Sub-acute toxicological and behavioural effects of two candidate therapeutics, cinnamaldehyde and eugenol, for treatment of ESBL producing-quinolone resistant pathogenic Enterobacteriaceae.

[Effect of bone marrow mesenchymal stem cells on paraquat-induced pulmonary fibrosis in rats].

[The expression of Nrf2 in the lung tissue of rats with acute diquat poisoning and the distribution of diquat in lungs].

Integrin CD11b mediates locus coeruleus noradrenergic neurodegeneration in a mouse Parkinson's disease model.

Comparison of the effects of resveratrol and its derivative pterostilbene on hepatic oxidative stress and mitochondrial dysfunction in piglets challenged with diquat.

Pre- and postnatal exposure to glyphosate-based herbicide causes behavioral and cognitive impairments in adult mice: evidence of cortical and hippocampal dysfunction.

Postnatal zinc or paraquat administration increases paraquat or zinc-induced loss of dopaminergic neurons: insight into augmented neurodegeneration.

Exposure to diclofop-methyl induces cardiac developmental toxicity in zebrafish embryos.

HMGB1 Mediates Paraquat-Induced Neuroinflammatory Responses via Activating RAGE Signaling Pathway.

Antioxidant and Anti-Inflammatory Effects of Different Zinc Sources on Diquat-Induced Oxidant Stress in a Piglet Model.

Proconvulsant effect of trans-cinnamaldehyde in pentylenetetrazole-induced kindling model of epilepsy: The role of TRPA1 channels.

Attenuation of paraquat-induced inflammation by inhibitors of phosphorylation of mitogen-activated protein kinases in BV(2) microglial cells.

Soybean isoflavones prevent atrazine-induced neurodegenerative damage by inducing autophagy.

Potential Role of Selenium Against Hepatotoxicity Induced by 2,4-Dichlorophenoxyacetic Acid in Albino Wistar Rats.

Human amniotic mesenchymal stem cells alleviate paraquat-induced pulmonary fibrosis in rats by inhibiting the inflammatory response.

Toxicology of paraquat and pharmacology of the protective effect of 5-hydroxy-1-methylhydantoin on lung injury caused by paraquat based on metabolomics.

Chronic pesticide mixture exposure including paraquat and respiratory outcomes among Colombian farmers.

2,4-Dichlorophenoxyacetic acid herbicide effects on zebrafish larvae: development, neurotransmission and behavior as sensitive endpoints.

Hydrogen Sulfide Protects against Paraquat-Induced Acute Liver Injury in Rats by Regulating Oxidative Stress, Mitochondrial Function, and Inflammation.

Aberrant miR-219-5p is correlated with TLR4 and serves as a novel biomarker in patients with multiple organ dysfunction syndrome caused by acute paraquat poisoning.

The protective impact of Trans-Cinnamaldehyde (TCA) against the IL-1b induced inflammation in in vitro osteoarthritis model by regulating PI3K/AKT pathways.

Toxicity of pesticides toward human immune cells U-937 and HL-60.

Immunosuppressive drugs to reduce the mortality rate in patients with moderate to severe paraquat poisoning: A Meta-analysis.

Oxidative stress, histopathological alterations and anti-oxidant capacity in different tissues of largemouth bass (*Micropterus salmoides*) exposed to a newly developed sodium carbonate peroxyhydrate granular algaecide formulated with hydrogen peroxide.

Involvement of ADAM10 in acrolein-induced astrocytic inflammation.

How to Use Cognitively Diagnostic Assessments of Student Performance as a Method for Monitoring and Managing the Instructional Quality in Undergraduate Medical Education.

Posterior reversible leukoencephalopathy after cyanamide overdose.

Ischemic stroke disrupts the endothelial glycocalyx through activation of proHPSE via acrolein exposure.

Disease-associated acrolein: A possible diagnostic and therapeutic substrate for in vivo synthetic chemistry.

Protective Effects of Cinnamaldehyde against Mesenteric Ischemia-Reperfusion-Induced Lung and Liver Injuries in Rats.

Anti-Allergic Potential of Cinnamaldehyde via the Inhibitory Effect of Histidine Decarboxylase (HDC) Producing *Klebsiella pneumoniae*.

Natural Cinnamaldehyde and Its Derivatives Ameliorate Neuroinflammatory Pathways in Neurodegenerative Diseases.

Endoplasmic reticulum stress-related neuroinflammation and neural stem cells decrease in mice exposure to paraquat.

Analysis of Acrolein Exposure Induced Pulmonary Response in Seven Inbred Mouse Strains and Human Primary Bronchial Epithelial Cells Cultured at Air-Liquid Interface.

Cinnamaldehyde Attenuates the Progression of Rheumatoid Arthritis through Down-Regulation of PI3K/AKT Signaling Pathway.

Inhibition of TBK1 by amlexanox attenuates paraquat-induced acute lung injury.

Acrolein Aggravates Secondary Brain Injury After Intracerebral Hemorrhage Through Drp1-Mediated Mitochondrial Oxidative Damage in Mice.

Coniferyl Aldehyde Inhibits the Inflammatory Effects of Leptomeningeal Cells by Suppressing the JAK2 Signaling.

Combination of ellagic acid and trans-cinnamaldehyde alleviates aging-induced cognitive impairment via modulation of mitochondrial function and inflammatory and apoptotic mediators in the prefrontal cortex of aged rats.

The modulatory effects of cinnamaldehyde on uric acid level and IL-6/JAK1/STAT3 signaling as a promising therapeutic strategy against benign prostatic hyperplasia.

Cinnamaldehyde protects against rat intestinal ischemia/reperfusion injuries by synergistic inhibition of NF- κ B and p53.

Cinnamaldehyde Treatment of Prostate Cancer-Associated Fibroblasts Prevents Their Inhibitory Effect on T Cells Through Toll-Like Receptor 4.

Co-hybridized composite nanovesicles for enhanced transdermal eugenol and cinnamaldehyde delivery and their potential efficacy in ulcerative colitis.

[Therapeutic effect of cinnamaldehyde on ulcerative colitis in mice induced by dextran sulfate sodium with *Candida albicans* colonization and its effect on dectin-1/TLRs/NF- κ B signaling pathway].

Cinnamaldehyde suppresses NLRP3 derived IL-1^β via activating succinate/HIF-1 in rheumatoid arthritis rats.

Cinnamaldehyde protects against oxidative stress and inhibits the TNF α -induced inflammatory response in human umbilical vein endothelial cells.

Klotho Alleviates Lung Injury Caused by Paraquat via Suppressing ROS/P38 MAPK-Regulated Inflammatory Responses and Apoptosis.

Cinnamaldehyde Inhibits Inflammation of Human Synoviocyte Cells Through Regulation of Jak/Stat Pathway and Ameliorates Collagen-Induced Arthritis in Rats.

Biogenic selenium nanoparticles synthesized by *Lactobacillus casei* ATCC 393 alleviate diquat-induced intestinal barrier dysfunction in C57BL/6 mice through their antioxidant activity.

Poloxamer 188-mediated anti-inflammatory effect rescues cognitive deficits in paraquat and maneb-induced mouse model of Parkinson's disease.

Rationally Designed Polymer Conjugate for Tumor-Specific Amplification of Oxidative Stress and Boosting Antitumor Immunity.

The polypharmacy reduction potential of cinnamic acids and some related compounds in pre- and post-onset management of type 2 diabetes mellitus.

Stephalagine, an aporphine alkaloid from *Annona crassiflora* fruit peel, induces antinociceptive effects by TRPA1 and TRPV1 channels modulation in mice.

Glyphosate Excretion is Associated With Steatohepatitis and Advanced Liver Fibrosis in Patients With Fatty Liver Disease.

Untargetted Metabolomic Exploration of the *Mycobacterium tuberculosis* Stress Response to Cinnamon Essential Oil.

Ingestion of organic acids and cinnamaldehyde improves tissue homeostasis of piglets exposed to enterotoxigenic *Escherichia coli* (ETEC).

Glyphosate exposures and kidney injury biomarkers in infants and young children.

Cinnamaldehyde: a compound with antimicrobial and synergistic activity against ESBL-producing quinolone-resistant pathogenic Enterobacteriaceae.

Cinnamon extract inhibits allergen-specific immune responses in human and murine allergy models.

Cinnamaldehyde Analogs: Docking Based Optimization, COX-2 Inhibitory In Vivo and In Vitro Studies.

Use of low-molecular-weight heparin in severe paraquat poisoning: a case report.

Pterocarpus mildbraedii (Harms) extract resolves propanil-induced hepatic injury via repression of inflammatory stress responses in Wistar rats.

Anti-Inflammatory Activity and ROS Regulation Effect of Sinapaldehyde in LPS-Stimulated RAW 264.7 Macrophages.

Sub-lethal toxicity assessment of the phenylurea herbicide linuron in developing zebrafish (*Danio rerio*) embryo/larvae.

A simple on-line detection system based on fiber-optic sensing for the realtime monitoring of fixed bed adsorption processes of molecularly imprinted polymers.

Meta-analysis of the efficacy of Xuebijing combined with hemoperfusion in treating paraquat poisoning.

Blood biomarkers of herbicide, insecticide, and fungicide toxicity to fish-a review.

Do trifluralin and tebuthiuron impair isolated rat liver mitochondria?

Modification of HDL by reactive aldehydes alters select cardioprotective functions of HDL in macrophages.

Cinnamaldehyde Enhanced Functional Recovery after Sciatic Nerve Crush Injury in Rats.

Aryl hydrocarbon receptor (AHR)-mediated inflammation and resolution: Non-genomic and genomic signaling.

Integrative transcriptomics and metabolomics explore the mechanism of kaempferol on improving nonalcoholic steatohepatitis.

Randomized, Placebo-Controlled Trial of Rifaximin Therapy for Lowering Gut-Derived Cardiovascular Toxins and Inflammation in CKD.

Metabolic and Hematological Responses to Endotoxin-Induced Inflammation in Chicks Experiencing Embryonic 2,3,7,8-Tetrachlorodibenzodioxin Exposure.

Mucoadhesive microspheres of ferrous sulphate - A novel approach for oral iron delivery in treating anemia.

Levels of polychlorinated biphenyls and organochlorine pesticides in donkey milk: Correlation with the infection level by intestinal strongyles.

Nephroprotective effects of chlorogenic acid against sodium arsenite-induced oxidative stress, inflammation, and apoptosis.

Thymoquinone protection against 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin induced nephrotoxicity in rats.

From Suppressor T cells to Regulatory T cells: How the Journey That Began with the Discovery of the Toxic Effects of TCDD Led to Better Understanding of the Role of AhR in Immunoregulation.

Inflammation response after the cessation of chronic arsenic exposure and post-treatment of natural astaxanthin in liver: potential role of cytokine-mediated cell-cell interactions.

[Omphalomesenteric fistulas; epidemiological diagnostic and therapeutic features: study of four cases in the Department of Pediatric Surgery at the Aristide Le Dantec University Hospital in Dakar].

Autophagy mediates bronchial cell malignant transformation induced by chronic arsenic exposure via MEK/ERK1/2 pathway.

Glufosinate constrains synchronous and metachronous metastasis by promoting anti-tumor macrophages.

Dexamethasone-Loaded Thermosensitive Hydrogel Suppresses Inflammation and Pain in Collagen-Induced Arthritis Rats.

Baicalein Restores the Balance of Th17/Treg Cells via Aryl Hydrocarbon Receptor to Attenuate Colitis.

Mechanisms and pathogenesis underlying environmental chemical-induced necroptosis.

Developmental 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure of either parent enhances the risk of necrotizing enterocolitis in neonatal mice.

Serum concentrations of pesticides including organophosphates, pyrethroids and neonicotinoids in a population with osteoarthritis in Saudi Arabia.

Effects of p-Cresol on Senescence, Survival, Inflammation, and Odontoblast Differentiation in Canine Dental Pulp Stem Cells.

Arsenic induces dose-dependent structural and ultrastructural pathological remodeling in the heart of Wistar rats.

p-Cresol Sulfate Caused Behavior Disorders and Neurodegeneration in Mice with Unilateral Nephrectomy Involving Oxidative Stress and Neuroinflammation.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) dysregulates hepatic one carbon metabolism during the progression of steatosis to steatohepatitis with fibrosis in mice.

The Succession of Flies of Forensic Importance Is Influenced by Volatiles Organic Compounds Emitted During the First Hours of Decomposition of Chicken Remains.

Blood vessels are primary targets for 2,3,7,8-tetrachlorodibenzo-p-dioxin in pre-cardiac edema formation in larval zebrafish.

Effects of 2,3,7,8-Tetrachlorodibenzo-p-dioxin on T Cell Differentiation in Primary Biliary Cholangitis.

TCDD promotes liver fibrosis through disordering systemic and hepatic iron homeostasis.

Aryl hydrocarbon receptor (AHR) functions: Balancing opposing processes including inflammatory reactions.

Single-cell RNA-seq Analysis Reveals That Prenatal Arsenic Exposure Results in Long-term, Adverse Effects on Immune Gene Expression in Response to Influenza A Infection.

Extracellular Vesicles Attenuate Nitrofen-Mediated Human Pulmonary Artery Endothelial Dysfunction: Implications for Congenital Diaphragmatic Hernia.

Scavenging Intracellular ROS Attenuates p-Cresyl Sulfate-Triggered Osteogenesis through MAPK Signaling Pathway and NF- κ B Activation in Human Arterial Smooth Muscle Cells.

Wheat flour fortification with iron for reducing anaemia and improving iron status in populations.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) alters hepatic polyunsaturated fatty acid metabolism and eicosanoid biosynthesis in female Sprague-Dawley rats.

Leucine-rich repeat kinase-2 (LRRK2) modulates microglial phenotype and dopaminergic neurodegeneration.

Role of endothelial microvesicles released by p-cresol on endothelial dysfunction.

Marrubium vulgare L.: A Phytochemical and Pharmacological Overview.

Uremic Toxins and Vascular Dysfunction.

Cenobamate (YKP3089) as adjunctive treatment for uncontrolled focal seizures in a large, phase 3, multicenter, open-label safety study.

Prebiotic inulin consumption reduces dioxin-like PCB 126-mediated hepatotoxicity and gut dysbiosis in hyperlipidemic Ldlr deficient mice.

Therapeutic potential of aryl hydrocarbon receptor ligands derived from natural products in rheumatoid arthritis.

Transgenerational epigenetic and transcriptomic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure in rat.

Iron pill-induced duodenitis: A distinct pattern of duodenal mucosal injury in a patient with a duodenal mass.

Identification of environmental chemicals targeting miscarriage genes and pathways using the comparative toxicogenomics database.

A murine model of Staphylococcus aureus infected chronic diabetic wound: A new tool to develop alternative therapeutics.

Streptococcal H₂O₂ inhibits IgE-triggered degranulation of RBL-2H3 mast cell/basophil cell line by inducing cell death.

Gut-Derived Metabolites and Their Role in Immune Dysfunction in Chronic Kidney Disease.

Topical Ascorbic Acid Ameliorates Oxidative Stress-Induced Corneal Endothelial Damage via Suppression of Apoptosis and Autophagic Flux Blockage.

A combination of monosodium glutamate and high-fat and high-fructose diets increases the risk of kidney injury, gut dysbiosis and host-microbial co-metabolism.

COVID-19: Hygiene and Public Health to the front.

Metabolomic alternations of follicular fluid of obese women undergoing in-vitro fertilization treatment.

Fractional iron absorption from enteric-coated ferrous sulphate tablet.

