Involvement of mitochondrial fission in renal tubular pyroptosis in mice exposed to high and environmental levels of glyphosate combined with hard water.

Cytotoxic effects on cancerous and non-cancerous cells of trans-cinnamaldehyde, carvacrol, and eugenol.

Synthesis, optical properties, determination and imaging in living cells and bamboo of cinnamaldehyde derivatives.

Effects of sodium arsenite and dimethyl arsenic acid on Liaoning cashmere goat skin fibroblasts.

Effects of atrazine short-term exposure on jumping ability and intestinal microbiota diversity in male *Pelophylax nigromaculatus* adults.

A dual electro-optical biosensor based on *Chlamydomonas reinhardtii* immobilised on paper-based nanomodified screen-printed electrodes for herbicide monitoring.

Efficient chemosensors for toxic pollutants based on photoluminescent Zn(ii) and Cd(ii) metal-organic networks.

Trans-cinnamaldehyde protects C2C12 myoblasts from DNA damage, mitochondrial dysfunction and apoptosis caused by oxidative stress through inhibiting ROS production.

Dietary glucose oxidase and/or catalase supplementation alleviates intestinal oxidative stress induced by diquat in weaned piglets.

Neurons die with heightened but functional macro- and chaperone mediated autophagy upon increased amyloid- β induced toxicity with region-specific protection in prolonged intermittent fasting.

Dinitramine induces cardiotoxicity and morphological alterations on zebrafish embryo development.

Passage Number-Induced Replicative Senescence Modulates the Endothelial Cell Response to Protein-Bound Uremic Toxins.

Discovery of a Potent and Selective JNK3 Inhibitor with Neuroprotective Effect Against Amyloid β -Induced Neurotoxicity in Primary Rat Neurons.

Human prostate epithelial cells and prostate-derived stem cells malignantly transformed in vitro with sodium arsenite show impaired Toll like receptor -3 (TLR3)-associated anti-tumor pathway.

Cardiac toxicity assessment of pendimethalin in zebrafish embryos.

Lipid metabolism disorders associated with dioxin exposure in a cohort of Chinese male workers revealed by a comprehensive lipidomics study.

Fluroxypyr-1-methylheptyl ester interferes with the normal embryogenesis of zebrafish by inducing apoptosis, inflammation, and neurovascular toxicity.

Fenofibrate, a peroxisome proliferator-activated receptor-alpha agonist, blocks steatosis and alters the inflammatory response in a mouse model of inflammation-dioxin interaction.

Dietary Selenium Deficiency Partially Mimics the Metabolic Effects of Arsenic.

Overexpression of miR-19a and miR-20a in iPS-MSCs preserves renal function of chronic kidney disease with acute ischaemia-reperfusion injury in rat.

Development of anti-acanthamoebic approaches.

Untargeted metabolomics and transcriptomics identified glutathione metabolism disturbance and PCS and TMAO as potential biomarkers for ER stress in lung.

Antioxidant and food additive BHA prevents TNF cytotoxicity by acting as a direct RIPK1 inhibitor.

Intravenous iron is non-inferior to oral iron regarding cell growth and iron metabolism in colorectal cancer associated with iron-deficiency anaemia.

Role of inhibiting Chk1-p53 pathway in hepatotoxicity caused by chronic arsenic exposure from coal-burning.

Unconjugated p-cresol activates macrophage macropinocytosis leading to increased LDL uptake.

Prolonged Low-Dose Dioxin Exposure Impairs Metabolic Adaptability to High-Fat Diet Feeding in Female but Not Male Mice.

Thidiazuron suppresses breast cancer via targeting miR-132 and dysregulation of the PI3K-Akt signaling pathway mediated by the miR-202-5p-PTEN axis.

Susceptibility to DNA damage caused by abrogation of Rad54 homolog B: A putative mechanism for chemically induced cleft palate.

Glycine-Conjugated Bile Acids Protect RPE Tight Junctions against Oxidative Stress and Inhibit Choroidal Endothelial Cell Angiogenesis In Vitro.

Role of aryl hydrocarbon receptor (AHR) in overall retinoid metabolism: Response comparisons to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure between wild-type and AHR knockout mice.

Inorganic arsenic induces sex-dependent pathological hypertrophy in the heart.

Cenobamate: Neuroprotective Potential of a New Antiepileptic Drug.

Attenuation of sodium arsenite-induced cardiotoxicity and neurotoxicity with the antioxidant, anti-inflammatory, and antiapoptotic effects of hesperidin.

Sustained high expression of NRF2 and its target genes induces dysregulation of cellular proliferation and apoptosis is associated with arsenite-induced malignant transformation of human bronchial epithelial cells.

Arsenite suppresses IL-2-dependent tumoricidal activities of natural killer cells.

Modulation of mutagenicity in *Salmonella typhimurium* and antioxidant properties and antiproliferative effects of fractions from *Cassia fistula* L. on human cervical HeLa and breast MCF-7 cancer cells.

TCDD attenuates EAE through induction of FasL on B cells and inhibition of IgG production.

Profiling of human burned bones: oxidising versus reducing conditions.

Uraemic toxins impair skeletal muscle regeneration by inhibiting myoblast proliferation, reducing myogenic differentiation, and promoting muscular fibrosis.

Kindlin-3 and RASSF6 are probable biomarkers for predicting metastasis in cutaneous melanoma.

Genetic Control of MAP3K1 in Eye Development and Sex Differentiation.

Overexpression of CERKL Protects Retinal Pigment Epithelium Mitochondria from Oxidative Stress Effects.

Metamitron, a Photosynthetic Electron Transport Chain Inhibitor, Modulates the Photoprotective Mechanism of Apple Trees.

Examining the ultraviolet optical screening tool as a viable means for delineating a contaminated organic sediment.

Suppression of apoptotic signaling in rat hepatocytes by non-dioxin-like polychlorinated biphenyls depends on the receptors CAR and PXR.

Resveratrol and its derivative pterostilbene attenuate oxidative stress-induced intestinal injury by improving mitochondrial redox homeostasis and function via SIRT1 signaling.

Sodium doped flaky carbon nitride with nitrogen defects for enhanced photoreduction carbon dioxide activity.

Endogenous regulation of the Akt pathway by the aryl hydrocarbon receptor (AhR) in lung fibroblasts.

Protective Effect of Dictyophora Polysaccharides on Sodium Arsenite-Induced Hepatotoxicity: A Proteomics Study.

Highly efficient and simultaneous catalytic reduction of multiple toxic dyes and nitrophenols waste water using highly active bimetallic PdO-NiO nanocomposite.

Exposure to acetochlor impairs swim bladder formation, induces heat shock protein expression, and promotes locomotor activity in zebrafish (*Danio rerio*) larvae.

Advanced Optical Sensing of Phenolic Compounds for Environmental Applications.

Short-Chain Fatty Acids Alleviate Hepatocyte Apoptosis Induced by Gut-Derived Protein-Bound Uremic Toxins.

Low-Dose Cyclophosphamide Induces Nerve Injury and Functional Overactivity in the Urinary Bladder of Rats.

Bone toxicity induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and the retinoid system: A causality analysis anchored in osteoblast gene expression and mouse data.

Bacillus amyloliquefaciens SC06 Induced AKT-FOXO Signaling Pathway-Mediated Autophagy to Alleviate Oxidative Stress in IPEC-J2 Cells.

Cimicifuga racemosa Extract Ze 450 Re-Balances Energy Metabolism and Promotes Longevity.

Construction and Validation of a Novel Immunosignature for Overall Survival in Uveal Melanoma.

ROCK1 Mediates Retinal Glial Cell Migration Promoted by Acrolein.

Chloramphenicol eye drops: ok to use in children younger than 2 years.

GDNF requires HIF-1 α and RET activation for suppression of programmed cell death of enteric neurons by metabolic challenge.

Benoxacor caused developmental and cardiac toxicity in zebrafish larvae.

P2X7 Receptor Blockade Protects Against Acrolein-Induced Bladder Damage: A Potential New Therapeutic Approach for the Treatment of Bladder Inflammatory Diseases.

Effects of Acute Diquat Poisoning on Liver Mitochondrial Apoptosis and Autophagy in Ducks.

Removal of a Past Varnish Treatment from a 19th-Century Belgian Wall Painting by Means of a Solvent-Loaded Double Network Hydrogel.

The impact of vaping on ocular health: a literature review.

Comparative evaluation of HET-CAM and ICE methods for objective assessment of ocular irritation caused by selected pesticide products.

Graphitic carbon nitride based mixed-phase bismuth nanostructures: Tuned optical and structural properties with boosted photocatalytic performance for wastewater decontamination under visible-light irradiation.

Photopolymerization performed under dark conditions using long-stored electrons in carbon nitride.

Water Pollutants p-Cresol Detection Based on Au-ZnO Nanoparticles Modified Tapered Optical Fiber.

Folic Acid as a Bimodal Optical Probe for the Detection of TNT.

Alcohol Dehydrogenases and N-Heterocyclic Carbene Gold(I) Catalysts: Design of a Chemoenzymatic Cascade towards Optically Active α,β -Disubstituted Allylic Alcohols.

Endocrine, metabolic and apical effects of in utero and lactational exposure to non-dioxin-like 2,2',3,4,4',5,5'-heptachlorobiphenyl (PCB 180): A postnatal follow-up study in rats.

LncRNA XIST Promoted OGD-Induced Neuronal Injury Through Modulating/miR-455-3p/TIPARP Axis.

Pendimethalin induces apoptosis in testicular cells via hampering ER-mitochondrial function and autophagy.

Aclonifen causes developmental abnormalities in zebrafish embryos through mitochondrial dysfunction and oxidative stress.

Optical Properties of Porous Alumina Assisted Niobia Nanostructured Films-Designing 2-D Photonic Crystals Based on Hexagonally Arranged Nanocolumns.

Ablation of Selenbp1 Alters Lipid Metabolism via the Ppar \pm Pathway in Mouse Kidney.

Hidroxi[®] Counteracts Cyclophosphamide-Induced Male Infertility through NRF2 Pathways in a Mouse Model.

Functional regulation of an outer retina hyporeflective band on optical coherence tomography images.

2,3,7,8-Tetrachlorodibenzo-p-dioxin exposure disrupts development of the visceral and ocular vasculature.

Detection of endocrine disrupting chemicals in Danio rerio and Daphnia pulex: Step-one, behavioral screen.

Corrigendum to "Aspirin eugenol ester ameliorates paraquat-induced oxidative damage through ROS/p38-MAPK-mediated mitochondrial apoptosis pathway" [Toxicology 453 (2021) 152721].

Dicopper(II) Complexes of p-Cresol-2,6-Bis(dpa) Amide-Tether Ligands: Large Enhancement of Oxidative DNA Cleavage, Cytotoxicity, and Mechanistic Insight by Intracellular Visualization.

In vivo comet assay in rabbit corneal epithelial cells following ocular instillation with genotoxic compounds.

Tetrahydroxystilbene glucoside protects against sodium azide-induced mitochondrial dysfunction in human neuroblastoma cells.

Photophysics of DFHBI bound to RNA aptamer Baby Spinach.

Self-referencing optical fiber pH sensor for marine microenvironments.

Flurochloridone induces Sertoli cell apoptosis through ROS-dependent mitochondrial pathway.

In vitro Regeneration of Clematis Plants in the Nikita Botanical Garden via Somatic Embryogenesis and Organogenesis.

Bach1 plays an important role in angiogenesis through regulation of oxidative stress.

Benfuresate induces developmental toxicity in zebrafish larvae by generating apoptosis and pathological modifications.

Selective beta-cell toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin on isolated pancreatic islets.

Lipidomics reveals multiple stressor effects (temperature & mitochondrial toxicant) in the zebrafish embryo toxicity test.

Tetrachlorobenzoquinone exposure triggers ferroptosis contributing to its neurotoxicity.

Quercetin Alleviates Oxidative Damage by Activating Nuclear Factor Erythroid 2-Related Factor 2 Signaling in Porcine Enterocytes.

Arsenic-induced HER2 promotes proliferation, migration and angiogenesis of bladder epithelial cells via activation of multiple signaling pathways in vitro and in vivo.

Identification of molecular toxicity pathways across early life-stages of zebrafish exposed to PCB126 using a whole transcriptomics approach.

PCB153 reduces apoptosis in primary cultures of murine pituitary cells through the activation of NF- κ B mediated by PI3K/Akt.

Disturbances in Microbial and Metabolic Communication across the Gut-Liver Axis Induced by a Dioxin-like Pollutant: An Integrated Metagenomics and Metabolomics Analysis.

Chlorogenic acid abates male reproductive dysfunction in arsenic-exposed mice via attenuation of testicular oxido-inflammatory stress and apoptotic responses.

Oleuropein attenuates the 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-perturbing effects on pancreatic β -cells.

Effects of cyhalofop-butyl on the developmental toxicity and immunotoxicity in zebrafish (*Danio rerio*).

Catecholic alkaloid sulfonates and aromatic nitro compounds from *Portulaca oleracea* and screening of their anti-inflammatory and anti-microbial activities.

Integrated ecotoxicological assessment of the complex interactions between chlorpyrifos and glyphosate on a non-target species *Cnesterodon decemmaculatus* (Jenyns, 1842).

Acrolein: A Potential Mediator of Oxidative Damage in Diabetic Retinopathy.

[Atrazine changes meiosis and reduces spermatogenesis in male mice].

A rabbit model for evaluating ocular damage from acrolein toxicity in vivo.

DP-22216-6 maize does not adversely affect rats in a 90-day feeding study.

Urinary crystal formation and urothelial effects of pyroxasulfone administered to male rats.

Effect of fomesafen on the embryonic development of zebrafish.

FoxF1 protects rats from paraquat-evoked lung injury following HDAC2 inhibition via the microRNA-342/KLF5/NF- κ B/p65 axis.

Chronic exposure of human glioblastoma tumors to low concentrations of a pesticide mixture induced multidrug resistance against chemotherapy agents.

Inhibition of the antioxidant enzyme PRDX1 activity promotes MPP(+)-induced death in differentiated SH-SY5Y cells and may impair its colocalization with eEF1A2.

Developmental toxicity of chlorpropham induces pathological changes and vascular irregularities in zebrafish embryos.

The scavenging capacity of \hat{I}^3 -aminobutyric acid for acrolein and the cytotoxicity of the formed adduct.

The PARK2 Mutation Associated with Parkinson's Disease Enhances the Vulnerability of Peripheral Blood Lymphocytes to Paraquat.

Hydrogen sulfide alleviates oxidative stress injury and reduces apoptosis induced by MPP(+) in Parkinson's disease cell model.

Systemic Paraquat Intoxication Presenting with Peripheral Ulcerative Keratitis: A Case Report and Literature Review.

Cichoric acid attenuates the toxicity of mesotrione. Effect on in vitro skin cell model.

Effect of glyphosate (Roundup Active[®]) on liver of tadpoles of the colombian endemic frog *Dendropsophus molitor* (amphibia: Anura).

[Study on the protective effect and mechanism of somatostatin on renal injury in paraquat intoxicated mice].

Increased basal antioxidant levels in RCAN1 - deficient mice lowers oxidative injury after acute paraquat insult.

Pterostilbene as a protective antioxidant attenuates diquat-induced liver injury and oxidative stress in 21-day-old broiler chickens.

Glyphosate induces lymphocyte cell dysfunction and apoptosis via regulation of miR-203 targeting of PIK3R1 in common carp (*Cyprinus carpio* L.).

Cytotoxic and genotoxic assessments of 2,4-dichlorophenoxyacetic acid (2,4-D) in in vitro mammalian cells.

[Role of microbial-derived antioxidants on diquat-induced oxidative stress, endoplasmic reticulum stress and function in mice].

Possible Protective Effects of TA on the Cancerous Effect of Mesotrione.

Environmental Pollution, Oxidative Stress and Thioretinaco Ozonide: Effects of Glyphosate, Fluoride and Electromagnetic Fields on Mitochondrial Dysfunction in Carcinogenesis, Atherogenesis and Aging.

Effects of cinnamaldehyde on anti-respiratory syncytial virus: A protocol of systematic review and meta-analysis.

Comparison of the effects of resveratrol and its derivative pterostilbene on hepatic oxidative stress and mitochondrial dysfunction in piglets challenged with diquat.

Effects of fertilization on the triafamone photodegradation in aqueous solution: Kinetic, identification of photoproducts and degradation pathway.

Adjuvant contributes Roundup's unexpected effects on A549 cells.

The endoplasmic reticulum stress and related signal pathway mediated the glyphosate-induced testosterone synthesis inhibition in TM3 cells.

Formation of di-cysteine acrolein adduct decreases cytotoxicity of acrolein by ROS alleviation and apoptosis intervention.

Environmentally relevant mixture of S-metolachlor and its two metabolites affects thyroid metabolism in zebrafish embryos.

Functionality and DNA-damage properties of blood cells in lactating cows exposed to glyphosate contaminated feed at different feed energy levels.

The Ocular Protective Effects of Nano/Submicron Particles Prepared from Lycium barbarum Fruits Against Oxidative Stress in an Animal Model.

Exposure to diclofop-methyl induces cardiac developmental toxicity in zebrafish embryos.

Where ferroptosis inhibitors and paraquat detoxification mechanisms intersect, exploring possible treatment strategies.

Design, Synthesis, and Herbicidal Activity of Novel Diphenyl Ether Derivatives Containing Fast Degrading Tetrahydrophthalimide.

Light and temperature influence on diuron bioaccumulation and toxicity in biofilms.

Characterization of a novel herbicide and antibiotic-resistant *Chlorella* sp. with an extensive extracellular matrix.

Soybean isoflavones prevent atrazine-induced neurodegenerative damage by inducing autophagy.

Acrolein-induced apoptosis of smooth muscle cells through NEAT1-Bmal1/Clock pathway and a protection from asparagus extract.

Glyphosate affects methylation in the promoter regions of selected tumor suppressors as well as expression of major cell cycle and apoptosis drivers in PBMCs (in vitro study).

Toxicity assessment of the herbicide acetochlor in the human liver carcinoma (HepG2) cell line.

Increased severity associated with tallowamine in acute glyphosate poisoning.

2,4-Dichlorophenoxyacetic Thiosemicarbazides as a New Class of Compounds Against Stomach Cancer Potentially Intercalating with DNA.

Genotoxicity of mixtures of glyphosate with 2,4-dichlorophenoxyacetic acid chemical forms towards *Cnesterodon decemmaculatus* (Pisces, Poeciliidae).

The surfactant polyethoxylated tallowamine (POEA) reduces lifespan and inhibits fecundity in *Drosophila melanogaster*- In vivo and in vitro study.

Seasonal variations in the dose-response relationship of acetylcholinesterase activity in freshwater fish exposed to chlorpyrifos and glyphosate.

Toxic effects of fluridone on early developmental stages of Japanese Medaka (*Oryzias latipes*).

The protective impact of Trans-Cinnamaldehyde (TCA) against the IL-1b induced inflammation in in vitro osteoarthritis model by regulating PI3K/AKT pathways.

Analysis of microRNA expression profiling during paraquat-induced injury of murine lung alveolar epithelial cells.

Toxicity of pesticides toward human immune cells U-937 and HL-60.

Secretogranin III upregulation is involved in parkinsonian toxin-mediated astroglia activation.

Morphoanatomical injuries in *Pistia stratiotes* L. (Araceae) as a result of exposure to clomazone in water.

Frequently encountered pesticides can cause multiple disorders in developing worker honey bees.

Involvement of ADAM10 in acrolein-induced astrocytic inflammation.

Evaluation of apoptotic potential of glyphosate metabolites and impurities in human peripheral blood mononuclear cells (in vitro study).

Environmentally relevant atrazine exposures cause DNA damage in cells of the lateral antennules of crayfish (*Faxonius virilis*).

Posterior reversible leukoencephalopathy after cyanamide overdose.

Protective Effects of Cinnamaldehyde against Mesenteric Ischemia-Reperfusion-Induced Lung and Liver Injuries in Rats.

Cinnamaldehyde Inhibits the Function of Osteosarcoma by Suppressing the Wnt/ β -Catenin and PI3K/Akt Signaling Pathways.

Pathological Role of Unsaturated Aldehyde Acrolein in Diabetic Retinopathy.

Endoplasmic reticulum stress-related neuroinflammation and neural stem cells decrease in mice exposure to paraquat.

Structural change and degradation of cytoskeleton due to the acrolein conjugation with vimentin and actin during brain infarction.

Cinnamaldehyde Attenuates the Progression of Rheumatoid Arthritis through Down-Regulation of PI3K/AKT Signaling Pathway.

Acrolein Aggravates Secondary Brain Injury After Intracerebral Hemorrhage Through Drp1-Mediated Mitochondrial Oxidative Damage in Mice.

Cinnamaldehyde induces endogenous apoptosis of the prostate cancer-associated fibroblasts via interfering the Glutathione-associated mitochondria function.

In Vitro Anticancer Effects of Cinnamomum verum J. Presl, Cinnamaldehyde, 4 Hydroxycinnamic Acid and Eugenol on an Oral Squamous Cell Carcinoma Cell Line.

Combination of ellagic acid and trans-cinnamaldehyde alleviates aging-induced cognitive impairment via modulation of mitochondrial function and inflammatory and apoptotic mediators in the prefrontal cortex of aged rats.

Cinnamaldehyde protects against rat intestinal ischemia/reperfusion injuries by synergistic inhibition of NF- κ B and p53.

Combination Therapy with Cinnamaldehyde and Hyperthermia Induces Apoptosis of A549 Non-Small Cell Lung Carcinoma Cells via Regulation of Reactive Oxygen Species and Mitogen-Activated Protein Kinase Family.

Cinnamaldehyde protects against oxidative stress and inhibits the TNF α -induced inflammatory response in human umbilical vein endothelial cells.

Klotho Alleviates Lung Injury Caused by Paraquat via Suppressing ROS/P38 MAPK-Regulated Inflammatory Responses and Apoptosis.

Effects of Cinnamaldehyde on the Viability and Expression of Chemokine Receptor Genes in Temozolomide-treated Glioma Cells.

trans-Cinnamaldehyde Prevents Oxidative Stress-Induced Apoptosis in V79-4 Chinese Hamster Lung Fibroblasts through the Nrf2-Mediated HO-1 Activation.

Three rare pathogenic mtDNA substitutions in LHON patients with low heteroplasmy.

Picomolar glyphosate sensitivity of an optical particle-based sensor utilizing biomimetic interaction principles.

A simple on-line detection system based on fiber-optic sensing for the realtime monitoring of fixed bed adsorption processes of molecularly imprinted polymers.

Suppression of water-bloom cyanobacterium Microcystis aeruginosa by algaecide hydrogen peroxide maximized through programmed cell death.

Protective effects of paeoniflorin on acrolein-induced apoptosis in H9c2 cardiomyocytes.

Low-dose Roundup induces developmental toxicity in bovine preimplantation embryos in vitro.

Acrolein exerts a genotoxic effect in the Leydig cells by stimulating DNA damage-induced apoptosis.

Adverse effects of atrazine, DCMU and metolachlor on phytoplankton cultures and communities at environmentally relevant concentrations using Fast Repetition Rate Fluorescence.

Combined cell death of co-exposure to aldehyde mixtures on human bronchial epithelial BEAS-2B cells: Molecular insights into the joint action.

Rapamycin attenuates the paraquat-induced pulmonary fibrosis through activating Nrf2 pathway.

Arsenic compounds activate the MAPK and caspase pathways to induce apoptosis in OECâ€™M1 gingival epidermal carcinoma.

Female mice exposed to low doses of dioxin during pregnancy and lactation have increased susceptibility to diet-induced obesity and diabetes.

IL-12p40 and sRAGE in serum correlate with chemically induced cleft palate in mice.

Role of sodium tetraborate as a cardioprotective or competitive agent: Modulation of hypertrophic intracellular signals.

Anti-Tumor Effects of Sodium Meta-Arsenite in Glioblastoma Cells with Higher Akt Activities.

Selenoprotein V protects against endoplasmic reticulum stress and oxidative injury induced by pro-oxidants.

Nephroprotective effects of chlorogenic acid against sodium arsenite-induced oxidative stress, inflammation, and apoptosis.

Comparison of the biological behaviors of palatal mesenchymal and epithelial cells induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in vitro.

Boron improves cardiac contractility and fibrotic remodeling following myocardial infarction injury.

Mechanisms and pathogenesis underlying environmental chemical-induced necroptosis.

Exposure to Oxadiazon-Butachlor causes cardiac toxicity in zebrafish embryos.

Effects of p-Cresol on Senescence, Survival, Inflammation, and Odontoblast Differentiation in Canine Dental Pulp Stem Cells.

Protein arginine methyltransferase-1 stimulates dopaminergic neuronal cell death in a Parkinson's disease model.

p-Cresol Sulfate Caused Behavior Disorders and Neurodegeneration in Mice with Unilateral Nephrectomy Involving Oxidative Stress and Neuroinflammation.

Investigation of the biochemical and apoptotic changes in breast cancer cells treated with leaf extract from tea (*Camellia sinensis* L.) grown with added boric acid.

Distinguishing mode of action of compounds inducing craniofacial malformations in zebrafish embryos to support dose-response modeling in combined exposures.

TCDD promotes liver fibrosis through disordering systemic and hepatic iron homeostasis.

Capsaicinoid nonivamide improves nonalcoholic fatty liver disease in rats fed a high-fat diet.

Overexpression of miR-455-5p affects retinol (vitamin A) absorption by downregulating STRA6 in a nitrofen-induced CDH with lung hypoplasia rat model.

Therapeutic potential of aryl hydrocarbon receptor ligands derived from natural products in rheumatoid arthritis.

Low Doses of Arsenic in a Mouse Model of Human Exposure and in Neuronal Culture Lead to S-Nitrosylation of Synaptic Proteins and Apoptosis via Nitric Oxide.

Oct4 plays a role in 2, 3, 7, 8 - tetrachlorobenzo-p-dioxin (TCDD) inducing cleft palate and inhibiting mesenchymal proliferation.

Aryl Hydrocarbon Receptor-Dependent inductions of omega-3 and omega-6 polyunsaturated fatty acid metabolism act inversely on tumor progression.

Role of Metallothionein-1 and Metallothionein-2 in the Neuroprotective Mechanism of Sevoflurane Preconditioning in Mice.

Low concentrations of sodium arsenite induce hepatotoxicity in prepubertal male rats.

Topical Ascorbic Acid Ameliorates Oxidative Stress-Induced Corneal Endothelial Damage via Suppression of Apoptosis and Autophagic Flux Blockage.

Metabolomic alternations of follicular fluid of obese women undergoing in-vitro fertilization treatment.

Taurocholic acid inhibits features of age-related macular degeneration in vitro.

Cardioprotective role of metformin against sodium arsenite-induced oxidative stress, inflammation, and apoptosis.

Synthesis of 2'-Deoxyuridine Modified with a 3,5-Difluoro-4-Methoxybenzylidene Imidazolinone Derivative for Incorporation into Oligonucleotide Probes for Detection of HER2 Breast Cancer Marker.

Is 1,8-Cineole-Rich Extract of Small Cardamom Seeds More Effective in Preventing Alzheimer's Disease than 1,8-Cineole Alone?

Antioxidative and antiapoptosis: Neuroprotective effects of dauricine in Alzheimer's disease models.

Chlorogenic acid prevents hepatotoxicity in arsenic-treated mice: role of oxidative stress and apoptosis.

Long-term metabolic consequences of acute dioxin exposure differ between male and female mice.

[The use of retinoids to stimulate the regenerative process in trepanation cavity after "open" sanitizing surgery on the middle ear].

Procyanidin B2 Suppresses Lipopolysaccharides-Induced Inflammation and Apoptosis in Human Type II Alveolar Epithelial Cells and Lung Fibroblasts.

Arsenic-induced immunomodulatory effects disorient the survival-death interface by stabilizing the Hsp90/Beclin1 interaction.

A promising "metastable" liquid crystal stationary phase for gas chromatography.

Optical sensor film for metribuzin pesticide detection.

Uremic toxins promote accumulation of oxidized protein and increased sensitivity to hydrogen peroxide in endothelial cells by impairing the autophagic flux.

In vitro effects of PNP and PNMC on apoptosis and proliferation in the hen ovarian stroma and prehierarchal follicles.

Paraquat Reduces the Female Fertility by Impairing the Oocyte Maturation in Mice.

HspB5 protects mouse neural stem/progenitor cells from paraquat toxicity.

A Paper-Based Analytical Device for Analysis of Paraquat in Urine and Its Validation with Optical-Based Approaches.

The Protective Effect of Aspirin Eugenol Ester on Paraquat-Induced Acute Liver Injury Rats.

Wearable Bracelet Monitoring the Solar Ultraviolet Radiation for Skin Health Based on Hybrid IPN Hydrogels.

Holly (*Ilex latifolia* Thunb.) Polyphenols Extracts Alleviate Hepatic Damage by Regulating Ferroptosis Following Diquat Challenge in a Piglet Model.

Anisotropic Optical Shock Waves in Isotropic Media with Giant Nonlocal Nonlinearity.

In Vitro and In Vivo Inhibitory Effect of Citrus Junos Tanaka Peel Extract against Oxidative Stress-Induced Apoptotic Death of Lung Cells.

Telomeric injury by KML001 in human T cells induces mitochondrial dysfunction through the p53-PGC-1 β pathway.

An aryl hydrocarbon receptor agonist suppresses the growth of human umbilical vein endothelial cells in vitro: Potent effect with polyunsaturated fatty acids.

New insights into toxic effects of arsenate on four *Microcystis* species under different phosphorus regimes.

Aspirin Eugenol Ester Protects Vascular Endothelium From Oxidative Injury by the Apoptosis Signal Regulating Kinase-1 Pathway.

Uremic toxic substances are essential elements for enhancing carotid artery stenosis after balloon-induced endothelial denudation: worsening role of the adventitial layer.

Emerging contaminant 1,3,6,8-tetrabromocarbazole induces oxidative damage and apoptosis during the embryonic development of zebrafish (*Danio rerio*).

Screening of Bioactive Metabolites and Biological Activities of Calli, Shoots, and Seedlings of *Mertensia maritima* (L.) Gray.

Laser-Based Synthesis of Au Nanoparticles for Optical Sensing of Glyphosate: A Preliminary Study.

Aspirin Eugenol Ester Attenuates Paraquat-Induced Hepatotoxicity by Inhibiting Oxidative Stress.

Behavioral Tests in Neurotoxin-Induced Animal Models of Parkinson's Disease.

Effect of Ubiquinol on Glaucomatous Neurodegeneration and Oxidative Stress: Studies for Retinal Ganglion Cell Survival and/or Visual Function.

Effects of curcumin, D-pinitol alone or in combination in cytotoxicity induced by arsenic in PC12 cells.

Nanometer accuracy statistical interferometric technique in monitoring the short-term effects of exogenous plant hormones, auxin and gibberellic acid, on rice plants.

Assessment of arsenic-induced modifications in the DNA methylation of insulin-related genes in rat pancreatic islets.

Dietary Iron Overload Differentially Modulates Chemically-Induced Liver Injury in Rats.

A General Strategy for the Construction of NIR-emitting Si-rhodamines and Their Application for Mitochondrial Temperature Visualization.

In vitro administration of sodium arsenite in mouse prepubertal testis induces germ cell loss and apoptosis.

Adverse effects of pesticides on the functions of immune system.

Protective Effect of Fenofibrate on Oxidative Stress-Induced Apoptosis in Retinal-Choroidal Vascular Endothelial Cells: Implication for Diabetic Retinopathy Treatment.

Aqueous Humor Outflow Requires Active Cellular Metabolism in Mice.

P-cresyl sulfate causes mitochondrial hyperfusion in H9C2 cardiomyoblasts.

Visual system: An understudied target of aquatic toxicology.

Introducing of potent cytotoxic novel 2-(aroylamino)cinnamamide derivatives against colon cancer mediated by dual apoptotic signal activation and oxidative stress.

Mitigation of arsenic driven utero-ovarian malfunction and changes of apoptotic gene expression by dietary NAC.

PINK1/Parkin-mediated mitophagy is involved in NaAsO₂-induced apoptosis of human hepatic cells through activation of ERK signaling.

Assessment irradiation effects on different development stages of *Callosobruchus maculatus* and on chemical, physical and microbiological quality of cowpea seeds.

Piceatannol Ameliorates Hepatic Oxidative Damage and Mitochondrial Dysfunction of Weaned Piglets Challenged with Diquat.

Benzothiadiazole bridged EDOT based donor-acceptor polymers with tunable optical, electrochemical, morphological and electrochromic performance: effects of solvents and electrolytes.

Uroprotective mechanisms of natural products against cyclophosphamide-induced urinary bladder toxicity: A comprehensive review.

Orbencarb induces lethality and organ malformation in zebrafish embryos during development.

Causes and possibilities to circumvent cyclophosphamide toxicity.

Platelet-Rich Fibrin Can Neutralize Hydrogen Peroxide-Induced Cell Death in Gingival Fibroblasts.

Regulation of Spermine Oxidase through Hypoxia-Inducible Factor-1 α Signaling in Retinal Glial Cells under Hypoxic Conditions.

[Injury of L-02 hepatocytes induced by NaAsO₂ is related to down-regulated expression of p14ARF and increased expression of MDM2 and p53].

Polydatin relieves paraquat-induced human MRC-5 fibroblast injury through inhibiting the activation of the NLRP3 inflammasome.

Resource-Efficient Low-Temperature Synthesis of Microcrystalline Pb(2) B(5) O(9) X (X = Cl, Br) for Surfaces Studies by Optical Second Harmonic Generation.

Multigenerational and transgenerational effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on ovarian reserve and follicular development through AMH/AMHR2 pathway in adult female rats.

Defining embryonic developmental effects of chemical mixtures using the embryonic stem cell test.

N,O-Nucleoside Analogues: Metabolic and Apoptotic Activity.

Access to Optically Enriched α -Aryloxy-carboxylic Esters via Carbene-Catalyzed Dynamic Kinetic Resolution and Transesterification.

Arsenic represses airway epithelial mucin expression by affecting retinoic acid signaling pathway.

Sarcoidosis: Causes, Diagnosis, Clinical Features, and Treatments.

Dietary exposure to pesticide residues and associated health risks in infants and young children - Results of the French infant total diet study.

Role of the MAPK pathway in human lung epithelial-like A549 cells apoptosis induced by paraquat.

Novel Aspects of Toxicity Mechanisms of Dioxins and Related Compounds.

Selenium-Enriched Yeast Alleviates Oxidative Stress-Induced Intestinal Mucosa Disruption in Weaned Pigs.

Chronic methyl bromide toxicity is ameliorated by haemodialysis.

Retina-Inspired Carbon Nitride-Based Photonic Synapses for Selective Detection of UV Light.

Cigarette smoke extract induces ferroptosis in vascular smooth muscle cells.

Lactobacillus probiotics improved the gut microbiota profile of a Drosophila melanogaster Alzheimer's disease model and alleviated neurodegeneration in the eye.

Protective Effect of the Aqueous Extract of Deschampsia antarctica (EDAFENCE(®)) on Skin Cells against Blue Light Emitted from Digital Devices.

Evaluation of the Effects of Agro Pesticides Use on Liver and Kidney Function in Farmers from Buea, Cameroon.

In-Vivo Optical Monitoring of the Efficacy of Epidermal Growth Factor Receptor Targeted Photodynamic Therapy: The Effect of Fluence Rate.

Novel imaging biomarkers for mapping the impact of mild mitochondrial uncoupling in the outer retina in vivo.

Glycyrrhizic acid modulates the atrazine-induced apoptosis in rabbit spleen.

Physiologically Based Pharmacokinetic Modeling of Salivary Concentrations for Noninvasive Biomonitoring of 2,4-Dichlorophenoxyacetic Acid (2,4-D).

Curcumin relieves paraquat-induced lung injury through inhibiting the thioredoxin interacting protein/NLR pyrin domain containing 3-mediated inflammatory pathway.

Effects of environmental chemicals on the proliferation and differentiation of neural stem cells.

The toxic effects and possible mechanisms of glyphosate on mouse oocytes.

Single and joint effects of chronic exposure to chlorpyrifos and glyphosate based pesticides on structural biomarkers in *Cnesterodon decemmaculatus*.

Investigation of comet assays under conditions mimicking ocular instillation administration in a three-dimensional reconstructed human corneal epithelial model.

Autophagy Stimulation Decreases Dopaminergic Neuronal Death Mediated by Oxidative Stress.

Diuron exposure and Akt overexpression promote glioma formation through DNA hypomethylation.

Atrazine induces necroptosis by miR-181-5p targeting inflammation and glycometabolism in carp lymphocytes.

Protective effect of *Ganoderma atrum* polysaccharide on acrolein-induced macrophage injury via autophagy-dependent apoptosis pathway.

N-acetylcysteine alleviated paraquat-induced mitochondrial fragmentation and autophagy in primary murine neural progenitor cells.

The Analysis of Bifenox and Dichlobenil Toxicity in Selected Microorganisms and Human Cancer Cells.

The Growth, Apoptosis and Oxidative Stress in *Microcystis viridis* Exposed to Glyphosate.

Ghrelin ameliorates A549 cell apoptosis caused by paraquat via p38-MAPK regulated mitochondrial apoptotic pathway.

Paraquat induced impaired reproductive function and modulation of retinal and extra-retinal photoreceptors in Japanese quail (*Coturnix coturnix japonica*).

Reprotoxicity of glyphosate-based formulation in *Caenorhabditis elegans* is not due to the active ingredient only.

Effect of endoplasmic reticulum calcium on paraquat-induced apoptosis of human lung type II alveolar epithelial A549 cells.

Xenobiotic mediated diabetogenesis: Developmental exposure to dichlorvos or atrazine leads to type 1 or type 2 diabetes in *Drosophila*.

Melatonin protects against Fenoxaprop-ethyl exposure-induced meiotic defects in mouse oocytes.

Roundup(®) confers cytotoxicity through DNA damage and Mitochondria-Associated apoptosis induction.

Paraquat exposure delays stem/progenitor Leydig cell regeneration in the adult rat testis.

Transcriptome responses to the natural phytotoxin t-chalcone in *Arabidopsis thaliana* L.

Milli-channel array for direct and quick reading of root elongation bioassays.

Conserved roles of glucose in suppressing reactive oxygen species-induced cell death and animal survival.

Activation of the N-methyl-d-aspartate receptor is involved in glyphosate-induced renal proximal tubule cell apoptosis.

Cytotoxic activity of pentachlorophenol and its active metabolites in SH-SY5Y neuroblastoma cells.

Detoxification, Apoptosis, and Immune Transcriptomic Responses of the Gill Tissue of Bay Scallop Following Exposure to the Algicide Thiazolidinedione 49.

Auxinic herbicides induce oxidative stress on *Cnesterodon decemmaculatus* (Pisces: Poeciliidae).

A new split-luciferase complementation assay identifies pentachlorophenol as an inhibitor of apoptosome formation.

Prenatal exposure to the herbicide 2,4-D is associated with deficits in auditory processing during infancy.

NF- κ B/mTOR-mediated autophagy can regulate diquat-induced apoptosis.

Perinatal Exposure to Glyphosate and a Glyphosate-Based Herbicide Affect Spermatogenesis in Mice.

Use of Pesticides and Health Risk among Farmers in Sunsari District, Nepal.

Melittin Exerts Beneficial Effects on Paraquat-Induced Lung Injuries In Mice by Modifying Oxidative Stress and Apoptosis.

TLR3 is involved in paraquat-induced acute renal injury.

Inhibitory effects of flavonoids on P-glycoprotein in vitro and in vivo: Food/herb-drug interactions and structure-activity relationships.

Mesenchymal Stem Cells Alleviate Acute Lung Injury and Inflammatory Responses Induced by Paraquat Poisoning.

Role of bone marrow mesenchymal stem cells in the development of PQ-induced pulmonary fibrosis.

NADPH oxidase regulates paraquat and maneb-induced dopaminergic neurodegeneration through ferroptosis.

High-Dose Paraquat Induces Human Bronchial 16HBE Cell Death and Aggravates Acute Lung Intoxication in Mice by Regulating Keap1/p65/Nrf2 Signal Pathway.

Inhibition of MAPKs Signaling Pathways Prevents Acrolein-Induced Neurotoxicity in HT22 Mouse Hippocampal Cells.

Paraquat affects the differentiation of neural stem cells and impairs the function of vascular endothelial cells: a study of molecular mechanism.

2,4-Dichlorophenoxyacetic acid containing herbicide impairs essential visually guided behaviors of larval fish.

The Critical Role of X Chromosome-Linked Inhibitor of Apoptosis (XIAP) in Differential Synergism Induced by Pentachlorophenol and Copper-1,10-Phenanthroline Complex in Normal and Cancer Liver Cells.

Protective effects of 3 β -angeloyloxy-8 β , 10 β -dihydroxyremophila-7(11)-en-12, 8 β -lactone on paraquat-induced oxidative injury in SH-SY5Y cells.

Quantitative and Site-Specific Chemoproteomic Profiling of Targets of Acrolein.

How reliable are in vitro IC(50) values? Values vary with cytotoxicity assays in human glioblastoma cells.

Clethodim exposure induces developmental immunotoxicity and neurobehavioral dysfunction in zebrafish embryos.

Fenoxaprop-ethyl affects mouse oocyte quality and the underlying mechanisms.

Visible photodegradation of ibuprofen and 2,4-D in simulated waste water using sustainable metal free-hybrids based on carbon nitride and biochar.

The effects of 100-3 fish oil emulsion-based parenteral nutrition plus combination treatment for acute paraquat poisoning.

Exogenous Tetranectin Protects Against 1-Methyl-4-Phenylpyridine-Induced Neurotoxicity by Inhibiting Apoptosis and Autophagy Through Ribosomal Protein S6 Kinase Beta-1.

Sodium tanshinone IIA sulfate protects myocardium against paraquat-induced toxicity through activating the Nrf2 signaling pathway in rats.

Linalool- and β -terpineol-induced programmed cell death in *Chlamydomonas reinhardtii*.

Atrazine exposure triggers common carp neutrophil apoptosis via the CYP450s/ROS pathway.

Cinnamaldehyde inhibits *Candida albicans* growth by causing apoptosis and its treatment on vulvovaginal candidiasis and oropharyngeal candidiasis.

Cinnamaldehyde enhances apoptotic effect of oxaliplatin and reverses epithelial-mesenchymal transition and stemness in hypoxic colorectal cancer cells.

Effect of Fenofibrate on the Expression of Inflammatory Mediators in a Diabetic Rat Model.

Effect of Vasicinone against Paraquat-Induced MAPK/p53-Mediated Apoptosis via the IGF-1R/PI3K/AKT Pathway in a Parkinson's Disease-Associated SH-SY5Y Cell Model.

Cinnamaldehyde Ameliorates High-Glucose-Induced Oxidative Stress and Cardiomyocyte Injury Through Transient Receptor Potential Ankyrin 1.

[Cinnamaldehyde attenuates lipopolysaccharide induced inflammation and apoptosis in human umbilical vein endothelial cells].

Paraquat Preferentially Induces Apoptosis of Late Stage Effector Lymphocyte and Impairs Memory Immune Response in Mice.

trans-Cinnamaldehyde mitigated intestinal inflammation induced by *Cronobacter sakazakii* in newborn mice.

Selective mitochondrial superoxide generation in vivo is cardioprotective through hormesis.

Upregulated lncRNA small nucleolar RNA host gene 1 promotes 1-methyl-4-phenylpyridinium ion-induced cytotoxicity and reactive oxygen species production through miR-15b-5p/GSK3 β axis in human dopaminergic SH-SY5Y cells.

Acid-responsive nanoparticles as a novel oxidative stress-inducing anticancer therapeutic agent for colon cancer.

Urinary acrolein metabolite levels in severe acute alcoholic hepatitis patients.

Response of DNA damage genes in acrolein-treated lung adenocarcinoma cells.

The potential role of acrolein in plant ferroptosis-like cell death.

In-situ photopolymerized polyhedral oligomeric silsesquioxane-derived monolithic capillary columns with quinidine functionality for enantioseparation by nano-liquid chromatography.

Short-term developmental toxicity and potential mechanisms of the herbicide metamifop to zebrafish (*Danio rerio*) embryos.

Superoxide-hydrogen peroxide imbalance differentially modulates the keratinocytes cell line (HaCaT) oxidative metabolism via Keap1-Nrf2 redox signaling pathway.

Auxin protects *Arabidopsis thaliana* cell suspension cultures from programmed cell death induced by the cellulose biosynthesis inhibitors thaxtomin A and isoxaben.

Short-chain lipid peroxidation products form covalent adducts with pyruvate kinase and inhibit its activity in vitro and in breast cancer cells.

Unsaturated Aldehyde Acrolein Promotes Retinal Glial Cell Migration.

Forkhead box O3 protects the heart against paraquat-induced aging-associated phenotypes by upregulating the expression of antioxidant enzymes.

Anti-cancer effects of cinnamon: Insights into its apoptosis effects.

2,4-D causes oxidative stress induction and apoptosis in human dental pulp stem cells (hDPSCs).

Regulating intracellular ROS signal by a dual pH/reducing-responsive nanogels system promotes tumor cell apoptosis.

An eco-designed paper-based algal biosensor for nanoformulated herbicide optical detection.

Chlorogenic acid prevents paraquat-induced apoptosis via Sirt1-mediated regulation of redox and mitochondrial function.

Atrazine or bisphenol A mediated negative modulation of mismatch repair gene, mlh1 leads to defective oogenesis and reduced female fertility in *Drosophila melanogaster*.

Towards integrated multi-sensor platform using dual electrochemical and optical detection for on-site pollutant detection in water.

Redox-dependent catalase mimetic cerium oxide-based nanozyme protect human hepatic cells from 3-AT induced acatalasemia.

Amplification of Oxidative Stress in MCF-7 Cells by a Novel pH-Responsive Amphiphilic Micellar System Enhances Anticancer Therapy.

Effective attenuation of glyphosate-induced oxidative stress and granulosa cell apoptosis by vitamins C and E in caprines.

Transgenerational impairment of ovarian induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) associated with Igf2 and H19 in adult female rat.

The gut microbiota and its relationship with chronic kidney disease.

Dioxin-like (DL-) polychlorinated biphenyls induced immunotoxicity through apoptosis in mice splenocytes via the AhR mediated mitochondria dependent signaling pathways.

LncRNA-241 inhibits 1,2-Dichloroethane-induced hepatic apoptosis.

Lesion of the Locus Coeruleus Damages Learning and Memory Performance in Paraquat and Maneb-induced Mouse Parkinson's Disease Model.

Common differentially expressed proteins were found in mouse cleft palate models induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin and retinoic acid.

NLRX1 Regulation Following Acute Mitochondrial Injury.

Creatine is Neuroprotective to Retinal Neurons In Vitro But Not In Vivo.

Borax Alleviates Copper-Induced Renal Injury via Inhibiting the DNA Damage and Apoptosis in Rainbow Trout.

Flow Cytometry Reveals the Nature of Oncotic Cells.

Gene expression and DNA methylation regulation of arsenic in mouse bladder tissues and in human urothelial cells.

Dietary CCPS from bitter melon attenuates sodium arsenite induced female reproductive ailments cum infertility in wistar rats: anti-inflammatory and anti-apoptotic role.

Targetome analysis of chaperone-mediated autophagy in cancer cells.

Divergent Synthesis and Evaluation of the in vitro Cytotoxicity Profiles of 3,4-Ethylenedioxythiophenyl-2-propen-1-one Analogues.

Suppression of the photoparoxysmal response in photosensitive epilepsy with cenobamate (YKP3089).

Gene expression alterations of human liver cancer cells following borax exposure.

Arsenic and sulfur dioxide co-exposure induce renal injury via activation of the NF- κ B and caspase signaling pathway.

Disruption of Telomere Integrity and DNA Repair Machineries by KML001 Induces T Cell Senescence, Apoptosis, and Cellular Dysfunctions.

In Vitro Study of the Anticancer Effects of Biotechnological Extracts of the Endangered Plant Species *Satureja Khuzistanica*.

High temperature aggravates the effects of pesticides in goldfish.

Sodium arsenite augments sensitivity of *Echinococcus granulosus* protoscoleces to albendazole.

Pulmonary hypertension secondary to congenital diaphragmatic hernia: factors and pathways involved in pulmonary vascular remodeling.

Aryl hydrocarbon receptor (AHR) functions in NAD(+) metabolism, myelopoiesis and obesity.

Intracellular Fe(2+) accumulation in endothelial cells and pericytes induces blood-brain barrier dysfunction in secondary brain injury after brain hemorrhage.

Mangiferin alleviates arsenic induced oxidative lung injury via upregulation of the Nrf2-HO1 axis.

2,3,7,8-tetrachlorodibenzo-p-dioxin suppresses the growth of human colorectal cancer cells in vitro: Implication of the aryl hydrocarbon receptor signaling.

Role of thymoquinone and ebselen in the prevention of sodium arsenite-induced nephrotoxicity in female rats.

Role of Aryl Hydrocarbon Receptor (AhR) in the Regulation of Immunity and Immunopathology During *Trypanosoma cruzi* Infection.

Development of iron(II) sulfate nanoparticles produced by hot-melt extrusion and their therapeutic potentials for colon cancer.

Sodium azide induces mitochondria-mediated apoptosis in PC12 cells through Pgc-1-associated signaling pathway.

hsa-miR-500a-3P alleviates kidney injury by targeting MLKL-mediated necroptosis in renal epithelial cells.

Exposure to 3-methyl-4-nitrophenol facilitates development of intestinal allergy.

Aryl hydrocarbon receptor pathway participates in myocardial ischemia reperfusion injury by regulating mitochondrial apoptosis.

Tropolone-induced effects on the unfolded protein response pathway and apoptosis in multiple myeloma cells are dependent on iron.

A ruthenium(II) complex containing a p-cresol group induces apoptosis in human cervical carcinoma cells through endoplasmic reticulum stress and reactive oxygen species production.

Cytotoxic and genotoxic effect of oxyfluorfen on hemocytes of *Biomphalaria glabrata*.

Targeted deletion of the aryl hydrocarbon receptor in dendritic cells prevents thymic atrophy in response to dioxin.

TUDCA-Treated Mesenchymal Stem Cells Protect against ER Stress in the Hippocampus of a Murine Chronic Kidney Disease Model.

Endoplasmic reticulum stress response is activated in pulmonary hypoplasia secondary to congenital diaphragmatic hernia, but is decreased by administration of amniotic fluid stem cells.

Assessment of the nitrofen model of congenital diaphragmatic hernia and of the dysregulated factors involved in pulmonary hypoplasia.

Novel metabolites from *Trichoderma atroviride* against human prostate cancer cells and their inhibitory effect on *Helicobacter pylori* and Shigella toxin producing *Escherichia coli*.

Long-term arsenite exposure induces testicular toxicity by redox imbalance, G2/M cell arrest and apoptosis in mice.

Ameliorative effects of crocin on paraquat-induced oxidative stress in testis of adult mice: An experimental study.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) Disrupts Control of Cell Proliferation and Apoptosis in a Human Model of Adult Liver Progenitors.

Catalpol protects against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced cytotoxicity in osteoblastic MC3T3-E1 cells.

Synthesis of Pyridyl and N-Methylpyridinium Analogues of Rosamines: Relevance of Solvent and Charge on Their Photophysical Properties.

Combination of yeast-based *in vitro* screens with high-performance thin-layer chromatography as a novel tool for the detection of hormonal and dioxin-like compounds.

Anthropogenic contaminants of high concern: Existence in water resources and their adverse effects.

Synthesis, photophysical and photobiological characterization of BSA nanoparticles loaded with chloroaluminium phthalocyanine by one-step desolvation technique for photodynamic therapy action.

Weed Detection in Perennial Ryegrass With Deep Learning Convolutional Neural Network.

8-Formyllophipogonanone B Antagonizes Paraquat-Induced Hepatotoxicity by Suppressing Oxidative Stress.

Botrysphin D attenuates arsenic-induced oxidative stress in human lung epithelial cells via activating Nrf2/ARE signaling pathways.

Nrf2-regulated miR-380-3p Blocks the Translation of Sp3 Protein and Its Mediation of Paraquat-Induced Toxicity in Mouse Neuroblastoma N2a Cells.

Sensitive monitoring of RNA transcription by optical amplification of cationic conjugated polymers.

Probiotic *Bacillus* Attenuates Oxidative Stress- Induced Intestinal Injury via p38-Mediated Autophagy.

Neuroprotective effects of anthocyanins and its major component cyanidin-3-O-glucoside (C3G) in the central nervous system: An outlined review.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the differentiation of embryonic stem cells towards pancreatic lineage and pancreatic beta cell function.

Subcellular Targets of Zinc Oxide Nanoparticles During the Aging Process: Role of Cross-talk Between Mitochondrial Dysfunction and Endoplasmic Reticulum Stress in the Genotoxic Response.

Optical generation and control of spatial Riemann waves.

Photodegradation of Myrigalone A, an Allelochemical from *Myrica gale*: Photoproducts and Effect of Terpenes.

Arsenic compounds induce apoptosis through caspase pathway activation in MA-10 Leydig tumor cells.

In-Depth Assessment of the Effect of Sodium Azide on the Optical Properties of Dissolved Organic Matter.

Effect of the SSeCKS-TRAF6 interaction on gastrodin-mediated protection against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced astrocyte activation and neuronal death.

Neuroprotective Role of Selected Antioxidant Agents in Preventing Cisplatin-Induced Damage of Human Neurons In Vitro.

ADAM28 dramatically regulates the biological features of human gingival fibroblasts.

The protective effects of bone mesenchymal stem cells on paraquat-induced acute lung injury via the muc5b and ERK/MAPK signaling pathways.

In vitro investigation to explore the toxicity of different groups of pesticides for an agronomically important rhizosphere isolate *Azotobacter vinelandii*.

Synthesis, characterization, and application of chemically interconnected carbon nanotube monolithic sorbents by photopolymerization in polypropylene caps.

Dioxin and Related Compound Detection: Perspectives for Optical Monitoring.

Flavin Oxidase-Induced ROS Generation Modulates PKC Biphasic Effect of Resveratrol on Endothelial Cell Survival.

Direct readout protonophore induced selective uncoupling and dysfunction of individual mitochondria within cancer cells.

A Nutraceutical Strategy to Slowing Down the Progression of Cone Death in an Animal Model of Retinitis Pigmentosa.

Exposure to arsenic during embryogenesis impairs olfactory sensory neuron differentiation and function into adulthood.

Epidemiology of ocular surface squamous neoplasia in veterans: a retrospective case-control study.

Mitochondria and Nuclei Dual-Targeted Hollow Carbon Nanospheres for Cancer Chemophotodynamic Synergistic Therapy.

Enhancing Rose Bengal-Photosensitized Protein Crosslinking in the Cornea.

Protective Effect of Hesperidin on Sodium Arsenite-Induced Nephrotoxicity and Hepatotoxicity in Rats.

Next-generation sequencing for the detection of microorganisms present in human donor corneal preservation medium.

An In Vitro Study on Mitochondrial Compensatory Response Induced by Gliadin Peptides in Caco-2 Cells.

Effects of acetochlor on neurogenesis and behaviour in zebrafish at early developmental stages.

Synthesis and preclinical evaluation of the CRTH2 antagonist [(11)C]MK-7246 as a novel PET tracer and potential surrogate marker for pancreatic beta-cell mass.

Alpha-lipoic acid attenuates p-cresyl sulfate-induced renal tubular injury through suppression of apoptosis and autophagy in human proximal tubular epithelial cells.

Characterization of the Photophysical Behavior of DFHBI Derivatives: Fluorogenic Molecules that Illuminate the Spinach RNA Aptamer.

Depressive Symptoms After PCB Exposure: Hypotheses for Underlying Pathomechanisms via the Thyroid and Dopamine System.

Excessive Reactive Iron Impairs Hematopoiesis by Affecting Both Immature Hematopoietic Cells and Stromal Cells.

Identification of photoproducts of florasulam in water using UPLC-QTOF-MS.

ABA promotes starch synthesis and storage metabolism in dormant grapevine buds.

Enhancement of corneal epithelium cell survival, proliferation and migration by red light: Relevance to corneal wound healing.

Neuroprotective effects of baicalein in animal models of Parkinson's disease: A systematic review of experimental studies.

Cilostazol Attenuates Retinal Oxidative Stress and Inflammation in a Streptozotocin-Induced Diabetic Animal Model.

TRPA1 Channel as a Regulator of Neurogenic Inflammation and Pain: Structure, Function, Role in Pathophysiology, and Therapeutic Potential of Ligands.

Molecular mechanism involved in cyclophosphamide-induced cardiotoxicity: Old drug with a new vision.

Acute glufosinate-based herbicide treatment in rats leads to increased ocular interleukin-1 β and c-Fos protein levels, as well as intraocular pressure.

BubR1 Is Essential for Thio-Dimethylarsinic Acid-Induced Spindle Assembly Checkpoint and Mitotic Cell Death for Preventing the Accumulation of Abnormal Cells.

Sperm Quality in Mouse After Exposure to Low Doses of TCDD.

Taurine rescues the arsenic-induced injury in the pancreas of rat offsprings and in the INS-1 cells.

Apigenin reverses lung injury and immunotoxicity in paraquat-treated mice.

Bacopa monnieri alleviates paraquat induced toxicity in Drosophila by inhibiting jnk mediated apoptosis through improved mitochondrial function and redox stabilization.

Atrazine induced oxidative stress and mitochondrial dysfunction in quail (*Coturnix C. coturnix*) kidney via modulating Nrf2 signaling pathway.

Differences in apoptotic signaling and toxicity between dimethylmonothioarsinic acid (DMMTA(V)) and its active metabolite, dimethylarsinous acid (DMA(III)), in HepaRG cells: Possibility of apoptosis cascade based on diversity of active metabolites of DMMTA(V).

Genotoxicity by long-term exposure to the auxinic herbicides 2,4-dichlorophenoxyacetic acid and dicamba on *Cnesterodon decemmaculatus* (Pisces: Poeciliidae).

Immunofluorescence/fluorescence assessment of brain-derived neurotrophic factor, c-Fos activation, and apoptosis in the brain of zebrafish (*Danio rerio*) larvae exposed to glufosinate.

LGK974, a PORCUPINE inhibitor, mitigates cytotoxicity in an in vitro model of Parkinson's disease by interfering with the WNT/ β -CATENIN pathway.

Evaluating Mode of Action of Acrolein Toxicity in an In Vitro Human Airway Tissue Model.

Atrazine hinders PMA-induced neutrophil extracellular traps in carp via the promotion of apoptosis and inhibition of ROS burst, autophagy and glycolysis.

Involvement of PINK1/Parkin-mediated mitophagy in paraquat- induced apoptosis in human lung epithelial-like A549 cells.

Müller glial dysfunction during diabetic retinopathy in rats is reduced by the acrolein-scavenging drug, 2-hydrazino-4,6-dimethylpyrimidine.

Pendimethalin-induced oxidative stress, DNA damage and activation of anti-inflammatory and apoptotic markers in male rats.

Modification of Wnt signaling pathway on paraquat-induced inhibition of neural progenitor cell proliferation.

Paraquat-induced inflammatory response of microglia through HSP60/TLR4 signaling.

Toxicity induced by glyphosate and glyphosate-based herbicides in the zebrafish hepatocyte cell line (ZF-L).

A commercial Roundup® formulation induced male germ cell apoptosis by promoting the expression of XAF1 in adult mice.

Protective effects of curcumin on acrolein-induced neurotoxicity in HT22 mouse hippocampal cells.

LC3-II may mediate ATR-induced mitophagy in dopaminergic neurons through SQSTM1/p62 pathway.

Acrolein induces ribotoxic stress in human cancer cells regardless of p53 status.

Acrolein-induced autophagy-dependent apoptosis via activation of the lysosomal-mitochondrial pathway in EAhy926 cells.

NF- κ B/p53-activated inflammatory response involves in diquat-induced mitochondrial dysfunction and apoptosis.

Inorganic arsenic exposure increased expression of Fas and Bax gene in vivo and vitro.

Atrazine promotes immunomodulation by melanomacrophage centre alterations in spleen and vascular disorders in gills from *Oreochromis niloticus*.

Naringin protects acrolein-induced pulmonary injuries through modulating apoptotic signaling and inflammation signaling pathways in mice.

Acrolein, a commonly found environmental toxin, causes oocyte mitochondrial dysfunction and negatively affects embryo development.

Opposite effects of mixtures of commercial formulations of glyphosate with auxinic herbicides on the ten spotted live-bearer fish *Cnesterodon decemmaculatus* (Pisces, Poeciliidae).

Diabetes, Cardiovascular Disorders and 2,3,7,8-Tetrachlorodibenzo-p-Dioxin Body Burden in Czech Patients 50 Years After the Intoxication.

Reduced oxygen tension culturing conditionally alters toxicogenic response of differentiated H9c2 cardiomyoblasts to acrolein.

Toxic effects of cyhalofop-butyl on embryos of the Yellow River carp (*Cyprinus carpio* var.): alters embryos hatching, development failure, mortality of embryos, and apoptosis.

[The effects of Xuebijing injection on apoptosis and expression of regulatory factors TNF- α , NF- κ B and Caspase-3 expression in the lung tissues of acute paraquat-induced rats].

Effects of the chloro-s-triazine herbicide terbuthylazine on DNA integrity in human and mouse cells.

Paraquat initially damages cochlear support cells leading to anoikis-like hair cell death.

Yeast polyubiquitin gene UBI4 deficiency leads to early induction of apoptosis and shortened replicative lifespan.

Atrazine Triggers Mitochondrial Dysfunction and Oxidative Stress in Quail (*Coturnix C. coturnix*) Cerebrum via Activating Xenobiotic-Sensing Nuclear Receptors and Modulating Cytochrome P450 Systems.

Label-free optical biosensor for real-time monitoring the cytotoxicity of xenobiotics: A proof of principle study on glyphosate.

Neuroprotective effects of *Cassia tora* against paraquat-induced neurodegeneration: relevance for Parkinson's disease.

TriPlex™, a waveguide-based fluorescence biosensor for multichannel environmental contaminants detection.

[The anti-inflammatory effect of hesperetin on lung damage induced by paraquat in rats].

Neuroprotective action of 4-Hydroxyisophthalic acid against paraquat-induced motor impairment involves amelioration of mitochondrial damage and neurodegeneration in *Drosophila*.

The influence of natural dissolved organic matter on herbicide toxicity to marine microalgae is species-dependent.

Synergism of mixtures of dicamba and 2,4-dichlorophenoxyacetic acid herbicide formulations on the neotropical fish *Cnesterodon decemmaculatus* (Pisces, Poeciliidae).

Paraquat and MPTP alter microRNA expression profiles, and downregulated expression of miR-17-5p contributes to PQ-induced dopaminergic neurodegeneration.

Fluorochloridone induces primary cultured Sertoli cells apoptosis: Involvement of ROS and intracellular calcium ions-mediated ERK1/2 activation.

Hepatotoxicity of paraquat on common carp (*Cyprinus carpio* L.).

Protective Effects of Olive Leaf Extract on Acrolein-Exacerbated Myocardial Infarction via an Endoplasmic Reticulum Stress Pathway.

A glyphosate micro-emulsion formulation displays teratogenicity in *Xenopus laevis*.

Acrolein toxicity at advanced age: present and future.

Mitochondrial bioenergetics and locomotor activity are altered in zebrafish (*Danio rerio*) after exposure to the bipyridylum herbicide diquat.

Silymarin attenuated paraquat-induced cytotoxicity in macrophage by regulating Trx/TXNIP complex, inhibiting NLRP3 inflammasome activation and apoptosis.

Eukaryotic translation initiation factor 2 subunit 1 (eIF2 β) inhibitor salubrinal attenuates paraquat-induced human lung epithelial-like A549 cell apoptosis by regulating the PERK-eIF2 β signaling pathway.

Arsenite and methylarsonite inhibit mitochondrial metabolism and glucose-stimulated insulin secretion in INS-1 832/13 β cells.

[The protective effect of Xuebijing on paraquat-induced HK-2 cells apoptosis and the underlying mechanisms].

MnTMPyP inhibits paraquat-induced pulmonary epithelial-like cell injury by inhibiting oxidative stress.

Necrosis in human neuronal cells exposed to paraquat.

Paraquat affects mitochondrial bioenergetics, dopamine system expression, and locomotor activity in zebrafish (*Danio rerio*).

Neuroprotective Effects of Baicalein on Acrolein-induced Neurotoxicity in the Nigrostriatal Dopaminergic System of Rat Brain.

TRPM2 Promotes Neurotoxin MPP(+)/MPTP-Induced Cell Death.

Trans-cinnamaldehyde Modulates Hippocampal Nrf2 Factor and Inhibits Amyloid Beta Aggregation in LPS-Induced Neuroinflammation Mouse Model.

Stereoisomeric guaiacylglycerol- β -coniferyl aldehyde ether induces distinctive apoptosis by downregulation of MEK/ERK pathway in hepatocellular carcinoma cells.

Protective Effects of a Rho Kinase Inhibitor on Paraquat-Induced Acute Lung Injuries in Rats.

Cytotoxicity of the natural herbicidal chemical, berberine, on *Nicotiana tabacum* Bright yellow-2 cells.

Novel cinnamaldehyde-based aspirin derivatives for the treatment of colorectal cancer.

Orthogonal self-assembly of an organoplatinum(II) metallacycle and cucurbit[8]uril that delivers curcumin to cancer cells.

Aldehyde dehydrogenase 2 activation ameliorates cyclophosphamide-induced acute cardiotoxicity via detoxification of toxic aldehydes and suppression of cardiac cell death.

Necrostatin-1 Protects Against Paraquat-Induced Cardiac Contractile Dysfunction via RIP1-RIP3-MLKL-Dependent Necroptosis Pathway.

Neutrophil extracellular traps in acrolein promoted hepatic ischemia reperfusion injury: Therapeutic potential of NOX2 and p38MAPK inhibitors.

6-OHDA-induced dopaminergic neurodegeneration in *Caenorhabditis elegans* is promoted by the engulfment pathway and inhibited by the transthyretin-related protein TTR-33.

Mutations in *Caenorhabditis elegans* neuroigin-like glit-1, the apoptosis pathway and the calcium chaperone crt-1 increase dopaminergic neurodegeneration after 6-OHDA treatment.

Orofacial antinociceptive effect of *Mimosa tenuiflora* (Willd.) Poiret.

Anti-inflammatory effect of cinnamaldehyde and linalool from the leaf essential oil of *Cinnamomum osmophloeum* Kanehira in endotoxin-induced mice.

Hesperetin mitigates acrolein-induced apoptosis in lung cells in vitro and in vivo.

Acrolein induces NLRP3 inflammasome-mediated pyroptosis and suppresses migration via ROS-dependent autophagy in vascular endothelial cells.

Integrin targeting of glyphosate and its cell adhesion modulation effects on osteoblastic MC3T3-E1 cells revealed by label-free optical biosensing.

Synthesis and characterization of Sb(2)S(3)-CeO(2)/chitosan-starch as a heterojunction catalyst for photo-degradation of toxic herbicide compound: Optical, photo-reusable, antibacterial and antifungal performances.

Photolysis of clethodim herbicide and a formulation in aquatic environments: Fate and ecotoxicity assessment of photoproducts by QSAR models.

Cytotoxicity of chemical constituents from *Toricellia tiliifolia* DC. on *Spodoptera litura* (SL-1) cells.

Retinoic acid co-treatment aggravates severity of dioxin-induced skin lesions in hairless mice via induction of inflammatory response.

Flavin homeostasis in the mouse retina during aging and degeneration.

Head skeleton malformations in zebrafish (*Danio rerio*) to assess adverse effects of mixtures of compounds.

Increases in bioactive lipids accompany early metabolic changes associated with β -cell expansion in response to short-term high-fat diet.

Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin promotes inflammation in mouse testes: The critical role of *Klotho* in Sertoli cells.

miR-145 via targeting *ERCC2* is involved in arsenite-induced DNA damage in human hepatic cells.

Uremic Toxins Activates Na/K-ATPase Oxidant Amplification Loop Causing Phenotypic Changes in Adipocytes in In Vitro Models.

Aryl hydrocarbon receptor, a tumor grade-associated marker of oral cancer, is directly downregulated by polydatin: A pilot study.

Lung function and pulmonary artery blood flow following prenatal maternal retinoic acid and imatinib in the nitrofen model of congenital diaphragmatic hernia.

Pesticides and cardiotoxicity. Where do we stand?

Sensitization of colorectal cancer cells to irinotecan by the Survivin inhibitor LLP3 depends on XAF1 proficiency in the context of mutated p53.

Selective synthesis of 7-O-substituted luteolin derivatives and their melanogenesis and proliferation inhibitory activity in B16 melanoma cells.

The citrus flavonone hesperetin attenuates the nuclear translocation of aryl hydrocarbon receptor.

N(6)-methyladenosine mediates the cellular proliferation and apoptosis via microRNAs in arsenite-transformed cells.

A splicing mutation in aryl hydrocarbon receptor associated with retinitis pigmentosa.

Phenol and chlorinated phenols exhibit different apoptotic potential in human red blood cells (in vitro study).

2,3,7,8-Tetrachlorodibenzo-p-dioxin dose-dependently increases bone mass and decreases marrow adiposity in juvenile mice.

TLQP Peptides in Amyotrophic Lateral Sclerosis: Possible Blood Biomarkers with a Neuroprotective Role.

The Effect of Boric Acid and Borax on Oxidative Stress, Inflammation, ER Stress and Apoptosis in Cisplatin Toxication and Nephrotoxicity Developing as a Result of Toxication.

Protective Effect of Azadirachta indica and Vitamin E Against Arsenic Acid-Induced Genotoxicity and Apoptosis in Rats.

Loss of the Thioretinaco Ozonide Oxygen Adenosine Triphosphate Complex from Mitochondria Produces Mitochondrial Dysfunction and Carcinogenesis.

The effect of ellagic acid on photodynamic therapy in leukemia cells.

Optically-controlled bacterial metabolite for cancer therapy.

Quercetin-3-O- β -l-arabinopyranoside protects against retinal cell death via blue light-induced damage in human RPE cells and Balb-c mice.

Role of Peroxiredoxin 2 in the Protection Against Ferrous Sulfate-Induced Oxidative and Inflammatory Injury in PC12 Cells.

Carnosine attenuates cyclophosphamide-induced bone marrow suppression by reducing oxidative DNA damage.

The AKT/BCL-2 Axis Mediates Survival of Uterine Leiomyoma in a Novel 3D Spheroid Model.

The impaired immune function and structural integrity by dietary iron deficiency or excess in gill of fish after infection with Flavobacterium columnare: Regulation of NF- κ B, TOR, JNK, p38MAPK, Nrf2 and MLCK signalling.

Metabolic characterization of human aqueous humor in the cataract progression after pars plana vitrectomy.

[Effects of prenatal tetrandrine treatment on the expression of Kruppel-like factor 5 and Survivin in the lung of congenital diaphragmatic hernia rat model induced by nitrofen].

Arsenic exposure induces glucose intolerance and alters global energy metabolism.

Associations Between Disinfection By-Product Exposures and Craniofacial Birth Defects.

Redox cycling induces spermtosis and necrosis in stallion spermatozoa while the hydroxyl radical (OH \cdot) only induces spermtosis.

Arsenic Induces Thioredoxin 1 and Apoptosis in Human Liver HHL-5 Cells.

Circular RNA BARD1 (Hsa_circ_0001098) overexpression in breast cancer cells with TCDD treatment could promote cell apoptosis via miR-3942/BARD1 axis.

Latent forms of the carious lesion of human lower third molars.

Novel Protective Effects of Cistanche Tubulosa Extract Against Low-Luminance Blue Light-Induced Degenerative Retinopathy.

Novel insight into circular RNA HECTD1 in astrocyte activation via autophagy by targeting MIR142-TIPARP: implications for cerebral ischemic stroke.

Epigenetic Therapy: Novel Translational Implications for Arrest of Environmental Dioxin-Induced Disease in Females.

Neuroprotective effects of hydrogen sulfide on sodium azide-induced oxidative stress in PC12 cells.

Cyano-Based Materials with Giant Optical Anisotropy and Second Harmonic-Generation Effect.

Modifying aroylhydrazone prochelators for hydrolytic stability and improved cytoprotection against oxidative stress.

Toxicological effects of 3-methyl-4-nitrophenol on mouse ovarian and testicular cell proliferation, apoptosis and oocyte maturation.

Differences in reproductive toxicity of TBBPA and TCBPA exposure in male *Rana nigromaculata*.

Pesticide-Poisoned Patients: Can They Be Used as Potential Organ Donors?

Ozone and chlorine reactions with dissolved organic matter - Assessment of oxidant-reactive moieties by optical measurements and the electron donating capacities.

Developmental Neurotoxicity of Arsenic: Involvement of Oxidative Stress and Mitochondrial Functions.

Crystalline Dioxin-Linked Covalent Organic Frameworks from Irreversible Reactions.

Photophysical properties and photodynamic therapy activity of highly water-soluble Zn(II) phthalocyanines.

Simultaneous determination of enantiomers of carfentrazone-ethyl and its metabolite in eight matrices using high-performance liquid chromatography with tandem mass spectrometry.

Pioglitazone Protects Mesenchymal Stem Cells against P-Cresol-Induced Mitochondrial Dysfunction via Up-Regulation of PINK-1.

Preparation and Optimization of Optical pH Sensor Based on Sol-Gel.

Bushfire smoke is pro-inflammatory and suppresses macrophage phagocytic function.

Arsenic-containing hydrocarbons disrupt a model in vitro blood-cerebrospinal fluid barrier.

The effect of crocin on testicular tissue and sperm parameters of mice offspring from mothers exposed to atrazine during pregnancy and lactation periods: An experimental study.

Aryl Hydrocarbon Receptor Regulates Apoptosis and Inflammation in a Murine Model of Experimental Autoimmune Uveitis.

Author Correction: Next generation histology methods for three-dimensional imaging of fresh and archival human brain tissues.

Safety evaluation of genetically modified DAS-40278-9 maize in a subchronic rodent feeding study.

The impact of short-chain fatty acids on GLP-1 and PYY secretion from the isolated perfused rat colon.

UV-Photochemistry of the Disulfide Bond: Evolution of Early Photoproducts from Picosecond X-ray Absorption Spectroscopy at the Sulfur K-Edge.

From Mesocates to Helicates: Structural, Magnetic and Chiro-Optical Studies on Nickel(II) Supramolecular Assemblies Derived from Tetradentate Schiff Bases.

27-Deoxyactein prevents 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced cellular damage in MC3T3-E1 osteoblastic cells.

Drosophila Voltage-Gated Calcium Channel $\hat{1}\pm 1$ -Subunits Regulate Cardiac Function in the Aging Heart.

Suppression of the IgM Response by Aryl Hydrocarbon Receptor Activation in Human Primary B Cells Involves Impairment of Immunoglobulin Secretory Processes.

Palmitic acid induces neurotoxicity and gliotoxicity in SH-SY5Y human neuroblastoma and T98G human glioblastoma cells.

Comparative live-imaging of in vivo EROD (ethoxyresorufin-O-deethylase) induction in zebrafish (*Danio rerio*) and fathead minnow (*Pimephales promelas*) embryos after exposure to PAHs and river sediment extracts.

Some adverse actions of chlorothalonil at sublethal levels in rat thymic lymphocytes: Its relation to Zn(2).

Ophthalmic acid is a marker of oxidative stress in plants as in animals.

Arsenic Attenuates Heparin-Binding EGF-Like Growth Factor/EGFR Signaling That Promotes Matrix Metalloprotease 9-Dependent Astrocyte Damage in the Developing Rat Brain.

Integrated metabolic models for xenobiotic induced mitochondrial toxicity in skeletal muscle.

The aryl hydrocarbon receptor and retinoid receptors cross-talk at the CYP1A1 promoter in vitro.

Urinary p-cresol diagnosis using nanocomposite of ZnO/MoS(2) and molecular imprinted polymer on optical fiber based lossy mode resonance sensor.

Bisphenol A is an exogenous toxin that promotes mitochondrial injury and death in tubular cells.

Phenyl sulfate, indoxyl sulfate and p-cresyl sulfate decrease glutathione level to render cells vulnerable to oxidative stress in renal tubular cells.

Synthesis and Cytotoxic Evaluation of 1H-1,2,3-Triazol-1-ylmethyl-2,3-dihydronaphtho[1,2-b]furan-4,5-diones.

Modification and quantification of in vivo EROD live-imaging with zebrafish (*Danio rerio*) embryos to detect both induction and inhibition of CYP1A.

Pendimethalin induces oxidative stress, DNA damage, and mitochondrial dysfunction to trigger apoptosis in human lymphocytes and rat bone-marrow cells.

Pink1 attenuates propofol-induced apoptosis and oxidative stress in developing neurons.

Complex mixtures of dissolved pesticides show potential aquatic toxicity in a synoptic study of Midwestern U.S. streams.

Nanosensing of Pesticides by Zinc Oxide Quantum Dot: An Optical and Electrochemical Approach for the Detection of Pesticides in Water.

Arsenite exposure potentiates apoptosis-inducing effects of tumor necrosis factor- α - through reactive oxygen species.

Imbalance of Th17/Treg in the Pathogenesis of Mice with Paraquat-induced Acute Lung Injury.

Cytogenetic damage in peripheral blood lymphocytes of children exposed to pesticides in agricultural areas of the department of Cordoba, Colombia.

The potential protective role of Akropower against Atrazine- induced humoral immunotoxicity in rabbits.

Glyphosate and Roundup(®) alter morphology and behavior in zebrafish.

Acrolein Disrupts Tight Junction Proteins and Causes Endoplasmic Reticulum Stress-Mediated Epithelial Cell Death Leading to Intestinal Barrier Dysfunction and Permeability.

Intracellular Ca(2+) is an essential factor for cell damage induced by unsaturated carbonyl compounds.

Effectiveness of heparin eye drops in paraquat-induced ocular injury.

Acute toxicity of organic antifouling biocides to phytoplankton *Nitzschia pungens* and zooplankton *Artemia* larvae.

Synthesis and herbicidal activity of optically active $\hat{\pm}$ -(substituted phenoxyacetoxy) (substituted phenyl) methylphosphonates.

Epi/perineural and Schwann Cells as Well as Perineural Sheath Integrity are Affected Following 2,4-D Exposure.

Effects of a glyphosate-based herbicide in pejerrey *Odontesthes humensis* embryonic development.

[Mono-carbonyl analogues of curcumin prevents paraquat-induced apoptosis in HK-2 cell line by inhibiting oxidative damage and inflammation].

Exposure to 2,4-dichlorophenoxyacetic acid induces oxidative stress and apoptosis in mouse testis.

Toxicity of two classes of arsenolipids and their water-soluble metabolites in human differentiated neurons.

Maternal linuron exposure alters testicular development in male offspring rats at the whole genome level.

Role of metabolites of cyclophosphamide in cardiotoxicity.

JWA antagonizes paraquat-induced neurotoxicity via activation of Nrf2.

JNK Inhibitor SP600125 Attenuates Paraquat-Induced Acute Lung Injury: an In Vivo and In Vitro Study.

Biological impacts of glyphosate on morphology, embryo biomechanics and larval behavior in zebrafish (*Danio rerio*).

Toxic effects of glyphosate on diploid and triploid fin cell lines from *Misgurnus anguillicaudatus*.

Paraquat induces extrinsic pathway of apoptosis in A549 cells by induction of DR5 and repression of anti-apoptotic proteins, DDX3 and GSK3 expression.

Early developmental exposure to pentachlorophenol causes alterations on mRNA expressions of caspase protease family in zebrafish embryos.

An approach to clarify the effect mechanism of glyphosate on body malformations during embryonic development of zebrafish (*Danio rerio*).

Interpreting surveys to estimate the size of the monarch butterfly population: Pitfalls and prospects.

Crosstalk between Mitochondrial Fission and Oxidative Stress in Paraquat-Induced Apoptosis in Mouse Alveolar Type II Cells.

Acrolein Can Cause Cardiovascular Disease: A Review.

Toxic effects of atrazine on porcine oocytes and possible mechanisms of action.

In vitro cytotoxicity assessment of roundup (glyphosate) in L-02 hepatocytes.

Ocular exposure to paraquat resulting in keratopathy, pseudomembranous conjunctivitis and symblepharon.

Age-dependent changes in sensitivity to a pesticide in tadpoles of the common toad (*Bufo bufo*).

Toll-like receptor 9 mediates paraquat-induced acute lung injury: an in vitro and in vivo study.

[The study of using salvianolate treat acute lung injury in rats induced by paraquat].

Effects of atrazine and chlorothalonil on the reproductive success, development, and growth of early life stage sockeye salmon (*Oncorhynchus nerka*).

Dendritic cells' death induced by contact sensitizers is controlled by Nrf2 and depends on glutathione levels.

[The study of using cordyceps-astragalus-salvia miltiorrhiza to treat acute lung injury induced by paraquat poisoning in rats].

Acrolein acts as a neurotoxin in the nigrostriatal dopaminergic system of rat: involvement of α -synuclein aggregation and programmed cell death.

Lichen microalgae are sensitive to environmental concentrations of atrazine.

Ablation of Akt2 prevents paraquat-induced myocardial mitochondrial injury and contractile dysfunction: Role of Nrf2.

Physiological effects and toxin release in *Microcystis aeruginosa* and *Microcystis viridis* exposed to herbicide fenoxaprop-p-ethyl.

Atrazine triggers hepatic oxidative stress and apoptosis in quails (*Coturnix C. coturnix*) via blocking Nrf2-mediated defense response.

Oxidative damage of the male reproductive system induced by paraquat.

Fast pesticide detection inside microfluidic device with integrated optical pH, oxygen sensors and algal fluorescence.

Photodegradation behaviour of sethoxydim and its commercial formulation Poast(®) under environmentally-relevant conditions in aqueous media. Study of photoproducts and their toxicity.

A glyphosate-based herbicide induces histomorphological and protein expression changes in the liver of the female guppy *Poecilia reticulata*.

Mixtures of herbicides and metals affect the redox system of honey bees.

Toll-like receptor 4 ablation rescues against paraquat-triggered myocardial dysfunction: Role of ER stress and apoptosis.

Protective effects of activated signaling pathways by insulin on C6 glial cell model of MPP(+)-induced Parkinson's disease.

[Alterations of miRNA profiles and function analysis in paraquat-induced apoptosis of hNPCs].

[Effect of atrazine on apoptosis in cultured rat Sertoli cells].

Idh2 Deficiency Exacerbates Acrolein-Induced Lung Injury through Mitochondrial Redox Environment Deterioration.

Resveratrol and Montelukast Alleviate Paraquat-Induced Hepatic Injury in Mice: Modulation of Oxidative Stress, Inflammation, and Apoptosis.

Liver X Receptor Agonist TO901317 Attenuates Paraquat-Induced Acute Lung Injury through Inhibition of NF- κ B and JNK/p38 MAPK Signal Pathways.

Curcumin attenuates paraquat-induced cell death in human neuroblastoma cells through modulating oxidative stress and autophagy.

Oxidative stress intensity-related effects of cadmium (Cd) and paraquat (PQ) on UV-damaged-DNA binding and excision repair activities in zebrafish (*Danio rerio*) embryos.

Soluble Vascular Adhesion Protein-1 Mediates Spermine Oxidation as Semicarbazide-Sensitive Amine Oxidase: Possible Role in Proliferative Diabetic Retinopathy.

Cinnamaldehyde induces cell apoptosis mediated by a novel circular RNA hsa_circ_0043256 in non-small cell lung cancer.

Zn doped CdO nanoparticles: Structural, morphological, optical, photocatalytic and anti-bacterial properties.

Fusarium infection causes genotoxic disorders and antioxidant-based damages in *Orobancha* spp.

Clathrin-Dependent Uptake of Paraquat into SH-SY5Y Cells and Its Internalization into Different Subcellular Compartments.

Cinnamomum verum ingredient 2-methoxycinnamaldehyde: a new antiproliferative drug targeting topoisomerase I and II in human lung squamous cell carcinoma NCI-H520 cells.

Curcumin Rescues a PINK1 Knock Down SH-SY5Y Cellular Model of Parkinson's Disease from Mitochondrial Dysfunction and Cell Death.

In vitro antioxidant activities of resveratrol, cinnamaldehyde and their synergistic effect against cyadox-induced cytotoxicity in rabbit erythrocytes.

Cinnamaldehyde induces apoptosis and reverses epithelial-mesenchymal transition through inhibition of Wnt/ β -catenin pathway in non-small cell lung cancer.

Cytotoxicity and cellular response mechanisms of water-soluble platinum(II) complexes of lidocaine and phenylcyanamide derivatives.

Cinnamomum cassia essential oil and its major constituent cinnamaldehyde induced cell cycle arrest and apoptosis in human oral squamous cell carcinoma HSC-3 cells.

Localization of Acrolein-Lysine Adduct in Fibrovascular Tissues of Proliferative Diabetic Retinopathy.

Unusual arsenic metabolism in Giant Pandas.

Protective effect of cinnamaldehyde against glutamate-induced oxidative stress and apoptosis in PC12 cells.

Cinnamaldehyde protects human dental pulp cells against oxidative stress through the Nrf2/HO-1-dependent antioxidant response.

Synthesis, Optical Properties, and DNA Interaction of New Diquats Based on Triazolopyridines and Triazoloquinolines.

A 3D-Printed, Portable, Optical-Sensing Platform for Smartphones Capable of Detecting the Herbicide 2,4-Dichlorophenoxyacetic Acid.

Combination of quercetin, cinnamaldehyde and hirudin protects rat dorsal root ganglion neurons against high glucose-induced injury through Nrf-2/HO-1 activation and NF- κ B inhibition.

siRNA-based Analysis of the Abrogation of the Protective Function of Membrane-associated Catalase of Tumor Cells.

Isoflavones Induce BEX2-Dependent Autophagy to Prevent ATR-Induced Neurotoxicity in SH-SY5Y Cells.

The Cystic Fibrosis Transmembrane Conductance Regulator Potentiator Ivacaftor Augments Mucociliary Clearance Abrogating Cystic Fibrosis Transmembrane Conductance Regulator Inhibition by Cigarette Smoke.

Chloracne in a Farming Family.

2,3,7,8-Tetrachlorodibenzo-p-dioxin influences bovine herpesvirus 1 replication through upregulation of SIRT3 and cytoskeletal reorganization.

Investigation on effect of basalin coated silver nanoparticles as antioxidant for alleviating peripheral neuropathy in mice treated with oxaliplatin.

Antitumoral effect of arsenic compound, sodium metaarsenite (KML001), on multiple myeloma cells.

Experimental oral iron administration: Histological investigations and expressions of iron handling proteins in rat retina with aging.

Elucidation of protective efficacy of Pentahydroxy flavone isolated from *Madhuca indica* against arsenite-induced cardiomyopathy: Role of Nrf-2, PPAR- γ , c-fos and c-jun.

Maternal Resveratrol Treatment Reduces the Risk of Mammary Carcinogenesis in Female Offspring Prenatally Exposure to 2,3,7,8-Tetrachlorodibenzo-p-Dioxin.

Effects of Commonly Used Pesticides in China on the Mitochondria and Ubiquitin-Proteasome System in Parkinson's Disease.

Apoptosis signal-regulating kinase 1 inhibition attenuates cardiac hypertrophy and cardiorenal fibrosis induced by uremic toxins: Implications for cardiorenal syndrome.

Enoxacin with UVA Irradiation Induces Apoptosis in the AsPC1 Human Pancreatic Cancer Cell Line Through ROS Generation.

The neurotoxicant PCB-95 by increasing the neuronal transcriptional repressor REST down-regulates caspase-8 and increases Ripk1, Ripk3 and MLKL expression determining necroptotic neuronal death.

Research on the effect of formononetin on photodynamic therapy in K562 cells.

Live cell imaging of bacterial cells: Pyrenoylpyrrole-based fluorescence labeling.

Carnosic Acid Protects Mitochondria of Human Neuroblastoma SH-SY5Y Cells Exposed to Paraquat Through Activation of the Nrf2/HO-1 Axis.

Synergistic therapy of chemotherapeutic drugs and MTH1 inhibitors using a pH-sensitive polymeric delivery system for oral squamous cell carcinoma.

Visual light effects on mitochondria: The potential implications in relation to glaucoma.

Predicting tyrosinaemia: a mathematical model of 4-hydroxyphenylpyruvate dioxygenase inhibition by nitrosonone in rats.

Cytotoxic effect of TDZ on human cervical cancer cells.

Near infra-red light attenuates corneal endothelial cell dysfunction in situ and in vitro.

Tert-butylhydroquinone protects PC12 cells against ferrous sulfate-induced oxidative and inflammatory injury via the Nrf2/ARE pathway.

Multidirectional inhibition of cortico-hippocampal neurodegeneration by kolaviron treatment in rats.

Pesticide Use and Age-Related Macular Degeneration in the Agricultural Health Study.

KML001 and doxercalciferol induce synergistic antileukemic effect in acute lymphoid leukemia cells.

Ergothioneine products derived by superoxide oxidation in endothelial cells exposed to high-glucose.

Indole-3-carbinol, a plant nutrient and AhR-Ligand precursor, supports oral tolerance against OVA and improves peanut allergy symptoms in mice.

The decreased growth performance and impaired immune function and structural integrity by dietary iron deficiency or excess are associated with TOR, NF- κ B, p38MAPK, Nrf2 and MLCK signaling in head kidney, spleen and skin of grass carp (*Ctenopharyngodon idella*).

Imazamethabenz inhibits human breast cancer cell proliferation, migration and invasion via combination with Pin1.

Suppressed erythropoietin expression in a nitrofen-induced congenital diaphragmatic hernia.

Lower concentrations of receptor for advanced glycation end products and epiregulin in amniotic fluid correlate to chemically induced cleft palate in mice.

Inhibition of Kupffer cell functions modulates arsenic intoxication in Wistar rats.

Intracellular ATP in balance of pro- and anti-inflammatory cytokines in adipose tissue with and without tissue expansion.

IL-27 triggers IL-10 production in Th17 cells via a c-Maf/ROR γ t/Blimp-1 signal to promote the progression of endometriosis.

Role of Glutathione Peroxidase 4 in Corneal Endothelial Cells.

Comparative Study of Folic Acid and β -Naphthoflavone on Reducing TCDD-Induced Cleft Palate in Fetal Mice.

Severe Self-Inflicted Acute Ocular Siderosis Caused by an Iron Tablet in the Conjunctival Fornix.

Mitochondrial Uncoupler Prodrug of 2,4-Dinitrophenol, MP201, Prevents Neuronal Damage and Preserves Vision in Experimental Optic Neuritis.

Photophysical, calf thymus DNA binding and in vitro photocytotoxicity properties of tetra-morpholinoethoxy-substituted phthalocyanines and their water-soluble quaternized derivatives.

Actein alleviates 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated cellular dysfunction in osteoblastic MC3T3-E1 cells.

2, 3, 7, 8-Tetrachlorodibenzo-p-dioxin promotes endothelial cell apoptosis through activation of EP3/p38MAPK/Bcl-2 pathway.

Evaluation of the safety of a genetically modified DAS-444 $\tilde{\sim}$ 6-6 soybean meal and hulls in a 90-day dietary toxicity study in rats.

Mdivi $\tilde{\sim}$ 1 attenuates sodium azide $\tilde{\sim}$ induced apoptosis in H9c2 cardiac muscle cells.

All-Trans Retinoic Acid Ameliorates Arsenic-Induced Oxidative Stress and Apoptosis in the Rat Uterus by Modulating MAPK Signaling Proteins.

Paraquat and MPTP induce neurodegeneration and alteration in the expression profile of microRNAs: the role of transcription factor Nrf2.

Optical Sensing of Weed Infestations at Harvest.

Visible-Light Neural Stimulation on Graphitic-Carbon Nitride/Graphene Photocatalytic Fibers.

Transcriptomic and Functional Analyses on the Effects of Dioxin on Insulin Secretion of Pancreatic Islets and β -Cells.

Cu(II) immobilized on Fe₃O₄@APTMS-DFX nanoparticles: an efficient catalyst for the synthesis of 5-substituted 1H-tetrazoles with cytotoxic activity.

The prophylactic effect of *Acetobacter syzygii* probiotic species against squamous cell carcinoma.

Acrolein induces mtDNA damages, mitochondrial fission and mitophagy in human lung cells.

Sodium Arsenite-Induced Learning and Memory Impairment Is Associated with Endoplasmic Reticulum Stress-Mediated Apoptosis in Rat Hippocampus.

Epigenetic Regulation by Agonist-Specific Aryl Hydrocarbon Receptor Recruitment of Metastasis-Associated Protein 2 Selectively Induces Stanniocalcin 2 Expression.

Two pathways of photoproduction of organic hydroperoxides on the donor side of photosystem 2 in subchloroplast membrane fragments.

Deficiency of long isoforms of Nfe2l1 sensitizes MIN6 pancreatic β cells to arsenite-induced cytotoxicity.

Bone morphogenetic protein 7 alleviates paraquat-induced pulmonary fibrosis via TGF- β 1/Erk1/2 pathway.

Overexpression of p58ipk protects neuroblastoma against paraquat-induced toxicity.

Fructose-1,6-bisphosphate reverts iron-induced phenotype of hepatic stellate cells by chelating ferrous ions.

The water soluble axially disubstituted silicon phthalocyanines: photophysicochemical properties and in vitro studies.

Hepatoprotective Role of *Hydrangea macrophylla* against Sodium Arsenite-Induced Mitochondrial-Dependent Oxidative Stress via the Inhibition of MAPK/Caspase-3 Pathways.

Synergistic cellular effects including mitochondrial destabilization, autophagy and apoptosis following low-level exposure to a mixture of lipophilic persistent organic pollutants.

Toxicological characterisation of two novel selective aryl hydrocarbon receptor modulators in Sprague-Dawley rats.

Characterizing Slow Photochemical Reaction Kinetics by Enhanced Sampling of Rare Events with Capillary Optical Fibers and Kramers' Theory.

A metal-organic framework as a flask: photophysics of confined chromophores with a benzylidene imidazolinone core.

A useful way to develop effective in vivo skin optical clearing agents.

Benzene and 2-ethyl-phthalate induce proliferation in normal rat pituitary cells.

[Effect of mitogen-activated protein kinase signaling pathway on apoptosis induced by chloroacetic acid in human normal bronchial epithelial 16HBE cells].

Self-initiation of UV photopolymerization reactions using tetrahalogenated bisphenol A (meth)acrylates.

No-core fiber-based highly sensitive optical fiber pH sensor.

Uncovering Potential Applications of Cyanobacteria and Algal Metabolites in Biology, Agriculture and Medicine: Current Status and Future Prospects.

DNA damage by lipid peroxidation products: implications in cancer, inflammation and autoimmunity.

Protein-bound P-cresol inhibits human umbilical vein endothelial cell proliferation by inducing cell cycle arrest at G(0)/G(1).

Using early life stages of marine animals to screen the toxicity of priority hazardous and noxious substances.

Environmentally Persistent Free Radicals Cause Apoptosis in HL-1 Cardiomyocytes.

Toxic Epidermal Necrolysis and Acute Kidney Injury due to Glyphosate Ingestion.

Role of precursors on the photophysical properties of carbon nitride and its application for antibiotic degradation.

The toxic effects of chlorophenols and associated mechanisms in fish.

Aryl hydrocarbon receptor (AhR)-dependent regulation of pulmonary miRNA by chronic cigarette smoke exposure.

Eryptosis - the Neglected Cause of Anemia in End Stage Renal Disease.

A Validated Capillary Electrophoretic Method for the Determination of Olopatadine and Its Application to a Pharmaceutical Preparation of Eye Drops.

Effects of Chronic Exposure to Sodium Arsenite on Expressions of VEGF and VEGFR2 Proteins in the Epididymis of Rats.

Crosstalk between Aryl Hydrocarbon Receptor and Glucocorticoid Receptor in Human Retinal Pigment Epithelial Cells.

Tetrachloro-1,4-benzoquinone induces apoptosis of mouse embryonic stem cells.

Novel roles for AhR and ARNT in the regulation of alcohol dehydrogenases in human hepatic cells.

[Dose-effect relationship between vitamin C and paraquat poisoning rats].

Establishment of an in vitro monolayer model of macular corneal dystrophy.

Role of cytochrome c in α -synuclein radical formation: implications of α -synuclein in neuronal death in Maneb- and paraquat-induced model of Parkinson's disease.

Effects of anti-androgens cyproterone acetate, linuron, vinclozolin, and p,p'-DDE on the reproductive organs of the copepod *Acartia tonsa*.

The transcription factor, Nuclear factor, erythroid 2 (Nfe2), is a regulator of the oxidative stress response during *Danio rerio* development.

Effects of neonatal exposure to a glyphosate-based herbicide on female rat reproduction.

Assessment of the Effects of MPTP and Paraquat on Dopaminergic Neurons and Microglia in the Substantia Nigra Pars Compacta of C57BL/6 Mice.

Diindolylmethane and Lupeol Modulates Apoptosis and Cell Proliferation in N-Butyl-N-(4-Hydroxybutyl) Nitrosamine Initiated and Dimethylarsinic Acid Promoted rat Bladder Carcinogenesis.

Mechanism-specific injury biomarkers predict nephrotoxicity early following glyphosate surfactant herbicide (GPSH) poisoning.

Physiological effects of the herbicide glyphosate on the cyanobacterium *Microcystis aeruginosa*.

Acrolein enhances epigenetic modifications, FasL expression and hepatocyte toxicity induced by anti-HIV drug Zidovudine.

Inhibition of cathepsin B by caspase-3 inhibitors blocks programmed cell death in *Arabidopsis*.

Unintended effects of the herbicides 2,4-D and dicamba on lady beetles.

Atrazine induces endoplasmic reticulum stress-mediated apoptosis of T lymphocytes via the caspase-8-dependent pathway.

Identification of apoptosis and macrophage migration events in paraquat-induced oxidative stress using a zebrafish model.

Human exposure to acrolein: Time-dependence and individual variation in eye irritation.

Adiponectin ameliorates the apoptotic effects of paraquat on alveolar type II cells via improvements in mitochondrial function.

Toxicities of glyphosate- and cypermethrin-based pesticides are antagonistic in the ten-spotted livebearer fish (*Gambusia affinis holbrooki*).

Nucleotide excision repair deficiency increases levels of acrolein-derived cyclic DNA adduct and sensitizes cells to apoptosis induced by docosahexaenoic acid and acrolein.

Evaluation of the effect of 2,4-dichlorophenol on oxidative parameters and viability of human blood mononuclear cells (in vitro).

In vitro neurotoxic hazard characterisation of dinitrophenolic herbicides.

Toxic and genotoxic effects of the 2,4-dichlorophenoxyacetic acid (2,4-D)-based herbicide on the Neotropical fish *Cnesterodon decemmaculatus*.

Evaluation of the toxic effect of the herbicide 2, 4-D on rat hepatocytes: an FT-IR spectroscopic study.

Paraquat Induces Cell Death Through Impairing Mitochondrial Membrane Permeability.

Cycloartenyl Ferulate Inhibits Paraquat-Induced Apoptosis in HK-2 Cells With the Involvement of ABCC1.

Glyphosate induces neurotoxicity in zebrafish.

Melatonin inhibits paraquat-induced cell death in bovine preimplantation embryos.

Acute and long-term ocular effects of acrolein vapor on the eyes and potential therapies.

Dioxins and cytogenetic status of villagers after 40 years of agent Orange application in Vietnam.

2,4-dichlorophenol induces ER stress-mediated apoptosis via eIF2 γ dephosphorylation in vitro.

Chronic Exposure to Diquat Causes Reproductive Toxicity in Female Mice.

Modelling the effect of exposing algae to pulses of S-metolachlor: How to include a delay to the onset of the effect and in the recovery.

Carbonyl Compounds in the Gas Phase of Cigarette Mainstream Smoke and Their Pharmacological Properties.

[The protective effect of bone marrow mesenchymal stem cells carrying antioxidant gene superoxide dismutase on paraquat lung injury in mice].

Photochemical changes and oxidative damage in the aquatic macrophyte *Cymodocea nodosa* exposed to paraquat-induced oxidative stress.

Low-Dose *Aronia melanocarpa* Concentrate Attenuates Paraquat-Induced Neurotoxicity.

The effects of resveratrol against trifluralin toxicity in the urinary tract of rats.

Visualising and Thinking and Interpreting. Response to the Burstyn and De Roos Comments on Sorahan, T. Multiple Myeloma and Glyphosate Use: A Re-Analysis of US Agricultural Health Study (AHS) Data. *Int. J. Environ. Res. Public Health* 2015, 12, 1548-1559.

Acrolein preferentially damages nucleolus eliciting ribosomal stress and apoptosis in human cancer cells.

New water-soluble palladium(II) complexes of lidocaine and phenylcyanamide derivative ligands: cytotoxicity and cellular response mechanisms.

Cx43 Mediates Resistance against MPP⁺-Induced Apoptosis in SH-SY5Y Neuroblastoma Cells via Modulating the Mitochondrial Apoptosis Pathway.

Trans-cinnamaldehyde protected PC12 cells against oxygen and glucose deprivation/reperfusion (OGD/R)-induced injury via anti-apoptosis and anti-oxidative stress.

Discovery of a novel anti-cancer agent targeting both topoisomerase I and II in hepatocellular carcinoma Hep 3B cells in vitro and in vivo: *Cinnamomum verum* component 2-methoxycinnamaldehyde.

Membrane lipid peroxidation in neurodegeneration: Role of thrombin and proteinase-activated receptor-1.

Cardiac-Specific Knockout of ETA Receptor Mitigates Paraquat-Induced Cardiac Contractile Dysfunction.

Histidine biosynthesis plays a crucial role in metal homeostasis and virulence of *Aspergillus fumigatus*.

Cinnamaldehydes in Cancer Chemotherapy.

SIRT1 exerts protective effects against paraquat-induced injury in mouse type II alveolar epithelial cells by deacetylating NRF2 in vitro.

Superoxide-hydrogen peroxide imbalance interferes with colorectal cancer cells viability, proliferation and oxaliplatin response.

3-Aminotriazole protects from CoCl₂-induced ototoxicity by inhibiting the generation of reactive oxygen species and proinflammatory cytokines in mice.

Cinnamaldehyde affects the biological behavior of human colorectal cancer cells and induces apoptosis via inhibition of the PI3K/Akt signaling pathway.

Cinnamomum verum Component 2-Methoxycinnamaldehyde: A Novel Anticancer Agent with Both Anti-Topoisomerase I and II Activities in Human Lung Adenocarcinoma A549 Cells In Vitro and In Vivo.

A low toxicity synthetic cinnamaldehyde derivative ameliorates renal inflammation in mice by inhibiting NLRP3 inflammasome and its related signaling pathways.

Discovery of a novel anticancer agent with both anti-topoisomerase I and II activities in hepatocellular carcinoma SK-Hep-1 cells in vitro and in vivo: Cinnamomum verum component 2-methoxycinnamaldehyde.

[The effect of resveratrol on paraquat-induced acute lung injury in mice and its mechanism].

A full evaluation for the enantiomeric impacts of lactofen and its metabolites on aquatic macrophyte *Lemna minor*.

Integration of optical and electrochemical sensors on a microfluidic platform using organic optoelectronic components and silver nanowires.

Reactive Carbonyl Species Activate Caspase-3-Like Protease to Initiate Programmed Cell Death in Plants.

Assessment of tick antioxidant responses to exogenous oxidative stressors and insight into the role of catalase in the reproductive fitness of the Gulf Coast tick, *Amblyomma maculatum*.

Methyl viologen induces neural differentiation on murine P19 cells.

Protective effect of carnosic acid against paraquat-induced redox impairment and mitochondrial dysfunction in SH-SY5Y cells: Role for PI3K/Akt/Nrf2 pathway.

[The effect of paraquat on autophagy in human embryonic neural progenitor cells].

Synthesis of docosahexaenoic acid from eicosapentaenoic acid in retina neurons protects photoreceptors from oxidative stress.

Critical Role of FoxO1 in Granulosa Cell Apoptosis Caused by Oxidative Stress and Protective Effects of Grape Seed Procyanidin B2.

Anti-oxidative and anti-inflammatory effects of cinnamaldehyde on protecting high glucose-induced damage in cultured dorsal root ganglion neurons of rats.

Hypothalamic L-Histidine Decarboxylase Is Up-Regulated During Chronic REM Sleep Deprivation of Rats.

Ayurvedic Amalaki Rasayana promotes improved stress tolerance and thus has anti-aging effects in *Drosophila melanogaster*.

Pomegranate protects against arsenic-induced p53-dependent ROS-mediated inflammation and apoptosis in liver cells.

Protective effects of quercetin against arsenic-induced testicular damage in rats.

Different modes of synergistic toxicities between metam/copper (II) and metam/zinc (II) in HepG2 cells: apoptosis vs. necrosis.

Citral reduces breast tumor growth by inhibiting the cancer stem cell marker ALDH1A3.

2,3,7,8-Tetrachlorodibenzo-p-dioxin Mediated Cleft palate by Mouse Embryonic Palate Mesenchymal Cells.

Rapid simulated gastric fluid digestion of in-seed/grain proteins expressed in genetically engineered crops.

Is hepatic oxidative stress a main driver of dietary selenium toxicity in white sturgeon (*Acipenser transmontanus*)?

The cardioprotective effect of melatonin and exendin-4 treatment in a rat model of cardiorenal syndrome.

Syndromic microphthalmia-3 caused by a mutation on gene SOX2 in a Colombian male patient.

Co-delivery of doxorubicin and recombinant plasmid pHSP70-Plk1-shRNA by bacterial magnetosomes for osteosarcoma therapy.

Mammary Gland Evaluation in Juvenile Toxicity Studies: Temporal Developmental Patterns in the Male and Female Harlan Sprague-Dawley Rat.

Arsenite inhibits the function of CD133(+) CD13(+) liver cancer stem cells by reducing PML and Oct4 protein expression.

Hypoxic Preconditioning Improves the Therapeutic Potential of Aging Bone Marrow Mesenchymal Stem Cells in Streptozotocin-Induced Type-1 Diabetic Mice.

Participation of protein kinases in cytotoxic and proapoptotic effects of ethylene glycol ethers and their metabolites in SH-SY5Y cells.

Targeting of Micelles and Liposomes Loaded with the Pro-Apoptotic Drug, NCL-240, into NCI/ADR-RES Cells in a 3D Spheroid Model.

Attenuative role of mangiferin in oxidative stress-mediated liver dysfunction in arsenic-intoxicated murines.

p-Cresyl sulfate promotes the formation of atherosclerotic lesions and induces plaque instability by targeting vascular smooth muscle cells.

AhR-dependent 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity in human neuronal cell line SHSY5Y.

Red light of the visual spectrum attenuates cell death in culture and retinal ganglion cell death in *in situ*.

Toward elucidation of dioxin-mediated chloracne and Ah receptor functions.

Previously Unclassified Mutation of mtDNA m.3472T>C: Evidence of Pathogenicity in Leber's Hereditary Optic Neuropathy.

Alterations in glutamate cysteine ligase content in the retina of two retinitis pigmentosa animal models.

Photoactive g-C₃N₄ Nanosheets for Light-Induced Suppression of Alzheimer's β -Amyloid Aggregation and Toxicity.

Defining the Relationships Among Retinal Function, Layer Thickness and Visual Behavior During Oxidative Stress-Induced Retinal Degeneration.

Alu retrotransposons promote differentiation of human carcinoma cells through the aryl hydrocarbon receptor.

Combined antenatal therapy with retinoic acid and tracheal occlusion in a rat model of congenital diaphragmatic hernia.

The effect of a vegetarian versus conventional hypocaloric diet on serum concentrations of persistent organic pollutants in patients with type 2 diabetes.

Digoxin reduces atherosclerosis in apolipoprotein E-deficient mice.

Free p-Cresol Alters Neutrophil Function in Dogs.

Protective effects of melatonin against arsenic-induced apoptosis and oxidative stress in rat testes.

Repurposing an orally available drug for the treatment of geographic atrophy.

Effective Valsalva maneuvering during TCCD and unrevealed etiology of RLS.

SCO2 Mediates Oxidative Stress-Induced Glycolysis to Oxidative Phosphorylation Switch in Hematopoietic Stem Cells.

Antenatal retinoic acid administration increases trophoblastic retinol-binding protein dependent retinol transport in the nitrofen model of congenital diaphragmatic hernia.

Long-term arsenite exposure induces premature senescence in B cell lymphoma A20 cells.

Aminomethylphosphonic acid inhibits growth and metastasis of human prostate cancer in an orthotopic xenograft mouse model.

Protective effects of a grape-supplemented diet in a mouse model of retinal degeneration.

5-Aminolevulinic acid combined with ferrous iron ameliorate ischemia-reperfusion injury in the mouse fatty liver model.

The role of peroxiredoxin 4 in inflammatory response and aging.

Expression of hepatic lipid droplets is decreased in the nitrofen model of congenital diaphragmatic hernia.

Anti-tumoral effect of arsenic compound, sodium metaarsenite (KML001), in non-Hodgkin's lymphoma: an in vitro and in vivo study.

ATPase-Modulated Stress Granules Contain a Diverse Proteome and Substructure.

Impact of Food Rations and Supplements on Micronutrient Status by Trimester of Pregnancy: Cross-Sectional Studies in the Mae La Refugee Camp in Thailand.

Endoplasmic reticulum stress is involved in 2,4-dichlorophenol-induced hepatotoxicity.

Deguelin and Its Role in Chronic Diseases.

Protective effects of thymoquinone against apoptosis and oxidative stress by arsenic in rat kidney.

Olive oil and its phenolic compounds (hydroxytyrosol and tyrosol) ameliorated TCDD-induced hepatotoxicity in rats via inhibition of oxidative stress and apoptosis.

Comparison of Fiber Optic and Conduit Attenuated Total Reflection (ATR) Fourier Transform Infrared (FT-IR) Setup for In-Line Fermentation Monitoring.

RNA Interference Directed against the Transglutaminase Gene Triggers Dysbiosis of Gut Microbiota in *Drosophila*.

Structure-Based Virtual Screening Protocol for in Silico Identification of Potential Thyroid Disrupting Chemicals Targeting Transthyretin.

Autism genes are selectively targeted by environmental pollutants including pesticides, heavy metals, bisphenol A, phthalates and many others in food, cosmetics or household products.

Advancing Biological Wastewater Treatment: Extended Anaerobic Conditions Enhance the Removal of Endocrine and Dioxin-like Activities.

Study of the inhibition effect of thiazone on muscle optical clearing.

Cell dedifferentiation, callus induction and somatic embryogenesis in *Crataegus* spp.

Activating Transcription Factor 4 (ATF4)-ATF3-C/EBP Homologous Protein (CHOP) Cascade Shows an Essential Role in the ER Stress-Induced Sensitization of Tetrachlorobenzoquinone-Challenged PC12 Cells to ROS-Mediated Apoptosis via Death Receptor 5 (DR5) Signaling.

Acrolein Is a Pathogenic Mediator of Alcoholic Liver Disease and the Scavenger Hydralazine Is Protective in Mice.

Diabetes Impairs the Aldehyde Detoxifying Capacity of the Retina.

Arsenic-induced mitochondrial oxidative damage is mediated by decreased PGC-1 β expression and its downstream targets in rat brain.

Control of optical and electrical properties of nanosheets by the chemical structure of the turning point in a foldable polymer.

Perinatal Exposure to Glufosinate Ammonium Herbicide Impairs Neurogenesis and Neuroblast Migration through Cytoskeleton Destabilization.

Photophysics, Dynamics, and Energy Transfer in Rigid Mimics of GFP-based Systems.

Toxicity of 3,5,6-trichloro-2-pyridinol tested at multiple stages of zebrafish (*Danio rerio*) development.

Optical coherence tomography angiography offers comprehensive evaluation of skin optical clearing in vivo by quantifying optical properties and blood flow imaging simultaneously.

Embryotoxicity of nitrophenols to the early life stages of zebrafish (*Danio rerio*).

Joint toxic effects of the type-2 alkene electrophiles.

A New Versatile Water-Soluble Iniferter Platform for the Preparation of Molecularly Imprinted Nanoparticles by Photopolymerisation in Aqueous Media.

Effect of retinyl acetate on transglutaminase 2 activity in carcinogen treated rat liver.

Arsenic Exposure Induces Unscheduled Mitotic S Phase Entry Coupled with Cell Death in Mouse Cortical Astrocytes.

Involvement of endogenous antioxidant systems in the protective activity of pituitary adenylate cyclase-activating polypeptide against hydrogen peroxide-induced oxidative damages in cultured rat astrocytes.

Preparation of Methylated Products of A-type Procyanidin Trimers in Cinnamon Bark and Their Protective Effects on Pancreatic β -Cell.

Studies of Hematopoietic Cell Differentiation with a Ratiometric and Reversible Sensor of Mitochondrial Reactive Oxygen Species.

Safety assessment of a standardized polyphenolic extract of clove buds: Subchronic toxicity and mutagenicity studies.

Photoprecursor Approach Enables Preparation of Well-Performing Bulk-Heterojunction Layers Comprising a Highly Aggregating Molecular Semiconductor.

Pressurized liquid extraction-gas chromatography-mass spectrometry for confirming the photo-induced generation of dioxin-like derivatives and other cosmetic preservative photoproducts on artificial skin.

Induced lipid peroxidation in ram sperm: semen profile, DNA fragmentation and antioxidant status.

Functional optical coherence tomography of rat olfactory bulb with periodic odor stimulation.

Pretilachlor has the potential to induce endocrine disruption, oxidative stress, apoptosis and immunotoxicity during zebrafish embryo development.

Glycine supplementation in vitro enhances porcine preimplantation embryo cell number and decreases apoptosis but does not lead to live births.

The olive leaf extract oleuropein exerts protective effects against oxidant-induced cell death, concurrently displaying pro-oxidant activity in human hepatocarcinoma cells.

SIRT3 Mediates the Antioxidant Effect of Hydrogen Sulfide in Endothelial Cells.

Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) increases human hepatic stellate cell activation.

TRPV3 Channel Negatively Regulates Cell Cycle Progression and Safeguards the Pluripotency of Embryonic Stem Cells.

Adolescent pesticide exposures reported to Texas poison centers.

Evaluation of serum markers of blood redox homeostasis and inflammation in PCB naturally contaminated heifers undergoing decontamination.

Astaxanthin Inhibits Expression of Retinal Oxidative Stress and Inflammatory Mediators in Streptozotocin-Induced Diabetic Rats.

Divergent Effects of Dioxin- or Non-Dioxin-Like Polychlorinated Biphenyls on the Apoptosis of Primary Cell Culture from the Mouse Pituitary Gland.

Evaluation of functioning of mitochondrial electron transport chain with NADH and FAD autofluorescence.

Toward understanding the impacts of sediment contamination on a native fish species: transcriptional effects, EROD activity, and biliary PAH metabolites.

Acute Illness Associated with Exposure to a New Soil Fumigant Containing Dimethyl Disulfide-Hillsborough County, Florida, 2014.

Arsenite accumulation in the mouse eye.

Synthesis, Cytotoxic Activity on Leukemia Cell Lines and Quantitative Structure-Activity Relationships (QSAR) Studies of Morita-Baylis-Hillman Adducts.

Evaluating the Effects of Tetrachloro-1,4-benzoquinone, an Active Metabolite of Pentachlorophenol, on the Growth of Human Breast Cancer Cells.

The combined effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and the phytoestrogen genistein on steroid hormone secretion, AhR and ER β expression and the incidence of apoptosis in granulosa cells of medium porcine follicles.

Delivery of a protein transduction domain-mediated Prdx6 protein ameliorates oxidative stress-induced injury in human and mouse neuronal cells.

Total ocular surface amniotic membrane transplantation for paraquat-induced ocular surface injury.

Interpreting biomonitoring data for 2,4-dichlorophenoxyacetic acid: Update to Biomonitoring Equivalents and population biomonitoring data.

Discovery of a novel neuroprotectant, BHDPC, that protects against MPP+/MPTP-induced neuronal death in multiple experimental models.

Artificial sweetener neohesperidin dihydrochalcone showed antioxidative, anti-inflammatory and anti-apoptosis effects against paraquat-induced liver injury in mice.

Differential effects of bevacizumab, ranibizumab and aflibercept on cell viability, phagocytosis and mitochondrial bioenergetics of retinal pigment epithelial cell.

Scavenging of Toxic Acrolein by Resveratrol and Hesperetin and Identification of Adducts.

[The effect of Wnt signaling pathway on paraquat induced PC12 cells damage].

Protective effects of Ndfip1 on MPP(+)-induced apoptosis in MES23.5 cells and its underlying mechanisms.

Effects of atrazine on egg masses of the yellow-spotted salamander (*Ambystoma maculatum*) and its endosymbiotic alga (*Oophila amblystomatis*).

Atrazine Triggers the Extrinsic Apoptosis Pathway in Lymphocytes of the Frog *Pelophylax nigromaculata* in Vivo.

Antifungal, Phytotoxic, and Cytotoxic Activities of Metabolites from *Epichloa bromicola*, a Fungus Obtained from *Elymus tangutorum* Grass.

Cytotoxicity on *Allium cepa* of the two main sulcotriene photoproducts, xanthene-1,9-dione-3,4-dihydro-6-methylsulphonyl and 2-chloro-4-mesylbenzoic acid.

Diquat causes caspase-independent cell death in SH-SY5Y cells by production of ROS independently of mitochondria.

Caspase-2 protects against oxidative stress in vivo.

Enantioselective and Synergetic Toxicity of Axial Chiral Herbicide Propisochlor to SP2/O Myeloma Cells.

Effect of acetochlor on transcription of genes associated with oxidative stress, apoptosis, immunotoxicity and endocrine disruption in the early life stage of zebrafish.

L-F001, a multifunctional ROCK inhibitor prevents paraquat-induced cell death through attenuating ER stress and mitochondrial dysfunction in PC12 cells.

[A Case of Corneal Injury due to Herbicide Containing Paraquat: Effectiveness of 2% Rebamipide Eye Drops].

Acute effects of a prooxidant herbicide on the microalga *Chlamydomonas reinhardtii*: Screening cytotoxicity and genotoxicity endpoints.

Cyhalofop-butyl has the potential to induce developmental toxicity, oxidative stress and apoptosis in early life stage of zebrafish (*Danio rerio*).

Proteomics analysis of *Xenopus laevis* gonad tissue following chronic exposure to atrazine.

Level of UV-B radiation influences the effects of glyphosate-based herbicide on the spotted salamander.

Atrazine Causes Autophagy- and Apoptosis-Related Neurodegenerative Effects in Dopaminergic Neurons in the Rat Nigrostriatal Dopaminergic System.

Effects of realistic doses of atrazine, metolachlor, and glyphosate on lipid peroxidation and diet-derived antioxidants in caged honey bees (*Apis mellifera*).

Adiponectin attenuates lung fibroblasts activation and pulmonary fibrosis induced by paraquat.

[The study of kidney injury in rats with acute paraquat poisoning].

$\hat{\pm}$, $\hat{2}$ -Unsaturated aldehyde pollutant acrolein suppresses cardiomyocyte contractile function: Role of TRPV1 and oxidative stress.

[Inhibition of pulmonary nuclear factor $\hat{\text{B}}$ and tumor necrosis factor $\hat{\pm}$ expression by diallyl sulfide in rats with paraquat poisoning].

Acrolein-Induced Oxidative Stress and Cell Death Exhibiting Features of Apoptosis in the Yeast *Saccharomyces cerevisiae* Deficient in SOD1.

Paraquat induces epithelial-mesenchymal transition-like cellular response resulting in fibrogenesis and the prevention of apoptosis in human pulmonary epithelial cells.

ROS-triggered signaling pathways involved in the cytotoxicity and tumor promotion effects of pentachlorophenol and tetrachlorohydroquinone.

[Effect of reactive oxygen species induced by paraquat on neutrophil apoptosis].

Modeling of degradation kinetic and toxicity evaluation of herbicides mixtures in water using the UV/H₂O₂ process.

PSTK is a novel gene associated with early lung injury in Paraquat Poisoning.

Atrazine induces apoptosis of SH-SY5Y human neuroblastoma cells via the regulation of Bax/Bcl-2 ratio and caspase-3-dependent pathway.

Molecular mechanisms of acrolein toxicity: relevance to human disease.

Effects of atrazine on the proliferation and cytotoxicity of murine lymphocytes with the use of carboxyfluorescein succinimidyl ester-based flow cytometric approaches.

Extracellular signal-regulated kinase pathway play distinct role in acetochlor-mediated toxicity and intrinsic apoptosis in A549 cells.

Clostridium tertium bacteremia in a patient with glyphosate ingestion.

Acute effects of acrolein in human volunteers during controlled exposure.

Effects of Atrazine on the Development of Neural System of Zebrafish, *Danio rerio*.

Enhancement of the acrolein-induced production of reactive oxygen species and lung injury by GADD34.

Acute and long-term ocular effects of acrolein vapor on the eyes and potential therapies.

Oral Administration of 4-Hydroxy-3-Methoxycinnamaldehyde Attenuates Atopic Dermatitis by Inhibiting T Cell and Keratinocyte Activation.

Topically applied metal chelator reduces thermal injury progression in a rat model of brass comb burn.

Methylated arsenic metabolites bind to PML protein but do not induce cellular differentiation and PML-RAR α protein degradation.

Coniferyl aldehyde attenuates radiation enteropathy by inhibiting cell death and promoting endothelial cell function.

Cinnamaldehyde Contributes to Insulin Sensitivity by Activating PPAR α , PPAR β , and RXR.

Protection of HepG2 cells against acrolein toxicity by 2-cyano-3,12-dioxooleana-1,9-dien-28-imidazole via glutathione-mediated mechanism.

Measuring Rates of Herbicide Metabolism in Dicot Weeds with an Excised Leaf Assay.

In Silico Approach To Identify Potential Thyroid Hormone Disruptors among Currently Known Dust Contaminants and Their Metabolites.

Leaf Age-Dependent Photoprotective and Antioxidative Response Mechanisms to Paraquat-Induced Oxidative Stress in *Arabidopsis thaliana*.

A disposable evanescent wave fiber optic sensor coated with a molecularly imprinted polymer as a selective fluorescence probe.

Accumulation of electrophilic aldehydes during postovulatory aging of mouse oocytes causes reduced fertility, oxidative stress, and apoptosis.

Anti-obesity and anti-hyperglycemic effects of cinnamaldehyde via altered ghrelin secretion and functional impact on food intake and gastric emptying.

Cinnamaldehyde derivative (CB-PIC) sensitizes chemo-resistant cancer cells to drug-induced apoptosis via suppression of MDR1 and its upstream STAT3 and AKT signalling.

Pesticide concentrations in frog tissue and wetland habitats in a landscape dominated by agriculture.

Cytotoxicity of PEGylated liposomes co-loaded with novel pro-apoptotic drug NCL-240 and the MEK inhibitor cobimetinib against colon carcinoma in vitro.

PKC in rat dorsal raphe nucleus plays a key role in sleep-wake regulation.

Potential Value of Cellulose Synthesis Inhibitors Combined With PHMB in the Treatment of *Acanthamoeba* Keratitis.

The aryl hydrocarbon receptor suppresses cigarette-smoke-induced oxidative stress in association with dioxin response element (DRE)-independent regulation of sulfiredoxin 1.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin Alters Lipid Metabolism and Depletes Immune Cell Populations in the Jejunum of C57BL/6 Mice.

Modeling the Dynamic AMD-Associated Chronic Oxidative Stress Changes in Human ESC and iPSC-Derived RPE Cells.

Correlation between dioxin and endometriosis: an epigenetic route to unravel the pathogenesis of the disease.

The adverse outcome pathway for rodent liver tumor promotion by sustained activation of the aryl hydrocarbon receptor.

Graphene-like two-dimensional layered nanomaterials: applications in biosensors and nanomedicine.

KML001 Induces Apoptosis and Autophagic Cell Death in Prostate Cancer Cells via Oxidative Stress Pathway.

HMME combined with green light-emitting diode irradiation results in efficient apoptosis on human tongue squamous cell carcinoma.

NADPH Oxidase-Mediated Superoxide Production by Intermediary Bacterial Metabolites of Dibenzofuran: A Potential Cause for Trans-Mitochondrial Membrane Potential ($\Delta\psi_m$) Collapse in Human Hepatoma Cells.

Yusho and its latest findings-A review in studies conducted by the Yusho Group.

Neuroendocrine factors regulate retinoic acid receptors in normal and hypoplastic lung development.

Tetramethylpyrazine (TMP) protects against sodium arsenite-induced nephrotoxicity by suppressing ROS production, mitochondrial dysfunction, pro-inflammatory signaling pathways and programmed cell death.

p-Cresyl sulfate aggravates cardiac dysfunction associated with chronic kidney disease by enhancing apoptosis of cardiomyocytes.

The Use of Chemical-Chemical Interaction and Chemical Structure to Identify New Candidate Chemicals Related to Lung Cancer.

Increased expression of activated pSTAT3 and PIM-1 in the pulmonary vasculature of experimental congenital diaphragmatic hernia.

Aminomethylphosphonic acid and methoxyacetic acid induce apoptosis in prostate cancer cells.

Involvement of iron depletion in palmitate-induced lipotoxicity of beta cells.

[Latest Findings of Yusho and Its Therapeutic Development].

The aryl hydrocarbon receptor (AhR) mediates resistance to apoptosis induced in breast cancer cells.

The drosophila T-box transcription factor midline functions within Insulin/Akt and c-Jun-N terminal kinase stress-reactive signaling pathways to regulate interommatial bristle formation and cell survival.

Anti-leukemic effect of sodium metaarsenite (KML001) in acute myeloid leukemia with breaking-down the resistance of cytosine arabinoside.

Time- and spectrally resolved characteristics of flavin fluorescence in U87MG cancer cells in culture.

2,3,7,8-Tetrachlorodibenzo-p-dioxin modulates estradiol-induced aldehydic DNA lesions in human breast cancer cells through alteration of CYP1A1 and CYP1B1 expression.

p-Cresol mediates autophagic cell death in renal proximal tubular cells.

Non-dioxin-like polychlorinated biphenyls (PCB 101, PCB 153 and PCB 180) induce chondrocyte cell death through multiple pathways.

Prevention of pulmonary hypoplasia and pulmonary vascular remodeling by antenatal simvastatin treatment in nitrofen-induced congenital diaphragmatic hernia.

Differential gene expression patterns in developing sexually dimorphic rat brain regions exposed to antiandrogenic, estrogenic, or complex endocrine disruptor mixtures: glutamatergic synapses as target.

Chronic cardiovascular disease-associated gene network analysis in human umbilical vein endothelial cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Estrogenic endocrine-disrupting chemicals modulate the production of inflammatory mediators and cell viability of lipopolysaccharide-stimulated macrophages.

Inorganic Arsenic-induced cellular transformation is coupled with genome wide changes in chromatin structure, transcriptome and splicing patterns.

The cellular and molecular progression of mitochondrial dysfunction induced by 2,4-dinitrophenol in developing zebrafish embryos.

Cerenkov-specific contrast agents for detection of pH in vivo.

Cardiac toxicity by sublethal 2,3,7,8-tetrachlorodibenzo-p-dioxin correlates with its anti-proliferation effect on cardiomyocytes in zebrafish embryos.

Effect of uraemia on endothelial cell damage is mediated by the integrin linked kinase pathway.

Novel heat shock protein 90 inhibitor NVP-AUY922 synergizes with the histone deacetylase inhibitor PXD101 in induction of death of anaplastic thyroid carcinoma cells.

Metabolic disturbances of the vitamin A pathway in human diaphragmatic hernia.

MicroRNA-21, up-regulated by arsenite, directs the epithelial-mesenchymal transition and enhances the invasive potential of transformed human bronchial epithelial cells by targeting PDCD4.

Enhancement of cytotoxic effect on human head and neck cancer cells by combination of photodynamic therapy and sulforaphane.

Volatile emission of decomposing pig carcasses (*Sus scrofa domesticus* L.) as an indicator for the postmortem interval.

Decidual β -carotene-15,15'-oxygenase-1 and 2 (BCMO1,2) expression is increased in nitrofen model of congenital diaphragmatic hernia.

Effects of acute hypercapnia with and without acidosis on lung inflammation and apoptosis in experimental acute lung injury.

Transcriptional regulation of human paraoxonase 1 by PXR and GR in human hepatoma cells.

Non-Cytotoxic Quantum Dot-Chitosan Nanogel Biosensing Probe for Potential Cancer Targeting Agent.

Light Inhibition of Shoot Regeneration Is Regulated by Endogenous Abscisic Acid Level in Calli Derived from Immature Barley Embryos.

Structural elucidation of metolachlor photoproducts by liquid chromatography/high-resolution tandem mass spectrometry.

Roles of oxidative stress and the ERK1/2, PTEN and p70S6K signaling pathways in arsenite-induced autophagy.

Homoleptic Tris-Diphosphine Re(I) and Re(II) Complexes and Re(II) Photophysics and Photochemistry.

A fetal whole ovarian culture model for the evaluation of CrVI-induced developmental toxicity during germ cell nest breakdown.

Snapping Turtles (*Chelydra serpentina*) from Canadian Areas of Concern across the southern Laurentian Great Lakes: Chlorinated and brominated hydrocarbon contaminants and metabolites in relation to circulating concentrations of thyroxine and vitamin A.

Red palm oil-supplemented and biofortified cassava gari increase the carotenoid and retinyl palmitate concentrations of triacylglycerol-rich plasma in women.

Assessing the environmental fate of S-metolachlor, its commercial product Mercantor Gold[®] and their photoproducts using a water-sediment test and in silico methods.

Efficient removal of sulcotrione and its formulated compound Tangenta[®] in aqueous TiO₂ suspension: Stability, photoproducts assessment and toxicity.

The role of thioredoxin reductase and glutathione reductase in plumbagin-induced, reactive oxygen species-mediated apoptosis in cancer cell lines.

Synthesis, Photophysics, and Self-Assembly of Furan-Embedded Heteroarenes.

Intestinal absorption mechanisms of MTBH, a novel hesperetin derivative, in Caco-2 cells, and potential involvement of monocarboxylate transporter 1 and multidrug resistance protein 2.

2,3,7,8-Tetrachlorodibenzo-p-dioxin differentially suppresses angiogenic responses in human placental vein and artery endothelial cells.

Tumor necrosis factor- α inhibits effects of aryl hydrocarbon receptor ligands on cell death in human lymphocytes.

Low-level sodium arsenite induces apoptosis through inhibiting TrxR activity in pancreatic β -cells.

Two persistent organic pollutants which act through different xenosensors (α -endosulfan and 2,3,7,8 tetrachlorodibenzo-p-dioxin) interact in a mixture and downregulate multiple genes involved in human hepatocyte lipid and glucose metabolism.

The aryl hydrocarbon receptor-dependent disruption of contact inhibition in rat liver WB-F344 epithelial cells is linked with induction of survivin, but not with inhibition of apoptosis.

Protective effect of telmisartan treatment against arsenic-induced testicular toxicity in rats.

Lipid Peroxide-Derived Short-Chain Carbonyls Mediate Hydrogen Peroxide-Induced and Salt-Induced Programmed Cell Death in Plants.

A bioassay to measure energy metabolism in mouse colonic crypts, organoids, and sorted stem cells.

A rapid in vivo zebrafish model to elucidate oxidative stress-mediated PCB126-induced apoptosis and developmental toxicity.

Pharmacokinetic and Genomic Effects of Arsenite in Drinking Water on Mouse Lung in a 30-Day Exposure.

Mechanisms of Fatal Cardiotoxicity following High-Dose Cyclophosphamide Therapy and a Method for Its Prevention.

Paraquat exposure induces behavioral deficits in larval zebrafish during the window of dopamine neurogenesis.

Glucose stimulates neurotensin secretion from the rat small intestine by mechanisms involving SGLT1 and GLUT2, leading to cell depolarization and calcium influx.

Fabrication of Two-Component, Brush-on-Brush Topographical Microstructures by Combination of Atom-Transfer Radical Polymerization with Polymer End-Functionalization and Photopatterning.

Lipoamide Acts as an Indirect Antioxidant by Simultaneously Stimulating Mitochondrial Biogenesis and Phase II Antioxidant Enzyme Systems in ARPE-19 Cells.

Critical Role of TAK1-Dependent Nuclear Factor- κ B Signaling in 2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced Astrocyte Activation and Subsequent Neuronal Death.

Oxidative stress and human spermatozoa: diagnostic and functional significance of aldehydes generated as a result of lipid peroxidation.

Lithium protects against paraquat neurotoxicity by NRF2 activation and miR-34a inhibition in SH-SY5Y cells.

Amphiphilic zinc phthalocyanine photosensitizers: synthesis, photophysical properties and in vitro studies for photodynamic therapy.

Identification of unwanted photoproducts of cosmetic preservatives in personal care products under ultraviolet-light using solid-phase microextraction and micro-matrix solid-phase dispersion.

Sex-related differences in murine hepatic transcriptional and proteomic responses to TCDD.

Expression of the aryl hydrocarbon receptor in growth plate cartilage and the impact of its local modulation on longitudinal bone growth.

Synthesis of phenstatin/isocombretastatin-chalcone conjugates as potent tubulin polymerization inhibitors and mitochondrial apoptotic inducers.

Triphenyl phosphate-induced developmental toxicity in zebrafish: potential role of the retinoic acid receptor.

Antioxidant compounds in the seaweed *Gelidiella acerosa* protects human Peripheral Blood Mononuclear Cells against TCDD induced toxicity.

Inflammation and pyroptosis mediate muscle expansion in an interleukin-1^β (IL-1^β)-dependent manner.

Ulinastatin suppresses endoplasmic reticulum stress and apoptosis in the hippocampus of rats with acute paraquat poisoning.

Contraction of gut smooth muscle cells assessed by fluorescence imaging.

Distinct photoproducts of hydroxylated polybromodiphenyl ethers from different photodegradation pathways: a case study of 2'-HO-BDE-68.

How does hybrid bridging core modification enhance the nonlinear optical properties in donor- π -acceptor configuration? A case study of dinitrophenol derivatives.

Chloroacetic acid triggers apoptosis in neuronal cells via a reactive oxygen species-induced endoplasmic reticulum stress signaling pathway.

Neuroglobin Plays a Protective Role in Arsenite-Induced Cytotoxicity by Inhibition of Cdc42 and Rac1GTPases in Rat Cerebellar Granule Neurons.

Molecular biology of the stress response in the early embryo and its stem cells.

On-line biosensor for the detection of putative toxicity in water contaminants.

Close link between protoporphyrin IX accumulation and developmental toxicity induced by N-phenylimide herbicides in rats.

Transcriptional changes induced by in vivo exposure to pentachlorophenol (PCP) in *Chironomus riparius* (Diptera) aquatic larvae.

Proteome-wide light/dark modulation of thiol oxidation in cyanobacteria revealed by quantitative site-specific redox proteomics.

Therapeutical effects and mechanism of salubrinal combined with ulinastatin on treating paraquat poisoning.

[Effect of thalidomide in a mouse model of paraquat-induced acute lung injury and the underlying mechanisms].

Impaired development of female mouse offspring maternally exposed to simazine.

Induced pluripotent stem cells without c-Myc ameliorate retinal oxidative damage via paracrine effects and reduced oxidative stress in rats.

Metallothioneins attenuate paraquat-induced acute lung injury in mice through the mechanisms of anti-oxidation and anti-apoptosis.

Pesticides exposure as etiological factors of Parkinson's disease and other neurodegenerative diseases-- a mechanistic approach.

Characterization of paraquat-induced miRNA profiling response in hNPCs undergoing proliferation.

Effects of atrazine, metolachlor, carbaryl and chlorothalonil on benthic microbes and their nutrient dynamics.

Evaluation of the genotoxicity of a herbicide formulation containing 3,6-dichloro-2-methoxybenzoic acid (dicamba) in circulating blood cells of the tropical fish *Cnesterodon decemmaculatus*.

Influence of the spray adjuvant on the toxicity effects of a glyphosate formulation.

Mutation in *Drosophila methuselah* resists paraquat induced Parkinson-like phenotypes.

Acrolein induced both pulmonary inflammation and the death of lung epithelial cells.

Acrolein-exposed normal human lung fibroblasts in vitro: cellular senescence, enhanced telomere erosion, and degradation of Werner's syndrome protein.

Effect of glyphosate-based herbicide on early life stages of Java medaka (*Oryzias javanicus*): a potential tropical test fish.

Betanin attenuates paraquat-induced liver toxicity through a mitochondrial pathway.

Response of the green alga *Oophila* sp., a salamander endosymbiont, to a PSII-inhibitor under laboratory conditions.

Changes in phosphatidylinositol 3-kinase 55 kDa gamma expression and subcellular localization may be caspase 6 dependent in paraquat-induced SH-SY5Y apoptosis.

Heat shock protein-70 (Hsp-70) suppresses paraquat-induced neurodegeneration by inhibiting JNK and caspase-3 activation in *Drosophila* model of Parkinson's disease.

[The interventional effect of Xuebijing injection on expression of mitochondrial fusion protein 2 and the ultrastructure changes in lung tissues in rats with paraquat poisoning].

[Early acute liver injury in paraquat poisoning rats].

Protective effects of exogenous β -hydroxybutyrate on paraquat toxicity in rat kidney.

[Curcumin alleviated liver oxidative stress injury of rat induced by paraquat].

α -Tocopheryl succinate pre-treatment attenuates quinone toxicity in prostate cancer PC3 cells.

Rapamycin inhibits acrolein-induced apoptosis by alleviating ROS-driven mitochondrial dysfunction in male germ cells.

Cyanobacterium *Microcystis aeruginosa* response to pentachlorophenol and comparison with that of the microalga *Chlorella vulgaris*.

Chlorpropham and phenisopham: phototransformation and ecotoxicity of carbamates in the aquatic environment.

Toxicological properties of the thiolated inorganic arsenic and arsenosugar metabolite thio-dimethylarsinic acid in human bladder cells.

Systems biology approach for evaluating the biological impact of environmental toxicants in vitro.

Cytotoxicity and genotoxicity caused by yttrium oxide nanoparticles in HEK293 cells.

Inflammatory and cytotoxic effects of acrolein, nicotine, acetaldehyde and cigarette smoke extract on human nasal epithelial cells.

Assessment of DNA damage, cytotoxicity, and apoptosis in human hepatoma (HepG2) cells after flurochloridone herbicide exposure.

The effects of 24-h exposure to carbaryl or atrazine on the locomotor performance and overwinter growth and survival of juvenile spotted salamanders (*Ambystoma maculatum*).

Degeneration modulates retinal response to transient exogenous oxidative injury.

Association between Agent Orange exposure and nonmelanotic invasive skin cancer: a pilot study.

Glyphosate commercial formulation causes cytotoxicity, oxidative effects, and apoptosis on human cells: differences with its active ingredient.

[Micro RNA alteration after paraquat induced PC12 cells damage and regulatory mechanism of bcl-2].

Chronic exposure to pentachlorophenol alters thyroid hormones and thyroid hormone pathway mRNAs in zebrafish.

Herbicide paraquat induces sex-specific variation of neuroinflammation and neurodegeneration in *Drosophila melanogaster*.

Catalase inhibition in diabetic rats potentiates DNA damage and apoptotic cell death setting the stage for cardiomyopathy.

Immune suppressive effect of cinnamaldehyde due to inhibition of proliferation and induction of apoptosis in immune cells: implications in cancer.

Metabolism of arsenic trioxide in acute promyelocytic leukemia cells.

Synthesis, characterization and in vitro study of biocompatible cinnamaldehyde functionalized magnetite nanoparticles (CPGF Nps) for hyperthermia and drug delivery applications in breast cancer.

Statil suppresses cancer cell growth and proliferation by the inhibition of tumor marker AKR1B10.

The pentachlorophenol metabolite tetrachlorohydroquinone induces massive ROS and prolonged p-ERK expression in splenocytes, leading to inhibition of apoptosis and necrotic cell death.

Cinnamaldehyde/chemotherapeutic agents interaction and drug-metabolizing genes in colorectal cancer.

Parkinson's disease, lights and melanocytes: looking beyond the retina.

Dual pH-sensitive oxidative stress generating micellar nanoparticles as a novel anticancer therapeutic agent.

Optimization of culturing conditions for toxicity testing with the alga *Oophila* sp. (Chlorophyceae), an amphibian endosymbiont.

Melatonin Reverses Fas, E2F-1 and Endoplasmic Reticulum Stress Mediated Apoptosis and Dysregulation of Autophagy Induced by the Herbicide Atrazine in Murine Splenocytes.

[The effect of selective phosphatase inhibitors Salubrinal on autophagy and apoptosis in the lung tissue of rats with acute paraquat poisoning].

Ectopic expression of the human MutT-type Nudix hydrolase, hMTH1, confers enhanced tolerance to oxidative stress in arabidopsis.

Trivalent methylated arsenic metabolites induce apoptosis in human myeloid leukemic HL-60 cells through generation of reactive oxygen species.

The optical property of core-shell nanosensors and detection of atrazine based on localized surface plasmon resonance (LSPR) sensing.

Photoprotective mechanism of the non-target organism *Arabidopsis thaliana* to paraquat exposure.

Recharging mitochondrial batteries in old eyes. Near infra-red increases ATP.

Acrolein activates cell survival and apoptotic death responses involving the endoplasmic reticulum in A549 lung cells.

Microalgae dual-head biosensors for selective detection of herbicides with fiber-optic luminescent O₂ transduction.

Health effects and arsenic species in urine of copper smelter workers.

p-Cresol affects reactive oxygen species generation, cell cycle arrest, cytotoxicity and inflammation/atherosclerosis-related modulators production in endothelial cells and mononuclear cells.

[Tetrachlorodibenzo-p-dioxin-induced cleft palate because of partial loss of cell polarity to interfere with apoptosis during early developmental stage].

Withania somnifera alleviates parkinsonian phenotypes by inhibiting apoptotic pathways in dopaminergic neurons.

Prenatal administration of all-trans retinoic acid upregulates leptin signaling in hypoplastic rat lungs with experimental congenital diaphragmatic hernia.

Increased pulmonary vascular expression of Krüppel-like factor 5 and activated survivin in experimental congenital diaphragmatic hernia.

Genetic deletion of LXR β prevents arsenic-enhanced atherosclerosis, but not arsenic-altered plaque composition.

Sodium arsenite induces apoptosis and Epstein-Barr virus reactivation in lymphoblastoid cells.

Potential involvement of chemicals in liver cancer progression: an alternative toxicological approach combining biomarkers and innovative technologies.

The N-terminal region of p27 inhibits HIF-1 α protein translation in ribosomal protein S6-dependent manner by regulating PHLPP-Ras-ERK-p90RSK axis.

A fluorescent nucleic acid nanodevice quantitatively images elevated cyclic adenosine monophosphate in membrane-bound compartments.

The novel regulations of MEF2A, CAMKK2, CALM3, and TNNT3 in ventricular hypertrophy induced by arsenic exposure in rats.

Nitrofen increases total retinol levels in placenta during lung morphogenesis in the nitrofen model of congenital diaphragmatic hernia.

Diet pills and the cataract outbreak of 1935: reflections on the evolution of consumer protection legislation.

Toxicological profile of ultrapure 2,2',3,4,4',5,5'-heptachlorobiphenyl (PCB 180) in adult rats.

Gestational and lactational exposure to the polychlorinated biphenyl mixture Aroclor 1254 modulates retinoid homeostasis in rat offspring.

Developmental exposure of mice to dioxin promotes transgenerational testicular inflammation and an increased risk of preterm birth in unexposed mating partners.

Statin-induced inhibition of breast cancer proliferation and invasion involves attenuation of iron transport: intermediacy of nitric oxide and antioxidant defence mechanisms.

Sodium arsenite induces ROS-dependent autophagic cell death in pancreatic β -cells.

Genotoxicity of sulcotrione pesticide and photoproducts on *Allium cepa* root meristem.

Activation of neuronal nitric oxide synthase (nNOS) signaling pathway in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced neurotoxicity.

Gold nanoshells-mediated bimodal photodynamic and photothermal cancer treatment using ultra-low doses of near infra-red light.

Thrombin-facilitated efflux of D-[3H]-aspartate from cultured astrocytes and neurons under hyponatremia and chemical ischemia.

Uremic toxins impair human bone marrow-derived mesenchymal stem cells functionality in vitro.

TCDD promotes lung tumors via attenuation of apoptosis through activation of the Akt and ERK1/2 signaling pathways.

Prenatal retinoic acid increases lipofibroblast expression in hypoplastic rat lungs with experimental congenital diaphragmatic hernia.

Increased uptake of dietary retinoids at the maternal-fetal barrier in the nitrofen model of congenital diaphragmatic hernia.

Elevated protein carbonyl and HIF-1 α levels in eyes with proliferative diabetic retinopathy.

Association of dioxin and other persistent organic pollutants (POPs) with diabetes: epidemiological evidence and new mechanisms of beta cell dysfunction.

Tetrachlorobenzoquinone induces acute liver injury, up-regulates HO-1 and NQO1 expression in mice model: the protective role of chlorogenic acid.

Cisplatin plus sodium arsenite and hyperthermia induces pseudo-G1 associated apoptotic cell death in ovarian cancer cells.

The thiocarbamate disulphide drug, disulfiram induces osteopenia in rats by inhibition of osteoblast function due to suppression of acetaldehyde dehydrogenase activity.

Alcohol oxidizing enzymes and ethanol-induced cytotoxicity in rat pancreatic acinar AR42J cells.

Poisoning injuries associated with water and wastewater treatment facilities.

Effects of incapacitant spray deployed in the restraint and arrest of detainees in the Metropolitan Police Service area, London, UK: a prospective study.

S cones: Evolution, retinal distribution, development, and spectral sensitivity.

The NRF2-KEAP1 pathway is an early responsive gene network in arsenic exposed lymphoblastoid cells.

Decreased apelin and apelin-receptor expression in the pulmonary vasculature of nitrofen-induced congenital diaphragmatic hernia.

Prenatal administration of retinoic acid increases the trophoblastic insulin-like growth factor 2 protein expression in the nitrofen model of congenital diaphragmatic hernia.

Elevated blood pressure in offspring of rats exposed to diverse chemicals during pregnancy.

Modulation of telomerase activity, bTERT and c-Myc induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin during Bovine Herpesvirus 1 infection in MDBK cells.

The aryl hydrocarbon receptor mediates raloxifene-induced apoptosis in estrogen receptor-negative hepatoma and breast cancer cells.

CYP1B1: a unique gene with unique characteristics.

KML001, a telomere-targeting drug, sensitizes glioblastoma cells to temozolomide chemotherapy and radiotherapy through DNA damage and apoptosis.

In utero and lactational exposure to a mixture of environmental contaminants detected in Canadian Arctic human populations alters retinoid levels in rat offspring with low margins of exposure.

Effects of AST-120 on blood concentrations of protein-bound uremic toxins and biomarkers of cardiovascular risk in chronic dialysis patients.

Gene-environment interactions in male reproductive health: special reference to the aryl hydrocarbon receptor signaling pathway.

Mode of action and dose-response framework analysis for receptor-mediated toxicity: The aryl hydrocarbon receptor as a case study.

p-cresyl sulphate has pro-inflammatory and cytotoxic actions on human proximal tubular epithelial cells.

Sodium meta-arsenite induces reactive oxygen species-dependent apoptosis, necrosis, and autophagy in both androgen-sensitive and androgen-insensitive prostate cancer cells.

Human Ntera2 cells as a predictive in vitro test system for developmental neurotoxicity.

Draft Genome Sequence of *Acetobacter tropicalis* Type Strain NBRC16470, a Producer of Optically Pure d-Glyceric Acid.

Low concentration of a dioxin (2, 3, 7, 8 TCDD) affects the glycosidases and Acid phosphatase activity in mice hepatocytes.

Transcriptional responses and embryotoxic effects induced by pyrene and methylpyrene in Japanese medaka (*Oryzias latipes*) early life stages exposed to spiked sediments.

Cytotoxic effects exerted by pentachlorophenol by targeting nodal pro-survival signaling pathways in human pancreatic cancer cells.

2,4,6-Trichlorophenol cytotoxicity involves oxidative stress, endoplasmic reticulum stress, and apoptosis.

A novel protective role for the innate immunity Toll-Like Receptor 3 (TLR3) in the retina via Stat3.

Aryl hydrocarbon receptor-dependent regulation of miR-196a expression controls lung fibroblast apoptosis but not proliferation.

Collateral sensitivity: ABCG2-overexpressing cells are more vulnerable to oxidative stress.

The role lipid aldehydes and ALEs in the pathogenesis of diabetic retinopathy.

[Experimental evaluation of pure traditional Chinese medical mouth rinse on skin and mucosa stimulation and bacteriostatic-bactericidal effect].

Human RAD23 homolog A is required for the nuclear translocation of apoptosis-inducing factor during induction of cell death.

Potential role of catalase in mice with lipopolysaccharide/D-galactosamine-induced fulminant liver injury.

The combined treatment with chloroquine and the enzymatic oxidation products of spermine overcomes multidrug resistance of melanoma M14 ADR2 cells: a new therapeutic approach.

Acute toxicity tests and meta-analysis identify gaps in tropical ecotoxicology for amphibians.

Magmas functions as a ROS regulator and provides cytoprotection against oxidative stress-mediated damages.

Critical role of cellular glutathione homeostasis for trivalent inorganic arsenite-induced oxidative damage in human bronchial epithelial cells.

Histological and histometrical study of the protective role of α -tocopherol against sodium arsenite toxicity in rat ovaries.

[The first stage of toxicology evaluation and analysis of 1502 pesticide samples].

Effects of uremic toxin p-cresol on proliferation, apoptosis, differentiation, and glucose uptake in 3T3-L1 cells.

Osteoactivin promotes osteoblast adhesion through HSPG and $\alpha_5\beta_1$ integrin.

Liquid crystal based sensors monitoring lipase activity: a new rapid and sensitive method for cytotoxicity assays.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces expression of p27(kip1) and FoxO3a in female rat cerebral cortex and PC12 cells.

Production of crude cellulase and xylanase from *Trichoderma harzianum* PPDDN10 NFCCI-2925 and its application in photocopier waste paper recycling.

Modulation of gene-expression profiles associated with sodium arsenite-induced cardiotoxicity by p-coumaric acid, a common dietary polyphenol.

p38 and extracellular signal-regulated kinases activations have opposite effects on primary-cultured rat cerebellar granule neurons exposed to sodium arsenite.

New insights into pesticide photoprotection.

[Research on the sodium arsenite and arsenic trioxide induced proliferation and apoptosis effects on human hepatocyte].

On the determination of the diagonal components of the optical activity tensor in chiral molecules.

Measurement and analysis of atomic hydrogen and diatomic molecular AlO, C2, CN, and TiO spectra following laser-induced optical breakdown.

Mechanism for the protective effect of diallyl disulfide against cyclophosphamide acute urotoxicity in rats.

Arsenic trioxide and other arsenical compounds inhibit the NLRP1, NLRP3, and NAIP5/NLRC4 inflammasomes.

Chemoprevention against arsenic-induced mutagenic DNA breakage and apoptotic liver damage in rat via antioxidant and SOD1 upregulation by green tea (*Camellia sinensis*) which recovers broken DNA resulted from arsenic-H₂O₂ related in vitro oxidant stress.

Viscous optical clearing agent for in vivo optical imaging.

Inhibitory and toxic effects of volatiles emitted by strains of *Pseudomonas* and *Serratia* on growth and survival of selected microorganisms, *Caenorhabditis elegans*, and *Drosophila melanogaster*.

Korean Red Ginseng water extract inhibits COX-2 expression by suppressing p38 in acrolein-treated human endothelial cells.

Effect of reverse photoperiod on in vitro regeneration and piperine production in *Piper nigrum* L.

3,3',4,4'-Tetrachlorobiphenyl-mediated decrease of serum thyroxine level in C57BL/6 and DBA/2 mice occurs mainly through enhanced accumulation of thyroxine in the liver.

Toxicity of pesticides associated with potato production, including soil fumigants, to snapping turtle eggs (*Chelydra serpentina*).

More than meets the eye in bacterial cellulose: biosynthesis, bioprocessing, and applications in advanced fiber composites.

Single-cell gel electrophoresis assay in the ten spotted live-bearer fish, *Cnesterodon decemmaculatus* (Jenyns, 1842), as bioassay for agrochemical-induced genotoxicity.

Treatment of acute paraquat intoxication using recommended megadose of vitamin C: a reappraisal.

Silymarin- and melatonin-mediated changes in the expression of selected genes in pesticides-induced Parkinsonism.

Aldose reductase regulates acrolein-induced cytotoxicity in human small airway epithelial cells.

[Effects of glyphosate on apoptosis and expressions of androgen-binding protein and vimentin mRNA in mouse Sertoli cells].

Impairment of Atg5-dependent autophagic flux promotes paraquat- and MPP⁺-induced apoptosis but not rotenone or 6-hydroxydopamine toxicity.

The reversal of paraquat-induced mitochondria-mediated apoptosis by cycloartenyl ferulate, the important role of Nrf2 pathway.

Curcumin analog 1, 5-bis (2-trifluoromethylphenyl)-1, 4-pentadien-3-one exhibits enhanced ability on Nrf2 activation and protection against acrolein-induced ARPE-19 cell toxicity.

Thyroid endocrine system disruption by pentachlorophenol: an in vitro and in vivo assay.

Using bosentan to treat paraquat poisoning-induced acute lung injury in rats.

Effect of acrolein, a hazardous air pollutant in smoke, on human middle ear epithelial cells.

Phytotoxicity of four photosystem II herbicides to tropical seagrasses.

Identification and ecotoxicity of degradation products of chloroacetamide herbicides from UV-treatment of water.

Mitochondrial susceptibility in a model of paraquat neurotoxicity.

The chiral herbicide beflubutamid (I): Isolation of pure enantiomers by HPLC, herbicidal activity of enantiomers, and analysis by enantioselective GC-MS.

Triketone toxicity: a report on two cases of sulcotrione poisoning.

Pharmacokinetic, neurochemical, stereological and neuropathological studies on the potential effects of paraquat in the substantia nigra pars compacta and striatum of male C57BL/6J mice.

Magnolol protects against oxidative stress-mediated neural cell damage by modulating mitochondrial dysfunction and PI3K/Akt signaling.

Cytotoxicity on human cells of Cry1Ab and Cry1Ac Bt insecticidal toxins alone or with a glyphosate-based herbicide.

MicroRNA-195 targets ADP-ribosylation factor-like protein 2 to induce apoptosis in human embryonic stem cell-derived neural progenitor cells.

Performance of a cyanobacteria whole cell-based fluorescence biosensor for heavy metal and pesticide detection.

In vitro effects of aldehydes present in tobacco smoke on gene expression in human lung alveolar epithelial cells.

Assessing the chronic toxicity of atrazine, permethrin, and chlorothalonil to the cladoceran *Ceriodaphnia cf. dubia* in laboratory and natural river water.

Effects of trifluralin on the mouse ovary.

Differential toxicity and gene expression in Caco-2 cells exposed to arsenic species.

Sodium tauroursodeoxycholate prevents paraquat-induced cell death by suppressing endoplasmic reticulum stress responses in human lung epithelial A549 cells.

Evaluation of the genotoxic and cytotoxic effects of glyphosate-based herbicides in the ten spotted live-bearer fish *Cnesterodon decemmaculatus* (Jenyns, 1842).

Lethal synergism between organic and inorganic wood preservatives via formation of an unusual lipophilic ternary complex.

Mixtures of glyphosate and surfactant TN20 accelerate cell death via mitochondrial damage-induced apoptosis and necrosis.

Paraquat-induced retinal degeneration is exaggerated in CX3CR1-deficient mice and is associated with increased retinal inflammation.

Impact of the redox-cycling herbicide diquat on transcript expression and antioxidant enzymatic activities of the freshwater snail *Lymnaea stagnalis*.

[Glyphosate and its formulations--toxicity, occupational and environmental exposure].

Genotoxic potential of two herbicides and their active ingredients assessed with comet assay on a fish cell line, epithelioma papillosum cyprini (EPC).

Developmental abnormalities in chicken embryos exposed to N-nitrosoatrazine.

The uremic toxin acrolein promotes suicidal erythrocyte death.

Immunotoxicity of atrazine in Balb/c mice.

Influence of pH, light cycle, and temperature on ecotoxicity of four sulfonylurea herbicides towards *Lemna gibba*.

Oral exposure to the herbicide simazine induces mouse spleen immunotoxicity and immune cell apoptosis.

Paraquat research: do recent advances in limiting its toxicity make its use safer?

The antidote effect of quinone oxidoreductase 2 inhibitor against paraquat-induced toxicity in vitro and in vivo.

Slow accumulation of mutations in *Xpc*^{-/-} mice upon induction of oxidative stress.

Glyphosate and AMPA inhibit cancer cell growth through inhibiting intracellular glycine synthesis.

Mitochondria-targeted antioxidant peptide SS31 protects the retinas of diabetic rats.

Wnt/ β -catenin signaling protects mouse liver against oxidative stress-induced apoptosis through the inhibition of forkhead transcription factor FoxO3.

Chemical composition and hypoglycemic and pancreas-protective effect of leaf essential oil from indigenous cinnamon (*Cinnamomum osmophloeum* Kanehira).

9-cis retinoic acid is the ALDH1A1 product that stimulates melanogenesis.

Central nervous system damage due to acute paraquat poisoning: an experimental study with rat model.

Early growth response protein 1 upregulation and nuclear translocation by 2'-benzyloxycinnamaldehyde induces prostate cancer cell death.

Inhibitory effects against pasture weeds in Brazilian Amazonia of natural products from the marine brown alga *Dictyota menstrualis*.

Cinnamaldehyde-induced apoptosis in human hepatoma PLC/PRF/5 cells involves the mitochondrial death pathway and is sensitive to inhibition by cyclosporin A and z-VAD-fmk.

Paraquat inhibits cell viability via enhanced oxidative stress and apoptosis in human neural progenitor cells.

Stimulation of suicidal erythrocyte death by trans-cinnamaldehyde.

Fast detection of oxygen by the naked eye using a stable metal-organic framework containing methyl viologen cations.

Synthesis and biological evaluation of novel neuroprotective agents for paraquat-induced apoptosis in human neuronal SH-SY5Y cells.

Combined theoretical and experimental study of the photophysics of asulam.

Differential regulation of GLUT1 activity in human corneal limbal epithelial cells and fibroblasts.

Singlet oxygen mediated DNA damage induced phototoxicity by ketoprofen resulting in mitochondrial depolarization and lysosomal destabilization.

Abnormalities in eelpout *Zoarces viviparus* upon chemical exposure.

Redox-sensitive glycogen synthase kinase 3^β-directed control of mitochondrial permeability transition: rheostatic regulation of acute kidney injury.

Role of mitogen-activated protein kinase cascades in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced apoptosis in neuronal pheochromocytoma cells.

ITE, a novel endogenous nontoxic aryl hydrocarbon receptor ligand, efficiently suppresses EAU and T-cell-mediated immunity.

Ets1 and heat shock factor 1 regulate transcription of the Transformer 2^β gene in human colon cancer cells.

Chitosan oligosaccharides attenuates oxidative-stress related retinal degeneration in rats.

Impaired cardiovascular function caused by different stressors elicits a common pathological and transcriptional response in zebrafish embryos.

Dual role of resveratrol in modulation of genotoxicity induced by sodium arsenite via oxidative stress and apoptosis.

Specific roles for Group V secretory PLA₂ in retinal iron-induced oxidative stress. Implications for age-related macular degeneration.

Temperature increase exacerbates apoptotic neuronal death in chemically-induced ischemia.

TCDD induces the expression of insulin-like growth factor binding protein 4 in 5L rat hepatoma cells: a cautionary tale of the use of this cell line in studies on dioxin toxicity.

2,3,7,8-TCDD induces neurotoxicity and neuronal apoptosis in the rat brain cortex and PC12 cell line through the down-regulation of the Wnt/ β -catenin signaling pathway.

The human Ah receptor: hints from dioxin toxicities to deregulated target genes and physiological functions.

Expression and potential role of apolipoprotein D on the death-survival balance of human colorectal cancer cells under oxidative stress conditions.

Multidrug resistance protein 1 (ABCC1) confers resistance to arsenic compounds in human myeloid leukemic HL-60 cells.

Deletion or activation of the aryl hydrocarbon receptor alters adult hippocampal neurogenesis and contextual fear memory.

Teratogenic effects of 4-nonylphenol on early embryonic and larval development of the catfish *Heteropneustes fossilis*.

Aryl hydrocarbon receptor and lung cancer.

Fentichlor photocontact dermatitis: a persistent enigma.

Arsenic induced neuronal apoptosis in guinea pigs is Ca²⁺ dependent and abrogated by chelation therapy: role of voltage gated calcium channels.

Arsenic increases Pi-mediated vascular calcification and induces premature senescence in vascular smooth muscle cells.

Chloroacetic acid induced neuronal cells death through oxidative stress-mediated p38-MAPK activation pathway regulated mitochondria-dependent apoptotic signals.

Prenatal exposure to a polychlorinated biphenyl (PCB) congener influences fixation duration on biological motion at 4-months-old: a preliminary study.

Isoflurane preconditioning confers cardioprotection by activation of ALDH2.

Oculomotor deficits in aryl hydrocarbon receptor null mouse.

Increased trophoblastic apoptosis mediated by neutrophil gelatinase-associated lipocalin (NGAL) activation in the nitrofen model of congenital diaphragmatic hernia.

Iron autointoxication in a 16-year-old girl: a protective role for hepcidin?

Estimation of the enamel and dentin mineral content from the refractive index.

Amniotic fluid stem cells rescue both in vitro and in vivo growth, innervation, and motility in nitrofen-exposed hypoplastic rat lungs through paracrine effects.

Inhibition of neurite outgrowth and alteration of cytoskeletal gene expression by sodium arsenite.

Mitochondria-targeted antioxidants and metabolic modulators as pharmacological interventions to slow ageing.

Inhibition of hepatocyte nuclear factor 1 and 4 alpha (HNF1 α and HNF4 α) as a mechanism of arsenic carcinogenesis.

Surface fluorescence studies of tissue mitochondrial redox state in isolated perfused rat lungs.

Induction of apoptotic death and retardation of neuronal differentiation of human neural stem cells by sodium arsenite treatment.

Contrasting retinoid and thyroid hormone status in differentially-contaminated northern fulmar colonies from the Canadian Arctic, Svalbard and the Faroe Islands.

Characterization of the carrier-mediated transport of ketoprofen, a nonsteroidal anti-inflammatory drug, in rabbit corneal epithelium cells.

Role of pigment epithelium-derived factor (PEDF) in arsenic-induced cell apoptosis of liver and brain in a rat model.

The accumulations of HIF-1 α and HIF-2 α by JNK and ERK are involved in biphasic effects induced by different levels of arsenite in human bronchial epithelial cells.

Ultrathin graphitic carbon nitride nanosheets: a novel peroxidase mimetic, Fe doping-mediated catalytic performance enhancement and application to rapid, highly sensitive optical detection of glucose.

Neuroglobin involvement in the course of arsenic toxicity in rat cerebellar granule neurons.

Dose-dependent folic acid and memantine treatments promote synergistic or additive protection against A β (25-35) peptide-induced apoptosis in SH-SY5Y cells mediated by mitochondria stress-associated death signals.

A single gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin disrupts the adult uterine response to estradiol in mice.

A simple protocol for the synthesis of dinitrosyl iron complexes with glutathione: EPR, optical, chromatographic and biological characterization of reaction products.

Biomonitoring of non-dioxin-like polychlorinated biphenyls in transgenic Arabidopsis using the mammalian pregnane X receptor system: a role of pectin in pollutant uptake.

2,4-Dinitrophenol induces neural differentiation of murine embryonic stem cells.

The aryl receptor inhibitor epigallocatechin-3-gallate protects INS-1E beta-cell line against acute dioxin toxicity.

Sodium arsenite and arsenic trioxide differently affect the oxidative stress, genotoxicity and apoptosis in A549 cells: an implication for the paradoxical mechanism.

670 nm light mitigates oxygen-induced degeneration in C57BL/6J mouse retina.

Novel Fluorometric Tool to Assess Mitochondrial Redox State of Isolated Perfused Rat Lungs after Exposure to Hyperoxia.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces microglial nitric oxide production and subsequent rat primary cortical neuron apoptosis through p38/JNK MAPK pathway.

Role of HO-1 in the arsenite-induced neurotoxicity in primary cultured cortical neurons.

Toxicogenomics-based identification of mechanisms for direct immunotoxicity.

Resveratrol stimulates mitochondrial bioenergetics to protect retinal pigment epithelial cells from oxidative damage.

2,4-dichlorophenol induces apoptosis in primary hepatocytes of grass carp (*Ctenopharyngodon idella*) through mitochondrial pathway.

A new in vivo model of pantothenate kinase-associated neurodegeneration reveals a surprising role for transcriptional regulation in pathogenesis.

Interaction of aldehydes derived from lipid peroxidation and membrane proteins.

Emptying of Intracellular Calcium Pool and Oxidative Stress Imbalance Are Associated with the Glyphosate-Induced Proliferation in Human Skin Keratinocytes HaCaT Cells.

Effective induction of cells expressing GABAergic neuronal markers from mouse embryonic stem cell.

Transplantation of induced pluripotent stem cells without C-Myc attenuates retinal ischemia and reperfusion injury in rats.

Retinoid X receptor activation is essential for docosahexaenoic acid protection of retina photoreceptors.

Quartz crystal microbalance measurements of mitochondrial depolarization predicting chemically induced toxicity of vascular cells and macrophages.

Breaking the carboxyl rule: lysine 96 facilitates reprotonation of the Schiff base in the photocycle of a retinal protein from *Exiguobacterium sibiricum*.

Cyp1a reporter zebrafish reveals target tissues for dioxin.

A screen for disruptors of the retinol (vitamin A) signaling pathway.

Dietary carnosine prevents early atherosclerotic lesion formation in apolipoprotein E-null mice.

Switchable skin window induced by optical clearing method for dermal blood flow imaging.

The protective effects of the proteasome inhibitor bortezomib (velcade) on ischemia-reperfusion injury in the rat retina.

Two-photon microscopy and fluorescence lifetime imaging of retinal pigment epithelial cells under oxidative stress.

Targeting ALDH1A1 to treat pigmentary disorders.

Quantification of triclosan, chlorinated triclosan derivatives, and their dioxin photoproducts in lacustrine sediment cores.

TGF β signaling induces expression of Gadd45b in retinal ganglion cells.

Sodium arsenite exposure inhibits AKT and Stat3 activation, suppresses self-renewal and induces apoptotic death of embryonic stem cells.

A novel colorimetric biosensor for monitoring and detecting acute toxicity in water.

Cytotoxic effects of p-cresol in renal epithelial tubular cells.

A simple and powerful approach for isolation of Arabidopsis mutants with increased tolerance to H₂O₂-induced cell death.

Teratogenic factors affect transcription factor expression.

[Biocatalytic desymmetric hydrolysis of 3-(4-chlorophenyl)-glutaronitrile to the key precursor of optically pure baclofen].

A new experimental model of ATP-sensitive K⁺ channel-independent insulinotropic action of glucose: a permissive role of cAMP for triggering of insulin release from rat pancreatic β -cells.

A novel murine model to deplete hepatic stellate cells uncovers their role in amplifying liver damage in mice.

The oxidative damage and inflammation caused by pesticides are reverted by lipoic acid in rat brain.

Dysregulated expression of secretogranin III is involved in neurotoxin-induced dopaminergic neuron apoptosis.

In vitro attenuation of acrolein-induced toxicity by phloretin, a phenolic compound from apple.

Comparison of chemical-induced changes in proliferation and apoptosis in human and mouse neuroprogenitor cells.

The changes of calretinin immunoreactivity in paraquat-induced nephrotoxic rats.

Long term toxicity of a Roundup herbicide and a Roundup-tolerant genetically modified maize.

Neuroprotective effects of tert-butylhydroquinone on paraquat-induced dopaminergic cell degeneration in C57BL/6 mice and in PC12 cells.

Recombinant adenovirus Ad-RUNrf2 reduces paraquat-induced A549 injury.

Activation of transcription factor MEF2D by bis(3)-cognitin protects dopaminergic neurons and ameliorates Parkinsonian motor defects.

Phenolic antioxidant 2,6-di-tert-butyl-p-cresol (vitamin E synthetic analogue) does not inhibit 1,1'-dimethyl-4,4'-bipyridium dichloride (paraquat)-induced structural chromosomal damage in cultured leukocytes of the dark-spotted-frog *Pelophylax (Rana) nigromaculatus*.

Effects of seven antifouling compounds on photosynthesis and inorganic carbon use in sugar kelp *Saccharina latissima* (Linnaeus).

Activator protein-1 regulation of murine aldehyde dehydrogenase 1a1.

Paraquat induces lung alveolar epithelial cell apoptosis via Nrf-2-regulated mitochondrial dysfunction and ER stress.

RNAi knockdown of rice SE5 gene is sensitive to the herbicide methyl viologen by the down-regulation of antioxidant defense.

A commercial formulation of glyphosate inhibits proliferation and differentiation to adipocytes and induces apoptosis in 3T3-L1 fibroblasts.

A step further toward glyphosate-induced epidermal cell death: involvement of mitochondrial and oxidative mechanisms.

5'-Aza-dC sensitizes paraquat toxic effects on PC12 cell.

Hepatic protein expression networks associated with masculinization in the female fathead minnow (*Pimephales promelas*).

[Therapeutic effects of epidermal growth factor (EGF) combined with plasma cryoprecipitate (CRYO) on the corneal injury induced by paraquat].

Prochelator BHAPI protects cells against paraquat-induced damage by ROS-triggered iron chelation.

Development of immobilized biophotonic beads consisting of *Photobacterium leiognathi* for the detection of heavy metals and pesticide.

[Effects of acrolein on apoptosis of H9c2 cardiomyocytes with hypoxia/reoxygenation injury].

Comparative risk assessment of permethrin, chlorothalonil, and diuron to coastal aquatic species.

siRNA-mediated knock-down of NOX3: therapy for hearing loss?

Determination of vitamin A and its metabolites in rat testis: possible involvement of vitamin A in testicular toxicity caused by molinate.

Glyphosate induced cell death through apoptotic and autophagic mechanisms.

Effect of chronic exposure to pendimethalin on the susceptibility of rainbow trout, *Oncorhynchus mykiss* L., to viral hemorrhagic septicemia virus (VHSV).

Effect of topical dimethylarsinic acid on the expression of apoptosis-related proteins in mouse skin.

Overexpression of TFAM, NRF-1 and myr-AKT protects the MPP(+)-induced mitochondrial dysfunctions in neuronal cells.

Resveratrol potentiates cytochrome P450 2 d22-mediated neuroprotection in maneb- and paraquat-induced parkinsonism in the mouse.

[The effects of Nrf2 gene expression induced by RU486 at different doses on A549 cell damage induced by paraquat].

The greening of pesticide-environment interactions: some personal observations.

Early cytotoxic and genotoxic effects of atrazine on Wistar rat liver: a morphological, immunohistochemical, biochemical, and molecular study.

Melatonin suppresses acrolein-induced IL-8 production in human pulmonary fibroblasts.

Minocycline prevents paraquat-induced cell death through attenuating endoplasmic reticulum stress and mitochondrial dysfunction.

New effects of Roundup on amphibians: predators reduce herbicide mortality; herbicides induce antipredator morphology.

A glyphosate-based herbicide induces necrosis and apoptosis in mature rat testicular cells in vitro, and testosterone decrease at lower levels.

Involvement of NADPH oxidase and glutathione in zinc-induced dopaminergic neurodegeneration in rats: similarity with paraquat neurotoxicity.

Disturbed relaxin signaling pathway and testicular dysfunction in mouse offspring upon maternal exposure to simazine.

Species-dependent effects of the phenolic herbicide ioxynil with potential thyroid hormone disrupting activity: modulation of its cellular uptake and activity by interaction with serum thyroid hormone-binding proteins.

Acrolein induces endoplasmic reticulum stress and causes airspace enlargement.

Endoplasmic reticulum stress impairs insulin signaling through mitochondrial damage in SH-SY5Y cells.

Prevention of paraquat-induced apoptosis in human neuronal SH-SY5Y cells by lipocalin-type prostaglandin D synthase.

Glyphosate as an acetylcholinesterase inhibitor in *Cnesterodon decemmaculatus*.

Symbiont-specific responses in foraminifera to the herbicide diuron.

A possible role of acrolein in diabetic retinopathy: involvement of a VEGF/TGF β signaling pathway of the retinal pigment epithelium in hyperglycemia.

Δ^9 -tetrahydrocannabinol (Δ^9 -THC) exerts a direct neuroprotective effect in a human cell culture model of Parkinson's disease.

Resveratrol inhibits paraquat-induced oxidative stress and fibrogenic response by activating the nuclear factor erythroid 2-related factor 2 pathway.

Neurotoxin-based models of Parkinson's disease.

Acute intoxication with the adjuvant itself for Gramoxone INTEON.

Series of dicyanamide-interlaced assembly of zinc-Schiff-base complexes: crystal structure and photophysical and thermal studies.

Towards an integrated biosensor array for simultaneous and rapid multi-analysis of endocrine disrupting chemicals.

Electrophilic aldehydes generated by sperm metabolism activate mitochondrial reactive oxygen species generation and apoptosis by targeting succinate dehydrogenase.

Differential effects of Bcl-2 and caspases on mitochondrial permeabilization during endogenous or exogenous reactive oxygen species-induced cell death: a comparative study of H₂O₂, paraquat, t-BHP, etoposide and TNF- α -induced cell death.

Diurnal dependence of growth responses to shade in *Arabidopsis*: role of hormone, clock, and light signaling.

Differences in susceptibility to inactivation of human aldehyde dehydrogenases by lipid peroxidation byproducts.

Significant damage-rescuing effects of wood vinegar extract in living *Caenorhabditis elegans* under oxidative stress.

Induction of tumor cell death through targeting tubulin and evoking dysregulation of cell cycle regulatory proteins by multifunctional cinnamaldehydes.

2'-Benzoyloxycinnamaldehyde-mediated DJ-1 upregulation protects MCF-7 cells from mitochondrial damage.

The cyclophosphamide metabolite, acrolein, induces cytoskeletal changes and oxidative stress in Sertoli cells.

Mitochondrial function is involved in regulation of cholesterol efflux to apolipoprotein (apo)A-I from murine RAW 264.7 macrophages.

Differentially expressed genes and pathways induced by organophosphates in human neuroblastoma cells.

PANC-1 cells proliferative response to ionizing radiation is related to GSK-3 β phosphorylation.

Silibinin ameliorates arsenic induced nephrotoxicity by abrogation of oxidative stress, inflammation and apoptosis in rats.

Toxicity of untreated and ozone-treated oil sands process-affected water (OSPW) to early life stages of the fathead minnow (*Pimephales promelas*).

Effects of choline on sodium arsenite-induced neural tube defects in chick embryos.

The epidemiology of chemical eye exposures reported to the Victorian Poisons Information Centre.

Tryptophan catabolism in cancer: beyond IDO and tryptophan depletion.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces apoptosis by disruption of intracellular calcium homeostasis in human neuronal cell line SHSY5Y.

Enhanced apoptosis in retinal pigment epithelium under inflammatory stimuli and oxidative stress.

Necrosis and apoptosis of renal tubular epithelial cells in rats exposed to 3-methyl-4-nitrophenol.

Opposed arsenite-mediated regulation of p53-survivin is involved in neoplastic transformation, DNA damage, or apoptosis in human keratinocytes.

Importance of riboflavin kinase in the pathogenesis of stroke.

Induction of anoikis by sodium arsenite in rat hepatoma FGC4 cells: comparison with cadmium chloride and implications for assessment of regulation of heat shock protein 70.

Baicalein induces G1 arrest in oral cancer cells by enhancing the degradation of cyclin D1 and activating AhR to decrease Rb phosphorylation.

FICZ, a tryptophan photoproduct, suppresses pulmonary eosinophilia and Th2-type cytokine production in a mouse model of ovalbumin-induced allergic asthma.

Mitochondrial inhibition in rat retinal cell cultures as a model of metabolic compromise: mechanisms of injury and neuroprotection.

Oxidative stress fuels *Trypanosoma cruzi* infection in mice.

Prenatal retinoic acid improves lung vascularization and VEGF expression in CDH rat.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces a proteomic pattern that defines cleft palate formation in mice.

Sodium arsenite down-regulates the expression of X-linked inhibitor of apoptosis protein via translational and post-translational mechanisms in hepatocellular carcinoma.

Combination of Rad001 (everolimus) and propachlor synergistically induces apoptosis through enhanced autophagy in prostate cancer cells.

Antenatal imatinib treatment reduces pulmonary vascular remodeling in a rat model of congenital diaphragmatic hernia.

Micronutrient status in lactating mothers before and after introduction of fortified flour: cross-sectional surveys in Maela refugee camp.

Adipose tissue and bone marrow-derived stem cells react similarly in an ischaemia-like microenvironment.

Aryl hydrocarbon receptor controls regulatory CD4⁺ T cell function.

Protein alteration of HepG2.2.15 cells induced by iron overload.

A novel method for the rapid determination of beta-amyloid toxicity on acute hippocampal slices using MTT and LDH assays.

Concomitant induction of heme oxygenase-1 attenuates the cytotoxicity of arsenic species from lumbricus extract in human liver HepG2 cells.

Cross-regulations among NRFs and KEAP1 and effects of their silencing on arsenic-induced antioxidant response and cytotoxicity in human keratinocytes.

Isolation and identification of C-19 fatty acids with anti-tumor activity from the spores of *Ganoderma lucidum* (reishi mushroom).

Endocrine-active chemicals in mammary cancer causation and prevention.

Neuroprotection of kaempferol by autophagy in models of rotenone-mediated acute toxicity: possible implications for Parkinson's disease.

[The pharmacological treatment of obesity: past, present and future].

Aldehyde dehydrogenases and cell proliferation.

Prenatal retinoic acid upregulates connexin 43 (Cx43) gene expression in pulmonary hypoplasia in the nitrofen-induced congenital diaphragmatic hernia rat model.

Melatonin as a neuroprotective agent in the rodent models of Parkinson's disease: is it all set to irrefutable clinical translation?

Nitrofen interferes with trophoblastic expression of retinol-binding protein and transthyretin during lung morphogenesis in the nitrofen-induced congenital diaphragmatic hernia model.

COUP-TFII gene expression is upregulated in embryonic pleuroperitoneal folds in the nitrofen-induced congenital diaphragmatic hernia rat model.

ErbB1/2 tyrosine kinase inhibitor mediates oxidative stress-induced apoptosis in inflammatory breast cancer cells.

Evidence of a suffocation alarm system within the periaqueductal gray matter of the rat.

Stability of the transthyretin molecule as a key factor in the interaction with a-beta peptide--relevance in Alzheimer's disease.

Prenatal exposure to TCDD triggers significant modulation of microRNA expression profile in the thymus that affects consequent gene expression.

A novel MYOC heterozygous mutation identified in a Chinese Uygur pedigree with primary open-angle glaucoma.

Inhibition of mitochondria- and endoplasmic reticulum stress-mediated autophagy augments temozolomide-induced apoptosis in glioma cells.

Exogenous inflammatory acne due to combined application of cosmetic and facial rubbing.

MiR-206 regulates neural cells proliferation and apoptosis via Otx2.

The pulmonary mesenchymal tissue layer is defective in an in vitro recombinant model of nitrofen-induced lung hypoplasia.

Retinoic acid rescues deficient airway innervation and peristalsis of hypoplastic rat lung explants.

In vitro evaluation of betamethasone esters for phototoxic potential.

Free base and metal complexes of 5,15-diaza-10,20-dimesitylporphyrins: synthesis, structures, optical and electrochemical properties, and aromaticities.

Dihydroxy-isosteviol methyl ester of Pulsatilla nigricans extract reduces arsenic-induced DNA damage in testis cells of male mice: its toxicity, drug-DNA interaction and signaling cascades.

1 α ,25 dihydroxyvitamin D3 enhances cellular defences against UV-induced oxidative and other forms of DNA damage in skin.

Dihydroxy-isosteviol-methyl-ester, an active biological component of Pulsatilla nigricans, reduces arsenic induced cellular dysfunction in testis of male mice.

Influence of the nitrogen content on the optical properties of CNx films.

Photophysical and theoretical insights on fullerene/zincphthalocyanine supramolecular interaction in solution.

Low dose and long term toxicity of sodium arsenite caused caspase dependent apoptosis based on morphology and biochemical character.

Stimulation and inhibition of bacterial growth by caffeine dependent on chloramphenicol and a phenolic uncoupler--a ternary toxicity study using microfluid segment technique.

Toxic effects of PCB126 and TCDD on shortnose sturgeon and Atlantic sturgeon.

Impaired adaptability of in vivo mitochondrial energetics to acute oxidative insult in aged skeletal muscle.

Blood levels of dioxins, furans, dioxin-like PCBs, and TEQs in general populations: a review, 1989-2010.

Plasma polymer coatings to aid retinal pigment epithelial growth for transplantation in the treatment of age related macular degeneration.

Real-time characterization of cytotoxicity using single-cell impedance monitoring.

Induction of Apoptosis in the Rat Bone Marrow Mesenchymal Stem Cells Following Sodium Arsenite Treatment with the Dose Lesser than that Used for Treatment of Malignant Patient.

[Mechanism of the apoptosis of rat pancreas islet β cell strain (INS-1 cells) induced by sodium arsenite].

In vitro propagation of *Dioscorea alata* var. *purpurea*.

Enhanced optical clearing of skin in vivo and optical coherence tomography in-depth imaging.

Changes in proteolytic enzymes mRNAs and proteins relevant for meat quality during myogenesis and hypoxia of primary bovine satellite cells.

Oxidant-induced cell death and Nrf2-dependent antioxidative response are controlled by Fra-1/AP-1.

[6]-Gingerol isolated from ginger attenuates sodium arsenite induced oxidative stress and plays a corrective role in improving insulin signaling in mice.

Removal efficiency and toxicity reduction of 4-chlorophenol with physical, chemical and biochemical methods.

Alleviative effect of quercetin on germ cells intoxicated by 3-methyl-4-nitrophenol from diesel exhaust particles.

Arsenite promotes apoptosis and dysfunction in microvascular endothelial cells via an alteration of intracellular calcium homeostasis.

Protective effect of curcumin against arsenic-induced apoptosis in murine splenocytes in vitro.

Developmental toxicity and endocrine disrupting potency of 4-azapyrene, benzo[b]fluorene and retene in the zebrafish *Danio rerio*.

Nrf2-dependent induction of proteasome and Pa28 β regulator are required for adaptation to oxidative stress.

First Report of Blight Caused by *Sclerotium rolfsii* on the Invasive Exotic Weed, *Vincetoxicum rossicum* (Pale Swallow-Wort), in Western New York.

Fish liver and seagull eggs, vitamin D-rich foods with a shadow: results from the Norwegian Fish and Game Study.

Structural nucleotide analogs are potent activators/inhibitors of pancreatic I^2 cell KATP channels: an emerging mechanism supporting their use as antidiabetic drugs.

Prospective experimental studies on the renal protective effect of ulinastatin after paraquat poisoning.

Protective Effect of Silymarin against Acrolein-Induced Cardiotoxicity in Mice.

Aberrant activation of ubiquitin D at G2 phase and apoptosis by carcinogens that evoke cell proliferation after 28-day administration in rats.

Involvement of cholesterol membrane transporter Niemann-Pick C1-like 1 in the intestinal absorption of lutein.

Transgenerational actions of environmental compounds on reproductive disease and identification of epigenetic biomarkers of ancestral exposures.

H₂O₂-induced secretion of tumor necrosis factor- α evokes apoptosis of cardiac myocytes through reactive oxygen species-dependent activation of p38 MAPK.

Biological analysis of endocrine-disrupting chemicals in animal meats from the Pearl River Delta, China.

Endocrine disruptors: a review of some sources, effects, and mechanisms of actions on behaviour and neuroendocrine systems.

Sex- and brain region-specific role of cytochrome c oxidase in 1-methyl-4-phenylpyridinium-mediated astrocyte vulnerability.

A comparison of mixture toxicity assessment: examining the chronic toxicity of atrazine, permethrin and chlorothalonil in mixtures to *Ceriodaphnia cf. dubia*.

Chronic oral exposure to the aldehyde pollutant acrolein induces dilated cardiomyopathy.

Comparative toxicity of antifouling compounds on the development of sea urchin.

Medical management of paraquat ingestion.

Cigarette smoke targets glutaredoxin 1, increasing s-glutathionylation and epithelial cell death.

Atrazine-induced apoptosis of splenocytes in BALB/C mice.

Paraquat induces epigenetic changes by promoting histone acetylation in cell culture models of dopaminergic degeneration.

Continuous hypoxia attenuates paraquat-induced cytotoxicity in the human A549 lung carcinoma cell line.

Acrolein - a pulmonary hazard.

The effects of acrolein on the thioredoxin system: implications for redox-sensitive signaling.

Kolaviron protects apoptotic cell death in PC12 cells exposed to atrazine.

Acrolein, an environmental toxin, induces cardiomyocyte apoptosis via elevated intracellular calcium and free radicals.

Lysine acetylsalicylate ameliorates lung injury in rats acutely exposed to paraquat.

Atrazine exposure affects growth, body condition and liver health in *Xenopus laevis* tadpoles.

Protective effects of chitosan oligosaccharide on paraquat-induced nephrotoxicity in rats.

Mitochondria are the main target organelle for trivalent monomethylarsonous acid (MMA(III))-induced cytotoxicity.

Acrolein inhalation prevents vascular endothelial growth factor-induced mobilization of Flk-1+/Sca-1+ cells in mice.

Letter to the editor regarding the article by Paganelli et al.

Biflavanone-kolaviron protects human dopaminergic SH-SY5Y cells against atrazine induced toxic insult.

Neonatal exposure to herbicide acetochlor alters pubertal development in female wistar rats.

Reply to the letter to the editor regarding our article (paganelli et Al., 2010).

Photostability and toxicity of pentachlorophenol and phenanthrene.

Acute toxicities of five commonly used antifouling booster biocides to selected subtropical and cosmopolitan marine species.

Sublethal toxicity of Roundup to immunological and molecular aspects of *Biomphalaria alexandrina* to *Schistosoma mansoni* infection.

Adverse effects of 2,4-dichlorophenoxyacetic acid on rat cerebellar granule cell cultures were attenuated by amphetamine.

DJ-1 mediates paraquat-induced dopaminergic neuronal cell death.

Protection by tetrahydroxystilbene glucoside against neurotoxicity induced by MPP+: the involvement of PI3K/Akt pathway activation.

[Antagonism of tert-butylhydroquinone on neurotoxicity and oxidative stress induced by paraquat in PC12].

Evaluation of carcinogenic potential of diuron in a rat mammary two-stage carcinogenesis model.

NBHA reduces acrolein-induced changes in ARPE-19 cells: possible involvement of TGF β 2.

[Clinical study of dynamic change of inflammatory factors in serum of acute paraquat rats].

[Induction of cell damage and change of miR-133b expression by paraquat in PC12 cells].

ASK1 overexpression accelerates paraquat-induced autophagy via endoplasmic reticulum stress.

Suicide victim of paraquat poisoning make suitable corneal donor.

2-Methoxycinnamaldehyde inhibits tumor angiogenesis by suppressing Tie2 activation.

Effects of paraquat and capsaicin on the expression of genes related to inflammatory, immune responses and cell death in immortalized human HaCat keratinocytes.

Apolipoprotein D mediates autocrine protection of astrocytes and controls their reactivity level, contributing to the functional maintenance of paraquat-challenged dopaminergic systems.

[Matricide in *Caenorhabditis elegans* as an example of programmed death of whole animal organism: role of mitochondrial oxidative stress].

Melatonin protects against oxidative stress in granular corneal dystrophy type 2 corneal fibroblasts by mechanisms that involve membrane melatonin receptors.

[Mechanism of cinnamic aldehyde-inducing apoptosis of chronic myeloid leukemic cells in vitro].

Protection against 1-methyl-4-phenylpyridinium ion (MPP⁺)-induced apoptosis by water extract of ginseng (*Panax ginseng* C.A. Meyer) in SH-SY5Y cells.

Isoarnottinin 4'-glucoside, a glycosylated coumarin from *Prangos uloptera*, with biological activity.

Submicron polymer particles containing fluorescent semiconductor nanocrystals CdSe/ZnS for bioassays.

Reduced coupling of oxidative phosphorylation in vivo precedes electron transport chain defects due to mild oxidative stress in mice.

Consumption of hydrogen water reduces paraquat-induced acute lung injury in rats.

Differential antiproliferation effect of 2'-benzoyloxycinnamaldehyde in K-ras-transformed cells via downregulation of thiol antioxidants.

Acrolein sensitizes human renal cancer Caki cells to TRAIL-induced apoptosis via ROS-mediated up-regulation of death receptor-5 (DR5) and down-regulation of Bcl-2.

Botrytone, a new naphthalenone pentaketide produced by *Botrytis fabae*, the causal agent of chocolate spot disease on *Vicia faba*.

Light history influences the response of the marine cyanobacterium *Synechococcus* sp. WH7803 to oxidative stress.

Growth inhibitory activities of oxyprenylated and non-prenylated naturally occurring phenylpropanoids in cancer cell lines.

Photodegradation of the herbicide imazethapyr in aqueous solution: effects of wavelength, pH, and natural organic matter (NOM) and analysis of photoproducts.

Murine hepatic aldehyde dehydrogenase 1a1 is a major contributor to oxidation of aldehydes formed by lipid peroxidation.

Optical sensing quantum dot-labeled polyacrolein particles prepared by layer-by-layer deposition technique.

Multifunctional microgel magnetic/optical traps for SERS ultradetection.

JNK3-mediated apoptotic cell death in primary dopaminergic neurons.

Correlation of seven biological factors (Hsp90a, p53, MDM2, Bcl-2, Bax, Cytochrome C, and Cleaved caspase3) with clinical outcomes of ALK+ anaplastic large-cell lymphoma.

Controlling viral immuno-inflammatory lesions by modulating aryl hydrocarbon receptor signaling.

Regulation of apoptosis in human melanoma and neuroblastoma cells by statins, sodium arsenite and TRAIL: a role of combined treatment versus monotherapy.

Mitochondrial respiratory complex I dysfunction promotes tumorigenesis through ROS alteration and AKT activation.

Low-level subchronic arsenic exposure from prenatal developmental stages to adult life results in an impaired glucose homeostasis.

Retinoic acid drives aryl hydrocarbon receptor expression and is instrumental to dioxin-induced toxicity during palate development.

Up-regulation of cyclin D1 by JNK1/c-Jun is involved in tumorigenesis of human embryo lung fibroblast cells induced by a low concentration of arsenite.

Exposure to 3-methyl-4-nitrophenol affects testicular morphology and induces spermatogenic cell apoptosis in immature male rats.

Discovery and biological characterization of 1-(1H-indol-3-yl)-9H-pyrido[3,4-b]indole as an aryl hydrocarbon receptor activator generated by photoactivation of tryptophan by sunlight.

Vitamin B12 protects against superoxide-induced cell injury in human aortic endothelial cells.

Proton MR spectroscopy of neural stem cells: does the proton-NMR peak at 1.28 ppm function as a biomarker for cell type or state?

Could *Malassezia* yeasts be implicated in skin carcinogenesis through the production of aryl-hydrocarbon receptor ligands?

Inducers of chemical hypoxia act in a gender- and brain region-specific manner on primary astrocyte viability and cytochrome C oxidase.

Mitochondrial dysfunction and oxidative stress contribute to the pathogenesis of spinocerebellar ataxia type 12 (SCA12).

Prenatal administration of retinoic acid upregulates connective tissue growth factor in the nitrofen CDH model.

Antenatal sildenafil treatment attenuates pulmonary hypertension in experimental congenital diaphragmatic hernia.

Prenatal administration of retinoic acid upregulates insulin-like growth factor receptors in the nitrofen-induced hypoplastic lung.

Perspectives on the potential involvement of the AH receptor-dioxin axis in cardiovascular disease.

Mushroom lectin protects arsenic induced apoptosis in hepatocytes of rodents.

Arsenite-induced apoptosis is prevented by selenite in A375 cell line.

Effect of quercetin on formation of choroidal neovascularization (CNV) in age-related macular degeneration(AMD).

Real-time flow cytometry for the kinetic analysis of oncosis.

Gene expression alterations in immune system pathways in the thymus after exposure to immunosuppressive chemicals.

Oxidative stress and hepatic stellate cell activation are key events in arsenic induced liver fibrosis in mice.

Suppression of the proinflammatory response of metastatic melanoma cells increases TRAIL-induced apoptosis.

Expression of the Wilm's tumor gene WT1 during diaphragmatic development in the nitrofen model for congenital diaphragmatic hernia.

Downregulation of Midkine gene expression and its response to retinoic acid treatment in the nitrofen-induced hypoplastic lung.

Prenatal retinoic acid treatment upregulates late gestation lung protein 1 in the nitrofen-induced hypoplastic lung in late gestation.

Resveratrol (3,5,4'-trihydroxystilbene) protects pregnant mother and fetus from the immunotoxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Polymorphism of TNF gene and CPOX gene in chemical industry workers].

Sequence analysis of MYOC and CYP1B1 in a Chinese pedigree of primary open-angle glaucoma.

Prenatal treatment with retinoic acid activates parathyroid hormone-related protein signaling in the nitrofen-induced hypoplastic lung.

Selective ascorbate toxicity in malignant mesothelioma: a redox Trojan mechanism.

2,3,7,8-tetrachlorodibenzo-p-dioxin induced autophagy in a bovine kidney cell line.

Photoproduction of catalase-insensitive peroxides on the donor side of manganese-depleted photosystem II: evidence with a specific fluorescent probe.

Disruption of embryonic vascular development in predictive toxicology.

A neural cell adhesion molecule-derived peptide, FGL, attenuates glial cell activation in the aged hippocampus.

All-trans retinoic acid protects against arsenic-induced uterine toxicity in female Sprague-Dawley rats.

Stereoselective metabolism of fenoxaprop-ethyl and its chiral metabolite fenoxaprop in rabbits.

Non-dioxin-like polychlorinated biphenyls interfere with neuronal differentiation of embryonic neural stem cells.

Inhibition by resistant starch of red meat-induced promutagenic adducts in mouse colon.

The significance of glutathione for photoprotection at contrasting temperatures in the alpine plant species *Soldanella alpina* and *Ranunculus glacialis*.

In vitro assessment of retinoic acid and aryl hydrocarbon receptor activity of treated effluent from 39 wastewater-treatment plants in Victoria, Australia.

In vitro modulation of intracellular receptor signaling and cytotoxicity induced by extracts of cyanobacteria, complex water blooms and their fractions.

Attenuating effect of lycopene and ellagic acid on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced spermiotoxicity and testicular apoptosis.

Using condition factor and blood variable biomarkers in fish to assess water quality.

Preparation of π -2-complexes of fullerenes by reduction. Crystal structure and optical properties of $\{Ni(dppp)\cdot(\pi-C_{70})\}\cdot(C_6H_4Cl_2)_0.5$.

Hydroxytyrosol, the phenolic compound of olive oil protects human PBMC against oxidative stress and DNA damage mediated by 2,3,7,8-TCDD.

A new tunable light-emitting and π -stacked hexa-ethyleneglycol naphthalene-bisimide oligomer: synthesis, photophysics and electrochemical properties.

Genotoxic effects of polychlorinated biphenyls (PCB 153, 138, 101, 118) in a fish cell line (RTG-2).

Development of a co-culture model for in vitro toxicological studies in Atlantic salmon.

The cross-pathway control system regulates production of the secondary metabolite toxin, sirodesmin PL, in the ascomycete, *Leptosphaeria maculans*.

Effect of oral coadministration of artesunate with ferrous sulfate on rat liver mitochondrial membrane permeability transition.

Arsenic and fluoride induce neural progenitor cell apoptosis.

Hepatic effects of a highly purified 2,2',3,4,4',5,5'-heptachlorbiphenyl (PCB 180) in male and female rats.

Metam sodium intoxication: the specific role of degradation products--methyl isothiocyanate and carbon disulphide--as a function of exposure.

Protective role of selenium against over-expression of cancer-related apoptotic genes induced by o-cresol in rats.

[Astaxanthin inhibits sodium azide-induced cytotoxicity in hepatocyte L-02 cells probably by H⁺ transferring function].

Identification of triclosan intermediates produced by oxidative degradation using TiO₂ in pure water and their endocrine disrupting activities.

Effect of dioxin exposure on several indices of blood redox status in lactating buffalo cows.

In vitro toxicity profiling of ultrapure non-dioxin-like polychlorinated biphenyl congeners and their relative toxic contribution to PCB mixtures in humans.

Free radical production, antioxidant capacity, and oxidative stress response signatures in fibroblasts from Lewis dwarf rats: effects of life span-extending peripubertal GH treatment.

Photo-driven optical oscillators in the kHz range based on push-pull hydroxyazopyridines.

Dioxin toxicity, aryl hydrocarbon receptor signaling, and apoptosis-persistent pollutants affect programmed cell death.

Light- and sodium azide-induced death of RGC-5 cells in culture occurs via different mechanisms.

Changes in DNA methylation and gene expression during 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced suppression of the lipopolysaccharide-stimulated IgM response in splenocytes.

Singlet oxygen mediated DNA degradation by copper nanoparticles: potential towards cytotoxic effect on cancer cells.

Chiral epoxides via borane reduction of 2-haloketones catalyzed by spiroborate ester: application to the synthesis of optically pure 1,2-hydroxy ethers and 1,2-azido alcohols.

Toxic pollutants emitted from thermal decomposition of phthalimide compounds.

Chlorinated benzenes cause concomitantly oxidative stress and induction of apoptotic markers in lung epithelial cells (A549) at nonacute toxic concentrations.

Effects of spermidine and p-cresol on polymorphonuclear cell apoptosis and function.

Intracellular trafficking of hyaluronic acid-chitosan oligomer-based nanoparticles in cultured human ocular surface cells.

Enhanced indirect fluorescence detection of p-nitrophenol, 2,4-dinitrophenol and trinitrophenol by micellar electrokinetic capillary chromatography with in-column optical-fiber LED-induced fluorescence detection.

Low-level laser therapy activates NF- κ B via generation of reactive oxygen species in mouse embryonic fibroblasts.

Chemo-enzymatic synthesis and properties of novel optically active cationics containing carbonate linkages.

In vitro assessment of iron effect on porcine ovarian granulosa cells: secretory activity, markers of proliferation and apoptosis.

DNA damage induced by shikonin in the presence of Cu(II) ions: potential mechanism of its activity to apoptotic cell death.

$\hat{\Gamma}^2$ -dicarbonyl enolates: a new class of neuroprotectants.

Calcium/calmodulin-dependent protein kinase IV involvement in the pathophysiology of glucotoxicity in rat pancreatic $\hat{\Gamma}^2$ -cells.

Cardiac-specific overexpression of catalase attenuates paraquat-induced myocardial geometric and contractile alteration: role of ER stress.

Rosmarinic acid antagonized 1-methyl-4-phenylpyridinium (MPP+)-induced neurotoxicity in MES23.5 dopaminergic cells.

Ecotoxicological effects of diuron and chlorotoluron nitrate-induced photodegradation products: monospecific and aquatic mesocosm-integrated studies.

Î±-Tocopherol is an effective Phase II enzyme inducer: protective effects on acrolein-induced oxidative stress and mitochondrial dysfunction in human retinal pigment epithelial cells.

Proteomic analysis of diaminochlorotriazine (DACT) adducts in three brain regions of Wistar rats.

PCB congener specific oxidative stress response by microarray analysis using human liver cell line.

Rasagiline protects against alpha-synuclein induced sensitivity to oxidative stress in dopaminergic cells.

Dose response assessment for effects of acute exposure to methyl isothiocyanate (MITC).

Hydroxytyrosol protects against oxidative damage by simultaneous activation of mitochondrial biogenesis and phase II detoxifying enzyme systems in retinal pigment epithelial cells.

Glyphosate-based herbicides produce teratogenic effects on vertebrates by impairing retinoic acid signaling.

Multiple stressor effects of high light irradiance and photosynthetic herbicides on growth and survival of the green alga *Chlamydomonas reinhardtii*.

Chlorothalonil and 2,4-D losses in surface water discharge from a managed turf watershed.

Acute atrazine exposure disrupts matrix metalloproteinases and retinoid signaling during organ morphogenesis in *Xenopus laevis*.

A deuterohemin peptide extends lifespan and increases stress resistance in *Caenorhabditis elegans*.

Paraquat and Parkinson's disease.

Resveratrol protects human retinal pigment epithelial cells from acrolein-induced damage.

Potential role of acrolein in neurodegeneration and in Alzheimer's disease.

Activation of apoptosis signal-regulating kinase 1 is a key factor in paraquat-induced cell death: modulation by the Nrf2/Trx axis.

Light modulated toxicity of isoproturon toward natural stream periphyton photosynthesis: a comparison between constant and dynamic light conditions.

Spontaneous mutation frequency is elevated in skin of harlequin (hq)/Big Blue mice.

Cigarette smoke total particulate matter increases mucous secreting cell numbers in vitro: a potential model of goblet cell hyperplasia.

The effects of atrazine on spotted salamander embryos and their symbiotic alga.

Studies on glyphosate-induced carcinogenicity in mouse skin: a proteomic approach.

Acrolein induces apoptosis through the death receptor pathway in A549 lung cells: role of p53.

Synthesis of sphingosine is essential for oxidative stress-induced apoptosis of photoreceptors.

Side-effects of glyphosate on the life parameters of *Eriopsis connexa* (Coleoptera: Coccinellidae) in Argentina.

P19 neuronal differentiation and retinoic acid metabolism as criteria to investigate atrazine, nitrite, and nitrate developmental toxicity.

NF-kappaB mediates MPP⁺-induced apoptotic cell death in neuroblastoma cells SH-EP1 through JNK and c-Jun/AP-1.

Environmental damage to the retina and preconditioning: contrasting effects of light and hyperoxic stress.

DJ-1 as a modulator of autophagy: an hypothesis.

Cytotoxic effect of trans-cinnamaldehyde on human leukemia K562 cells.

Bicyclic triterpenoid Iripallidal induces apoptosis and inhibits Akt/mTOR pathway in glioma cells.

Insulinotropic effect of cinnamaldehyde on transcriptional regulation of pyruvate kinase, phosphoenolpyruvate carboxykinase, and GLUT4 translocation in experimental diabetic rats.

Aqueous cinnamon extract (ACE-c) from the bark of *Cinnamomum cassia* causes apoptosis in human cervical cancer cell line (SiHa) through loss of mitochondrial membrane potential.

Cinnamaldehyde impairs high glucose-induced hypertrophy in renal interstitial fibroblasts.

Potential effects of the herbicide Diuron on mammary and urinary bladder two-stage carcinogenesis in a female Swiss mouse model.

Cinnamaldehydes inhibit thioredoxin reductase and induce Nrf2: potential candidates for cancer therapy and chemoprevention.

Composition, antimicrobial activity and in vitro cytotoxicity of essential oil from *Cinnamomum zeylanicum* Blume (Lauraceae).

Diquat derivatives: highly active, two-dimensional nonlinear optical chromophores with potential redox switchability.

Selective induction of catalase-mediated autophagy by dihydrocapsaicin in lung cell lines.

Characterization of developmental neurotoxicity of As, Cd, and Pb mixture: synergistic action of metal mixture in glial and neuronal functions.

An endogenous aryl hydrocarbon receptor ligand acts on dendritic cells and T cells to suppress experimental autoimmune encephalomyelitis.

Dioxin toxicity in vivo results from an increase in the dioxin-independent transcriptional activity of the aryl hydrocarbon receptor.

Embryonic Wnt gene expression in the nitrofen-induced hypoplastic lung using 3-dimensional imaging.

Recruitment maneuver in experimental acute lung injury: the role of alveolar collapse and edema.

The high level of RANTES in the ectopic milieu recruits macrophages and induces their tolerance in progression of endometriosis.

Suppression of hepatic oxidative events and regulation of eNOS expression in the liver by naringenin in fructose-administered rats.

hsa-miR-191 is a candidate oncogene target for hepatocellular carcinoma therapy.

The activated aryl hydrocarbon receptor synergizes mitogen-induced murine liver hyperplasia.

Arsenic-induced cell proliferation is associated with enhanced ROS generation, Erk signaling and CyclinA expression.

Clinical, pathologic, and ultrastructural studies of progressive macular hypomelanosis.

Protective effects of crude garlic by reducing iron-mediated oxidative stress, proliferation and autophagy in rats.

Prenatal retinoic acid upregulates pulmonary gene expression of PI3K and AKT in nitrofen-induced pulmonary hypoplasia.

2,3,7,8-Tetrachlorodibenzo-p-dioxin modifies expression and nuclear/cytosolic localization of bovine herpesvirus 1 immediate-early protein (bICP0) during infection.

Heart tissue of harlequin (hq)/Big Blue mice has elevated reactive oxygen species without significant impact on the frequency and nature of point mutations in nuclear DNA.

Anti-mutagenic and pro-apoptotic effects of apigenin on human chronic lymphocytic leukemia cells.

Manipulating tumor acidification as a cancer treatment strategy.

HET-CAM test for determining the possible eye irritancy of pesticides.

Sodium azide-associated laryngospasm after air bag deployment.

Implication of TAp73 in the p53-independent pathway of Puma induction and Puma-dependent apoptosis in primary cortical neurons.

2,3,7,8-Tetrachlorodibenzo-p-dioxin up-regulates stathmin 1 in the eye: suggestive evidence for the involvement of stathmin 1 in accelerated eye opening in mice induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Quantitative and statistical analysis of differences in sensitivity between Long-Evans and Han/Wistar rats following long-term exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Toxicity of Bromkal 70-5DE, a technical mixture of polybrominated diphenyl ethers, following 28 d of oral exposure in rats and impact of analysed impurities.

Prenatal developmental toxicity of gavage or feeding doses of 2-sec-butyl-4,6-dinitrophenol in rats.

The genome-wide expression profile of electroacupuncture in DNP-KLH immunized mice.

N-aryltriazole ribonucleosides with potent antiproliferative activity against drug-resistant pancreatic cancer.

Enhancement of TAT cell membrane penetration efficiency by dimethyl sulphoxide.

[Effects of rosiglitazone on the Hep-2 cell proliferation, cell cycle and COX-2 expression].

Developmental profile in children with iron deficiency anemia and its changes after therapeutic iron supplementation.

Suppression of experimental autoimmune uveoretinitis by inducing differentiation of regulatory T cells via activation of aryl hydrocarbon receptor.

Ischemia induces regulator of G protein signaling 2 (RGS2) protein upregulation and enhances apoptosis in astrocytes.

Stabilization of transcription factor Nrf2 by tBHQ prevents oxidative stress-induced amyloid beta formation in NT2N neurons.

Colon cancer chemopreventive activities of pomegranate ellagitannins and urolithins.

Suppression of p53 and p21CIP1/WAF1 reduces arsenite-induced aneuploidy.

Growth and thyroid function in children with in utero exposure to dioxin: a 5-year follow-up study.

Aryl hydrocarbon receptor regulates cell cycle progression in human breast cancer cells via a functional interaction with cyclin-dependent kinase 4.

Activation of the aryl hydrocarbon receptor pathway enhances cancer cell invasion by upregulating the MMP expression and is associated with poor prognosis in upper urinary tract urothelial cancer.

Ischemia-activated microglia induces neuronal injury via activation of gp91phox NADPH oxidase.

A combination of iron and retinol supplementation benefits iron status, IL-2 level and lymphocyte proliferation in anemic pregnant women.

Fluorescent silica nanoparticles for cancer imaging.

Function and expression of ATP-binding cassette transporters in cultured human Y79 retinoblastoma cells.

Aryl hydrocarbon receptor functions as a potent coactivator of E2F1-dependent transcription activity.

Increase in in utero exposure to a migrant, 4,4'-butylidenebis(6-t-butyl-m-cresol), from nitrile-butadiene rubber gloves on brain aromatase activity in male rats.

Downregulation of insulin-like growth factor binding protein 3 and 5 in nitrofen-induced pulmonary hypoplasia.

Neuroprotective effect of s-methylisothiourrea in transient focal cerebral ischemia in rat.

Protein-bound uraemic toxin removal in haemodialysis and post-dilution haemodiafiltration.

Early development of the primordial mammalian diaphragm and cellular mechanisms of nitrofen-induced congenital diaphragmatic hernia.

Circular dichroism, optical rotation and absolute configuration of 2-cyclohexenone-cis-diol type phenol metabolites: redefining the role of substituents and 2-cyclohexenone conformation in electronic circular dichroism spectra.

Pyrrolidine dithiocarbamate (PDTC)/Cu complex induces lung epithelial cell apoptosis through mitochondria and ER-stress pathways.

Cubic mesoporous graphitic carbon(IV) nitride: an all-in-one chemosensor for selective optical sensing of metal ions.

Evidence supporting a role for N-(3-formyl-3,4-dehydropiperidino)lysine accumulation in Müller glia dysfunction and death in diabetic retinopathy.

The malondialdehyde-derived fluorophore DHP-lysine is a potent sensitizer of UVA-induced photooxidative stress in human skin cells.

Effect of intracellular photosensitized singlet oxygen production on the electrophysiological properties of cultured rat hippocampal neurons.

Effects of selected food phytochemicals in reducing the toxic actions of TCDD and p,p'-DDT in U937 macrophages.

Numerical variations and spontaneous malformations in the early embryos of the Korean salamander, *Hynobius leechii*, in the farmlands of Korea.

Quadratic and cubic nonlinear optical properties of salts of diquat-based chromophores with diphenylamino substituents.

Relationship between persistent halogenated organic contaminants and TCDD-toxic equivalents on EROD activity and retinoid and thyroid hormone status in northern fulmars.

Injury and differentiation following inhibition of mitochondrial respiratory chain complex IV in rat oligodendrocytes.

Metabolic stress-induced programmed cell death in *Xanthomonas*.

Influence of the photostabilizer in the photoprotective effects of a formulation containing UV-filters and vitamin A.

Expression of pax6 and sox2 in adult olfactory epithelium.

Dig1 protects against cell death provoked by glyphosate-based herbicides in human liver cell lines.

Use of live imaging analysis for evaluation of cytotoxic chemicals that induce apoptotic cell death.

Photoprotection by plant extracts: a new ecological means to reduce pesticide photodegradation.

Transport of L-carnitine in human corneal and conjunctival epithelial cells.

Stereospecific substitution of allylic alcohols to give optically active primary allylic amines: unique reactivity of a (P,alkene)Ir complex modulated by iodide.

An efficient one-pot synthesis of heterocycle-fused 1,2,3-triazole derivatives as anti-cancer agents.

Arsenic induces apoptosis of human umbilical vein endothelial cells through mitochondrial pathways.

Gene-chemical interactions in the developing mammalian nervous system: Effects on proliferation, neurogenesis and differentiation.

Nanoengineered optical urea biosensor for estimating hemodialysis parameters in spent dialysate.

Regulation of the human CHOP gene promoter by the stress response transcription factor ATF5 via the AARE1 site in human hepatoma HepG2 cells.

Cytoprotective effects of silymarin on epithelial cells against arsenic-induced apoptosis in contrast with quercetin cytotoxicity.

A study of neurologic symptoms on exposure to organophosphate pesticides in the children of agricultural workers.

Genomic indicators in the blood predict drug-induced liver injury.

Expression of aryl hydrocarbon receptor in human placentas and fetal tissues.

Conserved structure of the chloroplast-DNA encoded D1 protein is essential for effective photoprotection via non-photochemical thermal dissipation in higher plants.

A case of toxic epidermal necrolysis (ten) with severe chronic ocular complications in a healthy 46-year-old woman.

Dioxin photoproducts of triclosan and its chlorinated derivatives in sediment cores.

Nitrofen induces apoptosis independently of retinaldehyde dehydrogenase (RALDH) inhibition.

A 28-day oral toxicity study of fermentation-derived cellulose, produced by *Acetobacter aceti* subspecies *xylinum*, in F344 rats.

Multiple protective functions of catalase against intercellular apoptosis-inducing ROS signaling of human tumor cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces apoptosis in neural growth factor (NGF)-differentiated pheochromocytoma PC12 cells.

Decrease of intracellular pH as possible mechanism of embryotoxicity of glycol ether alkoxyacetic acid metabolites.

Metabolic correlations of glucocorticoids and polyamines in inflammation and apoptosis.

Effects of folate on arsenic toxicity in Chang human hepatocytes: involvement of folate antioxidant properties.

Dynamic zebrafish interactome reveals transcriptional mechanisms of dioxin toxicity.

Estrogenic activity of coumestrol, DDT, and TCDD in human cervical cancer cells.

Synergistic effect of ultrasound and thiazone-PEG 400 on human skin optical clearing in vivo.

Endocrine disruptor, dioxin (TCDD)-induced mitochondrial dysfunction and apoptosis in human trophoblast-like JAR cells.

Imaging dermal blood flow through the intact rat skin with an optical clearing method.

TCDD-induced cyclooxygenase-2 expression is mediated by the nongenomic pathway in mouse MMDD1 macula densa cells and kidneys.

[Epigenetic mechanism of depression].

Somatic embryogenesis in in vitro culture of *Leucjum vernum* L.

Chloroplast and reactive oxygen species involvement in apoptotic-like programmed cell death in *Arabidopsis* suspension cultures.

Mechanisms of corneal tissue cross-linking in response to treatment with topical riboflavin and long-wavelength ultraviolet radiation (UVA).

Paraquat activates the IRE1/ASK1/JNK cascade associated with apoptosis in human neuroblastoma SH-SY5Y cells.

The role of T cells in the regulation of acrolein-induced pulmonary inflammation and epithelial-cell pathology.

Acrolein induces a cellular stress response and triggers mitochondrial apoptosis in A549 cells.

Natural polyphenols as direct trapping agents of lipid peroxidation-derived acrolein and 4-hydroxy-trans-2-nonenal.

Effect of pesticides on cell survival in liver and brain rat tissues.

p38 MAPK and MMP-9 cooperatively regulate mucus overproduction in mice exposed to acrolein fog.

Haemocyte lysosomal fragility facing an environmental reality: a toxicological perspective with atrazine and *Lymnaea stagnalis* (Gastropoda, Pulmonata) as a test case.

The toxicity of Roundup Original Max to 13 species of larval amphibians.

Trivalent methylated arsenical-induced phosphatidylserine exposure and apoptosis in platelets may lead to increased thrombus formation.

Arsenite and its metabolites, MMA(III) and DMA(III), modify CYP3A4, PXR and RXR alpha expression in the small intestine of CYP3A4 transgenic mice.

Up-regulation of divalent metal transporter 1 is involved in 1-methyl-4-phenylpyridinium (MPP(+))-induced apoptosis in MES23.5 cells.

Nitric oxide-mediated toxicity in paraquat-exposed SH-SY5Y cells: a protective role of 7-nitroindazole.

Induction of oxidative stress and apoptosis by pentachlorophenol in primary cultures of *Carassius carassius* hepatocytes.

Fibroblast growth factor 9 prevents MPP⁺-induced death of dopaminergic neurons and is involved in melatonin neuroprotection in vivo and in vitro.

Prognosis of paraquat-induced ocular surface injury: therapeutic effect of amniotic membrane transplantation.

Toxicological study of pesticides in air and precipitations of Paris by means of a bioluminescence method.

Time-dependent degradation and toxicity of diclofop-methyl in algal suspensions : emerging contaminants.

Evaluation of pathways involved in pentachlorophenol-induced apoptosis in rat neurons.

Acrolein-derived DNA adduct formation in human colon cancer cells: its role in apoptosis induction by docosahexaenoic acid.

Immunotoxicological effects of a sub-chronic exposure to selected current-use pesticides in rainbow trout (*Oncorhynchus mykiss*).

Changes of thyroid hormone levels and related gene expression in Chinese rare minnow (*Gobiocypris rarus*) during 3-amino-1,2,4-triazole exposure and recovery.

Protection against paraquat and A53T alpha-synuclein toxicity by cabergoline is partially mediated by dopamine receptors.

[Expression of inflammatory factors in lung tissue of acute paraquat poisoned rats].

Oxidant stress-induced liver injury in vivo: role of apoptosis, oncotic necrosis, and c-Jun NH₂-terminal kinase activation.

Photodegradation product of sulcotrione and the physiological response of maize (*Zea mays*) and white mustard (*Sinapis alba*).

Effects of molinate on survival and development of *Bombina orientalis* (Boulenger) embryos.

Plant growth regulator (4-chlorophenoxy acetic acid) increases apoptosis in gonads of rats without changing hormonal levels.

Glyphosate formulations induce apoptosis and necrosis in human umbilical, embryonic, and placental cells.

Involvement of ubiquitin proteasome system in protective mechanisms of Puerarin to MPP⁽⁺⁾-elicited apoptosis.

Growth arrest and DNA damage protein 45b (*Gadd45b*) protects retinal ganglion cells from injuries.

Modulation of intercellular ROS signaling of human tumor cells.

The effects of N-acetyl cysteine, buthionine sulfoximine, diethyldithiocarbamate or 3-amino-1,2,4-triazole on antimycin A-treated Calu-6 lung cells in relation to cell growth, reactive oxygen species and glutathione.

Okadaic acid protects human neuroblastoma SH-SY5Y cells from 1-methyl-4-phenylpyridinium ion-induced apoptosis.

2'-Benzoyloxycinnamaldehyde inhibits tumor growth in H-ras12V transgenic mice via downregulation of metallothionein.

Optical biosensors for environmental monitoring based on computational and biotechnological tools for engineering the photosynthetic D1 protein of *Chlamydomonas reinhardtii*.

Microalgae fiber optic biosensors for herbicide monitoring using sol-gel technology.

Protective mechanism of quercetin and rutin using glutathione metabolism on HO-induced oxidative stress in HepG2 cells.

Prenatal exposure to pesticides disrupts testicular histoarchitecture and alters testosterone levels in male *Caiman latirostris*.

Chlorophenols induce lipid peroxidation and change antioxidant parameters in the leaves of wheat (*Triticum aestivum* L.).

Oxidative stress promotes proliferation and dedifferentiation of retina glial cells in vitro.

Generation and characterization of cells that can be conditionally depleted of mitochondrial SOD2.

Conjugated polyelectrolytes: synthesis, photophysics, and applications.

Prolonged recruitment manoeuvre improves lung function with less ultrastructural damage in experimental mild acute lung injury.

Transcriptional changes associated with reduced spontaneous liver tumor incidence in mice chronically exposed to high dose arsenic.

Antioxidant activity of mangostin in cell-free system and its effect on K562 leukemia cell line in photodynamic therapy.

Amended safety assessment of sodium picramate and picramic acid.

Iron overload alters iron-regulatory genes and proteins, down-regulates osteoblastic phenotype, and is associated with apoptosis in fetal rat calvaria cultures.

Arsenite exposure compromises early embryonic development in the Golden hamster.

Overview of developmental heart defects by dioxins, PCBs, and pesticides.

Prenatal retinoic acid up-regulates pulmonary gene expression of COUP-TFII, FOG2, and GATA4 in pulmonary hypoplasia.

Inhibition of UV-C light-induced apoptosis in liver cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Differential cytotoxic effects of arsenic compounds in human acute promyelocytic leukemia cells.

Autologous melanoma vaccine induces antitumor and self-reactive immune responses that affect patient survival and depend on MHC class II expression on vaccine cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) inhibits neurite outgrowth in differentiating human SH-SY5Y neuroblastoma cells.

Characterization of MCF mammary epithelial cells overexpressing the Arylhydrocarbon receptor (AhR).

Effects of intrauterine 2,3,7,8-tetrachlorodibenzo-p-dioxin on the development and function of the gonadotrophin releasing hormone neuronal system in the male rat.

Induction of apoptosis by phloroglucinol derivative from Ecklonia Cava in MCF-7 human breast cancer cells.

Subchronic feeding study with genetically modified stacked trait lepidopteran and coleopteran resistant (DAS- \tilde{A} 15 \tilde{A} 7-1xDAS-59122-7) maize grain in Sprague-Dawley rats.

Effects of dioxin on vascular endothelial growth factor (VEGF) production in the retina associated with choroidal neovascularization.

Taurine protects rat testes against NaAsO₂-induced oxidative stress and apoptosis via mitochondrial dependent and independent pathways.

Melatonin reduces acute lung injury in endotoxemic rats.

Effects of frequency and inspiratory plateau pressure during recruitment manoeuvres on lung and distal organs in acute lung injury.

Transplacental and early life exposure to inorganic arsenic affected development and behavior in offspring rats.

Regulation of mitochondrial dynamics in acute kidney injury in cell culture and rodent models.

Potential therapeutic significance of increased expression of aryl hydrocarbon receptor in human gastric cancer.

Effect of DNA hypomethylation on genotoxicity and apoptogenicity of sodium arsenite in laboratory mice.

Activation of the aryl hydrocarbon receptor by TCDD inhibits senescence: a tumor promoting event?

Dioxin-induced toxicity on vascular remodeling of the placenta.

AHR signaling in prostate growth, morphogenesis, and disease.

Identification of tumor promotion marker genes for predicting tumor promoting potential of chemicals in BALB/c 3T3 cells.

Chronic health impairment due to 2,3,7,8-tetrachloro-dibenzo-p-dioxin exposure.

Illnesses associated with chloropicrin use in California agriculture, 1992-2003.

The anti-apoptotic activity of albumin for endothelium is inhibited by advanced glycation end products restricting intramolecular movement.

Menadione reduction by pharmacological doses of ascorbate induces an oxidative stress that kills breast cancer cells.

Molecular cloning and oxidative modification of human lens ALDH1A1: implication in impaired detoxification of lipid aldehydes.

Therapeutic surfactants modulate the viability of eosinophils and induce inflammatory mediator release.

Silencing of PINK1 expression affects mitochondrial DNA and oxidative phosphorylation in dopaminergic cells.

Arsenic induced apoptosis in malignant melanoma cells is enhanced by menadione through ROS generation, p38 signaling and p53 activation.

Speciation of arsenic trioxide metabolites in blood cells and plasma of a patient with acute promyelocytic leukemia.

Melatonin inhibits arsenite-induced peripheral neurotoxicity.

Effects of chronic low dose rotenone treatment on human microglial cells.

The mammalian aryl hydrocarbon (Ah) receptor: from mediator of dioxin toxicity toward physiological functions in skin and liver.

Mst1-FoxO signaling protects Na⁺ve T lymphocytes from cellular oxidative stress in mice.

Modulation of arsenic trioxide-induced apoptosis by genistein and functionally related agents in U937 human leukaemia cells. Regulation by ROS and mitogen-activated protein kinases.

Short form glutathione peroxidase 4 is the essential isoform required for survival and somatic mitochondrial functions.

A novel approach using DNA-repair-deficient chicken DT40 cell lines for screening and characterizing the genotoxicity of environmental contaminants.

Influence of teratogenic factors on mouse 39 hox gene expression.

Sonic hedgehog gene expression in nitrofen induced hypoplastic lungs in mice.

Changes in iron-regulatory proteins in the aged rodent neural retina.

The tryptophan photoproduct 6-formylindolo[3,2-b]carbazole (FICZ) binds multiple AHRs and induces multiple CYP1 genes via AHR2 in zebrafish.

Synthesis, photophysical properties and sugar-dependent in vitro photocytotoxicity of pyrrolidine-fused chlorins bearing S-glycosides.

Taurine prevents arsenic-induced cardiac oxidative stress and apoptotic damage: role of NF-kappa B, p38 and JNK MAPK pathway.

Arsenic induces mitochondria-dependent apoptosis by reactive oxygen species generation rather than glutathione depletion in Chang human hepatocytes.

Remarkable tuning of the coordination and photophysical properties of lanthanide ions in a series of tetrazole-based complexes.

Systematic gene expression profile of hypothalamus in calorie-restricted mice implicates the involvement of mTOR signaling in neuroprotective activity.

Cytotoxicity of spermine oxidation products to multidrug resistant melanoma M14 ADR2 cells: sensitization by the MDL 72527 lysosomotropic compound.

Activation of the aryl hydrocarbon receptor during different critical windows in pregnancy alters mammary epithelial cell proliferation and differentiation.

Dehydroascorbate protection against dioxin-induced toxicity in the beta-cell line INS-1E.

Interaction of fish aryl hydrocarbon receptor paralogs (AHR1 and AHR2) with the retinoblastoma protein.

Arsenic exposure disrupts neurite growth and complexity in vitro.

Biotechnological and industrial significance of cyanobacterial secondary metabolites.

Arsenic induces telomerase expression and maintains telomere length in human cord blood cells.

Fe²⁺ and Fe³⁺ initiated peroxidation of sonicated and non-sonicated liposomes made of retinal lipids in different aqueous media.

Lipopolysaccharide-induced apoptosis in transformed bovine brain endothelial cells and human dermal microvessel endothelial cells: the role of JNK.

Drug metabolizing enzyme expression in rat choroid plexus: effects of in vivo xenobiotics treatment.

Disruption of the thyroid system by diethylstilbestrol and ioxynil in the sea bream (*Sparus aurata*).

Short-term exposure to dioxin impairs bone tissue in male rats.

Sodium azide induced neuronal damage in vitro: evidence for non-apoptotic cell death.

Peroxiredoxin 5 confers protection against oxidative stress and apoptosis and also promotes longevity in *Drosophila*.

Effects of prometryne on apoptosis and necrosis in thymus, lymph node and spleen in mice.

Activated toxicity of diesel particulate extract by ultraviolet a radiation in mammalian cells: role of singlet oxygen.

Behavioral responses of *Daphnia magna* to stresses of chemicals with different toxic characteristics.

Functional ryanodine receptors in the plasma membrane of RINm5F pancreatic beta-cells.

Developmental mechanisms of arsenite toxicity in zebrafish (*Danio rerio*) embryos.

Up-regulation of COUP-TFII gene expression in the nitrofen-induced hypoplastic lung.

Optical waveguide light-mode spectroscopy immunosensors for environmental monitoring.

Paclitaxel-resistance conferred by altered expression of efflux and influx transporters for paclitaxel in the human hepatoma cell line, HepG2.

Effects of perinatal PBDE exposure on hepatic phase I, phase II, phase III, and deiodinase 1 gene expression involved in thyroid hormone metabolism in male rat pups.

Photolysis of the herbicide sulcotrione: formation of a major photoproduct and its toxicity evaluation.

Avoidance test with *Enchytraeus albidus* (Enchytraeidae): effects of different exposure time and soil properties.

Cytotoxic, genotoxic and cell-cycle disruptive effects of thio-dimethylarsinate in cultured human cells and the role of glutathione.

Neuroprotective effects of (-)-epigallocatechin-3-gallate (EGCG) on paraquat-induced apoptosis in PC12 cells.

Pretreatment with near-infrared light via light-emitting diode provides added benefit against rotenone- and MPP⁺-induced neurotoxicity.

Genome-wide transcriptional responses to acrolein.

1-Methyl-4-phenyl-pyridinium ion-induced oxidative stress, c-Jun phosphorylation and DNA fragmentation factor-45 cleavage in SK-N-SH cells are averted by selegiline.

[Influence of pyrrolidine dithiocarbamate (PDTTC) on expression of transforming growth factor beta(1), matrix metalloproteinase-2 and tissue inhibitor-1 of metalloproteinase in rats with pulmonary damage induced by paraquat].

Protective effect of estrogen on apoptosis in a cell culture model of Parkinson's disease.

Spermatogenesis, epididymis morphology and plasma sex steroid secretion in the male lizard *Podarcis sicula* exposed to diuron.

Mitochondrial complex I inhibition is not required for dopaminergic neuron death induced by rotenone, MPP⁺, or paraquat.

More toxic and photoresistant products from photodegradation of fenoxaprop-p-ethyl.

Nonredundant functions of alpha beta and gamma delta T cells in acrolein-induced pulmonary pathology.

Acrolein health effects.

Atrazine exposure decreases cell proliferation in Chinese Hamster Ovary (CHO-K1) cell line.

Role of protein kinase C delta in paraquat-induced glial cell death.

Modulation of signal transduction pathways in lymphocytes due to sub-lethal toxicity of chlorinated phenol.

Subchronic feeding study of herbicide-tolerant soybean DP-356~43-5 in Sprague-Dawley rats.

Protein alkylation, transcriptional responses and cytochrome c release during acrolein toxicity in A549 cells: influence of nucleophilic culture media constituents.

Maneb potentiates paraquat neurotoxicity by inducing key Bcl-2 family members.

Acute toxic hazard evaluations of glyphosate herbicide on terrestrial vertebrates of the Oregon coast range.

The *C. elegans* Opa1 homologue EAT-3 is essential for resistance to free radicals.

Perturbation of organogenesis by the herbicide atrazine in the amphibian *Xenopus laevis*.

Protective effects of a new metalloporphyrin on paraquat-induced oxidative stress and apoptosis in N27 cells.

Identification of genes associated with paraquat-induced toxicity in SH-SY5Y cells by PCR array focused on apoptotic pathways.

Coupling endoplasmic reticulum stress to the cell death program in dopaminergic cells: effect of paraquat.

[Cytogenetic and other cariological parameters of exfoliative buccal cells in Vietnamese children from areas where dioxin-containing herbicides were applied].

Paraquat-induced apoptosis in human neuroblastoma SH-SY5Y cells: involvement of p53 and mitochondria.

Acrolein: sources, metabolism, and biomolecular interactions relevant to human health and disease.

Photoreceptor oxidative damage in sympathetic ophthalmia.

Anti-diabetic effects of cinnamaldehyde and berberine and their impacts on retinol-binding protein 4 expression in rats with type 2 diabetes mellitus.

Modulation of reactive oxygen species by antioxidants in chronic myeloid leukemia cells enhances imatinib sensitivity through survivin downregulation.

Dihydrocapsaicin (DHC), a saturated structural analog of capsaicin, induces autophagy in human cancer cells in a catalase-regulated manner.

Modulation of the neuronal response to ischaemia by somatostatin analogues in wild-type and knock-out mouse retinas.

Acrolein inhalation suppresses lipopolysaccharide-induced inflammatory cytokine production but does not affect acute airways neutrophilia.

Enhanced autophagy and mitochondrial aberrations in murine G(M1)-gangliosidosis.

Paraquat neurotoxicity is mediated by a Bak-dependent mechanism.

Biocidal performance of acrylated glyphosate in a model photopolymerizable coating formulation.

Down-regulation of aldose reductase renders J774A.1 cells more susceptible to acrolein- or hydrogen peroxide-induced cell death.

Development of a photosystem II-based optical microfluidic sensor for herbicide detection.

Cinnamoyl-based Nrf2-activators targeting human skin cell photo-oxidative stress.

Tear cytokine and ocular surface alterations following brief passive cigarette smoke exposure.

Cell death activation during cavitation of embryoid bodies is mediated by hydrogen peroxide.

Lipoamide protects retinal pigment epithelial cells from oxidative stress and mitochondrial dysfunction.

Imbalance between ROS production and elimination results in apoptosis induction in primary smooth chorion trophoblast cells prepared from human fetal membrane tissues.

Change in optical properties of stratum corneum induced by protein carbonylation in vitro.

Infrared optical immunosensor: application to the measurement of the herbicide atrazine.

In vitro study on the binding of herbicide glyphosate to human serum albumin by optical spectroscopy and molecular modeling.

Characterization of the transcriptional profile in primary astrocytes after oxidative stress induced by Paraquat.

Decoy receptor 3 expression in AsPC-1 human pancreatic adenocarcinoma cells via the phosphatidylinositol 3-kinase-, Akt-, and NF-kappa B-dependent pathway.

Sodium azide induces necrotic cell death in rat squamous cell carcinoma SCC131.

Dihydrolipoic acid inhibits tetrachlorohydroquinone-induced tumor promotion through prevention of oxidative damage.

Quercetin prevents necrotic cell death induced by co-exposure to benzo(a)pyrene and UVA radiation.

Carbamylated low-density lipoprotein induces proliferation and increases adhesion molecule expression of human coronary artery smooth muscle cells.

Induction of cytoplasmic accumulation of p53: a mechanism for low levels of arsenic exposure to predispose cells for malignant transformation.

Effect of dimethyl sulfides on the induction of apoptosis in human leukemia Jurkat cells and HL-60 cells.

Fluorescence confocal laser scanning microscopy for in vivo imaging of epidermal reactions to two experimental irritants.

KLF6 induces apoptosis in prostate cancer cells through up-regulation of ATF3.

Potassium fluxes, energy metabolism, and oxygenation in intact diabetic rat hearts under normal and stress conditions.

Liver is a target of arsenic carcinogenesis.

Mitotic arrest-associated apoptosis induced by sodium arsenite in A375 melanoma cells is BUBR1-dependent.

Cross-talk between aryl hydrocarbon receptor and mitogen-activated protein kinase signaling pathway in liver cancer through c-raf transcriptional regulation.

Unique spatial and cellular expression patterns of Hoxa5, Hoxb4, and Hoxb6 proteins in normal developing murine lung are modified in pulmonary hypoplasia.

Oxidative inactivation of the proteasome in retinal pigment epithelial cells. A potential link between oxidative stress and up-regulation of interleukin-8.

Arsenic interferes with the signaling transduction pathway of T cell receptor activation by increasing basal and induced phosphorylation of Lck and Fyn in spleen cells.

Influences of perinatal dioxin load to visual motion and oddball stimuli examined with an EEG and MEG analysis.

Involvement of SREBPs in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced disruption of lipid metabolism in male guinea pig.

Effects of maternal retinoic acid administration in a congenital diaphragmatic hernia rabbit model.

Sensitivity to sodium arsenite in human melanoma cells depends upon susceptibility to arsenite-induced mitotic arrest.

A study of the process of apoptosis in animals infected with the contagious ecthyma virus.

Imaging breast cancer cells and tissues using peptide-labeled fluorescent silica nanoparticles.

GSK3 promotes arsenite-induced apoptosis via facilitation of mitochondria disruption.

Comparative genomics identifies genes mediating cardiotoxicity in the embryonic zebrafish heart.

[Effect of dioxin on apoptosis of osteogenic sarcoma cells and regulation on gene expression of insulin-like growth factor binding protein 6].

Iron-generated hydroxyl radicals kill retinal cells in vivo: effect of ferulic acid.

Resveratrol sensitizes melanomas to TRAIL through modulation of antiapoptotic gene expression.

Prenatal treatment with retinoic acid promotes pulmonary alveologenesis in the nitrofen model of congenital diaphragmatic hernia.

The common environmental pollutant dioxin-induced memory deficits by altering estrogen pathways and a major route of retinol transport involving transthyretin.

Aryl hydrocarbon receptor targets pathways extrinsic to bone marrow cells to enhance neutrophil recruitment during influenza virus infection.

Short dysfunctional telomeres impair the repair of arsenite-induced oxidative damage in mouse cells.

Prenatal treatment with retinoic acid accelerates type 1 alveolar cell proliferation of the hypoplastic lung in the nitrofen model of congenital diaphragmatic hernia.

Environmental factors in the etiology of esophageal atresia and congenital diaphragmatic hernia: results of a case-control study.

Reversal of arsenic-induced hepatic apoptosis with combined administration of DMSA and its analogues in guinea pigs: role of glutathione and linked enzymes.

Arsenite-induced thymus atrophy is mediated by cell cycle arrest: a characteristic downregulation of E2F-related genes revealed by a microarray approach.

Analysis of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced proteome changes in 5L rat hepatoma cells reveals novel targets of dioxin action including the mitochondrial apoptosis regulator VDAC2.

Subhepatotoxic exposure to arsenic enhances lipopolysaccharide-induced liver injury in mice.

Dioxin-mediated tumor progression through activation of mitochondria-to-nucleus stress signaling.

Insight into the selectivity of arsenic trioxide for acute promyelocytic leukemia cells by characterizing *Saccharomyces cerevisiae* deletion strains that are sensitive or resistant to the metalloid.

Neoplastic transformation of human small airway epithelial cells induced by arsenic.

C-reactive protein induces endothelial cell apoptosis and matrix metalloproteinase-9 production in human mononuclear cells: Implications for the destabilization of atherosclerotic plaque.

Bradykinin stimulates glutamate uptake via both B1R and B2R activation in a human retinal pigment epithelial cells.

Allium compounds, dipropyl and dimethyl thiosulfinates as antiproliferative and differentiating agents of human acute myeloid leukemia cell lines.

Silencing of mitochondrial alternative oxidase gene of *Aspergillus fumigatus* enhances reactive oxygen species production and killing of the fungus by macrophages.

Induction of cellular stress overcomes the requirement of herpes simplex virus type 1 for immediate-early protein ICPO and reactivates expression from quiescent viral genomes.

Impaired activation of caspase cascade during cell death induced by newly synthesized singlet oxygen generator, 1-buthylnaphthalene-4-propionate endoperoxide.

In utero exposure to 2,3,7,8-Tetrachlorodibenzo-p-Dioxin affects the development of reproductive system in mouse.

Arabidopsis AAL-toxin-resistant mutant *atr1* shows enhanced tolerance to programmed cell death induced by reactive oxygen species.

Reactive oxygen species in programmed death of pea guard cells.

2,3,7,8-tetrachlorodibenzo-p-dioxin regulates bovine herpesvirus type 1 induced apoptosis by modulating Bcl-2 family members.

Channels for water efflux and influx involved in volume regulation of murine spermatozoa.

Fifteen years after "Wingspread"--environmental endocrine disruptors and human and wildlife health: where we are today and where we need to go.

[Superoxide induces cellular growth and apoptosis of cultured human peripheral blood lymphocytes].

XRCC1 protects against the lethality of induced oxidative DNA damage in nondividing neural cells.

Evaluation of N (epsilon)-(3-formyl-3,4-dehydropiperidino)lysine as a novel biomarker for the severity of diabetic retinopathy.

Molecular regulation of somatic embryogenesis in potato: an auxin led perspective.

Comparison of a gas chromatography-optical fibre (GC-OF) detector with a gas chromatography-flame ionization detector (GC-FID) for determination of alcoholic compounds in industrial atmospheres.

Ghrelin infused into the portal vein inhibits glucose-stimulated insulin secretion in Wistar rats.

Genes related to apoptosis predict necrosis of the liver as a phenotype observed in rats exposed to a compendium of hepatotoxicants.

Effects of mitochondrial inhibitors on cell viability in U937 monocytes under glucose deprivation.

Endogenous Gas6 and Ca²⁺ -channel activation modulate phagocytosis by retinal pigment epithelium.

Insensitivity to glutamate neurotoxicity mediated by NMDA receptors in association with delayed mitochondrial membrane potential disruption in cultured rat cortical neurons.

Expression of phase I and phase II genes in mouse embryonic stem cells cultured in the presence of 2,3,7,8-tetrachlorodibenzo-para-dioxin.

2,3,7,8-Tetrachlorodibenzo-p-dioxin exposure disrupts granule neuron precursor maturation in the developing mouse cerebellum.

NF- κ B and caspases are involved in the hyaluronan and chondroitin-4-sulphate-exerted antioxidant effect in fibroblast cultures exposed to oxidative stress.

Arsenite-induced cytotoxicity in dorsal root ganglion explants.

Results of the negative control chemical allyl alcohol in the 15-day intact adult male rat screening assay for endocrine activity.

Identification of brominated and chlorinated phenols as potential thyroid-disrupting compounds in indoor dusts.

Thioredoxin 2 haploinsufficiency in mice results in impaired mitochondrial function and increased oxidative stress.

Loss of phospholipid asymmetry and elevated brain apoptotic protein levels in subjects with amnesic mild cognitive impairment and Alzheimer disease.

Induction of heat shock protein 70 by sodium arsenite attenuates burn-induced intestinal injury in severe burned rats.

[Research of a bioluminescent bacterial-based optical fiber sensor to detecting acute effects of pollutants in water].

Arsenic as an endocrine disruptor: arsenic disrupts retinoic acid receptor- and thyroid hormone receptor-mediated gene regulation and thyroid hormone-mediated amphibian tail metamorphosis.

Metacaspase-8 modulates programmed cell death induced by ultraviolet light and H₂O₂ in Arabidopsis.

Cleavage of focal adhesion kinase is an early marker and modulator of oxidative stress-induced apoptosis.

Melatonin prevents lipid peroxidation in human erythrocytes but augments deterioration of deformability after in vitro oxidative stress.

Involvement of reduced folate carrier 1 in the inner blood-retinal barrier transport of methyltetrahydrofolate.

The role of peroxisome proliferator-activated receptors in the development and physiology of gametes and preimplantation embryos.

Mutagenic, antimutagenic, cytotoxic, and apoptotic activities of extracts from *Pituranthos tortuosus*.

Impaired VEGF and nitric oxide signaling after nitrofen exposure in rat fetal lung explants.

Inhibition of estrogen-mediated uterine gene expression responses by dioxin.

2,3,7,8-Tetrachlorodibenzo-p-dioxin increases Bovine Herpesvirus type-1 (BHV-1) replication in Madin-Darby Bovine Kidney (MDBK) cells in vitro.

Interference of endocrine disrupting chemicals with aromatase CYP19 expression or activity, and consequences for reproduction of teleost fish.

Hydroxytyrosol protects retinal pigment epithelial cells from acrolein-induced oxidative stress and mitochondrial dysfunction.

Effects of the herbicide Roundup on freshwater microbial communities: a mesocosm study.

CD8⁺ T cells contribute to macrophage accumulation and airspace enlargement following repeated irritant exposure.

Toxicity of four antifouling biocides and their mixtures on the brine shrimp *Artemia salina*.

Lutein and zeaxanthin protect photoreceptors from apoptosis induced by oxidative stress: relation with docosahexaenoic acid.

Increased expression of glial cell line-derived neurotrophic factor protects against oxidative damage-induced retinal degeneration.

Targeted disruption of the glutaredoxin 1 gene does not sensitize adult mice to tissue injury induced by ischemia/reperfusion and hyperoxia.

Evaluation of the antiandrogenic effects of flutamide, DDE, and linuron in the weanling rat assay using organ weight, histopathological, and proteomic approaches.

Evaluation of neurodevelopmental effects on rats exposed prenatally to sulfentrazone.

Retinoic acid-mediated differentiation protects against nitrofen-induced apoptosis.

[Effects of high dose ambroxol on lung injury induced by paraquat in rats].

Protective effects of Ginkgo biloba extract on paraquat-induced apoptosis of PC12 cells.

Heterogeneous photocatalytic degradation of prometryn in aqueous solutions under UV-Vis irradiation.

Further evidence against a direct genotoxic mode of action for arsenic-induced cancer.

2,4-Dichlorophenoxyacetic acid: effects on Syrian hamster embryo (SHE) cell transformation, c-Myc expression, DNA damage and apoptosis.

Sodium salicylate prevents paraquat-induced apoptosis in the rat lung.

Relationship between autophagy and apoptotic cell death in human neuroblastoma cells treated with paraquat: could autophagy be a "brake" in paraquat-induced apoptotic death?

Inhibition of paraquat-induced autophagy accelerates the apoptotic cell death in neuroblastoma SH-SY5Y cells.

Dinitro-o-cresol induces apoptosis-like cell death but not alternative oxidase expression in soybean cells.

The concept of "aldehyde load" in neurodegenerative mechanisms: cytotoxicity of the polyamine degradation products hydrogen peroxide, acrolein, 3-aminopropanal, 3-acetamidopropanal and 4-aminobutanal in a retinal ganglion cell line.

Protective effect of erythropoietin against 1-methyl-4-phenylpyridinium-induced neurodegeneration in PC12 cells.

Activation of c-Jun N-terminal protein kinase is a common mechanism underlying paraquat- and rotenone-induced dopaminergic cell apoptosis.

Altered regulation of retinoic acid synthesis in nitrofen-induced hypoplastic lung.

P38 and ERK mitogen-activated protein kinases mediate acrolein-induced apoptosis in Chinese hamster ovary cells.

Photodegradation of sulcotrione in various aquatic environments and toxicity of its photoproducts for some marine micro-organisms.

Hypoxia protects human corneal endothelium from tertiary butyl hydroperoxide and paraquat-induced cell death in vitro.

Bayesian methods for highly correlated exposure data.

Rosiglitazone protects human neuroblastoma SH-SY5Y cells against MPP+ induced cytotoxicity via inhibition of mitochondrial dysfunction and ROS production.

Mechanisms of immune system activation in glaucoma: oxidative stress-stimulated antigen presentation by the retina and optic nerve head glia.

Paraquat and maneb induced neurotoxicity.

Coca and poppy eradication in Colombia: environmental and human health assessment of aerially applied glyphosate.

Acrolein, a toxicant in cigarette smoke, causes oxidative damage and mitochondrial dysfunction in RPE cells: protection by (R)-alpha-lipoic acid.

In vitro alachlor effects on reactive oxygen species generation, motility patterns and apoptosis markers in human spermatozoa.

Divergent mechanisms of paraquat, MPP+, and rotenone toxicity: oxidation of thioredoxin and caspase-3 activation.

Dacthal and chlorophenoxy herbicides and chlorothalonil fungicide in eggs of osprey (*Pandion haliaetus*) from the Duwamish-Lake Washington-Puget Sound area of Washington state, USA.

Novel and extensive aspects of paraquat-induced pulmonary fibrogenesis: comparative and time-course microarray analyses in fibrogenic and non-fibrogenic rats.

Oxidative damage in age-related macular degeneration.

The activity of 2'-benzoyloxyacetaldehyde against drug-resistant cancer cell lines.

Carcinogenicity of dimethylarsinic acid in Ogg1-deficient mice.

Down-regulation of glutaminase C in human hepatocarcinoma cell by diphenylarsinic acid, a degradation product of chemical warfare agents.

Prostacyclin prevents pulmonary endothelial cell apoptosis induced by cigarette smoke.

Disruption of thyroid hormone binding to sea bream recombinant transthyretin by ioxinyl and polybrominated diphenyl ethers.

Cyanide-induced death of cells in plant leaves.

2-hydroxycinnamaldehyde inhibits SW620 colon cancer cell growth through AP-1 inactivation.

Inhibition of cyclin-dependent kinases is neuroprotective in 1-methyl-4-phenylpyridinium-induced apoptosis in neurons.

The nature of "unusual" electro-optical transients observed for DNA.

Effects of copper-phenanthroline on pentachlorophenol-induced adaptation and cell death of *Escherichia coli*.

Activation of the death receptor pathway of apoptosis by the aldehyde acrolein.

Rotenone and MPP+ preferentially redistribute apoptosis-inducing factor in apoptotic dopamine neurons.

Synthesis and biological activity of photopolymerizable derivatives of glyphosate.

Trimethylamine oxide suppresses stress-induced alteration of organic anion transport in choroid plexus.

In vitro studies on the integrated control of rapeseed white stem rot disease through the application of herbicides and *Trichoderma* species.

Critical role of exposure time to endogenous oxidative stress in hepatocyte apoptosis.

Pulmonary lesions in female Harlan Sprague-Dawley rats following two-year oral treatment with dioxin-like compounds.

Iron deficiency anemia in infancy is associated with altered temporal organization of sleep states in childhood.

Arsenic promotes centrosome abnormalities and cell colony formation in p53 compromised human lung cells.

Identification of interspecies concordance of mechanisms of arsenic-induced bladder cancer.

Pathogenesis of aryl hydrocarbon receptor-mediated development of lymphoma is associated with increased cyclooxygenase-2 expression.

Endoplasmic reticulum stress is involved in arsenite-induced oxidative injury in rat brain.

[The etiology of congenital diaphragmatic hernia and esophageal atresia: the Hox genes].

Mechanisms of action of the congenital diaphragmatic hernia-inducing teratogen nitrofen.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin alters retinoid homeostasis in maternal and perinatal tissues of the Holtzman rat.

Effects of in utero and lactational exposure to triphenyltin chloride on pregnancy outcome and postnatal development in rat offspring.

p53 response to arsenic exposure in epithelial cells: protein kinase B/Akt involvement.

Arsenic salts induced autophagic cell death and hypermethylation of DAPK promoter in SV-40 immortalized human uroepithelial cells.

Interference of contaminated sediment extracts and environmental pollutants with retinoid signaling.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces oxidative stress, DNA strand breaks, and poly(ADP-ribose) polymerase-1 activation in human breast carcinoma cell lines.

Temporal and spatial profiles of cell loss after spinal cord injury: Reduction by a metalloporphyrin.

A proposed mechanism for the protective effect of dioxin against breast cancer.

Mitochondrial respiratory inhibition and oxidative stress elevate beta-secretase (BACE1) proteins and activity in vivo in the rat retina.

Cyclin B1 proteolysis via p38 MAPK signaling participates in G2 checkpoint elicited by arsenite.

Sodium selenite induces superoxide-mediated mitochondrial damage and subsequent autophagic cell death in malignant glioma cells.

Subchronic feeding study of DAS-59122-7 maize grain in Sprague-Dawley rats.

Ferula gummosa Boiss. Embryogenic culture and karyological changes.

Selenium deficiency alters epithelial cell morphology and responses to influenza.

Elevation of 8-hydroxydeoxyguanosine and cell proliferation via generation of oxidative stress by organic arsenicals contributes to their carcinogenicity in the rat liver and bladder.

Oxidative stress kills human primary oligodendrocytes via neutral sphingomyelinase: implications for multiple sclerosis.

Dihydroartemisinin exerts cytotoxic effects and inhibits hypoxia inducible factor-1 α activation in C6 glioma cells.

Sequential treatment by ionizing radiation and sodium arsenite dramatically accelerates TRAIL-mediated apoptosis of human melanoma cells.

Proteome and cytoskeleton responses in osteosarcoma cells with reduced OXPHOS activity.

Chemical contaminants, health indicators, and reproductive biomarker responses in fish from the Colorado River and its tributaries.

Concentrations of organochlorine pollutants in mothers who gave birth to neonates with congenital hypothyroidism.

Exposure in utero to 2,2',3,3',4,6'-hexachlorobiphenyl (PCB 132) impairs sperm function and alters testicular apoptosis-related gene expression in rat offspring.

Vitamin A deficiency (VAD), teratogenic, and surgical models of congenital diaphragmatic hernia (CDH).

[Relationship between blood dioxin levels and present/past clinical symptoms in Kanemi Yusho patients].

Inhibition of NF- κ B does not induce c-Jun N-terminal kinase-mediated apoptosis in reperfusion injury.

Yeast NDI1 improves oxidative phosphorylation capacity and increases protection against oxidative stress and cell death in cells carrying a Leber's hereditary optic neuropathy mutation.

Effects of low-level arsenic exposure on the developmental toxicity of anilofos in rats.

Site-directed photoproteolysis of 8-oxoguanine DNA glycosylase 1 (OGG1) by specific porphyrin-protein probe conjugates: a strategy to improve the effectiveness of photodynamic therapy for cancer.

Ubiquitinated-protein aggregates form in pancreatic beta-cells during diabetes-induced oxidative stress and are regulated by autophagy.

Proteomic analysis of exfoliation deposits.

Thirteen week feeding study with transgenic maize grain containing event DAS-157-1 in Sprague-Dawley rats.

Different states of energy metabolism in the vertebrate retina can be identified by stimulus-related changes in near UV transmission.

[Effect of tetrandrine on endothelin expression in the lungs and clinical significance thereof: experiment with rat models with nitrofen-induced congenital diaphragmatic hernia].

Disturbance of retinol transportation causes nitrofen-induced hypoplastic lung.

ATP depletion does not account for apoptosis induced by inhibition of mitochondrial electron transport chain in human dopaminergic cells.

Microarray analysis of gene expression in peripheral blood mononuclear cells from dioxin-exposed human subjects.

[Sea urchin embryo, DNA-damaged cell cycle checkpoint and the mechanisms initiating cancer development].

Kidney development in the nitrofen-induced pulmonary hypoplasia and congenital diaphragmatic hernia in rats.

Differential sensitivity of cones to iron-mediated oxidative damage.

Thyroxine-metabolizing rat uridine diphosphate-glucuronosyltransferase 1A7 is regulated by thyroid hormone receptor.

Oxidative metabolism of lung macrophages exposed to sodium arsenite.

A new electro-optical approach to rapid assay of cell viability.

In vitro toxicity assay using human bronchial epithelial cell, Beas-2B, for the screening of toxicological risk of dioxin-like compounds sampled from small sized Korean waste incineration plants.

Exposure to arsenic at levels found in U.S. drinking water modifies expression in the mouse lung.

The nitric oxide prodrug, V-PYRRO/NO, mitigates arsenic-induced liver cell toxicity and apoptosis.

An Optical Biosensor based on Immobilization of Laccase and MBTH in Stacked Films for the Detection of Catechol.

Identification of regions of the sigma-1 receptor ligand binding site using a novel photoprobe.

Contaminants in fish: risk-benefit considerations.

Melatonin attenuates arsenite-induced apoptosis in rat brain: involvement of mitochondrial and endoplasmic reticulum pathways and aggregation of alpha-synuclein.

Tumor necrosis factor-alpha modulates effects of aryl hydrocarbon receptor ligands on cell proliferation and expression of cytochrome P450 enzymes in rat liver "stem-like" cells.

Fiber optic-linear array detection spectrophotometry in combination with dispersive liquid-liquid microextraction for simultaneous preconcentration and determination of palladium and cobalt.

Sirt1 regulates aging and resistance to oxidative stress in the heart.

Inhibition of photophosphorylation and electron transport chain in thylakoids by lasiodiplodin, a natural product from *Botryosphaeria rhodina*.

Is the natural PCDD/PCDF mixture toxic for human placental JEG-3 cell line? The action of the toxicants on hormonal profile, CYP1A1 activity, DNA damage and cell apoptosis.

Regulation of aryl hydrocarbon receptor activity in porcine cumulus-oocyte complexes in physiological and toxicological conditions: the role of follicular fluid.

Cell death and impairment of glucose-stimulated insulin secretion induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the beta-cell line INS-1E.

Haemocyte apoptosis as a general cellular immune response of the snail, *Lymnaea stagnalis*, to a toxicant.

Resveratrol increases vascular oxidative stress resistance.

Quantitative structure-activity relationship modeling on in vitro endocrine effects and metabolic stability involving 26 selected brominated flame retardants.

In vitro effects of reactive oxygen metabolites, with and without flunixin meglumine, on equine colonic mucosa.

Fibronectin and laminin induce expression of islet cell markers in hepatic oval cells in culture.

Resveratrol protects dopaminergic neurons in midbrain slice culture from multiple insults.

Can radiation-induced apoptosis be modulated by inhibitors of energy metabolism?

Plasma polymer coated surfaces for serum-free culture of limbal epithelium for ocular surface disease.

Relation between serum xenobiotic-induced receptor activities and sperm DNA damage and sperm apoptotic markers in European and Inuit populations.

A hetero-core structured fiber optic pH sensor.

Cryopreservation of human hepatocytes alters the mitochondrial respiratory chain complex 1.

The anti-apoptotic activity of albumin for endothelium is mediated by a partially cryptic protein domain and reduced by inhibitors of G-coupled protein and PI-3 kinase, but is independent of radical scavenging or bound lipid.

Use of model-based compartmental analysis to study vitamin A kinetics and metabolism.

Effect of in vitro administered 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on DNA-binding activities of nuclear transcription factors in NIH-3T3 mouse fibroblasts.

Lack of the aryl hydrocarbon receptor leads to impaired activation of AKT/protein kinase B and enhanced sensitivity to apoptosis induced via the intrinsic pathway.

Introduction of the anti-apoptotic baculovirus p35 gene in passion fruit induces herbicide tolerance, reduced bacterial lesions, but does not inhibit passion fruit woodiness disease progress induced by cowpea aphid-borne mosaic virus (CABMV).

White adipose tissue: storage and effector site for environmental pollutants.

Photochemical nucleophile mapping: identification of Tyr311 within the catalytic domain of rabbit muscle glyceraldehyde-3-phosphate dehydrogenase.

Neurotoxicity assessment using zebrafish.

Reduction of p66Shc suppresses oxidative damage in retinal pigmented epithelial cells and retina.

Aneuploidy-inducing capacity of two widely used pesticides.

Aldehyde load in ischemia-reperfusion brain injury: neuroprotection by neutralization of reactive aldehydes with phenelzine.

Evidence for a novel endocrine disruptor: the pesticide propanil requires the ovaries and steroid synthesis to enhance humoral immunity.

Superoxide dismutase 1 protects retinal cells from oxidative damage.

Evaluation of DNA damage induced by atrazine and atrazine-based herbicide in human lymphocytes in vitro using a comet and DNA diffusion assay.

A case-control study of myelodysplastic syndromes in Belgrade (Serbia Montenegro).

Effects of Diuron [3-(3,4-dichlorophenyl)-1,1-dimethylurea] on the urinary bladder of male Wistar rats.

NTP Technical Report on the comparative toxicity studies of allyl acetate (CAS No. 591-87-7), allyl alcohol (CAS No. 107-18-6) and acrolein (CAS No. 107-02-8) administered by gavage to F344/N rats and B6C3F1 mice.

Immunomodulatory effects of maternal atrazine exposure on male Balb/c mice.

[Propofol protecting rats from paraquat induced lung injury].

Econazole attenuates cytotoxicity of 1-methyl-4-phenylpyridinium by suppressing mitochondrial membrane permeability transition.

[Advance of study on pathological mechanism of paraquat poisoning].

Characterizing the ovotoxicity of cyclophosphamide metabolites on cultured mouse ovaries.

Toxic actions of dinoseb in medaka (*Oryzias latipes*) embryos as determined by in vivo ³¹P NMR, HPLC-UV and ¹H NMR metabolomics.

Neuregulin 1-Beta cytoprotective role in AML 12 mouse hepatocytes exposed to pentachlorophenol.

Acrolein produces nitric oxide through the elevation of intracellular calcium levels to induce apoptosis in human umbilical vein endothelial cells: implications for smoke angiopathy.

Retinal degeneration from oxidative damage.

Cytotoxic effects and apoptosis induction of atrazine in a grass carp (*Ctenopharyngodon idellus*) cell line.

Mixture toxicity of the antifouling compound irgarol to the marine phytoplankton species *Dunaliella tertiolecta*.

Effects of atrazine on sexual maturation in female Japanese quail induced by photostimulation or exogenous gonadotropin.

In vitro assessment of antimicrobial activity of carvacrol, thymol and cinnamaldehyde towards *Salmonella* serotype Typhimurium DT104: effects of pig diets and emulsification in hydrocolloids.

Curcumin protects PC12 cells against 1-methyl-4-phenylpyridinium ion-induced apoptosis by bcl-2-mitochondria-ROS-iNOS pathway.

6-Hydroxydopamine but not 1-methyl-4-phenylpyridinium abolishes alpha-synuclein anti-apoptotic phenotype by inhibiting its proteasomal degradation and by promoting its aggregation.

Arabidopsis ACCELERATED CELL DEATH2 modulates programmed cell death.

Differential regulation of c-jun and CREB by acrolein and 4-hydroxynonenal.

Effects of different types of oxidative stress in RPE cells.

Ethanol-induced apoptosis in polarized hepatic cells possibly through regulation of the Fas pathway.

Death of stoma guard cells in leaf epidermis under disturbance of energy provision.

Acrolein-mediated mechanisms of neuronal death.

Antioxidant enzyme inhibitors enhance nitric oxide-induced cell death in U937 cells.

Toxin release in response to oxidative stress and programmed cell death in the cyanobacterium *Microcystis aeruginosa*.

Ceramide is a mediator of apoptosis in retina photoreceptors.

Photolysis behavior of herbicide propisochlor in water media and preliminary analysis of photoproducts under different light sources.

Chloroacetaldehyde- and acrolein-induced death of human proximal tubule cells.

Sodium arsenite accelerates TRAIL-mediated apoptosis in melanoma cells through upregulation of TRAIL-R1/R2 surface levels and downregulation of cFLIP expression.

Effects of chemical ischemia on cerebral cortex slices: focus on mitogen-activated protein kinase cascade.

Developmental dental toxicity of dioxin and related compounds--a review.

Spatial and temporal expression of glucocorticoid, retinoid, and thyroid hormone receptors is not altered in lungs of congenital diaphragmatic hernia.

Mitochondrial reactive oxygen species and nitric oxide-mediated cancer cell apoptosis in 2-butylamino-2-demethoxyhypocrellin B photodynamic treatment.

Modulation of aromatase activity and mRNA by various selected pesticides in the human choriocarcinoma JEG-3 cell line.

Cell cycle proteins in normal and chemically induced abnormal secondary palate development: a review.

Antioxidant enzyme inhibitors enhance singlet oxygen-induced cell death in HL-60 cells.

Severe craniofacial malformations resulting from developmental exposure to dioxin.

[Effect of adenovirus-mediated mutant exogenous P27kip1 gene expression on the chemosensitivities of cholangiocarcinoma cell line].

Carcinogenicity of "non-dioxinlike" polychlorinated biphenyls.

Carcinogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in experimental models.

Aqueous extract of *Trigonella foenum-graecum* L. ameliorates additive urotoxicity of buthionine sulfoximine and cyclophosphamide in mice.

t(14;18) translocations in lymphocytes of healthy dioxin-exposed individuals from Seveso, Italy.

Inhibitory effect of caffeic acid phenethyl ester on the growth of SW480 colorectal tumor cells involves beta-catenin associated signaling pathway down-regulation.

Down-regulation of wt1 expression in leukemia cell lines as part of apoptotic effect in arsenic treatment using two compounds.

Iron contributes to dopamine-induced toxicity in oligodendrocyte progenitors.

Cell death, caspase activation, and HMGB1 release of porcine choroid plexus epithelial cells during *Streptococcus suis* infection in vitro.

Impairment of lower jaw growth in developing zebrafish exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin and reduced hedgehog expression.

Overexpression of survivin in primary ATL cells and sodium arsenite induces apoptosis by down-regulating survivin expression in ATL cell lines.

Clinical pharmacokinetic study of arsenic trioxide in an acute promyelocytic leukemia (APL) patient: speciation of arsenic metabolites in serum and urine.

The binding of 2,4-dinitrophenol to wild-type and amyloidogenic transthyretin.

Evaluation of subchronic inhalation toxicity of dimethyl disulfide in rats.

Differential expression profiling of the hepatic proteome in a rat model of dioxin resistance: correlation with genomic and transcriptomic analyses.

Dual treatment with COX-2 inhibitor and sodium arsenite leads to induction of surface Fas Ligand expression and Fas-Ligand-mediated apoptosis in human melanoma cells.

Loss of glial Lazarillo, a homolog of apolipoprotein D, reduces lifespan and stress resistance in *Drosophila*.

Adverse health effects in humans exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Clinical and experimental applications of NIR-LED photobiomodulation.

The effects of biocides (antiseptics and disinfectants) on the endospores of *Rhinosporidium seeberi*.

Protective effect of hepatocyte growth factor against degeneration of the retinal pigment epithelium and photoreceptor in sodium iodate-injected rats.

Quantitative analysis of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced proteome alterations in 5L rat hepatoma cells using isotope-coded protein labels.

Depletion of securin increases arsenite-induced chromosome instability and apoptosis via a p53-independent pathway.

Effects of dimethylsulphoxide on mice arsenite-induced dysmorphogenesis in embryo culture and cytotoxicity in embryo cells.

Time-dependent effects of sodium arsenite on DNA breakage and apoptosis observed in the comet assay.

Age-dependent cell death and the role of ATP in hydrogen peroxide-induced apoptosis and necrosis.

Arsenic induced apoptosis in rat liver following repeated 60 days exposure.

NF-kappaB-associated MnSOD induction protects against beta-amyloid-induced neuronal apoptosis.

Arsenic-induced cell death in liver and brain of experimental rats.

Sex and congenital diaphragmatic hernia.

Retinoic acid rescues lung hypoplasia in nitrofen-induced hypoplastic foetal rat lung explants.

Potential of apoptosis by heat stress plus pesticide exposure in stress resistant human B-lymphoma cells and its attenuation through interaction with follicular dendritic cells: role for c-Jun N-terminal kinase signaling.

Differentiation-specific factors modulate epidermal CYP1-4 gene expression in human skin in response to retinoic acid and classic aryl hydrocarbon receptor ligands.

TCDD-induced CYP1A1 expression, an index of dioxin toxicity, is suppressed by flavonoids permeating the human intestinal Caco-2 cell monolayers.

K⁺ transport and energetics in Kir6.2(-/-) mouse hearts assessed by ⁸⁷Rb and ³¹P magnetic resonance and optical spectroscopy.

Chitosan-based tyrosinase optical phenol biosensor employing hybrid nafion/sol-gel silicate for MBTH immobilization.

Identification and functional expression of a carrier-mediated riboflavin transport system on rabbit corneal epithelium.

Transport of timolol and tilisolol in rabbit corneal epithelium.

Arsenite induces apoptosis in hepatocytes through an enhancement of the activation of Jun N-terminal kinase and p38 mitogen-activated protein kinase caused by partial hepatectomy.

Gene expression alterations in immune system pathways following exposure to immunosuppressive chemicals.

Biochemical activity of reactive oxygen species scavengers do not predict retinal ganglion cell survival.

A selective optical chemical sensor for 2,6-dinitrophenol based on fluorescence quenching of a novel functional polymer.

Case report: Hydroquinone and/or glutaraldehyde induced acute myeloid leukaemia?

Antioxidants reduce cone cell death in a model of retinitis pigmentosa.

Zebrafish as a model for developmental neurotoxicity testing.

[Cytoprotective effects of heat shock protein-70 in bronchial epithelium against neutrophil elastase-induced cell injury].

Sodium arsenite impairs insulin secretion and transcription in pancreatic beta-cells.

Monomeric azaheterofullerene derivatives RC59N: influence of the R moiety on spectroscopic and photophysical properties.

Photoirradiation of retinyl palmitate in ethanol with ultraviolet light--formation of photodecomposition products, reactive oxygen species, and lipid peroxides.

Mechanism of L-ascorbic acid uptake by rabbit corneal epithelial cells: evidence for the involvement of sodium-dependent vitamin C transporter 2.

Antiparasitic activity of flavonoids and isoflavones against *Cryptosporidium parvum* and *Encephalitozoon intestinalis*.

Regulation of human male germ cell death by modulators of ATP production.

Comparative first-principles study of structural and optical properties of alkali metal azides.

Induction of connective tissue growth factor in retinal pigment epithelium cells by oxidative stress.

Prohibitin is involved in mitochondrial biogenesis in plants.

The effect of ethanol, ethanol metabolizing enzyme inhibitors, and Vitamin E on regulating glutathione, glutathione S-transferase, and S-adenosylmethionine in mouse primary hepatocyte.

Suppressive effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on vascular remodeling that takes place in the normal labyrinth zone of rat placenta during late gestation.

Interference by 2,3,7,8-tetrachlorodibenzo-p-dioxin with cultured mouse submandibular gland branching morphogenesis involves reduced epidermal growth factor receptor signaling.

Transport of acebutolol through rabbit corneal epithelium.

Chitosan nanoparticles as a potential drug delivery system for the ocular surface: toxicity, uptake mechanism and in vivo tolerance.

Synthesis of new chiral amines with a cyclic 1,2-diacetal skeleton derived from (2R, 3R)-(+)-tartaric acid.

Stochastic spineless expression creates the retinal mosaic for colour vision.

The aryl hydrocarbon receptor activates the retinoic acid receptor α through SMRT antagonism.

Cytochrome P450 Cyp4x1 is a major P450 protein in mouse brain.

UVA1 radiation (340-400 nm) interferes with the perforin-granule system of CD8hi+ cytotoxic T lymphocytes in vitro.

Sunlight generates multiple tryptophan photoproducts eliciting high efficacy CYP1A induction in chick hepatocytes and in vivo.

In vitro cytotoxicity of TCDD on SPC-A1 cells.

Constitutive activation of the aryl hydrocarbon receptor in T-lineage cells induces thymus involution independently of the Fas/Fas ligand signaling pathway.

Cell cycle inhibition by sodium arsenite in primary embryonic rat midbrain neuroepithelial cells.

Loss of mitochondrial membrane potential is associated with increase in mitochondrial volume: physiological role in neurones.

Dopamine-beta-hydroxylase immunohistochemical study in the locus coeruleus of neonate rats exposed to 2,4-dichlorophenoxyacetic acid through mother's milk.

Metabolic regulation of in-vitro-produced bovine embryos. I. Effects of metabolic regulators at different glucose concentrations with embryos produced by semen from different bulls.

CYP1A in TCDD toxicity and in physiology-with particular reference to CYP dependent arachidonic acid metabolism and other endogenous substrates.

Enterocyte cytoskeleton changes are crucial for enhanced translocation of nonpathogenic Escherichia coli across metabolically stressed gut epithelia.

Amine oxidases in apoptosis and cancer.

Gene expression profiling of responses to dimethylarsinic acid in female F344 rat urothelium.

Antioxidant and hepatoprotective effects of Eucalyptus maculata.

The use of flow cytometric methods in acute and long-term in vitro testing.

The polysaccharide antibody response after *Streptococcus pneumoniae* vaccination is differentially enhanced or suppressed by 3,4-dichloropropionanilide and 2,4-dichlorophenoxyacetic acid.

Preventive mechanism of cellular glutathione in monomethylarsonic acid-induced cytolethality.

Toxicity testing of herbicide norflurazon on an aquatic bioindicator species--the planarian *Polycelis felina* (Daly.).

Gonadal development of larval male *Xenopus laevis* exposed to atrazine in outdoor microcosms.

Atrazine and the hypothalamo-pituitary-gonadal axis in sexually maturing precocial birds: studies in male Japanese quail.

Cytotoxic effects in mammalian Vero cells exposed to pentachlorophenol.

The effect on human eye blink frequency of exposure to limonene oxidation products and methacrolein.

The lethal impacts of Roundup and predatory stress on six species of North American tadpoles.

Quantitative and kinetic study of oxidative stress regulons using green fluorescent protein.

Vascular endothelial growth factor reduced and connective tissue growth factor induced by triamcinolone in ARPE19 cells under oxidative stress.

Nitrofen induces a redox-dependent apoptosis associated with increased p38 activity in P19 teratocarcinoma cells.

The effects of a PSII inhibitor on phytoplankton community structure as assessed by HPLC pigment analyses, microscopy and flow cytometry.

Illnesses related to shank application of metam-sodium, Arvin, California, July 2002.

Chemopreventive properties of trans-resveratrol against the cytotoxicity of chloroacetanilide herbicides in vitro.

Synergistic effects of diuron and sedimentation on photosynthesis and survival of crustose coralline algae.

Effects of Photosystem II inhibiting herbicides on mangroves--preliminary toxicology trials.

Neuropathological studies on cycloate-induced neuronal cell death in the rat brain.

Similar patterns of mitochondrial vulnerability and rescue induced by genetic modification of alpha-synuclein, parkin, and DJ-1 in *Caenorhabditis elegans*.

Acrolein-induced cell death in PC12 cells: role of mitochondria-mediated oxidative stress.

Long-lived alphaMUPA transgenic mice show reduced SOD2 expression, enhanced apoptosis and reduced susceptibility to the carcinogen dimethylhydrazine.

Regulation of constitutive neutrophil apoptosis by the alpha,beta-unsaturated aldehydes acrolein and 4-hydroxynonenal.

Cinnamaldehyde-induced apoptosis in human PLC/PRF/5 cells through activation of the proapoptotic Bcl-2 family proteins and MAPK pathway.

[WITHDRAWN] Overexpression of superoxide dismutase or glutathione peroxidase protects against the paraquat + maneb-induced Parkinson disease phenotype.

Oxidative damage is a potential cause of cone cell death in retinitis pigmentosa.

The aldehyde acrolein induces apoptosis via activation of the mitochondrial pathway.

Expression of gastrointestinal glutathione peroxidase is inversely correlated to the presence of hepatitis C virus subgenomic RNA in human liver cells.

Plasma retinoid profile in bullfrogs, *Rana catesbeiana*, in relation to agricultural intensity of sub-watersheds in the Yamaska River drainage basin, QuÃ©bec, Canada.

Conformational and photophysical studies on porphyrin-containing donor-bridge-acceptor compounds. Charge separation in micellar nanoreactors.

Autotrophic and mixotrophic hydrogen photoproduction in sulfur-deprived chlamydomonas cells.

Protection by puerarin against MPP⁺-induced neurotoxicity in PC12 cells mediated by inhibiting mitochondrial dysfunction and caspase-3-like activation.

Multiple components of 2,4-dichlorophenoxyacetic acid uptake by rat choroid plexus.

Wild-type alpha-synuclein interacts with pro-apoptotic proteins PKCdelta and BAD to protect dopaminergic neuronal cells against MPP⁺-induced apoptotic cell death.

Detection of herbicide subclasses by an optical multibiosensor based on an array of photosystem II mutants.

Coherent phase microscopy in cell biology: visualization of metabolic states.

Optical microsensors for pesticides identification based on porous silicon technology.

Primary hepatocyte apoptosis is unlikely to relate to caspase-3 activity under sustained endogenous oxidative stress.

[Withdrawal of exogenous auxin induces programmed cell death of cotton embryogenic suspension cultures].

Oxidative metabolites are involved in polyamine-induced microglial cell death.

Arsenite delays progression through each cell cycle phase and induces apoptosis following G2/M arrest in U937 myeloid leukemia cells.

AMG 9810 [(E)-3-(4-t-butylphenyl)-N-(2,3-dihydrobenzo[b][1,4] dioxin-6-yl)acrylamide], a novel vanilloid receptor 1 (TRPV1) antagonist with antihyperalgesic properties.

Changes in DNA binding pattern of transcription factor YY1 in neuronal degeneration.

Cell death induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (2,3,7,8-TCDD) in AtT-20 pituitary cells.

Effects of arsenic and UVB on normal human cultured keratinocytes: impact on apoptosis and implication on photocarcinogenesis.

Paradoxical effects of green tea (*Camellia sinensis*) and antioxidant vitamins in diabetic rats: improved retinopathy and renal mitochondrial defects but deterioration of collagen matrix glycooxidation and cross-linking.

Deregulation of cell proliferation by polycyclic aromatic hydrocarbons in human breast carcinoma MCF-7 cells reflects both genotoxic and nongenotoxic events.

Oxidative stress in mitochondria: decision to survival and death of neurons in neurodegenerative disorders.

Celecoxib inhibits proliferation and induces apoptosis via cyclooxygenase-2 pathway in human pancreatic carcinoma cells.

Role of aldehyde dehydrogenase isozymes in the defense of rat lens and human lens epithelial cells against oxidative stress.

[Risk factors for pediatric malignant bone tumors].

Genetic and environmental influences on malformations of the cardiac outflow tract.

Effect of pollen-mediated oxidative stress on immediate hypersensitivity reactions and late-phase inflammation in allergic conjunctivitis.

Insulin neuroprotection against oxidative stress in cortical neurons--involvement of uric acid and glutathione antioxidant defenses.

Carcinogenic risks of dioxin: mechanistic considerations.

Retinoid status and responsiveness to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice lacking retinoid binding protein or retinoid receptor forms.

Ultrastructural findings in feline corneal sequestra.

Synthesis and reactions of some new substituted pyridine and pyrimidine derivatives as analgesic, anticonvulsant and antiparkinsonian agents.

Gene expression changes in human small airway epithelial cells exposed to Delta9-tetrahydrocannabinol.

Low level, long-term inorganic arsenite exposure causes generalized resistance to apoptosis in cultured human keratinocytes: potential role in skin co-carcinogenesis.

Photosensitizing properties of 6-methoxy-2-naphthylacetic acid, the major metabolite of the phototoxic non-steroidal anti-inflammatory and analgesic drug nabumetone.

Effects of prenatal vitamins A, E, and C on the hypoplastic hearts of fetal rats with diaphragmatic hernia.

Congenital diaphragmatic hernia: a retinoid-signaling pathway disruption during lung development?

Induction of p53 by urokinase in lung epithelial cells.

Effect of caffeic acid phenethyl ester on proliferation and apoptosis of colorectal cancer cells in vitro.

Loss of mitochondrial membrane potential and caspase activation enhance apoptosis in irradiated K562 cells treated with herbimycin A.

Carbamylated low-density lipoprotein induces death of endothelial cells: a link to atherosclerosis in patients with kidney disease.

NF-kappaB and not the MAPK signaling pathway regulates GADD45beta expression during acute inflammation.

[Experimental behavioral tests using monkey and rat offspring born from mothers exposed perinatally to EDCs].

An epidemiological study of poisoning cases reported to the National Poisons Information Centre, All India Institute of Medical Sciences, New Delhi.

Retinal degeneration and other eye disorders in wives of farmer pesticide applicators enrolled in the agricultural health study.

Pseudolaminar necrosis in cyanide intoxication: a neuropathology case report.

Peroxiredoxin 6, a 1-Cys peroxiredoxin, functions in antioxidant defense and lung phospholipid metabolism.

Temporal and dose-dependent hepatic gene expression patterns in mice provide new insights into TCDD-Mediated hepatotoxicity.

Identification of the tryptophan photoproduct 6-formylindolo[3,2-b]carbazole, in cell culture medium, as a factor that controls the background aryl hydrocarbon receptor activity.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats disrupts brain sexual differentiation.

Ah receptor- and TCDD-mediated liver tumor promotion: clonal selection and expansion of cells evading growth arrest and apoptosis.

Localization of cytochrome P450 CYP2S1 expression in human tissues by in situ hybridization and immunohistochemistry.

Methyl bromide intoxication causes reversible symmetric brainstem and cerebellar MRI lesions.

Benzo[a]pyrene, but not 2,3,7,8-TCDD, induces G2/M cell cycle arrest, p21CIP1 and p53 phosphorylation in human choriocarcinoma JEG-3 cells: a distinct signaling pathway.

2,4-Dinitrophenol pharmacologically promotes retinal detachment in rabbits.

Effects of PCB 126 on primary immune organs and thymocyte apoptosis in chicken embryos.

Health status and plasma dioxin levels in chloracne cases 20 years after the Seveso, Italy accident.

Acidic fibroblast growth factor (FGF-1) and FGF receptor 1 signaling in human Y79 retinoblastoma.

Mitochondria are fast Ca²⁺ sinks in rat extraocular muscles: a novel regulatory influence on contractile function and metabolism.

An assessment of the toxicological significance of anthropogenic contaminants in Canadian arctic wildlife.

[Photochemical activity of photosystem II and hydrogen photoproduction in sulfur-deprived *Chlamydomonas reinhardtii* mutants D1-R323D and D1-R323L].

Identification and characterization of a Na⁺-dependent neutral amino acid transporter, ASCT1, in rabbit corneal epithelial cell culture and rabbit cornea.

Effects of unoprostone and endothelin 1 on L-type channel currents in human trabecular meshwork cells.

Thaxtomin A induces programmed cell death in *Arabidopsis thaliana* suspension-cultured cells.

Extent of iron pick-up in deferoxamine-coupled polyurethane materials for therapy of chronic wounds.

Spectral, electrochemical, and photophysical studies of a magnesium porphyrin-fullerene dyad.

Vitamins inhibit oxidant-induced apoptosis of corneal endothelial cells.

Flow-through sol-gel optical biosensor for the colorimetric determination of acetazolamide.

Human CD34-positive hematopoietic stem cells constitute targets for carcinogenic polycyclic aromatic hydrocarbons.

Altered retinoid metabolism in female Long-Evans and Han/Wistar rats following long-term 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treatment.

Proapoptotic, antimigratory, antiproliferative, and antiangiogenic effects of commercial C-reactive protein on various human endothelial cell types in vitro: implications of contaminating presence of sodium azide in commercial preparation.

Ouabain induces an increase of retinal ganglion cell survival in vitro: the involvement of protein kinase C.

A new short-term toxicity assay using *Aspergillus awamori* with recombinant aequorin gene.

EGF receptor-dependent JNK activation is involved in arsenite-induced p21Cip1/Waf1 upregulation and endothelial apoptosis.

Protection against amyloid beta-peptide (1-42)-induced loss of phospholipid asymmetry in synaptosomal membranes by tricyclodecan-9-xanthogenate (D609) and ferulic acid ethyl ester: implications for Alzheimer's disease.

Aryl hydrocarbon receptor-dependent induction of loss of mitochondrial membrane potential in epididymal spermatozoa by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Mortality of life stages of cowpea weevil (Coleoptera: Bruchidae) exposed to low pressure at different temperatures.

Novel regulation of Na, K-ATPase by Src tyrosine kinases in cortical neurons.

Altered thyroxin and retinoid metabolic response to 2,3,7,8-tetrachlorodibenzo-p-dioxin in aryl hydrocarbon receptor-null mice.

Energy substrate requirements for survival of rat retinal cells in culture: the importance of glucose and monocarboxylates.

Mechanisms of exocrine pancreatic toxicity induced by oral treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Harlan Sprague-Dawley Rats.

Cyclic GMP, sodium nitroprusside and sodium azide reduce aqueous humour formation in the isolated arterially perfused pig eye.

Small interference RNA-mediated gene silencing of human biliverdin reductase, but not that of heme oxygenase-1, attenuates arsenite-mediated induction of the oxygenase and increases apoptosis in 293A kidney cells.

Ascorbic acid and alpha-tocopherol as potent modulators of apoptosis on arsenic induced toxicity in rats.

Tetrachlorodibenzo-p-Dioxin (TCDD) Inhibits Differentiation and Increases Apoptotic Cell Death of Precursor T-Cells in the Fetal Mouse Thymus.

Molecular interactions of the aryl hydrocarbon receptor and its biological and toxicological relevance for reproduction.

Paired cysteine mutagenesis to establish the pattern of disulfide bonds in the functional intact secretin receptor.

Molecular salts with diquat-based electron acceptors for nonlinear optics.

Functional activity of a monocarboxylate transporter, MCT1, in the human retinal pigmented epithelium cell line, ARPE-19.

A carbohydrate fraction, AIP1, from *Artemisia iwayomogi* down-regulates Fas gene expression and suppresses apoptotic death of the thymocytes induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Photodecomposition of retinyl palmitate in ethanol by UVA light-formation of photodecomposition products, reactive oxygen species, and lipid peroxides.

Scleroglucan: a versatile polysaccharide for modified drug delivery.

Chronic exposure to arsenic sensitizes CD3+ and CD56+ human cells to sodium arsenite-mediated apoptosis.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on vitamin A metabolism in mice.

Establishment of a germ-somatic cell coculture model for toxicity assessment of environmental endocrine disrupters.

[Oxidative stress induced by NaAsO₂ in HaCaT cells].

In vitro and ex vivo intestinal tissue models to measure mucoadhesion of poly (methacrylate) and N-trimethylated chitosan polymers.

2,3,7,8-tetrachlorodibenzo-p-dioxin enhances negative selection of T cells in the thymus but allows autoreactive T cells to escape deletion and migrate to the periphery.

Assessment of the toxicity of triasulfuron and its photoproducts using aquatic organisms.

Paraquat induces oxidative stress and neuronal cell death; neuroprotection by water-soluble Coenzyme Q10.

Assessing cytotoxicity of photosensitized transformation products of 2,4,6-trinitrotoluene (TNT) and atrazine with freshwater microbial assemblages.

Reactivity of hydrazinophthalazine drugs with the lipid peroxidation products acrolein and crotonaldehyde.

Pesticide patch test series for the assessment of allergic contact dermatitis among banana plantation workers in panama.

Role of glutathione in dimethylarsinic acid-induced apoptosis.

Metallothionein (I/II) suppresses genotoxicity caused by dimethylarsinic acid.

Paraquat-induced apoptotic cell death in cerebellar granule cells.

Low-level atrazine exposure decreases cell proliferation in human fibroblasts.

[Using the FRTL-5 cell to screen the thyroxine disrupting effects of the two pesticides-ethylenethiourea and pendimethalin].

Low-dose agrochemicals and lawn-care pesticides induce developmental toxicity in murine preimplantation embryos.

Effects of the agricultural pesticides atrazine, chlorothalonil, and endosulfan on South Florida microbial assemblages.

Chlorpyrifos induces apoptosis in rat cortical neurons that is regulated by a balance between p38 and ERK/JNK MAP kinases.

Exposure of cardiac fibroblasts to the herbicide nitrofen causes altered interactions with the extracellular matrix.

Influence of UV irradiation on the toxicity of phenylurea herbicides using Microtox test.

Glyphosate poisoning.

The involvement of p53 in paraquat-induced apoptosis in human lung epithelial-like cells.

Chiral response of Oryzae and Paniceae plants in alpha-methylbenzyl-3-p-tolyl urea agar medium.

Protective role of metallothionein (I/II) against pathological damage and apoptosis induced by dimethylarsinic acid.

Vanin-1-/- mice exhibit a glutathione-mediated tissue resistance to oxidative stress.

Multiple deficiencies in antioxidant enzymes in mice result in a compound increase in sensitivity to oxidative stress.

Modulation of phospholipid asymmetry in synaptosomal membranes by the lipid peroxidation products, 4-hydroxynonenal and acrolein: implications for Alzheimer's disease.

Alpha-synuclein up-regulation and aggregation during MPP⁺-induced apoptosis in neuroblastoma cells: intermediacy of transferrin receptor iron and hydrogen peroxide.

Protein adduct-trapping by hydrazinophthalazine drugs: mechanisms of cytoprotection against acrolein-mediated toxicity.

Resistance of mitochondrial DNA-depleted cells against cell death: role of mitochondrial superoxide dismutase.

2'-benzoyloxycinnamaldehyde induces apoptosis in human carcinoma via reactive oxygen species.

Transgenic mice overexpressing glutathione peroxidase 4 are protected against oxidative stress-induced apoptosis.

Bcl-2 family members localize to tobacco chloroplasts and inhibit programmed cell death induced by chloroplast-targeted herbicides.

Verification of performance with the automated direct optical TIRF immunosensor (River Analyser) in single and multi-analyte assays with real water samples.

Involvement of rat organic anion transporter 3 in the uptake of an organic herbicide, 2,4-dichlorophenoxyacetate, by the isolated rat choroid plexus.

Antioxidants and ocular cell type differences in cytoprotection from formic acid toxicity in vitro.

Distinct roles of c-Abl and Atm in oxidative stress response are mediated by protein kinase C delta.

The renal-specific transporter mediates facilitative transport of organic anions at the brush border membrane of mouse renal tubules.

Identification and functional assessment of the novel murine organic anion transporter Oat5 (Slc22a19) expressed in kidney.

Oxidative stress in neonates: evaluation using specific biomarkers.

Arabidopsis thaliana plants overexpressing thylakoidal ascorbate peroxidase show increased resistance to Paraquat-induced photooxidative stress and to nitric oxide-induced cell death.

Evidence that atrazine and diaminochlorotriazine inhibit the estrogen/progesterone induced surge of luteinizing hormone in female Sprague-Dawley rats without changing estrogen receptor action.

Paraquat induces apoptosis of cultured rat cortical cells.

Simultaneous multi-analyte determination of estrone, isoproturon and atrazine in natural waters by the River ANALyser (RIANA), an optical immunosensor.

Recruitment of thyroid hormone receptor/retinoblastoma-interacting protein 230 by the aryl hydrocarbon receptor nuclear translocator is required for the transcriptional response to both dioxin and hypoxia.

Hematoporphyrin monomethyl ether photodynamic damage on HeLa cells by means of reactive oxygen species production and cytosolic free calcium concentration elevation.

2,3,7,8-TCDD effects on visual structure and function in swim-up rainbow trout.

Transforming growth factor-beta 1-induced apoptosis is blocked by beta 1-integrin-mediated mitogen-activated protein kinase activation in human hepatoma cells.

The induction of cell cycle regulatory and DNA repair proteins in cisplatin-induced acute renal failure.

The expression of P-glycoprotein in AML cells with FLT3 internal tandem duplications is associated with reduced apoptosis in response to FLT3 inhibitors.

Chronic inorganic arsenic exposure induces hepatic global and individual gene hypomethylation: implications for arsenic hepatocarcinogenesis.

The modulation of radiation-induced cell death by genistein in K562 cells: activation of thymidine kinase 1.

Chemical analysis and genotoxicological safety assessment of paper and paperboard used for food packaging.

Combined effects of Matrigel and growth factors on maintaining undifferentiated murine embryonic stem cells for embryotoxicity testing.

Flow cytometric methods used as screening tests for basal toxicity of chemicals.

Aromatic hydrocarbon receptor status in the metabolism of xenobiotics under normal and pathophysiological conditions.

Modeling of methyl isothiocyanate air concentrations associated with community illnesses following a metam-sodium sprinkler application.

Expression of hypothalamic neuropeptides after acute TCDD treatment and distribution of Ah receptor repressor.

Effects of cyclooxygenase-2 antisense vector on proliferation of human cholangiocarcinoma cells.

Branch retinal artery occlusion: a complication of iron-deficiency anemia in a young adult with a rectal carcinoid.

Minocycline up-regulates Bcl-2 and protects against cell death in mitochondria.

Effects of epidermal growth factor receptor deficiency and 2,3,7,8-tetrachlorodibenzo-p-dioxin on fetal development in mice.

Cytotoxic effects of environmentally relevant chlorophenols on L929 cells and their mechanisms.

Drosophila parkin mutants have decreased mass and cell size and increased sensitivity to oxygen radical stress.

Herbimycin A inhibits angiogenic activity in endothelial cells and reduces neovascularization in a rat model of retinopathy of prematurity.

Reductions in the incidence of nitrofen-induced diaphragmatic hernia by vitamin A and retinoic acid.

Hypothermia augments reactive oxygen species detected in the guinea pig isolated perfused heart.

Mechanisms of ischemic brain injury.

Geldanamycin and herbimycin A induce apoptotic killing of B chronic lymphocytic leukemia cells and augment the cells' sensitivity to cytotoxic drugs.

Intra-strain dioxin sensitivity and morphometric effects in swim-up rainbow trout (*Oncorhynchus mykiss*).

Preferential transcription of rabbit Aldh1a1 in the cornea: implication of hypoxia-related pathways.

The uremic solutes p-cresol and indoxyl sulfate inhibit endothelial proliferation and wound repair.

Mitochondrial coupling in vivo in mouse skeletal muscle.

Neurotoxins and neurotoxic species implicated in neurodegeneration.

Effects of airbag deployment: lesions, epidemiology, and management.

Immunohistochemical detection of activated caspases in apoptotic hepatocytes in rat liver.

Role of aryl hydrocarbon receptor in mesencephalic circulation failure and apoptosis in zebrafish embryos exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Characteristics of 3,5,3'-triiodothyronine (T3)-uptake system of tadpole red blood cells: effect of endocrine-disrupting chemicals on cellular T3 response.

EGR1 is a novel target for AhR agonists in human lung epithelial cells.

Down regulation of hepatic PPARalpha function by AhR ligand.

Alpha-tocotrienol provides the most potent neuroprotection among vitamin E analogs on cultured striatal neurons.

Angiotensin type 2 receptor neuroprotection against chemical hypoxia is dependent on the delayed rectifier K⁺ channel, Na⁺/Ca²⁺ exchanger and Na⁺/K⁺ ATPase in primary cortical cultures.

Isolation and structural characterization of an optically active intermediate in the oxidative addition of methyl iodide on a rhodium(I) centre.

Toxicity detection from EILATox-Oregon Workshop samples by using kinetic photobacteria measurement: the Flash method.

Air bags and the skin.

Identification of photoproducts from imazosulfuron by HPLC.

Gene interaction network suggests dioxin induces a significant linkage between aryl hydrocarbon receptor and retinoic acid receptor beta.

Comparison of the cytotoxicity induced by different exposure to sodium arsenite in two fish cell lines.

Sequential morphological changes of erythrocyte apoptosis in *Xenopus* larvae exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Spatiotemporal evidence of apoptosis-mediated ischemic injury in organotypic hippocampal slice cultures.

Interaction between the aryl hydrocarbon receptor and retinoic acid pathways increases matrix metalloproteinase-1 expression in keratinocytes.

Some polybrominated diphenyl ether (PBDE) flame retardants with wide environmental distribution inhibit TCDD-induced EROD activity in primary cultured carp (*Cyprinus carpio*) hepatocytes.

Effect of TCDD on corpus cavernosum histology and smooth muscle physiology.

Presence and functional activity of the aryl hydrocarbon receptor in isolated murine cerebral vascular endothelial cells and astrocytes.

Fluorescence resonance energy transfer from tryptophan to a chromium(III) complex accompanied by non-specific cleavage of albumin: a step forward towards the development of a novel photoprotease.

Ectopic cyclin D1 expression blocks STI571-induced erythroid differentiation of K562 cells.

D-mannose transport and metabolism in isolated enterocytes.

Protein phosphatase 2A-mediated cross-talk between p38 MAPK and ERK in apoptosis of cardiac myocytes.

Toxicity increases in ice containing monochlorophenols upon photolysis: environmental consequences.

Cytochrome P450-dependent toxicity of environmental polycyclic aromatic hydrocarbons towards human macrophages.

Versican V1 isoform induces neuronal differentiation and promotes neurite outgrowth.

Tumor promoters as inhibitors of apoptosis in rat hepatocytes.

Glutathione-S-transferase A4-4 modulates oxidative stress in endothelium: possible role in human atherosclerosis.

Polycyclic aromatic hydrocarbons modulate cell proliferation in rat hepatic epithelial stem-like WB-F344 cells.

Src and Cas are essentially but differentially involved in angiotensin II-stimulated migration of vascular smooth muscle cells via extracellular signal-regulated kinase 1/2 and c-Jun NH2-terminal kinase activation.

Cell-based assay for the detection of chemically induced cellular stress by immortalized untransformed transgenic hepatocytes.

Combined screening of thymocytes using apoptosis-specific cDNA array and promoter analysis yields novel gene targets mediating TCDD-induced toxicity.

Evidence for induction of apoptosis in T cells from murine fetal thymus following perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Synthesis of optically pure highly functionalized gamma-lactams via 2-azetidinone-tethered iminophosphoranes.

Angiotensin II attenuates chemical hypoxia-induced caspase-3 activation in primary cortical neuronal cultures.

Complestatin prevents apoptotic cell death: inhibition of a mitochondrial caspase pathway through AKT/PKB activation.

A chronic implant to record electroretinogram, visual evoked potentials and oscillatory potentials in awake, freely moving rats for pharmacological studies.

Toxicological profiling of sediments using in vitro bioassays, with emphasis on endocrine disruption.

Developmental toxicity of dioxin to mouse embryonic teeth in vitro: arrest of tooth morphogenesis involves stimulation of apoptotic program in the dental epithelium.

Enhancement of death-receptor induced caspase-8-activation in the death-inducing signalling complex by uncoupling of oxidative phosphorylation.

The Metropolitan Atlanta Congenital Defects Program: 35 years of birth defects surveillance at the Centers for Disease Control and Prevention.

Caspase-3 dependent proteolytic activation of protein kinase C delta mediates and regulates 1-methyl-4-phenylpyridinium (MPP+)-induced apoptotic cell death in dopaminergic cells: relevance to oxidative stress in dopaminergic degeneration.

Individual and mixture toxicity of three pesticides; atrazine, chlorpyrifos, and chlorothalonil to the marine phytoplankton species *Dunaliella tertiolecta*.

Role of chloroplast photosystems II and I in apoptosis of pea guard cells.

Impact of Agent Orange exposure among Korean Vietnam veterans.

Correlation of the structures of agricultural fungicides to gene expression in *Saccharomyces cerevisiae* upon exposure to toxic doses.

Allyl alcohol activation of protein kinase C delta leads to cytotoxicity of rat hepatocytes.

Protective effect of docosahexaenoic acid on oxidative stress-induced apoptosis of retina photoreceptors.

Cytotoxic effects of the herbicide 2,4-dichlorophenoxyacetic acid in HepG2 cells.

Acute and chronic effects of alcohol exposure on skeletal muscle c-myc, p53, and Bcl-2 mRNA expression.

An inhibitor of mitochondrial complex I, rotenone, inactivates proteasome by oxidative modification and induces aggregation of oxidized proteins in SH-SY5Y cells.

Delayed behavioural aging and altered mortality in *Drosophila* beta integrin mutants.

Resistance to tumor necrosis factor-alpha (TNF-alpha)-induced apoptosis in rat hepatoma cells expressing TNF-alpha is linked to low antioxidant enzyme expression.

Persistence and prevention of aluminium- and paraquat-induced adaptive response to methyl mercuric chloride in plant cells in vivo.

In vitro activity of dimethylarsinic acid against human leukemia and multiple myeloma cell lines.

Impacts of glutathione peroxidase-1 knockout on the protection by injected selenium against the pro-oxidant-induced liver aponecrosis and signaling in selenium-deficient mice.

Low levels of glutathione peroxidase 1 activity in selenium-deficient mouse liver affect c-Jun N-terminal kinase activation and p53 phosphorylation on Ser-15 in pro-oxidant-induced aponecrosis.

CYP1a1, HSP70, P53, and c-fos expression in human liver carcinoma cells (HepG2) exposed to pentachlorophenol.

The activation of the retinoic acid response element is inhibited in an animal model of congenital diaphragmatic hernia.

Effects of riboflavin photoproducts on microbial activity during photosensitization of atrazine transformation.

Photodegradation of acetochlor in water and UV photoproducts identified by mass spectrometry.

Role of the PSII-H subunit in photoprotection: novel aspects of D1 turnover in *Synechocystis* 6803.

The effect of endocrine disrupting chemicals on thyroid hormone binding to Japanese quail transthyretin and thyroid hormone receptor.

Expression of senescence-enhanced genes in response to oxidative stress.

Enhancement of catalase activity by repetitive low-grade H₂O₂ exposures protects fibroblasts from subsequent stress-induced apoptosis.

Cinnamaldehyde induces apoptosis by ROS-mediated mitochondrial permeability transition in human promyelocytic leukemia HL-60 cells.

Optical whole-cell biosensor using *Chlorella vulgaris* designed for monitoring herbicides.

Neuroprotective effects of alpha-tocopherol on oxidative stress in rat striatal cultures.

The role of oxidative stress in the in vitro induction of micronuclei by pesticides in mouse lung fibroblasts.

Cyclic, pseudocyclic and noncyclic photophosphorylation: new links in the chain.

Fish tolerance to organophosphate-induced oxidative stress is dependent on the glutathione metabolism and enhanced by N-acetylcysteine.

Photodegradation pathways and the in vitro phototoxicity of pyrazinamide, a phototoxic antitubercular drug.

Anticonvulsant potential of holy basil, *Ocimum sanctum* Linn., and its cultures.

Effect of endodontic agents on cytotoxicity induction by sodium fluoride.

A double-masked, randomized control trial of iron supplementation in early infancy in healthy term breast-fed infants.

Pathophysiology of the optic neuropathy associated with Friedreich ataxia.

Unbalanced collagenases/TIMP-1 expression and epithelial apoptosis in experimental lung fibrosis.

Oxygen regulation and limitation to cellular respiration in mouse skeletal muscle in vivo.

Effects of cysteine on the cytotoxicity of arsenic compounds.

Tribromophenol induces the differentiation of SH-SY5Y human neuroblastoma cells in vitro.

Mitochondrial oxidative stress causes chromosomal instability of mouse embryonic fibroblasts.

FLT3 expressing leukemias are selectively sensitive to inhibitors of the molecular chaperone heat shock protein 90 through destabilization of signal transduction-associated kinases.

Tyrosine kinases inhibitors block Fas-mediated deleterious effects in normoxic and hypoxic ventricular myocytes.

Mechanisms of TCDD-induced abnormalities and embryo lethality in white leghorn chickens.

Herbimycin A attenuates apoptosis during heat stress in rats.

The effect of retinyl palmitate added to iron-fortified maize porridge on erythrocyte incorporation of iron in African children with vitamin A deficiency.

Inhibition of NF-kappaB essentially contributes to arsenic-induced apoptosis.

Reversal of Bcl-2-mediated resistance of the EW36 human B-cell lymphoma cell line to arsenite- and pesticide-induced apoptosis by PK11195, a ligand of the mitochondrial benzodiazepine receptor.

Celecoxib inhibits proliferation and induces apoptosis via prostaglandin E2 pathway in human cholangiocarcinoma cell lines.

Cardiac effects of hypocretin-1 in nucleus ambiguus.

GVS-111 prevents oxidative damage and apoptosis in normal and Down's syndrome human cortical neurons.

Human RPE-monocyte co-culture induces chemokine gene expression through activation of MAPK and NIK cascade.

Etiology of congenital diaphragmatic hernia: the retinoid hypothesis.

ZnCl₂ induces Syrian hamster embryo (SHE) cell transformation.

Methylated metabolites of arsenic trioxide are more potent than arsenic trioxide as apoptotic but not differentiation inducers in leukemia and lymphoma cells.

Evidence of oxidative stress in familial amyloidotic polyneuropathy type 1.

The induction of heat shock protein-72 attenuates cisplatin-induced acute renal failure in rats.

Environmental estrogens alter early development in *Xenopus laevis*.

Early changes in metabolism of leukemic cell lines upon induction of apoptosis by cytotoxic drugs.

Spectrum of cross-photosensitization in 18 consecutive patients with contact photoallergy to ketoprofen: associated photoallergies to non-benzophenone-containing molecules.

Perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin alters activity-dependent expression of BDNF mRNA in the neocortex and male rat sexual behavior in adulthood.

Cross-linking of surface IgM in the Burkitt's lymphoma cell line ST486 provides protection against arsenite- and stress-induced apoptosis that is mediated by ERK and phosphoinositide 3-kinase signaling pathways.

Retinal dehydrogenase-2 is inhibited by compounds that induce congenital diaphragmatic hernias in rodents.

PPARalpha agonist-induced rodent tumors: modes of action and human relevance.

Axial skeletal and Hox expression domain alterations induced by retinoic acid, valproic acid, and bromoxynil during murine development.

Modulation of the arsenic effects on cytotoxicity, viability, and cell cycle in porcine endothelial cells by selenium.

Neocortical neurons cultured from mice with expanded CAG repeats in the huntingtin gene: unaltered vulnerability to excitotoxins and other insults.

Src tyrosine kinase but not activated Ras augments sensitivity to taxanes through apoptosis in human adenocarcinoma cells.

Proliferative activity of bile from congenital choledochal cyst patients.

Ryanodine receptor antibodies in myasthenia gravis: epitope mapping and effect on calcium release in vitro.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) alters the endogenous metabolism of all-trans-retinoic acid in the rat.

Rescue of light responses in the *Drosophila* "null" phospholipase C mutant, norpAP24, by the diacylglycerol kinase mutant, rdgA, and by metabolic inhibition.

Damage to developing mouse skeletal muscle myotubes in culture: protective effect of heat shock proteins.

Cardiovascular effects of hypocretin-1 in nucleus of the solitary tract.

Oxidative stress-induced cell death of human oral neutrophils.

2,3,7,8-tetrachlorodibenzo-p-dioxin induces lecithin: retinol acyltransferase transcription in the rat kidney.

Competitive interactions of chlorinated phenol compounds with 3,3',5-triiodothyronine binding to transthyretin: detection of possible thyroid-disrupting chemicals in environmental waste water.

Expression of aryl hydrocarbon receptor and aryl hydrocarbon receptor nuclear translocator messenger ribonucleic acids and proteins in rat and human testis.

Measurement of retinoids and beta-carotene 15,15'-dioxygenase activity in HR-1 hairless mouse skin with UV exposure.

Endocrine disrupting chemicals: interference of thyroid hormone binding to transthyretins and to thyroid hormone receptors.

Toxicokinetics and physiologically based toxicokinetics in toxicology and risk assessment.

Similarity between the major collagens of cuttlefish cranial cartilage and cornea.

Herbimycin A induces sympathetic neuron survival and protects against hypoxia.

Sensitivity and specificity of different staining methods to monitor apoptosis induced by oxidative stress in adherent cells.

Neurodevelopmental defects in zebrafish (*Danio rerio*) at environmentally relevant dioxin (TCDD) concentrations.

Cardioacceleratory responses to hypocretin-1 injections into rostral ventromedial medulla.

Enhanced prediction of potential rodent carcinogenicity by utilizing comet assay and apoptotic assay in combination.

Oxidative stress in laboratory-incubated double-crested cormorant eggs collected from the Great Lakes.

[Protective effect of ecdysterone against sodium arsenite-induced endothelial cell apoptosis].

Implications of glucose transporter protein type 1 (GLUT1)-haplodeficiency in embryonic stem cells for their survival in response to hypoxic stress.

TCDD-induced expression of Ah receptor responsive genes in the pituitary and brain of cellular retinol-binding protein (CRBP-I) knockout mice.

TCDD-induced apoptosis in EL-4 cells deficient of the aryl hydrocarbon receptor and down-regulation of IGFBP-6 prevented the apoptotic cell death.

[Development of the protein therapeutics using the super anti-cell death factor FNK].

Selective enhancement of ifosfamide-induced toxicity in Chinese hamster ovary cells.

Analysis of tryptophan and tyrosine in cerebrospinal fluid by capillary electrophoresis and "ball lens" UV-pulsed laser-induced fluorescence detection.

Glycolaldehyde induces apoptosis in a human breast cancer cell line.

On the significance of the role of cellular stress response reactions in the toxic actions of dioxin.

Aberrant utilization of nitric oxide and regulation of soluble guanylate cyclase in rat diabetic retinopathy.

Cardioselective sulfonylthiourea HMR 1098 blocks mitochondrial uncoupling induced by a KATP channel opener, P-1075, in beating rat hearts.

[Effect of arsenic toxicity on morphology and viability of enzyme in primary culture of rat hippocampal neurons].

Identification and functional characterization of a Na⁺-independent large neutral amino acid transporter, LAT1, in human and rabbit cornea.

Soluble extracts from *Helicobacter pylori* induce dome formation in polarized intestinal epithelial monolayers in a laminin-dependent manner.

Optical sensor for carbon dioxide combining colorimetric change of a pH indicator and a reference luminescent dye.

Corneal IL-8 expression following adenovirus infection is mediated by c-Src activation in human corneal fibroblasts.

Health of tree swallow (*Tachycineta bicolor*) nestlings exposed to chlorinated hydrocarbons in the St Lawrence River basin. Part I. Renal and hepatic vitamin A concentrations.

Zebrafish as a novel experimental model for developmental toxicology.

Metabolism of lipid derived aldehyde, 4-hydroxynonenal in human lens epithelial cells and rat lens.

A cysteine-linkable, short cleavable photoprobe with dual functionality to explore protein-protein interfaces.

Leiomyosarcoma of urinary bladder following cyclophosphamide therapy: report of two cases.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on chorionic gonadotrophin activity in pregnant macaques.

Dioxin risks in perspective: past, present, and future.

Role of reactive oxygen species and antioxidants in plant disease resistance.

Iron toxicity in organotypic cultures of hippocampal slices: role of reactive oxygen species.

Induction of apoptosis in cerebellar granule cells by 2,4-dichlorophenoxyacetic acid.

Effect of 2'-benzoyl-oxycinnamaldehyde on RPE cells in vitro and in an experimental proliferative vitreoretinopathy model.

Iron(III) photo-induced degradation of isoprothuron: correlation between degradation and toxicity.

Broadening our outlook on sources for corneal donation.

Specific up-regulation of GADD153/CHOP in 1-methyl-4-phenyl-pyridinium-treated SH-SY5Y cells.

A major human arsenic metabolite, dimethylarsinic acid, requires reduced glutathione to induce apoptosis.

The ocular surface toxicity of paraquat.

Incidence of CTCL in Vietnam veterans.

Effects of pentachlorophenol and tetrachlorohydroquinone on mitogen-activated protein kinase pathways in Jurkat T cells.

Developmental disorders in embryos of the frog *Xenopus laevis* induced by chloroacetanilide herbicides and their degradation products.

Acrolein-induced cytotoxicity in cultured human bronchial epithelial cells. Modulation by alpha-tocopherol and ascorbic acid.

An analysis of glyphosate data from the California Environmental Protection Agency Pesticide Illness Surveillance Program.

Photochemistry and photoinduced toxicity of acifluorfen, a diphenyl-ether herbicide.

Paraquat- and diquat-induced oxygen radical generation and lipid peroxidation in rat brain microsomes.

Acrolein-induced cell death: a caspase-influenced decision between apoptosis and oncosis/necrosis.

Simultaneous determination of pesticides using a four-band disposable optical capillary immunosensor.

A field study to assess the degradation and transport of diuron and its metabolites in a calcareous soil.

Enantioselective effects of optically active alpha-methylbenzyl-s-triazine on the root growth of rice and *Echinochloa* plants and their herbicidal activity.

Amyloid formation in rat transthyretin: effect of oxidative stress.

The barley MLO modulator of defense and cell death is responsive to biotic and abiotic stress stimuli.

Involvement of chloroplasts in the programmed death of plant cells.

Combined calcium carbimide and ethanol treatment induces high blood acetaldehyde levels, myocardial apoptosis and altered expression of apoptosis-regulating genes in rat.

Transepithelial organic anion transport by shark choroid plexus.

Confocal imaging of organic anion transport in intact rat choroid plexus.

Optical multiple-analyte immunosensor for water pollution control.

The distribution of the anti-HIV drug, 2'3'-dideoxycytidine (ddC), across the blood-brain and blood-cerebrospinal fluid barriers and the influence of organic anion transport inhibitors.

Involvement of the Arabidopsis alpha-DOX1 fatty acid dioxygenase in protection against oxidative stress and cell death.

Role of mitochondria in toxic cell death.

Localization of tumor by chemiluminescence probe during photosensitization action.

Non-genotoxic carcinogens: early effects on gap junctions, cell proliferation and apoptosis in the rat.

[Human neurotoxicity of ethylene-bis-dithiocarbamates (EBDC)].

Mesenchymal nuclear transcription factors in nitrofen-induced hypoplastic lung.

Caspase-3 colorimetric assay.

Activation of mitogen-activated protein kinases during granulocyte apoptosis in patients with severe sepsis.

Cytoskeletal structure of myoblasts with the mitochondrial DNA 3243A-->G mutation and of osteosarcoma cells with respiratory chain deficiency.

Lipid metabolism and neuropsychological follow-up study of workers exposed to 2,3,7,8-tetrachlorodibenzo- p-dioxin.

Differential toxicogenomic responses to 2,3,7,8-tetrachlorodibenzo-p-dioxin in malignant and nonmalignant human airway epithelial cells.

On the role of monoamine oxidase-A for the maintenance of the volitional consumption of ethanol in two different rat models.

Increased arylhydrocarbon receptor expression offers a potential therapeutic target for pancreatic cancer.

Radiosensitization by overexpression of the nonphosphorylation form of I κ B-alpha in human glioma cells.

Beta 1-integrin protects hepatoma cells from chemotherapy induced apoptosis via a mitogen-activated protein kinase dependent pathway.

The role of Akt and RAFK in beta1 integrin mediated survival of precursor B-acute lymphoblastic leukemia cells.

Selective apoptosis of tandemly duplicated FLT3-transformed leukemia cells by Hsp90 inhibitors.

Experimental study on photodynamic diagnosis of cancer mediated by chemiluminescence probe.

The silencing mediator of retinoic acid and thyroid hormone receptors can interact with the aryl hydrocarbon (Ah) receptor but fails to repress Ah receptor-dependent gene expression.

Endocrine dismodulation and cancer.

Effect of arsenic, cadmium and lead on the induction of apoptosis of normal human mononuclear cells.

Role of ATP in the sensitivity to heat and the induction of apoptosis in mammalian cells.

Differential activation of the c-Jun N-terminal kinase pathway in arsenite-induced apoptosis and sensitization of chemically resistant compared to susceptible B-lymphoma cell lines.

Platelet endothelial cell adhesion molecule-1 (PECAM-1/CD31) acts as a regulator of B-cell development, B-cell antigen receptor (BCR)-mediated activation, and autoimmune disease.

Studies on the photostability and phototoxicity of aloe-emodin, emodin and rhein.

Modes of activation of mitogen-activated protein kinases and their roles in cepharanthine-induced apoptosis in human leukemia cells.

Restoration of p53 tumor suppressor pathway in human cervical carcinoma cells by sodium arsenite.

Hsp-90-associated oncoproteins: multiple targets of geldanamycin and its analogs.

2,3,7,8-Tetrachlorodibenzo-p-dioxin treatment induces c-Fos expression in the forebrain of the Long-Evans rat.

Angiotensin protects cortical neurons from hypoxic-induced apoptosis via the angiotensin type 2 receptor.

Early induction of genetic instability and apoptosis by arsenic in cultured Chinese hamster cells.

Skin irritation typing and grading based on laser Doppler perfusion imaging.

NTP Technical Report on the Toxicology and Carcinogenesis Studies of Chloral Hydrate (Cas No. 302-17-0) in B6C3F1 mice (Gavage Studies).

Src tyrosine kinase augments taxotere-induced apoptosis through enhanced expression and phosphorylation of Bcl-2.

Dynamic imaging of endoplasmic reticulum Ca²⁺ concentration in insulin-secreting MIN6 Cells using recombinant targeted cameleons: roles of sarco(endo)plasmic reticulum Ca²⁺-ATPase (SERCA)-2 and ryanodine receptors.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxicity in the zebrafish embryo: altered regional blood flow and impaired lower jaw development.

Mechanism of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced decrease in anti-CD3-activated CD4(+) T cells: the roles of apoptosis, Fas, and TNF.

A dynamic role for the Ah receptor in cell signaling? Insights from a diverse group of Ah receptor interacting proteins.

Differentiation-dependent induction of CYP1A1 in cultured rat small intestinal epithelial cells, colonocytes, and human colon carcinoma cells: basement membrane-mediated apoptosis.

Monoclonal antibodies recognizing epitopes of calretinins: dependence on Ca²⁺-binding status and differences in antigen accessibility in colon cancer cells.

Overexpression of bcl-2 protects hepatoma cell line HCC-9204 from ethanol-induced apoptosis.

The use of quantitative histological and molecular data for risk assessment and biologically based model development.

Model of inhibition of the NPM-ALK kinase activity by herbimycin A.

Expression of the uncoupling protein 1 from the α P2 gene promoter stimulates mitochondrial biogenesis in unilocular adipocytes in vivo.

Oriental effect on the photophysical properties of quaterthiophene-C60 dyads.

The effects of endocrine-disrupting chemicals on thyroid hormone binding to *Xenopus laevis* transthyretin and thyroid hormone receptor.

Induction of heat shock proteins (HSPs) by sodium arsenite in cultured astrocytes and reduction of hydrogen peroxide-induced cell death.

Adenoviral-mediated overexpression of catalase inhibits endothelial cell proliferation.

Developmental changes in inhibitory effects of arsenic and heat shock on growth of pre-implantation bovine embryos.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces Fas-dependent activation-induced cell death in superantigen-primed T cells.

Stereoselective hydroxylation of 4-methyl-2-cyclohexenone in rats: its relevance to R-(+)-pulegone-mediated hepatotoxicity.

Involvement of reactive oxygen species in arsenite-induced downregulation of phospholipid hydroperoxide glutathione peroxidase in human epidermoid carcinoma A431 cells.

Enhanced resistance to salt, cold and wound stresses by overproduction of animal cell death suppressors Bcl-xL and Ced-9 in tobacco cells - their possible contribution through improved function of organelle.

2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity in the zebrafish embryo: local circulation failure in the dorsal midbrain is associated with increased apoptosis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxicity in the zebrafish embryo: local circulation failure in the dorsal midbrain is associated with increased apoptosis.

Origins and consequences of mitochondrial decline in nucleated erythrocytes.

Both tissue inhibitors of metalloproteinases-1 (TIMP-1) and TIMP-2 activate Ras but through different pathways.

Modification of the enantioselectivity of two homologous thermophilic carboxylesterases from *Alicyclobacillus acidocaldarius* and *Archaeoglobus fulgidus* by random mutagenesis and screening.

Isolation and structure determination of six glucocerebrosides from the starfish *Luidia maculata*.

Activation of Wiskott-Aldrich syndrome protein and its association with other proteins by stromal cell-derived factor-1alpha is associated with cell migration in a T-lymphocyte line.

Gene-specific TCDD suppression of RARalpha- and RXR-mediated induction of tissue transglutaminase.

Evidence that GABAergic neurons in the preoptic area of the rat brain are targets of 2,3,7,8-tetrachlorodibenzo-p-dioxin during development.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on preimplantation mouse embryos.

Expression of genes for alcohol and aldehyde metabolizing enzymes in mouse oocytes and preimplantation embryos.

The retinoid signaling system--a target in dioxin toxicity.

Recognition and phagocytosis of apoptotic T cells by resident murine tissue macrophages require multiple signal transduction events.

Effects of protein kinase C on delayed rectifier K⁺ channel regulation by tyrosine kinase in rat retinal pigment epithelial cells.

Merosin-integrin promotion of skeletal myofiber cell survival: Differentiation state-distinct involvement of p60Fyn tyrosine kinase and p38alpha stress-activated MAP kinase.

Soluble fibrinogen modulates neutrophil functionality through the activation of an extracellular signal-regulated kinase-dependent pathway.

Expression and induction of the stress protein alpha-B-crystallin in vascular endothelial cells.

Unique property of some synthetic retinoids: activation of the aryl hydrocarbon receptor pathway.

Changes in fetal brain aromatase activity following in utero 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure in rats.

Arsenic induces oxidative stress and activates stress gene expressions in cultured lung epithelial cells.

Myeloperoxidase-dependent caspase-3 activation and apoptosis in HL-60 cells: protection by the antioxidants ascorbate and (dihydro)lipoic acid.

Preliminary evaluation of the cytotoxic and genotoxic potential of D-003: Mixture of very long chain fatty acids.

Phototransformation of metoxuron [3-(3-chloro-4-methoxyphenyl)-1,1-dimethylurea] in aqueous solution.

Mechanisms of MPP(+) incorporation into cerebellar granule cells.

Toxic effect caused on microflora of soil by pesticide picloram application.

Arsenic induces apoptosis in rat cerebellar neurons via activation of JNK3 and p38 MAP kinases.

Assessment of pentachlorophenol-exposed timber workers using a test-of-poisoning model.

Degradation products of a phenylurea herbicide, diuron: synthesis, ecotoxicity, and biotransformation.

Toxic effects of MPP(+) and MPTP in PC12 cells independent of reactive oxygen species formation.

Oxidative stress and liver toxicity in rats and human hepatoma cell line induced by pentachlorophenol and its major metabolite tetrachlorohydroquinone.

Cleavage of Bax is mediated by caspase-dependent or -independent calpain activation in dopaminergic neuronal cells: protective role of Bcl-2.

Toxic effects of the herbicide 2,4-dichlorophenoxyacetic acid on lymphoid organs of the rat.

Dimethylarsinic acid induces 8-hydroxy-2'-deoxyguanosine formation in the kidney of NCI-Black-Reiter rats.

Selective protection by stably transfected human ALDH3A1 (but not human ALDH1A1) against toxicity of aliphatic aldehydes in V79 cells.

Effect of cigarette smoke extract on neonatal porcine vascular smooth muscle cells.

Induction of apoptosis in human lymphocytes by the herbicide 2,4-dichlorophenoxyacetic acid.

Combined effects of pentachlorophenol and salinity stress on chemiluminescence activity in two species of abalone.

Inhibition of neutrophil apoptosis by acrolein: a mechanism of tobacco-related lung disease?

GAPDH knockdown rescues mesencephalic dopaminergic neurons from MPP+ -induced apoptosis.

Evaluation of acute sensory--motor effects and test sensitivity using termiticide workers exposed to chlorpyrifos.

Atrazine potentiation of arsenic trioxide-induced cytotoxicity and gene expression in human liver carcinoma cells (HepG2).

Differential role of superoxide and glutathione in S-nitrosoglutathione-mediated apoptosis: a rationale for mild forms of familial amyotrophic lateral sclerosis associated with less active Cu,Zn superoxide dismutase mutants.

Increased susceptibility of copper-deficient neuroblastoma cells to oxidative stress-mediated apoptosis.

Ceramide-mediated apoptosis in lung epithelial cells is regulated by glutathione.

Inhibition of apoptosis by pentachlorophenol in v-myc-transfected rat liver epithelial cells: relation to down-regulation of gap junctional intercellular communication.

Caspase-3 activation induced by inhibition of mitochondrial complex I is facilitated by glycogen synthase kinase-3beta and attenuated by lithium.

Auxin herbicides induce H₂O₂ overproduction and tissue damage in cleavers (*Galium aparine* L.).

Synthesis of optically active N-(2-pyridyloxiran-2-ylmethyl) benzenesulfonamide derivatives and their herbicidal activity.

Design of functionalized lipids and evidence for their binding to photosystem II core complex by oxygen evolution measurements, atomic force microscopy, and scanning near-field optical microscopy.

Red blood cells inhibit activation-induced cell death and oxidative stress in human peripheral blood T lymphocytes.

Inhibitory effect of 2'-O-benzoylcinnamaldehyde on vascular endothelial cell proliferation and migration.

Unmasking the progesterone receptor in the preoptic area and hypothalamus of the ewe: no colocalization with gonadotropin-releasing neurons.

Hyperoxia inhibits oxidant-induced apoptosis in lung epithelial cells.

The transcriptional and DNA binding activity of peroxisome proliferator-activated receptor alpha is inhibited by ethanol metabolism. A novel mechanism for the development of ethanol-induced fatty liver.

Differential antioxidant responses to norflurazon-induced oxidative stress in maize.

Acrolein induces activation of the epidermal growth factor receptor of human keratinocytes for cell death.

Reactive oxygen species uncouple external horizontal cells in the carp retina and glutathione couples them again.

Neurotoxicity of MPTP.

Stereospecific antitumor activity of radicicol oxime derivatives.

Enhanced expression of heat shock proteins in activated polymorphonuclear leukocytes in patients with sepsis.

Severity of oxidative stress generates different mechanisms of endothelial cell death.

Reduced expression of neuronal nicotinic acetylcholine receptors during the early stages of damage by oxidative stress in PC12 cells.

Agricultural risk factors for t(14;18) subtypes of non-Hodgkin's lymphoma.

[Epidemiology of soft tissue sarcomas in adults].

Arsenic suppresses necrosis induced by selenite in human leukemia HL-60 cells.

T-cell-based immunity counteracts the potential toxicity of glutamate in the central nervous system.

Complestatin is a noncompetitive peptide antagonist of N-methyl-D-aspartate and alpha-amino-3-hydroxy-5-methyl-4-isoxazolepropionic acid/kainate receptors: secure blockade of ischemic neuronal death.

Inhibition of tyrosine kinase activity induces caspase-dependent apoptosis in anaplastic large cell lymphoma with NPM-ALK (p80) fusion protein.

FLT3 tyrosine kinase as a target molecule for selective antileukemia therapy.

Severe 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) intoxication: clinical and laboratory effects.

Green fluorescent protein (GFP) as a marker of aryl hydrocarbon receptor (AhR) function in developing zebrafish (*Danio rerio*).

Down-regulation of regulatory proteins for differentiation and proliferation in murine fetal hypoplastic lungs: altered mesenchymal-epithelial interactions.

Aromatic hydrocarbon receptor-driven Bax gene expression is required for premature ovarian failure caused by biohazardous environmental chemicals.

Pro-apoptotic interactions between XK469 and the peripheral benzodiazepine receptor.

[A case of chronic methyl bromide intoxication showing symmetrical lesions in the basal ganglia and brain stem on magnetic resonance imaging].

Concomitant supplemental vitamin A enhances the response to weekly supplemental iron and folic acid in anemic teenagers in urban Bangladesh.

Hepatic vitamin a depletion is a sensitive marker of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure in four rodent species.

[The changes of PCBs and PCDFs as well as symptoms in Yusho patients for 30 years].

Fate of PCDF/PCB congeners and change of clinical symptoms in patients with Yusho PCB poisoning for 30 years.

Method for evaluation of immunotoxicity of dioxin compounds using human T-lymphoblastic cell line, L-MAT.

Activated coagulation factor X: a novel mitogenic stimulus for human mesangial cells.

Pesticide-related illness and injuries among banana workers in Costa Rica: a comparison between 1993 and 1996.

Maximal aryl hydrocarbon receptor activity depends on an interaction with the retinoblastoma protein.

Central retinal vein occlusion and nonarteritic ischemic optic neuropathy in 2 patients with mild iron deficiency anemia.

Identification of apoptotic cells by formamide-induced dna denaturation in condensed chromatin.

Differential expression of Hox A5 in human colon cancer cell differentiation: a quantitative study using real-time RT-PCR.

Genetic events associated with arsenic-induced malignant transformation: applications of cDNA microarray technology.

Dopaminergic cell death induced by MPP(+), oxidant and specific neurotoxicants shares the common molecular mechanism.

Dioxin exposure is an environmental risk factor for ischemic heart disease.

Bcl-2 overexpression decreases BCNU sensitivity of a human glioblastoma line through enhancement of catalase activity.

Preconditioning with sodium arsenite inhibits apoptotic cell death in rat kidney with ischemia/reperfusion or cyclosporine-induced injuries. The possible role of heat-shock protein 70 as a mediator of ischemic tolerance.

History of the development of arsenic derivatives in cancer therapy.

Photosensitizing activity of thiocolchicoside: photochemical and in vitro phototoxicity studies.

Cyclophosphamide induces caspase 9-dependent apoptosis in 9L tumor cells.

Cyclic AMP increases the survival of ganglion cells in mixed retinal cell cultures in the absence of exogenous neurotrophic molecules, an effect that involves cholinergic activity.

Mass spectrometric analysis of integral membrane proteins at the subnanomolar level: application to recombinant photopigments.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) inhibition of coronary development is preceded by a decrease in myocyte proliferation and an increase in cardiac apoptosis.

Glial cell-derived neurotrophic factor (GDNF)-induced migration and signal transduction in corneal epithelial cells.

Inhibition of apoptosis in rat hepatocytes treated with 'non-dioxin-like' polychlorinated biphenyls.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on corticotrophin-releasing hormone, arginine vasopressin, and pro-opiomelanocortin mRNA levels in the hypothalamus of the cynomolgus monkey.

Phosphorylation-induced activation of tilapia nonspecific cytotoxic cells by serum cytokines.

Enhanced activation-induced cell death as a mechanism of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced immunotoxicity in peripheral T cells.

The regulation of FasL expression during activation-induced cell death (AICD).

Preconditioning-induced neuroprotection is mediated by reactive oxygen species and activation of the transcription factor nuclear factor-kappaB.

The Change in the Properties of Sodium Dodecyl Sulfate Micelles upon Addition of Isomeric and Unsaturated Short-Chain Alcohols Probed by Photophysical Methods.

Cytotoxic effects of cigarette smoke extract on an alveolar type II cell-derived cell line.

Identification of UV photoproducts and hydrolysis products of butachlor by mass spectrometry.

Comparison of reproductive parameters in male yellow-blotched map turtles (*Graptemys flavimaculata*) from a historically contaminated site and a reference site.

PCBs, TEQs and plasma retinol in grey heron (*Ardea cinerea*) hatchlings from two rookeries in Norway.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces apoptotic cell death and cytochrome P4501A expression in developing *Fundulus heteroclitus* embryos.

Photoaffinity labeling of human IRBP with all-trans-retinoic acid.

Intraocular pressure and vascular effects of sodium azide in bovine perfused eye.

2, 3, 7, 8-tetrachlorodibenzo-p-dioxin induces apoptosis in the dorsal midbrain of zebrafish embryos by activation of arylhydrocarbon receptor.

[Dependence of lipid peroxidation on pigmentation of the porcine iris].

Polychlorinated biphenyls, polychlorinated dibenzo-p-dioxins, and polychlorinated dibenzofurans as endocrine disrupters--what we have learned from Yusho disease.

Hemopoietic cell kinetics after intraperitoneal single injection of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice.

Evaluation of an optical microbiological method for rapidly estimating populations of aerobic bacteria, coliforms, and *Escherichia coli* from ground pork.

The rinosomes of senescing plant tissue bud from the endoplasmic reticulum.

An allyltitanium derived from acrolein 1,2-dicyclohexylethylene acetal and (eta(2)-propene)Ti(O-i-Pr)(2) as a chiral propionaldehyde homoenolate equivalent that reacts with imines with excellent stereoselectivity. An efficient and practical access to optically active gamma-amino carbonyl compounds.

Leaf optical properties in higher plants: linking spectral characteristics to stress and chlorophyll concentration.

Fibroblast growth factor receptor 2 (FGFR2) in brain neurons and retinal pigment epithelial cells act via stimulation of neuroendocrine L-type channels (Ca(v)1.3).

Lipid peroxidation in porcine irises: dependence on pigmentation.

Application of the nitroblue tetrazolium-reduction method for studies on the production of reactive oxygen species in insect haemocytes.

Nitroxide TEMPOL impairs mitochondrial function and induces apoptosis in HL60 cells.

Cepharanthine activates caspases and induces apoptosis in Jurkat and K562 human leukemia cell lines.

Differential effects of protein tyrosine kinase inhibitors on interferon-gamma-induction of major histocompatibility complex class II and intercellular adhesion molecule-1 expression in human corneal epithelial cells.

Effects of tyrosine kinase inhibitors on cell death induced by sodium fluoride and pertussis toxin in the pancreatic beta-cell line, RINm5F.

Effects of subchronic exposure to complex mixtures of dioxin-like and non-dioxin-like polyhalogenated aromatic compounds on thyroid hormone and vitamin A levels in female Sprague-Dawley rats.

Acute and repeated vapor exposure toxicology of 3-(methylthio)propionaldehyde.

Folic acid protects SWV/Fnn embryo fibroblasts against arsenic toxicity.

Cancer mortality in four northern wheat-producing states.

The molecular effects of acrolein.

Chronic toxicity and oncogenicity bioassay in rats with the chloro-s-triazine herbicide cyanazine.

In vitro studies of cellular and molecular developmental toxicity of adjuvants, herbicides, and fungicides commonly used in Red River Valley, Minnesota.

Increased tumor necrosis factor-alpha sensitivity of MCF-7 cells transfected with NAD(P)H:quinone reductase.

Safety evaluation and risk assessment of the herbicide Roundup and its active ingredient, glyphosate, for humans.

Mechanistic aspects of the induction of apoptosis by lauryl gallate in the murine B-cell lymphoma line Wehi 231.

Disrupted mitochondrial electron transport function increases expression of anti-apoptotic bcl-2 and bcl-X(L) proteins in SH-SY5Y neuroblastoma and in Parkinson disease cybrid cells through oxidative stress.

Results of dental amalgam removal and mercury detoxification using DMPS and neural therapy.

Interaction among mitochondria, mitogen-activated protein kinases, and nuclear factor-kappaB in cellular models of Parkinson's disease.

Inhibition of cellular action of thrombin by N3-cyclopropyl-7-[[4-(1-methylethyl)phenyl]methyl]-7H-pyrrolo[3, 2-f]quinazoline-1,3-diamine (SCH 79797), a nonpeptide thrombin receptor antagonist.

Different cell death mechanisms and gene expression in human cells induced by pentachlorophenol and its major metabolite, tetrachlorohydroquinone.

Antiapoptotic and antigenotoxic effects of N-acetylcysteine in human cells of endothelial origin.

Deregulated manganese superoxide dismutase expression and resistance to oxidative injury in p53-deficient cells.

Fiber optic biosensor using *Chlorella vulgaris* for determination of toxic compounds.

DNA damage in arsenite- and cadmium-treated bovine aortic endothelial cells.

A theoretical study on the metabolic requirements resulting from alpha-ketoglutarate-dependent cleavage of phenoxyalkanoates.

2,3,7,8-tetrachlorodibenzo-p-dioxin increases serum and kidney retinoic acid levels and kidney retinol esterification in the rat.

In vivo labeling of mitochondrial complex I (NADH:ubiquinone oxidoreductase) in rat brain using [(3)H]dihydrorotenone.

2,2',4,6,6'-pentachlorobiphenyl induces apoptosis in human monocytic cells.

Syndecan-1-dependent homotypic cell adhesion in HT58 lymphoma cells.

The transcriptional signature of dioxin in human hepatoma HepG2 cells.

Injection of iron compounds followed by induction of the stress response causes tissue injury and apoptosis.

Differential effects of diethylstilbestrol and 2,3,7,8-tetrachlorodibenzo-p-dioxin on thymocyte differentiation, proliferation, and apoptosis in bcl-2 transgenic mouse fetal thymus organ culture.

Novel oxime derivatives of radicicol induce erythroid differentiation associated with preferential G(1) phase accumulation against chronic myelogenous leukemia cells through destabilization of Bcr-Abl with Hsp90 complex.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on initiation and promotion of GST-P-positive foci in rat liver: A quantitative analysis of experimental data using a stochastic model.

TCDD suppression of tissue transglutaminase stimulation by retinoids in malignant human keratinocytes.

Metabolic stress reversibly activates the Drosophila light-sensitive channels TRP and TRPL in vivo.

Inhibition of Hsp90 function by ansamycins causes retinoblastoma gene product-dependent G1 arrest.

A method to study apoptosis in eosinophils by flow cytometry.

Preconditioning-induced neuroprotection is mediated by reactive oxygen species.

Mobilization of vitamin A stores in rats after administration of 2,3, 7,8-tetrachlorodibenzo-p-dioxin: a kinetic analysis.

Annexin I is a stress protein induced by heat, oxidative stress and a sulfhydryl-reactive agent.

Retinal degeneration in licensed pesticide applicators.

Evidence of functional ryanodine receptor involved in apoptosis of prostate cancer (LNCaP) cells.

Herbimycin A in the treatment of experimental proliferative vitreoretinopathy: toxicity and efficacy study.

Studies on the in vitro phototoxicity of the antidiabetes drug glipizide.

Caspase-3 protease activation during the process of genistein-induced apoptosis in TM4 testicular cells.

Photobiological properties of nabumetone (4-[6-methoxy-2-naphthalenyl]-2-butanone), a novel non-steroidal anti-inflammatory and analgesic agent.

Inhibition of UV irradiation-induced oxidative stress and apoptotic biochemical changes in human epidermal carcinoma A431 cells by genistein.

Dual-hit hypothesis explains pulmonary hypoplasia in the nitrofen model of congenital diaphragmatic hernia.

Ah receptor ligands and tumor promotion: survival of neoplastic cells.

Comparison of oxidative stress response parameters in newborn mouse liver versus simian virus 40 (SV40)-transformed hepatocyte cell lines.

In vivo treatment of mutant FLT3-transformed murine leukemia with a tyrosine kinase inhibitor.

Regional differences in hypoxic depolarization and swelling in hippocampal slices.

Selective increase in cellular A beta 42 is related to apoptosis but not necrosis.

Death caused by a letter bomb.

Morphologic, biochemical and molecular mitochondrial changes during reperfusion phase following brief renal ischemia.

Hypothesis: chemical carcinogenesis mediated by a transiently active carcinogen receptor.

Fumigant-related illnesses: Washington State's five-year experience.

Regulation of microglial tyrosine phosphorylation in response to neuronal injury.

Cell proliferation and apoptosis in experimental lung hypoplasia.

Tyrosine kinase inhibitors reduce bcl-2 expression and induce apoptosis in androgen-dependent cells.

Role of the aromatic hydrocarbon receptor and [Ah] gene battery in the oxidative stress response, cell cycle control, and apoptosis.

Air bag injury and the dermatologist.

Two distinct regions of the yeast mitochondrial ADP/ATP carrier are photolabeled by a new ADP analogue: 2-azido-3'-O-naphthoyl-[beta-32P]ADP. Identification of the binding segments by mass spectrometry.

Simultaneous measurement of ERK, p38, and JNK MAP kinase cascades in vascular smooth muscle cells.

Molecular mechanisms of apoptosis induced by cytotoxic chemicals.

Differential susceptibility of retinal ganglion cells to reactive oxygen species.

Arsenite-induced apoptosis in cortical neurons is mediated by c-Jun N-terminal protein kinase 3 and p38 mitogen-activated protein kinase.

Implications of the generation of reactive oxygen species by photoactivated calcein for mitochondrial studies.

Differential effects of 4-chloro-m-cresol and caffeine on skinned fibers from rat fast and slow skeletal muscles.

Dexamethasone enhances ras-reversion gene expression in cultured murine fetal lungs: role in development.

Suppression of carbonic anhydrase III in rat liver by a dioxin-related toxic compound, coplanar polychlorinated biphenyl, 3, 3',4,4',5-pentachlorobiphenyl.

Synergistic activation of NF-kappaB and inducible isoform of nitric oxide synthase induction by interferon-gamma and tumor necrosis factor-alpha in INS-1 cells.

Overexpression of catalase in the mitochondrial or cytosolic compartment increases sensitivity of HepG2 cells to tumor necrosis factor-alpha-induced apoptosis.

Relative potency values derived from hepatic vitamin A reduction in male and female Sprague-Dawley rats following subchronic dietary exposure to individual polychlorinated dibenzo-p-dioxin and dibenzofuran congeners and a mixture thereof.

Thyroidal dysfunction and environmental chemicals--potential impact on brain development.

The inhibition of ERK/MAPK not the activation of JNK/SAPK is primarily required to induce apoptosis in chronic myelogenous leukemic K562 cells.

Chemical changes in the photoreceptor outer segments due to iron induced oxidative stress: analysis by Fourier transform infrared (FT-IR) microspectroscopy.

The involvement of caspases in the CD95(Fas/Apo-1)- but not swelling-induced cellular taurine release from Jurkat T-lymphocytes.

Altered cell cycle control at the G(2)/M phases in aryl hydrocarbon receptor-null embryo fibroblast.

Deficiency of the stress kinase p38alpha results in embryonic lethality: characterization of the kinase dependence of stress responses of enzyme-deficient embryonic stem cells.

Bacterial cell death induced by human pro-apoptotic Bax is blocked by an RNase E mutant that functions in an anti-oxidant pathway.

In-vivo and in-vitro evidence of a carrier-mediated efflux transport system for oestrone-3-sulphate across the blood-cerebrospinal fluid barrier.

Biliary excretion of bile acids and organic anions in zone 1- and zone 3-injured rats.

Elevated perfusion pressure upregulates endothelin-1 and endothelin B receptor expression in the rabbit carotid artery.

Cytochrome c release from mitochondria of early postimplantation murine embryos exposed to 4-hydroperoxycyclophosphamide, heat shock, and staurosporine.

Aromatic hydrocarbon receptor interaction with the retinoblastoma protein potentiates repression of E2F-dependent transcription and cell cycle arrest.

In vitro ocular irritation toxicity study of some pesticides.

UVA-induced oxidative damage in retinal pigment epithelial cells after H2O2 or sparflaxacin exposure.

Regulation of programmed cell death in maize endosperm by abscisic acid.

Carbonic anhydrase activators - part 21. Novel activators of isozymes I, II and IV incorporating carboxamido and ureido histamine moieties.

The aromatic hydrocarbon receptor, transcription, and endocrine aspects of dioxin action.

Signaling regulation for synergistic effects of substance P and insulin-like growth factor-1 or epidermal growth factor on corneal epithelial migration.

Butachlor is cytotoxic and clastogenic and induces apoptosis in mammalian cells.

Toxicity of selected plant volatiles in microbial and mammalian short-term assays.

Human ocular effects from self-reported exposures to Roundup herbicides.

Determination photostability of selected agrochemicals in water and soil.

Degeneration and gliosis in rat retina and central nervous system following 3,3'-iminodipropionitrile exposure.

Zinc protects against oxidative damage in cultured human retinal pigment epithelial cells.

Characterization of maternal influence on teratogenicity: an assessment of developmental toxicity studies for the herbicide cyanazine.

Acute poisoning with a herbicide containing imazapyr (Arsenal): a report of six cases.

The early phase of apoptosis in human neuroblastoma CHP100 cells is characterized by lipoxygenase-dependent ultraweak light emission.

Arsenic trioxide selectively induces acute promyelocytic leukemia cell apoptosis via a hydrogen peroxide-dependent pathway.

Animal cell-death suppressors Bcl-x(L) and Ced-9 inhibit cell death in tobacco plants.

Decreased intracellular superoxide levels activate Sindbis virus-induced apoptosis.

Motor neuron degeneration is attenuated in bax-deficient neurons in vitro.

Mechanism of organic anion transport across the apical membrane of choroid plexus.

The p66shc adaptor protein controls oxidative stress response and life span in mammals.

State transitions, cyclic and linear electron transport and photophosphorylation in *Chlamydomonas reinhardtii*.

Attenuation of endogenous oxidative stress-induced cell death by cytochrome P450 inhibitors in primary cultures of rat hepatocytes.

Effect of pentachlorophenol (PCP) on frog cornea epithelium.

Metabolism of 7-fluoro-6-(3,4,5,6-tetrahydrophthalimido)-4-(2-propynyl)-2H-1,4-benzoxazin-3(4H)-one (S-53482, flumioxazin) in the rat: II. Identification of reduced metabolites.

Evidence for oestrogen receptor alpha-immunoreactivity in gonadotrophin-releasing hormone-expressing neurones.

Integrated optical surface plasmon resonance immunoprobe for simazine detection.

Signals controlling the expression of cytosolic ascorbate peroxidase during pathogen-induced programmed cell death in tobacco.

Effect of Optically Active Ethyl 2-Phthalimidooxypropionate on the Growth of Cress, *Lepidium sativum*.

Melatonin and 5-methoxytryptamine in the bioluminescent dinoflagellate *Gonyaulax polyedra*.

Restoration of the circadian glow peak after suppression of indoleamine biosynthesis or oxidative stress.

Metabolism of 7-fluoro-6-(3,4,5,6-tetrahydrophthalimido)-4-(2-propynyl)-2H-1,4-benzoxazin-3(4H)-one (S-53482) in rat. 1. Identification of a sulfonic acid type conjugate.

Acrolein cytotoxicity and glutathione depletion in n-3 fatty acid sensitive- and resistant human tumor cells.

Study of the photochemical and in vitro phototoxicity of chlortalidone [2-chloro-5-(1-hydroxy-3-oxo-1-isoindolinyl)benzene sulfonamide].

Taurine prevents high-glucose-induced human vascular endothelial cell apoptosis.

Implication of mitochondria-derived reactive oxygen species, cytochrome C and caspase-3 in N-(4-hydroxyphenyl)retinamide-induced apoptosis in cervical carcinoma cells.

Role of Fas-Fas ligand interactions in 2,3,7,8-tetrachlorodibenzo- p-dioxin (TCDD)-induced immunotoxicity: increased resistance of thymocytes from Fas-deficient (*lpr*) and Fas ligand-defective (*gld*) mice to TCDD-induced toxicity.

The significance of excursions above the ADI: duration in relation to pivotal studies.

Cytotoxicity and aromatase (CYP19) activity modulation by organochlorines in human placental JEG-3 and JAR choriocarcinoma cells.

Cytotoxic potential of the phytochemical genistein isoflavone (4',5',7-trihydroxyisoflavone) and certain environmental chemical compounds on testicular cells.

Hypoxia induces renal tubular epithelial cell apoptosis in chronic renal disease.

MHC-I-induced apoptosis in human B-lymphoma cells is dependent on protein tyrosine and serine/threonine kinases.

Secreted form of amyloid precursor protein enhances basal glucose and glutamate transport and protects against oxidative impairment of glucose and glutamate transport in synaptosomes by a cyclic GMP-mediated mechanism.

Altered *bcl-2* family expression during non-genotoxic hepatocarcinogenesis in mice.

A monoclonal antibody reactive with a 40-kDa molecule on fetal thymocytes and tumor cells blocks proliferation and stimulates aggregation and apoptosis.

Attenuation of cortical neuronal apoptosis by gangliosides.

F-actin as a functional target for retro-retinoids: a potential role in anhydroretinol-triggered cell death.

Dietary restriction and 2-deoxyglucose administration improve behavioral outcome and reduce degeneration of dopaminergic neurons in models of Parkinson's disease.

Interactions of nuclear receptor coactivator/corepressor proteins with the aryl hydrocarbon receptor complex.

p27(Kip1) induction and inhibition of proliferation by the intracellular Ah receptor in developing thymus and hepatoma cells.

[Sodium arsenite selectively inducing apoptosis of G2 + M phase NB4 cells].

Biochemistry of hemlock (*Conium maculatum* L.) alkaloids and their acute and chronic toxicity in livestock. A review.

Antiproliferative and apoptosis-inducing effects of an antitumor glycoprotein from *Streptococcus pyogenes*.

Involvement of tyrosine protein kinase in IFN-gamma-induced human endothelial cell apoptosis.

Low levels of p53 are associated with resistance to tetrachlorodibenzo-p-dioxin toxicity in DBA/2 mice.

[Oxidative injury and its defense system in vivo].

Cellular disposition of sulphamethoxazole and its metabolites: implications for hypersensitivity.

Establishment of a double Philadelphia chromosome-positive acute lymphoblastic leukemia-derived cell line, TMD5: effects of cytokines and differentiation inducers on growth of the cells.

Modifications to rat lens major intrinsic protein in selenite-induced cataract.

Decrease in protein tyrosine phosphorylation is associated with F-actin reorganization by retinoic acid in human endometrial adenocarcinoma (RL95-2) cells.

Aryl hydrocarbon receptor regulation of ceramide-induced apoptosis in murine hepatoma 1c1c7 cells. A function independent of aryl hydrocarbon receptor nuclear translocator.

A 63 kDa skeletal muscle protein associated with eye muscle inflammation in Graves' disease is identified as the calcium binding protein calsequestrin.

Dual actions of the metabolic inhibitor, sodium azide on K(ATP) channel currents in the rat CRI-G1 insulinoma cell line.

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters cardiovascular and craniofacial development and function in sac fry of rainbow trout (*Oncorhynchus mykiss*).

Poly(ADP ribose) polymerase cleavage precedes neuronal death in the hippocampus and cerebellum following injury to the developing rat forebrain.

Activity-dependent neurotrophic factor peptide (ADNF9) protects neurons against oxidative stress-induced death.

Bone marrow stromal cell cytochrome P4501B1 is required for pre-B cell apoptosis induced by 7,12-dimethylbenz[a]anthracene.

Herbimycin A and geldanamycin inhibit okadaic acid-induced apoptosis and p38 activation in NRK-52E renal epithelial cells.

The role of polycyclic aromatic hydrocarbon metabolism in dimethylbenz[a]anthracene-induced pre-B lymphocyte apoptosis.

CCD imaging for optical tomography of gel radiation dosimeters.

Myeloperoxidase-catalyzed redox-cycling of phenol promotes lipid peroxidation and thiol oxidation in HL-60 cells.

Effects of environmental estrogens on tumor necrosis factor alpha-mediated apoptosis in MCF-7 cells.

Eosinophil apoptosis is mediated by stimulators of cellular oxidative metabolisms and inhibited by antioxidants: involvement of a thiol-sensitive redox regulation in eosinophil cell death.

Photodynamic properties of meta-tetra(hydroxyphenyl)chlorin in human tumor cells.

Binding of salicylhydroxamic acid and several aromatic donor molecules to *Arthromyces ramosus* peroxidase, investigated by X-ray crystallography, optical difference spectroscopy, NMR relaxation, molecular dynamics, and kinetics.

Induction of negative regulators of haematopoiesis in human bone marrow cells by HLA-DR cross-linking.

Flow cytometric procedure to detect apoptosis of bovine polymorphonuclear leukocytes in blood.

Role of the outward delayed rectifier K⁺ current in ceramide-induced caspase activation and apoptosis in cultured cortical neurons.

Use of transepithelial electrical resistance in the study of pentachlorophenol toxicity.

Transforming growth factor(beta)-mediated corneal myofibroblast differentiation requires actin and fibronectin assembly.

Cortical NADH during pharmacological manipulations of the respiratory chain and spreading depression in vivo.

Characterization of cyclosporin A transport in cultured rabbit corneal epithelial cells: P-glycoprotein transport activity and binding to cyclophilin.

Heat shock protein 27 expression in human proximal tubule cells exposed to lethal and sublethal concentrations of CdCl₂.

A peptide agonist acts by occupation of a monomeric G protein-coupled receptor: dual sites of covalent attachment to domains near TM1 and TM7 of the same molecule make biologically significant domain-swapped dimerization unlikely.

Uptake of vitamin A in macrophages from physiologic transport proteins: role of retinol-binding protein and chylomicron remnants.

Characterization of glycine transport in cultured Müller glial cells from the retina.

Chondrocyte death is linked to development of a mitochondrial membrane permeability transition in the growth plate.

Cytosol-to-lysosome transport of free polymannose-type oligosaccharides. Kinetic and specificity studies using rat liver lysosomes.

Structural analysis of angiotensin IV receptor (AT4) from selected bovine tissues.

Uncouplers of oxidative phosphorylation can enhance a Fas death signal.

Molecular cloning of retinal oxidase/aldehyde oxidase cDNAs from rabbit and mouse livers and functional expression of recombinant mouse retinal oxidase cDNA in *Escherichia coli*.

The w/w+ SMART assay of *Drosophila melanogaster* detects the genotoxic effects of reactive oxygen species inducing compounds.

Four amino acid changes are associated with the *Aldh3a1* locus polymorphism in mice which may be responsible for corneal sensitivity to ultraviolet light.

Potential mechanisms of thyroid disruption in humans: interaction of organochlorine compounds with thyroid receptor, transthyretin, and thyroid-binding globulin.

Yolk PCB and plasma retinol concentrations in shag (*Phalacrocorax aristotelis*) hatchlings.

Proton and electron transfer during the reduction of molecular oxygen by fully reduced cytochrome c oxidase: a flow-flash investigation using optical multichannel detection.

Role of tyrosine phosphorylation of phospholipase C gamma1 in the signaling pathway of HMG-CoA reductase inhibitor-induced cell death of L6 myoblasts.

ECM-stimulated actin bundle formation in embryonic corneal epithelia is tyrosine phosphorylation dependent.

Stimulation of ultraviolet-induced apoptosis of human fibroblast UVR-1 cells by tyrosine kinase inhibitors.

Involvement of tyrosine phosphorylation in HMG-CoA reductase inhibitor-induced cell death in L6 myoblasts.

The human immunodeficiency virus-1 Tat protein increases cell proliferation, alters sensitivity to zinc chelator-induced apoptosis, and changes Sp1 DNA binding in HeLa cells.

Enantioselective Relieving Activity of $\hat{\pm}$ -Methylbenzylphenylureas toward Bensulfuron-methyl Injury to Rice (*Oryza sativa*).

Apoptosis of the intestinal principal cells of *Xenopus* larvae exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Possible involvement of a chloride-bicarbonate exchanger in apoptosis of endothelial cells and cardiomyocytes.

The lack of AHD4 induction by TCDD in corneal cells may involve tissue-specific regulatory proteins.

The lipid peroxidation product 4-hydroxynonenal impairs glutamate and glucose transport and choline acetyltransferase activity in NSC-19 motor neuron cells.

Kinetic constants for the inhibition of camel retinal acetylcholinesterase by the carbamate insecticide lannate.

DNA damaging effects of pesticides measured by the single cell gel electrophoresis assay (comet assay) and the chromosomal aberration test, in CHOK1 cells.

Mice with a homozygous null mutation for the most abundant glutathione peroxidase, Gpx1, show increased susceptibility to the oxidative stress-inducing agents paraquat and hydrogen peroxide.

From toxicological problem to therapeutic use: the discovery of the mode of action of 2-(2-nitro-4-trifluoromethylbenzoyl)-1,3-cyclohexanedione (NTBC), its toxicology and development as a drug.

Clinical experience with pendimethalin (STOMP) poisoning in Taiwan.

Apoptosis in human lung epithelial cells: triggering by paraquat and modulation by antioxidants.

Fluchloralin is cytotoxic and genotoxic and induces apoptosis in mammalian cells.

Thermally oxidized dietary fat and colon carcinogenesis in rodents.

Cytokine-mediated induction of ceramide production is redox-sensitive. Implications to proinflammatory cytokine-mediated apoptosis in demyelinating diseases.

Time-gated autofluorescence microscopy of motile green microalga in an optical trap.

Oxidative stress and hypoxia/reoxygenation trigger CD95 (APO-1/Fas) ligand expression in microglial cells.

Intrahippocampal injection of paraquat produces apoptotic cell death which is prevented by the lazaroïd U74389G, in rats.

Tyrosine kinase inhibitor effects on avian osteoclastic acid transport.

Zoxazolamine-induced paralysis in two rat substrains: differences in hepatic drug metabolism.

Heat shock proteins: protective effect and potential therapeutic use (review).

Isolation of a variant which has reduced Src activity from SH-SY5Y neuroblastoma cells.

Interactive effects of three structurally different polychlorinated biphenyls in a rat liver tumor promotion bioassay.

Epidermal Langerhans cell apoptosis is induced in vivo by nonanoic acid but not by sodium lauryl sulphate.

Nitric oxide inhibits stress-induced endothelial cell apoptosis.

Altered regulation of L-type channels by protein kinase C and protein tyrosine kinases as a pathophysiologic effect in retinal degeneration.

Activation of the Ah receptor by tryptophan and tryptophan metabolites.

Aryl hydrocarbon receptor-mediated antiestrogenicity in MCF-7 cells: modulation of hormone-induced cell cycle enzymes.

The Ah receptor is not involved in 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated apoptosis in human leukemic T cell lines.

Cyclosporin A increases resting mitochondrial membrane potential in SY5Y cells and reverses the depressed mitochondrial membrane potential of Alzheimer's disease cybrids.

Use of model-based compartmental analysis to study effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on vitamin A kinetics in rats.

Overexpression of the anti-apoptotic oncogene, bcl-2, in the thymus does not prevent thymic atrophy induced by estradiol or 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Methyl bromide: 1-year dietary study in dogs.

In utero and lactational exposure of the male rat to 2,3,7,8-tetrachlorodibenzo-p-dioxin impairs prostate development. 2. Effects on growth and cytodifferentiation.

Effects of glucose deprivation, chemical hypoxia, and simulated ischemia on Na⁺ homeostasis in rat spinal cord astrocytes.

Determinant analysis of IgE and IgG4 antibodies and T cells specific for bovine alpha(s)1-casein from the same patients allergic to cow's milk: existence of alpha(s)1-casein-specific B cells and T cells characteristic in cow's-milk allergy.

Thymic alterations induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin are strictly dependent on aryl hydrocarbon receptor activation in hemopoietic cells.

Dual action of CD30 antigen: anti-CD30 antibody induced apoptosis and interleukin-8 secretion in Ki-1 lymphoma cells.

Flow cytometric measurement of mitochondrial mass and function: a novel method for assessing chemoresistance.

Activation of tissue-factor gene expression in breast carcinoma cells by stimulation of the RAF-ERK signaling pathway.

Epidermal growth factor protects neuronal cells in vivo and in vitro against transient forebrain ischemia- and free radical-induced injuries.

Induction of 16 α -/2-hydroxyestrone metabolite ratios in MCF-7 cells by pesticides, carcinogens, and antiestrogens does not predict mammary carcinogens.

Herbimycin A accelerates the induction of apoptosis following etoposide treatment or gamma-irradiation of bcr/abl-positive leukaemia cells.

Cellular stimulation via CD95 involves activation of phospho-inositide-3-kinase.

The 64-kilodalton eye muscle protein is the flavoprotein subunit of mitochondrial succinate dehydrogenase: the corresponding serum antibodies are good markers of an immune-mediated damage to the eye muscle in patients with Graves' hyperthyroidism.

Protein kinase C-dependent tyrosine phosphorylation of p130cas in differentiating neuroblastoma cells.

Role of protein tyrosine phosphorylation in etoposide-induced apoptosis and NF-kappa B activation.

Induction of hydrogen peroxide production and Bax expression by caspase-3(-like) proteases in tyrosine kinase inhibitor-induced apoptosis in human small cell lung carcinoma cells.

Induction of cellular processes containing collagenase and retinoid by integrin-binding to interstitial collagen in hepatic stellate cell culture.

Modulation of ovarian follicle maturation and effects on apoptotic cell death in Holtzman rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in utero and lactationally.

Alternative methods for mechanistic studies in toxicology. Screening of hepatotoxicity of pesticides using freshly isolated and primary cultured hepatocytes and non-liver-derived cells, SIRC cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin suppresses apoptosis and leads to hyperphosphorylation of p53 in rat hepatocytes.

Reactive oxygen species activate focal adhesion kinase, paxillin and p130cas tyrosine phosphorylation in endothelial cells.

Mannitol at clinical concentrations activates multiple signaling pathways and induces apoptosis in endothelial cells.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the lymphatic absorption of a single oral dose of [3H]retinol and on the intestinal retinol esterification in the rat.

Tyrosine kinase inhibitors suppress prostaglandin F₂ α -induced phosphoinositide hydrolysis, Ca²⁺ elevation and contraction in iris sphincter smooth muscle.

Hepatobiliary transport kinetics of HSR-903, a new quinolone antibacterial agent.

Level of HgCl₂-mediated phosphorylation of intracellular proteins determines death of thymic T-lymphocytes with or without DNA fragmentation.

Session 4: Application of Molecular Biology in In Vitro Toxicology.

Type I collagen influence on gene expression in UMR106-06 osteoblast-like cells is inhibited by genistein.

In vitro inhibition of thyroid hormone sulfation by hydroxylated metabolites of halogenated aromatic hydrocarbons.

Regulation of apoptosis in mouse hepatocytes and alteration of apoptosis by nongenotoxic carcinogens.

A direct interaction between the aryl hydrocarbon receptor and retinoblastoma protein. Linking dioxin signaling to the cell cycle.

Interleukin 3 prevents delayed neuronal death in the hippocampal CA1 field.

Apoptosis, reproductive failure, and oxidative stress in Chinese hamster ovary cells with compromised genomic integrity.

Stress-induced fractal rearrangement of the endothelial cell cytoskeleton causes apoptosis.

Pp125FAK is required for stretch dependent morphological response of endothelial cells.

Teratogen-induced cell death in postimplantation mouse embryos: differential tissue sensitivity and hallmarks of apoptosis.

Ultrastructural apoptotic lesions induced in rat thymocytes after borax ingestion.

Tyrosine kinase inhibitors and antioxidants modulate NF-kappaB and NOS-II induction in retinal epithelial cells.

Effect of acute-phase and heat-shock stress on apoptosis in intestinal epithelial cells (Caco-2).

Arachidonic acid metabolism in the marine fish *Stenotomus chrysops* (Scup) and the effects of cytochrome P450 1A inducers.

Injury of stromal fibroblasts induces phosphorylation of focal adhesion proteins.

Buprenorphine hydrochloride induces apoptosis in NG108-15 nerve cells.

Reactive oxygen species (ROS) generated by xanthine oxidase in the corneal epithelium and their potential participation in the damage of the corneal epithelium after prolonged use of contact lenses in rabbits.

Biological characterization of human fibroblast-derived mitogenic factors for human melanocytes.

Differential involvement of tyrosine and serine/threonine kinases in platelet integrin α IIb β 3 exposure.

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters retinoic acid receptor function in human keratinocytes.

Aryl hydrocarbon receptor-associated genes in rat liver: regional coinduction of aldehyde dehydrogenase 3 and glutathione transferase Ya.

Interleukin 1 beta and tumour necrosis factor alpha inhibit acid secretion in cultured rabbit parietal cells by multiple pathways.

Oxygen consumption of the rabbit cornea.

Accumulation of ascorbate by endocrine-regulated and glucose-sensitive transport of dehydroascorbic acid in luteinized rat ovarian cells.

Inhibition of corneal metabolism of deslorelin by EDTA and ZnCl₂.

Comparative toxicology of borates.

Use of c-Src and c-Fos knockout mice for the studies on the role of c-Src kinase signaling in the expression of toxicity of TCDD.

Effect of in vivo administered 2,3,7,8-tetrachlorodibenzo-p-dioxin on DNA-binding activities of nuclear transcription factors in liver of guinea pigs.

Correlation of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced apoptotic cell death in the embryonic vasculature with embryotoxicity.

Single-dose and chronic dietary neurotoxicity screening studies on 2,4-dichlorophenoxyacetic acid in rats.

Acrolein-induced cell death in human alveolar macrophages.

Mitochondria-mediated cell injury. Symposium overview.

Do reactive oxygen species underlie the mechanism of apoptosis in the tadpole tail?

Comparative pharmacokinetics of [14C]metosulam (N-[2,6-dichloro-3-methylphenyl]-5,7-dimethoxy-1,2,4-triazolo[1,5a]-pyrimidine-2-sulfonamide) in rats, mice and dogs.

Influence of dietary selenium on the disposition of arsenate in the female B6C3F1 mouse.

Induction of glutathione depletion, p53 protein accumulation and cellular transformation by tetrachlorohydroquinone, a toxic metabolite of pentachlorophenol.

Superoxide-mediated cytotoxicity in superoxide dismutase-deficient fetal fibroblasts.

A suppressive role of p125FAK protein tyrosine kinase in hydrogen peroxide-induced apoptosis of T98G cells.

Induction and prevention of squamous transformation of bronchial epithelial cells by phenolic compounds.

Evidence that singlet oxygen-induced human T helper cell apoptosis is the basic mechanism of ultraviolet-A radiation phototherapy.

Activation induces apoptosis in Herpesvirus saimiri-transformed T cells independent of CD95 (Fas, APO-1).

Lateral hypothalamic injection of GABA(A) antagonist induces gastric vagus-mediated hypocalcemia in the rat.

Hepatic foci in rats after diethylnitrosamine initiation and 2,3,7,8-tetrachlorodibenzo-p-dioxin promotion: evaluation of a quantitative two-cell model and of CYP 1A1/1A2 as a dosimeter.

The epidemiology of soft tissue sarcoma.

Gallium nitrate optic neuropathy.

Chemopreventive and growth inhibitory effects of selenium.

Induction of apoptosis in megakaryocytic leukemia cell lines by MX2, a morpholino anthracycline.

Orthovanadate induces cell death in rat dentate gyrus primary culture.

Mitochondrial proliferation and paradoxical membrane depolarization during terminal differentiation and apoptosis in a human colon carcinoma cell line.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: effects on development of the male and female reproductive system of the mouse.

Tyrosine phosphorylation in DNA damage and cell death in hypoxic injury to LLC-PK1 cells.

CD40-triggered protein tyrosine phosphorylation on Vav and on phosphatidylinositol 3-kinase correlates with survival of the Ramos-Burkitt lymphoma B cell line.

Induction of human endothelial cell apoptosis requires both heat shock and oxidative stress responses.

Mechanism of inhibition of MDA-MB-468 breast cancer cell growth by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Tyrosine kinase signaling pathways control the expression of retinoic acid receptor-alpha in SK-BR-3 breast cancer cells.

Detection of peroxisome proliferators using a reporter construct derived from the rat acyl-CoA oxidase promoter in the rat liver cell line H-4-II-E.

Influence of maternal stress on the effects of prenatal exposure to methylmercury and arsenic on postnatal development and behavior in mice: a preliminary evaluation.

The clinical pharmacokinetics of levofloxacin.

Acute work-related poisoning by pesticides in The Netherlands; a one year follow-up study.

[Assessment of neurotoxic effects of methyl bromide in exposed workers].

Organochlorine exposure and risk for breast cancer.

Interactions of TCDD with signal transduction and neoplastic development in c-myc transgenic and TGF-alpha transgenic mice.

Low molecular weight proteins secreted by peritoneal macrophages obtained from 2,3,7,8-tetrabromodibenzo-p-dioxin-treated NMRI mice.

Oxidative and chemical stress mimic insulin by selectively inhibiting the expression of phosphoenolpyruvate carboxykinase in hepatoma cells.

Midkine, a retinoic acid-inducible heparin-binding cytokine, is a novel regulator of intracellular calcium in human neutrophils.

Heat shock induces I κ B- α and prevents stress-induced endothelial cell apoptosis.

Differential effect of hydrogen peroxide and superoxide anion on apoptosis and proliferation of vascular smooth muscle cells.

Na⁺-dependent gamma-aminobutyric acid (GABA) transport in the choroid plexus of rabbit.

A new, simple, nonradioactive, nontoxic in vitro assay to monitor corneal endothelial cell viability.

A dose-response analysis of the reproductive effects of a single gestational dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin in male Long Evans Hooded rat offspring.

Extension of long cellular processes of hepatic stellate cells cultured on extracellular type I collagen gel by microtubule assembly: observation utilizing time-lapse video-microscopy.

Endothelial cell apoptosis is accelerated by inorganic iron and heat via an oxygen radical dependent mechanism.

Aryl hydrocarbon receptor knockout mice (AHR^{-/-}) exhibit liver retinoid accumulation and reduced retinoic acid metabolism.

A selective optical chemical sensor for o-nitrophenol based on fluorescence quenching of curcumin.

Apoptotic cell death of erythrocytes in Xenopus larvae exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Functional recovery of retina after sodium iodate injection in mice.

Effect of increasing glucose concentrations and protein phosphorylation on intercellular communication in cultured rat retinal pigment epithelial cells.

Optical observations of comet Hale-Bopp (C/1995 O1) at large heliocentric distances before perihelion.

Murine hepatic p53, RB, and CDK inhibitory protein expression following acute 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure.

Activation of the aryl hydrocarbon receptor/transcription factor and bone marrow stromal cell-dependent preB cell apoptosis.

Energy metabolism during apoptosis. Bcl-2 promotes survival in hematopoietic cells induced to apoptose by growth factor withdrawal by stabilizing a form of metabolic arrest.

Apoptosis induced by glufosinate ammonium in the neuroepithelium of developing mouse embryos in culture.

Topographic localization of calretinin, calbindin, VIP, substance P, CCK and metabotropic glutamate receptor immunoreactive neurons in the supramammillary and related areas of the rat.

Suppressive effect of a chloride bicarbonate exchanger inhibitor on staurosporine-induced apoptosis of endothelial cells.

Cross-reactions in patch testing and photopatch testing with ketoprofen, thiaprophenic acid, and cinnamic aldehyde.

Comparative subchronic studies on 2,4-dichlorophenoxyacetic acid, amine, and ester in rats.

Protoporphyrinogen oxidase: high affinity tetrahydrophthalimide radioligand for the inhibitor/herbicide-binding site in mouse liver mitochondria.

Overexpression of a Rrp1 transgene reduces the somatic mutation and recombination frequency induced by oxidative DNA damage in *Drosophila melanogaster*.

Construction of a physiologically based pharmacokinetic model for 2,4-dichlorophenoxyacetic acid dosimetry in the developing rabbit brain.

Dimethylarsinic acid causes apoptosis in HL-60 cells via interaction with glutathione.

The somatic white-ivory eye spot test does not detect the same spectrum of genotoxic events as the wing somatic mutation and recombination test in *Drosophila melanogaster*.

In vivo and in vitro analysis of *Bordetella pertussis* catalase and Fe-superoxide dismutase mutants.

The w/w+ somatic mutation and recombination test (SMART) of *Drosophila melanogaster* for detecting reactive oxygen species: characterization of 6 strains.

Hydrogen peroxide in relation to proliferation and apoptosis in BHK-21 hamster fibroblasts.

Histochemical study on xanthine oxidase activity in the normal rabbit cornea and lens and after repeated irradiation of the eye with UVB rays.

Role of catalase in retinal antioxidant defence system: its comparative study among rabbits, guinea pigs, and rats.

Enforced expression of Bcl-XS induces differentiation and sensitizes chronic myelogenous leukemia-blast crisis K562 cells to 1-beta-D-arabinofuranosylcytosine-mediated differentiation and apoptosis.

Methyl iodide poisoning: report of two cases.

Retinoic acid affects the expression rate of the differentiation-related genes aryl hydrocarbon receptor, ARNT and keratin 4 in proliferative keratinocytes only.

The beneficial effect of taurine on the prevention of human endothelial cell death.

Monoclonal antibody to single-stranded DNA is a specific and sensitive cellular marker of apoptosis.

Activation of mitogen activated protein kinase in dolichyl phosphate-induced apoptosis in U937 cells.

Implication of tyrosine kinases and protein kinase C in dimethyl sulfoxide-induced apoptosis.

Activation of physiological cell death mechanisms by a necrosis-causing agent.

Target cell-induced apoptosis of interleukin-2-activated human natural killer cells: roles of cell surface molecules and intracellular events.

Intracellular glutathione level modulates the induction of apoptosis by delta 12-prostaglandin J2.

Quantitative analysis of enzyme-altered liver foci in rats initiated with diethylnitrosamine and promoted with 2,3,7,8-tetrachlorodibenzo-p-dioxin or 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin.

The aromatic hydrocarbon receptor modulates the Hepa 1c1c7 cell cycle and differentiated state independently of dioxin.

Target-induced death by apoptosis in human lymphokine-activated natural killer cells.

Incomplete occlusion of central retinal artery in a girl with iron deficiency anemia.

Curcumin induces apoptosis in immortalized NIH 3T3 and malignant cancer cell lines.

Pesticide applicators with mixed pesticide exposure: G-banded analysis and possible relationship to non-Hodgkin's lymphoma.

Morbidity study of extruder personnel with potential exposure to brominated dioxins and furans. II. Results of clinical laboratory studies.

Herbimycin A down-regulates messages of cyclin D1 and c-myc during erythroid differentiation of K562 cells.

The heat-shock response attenuates lipopolysaccharide-mediated apoptosis in cultured sheep pulmonary artery endothelial cells.

Tyrosine kinase inhibitors and cycloheximide inhibit Li⁺ protection of cerebellar granule neurons switched to non-depolarizing medium.

Arsenite induces apoptosis in Chinese hamster ovary cells by generation of reactive oxygen species.

Serum albumin is a specific inhibitor of apoptosis in human endothelial cells.

Hormone induction of ascorbic acid transport in immature granulosa cells.

A renewable-reagent fiber-optic sensor for measurement of high acidities.

Effects of photoreceptor metabolism on interstitial and glial cell pH in bee retina: evidence of a role for NH₄⁺.

Differential regulation of mouse Ah receptor gene expression in cell lines of different tissue origins.

Preventive effect of Ginkgo biloba extract on apoptosis in rat cerebellar neuronal cells induced by hydroxyl radicals.

2,3,7,8-Tetrachlorodibenzo-p-dioxin affects retinol esterification in rat hepatic stellate cells and kidney.

Retro-retinoids in regulated cell growth and death.

Movement of carboxyfluorescein across retinal pigment epithelium-choroid.

Rapid cytotoxicity of human B lymphocytes induced by VH4-34 (VH4.21) gene-encoded monoclonal antibodies.

Developmental toxicity of inorganic arsenic in whole embryo: culture oxidation state, dose, time, and gestational age dependence.

Lyn and Fgr protein-tyrosine kinases prevent apoptosis during retinoic acid-induced granulocytic differentiation of HL-60 cells.

Mechanism of Safening Action of Dymuron and Its Two Monomethyl Analogues against Bensulfuron-methyl Injury to Rice (*Oryza sativa*).

Expression and herbimycin A-sensitive localization of pp125FAK in retinal growth cones.

Saturable transport of valproic acid in rat choroid plexus in vitro.

Cell kinetics of repair after allyl alcohol-induced liver necrosis in mice.

Diallyl disulfide induces apoptosis of human colon tumor cells.

Inhibition of protein tyrosine kinases impairs axon extension in the embryonic optic tract.

Influence of liver tumor promoters on apoptosis in rat hepatocytes induced by 2-acetylaminofluorene, ultraviolet light, or transforming growth factor beta 1.

Osteoclast demise in the rat: physiological versus degenerative cell death.

Triphenyltin acetate toxicity: a biochemical and ultrastructural study on mouse thymocytes.

Regional differences in the distribution of catalase in the epithelium of the ocular lens.

Cell adhesion to substratum and activation of tyrosine kinases are essentially required for G1/S phase transition in BALB/c 3T3 fibroblasts.

Phase Fluorometric Optical Carbon Dioxide Gas Sensor for Fermentation Off-Gas Monitoring.

Induction of apoptosis in NK cells by monocyte-derived reactive oxygen metabolites.

Involvement of wound-associated factors in rat brain astrocyte migratory response to axonal injury: in vitro simulation.

Modulation of chemical-induced lung and liver toxicity by all-trans-retinol in the male Sprague-Dawley rat.

Production of a paraquat-specific murine single chain Fv fragment.

Risk factors for occupational illnesses associated with the use of paraquat (1,1'-dimethyl-4,4'-bipyridylum dichloride) in California.

The role of free radicals in paraquat-induced corneal lesions.

Toxicity of cotoran (fluometuron) in Desert sheep.

Toward less misleading comparisons of uncertain risks: the example of aflatoxin and alar.

Fate and effects of acrolein.

Mutations associated with amyotrophic lateral sclerosis convert superoxide dismutase from an antiapoptotic gene to a proapoptotic gene: studies in yeast and neural cells.

Development of a physiologically based pharmacokinetic model for 2,4-dichlorophenoxyacetic acid dosimetry in discrete areas of the rabbit brain.

Nerve growth factor prevents apoptosis of rat peritoneal mast cells through the trk proto-oncogene receptor.

Fibroblasts isolated after fibrotic lung injury induce apoptosis of alveolar epithelial cells in vitro.

PPAR: a mediator of peroxisome proliferator action.

Ornithine decarboxylase- and ras-induced cell transformations: reversal by protein tyrosine kinase inhibitors and role of pp130CAS.

Induction of heat shock protein 72 prevents neutrophil-mediated human endothelial cell necrosis.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on anti-CD3-induced changes in T-cell subsets and cytokine production.

Photodegradation and in vitro phototoxicity of the antidiabetic drug chlorpropamide.

Role of lipopolysaccharide and tumor necrosis factor-alpha in induction of hepatocyte necrosis.

Molecular mechanism of drug photosensitization. Part 6. Photohaemolysis sensitized by tolmetin.

Health effects related to releases of hazardous substances on the Superfund priority list.

Inhibition of apoptosis during 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated tumour promotion in rat liver.

Subchronic dose-response study of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats.

Apoptosis: the in vivo mechanism which mediates spontaneous AK-5 tumor regression.

Acidification of rabbit corneal endothelium during contact lens wear in vitro.

Synthesis, topoisomerase I inhibitory activity, and in vivo evaluation of 11-azacampthecin analogs.

Variation in the expression and/or phosphorylation of the human low molecular weight stress protein during in vitro cell differentiation.

Inhibition of retinoic-acid-induced gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Hemoglobin-induced lipid peroxidation in the retina: a possible mechanism for macular degeneration.

A morphological study of liver lesions in *Xenopus* larvae exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) with special reference to apoptosis of hepatocytes.

Antioxidant effect of a Ginkgo biloba extract (EGb 761) on the retina.

Genotoxicity of two arsenic compounds in germ cells and somatic cells of *Drosophila melanogaster*.

Receptor-mediated toxicity.

Selective depletion of cyclin-dependent kinases is associated with Fas-mediated apoptosis in human leukemia T-cell lines.

Kinetics of plasma membrane and mitochondrial alterations in cells undergoing apoptosis.

Evaluation of the significance of polyamines and their oxidases in the aetiology of human cervical carcinoma.

Biotransformation of all-trans-retinol and all-trans-retinal to all-trans-retinoic acid in rat conceptual homogenates.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces diverse retinoic acid metabolites in multiple tissues of the Sprague-Dawley rat.

Lymphocyte adhesive interactions with lacrimal gland acinar epithelial cells in primary culture.

Mechanisms of nucleobase transport in rabbit choroid plexus. Evidence for a Na(+)-dependent nucleobase transporter with broad substrate selectivity.

Type II collagen is a major component of bovine retinal microvessel extracellular matrix.

Changes associated with tyrosine phosphorylation during short-term hypoxia in retinal microvascular endothelial cells in vitro.

Dopamine-induced programmed cell death in mouse thymocytes.

Enhanced phosphorylation of nuclear 21-kDa and 34-kDa proteins in hepatoma cell death induced by tumor-necrosis factor-alpha.

Effects of protein tyrosine kinase inhibitors with different modes of action on topoisomerase activity and death of IL-2-dependent CTLL-2 cells.

Dual effect of lipid peroxidation on the membrane order of retinal cells in culture.

Integrin-dependent tyrosine phosphorylation in corneal fibroblasts.

Inhibition of tumor necrosis factor alpha- and ceramide-induced internucleosomal DNA fragmentation by herbimycin A in U937 cells.

Cyclic GMP contact points within the 63-kDa subunit and a 240-kDa associated protein of retinal rod cGMP-activated channels.

Functional role of GABA in cat retina: II. Effects of GABAA antagonists.

The effect of N-ethylmaleimide on the Na(+)-dependent nucleoside transporter (N3) in rabbit choroid plexus.

A novel type of cell death of lymphocytes induced by a monoclonal antibody without participation of complement.

A lifetime-based optical CO₂ gas sensor with blue or red excitation and stokes or anti-stokes detection.

The interactions between retinol and five different hepatotoxicants in the Swiss Webster mouse.

Analysis of interactions between the corneal epithelium and liposomes: qualitative and quantitative fluorescence studies of a corneal epithelial cell line.

Chronic UVB- and all-trans retinoic-acid-induced qualitative and quantitative changes in hairless mouse skin.

The differentiation-related upregulation of aryl hydrocarbon receptor transcript levels is suppressed by retinoic acid.

Identification of essential lysyl and cysteinyl residues, and the amino acid sequence at the substrate-binding site of retinal oxidase.

Transformation by v-erb-B - induction of apoptosis is abrogated in a myeloid cell-line.

Expression of xenobiotic-metabolizing enzymes in cultured rat tracheal epithelial cells.

Hydrogen peroxide induces microvilli on human retinal pigment epithelial cells in culture.

Induction of age pigment accumulation in the brain cells of young male rats through iron-injection into the cerebrospinal fluid.

Atypical apoptotic cell death induced in L929 targets by exposure to tumor necrosis factor.

Receptor-induced death in human natural killer cells: involvement of CD16.

Interactive effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and retinoids on proliferation and differentiation in cultured human keratinocytes: quantification of cross-linked envelope formation.

Statistical variability: what does it mean in risk assessment?

Evaluation of ocular health among alachlor manufacturing workers.

[Allergic diseases caused by pesticides: 3 case reports].

Dose-response assessment of airborne methyl isothiocyanate (MITC) following a metam sodium spill.

Effects of paraquat on survival and total cholinesterase activity in fry of *Cnesterodon decemmaculatus* (Pisces, Poeciliidae).

Assessment of oxidative stress to eye in animal model for cataract.

Pharmacokinetic modeling of 2,4-dichlorophenoxyacetic acid (2,4-D) in rat and in rabbit brain following single dose administration.

Concomitant increases in galectin-1 and its glycoconjugate ligands (carcinoembryonic antigen, lamp-1, and lamp-2) in cultured human colon carcinoma cells by sodium butyrate.

Evidence for involvement of tyrosine phosphorylation in taxol-induced apoptosis in a human ovarian tumor cell line.

Time course of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced thymic atrophy in the Wistar rat.

Detection of apoptosis in leukemic and breast cancer cells with monoclonal antibody to single-stranded DNA.

Partial demasculinization and feminization of sex behavior in male rats by in utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin is not associated with alterations in estrogen receptor binding or volumes of sexually differentiated brain nuclei.

Toxic potency of 3,3',4,4',5-pentachlorobiphenyl relative to and in combination with 2,3,7,8-tetrachlorodibenzo-p-dioxin in a subchronic feeding study in the rat.

Surveillance for emergency events involving hazardous substances--United States, 1990-1992.

Interaction of 2,3,7,8-tetrachlorodibenzo-p-dioxin and retinoic acid in MCF-7 human breast cancer cells.

Chloracne. Some recent issues.

Toxic potency of 2,3,3',4,4',5-hexachlorobiphenyl relative to and in combination with 2,3,7,8-tetrachlorodibenzo-p-dioxin in a subchronic feeding study in the rat.

Apoptosis and chemical carcinogenesis.

Enalapril reduces collagen type IV synthesis and expansion of the interstitium in the obstructed rat kidney.

Dexamethasone, beta-estradiol, and 2,3,7,8-tetrachlorodibenzo-p-dioxin elicit thymic atrophy through different cellular targets.

Radiopacity study of extended-release formulations using digitalized radiography.

Molecular mechanism of drug photosensitization. 5. Photohemolysis sensitized by Suprofen.

Identification of heat shock proteins binding to an immunodominant uveitopathogenic peptide of IRBP.

Inhibition of pro-cholecystokinin (CCK) sulfation by treatment with sodium chlorate alters its processing and decreases cellular content and secretion of CCK 8.

Heat shock glycoprotein GP50: product of the retinoic acid-inducible J6 gene.

Reversal agent inhibition of the multidrug resistance pump in human leukemic lymphoblasts.

Surveillance of hazardous substance releases and related health effects.

The hr locus and the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in newborn mice.

Peri- and postnatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: effects on physiological development, reflexes, locomotor activity and learning behaviour in Wistar rats.

Mechanisms of chemical injury of thyroid gland.

β -carotene and retinoids in eggs of Great Blue Herons (*Ardea herodias*) in relation to St Lawrence River contamination.

Induction in vitro of 72-kD heat shock protein in a continuous culture of rat thyroid cells, FRTL5.

Laboratory results for selected target organs in 138 individuals occupationally exposed to TCDD.

Heat shock-induced cell death in murine microvascular endothelial cells depends on priming with tumor necrosis factor-alpha or interferon-gamma.

T cell receptor-induced Fas ligand expression in cytotoxic T lymphocyte clones is blocked by protein tyrosine kinase inhibitors and cyclosporin A.

Iron-induced fluorescence in the retina: dependence on vitamin A.

The photoproduction of superoxide radicals and the superoxide dismutase activity of Photosystem II. The possible involvement of cytochrome b559.

Effects of retinoic acid on the 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced differentiation of in vitro cultured human keratinocytes.

Thiol reducing agents modulate induced apoptosis in porcine endothelial cells.

Oxidative stress-induced apoptosis prevented by Trolox.

Development of an optical formaldehyde sensor based on the use of immobilized pararosaniline.

Identification of beta-galactosidase activity in purified bovine retinal rod outer segments.

Probing the retinol-binding site of bovine beta-lactoglobulin.

Photolabeling of mitochondrial F1-H+ATPase by 2-azido[3H]ADP and 8-azido[3H]ADP entrapped as fluorometal complexes into the catalytic sites of the enzyme.

Astrocytic glycogenolysis energizes memory processes in neonate chicks.

Simple determination of retinol, alpha-tocopherol and carotenoids (lutein, all-trans-lycopene, alpha- and beta-carotenes) in human plasma by isocratic liquid chromatography.

A simple method for screening assessment of skin and eye irritation.

In vitro and in vivo transport of zidovudine (AZT) across the blood-brain barrier and the effect of transport inhibitors.

Acidification of phagosomes and degradation of rod outer segments in rat retinal pigment epithelium.

Dietary and environmental estrogens and antiestrogens and their possible role in human disease.

Transport of 2,4,5-trichlorophenoxyacetic acid across the blood-cerebrospinal fluid barrier of the rabbit.

Paraquat causes chronic ocular surface toxicity.

Immunohistochemical localization of paraquat in skin and eye of rat.

Production of monoclonal antibodies against diquat and its enzyme-linked immunosorbent assay.

Effects on thyroid hormone metabolism and depletion of lung vitamin A in rats by airborne particulate matter.

Community exposure to a paraquat drift.

Ocular injury caused by Preeglox-L, a herbicide containing paraquat, diquat and surfactants.

Paraquat-induced lung injury: prevention by vasoactive intestinal peptide and related peptide helodermin.

Photobleaching of mono-L-aspartyl chlorin e6 (NPe6): a candidate sensitizer for the photodynamic therapy of tumors.

Ascorbic acid uptake by isolated rat hepatocytes. Stimulatory effect of diquat, a redox cycling compound.

Metabolism of N-[4-chloro-2-fluoro-5-[(1-methyl-2-propynyl)oxy]phenyl]-3,4,5,6-tetrahydrophthalimide (S-23121) in the rat. II. Absorption, disposition, excretion and biotransformation.

Pentachlorophenol (PCP) inhibits ion transport in the isolated toad cornea.

Metabolism of N-[4-chloro-2-fluoro-5-[(1-methyl-2-propynyl)oxy]phenyl]-3,4,5,6-tetrahydrophthalimide (S-23121) in the rat: I. Identification of a new, sulphonic acid type of conjugate.

Nitro blue tetrazolium staining: a morphological demonstration of superoxide in the rat retina.

Lack of stereoselectivity in rat liver peroxisomal enzyme induction by optically active phenoxyacetic acids.

Photolability and photohemolytic studies of fibrates.

In vitro phototoxicity of clofibrate. Photochemical and photohemolytic studies on its metabolite clofibric acid.

Chicken ovalbumin upstream promoter transcription factor (COUP-TF) binds to a peroxisome proliferator-responsive element and antagonizes peroxisome proliferator-mediated signaling.

Phototoxicity of lumidoxycycline.

Gastric vagus mediates immobilization-induced hypocalcemia in rats.

Thyroxine binding in a TTR Met 119 kindred.

Tumors produced in rats with a single dosage of 1,2-dimethylhydrazine.

The role of oxidative metabolism in hexachlorobenzene-induced porphyria and thyroid hormone homeostasis: a comparison with pentachlorobenzene in a 13-week feeding study.

Molecular mechanism of drug photosensitization. 4. Photohemolysis sensitized by carprofen.

Additional endpoints and overview of a mouse skeletal variant assay for detecting exposure to teratogens.

Skin dendritic cell-lymphocyte interactions in autologous system.

Assessment of vitamin A status in pregnant women as reflected by in vitro destruction of vitamin A by hemolysates and urinary ammonium nitrogen to creatinine ratio.

In vivo response of the rat's retinal pigment epithelium to azide at advanced stages of hereditary retinal dystrophy.

Amino acid sequence surrounding the retinal-binding site in retinochrome of the squid, *Todarodes pacificus*.

Luminescence of Ca(2+)-activated photoprotein obelin initiated by NaOCl and MnCl₂.

Iron-induced accumulation of lipofuscin-like fluorescent pigment in the retinal pigment epithelium.

Antigenic determinants of human serum retinol binding protein as probed with monoclonal antibodies.

Apoptosis in splenic B lymphocytes. Regulation by protein kinase C and IL-4.

Ascorbic acid accumulation and transport in human fibroblasts.

Histopathologic approaches to chemical toxicity using primary cultures of dissociated neural cells grown in chamber slides.

Somatic embryogenesis and plant regeneration from callus cultures of chickpea (*Cicer arietinum* L.).

Isolated human and rabbit eye: Models of corneal toxicity.

Gap junctions in ovarian follicles of *Drosophila melanogaster*: inhibition and promotion of dye-coupling between oocyte and follicle cells.

Activation with superantigens induces programmed death in antigen-primed CD4⁺ class II⁺ major histocompatibility complex T lymphocytes via a CD11a/CD18-dependent mechanism.

Characterization of L-thyroxine transport into hepatocytes isolated from juvenile rainbow trout (*Oncorhynchus mykiss*).

Characterization of vitamin A potentiation of carbon tetrachloride-induced liver injury.

Movement of fluorescein and its glucuronide across retinal pigment epithelium-choroid.

Uptake of glycyrrhizin by isolated rat hepatocytes.

A temperature dependent action of fluoride on aqueous outflow facility of the calf eye.

In vivo response of the rat's retinal pigment epithelium to azide: changes induced by light damage.

Electrical responses of the rat's retinal pigment epithelium to azide and thiocyanate.

Effects of various chemical compounds on spontaneous and hydrogen peroxide-induced reversion in strain TA104 of *Salmonella typhimurium*.

Subacute toxicity of paraquat in beagle dogs: clinicopathology and pathologic examinations.

Morphological changes on nerves and histopathological effects on liver and kidney of rats by pentachlorophenol (PCP).

Antioxidant and anticataractogenic effects of topical captopril in diquat-induced cataract in rabbits.

X-ray studies on phospholipid bilayers. XII. Interactions of pentachlorophenol with myelin.

Opposite effects of enantiomers of clofibrilic acid derivative on rat skeletal muscle chloride conductance: antagonism studies and theoretical modeling of two different receptor site interactions.

Effects of eating an uncooked vegetable diet for 1 week.

Alkaline chemical keratitis: eye injury from airbags.

Hematopoietic cytokines inhibit apoptosis induced by transforming growth factor beta 1 and cancer chemotherapy compounds in myeloid leukemic cells.

A Danish kindred with familial amyloid cardiomyopathy revisited: identification of a mutant transthyretin-methionine111 variant in serum from patients and carriers.

[Differentiation therapy of hematologic malignancies: principles, current status and perspectives].

Effects on retinal adhesive force in vivo of metabolically active agents in the subretinal space.

Pesticides and other agricultural risk factors for non-Hodgkin's lymphoma among men in Iowa and Minnesota.

Chemicals trophic for the thymus: risk for immunodeficiency and autoimmunity.

Embryonic palatal responses to teratogens in serum-free organ culture.

Heme oxygenase: expression in human retina and modulation by stress agents in a human retinoblastoma cell model system.

The heat shock response: potential to screen teratogens.

Clinical and cytologic aspects of ocular late-phase reaction in the guinea pig.

Fragmented DNA and apoptotic bodies document the programmed way of cell death in hybridoma cultures.

Secretion of thioredoxin by normal and neoplastic cells through a leaderless secretory pathway.

Effect of inorganic phosphate on hypoxanthine transport in isolated brain microvessels.

Kinetic properties of the bovine corneal aldehyde dehydrogenase (BCP 54).

Ionizing radiation stimulates unidentified tyrosine-specific protein kinases in human B-lymphocyte precursors, triggering apoptosis and clonogenic cell death.

Localization of peroxidase activity in the retina and the retinal pigment epithelium of the Syrian golden hamster (*Mesocricetus auratus*).

Quantitative light microscopic demonstration of increased pallidal and striatal met5-enkephalin-like immunoreactivity in rats following chronic treatment with haloperidol but not with clozapine: implications for the pathogenesis of neuroleptic-induced movement disorders.

Lipid peroxidation in rod outer segments. Role of hydroxyl radical and lipid hydroperoxides.

Sodium-dependent nucleoside transport in choroid plexus from rabbit. Evidence for a single transporter for purine and pyrimidine nucleosides.

Mitochondrial superoxide dismutase in mature and developing human retinal pigment epithelium.

Photodynamic effects of chloroaluminum phthalocyanine tetrasulfonate are mediated by singlet oxygen: in vivo and in vitro studies utilizing hepatic microsomes as a model membrane source.

Purification and localization of brain-type creatine kinase in sodium chloride transporting epithelia of the spiny dogfish, *Squalus acanthias*.

[Comparison of the effectiveness of Milkofix, a preservative preparation, with traditional preservative agents in the determination of somatic cell count in milk samples using a fluoro-optic-electronic method].

Uptake of organic anions by isolated rat hepatocytes. A classification in terms of ATP-dependency.

[The effect of osmotic pressure on oligomycin-sensitive ATPase activity and the liberation of Mg^{2+} from liver mitochondria of rats of various ages].

Synthesis of cell-impermeable Cl-sensitive fluorescent indicators with improved sensitivity and optical properties.

Certain tryptophan photoproducts are inhibitors of cytochrome P450-dependent mutagenicity.

[Production of monoclonal antibody against diquat and its application for forensic medicine].

Desferal-Mn(III) in the therapy of diquat-induced cataract in rabbit.

Acrolein genotoxicity in *Drosophila melanogaster*. I. Somatic and germinal mutagenesis under proficient repair conditions.

Oxy radicals in the eye tissues of rabbits after diquat in vivo.

Free radical enhancer xenobiotic is an inducer of cataract in rabbit.

Catalase activity in cultured human retinal pigment epithelial cells.

Optically detected magnetic resonance study of the interaction of an arsenic(III) derivative of cacodylic acid with EcoRI methyl transferase.

Diamine uptake by rat lung type II cells in vitro.

Hydrogen peroxide effects on ionic and non-ionic permeability of the rabbit corneal endothelium.

Mechanism for enterohepatic injury caused by circulatory disturbance of hepatic vessels in the rat.

Molecular mechanism of drug photosensitization. Part 3. Photohemolysis sensitized by diflunisal.

The issues of transport multiplicity and energetics pertaining to methotrexate efflux in L1210 cells addressed by an analysis of cis and trans effects of inhibitors.

Stimulation by Bt2cAMP of epidermal mucous metaplasia in retinol-pretreated chick embryonic cultured skin, and its inhibition by herbimycin A, an inhibitor for protein-tyrosine kinase.

Mechanisms of cell death.

Tear volume in early and late phases of ocular anaphylaxis in guinea pigs.

Structure-function studies of S-antigen: use of proteases to reveal a dominant uveitogenic site.

Conversion of retinol to retinal by rat liver microsomes.

Characterization of the cellular binding domain and the effects of monoclonal antibodies and thrombin inhibitors on the binding and internalization of the antithrombin-III--thrombin complex by cultured cells.

Involvement of singlet oxygen in chloroaluminum phthalocyanine tetrasulfonate-mediated photoenhancement of lipid peroxidation in rat epidermal microsomes.

Interactions of halogenated industrial chemicals with transthyretin and effects on thyroid hormone levels in vivo.

Effect of arsenicals on biliary excretion of endogenous glutathione and xenobiotics with glutathione-dependent hepatobiliary transport.

Effect of experimental ocular hypertension on macrovacuolation in Schlemm's canal endothelial cells of monkey eyes.

Distribution of chloride ion in intercellular space of retinal pigment epithelium--effects of various agents.

Hexose uptake in primary cultures of bovine brain microvessel endothelial cells. I. Basic characteristics and effects of D-glucose and insulin.

Ultraviolet photoproducts of tryptophan can act as dioxin agonists.

The liver, kidney, and thyroid toxicity of chlorinated benzenes.

Active transport of ascorbic acid across the retinal pigment epithelium of the bullfrog.

Potassium-evoked responses from the retinal pigment epithelium of the toad *Bufo marinus*.

Effect of hepatotoxic chemicals and hypoxia on hepatic nonparenchymal cells: impairment of phagocytosis by Kupffer cells and disruption of the endothelium in rat livers perfused with colloidal carbon.

Effects of hydrogen peroxide-induced oxidative damage on outflow facility and washout in pig eyes.

Inhibitory effects of substance P and carbachol on the saturable sodium-dependent uptake process of myo-inositol in rat parotid gland.

Retinoic acid receptor belongs to a subclass of nuclear receptors that do not form "docking" complexes with hsp90.

[Analysis of transport of fluorescein across the isolated retinal pigment epithelium-choroid using an ussing type chamber].

Sublethal and acute toxicity of the ethylene glycol butyl ether ester formulation of triclopyr to juvenile coho salmon (*Oncorhynchus kisutch*).

Summary of safety evaluation toxicity studies of glufosinate ammonium.

Glutathione disulfide as index of oxidant stress in rat liver during hypoxia.

Hypergastrinemia is associated with decreased gastric acid secretion in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

TCDD-induced altered expression of growth factors may have a role in producing cleft palate and enhancing the incidence of clefts after coadministration of retinoic acid and TCDD.

The effect of TCDD on acyl CoA:retinol acyltransferase activity and vitamin A accumulation in the kidney of male Sprague-Dawley rats.

Confirmation by peptide sequence and co-expression on various cell types of the identity of CD44 and P85 glycoprotein.

Fibril in senile systemic amyloidosis is derived from normal transthyretin.

Risk factors for squamous cell carcinoma of the skin in Saskatchewan, Canada.

Cytosolic-nuclear tumor promoter-specific binding protein (CN-TPBP) in human promyelocytic leukemia cells HL-60.

Studies on specific serological antigens in metacercariae and juveniles of *Paragonimus westermani* and its monoclonal antibodies.

Ibuprofen, a putative anti-cataract drug, protects the lens against cyanate and galactose.

Urinary levels of proteins and metabolites in workers exposed to toluene. A cross-sectional study.

Cytotoxicity of lymphokine-activated killer cells against human neuroblastoma cells: modulation by neuroblast differentiation.

A new perspective of S-antigen from immunochemical analysis.

Optical emission spectrometry and laser-induced fluorescence of laser produced sample plumes.

[On the standardization of new chemical risk evaluation with eye irritation test].

Protein kinase A phosphorylates retinal phosducin on serine 73 in situ.

Contact site between inner and outer mitochondrial membrane: a dynamic microcompartment for creatine kinase activity.

Monoclonal antibody studies of the antigenic determinants of human plasma retinol-binding protein.

Physiologic neutralization mechanisms and the response of the corneal endothelium to hydrogen peroxide.

Interaction of chlorinated phenols with thyroxine binding sites of human transthyretin, albumin and thyroid binding globulin.

A comparative investigation of the metabolism of methyl bromide and methyl iodide in human erythrocytes.

Metabolic inhibitors reversibly alter the basal membrane potential of the gecko retinal pigment epithelium.

Characteristics of apical Cl-HCO₃ exchanger of bicarbonate-secreting cells in turtle bladder.

Effect of PO₂ and metabolic inhibitors on ionic fluxes across the isolated rabbit corneal endothelium.

Multiple, spatially distinct T cell epitopes within a pathogenic 123 residue cyanogen bromide peptide of bovine retinal s-antigen.

Acute health effects of community exposure to cotton defoliant.

[Photoallergic dermatitis caused by the herbicide phenmedipham].

Acute vapour inhalation toxicity of acrolein and its influence as a trace contaminant in 2-methoxy-3,4-dihydro-2H-pyran.

[Characteristics of the development of cataract models against a background of poisoning].

Effects of three pesticides on MSX-induced ammonia photoproduction by the cyanobacterium *Nostoc linckia*.

Characterization of four herbicide-resistant mutants of *Rhodospirillum rubrum* by genetic analysis, electron paramagnetic resonance, and optical spectroscopy.

Chromatographic approaches to the quality control of chiral propionate anti-inflammatory drugs and herbicides.

Influence of hydrogen peroxide on adenine uptake by iris, ciliary epithelium and corneal endothelium.

A highly potent antiangiogenic activity of retinoids.

Identification of T cell recognition sites in S-antigen: dissociation of proliferative and pathogenic sites.

Effect of tetrachlorodibenzo-p-dioxin (TCDD) on the glucuronidation of retinoic acid in the rat.

Molecular mechanism of drug photosensitization--II. Photohemolysis sensitized by ketoprofen.

Hexose transport in human myoblasts.

Type II collagen defects in the chondrodysplasias. I. Spondyloepiphyseal dysplasias.

Retinoid receptor antisense DNAs inhibit alkaline phosphatase induction and clonogenicity in malignant keratinocytes.

Cellular alterations and enhanced induction of cleft palate after coadministration of retinoic acid and TCDD.

Simplified method for screening populations at risk for transthyretin Met30-associated familial amyloidotic polyneuropathy.

Retinoic acid and 2,3,7,8-tetrachlorodibenzo-p-dioxin selectively enhance teratogenesis in C57BL/6N mice.

Molecular mechanism of naproxen photosensitization in red blood cells.

Modulation of 3-methylcholanthrene toxicity in cultured neoplastic keratinocytes by glucocorticoids and retinoids is not accounted for by macromolecular adduct formation.

Separation methods for the study of collagen and treatment of collagen disorders.

Cyanide and arsenic poisoning by intravenous injection.

Serum-free culture of insulin-secreting clonal cells from a hamster insulinoma.

Oxygen free radicals and corneal endothelium.

The effect of oxidants on biomembranes and cellular metabolism.

Gas chromatography-based method for assigning the configurations of allylic and benzylic alcohols and for determining their optical purities.

Modification of leucine transport across bovine pigment epithelium by metabolic stress.

Marked alterations in retinoid homeostasis of Sprague-Dawley rats induced by a single i.p. dose of 10 micrograms/kg of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Micro-scission of YAC tumor cells during antibody-dependent cellular cytotoxicity mediated by human neutrophils.

Selection of antibody epitopes in an immunopathogenic neural autoantigen.

Analysis of vertebrate eye movements following intravitreal drug injections. III. Spontaneous nystagmus is modulated by the GABA_A receptor.

Pinpointing the sites of hydroxylysine glycosides in peptide alpha 1-CB7 of bovine corneal collagen, and their possible role in determining fibril diameter and thus transparency.

Transport of cefodizime, a novel third generation cephalosporin antibiotic, in isolated rat choroid plexus.

Effects of 2,4-dinitrophenol and anoxia on the inorganic-pyrophosphate content of the spadix of *Arum maculatum* and the root apices of *Pisum sativum*.

Effects of DIDS on the chick retinal pigment epithelium. II. Mechanism of the light peak and other responses originating at the basal membrane.

Interactions of rutaecarpine alkaloids with specific binding sites for 2,3,7,8-tetrachlorodibenzo-p-dioxin in rat liver.

The isolation, characterization, and lipid-aggregating properties of a citrulline containing myelin basic protein.

Interaction of aromatic donor molecules with lactoperoxidase probed by optical difference spectra.

Effects of vitamin A and its analogs on nonenzymatic lipid peroxidation in rat brain mitochondria.

Interphotoreceptor retinoid-binding protein. Gene characterization, protein repeat structure, and its evolution.

[The microsurgical treatment of penetrating wounds of the cornea with the use of collagenous materials].

Spectroscopic studies of cutaneous photosensitizing agents--XIII. pH dependence of the photochemistry of photoallergens bithionol and fentichlor: an electron spin resonance study of the free radical photoproducts.

Identification of the main immunogenic region of retinal S-antigen: subordinate influence of MHC, IGH, species or strain differences on the specificity of the antibody response.

2,4-Dichlorophenoxyacetic acid intoxication increases its accumulation within the brain.

Genotoxicity of a variety of hydrazine derivatives in the hepatocyte primary culture/DNA repair test using rat and mouse hepatocytes.

pH homeostasis in promyelocytic leukemic HL60 cells.

Residue level determination of the aquatic herbicide fluridone and a potential photoproduct (N-methylformamide) in water.

Familial amyloidotic polyneuropathy: transthyretin (prealbumin) variants in kindreds of Italian origin.

Neuronal cell differentiation of human neuroblastoma cells by retinoic acid plus herbimycin A.

[Acute reversible cataract due to nitrocompounds in Japanese quail (*Coturnix coturnix japonica*)].

Synthetic peptides derived from IRBP induce EAU and EAP in Lewis rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin and polycyclic aromatic hydrocarbons suppress retinoid-induced tissue transglutaminase in SCC-4 cultured human squamous carcinoma cells.

Cyanogen bromide fragments of bovine interphotoreceptor retinoid-binding protein induce experimental autoimmune uveoretinitis in Lewis rats.

Photoaffinity analogues of methotrexate as folate antagonist binding probes.

Partial amino acid sequence analysis and variable subgroup determination (VH and VL) of a monoclonal rheumatoid factor derived from a rheumatoid arthritis patient.

Uptake of technetium 99m hepatobiliary imaging agents by cultured rat hepatocytes.

Epitope mapping of bovine retinal S-antigen with monoclonal antibodies.

Local interactions favor the native 8-residue disulfide loop in the oxidation of a fragment corresponding to the sequence Ser-50-Met-79 derived from bovine pancreatic ribonuclease A.

Mapping of the nucleotide-binding sites in the ADP/ATP carrier of beef heart mitochondria by photolabeling with 2-azido[alpha-32P]adenosine diphosphate.

Immunological characterization of thioltransferase from pig liver.

Photophysiology and phytochrome content of long-hypocotyl mutant and wild-type cucumber seedlings.

Initial observations of rabbit retinal pigment epithelium-choroid-sclera preparations.

Transport of digoxin into brain microvessels and choroid plexuses isolated from guinea pig.

Effects of flavonoids on nonenzymatic lipid peroxidation: structure-activity relationship.

Preparation of overlapping peptides of bovine retinal S-antigen and their localization by immunoblotting with peptide-specific antibodies.

Assignment of several epitopes to cyanogen bromide peptides of bovine retinal S-antigen by immunoblotting with peptide-specific antibodies.

Effect of glutamate on extracellular potassium activity in isolated retina of cyprinid fish.

Microfilament modification by dihydrocytochalasin B causes retinoic acid-modulated chondrocytes to reexpress the differentiated collagen phenotype without a change in shape.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes an increase in protein kinases associated with epidermal growth factor receptor in the hepatic plasma membrane.

Glutamate-induced K⁺ flux in the photoreceptor layer of isolated retina of cyprinid fish: possible consequences for second-order neurones.

Analysis of antigenic determinants of retinal S-antigen with monoclonal antibodies.

Effects of 2,4,5-trichlorophenoxyacetic acid and quinolinic acid on 5-hydroxy-3-indoleacetic acid transport by the rabbit choroid plexus: pharmacology and electron microscopic cytochemistry.

Dose-mortality responses of crawfish and mosquitoes to selected pesticides.

Lung fibrosis induced by diquat after intratracheal administration.

3-amino-triazole effects on the eye of young and adult rabbits in the presence and absence of hydrogen peroxide.

Thyrotropin-releasing hormone (TRH): immunohistochemical distribution in tadpole and frog brain.

Irritation and sensitization potential of pesticides.

Photoaffinity analogues of methotrexate as folate antagonist binding probes. 1. Photoaffinity labeling of murine L1210 dihydrofolate reductase and amino acid sequence of the binding region.

Increased thromboplastic potential in diabetes: a multifactorial phenomenon.

Colony size, cell density and nature of the tumor promoter are critical variables in expression of a transformed phenotype (focus formation) in co-cultures of UV-TDTx and C3H10T1/2 cells.

Antigenicity and uveitogenicity of partially purified peptides of a retinal autoantigen, S-antigen.

Fengabine, a novel antidepressant GABAergic agent. I. Activity in models for antidepressant drugs and psychopharmacological profile.

Identification of a uveitogenic cyanogen bromide peptide of bovine retinal S-antigen and preparation of a uveitogenic, peptide-specific T cell line.

Evaluation of a program to overcome vitamin A and iron deficiencies in areas of poverty in Minas Gerais, Brazil.

Phototoxic potential of afloqualone, a quinazolinone derivative, as determined by photosensitized inactivation of bacteriophage.

Mapping of nucleotide-depleted mitochondrial F1-ATPase with 2-azido-[alpha-32P]adenosine diphosphate. Evidence for two nucleotide binding sites in the beta subunit.

Neural mechanisms mediating the hyperthermia elicited by prostaglandin E2 injected into the preoptic-anterior hypothalamus.

The Mr 24,000 phosphoprotein from developing bone is the NH2-terminal propeptide of the alpha 1 chain of type I collagen.

Primary and secondary structure of bovine retinal S antigen (48-kDa protein).

[Emotional behavior disorders in rats during the formation of a generator of pathologically enhanced excitation in the basomedial nuclei of the amygdaloid complex].

Purification and characterization of rabbit ocular mucin.

Transport of benzylpenicillin by the rat choroid plexus in vitro.

Optical detection of triplet-state magnetic resonance studies on individual tryptophan residues of serum albumin: correlation between phosphorescence and zero-field splittings.

The purification and characterization of glutathione S-transferase from the hepatopancreas of the blue crab, *Callinectes sapidus*.

Regulation by cell metabolism and adenine nucleotides of a K channel in insulin-secreting B cells (RIN m5F).

Heat Shock May Relieve a Posttranscriptional Block on β Crystallin Synthesis in Cultures of Chick Embryo Neuroretinal Cells: (neural retina/transdifferentiation/posttranscriptional control/ β crystallin/heat shock).

Ultrastructure of the choroid plexus epithelium of pigeons treated with drugs: I. Effect of Thyradin, 2,4-dinitrophenol, and cycloheximide.

Regulation of amino acid influx and efflux at the basolateral plasma membrane of the salivary gland epithelium: effects of parasympathetic nerve stimulation.

Ca-stimulated Mg dependent ATPase activity in a plasma membrane enriched fraction of bovine corneal epithelium.

Mechanisms of azide induced increases in the c-wave and standing potential of the intact cat eye.

Synthesis of the trypsin fragment 10-25/75-88 of mouse nerve growth factor. I. The protected tetradecapeptide 75-88.

The supply of metabolic substrate from glia to photoreceptors in the retina of the honeybee drone.

Dome formation in cell cultures of chick embryo retinal pigment epithelium and effects of ouabain and 2,4-dinitrophenol thereon.

Na⁺-linked active transport of ascorbate into cultured bovine retinal pigment epithelial cells: heterologous inhibition by glucose.

Physiological, anatomic and behavioural changes in the respiratory system of *Salmo gairdneri* Rich. On acute and chronic exposure to chlorothalonil.

The complete amino acid sequence of human serum retinol-binding protein.

Chloracne from pentachlorophenol-preserved wood.

Acrolein and embryogenesis: an experimental study.

Kinetics of sulfation in the rat in vivo and in the perfused rat liver.

Combined light and electron microscope immunocytochemical localization of scattered peptidergic neurons in the central nervous system.

S-antigen: identification of the MAbA9-C6 monoclonal antibody binding site and the uveitopathogenic sites.

Lipid peroxidative potency of photosensitized thiazide diuretics.

Neurobehavioral evaluation of soil and structural fumigators using methyl bromide and sulfuryl fluoride.

Characterization of a transthyretin (prealbumin) variant associated with familial amyloidotic polyneuropathy type II (Indiana/Swiss).

The effects of nonadecafluoro-n-decanoic acid on serum retinol and hepatic retinyl palmitate hydrolase activity in male Sprague-Dawley rats.

Calmodulin antagonists inhibit dihydropyridine calcium channel activator (BAY-K-8644) induced cGMP synthesis in pituitary tumor cells.

S-antigen-specific rat T cell lines recognize peptide fragments of S-antigen and mediate experimental autoimmune uveoretinitis and pinealitis.

[Methyl bromide poisoning].

Syntheses and effects of [Glu34]-thymopoietin II fragment 32-45 and its analogs on the impaired T-cell transformation in a patient with common variable immunodeficiency.

Suppression of B cell differentiation by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The effects of dim cyclic light on pigment epithelial function in the albino rat.

Synergistic neurotoxicity of carbon tetrachloride/carbon disulfide (80/20 fumigants) and other pesticides in grain storage workers.

Transport of cimetidine by the rat choroid plexus in vitro.

Kinetics of ascorbate transport by cultured retinal capillary pericytes. Inhibition by glucose.

Semisynthesis of the native sequence of horse heart cytochrome c-(66-104)-nonatriacontapeptide.

Characterization of immunologically active cyanogen bromide peptide fragments of bovine and human retinal S-antigen.

Contraluminal transport of small aliphatic carboxylates in the proximal tubule of the rat kidney in situ.

Ascorbate transport in cultured cat retinal pigment epithelial cells.

Binding of a metabolite of 3,4,3',4'-tetrachlorobiphenyl to transthyretin reduces serum vitamin A transport by inhibiting the formation of the protein complex carrying both retinol and thyroxin.

A critical examination of assumptions used in risk assessments of dioxin contaminated soil.

Transglutaminase modification of rhodopsin in retinal rod outer segment disk membranes.

Cyclic GMP phosphodiesterase from cattle retina. Amino acid sequence of the gamma-subunit and nucleotide sequence of the corresponding cDNA.

Teratogenicity of bifenoxy and nitrofen in rodents.

Facilitated glucose transport across the retinal pigment epithelium of the bullfrog (*Rana catesbeiana*).

Coordinate regulation of type IX and type II collagen synthesis during growth of chick chondrocytes in retinoic acid or 5-bromo-2'-deoxyuridine.

Hepatocellular uptake of oleate is energy dependent, sodium linked, and inhibited by an antibody to a hepatocyte plasma membrane fatty acid binding protein.

Isolation and characterization of type VIII collagen synthesized by cultured rabbit corneal endothelial cells. A conventional structure replaces the interrupted-helix model.

Type VI collagen is a major component of the human cornea.

The complete amino acid sequence of the cellular retinoic acid-binding protein from bovine retina.

Uncoupling effects of 2,4-dinitrophenol on electron transfer reactions and cell bioenergetics in rat brain in situ.

Homology and diversity between intermediate filament proteins of neuronal and nonneuronal origin in goldfish optic nerve.

Enzyme release from the perfused rat heart. The functions of the cytoskeleton under cell-pathological conditions.

Effect of antioxidants on mutagenesis induced by DMBA in human cells.

Congenital glaucoma and retinal dysplasia.

A critical review of the literature on acrolein toxicity.

Physicochemical and immunological studies of the renatured alpha 1(II) chains and isolated cyanogen bromide peptides of type II collagen.

Gastric damage from ingested acid in children.

Mutagenic effects of some water-soluble metal compounds in a somatic eye-color test system in *Drosophila melanogaster*.

Methyl bromide optic atrophy.

Identification of carriers of a variant plasma prealbumin (transthyretin) associated with familial amyloidotic polyneuropathy type I.

Inhibition of mitochondrial aldehyde dehydrogenase and acetaldehyde oxidation by the glutathione-depleting agents diethylmaleate and phorone.

Amino acid sequence of the calcium-dependent photoprotein aequorin.

Effect of hematoporphyrin derivative on rabbit corneal endothelial cell function and ultrastructure.

Transport of 2-deoxy-D-glucose by dissociated brain cells.

Photopic c-wave in the chicken ERG: sensitivity to sodium azide, epinephrine, sodium iodate, barbiturates, and other general anesthetics.

Central thyrotropin-releasing hormone elicits systemic hypoglycemia in mice.

Analysis of the binding of a hemopoietic growth factor, P-cell-stimulating factor, to a cell surface receptor using quantitative absorption of bioactivity.

Uptake of glucose analogues into cultured cerebral microvessel endothelium.

Screening for eye irritancy using cultured HeLa cells.

The amino-acid sequence of beta-lactoglobulin II from horse colostrum (*Equus caballus*, Perissodactyla): beta-lactoglobulins are retinol-binding proteins.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the uptake, distribution and excretion of a single oral dose of [¹¹C, ¹²C]-retinyl acetate and on the vitamin A status in the rat.

The primary structure of rat liver cellular retinol-binding protein.

The primary structure of bovine cellular retinoic acid-binding protein.

Type I collagen synthesis by corneal endothelial cells modulated by polymorphonuclear leukocytes.

Characterization of hog thyroid peroxidase.

Stress Protein and Crystallin Synthesis During Heat Shock and Transdifferentiation of Embryonic Chick Neural Retina Cells: (chicken/retina/transdifferentiation/heat shock).

[Secretin and pancreatic secretion in iron absorption].

Pharmacological study on the effects of some ocular hypotensive drugs on aqueous humor formation in the arterially perfused enucleated rabbit eye.

The carbohydrate of bovine interstitial retinol-binding protein.

Complete amino acid sequence of gamma-subunit of the GTP-binding protein from cattle retina.

Acute and environmental toxicity studies with hexazinone.

Acute diquat intoxication. Interest of its repeated determination in urine and the evaluation of renal proximal tubule integrity.

The effect of quenching agents on contact urticaria caused by cinnamic aldehyde.

Organ and cellular distribution of inhaled metallic mercury in the rat and Marmoset monkey (*Callithrix jacchus*): influence of ethyl alcohol pretreatment.

Biliary excretion of glutathione and glutathione disulfide in the rat. Regulation and response to oxidative stress.

Effects of a herbicide on the peroxide metabolism enzymes and lipid peroxidation in carp fish (*Hypophthalmichthys molitrix*).

Induction of ornithine decarboxylase and augmentation of tyrosine aminotransferase activity by N-hydroxy-2-acetylaminofluorene and 2-acetylaminofluorene in rat liver. Influence of sex, retinylacetate, indomethacin, and pentachlorophenol.

Central versus peripheral sites of antipyretic action of a non-steroidal anti-inflammatory agent, AD-1590, in rabbits.

Synergistic effects of antigen and soluble T-cell factors in B-lymphocyte activation.

Amyloid fibril protein in familial amyloidotic polyneuropathy, Portuguese type. Definition of molecular abnormality in transthyretin (prealbumin).

Benoxaprofen photosensitization of cell membrane disruption.

Comparison between the effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and six other compounds on the vitamin A storage, the UDP-glucuronosyltransferase and the aryl hydrocarbon hydroxylase activity in the rat liver.

Improved optical detection of colony enlargement and drug cytotoxicity in primary soft agar cultures of human solid tumour cells.

Lipid peroxidation and retinal degeneration.

Molecular mechanism of cataractogenesis: III. Toxic metabolites of oxygen as initiators of lipid peroxidation and cataract.

Family studies of the genetic abnormality in transthyretin (prealbumin) in Portuguese patients with familial amyloidotic polyneuropathy.

Effects of in vivo-administered 2,3,7,8-tetrachlorodibenzo-p-dioxin on receptor binding of epidermal growth factor in the hepatic plasma membrane of rat, guinea pig, mouse, and hamster.

Replacing the Mixed Function Oxidase N-Demethylation by Hydrogen Peroxide and either Hemoglobin or Ferrous Sulfate.

Preparation, isolation, and immunochemical studies of the cyanogen bromide peptides from a retinal photoreceptor cell autoantigen, S-antigen.

Sustained Photoproduction of Ammonia from Dinitrogen and Water by the Nitrogen-Fixing Cyanobacterium *Anabaena* sp. Strain ATCC 33047.

Effects of BHA, d-alpha-tocopherol and retinol acetate on TCDD-mediated changes in lipid peroxidation, glutathione peroxidase activity and survival.

Overproduction of a gastrointestinal hormone, secretin, in *Escherichia coli* cells and its chemical characterization.

Effects of cyclic AMP on fluid absorption and ion transport across frog retinal pigment epithelium. Measurements in the open-circuit state.

Retinal migration during dark reduction of bacteriorhodopsin.

Optical activity and conformation of beta-bungarotoxin in solution.

[Effect of sodium cyanide and 2,4-dinitrophenol on the electroretinogram of the isolated frog retina].

Sequence variability in the retinal-attachment domain of mammalian rhodopsins.

A goniometrical study of mitochondrial cristae in rat heart muscle and ependyma of the choroid plexus after application 2,4-DNP in vivo.

Effects of lipid peroxidation on the isolated rat retina.

[Pharmacological sensitivity of the photopic c-wave in the electroretinogram of the chicken. I. Effects of sodium azide, adrenaline, and a barbiturate].

Uptake and release of [3H]-serotonin in photophores of the midshipman fish, *Porichthys notatus*.

Nitrofen: a review and perspective.

The effects on rat pups when nitrofen (4-(2,4-dichlorophenoxy)nitrobenzene) was applied dermally to the dam during organogenesis.

Positive correlation between superoxide dismutase and resistance to paraquat toxicity in the green alga *Chlorella sorokiniana*.

[A case of retinal degeneration in a man exposed to organophosphorus pesticides].

[Prognostic factors in acute paraquat poisoning. A retrospective study of cases registered by the Poison Control Center of Paris in 1981].

Postnatal evaluation of morphological and functional effects of prenatal exposure to nitrofen in the Long-Evans rat.

Diphenyl ether herbicides: mutagenic metabolites and photoproducts of nitrofen.

Morphological and biochemical studies on liver, kidney and gill of fishes affected by pesticides.

Effect of increasing carbon chain length on organic acid transport by the choroid plexus: a potential factor in Reye's syndrome.

Saturable accumulation of the anionic herbicide, 2,4-dichlorophenoxyacetic acid (2,4-D), by rabbit choroid plexus: early developmental origin and interaction with salicylates.

Whole body and liver distribution of inhaled mercury vapor in the mouse: influence of ethanol and aminotriazole pretreatment.

[Study of lipid peroxidation in experimental retinal degeneration].

Identification of collagens synthesized by cultures of normal human corneal and keratoconus stromal cells.

Optical isomers of 2,3-dimercapto-1-propanesulfonate: antidotal activity, in vitro and in vivo, against sodium arsenite.

Presence of an abnormal transthyretin (prealbumin) in Portuguese patients with familial amyloidotic polyneuropathy.

The toxic effect of some industrial chemicals on rabbit ileum in vitro compared with eye irritancy in vivo.

A monoclonal antibody with ability to distinguish between NH₂-terminal fragments derived from fibrinogen and fibrin.

Inhalation of products of combustion.

Pyridine nucleotides of rabbit cornea with histotoxic anoxia: chemical analysis, non-invasive fluorometry and physiological correlates.

Vitamin A (retinol) status in the Gunn rat. The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

HPLC determination of chloramphenicol degradation in eye drops.

Phosphatidylinositol synthesis and phosphorylation are enhanced by light in rat retinas.

Purification of pregnancy-specific beta 1-glycoprotein with a monoclonal antibody immunoadsorbent.

Optical methods for monitoring temperature in spectrophotometric analysers.

Toxicity of rubber chemicals towards three-day chicken embryos.

[Effect of selenium-containing compounds on the electrical activity of the isolated guinea pig retina during induced lipid peroxidation].

Effect of retinol and retinoic acid on P/O ratios of coupled mitochondria.

Age-related changes in the composition of proteins in the trabecular meshwork of the human eye.

Hexose transport in microvascular endothelial cells cultured from bovine retina.

Taurine biosynthesis in frog retina: effects of light and dark adaptations.

Pentachlorophenol, an assessment of the occupational hazard.

Ca²⁺ and calmodulin antagonists inhibit the proton gradients associated with non-cyclic and cyclic photophosphorylation in spinach chloroplasts.

A qualitative study of the melanins from blue and brown human eyes.

Microbial degradation of thidiazuron and its photoproduct.

Sequence analysis of a growth hormone releasing factor from a human pancreatic islet tumor.

Comparisons of highly purified hepatic microsomal cytochromes P-450 from Holtzman and Long-Evans rats.

Accumulation of peptide Tyr-D-Ala-Gly by choroid plexus during ventriculocisternal perfusion of rat brain.

Transport of 3-O-methylglucose in isolated rat retinal pigment epithelial cells.

2-¹⁴C-1-Allyl-3,5-diethyl-6-chlorouracil I: Synthesis, absorption in human skin, excretion, distribution, and metabolism in rats and rabbits.

Structural and immunological characterization of type IV collagen isolated from chicken tissues.

Structure-activity relationships of a pigment-dispersing crustacean neurohormone.

Immunohistochemical localization of thyrotropin-releasing hormone in the rat hypothalamus and pituitary.

The primary structure of leucine aminopeptidase from bovine eye lens.

Basement membrane collagen synthesis by rabbit corneal endothelial cells in culture. Evidence for an alpha chain derived from a larger biosynthetic precursor.

Thermodynamic analysis of active sodium and potassium transport in the frog corneal epithelium.

Collagens from the skin and cartilage of the larval salamander *Ambystoma tigrinum*.

Comparison of collagen types in adult and fetal bovine corneas.

Human corneal stroma contains three distinct collagens.

Fluid transport across retinal pigment epithelium is inhibited by cyclic AMP.

Active transport of nicotine by the isolated choroid plexus in vitro.

Image analysis of electron micrographs of ATPase (Coupling Factor TF1) from thermophilic bacteria and luminal epithelium of mouse urinary bladder.

Choroid plexus transport of 2,4-dichlorophenoxyacetic acid: interaction with the organic acid carrier.

Methanol poisoning and formate oxidation in nitrous oxide-treated rats.

Therapeutic drug assays with gas-liquid chromatography and optical detection.

An IgM-secreting cell line derived from the mouse plasmacytoma 104E expresses a different VH gene.

[The presence of an albino ERG in the pigmented rat: genetic implications (author's transl)].

Hexose transport in normal and SV40-transformed human endothelial cells in culture.

Cell surface labeling of embryonic neural retina cells exposed to low temperature, energy inhibitors, cytochalasin B and colchicin.

[Effect of changes in intracellular calcium concentration on the response of isolated frog retina photoreceptors].

Topography of rhodopsin in retinal rod outer segment disk membranes. Photochemical labeling with 1-azidopyrene.

Transport of 2-deoxy-D-[3H]glucose in microvessels isolated from bovine cerebral cortex.

Accumulation of anionic pesticides by rabbit choroid plexus in vitro.

[Gramoxon ocular burns].

Affinity of ferredoxin for electrons from water and the regulation of cyclic photophosphorylation.

Cyclic photophosphorylation reactions catalyzed by ferredoxin, methyl viologen and anthraquinone sulfonate. Use of photochemical reactions to optimize redox poisoning.

Effects of pentachlorophenol and 2,4,6-trichlorophenol on the disposition of sulfobromophthalein and respiration of isolated liver cells.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the hepatic storage of retinol in rats with different dietary supplies of vitamin A (retinol).

Consideration of the possible carcinogenicity of some pesticides.

Retinoids inhibit 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced activity of benzo[a]pyrene metabolizing enzymes in human diploid fibroblasts.

Synthesis of type III collagen by fibroblasts from the embryonic chick cornea.

Procollagen and collagen produced by normal bovine corneal stroma fibroblasts in cell culture.

Ultrastructure of choroid plexus of the rat brain after 2,4-dinitrophenol treatment.

The uptake of 3-deoxy-3-fluoro-D-glucose by synaptosomes from rat brain cortex.

Effects of dietary vitamin A (retinol) on the reduction of hepatic retinol storage caused by 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin.

EC collagen: biosynthesis by corneal endothelial cells and separation from type IV without pepsin treatment or denaturation.

Occupational exposures to pesticides containing organoarsenicals in California.

A clinical survey of paraquat formulation workers.

Toxic substances and cell membrane function.

Review of the toxicology of paraquat (1,1'-dimethyl-4,4'-bipyridinium chloride).

Role of AMP in photophosphorylation by spinach chloroplasts.

[Study of the kinetics of chlorophyll photosensitized dye reduction by photopolarography].

[Cresol burns in the eye (author's transl)].

Vitamin A (retinol) status in the rat after a single oral dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Skin responses to ultraviolet radiation in contact photodermatitis due to fentichlor.

Dansylation of bacteriorhodopsin near the retinal attachment site.

Bovine type I collagen: A study of cross-linking in various mature tissues.

Partial amino acid sequence of human plasma retinol-binding protein. Isolation and alignment of the five cyanogen bromide fragments and the amino acid sequences of four of the fragments.

The primary structure of the human retinol-binding protein.

Quantitative analysis of the collagens in the bovine cornea.

An improved silver stain for developing nervous tissue.

Ultrastructural correlates of luminescence in Porichthys photophores. II. Effects of metabolic inhibitors.

Collagen crosslinking: isolation of a dimeric crosslinked peptide of alpha1-CB6 from bovine corneal and scleral collagens.

Hexose transport and phosphorylation by capillaries isolated from rat brain.

Superoxide dismutase of the eye: relative functions of superoxide dismutase and catalase in protecting the ocular lens from oxidative damage.

Assessment of the contribution of chemical species to the eye irritation potential of photochemical smog.

Repeated exposure to acrolein vapour: subacute studies in hamsters, rats and rabbits.

[Role of pyruvate kinase in non-specific changes of carbon photosynthetic metabolism, caused by the photophosphorylation inhibition].

Alteration of sensitivity and time scale in invertebrate photoreceptors exposed to anoxia, dinitrophenol, and carbon dioxide.

Nonsecreting myeloma variants with heavy-chain carbohydrate deficiencies.

[Methyl bromide, ethylene oxide and ethylene formaldehyde: biological and toxicological problems and problems related to treatment of library materials].

The interaction of caerulein with the rat pancreas. 2. Specific binding of [3H]caerulein on dispersed acinar cells.

Calcium-induced conformational changes in a cyanogen bromide fragment of troponin C that contains one of the binding sites.

Isolated microvessels: the blood-brain barrier in vitro.

The organization of tissues of the eye by different collagen types.

Embryonic neural retina collagen: in vitro synthesis of high molecular weight forms of type II plus a new genetic type.

Isolation and hydroxylysine glycoside content of some cyanogen bromide-cleaved fragments of collagen from bovine corneal stroma.

Isolation and partial identification of a crosslinked peptide from bovine corneal collagen.

Partial characterization of human collagen and procollagen secreted by human corneal stromal fibroblasts in cell culture.

Bile secretion and liver cell heterogeneity in the rat.

Effect of Ca^{2+} , Mg^{2+} , NaN_3 , cholinergic agents, and gastrointestinal hormones on the guanylate cyclase from guinea pig gastric mucosa.

Sensory irritation to formaldehyde and acrolein during single and repeated exposures in mice.

Role of oxygen in ferredoxin-catalyzed cyclic photophosphorylations.

The importance of reducing conditions for the inhibitory action of DBMIB⁺, antimycin A and EDAC⁺ on cyclic photophosphorylation.

[Relation of the growth of *Anabaena variabilis* cyanophages to photosynthesis and respiration].

Regulation of hydrogen peroxide in eye humors. Effect of 3-amino-1H-1,2,4-triazole on catalase and glutathione peroxidase of rabbit eye.

Pathways of silicomolybdate photoreduction and associated photophosphorylation in tobacco chloroplasts.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on plasma disappearance and biliary excretion of foreign compounds in rats.

Photophosphorylation Associated with Photosystem II: III. Characterization of Uncoupling, Energy Transfer Inhibition, and Proton Uptake Reactions Associated with Photosystem II Cyclic Photophosphorylation.

Effect of anticonvulsants on the uptake of 5-methyltetrahydrofolic acid by the choroid plexus in rabbits.

The influence of 3,4-dihydroxyphenylacetic acid on the accumulation of 5-hydroxyindoleacetic acid in the choroid plexus and kidney cortex slices of rats.

Metabolism of Oat Leaves during Senescence: V. Senescence in Light.

Accumulation of taurine by cultured retinal pigment epithelium of the rat.

Synthesis of two collagen types by embryonic chick corneal epithelium in vitro.

Irritating effects on man of air pollution due to cigarette smoke.

[Air pollution and irritations due to cigarette smoke].

The use of deuterated analogs in qualitative and quantitative investigations of the metabolism of cyclophosphamide (NSC-26271).

Effect of paraquat (methyl viologen) on liver function in mice.

Studies on optically active pesticides, I synthesis and herbicidal activity of d(+) and l(-) methyl-2-chloro-3-(4-chlorophenyl)-propionate.

Photosystem II - mediated cyclic photophosphorylation.

Rates and properties of endogenous cyclic photophosphorylation of isolated intact chloroplasts measured by CO₂ fixation in the presence of dihydroxyacetone phosphate.

The deleterious effects of fungicides and herbicides on *Xenopus laevis* embryos.

[On the chloranilic acid reaction (RAC) proposed by Closs (author's transl)].

Cell-free synthesis of a large translation product of prolactin messenger RNA.

Antidiuretic peptide in mammalian choroid plexus.

Synthesis of type II collagen in vitro by embryonic chick neural retina tissue.

Excretion of sulfobromophthalein in rats with iodomethane-induced depletion of hepatic glutathione.

Use of preformed cell aggregates and layers to measure tissue-specific differences in intercellular adhesion.

Irritant dermatitis from diallylglycol carbonate monomer in the optical industry: clinical and experimental studies of cutaneous tolerance and chemical investigations.

Renal handling of phenol red. II. The mechanism of substituted phenolsulphophthalein (PSP) dye transport in rabbit kidney tubules in vitro.

Transport of organic cations and anions by choroid plexus.

The search for the structure of fibrinogen.

Eye hazards in rural communities.

Synthesis and herbicidal activity of N,N-diethyl-2-(1-naphthoxy) propionamide and its optical isomers.

Occurrence of trifluralin and its photoproducts in air.

Gas-liquid chromatographic determination of sencor (metribuzin) and its major metabolites and photoproduct.

Uptake of sorbitol by chick embryo heart cells at various stages of development.

Chemical synthesis of N beta-oxalyl-L-alpha, beta-diaminopropionic acid and optical specificity in its neurotoxic action.

Microperoxisomes in retinal pigment epithelium.

Interaction of a chick skin collagen fragment (alpha1-CB5) with human platelets. Biochemical studies during the aggregation and release reaction.

The roles of bile salts in the uptake of beta-carotene and retinol by rat everted gut sacs.

The transport of gentamicin in the choroid plexus and cerebrospinal fluid.

Structural and functional studies of ligandin, a major renal organic anion-binding protein.

Effects of modifiers on the optical properties of oxidized cholesterol model membranes.

Haploid callus and regeneration of plants from anthers of *Digitalis purpurea* L.

[Syndrome of ophthalmological manifestations caused by a generalized intoxication with defoliant and herbicides].

The dependence of photophosphorylation in chloroplasts on Δ pH and external pH.

Photophosphorylation not coupled to DCMU-insensitive photosystem II oxygen evolution.

Native and artificial energy-conserving sites in cyclic photophosphorylation systems.

Lipophilicity and catalysis of photophosphorylation. Artificial proton translocation by lipophilic, quinoid hydrogen carriers in chloroplasts and liposomes.

Studies on the energy coupling sites of photophosphorylation. IV. The relation of proton fluxes to the electron transport and ATP formation associated with photosystem II.

Photophosphorylation and the 518 NM absorbance change in tightly coupled chloroplasts.

[Physiological role of cyclic photophosphorylation (author's transl)].

Electroencephalography during acute poisoning by methyl bromide.

Purification of large crosslinked peptides from insoluble calf bone and skin collagens by hydroxyapatite chromatography.

The secretion of alkali metal ions by the perfused cat pancreas as influenced by the composition and osmolality of the external environment and by inhibitors of metabolism and Na⁺, K⁺-ATPase activity.

Rhythmic potassium flux in albizzia: effect of aminophylline, cations, and inhibitors of respiration and protein synthesis.

Structure of the porcine vasoactive intestinal octacosapeptide. The amino-acid sequence. Use of kallikrein in its determination.

Sicklepod Surface Wax Response to Photoperiod and S-(2,3-Dichloroallyl)diisopropylthiocarbamate (Diallate).

Table 2A-10 – Titles of Pubmed Records Related to Ear Adverse Events Following Herbicide Exposure

ACOUSTIC NEUROMA; *AUDI*; *DEAF*; *DIZZINESS*; *EUSTACHIAN TUBE DYSFUNCTION*;
HEARING LOSS; *HYPERACUSIS*; *LABYRINTHITIS*; *MENIERE*; *OTITIS*; *SENSORINEURAL
HEARING LOSS*; *TINNITUS*; *VERTIGO*; *VESTIBULAR*; * EAR *; EAR (358)

Acrolein suppresses anticancer drug-induced toxicity mediated by activating claudin-1 and Nrf2 axis in a spheroid model of human lung squamous cell carcinoma cells.

The exposure in ovo to glyphosate on the integrity of intestinal epithelial tight junctions of chicks.

Early and transitory hypoactivity and olfactory alterations after chronic atrazine exposure in female Sprague-Dawley rats.

Inactivation of microglia dampens blood-brain barrier permeability and loss of dopaminergic neurons in paraquat-lesioned mice.

Dietary glutathione supplementation attenuates oxidative stress and improves intestinal barrier in diquat-treated weaned piglets.

Assessing farmer's exposure to pesticides and the risk for non-communicable diseases: A biomonitoring study.

Early functional analysis on the pulmonary hemodynamic effects of Transamniotic Stem Cell Therapy (TRASCET) in the nitrofen model of congenital diaphragmatic hernia.

Management of Acute Ferrous Sulfate Poisoning Using Activated Charcoal Monotherapy: A Case Report.

Plant-derived squalene supplementation improves growth performance and alleviates acute oxidative stress-induced growth retardation and intestinal damage in piglets.

Evaluation of arsenic metabolism and tight junction injury after exposure to arsenite and monomethylarsonous acid using a rat in vitro blood-Brain barrier model.

Gut Microbiota and Its Role in the Brain-Gut-Kidney Axis in Hypertension.

Early-Life Exposure to Paraquat Aggravates Sex-Specific and Progressive Abnormal Non-Motor Neurobehavior in Aged Mice.

Priority screening of contaminants of emerging concern in drinking water sources of eastern China: Assessing risks based on exposure-activity ratios (EARs).

Occupational accidents involving pesticides notified by SINAN.

Prevention of DSS-induced colitis in mice with water kefir microbiota via anti-inflammatory and microbiota-balancing activity.

Iron-rich *Candida utilis* improves intestinal health in weanling piglets.

Exposure to the persistent organic pollutant 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD, dioxin) disrupts development of the zebrafish inner ear.

Stevioside Improves Antioxidant Capacity and Intestinal Barrier Function while Attenuating Inflammation and Apoptosis by Regulating the NF- κ B/MAPK Pathways in Diquat-Induced Oxidative Stress of IPEC-J2 Cells.

Exposure to the persistent organic pollutant 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD, dioxin) disrupts development of the zebrafish inner ear.

Absorption and Transport Mechanism of Red Meat-Derived N-glycolylneuraminic Acid and Its Damage to Intestinal Barrier Function through the NF- κ B Signaling Pathway.

Mulberry leaf extract improves intestinal barrier function and displays beneficial effects on colonic microbiota and microbial metabolism in weaned piglets.

Risk Assessment of Pesticide Residues by GC-MSMS and UPLC-MSMS in Edible Vegetables.

Pesticides and farmers' health: an analysis of variables related to management and property.

Long-term exposure to polyethylene microplastics and glyphosate interferes with the behavior, intestinal microbial homeostasis, and metabolites of the common carp (*Cyprinus carpio* L.).

Acute diquat poisoning causes rhabdomyolysis.

FARGO-360: a multi-disciplinary survey of practice and perspectives on provision of care for patients with frailty presenting with gynecological cancers in the UK and Ireland.

Onset of efficacy and adverse events during Cenobamate titration period.

Efficacy of cenobamate by focal seizure subtypes: Post-hoc analysis of a phase 3, multicenter, open-label study.

Flavoring agent dihydrocoumarin alleviates IgE-mediated mast cell activation and allergic inflammation.

Early life organophosphate ester exposures and bone health at age 12 years: The Health Outcomes and Measures of the Environment (HOME) Study.

Sodium acetate/sodium butyrate alleviates lipopolysaccharide-induced diarrhea in mice via regulating the gut microbiota, inflammatory cytokines, antioxidant levels, and NLRP3/Caspase-1 signaling.

Acidifiers Attenuate Diquat-Induced Oxidative Stress and Inflammatory Responses by Regulating NF- κ B/MAPK/COX-2 Pathways in IPEC-J2 Cells.

Influence of Plant Growth Regulators on Glandular Trichome Density and Steviol Glycosides Accumulation in *Stevia rebaudiana*.

Experimental evaluation of biological regeneration of arable soil: The effects of grass-clover leys and arbuscular mycorrhizal inoculants on wheat growth, yield, and shoot pathology.

Protective Effects of Resveratrol and Apigenin Dietary Supplementation on Serum Antioxidative Parameters and mRNAs Expression in the Small Intestines of Diquat-Challenged Pullets.

Efficacy and safety of adjunctive cenobamate: Post-hoc analysis of study C017 in patients grouped by mechanism of action of concomitant antiseizure medications.

Plant-Derived Molecule 4-Methylumbelliferone Suppresses Fc γ RI-Mediated Mast Cell Activation and Allergic Inflammation.

Degradation of 2,6-dichlorophenol by *Trichoderma longibraciatum* Isolated from an industrial Soil Sample in Dammam, Saudi Arabia.

Chlorogenic Acid Attenuates Oxidative Stress-Induced Intestinal Mucosa Disruption in Weaned Pigs.

Farmers' Knowledge, Attitudes, and Perceptions Regarding Carcinogenic Pesticides in Fez Meknes Region (Morocco).

Negative impacts of microcystin-LR and glyphosate on zebrafish intestine: Linked with gut microbiota and microRNAs?

Earthworm casts restrained the accumulation and phytotoxicity of soil glyphosate to cowpea (*Vigna unguiculata* (L.) Walp.) plants.

Kaempferol attenuates diquat-induced oxidative damage and apoptosis in intestinal porcine epithelial cells.

Roles of Bak and Sirt3 in Paraquat-Induced Cochlear Hair Cell Damage.

Tank mixture of glyphosate and 2,4-D applied on RR \hat{A} [®] maize crop.

Resveratrol protects intestinal integrity, alleviates intestinal inflammation and oxidative stress by modulating AhR/Nrf2 pathways in weaned piglets challenged with diquat.

Low Doses of Glyphosate/Roundup Alter Blood-Testis Barrier Integrity in Juvenile Rats.

Efficacy of cenobamate for uncontrolled focal seizures: Post hoc analysis of a Phase 3, multicenter, open-label study.

Post hoc analysis of a phase 3, multicenter, open-label study of cenobamate for treatment of uncontrolled focal seizures: Effects of dose adjustments of concomitant antiseizure medications.

Effects of prebiotic oligofructose-enriched inulin on gut-derived uremic toxins and disease progression in rats with adenine-induced chronic kidney disease.

Long-term safety of adjunctive cenobamate in patients with uncontrolled focal seizures: Open-label extension of a randomized clinical study.

Is Cenobamate the Breakthrough We Have Been Wishing for?

Efficacy and safety of cenobamate in patients with uncontrolled focal seizures: A meta-analysis.

Pharmacology of Cenobamate: Mechanism of Action, Pharmacokinetics, Drug-Drug Interactions and Tolerability.

Kindlin-3 and RASSF6 are probable biomarkers for predicting metastasis in cutaneous melanoma.

Earthworms accelerated the degradation of the highly toxic acetochlor S-enantiomer by stimulating soil microbiota in repeatedly treated soils.

Analysis of the Soil Fumigant, Dimethyl Disulfide, in Swine Blood by Dynamic Headspace Gas Chromatography-Mass Spectroscopy.

Environmental Pollution, Oxidative Stress and Thioretinaco Ozonide: Effects of Glyphosate, Fluoride and Electromagnetic Fields on Mitochondrial Dysfunction in Carcinogenesis, Atherogenesis and Aging.

Effects of a mixture of low doses of atrazine and benzo[a]pyrene on the rat seminiferous epithelium either during or after the establishment of the blood-testis barrier in the rat seminiferous tubule culture model.

In vitro effects of glyphosate and Roundup on Sertoli cell physiology.

Toxic effects of glyphosate on intestinal morphology, antioxidant capacity and barrier function in weaned piglets.

Early Postnatal Exposure to Paraquat and Maneb in Mice Increases Nigrostriatal Dopaminergic Susceptibility to a Re-challenge with the Same Pesticides at Adulthood: Implications for Parkinson's Disease.

[Effects of acute paraquat poisoning on cognitive ability in humans].

Biogenic selenium nanoparticles synthesized by *Lactobacillus casei* ATCC 393 alleviate diquat-induced intestinal barrier dysfunction in C57BL/6 mice through their antioxidant activity.

Epigenetic effects of low-level sodium arsenite exposure on human liver HepaRG cells.

Cenobamate for the treatment of focal epilepsies.

Serum concentrations of pesticides including organophosphates, pyrethroids and neonicotinoids in a population with osteoarthritis in Saudi Arabia.

Randomized phase 2 study of adjunctive cenobamate in patients with uncontrolled focal seizures.

Cenobamate (YKP3089) as adjunctive treatment for uncontrolled focal seizures in a large, phase 3, multicenter, open-label safety study.

Eckol from *Ecklonia cava* Suppresses Immunoglobulin E-mediated Mast Cell Activation and Passive Cutaneous Anaphylaxis in Mice.

COVID-19: Hygiene and Public Health to the front.

Tagetnoic acid, a new lipoxygenase inhibitor peroxy fatty acid from *Tagetes minuta* growing in Saudi Arabia.

[The use of retinoids to stimulate the regenerative process in trepanation cavity after "open" sanitizing surgery on the middle ear].

Early Development of Direct Embryos in the Cultured Anthers of *Manihot esculenta* Crantz.

Taurine Alleviates Intestinal Injury by Mediating Tight Junction Barriers in Diquat-Challenged Piglet Models.

Gut neurotoxin p-cresol induces differential expression of GLUN2B and GLUN2A subunits of the NMDA receptor in the hippocampus and nucleus accumbens in healthy and audiogenic seizure-prone rats.

Early Neurotoxic Effects of Inorganic Arsenic Modulate Cortical GSH Levels Associated With the Activation of the Nrf2 and NF- κ B Pathways, Expression of Amino Acid Transporters and NMDA Receptors and the Production of Hydrogen Sulfide.

[High frequency hearing among rural workers exposed to pesticides].

Prenatal exposure to the herbicide 2,4-D is associated with deficits in auditory processing during infancy.

Use of Pesticides and Health Risk among Farmers in Sunsari District, Nepal.

Paraquat affects the differentiation of neural stem cells and impairs the function of vascular endothelial cells: a study of molecular mechanism.

Dietary Tributyrin Attenuates Intestinal Inflammation, Enhances Mitochondrial Function, and Induces Mitophagy in Piglets Challenged with Diquat.

Claudins, VEGF, Nrf2, Keap1, and Nonspecific Airway Hyper-Reactivity Are Increased in Mice Co-Exposed to Allergen and Acrolein.

Resveratrol improves intestinal barrier function, alleviates mitochondrial dysfunction and induces mitophagy in diquat challenged piglets(1).

In vitro activity of carvacrol, cinnamaldehyde and thymol combined with antifungals against *Malassezia pachydermatis*.

Photobiomodulation therapy reduces acute pain and inflammation in mice.

Antimicrobial effects of cinnamon essential oil and cinnamaldehyde combined with EDTA against canine otitis externa pathogens.

Anti-inflammatory effect of trans-4-methoxycinnamaldehyde from *Etilingera pavieana* in LPS-stimulated macrophages mediated through inactivation of NF- κ B and JNK/c-Jun signaling pathways and in rat models of acute inflammation.

Epidemic of Chronic Kidney Disease of Nontraditional Etiology in El Salvador: Integrated Health Sector Action and South-South Cooperation.

An assessment for diagnostic and therapeutic modalities for management of pediatric Iron deficiency Anemia in Saudi Arabia: a cross-sectional study.

Suppression of the photoparoxysmal response in photosensitive epilepsy with cenobamate (YKP3089).

Prenatal dioxin exposure and neuropsychological functioning in the Seveso Second Generation Health Study.

Crizotinib-induced erosive esophagitis in a pediatric patient with neuroblastoma.

Hearing screening and cholinesterase activity among rural workers exposed to pesticides.

Dietary Supplementation With Citrus Extract Altered the Intestinal Microbiota and Microbial Metabolite Profiles and Enhanced the Mucosal Immune Homeostasis in Yellow-Feathered Broilers.

Tannic acid modulates intestinal barrier functions associated with intestinal morphology, antioxidative activity, and intestinal tight junction in a diquat-induced mouse model.

Energy Metabolism and Redox State in Brains of Wistar Audiogenic Rats, a Genetic Model of Epilepsy.

The testing of an artificial modified bacterial cellulose auricle skeleton in an animal model.

Paraquat initially damages cochlear support cells leading to anoikis-like hair cell death.

[The regulation of tight junction protein via PKC ζ /1 β for abnormal permeability of brain microvascular endothelial cells exposed to paraquat].

Urinary concentrations and profiles of organophosphate and pyrethroid pesticide metabolites and phenoxyacid herbicides in populations in eight countries.

Diquat-induced oxidative stress increases intestinal permeability, impairs mitochondrial function, and triggers mitophagy in piglets.

Target vs non-target analysis to determine pesticide residues in fruits from Saudi Arabia and influence in potential risk associated with exposure.

EF-Tu From Non-typeable Haemophilus influenzae Is an Immunogenic Surface-Exposed Protein Targeted by Bactericidal Antibodies.

The impaired immune function and structural integrity by dietary iron deficiency or excess in gill of fish after infection with Flavobacterium columnare: Regulation of NF- κ B, TOR, JNK, p38MAPK, Nrf2 and MLCK signalling.

Associations Between Disinfection By-Product Exposures and Craniofacial Birth Defects.

Early-life stress induces motor coordination dysfunction in adult mice.

The maturation state of the auditory nerve and brainstem in rats exposed to lead acetate and supplemented with ferrous sulfate.

Early Metabolome Profiling and Prognostic Value in Paraquat-Poisoned Patients: Based on Ultraperformance Liquid Chromatography Coupled To Quadrupole Time-of-Flight Mass Spectrometry.

Acrolein Disrupts Tight Junction Proteins and Causes Endoplasmic Reticulum Stress-Mediated Epithelial Cell Death Leading to Intestinal Barrier Dysfunction and Permeability.

Epi/perineural and Schwann Cells as Well as Perineural Sheath Integrity are Affected Following 2,4-D Exposure.

Early developmental exposure to pentachlorophenol causes alterations on mRNA expressions of caspase protease family in zebrafish embryos.

Agronomic performance of insect-protected and herbicide-tolerant MON 89034 \times TC1507 \times NK603 \times DAS-40278-9 corn is equivalent to that of conventional corn.

Early life stress affects mortality rate more than social behavior, gene expression or oxidative damage in honey bee workers.

Plant characterization of genetically modified maize hybrids MON-89 \times 34-3 \times MON-88 \times 17-3, MON-89 \times 34-3 \times MON- \times 6 \times 3-6, and MON- \times 6 \times 3-6: alternatives for maize production in Mexico.

The history of arsenical pesticides and health risks related to the use of Agent Blue.

The decreased growth performance and impaired immune function and structural integrity by dietary iron deficiency or excess are associated with TOR, NF- κ B, p38MAPK, Nrf2 and MLCK signaling in head kidney, spleen and skin of grass carp (*Ctenopharyngodon idella*).

Early-life chemical exposures and risk of metabolic syndrome.

Sensory deprivation increases phagocytosis of adult-born neurons by activated microglia in the olfactory bulb.

Feeble Antipyretic, Analgesic, and Anti-inflammatory Activities were Found with Regular Dose 4'-O- β -D-Glucosyl-5-O-Methylvisamminol, One of the Conventional Marker Compounds for Quality Evaluation of *Radix Saposhnikoviae*.

Acute Acrolein Exposure Induces Impairment of Vocal Fold Epithelial Barrier Function.

Early alterations on photosynthesis-related parameters in *Chlamydomonas reinhardtii* cells exposed to atrazine: A multiple approach study.

Exposure to a glyphosate-based herbicide during pregnancy and lactation induces neurobehavioral alterations in rat offspring.

Early Stage Blood Purification for Paraquat Poisoning: A Multicenter Retrospective Study.

Intra-laboratory study to determine the reproducibility of LLNA:BrdU-ELISA for the prediction of the skin sensitizing potential of chemicals.

Selective inhibition of JAK2/STAT1 signaling and iNOS expression mediates the anti-inflammatory effects of coniferyl aldehyde.

3-Aminotriazole protects from CoCl₂-induced ototoxicity by inhibiting the generation of reactive oxygen species and proinflammatory cytokines in mice.

TRPA1 activation leads to neurogenic vasodilatation: involvement of reactive oxygen nitrogen species in addition to CGRP and NO.

Photosynthetic contribution of the ear to grain filling in wheat: a comparison of different methodologies for evaluation.

Light-induced biochemical variations in secondary metabolite production and antioxidant activity in callus cultures of *Stevia rebaudiana* (Bert).

Early Changes of Peripheral Blood Lymphocyte Subpopulations in Patients with Occupational 2,4-dinitrophenol Poisoning.

Death within 44 days of 2,4-dinitrophenol intake.

Prenatal low dosage dioxin (TCDD) exposure impairs cochlear function resulting in auditory neuropathy.

Congener-specific levels and patterns of polychlorinated biphenyls in edible fish tissue from the central Red Sea coast of Saudi Arabia.

Arsenic and arsenic species in shellfish and finfish from the western Arabian Gulf and consumer health risk assessment.

A simple standard technique for labyrinthectomy in the rat: A methodical communication with a detailed description of the surgical process.

Development of a cell line from the American eel brain expressing endothelial cell properties.

Acute Illness Associated with Exposure to a New Soil Fumigant Containing Dimethyl Disulfide-Hillsborough County, Florida, 2014.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the development and function of the blood-brain barrier.

Prenatal pesticide exposure and otitis media during early childhood in the PELAGIE mother-child cohort.

L-Glutamate Enhances Barrier and Antioxidative Functions in Intestinal Porcine Epithelial Cells.