Lactobacillus salivarius BP121 prevents cisplatin-induced acute kidney injury by inhibition of uremic toxins such as indoxyl sulfate and p-cresol sulfate via alleviating dysbiosis.

Embelin impact on paraquat-induced lung injury through suppressing oxidative stress, inflammatory cascade, and MAPK/NF- κ B signaling pathway.

Cardioprotective role of metformin against sodium arsenite-induced oxidative stress, inflammation, and apoptosis.

Postinflammatory hypopigmentation due to ferrous sulphate.

Role of Aryl Hydrocarbon Receptor Activation and Autophagy in Psoriasis-Related Inflammation.

The anti-inflammatory effect of omega-3 polyunsaturated fatty acids dramatically decreases by iron in the hippocampus of diabetic rats.

Isolation and Quantification of Uremic Toxin Precursor-Generating Gut Bacteria in Chronic Kidney Disease Patients.

A Case of a 15-Month-Old With Periorbital Edema and Severe Anemia.

Simple and visible detection of duck hepatitis B virus in ducks and geese using loop-mediated isothermal amplification.

Chlorogenic acid prevents hepatotoxicity in arsenic-treated mice: role of oxidative stress and apoptosis.

Longitudinal association of biomarkers of pesticide exposure with cardiovascular disease risk factors in youth with diabetes.

Cecal Tumorigenesis in Aryl Hydrocarbon Receptor-Deficient Mice Depends on Cecum-Specific Mitogen-Activated Protein Kinase Pathway Activation and Inflammation.

Higher cerebrospinal fluid to plasma ratio of p-cresol sulfate and indoxyl sulfate in patients with Parkinson's disease.

Tagetnoic acid, a new lipoxygenase inhibitor peroxy fatty acid from *Tagetes minuta* growing in Saudi Arabia.

Molecular and Cellular Mechanisms that Induce Arterial Calcification by Indoxyl Sulfate and P-Cresyl Sulfate.

High-throughput sequencing analysis of intestinal flora changes in ESRD and CKD patients.

[The use of retinoids to stimulate the regenerative process in trepanation cavity after "open" sanitizing surgery on the middle ear].

Bibliometrics and Visualization of the Mechanisms of Parkinson's Diseases Based on Animal Models.

A mitochondrial uncoupler prodrug protects dopaminergic neurons and improves functional outcome in a mouse model of Parkinson's disease.

Procyanidin B2 Suppresses Lipopolysaccharides-Induced Inflammation and Apoptosis in Human Type II Alveolar Epithelial Cells and Lung Fibroblasts.

Arsenic-induced immunomodulatory effects disorient the survival-death interface by stabilizing the Hsp90/Beclin1 interaction.

Distribution and Determinants of Chronic Kidney Disease of Unknown Etiology: A Brief Overview.

Uremic toxins promote accumulation of oxidized protein and increased sensitivity to hydrogen peroxide in endothelial cells by impairing the autophagic flux.

Cyclophosphamide-induced cystitis results in NLRP3-mediated inflammation in the hippocampus and symptoms of depression in rats.

Comparing the Neuroprotective Effects of Caffeic Acid in Rat Cortical Slices and *Caenorhabditis elegans*: Involvement of Nrf2 and SKN-1 Signaling Pathways.

Anti-inflammatory Effect of AZD6244 on Acrolein-Induced Neuroinflammation.

A systematic review on hepatoprotective activity of quercetin against various drugs and toxic agents: Evidence from preclinical studies.

The Protective Effect of Aspirin Eugenol Ester on Paraquat-Induced Acute Liver Injury Rats.

The Metabolomics of Childhood Atopic Diseases: A Comprehensive Pathway-Specific Review.

Telomeric injury by KML001 in human T cells induces mitochondrial dysfunction through the p53-PGC-1 β pathway.

Oral mucosa changes associated with chronic oral and inhalation exposure to 2,4-dichlorophenoxyacetic acid (2,4-D) in Wistar rats.

Mucuna pruriens in Parkinson's and in some other diseases: recent advancement and future prospective.

An aryl hydrocarbon receptor agonist suppresses the growth of human umbilical vein endothelial cells in vitro: Potent effect with polyunsaturated fatty acids.

Metabolomics Profiling and Diagnosis Biomarkers Searching for Drug-Induced Liver Injury Implicated to *Polygonum multiflorum*: A Cross-Sectional Cohort Study.

Aspirin Eugenol Ester Protects Vascular Endothelium From Oxidative Injury by the Apoptosis Signal Regulating Kinase-1 Pathway.

Sub-ohm vaping increases the levels of carbonyls, is cytotoxic, and alters gene expression in human bronchial epithelial cells exposed at the air-liquid interface.

Uremic toxic substances are essential elements for enhancing carotid artery stenosis after balloon-induced endothelial denudation: worsening role of the adventitial layer.

A Comprehensive Review on Source, Types, Effects, Nanotechnology, Detection, and Therapeutic Management of Reactive Carbonyl Species Associated with Various Chronic Diseases.

Environmental neurotoxic pollutants: review.

Aspirin Eugenol Ester Attenuates Paraquat-Induced Hepatotoxicity by Inhibiting Oxidative Stress.

Continuous, Automated Breathing Rate and Body Motion Monitoring of Rats With Paraquat-Induced Progressive Lung Injury.

Behavioral Tests in Neurotoxin-Induced Animal Models of Parkinson's Disease.

Nanoconfined Crosslinked Poly(ionic liquid)s with Unprecedented Selective Swelling Properties Obtained by Alkylation in Nanophase-Separated Poly(1-vinylimidazole)-I-poly(tetrahydrofuran) Conetworks.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin Regulates the Expression of Aryl Hydrocarbon Receptor-Related Factors and Cytokines in Peripheral Blood Mononuclear Cells and CD4+ T cells from Patients with Atopic Dermatitis and Psoriasis.

Serum metabolic changes associated with dioxin exposure in a Chinese male cohort.

Xanthohumol Effect on 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Treated Japanese Quails in Terms of Serum Lipids, Liver Enzymes, Estradiol, and Thyroid Hormones.

Regulation of the Morphological and Physical Properties of a Soft Tissue Scaffold by Manipulating DD and DS of O-Carboxymethyl Chitin.

Dibenzoylthiamine Has Powerful Antioxidant and Anti-Inflammatory Properties in Cultured Cells and in Mouse Models of Stress and Neurodegeneration.

Exposures to uranium and arsenic alter intraepithelial and innate immune cells in the small intestine of male and female mice.

Formulation and Characterization of Alginate Dialdehyde, Gelatin, and Platelet-Rich Plasma-Based Bioink for Bioprinting Applications.

Paraquat-induced systemic inflammation and increased oxidative markers in rats improved by Zataria multiflora extract and carvacrol.

Adverse effects of pesticides on the functions of immune system.

The Protective Effect of Xanthohumol on the Content of Selected Elements in the Bone Tissue for Exposed Japanese Quails to TCDD.

Varying Protein Levels Influence Metabolomics and the Gut Microbiome in Healthy Adult Dogs.

How the AHR Became Important in Intestinal Homeostasis-A Diurnal FICZ/AHR/CYP1A1 Feedback Controls Both Immunity and Immunopathology.

Mitigation of arsenic driven utero-ovarian malfunction and changes of apoptotic gene expression by dietary NAC.

Chronic arsenic exposure induces the time-dependent modulation of inflammation and immunosuppression in spleen.

Morphological and Swelling Potential Evaluation of Moringa oleifera Gum/Poly(vinyl alcohol) Hydrogels as a Superabsorbent.

Kaempferol Protects Blood Vessels From Damage Induced by Oxidative Stress and Inflammation in Association With the Nrf2/HO-1 Signaling Pathway.

Short-term e-cigarette vapour exposure causes vascular oxidative stress and dysfunction: evidence for a close connection to brain damage and a key role of the phagocytic NADPH oxidase (NOX-2).

Uroprotective mechanisms of natural products against cyclophosphamide-induced urinary bladder toxicity: A comprehensive review.

Dioxin-like and non-dioxin-like PCBs differentially regulate the hepatic proteome and modify diet-induced nonalcoholic fatty liver disease severity.

Carvacrol and Zataria multiflora influenced the PPAR α agonist effects on systemic inflammation and oxidative stress induced by inhaled paraquat in rat.

Platelet-Rich Fibrin Can Neutralize Hydrogen Peroxide-Induced Cell Death in Gingival Fibroblasts.

Complex Regulatory Role of the TRPA1 Receptor in Acute and Chronic Airway Inflammation Mouse Models.

Polydatin relieves paraquat-induced human MRC-5 fibroblast injury through inhibiting the activation of the NLRP3 inflammasome.

Ansamycin derivatives from the marine-derived Streptomyces sp. SCSGAA 0027 and their cytotoxic and antiviral activities.

Iron Overload in Gastric Mucosa: Underdiagnosed Condition Rarely Documented in Clinical and Pathology Reports.

Microglia depletion prior to lipopolysaccharide and paraquat treatment differentially modulates behavioral and neuronal outcomes in wild type and G2019S LRRK2 knock-in mice.

Sustained release of vancomycin from bacterial cellulose membrane as dural substitutes for anti-inflammatory wound closure in rabbits.

Pro-inflammatory cytokines, oxidative stress and diffuse coronary reocclusions in elderly patients after coronary stenting.

Exposure effects of iron oxide nanoparticles and iron salts in blackfish (*Capoeta fusca*): Acute toxicity, bioaccumulation, depuration, and tissue histopathology.

Paraquat Poisoning: A Retrospective Study of 55 Patients From a Tertiary Care Center in Southern India.

Clinical significance of serum levels of microRNA-27a and its correlation with interleukin-10 in patients with multiple organ dysfunction syndrome caused by acute paraquat poisoning.

Uncovering pathophysiological changes in frontotemporal dementia using serum lipids.

Effect of cAMP Receptor Protein Gene on Growth Characteristics and Stress Resistance of *Haemophilus parasuis* Serovar 5.

Bioisosteric Replacement of Amide Group with 1,2,3-Triazoles in Acetaminophen Addresses Reactive Oxygen Species-Mediated Hepatotoxic Insult in Wistar Albino Rats.

Curcumin Attenuates Acrolein-induced COX-2 Expression and Prostaglandin Production in Human Umbilical Vein Endothelial Cells.

Graves' disease: Epidemiology, genetic and environmental risk factors and viruses.

An Analysis of Biomarkers in Patients with Chronic Pain.

Sub-chronic exposure to Kalach 360 SL-induced damage in rats' liver and hematological system.

Diosmin ameliorative effects on oxidative stress and fibrosis in paraquat-induced lung injury in mice.

Atrazine-induced toxicity in goat spermatozoa is alleviated to some extent by polyphenol-enriched feed.

Immunotoxicity and transcriptome analysis of zebrafish embryos in response to glufosinate-ammonium exposure.

Curcumin relieves paraquat-induced lung injury through inhibiting the thioredoxin interacting protein/NLR pyrin domain containing 3-mediated inflammatory pathway.

Single and joint effects of chronic exposure to chlorpyrifos and glyphosate based pesticides on structural biomarkers in *Cnesterodon decemmaculatus*.

Comparative molecular and metabolic responses of wheat seedlings (*Triticum aestivum* L.) to the imazethapyr enantiomers S-IM and R-IM.

Factors adversely influencing neurodevelopment.

[Xuebijing improves clinical prognosis and reduces mortality in patients with acute paraquat poisoning: a Meta-analysis included 1 429 patients].

Atrazine induces necroptosis by miR-181-5p targeting inflammation and glycometabolism in carp lymphocytes.

The organochlorine pesticides pentachlorophenol and dichlorodiphenyltrichloroethane increase secretion and production of interleukin 6 by human immune cells.

Genotoxic, cytotoxic, and cytopathological effects in rats exposed for 18 months to a mixture of 13 chemicals in doses below NOAEL levels.

Metformin Activates the Protective Effects of the AMPK Pathway in Acute Lung Injury Caused by Paraquat Poisoning.

Hepatoprotective effect of N-acetylcystein loaded niosomes on liver function in paraquat-induced acute poisoning.

Nuclear receptor AHR-mediated xenobiotic detoxification pathway involves in atrazine-induced nephrotoxicity in quail (*Coturnix C. coturnix*).

Protective mechanism of 1-methylhydantoin against lung injury induced by paraquat poisoning.

Comparison of four pharmacological strategies aimed to prevent the lung inflammation and paraquat-induced alveolar damage.

Innate immune responses to paraquat exposure in a Drosophila model of Parkinson's disease.

Ameliorative role of aspirin in paraquat-induced lung toxicity via mitochondrial mechanisms.

Xenobiotic mediated diabetogenesis: Developmental exposure to dichlorvos or atrazine leads to type 1 or type 2 diabetes in Drosophila.

Paraquat modulates microglia M1/M2 polarization via activation of TLR4-mediated NF- κ B signaling pathway.

Biochemical and molecular impacts of glyphosate-based herbicide on the gills of common carp.

Maternal glyphosate-based herbicide exposure alters antioxidant-related genes in the brain and serum metabolites of male rat offspring.

Mortality, teratogenicity and growth inhibition of three glyphosate formulations using Frog Embryo Teratogenesis Assay-Xenopus.

Subacute acrolein exposure to rat larynx in vivo.

Spirometric Pulmonary Restriction in Herbicide-Exposed U.S. Vietnam War Veterans.

[Protective effects of oligomeric proanthocyanidins in mice exposed to paraquat].

Exposures to the environmental contaminants pentachlorophenol and dichlorodiphenyltrichloroethane increase production of the proinflammatory cytokine, interleukin-1 β , in human immune cells.

Reduning injection ameliorates paraquat-induced acute lung injury by regulating AMPK/MAPK/NF- κ B signaling.

Systematic review and meta-analysis of the efficacy and safety of immunosuppressive pulse therapy in the treatment of paraquat poisoning.

Mechanisms behind the atherothrombotic effects of acrolein, a review.

Leucine-rich repeat kinase-2 (LRRK2) modulates paraquat-induced inflammatory sickness and stress phenotype.

Glimepiride prevents paraquat-induced Parkinsonism in mice: involvement of oxidative stress and neuroinflammation.

Inflammatory Effects of Subacute Exposure of Roundup in Rat Liver and Adipose Tissue.

[Establishment and evaluation of acute diquat poisoning model in Wistar rats].

Retrospective study of clinical features and prognosis of edaravone in the treatment of paraquat poisoning.

Homicidal Paraquat Poisoning.

The Alexipharmic Mechanisms of Five Licorice Ingredients Involved in CYP450 and Nrf2 Pathways in Paraquat-Induced Mice Acute Lung Injury.

[Lung transplantation in patients with paraquat poisoning: a case report and literature review].

TLR3 is involved in paraquat-induced acute renal injury.

Mesenchymal Stem Cells Alleviate Acute Lung Injury and Inflammatory Responses Induced by Paraquat Poisoning.

Role of bone marrow mesenchymal stem cells in the development of PQ-induced pulmonary fibrosis.

NADPH oxidase regulates paraquat and maneb-induced dopaminergic neurodegeneration through ferroptosis.

High-Dose Paraquat Induces Human Bronchial 16HBE Cell Death and Aggravates Acute Lung Intoxication in Mice by Regulating Keap1/p65/Nrf2 Signal Pathway.

Long-term Immunotoxic Effects of Oral Prenatal and Neonatal Atrazine Exposure.

Setal-epidermal, muscular and enzymatic anomalies induced by certain agrochemicals in the earthworm *Eudrilus eugeniae* (Kinberg).

Physiological responses of eelgrass (*Zostera marina*) to ambient stresses such as herbicide, insufficient light, and high water temperature.

Clethodim exposure induces developmental immunotoxicity and neurobehavioral dysfunction in zebrafish embryos.

Dietary Tributyrin Attenuates Intestinal Inflammation, Enhances Mitochondrial Function, and Induces Mitophagy in Piglets Challenged with Diquat.

Inhibiting expression of HSP60 and TLR4 attenuates paraquat-induced microglial inflammation.

Aspirin-triggered resolvin D1 alleviates paraquat-induced acute lung injury in mice.

Effects of AT-RvD1 on paraquat-induced acute renal injury in mice.

The effects of 1%-3 fish oil emulsion-based parenteral nutrition plus combination treatment for acute paraquat poisoning.

Increased 90-Day Mortality in Spontaneously Breathing Patients With Paraquat Poisoning: In Addition to Disease Severity, Lung Strain May Play a Role.

Protective and anti-inflammatory effects of hydroalcoholic leaf extract of *Origanum vulgare* on oxidative stress, TNF- α gene expression and liver histological changes in paraquat-induced hepatotoxicity in rats.

Environmental Control of Astrocyte Pathogenic Activities in CNS Inflammation.

Claudins, VEGF, Nrf2, Keap1, and Nonspecific Airway Hyper-Responsivity Are Increased in Mice Co-Exposed to Allergen and Acrolein.

Resveratrol improves intestinal barrier function, alleviates mitochondrial dysfunction and induces mitophagy in diquat challenged piglets(1).

Pequi enriched diets protect *Drosophila melanogaster* against paraquat-induced locomotor deficits and oxidative stress.

Dual drug-loaded cubic liquid crystal gels for transdermal delivery: inner structure and percutaneous mechanism evaluations.

In vitro activity of carvacrol, cinnamaldehyde and thymol combined with antifungals against *Malassezia pachydermatis*.

Side Effects of Coronary Stenting such as Severe Coronary Stenosis and Multiple Coronary Chronic Total Occlusions in Elderly Patients via Induced Proinflammatory and Prooxidative Stress.

Cardioprotective Effects of Atorvastatin Are Mediated Through PPAR α in Paraquat-Exposed Rats.

Trans-cinnamaldehyde improves neuroinflammation-mediated NMDA receptor dysfunction and memory deficits through blocking NF- κ B pathway in presenilin1/2 conditional double knockout mice.

Effect of Fenofibrate on the Expression of Inflammatory Mediators in a Diabetic Rat Model.

Cinnamaldehyde attenuates atherosclerosis via targeting the I κ B/NF- κ B signaling pathway in high fat diet-induced ApoE(-/-) mice.

Photobiomodulation therapy reduces acute pain and inflammation in mice.

Doxycycline alleviates paraquat-induced acute lung injury by inhibiting neutrophil-derived matrix metalloproteinase 9.

[Cinnamaldehyde attenuates lipopolysaccharide induced inflammation and apoptosis in human umbilical vein endothelial cells].

Anti-oxidant and anti-inflammatory effects of cinnamaldehyde and eugenol on mononuclear cells of rheumatoid arthritis patients.

trans-Cinnamaldehyde mitigated intestinal inflammation induced by *Cronobacter sakazakii* in newborn mice.

Anti-inflammatory effect of trans-4-methoxycinnamaldehyde from *Etilingera pavieana* in LPS-stimulated macrophages mediated through inactivation of NF- κ B and JNK/c-Jun signaling pathways and in rat models of acute inflammation.

Trans-Cinnamaldehyde Inhibits IL-1 β -Stimulated Inflammation in Chondrocytes by Suppressing NF- κ B and p38-JNK Pathways and Exerts Chondrocyte Protective Effects in a Rat Model of Osteoarthritis.

Radix *Tetragium* flavonoid ameliorates inflammation and prolongs the lifespan of *Caenorhabditis elegans* through JNK, p38 and Nrf2 pathways.

Protective effects of febuxostat against paraquat-induced lung toxicity in rats: Impact on RAGE/PI3K/Akt pathway and downstream inflammatory cascades.

Cinnamaldehyde and eugenol attenuates collagen induced arthritis via reduction of free radicals and pro-inflammatory cytokines.

Suppression of miR-21 and miR-155 of macrophage by cinnamaldehyde ameliorates ulcerative colitis.

Cinnamaldehyde ameliorates STZ-induced rat diabetes through modulation of IRS1/PI3K/AKT2 pathway and AGEs/RAGE interaction.

Urinary acrolein metabolite levels in severe acute alcoholic hepatitis patients.

Amino Acid Biosynthetic Pathways Are Required for *Klebsiella pneumoniae* Growth in Immunocompromised Lungs and Are Druggable Targets during Infection.

Biological effect of protein modifications by lipid peroxidation products.

Redox-dependent catalase mimetic cerium oxide-based nanozyme protect human hepatic cells from 3-AT induced acatalasemia.

Multidrug resistance of the extended-spectrum beta-lactamase-producing *Klebsiella pneumoniae* isolated in Tizi-Ouzou (Algeria).

[Brain abscess revealing trilogy of Fallot in a child: about a case at the University Teaching Hospital of Parakou, Benin].

Hypertension in Relation to Dioxins and Polychlorinated Biphenyls from the Anniston Community Health Survey Follow-Up.

Activation of aryl hydrocarbon receptor by dioxin directly shifts gut microbiota in zebrafish.

Aryl hydrocarbon receptor pathway: Role, regulation and intervention in atherosclerosis therapy (Review).

Disease modifying mitochondrial uncouplers, MP101, and a slow release ProDrug, MP201, in models of Multiple Sclerosis.

The gut microbiota and its relationship with chronic kidney disease.

Plasma Metabolic Profiling Analysis of Gout Party on Acute Gout Arthritis Rats Based on UHPLC-Q-TOF/MS Combined with Multivariate Statistical Analysis.

Lesion of the Locus Coeruleus Damages Learning and Memory Performance in Paraquat and Maneb-induced Mouse Parkinson's Disease Model.

Functions of aryl hydrocarbon receptor (AHR) and CD38 in NAD metabolism and nonalcoholic steatohepatitis (NASH).

Increase of core temperature affected the progression of kidney injury by repeated heat stress exposure.

Administration of ferrous sulfate drops has significant effects on the gut microbiota of iron-sufficient infants: a randomised controlled study.

The Colonization of Necrophagous Larvae Accelerates the Decomposition of Chicken Carcass and the Emission of Volatile Attractants for Blowflies (Diptera: Calliphoridae).

NLRX1 Regulation Following Acute Mitochondrial Injury.

Radiomics Nomogram Analyses for Differentiating Pneumonia and Acute Paraquat Lung Injury.

[Clinical observation on the inflammatory indexes in septic gastrointestinal dysfunction treated with acupuncture at Jiaji (EX-B 2)].

AhR Activation Leads to Massive Mobilization of Myeloid-Derived Suppressor Cells with Immunosuppressive Activity through Regulation of CXCR2 and MicroRNA miR-150-5p and miR-543-3p That Target Anti-Inflammatory Genes.

Impaired intestinal barrier function in a mouse model of hyperuricemia.

Dietary iron deficiency impaired intestinal immune function of on-growing grass carp under the infection of *Aeromonas hydrophila*: Regulation of NF- κ B and TOR signaling.

Design, synthesis and biological evaluation of novel FFA1/GPR40 agonists: New breakthrough in an old scaffold.

Unravelling the binding affinity between model transport protein and a prospective tuberculosis therapeutic agent: a spectroscopic and theoretical simulation exploration.

Novel polymerase spiral reaction assay for the visible molecular detection of porcine circovirus type 3.

Asymptomatic *Helicobacter Pylori* Infection in Preschool Children and Young Women Does Not Predict Iron Bioavailability from Iron-Fortified Foods.

Can contamination of the environment by dioxins cause craniofacial defects?

Dietary CCPS from bitter melon attenuates sodium arsenite induced female reproductive ailments cum infertility in wistar rats: anti-inflammatory and anti-apoptotic role.

Understanding Environmental Contaminants' Direct Effects on Non-alcoholic Fatty Liver Disease Progression.

CDK4/6 inhibitor palbociclib suppresses IgE-mediated mast cell activation.

Fecal Changes Following Introduction of Milk in Infants With Outgrowing Non-IgE Cow's Milk Protein Allergy Are Influenced by Previous Consumption of the Probiotic LGG.

The potential therapeutic benefit of resveratrol on Th17/Treg imbalance in immune thrombocytopenic purpura.

Interleukin 33 Expression Induced by Aryl Hydrocarbon Receptor in Macrophages.

Effects of dietary fat on gut microbiota and faecal metabolites, and their relationship with cardiometabolic risk factors: a 6-month randomised controlled-feeding trial.

Comparison of iron-reduced and iron-supplemented semisynthetic diets in T cell transfer colitis.

Gene expression alterations of human liver cancer cells following borax exposure.

Co-expression of the aryl hydrocarbon receptor and estrogen receptor in the developing teeth of rat offspring after rat mothers' exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin and the protective action of α -tocopherol and acetylsalicylic acid.

Genome-Wide Transcriptional Analysis Reveals Novel AhR Targets That Regulate Dendritic Cell Function during Influenza A Virus Infection.

Involvement of proinflammatory cytokines and metallothionein in the repairing of arsenic-mediated uterine tissue damage by curcumin.

Extragenital cutaneous warts - clinical presentation, diagnosis and treatment.

Role of dantrolene in dinitrophenol (DNP) overdose: A continuing question?

Rapid Analysis of Effects of Environmental Toxicants on Tumorigenesis and Inflammation Using a Transgenic Zebrafish Model for Liver Cancer.

Wound healing potential of oil extracted from *Parrotiopsis jacquemontiana* (Decne) Rehder.

Disruption of Telomere Integrity and DNA Repair Machineries by KML001 Induces T Cell Senescence, Apoptosis, and Cellular Dysfunctions.

High temperature aggravates the effects of pesticides in goldfish.

3-Methylcholanthrene Induces Chylous Ascites in TCDD-Inducible Poly-ADP-Ribose Polymerase (Tiparp) Knockout Mice.

Aromatic hydrocarbon receptor provides a link between smoking and rheumatoid arthritis in peripheral blood mononuclear cells.

Chiral phenoxyacetic acid analogues inhibit colon cancer cell proliferation acting as PPAR γ partial agonists.

Inhibition of NADPH oxidase by apocynin prevents learning and memory deficits in a mouse Parkinson's disease model.

Mangiferin alleviates arsenic induced oxidative lung injury via upregulation of the Nrf2-HO1 axis.

MIF inhibition enhances pulmonary angiogenesis and lung development in congenital diaphragmatic hernia.

Role of thymoquinone and ebselen in the prevention of sodium arsenite-induced nephrotoxicity in female rats.

3-Methyl-4-nitrophenol triggers nasal allergy by modulating dendritic cell properties.

Crizotinib-induced erosive esophagitis in a pediatric patient with neuroblastoma.

Role of Aryl Hydrocarbon Receptor (AhR) in the Regulation of Immunity and Immunopathology During *Trypanosoma cruzi* Infection.

PCB 126 induces monocyte/macrophage polarization and inflammation through AhR and NF- κ B pathways.

Cardiovascular Effects of PCB 126 (3,3',4,4',5-Pentachlorobiphenyl) in Zebrafish Embryos and Impact of Co-Exposure to Redox Modulating Chemicals.

A novel target for the promotion of dermal wound healing: Ryanodine receptors.

The aquaporin-4 inhibitor AER-271 blocks acute cerebral edema and improves early outcome in a pediatric model of asphyxial cardiac arrest.

hsa-miR-500a-3P alleviates kidney injury by targeting MLKL-mediated necroptosis in renal epithelial cells.

Sodium arsenite exposure impairs B cell proliferation and enhances vascular inflammation in *Plasmodium berghei* mouse model.

Mitochondrial Impairment in Oligodendroglial Cells Induces Cytokine Expression and Signaling.

Targeted deletion of the aryl hydrocarbon receptor in dendritic cells prevents thymic atrophy in response to dioxin.

Stars Are Not in Outer Space: Astrocytes Respond to Environmental Cues.

Polychlorinated biphenyl exposures differentially regulate hepatic metabolism and pancreatic function: Implications for nonalcoholic steatohepatitis and diabetes.

Thermographic evaluation of experimental pleurisy induced by carrageenan and modified by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Development of a database on key characteristics of human carcinogens.

Depressed prostaglandins and leukotrienes in veterans with Gulf War illness.

Protein-Bound Solute Clearance During Hemodialysis.

Exposure to environmental concentrations of hexachlorobenzene induces alterations associated with endometriosis progression in a rat model.

Sulforaphane promotes chlamydial infection by suppressing mitochondrial protein oxidation and activation of complement C3.

Prepubertal exposure to low doses of sodium arsenite impairs spermatogenesis and epididymal histophysiology in rats.

Effects of Simvastatin on Fetal Cardiac Impairment in the Diaphragmatic Experimental Hernia Model.

Aryl Hydrocarbon Receptor Modulates the Expression of TNF- α and IL-8 in Human Sebocytes via the MyD88-p65NF- κ B/p38MAPK Signaling Pathways.

Assessment of Acute Serum Iron, Non-Transferrin-Bound Iron, and Gastrointestinal Symptoms with 3-Week Consumption of Iron-Enriched *Aspergillus oryzae* Compared with Ferrous Sulfate.

Coupling the Patern \tilde{A}^2 -B \tilde{A} $\frac{1}{2}$ chi (PB) Reaction With Mass Spectrometry to Study Unsaturated Fatty Acids in Mouse Model of Multiple Sclerosis.

Activation of cannabinoid receptor type 2 reduces lung ischemia reperfusion injury through PI3K/Akt pathway.

Gut Microbiota in Alcoholic Hepatitis is Disparate from Those in Acute Alcoholic Pancreatitis and Biliary Disease.

Therapeutic potential of *Origanum vulgare* leaf hydroethanolic extract against renal oxidative stress and nephrotoxicity induced by paraquat in rats.

The Customizable E-cigarette Resistance Influences Toxicological Outcomes: Lung Degeneration, Inflammation, and Oxidative Stress-Induced in a Rat Model.

Cholestatic liver disease results increased production of reactive aldehydes and an atypical periportal hepatic antioxidant response.

AhR Activation by TCDD (2,3,7,8-Tetrachlorodibenzo-p-dioxin) Attenuates Pertussis Toxin-Induced Inflammatory Responses by Differential Regulation of Tregs and Th17 Cells Through Specific Targeting by microRNA.

Estrogen withdrawal and replacement differentially target liver and adipose tissues in female mice fed a high-fat high-sucrose diet: impact of a chronic exposure to a low-dose pollutant mixture(†).

Quantitation of Lipid Peroxidation Product DNA Adducts in Human Prostate by Tandem Mass Spectrometry: A Method That Mitigates Artifacts.

Hepatic heparan sulfate is a master regulator of hepcidin expression and iron homeostasis in human hepatocytes and mice.

Neuroprotective effects of anthocyanins and its major component cyanidin-3-O-glucoside (C3G) in the central nervous system: An outlined review.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced aryl hydrocarbon receptor activation enhanced the suppressive function of mesenchymal stem cells against splenocyte proliferation.

Exposure to diclofop-methyl induces immunotoxicity and behavioral abnormalities in zebrafish embryos.

Pyrazinamide may possess cardioprotective properties.

The active site of the *Mycobacterium tuberculosis* branched-chain amino acid biosynthesis enzyme dihydroxyacid dehydratase contains a 2Fe-2S cluster.