Further development of LLNA:DAE method as stand-alone skin-sensitization testing method and applied for evaluation of relative skin-sensitizing potency between chemicals.

Early haemoperfusion with continuous venovenous haemofiltration improves survival of acute paraquat-poisoned patients.

Oral Administration of 4-Hydroxy-3-Methoxycinnamaldehyde Attenuates Atopic Dermatitis by Inhibiting T Cell and Keratinocyte Activation.

[Therapeutic effects of gastric lavage with fuller earth combined with Qingyill catharsis in treatment of oral paraquat poisoning in rabbits].

Natural antioxidant betanin protects rats from paraquat-induced acute lung injury interstitial pneumonia.

Activation of the Prostaglandin E2 receptor EP2 prevents house dust mite-induced airway hyperresponsiveness and inflammation by restraining mast cells' activity.

Developmental exposure to purity-controlled polychlorinated biphenyl congeners (PCB74 and PCB95) in rats: effects on brainstem auditory evoked potentials and catalepsy.

Development and characterization of an endothelial cell line from the bulbus arteriosus of walleye, *Sander vitreus*.

Exchange transfusion can be life-saving in severe propanil poisoning: a case report.

Earthworm tolerance to residual agricultural pesticide contamination: field and experimental assessment of detoxification capabilities.

Antinociceptive and anti-inflammatory activities of extract and two isolated flavonoids of *Carthamus tinctorius* L.

Effects of in utero exposure of C57BL/6J mice to 2,3,7,8-tetrachlorodibenzo-p-dioxin on epidermal permeability barrier development and function.

An audit to review the characteristics and management of placenta praevia at Aberdeen Maternity Hospital, 2009-2011.

Production of the anti-inflammatory compound 6-O-palmitoyl-3-O- β -D-glucopyranosylcampesterol by Callus cultures of *Lopezia racemosa* Cav. (Onagraceae).

Homoisoflavanone prevents mast cell activation and allergic responses by inhibition of Syk signaling pathway.

Aryl hydrocarbon receptor-dependent induction of liver fibrosis by dioxin.

Early-life Exposure to Endocrine Disrupting Chemicals and Later-life Health Outcomes: An Epigenetic Bridge?

Toothache caused by trigeminal neuralgia of vestibular schwannoma: a case report. [Corrected].

Two-stage culture procedure using thidiazuron for efficient micropropagation of *Stevia rebaudiana*, an anti-diabetic medicinal herb.

Survival predictors in paraquat intoxication and role of immunosuppression.

Early-life exposure to a herbicide has enduring effects on pathogen-induced mortality.

Effect of acrolein, a hazardous air pollutant in smoke, on human middle ear epithelial cells.

Mitochondria-targeted antioxidant peptide SS31 protects the retinas of diabetic rats.

Early growth response protein 1 upregulation and nuclear translocation by 2'-benzyloxycinnamaldehyde induces prostate cancer cell death.

The ultra-early protective effect of ulinastatin on rabbit acute lung injury induced by paraquat.

Functional expression of TRPV1 and TRPA1 in rat vestibular ganglia.

Perspectives on communicating risks of chemicals.

Contact sensitizing potential of pyrogallol and 5-amino-o-cresol in female BALB/c mice.

Induction of thymic stromal lymphopoietin production by nonanoic acid and exacerbation of allergic inflammation in mice.

Novel, broad-spectrum anticonvulsants containing a sulfamide group: pharmacological properties of (S)-N-[(6-chloro-2,3-dihydrobenzo[1,4]dioxin-2-yl)methyl]sulfamide (JNJ-26489112).

Early dioxin exposure causes toxic effects in adult zebrafish.

Reduction in impulse noise-induced permanent threshold shift with intracochlear application of an NADPH oxidase inhibitor.

Oculomotor deficits in aryl hydrocarbon receptor null mouse.

Early membrane events induced by salicylic acid in motor cells of the *Mimosa pudica* pulvinus.

Influence of Maternal Exposure to 2,3,7,8-Tetrachlorodibenzo-p-dioxin on Socioemotional Behaviors in Offspring Rats.

siRNA-mediated knock-down of NOX3: therapy for hearing loss?

Early formation of GABAergic synapses governs the development of adult-born neurons in the olfactory bulb.

Further study is needed to assess ototoxicity from organophosphates and paraquat.

Early cytotoxic and genotoxic effects of atrazine on Wistar rat liver: a morphological, immunohistochemical, biochemical, and molecular study.

Early hemoperfusion may improve survival of severely paraquat-poisoned patients.

Glutamine suppresses dinitrophenol fluorobenzene-induced allergic contact dermatitis and itching: inhibition of contact dermatitis by glutamine.

Cyclo(His-Pro) exerts anti-inflammatory effects by modulating NF- κ B and Nrf2 signalling.

Earthworm bioassays and seedling emergence for monitoring toxicity, aging and bioaccumulation of anthropogenic waste indicator compounds in biosolids-amended soil.

Sodium azide poisoning at a restaurant - Dallas County, Texas, 2010.

Neuropsychiatric manifestations of methyl iodide.

Effects of deliberate ingestion of organophosphate or paraquat on brain stem auditory-evoked potentials.

Enhanced sensitization and elicitation responses caused by mixtures of common fragrance allergens.

Early exposure to low doses of atrazine affects behavior in juvenile and adult CD1 mice.

Early exposure to paraquat sensitizes dopaminergic neurons to subsequent silencing of PINK1 gene expression in mice.

The involvement of TRPA1 channel activation in the inflammatory response evoked by topical application of cinnamaldehyde to mice.

Endothelial dysfunction and claudin 5 regulation during acrolein-induced lung injury.

Surprises perilous: toxic health hazards for employees unloading fumigated shipping containers.

Illness associated with exposure to methyl bromide-fumigated produce--California, 2010.

Exposure to iodomethane and dichloromethane associated with a confusional state.

Effects of prenatal exposure to dioxin-like compounds on allergies and infections during infancy.

A case report of concomitant paroxysmal nocturnal hemoglobinuria and heterozygous β^0 -thalassemia.

Early life growth hormone treatment shortens longevity and decreases cellular stress resistance in long-lived mutant mice.

Early onset of neurological symptoms in fragile X premutation carriers exposed to neurotoxins.

In utero and lactational exposure to low doses of chlorinated and brominated dioxins induces deficits in the fear memory of male mice.

Development of a selective modulator of aryl hydrocarbon (Ah) receptor activity that exhibits anti-inflammatory properties.

In vitro assessment of chemical activation efficiency during in-office dental bleaching.

Early development of the primordial mammalian diaphragm and cellular mechanisms of nitrofen-induced congenital diaphragmatic hernia.

Matrix metalloproteinase-9 and -2 expression in the olfactory bulb following methyl bromide gas exposure.

Early-age changes in oxidative stress in brown trout, *Salmo trutta*.

Assessment of nicotine inhalation exposure and urinary cotinine of tobacco processing workers.

[Improvement of local lymph node assay for cosmetics safety evaluation].

Causes and types of health effects during the use of crop protection chemicals: data from a survey of over 6,300 smallholder applicators in 24 different countries.

Transplacental and early life exposure to inorganic arsenic affected development and behavior in offspring rats.

Evaluation of irritancy and sensitization potential of metalworking fluid mixtures and components.

Toxicology laboratory analysis and human exposure to p-chloroaniline.

Ferric carboxymaltose: a review of its use in iron-deficiency anaemia.

A cluster of neurological signs and symptoms in soil fumigators.

Analysis of PCB congeners related to cognitive functioning in adolescents.

Early biochemical and morphological modifications in the brain of a transgenic mouse model of Alzheimer's disease: a role for peroxisomes.

Collaboration between monitoring authorities, regulatory authorities and test facilities on GLP principles provides confidence in data quality with an emphasis on sound science. GLP: an example of a focused effort that paid off.

Early endoscopic gastric lavage for acute iron overdose: a novel approach to accidental pill ingestions.

[Headache caused by pesticides--a review of the literature].

Epidemiologic evidence of relationships between reproductive and child health outcomes and environmental chemical contaminants.

Neurological manifestation of methyl bromide intoxication.

TCDD exposure exacerbates atopic dermatitis-related inflammation in NC/Nga mice.

The effects of toluene plus noise on hearing thresholds: an evaluation based on repeated measurements in the German printing industry.

The dedicated emergency surgeon: towards consultant-based acute surgical admissions.

Evaluation of neurodevelopmental effects on rats exposed prenatally to sulfentrazone.

Pesticide exposure exacerbates alpha-synucleinopathy in an A53T transgenic mouse model.

Chronic inhalation of rotenone or paraquat does not induce Parkinson's disease symptoms in mice or rats.

Involvement of cannabinoid CB2 receptors in the IgE-mediated triphasic cutaneous reaction in mice.

[Sodium azide--clinical course of the poisoning and treatment].

Early maturation of gonadotropin-releasing hormone secretion and sexual precocity after exposure of infant female rats to estradiol or dichlorodiphenyltrichloroethane.

TRPA1 mediates the inflammatory actions of environmental irritants and proalgesic agents.

Increased resistance to free radical damage induced by low-level sound conditioning.

Effects of iron deficiency versus iron deficiency anemia on brainstem auditory evoked potentials in infancy.

Patterns of hospital transfer for self-poisoned patients in rural Sri Lanka: implications for estimating the incidence of self-poisoning in the developing world.

Case report: Hydroquinone and/or glutaraldehyde induced acute myeloid leukaemia?

Sensitising potential of four textile dyes and some of their metabolites in a modified local lymph node assay.

Damage and threshold shift resulting from cochlear exposure to paraquat-generated superoxide.

[Experimental study on pharmacodynamical of Oxalis griffithii, a national medicine in Guizhou].

Early developmental 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure decreases chick embryo heart chronotropic response to isoproterenol but not to agents affecting signals downstream of the beta-adrenergic receptor.

Auditory neurotoxicity and hepatotoxicity after MSMA (monosodium methanarsenate) high dose oral intake.

Mild postnatal anemia: is it a problem?

Early environmental origins of neurodegenerative disease in later life.

[Assessment of free radical formation process in rats with different audiogenic seizure susceptibility by means of biochemiluminiscent methods].

Methyl bromide intoxication causes reversible symmetric brainstem and cerebellar MRI lesions.

Inhibition of IgE-dependent mouse triphasic cutaneous reaction by a boiling water fraction separated from mycelium of *Phellinus linteus*.

Noradrenaline involvement in the memory-enhancing effects of exposure to a complex rhythm stimulus following discriminated passive avoidance training in the young chick.

Effects of pesticides on the peripheral and central nervous system in tobacco farmers in Malaysia: studies on peripheral nerve conduction, brain-evoked potentials and computerized posturography.

Paraquat-induced hair cell damage and protection with the superoxide dismutase mimetic m40403.

Early differential gene expression of rat lung after exposure to paraquat.

Molecular determinants of differential pore blocking of kidney CLC-K chloride channels.

Arsenic-induced alterations in the contact hypersensitivity response in Balb/c mice.

Early-life environmental risk factors for asthma: findings from the Children's Health Study.

Hexachlorobenzene, a dioxin-like compound, disrupts auditory function in rat.

Air bags and the skin.

Perinatal dioxin exposure and later effects--a review.

Comparative study on the effects of ointments of tinidazole, hydrocortisone and clobetasol on animal models for inflammatory dermatitis in mice.

Description of *Enterococcus canis* sp. nov. from dogs and reclassification of *Enterococcus porcinus* Teixeira et al. 2001 as a junior synonym of *Enterococcus villorum* Vancanneyt et al 2001.

Human health effects of sodium azide exposure: a literature review and analysis.

A neuropsychotoxicological assessment of workers in a sodium azide production plant.

Early changes in metabolism of leukemic cell lines upon induction of apoptosis by cytotoxic drugs.

Effects of metronidazole and tinidazole ointments on models for inflammatory dermatitis in mice.

Iron deficiency anemia in infancy: long-lasting effects on auditory and visual system functioning.

[Human neurotoxicity of ethylene-bis-dithiocarbamates (EBDC)].

Antipruritic and antiinflammatory effects of aqueous extract from Si-Wu-Tang.

A study on behavioral, neurotoxicological, and immunotoxicological effects of subchronic arsenic treatment in rats.

Induction of endolymphatic hydrops by directly infused monoclonal antibody against type II collagen CB11 peptide.

Early induction of genetic instability and apoptosis by arsenic in cultured Chinese hamster cells.

Uptake of the antivasular agent 5,6-dimethylxanthenone-4-acetic acid (DMXAA) and activation of NF-kappaB in human tumor cell lines.

Evaluation of acute sensory--motor effects and test sensitivity using termiticide workers exposed to chlorpyrifos.

[A case of chronic methyl bromide intoxication showing symmetrical lesions in the basal ganglia and brain stem on magnetic resonance imaging].

Oral administration of collagen conjugated with cholera toxin induces tolerance to type II collagen and suppresses chondritis in an animal model of autoimmune ear disease.

Presence of autoantibodies in the sera of Meniere's disease.

Early indicators of response in biologically based risk assessment for nongenotoxic carcinogens.

Expression of neuronal nitric oxide synthase/NADPH-diaphorase during olfactory deafferentation and regeneration.

Inhibition of irritation and contact hypersensitivity by phenoxyacetic acid methyl ester in mice.

Mass psychogenic illness attributed to toxic exposure at a high school.

Early lung malformations in congenital diaphragmatic hernia.

Air bag injury and the dermatologist.

Degeneration and gliosis in rat retina and central nervous system following 3,3'-iminodipropionitrile exposure.

Earthworm egg capsules as vectors for the environmental introduction of biodegradative bacteria.

Toxic action of the herbicide 2,4-D on the neuroepithelial synapse and on the nonstimulated skin of the frog *Caudiverbera caudiverbera*.

Effect of Shimotsu-to (a Kampo medicine, Si-Wu-Tang) and its constituents on triphasic skin reaction in passively sensitized mice.

Pheomelanin as a binding site for drugs and chemicals.

Phototoxicity of quinalphos under sunlight in vitro and in vivo.

Inhibitory mechanisms of glycoprotein fraction derived from *Miscanthus sinensis* for the immediate phase response of an IgE-mediated cutaneous reaction.

Trovafloxacin: an overview.

Early effects of protein kinase modulators on DNA synthesis in rat cerebral cortex.

Central nervous system effects of intranasally administered insulin during euglycemia in men.

Possible role of nitric oxide in IgE-mediated allergic cutaneous reaction in mice.

AP30, a differential protein marker for perilymph and cerebrospinal fluid in middle ear fluid, has been purified and identified as human apolipoprotein D.

Alterations in human B cell calcium homeostasis by polycyclic aromatic hydrocarbons: possible associations with cytochrome P450 metabolism and increased protein tyrosine phosphorylation.

FK-506 and cyclosporin A potentiate the IgE antibody production by contact sensitization with hapten in mice.

Central and peripheral neurotoxic effects of chronic methyl bromide intoxication.

Early life stage toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in zebrafish (*Danio rerio*).

Cytokine gene expression during ontogeny in murine thymus on activation of the aryl hydrocarbon receptor by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effects of Fuller's Earth and activated charcoal on oral absorption of paraquat in rabbits.

Identification of a novel growth-promoting factor with a wide target cell spectrum from various tumor cells as catalase.

Activation of the Ras signaling pathway by the CD40 receptor.

Acute cyanide poisoning: clinical spectrum, diagnosis, and treatment.

Pirenzepine versus scopolamine methyl bromide in double-contrast barium enema study of large bowel.

Type II collagen-induced autoimmune ear disease in mice: a preliminary report on an epitope of the type II collagen molecule that induced inner ear lesions.

TNF-alpha participates in an IgE-mediated cutaneous reaction in mast cell deficient, WBB6F1-W/Wv mice.

Bilateral idiopathic loss of peripheral vestibular function with normal hearing.

Immunologic effects of background prenatal and postnatal exposure to dioxins and polychlorinated biphenyls in Dutch infants.

Reconstitution of the rat olfactory epithelium after methyl bromide-induced lesion.

Dose-response assessment of airborne methyl isothiocyanate (MITC) following a metam sodium spill.

Menière's disease: role of antibodies against basement membrane antigens.

Dentate gyrus and olfactory bulb responses to olfactory and noxious stimulation in urethane anaesthetized rats.

Essential fatty acid preparation (SR-3) raises the seizure threshold in rats.

Early bone matrix formation during distraction. A biochemical study in sheep.

Pentachlorophenol (PCP) inhibits ion transport in the isolated toad cornea.

[Progress on combined traditional Chinese medicine and Western medicine therapy in treating sudden deafness].

Inhibitory effects of alpha- and beta-carotene on croton oil-induced or enzymatic lipid peroxidation and hydroperoxide production in mouse skin epidermis.

Relatively immediate relaxant effects of cholera toxin on isolated rabbit blood vessels.

A comparison of the acute toxicity, neuropathology, and electrophysiology of N,N-diethyl-m-toluamide and N,N-dimethyl-2,2-diphenylacetamide in rats.

Pig ear skin as an in-vitro model for human skin permeability.

Health status and needs of migrant farm workers in the United States: a literature review.

[Neuro-otologic diagnosis after long-term exposure to wood preservatives containing pentachlorophenol].

The epidemiology of Parkinson's disease. A case-control study of young-onset and old-onset patients.

Symptoms among workers with long-term exposure to methyl bromide. An epidemiological study.

On the mechanism of action of interferons: interaction with nonsteroidal anti-inflammatory agents, pentoxifylline (Trental) and cGMP inducers.

Mechanically induced length changes of isolated outer hair cells are metabolically dependent.

Immediate contact reactions to chemicals in the fragrance mix and a study of the quenching action of eugenol.

Histological examination of the temporal bone in medicolegal cases of asphyxia.

Golgi-like demonstration of "dark" neurons with an argyrophil III method for experimental neuropathology.

Sensory neurotoxicology: use of the olfactory system in the assessment of toxicity.

Early appearance of tyrosine hydroxylase immunoreactive cells in the mesencephalon of mouse embryos.

Effect of TCDD on the density of Langerhans cells in murine skin.

The anti-inflammatory effects of phenolic dental medicaments as determined by mouse ear edema assay.

NTP Toxicology and Carcinogenesis Studies of 2,4-Dichlorophenol (CAS No. 120-83-2) in F344/N Rats and B6C3F1 Mice (Feed Studies).

NTP Toxicology and Carcinogenesis Studies of Two Pentachlorophenol Technical-Grade Mixtures (CAS No. 87-86-5) in B6C3F1 Mice (Feed Studies).

Effects of glutaraldehyde and metabolic inhibitors on the vibratory responses in the isolated cochlea.

Early radiotherapy in the treatment of paraquat poisoning.

Induction of antigen-specific IgA-forming cells in the middle ear mucosa.

NTP Toxicology and Carcinogenesis Studies of C.I. Acid Orange 3 (CAS No. 6373-74-6) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Early changes in dermal collagen of mice exposed to chronic UVB irradiation and the effects of a UVB sunscreen.

NTP Toxicology and Carcinogenesis Studies of Monuron (CAS No. 150-68-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

The effect of IgE-mediated mast cell degranulation on the expression of experimental contact sensitivity in the mouse.

The relationship between uncoupling of oxidative phosphorylation and neuronal necrosis within the CNS in rats dosed with trihalogenated imidazoles.

Impaired odor perception in tank cleaners.

Synergistic neurotoxicity of carbon tetrachloride/carbon disulfide (80/20 fumigants) and other pesticides in grain storage workers.

Long refractory period after one application of nonimmunologic contact urticaria agents to the guinea pig ear.

[³¹P-NMR and HPLC studies on the energy metabolism of perfused chondrocytes].

NTP Toxicology and Carcinogenesis Studies of Dimethyl Hydrogen Phosphite (CAS No. 868-85-9) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Glutaraldehyde fixatives for preserving the chick's inner ear.

Allergic hypersensitivity to the herbicide 2,4-D in BALB/c mice.

Failure of Legionella pneumophila sensitivities to predict culture results from disinfectant-treated air-conditioning cooling towers.

A preliminary report on combined traditional Chinese and Western medicine in sensorineural hearing loss. An analysis of 108 cases.

Sodium azide poisoning in five laboratory technicians.

Acnegenic activity of 3-methylcholanthrene and benzo[a]pyrene, and a comparative study with 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rabbit and hairless mouse.

Tetrachloroazobenzene in 3,4-dichloroaniline and its herbicidal derivatives: propanil, diuron, linuron, and neburon.

Early events in herpes simplex virus type 1 infection: photosensitivity of fluorescein isothiocyanate-treated virions.

Early and delayed biochemical effects of paraquat toxicity on rat lung.

Effect of thyrotropin-releasing hormone (TRH) on local cerebral glucose utilization, by the autoradiographic 2-deoxy[14C]glucose method, in conscious and pentobarbitalized rats.

Early bronchiolar damage following paraquat poisoning in mice.

Propanil-chloracne and methomyl toxicity in workers of a pesticide manufacturing plant.

[2,4-D poisoning].

[Syndrome of ophthalmological manifestations caused by a generalized intoxication with defoliant and herbicides].

Movement of IgG receptors on the lymphocyte surface induced by protein A of Staphylococcus aureus.

Table 2A-11 – Titles of Pubmed Records Related to Kidney/Urinary Adverse Events Following Herbicide Exposure

BLADDER; *DIALYSIS*; *HAEMATURIA*; *HEMATURIA*; *HEMOGLOBINURIA*; *KIDNEY*; *LIGURIA*; *MICROHEMATURIA*; *NEPHRI*; *NEPHRO*; *NOCTURNAL HEMOGLOBINURIA*; *PROSTAT*; *PROTEINURIA*; *RENAL DISEASE*; *RENAL TRANSPLANT*; *URINARY* (5613)
--

Impact of pesticides exposure on Archachatina marginata snails in four Cameroon monomodal rainforest sites.

Mitochondrial reactive oxygen species initiate gasdermin D-mediated pyroptosis and contribute to paraquat-induced nephrotoxicity.

Association between urinary glyphosate levels and hand grip strength in a representative sample of US adults: NHANES 2013-2014.

Spatiotemporal Visualization of Paraquat Distribution, Toxicokinetics, and Its Detoxification in Zebrafish Using Matrix-Assisted Laser Desorption Ionization Mass Spectrometry Imaging.

Metabolomic Changes in Rat Serum after Chronic Exposure to Glyphosate-Based Herbicide.

Gestational glyphosate exposure and early childhood neurodevelopment in a Puerto Rico birth cohort.

Ferulic acid grafted into β -cyclodextrin nanospheres ameliorates Paraquat-induced human MRC-5 fibroblast injury.

Analysis of the association between urinary glyphosate exposure and fatty liver index: a study for US adults.

A trinuclear Zn (II) schiff base dicyanamide complex attenuates bacterial biofilm formation by ROS generation and membrane damage and exhibits anticancer activity.

An Updated Evaluation of Atrazine-Cancer Incidence Associations among Pesticide Applicators in the Agricultural Health Study Cohort.

Autophagy mediated FTH1 degradation activates gasdermin E dependent pyroptosis contributing to diquat induced kidney injury.

Association Between Urinary Glyphosate Exposure and Cognitive Impairment in Older Adults from NHANES 2013-2014.

Transient receptor potential ankyrin 1 channels in the bladder mediate low temperature elicited bladder overactivity in rats.

Mid-to-late stage diquat accumulation in the central nervous system: A severe case of oral poisoning.

A Forensic Case of Suicide Ingestion of Paraquat Herbicide: New Histological Insights and Revision of the Literature.

Associations of maternal exposure to 2,4-dichlorophenoxyacetic acid during early pregnancy with steroid hormones among one-month-old infants.

Association of urine glyphosate levels with renal injury biomarkers in children living close to major vegetable-producing regions in China.

Factors influencing occupational exposure to pyrethroids and glyphosate: An analysis of urinary biomarkers in Malaysia, Uganda and the United Kingdom.

A regulatory module comprising G3BP1-FBXL5-IRP2 axis determines sodium arsenite-induced ferroptosis.

The urinary level of 2,4,5-trichlorophenol was positively associated with both all-cause and cause-specific mortalities in general adult residents of United States.

Gut Microbiota and Uremic Retention Solutes in Adults With Moderate CKD: A 6-Day Controlled Feeding Study.

Urinary glyphosate levels and association with mortality in the 2013-16 National Health and Nutrition Examination Survey.

Exposure to polycyclic aromatic hydrocarbons, volatile organic compounds, and tobacco-specific nitrosamines and incidence of esophageal cancer.

Association of pesticide exposure with neurobehavioral outcomes among avocado farmworkers in Mexico.

Hybrid genome assembly of colistin-resistant mcr-1.5-producing Escherichia coli ST354 reveals phylogenomic pattern associated with urinary tract infections in Brazil.

Urinary and household chemical exposures in pet dogs with urothelial cell carcinoma.

Genotoxicity in humans exposed to arsenic, lithium, and boron in drinking water in the Bolivian Andes-A cross sectional study.

Associations of Urinary Total Arsenic and Arsenic Species and Periodontitis.

MAPK/NF- κ B signaling mediates atrazine-induced cardiorenal syndrome and antagonism of lycopene.

The urinary metabolites of volatile organic compounds and asthma in young children: NHANES 2011-2018.

Renoprotective effect of esculetin against ischemic acute kidney injury-diabetic comorbidity.

Mixed-Methods Assessment of Farmworkers' Perceptions of Workplace Compliance with Worker Protection Standards and Implications for Risk Perceptions and Protective Behaviors.

Prenatal current-use pesticide exposure and children's neurodevelopment at one year of age in the Infants' Environmental Health (ISA) birth cohort, Costa Rica.

Analysis of Relationships between Metabolic Changes and Selected Nutrient Intake in Women Environmentally Exposed to Arsenic.

Positive Association of Urinary Dimethylarsinic Acid (DMA(V)) with Serum 25(OH)D in Adults Living in an Area of Water-Borne Arsenicosis in Shanxi, China.

Crocin-loaded Niosomal Nanoparticles Reversing Cytotoxicity and Oxidative Stress in HEK293 Cell Line Exposed to Paraquat: An In vitro Study.

Artificial intelligence application in adsorption of uremic toxins: Towards the eco-friendly design of highly efficient with potential applications as hemodialysis membranes.

Differential Modulatory Effects of Methylmercury (MeHg) on Ahr-regulated Genes in Extrahepatic Tissues of C57BL/6 Mice.

Salvianolic acid A attenuates arsenic-induced ferroptosis and kidney injury via HIF-2 \pm /DUOX1/GPX4 and iron homeostasis.

Association between urinary arsenic concentration and genetic polymorphisms in Korean adults.

Uptake of Fluorescein via a pH-Dependent Monocarboxylate Transporter by Human Kidney 2 (HK-2) Cells.

Ifosfamide-induced nephrotoxicity in oncological patients.

Examination of urinary pesticide concentrations, protective behaviors, and risk perceptions among Latino and Latina farmworkers in Southwestern Idaho.

[Favorable evolution of severe paraquat poisoning. Treatment with gastric lavage, activated charcoal, cyclophosphamide + corticoids, and conventional daily hemodialysis: case study at the Franck Joly Hospital Center in French Guiana].

Self-reported and urinary biomarker-based measures of exposure to glyphosate and mancozeb and sleep problems among smallholder farmers in Uganda.

Association of glyphosate exposure with multiple adverse outcomes and potential mediators.

Impact of Agent Orange Exposure on Non-muscle Invasive Bladder Cancer Outcomes.

Effect of perinatal exposure to glyphosate and its mixture with 2,4-D and dicamba on rat dam kidney and thyroid function and offspring's health.

The novel peptide DR4penA attenuates the bleomycin- and paraquat-induced pulmonary fibrosis by suppressing the TGF- β ²/Smad signaling pathway.

Role of voltage-dependent calcium channels on the striatal in vivo dopamine release induced by the organophosphorus pesticide glyphosate.

Maternal impacts of pre-conceptual glyphosate exposure.

Higher urinary glyphosate exposure is associated with increased risk of liver dysfunction in adults: An analysis of NHANES, 2013-2016.

Groundwater constituents and the incidence of kidney cancer.

2,4-dichlorophenoxyacetic acid (2,4-D) exposure during postnatal development alters the effects of western diet on mouse prostate.

[Study on the occupational exposure limit of glyphosate in the air of workplace].

Assessment of the impact of glyphosate and 2,4-D herbicides on the kidney injury and transcriptome changes in obese mice fed a Western diet.

Dimethylarsinic acid induces bladder carcinogenesis via the amphiregulin pathway.

Association between Glyphosate Exposure and Erythrograms in a Representative Sample of US Adults: NHANES 2013-2014.

Acrolein produced during acute kidney injury promotes tubular cell death.

Urinary glyphosate and AMPA levels in a cross-sectional study of postmenopausal women: Associations with organic eating behavior and dietary intake.

Spatiotemporal variations of 2,4-dichlorophenoxy acetic acid with the role of sugarcane industry and related human health risk assessments in the Shadegan International Wetland.

Maternal pre-conceptual glyphosate exposure impacts the offspring hepatic and ovarian proteome.

Exposure to Agent Orange and Risk of Bladder Cancer Among US Veterans.

Neurotoxic effects of exposure to glyphosate in rat striatum: Effects and mechanisms of action on dopaminergic neurotransmission.

Glyphosate-induced liver and kidney dysfunction, oxidative stress, immunosuppression in Nile tilapia, but ginger showed a protection role.

Prepubertal to adulthood exposure to low doses of glyphosate-based herbicide increases the expression of the Havcr1 (Kim1) biomarker and causes mild kidney alterations.

A mixture of 13 pesticides, contaminants, and food additives below individual NOAELs produces histopathological and organ weight changes in rats.

Prolonged exposure to the herbicide atrazine promotes kidney fibrosis by activating Wnt/ β -catenin signaling in rats.

Glyphosate exposure and urinary oxidative stress biomarkers in the Agricultural Health Study.

Glyphosate exposure and preterm birth: A nested case-control pilot study.

Tannin alleviates glyphosate exposure-induced apoptosis, necrosis and immune dysfunction in hepatic L8824 cell line by inhibiting ROS/PTEN/PI3K/AKT pathway.

Pentachlorophenol causes redox imbalance, inhibition of brush border membrane and metabolic enzymes, DNA damage and histological alterations in rat kidney.

Variability, determinants, and associations with oxidative stress biomarkers of pentachlorophenol among Chinese pregnant women: A longitudinal study.

Synergistic toxicity of ethanol and 2,4-dichlorophenoxyacetic acid enhances oxidant status, DNA damage, inflammation, and apoptosis in rats.

Associations between urinary glyphosate and diabetes mellitus in the US general adult: a cross-sectional study from NHANES 2013-2016.

Subchronic feeding study of glyphosate-tolerant maize GG2 with the gr79-epsps and gat genes in Wistar Han RCC rats.

Study on the therapeutic effect of glucocorticoids on acute kidney injury in rats exposed to diquat.

Single-chemical and mixture effects of multiple volatile organic compounds exposure on liver injury and risk of non-alcoholic fatty liver disease in a representative general adult population.

A review of the characteristic properties of selected tobacco chemicals and their associated etiological risks.

Computational biology and in vitro studies for anticipating cancer-related molecular targets of sweet wormwood (*Artemisia annua*).

Clinical and pathological characteristics of acute kidney injury caused by diquat poisoning.

Soluble thrombomodulin alleviates Diquat-induced acute kidney injury by inhibiting the HMGB1/ α B \pm /NF- κ B signalling pathway.

[Predictive value of serum lactate dehydrogenase on prognosis of patients with paraquat poisoning].

Glyphosate potentiates insulin resistance in skeletal muscle through the modulation of IRS-1/PI3K/Akt mediated mechanisms: An in vivo and in silico analysis.

[A case of delayed peripheral neuropathy caused by diquat poisoning].

Exposure to Volatile Organic Compounds Is Associated with Hypertension in Black Adults: The Jackson Heart Study.

Arsenic metabolism, N6AMT1 and AS3MT single nucleotide polymorphisms, and their interaction on gestational diabetes mellitus in Chinese pregnant women.

Association of Lifetime Exposure to Glyphosate and Aminomethylphosphonic Acid (AMPA) with Liver Inflammation and Metabolic Syndrome at Young Adulthood: Findings from the CHAMACOS Study.

Clinical and pathological characteristics of diquat poisoning-related acute kidney injury.

Urinary Amino Acid-Conjugated Acrolein and Taurine as New Biomarkers for Detection of Dementia.

Arsenic exposure and prevalence of human papillomavirus in the US male population.

Urinary pesticide mixture patterns and exposure determinants in the adult population from the Netherlands and Switzerland: Application of a suspect screening approach.

The Effect of Pesticide Spray Season and Residential Proximity to Agriculture on Glyphosate Exposure among Pregnant People in Southern Idaho, 2021.

A neuroprotective dose of trehalose is harmless to metabolic organs: comprehensive histopathological analysis of liver, pancreas, and kidney.

[A Preliminary Study on the Plasma Metabolomic Profiles of Patients Suffering From Acute Diquat Poisoning].

Online solid phase extraction high-performance liquid chromatography - Isotope dilution - Tandem mass spectrometry quantification of organophosphate pesticides, synthetic pyrethroids, and selected herbicide metabolites in human urine.

Urinary Glyphosate, 2,4-D and DEET Biomarkers in Relation to Neurobehavioral Performance in Ecuadorian Adolescents in the ESPINA Cohort.

Teratogenic effects of the dicamba herbicide in Zebrafish (*Danio rerio*) embryos.

Comparison of urinary mercapturic acid excretions in users of various tobacco/nicotine products.

Global Profiling of Urinary Mercapturic Acids Using Integrated Library-Guided Analysis.

Urinary Glyphosate Concentrations among Pregnant Participants in a Randomized, Crossover Trial of Organic and Conventional Diets.

Increased Levels of the Acrolein Metabolite 3-Hydroxypropyl Mercapturic Acid in the Urine of e-Cigarette Users.

Melatonin ameliorates glyphosate- and hard water-induced renal tubular epithelial cell senescence via PINK1-Parkin-dependent mitophagy.

HPLC-MS/MS determination and the postmortem distribution or postmortem redistribution of paraquat and its metabolites in four fatal intoxication cases.

Associations of arsenic exposure with liver injury in US adults: NHANES 2003-2018.

Glyphosate and Aminomethylphosphonic Acid (AMPA) Modulate Glutathione S-Transferase in Non-Tumorigenic Prostate Cells.

Urine glyphosate exposure and serum sex hormone disruption within the 2013-2014 National Health and Nutrition Examination survey (NHANES).

Urinary pentachlorophenol in general population of central China: reproducibility, predictors, and associations with oxidative stress biomarkers.

Assessment of exposure to pesticide mixtures in five European countries by a harmonized urinary suspect screening approach.

Exposure of children to glyphosate in Morocco: Urinary levels and predictors of exposure.

Urinary concentrations and determinants of glyphosate and glufosinate in pregnant Canadian participants in the MIREC study.

Arsenic exposure induces urinary metabolome disruption in Pakistani male population.

The effect and mechanism of Fushen Granule on gut microbiome in the prevention and treatment of chronic renal failure.

Effect of acupuncture at neck-Jiaji (EX-B 2) and tuina on the cognitive function in the patients with subjective cognitive decline.

Nephroprotective effect of diosmin against sodium arsenite-induced renal toxicity is mediated via attenuation of oxidative stress and inflammation in mice.

Arsenic induces metabolome remodeling in mature human adipocytes.

Association of urinary arsenic, polycyclic aromatic hydrocarbons, and metals with cancers among the female population in the US.

Urinary arsenic metabolism, genetic susceptibility, and their interaction on type 2 diabetes.

Shenqi formula delayed Alzheimer's disease-like symptoms by skn-1 pathway in *Caenorhabditis elegans*.

Remote effects of kidney drug transporter OAT1 on gut microbiome composition and urate homeostasis.

Phloretin as an add-on therapy to losartan attenuates diabetes-induced AKI in rats: A potential therapeutic approach targeting TLR4-induced inflammation.

Incorporating Uremic Solute-mediated Inhibition of OAT1/3 Improves PBPK Prediction of Tenofovir Renal and Systemic Disposition in Patients with Severe Kidney Disease.

SLC22A11 Inserts the Uremic Toxins Indoxyl Sulfate and P-Cresol Sulfate into the Plasma Membrane.

A 90-day feeding study of genetically modified maize LP007-1 in wistar han RCC rats.

Association between maternal use of spray formulations and offspring urological anomalies: The Japan Environment and Children's Study.

p-Cresol Sulfate Is a Sensitive Urinary Marker of Fecal Microbiota Transplantation and Antibiotics Treatments in Human Patients and Mouse Models.

Persistent organic pollutants promote aggressiveness in prostate cancer.

A phenome-wide association study (PheWAS) to identify the health impacts of 4-cresol sulfate in the Nagahama Study.

Arsenic exposure and lung fibrotic changes-evidence from a longitudinal cohort study and experimental models.

Magnesium lithospermate B ameliorates diabetic nephropathy by suppressing the uremic toxin formation mediated by gut microbiota.

Arsenic, polycyclic aromatic hydrocarbons, and metal exposure and risk assessment of stroke.

Untargeted Multiomics Approach Coupling Lipidomics and Metabolomics Profiling Reveals New Insights in Diabetic Retinopathy.

Exposure to p-dichlorobenzene and prevalent endocrine-related reproductive cancers among US women.

Torsemide increases arsenic concentrations by inhibition of multidrug resistance protein 4 in arsenic trioxide treated acute promyelocytic leukemia patients.

Exposure to phenols, chlorophenol pesticides, phthalate and PAHs and mortality risk: A prospective study based on 6 rounds of NHANES.

Awareness and Use of Low-Sodium Salt Substitutes and Its Impact on 24-h Urinary Sodium and Potassium Excretion in China-A Cross-Sectional Study.

Possible Effects of Uremic Toxins p-Cresol, Indoxyl Sulfate, p-Cresyl Sulfate on the Development and Progression of Colon Cancer in Patients with Chronic Renal Failure.

Nephroprotective Effects of Selenium Nanoparticles Against Sodium Arsenite-Induced Damages.

Concomitant inhibition of TLR-4 and SGLT2 by phloretin and empagliflozin prevents diabetes-associated ischemic acute kidney injury.

Biodegradable Hollow Nanoscavengers Restore Liver Functions to Reverse Insulin Resistance in Type 2 Diabetes.

Serum Levels of Indoxyl Sulfate and P-cresol in Type II Diabetic Patients With and Without Nephropathy.

Individual, Independent, and Joint Associations of Toxic Metals and Manganese on Hypertensive Disorders of Pregnancy: Results from the MIREC Canadian Pregnancy Cohort.

Zingerone reduces sodium arsenite-induced nephrotoxicity by regulating oxidative stress, inflammation, apoptosis and histopathological changes.

Endocrine-disrupting chemicals (EDCs) and cancer: new perspectives on an old relationship.

Disruption of mitochondrial function augments the radiosensitivity of prostate cancer cell lines.

Associations of metal mixtures with metabolic-associated fatty liver disease and non-alcoholic fatty liver disease: NHANES 2003-2018.

Assessment of uremic toxins in advanced chronic kidney disease patients on maintenance hemodialysis by LC-ESI-MS/MS.

Rapid and sustainable HPLC method for the determination of uremic toxins in human plasma samples.

Metabolomic Analyses to Identify Candidate Biomarkers of Cystinosis.

Sample preparation and chromatographic methods for the determination of protein-bound uremic retention solutes in human biological samples: An overview.

Prion Protein Overexpression in Adipose-Derived Mesenchymal Stem Cells (ADMSCs) Effectively Protected Rodent Kidney Against Ischemia-Reperfusion Injury Via Enhancing ATP/Mitochondrial Biogenesis-Role of ADMSC Rejuvenation and Proliferation.

[Clinical case report of acute dinitrophenol poisoning with a fatal outcome of Udmurt Republic].

Improved β_2 -Microglobulin and Phosphorous Removal with Expanded Hemodialysis and Online Hemodiafiltration versus High-Flux Hemodialysis: A Cross-Over Randomized Clinical Trial.

Association of the gut microbiome with kidney function and damage in the Hispanic Community Health Study/Study of Latinos (HCHS/SOL).

Metabolic Communication by SGLT2 Inhibition.

Association between 2,4-dichlorophenoxyacetic acid and cognitive impairment in older adults: a cross-sectional study from NHANES 2001-2002 and 2011-2014.

"Cocktail" of environmental chemicals and early reproductive outcomes of IVF: The insight from paternal and maternal exposure.

Association between urinary glyphosate exposure and bone mineral density in adults.

Acute oral poisoning due to pretilachlor herbicide - a rare case report from Nepal.

Erratum: "Urinary Glyphosate, 2,4-D and DEET Biomarkers in Relation to Neurobehavioral Performance in Ecuadorian Adolescents in the ESPINA Cohort".

Effects of glyphosate herbicide ingestion on kidney function in rats on a balanced diet.

Age-dependent changes in the gut microbiota and serum metabolome correlate with renal function and human aging.

Uroprotective Potential of Campesterol in Cyclophosphamide Induced Interstitial Cystitis; Molecular Docking Studies.

Paraquat induced acute kidney and lung injury with a dramatic response to methylprednisolone: A case report.

Characterization of fifteen key genes involved in iron metabolism and their responses to dietary iron sources in yellow catfish *Pelteobagrus fulvidraco*.

Haemorrhagic cystitis: a review of management strategies and emerging treatments.

Effect of replacing inorganic iron with iron-rich microbial preparations on growth performance, serum parameters and iron metabolism of weaned piglets.

An overview of ATP synthase, inhibitors, and their toxicity.

Association between glyphosate exposure and cognitive function, depression, and neurological diseases in a representative sample of US adults: NHANES 2013-2014 analysis.

Microbe-derived uremic solutes enhance thrombosis potential in the host.

DNA Methylation Aberrations in Dimethylarsinic Acid-Induced Bladder Carcinogenesis.

Assessment of glyphosate and its metabolites' residue concentrations in cultured African Catfish offered for sale in selected markets in Ibadan, Oyo State, Nigeria.

High urinary oxidative DNA damage in wild chimpanzees ranging in proximity of agricultural fields in Sebitoli area, Uganda.

Determination of urinary deanol-N-oxide excretion profiles after ingestion of nutritional supplements containing deanol.

Urinary acrolein protein conjugates-to-creatinine ratio is positively associated with diabetic peripheral neuropathy in patients with type 2 diabetes mellitus.

Gut Microbiota and Its Role in the Brain-Gut-Kidney Axis in Hypertension.

Analysis of Human microRNA Expression Profiling During Diquat-Induced Renal Proximal Tubular Epithelial Cell Injury.

A Review on the Role of Phytoconstituents Chrysin on the Protective Effect on Liver and Kidney.

Total analysis system for the determination of uremic toxins in human plasma based on bead injection solid phase extraction hyphenated to mass spectrometry.

Toxicity assessment and DNA repair kinetics in HEK293 cells exposed to environmentally relevant concentrations of Glyphosate (Roundup® Control Max).

Acute paraquat poisoning complicated by acute kidney injury and lung fibrosis: a case report from Nepal.

Parkinson's disease updates: Addressing the pathophysiology, risk factors, genetics, diagnosis, along with the medical and surgical treatment.

Interactions of arsenic exposure, arsenic metabolism with red blood cell folate on the risk of hypertension: NHANES 2007-2016.

Evaluation of Lac and NGAL on the Condition and Prognosis of Patients with Diquat Poisoning.

Ferroptosis contributes to cyclophosphamide-induced hemorrhagic cystitis.

Effect of Intestinal Flora on Hyperuricemia-Induced Chronic Kidney Injury in Type 2 Diabetic Patients and the Therapeutic Mechanism of New Anti-Diabetic Prescription Medications.

[Research on Occupational Poisoning and Biological Monitoring].

Acute diquat poisoning case with multiorgan failure and a literature review: A case report.

Evaluation of the effect of photoplethysmograms on workers' exposure to methyl bromide using second derivative.

Levels of Urinary Mercapturic Acids of Acrolein, Methacrolein, Crotonaldehyde, and Methyl Vinyl Ketone in Relationship to Chronic Obstructive Pulmonary Disease in Cigarette Smokers of the Subpopulations and Intermediate Outcome Measures in COPD Study (SPIROMICS).

Effects of early repeated hemoperfusion combined with hemodialysis on the prognosis of patients with paraquat poisoning.

Stable Isotope Dilution Analysis (SIDA) to Determine Metabolites of Furan and 2-Methylfuran in Human Urine Samples: A Pilot Study.

Chronic Interstitial Nephritis in Agricultural Communities: Observational and Mechanistic Evidence Supporting the Role of Nephrotoxic Agrochemicals.

Association between urinary glyphosate levels and serum neurofilament light chain in a representative sample of US adults: NHANES 2013-2014.

Uro-protective role of chrysin against cyclophosphamide-induced hemorrhagic cystitis in rats involving the turning-off NF- κ B/P38-MAPK, NO/PARP-1 and STAT-3 signaling cascades.

Metformin Overcomes the Consequences of NKX3.1 Loss to Suppress Prostate Cancer Progression.

[8] and [10]-Gingerol reduces urothelial damage in ifosfamide-induced hemorrhagic cystitis via JAK/STAT/FOXO signaling pathway via IL-10.

Microbial metabolite p-cresol inhibits gut hormone expression and regulates small intestinal transit in mice.

Air, Dermal, and Urinary Metabolite Levels of Backpack and Tractor Sprayers Using the Herbicide Acetochlor in Thailand.

Therapeutic effects of avocado (*Persea americana* Mill.) seed powder against reproductive toxicity induced by Mancozeb (herbicide) in female rabbits.

Joint effects of phenol, chlorophenol pesticide, phthalate, and polycyclic aromatic hydrocarbon on bone mineral density: comparison of four statistical models.

Carboxymethylated *Rhizoma alismatis* Polysaccharides Regulate Calcium Oxalate Crystals Growth and Reduce the Regulated Crystals' Cytotoxicity.

Agent Orange exposure and prostate cancer risk in the Million Veteran Program.

Atrazine Toxicity: The Possible Role of Natural Products for Effective Treatment.

Sex-specific effects of prenatal organophosphate ester (OPE) metabolite mixtures and adverse infant birth outcomes in the maternal and developmental risks from environmental and social stressors (MADRES) pregnancy cohort.

Dietary rumen-protected choline supplementation regulates blood biochemical profiles and urinary metabolome and improves growth performance of growing lambs.

In-situ synchrotron imaging, experimental, and computational investigations on the efficiency of *Trametes versicolor* laccase on detoxification of P-Cresyl Sulfate (PCS) Protein Bound Uremic Toxin (PBUT).

In utero arsenic exposure and early childhood motor development in the New Hampshire Birth Cohort Study.

Clinical characteristics of acute kidney injury in patients with glyphosate surfactant herbicide poisoning.

Urinary concentration of phthalates and bisphenol A during minipuberty is associated with reproductive hormone concentrations in infant boys.

Exposure to phthalates and DiNCH among preschool children in Sweden: Urinary metabolite concentrations and predictors of exposure.

Exposure to oxyfluorfen-induced hematobiochemical alterations, oxidative stress, genotoxicity, and disruption of sex hormones in male African catfish and the potential to confront by *Chlorella vulgaris*.

Urine Metabolomic Signature of People Diagnosed with Balkan Endemic Nephropathy and Other Types of Chronic Kidney Disease Compared with Healthy Subjects in Romania.

Enhancing Immune Protection in Hemodialysis Patients: Role of the Polymethyl Methacrylate Membrane.

Pretreatment of ellagic acid protects ifosfamide-induced acute nephrotoxicity in rat kidneys: A mitochondrial, histopathological and oxidative stress approaches.

Berberine ameliorates chronic kidney disease through inhibiting the production of gut-derived uremic toxins in the gut microbiota.

Excretion kinetics of 1,3-dichlorobenzene and its urinary metabolites after controlled airborne exposure in human volunteers.

Serum Level of Protein-Bound Uraemic Toxins in Haemodialysis Patients with Chronic Kidney Disease-Associated Pruritus: Myths and Facts.

Pyruvate kinase M2 modification by a lipid peroxidation byproduct acrolein contributes to kidney fibrosis.

Associations between residential volatile organic compound exposures and liver injury markers: The role of biological sex and race.

A case of severe paraquat poisoning treated by continuous hemodiafiltration without sequelae.

Rural Land Management and Kidney Health.

Urinary excretion of phthalates and the substitutes DINCH and DEHTP in Danish young men and German young adults between 2000 and 2017 - A time trend analysis.

Effects of p-cresol, a uremic toxin, on cancer cells.

Risk of Environmental Chemicals on Bone Fractures Is Independent of Low Bone Mass in US Adults: Insights from 2017 to 2018 NHANES.

Effects of the Vitamin D3 on Alleviating the Oxidative Stress Induced by Diquat in Wenchang Chickens.

Multi-Omics Analyses Reveal the Mechanisms of Early Stage Kidney Toxicity by Diquat.

Pesticide exposure and asthma morbidity in children residing in urban, multi-family housing.

The kidney drug transporter OAT1 regulates gut microbiome-dependent host metabolism.

Selectively mixed matrix hemodialysis membrane for adequate clearance of p-cresol by the incorporation of imprinted zeolite.

Negligible Toxicokinetic Differences of Glyphosate by Different Vehicles in Rats.

The Effect of Sub-chronic Linuron Exposure on Thyroid, Liver, and Kidney Function in Male Wistar Rats.

Ameliorating effect of *Mucuna pruriens* seed extract on sodium arsenite-induced testicular toxicity and hepato-renal histopathology in rats.

Assessment of exposure to volatile organic compounds through urinary concentrations of their metabolites in pet dogs and cats from the United States.

Purification and biochemical characterization of catalase that confers protection against hydrogen peroxide induced by stressful desert environment: the *Camelus Dromedarius* kidney catalase.

Epidemiology and renal injury following 2-methyl-4-chlorophenoxyacetic acid (MCPA) poisoning.

Glyphosate disturbs various epigenetic processes in vitro and in vivo - A mini review.

Signaling pathways involved in paraquat-induced pulmonary toxicity: Molecular mechanisms and potential therapeutic drugs.

Pre-Conceptional Exposure to Glyphosate Affects the Maternal Hepatic and Ovarian Proteome.

Immunosuppressive therapies attenuate paraquat-induced renal dysfunction by suppressing inflammatory responses and lipid peroxidation.

Urinary 2,4-dichlorophenoxyacetic acid in Chinese pregnant women at three trimesters: Variability, exposure characteristics, and association with oxidative stress biomarkers.

Molecular signatures associated with diuron exposure on rat urothelial mitochondria.

The toxicokinetics of acute paraquat poisoning in specific patients: a case series.

Potential Mechanisms Involved in Chronic Kidney Disease of Unclear Etiology.

Cross-sectional and longitudinal associations of acrolein exposure with pulmonary function alteration: Assessing the potential roles of oxidative DNA damage, inflammation, and pulmonary epithelium injury in a general adult population.

Oxidative stress of glyphosate, AMPA and metabolites of pyrethroids and chlorpyrifos pesticides among primary school children in Cyprus.

Melatonin ameliorates renal dysfunction in glyphosate- and hard water-treated mice.

Urinary glyphosate kinetics after occupational exposure.

Effects of exposure to glyphosate on oxidative stress, inflammation, and lung function in maize farmers, Northern Thailand.

The Association Between 2, 4-Dichlorophenoxyacetic Acid and Erectile Dysfunction.

Risk assessment of glyphosate and malathion pollution and their potential impact on *Oreochromis niloticus*: role of organic selenium supplementation.

Isorhapontigenin Modulates SOX9/TOLLIP Expression to Attenuate Cell Apoptosis and Oxidative Stress in Paraquat-Induced Acute Kidney Injury.

Increased acrolein-DNA adducts in buccal brushings of e-cigarette users.

An in vitro strategy using multiple human induced pluripotent stem cell-derived models to assess the toxicity of chemicals: A case study on paraquat.

Acetochlor Affects Bighead Carp (*Aristichthys Nobilis*) by Producing Oxidative Stress, Lowering Tissue Proteins, and Inducing Genotoxicity.

Urinary Levels of Sirtuin-1, Î€-Glutathione S-Transferase, and Mitochondrial DNA in Maize Farmer Occupationally Exposed to Herbicide.

Role of OCT3 and DRP1 in the Transport of Paraquat in Astrocytes: A Mouse Study.

Ameliorative effect of selenium yeast supplementation on the physio-pathological impacts of chronic exposure to glyphosate and or malathion in *Oreochromis niloticus*.

Developmental toxicity of glyphosate on embryo-larval zebrafish (*Danio rerio*).

Endocrine, immune and renal toxicity in male largemouth bass after chronic exposure to glyphosate and Rodeo®.

A review of molecular mechanisms linked to potential renal injury agents in tropical rural farming communities.

Protective effect of *Thymus munbyanus* aqueous extract against 2,4-dichlorophenoxyacetic acid-induced nephrotoxicity in Wistar rats.

Clinicohematological, Mutagenic, and Oxidative Stress Induced by Pendimethalin in Freshwater Fish Bighead Carp (*Hypophthalmichthys nobilis*).

[Dynamic changes of locus coeruleus damage in Parkinson's disease-like mice induced by paraquat].

Paraquat toxicity in different cell types of Swiss albino mice.

Protective effects of antioxidants on striatal dopamine release induced by organophosphorus pesticides.

Acute exposure to paraquat affects the phenotypic differentiation of substantia nigra microglia in rats.

Toxicity of the herbicides used on herbicide-tolerant crops, and societal consequences of their use in France.

Comparative Toxicogenomics of Glyphosate and Roundup Herbicides by Mammalian Stem Cell-Based Genotoxicity Assays and Molecular Profiling in Sprague-Dawley Rats.

Association between increasing agricultural use of 2,4-D and population biomarkers of exposure: findings from the National Health and Nutrition Examination Survey, 2001-2014.

Attenuating effect of *Prosopis cineraria* against paraquat-induced toxicity in prepubertal mice, *Mus musculus*.

Exposure to pesticides and pediatric Wilms' tumor. A meta-analysis on pre-conception and pregnancy parental exposure with an IARC/WHO commentary.

Protective Effects of N-acetylcysteine Niosome Nanoparticles on Paraquat-induced Nephrotoxicity in Male Rats.

Silymarin protects the rats against paraquat-induced acute kidney injury via Nrf2.

In vitro cytotoxicity and genotoxicity of single and combined pesticides used by Bolivian farmers.

Response of the nuclear xenobiotic receptors to alleviate glyphosate-based herbicide-induced nephrotoxicity in weaned piglets.

Urinary glyphosate concentration in pregnant women in relation to length of gestation.

An ecological study regarding the association between paraquat exposure and end stage renal disease.

Lung transplantation in a woman with paraquat poisoning that led to pulmonary fibrosis-Widely reported by the media: A case report.

Case series: Diquat poisoning with acute kidney failure, myocardial damage, and rhabdomyolysis.

Quantitation of DNA Adducts Resulting from Acrolein Exposure and Lipid Peroxidation in Oral Cells of Cigarette Smokers from Three Racial/Ethnic Groups with Differing Risks for Lung Cancer.

DNA Damage and Oxidative Stress of Tobacco Smoke Condensate in Human Bladder Epithelial Cells.

Acrolein plays a culprit role in the pathogenesis of diabetic nephropathy in vitro and in vivo.

Acute diquat poisoning causes rhabdomyolysis.

Arsenic exposure and respiratory outcomes during childhood in the INMA study.

Prediction of mortality and morbidity following paraquat poisoning based on trend of liver and kidney injury.

Total arsenic, dimethylarsinic acid, lead, cadmium, total mercury, methylmercury and hypertension among Asian populations in the United States: NHANES 2011-2018.

Experimental Study on the Mechanism of Cinnamaldehyde Ameliorate Proteinuria Induced by Adriamycin.

Pentachlorophenol exposure in early pregnancy and gestational diabetes mellitus: A nested case-control study.

Protective effect of cinnamaldehyde on channel catfish infected by drug-resistant *Aeromonas hydrophila*.

Cigarette Smoke Containing Acrolein Contributes to Cisplatin Resistance in Human Bladder Cancers through the Regulation of HER2 Pathway or FGFR3 Pathway.

The Cooked Meat Carcinogen 2-Amino-1-methyl-6-phenylimidazo[4,5-b]pyridine Hair Dosimeter, DNA Adductomics Discovery, and Associations with Prostate Cancer Pathology Biomarkers.

Homicidal paraquat poisoning: Poisoned while drinking.

Acute diquat poisoning resulting in toxic encephalopathy: a report of three cases.

Comparison of Biochemical Parameters between Mouse Model and Human after Paraquat Poisoning.

Association of urinary arsenic and sleep disorder in the US population: NHANES 2015-2016.

Urinary acrolein metabolites, systemic inflammation, and blood lipids: Results from the National Health and Nutrition Examination Survey.

Anticancer Effects of Cinnamaldehyde Through Inhibition of ErbB2/HSF1/LDHA Pathway in 5637 Cell Line of Bladder Cancer.

Lessons for the clinical nephrologist: acute kidney injury by a glyphosate-surfactant herbicide.

Cinnamaldehyde attenuates kidney senescence and injury through PI3K/Akt pathway-mediated autophagy via downregulating miR-155.

Contribution of gut bacteria to arsenic metabolism in the first year of life in a prospective birth cohort.

Concentrations of blood and urinary arsenic species and their characteristics in general Korean population.

Interactive effects of high temperature and pesticide exposure on oxidative status, apoptosis, and renin expression in kidney of goldfish: Molecular and cellular mechanisms of widespread kidney damage and renin attenuation.

Peripheral tissular analysis of rapamycin's effect as a neuroprotective agent in vivo.

Self-Emulsifying Drug Delivery System Enhances Tissue Distribution of Cinnamaldehyde by Altering the Properties of the Mucus Layer.

Higher proportion of agricultural land use around the residence is associated with higher urinary concentrations of AMPA, a glyphosate metabolite.

Molecular Mechanisms of Acute Organophosphate Nephrotoxicity.

A clinico-epidemiological Study of acute Self-poisoning by different Types of herbicidal Substances used in agricultural Fields: A Study from Patients admitted in a Tertiary Care Hospital in West Bengal.

Associations of maternal urinary arsenic concentrations during pregnancy with childhood cognitive abilities: The HOME study.

Association of urinary metabolites of non-persistent pesticides with serum sex hormones among the US females: NHANES 2013-2014.

A Deadly Herbicide 'Paraquat Poisoning' and Miserable Death of a 19 Years Boy.

In vitro toxicity of glyphosate in Atlantic salmon evaluated with a 3D hepatocyte-kidney co-culture model.

Association of albumin to creatinine ratio with urinary arsenic and metal exposure: evidence from NHANES 2015-2016.

Impacts of dietary exposure to pesticides on faecal microbiome metabolism in adult twins.

Firefighters' urinary concentrations of VOC metabolites after controlled-residential and training fire responses.

Temporal trend and cross-sectional characterization of urinary concentrations of glyphosate in Japanese children from 2006 to 2015.

Prenatal arsenic exposure, arsenic methylation efficiency, and neuropsychological development among preschool children in a Spanish birth cohort.

Association of Glyphosate Exposure with Blood DNA Methylation in a Cross-Sectional Study of Postmenopausal Women.

The association between urinary glyphosate and aminomethyl phosphonic acid with biomarkers of oxidative stress among pregnant women in the PROTECT birth cohort study.

TRPA1 Channel Activation With Cinnamaldehyde Induces Cutaneous Vasodilation Through NOS, but Not COX and KCa Channel, Mechanisms in Humans.

Probiotic Bifidobacteria Mitigate the Deleterious Effects of para-Cresol in a Drosophila melanogaster Toxicity Model.

Mixed exposure to phenol, parabens, pesticides, and phthalates and insulin resistance in NHANES: A mixture approach.

Nano-formulations in treatment of iron deficiency anaemia: An overview.

Functional analysis of RYR1 variants in patients with confirmed susceptibility to malignant hyperthermia.

Association between trichlorophenols and neurodegenerative diseases: A cross-sectional study from NHANES 2003-2010.

Betaine attenuates sodium arsenite-induced renal dysfunction in rats.

2,4-Dinitrophenol as an Uncoupler Augments the Anthracyclines Toxicity against Prostate Cancer Cells.

Analysis of environmental chemical mixtures and nonalcoholic fatty liver disease: NHANES 1999-2014.

N-myc downstream regulated gene 1 (ndrg1) functions as a molecular switch for cellular adaptation to hypoxia.

Severe methyl bromide poisoning causing early acute renal failure and anuria: a case report.

LC-MS metabolomics of urine reveals distinct profiles for non-muscle-invasive and muscle-invasive bladder cancer.

Urinary organic acids spectra in children with altered gut microbiota composition and autistic spectrum disorder.

Synbiotics, prebiotics and probiotics for solid organ transplant recipients.

Mass Spectrometric Quantitation of N'-Nitrosonornicotine-1N-oxide in the Urine of Cigarette Smokers and Smokeless Tobacco Users.

Enzobiotics-A Novel Therapy for the Elimination of Uremic Toxins in Patients with CKD (EETOX Study): A Multicenter Double-Blind Randomized Controlled Trial.

Correlation of inflammatory biomarkers with the diversity of Bacteroidaceae, Bifidobacteriaceae, Prevotellaceae and Lactobacillaceae families in the intestinal microbiota of patients with end stage renal disease.

Urinary polycyclic aromatic hydrocarbon, arsenic, and metal exposure and correlation with emphysema in smokers.

The Accumulation of Gut Microbiome-derived Indoxyl Sulfate and P-Cresyl Sulfate in Patients With End-stage Renal Disease.

Ameliorative role of inducible nitric oxide synthase inhibitors against sodium arsenite-induced renal and hepatic dysfunction in rats.

Damage of uremic myocardium by p-cresyl sulfate and the ameliorative effect of Klotho by regulating SIRT6 ubiquitination.

Carboxymethylation of Desmodium styracifolium Polysaccharide and Its Repair Effect on Damaged HK-2 Cells.

A Comprehensive Transcriptomic Analysis of Arsenic-Induced Bladder Carcinogenesis.

Removal of Uremic Solutes from Dialysate by Activated Carbon.

Association between environmental toxic metals, arsenic and polycyclic aromatic hydrocarbons and chronic obstructive pulmonary disease in the US adult population.

Arsenic Speciation and Metallomics Profiling of Human Toenails as a Biomarker to Assess Prostate Cancer Cases: Atlantic PATH Cohort Study.

Radiosynthesis and characterization of a carbon-11 PET tracer for receptor-interacting protein kinase 1.

Prevalence of type 2 diabetes mellitus in relation to arsenic exposure and metabolism in Mexican women.

Xanthogranulomatous pyelonephritis in a pediatric patient.

Physiologically-based pharmacokinetic model for 2,4-dinitrophenol.

Sodium arsenite does not affect prostate carcinogenesis in a chemically-hormonally-induced rat model.

A combination of amino-functionalized fibrous silica (KCC-1-NH₂)/effectively and efficiently oxidized graphene oxide (EEO) nanocomposite for dispersive solid-phase extraction, pre-concentration and fluorescence determination of total para-cresol in plasma samples of chronic kidney disease patients.

Feeding cats with chronic kidney disease food supplemented with betaine and prebiotics increases total body mass and reduces uremic toxins.

Comparison of Ferric Sodium EDTA in Combination with Vitamin C, Folic Acid, Copper Gluconate, Zinc Gluconate, and Selenomethionine as Therapeutic Option for Chronic Kidney Disease Patients with Improvement in Inflammatory Status.

[Effect of panlong needling at Jiaji (EX-B 2) on motor dysfunction in patients with Parkinson's disease of liver and kidney deficiency: a randomized controlled trial].

Molecular characterization of the aryl hydrocarbon receptor 2 gene in black rockfish, *Sebastes schlegelii*, and its expression patterns upon exposure to benzo[a]pyrene, 2,3,7,8-tetrachlorodibenzo-p-dioxin, and 1^β-naphthoflavone.

Phage therapy for refractory periapical periodontitis caused by *Enterococcus faecalis* in vitro and in vivo.

Toenail speciation biomarkers in arsenic-related disease: a feasibility study for investigating the association between arsenic exposure and chronic disease.

Reproductive and developmental evaluations of triclopyr acid, triclopyr butoxyethyl ester and triclopyr triethylamine salt in the rat.

Cancer and occupational exposure to pesticides: a bibliometric study of the past 10 years.

Tryptophan Metabolites Regulate Neurotensin 1 Expression in Endothelial Cells.

Epidemiology of hospitalizations due to pesticide intoxication-associated acute kidney injury in China.

Oral iron supplementation in patients with chronic kidney disease: Can it be harmful to the gut microbiota?

p-Cresyl Sulfate Predicts Ischemic Stroke among Patients on Hemodialysis: A Prospective Cohort Study.

A randomized double-blind cross-over trial to study the effects of resistant starch prebiotic in chronic kidney disease (ReSPECKD).

Measurement of Urinary Triclocarban and 2,4-Dichlorophenol Concentration and Their Relationship with Obesity and Predictors of Cardiovascular Diseases among Children and Adolescents in Kerman, Iran.

Impact of Uremic Toxins on Endothelial Dysfunction in Chronic Kidney Disease: A Systematic Review.

Development and Characterization of Curcumin-Silver Nanoparticles as a Promising Formulation to Test on Human Pterygium-Derived Keratinocytes.

Novel intestinal dialysis interventions and microbiome modulation to control uremia.

Gut mobilization improves behavioral symptoms and modulates urinary p-cresol in chronically constipated autistic children: A prospective study.

Gut Microbiome-Dependent Metabolic Pathways and Risk of Lethal Prostate Cancer: Prospective Analysis of a PLCO Cancer Screening Trial Cohort.

Biotic Supplements in Patients With Chronic Kidney Disease: Meta-Analysis of Randomized Controlled Trials.

Toluene: correlation between occupational exposure limits and biological exposure indices.

Acrolein-inducing ferroptosis contributes to impaired peripheral neurogenesis in zebrafish.

Effects of Pesticide Intake on Gut Microbiota and Metabolites in Healthy Adults.

Rare fatal poisoning through dermal exposure to paraquat.

Early life organophosphate ester exposures and bone health at age 12 years: The Health Outcomes and Measures of the Environment (HOME) Study.

Incorporating zeolitic-imidazolate framework-8 nanoparticles into kidney scaffolds: a first step towards innovative renal therapies.

Quercetin Zinc and Iron Metal Complexes Protect against Sodium Arsenite Intoxication in the Hepato-Renal System of Wistar Rats via the Oxidative Stress Pathway.

Ethnicity Associated Microbial and Metabonomic Profiling in Newly Diagnosed Ulcerative Colitis.

Effects of various Fe compounds on the bioavailability of Pb contained in orally ingested soils in mice: Mechanistic insights and health implications.

Urinary volatile organic compound metabolites and reduced lung function in U.S. adults.

Estimated daily intake of phthalates, parabens, and bisphenol A in hospitalised very low birth weight infants.

The modulation of gut microbiota by herbal medicine to alleviate diabetic kidney disease - A review.

Characterization of Urinary Pesticide Metabolite Concentrations of Pregnant Women in Suriname.

Reliable determination of the main metabolites of 2-phenoxyethanol in human blood and urine using LC-MS/MS analysis.

Epigallocatechin-3-Gallate Decreases Plasma and Urinary Levels of p-Cresol by Modulating Gut Microbiota in Mice.

Effect of water diuresis with hydrogen saturation on the course of acute kidney damage during the separation of oxidation and phosphorylation.

Microbiome alterations from volatile organic compounds (VOC) exposures among workers in salons primarily serving women of color.

Drug transporters OAT1 and OAT3 have specific effects on multiple organs and gut microbiome as revealed by contextualized metabolic network reconstructions.

Chemical Composition and Cytotoxic Activity of Extracts from *Carpesium divaricatum*: In Vitro- versus Field-Grown Plants.

The Role of Acrolein in Neurodegenerative Diseases and Its Protective Strategy.

Protective efficacy of *Coriandrum sativum* seeds against arsenic induced toxicity in Swiss albino mice.

The involvement of branched-chain amino acids (BCAAs) in aromatic trihalogenated DBP exposure-induced kidney damage in mice.

The efficacy of hemodialysis on paraquat poisoning mortality: A systematic review and meta-analysis.

Altered gut microbiota and gut-derived p-cresyl sulfate serum levels in peritoneal dialysis patients.

In Vitro Induction of Eryptosis by Uremic Toxins and Inflammation Mediators in Healthy Red Blood Cells.

The Significance of Estimated Glomerular Filtration Rate for Predicting Mortality in Glyphosate Herbicide-Intoxicated Patients: A Single-Center, Retrospective Observational Study.

Beta-glucan effects on 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) toxicity in liver and brain.

Efficacy of Oral Versus Injectable Iron in Patients With Chronic Kidney Disease: A Two-Year Cross-Sectional Study Conducted at a Rural Teaching Hospital.

Diquat Herbicide Organophosphate Poisoning and Multi-Organ Failure: A Case Report.

The Effects of Resistant Starch Consumption in Adult Patients With Chronic Kidney Disease: A Systematic Review.

Research on the Relationship between Exposure to Dioxins and Cancer Incidence in Vietnam.

Paraquat induced oxidative stress, DNA damage, and cytotoxicity in lymphocytes.

Cytomegalovirus-related Cystitis in a Patient with Membranous Glomerulonephritis Receiving Cyclophosphamide: A Case Study.

Disinfection byproducts in chlorinated or brominated swimming pools and spas: Role of brominated DBPs and association with mutagenicity.

Red propolis reduces inflammation in cyclophosphamide-induced hemorrhagic cystitis in rats.

A glyphosate-based herbicide disrupted hematopoiesis and induced organ toxicities, ameliorated by vitamin B(12) in a mouse model.

Use of in vitro metabolism and biokinetics assays to refine predicted in vivo and in vitro internal exposure to the cosmetic ingredient, phenoxyethanol, for use in risk assessment.

Exposure to Contemporary and Emerging Chemicals in Commerce among Pregnant Women in the United States: The Environmental influences on Child Health Outcome (ECHO) Program.

Clinical characteristics, treatment and outcomes of acute propanil poisoning in a 7-year retrospective cohort study.

Novel Imidazole Phenoxyacetic Acids as Inhibitors of USP30 for Neuroprotection Implication via the Ubiquitin-Rho-110 Fluorometric Assay: Design, Synthesis, and In Silico and Biochemical Assays.

Pesticide exposure in New Zealand school-aged children: Urinary concentrations of biomarkers and assessment of determinants.

Tea polyphenols alleviates acetochlor-induced apoptosis and necroptosis via ROS/MAPK/NF- κ B signaling in Ctenopharyngodon idellus kidney cells.

Prediction of tissue and urine concentrations of 2-phenoxyethanol and its metabolite 2-phenoxyacetic acid in rat and human after oral and dermal exposures via GastroPlus(TM) physiologically based pharmacokinetic modelling.

Associations of total urinary arsenic with total cholesterol and high-density lipoprotein among 12-17-year-old participants from the 2009-2016 NHANES cycles: A cross-sectional study.

Effects of perinatal exposure to endocrine-disrupting chemicals on the reproductive system of F3 generation male rodents: a meta-analysis.

Health Risk Assessment of Ortho-Toluidine Utilising Human Biomonitoring Data of Workers and the General Population.

Randomized Crossover Trial Evaluating Detoxification of Tobacco Carcinogens by Broccoli Seed and Sprout Extract in Current Smokers.

Environmental induced transgenerational inheritance impacts systems epigenetics in disease etiology.

Thunbergia laurifolia aqueous leaf extract ameliorates paraquat-induced kidney injury by regulating NADPH oxidase in rats.

Kidney and lung injury in rats following acute diquat exposure.

Association of urinary triclosan, methyl triclosan, triclocarban, and 2,4-dichlorophenol levels with anthropometric and demographic parameters in children and adolescents in 2020 (case study: Kerman, Iran).

Catheter-associated urinary tract infections in adult intensive care units at a selected tertiary hospital, Addis Ababa, Ethiopia.

Exposure and Risk Assessment of Second- and Third-Hand Tobacco Smoke Using Urinary Cotinine Levels in South Korea.

Lead acetate versus cadmium sulfate in the modulation of main physiological pathways controlling detrusor muscle contractility in rat.

Significant Correlations between p-Cresol Sulfate and Mycophenolic Acid Plasma Concentrations in Adult Kidney Transplant Recipients.

Concentration of current-use pesticides in frogs from the Pampa region and correlation of a mixture toxicity index with biological effects.

Morphological and Molecular Description of a New Species *Haematoloechus dehradunensis* sp. nov. (Plagiorchidae: Haematoloechinae) from the Lungs of *Euphlyctis cyanophlyctis* (Anura, Dicroglossidae) from Dehradun, along with a Note on *H. singaporensis* Yuen, 1962, a New Record to India.

Effects of the L-tyrosine-derived bacterial metabolite p-cresol on colonic and peripheral cells.

Role of ACSL4 in the chemical-induced cell death in human proximal tubule epithelial HK-2 cells.

Diet and food type affect urinary pesticide residue excretion profiles in healthy individuals: results of a randomized controlled dietary intervention trial.

Geographical distribution of dioxins, cadmium, and mercury concentrations in reindeer liver, kidneys, and muscle in the Russian Far North.

Liver-specific decrease in *Tff3* gene expression in infant mice perinatally exposed to 2,3,7,8-tetrabromodibenzofuran or 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Alkaline Diuresis as Treatment for 2,4-D Dimethylamine Herbicide Intoxication.

Exposome of attention deficit hyperactivity disorder in Taiwanese children: exploring risks of endocrine-disrupting chemicals.

Repeated Low-Dose Acrolein Triggers Irreversible Lamina Propria Edema in Urinary Bladder, Transient Voiding Behavior and Widening of Eyes to Mechanical Stimuli.

Acute exposition to Roundup Transorb® induces systemic oxidative stress and alterations in the expression of newly sequenced genes in silverside fish (*Odontesthes humensis*).

Vitamin D(3) Protects Mice from Diquat-Induced Oxidative Stress through the NF- κ B/Nrf2/HO-1 Signaling Pathway.

Exposure to glyphosate and tetrachlorvinphos induces cytotoxicity and global DNA methylation in human cells.

Prenatal exposure to organophosphate and pyrethroid insecticides and the herbicide 2,4-dichlorophenoxyacetic acid and size at birth in urban pregnant women.

Global transcriptome profiling reveals antagonizing response of head kidney of juvenile common carp exposed to glyphosate.

Glyphosate and Polyoxyethyleneamine Ingestion Leading to Renal, Hepatic, and Pulmonary Failure.

Risk Assessment of Glyphosate Exposures from Pilot Study with Simulated Heavy Residential Consumer Application of Roundup® using a Margin of Safety (MOS) Approach.

Overexpression of TOLLIP Protects against Acute Kidney Injury after Paraquat Intoxication through Inhibiting NLRP3 Inflammasome Activation Modulated by Toll-Like Receptor 2/4 Signaling.

Low-Dose Acrolein, an Endogenous and Exogenous Toxic Molecule, Inhibits Glucose Transport via an Inhibition of Akt-Regulated GLUT4 Signaling in Skeletal Muscle Cells.

Glucocorticoid with cyclophosphamide for oral paraquat poisoning.

AQP2 as a target of lycopene protects against atrazine-induced renal ionic homeostasis disturbance.

Isorhynchophylline ameliorates paraquat-induced acute kidney injury by attenuating oxidative stress and mitochondrial damage via regulating toll-interacting expression.

Urinary excretion of herbicide co-formulants after oral exposure to roundup MON 52276 in rats.

Prognostic value of liver and kidney function parameters and their correlation with the ratio of urine-to-plasma paraquat in patients with paraquat poisoning.

Prenatal Exposure to Glyphosate and Its Environmental Degradate, Aminomethylphosphonic Acid (AMPA), and Preterm Birth: A Nested Case-Control Study in the PROTECT Cohort (Puerto Rico).

Growth performance and reproductive function impairment of glyphosate-based herbicide in male guinea pig (*Cavia porcellus*).

Urinary microRNAs as non-invasive biomarkers for toxic acute kidney injury in humans.

Paraquat pharmacokinetics in primates and extrapolation to humans.

Modulation of BAG3 expression in human normal urothelial cells by Diuron.

Occupational Paraquat and Glyphosate Exposure May Decline Renal Functions among Rural Farming Communities in Sri Lanka.

Effect of Occupational Exposure to Herbicides on Oxidative Stress in Sprayers.

2,4-Dichlorophenoxyacetic acid induced hepatic and renal toxicological perturbations in rat model: Attenuation by selenium supplementation.

Evaluation of the potential teratogenic and toxic effect of the herbicide 2,4-D (DMA[®] 806) in bullfrog embryos and tadpoles (*Lithobates catesbeianus*).

Paraquat Inhalation, a Translationally Relevant Route of Exposure: Disposition to the Brain and Male-Specific Olfactory Impairment in Mice.

Low-dose exposure of glyphosate-based herbicides disrupt the urine metabolome and its interaction with gut microbiota.

The agrochemical S-metolachlor disrupts molecular mediators and morphology of the swim bladder: Implications for locomotor activity in zebrafish (*Danio rerio*).

Melatonin alleviates the deterioration of oocytes and hormonal disorders from mice subjected to glyphosate.

Profiling and fingerprinting strategies to assess exposure of edible plants to herbicides.

Cholemic Nephrosis: An Autopsy Study of a Forgotten Entity.

Chitosan microparticles as entrapment system for trans- cinnamaldehyde: Synthesis, drug loading, and in vitro cytotoxicity evaluation.

Life-threatening triclopyr poisoning due to diethylene glycol monoethyl ether solvent.

Research on the Mechanism of Guizhi to Treat Nephrotic Syndrome Based on Network Pharmacology and Molecular Docking Technology.

Exposure to 2,4-dichlorophenol, 2,4,6-trichlorophenol, pentachlorophenol and risk of thyroid cancer: a case-control study in China.

Reduced Acrolein Detoxification in akr1a1a Zebrafish Mutants Causes Impaired Insulin Receptor Signaling and Microvascular Alterations.

Urinary arsenic and heart disease mortality in NHANES 2003-2014.

The relationship between chronic arsenic exposure and body measures among US adults: National Health and Nutrition Examination Survey 2009-2016.

Association between pesticide exposure and colorectal cancer risk and incidence: A systematic review.

The Stage at Presentation and Oncologic Outcomes for Agent Orange Exposed and Non-Exposed United States Veterans Diagnosed With Prostate Cancer.

High-dose diquat poisoning: a case report.

Pilot study on the urinary excretion of the glyphosate metabolite aminomethylphosphonic acid and breast cancer risk: The Multiethnic Cohort study.

Urinary total arsenic and arsenic methylation capacity in pregnancy and gestational diabetes mellitus: A case-control study.

Effect and Safety of Cinnamaldehyde on Immunosuppressed Mice with Invasive Pulmonary Candidiasis.

[Progress in the study of pulmonary fibrosis signaling pathways caused by paraquat poisoning].

Polyamine biomarkers as indicators of human disease.

Urinary Levels of the Acrolein Conjugates of Carnosine Are Associated with Cardiovascular Disease Risk.

Gallic acid exerts anti-inflammatory, anti-oxidative stress, and nephroprotective effects against paraquat-induced renal injury in male rats.

Absorption, Distribution, Metabolism, and Excretion of a New Herbicide, Epyrifenacil, in Rats.

Epigenome-wide association study for glyphosate induced transgenerational sperm DNA methylation and histone retention epigenetic biomarkers for disease.

Involvement of mitochondrial fission in renal tubular pyroptosis in mice exposed to high and environmental levels of glyphosate combined with hard water.

Maternal urinary levels of glyphosate during pregnancy and anogenital distance in newborns in a US multicenter pregnancy cohort.

Metribuzin-induced non-adverse liver changes result in rodent-specific non-adverse thyroid effects via uridine 5'-diphospho-glucuronosyltransferase (UDPGT, UGT) modulation.

Exposure to volatile organic compounds - acrolein, 1,3-butadiene, and crotonaldehyde - is associated with vascular dysfunction.

Arsenic Exposure, Arsenic Metabolism, and Glycemia: Results from a Clinical Population in New York City.

Dietary intake and urinary excretion of methylated arsenicals of Japanese adults consuming marine foods and rice.

Urinary concentrations of 2,4-D in repeated samples from 0-7 year old healthy children in central and south China.

Associations between blood arsenic and urinary arsenic species concentrations as an exposure characterization tool.

Cardioprotective and nephroprotective effects of Quercetin against different toxic agents.

Chrysin attenuates sodium arsenite-induced nephrotoxicity in rats by suppressing oxidative stress and inflammation.

The Binding of Aripiprazole to Plasma Proteins in Chronic Renal Failure Patients.

Gut Microbiota and Their Derived Metabolites, a Search for Potential Targets to Limit Accumulation of Protein-Bound Uremic Toxins in Chronic Kidney Disease.

Potential role of dietary chitosan nanoparticles against immunosuppression, inflammation, oxidative stress, and histopathological alterations induced by pendimethalin toxicity in Nile tilapia.

Impaired Tubular Secretion of Organic Solutes in Advanced Chronic Kidney Disease.

DNA Damage and Expression Profile of Genes Associated with Nephrotoxicity Induced by Butralin and Ameliorating Effect of Arabic Gum in Female Rats.

Ameliorative role of rolipram, PDE-4 inhibitor, against sodium arsenite-induced vascular dementia in rats.

Joint effect of urinary arsenic species and serum one-carbon metabolism nutrients on gestational diabetes mellitus: A cross-sectional study of Chinese pregnant women.

The protective effect of Xanthoceras sorbifolia Bunge husks on cognitive disorder based on metabolomics and gut microbiota analysis.

Passage Number-Induced Replicative Senescence Modulates the Endothelial Cell Response to Protein-Bound Uremic Toxins.

Human prostate epithelial cells and prostate-derived stem cells malignantly transformed in vitro with sodium arsenite show impaired Toll like receptor -3 (TLR3)-associated anti-tumor pathway.

Sphingolipid imbalance and inflammatory effects induced by uremic toxins in heart and kidney cells are reversed by dihydroceramide desaturase 1 inhibition.

Effects of prebiotic oligofructose-enriched inulin on gut-derived uremic toxins and disease progression in rats with adenine-induced chronic kidney disease.

The protein-bound uremic toxin p-cresyl-sulfate promotes intracellular ROS production and lipid peroxidation in 3T3-L1 adipose cells.

Prenatal exposure to arsenic and lung function in children from the New Hampshire Birth Cohort Study.

Protein-Bound Uremic Toxins Lowering Effect of Sevelamer in Pre-Dialysis Chronic Kidney Disease Patients with Hyperphosphatemia: A Randomized Controlled Trial.

The consequences of altered microbiota in immune-related chronic kidney disease.

Effect of renal impairment on arsenic accumulation, methylation capacity, and safety in acute promyelocytic leukemia (APL) patients treated with arsenic trioxide.

Relationship between acute kidney injury and mortality in poisoning - a systematic review and meta-analysis.

Uremic endothelial-derived extracellular vesicles: Mechanisms of formation and their role in cell adhesion, cell migration, inflammation, and oxidative stress.

Evaluation of Salivary Indoxyl Sulfate with Proteinuria for Predicting Graft Deterioration in Kidney Transplant Recipients.

In Vitro and Clinical Pharmacokinetic Studies of the Effects of Iron-containing Agents on Vadadustat, an Oral Hypoxia-inducible Factor-Prolyl Hydroxylase Inhibitor.

Overexpression of miR-19a and miR-20a in iPS-MSCs preserves renal function of chronic kidney disease with acute ischaemia-reperfusion injury in rat.

Association Between Kidney Clearance of Secretory Solutes and Cardiovascular Events: The Chronic Renal Insufficiency Cohort (CRIC) Study.

Circulating p-Cresyl Sulfate, Non-Hepatic Alkaline Phosphatase and Risk of Bone Fracture Events in Chronic Kidney Disease-Mineral Bone Disease.

Skeletal myopathy in CKD: a comparison of adenine-induced nephropathy and 5/6 nephrectomy models in mice.

Gallic acid ameliorates sodium arsenite-induced renal and hepatic toxicity in rats.

Unconjugated p-cresol activates macrophage macropinocytosis leading to increased LDL uptake.

Urinary Volatilomics Unveils a Candidate Biomarker Panel for Noninvasive Detection of Clear Cell Renal Cell Carcinoma.

Detrimental effects of 6 months exposure to very low doses of a mixture of six pesticides associated with chronic vitamin deficiency on rats.

Can curcumin supplementation reduce plasma levels of gut-derived uremic toxins in hemodialysis patients? A pilot randomized, double-blind, controlled study.

[Risk factors associated with acute kidney injury caused by pesticide poisoning].

Associations among total p-cresylsulfate, indoxyl sulfate and hippuric acid levels with hemodialysis quality indicators in maintenance hemodialysis patients.

Klebsiella pneumoniae carbapenemase (KPC) in urinary infection isolates.

Dietary Strategies for Management of Metabolic Syndrome: Role of Gut Microbiota Metabolites.

Circulating short and medium chain fatty acids are associated with normoalbuminuria in type 1 diabetes of long duration.

Coenzyme Q(10) protected against arsenite and enhanced the capacity of 2,3-dimercaptosuccinic acid to ameliorate arsenite-induced toxicity in mice.

Ferric carboxymaltose vs. ferrous sulfate for the treatment of anemia in advanced chronic kidney disease: an observational retrospective study and cost analysis.

2,4-Dinitrophenol overdose - Everything old is new again.

Role of aryl hydrocarbon receptor (AHR) in overall retinoid metabolism: Response comparisons to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure between wild-type and AHR knockout mice.

Thrombolome and Its Emerging Role in Chronic Kidney Diseases.

The Role of Gut Bacterial Metabolites in Brain Development, Aging and Disease.

The relationship of indoxyl sulfate and p-cresyl sulfate with target cardiovascular proteins in hemodialysis patients.

Proportionate mortality study of unionized maintenance of way railroad workers.

pH-Dependent Protein Binding Properties of Uremic Toxins In Vitro.

A Positive Relationship between Exposure to Heavy Metals and Development of Chronic Diseases: A Case Study from Chile.

Predicting changes in renal metabolism after compound exposure with a genome-scale metabolic model.

Arsenite suppresses IL-2-dependent tumoricidal activities of natural killer cells.

Ameliorative role of bosentan, an endothelin receptor antagonist, against sodium arsenite-induced renal dysfunction in rats.

Inorganic arsenic-mediated upregulation of AS3MT promotes proliferation of nonsmall cell lung cancer cells by regulating cell cycle genes.

Uraemic toxins impair skeletal muscle regeneration by inhibiting myoblast proliferation, reducing myogenic differentiation, and promoting muscular fibrosis.

Toxin-Related Acute Kidney Injury.

Protein-Bound Uremic Toxins and Immunity.

Reno-Hepatoprotective and Antidiabetic Properties of Methanol Leaf Extract of *Laportea Aestuans* in Wistar Rats.

Effects of Uremic Toxins on the Binding of Aripiprazole to Human Serum Albumin.

P-cresol and Indoxyl Sulfate Impair Osteogenic Differentiation by Triggering Mesenchymal Stem Cell Senescence.

Arsenic metabolism differs between child and adult patients during acute arsenic poisoning.

A rat subchronic study transcriptional point of departure estimates a carcinogenicity study apical point of departure.

Effects of Probiotic Preparations on Inflammatory Cytokines in Chronic Kidney Disease Patients: A Systematic Review and Meta-Analysis.

TriTACs, a Novel Class of T-Cell-Engaging Protein Constructs Designed for the Treatment of Solid Tumors.

Prenatal exposure to glycol ethers and visual contrast sensitivity in 6-year-old children in the PELAGIE mother-child cohort.

Association of urinary chlorophenols with central obesity in Korean girls.

Differences in exposure to toxic and/or carcinogenic volatile organic compounds between Black and White cigarette smokers.

Associations Between Residential Exposure to Volatile Organic Compounds and Liver Injury Markers.

Water-soluble polycarbodiimides and their cytotoxic and antifungal properties.

Inhibitory effect of pirfenidone on pulmonary fibrosis in patients with acute paraquat poisoning.

Exposure to acetochlor impairs swim bladder formation, induces heat shock protein expression, and promotes locomotor activity in zebrafish (*Danio rerio*) larvae.

Urinary metabolites of multiple volatile organic compounds among general population in Wuhan, central China: Inter-day reproducibility, seasonal difference, and their associations with oxidative stress biomarkers.

Development and Validation of an LC-MS-MS Method for the Quantification of Cyanate in Rat Plasma and Its Application to Toxicokinetic Bioanalysis.

Could Mesna and Celery Seed Cotherapy Modulate Oxidative Stress and Inflammation of the Urinary Bladder Induced by Ifosfamide in Rabbits?

Paraquat-induced acute kidney and liver injury: Case report of a survivor from Bangladesh.

Seasonal Urinary Levels of Glyphosate in Children From Agricultural Communities.

Paraquat Poisoning Associated With Daisley Barton Syndrome: A Case Report.

Provision of folic acid for reducing arsenic toxicity in arsenic-exposed children and adults.

Short-Chain Fatty Acids Alleviate Hepatocyte Apoptosis Induced by Gut-Derived Protein-Bound Uremic Toxins.

The correlation between the level of 3-hydroxypropyl mercapturic acid, CYP2B6 polymorphisms, and hematuria occurrences after cyclophosphamide administration and its bioanalytical methods: A systematic review.

Low-Dose Cyclophosphamide Induces Nerve Injury and Functional Overactivity in the Urinary Bladder of Rats.

Absence of prostacyclin greatly relieves cyclophosphamide-induced cystitis and bladder pain in mice.

Dilated Cardiomyopathy Associated with Paraquat Herbicide Poisoning.

The AST-120 Recovers Uremic Toxin-Induced Cognitive Deficit via NLRP3 Inflammasome Pathway in Astrocytes and Microglia.

Rapid Glomerulotubular Nephritis as an Initial Presentation of a Lethal Diquat Ingestion.

Sugarcane Workweek Study: Risk Factors for Daily Changes in Creatinine.

Effect of Dietary Inulin Supplementation on the Gut Microbiota Composition and Derived Metabolites of Individuals Undergoing Hemodialysis: A Pilot Study.

Contribution of diet and other factors for urinary concentrations of total arsenic and arsenic species: data for US children, adolescents, and adults.

Perinatal Resveratrol Therapy to Dioxin-Exposed Dams Prevents the Programming of Hypertension in Adult Rat Offspring.

Characterization of human sulfotransferases catalyzing the formation of p-cresol sulfate and identification of mefenamic acid as a potent metabolism inhibitor and potential therapeutic agent for detoxification.

P2X7 Receptor Blockade Protects Against Acrolein-Induced Bladder Damage: A Potential New Therapeutic Approach for the Treatment of Bladder Inflammatory Diseases.

Fine particulate matter air pollution and aortic perivascular adipose tissue: Oxidative stress, leptin, and vascular dysfunction.

Personal exposure assessment of pesticides in residents: The association between hand wipes and urinary biomarkers.

Pesticide use and kidney function among farmers in the Biomarkers of Exposure and Effect in Agriculture study.

Trends in concentrations of selected dioxins and furans across various stages of kidney function for US adults.

Can kissing cause paraquat poisoning: A case report and review of literature.

Independent and combined associations of urinary heavy metals exposure and serum sex hormones among adults in NHANES 2013-2016.

Determination of Pendimethalin Dynamic Residual Distribution in Crucian Carp Tissues and Associated Risk Assessment.

A mechanism linking perinatal 2,3,7,8 tetrachlorodibenzo-p-dioxin exposure to lower urinary tract dysfunction in adulthood.

Metagenomic and phytochemical analyses of kefir water and its subchronic toxicity study in BALB/c mice.

Protective and therapeutic effect of hydrogen sulfide on hemorrhagic cystitis and testis dysfunction induced with cyclophosphamide.

In Vitro Selection of Probiotics, Prebiotics, and Antioxidants to Develop an Innovative Synbiotic (NatuREN G) and Testing Its Effect in Reducing Uremic Toxins in Fecal Batches from CKD Patients.

Endocrine, metabolic and apical effects of in utero and lactational exposure to non-dioxin-like 2,2',3,4,4',5,5'-heptachlorobiphenyl (PCB 180): A postnatal follow-up study in rats.

Pharmacokinetics of 2-phenoxyethanol and its major metabolite, phenoxyacetic acid, after dermal and inhaled routes of exposure: application to development PBPK model in rats.

Antibiotic exposure decreases soil arsenic oral bioavailability in mice by disrupting ileal microbiota and metabolic profile.

Ablation of Selenbp1 Alters Lipid Metabolism via the Ppar α Pathway in Mouse Kidney.

Role of Fucoidan on the Growth Behavior and Blood Metabolites and Toxic Effects of Atrazine in Nile Tilapia *Oreochromis niloticus* (Linnaeus, 1758).

Distribution and toxicity of persistent organic pollutants and methoxylated polybrominated diphenylethers in different tissues of the green turtle *Chelonia mydas*.

Contamination of Foods from Cameroon with Residues of 20 Halogenated Pesticides, and Health Risk of Adult Human Dietary Exposure.

2,3,7,8-Tetrachlorodibenzo-p-dioxin exposure disrupts development of the visceral and ocular vasculature.

Urinary arsenic species and methylation efficiency during pregnancy: Concentrations and associated factors in Spanish pregnant women.

Measurement of urinary pesticide biomarkers among Latina farmworkers in southwestern Idaho.

Uremic Toxins in Organ Crosstalk.

Ethanol extract of *Vitellaria paradoxa* (Gaertn, F) leaves protects against sodium arsenite - induced toxicity in male wistar rats.

Paraquat poisoning in Andaman and Nicobar Islands - Government must intervene.

Physical activity, body mass index and arsenic metabolism among Mexican women.

Experimental acute arsenic toxicity in Balb/c mice: organic markers and splenic involvement.

Bach1 plays an important role in angiogenesis through regulation of oxidative stress.

Antioxidant effects of *Emblica officinalis* and *Zingiber officinalis* on arsenic and lead induced toxicity on Albino rats.

Simultaneous Determination of Multiple Reactive Carbonyl Species in High Fat Diet-Induced Metabolic Disordered Mice and the Inhibitory Effects of Rosemary on Carbonyl Stress.

2,4-Dichlorophenoxyacetic Acid Poisoning Mimicking as Organophosphorus Poisoning.

Arsenic-induced HER2 promotes proliferation, migration and angiogenesis of bladder epithelial cells via activation of multiple signaling pathways in vitro and in vivo.

Acute Changes in Thyroid Hormone Levels among Thai Pesticide Sprayers.

Urinary glyphosate biomonitoring of sprayers in vegetable farm in Thailand.

Short-term metabolic disruptions in urine of mouse models following exposure to low doses of oxygen ion radiation.

Liquid Biopsies in a Veteran Patient Population With Advanced Prostate and Lung Non-Small Cell Carcinomas: A New Paradigm and Unique Challenge in Personalized Medicine.

Renal tubular injury induced by glyphosate combined with hard water: the role of cytosolic phospholipase A2.

Synthesis and toxicity profile in 293 human embryonic kidney cells of the 12 D-glucuronide derivatives of ortho-, meta- and para-cresol.

Heart Rate Variability Analysis in Workers Exposed to Methyl Bromide as a Quarantine Treatment.

Transgenerational disease specific epigenetic sperm biomarkers after ancestral exposure to dioxin.

Epigenome-wide association study for atrazine induced transgenerational DNA methylation and histone retention sperm epigenetic biomarkers for disease.

Renal tubular injury by glyphosate-based herbicide.

Cellular injury leading to oxidative stress in acute poisoning with potassium permanganate/oxalic acid, paraquat, and glyphosate surfactant herbicide.

Reduction by, ligand exchange among, and covalent binding to glutathione and cellular thiols link metabolism and disposition of dietary arsenic species with toxicity.

Kidney developmental effects of metal-herbicide mixtures: Implications for chronic kidney disease of unknown etiology.

Urinary crystal formation and urothelial effects of pyroxasulfone administered to male rats.

Toxicological impacts of herbicide paraquat dichloride on histological profile (gills, liver, and kidney) of freshwater fish *Channa punctatus* (Bloch).

Ovarian mitochondrial and oxidative stress proteins are altered by glyphosate exposure in mice.

Determination of arsenicals in mouse tissues after simulated exposure to arsenic from rice for sixteen weeks and the effects on histopathological features.

Systemic Paraquat Intoxication Presenting with Peripheral Ulcerative Keratitis: A Case Report and Literature Review.

A Pilot Study to Assess Inhalation Exposures among Sugarcane Workers in Guatemala: Implications for Chronic Kidney Disease of Unknown Origin.

AhR-activating pesticides increase the bovine ABCG2 efflux activity in MDCKII-bABCG2 cells.

Effect of zinc supplementation on chronic hepatorenal toxicity following oral exposure to glyphosate-based herbicide (Bushfire[®]) in rats.

[Treatment of "hydration therapy" for acute paraquat poisoning].

[Study on the protective effect and mechanism of somatostatin on renal injury in paraquat intoxicated mice].

Investigation of simple, objective, and effective indicators for predicting acute paraquat poisoning outcomes.

Cytogenotoxic effect of propanil using the *Lens culinaris* Med and *Allium cepa* L test.

Sub-acute toxicological and behavioural effects of two candidate therapeutics, cinnamaldehyde and eugenol, for treatment of ESBL producing-quinolone resistant pathogenic Enterobacteriaceae.

Transgenerational epigenetic effects from male exposure to endocrine-disrupting compounds: a systematic review on research in mammals.

Acrolein contributes to urothelial carcinomas in patients with chronic kidney disease.

Environmentally relevant mixture of S-metolachlor and its two metabolites affects thyroid metabolism in zebrafish embryos.

Correlation between neutrophil gelatinase-associated lipocalin and soluble CD14 subtype on the prognosis evaluation of acute paraquat poisoning patients.

Metabolic profiles in the course of the shikimic acid pathway of *Raphanus sativus* var. *longipinnatus* exposed to mesotrione and its degradation products.

Antioxidant and Anti-Inflammatory Effects of Different Zinc Sources on Diquat-Induced Oxidant Stress in a Piglet Model.

Roundup-induced biochemical and histopathological changes in the liver and kidney of rats: the ameliorative effects of *Linum usitatissimum* oil.

Association of urinary metabolites of organophosphate and pyrethroid insecticides, and phenoxy herbicides with endometriosis.

[The assessment value of urinary NGAL combined with blood NLR in the early prognosis of patients with acute paraquat poisoning].

A comprehensive analysis of the animal carcinogenicity data for glyphosate from chronic exposure rodent carcinogenicity studies.

Toxicology of paraquat and pharmacology of the protective effect of 5-hydroxy-1-methylhydantoin on lung injury caused by paraquat based on metabolomics.

Fetal outcomes after intentional ingestion of paraquat: A case report.

DNA damage in kidney and parenchymal and non-parenchymal liver cells of adult Wistar rats after subchronic oral treatment with tembotrione.

An LC-MS/MS method for creatine and creatinine analysis in paraquat-intoxicated patients.

Magnesium supplementation ameliorates toxic effects of 2,4-dichlorophenoxyacetic acid in rat model.

Protective Effects of Cinnamaldehyde against Mesenteric Ischemia-Reperfusion-Induced Lung and Liver Injuries in Rats.

Anti-hypertensive effect of hydrogen peroxide acting centrally.

Cinnamaldehyde induces endogenous apoptosis of the prostate cancer-associated fibroblasts via interfering the Glutathione-associated mitochondria function.

The modulatory effects of cinnamaldehyde on uric acid level and IL-6/JAK1/STAT3 signaling as a promising therapeutic strategy against benign prostatic hyperplasia.

Cinnamaldehyde Treatment of Prostate Cancer-Associated Fibroblasts Prevents Their Inhibitory Effect on T Cells Through Toll-Like Receptor 4.

Combination of Quercetin, Hirudin and Cinnamaldehyde Promotes Schwann Cell Differentiation and Myelination against High Glucose by Inhibiting ERK Signaling Pathway.

MiADMSA ameliorate arsenic induced urinary bladder carcinogenesis in vivo and in vitro.

Hypoxia modifies the response to flutamide and linuron in male three-spined stickleback (*Gasterosteus aculeatus*).

Quantification of 3-Hydroxypropyl Mercapturic Acid in the Urine of Patients with Breast Cancer to Monitor Cyclophosphamide Toxicity.

Cystitis-Related Bladder Pain Involves ATP-Dependent HMGB1 Release from Macrophages and Its Downstream H(2)S/Ca(v)3.2 Signaling in Mice.

Cinnamaldehyde Ameliorates Vascular Dysfunction in Diabetic Mice by Activating Nrf2.

Lethal diquat poisoning manifesting as central pontine myelinolysis and acute kidney injury: A case report and literature review.

Occupational Pesticide Use and Risk of Renal Cell Carcinoma in the Agricultural Health Study.

Weak acidic stable carbazate modified cellulose membranes target for scavenging carbonylated proteins in hemodialysis.

Glyphosate exposures and kidney injury biomarkers in infants and young children.

Acrolein is involved in ischemic stroke-induced neurotoxicity through spermidine/spermine-N1-acetyltransferase activation.

Trapping Acrolein by Theophylline/Caffeine and Their Metabolites from Green Tea and Coffee in Mice and Humans.

A retrospective analysis reveals a predictor of survival for the patient with paraquat intoxication.

Organic diet intervention significantly reduces urinary glyphosate levels in U.S. children and adults.

Children exposure to inorganic and organic arsenic metabolites: A cohort study in Northeast Italy.

As3MT and GST Polymorphisms Influencing Arsenic Metabolism in Human Exposure to Drinking Groundwater.

Pilot study evaluating inhalation and dermal glyphosate exposure resulting from simulated heavy residential consumer application of Roundup®.

Meta-analysis of the efficacy of Xuebijing combined with hemoperfusion in treating paraquat poisoning.

Concentration Distribution and Analysis of Urinary Glyphosate and Its Metabolites in Occupationally Exposed Workers in Eastern China.

2,4-D exposure and urinary markers of oxidative DNA damage and lipid peroxidation: a longitudinal study.

Epigenetic effects of low-level sodium arsenite exposure on human liver HepaRG cells.

An LC-MS/MS analytical method for the determination of uremic toxins in patients with end-stage renal disease.

Anti-Tumor Effects of Sodium Meta-Arsenite in Glioblastoma Cells with Higher Akt Activities.

Effects of Fecal Microbiota Transplantation on Composition in Mice with CKD.

Randomized, Placebo-Controlled Trial of Rifaximin Therapy for Lowering Gut-Derived Cardiovascular Toxins and Inflammation in CKD.

Nephroprotective effects of chlorogenic acid against sodium arsenite-induced oxidative stress, inflammation, and apoptosis.

Thymoquinone protection against 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin induced nephrotoxicity in rats.

Serum indoxyl sulfate concentrations associate with progression of chronic kidney disease in children.

Knockdown of CK2 β reduces P-cresol-induced fibrosis in human renal proximal tubule epithelial cells via the downregulation of profilin-1.

[Omphalomesenteric fistulas; epidemiological diagnostic and therapeutic features: study of four cases in the Department of Pediatric Surgery at the Aristide Le Dantec University Hospital in Dakar].

Interactions of arsenic metabolism with arsenic exposure and individual factors on diabetes occurrence: Baseline findings from Arsenic and Non-Communicable disease cohort (AsNCD) in China.

Serum concentrations of pesticides including organophosphates, pyrethroids and neonicotinoids in a population with osteoarthritis in Saudi Arabia.

A metabolomics approach to investigate urine levels of neurotransmitters and related metabolites in autistic children.

p-Cresol Sulfate Caused Behavior Disorders and Neurodegeneration in Mice with Unilateral Nephrectomy Involving Oxidative Stress and Neuroinflammation.

Effect of Ferric Citrate versus Ferrous Sulfate on Iron and Phosphate Parameters in Patients with Iron Deficiency and CKD: A Randomized Trial.

Association of Serum Indoxyl Sulfate Levels with Skeletal Muscle Mass and Strength in Chronic Hemodialysis Patients: A 2-year Longitudinal Analysis.

Influence of Resveratrol on the Cardiovascular Health Effects of Chronic Kidney Disease.

Impaired Tubular Secretion of Organic Solutes in Acute Kidney Injury.

Effect of sucroferic oxyhydroxide on gastrointestinal microbiome and uremic toxins in patients with chronic kidney disease undergoing hemodialysis.

Longitudinal metabolic and gut bacterial profiling of pregnant women with previous bariatric surgery.

Pdgfr β -Cre mediated knockout of the aryl hydrocarbon receptor protects mice from high-fat diet induced obesity and hepatic steatosis.

Melatonin Suppresses Renal Cortical Fibrosis by Inhibiting Cytoskeleton Reorganization and Mitochondrial Dysfunction through Regulation of miR-4516.

Scavenging Intracellular ROS Attenuates p-Cresyl Sulfate-Triggered Osteogenesis through MAPK Signaling Pathway and NF- κ B Activation in Human Arterial Smooth Muscle Cells.

Role of endothelial microvesicles released by p-cresol on endothelial dysfunction.

Uremic Toxins and Vascular Dysfunction.

Therapeutic Targeting of Aristolochic Acid Induced Uremic Toxin Retention, SMAD 2/3 and JNK/ERK Pathways in Tubulointerstitial Fibrosis: Nephroprotective Role of Propolis in Chronic Kidney Disease.

Gut microbiota generation of protein-bound uremic toxins and related metabolites is not altered at different stages of chronic kidney disease.

Effects of the oral adsorbent AST-120 on fecal p-cresol and indole levels and on the gut microbiota composition.

Chronic Kidney Disease-Associated Immune Dysfunctions: Impact of Protein-Bound Uremic Retention Solutes on Immune Cells.

Quantification of microbiota-related phenols and aromatic acids in mouse feces of a diabetic nephropathy model by simultaneous BDAPE derivatization using ultra-performance liquid chromatography-tandem mass spectrometry.

Transgenerational epigenetic and transcriptomic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure in rat.

Inorganic arsenic methylation capacity and breast cancer by immunohistochemical subtypes in northern Mexican women.

A murine model of *Staphylococcus aureus* infected chronic diabetic wound: A new tool to develop alternative therapeutics.

Inulin-type fructan intervention restricts the increase in gut microbiome-generated indole in patients with peritoneal dialysis: a randomized crossover study.

Urine metabolomic analysis in clear cell and papillary renal cell carcinoma: A pilot study.

Mitigation of aflatoxin B1- and sodium arsenite-induced cytotoxicities in HUC-PC urinary bladder cells by curcumin and *Khaya senegalensis*.

Gut-Derived Metabolites and Their Role in Immune Dysfunction in Chronic Kidney Disease.

A combination of monosodium glutamate and high-fat and high-fructose diets increases the risk of kidney injury, gut dysbiosis and host-microbial co-metabolism.

Lactobacillus salivarius BP121 prevents cisplatin-induced acute kidney injury by inhibition of uremic toxins such as indoxyl sulfate and p-cresol sulfate via alleviating dysbiosis.

Association between prenatal arsenic exposure, birth outcomes, and pregnancy complications: An observational study within the National Children's Study cohort.

Isolation and Quantification of Uremic Toxin Precursor-Generating Gut Bacteria in Chronic Kidney Disease Patients.

Pesticide exposure and risk of aggressive prostate cancer among private pesticide applicators.

Nucleation and kinetics of SOD1 aggregation in human cells for ALS1.

Temporal and tissue-specific activation of aryl hydrocarbon receptor in discrete mouse models of kidney disease.

PCB126 blocks the thermogenic beiging response of adipocytes.

CharXgen-Activated Bamboo Charcoal Encapsulated in Sodium Alginate Microsphere as the Absorbent of Uremic Toxins to Retard Kidney Function Deterioration.

Improving the clearance of protein-bound uremic toxins using cationic liposomes as an adsorbent in dialysate.

Prenatal exposure to glycol ethers and response inhibition in 6-year-old children: The PELAGIE cohort study.

Higher cerebrospinal fluid to plasma ratio of p-cresol sulfate and indoxyl sulfate in patients with Parkinson's disease.

P-Cresylsulfate, the Protein-Bound Uremic Toxin, Increased Endothelial Permeability Partly Mediated by Src-Induced Phosphorylation of VE-Cadherin.

Molecular and Cellular Mechanisms that Induce Arterial Calcification by Indoxyl Sulfate and P-Cresyl Sulfate.

Multiple distinct pathways lead to hyperubiquitylated insoluble TDP-43 protein independent of its translocation into stress granules.

High-throughput sequencing analysis of intestinal flora changes in ESRD and CKD patients.

In vivo acute toxicity and anti-gastric evaluation of a novel dichloro Schiff base: Bax and HSP70 alteration.

Gut Microbiota as Diagnostic Tools for Mirroring Disease Progression and Circulating Nephrotoxin Levels in Chronic Kidney Disease: Discovery and Validation Study.

Transfusion-Free Cranial Vault Remodeling: A Novel, Multifaceted Approach.

Relation between in utero arsenic exposure and growth during the first year of life in a New Hampshire pregnancy cohort.

Preliminary evaluation of fecal fatty acid concentrations in cats with chronic kidney disease and correlation with indoxyl sulfate and p-cresol sulfate.

Bowel Habits and the Association With Uremic Toxins in Non-Dialysis-Dependent Chronic Kidney Disease Patients.

Prostate Cancer Screening Guidelines for African American Veterans: A New Perspective.

Distribution and Determinants of Chronic Kidney Disease of Unknown Etiology: A Brief Overview.

Pesticide exposure among Bolivian farmers: associations between worker protection and exposure biomarkers.

Uremic toxins promote accumulation of oxidized protein and increased sensitivity to hydrogen peroxide in endothelial cells by impairing the autophagic flux.

Cyclophosphamide-induced cystitis results in NLRP3-mediated inflammation in the hippocampus and symptoms of depression in rats.

Skeletal toxicity resulting from exposure of growing male rats to coplanar PCB 126 is associated with disruption of calcium homeostasis and the GH-IGF-1 axis and direct effects on bone formation.

Biomonitoring of non-persistent pesticides in urine from lactating mothers: Exposure and risk assessment.

Changes in urinary excretion of phthalates, phthalate substitutes, bisphenols and other polychlorinated and phenolic substances in young Danish men; 2009-2017.

Cytotoxicity and Oxidative Stress Responses of Imidacloprid and Glyphosate in Human Prostate Epithelial WPM-Y.1 Cell Line.

A Case of Paraquat Poisoning Presenting With Spontaneous Pneumothorax and Pneumomediastinum.

The Effect of Radium-223 Therapy in Agent Orange-Related Prostate Carcinoma.

Analysis of urinary VOCs using mass spectrometric methods to diagnose cancer: A review.

Urinary levels of the acrolein conjugates of carnosine are associated with inhaled toxicants.

Multi-sites polycyclodextrin adsorbents for removal of protein-bound uremic toxins combining with hemodialysis.

Outcome of Canine Multicentric Lymphoma after Single or Divided Treatment with Cyclophosphamide in Multidrug Chemotherapy.

Tissue- and Region-Specific Accumulation of Arsenic Species, Especially in the Brain of Mice, After Long-term Arsenite Exposure in Drinking Water.

Aspirin Eugenol Ester Attenuates Paraquat-Induced Hepatotoxicity by Inhibiting Oxidative Stress.

Effects of oral exposure to arsenite on arsenic metabolism and transport in rat kidney.

Association of dietary intake and urinary excretion of inorganic arsenic in the Japanese subjects.

In Vitro Detoxification Studies of p-Cresol by Intestinal Bacteria Isolated from Human Feces.

Effects of curcumin, D-pinitol alone or in combination in cytotoxicity induced by arsenic in PC12 cells.

Functional analysis of newly identified RYR1 variants in patients susceptible to malignant hyperthermia.

Urinary biomonitoring of subjects with different smoking habits. Part II: an untargeted metabolomic approach and the comparison with the targeted measurement of mercapturic acids.

Predictors of Urinary Pyrethroid and Organophosphate Compound Concentrations among Healthy Pregnant Women in New York.

Yolk Sac of Zebrafish Embryos as Backpack for Chemicals?

Development of an ELISA for Measurement of Urinary 3-Hydroxypropyl Mercapturic Acid (3-HPMA), the Marker of Stroke.

Varying Protein Levels Influence Metabolomics and the Gut Microbiome in Healthy Adult Dogs.

Negative effect of methyl bromide fumigation work on the central nervous system.

Protective effect of Mucuna pruriens against arsenic-induced liver and kidney dysfunction and neurobehavioral alterations in rats.

P-cresyl sulfate causes mitochondrial hyperfusion in H9C2 cardiomyoblasts.

Net release and uptake of xenometabolites across intestinal, hepatic, muscle, and renal tissue beds in healthy conscious pigs.

Assessment of the absorbed dose after exposure to surgical smoke in an operating room.

Microbiota-derived uremic retention solutes: perpetrators of altered nonrenal drug clearance in kidney disease.

Probiotic Supplementation in Chronic Kidney Disease: A Double-blind, Randomized, Placebo-controlled Trial.

Bifunctional aptasensor based on novel two-dimensional nanocomposite of MoS₂ quantum dots and g-C₃N₄ nanosheets decorated with chitosan-stabilized Au nanoparticles for selectively detecting prostate specific antigen.

Arsenic exposure, profiles of urinary arsenic species, and polymorphism effects of glutathione-S-transferase and metallothioneins.

Pesticide-Poisoned Patients: Can They Be Used as Potential Organ Donors?

2,6-Dihydroxybenzaldehyde Analogues of the Iron Chelator Salicylaldehyde Isonicotinoyl Hydrazone: Increased Hydrolytic Stability and Cytoprotective Activity against Oxidative Stress.

Metabolism and disposition of arsenic species from controlled dosing with sodium arsenite in adult female CD-1 mice. III. Toxicokinetic studies following oral and intravenous administration.

Acute stimulatory effect of tumor necrosis factor on the basolateral 50 pS K channels in the thick ascending limb of the rat kidney.

The effect of prenatal exposure on disposition of hexachloronaphthalene in female Wistar rats and fetal compartment.

Environmental phenols and parabens in adipose tissue from hospitalized adults in Southern Spain.

Supplementation of Short-Chain Fatty Acid, Sodium Propionate, in Patients on Maintenance Hemodialysis: Beneficial Effects on Inflammatory Parameters and Gut-Derived Uremic Toxins, A Pilot Study (PLAN Study).

Pioglitazone Protects Mesenchymal Stem Cells against P-Cresol-Induced Mitochondrial Dysfunction via Up-Regulation of PINK-1.

Pseudomelanosis intestini "from pylorus to jejunum:" A rare endoscopic finding in a patient with GI bleeding.

Early-life stress induces motor coordination dysfunction in adult mice.

Toxicity assessment of agrochemical Almix in *Heteropneustes fossilis* through histopathological alterations.

Effects of Prebiotic Fiber Xylooligosaccharide in Adenine-Induced Nephropathy in Mice.

Aldehydes are the predominant forces inducing DNA damage and inhibiting DNA repair in tobacco smoke carcinogenesis.

Long noncoding RNA MANTIS relieved the protein-bound uremic toxin-induced injury on human umbilical vein endothelial cells in chronic kidney disease and end-stage renal disease.

Advanced data mining approaches in the assessment of urinary concentrations of bisphenols, chlorophenols, parabens and benzophenones in Brazilian children and their association to DNA damage.

A cross-sectional study of general cognitive abilities among Uruguayan school children with low-level arsenic exposure, potential effect modification by methylation capacity and dietary folate.

Arsenic methylation capacity in relation to nutrient intake and genetic polymorphisms in one-carbon metabolism.

Exposure and risk assessment to arsenic species in Spanish children using biomonitoring.

Melatonin Rescues Mesenchymal Stem Cells from Senescence Induced by the Uremic Toxin p-Cresol via Inhibiting mTOR-Dependent Autophagy.

Effects of grazing different ergovaline concentrations on vasoactivity of bovine lateral saphenous vein.

Urinary metabolites of volatile organic compounds of infants in the neonatal intensive care unit.

Protein-bounded uremic toxin p-cresylsulfate induces vascular permeability alternations.

Hyperbaric oxygen as a treatment modality in cyclophosphamide-induced hemorrhagic cystitis.

Berberine protects the liver and kidney against functional disorders and histological damages induced by ferrous sulfate.

Human biomonitoring reference values for some non-persistent chemicals in blood and urine derived from the Canadian Health Measures Survey 2009-2013.

A Review of Environmental Occurrence, Fate, Exposure, and Toxicity of Benzothiazoles.

sEcad and EGF Levels Increased in Urine of Non-ferrous Metal Workers and Medium of Uroepithelial Cell Line Treated by Arsenic.

Dietary cyanogen exposure and early child neurodevelopment: An observational study from the Democratic Republic of Congo.

Within-Day, Between-Day, and Between-Week Variability of Urinary Concentrations of Phenol Biomarkers in Pregnant Women.

Urinary p-cresol diagnosis using nanocomposite of ZnO/MoS₂ and molecular imprinted polymer on optical fiber based lossy mode resonance sensor.

Effect of activated charcoal hemoperfusion on renal function in patients with paraquat poisoning.

Bisphenol A is an exogenous toxin that promotes mitochondrial injury and death in tubular cells.

Phenyl sulfate, indoxyl sulfate and p-cresyl sulfate decrease glutathione level to render cells vulnerable to oxidative stress in renal tubular cells.

Dioxin Exposure in the Manufacture of Pesticide Production as a Risk Factor for Death from Prostate Cancer: A Meta-analysis.

Electronic cigarette-generated aldehydes: The contribution of e-liquid components to their formation and the use of urinary aldehyde metabolites as biomarkers of exposure.

[Polymorphisms of the Arsenite Methyltransferase (As3MT) gene and urinary efficiency of arsenic metabolism in a population in northern Mexico].

Improving risk stratification among veterans diagnosed with prostate cancer: impact of the 17-gene prostate score assay.

Neighborhood Factors and Urinary Metabolites of Nicotine, Phthalates, and Dichlorobenzene.

Metabolism and disposition of arsenic species from controlled oral dosing with sodium arsenite in adult female CD-1 mice. I. Pilot study to determine dosing, analytical measurements, and sampling strategies.

Comparison of questionnaire-based estimation of pesticide residue intake from fruits and vegetables with urinary concentrations of pesticide biomarkers.

Cytogenetic damage in peripheral blood lymphocytes of children exposed to pesticides in agricultural areas of the department of Cordoba, Colombia.

Tissue metabolic changes for effects of pirfenidone in rats of acute paraquat poisoning by GC-MS.

Mixture Toxicity of Bensulfuron-Methyl and Acetochlor to Red Swamp Crayfish (*Procambarus clarkii*): Behavioral, Morphological and Histological Effects.

A review of Agent Orange and its associated oncologic risk of genitourinary cancers.

Exploring exposure to Agent Orange and increased mortality due to bladder cancer.

Exposure of frogs and tadpoles to chiral herbicide fenoxaprop-ethyl.

Effects of co-exposure to atrazine and ethanol on the oxidative damage of kidney and liver in Wistar rats.

A new machine-learning method to prognosticate paraquat poisoned patients by combining coagulation, liver, and kidney indices.

Lack of immunotoxic effects of repeated exposure to atrazine associated with the adaptation of adrenal gland activation.

Atrazine induced epigenetic transgenerational inheritance of disease, lean phenotype and sperm epimutation pathology biomarkers.

[Effects of small RNA interference targeting mammalian target of rapamycin on paraquat-induced pulmonary fibrosis in rats].

Toxicity of two classes of arsenolipids and their water-soluble metabolites in human differentiated neurons.

Adult and child urinary 2,4-D in cities with and without cosmetic pesticide bylaws: a population-based cross-sectional pilot study.

Exposure assessment using human biomonitoring for glyphosate and fluoxypyr users in amenity horticulture.

Efficacy of *Spirulina platensis* diet supplements on disease resistance and immune-related gene expression in *Cyprinus carpio* L. exposed to herbicide atrazine.

Respiratory Effects and Systemic Stress Response Following Acute Acrolein Inhalation in Rats.

Comparative toxic responses of male and female lizards (*Eremias argus*) exposed to (S)-metolachlor-contaminated soil.

Biomarkers of Chronic Acrolein Inhalation Exposure in Mice: Implications for Tobacco Product-Induced Toxicity.

[Study of the effect of occupational exposure to glyphosate on hepatorenal function].

Metabolic profiling of goldfish (*Carassius auratus*) after long-term glyphosate-based herbicide exposure.

Experimental study of sucralfate intervention for paraquat poisoning in rats.

Toxicity of clomazone and its formulations to zebrafish embryos (*Danio rerio*).

[Intervention of edaravone against renal injury induced by acute paraquat poisoning in rats].

Reduced expression of selective immune-related genes in silver catfish (*Rhamdia quelen*) monocytes exposed to atrazine.

The association of cancer risks with pentachlorophenol exposure: Focusing on community population in the areas along certain section of Yangtze River in China.

Sodium chlorate, a major water disinfection byproduct, alters brush border membrane enzymes, carbohydrate metabolism and impairs antioxidant system of Wistar rat intestine.

Fluazifop- p-butyl, an aryloxyphenoxypropionate herbicide, diminishes renal and hepatic functions and triggers testicular oxidative stress in orally exposed rats.

Nephrotoxicity-induced proteinuria increases biomarker diagnostic thresholds in acute kidney injury.

Effects of Glyphosate-Based Herbicide Sub-Lethal Concentrations on Fish Feeding Behavior.

[Unexplored Chemical Reactions of Endogenous Acrolein: Detection, Toxicity, and Biological Roles].

Protective Effect of Ellagic Acid on Paraquat-induced Kidney Hazards in Rats.

A longitudinal study of atrazine and 2,4-D exposure and oxidative stress markers among Iowa corn farmers.

Effects of oral administration of 2,4-dichlorophenoxyacetic acid (2,4-D) on reproductive parameters in male Wistar rats.

Pentachlorophenol affected both reproductive and interrenal systems: In silico and in vivo evidence.

Beneficial Effects of the Amino Acid Glycine.

An investigation of the health effects caused by exposure to arsenic from drinking water and coal combustion: arsenic exposure and metabolism.

Acrolein Scavenger Hydralazine Prevents Streptozotocin-Induced Painful Diabetic Neuropathy and Spinal Neuroinflammation in Rats.

Carbenoxolone inhibits TRPV4 channel-initiated oxidative urothelial injury and ameliorates cyclophosphamide-induced bladder dysfunction.

The relationships between arsenic methylation and both skin lesions and hypertension caused by chronic exposure to arsenic in drinking water.

NLRP3 inflammasome activation regulated by NF- κ B and DAPK contributed to paraquat-induced acute kidney injury.

Computational study involving identification of endocrine disrupting potential of herbicides: Its implication in TDS and cancer progression in CRPC patients.

Oral supplementation of trans-cinnamaldehyde reduces uropathogenic *Escherichia coli* colonization in a mouse model.

Cold adaptive thermogenesis following consumption of certain pungent spice principles: A validation study.

Unusual arsenic metabolism in Giant Pandas.

[Protective effect of 5-aminosalicylic acid on the kidney of paraquat poisoning rats by Nrf2-ARE signal pathway].

Iron and Zinc Supplementation Does Not Impact Urinary Arsenic Excretion in Mexican School Children.

Effects of pentachlorophenol on the quail (*Coturnix japonica*) liver detoxification pathway.

A drastic superoxide-dependent oxidative stress is prerequisite for the down-regulation of IRP1: Insights from studies on SOD1-deficient mice and macrophages treated with paraquat.

Metabolic parameters and oxidative balance in juvenile *Rhamdia quelen* exposed to rice paddy herbicides: Roundup®®, Primoleo®®, and Facet®®.

Urinary Concentrations of Insecticide and Herbicide Metabolites among Pregnant Women in Rural Ghana: A Pilot Study.

Impact of the Oral Adsorbent AST-120 on Organ-Specific Accumulation of Uremic Toxins: LC-MS/MS and MS Imaging Techniques.

Diverse pathways of epithelial mesenchymal transition related with cancer progression and metastasis and potential effects of endocrine disrupting chemicals on epithelial mesenchymal transition process.

Environmental estrogen-like endocrine disrupting chemicals and breast cancer.

Association of 2,4-dichlorophenol urinary concentrations and olfactory dysfunction in a national sample of middle-aged and older U.S. adults.

p-cresol sulfate and indoxyl sulfate: some clouds are gathering in the uremic toxin sky.

2,3,7,8-Tetrachlorodibenzo-p-dioxin influences bovine herpesvirus 1 replication through upregulation of SIRT3 and cytoskeletal reorganization.

p-Cresyl glucuronide is a major metabolite of p-cresol in mouse: in contrast to p-cresyl sulphate, p-cresyl glucuronide fails to promote insulin resistance.

Distribution of arsenic and oxidative stress in mice after rice ingestion.

Neuropsychological effects of occupational exposure to polychlorinated biphenyls.

Genetic susceptibility to breast cancer risk associated with inorganic arsenic exposure.

Case-control study of chronic low-level exposure of inorganic arsenic species and non-melanoma skin cancer.

Results of the HEMO Study suggest that p-cresol sulfate and indoxyl sulfate are not associated with cardiovascular outcomes.

Sodium chloride pica causing recurrent nephrolithiasis in a patient with iron deficiency anemia: a case report.

Microbiome perturbation by oral vancomycin reduces plasma concentration of two gut-derived uremic solutes, indoxyl sulfate and p-cresyl sulfate, in end-stage renal disease.

The relationship between dioxins exposure and risk of prostate cancer with steroid hormone and age in Vietnamese men.

Effect of a Short-Course Treatment with Synbiotics on Plasma p-Cresol Concentration in Kidney Transplant Recipients.

The anti-migraine component of butterbur extracts, isopetasin, desensitizes peptidergic nociceptors by acting on TRPA1 cation channel.

Obstacles to reducing plasma levels of uremic solutes by hemodialysis.

Antimicrobial agents, triclosan, chloroxylenol, methylisothiazolinone and borax, used in cleaning had genotoxic and histopathologic effects on rainbow trout.

Changes in Serum Adiponectin in Mice Chronically Exposed to Inorganic Arsenic in Drinking Water.

Metabolic inhibition reduces cardiac L-type Ca²⁺ channel current due to acidification caused by ATP hydrolysis.

Cytotoxic effect of TDZ on human cervical cancer cells.

Exploring binding characteristics and the related competition of different protein-bound uremic toxins.

Broad Spectrum Macromolecular Antimicrobials with Biofilm Disruption Capability and In Vivo Efficacy.

Long term variation of serum levels of uremic toxins in patients treated by post-dilution high volume on-line hemodiafiltration in comparison to standard low-flux bicarbonate dialysis: results from the REDERT study.

Benign and tumor parenchyma metabolomic profiles affect compensatory renal growth in renal cell carcinoma surgical patients.

Key Role for the Organic Anion Transporters, OAT1 and OAT3, in the in vivo Handling of Uremic Toxins and Solutes.

Downregulation of androgen receptors by NaAsO₂ via inhibition of AKT-NF- κ B and HSP90 in castration resistant prostate cancer.

Effect of pistachio consumption on the modulation of urinary gut microbiota-related metabolites in prediabetic subjects.

Serum persistent organic pollutants (POPs) and prostate cancer risk: A case-cohort study.

The decreased growth performance and impaired immune function and structural integrity by dietary iron deficiency or excess are associated with TOR, NF- κ B, p38MAPK, Nrf2 and MLCK signaling in head kidney, spleen and skin of grass carp (*Ctenopharyngodon idella*).

Identification of Key Odorants in Used Disposable Absorbent Incontinence Products.

Limited reduction in uremic solute concentrations with increased dialysis frequency and time in the Frequent Hemodialysis Network Daily Trial.

Dose-Response Relationship between Inorganic Arsenic Exposure and Lung Cancer among Arseniasis Residents with Low Methylation Capacity.

Suppressed erythropoietin expression in a nitrofen-induced congenital diaphragmatic hernia.

[A group of occupational acute methyl bromide poisoning incident].

Relation of polymorphism of arsenic metabolism genes to arsenic methylation capacity and developmental delay in preschool children in Taiwan.

Convergence of hepcidin deficiency, systemic iron overloading, heme accumulation, and REV-ERB β activation in aryl hydrocarbon receptor-elicited hepatotoxicity.

Prevalence and pattern of potential drug-drug interactions among chronic kidney disease patients in south-western Nigeria.

Antiproliferation effect of the uremic toxin para-cresol on endothelial progenitor cells is related to its antioxidant activity.

Prenatal Exposure to Glycol Ethers and Neurocognitive Abilities in 6-Year-Old Children: The PELAGIE Cohort Study.

[Pollution Characteristics of Chlorobenzenes in Organs of Fish from Typical Epidemic Areas of Schistosomiasis Prevalence].

Residual renal function: a paradigm shift.

Cilostazol inhibits uremic toxin-induced vascular smooth muscle cell dysfunction: role of Axl signaling.

Amelioration of arsenic-induced toxic effects in mice by dietary supplementation of *Syzygium cumini* leaf extract.

Free and total p-cresol sulfate levels and infectious hospitalizations in hemodialysis patients in CHOICE and HEMO.

Effect of curcumin on kidney histopathological changes, lipid peroxidation and total antioxidant capacity of serum in sodium arsenite-treated mice.

p-Cresyl Sulfate.

Urinary metabolomics revealed arsenic exposure related to metabolic alterations in general Chinese pregnant women.

[Uremic toxins and gut micro biome].

Protein-bound uremic toxins - biological effects and impact on morbidity in patients with chronic kidney disease.

Role of Organic Anion Transporters in the Uptake of Protein-Bound Uremic Toxins by Human Endothelial Cells and Monocyte Chemoattractant Protein-1 Expression.

Associations of arsenic metabolites, methylation capacity, and skin lesions caused by chronic exposure to high arsenic in tube well water.

Biomarkers identification by a combined clinical and metabonomics analysis in Henoch-Schonlein purpura nephritis children.

Ion Imbalance Is Involved in the Mechanisms of Liver Oxidative Damage in Rats Exposed to Glyphosate.

Hepatotoxicity and Drug/Chemical Interaction Toxicity of Nanoclay Particles in Mice.

Fertility enhancing activity and toxicity profile of aqueous extract of *Chasmanthera dependens* roots in male rats.

Interaction of mammary bovine ABCG2 with AFB1 and its metabolites and regulation by PCB 126 in a MDCKII in vitro model.

Extensin-4 protects kidney from acute ischemia-reperfusion injury through upregulation of NRF2 signaling.

The protective effect of hydroalcoholic extract of Ginger (*Zingiber officinale* Rosc.) against iron-induced functional and histological damages in rat liver and kidney.

Concentrations of urinary arsenic species in relation to rice and seafood consumption among children living in Spain.

Sodium arsenite-induced cardiovascular and renal dysfunction in rat via oxidative stress and protein kinase B (Akt/PKB) signaling pathway.

Assessment of prescribed medications and pattern of distribution for potential drug-drug interactions among chronic kidney disease patients attending the Nephrology Clinic of Lagos University Teaching Hospital in Sub-Saharan West Africa.

Polychlorinated biphenyls and depression: cross-sectional and longitudinal investigation of a dopamine-related Neurochemical path in the German HELPCB surveillance program.

Protein-bound uremic toxins impaired mitochondrial dynamics and functions.

Benzene exposure is associated with cardiovascular disease risk.

Protective efficacy of various carbonyl compounds and their metabolites, and nutrients against acute toxicity of some cyanogens in rats: biochemical and physiological studies.

Acute toxicity of commercial atrazine in *Piaractus mesopotamicus*: Histopathological, ultrastructural, molecular, and genotoxic evaluation.

Inhibition of ALDH2 expression aggravates renal injury in a rat sepsis syndrome model.

Incidence and pathological study of Explanatum explanatum (Creplin, 1847) Fukui, 1929 in goats in Andhra Pradesh, India.

Tissue-specific distributions of inorganic arsenic and its methylated metabolites, especially in cerebral cortex, cerebellum and hippocampus of mice after a single oral administration of arsenite.

Ifosfamide-Induced Malignancy of Ureter and Bladder.

Arsenic exposure impels CD4 commitment in thymus and suppress T cell cytokine secretion by increasing regulatory T cells.

Predictors of acute kidney injury after paraquat intoxication.

Accumulation of Arsenic Speciation and In Vivo Toxicity Following Oral Administration of a Chinese Patent Medicine Xiao-Er-Zhi-Bao-Wan in Rats.

Visible-light driven Photoelectrochemical Immunosensor Based on SnS(2)@mpg-C(3)N(4) for Detection of Prostate Specific Antigen.

Paraquat poisoning: Case report of a survivor.

Ameliorative effect of vitamin E and selenium against oxidative stress induced by sodium azide in liver, kidney, testis and heart of male mice.

Toxicological characterisation of two novel selective aryl hydrocarbon receptor modulators in Sprague-Dawley rats.

Xenobiotic transporters and kidney injury.

Relation of dietary inorganic arsenic exposure and urinary inorganic arsenic metabolites excretion in Japanese subjects.

Histopathological changes in zebrafish embryos exposed to DLPCBs extract from Zhanjiang coastal sediment.

Exposure to polycyclic aromatic hydrocarbons and volatile organic compounds among recently pregnant rural Guatemalan women cooking and heating with solid fuels.

The Investigation of Unexpected Arsenic Compounds Observed in Routine Biological Monitoring Urinary Speciation Analysis.

Acute kidney injury from different poisonous substances.

Levels of infants' urinary arsenic metabolites related to formula feeding and weaning with rice products exceeding the EU inorganic arsenic standard.

Diurnal and Long-term Variation in Plasma Concentrations and Renal Clearances of Circulating Markers of Kidney Proximal Tubular Secretion.

Metabonomic analysis of quercetin against the toxicity of acrylamide in rat urine.

Nicotine, Carcinogen, and Toxin Exposure in Long-Term E-Cigarette and Nicotine Replacement Therapy Users: A Cross-sectional Study.

Molecular pathways related to the longevity promotion and cognitive improvement of *Cistanche tubulosa* in *Drosophila*.

Carnosine Attenuates the Development of both Type 2 Diabetes and Diabetic Nephropathy in BTBR ob/ob Mice.

An experimental study of postmortem decomposition of methomyl in blood.

Toxic Epidermal Necrolysis and Acute Kidney Injury due to Glyphosate Ingestion.

SILAC-based quantitative proteomic analysis reveals widespread molecular alterations in human skin keratinocytes upon chronic arsenic exposure.

Biomarker Levels of Toxic Metals among Asian Populations in the United States: NHANES 2011-2012.

Discernment scheme for paraquat poisoning: A five-year experience in Shiraz, Iran.

Mumps caused by paraquat-induced poisoning: A case report.

Elevated Urinary Glyphosate and Clostridia Metabolites With Altered Dopamine Metabolism in Triplets With Autistic Spectrum Disorder or Suspected Seizure Disorder: A Case Study.

Encapsulation of Antifungals in Micelles Protects *Candida albicans* during Gall-Bladder Infection.

Beta-Glucans Supplementation Associates with Reduction in P-Cresyl Sulfate Levels and Improved Endothelial Vascular Reactivity in Healthy Individuals.

Effect of cooking on aroma profile of red kidney beans (*Phaseolus vulgaris*) and correlation with sensory quality.

Eryptosis - the Neglected Cause of Anemia in End Stage Renal Disease.

Urinary Arsenic Speciation in Children and Pregnant Women from Spain.

Benefits of Alcohol on Arsenic Toxicity in Rats.

Intravenous injection of Xuebijing attenuates acute kidney injury in rats with paraquat intoxication.

Urinary 3-hydroxypropyl mercapturic acid (3-HPMA) concentrations in dogs with acute spinal cord injury due to intervertebral disc herniation.

Î±-Lipoic acid potentially targets AMP-activated protein kinase and energy production in the fetal brain to ameliorate dioxin-produced attenuation in fetal steroidogenesis.

Interactive Influence of N6AMT1 and As3MT Genetic Variations on Arsenic Metabolism in the Population of Inner Mongolia, China.

[Dose-effect relationship between vitamin C and paraquat poisoning rats].

Histone deacetylase inhibitors mediate DNA damage repair in ameliorating hemorrhagic cystitis.

Examination of in vivo mutagenicity of sodium arsenite and dimethylarsinic acid in gpt delta rats.

Metabolomics as read-across tool: A case study with phenoxy herbicides.

Nephrotoxicity of Kalach 360 SL: biochemical and histopathological findings.

Fresh water fish, *Channa punctatus*, as a model for pendimethalin genotoxicity testing: A new approach toward aquatic environmental contaminants.

Diindolylmethane and Lupeol Modulates Apoptosis and Cell Proliferation in N-Butyl-N-(4-Hydroxybutyl) Nitrosamine Initiated and Dimethylarsinic Acid Promoted rat Bladder Carcinogenesis.

Effects of 2,4-dichlorophenoxyacetic acid on the ventral prostate of rats during the peri-pubertal, pubertal and adult stage.

Mechanism-specific injury biomarkers predict nephrotoxicity early following glyphosate surfactant herbicide (GPSH) poisoning.

Evaluating long-term cellular effects of the arsenic species thio-DMA(V): qPCR-based gene expression as screening tool.

Effect of MDR1 gene polymorphisms on mortality in paraquat intoxicated patients.

Dig1 protects against locomotor and biochemical dysfunctions provoked by Roundup.

The herbicide glyphosate is a weak inhibitor of acetylcholinesterase in rats.

Prognosis and survival analysis of paraquat poisoned patients based on improved HPLC-UV method.

Effects of pentachlorophenol on the detoxification system in white-rumped munia (*Lonchura striata*).

The role of ions, heavy metals, fluoride, and agrochemicals: critical evaluation of potential aetiological factors of chronic kidney disease of multifactorial origin (CKDmfo/CKDu) and recommendations for its eradication.

Atrazine promotes RM1 prostate cancer cell proliferation by activating STAT3 signaling.

Hyperamylasemia as an Early Predictor of Mortality in Patients with Acute Paraquat Poisoning.

Influence of dioxin exposure upon levels of prostate-specific antigen and steroid hormones in Vietnamese men.

Cycloartenyl Ferulate Inhibits Paraquat-Induced Apoptosis in HK-2 Cells With the Involvement of ABCC1.

Unfractionated bone marrow cells attenuate paraquat-induced glomerular injury and acute renal failure by modulating the inflammatory response.

Concurrent Hemoperfusion and Hemodialysis in Patients with Acute Pesticide Intoxication.

Effects of high doses of dexamethasone on hemodynamic and immunohistochemical characteristics of acute paraquat intoxication in rat kidneys.

Metabolic changes in rat urine after acute paraquat poisoning and discriminated by support vector machine.

Effects of the terbutylazine metabolite terbutylazine-desethyl on common carp embryos and larvae.

Pesticide use and risk of end-stage renal disease among licensed pesticide applicators in the Agricultural Health Study.

The effects of resveratrol against trifluralin toxicity in the urinary tract of rats.

Uremic toxins: some thoughts on acrolein and spermine.

Hypospadias and maternal exposure to atrazine via drinking water in the National Birth Defects Prevention study.

Arsenic Metabolism in Children Differs From That in Adults.

Acrolein metabolites, diabetes and insulin resistance.

A carnosine intervention study in overweight human volunteers: bioavailability and reactive carbonyl species sequestering effect.

Cinnamaldehydes in Cancer Chemotherapy.

A low toxicity synthetic cinnamaldehyde derivative ameliorates renal inflammation in mice by inhibiting NLRP3 inflammasome and its related signaling pathways.

Recent Progress in Analytical Methods for Determination of Urinary 3-Hydroxypropylmercapturic Acid, a Major Metabolite of Acrolein.

Urinary inorganic arsenic concentrations and semen quality of male partners of subfertile couples in Tokyo.

Polymorphic variants of MRP4/ABCC4 differentially modulate the transport of methylated arsenic metabolites and physiological organic anions.

Comparative cytotoxicity of fourteen trivalent and pentavalent arsenic species determined using real-time cell sensing.

Sex differences in the reduction of arsenic methylation capacity as a function of urinary total and inorganic arsenic in Mexican children.

[Effect of heme oxygenase-1 transduced by cell penetrating peptide PEP-1 on renal injury in rats with acute paraquat poisoning].

2-Phenethyl Isothiocyanate, Glutathione S-transferase M1 and T1 Polymorphisms, and Detoxification of Volatile Organic Carcinogens and Toxicants in Tobacco Smoke.

Differential effects of superoxide and hydrogen peroxide on myogenic signaling, membrane potential, and contractions of mouse renal afferent arterioles.

PBPK Model for Atrazine and Its Chlorotriazine Metabolites in Rat and Human.

Arsenic Metabolites and Methylation Capacity Among Individuals Living in a Rural Area with Endemic Arseniasis in Inner Mongolia, China.

[The expressions of intercellular adhesion molecule-1 in renal tissue of rats with paraquat poisoning and the effect of melatonin].

A characteristic biosignature for discrimination of gastric cancer from healthy population by high throughput GC-MS analysis.

Practice guideline summary: Treatment of restless legs syndrome in adults: Report of the Guideline Development, Dissemination, and Implementation Subcommittee of the American Academy of Neurology.

Protein-bound toxins: has the Cinderella of uraemic toxins turned into a princess?

Exposure to polychlorinated biphenyls and prostate cancer: population-based prospective cohort and experimental studies.

p-Cresyl sulfate affects the oxidative burst, phagocytosis process, and antigen presentation of monocyte-derived macrophages.

Association of Arsenic Methylation Capacity with Developmental Delays and Health Status in Children: A Prospective Case-Control Trial.

Low-level environmental arsenic exposure correlates with unexplained male infertility risk.

LC-MS/MS method for simultaneous determination of serum p-cresyl sulfate and indoxyl sulfate in patients undergoing peritoneal dialysis.

Electrophoretic stacking for sensitive determination of antibiotic ceftazidime in human blood and microdialysates from diabetic foot.

Carbamylated Low-Density Lipoproteins Induce a Prothrombotic State Via LOX-1: Impact on Arterial Thrombus Formation In Vivo.

Atorvastatin attenuates p-cresyl sulfate-induced atherogenesis and plaque instability in ApoE knockout mice.

Para-Dichlorobenzene Exposure Is Associated with Thyroid Dysfunction in US Adolescents.

Arsenic and subclinical vascular damage in a sample of Italian young adults: a cross-sectional analysis.

Polyuria-associated hydronephrosis induced by xenobiotic chemical exposure in mice.

Intestinal microbiota in pediatric patients with end stage renal disease: a Midwest Pediatric Nephrology Consortium study.

p-Cresyl sulfate promotes the formation of atherosclerotic lesions and induces plaque instability by targeting vascular smooth muscle cells.

Separation of Key Biogenic Amines by Capillary Electrophoresis and Determination of Possible Indicators of Sport Fatigue in Athlete's Urine.

2,3,7,8-Tetrachlorodibenzo-p-dioxin has both pro-carcinogenic and anti-carcinogenic effects on neuroendocrine prostate carcinoma formation in TRAMP mice.

Effect of a sustained difference in hemodialytic clearance on the plasma levels of p-cresol sulfate and indoxyl sulfate.

In utero and lactational dioxin exposure induces Sema3b and Sema3g gene expression in the developing mouse brain.

Metabolism, Protein Binding, and Renal Clearance of Microbiota-Derived p-Cresol in Patients with CKD.

METABOLIC DYSBIOSIS OF THE GUT MICROBIOTA AND ITS BIOMARKERS.

Associations of prenatal exposure to five chlorophenols with adverse birth outcomes.

Tubular Secretion in CKD.

Slow intestinal transit contributes to elevated urinary p-cresol level in Italian autistic children.

Endocrine-disrupting chemicals, risk of type 2 diabetes, and diabetes-related metabolic traits: A systematic review and meta-analysis.

Associations among chronic kidney disease, high total p-cresylsulfate and left ventricular systolic dysfunction.

Association of dioxins, furans and dioxin-like PCBs in human blood with nephropathy among US teens and young adults.

Occupational exposure to pesticides and bladder cancer risk.

Metabonomic study of the fruits of *Alpinia oxyphylla* as an effective treatment for chronic renal injury in rats.

Microbial-Derived Metabolites Reflect an Altered Intestinal Microbiota during Catch-Up Growth in Undernourished Neonatal Mice.

A novel orellanine containing mushroom *Cortinarius armillatus*.

Resistant starch alters gut microbiome and metabolomic profiles concurrent with amelioration of chronic kidney disease in rats.

Free p-Cresol Alters Neutrophil Function in Dogs.

Altered intestinal microbial flora and impaired epithelial barrier structure and function in CKD: the nature, mechanisms, consequences and potential treatment.

Urinary concentrations of 2,5-dichlorophenol and diabetes in US adults.

Traditional Arabic Palestinian ethnoveterinary practices in animal health care: A field survey in the West Bank (Palestine).

In Utero and Lactational TCDD Exposure Increases Susceptibility to Lower Urinary Tract Dysfunction in Adulthood.

Development and validation of a LC-MS/MS method for quantitative analysis of uraemic toxins p-cresol sulphate and indoxyl sulphate in saliva.

Gut microbiome in chronic kidney disease.

Association between Blood Dioxin Level and Chronic Kidney Disease in an Endemic Area of Exposure.

Untargeted plasma and tissue metabolomics in rats with chronic kidney disease given AST-120.

Iron Treatment Strategies in Nondialysis CKD.

Aminomethylphosphonic acid inhibits growth and metastasis of human prostate cancer in an orthotopic xenograft mouse model.

Indoxyl sulfate, not p-cresyl sulfate, is associated with cognitive impairment in early-stage chronic kidney disease.

Oral nanoparticulate curcumin combating arsenic-induced oxidative damage in kidney and brain of rats.

Metformin Scavenges Methylglyoxal To Form a Novel Imidazolinone Metabolite in Humans.

Synbiotics Easing Renal Failure by Improving Gut Microbiology (SYNERGY): A Randomized Trial.

Hemocompatibility evaluation for peptide fragments of human serum albumin cleaved by cyanogens bromide.

p-Cresyl sulfate is associated with carotid arteriosclerosis in hemodialysis patients and promotes atherogenesis in apoE^{-/-} mice.

Developmental toxicity, EROD, and CYP1A mRNA expression in zebrafish embryos exposed to dioxin-like PCB126.

Exaggerated arsenic nephrotoxicity in female mice through estrogen-dependent impairments in the autophagic flux.

Aromatic Hydrocarbon Receptor Suppresses Prostate Cancer Bone Metastasis Cells-Induced Vasculogenesis of Endothelial Progenitor Cells under Hypoxia.

Increased Levels of Total p-Cresylsulfate Are Associated with Pruritus in Patients with Chronic Kidney Disease.

Initial Serum Ammonia as a Predictor of Neurologic Complications in Patients with Acute Glufosinate Poisoning.

Protective effects of thymoquinone against apoptosis and oxidative stress by arsenic in rat kidney.

Associations between urinary concentrations of 2,5-dichlorophenol and metabolic syndrome among non-diabetic adults.

Effects of Liposomes Charge on Extending Sciatic Nerve Blockade of N-ethyl Bromide of Lidocaine in Rats.

Diazepam influences urinary bioindicator of occupational toluene exposure.

Urinary arsenic species concentration in residents living near abandoned metal mines in South Korea.

Sex Steroid Hormone Single-Nucleotide Polymorphisms, Pesticide Use, and the Risk of Prostate Cancer: A Nested Case-Control Study within the Agricultural Health Study.

Total and speciated urinary arsenic levels in the Spanish population.

Nanogold-functionalized g-C₃N₄ nanohybrids for sensitive impedimetric immunoassay of prostate-specific antigen using enzymatic biocatalytic precipitation.

Global metabolic changes induced by plant-derived pyrrolizidine alkaloids following a human poisoning outbreak and in a mouse model.

Dietary micronutrient intake and its relationship with arsenic metabolism in Mexican women.

Kt/Vurea and Nonurea Small Solute Levels in the Hemodialysis Study.

Dialysis catheter-related pulmonary embolism in a patient with paraquat intoxication.

Resistant starch reduces colonic and urinary p-cresol in rats fed a tyrosine-supplemented diet, whereas konjac mannan does not.

Urinary Metabotyping of Hepatocellular Carcinoma in a UK Cohort Using Proton Nuclear Magnetic Resonance Spectroscopy.

Exposure to Inorganic Arsenic Is Associated with Increased Mitochondrial DNA Copy Number and Longer Telomere Length in Peripheral Blood.

Acute kidney injury in patients with paraquat intoxication; a case report and review of the literature.

Association between polymorphisms in arsenic metabolism genes and urinary arsenic methylation profiles in girls and boys chronically exposed to arsenic.

Multi-tissue metabolic responses of goldfish (*Carassius auratus*) exposed to glyphosate-based herbicide.

Toxic effects of glyphosate-based herbicide, Excel Mera 71 on gill, liver, and kidney of *Heteropneustes fossilis* under laboratory and field conditions.

Oleuropein ameliorates arsenic induced oxidative stress in mice.

Effect of retinyl acetate on transglutaminase 2 activity in carcinogen treated rat liver.

Urinary Phthalate Metabolites in American Alligators (*Alligator mississippiensis*) from Selected Florida Wetlands.

p-cresol but not p-cresyl sulfate stimulate MCP-1 production via NF- κ B p65 in human vascular smooth muscle cells.

Impact of dioxins on antipyrine metabolism in firefighters.

A biological indicator of inorganic arsenic exposure using the sum of urinary inorganic arsenic and monomethylarsonic acid concentrations.

Effect of Acetyl-L-Carnitine on Antioxidant Status, Lipid Peroxidation, and Oxidative Damage of Arsenic in Rat.

Treatment of Resistant Cyclophosphamide Induced Haemorrhagic Cystitis: Review of Literature and Three Case Reports.

Assessment of Exposure to VOCs among Pregnant Women in the National Children's Study.

Underestimation of the Maximal Capacity of the Mitochondrial Electron Transport System in Oligomycin-Treated Cells.

A urinary metabonomics analysis of long-term effect of acetochlor exposure on rats by ultra-performance liquid chromatography/mass spectrometry.

Developmental toxicity, oxidative stress, and related gene expression induced by dioxin-like PCB 126 in zebrafish (*Danio rerio*).

Arsenic and smokeless tobacco induce genotoxicity, sperm abnormality as well as oxidative stress in mice *in vivo*.

Paraquat Poisoning: A Case Report.

Transformation, products, and pathways of chlorophenols via electro-enzymatic catalysis: How to control toxic intermediate products.

Evaluation and identification of dioxin exposure biomarkers in human urine by high-resolution metabolomics, multivariate analysis and *in vitro* synthesis.

Effect of probiotic and prebiotic fermented milk on skin and intestinal conditions in healthy young female students.

Arsenite accumulation in the mouse eye.

Evaluation and modeling of the impact of coexposures to VOC mixtures on urinary biomarkers.

The impact of combined administration of paraquat and maneb on motor and non-motor functions in the rat.

[Three cases of an extreme hyperkalemia associated with glyphosate potassium herbicide poisoning].

Interpreting biomonitoring data for 2,4-dichlorophenoxyacetic acid: Update to Biomonitoring Equivalents and population biomonitoring data.

Executive Summary to EDC-2: The Endocrine Society's Second Scientific Statement on Endocrine-Disrupting Chemicals.

Histopathological and ultramicroscopical changes in gill, liver and kidney of *Anabas testudineus* (Bloch) after chronic intoxication of almix (metsulfuron methyl 10.1%+chlorimuron ethyl 10.1%) herbicide.

Bioaccumulation and neurotoxicity of dithiopyridine herbicide in the brain of freshwater fish, *Cyprinus carpio*.

[Analysis of risk factors for prognosis of patients with acute paraquat intoxication].

[A case of rhabdomyolysis, acute renal failure induced by paraquat poisoning].

Cigarette side-stream smoke lung and bladder carcinogenesis: inducing mutagenic acrolein-DNA adducts, inhibiting DNA repair and enhancing anchorage-independent-growth cell transformation.

Antifungal, Phytotoxic, and Cytotoxic Activities of Metabolites from *Epichloë bromicola*, a Fungus Obtained from *Elymus tangutorum* Grass.

[Intensive hemoperfusion and long-term hemofiltration for treatment of paraquat poisoning: a case report].

Molecular characterization of heat-shock protein 90 gene and its expression in *Gobiocypris rarus* juveniles exposed to pentachlorophenol.

Toxicity of diuron in human cancer cells.

Kidney damage biomarkers detect acute kidney injury but only functional markers predict mortality after paraquat ingestion.

[The prevention and therapeutics effect of sodium bicarbonate with gastric lavage, atomization inhalation and intravenous injection on the patients with paraquat poisoning and pulmonary fibrosis induced by paraquat poisoning].

[Hemoperfusion alleviated paraquat-induced kidney inflammation injury of rabbit].

Transcriptome profile analysis reflects rat liver and kidney damage following chronic ultra-low dose Roundup exposure.

Toxicity of environmental Gesagard to goldfish may be connected with induction of low intensity oxidative stress in concentration- and tissue-related manners.

2,4-Dichlorophenoxyacetic acid and non-Hodgkin's lymphoma, gastric cancer, and prostate cancer: meta-analyses of the published literature.

Acute and subchronic toxic effects of atrazine and chlorpyrifos on common carp (*Cyprinus carpio* L.): Immunotoxicity assessments.

Simultaneous exposure to multiple heavy metals and glyphosate may contribute to Sri Lankan agricultural nephropathy.

Evaluation of early changes induced by diuron in the rat urinary bladder using different processing methods for scanning electron microscopy.

Agent Orange and long-term outcomes after radical prostatectomy.

Mercapturic Acids Derived from the Toxicants Acrolein and Crotonaldehyde in the Urine of Cigarette Smokers from Five Ethnic Groups with Differing Risks for Lung Cancer.

Alteration in the cytokine levels and histopathological damage in common carp induced by glyphosate.

[The study of kidney injury in rats with acute paraquat poisoning].

[The expressions of P38 mitogen-activated protein kinases and JNK mitogen-activated protein kinases in the renal tissue of rats with acute paraquat poisoning and the therapeutical effects of melatonin].

Effects of atrazine and chlorpyrifos on oxidative stress-induced autophagy in the immune organs of common carp (*Cyprinus carpio* L.).

[Intensity of hemoperfusion in acute paraquat-poisoned patients and analysis of prognosis].

[Effect of rhubarb as the main composition of sequential treatment in patients with acute paraquat poisoning: a prospective clinical research].

Betanin attenuates oxidative stress and inflammatory reaction in kidney of paraquat-treated rat.

Proposal for novel metabolic pathway of highly toxic dimethylated arsenics accompanied by enzymatic sulfuration, desulfuration and oxidation.

Commercial formulation containing 2,4-D affects biochemical parameters and morphological indices of silver catfish exposed for 90 days.

Mechanisms underlying early rapid increases in creatinine in paraquat poisoning.

UV and hydrogen peroxide treatment restores changes in innate immunity caused by exposure of fish to reuse water.

[Clinical study on the treatment of acute paraquat poisoning with sequential whole gastric and bowel irrigation].

Assessment of pesticide residues and gene expression in common carp exposed to atrazine and chlorpyrifos: Health risk assessments.

In vitro safety assessment of food ingredients in canine renal proximal tubule cells.

Protective effects of caffeic acid phenethyl ester on the dose-dependent acute nephrotoxicity with paraquat in a rat model.

Effects of prometryne on early life stages of common carp (*Cyprinus carpio* L.).

Molecular mechanisms of acrolein toxicity: relevance to human disease.

(1)H NMR based metabolomics approach to study the toxic effects of herbicide butachlor on goldfish (*Carassius auratus*).

Histopathological alterations in the kidney of Caspian kutum, *Rutilus frisii kutum*, larvae and fingerlings exposed to sublethal concentration of atrazine.

Dimethylarsinic acid (DMA(V)) changed the expressions of proliferative related factors and secretion of inflammatory cytokines in rat bladder.

Drinking well water and occupational exposure to Herbicides is associated with chronic kidney disease, in Padavi-Sripura, Sri Lanka.

Study of Cytotoxic Effects of Benzonitrile Pesticides.

The herbicide glyphosate causes behavioral changes and alterations in dopaminergic markers in male Sprague-Dawley rat.

Immunological and histopathological responses of the kidney of common carp (*Cyprinus carpio* L.) sublethally exposed to glyphosate.

Transcription alteration of immunologic parameters and histopathological damage in common carp (*Cyprinus carpio* L.) caused by paraquat.

EDC-2: The Endocrine Society's Second Scientific Statement on Endocrine-Disrupting Chemicals.

The effect of superoxide anion and hydrogen peroxide imbalance on prostate cancer: an integrative in vivo and in vitro analysis.

The Genetic Architecture of Arsenic Metabolism Efficiency: A SNP-Based Heritability Study of Bangladeshi Adults.

Lung inflammation biomarkers and lung function in children chronically exposed to arsenic.

Superoxide enhances Ca²⁺ entry through L-type channels in the renal afferent arteriole.

The association of urine arsenic with prevalent and incident chronic kidney disease: evidence from the Strong Heart Study.

Endogenous hydrogen peroxide in the hypothalamic paraventricular nucleus regulates neurohormonal excitation in high salt-induced hypertension.

[Preventive effects of 5-hydroxy-1-methylhydantoin on paraquat-induced nephrotoxicity in rat].

Distinguishing mild cognitive impairment from Alzheimer's disease with acrolein metabolites and creatinine in urine.

Cinnamaldehyde Contributes to Insulin Sensitivity by Activating PPAR α , PPAR β , and RXR.

Reduction of the Pentavalent Arsenical Dimethylarsinic Acid and the GSTO1 Substrate S-(4-Nitrophenacyl)glutathione by Rat Liver Cytosol: Analyzing the Role of GSTO1 in Arsenic Reduction.

Renal function is associated with indicators of arsenic methylation capacity in Bangladeshi adults.

Predictors of urinary levels of 2,4-dichlorophenoxyacetic acid, 3,5,6-trichloro-2-pyridinol, 3-phenoxybenzoic acid, and pentachlorophenol in 121 adults in Ohio.

Cinnamaldehyde and nitric oxide attenuate advanced glycation end products-induced the Jak/STAT signaling in human renal tubular cells.

The distribution in tissues and urine of arsenic metabolites after subchronic exposure to dimethylarsinic acid (DMAV) in rats.

Simultaneous determination of cinnamaldehyde and its metabolite in rat tissues by gas chromatography-mass spectrometry.

Influence of the level of arsenic (As) exposure and the presence of T860C polymorphism in human As urinary metabolic profile.

Short-term variability and predictors of urinary pentachlorophenol levels in Ohio preschool children.

DMA(V) in Drinking Water Activated NF- κ B Signal Pathway and Increased TGF- β 2 and IL-1 β Expressions in Bladder Epithelial Cells of Rats.

Urinary arsenic speciation profile in ethnic group of the Atacama desert (Chile) exposed to variable arsenic levels in drinking water.

Anti-androgen flutamide suppresses hepatocellular carcinoma cell proliferation via the aryl hydrocarbon receptor mediated induction of transforming growth factor- β 1.

Assessment of global and gene-specific DNA methylation in rat liver and kidney in response to non-genotoxic carcinogen exposure.

Para-cresyl sulfate acutely impairs vascular reactivity and induces vascular remodeling.

Green tea inhibited the elimination of nephro-cardiovascular toxins and deteriorated the renal function in rats with renal failure.

Pesticide exposure and end-stage renal disease risk among wives of pesticide applicators in the Agricultural Health Study.

Several Ryanodine Receptor Type 1 Gene Mutations of p.Arg2508 Are Potential Sources of Malignant Hyperthermia.

Proximal tubular efflux transporters involved in renal excretion of p-cresyl sulfate and p-cresyl glucuronide: Implications for chronic kidney disease pathophysiology.

A randomized trial of intravenous and oral iron in chronic kidney disease.

Exploring Protein Binding of Uremic Toxins in Patients with Different Stages of Chronic Kidney Disease and during Hemodialysis.

Continuous Reduction of Protein-Bound Uraemic Toxins with Improved Oxidative Stress by Using the Oral Charcoal Adsorbent AST-120 in Haemodialysis Patients.

KML001 Induces Apoptosis and Autophagic Cell Death in Prostate Cancer Cells via Oxidative Stress Pathway.

p-Cresol and Cardiovascular Risk in Kidney Transplant Recipients.

Dietary protein-fiber ratio associates with circulating levels of indoxyl sulfate and p-cresyl sulfate in chronic kidney disease patients.

The Chronic Kidney Disease - Colonic Axis.

Detection of urine metabolites in polycystic ovary syndrome by UPLC triple-TOF-MS.

The Role of Liver in Determining Serum Colon-Derived Uremic Solutes.

Gut-Microbiota-Metabolite Axis in Early Renal Function Decline.

Left ventricular global longitudinal strain is associated with cardiovascular risk factors and arterial stiffness in chronic kidney disease.

Activation of aryl hydrocarbon receptor promotes invasion of clear cell renal cell carcinoma and is associated with poor prognosis and cigarette smoke.

Meta-Analysis of the Associations of p-Cresyl Sulfate (PCS) and Indoxyl Sulfate (IS) with Cardiovascular Events and All-Cause Mortality in Patients with Chronic Renal Failure.

The AhR Ligand, TCDD, Regulates Androgen Receptor Activity Differently in Androgen-Sensitive versus Castration-Resistant Human Prostate Cancer Cells.

Nitrite-mediated renal vasodilatation is increased during ischemic conditions via cGMP-independent signaling.

Tetramethylpyrazine (TMP) protects against sodium arsenite-induced nephrotoxicity by suppressing ROS production, mitochondrial dysfunction, pro-inflammatory signaling pathways and programmed cell death.

p-Cresyl sulfate aggravates cardiac dysfunction associated with chronic kidney disease by enhancing apoptosis of cardiomyocytes.

Arsenic exposure and prevalence of the varicella zoster virus in the United States: NHANES (2003-2004 and 2009-2010).

Aminomethylphosphonic acid and methoxyacetic acid induce apoptosis in prostate cancer cells.

Free Levels of Selected Organic Solutes and Cardiovascular Morbidity and Mortality in Hemodialysis Patients: Results from the Retained Organic Solutes and Clinical Outcomes (ROSCO) Investigators.

Dioxin inhibition of swim bladder development in zebrafish: is it secondary to heart failure?

Fiber supplementation lowers plasma p-cresol in chronic kidney disease patients.

Effects of uremic solutes on reactive oxygen species in vitro model systems as a possibility of support the renal function management.

p-Cresol mediates autophagic cell death in renal proximal tubular cells.

Variation in urinary flow rates according to demographic characteristics and body mass index in NHANES: potential confounding of associations between health outcomes and urinary biomarker concentrations.

Associations of plasma concentrations of dichlorodiphenyldichloroethylene and polychlorinated biphenyls with prostate cancer: a case-control study in Guadeloupe (French West Indies).

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced hypertension: the beneficial effects of melatonin.

A potential synergy between incomplete arsenic methylation capacity and demographic characteristics on the risk of hypertension: findings from a cross-sectional study in an arsenic-endemic area of inner Mongolia, China.

Inorganic Arsenic-induced cellular transformation is coupled with genome wide changes in chromatin structure, transcriptome and splicing patterns.

Synergic actions of polyphenols and cyanogens of peanut seed coat (*Arachis hypogaea*) on cytological, biochemical and functional changes in thyroid.

Cerenkov-specific contrast agents for detection of pH in vivo.

Internal exposure to organochlorine pollutants and cadmium and self-reported health status: a prospective study.

Uremic toxins, oxidative stress, and renal fibrosis: an intertwined complex.

Associations between urinary phenol and paraben concentrations and markers of oxidative stress and inflammation among pregnant women in Puerto Rico.

Effects of sodium arsenite on the some laboratory signs and therapeutic role of thymoquinone in the rats.

Collection and storage of urine specimens for measurement of urolithiasis risk factors.

Effect of uraemia on endothelial cell damage is mediated by the integrin linked kinase pathway.

Urinary amino acid alterations in 3-year-old children with neurodevelopmental effects due to perinatal dioxin exposure in Vietnam: a nested case-control study for neurobiomarker discovery.

[MODELING IN VITRO PATHWAYS OF ACTIVATION OF LIPID PEROXIDATION AND PROTEIN IN CHRONIC KIDNEY DISEASE].

Dioxin-Produced Alteration in the Profiles of Fecal and Urinary Metabolomes: A Change in Bile Acids and Its Relevance to Toxicity.

Indoxyl sulfate, not P-cresyl sulfate, is associated with advanced glycation end products in patients on long-term hemodialysis.

Ferric carboxymaltose: a review of its use in iron deficiency.

Release of uremic retention solutes from protein binding by hypertonic predilution hemodiafiltration.

Antiandrogenic mechanisms of pesticides in human LNCaP prostate and H295R adrenocortical carcinoma cells.

Effects of acute hypercapnia with and without acidosis on lung inflammation and apoptosis in experimental acute lung injury.

Genetic variation in arsenic (+3 oxidation state) methyltransferase (AS3MT), arsenic metabolism and risk of basal cell carcinoma in a European population.

Alterations of platelet functions in children and adolescents with iron-deficiency anemia and response to therapy.

Simultaneous determination of phenoxyethanol and its major metabolite, phenoxyacetic acid, in rat biological matrices by LC-MS/MS with polarity switching: Application to ADME studies.

Evaluation of [(11)C]methyl-losartan and [(11)C]methyl-EXP3174 for PET imaging of renal AT1receptor in rats.

The small heat shock protein, HSP30, is associated with aggresome-like inclusion bodies in proteasomal inhibitor-, arsenite-, and cadmium-treated Xenopus kidney cells.

Treatment Following Intoxication With Lethal Dose of Paraquat: A Case Report and Review of Literature.

Hepatotoxicity, Nephrotoxicity and Oxidative Stress in Rat Testis Following Exposure to Haloxyfop-p-methyl Ester, an Aryloxyphenoxypropionate Herbicide.

Absorption of PCB126 by upper airways impairs G protein-coupled receptor-mediated immune response.

Levels of selected urinary metabolites of volatile organic compounds among children aged 6-11 years.

High accumulation of arsenic in the esophagus of mice after exposure to arsenite.

Biotin amelioration of nephrotoxicity in streptozotocin-induced diabetic mice.

Distributions of selected urinary metabolites of volatile organic compounds by age, gender, race/ethnicity, and smoking status in a representative sample of U.S. adults.

Toxicokinetic Model Development for the Insensitive Munitions Component 2,4-Dinitroanisole.

TCDD and corticosterone on testicular steroidogenesis and antioxidant system of epididymal sperm in rats.

Simple and sensitive GC/MS-method for the quantification of urinary phenol, o- and m-cresol and ethylphenols as biomarkers of exposure to industrial solvents.

Metals exposure and risk of small-for-gestational age birth in a Canadian birth cohort: The MIREC study.

Analysis of 18 urinary mercapturic acids by two high-throughput multiplex-LC-MS/MS methods.

Measurement of Total and Free Urinary Phenol and Paraben Concentrations over the Course of Pregnancy: Assessing Reliability and Contamination of Specimens in the Norwegian Mother and Child Cohort Study.

Characterization of arsenic hepatobiliary transport using sandwich-cultured human hepatocytes.

Characterization of Batracylin-induced Renal and Bladder Toxicity in Rats.

Intrathecal cannabinoid-1 receptor agonist prevents referred hyperalgesia in acute acrolein-induced cystitis in rats.

Use status and metabolism of realgar in Chinese patent medicine.

Urinary biomarkers as exposure surrogates: controlling for possible bias.

Human inhalation exposures to toluene, ethylbenzene, and m-xylene and physiologically based pharmacokinetic modeling of exposure biomarkers in exhaled air, blood, and urine.

Suspected flunixin poisoning of a wild Eurasian Griffon Vulture from Spain.

Inflammation and pyroptosis mediate muscle expansion in an interleukin-1^β (IL-1^β)-dependent manner.

Idiopathic erythrocytosis in a patient on chronic hemodialysis.

Accumulation of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls in livers of young sheep.

Longitudinal assessment of occupational exposures to the organophosphorous insecticides chlorpyrifos and profenofos in Egyptian cotton field workers.

Phosphate fertilizer is a main source of arsenic in areas affected with chronic kidney disease of unknown etiology in Sri Lanka.

Protective effects of phyllanthus emblica leaf extract on sodium arsenite-mediated adverse effects in mice.

Protein-bound uremic toxins induce tissue remodeling by targeting the EGF receptor.

Metabolomic pattern analysis after mediterranean diet intervention in a nondiabetic population: a 1- and 3-year follow-up in the PREDIMED study.

Proteomic analysis of human bladder epithelial cells by 2D blue native SDS-PAGE reveals TCDD-induced alterations of calcium and iron homeostasis possibly mediated by nitric oxide.

Naringin ameliorates sodium arsenite-induced renal and hepatic toxicity in rats: decisive role of KIM-1, Caspase-3, TGF- β^2 , and TNF- α .

Modulation of aryl hydrocarbon receptor regulated genes by acute administration of trimethylarsine oxide in the lung, kidney and heart of C57BL/6 mice.

[The influence of iron ions on ATP-hydrolases activity of cell membranes of rat colon smooth muscle and kidney].

Molecular biology of the stress response in the early embryo and its stem cells.

Association between maternal urinary arsenic species and infant cord blood leptin levels in a New Hampshire Pregnancy Cohort.

Acute systemic accumulation of acrolein in mice by inhalation at a concentration similar to that in cigarette smoke.

Continuous renal replacement therapy circuit failure after antidote administration.

Dose and temporal effects on gene expression profiles of urothelial cells from rats exposed to diuron.

Effect of atrazine and fenitrothion at no-observed-effect-levels (NOEL) on amphibian and mammalian corticosterone-binding-globulin (CBG).

[Comparative study of different methods of blood purification treatment of paraquat intoxication].

Diagnostic and therapeutic approach for acute paraquat intoxication.

Carcinogenicity of metamifop, a novel herbicide, in Wistar rats following oral administration for 104 weeks.

Toxic effects of paraquat on cytokine expression in common carp, *Cyprinus carpio* L.

A critical review of the epidemiology of Agent Orange/TCDD and prostate cancer.

Effects of atrazine and chlorpyrifos on DNA methylation in the liver, kidney and gill of the common carp (*Cyprinus carpio* L.).

Histopathological and biochemical changes in goldfish kidney due to exposure to the herbicide Sencor may be related to induction of oxidative stress.

Liposomal inhibition of acrolein-induced injury in rat cultured urothelial cells.

Indicators of the statuses of amphibian populations and their potential for exposure to atrazine in four midwestern U.S. conservation areas.

Pro- and anti-inflammatory cytokine expression in immune organs of the common carp exposed to atrazine and chlorpyrifos.

Comparison between kidney and continuous plasma perfusion for paraquat elimination.

Glucocorticoid with cyclophosphamide for paraquat-induced lung fibrosis.

Evaluation of potential endocrine activity of 2,4-dichlorophenoxyacetic acid using in vitro assays.

Induction of micronuclei and nuclear abnormalities in tadpoles of the common toad (*Rhinella arenarum*) treated with the herbicides Liberty[®] and glufosinate-ammonium.

Changes in phosphatidylinositol 3-kinase 55 kDa gamma expression and subcellular localization may be caspase 6 dependent in paraquat-induced SH-SY5Y apoptosis.

Time course of urothelial changes in rats and mice orally administered arsenite.

Acrolein- and 4-Aminobiphenyl-DNA adducts in human bladder mucosa and tumor tissue and their mutagenicity in human urothelial cells.

Hemolytic uremic syndrome associated with paraquat intoxication.

[Tumor necrosis factor- α induced protein 6 attenuates acute kidney injury following paraquat poisoning in rats].

Protective effects of exogenous β -hydroxybutyrate on paraquat toxicity in rat kidney.

Diuron-induced rat urinary bladder carcinogenesis: mode of action and human relevance evaluations using the International Programme on Chemical Safety framework.

Mesoamerica's mystery killer.

α -Tocopheryl succinate pre-treatment attenuates quinone toxicity in prostate cancer PC3 cells.

[The prognostic value of the Acute Kidney Injury Network criteria in patients with acute paraquat poisoning].

Agent Orange and heart disease: is there a connection?

Methemoglobinemia associated with metaflumizone poisoning.

Toxicological properties of the thiolated inorganic arsenic and arsenosugar metabolite thio-dimethylarsinic acid in human bladder cells.

Kidney biomarkers in MCPA-induced acute kidney injury in rats: reduced clearance enhances early biomarker performance.

Cytotoxicity and genotoxicity caused by yttrium oxide nanoparticles in HEK293 cells.

Tissue-specific induction of oxidative stress in goldfish by 2,4-dichlorophenoxyacetic acid: mild in brain and moderate in liver and kidney.

Immunological effects of paraquat on common carp, *Cyprinus carpio* L.

Glyphosate, hard water and nephrotoxic metals: are they the culprits behind the epidemic of chronic kidney disease of unknown etiology in Sri Lanka?

Use of a glyphosate-based herbicide-induced nephrotoxicity model to investigate a panel of kidney injury biomarkers.

Association between Agent Orange exposure and nonmelanotic invasive skin cancer: a pilot study.

Evaluation of metabolic enzymes in response to Excel Mera 71, a glyphosate-based herbicide, and recovery pattern in freshwater teleostean fishes.

Hemodialysis clearance of glyphosate following a life-threatening ingestion of glyphosate-surfactant herbicide.

Characterization of intracellular inclusions in the urothelium of mice exposed to inorganic arsenic.

Arsenic methylation capacity and obesity are associated with insulin resistance in obese children and adolescents.

Agent Orange exposure and risk of death in Korean Vietnam veterans: Korean Veterans Health Study.

MDR1 transporter protects against paraquat-induced toxicity in human and mouse proximal tubule cells.

XRCC1 Arg194Trp and Arg399Gln polymorphisms and arsenic methylation capacity are associated with urothelial carcinoma.

Acrolein exposure is associated with increased cardiovascular disease risk.

Interaction of plasma glutathione redox and folate deficiency on arsenic methylation capacity in Bangladeshi adults.

Differences of urinary arsenic metabolites and methylation capacity between individuals with and without skin lesions in Inner Mongolia, Northern China.

Arsenic methylation capacity and developmental delay in preschool children in Taiwan.

Advanced glycation end products of beta2-microglobulin in uremic patients as determined by high resolution mass spectrometry.

Prenatal exposure to organophosphate pesticides and neurobehavioral development of neonates: a birth cohort study in Shenyang, China.

Urinary biomarkers of exposure to insecticides, herbicides, and one insect repellent among pregnant women in Puerto Rico.

Urinary excretion of arsenic following rice consumption.

Urinary metabolomics revealed arsenic internal dose-related metabolic alterations: a proof-of-concept study in a Chinese male cohort.

Evaluation of urinary speciated arsenic in NHANES: issues in interpretation in the context of potential inorganic arsenic exposure.

Pesticide exposures to migrant farmworkers in Eastern NC: detection of metabolites in farmworker urine associated with housing violations and camp characteristics.

Metabolic pathway elucidation towards time- and dose-dependent electrophoretic screening of stable oxidative phenolic compounds.

Environmental determinants of the urinary concentrations of herbicides during pregnancy: the PELAGIE mother-child cohort (France).

Organophosphate pesticide exposure and dialkyl phosphate urinary metabolites among chili farmers in northeastern Thailand.

Health effects and arsenic species in urine of copper smelter workers.

Rice consumption and urinary concentrations of arsenic in US adults.

In-vivo evaluation of the permeability of the blood-brain barrier to arsenicals, molybdate, and methylmercury by use of online microdialysis-packed minicolumn-inductively coupled plasma mass spectrometry.

The factors influencing urinary arsenic excretion and metabolism of workers in steel and iron smelting foundry.

A novel multi-amplification photoelectrochemical immunoassay based on copper(II) enhanced polythiophene sensitized graphitic carbon nitride nanosheet.

Silencing KRAS overexpression in arsenic-transformed prostate epithelial and stem cells partially mitigates malignant phenotype.

In vivo kinetics of the uremic toxin p-cresyl sulfate in mice with variable renal function.

Dynamic changes in metabolic profiles of rats subchronically exposed to mequindox.

Uremic toxicity and sclerostin in chronic kidney disease patients.

Effect of mitochondrial metabolism-interfering agents on cancer cell mitochondrial function and radio/chemosensitivity.

Low brain iron effects and reversibility on striatal dopamine dynamics.

The novel regulations of MEF2A, CAMKK2, CALM3, and TNNI3 in ventricular hypertrophy induced by arsenic exposure in rats.

Malondialdehyde, antioxidant enzymes, and renal tubular functions in children with iron deficiency or iron-deficiency anemia.

Association of urinary phenols with increased body weight measures and obesity in children and adolescents.

Commentary on nephropathy and longitudinal studies of diabetes, and dioxins, furans, and dioxin-like PCBs.

A mouse strain less responsive to dioxin-induced prostaglandin E2 synthesis is resistant to the onset of neonatal hydronephrosis.

Human organic anion transporters function as a high-capacity transporter for p-cresyl sulfate, a uremic toxin.

Cardiac myocyte-specific AHR activation phenocopies TCDD-induced toxicity in zebrafish.

Urinary p-cresol is elevated in young French children with autism spectrum disorder: a replication study.

Inhibition of human drug-metabolising cytochrome P450 and UDP-glucuronosyltransferase enzyme activities in vitro by uremic toxins.

Effect of short-term synbiotic treatment on plasma p-cresol levels in patients with chronic renal failure: a randomized clinical trial.

In utero exposure to TCDD alters Wnt signaling during mouse prostate development: linking ventral prostate agenesis to downregulated β^2 -catenin signaling.

Uraemic toxins and cardiovascular disease across the chronic kidney disease spectrum: an observational study.

The uremic toxicity of indoxyl sulfate and p-cresyl sulfate: a systematic review.

Uremic toxin p-cresol induces Akt-pathway-selective insulin resistance in bone marrow-derived mesenchymal stem cells.

Indoxyl sulfate and p-cresyl sulfate in chronic kidney disease. Could these toxins modulate the antioxidant Nrf2-Keap1 pathway?

Gestational and lactational exposure to the polychlorinated biphenyl mixture Aroclor 1254 modulates retinoid homeostasis in rat offspring.

Clinical and etiological heterogeneity in patients with tracheo-esophageal malformations and associated anomalies.

Long-term low-dose exposure of human urothelial cells to sodium arsenite activates lipocalin-2 via promoter hypomethylation.

Androgen receptor signaling in hepatocellular carcinoma and pancreatic cancers.

Pesticide methoxychlor promotes the epigenetic transgenerational inheritance of adult-onset disease through the female germline.

The association of uremic toxins and inflammation in hemodialysis patients.

Role of the autonomic nervous system and baroreflex in stress-evoked cardiovascular responses in rats.

Joint effects of urinary arsenic methylation capacity with potential modifiers on arsenicosis: a cross-sectional study from an endemic arsenism area in Huhhot Basin, northern China.

Dioxins, furans and dioxin-like PCBs in human blood: causes or consequences of diabetic nephropathy?

Metabolites of tobacco smoking and colorectal cancer risk.

Protective effect of ellagic acid against TCDD-induced renal oxidative stress: modulation of CYP1A1 activity and antioxidant defense mechanisms.

Uremic toxins impair human bone marrow-derived mesenchymal stem cells functionality in vitro.

Cardiovascular disease relates to intestinal uptake of p-cresol in patients with chronic kidney disease.

Relationship between urine dichlorophenol levels and asthma morbidity.

An adsorbent monolith device to augment the removal of uraemic toxins during haemodialysis.

Determinants of cognitive performance in children relying on cyanogenic cassava as staple food.

Peroxiredoxin I protein, a potential biomarker of hydronephrosis in fetal mice exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Heritability and clinical determinants of serum indoxyl sulfate and p-cresyl sulfate, candidate biomarkers of the human microbiome enterotype.

Protein-bound uremic toxins, inflammation and oxidative stress: a cross-sectional study in stage 3-4 chronic kidney disease.

Interaction between arsenic exposure from drinking water and genetic susceptibility in carotid intima-media thickness in Bangladesh.

Evidence that p-cresol and IL-6 are adsorbed by the HFR cartridge: towards a new strategy to decrease systemic inflammation in dialyzed patients?

Nanoencapsulation of DMSA monoester for better therapeutic efficacy of the chelating agent against arsenic toxicity.

Aberrant microRNA expression likely controls RAS oncogene activation during malignant transformation of human prostate epithelial and stem cells by arsenic.

The gut microbiome, kidney disease, and targeted interventions.

The FIND-CKD study--a randomized controlled trial of intravenous iron versus oral iron in non-dialysis chronic kidney disease patients: background and rationale.

Uremic toxin development in living kidney donors: a longitudinal study.

The aryl hydrocarbon receptor-activating effect of uremic toxins from tryptophan metabolism: a new concept to understand cardiovascular complications of chronic kidney disease.

Effectiveness of wetting method for control of konzo and reduction of cyanide poisoning by removal of cyanogens from cassava flour.

Protein-bound molecules: a large family with a bad character.

2,3,7,8-Tetrachlorodibenzo-p-dioxin exposure and prostate cancer: a meta-analysis of cohort studies.

Prominent accumulation in hemodialysis patients of solutes normally cleared by tubular secretion.

Effect of uremic serum and uremic toxins on drug metabolism in human microsomes.

Urinary concentrations of dichlorophenol pesticides and obesity among adult participants in the U.S. National Health and Nutrition Examination Survey (NHANES) 2005-2008.

Protein-bound uremic toxins: new culprits of cardiovascular events in chronic kidney disease patients.

Predominant role of cytosolic phospholipase A₂ in dioxin-induced neonatal hydronephrosis in mice.

Exploration of novel predictive markers in rat plasma of the early stages of chronic renal failure.

Elevated blood pressure in offspring of rats exposed to diverse chemicals during pregnancy.

Methylarsonous acid causes oxidative DNA damage in cells independent of the ability to biomethylate inorganic arsenic.

Modulation of telomerase activity, bTERT and c-Myc induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin during Bovine Herpesvirus 1 infection in MDBK cells.

Effects of intestinal bacteria-derived p-cresyl sulfate on Th1-type immune response in vivo and in vitro.

Organic anion transporting polypeptides 1B1 and 1B3 play an important role in uremic toxin handling and drug-uremic toxin interactions in the liver.

[The functional state of the kidneys after adenosine triphosphate-sensitive potassium channels activation in experimental acute hypoxia].

What would you like to eat, Mr CKD Microbiota? A Mediterranean Diet, please!

Effect of terbuthylazine-2-hydroxy at environmental concentrations on early life stages of common carp (*Cyprinus carpio* L.).

Expansion of urease- and uricase-containing, indole- and p-cresol-forming and contraction of short-chain fatty acid-producing intestinal microbiota in ESRD.

P-cresyl sulfate is a valuable predictor of clinical outcomes in pre-ESRD patients.

In utero and lactational exposure to a mixture of environmental contaminants detected in Canadian Arctic human populations alters retinoid levels in rat offspring with low margins of exposure.

Effects of AST-120 on blood concentrations of protein-bound uremic toxins and biomarkers of cardiovascular risk in chronic dialysis patients.

Oral iron for patients receiving dialysis: what is the evidence?

Micronucleus frequency in copper-mine workers exposed to arsenic is modulated by the AS3MT Met287Thr polymorphism.

Serum concentrations of p-cresyl sulfate and indoxyl sulfate, but not inflammatory markers, increase in incident peritoneal dialysis patients in parallel with loss of residual renal function.

p-cresyl sulphate has pro-inflammatory and cytotoxic actions on human proximal tubular epithelial cells.

Sodium meta-arsenite induces reactive oxygen species-dependent apoptosis, necrosis, and autophagy in both androgen-sensitive and androgen-insensitive prostate cancer cells.

[Medication use during the first trimester of pregnancy: drug safety and adoption of folic acid and ferrous sulphate].

Subchronic arsenic exposure through drinking water alters vascular redox homeostasis and affects physical health in rats.

Collateral sensitivity: ABCG2-overexpressing cells are more vulnerable to oxidative stress.

Accumulation of heme oxygenase-1 (HSP32) in *Xenopus laevis* A6 kidney epithelial cells treated with sodium arsenite, cadmium chloride or proteasomal inhibitors.

Effects of atrazine on the oxidative damage of kidney in Wister rats.

Human urinary biomarkers of dioxin exposure: analysis by metabolomics and biologically driven data dimensionality reduction.

4-Amino-2-chlorophenol: Comparative in vitro nephrotoxicity and mechanisms of bioactivation.

Intersection of AHR and Wnt signaling in development, health, and disease.

Urinary VEGF and PGE2 levels and the association with arsenical metabolites in copper-smelting workers.

^{11}C -ORM-13070, a novel PET ligand for brain α_1 -adrenoceptors: radiometabolism, plasma pharmacokinetics, whole-body distribution and radiation dosimetry in healthy men.

Can oral therapy reduce uremic toxins?

Effect of increasing dietary fiber on plasma levels of colon-derived solutes in hemodialysis patients.

Structure- and concentration-specific assessment of the physiological reactivity of α -dicarbonyl glucose degradation products in peritoneal dialysis fluids.

Histopathologic alterations associated with global gene expression due to chronic dietary TCDD exposure in juvenile zebrafish.

A case report of acute severe paraquat poisoning and long-term follow-up.

Synthesis, cytotoxicity, antimicrobial and anti-biofilm activities of novel pyrazolo[3,4-b]pyridine and pyrimidine functionalized 1,2,3-triazole derivatives.

Effects of uremic toxin p-cresol on proliferation, apoptosis, differentiation, and glucose uptake in 3T3-L1 cells.

Comparative oxidative stress, metallothionein induction and organ toxicity following chronic exposure to arsenic, lead and mercury in rats.

Guanosine regulates adenosine levels in the kidney.

Demographics, clinical characteristics and management of herbicide poisoning in tertiary care hospital.

Protective effect of quercetin on atrazine-induced oxidative stress in the liver, kidney, brain, and heart of adult wistar rats.

Glyphosate surfactant herbicide poisoning and management.

Biochemical, oxidative and histological changes caused by sub-acute oral exposure of some synthetic cyanogens in rats: ameliorative effect of α -ketoglutarate.

Fish oil rich in eicosapentaenoic acid protects against oxidative stress-related renal dysfunction induced by TCDD in Wistar rats.

Novel resveratrol-based substrates for human hepatic, renal, and intestinal UDP-glucuronosyltransferases.

Urinary concentrations of 2,4-dichlorophenol and 2,5-dichlorophenol in the U.S. population (National Health and Nutrition Examination Survey, 2003-2010): trends and predictors.

A novel MDCKII in vitro model for assessing ABCG2-drug interactions and regulation of ABCG2 transport activity in the caprine mammary gland by environmental pollutants and pesticides.

Treatment with a cannabinoid receptor 2 agonist decreases severity of established cystitis.

Cancer-promoting and Inhibiting Effects of Dietary Compounds: Role of the Aryl Hydrocarbon Receptor (AhR).

Human urinary excretion of non-persistent environmental chemicals: an overview of Danish data collected between 2006 and 2012.

[Effect of synchronous perfusion of NaN₃ in changes in content of cholinergic neurotransmitter in medial prefrontal cortex and hippocampal extra-cellular fluid].

Mechanism for the protective effect of diallyl disulfide against cyclophosphamide acute urotoxicity in rats.

Urinary metabolites of a polycyclic aromatic hydrocarbon and volatile organic compounds in relation to lung cancer development in lifelong never smokers in the Shanghai Cohort Study.

Urinary concentrations of trichlorophenols in the Korean adult population: results of the National Human Biomonitoring Survey 2009.

Republished study: long-term toxicity of a Roundup herbicide and a Roundup-tolerant genetically modified maize.

History of Chemistry in the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK).

Effects of short term exposure of atrazine on the liver and kidney of normal and diabetic rats.

Influence of zinc supplementation on histopathological changes in the stomach, liver, kidney, brain, pancreas and spleen during subchronic exposure of Wistar rats to glyphosate.

Ameliorative Effect of Tephrosia Purpurea in Arsenic-induced Nephrotoxicity in Rats.

[Clarification of molecular targets of dioxin toxicity].

Identification of arsenolipids and their degradation products in cod-liver oil.

¹H/¹³C-ICP-MS determinations of unexposed UK urinary arsenic speciation reference values.

Diuron metabolites and urothelial cytotoxicity: in vivo, in vitro and molecular approaches.

Predictors of acute respiratory distress syndrome in patients with paraquat intoxication.

[Cyanamide-ethanol reaction induced shock: report of a case and literature review].

An F1-extended one-generation reproductive toxicity study in Crl:CD(SD) rats with 2,4-dichlorophenoxyacetic acid.

High level of dioxin-TEQ in tissue is associated with Agent Orange exposure but not with biochemical recurrence after radical prostatectomy.

Accumulation, histopathological effects and response of biochemical markers in the spleens and head kidneys of common carp exposed to atrazine and chlorpyrifos.

Treatment of acute paraquat intoxication using recommended megadose of vitamin C: a reappraisal.

Dietary predictors of young children's exposure to current-use pesticides using urinary biomonitoring.

Cancer incidence in Korean Vietnam veterans during 1992-2003: the Korean veterans health study.

Vietnam veterans: getting old, getting sick--is this service related?

The reversal of paraquat-induced mitochondria-mediated apoptosis by cycloartenyl ferulate, the important role of Nrf2 pathway.

Renal biomarkers predict nephrotoxicity after paraquat.

Dose-response of diuron [3-(3,4-dichlorophenyl)-1,1-dimethylurea] in the urothelial mucosa of Wistar rats.

Evaluation of hydroxyatrazine in the endocrine disruptor screening and testing program's male and female pubertal protocols.

Effect of intravenous lipid emulsion in patients with acute glyphosate intoxication.

Comparisons of metabolic and physiological changes in rats following short term oral dosing with pesticides commonly found in food.

Short-term atrazine exposure causes behavioral deficits and disrupts monoaminergic systems in male C57BL/6 mice.

The relationship between Agent Orange and prostate specific antigen: a comparison of a hotspot and a non-sprayed area in Vietnam.

Quercetin exacerbates the effects of subacute treatment of atrazine on reproductive tissue antioxidant defence system, lipid peroxidation and sperm quality in rats.

Agent Orange as a risk factor for high-grade prostate cancer.

Effects of the herbicide atrazine in neotropical catfish (*Rhamdia quelen*).

The suppressor of cytokine signaling 2 (SOCS2) modulating the neurotransmitters release in *Eriocheir sinensis*.

In vitro toxicological characterization of two arsenosugars and their metabolites.

Cytotoxicity on human cells of Cry1Ab and Cry1Ac Bt insecticidal toxins alone or with a glyphosate-based herbicide.

Propanil-induced histopathological changes in the liver and kidney of mice.

[Effect of treatment with early blood purification combined with prednisone and cyclophosphamide for patients with acute paraquat poisoning].

Paraquat poisoning in pediatric patients.

Reduction of dimethylarsinic acid to the highly toxic dimethylarsinous acid by rats and rat liver cytosol.

Effect of dietary treatment with dimethylarsinous acid (DMA(III)) on the urinary bladder epithelium of arsenic (+3 oxidation state) methyltransferase (As3mt) knockout and C57BL/6 wild type female mice.

[The significance of urine N-acetyl-beta-D-glucosaminidase in kidney injury with patients acute paraquat poisoning].

Urologic cancer risks for veterans exposed to Agent Orange.

Renal replacement therapy in acute poisonings--one center experience.

The uremic toxin acrolein promotes suicidal erythrocyte death.

[Hypoxia-inducible factor-1 α expression in renal tissue of rats with paraquat poisoning].

Acute kidney injury following Paraquat poisoning in India.

Alterations in activity and mRNA expression of acetylcholinesterase in the liver, kidney and gill of common carp exposed to atrazine and chlorpyrifos.

Risk of total and aggressive prostate cancer and pesticide use in the Agricultural Health Study.

Involvement of interleukin-6-regulated nitric oxide synthase in hemorrhagic cystitis and impaired bladder contractions in young rats induced by acrolein, a urinary metabolite of cyclophosphamide.

Effects of atrazine and chlorpyrifos on the mRNA levels of HSP70 and HSC70 in the liver, brain, kidney and gill of common carp (*Cyprinus carpio* L.).

Oxidative stress in ventral prostate, ovary, and breast by 2,4-dichlorophenoxyacetic acid in pre- and postnatal exposed rats.

Arsenic metabolism efficiency has a causal role in arsenic toxicity: Mendelian randomization and gene-environment interaction.

Comparative study of the possible protective effects of cinnamic acid and cinnamaldehyde on cisplatin-induced nephrotoxicity in rats.

Cationic uremic toxins affect human renal proximal tubule cell functioning through interaction with the organic cation transporter.

Role of aldose reductase in the metabolism and detoxification of carnosine-acrolein conjugates.

Extracts from black carrot tissue culture as potent anticancer agents.

Arsenic exposure from drinking water, arsenic methylation capacity, and carotid intima-media thickness in Bangladesh.

Glyphosate and AMPA inhibit cancer cell growth through inhibiting intracellular glycine synthesis.

Activation of cannabinoid receptor 2 inhibits experimental cystitis.

Association of exposure to phenols and idiopathic male infertility.

Identification of aldo-keto reductases as NRF2-target marker genes in human cells.

Early growth response protein 1 upregulation and nuclear translocation by 2'-benzyloxycinnamaldehyde induces prostate cancer cell death.

Adenylate cyclase and the cyclic AMP receptor protein modulate stress resistance and virulence capacity of uropathogenic *Escherichia coli*.

Use of biometric, hematologic, and plasma biochemical variables, and histopathology to assess the chronic effects of the herbicide prometryn on Common Carp.

Biomonitoring short- and long-term exposure to the herbicide terbuthylazine in agriculture workers and in the general population using urine and hair specimens.

[Distribution of arsenic species and its DNA damage in subchronic arsenite-exposed mice].

Semi-automated solid phase extraction method for the mass spectrometric quantification of 12 specific metabolites of organophosphorus pesticides, synthetic pyrethroids, and select herbicides in human urine.

The relationships between pesticide metabolites and neurobehavioral test performance in the third National Health and Nutrition Examination Survey.

Redox-sensitive glycogen synthase kinase 3^β-directed control of mitochondrial permeability transition: rheostatic regulation of acute kidney injury.

Arsenic exposure affects plasma insulin-like growth factor 1 (IGF-1) in children in rural Bangladesh.

Does the adequacy parameter $Kt/V(\text{urea})$ reflect uremic toxin concentrations in hemodialysis patients?

Kidney hypoxia, attributable to increased oxygen consumption, induces nephropathy independently of hyperglycemia and oxidative stress.

Metabonomic study on the biochemical response of spontaneously hypertensive rats to chronic taurine supplementation using $(1)\text{H}$ NMR spectroscopic urinalysis.

Protein-bound uremic toxins: new targets to prevent insulin resistance and dysmetabolism in patients with chronic kidney disease.

Gastrointestinal-related uremic toxins in peritoneal dialysis: a pilot study with a 5-year follow-up.

Control of konzo by detoxification of cassava flour in three villages in the Democratic Republic of Congo.

A population-based case-control study of urinary arsenic species and squamous cell carcinoma in New Hampshire, USA.

Indolic uremic solutes increase tissue factor production in endothelial cells by the aryl hydrocarbon receptor pathway.

Impairment of autophagy: from hereditary disorder to drug intoxication.

Renal clearance and intestinal generation of p-cresyl sulfate and indoxyl sulfate in CKD.

The effect of partial outlet obstruction on calpain and phospholipase-2 activities: analyzed by severity and duration.

Parental phenols exposure and spontaneous abortion in Chinese population residing in the middle and lower reaches of the Yangtze River.

Numerous protein-bound solutes are cleared by the kidney with high efficiency.

Plasma p-cresol lowering effect of sevelamer in peritoneal dialysis patients: evidence from a Cross-Sectional Observational Study.

Aromatic hydrocarbon receptor inhibits lysophosphatidic acid-induced vascular endothelial growth factor-A expression in PC-3 prostate cancer cells.

Rethinking the composition of a rational antibiotic arsenal for the 21st century.

Renal metabolic profiling of early renal injury and renoprotective effects of *Poria cocos* epidermis using UPLC Q-TOF/HSMS/MSE.

A prospective study of arsenic exposure, arsenic methylation capacity, and risk of cardiovascular disease in Bangladesh.

Antioxidant and micronutrient-rich milk formula reduces lead poisoning and related oxidative damage in lead-exposed mice.

Skeletal muscle ryanodine receptor mutations associated with malignant hyperthermia showed enhanced intensity and sensitivity to triggering drugs when expressed in human embryonic kidney cells.

Retained organic solutes, patient characteristics and all-cause and cardiovascular mortality in hemodialysis: results from the retained organic solutes and clinical outcomes (ROSCO) investigators.

Does p-cresylglucuronide have the same impact on mortality as other protein-bound uremic toxins?

Effects of iron polymaltose complex, ferrous fumarate and ferrous sulfate treatments in anemic pregnant rats, their fetuses and placentas.

A phantom study on bladder and rectum dose measurements in brachytherapy of cervix cancer using FBX aqueous chemical dosimeter.

Severe anemia in 3 toddlers with gastric lactobezoar.

Nox4 as a potential therapeutic target for treatment of uremic toxicity associated to chronic kidney disease.

Removal of protein-bound, hydrophobic uremic toxins by a combined fractionated plasma separation and adsorption technique.

p-Cresyl sulfate causes renal tubular cell damage by inducing oxidative stress by activation of NADPH oxidase.

Albumin is the main plasma binding protein for indoxyl sulfate and p-cresyl sulfate.

An integrated plasma and urinary metabolomic study using UHPLC-MS: intervention effects of Epimedium koreanum on 'Kidney-Yang Deficiency syndrome' rats.

Inhibition of constitutive aryl hydrocarbon receptor (AhR) signaling attenuates androgen independent signaling and growth in (C4-2) prostate cancer cells.

Differences in urinary arsenic metabolites between diabetic and non-diabetic subjects in Bangladesh.

Cases from NACCT acute and intensive care symposium: altered mental status, seizures, and rash in a fumigation company employee.

Exhaled breath and fecal volatile organic biomarkers of chronic kidney disease.

Spontaneous renal tumors in two rats from a thirteen week rodent feeding study with grain from molecular stacked trait lepidopteran and coleopteran resistant (DP-4114-3) maize.

Of pills, plants, and paraquat: the relevance of poison centers in emergency medicine.

Evaluation of gene expression changes in human primary uroepithelial cells following 24-hr exposures to inorganic arsenic and its methylated metabolites.

Urinary p-cresol in autism spectrum disorder.

A novel UPLC-MS-MS method for simultaneous determination of seven uremic retention toxins with cardiovascular relevance in chronic kidney disease patients.

Intrarenal metabolomic investigation of chronic kidney disease and its TGF- β 1 mechanism in induced-adenine rats using UPLC Q-TOF/HSMS/MS(E).

An update on uremic toxins.

The effect of cigarette smoke and arsenic exposure on urothelial carcinoma risk is modified by glutathione S-transferase M1 gene null genotype.

[Molecular mechanisms for uremic toxin-induced oxidative tissue damage via a cardiovascular-renal connection].

Increased kidney metabolism as a pathway to kidney tissue hypoxia and damage: effects of triiodothyronine and dinitrophenol in normoglycemic rats.

Removal of protein-bound uraemic toxins by haemodialysis.

Successful treatment of severe iron intoxication with gastrointestinal decontamination, deferoxamine, and hemodialysis.

Interactions between urinary 4-tert-octylphenol levels and metabolism enzyme gene variants on idiopathic male infertility.

Clinical benefits of predilution on-line hemodiafiltration.

In vivo efficacy of ferrihydrite as an enterosorbent for arsenic: short-term evaluation in rodents.

p-Cresyl sulfate promotes insulin resistance associated with CKD.

Association between uremic toxins and depression in patients with chronic kidney disease undergoing maintenance hemodialysis.

Uremic toxins inhibit renal metabolic capacity through interference with glucuronidation and mitochondrial respiration.

p-Cresol sulfate and indoxyl sulfate induce similar cellular inflammatory gene expressions in cultured proximal renal tubular cells.

Associations among chronic kidney disease, high total p-cresylsulfate and major adverse cardiac events.

Modulation of aryl hydrocarbon receptor-regulated genes by acute administration of ammonium metavanadate in kidney, lung and heart of C57BL/6 mice.

Role of pigment epithelium-derived factor (PEDF) in arsenic-induced cell apoptosis of liver and brain in a rat model.

Investigation of ifosfamide nephrotoxicity induced in a liver-kidney co-culture biochip.

Androgen receptor CAG repeat length modifies the effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on receptor activity in human prostate cells.

[Classical oxazaphosphorines--metabolism and therapeutic properties--new implications].

Glyphosate, pathways to modern diseases II: Celiac sprue and gluten intolerance.

Effects of oral anorexiant sibutramine on the expression of cytochromes P450s in human hepatocytes and cancer cell lines.

Characterization of bladder sensory neurons in the context of myelination, receptors for pain modulators, and acute responses to bladder inflammation.

Imidazolium-based ionic liquid-type surfactant as pseudostationary phase in micellar electrokinetic chromatography of highly hydrophilic urinary nucleosides.

Differential influences of various arsenic compounds on antioxidant defense system in liver and kidney of rats.

Biomarkers of oral exposure to 3-nitro-1,2,4-triazol-5-one (NTO) and 2,4-dinitroanisole (DNAN) in blood and urine of rhesus macaques (*Macaca mulatta*).

Knockout of the aryl hydrocarbon receptor results in distinct hepatic and renal phenotypes in rats and mice.

Assessment of arsenic exposure by measurement of urinary speciated inorganic arsenic metabolites in workers in a semiconductor manufacturing plant.

Paraquat Exposure Up-regulates Cyclooxygenase-2 in the Lungs, Liver and Kidneys in Rats.

Prenatal exposure to environmental phenols: concentrations in amniotic fluid and variability in urinary concentrations during pregnancy.

Mixed matrix hollow fiber membranes for removal of protein-bound toxins from human plasma.

p-Cresyl sulfate induces osteoblast dysfunction through activating JNK and p38 MAPK pathways.

Urinary glycol ether metabolites in women and time to pregnancy: the PELAGIE cohort.

Gene expression and pathologic alterations in juvenile rainbow trout due to chronic dietary TCDD exposure.

Serum arylhydrocarbon receptor transactivating activity is elevated in type 2 diabetic patients with diabetic nephropathy.

Acute toxicity of some synthetic cyanogens in rats: time-dependent cyanide generation and cytochrome oxidase inhibition in soft tissues after sub-lethal oral intoxication.

Emerging causes of iron deficiency anemia refractory to oral iron supplementation.

Influence of GSTT1 Genetic Polymorphisms on Arsenic Metabolism.

Evaluating effects of penicillin treatment on the metabolome of rats.

Radiosynthesis and evaluation of new β -1-adrenoceptor antagonists as PET radioligands for brain imaging.

Biomarkers of toluene exposure in rats: mercapturic acids versus traditional indicators (urinary hippuric acid and o-cresol and blood toluene).

Microbial-mammalian cometabolites dominate the age-associated urinary metabolic phenotype in Taiwanese and American populations.

Polychlorodibenzodioxin and -furan and dioxin-like polychlorobiphenyl distribution in tissues and dairy products of dairy buffaloes.

Validation of estimates of past exposure to arsenic in drinking water using historical urinary arsenic concentrations.

Oxidative DNA damage after acute exposure to arsenite and monomethylarsonous acid in biomethylation-deficient human cells.

Cyp1a reporter zebrafish reveals target tissues for dioxin.

Urinary Arsenic Concentrations and their Associated Factors in Korean Adults.

Oxidative stress and MAPK involved into ATF2 expression in immortalized human urothelial cells treated by arsenic.

Dietary carnosine prevents early atherosclerotic lesion formation in apolipoprotein E-null mice.

Protective effect of conjugated linolenic acid isomers present in vegetable oils against arsenite-induced renal toxicity in rat model.

Consumption of deep-fried foods and risk of prostate cancer.

Switchable skin window induced by optical clearing method for dermal blood flow imaging.

TCDD inhibition of canonical Wnt signaling disrupts prostatic bud formation in mouse urogenital sinus.

p-cresol induces disruption of cardiomyocyte adherens junctions.

Metabolism of profenofos to 4-bromo-2-chlorophenol, a specific and sensitive exposure biomarker.

Determination of urinary 6-mercaptopurine and three of its metabolites by HPLC-UV coupled with the iodine-azide reaction.

Global metabolomics and targeted steroid profiling reveal that rifampin, a strong human PXR activator, alters endogenous urinary steroid markers.

Effect of ulinastatin on paraquat-induced-oxidative stress in human type II alveolar epithelial cells.

Suppression of advanced glycation and lipoxidation end products by angiotensin II type-1 receptor blocker candesartan in type 2 diabetic patients with essential hypertension.

Cytotoxic effects of p-cresol in renal epithelial tubular cells.

Ameliorative Effects of Acacia Honey against Sodium Arsenite-Induced Oxidative Stress in Some Viscera of Male Wistar Albino Rats.

Correlation between Serum Levels of Protein-Bound Uremic Toxins in Hemodialysis Patients Measured by LC/MS/MS.

Polyamines and their metabolites as diagnostic markers of human diseases.

Bisphenol a in chronic kidney disease.

Cancer incidence in pulmonary vasculitis.

Neonatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin increases the mRNA expression of prostatic proteins in C57BL mice.

Diuron-induced rat bladder epithelial cytotoxicity.

The changes of calretinin immunoreactivity in paraquat-induced nephrotoxic rats.

[Clinical studies of dynamic changes on the renal injury indicators of acute paraquat poisoning].

[Effects of human umbilical cord mesenchymal stem cells in the treatment of paraquat-induced lung injury].

Effects of sub-lethal exposure of rats to the herbicide glyphosate in drinking water: glutathione transferase enzyme activities, levels of reduced glutathione and lipid peroxidation in liver, kidneys and small intestine.

Long term toxicity of a Roundup herbicide and a Roundup-tolerant genetically modified maize.

Haematology and blood chemistry changes in mice treated with terbuthylazine and its formulation Radazin TZ-50.

Biochemical and histological evaluation of kidney damage after sub-acute exposure to 2,4-dichlorophenoxyacetic herbicide in rats: involvement of oxidative stress.

Rice consumption and urinary arsenic concentrations in U.S. children.

Central nervous system damage due to acute paraquat poisoning: a neuroimaging study with 3.0 T MRI.

Review of 2,4-dichlorophenoxyacetic acid (2,4-D) biomonitoring and epidemiology.

Overexpression of stanniocalcin-1 inhibits reactive oxygen species and renal ischemia/reperfusion injury in mice.

[Early continuous dialysis in acute glyphosate-surfactant poisoning].

[Influence factors for prognosis in patients with acute oral poisoning with paraquat].

The time between paraquat ingestion and a negative dithionite urine test in an independent risk factor for death and organ failure in acute paraquat intoxication.

Pathological and toxicological findings in glyphosate-surfactant herbicide fatality: a case report.

Pentachlorophenol decreases tumor-cell-binding capacity and cell-surface protein expression of human natural killer cells.

Glucocorticoid with cyclophosphamide for paraquat-induced lung fibrosis.

siRNA-mediated knock-down of NOX3: therapy for hearing loss?

Histopathological changes and antioxidant response in brain and kidney of common carp exposed to atrazine and chlorpyrifos.

Efficacy of vitamin C against liver and kidney damage induced by paraquat toxicity.

Methyl bromide exposure and cancer risk in the Agricultural Health Study.

Exposure to the pesticide linuron affects androgen-dependent gene expression in the three-spined stickleback (*Gasterosteus aculeatus*).

Hormones and endocrine-disrupting chemicals: low-dose effects and nonmonotonic dose responses.

[Paraquat poisoning. Case report and overview].

Renal, hepatic, pulmonary and adrenal tumors induced by prenatal inorganic arsenic followed by dimethylarsinic acid in adulthood in CD1 mice.

[Presentation of a case of Paraquat poisoning].

Effects of short-term sodium chlorate exposure on pigs.

Effects of atrazine and chlorpyrifos on activity and transcription of glutathione S-transferase in common carp (*Cyprinus carpio* L.).

[Effects of hemoperfusion on oxidative stress, matrix metalloproteinases and their inhibitors in acute paraquat poisoning rabbits].

Effects of long-term exposure to simazine in real concentrations on common carp (*Cyprinus carpio* L.).

Plasma dioxin levels and cause-specific mortality in an occupational cohort of workers exposed to chlorophenoxy herbicides, chlorophenols and contaminants.

The effects of subchronic exposure to terbuthylazine on zebrafish.

Effects of low-concentrations of simazine on early life stages of common carp (*Cyprinus carpio* L.).

Intrastriatal pre-treatment with L-NAME protects rats from diquat neurotoxicity.

Sequential organ failure assessment score can predict mortality in patients with paraquat intoxication.

Effects of subchronic exposure to atrazine on zebrafish (*Danio rerio*).

The effects of subchronic exposure to metribuzin on *Danio rerio*.

Effect of chronic pesticide exposure in farm workers of a Mexico community.

Acute renal failure following penoxsulam poisoning.

Methylation capacity of arsenic and skin lesions in smelter plant workers.

Inverse correlation between stroke and urinary 3-hydroxypropyl mercapturic acid, an acrolein-glutathione metabolite.

Quantification of paraquat in postmortem samples by gas chromatography-ion trap mass spectrometry and review of the literature.

The relationship between obesity, insulin and arsenic methylation capability in Taiwan adolescents.

Endogenous hydrogen peroxide in the hypothalamic paraventricular nucleus regulates sympathetic nerve activity responses to L-glutamate.

Inhibitory effects of phosphodiesterase 5 inhibitor, tadalafil, on mechanosensitive bladder afferent nerve activities of the rat, and on acrolein-induced hyperactivity of these nerves.

Urinary metabolites as biomarkers of human exposure to atrazine: atrazine mercapturate in agricultural workers.

Binational arsenic exposure survey: methodology and estimated arsenic intake from drinking water and urinary arsenic concentrations.

Triazine residues in raw milk and infant formulas from Spanish northwest, by a diphasic dialysis extraction.

Increased expression of SVCT2 in a new mouse model raises ascorbic acid in tissues and protects against paraquat-induced oxidative damage in lung.

Determination of tissue to blood partition coefficients for nonvolatile herbicides, insecticides, and fungicides using negligible depletion solid-phase microextraction (nd-SPME) and ultrafiltration.

Modulation of the metabolism of airborne pollutants by glucoraphanin-rich and sulforaphane-rich broccoli sprout beverages in Qidong, China.

Effects of a wheat bran extract containing arabinoxylan oligosaccharides on gastrointestinal health parameters in healthy adult human volunteers: a double-blind, randomised, placebo-controlled, cross-over trial.

Arsenic urinary speciation in Mthfr deficient mice injected with sodium arsenate.

Influence of serum in hemodialysis patients on the expression of intestinal and hepatic transporters for the excretion of pravastatin.

Silibinin ameliorates arsenic induced nephrotoxicity by abrogation of oxidative stress, inflammation and apoptosis in rats.

Characterization of ecto-ATPase activity in the surface of LLC-PK1 cells and its modulation by ischemic conditions.

Environmental arsenic exposure and DNA methylation of the tumor suppressor gene p16 and the DNA repair gene MLH1: effect of arsenic metabolism and genotype.

The role of protein-bound uremic toxins on peripheral artery disease and vascular access failure in patients on hemodialysis.

A randomized controlled trial of oral heme iron polypeptide versus oral iron supplementation for the treatment of anaemia in peritoneal dialysis patients: HEMATOCRIT trial.

Ameliorating effects of quercetin and chrysin on 2,3,7,8-tetrachlorodibenzo- p-dioxin-induced nephrotoxicity in rats.

Necrosis and apoptosis of renal tubular epithelial cells in rats exposed to 3-methyl-4-nitrophenol.

Bath salt intoxication causing acute kidney injury requiring hemodialysis.

Quantification of p-cresol sulphate in human plasma by selected reaction monitoring.

Suicidal sodium azide intoxication: An analytical challenge based on a rare case.

Mild uncoupling of respiration and phosphorylation as a mechanism providing nephro- and neuroprotective effects of penetrating cations of the SkQ family.

Environmental factors affecting the urinary excretion of inorganic arsenic in the general population.

Cancer incidence in a chlorochemical plant in Isère, France: an occupational cohort study, 1979-2002.

Cellular distribution of cell cycle-related molecules in the renal tubules of rats treated with renal carcinogens for 28 days: relationship between cell cycle aberration and carcinogenesis.

High correlation between clearance of renal protein-bound uremic toxins (indoxyl sulfate and p-cresyl sulfate) and renal water-soluble toxins in peritoneal dialysis patients.

Urinary total arsenic and 8-hydroxydeoxyguanosine are associated with renal cell carcinoma in an area without obvious arsenic exposure.

In vivo regulation of the heme oxygenase-1 gene in humanized transgenic mice.

Trichosanthes dioica fruit ameliorates experimentally induced arsenic toxicity in male albino rats through the alleviation of oxidative stress.

Curcumin encapsulated in chitosan nanoparticles: a novel strategy for the treatment of arsenic toxicity.

Interaction between two sulfate-conjugated uremic toxins, p-cresyl sulfate and indoxyl sulfate, during binding with human serum albumin.

Arsenic methylation, GSTO1 polymorphisms, and metabolic syndrome in an arseniasis endemic area of southwestern Taiwan.

RP-HPLC-UV method coupled with post-column iodine-azide reaction for determination of free captopril in urine samples.

Quantitative imaging of arsenic and its species in goat following long term oral exposure.

Combination of Rad001 (everolimus) and propachlor synergistically induces apoptosis through enhanced autophagy in prostate cancer cells.

Critical role of microsomal prostaglandin E synthase-1 in the hydronephrosis caused by lactational exposure to dioxin in mice.

The impact of ferritin fluctuations on stable hemoglobin levels in hemodialysis patients.

Novel method for simultaneous determination of p-cresylsulphate and p-cresylglucuronide: clinical data and pathophysiological implications.

Inorganic arsenic and basal cell carcinoma in areas of Hungary, Romania, and Slovakia: a case-control study.

Ameliorative effect *Trichosanthes dioica* root against experimentally induced arsenic toxicity in male albino rats.

Uremic solutes from colon microbes.

A randomized controlled trial of intravenous or oral iron for posttransplant anemia in kidney transplantation.

A phytochemical approach to experimental metabolic syndrome-associated renal damage and oxidative stress.

Serum total p-cresol and indoxyl sulfate correlated with stage of chronic kidney disease in renal transplant recipients.

Suppression of Klotho expression by protein-bound uremic toxins is associated with increased DNA methyltransferase expression and DNA hypermethylation.

Selectively increasing the clearance of protein-bound uremic solutes.

A metabonomic study of biochemical changes characteristic of genetically hypertensive rats based on ¹H NMR spectroscopic urinalysis.

[The pharmacological treatment of obesity: past, present and future].

[Metabonomic study on protective effect of ethanol extracts of *drynariae rhizoma* on osteoporosis in rats urine by using UPLC-MS/MS].

Medication prescribing patterns among chronic kidney disease patients in a hospital in Malaysia.

Polychlorinated biphenyl congeners that increase the glucuronidation and biliary excretion of thyroxine are distinct from the congeners that enhance the serum disappearance of thyroxine.

Serum free p-cresyl sulfate levels predict cardiovascular and all-cause mortality in elderly hemodialysis patients--a prospective cohort study.

Distinct urinary metabolic profile of human colorectal cancer.

Solid phase microextraction, mass spectrometry and metabolomic approaches for detection of potential urinary cancer biomarkers--a powerful strategy for breast cancer diagnosis.

Prostate cancer and toxicity from critical use exemptions of methyl bromide: environmental protection helps protect against human health risks.

[Suicidal intoxication with sodium azide--a case report].

Uremia suppresses immune signal-induced CYP27B1 expression in human monocytes.

Dioxin (TCDD) induces epigenetic transgenerational inheritance of adult onset disease and sperm epimutations.

Global DNA methylation not increased in chronic hemodialysis patients: a case-control study.

Free p-cresol sulfate is associated with survival and function of vascular access in chronic hemodialysis patients.

Oxidative stress-induced glomerular mineralocorticoid receptor activation limits the benefit of salt reduction in Dahl salt-sensitive rats.

Coupled nitric oxide and autonomic receptor functional responses in the normal and inflamed urinary bladder of the rat.

[Exploring the mechanism of rhizoma coptidis in treating type II diabetes mellitus based on metabolomics by gas chromatography-mass spectrometry].

Uremic toxins induce kidney fibrosis by activating intrarenal renin-angiotensin-aldosterone system associated epithelial-to-mesenchymal transition.

Genome-wide association study identifies chromosome 10q24.32 variants associated with arsenic metabolism and toxicity phenotypes in Bangladesh.

The removal of protein-bound solutes by dialysis.

An update on protein-bound uremic retention solutes.

an Obituary for GFR as the main marker for kidney function?

Indigenous American ancestry is associated with arsenic methylation efficiency in an admixed population of northwest Mexico.

P-cresol, but not p-cresylsulphate, disrupts endothelial progenitor cell function in vitro.

Arsenic exposure through drinking water is associated with longer telomeres in peripheral blood.

Simultaneous analysis of 28 urinary VOC metabolites using ultra high performance liquid chromatography coupled with electrospray ionization tandem mass spectrometry (UPLC-ESI/MSMS).

Application of semi-permeable membrane dialysis/ion trap mass spectrometry technique to determine polybrominated diphenyl ethers and polychlorinated biphenyls in milk fat.

Urinary biomarkers of oxidative status.

Aryl hydrocarbon receptor-dependence of dioxin's effects on constitutive mouse hepatic cytochromes P450 and growth hormone signaling components.

Bladder urotoxicity pathophysiology induced by the oxazaphosphorine alkylating agents and its chemoprevention.

Protective Effect of Psidium guajava in Arsenic-induced Oxidative Stress and Cytological Damage in Rats.

Urinary arsenic levels in the French adult population: the French National Nutrition and Health Study, 2006-2007.

TGF- β 1 signaling plays a dominant role in the crosstalk between TGF- β 1 and the aryl hydrocarbon receptor ligand in prostate epithelial cells.

Effect of mercury on aryl hydrocarbon receptor-regulated genes in the extrahepatic tissues of C57BL/6 mice.

Acute and subacute oral toxicity of polychlorinated diphenyl sulfides in mice: determining LD50 and assessing the status of hepatic oxidative stress.

Pregnancy and the methyltransferase genotype independently influence the arsenic methylation phenotype.

Differential modulation of aryl hydrocarbon receptor regulated enzymes by arsenite in the kidney, lung, and heart of C57BL/6 mice.

Multi-trace element levels and arsenic speciation in urine of e-waste recycling workers from Agbogbloshie, Accra in Ghana.

GSTO and AS3MT genetic polymorphisms and differences in urinary arsenic concentrations among residents in Bangladesh.

Effects of oxidative stress caused by tert-butylhydroquinone on cytotoxicity in MDCK cells.

New analytical method for sensitive quantification of urinary 3-methyl-4-nitrophenol to assess fenitrothion exposure in general population and occupational sprayers.

Urinary levels of volatile organic carcinogen and toxicant biomarkers in relation to lung cancer development in smokers.

Impact of short-term intake of red wine and grape polyphenol extract on the human metabolome.

Response of urinary biomarkers of systemic oxidation to oral iron supplementation in healthy men.

Acute inhalation study of allyl alcohol for derivation of acute exposure guideline levels.

Environmental exposures and prostate cancer.

Consumption of breads containing in situ-produced arabinoxylan oligosaccharides alters gastrointestinal effects in healthy volunteers.

The influence of diet on intra and inter-individual variability of urinary excretion of arsenic species in Italian healthy individuals.

Sodium arsenite and cadmium chloride induction of proteasomal inhibition and HSP accumulation in *Xenopus laevis* A6 kidney epithelial cells.

Prospective experimental studies on the renal protective effect of ulinastatin after paraquat poisoning.

Modulation of protein fermentation does not affect fecal water toxicity: a randomized cross-over study in healthy subjects.

Aberrant activation of ubiquitin D at G2 phase and apoptosis by carcinogens that evoke cell proliferation after 28-day administration in rats.

Individual variations in arsenic metabolism in Vietnamese: the association with arsenic exposure and GSTP1 genetic polymorphism.

Urinary biomarkers of exposure to glycol ethers and chlorinated solvents during pregnancy: determinants of exposure and comparison with indirect methods of exposure assessment.

Deficiency of multidrug and toxin extrusion 1 enhances renal accumulation of paraquat and deteriorates kidney injury in mice.

Surfactant volume is an essential element in human toxicity in acute glyphosate herbicide intoxication.

The enhancing effect of the antioxidant N-acetylcysteine on urinary bladder injury induced by dimethylarsinic acid.

2,4-Dichlorophenoxyacetic acid effects on nephrotoxicity in rats during late pregnancy and early postnatal periods.

Medical management of paraquat ingestion.

[Effects of hemoperfusion on plasma concentration and histopathological changes in paraquat poisoning rabbits].

[Paraquat (PQ) clearance through continuous plasma perfusion in PQ poisoning patients: a clinical study].

Protective effect of Ginkgo biloba L. leaf extract against glyphosate toxicity in Swiss albino mice.

The effects of paraquat on regional brain neurotransmitter activity, hippocampal BDNF and behavioural function in female mice.

Cancer incidence of 2,4-D production workers.

Toxicology and risk assessment of acrolein in food.

Acrolein induced DNA damage, mutagenicity and effect on DNA repair.

Exposure to arsenic in drinking water is associated with increased prevalence of diabetes: a cross-sectional study in the Zimapán and Lagunera regions in Mexico.

[Urinary neutrophil gelatinase-associated lipocalin (uNGAL) and early diagnosis of paraquat poisoning patients with acute kidney injury].

Protective effects of chitosan oligosaccharide on paraquat-induced nephrotoxicity in rats.

Transcriptional profile of diuron-induced toxicity on the urinary bladder of male Wistar rats to inform mode of action.

Investigation into modification of mass transfer kinetics by acrolein in a renal biochip.

The efficacy of high doses of vitamin C in patients with paraquat poisoning.

Mitochondria are the main target organelle for trivalent monomethylarsonous acid (MMA(III))-induced cytotoxicity.

Metabolites of arsenic and increased DNA damage of p53 gene in arsenic plant workers.

Effects of atrazine and chlorpyrifos on the mRNA levels of IL-1 and IFN- γ 2b in immune organs of common carp.

Association between arsenic exposure and behavior among first-graders from Torreón, Mexico.

Urinary biomarkers of prenatal atrazine exposure and adverse birth outcomes in the PELAGIE birth cohort.

Impact of pesticide exposure misclassification on estimates of relative risks in the Agricultural Health Study.

Good outcomes despite high urinary arsenic concentrations from overdose with crabgrass killer.

Serum uric acid level as a marker for mortality and acute kidney injury in patients with acute paraquat intoxication.

Histopathological changes in gill, liver and kidney of neotropical fish *Colossoma macropomum* exposed to paraquat at different temperatures.

Diuron exposure induces systemic and organ-specific toxicity following acute and sub-chronic exposure in male Wistar rats.

Changes in the concentrations of creatinine, cystatin C and NGAL in patients with acute paraquat self-poisoning.

A review of epidemiologic studies of triazine herbicides and cancer.

Identification and dissection of the Nrf2 mediated oxidative stress pathway in human renal proximal tubule toxicity.

Toxicokinetics, including saturable protein binding, of 4-chloro-2-methyl phenoxyacetic acid (MCPA) in patients with acute poisoning.

[Clinical study of dynamic change of inflammatory factors in serum of acute paraquat rats].

[Study on the prognosis of patients with acute paraquat intoxication].

[Prolonged convulsion after intoxication of alachlor herbicide (Lasso): a case report].

A physiologically based pharmacokinetic model for atrazine and its main metabolites in the adult male C57BL/6 mouse.

Chronic progressive nephropathy in male F344 rats in 90-day toxicity studies: its occurrence and association with renal tubule tumors in subsequent 2-year bioassays.

Effects of nitric oxide on the primary bladder afferent activities of the rat with and without intravesical acrolein treatment.

Prostate cancer risk and exposure to pesticides in British Columbia farmers.

The effects of Click 500 SC (terbutylazine) on common carp *Cyprinus carpio* under (sub)chronic conditions.

Effects of subchronic exposure to simazine on zebrafish (*Danio rerio*).

Early exposure to paraquat sensitizes dopaminergic neurons to subsequent silencing of PINK1 gene expression in mice.

Hyperammonemia following glufosinate-containing herbicide poisoning: a potential marker of severe neurotoxicity.

Suicide victim of paraquat poisoning make suitable corneal donor.

Paraquat neurotoxicity is mediated by the dopamine transporter and organic cation transporter-3.

Endogenous hydrogen peroxide in paraventricular nucleus mediates sympathetic activation and enhanced cardiac sympathetic afferent reflex in renovascular hypertensive rats.

Protein conjugated with aldehydes derived from lipid peroxidation as an independent parameter of the carbonyl stress in the kidney damage.

Therapeutic potential of Nrf2 activators in streptozotocin-induced diabetic nephropathy.

Nrf2 activators as attractive therapeutics for diabetic nephropathy.

Expressions of lipid oxidation markers, N(μ)-hexanoyl lysine and acrolein in cisplatin-induced nephrotoxicity in rats.

Aldehyde reductase (AKR1B3) regulates the accumulation of advanced glycosylation end products (AGEs) and the expression of AGE receptor (RAGE).

TRPA1 receptor modulation attenuates bladder overactivity induced by spinal cord injury.

Isopentenyl pyrophosphate is a novel antinociceptive substance that inhibits TRPV3 and TRPA1 ion channels.

A pathway-based analysis of urinary arsenic metabolites and skin lesions.

Trans-cinnamaldehyde decreases attachment and invasion of uropathogenic *Escherichia coli* in urinary tract epithelial cells by modulating virulence gene expression.

Arsenic methylation capacity and its correlation with skin lesions induced by contaminated drinking water consumption in residents of chronic arsenicosis area.

Poly(ADP-ribose) polymerase-1 protects from oxidative stress induced endothelial dysfunction.

[Determination of linuron and its metabolite 3,4-dichloroaniline residues in meat and meat products using liquid chromatography-tandem mass spectrometry].

Soluble epoxide hydrolase contamination of specific catalase preparations inhibits epoxyeicosatrienoic acid vasodilation of rat renal arterioles.

Urinary arsenic speciation profiles in mice subchronically exposed to low concentrations of sodium arsenate in drinking water.

Determination of alachlor and its metabolite 2,6-diethylaniline in microbial culture medium using online microdialysis enriched-sampling coupled to high-performance liquid chromatography.

Stereoselective metabolism of the herbicide fluroxypyr methylheptyl ester in rabbits.

Redox cycling and increased oxygen utilization contribute to diquat-induced oxidative stress and cytotoxicity in Chinese hamster ovary cells overexpressing NADPH-cytochrome P450 reductase.

The impact of a rice based diet on urinary arsenic.

Arsenic methylation efficiency increases during the first trimester of pregnancy independent of folate status.

The polymorphisms of P53 codon 72 and MDM2 SNP309 and renal cell carcinoma risk in a low arsenic exposure area.

Mutated p.4894 RyR1 function related to malignant hyperthermia and congenital neuromuscular disease with uniform type 1 fiber (CNMDU1).

Protective effects of N-acetylcysteine against arsenic-induced oxidative stress and reprotoxicity in male mice.

Molecular changes during arsenic-induced cell transformation.

A chemically induced vaccine strategy for prostate cancer.

Polymorphism of the aryl-hydrocarbon receptor gene in intron 10 of human cancers.

Potential protective mechanisms of aryl hydrocarbon receptor (AHR) signaling in benign prostatic hyperplasia.

Gene expression changes in human prostate carcinoma cells exposed to genotoxic and nongenotoxic aryl hydrocarbon receptor ligands.

Role of dialysis technology in the removal of uremic toxins.

Molecular targets that link dioxin exposure to toxicity phenotypes.

Inhibition of fatty acid amide hydrolase suppresses referred hyperalgesia induced by bladder inflammation.

Comparative toxicity of arsenic metabolites in human bladder cancer EJ-1 cells.

Hydrogen peroxide stimulates the epithelial sodium channel through a phosphatidylinositide 3-kinase-dependent pathway.

Synthesis and evaluation of novel carbon-11 labeled oxopurine analogues for positron emission tomography imaging of translocator protein (18 kDa) in peripheral organs.

A competitive co-cultivation assay for cancer drug specificity evaluation.

Colonic contribution to uremic solutes.

Metabolomics analysis reveals elevation of 3-indoxyl sulfate in plasma and brain during chemically-induced acute kidney injury in mice: investigation of nicotinic acid receptor agonists.

Determination of uremic solutes in biological fluids of chronic kidney disease patients by HPLC assay.

Identification of differentially expressed genes in the livers of chronically i-As-treated hamsters.

Urinary trichlorophenol levels and increased risk of attention deficit hyperactivity disorder among US school-aged children.

Fulminant hepatic failure in woman with iron and non-steroidal anti-inflammatory drug intoxication.

Protein-bound uremic toxins: new insight from clinical studies.

De novo once-monthly darbepoetin alpha treatment for the anemia of chronic kidney disease using a computerized algorithmic approach.

The effect of the uremic toxin cyanate (CNO²⁻) on anaerobic cysteine metabolism and oxidative processes in the rat liver: a protective effect of lipoate.

Effect of urinary total arsenic level and estimated glomerular filtration rate on the risk of renal cell carcinoma in a low arsenic exposure area.

Prostate cancer and ambient pesticide exposure in agriculturally intensive areas in California.

Reproductive toxicity parameters and biological monitoring in occupationally and environmentally boron-exposed persons in Bandirma, Turkey.

In vitro and in vivo evaluation of chemically modified degradable starch microspheres for topical haemostasis.

Vascular incompetence in dialysis patients--protein-bound uremic toxins and endothelial dysfunction.

Clearance of p-cresol sulfate and β_2 -microglobulin from dialysate by commercially available sorbent technology.

[Non dietetic environmental risk factors in prostate cancer].

Urinary p-cresol is elevated in small children with severe autism spectrum disorder.

Association between body mass index and arsenic methylation efficiency in adult women from southwest U.S. and northwest Mexico.

Epidemiological approaches in the investigation of environmental causes of cancer: the case of dioxins and water disinfection by-products.

Uremic toxins inhibit transport by breast cancer resistance protein and multidrug resistance protein 4 at clinically relevant concentrations.

Uremic toxins and oral adsorbents.

Molecular and functional characterization of aryl hydrocarbon receptor nuclear translocator 1 (ARNT1) and ARNT2 in chicken (*Gallus gallus*).

Prenatal TCDD in mice increases adult autoimmunity.

The gut-kidney axis: indoxyl sulfate, p-cresyl sulfate and CKD progression.

Arsenic: toxicity, oxidative stress and human disease.

Prenatal developmental toxicity of polychlorinated naphthalenes (PCNs) in the rat.

Effects of synbiotic treatment on serum level of p-cresol in haemodialysis patients: a preliminary study.

p-Cresyl sulphate and indoxyl sulphate predict progression of chronic kidney disease.

Appearance of konzo in South-Kivu, a wartorn area in the Democratic Republic of Congo.

A case report of concomitant paroxysmal nocturnal hemoglobinuria and heterozygous \hat{I}^2 -thalassemia.

Acute tubular necrosis due to cutaneous contact with cresol.

Protective effects of plasma alpha-tocopherols on the risk of inorganic arsenic-related urothelial carcinoma.

Prenatal TCDD causes persistent modulation of the postnatal immune response, and exacerbates inflammatory disease, in 36-week-old lupus-like autoimmune SNF1 mice.

Inhibitory effects of ethacrynic acid analogues lacking the \hat{I}^{\pm}, \hat{I}^2 -unsaturated carbonyl unit and para-acylated phenols on human cancer cells.

Contribution of residual function to removal of protein-bound solutes in hemodialysis.

The association between urinary concentrations of dichlorophenol pesticides and obesity in children.

Does uremia cause vascular dysfunction?

p-Cresylsulfate and indoxyl sulfate level at different stages of chronic kidney disease.

Metabolomic study of a rat fever model induced with 2,4-dinitrophenol and the therapeutic effects of a crude drug derived from *Coptis chinensis*.

Acute arsine poisoning confirmed by speciation analysis of arsenic compounds in the plasma and urine by HPLC-ICP-MS.

Gene polymorphisms of glutathione S-transferase omega 1 and 2, urinary arsenic methylation profile and urothelial carcinoma.

Carcinogenic effects of "whole-life" exposure to inorganic arsenic in CD1 mice.

Cardioprotection induced by Na(+)/K(+)-ATPase activation involves extracellular signal-regulated kinase 1/2 and phosphoinositide 3-kinase/Akt pathway.

2,3,7,8-tetrachlorodibenzo-p-dioxin induced autophagy in a bovine kidney cell line.

Effect of dietary nitrogen content on the urine metabolite profile of dairy cows assessed by nuclear magnetic resonance (NMR)-based metabolomics.

The constitutively active Ah receptor (CA-AhR) mouse as a model for dioxin exposure - effects in reproductive organs.

Rat H9c2 cardiac myocytes are sensitive to arsenite due to a modest activation of transcription factor Nrf2.

Vanin-1: a potential biomarker for nephrotoxicant-induced renal injury.

Dose-dependent urinary phenotype of inorganic arsenic methylation in mice with a focus on trivalent methylated metabolites.

Stereoselective metabolism of fenoxaprop-ethyl and its chiral metabolite fenoxaprop in rabbits.

An inter-laboratory comparison of urinary 3-hydroxypropylmercapturic acid measurement demonstrates good reproducibility between laboratories.

Identification of urinary sex pheromones in female buffaloes and their influence on bull reproductive behaviour.

The effect of uremic toxin cyanate (OCN²⁻) on anaerobic sulfur metabolism and prooxidative processes in the rat kidney: a protective role of lipoate.

On the antioxidant properties of kynurenic acid: free radical scavenging activity and inhibition of oxidative stress.

A metabolic system-wide characterisation of the pig: a model for human physiology.

Effect of the traditional Chinese medicine tongxinluo on endothelial dysfunction rats studied by using urinary metabolomics based on liquid chromatography-mass spectrometry.

Severe cyclophosphamide-induced haemorrhagic cystitis treated with hyperbaric oxygen.

Epigenetic control of embryonic renal cell differentiation by L1 retrotransposon.

Organic anion transporters play an important role in the uptake of p-cresyl sulfate, a uremic toxin, in the kidney.

Herbal bioactivation, molecular targets and the toxicity relevance.

Exposure to polycyclic aromatic hydrocarbons, arsenic and environmental tobacco smoke, nutrient intake, and oxidative stress in Japanese preschool children.

Interactions of human organic anion transporter 1 (hOAT1) with substances associated with forensic toxicology.

Reduced cytochrome P4501A activity and recovery from oxidative stress during subchronic benzo[a]pyrene and benzo[e]pyrene treatment of rainbow trout.

Urinary concentrations of phthalates and phenols in a population of Spanish pregnant women and children.

Sodium arsenite and hyperthermia modulate cisplatin-DNA damage responses and enhance platinum accumulation in murine metastatic ovarian cancer xenograft after hyperthermic intraperitoneal chemotherapy (HIPEC).

Urinary arsenic metabolites of subjects exposed to elevated arsenic present in coal in Shaanxi Province, China.

Protective role of selenium against over-expression of cancer-related apoptotic genes induced by o-cresol in rats.

Mercapturic acids as metabolites of alkylating substances in urine samples of German inhabitants.

GLT-1 overexpression attenuates bladder nociception and local/cross-organ sensitization of bladder nociception.

Effect of sodium arsenite dose administered in the drinking water on the urinary bladder epithelium of female arsenic (+3 oxidation state) methyltransferase knockout mice.

2,3,7,8-Tetrachlorodibenzo-p-dioxin impairs iron homeostasis by modulating iron-related proteins expression and increasing the labile iron pool in mammalian cells.

Tissue-specific and dose-related accumulation of arsenic in mouse offspring following maternal consumption of arsenic-contaminated water.

Stability of tissue PO₂ in the face of altered perfusion: a phenomenon specific to the renal cortex and independent of resting renal oxygen consumption.

Cyclooxygenase-2 contributes to functional changes seen on experimental hemorrhagic cystitis induced by ifosfamide in rat urinary bladder.

Realgar and realgar-containing Liu-Shen-Wan are less acutely toxic than arsenite and arsenate.

Comparative study of human and mouse pregnane X receptor agonistic activity in 200 pesticides using in vitro reporter gene assays.

Effects of spermidine and p-cresol on polymorphonuclear cell apoptosis and function.

Polymorphisms in arsenic(+III oxidation state) methyltransferase (AS3MT) predict gene expression of AS3MT as well as arsenic metabolism.

Realgar- and cinnabar-containing an-gong-niu-huang wan (AGNH) is much less acutely toxic than sodium arsenite and mercuric chloride.

Serum paraquat concentration detected by spectrophotometry in patients with paraquat poisoning.

Polychlorinated dibenzo-p-dioxins and dibenzofurans in different tissues of the cormorants (*Phalacrocorax carbo*) from Dongting Lake, China.

Reduction in protein-bound solutes unacceptable as marker of dialysis efficacy during alternate-night nocturnal hemodialysis.

Evaluation of oxidative stress status in children with pervasive developmental disorder and attention deficit hyperactivity disorder using urinary-specific biomarkers.

Evaluation of Iron-induced Oxidative Stress and its Amelioration by Certain Herbs in Broilers.

Metabolic response to low-level toxicant exposure in a novel renal tubule epithelial cell system.

Differential long-term effects of developmental exposure to polychlorinated biphenyls 52, 138 or 180 on motor activity and neurotransmission. Gender dependence and mechanisms involved.

Occupational exposure in methyl bromide manufacturing workers: 17-year follow-up study of urinary bromide ion concentration for biological monitoring.

Effects of prenatal exposure to a low dose atrazine metabolite mixture on pubertal timing and prostate development of male Long-Evans rats.

Additive toxicity of herbicide mixtures and comparative sensitivity of tropical benthic microalgae.

Assessing the cancer risk associated with arsenic-contaminated seafood.

Predicting acute complicated glyphosate intoxication in the emergency department.

Repeated pesticide exposure among North Carolina migrant and seasonal farmworkers.

Increased reactive oxygen species production in the brain after repeated low-dose pesticide paraquat exposure in rats. A comparison with peripheral tissues.

Glucocorticoid with cyclophosphamide for paraquat-induced lung fibrosis.

Fatality in paraquat poisoning.

Postmortem distribution of ametryn in the blood and organ tissues of an herbicide-poisoning victim.

Paraquat ingestion: a challenging diagnosis.

Atrazine affects kidney and adrenal hormones (AHs) related genes expressions of rare minnow (*Gobiocypris rarus*).

[Thyroid disruption induced by pentachlorophenol].

Urethral carcinoma and hyperplasia in male and female B6C3F1 mice treated with 3,3',4,4'-tetrachloroazobenzene (TCAB).

Paraquat increases connective tissue growth factor and collagen expression via angiotensin signaling pathway in human lung fibroblasts.

[Relationship between paraquat tissue content and organ injury in paraquat poisoning rats].

The poison pen: bedside diagnosis of urinary diquat.

Effects of sub-chronic exposure to terbutryn in common carp (*Cyprinus carpio* L.).

Predictors of 2,4-dichlorophenoxyacetic acid exposure among herbicide applicators.

Perturbation of lipids and glucose metabolism associated with previous 2,4-D exposure: a cross-sectional study of NHANES III data, 1988-1994.

A prospective observational study of the clinical toxicology of glyphosate-containing herbicides in adults with acute self-poisoning.

Biomonitoring data for 2,4-dichlorophenoxyacetic acid in the United States and Canada: interpretation in a public health risk assessment context using Biomonitoring Equivalents.

Protective effects of *Forsythia suspensa* extract against oxidative stress induced by diquat in rats.

Toxicokinetics and recovery studies of dicamba dimethyl amine salt in goats following single oral administration.

[Acute poisoning due to chemical substances inducing methemoglobinemia--two cases report].

Failed rescue therapy with rapamycin after paraquat intoxication.

Cytotoxicity and regenerative proliferation as the mode of action for diuron-induced urothelial carcinogenesis in the rat.

Cause-specific mortality of Dutch chlorophenoxy herbicide manufacturing workers.

Polymorphisms in one-carbon metabolism pathway genes, urinary arsenic profile, and urothelial carcinoma.

Antibiofilm effect of trans-cinnamaldehyde on uropathogenic *Escherichia coli*.

Insulinotropic effect of cinnamaldehyde on transcriptional regulation of pyruvate kinase, phosphoenolpyruvate carboxykinase, and GLUT4 translocation in experimental diabetic rats.

Lipid peroxidation product acrolein as a predictive biomarker of prostate carcinoma relapse after radical surgery.

Cinnamaldehyde impairs high glucose-induced hypertrophy in renal interstitial fibroblasts.

Impact of smoking and chewing tobacco on arsenic-induced skin lesions.

Ameliorative effect of the cinnamon oil from *Cinnamomum zeylanicum* upon early stage diabetic nephropathy.

Potential effects of the herbicide Diuron on mammary and urinary bladder two-stage carcinogenesis in a female Swiss mouse model.

Modulation of SCF beta-TrCP-dependent I kappaB alpha ubiquitination by hydrogen peroxide.

Comparison of immunoassay and HPLC-MS/MS used to measure urinary metabolites of atrazine, metolachlor, and chlorpyrifos from farmers and non-farmers in Iowa.

Urinary biomarker, dermal, and air measurement results for 2,4-D and chlorpyrifos farm applicators in the Agricultural Health Study.

Effects of repeated seafood consumption on urinary excretion of arsenic species by volunteers.

Renal oxygenation suppresses VHL loss-induced senescence that is caused by increased sensitivity to oxidative stress.

Association of genetic variation in cystathionine-beta-synthase and arsenic metabolism.

Paraquat-induced oxidative stress represses phosphatidylinositol 3-kinase activities leading to impaired glucose uptake in 3T3-L1 adipocytes.

Genetic polymorphism of As3MT and delayed urinary DMA excretion after organic arsenic intake from oyster ingestion.

Distribution and metabolism of four different dimethylated arsenicals in hamsters.

The nephrologist as a consultant for acute poisoning: epidemiology of severe poisonings in the State of Rio Grande do Sul and techniques to enhance renal elimination.

Radiochemical synthesis, rodent biodistribution and tumor uptake, and dosimetry calculations of [^{14}C] methylated LY2181308.

Toxicology and carcinogenesis studies of 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (CAS No. 31508-00-6) in female harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 3,3',4,4'-tetrachloroazobenzene (TCAB) (CAS No. 14047-09-7) in Harlan Sprague-Dawley rats and B6C3F1 mice (gavage studies).

Recruitment maneuver in experimental acute lung injury: the role of alveolar collapse and edema.

NMR-based metabolomic analysis of the hepatotoxicity induced by combined exposure to PCBs and TCDD in rats.

Creation of a novel peptide with enhanced nuclear localization in prostate and pancreatic cancer cell lines.

[Establishment of an erythroleukemia model in CB6F1 mice by transplant with haploidentical mouse leukemic cell line FBL-3].

Cytochrome P4501A1 is required for vascular dysfunction and hypertension induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Food safety.

[Uremic toxins: the case of protein-bound compounds].

Neuroprotective effect of curcumin in arsenic-induced neurotoxicity in rats.

Protective role of tannin-rich fraction of *Camellia sinensis* in tissue arsenic burden in Sprague Dawley rats.

alpha-Synuclein- and MPTP-generated rodent models of Parkinson's disease and the study of extracellular striatal dopamine dynamics: a microdialysis approach.

Serological cardiovascular and mortality risk predictors in dialysis patients receiving sevelamer: a prospective study.

Sub-chronic arsenic exposure aggravates nephrotoxicity in experimental diabetic rats.

Copper sulphate toxicity in a young male complicated by methemoglobinemia, rhabdomyolysis and renal failure.

Maternal residence near municipal waste incinerators and the risk of urinary tract birth defects.

p-Cresol and cardiovascular risk in mild-to-moderate kidney disease.

Factors associated with blood concentrations of indoxyl sulfate and p-cresol in patients undergoing peritoneal dialysis.

A pharmacokinetic and safety study of intravenous arsenic trioxide in adult cancer patients with renal impairment.

Metabolomic analysis of uremic toxins by liquid chromatography/electrospray ionization-tandem mass spectrometry.

Toxicity of Bromkal 70-5DE, a technical mixture of polybrominated diphenyl ethers, following 28 d of oral exposure in rats and impact of analysed impurities.

Interpretation of studies on the developmental reproductive toxicology of 2,3,7,8-tetrachlorodibenzo-p-dioxin in male offspring.

Decrease in dietary K intake stimulates the generation of superoxide anions in the kidney and inhibits K secretory channels in the CCD.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin suggests abnormal palate development after palatal fusion.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces disruption of glands of the prostate and fibrosis in rhesus monkeys.

Arsenic exposure in utero and nonepidermal proliferative response in adulthood in Tg.AC mice.

Dietary administration of sodium arsenite to rats: relations between dose and urinary concentrations of methylated and thio-metabolites and effects on the rat urinary bladder epithelium.

In vitro inhibition of low density lipoprotein carbamylation by vitamins, as an ameliorating atherosclerotic risk in uremic patients.

Free p-cresylsulphate is a predictor of mortality in patients at different stages of chronic kidney disease.

Activation of Hedgehog signaling by the environmental toxicant arsenic may contribute to the etiology of arsenic-induced tumors.

Comparative contribution of the aryl hydrocarbon receptor gene to perinatal stage development and dioxin-induced toxicity between the urogenital complex and testis in the mouse.

Tolerance of arabinoxylan-oligosaccharides and their prebiotic activity in healthy subjects: a randomised, placebo-controlled cross-over study.

Maintenance of elevated versus physiological iron indices in non-anaemic patients with chronic kidney disease: a randomized controlled trial.

beta-TrCP inhibition reduces prostate cancer cell growth via upregulation of the aryl hydrocarbon receptor.

Androgenic regulation of ventral epithelial bud number and pattern in mouse urogenital sinus.

Activation of the aryl hydrocarbon receptor pathway enhances cancer cell invasion by upregulating the MMP expression and is associated with poor prognosis in upper urinary tract urothelial cancer.

Increased levels of total P-Cresylsulphate and indoxyl sulphate are associated with coronary artery disease in patients with diabetic nephropathy.

Inhibitory effects of uraemic toxins 3-indoxyl sulfate and p-cresol on losartan metabolism in vitro.

Efficacy and safety of ferric carboxymaltose in correcting iron-deficiency anemia: a review of randomized controlled trials across different indications.

Indian spice curcumin may be an effective strategy to combat the genotoxicity of arsenic in Swiss albino mice.

The absence of interleukin-6 enhanced arsenite-induced renal injury by promoting autophagy of tubular epithelial cells with aberrant extracellular signal-regulated kinase activation.

Bidirectional correlation of NMR and capillary electrophoresis fingerprints: a new approach to investigating *Schistosoma mansoni* infection in a mouse model.

2,3,7,8-Tetrachlorodibenzo-p-dioxin inhibits fibroblast growth factor 10-induced prostatic bud formation in mouse urogenital sinus.

Protein-bound uraemic toxin removal in haemodialysis and post-dilution haemodiafiltration.

p-Cresyl sulfate serum concentrations in haemodialysis patients are reduced by the prebiotic oligofructose-enriched inulin.

Effects of the compounds MV8608 and MV8612 obtained from *Mandevilla velutina* in the model of hemorrhagic cystitis induced by cyclophosphamide in rats.

Tissue-engineered conduit using urine-derived stem cells seeded bacterial cellulose polymer in urinary reconstruction and diversion.

Free fatty acids profile of the fetal brain and the plasma, liver, brain and kidneys of pregnant rats treated with sodium arsenite at mid-organogenesis.

Role of dietary GSH in the amelioration of sodium arsenite-induced ovarian and uterine disorders.

Serum protein-bound uraemic toxins and clinical outcomes in haemodialysis patients.

Interaction between beet vinasse and iron fertilisers in the prevention of iron deficiency in lupins.

Comparative metabolism of cyclophosphamide and ifosfamide in the mouse using UPLC-ESI-QTOFMS-based metabolomics.

National study of exposure to pesticides among professional applicators: an investigation based on urinary biomarkers.

Outcomes after radical prostatectomy among men who are candidates for active surveillance: results from the SEARCH database.

Nanoengineered optical urea biosensor for estimating hemodialysis parameters in spent dialysate.

Effects of in ovo exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin on hepatic AHR/ARNT-CYP1A signaling pathways in common cormorants (*Phalacrocorax carbo*).

Cell viability and PSA secretion assays in LNCaP cells: a tiered in vitro approach to screen chemicals with a prostate-mediated effect on male reproduction within the ReProTect project.

Expression of aryl hydrocarbon receptor in human placentas and fetal tissues.

The effects of dietary boric acid and borax supplementation on lipid peroxidation, antioxidant activity, and DNA damage in rats.

Association between As and Cu renal cortex accumulation and physiological and histological alterations after chronic arsenic intake.

Cellular uptake, subcellular distribution and toxicity of arsenic compounds in methylating and non-methylating cells.

Comparison of current-use pesticide and other toxicant urinary metabolite levels among pregnant women in the CHAMACOS cohort and NHANES.

Local maximum oxygen disappearance rate has limited utility as a measure of local renal tissue oxygen consumption.

Urinary metabolomics in Fxr-null mice reveals activated adaptive metabolic pathways upon bile acid challenge.

Hemorrhagic cystitis in a patient receiving docetaxel for prostate cancer.

C-reactive protein, sodium azide, and endothelial connexin43 gap junctions.

TCDD-induced cyclooxygenase-2 expression is mediated by the nongenomic pathway in mouse MMDD1 macula densa cells and kidneys.

Albumin-derived peptides efficiently reduce renal uptake of radiolabelled peptides.

Induction of CMV-1 promoter by 4-hydroxy-2-nonenal in human embryonic kidney cells.

Protective effect of *Corchorus olitorius* leaves on sodium arsenite-induced toxicity in experimental rats.

Altered metabolisms of mediators controlling vascular function and enhanced oxidative stress in asymptomatic children with congenital portosystemic venous shunt.

Assessment of nicotine inhalation exposure and urinary cotinine of tobacco processing workers.

Successful treatment of paraquat poisoning by Xuebijing, an injection concocted from multiple Chinese medicinal herbs: a case report.

Arsenate and dimethylarsinic acid in drinking water did not affect DNA damage repair in urinary bladder transitional cells or micronuclei in bone marrow.

Clinical implication of urinary neutrophil gelatinase-associated lipocalin and kidney injury molecule-1 in patients with acute paraquat intoxication.

The one stop shop: chemical causes and cures for cancer.

Behavioral response and kinetics of terrestrial atrazine exposure in American toads (*Bufo americanus*).

Postmortem analyses unveil the poor efficacy of decontamination, anti-inflammatory and immunosuppressive therapies in paraquat human intoxications.

[Acute glyphosate-surfactant poisoning with neurological sequels and fatal outcome].

Glycogen content is affected differently in acute pulmonary and extra-pulmonary lung injury.

[Pathologic changes and expression of Heme oxygenase-1 in paraquat-induced renal injury].

Low toxic herbicide Roundup induces mild oxidative stress in goldfish tissues.

Evidence for toxicity differences between inorganic arsenite and thioarsenicals in human bladder cancer cells.

Agent Orange exposure, Vietnam war veterans, and the risk of prostate cancer.

Effects of co-administration of dietary sodium arsenite and an NADPH oxidase inhibitor on the rat bladder epithelium.

Melamine-contaminated powdered formula and urolithiasis.

Effects of an epidermal growth factor receptor inhibitor on arsenic associated toxicity in the rat bladder epithelium.

Dimethylarsinic acid in drinking water changed the morphology of urinary bladder but not the expression of DNA repair genes of bladder transitional epithelium in F344 rats.

Immunohistochemical and histopathological evaluation of 2,4-dichlorophenoxyacetic acid-induced changes in rat kidney cortex.

Determination of the phenoxyacid herbicides MCPA, mecoprop and 2,4-D in kidney tissue using liquid chromatography with electrospray tandem mass spectrometry.

Exposure to Agent Orange is a significant predictor of prostate-specific antigen (PSA)-based recurrence and a rapid PSA doubling time after radical prostatectomy.

Urinary pesticide metabolites in school students from northern Thailand.

Immunotoxicological effects of a sub-chronic exposure to selected current-use pesticides in rainbow trout (*Oncorhynchus mykiss*).

Development of PBPK model of molinate and molinate sulfoxide in rats and humans.

The level and clinical significance of pancreatic enzymes in survivors of acute paraquat poisoning.

Effects of photosystem II inhibitors and their mixture on freshwater phytoplankton succession in outdoor mesocosms.

Western blot analysis for 4-hydroxy-2-nonenal (HNE)-modified proteins in paraquat-treated mice.

Effects of acute exposure to metribuzin on some hematological, biochemical and histopathological parameters of common carp (*Cyprinus carpio* L.).

The clinical features of acute kidney injury in patients with acute paraquat intoxication.

[Changes in nitric oxide, prostaglandins and myeloperoxidase activity in acrolein-induced cystitis in rats].

Heterocyclic aromatic amine pesticide use and human cancer risk: results from the U.S. Agricultural Health Study.

An effective antidote for paraquat poisonings: the treatment with lysine acetylsalicylate.

Terbutryn toxicity to *Danio rerio*: effects of subchronic exposure on fish growth.

Effects of subchronic exposure to Successor 600 (pethoxamid 600 g L⁻¹) on common carp *Cyprinus carpio*.

A review: oxidative stress in fish induced by pesticides.

Comparison between kidney and hemoperfusion for paraquat elimination.

Glyphosate formulations induce apoptosis and necrosis in human umbilical, embryonic, and placental cells.

Prostate cancer control and survival in Vietnam veterans exposed to Agent Orange.

Increased sensitivity of glutathione S-transferase P-null mice to cyclophosphamide-induced urinary bladder toxicity.

Urinary arsenic methylation capability and carotid atherosclerosis risk in subjects living in arsenicosis-hyperendemic areas in southwestern Taiwan.

Arsenic methylation capability, myeloperoxidase and sulfotransferase genetic polymorphisms, and the stage and grade of urothelial carcinoma.

Changes in urinary arsenic methylation profiles in a 15-year interval after cessation of arsenic ingestion in southwest Taiwan.

Influence of cobalamin on arsenic metabolism in Bangladesh.

Metabolism of flufenpyr-ethyl in rats and mice.

Organic cation transporters OCT1, 2, and 3 mediate high-affinity transport of the mutagenic vital dye ethidium in the kidney proximal tubule.

Effect of long-term exposure to simazine on histopathology, hematological, and biochemical parameters in *Cyprinus carpio*.

Occupational paraquat exposure of agricultural workers in large Costa Rican farms.

Levels of metals and organic substances in workers at a hazardous waste incinerator: a follow-up study.

Requirement of arsenic biomethylation for oxidative DNA damage.

Arsenic methylation, oxidative stress and cancer--is there a link?

p-Cresyl sulfate and indoxyl sulfate in hemodialysis patients.

Systems metabolic effects of a necator americanus infection in Syrian hamster.

Hypoxia and the metabolic phenotype of prostate cancer cells.

Effects of pomegranate chemical constituents/intestinal microbial metabolites on CYP1B1 in 22Rv1 prostate cancer cells.

p-Cresol sulfate: further understanding of its cardiovascular disease potential in CKD.

Urinary arsenic species and CKD in a Taiwanese population: a case-control study.

Polymorphisms in arsenic metabolism genes, urinary arsenic methylation profile and cancer.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin disrupts B-cell lymphopoiesis and exacerbates autoimmune disease in 24-week-old SNF1 mice.

The uremic retention solute p-cresyl sulfate and markers of endothelial damage.

Prophylactic role of taurine on arsenic mediated oxidative renal dysfunction via MAPKs/ NF-kappaB and mitochondria dependent pathways.

Cancer incidence among pesticide applicators exposed to butylate in the Agricultural Health Study (AHS).

Developmental exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin alters postnatal T cell phenotypes and T cell function and exacerbates autoimmune lupus in 24-week-old SNF1 mice.

Nrf2 protects against As(III)-induced damage in mouse liver and bladder.

Recent progress in the analysis of uremic toxins by mass spectrometry.

Evaluation of the rodent Hershberger bioassay on intact juvenile males--testing of coded chemicals and supplementary biochemical investigations.

Impact of life stage and duration of exposure on arsenic-induced proliferative lesions and neoplasia in C3H mice.

Health profiles of methyl bromide applicators in greenhouses in Turkey.

Rationale and design of the oral HEME iron polypeptide Against Treatment with Oral Controlled Release Iron Tablets trial for the correction of anaemia in peritoneal dialysis patients (HEMATOCRIT trial).

In vitro evaluation of ferrihydrite as an enterosorbent for arsenic from contaminated drinking water.

Protein-bound toxins--update 2009.

Determination of boron distribution in rat's brain, kidney and liver.

Immunogenicity of a standard trivalent influenza vaccine in patients on long-term hemodialysis: an open-label trial.

Intravenous versus oral iron supplementation for correction of post-transplant anaemia in renal transplant patients.

Characterization of inflammatory bowel disease with urinary metabolic profiling.

Effect of increasing dialyzer mass transfer area coefficient and dialysate flow on clearance of protein-bound solutes: a pilot crossover trial.

Maternal exposure to dioxin disrupts gonadotropin production in fetal rats and imprints defects in sexual behavior.

p-Cresol inhibits IL-12 production by murine macrophages stimulated with bacterial immunostimulant.

Effects of frequency and inspiratory plateau pressure during recruitment manoeuvres on lung and distal organs in acute lung injury.

Arsenic activates EGFR pathway signaling in the lung.

Dexamethasone enhances basal and TNF-alpha-stimulated production of PAI-1 via the glucocorticoid receptor regardless of 11beta-hydroxysteroid dehydrogenase 2 status in human proximal renal tubular cells.

Sodium octanoate to reverse indoxyl sulfate and p-cresyl sulfate albumin binding in uremic and normal serum during sample preparation followed by fluorescence liquid chromatography.

Evolution of protein-bound uraemic solutes during predilution haemofiltration.

Regulation of mitochondrial dynamics in acute kidney injury in cell culture and rodent models.

Comparative effects of very low-carbohydrate, high-fat and high-carbohydrate, low-fat weight-loss diets on bowel habit and faecal short-chain fatty acids and bacterial populations.

Structure-effect relationship in the down-regulation of glutaminase in cultured human cells by phenylarsenic compounds.

Dimethylarsine likely acts as a mouse-pulmonary tumor initiator via the production of dimethylarsine radical and/or its peroxy radical.

Dimethylarsine likely acts as a mouse-pulmonary tumor initiator via the production of dimethylarsine radical and/or its peroxy radical.

Sodium arsenite induces ROS generation, DNA oxidative damage, HO-1 and c-Myc proteins, NF-kappaB activation and cell proliferation in human breast cancer MCF-7 cells.

Carcinogenesis studies of cresols in rats and mice.

Repression of activated aryl hydrocarbon receptor-induced transcriptional activation by 5alpha-dihydrotestosterone in human prostate cancer LNCaP and human breast cancer T47D cells.

Inhibition of androgen receptor transcriptional activity as a novel mechanism of action of arsenic.

Dietary exposure and biomarkers of arsenic in consumers of fish and shellfish from France.

Identification and quantification of 2',3'-cAMP release by the kidney.

Development of a GIS-based indicator for environmental pesticide exposure and its application to a Belgian case-control study on bladder cancer.

Multiple micronutrient fortification of salt.

The significance of the nongenomic pathway in mediating inflammatory signaling of the dioxin-activated Ah receptor to cause toxic effects.

AHR signaling in prostate growth, morphogenesis, and disease.

Expression of hepcidin and other iron-related genes in type 3 hemochromatosis due to a novel mutation in transferrin receptor-2.

Effects of leaves extract of *Ocimum sanctum* L. on arsenic-induced toxicity in Wistar albino rats.

Cytotoxicity and phytotoxicity of trichothecene macrolides from *Myrothecium gramminum*.

Concentration of hydrogen ions in several calcium hydroxide pastes over different periods of time.

Functional analysis of ryanodine receptor type 1 p.R2508C mutation in exon 47.

[Analysis of the infection status and the drug resistance of mycoplasma and chlamydiae in genitourinary tracts of children with suspected nongonococcal urethritis].

Ferric carboxymaltose: a review of its use in iron-deficiency anaemia.

Oral carcinogenicity and toxicity of 2-amino-4-chlorophenol in rats.

Melanosis ilei associated with chronic ingestion of oral iron.

Metabolic effects of dark chocolate consumption on energy, gut microbiota, and stress-related metabolism in free-living subjects.

The effect of dose on 2,3,7,8-TCDD tissue distribution, metabolism and elimination in CYP1A2 (-/-) knockout and C57BL/6N parental strains of mice.

Multi-residue determination of phenolic and salicylanilide anthelmintics and related compounds in bovine kidney by liquid chromatography-tandem mass spectrometry.

Towards the mechanism and comparative effect of diphenyl diselenide, diphenyl ditelluride and ebselen under various pathophysiological conditions in rat's kidney preparation.

Antioxidant defense system in rats simultaneously intoxicated with agrochemicals.

Oxidative stress responses of rats exposed to Roundup and its active ingredient glyphosate.

Pseudo-halide derivatives of titanocene: synthesis and cytotoxicity studies.

Dioxin-dependent and dioxin-independent gene batteries: comparison of liver and kidney in AHR-null mice.

Combined effects of repeated administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin and polychlorinated biphenyls on kidneys of male rats.

Seasonal variation in the measurement of urinary pesticide metabolites among Latino farmworkers in eastern North Carolina.

Effects of occupational exposure to 1,4-dichlorobenzene on hematologic, kidney, and liver functions.

Reduced arsenic clearance and increased toxicity in aquaglyceroporin-9-null mice.

Acacia Senegal gum exudate offers protection against cyclophosphamide-induced urinary bladder cytotoxicity.

Impaired arsenic metabolism in children during weaning.

Pharmacometabonomic identification of a significant host-microbiome metabolic interaction affecting human drug metabolism.

Estrogen signaling is not required for prostatic bud patterning or for its disruption by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Radiation metabolomics. 3. Biomarker discovery in the urine of gamma-irradiated rats using a simplified metabolomics protocol of gas chromatography-mass spectrometry combined with random forests machine learning algorithm.

Anti-thyroid hormone activity of bisphenol A, tetrabromobisphenol A and tetrachlorobisphenol A in an improved reporter gene assay.

Simultaneous exposure of *Xenopus* A6 kidney epithelial cells to concurrent mild sodium arsenite and heat stress results in enhanced hsp30 and hsp70 gene expression and the acquisition of thermotolerance.

Organic cation transporters: physiology, toxicology and special focus on ethidium as a novel substrate.

The effect of workload on biological monitoring of occupational exposure to toluene and n-Hexane: contribution of physiologically based toxicokinetic modeling.

Oral charcoal adsorbent (AST-120) prevents progression of cardiac damage in chronic kidney disease through suppression of oxidative stress.

Detection of the anti-androgenic effect of endocrine disrupting environmental contaminants using in vivo and in vitro assays in the three-spined stickleback.

In vitro glutathione conjugation of methyl iodide in rat, rabbit, and human blood and tissues.

Two-day inhalation toxicity study of methyl iodide in the rat.

[Effect of environment temperature on the recovery of microdialysis probe for monoamine neurotransmitter].

Folate, Cobalamin, Cysteine, Homocysteine, and Arsenic Metabolism among Children in Bangladesh.

Dioxin-induced up-regulation of the active form of vitamin D is the main cause for its inhibitory action on osteoblast activities, leading to developmental bone toxicity.

Persistent adverse effects on health and reproduction caused by exposure of zebrafish to 2,3,7,8-tetrachlorodibenzo-p-dioxin during early development and gonad differentiation.

Sustaining hypercitrullinemia, hypercholesterolemia and augmented oxidative stress in Japanese children with aspartate/glutamate carrier isoform 2-citrin-deficiency even during the silent period.

Self-collected urine sampling to study the kinetics of urinary toluene (and o-cresol) and define the best sampling time for biomonitoring.

Genetic polymorphisms in AS3MT and arsenic metabolism in residents of the Red River Delta, Vietnam.

Effects of smoking cessation on eight urinary tobacco carcinogen and toxicant biomarkers.

Kir 2.2 inward rectifier potassium channels are inhibited by an endogenous factor in *Xenopus* oocytes independently from the action of a mitochondrial uncoupler.

Studies on histopathological changes in the gill, liver and kidney of *Channa punctatus* (Bloch) exposed to Alachlor.

Variability in biomarkers of arsenic exposure and metabolism in adults over time.

Parathyroid hormone regulation of the human bone sialoprotein gene transcription is mediated through two cAMP response elements.

New ifosfamide analogs designed for lower associated neurotoxicity and nephrotoxicity with modified alkylating kinetics leading to enhanced in vitro anticancer activity.

Relationship of urinary arsenic metabolites to intake estimates in residents of the Red River Delta, Vietnam.

Refractory cardiopulmonary failure after glyphosate surfactant intoxication: a case report.

A simple efficient technique of 'mid-dilution' on-line hemodiafiltration.

Lidocaine prevents referred hyperalgesia associated with cystitis.

Ameliorating effect of curcumin on sodium arsenite-induced oxidative damage and lipid peroxidation in different rat organs.

Levels of urinary total and speciated arsenic in the US population: National Health and Nutrition Examination Survey 2003-2004.

Gestational exposure to atrazine: effects on the postnatal development of male offspring.

Formation of dimethylthioarsenicals in red blood cells.

Reduction of paraquat-induced renal cytotoxicity by manganese and copper complexes of EGTA and EHPG.

Changes in muscarinic receptors in the toad urothelial cell line TBM-54 following acrolein treatment.

Pneumoproteins as markers of paraquat lung injury: a clinical case.

Effect of butachlor on antioxidant enzyme status and lipid peroxidation in fresh water African catfish, (*Clarias gariepinus*).

A comparative 90-day toxicity study of allyl acetate, allyl alcohol and acrolein.

Agent Orange exposure, Vietnam War veterans, and the risk of prostate cancer.

Editorial comment on: Agent Orange exposure, Vietnam War veterans, and the risk of prostate cancer.

Paraquat exposure reduces nicotinic receptor-evoked dopamine release in monkey striatum.

An outbreak of fatal pneumonitis caused by contamination of illicit alcohol with paraquat.

Comparative effects of herbicides on photosynthesis and growth of tropical estuarine microalgae.

In vitro nephrotoxicity induced by propanil.

Cytotoxicity of combinations of arsenicals on rat urinary bladder urothelial cells in vitro.

Comparison of a pulsatile blood pump and a peristaltic roller pump during hemoperfusion treatment in a canine model of paraquat poisoning.

Hemoperfusion using dual pulsatile pump in paraquat poisoning.

The effectiveness of combined treatment with methylprednisolone and cyclophosphamide in oral paraquat poisoning.

Blockade of NGF and trk receptors inhibits increased peripheral mechanical sensitivity accompanying cystitis in rats.

Cancer incidence among pesticide applicators exposed to trifluralin in the Agricultural Health Study.

Induction of COX-2 expression by acrolein in the rat model of hemorrhagic cystitis.

[Meta-analysis of association between pentachlorophenol exposure and cancer risk].

Acute renal failure induced by bentazone: 2 case reports and a comprehensive review.

A fatal intoxication from ingestion of 2-methyl-4-chlorophenoxyacetic acid (MCPA).

Dose-dependent uptake, elimination, and toxicity of monosodium methanearsonate in adult zebra finches (*Taeniopygia guttata*).

Metabolic acidosis in prometryn (triazine herbicide) self-poisoning.

Genotoxic potential of glyphosate formulations: mode-of-action investigations.

Perturbation of organogenesis by the herbicide atrazine in the amphibian *Xenopus laevis*.

Urinary corticosterone as an indicator of stress-mediated immunological changes in rats.

Determination of cytotoxicity of nephrotoxins on murine and human kidney cell lines.

Analysis of phenoxyacetic acid herbicides as biomarkers in human urine using liquid chromatography/triple quadrupole mass spectrometry.

Cannabinoid receptor 2 is increased in acutely and chronically inflamed bladder of rats.

Arsenic exposure, urinary arsenic speciation, and the incidence of urothelial carcinoma: a twelve-year follow-up study.

Prostaglandins inhibit cytochrome P450 4A activity and contribute to endotoxin-induced hypotension in rats via nitric oxide production.

Oxidative stress as a biomarker of respiratory disturbance in patients with severe motor and intellectual disabilities.

Recruiting strategy and 24-hour biomonitoring of paraquat in agricultural workers.

Tissue distribution and urinary excretion of inorganic arsenic and its methylated metabolites in C57BL6 mice following subchronic exposure to arsenate in drinking water.

A physiologically based pharmacokinetic model for intravenous and ingested dimethylarsinic acid in mice.

Identification of the major arsenic-binding protein in rat plasma as the ternary dimethylarsinous-hemoglobin-haptoglobin complex.

Distribution and function of the hydrogen sulfide-sensitive TRPA1 ion channel in rat urinary bladder.

Editorial comment on: distribution and function of the hydrogen sulfide-sensitive TRPA1 ion channel in rat urinary bladder.

Development of a human physiologically based pharmacokinetic (PBPK) model for inorganic arsenic and its mono- and di-methylated metabolites.

Mutagenic potential of DNA-peptide crosslinks mediated by acrolein-derived DNA adducts.

The effects of in utero exposure to a migrant, 4,4'-butylidenebis(6-t-butyl-m-cresol), from nitrile-butadiene rubber gloves on monoamine neurotransmitter in rats.

Comparison of broiler performance and carcass yields when fed diets containing transgenic maize grains from event DP-O9814O-6 (Optimum GAT), near-isogenic control maize grain, or commercial reference maize grains.

Curcumin attenuates cytochrome P450 induction in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin by ROS-dependently degrading AhR and ARNT.

Hypertension, cardiac hypertrophy, and impaired vascular relaxation induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin are associated with increased superoxide.

Effect of FeSO₄ treatment on glucose metabolism in diabetic rats.

Carbamylated low-density lipoprotein induces proliferation and increases adhesion molecule expression of human coronary artery smooth muscle cells.

New insights into uremic toxicity.

Abnormal liver development and resistance to 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity in mice carrying a mutation in the DNA-binding domain of the aryl hydrocarbon receptor.

Decreased urinary beta-defensin-1 expression as a biomarker of response to arsenic.

KLF6 induces apoptosis in prostate cancer cells through up-regulation of ATF3.

Polymorphisms in cell cycle regulatory genes, urinary arsenic profile and urothelial carcinoma.

Combined administration of taurine and monoisoamyl DMSA protects arsenic induced oxidative injury in rats.

Effects of uremic serum and uremic toxins on hepatic uptake of digoxin.

Perinatal 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure sensitizes offspring to angiotensin II-induced hypertension.

Urinary arsenic speciation and its correlation with 8-OHdG in Chinese residents exposed to arsenic through coal burning.

An enhanced postnatal autoimmune profile in 24 week-old C57BL/6 mice developmentally exposed to TCDD.

Critical role of cyclooxygenase-2 activation in pathogenesis of hydronephrosis caused by lactational exposure of mice to dioxin.

Antiteratogenic effect of resveratrol in mice exposed in utero to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effect of hand dermatitis on the total body burden of chromium after ferrous sulfate application in cement among cement workers.

Protective effects of GH and IGF-I against iron-induced lipid peroxidation in vivo.

Liver is a target of arsenic carcinogenesis.

KML001 cytotoxic activity is associated with its binding to telomeric sequences and telomere erosion in prostate cancer cells.

Interplay between cellular methyl metabolism and adaptive efflux during oncogenic transformation from chronic arsenic exposure in human cells.

Relationship of impaired olfactory function in ESRD to malnutrition and retained uremic molecules.

Effect of hemolytic and iron-deficiency anemia on intestinal absorption and tissue accumulation of cadmium.

Pollutant effects on genotoxic parameters and tumor-associated protein levels in adults: a cross sectional study.

Can folate intake reduce arsenic toxicity?

Clinical manifestations and arsenic methylation after a rare subacute arsenic poisoning accident.

Free p-cresol is associated with cardiovascular disease in hemodialysis patients.

The preparation and characterization of anti-VEGFR2 conjugated, paclitaxel-loaded PLLA or PLGA microspheres for the systemic targeting of human prostate tumors.

Neuropharmacological profile of novel and selective 5-HT₆ receptor agonists: WAY-181187 and WAY-208466.

Medullary pathways mediating the parasubthalamic nucleus depressor response.

A Weibull-PBPK model for assessing risk of arsenic-induced skin lesions in children.

Role of hormonal and other factors in human prostate cancer.

Removal of the uremic retention solute p-cresol using fractionated plasma separation and adsorption.

Plasma folate level, urinary arsenic methylation profiles, and urothelial carcinoma susceptibility.

Effectiveness of oral and intravenous iron therapy in haemodialysis patients.

Enhancements of 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone (NNK) metabolism and carcinogenic risk via NNK/arsenic interaction.

Renoprotective action of L-carnitine in fructose-induced metabolic syndrome.

In utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure: effects on fetal and adult cardiac gene expression and adult cardiac and renal morphology.

The effects of gum arabic oral treatment on the metabolic profile of chronic renal failure patients under regular haemodialysis in Central Sudan.

Anemia management in peritoneal dialysis patients: can an iron supplement maintain a normal transferrin saturation and hemoglobin level?

Arsenic methylation capability, heme oxygenase-1 and NADPH quinone oxidoreductase-1 genetic polymorphisms and the stage and grade of urothelial carcinomas.

Tissue levels of arsenicals and skin tumor response following administration of monomethylarsonous acid and arsenite to K6/ODC mice.

Inhalant abuse detection and evaluation in young Tunisians.

Feasibility studies of 4'-[methyl-(11)C]thiothymidine as a tumor proliferation imaging agent in mice.

Developmental exposure to polychlorinated biphenyls PCB153 or PCB126 impairs learning ability in young but not in adult rats.

Endocrine disruptors and estrogenic effects on male reproductive axis.

Removal of the protein-bound solutes indican and p-cresol sulfate by peritoneal dialysis.

Reactivity of urinary albumin (microalbumin) assays with fragmented or modified albumin.

Urinary 8-hydroxydeoxyguanosine and urothelial carcinoma risk in low arsenic exposure area.

Concentrations of urinary pesticide metabolites in small-scale farmers in Chiang Mai Province, Thailand.

Clinical applications of urinary organic acids. Part 2. Dysbiosis markers.

WNT5A selectively inhibits mouse ventral prostate development.

Dioxin causes ventral prostate agenesis by disrupting dorsoventral patterning in developing mouse prostate.

Effects of inorganic arsenic on the rat and mouse urinary bladder.

Reactive oxygen species from the uncoupling of human cytochrome P450 1B1 may contribute to the carcinogenicity of dioxin-like polychlorinated biphenyls.

Protein expression in the livers and urinary bladders of hamsters exposed to sodium arsenite.

Effects of endogenous hydrogen peroxide and glutathione on the stability of arsenic metabolites in rat bile.

Lack of TRPV1 inhibits cystitis-induced increased mechanical sensitivity in mice.

Synthesis and in vivo evaluation of novel PET radioligands for imaging the endothelin-A receptor.

Significance of urinary arsenic speciation in assessment of seafood ingestion as the main source of organic and inorganic arsenic in a population resident near a coastal area.

Intracellular localization of the heat shock protein, HSP110, in *Xenopus laevis* A6 kidney epithelial cells.

Dose-response effect of arabinoxylooligosaccharides on gastrointestinal motility and on colonic bacterial metabolism in healthy volunteers.

Saliva as an analytical tool to measure occupational exposure to toluene.

Attenuation of TCDD-induced oxidative stress by 670 nm photobiomodulation in developmental chicken kidney.

Comparative study of ezrin phosphorylation among different tissues: more is good; too much is bad.

Histopathological alterations of Nile tilapia, *Oreochromis niloticus* in acute and subchronic alachlor exposure.

Quercetin administration during chelation therapy protects arsenic-induced oxidative stress in mice.

Antioxidant activity of different extracts of Argentinian medicinal plants against arsenic-induced toxicity in renal cells.

Mechanistic aspects of 4-amino-2,6-dichlorophenol-induced in vitro nephrotoxicity.

The concept of neurogenic inflammation.

Tissue dosimetry, metabolism and excretion of pentavalent and trivalent dimethylated arsenic in mice after oral administration.

Metabolism and disposition of [¹⁴C]5-amino-o-cresol in female F344 rats and B6C3F1 mice.

Role of the Met(287)Thr polymorphism in the AS3MT gene on the metabolic arsenic profile.

2,3,7,8-Tetrachlorodibenzo-p-dioxin increases Bovine Herpesvirus type-1 (BHV-1) replication in Madin-Darby Bovine Kidney (MDBK) cells in vitro.

Tissue-specific induction of EROD activity and CYP1A protein in *Sparus aurata* exposed to B(a)P and TCDD.

Evaluation of the antiandrogenic effects of flutamide, DDE, and linuron in the weanling rat assay using organ weight, histopathological, and proteomic approaches.

Pesticide dose estimates for children of Iowa farmers and non-farmers.

Chlorate poisoning in beef cattle.

Roundup intoxication and a rationale for treatment.

Acrolein inactivates paraoxonase 1: changes in free acrolein levels after hemodialysis correlate with increases in paraoxonase 1 activity in chronic renal failure patients.

Pathophysiological aspects of cyclophosphamide and ifosfamide induced hemorrhagic cystitis; implication of reactive oxygen and nitrogen species as well as PARP activation.

Comparison of the effects of the superoxide dismutase mimetics EUK-134 and tempol on paraquat-induced nephrotoxicity.

[Immunosuppressive treatment due to paraquat poisoning].

Trifluralin toxicity in a Chagas disease mouse model.

Toxicity of dimethylmonothioarsinic acid toward human epidermoid carcinoma A431 cells.

Role of MGMT in protecting against cyclophosphamide-induced toxicity in cells and animals.

Further evidence against a direct genotoxic mode of action for arsenic-induced cancer.

Arsenic-induced bladder cancer in an animal model.

Protective effects of wheat bran against diquat toxicity in male Fischer-344 rats.

Time- and dose-dependent effects of roundup on human embryonic and placental cells.

Effects of paraquat on anti-oxidant system in rats.

An unusual toxic cause of hemolytic-uremic syndrome.

Atrazine-induced aromatase expression is SF-1 dependent: implications for endocrine disruption in wildlife and reproductive cancers in humans.

Agent Orange, prostate cancer irradiation and acute promyelocytic leukemia (APL): is there a link?

Toxicity studies of butachlor to the freshwater fish *Channa punctata* (Bloch).

Urinary pentachlorophenol in painters and bricklayers in a four-years time interval after the PCP prohibition ordinance in Germany.

[Protective effect of melatonin and sodium thiosulphate on histopathology and ultrastructure of the kidney in rats with acute paraquat poisoning].

Melatonin reduces mortality and oxidatively mediated hepatic and renal damage due to diquat treatment.

Combined effects of herbicides on biomarkers reflecting immune-endocrine interactions in goldfish. Immune and antioxidant effects.

Trivalent arsenicals induce lipid peroxidation, protein carbonylation, and oxidative DNA damage in human urothelial cells.

Evaluation of alachlor herbicide impacts on Nile tilapia (*Oreochromis niloticus*) using biochemical biomarkers.

Atrazine-induced reproductive tract alterations after transplacental and/or lactational exposure in male Long-Evans rats.

Developmental toxicity evaluation of triclopyr butoxyethyl ester and triclopyr triethylamine salt in the CD rat.

Urinary alkalinisation for acute chlorophenoxy herbicide poisoning.

A fatal case of paraquat poisoning following minimal dermal exposure.

Impact of the specificity of the exposure metric on exposure-response relationships.

Reproductive effects in male rats exposed to diuron.

Urinary pesticide concentrations among children, mothers and fathers living in farm and non-farm households in Iowa.

Epidemiological and clinical investigations among employees in a former herbicide production process.

Amifostine and glutathione prevent ifosfamide- and acrolein-induced hemorrhagic cystitis.

Acute antihypertensive action of Tempol in the spontaneously hypertensive rat.

Research toward the development of a biologically based dose response assessment for inorganic arsenic carcinogenicity: a progress report.

Arsenic metabolism, genetic susceptibility, and risk of premalignant skin lesions in Bangladesh.

Acute acrolein-induced cystitis in mice.

Inhibitory effect of cinnamaldehyde, derived from *Cinnamomi* cortex, on the growth of influenza A/PR/8 virus in vitro and in vivo.

Arsenic methylation, GSTT1, GSTM1, GSTP1 polymorphisms, and skin lesions.

Evaluation of oxidative stress in D-serine induced nephrotoxicity.

A possible role of thioredoxin interacting protein in the pathogenesis of streptozotocin-induced diabetic nephropathy.

Indoxyl sulfate-lowering capacity of oral sorbents affects the prognosis of kidney function and oxidative stress in chronic kidney disease.

Antiplatelet and antithrombotic activities of essential oil from wild *Ocotea quixos* (Lam.) Kosterm. (Lauraceae) calices from Amazonian Ecuador.

Cinnamaldehyde reduction of platelet aggregation and thrombosis in rodents.

Transient receptor potential channel A1 involved in sensory transduction of rat urinary bladder through C-fiber pathway.

Assessing exposure to atrazine and its metabolites using biomonitoring.

Identification of human urinary metabolites of acetochlor in exposed herbicide applicators by high-performance liquid chromatography-tandem mass spectrometry.

Pesticide urinary metabolite levels of children in eastern North Carolina farmworker households.

Transport of paraquat by human organic cation transporters and multidrug and toxic compound extrusion family.

Tissue distribution and urinary excretion of dimethylated arsenic and its metabolites in dimethylarsinic acid- or arsenate-treated rats.

Endogenous hydrogen peroxide in paraventricular nucleus mediating cardiac sympathetic afferent reflex and regulating sympathetic activity.

Environmental Arsenic Exposure and Urinary 8-OHdG in Arizona and Sonora.

Distribution of ¹⁴C-atrazine following an acute lactational exposure in the Wistar rat.

Consumption of folate-related nutrients and metabolism of arsenic in Bangladesh.

Characterization of the uptake of organic anion transporter (OAT) 1 and OAT3 substrates by human kidney slices.

Ifosfamide toxicity in cultured proximal renal tubule cells.

Metabolic differences between two dimethylthioarsenicals in rats.

Ethanol and acetaldehyde: in vivo quantitation and effects on cholinergic function in rat brain.

Agmatine transport into spinal nerve terminals is modulated by polyamine analogs.

Effect of fasting on the pattern of urinary arsenic excretion.

Supplementation of ascorbic acid and alpha-tocopherol prevents arsenic-induced protein oxidation and DNA damage induced by arsenic in rats.

Identification of interspecies concordance of mechanisms of arsenic-induced bladder cancer.

Folate deficiency enhances arsenic effects on expression of genes involved in epidermal differentiation in transgenic K6/ODC mouse skin.

Pharmacokinetics of 3-[125I]iodo-alpha-methyl-L-tyrosine, a tumor imaging agent, after probenecid loading in mice implanted with colon cancer DLD-1 cells.

Bacterial overgrowth affects urinary proteome analysis: recommendation for centrifugation, temperature, duration, and the use of preservatives during sample collection.

Arsenic salt-induced DNA damage and expression of mutant p53 and COX-2 proteins in SV-40 immortalized human uroepithelial cells.

Antiteratogenic effects of alpha-naphthoflavone on 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposed mice in utero.

Differential effects of quercetin and silymarin on arsenite-induced cytotoxicity in two human breast adenocarcinoma cell lines.

A case of survival following high-dose sodium azide poisoning.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin alters retinoid homeostasis in maternal and perinatal tissues of the Holtzman rat.

Comparison of the cytotoxicity of the nitroaromatic drug flutamide to its cyano analogue in the hepatocyte cell line TAMH: evidence for complex I inhibition and mitochondrial dysfunction using toxicogenomic screening.

Toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the developing male Wistar(Han) rat. II: Chronic dosing causes developmental delay.

Arsenic salts induced autophagic cell death and hypermethylation of DAPK promoter in SV-40 immortalized human uroepithelial cells.

Artificial sweeteners and salts producing a metallic taste sensation activate TRPV1 receptors.

Transplacental arsenic carcinogenesis in mice.

[Cancers and pesticides].

Selenium deficiency alters epithelial cell morphology and responses to influenza.

Elevation of 8-hydroxydeoxyguanosine and cell proliferation via generation of oxidative stress by organic arsenicals contributes to their carcinogenicity in the rat liver and bladder.

Induction of cyp1a1 is a nonspecific biomarker of aryl hydrocarbon receptor activation: results of large scale screening of pharmaceuticals and toxicants in vivo and in vitro.

Inhibition of NF-KB does not induce c-Jun N-terminal kinase-mediated apoptosis in reperfusion injury.

A battery of DNA effect biomarkers to evaluate environmental exposure of Flemish adolescents.

Some clinico and histopathological changes in female goats experimentally exposed to dioxin.

Pulmonary biomarkers based on alterations in protein expression after exposure to arsenic.

Effects of various pesticides on human 5alpha-reductase activity in prostate and LNCaP cells.

Iron therapy for renal anemia: how much needed, how much harmful?

New ligand coupling procedure for formation of an immunoadsorption wall.

Association of a polychlorinated dibenzo-p-dioxin, a polychlorinated biphenyl, and DDT with diabetes in the 1999-2002 National Health and Nutrition Examination Survey.

Clinical aspects of iron use in the anemia of kidney disease.

The aryl hydrocarbon receptor inhibits prostate carcinogenesis in TRAMP mice.

P-cresylsulphate, the main in vivo metabolite of p-cresol, activates leucocyte free radical production.

Uncoupling of oxidative phosphorylation enables *Candida albicans* to resist killing by phagocytes and persist in tissue.

Genetic polymorphisms in MTHFR 677 and 1298, GSTM1 and T1, and metabolism of arsenic.

Urinary arsenic profile affects the risk of urothelial carcinoma even at low arsenic exposure.

Arsenic methylation capability and hypertension risk in subjects living in arseniasis-hyperendemic areas in southwestern Taiwan.

[¹¹C]Vinblastine syntheses and preliminary imaging in cancer patients.

Increased excretion of glycosaminoglycans in children with urinary incontinence compared to those with monosymptomatic nocturnal enuresis.

Arsenic methylation, urinary arsenic metabolites and human diseases: current perspective.

Kidney development in the nitrofen-induced pulmonary hypoplasia and congenital diaphragmatic hernia in rats.

In vitro utilization of ferromagnetic nanoparticles in hemodialysis therapy.

The influence of exposure history on arsenic accumulation and toxicity in the killifish, *Fundulus heteroclitus*.

ATF4-dependent oxidative induction of the DNA repair enzyme Ape1 counteracts arsenite cytotoxicity and suppresses arsenite-mediated mutagenesis.

Constitutive mRNA expression of various glutathione S-transferase isoforms in different tissues of mice.

Nrf2 protects human bladder urothelial cells from arsenite and monomethylarsonous acid toxicity.

Tissue iron distribution and urinary mineral excretion vary depending on the form of iron (FeSO₄ or NaFeEDTA) and the route of administration (oral or subcutaneous) in rats given high doses of iron.

Folic acid supplementation lowers blood arsenic.

Accumulation of hypoxia-inducible factor-1 α through a novel electrophilic, thiol antioxidant-sensitive mechanism.

Comparative evaluation of biomarkers of occupational exposure to toluene.

Aryl hydrocarbon receptor splice variants in the dioxin-resistant rat: tissue expression and transactivational activity.

Interleukin-6 stimulates alpha-MG uptake in renal proximal tubule cells: involvement of STAT3, PI3K/Akt, MAPKs, and NF-kappaB.

An angiotensin II type-I receptor blocker, olmesartan medoxomil, attenuates lipid peroxidation in renal injury induced by subtotal nephrectomy.

Lack of an effect of oral iron administration on mycophenolic acid pharmacokinetics in stable renal transplant recipients.

Metabolic activation of herbal and dietary constituents and its clinical and toxicological implications: an update.

Thyroid ultrasound volume, structure and function after long-term high exposure of large population to polychlorinated biphenyls, pesticides and dioxin.

Exposure of sweepers to volatile organic compounds using urinary biological exposure index.

SCL-GFP transgenic zebrafish: in vivo imaging of blood and endothelial development and identification of the initial site of definitive hematopoiesis.

Sodium arsenite affects Na⁺ transport in the isolated skin of the toad *Pleurodema thaul*.

Intravenous versus oral iron supplementation in peritoneal dialysis patients.

Overexpression of thioredoxin1 in transgenic mice suppresses development of diabetic nephropathy.

[Estimation of urinary diacetylspermine in Yusho patients].

HPLC-ICP-MS speciation analysis of arsenic in urine of Japanese subjects without occupational exposure.

MRP2 and acquired tolerance to inorganic arsenic in the kidney of killifish (*Fundulus heteroclitus*).

Reproductive functions and hypothalamic catecholamines in response to the soil fumigant metam sodium: adaptations to extended exposures.

[Relationship between 5,10-methylenetetrahydrofolate reductase genetic polymorphism and arsenic metabolism].

Urinary arsenic metabolites in children and adults exposed to arsenic in drinking water in Inner Mongolia, China.

[Physiological significance of metallothionein in oxidative stress].

Concentration and distribution of dioxins and related compounds in human tissues.

Human urine certified reference material CZ 6010: creatinine and toluene metabolites (hippuric acid and o-cresol) and a benzene metabolite (phenol).

Tissue residues, metabolism, and excretion of radiolabeled sodium chlorate (Na[³⁶Cl]O₃) in rats.

Angiotensin II inhibits the ROMK-like small conductance K channel in renal cortical collecting duct during dietary potassium restriction.

Cigarette smoking as a risk factor for atherosclerosis and renal disease: novel pathogenic insights.

Superior dialytic clearance of beta2 microglobulin and p-cresol by high-flux hemodialysis as compared to peritoneal dialysis.

Comparative developmental toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the hamster, rat and guinea pig.

Vitamin E supplementation protects oxidative stress during arsenic and fluoride antagonism in male mice.

Use of model-based compartmental analysis to study vitamin A kinetics and metabolism.

Biomarkers for oxidative stress: clinical application in pediatric medicine.

Effects of combined administration of captopril and DMSA on arsenite induced oxidative stress and blood and tissue arsenic concentration in rats.

Comparison between urinary o-cresol and toluene as biomarkers of toluene exposure.

Effects of Lactobacillus casei Shirota, Bifidobacterium breve, and oligofructose-enriched inulin on colonic nitrogen-protein metabolism in healthy humans.

Diquat induces renal proximal tubule injury in glutathione reductase-deficient mice.

Adverse effects of herbicide MCPA on dogs in a 90 day toxicological study.

Aryloxoalcanoic compounds induce resistance to antibiotic therapy in urinary tract infection caused by Escherichia coli.

Relationship between body iron stores and diquat toxicity in male Fischer-344 rats.

A model of hemorrhagic cystitis induced with acrolein in mice.

Effect of the food flavour cinnamaldehyde on the antioxidant status of rat kidney.

Single high dose dexamethasone treatment decreases the pathological score and increases the survival rate of paraquat-intoxicated rats.

A case of acute sodium chlorate self-poisoning successfully treated without conventional therapy.

Paraquat-induced gene expression in rat kidney.

Investigation of cancer occurrences associated with an herbicide manufacturing facility.

Three controversial issues in extracorporeal toxin removal.

Cancer incidence among pesticide applicators exposed to cyanazine in the agricultural health study.

Cancer and occupational exposure to pentachlorophenol and tetrachlorophenol (Canada).

Effects of Diuron [3-(3,4-dichlorophenyl)-1,1-dimethylurea] on the urinary bladder of male Wistar rats.

Acute paraquat poisoning: report of a survival case following intake of a potential lethal dose.

Antimutagenic effect of neem leaves extract in freshwater fish, *Channa punctatus* evaluated by cytogenetic tests.

Cancer incidence among pesticide applicators exposed to metolachlor in the Agricultural Health Study.

Respiratory distress, pneumonic changes on chest X-ray, hypoxaemia, oral candidiasis in a homosexual male: not always *Pneumocystis carinii* pneumonia.

Dimethylarsinic acid: results of chronic toxicity/oncogenicity studies in F344 rats and in B6C3F1 mice.

Effects of pentachlorophenol on the reproduction of Japanese medaka (*Oryzias latipes*).

Tamoxifen protect against hydroxyl radical generation induced by phenelzine in rat striatum.

Effects of paraquat on the freshwater fish *Channa punctata* (Bloch): non-enzymatic antioxidants as biomarkers of exposure.

Prostate cancer in US Air Force veterans of the Vietnam war.

Methylated arsenicals: the implications of metabolism and carcinogenicity studies in rodents to human risk assessment.

A comparative study of the sub-chronic toxic effects of three organic arsenical compounds on the urothelium in F344 rats; gender-based differences in response.

Can early hemodialysis affect the outcome of the ingestion of glyphosate herbicide?

Polyamines in renal failure.

Contrasting genome-wide distribution of 8-hydroxyguanine and acrolein-modified adenine during oxidative stress-induced renal carcinogenesis.

Effect of plasma homocysteine level and urinary monomethylarsonic acid on the risk of arsenic-associated carotid atherosclerosis.

Nonpersistent pesticide exposure self-report versus biomonitoring in farm pesticide applicators.

[Physiological functions of polyamines and regulation of polyamine content in cells].

Tissue distribution of lipid peroxidation product acrolein in human colon carcinogenesis.

Lisinopril ameliorates paraquat-induced lung fibrosis.

Effects of arsenic exposure among semiconductor workers: a cautionary note on urinary 8-oxo-7,8-dihydro-2'-deoxyguanosine.

An oral adsorbent, AST-120, suppresses oxidative stress in uremic rats.

Acrolein generation stimulates hypercontraction in isolated human blood vessels.

Cinnamaldehyde induces endothelium-dependent and -independent vasorelaxant action on isolated rat aorta.

Evaluation of a urinary multi-parameter biomarker set for oxidative stress in children, adolescents and young adults.

Contractile mechanisms coupled to TRPA1 receptor activation in rat urinary bladder.

Cytosolic and localized inhibition of phosphodiesterase by atrazine in swine tissue homogenates.

Metabolic profile in workers occupationally exposed to arsenic: role of GST polymorphisms.

Distribution of urinary selenium and arsenic among pregnant women exposed to arsenic in drinking water.

Chloroacetaldehyde- and acrolein-induced death of human proximal tubule cells.

Anthropometric and metabolic factors and risk of benign prostatic hyperplasia: a prospective cohort study of Air Force veterans.

Binding and activation of the seven-transmembrane estrogen receptor GPR30 by environmental estrogens: a potential novel mechanism of endocrine disruption.

[Current progress in animal models of arsenic carcinogenesis].

Serum dioxin, testosterone, and subsequent risk of benign prostatic hyperplasia: a prospective cohort study of Air Force veterans.

Folate and arsenic metabolism: a double-blind, placebo-controlled folic acid-supplementation trial in Bangladesh.

Environmental arsenic exposure and sputum metalloproteinase concentrations.

Localization of cytochrome P450 1A1 in a specific region of hydronephrotic kidney of rat neonates lactationally exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Carcinogenicity of "non-dioxinlike" polychlorinated biphenyls.

Interferon-gamma plays protective roles in sodium arsenite-induced renal injury by up-regulating intrarenal multidrug resistance-associated protein 1 expression.

The uremic solute p-cresol decreases leukocyte transendothelial migration in vitro.

Aqueous extract of *Trigonella foenum-graecum* L. ameliorates additive urotoxicity of buthionine sulfoximine and cyclophosphamide in mice.

The therapeutic effect of tissue cultured root of wild *Panax ginseng* C.A. Mayer on spermatogenic disorder.

Epigenetic inactivation of the dioxin-responsive cytochrome P4501A1 gene in human prostate cancer.

Decreased nitric oxide production in the rat brain after chronic arsenic exposure.

Superior dialytic clearance of beta(2)-microglobulin and p-cresol by high-flux hemodialysis as compared to peritoneal dialysis.

The constitutively active Ah receptor (CA-Ahr) mouse as a potential model for dioxin exposure--effects in vital organs.

For dioxin-induced birth defects, mouse or human CYP1A2 in maternal liver protects whereas mouse CYP1A1 and CYP1B1 are inconsequential.

Dioxin exposure and benign prostatic hyperplasia.

Inhibition of HER-2(neu/ErbB2) restores normal function and structure to polycystic kidney disease (PKD) epithelia.

[Development of invasive urinary bladder carcinomas].

A potential endogenous ligand for the aryl hydrocarbon receptor has potent agonist activity in vitro and in vivo.

Adsorption of the uremic toxin p-cresol onto hemodialysis membranes and microporous adsorbent zeolite silicalite.

[Effect of prepared Polygonum multiflorum on striatum extracellular acetylcholine and choline in rats of intracerebral perfusion with sodium azide].

NTP technical report on the toxicology and carcinogenesis studies of 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (Gavage studies).

Review and meta-analysis of risk estimates for prostate cancer in pesticide manufacturing workers.

Effect of Centella asiatica on arsenic induced oxidative stress and metal distribution in rats.

Differential transcriptional regulation by mouse single-minded 2s.

NADPH oxidase in the renal medulla causes oxidative stress and contributes to salt-sensitive hypertension in Dahl S rats.

The early embryo loss caused by 2,3,7,8-tetrachlorodibenzo-p-dioxin may be related to the accumulation of this compound in the uterus.

Kidney failure and the gut: p-cresol and the dangers from within.

Free serum concentrations of the protein-bound retention solute p-cresol predict mortality in hemodialysis patients.

Elevation of circulating endothelial microparticles in patients with chronic renal failure.

The teratogenic sensitivity to 2,3,7,8-tetrachlorodibenzo-p-dioxin is modified by a locus on mouse chromosome 3.

System level metabolic effects of a Schistosoma japonicum infection in the Syrian hamster.

Congenital diaphragmatic hernia prevents absorption of distal air space fluid in late-gestation rat fetuses.

Occupational exposure to toluene and its possible causative role in renal damage development in shoe workers.

Biosynthesis of ¹⁴C-phytoene from tomato cell suspension cultures (*Lycopersicon esculentum*) for utilization in prostate cancer cell culture studies.

Control selection and pesticide exposure assessment via GIS in prostate cancer studies.

Genetic differences in lethality of newborn mice treated in utero with coplanar versus non-coplanar hexabromobiphenyl.

The citrus flavonoid naringenin stimulates DNA repair in prostate cancer cells.

Chloroacetaldehyde as a sulfhydryl reagent: the role of critical thiol groups in ifosfamide nephropathy.

A randomized controlled trial of oral versus intravenous iron in chronic kidney disease.

Possible beneficial effects of melatonin supplementation on arsenic-induced oxidative stress in Wistar rats.

Small molecule inhibitors of lysozyme amyloid aggregation.

Arsenic exposure in Hungary, Romania and Slovakia.

Effects of caffeine, halothane, and 4-chloro-m-cresol on skeletal muscle lactate and pyruvate in malignant hyperthermia-susceptible and normal swine as assessed by microdialysis.

Hemodialysis reduces inhibitory effect of plasma ultrafiltrate on LDL oxidation and subsequent endothelial reactions.

Understanding dioxin developmental toxicity using the zebrafish model.

Quantification of urinary allantoin by capillary zone electrophoresis during recombinant urate oxydase (rasburicase) therapy.

Sex and congenital diaphragmatic hernia.

Altered renin-angiotensin system gene expression causes renal hypoplasia in the rats with nitrofen-induced diaphragmatic hernia.

Induction of cytochrome P450-1A by the equine estrogen equilenin, a new endogenous aryl hydrocarbon receptor ligand.

Inhibition of MAPK stimulates the Ca²⁺ -dependent big-conductance K channels in cortical collecting duct.

Association between the levels of biogenic amines and superoxide anion production in brain regions of rats after subchronic exposure to TCDD.

The influence of inulin on the absorption of nitrogen and the production of metabolites of protein fermentation in the colon.

Serum dioxin-like activity is associated with reproductive parameters in young men from the general Flemish population.

Liver glycogen bodies: ground-glass hepatocytes in transplanted patients.

Deletion and single nucleotide substitution at G:C in the kidney of gpt delta transgenic mice after ferric nitrilotriacetate treatment.

Mitogen-activated protein kinases inhibit the ROMK (Kir 1.1)-like small conductance K channels in the cortical collecting duct.

Examination of the expression of the heat shock protein gene, hsp110, in *Xenopus laevis* cultured cells and embryos.

Toxicology and carcinogenesis studies of a mixture of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (Cas No. 1746-01-6), 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4), and 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) in female Harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4) in female Harlan Sprague-Dawley rats (gavage studies).

Effect of sodium azide on the metabolic activity of cultured fetal cells.

Results of a long-term carcinogenicity bioassay on Sprague-Dawley rats exposed to sodium arsenite administered in drinking water.

Effect of physical exertion on the biological monitoring of exposure of various solvents following exposure by inhalation in human volunteers: I. Toluene.

Effects of xenobiotics and steroids on renal and hepatic estrogen metabolism in lake trout.

Effects of individual and combined exposure to sodium arsenite and sodium fluoride on tissue oxidative stress, arsenic and fluoride levels in male mice.

Anti-androgenic activity of 3-methyl-4-nitrophenol in diesel exhaust particles.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (gavage studies).

Improved methods for urinary atrazine mercapturate analysis--assessment of an enzyme-linked immunosorbent assay (ELISA) and a novel liquid chromatography-mass spectrometry (LC-MS) method utilizing online solid phase extraction (SPE).

Differences in tumor-associated protein levels among middle-age Flemish women in association with area of residence and exposure to pollutants.

Chemical modification at subunit 1 of rat kidney Alpha class glutathione transferase with 2,3,5,6-tetrachloro-1,4-benzoquinone: close structural connectivity between glutathione conjugation activity and non-substrate ligand binding.

Toluene toxicokinetics and metabolism parameters in the rat and guinea pig.

Biomonitoring human exposure to organohalogenated substances by measuring urinary chlorophenols using a high-throughput screening (HTS) immunochemical method.

Cytochrome P4501A is induced in endothelial cell lines from the kidney and lung of the bottlenose dolphin, *Tursiops truncatus*.

Human sulphotransferases are involved in the activation of aristolochic acids and are expressed in renal target tissue.

Effects of chronic exposure to sodium arsenite on hypothalamo-pituitary-testicular activities in adult rats: possible an estrogenic mode of action.

[Resorption and tolerance of the high doses of ferrous sulfate and ferrous gluconate in the patients on peritoneal dialysis].

Urinary oxidative stress markers in young patients with type 1 diabetes.

Functional changes in bladder tissue from type III collagen-deficient mice.

Negative association between serum dioxin level and oxidative DNA damage markers in municipal waste incinerator workers.

The chlorinated AHR ligand 3,3',4,4',5-pentachlorobiphenyl (PCB126) promotes reactive oxygen species (ROS) production during embryonic development in the killifish (*Fundulus heteroclitus*).

The Relationship Between Noncoplanar PCB-Induced Immunotoxicity and Hepatic CYP1A Induction in a Fish Model.

Co-administration of zinc and n-acetylcysteine prevents arsenic-induced tissue oxidative stress in male rats.

Association between marijuana use and transitional cell carcinoma.

Induction of beta3-adrenergic receptor functional expression following chronic stimulation with noradrenaline in neonatal rat cardiomyocytes.

Gene expression profiling of responses to dimethylarsinic acid in female F344 rat urothelium.

Antioxidant and hepatoprotective effects of *Eucalyptus maculata*.

Applicator exposure to acetochlor based on biomonitoring.

Effects of 2,4-D and DCP on the DHT-induced androgenic action in human prostate cancer cells.

Farm Family Exposure Study: methods and recruitment practices for a biomonitoring study of pesticide exposure.

Toxicokinetics of 14C-atrazine and its metabolites in stage-66 *Xenopus laevis*.

Effect of 2,4-dichlorophenoxyacetic acid on the activities of some metabolic enzymes for generating pyridine nucleotide pool of cells from mouse liver.

Influence of dissolved organic matter from waste material on the phytotoxicity and environmental fate of triflurosulfuron methyl.

Paraquat-induced Fanconi syndrome.

Mechanism of acrolein-induced vascular toxicity.

A slowly developing dysfunction of dopaminergic nigrostriatal neurons induced by long-term paraquat administration in rats: an animal model of preclinical stages of Parkinson's disease?

High blood pressure is one of the symptoms of paraquat-induced toxicity in rats.

Acute arsenic poisoning in two siblings.

Sustained exposure to the widely used herbicide atrazine: altered function and loss of neurons in brain monoamine systems.

The comparative toxicology of 4-chloro-2-methylphenoxyacetic acid and its plant metabolite 4-chloro-2-carboxyphenoxyacetic acid in rats.

Effects of herbicide on the kidneys of two Venezuelan cultured fish: *Caquetaia kraussii* and *Colossoma macropomum* (Pisces: Ciclidae and Characeae).

Use of comet and micronucleus assays to measure genotoxicity in meadow voles (*Microtus pennsylvanicus*) living in golf course ecosystems exposed to pesticides.

A risk assessment of atrazine use in California: human health and ecological aspects.

Determination of biological reference values for chlorpyrifos metabolites in human urine using a toxicokinetic approach.

Acute exposure to molinate alters neuroendocrine control of ovulation in the rat.

Effects of co-administration of antioxidants and arsenicals on the rat urinary bladder epithelium.

Biomonitoring for farm families in the farm family exposure study.

Transforming growth factor-beta1 upregulation is independent of angiotensin in paraquat-induced lung fibrosis.

Nonosmotic release of vasopressin and renal aquaporins in impaired urinary dilution in hypothyroidism.

Doxorubicin increases intracellular hydrogen peroxide in PC3 prostate cancer cells.

Arsenic exposure, urinary arsenic speciation, and peripheral vascular disease in blackfoot disease-hyperendemic villages in Taiwan.

Acrolein modifies apolipoprotein A-I in the human artery wall.

Influence of atrazine administration and reduction of calorie intake on prostate carcinogenesis in probasin/SV40 T antigen transgenic rats.

Urinary trivalent methylated arsenic species in a population chronically exposed to inorganic arsenic.

Folate, homocysteine, and arsenic metabolism in arsenic-exposed individuals in Bangladesh.

Effects of gpx4 haploid insufficiency on GPx4 activity, selenium concentration, and paraquat-induced protein oxidation in murine tissues.

Adaptive response of antioxidant enzymes to catalase inhibition by aminotriazole in goldfish liver and kidney.

Investigation of the accumulation of 2,4-dichlorophenoxyacetic acid (2,4-D) in rat kidneys.

Identification of rat urinary and fecal metabolites of a new herbicide, pyribenzoxim.

Worker exposures to triclopyr: risk assessment through measurements in urine samples.

Tissue distribution and urinary excretion of inorganic arsenic and its methylated metabolites in mice following acute oral administration of arsenate.

Inhibition of acetaldehyde metabolism decreases acetylcholine release in medial frontal cortex of freely moving rats.

Urinary 3,5,6-trichloro-2-pyridinol levels of chlorpyrifos in Nicaraguan applicators and small farm families.

Tissue distribution of arsenic species in rabbits after single and multiple parenteral administration of arsenic trioxide: tissue accumulation and the reversibility after washout are tissue-selective.

Tissue, species, and environmental differences in absolute quantities of murine mRNAs coding for alpha, mu, omega, pi, and theta glutathione S-transferases.

Molecular events associated with arsenic-induced malignant transformation of human prostatic epithelial cells: aberrant genomic DNA methylation and K-ras oncogene activation.

Aryl hydrocarbon exposure induces expression of MMP-9 in human prostate cancer cell lines.

Uncoupling of oxidative phosphorylation prevents the urinary alcohol level cycling caused by feeding ethanol continuously at a constant rate.

Endemic nephropathy: the case for chronic poisoning by aristolochia.

Paradoxical effects of green tea (*Camellia sinensis*) and antioxidant vitamins in diabetic rats: improved retinopathy and renal mitochondrial defects but deterioration of collagen matrix glycoxidation and cross-linking.

Effects of arsenite on cell cycle progression in a human bladder cancer cell line.

Fryns syndrome without diaphragmatic hernia. Report on a new case and review of the literature.

The epidemiology of pesticide exposure and cancer: A review.

[Effects of Tianzhi Keli on extracellular acetylcholine and catecholamine levels in striatum of rats with neuromitochondrial impairment].

Erythrocyte susceptibility to oxidative stress in chronic renal failure patients under different substitutive treatments.

Comparative susceptibility of newborn and young rats to six industrial chemicals.

A randomized, controlled trial comparing IV iron sucrose to oral iron in anemic patients with nondialysis-dependent CKD.

Effects of dietary zinc and iron supplementation on mineral excretion, body composition, and mineral status of nursery pigs.

Hypothyroidism attenuates protein tyrosine nitration, oxidative stress and renal damage induced by ischemia and reperfusion: effect unrelated to antioxidant enzymes activities.

Darbepoetin alfa treatment for post-renal transplantation anemia during pregnancy.

Assay of the synthetic estrogen fosfestrol in pharmaceutical formulations using capillary electrophoresis.

Time profiles of peritoneal and renal clearances of different uremic solutes in incident peritoneal dialysis patients.

Lecozotan (SRA-333): a selective serotonin 1A receptor antagonist that enhances the stimulated release of glutamate and acetylcholine in the hippocampus and possesses cognitive-enhancing properties.

Genomic damage and circulating AGE levels in patients undergoing daily versus standard haemodialysis.

Cytochrome P450 1B1 is overexpressed and regulated by hypomethylation in prostate cancer.

Repeated in utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure affects male gonads in offspring, leading to sex ratio changes in F2 progeny.

Monitoring of hematological, inflammatory and oxidative reactions to acute oral iron exposure in human volunteers: preliminary screening for selection of potentially-responsive biomarkers.

Gas chromatographic-mass spectrometric analysis for measurement of p-cresol and its conjugated metabolites in uremic and normal serum.

In utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure: effects on the prostate and its response to castration in senescent C57BL/6J mice.

Glycation of mitochondrial proteins from diabetic rat kidney is associated with excess superoxide formation.

Determination of uric acid and p-aminohippuric acid in human saliva and urine using capillary electrophoresis with electrochemical detection: potential application in fast diagnosis of renal disease.

Carbamylated low-density lipoprotein induces death of endothelial cells: a link to atherosclerosis in patients with kidney disease.

Direct effect of plasma permeability factors from patients with idiopathic FSGS on nephrin and podocin expression in human podocytes.

One agent, many diseases: exposure-response data and comparative risks of different outcomes following silica exposure.

NF-kappaB and not the MAPK signaling pathway regulates GADD45beta expression during acute inflammation.

High susceptibility of human c-Ha-ras proto-oncogene transgenic rats to carcinogenesis: a cancer-prone animal model.

Common viral infection affects pentabrominated diphenyl ether (PBDE) distribution and metabolic and hormonal activities in mice.

Localization of cytochrome P450 CYP2S1 expression in human tissues by in situ hybridization and immunohistochemistry.

Organic anion transporter (Slc22a) family members as mediators of toxicity.

Did TCDD exposure or service in Southeast Asia increase the risk of cancer in air force Vietnam veterans who did not spray agent orange?

Rubidium-87 magnetic resonance spectroscopy and imaging for analysis of mammalian K⁺ transport.

Intracellular localization of Xenopus small heat shock protein, hsp30, in A6 kidney epithelial cells.

Prospective protective role of melatonin against arsenic-induced metabolic toxicity in Wistar rats.

Co-mutagenic activity of arsenic and benzo[a]pyrene in mouse skin.

Analysis of urinary biomarkers for exposure to alkyl benzenes by isotope dilution gas chromatography-mass spectrometry.

Neurobehavioural evaluation and kinetics of inhalation of constant or fluctuating toluene concentrations in human volunteers.

Function of nuclear sex hormone receptors in gene regulation.

Mineralocorticoids decrease the activity of the apical small-conductance K channel in the cortical collecting duct.

Removal of P-cresol sulfate by hemodialysis.

Dose-dependent liver regeneration in chloroform, trichloroethylene and allyl alcohol ternary mixture hepatotoxicity in rats.

Urinary and hand wipe pesticide levels among farmers and nonfarmers in Iowa.

Endogenous vascular hydrogen peroxide regulates arteriolar tension in vivo.

Tissue dosimetry, metabolism and excretion of pentavalent and trivalent monomethylated arsenic in mice after oral administration.

Contrasting contribution of 5-hydroxytryptamine 1A receptor activation to neurochemical profile of novel antipsychotics: frontocortical dopamine and hippocampal serotonin release in rat brain.

Current and emerging challenges in toxicopathology: carcinogenic threshold of phenobarbital and proof of arsenic carcinogenicity using rat medium-term bioassays for carcinogens.

Endothelin-1-induced contraction in veins is independent of hydrogen peroxide.

Application of a dialysis sampler to monitor phytoremediation processes.

Altered retinoid metabolism in female Long-Evans and Han/Wistar rats following long-term 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treatment.

The development of a physiologically-based pharmacokinetic model using the distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the tissues of the eastern oyster (*Crassostrea virginica*).

Protein carbonyls: novel biomarkers of exposure to oxidative stress-inducing pesticides in freshwater fish *Channa punctata* (Bloch).

Effects of dioxin on metabolism of estrogens in waste incinerator workers.

Concentrations of persistent organochlorine contaminants in bowhead whale tissues and other biota from northern Alaska: implications for human exposure from a subsistence diet.

Quantification of phenolic metabolites of environmental chemicals in human urine using gas chromatography-tandem mass spectrometry and isotope dilution quantification.

Tissue distribution, elimination, and metabolism of dietary sodium [³⁶Cl]chlorate in beef cattle.

Evaluation of immuno- and reproductive toxicities and association between immunotoxicological and genotoxicological parameters in waste incineration workers.

Small interference RNA-mediated gene silencing of human biliverdin reductase, but not that of heme oxygenase-1, attenuates arsenite-mediated induction of the oxygenase and increases apoptosis in 293A kidney cells.

Noradrenaline involvement in the memory-enhancing effects of exposure to a complex rhythm stimulus following discriminated passive avoidance training in the young chick.

Ascorbic acid and alpha-tocopherol as potent modulators of apoptosis on arsenic induced toxicity in rats.

[Evaluation of the iron bioavailability from meals prepared with lentil (*Lens esculenta*) or with white kidney bean seeds (*Phaseolus vulgaris*) in anemic rats].

Paired cysteine mutagenesis to establish the pattern of disulfide bonds in the functional intact secretin receptor.

Determination of urinary ortho- and meta-cresol in humans by headspace SPME gas chromatography/mass spectrometry.

Effect of testosterone and steroids homologues on indolamines and lipid peroxidation in rat brain.

Caffeine induced Ca²⁺ release and capacitative Ca²⁺ entry in human embryonic kidney (HEK293) cells.

MRP-1 expression levels determine strain-specific susceptibility to sodium arsenic-induced renal injury between C57BL/6 and BALB/c mice.

Exposure to pesticides increases levels of uPA and uPAR in pre-malignant human prostate cells.

Comparison of atomic absorption and fluorescence spectroscopic methods for the routine determination of urinary arsenic.

Effects of TCDD and estradiol-17beta on the proliferation and Na⁺/glucose cotransporter in renal proximal tubule cells.

HPLC based method using sample precolumn cleanup for the determination of triazines and thiolcarbamates in hemodialysis saline solutions.

Maternal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin and the body burden in offspring of long-evans rats.

Effects of N-acetylcysteine, quercetin, and phytic acid on spontaneous hepatic and renal lesions in LEC rats.

Cytochrome p4501a induced differentially in endothelial cells cultured from different organs of *Anguilla rostrata*.

Synthesis and characterization of EADAM: a selective radioligand for mapping the brain serotonin transporters by positron emission tomography.

Hepatocyte-targeted nuclear imaging using ^{99m}Tc-galactosylated chitosan: conjugation, targeting, and biodistribution.

Comparison of arsenic levels in fingernails with urinary As species as biomarkers of arsenic exposure in residents living close to a coal-burning power plant in Prievidza District, Slovakia.

The relationship of urinary metabolites of carbaryl/naphthalene and chlorpyrifos with human semen quality.

Failure of ethanol and acetaldehyde to alter in vivo norepinephrine release in the striatum and hippocampus of rats.

Herbicide critic dropped from pollution conference.

Prion protein protects against DNA damage induced by paraquat in cultured cells.

Cancer incidence among pesticide applicators exposed to atrazine in the Agricultural Health Study.

Mitogenic and cytotoxic effects of pentachlorophenol to AML 12 mouse hepatocytes.

Microbial metabolite of dimethylarsinic acid is highly toxic and genotoxic.

Metallothionein (I/II) suppresses genotoxicity caused by dimethylarsinic acid.

Comparative inter-species pharmacokinetics of phenoxyacetic acid herbicides and related organic acids. evidence that the dog is not a relevant species for evaluation of human health risk.

Comparison of anti-androgenic activity of flutamide, vinclozolin, procymidone, linuron, and p, p'-DDE in rodent 10-day Hershberger assay.

Mammalian toxicology overview and human risk assessment for sulfosulfuron.

Attenuation of paraquat-induced motor behavior and neurochemical disturbances by L-valine in vivo.

Herbicide exposure and the risk of transitional cell carcinoma of the urinary bladder in Scottish Terriers.

A nested case-control study of prostate cancer and atrazine exposure.

Association between Agent Orange and prostate cancer: a pilot case-control study.

Cancer in US Air Force veterans of the Vietnam War.

Carbonyl stress and detoxification ability in the male genital tract and testis of rats.

Physiologically based pharmacokinetic modeling of arsenic in the mouse.

Glyphosate poisoning.

Poisoning due to chlorophenoxy herbicides.

Genotoxicity evaluation of pesticide formulations containing alachlor and atrazine in multiple mouse tissues (blood, kidney, liver, bone marrow, spleen) by comet assay.

Tissue-specific oxidative stress responses in fish exposed to 2,4-D and azinphosmethyl.

Protective role of metallothionein (I/II) against pathological damage and apoptosis induced by dimethylarsinic acid.

Anandamide-evoked activation of vanilloid receptor 1 contributes to the development of bladder hyperreflexia and nociceptive transmission to spinal dorsal horn neurons in cystitis.

Arsenic drinking water exposure and urinary excretion among adults in the Yaqui Valley, Sonora, Mexico.

Possible mechanism for medial smooth muscle cell injury in diabetic nephropathy: glycooxidation-mediated local complement activation.

Activities of UDP-glucuronyltransferase, beta-glucuronidase and deiodinase types I and II in hyper- and hypothyroid rats.

The renal-specific transporter mediates facilitative transport of organic anions at the brush border membrane of mouse renal tubules.

Identification and functional assessment of the novel murine organic anion transporter Oat5 (Slc22a19) expressed in kidney.

Oxidative stress in neonates: evaluation using specific biomarkers.

Monitoring of urinary acrolein concentration in patients receiving cyclophosphamide and ifosfamide.

Molecular determinants of differential pore blocking of kidney CLC-K chloride channels.

Ethanol but not acetaldehyde induced changes in brain taurine: a microdialysis study.

Investigations of pharmacologic properties of the renal CLC-K1 chloride channel co-expressed with barttin by the use of 2-(p-Chlorophenoxy)propionic acid derivatives and other structurally unrelated chloride channels blockers.

Absorption, distribution, metabolism and excretion of 4-chloro-2-methylphenoxyacetic acid (MCPA) in rats.

Impairment of small intestinal protein assimilation in patients with end-stage renal disease: extending the malnutrition-inflammation-atherosclerosis concept.

Cancer cluster investigations: use of a hybrid approach in a rural county.

The induction of cell cycle regulatory and DNA repair proteins in cisplatin-induced acute renal failure.

Adult 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure and effects on male reproductive organs in three differentially TCDD-susceptible rat lines.

Protective activity of hesperidin and lipoic acid against sodium arsenite acute toxicity in mice.

Reduction of the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in mice using an antiulcer drug, geranylgeranylacetone.

Male reproductive toxicity of sodium arsenite in mice.

Arsenic and urinary bladder cell proliferation.

Evidence that arsenite acts as a cocarcinogen in skin cancer.

Animal models for arsenic carcinogenesis: inorganic arsenic is a transplacental carcinogen in mice.

Understanding arsenic carcinogenicity by the use of animal models.

Removal of the protein-bound solute p-cresol by convective transport: a randomized crossover study.

The topical application of 2,3,7,8-tetrachlorodibenzo-p-dioxin lacks skin tumor-promoting potency but induces hepatic injury and tumor necrosis factor-alpha expression in ICR male mice.

A maternal Ahr null genotype sensitizes embryos to chemical teratogenesis.

[Toxicological significance of metallothionein on environmental harmful factors: verification and suggestions from a metallothionein-I/II null mouse model study].

Intravesical resiniferatoxin decreases spinal c-fos expression and increases bladder volume to reflex micturition in rats with chronic inflamed urinary bladders.

P-cresol, a uremic retention solute, alters the endothelial barrier function in vitro.

Pattern of male reproductive system effects after in utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure in three differentially TCDD-sensitive rat lines.

Endocrine disrupting pesticides: a leading cause of cancer among rural people in Pakistan.

Ferrous sulfate does not affect mycophenolic acid pharmacokinetics in kidney transplant patients.

Minocycline up-regulates Bcl-2 and protects against cell death in mitochondria.

Effects of epidermal growth factor receptor deficiency and 2,3,7,8-tetrachlorodibenzo-p-dioxin on fetal development in mice.

Protective effect of N-acetylcysteine against arsenic-induced depletion in vivo of carbohydrate.

Cyp1a1(-/-) male mice: protection against high-dose TCDD-induced lethality and wasting syndrome, and resistance to intrahepatocyte lipid accumulation and uroporphyrin.

BMK1 is activated in glomeruli of diabetic rats and in mesangial cells by high glucose conditions.

Protective effect of methionine supplementation on arsenic-induced alteration of glucose homeostasis.

Identification of aryl hydrocarbon receptor as a putative Wnt/beta-catenin pathway target gene in prostate cancer cells.

In utero pesticide exposure, maternal paraoxonase activity, and head circumference.

Tissue-specific effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the activity of 5'-deiodinases I and II in rats.

Water permeability and TCDD-induced edema in zebrafish early-life stages.

A stone farm: development of a method for simultaneous production of multiple calcium oxalate stones in vitro.

Liquid growth hormone: preservatives and buffers.

Treatment of iron deficiency anemia with Ferro-Folgamma.

Coronary artery bypass grafting in a dialysis-dependent Jehovah's Witness.

Aryl hydrocarbon receptor-mediated inhibition of LNCaP prostate cancer cell growth and hormone-induced transactivation.

Stimulation of NHE3 in OKP cells by an autocrine mechanism.

Role of stromal-epithelial interactions in hormonal responses.

BRCA1 induces antioxidant gene expression and resistance to oxidative stress.

Contraction augments L-type Ca²⁺ currents in adherent guinea-pig cardiomyocytes.

C-reactive protein-induced in vitro vasorelaxation is an artefact caused by the presence of sodium azide in commercial preparations.

Identification of the growth hormone-releasing peptide binding site in CD36: a photoaffinity cross-linking study.

Exponential modeling, washout curve reconstruction, and estimation of half-life of toluene and its metabolites.

Signaling mechanisms mediated by G-protein coupled receptors in human platelets.

2,3,7,8-tetrachlorodibenzo-p-dioxin inhibits prostatic epithelial bud formation by acting directly on the urogenital sinus.

The human CYP1A1 gene is regulated in a developmental and tissue-specific fashion in transgenic mice.

Dual effect of insulin-like growth factor on the apical 70-pS K channel in the thick ascending limb of rat kidney.

Evidence that inhibited prostatic epithelial bud formation in 2,3,7,8-tetrachlorodibenzo-p-dioxin-exposed C57BL/6J fetal mice is not due to interruption of androgen signaling in the urogenital sinus.

[Indices of oxidative stress. 1. TBA-reactive substances and carbonylproteins].

Chlorophenol exposure in harbor workers exposed to river silt aerosols.

Protein tyrosine kinase is expressed and regulates ROMK1 location in the cortical collecting duct.

Epidermal growth factor inhibits 14C-alpha-methyl-D-glucopyranoside uptake in renal proximal tubule cells: involvement of PLC/PKC, p44/42 MAPK, and cPLA2.

Effect of manidipine on gene expression and protein level of oxidative stress-related proteins: p22phox and HO-1: relevance for antihypertensive and anti-remodeling effects.

Aryl hydrocarbon receptors in urogenital sinus mesenchyme mediate the inhibition of prostatic epithelial bud formation by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Modulation of intestinal P-glycoprotein function by cremophor EL and other surfactants by an in vitro diffusion chamber method using the isolated rat intestinal membranes.

Signaling cascade of ANG II-induced inhibition of alpha-MG uptake in renal proximal tubule cells.

Quantitative analysis of cresol and its metabolites in biological materials and distribution in rats after oral administration.

Antimutagenicity of herbal detoxification formula Smoke Shield against environmental mutagens.

Benzylmercapturic acid is superior to hippuric acid and o-cresol as a urinary marker of occupational exposure to toluene.

Formation and urinary excretion of arsenic triglutathione and methylarsenic diglutathione.

Histological analysis of acute toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in zebrafish.

Toxicity, histopathological alterations and immunohistochemical CYP1A induction in the early life stages of the seabream, Sparus aurata, following waterborne exposure to B(a)P and TCDD.

Toxicokinetic and genomic analysis of chronic arsenic exposure in multidrug-resistance mdr1a/1b(-/-) double knockout mice.

Transport of 99mTc-MAG3 via rat renal organic anion transporter 1.

Toxic nephropathy: environmental chemicals.

Biochemical and histopathological effects of glyphosate herbicide on Nile tilapia (Oreochromis niloticus).

Protective effect of 3-methyl-1-phenyl-2-pyrazolin-5-one, a free radical scavenger, on acute toxicity of paraquat in mice.

Determination of the herbicide glyphosate and its metabolite in biological specimens by gas chromatography-mass spectrometry. A case of poisoning by roundup herbicide.

MacLennan et al report on an elevated incidence of prostate cancer among workers in a triazine manufacturing plant.

The restriction of all minerals in the diet enhancing paraquat toxicity is regarded primarily as the shortage of Mg.

Effect of haemoperfusion on plasma paraquat concentration in vitro and in vivo.

Carcinogenicity of dimethylarsinic acid in p53 heterozygous knockout and wild-type C57BL/6J mice.

Thirty-five cases of S-carboxymethylcysteine use in paraquat poisoning.

Inhibition of cytokine production by the herbicide atrazine. Search for nuclear receptor targets.

Paraquat and menadione exposure of rainbow trout (*Oncorhynchus mykiss*)--studies of effects on the pentose-phosphate shunt and thiamine levels in liver and kidney.

[Paraquat intoxication].

Formation of acrolein-derived 2'-deoxyadenosine adduct in an iron-induced carcinogenesis model.

Lack of modifying effects of atrazine and/or tamoxifen on thyroid carcinogenesis in rats pretreated with N-bis(2-hydroxypropyl)nitrosamine (DHPN).

Effects of dietary folate intake and folate binding protein-1 (Folbp1) on urinary speciation of sodium arsenate in mice.

Potential mechanisms responsible for chlorotriazine-induced alterations in catecholamines in pheochromocytoma (PC12) cells.

Formation of advanced glycosylation end products and oxidative stress in young patients with type 1 diabetes.

Paraquat induces long-lasting dopamine overflow through the excitotoxic pathway in the striatum of freely moving rats.

Increase in putrescine, amine oxidase, and acrolein in plasma of renal failure patients.

Arsenic methylation and bladder cancer risk in Taiwan.

Oxidative stress and altered antioxidant defenses in children with acute exacerbation of atopic dermatitis.

Acrolein produced from polyamines as one of the uraemic toxins.

Increased urinary levels of pentosidine, pyrroline and acrolein adduct in type 2 diabetes.

Arsenic speciation in the urine and hair of individuals exposed to airborne arsenic through coal-burning in Guizhou, PR China.

Role of glutathione redox cycle and catalase in defense against oxidative stress induced by endosulfan in adrenocortical cells of rainbow trout (*Oncorhynchus mykiss*).

Accumulation and metabolism of arsenic in mice after repeated oral administration of arsenate.

Urinary sulfur-containing metabolite produced by intestinal bacteria following oral administration of dimethylarsinic acid to rats.

Comparative toxicity of ifosfamide metabolites and protective effect of mesna and amifostine in cultured renal tubule cells.

[Effect of aminotriazole on the activity of catalase and glucose-6-phosphate dehydrogenase in tissues of two frog species--*Rana ridibunda* and *Rana esculenta*].

Variability in human metabolism of arsenic.

Overexpression of oxidized protein hydrolase protects COS-7 cells from oxidative stress-induced inhibition of cell growth and survival.

Sorption and dialysis experiments to assess the binding of phenolic xenobiotics to dissolved organic matter in soil.

Dose-dependent biotransformation of arsenite in rats--not S-adenosylmethionine depletion impairs arsenic methylation at high dose.

Effects of the new herbicide fentrazamide on the glucose utilization in neurons and erythrocytes in vitro.

Exposure to indoor pesticides during pregnancy in a multiethnic, urban cohort.

Induction of glutathione S-transferase placental form positive foci in liver and epithelial hyperplasia in urinary bladder, but no tumor development in male Fischer 344 rats treated with monomethylarsonic acid for 104 weeks.

Cardiac hypertrophy in aryl hydrocarbon receptor null mice is correlated with elevated angiotensin II, endothelin-1, and mean arterial blood pressure.

Removal of middle molecules and protein-bound solutes by peritoneal dialysis and relation with uremic symptoms.

Evidence for impaired assimilation of protein in chronic renal failure.

Lack of expression of EGF and TGF- α in the fetal mouse alters formation of prostatic epithelial buds and influences the response to TCDD.

Connective molecular pathways of experimental bladder inflammation.

Region-specific inhibition of prostatic epithelial bud formation in the urogenital sinus of C57BL/6 mice exposed in utero to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Aryl hydrocarbon receptor 2 mediates 2,3,7,8-tetrachlorodibenzo-p-dioxin developmental toxicity in zebrafish.

Protein-bound uremic retention solutes.

Useful interventions for intradialytic hypotension.

Specific in vivo binding to the norepinephrine transporter demonstrated with the PET radioligand, (S,S)-[11C]MeNER.

Comparative kinetics of the uremic toxin p-cresol versus creatinine in rats with and without renal failure.

The effect of ingestion of ferrous sulfate on the absorption of oral methotrexate in patients with rheumatoid arthritis.

Link between agricultural pesticides and incidence of prostate cancer.

Uptake of 5-methyltetrahydrofolate into PC-3 human prostate cancer cells is carrier-mediated.

Urinary excretion of the uraemic toxin p-cresol in the rat: contribution of glucuronidation to its metabolism.

A mixture of dioxins, furans, and non-ortho PCBs based upon consensus toxic equivalency factors produces dioxin-like reproductive effects.

Carcinogenesis and its modification by environmental endocrine disruptors: in vivo experimental and epidemiological findings.

Markers of genetic susceptibility in human environmental hygiene and toxicology: the role of selected CYP, NAT and GST genes.

Association between arsenic exposure from a coal-burning power plant and urinary arsenic concentrations in Prievidza District, Slovakia.

Distinct response to dioxin in an arylhydrocarbon receptor (AHR)-humanized mouse.

Use of agricultural pesticides and prostate cancer risk in the Agricultural Health Study cohort.

A comparative immunohistochemical study of spontaneous and chemically induced pheochromocytomas in B6C3F1 mice.

The induction of heat shock protein-72 attenuates cisplatin-induced acute renal failure in rats.

Toxicokinetics of DL-glufosinate enantiomer in human BASTA poisoning.

Studies on dialysate mixing in the Genius single-pass batch system for hemodialysis therapy.

Determination of urinary hippuric acid and o-cresol levels as biological indicators of toluene exposure in shoe-workers and glue sniffers.

Prostate cancer risk in California farm workers.

Effects of single non-ortho, mono-ortho, and di-ortho chlorinated biphenyls on cell functions and proliferation of the human prostatic carcinoma cell line, LNCaP.

Toxicity of free p-cresol: a prospective and cross-sectional analysis.

Urinary concentrating defect in hypothyroid rats: role of sodium, potassium, 2-chloride co-transporter, and aquaporins.

Erythropoietin therapy in pre-dialysis patients with chronic renal failure: lack of need for parenteral iron.

Neurokinin 1 receptors and neprilysin modulation of mouse bladder gene regulation.

Local energy depletion in the basal forebrain increases sleep.

Arsenic species excretion after dimercaptopropanesulfonic acid (DMPS) treatment of an acute arsenic trioxide poisoning.

Dual fortification of salt with iodine and microencapsulated iron: a randomized, double-blind, controlled trial in Moroccan schoolchildren.

Peroxynitrite generated in the rat spinal cord induces oxidation and nitration of proteins: reduction by Mn (III) tetrakis (4-benzoic acid) porphyrin.

Iron bioavailability and weight gains to iron-deficient rats fed a commonly consumed Tunisian meal 'bean seeds ragout' with or without beef and with green or black tea decoction.

A framework for human relevance analysis of information on carcinogenic modes of action.

Analysis of urinary N-acetyl-beta-D-glucosaminidase using 2,4-dinitrophenyl-1-thio N-acetyl-beta-D-glucosaminide as the substrate.

Src tyrosine kinase but not activated Ras augments sensitivity to taxanes through apoptosis in human adenocarcinoma cells.

EGF and TGF-alpha expression influence the developmental toxicity of TCDD: dose response and AhR phenotype in EGF, TGF-alpha, and EGF + TGF-alpha knockout mice.

Calpain mediates progressive plasma membrane permeability and proteolysis of cytoskeleton-associated paxillin, talin, and vinculin during renal cell death.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) alters the endogenous metabolism of all-trans-retinoic acid in the rat.

Expression of aryl hydrocarbon receptor repressor in normal human tissues and inducibility by polycyclic aromatic hydrocarbons in human tumor-derived cell lines.

2,3,7,8-tetrachlorodibenzo-p-dioxin induces lecithin: retinol acyltransferase transcription in the rat kidney.

Metabolism of arsenic by sheep chronically exposed to arsenosugars as a normal part of their diet. 1. Quantitative intake, uptake, and excretion.

Tetanus toxin abolishes exocytosis of ROMK1 induced by inhibition of protein tyrosine kinase.

Evidence for the primary role for 4-aminopyridine-sensitive K(v) channels in beta(3)-adrenoceptor-mediated, cyclic AMP-independent relaxations of guinea-pig gastrointestinal smooth muscles.

Use of cultured cells of kidney origin to assess specific cytotoxic effects of nephrotoxins.

Effect of epidermal growth factor on phosphate uptake in renal proximal tubule cells: involvement of PKC, MAPK, and cPLA2.

Epidermal growth factor regulates Ca²⁺ uptake in primary cultured renal proximal tubule cells: involvement of cAMP, PKC and cPLA2.

Proteoglycans on bone marrow endothelial cells bind and present SDF-1 towards hematopoietic progenitor cells.

Monitoring internal exposure to metals and organic substances in workers at a hazardous waste incinerator after 3 years of operation.

Polymorphisms in the human monomethylarsonic acid (MMA V) reductase/hGSTO1 gene and changes in urinary arsenic profiles.

Kinetics of monochloroacetic acid at subtoxic and toxic doses in rats after single oral and dermal administrations.

The requirement of ammonium or other cations linked with p-cresol sulfate for cross-reactivity with a peptide of myelin basic protein.

NTP toxicology and carcinogenesis Studies of 2,4-hexadienal (89% trans,trans isomer, CAS No. 142-83-6; 11% cis,trans isomer) (Gavage Studies).

Simulation of dioxin accumulation in human tissues and analysis of reproductive risk.

KB130015, a new amiodarone derivative with multiple effects on cardiac ion channels.

Effect of dietary co-administration of sodium selenite on sodium arsenite-induced ovarian and uterine disorders in mature albino rats.

Acute application of TNF stimulates apical 70-pS K⁺ channels in the thick ascending limb of rat kidney.

4-aminobiphenyl-induced liver and urinary bladder DNA adduct formation in Cyp1a2(-/-) and Cyp1a2(+/-) mice.

Toxicity and metabolism of subcytotoxic inorganic arsenic in human renal proximal tubule epithelial cells (HK-2).

Health of tree swallow (*Tachycineta bicolor*) nestlings exposed to chlorinated hydrocarbons in the St Lawrence River basin. Part I. Renal and hepatic vitamin A concentrations.

Leiomyosarcoma of urinary bladder following cyclophosphamide therapy: report of two cases.

Chemiluminescence response of beta-glucan stimulated leukocytes isolated from different tissues and peritoneal cavity of *Dicentrarchus labrax*.

An artificial amino acid, 4-iodo-L-meta-tyrosine: biodistribution and excretion via kidney.

Cancer incidence among triazine herbicide manufacturing workers.

Antioxidant enzymes, free-radical damage, and response to paraquat in liver and kidney of long-living growth hormone receptor/binding protein gene-disrupted mice.

Paraquat-induced gene expression in rat lung tissues using a differential display reverse transcription-polymerase chain reaction.

Possible role of dimethylarsinous acid in dimethylarsinic acid-induced urothelial toxicity and regeneration in the rat.

Effect of the herbicide 2,4-dichlorophenoxyacetic acid on uropathogenic *Escherichia coli* virulence factors.

Predictors of herbicide exposure in farm applicators.

Expression of mutant alpha-synucleins enhances dopamine transporter-mediated MPP⁺ toxicity in vitro.

Toxicokinetics, recovery, and metabolism of triclopyr butotyl (ACTP) ester in goats.

Review of 2,4-dichlorophenoxyacetic acid (2,4-D) epidemiology and toxicology.

Oral (gavage) two-generation (one litter per generation) reproduction study of pentachlorophenol (penta) in rats.

Role of hydroxyl radical formation in neurotoxicity as revealed by in vivo free radical trapping.

Response of the amphibian tadpole *Xenopus laevis* to atrazine during sexual differentiation of the ovary.

The effects of atrazine metabolites on puberty and thyroid function in the male Wistar rat.

Paraquat intoxication in Korea.

Postnatal survival of rat offspring prenatally exposed to pure 2,4-dichlorophenoxyacetic acid (2,4-D).

Response of the amphibian tadpole (*Xenopus laevis*) to atrazine during sexual differentiation of the testis.

Oxysterols as indices of oxidative stress in man after paraquat ingestion.

Effects of paraquat on essential antioxidant elements in osteogenic disorder Shionogi rat.

In vivo genotoxicity evaluation of dimethylarsinic acid in MutaMouse.

Effect of vitamin C on plasma total antioxidant status in patients with paraquat intoxication.

Fetotoxic action of 2,4-dichlorophenoxyacetic acid (2,4-D). III. Morphological changes in rat kidneys.

Involvement of N-methyl-D-aspartate receptors in nociception in the cyclophosphamide-induced vesical pain model in the conscious rat.

Lesions induced by 2,4-D and chlorpyrifos in tench (*Tinca tinca* L.): implication in toxicity studies.

Changes in urinary bladder cytokine mRNA and protein after cyclophosphamide-induced cystitis.

Enantiomeric enrichment of chiral pesticides in the environment.

Serum protein acrolein adducts: utility in detecting oxidant stress in hemodialysis patients and reversal using a vitamin E-bonded hemodialyzer.

Monitoring of arsenic exposure with speciated urinary inorganic arsenic metabolites for ion implanter maintenance engineers.

Evaluation of a 15-day screening assay using intact male rats for identifying antiandrogens.

Carcinogenicity of dimethylarsinic acid in male F344 rats and genetic alterations in induced urinary bladder tumors.

Oxygen metabolites and hypoxic renal injury: effect of mitochondrial electron transport blockade.

Protection against acetaminophen hepatotoxicity by clofibrate pretreatment: role of catalase induction.

Intra-individual variation in the metabolism of inorganic arsenic.

Molecular requisites for drug binding to muscle CLC-1 and renal CLC-K channel revealed by the use of phenoxy-alkyl derivatives of 2-(p-chlorophenoxy)propionic acid.

Urinary arsenic speciation in subjects with or without restriction from seafood dietary intake.

Species variations in the biliary and urinary excretion of arsenate, arsenite and their metabolites.

Possible range of dioxin concentration in human tissues: simulation with a physiologically based model.

Non-genotoxic carcinogens: early effects on gap junctions, cell proliferation and apoptosis in the rat.

Comparative toxicity study of 3-aminophenol in newborn and young rats.

Toxicology and carcinogenesis study of chloral hydrate (ad libitum and dietary controlled) (CAS no. 302-17-0) in male B6C3F1 mice (gavage study).

Expression of hsp 27, hsp 60, hsc 70, and hsp 70 stress response genes in cultured human urothelial cells (UROtsa) exposed to lethal and sublethal concentrations of sodium arsenite.

Arsenite cocarcinogenesis: an animal model derived from genetic toxicology studies.

Alcohol-induced increases in insulin-like growth factor binding protein-1 are partially mediated by TNF.

Antiandrogenic effects in vitro and in vivo of the fungicide prochloraz.

Determination of autofluorescence of red blood cells (RbCs) in uremic patients as a marker of oxidative damage.

Effects of vitamin E on reactive oxygen species-mediated 2,3,7,8-tetrachlorodi-benzo-p-dioxin toxicity in rat testis.

Critical windows of vulnerability for effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on prostate and seminal vesicle development in C57BL/6 mice.

Behavior of non-protein-bound and protein-bound uremic solutes during daily hemodialysis.

Endocrine dismodulation and cancer.

Supplemental zinc lowers measures of iron status in young women with low iron reserves.

Cytoprotective properties of novel nonpeptide calpain inhibitors in renal cells.

Persistent konzo and cyanogen toxicity from cassava in northern Mozambique.

Mechanism of action and development of selective aryl hydrocarbon receptor modulators for treatment of hormone-dependent cancers (Review).

2,3,7,8-tetrachlorodibenzo-p-dioxin interacts with endogenous estradiol to disrupt prostate gland morphogenesis in male rat fetuses.

Decrease in 4-aminobiphenyl-induced methemoglobinemia in Cyp1a2(-/-) knockout mice.

Renal cell carcinoma and occupational exposure to chemicals in Canada.

Increased vascular endothelial growth factor peptide and gene expression in hypoplastic lung in nitrofen induced congenital diaphragmatic hernia in rats.

Effects of subchronic exposure to a complex mixture of persistent contaminants in male rats: systemic, immune, and reproductive effects.

Tumor necrosis factor-alpha and interleukin-1beta mediate the production of nitric oxide involved in the pathogenesis of ifosfamide induced hemorrhagic cystitis in mice.

Prediction of rodent nongenotoxic carcinogenesis: evaluation of biochemical and tissue changes in rodents following exposure to nine nongenotoxic NTP carcinogens.

Developmental stage-specific effects of perinatal 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on reproductive organs of male rat offspring.

Overexpression of alcohol dehydrogenase exacerbates ethanol-induced contractile defect in cardiac myocytes.

The environmental toxin 2,3,7,8-tetrachlorodibenzo-p-dioxin induces cytochrome P450 activity in high passage PC 3 and DU 145 human prostate cancer cell lines.

Differential activities of murine single minded 1 (SIM1) and SIM2 on a hypoxic response element. Cross-talk between basic helix-loop-helix/per-Arnt-Sim homology transcription factors.

[Immunoenzyme analysis of natural antibodies to endogenous bioregulators in patients with systemic lupus erythematosus].

On the rumors about the silent spring. Review of the scientific evidence linking occupational and environmental pesticide exposure to endocrine disruption health effects.

Effects of reactive oxygen species on lymphokine-activated killer cells in patients with bladder cancer.

[Acute effects of methyl bromide gas in rats and mice--studies on survival time].

Arsenic-induced Mre11 phosphorylation is cell cycle-dependent and defective in NBS cells.

Association between chronic exposure to pesticides and recorded cases of human malignancy in Gaza Governorates (1990-1999).

Effects of coxsackievirus B3 infection on the acute-phase protein metallothionein and on cytochrome P-4501A1 involved in the detoxification processes of TCDD in the mouse.

In vitro adsorption of lithium by bentonite.

Dioxin in infants--an environmental hazard?

Src tyrosine kinase augments taxotere-induced apoptosis through enhanced expression and phosphorylation of Bcl-2.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) disrupts early morphogenetic events that form the lower reproductive tract in female rat fetuses.

Extracellular signal-regulated kinases and G protein-coupled receptors in megakaryocytic human erythroleukemia cells: selective activation, differential regulation, and dissociation from mitogenesis.

Metabolism and excretion of 2-nitro-p-cresol in rats.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in the C57BL/6J mouse prostate: lobe-specific effects on branching morphogenesis.

Immunoaffinity column as sample cleanup method for determination of the beta-adrenergic agonist ractopamine and its metabolites.

Investigation of the relation between self-reported food consumption and household chemical exposures with urinary levels of selected nonpersistent pesticides.

Urinary 2,5-dichlorophenol as biological index for p-dichlorobenzene exposure in the general population.

Enhancement of alpha-adrenoceptor-mediated responses in prostate of testosterone-treated rat.

Bioavailability of the isomer mixture of phytoene and phytofluene-rich alga *Dunaliella bardawil* in rat plasma and tissues.

Clinical toxicology: part II. Diagnosis and management of uncommon poisonings.

cDNA cloning and expressions of cytochrome P450 1A in zebrafish embryos.

Chronic arsenic-exposed human prostate epithelial cells exhibit stable arsenic tolerance: mechanistic implications of altered cellular glutathione and glutathione S-transferase.

Biological monitoring of metals and organic substances in hazardous-waste incineration workers.

Metabolite ratio of toluene-exposed rotogravure printing plant workers reflects individual mutagenic risk by sister chromatid exchanges.

Comparison of urinary bromide levels among people in East Asia, and the effects of dietary intakes of cereals and marine products.

Impact of human variability on the biological monitoring of exposure to toluene: I. Physiologically based toxicokinetic modelling.

Severe 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) intoxication: insights into the measurement of hepatic cytochrome P450 1A2 induction.

Effects of aryl hydrocarbon receptor null mutation and in utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on prostate and seminal vesicle development in C57BL/6 mice.

Tissue-specific expression of AHR2, ARNT2, and CYP1A in zebrafish embryos and larvae: effects of developmental stage and 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

Expression of hsp 90 in the human kidney and in proximal tubule cells exposed to heat, sodium arsenite and cadmium chloride.

IARC monographs, industry influence, and upgrading, downgrading, and under-grading chemicals: a personal point of view. International Agency for Research on Cancer.

Distribution and elimination of polychlorinated dibenzo-p-dioxins, dibenzofurans, biphenyls, and p,p'-DDE in tissues of bald eagles from the Upper Peninsula of Michigan.

Evidence for the involvement of CYP1A2 in the metabolism of bromodichloromethane in rat liver.

[Evaluation of urinary ortho-cresol as biological monitoring indicator of occupational exposure to toluene].

Effect of MPTP on Dopamine metabolism in Ames dwarf mice.

Urinary benzylmercapturic acid as a marker of occupational exposure to toluene.

Characterization of arsenic species in kidney of the clam *Tridacna derasa* by multidimensional liquid chromatography-ICPMS and electrospray time-of-flight tandem mass spectrometry.

Development of an in vitro test battery for the estimation of acute human systemic toxicity: An outline of the EDIT project. Evaluation-guided Development of New In Vitro Test Batteries.

Automated, continuous, and dynamic speciation of urinary arsenic in the bladder of living organisms using microdialysis sampling coupled on-line with high performance liquid chromatography and hydride generation atomic absorption spectrometry.

Legumain from bovine kidney: its purification, molecular cloning, immunohistochemical localization and degradation of annexin II and vitamin D-binding protein.

Role of the cytoskeleton in mediating effect of vasopressin and herbimycin A on secretory K channels in CCD.

Toluene metabolites as biological indicators of exposure.

Characterization of 2-amino-4,5-dichlorophenol (2A45CP) in vitro toxicity in renal cortical slices from male Fischer 344 rats.

Chiral pharmacokinetics and inversion of enantiomers of a new quinoxaline topoisomerase II β poison in the rat.

Effect of brefeldin A on heparan sulphate biosynthesis in Madin-Darby canine kidney cells.

Mechanism and regulation of vitamin B(6) uptake by renal tubular epithelia: studies with cultured OK cells.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the antioxidant system in mitochondrial and microsomal fractions of rat testis.

Ligand-regulated internalization, trafficking, and down-regulation of guanylyl cyclase/atrial natriuretic peptide receptor-A in human embryonic kidney 293 cells.

Determination of tissue-blood partition coefficients for a physiological model for humans, and estimation of dioxin concentration in tissues.

Porphyrin profiles in blood and urine as a biomarker for exposure to various arsenic species.

Multidrug-resistance mdr1a/1b double knockout mice are more sensitive than wild type mice to acute arsenic toxicity, with higher arsenic accumulation in tissues.

Uptake of the antivasular agent 5,6-dimethylxanthenone-4-acetic acid (DMXAA) and activation of NF- κ B in human tumor cell lines.

Anti-mutagenic activity of *Phyllanthus amarus* Schum & Thonn in vitro as well as in vivo.

Acute sodium arsenite treatment induces Cyp2a5 but not Cyp1a1 in the C57Bl/6 mouse in a tissue (kidney) selective manner.

A comparison of 60, 70, and 90 kDa stress protein expression in normal rat NRK-52 and human HK-2 kidney cell lines following in vitro exposure to arsenite and cadmium alone or in combination.

PET imaging of dopamine transporters in the human brain using [(11)C]-beta-PPIT, a cocaine derivative lacking the 2 beta-ester function.

Neutropenia induced by paraquat poisoning.

Subacute toxicity of anilofos, a new organophosphorus herbicide, in male rats: effect on some physical attributes and acetylcholinesterase activity.

Evaluation of diet and dimethylarsinic acid on the urothelium of Syrian golden hamsters.

Oral exposure of dimethylarsinic acid, a main metabolite of inorganic arsenics, in mice leads to an increase in 8-Oxo-2'-deoxyguanosine level, specifically in the target organs for arsenic carcinogenesis.

The effect of exposure to a commercial 2,4-D formulation during gestation on the immune response in CD-1 mice.

Decreased plasma and cerebrospinal fluid glutamine concentrations in a patient with bialaphos poisoning.

Carrier-mediated processes in blood--brain barrier penetration and neural uptake of paraquat.

Unique renal tubule changes induced in rats and mice by the peroxisome proliferators 2,4-dichlorophenoxyacetic acid (2,4-D) and WY-14643.

The development of a new method to estimate total daily dose of pesticides in professional turf applicators following multiple and varied exposures in occupational settings.

Prostate cancer detection in veterans with a history of Agent Orange exposure.

Oxidative stress and liver toxicity in rats and human hepatoma cell line induced by pentachlorophenol and its major metabolite tetrachlorohydroquinone.

Possible involvement of O6-methylguanine formation and p53 dysfunction in mouse urinary bladder carcinogenesis.

Prenatal exposure to nitrofen induces Fryns phenotype in mice.

Effect of sulfosulfuron on the urine and urothelium of male rats.

Biomarker correlations of urinary 2,4-D levels in foresters: genomic instability and endocrine disruption.

Acute diquat poisoning with intracerebral bleeding.

L-Deprenyl prevents the cell hypoxia induced by dopaminergic neurotoxins, MPP(+) and beta-carbolinium: a microdialysis study in rats.

Dimethylarsinic acid induces 8-hydroxy-2'-deoxyguanosine formation in the kidney of NCI-Black-Reiter rats.

A concise review of the toxicity and carcinogenicity of dimethylarsinic acid.

The characterisation and uptake of paraquat in cultured baboon kidney proximal tubule cells (bPTC).

No parallel relationship between nitric oxide production and wet dog shakes susceptible to nitric oxide synthase inhibitors following systemic administration of paraquat in rats.

Paraquat poisoning in a family.

Glutamate is not involved in the MPP+-induced dopamine overflow in the striatum of freely moving C57BL/6 mice.

Pancreatitis induced by environmental toxins.

Urothelial cytotoxicity and regeneration induced by dimethylarsinic acid in rats.

Evaluation of acute sensory--motor effects and test sensitivity using termiticide workers exposed to chlorpyrifos.

Effect of tiagabine and topiramate on porphyrin metabolism in an in vivo model of porphyria.

Nitric oxide enhances MPP(+)-induced hydroxyl radical generation via depolarization activated nitric oxide synthase in rat striatum.

Glyphosate inhibits melanization of *Cryptococcus neoformans* and prolongs survival of mice after systemic infection.

Expression of inducible nitric oxide synthase in primary culture of rat bladder smooth muscle cells by plasma from cyclophosphamide-treated rats.

Influence of caffeine on allyl alcohol-induced hepatotoxicity in rats. I. In vivo study.

Post-transcriptional control of catalase expression in garlic-treated rats.

Protein binding of glufosinate and factors affecting it revealed by an equilibrium dialysis technique.

Biotransformation, excretion kinetics, and tissue distribution of an N-pyrrolo[1,2-c]imidazolylphenyl sulfonamide herbicide in rats.

Determination of clethodim and its oxidation metabolites in crops by liquid chromatography with confirmation by LC/MS.

Solid-phase extraction with styrene-divinylbenzene sorbent for high-performance liquid or gas chromatographic determination of urinary chloro- and methylthiotriazines.

Ethanol-modified subcritical water extraction combined with solid-phase microextraction for determining atrazine in beef kidney.

A novel arsenical in clam kidney identified by liquid chromatography/electrospray ionisation mass spectrometry.

Atrazine effects on testosterone levels and androgen-dependent reproductive organs in peripubertal male rats.

Metabolism of 2,4-dichlorophenoxyacetic acid in laying hens and lactating goats.

Alteration of catecholamines in pheochromocytoma (PC12) cells in vitro by the metabolites of chlorotriazine herbicide.

Comparative study of toxicity of 4-nitrophenol and 2,4-dinitrophenol in newborn and young rats.

Dioxin body burdens in operation ranch hand veterans: promotion blocking and cancer causation.

Effects on levels of glutathione and some related enzymes in tissues after an acute arsenic exposure in rats and their relationship to dietary protein deficiency.

Mast cell regulation of inflammation and gene expression during antigen-induced bladder inflammation in mice.

Three cases of acute methyl bromide poisoning in a seedling farm family.

Arsenite is a cocarcinogen with solar ultraviolet radiation for mouse skin: an animal model for arsenic carcinogenesis.

Transport of methotrexate into PC-3 human prostate cancer cells.

Effects of protein tyrosine kinase and protein tyrosine phosphatase on apical K(+) channels in the TAL.

7,12-Dimethylbenz[a]anthracene inhibition of steroid production in MA-10 mouse Leydig tumor cells is not directly linked to induction of CYP1B1.

[Pseudo-Acanthosis nigricans in a 12 year old boy after kidney transplantation].

Pharmacokinetics and pharmacodynamics of NTBC (2-(2-nitro-4-fluoromethylbenzoyl)-1,3-cyclohexanedione) and mesotrione, inhibitors of 4-hydroxyphenyl pyruvate dioxygenase (HPPD) following a single dose to healthy male volunteers.

Role of metabolism in arsenic toxicity.

Melatonin attenuates estradiol-induced oxidative damage to DNA: relevance for cancer prevention.

Differential effects of circulating IgA isolated from patients with IgA nephropathy on superoxide and fibronectin production of mesangial cells.

Hepatic vitamin A depletion is a sensitive marker of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure in four rodent species.

Teratogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice lacking the expression of EGF and/or TGF- α .

Albumin in the mg/l-range activates NF- κ B in renal proximal tubule-derived cell lines via tyrosine kinases and protein kinase C.

Environmental xenoestrogens, antiandrogens and disorders of male sexual differentiation.

Hypoxia-inducible factor 1 α and 1 β proteins share common signaling pathways in human prostate cancer cells.

Chronic toxicity of dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin to mink.

Activation of multiple antibiotic resistance in uropathogenic Escherichia coli strains by aryloxoalcanoic acid compounds.

3,4-Dichlorophenylhydroxylamine cytotoxicity in renal cortical slices from Fischer 344 rats.

Oxidation of albumin is enhanced in the presence of uremic toxins.

Dioxin exposure and public health in Chapaevsk, Russia.

Nephrin redistribution on podocytes is a potential mechanism for proteinuria in patients with primary acquired nephrotic syndrome.

A randomized study of oral vs intravenous iron supplementation in patients with progressive renal insufficiency treated with erythropoietin.

Activated coagulation factor X: a novel mitogenic stimulus for human mesangial cells.

Recent advances in arsenic carcinogenesis: modes of action, animal model systems, and methylated arsenic metabolites.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on fetal mouse urinary tract epithelium in vitro.

Crystallisation properties in stone forming and normal subjects' urine diluted using a standardised procedure to match the composition of urine in the distal part of the distal tubule and the middle part of the collecting duct.

Toxicity of PCB-126 in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P4501A induction in several organ systems.

Quantitative relationship between arsenic exposure and AP-1 activity in mouse urinary bladder epithelium.

Hippuric acid as a modifier of calcium oxalate crystallisation.

Maternal exposure to a low dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) suppressed the development of reproductive organs of male rats: dose-dependent increase of mRNA levels of 5 α -reductase type 2 in contrast to decrease of androgen receptor in the pubertal ventral prostate.

Acquired resistance to Ah receptor agonists in a population of Atlantic killifish (*Fundulus heteroclitus*) inhabiting a marine superfund site: in vivo and in vitro studies on the inducibility of xenobiotic metabolizing enzymes.

Androgen receptor antagonism by the organophosphate insecticide fenitrothion.

Uremic toxins and peritoneal dialysis.

Protein-bound uremic solutes: the forgotten toxins.

Dioxin exposure is an environmental risk factor for ischemic heart disease.

Thyroid hormones, acute iron overload and the pathogenesis of cloudy swelling.

Preconditioning with sodium arsenite inhibits apoptotic cell death in rat kidney with ischemia/reperfusion or cyclosporine-induced injuries. The possible role of heat-shock protein 70 as a mediator of ischemic tolerance.

Effect of sodium arsenite on iNOS expression and vascular hyporeactivity associated with cecal ligation and puncture in the rat.

Analysis of collagenase-cleavage of type II collagen using a neoepitope ELISA.

Apolipoproteins prevent glomerular albumin permeability induced in vitro by serum from patients with focal segmental glomerulosclerosis.

Dioxins in bile in relation to those in the human liver and blood.

Activation of p38 mitogen-activated protein kinases by endothelin and noradrenaline in small arteries, regulation by calcium influx and tyrosine kinases, and their role in contraction.

Acute exposure to arsenite induces metallothionein isoform-specific gene expression in human proximal tubule cells.

Two signal transduction pathways involved in the catecholaminergic differentiation of avian neural crest-derived cells in vitro.

Vicianin, prunasin, and beta-cyanoalanine in common vetch seed as sources of urinary thiocyanate in the rat.

Kinetics of the protein-bound, lipophilic, uremic toxin p-cresol in healthy rats.

Identification of a new urinary metabolite of carbon disulfide using an improved method for the determination of 2-thioxothiazolidine-4-carboxylic acid.

Toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds.

Identification of the major metabolites of prochloraz in rainbow trout by liquid chromatography and tandem mass spectrometry.

The chemistry, toxicology, and identification in rat and human urine of 4-hydroxy-5-phenyl-1,3-oxazaperhydroin-2-one: a reactive metabolite in felbamate bioactivation.

An ATP-sensitive K(+) conductance in dissociated neurones from adult rat intracardiac ganglia.

Fatal poisoning by butachlor and chlornitrofen ingested from a bottle marked as nitrofen.

Metabolism of [¹⁴C]1,2,7,8-tetrachlorodibenzo-p-dioxin in a ruminating Holstein calf.

Effect of dioxin on ovarian function in the cynomolgus macaque (*M. fascicularis*).

Protection of sodium arsenite-induced ovarian toxicity by coadministration of L-ascorbate (vitamin C) in mature wistar strain rat.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces apoptotic cell death and cytochrome P4501A expression in developing *Fundulus heteroclitus* embryos.

Male reproductive effect of arsenic in mice.

Measurement of children's exposure to pesticides: analysis of urinary metabolite levels in a probability-based sample.

Intraocular pressure and vascular effects of sodium azide in bovine perfused eye.

Renal function, cytogenetic measurements, and sexual development in adolescents in relation to environmental pollutants: a feasibility study of biomarkers.

Urinary bromide levels probably dependent to intake of foods such as sea algae.

Levels of metals and organic substances in blood and urine of workers at a new hazardous waste incinerator.

Effects of binary mixtures of six xenobiotics on hormone concentrations and morphometric endpoints of northern bobwhite quail (*Colinus virginianus*).

Heparin-induced release of protein-bound solutes during hemodialysis is an in vitro artifact.

Control of chemical risks during the treatment of soil contaminated with chlorophenol, creosote and copper-chrome-arsenic-wood preservatives.

Increase in number and size of kidney concretions as a result of PCP exposure in the freshwater snail *Planorbium corneum* (Gastropoda, Pulmonata).

In situ hybridization and immunohistochemical analysis of cytochrome P450 1B1 expression in human normal tissues.

Biological monitoring of occupational exposure to 1-bromopropane by means of urinalysis for 1-bromopropane and bromide ion.

Oral versus intravenous iron supplementation in peritoneal dialysis patients.

Toxic effects of arsenic (III) on some hematopoietic and central nervous system variables in rats and guinea pigs.

Metabolism of ochratoxin A: absence of formation of genotoxic derivatives by human and rat enzymes.

Inhalation toxicity studies of the alpha,beta-unsaturated ketones: 2-cyclohexene-1-one.

Health risks posed by use of Di-2-ethylhexyl phthalate (DEHP) in PVC medical devices: a critical review.

Glycosuria in organophosphate and carbamate poisoning.

The effects of atrazine on female wistar rats: an evaluation of the protocol for assessing pubertal development and thyroid function.

The effect of atrazine on puberty in male wistar rats: an evaluation in the protocol for the assessment of pubertal development and thyroid function.

[Paraquat poisoning. A study of 29 cases and evaluation of the effectiveness of the "Caribbean scheme"].

72-kDa stress protein (hsp72) induced by administration of dimethylarsinic acid to mice accumulates in alveolar flat cells of lung, a target organ for arsenic carcinogenesis.

Arsenic accumulation in three species of sea turtles.

Cancer mortality in four northern wheat-producing states.

Glufosinate ammonium stimulates nitric oxide production through N-methyl D-aspartate receptors in rat cerebellum.

Comparative toxicity of trivalent and pentavalent inorganic and methylated arsenicals in rat and human cells.

Clinical presentations and prognostic factors of a glyphosate-surfactant herbicide intoxication: a review of 131 cases.

Cellular and molecular mechanisms of action of linuron: an antiandrogenic herbicide that produces reproductive malformations in male rats.

Differential modulation of catecholamines by chlorotriazine herbicides in pheochromocytoma (PC12) cells in vitro.

Effect of chlorinated hydrocarbons on expression of cytochrome P450 1A1, 1A2 and 1B1 and 2- and 4-hydroxylation of 17beta-estradiol in female Sprague-Dawley rats.

Increase in production of ascorbate radical in tissues of rat treated with paraquat.

Subchronic toxicity of chlorpropham (CIPC) in ICR mice.

Estrogen reduces acute striatal dopamine responses in vivo to the neurotoxin MPP+ in female, but not male rats.

Occupation and prostate cancer risk in Sweden.

No significant paraquat-induced oxidative DNA damage in rats.

Effects of molybdate and pentachlorophenol on the sulfation of acetaminophen.

Increased lymphocyte replicative index following 2,4-dichlorophenoxyacetic acid herbicide exposure.

A fatal case of chlorate poisoning: confirmation by ion chromatography of body fluids.

Quantitative determination of paraquat in a fatal intoxication by HPLC-DAD following chemical reduction with sodium borohydride.

Detection of 2,4-dichlorophenoxyacetic acid (2,4-D) residues in neonates breast-fed by 2,4-D exposed dams.

A long-term follow-up of lung function in survivors of paraquat poisoning.

Genetic variation of basal iron status, ferritin and iron regulatory protein in mice: potential for modulation of oxidative stress.

A new diquat derivative appropriate for colourimetric measurements of biological materials in the presence of paraquat.

A case of transient diabetes insipidus associated with poisoning by a herbicide containing glufosinate.

A case of fatal diquat poisoning: toxicokinetic data and autopsy findings.

Mechanisms of toxicity, clinical features, and management of diquat poisoning: a review.

Mechanisms of toxicity, clinical features, and management of acute chlorophenoxy herbicide poisoning: a review.

Disorders of male rat reproductive tract under the influence of atrazine.

Circulating thyroglobulin transcytosed by thyroid cells in complexed with secretory components of its endocytic receptor megalin.

Cephaloridine-induced inhibition of cytochrome c oxidase activity in the mitochondria of cultured renal epithelial cells (LLC-PK(1)) as a possible mechanism of its nephrotoxicity.

Results of dental amalgam removal and mercury detoxification using DMPS and neural therapy.

Cyclophosphamide-induced cystitis in freely-moving conscious rats: behavioral approach to a new model of visceral pain.

DMPS-arsenic challenge test. II. Modulation of arsenic species, including monomethylarsonous acid (MMA(III)), excreted in human urine.

Potassium chloride depolarization enhances MPP⁺-induced hydroxyl radical generation in the rat striatum.

Increased urinary excretion of thioethers as a marker for detecting exposure to herbicide containing 2,4-dichlorophenoxyacetic acid dimethylamine - experimental study on mice.

Inhibition of cellular action of thrombin by N3-cyclopropyl-7-[[4-(1-methylethyl)phenyl]methyl]-7H-pyrrolo[3, 2-f]quinazoline-1,3-diamine (SCH 79797), a nonpeptide thrombin receptor antagonist.

Different cell death mechanisms and gene expression in human cells induced by pentachlorophenol and its major metabolite, tetrachlorohydroquinone.

Relationship of MTT reduction to stimulants of muscle metabolism.

7-Hydroperoxycholesterol as a marker of oxidative stress in rat kidney induced by paraquat.

Catalase activity in equine semen.

Structure, function, and regional distribution of the organic cation transporter OCT3 in the kidney.

Simplified urinary immunoassay for 2,4-D: validation and exposure assessment.

Improved rapid analytical method for the urinary determination of 3, 5,6 trichloro-2-pyridinol, a metabolite of chlorpyrifos.

Role of megalin (gp330) in transcytosis of thyroglobulin by thyroid cells. A novel function in the control of thyroid hormone release.

Dose-dependent effects on tissue distribution and metabolism of dimethylarsinic acid in the mouse after intravenous administration.

Stimulatory effect of trans-cinnamaldehyde on noradrenaline secretion in guinea-pig ileum myenteric nerve terminals.

The mercapturic acid biotransformation pathway of hexachlorobenzene is not involved in the induction of splenomegaly, or skin and lung lesions in the Brown Norway rat.

[Endocrine disrupting chemicals and carcinogenesis--breast, testis and prostate cancer].

2,3,7,8-tetrachlorodibenzo-p-dioxin increases serum and kidney retinoic acid levels and kidney retinol esterification in the rat.

In vivo labeling of mitochondrial complex I (NADH:ubiquinone oxidoreductase) in rat brain using [(3)H]dihydrorotenone.

[Membrane disorder and free radical].

Chronic peritoneal inflammation by cyanate in rats.

Pharmacological treatment of obesity. Past, present, and future.

Cyanate as a hemolytic factor.

Urinary excretion of glycosaminoglycans in patients with isolated nocturnal enuresis or combined with diurnal incontinence.

An alternative interpretation of nanobacteria-induced biomineralization.

Selective involvement of reactive oxygen intermediates in platelet-activating factor-mediated activation of NF-kappaB.

Cloning and functional expression of rKCNQ2 K(+) channel from rat brain.

Changes in free and esterified cholesterol: hallmarks of acute renal tubular injury and acquired cytoresistance.

Application of capillary electrophoresis in clinical chemistry: the clinical value of urinary modified nucleosides.

Redistribution of accumulated 2,3,7,8-tetrachlorodibenzo-p-dioxin during coxsackievirus B3 infection in the mouse.

Inhibitory effects of nitric oxide and nitrosative stress on dopamine-beta-hydroxylase.

Arsenic mediates cell proliferation and gene expression in the bladder epithelium: association with activating protein-1 transactivation.

Antiplatelet therapy alters iron requirements in hemodialysis patients.

Effects of erythropoietin therapy on iron absorption in chronic renal failure.

Evidence of functional ryanodine receptor involved in apoptosis of prostate cancer (LNCaP) cells.

p-Cresol sulfate is the dominant component of urinary myelin basic protein like material.

Role of antioxidant systems in human androgen-independent prostate cancer cells.

Caspase-3 protease activation during the process of genistein-induced apoptosis in TM4 testicular cells.

Paternal employment in agriculture and childhood kidney cancer.

Second primary neoplasms following non-Hodgkin's lymphoma in New South Wales, Australia.

CDC investigations of noninfectious outbreaks of adverse events in hemodialysis facilities, 1979-1999.

Neurokinin-1 (NK-1) receptor is required in antigen-induced cystitis.

Iron supplementation in goitrous, iron-deficient children improves their response to oral iodized oil.

Toxic action/toxicity.

Differential expression of phosphatidylethanol-amine-binding protein in rat hepatoma cell lines: analyses of tumor necrosis factor- α -resistant cKDH-8/11 and -sensitive KDH-8/YK cells by two-dimensional gel electrophoresis.

Effects of TCDD on thyroid hormone homeostasis in the rat.

Examination of selected food additives and organochlorine food contaminants for androgenic activity in vitro.

Responses of transgenic mouse lines p53(+/-) and Tg.AC to agents tested in conventional carcinogenicity bioassays.

Morphologic, biochemical and molecular mitochondrial changes during reperfusion phase following brief renal ischemia.

Infusion of total dose iron versus oral iron supplementation in ambulatory peritoneal dialysis patients: a prospective, cross-over trial.

The contributions of various chloroquine salts to the biliary and urinary excretion of hepatic paracetamol conjugation metabolites in the rat.

Intradialytic removal of protein-bound uraemic toxins: role of solute characteristics and of dialyser membrane.

2,3,7,8-tetrachlorodibenzo-p-dioxin inhibits luminal cell differentiation and androgen responsiveness of the ventral prostate without inhibiting prostatic 5 α -dihydrotestosterone formation or testicular androgen production in rat offspring.

Quantification of selected pesticide metabolites in human urine using isotope dilution high-performance liquid chromatography/tandem mass spectrometry.

Monomethylarsonic acid reductase and monomethylarsonous acid in hamster tissue.

Chronic toxicity of arsenic in goats: clinicobiochemical changes, pathomorphology and tissue residues.

Endotoxin (lipopolysaccharide)-induced nitric oxide production in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated Fischer rats: detection of nitrosyl hemoproteins by EPR spectroscopy.

Conditional disruption of the aryl hydrocarbon receptor nuclear translocator (Arnt) gene leads to loss of target gene induction by the aryl hydrocarbon receptor and hypoxia-inducible factor 1 α .

Urinary biomarkers of atrazine exposure among farm pesticide applicators.

Developmental and tissue-specific expression of AHR1, AHR2, and ARNT2 in dioxin-sensitive and -resistant populations of the marine fish *Fundulus heteroclitus*.

Toxicity of TCDD in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P450 1A induction in several organ systems.

Effects of arsenite on central monoamines and plasmatic levels of adrenocorticotrophic hormone (ACTH) in mice.

Portosystemic shunting and persistent fetal vascular structures in aryl hydrocarbon receptor-deficient mice.

Comparative effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on MCF-7, RL95-2, and LNCaP cells: role of target steroid hormones in cellular responsiveness to CYP1A1 induction.

Arsenic metabolism in seaweed-eating sheep from Northern Scotland.

Roles of oxygen radical production and lipid peroxidation in the cytotoxicity of cephaloridine on cultured renal epithelial cells (LLC-PK1).

Development of clover yellow vein virus as an efficient, stable gene-expression system for legume species.

Signal transduction mechanisms linking increased extracellular calcium to proliferation in ovarian surface epithelial cells.

Differential sensitivity to hydroxyl radicals of pre- and postjunctional neurovascular transmission in the isolated canine mesenteric vein.

Protein-tyrosine phosphatase reduces the number of apical small conductance K⁺ channels in the rat cortical collecting duct.

Molecular characterization and developmental expression of the aryl hydrocarbon receptor from the chick embryo.

Optimised separation of endogenous urinary components using cyclodextrin-modified micellar electrokinetic capillary chromatography.

Excretion of hexachlorobenzene and metabolites in feces in a highly exposed human population.

Biliary and urinary excretion of inorganic arsenic: monomethylarsonous acid as a major biliary metabolite in rats.

Comparative induction of CYP1A1 expression by pyridine and its metabolites.

Differential response of cellular antioxidant mechanism of liver and kidney to arsenic exposure and its relation to dietary protein deficiency.

Enzyme cytochemical localization of sarcosine oxidase activity in the liver and kidney of several mammals.

Fast urinary screening for paracetamol using on-line microwave assisted hydrolysis and spectrophotometric detection.

Purification, characterization, and localization of an ATP diphosphohydrolase in porcine kidney.

Cloning and functional characterization of the bile acid-sensitive methotrexate carrier from rat liver cells.

A novel function of thyrotropin as a potentiator of electrolyte secretion from the tracheal gland.

Chelating agents for uranium(VI): 2. Efficacy and toxicity of tetradentate catecholate and hydroxypyridinonate ligands in mice.

Sphingomyelinase and membrane sphingomyelin content: determinants of proximal tubule cell susceptibility to injury.

2-Methoxy-4-(2-phthalimidinyl)phenylsulfonyl chloride as a fluorescent labeling reagent for determination of phenols in high-performance liquid chromatography and application for determination of urinary phenol and p-cresol.

Time course of arsenite-induced copper accumulation in rat kidney.

Oxidative stress in female B6C3F1 mice following acute and subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

TCDD induces CYP1A4 and CYP1A5 in chick liver and kidney and only CYP1A4, an enzyme lacking arachidonic acid epoxygenase activity, in myocardium and vascular endothelium.

Toxicology of environmental chemicals in the flounder (*Platichthys flesus*) with emphasis on the immune system: field, semi-field (mesocosm) and laboratory studies.

Genetic polymorphism in the biotransformation of inorganic arsenic and its role in toxicity.

NTP Toxicology and Carcinogenesis Studies of Pyridine (CAS No. 110-86-1) in F344/N Rats, Wistar Rats, and B6C3F1 Mice (Drinking Water Studies).

Active transport of the angiotensin-II antagonist losartan and its main metabolite EXP 3174 across MDCK-MDR1 and caco-2 cell monolayers.

Identification and characterization of a novel hepatic canalicular ATP diphosphohydrolase.

Determination of albendazole and its main metabolites in ovine plasma by liquid chromatography with dialysis as an integrated sample preparation technique.

Sodium monochloroacetate causes cytotoxic effects, an increased lactate and pyruvate level and induces ultra structural and cytoskeletal alterations in cultured kidney and liver epithelial cells.

Parathyroid hormone stimulates extracellular signal-regulated kinase (ERK) activity through two independent signal transduction pathways: role of ERK in sodium-phosphate cotransport.

Systemic indicators of inorganic arsenic toxicity in four animal species.

Low dietary cyanogen exposure from frequent consumption of potentially toxic cassava in Malawi.

Carbonic anhydrase activators - part 21. Novel activators of isozymes I, II and IV incorporating carboxamido and ureido histamine moieties.

[Spreading of porcine kidney epithelial cells under normal conditions and under the effect of inhibitors of energy metabolism. II. Behavior of cellular organelles].

[Spreading of porcine kidney epithelial cells under normal condition and under the effect of inhibitors of energy metabolism. I. Dynamics of spreading].

[Chemical toxicological analysis of urinary cannabinoids by chromatography mass spectrometry].

Influence of different hemodialysis membranes on red blood cell susceptibility to oxidative stress.

Protein tyrosine kinase regulates the number of renal secretory K channels.

Nitrofen-induced congenital malformations of the heart and great vessels in rats: an animal model.

Chronic dietary toxicity and oncogenicity evaluation of MCPA (4-chloro-2-methylphenoxyacetic acid) in rodents.

Maternal exposure to atrazine during lactation suppresses suckling-induced prolactin release and results in prostatitis in the adult offspring.

Multiple logistic regression analysis of plasma paraquat concentrations as a predictor of outcome in 375 cases of paraquat poisoning.

Cardiogenic shock in a patient with glyphosate-surfactant poisoning.

Renal failure and corrosive airway and gastrointestinal injury after ingestion of diluted diquat solution.

Behavioural and histological effects of atrazine on freshwater molluscs (*Physa acuta* Drap. and *Ancylus fluviatilis* Müll. Gastropoda).

Urinary bladder carcinogenicity of dimethylarsinic acid in male F344 rats.

Effect of the in vivo catalase inhibition on aminonucleoside nephrosis.

Glutathione antagonized cyclophosphamide- and acrolein-induced cytotoxicity of PC3 cells and immunosuppressive actions in mice.

Effects of trifluralin on carp: biochemical and histological evaluation.

[Massive paraquat poisoning. Favorable course after treatment with n-acetylcysteine and early hemodialysis].

A toxicokinetic analysis in a patient with acute glufosinate poisoning.

2,4-D treatment in tench (*Tinca tinca* L.): pathological processes on the excretory kidney.

[Endocrine disrupting chemicals and carcinogenicity].

Urinary excretion of biomarkers for radical-induced damage in rats treated with NDMA or diquat and the effects of calcium carbimide co-administration.

Vaginally applied diquat intoxication.

Administration of potentially antiandrogenic pesticides (procymidone, linuron, iprodione, chlozolinate, p,p'-DDE, and ketoconazole) and toxic substances (dibutyl- and diethylhexyl phthalate, PCB 169, and ethane dimethane sulphonate) during sexual differentiation produces diverse profiles of reproductive malformations in the male rat.

Effects of dietary dimethylarsinic acid on the urine and urothelium of rats.

Pharmacological and molecular evidence for kinin B1 receptor expression in urinary bladder of cyclophosphamide-treated rats.

Loss of heterozygosity in (LewisF344)F1 rat urinary bladder tumors induced with N-butyl-N-(4-hydroxybutyl)nitrosamine followed by dimethylarsinic acid or sodium L-ascorbate.

Decreased intracellular superoxide levels activate Sindbis virus-induced apoptosis.

Oxidative stress as a mechanism of chronic cadmium-induced hepatotoxicity and renal toxicity and protection by antioxidants.

Mechanism of organic anion transport across the apical membrane of choroid plexus.

Isotope dilution high-performance liquid chromatography/tandem mass spectrometry method for quantifying urinary metabolites of atrazine, malathion, and 2,4-dichlorophenoxyacetic acid.

Metabolism of 7-fluoro-6-(3,4,5,6-tetrahydrophthalimido)-4-(2-propynyl)-2H-1,4-benzoxazin-3(4H)-one (S-53482, flumioxazin) in the rat: II. Identification of reduced metabolites.

p-cresol: a toxin revealing many neglected but relevant aspects of uraemic toxicity.

[Biological actions of acetaldehyde].

Species differences in arsenic-mediated renal copper accumulation: a comparison between rats, mice and guinea pigs.

Hypoxia induces renal tubular epithelial cell apoptosis in chronic renal disease.

The stabilization of ferrous iron by a toxic beta-amyloid fragment and by an aluminum salt.

Effects of CYP1A2 on disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin, 2,3,4,7,8-pentachlorodibenzofuran, and 2,2',4,4',5,5'-hexachlorobiphenyl in CYP1A2 knockout and parental (C57BL/6N and 129/Sv) strains of mice.

Multiple roles of ligand in transforming the dioxin receptor to an active basic helix-loop-helix/PAS transcription factor complex with the nuclear protein Arnt.

74As-arsenate metabolism in Flemish Giant rabbits with renal insufficiency.

Analysis of urinary nitric oxide metabolites in healthy subjects.

Geographical differences of cancer incidence in Costa Rica in relation to environmental and occupational pesticide exposure.

Heat shock protein expression protects against cerebral ischemia and monoamine overload in rat heatstroke.

Toxicity of 3,3',4,4'-tetrachloroazoxybenzene in rats and mice.

Cancer incidence in a cohort of licensed pesticide applicators in Florida.

Cross-talk between 2,3,7,8-tetrachlorodibenzo-p-dioxin and testosterone signal transduction pathways in LNCaP prostate cancer cells.

Ex vivo evaluation of a Taylor-Couette flow, immobilized heparinase I device for clinical application.

Cytochrome P450 CYP1B1 determines susceptibility to 7, 12-dimethylbenz[a]anthracene-induced lymphomas.

[Oxidative injury and its defense system in vivo].

Relationships between environmental organochlorine contaminant residues, plasma corticosterone concentrations, and intermediary metabolic enzyme activities in Great Lakes herring gull embryos.

v-src induces cisplatin resistance by increasing the repair of cisplatin-DNA interstrand cross-links in human gallbladder adenocarcinoma cells.

Endocrine biomarkers of early fetal loss in cynomolgus macaques (*Macaca fascicularis*) following exposure to dioxin.

Dioxin is a systemic promoter blocker, II.

Arsenic speciation in human organs following fatal arsenic trioxide poisoning--a case report.

Human cytochrome P4501A2.

Uremic ultrafiltrate inhibits platelet-activating factor synthesis.

Mortality in a cohort of licensed pesticide applicators in Florida.

Amelioration of TCDD-induced teratogenesis in aryl hydrocarbon receptor (AhR)-null mice.

Trovafloxacin: an overview.

Ubiquitinated aldolase B accumulates during starvation-induced lysosomal proteolysis.

Cytotoxicity of cadmium and characteristics of its transport in cardiomyocytes.

Biological monitoring of occupational exposure to inorganic arsenic.

Reversible alteration of morphology in an invertebrate erythrocyte: properties of the natural inducer and the cellular response.

Vascular endothelial growth factor activates MAP kinase and enhances collagen synthesis in human mesangial cells.

The role of plasma semicarbazide-sensitive amine oxidase in allylamine and beta-aminopropionitrile cardiovascular toxicity: mechanisms of myocardial protection and aortic medial injury in rats.

Herbimycin A and geldanamycin inhibit okadaic acid-induced apoptosis and p38 activation in NRK-52E renal epithelial cells.

2-Amino-5-chlorophenol toxicity in renal cortical slices from Fischer 344 rats: effect of antioxidants and sulfhydryl agents.

NTP Toxicology and Carcinogenesis Studies of Triethanolamine (CAS No. 102-71-6) in F344 Rats and B6C3F1 Mice (Dermal Studies).

Arsenite uptake and metabolism by rat hepatocyte primary cultures in comparison with kidney- and hepatocyte-derived rat cell lines.

Dissimilar mechanisms of Ca(2+) response to bradykinin in different types of juxtamedullary glomerular arterioles.

[Significance of urinary concentrations of S-benzyl-N-acetylcysteine (S-BMA) in subjects exposed to toluene].

[Urinary excretion of arsenic and its metabolites in a population of adult males not occupationally exposed in the province of Bari].

Regulation of the renal Na-HCO(3) cotransporter. XI. Signal transduction underlying CO(2) stimulation.

Estimating amounts of toluene inhaled by workers with protective mask using biological indicators of toluene.

Changes in mRNAs of inducible nitric oxide synthase and interleukin-1 beta in the liver, kidney and lung tissues of rats acutely exposed to paraquat.

A longitudinal investigation of selected pesticide metabolites in urine.

Oral phosphate binders: phosphate binding capacity of iron (III) hydroxide complexes containing saccharides and their effect on the urinary excretion of calcium and phosphate in rats.

High-performance liquid chromatographic-fluorescent method to determine chloroacetaldehyde, a neurotoxic metabolite of the anticancer drug ifosfamide, in plasma and in liver microsomal incubations.

Analyses of tissues of eight marine species from Atlantic and Pacific coasts for dioxin-like chlorobiphenyls (CBs) and total CBs.

Identification of a novel cytosolic tocopherol-binding protein: structure, specificity, and tissue distribution.

Role of O6-alkylguanine-DNA alkyltransferase in protecting against cyclophosphamide-induced toxicity and mutagenicity.

Heat shock protein 27 expression in human proximal tubule cells exposed to lethal and sublethal concentrations of CdCl₂.

Injection of encapsulated cells producing an ifosfamide-activating cytochrome P450 for targeted chemotherapy to pancreatic tumors.

Simultaneous determination of the urinary metabolites of toluene, xylene and styrene using high-performance capillary electrophoresis. Comparison with high-performance liquid chromatography.

Uptake of vitamin A in macrophages from physiologic transport proteins: role of retinol-binding protein and chylomicron remnants.

p120(ctn) acts as an inhibitory regulator of cadherin function in colon carcinoma cells.

Evaluation of a Short-term Rat Proximal Tubule Incubation System for the Detection of Nephrotoxicants.

The effect of EGF on electrolyte transport is mediated by tyrosine kinases in the rabbit cortical collecting duct.

Structural analysis of angiotensin IV receptor (AT4) from selected bovine tissues.

Unidirectional transport from apical to basolateral compartment of cobalt ion in polarized Madin-Darby canine kidney cells.

Four amino acid changes are associated with the Aldh3a1 locus polymorphism in mice which may be responsible for corneal sensitivity to ultraviolet light.

Dose dependent changes in 74As-arsenate metabolism of Flemish Giant rabbits.

Carbonyl stress in the pathogenesis of diabetic nephropathy.

Immunohistochemical evidence for an increased oxidative stress and carbonyl modification of proteins in diabetic glomerular lesions.

Secretion of primary urine by glomeruli of the hagfish kidney.

Ah receptor and ARNT protein and mRNA concentrations in rat prostate: effects of stage of development and 2,3,7, 8-tetrachlorodibenzo-p-dioxin treatment.

Lysophosphatidic acid-induced calcium mobilization and proliferation in kidney proximal tubular cells.

Activation of Cl⁻ channel and Na⁺/K⁺/2Cl⁻ cotransporter in renal epithelial A6 cells by flavonoids: genistein, daidzein, and apigenin.

Metabolic disposition of a monoterpene ketone, piperitenone, in rats: evidence for the formation of a known toxin, p-cresol.

Interactive effects of TCDD and p,p'-DDE on male reproductive tract development in in utero and lactationally exposed rats.

Promotion of NCI-Black-Reiter male rat bladder carcinogenesis by dimethylarsinic acid an organic arsenic compound.

[Nephrotoxicity of pesticides].

Chronic dietary toxicity study on 2,4-dichlorophenoxybutyric acid in the dog.

Acute 2,4-D poisoning in tench (*Tinca tinca* L.): lesions in the hematopoietic portion of the kidney.

Urinary excretion and pharmacokinetics of acrolein and its parent drug cyclophosphamide in bone marrow transplant patients.

Two cases of glufosinate poisoning with late onset convulsions.

Cellular glutathione peroxidase is the mediator of body selenium to protect against paraquat lethality in transgenic mice.

Paraquat-induced renal injury studied by 1H nuclear magnetic resonance spectroscopy of urine.

Malicious paraquat poisoning in Oklahoma dogs.

[Lethal paraquat poisoning caused by spraying in a vinyl greenhouse of causing pulmonary fibrosis with a hepatorenal dysfunction].

Acute 2,4-dichlorophenoxyacetic acid intoxication in broiler chicks.

Kaposi's sarcoma in dog with acquired immunodeficiency after phosphate poisoning.

In vivo studies on genotoxicity of a soil fumigant, dazomet.

Antioxidant and detoxifying enzymes in the liver and kidney of pheasants after intoxication by herbicides MCPA and ANITEN I.

³²P-postlabeling detection of DNA adducts in mice treated with the herbicide Roundup.

A morbidity study of former pentachlorophenol-production workers.

Excretion kinetics of ifosfamide side-chain metabolites in children on continuous and short-term infusion.

Feeding fish oil to rats accelerates the metabolism of hexachlorobenzene.

Effect of pentachlorophenol on immune function.

Chemical speciation of arsenic in serum of uraemic patients.

Transport of paraquat by isolated renal proximal tubular segments from rabbits.

The renal excretory mechanisms and the role of organic cations in modulating the renal handling of paraquat.

Analytical performance of accelerator mass spectrometry and liquid scintillation counting for detection of ¹⁴C-labeled atrazine metabolites in human urine.

Differential xenobiotic induction of CYP2A5 in mouse liver, kidney, lung, and olfactory mucosa.

Cultured renal epithelial cells from birds and mice: enhanced resistance of avian cells to oxidative stress and DNA damage.

Metabolism and distribution of [2,3-¹⁴C]acrolein in Sprague-Dawley rats. II. Identification of urinary and fecal metabolites.

Clusterin protects against oxidative stress in vitro through aggregative and nonaggregative properties.

Immunoenzymatic determination of atrazine in rat tissue samples.

Dialkylquinonimines validated as in vivo metabolites of alachlor, acetochlor, and metolachlor herbicides in rats.

Effect of arsenosugar ingestion on urinary arsenic speciation.

Urinary arsenic species in Devon and Cornwall residents, UK. A pilot study.

Experimental study of oxidative DNA damage.

Association between diesel exposure at work and prostate cancer.

Health effects associated with sulfur dioxide and methyl bromide exposure among structural fumigation workers.

Concentrated cresol intoxication.

Mechanism of action of the nongenotoxic peroxisome proliferators: role of the peroxisome proliferator-activator receptor alpha.

Correlation analysis of pesticide use data and cancer incidence rates in California counties.

A sensitive HPLC method for the quantification of free and total p-cresol in patients with chronic renal failure.

Molecular analysis of collagens in bladder fibrosis.

Claims based on exposure to ionizing radiation (prostate cancer and any other cancer)--VA. Final rule.

Interactive effects of three structurally different polychlorinated biphenyls in a rat liver tumor promotion bioassay.

Micellar electrokinetic chromatography for the determination of urinary desmosine and isodesmosine in patients affected by chronic obstructive pulmonary disease.

Genesis of the uraemic syndrome: role of uraemic toxins.

Heat shock protein expression protects against death following exposure to heatstroke in rats.

A case-control study of occupational and environmental risk factors for Parkinson's disease in the Emilia-Romagna region of Italy.

Urinary levels of inorganic and organic arsenic metabolites among residents in an arseniasis-hyperendemic area in Taiwan.

Effects on developmental landmarks and reproductive capability of 3,3',4,4'-tetrachlorobiphenyl and 3,3',4,4',5-pentachlorobiphenyl in offspring of rats exposed during pregnancy.

Role of tyrosine phosphorylation in leptin activation of ATP-sensitive K⁺ channels in the rat insulinoma cell line CRI-G1.

Urinary excretion of arsenic metabolites after long-term oral administration of various arsenic compounds to rats.

Effect of vitamin C on androgen independent prostate cancer cells (PC3 and Mat-Ly-Lu) in vitro: involvement of reactive oxygen species-effect on cell number, viability and DNA synthesis.

In utero and lactational exposure of the male rat to 2,3,7,8-tetrachlorodibenzo-p-dioxin impairs prostate development. 2. Effects on growth and cytodifferentiation.

In utero and lactational exposure of the male rat to 2,3,7,8-tetrachlorodibenzo-p-dioxin impairs prostate development. 1. Effects on gene expression.

Interferon-alpha and -gamma inhibit the growth and neoplastic potential of v-src-transformed human epithelial cells by reducing Src tyrosine kinase activity.

Parvovirus B19 infection and unresponsiveness to erythropoietin therapy in haemodialysis patients.

Microangiopathic hemolytic anemia as a complication of diabetes mellitus.

Effective utilization of erythropoietin with intravenous iron therapy.

Acute intoxication with trichloroethene: clinical symptoms, toxicokinetics, metabolism, and development of biochemical parameters for renal damage.

Association between the clastogenic effect in peripheral lymphocytes and human exposure to arsenic through drinking water.

Effects of the nonsteroidal anti-inflammatory drug nimesulide on energy metabolism in livers from adjuvant-induced arthritic rats.

Dioxin causes a sustained oxidative stress response in the mouse.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazoxybenzene (CAS No. 21232-47-3) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazobenzene (CAS No. 14047-09-7) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

Inhibition of oxidant-induced lipid peroxidation in cultured renal tubular epithelial cells (LLC-PK1) by quercetin.

Hepatobiliary transport kinetics of HSR-903, a new quinolone antibacterial agent.

Aromatic and polycyclic hydrocarbons in air and their urinary metabolites in coke plant workers.

Biotransformation of 2-chloroaniline in the Fischer 344 rat: identification of urinary metabolites.

Effect of side chains including the N-methyl-tetrazole-thiol group of beta-lactam antibiotics on transport in cultured kidney epithelial cells LLC-PK1.

Evidence for impaired assimilation and increased colonic fermentation of protein, related to gastric acid suppression therapy.

Biological monitoring of occupational exposure to arsenic by determining urinary content of inorganic arsenic and its methylated metabolites.

[State of free radical lipid peroxidation in white rats under chronic effects of dioxin].

Cyclophosphamide cystitis as a model of visceral pain in rats: a c-fos and Krox-24 study at telencephalic levels, with a note on pituitary adenylate cyclase activating polypeptide (PACAP).

Hepatic and renal metallothionein induction following single oral administration of gallium arsenide in rats.

Pleiotropic effects of hepatocyte growth factor in proximal tubule involve different signaling pathways.

Ceramide accumulation during oxidant renal tubular injury: mechanisms and potential consequences.

Regulation of BMP7 expression during kidney development.

Metabolic fate of S-(-)-pulegone in rat.

A pharmacodynamic analysis of TCDD-induced cytochrome P450 gene expression in multiple tissues: dose- and time-dependent effects.

Species- and sex-related differences in metabolism of trichloroethylene to yield chloral and trichloroethanol in mouse, rat, and human liver microsomes.

Elucidation of the amino acid sequence of a crustacean hyperglycaemic hormone from the spiny lobster, *Jasus lalandii*.

Serum and urinary boron levels in rats after single administration of sodium tetraborate.

High-pressure liquid chromatographic determination of toluene in urine as a marker of occupational exposure to toluene.

Handling of doxorubicin by the LLC-PK1 kidney epithelial cell line.

Sodium iron EDTA [NaFe(III)EDTA] as a food fortificant does not influence absorption and urinary excretion of manganese in healthy adults.

Cytotoxic Response Profiles of Cultured Renal Epithelial and Mesenchymal Cells to Selected Aromatic Hydrocarbons.

Differential cytotoxicity of Ifosfamide and its metabolites in renal epithelial cell cultures.

Development of a model for classification of toxin-induced lesions using ¹H NMR spectroscopy of urine combined with pattern recognition.

The role of glutathione S-transferase- and cytochrome P450-dependent metabolism in the olfactory toxicity of methyl iodide in the rat.

Responsiveness of the adult male rat reproductive tract to 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure: Ah receptor and ARNT expression, CYP1A1 induction, and Ah receptor down-regulation.

Differentiating and proliferative effects of HGF in renal proximal tubular cells are mediated via different signalling pathways.

Metabolism of inorganic arsenic in children with chronic high arsenic exposure in northern Argentina.

Arachidonic acid metabolism in the marine fish *Stenotomus chrysops* (Scup) and the effects of cytochrome P450 1A inducers.

Speciation of arsenic metabolites in the urine of occupational workers and experimental rats using an optimised hydride cold-trapping method.

Uptake of doxorubicin by cultured kidney epithelial cells LLC-PK1.

p53 mutations in cyclophosphamide-associated bladder cancer.

Effects of some thiol chelators on enzymatic activities in blood, liver and kidneys of acute arsenic (III) exposed mice.

Identification of a putative surfactant convertase in rat lung as a secreted serine carboxylesterase.

Differential involvement of tyrosine and serine/threonine kinases in platelet integrin α IIb β 3 exposure.

Metabolic interaction between toluene, trichloroethylene and n-hexane in humans.

Cellular uptake properties of oligonucleotides in LLC-PK1 renal epithelial cells.

Metabolic Study of Isoproturon in Goats Following a Single Oral Administration: Toxicokinetics and Recovery.

Mixed effects of 2,6-dithiopurine against cyclophosphamide mediated bladder and lung toxicity in mice.

Characterization of a novel group of basic small heat shock proteins in *Xenopus laevis* A6 kidney epithelial cells.

Enzymatic methylation of arsenic compounds. V. Arsenite methyltransferase activity in tissues of mice.

S-p-toluymercapturic acid in the urine of workers exposed to toluene: a new biomarker for toluene exposure.

Chemically reactive intermediates and pulmonary xenobiotic toxicity.

Haemoperfusion treatment in pigs experimentally intoxicated by paraquat.

Herbicide-induced experimental variegate porphyria in mice: tissue porphyrinogen accumulation and response to porphyrogenic drugs.

The cytotoxic effect of paraquat to isolated renal proximal tubular segments from rabbits.

Determination of 8-hydroxy-deoxyguanosine formation in rat organs: assessment of paraquat-evoked oxidative DNA damage.

Sex-dependent differences in the disposition of 2,4-dichlorophenoxyacetic acid in Sprague-Dawley rats, B6C3F1 mice, and Syrian hamsters.

Hemodialysis and hemoperfusion in the successful treatment of a poisoning with a herbicide containing glufosinate ammonium and a surfactant.

Possible carcinogenic potential of dimethylarsinic acid as assessed in rat in vivo models: a review.

In vivo studies on genotoxicity of pure and commercial linuron.

Alterations in steroidogenesis in alligators (*Alligator mississippiensis*) exposed naturally and experimentally to environmental contaminants.

The urinary excretion of arsenic metabolites after a single oral administration of dimethylarsinic acid to rats.

Meta-analyses of prostate cancer and farming.

Characterization of risks associated with the use of molinate.

Evaluation of renal function in rhesus monkeys and comparison to beagle dogs following oral administration of the organic acid triclopyr (3,5,6-trichloro-2-pyridinyloxyacetic acid).

[Ultrastructure of the kidney in paraquat-poisoned rats. Comparative study with literature data on man and animal].

[Case-control study of hemo-lymphopietic neoplasms and exposure to pesticides in western Liguria].

Comparison of HPLC and CE for the analysis of dichlorprop in a case of intoxication.

[Nephropathy induced by non-drug chemical agents].

Comparative pharmacokinetics of [¹⁴C]metosulam (N-[2,6-dichloro-3-methylphenyl]-5,7-dimethoxy-1,2,4-triazolo[1,5a]-pyrimidine-2-sulfonamide) in rats, mice and dogs.

Metabolism of arsenic after acute occupational arsine intoxication.

Performance characteristics of combined haemodialysis/haemoperfusion system for removal of blood toxins.

Influence of dietary selenium on the disposition of arsenate in the female B6C3F1 mouse.

Unique expression of HRF20 (CD59) in human nervous tissue.

Pentachlorophenol dermal absorption and disposition from soil in swine: effects of occlusion and skin microorganism inhibition.

Transport of paraquat by a renal epithelial cell line, MDCK.

Analytical methods for the determination of urinary 2,4-dichlorophenoxyacetic acid and 2-methyl-4-chlorophenoxyacetic acid in occupationally exposed subjects and in the general population.

Identification of a major human urinary metabolite of metolachlor by LC-MS/MS.

Effects of lead-arsenic combined exposure on central monoaminergic systems.

Mortality study of pesticide applicators and other employees of a lawn care service company.

Prevention of gastrointestinal iron absorption by chelation from an orally administered premixed deferoxamine/charcoal slurry.

Immune dysfunction in uremia.

p-cresol and uric acid: two old uremic toxins revisited.

Markers of masked iron deficiency and effectiveness of EPO therapy in chronic renal failure.

Gallium nitrate optic neuropathy.

Mitochondrial toxins in models of neurodegenerative diseases. I: In vivo brain hydroxyl radical production during systemic MPTP treatment or following microdialysis infusion of methylpyridinium or azide ions.

Serum beta-carotene level, arsenic methylation capability, and incidence of skin cancer.

HDL causes mesangial cell mitogenesis through a tyrosine kinase-dependent receptor mechanism.

Effect of vitamin C on prostate cancer cells in vitro: effect on cell number, viability, and DNA synthesis.

Maintenance therapy with intravenous iron in hemodialysis patients receiving erythropoietin.

DMPS-arsenic challenge test. I: Increased urinary excretion of monomethylarsonic acid in humans given dimercaptopropane sulfonate.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: effects on development of the male and female reproductive system of the mouse.

Induction of cytochrome P450 1B1 and catechol estrogen metabolism in ACHN human renal adenocarcinoma cells.

Effect of hepatic methyl donor status on urinary excretion and DNA damage in B6C3F1 mice treated with sodium arsenite.

Cytogenetic effects in human exposure to arsenic.

P-Cresol, a uremic compound, enhances the uptake of aluminum in hepatocytes.

Some peculiarities of hepatobiliary diseases in Vietnam.

Cancer mortality among rice growers in Novara Province, northern Italy.

Tyrosine kinase dependent expression of TGF-beta induced by stretch in mesangial cells.

Reproductive toxicology. m-/p-cresol.

Expression of CYP1B1 in human adult and fetal tissues and differential inducibility of CYP1B1 and CYP1A1 by Ah receptor ligands in human placenta and cultured cells.

[Assessment of neurotoxic effects of methyl bromide in exposed workers].

Dosimeter gel and MR imaging for verification of calculated dose distributions in clinical radiation therapy.

Altered profile of urinary arsenic metabolites in adults with chronic arsenicism. A pilot study.

Early life stage toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in zebrafish (*Danio rerio*).

Modulation of TCDD-induced fetotoxicity and oxidative stress in embryonic and placental tissues of C57BL/6J mice by vitamin E succinate and ellagic acid.

4-Amino-2,6-dichlorophenol nephrotoxicity in the Fischer 344 rat: protection by ascorbic acid, AT-125, and aminooxyacetic acid.

Loss of teratogenic response to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice lacking the Ah (dioxin) receptor.

The oncofetal J28 epitope involves fucosylated O-linked oligosaccharide structures of the fetopancreatic protein.

Inhibition of oxidative phosphorylation, vascular tone, and $[Ca^{2+}]_i$ in the perfused rat tail artery.

Tyrosine phosphorylation modulates current amplitude and kinetics of a neuronal voltage-gated potassium channel.

A dose-response analysis of the reproductive effects of a single gestational dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin in male Long Evans Hooded rat offspring.

Active and passive compliance of the fetal bovine bladder.

Airborne arsenic and urinary excretion of arsenic metabolites during boiler cleaning operations in a Slovak coal-fired power plant.

Involvement of the dorsal paratrigeminal nucleus in visceral pain-related phenomena.

Immunochemical, ^{32}P -postlabeling, and GC/MS detection of 4-aminobiphenyl-DNA adducts in human peripheral lung in relation to metabolic activation pathways involving pulmonary N-oxidation, conjugation, and peroxidation.

Role of 3,4-dichlorophenyl methyl sulfone, a metabolite of o-dichlorobenzene, in the changes in hepatic microsomal drug-metabolizing enzymes caused by o-dichlorobenzene administration in rats.

Induction in human osteoblastic cells (SaOS2) of the early response genes fos, jun, and myc by the amino terminal fragment (ATF) of urokinase.

Transcriptional regulation of N-acetylglucosaminyltransferase V by the src oncogene.

Influence of dietary protein supplements on the formation of bacterial metabolites in the colon.

Quantitative determination of urinary metabolites of o-dichlorobenzene using a gas chromatograph.

Aluminum citrate is transported from brain into blood via the monocarboxylic acid transporter located at the blood-brain barrier.

Expression and characterization of recombinant rat parathyroid hormone-related peptide (1-141) and an amino-terminally-truncated analogue (38-141).

Endothelial cells protect vascular smooth muscle cells from H₂O₂ attack.

Effects of TCDD on Ah receptor, ARNT, EGF, and TGF- α expression in embryonic mouse urinary tract.

Hrp12, a novel heat-responsive, tissue-specific, phosphorylated protein isolated from mouse liver.

Direct mapping of an agonist-binding domain within the parathyroid hormone/parathyroid hormone-related protein receptor by photoaffinity crosslinking.

Intracellular calcium buffering declines in aging adrenergic nerves.

Thrombin stimulates production of transforming growth factor- β by cultured human mesangial cells.

Gas chromatographic-mass spectrometric identification and quantitation of urinary phenols after derivatization with 4-carbomethoxyhexafluorobutyryl chloride, a novel derivative.

Identification of N-linked glycosylation sites in human testis angiotensin-converting enzyme and expression of an active deglycosylated form.

Death following intentional methyl bromide poisoning: toxicological data and literature review.

Differential effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the expression of prostaglandin-H synthase isoenzymes in mouse tissues.

[Modulation of respiratory activity of renal macrophages in sea bass (*Dicentrarchus labrax*) by chronic exposure to sublethal concentration of ammonia].

[Urinary sulfates as a biologic indicator of exposure to methylsulfate compounds in manufacture of sulfate cellulose].

Urinary excretion of phenols as an indicator of occupational exposure in the coke-plant industry.

Reduced glutathione inhibits rabbit and rat skeletal muscle lactate dehydrogenase and prevents dinitrophenol induced extracellular acidification by an epithelial cell line.

N-acetyl-S-(dichlorophenyl)cysteines as suitable biomarkers for the monitoring of occupational exposure to 1,2-dichlorobenzene.

Metabolism of hexachlorobenzene in humans: association between serum levels and urinary metabolites in a highly exposed population.

Selected lesions of dioxin in laboratory rodents.

Urinary excretion of ifosfamide, 4-hydroxyifosfamide, 3- and 2-dechloroethylifosfamide, mesna, and dimesna in patients on fractionated intravenous ifosfamide and concomitant mesna therapy.

Occupational chronic exposure to organic solvents. XVI. Ambient and biological monitoring of workers exposed to toluene.

Acute oral toxicity of the herbicide BUREX EKO in pheasants.

Promoting effects of dimethylarsinic acid on N-butyl-N-(4-hydroxybutyl)nitrosamine-induced urinary bladder carcinogenesis in rats.

Effect of paraquat intoxication and ambroxol treatment on hydrogen peroxide production and lipid peroxidation in selected organs of rat.

Comparative subchronic studies on 2,4-dichlorophenoxyacetic acid, amine, and ester in rats.

Studies on the basis for the toxicity of acrolein mercapturates.

Pharmacological advantages of conjugation of Cu, Zn-superoxide dismutase with succinylated keratin fragment: improvement of biological properties and resistance to oxidative damage.

Experimental ureterohydronephrosis in fetal rats.

No changes in behaviour, nigro-striatal system neurochemistry or neuronal cell death following toxic multiple oral paraquat administration to rats.

[Paraquat poisoning. Description of a case].

Pulmonary dysfunction in survivors of acute paraquat poisoning.

Experience with acute paraquat poisoning in Crete.

Biochemical and histopathological effects of glyphosate on carp, *Cyprinus carpio* L.

Use of continuous renal replacement therapy for detoxification?

Detection of 1, N2-propanodeoxyguanosine adducts as potential endogenous DNA lesions in rodent and human tissues.

DNA damage induced in mouse tissues by organic wood preserving waste extracts as assayed by 32P-postlabeling.

Comparative subchronic and chronic dietary toxicity studies on 2,4-dichlorophenoxyacetic acid, amine, and ester in the dog.

Herbicide: fatal ammonium thiocyanate and aminotriazole poisoning.

Biotransformation of acrolein in rat: excretion of mercapturic acids after inhalation and intraperitoneal injection.

Mortality in a cohort of pentachlorophenol manufacturing workers, 1940-1989.

Accumulation of arsenic species in serum of patients with chronic renal disease.

Increased expression of neuronal nitric oxide synthase in bladder afferent pathways following chronic bladder irritation.

Characterisation and uptake of paraquat by rat renal proximal tubular cells in primary culture.

Renal organic anion secretion: evidence for dopaminergic and adrenergic regulation.

Transport of paraquat in a renal epithelial cell line LLC-PK1.

Metabolism and distribution of [2,3-14C]acrolein in Sprague-Dawley rats.

Mechanism mediating basolateral transport of 2,4-dichlorophenoxyacetic acid in rat kidney.

Identification of a major human urinary metabolite of alachlor by LC-MS/MS.

Assessment of the biochemical effects of percutaneous exposure of sulphur mustard in an in vitro human skin system.

Influence of age on the passage of paraquat through the blood-brain barrier in rats: a distribution and pathological examination.

Increases in tissue levels of ubiquinone in association with peroxisome proliferation.

HSP induction inhibits iNOS mRNA expression and attenuates hypotension in endotoxin-challenged rats.

Interactive effects between 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,2',4,4',5,5'-hexachlorobiphenyl in female B6C3F1 mice: tissue distribution and tissue-specific enzyme induction.

Dioxin induces transcription of fos and jun genes by Ah receptor-dependent and -independent pathways.

Effects of developmental exposure to indole-3-carbinol or 2,3,7,8-tetrachlorodibenzo-p-dioxin on reproductive potential of male rat offspring.

Inhibitors of anchorage-independent growth affect the growth of transformed cells on poly(2-hydroxyethyl methacrylate)-coated surfaces.

[The perioperative use of recombinant erythropoietin (rhEPO) in Jehovah's witnesses].

Epoetin alfa--focus on nutritional therapy. Case study of the anemic patient.

Disturbed host defense in peritoneal cavity during CAPD: characterization of responsible factors in dwell fluid.

Diagnostic criteria for selenium toxicosis in aquatic birds: dietary exposure, tissue concentrations, and macroscopic effects.

Cancer incidence and specific occupational exposures in the Swedish leather tanning industry: a cohort based case-control study.

Simultaneous determination of phenol, cresol, xylenol isomers and naphthols in urine by capillary gas chromatography.

Nephrotoxicity of 4-amino-2-chlorophenol and 2-amino-4-chlorophenol in the Fischer 344 rat.

Latent effects of pesticides and toxic substances on sexual differentiation of rodents.

Dysfunction of polymorphonuclear leukocytes in uremia.

Effect of herbimycin A on renal cancer cell growth.

Detection of toluene in an adipoceratus body.

Incidence and time trends for lymphomas, leukemias and myelomas: hypothesis generation. Working Group on the Epidemiology of Hematolymphopoietic Malignancies in Italy.

Determination of furosemide in plasma and urine by gas chromatography/mass spectrometry.

Failure of prostatitis treatment secondary to probable ciprofloxacin-sucralfate drug interaction.

Implications for risk assessment of suggested nongenotoxic mechanisms of chemical carcinogenesis.

Comparative teratological studies on TCDD, endrin and lindane in C57BL/6J and DBA/2J mice.

Intravenous iron supplementation for the treatment of the anemia of moderate to severe chronic renal failure patients not receiving dialysis.

Airborne pollutants and the immune system.

Altered contractility of rabbit penile corpus cavernosum smooth muscle by hypoxia.

Arsenite, but not cadmium, induces ornithine decarboxylase and heme oxygenase activity in rat liver: relevance to arsenic carcinogenesis.

Inhibition of the accumulation of uremic toxins in the blood and their precursors in the feces after oral administration of Lebenin, a lactic acid bacteria preparation, to uremic patients undergoing hemodialysis.

Curcumin induces apoptosis in immortalized NIH 3T3 and malignant cancer cell lines.

On the mechanism of the differential effects of NS004 and NS1608 in smooth muscle cells from guinea pig bladder.

Inhibition of mitochondrial respiration and oxygen uptake in isolated rat renal tubular fragments by atractyloside.

Subcellular localization of TCDD differs between the liver, lungs, and kidneys after acute and subchronic exposure: species/dose comparisons and possible mechanism.

Basal metabolism of intraperitoneally injected carrier-free ⁷⁴As-labeled arsenate in rabbits.

Coagulation factors VII and X induce Ca²⁺ oscillations in Madin-Darby canine kidney cells only when proteolytically active.

Inducibility of cytochromes P-450 by dioxin in liver and extrahepatic tissues of the marmoset monkey (*Callithrix jacchus*).

Advancing age alters intracellular calcium buffering in rat adrenergic nerves.

[Bladder neoplasms and cyclophosphamide. Apropos of 3 cases and review of the literature].

Uptake of human urinary trypsin inhibitor by the kidney epithelial cell line, LLC-PK1.

Assessment of aspects of the toxicity of *Clostridium perfringens* epsilon-toxin using the MDCK cell line.

Rapid distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) to embryonic tissues in C57BL/6N mice and correlation with palatal uptake in vitro.

Tissue-specific 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible expression of human UDP-glucuronosyltransferase UGT1A6.

Stimulation of inorganic phosphate transport by insulin-like growth factor I and vanadate in opossum kidney cells is mediated by distinct protein tyrosine phosphorylation processes.

Subchronic dispositional and toxicological effects of arsenate administered in drinking water to mice.

Bladder augmentation in the prevention of cyclophosphamide-induced haemorrhagic cystitis in the rat model.

Anti-herpes simplex virus activity of n-docosanol correlates with intracellular metabolic conversion of the drug.

Depletion of glucose causes presynaptic inhibition of neuronal transmission in the rat dorsolateral septal nucleus.

Gas chromatographic determination of urinary o-cresol for the monitoring of toluene exposure.

Aryl-hydrocarbon receptor-deficient mice are resistant to 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced toxicity.

Non-, mono-, and di-o-chlorobiphenyl concentrations and their toxic equivalents to 2,3,7,8-tetrachlorodibenzo[p]dioxin in Aroclors(R) and digestive glands from American lobster (*Homarus americanus*) captured in Atlantic Canada.

Atypical cytochrome P450 induction profiles in glomerular mesangial cells at the mRNA and enzyme level. Evidence for CYP1A1 and CYP1B1 expression and their involvement in benzo[a]pyrene metabolism.

2,3,7,8-Tetrachlorodibenzo-p-dioxin affects retinol esterification in rat hepatic stellate cells and kidney.

Phenobarbital induction of cytochrome P4501A1 is regulated by cAMP-dependent protein kinase-mediated signaling pathways in rainbow trout hepatocytes.

Characterization of urinary metabolites from Sprague-Dawley rats and B6C3F1 mice exposed to [1,2,3,4-13C]butadiene.

The effect of the lipid peroxidation product 4-hydroxynonenal and of its metabolite 4-hydroxynonenic acid on respiration of rat kidney cortex mitochondria.

Toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in two substrains of male Long-Evans rats after intravenous injection.

Studies on the pharmacology of the inward transport of L-DOPA in rat renal tubules.

Expression and release of the a and b subunits for human coagulation factor XIII in baby hamster kidney (BHK) cells.

Comparison of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) disposition following pulmonary, oral, dermal, and parenteral exposures to rats.

Nephrotoxic potential of 2-amino-5-chlorophenol and 4-amino-3-chlorophenol in Fischer 344 rats: comparisons with 2- and 4-chloroaniline and 2- and 4-aminophenol.

Arsenic-copper interaction in the kidney of the rat: influence of arsenic metabolites.

Determination of the sequence of the aralkyl acyl-CoA:amino acid N-acyltransferase from bovine liver mitochondria.

Changes in taurine as an indicator of hepatic dysfunction and biochemical perturbations. Studies in vivo and in vitro.

Effect of verapamil on allyl alcohol hepatotoxicity.

Assessment of exposure to inorganic arsenic, a human carcinogen, due to the consumption of seafood.

Oral iron absorption test in patients on CAPD: comparison of ferrous sulfate and a polysaccharide ferric complex.

Dose-dependent kinetics and metabolism of 1,2-dichlorobenzene in rat: effect of pretreatment with phenobarbital.

Toluene itself as the best urinary marker of toluene exposure.

Regenerated cellulose-based hemodialyzers with immobilized proteins as potential devices for extracorporeal immunoadsorption procedures: an assessment of protein coupling capacity and in vitro dialysis performances.

Evidence for decline in intracellular calcium buffering in adrenergic nerves of aged rats.

Habitual and genetic factors that affect urinary background levels of biomarkers for organic solvent exposure.

A mechanistic model of effects of dioxin on thyroid hormones in the rat.

Effect of glutathione depletion on metallothionein synthesis induced by paraquat in mice.

[Paraquat-induced acute dermatitis in a child after playing with a discarded container].

Subacute toxicity of urea herbicide, isoproturon, in male rats.

Enhancement of paraquat toxicity by glutathione depletion in mice in vivo and in vitro.

Stimulation of antioxidative enzymes by paraquat in cultured Vero cells.

Segment specificity of the cytological response in rainbow trout (*Oncorhynchus mykiss*) renal tubules following prolonged exposure to sublethal concentrations of atrazine.

Effects of acute 2,4-dichlorophenoxyacetic acid on cattle serum components and enzyme activities.

Lack of methylation of inorganic arsenic in the chimpanzee.

Enhancement of tissue lipoperoxidation in propanil-treated rats.

[Paraquat poisoning. Treatment and prognosis].

Chelation of organoarsenate with dimercaptosuccinic acid.

Developmental toxicity of the substituted phenylurea herbicide isoproturon in rats.

Toxicity of cotoran (fluometuron) in Desert sheep.

Acrolein mercapturates: synthesis, characterization, and assessment of their role in the bladder toxicity of cyclophosphamide.

Paraquat--a superoxide generator--kills neurons in the rat spinal cord.

Effect of s-triazine compounds on testosterone metabolism in the rat prostate.

Ifosfamide and mesna: effects on the Na/H exchanger activity in renal epithelial cells in culture (LLC-PK1).

The effects of subchronic chlorate exposure in Sprague-Dawley rats.

Cancer induction by an organic arsenic compound, dimethylarsinic acid (cacodylic acid), in F344/DuCrj rats after pretreatment with five carcinogens.

Changes in the urinary excretion level of 8-hydroxyguanine by exposure to reactive oxygen-generating substances.

[Herbicides and neoplasms of the hemolymphopoietic system].

Survival in a case of massive paraquat ingestion.

Atrazine treatment potentiates excretion of mutagenic urine in 2,6-dinitrotoluene-treated Fischer 344 rats.

Acute-phase reactant proteins and antioxidants in rats intoxicated chronically with paraquat.

Puromycin aminonucleoside inhibits mesangial cell-induced contraction of collagen gels by stimulating production of reactive oxygen species.

Antioxidative roles of metallothionein and manganese superoxide dismutase induced by tumor necrosis factor-alpha and interleukin-6.

Simple method for analysis of diquat in biological fluids and tissues by high-performance liquid chromatography.

A unique metabolism of inorganic arsenic in native Andean women.

The effect of protoporphyrinogen oxidase inhibitors on microsomal and mitochondrial cytochromes.

Paraquat²⁺/H⁺ exchange in isolated renal brush-border membrane vesicles.

Peritubular paraquat transport in isolated renal proximal tubules.

A comparative study of direct hemoperfusion and hemodialysis for the removal of glufosinate ammonium.

Role of lipid peroxidation in H₂O₂-induced renal epithelial (LLC-PK1) cell injury.

Diquat increases cysteine proteinase inhibitors greatly in rat plasma and tissues.

Review of the interaction between TCDD and glucocorticoids in embryonic palate.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced anorexia and wasting syndrome in rats: aggravation after ventromedial hypothalamic lesion.

Developmental effects of dioxins and related endocrine disrupting chemicals.

Biological activities of synthetic analogues of *Alternaria alternata* toxin (AAL-toxin) and fumonisin in plant and mammalian cell cultures.

Tissue-specific effects of 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) on the activity of phosphoenolpyruvate carboxykinase (PEPCK) in rats.

Morphology of ras-transformed cells becomes apparently normal again with tyrosine kinase inhibitors without a decrease in the ras-GTP complex.

The efficacy of erythropoietin in human immunodeficiency virus-infected end-stage renal disease patients treated by maintenance hemodialysis.

Neonatal lethality associated with respiratory distress in mice lacking cytochrome P450 1A2.

Postischemic proximal tubular resistance to oxidant stress and Ca²⁺ ionophore-induced attack. Implications for reperfusion injury.

Direct tumorigenic conversion of human gallbladder carcinoma cells by v-src but not by activated c-H-ras oncogene.

Workers' response to risk notification.

Formation of 8-hydroxydeoxyguanosine in calf thymus DNA treated in vitro with phenylhydroquinone, the major metabolite of O-phenylphenol.

ACTH-(1-24) blocks the decompensatory phase of the haemodynamic response to acute hypovolaemia in conscious rabbits.

Activation of mesangial cells by the phosphatase inhibitor vanadate. Potential implications for diabetic nephropathy.

Correlation between toxicity and effects on intermediary metabolism in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated male C57BL/6J and DBA/2J mice.

Exposure to TCDD during development permanently alters reproductive function in male Long Evans rats and hamsters: reduced ejaculated and epididymal sperm numbers and sex accessory gland weights in offspring with normal androgenic status.

Efficacy of oral iron therapy in patients receiving recombinant human erythropoietin.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) distribution and cytochrome P4501A induction in young adult and senescent male mice.

Mechanisms of uremic inhibition of phagocyte reactive species production: characterization of the role of p-cresol.

Renal tumorigenicity of 1,1-dichloroethene in mice: the role of male-specific expression of cytochrome P450 2E1 in the renal bioactivation of 1,1-dichloroethene.

Colonic protein fermentation and promotion of colon carcinogenesis by thermolyzed casein.

Lung retention and bioavailability of arsenic after single intratracheal administration of sodium arsenite, sodium arsenate, fly ash and copper smelter dust in the hamster.

Characterization of LLC-PK1 kidney epithelial cells as an in vitro model for studying renal tubular reabsorption of protein drugs.

Sequential activation of MAP kinase cascade by angiotensin II in opossum kidney cells.

Factors influencing the protein binding of YH-439 using an equilibrium dialysis technique. A new hepatoprotective agent.

An attempt to explain interindividual variability in 24-h urinary excretion of inorganic arsenic metabolites by C57 BL/6J mice.

Factors influencing the protein binding of azosemide using an equilibrium dialysis technique.

Evaluation of the biodistribution and in vivo biochemistry of ^{99m}Tc-cysteine and ⁹⁹/^{99m}Tc-cysteine complexes--a potential renal imaging agent.

In utero and lactational exposure of the male rat to 2,3,7,8-tetrachlorodibenzo-p-dioxin: impaired prostate growth and development without inhibited androgen production.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces diverse retinoic acid metabolites in multiple tissues of the Sprague-Dawley rat.

Rat tail artery norepinephrine release: age and effect of mitochondrial blockade.

Calcium dependent K-channels in guinea pig and human urinary bladder.

Toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats including placental and lactational transfer to fetuses and neonates.

Enhancement of somatic embryogenesis in orchardgrass leaf cultures by epinephrine.

Application of high-performance liquid chromatography to a fatality involving azide.

Interindividual variability in the urinary excretion of inorganic arsenic metabolites by C57 BL/6J mice: possible involvement of a thiol/disulfide exchange mechanism.

Rat CYP1B1: an adrenal cytochrome P450 that exhibits sex-dependent expression in livers and kidneys of TCDD-treated animals.

Immunocytochemical investigation of the in vivo endocytosis by renal tubular epithelial cells.

Gas chromatographic-mass spectrometric determination of chlorophenols in the urine of sawmill workers with past use of chlorophenol-containing anti-stain agents.

Inhibition of viral replication by nitric oxide and its reversal by ferrous sulfate and tricarboxylic acid cycle metabolites.

Identification of a rat adrenal cytochrome P450 active in polycyclic hydrocarbon metabolism as rat CYP1B1. Demonstration of a unique tissue-specific pattern of hormonal and aryl hydrocarbon receptor-linked regulation.

Sulphated proteoglycan is required for collecting duct growth and branching but not nephron formation during kidney development.

Ethanol ingestion on allylamine-induced experimental subendocardial fibrosis.

[The uptake of nalidixic acid and enoxacin by rat renal cortical slices in rat].

Cisplatin induced nephrotoxicity and the modulating effect of glutathione ester.

An in vitro method for determination of tissue partition coefficients of non-volatile chemicals such as 2,3,7,8-tetrachlorodibenzo-p-dioxin and estradiol.

The 40 kDa $^{63}\text{Ni}(2+)$ -binding protein (pNiXc) on western blots of *Xenopus laevis* oocytes and embryos is the monomer of fructose-1,6-bisphosphate aldolase A.

Induction of P-450 in workers exposed to dioxin.

Urinary biomonitoring for alachlor exposure in commercial pesticide applicators by immunoassay.

Arsenic increased lipid peroxidation in rat tissues by a mechanism independent of glutathione levels.

Glutathione effects on toxicity and uptake of mercuric chloride and sodium arsenite in rabbit renal cortical slices.

Human chorionic gonadotropin protects Leydig cell function against 2,3,7,8-tetrachlorodibenzo-p-dioxin in adult rats: role of Leydig cell cytoplasmic volume.

Synthesis, Structure of Nitrogen-Containing Phosphinogold(I) Ferrocenes. In vitro Activity against Bladder and Colon Carcinoma Cell Lines.

Internal exposure of waste incineration workers to organic and inorganic substances.

Effects of benzo(a)pyrene and tetrachlorodibenzo(p)dioxin on fetal dolphin kidney cells: inhibition of proliferation and initiation of DNA damage.

Carbamylation decreases the cytotoxicity but not the drug-carrier properties of polylysines.

Selective increase of rat lung cytochrome P450 1A1 dependent monooxygenase activity after acute sodium arsenite administration.

Identification of urinary metabolites of human subjects exposed to o-dichlorobenzene.

Analysis of whole-blood cyclosporin G by liquid chromatography in renal transplant recipients.

"Farming and prostate cancer mortality".

Comparison of the toxicity of cinnamaldehyde when administered by microencapsulation in feed or by corn oil gavage.

Ifosfamide metabolite chloroacetaldehyde causes Fanconi syndrome in the perfused rat kidney.

Effects of atrazine on reproductive performance in the rat.

[Kidney disorders caused by organic toxic substances].

Nephrotoxicity and hepatotoxicity of 5,6-dichloro-4-thia-5-hexenoic acid: evidence for fatty acid beta-oxidation-dependent bioactivation.

Studies on trans-cinnamaldehyde. 1. The influence of dose size and sex on its disposition in the rat and mouse.

Acute 2,4-dichlorophenoxyacetic acid intoxication in cattle.

Effect of selenium deficiency and glutathione-modulating agents on diquat toxicity and lipid peroxidation in rats.

Occupational risk factors for renal-cell carcinoma in Denmark.

[Organic trace element pollution in water--a potential health risk for long-term dialysis patients].

[Methemoglobinemia induced by sodium chlorate: value of hyperbaric oxygen therapy].

Flow cytometric analysis of the direct toxic effects of paraquat on cultured MDCK cells.

[Hemoperfusion and plasma exchange therapy in patients with paraquat poisoning].

Effect of ethanol on paraquat toxicity in F344 rats.

Characterization of the capsaicin-sensitive component of cyclophosphamide-induced inflammation in the rat urinary bladder.

Canine exposure to herbicide-treated lawns and urinary excretion of 2,4-dichlorophenoxyacetic acid.

[Alteration of lipid peroxidation and the activity of peroxide metabolism enzymes in the liver, kidney and lung following the administration of paraquat in mice].

Different distribution of paraquat and diquat in human poisoning cases after ingestion of a combined herbicide.

In vivo hydrogen peroxide production in rat remnant kidney.

[Changes in the concentrations of chlornitrofen (CNP) and CNP-amino in river and faucet water in Niigata, Japan].

Disposition and metabolism of radiolabelled pentachloroanisole in rats and rabbits.

Tamoxifen: evidence by ³²P-postlabeling and use of metabolic inhibitors for two distinct pathways leading to mouse hepatic DNA adduct formation and identification of 4-hydroxytamoxifen as a proximate metabolite.

Effect of the protoporphyrinogen oxidase-inhibiting herbicide fomesafen on liver uroporphyrin and heptacarboxylic porphyrin in two mouse strains.

Effect of dosing vehicle on the dermal absorption of fluazifop-butyl and fomesafen in rats in vivo.

Metabolic fate of S,S,S-tributyl phosphorotrithioate (DEF) in the lactating goat.

Toxicity of ifosfamide, cyclophosphamide and their metabolites in renal tubular cells in culture.

Stimulatory effect of ethanol on weak organic acid uptake in rat renal tubules.

Inhibition of degranulation of polymorphonuclear leukocytes by angiogenin and its tryptic fragment.

Polymorphonuclear leukocytes increase glomerular albumin permeability via hypohalous acid.

Treatment of methyl bromide poisoning with haemodialysis.

[Shock caused by poisoning. Use of cardiotropic agents].

Interactive regulation of Ah and glucocorticoid receptors in the synergistic induction of cleft palate by 2,3,7,8-tetrachlorodibenzo-p-dioxin and hydrocortisone.

Hypoxic stimulation of vascular endothelial growth factor expression in vitro and in vivo.

[Assessment of iron absorption in children with chronic renal insufficiency].

Effects of in utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on responsiveness of the male rat reproductive system to testosterone stimulation in adulthood.

Reproductive toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in male rats: different effects of in utero versus lactational exposure.

Toxic potency of 3,3',4,4',5-pentachlorobiphenyl relative to and in combination with 2,3,7,8-tetrachlorodibenzo-p-dioxin in a subchronic feeding study in the rat.

Synthesis and tissue biodistribution of [ω -¹¹C]palmitic acid. A novel PET imaging agent for cardiac fatty acid metabolism.

Morbidity follow up study of BASF employees exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) after a 1953 chemical reactor incident.

Protein binding of itraconazole and fluconazole in patients with chronic renal failure.

Effect of ethanol and sodium arsenite on HSP-72 formation and on survival in a murine endotoxin model.

Urea-derived cyanate forms epsilon-amino-carbamoyl-lysine (homocitrulline) in leukocyte proteins in patients with end-stage renal disease on peritoneal dialysis.

Enalapril reduces collagen type IV synthesis and expansion of the interstitium in the obstructed rat kidney.

In vivo and in vitro 4-amino-2,6-dichlorophenol nephrotoxicity and hepatotoxicity in the Fischer 344 rat.

Human NAD(P)H:quinone oxidoreductase2. Gene structure, activity, and tissue-specific expression.

2,3,7,8-TCDD and 2,3,7,8-TCDF in blue crabs and American lobsters from the Hudson-Raritan estuary and the New York Bight.

Evaluation of porphyria cutanea tarda in U.S. workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effects of herbimycin A and its derivatives on growth and differentiation of Ph1-positive acute lymphoid leukemia cell lines.

Decreased clearance of uraemic and mildly carbamylated low-density lipoprotein.

Developmental toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the most TCDD-resistant and -susceptible rat strains.

The use of 5-hydroxytryptophol as an alcohol intake marker.

Human intestinal alkaline phosphatase-binding IgG in patients with severe bacterial infections.

Mechanisms of chemical injury of thyroid gland.

Sequential activation of Raf-1 kinase, mitogen-activated protein (MAP) kinase kinase, MAP kinase, and S6 kinase by hyperosmolality in renal cells.

Assessment of cell-specific cytotoxic responses of the kidney to selected aromatic hydrocarbons.

NTP Toxicology and Carcinogenesis Studies of 4,4'-Thiobis(6-*t*-butyl-*m*-cresol) (CAS No. 96-69-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

The amino acid sequence of the red kidney bean Fe(III)-Zn(II) purple acid phosphatase. Determination of the amino acid sequence by a combination of matrix-assisted laser desorption/ionization mass spectrometry and automated Edman sequencing.

Ah receptor in different tissues of C57BL/6J and DBA/2J mice: use of competitive polymerase chain reaction to measure Ah-receptor mRNA expression.

Distribution of urinary hippuric acid concentrations by ALDH2 genotype.

Effect on tissue vitamin A levels in the rat following subchronic exposure to four individual PCB congeners (IUPAC 77, 118, 126, and 153).

Comparative mutagenicity of chemicals selected for test in the International Program on Chemical Safety's collaborative study on plant systems for the detection of environmental mutagens.

Synthesis of n.c.a. carbon-11 labelled clozapine and its major metabolite clozapine-N-oxide and comparison of their biodistribution in mice.

Comparative metabolism and elimination of acetanilide compounds by rat.

Cloning of a cDNA encoding an ectoenzyme that degrades thyrotropin-releasing hormone.

Astrocytes implicated in the energizing of intermediate memory processes in neonate chicks.

Tissue specific expression of the rat Ah-receptor and ARNT mRNAs.

Pathological findings in rabbits and sheep following the subacute administration of triphenyltin acetate.

Dithio-bis-mercaptoethanesulphonate (DIMESNA) does not prevent cellular damage by metabolites of ifosfamide and cyclophosphamide in LLC-PK1 cells.

Rapid desensitization of adrenaline- and neuropeptide Y-stimulated Ca²⁺ mobilization in HEL-cells.

Hemodialysis in metacresol poisoning.

Mouse cytochrome P-450EF, representative of a new 1B subfamily of cytochrome P-450s. Cloning, sequence determination, and tissue expression.

Cyclosporine enhances the synthesis of selected extracellular matrix proteins by renal cells "in culture". Different cell responses and phenotype characterization.

Comparative oxidation of 2-propyn-1-ol with other low molecular weight unsaturated and saturated primary alcohols by bovine liver catalase in vitro.

Hepatic uptake and metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,7,8-tetrachlorodibenzofuran.

Effects of smoking and drinking habits on urinary o-cresol excretion after occupational exposure to toluene vapor among Chinese workers.

Blockade of ovulation in the rat by the fungicide sodium N-methyldithiocarbamate: relationship between effects on the luteinizing hormone surge and alterations in hypothalamic catecholamines.

Tissue-specific constitutive and inducible expression of rat phenol UDP-glucuronosyltransferase.

Enzymatic reduction of xenobiotic alpha,beta-unsaturated ketones: formation of allyl alcohol metabolites from shogaol and dehydroparadol.

The oligosaccharides of the Fe(III)-Zn(II) purple acid phosphatase of the red kidney bean. Determination of the structure by a combination of matrix-assisted laser desorption/ionization mass spectrometry and selective enzymic degradation.

Purification and biochemical characterization of two major cytochrome P-450 isoforms induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in chick embryo liver.

Comparison of the urinary metabolite profiles of hexachlorobenzene and pentachlorobenzene in the rat.

Concentrations of urinary metabolites in workers exposed to monochlorobenzene and variation in the concentration during a workshift.

NTP Toxicology and Carcinogenesis Studies of o-Benzyl-p-Chlorophenol (CAS No. 120-32-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

X-ray microanalysis of renal proximal tubules in cadmium-treated rats.

Pharmacological classification and renal actions of diuretics.

Behavioral evidence for modified receptor sensitivity in rat brain induced by methyl bromide exposure.

Human pentachlorophenol poisoning.

Mechanism of cytotoxicity of paraquat. II. Organ specificity of paraquat-stimulated lipid peroxidation in the inner membrane of mitochondria.

Interaction of structurally similar pesticides with organic anion transport by primary cultures of winter flounder renal proximal tubule.

A health survey of workers in the pentachlorophenol section of a chemical manufacturing plant.

Effects of carbon tetrachloride, menadione, and paraquat on the urinary excretion of malondialdehyde, formaldehyde, acetaldehyde, and acetone in rats.

Biochemical and toxicological studies on the mixtures of three commonly-used herbicides in mice.

Mutagenic and carcinogenic pesticides used in the agricultural environment of Gaza Strip.

Haemotoxic effect of phenylurea herbicides in rats: role of haemoglobin-adduct formation in splenic toxicity.

Effect of alachlor on the urinary excretion of malondialdehyde, formaldehyde, acetaldehyde, and acetone by rats.

Acute and subacute toxicity of atrazine to carp (*Cyprinus carpio* L.).

[Intoxications by a weedkiller preparation containing glyphosate].

An epidemiological study of the health of Sri Lankan tea plantation workers associated with long term exposure to paraquat.

Nitrofen-induced congenital diaphragmatic defects in CD1 mice.

Atrazine in plasma and tissue following atrazine-aminotriazole-ethylene glycol-formaldehyde poisoning.

Kinetics of toxic doses of paraquat and the effects of hemoperfusion in the dog.

Application of microencapsulation for toxicology studies. III. Bioavailability of microencapsulated cinnamaldehyde.

Renal lesions induced in F344/DuCrj rats by 4-weeks oral administration of dimethylarsinic acid.

Alterations of peroxisomal function in ischemia-reperfusion injury of rat kidney.

The analysis of ifosfamide and its metabolites (review).

Hyperbaric oxygen treatment for experimental cyclophosphamide-induced hemorrhagic cystitis.

Effect of indomethacin, aspirin, nordihydroguaiaretic acid, and piperonyl butoxide on cyclophosphamide-induced bladder damage.

Detection of paraquat-induced in vivo lipid peroxidation by gas chromatography/mass spectrometry and high-pressure liquid chromatography.

Effect of ifosfamide metabolites on sodium-dependent phosphate transport in a model of proximal tubular cells (LLC-PK1) in culture.

Metabolism of N-[4-chloro-2-fluoro-5-[(1-methyl-2-propynyl)oxy]phenyl]-3,4,5,6-tetrahydrophthalimide (S-23121) in the rat. II. Absorption, disposition, excretion and biotransformation.

Metabolism of N-[4-chloro-2-fluoro-5-[(1-methyl-2-propynyl)oxy]phenyl]-3,4,5,6-tetrahydrophthalimide (S-23121) in the rat: I. Identification of a new, sulphonic acid type of conjugate.

Relationship of thermal and chemical tolerance to transepithelial transport by cultured flounder renal epithelium.

Modelling dermal pharmacokinetics using in vitro data. Part I. Fluazifop-butyl in the rat.

Tissue distribution and excretion of ¹⁴C-labelled cinnamic aldehyde following single and multiple oral administration in male Fischer 344 rats.

Human studies do not support the methylation threshold hypothesis for the toxicity of inorganic arsenic.

Autoxidation of cysteine generates hydrogen peroxide: cytotoxicity and attenuation by pyruvate.

Determination of atrazine metabolites in human urine: development of a biomarker of exposure.

Evidence for peroxidase-mediated metabolism of cyclophosphamide.

Comparison of the pharmacokinetics of 1,2-dimethyl-3-hydroxypyrid-4-one (L1) in healthy volunteers, with and without co-administration of ferrous sulfate, to thalassemia patients.

Subchronic toxicity of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats.

Resistance to aflatoxin B1 is associated with the expression of a novel aldo-keto reductase which has catalytic activity towards a cytotoxic aldehyde-containing metabolite of the toxin.

Phototoxicity of lumidoxycycline.

Collagen studies in newborn rat kidneys with incomplete ureteric obstruction.

A cationic protein from a urate-calcium oxalate stone: isolation and purification of a shared protein.

Thyroxine binding in a TTR Met 119 kindred.

Sodium azide protects against ischemia-induced acute renal failure in rats.

Transport of (2-chloroethyl)-3-sarcosinamide-1-nitrosourea in the human glioma cell line SK-MG-1 is mediated by an epinephrine-sensitive carrier system.

An acute model for IgA-mediated glomerular inflammation in rats induced by monoclonal polymeric rat IgA antibodies.

Purification of an autocrine growth factor homologous with mouse epithelin precursor from a highly tumorigenic cell line.

Renal and hepatic toxicity of monochloroacetanilides in the Fischer 344 rat.

Comparative immunochemistry and ontogeny of two closely related coated pit proteins. The 280-kd target of teratogenic antibodies and the 330-kd target of nephritogenic antibodies.

Opioid peptides in the rabbit carotid body: identification and evidence for co-utilization and interactions with dopamine.

Tumors produced in rats with a single dosage of 1,2-dimethylhydrazine.

The role of oxidative metabolism in hexachlorobenzene-induced porphyria and thyroid hormone homeostasis: a comparison with pentachlorobenzene in a 13-week feeding study.

Desensitization of beta-1 and beta-2, but not beta-3, adrenoceptor-mediated lipolytic responses of adipocytes after long-term norepinephrine infusion.

Effects of restricted feeding on the absorption, metabolism, and accumulation of pentachlorobenzene in rats.

Farming and prostate cancer mortality.

Teratogenicity and immunotoxicity of 3,3',4,4',5-pentachlorobiphenyl in C57BL/6 mice.

Unchanged protein binding of penbutolol in renal insufficiency: a possible role of carbamylation.

The mortality experience of workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin in a trichlorophenol process accident.

Phenol and p-cresol accumulated in uremic serum measured by HPLC with fluorescence detection.

Suppressive effect of an oral sorbent on the accumulation of p-cresol in the serum of experimental uremic rats.

Assessment of vitamin A status in pregnant women as reflected by in vitro destruction of vitamin A by hemolysates and urinary ammonium nitrogen to creatinine ratio.

Transport of choline by Madin-Darby canine kidney cells.

Roles of catalase and cytochrome c in hydroperoxide-dependent lipid peroxidation and chemiluminescence in rat heart and kidney mitochondria.

Purification and primary structure of a porcine kidney non-secretory ribonuclease.

Chlorate poisoning: mechanism of toxicity.

Tissue distribution and toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats after intravenous injection.

Cytochrome P4501A1 mediates the metabolism of 2,3,7,8-tetrachlorodibenzofuran in the rat and human.

Angiotensin II-mediated facilitation of sympathetic neurotransmission in the spontaneously hypertensive rat is not associated with neuronal uptake of the peptide.

Simple high-performance liquid chromatographic method to verify the direct barbituric acid assay for urinary cotinine.

Isolation and characterization of an intracellular serine proteinase inhibitor from a monkey kidney epithelial cell line.

Ifosfamide. Patient care management.

Methoxyresorufin and benzyloxyresorufin: substrates preferentially metabolized by cytochromes P4501A2 and 2B, respectively, in the rat and mouse.

Identification of a putative tyrosine-O-sulphate (TyrS) receptor possibly functioning in the biosynthetic transport of tyrosine-sulphated proteins in Madin-Darby canine kidney cells.

Distribution patterns of polychlorinated biphenyl congeners in harbor seal (*Phoca vitulina*) tissues: statistical analysis.

Role of P-glycoprotein in renal tubular secretion of digoxin in the isolated perfused rat kidney.

Simultaneous induction of sod, glutathione reductase, GSH, and ascorbate in liver and kidney correlates with survival during aging.

Modification by hydroxyl radicals of functional reactivity in rabbit lingual artery.

Human non-secretory ribonucleases. I. Purification, peptide mapping and lectin blotting analysis of the kidney, liver and spleen enzymes.

Modification of P450 activity and its effect on 1,2-dichlorobenzene toxicity in Fischer 344 rats.

[Toxicology of tobacco].

ATP-sensitive potassium channels in smooth muscle cells from guinea pig urinary bladder.

Porcine cerebroside sulfate activator: further structural characterization and disulfide identification.

NTP Toxicology and Carcinogenesis Studies of Pentachloroanisole (CAS No. 1825-21-4) in F344 Rats and B6C3F1 Mice (Feed Studies).

In vitro metabolism of cyanohydroxybutene: formation of a glutathione-S-transferase catalyzed product.

Effects of arsenite treatment on NAD(P)H:quinone acceptor oxidoreductase activity in liver, lung, kidney, and heart of the rat. Comparison to induction by the polyaromatic hydrocarbon, beta-naphthoflavone.

Determination of urinary arsenic and impact of dietary arsenic intake.

Measurements of year-long exposure to tree nursery workers using multiple pesticides.

Hepatic metabolism of toluene after gastrointestinal uptake in humans.

Investigations into the effects of various hepatotoxic compounds on urinary and liver taurine levels in rats.

Effects of acute sodium arsenite administration on the pulmonary chemical metabolizing enzymes, cytochrome P-450 monooxygenase, NAD(P)H:quinone acceptor oxidoreductase and glutathione S-transferase in guinea pig: comparison with effects in liver and kidney.

Comparative pharmacokinetics of ifosfamide, 4-hydroxyifosfamide, chloroacetaldehyde, and 2- and 3-dechloroethylifosfamide in patients on fractionated intravenous ifosfamide therapy.

Herbicides and cancer.

Nephrotoxicity of the 1:1 acrolein-glutathione adduct in the rat.

Changes in lipid peroxidation levels and lipid composition in the lungs, livers, kidneys and brains of mice treated with paraquat.

The kidney in the fetal rat model of congenital diaphragmatic hernia induced by nitrofen.

Inhibition of lipid peroxidation and cholesterol levels in mice by curcumin.

Antioxidant-dependent inhibition of diquat-induced toxicity in vivo.

Acute renal failure in a case of paraquat poisoning with relative absence of pulmonary toxicity.

Protective effects of antioxidants on paraquat-induced acute renal failure in mice.

Disposition, bioavailability, and serum protein binding of pentachlorophenol in the B6C3F1 mouse.

NTP technical report on the toxicity studies of Glyphosate (CAS No. 1071-83-6) Administered In Dosed Feed To F344/N Rats And B6C3F1 Mice.

Acrolein initiates rat urinary bladder carcinogenesis.

Prevention of acrolein-induced bladder injury by pentosanpolysulfate.

Excretion of formaldehyde, malondialdehyde, acetaldehyde and acetone in the urine of rats in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin, paraquat, endrin and carbon tetrachloride.

[Appearance of different panmyelopathies in the same patient].

Acute toxicological studies on paraquat: pathological findings in beagle dogs following single subcutaneous injections.

Upper gastrointestinal injury caused by diquat.

Subacute toxicity of paraquat in beagle dogs: clinicopathology and pathologic examinations.

2,4,5-trichlorophenoxyacetic acid influence on 2,6-dinitrotoluene-induced urine genotoxicity in Fischer 344 rats: effect on gastrointestinal microflora and enzyme activity.

Effects of ethyl 4-chloro-2-methylphenoxyacetate on bile composition in golden hamsters.

Morphological changes on nerves and histopathological effects on liver and kidney of rats by pentachlorophenol (PCP).

Effect of preinduction of metallothionein on paraquat toxicity in mice.

[Drug-induced acute renal failure].

Poisoning with 2,4-dichlorophenoxyacetic acid treated by hemodialysis.

Fatal paraquat poisoning: a light microscopic study in eight autopsy cases.

Renal cadmium deposition and injury as a result of accumulation of cadmium-metallothionein (CdMT) by the proximal convoluted tubules--A light microscopic autoradiography study with ¹⁰⁹CdMT.

Short-term hypothyroidism and vasopressin gene expression in the rat.

Inhibition of sodium-dependent transport systems in LLC-PK1 cells by metabolites of ifosfamide.

[Urinary excretion of mineral arsenic, methylarsonic acid and dimethylarsinic acid in workers exposed to gallium arsenide].

The effect of seafood consumption on the assessment of occupational exposure to arsenic by urinary arsenic speciation measurements.

Dermal absorption of the phenoxy herbicide 2,4-D dimethylamine in humans: effect of DEET and anatomic site.

Pharmacokinetics of fluzifop-butyl in human volunteers. II: Dermal dosing.

EPSP synthase: binding studies using isothermal titration microcalorimetry and equilibrium dialysis and their implications for ligand recognition and kinetic mechanism.

Comparative metabolism of the cysteine and homocysteine conjugates of propachlor by in situ perfused kidneys of rats.

Biotransformation of butachlor through mercapturic acid pathway in rat tissue homogenates.

Oral and dermal application of 2,4-dichlorophenoxyacetic acid sodium and dimethylamine salts to male rats: investigations on absorption and excretion as well as induction of hepatic mixed-function oxidase activities.

Effects of eating an uncooked vegetable diet for 1 week.

Reduced Leydig cell volume and function in adult rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin without a significant effect on spermatogenesis.

[Urinary N-acetyl-beta-D-glucosaminidase and gamma-glutamyl-transpeptidase activities for evaluation of renal disturbance in patients with multiple myeloma].

Ingested arsenic, keratoses, and bladder cancer.

Endoscopic treatment of vesicoureteral reflux with a self-detachable balloon system.

Urinary ortho-cresol concentrations as an indicator of toluene inhalation in glue-sniffers.

Extraembryonic tissue changes induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,4,7,8-pentachlorodibenzofuran with a note on direction of maternal blood flow in the labyrinth of C57BL/6N mice.

Cancer incidence following chlorophenol exposure in a community in southern Finland.

In utero and lactational exposure of male rats to 2,3,7,8-tetrachlorodibenzo-p-dioxin. 1. Effects on androgenic status.

The role of occupational exposure and immunodeficiency in B-cell malignancies. Working Group on the Epidemiology of Hematolymphopoietic Malignancies in Italy.

Heat-shock responsive elements in the induction of the multidrug resistance gene (MDR1).

Chemical burn with cresol intoxication and multiple organ failure.

Cancer risk among Danish and Italian farmers.

Neutrophil accumulation in ischemic reperfused rat liver: evidence for a role for superoxide free radicals.

[Amounts of urinary metabolites of p-chloroaniline and their half lives in a patient with acute poisoning].

Molecular cloning of the human Goodpasture antigen demonstrates it to be the alpha 3 chain of type IV collagen.

Glycosylation-inhibiting factor from human T cell hybridomas constructed from peripheral blood lymphocytes of a bee venom-sensitive allergic patient.

Cassava cyanogens and konzo, an upper motoneuron disease found in Africa.

The N-terminal segment of protein AA determines its fibrillogenic property.

Development of a quantitative in vitro transformation assay for kidney epithelial cells.

Sex differences in monochloroacetate pretreatment effects on chloroform toxicity in rats.

Effects of herbimycin A derivatives on growth and differentiation of K562 human leukemic cells.

Limited PCB antagonism of TCDD-induced malformations in mice.

Toxicity of monochloroacetic acid administered by gavage to F344 rats and B6C3F1 mice for up to 13 weeks.

Extracellular matrix formation by epithelial cells from human polycystic kidney cysts in culture.

A prospective open-label study evaluating the efficacy and adverse reactions of the use of Niferex-150 in ESRD patients receiving EPOGEN.

Reactive oxygen metabolites in toxic acute renal failure.

Siderophore production and membrane alterations by *Bordetella pertussis* in response to iron starvation.

Identification of urinary metabolites of human subjects acutely poisoned by p-chloronitrobenzene.

Isolation and characterization of a brefeldin A-resistant mutant of monkey kidney Vero cells.

Murine strain differences in metabolism and bladder toxicity of cyclophosphamide.

Structural comparison between the mitochondrial aralkyl-CoA and arylacetyl-CoA N-acyltransferases.

Hypoxia-elicited contraction of aorta and coronary artery via removal of endothelium-derived nitric oxide.

Confirmation of low concentrations of urinary benzodiazepines, including alprazolam and triazolam, by GC/MS: an extractive alkylation procedure.

Use of multiple-cause mortality data in epidemiologic analyses: US rate and proportion files developed by the National Institute for Occupational Safety and Health and the National Cancer Institute.

Synergism among oxidants, proteinases, phospholipases, microbial hemolysins, cationic proteins, and cytokines.

The potentiation of 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity by tamoxifen in female CD1 mice.

Antioxidant defense mechanisms of endothelial cells and renal tubular epithelial cells in vitro: role of the glutathione redox cycle and catalase.

[Purification and properties of NAG A from human kidney].

Chemical modification of Glu-953 of the alpha chain of Na⁺,K⁽⁺⁾-ATPase associated with inactivation of cation occlusion.

NTP technical report on the toxicity studies of para-Chloro-alpha,alpha,alpha Trifluorotoluene (CAS NO: 98-56-6) Administered in Corn Oil and alpha-Cyclodextrin to F344/N Rats and B6C3F1 Mice in 14-Day Comparative Gavage Studies.