[Assessment of prenatal care for indigenous women in Brazil: findings from the First National Survey of Indigenous People's Health and Nutrition].

2,3,7,8-Tetrachlorodibenzo-p-dioxin modifies alternative splicing in mouse liver.

Astrocytic Oxidative/Nitrosative Stress Contributes to Parkinson's Disease Pathogenesis: The Dual Role of Reactive Astrocytes.

Effects of Pinacidil and Calcium on Succinate-Energized Rat Heart Mitochondria in the Presence of Rotenone.

Down-regulation of the inflammatory response after short-term exposure to low levels of chemical vapours.

Hermetia illucens larvae as a potential dietary protein source altered the microbiota and modulated mucosal immune status in the colon of finishing pigs.

The protective effects of bone mesenchymal stem cells on paraquat-induced acute lung injury via the muc5b and ERK/MAPK signaling pathways.

Altered Gene Expression in Dioxin-Like and Non-Dioxin-Like PCB Exposed Peripheral Blood Mononuclear Cells.

[Effects of exogenous ABA on translocation of photosynthate to fruit of Fuji apple during late stage of fruit rapid-swelling].

Very Low Protein Diet for Patients with Chronic Kidney Disease: Recent Insights.

Isolation of Myricitrin and 3,5-di-O-Methyl Gossypetin from Syzygium samarangense and Evaluation of their Involvement in Protecting Keratinocytes against Oxidative Stress via Activation of the Nrf-2 Pathway.

Organoselenotriazoles attenuate oxidative damage induced by mitochondrial dysfunction in mev-1 Caenorhabditis elegans mutants.

Attenuation of the effects of oxidative stress by the MAO-inhibiting antidepressant and carbonyl scavenger phenelzine.

Protective Effect of Hesperidin on Sodium Arsenite-Induced Nephrotoxicity and Hepatotoxicity in Rats.

A Protective Role of Aryl Hydrocarbon Receptor Repressor in Inflammation and Tumor Growth.

Evaluation of the developmental toxicity of 2,7-dibromocarbazole to zebrafish based on transcriptomics assay.

Immunomodulatory effects of synthetic endocrine disrupting chemicals on the development and functions of human immune cells.

TRPA1 channel contributes to myocardial ischemia-reperfusion injury.

Lipidomic profiling of subchronic As(4)S(4) exposure identifies inflammatory mediators as sensitive biomarkers in rats.

Transcriptomic Impact of IMA-08401, a Novel AHR Agonist Resembling Laquinimod, on Rat Liver.

The Differential Expression of Mitochondrial Function-Associated Proteins and Antioxidant Enzymes during Bovine Herpesvirus 1 Infection: A Potential Mechanism for Virus Infection-Induced Oxidative Mitochondrial Dysfunction.

Effects of fermentable high fiber diet supplementation on gut derived and conventional nitrogenous product in patients on maintenance hemodialysis: a randomized controlled trial.

ER stress differentially affects pro-inflammatory changes induced by mitochondrial dysfunction in the human monocytic leukemia cell line, THP-1.

Oxidative stress induces release of 2'-AMP from microglia.

Neuroprotective effects of baicalein in animal models of Parkinson's disease: A systematic review of experimental studies.

Cilostazol Attenuates Retinal Oxidative Stress and Inflammation in a Streptozotocin-Induced Diabetic Animal Model.

Association of Vitamin B(12), Lactate Dehydrogenase, and Regulation of NF- κ B in the Mitigation of Sodium Arsenite-Induced ROS Generation in Uterine Tissue by Commercially Available Probiotics.

IPSE, a urogenital parasite-derived immunomodulatory protein, ameliorates ifosfamide-induced hemorrhagic cystitis through downregulation of pro-inflammatory pathways.

TRPA1 Channel as a Regulator of Neurogenic Inflammation and Pain: Structure, Function, Role in Pathophysiology, and Therapeutic Potential of Ligands.

Molecular mechanism involved in cyclophosphamide-induced cardiotoxicity: Old drug with a new vision.

Environmental pollutant-mediated disruption of gut microbial metabolism of the prebiotic inulin.

RiboTag translomic profiling of *Drosophila* oenocytes under aging and induced oxidative stress.

Ameliorative effect of gallic acid on sodium arsenite-induced spleno-, cardio- and hemato-toxicity in rats.

Lung injury from inhaling butane hash oil mimics pneumonia.

Bioactive Lipids in Cancer, Inflammation and Related Diseases : Acute and Chronic Mild Traumatic Brain Injury Differentially Changes Levels of Bioactive Lipids in the CNS Associated with Headache.

Synthesis and Antibacterial Activity of Mefloquine-Based Analogs Against Sensitive and Resistant *Mycobacterium tuberculosis* Strains.

RESPIRATORY IMPACT OF ELECTRONIC CIGARETTES AND "LOW-RISK" TOBACCO.

Acetochlor poisoning presenting as acute genital edema: A case report.

Protective effect of lycopene against chemical and natural toxins: A review.

Effect of sub-chronic ferrous sulfate treatment on motor skills, hematological and biochemical parameters in rats.

Atypical Gasdermin D and Mixed Lineage Kinase Domain-like Protein Leakage Aggravates Tetrachlorobenzoquinone-Induced Nod-like Receptor Protein 3 Inflammasome Activation.

[Exploration about the protection mechanism of 5-hydroxy-1-methylhydantoin on paraquat poisoning model].

Apigenin reverses lung injury and immunotoxicity in paraquat-treated mice.

Protective effects of SOD2 overexpression in human umbilical cord mesenchymal stem cells on lung injury induced by acute paraquat poisoning in rats.

Secretogranin III may be an indicator of paraquat-induced astrocyte activation and affects the recruitment of BDNF during this process.

Evaluating Mode of Action of Acrolein Toxicity in an In Vitro Human Airway Tissue Model.

Müller glial dysfunction during diabetic retinopathy in rats is reduced by the acrolein-scavenging drug, 2-hydrazino-4,6-dimethylpyrimidine.

Lycopene Triggers Nrf2-AMPK Cross Talk to Alleviate Atrazine-Induced Nephrotoxicity in Mice.

Pendimethalin-induced oxidative stress, DNA damage and activation of anti-inflammatory and apoptotic markers in male rats.

Adsorption of 2,4-dichlorophenoxyacetic acid using rice husk biochar, granular activated carbon, and multi-walled carbon nanotubes in a fixed bed column system.

Exploring the potential benefit of natural product extracts in paraquat toxicity.

Paraquat-induced inflammatory response of microglia through HSP60/TLR4 signaling.

Protective effects of curcumin on acrolein-induced neurotoxicity in HT22 mouse hippocampal cells.

Does cyclophosphamide still play a role in glomerular diseases?

Procyanidin B2 protects rats from paraquat-induced acute lung injury by inhibiting NLRP3 inflammasome activation.

NF- κ B/p53-activated inflammatory response involves in diquat-induced mitochondrial dysfunction and apoptosis.

Vitamin D treatment abrogates the inflammatory response in paraquat-induced lung fibrosis.

Tanshinone IIA attenuates paraquat-induced acute lung injury by modulating angiotensin-converting enzyme 2/angiotensin(1-7) in rats.

Naringin protects acrolein-induced pulmonary injuries through modulating apoptotic signaling and inflammation signaling pathways in mice.

Atrazine-xenobiotic nuclear receptor interactions induce cardiac inflammation and endoplasmic reticulum stress in quail (*Coturnix coturnix coturnix*).

Bromoxynil and 2-methyl-4-chlorophenoxyacetic acid (MCPA) poisoning could be a bad combination.

Seagrass wasting disease: Nitrate enrichment and exposure to a herbicide (Diuron) increases susceptibility of *Zostera marina* to infection.

A new sight for paraquat poisoning from immunology.

Toxic effects of cyhalofop-butyl on embryos of the Yellow River carp (*Cyprinus carpio* var.): alters embryos hatching, development failure, mortality of embryos, and apoptosis.

High-dose acute exposure of paraquat induces injuries of swim bladder, gastrointestinal tract and liver via neutrophil-mediated ROS in zebrafish and their relevance for human health risk assessment.

The effects of Roundup on gametes and early development of common carp (*Cyprinus carpio* L).

[Acute pulmonary fibrosis associated with Paraquat poisoning. Report of one case].

A survival case of intravenous paraquat intoxication: A case report.

Pre-protective effects of dietary chitosan supplementation against oxidative stress induced by diquat in weaned piglets.

High-dose immunosuppression to prevent death after paraquat self-poisoning - a randomised controlled trial.

Atrazine Triggers Mitochondrial Dysfunction and Oxidative Stress in Quail (*Coturnix C. coturnix*) Cerebrum via Activating Xenobiotic-Sensing Nuclear Receptors and Modulating Cytochrome P450 Systems.

Modeling the effects of Irgarol 1051 on coral using lipidomic methodology for environmental monitoring and assessment.

Effect of glyphosate-based herbicide on hematological and hemopoietic parameters in common carp (*Cyprinus carpio* L).

[The anti-inflammatory effect of hesperetin on lung damage induced by paraquat in rats].

[The effect of pulmonary injury in rats induced by paraquat].

Apple procyanidins promote mitochondrial biogenesis and proteoglycan biosynthesis in chondrocytes.

Taurine protects noradrenergic locus coeruleus neurons in a mouse Parkinson's disease model by inhibiting microglial M1 polarization.

Serum immune responses in common carp (*Cyprinus carpio* L.) to paraquat exposure: The traditional parameters and circulating microRNAs.

Lethal and Sublethal Effects of the Herbicide Atrazine in the Early Stages of Development of *Physalaemus gracilis* (Anura: Leptodactylidae).

Treatment of Paraquat-Induced Lung Injury With an Anti-C5a Antibody: Potential Clinical Application.

2-Methyl-4-chlorophenoxyacetic acid (MCPA) and bromoxynil herbicide ingestion.

Taurine protects dopaminergic neurons in a mouse Parkinson's disease model through inhibition of microglial M1 polarization.

Naringenin Exerts Anti-inflammatory Effects in Paraquat-Treated SH-SY5Y Cells Through a Mechanism Associated with the Nrf2/HO-1 Axis.

Mesenchymal stem cell therapy for paraquat poisoning: A systematic review and meta-analysis of preclinical studies.

Effects of PQ's cytotoxicity on secretory vesicles in astroglia: Expression alternation of secretogranin II and its potential interaction with intracellular factors.

[Effect of sucralfate on cytokines in rat with paraquat poisoning].

Lipopolysaccharide-Induced Striatal Nitrosative Stress and Impaired Social Recognition Memory Are Not Magnified by Paraquat Coexposure.

Effects of glyphosate on early life stages: comparison between *Cyprinus carpio* and *Danio rerio*.

Effect of dietary supplementation with *Spirulina platensis* on Atrazine-induced oxidative stress-mediated hepatic damage and inflammation in the common carp (*Cyprinus carpio* L.).

Hepatotoxicity of paraquat on common carp (*Cyprinus carpio* L.).

A glyphosate micro-emulsion formulation displays teratogenicity in *Xenopus laevis*.

Pirfenidone protects against paraquat-induced lung injury and fibrosis in mice by modulation of inflammation, oxidative stress, and gene expression.

Impacts on the seagrass, *Zostera nigricaulis*, from the herbicide Fusilade Forte(®) used in the management of *Spartina anglica* infestations.

Silymarin attenuated paraquat-induced cytotoxicity in macrophage by regulating Trx/TXNIP complex, inhibiting NLRP3 inflammasome activation and apoptosis.

Inflammatory effects of acrolein, crotonaldehyde and hexanal vapors on human primary bronchial epithelial cells cultured at air-liquid interface.

Preference of Aerosolized Pirfenidone to Oral Intake: An Experimental Model of Pulmonary Fibrosis by Paraquat.

Cellular Senescence Is Induced by the Environmental Neurotoxin Paraquat and Contributes to Neuropathology Linked to Parkinson's Disease.

Acrolein-induced atherogenesis by stimulation of hepatic flavin containing monooxygenase 3 and a protection from hydroxytyrosol.

HIV and paraquat poisoning: fighting fire with fire?

Occupational koebnerization of psoriasis caused by glyphosate.

Neuroprotective Effects of Baicalein on Acrolein-induced Neurotoxicity in the Nigrostriatal Dopaminergic System of Rat Brain.

Lethal Bentazone Intoxication - A Report of Two Cases.

Effects of prolonged methylprednisolone treatment after pulse therapy for paraquat-intoxicated rats.

Carnosic Acid Induces Anti-Inflammatory Effects in Paraquat-Treated SH-SY5Y Cells Through a Mechanism Involving a Crosstalk Between the Nrf2/HO-1 Axis and NF- κ B.

Trans-cinnamaldehyde Modulates Hippocampal Nrf2 Factor and Inhibits Amyloid Beta Aggregation in LPS-Induced Neuroinflammation Mouse Model.

Phytantriol-based lyotropic liquid crystal as a transdermal delivery system.

Protective Effects of a Rho Kinase Inhibitor on Paraquat-Induced Acute Lung Injuries in Rats.

Cinnamaldehyde exerts vasculoprotective effects in hypercholesterolemic rabbits.

Prolonged low-dose cyclophosphamide treatment after pulse therapy attenuates lung injury in rats with paraquat intoxication.

The KCa3.1 blocker TRAM-34 inhibits proliferation of fibroblasts in paraquat-induced pulmonary fibrosis.

Novel action of vinpocetine in the prevention of paraquat-induced parkinsonism in mice: involvement of oxidative stress and neuroinflammation.

Trans-cinnamic aldehyde inhibits *Aggregatibacter actinomycetemcomitans*-induced inflammation in THP-1-derived macrophages via autophagy activation.

Allergenicity of acrolein-treated shrimp tropomyosin evaluated using RBL-2H3 cell and mouse model.

FGF21 attenuates pulmonary fibrogenesis through ameliorating oxidative stress in vivo and in vitro.

Submicron emulsion of cinnamaldehyde ameliorates bleomycin-induced idiopathic pulmonary fibrosis via inhibition of inflammation, oxidative stress and epithelial-mesenchymal transition.

Time for Targeted Therapies in Acute Respiratory Distress Syndrome? Understanding Every Single Piece of the Puzzle.

Short communication: Investigation of antibiotic alternatives to improve health and growth of veal calves.

Varying susceptibility of clinical and environmental *Scenedesporium* isolates to chemical oxidative stress in conidial germination.

Complement receptor 3 mediates NADPH oxidase activation and dopaminergic neurodegeneration through a Src-Erk-dependent pathway.

Neutrophil extracellular traps in acrolein promoted hepatic ischemia reperfusion injury: Therapeutic potential of NOX2 and p38MAPK inhibitors.

Astrocytic JWA deletion exacerbates dopaminergic neurodegeneration by decreasing glutamate transporters in mice.

The Neuroprotective Effects of Cinnamic Aldehyde in an MPTP Mouse Model of Parkinson's Disease.

Protective Effects of Chymostatin on Paraquat-Induced Acute Lung Injury in Mice.

Combination Therapy with Pirfenidone plus Prednisolone Ameliorates Paraquat-Induced Pulmonary Fibrosis.

Purinergic receptor P2Y6 contributes to 1-methyl-4-phenylpyridinium-induced oxidative stress and cell death in neuronal SH-SY5Y cells.

Immunomodulatory and therapeutic role of *Cinnamomum verum* extracts in collagen-induced arthritic BALB/c mice.

Orofacial antinociceptive effect of *Mimosa tenuiflora* (Willd.) Poiret.