Metabolism of an imidazole fungicide (prochloraz) in the rat after oral administration.

Arsenic concentrations in tissues and body fluids of dogs on chronic low-level dietary sodium arsenite.

Molecular cloning of rat prostate transglutaminase complementary DNA. The major androgen-regulated protein DP1 of rat dorsal prostate and coagulating gland.

The primary structure of the flavoprotein D-aspartate oxidase from beef kidney.

Relation between airborne arsenic trioxide and urinary excretion of inorganic arsenic and its methylated metabolites.

Comparison of the effect of a mitochondrial uncoupler, 2,4-dinitrophenol and adrenaline on oxygen radical production in the isolated perfused rat liver.

Cyclophosphamide cystitis in rats: involvement of capsaicin-sensitive primary afferents.

Primary structure of hemocyanin subunit c from *Panulirus interruptus*.

Immunochemical analysis of human kidney reticulins.

[The mechanism of the renal excretion of disopyramide in rats. I].

Perinatal changes in the coupling of beta 1- and beta 3 adrenergic receptors to brown fat adenylyl cyclase.

NTP Toxicology and Carcinogenesis Studies of Methyl Bromide (CAS: 74-83-9) in B6C3F1 Mice (Inhalation Studies).

Flavin-containing monooxygenase-dependent stereoselective S-oxygenation and cytotoxicity of cysteine S-conjugates and mercapturates.

Liquid flow across the epithelium of the artificially perfused lung of fetal and postnatal sheep.

Serotonin and norepinephrine vasoconstriction in rat hindlimb have different oxygen requirements.

[Thermal distribution in the agar phantom by a new intracavitary RF applicator for prostate gland].

Purification and localization of brain-type creatine kinase in sodium chloride transporting epithelia of the spiny dogfish, *Squalus acanthias*.

An automated in vitro dermal absorption procedure: II. Comparative in vivo and in vitro dermal absorption of the herbicide fenoxaprop-ethyl (HOE 33171) in rats.

NTP Toxicology and Carcinogenesis Studies of Monochloroacetic Acid (CAS No. 79-11-8) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Amino acid sequence analyses of non-AA proteins from amyloid fibrils of bovine kidney.

Urinary excretion of o-cresol and hippuric acid after toluene exposure in rotogravure printing.

Tissue distribution of monochloroacetic acid and its binding to albumin in rats.

Brain microdialysis study of the effects of hazardous chemicals on the central nervous system. 1.
Changes in monoamine metabolites induced by cerebral methyl bromide administration measured by two-probe microdialysis (TPMD) method.

Failure of CAPD patients to respond to an oral iron absorption test.

Contrasting influences of central and peripheral opioids on cardiac baroreflex sensitivity in rabbits.

[Production of monoclonal antibody against diquat and its application for forensic medicine].

Pentachlorophenol toxicokinetics after intravenous and oral administration to rat.

Paraquat poisoning: findings on chest radiography and CT in 42 patients.

2,4-D toxicosis.III: An attempt to produce 2,4-D toxicosis in dogs on treated grass plots.

2,4-D toxicosis.II: A pilot study of clinical pathologic and electroencephalographic effects and residues of 2,4-D in orally dosed dogs.

Free radical-induced carbonyl content in protein of estrogen-treated hamsters assayed by sodium boro[³H]hydride reduction.

Oncogenicity study of trifluralin in B6C3F1 mice.

Comparison of one-electron reduction activity against the bipyridylum herbicides, paraquat and diquat, in microsomal and mitochondrial fractions of liver, lung and kidney (in vitro).

[Acute renal failure in surgical and emergency patients].

[Acute renal failure induced by non-drug chemical agents and contrast media].

Morphological effects of acute and chronic atrazine exposure in rainbow trout (*Oncorhynchus mykiss*).

Cytogenetic biomonitoring of an Italian population exposed to pesticides: chromosome aberration and sister-chromatid exchange analysis in peripheral blood lymphocytes.

[A case of suicide suspected of poisoning from taking some agricultural chemicals].

A fatal case of parenteral paraquat poisoning.

[Elevated pentachlorophenol in urine following Fungifen therapy].

Protective effect of taurine against acute paraquat intoxication in rats.

Taiwan National Poison Center survey of glyphosate--surfactant herbicide ingestions.

Protective effects of dextran sulfate and polyvinyl sulfate against acute toxicity of paraquat in mice.

Effects of acute 2,4-dichlorophenoxyacetic acid intoxication on some rat serum components and enzyme activities.

Uroprotection in patients receiving cyclophosphamide and ifosfamide.

Acute poisoning with a glyphosate-surfactant herbicide ('Roundup'): a review of 93 cases.

Cyclophosphamide-associated carcinoma of urothelium: modalities for prevention.

Enhanced lipid peroxidation is not necessary for induction of metallothionein-I by oxidative stress.

Dose-dependent increases in metallothionein synthesis in the lung and liver of paraquat-treated rats.

Tissue peroxidase in the normal and neoplastic salivary gland.

Hydrogen peroxide and ischemic renal injury: effect of catalase inhibition.

Residues of pentachlorophenol and other chlorinated contaminants in human tissues: analysis by electron capture gas chromatography and electron capture negative ion mass spectrometry.

Increase in metallothionein produced by chemicals that induce oxidative stress.

Metabolism of the thiocarbamate herbicide SUTAN in rats.

Occupational and environmental exposure to arsenic--increased urinary arsenic level in children.

Effects of Fe²⁺, Fe³⁺ and desferrioxamine on paraquat accumulation by rabbit kidney cortex slices.

Propachlor-S-glutathione metabolism by kidneys and ureters of calves.

[Results of the toxicokinetics of bromoxynil in rats].

Occupational exposure of forest workers to glyphosate during brush saw spraying work.

Urinary excretion of acetylcyanamide in rat and human after oral and dermal application of hydrogen cyanamide (H₂N₂CN).

Effect of pentachlorophenol on the activation of 2,6-dinitrotoluene to genotoxic urinary metabolites in CD-1 mice: a comparison of GI enzyme activities and urine mutagenicity.

Biological monitoring of 2,4-dichlorophenoxyacetic acid-exposed workers in agriculture and forestry.

Reversibility of the inhibitory effect of atrazine and lindane on cytosol 5 alpha-dihydrotestosterone receptor complex formation in rat prostate.

Cyclic AMP modulates differentially the release of dopamine induced by hypoxia and other stimuli and increases dopamine synthesis in the rabbit carotid body.

[Identification of urinary metabolites in a patient of acute poisoning by p-chloroaniline].

Hemolytic activity of ethylene glycol phenyl ether (EGPE) in rabbits.

Chloracne caused by ingestion of olive oil contaminated with PCDDs and PCDFs.

The acute effects of S-(1,2-dichlorovinyl)-L-cysteine and related chemicals on renal function and ultrastructure in the pentobarbital-anesthetized dog: structure-activity relationships, biotransformation, and unique site-specific nephrotoxicity.

Extracorporeal techniques in the treatment of poisoned patients.

Effect of modulators of glutathione synthesis on the hepatotoxicity of 2-methylfuran.

Ninety-day toxicity study of sodium monochloroacetate in Sprague-Dawley rats.

Dioxin contamination and growth and development in great blue heron embryos.

Hydronephrosis in mice exposed to TCDD-contaminated breast milk: identification of the peak period of sensitivity and assessment of potential recovery.

Evaluation of the persistence of hydronephrosis induced in mice following in utero and/or lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

N-terminal amino-acid sequence of pig kidney dipeptidyl peptidase IV solubilized by autolysis.

TCDD exposure of human embryonic palatal shelves in organ culture alters the differentiation of medial epithelial cells.

Teratogenic effects of 2,3,7,8-tetrabromodibenzo-p-dioxin and three polybrominated dibenzofurans in C57BL/6N mice.

[Determination of beta-N-acetylglucosaminidase and albumin in urine: comparison of methods and effect of gel filtration in human and rat urine].

Roles of UDP-glucuronosyltransferases in chemical carcinogenesis.

Chronic inhalation toxicity and carcinogenicity study of methyl bromide in Wistar rats.

Polycythemia in diabetic patients on CAPD.

Single-dose cyclophosphamide for the prevention of bladder tumor implantation in F344 rats: site of drug activity.

NTP technical report on the toxicity studies of Cresols (CAS Nos. 95-48-7, 108-39-4, 106-44-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Amino-terminal sequence homology of two chick kidney mitochondrial proteins immunisolated with monoclonal antibodies to the cytochrome P450 of 25-hydroxyvitamin D3-1 alpha-hydroxylase.

Chemoprotectants for cancer chemotherapy.

Mitochondrial phosphate transport. Import of the H⁺/Pi symporter and role of the presequence.

Toxicity and tissue distribution of pentachlorophenol and permethrin in pipistrelle bats experimentally exposed to treated timber.

Relative roles of metabolism and renal excretory mechanisms in xenobiotic elimination by fish.

Identification of urinary metabolites in rats treated with p-chloronitrobenzene.

Increased copper concentrations in rat tissues after acute intoxication with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Determination of free concentration of piroxicam and naproxen in plasma. The influence of experimental conditions in equilibrium dialysis.

Quantitation of urinary chlorobenzene metabolites by HPLC: concentrations of 4-chlorocatechol and chlorophenols in urine and of chlorobenzene in biological specimens of subjects exposed to chlorobenzene.

Ten- and ninety-day toxicity studies of 1,2-dichlorobenzene administered by oral gavage to Sprague-Dawley rats.

Urinary excretion of chlorinated phenols in saw-mill workers.

Drug interaction effects on antitumour drugs (VIII): prevention of ifosfamide-induced urotoxicity by disulfiram and its effect on antitumour activity and acute toxicity of alkylating agents in mice.

Characterization of the cytochrome P450 isozyme that metabolizes ochratoxin A, using metabolic inducers, inhibitors and antibodies.

Accumulation and release of adrenaline, and the modulation by adrenaline of noradrenaline release from rabbit blood vessels in vitro.

Factors influencing the protein binding of bumetanide using an equilibrium dialysis technique.

Characterization of the renal effects and renal elimination of sulotroban in the dog.

Inducible bilirubin-degrading system of rat liver microsomes: role of cytochrome P450IA1.

The metabolism and excretion of prochloraz, an imidazole-based fungicide, in the rat.

Identification of cysteine residues in lamb kidney (Na,K)-ATPase essential for ouabain binding.

Pig kidney 3,4-dihydroxyphenylalanine (dopa) decarboxylase. Primary structure and relationships to other amino acid decarboxylases.

The liver, kidney, and thyroid toxicity of chlorinated benzenes.

Meprin-A and -B. Cell surface endopeptidases of the mouse kidney.

Development and validation of a fluoroimmunoassay for urinary normetanephrine.

Mitochondrial 3-2trans-Enoyl-CoA isomerase. Purification, cloning, expression, and mitochondrial import of the key enzyme of unsaturated fatty acid beta-oxidation.

[Uptake of adrenaline by rat brain synaptosomes. Effects of several psychotropic drugs].

Uptake of glutathione by renal cortical mitochondria.

In vitro identification of a soluble protein:geranylgeranyl transferase from rat tissues.

The pyrimido-pyrimidine derivative RA-642: a potent inhibitor of ferrous-induced lipid peroxidation in cell membranes.

Metabolism of ¹⁴C-dichloroethyne in rats.

Protamine-coated Cuprophan. A potential nonthrombogenic hemodialysis membrane with improved blood compatibility.

Interaction between dietary vitamin A and single oral doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the TCDD-induced toxicity and on the vitamin A status in the rat.

Evidence for the formation of a known toxin, p-cresol, from menthofuran.

Calcium binding to human platelet integrin GPIIb/IIIa and to its constituent glycoproteins. Effects of lipids and temperature.

Differential effects of insulin, epinephrine, and glucagon on rat hepatocyte mitochondrial activity.

Transport of organic cations by a renal epithelial cell line (OK).

Transport of cyclosporin A in kidney epithelial cell line (LLC-PK1).

Cytotoxicity of alkylating agents in isolated rat kidney proximal tubular and distal tubular cells.

Pre-embarkment prognostication for acute paraquat poisoning.

Haemodialysis/haemoperfusion in paraquat poisoning.

[Exposure to agricultural chemicals and oncogenic risk].

Effects of pentachlorophenol and other chemical preservatives on the health of wood-treating workers in Hawaii.

Paraquat poisoning. An overview of the current status.

Toxicokinetics of monochloroacetic acid: a whole-body autoradiography study.

[The effect of chronic butyphos poisoning on protein and nucleic acid synthesis in various rat organs and activity of blood cholinesterase].

Urinary paraquat in acute intoxication.

Initial accumulation of paraquat in the heart leading to acute death.

Chronic toxicity of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in mice.

[Use of extracorporeal circulation in the treatment of 2,4-dichlorophenoxyacetic acid poisoning].

Toxicokinetics of paraquat in humans.

Paraquat pharmacokinetics using a subcutaneous toxic low dose in the rat.

[Distribution and elimination of C-14-2,4-dichlorophenoxyacetic acid (2,4 D) in rat tissues in acute poisoning].

Biological valuation of extra-corporeal techniques in acute poisoning.

Determination of diquat in biological materials by electron spin resonance spectroscopy.

Free malondialdehyde levels in the urine of rats intoxicated with paraquat.

The effects of lindane and linuron on calcium metabolism, bone morphometry and the kidney in rats.

Effect of beta-naphthoflavone and MCPA on liver and kidney drug-metabolizing enzymes from the carp, *Cyprinus carpio*.

Fibronectin-mediated Calmette-Guerin bacillus attachment to murine bladder mucosa. Requirement for the expression of an antitumor response.

Alterations of arachidonate metabolism in cardiovascular system by cigarette smoking.

Effects of skin preapplication treatments and postapplication cleansing agents on dermal absorption of 2,4-dichlorophenoxyacetic acid dimethylamine by Fischer 344 rats.

Renal processing of glutathione conjugates by rat, chicken, pig and calf.

Immunohistochemical localization and dynamics of paraquat in small intestine, liver and kidney.

Pharmacokinetics and metabolism of triclopyr (3,5,6-trichloro-2-pyridinyloxyacetic acid) in Fischer 344 rats.

Effects of sulfur-containing metabolites of hexachlorobenzene on the heme metabolic enzymes in rat liver.

Metabolism of the glutathione conjugate of propachlor by in situ perfused kidneys and livers of rats.

Effects of dose, age, inhibition of metabolism and elimination on the toxicokinetics of 2-butoxyethanol and its metabolites.

[Negativation of tissue paraquat levels under continuous arteriovenous hemodialysis after accidental poisoning].

Dermal absorption of the phenoxy herbicides 2,4-D, 2,4-D amine, 2,4-D isooctyl, and 2,4,5-T in rabbits, rats, rhesus monkeys, and humans: a cross-species comparison.

Role of xanthine oxidase in ethanol-induced lipid peroxidation in rats.

Effects of acrolein on human platelet aggregation.

Accumulation and metabolism of 2,4,6-trichlorophenyl-4'-aminophenyl ether by carp.

Electron dense artefactual deposits in tissue sections: the role of ethanol, uranyl acetate and phosphate buffer.

TCDD-induced altered expression of growth factors may have a role in producing cleft palate and enhancing the incidence of clefts after coadministration of retinoic acid and TCDD.

Reactive oxygen metabolites in endotoxin-induced acute renal failure in rats.

A critical review of the developmental toxicity and teratogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: recent advances toward understanding the mechanism.

The effect of TCDD on acyl CoA:retinol acyltransferase activity and vitamin A accumulation in the kidney of male Sprague-Dawley rats.

Thermogenesis and thermoregulatory function of iron-deficient women without anemia.

[Excretion of phenol and p-cresol in the urine in fasting obese individuals and in persons treated with total enteral nutrition].

Immunoglobulin heavy-chain-associated amyloidosis.

Oxygen extraction in lamb skeletal muscle.

Characterization of the peak period of sensitivity for the induction of hydronephrosis in C57BL/6N mice following exposure to 2,3,7, 8-tetrachlorodibenzo-p-dioxin.

Two cases of acute toluene intoxication.

Occupation and the risk of bladder cancer.

Characterization of ATP and calmodulin-binding properties of a truncated form of Bacillus anthracis adenylate cyclase.

Rat embryonic palatal shelves respond to TCDD in organ culture.

[Effect of monoamine neurotransmitters in the hypothalamus in a cortisol-induced rat model of yang-deficiency].

Hormone-dependent phosphorylation of the glucocorticoid receptor occurs mainly in the amino-terminal transactivation domain.

Molecular cloning of a cDNA encoding a major pathogenic domain of the Heymann nephritis antigen gp330.

A 42-kD tyrosine kinase substrate linked to chromaffin cell secretion exhibits an associated MAP kinase activity and is highly related to a 42-kD mitogen-stimulated protein in fibroblasts.

Ethylene dichloride: the influence of disulfiram or ethanol on oncogenicity, metabolism, and DNA covalent binding in rats.

Tissue distribution, metabolism, and excretion of 14C-TCDD in a TCDD-susceptible and a TCDD-resistant rat strain.

Unintentional methyl bromide gas release--Florida, 1988.

Heat shock and arsenite increase expression of the multidrug resistance (MDR1) gene in human renal carcinoma cells.

Effects of TCDD on embryonic ureteric epithelial EGF receptor expression and cell proliferation.

Epidemic hypotension in a dialysis center caused by sodium azide.

Urinary levels of proteins and metabolites in workers exposed to toluene. A cross-sectional study.

Epidemiologic studies of cancer in agricultural workers.

Absorption, distribution, excretion and metabolism of a single oral dose of [14C]tri-o-cresyl phosphate (TOCP) in the male rat.

Effects of glutathione depletion on the acute nephrotoxic potential of arsenite and on arsenic metabolism in hamsters.

Alteration in protein synthesis in primary cultures of rat kidney proximal tubule epithelial cells by exposure to gallium, indium, and arsenite.

Memory consolidation of weak training experiences by hormonal treatments.

Effects of the food mutagens MeIQx and PhIP on the expression of cytochrome P450IA proteins in various tissues of male and female rats.

Metabolism and covalent binding of [14C]toluene by human and rat liver microsomal fractions and liver slices.

myo-inositol oxygenase from rat kidneys. Substrate-dependent oligomerization.

Characterization of the interaction of parathyroid hormone with the mitochondrial ATPase.

Self-catalyzed irreversible inactivation of rat hepatic aryl sulfotransferase IV by N-hydroxy-2-acetylaminofluorene.

Changes in rat brain monoamines, monoamine metabolites and histamine after a single administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Interaction of Mesna (2-mercaptoethane sulfonate) with the mutagenicity of cyclophosphamide in vitro and in vivo.

Evidence for the absence of cysteine S-conjugate N-acetyltransferase activity in the metabolism of propachlor, naphthalene, and dichlobanil in calves.

[Ifosfamide-induced urinary bladder lesion and its inhibition by mesna].

Norepinephrine and BRL 37344 stimulate adenylate cyclase by different receptors in rat brown adipose tissue.

Contact site between inner and outer mitochondrial membrane: a dynamic microcompartment for creatine kinase activity.

Inorganic arsenic methylation by rat tissue slices.

Complete amino acid sequence of rat kidney ornithine aminotransferase: identity with liver ornithine aminotransferase.

The role of cytochromes P-450 and flavin-containing monooxygenase in the metabolism of (S)-nicotine by rabbit lung.

Glutathione enhancement in various mouse organs and protection by glutathione isopropyl ester against liver injury.

Sequence analysis, tissue distribution and regulation by cell depolarization, and second messengers of bovine secretogranin II (chromogranin C) mRNA.

³¹P NMR studies of ATP concentrations and Pi-ATP exchange in the rat kidney in vivo: effects of inhibiting and stimulating renal metabolism.

[Locomotor activity and urinary excretion of orthocresol in rats exposed to toluene].

Sodium-dependent phosphate transport in primary cultures of renal tubule cells from young and adult rats.

Age-related DNA modifications (I-compounds): modulation by physiological and pathological processes.

Selective affinity labeling of a 27-kDa integral membrane protein in rat liver and kidney with N-bromoacetyl derivatives of L-thyroxine and 3,5,3'-triiodo-L-thyronine.

2,3,7,8-Tetrachlorodibenzo-p-dioxin pretreatment of female mice altered tissue distribution but not hepatic metabolism of a subsequent dose.

NTP Toxicology and Carcinogenesis Studies of Iodinated Glycerol (Organidin(R)) (CAS No. 5634-39-9) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Oxidant-induced haemoprotein degradation in rat tissue slices: effect of bromotrichloromethane, antioxidants and chelators.

Effects of TCDD on vitamin A status and liver microsomal enzyme activities in a TCDD-susceptible and a TCDD-resistant rat strain.

Effect of gel filtration on urinary N-acetyl-beta-D-glucosaminidase activity measured by the m-cresolsulfonphthaleinyl procedure.

Glutathione conjugation and cytochrome P-450 metabolism of methyl chloride in vitro.

Sodium-azide-evoked noradrenaline release from peripheral nerves of rabbit pulmonary artery.

Exposure to toluene increases the urinary excretion of D-glucaric acid.

Characteristics of apical Cl-HCO₃ exchanger of bicarbonate-secreting cells in turtle bladder.

Oxidative stress induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

DNA cleavage by phenylhydroquinone: the major metabolite of a fungicide o-phenylphenol.

Hepatotoxin-induced hypertauninuria: a proton NMR study.

Disposition, elimination, and metabolism of tri-o-cresyl phosphate following daily oral administration in Fischer 344 male rats.

Pre-natal (segment II) toxicity study of cinnamic aldehyde in the Sprague-Dawley rat.

Diquat hepatotoxicity in the Fischer-344 rat: the role of covalent binding to tissue proteins and lipids.

Total exclusion from external respiration protects lungs from development of fibrosis after paraquat intoxication.

Oral and dermal pharmacokinetics of triclopyr in human volunteers.

HPLC measurement of chlorophenoxy herbicides, bromoxynil, and ioxynil, in biological specimens to aid diagnosis of acute poisoning.

[Failure of a cyclophosphamide-dexamethasone combination in paraquat poisoning].

[Clinical studies on paraquat poisoning; prognosis and severity index of paraquat poisoning using the urine levels].

[Evaluation of the capability of 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine and pyridine derivatives to evoke parkinsonism].

Effects of preconceptional and gestational exposure to Tordon 202c on fetal growth and development in CD-1 mice.

Preventive effect of taurine against acute paraquat intoxication in beagles.

Penetration studies and residue determinations of 2,4-dichlorophenoxyacetic acid butyl ester in fertile hen eggs and chicks hatched from treated eggs.

Urological complications of cyclophosphamide.

Paraquat poisoning with acute renal failure--a case report.

Production and toxicological application of anti-paraquat antibodies.

Rat urinary bladder epithelial lesions induced by acrolein.

Effect of paraquat administered intraperitoneally on the nonpolar lipids of rabbits.

[Paraquat and diquat: mechanisms of toxicity].

Determination of paraquat in raw and formalin-fixed tissues by electron spin resonance (ESR) spectroscopy.

The relation between the oxidative biotransformation of hexachlorobenzene and its porphyrinogenic activity.

Enhanced in vivo H₂O₂ generation by rat kidney in glycerol-induced renal failure.

Brain biogenic amine levels after methanol administration: possible mechanism of action on central monoaminergic neurons in discrete areas of brain in Wistar rat.

The role of sulfation in the metabolic activation of N-hydroxy-4'-fluoro-4-acetylamino-biphenyl.

Hydroxylamine is a vasorelaxant and a possible intermediate in the oxidative conversion of L-arginine to nitric oxide.

Renal handling of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in rats.

Inhibition of paraquat accumulation in rabbit kidney cortex slices by ascorbic acid.

Contraluminal organic anion and cation transport in the proximal renal tubule: V. Interaction with sulfamoyl- and phenoxy diuretics, and with beta-lactam antibiotics.

N-methylation as a toxication route for xenobiotics. II. In vivo formation of N,N'-dimethyl-4,4'-bipyridyl ion (paraquat) from 4,4'-bipyridyl in the guinea pig.

Metallothionein-I accumulation in the rat lung following a single paraquat administration.

In vivo generation of hydrogen peroxide by rat kidney cortex and glomeruli.

Disposition of 2,4-dichlorophenoxyacetic acid dimethylamine by Fischer 344 rats dosed orally and dermally.

Catalase is needed to avoid tissue peroxidation in *Rana perezi* in normoxia.

Biological monitoring of arsenic exposure of gallium arsenide- and inorganic arsenic-exposed workers by determination of inorganic arsenic and its metabolites in urine and hair.

Effects of the beta-isomer of hexachlorocyclohexane on estrogen-sensitive human mammary tumor cells.

Effect of tetrachlorodibenzo-p-dioxin (TCDD) on the glucuronidation of retinoic acid in the rat.

Mechanism of tolerance to renal ischemia in harbor seal: role of membranes.

Iron management during recombinant human erythropoietin therapy.

Teratology of 2,3,7,8-tetrachlorodibenzo-p-dioxin in a complex environmental mixture from the love canal.

Cellular alterations and enhanced induction of cleft palate after coadministration of retinoic acid and TCDD.

Iron deficiency among active men.

From the Food and Drug Administration.

Retinoic acid and 2,3,7,8-tetrachlorodibenzo-p-dioxin selectively enhance teratogenesis in C57BL/6N mice.

Developmental toxicity of perfluorodecanoic acid in C57BL/6N mice.

Separation methods for the study of collagen and treatment of collagen disorders.

Histopathological effects of monosodium methanearsonate (MSMA) on New Zealand white rabbits (*Oryctolagus cuniculus*).

Reversible downregulation of thiazide diuretic receptors by acute renal ischemia.

Iron status in patients receiving erythropoietin for dialysis-associated anemia.

Psychosocial determinants of compliance in adolescents with iron deficiency.

A pharmacological approach to cellular mechanisms of PGI₂-induced gastric cytoprotection on ethanol-induced gastric mucosal damage in rats.

A comparison of exposure estimates by worker raters and industrial hygienists.

Very high water permeability in vasopressin-induced endocytic vesicles from toad urinary bladder.

Phorbol myristate acetate inhibits acidification by turtle urinary bladder.

The neutrophil chemoattractant produced by the rat kidney epithelioid cell line NRK-52E is a protein related to the KC/gro protein.

[The induction of the beta state of the comuton regulation of mitochondrial oxidative phosphorylation by 2,4-DNP and malonate].

Effect of dietary lipids and vitamin E on in vitro lipid peroxidation in rat liver and kidney homogenates.

Marked alterations in retinoid homeostasis of Sprague-Dawley rats induced by a single i.p. dose of 10 micrograms/kg of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Purification of recombinant human tissue factor.

Preparation of a volatile derivative of taurine and application to gas chromatographic determination of urinary taurine.

Plasma concentrations of pituitary hormones in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated male rats.

Variable porosity of the mitochondrial inner membrane induced by energization.

Sulphotransferase-mediated activation of the carcinogen 5-hydroxymethyl-chrysene. Species and sex differences in tissue distribution of the enzyme activity and a possible participation of hydroxysteroid sulphotransferases.

Effects of the new nitrosoarea derivative, fotemustine, on the glutathione reductase activity in rat tissues in vivo and in isolated rat hepatocytes.

Immunocytochemical localization of intracellular acidic compartments: rat proximal nephron.

[Urinary bioavailability of sodium-2-mercaptoethanesulfonate (Uromitexan) following intravenous, subcutaneous and continuous subcutaneous administration].

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters embryonic palatal medial epithelial cell differentiation in vitro.

Intestinal-like alkaline phosphatase expressed in normal human adult kidney.

Presence of multiple species of polypeptides immunologically related to transcription factor TFIIIA in adult *Xenopus* tissues.

Characterization of multiple forms of the Ah receptor: comparison of species and tissues.

Homology between the cDNAs encoding phosphoprotein p19 and SCG10 reveals a novel mammalian gene family preferentially expressed in developing brain.

Modulation of benthocarb in vitro inhibited neonate rat (Wistar strain) brain Na⁺K⁺-ATPase by norepinephrine.

Stimulation of in vivo hepatic uptake and in vitro hepatic binding of [125I]2-Iodo-3,7,8-trichlorodibenzo-p-dioxin by the administration of agonist for the Ah receptor.

Metabolic activation and nucleic acid binding of acetaminophen and related arylamine substrates by the respiratory burst of human granulocytes.

Urinary arsenic concentrations and speciation in Cornwall residents.

FDA safety alert: sodium azide contamination of hemodialysis water supplies.

[Application of high-pressure liquid chromatography in the analysis of urinary metabolites of aromatic solvents].

Decreased ligand binding to the hepatic glucocorticoid and epidermal growth factor receptors after 2,3,4,7,8-pentachlorodibenzofuran and 1,2,3,4,7,8-hexachlorodibenzofuran treatment of pregnant mice.

Acetazolamide inhibits acidification by the turtle bladder independent of cell pH.

Iron stimulation of free radical-mediated porphyrinogen oxidation by hepatic and renal mitochondria.

Multiple forms of recombinant murine interleukin-4 expressed in COS-7 monkey kidney cells.

In vivo and in vitro studies of the hepatotoxic effects of 4-chlorophenol in mice.

NTP Toxicology and Carcinogenesis Studies of Two Pentachlorophenol Technical-Grade Mixtures (CAS No. 87-86-5) in B6C3F1 Mice (Feed Studies).

Analysis of the hyperpolarizing effect of catecholamines on canine cardiac Purkinje fibres.

Influence of 2,3-dimercaptopropane-1-sulfonate and dimercaptosuccinic acid on the mobilization of mercury from tissues of rats pretreated with mercuric chloride, phenylmercury acetate or mercury vapors.

Comparison of in vitro, animal, and clinical determinations of iron bioavailability: International Nutritional Anemia Consultative Group Task Force report on iron bioavailability.

Molecular differences between rat-liver and rat-kidney biliverdin reductase. Implications for their in vivo regulation.

Effect of splenectomy on heparin treatment in allyl-alcohol-traumatized rat liver.

[Method for simultaneous determination of six metabolites of toluene, xylene and ethylbenzene, and its application to exposure monitoring of workers in a printing factory with gravure machines].

The use of multiple endpoints to define the mechanism of action of reproductive toxicants and germ cell mutagens.

[Modification of the toxic effects of phenylmercury by adaptive reactions of the rat kidney. 2. Adaptation to phenylmercury acetate, cadmium chloride and cupric chloride].

[The modification of the toxic effects of phenyl mercury by the adaptive reactions of the rat kidney. 1. Timely development of adaptation].

Human urinary kallikrein: amino acid sequence and carbohydrate attachment sites.

Human urinary prokallikrein--structural analysis on activation mechanism.

[Levels of metabolites of selected chemical compounds in the urine of workers in pitch coke plant].

Sodium-azide-evoked noradrenaline and catecholamine release from peripheral sympathetic nerves and chromaffin cells.

Characteristics of chloride ion influx in *Amphiuma* small intestine.

Synthesis and regional mouse brain distribution of [¹¹C]nisoxetine, a norepinephrine uptake inhibitor.

Pig kidney dopa decarboxylase: inactivation by iodoacetamide and sequence of the carboxyamidomethylcysteine-containing peptide.

Health and reproductive outcomes among American Legionnaires in relation to combat and herbicide exposure in Vietnam.

Effects of sodium 2,4-dichlorophenoxyacetate on renal function in the rat.

[Morphologic and histoenzymatic studies of rat kidneys after acute 2,4-dichlorophenoxyacetic acid (2,4-D) poisoning].

Functional teratogens of the rat kidney. II. Nitrofen and ethylenethiourea.

Functional teratogens of the rat kidney. I. Colchicine, dinoseb, and methyl salicylate.

Influence of bipyridylium compounds on microsomal mixed-function oxidation activities.

Brain damage due to paraquat poisoning: a fatal case with neuropathological examination of the brain.

Paraquat poisoning: biological presentation.

Oxidant stress following renal ischemia: changes in the glutathione redox ratio.

Lipid peroxidation and tissue injury by ferric citrate in paraquat-intoxicated mice.

Toxicity and distribution of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in developing chick embryos.

Marked hypocalcemia in a fatal poisoning with chlorinated phenoxy acid derivatives.

[Failure of chemotherapy and radiotherapy in pulmonary fibrosis caused by paraquat].

Immune-mediated glomerulonephritis after exposure to paraquat.

Failure of haemoperfusion and haemodialysis to prevent death in paraquat poisoning. A retrospective review of 42 patients.

Host defence mechanisms in the bladder. II. Disruption of the layer of mucus.

Protective effect of alpha-human atrial natriuretic polypeptide (alpha-hANP) on chemical-induced pulmonary edema.

DNA damage in stomach, kidney, liver and lung of rats treated with atrazine.

Urinary atrazine metabolites as indicators for rat and human exposure to atrazine.

Effect of 4-hydroxy-2,3-trans-nonenal on platelet function.

Organ-specific effects of long term feeding of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 1,2,3,7,8-pentachlorodibenzo-p-dioxin on I-compounds in hepatic and renal DNA of female Sprague-Dawley rats.

Significance of fibrin/fibrinogen related antigen in glomeruli in children with IgA nephropathy.

Toxicology and pathology of methyl bromide in F344 rats and B6C3F1 mice following repeated inhalation exposure.

Endogenous opiate modulation of baroreflexes in normotensive and hypertensive rats.

Steroid hormones and medications that alter cancer risks.

Comparative acute systemic toxicity of sodium arsenite and dichloro(2-chlorovinyl)arsine in rabbits.

Intraglomerular deposition of fibrin/fibrinogen-related antigen in children with various renal diseases.

Kappa/lambda immunoglobulin distribution in Graves' thyroid-stimulating antibodies. Simultaneous analysis of C lambda gene polymorphisms.

(De)phosphorylation agents influence 5 alpha-reduction of testosterone in human prostate.

Intermediary metabolism of 2,6-dichlorobenzonitrile (dichlobenil) in chickens and growth of chickens fed dichlobenil.

The significance of the dilated renal pelvis in the nitrofen-exposed rat fetus: effects on morphology and function.

Microbial amino acid metabolites and bladder cancer: no evidence of promoting activity in man.

Selective alteration in blood-brain barrier and insulin transport in iron-deficient rats.

Reversal of transformed phenotypes by herbimycin A in src oncogene expressed rat fibroblasts.

A crucial role of ongoing anaerobic glycolysis in attenuating acute ischemia-induced release of myocardial noradrenaline.

Species differences in 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity and biotransformation in fish.

Synthetic peptides corresponding to protective epitopes of Escherichia coli digalactoside-binding pilin prevent infection in a murine pyelonephritis model.

Abnormal methylation capacity in human liver cirrhosis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxicity in yellow perch (*Perca flavescens*).

Morphologic lesions and acute toxicity in rainbow trout (*Salmo gairdneri*) treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Synthesis of ¹¹C-methylated inulin as a radiopharmaceutical for imaging brain edema and pulmonary edema.

Validity and reliability of a method for retrospective evaluation of chlorophenolate exposure in the lumber industry.

Panulirus interruptus hemocyanin. The amino acid sequence of subunit b and anomalous behaviour of subunits a and b on polyacrylamide gel electrophoresis in the presence of SDS.

Quantitative evaluation of collagen fractions separated by acrylamide gel electrophoresis: its application for collagen typing in normal and pathological tissues.

NTP Toxicology and Carcinogenesis Studies of C.I. Acid Orange 3 (CAS No. 6373-74-6) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Subchronic metabolic effects and toxicity of a simulated pulp mill effluent on juvenile lake trout, *Salmo trutta m. lacustris*.

Organic cation uptake by a cultured renal epithelium.

Assessment of the relative hazard involved with airborne irritants with additional hepatotoxic or nephrotoxic properties in mice.

Hydroperoxide metabolism of amphibia: tissue catalases of leopard frogs.

Micromethods in single muscle fibers. 1. Determination of catalase and superoxide dismutase.

Oxidation of N-butyl-N-(3-formylpropyl)nitrosamine to N-butyl-N-(3-carboxypropyl)nitrosamine in rat liver and inhibition by disulfiram.

Ifosfamide and mesna: marginally active in patients with advanced carcinoma of the pancreas.

Gas chromatographic determination of sulfuric acid and application to urinary sulfate.

The metabolism of acetaldehyde and not acetaldehyde itself is responsible for in vivo ethanol-induced lipid peroxidation in rats.

Metabolites of [³-¹³C]1,2-dibromo-3-chloropropane in male rats studied by ¹³C and ¹H-¹³C correlated two-dimensional NMR spectroscopy.

Purification and characterization of the Mg²⁺-ATPase from rabbit skeletal muscle transverse tubule.

Renal handling of amino acid ^{99m}technetium chelates.

The beta-subunit of the bovine mitochondrial F₁ ATPase specifically binds the amino terminal domain of parathyroid hormone.

Analysis of the in vivo phosphorylation state of rabbit skeletal muscle glycogen synthase by fast-atom-bombardment mass spectrometry.

NTP Toxicology and Carcinogenesis Studies of Monuron (CAS No. 150-68-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Hepatotoxicity of cyclophosphamide in man: pharmacokinetic analysis.

Primary structure of a non-secretory ribonuclease from bovine kidney.

Autoradiographic studies of the renal clearance of circulating type I collagen fragments in the rat.

Plasma gamma-hexachlorocyclohexane concentrations in forestry workers exposed to lindane.

Immunological characterization of thioltransferase from pig liver.

Partial characterization of specific cantharidin binding sites in mouse tissues.

Biosynthesis, import and processing of precursor polypeptides of mammalian mitochondrial pyruvate dehydrogenase complex.

The use of in vivo brain dialysis of dopamine, acetylcholine, amino acids and lactic acid in studies on the neurotoxin 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP).

Purification, properties, and immunochemical localization of a receptor for intrinsic factor-cobalamin complex in the rat kidney.

A kidney perfusion method for metabolism studies with chickens using propachlor as a model.

Elevation of acetylpolyamine levels in mouse tissues, serum and urine after treatment with radical-producing drugs and lipopolysaccharide.

Amino acid sequences of the human kidney cathepsins H and L.

Extracellular lactic acid as an indicator of brain metabolism: continuous on-line measurement in conscious, freely moving rats with intrastriatal dialysis.

Purification and characterization of two kinds of low molecular weight kininogens from rat (non-inflamed) plasma. One resistant and the second sensitive to rat glandular kallikreins.

Relationship between exposure to toluene and excretion of urinary metabolites in Korean female solvent workers.

[Cases of severe methyl bromide poisoning residing above a warehouse].

Comparison of the action of epinephrine and a respiratory chain uncoupler, 2,4-dinitrophenol, on Ca²⁺-mobilization in isolated hepatocytes and perfused livers.

Accumulation of aluminum by rabbit renal cortex.

Mutual metabolic suppression between benzene and toluene in man.

Renal metabolic/excretory coupling.

Effects of phenolic dental medicaments on prostaglandin synthesis by microsomes of bovine tooth pulp and rabbit kidney medulla.

Uptake, distribution, and metabolism of trivalent arsenic in the pregnant mouse.

Nephrotoxicity of orellanine, a toxin from the mushroom *Cortinarius orellanus*.

Current status of thrombopoietin.

[Kidney damage after peroral poisoning with herbicides].

Acute, pharmacokinetic, and subchronic toxicological studies of 2,4-dichlorophenoxyacetic acid.

Ontogeny of swimming behavior and brain catecholamine turnover in rats prenatally exposed to a mixture of 2,4-dichlorophenoxyacetic and 2,4,5-trichlorophenoxyacetic acids.

[Paraquat poisoning treated with hemoperfusion].

Evaluation of paraquat concentrations in paraquat poisoning.

Paraquat (gramoxone) poisoning in south-west Hungary, 1977-1984. Toxicological and histopathological aspects of group intoxication cases.

Primary cultures of rat aortic endothelial and smooth muscle cells: I. An in vitro model to study xenobiotic-induced vascular cytotoxicity.

[Therapy of paraquat poisoning].

Haemodialysis for paraquat poisoning.

Indirect influence of s-triazines on rat gonadotropic mechanism at early postnatal period.

Repeated hemoperfusion and continuous arteriovenous hemofiltration in a paraquat poisoned patient.

Elimination of paraquat.

The search for ideal antidote treatment in Gramoxone intoxication.

Metabolic basis of ethylene glycol monobutyl ether (2-butoxyethanol) toxicity: role of alcohol and aldehyde dehydrogenases.

In vivo metabolism of the cardiovascular toxin, allylamine.

Evidence for involvement of non-biliary excretion into the intestines in the formation of methylsulphonyl-containing metabolites of 2-chloro-N-isopropylacetanilide (propachlor) by swine and rats.

Determination of paraquat in tissue using ion-pair chromatography in conjunction with spectrophotometry.

Effects of a small dose of ethanol and calcium carbimide-induced acetaldehyde intoxication on human platelet aggregation, associated thromboxane formation and urinary excretion of 2,3-dinor-6-keto prostaglandin F1 alpha.

Nucleic acid content and residue determination in tissues of chicks born from 2,4-dichlorophenoxyacetic butyl ester treated eggs.

Mechanisms of mitochondrial photosensitization by the cationic dye, N,N-bis(2-ethyl-1,3-dioxylene)kryptocyanine (EDKC): preferential inactivation of complex I in the electron transport chain.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on thermogenesis in brown adipose tissue of rats.

The effect of saccharin ingestion on the excretion of microbial amino acid metabolites in rat and man.

Effect of excess iron in milk replacer on calf performance.

Teratogenic effects of polychlorinated dibenzofurans in combination in C57BL/6N mice.

Acidotic alterations in oxidative metabolism influencing rat renal slice ammoniogenesis.

Teratogenicity of three polychlorinated dibenzofurans in C57BL/6N mice.

Renal anaphylaxis. I. Antigen-initiated responses from isolated perfused rat kidney.

Increased thromboplastic potential in diabetes: a multifactorial phenomenon.

Cellular action of arginine vasopressin in the isolated renal tubules of hypothyroid rats.

Enhancement of fibronectin expression by herbimycin A.

TCDD alters the extracellular matrix and basal lamina of the fetal mouse kidney.

TCDD-induced hyperplasia of the ureteral epithelium produces hydronephrosis in murine fetuses.

The effect of arsenic on urethan-induced adenoma formation in Swiss mice.

Catalase in cultured skin fibroblasts from patients with the cerebro-hepato-renal (Zellweger) syndrome: normal maturation in peroxisome-deficient cells.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the lactating rat on maternal and neonatal vitamin A status.

Clinical reports on plasma exchange in the Kidney Center, Tokai University School of Medicine.

Han/Wistar rats are exceptionally resistant to TCDD. I.

Urinary chlorophenols in sawmill workers.

Hippuric acid and ortho-cresol as biological indicators of occupational exposure to toluene.

Assessment of the systemic distribution and toxicity of formaldehyde following pulpotomy treatment: Part two.

Porphyriurias and occupational disease.

Medical, life-style, and occupational risk factors for prostate cancer.

Panulirus interruptus hemocyanin. The elucidation of the complete amino acid sequence of subunit a.

Primary and tertiary structures of the first domain of Panulirus interruptus hemocyanin and comparison of arthropod hemocyanins.

Organic cation secretion in flounder renal tissue.

Metabolism and excretion of gallium arsenide and arsenic oxides by hamsters following intratracheal instillation.

Role of fibronectin on the clearance and tissue uptake of antigen and immune complexes in rats.

Characteristics of H⁺ current transients induced by adverse H⁺ gradient pulses in toad bladder.

Involvement of the prostatic steroid-binding protein in the transfer of ligand to the dioxin receptor.

Methyl bromide alters catecholamine and metabolite concentrations in rat brain.

Histopathology of acute toxic responses in selected tissues from rats exposed by inhalation to methyl bromide.

Phosphate transport by reconstructed monolayers from cultured mouse kidney cells.

3,3',4,4'-Tetrachlorobiphenyl in pregnant mice: embryotoxicity, teratogenicity, and toxic effects on the cultured embryonic thymus.

Amino acid sequence of guinea pig prostate kallikrein.

Fengabine, a novel antidepressant GABAergic agent. II. Effect on cerebral noradrenergic, serotonergic and GABAergic transmission in the rat.

Physiological stress induced by sublethal concentrations of phenolic compounds in *Notopterus notopterus*: measurement of hydrolytic enzymes.

Studies on the mechanism of action of diallyl sulfide, an inhibitor of the genotoxic effects of cyclophosphamide.

Circadian alterations in prolactin, corticosterone, and thyroid hormone levels and down-regulation of prolactin receptor activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Acute toxicity in the guinea pig and in vitro "dioxin-like" activity of the environmental contaminant 1,2,4,5,7,8-hexachloro (9H)xanthene.

Output of bacterial metabolites as a diagnostic means.

Toluene metabolism during exposure to varying concentrations combined with exercise.

[Effect of oxidative metabolism inhibitors on ADH-dependent transport of water in the bladder of *Rana temporaria*].

Differential expression of cytochrome P-450 1 and related forms in rabbit liver and kidney.

The secretory mechanism in adrenal chromaffin cells by nitrophenol compounds: possible involvement of the change in the surface potentials.

[Mitochondrial oxidative phosphorylation in the rat kidney during the perinatal period].

Mechanism of nitrofen teratogenesis.

Tissue levels of atrazine in a case of bovine poisoning.

Acute, 14-day repeated dosing, and 90-day subchronic toxicity studies of potassium picloram.

The toxicity of 2,4-dichlorophenoxyacetic acid to the adult crested newt.

[Treatment of paraquat poisoning. Plasmapheresis versus hemodialysis].

Selenium-dependent glutathione peroxidase inhibitors increase toxicity of prooxidant compounds in chicks.

Pharmacokinetic profile of paraquat following intravenous administration to the rabbit.

Acute group poisoning of paraquat--case report.

Absorption study of pentachlorophenol in persons working with wood preservatives.

Similarity of isozyme pattern of serum lactate dehydrogenase following treatments with O,O,S-trimethyl phosphorothioate and paraquat.

Multicenter evaluation of ultrafiltration, dialysis, and thermal coagulation as sample pretreatment methods for the colorimetric determination of paraquat in blood and tissues.

Subacute atrazine treatment effects on rat renal functions.

Exposure of Finnish farm workers to phenoxy acid herbicides.

Kidney morphology and function in the young of rats malnourished and exposed to nitrofen during pregnancy.

Effects of ascorbic acid in vivo on the fatty acid composition of the tissues of mice treated with Gramoxone.

The effect of light on the toxicity of paraquat in the mouse.

Adjunctive therapy of phenytoin overdose--a case report using plasmaphoresis.

Diquat intoxication: treatment by charcoal haemoperfusion and description of a new method of diquat measurement in plasma.

Elimination of paraquat.

Effects on the fetus of maternal nitrofen exposure in the protein-deprived rat.

Industrial hygiene, chemical and biological assessments of exposures to a chlorinated phenolic sapstain control agent.

Lack of neuropathologic consequences of repeated dermal exposure to 2,4-dichlorophenoxyacetic acid in rats.

Effects of thyroid status on brain catecholamine biosynthesis in adult rats: assessment by a steady-state method.

Studies on benzyl acetate. II. Use of specific metabolic inhibitors to define the pathway leading to the formation of benzylmercapturic acid in the rat.

Dermal exposure and urinary metabolite excretion in farmers repeatedly exposed to 2,4-D amine.

Metabolism of the cinnamon constituent o-methoxycinnamaldehyde in the rat.

Action of some pesticides on T4 to T3 conversion in cultured kidney and liver cells in the presence or absence of cysteine.

Differential inhibition of rat tissue catalase by cyanamide.

[Pentachlorophenol concentrations in the organs and blood of 11 dead infants].

Liquid-chromatographic determination of urinary pentachlorophenol.

Metabolism and disposition of ortho-benzyl-para-chlorophenol in male rats.

Excretion of metabolites of hexachlorobenzene in the rat and in man.

The metabolism of xenobiotics by certain extrahepatic organs and its relation to toxicity.

Effect of chloroacetic acids on the kidneys.

[Production, absorption and excretion of phenols in intestinal obstruction].

Two automated procedures for N-acetyl-beta-D-glucosaminidase determination evaluated for detection of drug-induced tubular nephrotoxicity.

Comparative study of Baralgan and hyoscine-N-methyl bromide in the treatment of intestinal and renal colic pain.

Teratologic evaluation of hexabrominated naphthalenes in C57BL/6N mice.

Strain differences in response of Sprague-Dawley and Long Evans Hooded rats to the teratogen nitrofen.

Mitochondrial phototoxicity sensitized by doxycycline in cultured human carcinoma cells.

Cross-linking of IgE-receptor complexes at the cell surface: a fluorescence method for studying the binding of monovalent and bivalent haptens to IgE.

Effects of thyroid hormones on the induction of cleft palate by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C57BL/6N mice.

Phenotypic change from transformed to normal induced by benzoquinonoid ansamycins accompanies inactivation of p60src in rat kidney cells infected with Rous sarcoma virus.

Health effects of long-term exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Intermediary metabolism of the mature rat following 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment.

Subchronic oral toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the guinea pig: comparisons with a PCB-containing transformer fluid pyrolysate.

1-Methyl-4-phenylpyridine (MPP+) induces oxidative stress in the rodent.

Synergistic interaction of 2,3,7,8-tetrachlorodibenzo-p-dioxin and hydrocortisone in the induction of cleft palate in mice.

The use of renal tubule fragments isolated from the rat to investigate aspects of gentamicin nephrotoxicity.

A pilot epidemiologic study of possible health effects associated with 2,3,7,8-tetrachlorodibenzo-p-dioxin contaminations in Missouri.

Zinc tolerance test in uremia. Effect of ferrous sulfate and aluminum hydroxide.

Bovine amyloid protein AA: isolation and amino acid sequence analysis.

A case of fatal sodium azide ingestion.

Relationship of alterations in energy metabolism to hypophagia in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Cell number and size in selected organs of fetuses of rats malnourished and exposed to nitrofen.

Effects of induction of rat liver cytosolic aldehyde dehydrogenase on the oxidation of biogenic aldehydes.

The mechanism by which cyclopiazonic acid potentiates accumulation of tetraphenylphosphonium in cultured renal epithelial cells.

Nifedipine attenuates both alpha-1 and alpha-2 adrenoceptor-mediated pressor and vasoconstrictor responses in conscious dogs and primates.

Fine anionic iron colloid and its use in light and electron microscopic detection of cationic sites in the rat kidney.

Chemical and biological characterization of low-molecular-weight human skeletal growth factor.

Establishment of a parathyroid hormone-responsive phosphate transport system in vitro using cultured renal cells.

A fraction enriched in dendrodendritic synaptosomes isolated from rat olfactory bulb: morphology and transmitter release.

Contraluminal transport of small aliphatic carboxylates in the proximal tubule of the rat kidney in situ.

25-Hydroxyvitamin D₃-23-hydroxylase, a renal enzyme in several animal species.

Metabolism of salicylate by isolated kidney and liver mitochondria.

Metabolism and disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin in guinea pigs.

Metabolism and excretion of orally and intraperitoneally administered gallium arsenide in the hamster.

Mechanisms of gentamicin transport in kidney epithelial cell line (LLC-PK1).

[The effect of induced hyperthermia on kidney function in dogs].

Tissue-specific expression of the mouse dioxin-inducible P(1)450 and P(3)450 genes: differential transcriptional activation and mRNA stability in liver and extrahepatic tissues.

Transport of N-acetyl-S-pentachloro-1,3-butadienylcysteine by rat renal cortex.

pH shift during equilibrium dialysis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin metabolism and disposition in yellow perch.

Metabolism and disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rainbow trout.

Polycations reduce vasopressin-induced water flow by endocytic removal of water channels.

Human prostate-specific antigen: structural and functional similarity with serine proteases.

Effects of 2,4-dinitrophenol on renal ammoniogenesis in the rat.

Occupational exposure to chlorophenates. Renal, hepatic and other health effects.

Insulin antagonizes epinephrine activation of the membrane transport of fatty acids. Potential site for hormonal suppression of lipid mobilization.

Ca²⁺ compartments in saponin-skinned cultured vascular smooth muscle cells.

A modified method of fine-granular cationic iron colloid preparation: its use in light and electron microscopic detection of anionic sites in the rat kidney glomerulus and certain other tissues.

Carcinogen-binding proteins in the rat ventral prostate: specific and nonspecific high-affinity binding sites for benzo(a)pyrene, 3-methylcholanthrene, and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Airborne arsenic and urinary excretion of metabolites of inorganic arsenic among smelter workers.

Fluorescence identifies an alkaline cell in turtle urinary bladder.

Studies on the metabolism of the neurotoxic tri-o-cresyl phosphate. Distribution, excretion, and metabolism in male cats after a single, dermal application.

Effect of ATP inhibitors on the translocation of luminal membrane between cytoplasm and cell surface of transitional epithelial cells during the expansion-contraction cycle of the rat urinary bladder.

Presence of an extramitochondrial anion-stimulated ATPase in the rabbit kidney: localization along the nephron and effect of corticosteroids.

Detection of sister chromatid exchanges induced by volatile genotoxicants.

[Hemodialysis-hemoperfusion in the management of paraquat poisoning based on serum levels of the toxic agent].

Assessment of pentachlorophenol toxicity in newborn calves: clinicopathology and tissue residues.

Developing rat brain monoamine levels following in utero exposure to a mixture of 2,4-dichlorophenoxyacetic and 2,4,5-trichlorophenoxyacetic acids.

Comparative behavioral, biochemical and pigmentary effects of MPTP, MPP+ and paraquat in *Rana pipiens*.

Experimental cytoxic cystitis and prevention by acetylcysteine.

Response of the medullary thick ascending limb to hypothyroidism in the rat.

Forestry workers involved in aerial application of 2,4-dichlorophenoxyacetic acid (2,4-D): exposure and urinary excretion.

Formation, toxicity and inactivation of acrolein during biotransformation of cyclophosphamide as studied in freshly isolated cells from rat liver and kidney.

[An autopsy case of paraquat poisoning--correlation of paraquat toxicity with tissue concentration].

Pentachlorophenol intoxication: report of a fatal case, with comments on the clinical course and pathologic anatomy.

The postnatal effects of prenatal exposure to low doses of nitrofen (2,4-dichlorophenyl-p-nitrophenyl ether) in Sprague-Dawley rats.

Hemoperfusion-hemodialysis ineffective for paraquat removal in life-threatening poisoning?

[Morphology of a paraquat poisoning].

Complete recovery from paraquat poisoning causing severe unilateral pulmonary lesion.

A critical review of the literature on acrolein toxicity.

Toxicokinetics of the herbicide dichlorprop and its leucinate and their action on liver mixed function oxidase in rats.

Effects of thyroid hormone on Na-K-adenosine triphosphatase activity along the rat nephron.

The role of neutrophils in the development of cadmium chloride-induced emphysema in lathyrogen-fed hamsters.

Arsenic speciation in urine from humans intoxicated by inorganic arsenic compounds.

Identification and quantification of metabolite conjugates of activated cyclophosphamide and ifosfamide with mesna in urine by ion-pair extraction and fast atom bombardment mass spectrometry.

Study of inorganic arsenic methylation by rat liver in vitro: relevance for the interpretation of observations in man.

Metabolic activation of 2-methylfuran by rat microsomal systems.

The effects of pentachlorophenol, phenol and other pollutants on the liver of carp (*Cyprinus carpio* L.).

Changed enzyme activities in rat kidney during ischemia.

Antibody-induced redistribution of Heymann antigen on the surface of cultured glomerular visceral epithelial cells: possible role in the pathogenesis of Heymann glomerulonephritis.

Teratogenic potency of TCDD, TCDF and TCDD-TCDF combinations in C57BL/6N mice.

Screening of agents which convert 'transformed morphology' of Rous sarcoma virus-infected rat kidney cells to 'normal morphology': identification of an active agent as herbimycin and its inhibition of intracellular src kinase.

[Adult respiratory distress syndrome and arsenic poisoning caused by Fowler's solution].

Androgenic deficiency in male rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Chloracne, "the hallmark of dioxin intoxication".

Isolation and characterization of amyloid protein AA in the Abyssinian cat.

Identification and characterization of amyloid protein AA in spontaneous canine amyloidosis.

The urinary excretion of bacterial amino-acid metabolites by rats fed saccharin in the diet.

Gas chromatographic profiling of phenolic acids in urine of patients with cirrhosis of the liver.

Toxic interaction of specific polychlorinated biphenyls and 2,3,7,8-tetrachlorodibenzo-p-dioxin: increased incidence of cleft palate in mice.

AA-amyloidosis in dogs: partial amino acid sequence of protein AA and immunohistochemical cross-reactivity with human and cow AA-amyloid.

Urinary excretion of cresol as an indicator for occupational toluene exposure.

Purification of gamma-glutamyltransferases by immunoaffinity chromatography and some properties of the enzymes.

Sympathetic neurons grown in culture generate ATP by glycolysis: correlation between ATP content and [3H]norepinephrine uptake and storage.

Iron delivery during proliferation and differentiation of kidney tubules.

Mechanism of fluid secretion in isolated shark renal proximal tubules.

Comparison of in vivo and in vitro methods for assessing the effects of phenobarbital on the hepatic drug-metabolizing enzyme system.

Disruption of phosphatidylserine translocation to the mitochondria in baby hamster kidney cells.

Developmental and tissue-specific differential regulation of the mouse dioxin-inducible P1-450 and P3-450 genes.

The cytochrome P-450 monooxygenase system of rabbit bladder mucosa: enzyme components and isozyme 5-dependent metabolism of 2-aminofluorene.

Photopic c-wave in the chicken ERG: sensitivity to sodium azide, epinephrine, sodium iodate, barbiturates, and other general anesthetics.

NTP Toxicology and Carcinogenesis Studies of 1,2-Dichlorobenzene (o-Dichlorobenzene) (CAS No. 95-50-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Effect of vapor concentration on the disposition of inhaled 2,3-dichloropropene in Fischer-344 rats.

Acute polybrominated biphenyl toxicosis alters vitamin A homeostasis and enhances degradation of vitamin A.

Calcium secretion in canine tracheal mucosa.

Peritubular uptake and brush border transport of 28Mg by flounder renal tubules.

Subcellular location and properties of rat renal 25-hydroxyvitamin D₃-1 alpha-hydroxylase.

Phosphate uptake by primary renal proximal tubule cell cultures grown in hormonally defined medium.

Effects of ATP and cyclic AMP on the (Na⁺ + K⁺ + 2Cl⁻)-cotransport system in turkey erythrocytes.

Localization of a fibrinogen calcium binding site between gamma-subunit positions 311 and 336 by terbium fluorescence.

[Induced mutagenesis of plasmid as well as chromosomal genes inserted into plasmid DNA. II. The mutagenic action of chemical factors].

Effect of heavy metals on cellular growth, metabolism and integrity of cultured Chinese hamster kidney cells.

Effect of furosemide on ion transport in the turtle bladder: evidence for direct inhibition of active acid-base transport.

Novel ATP-dependent calcium transport component from rat liver plasma membranes. The transporter and the previously reported (Ca²⁺-Mg²⁺)-ATPase are different proteins.

Properties and biochemical characterization of NADH 5 alpha-reductase from rat liver microsomes.

Release of carnitine from the perfused rat liver.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the uptake, distribution and excretion of a single oral dose of [11,12-³H]retinyl acetate and on the vitamin A status in the rat.

Urinary D-glucaric acid excretion in the Seveso area, polluted by tetrachloro-dibenzo-p-dioxin (TCDD): five years of experience.

Renal transport of gossypol in the rabbit.

Cyanide and sulfide interact with nitrogenous compounds to influence the relaxation of various smooth muscles.

Influence of cyclosporin A on the respiration of isolated rat kidney mitochondria.

Disposition of [14C]methyl bromide in rats after inhalation.

In vivo and in vitro metabolism of 2,4-dinitrotoluene in strain A mice.

Allyl isothiocyanate is mutagenic in *Salmonella typhimurium*.

Treatment of dialysis membranes for simultaneous dialysis and concentration.

Roles of Ca²⁺ and Na⁺ on the modulation of antidiuretic hormone action on urea permeability in toad urinary bladder.

Vasodilator properties of a family of bioactive atrial peptides in isolated perfused rat kidneys.

Demonstration of arginyl-bradykinin moiety in rat HMW kininogen: direct evidence for liberation of bradykinin by rat glandular kallikreins.

Induction of methotrexate release from rat hepatocytes in suspension by alpha-adrenergic agents: involvement of calcium and metabolic energy.

Characterization of parathyroid hormone fragments produced by cathepsin D.

Effect of sodium azide and sodium selenite on prostaglandin synthesis in rabbit kidney medulla slices.

The validity of urinary metabolites as indicators of low exposures to toluene.

Sex-influenced CPIB-induction of peroxisomes in rat liver and kidney tissues.

Pharmacological study on the effects of some ocular hypotensive drugs on aqueous humor formation in the arterially perfused enucleated rabbit eye.

Determination of acute toxic effects in mice following exposure to methyl bromide.

Assessment of exposure to organophosphate insecticides during spraying in Haiti: monitoring of urinary metabolites and blood cholinesterase levels.

Metabolic fate and cardiovascular effects of arsenic in rats and rabbits chronically exposed to trivalent and pentavalent arsenic.

Allyl alcohol toxicity in isolated renal epithelial cells: protective effects of low molecular weight thiols.

Control of 2,3,7,8-tetrachlorodibenzo-p-dioxin binding protein(s) in the hamster kidney.

[Paraquat poisoning in the Netherlands, 1972-1982].

Ascorbic acid nutritional status does not affect the biochemical response to paraquat.

Paraquat poisoning.

Paraquat toxicity. The use of hypoxic ventilation.

[Acute poisoning with the herbicide diquat].

Paraquat ingestion.

[Plasmapheresis by adsorption. a. Physico-chemical adsorption method].

Effect of dimethylthiourea on paraquat toxicity in rats.

Distribution and toxicity of monosodium methanearsonate following oral administration of the herbicide to dairy sheep and goats.

[Fatal paraquat poisoning].

Renal involvement in paraquat poisoning.

Acute diquat intoxication. Interest of its repeated determination in urine and the evaluation of renal proximal tubule integrity.

Health status of workers with past exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in the manufacture of 2,4,5-trichlorophenoxyacetic acid: comparison of findings with and without chloracne.

Hepatic macromolecular covalent binding of the hepatocarcinogen 2,6-dinitrotoluene and its 2,4-isomer in vivo: modulation by the sulfotransferase inhibitors pentachlorophenol and 2,6-dichloro-4-nitrophenol.

Uptake, distribution and elimination of monosodium methanearsonate following long term oral administration of the herbicide to sheep and goats.

Extracorporeal removal of specific antibodies by hemoperfusion through the immunosorbent agarose-polyacrolein microsphere beads: removal of anti-bovine serum albumin in animals.

N-acetylcyanamide, the major urinary metabolite of cyanamide in rat, rabbit, dog, and man.

The metabolic fate of the herbicide nitralin in the rat.

On the role of catalase in the oxidation of tissue fatty acids.

Occupational exposure of herbicide applicators to herbicides used along electric power transmission line right-of-way.

Mechanism controlling the renal excretion of xenobiotics in fish: effects of chemical structure.

In vivo effects of 3-methylcholanthrene, phenobarbital, pyrethrum and 2,4,5-T isooctylester on liver, lung and kidney microsomal mixed-function oxidase system of guinea-pig: a comparative study.

The nucleotide binding site detected by affinity labeling in the large T proteins of polyoma and SV40 viruses is distinct from their ATPase catalytic site.

Delayed neurotoxicity produced by an organophosphorus compound (Sumithion). A case report.

Effects of zeolite a or clinoptilolite in diets of growing swine.

3'-Monoiodothyronine degradation in rat liver homogenate: enzyme characteristics and documentation of deiodination by high-pressure liquid chromatography.

Prevention of TCDD toxicity in laboratory rodents by addition of charcoal or cholic acids to chow.

Teratogenicity of 2,3,7,8-tetrachlorodibenzofuran in BXD recombinant inbred strains.

Immunosuppression in weanling and adult Sprague-Dawley rats induced by acute exposure to 3,3',4,4'-tetrachloroazoxybenzene.

Glomerulonephritis induced by pre-formed immune complexes containing monoclonal antibodies of defined affinity and isotype.

Amyloid fibril protein in familial amyloidotic polyneuropathy, Portuguese type. Definition of molecular abnormality in transthyretin (prealbumin).

[Relation between glutathione and cytoplasmic protein sulfhydryl groups in the rat: a rapid procedure for analytical determination].

Analysis of collagen from normal and abnormal human bone.

Glomerulonephritis: the use of grafted hybridomas to investigate the role of epitope density, antibody affinity and antibody isotype in active serum sickness.

Lipid abnormalities in workers exposed to dioxin.

Iron absorption and utilization in maintenance hemodialysis patients: oral and intravenous routes.

Teratological studies on the TCDD congener 3,3',4,4'-tetrachloroazoxybenzene in sensitive and nonsensitive mouse strains: evidence for direct effect on embryonic tissues.

Identification of an anti-monocyte monoclonal antibody that is specific for membrane complement receptor type one (CR1).

The assessment of iron stores in children on regular dialysis treatment.

Calcium is a competitive inhibitor of gentamicin-renal membrane binding interactions and dietary calcium supplementation protects against gentamicin nephrotoxicity.

Iron pharmacokinetics after administration of ferric-hydroxide-polymaltose complex in rats.

Teratogenicity of 2,3,7,8-tetrachlorodibenzofuran in the mouse.

Family studies of the genetic abnormality in transthyretin (prealbumin) in Portuguese patients with familial amyloidotic polyneuropathy.

N-Hydroxy-N-arylamides. I. Toxicity of certain polycyclic and monocyclic N-hydroxy-N-arylamides in rats.

Cathepsins J and K: high molecular weight cysteine proteinases from human tissues.

Lead flux through the kidney and salivary glands of rats.

Studies on the bovine brain pyruvate dehydrogenase complex using the antibodies against kidney enzyme complex.

Analysis of an inhibin preparation reveals apparent identity between a peptide with inhibin-like activity and a sperm-coating antigen.

Oxalate accumulation in rat renal cortical slices.

Altered levels of a 5 S gene-specific transcription factor (TFIIIA) during oogenesis and embryonic development of *Xenopus laevis*.

N-(2,3-dimercaptopropyl)phthalamidic acid: protection, in vivo and in vitro, against arsenic intoxication.

Role of calcium ions in insulin action on hexose transport in L6 muscle cells.

A tumor promoter induces rapid and coordinated reorganization of actin and vinculin in cultured cells.

Sodium azide interference with a radioimmunoassay for prostatic acid phosphatase.

Relationships between the flux of lipid metabolism in vivo and the uncoupling of respiratory control.

Effect of transition metal ions on lipid peroxidation of rabbit renal cortical mitochondria.

Hormonal effects on the phosphorylation of glycogen synthase in rat hepatocytes.

Oxidized forms of parathyroid hormone with biological activity. Separation and characterization of hormone forms oxidized at methionine 8 and methionine 18.

Role of metabolic CO₂ production in the generation of elevated renal cortical PCO₂.

Microdomains of distinctive glycoprotein composition in the kidney proximal tubule brush border.

Renal actions of piretanide and three other "loop" diuretics.

Sensitivity of cAMP-stimulated salt secretion in shark rectal gland to "loop" diuretics.

In vitro inhibitory effect on porphyrinogen carboxylase of liver extracts from TCDD treated mice.

Different susceptibility of mouse tissues to porphyrogenic effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Investigation on a selective non-prostanoid thromboxane antagonist, BM 13.177, in human platelets.

Correlation between the redox state of NAD(P)H and total flow in the perfused rat liver.

Significance of arsenic metabolic forms in urine. Part I: Chemical speciation.

Differential induction of two 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible forms of cytochrome P-450 in extrahepatic versus hepatic tissues.

Hepato-renal cooperation in biotransformation, membrane transport, and elimination of cysteine S-conjugates of xenobiotics.

Experimental model for evaluating animal exposure to endogenous N-nitrosodi-n-butylamine by measuring its urinary metabolites N-butyl-N-(4-hydroxybutyl)-nitrosamine and N-butyl-N-(3-carboxypropyl)nitrosamine.

Effects of atratone on hormone-dependent reactions in hypothalamus, pituitary and prostate gland.

Lack of protection against oxygen toxicity by in vivo protective agents in the isolated toad bladder.

On the synthesis and degradation of the multiple forms of catalase in mouse liver: effects of aminotriazole and p-chlorophenoxyisobutric acid ethyl ester.

Effect of SITS on organic anion transport in the rabbit kidney cortical slice.

Binding to radioactivity from [¹⁴C] paraquat to rat lung protein, in vitro.

Reversion of transformed glycolysis to normal by inhibition of protein synthesis in rat kidney cells infected with temperature-sensitive mutant of Rous sarcoma virus.

[Mechanism of the decrease in basal metabolism during adaptation to hypoxia].

Mechanism of the attenuated cardiac response to beta-adrenergic stimulation in chronic hypoxia.

Experimental transfusion of dextran-hemoglobin.

Quantitative and qualitative changes in the metabolism of benzo(a)pyrene in rat tissues after intragastric administration of TCDD.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the renal tubular secretion of phenolsulfonphthalein.

Effect of acute and chronic Cd exposure on lindane metabolism.

Functional differences of ouabain and ethacrynic acid on renal potassium metabolism in dogs.

Selective modification of the renal and the hepatic toxicities of chloroform by induction of drug-metabolizing enzyme systems in kidney and liver.

The role of acetaldehyde in mediating the deleterious effect of ethanol on pyridoxal 5'-phosphate metabolism.

Functional distinction between two transport mechanisms in rabbit gall-bladder epithelium by use of ouabain, ethacrynic acid and metabolic inhibitors.

Responses of the D-glucuronic acid pathway in rat tissues to treatment with tetrachlorodibenzodioxin.

Are lobster fibrinogen and cold-insoluble globulin related molecules?

Calcium transport across peritubular surface of the marine teleost renal tubule.

An energy requirement for the degradation of intravenously injected ¹²⁵I-labeled albumin in mouse liver and kidney slices.

Inhibition of the efflux of organic ions from renal cortical slices.

Role of neurotransmitters, prostaglandins and glucose on precursor incorporation into the RNA of thyroid slices.

Renal tubular transport of saccharin.

Metabolism of tetrachlorophenols in the rat.

Short-term toxicity of allyl alcohol in rats.

Molecular weights of the Thy-1 glycoproteins from rat thymus and brain in the presence and absence of deoxycholate.

Iodothyronine metabolism in rat liver homogenates.

Bioassay of sulfallate for possible carcinogenicity (CAS No. 95-06-7).

3,3'-diaminobenzidine oxidation in hepatic and renal histological sections.

Human poisoning with pentachlorophenol and its treatment.

[Hemoperfusion with coated activated charcoal for treating acute poisoning by remedies, plant protectants, and fungi. III. Fungi (author's transl)].

Concentration levels of 2,4-D and 2,4,5-T in forensic material.

Paraquat poisoning is not necessarily fatal.

[Case of fatal herbicide poisoning].

Human urinary excretion of the herbicide 2-methyl-4-chlorophenoxyacetic acid.

[Hemoperfusion with coated activated charcoal for treating acute poisoning by remedies, plant protectants, and fungi (author's transl)].

The immediate care of cases of poisoning.

Toxicological studies on hydrocarbons--lomex.

Paraquat toxicity and pulmonary superoxide dismutase: an enzymic deficiency of lung microsomes.

[Experimental substantiation of the maximum permissible concentration of Reglone in the air of a work environment].

Dialysis and hemoperfusion of poisons and drugs--update.

Paraquat poisoning. Survival without pulmonary insufficiency after early bleomycin treatment.

Acute renal complications of acute intoxications.

Relationship between 2,4,5-trichlorophenoxyacetate and the renal organic base transport system.

Evaluation of acute and short-term administration of 2,4,5-trichlorophenoxyacetate with respect to renal proximal tubular transport.

Effect of 3-amino-1,2,4-triazole on in vivo formation of liver triglyceride.

Retarded development of fetal renal alkaline phosphatase in mice given 2,4,5-trichlorophenoxyacetic acid.

Determination of terbacil and metabolite residues using microcoulometric gas chromatography.

Association between renal function tests and pentachlorophenol exposure.

1,1-Dichloroethylene hepatotoxicity: proposed mechanism of action and distribution and binding of ¹⁴C radioactivity following inhalation exposure in rats.

Prostaglandin E₂ production by renal inner medullary tissue slices: effect of metabolic inhibitors.

Induction of tumors in mice with the herbicide succinic acid 2,2-dimethylhydrazide.

Renal energy metabolism and sodium reabsorption after 2,4-dinitrophenol administration.

Assessment of technique for rapid detection of *Escherichia coli* and *Proteus* species in urine by head-space gas-liquid chromatography.

Development of specific tests for rapid detection of *Escherichia coli* and all species of *Proteus* in urine.

Poisoning by cresol.

[Copper and nervous system. An experimental study (author's transl)].

[Dissociation of the ino- and chronotropic response of isolated rat heart to noradrenaline in the presence of oxygen deficit, exposure to cyanide and 2,4-dinitrophenol].

Factors involved in heavy metal poisoning.

Epidemiology and pathology of a tetrachlorodibenzodioxin poisoning episode.

A cytological study of Heinz body-hemolytic anemia. Report of a case of sodium chlorate poisoning complicated by methemoglobinemia and acute renal failure.

Effects of sodium azide on platelet function.

Tetrachlorodibenzo-p-dioxin induction of renal microsomal enzyme systems: ultrastructural effects on pars recta (S3) proximal tubule cells on the rat kidney.

Mouse liver metallothioneins. Complete amino acid sequence of metallothionein-I.

Energy utilization in the uptake of catecholamines by synaptic vesicles and adrenal chromaffin granules.

[Hormonal regulation of the electrical properties of the cell membrane].

Mutagenic activity of major mammalian metabolites of cyclophosphamide toward several genes of *Escherichia coli*.

Does diaminobenzidine demonstrate prostaglandin synthetase? A study on polyunsaturated fatty acid-induced DAB oxidation in sheep vesicular glands and rabbit kidney medulla.

Comparative studies on immobilization of human prostatic acid phosphatase.

The effect of inosine on the recovery of isolated perfused arteries from dinitrophenol [proceedings].

Transplacental induction of mixed-function oxygenases in extra-hepatic tissues by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

In vitro uptake of gentamicin by rat renal cortical tissue.

Nitric oxide activates guanylate cyclase and increases guanosine 3':5'-cyclic monophosphate levels in various tissue preparations.

Effects of temperature, metabolic and cytoskeletal inhibitors on the rate of BHK cell adhesion to polystyrene.

[Calorigenic effect of catecholamines in dinitrophenol poisoning].

The influence of 3,4-dihydroxyphenylacetic acid on the accumulation of 5-hydroxyindoleacetic acid in the choroid plexus and kidney cortex slices of rats.

Hydrogen peroxide lowers ATP levels in platelets without altering adenylate energy charge and platelet function.

Factors affecting the distribution of chloride ions in rat renal outer medulla.

2,4,5-trichlorophenol, a new urinary metabolite of hexachlorobenzene.

Activation of guanylate cyclase in cerebral cortex of rat by hydroxylamine.

Innocuity and toxicity testing of non-viral components of foot-and-mouth disease vaccines.

Effect of extracellular pH and inhibitors on the gluconeogenesis and ammoniogenesis relationship in rat kidney cortex slices.

Experience with hemoperfusion in drug abuse.

Studies on the mechanism of renal transport depression caused by pretreatment with 2,4,5-trichlorophenoxyacetate.

Paraquat poisoning: new aspects of therapy.

Efficacy of gut lavage, hemodialysis, and hemoperfusion in the therapy of paraquat or diquat intoxication.

[Diquat-dibromide (Reglone) poisoning treated with hemodialysis].

A deadly cure for lice - a case of paraquat poisoning.

Paraquat revisited.

Editorial: Paraquat poisoning.

Paraquat accumulation: tissue and species specificity.

Pesticide levels of patients on chronic hemodialysis.

[Effect of noradrenaline and 2,4-dinitrophenol on the energetics of muscle contraction].

Table 2A-12 – Titles of Pubmed Records Related to Liver Adverse Events Following Herbicide Exposure

* LIVER *; LIVER; *ASCITES*; *BILIARY CHOLANGITIS*; *CIRRHOSIS*; *HEMOCHROMATOSIS*; *HEPAT*; *STEATOSIS* (7670)

Prometryn exposure disrupts the intestinal health of *Eriocheir sinensis*: Physiological responses and underlying mechanism.

Usefulness of oxidative stress biomarkers in native species for the biomonitoring of pesticide pollution in a shallow lake of the Austral Pampas, Argentina.

Spatiotemporal Visualization of Paraquat Distribution, Toxicokinetics, and Its Detoxification in Zebrafish Using Matrix-Assisted Laser Desorption Ionization Mass Spectrometry Imaging.

Association of UGT1A1 gene variants, expression levels, and enzyme concentrations with 2,3,7,8-TCDD exposure in individuals exposed to Agent Orange/Dioxin.

A combination of silymarin and garlic extract enhances thyroid hormone activation and body metabolism in orally intoxicated male rats with atrazine: Impact on hepatic iodothyronine deiodinase type 1.

In vivo estrogenicity of glyphosate, its formulations, and AMPA on transgenic zebrafish (*Danio rerio*) embryos.

Amentoflavone mediated hepatoprotection to counteract paraquat instigated hepatotoxicity via modulating Nrf2/keap1 pathway: A biochemical, inflammatory, apoptotic and histopathological study.

Redox imbalance and inflammation: A link to depression risk in Brazilian pesticide-exposed farmers.

Long term integrated biomarker responses in freshwater African catfish *Clarias gariepinus* exposed to a new brand of herbicide fluazifop-p-butyl.

Analysis of the association between urinary glyphosate exposure and fatty liver index: a study for US adults.

ATR induces hepatic lipid metabolism disorder in rats by activating IRE1 \pm /XBP1 signaling pathway.

Insights on cyclophosphamide metabolism and anticancer mechanism of action: A computational study.

Preservative effect of pomegranate-based marination with \hat{I}^2 -resorcylic acid and cinnamaldehyde on the microbial quality of chicken liver.

Exogenous Melatonin Alleviates Atrazine-Induced Glucose Metabolism Disorders in Mice Liver via Suppressing Endoplasmic Reticulum Stress.

Exploring azomethine ylides reactivity with acrolein through cycloaddition reaction and computational antiviral activity assessment against hepatitis C virus.

Grape seed-derived procyanidin inhibits glyphosate-induced hepatocyte ferroptosis via enhancing crosstalk between Nrf2 and FGF12.

ALDH2 deficiency exacerbates MCD-diet induced MASLD by modulating bile acid metabolism.

Enrichment and distribution of 3,6-dichlorocarbazole in red crucian carp (*Carassius auratus*) and its hepatotoxicity.

Self-heating mitochondrion-induced free radical blast for immunogenic cell death stimulation and HCC immunotherapy.

m-Cresol, a pesticide intermediate, induces hepatotoxicity and behavioral abnormalities in zebrafish larvae through oxidative stress, apoptosis.

Transcriptomic and metabolomic profile changes in the liver of Sprague Dawley rat offspring after maternal PFOS exposure during gestation and lactation.

Inhibition of the urea cycle by the environmental contaminant 2,3,7,8-tetrachlorodibenzo-p-dioxin increases serum ammonia levels in mice.

Glufosinate-ammonium causes liver injury in zebrafish by blocking the Nrf2 pathway.

The role of thioredoxin and glutathione systems in arsenic-induced liver injury in rats under glutathione depletion.

Behavioral and biochemical consequences after chronic exposition to the herbicide atrazine in tadpoles.

Efficient removal of toxicity associated to wastewater treatment plant effluents by enhanced Soil Aquifer Treatment.

The uses of zebrafish (*Danio rerio*) as an in vivo model for toxicological studies: A review based on bibliometrics.

Hepatic glucuronidation of tetrabromobisphenol A and tetrachlorobisphenol A: interspecies differences in humans and laboratory animals and responsible UDP-glucuronosyltransferase isoforms in humans.

Oxidative stress in the bivalve *Diplodon chilensis* under direct and dietary glyphosate-based formulation exposure.

Hepatic effects of acetochlor chiral isomers in zebrafish and LO2 cells.

Gut microbiota disorders aggravate terbuthylazine-induced mitochondrial quality control disturbance and PANoptosis in chicken hepatocyte through gut-liver axis.

Short-term effects of sodium arsenite (AsIII) and sodium arsenate (AsV) on carbohydrate metabolism in the perfused rat liver.

Loss of flavin-containing monooxygenase 3 modulates dioxin-like polychlorinated biphenyl 126-induced oxidative stress and hepatotoxicity.

Roles of oxidative stress/JNK/ERK signals in paraquat-triggered hepatic apoptosis.

Differential eigengene network analysis reveals benzo[a]pyrene and 2,3,7,8-tetrachlorodibenzo-p-dioxin consensus regulatory network in human liver cell line HepG2.

Influence of triazines and lipopolysaccharide coexposure on inflammatory response and histopathological changes in the testis and liver of BalB/c mice.

Chronic arsenic exposure-provoked biotoxicity involved in liver-microbiota-gut axis disruption in chickens based on multi-omics technologies.

Effects of Aminomethylphosphonic Acid on the Transcriptome and Metabolome of Red Swamp Crayfish, *Procambarus clarkii*.

Differential Modulatory Effects of Methylmercury (MeHg) on Ahr-regulated Genes in Extrahepatic Tissues of C57BL/6 Mice.

2,4-D Herbicide-Induced Hepatotoxicity: Unveiling Disrupted Liver Functions and Associated Biomarkers.

Exploring Metabolic and Gut Microbiome Responses to Paraquat Administration in Male Wistar Rats: Implications for Oxidative Stress.

Transcriptome analysis reveal the effect of freshwater sediments containing 2,3,7,8-tetrachlorodibenzo-p-dioxin on the *Macrobrachium rosenbergii* hepatopancreas, intestine, and muscle.

Holistic Assessment Based On Hepatocyte Mitochondria: Lycopene Repairs Oxidized mtDNA to Alleviate Mitochondrial Stress Induced by Atrazine.

Serum metabolome and liver transcriptome reveal acrolein inhalation-induced sex-specific homeostatic dysfunction.

Modifying effects of 2,4-D and Glyphosate exposures on gut-liver-adipose tissue axis of diet-induced non-alcoholic fatty liver disease in mice.

Supplementation with grape seed extract, onion peel extract, or rosemary extract in the diet^Â alleviates growth inhibition, liver damage, and oxidative stress induced by diquat in Lohmann chicks.

Association of glyphosate exposure with multiple adverse outcomes and potential mediators.

Dietary curcumin supplementation alleviates diquat-induced oxidative stress in the liver of broilers.

Involvement of glyphosate in disruption of biotransformation P450 enzymes and hepatic lipid metabolism in chicken.

Sub-acute toxicity of the herbicide glufosinate-ammonium exposure in adult red swamp crayfish (*Procambarus clarkii*).

Mutagenicity, hepatotoxicity, and neurotoxicity of glyphosate and fipronil commercial formulations in Amazon turtles neonates (*Podocnemis expansa*).

Ecotoxicology of the herbicide paraquat: effects on wildlife and knowledge gaps.

Toxicity assessment and detoxification metabolism of sodium pentachlorophenol (PCP-Na) on marine economic species: a case study of *Moerella iridescens* and *Exopalaemon carinicauda*.

Effects of glyphosate exposure on western diet-induced non-alcoholic fatty liver disease in mice.

Maternal impacts of pre-conceptional glyphosate exposure.

Toxic effects of benfluralin on zebrafish embryogenesis via the accumulation of reactive oxygen species and apoptosis.

Glyphosate-based herbicide (GBH) challenged thermoregulation in lizards (*Eremias argus*), compensatory warming could mitigate this effect.

Zinc Oxide Nanoparticles and Vitamin C Ameliorate Atrazine-Induced Hepatic Apoptosis in Rat via CYP450s/ROS Pathway and Immunomodulation.

Enantioselective in vitro metabolism of the herbicide diclofop-methyl: Prediction of toxicokinetic parameters and reaction phenotyping.

Higher urinary glyphosate exposure is associated with increased risk of liver dysfunction in adults: An analysis of NHANES, 2013-2016.

[Study on the occupational exposure limit of glyphosate in the air of workplace].

Response to oxidative stress of AML12 hepatocyte cells with knockout of methionine sulfoxide reductases.

Dimethylarsinic acid induces bladder carcinogenesis via the amphiregulin pathway.

[Investigation on health status of workers exposed to glyphosate].

Selected herbicides screened for toxicity and analysed as inhibitors of both cholinesterases.

Evaluation of perinatal exposure of glyphosate and its mixture with 2,4-D and dicamba in liver redox status in Wistar rats.

Co-exposure of iron oxide nanoparticles with glyphosate herbicides in *Poecilia reticulata*: Fish liver damages is reversible during iron accumulation and elimination period.

Maternal pre-conceptual glyphosate exposure impacts the offspring hepatic and ovarian proteome.

Glyphosate induces autophagy in hepatic L8824 cell line through NO-mediated activation of RAS/RAF/MEK/ERK signaling pathway and energy metabolism disorders.

Glyphosate-induced liver and kidney dysfunction, oxidative stress, immunosuppression in Nile tilapia, but ginger showed a protection role.

Glyphosate Interference in Follicular Organization in the Wall Lizard *Podarcis siculus*.

Atrazine contaminated sites and bullfrog tadpoles: evasive trends and biochemical consequences.

Role of NF- κ B/IL-1 β Pathway and Caspase 3 in Mediating the Hepatoprotective Effect of Rutin against Paraquat-Induced Liver Toxicity in Male Rats.

Species differences and human relevance of the toxicity of 4-hydroxyphenylpyruvate dioxygenase (HPPD) inhibitors and a new approach method in vitro for investigation.

Tannin alleviates glyphosate exposure-induced apoptosis, necrosis and immune dysfunction in hepatic L8824 cell line by inhibiting ROS/PTEN/PI3K/AKT pathway.

Cyhalofop-butyl exposure induces the severe hepatotoxicity and immunotoxicity in zebrafish embryos.

Minor metabolomic disturbances induced by glyphosate-isopropylammonium exposure at environmentally relevant concentrations in an aquatic turtle, *Pelodiscus sinensis*.

Effects of dietary supplementation with chlorogenic acid on growth performance, antioxidant capacity, and hepatic inflammation in broiler chickens subjected to diquat-induced oxidative stress.

Transcriptome analysis reveals the mechanisms of hepatic injury caused by long-term environmental exposure to atrazine in juvenile common carp (*Cyprinus carpio* L.).

Glyphosate-triggered hepatocyte ferroptosis via suppressing Nrf2/GSH/GPX4 axis exacerbates hepatotoxicity.

Human health risks and hepatotoxicity associated with exposure to atrazine surveyed in drinking water from Ijebu-North, Southwest, Nigeria.

Single-cell transcriptome analysis reveals liver injury induced by glyphosate in mice.

Toxic effects of glyphosate on histopathology and intestinal microflora of juvenile *Litopenaeus vannamei*.

Alterations in cell viability, reactive oxygen species production, and modulation of gene expression involved in mitogen-activated protein kinase/extracellular regulating kinase signaling pathway by glyphosate and its commercial formulation in hepatocellular carcinoma cells.

Glyphosate based-herbicide disrupts energy metabolism and activates inflammatory response through oxidative stress in mice liver.

Mitigating effect of L-carnitine against atrazine-induced hepatotoxicity: histopathological and biochemical analyses in albino rats.

Evaluation of acute toxicity and histology effect on liver of glyphosate and atrazine in the African catfish *Clarias gariepinus* (Burchell 1822).

Human serum lipidomics analysis revealed glyphosate may lead to lipid metabolism disorders and health risks.

Chronic effects of environmental concentrations of antifoulant diuron on two marine fish: Assessment of hormone levels, immunity, and antioxidant defense system.

Synergistic toxicity of ethanol and 2,4-dichlorophenoxyacetic acid enhances oxidant status, DNA damage, inflammation, and apoptosis in rats.

Exposure to Agent Orange and Hepatocellular Carcinoma Among US Military Personnel.

Effects of glyphosate exposure on gut-liver axis: Metabolomic and mechanistic analysis in grass carp (*Ctenopharyngodon idellus*).

Single-chemical and mixture effects of multiple volatile organic compounds exposure on liver injury and risk of non-alcoholic fatty liver disease in a representative general adult population.

A review of the characteristic properties of selected tobacco chemicals and their associated etiological risks.

Clinical and pathological characteristics of acute kidney injury caused by diquat poisoning.

[Predictive value of serum lactate dehydrogenase on prognosis of patients with paraquat poisoning].

Glyphosate potentiates insulin resistance in skeletal muscle through the modulation of IRS-1/PI3K/Akt mediated mechanisms: An in vivo and in silico analysis.

Trehalose prevents glyphosate-induced hepatic steatosis in roosters by activating the Nrf2 pathway and inhibiting NLRP3 inflammasome activation.

Glyphosate-induced autophagy inhibition results in hepatic steatosis via mediating epigenetic reprogramming of PPAR α in roosters.

Diet as a Source of Acrolein: Molecular Basis of Aldehyde Biological Activity in Diabetes and Digestive System Diseases.

Association of Lifetime Exposure to Glyphosate and Aminomethylphosphonic Acid (AMPA) with Liver Inflammation and Metabolic Syndrome at Young Adulthood: Findings from the CHAMACOS Study.

Small-Molecule Cyanamide Pan-TEAD^Δ-YAP1 Covalent Antagonists.

A neuroprotective dose of trehalose is harmless to metabolic organs: comprehensive histopathological analysis of liver, pancreas, and kidney.

Selenium-dependent glutathione peroxidase 1 regulates transcription of elongase 3 in murine tissues.

The effects of glyphosate-based herbicide on the hypothalamic-pituitary thyroid axis are tissue-specific and dependent on age exposure.

Safety assessment of subchronic feeding of insect-resistant and herbicide-resistant transgenic soybeans to juvenile channel catfish (*Ictalurus punctatus*).

Associations of arsenic exposure with liver injury in US adults: NHANES 2003-2018.

m(6)A methylation-mediated PGC-1^Δ contributes to ferroptosis via regulating GSTK1 in arsenic-induced hepatic insulin resistance.

Quantitative Integration of Mode of Action Information in Dose-Response Modeling and POD Estimation for Nonmutagenic Carcinogens: A Case Study of TCDD.

Safety and efficacy of once-daily HU6 versus placebo in people with non-alcoholic fatty liver disease and high BMI: a randomised, double-blind, placebo-controlled, phase 2a trial.

Metformin alleviates sodium arsenite-induced hepatotoxicity and glucose intolerance in mice by suppressing oxidative stress, inflammation, and apoptosis.

Shenqi formula delayed Alzheimer's disease-like symptoms by skn-1 pathway in *Caenorhabditis elegans*.

Dysregulated meta-organismal metabolism of aromatic amino acids in alcohol-associated liver disease.

The Use of Multiple Biomarkers to Assess the Health of Anuran Amphibians in the Brazilian Cerrado Savanna: An Ecotoxicological Approach.

Carbon Nitride-Based siRNA Vectors with Self-Produced O₂ Effects for Targeting Combination Therapy of Liver Fibrosis via HIF-1^Δ-Mediated TGF-^Δ1/Smad Pathway.

A Novel Quinazoline Derivative Prevents and Treats Arsenic-Induced Liver Injury by Regulating the Expression of RecQ Family Helicase.

A *Cryptosporidium parvum* vaccine candidate effect on immunohistochemical profiling of CD4(+), CD8(+), Caspase-3 and NF-^ΔB in mice.

Effect of Long-Term Low-Dose Arsenic Exposure on DNA Methylation and Gene Expression in Human Liver Cells.

Haloxypop-P-methyl induces immunotoxicity and glucose metabolism disorders and affects the Nrf2/ARE pathway mediated antioxidant system in *Chiromantes dehaani*.

Characterizing the impact of simvastatin co-treatment of cell specific TCDD-induced gene expression and systemic toxicity.

Female-to-male differential transcription patterns of miRNA-mRNA networks in the livers of dioxin-exposed mice.

17-(R/S)-hydroxyeicosatetraenoic acid (HETE) induces cardiac hypertrophy through the CYP1B1 in enantioselective manners.

Do natural catastrophic events and exceptional climatic conditions also affect parasites?

Liver enzymes mediate the association between aldehydes co-exposure and hypertriglyceridemia.

Alternations in interleukin-1 β and nuclear factor kappa beta activity (NF- κ B) in rat liver due to the co-exposure of Cadmium and Arsenic: Protective role of curcumin.

A phenome-wide association study (PheWAS) to identify the health impacts of 4-cresol sulfate in the Nagahama Study.

The health risk of acetochlor metabolite CMEPA is associated with lipid accumulation induced liver injury.

Molinate induces organ defects by promoting apoptosis, inflammation, and endoplasmic reticulum stress during the developmental stage of zebrafish.

Arsenic trioxide (ATO) up-regulates cytochrome P450 1A (CYP1A) enzymes in murine hepatoma Hepa-1c1c7 cell line.

Hepatoprotective and anti-hyperglycemic effects of ferulic acid in arsenic-exposed mice.

TCDD dysregulation of lncRNA expression, liver zonation and intercellular communication across the liver lobule.

Effects of food-derived oligopeptide iron chelates on liver injury and gut microbiota homeostasis in iron-deficiency anemia female rats: a pilot study.

Diosmin exerts hepatoprotective and antihyperglycemic effects against sodium arsenite-induced toxicity through the modulation of oxidative stress and inflammation in mice.

Cystine/Glutamate Xc(-) Antiporter Induction Compensates for Transsulfuration Pathway Repression by 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) to Ensure Cysteine for Hepatic Glutathione Biosynthesis.

Disruption of the mouse liver epitranscriptome by long-term aroclor 1260 exposure.

Ferrous sulfate reverses cerebral metabolic abnormality induced by minimal hepatic encephalopathy.

Biodegradable Hollow Nanoscavengers Restore Liver Functions to Reverse Insulin Resistance in Type 2 Diabetes.

The effect of *Alnus incana* (L.) Moench extracts in ameliorating iron overload-induced hepatotoxicity in male albino rats.

Citicoline ameliorates arsenic-induced hepatotoxicity and diabetes in mice by overexpression of VAMP2, PPAR- β , As3MT, and SIRT3.

Polyhalogenated carbazoles induce hepatic metabolic disorders in mice via alteration in gut microbiota.

Steatosis and Metabolic Disorders Associated with Synergistic Activation of the CAR/RXR Heterodimer by Pesticides.

Fetal lung hypoxia and energetic cell failure in the nitrofen-induced congenital diaphragmatic hernia rat model.

Thioredoxin A of *Streptococcus suis* Serotype 2 Contributes to Virulence by Inhibiting the Expression of Pentraxin 3 to Promote Survival Within Macrophages.

Malathion alters the transcription of target genes of the tumour suppressor tp53 and cancerous processes in *Colossoma macropomum*: Mechanisms of DNA damage response, oxidative stress and apoptosis.

Antioxidant and Lipid-Lowering Effects of Buriti Oil (*Mauritia flexuosa* L.) Administered to Iron-Overloaded Rats.

Consequences of reprogramming acetyl-CoA metabolism by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the mouse liver.

Associations of metal mixtures with metabolic-associated fatty liver disease and non-alcoholic fatty liver disease: NHANES 2003-2018.

Identification of key genes in hepatocellular carcinoma associated with exposure to TCDD and $\hat{\pm}$ -endosulfan by WGCNA.

Is it really safe to replace decabromodiphenyl ether (BDE209) with decabromodiphenyl ethane (DBDPE)?: A perspective from hepatotoxicity.

The capsaicinoid nonivamide suppresses the inflammatory response and attenuates the progression of steatosis in a NAFLD-rat model.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces liver lipid metabolism disorder via the ROS/AMPK/CD36 signaling pathway.

Mechanistic insights on the possible protective role of polyphenols extracted from *Tamarix aphylla* aerial parts against sodium arsenite-induced hepatotoxicity in rats.

Single-cell transcriptomics shows dose-dependent disruption of hepatic zonation by TCDD in mice.

Supplementation with sesame oil suppresses genotoxicity, hepatotoxicity and enterotoxicity induced by sodium arsenite in rats.

[Clinical case report of acute dinitrophenol poisoning with a fatal outcome of Udmurt Republic].

The environmental pollutant, polychlorinated biphenyl 126, alters liver function in a rodent model of alcohol-associated liver disease.

In vitro and in vivo assessments of the genotoxic potential of 3-chloroallyl alcohol.

Multi-omics reveals diet-induced metabolic disorders and liver inflammation via microbiota-gut-liver axis.

Betaine protects against sodium arsenite-induced diabetes and hepatotoxicity in mice.

Metabolic Communication by SGLT2 Inhibition.

Antioxidant Vitamins Attenuate Glyphosate-Induced Development of Type-2 Diabetes Through the Activation of Glycogen Synthase Kinase-3 β and Forkhead Box Protein O-1 in the Liver of Adult Male Rats.

Cytotoxicity of 19 Pesticides in Rainbow Trout Gill, Liver, and Intestinal Cell Lines.

Phenolic compounds in the freshwater environment in South Korea: Occurrence and tissue-specific distribution.

Ginkgo Biloba Extract Can Antagonize Subchronic Arsenite Exposure-Induced Hepatocyte Senescence by Inhibiting Oxidative Damage and Inflammation in Rats.

An insight into the critical role of gut microbiota in triggering the phthalate-induced toxicity and its mitigation using probiotics.

Toxicological evaluation of TBBPA by common carp (*Cyprinus carpio*) about the in vivo/vitro disturbance of the AHR pathway.

Pan msr gene deleted strain of *Salmonella Typhimurium* suffers oxidative stress, depicts macromolecular damage and attenuated virulence.

The Role of BNIP3 and Blocked Autophagy Flux in Arsenic-Induced Oxidative Stress-Induced Liver Injury in Rats.

Plant-derived squalene supplementation improves growth performance and alleviates acute oxidative stress-induced growth retardation and intestinal damage in piglets.

Thiosulfate sulfurtransferase deficiency promotes oxidative distress and aberrant NRF2 function in the brain.

How single-cell transcriptomics provides insight on hepatic responses to TCDD.

Interpretable predictive models of genome-wide aryl hydrocarbon receptor-DNA binding reveal tissue-specific binding determinants.

Cross species extrapolation of the disruption of thyroid hormone synthesis by oxyfluorfen using in vitro data, physiologically based pharmacokinetic (PBPK), and thyroid hormone kinetics models.

Suppressed Histone H3 Lysine 18 Acetylation Is Involved in Arsenic-Induced Liver Fibrosis in Rats by Triggering the Dedifferentiation of Liver Sinusoidal Endothelial Cells.

Bifenox induces programmed cell death in bovine mammary epithelial cells by impairing calcium homeostasis, triggering ER stress, and altering the signaling cascades of PI3K/AKT and MAPK.

Hepatic cholesterol biosynthesis and dioxin-induced dysregulation: A multiscale computational approach.

Dimethenamid promotes oxidative stress and apoptosis leading to cardiovascular, hepatic, and pancreatic toxicities in zebrafish embryo.

Nilotinib alleviates paraquat-induced hepatic and pulmonary injury in rats via the Nrf2/Nf-kB axis.

Deeper insights into the effects of low dietary levels of polychlorinated biphenyls on pig metabolism using gas chromatography-high resolution mass spectrometry metabolomics.

Developmental toxicity of flufenacet including vascular, liver, and pancreas defects is mediated by apoptosis and alters the Mapk and PI3K/Akt signal transduction in zebrafish.

A Review on the Role of Phytoconstituents Chrysin on the Protective Effect on Liver and Kidney.

Regulation of Hepatic Xenosensor Function by HNF4alpha.

Autoantibodies to beta tubulin in autoimmune liver diseases - relation to pANCA and clinical relevance.

A review of food contaminant 2,3,7,8-tetrachlorodibenzo-p-dioxin and its toxicity associated with metabolic disorders.

Biological Characterization of Cleome felina L.f. Extracts for Phytochemical, Antimicrobial, and Hepatoprotective Activities in Wistar Albino Rats.

Acute paraquat poisoning complicated by acute kidney injury and lung fibrosis: a case report from Nepal.

Carbonyl cyanide-4-(trifluoromethoxy)phenylhydrazone-induced toxicities in rats: comparative study with other mitochondrial uncouplers (2,4-dinitrophenol, OPC-163493 and tolcapone).

Role of NRF2 and reactive aldehydes in acute cellular rejection in liver transplant recipients.

Pelargonic acid vanillylamide alleviates hepatic autophagy and ER stress in hepatic steatosis model.

Terbutryn causes developmental toxicity in zebrafish (*Danio rerio*) via apoptosis and major organ malformation in the early stages of embryogenesis.

Priority screening of contaminants of emerging concern in drinking water sources of eastern China: Assessing risks based on exposure-activity ratios (EARs).

Toxicokinetic modelling of the transfer of non-dioxin like polychlorinated biphenyls from feed into edible tissues of pigs.

Effects of early repeated hemoperfusion combined with hemodialysis on the prognosis of patients with paraquat poisoning.

Oral iron supplementation ameliorated alterations in iron uptake and utilization in copper-toxic female Wistar rats.

Acetobacter pasteurianus BP2201 alleviates alcohol-induced hepatic and neuro-toxicity and modulate gut microbiota in mice.

Bensulide-induced oxidative stress causes developmental defects of cardiovascular system and liver in zebrafish (*Danio rerio*).

Effects of Prometryn Exposure on Hepatopancreas Oxidative Stress and Intestinal Flora in *Eriocheir sinensis* (Crustacea: Decapoda).

Updating "Dataset of transcriptomic changes that occur in human preadipocytes over a 3-day course of exposure to 3,3',4,4',5-Pentachlorobiphenyl (PCB126)" with additional data on exposure to 2,2',5,5'-tetrachlorobiphenyl (PCB52) or its 4-hydroxy metabolite (4-OH-PCB52).

Pesticide concentration in three selected fish species and human health risk in the Lake Tana sub-basin, Ethiopia.

Case report: Lung transplantation for treatment of paraquat intoxication: timing of transplantation.

PTEN Overexpression Alters Autophagy Levels and Slows Sodium Arsenite-Induced Hepatic Stellate Cell Fibrosis.

Effects of prometryn on oxidative stress, immune response and apoptosis in the hepatopancreas of *Eriocheir sinensis* (Crustacea: Decapoda).

Herbicide propisochlor exposure induces intestinal barrier impairment, microbiota dysbiosis and gut pyroptosis.

Novel 2-alkylthio-4-chloro-N-[imino(heteroaryl)methyl]benzenesulfonamide Derivatives: Synthesis, Molecular Structure, Anticancer Activity and Metabolic Stability.

Effects of metamifop on ammonia production and metabolism of *Monopterus albus*.

Mobitz type I as manifestation of acute lithium cardiotoxicity.

Pentachlorophenol-induced hemotoxicity diminishes antioxidant potential and oxidizes proteins, thiols, and lipids in rat blood: An in vivo study.

An autopsy report with a diagnostic clinical profile on fatal overdose of life-saving iron supplement.

Predictive liver lipid biomarker signature of Acetyl-coenzyme A carboxylase inhibitor related developmental toxicity in non-pregnant female Han Wistar rats - Lipidomics biomarker discovery and validation.

Metabolomics Differences of the Donor Livers Between In Situ and Ex Situ Conditions During Ischemia-free Liver Transplantation.

Exposure to oxyfluorfen-induced hematobiochemical alterations, oxidative stress, genotoxicity, and disruption of sex hormones in male African catfish and the potential to confront by *Chlorella vulgaris*.

4-Chloro-2-Methyl-Phenoxy Acetic Acid-Induced Liver Injury: A Case Report.

The Effects of Sodium Tetraborate against Lead Toxicity in Rats: The Behavior of Some Metabolic Enzymes.

Novel approach for verification of a human PBPK modeling strategy using chimeric mice in the health risk assessment of epyrifenacil.

Investigating the bioaccumulation potential of anionic organic compounds using a permanent rainbow trout liver cell line.

Associations between residential volatile organic compound exposures and liver injury markers: The role of biological sex and race.

Combined effects of high temperature and pesticide mixture exposure on free-swimming behaviors and hepatic cytochrome P450 1A expression in goldfish, *Carassius auratus*.

Effects of p-cresol, a uremic toxin, on cancer cells.

The quest for metabolic biomarkers of agrochemicals exposure via in vitro studies and suspect screening.

Effects of the Vitamin D3 on Alleviating the Oxidative Stress Induced by Diquat in Wenchang Chickens.

Assessment of the inhibition risk of chlorophenol substances on cytochrome P450 via cocktail inhibition assays.

Azole pesticide products and their hepatic metabolites cause endocrine disrupting potential by suppressing the homo-dimerization of human estrogen receptor alpha.

Mercury and methylmercury differentially modulate hepatic cytochrome P450 1A1 and 1A2 in vivo and in vitro.

Transcriptomics provides insights into toxicological effects and molecular mechanisms associated with the exposure of Chinese mitten crab, *Eriocheir sinensis*, to dioxin.

A Comparative Study on the Effects of the Lysine Reagent Pyridoxal 5-Phosphate and Some Thiol Reagents in Opening the TI(+)-Induced Mitochondrial Permeability Transition Pore.

The kidney drug transporter OAT1 regulates gut microbiome-dependent host metabolism.

Metamifop as an estrogen-like chemical affects the pituitary-hypothalamic-gonadal (HPG) axis of female rice field eels (*Monopterus albus*).

Negligible Toxicokinetic Differences of Glyphosate by Different Vehicles in Rats.

The Effect of Sub-chronic Linuron Exposure on Thyroid, Liver, and Kidney Function in Male Wistar Rats.

Ameliorating effect of *Mucuna pruriens* seed extract on sodium arsenite-induced testicular toxicity and hepato-renal histopathology in rats.

Impact of Glyphosate on the Development of Insulin Resistance in Experimental Diabetic Rats: Role of NF- κ B Signalling Pathways.

Tannic acid antagonizes atrazine exposure-induced autophagy and DNA damage crosstalk in grass carp hepatocytes via NO/iNOS/NF- κ B signaling pathway to maintain stable immune function.

Tannic acid through ROS/TNF- α /TNFR 1 antagonizes atrazine induced apoptosis, programmed necrosis and immune dysfunction of grass carp hepatocytes.

Protective effects of summer savory (*Satureja hortensis*) oil on growth, biochemical, and immune system performance of common carp exposed to pretilachlor herbicide.

Heavy Metals, Halogenated Hydrocarbons, Phthalates, Glyphosate, Cordycepin, Alcohol, Drugs, and Herbs, Assessed for Liver Injury and Mechanistic Steps.

Pre-Conceptional Exposure to Glyphosate Affects the Maternal Hepatic and Ovarian Proteome.

Investigation of the toxicity of a glyphosate-based herbicide in a human liver cell line: Assessing the involvement of Nrf2 pathway and protective effects of vitamin E and α -lipoic acid.

Transcriptome analysis reveals hepatotoxicity in zebrafish induced by cyhalofop-butyl.

Perinatal exposure to a glyphosate pesticide formulation induces offspring liver damage.

Histopathological, immunohistochemical, and molecular investigation of atrazine toxic effect on some organs of adult male albino rats with a screening of *Acacia nilotica* as a protective trial.

The surfactant co-formulant POEA in the glyphosate-based herbicide RangerPro but not glyphosate alone causes necrosis in Caco-2 and HepG2 human cell lines and ER stress in the ToxTracker assay.

Toxicity of pesticides widely applied on soybean cultivation: Synergistic effects of fipronil, glyphosate and imidacloprid in HepG2 cells.

Whey protein protects liver mitochondrial function against oxidative stress in rats exposed to acrolein.

Chronic dietary exposure to a glyphosate-based herbicide results in total or partial reversibility of plasma oxidative stress, cecal microbiota abundance and short-chain fatty acid composition in broiler hens.

Co-exposure of iron oxide nanoparticles and glyphosate-based herbicide promote liver toxicity in guppy (*Poecilia reticulata*): A histochemical and ultrastructural approach.

Pentachlorophenol mediated regulation of DAMPs and inflammation: In vitro study.

Metabolomics analysis of the potential toxicological mechanisms of diquat dibromide herbicide in adult zebrafish (*Danio rerio*) liver.

Neuro-hepatopathological changes in juvenile *Oreochromis niloticus* exposed to sublethal concentrations of commercial herbicides.

The study of human serum metabolome on the health effects of glyphosate and early warning of potential damage.

Pterocarpus mildbraedii leaf extract ebbs propanil-induced oxidative and apoptotic damage in the liver of rats.

Pesticides Inhibit Retinoic Acid Catabolism in PLHC-1 and ZFL Fish Hepatic Cell Lines.

Exposure to glyphosate-based herbicide during early stages of development increases insulin sensitivity and causes liver inflammation in adult mice offspring.

An in vitro strategy using multiple human induced pluripotent stem cell-derived models to assess the toxicity of chemicals: A case study on paraquat.

Ameliorative effect of selenium yeast[®] supplementation on the physio-pathological impacts of chronic exposure to glyphosate and or malathion in *Oreochromis niloticus*.

Can Vitamin C Supplementation Improve the Antioxidant Capacity of *Rhamdia quelen* Fish Exposed to Atrazine?

Endocrine, immune and renal toxicity in male largemouth bass after chronic exposure to glyphosate and Rodeo[®].

Clinicohematological, Mutagenic, and Oxidative Stress Induced by Pendimethalin in Freshwater Fish Bighead Carp (*Hypophthalmichthys nobilis*).

Paraquat toxicity in different cell types of Swiss albino mice.

Toxicity of commercial atrazine in *Rattus norvegicus* organs as a function of concentration: histopathological, ultrastructural and hematological evaluation.

Prediction of the human pharmacokinetics of epyrifenacil and its major metabolite, S-3100-CA, by a physiologically based pharmacokinetic modeling using chimeric mice with humanized liver.

Metabolomic and Transcript Analysis Revealed a Sex-Specific Effect of Glyphosate in Zebrafish Liver.

Effects of subchronic exposure to environmentally relevant concentrations of a commercial fluridone formulation on fathead minnows (*Pimephales promelas*).

Apiaceous vegetables protect against acrolein-induced pulmonary injuries through modulating hepatic detoxification and inflammation in C57BL/6 male mice.

Propolis nanoparticles relieved the impacts of glyphosate-induced oxidative stress and immunosuppression in Nile tilapia.

The Effects of Benoxacor on the Liver and Gut Microbiome of C57BL/6 Mice.

Comparative Toxicogenomics of Glyphosate and Roundup Herbicides by Mammalian Stem Cell-Based Genotoxicity Assays and Molecular Profiling in Sprague-Dawley Rats.

Benchmark dose and the adverse effects of exposure to pendimethalin at low dose in female rats.

Attenuating effect of *Prosopis cineraria* against paraquat-induced toxicity in prepubertal mice, *Mus musculus*.

Ellagic acid ameliorates paraquat-induced liver injury associated with improved gut microbial profile.

Induced Hepatic Glutathione and Metabolomic Alterations Following Mixed Pesticide and Fertilizer Exposures in Juvenile Leopard Frogs (*Lithobates sphenoccephala*).

In vitro cytotoxicity and genotoxicity of single and combined pesticides used by Bolivian farmers.

Disruption of developmental programming with long-term consequences after exposure to a glyphosate-based herbicide in a rat model.

Microcystin-LR in Primary Liver Cancers: An Overview.

Acute diquat poisoning causes rhabdomyolysis.

A Composition of Phytonutrients for Glycemic and Weight Management.

Prediction of mortality and morbidity following paraquat poisoning based on trend of liver and kidney injury.

Effects of replacing fish meal with cottonseed protein concentrate on the growth, immune responses, digestive ability and intestinal microbial flora in *Litopenaeus vannamei*.

Antagonism of Cyanamide-3-O-glucoside and protocatechuic acid on Aflatoxin B(1)-induced toxicity in zebrafish larva (*Danio rerio*).

The methyltransferase METTL3-mediated fatty acid metabolism revealed the mechanism of cinnamaldehyde on alleviating steatosis.

Toxic effects of glyphosate on the intestine, liver, brain of carp and on epithelioma papulosum cyprinid cells: Evidence from in vivo and in vitro research.

Protective Effects of Cinnamaldehyde on the Oxidative Stress, Inflammatory Response, and Apoptosis in the Hepatocytes of *Salmonella Gallinarum*-Challenged Young Chicks.

The Antitumor Effect of Cinnamaldehyde Derivative CB-PIC in Hepatocellular Carcinoma Cells via Inhibition of Pyruvate and STAT3 Signaling.

Effects of cinnamaldehyde on glucose-6-phosphate dehydrogenase activity, some biochemical and hematological parameters in diabetic rats.

Homicidal paraquat poisoning: Poisoned while drinking.

Successful Treatment of Severe Toxic Hepatitis and Encephalopathy Without Respiratory Failure Caused by Paraquat Intoxication.

Histopathological Findings in a Fatal Case of Paraquat Poisoning.

Comparison of Biochemical Parameters between Mouse Model and Human after Paraquat Poisoning.

Combination of TRP channel dietary agonists induces energy expending and glucose utilizing phenotype in HFD-fed mice.

Peripheral tissular analysis of rapamycin's effect as a neuroprotective agent in vivo.

Stimulation of de novo glutathione synthesis by nitrofurantoin for enhanced resilience of hepatocytes.

ROS-mediated PPAR/RXR inhibition contributes to acetochlor-induced apoptosis and autophagy in *Ctenopharyngodon idella* hepatic cells.

A clinico-epidemiological Study of acute Self-poisoning by different Types of herbicidal Substances used in agricultural Fields: A Study from Patients admitted in a Tertiary Care Hospital in West Bengal.

Acute toxicity, bioaccumulation and elimination of prometryn in tilapia (*Oreochromis niloticus*).

A Deadly Herbicide 'Paraquat Poisoning' and Miserable Death of a 19 Years Boy.

In vitro toxicity of glyphosate in Atlantic salmon evaluated with a 3D hepatocyte-kidney co-culture model.

Dynamic changes of serum cytokines in acute paraquat poisoning and changes in patients' immune function.

Alterations at biochemical, proteomic and transcriptomic levels in liver of tilapia (*Oreochromis niloticus*) under chronic exposure to environmentally relevant level of glyphosate.

Herbicidal activity and differential metabolism of lactofen in rat and loach on an enantiomeric level.

Parental diuron exposure causes lower hatchability and abnormal ovarian development in offspring of medaka (*Oryzias melastigma*).

Engineered resistance and risk assessment associated with insecticidal and weeds resistant transgenic cotton using wister rat model.

The significance of thymoquinone administration on liver toxicity of diazinon and cholinesterase activity; a recommendation for prophylaxis among individuals at risk.

Promising hepatoprotective effects of lycopene in different liver diseases.

Hibiscus sabdariffa L. polyphenolic-rich extract promotes muscle glucose uptake and inhibits intestinal glucose absorption with concomitant amelioration of Fe(2+) -induced hepatic oxidative injury.

Evaluation of the mode of action and human relevance of liver tumors in male mice treated with epyrifenacil.

Boron attenuated diethylnitrosamine induced hepatocellular carcinoma in C3H/HeN mice via alteration of oxidative stress and apoptotic pathway.

Efficacy and Mechanism of Buxue Yimu Pills on Gynecological Anemia: A Combination of Clinical and Network Pharmacology Study.

The Clostridium Metabolite P-Cresol Sulfate Relieves Inflammation of Primary Biliary Cholangitis by Regulating Kupffer Cells.

[Protective effect of active vitamin D on liver fibrosis induced by sodium arsenite in SD rats].

Inorganic arsenic exposure-induced premature senescence and senescence-associated secretory phenotype (SASP) in human hepatic stellate cells.

Pharmacological testing of therapeutics using normothermic machine perfusion: A pilot study of 2,4-dinitrophenol delivery to steatotic human livers.

Analysis of environmental chemical mixtures and nonalcoholic fatty liver disease: NHANES 1999-2014.

Trace Element Interactions, Inflammatory Signaling, and Male Sex Implicated in Reduced Growth Following Excess Oral Iron Supplementation in Pre-Weanling Rats.

Synbiotics, prebiotics and probiotics for solid organ transplant recipients.

Mechanism underlying the targeted regulation of the SOD1 3'UTR by the AUF1/Dicer1/miR-155/SOD1 pathway in sodium arsenite-induced liver injury.

Dioxin-elicited decrease in cobalamin redirects propionyl-CoA metabolism to the $\hat{\Gamma}^2$ -oxidation-like pathway resulting in acrylyl-CoA conjugate buildup.

Sub-lethal concentration of metamifop exposure impair gut health of zebrafish (*Danio rerio*).

Ameliorative role of inducible nitric oxide synthase inhibitors against sodium arsenite-induced renal and hepatic dysfunction in rats.

Recombinant FGF21 Attenuates Polychlorinated Biphenyl-Induced NAFLD/NASH by Modulating Hepatic Lipocalin-2 Expression.

Ginsenoside Rg1 protects mice against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced liver injury by inhibiting CYP1A1 through the aryl hydrocarbon receptor.

Multiomics analysis of the impact of polychlorinated biphenyls on environmental liver disease in a mouse model.

Suppressed farnesoid X receptor by iron overload in mice and humans potentiates iron-induced hepatotoxicity.

Flurochloridone induces responses of free radical reactions and energy metabolism disorders to BRL-3A cell.

Radiosynthesis and characterization of a carbon-11 PET tracer for receptor-interacting protein kinase 1.

AhR Activation Leads to Attenuation of Murine Autoimmune Hepatitis: Single-Cell RNA-Seq Analysis Reveals Unique Immune Cell Phenotypes and Gene Expression Changes in the Liver.

Physiologically-based pharmacokinetic model for 2,4-dinitrophenol.

[Effect of panlong needling at Jiaji (EX-B 2) on motor dysfunction in patients with Parkinson's disease of liver and kidney deficiency: a randomized controlled trial].

[Mechanism and material basis of Sparganii Rhizoma and vinegar-processed Sparganii Rhizoma in treatment of hyperlipidemia based on network pharmacology].

Application of FeOOH Nano-Ellipsoids as a Novel Nano-Based Iron Supplement: an In Vivo Study.

Flumioxazin, a PPO inhibitor: A weight-of-evidence consideration of its mode of action as a developmental toxicant in the rat and its relevance to humans.

Lentinan alleviates arsenic-induced hepatotoxicity in mice via downregulation of OX40/IL-17A and activation of Nrf2 signaling.

A Novel Ferritin-Core Analog Is a Safe and Effective Alternative to Oral Ferrous Iron for Treating Iron Deficiency during Pregnancy in Mice.

Phage therapy for refractory periapical periodontitis caused by *Enterococcus faecalis* in vitro and in vivo.

Emissions of dioxins and dioxin-like compounds and incidence of hepatocellular carcinoma in the United States.

Ubiquitinated gasdermin D mediates arsenic-induced pyroptosis and hepatic insulin resistance in rat liver.

PCB126 induced toxic actions on liver energy metabolism is mediated by AhR in rats.

Rare fatal poisoning through dermal exposure to paraquat.

Quercetin Zinc and Iron Metal Complexes Protect against Sodium Arsenite Intoxication in the Hepato-Renal System of Wistar Rats via the Oxidative Stress Pathway.

Environmentally relevant atrazine exposure leads to increases in DNA damage and changes in morphology in the hepatopancreas of crayfish (*Faxonius virilis*).

Can probiotic, prebiotic, and synbiotic supplementation modulate the gut-liver axis in type 2 diabetes? A narrative and systematic review of clinical trials.

A pilot study of oral iron therapy in erythropoietic protoporphyria and X-linked protoporphyria.

Availability and effects of n-TiO₂ and PCB77 in fish in vitro models of the intestinal barrier and liver under single- and/or co-exposure scenarios.

Effect of syringic acid on steroid and gonadotropic hormones, hematological indices, sperm characteristics and morphologies, and markers of tissue damage in methyl cellosolve-administered rats.

Synthesis, characterization, antioxidant potential, and cytotoxicity screening of new Cu(II) complexes with 4-(arylchalcogenyl)-1H-pyrazoles ligands.

Levels of non-dioxin-like PCBs (NDL-PCBs) in liver of loggerhead turtles (*Caretta caretta*) from the Tyrrhenian Sea (Southern Italy).

Cytotoxicity Mechanisms of Eight Major Herbicide Active Ingredients in Comparison to Their Commercial Formulations.

The dichloroacetamide safener benoxacor is enantioselectively metabolized by monkey liver microsomes and cytosol.

The desmoplastic growth pattern is associated with second-stage completion and longer survival in 2-stage hepatectomy for colorectal cancer liver metastases.

Integrated biomarker approach strongly explaining in vivo sub-lethal acute toxicity of butachlor on *Labeo rohita*.

Chemical Composition and Cytotoxic Activity of Extracts from *Carpesium divaricatum*: In Vitro- versus Field-Grown Plants.

Protective efficacy of *Coriandrum sativum* seeds against arsenic induced toxicity in Swiss albino mice.

Facile preparation of PVA hydrogels with adhesive, self-healing, antimicrobial, and on-demand removable capabilities for rapid hemostasis.

Differential Effects of Arsenic in Drinking Water on Mouse Hepatic and Intestinal Heme Oxygenase-1 Expression.

Occurrence and distribution of persistent organic pollutants in the liver and muscle of Atlantic blue sharks: Relevance and health risks.

Periplaneta americana Extract Pretreatment Alleviates Oxidative Stress and Inflammation and Increases the Abundance of Gut Akkermansia muciniphila in Diquat-Induced Mice.

Food-derived bioactive oligopeptide iron complexes ameliorate iron deficiency anemia and offspring development in pregnant rats.

Evaluation of the toxicological effects of atrazine-metolachlor in male rats: in vivo and in silico studies.

Down-regulation of hepatic cytochromes P450 1A1 and 1A2 by arsenic trioxide (ATO) in vivo and in vitro: A role of heme oxygenase 1.

Borax relieved the acrylamide-induced hematotoxic, hepatotoxic, immunotoxic and genotoxic damages in rainbow trout by regulating apoptosis and Nrf2 signaling pathway.

The toxicological profile of polychlorinated naphthalenes (PCNs).

Automating Predictive Toxicology Using ComptoxAI.

The Joint Influence of TI(+) and Thiol-Modifying Agents on Rat Liver Mitochondrial Parameters In Vitro.

Effects of three surfactants on the degradation and environmental risk of metolachlor in aquatic environment.

Beta-glucan effects on 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) toxicity in liver and brain.

Atrazine Exposure Induces Hepatic Metabolism Disorder in Male Adult Zebrafish.

Environmentally relevant arsenic exposure affects morphological and molecular endpoints associated with reproduction in the Western mosquitofish, *Gambusia affinis*.

AQP9 (Aquaporin 9) Determines Arsenic Uptake and Tolerance in Human Hepatocellular Carcinoma Cells In Vitro.

Research on the Relationship between Exposure to Dioxins and Cancer Incidence in Vietnam.

Paraquat induced oxidative stress, DNA damage, and cytotoxicity in lymphocytes.

Improving knowledge on genotoxicity dynamics in somatic and germ cells of crayfish (*Procambarus clarkii*).

[Rat serum containing oxymatrine inhibits the proliferation of LX2 human hepatic stellate cells induced by sodium arsenite via blocking PI3K/AKT pathway].

Hepatic Burdens of PCB and PCDD/F Congeners in Federally Endangered Shortnose Sturgeon and Atlantic Sturgeon from the Hudson River, New York, USA: Burden Patterns and Potential Consequences in Offspring.

Optimisation of an automated high-throughput micronucleus (HiTMiN) assay to measure genotoxicity of environmental contaminants.

Evaluation of dioxin induced transcriptomic responses in a 3D human liver microtissue model.

In vivo toxicity evaluations of halophenolic disinfection byproducts in drinking water: A multi-omics analysis of toxic mechanisms.

Effects of Vine Tea Extract on Meat Quality, Gut Microbiota and Metabolome of Wenchang Broiler.

Histopathological Alterations in the Livers of Chronic Hepatitis Patients Exposed to Agent Orange/Dioxin in Vietnam.

Genotoxic, biochemical and histological biomarkers of subacute concentrations of paraquat and glyphosate in Nile Tilapia.

Mitochondrial uncouplers induce proton leak by activating AAC and UCP1.

Effects of 1,3,7-tribromodibenzo-p-dioxin, a natural dioxin on chicken embryos: Comparison with effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

A glyphosate-based herbicide disrupted hematopoiesis and induced organ toxicities, ameliorated by vitamin B(12) in a mouse model.

The toxicity of perfluorodecanoic acid is mainly manifested as a deflected immune function.

Use of in vitro metabolism and biokinetics assays to refine predicted in vivo and in vitro internal exposure to the cosmetic ingredient, phenoxyethanol, for use in risk assessment.

Glycine alleviated diquat-induced hepatic injury via inhibiting ferroptosis in weaned piglets.

Comparative study of free respiration in liver mitochondria during oxidation of various electron donors and under conditions of shutdown of complex III of the respiratory chain.

Network-Pharmacology-Based Study on Active Phytochemicals and Molecular Mechanism of *Cnidium monnieri* in Treating Hepatocellular Carcinoma.

Pedunculagin isolated from *Plinia cauliflora* seeds exhibits genotoxic, antigenotoxic and cytotoxic effects in bacteria and human lymphocytes.

Dioxin-like polychlorinated biphenyl 126 (PCB126) disrupts gut microbiota-host metabolic dysfunction in mice via aryl hydrocarbon receptor activation.

Evaluation of the Acute Effects of Arsenic on Adults of the Neotropical Native Fish *Cnesterodon decemmaculatus* Using a Set of Biomarkers.

The Potential Role of Mitochondrial Acetaldehyde Dehydrogenase 2 in Urological Cancers From the Perspective of Ferroptosis and Cellular Senescence.

A Mixture of Endocrine Disruptors and the Pesticide Roundup(®) Induce Oxidative Stress in Rabbit Liver When Administered under the Long-Term Low-Dose Regimen: Reinforcing the Notion of Real-Life Risk Simulation.

Insights into the toxicokinetic, tissue distribution and maternal transfer of polychlorinated dibenzo-p-dioxins/dibenzofurans in laying hens fed with dioxin-associated dietary.

A Negative Feedback Loop and Transcription Factor Cooperation Regulate Zonal Gene Induction by 2, 3, 7, 8-Tetrachlorodibenzo-p-Dioxin in the Mouse Liver.

Effects of sequential blood purification on the organ function and lethality in patients with paraquat-induced multiple organ dysfunction syndrome.

Gut microbial metabolite p-cresol alters biotransformation of bisphenol A: Enzyme competition or gene induction?

Novel Coconut Vinegar Attenuates Hepatic and Vascular Oxidative Stress in Rats Fed a High-Cholesterol Diet.

Significant Correlations between p-Cresol Sulfate and Mycophenolic Acid Plasma Concentrations in Adult Kidney Transplant Recipients.

Concentrations and Toxic Implications of Dioxin-Like Polychlorinated Biphenyls in Soil Samples from Electrical Power Stations in Lagos, Nigeria.

Concentration of current-use pesticides in frogs from the Pampa region and correlation of a mixture toxicity index with biological effects.

Effects of the L-tyrosine-derived bacterial metabolite p-cresol on colonic and peripheral cells.

Extranodal Diffuse Large B-Cell Lymphoma of Bone and Soft Tissue Presenting With Marked Lymphedema and Hypercalcemia.

Effect of PINK1 and Parkin gene silencing on sodium arsenite-induced mitophagy in normal rat liver cells (BRL-3A).

A Novel Imidazolinone Derivative with 5-Arylidene and 2-Substituted Mercapto Group as Potent Anti-Hepatitis C Virus Compound.

The fate of sodium chlorite in simulated gastric and intestinal fluids and residues of chlorate in broiler chickens after oral administration of sodium chlorite.

Geographical distribution of dioxins, cadmium, and mercury concentrations in reindeer liver, kidneys, and muscle in the Russian Far North.

Liver-specific decrease in Tff3 gene expression in infant mice perinatally exposed to 2,3,7,8-tetrabromodibenzofuran or 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Probiotic Bacillus Alleviates Oxidative Stress-Induced Liver Injury by Modulating Gut-Liver Axis in a Rat Model.

Optical coherence tomography as an alternative tool for evaluating the effects of glyphosate on hybrid catfish (*Clarias gariepinus* × *Clarias macrocephalus*).

Genome-Wide ChIPseq Analysis of AhR, COUP-TF, and HNF4 Enrichment in TCDD-Treated Mouse Liver.

Rare co-inherited alpha-thalassemia minor and beta-thalassemia minor with heterozygous H63D mutation mistaken as iron deficiency anemia: a case report.

Oxyfluorfen induces hepatotoxicity through lipo-sugar accumulation and inflammation in zebrafish (*Danio rerio*).

Isatis phytoenic relieved atrazine induced growth retardation, hepato-renal dysfunction, and oxidative stress in Nile tilapia.

Bioaccumulation, metabolism and endocrine-reproductive effects of metolachlor and its S-enantiomer in adult zebrafish (*Danio rerio*).

Alterations in small RNA profiles in liver following a subchronic exposure to a low-dose pesticide mixture in Sprague-Dawley rats.

Acute exposition to Roundup Transorb[®] induces systemic oxidative stress and alterations in the expression of newly sequenced genes in silverside fish (*Odontesthes humensis*).

Evaluation of the genotoxic, mutagenic, and histopathological hepatic effects of polyoxyethylene amine (POEA) and glyphosate on *Dendropsophus minutus* tadpoles.

Assessment of transplacental and lactational genotoxicity of tembotrione in Wistar rats at different developmental stages by alkaline comet assay.

Characterization of the ERK1/2 phosphorylation profile in human and fish liver cells upon exposure to chemicals of environmental concern.

Atrazine intoxication in cattle, confirmed by gas chromatography-mass spectrometry.

Alterations in blood parameters, DNA damage, oxidative stress and antioxidant enzymes and immune-related genes expression in Nile tilapia (*Oreochromis niloticus*) exposed to glyphosate-based herbicide.

Herbicide atrazine exposure induce oxidative stress, immune dysfunction and WSSV proliferation in red swamp crayfish *Procambarus clarkii*.

Exposure to the herbicide butachlor activates hepatic stress signals and disturbs lipid metabolism in mice.

Recovery trend to co-exposure of iron oxide nanoparticles (Fe_3O_4) and glyphosate in liver tissue of the fish *Poecilia reticulata*.

Exposure to glyphosate and tetrachlorvinphos induces cytotoxicity and global DNA methylation in human cells.

Multiple Level Effects of Imazethapyr on *Leptodactylus latinasus* (Anura) Adult Frogs.

Exposure to 2,4-D herbicide induces hepatotoxicity in zebrafish larvae.

Improving pollutants environmental risk assessment using a multi model toxicity determination with in vitro, bacterial, animal and plant model systems: The case of the herbicide alachlor.

Glyphosate and Polyoxyethyleneamine Ingestion Leading to Renal, Hepatic, and Pulmonary Failure.

Effects of carboxylated multi-walled carbon nanotubes on bioconcentration of pentachlorophenol and hepatic damages in goldfish.

Ameliorative effect of N-acetylcysteine against glyphosate-induced hepatotoxicity in adult male albino rats: histopathological, biochemical, and molecular studies.

Route of exposure influences pesticide body burden and the hepatic metabolome in post-metamorphic leopard frogs.

N-acetylcysteine is more effective than ellagic acid in preventing acrolein induced dysfunction in mitochondria isolated from rat liver.

Toxic effects of atrazine on immune function in BALB/c mice.

Assessment of oxidative DNA damage, oxidative stress responses and histopathological alterations in gill and liver tissues of *Oncorhynchus mykiss* treated with linuron.

Inflammatory state and autism-like behavioral phenotype of offspring induced by maternal exposure to low-dose chemical mixtures during pregnancy in mice.

Can the exposure system adopted influence the results of the atrazine toxicity in hepatic tissue of fish?

Ground-glass hepatocellular inclusions are associated with polypharmacy.

Effects of the emulsifiable herbicide Dicamba on amphibian tadpoles: an underestimated toxicity risk?

Influence of temperature on biomarker responses and histology of the liver of American bullfrog tadpoles (*Lithobates catesbeianus*, Shaw, 1802) exposed to the herbicide Tebuthiuron.

The hepatotoxicity of atrazine exposure in mice involves the intestinal microbiota.

Prognostic value of liver and kidney function parameters and their correlation with the ratio of urine-to-plasma paraquat in patients with paraquat poisoning.

Growth performance and reproductive function impairment of glyphosate-based herbicide in male guinea pig (*Cavia porcellus*).

Evaluation of the hepatoprotective effects of curcumin and nanocurcumin against paraquat-induced liver injury in rats: Modulation of oxidative stress and Nrf2 pathway.

Physiological and morphoanatomical effects of glyphosate in *Eugenia uniflora*, a Brazilian plant species native to the Atlantic Forest biome.

HFE H63D Limits Nigral Vulnerability to Paraquat in Agricultural Workers.

Multi-omics phenotyping of the gut-liver axis reveals metabolic perturbations from a low-dose pesticide mixture in rats.

Mutagenicity and genotoxicity in juvenile African catfish, *Clarias gariepinus* exposed to formulations of glyphosate and paraquat.

Mitochondrial biochemical and histopathological defects induced by the herbicide pendimethalin in tilapia fish (*Oreochromis niloticus*).

2,4-Dichlorophenoxyacetic acid induced hepatic and renal toxicological perturbations in rat model: Attenuation by selenium supplementation.

Dietary squalene supplementation alleviates diquat-induced oxidative stress and liver damage of broiler chickens.

Investigation of *in vivo* unscheduled DNA synthesis in rabbit corneas following instillation of genotoxic agents.

Differential effects of arsenic species on Nrf2 and Bach1 nuclear localization in cultured hepatocytes.

Effects of glyphosate residues and different concentrate feed proportions in dairy cow rations on hepatic gene expression, liver histology and biochemical blood parameters.

Hepatotoxic Effects of Atrazine on *Clarias gariepinus* (Burchell, 1822): Biochemical and Histopathological Studies.

The use of combined high-fructose diet and glyphosate to model rats type 2 diabetes symptomatology.

The effect of chronic exposure to chloridazon and its degradation product chloridazon-desphenyl on signal crayfish *Pacifastacus leniusculus*.

Effects of subchronic exposure to environmentally relevant concentrations of the herbicide atrazine in the Neotropical fish *Astyanax altiparanae*.

Inflammatory lncRNA AK039862 regulates paraquat-inhibited proliferation and migration of microglial and neuronal cells through the Pafah1b1/Foxa1 pathway in co-culture environments.

Cholemic Nephrosis: An Autopsy Study of a Forgotten Entity.

HSPB5 (β -crystallin) confers protection against paraquat-induced oxidative stress at the organismal level in a tissue-dependent manner.

Effects of chronic glyphosate exposure on antioxidative status, metabolism and immune response in tilapia (GIFT, *Oreochromis niloticus*).

Resveratrol: Isolation, and Its Nanostructured Lipid Carriers, Inhibits Cell Proliferation, Induces Cell Apoptosis in Certain Human Cell Lines Carcinoma and Exerts Protective Effect Against Paraquat-Induced Hepatotoxicity.

Protective effect of genistein pre-treatment on paraquat hepatotoxicity in rats.

Cinnamaldehyde Improves Metabolic Functions in Streptozotocin-Induced Diabetic Mice by Regulating Gut Microbiota.

Protective Effects of Cinnamaldehyde on the Inflammatory Response, Oxidative Stress, and Apoptosis in Liver of *Salmonella typhimurium*-Challenged Mice.

Esophagitis dissecans superficialis associated with acute transoral paraquat poisoning: Clinical study of 15 cases.

Effect and Safety of Cinnamaldehyde on Immunosuppressed Mice with Invasive Pulmonary Candidiasis.

Cinnamaldehyde mitigates placental vascular dysfunction of gestational diabetes and protects from the associated fetal hypoxia by modulating placental angiogenesis, metabolic activity and oxidative stress.

Pediococcus pentosaceus ZJUA4-4 relieves oxidative stress and restores the gut microbiota in diquat-induced intestinal injury.

Glyphosate-induced lipid metabolism disorder contributes to hepatotoxicity in juvenile common carp.

An Unusual Case of Paraquat-Induced Rhabdomyolysis and Hepatic Injury Presenting With Takotsubo Cardiomyopathy.

Absorption, Distribution, Metabolism, and Excretion of a New Herbicide, Epyrifenacil, in Rats.

Primary Human Hepatocyte Spheroids as Tools to Study the Hepatotoxic Potential of Non-Pharmaceutical Chemicals.

Identification of the organic anion transporting polypeptides responsible for the hepatic uptake of the major metabolite of epyrifenacil, S-3100-CA, in mice.

Translation, ribosome biogenesis, and oxidative damage caused by chlorpyrifos exposure to common carp (*Cyprinus carpio* L.) liver: application of combined RNA-seq with sRNA-seq in risk evaluation of environmental toxicant chlorpyrifos.

Synthesis, optical properties, determination and imaging in living cells and bamboo of cinnamaldehyde derivatives.

Metribuzin-induced non-adverse liver changes result in rodent-specific non-adverse thyroid effects via uridine 5'-diphospho-glucuronosyltransferase (UDPGT, UGT) modulation.

Effects of simazine and food deprivation chronic stress on energy allocation among the costly physiological processes of male lizards (*Eremias argus*).

The problem with implementing fish farms in agricultural regions: A trial in a pampean pond highlights potential risks to both human and fish health.

Effects of Different Intensity Exercise on Glucose Metabolism and Hepatic IRS/PI3K/AKT Pathway in SD Rats Exposed with TCDD.

Chemical constituents and medicinal properties of *Allium* species.

Aryl Hydrocarbon Receptor (AhR) Activation by 2,3,7,8-Tetrachlorodibenzo-p-Dioxin (TCDD) Dose-Dependently Shifts the Gut Microbiome Consistent with the Progression of Non-Alcoholic Fatty Liver Disease.

Aryl hydrocarbon receptor (AHR) functions in infectious and sterile inflammation and NAD(+)-dependent metabolic adaptation.

Potential role of dietary chitosan nanoparticles against immunosuppression, inflammation, oxidative stress, and histopathological alterations induced by pendimethalin toxicity in Nile tilapia.

An Overview: The Toxicity of *Ageratina adenophora* on Animals and Its Possible Interventions.

Inducing, Collecting, and Storing Ascites.

Iron distribution in different tissues of homozygous Mask (msk/msk) mice and the effects of oral iron treatments.

Lipid metabolism disorders associated with dioxin exposure in a cohort of Chinese male workers revealed by a comprehensive lipidomics study.

Transcriptome-based analysis of blood samples reveals elevation of DNA damage response, neutrophil degranulation, cancer and neurodegenerative pathways in *Plasmodium falciparum* patients.

Effect of renal impairment on arsenic accumulation, methylation capacity, and safety in acute promyelocytic leukemia (APL) patients treated with arsenic trioxide.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin (TCDD)-Inducible Poly-ADP-Ribose Polymerase (TIPARP/PARP7) Catalytic Mutant Mice (TiparpH532A) Exhibit Increased Sensitivity to TCDD-Induced Hepatotoxicity and Lethality.

Fenofibrate, a peroxisome proliferator-activated receptor- α agonist, blocks steatosis and alters the inflammatory response in a mouse model of inflammation-dioxin interaction.

Association between occupational exposures and sarcoma incidence and mortality: systematic review and meta-analysis.

8-Formylpiperonylacetone B antagonizes doxorubicin-induced cardiotoxicity by suppressing heme oxygenase-1-dependent myocardial inflammation and fibrosis.

A molecular signature for the metabolic syndrome by urine metabolomics.

Circulating p-Cresyl Sulfate, Non-Hepatic Alkaline Phosphatase and Risk of Bone Fracture Events in Chronic Kidney Disease-Mineral Bone Disease.

Role of inhibiting Chk1-p53 pathway in hepatotoxicity caused by chronic arsenic exposure from coal-burning.

Gallic acid ameliorates sodium arsenite-induced renal and hepatic toxicity in rats.

Unconjugated p-cresol activates macrophage macropinocytosis leading to increased LDL uptake.

[The Comparison of Iron Deficiency Anemia Rat Treated with Hydroxypropyl Chitosan Ferrous Ion Complex and Ferrous Sulfate].

Testing in vitro tools for the prediction of cholestatic liver injury induced by non-pharmaceutical chemicals.

Inulin supplementation ameliorates hyperuricemia and modulates gut microbiota in Uox-knockout mice.

[Risk factors associated with acute kidney injury caused by pesticide poisoning].

Role of Endocrine-Disrupting Chemicals in the Pathogenesis of Non-Alcoholic Fatty Liver Disease: A Comprehensive Review.

Hard as Iron: A Case of Delayed Presentation of Severe Iron Toxicity With Diagnostic and Treatment Dilemmas.

Coenzyme Q(10) protected against arsenite and enhanced the capacity of 2,3-dimercaptosuccinic acid to ameliorate arsenite-induced toxicity in mice.

2,4-Dinitrophenol overdose - Everything old is new again.

Role of aryl hydrocarbon receptor (AHR) in overall retinoid metabolism: Response comparisons to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure between wild-type and AHR knockout mice.

Underlying mechanisms of cytotoxicity in HepG2 hepatocarcinoma cells exposed to arsenic, cadmium and mercury individually and in combination.

Influences of Selenium-Enriched Yeast on Growth Performance, Immune Function, and Antioxidant Capacity in Weaned Pigs Exposure to Oxidative Stress.

Assessment of fibrotic pathways induced by environmental chemicals using 3D-human liver microtissue model.

The antioxidant study proprieties of Thymus munbyanus aqueous extract and its beneficial effect on 2,4-Dichlorophenoxyacetic acid -induced hepatic oxidative stress in albino Wistar rats.

Mechanisms involved in the possible protective effect of chrysin against sodium arsenite-induced liver toxicity in rats.

Potent aneugenicity of 1-methylpyrene in human cells dependent on metabolic activation by endogenous enzymes.

Ameliorative role of bosentan, an endothelin receptor antagonist, against sodium arsenite-induced renal dysfunction in rats.

IRE1 \pm /NOX4 signaling pathway mediates ROS-dependent activation of hepatic stellate cells in NaAsO(2)-induced liver fibrosis.

Adverse effects of iron deficiency anemia on pregnancy outcome and offspring development and intervention of three iron supplements.

An enriched biosignature of gut microbiota-dependent metabolites characterizes maternal plasma in a mouse model of fetal alcohol spectrum disorder.

Elucidation of the species differences of epyrifenacil-induced hepatotoxicity between mice and humans by mass spectrometry imaging analysis in chimeric mice with humanized liver.

Reno-Hepatoprotective and Antidiabetic Properties of Methanol Leaf Extract of *Laportea Aestuans* in Wistar Rats.

Catalase deficiency induces reactive oxygen species mediated pexophagy and cell death in the liver during prolonged fasting.

A rat subchronic study transcriptional point of departure estimates a carcinogenicity study apical point of departure.

Single-Nuclei RNA Sequencing Assessment of the Hepatic Effects of 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Co-exposure to nTiO₂ impairs arsenic metabolism and affects antioxidant capacity in the marine shrimp *Litopenaeus vannamei*.

Associations Between Residential Exposure to Volatile Organic Compounds and Liver Injury Markers.

The Promising Role of Chitosan-Poloxamer 188 Nanocrystals in Improving Diosmin Dissolution and Therapeutic Efficacy against Ferrous Sulfate-Induced Hepatic Injury in Rats.

Proteomics and metabolic phenotyping define principal roles for the aryl hydrocarbon receptor in mouse liver.

The Improvement of the Adaptation Process of Tocopherol and Acetylsalicylic Acid in Offspring of Mothers Exposed to TCDD.

Suppression of apoptotic signaling in rat hepatocytes by non-dioxin-like polychlorinated biphenyls depends on the receptors CAR and PXR.

Co-occurrence of contaminants in marine fish from the North East Atlantic Ocean: Implications for human risk assessment.

Single and binary-combined toxic effects of acetochlor and Cu(2+) on goldfish (*Carassius auratus*) larvae.

Protective Effect of Dictyophora Polysaccharides on Sodium Arsenite-Induced Hepatotoxicity: A Proteomics Study.

Comparative hepatotoxicity of a herbicide, epyrifenacil, in humans and rodents by comparing the dynamics and kinetics of its causal metabolite.

Inhibitory effect of pirfenidone on pulmonary fibrosis in patients with acute paraquat poisoning.

Paraquat-induced acute kidney and liver injury: Case report of a survivor from Bangladesh.

Antioxidant, anti-inflammatory and protective potential of gallic acid against paraquat-induced liver toxicity in male rats.

Correction to: The effect of dietary tryptophan levels on oxidative stress of liver induced by diquat in weaned piglets.

Short-Chain Fatty Acids Alleviate Hepatocyte Apoptosis Induced by Gut-Derived Protein-Bound Uremic Toxins.

Effects of TI(+) on the inner membrane thiol groups, respiration, and swelling in succinate-energized rat liver mitochondria were modified by thiol reagents.

Rapid Glomerulotubular Nephritis as an Initial Presentation of a Lethal Diquat Ingestion.

Clothianidin alters leukocyte profiles and elevates measures of oxidative stress in tadpoles of the amphibian, *Rana pipiens*.

A Common Insecticide Induced-Oxidative Stress in Wistar Rats: Significance for Humans and Implications for Nutritional Modulation of Insecticide Toxicity.

Impact of Estrogen Withdrawal and Replacement in Female Mice along the Intestinal Tract. Comparison of E2 Replacement with the Effect of a Mixture of Low Dose Pollutants.

Characterization of human sulfotransferases catalyzing the formation of p-cresol sulfate and identification of mefenamic acid as a potent metabolism inhibitor and potential therapeutic agent for detoxification.

Effects of Acute Diquat Poisoning on Liver Mitochondrial Apoptosis and Autophagy in Ducks.

Effects of sublethal concentration of metamifop on hepatic lipid metabolism in adult zebrafish (*Danio rerio*).

Thioesterase induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin results in a futile cycle that inhibits hepatic β^2 -oxidation.

Comparison of the *in vitro* assays to investigate the hepatic metabolism of seven pesticides in *Cyprinus carpio* and *Oncorhynchus mykiss*.

Ceramide/protein phosphatase 2A axis is engaged in gap junction impairment elicited by PCB153 in liver stem-like progenitor cells.

Per- and polyfluoroalkyl mixtures toxicity assessment "Proof-of-Concept" illustration for the hazard index approach.

Endocrine, metabolic and apical effects of *in utero* and lactational exposure to non-dioxin-like 2,2',3,4,4',5,5'-heptachlorobiphenyl (PCB 180): A postnatal follow-up study in rats.

Pharmacokinetics of 2-phenoxyethanol and its major metabolite, phenoxyacetic acid, after dermal and inhaled routes of exposure: application to development PBPK model in rats.

Phytotoxic property of metabolites isolated from *Garcinia gardneriana*.

Genetics-Based Approach to Identify Novel Genes Regulated by the Aryl Hydrocarbon Receptor *in vitro* Mouse Liver.

Distribution and toxicity of persistent organic pollutants and methoxylated polybrominated diphenylethers in different tissues of the green turtle *Chelonia mydas*.

The enantioselective study of the toxicity effects of chiral acetochlor in HepG2 cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin exposure disrupts development of the visceral and ocular vasculature.

Effect of exposure to 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and polychlorinated biphenyls (PCBs) on mitochondrial DNA (mtDNA) copy number in rats.

Uremic Toxins in Organ Crosstalk.

The effect of *Ulva lactuca* and *Sargassum hemiphyllum* var. *chinense* on arsenic metabolites and enzymes in broilers.

In vivo comet assay in rabbit corneal epithelial cells following ocular instillation with genotoxic compounds.

Ethanol extract of *Vitellaria paradoxa* (Gaertn, F) leaves protects against sodium arsenite - induced toxicity in male wistar rats.

Paraquat poisoning in Andaman and Nicobar Islands - Government must intervene.

Acute liver injury associated with Oxyfluorfen toxicity.

Primary hepatocytes isolated from human and porcine donors display similar patterns of cytochrome p450 expression following exposure to prototypical activators of AhR, CAR and PXR.

HGF-Modified Dental Pulp Stem Cells Mitigate the Inflammatory and Fibrotic Responses in Paraquat-Induced Acute Respiratory Distress Syndrome.

Effect of uncouplers of oxidative phosphorylation on metabolism of propionate in liver explants from dairy cows.

Antioxidant effects of *Emblca officinalis* and *Zingiber officinalis* on arsenic and lead induced toxicity on Albino rats.

Smoke Chemistry, In Vitro Cytotoxicity, and Genotoxicity Demonstrates Enhanced Toxicity of Cigarillos Compared With Cigarettes.

Neuropathy and chloracne induced by 3,5,6-trichloropyridin-2-ol sodium: Report of three cases.

Importance of monitoring arsenic methylation metabolism in acute promyelocytic leukemia patients receiving the treatment of arsenic trioxide.

Lysosomal SLC46A3 modulates hepatic cytosolic copper homeostasis.

Protective effect of melatonin against herbicides-induced hepatotoxicity in rats.

Evaluation of aryl hydrocarbon receptor expression in oral squamous cell carcinoma and normal oral mucosa using western blot.

Bioanalytical screening of low levels of dioxins and dioxin-like PCBs in pig meat (pork) for checking compliance with EU maximum and action levels using highly sensitive "third generation" recombinant H4L7.5c2 rat hepatoma cells.

High levels of dioxins and PCBs in meat, fat and livers of free ranging pigs, goats, sheep and cows from the island of Curaçao.

A toxicity pathway-oriented approach to develop adverse outcome pathway: AHR activation as a case study.

Roundup causes embryonic development failure and alters metabolic pathways and gut microbiota functionality in non-target species.

Integrated ecotoxicological assessment of the complex interactions between chlorpyrifos and glyphosate on a non-target species *Cnesterodon decemmaculatus* (Jenyns, 1842).

Chronic Atrazine Exposure Beginning Prenatally Impacts Liver Function and Sperm Concentration With Multi-Generational Consequences in Mice.

Toxicological impacts of herbicide paraquat dichloride on histological profile (gills, liver, and kidney) of freshwater fish *Channa punctatus* (Bloch).

Toxicities of Neonicotinoid-Containing Pesticide Mixtures on Nontarget Organisms.

Transcriptome analysis of *Penaeus vannamei* hepatopancreas reveals differences in toxicity mechanisms between phoxim and prometryne.

Exposure to glyphosate during pregnancy induces neurobehavioral alterations and downregulation of Wnt5a-CaMKII pathway.

Determination of arsenicals in mouse tissues after simulated exposure to arsenic from rice for sixteen weeks and the effects on histopathological features.

Cross-Taxa Distinctions in Mechanisms of Developmental Effects for Aquatic Species Exposed to Trifluralin.

Orthotopic foetal lung tissue direct injection into lung showed a preventive effect against paraquat-induced acute lung injury in mice.

Systemic Paraquat Intoxication Presenting with Peripheral Ulcerative Keratitis: A Case Report and Literature Review.

Effect of zinc supplementation on chronic hepatorenal toxicity following oral exposure to glyphosate-based herbicide (Bushfire®) in rats.

The Nrf2-mediated defense mechanism associated with HFE genotype limits vulnerability to oxidative stress-induced toxicity.

The enantioselective enrichment, metabolism, and toxicity of fenoxaprop-ethyl and its metabolites in zebrafish.

Effect of glyphosate (Roundup Active®) on liver of tadpoles of the colombian endemic frog *Dendropsophus molitor* (amphibia: Anura).

Pterostilbene as a protective antioxidant attenuates diquat-induced liver injury and oxidative stress in 21-day-old broiler chickens.

Cytogenotoxic effect of propanil using the *Lens culinaris* Med and *Allium cepa* L test.

Sub-acute toxicological and behavioural effects of two candidate therapeutics, cinnamaldehyde and eugenol, for treatment of ESBL producing-quinolone resistant pathogenic Enterobacteriaceae.

Interference of goethite in the effects of glyphosate and Roundup® on ZFL cell line.

[Role of microbial-derived antioxidants on diquat-induced oxidative stress, endoplasmic reticulum stress and function in mice].

Comparison of the effects of resveratrol and its derivative pterostilbene on hepatic oxidative stress and mitochondrial dysfunction in piglets challenged with diquat.

Morphometric and proteomic responses of early-life stage rainbow trout (*Oncorhynchus mykiss*) to the aquatic herbicide diquat dibromide.

Toxicity of glyphosate in feed for weanling piglets and the mechanism of glyphosate detoxification by the liver nuclear receptor CAR/PXR pathway.

Antioxidant and Anti-Inflammatory Effects of Different Zinc Sources on Diquat-Induced Oxidant Stress in a Piglet Model.

Roundup-induced biochemical and histopathological changes in the liver and kidney of rats: the ameliorative effects of *Linum usitatissimum* oil.

Dimethylarsinic acid (DMA) enhanced lung carcinogenesis via histone H3K9 modification in a transplacental mouse model.

Modulation of antioxidant gene expressions by Roundup® exposure in the decapod *Macrobrachium potiana*.

Toxicity assessment of the herbicide acetochlor in the human liver carcinoma (HepG2) cell line.

Potential Role of Selenium Against Hepatotoxicity Induced by 2,4-Dichlorophenoxyacetic Acid in Albino Wistar Rats.

A comprehensive analysis of the animal carcinogenicity data for glyphosate from chronic exposure rodent carcinogenicity studies.

Effects of acrolein in comparison to its prodrug cyclophosphamide on human primary endothelial cells in vitro.

Hydrogen Sulfide Protects against Paraquat-Induced Acute Liver Injury in Rats by Regulating Oxidative Stress, Mitochondrial Function, and Inflammation.

Effects of metazachlor and its major metabolite metazachlor OA on early life stages of marbled crayfish.

MiR-130a-5p/Foxa2 axis modulates fetal lung development in congenital diaphragmatic hernia by activating the Shh/Gli1 signaling pathway.

Immunosuppressive drugs to reduce the mortality rate in patients with moderate to severe paraquat poisoning: A Meta-analysis.

Oxidative stress, histopathological alterations and anti-oxidant capacity in different tissues of largemouth bass (*Micropterus salmoides*) exposed to a newly developed sodium carbonate peroxyhydrate granular algacide formulated with hydrogen peroxide.

Assessment of the effects of atrazine, dichlorodiphenyltrichloroethane, and dimethoate on freshwater fish (*Oreochromis mossambicus*): a case study of the A2 farmlands in Chiredzi, in the southeastern part of Zimbabwe.

DNA damage in kidney and parenchymal and non-parenchymal liver cells of adult Wistar rats after subchronic oral treatment with tembotrione.

Magnesium supplementation ameliorates toxic effects of 2,4-dichlorophenoxyacetic acid in rat model.

Protective Effects of Cinnamaldehyde against Mesenteric Ischemia-Reperfusion-Induced Lung and Liver Injuries in Rats.

Coniferaldehyde ameliorates the lipid and glucose metabolism in palmitic acid-induced HepG2 cells via the LKB1/AMPK signaling pathway.

Dicamba use and cancer incidence in the agricultural health study: an updated analysis.

Hypoxia modifies the response to flutamide and linuron in male three-spined stickleback (*Gasterosteus aculeatus*).

Protective effects of Alda-1, an ALDH2 activator, on alcohol-derived DNA damage in the esophagus of human ALDH2*2 (Glu504Lys) knock-in mice.

Treatment with cinnamaldehyde reduces the visceral adiposity and regulates lipid metabolism, autophagy and endoplasmic reticulum stress in the liver of a rat model of early obesity.

Glyphosate Excretion is Associated With Steatohepatitis and Advanced Liver Fibrosis in Patients With Fatty Liver Disease.

Ingestion of organic acids and cinnamaldehyde improves tissue homeostasis of piglets exposed to enterotoxigenic *Escherichia coli* (ETEC).

Glyphosate exposures and kidney injury biomarkers in infants and young children.

Pterocarpus mildbraedii (Harms) extract resolves propanil-induced hepatic injury via repression of inflammatory stress responses in Wistar rats.

Dicamba elevates concentrations of S-adenosyl methionine but does not induce oxidative stress or alter DNA methylation in rainbow trout (*Oncorhynchus mykiss*) hepatocytes.

Glyphosate-based herbicides influence antioxidants, reproductive hormones and gut microbiome but not reproduction: A long-term experiment in an avian model.

Benoxacor is enantioselectively metabolized by rat liver subcellular fractions.

Cinnamaldehyde changes the dynamic balance of glucose metabolism by targeting ENO1.

Ozone Degradation of Prometryn in *Ruditapes philippinarum*: Response Surface Methodology Optimization and Toxicity Assessment.

Enantioselective in vitro metabolism and in vitro-in vivo correlation of the herbicide ethofumesate in a human model.

Meta-analysis of the efficacy of Xuebijing combined with hemoperfusion in treating paraquat poisoning.

Blood biomarkers of herbicide, insecticide, and fungicide toxicity to fish-a review.

Disruption of cytochrome P450 enzymes in the liver and small intestine in chicken embryos in ovo exposed to glyphosate.

Do trifluralin and tebuthiuron impair isolated rat liver mitochondria?

Hepatoprotective role of berberine against paraquat-induced liver toxicity in rat.

The Aryl Hydrocarbon Receptor in Energy Balance: The Road from Dioxin-Induced Wasting Syndrome to Combating Obesity with Ahr Ligands.

Gestational arsenic exposure and paternal intergenerational epigenetic inheritance.

Aryl hydrocarbon receptor (AHR)-mediated inflammation and resolution: Non-genomic and genomic signaling.

Epigenetic effects of low-level sodium arsenite exposure on human liver HepaRG cells.

Histone demethylase JHDM2A regulates H3K9 dimethylation in response to arsenic-induced DNA damage and repair in normal human liver cells.

Selenoprotein V protects against endoplasmic reticulum stress and oxidative injury induced by pro-oxidants.

Integrative transcriptomics and metabolomics explore the mechanism of kaempferol on improving nonalcoholic steatohepatitis.

Randomized, Placebo-Controlled Trial of Rifaximin Therapy for Lowering Gut-Derived Cardiovascular Toxins and Inflammation in CKD.

Weight of Evidence and Human Relevance Evaluation of the Benfluralin Mode of Action in Rats (Part II): Thyroid carcinogenesis.

Weight of evidence and human relevance evaluation of the benfluralin mode of action in rodents (Part I): Liver carcinogenesis.

Inflammation response after the cessation of chronic arsenic exposure and post-treatment of natural astaxanthin in liver: potential role of cytokine-mediated cell-cell interactions.

Glufosinate constrains synchronous and metachronous metastasis by promoting anti-tumor macrophages.

Nanosized drug-eluting bead for transcatheter arterial chemoembolization (ND-TACE).

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) dysregulates hepatic one carbon metabolism during the progression of steatosis to steatohepatitis with fibrosis in mice.

Rosa persica hydroalcoholic extract improves cadmium-hepatotoxicity by modulating oxidative damage and tumor necrosis factor- α status.

Evaluation of the Aryl Hydrocarbon Receptor Response in LMH 3D Spheroids.

Influence of Resveratrol on the Cardiovascular Health Effects of Chronic Kidney Disease.

Effects of 2,3,7,8-Tetrachlorodibenzo-p-dioxin on T Cell Differentiation in Primary Biliary Cholangitis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and Polychlorinated Biphenyl Coexposure Alters the Expression Profile of MicroRNAs in the Liver Associated with Atherosclerosis.

TCDD promotes liver fibrosis through disordering systemic and hepatic iron homeostasis.

Aryl hydrocarbon receptor (AHR) functions: Balancing opposing processes including inflammatory reactions.

Pdgfr β -Cre mediated knockout of the aryl hydrocarbon receptor protects mice from high-fat diet induced obesity and hepatic steatosis.

Capsaicinoid nonivamide improves nonalcoholic fatty liver disease in rats fed a high-fat diet.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) alters hepatic polyunsaturated fatty acid metabolism and eicosanoid biosynthesis in female Sprague-Dawley rats.

Marrubium vulgare L.: A Phytochemical and Pharmacological Overview.

Prebiotic inulin consumption reduces dioxin-like PCB 126-mediated hepatotoxicity and gut dysbiosis in hyperlipidemic Ldlr deficient mice.

Human CYP2E1-activated mutagenicity of dioxin-like PCBs 105 and 118-Experimental data consistent with molecular docking results.

Aryl Hydrocarbon Receptor-Dependent inductions of omega-3 and omega-6 polyunsaturated fatty acid metabolism act inversely on tumor progression.

The role of PSMB5 in sodium arsenite-induced oxidative stress in L-02 cells.

Transgenerational epigenetic and transcriptomic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure in rat.

Arsenic Exposure Decreases Adiposity During High-Fat Feeding.

Aryl hydrocarbon receptor nuclear translocators (ARNT1, ARNT2, and ARNT3) of white sturgeon (*Acipenser transmontanus*): Sequences, tissue-specific expressions, and response to β -naphthoflavone.

Low concentrations of sodium arsenite induce hepatotoxicity in prepubertal male rats.

Iron absorption from supplements is greater with alternate day than with consecutive day dosing in iron-deficient anemic women.

Transplacental arsenic exposure produced 5-methylcytosine methylation changes and aberrant microRNA expressions in livers of male fetal mice.

A combination of monosodium glutamate and high-fat and high-fructose diets increases the risk of kidney injury, gut dysbiosis and host-microbial co-metabolism.

Research Note: Evaluation of dietary administration of sodium chlorate and sodium nitrate for *Histomonas meleagridis* prophylaxis in turkeys.

Combined toxicity of imidacloprid, acetochlor, and tebuconazole to zebrafish (*Danio rerio*): acute toxicity and hepatotoxicity assessment.

Undernutrition combined with dietary mineral oil hastens depuration of stored dioxin and polychlorinated biphenyls in ewes. 2. Tissue distribution, mass balance and body burden.

A Case of a 15-Month-Old With Periorbital Edema and Severe Anemia.

Temporal and tissue-specific activation of aryl hydrocarbon receptor in discrete mouse models of kidney disease.

The impaired redox balance in peroxisomes of catalase knockout mice accelerates nonalcoholic fatty liver disease through endoplasmic reticulum stress.

The Natural Metabolite 4-Cresol Improves Glucose Homeostasis and Enhances β^2 -Cell Function.

CharXgen-Activated Bamboo Charcoal Encapsulated in Sodium Alginate Microsphere as the Absorbent of Uremic Toxins to Retard Kidney Function Deterioration.

Simple and visible detection of duck hepatitis B virus in ducks and geese using loop-mediated isothermal amplification.

Chlorogenic acid prevents hepatotoxicity in arsenic-treated mice: role of oxidative stress and apoptosis.

Human CYP1B1-dependent genotoxicity of dioxin-like polychlorinated biphenyls in mammalian cells.

In vivo acute toxicity and anti-gastric evaluation of a novel dichloro Schiff base: Bax and HSP70 alteration.

Porphobilinogen synthase: An equilibrium of different assemblies in human health.

Physiologically based toxicokinetic models and in silico predicted partition coefficients to estimate tetrachlorodibenzo-p-dioxin transfer from feed into growing pigs.

Validity of using a relative potency factor approach for the risk management of dioxin-like polychlorinated naphthalenes.

Skeletal toxicity resulting from exposure of growing male rats to coplanar PCB 126 is associated with disruption of calcium homeostasis and the GH-IGF-1 axis and direct effects on bone formation.

In vitro toxicity and molecular interacting mechanisms of chloroacetic acid to catalase.

Gene co-regulation and co-expression in the aryl hydrocarbon receptor-mediated transcriptional regulatory network in the mouse liver.

A systematic review on hepatoprotective activity of quercetin against various drugs and toxic agents: Evidence from preclinical studies.

Involvement of metallothionein, homocysteine and B-vitamins in the attenuation of arsenic-induced uterine disorders in response to the oral application of hydro-ethanolic extract of *Moringa oleifera* seed: a preliminary study.

Transporter Gene Regulation in Sandwich Cultured Human Hepatocytes Through the Activation of Constitutive Androstane Receptor (CAR) or Aryl Hydrocarbon Receptor (AhR).

Hepato-Genoprotective Activities of Methanol Extract of The Stem Bark of *Adansonia Digitata* LINN. In Wistar Rats Challenged with Sodium Arsenite.

The mitochondria-targeted derivative of the classical uncoupler of oxidative phosphorylation carbonyl cyanide m-chlorophenylhydrazone is an effective mitochondrial recoupler.

Attenuation of potassium dichromate and sodium arsenite toxicities by methanol extract of *Rauvolfia vomitoria* in mice.

The Protective Effect of Aspirin Eugenol Ester on Paraquat-Induced Acute Liver Injury Rats.

Holly (*Ilex latifolia* Thunb.) Polyphenols Extracts Alleviate Hepatic Damage by Regulating Ferroptosis Following Diquat Challenge in a Piglet Model.

Cytochrome P450 Expression and Chemical Metabolic Activity before Full Liver Development in Zebrafish.

A Case of Paraquat Poisoning Presenting With Spontaneous Pneumothorax and Pneumomediastinum.

Effects on the Liver Transcriptome in Baltic Salmon: Contributions of Contamination with Organohalogen Compounds and Origin of Salmon.

Telomeres as targets for the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and polychlorinated biphenyls (PCBs) in rats.

Metabolomics Profiling and Diagnosis Biomarkers Searching for Drug-Induced Liver Injury Implicated to *Polygonum multiflorum*: A Cross-Sectional Cohort Study.

InÂ vitro profiling of the potential endocrine disrupting activities affecting steroid and aryl hydrocarbon receptors of compounds and mixtures prevalent in human drinking water resources.

Tissue- and Region-Specific Accumulation of Arsenic Species, Especially in the Brain of Mice, After Long-term Arsenite Exposure in Drinking Water.

Aspirin Eugenol Ester Attenuates Paraquat-Induced Hepatotoxicity by Inhibiting Oxidative Stress.

In vitro effects of selected endocrine disruptors (DEHP, PCB118, BPA) on narrow-clawed crayfish (*Astacus leptodactylus*) primary cells.

Serum metabolic changes associated with dioxin exposure in a Chinese male cohort.

Effects of curcumin, D-pinitol alone or in combination in cytotoxicity induced by arsenic in PC12 cells.

Xanthohumol Effect on 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Treated Japanese Quails in Terms of Serum Lipids, Liver Enzymes, Estradiol, and Thyroid Hormones.

Correlation of polyamines, acrolein-conjugated lysine and polyamine metabolic enzyme levels with age in human liver.

Dietary Iron Overload Differentially Modulates Chemically-Induced Liver Injury in Rats.

Herbicide Widespread: The Effects of Pethoxamid on Nonalcoholic Fatty Liver Steatosis In Vitro.

Behavioral impairments in infant and adult mouse offspring exposed to 2,3,7,8-tetrabromodibenzofuran in utero and via lactation.

Over-gene expression in the apoptotic, oxidative damage and liver injure in female rats exposed to butralin.

Protective effect of *Mucuna pruriens* against arsenic-induced liver and kidney dysfunction and neurobehavioral alterations in rats.

Net release and uptake of xenometabolites across intestinal, hepatic, muscle, and renal tissue beds in healthy conscious pigs.

Potentials and pitfalls of transient in vitro reporter bioassays: interference by vector geometry and cytotoxicity in recombinant zebrafish cell lines.

Mass Balance, Metabolism, and Excretion of Cenobamate, a New Antiepileptic Drug, After a Single Oral Administration in Healthy Male Subjects.

Biotransformation and oxidative stress responses in relation to tissue contaminant burden in *Clarias gariepinus* exposed to simulated leachate from a solid waste dumpsite in Calabar, Nigeria.

PINK1/Parkin-mediated mitophagy is involved in NaAsO₂-induced apoptosis of human hepatic cells through activation of ERK signaling.

Piceatannol Ameliorates Hepatic Oxidative Damage and Mitochondrial Dysfunction of Weaned Piglets Challenged with Diquat.

Synthesis of cyclophosphamide metabolites by a peroxygenase from *Marasmius rotula* for toxicological studies on human cancer cells.

Organic selenium supplement partially alleviated diquat-induced oxidative insults and hepatic metabolic stress in nursery pigs.

Toxicity of Gold Nanoparticles in Mice due to Nanoparticle/Drug Interaction Induces Acute Kidney Damage.

Tissue distribution, hormonal regulation, ontogeny, diurnal expression, and induction of mouse cystine transporters Slc3a1 and Slc7a9.

Dioxin-like and non-dioxin-like PCBs differentially regulate the hepatic proteome and modify diet-induced nonalcoholic fatty liver disease severity.

Rethinking toxicity testing: Influence of aging on the outcome of long-term toxicity testing and possible remediation.

Causes and possibilities to circumvent cyclophosphamide toxicity.

Effect of Oral Supplementation of Healthy Pregnant Sows with Sucrosomial Ferric Pyrophosphate on Maternal Iron Status and Hepatic Iron Stores in Newborn Piglets.

Polybrominated dibenzo-p-dioxins (PBDDs) and - dibenzofurans (PBDFs) in cod (*Gadus morhua*) liver-derived products from 1972 to 2017.

Enhanced alcohol degradation and hepatic protective effects of an *Acetobacter Pasteurianus*-derived product, CureZyme-ACE, in an acute intoxication rat model.

[Injury of L-02 hepatocytes induced by NaAsO₂ is related to down-regulated expression of p14ARF and increased expression of MDM2 and p53].

A Comparative Study of the Action of Protonophore Uncouplers and Decoupling Agents as Inducers of Free Respiration in Mitochondria in States 3 and 4: Theoretical and Experimental Approaches.

The aryl hydrocarbon receptor mediates sex ratio distortion in the embryos sired by TCDD-exposed male mice.

Dioxin-like polybrominated biphenyls (PBBs) and ortho-substituted PBBs in edible cod (*Gadus morhua*) liver oils and canned cod livers.

Compositional profiles, persistency and toxicity of polychlorinated naphthalene (PCN) congeners in edible cod liver products from 1972 to 2017.

Exposure effects of iron oxide nanoparticles and iron salts in blackfish (*Capoeta fusca*): Acute toxicity, bioaccumulation, depuration, and tissue histopathology.

Kaempferol modulates TCDD- and t-BHQ-induced drug-metabolizing enzymes and luteolin enhances this effect.

Dioxin male rat reproductive toxicity mode of action and relative potency of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,7,8-tetrachlorodibenzofuran characterized by fetal pituitary and testis transcriptome profiling.

Metformin lowers glucose 6-phosphate in hepatocytes by activation of glycolysis downstream of glucose phosphorylation.

Bioisosteric Replacement of Amide Group with 1,2,3-Triazoles in Acetaminophen Addresses Reactive Oxygen Species-Mediated Hepatotoxic Insult in Wistar Albino Rats.

Mechanisms of Metabolism Interaction Between p-Cresol and Mycophenolic Acid.

Evaluation of the Effects of Agro Pesticides Use on Liver and Kidney Function in Farmers from Buea, Cameroon.

Protection against Mitochondrial Oxidative-Stress by Flesh-Extract of Edible Freshwater Snail *Bellamya bengalensis* Prevents Arsenic Induced DNA and Tissue Damage.

Effects of sublethal and realistic concentrations of the commercial herbicide atrazine in Pacu (*Piaractus mesopotamicus*): Long-term exposure and recovery assays.

Graves' disease: Epidemiology, genetic and environmental risk factors and viruses.

Sub-chronic exposure to Kalach 360 SL-induced damage in rats' liver and hematological system.

Comparative cyto- and genotoxicity assessment of glyphosate and glyphosate-based herbicides in human peripheral white blood cells.

Single and joint effects of chronic exposure to chlorpyrifos and glyphosate based pesticides on structural biomarkers in *Cnesterodon decemmaculatus*.

[Xuebijing improves clinical prognosis and reduces mortality in patients with acute paraquat poisoning: a Meta-analysis included 1 429 patients].

A glyphosate-based herbicide induces sub-lethal effects in early life stages and liver cell line of rainbow trout, *Oncorhynchus mykiss*.

Genotoxic, cytotoxic, and cytopathological effects in rats exposed for 18 months to a mixture of 13 chemicals in doses below NOAEL levels.

Effects of chronic glyphosate exposure to pregnant mice on hepatic lipid metabolism in offspring.

Effects of 2,4-D-based herbicide (DMA[®] 806) on sensitivity, respiration rates, energy reserves and behavior of tadpoles.

Hepatoprotective effect of N-acetylcystein loaded niosomes on liver function in paraquat-induced acute poisoning.

Cellular, humoral and molecular responses in rainbow trout (*Oncorhynchus mykiss*) exposed to a herbicide and subsequently infected with infectious hematopoietic necrosis virus.

Metazachlor: Mode of action analysis for rat liver tumour formation and human relevance.

Hepatoprotective effects of the n-butanol extract from *Perralderia coronopifolia* Coss. against PCP-induced toxicity in Wistar albino rats.

Cytochrome P450 and Glutathione-S-Transferase Activity are Altered Following Environmentally Relevant Atrazine Exposures in Crayfish (*Faxonius virilis*).

Kinetics of the metabolic effects, distribution spaces and lipid-bilayer affinities of the organo-chlorinated herbicides 2,4-D and picloram in the liver.

Comparison of four pharmacological strategies aimed to prevent the lung inflammation and paraquat-induced alveolar damage.

Effects of the glyphosate-based herbicide roundup on the survival, immune response, digestive activities and gut microbiota of the Chinese mitten crab, *Eriocheir sinensis*.

Gene expression, genotoxicity, and physiological responses in an Amazonian fish, *Colossoma macropomum* (CUVIER 1818), exposed to Roundup[®] and subsequent acute hypoxia.

Clinical outcome of paraquat poisoning during pregnancy.

Systematic review and meta-analysis of the efficacy and safety of immunosuppressive pulse therapy in the treatment of paraquat poisoning.

Toxicological effects of anthropogenic activities in *Geophagus brasiliensis* from a coastal river of southern Brazil: A biomarker approach.

Inflammatory Effects of Subacute Exposure of Roundup in Rat Liver and Adipose Tissue.

[Establishment and evaluation of acute diquat poisoning model in Wistar rats].

How Glyphosate Impairs Liver Condition in the Field Lizard *Podarcis siculus* (Rafinesque-Schmaltz, 1810): Histological and Molecular Evidence.

Retrospective study of clinical features and prognosis of edaravone in the treatment of paraquat poisoning.

Histopathological and ultrastructural indices for the assessment of glyphosate-based herbicide cytotoxicity in decapod crustacean hepatopancreas.

Homicidal Paraquat Poisoning.

The Alexipharmic Mechanisms of Five Licorice Ingredients Involved in CYP450 and Nrf2 Pathways in Paraquat-Induced Mice Acute Lung Injury.

The Critical Role of X Chromosome-Linked Inhibitor of Apoptosis (XIAP) in Differential Synergism Induced by Pentachlorophenol and Copper-1,10-Phenanthroline Complex in Normal and Cancer Liver Cells.

Antioxidative status, immunological responses, and heat shock protein expression in hepatopancreas of Chinese mitten crab, *Eriocheir sinensis* under the exposure of glyphosate.

Hepatotoxicity and reproductive disruption in male lizards (*Eremias argus*) exposed to glufosinate-ammonium contaminated soil.

Enantioselective Toxicity of Chiral Herbicide Metolachlor to *Microcystis aeruginosa*.

[Clinical effect of haemoperfusion combined with continuous veno-veno haemofiltration in treatment of paraquat poisoning: a Meta-analysis].

Histological evaluation of vital organs of the livebearer *Jenynsia multidentata* (Jenyns, 1842) exposed to glyphosate: A comparative analysis of Roundup(®) formulations.

Antioxidant activities of *Moringa oleifera* leaf extract against pendimethalin-induced oxidative stress and genotoxicity in Nile tilapia, *Oreochromis niloticus* (L.).

Protective and anti-inflammatory effects of hydroalcoholic leaf extract of *Origanum vulgare* on oxidative stress, TNF- α gene expression and liver histological changes in paraquat-induced hepatotoxicity in rats.

Using mathematical modeling to infer the valence state of arsenicals in tissues: A PBPK model for dimethylarsinic acid (DMA(V)) and dimethylarsinous acid (DMA(III)) in mice.

Effects of s-metolachlor on early life stages of marbled crayfish.

Oxadiazon affects the expression and activity of aldehyde dehydrogenase and acylphosphatase in human striatal precursor cells: A possible role in neurotoxicity.

Biomarkers at different levels of organisation after atrazine formulation (SIPTRAN 500SC(®)) exposure in *Rhinella schneideri* (Anura: Bufonidae) Neotropical tadpoles.

Exposure to atrazine during puberty reduces sperm viability, increases weight gain and alters the expression of key metabolic genes in the liver of male mice.

Cinnamaldehyde ameliorates STZ-induced rat diabetes through modulation of IRS1/PI3K/AKT2 pathway and AGEs/RAGE interaction.

Urinary acrolein metabolite levels in severe acute alcoholic hepatitis patients.

Assessment of hematological, hepato-renal, antioxidant, and hormonal responses of *Clarias gariepinus* exposed to sub-lethal concentrations of oxyfluorfen.

Modulation of the multixenobiotic resistance mechanism in *Danio rerio* hepatocyte culture (ZF-L) after exposure to glyphosate and Roundup(®).

Metabolic Activation and Cytotoxicity of Aloe-Emodin Mediated by Sulfotransferases.

Diquat Determines a Deregulation of lncRNA and mRNA Expression in the Liver of Postweaned Piglets.

Effects of inhibition of hepatic sulfotransferase activity on renal genotoxicity induced by lucidin-3-O-primeveroside.

Glyphosate disrupts redox status and up-regulates metallothionein I and II genes expression in the liver of adult rats. Alleviation by quercetin.

Enantiomeric environmental behavior, oxidative stress and toxin release of harmful cyanobacteria *Microcystis aeruginosa* in response to napropamide and acetochlor.

Redox-dependent catalase mimetic cerium oxide-based nanozyme protect human hepatic cells from 3-AT induced acatalasemia.

Metabolic activity testing can underestimate acute drug cytotoxicity as revealed by HepG2 cell clones overexpressing cytochrome P450 2C19 and 3A4.

The gut microbiota and its relationship with chronic kidney disease.

lncRNA-241 inhibits 1,2-Dichloroethane-induced hepatic apoptosis.

Expression and Functional Analysis of Hepcidin from Mandarin Fish (*Siniperca chuatsi*).

(¹¹C)-Labeled Pictilisib (GDC-0941) as a Molecular Tracer Targeting Phosphatidylinositol 3-Kinase (PI3K) for Breast Cancer Imaging.

Exosomal MALAT1 derived from hepatic cells is involved in the activation of hepatic stellate cells via miRNA-26b in fibrosis induced by arsenite.

Functions of aryl hydrocarbon receptor (AHR) and CD38 in NAD metabolism and nonalcoholic steatohepatitis (NASH).

AhR Activation Leads to Massive Mobilization of Myeloid-Derived Suppressor Cells with Immunosuppressive Activity through Regulation of CXCR2 and MicroRNA miR-150-5p and miR-543-3p That Target Anti-Inflammatory Genes.

Dietary iron deficiency impaired intestinal immune function of on-growing grass carp under the infection of *Aeromonas hydrophila*: Regulation of NF- κ B and TOR signaling.

Design, synthesis and biological evaluation of novel FFA1/GPR40 agonists: New breakthrough in an old scaffold.

Killing Effects of IFN R(-/-) Mouse NK Cells Activated by HN Protein of NDV on Mouse Hepatoma Cells and Possible Mechanism with Syk and NF- κ B.

Tissue-Specific Peculiarities of Vibration-Induced Hypoxia in Rabbit Liver and Kidney.

Aryl Hydrocarbon Receptor Signaling Prevents Activation of Hepatic Stellate Cells and Liver Fibrogenesis in Mice.

Novel diterpenoid-type activators of the Keap1/Nrf2/ARE signaling pathway and their regulation of redox homeostasis.

Understanding Environmental Contaminants' Direct Effects on Non-alcoholic Fatty Liver Disease Progression.

A comprehensive review on hepatoprotective and nephroprotective activities of chrysin against various drugs and toxic agents.

Industrial, Biocide, and Cosmetic Chemical Inducers of Cholestasis.

LC-MS/MS study of the degradation processes of nitisinone and its by-products.

Effects of Aryl Hydrocarbon Receptor Deficiency on PCB-77-Induced Impairment of Glucose Homeostasis during Weight Loss in Male and Female Obese Mice.

Gene expression alterations of human liver cancer cells following borax exposure.

Involvement of proinflammatory cytokines and metallothionein in the repairing of arsenic-mediated uterine tissue damage by curcumin.

Rapid Analysis of Effects of Environmental Toxicants on Tumorigenesis and Inflammation Using a Transgenic Zebrafish Model for Liver Cancer.

Disruption of Telomere Integrity and DNA Repair Machineries by KML001 Induces T Cell Senescence, Apoptosis, and Cellular Dysfunctions.

High temperature aggravates the effects of pesticides in goldfish.

3-Methylcholanthrene Induces Chylous Ascites in TCDD-Inducible Poly-ADP-Ribose Polymerase (Tiparp) Knockout Mice.

Comparative liver function assessment of natural and available drug (Ferrous sulfate) for iron-deficiency anemia in rat model.

Sodium arsenite augments sensitivity of *Echinococcus granulosus* protozoa to albendazole.

2,3,7,8-tetrachlorodibenzo-p-dioxin suppresses the growth of human colorectal cancer cells in vitro: Implication of the aryl hydrocarbon receptor signaling.

Crizotinib-induced erosive esophagitis in a pediatric patient with neuroblastoma.

Role of Aryl Hydrocarbon Receptor (AhR) in the Regulation of Immunity and Immunopathology During *Trypanosoma cruzi* Infection.

Iron Oversupplementation Causes Hippocampal Iron Overloading and Impairs Social Novelty Recognition in Nursing Piglets.

Ultrasensitivity dynamics of diverse aryl hydrocarbon receptor modulators in a hepatoma cell line.

Urinary 2,5-dichlorophenol and 2,4-dichlorophenol concentrations and prevalent disease among adults in the National Health and Nutrition Examination Survey (NHANES).

KML001, an arsenic compound, as salvage chemotherapy in refractory biliary tract cancers: A prospective study.

Tropolone-induced effects on the unfolded protein response pathway and apoptosis in multiple myeloma cells are dependent on iron.

The protective effect exerted by dietary borax on toxicity metabolism in rainbow trout (*Oncorhynchus mykiss*) tissues.

Constitutive Activation of the Human Aryl Hydrocarbon Receptor in Mice Promotes Hepatocarcinogenesis Independent of Its Coactivator Gadd45b.

Polychlorinated biphenyl exposures differentially regulate hepatic metabolism and pancreatic function: Implications for nonalcoholic steatohepatitis and diabetes.

Development of a database on key characteristics of human carcinogens.

Gut microbiome disruption altered the biotransformation and liver toxicity of arsenic in mice.

Effects of Simvastatin on Fetal Cardiac Impairment in the Diaphragmatic Experimental Hernia Model.

Assessment of Acute Serum Iron, Non-Transferrin-Bound Iron, and Gastrointestinal Symptoms with 3-Week Consumption of Iron-Enriched *Aspergillus oryzae* Compared with Ferrous Sulfate.

Paraquat: The Poison Potion.

Oxidative stress, lysosomal damage and dysfunctional autophagy in molluscan hepatopancreas (digestive gland) induced by chemical contaminants.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) Disrupts Control of Cell Proliferation and Apoptosis in a Human Model of Adult Liver Progenitors.

Genome-Scale Characterization of Toxicity-Induced Metabolic Alterations in Primary Hepatocytes.

Gut Microbiota in Alcoholic Hepatitis is Disparate from Those in Acute Alcoholic Pancreatitis and Biliary Disease.

Characterizing the Role of HMG-CoA Reductase in Aryl Hydrocarbon Receptor-Mediated Liver Injury in C57BL/6 Mice.

A dual mixture of persistent organic pollutants modifies carbohydrate metabolism in the human hepatic cell line HepaRG.

Effect of in ovo glyphosate injection on embryonic development, serum biochemistry, antioxidant status and histopathological changes in newly hatched chicks.

A comparative study of 3 alternative avian toxicity testing methods: Effects on hepatic gene expression in the chicken embryo.

Cholestatic liver disease results increased production of reactive aldehydes and an atypical periportal hepatic antioxidant response.

8-Formylpiperonylacetone B Antagonizes Paraquat-Induced Hepatotoxicity by Suppressing Oxidative Stress.

Effect of Benzo(a)pyrene on the Expression of miR-483-3p in Hepatocyte Primary Culture and Rat Liver.

Comparative toxicoproteogenomics of mouse and rat liver identifies TCDD-resistance genes.

Estrogen withdrawal and replacement differentially target liver and adipose tissues in female mice fed a high-fat high-sucrose diet: impact of a chronic exposure to a low-dose pollutant mixture(â†).

Hepatic heparan sulfate is a master regulator of hepcidin expression and iron homeostasis in human hepatocytes and mice.

Disruption of flavin homeostasis in isolated rat liver mitochondria.

A retrospective investigation into the occurrence and human exposure to polychlorinated naphthalenes (PCNs), dibenzo-p-dioxins and furans (PCDD/Fs) and PCBs through cod liver products (1972-2017).

AhR Activation in Pharmaceutical Development: Applying Liver Gene Expression Biomarker Thresholds to Identify Doses Associated With Tumorigenic Risks in Rats.

Different stability-indicating chromatographic methods for specific determination of paracetamol, dantrolene sodium, their toxic impurities and degradation products.

Gut microbial transformation of the dietary mutagen MeIQx may reduce exposure levels without altering intestinal transport.

Severe ARDS Complicating an Acute Intentional Cresol Poisoning.

[Assessment of prenatal care for indigenous women in Brazil: findings from the First National Survey of Indigenous People's Health and Nutrition].

2,3,7,8-Tetrachlorodibenzo-p-dioxin modifies alternative splicing in mouse liver.

Mixture toxicity effects and uptake of titanium dioxide (TiO₂) nanoparticles and 3,3',4,4'-tetrachlorobiphenyl (PCB77) in juvenile brown trout following co-exposure via the diet.

Defining the Contribution of CYP1A1 and CYP1A2 to Drug Metabolism Using Humanized CYP1A1/1A2 and Cyp1a1/Cyp1a2 Knockout Mice.

The impact of maternally derived dioxins on embryonic development and hepatic AHR signaling in a long-lived apex predator.

Metabolism of 3-[5'-deoxy-5'-(dimethylarsinoyl)- β -ribofuranosyloxy]-2-hydroxypropylene glycol in an artificial digestive system.

Effect of Dioxins in Milk on the 3D Cultured Primary Buffalo Hepatocyte Model System.

Effects of hot melt extrusion processed nano-iron on growth performance, blood composition, and iron bioavailability in weanling pigs.

Effect of plant extracts on the genotoxicity of 1'-hydroxy alkenylbenzenes.

A Quantitative HILIC-MS/MS Assay of the Metabolic Response of Huh-7 Cells Exposed to 2,3,7,8-Tetrachlorodibenzo-p-Dioxin.

Review of a Case of Paraquat Poisoning in a Tertiary Care Rural-based ICU.

Pollutants released from the pulp paper industry: Aquatic toxicity and their health hazards.

Cytotoxicity of hexahelicene and its effect on the aryl hydrocarbon receptor pathway.

Gender- and dose-related metabolome alterations in rat offspring after in utero and lactational exposure to PCB 180.

Sodium Arsenite Injection Induces Ovarian Oxidative Stress and Affects Steroidogenesis in Rats.

Protective Effect of Hesperidin on Sodium Arsenite-Induced Nephrotoxicity and Hepatotoxicity in Rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin abolishes circadian regulation of hepatic metabolic activity in mice.

The influence of high doses of α -tocopherol on the content of selected trace elements in the liver of developing chicken embryos in experimentally induced 2,3,7,8-tetrachlorodibenzo-p-dioxin intoxication.

Formation of dioxins from triclosan with active chlorine: A potential risk assessment.

Polychlorinated Biphenyls and Nonalcoholic Fatty Liver Disease.

Dimethylarsinic acid may promote prostate carcinogenesis in rats.

Bioassay system for the detection of aryl hydrocarbon receptor agonists in waterborne pesticides using zebrafish cyp1a1 promoter-luciferase recombinant hepatic cells.

Administration of Fenugreek Seed Extract Produces Better Effects in Glibenclamide-Induced Inhibition in Hepatic Lipid Peroxidation: An in vitro Study.

Lipidomic profiling of subchronic As(4)S(4) exposure identifies inflammatory mediators as sensitive biomarkers in rats.

Transcriptomic Impact of IMA-08401, a Novel AHR Agonist Resembling Laquinimod, on Rat Liver.

Kinetics of Glutathione Depletion and Antioxidant Gene Expression as Indicators of Chemical Modes of Action Assessed in Vitro in Mouse Hepatocytes with Enhanced Glutathione Synthesis.

Excessive Reactive Iron Impairs Hematopoiesis by Affecting Both Immature Hematopoietic Cells and Stromal Cells.

Protective effects of resveratrol on biomarkers of oxidative stress, biochemical and histopathological changes induced by sub-chronic oral glyphosate-based herbicide in rats.

Interindividual variation in the cytochrome P4501A response to 2,3,7,8-tetrachlorodibenzo-p-dioxin in herring gull embryo hepatocytes.

Radiosynthesis and in vivo evaluation of (11)C-labeled BMS-193885 and its desmethyl analog as PET tracers for neuropeptide Y1 receptors.

Effectiveness of AOS-iron on iron deficiency anemia in rats.

The effects of hesperidin on sodium arsenite-induced different organ toxicity in rats on metabolic enzymes as antidiabetic and anticholinergics potentials: A biochemical approach.

Evaluation of 12 mouse marker genes in rat toxicogenomics public data, Open TG-GATEs: Discrimination of genotoxic from non-genotoxic hepatocarcinogens.

Molecular mechanism involved in cyclophosphamide-induced cardiotoxicity: Old drug with a new vision.

RiboTag translomic profiling of Drosophila oenocytes under aging and induced oxidative stress.

Estimation of potential risk of allyl alcohol induced liver injury in diabetic patients using type 2 diabetes spontaneously diabetic Torii-Lepr(fa) (SDT fatty) rats.

Organ distribution of endogenous p-cresol in hemodialysis patients.

Embryonic arsenic exposure reduces intestinal cell proliferation and alters hepatic IGF mRNA expression in killifish (*Fundulus heteroclitus*).

Hepatic and renal protective effects of quercetin in ferrous sulfate-induced toxicity.

An imazamox-based herbicide causes apoptotic changes in rat liver and pancreas.

Assessment of adverse outcome of Excel Mera 71 in *Anabas testudineus* by histological and ultrastructural alterations.

Differences in apoptotic signaling and toxicity between dimethylmonothioarsinic acid (DMMTA(V)) and its active metabolite, dimethylarsinous acid (DMA(III)), in HepaRG cells: Possibility of apoptosis cascade based on diversity of active metabolites of DMMTA(V).

Effects of glyphosate on the ovarian function of pregnant mice, the secretion of hormones and the sex ratio of their fetuses.

Chronic toxicity of metolachlor OA on growth, ontogenetic development, antioxidant biomarkers and histopathology of early life stages of marbled crayfish.

Cinnamaldehyde and related phenylpropanoids, natural repellents, and insecticides against *Sitophilus zeamais* (Motsch.). A chemical structure-bioactivity relationship.

Pendimethalin-induced oxidative stress, DNA damage and activation of anti-inflammatory and apoptotic markers in male rats.

Toxicity induced by glyphosate and glyphosate-based herbicides in the zebrafish hepatocyte cell line (ZF-L).

Exposure Through Runoff and Ground Water Contamination Differentially Impact Behavior and Physiology of Crustaceans in Fluvial Systems.

Inhibition effects of pesticides on glutathione-S-transferase enzyme activity of Van Lake fish liver.

Joint toxicity on hepatic detoxication enzymes in goldfish (*Carassius auratus*) exposed to binary mixtures of lead and paraquat.

Changes in hepatic phase I and phase II biotransformation enzyme expression and glutathione levels following atrazine exposure in female rats.

Biochemical and histological effects of sub-chronic exposure to atrazine in crayfish *Cherax destructor*.

High-dose acute exposure of paraquat induces injuries of swim bladder, gastrointestinal tract and liver via neutrophil-mediated ROS in zebrafish and their relevance for human health risk assessment.

Toxicity of some aquatic pollutants to fish.

[Acute pulmonary fibrosis associated with Paraquat poisoning. Report of one case].

A survival case of intravenous paraquat intoxication: A case report.

Effects of the chloro-s-triazine herbicide terbuthylazine on DNA integrity in human and mouse cells.

Effects of glyphosate and its commercial formulation, Roundup(®) Ultramax, on liver histology of tadpoles of the neotropical frog, *Leptodactylus latrans* (amphibia: Anura).

Metabolome disruption of pregnant rats and their offspring resulting from repeated exposure to a pesticide mixture representative of environmental contamination in Brittany.

Oxidative stress, cholinesterase activity, and DNA damage in the liver, whole blood, and plasma of Wistar rats following a 28-day exposure to glyphosate.

Protective role of thymoquinone against paraquat-induced hepatotoxicity in mice.

Influences of *Chlorella vulgaris* dietary supplementation on growth performance, hematology, immune response and disease resistance in *Oreochromis niloticus* exposed to sub-lethal concentrations of penoxsulam herbicide.

A human relevance investigation of PPAR α -mediated key events in the hepatocarcinogenic mode of action of propaquizafop in rats.

Six months exposure to a real life mixture of 13 chemicals' below individual NOAELs induced non monotonic sex-dependent biochemical and redox status changes in rats.

HFE Genotype Restricts the Response to Paraquat in a Mouse Model of Neurotoxicity.

Toxicological responses on cytochrome P450 and metabolic transferases in liver of goldfish (*Carassius auratus*) exposed to lead and paraquat.

Effects of atrazine on vitellogenesis, steroid levels and lipid peroxidation, in female red swamp crayfish *Procambarus clarkii*.

Protective effect of *Uncaria tomentosa* extract against oxidative stress and genotoxicity induced by glyphosate-Roundup® using zebrafish (*Danio rerio*) as a model.

Acute and single repeated dose effects of low concentrations of chlorpyrifos, diuron, and their combination on chicken.

Effects of surface charge and palladium on hepatic and kidney injury induced by polystyrene nanoparticles co-administered to mice with paraquat and cisplatin.

Changes in intermediate metabolism and oxidative balance parameters in sexually matured three-barbeled catfishes exposed to herbicides from rice crops (Roundup®, Primoleo® and Facet®).

Isolated and mixed effects of diuron and its metabolites on biotransformation enzymes and oxidative stress response of Nile tilapia (*Oreochromis niloticus*).

Effect of dietary supplementation with *Spirulina platensis* on Atrazine-induced oxidative stress-mediated hepatic damage and inflammation in the common carp (*Cyprinus carpio* L.).

Hepatotoxicity of paraquat on common carp (*Cyprinus carpio* L.).

Changes in Sensitivity to the Effects of Atrazine on the Luteinizing Hormone Surge in Female Sprague-Dawley Rats after Repeated Daily Doses: Correlation with Liver Enzyme Expression.

Oxidative stress and DNA damage in common carp (*Cyprinus carpio*) exposed to the herbicide mesotrione.

Assessment of hepatic metabolism-dependent nephrotoxicity on an organs-on-a-chip microdevice.

Flumioxazin metabolism in pregnant animals and cell-based protoporphyrinogen IX oxidase (PPO) inhibition assay of fetal metabolites in various animal species to elucidate the mechanism of the rat-specific developmental toxicity.

Effects on metabolic parameters in young rats born with low birth weight after exposure to a mixture of pesticides.

Acrolein-induced atherogenesis by stimulation of hepatic flavin containing monooxygenase 3 and a protection from hydroxytyrosol.

Transcription factor NFE2L2/NRF2 modulates chaperone-mediated autophagy through the regulation of LAMP2A.

A comparative study on subacute toxicity of arsenic trioxide and dimethylarsinic acid on antioxidant status in Crandell Rees feline kidney (CRFK), human hepatocellular carcinoma (PLC/PRF/5), and epithelioma papulosum cyprini (EPC) cell lines.

Treatment Outcome of Combined Continuous Venovenous Hemofiltration and Hemoperfusion in Acute Paraquat Poisoning: A Prospective Controlled Trial.

Lethal Bentazone Intoxication - A Report of Two Cases.

Stereoisomeric guaiacylglycerol- β -coniferyl aldehyde ether induces distinctive apoptosis by downregulation of MEK/ERK pathway in hepatocellular carcinoma cells.

FGF21 attenuates pulmonary fibrogenesis through ameliorating oxidative stress in vivo and in vitro.

Protective effect of ALDH2 against cyclophosphamide-induced acute hepatotoxicity via attenuating oxidative stress and reactive aldehydes.

Neutrophil extracellular traps in acrolein promoted hepatic ischemia reperfusion injury: Therapeutic potential of NOX2 and p38MAPK inhibitors.

Antibiotics may increase triazine herbicide exposure risk via disturbing gut microbiota.

Extended fish short term reproduction assays with the fathead minnow and Japanese medaka: No evidence of impaired fecundity from exposure to atrazine.

Chimeric mice with humanized liver as a model for testing organophosphate and carbamate pesticide exposure.

Influence of exposure to pesticide mixtures on the metabolomic profile in post-metamorphic green frogs (*Lithobates clamitans*).

Metabolic Hydrolysis of Aromatic Amides in Selected Rat, Minipig, and Human In Vitro Systems.

Hexachloronaphthalene (HxCN) as a potential endocrine disruptor in female rats.

Increases in bioactive lipids accompany early metabolic changes associated with β -cell expansion in response to short-term high-fat diet.

Impaired lipid and glucose homeostasis in male mice offspring after combined exposure to low-dose bisphenol A and arsenic during the second half of gestation.

[Effects of sodium arsenite exposure on activation and extracellular matrix secretion of human hepatic stellate cells].

2,3,7,8-Tetrachlorodibenzo-*p*-dioxin suppresses the growth of human liver cancer HepG2 cells in vitro: Involvement of cell signaling factors.

Hepatocyte-Specific Deletion of TIPARP, a Negative Regulator of the Aryl Hydrocarbon Receptor, Is Sufficient to Increase Sensitivity to Dioxin-Induced Wasting Syndrome.

miR-145 via targeting ERCC2 is involved in arsenite-induced DNA damage in human hepatic cells.

The role of molecular modelling strategies in validating the effects of chrysin on sodium arsenite-induced chromosomal and DNA damage.

Ursodeoxycholic acid improves liver function via phenylalanine/tyrosine pathway and microbiome remodelling in patients with liver dysfunction.

Elevated Arsenic Exposure Is Associated with an Increased Risk of Chronic Hepatitis B Virus Infection: NHANES (2003-2014) in U.S. Adults.

Integrated transcriptomics and metabolomics reveal signatures of lipid metabolism dysregulation in HepaRG liver cells exposed to PCB 126.

Ellagic acid mitigates sodium arsenite-induced renal and hepatic toxicity in male Wistar rats.

The Influence of Obesity on the Pharmacokinetics of Dioxin in Mice: An Assessment Using Classical and PBPK Modeling.

Toluene and methylethylketone: effect of combined exposure on their metabolism in rat.

SLC6A19 is a novel putative gene, induced by dioxins via AhR in human hepatoma HepG2 cells.

Protective Effect of Azadirachta indica and Vitamin E Against Arsenic Acid-Induced Genotoxicity and Apoptosis in Rats.

Relationship between serum trimethylamine N-oxide and exposure to dioxin-like pollutants.

Dioxin-like PCB 126 Increases Systemic Inflammation and Accelerates Atherosclerosis in Lean LDL Receptor-Deficient Mice.

In rats gestational iron deficiency does not change body fat or hepatic mitochondria in the aged offspring.

Host biotin is required for liver stage development in malaria parasites.

Probiotic/prebiotic correction for adverse effects of iron fortification on intestinal resistance to Salmonella infection in weaning mice.

iTRAQ-based quantitative proteomic analysis reveals important metabolic pathways for arsenic-induced liver fibrosis in rats.

Aberrant expression of miR-451a contributes to 1,2-dichloroethane-induced hepatic glycerol gluconeogenesis disorder by inhibiting glycerol kinase expression in NIH Swiss mice.

Arsenic Induces Thioredoxin 1 and Apoptosis in Human Liver HHL-5 Cells.

The Role of Cytochromes P450 in Infection.

[About a cresol intoxication].

Thymoquinone is protective against 2,3,7,8-tetrachlorodibenzo-p-dioxin induced hepatotoxicity.

Evidence for estrogeno-mimetic effects of a mixture of low-dose pollutants in a model of ovariectomized mice.

Microbiota-derived uremic retention solutes: perpetrators of altered nonrenal drug clearance in kidney disease.

Therapy with high-dose long-term antioxidant free radicals for severe paraquat poisoning: A pilot study.

Release and toxicity of adipose tissue-stored TCDD: Direct evidence from a xenografted fat model.

Tissue-specific bioaccumulation, depuration and metabolism of 4,4'-dichlorodiphenyl sulfide in the freshwater mussel *Anodonta woodiana*.

Dynamics study on the role of curcumin on TGF- β 1 expression and pathological changes in acute paraquat poisoned rats.

Metabolism and disposition of arsenic species from controlled dosing with sodium arsenite in adult female CD-1 mice. III. Toxicokinetic studies following oral and intravenous administration.

Glutathione S-transferase P deficiency induces glucose intolerance via JNK-dependent enhancement of hepatic gluconeogenesis.

The effect of prenatal exposure on disposition of hexachloronaphthalene in female Wistar rats and fetal compartment.

Sodium arsenite exposure inhibits histone acetyltransferase p300 for attenuating H3K27ac at enhancers in mouse embryonic fibroblast cells.

Utility of Serum miR-122, Liver Enzymes, and Hepatic Histopathology in Response to Hepatotoxicants in Sprague-Dawley Rats.

In vitro toxicity and in silico docking analysis of two novel selective AH-receptor modulators.

Delayed death following paraquat poisoning: three case reports and a literature review.

Low dose exposure to HBCD, CB-153 or TCDD induces histopathological and hormonal effects and changes in brain protein and gene expression in juvenile female BALB/c mice.

Transcriptomic and methylomic analysis reveal the toxicological effect of 2,3,7,8-Tetrachlorodibenzodioxin on human embryonic stem cell.

Author Correction: Multiomics reveal non-alcoholic fatty liver disease in rats following chronic exposure to an ultra-low dose of Roundup herbicide.

Toxicity assessment of agrochemical Almix in *Heteropneustes fossilis* through histopathological alterations.

Comparison of Hepatic NRF2 and Aryl Hydrocarbon Receptor Binding in 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Treated Mice Demonstrates NRF2-Independent PKM2 Induction.

Photocatalytic decomposition of selected biologically active compounds in environmental waters using TiO₂/polyaniline nanocomposites: Kinetics, toxicity and intermediates assessment.

Metabolomic analysis of serum from rats following long-term intake of Chinese sausage.

Bioaccumulation of As, Hg, and Se in tunas *Thunnus albacares* and *Katsuwonus pelamis* from the Eastern Pacific: tissue distribution and As speciation.

Biogenic Synthesis of Novel Functionalized Selenium Nanoparticles by *Lactobacillus casei* ATCC 393 and Its Protective Effects on Intestinal Barrier Dysfunction Caused by Enterotoxigenic *Escherichia coli* K88.

The gut microbiota metabolite indole alleviates liver inflammation in mice.

PCB126 Inhibits the Activation of AMPK-CREB Signal Transduction Required for Energy Sensing in Liver.

Ecotoxicological potential of the biocides terbutryn, octhiline and methylisothiazolinone:
Underestimated risk from biocidal pathways?

Effects of Arsenic Compounds on Microminerals Content and Antioxidant Enzyme Activities in Rat Liver.

Elevated Nrf-2 responses are insufficient to mitigate protein carbonylation in hepatospecific PTEN deletion mice.

Berberine protects the liver and kidney against functional disorders and histological damages induced by ferrous sulfate.

Environmental Toxin Screening Using Human-Derived 3D Bioengineered Liver and Cardiac Organoids.

Cellular and Molecular Effects of Prolonged Low-Level Sodium Arsenite Exposure on Human Hepatic HepaRG Cells.

Photolysis of highly brominated flame retardants leads to time-dependent dioxin-responsive mRNA expression in chicken embryonic hepatocytes.

Association of textile industry effluent with mutagenicity and its toxic health implications upon acute and sub-chronic exposure.

Dysregulation of Intestinal Health by Environmental Pollutants: Involvement of the Estrogen Receptor and Aryl Hydrocarbon Receptor.

The Initiation Factors eIF2, eIF2A, eIF2D, eIF4A, and eIF4G Are Not Involved in Translation Driven by Hepatitis C Virus IRES in Human Cells.

Spectroscopic analyses and genotoxicity of dioxins in the aquatic environment of Alexandria.

Analysis of expression profile data identifies key genes and pathways in hepatocellular carcinoma.

Understanding the toxic potencies of xenobiotics inducing TCDD/TCDF-like effects.

Dysregulation of antioxidant responses in patients diagnosed with concomitant Primary Sclerosing Cholangitis/Inflammatory Bowel Disease.

Use of polychlorinated biphenyl and toxic equivalent concentrations in scat from mink (Neovison vison) fed fish from the upper Hudson River to predict dietary and hepatic concentrations and health effects.

Mersalyl prevents the TI(+)-induced permeability transition pore opening in the inner membrane of Ca²⁺-loaded rat liver mitochondria.

Transcriptional inhibition of TCDD-mediated induction of cytochrome P450 1A1 and alteration of protein expression in a zebrafish hepatic cell line following the administration of TCDD and Cd(2).

[Determination of Hexazinone and Its Major Metabolites in Livestock Products by LC-MS/MS].

A Review on the Expression and Metabolic Features of Orphan Human Cytochrome P450 2S1 (CYP2S1).

Metabolism and disposition of arsenic species from controlled oral dosing with sodium arsenite in adult female CD-1 mice. I. Pilot study to determine dosing, analytical measurements, and sampling strategies.

Seasonal implications on toxicity biomarkers of *Loricariichthys anus* (Valenciennes, 1835) from a subtropical reservoir.

Comparison of in vivo toxicity, antioxidant and immunomodulatory activities of coconut, niphah and pineapple juice vinegars.

Effects of glyphosate-based herbicide on pintado da AmazÃ´nia: Hematology, histological aspects, metabolic parameters and genotoxic potential.

Tissue metabolic changes for effects of pirfenidone in rats of acute paraquat poisoning by GC-MS.

Exposures to arsenite and methylarsonite produce insulin resistance and impair insulin-dependent glycogen metabolism in hepatocytes.

Effect of resveratrol and tetracycline on the subacute paraquat toxicity in mice.

The hepatoprotective effects of aquatic extract of *Levisticum officinale* against paraquat hepatocyte toxicity.

Serine alleviates oxidative stress via supporting glutathione synthesis and methionine cycle in mice.

Effects of co-exposure to atrazine and ethanol on the oxidative damage of kidney and liver in Wistar rats.

A new machine-learning method to prognosticate paraquat poisoned patients by combining coagulation, liver, and kidney indices.

Influence of sublethal doses of acetamiprid and halosulfuron-methyl on metabolites of zebra fish (*Brachydanio rerio*).

Oxidative stress in the hybrid fish jundiara (*Leiarius marmoratus*—*Pseudoplatystoma reticulatum*) exposed to Roundup Original®).

The metabolic effects of diuron in the rat liver.

Gender-specific histopathological response in guppies *Poecilia reticulata* exposed to glyphosate or its metabolite aminomethylphosphonic acid.

Fish short-term reproduction assay with atrazine and the Japanese medaka (*Oryzias latipes*).

Effects of the herbicide triclopyr on metamorphic northern red-legged frogs.

Toxicity of two classes of arsenolipids and their water-soluble metabolites in human differentiated neurons.

Comparative toxic responses of male and female lizards (*Eremias argus*) exposed to (S)-metolachlor-contaminated soil.

Paraquat Induces Peripheral Myelin Disruption and Locomotor Defects: Crosstalk with LXR and Wnt Pathways.

[Study of the effect of occupational exposure to glyphosate on hepatorenal function].

In vitro cytotoxicity assessment of roundup (glyphosate) in L-02 hepatocytes.

Effects of Roundup formulations on biochemical biomarkers and male sperm quality of the livebearing *Jenynsia multidentata*.

Activating nuclear xenobiotic receptors and triggering ER stress and hepatic cytochromes P450 systems in quails (*Coturnix C. coturnix*) during atrazine exposure.

Isolation and characterization of two glutathione S-transferases from freshwater bivalve *Anodonta woodiana*: Chronic effects of pentachlorophenol on gene expression profiles.

Influence of CuSO₄ and chelated copper algacide exposures on biodegradation of microcystin-LR.

The association of cancer risks with pentachlorophenol exposure: Focusing on community population in the areas along certain section of Yangtze River in China.

Fluazifop- p-butyl, an aryloxyphenoxypropionate herbicide, diminishes renal and hepatic functions and triggers testicular oxidative stress in orally exposed rats.

Nephrotoxicity-induced proteinuria increases biomarker diagnostic thresholds in acute kidney injury.

Effects of melatonin in rats in the initial third stage of pregnancy exposed to sub-lethal doses of herbicides.

Metastasis suppressor NM23 limits oxidative stress in mammals by preventing activation of stress-activated protein kinases/JNKs through its nucleoside diphosphate kinase activity.

[Evaluation of adsorption effect of activated charcoal on oral paraquat poisoning: an experimental study on large animal].

The chronic effects of terbuthylazine-2-hydroxy on early life stages of marbled crayfish (*Procambarus fallax f. virginalis*).

Atrazine triggers hepatic oxidative stress and apoptosis in quails (*Coturnix C. coturnix*) via blocking Nrf2-mediated defense response.

Mapping Proteome-wide Targets of Glyphosate in Mice.

Perinatal exposure to glyphosate-based herbicide alters the thyrotrophic axis and causes thyroid hormone homeostasis imbalance in male rats.

A miniaturized electrochemical toxicity biosensor based on graphene oxide quantum dots/carboxylated carbon nanotubes for assessment of priority pollutants.

Quizalofop-P-ethyl exposure increases estrogen axis activity in male and slightly decreases estrogen axis activity in female zebrafish (*Danio rerio*).

Effects of atrazine on ovarian growth, in the estuarine crab *Neohelice granulata*.

A glyphosate-based herbicide induces histomorphological and protein expression changes in the liver of the female guppy *Poecilia reticulata*.

The protective effects of *Cichorium glandulosum* seed and cynarin against cyclophosphamide and its metabolite acrolein-induced hepatotoxicity in vivo and in vitro.

Acrolein scavengers, cysteamine and N-benzylhydroxylamine, reduces the mouse liver damage after acetaminophen overdose.

Multimiomics reveal non-alcoholic fatty liver disease in rats following chronic exposure to an ultra-low dose of Roundup herbicide.

Resveratrol and Montelukast Alleviate Paraquat-Induced Hepatic Injury in Mice: Modulation of Oxidative Stress, Inflammation, and Apoptosis.

Liver X Receptor Agonist TO901317 Attenuates Paraquat-Induced Acute Lung Injury through Inhibition of NF- κ B and JNK/p38 MAPK Signal Pathways.

Pentachlorophenol affected both reproductive and interrenal systems: In silico and in vivo evidence.

Prometryn and humic acid induce Cytochrome P450 1A expression in *Danio rerio* (zebrafish).

Coadministration of isomalto-oligosaccharides augments metabolic health benefits of cinnamaldehyde in high fat diet fed mice.

Cinnamaldehyde potentially attenuates gestational hyperglycemia in rats through modulation of PPAR γ , proinflammatory cytokines and oxidative stress.

Cytotoxicity and cellular response mechanisms of water-soluble platinum(II) complexes of lidocaine and phenylcyanamide derivatives.

Spermine oxidase promotes bile canalicular lumen formation through acrolein production.

An accurate and robust LC-MS/MS method for the quantification of chlorfenvinphos, ethion and linuron in liver samples.

Evidence of in vitro metabolic interaction effects of a chlorfenvinphos, ethion and linuron mixture on human hepatic detoxification rates.

Effects of pentachlorophenol on the quail (*Coturnix japonica*) liver detoxification pathway.

A drastic superoxide-dependent oxidative stress is prerequisite for the down-regulation of IRP1: Insights from studies on SOD1-deficient mice and macrophages treated with paraquat.

Metabolic parameters and oxidative balance in juvenile *Rhamdia quelen* exposed to rice paddy herbicides: Roundup $\text{\textcircled{R}}$, Primoleo $\text{\textcircled{R}}$, and Facet $\text{\textcircled{R}}$.

Effects of Nrf2 deficiency on arsenic metabolism in mice.

Chloracne in a Farming Family.

Persistent Endocrine-Disrupting Chemicals and Fatty Liver Disease.

Editor's Highlight: PCB126 Exposure Increases Risk for Peripheral Vascular Diseases in a Liver Injury Mouse Model.

Distribution of arsenic and oxidative stress in mice after rice ingestion.

Elucidation of protective efficacy of Pentahydroxy flavone isolated from *Madhuca indica* against arsenite-induced cardiomyopathy: Role of Nrf-2, PPAR- γ , c-fos and c-jun.

Quillaja saponaria bark saponin protects Wistar rats against ferrous sulphate-induced oxidative and inflammatory liver damage.

Paclitaxel-mediated human aryl hydrocarbon receptor mRNA translation by an internal ribosomal entry site-dependent mechanism.

Obesogenic endocrine disruptors and obesity: myths and truths.

Gonadal intersex in smallmouth bass *Micropterus dolomieu* from northern Indiana with correlations to molecular biomarkers and anthropogenic chemicals.

[Sensory axonal polyneuropathy due to 2,4-dinitrophenol].

Sustained-release mitochondrial protonophore reverses nonalcoholic fatty liver disease in rats.

Dioxin Receptor Adjusts Liver Regeneration After Acute Toxic Injury and Protects Against Liver Carcinogenesis.

Chronic exposure of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces an obesogenic effect in C57BL/6J mice fed a high fat diet.

Pediatric liver transplantation for fulminant hepatic failure secondary to intentional iron overdose.

Antimicrobial agents, triclosan, chloroxylenol, methylisothiazolinone and borax, used in cleaning had genotoxic and histopathologic effects on rainbow trout.

Effects of C-Glycosides from *Apios americana* Leaves against Oxidative Stress during Hyperglycemia through Regulating Mitogen-Activated Protein Kinases and Nuclear Factor Erythroid 2-Related Factor 2.

Distribution, lipid-bilayer affinity and kinetics of the metabolic effects of dinoseb in the liver.

Polychlorinated dibenzo-p-dioxins and dibenzofurans levels in piglet liver with various diseases.

Broad Spectrum Macromolecular Antimicrobials with Biofilm Disruption Capability and In Vivo Efficacy.

Separate screening of brominated and chlorinated dioxins in field samples using in vitro reporter gene assays with rat and mouse hepatoma cell lines.

High Consumption of Iron Exacerbates Hyperlipidemia, Atherosclerosis, and Female Sterility in Zebrafish via Acceleration of Glycation and Degradation of Serum Lipoproteins.

Dioxin-induced increase in leukotriene B4 biosynthesis through the aryl hydrocarbon receptor and its relevance to hepatotoxicity owing to neutrophil infiltration.

β -catenin Mutations Are Not Involved in Early-stage Hepatocarcinogenesis Induced by Protoporphyrinogen Oxidase Inhibitors in Mice.

The Influence of α -Tocopherol on Serum Biochemical Markers During Experimentally Induced Pleuritis in Rats Exposed to Dioxin.

NAD(+) loss, a new player in AhR biology: prevention of thymus atrophy and hepatosteatosis by NAD(+) repletion.

A bio-chemical application of N-GQDs and g-C(3)N(4) QDs sensitized TiO(2) nanopillars for the quantitative detection of pcDNA3-HBV.

Oral administration of trace element magnesium significantly improving the cognition and locomotion in hepatic encephalopathy rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces hepatic stellate cell (HSC) activation and liver fibrosis in C57BL6 mouse via activating Akt and NF- κ B signaling pathways.

Suppressed erythropoietin expression in a nitrofen-induced congenital diaphragmatic hernia.

Lipidomic Evaluation of Aryl Hydrocarbon Receptor-Mediated Hepatic Steatosis in Male and Female Mice Elicited by 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Convergence of hepcidin deficiency, systemic iron overloading, heme accumulation, and REV-ERB α/β activation in aryl hydrocarbon receptor-elicited hepatotoxicity.

Cost-effectiveness analysis of ultrasonography screening for nonalcoholic fatty liver disease in metabolic syndrome patients.

1,2-Dichloroethane impairs glucose and lipid homeostasis in the livers of NIH Swiss mice.

Inhibition of Kupffer cell functions modulates arsenic intoxication in Wistar rats.

Strain differences in arsenic-induced oxidative lesion via arsenic biomethylation between C57BL/6J and 129X1/SvJ mice.

Targeted mitochondrial uncoupling beyond UCP1 - The fine line between death and metabolic health.

Chronic Exposure to Low Doses of Dioxin Promotes Liver Fibrosis Development in the C57BL/6J Diet-Induced Obesity Mouse Model.

Amelioration of arsenic-induced toxic effects in mice by dietary supplementation of Syzygium cumini leaf extract.

Arsenite in drinking water produces glucose intolerance in pregnant rats and their female offspring.

An iron-deficient diet during development induces oxidative stress in relation to age and gender in Wistar rats.

CCL2 is Upregulated by Decreased miR-122 Expression in Iron-Overload-Induced Hepatic Inflammation.

2,3,7,8 Tetrachlorodibenzo-p-dioxin-induced RNA abundance changes identify Akr3, Col18a1, Cyb5a and Glud1 as candidate mediators of toxicity.

Dibenzo[def,p]chrysene transplacental carcinogenesis in wild-type, Cyp1b1 knockout, and CYP1B1 humanized mice.

Ion Imbalance Is Involved in the Mechanisms of Liver Oxidative Damage in Rats Exposed to Glyphosate.

Caffeine - rich infusion from *Cola nitida* (kola nut) inhibits major carbohydrate catabolic enzymes; abates redox imbalance; and modulates oxidative dysregulated metabolic pathways and metabolites in Fe(2+)-induced hepatic toxicity.

Hexachlorobenzene as a persistent organic pollutant: Toxicity and molecular mechanism of action.

Purification of camel liver catalase by zinc chelate affinity chromatography and pH gradient elution: An enzyme with interesting properties.

Hepatotoxicity and Drug/Chemical Interaction Toxicity of Nanoclay Particles in Mice.

Fertility enhancing activity and toxicity profile of aqueous extract of *Chasmanthera dependens* roots in male rats.

Induction of cytochrome P450 mRNA in porcine primary hepatocytes cultured under serum free conditions: Comparison of freshly isolated cells and cryopreserved.

Toxic effects of polybrominated diphenyl ethers (BDE 47 and 99) and localization of BDE-99-induced cyp1a mRNA in zebrafish larvae.

The protective effect of hydroalcoholic extract of Ginger (*Zingiber officinale* Rosc.) against iron-induced functional and histological damages in rat liver and kidney.

Synergistic antimutagenic effect of isothiocyanates against varied mutagens.

All-Trans Retinoic Acid Ameliorates Arsenic-Induced Oxidative Stress and Apoptosis in the Rat Uterus by Modulating MAPK Signaling Proteins.

Effect of Cyanide on Mitochondrial Membrane Depolarization Induced by Uncouplers.

Novel Pathways of Ponatinib Disposition Catalyzed By CYP1A1 Involving Generation of Potentially Toxic Metabolites.

Dioxin-like activity of brominated dioxins as individual compounds or mixtures in in vitro reporter gene assays with rat and mouse hepatoma cell lines.

Effect of arsenic acid withdrawal on hepatotoxicity and disruption of erythrocyte antioxidant defense system.

Development of suspect and non-target screening methods for detection of organic contaminants in highway runoff and fish tissue with high-resolution time-of-flight mass spectrometry.

Loss of liver-specific and sexually dimorphic gene expression by aryl hydrocarbon receptor activation in C57BL/6 mice.

Protective efficacy of various carbonyl compounds and their metabolites, and nutrients against acute toxicity of some cyanogens in rats: biochemical and physiological studies.

Acute toxicity of commercial atrazine in *Piaractus mesopotamicus*: Histopathological, ultrastructural, molecular, and genotoxic evaluation.

Electrozymographic evaluation of the attenuation of arsenic induced degradation of hepatic SOD, catalase in an in vitro assay system by pectic polysaccharides of *Momordica charantia* in combination with curcumin.

Incidence and pathological study of *Explanatum explanatum* (Creplin, 1847) Fukui, 1929 in goats in Andhra Pradesh, India.

Epigenetic Regulation by Agonist-Specific Aryl Hydrocarbon Receptor Recruitment of Metastasis-Associated Protein 2 Selectively Induces Stanniocalcin 2 Expression.

The endocrine disrupting alkylphenols and 4,4'-DDT interfere with estrogen conversion and clearance by mouse liver cytosol.

Tissue-specific distributions of inorganic arsenic and its methylated metabolites, especially in cerebral cortex, cerebellum and hippocampus of mice after a single oral administration of arsenite.

Polychlorinated biphenyls disrupt hepatic epidermal growth factor receptor signaling.

Activation of the aryl hydrocarbon receptor decreases rifampicin-induced CYP3A4 expression in primary human hepatocytes and HepaRG.

Arsenic exposure impels CD4 commitment in thymus and suppress T cell cytokine secretion by increasing regulatory T cells.

Predictors of acute kidney injury after paraquat intoxication.

Fructose-1,6-bisphosphate reverts iron-induced phenotype of hepatic stellate cells by chelating ferrous ions.

The water soluble axially disubstituted silicon phthalocyanines: photophysical properties and in vitro studies.

Catalase increases ethanol oxidation through the purine catabolism in rat liver.

Accumulation of Arsenic Speciation and In Vivo Toxicity Following Oral Administration of a Chinese Patent Medicine Xiao-Er-Zhi-Bao-Wan in Rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-elicited effects on bile acid homeostasis: Alterations in biosynthesis, enterohepatic circulation, and microbial metabolism.

The Association of Combined GSTM1 and CYP2C9 Genotype Status with the Occurrence of Hemorrhagic Cystitis in Pediatric Patients Receiving Myeloablative Conditioning Regimen Prior to Allogeneic Hematopoietic Stem Cell Transplantation.

Hepatoprotective Role of *Hydrangea macrophylla* against Sodium Arsenite-Induced Mitochondrial-Dependent Oxidative Stress via the Inhibition of MAPK/Caspase-3 Pathways.

Ameliorative effect of vitamin E and selenium against oxidative stress induced by sodium azide in liver, kidney, testis and heart of male mice.

Toxicological characterisation of two novel selective aryl hydrocarbon receptor modulators in Sprague-Dawley rats.

Activated thyroid hormone receptor modulates dioxin-inducible aryl hydrocarbon receptor-mediated CYP1A1 induction in human hepatocytes but not in human hepatocarcinoma HepG2 cells.

Histopathological changes in zebrafish embryos exposed to DLPCBs extract from Zhanjiang coastal sediment.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-mediated deregulation of myeloid and sebaceous gland stem/progenitor cell homeostasis.

Expression of advanced glycation end-products and NF κ B in chick embryos exposed to dioxins and treated with acetylsalicylic acid and α -tocopherol.

New insights into the role of spermine in enhancing the antioxidant capacity of rat spleen and liver under oxidative stress.

Characterization of E-NTPDase (EC 3.6.1.5) activity in hepatic lymphocytes: A different activity profile from peripheral lymphocytes.

Pharmacodynamics of S-dimethylarsino-glutathione, a putative metabolic intermediate of inorganic arsenic, in mice.

Antioxidant effects of aqueous extract of Salep on Paraquat-induced rat liver injury.

Beyond the Aryl Hydrocarbon Receptor: Pathway Interactions in the Hepatotoxicity of 2,3,7,8-Tetrachlorodibenzo-p-dioxin and Related Compounds.

Non-dioxin-like organic toxicant PCB153 modulates sphingolipid metabolism in liver progenitor cells: its role in Cx43-formed gap junction impairment.

Ethnopharmacological based Evaluation of *Anogeissus pendula* Edgew Extracts for Antioxidant and Hepatoprotective Potential.

Benefits of Alcohol on Arsenic Toxicity in Rats.

Methanol Extract of *Adansonia digitata* Leaf Protects Against Sodium Arsenite-induced Toxicities in Male Wistar Rats.

Feeble Antipyretic, Analgesic, and Anti-inflammatory Activities were Found with Regular Dose 4'-O- β -D-Glucosyl-5-O-Methylvisamminol, One of the Conventional Marker Compounds for Quality Evaluation of *Radix Saposhnikovia*.

Secondary Hemochromatosis due to Chronic Oral Iron Supplementation.

Hepatoprotective and antioxidant effects of dietary *Glycyrrhiza* polysaccharide against TCDD-induced hepatic injury and RT-PCR quantification of AHR2, ARNT2, CYP1A mRNA in Jian Carp (*Cyprinus carpio* var. Jian).

Novel roles for AhR and ARNT in the regulation of alcohol dehydrogenases in human hepatic cells.

[Dose-effect relationship between vitamin C and paraquat poisoning rats].

A novel mechanism underlies atrazine toxicity in quails (*Coturnix Coturnix coturnix*): triggering ionic disorder via disruption of ATPases.

The sublethal effects of (2,4-Dichlorophenoxy) acetic acid (2,4-D) on narrow-clawed crayfish (*Astacus leptodactylus* Eschscholtz, 1823).