Anti-inflammatory effect of cinnamaldehyde and linalool from the leaf essential oil of *Cinnamomum osmophloeum* Kanehira in endotoxin-induced mice.

Acrolein induces NLRP3 inflammasome-mediated pyroptosis and suppresses migration via ROS-dependent autophagy in vascular endothelial cells.

Anti-inflammatory effects of cinnamon extract and identification of active compounds influencing the TLR2 and TLR4 signaling pathways.

Inhibition of catalase activity with 3-amino-1,2,4-triazole intensifies bisphenol A (BPA)-induced toxicity in granulosa cells of female albino rats.

In vitro inhibition of food borne mutagens induced mutagenicity by cinnamon (*Cinnamomum cassia*) bark extract.

Antimycobacterial Activity of Cinnamaldehyde in a *Mycobacterium tuberculosis*(H37Ra) Model.

Inhibition of HSV-2 infection by pure compounds from *Thymus capitatus* extract in vitro.

Breakthrough dynamics of s-metolachlor metabolites in drinking water wells: Transport pathways and time to trend reversal.

Anti-inflammatory effects of trans-cinnamaldehyde on lipopolysaccharide-stimulated macrophage activation via MAPKs pathway regulation.

The sugarcane herbicide ametryn induces oxidative stress and developmental abnormalities in zebrafish embryos.

Risk management of ochratoxigenic fungi and ochratoxin A in maize grains by bioactive EVOH films containing individual components of some essential oils.

Effects of the herbicides linuron and S-metolachlor on Perez's frog embryos.

Taurine Inhibits TRPV-Dependent Activity to Overcome Oxidative Stress in *Caenorhabditis elegans*.

Dantrolene is not the answer to 2,4-dinitrophenol poisoning: more heated debate.

EF-Tu From Non-typeable *Haemophilus influenzae* Is an Immunogenic Surface-Exposed Protein Targeted by Bactericidal Antibodies.

Could resistant starch supplementation improve inflammatory and oxidative stress biomarkers and uremic toxins levels in hemodialysis patients? A pilot randomized controlled trial.

Retinoic acid co-treatment aggravates severity of dioxin-induced skin lesions in hairless mice via induction of inflammatory response.

Chiral pharmaceuticals: Environment sources, potential human health impacts, remediation technologies and future perspective.

Profile of three boron-containing compounds on the body weight, metabolism and inflammatory markers of diabetic rats.

Quantitative assessment of cyanide in cystic fibrosis sputum and its oxidative catabolism by hypochlorous acid.

Recognising the return of nutritional deficiencies: a modern pellagra puzzle.

Dioxin-like PCB 126 increases intestinal inflammation and disrupts gut microbiota and metabolic homeostasis.

Uremia Impacts VE-Cadherin and ZO-1 Expression in Human Endothelial Cell-to-Cell Junctions.

Anemia in Older Adults.

Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin promotes inflammation in mouse testes: The critical role of Klotho in Sertoli cells.

Hepatocyte-Specific Deletion of TIPARP, a Negative Regulator of the Aryl Hydrocarbon Receptor, Is Sufficient to Increase Sensitivity to Dioxin-Induced Wasting Syndrome.

The Impact of Uremic Toxicity Induced Inflammatory Response on the Cardiovascular Burden in Chronic Kidney Disease.

Efficacy of Lactoferrin Oral Administration in the Treatment of Anemia and Anemia of Inflammation in Pregnant and Non-pregnant Women: An Interventional Study.

Sucrosomial(®) Iron Supplementation in Mice: Effects on Blood Parameters, Hepcidin, and Inflammation.

Impacts of Indoxyl Sulfate and p-Cresol Sulfate on Chronic Kidney Disease and Mitigating Effects of AST-120.

Uremic Toxins Activates Na/K-ATPase Oxidant Amplification Loop Causing Phenotypic Changes in Adipocytes in In Vitro Models.

Angptl2 deficiency attenuates paraquat (PQ)-induced lung injury in mice by altering inflammation, oxidative stress and fibrosis through NF- κ B pathway.

Protective effect of simvastatin on arterial plaque instability induced by p-cresyl sulfate.

Chemical Tools for Targeted Amplification of Reactive Oxygen Species in Neutrophils.

Elevated Arsenic Exposure Is Associated with an Increased Risk of Chronic Hepatitis B Virus Infection: NHANES (2003-2014) in U.S. Adults.

Immune response induced by major environmental pollutants through altering neutrophils in zebrafish larvae.

Associations of Arsenic Exposure With Telomere Length and Na⁺-ve T Cells in Childhood-A Birth Cohort Study.

LC-Q-TOF-MS based plasma metabolomic profile of subclinical pelvic inflammatory disease: A pilot study.

RASopathic comedone-like or cystic lesions induced by vemurafenib: a model of skin lesions similar but not identical to those induced by dioxins MADISH.

Protective Effect of Ellagic Acid Against Sodium Arsenite-Induced Cardio- and Hematotoxicity in Rats.

Oxymatrine attenuates lipopolysaccharide-induced acute lung injury by activating the epithelial sodium channel and suppressing the JNK signaling pathway.

ALDH2 Protects Against Ischemic Stroke in Rats by Facilitating 4-HNE Clearance and AQP4 Down-Regulation.

The Effect of Boric Acid and Borax on Oxidative Stress, Inflammation, ER Stress and Apoptosis in Cisplatin Toxication and Nephrotoxicity Developing as a Result of Toxication.

Iron pill aspiration: Cytologic and histologic findings of a potential life-threatening airway injury. A Case report and literature review.

Plasma p-cresol lowering effect of sevelamer in non-dialysis CKD patients: evidence from a randomized controlled trial.

A delayed proinflammatory response of human preadipocytes to PCB126 is dependent on the aryl hydrocarbon receptor.

Genetic or pharmacological superoxide-hydrogen peroxide imbalances modulate the in vitro effects of lithium on glycogen synthase kinase-3 β .

Metabolic profiles in community-acquired pneumonia: developing assessment tools for disease severity.

Mining a KrÄhnke Pyridine Library for Anti-Arenavirus Activity.

Towards Resolving the Pro- and Anti-Tumor Effects of the Aryl Hydrocarbon Receptor.

Protective Effect of Azadirachta indica and Vitamin E Against Arsenic Acid-Induced Genotoxicity and Apoptosis in Rats.

The effect of ellagic acid on photodynamic therapy in leukemia cells.

Microglial activation and the nitric oxide/cGMP/PKG pathway underlie enhanced neuronal vulnerability to mitochondrial dysfunction in experimental multiple sclerosis.

Modulation of intestinal microbiota, control of nitrogen products and inflammation by pre/probiotics in chronic kidney disease: a systematic review.

Quercetin-3-O-Î±-l-arabinopyranoside protects against retinal cell death via blue light-induced damage in human RPE cells and Balb-c mice.

Application of the key characteristics of carcinogens in cancer hazard identification.

The possible neuroprotective effect of ellagic acid on sodium arsenate-induced neurotoxicity in rats.

Dioxin-like PCB 126 Increases Systemic Inflammation and Accelerates Atherosclerosis in Lean LDL Receptor-Deficient Mice.

Role of Peroxiredoxin 2 in the Protection Against Ferrous Sulfate-Induced Oxidative and Inflammatory Injury in PC12 Cells.

Anti-inflammatory evaluation and characterization of leaf extract of *Ananas comosus*.

Diterpene ginkgolides meglumine injection protects against paraquat-induced lung injury and pulmonary fibrosis in rats.

Contributory Role of Gut Microbiota and Their Metabolites Toward Cardiovascular Complications in Chronic Kidney Disease.

Immediate tooth replantation: root canal filling for delayed initiation of endodontic treatment.

The impaired immune function and structural integrity by dietary iron deficiency or excess in gill of fish after infection with *Flavobacterium columnare*: Regulation of NF- κ B, TOR, JNK, p38MAPK, Nrf2 and MLCK signalling.

Metabolic characterization of human aqueous humor in the cataract progression after pars plana vitrectomy.

Prenatal exposure to TCDD and atopic conditions in the Seveso second generation: a prospective cohort study.

Vascular Hyperpermeability Response in Animals Systemically Exposed to Arsenic.

Roles of cytosolic phospholipase A(2) β in reproductive and systemic toxicities in 2,3,7,8-tetrachlorodibenzo-p-dioxin-exposed mice.

Parkinsonian Neurotoxins Impair the Pro-inflammatory Response of Glial Cells.

Occurrence of emerging pollutants in estuaries of the Basque Country: Analysis of sources and distribution, and assessment of the environmental risk.

Therapy with high-dose long-term antioxidant free radicals for severe paraquat poisoning: A pilot study.

Release and toxicity of adipose tissue-stored TCDD: Direct evidence from a xenografted fat model.

CYP1A1 and 1B1-mediated metabolic pathways of dolutegravir, an HIV integrase inhibitor.

Pesticide toxicity: a mechanistic approach.

Dynamics study on the role of curcumin on TGF- β 1 expression and pathological changes in acute paraquat poisoned rats.

Structure and inflammatory activity of the LPS isolated from *Acetobacter pasteurianus* CIP103108.

Dioxin leaching risk assessment through selected soils by estimating distribution coefficient and breakthrough curves.

Utility of Serum miR-122, Liver Enzymes, and Hepatic Histopathology in Response to Hepatotoxicants in Sprague-Dawley Rats.

Nrf2 Signaling in Sodium Azide-Treated Oligodendrocytes Restores Mitochondrial Functions.

Reduced intestinal epithelial mitochondrial function enhances in vitro interleukin-8 production in response to commensal *Escherichia coli*.

The Chemical Compositions of *Angelica pubescens* Oil and Its Prevention of UV-B Radiation-Induced Cutaneous Photoaging.

Supplementation of Short-Chain Fatty Acid, Sodium Propionate, in Patients on Maintenance Hemodialysis: Beneficial Effects on Inflammatory Parameters and Gut-Derived Uremic Toxins, A Pilot Study (PLAN Study).

Bushfire smoke is pro-inflammatory and suppresses macrophage phagocytic function.

RXFP1 Receptor Activation by Relaxin-2 Induces Vascular Relaxation in Mice via a G β (i2)-Protein/PI3K β /Nitric Oxide-Coupled Pathway.

A review of current studies on cellular and molecular mechanisms underlying pulmonary fibrosis induced by chemicals.

Roles of dietary supplementation with arginine or N-carbamylglutamate in modulating the inflammation, antioxidant property, and mRNA expression of antioxidant-relative signaling molecules in the spleen of rats under oxidative stress.

Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin increases the activation of aryl hydrocarbon receptor and is associated with the aggressiveness of osteosarcoma MG-63 osteoblast-like cells.

Activation of aryl hydrocarbon receptor regulates the LPS/IFN γ -induced inflammatory response by inducing ubiquitin-proteosomal and lysosomal degradation of RelA/p65.

Modulating effect of selected pharmaceuticals on bone in female rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Epigenetic underpinnings of developmental immunotoxicity and autoimmune disease.

Sources of free radicals and oxidative stress in the oral cavity.

Acetyl-L-Carnitine Attenuates Arsenic-Induced Oxidative Stress and Hippocampal Mitochondrial Dysfunction.

Aryl Hydrocarbon Receptor Regulates Apoptosis and Inflammation in a Murine Model of Experimental Autoimmune Uveitis.

Food Chemicals Disrupt Human Gut Microbiota Activity And Impact Intestinal Homeostasis As Revealed By In Vitro Systems.

Lung injury caused by paraquat poisoning results in increased interleukin-6 and decreased microRNA-146a levels.

Ellagic acid: A promising protective remedy against testicular toxicity induced by arsenic.

PI3K/Akt/GSK3 β induced CREB activation ameliorates arsenic mediated alterations in NMDA receptors and associated signaling in rat hippocampus: Neuroprotective role of curcumin.

Pharmacologic modeling of primary mitochondrial respiratory chain dysfunction in zebrafish.

Gain-of-function mutation of AtDICE1, encoding a putative endoplasmic reticulum-localized membrane protein, causes defects in anisotropic cell elongation by disturbing cell wall integrity in Arabidopsis.

Systemic Acrolein Elevations in Mice With Experimental Autoimmune Encephalomyelitis and Patients With Multiple Sclerosis.

The gut microbiota metabolite indole alleviates liver inflammation in mice.

Metabolomic assessment of arsenite toxicity and novel biomarker discovery in early development of zebrafish embryos.

Key genes and pathways in measles and their interaction with environmental chemicals.

Hyperbaric oxygen as a treatment modality in cyclophosphamide-induced hemorrhagic cystitis.

Elevated Nrf-2 responses are insufficient to mitigate protein carbonylation in hepatospecific PTEN deletion mice.

Mutagenicity and antimutagenicity of *Salacia crassifolia* (mart. Ex. Schult.) G. Don. evaluated by Ames test.

Palmitic acid induces neurotoxicity and gliotoxicity in SH-SY5Y human neuroblastoma and T98G human glioblastoma cells.

Environmental and human health risk indicators for agricultural pesticides in estuaries.

ER-stress mobilization of death-associated protein kinase-1-dependent xenophagy counteracts mitochondria stress-induced epithelial barrier dysfunction.

Acetobacter indonesiensis Pneumonia after Lung Transplantation.

Dysregulation of Intestinal Health by Environmental Pollutants: Involvement of the Estrogen Receptor and Aryl Hydrocarbon Receptor.

Modification and quantification of in vivo EROD live-imaging with zebrafish (*Danio rerio*) embryos to detect both induction and inhibition of CYP1A.

The Initiation Factors eIF2, eIF2A, eIF2D, eIF4A, and eIF4G Are Not Involved in Translation Driven by Hepatitis C Virus IRES in Human Cells.

Dysregulation of antioxidant responses in patients diagnosed with concomitant Primary Sclerosing Cholangitis/Inflammatory Bowel Disease.

Mersalyl prevents the TI(+)-induced permeability transition pore opening in the inner membrane of Ca(2+)-loaded rat liver mitochondria.

Potential Prognostic, Diagnostic and Therapeutic Markers for In-stent Reocclusion in Advanced Age Patients After Coronary Stenting.

Arsenite exposure potentiates apoptosis-inducing effects of tumor necrosis factor- α - through reactive oxygen species.

A case of herbicide-induced acute fibrinous and organizing pneumonia?

Imbalance of Th17/Treg in the Pathogenesis of Mice with Paraquat-induced Acute Lung Injury.

Propolis supplementation attenuates the negative effects of oxidative stress induced by paraquat injection on productive performance and immune function in turkey poults.

Alda-1 Protects Against Acrolein-Induced Acute Lung Injury and Endothelial Barrier Dysfunction.

The rise of glyphosate and new opportunities for biosentinel early-warning studies.

Effect of resveratrol and tetracycline on the subacute paraquat toxicity in mice.

Mixture Toxicity of Bensulfuron-Methyl and Acetochlor to Red Swamp Crayfish (*Procambarus clarkii*): Behavioral, Morphological and Histological Effects.

Porous Se@SiO₂ nanospheres treated paraquat-induced acute lung injury by resisting oxidative stress.

[The effect of captopril and losartan on paraquat-induced pulmonary fibrosis and PIGF expression in the lungs of rats].

[Mono-carbonyl analogues of curcumin prevents paraquat-induced apoptosis in HK-2 cell line by inhibiting oxidative damage and inflammation].

[Effects of small RNA interference targeting mammalian target of rapamycin on paraquat-induced pulmonary fibrosis in rats].

Cyclophosphamide and acrolein induced oxidative stress leading to deterioration of metaphase II mouse oocyte quality.

Gender-specific histopathological response in guppies *Poecilia reticulata* exposed to glyphosate or its metabolite aminomethylphosphonic acid.

Role of metabolites of cyclophosphamide in cardiotoxicity.

Efficacy of *Spirulina platensis* diet supplements on disease resistance and immune-related gene expression in *Cyprinus carpio* L. exposed to herbicide atrazine.

Respiratory Effects and Systemic Stress Response Following Acute Acrolein Inhalation in Rats.

Flavored e-cigarette liquids and cinnamaldehyde impair respiratory innate immune cell function.

Biomarkers of Chronic Acrolein Inhalation Exposure in Mice: Implications for Tobacco Product-Induced Toxicity.

JNK Inhibitor SP600125 Attenuates Paraquat-Induced Acute Lung Injury: an In Vivo and In Vitro Study.

In vivo cardiovascular toxicity induced by acetochlor in zebrafish larvae.

Early developmental exposure to pentachlorophenol causes alterations on mRNA expressions of caspase protease family in zebrafish embryos.

An approach to clarify the effect mechanism of glyphosate on body malformations during embryonic development of zebrafish (*Danio rerio*).

Tanshinone I Induces Mitochondrial Protection through an Nrf2-Dependent Mechanism in Paraquat-Treated Human Neuroblastoma SH-SY5Y Cells.

Experimental study of sucralfate intervention for paraquat poisoning in rats.

Toxicity of clomazone and its formulations to zebrafish embryos (*Danio rerio*).

Arginine metabolism and its protective effects on intestinal health and functions in weaned piglets under oxidative stress induced by diquat.

Levels of oxylipins, endocannabinoids and related lipids in plasma before and after low-level exposure to acrolein in healthy individuals and individuals with chemical intolerance.

Dimercaprol is an acrolein scavenger that mitigates acrolein-mediated PC-12 cells toxicity and reduces acrolein in rat following spinal cord injury.

[Changes of integrin-linked kinase expression on rats' pulmonary fibrosis induced by paraquat].

[The study of using salvianolate treat acute lung injury in rats induced by paraquat].

Molecular mechanisms of anti-oxidant and anti-aging effects induced by convallatoxin in *Caenorhabditis elegans*.

Potential mechanisms of development-dependent adverse effects of the herbicide paraquat in 3D rat brain cell cultures.

Reduced expression of selective immune-related genes in silver catfish (*Rhamdia quelen*) monocytes exposed to atrazine.

Dendritic cells' death induced by contact sensitizers is controlled by Nrf2 and depends on glutathione levels.

Effects of airborne toxicants on pulmonary function and mitochondrial DNA damage in rodent lungs.

Fluazifop-p-butyl, an aryloxyphenoxypropionate herbicide, diminishes renal and hepatic functions and triggers testicular oxidative stress in orally exposed rats.

Paraquat poisoning: Acute lung injury - a missed diagnosis.

[The study of using cordyceps-astragalus-salvia miltiorrhiza to treat acute lung injury induced by paraquat poisoning in rats].

Acrolein acts as a neurotoxin in the nigrostriatal dopaminergic system of rat: involvement of α -synuclein aggregation and programmed cell death.

HMGB1-TLR4-IL23-IL17A axis promotes paraquat-induced acute lung injury by mediating neutrophil infiltration in mice.

Nephrotoxicity-induced proteinuria increases biomarker diagnostic thresholds in acute kidney injury.

Lichen microalgae are sensitive to environmental concentrations of atrazine.

Paraquat and maneb co-exposure induces noradrenergic locus coeruleus neurodegeneration through NADPH oxidase-mediated microglial activation.

Exposures to the environmental toxicants pentachlorophenol (PCP) and dichlorodiphenyltrichloroethane (DDT) modify secretion of interleukin 1-beta ($IL-1\beta$) from human immune cells.

Pesticides are Associated with Allergic and Non-Allergic Wheeze among Male Farmers.

Acrolein Inhalation Alters Myocardial Synchrony and Performance at and Below Exposure Concentrations that Cause Ventilatory Responses.

MyD88 gene knockout attenuates paraquat-induced acute lung injury.

Toxicity effects of an environmental realistic herbicide mixture on the seagrass *Zostera noltei*.

Effects of pentachlorophenol and dichlorodiphenyltrichloroethane on secretion of interferon gamma ($IFN\gamma$) and tumor necrosis factor alpha ($TNF\alpha$) from human immune cells.

Developmental toxicity of 2,4-dichlorophenoxyacetic acid in zebrafish embryos.

Ustiloxin G, a New Cyclopeptide Mycotoxin from Rice False Smut Balls.

Basagran (\hat{A}) induces developmental malformations and changes the bacterial community of zebrafish embryos.

Epigallocatechin-3-gallate alleviates paraquat-induced acute lung injury and inhibits upregulation of toll-like receptors.

A glyphosate-based herbicide induces histomorphological and protein expression changes in the liver of the female guppy *Poecilia reticulata*.

Toll-like receptor 4 ablation rescues against paraquat-triggered myocardial dysfunction: Role of ER stress and apoptosis.

Evaluation of Complex Toxicity of Carbon Nanotubes and Sodium Pentachlorophenol Based on Earthworm Coelomocytes Test.

Resveratrol and Montelukast Alleviate Paraquat-Induced Hepatic Injury in Mice: Modulation of Oxidative Stress, Inflammation, and Apoptosis.

Vasculitic Neuropathy Following Exposure to a Glyphosate-based Herbicide.

Liver X Receptor Agonist TO901317 Attenuates Paraquat-Induced Acute Lung Injury through Inhibition of NF- κ B and JNK/p38 MAPK Signal Pathways.

Atorvastatin protected from paraquat-induced cytotoxicity in alveolar macrophages via down-regulation of TLR-4.

Beneficial Effects of the Amino Acid Glycine.

Novel tetrazole and cyanamide derivatives as inhibitors of cyclooxygenase-2 enzyme: design, synthesis, anti-inflammatory evaluation, ulcerogenic liability and docking study.

[Protective effect of thalidomide on ALI induced by paraquat poisoning in rats and its mechanism].

Effects of herbal extracts and compounds and pharmacological agents on pulmonary fibrosis in animal models: a review.

Coadministration of isomalto-oligosaccharides augments metabolic health benefits of cinnamaldehyde in high fat diet fed mice.

Inhibition of NLRP3 inflammasome: a new protective mechanism of cinnamaldehyde in endotoxin poisoning of mice.

Interleukin-17A Plays the Same Role on Mice Acute Lung Injury Respectively Induced by Lipopolysaccharide and Paraquat.

Acrolein Scavenger Hydralazine Prevents Streptozotocin-Induced Painful Diabetic Neuropathy and Spinal Neuroinflammation in Rats.

Pinocembrin Provides Mitochondrial Protection by the Activation of the Erk1/2-Nrf2 Signaling Pathway in SH-SY5Y Neuroblastoma Cells Exposed to Paraquat.

Supplementation of Spirulina (*Arthrospira platensis*) Improves Lifespan and Locomotor Activity in Paraquat-Sensitive DJ-1^{Δ93} Flies, a Parkinson's Disease Model in *Drosophila melanogaster*.

Cinnamon reduces inflammatory response in intestinal fibroblasts in vitro and in colitis in vivo leading to decreased fibrosis.

Carbenoxolone inhibits TRPV4 channel-initiated oxidative urothelial injury and ameliorates cyclophosphamide-induced bladder dysfunction.

The protective effect of cinnamaldehyde on lipopolysaccharide induced acute lung injury in mice.

Contribution of PPAR α in modulation of acrolein-induced inflammatory signaling in gp91(phox) knock-out mice.

Activation of MMP-9 activity by acrolein in saliva from patients with primary Sjögren's syndrome and its mechanism.

Contact sensitizers trigger human CD1-autoreactive T-cell responses.

NLRP3 inflammasome activation regulated by NF- κ B and DAPK contributed to paraquat-induced acute kidney injury.

Cromolyn Sodium Attenuates Paraquat-Induced Lung Injury by Modulation of Proinflammatory Cytokines.

Chloroquine attenuates paraquat-induced lung injury in mice by altering inflammation, oxidative stress and fibrosis.

Curcumin Rescues a PINK1 Knock Down SH-SY5Y Cellular Model of Parkinson's Disease from Mitochondrial Dysfunction and Cell Death.

Cinnamaldehyde potentially attenuates gestational hyperglycemia in rats through modulation of PPAR α , proinflammatory cytokines and oxidative stress.

Novel 2,4-dichlorophenoxy acetic acid substituted thiazolidin-4-ones as anti-inflammatory agents: Design, synthesis and biological screening.

Antipruritic Effect of Cold-induced and Transient Receptor Potential-agonist-induced Counter-irritation on Histaminergic Itch in Humans.

Cinnamaldehyde Ameliorates Diet-Induced Obesity in Mice by Inducing Browning of White Adipose Tissue.

Cinnamaldehyde Analogues as Potential Therapeutic Agents.

Cinnamaldehyde protects human dental pulp cells against oxidative stress through the Nrf2/HO-1-dependent antioxidant response.

[Curative effect of paraquat detoxification recipe combined with continuous hemoperfusion in the treatment of patients with APP and clinical value of Presepsin].

[Protective effect of 5-aminosalicylic acid on the kidney of paraquat poisoning rats by Nrf2-ARE signal pathway].

Evaluation of antibacterial potential and toxicity of plant volatile compounds using new broth microdilution volatilization method and modified MTT assay.

Preparation of a calcium carbonate-based bone substitute with cinnamaldehyde crosslinking agent with potential anti-inflammatory properties.

Autophagy deficient keratinocytes display increased DNA damage, senescence and aberrant lipid composition after oxidative stress in vitro and in vivo.

IFN- γ regulates xanthine oxidase-mediated iNOS-independent oxidative stress in maneb- and paraquat-treated rat polymorphonuclear leukocytes.

The Evaluation of Antioxidant and Anti-Inflammatory Effects of *Eucommia ulmoides* Flavones Using Diquat-Challenged Piglet Models.

Phytotoxic, Antifungal and Immunosuppressive Metabolites from *Aspergillus terreus* QT122 Isolated from the Gut of Dragonfly.

Conjugation of nitrated acetaminophen to Der p1 amplifies peripheral blood monocyte response to Der p1.

Tooth development disorders in infants of rat dams exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin and protective role of tocopherol and acetylsalicylic acid.

Chloracne in a Farming Family.

Expression of aryl hydrocarbon receptor, inflammatory cytokines, and incidence of rheumatoid arthritis in Vietnamese dioxin-exposed people.

2,3,7,8-Tetrachlorodibenzo-p-dioxin influences bovine herpesvirus 1 replication through upregulation of SIRT3 and cytoskeletal reorganization.

Editor's Highlight: PCB126 Exposure Increases Risk for Peripheral Vascular Diseases in a Liver Injury Mouse Model.

Elucidation of protective efficacy of Pentahydroxy flavone isolated from *Madhuca indica* against arsenite-induced cardiomyopathy: Role of Nrf-2, PPAR- γ , c-fos and c-jun.

Quillaja saponaria bark saponin protects Wistar rats against ferrous sulphate-induced oxidative and inflammatory liver damage.

Enhancing miR-132 expression by aryl hydrocarbon receptor attenuates tumorigenesis associated with chronic colitis.

A Toddler With Severe Anemia, Pica, and Extremity Swelling.

Carnosic Acid Protects Mitochondria of Human Neuroblastoma SH-SY5Y Cells Exposed to Paraquat Through Activation of the Nrf2/HO-1 Axis.

Effects of Orally Ingested Arsenic on Respiratory Epithelial Permeability to Bacteria and Small Molecules in Mice.

The human bitter taste receptor T2R38 is broadly tuned for bacterial compounds.

Chronic exposure of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces an obesogenic effect in C57BL/6J mice fed a high fat diet.

The anti-migraine component of butterbur extracts, isopetasin, desensitizes peptidergic nociceptors by acting on TRPA1 cation channel.

Antimicrobial agents, triclosan, chloroxylenol, methylisothiazolinone and borax, used in cleaning had genotoxic and histopathologic effects on rainbow trout.

Short Chain Fatty Acids Enhance Aryl Hydrocarbon (Ah) Responsiveness in Mouse Colonocytes and Caco-2 Human Colon Cancer Cells.

Increased Frequency of Rheumatoid Arthritis and Allergic Rhinitis among Pesticide Sprayers and Associations with Pesticide Use.

The Complex Biology of the Aryl Hydrocarbon Receptor and Its Role in the Pituitary Gland.

Tert-butylhydroquinone protects PC12 cells against ferrous sulfate-induced oxidative and inflammatory injury via the Nrf2/ARE pathway.

Pesticide Exposure and Risk of Rheumatoid Arthritis among Licensed Male Pesticide Applicators in the Agricultural Health Study.

Absence of the NOD2 protein renders epithelia more susceptible to barrier dysfunction due to mitochondrial dysfunction.

Outbreak of Occupational Dermatitis Associated With *Pyemotes ventricosus*.

Dioxin-induced increase in leukotriene B4 biosynthesis through the aryl hydrocarbon receptor and its relevance to hepatotoxicity owing to neutrophil infiltration.

The decreased growth performance and impaired immune function and structural integrity by dietary iron deficiency or excess are associated with TOR, NF- κ B, p38MAPK, Nrf2 and MLCK signaling in head kidney, spleen and skin of grass carp (*Ctenopharyngodon idella*).

Progesterone resistance in endometriosis: origins, consequences and interventions.

The Influence of α -Tocopherol on Serum Biochemical Markers During Experimentally Induced Pleuritis in Rats Exposed to Dioxin.

Oral Iron Treatment Response and Predictors in Anaemic Adolescents and Adults with IBD: A Prospective Controlled Open-Label Trial.

A bio-chemical application of N-GQDs and g-C(3)N(4) QDs sensitized TiO(2) nanopillars for the quantitative detection of pCDNA3-HBV.

TCF21 and the environmental sensor aryl-hydrocarbon receptor cooperate to activate a pro-inflammatory gene expression program in coronary artery smooth muscle cells.

Dioxins and related environmental contaminants increase TDP-43 levels.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces hepatic stellate cell (HSC) activation and liver fibrosis in C57BL6 mouse via activating Akt and NF- κ B signaling pathways.

Sodium azide suppresses LPS-induced expression MCP-1 through regulating $\text{I}\kappa\text{B}\alpha$ and STAT1 activities in macrophages.

Iron Supplements Modulate Colon Microbiota Composition and Potentiate the Protective Effects of Probiotics in Dextran Sodium Sulfate-induced Colitis.

DNP, mitochondrial uncoupling, and neuroprotection: A little dab'll do ya.

Fecal metagenomic profiles in subgroups of patients with myalgic encephalomyelitis/chronic fatigue syndrome.

Lipidomic Evaluation of Aryl Hydrocarbon Receptor-Mediated Hepatic Steatosis in Male and Female Mice Elicited by 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Convergence of hepcidin deficiency, systemic iron overloading, heme accumulation, and REV-ERB α/β activation in aryl hydrocarbon receptor-elicited hepatotoxicity.

Tyrosine kinase inhibition is an important factor for gene expression of CRTH2 in human eosinophils and lymphocytes: A novel mechanism for explaining eosinophils recruitment by the neuro-immune axis in allergic rhinitis.

Arsenic exposure alters lung function and airway inflammation in children: A cohort study in rural Bangladesh.

Inhibition of Kupffer cell functions modulates arsenic intoxication in Wistar rats.

Low concentration of uncouplers of oxidative phosphorylation decreases the TNF-induced endothelial permeability and lethality in mice.