Effect of single and combination of three triazine metabolites at environmental concentrations on early life stages of common carp (*Cyprinus carpio* L.).

PPAR α -dependent cholesterol/testosterone disruption in Leydig cells mediates 2,4-dichlorophenoxyacetic acid-induced testicular toxicity in mice.

Examination of in vivo mutagenicity of sodium arsenite and dimethylarsinic acid in gpt delta rats.

Effects of alkylphenols on the biotransformation of diuron and enzymes involved in the synthesis and clearance of sex steroids in juvenile male tilapia (*Oreochromis mossambica*).

Metabolomics as read-across tool: A case study with phenoxy herbicides.

Health effect of agricultural pesticide use in China: implications for the development of GM crops.

The receptor for activated C kinase 1 (RACK1) functions in hematopoiesis through JNK activation in Chinese mitten crab *Eriocheir sinensis*.

Continued Studies on the Effects of Simazine on the Liver Histological Structure and Metamorphosis in the Developing *Xenopus laevis*.

Roundup(®) in Zebrafish: Effects on Oxidative Status and Gene Expression.

Effects of terbuthylazine-desethyl, a terbuthylazine degradation product, on red swamp crayfish (*Procambarus clarkii*).

Glyphosate (Pesticides).

Gene expression profiles in testis of developing male *Xenopus laevis* damaged by chronic exposure of atrazine.

Acrolein enhances epigenetic modifications, FasL expression and hepatocyte toxicity induced by anti-HIV drug Zidovudine.

Response of selenium-dependent glutathione peroxidase in the freshwater bivalve *Anodonta woodiana* exposed to 2,4-dichlorophenol, 2,4,6-trichlorophenol and pentachlorophenol.

Assessment of oxidative stress responses and the cytotoxic and genotoxic potential of the herbicide tembotrione in HepG2 cells.

The Protective Role of Thiourea on *Leuciscus cephalus* Exposed to Sublethal Doses of Pendigan 330EC (Pendimethalin) Herbicide.

Dig1 protects against locomotor and biochemical dysfunctions provoked by Roundup.

The herbicide glyphosate is a weak inhibitor of acetylcholinesterase in rats.

Prognosis and survival analysis of paraquat poisoned patients based on improved HPLC-UV method.

Effects of pentachlorophenol on the detoxification system in white-rumped munia (*Lonchura striata*).

Impacts of 2,4-dichlorophenoxyacetic acid aquatic herbicide formulations on reproduction and development of the fathead minnow (*Pimephales promelas*).

Effects of glyphosate on hepatic tissue evaluating melanomacrophages and erythrocytes responses in neotropical anuran *Leptodactylus latinasus*.

Evaluation of the toxic effect of the herbicide 2, 4-D on rat hepatocytes: an FT-IR spectroscopic study.

Acute paraquat exposure determines dose-dependent oxidative injury of multiple organs and metabolic dysfunction in rats: impact on exercise tolerance.

Hepatic effects of the clomazone herbicide in both its free form and associated with chitosan-alginate nanoparticles in bullfrog tadpoles.

Lycopene protects against atrazine-induced hepatotoxicity through modifications of cytochrome P450 enzyme system in microsomes.

Exposure to different glyphosate formulations on the oxidative and histological status of *Rhamdia quelen*.

Atrazine exposure causes mitochondrial toxicity in liver and muscle cell lines.

Constitutive active/androstane receptor, peroxisome proliferator-activated receptor $\hat{\pm}$, and cytotoxicity are involved in oxadiazon-induced liver tumor development in mice.

Effects of diphenyl diselenide on growth, oxidative damage, and antioxidant response in silver catfish.

Multiple biomarker responses in *Prochilodus lineatus* subjected to short-term in situ exposure to streams from agricultural areas in Southern Brazil.

A multicenter retrospective survey of poisoning after ingestion of herbicides containing glyphosate potassium salt or other glyphosate salts in Japan.

Lycopene protects against atrazine-induced hepatic ionic homeostasis disturbance by modulating ion-transporting ATPases.

Toxicity of atrazine, glyphosate, and quinclorac in bullfrog tadpoles exposed to concentrations below legal limits.

New water-soluble palladium(II) complexes of lidocaine and phenylcyanamide derivative ligands: cytotoxicity and cellular response mechanisms.

Albumin Cys34 adducted by acrolein as a marker of oxidative stress in ischemia-reperfusion injury during hepatectomy.

Discovery of a novel anti-cancer agent targeting both topoisomerase I and II in hepatocellular carcinoma Hep 3B cells in vitro and in vivo: *Cinnamomum verum* component 2-methoxycinnamaldehyde.

Roles of catalase and glutathione peroxidase in the tolerance of a pulmonate gastropod to anoxia and reoxygenation.

Cinnamaldehydes in Cancer Chemotherapy.

Discovery of a novel anticancer agent with both anti-topoisomerase I and II activities in hepatocellular carcinoma SK-Hep-1 cells in vitro and in vivo: Cinnamomum verum component 2-methoxycinnamaldehyde.

Polymorphic variants of MRP4/ABCC4 differentially modulate the transport of methylated arsenic metabolites and physiological organic anions.

Metabolism and Bioactivation of Fluorochloridone, a Novel Selective Herbicide, in Vivo and in Vitro.

Dietary arginine and N-carbamylglutamate supplementation enhances the antioxidant statuses of the liver and plasma against oxidative stress in rats.

PBPK Model for Atrazine and Its Chlorotriazine Metabolites in Rat and Human.

Boule gene expression underpins the meiotic arrest in spermatogenesis in male rainbow trout (*Oncorhynchus mykiss*) exposed to DEHP and butachlor.

Estrogen receptor- α and aryl hydrocarbon receptor involvement in the actions of botanical estrogens in target cells.

Pomegranate protects against arsenic-induced p53-dependent ROS-mediated inflammation and apoptosis in liver cells.

From the Cover: Coagulation-Driven Hepatic Fibrosis Requires Protease Activated Receptor-1 (PAR-1) in a Mouse Model of TCDD-Elicited Steatohepatitis.

Dose-Dependent Metabolic Reprogramming and Differential Gene Expression in TCDD-Elicited Hepatic Fibrosis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) increases necroinflammation and hepatic stellate cell activation but does not exacerbate experimental liver fibrosis in mice.

Phase I and pharmacokinetic evaluation of the anti-telomerase agent KML-001 with cisplatin in advanced solid tumors.

A comparison of biomarker responses in juvenile diploid and triploid African catfish, *Clarias gariepinus*, exposed to the pesticide butachlor.

Is hepatic oxidative stress a main driver of dietary selenium toxicity in white sturgeon (*Acipenser transmontanus*)?

Organochlorine contaminants in the muscle, liver and brain of seabirds (*Larus*) from the coastal area of the Southern Baltic.

N-acetylcysteine and meso-2,3-dimercaptosuccinic acid alleviate oxidative stress and hepatic dysfunction induced by sodium arsenite in male rats.

Arsenite inhibits the function of CD133(+) CD13(+) liver cancer stem cells by reducing PML and Oct4 protein expression.

Decreased expression of hepatocyte growth factor in the nitrofen model of congenital diaphragmatic hernia.

Attenuative role of mangiferin in oxidative stress-mediated liver dysfunction in arsenic-intoxicated murines.

Chronic Arsenic Exposure-Induced Oxidative Stress is Mediated by Decreased Mitochondrial Biogenesis in Rat Liver.

TCDD modulation of gut microbiome correlated with liver and immune toxicity in streptozotocin (STZ)-induced hyperglycemic mice.

Bioanalytical effect-balance model to determine the bioavailability of organic contaminants in sediments affected by black and natural carbon.

Effects of Fe-YM1504 on iron deficiency anemia in rats.

METABOLIC DYSBIOSIS OF THE GUT MICROBIOTA AND ITS BIOMARKERS.

Dioxin-like pollutants increase hepatic flavin containing monooxygenase (FMO3) expression to promote synthesis of the pro-atherogenic nutrient biomarker trimethylamine N-oxide from dietary precursors.

Involvement of Mouse Constitutive Androstane Receptor in Acifluorfen-Induced Liver Injury and Subsequent Tumor Development.

Aryl hydrocarbon receptor knockout rats are insensitive to the pathological effects of repeated oral exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

New insights into BaP-induced toxicity: role of major metabolites in transcriptomics and contribution to hepatocarcinogenesis.

Definite hereditary hemorrhagic telangiectasia in a 60-year-old black Kenyan woman: a case report.

C-Terminal Amino Acids 471-507 of Avian Hepatitis E Virus Capsid Protein Are Crucial for Binding to Avian and Human Cells.

Public health and international drug policy.

Use of microbial fuel cells to monitor current production in Qi-deficient liver cells.

Comparative experimental investigation on the efficacy of mono- and multiprobiotic strains in non-alcoholic fatty liver disease prevention.

Untargeted plasma and tissue metabolomics in rats with chronic kidney disease given AST-120.

Evaluation of Safety of Iron-Fortified Soybean Sprouts, a Potential Component of Functional Food, in Rat.

Effects of in Utero Exposure to Arsenic during the Second Half of Gestation on Reproductive End Points and Metabolic Parameters in Female CD-1 Mice.

5-Aminolevulinic acid combined with ferrous iron ameliorate ischemia-reperfusion injury in the mouse fatty liver model.

Metformin Scavenges Methylglyoxal To Form a Novel Imidazolinone Metabolite in Humans.

Expression of hepatic lipid droplets is decreased in the nitrofen model of congenital diaphragmatic hernia.

Effects of a Tripeptide Iron on Iron-Deficiency Anemia in Rats.

Endoplasmic reticulum stress is involved in 2,4-dichlorophenol-induced hepatotoxicity.

Oligonol Ameliorates CCl₄-Induced Liver Injury in Rats via the NF-Kappa B and MAPK Signaling Pathways.

Tetrachlorobenzoquinone exhibits neurotoxicity by inducing inflammatory responses through ROS-mediated IKK/Î²B/NF-Î²B signaling.

Molecular imaging of aurora kinase A (AURKA) expression: Synthesis and preclinical evaluation of radiolabeled alisertib (MLN8237).

PCB126-Induced Disruption in Gluconeogenesis and Fatty Acid Oxidation Precedes Fatty Liver in Male Rats.

Delayed cognitive and psychiatric symptoms following methyl iodide and manganese poisoning: Potential for misdiagnosis.

Protective Effects of Combined Selenium and Punica granatum Treatment on Some Inflammatory and Oxidative Stress Markers in Arsenic-Induced Hepatotoxicity in Rats.

Olive oil and its phenolic compounds (hydroxytyrosol and tyrosol) ameliorated TCDD-induced hepatotoxicity in rats via inhibition of oxidative stress and apoptosis.

Oxidative stress-related liver dysfunction by sodium arsenite: Alleviation by Pistacia lentiscus oil.

Concentration and congener pattern of polychlorinated biphenyls in blubber and liver of Hubbs' beaked whale (*Mesoplodon carlhubbsi*), using a sulfoxide and an Ag-ION solid phase extraction cartridge as a simplified cleanup technique for biological samples.

A high fat diet does not affect the iron bioavailability in Wistar rats fed with chia and increases gene expression of iron metabolism proteins.

Single Heteroatom Substitutions in the Efavirenz Oxazinone Ring Impact Metabolism by CYP2B6.

Integrins and heparan sulfate proteoglycans on hepatic stellate cells (HSC) are novel receptors for HSC-derived exosomes.

In vitro mutagenic, antimutagenic, and antioxidant activities evaluation and biotransformation of some bioactive 4-substituted 1-(2-methoxyphenyl)piperazine derivatives.

The comparative effects of diethyldithiocarbamate-copper complex with established proteasome inhibitors on expression levels of CYP1A2/3A4 and their master regulators, aryl hydrocarbon and pregnane X receptor in primary cultures of human hepatocytes.

Toxicological characterisation of a thio-arsenosugar-glycerol in human cells.

Person-centered older military veteran care when there are consequences.

Comparative liver accumulation of dioxin-like compounds in sheep and cattle: Possible role of AhR-mediated xenobiotic metabolizing enzymes.

Global metabolic changes induced by plant-derived pyrrolizidine alkaloids following a human poisoning outbreak and in a mouse model.

Protective Effects of Essential Oils as Natural Antioxidants against Hepatotoxicity Induced by Cyclophosphamide in Mice.

Attesting the efficiency of monitored natural attenuation in the detoxification of sewage sludge by means of genotoxic and mutagenic bioassays.

Effect of pyrolysis temperature on potential toxicity of biochar if applied to the environment.

Comparative risk assessment of tobacco smoke constituents using the margin of exposure approach: the neglected contribution of nicotine.

Dioxin induces Ahr-dependent robust DNA demethylation of the Cyp1a1 promoter via Tdg in the mouse liver.

Mechanisms of Action Point Towards Combined PBDE/NDL-PCB Risk Assessment.

In vitro toxicity of reuterin, a potential food biopreservative.

Diminished Phosphorylation of CREB Is a Key Event in the Dysregulation of Gluconeogenesis and Glycogenolysis in PCB126 Hepatotoxicity.

Acrolein, a New Villain in the Development of Alcoholic Liver Disease.

Acrolein Is a Pathogenic Mediator of Alcoholic Liver Disease and the Scavenger Hydralazine Is Protective in Mice.

Urinary Metabotyping of Hepatocellular Carcinoma in a UK Cohort Using Proton Nuclear Magnetic Resonance Spectroscopy.

Glyphosate rodent carcinogenicity bioassay expert panel review.

Specific carotenoid pigments in the diet and a bit of oxidative stress in the recipe for producing red carotenoid-based signals.

Toxicogenomic applications of Chinese rare minnow (*Gobiocypris rarus*) in aquatic toxicology.

Data on AHR-dependent changes in the mitochondrial proteome in response to ,3,7,8-tetrachlorodibenzo-p-dioxin.

Data of enzymatic activities of the electron transport chain and ATP synthase complexes in mouse hepatoma cells following exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Molecular impacts of perfluorinated chemicals (PFASs) in the liver and testis of male largemouth bass (*Micropterus salmoides*) in Minnesota Lakes.

BDE-99, but not BDE-47, is a transient aryl hydrocarbon receptor agonist in zebrafish liver cells.

The role of AHR-inducible cytochrome P450s in metabolism of polyunsaturated fatty acids.

Investigation of salicylate hepatic responses in comparison with chemical analogues of the drug.

Mitochondrial-targeted aryl hydrocarbon receptor and the impact of 2,3,7,8-tetrachlorodibenzo-p-dioxin on cellular respiration and the mitochondrial proteome.

In vitro toxicity assessment of sediment samples from Huangpu River and Suzhou River, Shanghai, China.

Hepatic Aryl Hydrocarbon Receptor Attenuates Fibroblast Growth Factor 21 Expression.

Multi-tissue metabolic responses of goldfish (*Carassius auratus*) exposed to glyphosate-based herbicide.

Toxic effects of glyphosate-based herbicide, Excel Mera 71 on gill, liver, and kidney of *Heteropneustes fossilis* under laboratory and field conditions.

Alteration of human hepatic drug transporter activity and expression by cigarette smoke condensate.

Chemopreventive Agents Attenuate Rapid Inhibition of Gap Junctional Intercellular Communication Induced by Environmental Toxicants.

Boron influences immune and antioxidant responses by modulating hepatic superoxide dismutase activity under calcium deficit abiotic stress in Wistar rats.

Oleuropein ameliorates arsenic induced oxidative stress in mice.

Effect of retinyl acetate on transglutaminase 2 activity in carcinogen treated rat liver.

Transgenic Overexpression of Aryl Hydrocarbon Receptor Repressor (AhRR) and AhR-Mediated Induction of CYP1A1, Cytokines, and Acute Toxicity.

Age-Specific Regulation of Drug-Processing Genes in Mouse Liver by Ligands of Xenobiotic-Sensing Transcription Factors.

MicroRNA-21 activation of ERK signaling via PTEN is involved in arsenite-induced autophagy in human hepatic L-02 cells.

Is exposure to Agent Orange a risk factor for hepatocellular cancer?-A single-center retrospective study in the U.S. veteran population.

Data supporting the involvement of the adenine nucleotide translocase conformation in opening the TI(+)-induced permeability transition pore in Ca(2+)-loaded rat liver mitochondria.

Dioxins, DL-PCB and NDL-PCB accumulation profiles in livers from sheep and cattle reared in North-western Italy.

Ameliorative effects of docosahexaenoic acid on the toxicity induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in cultured rat hepatocytes.

A Microfabricated Platform for Generating Physiologically-Relevant Hepatocyte Zonation.

Impact of dioxins on antipyrine metabolism in firefighters.

Skatole (3-Methylindole) Is a Partial Aryl Hydrocarbon Receptor Agonist and Induces CYP1A1/2 and CYP1B1 Expression in Primary Human Hepatocytes.

Synthesis and Preclinical Evaluation of ¹¹C-UCB-J as a PET Tracer for Imaging the Synaptic Vesicle Glycoprotein 2A in the Brain.

Anti-inflammatory Montelukast prevents toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin: Oxidative stress, histological alterations in liver, and serum cytokine levels.

Treatment of Resistant Cyclophosphamide Induced Haemorrhagic Cystitis: Review of Literature and Three Case Reports.

To involvement the conformation of the adenine nucleotide translocase in opening the TI(+)-induced permeability transition pore in Ca²⁺-loaded rat liver mitochondria.

TCDD-inducible poly-ADP-ribose polymerase (TIPARP/PARP7) mono-ADP-ribosylates and co-activates liver X receptors.

Responses of antioxidant defense system to polyfluorinated dibenzo-p-dioxins (PFDDs) exposure in liver of freshwater fish *Carassius auratus*.

Use of a Novel Double-Crested Cormorant ToxCip PCR Array and the EROD Assay to Determine Effects of Environmental Contaminants in Primary Hepatocytes.

Attenuation of hepatotoxicity and oxidative stress in diabetes STZ-induced type 1 by biotin in Swiss albino mice.

A urinary metabolomics analysis of long-term effect of acetochlor exposure on rats by ultra-performance liquid chromatography/mass spectrometry.

Proton-Coupled Organic Cation Antiporter Contributes to the Hepatic Uptake of Matrine.

Sunlight Irradiation of Highly Brominated Polyphenyl Ethers Generates Polybenzofuran Products That Alter Dioxin-responsive mRNA Expression in Chicken Hepatocytes.

Inhibition of ATP synthesis by fenbufen and its conjugated metabolites in rat liver mitochondria.

The olive leaf extract oleuropein exerts protective effects against oxidant-induced cell death, concurrently displaying pro-oxidant activity in human hepatocarcinoma cells.

Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) increases human hepatic stellate cell activation.

Paraquat Poisoning: A Case Report.

Novel human hepatic organoid model enables testing of drug-induced liver fibrosis *in vitro*.

Differential effects of metal ions on TCDD-induced cytotoxicity and cytochrome P4501A1 gene expression in a zebrafish liver (ZFL) cell-line.

Pyruvate Kinase Isoform Switching and Hepatic Metabolic Reprogramming by the Environmental Contaminant 2,3,7,8-Tetrachlorodibenzo-p-Dioxin.

Multistress effects on goldfish (*Carassius auratus*) behavior and metabolism.

Protective Effects of Zinc Against Acute Arsenic Toxicity by Regulating Antioxidant Defense System and Cumulative Metallothionein Expression.

Pure non-dioxin-like PCB congeners suppress induction of AhR-dependent endpoints in rat liver cells.

Paraoxonase 1 activity in subchronic low-level inorganic arsenic exposure through drinking water.

Evaluation and identification of dioxin exposure biomarkers in human urine by high-resolution metabolomics, multivariate analysis and in vitro synthesis.

Use of extracorporeal removal techniques in patients with paraquat toxicity and unknown hepatitis viral marker status.

Toward understanding the impacts of sediment contamination on a native fish species: transcriptional effects, EROD activity, and biliary PAH metabolites.

Aryl Hydrocarbon Receptor Activation by TCDD Modulates Expression of Extracellular Matrix Remodeling Genes during Experimental Liver Fibrosis.

Effects of Antioxidant N-acetylcysteine Against Paraquat-Induced Oxidative Stress in Vital Tissues of Mice.

Metallothionein's role in PCB126 induced hepatotoxicity and hepatic micronutrient disruption.

A Study of 2,3,7,8-Tetrachlorodibenzo-p-dioxin Induced Liver Injury in Jian Carp (*Cyprinus carpio* var. Jian) Using Precision-Cut Liver Slices.

Methylation of inorganic arsenic by murine fetal tissue explants.

Gene Expression Patterns Associated With Histopathology in Toxic Liver Fibrosis.

Artificial sweetener neohesperidin dihydrochalcone showed antioxidative, anti-inflammatory and anti-apoptosis effects against paraquat-induced liver injury in mice.

Histopathological and ultramicroscopical changes in gill, liver and kidney of *Anabas testudineus* (Bloch) after chronic intoxication of almix (metsulfuron methyl 10.1%+chlorimuron ethyl 10.1%) herbicide.

Cancer incidence and metolachlor use in the Agricultural Health Study: An update.

Oral exposure of pubertal male mice to endocrine-disrupting chemicals alters fat metabolism in adult livers.

Correlations of Gut Microbial Community Shift with Hepatic Damage and Growth Inhibition of *Carassius auratus* Induced by Pentachlorophenol Exposure.

Toxicological evaluation of ametryn effects in Wistar rats.

Potential toxic effects of glyphosate and its commercial formulations below regulatory limits.

Environmental pollutants parathion, paraquat and bisphenol A show distinct effects towards nuclear receptors-mediated induction of xenobiotics-metabolizing cytochromes P450 in human hepatocytes.

Molecular characterization of heat-shock protein 90 gene and its expression in *Gobiocypris rarus* juveniles exposed to pentachlorophenol.

Cytotoxicity of the association of pesticides Roundup Transorb[®] and Furadan 350 SC[®] on the zebrafish cell line, ZF-L.

[The prevention and therapeutics effect of sodium bicarbonate with gastric lavage, atomization inhalation and intravenous injection on the patients with paraquat poisoning and pulmonary fibrosis induced by paraquat poisoning].

Methylene blue attenuates acute liver injury induced by paraquat in rats.

Energy reserves mobilization in the yellow eel as herbicide exposure effect.

Roundup[®] exposure promotes gills and liver impairments, DNA damage and inhibition of brain cholinergic activity in the Amazon teleost fish *Colossoma macropomum*.

Transcriptome profile analysis reflects rat liver and kidney damage following chronic ultra-low dose Roundup exposure.

Toxicity of environmental Gesagard to goldfish may be connected with induction of low intensity oxidative stress in concentration- and tissue-related manners.

Altered levels of endocrine biomarkers in juvenile barramundi (*Lates calcarifer*; Bloch) following exposure to commercial herbicide and surfactant formulations.

Pneumomediastinum predicts early mortality in acute paraquat poisoning.

Hepatotoxicity of herbicide Sencor in goldfish may result from induction of mild oxidative stress.

Pronamide: Weight of evidence for potential estrogen, androgen or thyroid effects.

Pronamide: Human relevance of liver-mediated rat leydig cell tumors.

Alteration in the cytokine levels and histopathological damage in common carp induced by glyphosate.

Integrated assessment of biomarker response in carp (*Cyprinus carpio*) and silver catfish (*Rhamdia quelen*) exposed to clomazone.

Effects of dietary supplementation with glutamate and aspartate on diquat-induced oxidative stress in piglets.

[Effect of rhubarb as the main composition of sequential treatment in patients with acute paraquat poisoning: a prospective clinical research].

Mode of action and human relevance of pronamide-induced rat thyroid tumors.

Safety assessment of potential food ingredients in canine hepatocytes.

Subcellular energy balance of *Odontesthes bonariensis* exposed to a glyphosate-based herbicide.

Proposal for novel metabolic pathway of highly toxic dimethylated arsenics accompanied by enzymatic sulfuration, desulfuration and oxidation.

Commercial formulation containing 2,4-D affects biochemical parameters and morphological indices of silver catfish exposed for 90 days.

Physiological and oxidative stress biomarkers in the freshwater monosex Nile tilapia, *Oreochromis niloticus* L., exposed to pendimethalin-based herbicide.

The herbicide linuron inhibits cholesterol biosynthesis and induces cellular stress responses in brown trout.

Atrazine levels in the Jaboticabal water stream (SÃ£o Paulo State, Brazil) and its toxicological effects on the pacu fish *Piaractus mesopotamicus*.

Atrazine and chlorpyrifos exposure induces liver autophagic response in common carp.

Molecular mechanisms of acrolein toxicity: relevance to human disease.

(1)H NMR based metabolomics approach to study the toxic effects of herbicide butachlor on goldfish (*Carassius auratus*).

Severe cholestasis and hepatic dysfunction in a case of fatal paraquat poisoning.

Hepatoprotective effect of *Matricaria chamomilla* L. in paraquat induced rat liver injury.

Global transcriptomic profiling demonstrates induction of oxidative stress and of compensatory cellular stress responses in brown trout exposed to glyphosate and Roundup.

Study of Cytotoxic Effects of Benzonitrile Pesticides.

Toxicity assessment of 2,4-D and MCPA herbicides in primary culture of fish hepatic cells.

Effects of glyphosate on juvenile rainbow trout (*Oncorhynchus mykiss*): transcriptional and enzymatic analyses of antioxidant defence system, histopathological liver damage and swimming performance.

Combined effects of repeated administration of Bretmont Wipeout (glyphosate) and Ultrazin (atrazine) on testosterone, oxidative stress and sperm quality of Wistar rats.

Transcription alteration of immunologic parameters and histopathological damage in common carp (*Cyprinus carpio* L.) caused by paraquat.

Oxidative stress and biochemical responses in the tissues of African catfish *Clarias gariepinus* juvenile following exposure to primextra herbicide.

Methylene blue, a potential therapeutic target for mitochondria dysfunction.

Aminotriazole alleviates acetaminophen poisoning via downregulating P450 2E1 and suppressing inflammation.

[The catalase inhibitor aminotriazole alleviates acute alcoholic liver injury].

The antisenescence effect of trans-cinnamaldehyde on adipose-derived stem cells.

Reduction of the Pentavalent Arsenical Dimethylarsinic Acid and the GSTO1 Substrate S-(4-Nitrophenacyl)glutathione by Rat Liver Cytosol: Analyzing the Role of GSTO1 in Arsenic Reduction.

Protection of HepG2 cells against acrolein toxicity by 2-cyano-3,12-dioxooleana-1,9-dien-28-imidazole via glutathione-mediated mechanism.

Steady-state metabolism of ethanol in perfused rat livers treated with cyanamide: quantitative analysis of acetaldehyde effects on the metabolic flux rates.

Acrolein impairs the cholesterol transport functions of high density lipoproteins.

The distribution in tissues and urine of arsenic metabolites after subchronic exposure to dimethylarsinic acid (DMAV) in rats.

Comparison on the fatty acid profiles of liver, subcutaneous fat and muscle from feedlot steers finished on diets supplemented with or without cinnamaldehyde or monensin.

Effects of toluene, acrolein and vinyl chloride on motor activity of *Drosophila melanogaster*.

Anti-androgen flutamide suppresses hepatocellular carcinoma cell proliferation via the aryl hydrocarbon receptor mediated induction of transforming growth factor- β 1.

Enhanced protective activity of nano formulated andrographolide against arsenic induced liver damage.

Progression of micronutrient alteration and hepatotoxicity following acute PCB126 exposure.

Ancestral TCDD exposure promotes epigenetic transgenerational inheritance of imprinted gene Igf2: Methylation status and DNMTs.

Assessment of global and gene-specific DNA methylation in rat liver and kidney in response to non-genotoxic carcinogen exposure.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin Alters Lipid Metabolism and Depletes Immune Cell Populations in the Jejunum of C57BL/6 Mice.

Effects of co-exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin and polychlorinated biphenyls on nonalcoholic fatty liver disease in mice.

Development of a physiologically-based pharmacokinetic model of 2-phenoxyethanol and its metabolite phenoxyacetic acid in rats and humans to address toxicokinetic uncertainty in risk assessment.

Evaluating microRNA profiles reveals discriminative responses following genotoxic or non-genotoxic carcinogen exposure in primary mouse hepatocytes.

Development of Species-Specific Ah Receptor-Responsive Third Generation CALUX Cell Lines with Enhanced Responsiveness and Improved Detection Limits.

The adverse outcome pathway for rodent liver tumor promotion by sustained activation of the aryl hydrocarbon receptor.

Modulation of aryl hydrocarbon receptor-regulated enzymes by trimethylarsine oxide in C57BL/6 mice: In vivo and in vitro studies.

NADPH Oxidase-Mediated Superoxide Production by Intermediary Bacterial Metabolites of Dibenzofuran: A Potential Cause for Trans-Mitochondrial Membrane Potential ($\Delta\psi_m$) Collapse in Human Hepatoma Cells.

Ablation of XP-V gene causes adipose tissue senescence and metabolic abnormalities.

Persistent reduced oxygen requirement following blood transfusion during recovery from hemorrhagic shock.

The Role of Liver in Determining Serum Colon-Derived Uremic Solutes.

Fluorimetric screening assay for protein carbonyl evaluation in biological samples.

Loss of the Mono-ADP-ribosyltransferase, Tiparp, Increases Sensitivity to Dioxin-induced Steatohepatitis and Lethality.

Improved method for quantitative analysis of methylated phosphatidylethanolamine species and its application for analysis of diabetic-mouse liver samples.

The Transcriptional Effects of PCB118 and PCB153 on the Liver, Adipose Tissue, Muscle and Colon of Mice: Highlighting of Glut4 and Lipin1 as Main Target Genes for PCB Induced Metabolic Disorders.

Arsenic-induced dyslipidemia in male albino rats: comparison between trivalent and pentavalent inorganic arsenic in drinking water.

Activating and Inhibitory Functions of WNT/ β^2 -Catenin in the Induction of Cytochromes P450 by Nuclear Receptors in HepaRG Cells.

Activation of aryl hydrocarbon receptor dissociates fatty liver from insulin resistance by inducing fibroblast growth factor 21.

Identification of Environmental Chemicals Associated with the Development of Toxicant-associated Fatty Liver Disease in Rodents.

Effect of tocopherol on biochemical blood parameters in pleuritis-induced rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Omeprazole Inhibits Pancreatic Cancer Cell Invasion through a Nongenomic Aryl Hydrocarbon Receptor Pathway.

Ferrous sulfate, but not iron polymaltose complex, aggravates local and systemic inflammation and oxidative stress in dextran sodium sulfate-induced colitis in rats.

[Effect of Cynaropicrin on 2,3,4,7,8-Pentachlorodibenzofuran-induced Wasting Syndrome and Oxidative Stress].

Oligofructose protects against arsenic-induced liver injury in a model of environment/obesity interaction.

Effects of nanoparticle-encapsulated curcumin on arsenic-induced liver toxicity in rats.

Metabolic outcome of female mice exposed to a mixture of low-dose pollutants in a diet-induced obesity model.

Isolation and characterization of Cu/Zn-superoxide dismutase in *Fasciola gigantica*.

Development of a computational high-throughput tool for the quantitative examination of dose-dependent histological features.

Controlled-release mitochondrial protonophore reverses diabetes and steatohepatitis in rats.

Stability of the aryl hydrocarbon receptor and its regulated genes in the low activity variant of Hepa-1 cell line.

Serum metabolomics reveals that arsenic exposure disrupted lipid and amino acid metabolism in rats: a step forward in understanding chronic arsenic toxicity.

Estimation of a benchmark dose in the presence or absence of hormesis using posterior averaging.

Identification of modulators of the nuclear receptor peroxisome proliferator-activated receptor β (PPAR β) in a mouse liver gene expression compendium.

Effects of sodium arsenite on the some laboratory signs and therapeutic role of thymoquinone in the rats.

Lineage-dependent effects of aryl hydrocarbon receptor agonists contribute to liver tumorigenesis.

Shed syndecan-1 translocates to the nucleus of cells delivering growth factors and inhibiting histone acetylation: a novel mechanism of tumor-host cross-talk.

Dioxin-Produced Alteration in the Profiles of Fecal and Urinary Metabolomes: A Change in Bile Acids and Its Relevance to Toxicity.

In Vitro Protective Potentials of *Annona muricata* Leaf Extracts Against Sodium Arsenite-induced Toxicity.

Differential expression of CYP1A1 and CYP1A2 genes in H4IIE rat hepatoma cells exposed to TCDD and PAHs.

Decidual β -carotene-15,15'-oxygenase-1 and 2 (BCMO1,2) expression is increased in nitrofen model of congenital diaphragmatic hernia.

Growth Period Effects on the Protective Properties of Aloe vera Against t-BHP-Induced Oxidative Stress in Chang Cells.

Transcriptional regulation of human paraoxonase 1 by PXR and GR in human hepatoma cells.

Diamide accelerates opening of the TI(+)-induced permeability transition pore in Ca(2+)-loaded rat liver mitochondria.

World Health Organization estimates of the global and regional disease burden of four foodborne chemical toxins, 2010: a data synthesis.

Effects of iron-glycine chelate on growth, carcass characteristic, liver mineral concentrations and haematological and biochemical blood parameters in broilers.

BFCOD activity in fish cell lines and zebrafish embryos and its modulation by chemical ligands of human aryl hydrocarbon and nuclear receptors.

Synthesis, Molecular Structure, Metabolic Stability and QSAR Studies of a Novel Series of Anticancer N-Acylbenzenesulfonamides.

Hepatotoxicity, Nephrotoxicity and Oxidative Stress in Rat Testis Following Exposure to Haloxyfop-p-methyl Ester, an Aryloxyphenoxypropionate Herbicide.

The role of thioredoxin reductase and glutathione reductase in plumbagin-induced, reactive oxygen species-mediated apoptosis in cancer cell lines.

Screening a mouse liver gene expression compendium identifies modulators of the aryl hydrocarbon receptor (AhR).

Combination effects of nano-TiO₂ and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on biotransformation gene expression in the liver of European sea bass *Dicentrarchus labrax*.

Eicosapentaenoic acid prevents TCDD-induced oxidative stress and inflammatory response by modulating MAP kinases and redox-sensitive transcription factors.

Toxicogenetic effects of low concentrations of the pesticides imidacloprid and sulfentrazone individually and in combination in in vitro tests with HepG2 cells and *Salmonella typhimurium*.

Ameliorative effect of lycopene against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced rat liver microsomal toxicity: an in vitro study.

Hydroxyl metabolite of PCB 180 induces DNA damage signaling and enhances the DNA damaging effect of benzo[a]pyrene.

Synthesis and phototoxicity of isomeric 7,9-diglutathione pyrrole adducts: Formation of reactive oxygen species and induction of lipid peroxidation.

Two persistent organic pollutants which act through different xenosensors (alpha-endosulfan and 2,3,7,8 tetrachlorodibenzo-p-dioxin) interact in a mixture and downregulate multiple genes involved in human hepatocyte lipid and glucose metabolism.

Male and female mice show significant differences in hepatic transcriptomic response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The effects of drugs with immunosuppressive or immunomodulatory activities on xenobiotics-metabolizing enzymes expression in primary human hepatocytes.

Preliminary study on brominated dioxins/furans and hydroxylated/methoxylated PBDEs in Baltic cod (*Gadus morhua*) liver. Comparison to the levels of analogue chlorinated co-occurring pollutants.

Metabolomics Reveals that Aryl Hydrocarbon Receptor Activation by Environmental Chemicals Induces Systemic Metabolic Dysfunction in Mice.

The aryl hydrocarbon receptor-dependent disruption of contact inhibition in rat liver WB-F344 epithelial cells is linked with induction of survivin, but not with inhibition of apoptosis.

Comet assay evaluation of six chemicals of known genotoxic potential in rats.

Pharmacokinetic and Genomic Effects of Arsenite in Drinking Water on Mouse Lung in a 30-Day Exposure.

Mechanisms of Fatal Cardiotoxicity following High-Dose Cyclophosphamide Therapy and a Method for Its Prevention.

Toxicological and phytoprotective effect of *Keayodendron bridelioides* and *Monodora myristica* extracts in Wistar rats.

Closure of mitochondrial potassium channels favors opening of the Tl(+)-induced permeability transition pore in Ca(2+)-loaded rat liver mitochondria.

Characterization of arsenic hepatobiliary transport using sandwich-cultured human hepatocytes.

Phosphatidylcholine Specific PLC-Induced Dysregulation of Gap Junctions, a Robust Cellular Response to Environmental Toxicants, and Prevention by Resveratrol in a Rat Liver Cell Model.

Clinical features and prognosis of paraquat poisoning: a review of 41 cases.

RNA-Seq versus oligonucleotide array assessment of dose-dependent TCDD-elicited hepatic gene expression in mice.

Catechins in tea suppress the activity of cytochrome P450 1A1 through the aryl hydrocarbon receptor activation pathway in rat livers.

Sex-related differences in murine hepatic transcriptional and proteomic responses to TCDD.

2-Acetylcyclopentanone, an enolate-forming 1,3-dicarbonyl compound, is cytoprotective in warm ischemia-reperfusion injury of rat liver.

Suspected flunixin poisoning of a wild Eurasian Griffon Vulture from Spain.

Antioxidant compounds in the seaweed *Gelidiella acerosa* protects human Peripheral Blood Mononuclear Cells against TCDD induced toxicity.

Regulation of human hepatic drug transporter activity and expression by diesel exhaust particle extract.

Potency of polycyclic aromatic hydrocarbons (PAHs) for induction of ethoxyresorufin-O-deethylase (EROD) activity in hepatocyte cultures from chicken, Pekin duck, and greater scaup.

Arsenic responsive microRNAs in vivo and their potential involvement in arsenic-induced oxidative stress.

Alcohol induced alterations to the human fecal VOC metabolome.

Investigating the mutagenic effects of three commonly used pulpotomy agents using the ames test.

Accumulation of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls in livers of young sheep.

The toxicity of sediments from Taihu Lake evaluated by several in vitro bioassays.

Regulation of pregnane-X-receptor, CYP3A and P-glycoprotein genes in the PCB-resistant killifish (*Fundulus heteroclitus*) population from New Bedford Harbor.

Aryl hydrocarbon receptor 2 mediates the toxicity of Paclitaxel on the digestive system of zebrafish embryos.

Comparing the effects of tetrabromobisphenol-A, bisphenol A, and their potential replacement alternatives, TBBPA-bis(2,3-dibromopropyl ether) and bisphenol S, on cell viability and messenger ribonucleic acid expression in chicken embryonic hepatocytes.

Paraquat Poisoning: Analysis of an Uncommon Cause of Fatal Poisoning from Manipal, South India.

[The Relationship of Obesity to the Character of Nutrition].

Different regulation of aryl hydrocarbon receptor-regulated genes in response to dioxin in undifferentiated and neuronally differentiated human neuroblastoma SH-SY5Y cells.

Naringin ameliorates sodium arsenite-induced renal and hepatic toxicity in rats: decisive role of KIM-1, Caspase-3, TGF- β 2, and TNF- α .

Modulation of aryl hydrocarbon receptor regulated genes by acute administration of trimethylarsine oxide in the lung, kidney and heart of C57BL/6 mice.

Chronic exposure to low-dose arsenic modulates lipogenic gene expression in mice.

Persistence and dioxin-like toxicity of carbazole and chlorocarbazoles in soil.

Modulatory role of Acacia honey from north-west Nigeria on sodium arsenite-induced clastogenicity and oxidative stress in male Wistar rats.

Diet with diphenyl diselenide mitigates quinclorac toxicity in silver catfish (*Rhamdia quelen*).

Agent Orange exposure and cancer incidence in Korean Vietnam veterans: a prospective cohort study.

[Comparative study of different methods of blood purification treatment of paraquat intoxication].

Metabolic and behavior changes in surubim acutely exposed to a glyphosate-based herbicide.

Progression of DNA damage induced by a glyphosate-based herbicide in fish (*Anguilla anguilla*) upon exposure and post-exposure periods--insights into the mechanisms of genotoxicity and DNA repair.

Characterization of nuclear receptor-mediated murine hepatocarcinogenesis of the herbicide pronamide and its human relevance.

Toxic effects of paraquat on cytokine expression in common carp, *Cyprinus carpio* L.

Effects of the surfactant polyoxyethylene amine (POEA) on genotoxic, biochemical and physiological parameters of the freshwater teleost *Prochilodus lineatus*.

Biochemical effects of glyphosate based herbicide, Excel Mera 71 on enzyme activities of acetylcholinesterase (AChE), lipid peroxidation (LPO), catalase (CAT), glutathione-S-transferase (GST) and protein content on teleostean fishes.

Cytotoxic effects of pentachlorophenol (PCP) and its metabolite tetrachlorohydroquinone (TCHQ) on liver cells are modulated by antioxidants.

Agent Orange exposure and disease prevalence in Korean Vietnam veterans: the Korean veterans health study.

Effects of the acute exposition to glyphosate-based herbicide on oxidative stress parameters and antioxidant responses in a hybrid Amazon fish surubim (*Pseudoplatystoma* sp).

Betanin attenuates paraquat-induced liver toxicity through a mitochondrial pathway.

Toxicity of the herbicide linuron as assessed by bacterial and mitochondrial model systems.

Effects of Sublethal Exposure to a Glyphosate-Based Herbicide Formulation on Metabolic Activities of Different Xenobiotic-Metabolizing Enzymes in Rats.

Effects of atrazine on endocrinology and physiology in juvenile barramundi, *Lates calcarifer* (Bloch).

Clinical characteristics of paraquat poisoning in 22 Chinese children.

[Early acute liver injury in paraquat poisoning rats].

Effects of glyphosate on growth rate, metabolic rate and energy reserves of early juvenile crayfish, *Cherax quadricarinatus* M.

Histopathological and estrogen effect of pentachlorophenol on the rare minnow (*Gobiocypris rarus*).

Fetotoxicity of 2,4-dichlorophenoxyacetic acid in rats and the protective role of vitamin E.

[Prognosis value of urine paraquat semi-quantitative in the patients with acute paraquat poisoning].

[Curcumin alleviated liver oxidative stress injury of rat induced by paraquat].

Herbicide clomazone effects on $\hat{\Gamma}$ -aminolevulinic acid activity and metabolic parameters in *Cyprinus carpio*.

Effect of atrazine, glyphosate and quinclorac on biochemical parameters, lipid peroxidation and survival in bullfrog tadpoles (*Lithobates catesbeianus*).

Chronic exposure of mice to environmental endocrine-disrupting chemicals disturbs their energy metabolism.

Tissue-specific induction of oxidative stress in goldfish by 2,4-dichlorophenoxyacetic acid: mild in brain and moderate in liver and kidney.

Exposure of mice to atrazine and its metabolite diaminochlorotriazine elicits oxidative stress and endocrine disruption.

Assessment of DNA damage, cytotoxicity, and apoptosis in human hepatoma (HepG2) cells after flurochloridone herbicide exposure.

Atrazine represses S100A4 gene expression and TPA-induced motility in HepG2 cells.

Cellular impact of combinations of endosulfan, atrazine, and chlorpyrifos on human primary hepatocytes and HepaRG cells after short and chronic exposures.

Acrolein, a highly toxic aldehyde generated under oxidative stress in vivo, aggravates the mouse liver damage after acetaminophen overdose.

The effect of subchronic metribuzin exposure to signal crayfish (*Pacifastacus leniusculus* Dana 1852).

Evaluation of metabolic enzymes in response to Excel Mera 71, a glyphosate-based herbicide, and recovery pattern in freshwater teleostean fishes.

[Oxidative stress and antioxidant therapy with alpha-lipoic acid inclusion in acute poisoning by herbicide based on 2,4-dichlorophenoxyacetic acid].

Effect of chronic exposure to prometryne on oxidative stress and antioxidant response in red swamp crayfish (*Procambarus clarkii*).

Development and application of a microwave-assisted extraction and LC/MS/MS methodology to the determination of antifouling booster biocides in sea mullets (*Mugil cephalus*) organisms.

Glyphosate commercial formulation causes cytotoxicity, oxidative effects, and apoptosis on human cells: differences with its active ingredient.

Hematological and histopathological changes in silver catfish *Rhamdia quelen* (Siluriformes) exposed to clomazone herbicide in the Madre River, Santa Catarina State, Southern Brazil.

Chronic exposure to pentachlorophenol alters thyroid hormones and thyroid hormone pathway mRNAs in zebrafish.

Agent Orange exposure and risk of death in Korean Vietnam veterans: Korean Veterans Health Study.

Suppression of sulfoconjugation reduces the protective effect of ortho-aminoazotoluene on hepatocarcinogenesis induced by diethylnitrosamine in mice.

Cinnamon extract improves insulin sensitivity in the brain and lowers liver fat in mouse models of obesity.

The impact of a specific blend of essential oil components and sodium butyrate in feed on growth performance and *Salmonella* counts in experimentally challenged broilers.

Synthesis, characterization, and preclinical evaluation of new thiazolidin-4-ones substituted with p-chlorophenoxy acetic acid and clofibrac acid against insulin resistance and metabolic disorder.

Enantioselective metabolism of the chiral herbicide diclofop-methyl and diclofop by HPLC in loach (*Misgurnus anguillicaudatus*) liver microsomes in vitro.

Human plasma concentrations of herbicidal carbamate molinate extrapolated from the pharmacokinetics established in in vivo experiments with chimeric mice with humanized liver and physiologically based pharmacokinetic modeling.

Metabolism and physiologically based pharmacokinetic modeling of flumioxazin in pregnant animals.

Effects of atrazine and chlorpyrifos on cytochrome P450 in common carp liver.

Comparison of speciated arsenic levels in the liver and brain of mice between arsenate and arsenite exposure at the early life.

Dietary essential oils improve the hepatic antioxidative status of broiler chickens.

Effects of in vivo chronic exposure to pendimethalin on EROD activity and antioxidant defenses in rainbow trout (*Oncorhynchus mykiss*).

p-Cresol affects reactive oxygen species generation, cell cycle arrest, cytotoxicity and inflammation/atherosclerosis-related modulators production in endothelial cells and mononuclear cells.

Bioaccumulation of arsenic species in rays from the northern Adriatic Sea.

Effect of iron supplementation on the expression of hypoxia-inducible factor and antioxidant status in rats exposed to high-altitude hypoxia environment.

A nanoparticulate ferritin-core mimetic is well taken up by HuTu 80 duodenal cells and its absorption in mice is regulated by body iron.

Genetic deletion of LXR \pm prevents arsenic-enhanced atherosclerosis, but not arsenic-altered plaque composition.

Potential involvement of chemicals in liver cancer progression: an alternative toxicological approach combining biomarkers and innovative technologies.

Dynamic changes in metabolic profiles of rats subchronically exposed to mequindox.

Dioxin-induced fetal growth retardation: the role of a preceding attenuation in the circulating level of glucocorticoid.

Fructo-oligosaccharides and iron bioavailability in anaemic rats: the effects on iron species distribution, ferroportin-1 expression, crypt bifurcation and crypt cell proliferation in the caecum.

An integrative risk assessment approach for persistent chemicals: a case study on dioxins, furans and dioxin-like PCBs in France.

Burn after feeding. An old uncoupler of oxidative phosphorylation is redesigned for the treatment of nonalcoholic fatty liver disease.

Inhibition of human drug-metabolising cytochrome P450 and UDP-glucuronosyltransferase enzyme activities in vitro by uremic toxins.

Toxicological profile of ultrapure 2,2',3,4,4',5,5'-heptachlorobiphenyl (PCB 180) in adult rats.

Gestational and lactational exposure to the polychlorinated biphenyl mixture Aroclor 1254 modulates retinoid homeostasis in rat offspring.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on hormones of energy balance in a TCDD-sensitive and a TCDD-resistant rat strain.

Responsiveness of hepatic and cerebral cytochrome P450 in rat offspring prenatally and lactationally exposed to a reconstituted PCB mixture.

Androgen receptor signaling in hepatocellular carcinoma and pancreatic cancers.

The chemical uncoupler 2,4-dinitrophenol (DNP) protects against diet-induced obesity and improves energy homeostasis in mice at thermoneutrality.

Liver tumor promotion by 2,3,7,8-tetrachlorodibenzo-p-dioxin is dependent on the aryl hydrocarbon receptor and TNF/IL-1 receptors.

Hepatoprotective and anticlastogenic effects of ethanol extract of *Irvingia gabonensis* (IG) leaves in sodium arsenite-induced toxicity in male Wistar rats.

Effects of acute dietary iron overload in pigs (*Sus scrofa*) with induced type 2 diabetes mellitus.

Tetrachlorobenzoquinone induces acute liver injury, up-regulates HO-1 and NQO1 expression in mice model: the protective role of chlorogenic acid.

Nanoencapsulation of DMSA monoester for better therapeutic efficacy of the chelating agent against arsenic toxicity.

Alcohol-induced autophagy contributes to loss in skeletal muscle mass.

Hepatoprotective activity of *Tephrosia purpurea* against arsenic induced toxicity in rats.

Comparison of intake and systemic relative effect potencies of dioxin-like compounds in female rats after a single oral dose.

Effect of uremic serum and uremic toxins on drug metabolism in human microsomes.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin modulates dysregulation of the lipid metabolism in mouse offspring fed a high-calorie diet.

Methylarsonous acid causes oxidative DNA damage in cells independent of the ability to biomethylate inorganic arsenic.

The aryl hydrocarbon receptor mediates raloxifene-induced apoptosis in estrogen receptor-negative hepatoma and breast cancer cells.

Sodium meta-arsenite ameliorates hyperglycemia in obese diabetic db/db mice by inhibition of hepatic gluconeogenesis.

Organic anion transporting polypeptides 1B1 and 1B3 play an important role in uremic toxin handling and drug-uremic toxin interactions in the liver.

In utero and lactational exposure to a mixture of environmental contaminants detected in Canadian Arctic human populations alters retinoid levels in rat offspring with low margins of exposure.

Mode of action and dose-response framework analysis for receptor-mediated toxicity: The aryl hydrocarbon receptor as a case study.

Aryl hydrocarbon receptor-dependent induction of liver fibrosis by dioxin.

Lack of nrf2 results in progression of proliferative lesions to neoplasms induced by long-term exposure to non-genotoxic hepatocarcinogens involving oxidative stress.

Hepatoprotective potential of astaxanthin against 2,3,7,8-tetrachlorodibenzo-p-dioxin in cultured rat hepatocytes.

Potential effects of polychlorinated biphenyls (PCBs) and selected organochlorine pesticides (OCPs) on immune cells and blood biochemistry measures: a cross-sectional assessment of the NHANES 2003-2004 data.

In vitro propagation and analysis of secondary metabolites in *Glossogyne tenuifolia* (Hsiang-Ju) - a medicinal plant native to Taiwan.

Low concentration of a dioxin (2, 3, 7, 8 TCDD) affects the glycosidases and Acid phosphatase activity in mice hepatocytes.

Subchronic arsenic exposure through drinking water alters vascular redox homeostasis and affects physical health in rats.

Y³⁺, La³⁺, and some bivalent metals inhibited the opening of the Tl⁺-induced permeability transition pore in Ca²⁺-loaded rat liver mitochondria.

Induction of glutathione synthesis in human hepatocytes by acute and chronic arsenic exposure: differential roles of mitogen-activated protein kinases.

Differential Fmo3 gene expression in various liver injury models involving hepatic oxidative stress in mice.

The effect of dietary tryptophan levels on oxidative stress of liver induced by diquat in weaned piglets.

Hepatic oxidative status and metal homeostasis disturbance of 2-hydroxylated dioxin in ICR mice.

Duodenal absorption and tissue utilization of dietary heme and nonheme iron differ in rats.

Ammonium increases Ca²⁺ signalling and up-regulates expression of TRPC1 gene in astrocytes in primary cultures and in the in vivo brain.

Protective Effect of Curcumin against the Liver Toxicity Caused by Propanil in Rats.

Estrogen receptor $\hat{\pm}$ and aryl hydrocarbon receptor cross-talk in a transfected hepatoma cell line (HepG2) exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Photolytic degradation products of two highly brominated flame retardants cause cytotoxicity and mRNA expression alterations in chicken embryonic hepatocytes.

Identification of reference proteins for Western blot analyses in mouse model systems of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) toxicity.

Human urinary biomarkers of dioxin exposure: analysis by metabolomics and biologically driven data dimensionality reduction.

A metabonomic analysis of the effect of quercetin on toxicity induced by chronic exposure to low-level dichlorvos in rat plasma.

How much do PCB toxic equivalents account for PHAH toxicity in predatory birds?

^{14}C -ORM-13070, a novel PET ligand for brain $\alpha_1\text{-C}$ -adrenoceptors: radiometabolism, plasma pharmacokinetics, whole-body distribution and radiation dosimetry in healthy men.

Potential role of catalase in mice with lipopolysaccharide/D-galactosamine-induced fulminant liver injury.

In vitro antioxidant capacity of tea of *Echinodorus grandiflorus*, "leather hat," in Wistar rat liver.

Luteolin modulates expression of drug-metabolizing enzymes through the AhR and Nrf2 pathways in hepatic cells.

Arsenite-induced changes in hepatic protein abundance in cynomolgus monkeys (*Macaca fascicularis*).

Combined chemical and toxicological long-term monitoring for AhR agonists with SPMD-based virtual organisms in drinking water Danjiangkou Reservoir, China.

Arsenic exposure alters expression of cell cycle and lipid metabolism genes in the liver of adult zebrafish (*Danio rerio*).

A new pro-prodrug aminoacid-based for trans-ferulic Acid and silybin intestinal release.

Evaluation of BDE-47 hydroxylation metabolic pathways based on a strong electron-withdrawing pentafluorobenzoyl derivatization gas chromatography/electron capture negative ionization quadrupole mass spectrometry.

FGF21 as a Hepatokine, Adipokine, and Myokine in Metabolism and Diseases.

Histopathologic alterations associated with global gene expression due to chronic dietary TCDD exposure in juvenile zebrafish.

A case report of acute severe paraquat poisoning and long-term follow-up.

Fibroblast growth factor (Fgf) 21 is a novel target gene of the aryl hydrocarbon receptor (AhR).

Ethoxyresorufin-O-deethylase (EROD) induction by TCDD, PeCDF and PCB 126 in bobwhite quail hepatocytes.

Comparative oxidative stress, metallothionein induction and organ toxicity following chronic exposure to arsenic, lead and mercury in rats.

Environmentally persistent free radicals inhibit cytochrome P450 activity in rat liver microsomes.

Palmitine activates AhR and upregulates CYP1A activity in HepG2 cells but not in human hepatocytes.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) increases bilirubin formation but hampers quantitative hepatic conversion of biliverdin to bilirubin in rats with wild-type AH receptor.

Nicotinamide nucleotide transhydrogenase (Nnt) links the substrate requirement in brain mitochondria for hydrogen peroxide removal to the thioredoxin/peroxiredoxin (Trx/Prx) system.

Demographics, clinical characteristics and management of herbicide poisoning in tertiary care hospital.

Protective effect of quercetin on atrazine-induced oxidative stress in the liver, kidney, brain, and heart of adult wistar rats.

Protective effects of *Moringa oleifera* Lam. leaves against arsenic-induced toxicity in mice.

Fatal adverse drug reactions: Experience of adverse drug reactions in a tertiary care teaching hospital of North India - A case series.

Biochemical, oxidative and histological changes caused by sub-acute oral exposure of some synthetic cyanogens in rats: ameliorative effect of α -ketoglutarate.

Wild fish from the Bay of Quinte Area of Concern contain elevated tissue concentrations of PCBs and exhibit evidence of endocrine-related health effects.

Monomethylated trivalent arsenic species disrupt steroid receptor interactions with their DNA response elements at non-cytotoxic cellular concentrations.

Novel resveratrol-based substrates for human hepatic, renal, and intestinal UDP-glucuronosyltransferases.

In Vitro Metabolism of Flucetosulfuron by Human Liver Microsomes.

Analysis of hepatic deiodinase 2 mRNA levels in natural fish lake populations exposed to different levels of putative thyroid disrupters.

Persistent organic pollutant levels in semi-domesticated reindeer (*Rangifer tarandus tarandus* L.), feed, lichen, blood, milk, placenta, foetus and calf.

Ah receptor-mediated suppression of liver regeneration through NC-XRE-driven p21Cip1 expression.

In vivo effects of the pure aryl hydrocarbon receptor antagonist GNF-351 after oral administration are limited to the gastrointestinal tract.

Development of a convenient in vivo hepatotoxin assay using a transgenic zebrafish line with liver-specific DsRed expression.

[Research on the sodium arsenite and arsenic trioxide induced proliferation and apoptosis effects on human hepatocyte].

2,4-Dichlorophenol induces global DNA hypermethylation through the increase of S-adenosylmethionine and the upregulation of DNMTs mRNA in the liver of goldfish *Carassius auratus*.

Hypoxia perturbs aryl hydrocarbon receptor signaling and CYP1A1 expression induced by PCB 126 in human skin and liver-derived cell lines.

TCDD dysregulation of 13 AHR-target genes in rat liver.

Increases in levels of epoxyeicosatrienoic and dihydroxyeicosatrienoic acids (EETs and DHETs) in liver and heart in vivo by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and in hepatic EET:DHET ratios by cotreatment with TCDD and the soluble epoxide hydrolase inhibitor AUDA.

Mammalian cell-line based toxicological evaluation of paper mill black liquor treated in a soil microcosm by indigenous alkalo-tolerant *Bacillus* sp.

In vivo mutagenicity of arsenite in the livers of gpt delta transgenic mice.

Republished study: long-term toxicity of a Roundup herbicide and a Roundup-tolerant genetically modified maize.

Chemoprevention against arsenic-induced mutagenic DNA breakage and apoptotic liver damage in rat via antioxidant and SOD1 upregulation by green tea (*Camellia sinensis*) which recovers broken DNA resulted from arsenic-H₂O₂ related in vitro oxidant stress.

Effects of short term exposure of atrazine on the liver and kidney of normal and diabetic rats.

Influence of zinc supplementation on histopathological changes in the stomach, liver, kidney, brain, pancreas and spleen during subchronic exposure of Wistar rats to glyphosate.

Serum biochemical assessment of hepatic and renal functions of rats during oral exposure to glyphosate with zinc.

Development of a screening system for the detection of chemically induced DNA methylation alterations in a zebrafish liver cell line.

Assessment of genotoxic potential of arsenic in female albino rats at permissible dose levels.

Mammalian cell line-based bioassays for toxicological evaluation of landfill leachate treated by *Pseudomonas* sp. ISTDF1.

3,3',4,4'-Tetrachlorobiphenyl-mediated decrease of serum thyroxine level in C57BL/6 and DBA/2 mice occurs mainly through enhanced accumulation of thyroxine in the liver.

Alpha-lipoic acid protects oxidative stress, changes in cholinergic system and tissue histopathology during co-exposure to arsenic-dichlorvos in rats.

Identification of arsenolipids and their degradation products in cod-liver oil.

Acute toxicity of a commercial glyphosate formulation on European sea bass juveniles (*Dicentrarchus labrax* L.): gene expressions of heme oxygenase-1 (ho-1), acetylcholinesterase (AChE) and aromatases (cyp19a and cyp19b).

Oral lesions and pulmonary fibrosis after ingesting grapes.

Effect of a glyphosate-based herbicide in *Cyprinus carpio*: assessment of acetylcholinesterase activity, hematological responses and serum biochemical parameters.

Ethoxylated adjuvants of glyphosate-based herbicides are active principles of human cell toxicity.

Acrolein-induced oxidative stress in NAD(P)H Oxidase Subunit gp91phox knock-out mice and its modulation of NF- κ B and CD36.

Atrazine is primarily responsible for the toxicity of long-term exposure to a combination of atrazine and inorganic arsenic in the nigrostriatal system of the albino rat.

Enhanced cytotoxicity of pentachlorophenol by perfluorooctane sulfonate or perfluorooctanoic acid in HepG2 cells.

Diphenyl diselenide prevents hepatic alterations induced by paraquat in rats.

Alterations in fatty acids of polar lipids in *Salmo trutta* on long-term exposure to a glyphosate-based herbicide (Roundup).

Evaluation of hydroxyatrazine in the endocrine disruptor screening and testing program's male and female pubertal protocols.

Detrimental effects of metronidazole on the liver of freshwater common carp (*Cyprinus carpio* L.).

Methylene blue protects against paraquat-induced acute lung injury in rats.

Effect of methylsulfonylmethane on paraquat-induced acute lung and liver injury in mice.

Toxicological studies on the short term exposure of *Clarias albopunctatus* (Lamonte and Nichole 1927) to sub-lethal concentrations of roundup.

Comparative study on effects of dietary with diphenyl diselenide on oxidative stress in carp (*Cyprinus carpio*) and silver catfish (*Rhamdia* sp.) exposed to herbicide clomazone.

Photocatalytic degradation of the herbicide clomazone in natural water using TiO₂: kinetics, mechanism, and toxicity of degradation products.

Effects of the herbicide atrazine in neotropical catfish (*Rhamdia quelen*).

Hematological and biochemical alterations in the fish *Prochilodus lineatus* caused by the herbicide clomazone.

Alteration of lipid status and lipid metabolism, induction of oxidative stress and lipid peroxidation by 2,4-dichlorophenoxyacetic herbicide in rat liver.

Propanil-induced histopathological changes in the liver and kidney of mice.

CT imaging as a prognostic indicator for patients with pulmonary injury from acute paraquat poisoning.

Dietary supplementation with *Lactobacillus fermentum* I5007 improves the anti-oxidative activity of weanling piglets challenged with diquat.

Oxidative stress in carp exposed to quinclorac herbicide under rice field condition.

Effects of chemical and handling exposure on fatty acids, oxidative stress and morphological welfare indicators in gilt-head sea bream (*Sparus aurata*).

[Effect of glyphosate on the energy exchange in carp organs].

Assessing eco-toxicological effects of industrial 2,4-D acid iso-octylester herbicide on rat pancreas and liver.

Paraquat poisoning in pediatric patients.

Oral exposure to atrazine modulates hormone synthesis and the transcription of steroidogenic genes in male peripubertal mice.

Genotoxic effects of the herbicide Roundup(®) in the fish *Corydoras paleatus* (Jenyns 1842) after short-term, environmentally low concentration exposure.

Reduction of dimethylarsinic acid to the highly toxic dimethylarsinous acid by rats and rat liver cytosol.

Determination of glyphosate and AMPA in blood and urine from humans: about 13 cases of acute intoxication.

Comments on 'Spectrum of toxic hepatitis following intentional paraquat ingestion'.

A metal mixture induces transformation upon antioxidant depletion in a hepatic cell line.

Ratios of biliary glutathione disulfide (GSSG) to glutathione (GSH): a potential index to screen drug-induced hepatic oxidative stress in rats and mice.

Mutagenic/recombinogenic effects of four lipid peroxidation products in *Drosophila*.

Laboratory and field exposure of two species of juvenile amphibians to a glyphosate-based herbicide and *Batrachochytrium dendrobatidis*.

Lethal synergism between organic and inorganic wood preservatives via formation of an unusual lipophilic ternary complex.

Biochemical and molecular mechanisms of N-acetyl cysteine and silymarin-mediated protection against maneb- and paraquat-induced hepatotoxicity in rats.

Impact of the redox-cycling herbicide diquat on transcript expression and antioxidant enzymatic activities of the freshwater snail *Lymnaea stagnalis*.

Renal replacement therapy in acute poisonings--one center experience.

Oral administration of pentachlorophenol induces interferon signaling mRNAs in C57BL/6 male mouse liver.

Recovery ability of common carp (*Cyprinus carpio*) after a short-term exposure to terbutylazine.

Liver injury induced by thirty- and fifty-nanometer-diameter silica nanoparticles.

Effects of the herbicide imazapyr on juvenile Oregon spotted frogs.

Cellular effects of metolachlor exposure on human liver (HepG2) cells.

Amelioration of paraquat-induced pulmonary injury by mesenchymal stem cells.

Differential regulation of the rainbow trout (*Oncorhynchus mykiss*) MT-A gene by nuclear factor interleukin-6 and activator protein-1.

Acrolein stimulates the synthesis of IL-6 and C-reactive protein (CRP) in thrombosis model mice and cultured cells.

Wnt/ β -catenin signaling protects mouse liver against oxidative stress-induced apoptosis through the inhibition of forkhead transcription factor FoxO3.

Mutagenic activation reduces carcinogenic activity of ortho-aminoazotoluene for mouse liver.

The effects of temperature and dissolved oxygen on antioxidant defences and oxidative damage in the fathead minnow *Pimephales promelas*.

Cinnamaldehyde-induced apoptosis in human hepatoma PLC/PRF/5 cells involves the mitochondrial death pathway and is sensitive to inhibition by cyclosporin A and z-VAD-fmk.

Interaction of phthalates and phenoxy acid herbicide environmental pollutants with intestinal intracellular lipid binding proteins.

A vortex-assisted MSPD method for the extraction of pesticide residues from fish liver and crab hepatopancreas with determination by GC-MS.

Acetaldehyde-induced cytotoxicity involves induction of spermine oxidase at the transcriptional level.

Protective effects of dietary arginine supplementation against oxidative stress in weaned piglets.

Antimitotic herbicides bind to an unidentified site on malarial parasite tubulin and block development of liver-stage *Plasmodium* parasites.

Acrolein and chloroacetaldehyde: an examination of the cell and cell-free biomarkers of toxicity.

Effect of chronic exposure to prometryne on oxidative stress and antioxidant response in common carp (*Cyprinus carpio* L.).

Oxidative DNA damage and in vivo mutagenicity caused by reactive oxygen species generated in the livers of p53-proficient or -deficient gpt delta mice treated with non-genotoxic hepatocarcinogens.

Reversal of hypertriglyceridemia, fatty liver disease, and insulin resistance by a liver-targeted mitochondrial uncoupler.

Treating fatty liver and insulin resistance.

Pretreatment with TCDD exacerbates liver injury from Concanavalin A: critical role for NK cells.

Multiple classes of environmental chemicals are associated with liver disease: NHANES 2003-2004.

Comparisons of differential gene expression elicited by TCDD, PCB126, β 2NF, or ICZ in mouse hepatoma Hepa1c1c7 cells and C57BL/6 mouse liver.

Low-dose food contaminants trigger sex-specific, hepatic metabolic changes in the progeny of obese mice.

Arsenic induced toxicity and histopathological changes in gill and liver tissue of freshwater fish, tilapia (*Oreochromis mossambicus*).

Propolis alleviates 2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced histological changes, oxidative stress and DNA damage in rat liver.

Malassezia yeasts produce a collection of exceptionally potent activators of the Ah (dioxin) receptor detected in diseased human skin.

Beneficial effect of astaxanthin on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced liver injury in rats.

TCDD induces the expression of insulin-like growth factor binding protein 4 in 5L rat hepatoma cells: a cautionary tale of the use of this cell line in studies on dioxin toxicity.

Proteomic analysis of arsenic-exposed zebrafish (*Danio rerio*) identifies altered expression in proteins involved in fibrosis and lipid uptake in a gender-specific manner.

Effects of iron polymaltose complex, ferrous fumarate and ferrous sulfate treatments in anemic pregnant rats, their fetuses and placentas.

Seizure control by ketogenic diet-associated medium chain fatty acids.

Activation of the aryl hydrocarbon receptor sensitizes mice to nonalcoholic steatohepatitis by deactivating mitochondrial sirtuin deacetylase Sirt3.

Nerve growth factor exhibits an antioxidant and an autocrine activity in mouse liver that is modulated by buthionine sulfoximine, arsenic, and acetaminophen.

Biological and tumor-promoting effects of dioxin-like and non-dioxin-like polychlorinated biphenyls in mouse liver after single or combined treatment.

Association between exposure to dioxin-like polychlorinated biphenyls and miR-191 expression in human peripheral blood mononuclear cells.

Pelargonidin activates the AhR and induces CYP1A1 in primary human hepatocytes and human cancer cell lines HepG2 and LS174T.

Ethylendioxy-PIP2 oxalate reduces ganglioside storage in juvenile Sandhoff disease mice.

Role of hepatic and pancreatic oxidative stress in arsenic induced diabetic condition in Wistar rats.

Aryl hydrocarbon receptor-mediated disruption of contact inhibition is associated with connexin43 downregulation and inhibition of gap junctional intercellular communication.

Effects of quercetin and chrysin on 2,3,7,8-tetrachlorodibenzo-p-dioxin induced hepatotoxicity in rats.

Cyprodinil as an activator of aryl hydrocarbon receptor.

Dioxin suppresses benzo[a]pyrene-induced mutations and DNA adduct formation through cytochrome P450 1A1 induction and (±)-anti-benzo[a]pyrene-7,8-diol-9,10-epoxide inactivation in human hepatoma cells.

Methane biogenesis during sodium azide-induced chemical hypoxia in rats.

2,3,7,8-TCDD enhances the sensitivity of mice to concanavalin A immune-mediated liver injury.

Occurrence of disseminated intravascular coagulation in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced pneumonia in the rat.

Oculomotor deficits in aryl hydrocarbon receptor null mouse.

Polybrominated diphenyl ethers alter hepatic phosphoenolpyruvate carboxykinase enzyme kinetics in male Wistar rats: implications for lipid and glucose metabolism.

TCDD-elicited effects on liver, serum, and adipose lipid composition in C57BL/6 mice.

Delayed temporal increase of hepatic Hsp70 in ApoE knockout mice after prenatal arsenic exposure.

Genetically modified foods: safety, risks and public concerns-a review.

Modulation of aryl hydrocarbon receptor-regulated genes by acute administration of ammonium metavanadate in kidney, lung and heart of C57BL/6 mice.

Borax counteracts genotoxicity of aluminum in rat liver.

Construction and characterization of peroxisome proliferator-activated receptor-gamma co-activator 1 alpha (PGC-1± over-expressing cell line derived from human hepatocyte carcinoma HepG2 cells).

Vanadium toxicity in mice: possible impairment of lipid metabolism and mucosal epithelial cell necrosis in the small intestine.

Evaluation of miR-122 and other biomarkers in distinct acute liver injury in rats.

Sodium arsenite induced reactive oxygen species generation, nuclear factor (erythroid-2 related) factor 2 activation, heme oxygenase-1 expression, and glutathione elevation in Chang human hepatocytes.

Inhibition of hepatocyte nuclear factor 1 and 4 alpha (HNF1± and HNF4±) as a mechanism of arsenic carcinogenesis.

Biotransformation of BDE-47 to potentially toxic metabolites is predominantly mediated by human CYP2B6.

Induction of apoptotic death and retardation of neuronal differentiation of human neural stem cells by sodium arsenite treatment.

AhR-mediated changes in global gene expression in rat liver progenitor cells.

A category approach to predicting the repeated-dose hepatotoxicity of allyl esters.

Comparison of TCDD-elicited genome-wide hepatic gene expression in Sprague-Dawley rats and C57BL/6 mice.

Contrasting retinoid and thyroid hormone status in differentially-contaminated northern fulmar colonies from the Canadian Arctic, Svalbard and the Faroe Islands.

Role of pigment epithelium-derived factor (PEDF) in arsenic-induced cell apoptosis of liver and brain in a rat model.

The toxicity of the N-hydroxy and 6-hydroxy metabolites of 3,4-dichloropropionanilide does not depend on calcium release-activated calcium channel inhibition.

Investigation of ifosfamide nephrotoxicity induced in a liver-kidney co-culture biochip.

2,3,7,8-Tetrachlorodibenzo-p-dioxin enhances CCl₄-induced hepatotoxicity in an aryl hydrocarbon receptor-dependent manner.

Harmine and harmaline downregulate TCDD-induced Cyp1a1 in the livers and lungs of C57BL/6 mice.

Cytochrome P4501A induction in avian hepatocyte cultures exposed to polychlorinated biphenyls: comparisons with AHR1-mediated reporter gene activity and in ovo toxicity.

Effects of butachlor on reproduction and hormone levels in adult zebrafish (*Danio rerio*).

Toxicity of polyamines and their metabolic products.

The synthesis and biodistribution of [(11)C]metformin as a PET probe to study hepatobiliary transport mediated by the multi-drug and toxin extrusion transporter 1 (MATE1) in vivo.

Effect of selenomethionine supplementation in food on the excretion and toxicity of arsenic exposure in female mice.

Comparative study of cytotoxic and genotoxic effects induced by herbicide S-metolachlor and its commercial formulation Twin Pack Gold[®] in human hepatoma (HepG2) cells.

Effect of some organic solvents on oxidative phosphorylation in rat liver mitochondria: Choice of organic solvents.

A genomics-based analysis of relative potencies of dioxin-like compounds in primary rat hepatocytes.

Effects of oral anorexiant sibutramine on the expression of cytochromes P450s in human hepatocytes and cancer cell lines.

Differential influences of various arsenic compounds on antioxidant defense system in liver and kidney of rats.

Stereoselective toxicity and metabolism of lactofen in primary hepatocytes from rat.

RNA-sequencing analysis of TCDD-induced responses in zebrafish liver reveals high relatedness to in vivo mammalian models and conserved biological pathways.

Knockout of the aryl hydrocarbon receptor results in distinct hepatic and renal phenotypes in rats and mice.

Purification of an IgA Monoclonal Antibody Specific for the Acr Protein of *Mycobacterium tuberculosis* by Immunoaffinity Chromatography.

Paraquat Exposure Up-regulates Cyclooxygenase-2 in the Lungs, Liver and Kidneys in Rats.

Potential role of epigenetic mechanisms in the regulation of drug metabolism and transport.

Toxicogenomic evaluation of long-term hepatic effects of TCDD in immature, ovariectomized C57BL/6 mice.

Role of the nuclear xenobiotic receptors CAR and PXR in induction of cytochromes P450 by non-dioxinlike polychlorinated biphenyls in cultured rat hepatocytes.

2,4-dichlorophenol induces apoptosis in primary hepatocytes of grass carp (*Ctenopharyngodon idella*) through mitochondrial pathway.

[Effects of hemoperfusion on the patients with acute toxication of 2, 4-dinitrophenol].

Dietary exposure to dioxins and PCBs in a large cohort of pregnant women: results from the Norwegian Mother and Child Cohort Study (MoBa).

The aryl hydrocarbon receptor interacts with nuclear factor erythroid 2-related factor 2 to mediate induction of NAD(P)H:quinoneoxidoreductase 1 by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Dioxin-induced acute cardiac mitochondrial oxidative damage and increased activity of ATP-sensitive potassium channels in Wistar rats.

Effect of nicotine pretreatment on arsenic-induced oxidative stress in male Wistar rats.

Spectrum of corrosive esophageal injury after intentional paraquat or glyphosate-surfactant herbicide ingestion.

Relative potencies of aroclor mixtures derived from avian in vitro bioassays: comparisons with calculated toxic equivalents.

Histopathological changes in the liver of rabbits exposed to high nitrate ingestion in drinking water.

Modulation of cytochrome P450 1 (Cyp1) by vanadium in hepatic tissue and isolated hepatocyte of C57BL/6 mice.

Tissue distribution of dioxin-like compounds: potential impacts on systemic relative potency estimates.

An integrated approach for prospectively investigating a mode-of-action for rodent liver effects.

Polychlorodibenzodioxin and -furan and dioxin-like polychlorobiphenyl distribution in tissues and dairy products of dairy buffaloes.

Evaluation of protective effect of N-acetyl cysteine on arsenic-induced hepatotoxicity.

Protective effect of *Juglans nigra* on sodium arsenite-induced toxicity in rats.

Protective effects of *Vernonia amygdalina* against sodium arsenite-induced genotoxicity in rat.

Sex differences in the accumulation of chlorinated dioxins in the cormorant (*Phalacrocorax carbo*): implication of hepatic sequestration in the maternal transfer.

Oral administration of hesperidin, a citrus flavonone, in rats counteracts the oxidative stress, the inflammatory cytokine production, and the hepatotoxicity induced by the ingestion of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Use of a highly sensitive recombinant hepatoma cell method to determine dioxin concentrations in samples of fish and crab from a hotspot area.

PCDD/Fs and DL-PCBs intake from fish caught in Polish fishing grounds in the Baltic Sea--characterizing the risk for consumers.

Dietary exposure of juvenile female mice to polyhalogenated seafood contaminants (HBCD, BDE-47, PCB-153, TCDD): comparative assessment of effects in potential target tissues.

Cytochrome P4501A induction in primary cultures of embryonic European starling hepatocytes exposed to TCDD, PeCDF and TCDF.

Comparative analysis of temporal and dose-dependent TCDD-elicited gene expression in human, mouse, and rat primary hepatocytes.

Metabolism of profenofos to 4-bromo-2-chlorophenol, a specific and sensitive exposure biomarker.

Toxicokinetics of dioxins and other organochlorine compounds in Japanese people: association with hepatic CYP1A2 expression levels.

Ecotoxicity and risk to human fish consumers of polychlorinated biphenyls in fish near the Hanford Site (USA).

Histopathological changes induced by paraquat on some tissues of gourami fish (*Trichogaster trichopterus*).

Human adipose tissue derived stem cells promote liver regeneration in a rat model of toxic injury.

Treatment of mice with 2,3,7,8-Tetrachlorodibenzo-p-dioxin markedly increases the levels of a number of cytochrome P450 metabolites of omega-3 polyunsaturated fatty acids in the liver and lung.

Nrf2 protection against liver injury produced by various hepatotoxicants.

Proteoglycans act as cellular hepatitis delta virus attachment receptors.

A novel murine model to deplete hepatic stellate cells uncovers their role in amplifying liver damage in mice.

Acrolein cytotoxicity in hepatocytes involves endoplasmic reticulum stress, mitochondrial dysfunction and oxidative stress.

Toxicity of atrazine and nonylphenol in juvenile rainbow trout (*Oncorhynchus mykiss*): effects on general health, disease susceptibility and gene expression.

Long term toxicity of a Roundup herbicide and a Roundup-tolerant genetically modified maize.

Haematology and blood chemistry changes in mice treated with terbuthylazine and its formulation Radazin TZ-50.

Endocrine disruption caused by oral administration of atrazine in European quail (*Coturnix coturnix coturnix*).

Atrazine promotes biochemical changes and DNA damage in a Neotropical fish species.

Nrf2 protects against diquat-induced liver and lung injury.

Activator protein-1 regulation of murine aldehyde dehydrogenase 1a1.

Spectrum of toxic hepatitis following intentional paraquat ingestion: analysis of 187 cases.

Toxicity of trifluralin herbicide in a representative of the edaphic fauna: histopathology of the midgut of *Rhinocricus padbergi* (Diplopoda).

The time between paraquat ingestion and a negative dithionite urine test in an independent risk factor for death and organ failure in acute paraquat intoxication.

Pathological and toxicological findings in glyphosate-surfactant herbicide fatality: a case report.

Acute exposure of a glyphosate-based herbicide affects the gills and liver of the Neotropical fish, *Piaractus mesopotamicus*.

Hepatic protein expression networks associated with masculinization in the female fathead minnow (*Pimephales promelas*).

Influence of 50-nm polystyrene particles in inducing cytotoxicity in mice co-injected with carbon tetrachloride, cisplatin, or paraquat.

Impacts of low doses of pesticide mixtures on liver cell defence systems.

The effects of diphenyl diselenide on oxidative stress biomarkers in *Cyprinus carpio* exposed to herbicide quinclorac (Facet®).

Efficacy of vitamin C against liver and kidney damage induced by paraquat toxicity.

[Induction effects of pentachlorophenol on vitellogenin and p53 in Chinese rare minnow (*Gobiocypris rarus*)].

Responses of growth performance and tryptophan metabolism to oxidative stress induced by diquat in weaned pigs.

Effects of herbicides and the chytrid fungus *Batrachochytrium dendrobatidis* on the health of post-metamorphic northern leopard frogs (*Lithobates pipiens*).

The endoplasmic reticulum is a target organelle for trivalent dimethylarsinic acid (DMAIII)-induced cytotoxicity.

A mixture of an environmentally realistic concentration of a phthalate and herbicide reduces testosterone in male fathead minnow (*Pimephales promelas*) through a novel mechanism of action.

Copper and the herbicide atrazine impair the stress response of the freshwater fish *Prochilodus lineatus*.

Early cytotoxic and genotoxic effects of atrazine on Wistar rat liver: a morphological, immunohistochemical, biochemical, and molecular study.

DNA damage in fish (*Anguilla anguilla*) exposed to a glyphosate-based herbicide -- elucidation of organ-specificity and the role of oxidative stress.

Renal, hepatic, pulmonary and adrenal tumors induced by prenatal inorganic arsenic followed by dimethylarsinic acid in adulthood in CD1 mice.

[Presentation of a case of Paraquat poisoning].

Effects of short-term sodium chlorate exposure on pigs.

Effects of atrazine and chlorpyrifos on activity and transcription of glutathione S-transferase in common carp (*Cyprinus carpio* L.).

Oxidative stress induced by 2,4-phenoxyacetic acid in liver of female rats and their progeny: biochemical and histopathological studies.

[Effects of hemoperfusion on oxidative stress, matrix metalloproteinases and their inhibitors in acute paraquat poisoning rabbits].

Effects of long-term exposure to simazine in real concentrations on common carp (*Cyprinus carpio* L.).

The effects of subchronic exposure to terbuthylazine on zebrafish.

Intrastriatal pre-treatment with L-NAME protects rats from diquat neurotoxicity.

Effects of subchronic exposure to atrazine on zebrafish (*Danio rerio*).

The effects of subchronic exposure to metribuzin on *Danio rerio*.

Toxicity evaluation of glyphosate agrochemical components using Japanese medaka (*Oryzias latipes*) and DNA microarray gene expression analysis.

Effect of chronic pesticide exposure in farm workers of a Mexico community.

Effect of bark extract of *Bathysa cuspidata* on hepatic oxidative damage and blood glucose kinetics in rats exposed to paraquat.

Hypolipidemic and antioxidant activities of virgin olive oil and its fractions in 2,4-dichlorophenoxyacetic acid-treated rats.

Exposure to a commercial glyphosate formulation (Roundup®) alters normal gill and liver histology and affects male sexual activity of *Jenynsia multidentata* (Anablepidae, Cyprinodontiformes).

Proteomic analysis of hepatic tissue in adult female zebrafish (*Danio rerio*) exposed to atrazine.

Aminotriazole attenuated carbon tetrachloride-induced oxidative liver injury in mice.

GC-MS analysis and screening of antidiabetic, antioxidant and hypolipidemic potential of *Cinnamomum tamala* oil in streptozotocin induced diabetes mellitus in rats.

Protein carbonylation in a murine model for early alcoholic liver disease.

[Design of a polymer drug for serological diagnosis of hepatitis C].

Carbonyl reductase mRNA abundance and enzymatic activity as potential biomarkers of oxidative stress in marine fish.

Modulation of the metabolism of airborne pollutants by glucoraphanin-rich and sulforaphane-rich broccoli sprout beverages in Qidong, China.

Influence of serum in hemodialysis patients on the expression of intestinal and hepatic transporters for the excretion of pravastatin.

Synergistic effect of conjugated linolenic acid isomers against induced oxidative stress, inflammation and erythrocyte membrane disintegrity in rat model.

High-resolution genome-wide mapping of AHR and ARNT binding sites by ChIP-Seq.

Repeated dose toxicity and relative potency of 1,2,3,4,6,7-hexachloronaphthalene (PCN 66) 1,2,3,5,6,7-hexachloronaphthalene (PCN 67) compared to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) for induction of CYP1A1, CYP1A2 and thymic atrophy in female Harlan Sprague-Dawley rats.

Metabolomics identifies an inflammatory cascade involved in dioxin- and diet-induced steatohepatitis.

The epigenetic effects of a high prenatal folate intake in male mouse fetuses exposed in utero to arsenic.

Telmisartan treatment attenuates arsenic-induced hepatotoxicity in mice.

Induction of anoikis by sodium arsenite in rat hepatoma FGC4 cells: comparison with cadmium chloride and implications for assessment of regulation of heat shock protein 70.

Long-term toxicology and carcinogenicity of 2,4,6-trichlorophenol.

Suicidal sodium azide intoxication: An analytical challenge based on a rare case.

Ameliorative effect of docosahexaenoic acid on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced histological changes, oxidative stress, and DNA damage in rat liver.

Optimization of a histopathological biomarker for sphingomyelin accumulation in acid sphingomyelinase deficiency.

Hepatic microRNA profiles offer predictive and mechanistic insights after exposure to genotoxic and epigenetic hepatocarcinogens.

Intracellular accumulation of bilirubin as a defense mechanism against increased oxidative stress.

Dietary fat is a lipid source in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-elicited hepatic steatosis in C57BL/6 mice.

Trichosanthes dioica fruit ameliorates experimentally induced arsenic toxicity in male albino rats through the alleviation of oxidative stress.

Modulatory effect of L-glutamine on 2,3,7,8 tetrachlorodibenzo-p-dioxin-induced liver injury in rats.

Curcumin encapsulated in chitosan nanoparticles: a novel strategy for the treatment of arsenic toxicity.

Yusho: 43 years later.

Non-dioxin-like AhR ligands in a mouse peanut allergy model.

Iron replacement therapy in the routine management of blood donors.

Sodium arsenite down-regulates the expression of X-linked inhibitor of apoptosis protein via translational and post-translational mechanisms in hepatocellular carcinoma.

Quantitative imaging of arsenic and its species in goat following long term oral exposure.

Circulating microRNA-122 as a potential biomarker for liver injury.

Tumors and proliferative lesions in adult offspring after maternal exposure to methylarsonous acid during gestation in CD1 mice.

Gilbert syndrome redefined: a complex genetic haplotype influences the regulation of glucuronidation.

Comparative study of hypocholesterolemic and hypolipidemic effects of conjugated linolenic acid isomers against induced biochemical perturbations and aberration in erythrocyte membrane fluidity.

FOXA1 is essential for aryl hydrocarbon receptor-dependent regulation of cyclin G2.

Protein alteration of HepG2.2.15 cells induced by iron overload.

Ameliorative effect *Trichosanthes dioica* root against experimentally induced arsenic toxicity in male albino rats.

Concomitant induction of heme oxygenase-1 attenuates the cytotoxicity of arsenic species from lumbricus extract in human liver HepG2 cells.

Plant expression, lyophilisation and storage of HBV medium and large surface antigens for a prototype oral vaccine formulation.

Changes in fibrinopeptide A peptides in the sera of rats chronically exposed to low doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Polychlorinated biphenyl congeners that increase the glucuronidation and biliary excretion of thyroxine are distinct from the congeners that enhance the serum disappearance of thyroxine.

Hepatoprotective role and antioxidant capacity of selenium on arsenic-induced liver injury in rats.

Aldehyde dehydrogenases and cell proliferation.

[Targeting malaria parasite at the level of apicoplast: an update].

Glutathione-deficient mice are susceptible to TCDD-Induced hepatocellular toxicity but resistant to steatosis.

Prenatal exposure to TCDD triggers significant modulation of microRNA expression profile in the thymus that affects consequent gene expression.

Camel milk modulates the expression of aryl hydrocarbon receptor-regulated genes, Cyp1a1, Nqo1, and Gsta1, in murine hepatoma Hepa 1c1c7 cells.

Hepatoprotective role of vitamin B(12) and folic acid in arsenic intoxicated rats.

Preliminary morphological and biochemical changes in rat liver following postnatal exposure to sodium arsenite.

Induction of Heat Shock Proteins and Antioxidant Enzymes in 2,3,7,8-TCDD-Induced Hepatotoxicity in Rats.

Ameliorative effect of supplementation with L-glutamine on oxidative stress, DNA damage, cell viability and hepatotoxicity induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in rat hepatocyte cultures.

Estrogen receptor-hijacking by dioxin-like 3,3',4,4',5-pentachlorobiphenyl (PCB126) in salmon hepatocytes involves both receptor activation and receptor protein stability.

Organochlorine pesticides induce epithelial to mesenchymal transition of human primary cultured hepatocytes.

Incidence of jaw lesions and activity and gene expression of hepatic P4501A enzymes in mink (*Mustela vison*) exposed to dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin, 2,3,7,8-tetrachlorodibenzofuran, and 2,3,4,7,8-pentachlorodibenzofuran.

Effects of iron glycine chelate on growth, tissue mineral concentrations, fecal mineral excretion, and liver antioxidant enzyme activities in broilers.

Oxidative stress modulates KLF6Full and its splice variants.

Pleurotus florida lectin normalizes duration dependent hepatic oxidative stress responses caused by arsenic in rat.

Dioxin-like potency of HO- and MeO- analogues of PBDEs' the potential risk through consumption of fish from eastern China.

Aryl hydrocarbon receptor-dependence of dioxin's effects on constitutive mouse hepatic cytochromes P450 and growth hormone signaling components.

The point of transition on the dose-effect curve as a reference point in the evaluation of in vitro toxicity data.

The androgenic anabolic steroid tetrahydrogestrinone produces dioxin-like effects via the aryl hydrocarbon receptor.

Consequences of TCDD treatment on intra-hepatic lymphocytes during liver regeneration.

Development of an ion chromatography-inductively coupled plasma-mass spectrometry method to determine inorganic arsenic in liver from chickens treated with roxarsone.

Evaluation of biochemical, hematological and oxidative parameters in mice exposed to the herbicide glyphosate-Roundup(®).

Protective Effect of *Psidium guajava* in Arsenic-induced Oxidative Stress and Cytological Damage in Rats.

[Study of the mechanisms of cytotoxic effect of uranyl nitrate].

Antimutagenic properties of *Mangifera indica* L. stem bark extract and evaluation of its effects on hepatic CYP1A1.

Antioxidant properties of \hat{I}^2 -seleno amines against lipid peroxidation in rat brain and liver.

Assessment of possible carcinogenicity of oxyfluorfen to humans using mode of action analysis of rodent liver effects.

Unexpected gender difference in sensitivity to the acute toxicity of dioxin in mice.

Effect of mercury on aryl hydrocarbon receptor-regulated genes in the extrahepatic tissues of C57BL/6 mice.

Acute and subacute oral toxicity of polychlorinated diphenyl sulfides in mice: determining LD50 and assessing the status of hepatic oxidative stress.

Tissue specificity of aryl hydrocarbon receptor (AhR) mediated responses and relative sensitivity of white sturgeon (*Acipenser transmontanus*) to an AhR agonist.

Transcription factor-mediated regulation of carboxylesterase enzymes in livers of mice.

Propolis protects against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced toxicity in rat hepatocytes.

Cross-species comparisons of transcriptomic alterations in human and rat primary hepatocytes exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Buffalo (*Bubalus bubalis*) epiphyseal proteins counteract arsenic-induced oxidative stress in brain, heart, and liver of female rats.

Inter-strain heterogeneity in rat hepatic transcriptomic responses to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

[6]-Gingerol isolated from ginger attenuates sodium arsenite induced oxidative stress and plays a corrective role in improving insulin signaling in mice.

Toxicological evaluation of paper mill sewage sediment treated by indigenous dibenzofuran-degrading *Pseudomonas* sp.

Induction of cytochrome P4501A by highly purified hexachlorobenzene in primary cultures of ring-necked pheasant and Japanese quail embryo hepatocytes.

Acute inhalation study of allyl alcohol for derivation of acute exposure guideline levels.

Fish liver and seagull eggs, vitamin D-rich foods with a shadow: results from the Norwegian Fish and Game Study.

Significant interspecies differences in induction profiles of hepatic CYP enzymes by TCDD in bank and field voles.

Changes in expression of drug-metabolizing enzymes by single-walled carbon nanotubes in human respiratory tract cells.

Inhibition of heme oxygenase-1 partially reverses the arsenite-mediated decrease of CYP1A1, CYP1A2, CYP3A23, and CYP3A2 catalytic activity in isolated rat hepatocytes.

Multidrug resistance protein (MRP) 4 attenuates benzo[a]pyrene-mediated DNA-adduct formation in human bronchoalveolar H358 cells.

Comparative Studies of the (Anti) Mutagenicity of *Baccharis dracunculifolia* and Artepillin C by the Bacterial Reverse Mutation Test.

Large enhancement of skeletal muscle cell glucose uptake and suppression of hepatocyte glucose-6-phosphatase activity by weak uncouplers of oxidative phosphorylation.

Effects of dietary exposure of mink (*Mustela vison*) to 2,3,7,8-tetrachlorodibenzo-p-dioxin, 2,3,4,7,8-pentachlorodibenzofuran, and 2,3,7,8-tetrachlorodibenzofuran on reproduction and offspring viability and growth.

Harmaline and harmalol inhibit the carcinogen-activating enzyme CYP1A1 via transcriptional and posttranslational mechanisms.

A mouse model of accelerated liver aging caused by a defect in DNA repair.

Toxicity, dioxin-like activities, and endocrine effects of DDT metabolites--DDA, DDMU, DDMS, and DDCN.

Comparison of DNA damage in human-derived hepatoma line (HepG2) exposed to the fifteen drinking water disinfection byproducts using the single cell gel electrophoresis assay.

Disruption of endocrine function in in vitro H295R cell-based and in in vivo assay in zebrafish by 2,4-dichlorophenol.

Differential display system with vertebrate-common degenerate oligonucleotide primers: uncovering genes responsive to dioxin in avian embryonic liver.

Aberrant activation of ubiquitin D at G2 phase and apoptosis by carcinogens that evoke cell proliferation after 28-day administration in rats.

PCB 126 and other dioxin-like PCBs specifically suppress hepatic PEPCK expression via the aryl hydrocarbon receptor.

Cyanamide potentiates the ethanol-induced impairment of receptor-mediated endocytosis in a recombinant hepatic cell line expressing alcohol dehydrogenase activity.

Tissue concentrations of pesticides, PCBs and metals among ospreys, *Pandion haliaetus*, collected in France.

Comparative metabolomic and genomic analyses of TCDD-elicited metabolic disruption in mouse and rat liver.

Eicosapentaenoic acid protects against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced hepatic toxicity in cultured rat hepatocytes.

Synthesis and evaluation of PET probes for the imaging of I2 imidazoline receptors in peripheral tissues.

Stereoselective metabolism and toxicity of the herbicide fluroxypyr methylheptyl ester in rat hepatocytes.

Medical management of paraquat ingestion.

Acute exposure to glyphosate herbicide affects oxidative parameters in piava (*Leporinus obtusidens*).

Effects of glyphosate and polyoxyethylenamine on growth and energetic reserves in the freshwater crayfish *Cherax quadricarinatus* (Decapoda, Parastacidae).

[Effects of hemoperfusion on plasma concentration and histopathological changes in paraquat poisoning rabbits].

Protective effect of *Ginkgo biloba* L. leaf extract against glyphosate toxicity in Swiss albino mice.

Effect of Yerbimat herbicide on lipid peroxidation, catalase activity, and histological damage in gills and liver of the freshwater fish *Goodea atripinnis*.

Toxicological responses of *Cyprinus carpio* exposed to the herbicide penoxsulam in rice field conditions.

DNA damage and effects on glutathione-S-transferase activity induced by atrazine exposure in zebrafish (*Danio rerio*).

Hepatotoxicity of silica nanoparticles with a diameter of 100 nm.

Acrolein-induced dyslipidemia and acute-phase response are independent of HMG-CoA reductase.

Comparison of nitrofen uptake via water and food and its distribution in tissue of common carp, *Cyprinus carpio* L.

Atrazine exposure affects growth, body condition and liver health in *Xenopus laevis* tadpoles.

Mitochondria are the main target organelle for trivalent monomethylarsonous acid (MMA(III))-induced cytotoxicity.

[Clinical analysis of multiple organ dysfunction syndrome caused by acute paraquat poisoning].

Exposure of juvenile green frogs (*Lithobates clamitans*) in littoral enclosures to a glyphosate-based herbicide.

Histopathological changes in gill, liver and kidney of neotropical fish *Colossoma macropomum* exposed to paraquat at different temperatures.

Diuron exposure induces systemic and organ-specific toxicity following acute and sub-chronic exposure in male Wistar rats.

Roundup effects on oxidative stress parameters and recovery pattern of *Rhamdia quelen*.

Phenylurea herbicides induce cytogenetic effects in Chinese hamster cell lines.

[Study on the prognosis of patients with acute paraquat intoxication].

[Prolonged convulsion after intoxication of alachlor herbicide (Lasso): a case report].

Toxicological responses of *Cyprinus carpio* after exposure to a commercial herbicide containing imazethapyr and imazapic.

Commercial formulation containing quinclorac and metsulfuron-methyl herbicides inhibit acetylcholinesterase and induce biochemical alterations in tissues of *Leporinus obtusidens*.

Effects on antioxidant status of liver following atrazine exposure and its attenuation by vitamin E.

Selenium provides protection to the liver but not the reproductive organs in an atrazine-model of experimental toxicity.

A physiologically based pharmacokinetic model for atrazine and its main metabolites in the adult male C57BL/6 mouse.

Early exposure to low doses of atrazine affects behavior in juvenile and adult CD1 mice.

The effects of Click 500 SC (terbuthylazine) on common carp *Cyprinus carpio* under (sub)chronic conditions.

Effects of subchronic exposure to simazine on zebrafish (*Danio rerio*).

Pesticide risk assessment: A study on inhalation and dermal exposure to 2,4-D and paraquat among Malaysian paddy farmers.

Wheat bran protects Fischer-344 rats from diquat-induced oxidative stress by activating antioxidant system: selenium as an antioxidant.

Hepatic response to oxidative injury in long-lived Ames dwarf mice.

Pathological and genotoxic effects of atrazine in male Japanese quail (*Coturnix japonica*).

Protein conjugated with aldehydes derived from lipid peroxidation as an independent parameter of the carbonyl stress in the kidney damage.

Low-dose oral immunization with lyophilized tissue of herbicide-resistant lettuce expressing hepatitis B surface antigen for prototype plant-derived vaccine tablet formulation.

[Metabolism inhibition stimulates, metabolism activation inhibits cancerogenic activity of ortho-aminoazotoluene in mouse liver].

Effect of diquat-induced oxidative stress on iron metabolism in male Fischer-344 rats.

Soluble epoxide hydrolase contamination of specific catalase preparations inhibits epoxyeicosatrienoic acid vasodilation of rat renal arterioles.

Stereoselective metabolism of the herbicide fluroxypyr methylheptyl ester in rabbits.

Murine hepatic aldehyde dehydrogenase 1a1 is a major contributor to oxidation of aldehydes formed by lipid peroxidation.

Direct analysis of methylated trivalent arsenicals in mouse liver by hydride generation-cryotrapping-atomic absorption spectrometry.

Redox cycling and increased oxygen utilization contribute to diquat-induced oxidative stress and cytotoxicity in Chinese hamster ovary cells overexpressing NADPH-cytochrome P450 reductase.

Atrazine metabolite screening in human microsomes: detection of novel reactive metabolites and glutathione adducts by LC-MS.

Elucidation of a novel bioactivation pathway of a 3,4-unsubstituted isoxazole in human liver microsomes: formation of a glutathione adduct of a cyanoacrolein derivative after isoxazole ring opening.

Chronic subhepatotoxic exposure to arsenic enhances hepatic injury caused by high fat diet in mice.

Environmental- and injury-related epidemic-assistance investigations, 1946-2005.

Aryl hydrocarbon receptor-mediated induction of Stearoyl-CoA desaturase 1 alters hepatic fatty acid composition in TCDD-elicited steatosis.

Biotransformation enzyme-dependent formation of micronucleus and multinuclei in cell line V79-hCYP2E1-hSULT1A1 by 2-nitropropane and N-nitrosodimethylamine.

Identification of aryl hydrocarbon receptor binding targets in mouse hepatic tissue treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Increased hepatic Igf2 gene expression involves C/EBP β in TCDD-induced teratogenesis in rats.

Quantification of PCDD/Fs and dioxin-like PCBs in small amounts of human serum using the sensitive H1L7.5c1 mouse hepatoma cell line: optimization and analysis of human serum samples from adolescents of the Flemish human biomonitoring program FLEHS II.

Nrf2 protects against 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced oxidative injury and steatohepatitis.

Protective role of the methanolic extract of *Icacina trichantha* on sodium arsenite induced genotoxicity and hepatotoxicity.

Third-generation Ah receptor-responsive luciferase reporter plasmids: amplification of dioxin-responsive elements dramatically increases CALUX bioassay sensitivity and responsiveness.

Molecular targets that link dioxin exposure to toxicity phenotypes.

The CALUX bio-assay: analytical comparison between mouse hepatoma cell lines with a low (H1L6.1c3) and high (H1L7.5c1) number of dioxin response elements.

The p38 MAPK inhibitor SB203580 induces cytochrome P450 1A1 gene expression in murine and human hepatoma cell lines through ligand-dependent aryl hydrocarbon receptor activation.

Discovery and biological characterization of 1-(1H-indol-3-yl)-9H-pyrido[3,4-b]indole as an aryl hydrocarbon receptor activator generated by photoactivation of tryptophan by sunlight.

The embryology of the diaphragm.

Identification of differentially expressed genes in the livers of chronically i-As-treated hamsters.

Blunted increase in serum hepcidin as response to oral iron in HFE-hemochromatosis.

Involvement of microRNAs in dioxin-induced liver damage in the mouse.

Fulminant hepatic failure in woman with iron and non-steroidal anti-inflammatory drug intoxication.

Analysis of arsenic metabolites in HepG2 and AS3MT-transfected cells.

Metabolomic analysis of liver and skeletal muscle tissues in C57BL/6J and DBA/2J mice exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Global DNA methylation in the mouse liver is affected by methyl deficiency and arsenic in a sex-dependent manner.

Concomitant exposure to arsenic and organophosphates on tissue oxidative stress in rats.

Therapeutic efficacy of silymarin and naringenin in reducing arsenic-induced hepatic damage in young rats.

Antioxidant effect of vegetable oils containing conjugated linolenic acid isomers against induced tissue lipid peroxidation and inflammation in rat model.

Quantitation of branched-chain amino acids in ascites by capillary electrophoresis with light-emitting diode-induced fluorescence detection.

Molecular and functional characterization of aryl hydrocarbon receptor nuclear translocator 1 (ARNT1) and ARNT2 in chicken (*Gallus gallus*).

Mushroom lectin protects arsenic induced apoptosis in hepatocytes of rodents.

Arsenic: toxicity, oxidative stress and human disease.

A case report of concomitant paroxysmal nocturnal hemoglobinuria and heterozygous β^2 -thalassemia.

Acute tubular necrosis due to cutaneous contact with cresol.

Oxidative stress and hepatic stellate cell activation are key events in arsenic induced liver fibrosis in mice.

Aryl hydrocarbon receptor ligand 2,3,7,8-tetrachlorodibenzo-p-dioxin enhances liver damage in bile duct-ligated mice.

Differential effects of indirubin and 2,3,7,8-tetrachlorodibenzo-p-dioxin on the aryl hydrocarbon receptor (AhR) signalling in liver progenitor cells.

Camel urine inhibits the cytochrome P450 1a1 gene expression through an AhR-dependent mechanism in Hepa 1c1c7 cell line.

[Pharmacokinetics of iron medication and efficacy of therapy with oral iron supplementation].

Acute arsine poisoning confirmed by speciation analysis of arsenic compounds in the plasma and urine by HPLC-ICP-MS.

Dioxins in ascites and serum of women with endometriosis: a pilot study.

Basolateral potassium (IKCa) channel inhibition prevents increased colonic permeability induced by chemical hypoxia.

Carcinogenic effects of "whole-life" exposure to inorganic arsenic in CD1 mice.

Synthesis and biological evaluation of some nitrogen containing steroidal heterocycles.

Actions of juglone on energy metabolism in the rat liver.

The effect of laurel leaf extract against toxicity induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in cultured rat hepatocytes.

Novel stably transfected gene reporter human hepatoma cell line for assessment of aryl hydrocarbon receptor transcriptional activity: construction and characterization.

Identification of major dioxin-like compounds and androgen receptor antagonist in acid-treated tissue extracts of high trophic-level animals.

Licorice extract increases cyclophosphamide teratogenicity by upregulating the expression of cytochrome P-450 2B mRNA.

Molecular mechanisms of cold-induced CYP1A activation in rat liver microsomes.

Rat H9c2 cardiac myocytes are sensitive to arsenite due to a modest activation of transcription factor Nrf2.

Stereoselective metabolism of fenoxaprop-ethyl and its chiral metabolite fenoxaprop in rabbits.

Construction and characterization of hepatocyte nuclear factor HNF4 α 1 over-expressing cell line derived from human hepatoma HepG2 cells.

Transcriptional modulation of the NAD(P)H:quinone oxidoreductase 1 by mercury in human hepatoma HepG2 cells.

Non-additive hepatic gene expression elicited by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and 2,2',4,4',5,5'-hexachlorobiphenyl (PCB153) co-treatment in C57BL/6 mice.

Construction and characterization of Japanese medaka (*Oryzias latipes*) hepatic cDNA library and its implementation to biomarker screening in aquatic toxicology.

Hepatic in vitro toxicity assessment of PBDE congeners BDE47, BDE153 and BDE154 in Atlantic salmon (*Salmo salar* L.).

Sodium arsenite-induced alteration in hepatocyte function of rat with special emphasis on superoxide dismutase expression pathway and its prevention by mushroom lectin.

Photoirradiation of dehydropyrrolizidine alkaloids--formation of reactive oxygen species and induction of lipid peroxidation.

Transcriptomics identifies differences between ultrapure non-dioxin-like polychlorinated biphenyls (PCBs) and dioxin-like PCB126 in cultured peripheral blood mononuclear cells.

A metabolic system-wide characterisation of the pig: a model for human physiology.

Transcriptional profiles induced by the Aryl Hydrocarbon Receptor agonists 2,3,7,8-tetrachlorodibenzo-p-dioxin, 2,3,7,8-tetrachlorodibenzofuran and 2,3,4,7,8-pentachlorodibenzofuran in primary rat hepatocytes.

The interplay of the aryl hydrocarbon receptor and β -catenin alters both AhR-dependent transcription and Wnt/ β -catenin signaling in liver progenitors.

Development of a co-culture model for in vitro toxicological studies in Atlantic salmon.

Protective role of *Moringa oleifera* (Sajina) seed on arsenic-induced hepatocellular degeneration in female albino rats.

Integration of genome-wide computation DRE search, AhR ChIP-chip and gene expression analyses of TCDD-elicited responses in the mouse liver.

Herbal bioactivation, molecular targets and the toxicity relevance.

[Effects of inorganic arsenic on mRNA expression of Nrf2 and Nrf2-regulated downstream anti-oxidant enzymes in Chang hepatocytes].

Effect of oral coadministration of artesunate with ferrous sulfate on rat liver mitochondrial membrane permeability transition.

Reduced cytochrome P4501A activity and recovery from oxidative stress during subchronic benzo[a]pyrene and benzo[e]pyrene treatment of rainbow trout.

Developmental and posthatch effects of in ovo exposure to 2,3,7,8-TCDD, 2,3,4,7,8-PECDF, and 2,3,7,8-TCDF in Japanese quail (*Coturnix japonica*), common pheasant (*Phasianus colchicus*), and white leghorn chicken (*Gallus gallus domesticus*) embryos.

Coordinate regulation of cytochrome P450 1a1 expression in mouse liver by the aryl hydrocarbon receptor and the beta-catenin pathway.

Sodium arsenite and hyperthermia modulate cisplatin-DNA damage responses and enhance platinum accumulation in murine metastatic ovarian cancer xenograft after hyperthermic intraperitoneal chemotherapy (HIPEC).

Hepatic effects of a highly purified 2,2',3,4,4',5,5'-heptachlorbiphenyl (PCB 180) in male and female rats.

Lack of change in microRNA expression in adult mouse liver following treatment with benzo(a)pyrene despite robust mRNA transcriptional response.

Protopine and allocryptopine increase mRNA levels of cytochromes P450 1A in human hepatocytes and HepG2 cells independently of AhR.

Biochemical markers of contamination in fish toxicity tests.

Protective role of selenium against over-expression of cancer-related apoptotic genes induced by o-cresol in rats.

Assessing the genotoxic potentials of arsenic in tilapia (*Oreochromis mossambicus*) using alkaline comet assay and micronucleus test.

Antioxidative effects of curcumin, β -myrcene and 1,8-cineole against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced oxidative stress in rats liver.

An untargeted multi-technique metabolomics approach to studying intracellular metabolites of HepG2 cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Astaxanthin inhibits sodium azide-induced cytotoxicity in hepatocyte L-02 cells probably by H⁺ transferring function].

Efficient sequential synthesis of PET Probes of the COX-2 inhibitor [¹¹C]celecoxib and its major metabolite [¹¹C]SC-62807 and in vivo PET evaluation.

2,3,7,8-Tetrachlorodibenzo-p-dioxin impairs iron homeostasis by modulating iron-related proteins expression and increasing the labile iron pool in mammalian cells.

Tissue-specific and dose-related accumulation of arsenic in mouse offspring following maternal consumption of arsenic-contaminated water.

Differences in TCDD-elicited gene expression profiles in human HepG2, mouse Hepa1c1c7 and rat H4IIE hepatoma cells.

c-Src is required for complex formation between the hepatitis C virus-encoded proteins NS5A and NS5B: a prerequisite for replication.

Influence of TI(+) on mitochondrial permeability transition pore in Ca(2+)-loaded rat liver mitochondria.

Retention and maternal transfer of brominated dioxins in zebrafish (*Danio rerio*) and effects on reproduction, aryl hydrocarbon receptor-regulated genes, and ethoxyresorufin-O-deethylase (EROD) activity.

Dioxin toxicity, aryl hydrocarbon receptor signaling, and apoptosis-persistent pollutants affect programmed cell death.

Realgar and realgar-containing Liu-Shen-Wan are less acutely toxic than arsenite and arsenate.

Proteomic mapping of bezafibrate-treated human hepatocytes in primary culture using two-dimensional liquid chromatography.

Hepatic transcriptomic responses to TCDD in dioxin-sensitive and dioxin-resistant rats during the onset of toxicity.

Isotopomer enrichment assay for very short chain fatty acids and its metabolic applications.

Transcriptional response of hepatic largemouth bass (*Micropterus salmoides*) mRNA upon exposure to environmental contaminants.

Inhibition of cyclophosphamide-induced oxidative stress in rat brain by polar and non-polar extracts of Annatto (*Bixa orellana*) seeds.

Bioaccumulation of dioxin-like substances and selected brominated flame retardant congeners in the fat and livers of black pigs farmed within the Nebrodi Regional Park of Sicily.

Realgar- and cinnabar-containing an-gong-niu-huang wan (AGNH) is much less acutely toxic than sodium arsenite and mercuric chloride.

Regulation of benzo[a]pyrene-mediated DNA- and glutathione-adduct formation by 2,3,7,8-tetrachlorodibenzo-p-dioxin in human lung cells.

Polychlorinated dibenzo-p-dioxins and dibenzofurans in different tissues of the cormorants (*Phalacrocorax carbo*) from Dongting Lake, China.

Acute mitochondrial actions of glitazones on the liver: a crucial parameter for their antidiabetic properties.

Hepatic xenobiotic metabolizing enzyme and transporter gene expression through the life stages of the mouse.

Human cytochrome P450 1A1 is a novel target gene of liver X receptor $\hat{\pm}$.

Enhanced hepatotoxicity induced by repeated exposure to polychlorinated biphenyls and 2,3,7,8-tetrachlorodibenzo-p-dioxin in combination in male rats.

NTP toxicity studies of toxicity studies of 2,4-decadienal (CAS No. 25152-84-5) administered by gavage to F344/N Rats and B6C3F1 mice.

Evaluation of Iron-induced Oxidative Stress and its Amelioration by Certain Herbs in Broilers.

Levels and congener profiles of PCBs and PCDD/Fs in blue shark (*Prionace glauca*) liver from the South-Eastern Mediterranean Sea (Italy).

The aryl hydrocarbon receptor pathway and the response to 3-methylcholanthrene are altered in the liver of adrenalectomized rats.

Expression and purification of the membrane protein p7 from hepatitis C virus.

In vivo and in vitro mixed-function oxygenase activity and vitellogenin induction in fish and in fish and rat liver cells by stilbenes isolated from scotch pine (*Pinus sylvestris*).

Maneb and paraquat-induced modulation of toxicant responsive genes in the rat liver: comparison with polymorphonuclear leukocytes.

A fatal case of paraquat ingestion: clinical course and review of pathophysiology.

Relative inhibitory potency of molinate and metabolites with aldehyde dehydrogenase 2: implications for the mechanism of enzyme inhibition.

Mechanisms of olfactory toxicity of the herbicide 2,6-dichlorobenzonitrile: essential roles of CYP2A5 and target-tissue metabolic activation.

Identification of differential hepatic proteins in rare minnow (*Gobiocypris rarus*) exposed to pentachlorophenol (PCP) by proteomic analysis.

Glyphosate-surfactant herbicide-induced reversible encephalopathy.

PCB congener specific oxidative stress response by microarray analysis using human liver cell line.

Exposure to acrolein by inhalation causes platelet activation.

Effects of Roundup Transorb on fish: hematology, antioxidant defenses and acetylcholinesterase activity.

Impacts of mixtures of herbicides on molecular and physiological responses of the European flounder *Platichthys flesus*.

Hepatotoxicity induced by sub-acute exposure of rats to 2,4-Dichlorophenoxyacetic acid based herbicide "DÃ©sormone lourde".

Toxicity of the herbicide atrazine: effects on lipid peroxidation and activities of antioxidant enzymes in the freshwater fish *Channa punctatus* (Bloch).

Oxidative stress biomarkers in *Cyprinus carpio* exposed to commercial herbicide bispyribac-sodium.

Alterations in mRNA expression of steroid receptors and heat shock proteins in the liver of rare minnow (*Gobiocypris rarus*) exposed to atrazine and p,p'-DDE.

Spectrum of corrosive esophageal injury after intentional paraquat ingestion.

Desmoplastic small round-cell tumor: an adult with previous exposure to agent orange.

Assessment of oxidative stress in *Rhamdia quelen* exposed to agrichemicals.

Oxidative stress responses in rainbow trout (*Oncorhynchus mykiss*) hepatocytes exposed to pro-oxidants and a complex environmental sample.

[Thyroid disruption induced by pentachlorophenol].

[Analysis of cardiac toxicity caused by cyclophosphamide in the H9c2 cell line and isolated and perfused rat hearts].

Oral administration of paraquat perturbs immunoglobulin productivity in mouse.

Low levels of the herbicide atrazine alter sex ratios and reduce metamorphic success in *Rana pipiens* tadpoles raised in outdoor mesocosms.

Herbicide formulation with glyphosate affects growth, acetylcholinesterase activity, and metabolic and hematological parameters in piava (*Leporinus obtusidens*).

Effects of sub-chronic exposure to terbutryn in common carp (*Cyprinus carpio* L.).

Acrolein consumption induces systemic dyslipidemia and lipoprotein modification.

Oxidative stress response and gene expression with atrazine exposure in adult female zebrafish (*Danio rerio*).

Protective effects of *Forsythia suspensa* extract against oxidative stress induced by diquat in rats.

[Acute poisoning due to chemical substances inducing methemoglobinemia--two cases report].

Roundup causes oxidative stress in liver and inhibits acetylcholinesterase in muscle and brain of the fish *Prochilodus lineatus*.

Oxidatively generated DNA damage induced by 3-amino-5-mercapto-1,2,4-triazole, a metabolite of carcinogenic amitrole.

Acetaminophen, via its reactive metabolite N-acetyl-p-benzo-quinoneimine and transient receptor potential ankyrin-1 stimulation, causes neurogenic inflammation in the airways and other tissues in rodents.

Effects of exogenous GSH and methionine on methylation of inorganic arsenic in mice exposed to arsenite through drinking water.

Insulinotropic effect of cinnamaldehyde on transcriptional regulation of pyruvate kinase, phosphoenolpyruvate carboxykinase, and GLUT4 translocation in experimental diabetic rats.

[Effect of hepatocarcinogenicity of estragole on the glucocorticoid-mediated induction of liver-specific enzymes and the activity of the transcription factors FOXA and HNF4 in the liver of mouse and rat].

Subcellular localization of the amide class herbicide 3,4-dichloropropionanilide (DCPA) in T cells and hepatocytes.

Effect of defatted methanolic extract of *Holarrhena floribunda* leaves in sodium arsenite-induced clastogenicity in Wistar albino rats.

[Effects of α -lipoic acid and vitamin C on oxidative stress in rat exposed to chronic arsenic toxicity].

Aryl hydrocarbon receptor nuclear translocator in hepatocytes is required for aryl hydrocarbon receptor-mediated adaptive and toxic responses in liver.

Radiochemical synthesis, rodent biodistribution and tumor uptake, and dosimetry calculations of [^{14}C] methylated LY2181308.

Aqueous and ethanolic leaf extracts of *Ocimum basilicum* (sweet basil) protect against sodium arsenite-induced hepatotoxicity in Wistar rats.

The aryl hydrocarbon receptor-interacting protein (AIP) is required for dioxin-induced hepatotoxicity but not for the induction of the Cyp1a1 and Cyp1a2 genes.

Functional analysis of six human aryl hydrocarbon receptor variants in human breast cancer and mouse hepatoma cell lines.

Toxicology and carcinogenesis studies of 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (CAS No. 31508-00-6) in female Harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 3,3',4,4'-tetrachloroazobenzene (TCAB) (CAS No. 14047-09-7) in Harlan Sprague-Dawley rats and B6C3F1 mice (gavage studies).

A case of black urine and dark skin - cresol poisoning.

NMR-based metabonomic analysis of the hepatotoxicity induced by combined exposure to PCBs and TCDD in rats.

Suppression of hepatic oxidative events and regulation of eNOS expression in the liver by naringenin in fructose-administered rats.

Toxicogenomic analysis of exposure to TCDD, PCB126 and PCB153: identification of genomic biomarkers of exposure to AhR ligands.

hsa-miR-191 is a candidate oncogene target for hepatocellular carcinoma therapy.

The activated aryl hydrocarbon receptor synergizes mitogen-induced murine liver hyperplasia.

Non-genomic action of TCDD to induce inflammatory responses in HepG2 human hepatoma cells and in liver of C57BL/6J mice.

Protective effects of crude garlic by reducing iron-mediated oxidative stress, proliferation and autophagy in rats.

Cytochrome P4501A1 is required for vascular dysfunction and hypertension induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Protective role of tannin-rich fraction of *Camellia sinensis* in tissue arsenic burden in Sprague Dawley rats.

Flavin-containing monooxygenase-3: induction by 3-methylcholanthrene and complex regulation by xenobiotic chemicals in hepatoma cells and mouse liver.

A novel role for the dioxin receptor in fatty acid metabolism and hepatic steatosis.

Quantitative and statistical analysis of differences in sensitivity between Long-Evans and Han/Wistar rats following long-term exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Quercetin in vesicular delivery systems: evaluation in combating arsenic-induced acute liver toxicity associated gene expression in rat model.

Withdrawal symptoms after gabapentin discontinuation.

Toxicity of Bromkal 70-5DE, a technical mixture of polybrominated diphenyl ethers, following 28 d of oral exposure in rats and impact of analysed impurities.

2,3,7,8-tetrachlorodibenzo-p-dioxin counteracts the p53 response to a genotoxicant by upregulating expression of the metastasis marker *agr2* in the hepatocarcinoma cell line HepG2.

Reversible mitochondrial uncoupling in the cold phase during liver preservation/reperfusion reduces oxidative injury in the rat model.

Hepatoprotective effects of apple polyphenols on CCl₄-induced acute liver damage in mice.

Disruption of CLOCK-BMAL1 transcriptional activity is responsible for aryl hydrocarbon receptor-mediated regulation of *Period1* gene.

Kynurenic acid is a potent endogenous aryl hydrocarbon receptor ligand that synergistically induces interleukin-6 in the presence of inflammatory signaling.

Complex gene-chemical interactions: hepatic uroporphyrin as a paradigm.

Differential regulation of the dioxin-induced Cyp1a1 and Cyp1b1 genes in mouse hepatoma and fibroblast cell lines.

The effects of an in utero exposure to 2,3,7,8-tetrachloro-dibenzo-p-dioxin on male reproductive function: identification of Ccl5 as a potential marker.

Temporal and anatomical sensitivities to the aryl hydrocarbon receptor agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin leading to premature acyclicity with age in rats.

Differential gene regulation by the human and mouse aryl hydrocarbon receptor.

HBx targeting to mitochondria and ROS generation are necessary but insufficient for HBV-induced cyclooxygenase-2 expression.

Distribution and speciation of arsenic by transplacental and early life exposure to inorganic arsenic in offspring rats.

PCB153-elicited hepatic responses in the immature, ovariectomized C57BL/6 mice: comparative toxicogenomic effects of dioxin and non-dioxin-like ligands.

L-Ascorbate protects rat hepatocytes against sodium arsenite--induced cytotoxicity and oxidative damage.

Ground-glass-like hepatocellular inclusions in the course of adult-onset Still's disease.

Arsenic transformations and biomarkers in meadow voles (*Microtus pennsylvanicus*) living on an abandoned gold mine site in Montague, Nova Scotia, Canada.

Anti-mutagenic and anti-carcinogenic potential of the carotenoid meso-zeaxanthin.

Protective role of zinc in ameliorating arsenic-induced oxidative stress and histological changes in rat liver.

Inhibitory effects of uraemic toxins 3-indoxyl sulfate and p-cresol on losartan metabolism in vitro.

Indian spice curcumin may be an effective strategy to combat the genotoxicity of arsenic in Swiss albino mice.

The effect of TCDD dioxin on the rat liver in biochemical and histological assessment.

Protective effects of the antioxidant 4b,5,9b,10-tetrahydroindeno[1,2-b]indole against TCDD toxicity in C57BL/6J mice.

Mercury modulates the CYP1A1 at transcriptional and posttranslational levels in human hepatoma HepG2 cells.

Identification of the aryl hydrocarbon receptor target gene TiPARP as a mediator of suppression of hepatic gluconeogenesis by 2,3,7,8-tetrachlorodibenzo-p-dioxin and of nicotinamide as a corrective agent for this effect.

Dioxins and human toxicity.

Metabolism and toxicity of menthofuran in rat liver slices and in rats.

Relationship between persistent halogenated organic contaminants and TCDD-toxic equivalents on EROD activity and retinoid and thyroid hormone status in northern fulmars.

Characterization of the avian aryl hydrocarbon receptor 1 from blood using non-lethal sampling methods.

Human and rat primary hepatocyte CYP1A1 and 1A2 induction with 2,3,7,8-tetrachlorodibenzo-p-dioxin, 2,3,7,8-tetrachlorodibenzofuran, and 2,3,4,7,8-pentachlorodibenzofuran.

Automated dose-response analysis and comparative toxicogenomic evaluation of the hepatic effects elicited by TCDD, TCDF, and PCB126 in C57BL/6 mice.

Highly purified hexachlorobenzene induces cytochrome P4501A in primary cultures of chicken embryo hepatocytes.

Acute toxicity of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) in male Sprague-Dawley rats: effects on hepatic oxidative stress, glutathione and metals status.

Effects of olive oil and its fractions on oxidative stress and the liver's fatty acid composition in 2,4-Dichlorophenoxyacetic acid-treated rats.

Dig1 protects against cell death provoked by glyphosate-based herbicides in human liver cell lines.

Debate on GMOs health risks after statistical findings in regulatory tests.

Incorporating human dosimetry and exposure into high-throughput in vitro toxicity screening.

Transcriptional and posttranscriptional regulation of CYP1A1 by vanadium in human hepatoma HepG2 cells.

Stress inducible heat shock protein 70: a potent molecular and toxicological signature in arsenic exposed broiler chickens.

2,3,4,7,8-pentachlorodibenzofuran is a more potent cytochrome P4501A inducer than 2,3,7,8-tetrachlorodibenzo-p-dioxin in herring gull hepatocyte cultures.

Involvement of aryl hydrocarbon receptor in basal and 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced expression of target genes in primary human hepatocytes.

Modulation of NAD(P)H:quinone oxidoreductase by vanadium in human hepatoma HepG2 cells.

Differential effects of polychlorinated biphenyl congeners on serum thyroid hormone levels in rats.

AhR-agonistic, anti-androgenic, and anti-estrogenic potencies of 2-isopropylthioxanthone (ITX) as determined by in vitro bioassays and gene expression profiling.

Regulation of the human CHOP gene promoter by the stress response transcription factor ATF5 via the AARE1 site in human hepatoma HepG2 cells.

Computational experiments reveal plausible mechanisms for changing patterns of hepatic zonation of xenobiotic clearance and hepatotoxicity.

Distribution of 14C-2,3,7,8-tetrachlorodibenzo-p-dioxin to the brain and peripheral tissues of fetal rats and its comparison with adults.

Genomic indicators in the blood predict drug-induced liver injury.

Aryl hydrocarbon receptor is a transcriptional activator of the human breast cancer resistance protein (BCRP/ABCG2).

Effects of in ovo exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin on hepatic AHR/ARNT-CYP1A signaling pathways in common cormorants (*Phalacrocorax carbo*).

Properties of blood, porphyrins, and exposure to legacy and emerging persistent organic pollutants in surf scoters (*Melanitta perspicillata*) overwintering on the south coast of British Columbia, Canada.

[Effects of catalase activators and inhibitors on ethanol pharmacokinetic characteristics and ethanol and aldehyde-metabolizing enzyme activities in the rat liver and brain].

Dioxin-like and perfluorinated compounds in pigs in an Indian open waste dumping site: toxicokinetics and effects on hepatic cytochrome P450 and blood plasma hormones.

The effects of dietary boric acid and borax supplementation on lipid peroxidation, antioxidant activity, and DNA damage in rats.

Predicting PCDD/F and dioxin-like PCB contamination levels in bovine edible tissues from in vivo sampling.

Effects of TCDD on the expression of nuclear encoded mitochondrial genes.

Cellular uptake, subcellular distribution and toxicity of arsenic compounds in methylating and non-methylating cells.

Arsenite induces aquaglyceroporin 9 expression in murine livers.

The clock genes period 1 and period 2 mediate diurnal rhythms in dioxin-induced Cyp1A1 expression in the mouse mammary gland and liver.

Ethoxyresorufin O-deethylase induction by TCDD, PeCDF and TCDF in ring-necked pheasant and Japanese quail hepatocytes: Time-dependent effects on concentration-response curves.

Effects of folate on arsenic toxicity in Chang human hepatocytes: involvement of folate antioxidant properties.

Induction of hepatic carbonyl reductase/20beta-hydroxysteroid dehydrogenase mRNA in rainbow trout downstream from sewage treatment works--possible roles of aryl hydrocarbon receptor agonists and oxidative stress.

Hepatic CYP1A induction by chlorinated dioxins and related compounds in the endangered black-footed albatross from the North Pacific.

Toxicological application of primary hepatocyte cell cultures of Atlantic cod (*Gadus morhua*)--effects of BNF, PCDD and Cd.

Isoform distinct time-, dose-, and castration-dependent alterations in flavin-containing monooxygenase expression in mouse liver after 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment.

Evaluation of a liver micronucleus assay in young rats (III): a study using nine hepatotoxicants by the Collaborative Study Group for the Micronucleus Test (CSGMT)/Japanese Environmental Mutagen Society (JEMS)-Mammalian Mutagenicity Study Group (MMS).

Aryl hydrocarbon receptor (AHR)-regulated transcriptomic changes in rats sensitive or resistant to major dioxin toxicities.

Cryopreserved hepatocytes from rainbow trout (*Oncorhynchus mykiss*): a validation study to support their application in bioaccumulation assessment.

Early-age changes in oxidative stress in brown trout, *Salmo trutta*.

Induction of GST-P-positive proliferative lesions facilitating lipid peroxidation with possible involvement of transferrin receptor up-regulation and ceruloplasmin down-regulation from the early stage of liver tumor promotion in rats.

Xenobiotic-metabolizing cytochromes p450 in human white adipose tissue: expression and induction.

Fusion of the endoplasmic reticulum and mitochondrial outer membrane in rats brown adipose tissue: activation of thermogenesis by Ca²⁺.

Oxidative and nitrosative stress in experimental rat liver fibrosis: Protective effect of taurine.

[Comparative characteristic of lactate dehydrogenase properties from the white muscles and liver of goldfish (*Carassius auratus* L.)].

Effect of paraquat-induced oxidative stress on insulin regulation of insulin-like growth factor-binding protein-1 gene expression.

The actions of fisetin on glucose metabolism in the rat liver.

Development of TEFs for PCB congeners by using an alternative biomarker--thyroid hormone levels.

NTPDase family in zebrafish: Nucleotide hydrolysis, molecular identification and gene expression profiles in brain, liver and heart.

Effects of dinuclear copper(II) complexes with 6-(benzylamino)purine derivatives on AhR and PXR dependent expression of cytochromes P450 CYP1A2 and CYP3A4 genes in primary cultures of human hepatocytes.

Interaction between oxidative stress sensor Nrf2 and xenobiotic-activated aryl hydrocarbon receptor in the regulation of the human phase II detoxifying UDP-glucuronosyltransferase 1A10.

Evidence for thyroid endocrine disruption in wild fish in San Francisco Bay, California, USA. Relationships to contaminant exposures.

High levels of polychlorinated dibenzo-dioxins/furans and dioxin like-PCBs found in monitoring investigations of sheep liver samples from Lower Saxony, Germany.

Influence of repeated preexposure to arsenic on acetaminophen-induced oxidative stress in liver of male rats.

Cytochrome P4501A induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin and two chlorinated dibenzofurans in primary hepatocyte cultures of three avian species.

Gender-linked haematopoietic and metabolic disturbances induced by a pesticide mixture administered at low dose to mice.

Evaluation of mutagenicity of mebudipine, a new calcium channel blocker.

Xenobiotic metabolism of bank vole (*Myodes glareolus*) exposed to PCDDs.

Effects of growth hormone and insulin-like growth factor-I on the iron-induced lipid peroxidation in the rat liver and porcine thyroid homogenates.

Pressure activates Src-dependent FAK-Akt and ERK1/2 signaling pathways in rat hepatic stellate cells.

The new generation of intravenous iron: chemistry, pharmacology, and toxicology of ferric carboxymaltose.

[The effect of 2,4-dinitrophenol on the intensity of oxidative processes in the rat liver during prolonged experiment].

Fluorescence-based liver microsomal assay for screening of pharmaceutical reactive metabolites using a glutathione conjugated 96-well plate.

Mutagenic activities of a chlorination by-product of butamifos, its structural isomer, and their related compounds.

Pyrrroloquinoline quinone stimulates mitochondrial biogenesis through cAMP response element-binding protein phosphorylation and increased PGC-1alpha expression.

Protective effect of *Corchorus olitorius* leaves on sodium arsenite-induced toxicity in experimental rats.

Altered metabolisms of mediators controlling vascular function and enhanced oxidative stress in asymptomatic children with congenital portosystemic venous shunt.

Successful treatment of paraquat poisoning by Xuebijing, an injection concocted from multiple Chinese medicinal herbs: a case report.

Toxicity assessment of the herbicide metolachlor comparative effects on bacterial and mitochondrial model systems.

Clinical implication of urinary neutrophil gelatinase-associated lipocalin and kidney injury molecule-1 in patients with acute paraquat intoxication.

Subacute effect of 2,4-dichlorophenoxyacetic acid on rat liver tissue: histochemical and immunohistochemical study.

Effects of atrazine on cytochrome P450 enzymes of zebrafish (*Danio rerio*).

Effect of pesticides on cell survival in liver and brain rat tissues.

Water extracts of *Brassica oleracea* var. *costata* potentiate paraquat toxicity to rat hepatocytes in vitro.

Arsenite and its metabolites, MMA(III) and DMA(III), modify CYP3A4, PXR and RXR alpha expression in the small intestine of CYP3A4 transgenic mice.

Glyphosate-based herbicides are toxic and endocrine disruptors in human cell lines.

Low toxic herbicide Roundup induces mild oxidative stress in goldfish tissues.

Long-lived ames dwarf mice are resistant to chemical stressors.

Induction of oxidative stress and apoptosis by pentachlorophenol in primary cultures of *Carassius carassius* hepatocytes.

Development of PBPK model of molinate and molinate sulfoxide in rats and humans.

Western blot analysis for 4-hydroxy-2-nonenal (HNE)-modified proteins in paraquat-treated mice.

Oxidant stress-induced liver injury in vivo: role of apoptosis, oncotic necrosis, and c-Jun NH2-terminal kinase activation.

Genotoxicity of AMPA, the environmental metabolite of glyphosate, assessed by the Comet assay and cytogenetic tests.

Effects of propanil on the European eel *Anguilla anguilla* and post-exposure recovery using selected biomarkers as effect criteria.

Serum total antioxidant statuses of survivors and nonsurvivors after acute paraquat poisoning.

Effect of a subchronic exposure to simazine on energetic metabolism of common carp (*Cyprinus carpio*).

Effects of subchronic exposure to Successor 600 (pethoxamid 600 g L⁻¹) on common carp *Cyprinus carpio*.

A review: oxidative stress in fish induced by pesticides.

Effects of atrazine on hepatic metabolism and endocrine homeostasis in rainbow trout (*Oncorhynchus mykiss*).

Increased sensitivity of glutathione S-transferase P-null mice to cyclophosphamide-induced urinary bladder toxicity.

Staphylococcal catalase regulates its virulence and induces arthritis in catalase deficient mice.

Acrolein, a ubiquitous pollutant and lipid hydroperoxide product, inhibits antiviral activity of interferon-alpha: relevance to hepatitis C.

2'-Benzoyloxycinnamaldehyde inhibits tumor growth in H-ras12V transgenic mice via downregulation of metallothionein.

Chronic exposure to the herbicide, atrazine, causes mitochondrial dysfunction and insulin resistance.

Bioaccumulation and biotransformation of brominated and chlorinated contaminants and their metabolites in ringed seals (*Pusa hispida*) and polar bears (*Ursus maritimus*) from East Greenland.

1-Cyano-2,3-epithiopropene is a novel plant-derived chemopreventive agent which induces cytoprotective genes that afford resistance against the genotoxic alpha,beta-unsaturated aldehyde acrolein.

Metabolism of flufenpyr-ethyl in rats and mice.

Time course of arsenic species in the brain and liver of mice after oral administration of arsenate.

Genetic variants in multidrug and toxic compound extrusion-1, hMATE1, alter transport function.

Disposition of the herbicide 2-chloro-4-(ethylamino)-6-(isopropylamino)-s-triazine (Atrazine) and its major metabolites in mice: a liquid chromatography/mass spectrometry analysis of urine, plasma, and tissue levels.

Effect of long-term exposure to simazine on histopathology, hematological, and biochemical parameters in *Cyprinus carpio*.

Plasma pharmacokinetics and metabolism of the antitumour drug candidate 2'-benzyloxycinnamaldehyde in rats.

Lymphatic and portal vein absorption of organochlorine compounds in rats.

Transcriptional changes associated with reduced spontaneous liver tumor incidence in mice chronically exposed to high dose arsenic.

Requirement of arsenic biomethylation for oxidative DNA damage.

Non-dioxin-like-PCBs phosphorylate Mdm2 at Ser166 and attenuate the p53 response in HepG2 cells.

Serum gamma-glutamyltransferase: new insights about an old enzyme.

Automated dose-response analysis of the relative hepatic gene expression potency of TCDF in C57BL/6 mice.

Marked iron overload related to ribavirin and iron sulfate treatment in a patient with active viral C cirrhosis.

The inhibition effect of 2,3,7,8-tetrachlorinated dibenzo-p-dioxin-induced aryl hydrocarbon receptor activation in human hepatoma cells with the treatment of cadmium chloride.

Aryl hydrocarbon receptor-mediated induction of the cytosolic phospholipase A(2)alpha gene by 2,3,7,8-tetrachlorodibenzo-p-dioxin in mouse hepatoma Hepa-1c1c7 cells.

Inter-tissue distribution and evaluation of potential toxicity of PCBs in Baltic cod (*Gadus morhua* L.).

Comparative hepatotoxicity and clastogenicity of sodium arsenite and three petroleum products in experimental Swiss Albino Mice: the modulatory effects of Aloe vera gel.

Nrf2 protects against As(III)-induced damage in mouse liver and bladder.

Changes in serum hepcidin levels in acute iron intoxication in a rat model.

Inhibition of UV-C light-induced apoptosis in liver cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Evaluation of the rodent Hershberger bioassay on intact juvenile males--testing of coded chemicals and supplementary biochemical investigations.

Impact of life stage and duration of exposure on arsenic-induced proliferative lesions and neoplasia in C3H mice.

Health profiles of methyl bromide applicators in greenhouses in Turkey.

Phyllanthus urinaria extract attenuates acetaminophen induced hepatotoxicity: involvement of cytochrome P450 CYP2E1.

Determination of boron distribution in rat's brain, kidney and liver.

Metal interference on luciferase activity induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in bioassays of recombinant mouse hepatoma cells.

[Model establishment of liver fibrosis in oral arsenic solution exposed mice].

The protective role of HO-1 and its generated products (CO, bilirubin, and Fe) in ethanol-induced human hepatocyte damage.

Influence of aryl hydrocarbon- (Ah) receptor and genotoxins on DNA repair gene expression and cell survival of mouse hepatoma cells.

PCBs and the energy cost of migration in the European eel (*Anguilla anguilla* L.).

Attenuation of 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity by resveratrol: a comparative study with different routes of administration.

Suppression of cytochrome P450 1A1 expression induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in mouse hepatoma hepa-1c1c7 cells treated with serum of (-)-epigallocatechin-3-gallate- and green tea extract-administered rats.

Structure-effect relationship in the down-regulation of glutaminase in cultured human cells by phenylarsenic compounds.

Possible involvement of arylhydrocarbon receptor variants in TCDD-induced thymic atrophy and XRE-dependent transcriptional activity in Wistar Hannover GALAS rats.

CYP1B1, but not CYP1A1, is downregulated by promoter methylation in colorectal cancers.

The role of the dioxin-responsive element cluster between the Cyp1a1 and Cyp1a2 loci in aryl hydrocarbon receptor biology.

Tumor promoting and co-carcinogenic effects in medium-term rat hepatocarcinogenesis are not modified by co-administration of 12 pesticides in mixture at acceptable daily intake.

Selection of cytotoxicity markers for the screening of new chemical entities in a pharmaceutical context: a preliminary study using a multiplexing approach.

Activation of the aryl hydrocarbon receptor by TCDD inhibits senescence: a tumor promoting event?

A new cross-talk between the aryl hydrocarbon receptor and RelB, a member of the NF-kappaB family.

Bioactivation of the phytoestrogen diosmetin by CYP1 cytochromes P450.

Ethanol extract of *Allium sativum* attenuates testicular and liver toxicity induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats.

Expression of hepcidin and other iron-related genes in type 3 hemochromatosis due to a novel mutation in transferrin receptor-2.

Effects of leaves extract of *Ocimum sanctum* L. on arsenic-induced toxicity in Wistar albino rats.

Cytotoxicity and phytotoxicity of trichothecene macrolides from *Myrothecium gramminum*.

A stable and sensitive testing system for potential carcinogens based on DNA damage-induced gene expression in human HepG2 cell.

Toxicology laboratory analysis and human exposure to p-chloroaniline.

Reproductive and developmental toxicity screening study of 2,4-dinitrophenol in rats.

2,3,7,8-TCDD neurotoxicity in neuroblastoma cells is caused by increased oxidative stress, intracellular calcium levels, and tau phosphorylation.

Ferric carboxymaltose: a review of its use in iron-deficiency anaemia.

Molecular cloning and oxidative modification of human lens ALDH1A1: implication in impaired detoxification of lipid aldehydes.

Hepatic and vascular mRNA expression in adult zebrafish (*Danio rerio*) following exposure to benzo-a-pyrene and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Fetal arsenic exposure appears to facilitate endocrine disruption by postnatal diethylstilbestrol in neonatal mouse adrenal.

Glucocorticoid and adrenalectomy effects on the rat aryl hydrocarbon receptor pathway depend on the dosing regimen and post-surgical time.

Heparan sulfate proteoglycans are required for cellular binding of the hepatitis E virus ORF2 capsid protein and for viral infection.

The pleiotropy of dioxin toxicity--xenobiotic misappropriation of the aryl hydrocarbon receptor's alternative physiological roles.

Estimates of cancer potency of 2,3,7,8-tetrachlorodibenzo(p)dioxin using linear and nonlinear dose-response modeling and toxicokinetics.

The mammalian aryl hydrocarbon (Ah) receptor: from mediator of dioxin toxicity toward physiological functions in skin and liver.

Examination of Zolpidem effects on AhR- and PXR-dependent expression of drug-metabolizing cytochromes P450 in primary cultures of human hepatocytes.

Cytotoxicity and mitochondrial dysfunction of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in isolated rat hepatocytes.

Factorial design applied for multiple endpoint toxicity evaluation in Atlantic salmon (*Salmo salar* L.) hepatocytes.

Mst1-FoxO signaling protects Na⁺-ve T lymphocytes from cellular oxidative stress in mice.

The effect of dose on 2,3,7,8-TCDD tissue distribution, metabolism and elimination in CYP1A2 (-/-) knockout and C57BL/6N parental strains of mice.

Antioxidant defense system in rats simultaneously intoxicated with agrochemicals.

Oxidative stress responses of rats exposed to Roundup and its active ingredient glyphosate.

The inducibility of human cytochrome P450 1A by environmental-relevant xenobiotics in the human hepatoma derived cell line HepG2.

Hemangiomas, angiosarcomas, and vascular malformations represent the signaling abnormalities of pathogenic angiogenesis.

Dioxin-dependent and dioxin-independent gene batteries: comparison of liver and kidney in AHR-null mice.

Beta-naphthoflavone causes an AhR-independent inhibition of invasion and intracellular multiplication of *Listeria monocytogenes* in murine hepatocytes.

Divergent transcriptomic responses to aryl hydrocarbon receptor agonists between rat and human primary hepatocytes.

Comparative analysis of AhR-mediated TCDD-elicited gene expression in human liver adult stem cells.

Model estimates bioaccumulation of total PCBs, dioxin-furan TEQs, and total mercury in mink liver based on concentrations in Lake Ontario water.

Histological lesions in mink jaws are a highly sensitive biomarker of effect after exposure to TCDD-like chemicals: field and literature-based confirmations.

Highly effective binding of viologens by p-sulfonatocalixarenes for the treatment of viologen poisoning.

Liver proteome response of largemouth bass (*Micropterus salmoides*) exposed to several environmental contaminants: potential insights into biomarker development.

Preventive effect of piperonyl butoxide on cyclophosphamide-induced teratogenesis in rats.

Arsenic induces mitochondria-dependent apoptosis by reactive oxygen species generation rather than glutathione depletion in Chang human hepatocytes.

Effects of occupational exposure to 1,4-dichlorobenzene on hematologic, kidney, and liver functions.

Reduced arsenic clearance and increased toxicity in aquaglyceroporin-9-null mice.

Activation of MAPKs influences the expression of drug-metabolizing enzymes in primary human hepatocytes.

Predictive modeling of a mixture of thyroid hormone disrupting chemicals that affect production and clearance of thyroxine.

Species differences for stereoselective metabolism of ethofumesate and its enantiomers in vitro.

Specific in vitro toxicity of crude and refined petroleum products. 1. Aryl hydrocarbon receptor-mediated responses.

Preclinical activity of palifosfamide lysine (ZIO-201) in pediatric sarcomas including oxazaphosphorine-resistant osteosarcoma.

Modulation of carcinogen metabolism by nitric oxide-aspirin 2 is associated with suppression of DNA damage and DNA adduct formation.

An evaluation of the cytochrome P450 inhibition potential of selected pesticides in human hepatic microsomes.

[Effect of bromoxynil on membrane potential and respiratory control rate in isolated mitochondria from mice liver and intervention effect of NAC].

[Production of marker-free plants expressing the gene of the hepatitis B virus surface antigen].

Distinct roles of two zebrafish AHR repressors (AHRRa and AHRRb) in embryonic development and regulating the response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Hepatic P450 enzyme activity, tissue morphology and histology of mink (*Mustela vison*) exposed to polychlorinated dibenzofurans.

Concentrations, patterns and metabolites of organochlorine pesticides in relation to xenobiotic phase I and II enzyme activities in ringed seals (*Phoca hispida*) from Svalbard and the Baltic Sea.

The role of aryl hydrocarbon receptor in regulation of enzymes involved in metabolic activation of polycyclic aromatic hydrocarbons in a model of rat liver progenitor cells.

Organic cation transporters: physiology, toxicology and special focus on ethidium as a novel substrate.

2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) induces degradation of adherens junction proteins and inhibits beta-catenin-dependent transcription in liver epithelial cells.

The molecular mechanisms of diallyl disulfide and diallyl sulfide induced hepatocyte cytotoxicity.

Effects of TI(+) on ion permeability, membrane potential and respiration of isolated rat liver mitochondria.

Role of aquaporin 9 in cellular accumulation of arsenic and its cytotoxicity in primary mouse hepatocytes.

Drug metabolizing enzyme expression in rat choroid plexus: effects of in vivo xenobiotics treatment.

Disruption of the thyroid system by diethylstilbestrol and ioxynil in the sea bream (*Sparus aurata*).

CYP1A1 and CYP1A2 expression: comparing 'humanized' mouse lines and wild-type mice; comparing human and mouse hepatoma-derived cell lines.

Dexamethasone controls aryl hydrocarbon receptor (AhR)-mediated CYP1A1 and CYP1A2 expression and activity in primary cultures of human hepatocytes.

In vitro glutathione conjugation of methyl iodide in rat, rabbit, and human blood and tissues.

Two-day inhalation toxicity study of methyl iodide in the rat.

Sustaining hypercitrullinemia, hypercholesterolemia and augmented oxidative stress in Japanese children with aspartate/glutamate carrier isoform 2-citrin-deficiency even during the silent period.

Chicken embryo cardiomyocyte cultures--a new approach for studying effects of halogenated aromatic hydrocarbons in the avian heart.

Effects of co-exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin and perfluorooctane sulfonate or perfluorooctanoic acid on expression of cytochrome P450 isoforms in chicken (*Gallus gallus*) embryo hepatocyte cultures.

Hepatic uptake and biliary excretion of manganese in the little skate, *Leucoraja erinacea*.

Transgenic mouse lines expressing rat AH receptor variants--a new animal model for research on AH receptor function and dioxin toxicity mechanisms.

Gene expression profiling in rat liver treated with compounds inducing elevation of bilirubin.

Correlation between hepatocarcinogenic effect of estragole and its influence on glucocorticoid induction of liver-specific enzymes and activities of FOXA and HNF4 transcription factors in mouse and rat liver.

Hepatoprotective and curative properties of Kombucha tea against carbon tetrachloride-induced toxicity.

Effect of allyl alcohol on hepatic transporter expression: zonal patterns of expression and role of Kupffer cell function.

Induction of mouse UDP-glucuronosyltransferase mRNA expression in liver and intestine by activators of aryl-hydrocarbon receptor, constitutive androstane receptor, pregnane X receptor, peroxisome proliferator-activated receptor alpha, and nuclear factor erythroid 2-related factor 2.

Differential induction of cytochrome P450 1A1 and 1B1 mRNA in primary cultured bovine hepatocytes treated with TCDD, PBDD/Fs and feed ingredients.

Characterization of a rat NADPH-dependent aldo-keto reductase (AKR1B13) induced by oxidative stress.

Studies on histopathological changes in the gill, liver and kidney of *Channa punctatus* (Bloch) exposed to Alachlor.

Genotoxic effect of 2,4,6-trichlorophenol on p53 gene in zebrafish liver.

Disruption of period gene expression alters the inductive effects of dioxin on the AhR signaling pathway in the mouse liver.

Oposonized erythrocyte ghosts for liver-targeted delivery of antisense oligodeoxynucleotides.

New ifosfamide analogs designed for lower associated neurotoxicity and nephrotoxicity with modified alkylating kinetics leading to enhanced in vitro anticancer activity.

Antifibrogenic effects of tamoxifen in a rat model of periportal hepatic fibrosis.

Nanoencapsulation of quercetin enhances its dietary efficacy in combating arsenic-induced oxidative damage in liver and brain of rats.

Paclitaxel-resistance conferred by altered expression of efflux and influx transporters for paclitaxel in the human hepatoma cell line, HepG2.

Green tea extract increases cyclophosphamide-induced teratogenesis by modulating the expression of cytochrome P-450 mRNA.

Ameliorating effect of curcumin on sodium arsenite-induced oxidative damage and lipid peroxidation in different rat organs.

Effects of perinatal PBDE exposure on hepatic phase I, phase II, phase III, and deiodinase 1 gene expression involved in thyroid hormone metabolism in male rat pups.

TCDD-mediated suppression of the in vitro anti-sheep erythrocyte IgM antibody forming cell response is reversed by interferon-gamma.

The changes of serum testosterone level and hepatic microsome enzyme activity of crucian carp (*Carassius carassius*) exposed to a sublethal dosage of pentachlorophenol.

Cytotoxic, genotoxic and cell-cycle disruptive effects of thio-dimethylarsinate in cultured human cells and the role of glutathione.

Oxidative stress biomarkers and heart function in bullfrog tadpoles exposed to Roundup Original.

Formation of dimethylthioarsenicals in red blood cells.

The 2,4-D herbicide effects on acetylcholinesterase activity and metabolic parameters of piava freshwater fish (*Leporinus obtusidens*).

Toxicity and effects of a glyphosate-based herbicide on the Neotropical fish *Prochilodus lineatus*.

Effect of butachlor on antioxidant enzyme status and lipid peroxidation in fresh water African catfish, (*Clarias gariepinus*).

Biochemical effects of clomazone herbicide on piava (*Leporinus obtusidens*).

In vitro screening for aryl hydrocarbon receptor agonistic activity in 200 pesticides using a highly sensitive reporter cell line, DR-EcoScreen cells, and in vivo mouse liver cytochrome P450-1A induction by propanil, diuron and linuron.

Hepatoma tissue culture (HTC) cells as a model for investigating the effects of low concentrations of herbicide on cell structure and function.

A comparative 90-day toxicity study of allyl acetate, allyl alcohol and acrolein.

Effects of subchronic exposure to LASSO MTX (alachlor 42% W/V) on hematological indices and histology of the common Carp, *Cyprinus carpio* L.

Effects of subchronic metribuzin exposure on common carp (*Cyprinus carpio*).

An outbreak of fatal pneumonitis caused by contamination of illicit alcohol with paraquat.

Protective effects of vitamin E against atrazine-induced genotoxicity in rats.

Mechanism of trifluralin-induced thyroid tumors in rats.

Discriminating the molecular basis of hepatotoxicity using the large-scale characteristic molecular signatures of toxicants by expression profiling analysis.

The in vivo gene expression signature of oxidative stress.

Effect of atrazine on metamorphosis and sexual differentiation in *Xenopus laevis*.

Carbonyl-scavenging drugs & protection against carbonyl stress-associated cell injury.

Acute renal failure induced by bentazone: 2 case reports and a comprehensive review.

Dose-dependent uptake, elimination, and toxicity of monosodium methanearsonate in adult zebra finches (*Taeniopygia guttata*).

Genotoxic potential of glyphosate formulations: mode-of-action investigations.

Comparative cytotoxicity of alachlor, acetochlor, and metolachlor herbicides in isolated rat and cryopreserved human hepatocytes.

Protective effects of ethyl pyruvate treatment on paraquat-intoxicated rats.

Analysis of phenoxyacetic acid herbicides as biomarkers in human urine using liquid chromatography/triple quadrupole mass spectrometry.

UCP2 modulates cell proliferation through the MAPK/ERK pathway during erythropoiesis and has no effect on heme biosynthesis.

PPARalpha and PPARbeta are differentially affected by ethanol and the ethanol metabolite acetaldehyde in the MCF-7 breast cancer cell line.

Glutathione transferases from *Anguilla anguilla* liver: identification, cloning and functional characterization.

Preventing cell death induced by carbonyl stress, oxidative stress or mitochondrial toxins with vitamin B anti-AGE agents.

Oxidative stress does not influence carotenoid mobilization and plumage pigmentation.

Induction of cancer chemopreventive enzymes by coffee is mediated by transcription factor Nrf2. Evidence that the coffee-specific diterpenes cafestol and kahweol confer protection against acrolein.

Development of a human physiologically based pharmacokinetic (PBPK) model for inorganic arsenic and its mono- and di-methylated metabolites.

The NADPH quinone reductase MdaB confers oxidative stress resistance to *Helicobacter hepaticus*.

Detoxification of molinate sulfoxide: comparison of spontaneous and enzymatic glutathione conjugation using human and rat liver cytosol.

Curcumin attenuates cytochrome P450 induction in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin by ROS-dependently degrading AhR and ARNT.

Dihydrolipoic acid inhibits tetrachlorohydroquinone-induced tumor promotion through prevention of oxidative damage.

Effects of dietary iron levels on growth performance, hematological status, liver mineral concentration, fecal microflora, and diarrhea incidence in weanling pigs.

Effect of FeSO₄ treatment on glucose metabolism in diabetic rats.

Enhancement of hypoxia-induced gene expression in fish liver by the aryl hydrocarbon receptor (AhR) ligand, benzo[a]pyrene (BaP).

Identification of *Inonotus obliquus* and analysis of antioxidation and antitumor activities of polysaccharides.

Omeprazole alleviates benzo[a]pyrene cytotoxicity by inhibition of CYP1A1 activity in human and mouse hepatoma cells.

Embryo toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin to the wood duck (*Aix sponsa*).

Abnormal liver development and resistance to 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity in mice carrying a mutation in the DNA-binding domain of the aryl hydrocarbon receptor.

Patterns of dioxin-altered mRNA expression in livers of dioxin-sensitive versus dioxin-resistant rats.

Combined administration of taurine and monoisoamyl DMSA protects arsenic induced oxidative injury in rats.

Blockade of the aryl hydrocarbon receptor pathway triggered by dioxin, polycyclic aromatic hydrocarbons and cigarette smoke by *Phellinus linteus*.

Temporal metabonomic modeling of l-arginine-induced exocrine pancreatitis.

Effects of uremic serum and uremic toxins on hepatic uptake of digoxin.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on heme oxygenase-1, biliverdin IXalpha reductase and delta-aminolevulinic acid synthetase 1 in rats with wild-type or variant AH receptor.

Associations of environmental exposure to dioxins with prevalent diabetes among general inhabitants in Japan.

CYP1A induction potential and the concentration of priority pollutants in marine sediment samples--in vitro evaluation using the PLHC-1 fish hepatoma cell line.

Liver is a target of arsenic carcinogenesis.

Accumulation of M1dG DNA adducts after chronic exposure to PCBs, but not from acute exposure to polychlorinated aromatic hydrocarbons.

Cross-talk between aryl hydrocarbon receptor and mitogen-activated protein kinase signaling pathway in liver cancer through c-raf transcriptional regulation.

Evaluation of tumour promoting potency of fish borne toxaphene residues, as compared to technical toxaphene and UV-irradiated toxaphene.

Concurrent subacute exposure to arsenic through drinking water and malathion via diet in male rats: effects on hepatic drug-metabolizing enzymes.

Sodium arsenite induces orphan nuclear receptor SHP gene expression via AMP-activated protein kinase to inhibit gluconeogenic enzyme gene expression.

Arsenite and cadmium, but not chromium, induce NAD(P)H:quinone oxidoreductase 1 through transcriptional mechanisms, in spite of post-transcriptional modifications.

Automated quantitative dose-response modeling and point of departure determination for large toxicogenomic and high-throughput screening data sets.

Beneficial impact of L-carnitine in liver: a study in a rat model of syndrome X.

Increased levels of a unique post-translationally modified betaIVb-tubulin isotype in liver cancer.

Mid-gestation exposure of C57BL/6 mice to 2,3,7,8-tetrachlorodibenzo-p-dioxin causes postnatal morphologic changes in the spleen and liver.

Occurrence of two different types of glutathione S-transferase placental form-positive hepatocytes after a single administration of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats.

Cytochrome P450 2C11 5'-flanking region and promoter: regulation by aromatic hydrocarbons in vitro.

Involvement of SREBPs in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced disruption of lipid metabolism in male guinea pig.

Effect of hemolytic and iron-deficiency anemia on intestinal absorption and tissue accumulation of cadmium.

Basil extract inhibits the sulfotransferase mediated formation of DNA adducts of the procarcinogen 1'-hydroxyestragole by rat and human liver S9 homogenates and in HepG2 human hepatoma cells.

The influence of metallothionein on exposure to metals: an in vitro study on cellular models.

Clinical manifestations and arsenic methylation after a rare subacute arsenic poisoning accident.

Experience of nitisinone for the pharmacological treatment of hereditary tyrosinaemia type 1.

DNA-dependent protein kinase catalytic subunit modulates the stability of c-Myc oncoprotein.

[Analytic role in clinical toxicology--impact on the diagnosis and treatment of a poisoned patient].

Effects of Helicobacter infection on developmental toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in Holtzman rats.

Mortality in a population exposed to dioxin after the Seveso, Italy, accident in 1976: 25 years of follow-up.

Relative potency based on hepatic enzyme induction predicts immunosuppressive effects of a mixture of PCDDS/PCDFS and PCBS.

High dietary fat exacerbates arsenic-induced liver fibrosis in mice.

Removal of the uremic retention solute p-cresol using fractionated plasma separation and adsorption.

Regulation of aryl hydrocarbon receptor expression and function by glucocorticoids in mouse hepatoma cells.

Comparative toxicogenomic examination of the hepatic effects of PCB126 and TCDD in immature, ovariectomized C57BL/6 mice.

Antagonistic and agonistic effects of indigoids on the transformation of an aryl hydrocarbon receptor.

Chemical contaminants, health indicators, and reproductive biomarker responses in fish from rivers in the Southeastern United States.

Enhancements of 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone (NNK) metabolism and carcinogenic risk via NNK/arsenic interaction.

Hepatocyte mitochondrion electron-transport chain alterations in CCl(4) and alcohol induced hepatitis in rats and their correction with simvastatin.

Reversal of arsenic-induced hepatic apoptosis with combined administration of DMSA and its analogues in guinea pigs: role of glutathione and linked enzymes.

Essential role of the AH receptor in the dysfunction of heme metabolism induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Significance of prolyl hydroxylase 2 in the interference of aryl hydrocarbon receptor and hypoxia-inducible factor-1 alpha signaling.

Analysis of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced proteome changes in 5L rat hepatoma cells reveals novel targets of dioxin action including the mitochondrial apoptosis regulator VDAC2.

Modulation of TCDD-mediated induction of cytochrome P450 1A1 by mercury, lead, and copper in human HepG2 cell line.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin administration and high-fat diet on the body weight and hepatic estrogen metabolism in female C3H/HeN mice.

Subhepatotoxic exposure to arsenic enhances lipopolysaccharide-induced liver injury in mice.

Comparative study of gastrointestinal tract and liver toxicity of ferrous sulfate, iron amino chelate and iron polymaltose complex in normal rats.

[Protective and restorative effect of antioxidants in experimental intoxication with chlorophenols].

An evidence for regulatory cross-talk between aryl hydrocarbon receptor and glucocorticoid receptor in HepG2 cells.

Nonenzymatic formation of a novel hydroxylated sulfamethoxazole derivative in human liver microsomes: implications for bioanalysis of sulfamethoxazole metabolites.

Aryl hydrocarbon receptor-dependent induction of flavin-containing monooxygenase mRNAs in mouse liver.

Potential effects of perfluorinated compounds in common cormorants from Lake Biwa, Japan: an implication from the hepatic gene expression profiles by microarray.

Reactive oxygen species from the uncoupling of human cytochrome P450 1B1 may contribute to the carcinogenicity of dioxin-like polychlorinated biphenyls.

A bioassay approach to determine the dioxin-like activity in sediment extracts from the Danube River: ethoxyresorufin-O-deethylase induction in gill filaments and liver of three-spined sticklebacks (*Gasterosteus aculeatus* L.).

Protein expression in the livers and urinary bladders of hamsters exposed to sodium arsenite.

Transcriptomic responses to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in liver: comparison of rat and mouse.

Exposure of laboratory mice to domestic cooking gas: implications for toxicity.

Synthesis and in vivo evaluation of novel PET radioligands for imaging the endothelin-A receptor.

A technical mixture of 2,2',4,4'-tetrabromo diphenyl ether (BDE47) and brominated furans triggers aryl hydrocarbon receptor (AhR) mediated gene expression and toxicity.

Toxicity of analytically cleaned pentabromodiphenylether after prolonged exposure in estuarine European flounder (*Platichthys flesus*), and partial life-cycle exposure in fresh water zebrafish (*Danio rerio*).

Xenobiotic intrinsic clearance in freshly isolated hepatocytes from rainbow trout (*Oncorhynchus mykiss*): determination of trout hepatocellularity, optimization of cell concentrations and comparison of serum and serum-free incubations.

Differences in gene expression and benzo[a]pyrene-induced DNA adduct formation in the liver of three strains of female mice with identical AhRb2 genotype treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin and/or benzo[a]pyrene.

Rapid screening of glutathione-trapped reactive metabolites by linear ion trap mass spectrometry with isotope pattern-dependent scanning and postacquisition data mining.

Ghrelin infused into the portal vein inhibits glucose-stimulated insulin secretion in Wistar rats.

Estrogenic effect of dioxin-like aryl hydrocarbon receptor (AhR) agonist (PCB congener 126) in salmon hepatocytes.

Genes related to apoptosis predict necrosis of the liver as a phenotype observed in rats exposed to a compendium of hepatotoxicants.

Assessing the potential risk of oil-field produced waters using a battery of bioassays/biomarkers.

Comparative temporal toxicogenomic analysis of TCDD- and TCDF-mediated hepatic effects in immature female C57BL/6 mice.

Mutagenicity and antimutagenicity of teas used in popular medicine in the salmonella/microsome assay.

Low-dose dioxins alter gene expression related to cholesterol biosynthesis, lipogenesis, and glucose metabolism through the aryl hydrocarbon receptor-mediated pathway in mouse liver.

Non-dioxin-like polychlorinated biphenyls induce a release of arachidonic acid in liver epithelial cells: a partial role of cytosolic phospholipase A(2) and extracellular signal-regulated kinases 1/2 signalling.

Histopathological alterations of Nile tilapia, *Oreochromis niloticus* in acute and subchronic alachlor exposure.

Inorganic phosphate stimulates the toxic effects of TI⁺ in rat liver mitochondria.

Superiority of serum type-I arginase and ornithine carbamyltransferase in the detection of toxicant-induced acute hepatic injury in rats.

Quercetin administration during chelation therapy protects arsenic-induced oxidative stress in mice.

Differential signatures of protein glycosylation and phosphorylation in human Chang liver cells induced by TCDD treatment.

TCDD deregulates contact inhibition in rat liver oval cells via Ah receptor, JunD and cyclin A.

Results of the negative control chemical allyl alcohol in the 15-day intact adult male rat screening assay for endocrine activity.

2-Chlorophenol induced hydroxyl radical production in mitochondria in *Carassius auratus* and oxidative stress--an electron paramagnetic resonance study.

Organochlorine residues in the blubber and liver of bottlenose dolphins (*Tursiops truncatus*) stranded in the Canary Islands, North Atlantic Ocean.

Toxicogenomic analysis of gender, chemical, and dose effects in livers of TCDD- or aroclor 1254-exposed rats using a multifactor linear model.

Inhibition of carrier-mediated uptake of epirubicin reduces cytotoxicity in primary culture of rat hepatocytes.

Hexachlorobenzene triggers AhR translocation to the nucleus, c-Src activation and EGFR transactivation in rat liver.

Microtubules-interfering agents restrict aryl hydrocarbon receptor-mediated CYP1A2 induction in primary cultures of human hepatocytes via c-jun-N-terminal kinase and glucocorticoid receptor.

[Effect of 2,4-dinitrophenol on the rat liver respiratory activity and ATP content after hypothermic storage and following reperfusion].

Thioredoxin 2 haploinsufficiency in mice results in impaired mitochondrial function and increased oxidative stress.

Toxicity reference values for mink exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) equivalents (TEQs).

Cytochrome P4501A1 expression, polychlorinated biphenyls and hydroxylated metabolites, and adipocyte size of bottlenose dolphins from the Southeast United States.

Tissue dosimetry, metabolism and excretion of pentavalent and trivalent dimethylated arsenic in mice after oral administration.

Approach for extrapolating in vitro metabolism data to refine bioconcentration factor estimates.

Perinatal dioxin exposure, cytochrome P-450 activity, liver functions and thyroid hormones at follow-up after 7-12 years.

JNK inhibitor SP600125 is a partial agonist of human aryl hydrocarbon receptor and induces CYP1A1 and CYP1A2 genes in primary human hepatocytes.

The effect of sub-acute and sub-chronic exposure of rats to the glyphosate-based herbicide Roundup.

Epigallocatechin gallate, a green tea phytochemical, attenuates alcohol-induced hepatic protein and lipid damage.

Tissue-specific induction of EROD activity and CYP1A protein in *Sparus aurata* exposed to B(a)P and TCDD.

Diuron lacks promoting potential in a rat liver bioassay.

Insulin-like growth factor I deficiency prolongs survival and antagonizes paraquat-induced cardiomyocyte dysfunction: role of oxidative stress.

Aldo-keto reductase family 1 B10 gene silencing results in growth inhibition of colorectal cancer cells: Implication for cancer intervention.

Hepatotoxicity related to paraquat and diquat absorption through intact skin.

Acute effects of glyphosate herbicide on metabolic and enzymatic parameters of silver catfish (*Rhamdia quelen*).

Hepatoprotective role of captopril on paraquat induced hepatotoxicity.

Case report: mixed cholestatic/hepatocellular liver injury induced by the herbicide quizalofop-p-ethyl.

Effect of an excessive intake of quercetin on the vitamin E level and antioxidative enzyme activities of mouse liver under paraquat-induced oxidative stress.

Autophagic and lysosomal reactions to stress in the hepatopancreas of blue mussels.

Trifluralin toxicity in a Chagas disease mouse model.

Pesticide poisoning.

Protective effects of wheat bran against diquat toxicity in male Fischer-344 rats.

Effects of four rice herbicides on some metabolic and toxicology parameters of teleost fish (*Leporinus obtusidens*).

[Change of liver function and blood glucose in patients with acute paraquat poisoning].

No direct hepatotoxic potential following a multiple-low dose paraquat exposure in rat as related to its bioaccumulation.

Butachlor-induced acute toxic hepatitis.

Effect of clomazone herbicide on biochemical and histological aspects of silver catfish (*Rhamdia quelen*) and recovery pattern.

Cytotoxicity of chloroacetanilide herbicide alachlor in HepG2 cells independent of CYP3A4 and CYP3A7.

Captopril ameliorates toxicity induced by paraquat in mitochondria isolated from the rat liver.

Melatonin reduces mortality and oxidatively mediated hepatic and renal damage due to diquat treatment.

Combined effects of herbicides on biomarkers reflecting immune-endocrine interactions in goldfish. Immune and antioxidant effects.

Characterization of hepatic glutathione S-transferases in coho salmon (*Oncorhynchus kisutch*).

Developmental toxicity evaluation of triclopyr butoxyethyl ester and triclopyr triethylamine salt in the CD rat.

A fatal case of paraquat poisoning following minimal dermal exposure.

Reproductive effects in male rats exposed to diuron.

Acute acrolein-induced cystitis in mice.

Down-regulation of glutaminase C in human hepatocarcinoma cell by diphenylarsinic acid, a degradation product of chemical warfare agents.

Cinnamaldehyde--a potential antidiabetic agent.

Characterization of diuron N-demethylation by mammalian hepatic microsomes and cDNA-expressed human cytochrome P450 enzymes.

Disruption of thyroid hormone binding to sea bream recombinant transthyretin by ioxinyl and polybrominated diphenyl ethers.

Thio-dimethylarsinate is a common metabolite in urine samples from arsenic-exposed women in Bangladesh.

Modification by acrolein, a component of tobacco smoke and age-related oxidative stress, mediates functional impairment of human apolipoprotein E.

Distribution of ¹⁴C-atrazine following an acute lactational exposure in the Wistar rat.

Determination of triazine herbicides in sheep liver by microwave-assisted extraction and high performance liquid chromatography.

Determination of xenobiotic intrinsic clearance in freshly isolated hepatocytes from rainbow trout (*Oncorhynchus mykiss*) and rat and its application in bioaccumulation assessment.

Estimating constants for metabolism of atrazine in freshly isolated rat hepatocytes by kinetic modeling.

Paraquat increases cyanide-insensitive respiration in murine lung epithelial cells by activating an NAD(P)H:paraquat oxidoreductase: identification of the enzyme as thioredoxin reductase.

Electron transfer from NADH bound to horse liver alcohol dehydrogenase (NAD⁺ dependent dehydrogenase): visualisation of the activity in the enzyme crystals and adsorption of formazan derivatives by these crystals.

Toxicity assays in nanodrops combining bioassay and morphometric endpoints.

Metabolic differences between two dimethylthioarsenicals in rats.

Critical role of exposure time to endogenous oxidative stress in hepatocyte apoptosis.

Hepatitis B virus infection initiates with a large surface protein-dependent binding to heparan sulfate proteoglycans.

Evaluation of electrospray ionization and atmospheric pressure chemical ionization for simultaneous detection of estrone and its metabolites using high-performance liquid chromatography/tandem mass spectrometry.

The aryl hydrocarbon receptor is required for optimal resistance to *Listeria monocytogenes* infection in mice.

Porphyria cutanea tarda as rare cutaneous manifestation of hepatic metastases treated with interferon.

Relative differences in aryl hydrocarbon receptor-mediated response for 18 polybrominated and mixed halogenated dibenzo-p-dioxins and -furans in cell lines from four different species.

Protection of arsenic-induced hepatic disorder by arjunolic acid.

Relationship between aryl hydrocarbon receptor-affinity and the induction of EROD activity by 2,3,7,8-tetrachlorinated phenothiazine and derivatives.

The effect of dietary glycine on the hepatic tumor promoting activity of polychlorinated biphenyls (PCBs) in rats.

Differential effect of arecoline on the endogenous dioxin-responsive cytochrome P450 1A1 and on a stably transfected dioxin-responsive element-driven reporter in human hepatoma cells.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin alters retinoid homeostasis in maternal and perinatal tissues of the Holtzman rat.

Regulatory factors involved in species-specific modulation of arylhydrocarbon receptor (AhR)-dependent gene expression in humans and mice.

Serum profiles of PCDDs and PCDFs, in individuals near the Escambia Wood Treating Company Superfund site in Pensacola, FL.

Lafora-like ground-glass inclusions in hepatocytes of pediatric patients: a report of two cases.

Comparison of the cytotoxicity of the nitroaromatic drug flutamide to its cyano analogue in the hepatocyte cell line TAMH: evidence for complex I inhibition and mitochondrial dysfunction using toxicogenomic screening.

Functional characterization of the promoter of human carbonyl reductase 1 (CBR1). Role of XRE elements in mediating the induction of CBR1 by ligands of the aryl hydrocarbon receptor.

Toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the developing male Wistar(Han) rat. I: No decrease in epididymal sperm count after a single acute dose.

Imatinib mesylate inhibits cell invasion of malignant peripheral nerve sheath tumor induced by platelet-derived growth factor-BB.

Polychlorinated biphenyls modulated tumorigenesis in Sprague Dawley rats: correlation with mixed function oxidase activities and superoxide (O₂^{*}) formation potentials and implied mode of action.

Protective effects of hepatocellular canalicular conjugate export pump (Mrp2) on sodium arsenite-induced hepatic dysfunction in rats.

Transplacental arsenic carcinogenesis in mice.

Elevation of 8-hydroxydeoxyguanosine and cell proliferation via generation of oxidative stress by organic arsenicals contributes to their carcinogenicity in the rat liver and bladder.

Differences in acute toxicity syndromes of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 1,2,3,4,7,8-hexachlorodibenzo-p-dioxin in rats.

Maternal exposure of low dose of TCDD modulates the expression of estrogen receptor subunits of male gonads in offspring.

Symptomatic response of erythropoietic protoporphyria to iron supplementation.

Chemical contaminants, health indicators, and reproductive biomarker responses in fish from the Colorado River and its tributaries.

Inhibition of NF- κ B does not induce c-Jun N-terminal kinase-mediated apoptosis in reperfusion injury.

Determinations of dioxinlike activity in selected mollusks from the coast of the Bohai Sea, China, using the H4IIIE-luc bioassay.

Some clinico and histopathological changes in female goats experimentally exposed to dioxin.

[The role of insulin-like growth factor-2 gene differentially methylated regions in TCDD-induced malformation].

Protective effect of *Mentha piperita* against arsenic-induced toxicity in liver of Swiss albino mice.

Prevention of aneuploidy by S-adenosyl-methionine in human cells treated with sodium arsenite.

Long-term effects of subcutaneously injected 2,3,7,8-tetrachlorodibenzo-p-dioxin on the liver of rhesus monkeys.

Role of heat shock protein 70 in hepatic ischemia-reperfusion injury in mice.

Internal dose-effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in gonadotropin-primed weanling rat model.

Association of a polychlorinated dibenzo-p-dioxin, a polychlorinated biphenyl, and DDT with diabetes in the 1999-2002 National Health and Nutrition Examination Survey.

Hepatoprotective activity of liposomal flavonoid against arsenite-induced liver fibrosis.

Identification of kaempferol as an inhibitor of cigarette smoke-induced activation of the aryl hydrocarbon receptor and cell transformation.

Hsp90 inhibitors suppress HCV replication in replicon cells and humanized liver mice.

Dose- and time-dependent effects of 2,3,7,8-tetrabromodibenzo-p-dioxin on rat liver.

Disturbance of retinol transportation causes nitrofen-induced hypoplastic lung.

The role of chrysin and the ah receptor in induction of the human UGT1A1 gene in vitro and in transgenic UGT1 mice.

Effect of alpha-asarone and a derivative on lipids, bile flow and Na⁺/K⁺-ATPase in ethinyl estradiol-induced cholestasis in the rat.

P-selectin mediates metastatic progression through binding to sulfatides on tumor cells.

4-monochlorobiphenyl (PCB3) induces mutations in the livers of transgenic Fisher 344 rats.

In vitro mitigation of arsenic toxicity by tea polyphenols in human lymphocytes.

Influence of dietary fat and zinc supplementation on the iron utilization in growing rats.

[Sodium azide--clinical course of the poisoning and treatment].

[11C]Vinblastine syntheses and preliminary imaging in cancer patients.

Alcoholic myopathy and acetaldehyde.

[Hepatocyte mitochondrion respiratory chain in rats with experimental toxic hepatitis].

Arsenic methylation, urinary arsenic metabolites and human diseases: current perspective.

Arjunolic acid, a triterpenoid saponin, ameliorates arsenic-induced cyto-toxicity in hepatocytes.

The influence of exposure history on arsenic accumulation and toxicity in the killifish, *Fundulus heteroclitus*.

Mitochondrial P450-dependent arachidonic acid metabolism by TCDD-induced hepatic CYP1A5; conversion of EETs to DHETs by mitochondrial soluble epoxide hydrolase.

Taurine, a conditionally essential amino acid, ameliorates arsenic-induced cytotoxicity in murine hepatocytes.

Hepatic transcriptional networks induced by exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Detection and structural characterization of glutathione-trapped reactive metabolites using liquid chromatography-high-resolution mass spectrometry and mass defect filtering.

Analysis of cell death inducing compounds.

The nitric oxide prodrug, V-PYRRO/NO, mitigates arsenic-induced liver cell toxicity and apoptosis.

Tissue iron distribution and urinary mineral excretion vary depending on the form of iron (FeSO₄ or NaFeEDTA) and the route of administration (oral or subcutaneous) in rats given high doses of iron.

Strong synergistic induction of CYP1A1 expression by andrographolide plus typical CYP1A inducers in mouse hepatocytes.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) or diethylstilbestrol (DES) cause similar hematopoietic hypocellularity and hepatocellular changes in murine fetal liver, but differentially affect gene expression.

A noninvasive test of exposition to toxicants: quantitative analysis of cytochrome P4501A expression in fish scales.

microRNAs in adult rodent liver are refractory to dioxin treatment.

Oxidative stress and antioxidant defenses in goldfish liver in response to short-term exposure to arsenite.

Relationships between tissue levels of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), mRNAs, and toxicity in the developing male Wistar(Han) rat.

Importance of hepatic induction of constitutive androstane receptor and other transcription factors that regulate xenobiotic metabolism and transport.

Identification of regions of the sigma-1 receptor ligand binding site using a novel photoprobe.

Evaluation of genotoxic and non-genotoxic effects of organic air pollution using in vitro bioassays.

The effect of aromatic hydrocarbon receptor on the phenotype of the Hepa 1c1c7 murine hepatoma cells in the absence of dioxin.

Evaluation of novel microtubules interfering agents myoseverin, tubulyzine and E2GG in primary cultures of rat hepatocytes.

3-Methyl-4-nitrophenol metabolism by uridine diphosphate glucuronosyltransferase and sulfotransferase in liver microsomes of mice, rats, and Japanese quail (*Coturnix japonica*).

Tumor necrosis factor-alpha modulates effects of aryl hydrocarbon receptor ligands on cell proliferation and expression of cytochrome P450 enzymes in rat liver "stem-like" cells.

Arsenite induced oxidative damage in mouse liver is associated with increased cytokeratin 18 expression.

Catalase takes part in rat liver mitochondria oxidative stress defense.

Metabolic activation of herbal and dietary constituents and its clinical and toxicological implications: an update.

Commonly used tropical medicinal plants exhibit distinct in vitro antioxidant activities against hepatotoxins in rat liver.

Arecoline inhibits the 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced cytochrome P450 1A1 activation in human hepatoma cells.

Aryl-hydrocarbon receptor activation regulates constitutive androstane receptor levels in murine and human liver.

Conditional deletion of cytochrome P450 oxidoreductase in the liver and gastrointestinal tract: a new model for studying the functions of the P450 system.

Effects of long-term alachlor exposure on hepatic antioxidant defense and detoxifying enzyme activities in crucian carp (*Carassius auratus*).

Evaluation of a diverse set of potential P1 carboxylic acid bioisosteres in hepatitis C virus NS3 protease inhibitors.

Molecular characterization of cytochrome P450 1A1, 1A2, and 1B1, and effects of polychlorinated dibenzo-p-dioxin, dibenzofuran, and biphenyl congeners on their hepatic expression in Baikal seal (*Pusa sibirica*).

The anti-mutagenic and antioxidant effects of bile pigments in the Ames Salmonella test.

beta-Naphthoflavone and 3'-methoxy-4'-nitroflavone exert ambiguous effects on Ah receptor-dependent cell proliferation and gene expression in rat liver 'stem-like' cells.

Development and evaluation of an electrochemical method for studying reactive phase-I metabolites: correlation to in vitro drug metabolism.

Differential expression, induction, and stability of CYP1A4 and CYP1A5 mRNA in chicken and herring gull embryo hepatocytes.

4-Methoxyestradiol-induced oxidative injuries in human lung epithelial cells.

Kinetics and functional assay of liver repopulation after human cord blood transplantation.

Transplacental exposure to inorganic arsenic at a hepatocarcinogenic dose induces fetal gene expression changes in mice indicative of aberrant estrogen signaling and disrupted steroid metabolism.

Suppression of endogenous antioxidant enzymes by 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced oxidative stress in chicken liver during development.

Effect of herbal medicine Juzentaihoto on hepatic and intestinal heat shock gene expression requires intestinal microflora in mouse.

Validation of a high-throughput in vitro alkaline elution/rat hepatocyte assay for DNA damage.

[Physiological significance of metallothionein in oxidative stress].

Molecular characterization and tissue distribution of aryl hydrocarbon receptor nuclear translocator isoforms, ARNT1 and ARNT2, and identification of novel splice variants in common cormorant (*Phalacrocorax carbo*).

Concentration and distribution of dioxins and related compounds in human tissues.

Toxicogenomic responses in rainbow trout (*Oncorhynchus mykiss*) hepatocytes exposed to model chemicals and a synthetic mixture.

Fibronectin and laminin induce expression of islet cell markers in hepatic oval cells in culture.

No contribution of multipotent mesenchymal stromal cells to liver regeneration in a rat model of prolonged hepatic injury.

Cloning, purification, and identification of the liver canalicular ecto-ATPase as NTPDase8.

Halogenated organic contaminants and mercury in northern fulmars (*Fulmarus glacialis*): levels, relationships to dietary descriptors and blood to liver comparison.

Hydroxyl radical generation and oxidative stress in *Carassius auratus* liver as affected by 2,4,6-trichlorophenol.

In vitro and in vivo characterization of alkyl hydroperoxide reductase mutant strains of *Helicobacter hepaticus*.

Same-sample analysis of ethoxyresorufin-O-deethylase activity and cytochrome P4501A mRNA abundance in chicken embryo hepatocytes.

Expression and activity of arsenic methyltransferase Cyt19 in rat tissues.

Comparative measurement of cyanide and paraquat mitochondrial toxicity using two different mitochondrial toxicity assays.

Cryopreservation of human hepatocytes alters the mitochondrial respiratory chain complex 1.

Vitamin E supplementation protects oxidative stress during arsenic and fluoride antagonism in male mice.

Increase in the toxic effects of Tl⁺ on isolated rat liver mitochondria in the presence of nonactin.

[Free radicals in *Carassius auratus* liver: their generation and oxidative stress induced by 2,4,6-trichlorophenol].

Use of model-based compartmental analysis to study vitamin A kinetics and metabolism.

Effect of various radical generators on insulin-dependent regulation of hepatic gene expression.

Effects of combined administration of captopril and DMSA on arsenite induced oxidative stress and blood and tissue arsenic concentration in rats.

Human CYP1A1GFP expression in transgenic mice serves as a biomarker for environmental toxicant exposure.

Lack of the aryl hydrocarbon receptor leads to impaired activation of AKT/protein kinase B and enhanced sensitivity to apoptosis induced via the intrinsic pathway.

Accumulation of organic and inorganic contaminants in shellfish collected in estuarine waters near Pensacola, Florida: contamination profiles and risks to human consumers.

Diquat induces renal proximal tubule injury in glutathione reductase-deficient mice.

Using Janus green B to study paraquat toxicity in rat liver mitochondria: role of ACE inhibitors (thiol and nonthiol ACEi).

Adverse effects of herbicide MCPA on dogs in a 90 day toxicological study.

Experience with paraquat poisoning in a respiratory intensive care unit in North India.

Toxicity of a trivalent organic arsenic compound, dimethylarsinous glutathione in a rat liver cell line (TRL 1215).

Relationship between body iron stores and diquat toxicity in male Fischer-344 rats.

The effect of paraquat on hepatic EROD activity, liver, and gonadal histology in males and females of Nile tilapia, *Oreochromis niloticus*, exposed at different temperatures.

Health status of Army Chemical Corps Vietnam veterans who sprayed defoliant in Vietnam.

Pentachlorophenol treatment in vivo elevates point mutation rate in zebrafish p53 gene.

Single high dose dexamethasone treatment decreases the pathological score and increases the survival rate of paraquat-intoxicated rats.

Joint anti-estrogenic effects of PCP and TCDD in primary cultures of juvenile goldfish hepatocytes using vitellogenin as a biomarker.

Lack of effects of atrazine on estrogen-responsive organs and circulating hormone concentrations in sexually immature female Japanese quail (*Coturnix coturnix japonica*).

Effect of glyphosate herbicide on acetylcholinesterase activity and metabolic and hematological parameters in piava (*Leporinus obtusidens*).

Effects of clomazone herbicide on hematological and some parameters of protein and carbohydrate metabolism of silver catfish *Rhamdia quelen*.

Adverse hepatic reactions associated with calcium carbimide and disulfiram therapy: is there still a role for these drugs?

Effects of antioxidant vitamins on molecular regulators involved in lung hypoplasia induced by nitrofen.

NTP Technical Report on the comparative toxicity studies of allyl acetate (CAS No. 591-87-7), allyl alcohol (CAS No. 107-18-6) and acrolein (CAS No. 107-02-8) administered by gavage to F344/N rats and B6C3F1 mice.

Acrolein is a mitochondrial toxin: effects on respiratory function and enzyme activities in isolated rat liver mitochondria.

Respiratory distress, pneumonic changes on chest X-ray, hypoxaemia, oral candidiasis in a homosexual male: not always *Pneumocystis carinii* pneumonia.

Effects of pentachlorophenol on the reproduction of Japanese medaka (*Oryzias latipes*).

Effects of paraquat on the freshwater fish *Channa punctata* (Bloch): non-enzymatic antioxidants as biomarkers of exposure.

Neuregulin 1-Beta cytoprotective role in AML 12 mouse hepatocytes exposed to pentachlorophenol.

Preexposure to copper modulates nonenzymatic antioxidants in liver of *Channa punctata* (Bloch) exposed to the herbicide paraquat.

Hydralazine inhibits rapid acrolein-induced protein oligomerization: role of aldehyde scavenging and adduct trapping in cross-link blocking and cytoprotection.

A crucial role of Nrf2 in in vivo defense against oxidative damage by an environmental pollutant, pentachlorophenol.

Methylated arsenicals: the implications of metabolism and carcinogenicity studies in rodents to human risk assessment.

Monomethylarsonic acid and dimethylarsinic acid: developmental toxicity studies with risk assessment.

Orphan nuclear receptor pregnane X receptor sensitizes oxidative stress responses in transgenic mice and cancerous cells.

Assessing the anti-estrogenic activity of sodium pentachlorophenol in primary cultures of juvenile goldfish (*Carassius auratus*) hepatocytes using vitellogenin as a biomarker.

Effects of atrazine on sexual maturation in female Japanese quail induced by photostimulation or exogenous gonadotropin.

Croton cajucara Benth. leaf extract scavenges the stable free radical DPPH and protects against oxidative stress induced by paraquat.

Decrease in NADPH-cytochrome P450 reductase activity of the human heart, Liver and lungs in the presence of alpha-lipoic acid.

Acute oxidative stress is associated with cell proliferation in the mouse liver.

Gene expression of cytokines and growth factors in the lungs after paraquat administration in mice.

Delayed occurrence of H-ras12V-induced hepatocellular carcinoma with long-term treatment with cinnamaldehydes.

Studies on the goitrogenic mechanism of action of N,N,N',N'-tetramethylthiourea.

Ethanol-induced apoptosis in polarized hepatic cells possibly through regulation of the Fas pathway.

Paraquat-induced lipid peroxidation: effects of ovariectomy and estrogen receptor antagonist.

Cytosolic and localized inhibition of phosphodiesterase by atrazine in swine tissue homogenates.

Identification of a metabolite of atrazine, N-ethyl-6-methoxy-N'-(1-methylethyl)-1,3,5-triazine-2,4-diamine, upon incubation with rat liver microsomes.

Involvement of endonuclease G in nucleosomal DNA fragmentation under sustained endogenous oxidative stress.

Induction and expression of GST-Pi foci in the liver of Cyclophosphamide-administered rats.

Developmental toxicity of 4-ring polycyclic aromatic hydrocarbons in zebrafish is differentially dependent on AH receptor isoforms and hepatic cytochrome P4501A metabolism.

Comparative toxicogenomic analysis of the hepatotoxic effects of TCDD in Sprague Dawley rats and C57BL/6 mice.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (Cas No. 31508-00-6) in female Harlan Sprague-Dawley rats (gavage studies).

Protective effects of tea melanin against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced toxicity: antioxidant activity and aryl hydrocarbon receptor suppressive effect.

Localization of cytochrome P450 1A1 in a specific region of hydronephrotic kidney of rat neonates lactationally exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Effect of adenovirus-mediated mutant exogenous P27kip1 gene expression on the chemosensitivities of cholangiocarcinoma cell line].

Carcinogenicity of "non-dioxinlike" polychlorinated biphenyls.

Comparison of chronic toxicity and carcinogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in 2-year bioassays in female Sprague-Dawley rats.

Carcinogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in experimental models.

Bifunctional modulating effects of an indigo dimer (bisindigotin) to CYP1A1 induction in H4IIE cells.

Arsenic inhibits induction of cytochrome P450 1A1 by 2,3,7,8-tetrachlorodibenzo-p-dioxin in human hepatoma cells.

Antimutagenic activity of methanolic extract of Ganoderma lucidum and its effect on hepatic damage caused by benzo[a]pyrene.

Use of a physiologically based pharmacokinetic model for rats to study the influence of body fat mass and induction of CYP1A2 on the pharmacokinetics of TCDD.

Ground-glass, polyglucosan-like hepatocellular inclusions: A "new" diagnostic entity.

PCB 153, a non-dioxin-like tumor promoter, selects for beta-catenin (Catnb)-mutated mouse liver tumors.

Quaternary benzo[c]phenanthridine alkaloids sanguinarine and chelerythrine do not affect transcriptional activity of aryl hydrocarbon receptor: analyses in rat hepatoma cell line H4IIE.luc.

Secreted protein-based reporter systems for monitoring inflammatory events: critical interference by endoplasmic reticulum stress.

Quantitative relationship of dioxin-responsive gene expression to dioxin response element in Hep3B and HepG2 human hepatocarcinoma cell lines.

Decreased nitric oxide production in the rat brain after chronic arsenic exposure.

Stress resistance and aging: influence of genes and nutrition.

Mechanisms of 2-butoxyethanol-induced hemangiosarcomas.

The constitutively active Ah receptor (CA-Ahr) mouse as a potential model for dioxin exposure--effects in vital organs.

Estimated cancer risk of dioxins to humans using a bioassay and physiologically based pharmacokinetic model.

For dioxin-induced birth defects, mouse or human CYP1A2 in maternal liver protects whereas mouse CYP1A1 and CYP1B1 are inconsequential.

HCV proteins increase expression of heme oxygenase-1 (HO-1) and decrease expression of Bach1 in human hepatoma cells.

Arsenic speciation transported through the placenta from mother mice to their newborn pups.

Lethal acute lung injury and hypoglycemia after subcutaneous administration of monochloroacetic acid.

Aryl hydrocarbon receptor-independent activation of estrogen receptor-dependent transcription by 3-methylcholanthrene.

Safe use of hazardous chemicals.

NTP technical report on the toxicology and carcinogenesis studies of 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (Gavage studies).

[Effects of MRP2-GSH cotransport system on hepatic arsenic metabolism in rats].

Relative cancer potencies of selected dioxin-like compounds on a body-burden basis: comparison to current toxic equivalency factors (TEFs).

Differential expression profiling of the hepatic proteome in a rat model of dioxin resistance: correlation with genomic and transcriptomic analyses.

Recommended relative potency factors for 2,3,4,7,8-pentachlorodibenzofuran: the impact of different dose metrics.

Chronic exposure to methylated arsenicals stimulates arsenic excretion pathways and induces arsenic tolerance in rat liver cells.

Assessment of effects in mink caused by consumption of carp collected from the Saginaw River, Michigan, USA.

Effect of *Centella asiatica* on arsenic induced oxidative stress and metal distribution in rats.

Microtubules are more stable and more highly acetylated in ethanol-treated hepatic cells.

Role of CYP3A4 in the regulation of the aryl hydrocarbon receptor by omeprazole sulphide.

In vivo-in vitro toxicogenomic comparison of TCDD-elicited gene expression in Hepa1c1c7 mouse hepatoma cells and C57BL/6 hepatic tissue.

Adverse health effects in humans exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

NTP technical report on the toxicology and carcinogenesis studies of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (CAS No. 1746-01-6) in female Harlan Sprague-Dawley rats (Gavage Studies).

Involvement of cytoskeleton in AhR-dependent CYP1A1 expression.

Protective effect of hepatocyte growth factor against degeneration of the retinal pigment epithelium and photoreceptor in sodium iodate-injected rats.

Quantitative analysis of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced proteome alterations in 5L rat hepatoma cells using isotope-coded protein labels.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induced cytochrome P450s alter the formation of reactive oxygen species in liver cells.

Therapeutic value of melatonin in an experimental model of liver injury and regeneration.

Uncertainties related to the assignment of a toxic equivalency factor for 1,2,3,4,6,7,8,9-octachlorodibenzo-p-dioxin.

Boron ameliorates fulminant hepatic failure by counteracting the changes associated with the oxidative stress.

[Rapid analysis of antiepileptic drugs in human plasma by micellar electrokinetic capillary chromatography].

Silybin and dehydrosilybin inhibit cytochrome P450 1A1 catalytic activity: a study in human keratinocytes and human hepatoma cells.

Global gene expression associated with hepatocarcinogenesis in adult male mice induced by in utero arsenic exposure.

Fatty liver and hepatic function for residents with markedly high serum PCDD/Fs levels in Taiwan.

Transactivation of fetal liver kinase-1/kinase-insert domain-containing receptor by lysophosphatidylcholine induces vascular endothelial cell proliferation.

Time-course changes of mixture effects on AhR binding-dependent luciferase activity in a crude extract from a compost sample.

Investigation of sanguinarine and chelerythrine effects on CYP1A1 expression and activity in human hepatoma cells.

Arsenic induced apoptosis in rat liver following repeated 60 days exposure.

Possible beneficial effects of melatonin supplementation on arsenic-induced oxidative stress in Wistar rats.

Polychlorinated biphenyls (PCBs): routes of exposure and effects on human health.

NTP toxicology and carcinogenesis studies of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (CAS No. 57465-28-8) in female Harlan Sprague-Dawley rats (Gavage Studies).

Arsenic-induced cell death in liver and brain of experimental rats.

The aryl hydrocarbon receptor directly regulates expression of the potent mitogen epiregulin.

Induction of cytochrome P450-1A by the equine estrogen equilenin, a new endogenous aryl hydrocarbon receptor ligand.

TCDD decreases ATP levels and increases reactive oxygen production through changes in mitochondrial F₀F₁-ATP synthase and ubiquinone.

Effect of EGF on [3H]-thymidine incorporation and cell cycle regulatory proteins in primary cultured chicken hepatocytes: Involvement of Ca²⁺/PKC and MAPKs.

Dihydroxy-, hydroxyspirolactone-, and dihydroxyspirolactone-urochlorins induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the liver of mice.

Hepatic gene downregulation following acute and subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Modeling inflammation-drug interactions in vitro: a rat Kupffer cell-hepatocyte coculture system.

Primary cultured cells as sensitive in vitro model for assessment of toxicants--comparison to hepatocytes and gill epithelia.

cis-Terpenones as an effective chemopreventive agent against aflatoxin B1-induced cytotoxicity and TCDD-induced P450 1A/B activity in HepG2 cells.

Influx of macrophages into livers of rats treated with hepatotoxicants (thioacetamide, allyl alcohol, D-galactosamine) induces expression of HSP25.

Exposure to 3,3',4,4',5-pentachlorobiphenyl during embryonic development has a minimal effect on the cytochrome P4501A response to 2,3,7,8-tetrachlorodibenzo-p-dioxin in cultured chicken embryo hepatocytes.

Liver glycogen bodies: ground-glass hepatocytes in transplanted patients.

Metabolism of dopamine by the nasal mucosa.

Involvement of oxidative stress in the synthesis of metallothionein induced by mitochondrial inhibitors.

Differential regulation of sinusoidal and canalicular hepatic drug transporter expression by xenobiotics activating drug-sensing receptors in primary human hepatocytes.

EGF-induced inhibition of glucose transport is mediated by PKC and MAPK signal pathways in primary cultured chicken hepatocytes.

Evaluation of the sensitivity of three sublethal cytotoxicity assays in human HepG2 cell line using water contaminants.

Exposure to PCB 77 induces tissue-dependent changes in iodothyronine deiodinase activity patterns in the embryonic chicken.

Arsenite induces apoptosis in hepatocytes through an enhancement of the activation of Jun N-terminal kinase and p38 mitogen-activated protein kinase caused by partial hepatectomy.

Cytotoxicity of sanguinarine in primary rat hepatocytes is attenuated by dioxin and phenobarbital.

Protective effect of NADP-isocitrate dehydrogenase on the paraquat-mediated oxidative inactivation of aconitase in heart mitochondria.

Toxicology and carcinogenesis studies of a mixture of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (Cas No. 1746-01-6), 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4), and 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) in female Harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4) in female Harlan Sprague-Dawley rats (gavage studies).

Effect of sodium azide on the metabolic activity of cultured fetal cells.

Aldehydes release zinc from proteins. A pathway from oxidative stress/lipid peroxidation to cellular functions of zinc.

Regulation of the CYP1A1 gene by 2,3,7,8-tetrachlorodibenzo-p-dioxin but not by beta-naphthoflavone or 3-methylcholanthrene is altered in hepatitis C virus replicon-expressing cells.

Effects of xenobiotics and steroids on renal and hepatic estrogen metabolism in lake trout.

Effects of individual and combined exposure to sodium arsenite and sodium fluoride on tissue oxidative stress, arsenic and fluoride levels in male mice.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (gavage studies).

Effects of hypoxia and limited diffusion in tumor cell microenvironment on bystander effect of P450 prodrug therapy.

Selection of a battery of rapid toxicity sensors for drinking water evaluation.

Arsenicals in maternal and fetal mouse tissues after gestational exposure to arsenite.

Influence of antimonite, selenite, and mercury on the toxicity of arsenite in primary rat hepatocytes.

Gene expression profile by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the liver of wild-type (AhR+/+) and aryl hydrocarbon receptor-deficient (AhR-/-) mice.

Nonezymatic formation of succinate in mitochondria under oxidative stress.

Sustained aryl hydrocarbon receptor activity attenuates liver regeneration.

Enhanced xenobiotic-induced hepatotoxicity and Kupffer cell activation by restraint-induced stress.

Antagonism of TCDD-induced ethoxyresorufin-O-deethylation activity by polybrominated diphenyl ethers (PBDEs) in primary cynomolgus monkey (*Macaca fascicularis*) hepatocytes.

Kinetics of arsenic methylation by freshly isolated B6C3F1 mouse hepatocytes.

Brief report: embryonic growth and hatching implications of developmental 670-nm phototherapy and dioxin co-exposure.

Dietary exposure of mink (*Mustela vison*) to fish from the Housatonic River, Berkshire County, Massachusetts, USA: effects on organ weights and histology and hepatic concentrations of polychlorinated biphenyls and 2,3,7,8-tetrachlorodibenzo-P-dioxin toxic equivalence.

Identification of new human pregnane X receptor ligands among pesticides using a stable reporter cell system.

Novel compound 2-methyl-2H-pyrazole-3-carboxylic acid (2-methyl-4-o-tolylazo-phenyl)-amide (CH-223191) prevents 2,3,7,8-TCDD-induced toxicity by antagonizing the aryl hydrocarbon receptor.

Tissue specific induction of cytochrome P450 (CYP) 1A1 and 1B1 in rat liver and lung following in vitro (tissue slice) and in vivo exposure to benzo(a)pyrene.

Reactive nitrogen species derived activation of rat liver microsomal glutathione S-transferase.

Enhancing effects of simultaneous treatment with sodium nitrite on 2-amino-3-methylimidazo[4,5-f]quinoline-induced rat liver, colon and Zymbal's gland carcinogenesis after initiation with diethylnitrosamine and 1,2-dimethylhydrazine.

A toxicokinetic model for the carry-over of dioxins and PCBs from feed and soil to eggs.

Inhibitory effect of melatonin on diquat-induced lipid peroxidation in vivo as assessed by the measurement of F2-isoprostanes.

The effect of ethanol, ethanol metabolizing enzyme inhibitors, and Vitamin E on regulating glutathione, glutathione S-transferase, and S-adenosylmethionine in mouse primary hepatocyte.

Toxicokinetic study of dioxins and furans in laying chickens.

Comparison of mouse hepatic mitochondrial versus microsomal cytochromes P450 following TCDD treatment.

Protective effect of *Phyllanthus fraternus* against allyl alcohol-induced oxidative stress in liver mitochondria.

Analytical methods for trace levels of reactive carbonyl compounds formed in lipid peroxidation systems.

Regeneration of the liver in mice treated with a mixture of hepatotoxins in delayed periods after bone marrow transplantation.

Effect of a single in ovo injection of 2,3,7,8-tetrachlorodibenzo-p-dioxin on protein expression in liver and ovary of the one-day-old chick analyzed by fluorescent two-dimensional difference gel electrophoresis and mass spectrometry.

Inhibition of follicular development, vitellogenesis, and serum 17 β -estradiol concentrations in zebrafish following chronic, sublethal dietary exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Preferential inducibility of CYP1A1 and CYP1A2 by TCDD: differential regulation in primary human hepatocytes versus transformed human cells.

Comparison of hepatic and extra hepatic induction of cytochrome P4501A by graded doses of aryl hydrocarbon receptor agonists in Atlantic tomcod from two populations.

Beta-naphthoflavone represses dystrophin Dp71 expression in hepatic cells.

Cytochrome P450 Cyp4x1 is a major P450 protein in mouse brain.

Sunlight generates multiple tryptophan photoproducts eliciting high efficacy CYP1A induction in chick hepatocytes and in vivo.

Influence of orange juice in the levels and in the genotoxicity of iron and copper.

The ROS production induced by a reverse-electron flux at respiratory-chain complex 1 is hampered by metformin.

Induction of cytochrome P4501A in African brown house snake (*Lamprophis fuliginosus*) primary hepatocytes.

Gene expression profiling in common cormorant liver with an oligo array: assessing the potential toxic effects of environmental contaminants.

Interactive effects between CYP1A1 genotypes and environmental polychlorinated dibenzo-p-dioxins and dibenzofurans exposures on liver function profile.

Dynamic gene expression changes precede dioxin-induced liver pathogenesis in medaka fish.

The Relationship Between Noncoplanar PCB-Induced Immunotoxicity and Hepatic CYP1A Induction in a Fish Model.

Environmental toxicants and effects on female reproductive function.

Enhanced functional maturation of fetal porcine hepatocytes in three-dimensional poly-L-lactic acid scaffolds: a culture condition suitable for engineered liver tissues in large-scale animal studies.

670 nanometer light treatment attenuates dioxin toxicity in the developing chick embryo.

Co-administration of zinc and n-acetylcysteine prevents arsenic-induced tissue oxidative stress in male rats.

Mechanistic investigation on the cause for reduced toxicity of TCDD in wa-1 homozygous TGFalpha mutant strain of mice as compared its matching wild-type counterpart, C57BL/6J mice.

Biliary excretion of sulfated bile acids and organic anions in zone 1- and zone 3-injured rats.

CYP2A5-mediated activation and early ultrastructural changes in the olfactory mucosa: studies on 2,6-dichlorophenyl methylsulfone.

[Carbimide overdose: description of a case and review of the literature].

Comparative effects of the Roundup and glyphosate on mitochondrial oxidative phosphorylation.

Differences in lysine adduction by acrolein and methyl vinyl ketone: implications for cytotoxicity in cultured hepatocytes.

Antioxidant and hepatoprotective effects of Eucalyptus maculata.

Effect of 2,4-dichlorophenoxyacetic acid on the activities of some metabolic enzymes for generating pyridine nucleotide pool of cells from mouse liver.

High blood pressure is one of the symptoms of paraquat-induced toxicity in rats.

Activity of NADPH-cytochrome P-450 reductase of the human heart, liver and lungs in the presence of (-)-epigallocatechin gallate, quercetin and resveratrol: an in vitro study.

Preventive mechanism of cellular glutathione in monomethylarsonic acid-induced cytolethality.

Altered gene expression in human hepatoma HepG2 cells exposed to low-level 2,4-dichlorophenoxyacetic acid and potassium nitrate.

The comparative toxicology of 4-chloro-2-methylphenoxyacetic acid and its plant metabolite 4-chloro-2-carboxyphenoxyacetic acid in rats.

Effect of the herbicide glyphosate on liver lipoperoxidation in pregnant rats and their fetuses.

Drug-induced hypersensitivity syndrome due to cyanamide associated with multiple reactivation of human herpesviruses.

Lack of combination hepatocarcinogenicity of harman, norharman and amitrole when given with NaNO₂ in the rat.

Hepatic porphyria induced by the herbicide tralkoxydim in small mammals is species-specific.

Mother and fetus both survive from severe paraquat intoxication.

Chemopreventive properties of trans-resveratrol against the cytotoxicity of chloroacetanilide herbicides in vitro.

Arsenic-induced micronuclei formation in mammalian cells and its counteraction by tea.

Responses of molecular indicators of exposure in mesocosms: common carp (*Cyprinus carpio*) exposed to the herbicides alachlor and atrazine.

Long-lived alphaMUPA transgenic mice show reduced SOD2 expression, enhanced apoptosis and reduced susceptibility to the carcinogen dimethylhydrazine.

Protein adduct species in muscle and liver of rats following acute ethanol administration.

Forced uptake of trivalent and pentavalent methylated and inorganic arsenic and its cyto-/genotoxicity in fibroblasts and hepatoma cells.

Cinnamaldehyde-induced apoptosis in human PLC/PRF/5 cells through activation of the proapoptotic Bcl-2 family proteins and MAPK pathway.

Expression of gastrointestinal glutathione peroxidase is inversely correlated to the presence of hepatitis C virus subgenomic RNA in human liver cells.

Adaptive response of antioxidant enzymes to catalase inhibition by aminotriazole in goldfish liver and kidney.

The decrease in level of serum thyroxine by 2,2',4,5,5'-pentachlorobiphenyl in rats and mice: no correlation with formation of methylsulfonyl metabolites.

Protective effect of melatonin on paraquat-induced cytotoxicity in isolated rat hepatocytes.

Effect of ascorbate on acrolein modification of very low density lipoprotein and uptake of oxidized apolipoprotein e by hepatocytes.

Application of Alamar blue/5-carboxyfluorescein diacetate acetoxyethyl ester as a noninvasive cell viability assay in primary hepatocytes from rainbow trout.

Tissue distribution and urinary excretion of inorganic arsenic and its methylated metabolites in mice following acute oral administration of arsenate.

Primary hepatocyte apoptosis is unlikely to relate to caspase-3 activity under sustained endogenous oxidative stress.

Tissue distribution of arsenic species in rabbits after single and multiple parenteral administration of arsenic trioxide: tissue accumulation and the reversibility after washout are tissue-selective.

Influence of protein binding on acrolein turnover in vitro by oxazaphosphorines and liver microsomes.

Uncoupling of oxidative phosphorylation prevents the urinary alcohol level cycling caused by feeding ethanol continuously at a constant rate.

Inhibitory effects of vitamin A on TCDD-induced cytochrome P-450 1A1 enzyme activity and expression.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and 1,2,3,4,7,8-hexachlorodibenzo-p-dioxin (HxCDD) alter body weight by decreasing insulin-like growth factor I (IGF-I) signaling.

Suppressive effects of caraway (*Carum carvi*) extracts on 2, 3, 7, 8-tetrachloro-dibenzo-p-dioxin-dependent gene expression of cytochrome P450 1A1 in the rat H4IIE cells.

Identification of aldehyde oxidase 1 and aldehyde oxidase homologue 1 as dioxin-inducible genes.

Transcriptional activation of the membrane-bound progesterone receptor (mPR) by dioxin, in endocrine-responsive tissues.

Portal hypertension: the role of shunting procedures.

Auditory neurotoxicity and hepatotoxicity after MSMA (monosodium methanarsenate) high dose oral intake.

Pediatric fatality following ingestion of dinitrophenol: postmortem identification of a "dietary supplement".

Classification of proliferative hepatocellular lesions in harlan sprague-dawley rats chronically exposed to dioxin-like compounds.

Quantitative analysis of cereulide, an emetic toxin of *Bacillus cereus*, by using rat liver mitochondria.

Dose-additive carcinogenicity of a defined mixture of "dioxin-like compounds".

A beta-catenin-dependent pathway regulates expression of cytochrome P450 isoforms in mouse liver tumors.

Regulation of aryl hydrocarbon receptor signal transduction by protein tyrosine kinases.

Lack of CYP1A1 expression is involved in unresponsiveness of the human hepatoma cell line SK-HEP-1 to dioxin.

Effects of dietary zinc and iron supplementation on mineral excretion, body composition, and mineral status of nursery pigs.

Regulatory mechanisms modulating the expression of cytochrome P450 1A1 gene by heavy metals.

Severe cyanide toxicity from 'vitamin supplements'.

Carcinogenic risks of dioxin: mechanistic considerations.

Retinoid status and responsiveness to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice lacking retinoid binding protein or retinoid receptor forms.

Induction of the heat shock response in vivo inhibits NF-kappaB activity and protects murine liver from endotoxemia-induced injury.

A histochemical and pathological study on the interrelationship between TCDD-induced AhR expression, AhR activation, and hepatotoxicity in mice.

Repeated in utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure affects male gonads in offspring, leading to sex ratio changes in F2 progeny.

Bone resorption by aryl hydrocarbon receptor-expressing osteoclasts is not disturbed by TCDD in short-term cultures.

Aryl hydrocarbon receptor-mediated transcription: ligand-dependent recruitment of estrogen receptor alpha to 2,3,7,8-tetrachlorodibenzo-p-dioxin-responsive promoters.

NF-kappaB and not the MAPK signaling pathway regulates GADD45beta expression during acute inflammation.

Common viral infection affects pentabrominated diphenyl ether (PBDE) distribution and metabolic and hormonal activities in mice.

Temporal and dose-dependent hepatic gene expression patterns in mice provide new insights into TCDD-Mediated hepatotoxicity.

Identification of the tryptophan photoproduct 6-formylindolo[3,2-b]carbazole, in cell culture medium, as a factor that controls the background aryl hydrocarbon receptor activity.

Transcriptional regulation of NF-E2 p45-related factor (NRF2) expression by the aryl hydrocarbon receptor-xenobiotic response element signaling pathway: direct cross-talk between phase I and II drug-metabolizing enzymes.

Ah receptor- and TCDD-mediated liver tumor promotion: clonal selection and expansion of cells evading growth arrest and apoptosis.

[Possible candidates for the compound which is expected to attenuate dioxin toxicity].

Dioxin: a review of its environmental effects and its aryl hydrocarbon receptor biology.

Chronic toxicity and carcinogenicity of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin displays a distinct dose/time toxicity threshold ($c \times t = k$) and a life-prolonging subthreshold effect.

Increased heat shock protein 70 expression following toxicant-mediated cytotoxicity: a ubiquitous marker of toxicant exposure?

Detection and precipitation of hepatitis B core antigen using a fusion bacteriophage.

Kupffer cell ablation improves hepatic microcirculation after trauma and sepsis.

Bisindigotin, a TCDD antagonist from the Chinese medicinal herb *Isatis indigotica*.

Squamous epithelial lesion of the mandibles and maxillae of wild mink (*Mustela vison*) naturally exposed to polychlorinated biphenyls.

Prospective protective role of melatonin against arsenic-induced metabolic toxicity in Wistar rats.

Aryl hydrocarbon receptor-dependent liver development and hepatotoxicity are mediated by different cell types.

How does human stem cell therapy influence gene expression after liver injury? Microarray evaluation on a rat model.

Induction of cytochrome P450 1A5 mRNA, protein and enzymatic activities by dioxin-like compounds, and congener-specific metabolism and sequestration in the liver of wild jungle crow (*Corvus macrorhynchos*) from Tokyo, Japan.

Bioactivation of 4-methylphenol (p-cresol) via cytochrome P450-mediated aromatic oxidation in human liver microsomes.

An assessment of the toxicological significance of anthropogenic contaminants in Canadian arctic wildlife.

Organochlorine compounds in liver and concentrations of vitellogenin and 17beta-estradiol in plasma of sea bass fed with a commercial or with a natural diet.

Activation of rat liver microsomal glutathione S-transferase by gallic acid.

A possible restriction of ferro- and ferricyanide oxidoreductase activities of rat liver mitochondria by the outer membrane.

Tissue-specific, inducible, and hormonal control of the human UDP-glucuronosyltransferase-1 (UGT1) locus.

Sodium arsenite-induced inhibition of eukaryotic translation initiation factor 4E (eIF4E) results in cytotoxicity and cell death.

Thyroid-hormone-disrupting chemicals: evidence for dose-dependent additivity or synergism.

Differential inhibitory effect of long-chain acyl-CoA esters on succinate and glutamate transport into rat liver mitochondria and its possible implications for long-chain fatty acid oxidation defects.

Dose-dependent liver regeneration in chloroform, trichloroethylene and allyl alcohol ternary mixture hepatotoxicity in rats.

Effect-directed analysis of mutagens and ethoxyresorufin-o-deethylase inducers in aquatic sediments.

Comparison of the cytotoxicity of the MEIC reference chemicals measured in protein free and in complete culture medium.

Comparison of TCDD and PCB CYP1A induction sensitivities in fresh hepatocytes from human donors, sprague-dawley rats, and rhesus monkeys and HepG2 cells.

Electron paramagnetic resonance investigation of in vivo free radical formation and oxidative stress induced by 2,4-dichlorophenol in the freshwater fish *Carassius auratus*.

Effects of iron supplementation on binding activity of iron regulatory proteins and the subsequent effect on growth performance and indices of hematological and mineral status of young pigs.

Current and emerging challenges in toxicopathology: carcinogenic threshold of phenobarbital and proof of arsenic carcinogenicity using rat medium-term bioassays for carcinogens.

Sulfonation of environmental chemicals and their metabolites in the polar bear (*Ursus maritimus*).

Regulation of mouse organic anion-transporting polypeptides (Oatps) in liver by prototypical microsomal enzyme inducers that activate distinct transcription factor pathways.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) alters the mRNA expression of critical genes associated with cholesterol metabolism, bile acid biosynthesis, and bile transport in rat liver: a microarray study.

Concentrations and hazard assessment of polychlorinated biphenyls and organochlorine pesticides in shark liver from the Mediterranean Sea.

The dioxin-like PCB 77 but not the ortho-substituted PCB 153 interferes with chicken embryo thyroid hormone homeostasis and delays hatching.

EROD induction and PCDD/F levels in fish liver from the Biobio River in Chile.

Evaluation of mutagenic and antimutagenic activities of alpha-bisabolol in the Salmonella/microsome assay.

Altered retinoid metabolism in female Long-Evans and Han/Wistar rats following long-term 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treatment.

Comparison of murine cirrhosis models induced by hepatotoxin administration and common bile duct ligation.

Glutathione redox state regulates mitochondrial reactive oxygen production.

Human cordonal stem cell intraperitoneal injection can represent a rescue therapy after an acute hepatic damage in immunocompetent rats.

Improvement of mortality rate and decrease in histologic hepatic injury after human cord blood stem cell infusion in a murine model of hepatotoxicity.

Aryl hydrocarbon receptor (AHR) and AHR nuclear translocator (ARNT) expression in Baikal seal (*Pusa sibirica*) and association with 2,3,7,8-TCDD toxic equivalents and CYP1 expression levels.

Plasma protein level changes in waste incineration workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Concentrations of persistent organochlorine contaminants in bowhead whale tissues and other biota from northern Alaska: implications for human exposure from a subsistence diet.

Induction of the multidrug resistance-associated protein family of transporters by chemical activators of receptor-mediated pathways in mouse liver.

Induction of ethoxy-resorufin-O-deethylase activity by halogenated aromatic hydrocarbons and polycyclic aromatic hydrocarbons in primary hepatocytes of the green frog (*Rana esculenta*).

Microplates with integrated oxygen sensors for kinetic cell respiration measurement and cytotoxicity testing in primary and secondary cell lines.

Glutathione conjugates of 4-hydroxy-2(E)-nonenal as biomarkers of hepatic oxidative stress-induced lipid peroxidation in rats.

Hepatic CYP1A induction by dioxin-like compounds, and congener-specific metabolism and sequestration in wild common cormorants from Lake Biwa, Japan.

Effects of redox cycling compounds on DT diaphorase activity in the liver of rainbow trout (*Oncorhynchus mykiss*).

[Free radical generation and lipid peroxidation induced by 2,4-dichlorophenol in liver of *Carassius auratus*].

Bcl-2 gene family expression in the brain of rat offspring after gestational and lactational dioxin exposure.

Altered thyroxin and retinoid metabolic response to 2,3,7,8-tetrachlorodibenzo-p-dioxin in aryl hydrocarbon receptor-null mice.

Analysis of UNEP priority POPs using HRGC-HRMS and their contamination profiles in livers and eggs of great cormorants (*Phalacrocorax carbo*) from Japan.

Aspects of dioxin toxicity are mediated by interleukin 1-like cytokines.

Tetrachlorodibenzo-p-Dioxin (TCDD) Inhibits Differentiation and Increases Apoptotic Cell Death of Precursor T-Cells in the Fetal Mouse Thymus.

[Evaluation of the iron bioavailability from meals prepared with lentil (*Lens esculenta*) or with white kidney bean seeds (*Phaseolus vulgaris*) in anemic rats].

[Differentiation of bone marrow derived Thy-1+ beta2M- cells into liver cells in AA induced liver injury micro-environment].

Thyroid lesions and dioxin accumulation in the livers of jungle crows (*Corvus macrorhynchos*) in urban and suburban Tokyo.

Effect of *Chlorella pyrenoidosa* on fecal excretion and liver accumulation of polychlorinated dibenzo-p-dioxin in mice.

The effects of gestational arsenic exposure and dietary selenium deficiency on selenium and selenoenzymes in maternal and fetal tissues in mice.

Proteomic characterization of rat liver exposed to 2,3,7,8-tetrachlorobenzo-p-dioxin.

Characterization of the metabolic interaction between trihalomethanes and chloroacetic acids using rat liver microsomes.

Optimisation of the coupled monoclonal antibody density for recombinant hepatitis B virus surface antigen immunopurification.

Phase I study of MetXia-P450 gene therapy and oral cyclophosphamide for patients with advanced breast cancer or melanoma.

Natural furocoumarins as inducers and inhibitors of cytochrome P450 1A1 in rat hepatocytes.

[Differentiation of rat bone marrow derived Thy-1+ beta2M- cells into hepatocytes].

Monochloroacetic acid inhibits liver gluconeogenesis by inactivating glyceraldehyde-3-phosphate dehydrogenase.

Attenuation of cyclosporine A toxicity by sublethal heat shock. Role of catalase.

Differential signatures of protein expression in marmoset liver and thymus induced by single-dose TCDD treatment.

In vitro System for Assessing Dioxin Absorption by Intestinal Epithelial Cells and for Preventing this Absorption by Food Substances.

Studies of the toxicological potential of tripeptides (L-valyl-L-prolyl-L-proline and L-isoleucyl-L-prolyl-L-proline): IX. Evaluation of the mutagenic potential of synthesized L-valyl-L-prolyl-L-proline in the Salmonella-Escherichia coli/microsome, incorporation assay.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on vitamin A metabolism in mice.

Effects of N-acetylcysteine, quercetin, and phytic acid on spontaneous hepatic and renal lesions in LEC rats.

Effect of silybin and its glycosides on the expression of cytochromes P450 1A2 and 3A4 in primary cultures of human hepatocytes.

Tissue repair: an important determinant of final outcome of toxicant-induced injury.

Hepatocyte-targeted nuclear imaging using ^{99m}Tc-galactosylated chitosan: conjugation, targeting, and biodistribution.

Aryl hydrocarbon receptor-activating polychlorinated biphenyls and their hydroxylated metabolites induce cell proliferation in contact-inhibited rat liver epithelial cells.

Concentration-dependent TCDD elimination kinetics in humans: toxicokinetic modeling for moderately to highly exposed adults from Seveso, Italy, and Vienna, Austria, and impact on dose estimates for the NIOSH cohort.

The transcriptional response to a peroxisome proliferator-activated receptor alpha agonist includes increased expression of proteome maintenance genes.

A comparative study of plant and animal mitochondria exposed to paraquat reveals that hydrogen peroxide is not related to the observed toxicity.

The effects of sub-chronic exposure of Wistar rats to the herbicide Glyphosate-Biocarb.

Reactivity of hydrazinophthalazine drugs with the lipid peroxidation products acrolein and crotonaldehyde.

Effects of long-term exposure of the red swamp crawfish *Procambarus clarkii* to a mixture of two herbicides, 2,4-dichlorophenoxyacetic acid and monosodium methanearsonate, and associated human health risks.

Mitogenic and cytotoxic effects of pentachlorophenol to AML 12 mouse hepatocytes.

Pentachlorophenol-induced cytotoxic, mitogenic, and endocrine-disrupting activities in channel catfish, *Ictalurus punctatus*.

Severe acute hepatitis in a burns patient.

Strong protein adduct trapping accompanies abolition of acrolein-mediated hepatotoxicity by hydralazine in mice.

Chlorpropham induces mitochondrial dysfunction in rat hepatocytes.

Biokinetics and subchronic toxic effects of oral arsenite, arsenate, monomethylarsonic acid, and dimethylarsinic acid in v-Ha-ras transgenic (Tg.AC) mice.

Role of glutathione in dimethylarsinic acid-induced apoptosis.

Metallothionein (I/II) suppresses genotoxicity caused by dimethylarsinic acid.

Chromosomal aberrations, micronuclei and nuclear buds induced in human lymphocytes by 2,4-dichlorophenoxyacetic acid pesticide formulation.

Comparison of anti-androgenic activity of flutamide, vinclozolin, procymidone, linuron, and p, p'-DDE in rodent 10-day Hershberger assay.

Itraconazole-induced acute hepatitis in an agricultural worker: susceptibility or drug interaction?

Detoxication of the environmental pollutant acrolein by a rat liver aldo-keto reductase.

Biotransformation of chlorpropham (CIPC) in isolated rat hepatocytes and xenoestrogenic activity of CIPC and its metabolites by in vitro assays.

The effect of estradiol on the oxidative damage and trace element level determined in the liver of rats treated with dimethylarsinic acid.

Catalase transgenic mice: characterization and sensitivity to oxidative stress.

NTP toxicology and carcinogenesis studies of trans-cinnamaldehyde (CAS No. 14371-10-9) in F344/N rats and B6C3F1 mice (feed studies).

15-deoxy prostaglandin J2 enhances allyl alcohol-induced toxicity in rat hepatocytes.

Foetal rat lung epithelial (FRLE) cells: partial characterisation and response to pneumotoxins.

Multiple medical problems following agent orange exposure.

Glyphosate poisoning.

Genotoxicity evaluation of pesticide formulations containing alachlor and atrazine in multiple mouse tissues (blood, kidney, liver, bone marrow, spleen) by comet assay.

Protective role of metallothionein (I/II) against pathological damage and apoptosis induced by dimethylarsinic acid.

Activities of UDP-glucuronyltransferase, beta-glucuronidase and deiodinase types I and II in hyper- and hypothyroid rats.

Protein adduct-trapping by hydrazinophthalazine drugs: mechanisms of cytoprotection against acrolein-mediated toxicity.

Resistance of mitochondrial DNA-depleted cells against cell death: role of mitochondrial superoxide dismutase.

Acetaldehyde accumulation suppresses Kupffer cell release of TNF-Alpha and modifies acute hepatic inflammation in rats.

Transgenic mice overexpressing glutathione peroxidase 4 are protected against oxidative stress-induced apoptosis.

Identification and functional assessment of the novel murine organic anion transporter Oat5 (Slc22a19) expressed in kidney.

Absorption, distribution, metabolism and excretion of 4-chloro-2-methylphenoxyacetic acid (MCPA) in rats.

DRESSA: biosensing of dioxin and dioxin-like chemicals using secreted alkaline phosphatase.

Potent inhibition of recombinant human cytochrome p-450 1A1 by pentamethoxystilbene.

Effects of polybrominated diphenyl ethers on basal and TCDD-induced ethoxyresorufin activity and cytochrome P450-1A1 expression in MCF-7, HepG2, and H4IIE cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces suppressor of cytokine signaling 2 in murine B cells.

Lack of antagonism of 2,3,7,8-tetrachlorodibenzo-p-dioxin's (TCDDs) induction of cytochrome P4501A1 (CYP1A1) by the putative selective aryl hydrocarbon receptor modulator 6-alkyl-1,3,8-trichlorodibenzofuran (6-MCDF) in the mouse hepatoma cell line Hepa-1c1c7.

Transforming growth factor-beta 1-induced apoptosis is blocked by beta 1-integrin-mediated mitogen-activated protein kinase activation in human hepatoma cells.

Determination of dioxin and dioxin-like compounds in sediments from UK estuaries using a bio-analytical approach: chemical-activated luciferase expression (CALUX) assay.

Iron absorption by heterozygous carriers of the HFE C282Y mutation associated with hemochromatosis.

Liver portal fibrosis in dioxin receptor-null mice that overexpress the latent transforming growth factor-beta-binding protein-1.

Modulation of aryl hydrocarbon receptor-regulated gene expression by arsenite, cadmium, and chromium.

Evaluation of mixture effects in a crude extract of compost using the CALUX bioassay and HPLC fractionation.

Microarray analysis of gene regulation in the Hepa1c1c7 cell line following exposure to the DNA methylation inhibitor 5-aza-2'-deoxycytidine and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Inhibition of the MEK-1/p42 MAP kinase reduces aryl hydrocarbon receptor-DNA interactions.

Protective activity of hesperidin and lipoic acid against sodium arsenite acute toxicity in mice.

Protective effects of vitamin A and vitamin E succinate against 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced body wasting, hepatomegaly, thymic atrophy, production of reactive oxygen species and DNA damage in C57BL/6J mice.

Reduction of the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in mice using an antiulcer drug, geranylgeranylacetone.

Differential effects of mercury, lead and copper on the constitutive and inducible expression of aryl hydrocarbon receptor (AHR)-regulated genes in cultured hepatoma Hepa 1c1c7 cells.

Chronic inorganic arsenic exposure induces hepatic global and individual gene hypomethylation: implications for arsenic hepatocarcinogenesis.

Molecular mechanisms of alcoholic fatty liver: role of sterol regulatory element-binding proteins.

[Synthesis and antitumor activity of 20-O-linked camptothecin ester derivatives].

Suppression of CYP1A1 expression by naringenin in murine Hepa-1c1c7 cells.

[Toxic effect of arsenite on the expression of liver multidrug resistance-associated protein 2 in rat].

Animal models for arsenic carcinogenesis: inorganic arsenic is a transplacental carcinogen in mice.

Understanding arsenic carcinogenicity by the use of animal models.

Development of an oral cancer slope factor for Aroclor 1268.

The topical application of 2,3,7,8-tetrachlorodibenzo-p-dioxin lacks skin tumor-promoting potency but induces hepatic injury and tumor necrosis factor-alpha expression in ICR male mice.

Flow cytometric methods used as screening tests for basal toxicity of chemicals.

Mechanism of hepatic insulin resistance in non-alcoholic fatty liver disease.

A constitutively active dioxin/aryl hydrocarbon receptor promotes hepatocarcinogenesis in mice.

Aromatic hydrocarbon receptor status in the metabolism of xenobiotics under normal and pathophysiological conditions.

Associations between organochlorine contaminant concentrations and clinical health parameters in loggerhead sea turtles from North Carolina, USA.

The relationship of diaphragmatic defect, liver growth, and lung hypoplasia in nitrofen-induced congenital diaphragmatic hernia in the rat.

Waste wood recycling as animal bedding and development of bio-monitoring tool using the CALUX assay.

Effects of cyclooxygenase-2 antisense vector on proliferation of human cholangiocarcinoma cells.

Independent actions on cyclin-dependent kinases and aryl hydrocarbon receptor mediate the antiproliferative effects of indirubins.

Mechanisms underlying arsenic carcinogenesis: hypersensitivity of mice exposed to inorganic arsenic during gestation.

NTP toxicology and carcinogenesis studies of triethanolamine (Cas No. 102-71-6) in B6C3F1 mice (dermal studies).

Protective effect of N-acetylcysteine against arsenic-induced depletion in vivo of carbohydrate.

Cyp1a1(-/-) male mice: protection against high-dose TCDD-induced lethality and wasting syndrome, and resistance to intrahepatocyte lipid accumulation and uroporphyrin.

Protective effect of methionine supplementation on arsenic-induced alteration of glucose homeostasis.

Patent ductus venosus and dioxin resistance in mice harboring a hypomorphic Arnt allele.

First evidence of endocrine disruption in feral carp from the Ebro River.

Role of mediator in transcriptional activation by the aryl hydrocarbon receptor.

Oxygen-regulated expression of the RNA-binding proteins RBM3 and CIRP by a HIF-1-independent mechanism.

Polychlorinated biphenyl and organochlorine pesticide residues in *Lophius budegassa* from the Mediterranean Sea (Italy).

Association of liver hemangiosarcoma and secondary iron overload in B6C3F1 mice--the National Toxicology Program experience.

Histological and lipid peroxidation changes after administration of 2-acetylaminofluorene in a rat liver injury model following selective periportal and pericentral damage.

Tissue-specific effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the activity of 5'-deiodinases I and II in rats.

Modulation of AhR-mediated CYP1A1 mRNA and EROD activities by 17beta-estradiol and dexamethasone in TCDD-induced H411E cells.

Intra-strain dioxin sensitivity and morphometric effects in swim-up rainbow trout (*Oncorhynchus mykiss*).

Sleep deprivation and cellular responses to oxidative stress.

Preferential transcription of rabbit Aldh1a1 in the cornea: implication of hypoxia-related pathways.

Toxicogenomic analysis of aberrant gene expression in liver tumors and nontumorous livers of adult mice exposed in utero to inorganic arsenic.

Assessment system for dioxin absorption in the small intestine and prevention of its absorption by food factors.

Anthocyan does not suppress transformation of aryl hydrocarbon receptor induced by dioxin.

[Severe toxic liver failure after acute poisoning with paracetamol, ferrous sulphate and naproxen].

Combined devascularization and proximal splenorenal shunt: is this a better option than either procedure alone?

Comparison of recombinant cell bioassays for the detection of Ah receptor agonists.

The H4IIE cell bioassay as an indicator of dioxin-like chemicals in wildlife and the environment.

The drug salicylamide is an antagonist of the aryl hydrocarbon receptor that inhibits signal transduction induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Immunohistochemical detection of activated caspases in apoptotic hepatocytes in rat liver.

Nitrofen-induced congenital diaphragmatic hernia in rat embryo: what model?

Induction of tumors of the liver, lung, ovary and adrenal in adult mice after brief maternal gestational exposure to inorganic arsenic: promotional effects of postnatal phorbol ester exposure on hepatic and pulmonary, but not dermal cancers.

Comparison of risk assessment methodologies for exposure of mink to PCBs on the Kalamazoo River, Michigan.

Antioxidant activity and neuroprotective effects of zolpidem and several synthesis intermediates.

Modulation of the hepatic CYP1A1 system in the marine fish *Gobius niger*, exposed to xenobiotic compounds.

Comparative uterine gene expression analysis after dioxin and estradiol administration.

Gestational exposure of Ahr and Arnt hypomorphs to dioxin rescues vascular development.

Liver regeneration: a critical toxicodynamic response in predictive toxicology.

Subchronic exposure to TCDD, PeCDF, PCB126, and PCB153: effect on hepatic gene expression.

Down regulation of hepatic PPARalpha function by AhR ligand.

Strain-specific of alachlor on murine olfactory mucosal responses.

Effects of dietary iron supplementation on growth performance, hematological status, and whole-body mineral concentrations of nursery pigs.

Dietary sesame oils inhibits iron-induced oxidative stress in rats [corrected].

In vitro cytotoxic and genotoxic effects of diphenylarsinic acid, a degradation product of chemical warfare agents.

C-reactive protein-induced in vitro vasorelaxation is an artefact caused by the presence of sodium azide in commercial preparations.

Dioxin health risk to infants using simulated tissue concentrations.

A human umbilical cord stem cell rescue therapy in a murine model of toxic liver injury.

Effects of natural and synthetic estrogens and various environmental contaminants on vitellogenesis in fish primary hepatocytes: comparison of bream (*Abramis brama*) and carp (*Cyprinus carpio*).

Effects of beta-naphthoflavone, phenobarbital and dichlobenil on the drug-metabolizing system of liver and nasal mucosa of Italian water frogs.

Polychlorinated biphenyls, hexachlorobenzene, hexachlorocyclohexane isomers, and pesticide organochlorine residues in cod-liver oil dietary supplements.

Sequential metabolism of 2,3,7-trichlorodibenzo-p-dioxin (2,3,7-triCDD) by cytochrome P450 and UDP-glucuronosyltransferase in human liver microsomes.

Levels and toxicokinetic behaviors of PCDD, PCDF, and coplanar PCB congeners in common cormorants from Lake Biwa, Japan.

Toxicokinetics of PCDD, PCDF, and coplanar PCB congeners in Baikal seals, *Pusa sibirica*: age-related accumulation, maternal transfer, and hepatic sequestration.

Dimethylthioarsenicals as arsenic metabolites and their chemical preparations.

Phenylthiourea as a weak activator of aryl hydrocarbon receptor inhibiting 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced CYP1A1 transcription in zebrafish embryo.

Biochemical and molecular biological analysis of different responses to 2,3,7,8-tetrachlorodibenzo-p-dioxin in chick embryo heart and liver.

Neutrophils contribute to endotoxin enhancement of allyl alcohol hepatotoxicity.

Some polybrominated diphenyl ether (PBDE) flame retardants with wide environmental distribution inhibit TCDD-induced EROD activity in primary cultured carp (*Cyprinus carpio*) hepatocytes.

The human CYP1A1 gene is regulated in a developmental and tissue-specific fashion in transgenic mice.

Aryl hydrocarbon receptor-mediated induction of microsomal drug-metabolizing enzyme activity by indirubin and indigo.

The aryl hydrocarbon receptor-mediated disruption of vitellogenin synthesis in the fish liver: Cross-talk between AHR- and ER α -signalling pathways.

Pharmacokinetic analysis of factors determining elimination pathways for sulfate and glucuronide metabolites of xenobiotics. III: mechanisms for sinusoidal efflux of 4-methylumbelliferone sulfate.

EROD activities in a primary cell culture of grass carp (*Ctenopharyngodon idellus*) hepatocytes exposed to polychlorinated aromatic hydrocarbons.

Differential susceptibility of fish and rat liver cells to oxidative stress and cytotoxicity upon exposure to prooxidants.

Tumor promoters as inhibitors of apoptosis in rat hepatocytes.

Polycyclic aromatic hydrocarbons modulate cell proliferation in rat hepatic epithelial stem-like WB-F344 cells.

CYP1A2 is not required for 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immunosuppression.

Molecular switch circuits in toxicology: a dimmer switch for dioxin.

Effects of chronic exposure of 2,4-dichlorophenol on the antioxidant system in liver of freshwater fish *Carassius auratus*.

Cell-based assay for the detection of chemically induced cellular stress by immortalized untransformed transgenic hepatocytes.

The role of protein tyrosine kinases in CYP1A1 induction by omeprazole and thiabendazole in rat hepatocytes.

Induction of hepatic metallothionein synthesis by endoplasmic reticulum stress in mice.

Compartmental inhibition of hepatic glutathione reductase activities by 1,3-bis(2-chloroethyl)-N-nitrosourea (BCNU) in Sprague-Dawley and Fischer-344 rats.

Connective tissue growth factor (CCN2) induces adhesion of rat activated hepatic stellate cells by binding of its C-terminal domain to integrin $\alpha(v)\beta(3)$ and heparan sulfate proteoglycan.

The effect of *Smallanthus sonchifolius* leaf extracts on rat hepatic metabolism.

Uncoupling-mediated generation of reactive oxygen by halogenated aromatic hydrocarbons in mouse liver microsomes.

Cyp1a2 protects against reactive oxygen production in mouse liver microsomes.

Perinatal dioxin exposure and later effects--a review.

Spatial variation in hepatic levels and patterns of PCBs and PCDD/Fs among young-of-the-year and adult Atlantic tomcod (*Microgadus tomcod*) in the Hudson River estuary.

DNA adduct formation in precision-cut rat liver and lung slices exposed to benzo[a]pyrene.

Potential of carbon tetrachloride hepatotoxicity and lethality in type 2 diabetic rats.

Divergent roles of hepatitis B virus X-associated protein 2 (XAP2) in human versus mouse Ah receptor complexes.

Histological analysis of acute toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in zebrafish.

Effect of acute exposure to arsenic on formalin-induced nociception and tramadol-mediated antinociception in mice.

Update on olfactory mucosal metabolic enzymes: age-related changes and N-acetyltransferase activities.

Toxicity, histopathological alterations and immunohistochemical CYP1A induction in the early life stages of the seabream, *Sparus aurata*, following waterborne exposure to B(a)P and TCDD.

Regulation of CYP1A2 by histone deacetylase inhibitors in mouse hepatocytes.

Toxicokinetic and genomic analysis of chronic arsenic exposure in multidrug-resistance *mdr1a/1b*(-/-) double knockout mice.

The olivacine derivative **s 16020** (9-hydroxy-5,6-dimethyl-N-[2-(dimethylamino)ethyl]-6H-pyrido(4,3-B)-carbazole-1-carboxamide) induces CYP1A and its own metabolism in human hepatocytes in primary culture.

An assessment of the genotoxicity and human health risk of topical use of kojic acid [5-hydroxy-2-(hydroxymethyl)-4H-pyran-4-one].

Induction of murine NAD(P)H:quinone oxidoreductase by 2,3,7,8-tetrachlorodibenzo-p-dioxin requires the CNC (cap 'n' collar) basic leucine zipper transcription factor Nrf2 (nuclear factor erythroid 2-related factor 2): cross-interaction between AhR (aryl hydrocarbon receptor) and Nrf2 signal transduction.

Dioxin, dibenzofuran, and polychlorinated biphenyl (PCB) levels in food from Agent Orange-sprayed and nonsprayed areas of Laos.

[Renal and hepatic failure secondary to cyanamide].

Toxic nephropathy: environmental chemicals.

Iron, zinc and copper levels in brain, serum and liver of neonates exposed to 2,4-dichlorophenoxyacetic acid.

Biochemical and histopathological effects of glyphosate herbicide on Nile tilapia (*Oreochromis niloticus*).

The herbicide metolachlor induces liver cytochrome P450s 2B1/2 and 3A1/2, but not thyroxine-uridine dinucleotide phosphate glucuronosyltransferase and associated thyroid gland activity.

An oxygen-bonded c8-deoxyguanosine nucleoside adduct of pentachlorophenol by peroxidase activation: evidence for ambident c8 reactivity by phenoxy radicals.

The herbicide dicamba (2-methoxy-3,6-dichlorobenzoic acid) interacts with mitochondrial bioenergetic functions.

Fatal 2,4-D (ethyl ester) ingestion.

Toxicovigilance: new biochemical tool used in sulfonylurea herbicides toxicology studies.

Prevention of dual promoting effects of pentachlorophenol, an environmental pollutant, on diethylnitrosamine-induced hepato- and cholangiocarcinogenesis in mice by green tea infusion.

Experimental hepatic uroporphyrinemia induced by the diphenyl-ether herbicide fomesafen in male DBA/2 mice.

A review of the genotoxicity of triallate.

Allyl alcohol activation of protein kinase C delta leads to cytotoxicity of rat hepatocytes.

Cancer and developmental exposure to endocrine disruptors.

Influence of malathion pretreatment on the toxicity of anilofos in male rats: a biochemical interaction study.

The restriction of all minerals in the diet enhancing paraquat toxicity is regarded primarily as the shortage of Mg.

In vitro studies on the chemical reactivity of 2,4-dichlorophenoxyacetyl-S-acyl-CoA thioester.

Cytotoxic effects of the herbicide 2,4-dichlorophenoxyacetic acid in HepG2 cells.

Carcinogenicity of dimethylarsinic acid in p53 heterozygous knockout and wild-type C57BL/6J mice.

Inhibitory activity of epigallocatechin gallate (EGCg) in paraquat-induced microsomal lipid peroxidation--a mechanism of protective effects of EGCg against paraquat toxicity.

Inhibition of cytokine production by the herbicide atrazine. Search for nuclear receptor targets.

Paraquat and menadione exposure of rainbow trout (*Oncorhynchus mykiss*)--studies of effects on the pentose-phosphate shunt and thiamine levels in liver and kidney.

Combined initial cyclophosphamide with repeated methylprednisolone pulse therapy for severe paraquat poisoning from dermal exposure.

Focal transmural necrotic tracheitis in commercial meat turkeys.

Pentachlorophenol (but not phenobarbital) promotes intrahepatic biliary cysts induced by diethylnitrosamine to cholangio cystic neoplasms in B6C3F1 mice possibly due to oxidative stress.

Comparison of cyanamide and placebo in the treatment of alcohol dependence of adolescents.

Formation of acrolein-derived 2'-deoxyadenosine adduct in an iron-induced carcinogenesis model.

Lack of modifying effects of atrazine and/or tamoxifen on thyroid carcinogenesis in rats pretreated with N-bis(2-hydroxypropyl)nitrosamine (DHPN).

Resistance to tumor necrosis factor-alpha (TNF-alpha)-induced apoptosis in rat hepatoma cells expressing TNF-alpha is linked to low antioxidant enzyme expression.

Effects of dietary essential oil components on growth performance, digestive enzymes and lipid metabolism in female broiler chickens.

Alcohol potentiates hepatitis C virus replicon expression.

Oxidative stress and bioindicators of reproductive function in pulp and paper mill effluent exposed white sucker.

Impacts of glutathione peroxidase-1 knockout on the protection by injected selenium against the pro-oxidant-induced liver aponecrosis and signaling in selenium-deficient mice.

Low levels of glutathione peroxidase 1 activity in selenium-deficient mouse liver affect c-Jun N-terminal kinase activation and p53 phosphorylation on Ser-15 in pro-oxidant-induced aponecrosis.

Reduction of paraquat-induced oxidative stress in rats by dietary soy peptide.

CYP1a1, HSP70, P53, and c-fos expression in human liver carcinoma cells (HepG2) exposed to pentachlorophenol.

Antioxidant perturbations in the olfactory mucosa of alachlor-treated rats.

Toxicokinetics, recovery, and metabolism of metamitron in goat.

Accumulation and metabolism of arsenic in mice after repeated oral administration of arsenate.

Thermal and metabolic factors affecting bioaccumulation of triazine herbicides by rainbow trout (*Oncorhynchus mykiss*).

A comparison of two methods for fractionating complex mixtures in preparation for toxicity analysis.

[Effect of aminotriazole on the activity of catalase and glucose-6-phosphate dehydrogenase in tissues of two frog species--*Rana ridibunda* and *Rana esculenta*].

Acetylation of histone H3 at lysine 9 by ethanol in rat hepatocytes.

Formation and removal of pentachlorophenol-derived protein adducts in rodent liver under acute, multiple, and chronic dosing regimens.

Dose-dependent biotransformation of arsenite in rats--not S-adenosylmethionine depletion impairs arsenic methylation at high dose.

Inhibition of succinic semialdehyde dehydrogenase activity by alkenal products of lipid peroxidation.

Hepatocyte metabolism of coenzyme Q1 (ubiquinone-5) to its sulfate conjugate decreases its antioxidant activity.

Induction of glutathione S-transferase placental form positive foci in liver and epithelial hyperplasia in urinary bladder, but no tumor development in male Fischer 344 rats treated with monomethylarsonic acid for 104 weeks.

Fish tolerance to organophosphate-induced oxidative stress is dependent on the glutathione metabolism and enhanced by N-acetylcysteine.

Ascorbic acid reduces the frequency of iron induced micronuclei in bone marrow cells of mice.

Brain mitochondrial aldehyde dehydrogenase: relation to acetaldehyde aversion in low-alcohol-drinking (UChA) and high-alcohol-drinking (UChB) rats.

Tolerogenic role of Kupffer cells in allergic reactions.

Dioxin and cancer: a critical review.

Role of lipid peroxidation as a mechanism of liver injury after acetaminophen overdose in mice.

Cellular uptake and metabolism of DNA frayed wires.

Systemic effects and skin injury after experimental dermal exposure to monochloroacetic acid.

Mechanisms of TCDD-induced abnormalities and embryo lethality in white leghorn chickens.

Oxidative stress in liver and brain of the hatchling chicken (*Gallus domesticus*) following in ovo injection with TCDD.

Contribution of the Ah receptor to the phenolic antioxidant-mediated expression of human and rat UDP-glucuronosyltransferase UGT1A6 in Caco-2 and rat hepatoma 5L cells.

Use of an "acetaldehyde clamp" in the determination of low-KM aldehyde dehydrogenase activity in H4-II-E-C3 rat hepatoma cells.

Protective effect of fenugreek (*Trigonella foenum graecum*) seeds in experimental ethanol toxicity.

Herbimycin A attenuates apoptosis during heat stress in rats.

Beta-glucuronidase inhibitor tectorigenin isolated from the flower of *Pueraria thunbergiana* protects carbon tetrachloride-induced liver injury.

Evaluation of the potential impact of pharmacokinetic differences on tissue dosimetry in offspring during pregnancy and lactation.

3'-methoxy-4'-nitroflavone, a reported aryl hydrocarbon receptor antagonist, enhances Cyp1a1 transcription by a dioxin responsive element-dependent mechanism.

Characteristics and application of established luciferase hepatoma cell line that responds to dioxin-like chemicals.

Applicability of the CALUX bioassay for screening of dioxin levels in human milk samples.

Celecoxib inhibits proliferation and induces apoptosis via prostaglandin E2 pathway in human cholangiocarcinoma cell lines.

Aryl hydrocarbon receptor gene silencing with small inhibitory RNA differentially modulates Ah-responsiveness in MCF-7 and HepG2 cancer cells.

Protective effect of melatonin against mitochondrial injury induced by ischemia and reperfusion of rat liver.

Rat thyroid hyperplasia induced by gestational and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

ZnCl₂ induces Syrian hamster embryo (SHE) cell transformation.

Methylated metabolites of arsenic trioxide are more potent than arsenic trioxide as apoptotic but not differentiation inducers in leukemia and lymphoma cells.

Effect of low dose mono-ortho 2,3',4,4',5 pentachlorobiphenyl on thyroid hormone status and EROD activity in rat offspring: consequences for risk assessment.

Validation of the chloramine-T induced oxidation of human serum albumin as a model for oxidative damage in vivo.

Invasion of interstitial matrix by a novel cell line from primary peritoneal carcinosarcoma, and by established ovarian carcinoma cell lines: role of cell-matrix adhesion molecules, proteinases, and E-cadherin expression.

Edaravone protects against ischemia/reperfusion-induced oxidative damage to mitochondria in rat liver.

Induction of cytochrome P4501A and endocrine disrupting effects of school incinerator residues.

Involvement of oxidative stress in the toxicity of 4-monochlorophenol in Hep G2 cells in culture.

Prostate cancer risk in California farm workers.

Troglitazone-induced intracellular oxidative stress in rat hepatoma cells: a flow cytometric assessment.

Basis for a proposed reference dose (RfD) for dioxin of 1-10 pg/kg-day: a weight of evidence evaluation of the human and animal studies.

TCDD-dependent downregulation of gamma-catenin in rat liver epithelial cells (WB-F344).

Ferric citrate is half as effective as ferrous sulfate in meeting the iron requirement of juvenile tilapia, *Oreochromis niloticus* x *O. aureus*.

Iron bioavailability and weight gains to iron-deficient rats fed a commonly consumed Tunisian meal 'bean seeds ragout' with or without beef and with green or black tea decoction.

Increase in cardiovascular pathology in female Sprague-Dawley rats following chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3,3',4,4',5-pentachlorobiphenyl.

PPARalpha agonist-induced rodent tumors: modes of action and human relevance.

The use of c-src knockout mice for the identification of the main toxic signaling pathway of TCDD to induce wasting syndrome.

Perinatal exposure to low doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin alters sex-dependent expression of hepatic CYP2C11.

Antiperoxidative, anti-inflammatory, and antimutagenic activities of ethanol extract of the mycelium of *Ganoderma lucidum* occurring in South India.

Transplacental carcinogenicity of inorganic arsenic in the drinking water: induction of hepatic, ovarian, pulmonary, and adrenal tumors in mice.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced accumulation of biliverdin and hepatic peliosis in rats.

EGF and TGF-alpha expression influence the developmental toxicity of TCDD: dose response and AhR phenotype in EGF, TGF-alpha, and EGF + TGF-alpha knockout mice.

Blockage of multidrug resistance-associated proteins potentiates the inhibitory effects of arsenic trioxide on CYP1A1 induction by polycyclic aromatic hydrocarbons.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) alters the endogenous metabolism of all-trans-retinoic acid in the rat.

Transcriptional regulation of heme oxygenase-1 gene expression by MAP kinases of the JNK and p38 pathways in primary cultures of rat hepatocytes.

Resistance to 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity and abnormal liver development in mice carrying a mutation in the nuclear localization sequence of the aryl hydrocarbon receptor.

Expression of aryl hydrocarbon receptor repressor in normal human tissues and inducibility by polycyclic aromatic hydrocarbons in human tumor-derived cell lines.

2,3,7,8-tetrachlorodibenzo-p-dioxin induces lecithin: retinol acyltransferase transcription in the rat kidney.

Hepatocellular injury with hyperaminotransferasemia after cresol ingestion.

Acutely administered melatonin restores hepatic mitochondrial physiology in old mice.

The liver isoform of carnitine palmitoyltransferase 1 is not targeted to the endoplasmic reticulum.

Primary cultures of human hepatocytes as a tool in cytotoxicity studies: cell protection against model toxins by flavonolignans obtained from *Silybum marianum*.

Sensitivity of bald eagle (*Haliaeetus leucocephalus*) hepatocyte cultures to induction of cytochrome P4501A by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Hepatic EROD activity is not a useful biomarker of polychlorinated biphenyl exposure in the adult herring gull (*Larus argentatus*).

Modulating carbonyl cytotoxicity in intact rat hepatocytes by inhibiting carbonyl metabolizing enzymes. II. Aromatic aldehydes.

Modulating carbonyl cytotoxicity in intact rat hepatocytes by inhibiting carbonyl-metabolizing enzymes. I. Aliphatic alkenals.

Humic acid mediates iron release from ferritin and promotes lipid peroxidation in vitro: a possible mechanism for humic acid-induced cytotoxicity.

Use of cultured cells of kidney origin to assess specific cytotoxic effects of nephrotoxins.

Hepatic stem cells: existence and origin.

Hepatic progenitor cell lines from allyl alcohol-treated adult rats are derived from gamma-irradiated mouse STO cells.

The 2001 Veylien Henderson Award of the Society of Toxicology of Canada. Positive and negative transcriptional regulation of cytochromes P450 by polycyclic aromatic hydrocarbons.

Isolation, sequencing, and expression of a cDNA for the HXM-A form of xenobiotic/medium-chain fatty acid:CoA ligase from human liver mitochondria.

[Induction of aryl hydrocarbon receptor and CYP1A1 mRNA by 2,3,7,8-tetrachlorodibenzo-p-dioxin in rat liver].

Oxidative stress in laboratory-incubated double-crested cormorant eggs collected from the Great Lakes.

Oxygen availability during orthotopic liver transplantation.

Low density lipoprotein receptor-related protein (LRP) is a heparin-dependent adhesion receptor for connective tissue growth factor (CTGF) in rat activated hepatic stellate cells.

TCDD-induced expression of Ah receptor responsive genes in the pituitary and brain of cellular retinol-binding protein (CRBP-I) knockout mice.

Role of mitochondrial aldehyde dehydrogenase in nitrate tolerance.

Cell-specific expression of CYP2A5 in the mouse respiratory tract: effects of olfactory toxicants.

Kinetics of monochloroacetic acid at subtoxic and toxic doses in rats after single oral and dermal administrations.

The role of hepatocellular oxidative stress in Kupffer cell activation during 1,2-dichlorobenzene-induced hepatotoxicity.

In vivo studies on the metabolism of the monoterpene pulegone in humans using the metabolism of ingestion-correlated amounts (MICA) approach: explanation for the toxicity differences between (S)-(-)- and (R)-(+)-pulegone.

Cellular binding of hepatitis C virus envelope glycoprotein E2 requires cell surface heparan sulfate.

NTP toxicology and carcinogenesis Studies of 2,4-hexadienal (89% trans,trans isomer, CAS No. 142-83-6; 11% cis,trans isomer) (Gavage Studies).

Toxicogenomic effects of marine brevetoxins in liver and brain of mouse.

Decreased enzyme activity of hepatic thioredoxin reductase and glutathione reductase in rabbits by prolonged exposure to inorganic arsenate.

3,4-dichloroaniline-induced oxidative stress in liver of crucian carp (*Carassius auratus*).

Effect of dietary co-administration of sodium selenite on sodium arsenite-induced ovarian and uterine disorders in mature albino rats.

Endogenously produced endothelial lipase enhances binding and cellular processing of plasma lipoproteins via heparan sulfate proteoglycan-mediated pathway.

Thallium induces opening of the mitochondrial permeability transition pore in the inner membrane of rat liver mitochondria.

[Effects of long-term exposure of low-level 2,4-dichlorophenol on the antioxidant defense system in liver of *Carassius auratus*].

4-aminobiphenyl-induced liver and urinary bladder DNA adduct formation in Cyp1a2(-/-) and Cyp1a2(+/+) mice.

On the significance of the role of cellular stress response reactions in the toxic actions of dioxin.

ATP-dependent transport of bile acid intermediates across rat liver peroxisomal membranes.

Tissue repair plays pivotal role in final outcome of liver injury following chloroform and allyl alcohol binary mixture.

FT-IR spectroscopic analysis of rainbow trout liver exposed to nonylphenol.

Effects of cytochrome P-450 inducers on the perazine metabolism in a primary culture of human hepatocytes.

Naturally produced halogenated dimethyl bipyrrroles bind to the aryl hydrocarbon receptor and induce cytochrome P4501A and porphyrin accumulation in chicken embryo hepatocytes.

Activation and inhibition of cellular calcium and tyrosine kinase signaling pathways identify targets of the HBx protein involved in hepatitis B virus replication.

Initial signaling of the fibronectin receptor (alpha5beta1 integrin) in hepatic stellate cells is independent of tyrosine phosphorylation.

Health of tree swallow (*Tachycineta bicolor*) nestlings exposed to chlorinated hydrocarbons in the St Lawrence River basin. Part I. Renal and hepatic vitamin A concentrations.

Temperature dependence of rat liver mitochondrial respiration with uncoupling of oxidative phosphorylation by fatty acids. Influence of inorganic phosphate.

Quantitative structure toxicity relationships for phenols in isolated rat hepatocytes.

[Determination of 2,4-dinitrophenol, its basic metabolite and 4-oxide diphenyl in biological materials].

Selenoprotein metabolism and function: evidence for more than one function for selenoprotein P.

Differential modulation of cytochrome P-450 1A and P-glycoprotein expression by aryl hydrocarbon receptor agonists and thyroid hormone in *Xenopus laevis* liver and intestine.

Contribution of human cytochrome p-450 isoforms to the metabolism of the simplest phenothiazine neuroleptic promazine.

Role of the different mitogen-activated protein kinase subfamilies in the stimulation of dog and human thyroid epithelial cell proliferation by cyclic adenosine 5'-monophosphate and growth factors.

Inhibition of CYP 1A2-dependent MROD activity in rat liver microsomes: an explanation of the hepatic sequestration of a limited subset of halogenated aromatic hydrocarbons.

Tumorigenicity of chloral hydrate, trichloroacetic acid, trichloroethanol, malondialdehyde, 4-hydroxy-2-nonenal, crotonaldehyde, and acrolein in the B6C3F(1) neonatal mouse.

Functional activation of peroxisome proliferator-activated receptor alpha (PPARalpha) by environmental chemicals in relation to their toxicities.

Fractionation of protein adducts in rats and mice dosed with [14C]pentachlorophenol.

Hepatocellular peroxisome proliferation and DNA synthesis in Wistar rats treated with herbicide fluazifop.

Antioxidant enzymes, free-radical damage, and response to paraquat in liver and kidney of long-living growth hormone receptor/binding protein gene-disrupted mice.

Paraquat-induced gene expression in rat lung tissues using a differential display reverse transcription-polymerase chain reaction.

A survey of EPA/OPP and open literature on selected pesticide chemicals. III. Mutagenicity and carcinogenicity of benomyl and carbendazim.

Nuclear and nucleolar glutathione reductase, peroxidase, and transferase activities in livers of male and female Fischer-344 rats.

Toxicokinetics, recovery, and metabolism of triclopyr butotyl (ACTP) ester in goats.

Plasmid DNA damage caused by methylated arsenicals, ascorbic acid and human liver ferritin.

Detection of estrogenic activity in sediment-associated compounds using in vitro reporter gene assays.

[An unusual case of toxic hepatitis from paraquat].

Review of 2,4-dichlorophenoxyacetic acid (2,4-D) epidemiology and toxicology.

Oral (gavage) two-generation (one litter per generation) reproduction study of pentachlorophenol (penta) in rats.

Paraquat-generated oxidative stress in rat liver induces heme oxygenase-1 and aminolevulinic acid synthase.

Paraquat detoxicative system in the mouse liver postmitochondrial fraction.

Predictors of survival after acute paraquat poisoning.

A major human arsenic metabolite, dimethylarsinic acid, requires reduced glutathione to induce apoptosis.

Oxysterols as indices of oxidative stress in man after paraquat ingestion.

Effect of alachlor on hepatic cytochrome P450 enzymes in rats.

Effects of paraquat on essential antioxidant elements in osteogenic disorder Shionogi rat.

Effect of vitamin C on plasma total antioxidant status in patients with paraquat intoxication.

Marker enzyme assessment in the liver of cyprinus carpio (L.) exposed to 2,4-D and azinphosmethyl.

[Participation of dexamethasone and E and C vitamins in the modulation of the hepatotoxic effect induced by fomesafen and 2,4-D amino herbicides, in rats].

[Effect of diclofop on the activity of some drug-metabolizing enzymes in the liver of male Wistar rats].

In vitro hepatotoxicity of alachlor and its by-products.

Enantiomeric enrichment of chiral pesticides in the environment.

Ascorbic acid induces redifferentiation and growth inhibition in human hepatoma cells by increasing endogenous hydrogen peroxide.

Evaluation of a 15-day screening assay using intact male rats for identifying antiandrogens.

Promoting effects of monomethylarsonic acid, dimethylarsinic acid and trimethylarsine oxide on induction of rat liver preneoplastic glutathione S-transferase placental form positive foci: a possible reactive oxygen species mechanism.

The restoring effect of trifluralin and benznidazole on the abnormal fatty-acid pattern induced by *Trypanosoma cruzi* in the liver microsomes of infected mice.

Analysis of DNA adducts in rats exposed to pentachlorophenol.

Protection against acetaminophen hepatotoxicity by clofibrate pretreatment: role of catalase induction.

Lipid peroxidation contributes to immune reactions associated with alcoholic liver disease.

Aldehyde-sequestering drugs: tools for studying protein damage by lipid peroxidation products.

Effects of redox cycling compounds on glutathione content and activity of glutathione-related enzymes in rainbow trout liver.

Generation of protein adducts with malondialdehyde and acetaldehyde in muscles with predominantly type I or type II fibers in rats exposed to ethanol and the acetaldehyde dehydrogenase inhibitor cyanamide.

Metabolic disturbances in fish exposed to sodium pentachlorophenate (NaPCP) and 3,3',4,4',5-pentachlorobiphenyl (PCB126), individually or combined.

Soy protein reduces paraquat-induced oxidative stress in rats.

Measurement of 4-hydroxylation of ifosfamide in human liver microsomes using the estimation of free and protein-bound acrolein and codetermination of keto- and carboxyifosfamide.

In vitro effect of eugenol and cinnamaldehyde on membrane potential and respiratory chain complexes in isolated rat liver mitochondria.

Side-chain metabolism of propranolol: involvement of monoamine oxidase and mitochondrial aldehyde dehydrogenase in the metabolism of N-desisopropylpropranolol to naphthoxylactic acid in rat liver.

Age-related alteration in hepatic disposition of the neurotoxin 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine and pesticides.

Non-genotoxic carcinogens: early effects on gap junctions, cell proliferation and apoptosis in the rat.

Comparative toxicity study of 3-aminophenol in newborn and young rats.

Toxicology and carcinogenesis study of chloral hydrate (ad libitum and dietary controlled) (CAS no. 302-17-0) in male B6C3F1 mice (gavage study).

Acute toxicity of carbonyl iron and sodium iron EDTA compared with ferrous sulfate in young rats.

Using the dioxin receptor-CALUX in vitro bioassay to screen marine harbor sediments for compounds with a dioxin-like mode of action.

Formation of reactive oxygen species in rat hepatoma-derived Fa32 cells to predict human toxicity.

Cell-type specificity of ectonucleotidase expression and upregulation by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effects of o,p'-DDT on the 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible CYP1A1 expression in murine Hepa-1c1c7 cells.

Application of the luciferase cell culture bioassay for the detection of refined petroleum products.

Alcohol-induced increases in insulin-like growth factor binding protein-1 are partially mediated by TNF.

Antiandrogenic effects in vitro and in vivo of the fungicide prochloraz.

Application of the luciferase recombinant cell culture bioassay system for the analysis of polycyclic aromatic hydrocarbons.

Effects of chronic dietary exposure to environmentally relevant concentrations to 2,3,7,8-tetrachlorodibenzo-p-dioxin on survival, growth, reproduction and biochemical responses of female rainbow trout (*Oncorhynchus mykiss*).

Screening of dioxin-like toxicity equivalents for various matrices with wildtype and recombinant rat hepatoma H4IIE cells.

2,3,7,8-tetrachlorodibenzo-p-dioxin causes alterations in lymphocyte development and thymic atrophy in hemopoietic chimeras generated from mice deficient in ARNT2.

Beta 1-integrin protects hepatoma cells from chemotherapy induced apoptosis via a mitogen-activated protein kinase dependent pathway.

Ethanol induces fatty acid synthesis pathways by activation of sterol regulatory element-binding protein (SREBP).

Laboratory safety.

Severe hepatic dysfunction following cresol poisoning.

Promotion of altered hepatic foci by 2,3,7,8-tetrachlorodibenzo-p-dioxin and 17beta-estradiol in male Sprague-Dawley rats.

In vivo effects of Panax ginseng extracts on the cytochrome P450-dependent monooxygenase system in the liver of 2,3,7,8-tetrachlorodibenzo-p-dioxin-exposed guinea pig.

Entacapone does not induce conformational changes in liver mitochondria or skeletal muscle in vivo.

Tyrosinemia I, a model for human diseases mediated by 2-oxoacid-utilizing dioxygenases: hepatotoxin suppression by NTBC does not normalize hepatic collagen metabolism.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces plasminogen activator inhibitor-1 through an aryl hydrocarbon receptor-mediated pathway in mouse hepatoma cell lines.

Inhibition of carcinogen-activating enzymes by 16 α -fluoro-5-androsten-17-one.

The stress response decreases NF-kappaB activation in liver of endotoxemic mice.

Mechanisms of 2-butoxyethanol carcinogenicity: studies on Syrian Hamster Embryo (SHE) cell transformation.

Comparison of acute toxicities of indolo[3,2-b]carbazole (ICZ) and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in TCDD-sensitive rats.

Angiopoietin-1 and VEGF in vascular development and angiogenesis in hypoplastic lungs.

Severe 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) intoxication: kinetics and trials to enhance elimination in two patients.

Recruitment of dioxin receptor to active transcription sites.

Decrease in 4-aminobiphenyl-induced methemoglobinemia in Cyp1a2(-/-) knockout mice.

Involvement of multidrug resistance-associated protein 2 in in vivo cisplatin resistance of rat hepatoma AH66 cells.

Transgenic rice is a source of iron for iron-depleted rats.

Relationship between acetaldehyde levels and cell survival in ethanol-metabolizing hepatoma cells.

Effects of subchronic exposure to a complex mixture of persistent contaminants in male rats: systemic, immune, and reproductive effects.

Prediction of rodent nongenotoxic carcinogenesis: evaluation of biochemical and tissue changes in rodents following exposure to nine nongenotoxic NTP carcinogens.

An autopsy case of poisoning by massive absorption of cresol a short time before death.

Effects of src-deficiency on the expression of in vivo toxicity of TCDD in a strain of c-src knockout mice procured through six generations of backcrossings to C57BL/6 mice.

Improvement of chemically-activated luciferase gene expression bioassay for detection of dioxin-like chemicals.

Non-ahr gene susceptibility Loci for porphyria and liver injury induced by the interaction of 'dioxin' with iron overload in mice.

Involvement of protein tyrosine phosphorylation and reduction of cellular sulfhydryl groups in cell death induced by 1'-acetoxychavicol acetate in Ehrlich ascites tumor cells.

Association between chronic exposure to pesticides and recorded cases of human malignancy in Gaza Governorates (1990-1999).

Effects of coxsackievirus B3 infection on the acute-phase protein metallothionein and on cytochrome P-4501A1 involved in the detoxification processes of TCDD in the mouse.

NTP Technical Report on the Toxicology and Carcinogenesis Studies of Chloral Hydrate (Cas No. 302-17-0) in B6C3F1 mice (Gavage Studies).

Dioxin in infants--an environmental hazard?

Thyroid status is a key regulator of both flux and efficiency of oxidative phosphorylation in rat hepatocytes.

Development of a green fluorescent protein-based cell bioassay for the rapid and inexpensive detection and characterization of Ah receptor agonists.

Identification of a novel dioxin-inducible cytochrome P450.

Identification of novel Ah receptor agonists using a high-throughput green fluorescent protein-based recombinant cell bioassay.

Effects of 2-butoxyethanol on hepatic oxidative damage.

A dynamic role for the Ah receptor in cell signaling? Insights from a diverse group of Ah receptor interacting proteins.

The combined use of the CALUX bioassay and the HRGC/HRMS method for the detection of novel dioxin sources and new dioxin-like compounds.

Relative potencies of individual polycyclic aromatic hydrocarbons to induce dioxinlike and estrogenic responses in three cell lines.

Overexpression of bcl-2 protects hepatoma cell line HCC-9204 from ethanol-induced apoptosis.

The use of quantitative histological and molecular data for risk assessment and biologically based model development.

Ferrous ion autoxidation and its chelation in iron-loaded human liver HepG2 cells.

Autocrine activation of the hepatocyte growth factor receptor/met tyrosine kinase induces tumor cell motility by regulating pseudopodial protrusion.

Aromatic hydrocarbon receptor expression and function in liver of hypophysectomized male rats.

Re: dioxin increases reactive oxygen production in mouse liver mitochondria (toxicol. Appl. Pharmacol.178, 15-21, 2002). To the editor.

Reactivity of atropaldehyde, a felbamate metabolite in human liver tissue in vitro.

Subchronic toxicity of Baltic herring oil and its fractions in the rat I: Fractionation and levels of organohalogen pollutants.

Immunoaffinity column as sample cleanup method for determination of the beta-adrenergic agonist ractopamine and its metabolites.

Different toxicological profile of two COMT inhibitors in vivo: the role of uncoupling effects.

Indolo[3,2-b]carbazole inhibits gap junctional intercellular communication in rat primary hepatocytes and acts as a potential tumor promoter.

Mitochondrial reactive oxygen production is dependent on the aromatic hydrocarbon receptor.

Effects of entacapone and tolcapone on mitochondrial membrane potential.

Bioavailability of the isomer mixture of phytoene and phytofluene-rich alga *Dunaliella bardawil* in rat plasma and tissues.

Enhancement of allyl alcohol hepatotoxicity by endotoxin requires extrahepatic factors.

Response of anti-oxidant enzymes mRNA in the neonatal rat liver exposed to 1,2,3,4-tetrachlorodibenzo-p-dioxin via lactation.

Stereoselective hydroxylation of 4-methyl-2-cyclohexenone in rats: its relevance to R-(+)-pulegone-mediated hepatotoxicity.

Cyclosporin A-sensitive permeability transition pore is involved in Cd(2+)-induced dysfunction of isolated rat liver mitochondria: doubts no more.

Metabolism of polychlorinated dibenzo-p-dioxins (PCDDs) by human cytochrome P450-dependent monooxygenase systems.

Analysis of paraquat, diquat and two diquat metabolites in biological materials by high-performance liquid chromatography.

Effect of chitosan oligosaccharide on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced oxidative stress in mice.

Estrous cycle-regulated expression of CYP1B1 mRNA in the rat ovary.

Induction of P-glycoprotein, glutathione-S-transferase and cytochrome P450 in rat liver by atrazine.

Severe 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) intoxication: insights into the measurement of hepatic cytochrome P450 1A2 induction.

Oxidative bioactivation of crotyl alcohol to the toxic endogenous aldehyde crotonaldehyde: association of protein carbonylation with toxicity in mouse hepatocytes.

Comparative responsiveness of hypothyroxinemia and hepatic enzyme induction in Long-Evans rats versus C57BL/6J mice exposed to TCDD-like and phenobarbital-like polychlorinated biphenyl congeners.

IARC monographs, industry influence, and upgrading, downgrading, and under-grading chemicals: a personal point of view. International Agency for Research on Cancer.

Distribution and elimination of polychlorinated dibenzo-p-dioxins, dibenzofurans, biphenyls, and p,p'-DDE in tissues of bald eagles from the Upper Peninsula of Michigan.

The effect of ascorbic acid and ethanol on the level of thiobarbituric acid reactive substances (TBARS) in selected tissues of albino BALB/c mice.

Evidence for the involvement of CYP1A2 in the metabolism of bromodichloromethane in rat liver.

Induction of oxidative stress in the tissues of rats after chronic exposure to TCDD, 2,3,4,7,8-pentachlorodibenzofuran, and 3,3',4,4',5-pentachlorobiphenyl.

Comparative effects of TCDD, endrin, naphthalene and chromium (VI) on oxidative stress and tissue damage in the liver and brain tissues of mice.

Effects of inhaled methyl bromide gas on the metabolic system and kinetics of bromine ion in rats.

Thyroid toxicity due to subchronic exposure to a complex mixture of 16 organochlorines, lead, and cadmium.

Expression of rat liver glutathione-S-transferase GSTA5 in cell lines provides increased resistance to alkylating agents and toxic aldehydes.

Assessment of chlorinated dibenzo-p-dioxin and dibenzofuran trends in sediment and crab hepatopancreas from pulp mill and harbor sites using multivariate- and index-based approaches.

Circulating lysozyme and hepatic CYP1A activities during a chronic dietary exposure to tributyltin (TBT) and 3,3',4,4',5-pentachlorobiphenyl (PCB-126) mixtures in channel catfish, *Ictalurus punctatus*.

Hepatic microsomal cytochrome p450s and chlorinated hydrocarbons in largha and ribbon seals from Hokkaido, Japan: differential response of seal species to Ah receptor agonist exposure.

Identification of 2,3,7,8-tetrachlorodibenzo-p-dioxin-responsive genes in mouse liver by serial analysis of gene expression.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the antioxidant system in mitochondrial and microsomal fractions of rat testis.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on oxidative enzymes in adipocytes and liver.

Immunohistochemical localization of thyroid stimulating hormone induced by a low oral dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats.

The effects of glutathione and vitamin E on iron toxicity in isolated rat hepatocytes.

Derivation, characterization, and phenotypic variation of hepatic progenitor cell lines isolated from adult rats.

Multidrug-resistance mdr1a/1b double knockout mice are more sensitive than wild type mice to acute arsenic toxicity, with higher arsenic accumulation in tissues.

Chemical speciation of arsenic in the livers of higher trophic marine animals.

Induction of olfactory mucosal and liver metabolism of lidocaine by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Neoductular progenitor cells regenerate hepatocytes in severely damaged liver: a comparative ultrastructural study.

Acute sodium arsenite treatment induces Cyp2a5 but not Cyp1a1 in the C57Bl/6 mouse in a tissue (kidney) selective manner.

Acute sodium arsenite administration induces pulmonary CYP1A1 mRNA, protein and activity in the rat.

TCDD-mediated oxidative stress in male rat pups following perinatal exposure.

Tissue concentrations and induction of a hepatic monooxygenase in male Wistar rats after repeated doses of defined polychlorinated dibenzo-p-dioxin and dibenzofuran (PCDDs and PCDFs) mixtures.

Effect of peroxisome proliferators on the methylation and protein level of the c-myc protooncogene in B6C3F1 mice liver.

Cytochrome P4501A induction and testosterone hydroxylation in cultured hepatocytes of four fish species.

Proliferation and differentiation of ductular progenitor cells and littoral cells during the regeneration of the rat liver to CCl₄/2-AAF injury.

Glucocorticoid-induced glucose release is abolished in trout hepatocytes with elevated hsp70 content.

Dioxin increases reactive oxygen production in mouse liver mitochondria.

Subacute toxicity of anilofos, a new organophosphorus herbicide in male rats: effect on lipid peroxidation and ATPase activity.

Subacute toxicity of anilofos, a new organophosphorus herbicide, in male rats: effect on some physical attributes and acetylcholinesterase activity.

Toxicity and effects of 2,6-di-tert-butyl-4-methylphenyl N-methylcarbamate (terbutol) on hepatic cytochrome P450 in F344 rats.

Glutathione-dependent resistance of the European eel *Anguilla anguilla* to the herbicide molinate.

Effects of chloro-s-triazine herbicides and metabolites on aromatase activity in various human cell lines and on vitellogenin production in male carp hepatocytes.

Effect of isoproteruron pretreatment on the biochemical toxicodynamics of anilofos in male rats.

Unique renal tubule changes induced in rats and mice by the peroxisome proliferators 2,4-dichlorophenoxyacetic acid (2,4-D) and WY-14643.

Use of a monoclonal antibody against Lafora bodies for the immunocytochemical study of ground-glass inclusions in hepatocytes due to cyanamide.

Serum dioxin and hepatic abnormalities in veterans of Operation Ranch Hand.

Oxidative stress and liver toxicity in rats and human hepatoma cell line induced by pentachlorophenol and its major metabolite tetrachlorohydroquinone.

Toxico-kinetics, recovery, and metabolism of napropamide in goats following a single high-dose oral administration.

A concise review of the toxicity and carcinogenicity of dimethylarsinic acid.

Carcinogenicity assays of wood dust and wood additives in rats exposed by long-term inhalation.

Studies of early hepatocellular proliferation and peroxisomal proliferation in Wistar rats treated with herbicide diclofop.

Centrilobular endothelial cell injury by diquat in the selenium-deficient rat liver.

Genotoxic effects of methyl isothiocyanate.

Effects of diquat, an aquatic herbicide, on the development of mallard embryos.

Differential sensitivities of plant and animal mitochondria to the herbicide paraquat.

Extensive protein carbonylation precedes acrolein-mediated cell death in mouse hepatocytes.

Caffeine potentiation of allyl alcohol-induced hepatotoxicity. II. In vitro study.

Pentachlorophenol potentiates benzo[a]pyrene DNA adduct formation in adult but not infant B6C3F1 male mice.

Subchronic oral toxicity of a combination of insecticide (HCH) and herbicide (ISP) in male rats.

Effect of tiagabine and topiramate on porphyrin metabolism in an in vivo model of porphyria.

Atrazine potentiation of arsenic trioxide-induced cytotoxicity and gene expression in human liver carcinoma cells (HepG2).

Effects of chlorpropham (CIPC) on the hemopoietic system of rats.

Biological effects of a nano red elemental selenium.

Influence of caffeine on allyl alcohol-induced hepatotoxicity in rats. I. In vivo study.

Post-transcriptional control of catalase expression in garlic-treated rats.

Inhibition of apoptosis by pentachlorophenol in v-myc-transfected rat liver epithelial cells: relation to down-regulation of gap junctional intercellular communication.

Comparative impacts of glutathione peroxidase-1 gene knockout on oxidative stress induced by reactive oxygen and nitrogen species in mouse hepatocytes.

In vivo and in vitro binding of 2,4-dichlorophenoxyacetic acid to a rat liver mitochondrial protein.

Repression of phenobarbital-dependent CYP2B1 mRNA induction by reactive oxygen species in primary rat hepatocyte cultures.

Protection from drug-induced hepatocellular changes by pretreatment with conjugating enzyme inhibitors in rats.

Glutathione depletion in rat hepatocytes: a mixture toxicity study with alpha, beta-unsaturated esters.

Characterization of metabolic activation of pentachlorophenol to quinones and semiquinones in rodent liver.

Acute effect of ethanol on 7-hydroperoxycholesterol in muscle and liver.

The transcriptional and DNA binding activity of peroxisome proliferator-activated receptor alpha is inhibited by ethanol metabolism. A novel mechanism for the development of ethanol-induced fatty liver.

Taurine modulates catalase, aldehyde dehydrogenase, and ethanol elimination rates in rat brain.

Congener-specific profile and toxicity assessment of PCBs in green turtles (*Chelonia mydas*) from the Hawaiian Islands.

In vivo up-regulation of aryl hydrocarbon receptor expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in a dioxin-resistant rat model.

Characterization of dioxin-like activity of sediments from a Czech river basin.

Novel target genes of the Ah (dioxin) receptor: transcriptional induction of N-myristoyltransferase 2.

Biochemical, neuropsychological, and neurological abnormalities following 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure.

Effects on levels of glutathione and some related enzymes in tissues after an acute arsenic exposure in rats and their relationship to dietary protein deficiency.

Induction of cytochrome P450 1A1 gene expression by a vitamin K3 analog in mouse hepatoma Hepa-1c1c7 cells.

Familial intrahepatic cholestasis 1: studies of localization and function.

Association of c-myc overexpression and hyperproliferation with arsenite-induced malignant transformation.

7,12-Dimethylbenz[a]anthracene inhibition of steroid production in MA-10 mouse Leydig tumor cells is not directly linked to induction of CYP1B1.

Inducing effects of dioxin-like polychlorinated biphenyls on CYP1A in the human hepatoblastoma cell line HepG2, the rat hepatoma cell line H4IIE, and rat primary hepatocytes: comparison of relative potencies.

Persistent, low-dose 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure: effect on aryl hydrocarbon receptor expression in a dioxin-resistance model.

Accessibility and activity of the promoter for a dioxin-inducible ecto-ATPase gene.

Green fluorescent protein (GFP) as a marker of aryl hydrocarbon receptor (AhR) function in developing zebrafish (*Danio rerio*).

Biochemical and toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in immature male and female chickens.

Contribution of Mn-cofactored superoxide dismutase (SodA) to the virulence of *Streptococcus agalactiae*.

Use of cDNA microarrays to analyze dioxin-induced changes in human liver gene expression.

Dioxin-inducible transactivation in a chromosomal setting. Analysis of the acidic domain of the Ah receptor.

Use of a toxicokinetic model in the analysis of cancer mortality in relation to the estimated absorbed dose of dioxin (2,3,7,8-tetrachlorodibenzo-p-dioxin, TCDD).

Induction of hepatic 8-oxo-deoxyguanosine adducts by 2,3,7,8-tetrachlorodibenzo-p-dioxin in Sprague-Dawley rats is female-specific and estrogen-dependent.

Melatonin attenuates estradiol-induced oxidative damage to DNA: relevance for cancer prevention.

Hepatic vitamin A depletion is a sensitive marker of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure in four rodent species.

Teratogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice lacking the expression of EGF and/or TGF- α .

The hepatitis B virus HBx protein induces adherens junction disruption in a src-dependent manner.

Interaction of estrogen and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) with hepatic fatty acid synthesis and metabolism of male chickens (*Gallus domesticus*).

Protection of the Cyp1a2(-/-) null mouse against uroporphyrin and hepatic injury following exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Chronic toxicity of dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin to mink.

Subchronic Exposure of [3H]- 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in female B6C3F1 mice: relationship of steady-state levels to disposition and metabolism.

Physiological modeling of a proposed mechanism of enzyme induction by TCDD.

Differential regulation of cytochrome P450 1A1 and 1B1 by a combination of dioxin and pesticides in the breast tumor cell line MCF-7.

Regulation of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced tumor promotion by 17 beta-estradiol in female Sprague-Dawley rats.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on weight gain and hepatic ethoxyresorufin-o-deethylase (EROD) induction vary with ovarian hormonal status in the immature gonadotropin-primed rat model.

An overview of TCDD half-life in mammals and its correlation to body weight.

Interaction of estrogen and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in immature male chickens (*Gallus domesticus*).

Metabolism of equilenin in MCF-7 and MDA-MB-231 human breast cancer cells.

Correlation of cardiotoxicity mediated by halogenated aromatic hydrocarbons to aryl hydrocarbon receptor activation.

Suppression of CYP1A1 expression by 4-nonylphenol in murine Hepa-1c1c7 cells.

Toxicity of PCB-126 in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P4501A induction in several organ systems.

Comparative biodistribution and metabolism of carbon-11-labeled N-[2-(dimethylamino)ethyl]acridine-4-carboxamide and DNA-intercalating analogues.

Maximal aryl hydrocarbon receptor activity depends on an interaction with the retinoblastoma protein.

Acquired resistance to Ah receptor agonists in a population of Atlantic killifish (*Fundulus heteroclitus*) inhabiting a marine superfund site: in vivo and in vitro studies on the inducibility of xenobiotic metabolizing enzymes.

Androgen receptor antagonism by the organophosphate insecticide fenitrothion.

Aromatic hydrocarbon receptor (AhR). AhR nuclear translocator- and p53-mediated induction of the murine multidrug resistance *mdr1* gene by 3-methylcholanthrene and benzo(a)pyrene in hepatoma cells.

High-performance liquid chromatography/fluorescence detection of S-methylglutathione formed by glutathione-S-transferase T1 in vitro.

Genetic events associated with arsenic-induced malignant transformation: applications of cDNA microarray technology.

Effect of oral administration of excessive iron in adult ponies.

BAPS prize-1999: Lung growth induced by prenatal tracheal occlusion and its modifying factors: a study in the rat model of congenital diaphragmatic hernia.

Thyroid hormones, acute iron overload and the pathogenesis of cloudy swelling.

Organochlorine contaminants and biomarker response in double-crested cormorants nesting in Green Bay and Lake Michigan, Wisconsin, USA.

Benzo[a]pyrene-induced toxicity: paradoxical protection in *Cyp1a1*(-/-) knockout mice having increased hepatic BaP-DNA adduct levels.

Dioxins in bile in relation to those in the human liver and blood.

Enhanced systemic tissue distribution after dermal versus intravenous 3,3',4,4'-tetrachlorobiphenyl exposure: limited utility of radiolabel blood area under the curve and excretion data in dermal absorption calculations and tissue exposure assessment.

Histopathological alterations and induction of cytochrome P-450 1A in the liver and gills of the gilthead seabream (*Sparus aurata*) exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Differential effects of two lots of aroclor 1254 on enzyme induction, thyroid hormones, and oxidative stress.

A study of the effects of indometacin on liver mitochondria from rats, mice and humans.

Lipid peroxidation end products-responded induction of a preneoplastic marker enzyme glutathione S-transferase P-form (GST-P) in rat liver on administration via the portal vein.

Cytochrome CYP2E1 phenotyping and genotyping in the evaluation of health risks from exposure to polluted environments.

Effect of lactational exposure to 1,2,3,4- tetrachlorodibenzo-p-dioxin on cytochrome P-450 1A1 mRNA in the neonatal rat liver: quantitative analysis by the competitive RT-PCR method.

Inhibition of apoptosis in rat hepatocytes treated with 'non-dioxin-like' polychlorinated biphenyls.

Is hepatic cytochrome P4501A1 expression predictive of hepatic burdens of dioxins, furans, and PCBs in Atlantic tomcod from the Hudson River estuary?

Specific induction of metallothionein synthesis by mitochondrial oxidative stress.

Long-lived polyclonal B-cell lines derived from midgestation mouse embryo lymphohematopoietic progenitors reconstitute adult immunodeficient mice.

Role of substrates in the regulation of mitochondrial function in situ.

Polychlorinated dibenzo-p-dioxins, dibenzofurans, and polychlorinated biphenyls in human tissues, meat, fish, and wildlife samples from India.

Clustering of hepatotoxins based on mechanism of toxicity using gene expression profiles.

Induction of metallothionein in the livers of female Sprague-Dawley rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Bivalent metal ions modulate Cd²⁺ effects on isolated rat liver mitochondria.

Ascorbate and low concentrations of FeSO₄ induce Ca²⁺-dependent pore in rat liver mitochondria.

Fatal poisoning by butachlor and chlornitrofen ingested from a bottle marked as nitrofen.

Involvement of cyclooxygenase-2 in the potentiation of allyl alcohol-induced liver injury by bacterial lipopolysaccharide.

Metabolism of [¹⁴C]1,2,7,8-tetrachlorodibenzo-p-dioxin in a ruminating Holstein calf.

In vitro model using mouse hepatocytes for study of alcohol stress.

Arsenic induces expression of the multidrug resistance-associated protein 2 (MRP2) gene in primary rat and human hepatocytes.

Antimalarial drugs exacerbate rat liver microsomal lipid peroxidation in the presence of oxidants.

Disposition of polychlorinated dibenzo-p-dioxins, dibenzofurans, and non-ortho polychlorinated biphenyls in pregnant long evans rats and the transfer to offspring.

Biliary excretion of temocapril in zone 1- and zone 3-injured rat.

[Effect of perftoran on experimental hepatitis].

Production of superoxide anion, lipid peroxidation and DNA damage in the hepatic and brain tissues of rats after subchronic exposure to mixtures of TCDD and its congeners.

Effects of binary mixtures of six xenobiotics on hormone concentrations and morphometric endpoints of northern bobwhite quail (*Colinus virginianus*).

Induction of CYP1A by benzo[k]fluoranthene in human hepatocytes: CYP1A1 or CYP1A2?

Relative potencies of polychlorinated dibenzo-p-dioxin, dibenzofuran, and biphenyl congeners to induce cytochrome P4501A mRNA in a zebrafish liver cell line.

Inhibition of liver methionine adenosyltransferase gene expression by 3-methylcolanthrene: protective effect of S-adenosylmethionine.

Influence of culture system and medium enrichment on sulfotransferase and sulfatase expression in male rat hepatocyte cultures.

Enhancement of oxidative damage to cultured cells and *Caenorhabditis elegans* by mitochondrial electron transport inhibitors.

The mitochondrial consequences of uncoupling intact cells depend on the nature of the exogenous substrate.

Microarray analysis of hepatotoxins in vitro reveals a correlation between gene expression profiles and mechanisms of toxicity.

Regulation of cytochrome P450 in a primary culture of rainbow trout hepatocytes.

Heterogeneity and plasticity of hepatocyte lineage cells.

Long-term toxic impact of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the reproduction, sexual differentiation, and development of different life stages of *Gobiocypris rarus* and *Daphnia magna*.

Induction of cytochrome P450 1A1 gene expression, oxidative stress, and genotoxicity by carbaryl and thiabendazole in transfected human HepG2 and lymphoblastoid cells.

Acyl-CoA-binding protein in the armadillo Harderian gland: its primary structure and possible role in lipid secretion.

[Inhibitory effects of tea polyphenols and vitamin C on lipid peroxidation induced by FeSO₄- cysteine in isolated human plasma and carbon tetrachloride-induced liver free radical injury in mice].

Mitochondrial adaptation to in vivo polyunsaturated fatty acid deficiency: increase in phosphorylation efficiency.

PCB methyl sulphones in rat liver after exposure to PCB (Clophen A50): analysis and radiosynthesis of selected methylsulphonyl-PCBs.

Effects of cresols (o-, m-, and p-isomers) on the bioenergetic system in isolated rat liver mitochondria.

Associations of blood levels of PCB, HCHS, and HCB with numbers of lymphocyte subpopulations, in vitro lymphocyte response, plasma cytokine levels, and immunoglobulin autoantibodies.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of different cytotoxins on cytochrome P450 mediated monooxygenase functions and on oxidative state.

Induction of 7-ethoxyresorufin-O-deethylase activity by planar chlorinated hydrocarbons and polycyclic aromatic hydrocarbons in cell lines from the rainbow trout pituitary.

Kinetics of monochloroacetic acid in adult male rats after intravenous injection of a subtoxic and a toxic dose.

In situ hybridization and immunohistochemical analysis of cytochrome P450 1B1 expression in human normal tissues.

Cytochrome P450 2E1 metabolically activates propargyl alcohol: propionaldehyde-induced hepatocyte cytotoxicity.

Liver Cancer in Viet Nam: Risk Estimates of Viral Infections and Dioxin Exposure in the South and North Populations.

Beneficial effect of nitric oxide synthase inhibitor on hepatotoxicity induced by allyl alcohol.

Toxic effects of arsenic (III) on some hematopoietic and central nervous system variables in rats and guinea pigs.

Primary culture of chicken hepatocytes as an in vitro model for determining the influence of dioxin.

Carcinogen biomarkers for lung or oral cancer chemoprevention trials.

Metabolism of ochratoxin A: absence of formation of genotoxic derivatives by human and rat enzymes.

Inhalation toxicity studies of the alpha,beta-unsaturated ketones: 2-cyclohexene-1-one.

Health risks posed by use of Di-2-ethylhexyl phthalate (DEHP) in PVC medical devices: a critical review.

Pretreatment of whole blood for use in immunochromatographic assays for hepatitis B virus surface antigen.

Effects of subchronic exposure to complex mixtures of dioxin-like and non-dioxin-like polyhalogenated aromatic compounds on thyroid hormone and vitamin A levels in female Sprague-Dawley rats.

Associations between laboratory parameters and outcome of paraquat poisoning.

Evaluation of the in vitro genetic toxicity of 4-(2, 4-dichlorophenoxy)butyric acid.

Combined effects of 2,4-D and azinphosmethyl on antioxidant enzymes and lipid peroxidation in liver of *Oreochromis niloticus*.

Butachlor, a suspected carcinogen, alters growth and transformation characteristics of mouse liver cells.

Purification and characterization of diquat (1,1'-ethylene-2, 2'-dipyridylum)- metabolizing enzyme from paraquat-resistant rat liver cytosol.

Evaluation of the genotoxic and cytochrome P450 monooxygenase-inhibitory potential of Dicuran on procaryotic and eucaryotic test systems.

Arsenic species that cause release of iron from ferritin and generation of activated oxygen.

72-kDa stress protein (hsp72) induced by administration of dimethylarsinic acid to mice accumulates in alveolar flat cells of lung, a target organ for arsenic carcinogenesis.

Evaluation of dietary and environmental risk factors for hyperthyroidism in cats.

Cancer mortality in four northern wheat-producing states.

Prevention of the down-regulation of gap junctional intercellular communication by green tea in the liver of mice fed pentachlorophenol.

Comparative toxicity of trivalent and pentavalent inorganic and methylated arsenicals in rat and human cells.

Effect of chlorinated hydrocarbons on expression of cytochrome P450 1A1, 1A2 and 1B1 and 2- and 4-hydroxylation of 17beta-estradiol in female Sprague-Dawley rats.

Increase in production of ascorbate radical in tissues of rat treated with paraquat.

In vivo cytokine production and resistance to infection after acute exposure to 3,4-dichloropropionaniline.

Immunodetection of hepatic peroxisomal PMP70 as an indicator of peroxisomal proliferation in the mummichog, *Fundulus heteroclitus*.

Effects of the herbicide Roundup on the ultrastructural pattern of hepatocytes in carp (*Cyprinus carpio*).

Influence of Adriamycin and paraquat on antioxidant enzyme expression in primary rat hepatocytes.

Subchronic toxicity of chlorpropham (CIPC) in ICR mice.

Prolonged cholestasis after acute paraquat poisoning through skin absorption.

Role of glutathione in Thiobencarb resistance in the European eel *Anguilla anguilla*.

No significant paraquat-induced oxidative DNA damage in rats.

Effects of molybdate and pentachlorophenol on the sulfation of acetaminophen.

Cyanamide-induced liver dysfunction after abstinence in alcoholics: a long-term follow-up study on four cases.

Comparison of cyanamide and disulfiram in effects on liver function.

Effects of L-2-oxothiazolidine-4-carboxylate on the cytotoxic activity and toxicity of cyclophosphamide in mice bearing B16F10 melanoma liver metastases.

Sex differences in diquat-induced hepatic necrosis and DNA fragmentation in Fischer 344 rats.

Monomethylarsonous acid (MMA(III)) is more toxic than arsenite in Chang human hepatocytes.

A long-term follow-up of lung function in survivors of paraquat poisoning.

Genetic variation of basal iron status, ferritin and iron regulatory protein in mice: potential for modulation of oxidative stress.

A new diquat derivative appropriate for colourimetric measurements of biological materials in the presence of paraquat.

[Liver steatosis and disorders of mitochondrial oxidative phosphorylation after experimental administration of simazine].

Clofibrate pretreatment in mice confers resistance against hepatic lipid peroxidation.

Paraquat-induced lipid peroxidation and injury in Ehrlich ascites tumor cells.

The antihypertensive hydralazine is an efficient scavenger of acrolein.

Developmental toxicity studies in rats and rabbits with 3,5,6-trichloro-2-pyridinol, the major metabolite of chlorpyrifos.

Hepatic disposition of neurotoxins and pesticides.

Ethanol potentiates hypoxic liver injury: role of hepatocyte Na(+) overload.

Role of reactive oxygen intermediates in the decrease of hepatic cytochrome P450 activity by serum of humans and rabbits with an acute inflammatory reaction.

Preventive effects of dietary cabbage acylated anthocyanins on paraquat-induced oxidative stress in rats.

Ethanol patch test: a simple method for identifying the effectiveness of cyanamide in alcoholics.

Comparative metabolism of chloroacetamide herbicides and selected metabolites in human and rat liver microsomes.

Different cell death mechanisms and gene expression in human cells induced by pentachlorophenol and its major metabolite, tetrachlorohydroquinone.

The role of conjugation in hepatotoxicity of troglitazone in human and porcine hepatocyte cultures.

7-Hydroperoxycholesterol as a marker of oxidative stress in rat kidney induced by paraquat.

Deregulated manganese superoxide dismutase expression and resistance to oxidative injury in p53-deficient cells.

Induction of rat hepatic aryl sulfotransferase (SULT1A1) gene expression by triamcinolone acetonide: impact on minoxidil-mediated hypotension.

Dose-dependent effects on tissue distribution and metabolism of dimethylarsinic acid in the mouse after intravenous administration.

In vitro genotoxicity of terbutryn evaluated by the alkaline single-cell microgel-electrophoresis "comet" assay.

Effects of yukmi, an herbal formula, on the liver of senescence accelerated mice (SAM) exposed to oxidative stress.

Evaluation of the developmental toxicity of thalidomide using frog embryo teratogenesis assay-xenopus (FETAX): biotransformation and detoxification.

The human cytochrome P450 1A1 mRNA is rapidly degraded in HepG2 cells.

Liver tumor-promoting activity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in TCDD-sensitive and TCDD-resistant rat strains.

Contribution of planar (0-1 ortho) and nonplanar (2-4 ortho) fractions of Aroclor 1260 to the induction of altered hepatic foci in female Sprague-Dawley rats.

The mercapturic acid biotransformation pathway of hexachlorobenzene is not involved in the induction of splenomegaly, or skin and lung lesions in the Brown Norway rat.

NRH:quinone oxidoreductase2 (NQO2).

Failure of Ah receptor to mediate induction of cytochromes P450 in the CYP1 family in the human hepatoma line SK-Hep-1.

3',4'-dimethoxyflavone as an aryl hydrocarbon receptor antagonist in human breast cancer cells.

2,3,7,8-tetrachlorodibenzo-p-dioxin increases serum and kidney retinoic acid levels and kidney retinol esterification in the rat.

2,2',4,6,6'-pentachlorobiphenyl induces apoptosis in human monocytic cells.

Down-regulation of murine Cyp1a-1 in mouse hepatoma Hepa-1c1c7 cells by bisphenol A.

[Membrane disorder and free radical].

[Diagnosis of acute poisoning].

Estimation of dioxin and furan elimination rates with a pharmacokinetic model.

Protective effects of herbimycin A on hepatic reperfusion injury.

Arsenic methylation capacity and skin cancer.

Iron deficiency due to excessive therapeutic phlebotomy in hemochromatosis.

Comparative studies on the effects of green tea extracts and individual tea catechins on human CYP1A gene expression.

Effect of *Withania somnifera* glycowithanolides on iron-induced hepatotoxicity in rats.

The application of reporter gene assays for the determination of the toxic potency of diffuse air pollution.

The transcriptional signature of dioxin in human hepatoma HepG2 cells.

Central versus peripheral mediation of naloxone's perfusion effects in endotoxic rats.

Dose-response relationships for induction of CYP1A1 and CYP1A2 enzyme activity in liver, lung, and skin in female mice following subchronic exposure to polychlorinated biphenyls.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on initiation and promotion of GST-P-positive foci in rat liver: A quantitative analysis of experimental data using a stochastic model.

Disruption of dioxin-inducible phase I and phase II gene expression patterns by cadmium, chromium, and arsenic.

Characterisation of multidrug-resistant Ehrlich ascites tumour cells selected in vivo for resistance to etoposide.

Molecular cloning and expression of Cu/Zn-containing superoxide dismutase from *Fasciola hepatica*.

Mobilization of vitamin A stores in rats after administration of 2,3, 7,8-tetrachlorodibenzo-p-dioxin: a kinetic analysis.

Effect of CGS 26303, an endothelin-converting enzyme-neutral endopeptidase inhibitor, on nitrofen-induced congenital diaphragmatic hernia in the rat.

Diflubenzuron, a benzoyl-urea insecticide, is a potent inhibitor of TCDD-induced CYP1A1 expression in HepG2 cells.

Analysis of difference in vivo effects of TCDD between c-src $+/+$ mice, c-src deficient, $-/+$ and $-/-$ B6, 129-Src(tm 1 sor) mice and their wild-type littermates.

Dioxins: WHO's tolerable daily intake (TDI) revisited.

Density-dependent growth of normal and nodular hepatocytes.

Human health effects after exposure to 2,3,7,8-TCDD.

Animal studies addressing the carcinogenicity of TCDD (or related compounds) with an emphasis on tumour promotion.

Non-carcinogenic effects of TCDD in animals.

Toxicity of chronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in diethylnitrosamine-initiated ovariectomized rats implanted with subcutaneous 17 beta-estradiol pellets.

Hepatocarcinogenesis in female Sprague-Dawley rats following discontinuous treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Ah receptor ligands and tumor promotion: survival of neoplastic cells.

Comparison of oxidative stress response parameters in newborn mouse liver versus simian virus 40 (SV40)-transformed hepatocyte cell lines.

CDC investigations of noninfectious outbreaks of adverse events in hemodialysis facilities, 1979-1999.

Development and modification of a recombinant cell bioassay to directly detect halogenated and polycyclic aromatic hydrocarbons in serum.

Chronic ethanol ingestion increases efficiency of oxidative phosphorylation in rat liver mitochondria.

Effects of histone deacetylase inhibitors on the Ah receptor gene promoter.

Organophosphates and their impact on the global environment.

Toxic action/toxicity.

Differential expression of phosphatidylethanol-amine-binding protein in rat hepatoma cell lines: analyses of tumor necrosis factor- α -resistant cKDH-8/11 and -sensitive KDH-8/YK cells by two-dimensional gel electrophoresis.

Effects of TCDD on thyroid hormone homeostasis in the rat.

Serum alters the uptake and relative potencies of halogenated aromatic hydrocarbons in cell culture bioassays.

Responses of transgenic mouse lines p53(+/-) and Tg.AC to agents tested in conventional carcinogenicity bioassays.

Geographic variation in hematological variables in adult and pre fledgling herring gulls (*Larus argentatus*) and possible associations with organochlorine exposure.

Pharmacokinetics of orally administered camptothecins.

The contributions of various chloroquine salts to the biliary and urinary excretion of hepatic paracetamol conjugation metabolites in the rat.

N-methoxyindole-3-carbinol is a more efficient inducer of cytochrome P-450 1A1 in cultured cells than indol-3-carbinol.

Sodium arsenite induces the stress response in the gut and decreases bacterial translocation in a burned mouse model with gut-derived sepsis.

Effect of the adrenal 11- β -hydroxylase inhibitor metyrapone on human hepatic cytochrome P-450 expression: induction of cytochrome P-450 3A4.

Cytochrome P4501A induction and porphyrin accumulation in PLHC-1 fish cells exposed to sediment and oil shale extracts.

Insulin increased cAMP phosphodiesterase activity antagonizing metabolic actions of glucagon in rat hepatocytes cultured with herbimycin A.

Metabolism of N-isopropylacetanilide in rat.

Regulation of prostaglandin endoperoxide H synthase-2 induction by dioxin in rat hepatocytes: possible c-Src-mediated pathway.

Subcellular localization of the aryl hydrocarbon receptor is modulated by the immunophilin homolog hepatitis B virus X-associated protein 2.

Monomethylarsonic acid reductase and monomethylarsonous acid in hamster tissue.

Effect of arsenite on the induction of CYP1A4 and CYP1A5 in cultured chick embryo hepatocytes.

CYP2A5/CYP2A6 expression in mouse and human hepatocytes treated with various in vivo inducers.

Chronic toxicity of arsenic in goats: clinicobiochemical changes, pathomorphology and tissue residues.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of different cytotoxins on cytochrome P450 isoforms expression and on glycogen content.

Endotoxin (lipopolysaccharide)-induced nitric oxide production in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated Fischer rats: detection of nitrosyl hemoproteins by EPR spectroscopy.

Effect of a dioxin-like PCB (CB 126) on the biotransformation and genotoxicity of benzo.

Toxicity of TCDD in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P450 1A induction in several organ systems.

Pathologic alterations in adult rainbow trout, *Oncorhynchus mykiss*, exposed to dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Isolation of MFO inducers from tissues of white suckers caged in bleached kraft mill effluent.

Portosystemic shunting and persistent fetal vascular structures in aryl hydrocarbon receptor-deficient mice.

Arsenic metabolism in seaweed-eating sheep from Northern Scotland.

Experimental model of hepatic fibrosis following repeated periportal necrosis induced by allyl alcohol.

Fc receptor mediated endocytosis of small soluble immunoglobulin G immune complexes in Kupffer and endothelial cells from rat liver.

Genotoxicity of urban air pollutants in the Czech Republic. Part II. DNA adduct formation in mammalian cells by extractable organic matter.

Interleukin-6 negatively regulates the expression of pregnane X receptor and constitutively activated receptor in primary human hepatocytes.

Evidence for a trigger function of valproic acid in xenobiotic-induced hepatotoxicity.

Cytosolic $[Ca^{2+}]$ modulates basal GLUT1 activity and plays a permissive role in its activation by metabolic stress and insulin in rat epithelial cells.

Aminomethylphosphonate and 2-aminoethylphosphonate as (^{31}P) -NMR pH markers for extracellular and cytosolic spaces in the isolated perfused rat liver.

Suppression of carbonic anhydrase III in rat liver by a dioxin-related toxic compound, coplanar polychlorinated biphenyl, 3, 3',4,4',5-pentachlorobiphenyl.

On the cardiac contractile, electrophysiological and biochemical effects of endothall, a protein phosphatase inhibitor.

Pentoxifylline attenuates bacterial lipopolysaccharide-induced enhancement of allyl alcohol hepatotoxicity.

Biliary and urinary excretion of inorganic arsenic: monomethylarsonous acid as a major biliary metabolite in rats.

Relative potency values derived from hepatic vitamin A reduction in male and female Sprague-Dawley rats following subchronic dietary exposure to individual polychlorinated dibenzo-p-dioxin and dibenzofuran congeners and a mixture thereof.

Comparative induction of CYP1A1 expression by pyridine and its metabolites.

Differential response of cellular antioxidant mechanism of liver and kidney to arsenic exposure and its relation to dietary protein deficiency.

Vanillin as an antioxidant in rat liver mitochondria: inhibition of protein oxidation and lipid peroxidation induced by photosensitization.

Upstream regulatory elements in chick heme oxygenase-1 promoter: a study in primary cultures of chick embryo liver cells.

Enzyme cytochemical localization of sarcosine oxidase activity in the liver and kidney of several mammals.

Pathological changes of hepatic artery and portal vein, after allyl-alcohol and carbon tetrachloride administration. An experimental study.

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters melatonin metabolism in fish hepatocytes.

Cloning and functional characterization of the bile acid-sensitive methotrexate carrier from rat liver cells.

Green tea polyphenols and tannic acid act as potent inhibitors of phorbol ester-induced nitric oxide generation in rat hepatocytes independent of their antioxidant properties.

Peroxisomes: biochemistry, molecular biology and genetic diseases- a video programme for teaching students.

Effect of transforming growth factor-beta1 on cytochrome P450 expression: inhibition of CYP1 mRNA and protein expression in primary rat hepatocytes.

Identification of theta-class glutathione S-transferase in liver cytosol of the marmoset monkey.

Metabolic inactivation of five glycidyl ethers in lung and liver of humans, rats and mice in vitro.

Toxic assessment of PCBs by the 2,3,7,8-tetrachlorodibenzo-p-dioxin equivalent in common cormorant (*Phalacrocorax carbo*) from Japan.

A novel 4 S [3H]beta-naphthoflavone-binding protein in liver cytosol of female Sprague-Dawley rats treated with aryl hydrocarbon receptor agonists.

Effect of gestational and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on the level and catalytic activities of hepatic microsomal CYP1A in prepubertal and adult rats.

The relative abilities of TCDD and its congeners to induce oxidative stress in the hepatic and brain tissues of rats after subchronic exposure.

Time course of arsenite-induced copper accumulation in rat kidney.

Toxicokinetics.

Effect of bioactive tannoid principles of *Embllica officinalis* on iron-induced hepatic toxicity in rats.

Studies on the mechanisms of arsenic-induced self tolerance developed in liver epithelial cells through continuous low-level arsenite exposure.

Oxidative stress in female B6C3F1 mice following acute and subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

TCDD induces CYP1A4 and CYP1A5 in chick liver and kidney and only CYP1A4, an enzyme lacking arachidonic acid epoxygenase activity, in myocardium and vascular endothelium.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-induced changes in activities of nuclear protein kinases and phosphatases affecting DNA binding activity of c-Myc and AP-1 in the livers of guinea pigs.

Role of p53 tumor suppressor gene in the toxicity of TCDD, endrin, naphthalene, and chromium (VI) in liver and brain tissues of mice.

Toxicology of environmental chemicals in the flounder (*Platichthys flesus*) with emphasis on the immune system: field, semi-field (mesocosm) and laboratory studies.

NTP Toxicology and Carcinogenesis Studies of Pyridine (CAS No. 110-86-1) in F344/N Rats, Wistar Rats, and B6C3F1 Mice (Drinking Water Studies).

[Degradation of 4,9-dichlorodibenzodioxin in rat liver microsomes].

Sensitivity analysis of a physiological model for 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): assessing the impact of specific model parameters on sequestration in liver and fat in the rat.

1,2-Dichlorobenzene-mediated hepatocellular oxidative stress in Fischer-344 and Sprague-Dawley rats.

Thiobencarb-induced embryotoxicity in medaka (*Oryzias latipes*): stage-specific toxicity and the protective role of chorion.

Identification and characterization of a novel hepatic canalicular ATP diphosphohydrolase.

Probing subunit interactions in alpha class rat liver glutathione S-transferase with the photoaffinity label glutathionyl S-[4-(succinimidyl)benzophenone].

Sodium monochloroacetate causes cytotoxic effects, an increased lactate and pyruvate level and induces ultra structural and cytoskeletal alterations in cultured kidney and liver epithelial cells.

2,3,7,8 Tetrachlorodibenzo-p-dioxin induction of cytochrome P4501A in cultured rat and human hepatocytes.

Biliary excretion of bile acids and organic anions in zone 1- and zone 3-injured rats.

Acute administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in pregnant Long Evans rats: association of measured tissue concentrations with developmental effects.

Glutathione depletion in a liver microsomal assay as an in vitro biomarker for reactive metabolite formation.

Effect of arsenic trioxide on metallothionein and its conversion to different arsenic metabolites in hen liver.

Yang-Gan-Wan protects mice against experimental liver damage.

[Fe²⁺-induced oxidative processes in the liver mitochondria of rats].

Nongenotoxic (epigenetic) carcinogens: pesticides as an example. A critical review.

Uncoupling effect of anacardic acids from cashew nut shell oil on oxidative phosphorylation of rat liver mitochondria.

Enzymatic reduction of arsenic compounds in mammalian systems: reduction of arsenate to arsenite by human liver arsenate reductase.

Competitive behavior in the interactive toxicology of halogenated aromatic compounds.

Estrogen enhances induction of cytochrome P-4501A1 by 2,3,7, 8-tetrachlorodibenzo-p-dioxin in liver of female Long-Evans rats.

trans-Activation of PPARalpha and PPARgamma by structurally diverse environmental chemicals.

Protective role of germanium-132 against paraquat-induced oxidative stress in the livers of senescence-accelerated mice.

Cellular glutathione peroxidase protects mice against lethal oxidative stress induced by various doses of diquat.

High levels of dietary vitamin E do not replace cellular glutathione peroxidase in protecting mice from acute oxidative stress.

Effect of chloridazone on the animal organism.

Persistent health effects of dioxin contamination in herbicide production.

Effect of cyanamide on toxicity and glutathione depletion in rat hepatocyte cultures: differences between two dichloropropanol isomers.

Effects of a herbicide formulation, Tordon 75D, and its individual components on the oxidative functions of mitochondria.

Fatal paraquat poisoning: report of two cases.

Acute basagran poisoning mimicking neuroleptic malignant syndrome.

Selenium-dependent cellular glutathione peroxidase protects mice against a pro-oxidant-induced oxidation of NADPH, NADH, lipids, and protein.

Ames assays and unscheduled DNA synthesis assays on 2, 4-dichlorophenoxyacetic acid and its derivatives.

Degeneration and gliosis in rat retina and central nervous system following 3,3'-iminodipropionitrile exposure.

An evaluation of the carcinogenic potential of the herbicide alachlor to man.

Dimethylarsinic acid effects on DNA damage and oxidative stress related biochemical parameters in B6C3F1 mice.

Hepato-toxic effect of diuron in albino rats.

Induced mono-(ADP)-ribosylation of rat liver cytosolic proteins by lipid peroxidant agents.

Protective effects of dietary nasunin on paraquat-induced oxidative stress in rats.

Liver preneoplastic changes in mice treated with the herbicide fomesafen.

Acrolein-induced toxicity--defective mitochondrial function as a possible mechanism.

Toxicology and carcinogenesis studies of pentachlorophenol in rats.

Maternal and developmental toxicity of halogenated 4'-nitrodiphenyl ethers in mice.

Urinary excretion of biomarkers for radical-induced damage in rats treated with NDMA or diquat and the effects of calcium carbimide co-administration.

Content of 8-oxodG in chromosomal DNA of *Sparus aurata* fish as biomarker of oxidative stress and environmental pollution.

Studies on paraquat-induced oxidative stress in rat liver.

Glutathione-dependent cytotoxicity of the chloroacetanilide herbicides alachlor, metolachlor, and propachlor in rat and human hepatoma-derived cultured cells.

The functional and structural observations of the neonatal reproductive system of alligators exposed in ovo to atrazine, 2,4-D, or estradiol.

Acute poisoning with a herbicide containing imazapyr (Arsenal): a report of six cases.

Cytotoxic and porphyrinogenic effects of diphenyl ethers in cultured rat hepatocytes: chlornitrofen (CNP), CNP-amino, chlomethoxyfen and bifenoX.

Dose-specific production of chlorinated quinone and semiquinone adducts in rodent livers following administration of pentachlorophenol.

Cytotoxicity of lindane and paraquat to human hepatoma cell lines.

Promoting activity of the herbicide dicamba (2-methoxy-3, 6-dichlorobenzoic acid) in two stage hepatocarcinogenesis.

Serological and biochemical follow-up in cattle naturally infected with *Fasciola hepatica*, and comparison with a climate model for predicting risks of fasciolosis.

In vitro and in vivo comparison between the effects of treatment with adenosine triphosphate and treatment with buthionine sulfoximine on chemosensitization and tumour growth of B16 melanoma.

Pentachlorophenol (PCP) produces liver oxidative stress and promotes but does not initiate hepatocarcinogenesis in B6C3F1 mice.

Enhanced potential for oxidative stress in hyperinsulinemic rats: imbalance between hepatic peroxisomal hydrogen peroxide production and decomposition due to hyperinsulinemia.

Oxidative stress as a mechanism of chronic cadmium-induced hepatotoxicity and renal toxicity and protection by antioxidants.

Ethanol co-exposure increases lethality of allyl alcohol in male Sprague-Dawley rats.

[Features of the inhibition of catalase activity by 3-amino-1,2,4-triazole in erythrocytes and liver of rats with streptozotocin diabetes].

Alpha, beta-unsaturated aldehydes mediate inducible expression of glutathione S-transferase in hepatoma cells through activation of the antioxidant response element (ARE).

Higher content of insulin-like growth factor-I in dystrophic mdx mouse: potential role in the spontaneous regeneration through an electrophysiological investigation of muscle function.

In vitro metabolism of simazine, atrazine and propazine by hepatic cytochrome P450 enzymes of rat, mouse and guinea pig, and oestrogenic activity of chlorotriazines and their main metabolites.

Attenuation of endogenous oxidative stress-induced cell death by cytochrome P450 inhibitors in primary cultures of rat hepatocytes.

S-methyl N-butylthiocarbamate sulfoxide: selective carbamoylating agent for mouse mitochondrial aldehyde dehydrogenase.

Metabolism of [(1)(4)C]prometryn in rats.

Knockout of cellular glutathione peroxidase gene renders mice susceptible to diquat-induced oxidative stress.

In vitro metabolism of alachlor by human liver microsomes and human cytochrome P450 isoforms.

[Effect of alcohol intoxication and aldehyde dehydrogenase inhibitors on lipid peroxidation in rat liver].

Comparison of human and rat metabolism of molinate in liver microsomes and slices.

Induction of the multispecific organic anion transporter (cMoat/mrp2) gene and biliary glutathione secretion by the herbicide 2,4,5-trichlorophenoxyacetic acid in the mouse liver.

Enzymatic synthesis of 4-amino-3,5-diethylphenyl sulfate, a rodent metabolite of alachlor.

Biotransformation of pentachlorophenol, aniline and biphenyl in isolated rainbow trout (*Oncorhynchus mykiss*) hepatocytes: comparison with in vivo metabolism.

In vitro metabolism of chlorotriazines: characterization of simazine, atrazine, and propazine metabolism using liver microsomes from rats treated with various cytochrome P450 inducers.

Reactive oxygen species participate in mdr1b mRNA and P-glycoprotein overexpression in primary rat hepatocyte cultures.

[Dietary fiber inhibits the incidence of hepatic metastasis with the anti-oxidant activity and portal scavenging functions].

Inhibition of CYP1A1 enzyme activity in mouse hepatoma cell culture by soybean isoflavones.

Effect of prenatal exposure to TCDD on the promotion of endometriotic lesion growth by TCDD in adult female rats and mice.

Arsenic-induced oxidative stress and its reversibility following combined administration of N-acetylcysteine and meso 2,3-dimercaptosuccinic acid in rats.

In vitro methylation of arsenite by rabbit liver cytosol: effect of metal ions, metal chelating agents, methyltransferase inhibitors and uremic toxins.

The significance of excursions above the ADI: duration in relation to pivotal studies.

In vivo cisplatin resistance depending upon canalicular multispecific organic anion transporter (cMOAT).

Quantitative analysis of dose- and time-dependent promotion of four phenotypes of altered hepatic foci by 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats.

Loss of wild-type carrier-mediated L-carnitine transport activity in hepatocytes of juvenile visceral steatosis mice.

Modulation of cytochrome P4501A1 activity by ascorbigen in murine hepatoma cells.

Long term substitution and specific immune responses after transfer of bovine peripheral blood lymphocytes into severe combined immunodeficient mice.

Ferrous sulfate toxicity: a review of autopsy findings.

Mutation of beta-catenin is an early event in chemically induced mouse hepatocellular carcinogenesis.

Effects of CYP1A2 on disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin, 2,3,4,7,8-pentachlorodibenzofuran, and 2,2',4,4',5,5'-hexachlorobiphenyl in CYP1A2 knockout and parental (C57BL/6N and 129/Sv) strains of mice.

Characteristics of L-carnitine transport in cultured human hepatoma HLF cells.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on liver phosphoenolpyruvate carboxykinase (PEPCK) activity, glucose homeostasis and plasma amino acid concentrations in the most TCDD-susceptible and the most TCDD-resistant rat strains.

Altered bcl-2 family expression during non-genotoxic hepatocarcinogenesis in mice.

Multiple roles of ligand in transforming the dioxin receptor to an active basic helix-loop-helix/PAS transcription factor complex with the nuclear protein Arnt.

Regulation of matrix metalloproteinase-2 (MMP-2) by hepatocyte growth factor/scatter factor (HGF/SF) in human glioma cells: HGF/SF enhances MMP-2 expression and activation accompanying up-regulation of membrane type-1 MMP.

Differential toxicities of TCDD in vivo among normal, c-src knockout, geldanamycin- and quercetin-treated mice.

Signal transduction-mediated CYP1A1 induction by omeprazole in human HepG2 cells.

p27(Kip1) induction and inhibition of proliferation by the intracellular Ah receptor in developing thymus and hepatoma cells.

A chimeric aryl hydrocarbon receptor knockout mouse model indicates that aryl hydrocarbon receptor activation in hematopoietic cells contributes to the hepatic lesions induced by 2,3,7, 8-tetrachlorodibenzo-p-dioxin.

Lipoxin A4: a new class of ligand for the Ah receptor.

[Anemia and its treatment with peroral anti-anemia agents in women during the postpartum period].

Toxicity of 3,3',4,4'-tetrachloroazoxybenzene in rats and mice.

Suppressive effects of alpha-Hederin on 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated murine Cyp1a-1 expression in the mouse hepatoma Hepa-1c1c7 cells.

Toxicity of 3,3',4,4'-tetrachloroazobenzene in rats and mice.

Structural and mechanistic aspects of transcriptional induction of cytochrome P450 1A1 by benzimidazole derivatives in rat hepatoma H4IIE cells.

Induction of altered hepatic foci by a mixture of dioxin-like compounds with and without 2,2',4,4',5,5'-hexachlorobiphenyl in female Sprague-Dawley rats.

Flavone antagonists bind competitively with 2,3,7, 8-tetrachlorodibenzo-p-dioxin (TCDD) to the aryl hydrocarbon receptor but inhibit nuclear uptake and transformation.

Cytochrome P450 CYP1B1 determines susceptibility to 7, 12-dimethylbenz[a]anthracene-induced lymphomas.

Development of a stably transfected estrogen receptor-mediated luciferase reporter gene assay in the human T47D breast cancer cell line.

Relationships between environmental organochlorine contaminant residues, plasma corticosterone concentrations, and intermediary metabolic enzyme activities in Great Lakes herring gull embryos.

Plasmodium falciparum and Plasmodium yoelii: effect of the iron chelation prodrug dexrazoxane on in vitro cultures.

Isoform-specific induction of a human aldo-keto reductase by polycyclic aromatic hydrocarbons (PAHs), electrophiles, and oxidative stress: implications for the alternative pathway of PAH activation catalyzed by human dihydrodiol dehydrogenase.

Arsenic speciation in human organs following fatal arsenic trioxide poisoning--a case report.

Aryl hydrocarbon receptor regulation of ceramide-induced apoptosis in murine hepatoma 1c1c7 cells. A function independent of aryl hydrocarbon receptor nuclear translocator.

Tryptanthrins and other tryptophan-derived agonists of the dioxin receptor.

Differential response to benzo[A]pyrene in human lung adenocarcinoma cell lines: the absence of aryl hydrocarbon receptor activation.

Human cytochrome P4501A2.

Effect of arachidonic acid alone or with prooxidant on aldehyde dehydrogenases in hepatoma cells.

Influence of metabolic inhibitors on the intracellular accumulation and retention of adriamycin.

Diluted mainstream cigarette smoke condensates activate estrogen receptor and aryl hydrocarbon receptor-mediated gene transcription.

Trovafloxacin: an overview.

On the role of c-Jun in the induction of PAI-1 gene expression by phorbol ester, serum, and IL-1alpha in HepG2 cells.

Ubiquitinated aldolase B accumulates during starvation-induced lysosomal proteolysis.

Cytotoxicity of cadmium and characteristics of its transport in cardiomyocytes.

Effects of phenylarsine oxide on expression of heme oxygenase-1 reporter constructs in transiently transfected cultures of chick embryo liver cells.

Effects of phenolic antioxidants and flavonoids on DNA synthesis in rat liver, spleen, and testis in vitro.

The anti-estrogenicity of Ah receptor agonists in carp (*Cyprinus carpio*) hepatocytes.

Enzymatic reduction of arsenic compounds in mammalian systems: the rate-limiting enzyme of rabbit liver arsenic biotransformation is MMA(V) reductase.

Metabolism-based polycyclic aromatic acetylene inhibition of CYP1B1 in 10T1/2 cells potentiates aryl hydrocarbon receptor activity.

Analysis of aryl hydrocarbon receptor-mediated signaling during physiological hypoxia reveals lack of competition for the aryl hydrocarbon nuclear translocator transcription factor.

Differential protooncogene expression in Sprague Dawley and Fischer 344 rats during 1,2-dichlorobenzene-induced hepatocellular regeneration.

pH-dependent uptake of irinotecan and its active metabolite, SN-38, by intestinal cells.

NTP Toxicology and Carcinogenesis Studies of Triethanolamine (CAS No. 102-71-6) in F344 Rats and B6C3F1 Mice (Dermal Studies).

Role of glutathione and reactive oxygen intermediates in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immune suppression in C57Bl/6 mice.

Arsenite uptake and metabolism by rat hepatocyte primary cultures in comparison with kidney- and hepatocyte-derived rat cell lines.

Dose-dependent localization of TCDD in isolated centrilobular and periportal hepatocytes.

Effect of sodium arsenite on heme metabolism in cultured chick embryo hepatocytes.

[Significance of urinary concentrations of S-benzyl-N-acetylcysteine (S-BMA) in subjects exposed to toluene].

Energetics of trout hepatocytes during A23187-induced disruption of Ca²⁺ homeostasis.

Different change patterns of the isozymes of cytochrome P450 and glutathione S-transferases in chemically induced liver damage in rat.

Cytological and biochemical alterations in *Carassius auratus* hepatocytes from exposure to sediment containing dioxins and related compounds.

Hepatic Ah receptor binding affinity for 2,3,7,8-tetrachlorodibenzo-p-dioxin: similarity between beagle dog and cynomolgus monkey.

Development of selective aryl hydrocarbon receptor modulators for treatment of breast cancer.

Changes in mRNAs of inducible nitric oxide synthase and interleukin-1 beta in the liver, kidney and lung tissues of rats acutely exposed to paraquat.

Ability of polycyclic aromatic hydrocarbons to induce 7-ethoxyresorufin-o-deethylase activity in a trout liver cell line.

Participation of different cell types in the restitutive response of the rat liver to periportal injury induced by allyl alcohol.

Hexachlorobenzene, a dioxin-type compound, increases malic enzyme gene transcription through a mechanism involving the thyroid hormone response element.

High-performance liquid chromatographic-fluorescent method to determine chloroacetaldehyde, a neurotoxic metabolite of the anticancer drug ifosfamide, in plasma and in liver microsomal incubations.

Role of the ADP/ATP and aspartate/glutamate antiporters in the uncoupling effect of fatty acids, lauryl sulfate, and 2, 4-dinitrophenol in liver mitochondria.

Estrogenic potencies of several environmental pollutants, as determined by vitellogenin induction in a carp hepatocyte assay.

Analyses of tissues of eight marine species from Atlantic and Pacific coasts for dioxin-like chlorobiphenyls (CBs) and total CBs.

Influence of lead acetate and selected metal salts on tryptophan binding to rat hepatic nuclei.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of various mitogens and cytotoxins on cytochrome P450 (P450) isoforms expression and on P450 mediated monooxygenase functions.

Metabolism of arsenic in primary cultures of human and rat hepatocytes.

Enzymatic methylation of arsenic compounds. VII. Monomethylarsonous acid (MMAIII) is the substrate for MMA methyltransferase of rabbit liver and human hepatocytes.

The existence of the 4S polycyclic aromatic hydrocarbon-protein binding in 14-day-old chick embryo liver.

Targeted delivery of oligodeoxynucleotides to parenchymal liver cells in vivo.

Effects of pentachlorophenol and hydroxylated polychlorinated biphenyls on thyroid hormone conjugation in a rat and a human hepatoma cell line.

In vitro vitellogenin production by carp (*Cyprinus carpio*) hepatocytes as a screening method for determining (anti)estrogenic activity of xenobiotics.

Effect of arsenite on induction of CYP1A, CYP2B, and CYP3A in primary cultures of rat hepatocytes.

Cytosol-to-lysosome transport of free polymannose-type oligosaccharides. Kinetic and specificity studies using rat liver lysosomes.

Dietary intrinsic phytate protects colon from lipid peroxidation in pigs with a moderately high dietary iron intake.

Molecular cloning of retinal oxidase/aldehyde oxidase cDNAs from rabbit and mouse livers and functional expression of recombinant mouse retinal oxidase cDNA in *Escherichia coli*.

Influence of different types of effectors on the kinetic parameters of suicide inactivation of catalase by hydrogen peroxide.

NTP Toxicology and Carcinogenesis Studies of Pentachlorophenol (CAS NO. 87-86-5) in F344/N Rats (Feed Studies).

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-mediated membrane translocation of c-Src protein kinase in liver WB-F344 cells.

[Effects of hepatoprotective agents containing phospholipids on cytochrome P-450-dependent antitoxic liver function during experimental toxic hepatitis].

Toxicant-inflicted injury and stimulated tissue repair are opposing toxicodynamic forces in predictive toxicology.

Levels of dioxin-like compounds in sewage sludge determined with a bioassay based on EROD induction in chicken embryo liver cultures.

Interferon-gamma alone triggers the production of nitric oxide from serum-starved BNL CL.2, murine embryonic liver cells.

Decreases in cAMP phosphodiesterase activity in hepatocytes cultured with herbimycin A due to cellular microtubule polymerization related to inhibition of tyrosine phosphorylation of alpha-tubulin.

Time- and concentration-dependent induction of CYP1A1 and CYP1A2 in precision-cut rat liver slices incubated in dynamic organ culture in the presence of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin or 2,2',4,4',5,5'-hexachlorobiphenyl on vitamin K-dependent blood coagulation in male and female WAG/Rij-rats.

Reversal of sodium arsenite inhibition of rat liver microsomal Ca²⁺ pumping ATPase by vitamin C.

Determination of 4-hydroxy-2-nonenal in primary rat hepatocyte cultures by liquid chromatography with laser induced fluorescence detection.

Species differences in hepatocyte induction of CYP1A1 and CYP1A2 by omeprazole.

Characterization of the dose-response of CYP1B1, CYP1A1, and CYP1A2 in the liver of female Sprague-Dawley rats following chronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Cytochrome 1A1 induction by primaquine in human hepatocytes and HepG2 cells: absence of binding to the aryl hydrocarbon receptor.

Potency of various polycyclic aromatic hydrocarbons as inducers of CYP1A1 in rat hepatocyte cultures.

A Preliminary Comparison of LiverBeads[®] with a Conventional Rat Hepatocyte Culture Preparation: Some Aspects of Xenobiotic Metabolism and Related Toxicity.

Induction of cytochrome P450 1A and DNA damage in isolated rainbow trout (*Oncorhynchus mykiss*) hepatocytes by 2,3,7,8 tetrachlorodibenzo-p-dioxin.

Effect of inhibitors on the biotransformation of tamoxifen by female rat and mouse liver slices and homogenates.

Metabolism of polychlorinated dibenzo-p-dioxins by rat liver microsomes.

Experimental studies on the stem cell concept of liver regeneration. II.

The mutagenicity of benzo[a]pyrene in mouse small intestine.

Metabolic disposition of a monoterpene ketone, piperitenone, in rats: evidence for the formation of a known toxin, p-cresol.

Primary hepatic angiosarcoma: report of a case involving environmental arsenic exposure.

Chronic dietary toxicity study on 2,4-dichlorophenoxybutyric acid in the dog.

Mechanism of biochemical action of substituted 4-methylbenzopyran-2-ones. Part 3: A novel mechanism for the inhibition of biological membrane lipid peroxidation by dioxygenated 4-methylcoumarins mediated by the formation of a stable ADP-Fe-inhibitor mixed ligand complex.

Postservice mortality of US Air Force veterans occupationally exposed to herbicides in Vietnam: 15-year follow-up.

Mutagenic interactions of model chemical mixtures.

From toxicological problem to therapeutic use: the discovery of the mode of action of 2-(2-nitro-4-trifluoromethylbenzoyl)-1,3-cyclohexanedione (NTBC), its toxicology and development as a drug.

Lack of mammalian mutagenicity of the potent bacterial mutagen tris(2,3-dibromopropyl) phosphate and its metabolite 2-bromoacrolein.

Cellular glutathione peroxidase is the mediator of body selenium to protect against paraquat lethality in transgenic mice.

Metabolism and cytotoxicity of chlorpropham (CIPC) and its essential metabolites in isolated rat hepatocytes during a partial inhibition of sulphation and glucuronidation reactions: a comparative study.

Involvement of oxidative stress in paraquat-induced metallothionein synthesis under glutathione depletion.

[Lethal paraquat poisoning caused by spraying in a vinyl greenhouse of causing pulmonary fibrosis with a hepatorenal dysfunction].

[Morphologic findings in liver tissue in mice after long-term administration of the herbicide fomesafan].

Testicular toxicity of molinate in the rat: metabolic activation via sulfoxidation.

Acute 2,4-dichlorophenoxyacetic acid intoxication in broiler chicks.

Inorganic and methylated arsenic compounds induce cell death in murine macrophages via different mechanisms.

Mitochondrial NADH-quinone oxidoreductase of the outer membrane is responsible for paraquat cytotoxicity in rat livers.

Morphological changes in mitochondria and lysosomes of hepatocytes in acute intoxication with 2,4-dichlorophenoxyacetic acid (2,4-D).

[Inhibitory effect of green tea infusion of hepatotoxicity].

Ultrastructural changes in rat hepatocytes in acute intoxication with 2,4-dichlorophenoxyacetic acid (2,4-D).

Fetotoxic effect of 2,4-dichlorophenoxyacetic acid (2,4-D) in rats.

In vivo studies on genotoxicity of a soil fumigant, dazomet.

[Use of interferon in hepatic necrosis produced by paraquat and yellow phosphorus: experimental evaluation].

Accentuation of paraquat-induced toxicity by L-carnitine in mice.

Cytotoxicity of paraquat in freshly isolated rat hepatocytes: effects of L-carnitine.

Cytoplasmic liver cell inclusions--a typical feature of porphyria cutanea tarda--are absent in porphyria-related hepatic neoplasias.

Antioxidant and detoxifying enzymes in the liver and kidney of pheasants after intoxication by herbicides MCPA and ANITEN I.

'Golf ball liver': a cause of chronic hepatitis?

Extraperoxisomal targets of peroxisome proliferators: mitochondrial, microsomal, and cytosolic effects. Implications for health and disease.

32P-postlabeling detection of DNA adducts in mice treated with the herbicide Roundup.

Alpha,beta-unsaturated aldehydes increase glutathione S-transferase mRNA and protein: correlation with activation of the antioxidant response element.

Acute and chronic ethanol increases reactive oxygen species generation and decreases viability in fresh, isolated rat hepatocytes.

Chloracne and morbidity after dioxin exposure (preliminary results).

Feeding fish oil to rats accelerates the metabolism of hexachlorobenzene.

Effect of pentachlorophenol on immune function.

S-oxygenation of thiourea results in the formation of genotoxic products.

In vitro biotransformation of atrazine by rat liver microsomal cytochrome P450 enzymes.

Transport of paraquat by isolated renal proximal tubular segments from rabbits.

[Peroxisomes and peroxisome proliferators. Specific environmental poisons and therapeutic agents affecting lipid metabolism and hormone release].

Inhibitory effect of pentachlorophenol on gap junctional intercellular communication in rat liver epithelial cells in vitro.

Differential xenobiotic induction of CYP2A5 in mouse liver, kidney, lung, and olfactory mucosa.

Changes in rat liver cytochrome P450 enzymes by atrazine and simazine treatment.

Immunoenzymatic determination of atrazine in rat tissue samples.

Dialkylquinonimines validated as in vivo metabolites of alachlor, acetochlor, and metolachlor herbicides in rats.

Activation of hepatic NF-kappaB by the herbicide Dicamba (2-methoxy-3,6-dichlorobenzoic acid) in female and male rats.

Ethanol-induced changes of intracellular thiol compartmentation and protein redox status in the rat liver: effect of tauroursodeoxycholate.

Inhibitor and temperature effect on catalase in the liver of adult diploid and haploid *Rana rugosa*.

Resveratrol inhibits transcription of CYP1A1 in vitro by preventing activation of the aryl hydrocarbon receptor.

Experimental study of oxidative DNA damage.

Expression of mucin-associated sulfo-Lea carbohydrate epitopes on human colon carcinoma cells.

Mechanistic modeling of rodent liver tumor promotion at low levels of exposure: an example related to dose-response relationships for 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Body weight loss and changes in tryptophan homeostasis by chlorinated dibenzo-p-dioxin congeners in the most TCDD-susceptible and the most TCDD-resistant rat strain.

Determination of the enzymes responsible for activation of the heterocyclic amine 2-amino-3-methylimidazo[4,5-f]quinoline in the human breast.

Interactive toxicity and stress protein expression by vinylidene chloride and monochloroacetate in precision-cut rat liver slices.

Environmental complex mixture toxicity assessment.

Concentrated cresol intoxication.

Suppressive effects of estradiol on 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated transcriptional activation of murine Cyp1a-1 in mouse hepatoma Hepa 1c1c7 cells.

Hepatocyte extracellular matrix modulates expression of growth factors and growth factor receptors in human colon cancer cells.

Mechanism of action of the nongenotoxic peroxisome proliferators: role of the peroxisome proliferator-activator receptor alpha.

Phosphine-induced oxidative stress in Hepa 1c1c7 cells.

Influence of aromatic hydrocarbon receptor-mediated events on the genotoxicity of cigarette smoke condensate.

Herbimycin-A attenuates ischaemia-reperfusion induced pulmonary neutrophil infiltration.

Marked increases of aminotransferase levels after cresol ingestion.

Induction of cytochrome P-450 1A1 by omeprazole in human HepG2 cells is protein tyrosine kinase-dependent and is not inhibited by alpha-naphthoflavone.

Zoxazolamine-induced paralysis in two rat substrains: differences in hepatic drug metabolism.

Carbaryl, a carbamate insecticide, is a ligand for the hepatic Ah (dioxin) receptor.

Regulated Co-translational ubiquitination of apolipoprotein B100. A new paradigm for proteasomal degradation of a secretory protein.

Regulation of cytochrome P450 enzymes by aryl hydrocarbon receptor in human cells: CYP1A2 expression in the LS180 colon carcinoma cell line after treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin or 3-methylcholanthrene.

Interactive effects of three structurally different polychlorinated biphenyls in a rat liver tumor promotion bioassay.

Stimulation of the stress-induced expression of stress proteins by curcumin in cultured cells and in rat tissues in vivo.

Establishment of a simple cleanup procedure and bioassay for determining 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity equivalents of environmental samples.

Activation of the Ah receptor by tryptophan and tryptophan metabolites.

Heat shock protein expression protects against death following exposure to heatstroke in rats.

Mode of carcinogenic action of pesticides inducing thyroid follicular cell tumors in rodents.

Oxidative damage induced by the fullerene C60 on photosensitization in rat liver microsomes.

Hemochromatosis presenting as acute liver failure after iron supplementation.

Manganese uptake and release by cultured human hepato-carcinoma (Hep-G2) cells.

Use of model-based compartmental analysis to study effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on vitamin A kinetics in rats.

Subchronic/chronic toxicity of a mixture of four chlorinated dibenzo-p-dioxins in rats. I. Design, general observations, hematology, and liver concentrations.

A novel response to dioxin. Induction of ecto-ATPase gene expression.

Effect of dichloroacetic acid and trichloroacetic acid on DNA methylation in liver and tumors of female B6C3F1 mice.

Reproductive toxicity and tissue concentrations of low doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin in male offspring rats exposed throughout pregnancy and lactation.

Small dense low density lipoprotein has increased affinity for LDL receptor-independent cell surface binding sites: a potential mechanism for increased atherogenicity.

A novel dosage approach for evaluation of SMANCS [poly-(styrene-co-maleyl-half-n-butylate) - neocarcinostatin] in the treatment of primary hepatocellular carcinoma.

Stressor-specific enhancement of hsp induction by low doses of stressors in conditions of self- and cross-sensitization.

[Effect of GABA and piracetam on ATPase activity in brain and liver mitochondria in experimental hypokinesia].

Elimination kinetics and toxicity of 2,3,7,8-tetrachlorothianthrene, a thio analogue of 2,3,7,8-TCDD.

Mechanism of sodium arsenite-mediated induction of heme oxygenase-1 in hepatoma cells. Role of mitogen-activated protein kinases.

Interference between progesterone and dioxin signal transduction pathways. Different mechanisms are involved in repression by the progesterone receptor A and B isoforms.

The Seveso studies on early and long-term effects of dioxin exposure: a review.

Protein kinase C activity is required for aryl hydrocarbon receptor pathway-mediated signal transduction.

Aryl hydrocarbon receptor-dependent suppression by 2,3,7,8-tetrachlorodibenzo-p-dioxin of IgM secretion in activated B cells.

A computer-aided 3-D geometry of acute and chronic zonal necrosis: three-D tangent counting applied in an attempt to re-examine the structure of the human liver.

The dose-response model for dioxin.

Cancer chemopreventive and therapeutic activities of red ginseng.

Characterization of the effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in B6C3F1 and DBA/2 mice following single and repeated exposures.

Cross-resistance to methotrexate and metals in human cisplatin-resistant cell lines results from a pleiotropic defect in accumulation of these compounds associated with reduced plasma membrane binding proteins.

[Risk assessment of dioxins and the effect as the endocrine disrupters].

Induction of cellular processes containing collagenase and retinoid by integrin-binding to interstitial collagen in hepatic stellate cell culture.

2,3,7,8-Tetrachlorodibenzo-p-dioxin co-stimulates staphylococcal enterotoxin beta (SEB) cytokine production and phenotypic cell cycling in Long-Evans rats.

Effects of the nonsteroidal anti-inflammatory drug nimesulide on energy metabolism in livers from adjuvant-induced arthritic rats.

Interaction between iron metabolism and 2,3,7,8-tetrachlorodibenzo-p-dioxin in mice with variants of the Ahr gene: a hepatic oxidative mechanism.

Collagens in the liver extracellular matrix bind hepatocyte growth factor.

Association of Shc, Cbl, Grb2, and Sos following treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin in primary rat hepatocytes.

Alternative methods for mechanistic studies in toxicology. Screening of hepatotoxicity of pesticides using freshly isolated and primary cultured hepatocytes and non-liver-derived cells, SIRC cells.

Dioxin causes a sustained oxidative stress response in the mouse.

2,3,7,8-Tetrachlorodibenzo-p-dioxin suppresses apoptosis and leads to hyperphosphorylation of p53 in rat hepatocytes.

1,2-Dichlorobenzene-induced lipid peroxidation in male Fischer 344 rats is Kupffer cell dependent.

Dose-response relationships for disposition and hepatic sequestration of polyhalogenated dibenzo-p-dioxins, dibenzofurans, and biphenyls following subchronic treatment in mice.

Presence of intestinal, liver and heart/adipocyte fatty-acid-binding protein types in the liver of a chimaera fish.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the lymphatic absorption of a single oral dose of [3H]retinol and on the intestinal retinol esterification in the rat.

Photoaffinity labeling of rat liver glutathione S-transferase, 4-4, by glutathionyl S-[4-(succinimidyl)-benzophenone].

Genotoxic bifunctional aldehydes produce specific images in the comet assay.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazoxybenzene (CAS No. 21232-47-3) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazobenzene (CAS No. 14047-09-7) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

EROD induction by environmental contaminants in avian embryo livers.

Effects of the agrochemicals butachlor, pretilachlor and isoprothiolane on rat liver xenobiotic-metabolizing enzymes.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induction of cytochrome P450-dependent arachidonic acid metabolism in mouse liver microsomes: evidence for species-specific differences in responses.

Effects of carbaryl and naphthalene on rat hepatic CYP1A1/2: potential binding to Ah receptor and 4S benzo(a)pyrene-binding protein.

Hepatobiliary transport kinetics of HSR-903, a new quinolone antibacterial agent.

Structural and functional comparison of agents interfering with dihydroorotate, succinate and NADH oxidation of rat liver mitochondria.

Down-regulation of cytochrome P450 1A1 gene promoter by oxidative stress. Critical contribution of nuclear factor 1.

Enzymatic methylation of arsenic compounds. VI. Characterization of hamster liver arsenite and methylarsonic acid methyltransferase activities in vitro.

2,3,7,8-Tetrachlorodibenzo-p-dioxin in pregnant Long Evans rats: disposition to maternal and embryo/fetal tissues.

Toxicokinetics of an environmentally relevant mixture of dioxin-like PHAHs with or without a non-dioxin-like PCB in a semi-chronic exposure study in female Sprague Dawley rats.

Sulfation of thyroid hormones by liver of rainbow trout, *Oncorhynchus mykiss*.

Metabolism of ethanol by rat pancreatic acinar cells.

Contaminants in eggs of colonial waterbirds and hepatic cytochrome P450 enzyme levels in pipped tern embryos, Washington State.

The malonyl-CoA-sensitive form of carnitine palmitoyltransferase is not localized exclusively in the outer membrane of rat liver mitochondria.

Zonal location of compensatory hepatocyte proliferation following chemically induced hepatotoxicity in rats and humans.

Induction of UDP-glycosyltransferase family 1 genes in rat liver: different patterns of mRNA expression with two inducers, 3-methylcholanthrene and beta-naphthoflavone.

Quantitative analysis of liver peroxisomes in rats intoxicated with peroxisomicine-A1.

Cyclophosphamide cystitis as a model of visceral pain in rats: a c-fos and Krox-24 study at telencephalic levels, with a note on pituitary adenylate cyclase activating polypeptide (PACAP).

Nonresponsiveness to 2,3,7,8-tetrachlorodibenzo-p-dioxin of transforming growth factor beta1 and CYP 1A1 gene expression in rat liver fat-storing cells.

Hepatic and renal metallothionein induction following single oral administration of gallium arsenide in rats.

In vitro inhibition of thyroid hormone sulfation by hydroxylated metabolites of halogenated aromatic hydrocarbons.

Biochemical markers for differentiation of exposures to nonplanar polychlorinated biphenyls, organochlorine pesticides, or 2,3,7,8-tetrachlorodibenzo-p-dioxin in trout liver.

Regulation of apoptosis in mouse hepatocytes and alteration of apoptosis by nongenotoxic carcinogens.

Pleiotropic effects of hepatocyte growth factor in proximal tubule involve different signaling pathways.

A direct interaction between the aryl hydrocarbon receptor and retinoblastoma protein. Linking dioxin signaling to the cell cycle.

Investigations of the pathways of toxicity of methyl iodide in the rat nasal cavity.

Proteolysis of liver plectin by mu-calpain.

Cytochrome P450 catalyzed oxidation of monochlorobenzene, 1,2- and 1,4-dichlorobenzene in rat, mouse, and human liver microsomes.

Modulation of Hepatocyte Gene Expression by the Carcinogen Benzo[a]pyrene.

Cytotoxic effects and induction of cytochromes P450 1A1/2 by insecticides, in hepatic or epidermal cells: binding capability to the Ah receptor.

Differences in kinetics of induction and reversibility of TCDD-induced changes in cell proliferation and CYP1A1 expression in female Sprague-Dawley rat liver.

Detection of CYP1A1 protein in human liver and induction by TCDD in precision-cut liver slices incubated in dynamic organ culture.

Metabolic fate of S-(-)-pulegone in rat.

Hepatic stellate cells (vitamin A-storing cells) change their cytoskeleton structure by extracellular matrix components through a signal transduction system.

The synthesis and utilization of 2,4-dinitrophenyl-labeled irreversible peptidyl diazomethyl ketone inhibitors.

A pharmacodynamic analysis of TCDD-induced cytochrome P450 gene expression in multiple tissues: dose- and time-dependent effects.

Species- and sex-related differences in metabolism of trichloroethylene to yield chloral and trichloroethanol in mouse, rat, and human liver microsomes.

Hepatocyte growth factor-induced expression of ornithine decarboxylase, c-met, and c-myc is differently affected by protein kinase inhibitors in human hepatoma cells HepG2.

Strain differences in cytochrome P4501A1 gene expression caused by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat liver: role of the aryl hydrocarbon receptor and its nuclear translocator.

Oxidative phosphorylation in intact hepatocytes: quantitative characterization of the mechanisms of change in efficiency and cellular consequences.

Developmental regulation of the 3-methylcholanthrene- and dioxin-inducible CYP1A5 gene in chick embryo liver in vivo.

Subchronic/chronic toxicity of a mixture of four chlorinated dibenzo-p-dioxins in rats. II. Biochemical effects.

Expression of cytosolic beta-glucosidase in guinea pig liver cells.

Lipid peroxidation and biogenic aldehydes: from the identification of 4-hydroxynonenal to further achievements in biopathology.

Development of a model for classification of toxin-induced lesions using ¹H NMR spectroscopy of urine combined with pattern recognition.

The role of glutathione S-transferase- and cytochrome P450-dependent metabolism in the olfactory toxicity of methyl iodide in the rat.

Effect of arsenite on induction of CYP1A and CYP2H in primary cultures of chick hepatocytes.

Differentiating and proliferative effects of HGF in renal proximal tubular cells are mediated via different signalling pathways.

2,4 Dinitrophenol-uncoupling effect on delta psi in living hepatocytes depends on reducing-equivalent supply.

Metabolism of 17-(allylamino)-17-demethoxygeldanamycin (NSC 330507) by murine and human hepatic preparations.

Suppression of C/EBPalpha and induction of C/EBPbeta by 2,3,7,8-tetrachlorodibenzo-p-dioxin in mouse adipose tissue and liver.

Arachidonic acid metabolism in the marine fish *Stenotomus chrysops* (Scup) and the effects of cytochrome P450 1A inducers.

Highly toxic coplanar PCB126 reduces liver peroxisomal enzyme activities in rats.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces hepatic cytochrome P450-dependent arachidonic acid epoxygenation in diverse avian orders: regioisomer selectivity and immunochemical comparison of the TCDD-induced P450s to CYP1A4 and 1A5.

Mechanism for benomyl action as a mitochondrial aldehyde dehydrogenase inhibitor in mice.

Interleukin 1beta and interleukin 6, but not tumor necrosis factor alpha, inhibit insulin-stimulated glycogen synthesis in rat hepatocytes.

Characterization of glycerol uptake and glycerol kinase activity in rat hepatocytes cultured under different hormonal conditions.

Impact of dioxin-type induction of drug-metabolizing enzymes on the metabolism of endo- and xenobiotics.

Myelosuppressive activity of two herbicides, atrazine and dinoterb, on human haematopoietic progenitor cells: An in vitro assay to evaluate the effects of intermediate or long-term exposure.

Cytotoxic response profiles of cultured rat hepatocytes to selected aromatic hydrocarbons.

Cd²⁺ effects on respiration and swelling of rat liver mitochondria were modified by monovalent cations.

Use of precision-cut rat liver slices for studies of xenobiotic metabolism and toxicity: comparison of the Krumdieck and Brendel tissue slicers.

Estimation of occupational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin using a minimal physiologic toxicokinetic model.

Female Sprague-Dawley rats exposed to a single oral dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin exhibit sustained depletion of aryl hydrocarbon receptor protein in liver, spleen, thymus, and lung.

Hepatic oval cell activation in response to injury following chemically induced periportal or pericentral damage in rats.

Isolation of a novel metabolizing system enriched in phase-II enzymes for short-term genotoxicity bioassays.

Biological characterization of human fibroblast-derived mitogenic factors for human melanocytes.

Peroxidation of membrane lipids and oxidative DNA damage by fumonisin B1 in isolated rat liver nuclei.

Effects of some thiol chelators on enzymatic activities in blood, liver and kidneys of acute arsenic (III) exposed mice.

Hepatoprotective effect of Fe-TPEN on carbon tetrachloride induced liver injury in rats.

Induction of oxidative stress in brain tissues of mice after subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Induction and localization of cytochrome P450 1B1 (CYP1B1) protein in the livers of TCDD-treated rats: detection using polyclonal antibodies raised to histidine-tagged fusion proteins produced and purified from bacteria.

Accumulation of iron by primary rat hepatocytes in long-term culture: changes in nuclear shape mediated by non-transferrin-bound forms of iron.

Sulfotransferase-mediated genotoxicity of propane 2-nitronate in cultured ovine seminal vesicle cells.

Regulation of sulfotransferase gene expression by glucocorticoid hormones and xenobiotics in primary rat hepatocyte culture.

Characterization of thyroid hormone sulfotransferases.

Aryl hydrocarbon receptor-associated genes in rat liver: regional coinduction of aldehyde dehydrogenase 3 and glutathione transferase Ya.

Metabolic interaction between toluene, trichloroethylene and n-hexane in humans.

Comparison of liver progenitor cells in human atypical ductular reactions with those seen in experimental models of liver injury.

Toxicity of linoleic acid hydroperoxide to *Saccharomyces cerevisiae*: involvement of a respiration-related process for maximal sensitivity and adaptive response.

Hepatitis B virus X-associated protein 2 is a subunit of the unliganded aryl hydrocarbon receptor core complex and exhibits transcriptional enhancer activity.

Molecular cloning, characterization, and expression of the chicken heme oxygenase-1 gene in transfected primary cultures of chick embryo liver cells.

Metabolic Study of Isoproturon in Goats Following a Single Oral Administration: Toxicokinetics and Recovery.

Modulating effects of thyroid state on the induction of biotransformation enzymes by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Inhibition of 5,9-dimethyldibenzo[c,g]carbazole-DNA adduct formation in mouse liver by pretreatment with cytochrome P4501A inducers in vivo.

Determination of the sequence of the arylacetyl acyl-CoA:amino acid N-acyltransferase from bovine liver mitochondria and its homology to the aralkyl acyl-CoA:amino acid N-acyltransferase.

Modulation of 2,6-dinitrotoluene genotoxicity by alachlor treatment of Fischer 344 rats.

Effect of in vivo administered 2,3,7,8-tetrachlorodibenzo-p-dioxin on DNA-binding activities of nuclear transcription factors in liver of guinea pigs.

Interaction of PCB congeners and 2,3,7,8-TCDD in the rat liver: an electron microscope study.

Drug metabolizing enzyme activities and superoxide formation in primary and immortalized rat brain endothelial cells.

Enzymatic methylation of arsenic compounds. V. Arsenite methyltransferase activity in tissues of mice.

Biosynthesis of methylguanidine in the hepatic peroxisomes and the effect of the induction of peroxisomal enzymes by clofibrate.

Mitochondrial dysfunction in the senescence accelerated mouse (SAM).

Promotion of rat hepatocarcinogenesis by dimethylarsinic acid: association with elevated ornithine decarboxylase activity and formation of 8-hydroxydeoxyguanosine in the liver.

Hemotoxicity of chlorpropham (CIPC) in F344 rats.

Effect of arsenite, arsenate, and the herbicide monosodium methyl arsonate (MSMA) on hepatic metallothionein expression and lipid peroxidation in channel catfish.

Herbicide-induced experimental variegate porphyria in mice: tissue porphyrinogen accumulation and response to porphyrogenic drugs.

The cytotoxic effect of paraquat to isolated renal proximal tubular segments from rabbits.

Peroxisome proliferators increase the formation of BPDE-DNA adducts in isolated rat hepatocytes.

Age-associated increase in ferritin content of male rat liver: implication for diquat-mediated oxidative injury.

Propanil poisoning.

Possible carcinogenic potential of dimethylarsinic acid as assessed in rat in vivo models: a review.

Genotoxicity of six pesticides by Salmonella mutagenicity test and SOS chromotest.

In vivo studies on genotoxicity of pure and commercial linuron.

"Golf ball liver": agent orange hepatitis.

Studies on the effect of peroxisomicine on catalase activity in albino mice.

Biochemical studies on the toxicity of 1, 1'-dimethyl-4, 4'-bipyridylum dichloride in the rat.

Comparative in vitro and in vivo protein kinase C activation by selected pesticides and transition metal salts.

[Retrospective study of morbidity in a group professionally exposed to chlorotriazine herbicides].

Inhibitory effect of nicotinamide to paraquat toxicity and the reaction site on complex I.

Dimethylarsinic acid treatment alters six different rat biochemical parameters: relevance to arsenic carcinogenesis.

¹H NMR investigation of toxic effects of lindane and paraquat on Hep 3B and Hep G2 human hepatoma cell lines.

Comparison of catalase in diploid and haploid *Rana rugosa* using heat and chemical inactivation techniques.

Liver cell cytoplasmic inclusions in experimental porphyrias: their demonstration with the ferric ferricyanide reduction reaction.

Inhibition of the genotoxic effects of heterocyclic amines in human derived hepatoma cells by dietary bioantimutagens.

Induction of glutathione depletion, p53 protein accumulation and cellular transformation by tetrachlorohydroquinone, a toxic metabolite of pentachlorophenol.

Regulation of human apolipoprotein A-I gene expression by gramoxone.

Inhibition of sulfotransferase affecting in vivo genotoxicity and DNA adducts induced by safrole in rat liver.

Effects of acrolein on rat liver antioxidant defense system.

Role of glutathione and catalase in H₂O₂ detoxification in LPS-activated hepatic endothelial and Kupffer cells.

Identification of enzymes involved in the metabolism of atrazine, terbutylazine, ametryne, and terbutryne in human liver microsomes.

Induction after administering paraquat of heme oxygenase-1 and heat shock protein 70 in the liver of senescence-accelerated mice.

Dosimetry of chlorinated quinone metabolites of pentachlorophenol in the livers of rats and mice based upon measurement of protein adducts.

Overexpression of *mdr2* gene by peroxisome proliferators in the mouse liver.

High-performance liquid chromatographic determination of acrolein as a marker for cyclophosphamide bioactivation in human liver microsomes.

Molecularly imprinted solid phase extraction of atrazine from beef liver extracts.

Sustained increase in intracellular free calcium and activation of cyclooxygenase-2 expression in mouse hepatoma cells treated with dioxin.

Signal transduction-mediated activation of the aryl hydrocarbon receptor in rat hepatoma H4IIE cells.

Failure of monochloroacetic acid and trichloroacetic acid administered in the drinking water to produce liver cancer in male F344/N rats.

Entacapone, a novel catechol-O-methyltransferase inhibitor for Parkinson's disease, does not impair mitochondrial energy production.

Studies on the relationship between estrogen receptor content, glutathione S-transferase pi expression, and induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin and drug resistance in human breast cancer cells.

Down-regulation of major histocompatibility complex Q1b gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Pancreatic carcinomas deposit laminin-5, preferably adhere to laminin-5, and migrate on the newly deposited basement membrane.

Promotion of enzyme altered foci in female rat 2,3,3',4,4',5-hexachlorobiphenyl.

Evidence for protein dolichylation.

Alterations in the developing immune system of the F344 rat after perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin I. [correction of II]. Effects on the fetus and the neonate.

Role of nitroreductases but not cytochromes P450 in the metabolic activation of 1-nitropyrene in the HepG2 human hepatoblastoma cell line.

Aryl hydrocarbon receptor-dependent induction of cyp1a1 by bilirubin in mouse hepatoma hepa 1c1c7 cells.

Hepatic foci in rats after diethylnitrosamine initiation and 2,3,7,8-tetrachlorodibenzo-p-dioxin promotion: evaluation of a quantitative two-cell model and of CYP 1A1/1A2 as a dosimeter.

Subchronic/chronic toxicity of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin (HpCDD) in rats. Part I. Design, general observations, hematology, and liver concentrations.

Reduced stress defense in heme oxygenase 1-deficient cells.

Association of arsenic-induced malignant transformation with DNA hypomethylation and aberrant gene expression.

Mitochondrial damage: a possible mechanism of the "topical" phase of NSAID induced injury to the rat intestine.

Activity and inducibility of drug-metabolizing enzymes in immortalized hepatocyte-like cells (mhPKT) derived from a L-PK/Tag1 transgenic mouse.

Carrier effects of dosing the H4IIE cells with 3,3',4,4'-tetrachlorobiphenyl (PCB77) in dimethyl sulfoxide or isoctane.

Modulation of cytochrome P450 by 5,5'-bis-trifluoromethyl-2,2'-dichlorobiphenyl, a unique environmental contaminant.

Promotion of endometriosis in mice by polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls.

Cytochrome P450 isozymes responsible for the metabolism of toluene and styrene in human liver microsomes.

Antimitotic intervention with colchicine alters the outcome of o-DCB-induced hepatotoxicity in Fischer 344 rats.

Purification and partial sequencing of the XL-I form of xenobiotic-metabolizing medium chain fatty acid:CoA ligase from bovine liver mitochondria, and its homology with the essential hypertension protein.

Cytosolic Ca²⁺ and protein kinase Calpha couple cellular metabolism to membrane K⁺ permeability in a human biliary cell line.

Induction of cytochrome P450 1B1 and catechol estrogen metabolism in ACHN human renal adenocarcinoma cells.

Opposite effects of 2,2',4,4',5,5'-hexachlorobiphenyl and 2,3,7,8-tetrachlorodibenzo-p-dioxin on the antibody response to sheep erythrocytes in mice.

Effect of hepatic methyl donor status on urinary excretion and DNA damage in B6C3F1 mice treated with sodium arsenite.

P-Cresol, a uremic compound, enhances the uptake of aluminum in hepatocytes.

Mortality among Army Chemical Corps Vietnam veterans.

Altered in vivo toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C-SRC deficient mice.

Regulation of dioxin receptor function by omeprazole.

Some peculiarities of hepatobiliary diseases in Vietnam.

Role of cytochrome P450 enzyme induction in the metabolic activation of benzo[c]phenanthrene in human cell lines and mouse epidermis.

Murine Cyp1a-1 induction in mouse hepatoma Hepa-1C1C7 cells by myristicin.

Detection of peroxisome proliferators using a reporter construct derived from the rat acyl-CoA oxidase promoter in the rat liver cell line H-4-II-E.

The carboxyl-terminal region of factor IX is essential for its secretion.

A novel cytoplasmic protein that interacts with the Ah receptor, contains tetratricopeptide repeat motifs, and augments the transcriptional response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Co-metabolism of ethanol, ethanol-derived acetaldehyde, and 4-hydroxynonenal in isolated rat hepatocytes.

Nitrofen dose-dependent gestational day-specific murine lung hypoplasia and left-sided diaphragmatic hernia.

Expression of CYP1B1 in human adult and fetal tissues and differential inducibility of CYP1B1 and CYP1A1 by Ah receptor ligands in human placenta and cultured cells.

Human NAD(P)H:quinone oxidoreductase induction in human hepatoma cells after exposure to industrial acrylates, phenolics, and metals.

Oxygen- and dioxin-regulated gene expression in mouse hepatoma cells.

Cytokines (IL-1beta and TNFalpha) in relation to biochemical and immunological effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in rats.

[Assessment of neurotoxic effects of methyl bromide in exposed workers].

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and congeners in infants. A toxicokinetic model of human lifetime body burden by TCDD with special emphasis on its uptake by nutrition.

Effect of subchronic 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on immune system and target gene responses in mice: calculation of benchmark doses for CYP1A1 and CYP1A2 related enzyme activities.

Enzymatic methylation of arsenic species and other new approaches to arsenic toxicity.

Interactions of TCDD with signal transduction and neoplastic development in c-myc transgenic and TGF-alpha transgenic mice.

Mechanism of thiazopyr-induced effects on thyroid hormone homeostasis in male Sprague-Dawley rats.

Early life stage toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in zebrafish (*Danio rerio*).

Oxidative and chemical stress mimic insulin by selectively inhibiting the expression of phosphoenolpyruvate carboxykinase in hepatoma cells.

Modification of hepatic drug-metabolizing enzymes in rats treated with alkyl sulfides.

Protective effects of Propolis extract on allyl alcohol-induced liver injury in mice.

Age-related susceptibility to hepatotoxicants.

Comparative cytotoxicity of the aqueous chlorination products of thiobencarb, a thiocarbamate herbicide, in cultured rat hepatocytes.

Two complementary bioassays for screening the estrogenic potency of xenobiotics: recombinant yeast for trout estrogen receptor and trout hepatocyte cultures.

Is exposure to bacterial endotoxin a determinant of susceptibility to intoxication from xenobiotic agents?

Dose-response relationships for polyhalogenated dioxins and dibenzofurans following subchronic treatment in mice. I. CYP1A1 and CYP1A2 enzyme activity in liver, lung, and skin.

Multiple roles of polyhalogenated biphenyls in causing increases in cytochrome P450 and uroporphyrin accumulation in cultured hepatocytes.

Mechanisms for metabolism of ethanol to 1-hydroxyethyl radicals in rat liver microsomes.

Long-term primary cultures of adult human hepatocytes.

4-Amino-2,6-dichlorophenol nephrotoxicity in the Fischer 344 rat: protection by ascorbic acid, AT-125, and aminoxyacetic acid.

Purification and gas chromatographic-mass spectrometric characterization of non-methylene interrupted fatty acid incorporated in rat liver.

Preliminary assessment of PCB risks to human and ecological health in the lower Passaic River.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced activation of a protein tyrosine kinase, pp60src, in murine hepatic cytosol using a cell-free system.

Subchronic/chronic toxicity of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin (HpCDD) in rats. Part II. Biochemical effects.

Altered function, localization and phosphorylation of gap junctions in rat liver epithelial, IAR 20, cells after treatment with PCBs or TCDD.

Purification and partial structural characterization of a fatty acid-binding protein from the liver of the South American armadillo *Chaetophractus villosus*.

CYP1A induction by beta-naphthoflavone, Aroclor 1254, and 2,3,7,8-tetrachlorodibenzo-p-dioxin and its influence on aflatoxin B1 metabolism and DNA adduction in zebrafish.

The role of Src kinase in the potentiation by ethanol of cytokine- and endotoxin-mediated nitric oxide synthase expression in rat hepatocytes.

Extrathyroidal effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on thyroid hormone turnover in male Sprague-Dawley rats.

Gadolinium chloride reduces cytochrome P450: relevance to chemical-induced hepatotoxicity.

Extension of long cellular processes of hepatic stellate cells cultured on extracellular type I collagen gel by microtubule assembly: observation utilizing time-lapse video-microscopy.

A physiologically based pharmacokinetic (PB-PK) model for 1,2-dichlorobenzene linked to two possible parameters of toxicity.

Role of 3,4-dichlorophenyl methyl sulfone, a metabolite of o-dichlorobenzene, in the changes in hepatic microsomal drug-metabolizing enzymes caused by o-dichlorobenzene administration in rats.

A pharmacokinetic analysis of interspecies extrapolation in dioxin risk assessment.

Cellular response to the redox active lipid peroxidation products: induction of glutathione S-transferase P by 4-hydroxy-2-nonenal.

Role of CYP1A2 in hepatic sequestration of dioxin: studies using CYP1A2 knock-out mice.

Aryl hydrocarbon receptor knockout mice (AHR^{-/-}) exhibit liver retinoid accumulation and reduced retinoic acid metabolism.

Brevetoxin-6 (PbTx-6), a nonaromatic marine neurotoxin, is a ligand of the aryl hydrocarbon receptor.

Cytotoxic effects of 2,6-di-tert-butyl-4-methylphenyl N-methylcarbamate (terbutol) herbicide on hepatocytes and mitochondria isolated from male rats.

[Oxidative phosphorylation in liver mitochondria under extremely high frequency electromagnetic radiation in vitro].

4,6-Dinitro-o-cresol uncouples oxidative phosphorylation and induces membrane permeability transition in rat liver mitochondria.

Expression of liver functions following sub-lethal and non-lethal doses of allyl alcohol and acetaminophen in the rat.

Isolation, characterization, and functional studies of rat liver iron regulatory protein 1.

Regulation of expression of the human heme oxygenase-1 gene in transfected chick embryo liver cell cultures.

Protective effects of lobenzarit against allyl alcohol-induced hepatotoxicity in mice and rats.

Menadione-dependent reduction of tertiary amine N-oxide by rat liver cytosol.

Enzymatic methylation of arsenic compounds: IV. In vitro and in vivo deficiency of the methylation of arsenite and monomethylarsonic acid in the guinea pig.

Cytochrome P450 3A4 mediated metabolism of 2,4-dichlorophenol.

[Comparative study of the effect of paracetamol, phenacetin and amidopyrine on mitochondrial function in isolated rat hepatocytes].

Glycogenolysis stimulation by non-steroidal anti-inflammatories in the perfused rat liver is not accompanied by Ca²⁺ release.

Characterization of the H4IIE rat hepatoma cell bioassay for evaluation of environmental samples containing polynuclear aromatic hydrocarbons (PAHs).

Interleukin-2 increases intracellular glutathione levels and reverses the growth inhibiting effects of cyclophosphamide on B16 melanoma cells.

Carbaryl induces CYP1A1 gene expression in HepG2 and HaCaT cells but is not a ligand of the human hepatic Ah receptor.

Regional hepatic CYP1A1 and CYP1A2 induction with 2,3,7,8-tetrachlorodibenzo-p-dioxin evaluated with a multicompartiment geometric model of hepatic zonation.

Bacterial endotoxin enhances the hepatotoxicity of allyl alcohol.

Hrp12, a novel heat-responsive, tissue-specific, phosphorylated protein isolated from mouse liver.

Effect of cell density and epidermal growth factor on the inducible expression of CYP3A and CYP1A genes in human hepatocytes in primary culture.

Rapid Ca²⁺ influx induced by the action of dibutylhydroquinone and glucagon in the perfused rat liver.

Involvement of aspartate/glutamate antiporter in fatty acid-induced uncoupling of liver mitochondria.

Effect of the histone deacetylase inhibitor trichostatin A on the responsiveness of rat hepatocytes to dioxin.

Regulation of glucocorticoid receptor by the tyrosine kinase inhibitor herbimycin A in the cytosolic fraction of primary cultured rat hepatocytes.

Multiplicity of antioxidant enzyme catalase in mouse liver cells.

Cytochrome P450 isoenzyme activities in cultured rat and mouse liver slices.

Determination of genotoxicity of the metabolites of the pesticides Guthion, Sencor, Lorox, Reglone, Daconil and Admire by ³²P-postlabeling.

Involvement of cytochrome P4502E1 in the toxicity of dichloropropanol to rat hepatocyte cultures.

The ability to alter the gap junction protein expression outside GST-P positive foci in liver of rats was associated to the tumour promotion potency of different polychlorinated biphenyls.

Cytidine-5'-diphosphate-1,2-diacyl-sn-glycerol import into mitochondria through mitochondrial membrane contact sites in permeabilized rat liver hepatocytes.

Effect of UVA on RNA synthesis in isolated chicken liver nuclei.

Effects of cyclophosphamide and ifosfamide on neuroblastoma cells before and after activation by microsomes.

Murine hepatic p53, RB, and CDK inhibitory protein expression following acute 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure.

The relative susceptibility of animals and humans to the carcinogenic hazard posed by exposure to 2,3,7,8-TCDD: an analysis using standard and internal measures of dose.

Derivation of 2,3,7,8-TCDD toxic equivalent factors (TEFs) for selected dioxins, furans and PCBs with rainbow trout and rat liver cell lines and the influence of exposure time.

Cytotoxicity of organochlorine pesticides and lipid peroxidation in isolated rat hepatocytes.

Time course for the modulation of hepatic cytochrome P450 after administration of ethylbenzene and its correlation with toluene metabolism.

Oxidative liver DNA damage in rats treated with pesticide mixtures.

Halogenated aromatic hydrocarbon-mediated porphyrin accumulation and induction of cytochrome P4501A in chicken embryo hepatocytes.

Toluene metabolism by cDNA-expressed human hepatic cytochrome P450.

Redox stress and hepatic DNA fragmentation induced by diquat in vivo are not accompanied by increased 8-hydroxydeoxyguanosine contents.

Sensitivity of common tern (*Sterna hirundo*) embryo Hepatocyte Cultures to CYP1A induction and porphyrin accumulation by halogenated aromatic hydrocarbons and common tern egg extracts.

Death following intentional methyl bromide poisoning: toxicological data and literature review.

A continuous spectrophotometric assay for monoamine oxidase and related enzymes in tissue homogenates.

Effects of arsenite pretreatment on the acute toxicity of parathion.

Polymerase chain reaction-based cloning of alkyl-dihydroxyacetonephosphate synthase complementary DNA from guinea pig liver.

Characterization of hepatic metallothionein expression in channel catfish (*Ictalurus punctatus*) by reverse transcriptase polymerase chain reaction.

Metabolic activation and DNA-adducts detection as biomarkers of chlorinated pesticide exposures.

Congener specific accumulation and toxic assessment of polychlorinated biphenyls in common cormorants, *Phalacrocorax carbo*, from Lake Biwa, Japan.

Giant Mitochondria as Possible Bioindicators of Environmental Injuries in Fish Liver.

[Respiration and ion permeability of the inner membrane in rat "sodium" liver mitochondria].

Ethoxyresorufin-O-deethylase (EROD) inducing potencies of planar chlorinated aromatic hydrocarbons in primary cultures of hepatocytes from different developmental stages of the chicken.

Electron microscopic identification of putative liver stem cells and intermediate hepatocytes following periportal necrosis induced in rats by allyl alcohol.

DNA adduct formation in primary mouse embryo cells induced by 7H-dibenzo[c,g]carbazole and its organ-specific carcinogenic derivatives.

Selected lesions of dioxin in laboratory rodents.

Urinary excretion of ifosfamide, 4-hydroxyifosfamide, 3- and 2-dechloroethylifosfamide, mesna, and dimesna in patients on fractionated intravenous ifosfamide and concomitant mesna therapy.

Metabolic degradation, inducing potency, and metabolites of fluorinated and chlorinated-fluorinated dibenzodioxins and dibenzofurans.

Regulation of CYP 2 A 5 induction by porphyrinogenic agents in mouse primary hepatocytes.

Toxicity of allyl alcohol in primary cultures of freshly isolated and cryopreserved hepatocytes maintained on hydrated collagen gels.

Pretreatment with peroxisome proliferators protects mice against some but not all hepatotoxins.

Evaluation of the genotoxicity potential (by Mutatox test) of ten pesticides found as water pollutants in Cyprus.

Acute oral toxicity of the herbicide BUREX EKO in pheasants.

Effect of paraquat intoxication and ambroxol treatment on hydrogen peroxide production and lipid peroxidation in selected organs of rat.

Differential effect of peroxisome proliferators on rat glutathione S-transferase isoenzymes.

Protoporphyrinogen oxidase: high affinity tetrahydrophthalimide radioligand for the inhibitor/herbicide-binding site in mouse liver mitochondria.

Acute, subchronic and chronic 2,4-dichlorophenoxyacetic acid (2,4-D) intoxication in rats.

Cellular target of cyclophosphamide toxicity in the murine liver: role of glutathione and site of metabolic activation.

Evaluation of the potential carcinogenicity and genetic toxicity to humans of the herbicide acetochlor.

Mode of action of thyroid tumor formation in the male Long-Evans rat administered high doses of alachlor.

Hierarchical cluster analysis of environmental pollutants through P450 induction in cultured hepatic cells.

Protective effects of chlorogenic acid on paraquat-induced oxidative stress in rats.

Oxidative DNA damage and cell proliferation in the livers of B6C3F1 mice exposed to pentachlorophenol in their diet.

Experience with acute paraquat poisoning in Crete.

Evidence of chemical stimulation of hepatic metabolism by an experimental acetanilide (FOE 5043) indirectly mediating reductions in circulating thyroid hormone levels in the male rat.

3-Aminobenzamide: effects on cytochrome P450-dependent metabolism of chemicals and on the toxicity of dichlobenil in the olfactory mucosa.

The detection of S-glutathionation of hepatic carbonic anhydrase III in rats treated with paraquat or diquat.

Detection of 1, N2-propanodeoxyguanosine adducts as potential endogenous DNA lesions in rodent and human tissues.

Biochemical and genetic interactions of two commercial pesticides with the monooxygenase system and chlorophyllin.

Pentachlorophenol enhances 9-hydroxybenzo [a] pyrene-induced hepatic DNA adduct formation in vivo and inhibits microsomal epoxide hydrolase and glutathione S-transferase activities in vitro: likely inhibition of epoxide detoxication by pentachlorophenol.

DNA damage induced in mouse tissues by organic wood preserving waste extracts as assayed by 32P-postlabeling.

Effects of paraquat on mitochondrial electron transport system and catecholamine contents in rat brain.

Paraquat causes S-phase arrest of rat liver and lung cells in vivo.

Comparison of the induction of hepatic peroxisome proliferation by the herbicide oxadiazon in vivo in rats, mice, and dogs and in vitro in rat and human hepatocytes.

Mortality in a cohort of pentachlorophenol manufacturing workers, 1940-1989.

Depression of liver microsomal glucose 6-phosphatase activity in carbon tetrachloride-poisoned rats. Potential synergistic effects of lipid peroxidation and of covalent binding of haloalkane-derived free radicals to cellular components in the process.

A new evaluation of peroxisome proliferation in rainbow trout hepatocytes in culture.

[The phospholipid composition of the liver and the glycolipid spectrum of the brain in rats administered cyanamide].

In vitro metabolism of atrazine, terbuthylazine, ametryne, and terbutryne in rats, pigs, and humans.

[The effect of catalase inhibitor 3-amino-1,2,4-triazole on coupled oxidative phosphorylation and the state of adenyl system in liver mitochondria of albino rats].

Metabolic activation of 2,6-dichlorobenzonitrile, an olfactory-specific toxicant, by rat, rabbit, and human cytochromes P450.

The direct effect of hepatic peroxisome proliferators on rat Leydig cell function in vitro.

Ascorbate synthesis-dependent glutathione consumption in mouse liver.

Increases in tissue levels of ubiquinone in association with peroxisome proliferation.

Mono- and dimethylation of arsenic in rat liver cytosol in vitro.

A convenient method to discriminate between cytochrome P450 enzymes and flavin-containing monooxygenases in human liver microsomes.

Characterization of the interaction of 2-[2-nitro-4-(trifluoromethyl)benzoyl]-4,4,6,6,-tetramethyl-cyclohexane-1,3,5-trione with rat hepatic 4-hydroxyphenylpyruvate dioxygenase.

ATP depletion affects the phosphorylation state, ligand binding, and nuclear transport of the 4 S polycyclic aromatic hydrocarbon-binding protein in rat hepatoma cells.

Decreased liver type I 5'-deiodinase and increased brown adipose tissue type II 5'-deiodinase activity in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treated Long-Evans rats.

Toward understanding the developmental anatomy of congenital diaphragmatic hernia.

Possible role of arachidonic acid in stress-induced cytochrome P450IA1 activity.

Interactive effects between 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,2',4,4',5,5'-hexachlorobiphenyl in female B6C3F1 mice: tissue distribution and tissue-specific enzyme induction.

Embryology of congenital diaphragmatic hernia.

Bioassay for determining 2,3,7,8-tetrachlorodibenzo-p-dioxin equivalents (TEs) in human hepatoma Hepg2 cells.

Dioxin induces transcription of fos and jun genes by Ah receptor-dependent and -independent pathways.

Ah-receptor-dependent modulation of gene expression by aged and diluted sidestream cigarette smoke.

Differences in inducibility of CYP1A1-mRNA by benzimidazole compounds between human and mouse cells: evidences of a human-specific signal transduction pathway for CYP1A1 induction.

Oxidative modification of low-density lipoprotein by the human hepatoma cell line HepG2.

Effects of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) injected into the yolks of chicken (*Gallus domesticus*) eggs prior to incubation.

Functional interference between hypoxia and dioxin signal transduction pathways: competition for recruitment of the Arnt transcription factor.

Missing effects of background dioxin exposure on development of breast-fed infants during the first half year of life.

The effect of ethanol or hepatotoxin exposure on rat transferrin desialylation.

beta-Apo-8'-carotenal, but not beta-carotene, is a strong inducer of liver cytochromes P4501A1 and 1A2 in rat.

Chemical-activated luciferase gene expression (CALUX): a novel in vitro bioassay for Ah receptor active compounds in sediments and pore water.

[The perioperative use of recombinant erythropoietin (rhEPO) in Jehovah's witnesses].

In ovo 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure in three avian species. 2. Effects on estrogen receptor and plasma sex steroid hormones during the perinatal period.

In ovo 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure in three avian species. 1. Effects on thyroid hormones and growth during the perinatal period.

Identification of a cell-specific transcription activation domain within the human Ah receptor nuclear translocator.

Cytokine-induced nitric oxide synthase gene transcription is blocked by the heat shock response in human liver cells.

Complementation of Ah receptor deficiency in hepatoma cells: negative feedback regulation and cell cycle control by the Ah receptor.

[The determination of toxic compounds with a dinitrophenol structure in the forensic chemical study of cadaveric material].

Diagnostic criteria for selenium toxicosis in aquatic birds: dietary exposure, tissue concentrations, and macroscopic effects.

Nephrotoxicity of 4-amino-2-chlorophenol and 2-amino-4-chlorophenol in the Fischer 344 rat.

Physical and functional association between GADD153 and CCAAT/enhancer-binding protein beta during cellular stress.

Intracellular glutathione level modulates the induction of apoptosis by delta 12-prostaglandin J2.

Studies on the mechanism of hepatotoxicity of 4-methylphenol (p-cresol): effects of deuterium labeling and ring substitution.

Uroporphyrin accumulation associated with cytochrome P4501A induction in fish hepatoma cells exposed to aryl hydrocarbon receptor agonists, including 2,3,7,8-tetrachlorodibenzo-p-dioxin and planar chlorobiphenyls.

Characterization of the molecular and structural properties of the transformed and nuclear aryl hydrocarbon (Ah) receptor complexes by proteolytic digestion.

Synergistic effect of 2,2',4,4',5,5'-hexachlorobiphenyl and 2,3,7,8-tetrachlorodibenzo-p-dioxin on hepatic porphyrin levels in the rat.

Quantitative analysis of enzyme-altered liver foci in rats initiated with diethylnitrosamine and promoted with 2,3,7,8-tetrachlorodibenzo-p-dioxin or 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin.

Modeling the number and size of hepatic focal lesions following exposure to 2,3,7,8-TCDD.

Promotion of endometriosis by 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats and mice: time-dose dependence and species comparison.

The aromatic hydrocarbon receptor modulates the Hepa 1c1c7 cell cycle and differentiated state independently of dioxin.

Cytochromes P450 (CYP) in the *Poeciliopsis lucida* hepatocellular carcinoma cell line (PLHC-1): dose- and time-dependent glucocorticoid potentiation of CYP1A induction without induction of CYP3A.

DNA binding by the heterodimeric Ah receptor. Relationship to dioxin-induced CYP1A1 transcription in vivo.

Detection of toluene in an adipoceratous body.

The involvement of cytochrome P4502E1 in 2-bromoethanol-induced hepatocyte cytotoxicity.

Comparison of Ah receptor-mediated luciferase and ethoxyresorufin-O-deethylase induction in H4IIE cells: implications for their use as bioanalytical tools for the detection of polyhalogenated aromatic hydrocarbons.

Identification of dioxin-responsive genes in Hep G2 cells using differential mRNA display RT-PCR.

Enhanced arsenite-induced hepatic morphological and biochemical changes in phenobarbital-pretreated rats.

Effect of 2,3,7,8-tetrachlorodibenzo-P-dioxin (TCDD) on the hepatic stellate cell population in the rat.

Interaction of a recombinant form of apolipoprotein[a] with human fibroblasts and with the human hepatoma cell line HepG2.

TCDD-inducible plasminogen activator inhibitor type 2 (PAI-2) in human hepatocytes, HepG2 and monocytic U937 cells.

The actions of 2,3,7,8-tetrachlorodibenzo-p-dioxin on transforming growth factor-beta2 promoter activity are localized to the TATA box binding region and controlled through a tyrosine kinase-dependent pathway.

Immune system impairment and hepatic fibrosis in mice lacking the dioxin-binding Ah receptor.

Arsenite, but not cadmium, induces ornithine decarboxylase and heme oxygenase activity in rat liver: relevance to arsenic carcinogenesis.

Increased oxidative DNA damage in livers of 2,3,7,8-tetrachlorodibenzo-p-dioxin treated intact but not ovariectomized rats.

Cytochrome P450 and its interactions with the heme biosynthetic pathway.

Effects of canthaxanthin, astaxanthin, lycopene and lutein on liver xenobiotic-metabolizing enzymes in the rat.

Curcumin induces apoptosis in immortalized NIH 3T3 and malignant cancer cell lines.

Effects of iron replenishment on iron, calcium, phosphorus and magnesium metabolism in iron-deficient rats.

Mechanism underlying the inhibitory effect of high calcium carbonate intake on iron bioavailability from ferrous sulphate in anaemic rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) inhibition of fat cell differentiation.

Peroxisome proliferators: species differences in response of primary hepatocyte cultures.

Relationship between mitochondrial dysfunction and toxicity of propyl gallate in isolated rat hepatocytes.

Nitro musk compounds genotoxic activity : Genotoxicity testing of nitro musks with the SOS-chromotest and the sister-chromatid exchange test.

Isolation and characterization of a novel gene induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in rat liver.

Morbidity study of extruder personnel with potential exposure to brominated dioxins and furans. II. Results of clinical laboratory studies.

Subcellular localization of TCDD differs between the liver, lungs, and kidneys after acute and subchronic exposure: species/dose comparisons and possible mechanism.

Differences in cytochrome P450-mediated biotransformation of 1,2-dichlorobenzene by rat and man: implications for human risk assessment.

Regulation of gene expression of various phase I and phase II drug-metabolizing enzymes by tamoxifen in rat liver.

Inducibility of cytochromes P-450 by dioxin in liver and extrahepatic tissues of the marmoset monkey (*Callithrix jacchus*).

Affinity purification of mannose 6-phosphate receptor proteins. Purification and partial characterisation of goat liver receptors.

Effects induced by feeding organochlorine-contaminated carp from Saginaw Bay, Lake Huron, to laying White Leghorn hens. I. Effects on health of adult hens, egg production, and fertility.

Rapid distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) to embryonic tissues in C57BL/6N mice and correlation with palatal uptake in vitro.

Cytochrome P4501A induction in avian hepatocyte cultures: a promising approach for predicting the sensitivity of avian species to toxic effects of halogenated aromatic hydrocarbons.

Tissue-specific 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible expression of human UDP-glucuronosyltransferase UGT1A6.

Heat shock response inhibits cytokine-inducible nitric oxide synthase expression in rat hepatocytes.

Independent antioxidant action of vitamins E and C in cultured rat hepatocytes intoxicated with allyl alcohol.

Subchronic dispositional and toxicological effects of arsenate administered in drinking water to mice.

Alteration of oxytocin-induced calcium oscillations in clone 9 cells by toxin exposure.

Activation of tinidazole, an antiprotozoal drug to a mutagen by mammalian liver S9.

Validation of precision-cut liver slices in dynamic organ culture as an in vitro model for studying CYP1A1 and CYP1A2 induction.

Aldehyde dismutase activity of human liver alcohol dehydrogenase.

The primary structure of UK114 tumor antigen.

Identification of functional aryl hydrocarbon receptor and aryl hydrocarbon receptor nuclear translocator in murine splenocytes.

Breast-feeding exposure of infants to environmental contaminants--a public health risk assessment viewpoint: chlorinated dibenzodioxins and chlorinated dibenzofurans.

Purification and partial characterization of an indomethacin hydrolyzing enzyme from pig liver.

Aryl-hydrocarbon receptor-deficient mice are resistant to 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced toxicity.

Differential regulation of mouse Ah receptor gene expression in cell lines of different tissue origins.

Uptake of duck hepatitis B virus into hepatocytes occurs by endocytosis but does not require passage of the virus through an acidic intracellular compartment.

2,3,7,8-Tetrachlorodibenzo-p-dioxin affects retinol esterification in rat hepatic stellate cells and kidney.

Phenobarbital induction of cytochrome P4501A1 is regulated by cAMP-dependent protein kinase-mediated signaling pathways in rainbow trout hepatocytes.

Uncoupling effect of polyunsaturated fatty acid deficiency in isolated rat hepatocytes: effect on glycerol metabolism.

Metabolic stress opens K⁺ channels in hepatoma cells through a Ca²⁺- and protein kinase calpha-dependent mechanism.

Efficient tissue repair underlies the resiliency of postnatally developing rats to chlordecone + CCl₄ hepatotoxicity.

Interaction with the aromatic hydrocarbon receptor, CYP1A induction, and mutagenicity of a series of diaminotoluenes: implications for their carcinogenicity.

Characterization of a murine Ahr null allele: involvement of the Ah receptor in hepatic growth and development.

P-glycoprotein induction in rat liver epithelial cells in response to acute 3-methylcholanthrene treatment.

Effects of culture duration, cytochrome P-450 inhibition and glutathione depletion on toxicity of diverse xenobiotics.

Glutathione depletion in human erythrocytes and rat liver: a study on the interplay between bioactivation and inactivation functions of liver and blood.

Tyrosine 8 contributes to catalysis but is not required for activity of rat liver glutathione S-transferase, 1-1.

The capability of rat colon tissue slices to metabolize the cooked-food carcinogen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine.

Induction of heme oxygenase-1 in LMH cells. Comparison of LMH cells to primary cultures of chick embryo liver cells.

The nature of uncoupling by n-hexane, 1-hexanethiol and 1-hexanol in rat liver mitochondria.

A generic toxicokinetic model for persistent lipophilic compounds in humans: an application to TCDD.

Relative potencies of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls derived from hepatic porphyrin accumulation in mice.

Comparison of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) disposition following pulmonary, oral, dermal, and parenteral exposures to rats.

Differences in binding of epidermal growth factor to liver membranes of TCDD-resistant and TCDD-sensitive rats after a single dose of TCDD.

Mutagenic potential of binary and complex mixtures using different enzyme induction systems.

Effect of exposure of rabbit hepatocytes to sulfur-containing anthelmintics (oxfendazole and fenbendazole) on cytochrome P4501A1 expression.

Cell kinetics of repair after allyl alcohol-induced liver necrosis in mice.

Mechanism of acetaminophen-induced hepatotoxicity: covalent binding versus oxidative stress.

Disposition characteristics of plasmid DNA in the single-pass rat liver perfusion system.

Actions of selected hepatotoxicants on freshly isolated and cryopreserved rat hepatocytes.

Influence of liver tumor promoters on apoptosis in rat hepatocytes induced by 2-acetylaminofluorene, ultraviolet light, or transforming growth factor beta 1.

Arsenic-copper interaction in the kidney of the rat: influence of arsenic metabolites.

The aryl-hydrocarbon receptor, but not the aryl-hydrocarbon receptor nuclear translocator protein, is rapidly depleted in hepatic and nonhepatic culture cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Development of a caffeine breath test to measure cytochrome P450-1A activity in birds.

Studies on trans-cinnamaldehyde II: Mechanisms of cytotoxicity in rat isolated hepatocytes.

Health risk assessment for inuit newborns exposed to dioxin-like compounds through breast feeding.

Biochemical characterization of the effects of the benzodiazepine, midazolam, on mitochondrial electron transfer.

alpha-Lipoic acid dependent regeneration of ascorbic acid from dehydroascorbic acid in rat liver mitochondria.

CYP2E1-mediated mechanism of anti-genotoxicity of the broccoli constituent sulforaphane.

Growth modulation of hepatocytes and rat liver epithelial cells (WB-F344) by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Oxidation of pyridine nucleotides is an early event in the lethality of allyl alcohol.

Investigation of liver binding of pentachlorophenol based upon measurement of protein adducts.

Bald eagle mortality and chlorinated hydrocarbon contaminants in livers from British Columbia, Canada, 1989-1994.

Protective action of dehydroascorbic acid on the Ah receptor-dependent and receptor-independent induction of lipid peroxidation in adipose tissue of male guinea pig caused by TCDD administration.

Determination of the sequence of the aralkyl acyl-CoA:amino acid N-acyltransferase from bovine liver mitochondria.

[The effect of Cd²⁺ on the respiration and swelling of isolated rat liver mitochondria in incubation media of different compositions].

Comparison of the toxicity of allyl alcohol, coumarin and menadione in precision-cut rat, guinea-pig, cynomolgus monkey and human liver slices.

Induction effects of polychlorinated biphenyls, polycyclic aromatic hydrocarbons and other widespread aromatic environmental pollutants on microsomal monooxygenase activities in chick embryo liver.

[Changes in the effect of Cd²⁺ on the respiration of isolated rat liver mitochondria after their preincubation with Ca²⁺, Sr²⁺, Ba²⁺, Mn²⁺ and ruthenium red].

Anisoosmotic regulation of hepatic gene expression.

Metabolism of 1,2-dichloro-1-fluoroethane and 1-fluoro-1,2,2-trichloroethane: electronic factors govern the regioselectivity of cytochrome P450-dependent oxidation.

Changes in taurine as an indicator of hepatic dysfunction and biochemical perturbations. Studies in vivo and in vitro.

The effect of 2,4-dichlorophenol on lipid peroxidation in tissues of guinea pigs with different ascorbic acid intake.

Effect of verapamil on allyl alcohol hepatotoxicity.

Strain differences in tissue repair response to 1,2-dichlorobenzene.

Regulation of metallothionein gene expression. Studies in transfected primary cultures of chick embryo liver cells.

Dose-dependent kinetics and metabolism of 1,2-dichlorobenzene in rat: effect of pretreatment with phenobarbital.

Trout liver slices for metabolism and toxicity studies.

Expression of hepatic pyruvate carboxylase mRNA in C57BL/6J Ah(b/b) and congenic Ah((d/d)) mice exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Induction of cytochromes P450 by dioxins in liver and lung of marmoset monkeys (*Callithrix jacchus*).

Effects of the nonsteroidal anti-inflammatory drug piroxicam on rat liver mitochondria.

A mechanistic model of effects of dioxin on thyroid hormones in the rat.

Tissue distribution after a single subcutaneous administration of 2,3,7,8-tetrabromodibenzo-p-dioxin in comparison with toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Wistar rats.

Modulation of chemical-induced lung and liver toxicity by all-trans-retinol in the male Sprague-Dawley rat.

Effects of modulation of sulphation and glucuronidation on chlorpropham metabolism and cytotoxicity in isolated rat hepatocytes.

Thiols metabolism is altered by the herbicides paraquat, dinoseb and 2,4-D: a study in isolated hepatocytes.

Effect of glutathione depletion on metallothionein synthesis induced by paraquat in mice.

[Paraquat-induced acute dermatitis in a child after playing with a discarded container].

Subacute toxicity of urea herbicide, isoproturon, in male rats.

Enhancement of paraquat toxicity by glutathione depletion in mice in vivo and in vitro.

Species-dependent induction of peroxisome proliferation by haloxyfop, an aryloxyphenoxy herbicide.

Antioxidative activity of 5,6,7,8-tetrahydrobiopterin and its inhibitory effect on paraquat-induced cell toxicity in cultured rat hepatocytes.

Cyanamide-associated alcoholic liver disease: a sequential histological evaluation.

Pentachlorophenol-induced oxidative DNA damage in mouse liver and protective effect of antioxidants.

Diquat-dependent protein carbonyl formation. Identification of lipid-dependent and lipid-independent pathways.

The effects of diquat and ciprofibrate on mRNA expression and catalytic activities of hepatic xenobiotic metabolizing and antioxidant enzymes in rat liver.

Enhancement of tissue lipoperoxidation in propanil-treated rats.

The herbicide dicamba (2-methoxy-3,6-dichlorobenzoic acid) is a peroxisome proliferator in rats.

Chelation of organoarsenate with dimercaptosuccinic acid.

Toxicity of cotoran (fluometuron) in Desert sheep.

Extrathyroidally mediated changes in circulating thyroid hormone concentrations in the male rat following administration of an experimental oxyacetamide (FOE 5043).

The metabolism and DNA binding of the cooked-food mutagen, 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) in precision-cut rat liver slices.

On the effects of paraquat on isolated mitochondria. Evidence that paraquat causes opening of the cyclosporin A-sensitive permeability transition pore synergistically with nitric oxide.

Serum biochemical and histopathological changes related to the hepatic function in pigs following atrazine treatment.

The effects of subchronic chlorate exposure in Sprague-Dawley rats.

Mitochondrial bioenergetics is affected by the herbicide paraquat.

Olfactory toxicity of diethyldithiocarbamate (DDTC) and disulfiram and the protective effect of DDTC against the olfactory toxicity of dichlobenil.

Induction of hepatic drug-metabolizing enzymes by chlornitrofen (CNP) and CNP-amino in rats and mice.

Rapid decreases in indigenous covalent DNA modifications (I-compounds) of male Fischer-344 rat liver DNA by diquat treatment.

Cancer induction by an organic arsenic compound, dimethylarsinic acid (cacodylic acid), in F344/DuCrj rats after pretreatment with five carcinogens.

Inhibition of rat liver low Km aldehyde dehydrogenase by thiocarbamate herbicides. Occupational implications.

Lack of carcinogenicity of daminozide, alone or in combination with its contaminant 1,1-dimethylhydrazine, in a medium-term bioassay.

Effects of paraquat, dinoseb and 2,4-D on intracellular calcium and on vasopressin-induced calcium mobilization in isolated hepatocytes.

Potent protective effect of melatonin on in vivo paraquat-induced oxidative damage in rats.

Survival in a case of massive paraquat ingestion.

The influence of glutathione and detoxifying enzymes on DNA damage induced by 2-alkenals in primary rat hepatocytes and human lymphoblastoid cells.

Atrazine treatment potentiates excretion of mutagenic urine in 2,6-dinitrotoluene-treated Fischer 344 rats.

Pathogenesis of diquat-induced liver necrosis in selenium-deficient rats: assessment of the roles of lipid peroxidation and selenoprotein P.

Antioxidative roles of metallothionein and manganese superoxide dismutase induced by tumor necrosis factor-alpha and interleukin-6.

Simple method for analysis of diquat in biological fluids and tissues by high-performance liquid chromatography.

Upregulation of glucose-6-phosphate dehydrogenase in response to hepatocellular oxidative stress: studies with diquat.

The effect of protoporphyrinogen oxidase inhibitors on microsomal and mitochondrial cytochromes.

Evidence from ³²P-postlabeling and the use of pentachlorophenol for a novel metabolic activation pathway of diethylstilbestrol and its dimethyl ether in mouse liver: likely alpha-hydroxylation of ethyl group(s) followed by sulfate conjugation.

Crocetin protects against oxidative damage in rat primary hepatocytes.

Isolation and characterization of rat primary lung cells.

Excretion of F₂-isoprostanes in bile: a novel index of hepatic lipid peroxidation.

High susceptibility to paraquat-driven lipid peroxidation of cultured hepatocytes loaded with linolenic acid.

Identification of methylated metabolites of inorganic arsenic by thin-layer chromatography.

Mutagenicity of nitroscanate, an antischistosomal drug.

Metabolism of 3,5-di-*t*-butyl-4-methylphenyl N-methylcarbamate, Terbutcarb, on isolated rat hepatocytes.

Hepatic oxidative stress and related defenses during treatment of mice with acetylsalicylic acid and other peroxisome proliferators.

Metabolic activation of the olfactory toxicant, dichlobenil, in rat olfactory microsomes: comparative studies with p-nitrophenol.

Proteolysis in cultured liver epithelial cells during oxidative stress. Role of the multicatalytic proteinase complex, proteasome.

A study of gender, strain and age differences in mouse liver glutathione-S-transferase.

Effect of peroxisomes proliferators and hypolipemic agents on mitochondrial inner membrane linked D-3-hydroxybutyrate dehydrogenase (BDH).

Metabolic deactivation of the herbicide thiazopyr by animal liver esterases.

Species-specific antagonism of Ah receptor action by 2,2',5,5'-tetrachloro- and 2,2',3,3',4,4'-hexachlorobiphenyl.

Toxic equivalency factors do not predict the acute toxicities of dioxins in rats.

Biologically bounded risk assessment for receptor-mediated nongenotoxic carcinogens.

Immunotoxic effects of exposure of rats to xenobiotics via maternal lactation. Part I 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Biological activities of synthetic analogues of *Alternaria alternata* toxin (AAL-toxin) and fumonisin in plant and mammalian cell cultures.

Tissue-specific effects of 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) on the activity of phosphoenolpyruvate carboxykinase (PEPCK) in rats.

PPAR: a mediator of peroxisome proliferator action.

Persistence of TCDD-induced hepatic cell proliferation and growth of enzyme altered foci after chronic exposure followed by cessation of treatment in DEN initiated female rats.

Promotion of N-nitrosodiethylamine-initiated hepatocellular tumors and hepatoblastomas by 2,3,7,8-tetrachlorodibenzo-p-dioxin or Aroclor 1254 in C57BL/6, DBA/2, and B6D2F1 mice.

Interaction of calyculin and its cyanogen bromide fragments with annexin II and glyceraldehyde 3-phosphate dehydrogenase.

Influence of xenobiotics on rainbow trout liver estrogen receptor and vitellogenin gene expression.

Intestinal rotation in experimental congenital diaphragmatic hernia.

Comparison of mouse and chick embryo liver and hepatoma cell lines as model systems used for enzymological estimation of toxicity potentials of organic pollutants.

Purification and identification of mouse lung microvessel endothelial cell-derived chemoattractant for lung-metastasizing murine RAW117 large-cell lymphoma cells: identification as mouse monocyte chemotactic protein 1.

Adaptation of Ehrlich ascites carcinoma cells to energy deprivation in vivo can be associated with heat shock protein accumulation.

Dietary exposure of mink to carp from Saginaw Bay, Michigan: 2. Hematology and liver pathology.

Regulation of CYP1A1 by indolo[3,2-b]carbazole in murine hepatoma cells.

Induction of macrophage procoagulant activity by murine hepatitis virus strain 3: role of tyrosine phosphorylation.

Negative selection in hepatic tumor promotion in relation to cancer risk assessment.

Incorporating cell proliferation kinetics into models for cancer risk assessment.

Biochemical mechanisms and cancer risk assessment models for dioxin.

Establishment of a recombinant hepatic cell line stably expressing alcohol dehydrogenase.

Influx of daunorubicin in multidrug resistant Ehrlich ascites tumour cells: correlation to expression of P-glycoprotein and efflux. Influence of verapamil.

Distribution of microsomal epoxide hydrolase and glutathione S-transferase in the rat olfactory mucosa: relevance to distribution of lesions caused by systemically-administered olfactory toxicants.

Role of lipopolysaccharide and tumor necrosis factor-alpha in induction of hepatocyte necrosis.

H-ras oncogene mutation spectra in B6C3F1 and C57BL/6 mouse liver tumors provide evidence for TCDD promotion of spontaneous and vinyl carbamate-initiated liver cells.

Sensitization to x-rays by sodium arsenite or heat in normal cells and in cells with an induced tolerance for heat and arsenite.

Human hepatoma cell mutant defective in cell surface protein trafficking.

Identification of a 120-kDa protein associated with aromatic hydrocarbon receptor nuclear translocator.

The Ah receptor recognizes DNA binding sites for the B cell transcription factor, BSAP: a possible mechanism for dioxin-mediated alteration of CD19 gene expression in human B lymphocytes.

Dioxin induces localized, graded changes in chromatin structure: implications for Cyp1A1 gene transcription.

Ferritin excretion and iron balance in humans.

Inhibition of 4-hydroxyphenylpyruvate dioxygenase by 2-(2-nitro-4-trifluoromethylbenzoyl)-cyclohexane-1,3-dione and 2-(2-chloro-4-methanesulfonylbenzoyl)-cyclohexane-1,3-dione.

Promotion of N-nitrosodimethylamine-initiated mouse lung tumors following single or multiple low dose exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Inhibition of apoptosis during 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated tumour promotion in rat liver.

Dioxin--an analysis of the major human studies: comparison with animal-based cancer risks.

Effect of a negative regulatory element (NRE) on the human CYP1A1 gene expression in breast carcinoma MCF-7 and hepatoma HepG2 cells.

Neonatal lethality associated with respiratory distress in mice lacking cytochrome P450 1A2.

Immune system impairment and hepatic fibrosis in mice lacking the dioxin-binding Ah receptor.

Enhancement of the stress response by low concentrations of arsenite in arsenite-pretreated Reuber H35 hepatoma cells.

Hepatic microsomal ethoxyresorufin O-deethylase-inducing potency in ovo and cytosolic Ah receptor binding affinity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: comparison of four avian species.

Subchronic dose-response study of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats.

Apoptosis: the in vivo mechanism which mediates spontaneous AK-5 tumor regression.

Enzyme induction by L-buthionine (S,R)-sulfoximine in cultured mouse hepatoma cells.

Suppression of cytochrome P450 (Cyp1a-1) induction in mouse hepatoma Hepa-1C1C7 cells by methoxsalen.

Modulation of TCDD-induced wasting syndrome by portocaval anastomosis and vagotomy in Long-Evans and Han/Wistar rats.

Liver tumour promoting activity of 3,4,5,3',4'-pentachlorobiphenyl and its interaction with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Possible involvement of the Ah receptor in the induction of cytochrome P-450IA1 under conditions of hydrodynamic shear in microcarrier-attached hepatoma cell lines.

Correlation between toxicity and effects on intermediary metabolism in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated male C57BL/6J and DBA/2J mice.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) distribution and cytochrome P4501A induction in young adult and senescent male mice.

Orientation of the heterodimeric aryl hydrocarbon (dioxin) receptor complex on its asymmetric DNA recognition sequence.

A cytokeratin 8-like protein with plasminogen-binding activity is present on the external surfaces of hepatocytes, HepG2 cells and breast carcinoma cell lines.

Comparison of expression of aldehyde dehydrogenase 3 and CYP1A1 in dominant and recessive aryl hydrocarbon hydroxylase-deficient mutant mouse hepatoma cells.

Enrichment with arachidonic acid increases the sensitivity of hepatoma cells to the cytotoxic effects of oxidative stress.

Identification of 3'-methoxy-4'-nitroflavone as a pure aryl hydrocarbon (Ah) receptor antagonist and evidence for more than one form of the nuclear Ah receptor in MCF-7 human breast cancer cells.

The effects of acute exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin on glioma-specific cytotoxic T-cell activity in Fischer 344 rats.

A morphological study of liver lesions in *Xenopus* larvae exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) with special reference to apoptosis of hepatocytes.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on tryptophan and glucose homeostasis in the most TCDD-susceptible and the most TCDD-resistant species, guinea pigs and hamsters.

Renal tumorigenicity of 1,1-dichloroethene in mice: the role of male-specific expression of cytochrome P450 2E1 in the renal bioactivation of 1,1-dichloroethene.

Survival after a severe iron poisoning treated with intermittent infusions of deferoxamine.

The importance of pharmacokinetics in determining the relative potency of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,7,8-tetrachlorodibenzofuran.

Mechanisms of the formation and disposition of reactive metabolites that can cause acute liver injury.

Immunosuppressive potential of several polycyclic aromatic hydrocarbons (PAHs) found at a Superfund site: new model used to evaluate additive interactions between benzo[a]pyrene and TCDD.

Sodium arsenite and heat shock induce stress proteins in precision-cut rat liver slices.

Evaluation of the cytotoxicity of 10 chemicals in human and rat hepatocytes and in cell lines: Correlation between in vitro data and human lethal concentration.

Human cytochromes P4501A1 and P4501A2: R-warfarin metabolism as a probe.

Enzymatic methylation of arsenic compounds: assay, partial purification, and properties of arsenite methyltransferase and monomethylarsonic acid methyltransferase of rabbit liver.

Receptor-mediated toxicity.

Factors influencing the protein binding of YH-439 using an equilibrium dialysis technique. A new hepatoprotective agent.

2,3,7,8-Tetrachlorodibenzo-p-dioxin inhibits DNA synthesis in rat primary hepatocytes.

Measurement of nitric oxide synthase activity in sections of rat liver.

Response of [Ah] battery genes to compounds that protect against menadione toxicity.

2,3,7,8-Tetrachlorodibenzo-p-dioxin blocks the physiological regulation of hepatic phosphoenolpyruvate carboxykinase activity in primary rat hepatocytes.

Loss of mitochondrial membrane potential is not essential to hepatocyte killing by allyl alcohol.

Dog liver microsomal P450 enzyme-mediated toluene biotransformation.

11 beta-hydroxysteroid dehydrogenase is an exclusive 11 beta- reductase in primary cultures of rat hepatocytes: effect of physicochemical and hormonal manipulations.

Rainbow trout hepatic mixed-function oxygenase induction by polychlorinated dibenzo-p-dioxins (PCDDs) as a function of time and tissue concentration.

Amino-acid sequence of rat liver kynureninase.

Induction of hepatic CYP1A2 by the oral administration of caffeine to rats: lack of association with the Ah locus.

Screening assay for dioxin-like compounds based on competitive binding to the murine hepatic Ah receptor. 2. Application to environmental samples.

Screening assay for dioxin-like compounds based on competitive binding to the murine hepatic Ah receptor. 1. Assay development.

Purification and application of a single-chain Fv antibody fragment specific to hepatitis B virus surface antigen.

Inhibition of gap junctional intercellular communication by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in rat hepatocytes.

Toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) to the human thymus after implantation in SCID mice.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces diverse retinoic acid metabolites in multiple tissues of the Sprague-Dawley rat.

Picrotoxin is a CYP1A1 inducer in rainbow trout hepatocytes.

Electrophile and antioxidant regulation of enzymes that detoxify carcinogens.

Transport of dehydroepiandrosterone and dehydroepiandrosterone sulphate into rat hepatocytes.

Bivascular liver perfusion in the anterograde and retrograde modes: zonation of the response to inhibitors of oxidative phosphorylation.

Peroxisomal membrane protein PMP68 of mouse liver: cloning of a cDNA encompassing the nucleotide binding fold and epitope mapping of monoclonal antibodies to the expressed protein.

Enhanced phosphorylation of nuclear 21-kDa and 34-kDa proteins in hepatoma cell death induced by tumor-necrosis factor-alpha.

Enhanced effectiveness of dimethyl-4,4'-dimethoxy-5,6,5',6'-dimethylene dioxybiphenyl-2,2'-dicarboxylate in combination with garlic oil against experimental hepatic injury in rats and mice.

Effects of gestational and lactational exposure to coplanar polychlorinated biphenyl (PCB) congeners or 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on thyroid hormone concentrations in weanling rats.

Cyclophosphamide: review of its mutagenicity for an assessment of potential germ cell risks.

Toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats including placental and lactational transfer to fetuses and neonates.

Inhibitory effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on rat hepatocyte proliferation induced by 2/3 partial hepatectomy.

Octanoate affects 2,4-dinitrophenol uncoupling in intact isolated rat hepatocytes.

Purification and characterization of hepatic oligosaccharyltransferase.

Halogenated aromatic hydrocarbons and toxicity equivalency factors (TEFs) from the public health assessment perspective.

Cytochromes P450 in cynomolgus monkeys mutagenically activate 2-amino-3-methylimidazo[4,5-f]quinoline (IQ) but not 2-amino-3,8-dimethylimidazo[4,5-f]quinoxaline (MeIQx).

A stereotypic, transplantable liver tissue-culture system.

Identification of Asp258 as the metal coordinate of pigeon liver malic enzyme by site-specific mutagenesis.

Rat CYP1B1: an adrenal cytochrome P450 that exhibits sex-dependent expression in livers and kidneys of TCDD-treated animals.

Relative potencies of induction of hepatic drug-metabolizing enzyme genes by individual PCB congeners.

TCDD reduces rat hepatic epidermal growth factor receptor: comparison of binding, immunodetection, and autophosphorylation.

Regulation of the Ah gene battery via Ah receptor-dependent and independent processes in cultured adult rat hepatocytes.

Alterations in thyroid function in female Sprague-Dawley rats following chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Participation of small intraportal stem cells in the restitutive response of the liver to periportal necrosis induced by allyl alcohol.

Characterization of the Ah receptor from human placental tissue.

Growth hormone signaling leading to CYP2C12 gene expression in rat hepatocytes involves phospholipase A2.

Inhibition of DNA synthesis in primary cultures of adult rat hepatocytes by benzo[a]pyrene and related aromatic hydrocarbons: role of Ah receptor-dependent events.

Comparison of the primary structure of nuclear and mitochondrial glutamate dehydrogenase from bovine liver.

A metabolite of carcinogenic 2-acetylaminofluorene, 2-nitrosofluorene, induces redox cycling in mitochondria.

Depletion of neutrophils and modulation of Kupffer cell function in allyl alcohol-induced hepatotoxicity.

Potency of mixtures of polychlorinated biphenyls as inducers of dioxin receptor-regulated CYP1A activity in rat hepatocytes and H4IIE cells.

Sulphated proteoglycan is required for collecting duct growth and branching but not nephron formation during kidney development.

The interactions between retinol and five different hepatotoxicants in the Swiss Webster mouse.

Induction of cytochrome P450 isoenzymes after toxicokinetic interactions between 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,2',4,4',5,5'-hexachlorobiphenyl in the liver of the mouse.

Comparative metabolism and toxicity of dichlorobenzenes in Sprague-Dawley, Fischer-344 and human liver slices.

Reaction of glutathione with the electrophilic metabolites of 1,1-dichloroethylene.

Identification of essential lysyl and cysteinyl residues, and the amino acid sequence at the substrate-binding site of retinal oxidase.

A human erythrocyte-derived growth-promoting factor with a wide target cell spectrum: identification as catalase.

Dioxin activates HIV-1 gene expression by an oxidative stress pathway requiring a functional cytochrome P450 CYP1A1 enzyme.

Up-regulation of CYP2A5 expression by porphyrinogenic agents in mouse liver.

Effects of the herbicide chlorthiamid on the olfactory mucosa.

Induction of CYP1A and glutathione S-transferase activities by 2,3,7,8-tetrachlorodibenzo-p-dioxin in human hepatocyte cultures.

Subchronic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and their reversibility in male Sprague-Dawley rats.

Effects of magnesium and iron on lipid peroxidation in cultured hepatocytes.

DNA binding of the transformed guinea pig hepatic Ah receptor complex: identification and partial characterization of two high-affinity DNA-binding forms.

[Morphologic characteristics of the thymus in pregnant and newborn mice exposed to sodium arsenite].

Mechanism for drug absorption from rat-liver surface membrane: effect of dose and transport inhibitors on the pharmacokinetics of phenol red.

Protective effect of oleanolic acid against chemical-induced acute necrotic liver injury in mice.

Polyfluorinated dibenzodioxins and dibenzofurans--synthesis, analysis, formation and toxicology.

Dose-response relationships of tissue distribution and induction of CYP1A1 and CYP1A2 enzymatic activities following acute exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice.

Phenotypic variability in induction of P-glycoprotein mRNA by aromatic hydrocarbons in primary human hepatocytes.

Arsenic increased lipid peroxidation in rat tissues by a mechanism independent of glutathione levels.

Collagen and fibronectin immobilization on PHEMA microcarriers for hepatocyte attachment.

The hepatocellular metabolism of 4-hydroxynonanal by alcohol dehydrogenase, aldehyde dehydrogenase, and glutathione S-transferase.

CYP1 induction, binding to the hepatic aromatic hydrocarbon receptor and mutagenicity of a series of 11-alkoxy cyclopenta[a]phenanthren-17-ones: a structure activity relationship.

Alcohol:NAD⁺ oxidoreductase is present in rat liver peroxisomes.

The influence of ascorbic acid on the hepatic cytochrome P-450, and glutathione in guinea-pigs exposed to 2,4-dichlorophenol.

Comparative toxicity of four chlorinated dibenzo-p-dioxins (CDDs) and their mixture. IV. Determination of liver concentrations.

Allyl alcohol cytotoxicity in isolated rat hepatocytes: effects of azide, fasting, and fructose.

Fish oil enhances pentachlorobenzene metabolism and reduces its accumulation in rats.

Carbamylation decreases the cytotoxicity but not the drug-carrier properties of polylysines.

Four generation reproductive toxicity study with 2,3,7,8-tetrachlorodibenzo-P-dioxin (TCDD) in rats. I. Toxicokinetic variations in dams and offspring.

Effects of pesticides on isolated rat hepatocytes, mitochondria, and microsomes II.

Analysis of 4-hydroxycyclophosphamide in human blood.

Quinone methide formation from para isomers of methylphenol (cresol), ethylphenol, and isopropylphenol: relationship to toxicity.

Aromatic hydrocarbon receptor in cultured fetal cells from C57BL/6J and DBA/2J mice: similarity in molecular mass to receptors in adult livers.

Selective increase of rat lung cytochrome P450 1A1 dependent monooxygenase activity after acute sodium arsenite administration.

Identification of urinary metabolites of human subjects exposed to o-dichlorobenzene.

Tyrosine kinase inhibitors potentiate the induction of low density lipoprotein receptor gene expression by hepatocyte growth factor.

Metabolism and genotoxicity of the halogenated alkyl compound tris(2,3-dibromopropyl)phosphate.

Protoporphyrinogen accumulation in cultured hepatocytes treated with the diphenyl ether herbicide, acifluorfen.

Application of the kinetic of RNA synthesis on Hep 3B cells. Study of the medium-term cytotoxicity of atrazine.

Nephrotoxicity and hepatotoxicity of 5,6-dichloro-4-thia-5-hexenoic acid: evidence for fatty acid beta-oxidation-dependent bioactivation.

Effect of selenium deficiency and glutathione-modulating agents on diquat toxicity and lipid peroxidation in rats.

Effect of aldehyde dehydrogenase and alcohol dehydrogenase inhibitors and ethanol on blood and liver ketone bodies in the rat.

Assay of linuron and a pesticide mixture commonly found in the Italian diet, for promoting activity in rat liver carcinogenesis.

Evaluation of liver protein due to stress under 2,4-D intoxication in *Channa punctatus* (Bloch.).

Interactions of herbicides 2,4-D and dinoseb with liver mitochondrial bioenergetics.

Studies on the mechanism of the carcinogenic activity of amitrole.

Cinnamaldehyde-induced micronuclei in rodent liver.

Defence capacity modulation of human hepatoma cell line Hep 3B by three pesticides.

Diquat- and acetaminophen-induced alterations of biliary efflux of iron in rats.

Assessment of lipid peroxidation associated with lung damage induced by oxidative stress. In vivo and in vitro studies.

Effect of ethanol on paraquat toxicity in F344 rats.

Effects of pentachlorophenol (PCP) on the pituitary and thyroidal hormone regulation in the rat.

Biliary excretion of lysosomal enzymes, iron, and oxidized protein in Fischer-344 and Sprague-Dawley rats and the effects of diquat and acetaminophen.

[Alteration of lipid peroxidation and the activity of peroxide metabolism enzymes in the liver, kidney and lung following the administration of paraquat in mice].

Metabolic alterations in hepatocytes promoted by the herbicides paraquat, dinoseb and 2,4-D.

[The enzymes of mono-oxygenase oxidation in the lymphocytes and liver of persons subjected to chlorophenoxy herbicide exposure].

Effect of Tordon 2,4-D 64/240 triethanolamine BR on the energy metabolism of rat liver mitochondria.

Methemoglobinemia following ingestion of a monolinuron/paraquat herbicide (Gramonol).

Aldehyde dehydrogenase of mice inhibited by thiocarbamate herbicides.

Role of hydrogen peroxide in hypoxia-induced erythropoietin production.

Activation of the liver carcinogen 2-nitropropane by aryl sulfotransferase.

[The effect of the activation of lipid peroxidation on the structure of extraembryonic organs and the liver in rats at different periods of ontogeny].

The pentachlorophenol metabolite tetrachloro-p-hydroquinone induces the formation of 8-hydroxy-2-deoxyguanosine in liver DNA of male B6C3F1 mice.

Aminotriazole is a potent inhibitor of alpha-oxidation of 3-methyl-substituted fatty acids in rat liver.

Tamoxifen: evidence by ³²P-postlabeling and use of metabolic inhibitors for two distinct pathways leading to mouse hepatic DNA adduct formation and identification of 4-hydroxytamoxifen as a proximate metabolite.

Dietary butylated hydroxytoluene counteracts with paraquat to reduce the rate of hepatic DNA single strand breaks in senescence-accelerated mice.

Detection of exocyclic 1,N²-propanodeoxyguanosine adducts as common DNA lesions in rodents and humans.

Competitive inhibition of human liver microsomal cytochrome P450 3A-dependent steroid 6 beta-hydroxylation activity by cyclophosphamide and ifosfamide in vitro.

In vitro biotransformation of thiazopyr by rat liver microsomes: oxidative cleavage of a carboxylic methylester by monooxygenases.

Effect of the protoporphyrinogen oxidase-inhibiting herbicide fomesafen on liver uroporphyrin and heptacarboxylic porphyrin in two mouse strains.

Role of iron and glutathione redox cycle in acetaminophen-induced cytotoxicity to cultured rat hepatocytes.

Evaluation of commercial immunoassays for the detection of alachlor in milk, eggs and liver.

Strong intensification of mouse hepatic tamoxifen DNA adduct formation by pretreatment with the sulfotransferase inhibitor and ubiquitous environmental pollutant pentachlorophenol.

Metabolic fate of S,S,S-tributyl phosphorotrithioate (DEF) in the lactating goat.

The role of sulfation and/or acetylation in the metabolism of the cooked-food mutagen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine in *Salmonella typhimurium* and isolated rat hepatocytes.

Genotoxicity of the alkenylbenzenes alpha- and beta-asarone, myristicin and elimicin as determined by the UDS assay in cultured rat hepatocytes.

Effects of aldehyde dehydrogenase and glutathione on the degradation of (E)-4-hydroxy-2-nonenal and N-hexanal in rat liver.

Effect of paraquat on the malondialdehyde level in rat liver microsomes (in vitro).

Suspension-mediated induction of Hepa 1c1c7 Cyp1a-1 expression is dependent on the Ah receptor signal transduction pathway.

Hepatocyte growth factor/scatter factor induces tyrosine phosphorylation of focal adhesion kinase (p125FAK) and promotes migration and invasion by oral squamous cell carcinoma cells.

Characterization of a thioredoxin-related surface protein.

Inhibition of intercellular communication by 2,3,7,8-tetrachlorodibenzo-p-dioxin and dioxin-like PCBs in mouse hepatoma cells (Hepa1c1c7): involvement of the Ah receptor.

The effect of 1,2,3,4-tetrachlorodibenzo-p-dioxin on drug-metabolizing enzymes in the rat liver.

The importance of biological realism in dioxin risk assessment models.

Inhibition of mammalian protoporphyrinogen oxidase by acifluorfen.

Transcriptional activation function of the mouse Ah receptor nuclear translocator.

Stressor-specific induction of heat shock proteins in rat hepatoma cells.

Regulation of [Ah] gene battery enzymes and glutathione levels by 5,10-dihydroindeno[1,2-b]indole in mouse hepatoma cell lines.

Dose response and time course of alterations in tryptophan metabolism by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the most TCDD-susceptible and the most TCDD-resistant rat strain: relationship with TCDD lethality.

A protective effect of glutathione-dextran macromolecular conjugates on acetaminophen-induced hepatotoxicity dependent on molecular size.

2-Phenylphenanthridinone and related compounds: aryl hydrocarbon receptor agonists and suicide inactivators of P4501A1.

Interactive regulation of Ah and glucocorticoid receptors in the synergistic induction of cleft palate by 2,3,7,8-tetrachlorodibenzo-p-dioxin and hydrocortisone.

Effect of 1,2,4-trichlorodibenzo-p-dioxin on drug-metabolizing enzymes in the rat liver.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the hepatic 7-ethoxyresorufin O-deethylase activity in four rodent species.

Toxic potency of 3,3',4,4',5-pentachlorobiphenyl relative to and in combination with 2,3,7,8-tetrachlorodibenzo-p-dioxin in a subchronic feeding study in the rat.

Aberrant CYP1A1 induction: discrepancy of CYP1A1 mRNA and aryl hydrocarbon hydroxylase activity in mutant cells of mouse hepatoma line, Hepa-1.

Morbidity follow up study of BASF employees exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) after a 1953 chemical reactor incident.

Effect of ethanol and sodium arsenite on HSP-72 formation and on survival in a murine endotoxin model.

Toxic potency of 2,3,3',4,4',5-hexachlorobiphenyl relative to and in combination with 2,3,7,8-tetrachlorodibenzo-p-dioxin in a subchronic feeding study in the rat.

Apoptosis and chemical carcinogenesis.

Effects of 2,3,7,8-tetrachloro- and 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin on the proliferation of preneoplastic liver cells in the rat.

The function of heat-shock proteins in stress tolerance.

Coxsackievirus B3 infection alters the uptake of 2,3,7,8-tetrachlorodibenzo-p-dioxin into various tissues of the mouse.

In vivo and in vitro 4-amino-2,6-dichlorophenol nephrotoxicity and hepatotoxicity in the Fischer 344 rat.

Human NAD(P)H:quinone oxidoreductase2. Gene structure, activity, and tissue-specific expression.

Short and long term effects of cytoskeleton-disrupting drugs on cytochrome P450 Cyp1a-1 induction in murine hepatoma 1c1c7 cells: suppression by the microtubule inhibitor nocodazole.

[SMANCS/lipiodol].

Tumor-promoting effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and phenobarbital in initiated weanling Sprague-Dawley rats: a quantitative, phenotypic, and ras p21 protein study.

Photoaffinity labeling of the Ah receptor with 3-[³H]methylcholanthrene and formation of a 165-kDa complex between the ligand-binding subunit and a novel cytosolic protein.

2,3,7,8-Tetrachlorodibenzo-p-dioxin versus 3-methylcholanthrene: comparative studies of Ah receptor binding, transformation, and induction of CYP1A1.

Characterization of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced brain serotonin metabolism in the rat.

Co-expression of human CYP1A1 and a human analog of cytochrome P450-EF in response to 2,3,7,8-tetrachloro-dibenzo-p-dioxin in the human mammary carcinoma-derived MCF-7 cells.

Monitoring biological effects of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls in great blue heron chicks (*Ardea herodias*) in British Columbia.

A cellular factor stimulates ligand-dependent release of hsp90 from the basic helix-loop-helix dioxin receptor.

Induction of heat-shock protein synthesis and thermotolerance in EL-4 ascites tumor cells by transient ATP depletion after ischemic stress.

Suppression of TCDD-induced cytochrome P450 IA1 activity by staurosporine in mouse primary hepatocyte cultures and hepatoma cells.

The human CYP1A2 gene and induction by 3-methylcholanthrene. A region of DNA that supports AH-receptor binding and promoter-specific induction.

Promotion of preneoplastic foci in rat liver with 2,3,7,8-tetrachlorodibenzo-p-dioxin, 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin and a defined mixture of 49 polychlorinated dibenzo-p-dioxins.

Regulation of human dioxin receptor function by indolocarbazoles, receptor ligands of dietary origin.

Biological effects of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls in double-crested cormorant chicks (*Phalacrocorax auritus*).

Developmental toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the most TCDD-resistant and -susceptible rat strains.

alpha-Fucose-mediated binding and degradation of tissue-type plasminogen activator by HepG2 cells.

A toxic equivalency factor scale for polychlorinated dibenzofurans.

Isolation of a cDNA clone specifying rat chaperonin 10, a stress-inducible mitochondrial matrix protein synthesised without a cleavable presequence.

2,3,7,8-Tetrachlorodibenzo-p-dioxin as growth modulator in mouse hepatocytes with high and low affinity Ah receptor.

Dose-response relationship in multistage carcinogenesis: promoters.

Multiple mechanisms are responsible for altered expression of gap junction genes during oncogenesis in rat liver.

Porphyrin studies in TCDD-exposed workers.

Liver iron quantification: studies in aqueous iron solutions, iron overloaded rats, and patients with hereditary hemochromatosis.

A model of effects of TCDD on expression of rat liver proteins.

Dose-response and risk assessment considerations for receptor-mediated effects: case study with a TCDD hepatic tumor promotion model.

Combining estimates of the odds ratio: the state of the art.

Thyroid hormones and regulation of cell reliability systems.

The rice culture filtrate of *Bacillus cereus* isolated from emetic-type food poisoning causes mitochondrial swelling in a HEp-2 cell.

Peri- and postnatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: effects on physiological development, reflexes, locomotor activity and learning behaviour in Wistar rats.

Relationship between acute toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and disturbance of intermediary metabolism in the Long-Evans rat.

Mechanisms of chemical injury of thyroid gland.

A targeting model of boron neutron-capture therapy to hepatoma cells in vivo with a boronated anti-(alpha-fetoprotein) monoclonal antibody.

Could the cytokeratin molecule be modulated during tumor transformation in hepatocellular carcinoma?

NTP Toxicology and Carcinogenesis Studies of 4,4'-Thiobis(6-*t*-butyl-*m*-cresol) (CAS No. 96-69-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Purification of NADPH-dependent dehydroascorbate reductase from rat liver and its identification with 3 alpha-hydroxysteroid dehydrogenase.

Additive binding of polychlorinated biphenyls and 2,3,7,8-tetrachlorodibenzo-p-dioxin to the murine hepatic Ah receptor.

Immobilization, characterization, and laboratory-scale application of bovine liver arginase.

Lipid peroxidation and chemiluminescence during naproxen metabolism in rat liver microsomes.

Purification and characterization of a cytosolic thyroid-hormone-binding protein (CTBP) in *Xenopus* liver.

Identification of hepatocytes as the major locus of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced CYP1-related P450s, TCDDAA and TCDDAHH, in chick embryo liver.

Effect on tissue vitamin A levels in the rat following subchronic exposure to four individual PCB congeners (IUPAC 77, 118, 126, and 153).

Accumulation and persistence of individual polychlorinated biphenyl congeners in liver, blood, and adipose tissue of rats following dietary exposure to Aroclor 1254.

Immunohistochemical double-staining for Ah receptor and ARNT in human embryonic palatal shelves.

Use of a selective inhibitor of liver carnitine palmitoyltransferase I (CPT I) allows quantification of its contribution to total CPT I activity in rat heart. Evidence that the dominant cardiac CPT I isoform is identical to the skeletal muscle enzyme.

Effect of rate of intracellular transport and diacytosis on cytotoxicity of hybrid toxins. Study with hybrids using hepatic asialoglycoprotein receptor-mediated endocytosis.

Accumulation of polychlorinated dibenzo-p-dioxins and dibenzofurans in liver of control laboratory rats.

Review of the safety assessment of polychlorinated biphenyls (PCBs) with particular reference to reproductive toxicity.

Ca(2+)-loading modulates potencies of cyclosporin A, Mg²⁺ and ADP to recouple permeabilized rat liver mitochondria.

[The effect of lipid peroxidation on the lipid and phospholipid composition of mitochondrial membranes during thermal incubation].

Lack of response of the rat liver "class 3" cytosolic aldehyde dehydrogenase to toxic chemicals, glutathione depletion, and other forms of stress.

Tissue specific expression of the rat Ah-receptor and ARNT mRNAs.

Comparative study of the hepatoprotective effect of silymarin and silybin on isolated rat hepatocytes.

Effect of glutathione depletion and inhibition of glucuronidation and sulfation on 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) metabolism, PhIP-DNA adduct formation and unscheduled DNA synthesis in primary rat hepatocytes.

Glutathione depletion induced in rat liver fractions by seven pesticides.

Comparative kinetic study of the binding between 2,3,7,8-tetrachlorodibenzo-p-dioxin and related ligands with the hepatic Ah receptors from several rodent species.

An inhibitory factor in rat thymus which interferes with binding of cytosol Ah receptor to xenobiotic responsive element.

A volume-activated taurine channel in skate hepatocytes: membrane polarity and role of intracellular ATP.

Purification and characterization of glutathione-dependent dehydroascorbate reductase from rat liver.

Primary structure and tetrahydropteroylglutamate binding site of rabbit liver cytosolic 5,10-methenyltetrahydrofolate synthetase.

A pharmacodynamically responsive model of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) transfer between liver and fat at low and high doses.

Peptide mapping of the subunits and deglycosylated polypeptides of human liver alpha-L-fucosidase.

Hepatobiliary disposition of 3'-azido-3'-deoxythymidine (AZT) in the rat: effect of phenobarbitone induction.

Effect of pretreatment of rats with uracil on liver injuries induced by D-galactosamine and allyl alcohol.

K(+)-linked release of oxidized glutathione induced by tert-butyl hydroperoxide in perfused rat liver is independent of lipid peroxidation and cell death.

Purification and amino- and carboxyl-terminal amino acid sequences of alanine-glyoxylate transaminase 1 from human liver.

Affinity cleavage at the putative metal-binding site of pigeon liver malic enzyme by the Fe(2+)-ascorbate system.

Induction of tamoxifen-4-hydroxylation by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), beta-naphthoflavone (beta NF), and phenobarbital (PB) in avian liver: identification of P450 TCDDAA as catalyst of 4-hydroxylation induced by TCDD and beta NF.

Congener-specific data of polychlorinated biphenyl residues in human adipose tissue in Poland.

Isolation of phosphorylated calmodulin from rat liver and identification of the in vivo phosphorylation sites.

Mutagenicity and CYP1A induction by azobenzenes correlates with their carcinogenicity.

Biphasic modulation of protein kinase C (PKC) activity by polychlorinated dibenzo-p-dioxins (PCDDs) in serum-deprived rat aortic smooth muscle cells.

Acetaldehyde exposure causes growth inhibition in a Chinese hamster ovary cell line that expresses alcohol dehydrogenase.

Mouse cytochrome P-450EF, representative of a new 1B subfamily of cytochrome P-450s. Cloning, sequence determination, and tissue expression.

Ah receptor in embryonic mouse palate and effects of TCDD on receptor expression.

Mechanisms of impaired hepatic fatty acid metabolism in rats with long-term bile duct ligation.

Stimulation of collagen alpha 1(I) gene expression is associated with lipid peroxidation in hepatocellular injury: a link to tissue fibrosis?

Comparative oxidation of 2-propyn-1-ol with other low molecular weight unsaturated and saturated primary alcohols by bovine liver catalase in vitro.

Hepatic uptake and metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,7,8-tetrachlorodibenzofuran.

The effect of Chinese hepatoprotective medicines on experimental liver injury in mice.

Comparison of the ATPase activities of bovine heart and liver mitochondrial ATP synthases with different tissue-specific gamma subunit isoforms.

Tissue-specific constitutive and inducible expression of rat phenol UDP-glucuronosyltransferase.

Acetylsalicylate (ASA)-induced mitochondrial dysfunction and its potentiation by Ca²⁺.

Hepatoprotective mechanism of silymarin: no evidence for involvement of cytochrome P450 2E1.

Comparative cytotoxicity between butylated hydroxytoluene and its methylcarbamate derivative, terbucarb, on isolated rat hepatocytes.

Fungal metabolites. X. The effect of peptide antibiotics, trichosporin-Bs, on the respiratory activity of mitochondria.

Enzymatic reduction of xenobiotic alpha,beta-unsaturated ketones: formation of allyl alcohol metabolites from shogaol and dehydroparadol.

Isolation and structure of a third form of liver microsomal flavin monooxygenase.

Effect of dietary turmeric (*Curcuma longa*) on iron-induced lipid peroxidation in the rat liver.

Cresol isomers: comparison of toxic potency in rat liver slices.

Consequences of 3-methylcholanthrene-type induction for the metabolism of 4-aminobiphenyl in isolated rat hepatocytes.

Serum modulation of the effects of TCDD on the in vitro antibody response and on enzyme induction in primary hepatocytes.

Protection by ascorbic acid against oxidative injury of isolated hepatocytes.

Purification and biochemical characterization of two major cytochrome P-450 isoforms induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in chick embryo liver.

Acute cytotoxicity of ten chemicals in human and rat cultured hepatocytes and in cell lines: Correlation between in vitro data and human lethal concentrations.

Microheterogeneity in glycosylphosphatidylinositol anchor structures of bovine liver 5'-nucleotidase.

Structural relation between HDL-binding proteins in porcine liver.

[Stimulation of respiration in liver mitochondria by glucose in the absence of hexokinase activity. The effect of saccharose and several inhibitors of oxidative phosphorylation].

Controversial role of intracellular iron in the mechanisms of chemically-induced hepatotoxicity.

The effects of anti-TNF-alpha antibody and dexamethasone on TCDD-induced oxidative stress in mice.

Toxicity of bile acids on the electron transport chain of isolated rat liver mitochondria.

Dithiothreitol reversal of allyl alcohol cytotoxicity in isolated rat hepatocytes.

Effect of Paraquat Administration on Antioxidative Enzyme Activities and Oxidative Damage in the Blood and Liver of Senescence-accelerated Mice.

Hepatic Phosphoglucomutase Activity as a Marker of Oxidative Stress Induced by Pro-oxidative Drugs.

NTP Toxicology and Carcinogenesis Studies of o-Benzyl-p-Chlorophenol (CAS No. 120-32-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Ferritin stimulation of hydroxyl radical production by rat liver nuclei.

Cyclophosphamide-induced lung toxicity: mechanism of endothelial cell injury.

Dose-response relationships in mice following subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: CYP1A1, CYP1A2, estrogen receptor, and protein tyrosine phosphorylation.

Obesity decreases hepatic glutathione concentrations and markedly potentiates allyl alcohol-induced periportal necrosis in the overfed rat.

Purification and characterization of hepatic microsomal NADPH cytochrome c reductase from rhesus monkey (*Macaca mulatta*).

Effect of a mixture of 15 commonly used pesticides on DNA levels of 8-hydroxy-2-deoxyguanosine and xenobiotic metabolizing enzymes in rat liver.

Allyl alcohol cytotoxicity in isolated rat hepatocytes: mechanism of cell death does not involve an early rise in cytosolic free calcium.

Effect of low-intensity argon laser irradiation on mitochondrial respiration.

Lack of alachlor induced DNA damage as assayed in rodent liver by the alkaline elution test.

[The place of pentachlorophenol in general medicinal practice].

Effects of 2-[1-(ethoxyimino)propyl]-3-hydroxy-5-(2,4,6-trimethylphenyl) cyclohex-2-enone on hepatic haem biosynthesis: species differences in hepatic porphyria.

Mechanism of cytotoxicity of paraquat. II. Organ specificity of paraquat-stimulated lipid peroxidation in the inner membrane of mitochondria.

Hepatic alterations in experimental paraquat intoxication.

Viral infections and chemical exposures as risk factors for hepatocellular carcinoma in Vietnam.

[Binding of toxic substances and suppression of their toxicities by albumin--studies on psychosine and pentachlorophenol].

Distribution and elimination of the herbicide propanil in the channel catfish (*Ictalurus punctatus*).

Phototoxic contact dermatitis with toxic hepatitis due to the percutaneous absorption of paraquat.

Induction of hepatic drug metabolizing enzymes and interaction with carbon tetrachloride in rats after a single oral exposure to atrazine.

Effects of 2,4-dichlorophenoxyacetic acid butyl ester on chick liver.

Redox cycling and hepatotoxicity of diquat in aging male Fischer 344 rats.

[The combination effects of quercetin with the herbicides atrazine, cyanazine and gesamprim in mutagenicity tests].

Genotoxicity testing of the herbicide Roundup and its active ingredient glyphosate isopropylamine using the mouse bone marrow micronucleus test, Salmonella mutagenicity test, and Allium anaphase-telophase test.

Effects of paraquat on Mg(2+)-ATPase activity in rat liver.

Biochemical and toxicological studies on the mixtures of three commonly-used herbicides in mice.

Effects on thyroid hormone metabolism and depletion of lung vitamin A in rats by airborne particulate matter.

Haemotoxic effect of phenylurea herbicides in rats: role of haemoglobin-adduct formation in splenic toxicity.

[Experimental research on the toxicity of the product orthochlorobenzene sulfur chloride].

Acrolein increases airway sensitivity to substance P and decreases NEP activity in guinea pigs.

Toxicological and immune findings in workers exposed to pentachlorophenol (PCP).

An epidemiological study of the health of Sri Lankan tea plantation workers associated with long term exposure to paraquat.

Oxidative stress in fish cells: in vitro studies.

Diquat-induced oxidative damage in BCNU-pretreated hepatocytes of mature and old rats.

Effect of diphenyl ether herbicides and oxadiazon on porphyrin biosynthesis in mouse liver, rat primary hepatocyte culture and HepG2 cells.

Role of free radicals in toxic hepatic injury. II. Are free radicals the cause of toxin-induced liver injury?

Zonal distribution of protein-acetaldehyde adducts in the liver of rats fed alcohol for long periods.

The mechanisms by which mild respiratory chain inhibitors inhibit hepatic gluconeogenesis.

Effect of indomethacin, aspirin, nordihydroguaiaretic acid, and piperonyl butoxide on cyclophosphamide-induced bladder damage.

Increase in liver microsomal glutathione S-transferase activity by phenobarbital treatment of rats. Possible involvement of oxidative activation via cytochrome P450.

Ascorbic acid uptake by isolated rat hepatocytes. Stimulatory effect of diquat, a redox cycling compound.

In vivo effects of disulfiram and cyanamide on canine liver aldehyde dehydrogenase isoenzymes as detected by high-performance (pressure) liquid chromatography.

Toxicokinetics and metabolism of linuron in rabbit: in vivo and in vitro studies.

Metabolism of N-[4-chloro-2-fluoro-5-[(1-methyl-2-propynyl)oxy]phenyl]-3,4,5,6-tetrahydrophthalimide (S-23121) in the rat. II. Absorption, disposition, excretion and biotransformation.

A comparative study of effects of atrazine on xenobiotic metabolizing enzymes in fish and insect, and of the in vitro phase II atrazine metabolism in some fish, insects, mammals and one plant species.

Roles of different forms of cytochrome P450 in the activation of the promutagen 6-aminochrysene to genotoxic metabolites in human liver microsomes.

[N-demethylation and denitrosation activity of the rat liver, thymus lymphocytes and spleen after exposure to simazine and sodium nitrite].

Inhibition of rat hepatic mitochondrial aldehyde dehydrogenase isozymes by repeated cyanamide administration: pharmacokinetic-pharmacodynamic relationships.

Cyclophosphamide modulates rat hepatic cytochrome P450 2C11 and steroid 5 alpha-reductase activity and messenger RNA levels through the combined action of acrolein and phosphoramidate mustard.

Tissue distribution and excretion of ¹⁴C-labelled cinnamic aldehyde following single and multiple oral administration in male Fischer 344 rats.

Is hydrogen peroxide involved in the benzyl viologen-mediated in-vivo inactivation of rat liver glutamine synthetase?

Ethanol metabolism in isolated hepatocytes. Effects of methylene blue, cyanamide and penicillamine on the redox state of the bound coenzyme and on the substrate exchange at alcohol dehydrogenase.

Metabolic activation of tris(2,3-dibromopropyl)phosphate to reactive intermediates. I. Covalent binding and reactive metabolite formation in vitro.

[In vitro studies of the metabolism of paraquat and diquat using rat liver homogenates--isolation and identification of the metabolites of paraquat and diquat].

Molecular mechanisms of dibromoalkane cytotoxicity in isolated rat hepatocytes.

Lack of stereoselectivity in rat liver peroxisomal enzyme induction by optically active phenoxyacetic acids.

Evidence for peroxidase-mediated metabolism of cyclophosphamide.

Erythropoietin increases hemoglobin in cancer patients during radiation therapy.

Dose response for TCDD promotion of hepatocarcinogenesis in rats initiated with DEN: histologic, biochemical, and cell proliferation endpoints.

Expression of cathepsin B and aryl hydrocarbon hydroxylase activities, and of apolipoprotein B in human hepatoma cells maintained long-term in a serum-free medium.

Subchronic toxicity of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats.

Chicken ovalbumin upstream promoter transcription factor (COUP-TF) binds to a peroxisome proliferator-responsive element and antagonizes peroxisome proliferator-mediated signaling.

TCDD-mediated changes in hepatic epidermal growth factor receptor may be a critical event in the hepatocarcinogenic action of TCDD.

Cancer incidence in a population accidentally exposed to 2,3,7,8-tetrachlorodibenzo-para-dioxin.

Rat CYP1A1 negative regulatory element: biological activity and interaction with a protein from liver and hepatoma cells.

Resistance to aflatoxin B1 is associated with the expression of a novel aldo-keto reductase which has catalytic activity towards a cytotoxic aldehyde-containing metabolite of the toxin.

Inhibition of uncoupled respiration in tumor cells. A possible role of mitochondrial Ca²⁺ efflux.

Enhancement by non-mutagenic pesticides of GST-P positive hepatic foci development initiated with diethylnitrosamine in the rat.

Liver damage due to free radicals.

The human estrogen receptor structural gene contains a DNA sequence that binds activated mouse and human Ah receptors: a possible mechanism of estrogen receptor regulation by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effects of small doses of dioxins on the immune system of marmosets and rats.

NAD(P)H:quinone oxidoreductase1 (DT-diaphorase) expression in normal and tumor tissues.

Cloning and characterization of complementary DNA encoding the eukaryotic initiation factor 2-associated 67-kDa protein (p67).

Renal and hepatic toxicity of monochloroacetanilides in the Fischer 344 rat.

Dioxin hepatic carcinogenesis: biologically motivated modeling and risk assessment.

Mouse Hepa 1c1c7 hepatoma cells produce complement component C3; 2,3,7,8-tetrachlorodibenzo-p-dioxin fails to modulate this capacity.

Tumors produced in rats with a single dosage of 1,2-dimethylhydrazine.

Relationship between aryl hydrocarbon receptor binding, induction of aryl hydrocarbon hydroxylase and 7-ethoxyresorufin O-deethylase enzymes, and toxic activities of aromatic xenobiotics in animals. A new model.

Peroxisome proliferators: paradigms and prospects.

Hyperoxic lung injury in Fischer-344 and Sprague-Dawley rats in vivo.

[Effects of disinfectants on erythrocytes and isolated hepatocytes from rats and surface tension].

Toxicological evaluation of mixtures of ten widely used pesticides.

Comparative potencies of Aroclors 1232, 1242, 1248, 1254, and 1260 in male Wistar rats--assessment of the toxic equivalency factor (TEF) approach for polychlorinated biphenyls (PCBs).

The role of oxidative metabolism in hexachlorobenzene-induced porphyria and thyroid hormone homeostasis: a comparison with pentachlorobenzene in a 13-week feeding study.

Environmental toxicology of polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans.

Ligand-dependent recruitment of the Arnt coregulator determines DNA recognition by the dioxin receptor.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the epidermal growth factor receptor in hepatic plasma membranes of rainbow trout (*Oncorhynchus mykiss*).

The natural history of congenital diaphragmatic hernia and pulmonary hypoplasia in the embryo.

Red blood cell regeneration induced by subcutaneous recombinant erythropoietin: iron-deficient erythropoiesis in iron-replete subjects.

Effects of restricted feeding on the absorption, metabolism, and accumulation of pentachlorobenzene in rats.

Mouse interferon gamma pretreated hepatocytes conditioned media suppress cytochrome P-450 induction by TCDD in mouse hepatoma cells.

The effect of ischaemia on xanthine oxidase activity in rat intestine and liver.

Health risks of "dioxins": a review of environmental and toxicological considerations.

Modeling receptor-mediated processes with dioxin: implications for pharmacokinetics and risk assessment.

Metabolism of iron from (3,5,5-trimethylhexanoyl)ferrocene in rats. A dietary model for severe iron overload.

In vitro cytotoxic and cell transforming activities exerted by the pesticides cyanazine, dithianon, diflubenzuron, procymidone, and vinclozolin on BALB/c 3T3 cells.

Arsenite induced sensitization and self-tolerance of Reuber H35 hepatoma cells.

Effect of caloric restriction on the induction of hepatic cytochrome P-450 and Ah receptor binding in C57BL/6N and DBA/2J mice.

Toxicokinetic mixture interactions between chlorinated aromatic hydrocarbons in the liver of the C57BL/6J mouse: 2. Polychlorinated dibenzo-p-dioxins (PCDDs), dibenzofurans (PCDFs) and biphenyls (PCBs).

³¹P and ¹³C NMR spectroscopic study of wild type and multidrug resistant Ehrlich ascites tumor cells.

Complete amino acid sequence of biliverdin-IX beta reductase from human liver.

Acute 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure results in enhanced tyrosylphosphorylation and expression of murine hepatic cyclin dependent kinases.

Liver accumulation of 2,3,7,8-tetrachloro-[3H]dibenzofuran in mice: modulation by treatments with polychlorinated biphenyls.

Inhibition of hepatocyte gap junctional communication by 25-hydroxycholesterol may be mediated through free radicals.

Amino acid sequence of glutathione S-transferase a from guinea pig liver.

Reversible modification of rat liver glutathione S-transferase 3-3 with 1-chloro-2,4-dinitrobenzene: specific labelling of Tyr-115.

Glucuronidation of thyroid hormone in rat liver: effects of in vivo treatment with microsomal enzyme inducers and in vitro assay conditions.

Tissue distribution and toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats after intravenous injection.

Effect of dose, time, and pretreatment on the biliary excretion and tissue distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on protein kinase C and inositol phosphate metabolism in primary cultures of rat hepatocytes.

Cytochrome P4501A1 mediates the metabolism of 2,3,7,8-tetrachlorodibenzofuran in the rat and human.

Discrimination between periportal and pericentral necrosis of rat liver by determination of glutamine synthetase and other enzyme activities in serum.

Human xenobiotic metabolizing esterases in liver and blood.

Response of mouse liver coumarin 7-hydroxylase activity to hepatotoxins: dependence on strain and agent and comparison to other monooxygenases.

In vitro cytotoxicity of mono-, di-, and trichloroacetate and its modulation by hepatic peroxisome proliferation.

Affinities for the aryl hydrocarbon receptor, potencies as aryl hydrocarbon hydroxylase inducers and relative toxicities of polychlorinated biphenyls. A congener specific approach.

Antimutagenic and mutagenic potentials of Chinese radish.

Genetic toxicity of a mixture of fifteen pesticides commonly found in the Italian diet.

A ferro-heme protein senses oxygen levels, which modulate the glucagon-dependent activation of the phosphoenolpyruvate carboxykinase gene in rat hepatocyte cultures.

Structure-activity relationships for induction of peroxisomal enzyme activities in primary rat hepatocyte cultures.

Effects of polychlorinated dibenzofurans on compounds in hepatic DNA of female Sprague-Dawley rats: structure dependence and mechanistic considerations.

Methoxyresorufin and benzyloxyresorufin: substrates preferentially metabolized by cytochromes P4501A2 and 2B, respectively, in the rat and mouse.

Regulation of cytochrome P450 expression in a novel liver cell line from zebrafish (*Brachydanio rerio*).

Distribution patterns of polychlorinated biphenyl congeners in harbor seal (*Phoca vitulina*) tissues: statistical analysis.

Effects of oral administration of brassica secondary metabolites, allyl cyanide, allyl isothiocyanate and dimethyl disulphide, on the voluntary food intake and metabolism of sheep.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induced ethoxyresorufin-O-deethylase (EROD) and aldehyde dehydrogenase (ALDH3) activities in the brain and liver. A comparison between the most TCDD-susceptible and the most TCDD-resistant rat strain.

Localization of the potassium ion activation site in human liver fructose 1,6-bisphosphatase.

Stimulation of lipid peroxidation or 4-hydroxynonenal treatment increases procollagen alpha 1 (I) gene expression in human liver fat-storing cells.

Differing effects of the inhibition of poly(ADP-ribose) polymerase on the course of oxidative cell injury in hepatocytes and fibroblasts.

NTP technical report on the toxicity studies of Pesticide/Fertilizer Mixtures Administered in Drinking Water to F344/N Rats and B6C3F1 Mice.

Photodynamic effects of new silicon phthalocyanines: in vitro studies utilizing rat hepatic microsomes and human erythrocyte ghosts as model membrane sources.

Interactions of indolo[3,2-b]carbazoles and related polycyclic aromatic hydrocarbons with specific binding sites for 2,3,7,8-tetrachlorodibenzo-p-dioxin in rat liver.

Simultaneous induction of sod, glutathione reductase, GSH, and ascorbate in liver and kidney correlates with survival during aging.

Subunit structures of purified beef mitochondrial cytochrome bc1 complex from liver and heart.

Influence of some biological response modifiers on swelling of rat liver mitochondria in vitro.

Maintenance of xenobiotic metabolism and toxicity in rat hepatocyte cultures after cell preservation at 4 degrees.

Modulatory effect of hyperthermia on hepatic microsomal cytochrome P450 in mice.

Mutagenicity of chrysene, its methyl and benzo derivatives, and their interactions with cytochromes P-450 and the Ah-receptor; relevance to their carcinogenic potency.

Free radical induction in the brain and liver by products of toluene catabolism.

Effect of propaquizafop and its free-acid derivative on lauric acid hydroxylation and peroxisomal beta-oxidation in primary cultured rat, mouse, guinea pig and marmoset hepatocytes.

The mutagenicity and interactions of 2- and 4-(acetylamino)fluorene with cytochrome P450 and the aromatic hydrocarbon receptor may explain the difference in their carcinogenic potency.

A physiologically based pharmacokinetic model for 2,3,7,8-tetrabromodibenzo-p-dioxin (TBDD) in the rat: tissue distribution and CYP1A induction.

Development and characterization of a rainbow trout liver cell line expressing cytochrome P450-dependent monooxygenase activity.

Assessment of P-glycoprotein-dependent drug transport in isolated rat hepatocytes using rhodamine 123.

Comparative effects of endrin on hepatic lipid peroxidation and DNA damage, and nitric oxide production by peritoneal macrophages from C57BL/6J and DBA/2 mice.

Light microscopic catalase histochemistry in mussel digestive gland tissue.

Acrylamide as an inducer of metabolic activation system (S9) in rats.

Interactions of flavonoids, trace metals, and oxygen: nuclear DNA damage and lipid peroxidation induced by myricetin.

Human non-secretory ribonucleases. I. Purification, peptide mapping and lectin blotting analysis of the kidney, liver and spleen enzymes.

Modification of P450 activity and its effect on 1,2-dichlorobenzene toxicity in Fischer 344 rats.

Gene expression and cell proliferation in rat liver after 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

Detection and characterization of a novel hepatic 8 S binding protein for benzo[a]pyrene distinct from the Ah receptor.

Ethoxyresorufin-O-deethylase and porphyrin analysis in chicken embryo hepatocyte cultures with a fluorescence multiwell plate reader.

Effect of macromolecules on the structure of the mitochondrial inter-membrane space and the regulation of hexokinase.

A mechanistic model of effects of dioxin on gene expression in the rat liver.

Modulation of liver intracellular C3 in mice by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Purification and characterization of salicylhydroxamic acid reductase from rat liver.

Studies on the metabolism of a monoterpene ketone, R-(+)-pulegone--a hepatotoxin in rat: isolation and characterization of new metabolites.

Effects of 3-methylsulphonyl-4,5,3',4',-tetrachlorobiphenyl and 7,8-benzoflavone on aryl hydrocarbon hydroxylase activities of murine hepatic microsomes prepared from inbred strains with different Ah responsiveness.

Interaction of the cyclophosphamide metabolite, acrolein, with lactate dehydrogenase-m homolog.

NTP Toxicology and Carcinogenesis Studies of Pentachloroanisole (CAS No. 1825-21-4) in F344 Rats and B6C3F1 Mice (Feed Studies).

Characterization of L-thyroxine transport into hepatocytes isolated from juvenile rainbow trout (*Oncorhynchus mykiss*).

Characterization of vitamin A potentiation of carbon tetrachloride-induced liver injury.

Maturation changes in dermal absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in Fischer 344 rats.

Uncoupling of rat liver mitochondrial oxidative phosphorylation by the fasciolicide triclabendazole and its sulfoxide and sulfone metabolites.

Modulation of 1,2-dichlorobenzene hepatotoxicity in the Fischer-344 rat by a scavenger of superoxide anions and an inhibitor of Kupffer cells.

Mitochondria as a source of reactive oxygen species during reductive stress in rat hepatocytes.