Intracellular ATP in balance of pro- and anti-inflammatory cytokines in adipose tissue with and without tissue expansion.

Protective effects of levamisole, acetylsalicylic acid, and α -tocopherol against dioxin toxicity measured as the expression of AhR and COX-2 in a chicken embryo model.

Immunomodulation of cell-penetrating tat-metallothionein for successful outcome of xenotransplanted pancreatic islet.

Dioxin-like rather than non-dioxin-like PCBs promote the development of endometriosis through stimulation of endocrine-inflammation interactions.

The Role of a FAD Cofactor in the Regulation of Acetohydroxyacid Synthase by Redox Signaling Molecules.

Dose-response characteristics of Clematis triterpenoid saponins and clematichinenoside AR in rheumatoid arthritis rats by liquid chromatography/mass spectrometry-based serum and urine metabolomics.

IL-27 triggers IL-10 production in Th17 cells via a c-Maf/ROR γ t/Blimp-1 signal to promote the progression of endometriosis.

Pharmacologic Impact (aka "Breaking Bad") of Medications on Wound Healing and Wound Development: A Literature-based Overview.

Chronic Exposure to Low Doses of Dioxin Promotes Liver Fibrosis Development in the C57BL/6J Diet-Induced Obesity Mouse Model.

From the Cover: Embryonic Exposure to TCDD Impacts Osteogenesis of the Axial Skeleton in Japanese medaka, *Oryzias latipes*.

2,3,7,8-tetrachlorodibenzo-p-dioxin and the viral infection.

Epidemiology of endometriosis and its comorbidities.

Aryl hydrocarbon receptor suppresses the osteogenesis of mesenchymal stem cells in collagen-induced arthritic mice through the inhibition of β -catenin.

[Uremic toxins and gut micro biome].

CCL2 is Upregulated by Decreased miR-122 Expression in Iron-Overload-Induced Hepatic Inflammation.

Mitochondrial Uncoupler Prodrug of 2,4-Dinitrophenol, MP201, Prevents Neuronal Damage and Preserves Vision in Experimental Optic Neuritis.

Arsenite Induces Vascular Endothelial Cell Dysfunction by Activating IRE1 α /XBP1s/HIF1 α -Dependent ANGII Signaling.

Extensin-4 protects kidney from acute ischemia-reperfusion injury through upregulation of NRF2 signaling.

Toxic effects of polybrominated diphenyl ethers (BDE 47 and 99) and localization of BDE-99-induced cyp1a mRNA in zebrafish larvae.

Pinocembrin, a novel histidine decarboxylase inhibitor with anti-allergic potential in vitro.

Doxycycline attenuates paraquat-induced pulmonary fibrosis by downregulating the TGF- β 2 signaling pathway.

Editor's Highlight: Ah Receptor Activation Potentiates Neutrophil Chemoattractant (C-X-C Motif) Ligand 5 Expression in Keratinocytes and Skin.

Imbalanced immune responses involving inflammatory molecules and immune-related pathways in the lung of acute and subchronic arsenic-exposed mice.

Benzene exposure is associated with cardiovascular disease risk.

Acute toxicity of commercial atrazine in *Piaractus mesopotamicus*: Histopathological, ultrastructural, molecular, and genotoxic evaluation.

Inhibition of ALDH2 expression aggravates renal injury in a rat sepsis syndrome model.

Polychlorinated biphenyls disrupt hepatic epidermal growth factor receptor signaling.

Gerontoxanthone B from *Maclura cochinchinensis* var. *gerontogea* exhibits anti-inflammatory potential as an aryl hydrocarbon receptor agonist.

Predictors of acute kidney injury after paraquat intoxication.

Patchouli oil ameliorates acute colitis: A targeted metabolite analysis of 2,4,6-trinitrobenzenesulfonic acid-induced rats.

Targeted metabolomics analysis of aromatic amino acids and their gut microbiota-host cometabolites in rat serum and urine by liquid chromatography coupled with tandem mass spectrometry.

Identification of tissue-specific transcriptional markers of caloric restriction in the mouse and their use to evaluate caloric restriction mimetics.

Organic micropollutants (OMPs) oxidation by ozone: Effect of activated carbon on toxicity abatement.

Real-Time Amperometric Recording of Extracellular H_2O_2 in the Brain of Immunocompromised Mice: An In Vitro, Ex Vivo and In Vivo Characterisation Study.

Zinc and Copper Metabolism and Risk of Autism: a reply to Sayehmiri et al.

Toxicological characterisation of two novel selective aryl hydrocarbon receptor modulators in Sprague-Dawley rats.

Potential role of heme metabolism in the inducible expression of heme oxygenase-1.

Pneumocystis Pneumonia Infection in a Survivor of Paraquat Intoxication.

Histopathological changes in zebrafish embryos exposed to DLPCBs extract from Zhanjiang coastal sediment.

Aryl hydrocarbon receptor upregulates IL-1 β expression in hCMEC/D3 human cerebral microvascular endothelial cells after TCDD exposure.

Expression of advanced glycation end-products and NF κ B in chick embryos exposed to dioxins and treated with acetylsalicylic acid and α -tocopherol.

Role of transient receptor potential ankyrin 1 receptors in rodent models of meningeal nociception - Experiments in vitro.

Fumarate Copolymer-Chitosan Cross-Linked Scaffold Directed to Osteochondrogenic Tissue Engineering.

Diet-induced obesity alters dural CGRP release and potentiates TRPA1-mediated trigeminovascular responses.

Uncovering Potential Applications of Cyanobacteria and Algal Metabolites in Biology, Agriculture and Medicine: Current Status and Future Prospects.

DNA damage by lipid peroxidation products: implications in cancer, inflammation and autoimmunity.

[Quality of prenatal services in primary healthcare in Brazil: indicators and social inequalities].

The Influence of pH on the Scleroglucan and Scleroglucan/Borax Systems.

Paraquat disrupts the anti-inflammatory action of cortisol in human macrophages in vitro: therapeutic implications for paraquat intoxications.

Differential effect of early antibiotic intervention on bacterial fermentation patterns and mucosal gene expression in the colon of pigs under diets with different protein levels.

Discernment scheme for paraquat poisoning: A five-year experience in Shiraz, Iran.

Environmental Factors Impacting Bone-Relevant Chemokines.

The aryl hydrocarbon receptor repressor - More than a simple feedback inhibitor of AhR signaling: Clues for its role in inflammation and cancer.

Mumps caused by paraquat-induced poisoning: A case report.

Review of Advances in Uroprotective Agents for Cyclophosphamide- and Ifosfamide-induced Hemorrhagic Cystitis.

The Anti-Inflammatory and Vasodilating Effects of Three Selected Dietary Organic Sulfur Compounds from Allium Species.

Aryl hydrocarbon receptor (AhR)-dependent regulation of pulmonary miRNA by chronic cigarette smoke exposure.

Crosstalk between Aryl Hydrocarbon Receptor and Glucocorticoid Receptor in Human Retinal Pigment Epithelial Cells.

Uncovering the Molecular Mechanism of Anti-Allergic Activity of Silkworm Pupa-Grown Cordyceps militaris Fruit Body.

Feeble Antipyretic, Analgesic, and Anti-inflammatory Activities were Found with Regular Dose 4'-O- β -D-Glucosyl-5-O-Methylvisamminol, One of the Conventional Marker Compounds for Quality Evaluation of Radix Saposhnikoviae.

The adjuvant use of calcium fructoborate and borax with etanercept in patients with rheumatoid arthritis: Pilot study.

Intravenous injection of Xuebijing attenuates acute kidney injury in rats with paraquat intoxication.

From dioxin toxicity to putative physiologic functions of the human Ah receptor in homeostasis of stem/progenitor cells.

Histone deacetylase inhibitors mediate DNA damage repair in ameliorating hemorrhagic cystitis.

Curcumin inhibits paraquat induced lung inflammation and fibrosis by extracellular matrix modifications in mouse model.

Effect on the growth and development and induction of abnormalities by a glyphosate commercial formulation and its active ingredient during two developmental stages of the South-American Creole frog, *Leptodactylus latrans*.

Stereoselective induction of developmental toxicity and immunotoxicity by acetochlor in the early life stage of zebrafish.

Carvedilol attenuates paraquat-induced lung injury by inhibition of proinflammatory cytokines, chemokine MCP-1, NF- κ B activation and oxidative stress mediators.

Paraquat intoxication and associated pathological findings in three dogs in South Africa.

Antioxidant and neuroprotective effects of Dictyophora indusiata polysaccharide in *Caenorhabditis elegans*.

Nephrotoxicity of Kalach 360 SL: biochemical and histopathological findings.

Glufosinate aerogenic exposure induces glutamate and IL-1 receptor dependent lung inflammation.

Effect of atrazine on immunocompetence of red-eared slider turtle (*Trachemys scripta*).

Rheumatoid Arthritis in Agricultural Health Study Spouses: Associations with Pesticides and Other Farm Exposures.

Assessment of the Effects of MPTP and Paraquat on Dopaminergic Neurons and Microglia in the Substantia Nigra Pars Compacta of C57BL/6 Mice.

Salvianolic acid B protects against paraquat-induced pulmonary injury by mediating Nrf2/Nox4 redox balance and TGF- β 1/Smad3 signaling.

Health effect of agricultural pesticide use in China: implications for the development of GM crops.

Toll-like receptor 4 knockout alleviates paraquat-induced cardiomyocyte contractile dysfunction through an autophagy-dependent mechanism.

Poly-ADP-ribose polymerase inhibition provides protection against lung injury in a rat paraquat toxicity model.

High-Concentration L-Menthol Exhibits Counter-Irritancy to Neurogenic Inflammation, Thermal and Mechanical Hyperalgesia Caused by Trans-cinnamaldehyde.

Thymoquinone effectively alleviates lung fibrosis induced by paraquat herbicide through down-regulation of pro-fibrotic genes and inhibition of oxidative stress.

Protective effect of *Berberis vulgaris* fruit extract against Paraquat-induced pulmonary fibrosis in rats.

Unilateral microinjection of acrolein into thoracic spinal cord produces acute and chronic injury and functional deficits.

Proposed Mode of Action for Acrolein Respiratory Toxicity Associated with Inhaled Tobacco Smoke.

The metabolite 3,4,3',4'-tetrachloroazobenzene (TCAB) exerts a higher ecotoxicity than the parent compounds 3,4-dichloroaniline (3,4-DCA) and propanil.

Acute and short-term developmental toxicity of cyhalofop-butyl to zebrafish (*Danio rerio*).

Paraquat Poisoning in Patients With HIV Infection: A Case Report and Literature Review.

Activating Peroxisome Proliferator-Activated Receptors (PPARs): a New Sight for Chrysophanol to Treat Paraquat-Induced Lung Injury.

The effect of two glyphosate formulations on a small, diurnal lizard (*Oligosoma polychroma*).

Protective Effects of Apigenin Against Paraquat-Induced Acute Lung Injury in Mice.

Unfractionated bone marrow cells attenuate paraquat-induced glomerular injury and acute renal failure by modulating the inflammatory response.

Combined Effects of Pesticides and Trematode Infections on Hourglass Tree Frog *Polypedates cruciger*.

Acute paraquat exposure impairs colonic motility by selectively attenuating nitrenergic signalling in the mouse.

Acrolein-mediated conduction loss is partially restored by K^+ channel blockers.

Common and distinct mechanisms of induced pulmonary fibrosis by particulate and soluble chemical fibrogenic agents.

Radix puerariae extracts ameliorate paraquat-induced pulmonary fibrosis by attenuating follistatin-like 1 and nuclear factor erythroid 2p45-related factor-2 signalling pathways through downregulation of miRNA-21 expression.

The tobacco smoke component acrolein induces glucocorticoid resistant gene expression via inhibition of histone deacetylase.

Effects of high doses of dexamethasone on hemodynamic and immunohistochemical characteristics of acute paraquat intoxication in rat kidneys.

Tumor necrosis factor- α induced protein 6 attenuates acute lung injury following paraquat exposure.

Inhalation of the reactive aldehyde acrolein promotes antigen sensitization to ovalbumin and enhances neutrophilic inflammation.

Cinnamaldehyde ameliorates LPS-induced cardiac dysfunction via TLR4-NOX4 pathway: The regulation of autophagy and ROS production.

Cinnamaldehyde, Carvacrol and Organic Acids Affect Gene Expression of Selected Oxidative Stress and Inflammation Markers in IPEC-J2 Cells Exposed to *Salmonella typhimurium*.

Novel broad-spectrum and long-acting parenteral cephalosporins having an acyl cyanamide moiety at the C-3 terminal: Synthesis and structure-activity relationships.

Intracellular TRPA1 mediates Ca^{2+} release from lysosomes in dorsal root ganglion neurons.

Trans-cinnamaldehyde improves memory impairment by blocking microglial activation through the destabilization of iNOS mRNA in mice challenged with lipopolysaccharide.

Cinnamaldehyde derivatives inhibit degranulation and inflammatory mediator production in rat basophilic leukemia cells.

Trans-Cinnamaldehyde, An Essential Oil in Cinnamon Powder, Ameliorates Cerebral Ischemia-Induced Brain Injury via Inhibition of Neuroinflammation Through Attenuation of iNOS, COX-2 Expression and NF κ -B Signaling Pathway.

Selective inhibition of JAK2/STAT1 signaling and iNOS expression mediates the anti-inflammatory effects of cinnamaldehyde.

Reversal of diabetes-induced behavioral and neurochemical deficits by cinnamaldehyde.

Albumin Cys34 adducted by acrolein as a marker of oxidative stress in ischemia-reperfusion injury during hepatectomy.

Discovery of a novel anti-cancer agent targeting both topoisomerase I and II in hepatocellular carcinoma Hep 3B cells in vitro and in vivo: Cinnamomum verum component 2-methoxycinnamaldehyde.

Cinnamaldehyde and allopurinol reduce fructose-induced cardiac inflammation and fibrosis by attenuating CD36-mediated TLR4/6-IRAK4/1 signaling to suppress NLRP3 inflammasome activation.

Cinnamaldehyde is an effective anti-inflammatory agent for treatment of allergic rhinitis in a rat model.

Cinnamaldehyde modulates LPS-induced systemic inflammatory response syndrome through TRPA1-dependent and independent mechanisms.

3-Aminotriazole protects from CoCl₂-induced ototoxicity by inhibiting the generation of reactive oxygen species and proinflammatory cytokines in mice.

Impact of 3-Amino-1,2,4-Triazole (3-AT)-Derived Increase in Hydrogen Peroxide Levels on Inflammation and Metabolism in Human Differentiated Adipocytes.

Cinnamaldehyde supplementation prevents fasting-induced hyperphagia, lipid accumulation, and inflammation in high-fat diet-fed mice.

Perfluorocarbon attenuates inflammatory cytokines, oxidative stress and histopathologic changes in paraquat-induced acute lung injury in rats.

Calcium carbonate hydrogel construct with cinnamaldehyde incorporated to control inflammation during surgical procedure.

Structural and biochemical abnormalities in the absence of acute deficits in mild primary blast-induced head trauma.

A low toxicity synthetic cinnamaldehyde derivative ameliorates renal inflammation in mice by inhibiting NLRP3 inflammasome and its related signaling pathways.

Protective Effect of Astragaloside IV Against Paraquat-Induced Lung Injury in Mice by Suppressing Rho Signaling.

Discovery of a novel anticancer agent with both anti-topoisomerase I and II activities in hepatocellular carcinoma SK-Hep-1 cells in vitro and in vivo: Cinnamomum verum component 2-methoxycinnamaldehyde.