Toxicology, structure-function relationship, and human and environmental health impacts of polychlorinated biphenyls: progress and problems.

Reduction of hepatic phosphoenolpyruvate carboxykinase (PEPCK) activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) is due to decreased mRNA levels.

Ferrous-iron induces lipid peroxidation with little damage to energy transduction in mitochondria.

Inhibitors of mitochondrial carnitine palmitoyltransferase I limit the action of proteases on the enzyme. Isolation and partial amino acid analysis of a truncated form of the rat liver isozyme.

Uptake of tyramine by rat hepatocytes.

Ah receptor binding properties of indole carbinols and induction of hepatic estradiol hydroxylation.

Activation of Cyp1a1 and Cyp1a2 genes in adult mouse hepatocytes in primary culture.

In vitro metabolism of cyanohydroxybutene: formation of a glutathione-S-transferase catalyzed product.

Uptake of glycyrrhizin by isolated rat hepatocytes.

Effect of P-450 inducers on biliary excretion of glutathione and its hydrolysis products. Correlation between hepatic gamma-glutamyltranspeptidase activity and the proportion of glutathione hydrolysis products in bile.

Effects of arsenite treatment on NAD(P)H:quinone acceptor oxidoreductase activity in liver, lung, kidney, and heart of the rat. Comparison to induction by the polyaromatic hydrocarbon, beta-naphthoflavone.

Nonresponsiveness of normal human fibroblasts to dioxin correlates with the presence of a constitutive xenobiotic response element-binding factor.

Differential effects of metabolic inhibitors on cellular and mitochondrial uptake of organic cations in rat liver.

Purification and characterization of glutathione S-transferase of murine ovary and testis.

Enhanced glutathione S-transferase 7-7 expression in rat hepatic cytosol following treatment with pyrrole.

A top-down control analysis in isolated rat liver mitochondria: can the 3-hydroxy-3-methylglutaryl-CoA pathway be rate-controlling for ketogenesis?

Inhibition of mitochondrial oxidative phosphorylation and its electron transport pathway by a polycation in vitro.

Hepatic metabolism of toluene after gastrointestinal uptake in humans.

Differential effects of extracellular calcium on lipid peroxidation dependent (ethacrynic acid and allyl alcohol) and lipid peroxidation independent (disulfiram)-induced cytotoxicity in normal and vitamin E-deficient rat hepatocytes.

In vivo effect of 7,8-benzoflavone on aryl hydrocarbon hydroxylase activity of mouse liver microsomes.

Nature and role of xenobiotic metabolizing esterases in rat liver, lung, skin and blood.

Investigations into the effects of various hepatotoxic compounds on urinary and liver taurine levels in rats.

The metabolism of 2,3,7,8-tetrabromodibenzodioxin in the rat.

Transient induction of cytochrome P450 1A1 mRNA by culture medium component in primary cultures of adult rat hepatocytes.

Effects of acute sodium arsenite administration on the pulmonary chemical metabolizing enzymes, cytochrome P-450 monooxygenase, NAD(P)H:quinone acceptor oxidoreductase and glutathione S-transferase in guinea pig: comparison with effects in liver and kidney.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the epidermal growth factor receptor in hepatic plasma membranes of rainbow trout.

Deglycosylation and fragmentation of purified rat liver angiotensin II receptor: application to the mapping of hormone-binding domains.

ESR studies on the production of reactive oxygen intermediates by rat liver microsomes in the presence of NADPH or NADH.

Culture medium composition affects the relative toxicities of chlorobenzenes in rat liver slices and the isolated perfused liver.

Comparative pharmacokinetics of ifosfamide, 4-hydroxyifosfamide, chloroacetaldehyde, and 2- and 3-dechloroethylifosfamide in patients on fractionated intravenous ifosfamide therapy.

Growth stimulation of primary rat hepatocytes by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Predicting rodent carcinogenicity of halogenated hydrocarbons by in vivo biochemical parameters.

In vitro induction of reactive oxygen species by 2,3,7,8-tetrachlorodibenzo-p-dioxin, endrin, and lindane in rat peritoneal macrophages, and hepatic mitochondria and microsomes.

Toxicology and hazard potential of trifluralin.

Nephrotoxicity of the 1:1 acrolein-glutathione adduct in the rat.

Marked interanimal differences in susceptibility of Sprague-Dawley rats to diquat-induced oxidative stress in the liver: correlation with hepatic uptake of diquat.

[The influence of paraquat on cell cycle--analysis of cell kinetics using DNA/BrdU staining].

Simazine toxicosis in sheep.

Tissue-binding and toxicity of compounds structurally related to the herbicide dichlobenil in the mouse olfactory mucosa.

Chronic liver injury in phenoxy herbicide-exposed Vietnam veterans.

Inhibition of lipid peroxidation and cholesterol levels in mice by curcumin.

Effect of food flavor cinnamaldehyde on liver microsomal cytochrome P-450 in rats.

Antioxidant-dependent inhibition of diquat-induced toxicity in vivo.

[Hepatopathy from cyanamide. Presentation of a new case].

[A cardiac lesion secondary to paraquat].

Dioxin intoxication from chronic exposure of horses to pentachlorophenol-contaminated wood shavings.

NTP technical report on the toxicity studies of Glyphosate (CAS No. 1071-83-6) Administered In Dosed Feed To F344/N Rats And B6C3F1 Mice.

Effects of diphenyl ether herbicides on porphyrin accumulation by cultured hepatocytes.

Action of acrolein on rat liver membrane proteins and enzymes.

Age-associated enhancement of diquat-induced lipid peroxidation and cytotoxicity in isolated rat hepatocytes.

Mitochondrial breakage induced by the herbicide paraquat in cultured human lung cells.

The acrolein cytotoxicity and cytoprotective action of alpha-tocopherol in primary cultured rat hepatocytes.

Peroxisome proliferators protect against paracetamol hepatotoxicity in mice.

Preferential increase of heterochromatin in venular endothelium of lung in mice after administration of dimethylarsinic acid, a major metabolite of inorganic arsenics.

[Effects of pesticide fluometuron (cotoran) on template synthesis of RNA].

Role of lipid peroxidation and DNA damage in paraquat toxicity and the interaction of paraquat with ionizing radiation.

Subacute toxicity of paraquat in beagle dogs: clinicopathology and pathologic examinations.

2,4,5-trichlorophenoxyacetic acid influence on 2,6-dinitrotoluene-induced urine genotoxicity in Fischer 344 rats: effect on gastrointestinal microflora and enzyme activity.

Effects of ethyl 4-chloro-2-methylphenoxyacetate on bile composition in golden hamsters.

Morphological changes on nerves and histopathological effects on liver and kidney of rats by pentachlorophenol (PCP).

Effect of preinduction of metallothionein on paraquat toxicity in mice.

Mutagenicity of beta-alkyl substituted acrolein congeners in the Salmonella typhimurium strain TA100 and genotoxicity testing in the SOS chromotest.

DNA damage induced by alachlor after in vitro activation by rat hepatocytes.

Fatal paraquat poisoning: a light microscopic study in eight autopsy cases.

Paraquat damage of rat liver mitochondria by superoxide production depends on extramitochondrial NADH.

[Rainbow trout and zebrafish, two models for continuous toxicity tests: relative sensitivity, species and organ specificity in cytopathologic reaction of liver and intestines to atrazine].

[The action of defoliant on the energetics of rat liver mitochondria in vitro].

Regression mechanism of cyanamide-induced inclusion bodies in the rat: a useful experimental pattern to study the beta-glycogen metabolism of hepatocytes.

Pathophysiological consequences of enhanced intracellular superoxide formation in isolated perfused rat liver.

No evidence of intracellular oxidative stress during ischemia-reperfusion damage in rat liver in vivo.

Renal cadmium deposition and injury as a result of accumulation of cadmium-metallothionein (CdMT) by the proximal convoluted tubules--A light microscopic autoradiography study with ¹⁰⁹CdMT.

Chemical contamination and the annual summer die-off of striped bass (*Morone saxatilis*) in the Sacramento-San Joaquin Delta.

Enhancement of cytotoxic T lymphocyte growth from spleens of P815-tumor-bearing host mice with mafosfamide.

[Synthesis and antitumor activity of substituted benzaldehyde/cinnamaldehyde selenosemicarbazones].

Induction of hepatic metallothionein by paraquat.

The effects of alpha, beta-unsaturated aldehydes on hepatic thiols and thiol-containing enzymes.

Activation of 6-aminochrysene to genotoxic products by different forms of rat liver cytochrome P450 in an O-acetyltransferase-overexpressing Salmonella typhimurium strain (NM2009).

Utility of liquid chromatography/fast atom bombardment mass spectrometry and liquid chromatography/thermospray mass spectrometry for structure identification of metabolites of a fluorinated herbicide.

Inhibition of acetaminophen hepatotoxicity by acetaldehyde in the rat.

Evaluation of amitrole mutagenicity in Salmonella typhimurium using prostaglandin synthase activation.

Identification of the mixed disulfide of glutathione and cysteinylglycine in bile: dependence on gamma-glutamyl transferase and responsiveness to oxidative stress.

Hepatic triiodothyronine sulfation and its regulation by growth hormone and triiodothyronine in rats.

Metabolism of alachlor by rat and monkey liver and nasal turbinate tissue.

The S-thiolation of hepatocellular protein thiols during diquat metabolism.

Inhibition of sulfotransferase in primary cultures of human hepatocytes affecting metabolism and binding of 2-acetylaminofluorene.

Ethanol-induced motor activity in normal and acatalasemic mice.

Cyclophosphamide and its metabolite acrolein. Some studies on their porphyrinogenic action in 17 day old chick embryo.

Biotransformation of butachlor through mercapturic acid pathway in rat tissue homogenates.

The influence of buffers during fixation on the appearance of smooth endoplasmic reticulum and glycogen in hepatocytes of normal and glycogen-depleted rats.

Glutathione and antioxidants protect microsomes against lipid peroxidation and enzyme inactivation.

The biomethylation of sodium arsenate by rat liver cytosol determined by mass spectrometry.

Oral and dermal application of 2,4-dichlorophenoxyacetic acid sodium and dimethylamine salts to male rats: investigations on absorption and excretion as well as induction of hepatic mixed-function oxidase activities.

[RNA synthesis and transport in the rat liver under the effects of pesticide cotoran (fluometuron)].

Coenzyme A esters of 2-aryloxyphenoxypropionate herbicides and 2-arylpropionate antiinflammatory drugs are potent and stereoselective inhibitors of rat liver acetyl-CoA carboxylase.

Modification of liver and serum enzymes by paraquat treatment in rabbits.

Decreased stress inducibility of the HSP68 protein in a rat hepatoma variant clone.

Effects of different rates of drying cassava root on its toxicity to broiler chicks.

Localization of protein-acetaldehyde adducts on cell surface of hepatocytes by flow cytometry.

Protein tyrosine phosphorylation as an indicator of 2,3,7,8-tetrachloro-p-dioxin exposure in vivo and in vitro.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin or 2,2',4,4',5,5'-hexachlorobiphenyl on vitamin K-dependent blood coagulation in female germfree WAG/Rij-rats.

Regulation of 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible expression of aldehyde dehydrogenase in hepatoma cells.

Integrated approach for evaluating species and interindividual differences in responsiveness to dioxins and structural analogs.

Mechanism of action of aryl hydrocarbon receptor antagonists: inhibition of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced CYP1A1 gene expression.

[The retention of alkyldinitrophenol compounds in cadaveric material].

Hepatotoxic interactions of ethanol with allyl alcohol or carbon tetrachloride in rats.

Negative regulation of the murine cytosolic aldehyde dehydrogenase-3 (Aldh-3c) gene by functional CYP1A1 and CYP1A2 proteins.

Induction of class 3 aldehyde dehydrogenase in the mouse hepatoma cell line Hepa-1 by various chemicals.

Bioavailability to rats and toxicity of bound residues in bean seeds fumigated with ¹⁴C-methyl bromide.

Comparative assessment of the cytotoxic effects of different xenobiotics in three hepatoma cell lines.

Characterization of the promotion of altered hepatic foci by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the female rat.

Chemopreventive effects of green tea components on hepatic carcinogenesis.

Dose-response relationships for chronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in a rat tumor promotion model: quantification and immunolocalization of CYP1A1 and CYP1A2 in the liver.

Research note: effect of 2,4-dinitrophenol on growth and body composition of broilers.

Reduced activity of the electron transport chain in liver mitochondria isolated from rats with secondary biliary cirrhosis.

Hepatotoxicity and carcinogenicity in female Sprague-Dawley rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): a pathology working group reevaluation.

Mechanism of dioxin action: Ah receptor-mediated increase in promoter accessibility in vivo.

Posttranslational regulation of spermidine/spermine N1-acetyltransferase with stress.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on blood and spleen natural killer (NK) cell activity in the mouse.

In utero and lactational exposure of male rats to 2,3,7,8-tetrachlorodibenzo-p-dioxin. 2. Effects on sexual behavior and the regulation of luteinizing hormone secretion in adulthood.

Mechanism of action of a repressor of dioxin-dependent induction of Cyp1a1 gene transcription.

Affinity chromatographic purification of immunoglobulin M antibodies utilizing immobilized mannan binding protein.

Hepatic and gastrointestinal effects in an occupational cohort exposed to 2,3,7,8-tetrachlorodibenzo-para-dioxin.

Heat-shock responsive elements in the induction of the multidrug resistance gene (MDR1).

The effect of ethanol metabolism on ferritin uptake by freshly isolated rat hepatocytes: is acetaldehyde responsible for this alteration?

Antiestrogenic action of 2,3,7,8-tetrachlorodibenzo-p-dioxin: tissue-specific regulation of estrogen receptor in CD1 mice.

Neutrophil accumulation in ischemic reperfused rat liver: evidence for a role for superoxide free radicals.

Characterization of the aryl hydrocarbon receptor in the human C-4II cervical squamous carcinoma cell line.

[Phenazon metabolism in children with liver diseases].

Chromosomal aberrations and sister-chromatid exchanges induced by N-nitroso-2-acetylaminofluorene and their modifications by arsenite and selenite in Chinese hamster ovary cells.

Soluble aggregates of the human PiZ alpha 1-antitrypsin variant are degraded within the endoplasmic reticulum by a mechanism sensitive to inhibitors of protein synthesis.

Chemical cross-linking of the cytosolic and nuclear forms of the Ah receptor in hepatoma cell line 1c1c7.

Transcriptional derepression of the murine Cyp1a-1 gene by mevinolin.

Sex differences in monochloroacetate pretreatment effects on chloroform toxicity in rats.

Toxicity of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats after single oral administration.

Reconciling old and new findings on dioxin.

Toxicity of monochloroacetic acid administered by gavage to F344 rats and B6C3F1 mice for up to 13 weeks.

Placental transport of dioxins from mother to fetus. II. PCBs, dioxins and furans and vitamin K metabolism.

[The effect of 2,4-dichlorophenol on enzyme activities and other parameters in parenchymatous organs of rats].

Peroxisome proliferators: a model for receptor mediated carcinogenesis.

Amyloid enhancing factor activity is associated with ubiquitin.

Enhanced suppression of humoral immunity in DBA/2 mice following subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Mechanism of benzo[a]pyrene-induced Cyp1a-1 gene expression in mouse Hepa 1c1c7 cells: role of the nuclear 6 s and 4 s proteins.

Immunochemical identity of the 2,3,7,8-tetrachlorodibenzo-p-dioxin- and beta-naphthoflavone-induced cytochrome P-450 arachidonic acid epoxygenases in chick embryo liver: distinction from the omega-hydroxylase and the phenobarbital-induced epoxygenase.

Hepatic Na(+)-dicarboxylate cotransport: identification, characterization, and acinar localization.

The involvement of primary and secondary metabolism in the covalent binding of 1,2- and 1,4-dichlorobenzenes.

Purification of cytochromes P-450 derived from liver microsomes of untreated and 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated marmoset monkeys.

[Tris-2-(oxyethyl)ammonium ortho-cresol acetate--a stimulant of the activity of regenerating hepatocytes].

Effect of serum-free medium on cytochrome P450-dependent metabolism and toxicity in rat cultured hepatocytes.

Evaluation of iron binding and peroxide-mediated toxicity in rat hepatocytes.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes reduction of glucose transporting activities in the plasma membranes of adipose tissue and pancreas from the guinea pig.

The influence of chloro-substituent sites of hexachlorobiphenyl on the respiration of rat liver mitochondria.

Absence of interactions on hepatic retention and 7-ethoxyresorufin-O-deethylation activity after co-administration of 1,2,3,7,8-pentachlorodibenzo-p-dioxin and 2,4,5,2',4',5'-hexachlorobiphenyl.

Mechanism for the hepatotoxicity of the antiandrogen, nilutamide. Evidence suggesting that redox cycling of this nitroaromatic drug leads to oxidative stress in isolated hepatocytes.

Beta-naphthoflavone induction of a cytochrome P-450 arachidonic acid epoxygenase in chick embryo liver distinct from the aryl hydrocarbon hydroxylase and from phenobarbital-induced arachidonate epoxygenase.

Bovine brain 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase. Evidence for a neural-specific isozyme.

The potentiation of 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity by tamoxifen in female CD1 mice.

Plasma alpha 1-acid glycoprotein concentration in rats with chemical liver injury.

Mechanism of citrinin-induced dysfunction of mitochondria. II. Effect on respiration, enzyme activities, and membrane potential of liver mitochondria.

Benzo[e]pyrene elicits changes in the biochemical activities and chromatographic behavior of murine hepatic cytochromes P-450 that are distinct from those induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

On the mechanism of the mitochondrial decarboxylation of phosphatidylserine.

Effects of antibacterial agents on in vitro ovine ruminal biotransformation of the hepatotoxic pyrrolizidine alkaloid jacobine.

Effects of microsomal enzyme inducers upon UDP-glucuronic acid concentration and UDP-glucuronosyltransferase activity in the rat intestine and liver.

Phosphorylation and inactivation of HMG-CoA reductase at the AMP-activated protein kinase site in response to fructose treatment of isolated rat hepatocytes.

The interactions of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 6-methyl-1,3,8-trichlorodibenzofuran in chick embryo hepatocytes.

NTP technical report on the toxicity studies of para-Chloro-alpha,alpha,alpha Trifluorotoluene (CAS NO: 98-56-6) Administered in Corn Oil and alpha-Cyclodextrin to F344/N Rats and B6C3F1 Mice in 14-Day Comparative Gavage Studies.

Involvement of nonparenchymal cells in oxygen-dependent hepatic injury by allyl alcohol.

TCDD causes stimulation of c-ras expression in the hepatic plasma membranes in vivo and in vitro.

[Effects of ifenprodil on the adenosine triphosphatase of guinea pig liver mitochondria].

The interaction of L-triiodothyronine and 2,3,7,8-tetrachlorodibenzo-p-dioxin on Ah-receptor-mediated hepatic Phase I and Phase II enzymes and iodothyronine 5'-deiodinase in thyroidectomized rats.

Immobilization of solubilized UDP-glucuronosyltransferase from rat liver microsomes to Sepharose 4B.

³¹P-NMR spectroscopy of perfused rat hepatocytes immobilized in agarose threads: application to chemical-induced hepatotoxicity.

Artificial liver.

Sex-, age- and pregnancy-induced changes in the metabolism of toluene and trichloroethylene in rat liver in relation to the regulation of cytochrome P450IIE1 and P450IIC11 content.

Participation of rat liver cytochrome P450 2E1 in the activation of N-nitrosodimethylamine and N-nitrosodiethylamine to products genotoxic in an acetyltransferase-overexpressing Salmonella typhimurium strain (NM2009).

Cloning and heterologous expression of cDNA encoding class alpha rat glutathione transferase 8-8, an enzyme with high catalytic activity towards genotoxic alpha,beta-unsaturated carbonyl compounds.

Comparison of the effect of a mitochondrial uncoupler, 2,4-dinitrophenol and adrenaline on oxygen radical production in the isolated perfused rat liver.

Lipid peroxidation and irreversible damage in the rat hepatocyte model. Protection by the silybin-phospholipid complex IdB 1016.

Mouse liver cytidine-5'-monophosphate-N-acetylneuraminic acid hydroxylase. Catalytic function and regulation.

Dioxin induces expression of c-fos and c-jun proto-oncogenes and a large increase in transcription factor AP-1.

Characterization of the rabbit CYP1A1 and CYP1A2 genes: developmental and dioxin-inducible expression of rabbit liver P4501A1 and P4501A2.

Utilization of glutathione during 1,2-dihaloethane metabolism in rat hepatocytes.

Kinetics of the association of several tritiated polychlorinated dibenzo-p-dioxin and dibenzofuran congeners with hepatic cytosolic Ah receptor from the Wistar rat.

[The effect of isomeric alkyl (C19--C25) methoxybenzoquinones on mitochondrial respiration].

Ca(2+)-sensitive reduction of 5,5'-dithiobis-(2-nitrobenzoic acid) by rat liver mitochondria.

Interleukin-1 beta suppresses the induction of P4501A1 and P4501A2 mRNAs in isolated hepatocytes.

Photodynamic effects of chloroaluminum phthalocyanine tetrasulfonate are mediated by singlet oxygen: in vivo and in vitro studies utilizing hepatic microsomes as a model membrane source.

In vitro stimulation of microsomal diethyl nitrosamine deethylase activity by vitamin K3 (menadione).

Physiological properties of liver, gonads and muscle during maturation of female Atlantic salmon, *Salmo salar*. Comparison between a control and xenobiotics containing fish feed.

Effect of phenobarbital and 3-methylcholanthrene treatment on NADPH- and NADH-dependent production of reactive oxygen intermediates by rat liver nuclei.

Specific binding of polychlorinated biphenyls to rat liver cytosol protein.

Flavin-containing monooxygenase-dependent stereoselective S-oxygenation and cytotoxicity of cysteine S-conjugates and mercapturates.

Purification, antibody production, and partial amino acid sequence of the 58-kDa acetaminophen-binding liver proteins.

Taurine transport in skate hepatocytes. II. Volume activation, energy, and sulfhydryl dependence.

Taurine transport in skate hepatocytes. I. Uptake and efflux.

2,3,7,8-Tetrachlorodibenzo-p-dioxin and ethinylestradiol as co-mitogens in cultured rat hepatocytes.

Inhibition of ferrous-induced lipid peroxidation by pyrimido-pyrimidine derivatives in human liver membranes.

The profile of rat liver enzyme induction produced by prochloraz and its major metabolites.

Metabolic fate of menthofuran in rats. Novel oxidative pathways.

Carrier-mediated uptake of pravastatin by rat hepatocytes in primary culture.

Enhancement of glucose transport in response to inhibition of oxidative metabolism: pre- and posttranslational mechanisms.

Enhanced expression, purification, and characterization of a novel class alpha glutathione S-transferase isozyme appearing in rabbit hepatic cytosol following treatment with 4-picoline.

Characterization of the human myeloid cell nuclear differentiation antigen: relationship to interferon-inducible proteins.

Characterization of 6-phosphofructo-2-kinase from foetal-rat liver.

Effects of cyclophosphamide and acrolein in organoid cultures of mouse limb bud cells grown in the presence of adult rat hepatocytes.

NTP Toxicology and Carcinogenesis Studies of Monochloroacetic Acid (CAS No. 79-11-8) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Primary cultures of rat hepatocytes on microcarriers as a metabolising system in toxicity testing in cell cultures.

Uptake of organic anions by isolated rat hepatocytes. A classification in terms of ATP-dependency.

NADH-dependent reductive stress and ferritin-bound iron in allyl alcohol-induced lipid peroxidation in vivo: the protective effect of vitamin E.

Expression of P4501A1 in a primary culture of rainbow trout hepatocytes exposed to beta-naphthoflavone or 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Association of blebbing with assembly of cytoskeletal proteins in ATP-depleted EL-4 ascites tumour cells.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on benzo(a)pyrene hydroxylase activity in embryos of the Japanese medaka (*Oryzias latipes*).

Decreased hepatic phosphoenolpyruvate carboxykinase gene expression after 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment: implications for the acute toxicity of chlorinated dibenzo-p-dioxins in the rat.

[Oxidative phosphorylation of liver mitochondria in *Oncomelania* snail].

[The effect of osmotic pressure on oligomycin-sensitive ATPase activity and the liberation of Mg²⁺ from liver mitochondria of rats of various ages].

Comparative toxicity of four chlorinated dibenzo-p-dioxins (CDDs) and their mixture. Part II: Structure-activity relationships with inhibition of hepatic phosphoenolpyruvate carboxykinase, pyruvate carboxylase, and gamma-glutamyl transpeptidase activities.

Heterogeneity of rat hepatic Ah receptor: identification of two receptor forms which differ in their biochemical properties.

Comparative toxicity of four chlorinated dibenzo-p-dioxins (CDDs) and their mixture. Part III: Structure-activity relationship with increased plasma tryptophan levels, but no relationship to hepatic ethoxyresorufin o-deethylase activity.

Certain tryptophan photoproducts are inhibitors of cytochrome P450-dependent mutagenicity.

Analysis of DNA strand breaks induced in rodent liver in vivo, hepatocytes in primary culture, and a human cell line by chlorinated acetic acids and chlorinated acetaldehydes.

Lethality, hexobarbital narcosis and behavior in rats exposed to atrazine, bentazon or molinate.

The effect of structurally divergent herbicides on mouse liver xenobiotic-metabolizing enzymes (P-450-dependent mono-oxygenases, epoxide hydrolases and glutathione S-transferases) and carnitine acetyltransferase.

The evaluation of Escherichia coli as a model for oxidant stress in mammalian hepatocytes: role of glutathione.

Developmental toxicity of diphenyl ether herbicides in nestling American kestrels.

Effects of MCPA and other phenoxyacid compounds on hepatic xenobiotic metabolism in rats.

[Biochemical and histological changes after acute oral poisoning with the acetanilide herbicide acetochlor].

Toxicology and carcinogenesis studies of two grades of pentachlorophenol in B6C3F1 mice.

Developmental toxicity of bromoxynil in mice and rats.

Superoxide is involved in the pathogenesis of paraquat-induced injury in cultured rat liver slices.

Effects of ethyl 4-chloro-2-methylphenoxyacetate on hepatic peroxisomal enzymes in rats.

Liver high performance liquid chromatographic porphyrin profiles in experimental porphyria induced by peroxidizing herbicides.

Protection of rats against the effects of alpha-naphthylthiourea (ANTU) by elevation of non-protein sulphhydryl levels.

Reduction of paraquat and related bipyridylium compounds to free radical metabolites by rat hepatocytes.

Oncogenicity study of trifluralin in B6C3F1 mice.

Age- and sex-related effects on hepatic drug metabolism in rats chronically exposed to dietary atrazine.

Metabolic aspects of the toxicology of mixtures of parathion, toxaphene and/or 2,4-D in mice.

Relationships between ascorbic acid and alpha-tocopherol during diquat-induced redox cycling in isolated rat hepatocytes.

Comparison of one-electron reduction activity against the bipyridylum herbicides, paraquat and diquat, in microsomal and mitochondrial fractions of liver, lung and kidney (in vitro).

[Cholestatic hepatitis caused by cyanamide].

Effects of 2,4-dichlorophenoxyacetic acid and picloram on biotransformation, peroxisomal and serum enzyme activities in channel catfish (*Ictalurus punctatus*).

Loss of membrane protein thiols and lipid peroxidation in allyl alcohol hepatotoxicity.

Inhibition of diquat-induced lipid peroxidation and toxicity in precision-cut rat liver slices by novel antioxidants.

[A case of suicide suspected of poisoning from taking some agricultural chemicals].

[Acute poisoning caused by the herbicide dichlorprop (preparation SYS 67 PROP)].

A fatal case of parenteral paraquat poisoning.

[Cyanamide hepatopathy. Presentation of two new cases].

Effects of vitamin E on toxicity by minute amounts of paraquat fed continuously to rats.

Effect of atrazine on some aspects of lipid metabolism in fresh water fish.

Effects of phenoxyacetic acid herbicides on chicken embryo liver drug metabolizing enzymes.

Pentachlorophenol.

Effects of 2,4,5-trichlorophenoxyacetic acid, pentachlorophenol, methylprednisolone, and Freund's adjuvant on 2-hydroxyethylnitrosourea carcinogenesis in MRC-Wistar rats.

Protective effects of dextran sulfate and polyvinyl sulfate against acute toxicity of paraquat in mice.

Effects of acute 2,4-dichlorophenoxyacetic acid intoxication on some rat serum components and enzyme activities.

Acute poisoning with a glyphosate-surfactant herbicide ('Roundup'): a review of 93 cases.

Diquat-induced oxidative damage in hepatic microsomes: effects of antioxidants.

[Morphological evidence of the possible role of cytochrome P-450 in the development of an autoimmune process in the liver].

An overview of peroxisome proliferator-induced hepatocarcinogenesis.

[The characteristics of glutathione reductase distribution and activity in the liver of adult rats subjected to paraquat action in the embryonic period].

Formation of a protein-acetaldehyde adduct in liver during chronic alcohol exposure.

Enhanced lipid peroxidation is not necessary for induction of metallothionein-I by oxidative stress.

Cytochemical studies of hydrogen peroxide generation in postischemic hepatocytes.

Hepatic peroxisome proliferators induce morphologic transformation of Syrian hamster embryo cells, but not peroxisomal beta oxidation.

Inverse correlation between resistance towards copper and towards the redox-cycling compound paraquat: a study in copper-tolerant hepatocytes in tissue culture.

Liver ferrochelatase from normal and hexachlorobenzene porphyric rats. Mechanism of drug action.

Dose-dependent increases in metallothionein synthesis in the lung and liver of paraquat-treated rats.

Formation of the 37KD liver protein-acetaldehyde adduct in vivo and in vitro.

Investigations on the sensitivity of several biochemical and histological methods after liver intoxication induced by pentachlorophenol and carbon tetrachloride.

Residues of pentachlorophenol and other chlorinated contaminants in human tissues: analysis by electron capture gas chromatography and electron capture negative ion mass spectrometry.

In vitro transformation of dithiopyr by rat liver enzymes: conversion of methylthioesters to acids by oxygenases.

The correlation of the oxidation potentials of structurally related dibenzo[1,4]dithalogenines to their antioxidance capacity in biological systems undergoing free radical-induced lipid peroxidation.

Increase in metallothionein produced by chemicals that induce oxidative stress.

Dose- and time-dependent effect of an acute 3-amino-1,2,4-triazole injection on rat brain catalase activity.

Inactivation mechanism of low-KM rat liver mitochondrial aldehyde dehydrogenase by cyanamide in vitro.

Different effects of paraquat on microsomal lipid peroxidation in mouse brain, lung and liver.

[Results of the toxicokinetics of bromoxynil in rats].

Age- and sex-related differences in activation of the carcinogen 7-hydroxymethyl-12-methylbenz[a]anthracene to an electrophilic sulfuric acid ester metabolite in rats. Possible involvement of hydroxysteroid sulfotransferase activity.

Studies on the periportal hepatotoxicity of allyl alcohol.

Modulations in nitrogen metabolism in the hepatic and neuronal tissues of fish, *Tilapia mossambica* exposed to atrazine.

Relationship between oxidative stress and hepatic phosphoglucomutase activity in rats.

[The translocation and specific binding of the pesticide fluometuron (cotoran) with the proteins of rat liver nuclei].

Pharmacokinetics and metabolism of triclopyr in the crayfish (*Procambarus clarki*).

Regulation of intracellular acetyl-CoA carboxylase by ATP depletors mimics the action of the 5'-AMP-activated protein kinase.

Relative liver tumour promoting activity and toxicity of some polychlorinated dibenzo-p-dioxin- and dibenzofuran-congeners in female Sprague-Dawley rats.

Specific reduction of I-compound levels in DNA from spontaneous hepatomas of 22-24 month old male C3H mice.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes unbalanced growth in 5L rat hepatoma cells.

Decreased activities of ubiquinol:ferricytochrome c oxidoreductase (complex III) and ferrocyclochrome c:oxygen oxidoreductase (complex IV) in liver mitochondria from rats with hydroxycobalamin[c-lactam]-induced methylmalonic aciduria.

Human NAD(P)H:quinone oxidoreductase (NQO1) gene structure and induction by dioxin.

Pathology reevaluation of the Kociba et al. (1978) bioassay of 2,3,7,8-TCDD: implications for risk assessment.

Human AH locus polymorphism and cancer: inducibility of CYP1A1 and other genes by combustion products and dioxin.

Aromatic hydrocarbon responsiveness-receptor agonists generated from indole-3-carbinol in vitro and in vivo: comparisons with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

DNA binding properties of the Ah receptor in wild-type and variant mouse hepatoma cells.

Superinduction of 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible expression of aldehyde dehydrogenase by the inhibition of protein synthesis.

Neurotoxicity of polychlorinated biphenyls: structure-activity relationship of individual congeners.

Mechanism for enterohepatic injury caused by circulatory disturbance of hepatic vessels in the rat.

Induction of hepatic metallothionein by nonmetallic compounds associated with acute-phase response in inflammation.

Detection and characterization of the Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in the human colon adenocarcinoma cell line LS180.

The differential effects of hepatotoxicants on the sulfation pathway in rats.

Inhibition of the specific DNA binding activity of the dioxin receptor by phosphatase treatment.

Lipid peroxidation in rat AH-130 hepatoma cells enriched in vitro with arachidonic acid.

Chloracne caused by ingestion of olive oil contaminated with PCDDs and PCDFs.

Risk assessment of 2,3,7,8-TCDD using a biologically based cancer model: a reevaluation of the Kociba et al. bioassay using 1978 and 1990 histopathology criteria.

Ninety day toxicity study of chloroacetic acids in rats.

Downregulation of the Ah receptor in mouse hepatoma cells treated in culture with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Ah receptor mediating induction of cytochrome P450IA1 in a novel continuous human liver cell line (Mz-Hep-1). Detection by binding with [3H]2,3,7,8-tetrachlorodibenzo-p-dioxin and relationship to the activity of aryl hydrocarbon hydroxylase.

Mechanism of action of 2,3,7,8-tetrachlorodibenzo-p-dioxin on intermediary metabolism in the rat.

Breast milk, dioxins and the possible effects on the health of newborn infants.

Long-term effects of chemical disasters. Lessons and results from Seveso.

H4IIE rat hepatoma cell bioassay-derived 2,3,7,8-tetrachlorodibenzo-p-dioxin equivalents in colonial fish-eating waterbird eggs from the Great Lakes.

Evidence for the mechanism of action of the 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated decrease of nuclear estrogen receptor levels in wild-type and mutant mouse Hepa 1c1c7 cells.

Characterization of an inducible aryl hydrocarbon receptor-like protein in rat liver.

Disposition and excretion of intravenous 2,3,7,8-tetrabromodibenzo-p-dioxin (TBDD) in rats.

Effect of modulators of glutathione synthesis on the hepatotoxicity of 2-methylfuran.

[Intestinal obstruction caused by non-absorbable tablets and Budd-Chiari syndrome in a patient with Crohn's disease].

Ninety-day toxicity study of sodium monochloroacetate in Sprague-Dawley rats.

Comparison of 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated hepatotoxicity in C57BL/6J and DBA/2J mice.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the vitamin A status of Hartley guinea pigs, Sprague-Dawley rats, C57Bl/6 mice, DBA/2 mice, and Golden Syrian hamsters.

An initiation-promotion assay in rat liver as a potential complement to the 2-year carcinogenesis bioassay.

Isolation and characterization of cDNA clones for rat liver 10-formyltetrahydrofolate dehydrogenase.

The sensitized liver represents a rich source of endogenous leukotrienes.

N-terminal amino-acid sequence of pig kidney dipeptidyl peptidase IV solubilized by autolysis.

Ovarian hormones enhance 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated increases in cell proliferation and preneoplastic foci in a two-stage model for rat hepatocarcinogenesis.

Characterization of the cell-cycle-regulated protein calyculin from Ehrlich ascites tumor cells. Identification of two binding proteins obtained by Ca²⁺(+)-dependent affinity chromatography.

Modulation of 2,3,7,8-tetrachlorodibenzo-p-dioxin and phenobarbital-induced promotion of hepatocarcinogenesis in rats by the type of diet and vitamin A deficiency.

A possible biochemical mode of action for benzimidazole anthelmintics.

Presence of the 4 S polycyclic hydrocarbon-binding protein in H4-II-E cells.

Toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in vitro: H4IIEC3-derived 5L hepatoma cells as a model system.

Cytosolic free Ca²⁺ in daunorubicin and vincristine resistant Ehrlich ascites tumor cells. Drug accumulation is independent of intracellular Ca²⁺ changes.

Respective roles of free radicals and energy supply in hypoxic rat liver injury after reoxygenation.

Long-term carcinogenesis studies on 2,3,7,8-tetrachlorodibenzo-p-dioxin and hexachlorodibenzo-p-dioxins.

A one-year carcinogenicity study with 2,6-dichlorobenzonitrile (Dichlobenil) in male Swiss mice: preliminary note.

Teratogenic effects of 2,3,7,8-tetrabromodibenzo-p-dioxin and three polybrominated dibenzofurans in C57BL/6N mice.

Vitamin A deficiency and the induction of cutaneous toxicity in murine skin by TCDD.

Effects of salicylate on hepatocyte lactate metabolism.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces cytochrome P450IA1 enzyme activity by activating transcription of the corresponding gene.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the hepatic estrogen and glucocorticoid receptors in congenic strains of Ah responsive and Ah nonresponsive C57BL/6J mice.

Morphological changes of isolated rat liver mitochondria during Fe²⁺/ascorbate-induced peroxidation and the effect of thiocitacid.

[The effect of finoptin on the metabolism and pharmacological action of cyclophosphane in vivo and in vitro].

A new method to monitor Kupffer cell phagocytosis continuously in perfused rat liver.

Sequence and immunological characterisation of ovine pancreatic lipase.

Influence of the Ah locus on the effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the hepatic epidermal growth factor receptor.

Conversion of retinol to retinal by rat liver microsomes.

Characteristics of induction of peroxisomal fatty acid oxidation-related enzymes in rat liver by drugs. Relationships between structure and inducing activity.

Esterase activity in rat hepatocytes.

NTP technical report on the toxicity studies of Cresols (CAS Nos. 95-48-7, 108-39-4, 106-44-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Effect of rat liver cytosolic enzymes and cofactors on mutagenicity of 1-amino-8-nitropyrene.

Monoclonal antibody-directed characterization of cytochrome P450 isozymes responsible for toluene metabolism in rat liver.

Absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) after low dose dermal exposure.

Evaluation of potential chemoprotectants against microcystin-LR hepatotoxicity in mice.

Human liver alcohol dehydrogenases catalyze the oxidation of the intermediary alcohols of the shunt pathway of mevalonate metabolism.

Mitochondrial phosphate transport. Import of the H⁺/Pi symporter and role of the presequence.

Isolation and characterization of cDNA clones to mouse macrophage and human endothelial cell tissue transglutaminases.

The induction of DNA strand breaks and formation of semiquinone radicals by metabolites of 2,4,5-trichlorophenol.

Evidence for the induction of an oxidative stress in rat hepatic mitochondria by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Relative roles of metabolism and renal excretory mechanisms in xenobiotic elimination by fish.

Effect of natural ageing and antioxidant inhibition on liver antioxidant enzymes, glutathione system, peroxidation, and oxygen consumption in *Rana perezi*.

Kinetic studies on toluene metabolism in ethanol- and phenobarbital-induced rat liver microsomes in vitro.

Effect of arsenicals on biliary excretion of endogenous glutathione and xenobiotics with glutathione-dependent hepatobiliary transport.

Effect of aclarubicin and doxorubicin on rat liver mitochondrial oxidative phosphorylation.

Increased copper concentrations in rat tissues after acute intoxication with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Gene expression, ontogeny and transplacental induction of hepatic UDP-glucuronosyl transferase activity in mice.

Ten- and ninety-day toxicity studies of 1,2-dichlorobenzene administered by oral gavage to Sprague-Dawley rats.

Characterization of the interaction of transformed rat hepatic cytosolic Ah receptor with a dioxin responsive transcriptional enhancer.

Characterization of the cytochrome P450 isozyme that metabolizes ochratoxin A, using metabolic inducers, inhibitors and antibodies.

Effect of different hypolipemic agents on rat liver peroxisomal and mitochondrial functions and biogenesis.

The major glutathione S-transferase in salmonid fish livers is homologous to the mammalian pi-class GST.

Regulation of 2-acetylaminofluorene- and 3-methylcholanthrene--mediated induction of multidrug resistance and cytochrome P450IA gene family expression in primary hepatocyte cultures and rat liver.

A comparative study of the effects of phebrol on the respiratory chains of rat liver, *Biomphalaria glabrata* and *Oncomelania nosophora*.

In vivo unwinding fluorimetric assay as evidence of the damage induced by fenarimol and DNOC in rat liver DNA.

Role of microtubuli in secretion of very-low-density lipoprotein in isolated rat hepatocytes: early effects of thiol reagents.

In vitro effects of L-ascorbic acid (vitamin C) on aryl hydrocarbon hydroxylase activity in hepatic microsomes of mice.

Inducible bilirubin-degrading system of rat liver microsomes: role of cytochrome P450IA1.

[Comparative study of the effectiveness of the classical and modified Cooper protocol for breast cancer chemotherapy].

[The efficiency of the action of alpha-tocopherol and its homologs on luminol-dependent chemiluminescence induced by (Fe²⁺ + NADP.H) and (Fe²⁺ + ascorbate) systems in rat liver microsomes].

The metabolism and excretion of prochloraz, an imidazole-based fungicide, in the rat.

Ah receptor in mice genetically "nonresponsive" for cytochrome P450IA1 induction: cytosolic Ah receptor, transformation to the nuclear binding state, and induction of aryl hydrocarbon hydroxylase by halogenated and nonhalogenated aromatic hydrocarbons in embryonic tissues and cells.

Complete amino acid sequence of human liver cytosolic alanine aminotransferase (GPT) determined by a combination of conventional and mass spectral methods.

A serine esterase released by human alveolar macrophages is closely related to liver microsomal carboxylesterases.

The liver, kidney, and thyroid toxicity of chlorinated benzenes.

Homogeneous distribution of phosphofructokinase in the rat liver acinus: a quantitative histochemical study.

The visualization of apoferritin in the secretory pathway of vertebrate liver cells.

Characterization of a novel glutathione S-transferase isoenzyme from mouse lung and liver having structural similarity to rat glutathione S-transferase 8-8.

Cis-inhibition and trans-stimulation of cationic amino acid transport in the perfused rat pancreas.

Effect of allyl alcohol on xanthine dehydrogenase activity in the perfused rat liver.

In-vitro hepatotoxicity of three dichlorobenzene isomers in human liver slices.

Alterations in protein synthesis in rat liver cells by in vitro and in vivo exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Mitochondrial 3- Δ^2 -trans-Enoyl-CoA isomerase. Purification, cloning, expression, and mitochondrial import of the key enzyme of unsaturated fatty acid beta-oxidation.

Effect of hepatotoxic chemicals and hypoxia on hepatic nonparenchymal cells: impairment of phagocytosis by Kupffer cells and disruption of the endothelium in rat livers perfused with colloidal carbon.

[Oxidative activity and $\Delta\psi$ of liver mitochondria of active and hibernating ground squirrels during various incubation conditions].

Glutathione depletion: its effects on other antioxidant systems and hepatocellular damage.

Expression of the core antigen gene of hepatitis B virus (HBV) in *Acetobacter methanolicus* using broad-host-range vectors.

Induction of a 31,000-dalton stress protein by prostaglandins D2 and J2 in porcine aortic endothelial cells.

Human aldehyde dehydrogenase. Activity with aldehyde metabolites of monoamines, diamines, and polyamines.

Dose-dependent acinar induction of cytochromes P450 in rat liver. Evidence for a differential mechanism of induction of P450IA1 by beta-naphthoflavone and dioxin.

Murine mdr-1, mdr-2, and mdr-3 gene expression: no coinduction with the Cyp1a-1 and Nmo-1 genes in liver by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Toxicity of 2,6-dichlorothiobenzamide (chlorthiamid) and 2,6-dichlorobenzamide in the olfactory nasal mucosa of mice.

The pyrimido-pyrimidine derivative RA-642: a potent inhibitor of ferrous-induced lipid peroxidation in cell membranes.

Sulphation of the flavonoids quercetin and catechin by rat liver.

Alterations of hepatic acetyl-CoA carboxylase by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Complete amino acid sequence of rat liver cytosolic alanine aminotransferase.

Potentiation of the toxicity of model hepatotoxicants by acetaminophen.

Effects of environmentally encountered epoxides on mouse liver epoxide-metabolizing enzymes.

Interaction between dietary vitamin A and single oral doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the TCDD-induced toxicity and on the vitamin A status in the rat.

In vitro cytotoxicity studies with the fish hepatoma cell line, PLHC-1 (*Poeciliopsis lucida*).

Uptake of corticosterone into isolated rat liver cells: possible involvement of Na⁺/K⁽⁺⁾-ATPase.

Evidence for the formation of a known toxin, p-cresol, from menthofuran.

Role of eicosanoids, inositol phosphates and extracellular Ca²⁺ in cell-volume regulation of rat liver.

Differential effects of insulin, epinephrine, and glucagon on rat hepatocyte mitochondrial activity.

Effects of chlordane on parameters of liver and muscle toxicity in man and experimental animals.

The synergistic effect of chlorinated chemicals (trichlorosalicylanilid, 4-chloro-m-cresol, trichlorophenoxyacetic acid, trichloroethanol, trichloromethiazide, trichlorofon and trichloroacetaldehyde) and low concentrations of griseofulvin on porphyrin metabolism.

[Acute toxicity, inductive effects of liver enzymes and distribution in the liver of 1,2,3,7,8-pentachlorodibenzo-p-dioxin in rats].

The inhibition of rat liver threonine dehydratase by carbamoyl-phosphate. The formation of carbamoylpyridoxal 5'-phosphate.

Induction of biotransformation in the liver of Eel (*Anguilla anguilla* L.) by sublethal exposure to dinitro-o-cresol: an ultrastructural and biochemical study.

Characterization and induction of xenobiotic metabolizing enzyme activities in a primary culture of rainbow trout hepatocytes.

Periportal hepatotoxicity due to allyl alcohol: a myriad of proposed mechanisms.

The possible role of phospholipase A2 in hepatic microsomal lipid peroxidation induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats.

Assessment of mitochondrial membrane potential as an indicator of cytotoxicity.

Regulation of mouse P(1)450 gene expression in monolayer-cultured hepatocytes from responsive and non-responsive strains.

Peroxisome proliferation and modulation of rat liver carcinogenesis by 2,4-dichlorophenoxyacetic acid, 2,4,5-trichlorophenoxyacetic acid, perfluorooctanoic acid and nafenopin.

Chronic effect of atrazine on hydromineral balance in the crab.

An evaluation of the redox cycling potencies of paraquat and nitrofurantoin in microsomal and lung slice systems.

Sublethal effects of 2,2-dichloropropionic acid (dalapon) on *Fossaria cubensis*, intermediate host of the liver fluke, *Fasciola hepatica*.

Toxicity of mixtures of parathion, toxaphene and/or 2,4-D in mice.

Effects of pentachlorophenol and other chemical preservatives on the health of wood-treating workers in Hawaii.

[Free amino acids of the liver and the characteristics of the amino acid metabolism in the liver and brain after cyanamide administration to rats].

Toxicokinetics of monochloroacetic acid: a whole-body autoradiography study.

[Free radicals in industrial medicine: their mechanisms of toxicity and biological relevance].

Ground-glass hepatocytes: light and electron microscopy. Characterization of the different types.

[The effect of chronic butyphos poisoning on protein and nucleic acid synthesis in various rat organs and activity of blood cholinesterase].

Chronic toxicity and oncogenicity of picloram in Fischer 344 rats.

The protective effect of sulfite on menadione- and diquat-induced cytotoxicity in isolated rat hepatocytes.

Evaluation of N-acetylcysteine and methylprednisolone as therapies for oxygen and acrolein-induced lung damage.

An assessment of the role of redox cycling in mediating the toxicity of paraquat and nitrofurantoin.

Metabolism of the arylamide herbicide propanil. I. Microsomal metabolism and in vitro methemoglobinemia.

Metabolism of the arylamide herbicide propanil. II. Effects of propanil and its derivatives on hepatic microsomal drug-metabolizing enzymes in the rat.

The effects of pesticides on some biochemical parameters of carp (*Cyprinus carpio* L.).

Initial accumulation of paraquat in the heart leading to acute death.

Chronic toxicity of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in mice.

Biological valuation of extra-corporeal techniques in acute poisoning.

A possible role for calcium in oxidative plant stress.

Free malondialdehyde levels in the urine of rats intoxicated with paraquat.

Role of catalase and oxidative stress in hepatic peroxisome proliferator-induced morphological transformation of Syrian hamster embryo cells.

Health status of Air Force veterans occupationally exposed to herbicides in Vietnam. I. Physical health.

In vivo and in vitro peroxisome proliferation properties of selected clofibrate analogues in the rat. Structure-activity relationships.

Effect of beta-naphthoflavone and MCPA on liver and kidney drug-metabolizing enzymes from the carp, *Cyprinus carpio*.

[Disulfiram and calcium carbimide. Mode of action, adverse effects and clinical use].

Glutathione disulfide as index of oxidant stress in rat liver during hypoxia.

Co-existence of hepatocyte ground-glass inclusions from several causes.

The determination of myeloperoxidase activity in liver.

gamma-Glutamyltranspeptidase-positive rat hepatocytes are protected from GSH depletion, oxidative stress and reversible alterations of collagen receptors.

NADPH- and NADH-dependent oxygen radical generation by rat liver nuclei in the presence of redox cycling agents and iron.

Paraquat inhibits the lipid peroxidation caused by carbon tetrachloride in guinea pig liver microsomes.

Sulfation-dependent formation of N-acetylated and deacetylated DNA adducts of N-hydroxy-4-acetylamino-biphenyl in male rat liver in vivo and in isolated hepatocytes.

[The effect of ethanol and the catalase inhibitor 3-amino-1,2,4-triazole on lipid peroxidation in rat liver homogenate and subcellular fractions].

Mechanisms of in vitro immunosuppression by hepatocyte-generated cyclophosphamide metabolites and 4-hydroperoxycyclophosphamide.

Immunohistochemical localization and dynamics of paraquat in small intestine, liver and kidney.

Comparison of uncoupling activities of chlorophenoxy herbicides in rat liver mitochondria.

Effects of sulfur-containing metabolites of hexachlorobenzene on the heme metabolic enzymes in rat liver.

Metabolism of the glutathione conjugate of propachlor by in situ perfused kidneys and livers of rats.

Formation of the 37-kD protein-acetaldehyde adduct in primary cultured rat hepatocytes exposed to alcohol.

Intestinal absorption of cationic and anionic ferric colloids and complexes: biochemical, histochemical and morphological observations in rats.

Effects of hepatic peroxisome proliferators and 12-O-tetradecanoyl phorbol-13-acetate on catalase and other enzyme activities of embryonic cells in vitro.

³²P-postlabeling analysis of binding of the cyclophosphamide metabolite, acrolein, to DNA.

Morphological transformation and catalase activity of Syrian hamster embryo cells treated with hepatic peroxisome proliferators, TPA and nickel sulphate.

Evaluation of genotoxic effects of the herbicide dicamba using in vivo and in vitro test systems.

Role of xanthine oxidase in ethanol-induced lipid peroxidation in rats.

Influence of aging on ethanol and acetaldehyde oxidation in female rat liver.

Effects of bioactivation inhibitors on covalent binding of 2-AAF to rat liver DNA in vivo and on hepatocytes cultures.

Metabolism of chlorpropham by adult rat hepatocytes co-cultured with a liver epithelial cell line.

Dose-related induction of rat hepatic drug-metabolizing enzymes by diuron and chlorotoluron, two substituted phenylurea herbicides.

Nuclear Ah receptor from mouse hepatoma cells: effect of partial proteolysis on relative molecular mass and DNA-binding properties.

Inhibition of growth by 2,3,7,8-tetrachlorodibenzo-p-dioxin in 5L rat hepatoma cells is associated with the presence of Ah receptor.

Multiple DNA-binding factors interact with overlapping specificities at the aryl hydrocarbon response element of the cytochrome P450IA1 gene.

The murine Cyp1a-1 gene negatively regulates its own transcription and that of other members of the aromatic hydrocarbon-responsive [Ah] gene battery.

Acetaldehyde-collagen adducts in CCl₄-induced liver injury in rats.

Expression of the chloramphenicol acetyltransferase (CAT) reporter gene by the murine Cyp1a-2 (cytochrome P3(450)) promoter in hepatoma cell cultures.

Arachidonic acid metabolism by dioxin-induced cytochrome P-450: a new hypothesis on the role of P-450 in dioxin toxicity.

Dioxin-inducible, Ah receptor-dependent transcription in vitro.

Equivalent molecular mass of cytosolic and nuclear forms of Ah receptor from Hepa-1 cells determined by photoaffinity labeling with 2,3,7,8-[³H]tetrachlorodibenzo-p-dioxin.

Functional analysis of the transcriptional promoter for the CYP1A1 gene.

The effect of TCDD on acyl CoA:retinol acyltransferase activity and vitamin A accumulation in the kidney of male Sprague-Dawley rats.

Formation of the 37KD protein-acetaldehyde adduct in liver during alcohol treatment is dependent on alcohol dehydrogenase activity.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced oxidative stress in female rats.

Regulation of polyamine biosynthesis by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Differences in the modulation of P450IA1 and epoxide hydratase expression by benz[a]anthracene and 2,3,7,8-tetrachlorodibenzo-p-dioxin in mouse embryo versus mouse hepatoma-derived cell lines.

Detection and characterization of [³H]2,3,7,8-tetrachlorodibenzo-p-dioxin binding to Ah receptor in a rainbow trout hepatoma cell line.

Induction of cytochrome P450IA1 in rat hepatoma cell by polycyclic hydrocarbons and a dioxin.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-induced decrease in the fluidity of rat liver membranes.

Oxidative injury mediated by the hepatic cytochrome P-450 system in conjunction with cellular iron. Effects on the pathway of haem biosynthesis.

The mechanism of action of alpha-naphthoflavone as an inhibitor of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced CYP1A1 gene expression.

Influence of the Ah locus on the humoral immunotoxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: evidence for Ah-receptor-dependent and Ah-receptor-independent mechanisms of immunosuppression.

Xenobiotic-inducible expression of murine glutathione S-transferase Ya subunit gene is controlled by an electrophile-responsive element.

Evaluation of factors which affect column performance with immobilized monoclonal antibodies. Model studies with a lysozyme-antilysozyme system.

Effect of rhein on the glucose metabolism of Ehrlich ascites tumor cells.

Analysis of photoaffinity-labeled aryl hydrocarbon receptor heterogeneity by two-dimensional gel electrophoresis.

Differential toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C57BL/6J mice congenic at the Ah Locus.

Identification of cytochrome P450IA2 as a human autoantigen.

Stable expression of mouse Cyp1a1 and human CYP1A2 cDNAs transfected into mouse hepatoma cells lacking detectable P450 enzyme activity.

Preferential over-expression of the class alpha rat Ya2 glutathione S-transferase subunit in livers bearing aflatoxin-induced pre-neoplastic nodules. Comparison of the primary structures of Ya1 and Ya2 with cloned class alpha glutathione S-transferase cDNA sequences.

Lack of I-compounds in DNA from a spectrum of Morris hepatomas.

Partial characterization of mechanism of insulin accumulation in H35 hepatoma cell nuclei.

Hepatic steatosis in zebra fish (*Brachydanio rerio*) induced by long-term exposure to gamma-hexachlorocyclohexane.

Studies on the role of lipid peroxidation in the acute toxicity of TCDD in rats.

Brain phenylalanine and tyrosine levels and hepatic encephalopathy induced by CCl₄ in rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-inducible, Ah receptor-mediated bending of enhancer DNA.

Hormone-dependent phosphorylation of the glucocorticoid receptor occurs mainly in the amino-terminal transactivation domain.

Desferrioxamine-induced alterations in hepatic iron distribution, DNA damage and lipid peroxidation in control and 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

Relative teratogenicity of nitrofen analogs in mice: unchlorinated, monochlorinated, and dichlorinated-phenyl ethers.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on I-compounds in hepatic DNA of Sprague-Dawley rats: sex-specific effects and structure-activity relationships.

Differences in adenosine triphosphate dependency of receptor-mediated endocytosis of alpha 2-macroglobulin and insulin correlate with separate routes of ligand-receptor complex internalization.

Activation of heme oxygenase and heat shock protein 70 genes by stress in human hepatoma cells.

[Acute myelomonocytic leukemia with mastocytosis in bone marrow].

Ethylene dichloride: the influence of disulfiram or ethanol on oncogenicity, metabolism, and DNA covalent binding in rats.

Tissue distribution, metabolism, and excretion of 14C-TCDD in a TCDD-susceptible and a TCDD-resistant rat strain.

Relative toxicity and tumor-promoting ability of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), 2,3,4,7,8-pentachlorodibenzofuran (PCDF), and 1,2,3,4,7,8-hexachlorodibenzofuran (HCDF) in hairless mice.

Characterization of the Ah receptor mediating aryl hydrocarbon hydroxylase induction in the human liver cell line Hep G2.

Heat shock and arsenite increase expression of the multidrug resistance (MDR1) gene in human renal carcinoma cells.

Hypoxia and deposition of iron in liver and spleen of mice given iron supplement.

Mortality and morbidity among Army Chemical Corps Vietnam veterans: a preliminary report.

Dexamethasone-mediated potentiation of P450IA1 induction in H4IIEC3/T hepatoma cells is dependent on a time-consuming process and associated with induction of the Ah receptor.

The effects of TCDD on receptors for epidermal growth factor, glucocorticoid, and estrogen in Ah-responsive and -nonresponsive congenic mice and the effects of TCDD on estradiol metabolism in a liver tumor promotion model in female rats.

The specific DNA binding activity of the dioxin receptor is modulated by the 90 kd heat shock protein.

Differential enzyme induction of mouse liver and lung following a single low or high dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Reversible alteration in the expression of the gap junctional protein connexin 32 during tumor promotion in rat liver and its role during cell proliferation.

Preparation for human study of pesticide applicators: sister chromatid exchanges and chromosome aberrations in cultured human lymphocytes exposed to selected fumigants.

Absorption, distribution, excretion and metabolism of a single oral dose of [14C]tri-o-cresyl phosphate (TOCP) in the male rat.

Induction of ethoxyresorufin-O-deethylase and inhibition of glucocorticoid receptor binding in skin and liver of haired and hairless HRS/J mice by topically applied 2,3,7,8-tetrachlorodibenzo-p-dioxin.

A complex effect of arsenite on the formation of alpha-ketoglutarate in rat liver mitochondria.

Lung injury in Fischer but not Sprague-Dawley rats after short-term hyperoxia.

Mitochondrial respiratory inhibition by N-methylated beta-carboline derivatives structurally resembling N-methyl-4-phenylpyridine.

The association of selected cancers with service in the US military in Vietnam. III. Hodgkin's disease, nasal cancer, nasopharyngeal cancer, and primary liver cancer. The Selected Cancers Cooperative Study Group.

Changes in disposition kinetics of sulphadimidine in response to acute regional liver damage in sheep.

Rat hepatocytes; uptake and hydrolysis of xenobiotics.

Dual effect of amiodarone on mitochondrial respiration. Initial protonophoric uncoupling effect followed by inhibition of the respiratory chain at the levels of complex I and complex II.

Effects of the food mutagens MeIQx and PhIP on the expression of cytochrome P450IA proteins in various tissues of male and female rats.

The contribution of N-oxidation to the metabolism of the food-borne carcinogen 2-amino-3,8-dimethylimidazo[4,5-f]quinoxaline in rat hepatocytes.

[Effect of inflammatory mediators on respiration in rat liver mitochondria].

Metabolism and covalent binding of [¹⁴C]toluene by human and rat liver microsomal fractions and liver slices.

Carboxyatractylate-sensitive uncoupling in liver mitochondria from ground squirrels during hibernation and arousal.

Hepatic aryl hydrocarbon hydroxylase and cytochrome P450 induction following the transpulmonary absorption of TCDD from intratracheally instilled particles.

Prothymocyte activity is reduced by perinatal 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

Lightly chlorinated ortho-substituted PCB congeners decrease dopamine in nonhuman primate brain and in tissue culture.

Cloning of the mitogen-activated S6 kinase from rat liver reveals an enzyme of the second messenger subfamily.

Partial purification and characterization of the Ca²⁺(+)-pumping ATPase of the liver plasma membrane.

Mechanisms of cyclophosphamide action on hepatic P-450 expression.

Self-catalyzed irreversible inactivation of rat hepatic aryl sulfotransferase IV by N-hydroxy-2-acetylaminofluorene.

S-oxygenation of thiobencarb (Bolero) in hepatic preparations from striped bass (*Morone saxatilis*) and mammalian systems.

Altered hepatic iron distribution and release in rats after exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

delta-Aminolevulinic acid dehydratase in rat liver: studies on the effects of ethanol, acetaldehyde, and B6 vitamers.

Regulation of HMG-CoA reductase: identification of the site phosphorylated by the AMP-activated protein kinase in vitro and in intact rat liver.

Primary structure of avian hepatic rhodanese.

Evidence for the absence of cysteine S-conjugate N-acetyltransferase activity in the metabolism of propachlor, naphthalene, and dichlobanil in calves.

Binding of aromatic amines to the rat hepatic Ah receptor in vitro and in vivo and to the 8S and 4S estrogen receptor of rat uterus and rat liver.

Competitive binding affinity of carcinogenic aromatic amines to the rat hepatic aromatic hydrocarbon (Ah) receptor in vitro and potency to induce monooxygenase activity in vivo.

Inorganic arsenic methylation by rat tissue slices.

Complete amino acid sequence of rat kidney ornithine aminotransferase: identity with liver ornithine aminotransferase.

Purification and characterization of bovine liver 3-cis-2-trans-enoyl-CoA isomerase.

[Morphofunctional status of blood and bone marrow cells in acute experimental hepatitis induced by allyl alcohol].

Halothane impairs the bioenergetic functions of isolated rat liver mitochondria.

Immunosuppressive activities of polychlorinated biphenyls in C57BL/6N mice: structure-activity relationships as Ah receptor agonists and partial antagonists.

Endothall thioanhydride: structural aspects of unusually high mouse toxicity and specific binding site in liver.

The role of cytochromes P-450 and flavin-containing monooxygenase in the metabolism of (S)-nicotine by rabbit lung.

Glutathione enhancement in various mouse organs and protection by glutathione isopropyl ester against liver injury.

Involvement of cytochrome P-450c in alpha-naphthoflavone metabolism by rat liver microsomes.

Influence of antibiotics on intestinal tract survival and translocation of environmental *Pseudomonas* species.

Aryl hydrocarbon hydroxylase activity levels in the hepatic microsomal fraction from MC- or TCDD-treated mice: a comparison between aromatic hydrocarbon responsive and non-responsive strains.

Acquisition of aryl hydrocarbon hydroxylase inducibility by aromatic hydrocarbons in monolayer-cultured hepatocytes from nonresponsive mouse strains.

Isolation of rat liver spectrin and identification of functional domains.

Lipid peroxidation and antioxidant systems in the liver injury produced by glutathione depleting agents.

Multiple isoelectric variants of copper, zinc-superoxide dismutase from rat liver.

Comparison of polychlorinated dibenzodioxin levels with hepatic mixed-function oxidase induction in great blue herons.

Age-related DNA modifications (I-compounds): modulation by physiological and pathological processes.

Protein degradation in cultured fetal hepatocytes. Absence of an inhibitory effect of insulin.

Chemically induced hepatic cytosol from the Sprague-Dawley rat: evidence for specific binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin to components kinetically distinct from the Ah receptor.

A physiological pharmacokinetic description of the tissue distribution and enzyme-inducing properties of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat.

Metabolism of alachlor by rat and mouse liver and nasal turbinate tissues.

Selective affinity labeling of a 27-kDa integral membrane protein in rat liver and kidney with N-bromoacetyl derivatives of L-thyroxine and 3,5,3'-triiodo-L-thyronine.

Deuterium D(V/K) isotope effects on ethanol oxidation in hepatocytes: importance of the reverse ADH-reaction.

2,3,7,8-Tetrachlorodibenzo-p-dioxin pretreatment of female mice altered tissue distribution but not hepatic metabolism of a subsequent dose.

Purification and characterization of two porcine liver nuclear histone acetyltransferases.

Thionamides and arsenite inhibit specific T3 binding to the hepatic nuclear receptor.

The induction of alkoxyresorufin metabolism: a potential indicator of environmental contamination.

The hepatic Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin: species differences in subunit dissociation.

Effects of TCDD on vitamin A status and liver microsomal enzyme activities in a TCDD-susceptible and a TCDD-resistant rat strain.

Peroxisomal bifunctional protein from rat liver is a trifunctional enzyme possessing 2-enoyl-CoA hydratase, 3-hydroxyacyl-CoA dehydrogenase, and delta 3, delta 2-enoyl-CoA isomerase activities.

The cytosolic concentration of phosphate determines the maximal rate of glycogenolysis in perfused rat liver.

Relative distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in human hepatic and adipose tissues.

Molecular cloning of human protein 4.2: a major component of the erythrocyte membrane.

Phenytoin 4-hydroxylation by rabbit liver P450IIC3 and identification of orthologs in human liver microsomes.

NAD(P)H: quinone oxidoreductase (DT-diaphorase) in chick embryo liver. Comparison to activity in rat and guinea pig liver and differences in co-induction with 7-ethoxyresorufin deethylase by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Purification to apparent homogeneity and partial amino acid sequence of rat liver O6-alkylguanine-DNA-alkyltransferase.

Effects of 3-methylsulphonyl-4,5,3',4'-tetrachlorobiphenyl and 7,8-benzoflavone on mouse liver aryl hydrocarbon hydroxylase activity in vitro.

Glutathione conjugation and cytochrome P-450 metabolism of methyl chloride in vitro.

Reactive metabolite formation catalysed by cytochrome P-450j.

Amino acid sequence of glutathione S-transferase b from guinea pig liver.

Effects of perfluoro-n-decanoic acid on the respiratory activity of isolated rat liver mitochondria.

Effects of selected chemicals on the glutathione status in the male reproductive system of rats.

The role of vitamin E in the hepatotoxicity by glutathione depleting agents.

Oxidative stress induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Oxidant-increased proteolysis in rat liver slices: effect of bromotrichloromethane, antioxidants and effectors of proteolysis.

Hepatotoxin-induced hypertauroinuria: a proton NMR study.

Possible roles of free radicals in alcoholic tissue damage.

Persistence of various polychlorinated dibenzo-p-dioxins and dibenzofurans (PCDDs and PCDFs) in hepatic and adipose tissue of marmoset monkeys.

Differences in time course of hepatocyte and pancreocyte damage after incubation with trypsin, chymotrypsin and 2,4-dinitrophenol.

Disposition, elimination, and metabolism of tri-o-cresyl phosphate following daily oral administration in Fischer 344 male rats.

Metabolism of chloronitrobenzenes by isolated rat hepatocytes.

Inhibitory effect of paraquat on biotransformation of halothane in rabbit liver microsomes.

Cadmium-induced alterations of chlorpropham metabolism in isolated rat hepatocytes.

Diquat hepatotoxicity in the Fischer-344 rat: the role of covalent binding to tissue proteins and lipids.

[The mutagenicity of organic microcontamination in the environment. III. The mutagenicity of selected herbicides and insecticides in the SOS chromotest].

Calcium carbimide in alcoholism treatment. Part 2: Medical findings of a short-term, placebo-controlled, double-blind clinical trial.

Paraquat poisoning: per vagina.

[Photoallergic dermatitis caused by the herbicide phenmedipham].

[Hepatotoxicity induced by cyanamide. A review of the anatomicopathological changes apropos a case].

Evidence in vivo for elevation of intracellular free Ca²⁺ in the liver after diquat, acetaminophen, and CCl₄.

Effects of preconceptional and gestational exposure to Tordon 202c on fetal growth and development in CD-1 mice.

Production and toxicological application of anti-paraquat antibodies.

[A 73-year-old patient with discrete changes in hepatic biochemistry].

Immunotherapy for the treatment of acute paraquat poisoning.

[Paraquat poisoning: clinical and anatomopathologic aspects in 3 cases].

Effect of paraquat administered intraperitoneally on the nonpolar lipids of rabbits.

Interaction of hexachlorocyclohexane (HCH) and chlorpropham (CIPC) in male rats.

Mechanistic studies: their role in the toxicological evaluation of pesticides.

Mutagenicity of dipyridyls and their methylated derivatives in Salmonella typhimurium/rat liver microsome system.

Effect of cyanamide on transaminases and other serum proteins in the rat.

Effects of gestational exposure to Tordon 202c on fetal growth and development in CD-1 mice.

The role of peroxisomal fatty acyl-CoA beta-oxidation in bile acid biosynthesis.

[Toxicological and hygienic characteristics of sulfocarbathione].

The relation between the oxidative biotransformation of hexachlorobenzene and its porphyrinogenic activity.

Effects of cholesterol feeding on the distribution, metabolism, and accumulation of pentachlorobenzene in rats.

Allyl alcohol-induced hemolysis and its relation to iron release and lipid peroxidation.

Mitochondria and xanthine oxidase both generate reactive oxygen species in isolated perfused rat liver after hypoxic injury.

Cyanamide and its calcium form: do they differ with respect to their action on the liver cell?
Experimental study in the rat.

Stereoselective sulfation of R,S-4'-hydroxypropranolol by canine hepatic cytosol and partially purified phenolsulfotransferases.

The metabolism of sulfite in liver. Stimulation of sulfate conjugation and effects on paracetamol and allyl alcohol toxicity.

Allyl alcohol- and acrolein-induced toxicity in isolated rat hepatocytes.

The role of sulfation in the metabolic activation of N-hydroxy-4'-fluoro-4-acetylamino-biphenyl.

Formation of cyclic 1,N2-propanodeoxyguanosine and thymidine adducts in the reaction of the mutagen 2-bromoacrolein with calf thymus DNA.

Metabolism of triiodothyronine in rat hepatocytes.

Ubiquitous formation of catalase compound II in hemoglobin-free perfused rat liver and detection of novel spectral species.

Changes in catalase, glutathione peroxidase and glutathione-S-transferase activities in the liver of newts exposed to 2-methyl-4-chlorophenoxyacetic acid (MCPA).

Inactivation of low-K_m rat liver mitochondrial aldehyde dehydrogenase by cyanamide in vitro. A catalase-mediated reaction.

The role of specific DNA adducts in the induction of micronuclei by N-hydroxy-2-acetylaminofluorene in rat liver in vivo.

Methoxyflurane enhances allyl alcohol hepatotoxicity in rats. Possible involvement of increased acrolein formation.

Drug-induced hydrogen peroxide production in isolated rat hepatocytes.

Disposition of 2,4-dichlorophenoxyacetic acid dimethylamine by Fischer 344 rats dosed orally and dermally.

Changes in the inducibility of a hepatic aldehyde dehydrogenase by various effectors.

Superoxide dismutase and alpha-tocopherol suppress the paraquat-induced elevation of N1-acetylspermidine and putrescine in primary culture of adult rat hepatocytes.

Catalase is needed to avoid tissue peroxidation in *Rana perezi* in normoxia.

Comparative effects of pair-feeding and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on various biochemical parameters in female rats.

Biological activity of 2,4,8-trichlorodibenzofuran: promotion of rat liver foci and induction of cytochrome P-450-dependent monooxygenases.

Alteration of the acute toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) by estradiol and tamoxifen.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-inducible aryl hydrocarbon receptor-mediated change in CYP1A1 chromatin structure occurs independently of transcription.

The adrenocorticotrophic hormone (ACTH)-induced reversal of hemorrhagic shock.

Photoaffinity labeling of the nuclear Ah receptor from mouse Hepa 1c1c7 cells using 2,3,7,8-[³H]tetrachlorodibenzo-p-dioxin.

Species and strain sensitivity to the induction of peroxisome proliferation by chloroacetic acids.

Acute toxicity of perfluorodecanoic acid in C57BL/6 mice differs from 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Medical monitoring of dioxin clean-up workers.

[Noncirrhotic liver fibrosis after chronic arsenic poisoning].

The potential role of DNA methylation in the response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effect of tetrachlorodibenzo-p-dioxin (TCDD) on the glucuronidation of retinoic acid in the rat.

Evaluation of the carcinogenic potential of pesticides. 1. Acifluorfen.

Effect of subacute low level dietary sodium arsenite on dogs.

Oxidation of diethyldithiocarbamate to disulfiram by liver microsomal cytochrome P-450-containing monooxygenase system.

Species differences in estrogen receptors and in the response to 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced porphyria in genetically inbred mice: partial antagonism and mechanistic studies.

Cottonseed meal (gossypol) toxicosis in a swine herd.

Transcriptional start site in the mouse Cyp1a1 (cytochrome P1450) gene.

Marked increases in hepatic NAD(P)H:oxidoreductase gene transcription and mRNA levels correlated with a mouse chromosome 7 deletion.

Suppression of aryl hydrocarbon hydroxylase activity in human primary lung carcinoma x mouse hepatoma somatic cell hybrids.

Induction of cytochrome P450-dependent monooxygenase activities in rat hepatoma H-4-IIIE cells in culture by 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds: mechanistic studies using radiolabeled congeners.

Effect of galactose on interaction of N-(2-hydroxypropyl)methacrylamide copolymers with hepatoma cells in culture: preliminary application to an anticancer agent, daunomycin.

Induction of aryl hydrocarbon hydroxylase and demonstration of a specific nuclear receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in two human hepatoma cell lines.

Teratology of 2,3,7,8-tetrachlorodibenzo-p-dioxin in a complex environmental mixture from the love canal.

The biochemical toxicity of perfluorodecanoic acid in the mouse is different from that of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Mortality in an area contaminated by TCDD following an industrial incident.

Tumor cell permeability to peplomycin.

Subunit structure of the erythropoietin receptor.

Characteristics of 2,3,7,8-tetrachlorodibenzo-p-dioxin induced endotoxin hypersensitivity: association with hepatotoxicity.

Ten-year mortality study of the population involved in the Seveso incident in 1976.

³¹P and ¹³C NMR studies of isolated perfused hematopoietic cells from leukemic mice.

Regulation of mouse CYP1A1 gene expression by dioxin: requirement of two cis-acting elements during induction.

Control of glycogen synthase and phosphorylase in hepatocytes from diabetic rats. Effects of glucagon, vasopressin, and vanadate.

Mitochondrial function in carbon tetrachloride-induced cirrhosis in the rat. Qualitative and quantitative defects.

Affinity purification of active plasminogen activator inhibitor-1 (PAI-1) using immobilized anhydrourokinase. Demonstration of the binding, stabilization, and activation of PAI-1 by vitronectin.

Target tissue morphology and serum biochemistry following 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure in a TCDD-susceptible and a TCDD-resistant rat strain.

Induction of cytochrome P450IA1 in mouse hepatoma cells by several chemicals. Phenobarbital and TCDD induce the same form of cytochrome P450.

Tyrosine phosphorylation of the insulin receptor is not required for receptor internalization: studies in 2,4-dinitrophenol-treated cells.

2-(4'-chlorophenyl)benzothiazole is a potent inducer of cytochrome P450IA1 in a human and a mouse cell line. Anomalous correlation between protein and mRNA induction.

Effect of hepatic failure toxins on regenerative enzymes in the liver after injury with galactosamine in the rat.

2,2',4,4',5,5'-hexachlorobiphenyl as a 2,3,7,8-tetrachlorodibenzo-p-dioxin antagonist in C57BL/6J mice.

Cyanide and arsenic poisoning by intravenous injection.

Inducible (class 3) aldehyde dehydrogenase from rat hepatocellular carcinoma and 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated liver: distant relationship to the class 1 and 2 enzymes from mammalian liver cytosol/mitochondria.

6-Methyl-1,3,8-trichlorodibenzofuran (MCDF) as a 2,3,7,8-tetrachlorodibenzo-p-dioxin antagonist in C57BL/6 mice.

Immunotoxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in a complex environmental mixture from the Love Canal.

Update of mortality among chemical workers with potential exposure to the higher chlorinated dioxins.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on lipid synthesis and lipogenic enzymes in the rat.

[The specific effects of new phenoxyacetic acid derivatives at the cellular membrane level].

Regulation of cytochrome P1-450 gene expression in mouse hepatoma cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Activation of transcription as a general mechanism of 2,3,7,8-tetrachlorodibenzo-p-dioxin action.

Lymphocyte stem cell alterations following perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Follow-up of subjects who developed chloracne following TCDD exposure at Seveso.

Effects of commercial chlorophenolate, 2,3,7,8-TCDD, and pure phenoxyacetic acids on hepatic peroxisome proliferation, xenobiotic metabolism and sister chromatid exchange in the rat.

Activation of cytochrome P450IA1 gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin in wild-type and high-activity variant mouse hepatoma cells.

Dioxins and furans in the mother and possible effects on the fetus and newborn breast-fed baby.

Ferritin subunits in livers of siderotic mice.

Use of rat liver altered focus models for testing chemicals that have completed two-year carcinogenicity studies.

Amino acid sequence variations in protein AA of cats with high and low incidences of AA amyloidosis.

Ligand-dependent interaction of the dioxin receptor with target DNA.

Specific protein-DNA interactions at a xenobiotic-responsive element: copurification of dioxin receptor and DNA-binding activity.

Collagens of normal and cirrhotic human liver.

Differential [32P]-labeling of chemically induced stress proteins in S-phase mouse lymphoma cells.

Variability within mammalian sorbitol dehydrogenases. The primary structure of the human liver enzyme.

Phenobarbital-inducible gene expression in developing rat liver: relationship to hepatocyte function.

Diacytosis of asialoglycoprotein in isolated hepatocytes is dependent on the structure of ligand and cellular distribution of the receptors.

Long-chain fatty acids act as protonophoric uncouplers of oxidative phosphorylation in rat liver mitochondria.

Extracellular calcium alleviates cell toxicity due to hepatotoxins that induce lipid peroxidation, but has no effect on toxins that do not cause lipid peroxidation. A study in isolated rat hepatocytes.

Biphasic response for hepatic microsomal enzyme induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57BL/6J and DBA/2J mice.

Further studies on the 37 kD liver protein-acetaldehyde adduct that forms in vivo during chronic alcohol ingestion.

[The induction of the beta state of the comuton regulation of mitochondrial oxidative phosphorylation by 2,4-DNP and malonate].

Induction of hepatic peroxisome proliferation in mice by lactofen, a diphenyl ether herbicide.

[Lysosomal hydrolase activity in the liver of rats with chronic sulfocarbathione poisoning].

Lipid peroxidation and tissue injury by ferric citrate in paraquat-intoxicated mice.

Toxicity and distribution of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in developing chick embryos.

Genotoxicity of a variety of hydrazine derivatives in the hepatocyte primary culture/DNA repair test using rat and mouse hepatocytes.

Carcinogenicity and genotoxicity of the herbicide 2,4,5-trichlorophenoxyethanol (TCPE) contaminated with dioxin.

Lysosomal and cytosolic enzyme release as a measure of organelle specific toxicity in cultured rat liver slices.

The role of N-sulfation in the N-hydroxy-2-acetylaminofluorene-mediated outgrowth of diethylnitrosamine-initiated hepatocytes to gamma-glutamyltranspeptidase-positive foci in male rat liver.

Increased oxygen radical-dependent inactivation of metabolic enzymes by liver microsomes after chronic ethanol consumption.

Reactive oxygen species during ischemia-reflow injury in isolated perfused rat liver.

The effect of iron overload on the mitochondrial porphyrin level in the hexachlorobenzene induced experimental porphyria.

Effects of 2-methyl-4-chlorophenoxyacetic acid on the catalase liver activity of chicken embryos.

[Effect of cyanamide on the level of endogenous ethanol in the liver of normal rats and in hypocorticism].

DNA damage in stomach, kidney, liver and lung of rats treated with atrazine.

Mitochondria as the primary site of acetaldehyde metabolism in beef and pig liver slices.

Carbon tetrachloride toxicity on *Escherichia coli* exacerbated by superoxide.

Toxic consequence of the abrupt depletion of glutathione in cultured rat hepatocytes.

Oxidative cell injury in the killing of cultured hepatocytes by allyl alcohol.

Environmental stress and parasitic infections: I. The effects of Gramoxone and Hexadrin on embryo and hatching of *Fasciola gigantica* miracidia.

Role of thiols in the in-vitro methylation of inorganic arsenic by rat liver cytosol.

Metabolizing systems in cell culture cytotoxicity tests.

Significance of alterations in hepatic antioxidant enzymes. Primacy of glutathione peroxidase.

Characterization of the activation of rat liver glutathione S-transferases by nonsubstrate ligands.

Depletion of hepatic glutathione by ethanol occurs independently of ethanol metabolism.

Identification of the hepatic cytochrome P-450 isozymes induced and decreased by picloram.

Inhibition of rat liver glutathione S-transferase isoenzymes by acrolein.

Mutagenicity and in vitro covalent DNA binding of 2-hydroxyamino-3-methylimidazo[4,5-f]quinoline.

Interaction of 1,4-benzoquinone and 2,4-dichlorophenoxyacetic acid with microsomal glutathione transferase from rat liver.

Acute effects of the aldehyde dehydrogenase inhibitors, disulfiram, pargyline and cyanamide, on circulating ketone body levels in the rat.

Chlorophenoxyacid herbicides induce microsomal cytochrome P-450 IVA1 (P-452) in rat liver.

Effects of 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP), cyperquat (MPP+) and paraquat on isolated mitochondria from rat striatum, cortex and liver.

Evidence for hydroxyl free radical formation during paraquat but not for nifurtimox liver microsomal biotransformation. A dimethyl-sulfoxide scavenging study.

DNA adduct formation by alachlor metabolites.

Effect of chronic ethanol treatment under partial catalase inhibition on the activity of enzymes related to peroxide metabolism in rat liver and heart.

Inhibition of rat liver aldehyde dehydrogenases by acrolein.

Low level chemiluminescence from isolated rat hepatocytes, intact lung and intestine in situ.

Altered regulation of P-450IA1 expression in a multidrug-resistant MCF-7 human breast cancer cell line.

Organ-specific effects of long term feeding of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 1,2,3,7,8-pentachlorodibenzo-p-dioxin on I-compounds in hepatic and renal DNA of female Sprague-Dawley rats.

The aromatic hydrocarbon receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin and variable levels of induced aryl hydrocarbon hydroxylase activity in clones of mouse hepatoma cells.

Physicochemical characterization of the nuclear form of Ah receptor from mouse hepatoma cells exposed in culture to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The DNA recognition site for the dioxin-Ah receptor complex. Nucleotide sequence and functional analysis.

Increases in cytochrome P-450 mediated 17 beta-estradiol 2-hydroxylase activity in rat liver microsomes after both acute administration and subchronic administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin in a two-stage hepatocarcinogenesis model.

Interrelationship of number of glucose carriers and intracellular phosphoribosyl diphosphate level of Ehrlich ascites tumor cells in vitro.

Steroid hormones and medications that alter cancer risks.

Immunological abnormalities 17 years after accidental exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Induction of heme oxygenase in rat hepatoma cells by exposure to heavy metals and hyperthermia.

Association of the Ah receptor with the 90-kDa heat shock protein.

Human dioxin-inducible cytosolic NAD(P)H:menadione oxidoreductase. cDNA sequence and localization of gene to chromosome 16.

Biochemical and functional effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the heart of female rats.

Hepatic ATP content and hyperammonemia induced by CCl₄ in rats.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on de novo fatty acid and cholesterol synthesis in the rat.

Differential gene expression in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD). Noncoordinate regulation of a TCDD-induced aldehyde dehydrogenase and cytochrome P-450c in the rat.

The acute toxicity of 2,3,4,7,8-pentachlorodibenzofuran (4PeCDF) in the male Fischer rat.

Intermediary metabolism of 2,6-dichlorobenzonitrile (dichlobenil) in chickens and growth of chickens fed dichlobenil.

A third genetic locus affecting the Ah (dioxin) receptor.

Virucidal efficacy of physico-chemical treatments against coronaviruses and parvoviruses of laboratory animals.

Hepatic failure toxins depress liver regenerative enzymes after periportal injury with allyl alcohol in the rat.

Differentiation of erythroid progenitor (CFU-E) cells from mouse fetal liver cells and murine erythroleukemia (TSA8) cells without proliferation.

Evidence for two independent pathways of insulin-receptor internalization in hepatocytes and hepatoma cells.

An immunotoxicological evaluation of 4,4'-thiobis-(6-t-butyl-m-cresol) in female B6C3F1 mice. 1. Body and organ weights, hematology, serum chemistries, bone marrow cellularity, and hepatic microsomal parameters.

Characterization of the Ah receptor and aryl hydrocarbon hydroxylase induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin and benz(a)anthracene in the human A431 squamous cell carcinoma line.

Comparison of gene expression in preneoplastic and neoplastic rat liver to adult, fetal, regenerating, and tumor-promoted liver.

DNA binding properties of dioxin receptors in wild-type and mutant mouse hepatoma cells.

Biologic and toxic effects of polychlorinated dibenzo-p-dioxin and dibenzofuran congeners in the guinea pig. Quantitative structure-activity relationships.

Evaluation of spermatogenesis and sperm quality in the rat following acute inhalation exposure to methyl bromide.

Expression of the primary biliary cirrhosis antigens in yeast: aspects of mitochondrial control.

The effect of age on the glucuronidation and toxicity of 4,4'-thiobis(6-t-butyl-m-cresol).

The cytogenetic and hepatotoxic effects of dioxin on mouse liver cells.

Perfluoro-n-decanoic acid: induction of peroxisomal beta-oxidation by a fatty acid with dioxin-like toxicity.

Glutathione S-transferase Ya subunit gene: identification of regulatory elements required for basal level and inducible expression.

Evidence that 2,3,7,8-tetrachlorodibenzo-p-dioxin induces NADPH cytochrome c (P-450) reductase in rat hepatoma cells in culture.

Responses of the L5178Y tk+/tk- mouse lymphoma cell forward mutation assay: III. 72 coded chemicals.

Abnormal methylation capacity in human liver cirrhosis.

Dietary iron and 2,3,7,8-tetrachlorodibenzo-p-dioxin induced alterations in hepatic lipid peroxidation, glutathione content and body weight.

Modulation of 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity in F344 rats by di(2-ethylhexyl)phthalate.

Mortality among California highway workers.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxicity in yellow perch (*Perca flavescens*).

Morphologic lesions and acute toxicity in rainbow trout (*Salmo gairdneri*) treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effect of some uremic toxins on oxygen consumption of rats in vivo and in vitro.

Effects of TCDD-estradiol interactions in three strains of mice.

Rabbit serum hypertriglyceridemia after administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Tissue-specific alterations of de novo fatty acid synthesis in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treated rats.

Potentially hazardous residues of non-ortho chlorine substituted coplanar PCBs in human adipose tissue.

TCDD receptor ligands present in extracts of urban air particulate matter induce aryl hydrocarbon hydroxylase activity and cytochrome P-450c gene expression in rat hepatoma cells.

The activator protein for glucosylceramide beta-glucosidase from guinea pig liver. Improved isolation method and complete amino acid sequence.

Subchronic metabolic effects and toxicity of a simulated pulp mill effluent on juvenile lake trout, *Salmo trutta m. lacustris*.

Differential arrest of secretory protein transport in cultured rat hepatocytes by azide treatment.

Uptake of technetium 99m hepatobiliary imaging agents by cultured rat hepatocytes.

Uroporphyrin accumulation in cultured chick embryo hepatocytes: comparison of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3,4,3',4'-tetrachlorobiphenyl.

Assessment of the relative hazard involved with airborne irritants with additional hepatotoxic or nephrotoxic properties in mice.

Hydroperoxide metabolism of amphibia: tissue catalases of leopard frogs.

Amino acid sequence of the ribonuclease inhibitor from porcine liver reveals the presence of leucine-rich repeats.

Radioligand-dependent differences in the molecular properties of the mouse and rat hepatic aryl hydrocarbon receptor complexes.

Coinduction of MDR-1 multidrug-resistance and cytochrome P-450 genes in rat liver by xenobiotics.

Oxidation of N-butyl-N-(3-formylpropyl)nitrosamine to N-butyl-N-(3-carboxypropyl)nitrosamine in rat liver and inhibition by disulfiram.

Protective murine monoclonal antibodies to tetanus toxin.

Effects of chlorobenzenes and their methyl sulfone metabolites on microsomal enzymes associated with drug metabolism in rat liver.

Transplacental induction of cytochromes P-450IA1 and P-450IA2 by polycyclic aromatic carcinogens: TCDD-binding protein level as the rate-limiting step.

Choline accumulation in isolated rat hepatocytes.

Metabolism and excretion of etoposide in isolated, perfused rat liver models.

Complete amino acid sequence of the thioesterase domain of chicken liver fatty acid synthase.

Interaction of nitrite with catalase in the perfused rat liver.

The metabolism of acetaldehyde and not acetaldehyde itself is responsible for in vivo ethanol-induced lipid peroxidation in rats.

The effects of perfluorodecanoic acid on hepatic stearyl-coenzyme A desaturase and mixed function oxidase activities in rats.

Sources of calcium mobilized by glucagon in isolated rat hepatocytes.

Substrate preference of a cytosolic aldehyde dehydrogenase inducible in rat liver by treatment with 3-methylcholanthrene.

Crystal violet as an uncoupler of oxidative phosphorylation in rat liver mitochondria.

Regulatory mechanisms of monofunctional and bifunctional anticarcinogenic enzyme inducers in murine liver.

[The role of rat liver microsomes in the metabolism of methylmethacrylate to formaldehyde].

Expression of the 31-kD stress protein in rat myoblasts and hepatocytes.

Polyacrylamide concentration gradient gel electrophoresis of the 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) receptor in rat liver cytosol.

Comparison of in vivo and in vitro methods for assessing the effects of carbon tetrachloride on the hepatic drug-metabolizing enzyme system.

Amino acid sequence of rat liver cathepsin L.

Nitrofurantoin-mediated oxidative stress cytotoxicity in isolated rat hepatocytes.

Specificity of rabbit cytochrome P-450 isozymes involved in the metabolic activation of the food derived mutagen 2-amino-3-methylimidazo[4,5-f] quinoline.

4-Hydroxynonenal and other lipid peroxidation products are formed in mouse liver following intoxication with allyl alcohol.

Isolation and cDNA sequence of human postheparin plasma hepatic triglyceride lipase.

NTP Toxicology and Carcinogenesis Studies of Monuron (CAS No. 150-68-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Uptake of copper by mouse hepatocytes.

Hepatotoxicity of cyclophosphamide in man: pharmacokinetic analysis.

Are lysosomal enzymes involved in rapid damage in vertebrate muscle cells? A study of the separate pathways leading to cellular damage.

Purification of the Ah receptor from C57BL/6J mouse liver.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the hepatic distribution of iron, copper, zinc, and magnesium in rats.

Trout P450IA1: cDNA and deduced protein sequence, expression in liver, and evolutionary significance.

Plasma gamma-hexachlorocyclohexane concentrations in forestry workers exposed to lindane.

Immunological characterization of thioltransferase from pig liver.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes increases in expression of c-erb-A and levels of protein-tyrosine kinases in selected tissues of responsive mouse strains.

Partial characterization of specific cantharidin binding sites in mouse tissues.

Promotion of iron-induced rat liver microsomal lipid peroxidation by copper.

Theophylline metabolism by human, rabbit and rat liver microsomes and by purified forms of cytochrome P450.

Amino acid sequence of porcine heart fumarase.

Identification of hormone-interacting amino acid residues within the steroid-binding domain of the glucocorticoid receptor in relation to other steroid hormone receptors.

Induction of heat shock proteins in short-term cultured hepatocytes derived from normal and chronically griseofulvin-treated mice.

Glycogenolysis in the rat isolated perfused liver as a measure of chemically induced liver toxicity.

Suppression of splenic lymphocyte function by 7,12-dimethylbenz[a]anthracene (DMBA) in vitro.

Effect of extracellular Ca⁺⁺ omission on isolated hepatocytes. II. Loss of mitochondrial membrane potential and protection by inhibitors of uniport Ca⁺⁺ transduction.

Qualitative and quantitative differences in the induction and inhibition of hepatic benzo[a]pyrene metabolism in the rat and hamster.

Antidotal effects of deferrioxamine in experimental liver injury--role of lipid peroxidation.

Induction of hepatic DNA single strand breaks in rats by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

The interaction of MgADP with H⁺-ATPase in rat liver mitochondria.

Effects of SH-modifying reagents on the rat hepatic Ah receptor: inhibition of ligand binding and transformation, and disruption of the ligand-receptor complex.

Binding characteristics of Ah receptors from rats and mice before and after separation from hepatic cytosols. 7-Hydroxyellipticine as a competitive antagonist of cytochrome P-450 induction.

Complete covalent structure of 60-kDa esterase isolated from 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced rabbit liver microsomes.

Localization of high benzaldehyde dehydrogenase activity in rat upper gastrointestinal tract mucosa: a quantitative histochemical study.

Class III human liver alcohol dehydrogenase: a novel structural type equidistantly related to the class I and class II enzymes.

Effects of piperine on bioenergetic functions of isolated rat liver mitochondria.

Mutagenicity, comutagenicity, and antimutagenicity of erythrosine (FD and C red 3), a food dye, in the Ames/Salmonella assay.

Structural characterization of recombinant hepatitis B surface antigen protein by mass spectrometry.

Complete amino acid sequence of rat liver 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase.

Hepatic toxicity of paraquat in primary cultures of rat hepatocytes.

Comparison of the action of epinephrine and a respiratory chain uncoupler, 2,4-dinitrophenol, on Ca²⁺-mobilization in isolated hepatocytes and perfused livers.

Modulation of the mutagenic effects of 2-amino-3-methylimidazo[4,5-f]quinoline (IQ) and 2-amino-3,4-dimethylimidazo[4,5-f]quinoline (MeIQ) in bacteria with rat-liver 9000 x g supernatant or monolayers of rat hepatocytes as an activation system.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes an increase in protein kinases associated with epidermal growth factor receptor in the hepatic plasma membrane.

1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP), its metabolite cyperquat (MPP⁺) and energy transduction in mitochondria from rat striatum and liver.

[Hepatic ornithine decarboxylase activity of rats induced by administration of 2-nitro-p-cresol and sodium deoxycholate].

Pharmacokinetics and biological activity of 2,3,7,8-tetrachlorodibenzo-p-dioxin. 1. Dose-dependent tissue distribution and induction of hepatic ethoxyresorufin O-deethylase in rats following a single injection.

Induction of cytosolic and microsomal epoxide hydrolases in mouse liver by peroxisome proliferators, with special emphasis on structural analogues of 2-ethylhexanoic acid.

Metabolic activation of alpha-naphthoflavone by 2,3,7,8-tetrachlorodibenzodioxin-induced rat liver microsomes.

Stimulatory and inhibitory effects of sodium salts on adenylate cyclase of rat liver. Implications for salt modulation of guanine nucleotide-binding regulatory component function.

Comparison of the effects of carbon tetrachloride and of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the disposition of linoleic acid in rat liver in vitro.

Development of hepatocytes in the pancreas of hamsters treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Inhibition of mitochondrial respiration by mepivacaine].

Differences between chick and turkey embryos in sensitivity to 3,3',4,4'-tetrachloro-biphenyl and in concentration/affinity of the hepatic receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effect of monooxygenase inducers and inhibitors on the hepatic metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat and hamster.

Inhibition of lipid peroxidation by disulfiram and diethyldithiocarbamate does not prevent hepatotoxin-induced cell death in isolated rat hepatocytes. A study with allyl alcohol, tert-butyl hydroperoxide, diethyl maleate, bromoisovalerylurea and carbon tetrachloride.

Allyl alcohol cytotoxicity and glutathione depletion in isolated periportal and perivenous rat hepatocytes.

Hepatic Ah-receptor levels and the effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on hepatic microsomal monooxygenase activities in a TCDD-susceptible and -resistant rat strain.

Hepatotoxicity induced by the herbicide atrazine in the rat.

Mutagenicity of chloroaniline/lignin metabolites in the Salmonella/microsome assay.

Cytotoxicity of the redox cycling compound diquat in isolated hepatocytes: involvement of hydrogen peroxide and transition metals.

[Effect of ethanol and the catalase inhibitor aminotriazole on the activity of antioxidative enzymes in the rat liver and heart].

Acute, pharmacokinetic, and subchronic toxicological studies of 2,4-dichlorophenoxyacetic acid.

Evidence for participation of lipid peroxidation and iron in diquat-induced hepatic necrosis in vivo.

Cyanamide hepatotoxicity. Incidence and clinico-pathological features.

The effect of tridiphane (2-(3,5-dichlorophenyl)-2-(2,2,2-trichloroethyl)oxirane) on hepatic epoxide-metabolizing enzymes: indications of peroxisome proliferation.

[Cyanamide hepatotoxicity: various forms of presentation. Apropos of 2 cases].

Cohort mortality study of chemical workers with potential exposure to the higher chlorinated dioxins.

Specific polyclonal and monoclonal antibody prevents paraquat accumulation into rat lung slices.

Effect of BCNU pretreatment on diquat-induced oxidant stress and hepatotoxicity.

Effect of tridiphane on reproductive parameters in Fischer 344 rats.

Dietary toxicity of picloram herbicide in rats.

Bipyridylium herbicide toxicity: effects of paraquat and diquat on isolated rat hepatocytes.

Paraquat poisoning: clinical features and immediate general management.

Responses of the L5178Y tk⁺/tk⁻ mouse lymphoma cell forward mutation assay to coded chemicals. I: Results for nine compounds.

Effect of aminotriazole on mercury uptake by the fetus of normal and acatalasemic mice exposed to metallic mercury.

Evidence that the flux control coefficient of the respiratory chain is high during gluconeogenesis from lactate in hepatocytes from starved rats. Implications for the hormonal control of gluconeogenesis and action of hypoglycaemic agents.

Metabolic basis of ethylene glycol monobutyl ether (2-butoxyethanol) toxicity: role of alcohol and aldehyde dehydrogenases.

Effect of aldehyde dehydrogenase inhibitors on the ex vivo sensitivity of human multipotent and committed hematopoietic progenitor cells and malignant blood cells to oxazaphosphorines.

Treatment of adverse digitalis effects by hemoperfusion through columns with antidigoxin antibodies bound to agarose polyacrolein microsphere beads.

Allyl alcohol liver injury: suppression by ethanol and relation to transient glutathione depletion.

Autoradiographic studies on in vivo covalent binding of N-hydroxy-2-acetylaminofluorene in rat liver containing gamma-glutamyltranspeptidase-positive foci. The effect of the sulfation-inhibitor pentachlorophenol.

Inhibition by pentachlorophenol of the initiating and promoting activities of 1¹-hydroxysafrole for the formation of enzyme-altered foci and tumors in rat liver.

Initiation of hepatocarcinogenesis in infant male B6C3F1 mice by N-hydroxy-2-aminofluorene or N-hydroxy-2-acetylaminofluorene depends primarily on metabolism to N-sulfooxy-2-aminofluorene and formation of DNA-(deoxyguanosin-8-yl)-2-aminofluorene adducts.

Metabolism of tridiphane (2-(3,5-dichlorophenyl)-2(2,2,2-trichloroethyl)oxirane) by hepatic epoxide hydrolases and glutathione S-transferases in mouse.

Alterations in brain aldehyde dehydrogenase activity modify ethanol-induced conditioned taste aversion.

The effect of pretreatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin on the hepatic metabolism of 2,4,5-trichlorophenoxyacetate (2,4,5-T) and 2,4-dichlorophenoxyacetate (2,4,-D).

Further characterization of the ability of hepatocarcinogens to lower rat liver aryl sulfotransferase activity.

Regulation of hepatic sulfotransferase catalyzing the activation of N-hydroxyarylamide and N-hydroxyarylamine by growth hormone.

Model study on the bioreduction of paraquat, MPP+, and analogs. Evidence against a "redox cycling" mechanism in MPTP neurotoxicity.

N-acetylcysteine and glutathione-dependent protective effect of PZ51 (Ebselen) against diquat-induced cytotoxicity in isolated hepatocytes.

Effects of picloram on xenobiotic biotransformation in rat liver.

Evidence for involvement of non-biliary excretion into the intestines in the formation of methylsulphonyl-containing metabolites of 2-chloro-N-isopropylacetanilide (propachlor) by swine and rats.

Evidence for the generation of transaminase inhibitor(s) during ethanol metabolism by rat liver homogenates: a potential mechanism for alcohol toxicity.

Role of acetaldehyde in ethanol-induced increase in the activity of phosphatidate phosphatase in rat liver.

Selective measurement of hepatic triglyceride lipase and lipoprotein lipase in rat postheparin plasma with pentachlorophenol and dichlorodiphenyltrichloroethane.

Role of acetaldehyde in the ethanol-induced impairment of hepatic glycoprotein secretion in the rat in vivo.

Respective roles of the microsomal ethanol oxidizing system and catalase in ethanol metabolism by deermice lacking alcohol dehydrogenase.

The oxidation of acrolein by rat liver aldehyde dehydrogenases. Relation to allyl alcohol hepatotoxicity.

Induction of cytosolic and microsomal epoxide hydrolases and proliferation of peroxisomes and mitochondria in mouse liver after dietary exposure to p-chlorophenoxyacetic acid, 2,4-dichlorophenoxyacetic acid and 2,4,5-trichlorophenoxyacetic acid.

Glucagon treatment of rats activates the respiratory chain of liver mitochondria at more than one site.

The role of acrolein in allyl alcohol-induced lipid peroxidation and liver cell damage in mice.

Effects of doxorubicin on mouse heart catalase.

Rate determining factors of ethanol oxidation in hepatocytes from starved and fed rats: effect of acetaldehyde concentration on the rate of NADH oxidation catalyzed by alcohol dehydrogenase.

Ethanol metabolism in alcohol dehydrogenase deficient deermice is mediated by the microsomal ethanol oxidizing system, not by catalase.

Metabolism of cyanamide to cyanide and an inhibitor of aldehyde dehydrogenase (ALDH) by rat liver microsomes.

Changes of the liver UDP-glucuronosyltransferase activity in trout (*Salmo gairdneri* Rich.) acutely exposed to selected aquatic toxicants.

Mechanisms of mitochondrial photosensitization by the cationic dye, N,N-bis(2-ethyl-1,3-dioxylene)kryptocyanine (EDKC): preferential inactivation of complex I in the electron transport chain.

Dietary iron and broiler performance.

Immunosuppression following exposure to 7,12-dimethylbenz[a]anthracene (DMBA) in Ah-responsive and Ah-nonresponsive mice.

Effect of excess iron in milk replacer on calf performance.

Isolation of a calcium-sensitive, 35,000-dalton microfilament- and liposome-binding protein from ascites tumor cell microvilli: identification as monomeric calpactin.

Pleiotropic drug resistance in hepatocytes induced by carcinogens administered to rats.

Effects of vitamin A and/or thyroidectomy on liver microsomal enzymes and their induction in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

Significance of mirex-caused hypoglycemia and hyperlipidemia in rats.

A method to quantitate the relative initiating and promoting potencies of hepatocarcinogenic agents in their dose-response relationships to altered hepatic foci.

Stimulation of DNA synthesis in rat and mouse liver by various tumor promoters.

Tumor accumulation of D-selenomethionine-⁷⁵Se in tumor-bearing mice.

Quantitative stereological evaluation of four histochemical markers of altered foci in multistage hepatocarcinogenesis in the rat.

Regulation of cytochrome P-450c in differentiated and dedifferentiated rat hepatoma cells: role of the Ah receptor.

In situ protein-DNA interactions at a dioxin-responsive enhancer associated with the cytochrome P1-450 gene.

alpha-Naphthoflavone metabolized by 2,3,7,8-tetrachlorodibenzo(p)dioxin-induced rat liver microsomes: a potent clastogen in Chinese hamster ovary cells.

Inactivation of *Bacillus piliformis* spores by heat and certain chemical disinfectants.

Pleiotropic effect of the gene hairless on hepatotoxicity of 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin in mice.

Hydroxyl radical generation by microsomes after chronic ethanol consumption.

Uptake and binding of teniposide (VM26) in Krebs II ascites cells.

The effect of cephalosporin antibiotics on alcohol metabolism: a review.

Structure-activity studies of the hepatocarcinogenicities of alkenylbenzene derivatives related to estragole and safrole on administration to preweanling male C57BL/6J x C3H/HeJ F1 mice.

Carcinogenic effects of infantile and long-term 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment in the mouse.

Catalase in cultured skin fibroblasts from patients with the cerebro-hepato-renal (Zellweger) syndrome: normal maturation in peroxisome-deficient cells.

Stress-induced thermotolerance of the cytoskeleton of mouse neuroblastoma N2A cells and rat Reuber H35 hepatoma cells.

The receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in the mouse hepatoma cell line Hepa 1c1c7. A comparison with the glucocorticoid receptor and the mouse and rat hepatic dioxin receptors.

Cytogenetic studies on 1,1-dichloroethylene and its two isomers in mammalian cells in vitro and in vivo.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the lactating rat on maternal and neonatal vitamin A status.

Quantitative cancer risk assessments for 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Drug-induced cholestasis.

Clinical reports on plasma exchange in the Kidney Center, Tokai University School of Medicine.

A nonendocytotic mechanism for the selective uptake of high density lipoprotein-associated cholesterol esters.

Oral toxicity of trichlorobenzyl chloride and its acid derivative.

Embryotoxicity and fetotoxicity of orally administered tridiphane in mice and rats.

Sendai-viral HN and F glycoproteins as probes of plasma-membrane protein catabolism in HTC cells. Studies with fusogenic reconstituted Sendai-viral envelopes.

Hepatic encephalopathy. Application of visual evoked responses to test hypotheses of its pathogenesis in rats.

Fatal iron intoxication in late pregnancy.

Experimental and clinical studies on the reproductive toxicology of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

No evidence for reactive oxygen damage in ischemia-reflow injury.

Effect of a sublethal dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin on interscapular brown adipose tissue of rats.

Porphyriurias and occupational disease.

The role of necrosis in hepatocellular proliferation and liver tumors.

[Follow-up of patients with chloracne in the Seveso area].

Increased permeability of the rat biliary tree by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) treatment and protection by hepatoactive agents.

Structural studies and isolation of cDNA clones providing the complete sequence of rat liver dihydropteridine reductase.

An increase in cerebral benzodiazepine receptors induced by a subacute administration of ammonia, mercaptans and short-chain fatty acids in rats.

Cantharidin poisoning associated with specific binding site in liver.

Interactions of glucagon and glucagon analogs with isolated canine hepatocytes.

Metabolism and excretion of gallium arsenide and arsenic oxides by hamsters following intratracheal instillation.

Effects of methyl (+)(3S)-1,2,3,4-tetrahydro-3-hydroxy-methyl-beta-carboline-2- carbodithioate (THC), a new hepatoprotective agent, on acute liver injuries induced by various hepatotoxic substances in mice and rats.

[Alanine aminotransferase activity of the blood serum and liver of rats after exposure to chemical substances].

Role of fibronectin on the clearance and tissue uptake of antigen and immune complexes in rats.

4-Chloro-4'-biphenylol as an uncoupler and an inhibitor of mitochondrial oxidative phosphorylation.

Cloning of cDNAs coding for the heavy chain region and connecting region of human factor V, a blood coagulation factor with four types of internal repeats.

Effect of age and sex on allyl alcohol hepatotoxicity in rats: role of liver alcohol and aldehyde dehydrogenase activities.

Rat hepatic mitochondria are more sensitive to allyl alcohol than are those of mice.

Studies on the mechanism of acetaldehyde-mediated inhibition of rat liver transaminases.

[Comparative evaluation of hepatotropic substances using various experimental models].

The role of iron in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced lipid peroxidation by rat liver microsomes.

Involvement of the prostatic steroid-binding protein in the transfer of ligand to the dioxin receptor.

Relationship between the murine Ah phenotype and the hepatic uptake and metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The molybdate-stabilized nonactivated glucocorticoid receptor contains a dimer of Mr 90,000 non-hormone-binding protein.

Rat liver 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase. Identification of essential sulfhydryl residues in the primary sequence of the enzyme.

Chemically-induced formation of an inhibitor of hepatic uroporphyrinogen decarboxylase in inbred mice with iron overload.

Influence of proteinase inhibitors and substrates on 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-binding capacity of the rat hepatic Ah receptor.

Histopathology of acute toxic responses in selected tissues from rats exposed by inhalation to methyl bromide.

Uptake and specific binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the olfactory mucosa of mice and rats.

TCDD (2,3,7,8-tetrachlorodibenzo-p-dioxin) causes an increase in protein tyrosine kinase activities at an early stage of poisoning in vivo in rat hepatocyte membranes.

alpha-Naphthoflavone antagonism of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced murine lymphocyte ethoxoresorufin-O-deethylase activity and immunosuppression.

Comparison of the acute toxicity of endothal and cantharidic acid on mouse liver in vivo.

Changes in thyroid hormones and thyroxine glucuronidation in hamsters compared with rats following treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effect of allyl alcohol-induced sublethal hepatic damage upon doxorubicin metabolism and toxicity in the rabbit.

Enhancement of rat liver microsomal metabolism of azoxymethane to methylazoxymethanol by chronic ethanol administration: similarity to the microsomal metabolism of N-nitrosodimethylamine.

The purification and characterization of glutathione S-transferase from the hepatopancreas of the blue crab, *Callinectes sapidus*.

The primary structure of pig liver thioltransferase.

Spectral interaction between 4-methylphenol and beta-oestradiol on hepatic microsomal cytochrome P-450: difference between ethanol and phenobarbital pretreatment.

[Stimulation by quinones of cyanide-resistant respiration in rat liver and heart mitochondria].

Sequence analysis of a cDNA clone encoding the liver cell adhesion molecule, L-CAM.

Dose-dependent elevation of Ah receptor binding by TCDD in rat liver.

The primary structure of rabbit liver cytosolic serine hydroxymethyltransferase.

Hepatic cyclic GMP formation is regulated by similar factors that modulate activation of purified hepatic soluble guanylate cyclase.

Structure of the class II enzyme of human liver alcohol dehydrogenase: combined cDNA and protein sequence determination of the pi subunit.

The binding components for 2,3,7,8-tetrachlorodibenzo-p-dioxin and polycyclic aromatic hydrocarbons. Separation from the rat and mouse hepatic cytosol and characterization of a light density component.

[Effects of phenol and related compounds on erythrocytes and hepatocytes from rats and dipalmitoyl phosphatidylcholine-liposomes].

Species-dependent expression and induction of homologues of rabbit cytochrome P-450 isozyme 5 in liver and lung.

In vitro cytotoxicity of allyl alcohol and bromobenzene in a novel organ culture system.

Preliminary studies on the primary structure of rat liver dihydropteridine reductase.

Examination of the structural requirements for proliferation of peroxisomes and mitochondria in mouse liver by hypolipidemic agents, with special emphasis on structural analogues of 2-ethylhexanoic acid.

Isolation and characterization of a polarized isolated hepatocyte preparation in the skate *Raja erinacea*.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced lipid peroxidation in hepatic and extrahepatic tissues of male and female rats.

Changes in plasma proteins in rats treated for short periods with hepatotoxins or with agents which induce cytochrome P450 isoenzymes.

Sulphotransferase-mediated covalent binding of the carcinogen 7,12-dihydroxymethylbenz[a]anthracene to calf thymus DNA and its inhibition by glutathione transferase.

Transcriptional control of human cytochrome P1-450 gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin in human tissue culture cell lines.

Heterogeneity of the rat hepatic Ah receptor and evidence for transformation in vitro and in vivo.

ATP depletion causes a reversible redistribution and inactivation of a subpopulation of galactosyl receptors in isolated rat hepatocytes.

Mutagenicity of the C-nitroso analog of fenitrothion.

Circadian alterations in prolactin, corticosterone, and thyroid hormone levels and down-regulation of prolactin receptor activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Biosynthesis of four rat liver mitochondrial acyl-CoA dehydrogenases: in vitro synthesis, import into mitochondria, and processing of their precursors in a cell-free system and in cultured cells.

Covalent binding to DNA and mutagenicity of 2,4-diaminotoluene metabolites produced by isolated hepatocytes and 9000 g supernatant from Fischer 344 rats.

TCDD, dietary iron and hepatic iron distribution in female rats.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on hepatic and uterine estrogen receptor levels in rats.

Characterization of the in vitro stability of the rat hepatic receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Structure and function of the Ah receptor: sulfhydryl groups required for binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin to cytosolic receptor from rodent livers.

Amino acid sequence of S-adenosyl-L-homocysteine hydrolase from rat liver as derived from the cDNA sequence.

Impaired calcium sequestration activity in liver microsomes from fasted rats.

Hepatic indices of thyroid status in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Rat liver NAD(P)H: quinone reductase nucleotide sequence analysis of a quinone reductase cDNA clone and prediction of the amino acid sequence of the corresponding protein.

Enhanced uptake of carnitine by perfused rat liver following starvation.

Glycogenolytic, noninsulin-like effects of vanadate on rat hepatocyte glycogen synthase and phosphorylase.

The Ca²⁺-dependent actions of the alpha-adrenergic agonist phenylephrine on hepatic glycogenolysis differ from those of vasopressin and angiotensin.

Monoxygenase induction by various xenobiotics and its influence on rat liver microsomal metabolism of chrysene in comparison to benz[a]anthracene.

Comparative effects of BHA and ascorbic acid on the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in rats.

[Excretory function of the liver with an allyl alcohol lesion and the antioxidant correction of the disorders].

Alcohol-induced hepatotoxicity: a role for oxygen free radicals.

Differential expression of cytochrome P-450 1 and related forms in rabbit liver and kidney.

A dynamic liver culture system: a tool for studying chemical biotransformation and toxicity.

The study of mutagenic activity of carcinogens and other chemical agents with Salmonella typhimurium assays: testing of 126 compounds.

Effect of thyroidectomy on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced lipid peroxidation.

Measurement of in vivo lipid peroxidation and toxicological significance.

7-ethoxycoumarin O-deethylation in perfused livers from ethanol-fed rats: evidence for an important role of mitochondrial reducing equivalents.

Polychlorinated biphenyls and related compound interactions with specific binding sites for thyroxine in rat liver nuclear extracts.

Relationship of basic research in toxicology to environmental standard setting: the case of polybrominated biphenyls in Michigan.

Role of protein kinase C in the regulation of rat liver glycogen synthase.

[Action of a dental anesthetic on cell respiration].

Different effects of 2,4-dinitrophenol on rat liver mitochondrial oxidation of various substrates: succinate and glutamate vs 3-hydroxybutyrate and glycerol 3-phosphate.

Electron spin resonance studies on isolated hepatocytes treated with ferrous or ferric iron.

Molecular cloning and primary structure of myelin-associated glycoprotein.

Synthetic seleno-organic compound with glutathione peroxidase-like activity in the chick.

Lack of genotoxic and cytotoxic effects of the herbicide lenacil on mouse tumor cells and on some *Salmonella typhimurium* strains.

Acute, 14-day repeated dosing, and 90-day subchronic toxicity studies of potassium picloram.

The toxicity of 2,4-dichlorophenoxyacetic acid to the adult crested newt.

Cytotoxic effects of paraquat and inhibition of them by vitamin E.

Hepatic disease associated with ground-glass inclusions in hepatocytes after cyanamide therapy.

Role of redox cycling and lipid peroxidation in bipyridyl herbicide cytotoxicity. Studies with a compromised isolated hepatocyte model system.

A light and electron microscopic study of the regenerative epithelium in the intrahepatic bile duct. Experimental study of local direct instillation of paraquat into the intrahepatic bile ducts of rats.

[Toxicologo-hygienic evaluation of morphological changes in the liver of animals exposed to butyl esters of 2,4-D and 2,4,5-T (2,4-DB, 2,4,5-TB) and their combinations].

Health effects of phenoxy herbicides. A review.

Bioavailability of dioxin in soil from a 2,4,5-T manufacturing site.

Further studies of lipid peroxidation in human paraquat poisoning.

Similarity of isozyme pattern of serum lactate dehydrogenase following treatments with O,O,S-trimethyl phosphorothioate and paraquat.

Multicenter evaluation of ultrafiltration, dialysis, and thermal coagulation as sample pretreatment methods for the colorimetric determination of paraquat in blood and tissues.

Sulfuric acid esters as major ultimate electrophilic and hepatocarcinogenic metabolites of 4-aminoazobenzene and its N-methyl derivatives in infant male C57BL/6J x C3H/HeJ F1 (B6C3F1) mice.

Effects of ascorbic acid in vivo on the fatty acid composition of the tissues of mice treated with Gramoxone.

Review of recent Vietnamese studies on the carcinogenic and teratogenic effects of phenoxy herbicide exposure.

Effects of oxidative stress caused by hyperoxia and diquat. A study in isolated hepatocytes.

Occupational exposures to chlorophenoxy herbicides.

Effects of various thiols on paraquat toxicity.

[Characteristics of an experimental model of alcoholic cardiomyopathy by diagnostic enzyme tests].

Glutathione depletion as a determinant of sensitivity of human leukemia cells to cyclophosphamide.

Cytotoxicity, DNA cross-linking, and single strand breaks induced by activated cyclophosphamide and acrolein in human leukemia cells.

Bacterial infection and acute lung injury in hamsters.

[Changes in the content and activity of liver and lung microsomal enzymes in experimental pneumonia and their possible correction].

Porphyrins and pentachlorophenol in rat-liver mitochondria in hexachlorobenzene-induced porphyria.

Mechanism of hepatotoxicity to periportal regions of the liver lobule due to allyl alcohol: role of oxygen and lipid peroxidation.

Inhibition of CO₂ production from aminopyrine or methanol by cyanamide or crotonaldehyde and the role of mitochondrial aldehyde dehydrogenase in formaldehyde oxidation.

Action of some pesticides on T₄ to T₃ conversion in cultured kidney and liver cells in the presence or absence of cysteine.

Metabolism of the "mixed" cytochrome P-450 inducer hexachlorobenzene by rat liver microsomes.

Differential inhibition of rat tissue catalase by cyanamide.

Kinetics of sulfation in the rat in vivo and in the perfused rat liver.

Comparative effect of chemical structure of chlorinated N-hydroxy-N-acyl-aminobiphenyl ethers and their related compounds on rat liver cytosol-catalyzed transacylation.

Comparative studies on the mechanisms of paraquat and 1-methyl-4-phenylpyridine (MPP⁺) cytotoxicity.

The role of mitochondrial glutathione and cellular protein sulfhydryls in formaldehyde toxicity in glutathione-depleted rat hepatocytes.

Effect of 3-amino-1,2,4-triazole pretreatment on ethanol blood levels after intraperitoneal administration.

A comparative study of the regulation of cytochrome P-450 and glutathione transferase gene expression in rat liver.

The reduction of dithiobis(2-nitrobenzoate) by rat liver mitochondria.

Induction of rat hepatic microsomal epoxide hydrolase by substituted urea herbicides.

Interaction of 2,4-dichlorophenoxyacetate (2,4-D) and 2,4,5-trichlorophenoxyacetate (2,4,5-T) with the acyl-CoA: amino acid N-acyltransferase enzymes of bovine liver mitochondria.

Metabolism and disposition of ortho-benzyl-para-chlorophenol in male rats.

The metabolism of xenobiotics by certain extrahepatic organs and its relation to toxicity.

Increased spontaneous chemiluminescence from liver homogenates and isolated hepatocytes upon inhibition of O₂⁻ and H₂O₂ utilization.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on IgA serum and bile levels in rats.

Clinical laboratory manifestations of exposure to dioxin in children. A six-year study of the effects of an environmental disaster near Seveso, Italy.

Impaired ketogenesis in iron-deficient rat pups.

The cytosolic receptor binding affinities and AHH induction potencies of 29 polynuclear aromatic hydrocarbons.

Lack of direct effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on protein kinase C activity in EL4 cells.

Hematotoxic effects of 3,5-dinitro-4-chloro-alpha,alpha,alpha-trifluorotoluene, a water contaminant.

The effects of Love Canal soil extracts on maternal health and fetal development in rats.

Synthesis, biologic and toxic effects of the major 2,3,7,8-tetrachlorodibenzo-p-dioxin metabolites in the rat.

Regression of methyl bromide-induced forestomach lesions in the rat.

Polychlorinated dibenzo-p-dioxins: quantitative in vitro and in vivo structure-activity relationships.

Reversible inactivation of the Ah receptor associated with changes in intracellular ATP levels.

Intracellular location of the Ah receptor.

Protein and cDNA sequence of a glycine-rich, dimethylarginine-containing region located near the carboxyl-terminal end of nucleolin (C23 and 100 kDa).

A novel biologically active seleno-organic compound--VI. Protection by ebselen (PZ 51) against galactosamine/endotoxin-induced hepatitis in mice.

Methylation differences in the murine P1450 and P3450 genes in wild-type and mutant hepatoma cell culture.

Effects of adenine and its isomer 4-aminopyrazolo-[3,4-d]-pyrimidine on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced mortality in rats.

The effects of nonadecafluoro-n-decanoic acid on serum retinol and hepatic retinyl palmitate hydrolase activity in male Sprague-Dawley rats.

Induction by phenobarbital in McA-RH7777 rat hepatoma cells of a polycyclic hydrocarbon inducible cytochrome P450.

Control of gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin. Multiple dioxin-responsive domains 5'-ward of the cytochrome P1-450 gene.

Immunosuppression without liver induction by subchronic exposure to 2,7-dichlorodibenzo-p-dioxin in adult female B6C3F1 mice.

Evaluating toxin-induced hepatic injury in rats by laboratory results and discriminant analysis.

Polychlorinated dibenzofurans as 2,3,7,8-TCDD antagonists: in vitro inhibition of monooxygenase enzyme induction.

Control of cytochrome P1-450 gene expression: analysis of a dioxin-responsive enhancer system.

Health effects of long-term exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Intermediary metabolism of the mature rat following 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment.

Identification of ferrous sulfate toxicity in a commercial broiler flock.

Suppression of B cell differentiation by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Subchronic oral toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the guinea pig: comparisons with a PCB-containing transformer fluid pyrolysate.

Regulation of alkaline phosphatase activity in rat hepatoma cells. Effects of serum proteins, cycloheximide, actinomycin D, chloroquine, dinitrophenol and potassium cyanide.

Carbonyl iron therapy for iron deficiency anemia.

Chemical modification of herbimycin A. Synthesis and in vivo antitumor activities of halogenated and other related derivatives of herbimycin A.

The diagnosis of dioxin-associated illness.

1-Methyl-4-phenylpyridine (MPP+) induces oxidative stress in the rodent.

Relationship of the wasting syndrome to lethality in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Quantitative histochemistry of benzaldehyde dehydrogenase in hepatocellular carcinomas of vinyl chloride-treated rats.

A pilot epidemiologic study of possible health effects associated with 2,3,7,8-tetrachlorodibenzo-p-dioxin contaminations in Missouri.

CCl₄-induced toxicity in isolated hepatocytes: the importance of direct solvent injury.

Liver histology in chronic metribuzin poisoning of the guinea-pig.

Porphyrogenic effect of hexachlorobenzene and 2,3,7,8-tetrachlorodibenzo-para-dioxin: is an inhibitor involved in uroporphyrinogen decarboxylase inactivation?

Occupational exposures to chlorophenols.

A review of porphyria and cancer and the missing link with human exposure to hexachlorobenzene.

The role of contaminants in hexachlorobenzene toxicity.

Cell number and size in selected organs of fetuses of rats malnourished and exposed to nitrofen.

Inhibition of the low-K_m mitochondrial aldehyde dehydrogenase by diethyl maleate and phorone in vivo and in vitro. Implications for formaldehyde metabolism.

Effects of induction of rat liver cytosolic aldehyde dehydrogenase on the oxidation of biogenic aldehydes.

Conserved structural domains among species and tissues-specific differences in the mitochondrial phosphate-transport protein and the ADP/ATP carrier.

NADPH-dependent generation of a cytosolic dithiol which activates hepatic iodothyronine 5'-deiodinase. Demonstration by alkylation with iodoacetamide.

Enhanced repair of O6-methylguanine in liver DNA of rats pretreated with phenobarbital, 2,3,7,8-tetrachlorodibenzo-p-dioxin, ethionine, or N-alkyl-N-nitrosoureas.

[Changes in intercellular contact as a parameter of hepatotoxicity of industrial substances].

Hepatic regenerative enzyme activity after pericentral and periportal lobular toxic injury.

Activation of hepatocyte glycogen synthase by metabolic inhibitors.

Construction and sequence of cDNA for rat liver stearyl coenzyme A desaturase.

Examination of the differential hepatotoxicity of diallyl phthalate in rats and mice.

Metabolism of salicylate by isolated kidney and liver mitochondria.

Effects of individual terphenyls and polychlorinated terphenyls on rat hepatic microsomal cytochrome P-450-dependent monooxygenases: structure-activity relationships.

A quantitative evaluation of the extent of inner mitochondrial membrane destruction after freezing-thawing based on functional studies.

Polychlorinated terphenyls: alterations in liver morphology and induction of cytochrome P-450.

Mechanism of hepatotoxicity in periportal regions of the liver lobule due to allyl alcohol: studies on thiols and energy status.

Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin: ontogeny in chick embryo liver.

In vivo ³¹P nuclear magnetic resonance studies of arsenite induced changes in hepatic phosphate levels.

Changes in hamster hepatic cytochrome P-450, ethoxycoumarin O-deethylase, and reduced NAD(P): menadione oxidoreductase following treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin. Partial dissociation of temporal and dose-response relationships from elicited toxicity.

Prevention of microsomal production of hydroxyl radicals, but not lipid peroxidation, by the glutathione-glutathione peroxidase system.

Hepatic Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin. Partial stabilization by molybdate.

[Protective effect of malotilate (diisopropyl 1,3-dithiol-2-ylidenemalonate) on chemical-induced hepatotoxicity].

Rat lung microsomal lipid peroxidation: effects of vitamin E and reduced glutathione.

Microcalorimetric investigation of metabolism in rat hepatocytes cultured on microplates and in cell suspensions.

Chicken liver H-protein, a component of the glycine cleavage system. Amino acid sequence and identification of the N epsilon-lipoyllysine residue.

Influence of extracellular calcium on allyl alcohol-induced hepatotoxicity.

Interactive effects of estradiol and 2,3,7,8-tetrachlorodibenzo-p-dioxin on hepatic cytochrome P-450 and mouse uterus.

Isolated hepatocytes as a model for aging effects on hepatotoxicity: studies with allyl alcohol.

Nitrofurantoin inhibition of mouse liver mitochondrial respiration involving NAD-linked substrates.

Allyl alcohol partially protects murine hepatic mitochondria against carbon tetrachloride.

The action of mouse liver and lung homogenates on the ESR signal of a spin-labelled antiviral compound.

Effects of thyroidectomy on the Ah receptor and enzyme inducibility by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat liver.

Ah receptor mediating induction of aryl hydrocarbon hydroxylase: detection in human lung by binding of 2,3,7,8-[3H]tetrachlorodibenzo-p-dioxin.

Chemical changes of organic compounds in chlorinated water. XI. Thin-layer chromatographic fractionation of Ames mutagenic compounds in chlorine-treated 4-methylphenol solution.

Identification of an essential lysine residue in the phosphatidylcholine-transfer protein from bovine liver by modification with phenylisothiocyanate.

N-hydroxyarylamine O-acetyltransferase in hamster liver: identity with arylhydroxamic acid N,O-acetyltransferase and arylamine N-acetyltransferase.

Hepatocellular uptake of oleate is energy dependent, sodium linked, and inhibited by an antibody to a hepatocyte plasma membrane fatty acid binding protein.

Immobilization of pig liver microsomes. Stability of cytochrome P-450-dependent monooxygenase activities.

Evidence that the development of hepatic fatty acid oxidation at birth in the rat is concomitant with an increased intramitochondrial CoA concentration.

Tissue-specific expression of the mouse dioxin-inducible P(1)450 and P(3)450 genes: differential transcriptional activation and mRNA stability in liver and extrahepatic tissues.

[Cytochrome P-448 induction in liver microsomes of mice of inbred strains after administration of xenobiotics of MC-type].

The biologic and toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in chickens.

2,3,7,8-Tetrachlorodibenzo-p-dioxin metabolism and disposition in yellow perch.

Concentration-related changes in blood and tissue parameters of hepatotoxicity and their interdependence in rats exposed to bromobenzene and 1,2-dichlorobenzene.

Prostaglandin release by the chick embryo heart is increased by 2,3,7,8-tetrachlorodibenzo-p-dioxin and by other cytochrome P-448 inducers.

Cytosolic rat liver glutathione transferase 4-4. Primary structure of the protein reveals extensive differences between homologous glutathione transferases of classes alpha and mu.

Occupational exposure to chlorophenates. Renal, hepatic and other health effects.

[Biosynthesis in the rat liver of a common form of monooxygenase induced by xenobiotics of a methylcholanthrene series].

Regulation of rat and bovine adrenal metabolism of polycyclic aromatic hydrocarbons by adrenocorticotropin and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Reappraisal of the liver benzpyrene hydroxylase synthesized de novo after treatment of rats with 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3-methylcholanthrene.

Functional hepatocellular heterogeneity determined by the hepatotoxins allyl alcohol and bromobenzene in immature and adult Fischer 344 rats.

Complete amino acid sequence of a cytochrome P-450 isolated from beta-naphthoflavone-induced rabbit liver microsomes. Comparison with phenobarbital-induced and constitutive isozymes and identification of invariant residues.

Structure and function of the Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin. Species difference in molecular properties of the receptors from mouse and rat hepatic cytosols.

Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin. Codistribution of unoccupied receptor with cytosolic marker enzymes during fractionation of mouse liver, rat liver and cultured Hepa-1c1 cells.

On the stimulation of respiration by alpha-adrenergic agonists in perfused rat liver.

The role of formaldehyde in hydrazine-induced methylation of liver DNA guanine.

Screening for the ability of hexachlorobenzene metabolites to decrease rat liver porphyrinogen carboxylase.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on lipid peroxidation in microsomal systems in vitro.

Adenosine triphosphate content of *Mycobacterium leprae* isolated from armadillo tissue by Percoll buoyant density centrifugation.

The effect of inhibitors of mitochondrial energy production on hepatic glutathione, UDP-glucuronic acid, and adenosine 3'-phosphate-5'-phosphosulfate concentrations.

Studies of gene transcription and translation in regenerating rat liver.

Ingestion of soil contaminated with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) alters hepatic enzyme activities in rats.

Effect of fasting and acute ethanol administration on the energy state of in vivo liver as measured by ³¹P-NMR spectroscopy.

Uptake of benzylpenicillin, cefpiramide and cefazolin by freshly prepared rat hepatocytes. Evidence for a carrier-mediated transport system.

Depression of alcohol dehydrogenase activity in rat hepatocyte culture by dihydrotestosterone.

Phosphorylation and inactivation of rat hepatocyte glycogen synthase by phorbol esters and mezerein.

Induction of different isozymes of cytochrome P-450 and of microsomal epoxide hydrolase in rat liver by 2-acetylaminofluorene and structurally related compounds.

Metabolism of hexachlorobenzene (HCB) in the isolated perfused rat liver.

[2,3,7,8-Tetrachlorodibenzo-p-dioxin induces the biosynthesis of highly active benzo(a)pyrene hydroxylase in liver microsomes].

Halogenated hydrocarbon and hydroperoxide-induced peroxidation in rat tissue slices.

Iron-induced peroxidative injury to isolated rat hepatic mitochondria.

Structure-activity relationships of chlorinated benzenes as inducers of hepatic cytochrome P-450 isozymes in the rat.

Ability of several hexachlorobenzene metabolites to decrease rat-liver porphyrinogen carboxy-lyase and to produce porphyrin accumulation in chick-embryo liver.

Functional derangement of liver mitochondria from hexachlorobenzene-treated rats.

[Mutagenic activity of carcinogens and other chemical agents in Salmonella typhimurium tests].

The bacterial mutagenicity of nitropolychlorinated dibenzo-p-dioxins.

Glutathione peroxidase and reactive oxygen species in TCDD-induced lipid peroxidation.

Inhibitory effect of sodium arsenite and azide on asialoglycoprotein receptor mediated endocytosis in suspended rat hepatocytes.

The kinetics of calcium influx into rat liver slices.

The in vitro metabolism of Eulan WA New by liver homogenates from freshwater fish.

The effect of some hepatotoxins on the sulphoxidation of cimetidine in rat.

Amitrole: strain differences in morphological response of the liver following subchronic administration to mice.

Assessment of pentachlorophenol toxicity in newborn calves: clinicopathology and tissue residues.

Lack of hepatotoxicity after long-term administration of cyanamide in rats: a histological and biochemical study.

[Food stimulation of the detoxifying system of the liver in preventing pesticide poisonings].

Cyanamide, ethanol, and liver cell inclusion bodies.

Formation, toxicity and inactivation of acrolein during biotransformation of cyclophosphamide as studied in freshly isolated cells from rat liver and kidney.

Acute and subchronic toxicity of 2,4-dichlorophenol in CD-1 mice.

The genotoxicity of 2-bromoacrolein and 2,3-dibromopropanal.

Lipid peroxidation in human paraquat poisoning.

Enhanced peroxisomal beta-oxidation of fatty acids and glutathione metabolism in rats exposed to phenoxyacetic acids.

Hemoperfusion-hemodialysis ineffective for paraquat removal in life-threatening poisoning?

Light and electron microscopical changes in the liver of mice following treatment with aminotriazole.

Complete recovery from paraquat poisoning causing severe unilateral pulmonary lesion.

Extraction and quantification of paraquat in liver and hemolyzed blood.

A critical review of the literature on acrolein toxicity.

Toxicokinetics of the herbicide dichlorprop and its leucinate and their action on liver mixed function oxidase in rats.

[Kinetic micromethod for determining acetylcholinesterase].

Major role of hepatic sulfotransferase activity in the metabolic activation, DNA adduct formation, and carcinogenicity of 1'-hydroxy-2',3'-dehydroestragole in infant male C57BL/6J x C3H/HeJ F1 mice.

Oxidant stress and hepatic necrosis in rats treated with diquat.

Disulfiram-induced hepatitis. Report of two cases and review of the literature.

Inhibition by 3-amino-1H-1,2,4-triazole of hepatic tumorigenesis induced by diethylstilbestrol alone or combined with N-nitrosobutylurea in WF rats.

The initiation of gamma-glutamyltranspeptidase positive foci in the rat liver by N-hydroxy-2-acetylaminofluorene. The effect of the sulfation inhibitor pentachlorophenol.

The role of pentachlorophenol in causing mitochondrial derangement in hexachlorobenzene induced experimental porphyria.

Protective effects of trifluralin on benzo(a)pyrene-induced tumors in A/J mice.

Discrepancy between the different subcellular activities of rat liver catalase and superoxide dismutases in response to acute ethanol administration.

Sulfoxide reduction catalyzed by guinea pig liver aldehyde oxidase in combination with one-electron reducing flavoenzymes.

Purification and partial characterization of the glutathione S-transferases in carp liver, and their interaction with 2,4-dichlorophenoxyacetic acid and 1,4-benzoquinone.

Metabolism of pentachlorophenol to tetrachlorohydroquinone by human liver homogenate.

Norflurazon--an inhibitor of essential fatty acid desaturation in isolated liver cells.

3-Substituted 2-halopropenals: mutagenicity, detoxification and formation from 3-substituted 2,3-dihalopropanal promutagens.

The roles of the hepatocellular redox state and the hepatic acetaldehyde concentration in determining the ethanol elimination rate in fasted rats.

Effect of sulfotransferase inhibitors on the 2-acetylaminofluorene-mediated lowering of rat liver N-hydroxy-2-acetylaminofluorene sulfotransferase activity.

Demonstration of H₂O₂ production in vivo during aminopyrine metabolism and phenobarbital induction.

Incorporation of the 1-pro-R and 1-pro-S hydrogen atoms of ethanol in the reduction of acids in the liver of intact rats and in isolated hepatocytes.

Sensitivity of oligomycin-inhibited respiration of isolated rat liver mitochondria to perfluidone, a fluorinated arylalkylsulfonamide.

Study of inorganic arsenic methylation by rat liver in vitro: relevance for the interpretation of observations in man.

Metabolic activation of 2-methylfuran by rat microsomal systems.

A comparative study of the inhibition of hepatic aldehyde dehydrogenases in the rat by methyltetrazaolethiol, calcium carbimide, and disulfiram.

Enzymatic requirement for cyanamide inactivation of rat liver aldehyde dehydrogenase.

Induction of rat hepatic drug metabolizing enzymes by substituted urea herbicides.

Mechanism of allyl alcohol toxicity and protective effects of low-molecular-weight thiols studied with isolated rat hepatocytes.

Formation of pentachlorophenol glucuronide in rat and human liver microsomes.

Long-term effects of dinoseb and paraquat, both individually and combined, on embryonic development and hatching success of *Fasciola hepatica* miracidia.

Metabolism and excretion of orally administered arsenic trioxide in the hamster.

Endogenous defenses against the cytotoxicity of hydrogen peroxide in cultured rat hepatocytes.

Effects of high hepatic acetaldehyde level following simultaneous administration of ethanol and cyanamide on liver function in rats.

Use of cyanamide to determine localization of acetaldehyde metabolism in rat liver.

Studies on the mechanism of sheep liver cytosolic aldehyde dehydrogenase.

Covalent binding of acetaldehyde to hepatic proteins during ethanol oxidation.

Aldehyde dehydrogenase activity as the rate-limiting factor for acetaldehyde metabolism in rat liver.

Effects of paraquat on the mitochondrial structure and Ca-ATPase activity in rat hepatocytes.

Hepatic glutathione S-transferases in rainbow trout and their interaction with 2,4-dichlorophenoxyacetic acid and 1,4-benzoquinone.

The effects of pentachlorophenol, phenol and other pollutants on the liver of carp (*Cyprinus carpio* L.).

Modulation of rat hepatic microsomal testosterone hydroxylases by 2,3,7,8-tetrachlorodibenzo-p-dioxin and related toxic isostereomers.

Effect of hepatic failure toxins on liver thymidine kinase activity and ornithine decarboxylase activity after massive necrosis with acetaminophen in the rat.

[Effect of phenobarbital on the kinetics of the change in the level of paramagnetic metalloprotein complexes in dinitrophenol poisoning].

Hepatotoxicity due to allyl alcohol in deer mice depends on alcohol dehydrogenase.

Voltammetric measurements of the kinetics of enzymatic reduction of 2,6-dichlorophenolindophenol in normal and neoplastic hepatocytes using glucose as substrate.

Autoregulation plus upstream positive and negative control regions associated with transcriptional activation of the mouse P1(450) gene.

Comparison of the mouse P(1)450 gene and flanking sequences from a MOPC 41 plasmacytoma and normal liver.

Commentary on 2,3,7,8-tetrachlorodibenzo-para-dioxin (TCDD).

Efficient clearance of non-transferrin-bound iron by rat liver. Implications for hepatic iron loading in iron overload states.

Polychlorinated dibenzofurans (PCDFs): correlation between in vivo and in vitro structure-activity relationships.

[Blood chemiluminescence in the diagnosis of acute inflammatory diseases of the abdominal organs].

ATP depletion and loss of cell integrity in anoxic hepatocytes and silica-treated P388D1 macrophages.

Carrier-mediated choline uptake by Krebs II ascites cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and 2,3,7,8-tetrachlorodibenzofuran (TCDF) in pregnant C57BL/6N mice: distribution to the embryo and excretion.

Hypophagia-induced weight loss in mice, rats, and guinea pigs treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Comparison of aryl hydrocarbon hydroxylase and acetanilide 4-hydroxylase induction by polycyclic aromatic compounds in human and mouse cell lines.

Hepatotoxic doses of dioxin do not damage mouse bone marrow chromosomes.

alpha-1-Antitrypsin metabolism in the protein-deficient weanling rat.

Delayed wasting syndrome and alterations of liver gluconeogenic enzymes in rats exposed to the TCDD congener 3,3', 4,4'-tetrachloroazoxybenzene.

Chloracne, "the hallmark of dioxin intoxication".

Superinduction of cytochrome P1-450 gene transcription by inhibition of protein synthesis in wild type and variant mouse hepatoma cells.

Comparative hepatic response to bromobenzene and allyl alcohol in the vitamin D-replete and vitamin D-depleted rat.

Effects of PCBs and related compounds on hepatocarcinogenesis in rats and mice.

The teratogenic, embryotoxic, and prenatal mutagenic effect of 3-methyl-4-nitrophenol in the mouse.

Enzyme immunoassay for detection of total and IgM-specific antibodies to hepatitis A virus and its clinical application.

Dose-related effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C57BL/6J and DBA/2J mice.

Control of cytochrome P1-450 gene expression by dioxin.

Ammonium inhibition of fatty acid oxidation in rat liver mitochondria. A possible cause of fatty liver in Reye's syndrome and urea cycle defects.

[Dependence of the nature of the action of metabolic inhibitors on ribosomal RNA synthesis in Ehrlich ascites carcinoma cells on cell integrity].

Gas chromatographic profiling of phenolic acids in urine of patients with cirrhosis of the liver.

Mutations affecting the regulation of transcription of the cytochrome P1-450 gene in the mouse Hepa-1 cell line.

A study of the mutagenic effect of 3-methyl-4-nitrophenol on the somatic cells of the mouse.

Inducing potency of aryl hydrocarbon hydroxylase activity in human lymphoblastoid cells and mice by polychlorinated dibenzofuran congeners.

Immunoradiometric assay to measure the in vitro penetration of sporozoites of malaria parasites into hepatoma cells.

Dietary selenium, glutathione peroxidase activity, and toxicity of 2,3,7,8-tetrachloro-dibenzo-p-dioxin.

The effect of various aldehydes on the respiration of rat liver and hepatoma AH-130 cells.

[Determination of free serum phenol by gas-liquid chromatography in hemosorption].

Further studies on the activation of glucocerebrosidase by a heat-stable factor from Gaucher spleen.

The role of receptors in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) toxicity.

Analysis of Ah gene locus by somatic cell hybridization: expression of Ah regulatory gene product for 2,3,7,8-tetrachlorodibenzo-p-dioxin in mouse L-cell x mouse hepatoma cell hybrids.

Ability of several hexachlorobenzene metabolites to induce porphyrin accumulation in chick embryo liver "in ovo".

Purification of gamma-glutamyltransferases by immunoaffinity chromatography and some properties of the enzymes.

Structural properties of the methionine-containing subfraction of rat liver histone H1.

Mechanism of the stimulation of respiration by fatty acids in rat liver.

Comparison of in vivo and in vitro methods for assessing the effects of phenobarbital on the hepatic drug-metabolizing enzyme system.

Comparison of in vivo and in vitro methods for assessing effects of allyl alcohol on the liver.

Inhibition of mitochondrial aldehyde dehydrogenase and acetaldehyde oxidation by the glutathione-depleting agents diethylmaleate and phorone.

NTP Toxicology and Carcinogenesis Studies of Dimethyl Hydrogen Phosphite (CAS No. 868-85-9) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Hepatic metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the rat and guinea pig.

Developmental and tissue-specific differential regulation of the mouse dioxin-inducible P1-450 and P3-450 genes.

Role of membranes and energy-producing reactions in cellular processing of insulin in primary cultures of rat hepatocytes.

Studies on the effects of copper deficiency on rat liver mitochondria. II. Effects on oxidative phosphorylation.

Complete amino acid sequence of steer liver microsomal NADH-cytochrome b5 reductase.

NTP Toxicology and Carcinogenesis Studies of 1,2-Dichlorobenzene (o-Dichlorobenzene) (CAS No. 95-50-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Effect of thyroid hormones on liver microsomal enzyme induction in rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Interactions of indoles with specific binding sites for 2,3,7,8-tetrachlorodibenzo-p-dioxin in rat liver.

Acute myelotoxic responses in mice exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Subacute physiological effects of bleached kraft mill effluent (BKME) on the liver of trout, *Salmo gairdneri*.

Amino acid sequence of the intracellular cysteine proteinase inhibitor cystatin B from human liver.

Structural relationships among class I isozymes of human liver alcohol dehydrogenase.

Redox-dependent activation of 5'-nucleotidase in rat liver plasma membranes.

Immobilization of chicken liver fructose 1,6-bisphosphatase on CNBr-activated Sepharose.

Purification and characterization of human lipoprotein lipase and hepatic triglyceride lipase. Reactivity with monoclonal antibodies to hepatic triglyceride lipase.

Effect of seminal plasma antioxidant on lipid peroxidation in spermatozoa, mitochondria and microsomes.

Genotoxicity of heterocyclic amines in the Salmonella/hepatocyte system.

Influence of extracellular phosphate concentrations on the regulation of hepatic glucose output.

Aryl hydrocarbon hydroxylase induction in adult rat hepatocytes in primary culture by several chlorinated aromatic hydrocarbons including 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effect of tricyclic drugs on mitochondrial membrane.

Effects of guanethidine on electron transport and proton movements in rat heart, brain and liver mitochondria.

Novel ATP-dependent calcium transport component from rat liver plasma membranes. The transporter and the previously reported (Ca²⁺-Mg²⁺)-ATPase are different proteins.

Properties and biochemical characterization of NADH 5 alpha-reductase from rat liver microsomes.

Elevation of hepatic microsomal epoxide hydrolase activity by 2-acetylaminofluorene: role of metabolism.

N-sulfoxy-2-aminofluorene is the major ultimate electrophilic and carcinogenic metabolite of N-hydroxy-2-acetylaminofluorene in the livers of infant male C57BL/6J x C3H/HeJ F1 (B6C3F1) mice.

Effect of triiodothyronine on alcohol dehydrogenase and aldehyde dehydrogenase activities in rat liver. Implications for the control of ethanol metabolism.

Inducible aldehyde dehydrogenases from rat liver cytosol.

Chemical modification of methionine residues of the phosphatidylcholine transfer protein from bovine liver. A spin-label study.

Inhibition of purified rat liver glutathione S-transferase isozymes by diuretic drugs.

Release of carnitine from the perfused rat liver.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the uptake, distribution and excretion of a single oral dose of [11,12-³H]retinyl acetate and on the vitamin A status in the rat.

Fasciola hepatica: motility response to metabolic inhibitors in vitro.

The metabolic fate of pargyline in rat liver microsomes.

The primary structure of rat liver cellular retinol-binding protein.

Continued depression of hepatic uroporphyrinogen decarboxylase activity caused by hexachlorobenzene or 2,3,7,8-tetrachlorodibenzo-p-dioxin despite regeneration after partial hepatectomy.

Role of glutathione and hepatic glutathione S-transferase in the biliary excretion of methyl mercury, cadmium and zinc: a study with enzyme inducers and glutathione depletors.

Urinary D-glucaric acid excretion in the Seveso area, polluted by tetrachloro-dibenzo-p-dioxin (TCDD): five years of experience.

Conversion of 5-aminolaevulinate into haem by homogenates of human liver. Comparison with rat and chick-embryo liver homogenates.

Carcinogenicity of diallylnitrosamine following intragastric administration to Syrian hamsters.

Monoxygenase induction by various xenobiotics and its influence on the rat liver microsomal metabolite profile of benz[a]anthracene.

The modulation by arylamines of the in vitro formation of superoxide anion radicals and hydrogen peroxide by rat liver microsomes.

The mechanism of pantothenate transport by rat liver parenchymal cells in primary culture.

Disposition of [14C]methyl bromide in rats after inhalation.

Regulation of aromatic oxidation of estradiol-17 beta in maternal hepatic, fetal hepatic and placental tissues: comparative effects of a series of inducing agents.

A comparison of physiological changes in carp, *Cyprinus carpio*, induced by several pollutants at sublethal concentrations. I. The dependency on exposure time.

In vivo and in vitro metabolism of 2,4-dinitrotoluene in strain A mice.

Polychlorinated aromatic hydrocarbon lethality, mixed-function oxidase induction, and uroporphyrinogen decarboxylase inhibition in the chick embryo: dissociation of dose-response relationships.

Maintenance of prolactin (PRL) binding sites in rat liver cells in suspension culture: effect of PRL and of inhibitors of various cellular functions.

Microsomal cytochrome P-450 "handprints": five fractions from anion-exchange high-pressure liquid chromatography provide a rapid preliminary screen for selectivity in the induction and destruction of rat hepatic cytochrome P-450 subpopulations.

Toxicity of 3,4,5,3',4',5'-hexabrominated biphenyl and 3,4,3',4'-tetrabrominated biphenyl.

Potentiated hepatotoxicity from concurrent administration of acetaminophen and allyl alcohol to rats.

Influence of phenobarbital and TCDD on the hepatic metabolism of TCDD in the dog.

Characteristics of the formation and membrane transport of 7-hydroxymethotrexate in freshly isolated rabbit hepatocytes.

[Effects of clofibrate on allyl alcohol poisoning in the rat].

TCDD (2,3,7,8-tetrachlorodibenzo-p-dioxin) causes increases in protein kinases particularly protein kinase C in the hepatic plasma membrane of the rat and the guinea pig.

Induction of methotrexate release from rat hepatocytes in suspension by alpha-adrenergic agents: involvement of calcium and metabolic energy.

Amino acid sequence of human liver cathepsin B.

Additional routes in the metabolism of phenacetin.

Variations among untreated rabbits in benzo(a)pyrene metabolism and its modulation by 7,8-benzoflavone.

Studies on the primary structure of rat liver phenylalanine hydroxylase.

Mitochondrial and extramitochondrial Ca²⁺ pools in the perfused rat liver. Mitochondria are not the origin of calcium mobilized by vasopressin.

Recycling of the asialoglycoprotein receptor in isolated rat hepatocytes. ATP depletion blocks receptor recycling but not a single round of endocytosis.

Effect of various agents and conditions on palmitate oxidation by homogenates of rat liver and rat and human skeletal muscle.

Sex-influenced CP1B-induction of peroxisomes in rat liver and kidney tissues.

Isolation and characterization of rat liver cytosolic aldehyde dehydrogenases induced by phenanthrene or benzo[a]pyrene.

Determination of acute toxic effects in mice following exposure to methyl bromide.

Ammonia, octanoate and a mercaptan depress regeneration of normal rat liver after partial hepatectomy.

Formation of glutathione conjugates by reactive metabolites of vinylidene chloride in microsomes and isolated hepatocytes.

Aminopyrine breath test and zonal hepatic damage in rats.

The stability of mutagenic chemicals stored in solution.

Separation of histones by reverse-phase high-performance liquid chromatography: analysis of the binding of carcinogens to histones.

Influence of pyrazolones on hepatic glutathione in rats.

Alcohol dehydrogenase: a new sensitive marker of hepatic centrilobular damage.

Rat liver microsomal NADPH-dependent release of iron from ferritin and lipid peroxidation.

The protective effect of pollen extracts against allyl alcohol damage of the liver.

A metabolite of riboflavin binds to the 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) receptor.

Carbohydrate, protein and glycoprotein metabolism by the guinea-pig liver in chronic metribuzin poisoning.

A carrier-mediated transport system for benzylpenicillin in isolated hepatocytes.

Lamprey fibrinogen gamma chain: cloning, cDNA sequencing, and general characterization.

Incorporation of C14-thymidine and C14-uridine nucleosides into nucleic acid molecules in the liver of mice exposed to trivalent arsenic in drinking water.

Chronic toxicity, reproductive, and teratogenic studies of hexazinone.

Effect of herbicide 2,4,5-trichlorophenoxyethanol (TCPE) containing dioxin on mutation and induction of sister chromatid exchanges.

Potential of 2,4-dichlorophenoxyacetic acid conjugates as promutagens in the Salmonella/microsome mutagenicity test.

Effect of pentachlorophenol on hepatic glycogen metabolism in rats.

The protection from hepatotoxicity of some compounds by the synthetic immunomodulator muramyl dipeptide (MDP) in rat hepatocytes and in vivo.

Effect of dimethylthiourea on paraquat toxicity in rats.

Induction of sister chromatid exchanges by the peroxisome proliferators 2,4-D, MCPA, and clofibrate in vivo and in vitro.

Activation mechanism of tris(2,3-dibromopropyl)phosphate to the potent mutagen, 2-bromoacrolein.

Human health effects of 2,4,5-T and its toxic contaminants.

Differential activation and inhibition of different forms of rat liver glutathione S-transferase by the herbicides 2,4-dichlorophenoxyacetate (2,4-D) and 2,4,5-trichlorophenoxyacetate (2,4,5-T).

[Liver function in alcoholic patients treated with cyanamide].

Acute toxic effects of paraquat on ultrastructure of rat liver.

Collagen stimulating factors from lung in experimental paraquat poisoning demonstrated in vitro and in vivo.

Agent Orange study is like a chameleon.

The effectiveness of N-acetylcysteine in isolated hepatocytes, against the toxicity of paracetamol, acrolein, and paraquat.

Structural hepatic changes associated with cyanamide treatment: cholangiolar proliferation, fibrosis and cirrhosis.

Ascorbic acid potentiates the substrate-specific inhibition of mixed-function oxidation and the stimulation of NADPH oxidation caused by paraquat.

The acute effects of single and repeated injections of acrolein and other aldehydes.

Toxicity studies in isolated hepatocytes from selenium-deficient rats and vitamin E-deficient rats.

Normothermic whole body rinse-out utilizing perfluorochemical(PFC)-containing artificial blood.

Acute diquat intoxication. Interest of its repeated determination in urine and the evaluation of renal proximal tubule integrity.

Biochemical study of pentachlorophenol workers.

Hepatic macromolecular covalent binding of the hepatocarcinogen 2,6-dinitrotoluene and its 2,4-isomer in vivo: modulation by the sulfotransferase inhibitors pentachlorophenol and 2,6-dichloro-4-nitrophenol.

Lipid metabolism in rabbits exposed to paraquat aerosol.

Cyanamide-induced liver cell injury. Experimental study in the rat.

Peroxisomal beta-oxidation from endogenous substrates. Demonstration through H₂O₂ production in the unanaesthetized mouse.

Quantitative liver functions after administration of allyl alcohol to rats.

Properties of the lysosomes from liver and gill of rainbow trout, *Salmo gairdnerii* R.: effect of starvation, salinity and 2,4,5-T.

Hepatic macromolecular covalent binding of mononitrotoluenes in Fischer-344 rats.

Association of the liver peroxisomal fatty acyl-CoA beta-oxidation system with the synthesis of bile acids.

A redox cycling mechanism of action for 2,3-dichloro-1,4-naphthoquinone with mitochondrial membranes and the role of sulfhydryl groups.

³²P-post-labelling analysis of DNA adducts formed in the livers of animals treated with safrole, estragole and other naturally-occurring alkenylbenzenes. I. Adult female CD-1 mice.

Transmembrane potential of liver mitochondria from hexachlorobenzene-and iron-treated rats.

On the role of peroxisomes in the metabolism of lipids--evidence from studies on mammalian tissues in vivo.

Detection and occurrence of pentachlorophenol residues in chicken liver and fat.

Effects of metals and organic compounds on hepatic glutathione, cysteine, and acid-soluble thiol levels in mullet (*Mugil cephalus* L.).

Modulation of genotoxic and cytotoxic effects of aromatic amines in monolayers of rat hepatocytes.

Metabolism and binding of cyclophosphamide and its metabolite acrolein to rat hepatic microsomal cytochrome P-450.

[In vitro conjugation of allyl alcohol and of its metabolites with reduced glutathione].

Organ and cellular distribution of inhaled metallic mercury in the rat and Marmoset monkey (*Callithrix jacchus*): influence of ethyl alcohol pretreatment.

The metabolic activation of cyanamide to an inhibitor of aldehyde dehydrogenase is catalyzed by catalase.

Effect of acetaldehyde and cyanamide on the metabolism of formaldehyde by hepatocytes, mitochondria, and soluble supernatant from rat liver.

[Biotransformation of monolinuron (N-(4-chlorophenyl)-N'-methyl-N'methoxyurea) in isolated perfused chicken liver].

Autoradiographic and biochemical studies of drug distribution in the liver. III. [¹⁴C]Aminotriazole.

Effect of glutathione levels, sulfate levels, and metabolic inhibitors on covalent binding of 2-amino-3-methylimidazo[4,5-f]quinoline and 2-acetylaminofluorene to cell macromolecules in primary monolayer cultures of adult rat hepatocytes.

Selective inactivation of rat lung and liver microsomal NADPH-cytochrome c reductase by acrolein.

Decrease in calcium carbimide (calcium cyanamide)-induced inhibition of rat hepatic aldehyde dehydrogenases by multiple ethanol administration.

N-acetylcyanamide, the major urinary metabolite of cyanamide in rat, rabbit, dog, and man.

Metabolism of the carbamate herbicide, asulam, in the rat.

Effects of 2,4-dichlorophenoxyacetic acid and 2,4,5-trichlorophenoxyacetic acid on peroxisomal enzymes in rat liver.

Effect of di(2-ethylhexyl) phthalate on DNA repair and lipid peroxidation in rat hepatocytes and on metabolic cooperation in Chinese hamster V-79 cells.

Biliary excretion of glutathione and glutathione disulfide in the rat. Regulation and response to oxidative stress.

Chlorinated compounds in tissues of chickens raised on pentachlorophenol-contaminated litter.

Induction of ornithine decarboxylase and augmentation of tyrosine aminotransferase activity by N-hydroxy-2-acetylaminofluorene and 2-acetylaminofluorene in rat liver. Influence of sex, retinylacetate, indomethacin, and pentachlorophenol.

In vivo effects of 3-methylcholanthrene, phenobarbital, pyrethrum and 2,4,5-T isooctylester on liver, lung and kidney microsomal mixed-function oxidase system of guinea-pig: a comparative study.

Hepatic angiosarcoma and bronchioloalveolar carcinoma induced by Fowler's solution.

Regulation of mouse cytochrome P3-450 by the Ah receptor. Studies with a P3-450 cDNA clone.

A novel human myelomonocytoid cell line, P39/Tsugane, derived from overt leukemia following myelodysplastic syndrome.

[Inhibitor interaction in the suppression of ribosomal RNA synthesis in Ehrlich ascites carcinoma cells].

3'-Monoiodothyronine degradation in rat liver homogenate: enzyme characteristics and documentation of deiodination by high-pressure liquid chromatography.

Cellular pathways of galactose-terminal ligand movement in a cloned human hepatoma cell line.

Biochemical and genetic analysis of variant mouse hepatoma cells which overtranscribe the cytochrome P1-450 gene in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Increase of sensitivity and uptake of vinblastine by reserpine in rat ascites hepatoma.

An isozyme-specific selective system for the recovery of mammalian cells deficient in hepatic alcohol dehydrogenase activity.

Immunosuppression in weanling and adult Sprague-Dawley rats induced by acute exposure to 3,3',4,4'-tetrachloroazoxybenzene.

The influence of liver disease on the methylation of arsenite in humans.

Flow cytometric analysis of proflavine uptake into normal rat hepatocytes and cells arising during AAF-induced hepatocarcinogenesis.

Isolation and characterization of revertants from four different classes of aryl hydrocarbon hydroxylase-deficient hepa-1 mutants.

Haemochromatosis following prolonged oral iron ingestion.

Polychlorinated dibenzofurans (PCDFs): effects of structure on binding to the 2,3,7,8-TCDD cytosolic receptor protein, AHH induction and toxicity.

Autoradiographic and biochemical studies of drug distribution in the liver. I. [14C]Dehydrocorydaline.

[Relation between glutathione and cytoplasmic protein sulfhydryl groups in the rat: a rapid procedure for analytical determination].

Incomplete correlation of 2,3,7,8-tetrachlorodibenzo-p-dioxin hepatotoxicity with Ah phenotype in mice.

Modulation of azaserine-induced pancreatic foci by phenolic antioxidants in rats.

Role of the cellular oxidation-reduction state in methotrexate binding to dihydrofolate reductase and dissociation induced by reduced folates.

Regulation of cytochrome P1-450 gene transcription by 2,3,7, 8-tetrachlorodibenzo-p-dioxin in wild type and variant mouse hepatoma cells.

Effects of 2,4-dinitrophenol and other metabolic inhibitors on the thermograms of Ehrlich ascites carcinoma cells registered with a microcalorimeter.

[Inhibitory analysis of the functions of the oxidative metabolic systems of tumor cells in tissue culture].

[Kinetics of the change in the level of metalloproteins and free radicals in the liver of rats with acute poisoning by alkyl derivatives of 2, 4-dinitrophenol].

Induction and decay of amino acid transport in the liver. Turnover of transport activity in isolated hepatocytes after stimulation by diabetes or glucagon.

Visual evoked potentials in a rabbit model of hepatic encephalopathy. II. Comparison of hyperammonemic encephalopathy, postictal coma, and coma induced by synergistic neurotoxins.

Interactions between 7-hydroxymethotrexate and methotrexate at the cellular level in the Ehrlich ascites tumor in vitro.

Comparison between the effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and six other compounds on the vitamin A storage, the UDP-glucuronosyltransferase and the aryl hydrocarbon hydroxylase activity in the rat liver.

Characteristics of adenine nucleotide fluxes and transport in human tumor mitochondria.

Effect of phenoxy acids on rat liver regeneration.

2,3,7,8-Tetrachlorodibenzo-p-dioxin receptors in wild type and variant mouse hepatoma cells. Nuclear location and strength of nuclear binding.

Structural and functional properties of rat liver mitochondria in hexachlorobenzene induced experimental porphyria.

Experimental study on embryogenesis of congenital diaphragmatic hernia.

Calcium modifies the accumulation and retention of daunorubicin by Ehrlich ascites carcinoma.

Decarboxylation of uroporphyrinogen I and III in 2,3,7,8-tetrachlorodibenzo-p-dioxin induced porphyria in mice.

Hepatotoxicological evaluation of dantrolene sodium.

Development of chronic hepatic porphyria (porphyria cutanea tarda) with inherited uroporphyrinogen decarboxylase deficiency under exposure to dioxin.

Oral iron therapy in human subjects, comparative absorption between ferrous salts and iron polymaltose.

On the absorption of divalent and trivalent iron in living rats.

Toxicologic, pathologic, and immunotoxic effects of 2,4-dichlorophenol in rats.

Prostanoids and cell injury.

Transplantation studies on induced and spontaneous nodules from B6C3F1 mouse liver.

Teratogenicity of 2,3,7,8-tetrachlorodibenzofuran in the mouse.

Potency of carcinogens derived from covalent DNA binding and stimulation of DNA synthesis in rat liver.

Combined use of a water-insoluble chemical delivery system and a metabolic activation system in whole embryo culture.

[Experimental porphyria induced by chlorinated hydrocarbons. Studies of porphyrinogen carboxy-lyase in the experimental model of human cutaneous delayed porphyria].

Water movement from intracristal spaces in isolated liver mitochondria.

Release of ferrous iron from ferritin by liver microsomes: a possible role in the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Triiodothyronine production by isolated rat hepatocytes: characterization and lack of gluco regulatory hormone effects.

Effects of in vivo-administered 2,3,7,8-tetrachlorodibenzo-p-dioxin on receptor binding of epidermal growth factor in the hepatic plasma membrane of rat, guinea pig, mouse, and hamster.

Some properties of the thiamine uptake system in isolated rat hepatocytes.

Sequence comparison of rat liver phenylalanine hydroxylase and its cDNA clones.

Characteristics of an extraction and purification procedure for chlorinated dibenzo-p-dioxins and dibenzofurans in soil and liver.

Cathepsins J and K: high molecular weight cysteine proteinases from human tissues.

Replacing the Mixed Function Oxidase N-Demethylation by Hydrogen Peroxide and either Hemoglobin or Ferrous Sulfate.

Enzymatic sulfation of steroids--XX. Effects of ten drugs on the hepatic glucocorticoid sulfotransferase activity of rats in vitro and in vivo.

Hepatic antioxidant-sensitive respiration. Effect of ethanol, iron and mitochondrial uncoupling.

Effects of mitomycin C on metabolism in a rat liver preparation.

Interaction of prolactin (PRL) binding sites with PRL receptor antibodies in rat liver cells in suspension culture: effect of inhibitors of cellular functions.

Short-chain fatty acid fermentation products of plant fiber affect glucose metabolism of isolated rat hepatocytes.

Rat liver aldehyde dehydrogenase. II. Isolation and characterization of four inducible isozymes.

Species-specific irreversible inhibition of *Neisseria gonorrhoeae* dihydrofolate reductase by a substituted 2,4-diamino-5-benzylpyrimidine.

Cyclophosphamide resistance developed in a human melanoma cell line.

Blood glutathione as a measure of exposure to toxic compounds.

Difference in hepatic uptake kinetics of aspirin and salicylamide in rats.

Inhibition of the oxidation of acetaldehyde and formaldehyde by hepatocytes and mitochondria by crotonaldehyde.

Production of chemotactic activity for polymorphonuclear leukocytes by cultured rat hepatocytes exposed to ethanol.

Ah receptor in primate liver: binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin and carcinogenic aromatic hydrocarbons.

Structural characterization of the isoforms of neonatal and adult rat liver metallothionein.

Altered levels of a 5 S gene-specific transcription factor (TFIIIA) during oogenesis and embryonic development of *Xenopus laevis*.

Multiple phosphorylation of rat-liver glycogen synthase by protein kinases.

Linear organization of the liver cell adhesion molecule L-CAM.

Trypan blue uptake as a new method to investigate hepatotoxicity in periportal and pericentral regions of the liver lobule: studies with allyl alcohol in the perfused liver.

Uptake and metabolism of thyroid hormones by the rat foetus in early pregnancy.

Alteration of rat hepatic plasma membrane functions by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Carcinogen-binding proteins. High-affinity binding sites for benzo[a]pyrene in mouse liver distinct from the Ah receptor.

Human liver mitochondrial aldehyde dehydrogenase: a C-terminal segment positions and defines the structure corresponding to the one reported to differ in the Oriental enzyme variant.

Amino acid sequence of NADH-cytochrome b5 reductase of human erythrocytes.

Serum gamma glutamyl transferase as a specific indicator of bile duct lesions in the rat liver.

Evaluation of the genotoxicity of cresols using sister-chromatid exchange (SCE).

Effects of allyl alcohol and bromobenzene on trimethadione metabolism in the rat.

Phosphorylation of glycogen synthase in isolated rabbit hepatocytes.

The genotoxicity of aromatic amines in primary hepatocytes isolated from C57BL/6 and DBA/2 mice.

Relationships between the flux of lipid metabolism in vivo and the uncoupling of respiratory control.

Depression of glucuronyltransferase activity by glucocorticoids in adult female mice.

PCBs and PBBs: biologic and toxic effects on C57BL/6J and DBA/2J inbred mice.

Effects of H₂ receptor antagonists on the hepatotoxicity of various chemicals.

Biogenesis of the mitochondrial enzyme methylmalonyl-CoA mutase. Synthesis and processing of a precursor in a cell-free system and in cultured cells.

Hormonal effects on the phosphorylation of glycogen synthase in rat hepatocytes.

Aldehyde dehydrogenase from human liver. Primary structure of the cytoplasmic isoenzyme.

[Effect of hepatotoxic industrial substances on contact interactions of rat hepatocytes].

In vitro binding of acetic acid and its chlorinated derivatives by the soluble glutathione S-transferases from rat liver.

Processing of human growth hormone by rat hepatocytes in monolayer culture.

A polypeptide containing 55 amino acid residues coded by the pre-S region of hepatitis B virus deoxyribonucleic acid bears the receptor for polymerized human as well as chimpanzee albumins.

Effect of ammonia on amino acid uptake by brain microvessels.

Conservation in rat liver of light and heavy subunit sequences of mammalian ferritin. Presence of unique octopeptide in the light subunit.

Purification of a beta-D-galactosidase from bovine liver by affinity chromatography.

Influence of aging on the susceptibility of rats to hepatotoxic injury.

Characterization of uptake of steroid glucuronides into isolated male and female rat hepatocytes.

Characteristics of taurine transport in rat hepatocytes in primary culture.

Colorimetric assay for monoamine oxidase in tissues using peroxidase and 2,2'-azinodi(3-ethylbenzthiazoline-6-sulfonic acid) as chromogen.

Binding of benzo(a)pyrene and dibenz(a,h)anthracene to the Ah receptor in mouse and rat hepatic cytosols.

Induction of rat hepatic long-chain acyl-CoA hydrolases by various peroxisome proliferators.

Examination and rapid analysis of hepatic cytosolic receptors for 2,3,7,8-tetrachlorodibenzo-p-dioxin using gel-permeation high performance liquid chromatography.

Biosynthesis and compartmentalization of rat-intestinal vitamin-D-dependent calcium-binding protein.

Averufin, an anthraquinone mycotoxin possessing a potent uncoupling effect on mitochondrial respiration.

Isosafrole-induced cytochrome P2-450 in DBA/2N mouse liver. Characterization and genetic control of induction.

Elevated binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3-methylcholanthrene to the Ah receptor in hepatic cytosols from phenobarbital-treated rats and mice.

Effect of injected glucagon or fatty acids on mitochondrial ATPase.

Rhodamine 123 inhibits bioenergetic function in isolated rat liver mitochondria.

In vitro inhibitory effect on porphyrinogen carboxylase of liver extracts from TCDD treated mice.

Different susceptibility of mouse tissues to porphyrogenic effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

TCDD (2,3,7,8-tetrachlorodibenzo-p-dioxin) causes reduction in the low density lipoprotein (LDL) receptor activities in the hepatic plasma membrane of the guinea pig and rat.

The covalent structure of hepatic microsomal epoxide hydrolase. I. Isolation and characterization of the cyanogen bromide fragments.

Ontogeny of the cytosolic receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in rat liver, lung, and thymus.

The primary structure of rat liver ribosomal protein L39.

Correlation between the redox state of NAD(P)H and total flow in the perfused rat liver.

The peroxidatic function of liver microsomal cytochrome P-450: comparison of hydrogen peroxide and NADPH-catalysed N-demethylation reactions.

Interaction of cyclophosphamide with DNA in isolated rat liver cell nuclei.

Differential induction of two 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible forms of cytochrome P-450 in extrahepatic versus hepatic tissues.

Rates of allyl alcohol metabolism in periportal and pericentral regions of the liver lobule.

Hepato-renal cooperation in biotransformation, membrane transport, and elimination of cysteine S-conjugates of xenobiotics.

Cytological changes occurring in the liver of coturnix quail with an acute arsenic exposure.

Effect of aging on liver glutathione levels and hepatocellular injury from carbon tetrachloride, allyl alcohol or galactosamine.

Hepatic microsomal calcium uptake during the perinatal period.

Metabolism of 2,4-dichlorophenol by isolated perfused rat liver.

Observations on the effects of cyclophosphamide, phosphoramidate mustard and some activated oxazaphosphorines on murine L1210 leukemia.

Interaction of bis- and mono-N-nitrosoureas with rat liver chromatin in vitro.

Role of kidney and liver in degradation of circulating submaxillary renin in mice.

The isolation and some properties of dairy cow liver mitochondria.

Effects of auxiliary liver transplantation on oxygen consumption in the graft and recipient's liver mitochondria. Possible inter-liver regulating mechanism.

The in vitro metabolism by homogenates of goldfish (*Carassius auratus*) liver of pentachloro-2-(chloromethyl sulphonamido) diphenyl ether, the major component and active ingredient of the mothproofing agent Eulan WA New.

Release of a common source of intracellular Ca^{2+} by alpha-adrenergic agonists and dinitrophenol in rat liver slices.

Noninvasive assessment of microsomal enzyme activity in occupational medicine: present state of knowledge and future perspectives.

Environmental hazards of interest to the forensic pathologist.

Nitrofen: a review and perspective.

The effect of nitrofen [4-(2,4-dichlorophenoxy)nitrobenzene] on the reproductive performance of male rats.

Fatality due to paraquat intoxication: confirmation by postmortem tissue analysis.

Strong evidence from studies with brachymorphic mice and pentachlorophenol that 1'-sulfoxyafrole is the major ultimate electrophilic and carcinogenic metabolite of 1'-hydroxyafrole in mouse liver.

[Paraquat poisoning treated with simultaneous hemoperfusion and hemodialysis].

Effect of phenolic compounds on in vivo activity of transaminases in certain tissues of the fish, *Notopterus notopterus*.

Maternal hepatic effects of 1,2,4,5-tetrachlorobenzene in the rat.

Hypolipidemia and peroxisome proliferation induced by phenoxyacetic acid herbicides in rats.

The effects on rat pups when nitrofen (4-(2,4-dichlorophenoxy)nitrobenzene) was applied dermally to the dam during organogenesis.

Effects of phenoxyherbicides and glyphosate on the hepatic and intestinal biotransformation activities in the rat.

Cyanamide-induced liver injury. A predictable lesion.

Severe transient idiopathic neutropenia and liver damage in a pony.

[Prognostic factors in acute paraquat poisoning. A retrospective study of cases registered by the Poison Control Center of Paris in 1981].

Modification of chemical toxicity by selenium deficiency.

Evaluation of amitrole (aminotriazole) for potential carcinogenicity in orally dosed rats, mice, and golden hamsters.

Paraquat poisoning: evidence of systemic toxicity after dermal exposure.

Effect of chronic herbicide intoxication on in vivo activities of certain enzymes in the liver of freshwater fish *Nemachelius denisonii* (day).

[Deliberate poisoning with paraquat, death in less than 24 hours].

Physiological changes in carps induced by pollution.

Protection against acute paraquat toxicity by dietary selenium in the chick.

[Experimental studies of certain aspects of the hepatotoxicity of allyl alcohol].

The effects of the herbicide 2,4-dichlorophenyl-p-nitrophenyl ether (DDE) on serum thyroid hormones in adult female mice.

Lipid peroxidation: a possible mechanism of cephaloridine-induced nephrotoxicity.

Postnatal developmental alterations following prenatal exposure to the herbicide 2,4-dichlorophenyl-p-nitrophenyl ether: a dose response evaluation in the mouse.

Changes induced by Gramoxon in tissue phospholipids and phospholipid fatty acids in mouse and guinea-pig.

Hepatitis induced by drugs used as alcohol aversion therapy.

Morphological and biochemical studies on liver, kidney and gill of fishes affected by pesticides.

[Hepatotoxicity of 2,4,5-trichlorophenoxyacetic acid. Cytologic and biochemical study in quail embryos].

Toxicity of fluometuron and diuron on the intermediate snail host (*Lymnaea* spp.) of *Fasciola hepatica*.

[Effect of small amounts of 2,4-dichlorophenoxyacetic acid derivatives on thiamine and riboflavin metabolism in the animal body].

Iron overload of spleen, liver and kidney as a consequence of hemolytic anaemia.

Perinatal hepatocarcinogenesis.

Effects of metyrapone on microsomal-dependent *Salmonella* mutagenesis. Studies with chloroallyl ethers and model compounds.

Plasma glutathione and glutathione disulfide in the rat: regulation and response to oxidative stress.

The major role of glutathione in the metabolism and excretion of N,N-dimethyl-4-aminoazobenzene in the rat.

The relationship between paraquat accumulation and covalent binding in rat lung slices.

Intracellular interaction and metabolic fate of arsenite and arsenate in mice and rabbits.

Effect of 1.1.1 trifluoro-N-(2-methyl-4-phenyl sulfonyl) methane sulfonamide (Destun 50WP) on rat hepatic microsomal enzymes, aniline hydroxylase and amino-pyrene N-demethylase.

Formation of diiodotyrosine from thyroxine. Ether-link cleavage, an alternate pathway of thyroxine metabolism.

Acute toxicity of fluorinated ether anesthetics: role of 2,2,2-trifluoroethanol and other metabolites.

Inhibition of hepatic aldehyde dehydrogenases in the rat by calcium carbimide (calcium cyanamide).

Arsenic uptake and metabolism by liver cells is dependent on arsenic oxidation state.

In vitro release of bound (nonextractable) atrazine residues from corn plants by chicken liver homogenate and bovine rumen liquor.

Effects of monocrotaline and monocrotaline pyrrole on 5-hydroxytryptamine and paraquat uptake by lung slices.

Whole body and liver distribution of inhaled mercury vapor in the mouse: influence of ethanol and aminotriazole pretreatment.

Specificity of hepatic aldehyde dehydrogenase inhibition by calcium carbimide (calcium cyanamide) in the rat.

Relationship between catalase activity and uptake of elemental mercury by rat brain.

Paraquat concentration and renal function in mice fed purified and cereal-based diets.

Metabolic activation of cyanamide to an inhibitor of aldehyde dehydrogenase in vitro.

Investigations into the production of acetate from ethanol by human blood and bone marrow cells in vitro.

A new era of exploitation of microbial metabolites.

Studies on the effect of paraquat on glycogen mobilization in liver of common carp (*Cyprinus carpio* L.).

Competitive binding to the cytosolic 2,3,7,8-tetrachlorodibenzo-p-dioxin receptor. Effects of structure on the affinities of substituted halogenated biphenyls--a QSAR analysis.

Effects of chronic ethanol feeding and acetaldehyde metabolism on calcium transport by rat liver mitochondria.

Decreased liver delta-aminolaevulinate dehydratase activity in porphyria cutanea tarda and in alcoholism.

Short-term inhalation test for evaluating industrial hepatotoxicants in rats.

The acute toxicity of perfluorooctanoic and perfluorodecanoic acids in male rats and effects on tissue fatty acids.

Induction of mRNA specific for cytochrome P1-450 in wild type and variant mouse hepatoma cells.

Effects of cytochrome P1-450 inducers on the cell-surface receptors for epidermal growth factor, phorbol 12,13-dibutyrate, or insulin of cultured mouse hepatoma cells.

[Brain death in secondary brain lesion].

Effect of ATP level and its metabolic turnover in liver on the proteosynthesis postmortem.

The respiration-linked limiting step of tumor cell transition from the non-cycling to the cycling state: its inhibition by oxidizable substrates and its relationships to purine metabolism.

Effects of polychlorinated biphenyl compounds, 2,3,7,8-tetrachlorodibenzo-p-dioxin, phenobarbital and iron on hepatic uroporphyrinogen decarboxylase. Implications for the pathogenesis of porphyria.

Hypothyroxinemia and hypothermia in rats in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin administration.

Relationship between hyperthermia-induced heat-shock proteins and thermotolerance in Morris hepatoma cells.

Quantitative removal of hepatitis B viral antigens from serum by a monoclonal IgM coupled to a biocompatible solid-phase support.

Study of isolated mitochondria incubated with labelled and non-labelled alloxan, with regard to intramitochondrial concentrations of reduced glutathione and inorganic phosphate.

The current use of studies on promoters and cocarcinogens in quantitative risk assessment.

The role of growth of normal and preneoplastic cell populations for tumor promotion in rat liver.

Encephalopathic effect of phenol in rats.

Characterization of NADPH-cytochrome P-450 reductase in a mouse hepatoma cell line.

Biochemical and genetic analysis of variant mouse hepatoma cells defective in the induction of benzo(a)pyrene-metabolizing enzyme activity.

The effect of acute inflammation on iron metabolism in rats.

Effects of halogenated dibenzo-p-dioxins on plasma disappearance and biliary excretion of ouabain in rats.

Evaluation of an enzymic procedure for the measurement of acetaminophen.

Tumorigenic effect of sodium arsenite in rat kidney.

Impairment of blastogenic response of splenic lymphocytes from iron-deficient mice: in vivo repletion.

Purification and properties of human erythrocyte uroporphyrinogen decarboxylase: immunological demonstration of the enzyme defect in porphyria cutanea tarda.

Different sensitivity of Zajdela hepatoma mitochondrial ATPase activity to uncouplers in digitonin-treated cells and isolated mitochondria.

Characterization of messenger RNA specific for carcinoembryonic antigen.

[Pharmacological and clinico-pharmacological studies of a combination preparation for calves having antianemia and general tonic action].

Calcium pools in saponin-permeabilized guinea pig hepatocytes.

The analysis of drug action on mitochondrial oxidative phosphorylation. The choice of organic solvent for water-insoluble drugs.

Nutrition-endocrine interactions: induction of reciprocal changes in the delta 4-5 alpha-reduction of testosterone and the cytochrome P-450-dependent oxidation of estradiol by dietary macronutrients in man.

Interaction of metals and carbon tetrachloride on lipid peroxidation and hepatotoxicity.

The metabolism of the anti-inflammatory drug eterylate in rat, dog and man.

Physicochemical characterization of specific and nonspecific polyaromatic hydrocarbon binders in rat and mouse liver cytosol.

Interactions between xenobiotics that increase or decrease the levels of cytochrome P-450 isozymes in rabbit lung and liver.

Effect of N-ethylmaleimide on leucine transport in the Chang liver cell. II. Effect on the kinetics of Na⁺-independent transport.

Periportal localization of lorazepam glucuronidation in the isolated perfused rat liver.

Effects of propylthiouracil on urinary metabolites of cyclophosphamide in rats.

Synthetic [Asu1,7] eel calcitonin increases phosphorus content in the hepatic mitochondria of rats.

Natural history of TCDD-induced liver lesions in rats as observed by transmission electron microscopy during a 32-week period after a single intraperitoneal injection.

Receptor-mediated ¹²⁵I-labelled insulin degradation in the rat hepatocyte. Studies using chloroquine.

Elimination of artifactual acetaldehyde in the measurement of human blood acetaldehyde by the use of polyethylene glycol and sodium azide: normal blood acetaldehyde levels in the dog and human after ethanol.

Inhibition by secalonic acid D of oxidative phosphorylation and Ca²⁺-induced swelling in mitochondria isolated from rat livers.

Chlorobenzene-impaired lindane metabolism and the effect of pretreatment with chlorobenzene, lindane, or chlorobenzene plus lindane.

The primary structure of rat liver ribosomal protein L37. Homology with yeast and bacterial ribosomal proteins.

End group analysis of the cytosolic and mitochondrial fumarases from rat liver.

Polychlorinated benzene and phenol congeners as inducers of rat hepatic drug-metabolizing enzymes in immature male Wistar rats.

Identification and quantitation of glutathione in hepatic protein mixed disulfides and its relationship to glutathione disulfide.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on [³H]thymidine incorporation into rat liver deoxyribonucleic acid.

Distribution, excretion, and metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57BL/6J, DBA/2J, and B6D2F1/J mice.

Phosphorylating efficiency of isolated rat liver mitochondria respiring under the conditions of steady-State 4.

Ethane release during metabolism of aldehydes and monoamines in perfused rat liver.

Inhibitory effects of anthracenedione antineoplastic agents on hepatic and cardiac lipid peroxidation.

Isolation from trout liver of a methionine-containing H1 subfraction, THImet.

Somatomedin synthesis by a subclone of Buffalo rat liver cells: characterization and evidence for immediate secretion of de novo synthesized hormone.

Kinetics of N- and C-hydroxylations of 2-acetylaminofluorene in male Sprague-Dawley rat liver microsomes: implications for carcinogenesis.

Separation of two forms of cytochrome P-450 with aryl hydrocarbon hydroxylase activity from intestinal mucosa microsomes of rabbits treated with 3-methylcholanthrene.

Characteristics of cholic acid uptake in primary cultured hepatocytes.

Active transport of dimethylsulfonium in isolated rat hepatocytes.

Three catalytic sites in mitochondrial ATPase.

The metabolism of arsenite and arsenate by the rat.

Vitamin A (retinol) status in the Gunn rat. The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The alteration of hepatic cytochrome P-450 subpopulations of phenobarbital-induced and uninduced rat by regioselective hepatotoxins.

Immunological and enzymatic comparison of hepatic cytochrome P-450 fractions from phenobarbital-, 3-methylcholanthrene-, beta-naphthoflavone- and 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

Homology of amino acid sequences of rat liver cathepsins B and H with that of papain.

Development of basal and induced aryl hydrocarbon (benzo[a]pyrene) hydroxylase activity in the chicken embryo in ovo.

Purification of pregnancy-specific beta 1-glycoprotein with a monoclonal antibody immunoadsorbent.

Subunit interaction in the mitochondrial H⁺-translocating ATPase. Association of the 26,500-dalton atpase binding protein and oligomycin sensitivity conferral protein with F1-ATPase.

Induction of two immunochemically related rat liver cytochrome P-450 isozymes, cytochromes P-450c and P-450d, by structurally diverse xenobiotics.

Calcium transport and phosphorylated intermediate of (Ca²⁺ + Mg²⁺)-ATPase in plasma membranes of rat liver.

Further biochemical characterization of the polypeptide h3 recently isolated from human brain material, and its identification in human liver.

Toxic activity of seventeen industrial solvents and halogenated compounds on human lymphocytes cultured in vitro.

Lipid peroxidation as a possible cause of TCDD toxicity.

Liver morphology in guinea pigs administered either pyrolysis products of a polychlorinated biphenyl transformer fluid or 2,3,7,8-tetrachlorodibenzo-p-dioxin.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) effects on hepatic microsomal steroid metabolism and serum estradiol of pregnant rats.

The nucleotide sequence of rat liver fatty acid binding protein mRNA.

Higher Chlorinated Dioxins Implicated in the Mortality of Young Pigs Kept on a Pentachlorophenol-treated Wooden Floor.

Cytotoxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin on primary cultures of adult rat hepatocytes.

The calorogenic nature of hepatic ketogenesis: an explanation for the stimulation of respiration induced by fatty acid substrates.

Genotoxicity of N-acetylarylamines in the salmonella/hepatocyte system.

[Effect of heliomycin on the respiration and oxidative phosphorylation of the liver mitochondria of the rat].

Comparison of hepatic biotransformation and toxicity of allyl alcohol and [1,1-2H₂]allyl alcohol in rats.

Sephacryl-sepharose as substrate for rat liver long-chain fatty acyl-CoA synthetase.

Effect of polycyclic aromatic compounds and phorbol esters on ornithine decarboxylase and aryl hydrocarbon hydroxylase activities in mouse liver.

Hepatic microsomal metabolism of the dichloroethanes.

Inhibition of testosterone biosynthesis by ethanol. Relation to hepatic and testicular acetaldehyde, ketone bodies and cytosolic redox state in rats.

Toxicity and biotransformation of acetaminophen in rat hepatocytes (I). Uptake and release.

Teratology testing: I. Development and status of short-term prescreens. II. Biotransformation of teratogens as studied in whole embryo culture.

Effect of lidocaine on hepatic prostanoid production in vitro following 2,4-dinitrophenol administration.

Mutagenicity and DNA damage induced by arylamines in the Salmonella/hepatocyte system.

Insulin depolarization of rat hepatocytes in primary monolayer culture.

Amino acid sequence studies on sheep liver fructose-bisphosphatase. II. The complete sequence.

Toxicity of 3,3',4,4'- and 2,2',5,5'-tetrabromobiphenyl: correlation of activity with aryl hydrocarbon hydroxylase induction and lack of protection by antioxidants.

Cytochemical localization of glutaraldehyde-resistant NAD(P)H-oxidase in rat hepatocytes.

Occupational exposure to hexachlorocyclohexane. VI. Metabolism of gamma-hexachlorocyclohexane in man.

Chemically-induced alteration of UDP-glucuronic acid concentration in rat liver.

[Experimental chronic paraquat poisoning. Functional and histopathological pulmonary changes].

Pentachlorophenol, an assessment of the occupational hazard.

Paraquat--the weed and people killer.

Paraquat poisoning: a clinical and epidemiological review of 30 cases.

Prognosis and treatment of paraquat poisoning: a review of 28 cases.

Phenoxy acid herbicides cause peroxisome proliferation in Chinese hamsters.

Effects of organochlorine compounds on lipid catabolism of foetal rat liver mitochondria and microsomes.

Immunotoxicity of technical pentachlorophenol (PCP-T): depressed humoral immune responses to T-dependent and T-independent antigen stimulation in PCP-T exposed mice.

Effects of sodium pentachlorophenate on enzymes of energy metabolism in tissues of *Notopterus notopterus*.

Effects of anionic xenobiotics on rat kidney. I--Tissue and mitochondrial respiration.

Neurotoxicological investigation of the new Hungarian pesticide Toxurazine.

Significance of plant metabolism in the mutagenicity and toxicity of pesticides.

[Hepatotoxicity of selected polychlorinated aromatic hydrocarbons].

Inhibition of energy-dependent transhydrogenase reaction by N-(phosphonomethyl) glycine in isolated rat liver mitochondria.

Sex differences in the metabolism of hexachlorobenzene by rats and the development of porphyria in females.

[The effect of (+)-cyanidanol-3 on toxic fatty infiltration of liver parenchyma (author's transl)].

Effects of aldehyde dehydrogenase inhibitors on enzymes involved in the metabolism of biogenic aldehydes in rat liver and brain.

Dose-effect relationship between ethyl alcohol pretreatment and retention and tissue distribution of mercury vapor in rats.

The formation and metabolism of N-hydroxymethyl compounds--I. The oxidative N-demethylation of N-dimethyl derivatives of arylamines, aryltriazenes, arylformamidines and arylureas including the herbicide monuron.

Interaction of cyclophosphamide metabolites with membrane proteins: an in vitro study with rabbit liver microsomes and human red blood cells. Effect of thiols.

Serological approaches for the characterization of catalase in tissue-derived mycobacteria.

Changes in hepatic microsomal enzyme function in workers exposed to mixtures of chemicals.

Metabolic activation of cyanamide by liver mitochondria, a requirement for the inhibition of aldehyde dehydrogenase enzymes.

The effects of clofibrate and 3-amino-1,2,4-triazole on liver catalase and lipid metabolism in mice.

[Effects of pentachlorophenol on the levels of hepatic glycogen].

Defective nicotinamide nucleotide transhydrogenase reaction in hepatic mitochondria of N-(phosphonomethyl)-glycine treated rats.

In vivo cooperation between hepatic catalase and superoxide dismutase demonstrated by diethyldithiocarbamate.

Increase in hepatic mixed disulphide and glutathione disulphide levels elicited by paraquat.

Effect of drugs and hormones on rat liver dimethylaminoazobenzene reductase activity.

Effects of fluometuron on embryonic development and hatching of *Fasciola hepatica*'s Miracidia.

Conjugation of pentachlorophenol to palmitic acid by liver microsomes.

Allylamine cardiotoxicity--IV. Metabolism to acrolein by cardiovascular tissues.

Active oxygen metabolites and their action in the hepatocyte. Studies on chemiluminescence responses and alkane production.

The effect of ionophore A23187 and 2,4-dinitrophenol on the structure and function of cultured liver cells.

In vivo resistance towards anthracyclines, etoposide, and cis-diamminedichloroplatinum(II).

An analysis of fetotoxicity using biochemical endpoints of organ differentiation.

Influence of *Mycoplasma arginini* infection on the induction of aryl hydrocarbon hydroxylase by TCDD in rat hepatoma cell cultures.

[A new test for hemolysis related to tocopherol deficiency: hemolysis caused by sodium azide (NaN₃). Results in cholestasis in children].

Visual evoked potentials in encephalopathy induced by galactosamine, ammonia, dimethyldisulfide, and octanoic acid.

PCB isomers and congeners: induction of aryl hydrocarbon hydroxylase and ethoxyresorufin O-deethylase enzyme activities in rat hepatoma cells.

Effect of long-term ethanol feeding on rat liver interstitial collagens.

Differential effects of 2,4-dinitrophenol and valinomycin (+ K⁺) on uncoupler-stimulated ATPase of human tumor mitochondria.

Increased urinary D-glucaric acid excretion by children living in an area polluted with tetrachlorodibenzoparadioxin (TCDD).

Induction of porphyria in the rat by chronic versus acute exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Misonidazole-induced biochemical alterations of mammalian cells: effects on glycolysis.

Mutagenic evaluation of carcinogens and non-carcinogens in the L5178Y/TK assay utilizing postmitochondrial fractions (S9) from normal rat liver.

Stability of hexokinase II in vitro and in ascites tumor cells.

Ascorbic acid and iron levels in plasma and liver of vitamin C deficient guinea pigs after iron overload and desferrioxamine administration.

[Pathogenesis of hyperlipidemia and fatty liver of rabbits induced by methyl iodide. Increased synthesis and secretion of triglyceride in the liver].

Studies in neuronal ceroid lipofuscinosis: enzymes of liver and brain tissues involved in the defense against oxidative damage.

Enhancement of hyperthermia-induced cytotoxicity upon ATP deprivation.

A study of oxidative phosphorylative activity and calcium-induced respiration of rat liver mitochondria following living *Escherichia coli* injection.

The TCDD receptor in rat intestinal mucosa and its possible dietary ligands.

Acnegenic activity of 3-methylcholanthrene and benzo[a]pyrene, and a comparative study with 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rabbit and hairless mouse.

The functional and ultrastructural changes of hepatic mitochondria in acute experimental pancreatitis in dogs treated with prostacyclin.

Isolation of gamma-glutamyl transpeptidase positive hepatocytes during the early stages of hepatocarcinogenesis in the rat.

Comparisons of highly purified hepatic microsomal cytochromes P-450 from Holtzman and Long-Evans rats.

A role for 2,4-enoyl-CoA reductase in mitochondrial beta-oxidation of polyunsaturated fatty acids. Effects of treatment with clofibrate on oxidation of polyunsaturated acylcarnitines by isolated rat liver mitochondria.

Purification of a Gal beta 1 to 4GlcNAc alpha 2 to 6 sialyltransferase and a Gal beta 1 to 3(4)GlcNAc alpha 2 to 3 sialyltransferase to homogeneity from rat liver.

Purification, characterization and regulation of five rat hepatic microsomal cytochrome P-450 isozymes.

The kinetics of uptake of 5-fluorouracil by rat liver.

Effect of thyroidectomy on oxidative phosphorylation mechanisms in rat liver mitochondria.

[Characteristics of the system of corticosterone binding by hepatocyte plasma membranes].

Binding of 3-methylcholanthrene and 2,3,7,8-tetrachlorodibenzo-p-dioxin to a common Ah receptor site in mouse and rat hepatic cytosols.

Effects of dopamine-beta-hydroxylase inhibitors FLA-57 and FLA-63 on ethanol metabolism and aldehyde dehydrogenase activity in rats.

Protective role of thiols in cyclophosphamide-induced urotoxicity and depression of hepatic drug metabolism.

Metabolism of parathyroid hormone by Kupffer cells: analysis by reverse-phase high-performance liquid chromatography.

The primary structure of the acidic phosphoprotein P2 from rat liver 60 S ribosomal subunits. Comparison with ribosomal 'A' proteins from other species.

Differential effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on nuclear RNA polymerase activity in the rat liver and thymus.

Structure-activity relationships of chlorinated benzenes as inducers of different forms of cytochrome P-450 in rat liver.

Influence of 2,3,7,8-TCDD on the protein composition of the plasma membrane of hepatic cells from the rat.

On the mechanism by which hormones induce the release of Ca^{2+} from mitochondria in the liver cell.

Structure of dihydrofolate reductase: primary sequence of the bovine liver enzyme.

Halogenated biphenyls: molecular toxicology.

Hepatic morphine and estrone glucuronyltransferase activity and morphine biliary excretion in the isolated perfused rat liver. Effect of pregnancy and estradiol-17 beta treatment.

Calcium plays an important role in the regulation of hepatic branched-chain 2-oxo acid dehydrogenase activity.

Heterogeneity in the rate of benzo[a]pyrene metabolism in single cells: quantitation using flow cytometry.

Fate of 2,3,7,8-tetrachlorodibenzo-p-dioxin metabolites from dogs in rats.

The 1,2-dichloroethylenes: their metabolism by hepatic cytochrome p-450 in vitro.

Structural features of liver microsomal NADPH-cytochrome P-450 reductase. Hydrophobic domain, hydrophilic domain, and connecting region.

Effect of microsomal cytochrome P-450 isozyme induction on the mutagenic activation of 2-aminoanthracene.

An oligomycin-resistant Mg^{2+} -dependent ATPase in rabbit bone marrow mitochondria.

Purification and properties of glycine N-methyltransferase from rat liver.

Primary structure of rat liver Z-protein. A low-Mr cytosol protein that binds sterols, fatty acids and other small molecules.

Energy linked uptake of demethylphalloin by isolated rat liver cells.

Determinants of biliary secretion in isolated perfused skate liver.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin and phenobarbital on the occurrence and distribution of four cytochrome P-450 isozymes in rabbit kidney, lung, and liver.

Rabbit liver fructose-1,6-bisphosphatase: location of an active site lysyl residue in the COOH-terminal fragment generated by a lysosomal proteinase.

Role of zinc as an activator of mitochondrial function in rat liver.

Multiple phosphorylation of rat liver 3-hydroxy 3-methylglutaryl coenzyme A reductase.

Identification of metabolites of 2, 3, 7, 8-tetrachlorodibenzo-P-dioxin (TCDD) formed on incubation with isolated rat hepatocytes.

Human hepatic microsomal epoxide hydrolase. A structural comparison with the rat enzyme.

Purification and characterization of two constitutive forms of rat liver microsomal cytochrome P-450.

Toxicokinetics of chloroethanol in the rat after single oral administration.

Liver mitochondria contain an ATP-dependent, vanadate-sensitive pathway for the degradation of proteins.

Cytosolic and nuclear binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin to the Ah receptor in extra-hepatic tissues of rats and mice.

High-affinity binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin in cell nuclei from rat liver.

Activation of misonidazole by rat liver microsomes and purified NADPH-cytochrome c reductase.

Carcinogenesis Bioassay of 2,3,7,8-Tetrachlorodibenzo-p-dioxin (CAS No. 1746-01-6) in Osborne-Mendel Rats and B6C3F1 Mice (Gavage Study).

Effects of extended peroral borate ingestion on rat liver and brain.

Effects of dichlorodiphenyltrichloroethane and its analogues on rat liver mitochondria.

Therapeutic properties of dihydroxy-dibutylether on sub-acute liver damage induced by several hepatotoxic agents in rats.

Light, fluorescence and electron microscopic observations on vitamin A storing cells in allyl-alcohol induced liver damage.

Induction of rat liver cytoplasmic aldehyde dehydrogenase by phenobarbital and polycyclic hydrocarbons. Comparison of different isoenzyme types.

Histochemical localization of carbohydrates and lipids in the liver and kidney of mice poisoned with chlorophenols.

Interrelationships between gluconeogenesis and uricogenesis in chicken liver.

[Morphometric analysis and reaction to allyl alcohol of light and heavy hepatocytes (author's transl)].

Uptake of cholic acid by freshly isolated rat hepatocytes: presence of a common carrier for bile acid transports.

The Ah regulatory gene product. Survey of nineteen polycyclic aromatic compounds' and fifteen benzo[a]pyrene metabolites' capacity to bind to the cytosolic receptor.

The effects of dimethylnitrosamine and allyl alcohol on primary maintenance cultures of adult rabbit hepatocytes.

[Catecholamine regulation of the liver and kidney ATPase activity in mice].

Effect of 4-dimethylaminomethyl-1-(3-hydroxyphenyl)-1-nonen-3-one hydrochloride and related compounds on respiration in rat liver mitochondria.

Lack of effect of a purified diet on carbon tetrachloride or oxygen toxicity.

Toxicity of chlorinated phenoxy acids in combination with 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57BL/6 male mice.

Hepatic injury associated with paraquat toxicity in humans.

Role of glutathione in the metabolism-dependent toxicity and chemotherapy of cyclophosphamide.

Effect of phenolic compounds on in vivo activity of glucose-6-phosphatase in certain tissues of *Notopterus notopterus*.

Acceleration of lipid peroxidation in human paraquat poisoning.

Effects of sublethal concentrations of pentachlorophenol on the liver of bluegill sunfish, *Lepomis macrochirus*.

A study of the health of Malaysian plantation workers with particular reference to paraquat spraymen.

Increased biliary GSSG-secretion and loss of hepatic glutathione in isolated perfused rat liver after paraquat treatment.

Ground glass inclusions in liver cells in an alcoholic treated with cyanamide (Dipsan).

[Hepatic lesion in three autopsy cases of paraquat poisoning (author's transl)].

Carcinogenicity of picloram.

Cardiovascular changes during the calcium carbimide-ethanol interaction.

Assessment of the teratogenic potential of acrolein and cyclophosphamide in a rat embryo culture system.

[Embryotropic action of the triazine herbicide polyzin 50].

[Pentachlorophenol and liver-function: a pilot-study on occupationally exposed collectives (author's transl)].

[Field study of workers with longterm exposure to calcium cyanamide (author's transl)].

Subchronic administration of technical pentachlorophenol to lactating dairy cattle: performance, general health, and pathologic changes.

A comparative review of the pharmacological and toxicological properties of disulfiram and calcium carbimide.

Inhibition of lipogenesis in isolated hepatocytes by 3-amino-1,2,4-triazole.

Protection by 3-amino-1,2,4-triazole against the lowered uptake of p-biphenylmethyl-(dl-tropyl-alpha-tropinium) bromide into the hepatic lysosomes of carbon tetrachloride-treated mice.

The effect of 3-amino-1,2,4-triazole on hepatic and renal deiodination of L-thyroxine to 3,5,3'-triiodothyronine.

Reye's syndrome simulacra in liver of mice after treatment with chemical agents and encephalomyocarditis virus.

Prevention of the hepatotoxic action of N-hydroxy-2-acetylaminofluorene in the rat by inhibition of N-O-sulfation by pentachlorophenol.

The influence of putrefactive changes on the determination of Paraquat in autopsy materials.

Effect of cyanamide on the metabolism of ethanol and acetaldehyde and on gluconeogenesis by isolated rat hepatocytes.

Pharmacokinetics of 2,4,5-T PGBE ester applied dermally to rats.

Metabolites of diuron, linuron, and methazole formed by liver microsomal enzymes and spinach plants.

Production of acetaldehyde and ethanol by isolated rat liver parenchymal cells in the presence of diethyl ether.

Herbicides and fungicides stimulate Ca²⁺ efflux from rat liver mitochondria.

Methanol poisoning and formate oxidation in nitrous oxide-treated rats.

[Pentachlorophenol concentrations in tissues and body fluids of normal persons (author's transl)].

Role of sulfation in the formation of DNA adducts from N-hydroxy-2-acetylaminofluorene in rat liver in vivo. Inhibition of N-acetylated aminofluorene adduct formation by pentachlorophenol.

The effect of cyanamide on acetaldehyde oxidation by isolated rat liver mitochondria and on the inhibition of pyruvate oxidation by acetaldehyde.

2,4-Dichloro-phenoxy-acetic acid interactions with the detoxification hepatic systems.

A comparison of NADPH and cumene hydroperoxide-stimulated lipid peroxidation in mouse hepatic microsomes.

Relationship between clinical and electrophysiological findings and indicators of heavy exposure to 2,3,7,8-tetrachlorodibenzo-dioxin.

Severe chlorate poisoning: report of a case.

Influence of 2,4-dinitrophenol on the susceptibility of rats to hepatotoxic injury.

Quantitation of differences between spontaneous and induced liver tumors in mice with an automated image analyzer.

Biological evaluation of hemoperfusion in acute poisoning.

Influence of inducers of monooxygenases on cytotoxic efficiency of ellipticine on leukemia L1210 cells.

[Experimental studies on metabolism of iron overload in dogs with carbon tetrachloride induced chronic hepatic injury (author's transl)].

A comparison of purified poly(ADP-ribose) polymerases from Ehrlich ascites tumor cells, pig thymus, and HeLa S3 cells.

Mechanism of natural resistance to vincristine in rat ascites hepatoma AH66.

Acute and subchronic toxicity studies of rats exposed to vapors of methyl mercaptan and other reduced-sulfur compounds.

Enzymatic alterations in mouse hepatic nodules induced by a chlorinated hydrocarbon pesticide.

Acute and short-term toxicity of 2,3,4,6-tetrachlorophenol in rats.

A scanning electron microscopic study of the two-step effect of cytochalasin B on Ehrlich ascites tumor cells.

The role of respiration in tumor cell transition from the noncycling to the cycling state.

Comparison of the metabolic and antihypertensive properties of tienilic acid and hydrochlorothiazide.

The accumulation of amino acids by mouse ascites-tumour cells. Dependence on but lack of equilibrium with the sodium-ion electrochemical gradient.

Haptoglobin. A novel mode of biosynthesis of a liver secretory glycoprotein.

Evidence for a plasma membrane redox system on intact ascites tumor cells with different metastatic capacity.

The development and prognosis of chronic intoxication by tetrachlorodibenzo-p-dioxin in men.

Transfer of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) to the mouse embryo and fetus.

The influence of malnutrition on the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in rats.

New aspects of the origin of hepatocellular vacuoles. An ultrastructural study on rat and mice liver after different intoxications.

Biotransformation and porphyrinogenic action of hexachlorobenzene and its metabolites in a primary liver cell culture.

Arsenic-related hepatic angiosarcoma.

The covalent structure of pig kidney fructose-1,6-bisphosphatase. Sequence of a 63-residue cyanogen bromide peptide containing a phosphorylatable serine.

5-Fluoro- and 5-chlorocyclophosphamide: synthesis, metabolism, and antitumor activity of the cis and trans isomers.

Biochemical and morphological changes induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat liver cell plasma membrane.

Synthesis of adenosine triphosphate in respiration-inhibited submitochondrial particles induced by microsecond electric pulses.

Studies on the mechanism of denaturation of cytochrome P-450 by cyclophosphamide and its metabolites.

Amino acid sequence of copper-zinc superoxide dismutase from horse liver.

A study with model substrates of the structure of the sites phosphorylated by rat liver casein kinase TS.

Studies on the biliary excretion and metabolites of hexachlorobenzene in the rat.

Development of a toxicity test system using primary rat liver cells.

Estimation of genetic risks of alkylating agents. VI. Exposure of mice and bacteria to methyl bromide.

On the formation of amino acids deriving from spermidine and spermine.

Hepatic toxicity and uroporphyrinogen decarboxylase activity following a single dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin to mice.

Difference in the nature of induction of mixed-function oxidase systems of the rat liver among phenobarbital, DDT, 3-methylcholanthrene, and TCDD.

Ether inhibition of ethanol metabolism in isolated rat liver parenchymal cells.

Omega- and (omega-1)-hydroxylation of 1-dodecanol by frog liver microsomes.

Interaction of phenols with delta 9 terminal desaturase and other cyanide-sensitive factors in chicken liver microsomes.

Conversion of 5-aminolaevulinate into haem by liver homogenates. Comparison of rat and chick embryo.

Oxidation of branched-chain amino acids in skeletal muscle and liver of rat. Effects of octanoate and energy state.

The complete amino acid sequence of mitochondrial glutamic oxaloacetic transaminase from rat liver.

The effects of 1,10-phenanthroline on the binding of activated rat hepatic glucocorticoid-receptor complexes to deoxyribonucleic acid-cellulose.

In vivo drug metabolism and liver lobule heterogeneity in the rat.

Inhibition in vivo of the formation of adducts between metabolites of benzo(a)pyrene and DNA by aryl hydrocarbon hydroxylase inducers.

Alpha-fetoprotein on human peripheral blood lymphocytes does not block complement-dependent lymphocytotoxicity.

Localization of a hepatitis B surface antigen determinant deduced from results of chemical modifications.

Uptake and processing of the precursor for rat liver ornithine transcarbamylase by isolated mitochondria. Inhibition by uncouplers.

Control of ethanol utilization by rat hepatocytes.

Aflatoxin inhibition of reversed electron transfer in rat liver mitochondria in vitro.

Rabbit liver fructose 1,6-bisphosphatase: labeling of the active and allosteric sites with pyridoxal 5-phosphate and sequence of a nonapeptide from the active site.

Polyhalogenated biphenyls and phenobarbital: evaluation as inducers of drug metabolizing enzymes in the sheephead, *Archosargus probatocephalus*.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on hepatic and renal prostaglandin synthetase.

Enterohepatic circulation in formation of propachlor (2-chloro-N-isopropylacetanilide) metabolites in the rat.

Induction of benzo[a]pyrene metabolism by 2,3,7,8-tetrachlorodibenzo-p-dioxin in primary cultures of adult rat hepatocytes.

Complete amino acid sequence of a membrane receptor for glycoproteins. Sequence of the chicken hepatic lectin.

Differences in inducibility of particulate and cytosolic rat liver glutathione S-transferase activities.

Complete amino acid sequence of mouse liver metallothionein-II.

The mutagenic properties of hexachloroacetone in short-term bacterial mutagen assay systems.

Exogenous, but not endogenous, cyclic GMP reduces hepatic pyruvate kinase activity.

Regulatory gene product of the Ah complex. Comparison of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3-methylcholanthrene binding to several moieties in mouse liver cytosol.

Enhanced liver DNA synthesis in partially hepatectomized rats pretreated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Substrate adhesion of rat hepatocytes: mechanism of attachment to collagen substrates.

Determination of 2,3,7,8-tetrachlorodibenzo-p-dioxin in goat milk and tissues by glass capillary gas chromatography and medium resolution mass fragmentography.

Structural gene products of the murine Ah complex. Differences in ontogenesis and glucosamine incorporation between liver microsomal cytochromes P1-450 and P-448 induced by polycyclic aromatic compounds.

The differential localization of various drug metabolizing systems within the rat liver lobule as determined by the hepatotoxins allyl alcohol, carbon tetrachloride and bromobenzene.

Structural analysis of the mu-chains synthesized by fetal liver hybridomas.

Potent induction of rat liver microsomal, drug-metabolizing enzymes by 2,3,3',4,4',5-hexabromobiphenyl, a component of fireMaster.

Effect of diesel particulate exposure on adenylate and guanylate cyclase of rat and guinea pig liver and lung.

The rabbit pulmonary monooxygenase system. partial structural characterization of the cytochrome P-450 components and comparison to the hepatic cytochrome P-450.

Effect of hypophysectomy and castration on hepatic, pulmonary and intestinal aryl hydrocarbon hydroxylase activities in the rat.

[Tissue-specific regulation of rat liver mitochondrial oxidative phosphorylation by a soluble phase of cells from that organ].

Uptake of anticoagulants by isolated rat hepatocytes.

Effects of pyruvate and other metabolites on cyclic GMP levels in incubations of rat hepatocytes and kidney cortex.

Inhibitory effect on calcium channel blockers on alpha -adrenergic activation of glycogenolysis and calcium efflux in perfused rat liver.

Effect of several factors on the liver extract mediated mutagenicity of acrylonitrile and identification of four new in vitro metabolites.

Activation and inhibition of rat hepatic UDP-glucuronyltransferase by mercuric acetate.

The carboxy-terminal amino acid sequence of rabbit liver fructose 1,6-bisphosphatase.

Interaction of the hepatic receptor protein for 2,3,7,8-tetrachlorodibenzo-rho-dioxin with DNA.

Energy-dependent activation and magnesium--dependent inactivation of hepatocyte hormone-sensitive phosphodiesterase.

Effect of 2,4 dinitrophenol on the rate of hepatic prostaglandin production.

Induction of mixed-function oxidase by chronic treatment with 2,3,7,8-tetrachloro-dibenzo-p-dioxin in female rats.

Biotransformation and intracellular binding of arsenic in tissues of rabbits after intraperitoneal administration of ⁷⁴As labelled arsenite.

Effect of arginine thiazolidinecarboxylate on allyl alcohol hepatotoxicity in the rat.

The effect of intestinal microflora on the enterohepatic circulation of mercapturic acid pathway metabolites.

Alteration of urinary levels of the carcinogen, N-hydroxy-2-naphthylamine, and its N-glucuronide in the rat by control of urinary pH, inhibition of metabolic sulfation, and changes in biliary excretion.

Simultaneous immobilization of cytochrome P-450 and glucuronyltransferase for synthesis of drug metabolites.

Inhibition of succinate-linking reduction of pyridine nucleotide in rat liver mitochondria 'in vivo' by N-(phosphonomethyl)glycine.

A histopathological study of the liver in paraquat poisoning--an analysis of fourteen autopsy cases with emphasis on bile duct injury.

[Biochemical and morphological changes in white rat lung and liver tissues in experimental paraquat poisoning].

Dioxin. A case in point.

Toxicity and bioaccumulation of pentachlorophenol in broiler chickens.

Liver necrosis and lipid peroxidation in the rat as the result of paraquat and diquat administration. Effect of selenium deficiency.

[Paraquat poisoning; clinical toxicological aspects and a case description].

Ultrastructural morphometric investigations on rat liver of young and adult rats after treatment with technical pentachlorophenol (PCP).

The changing pattern of paraquat poisoning in man.

Cyanamide-induced liver injury in alcoholics.

Effects of pentachlorophenol on rat liver changes induced by hexachlorobenzene, with special reference to porphyria, and alterations in mixed function oxygenases.

Pentose pathway in pulmonary fibrosis due to chronic paraquat poisoning.

[Comparative study of the intermittent and continuous action of the herbicide, Ramrod].

[Assessment of the chronic toxic action of the herbicide, balagrin, in continuous and intermittent exposure regimens].

[Thiamine allowance of animals receiving rye and wheat grains grown with the use of herbicides from the phenoxy acid chlorine derivative group].

Decrease of reduced glutathione in isolated rat hepatocytes caused by acrolein, acrylonitrile, and the thermal degradation products of styrene copolymers.

Human health effects of selected pesticides, chloroaniline derivatives.

Hydroperoxide-induced chemiluminescence of the perfused lung.

The involvement of porphyrogenic steroids in the development of experimental porphyria.

Ethanol oxidation by isolated hepatocytes from fed and starved rats and from rats exposed to ethanol, phenobarbitone or 3-amino-triazole. No evidence for a physiological role of a microsomal ethanol oxidation system.

Ethanol oxidation in isolated hepatocytes.

Metabolism of deethylatrazine, deisopropylatrazine, and hydroxyatrazine by the soluble fraction (105000 g) from goose liver homogenates.

Paraquat-stimulated binding of dopa to liver and lung microsomal protein.

Inhibition of sulfate conjugation of N-hydroxy-2-acetylaminofluorene in isolated perfused rat liver and in the rat in vivo by pentachlorophenol and low sulfate.

The biotransformation of allyl alcohol and acrolein in rat liver and lung preparations.

3-Amino-1,2,4-triazole is an inhibitor of protein synthesis on mitoribosomes in *Neurospora crassa*.

A review of the coordinated research effort on the comparison of test systems for the detection of mutagenic effects, sponsored by the E.E.C.

S-oxygenation of an alkylmercaptotriazine herbicide by rat, rabbit and human liver enzymes.

Effects of pentachlorophenol and 2,4,6-trichlorophenol on the disposition of sulfobromophthalein and respiration of isolated liver cells.

Investigations on the presence of porphyrinogen carboxy-lyase inhibitor in the liver of rats intoxicated with hexachlorobenzene.

Mutagenicity of pesticides evaluated by means of gene-conversion in *Saccharomyces cerevisiae* and in *Aspergillus nidulans*.

A membrane glycoprotein from human neuroblastoma cells isolated with the use of a monoclonal antibody.

Temperature-dependent cytosol-to-nucleus translocation of the Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in continuous cell culture lines.

Mechanism of the linkage between the electrophoretic mobility and oxygen uptake of ascites tumor cells.

Comparative induction of aryl hydrocarbon hydroxylase activity in vitro by analogues of dibenzo-p-dioxin.

Cultured hepatoma cells as a model system for studying insulin processing and biologic responsiveness.

Histopathologic differences between liver tumors in untreated (C57BL/6 X C3H)F1 (B6C3F1) mice and Nitrofen-fed mice.

Effects of 2,4-dinitrophenol and other metabolic inhibitors on the bidirectional carrier fluxes, net transport, and intracellular binding of methotrexate in Ehrlich ascites tumor cells.

Carcinogenicity of pronamide.

Metabolism of 3,3'-Diiodothyronine and 3'-monoiodothyronine, and effect of potassium cyanide and dinitrophenol and glucuronidation of thyroxine in cultured rat hepatoma cells.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the hepatic storage of retinol in rats with different dietary supplies of vitamin A (retinol).

Quantitative evaluation of the promotion by 2,3,7,8-tetrachlorodibenzo-p-dioxin of hepatocarcinogenesis from diethylnitrosamine.

Effects of level and source of dietary fat on the bioavailability of iron from turkey meat for the anemic rat.

Effect of iron therapy on serum ferritin levels in iron-deficiency anemia.

Relationship between membrane transport of methotrexate and endogenous cyclic adenosine 3':5'-monophosphate in the Ehrlich ascites tumor.

Interstitial collagen polymorphism in rat liver with CCl₄-induced cirrhosis.

Mitochondrial function of rat liver in biliary obstruction.

Characterization of collagen synthesized by normal and chemically transformed rat liver epithelial cell lines.

Covalent structure of collagen: amino acid sequence of alpha 1 (III)-CB5 from type III collagen of human liver.

Allergic contact dermatitis from methylisothiocyanate in soil disinfectants.

Modification of mitochondrial respiration by aging and dietary restriction.

Chemical company suppresses dioxin report.

The primary structure of amyloid fibril protein AA in endotoxin-induced amyloidosis of the mink.

Primary structure of chicken liver dihydrofolate reductase.

Health aspects of rabbits in a low-TCDD contaminated area.

Blood clearance tests for detecting 2,3,7,8-tetrachlorodibenzo-p-dioxin hepatotoxicity in rats and rabbits.

[Use of antagonistic metals to correct copper metabolism in patients with hepatocerebral dystrophy].

General health effects of prolonged exposure to 3,3',4,4'-tetrachloroazobenzene and 3,3',4,4'-tetrachloroazoxybenzene in rats.

Role of the endocrine system in the action of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the thymus.

Biological evaluation of hemoperfusion in acute poisoning.

Catalysis of divergent pathways of 2-acetylaminofluorene metabolism by multiple forms of cytochrome P-450.

Mutagenicity of urine from rats after administration of 2,4-diaminoanisole: the effect of microsomal enzyme inducers.

Effect of pH on the sensitivity of mitochondrial ATPase to free ATP, ADP and anions.

Amino acid sequence studies on sheep liver fructose-bisphosphatase. I. The S-peptide.

Primary structure of mitochondrial glutamic oxaloacetic transaminase from rat liver : comparison with that of the pig heart isozyme.

[Reduced glutathione in rat liver intoxicated with allyl alcohol].

Metabolism of propachlor by the germfree rat.

Inhibition of mixed-function oxidation of p-nitroanisole in perfused rat liver by 2,4-dinitrophenol.

Control of hepatic arterial blood flow: independence from liver metabolic activity.

Amino acid sequence of a collagenolytic protease from the hepatopancreas of the fiddler crab, *Uca pugilator*.

Effect of form of iron on nickel deprivation in the rat: Plasma and liver lipids.

Translation of poly-A RNA from rat liver in vitro. Evidence for a high molecular weight subunit of tyrosine aminotransferase.

Purification and structural comparison of pulmonary and hepatic cytochrome P-450 from rabbits.

Bioassay of Fluometuron for Possible Carcinogenicity (CAS No. 2164-17-2).

Bioassay of a Mixture of 1,2,3,6,7,8-Hexachlorodibenzo-p-dioxin and 1,2,3,7,8,9-Hexachlorodibenzo-p-dioxin (Gavage) for Possible Carcinogenicity (CAS No. 57653-85-7, CAS No. 19408-74-3).

[Liver regeneration characteristics in young rats in allyl alcohol lesion of the periportal areas].

Influence of hypoxia on the hepatotoxic effects of carbon tetrachloride, paracetamol, allyl alcohol, bromobenzene and thioacetamide.

Comparison of aryl hydrocarbon hydroxylase and epoxide hydratase. Induction in primary fetal rat liver cell culture.

Mutagenic activation of N-2-fluorenylacetamide and N-hydroxy-N-2-fluorenylacetamide in subcellular fractions from X/Gf mice.

Non-hormonal activation of glycogenolysis in perfused rat livers.

Phosphorylation of rat hepatic fructose-1,6-bisphosphatase and pyruvate kinase.

Respiratory effects and ascorbate reactions with misonidazole and other recently developed drugs.

Effect of human gastric juice on the mutagenicity of chemicals.

Necrotropic protective effect of Ca-Mg gluconolactate on allyl alcohol-induced liver necrosis in rats.

Analysis of the lytic step in the herpes simplex virus antibody-dependent cellular cytotoxicity system.

Activation of liver microsomes by 2,3,4,5-tetrachlorophenol.

[Properties of anion-sensitive ATPase from plasma membranes of rat liver].

Amino acid sequence of the membranous segment of rabbit liver cytochrome b5. Methodology for separation of hydrophobic peptides.

Isolation and characterization of a constitutive form of rabbit liver microsomal cytochrome P-450.

Biosynthesis of interstitial types of collagen by albumin-producing rat liver parenchymal cell (hepatocyte) clones in culture.

Combined action of hepatotoxic substances and increased environmental temperature on the liver of rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxic effects and tissue levels in animals from the contaminated area of Seveso, Italy.

Purification and properties of the major tRNA^{His} from sheep liver.

Ultrastructure of hepatic and heart muscle mitochondria after 2,4-dinitrophenol treatment in vivo.

Evaluation of hepatocytes isolated by a nonperfusion technique in a prescreen for cytotoxicity.

Effects of dietary vitamin A (retinol) on the reduction of hepatic retinol storage caused by 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin.

Effect of metal salts on UDPglucuronosyltransferase activity of various aglycones in rat liver microsomes in vitro.

Mutagenicity of vinyl compounds in *Salmonella typhimurium*.

[Biological value of Mironovskaya-808 winter wheat grown using the herbicide simazine].

Biochemical and morphological study of the liver injury induced by drugs and chemicals.

Viets and vets fear herbicide health effects.

Carcinogenicity testing of herbicide 2,4,5-trichlorophenoxyethanol containing dioxin and of pure dioxin in Swiss mice.

Paraquat poisoning: an analytical toxicologic study of three cases.

Role of pesticides in hepatocarcinogenesis.

[Histo enzymatic reactions in the cells of the reticuloendothelial system of the liver and spleen and hepatocytes in acute Morfamquat dichloride poisoning].

[Clinical and experimental studies of chronic Herbazin-50 poisoning in sheep].

[General toxicity and specific action of the herbicide balagrin].

Research related to the herbicide buvinol, especially for possible carcinogenicity.

Decrease in mouse lung and liver glutathione peroxidase activity and potentiation of the lethal effects of ozone and paraquat by the superoxide dismutase inhibitor diethyldithiocarbamate.

Some effects of atrazine on Ehrlich ascites tumor cells in vitro and in vivo.

Effect of paraquat on plasma enzymes, insulin, glucose, and liver glycogen in the rat.

Induction of the hepatic microsomal and nuclear cytochrome P-450 system by hexachlorobenzene, pentachlorophenol and trichlorophenol.

Mercapturic acid occurrence in fish bile. A terminal product of metabolism of the herbicide molinate.

Blood pressure response to ethanol in relation to acetaldehyde levels and dopamine-beta-hydroxylase activity in rats pretreated with disulfiram, cyanamide and coprine.

Effect of Triton WR-1339 on the rates of synthesis and degradation of hepatic catalase of rat.

The effect of paraquat on the covalent binding of radio-labelled DOPA to liver and lung microsomal protein [proceedings].

S-Chloroallyl thiocarbamate herbicides: mouse hepatic microsomal oxygenase and rat metabolism of cis- and trans-[¹⁴C = O]diallate.

Effect of glyphosate on rat liver mitochondria in vivo.

Changes in fatty acid and cholesterol synthesis in rat liver slices due to aromatic amines formed during the degradation of some herbicides.

Activation of liver guanylate cyclase by paraquat: possible role of superoxide anion.

The uncoupling effect of N-(phosphonomethyl)glycine on isolated rat liver mitochondria.

Metabolism of atrazine by the soluble fraction (105000g) from chicken liver homogenates.

EC-GLC determination of the herbicidal monohalogenated phenoxyalkyl acid mecoprop in tissues, urine and plasma after derivatization with pentafluorobenzylbromide.

Neurochemical effects of peroral administration of technical pentachlorophenol.

Increases in rat liver cyclic AMP and glycogen phosphorylase activity caused by the herbicide atrazine.

Renal transport and renal metabolism of 2, 4, 5-trichlorophenoxyacetate by the chicken.

Correlation between metabolic reduction rates and electron affinity of nitroheterocycles.

Pyrolysis products from amino acids and protein: highest mutagenicity requires cytochrome P1-450.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on indocyanine green blood clearance in rhesus monkeys.

Vitamin A (retinol) status in the rat after a single oral dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Induction of hepatic microsomal cytochrome P-448 by 3,3',4,4'-tetrachloroazobenzene and the corresponding azoxy and hydrazo analogs.

In-vitro assessment of the removal of phenols by ACAC hemoperfusion.

Induction of enzyme activity in cell culture: a rapid screen for detection of planar polychlorinated organic compounds.

Mode of uptake and degradation of 125I-labelled insulin by isolated hepatocytes and H4 hepatoma cells.

Human health effects from accidental release of tetrachlorodibenzo-p-dioxin (TCDD) at Seveso, Italy.

Developmental toxicology of the halogenated aromatics: effects on enzyme development.

Toxicological studies of ammonium sulfamate in rat after repeated oral administration.

Isolation and immunochemical characterization of antibodies from the sera of cancer patients which are reactive against human melanoma cell membranes by affinity chromatography.

Large agarose beads for extracorporeal detoxification systems. Preparation and enzymatic properties of agarose-bound UDP-glucuronyltransferase.

Iron deficiency prevents liver toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Absence of microsomal lipid peroxidation in acatalasemic mice.

Comparison of rat liver and Walker 256 carcinosarcoma tRNAs.

Purification of cobalt-activated acylase by affinity chromatography.

[The difference of drug sensitivity of tumor cells on N-ethyloxycarbonylaminomethyl-L-isoleucine (A-145 (author's transl))].

[Effect of cycloheximide, 2,4-dinitrophenol and papaverine on ribosomal RNA synthesis in Ehrlich ascitic carcinoma cells].