Novel Role of Endogenous Catalase in Macrophage Polarization in Adipose Tissue.

[The effect of resveratrol on paraquat-induced acute lung injury in mice and its mechanism].

Chyawanprash, a formulation of traditional Ayurvedic medicine, shows a protective effect on skin photoaging in hairless mice.

Acrolein and thiol-reactive electrophiles suppress allergen-induced innate airway epithelial responses by inhibition of DUOX1 and EGFR.

2-Phenethyl Isothiocyanate, Glutathione S-transferase M1 and T1 Polymorphisms, and Detoxification of Volatile Organic Carcinogens and Toxicants in Tobacco Smoke.

Novel Approach for High-Throughput Metabolic Screening of Whole Plants by Stable Isotopes.

Protective effect of carnosic acid against paraquat-induced redox impairment and mitochondrial dysfunction in SH-SY5Y cells: Role for PI3K/Akt/Nrf2 pathway.

[The expressions of intercellular adhesion molecule-1 in renal tissue of rats with paraquat poisoning and the effect of melatonin].

Anti-oxidative and anti-inflammatory effects of cinnamaldehyde on protecting high glucose-induced damage in cultured dorsal root ganglion neurons of rats.

Disseminated tungiasis in a 78-year-old woman from Tanzania: a case report.

Semilobar holoprosencephaly in a 12-month-old baby boy born to a primigravida patient with type 1 diabetes mellitus: a case report.

Neuropathic organophosphates: from Scrugham, Heim and Lorot to Jake leg paralysis.

Inhibitory effects of norlignans isolated from *Anemarrhena asphodeloides* on degranulation of rat basophilic leukemia- β 3H3Cells.

Pomegranate protects against arsenic-induced p53-dependent ROS-mediated inflammation and apoptosis in liver cells.

From the Cover: Coagulation-Driven Hepatic Fibrosis Requires Protease Activated Receptor-1 (PAR-1) in a Mouse Model of TCDD-Elicited Steatohepatitis.

Dose-Dependent Metabolic Reprogramming and Differential Gene Expression in TCDD-Elicited Hepatic Fibrosis.

Different modes of synergistic toxicities between metam/copper (II) and metam/zinc (II) in HepG2 cells: apoptosis vs. necrosis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) increases necroinflammation and hepatic stellate cell activation but does not exacerbate experimental liver fibrosis in mice.

Synthesis of phenylpiperazine derivatives of 1,4-benzodioxan as selective COX-2 inhibitors and anti-inflammatory agents.

Exposure to polychlorinated biphenyl-153 decreases incidence of autoimmune Type 1 diabetes in non-obese diabetic mice.

The cardioprotective effect of melatonin and exendin-4 treatment in a rat model of cardiorenal syndrome.

Carbamylated Low-Density Lipoproteins Induce a Prothrombotic State Via LOX-1: Impact on Arterial Thrombus Formation In Vivo.

The effects of fat loss after bariatric surgery on inflammation, serum hepcidin, and iron absorption: a prospective 6-mo iron stable isotope study.

Plant lignan secoisolariciresinol suppresses pericardial edema caused by dioxin-like compounds in developing zebrafish: Implications for suppression of morphological abnormalities.

From the Cover: Tetrachlorobenzoquinone Exerts Neurological Proinflammatory Activity by Promoting HMGB1 Release, Which Induces TLR4 Clustering within the Lipid Raft.

Halogenated carbazoles induce cardiotoxicity in developing zebrafish (*Danio rerio*) embryos.

Intestinal microbiota in pediatric patients with end stage renal disease: a Midwest Pediatric Nephrology Consortium study.

Development of potent chemical antituberculosis agents targeting *Mycobacterium tuberculosis* acetohydroxyacid synthase.

Protective effect of prostacyclin against pre-cardiac edema caused by 2,3,7,8-tetrachlorodibenzo-p-dioxin and a thromboxane receptor agonist in developing zebrafish.

Endometrial expression and *in vitro* modulation of the iron transporter divalent metal transporter-1: implications for endometriosis.

Balneotherapy in rheumatoid arthritis-a systematic review.

Comparison of the Efficacies of Parenteral Iron Sucrose and Oral Iron Sulfate for Anemic Patients with Inflammatory Bowel Disease in Korea.

METABOLIC DYSBIOSIS OF THE GUT MICROBIOTA AND ITS BIOMARKERS.

Physiological Aspects of Female Fertility: Role of the Environment, Modern Lifestyle, and Genetics.

Arsenite and Cadmium Activate MAPK/ERK via Membrane Estrogen Receptors and G-Protein Coupled Estrogen Receptor Signaling in Human Lung Adenocarcinoma Cells.

Inflammation, glucose, and vascular cell damage: the role of the pentose phosphate pathway.

Enhanced cyclooxygenase-2 expression levels and metalloproteinase 2 and 9 activation by Hexachlorobenzene in human endometrial stromal cells.

Involvement of Mouse Constitutive Androstane Receptor in Acifluorfen-Induced Liver Injury and Subsequent Tumor Development.

The use of *Aedes aegypti* larvae attractants to enhance the effectiveness of larvicides.

The effect of ferrous-chelating hairtail peptides on iron deficiency and intestinal flora in rats.

Aryl hydrocarbon receptor knockout rats are insensitive to the pathological effects of repeated oral exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

New insights into BaP-induced toxicity: role of major metabolites in transcriptomics and contribution to hepatocarcinogenesis.

Digoxin reduces atherosclerosis in apolipoprotein E-deficient mice.

Immunomodulation By Subchronic Low Dose 2,3,7,8-Tetrachlorodibenzo-p-Dioxin in Experimental Autoimmune Encephalomyelitis in the Absence of Pertussis Toxin.

Altered intestinal microbial flora and impaired epithelial barrier structure and function in CKD: the nature, mechanisms, consequences and potential treatment.

C-Terminal Amino Acids 471-507 of Avian Hepatitis E Virus Capsid Protein Are Crucial for Binding to Avian and Human Cells.

Repurposing an orally available drug for the treatment of geographic atrophy.

Public health and international drug policy.

Gut microbiome in chronic kidney disease.

Comparative experimental investigation on the efficacy of mono- and multiprobiotic strains in non-alcoholic fatty liver disease prevention.

TCDD-Induced Activation of Aryl Hydrocarbon Receptor Inhibits Th17 Polarization and Regulates Non-Eosinophilic Airway Inflammation in Asthma.

[Incidence and risk factors associated with nosocomial infection in pediatric heart surgery].

Evaluation of Safety of Iron-Fortified Soybean Sprouts, a Potential Component of Functional Food, in Rat.

5-Aminolevulinic acid combined with ferrous iron ameliorate ischemia-reperfusion injury in the mouse fatty liver model.

Synbiotics Easing Renal Failure by Improving Gut Microbiology (SYNERGY): A Randomized Trial.

Evaluation of cytotoxicity and genotoxicity of *Hancornia speciosa* latex in *Allium cepa* root model.

Sulforaphane exerts its anti-inflammatory effect against amyloid- β^2 peptide via STAT-1 dephosphorylation and activation of Nrf2/HO-1 cascade in human THP-1 macrophages.

The role of peroxiredoxin 4 in inflammatory response and aging.

p-Cresyl sulfate is associated with carotid arteriosclerosis in hemodialysis patients and promotes atherogenesis in apoE^{-/-} mice.

Developmental toxicity, EROD, and CYP1A mRNA expression in zebrafish embryos exposed to dioxin-like PCB126.

Therapeutic evaluation of HIV transduction basic domain-conjugated superoxide dismutase solution on suppressive effects of the formation of peroxynitrite and expression of COX-2 in murine skin.

Melatonergic System in Parkinson's Disease: From Neuroprotection to the Management of Motor and Nonmotor Symptoms.

Synthesis and Pharmacological Evaluation of Tetrazolobenzimidazoles as Novel Anti-inflammatory Agents.

Management and Treatment of Human Lice.

Increased Levels of Total p-Cresylsulfate Are Associated with Pruritus in Patients with Chronic Kidney Disease.

Chronic TCDD exposure results in the dysregulation of gene expression in splenic B-lymphocytes and in the impairments in T-cell and B-cell differentiation in mouse model.

Synthesis, Characterization & Screening for Anti-Inflammatory & Analgesic Activity of Quinoline Derivatives Bearing Azetidinones Scaffolds.

Oligonol Ameliorates CCl₄-Induced Liver Injury in Rats via the NF-Kappa B and MAPK Signaling Pathways.

Tetrachlorobenzoquinone exhibits neurotoxicity by inducing inflammatory responses through ROS-mediated IKK/Î⁹B/NF-Î⁹B signaling.

Initial Serum Ammonia as a Predictor of Neurologic Complications in Patients with Acute Glufosinate Poisoning.

Sesamin attenuates mast cell-mediated allergic responses by suppressing the activation of p38 and nuclear factor-Î⁹B.

Antipyretic and antimalarial activities of Solenostemon monostachyus.

How we diagnose and treat iron deficiency anemia.

Protective Effects of Combined Selenium and Punica granatum Treatment on Some Inflammatory and Oxidative Stress Markers in Arsenic-Induced Hepatotoxicity in Rats.

Tolfenamic acid degradation by direct photolysis and the UV-ABC/H₂O₂ process: factorial design, kinetics, identification of intermediates, and toxicity evaluation.

Influence of LED light spectra on in vitro somatic embryogenesis and LC-MS analysis of chlorogenic acid and rutin in Peucedanum japonicum Thunb.: a medicinal herb.

Person-centered older military veteran care when there are consequences.

RNA Interference Directed against the Transglutaminase Gene Triggers Dysbiosis of Gut Microbiota in Drosophila.

Protective Effects of Essential Oils as Natural Antioxidants against Hepatotoxicity Induced by Cyclophosphamide in Mice.

The Effects of Nanoparticles Containing Iron on Blood and Inflammatory Markers in Comparison to Ferrous Sulfate in Anemic Rats.

The Mycobacterium tuberculosis transcriptional landscape under genotoxic stress.

Formyl peptide receptor modulators: a patent review and potential applications for inflammatory diseases (2012-2015).

Odorants specifically modulate chemotaxis and tissue retention of CD4+ T cells via cyclic adenosine monophosphate induction.

The Effect of Cellular Stress on T and B Cell Memory Pathways in Immunized and Unimmunized BALB/c Mice.

Vam3, a Compound Derived from Vitis amurensis Rupr., Attenuated Colitis-Related Tumorigenesis by Inhibiting NF- κ B Signaling Pathway.

Exogenous lipid pneumonia caused by herbicide inhalation.

Risk Factors for Herpes Zoster Among Adults.

Signaling mechanisms underlying the glioprotective effects of resveratrol against mitochondrial dysfunction.

Molecular Hydrogen Alleviates Cellular Senescence in Endothelial Cells.

Sulforaphane protects against acrolein-induced oxidative stress and inflammatory responses: modulation of Nrf-2 and COX-2 expression.

Toxicity of 3,5,6-trichloro-2-pyridinol tested at multiple stages of zebrafish (Danio rerio) development.

Toxic effects of glyphosate-based herbicide, Excel Mera 71 on gill, liver, and kidney of Heteropneustes fossilis under laboratory and field conditions.

[The effect and injury to the airways of different sputum aspiration pressure in a rat model of mucus hypersecretion].

Organic micropollutants (OMPs) in natural waters: Oxidation by UV/H₂O₂ treatment and toxicity assessment.

Mitigation of sensory and motor deficits by acrolein scavenger phenelzine in a rat model of spinal cord contusive injury.

Multivariate approach to gill pathology in European sea bass after experimental exposure to cadmium and terbuthylazine.

Transgenic Overexpression of Aryl Hydrocarbon Receptor Repressor (AhRR) and AhR-Mediated Induction of CYP1A1, Cytokines, and Acute Toxicity.

p-cresol but not p-cresyl sulfate stimulate MCP-1 production via NF- κ B p65 in human vascular smooth muscle cells.

Is exposure to Agent Orange a risk factor for hepatocellular cancer?-A single-center retrospective study in the U.S. veteran population.

Data supporting the involvement of the adenine nucleotide translocase conformation in opening the Tl(+)-induced permeability transition pore in Ca(2+)-loaded rat liver mitochondria.

The Helicobacter pylori CZB Cytoplasmic Chemoreceptor TlpD Forms an Autonomous Polar Chemotaxis Signaling Complex That Mediates a Tactic Response to Oxidative Stress.

Exposure to butachlor causes thyroid endocrine disruption and promotion of metamorphosis in Xenopus laevis.

Walnut Polyphenol Extract Attenuates Immunotoxicity Induced by 4-Pentylphenol and 3-methyl-4-nitrophenol in Murine Splenic Lymphocyte.

Anti-inflammatory Montelukast prevents toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin: Oxidative stress, histological alterations in liver, and serum cytokine levels.

Probing the Sophisticated Synergistic Allosteric Regulation of Aromatic Amino Acid Biosynthesis in Mycobacterium tuberculosis Using á'...-Amino Acids.

Treatment of ResÄ±stant Cyclophosphamide Induced Haemorrhagic CystÄ±tÄ±s: RevÄ±ew of Literature and Three Case Reports.

To involvement the conformation of the adenine nucleotide translocase in opening the Tl(+)-induced permeability transition pore in Ca(2+)-loaded rat liver mitochondria.

Are bee diseases linked to pesticides? - A brief review.

Inhibition of ATP synthesis by fenbufen and its conjugated metabolites in rat liver mitochondria.

European sea bass gill pathology after exposure to cadmium and terbuthylazine: expert versus fractal analysis.

The olive leaf extract oleuropein exerts protective effects against oxidant-induced cell death, concurrently displaying pro-oxidant activity in human hepatocarcinoma cells.

Developmental toxicity, oxidative stress, and related gene expression induced by dioxin-like PCB 126 in zebrafish (Danio rerio).

Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) increases human hepatic stellate cell activation.

Disinfectant-susceptibility of multi-drug-resistant Mycobacterium tuberculosis isolated in Japan.

Dual ATPase and GTPase activity of the replication-associated protein (Rep) of beak and feather disease virus.

Pyruvate Kinase Isoform Switching and Hepatic Metabolic Reprogramming by the Environmental Contaminant 2,3,7,8-Tetrachlorodibenzo-p-Dioxin.

Kolaviron was protective against sodium azide (NaN₃) induced oxidative stress in the prefrontal cortex.

Evaluation of serum markers of blood redox homeostasis and inflammation in PCB naturally contaminated heifers undergoing decontamination.

Astaxanthin Inhibits Expression of Retinal Oxidative Stress and Inflammatory Mediators in Streptozotocin-Induced Diabetic Rats.

Evaluation of functioning of mitochondrial electron transport chain with NADH and FAD autofluorescence.

Use of extracorporeal removal techniques in patients with paraquat toxicity and unknown hepatitis viral marker status.

The pretransplant systemic metabolic profile reflects a risk of acute graft versus host disease after allogeneic stem cell transplantation.

Aryl Hydrocarbon Receptor Activation by TCDD Modulates Expression of Extracellular Matrix Remodeling Genes during Experimental Liver Fibrosis.

Severe Endobronchial Inflammation Induced by Aspiration of a Ferrous Sulfate Tablet.

The onset of lipid peroxidation in rheumatoid arthritis: consequences and monitoring.

Gene Expression Patterns Associated With Histopathology in Toxic Liver Fibrosis.

Artificial sweetener neohesperidin dihydrochalcone showed antioxidative, anti-inflammatory and anti-apoptosis effects against paraquat-induced liver injury in mice.

Histopathological and ultramicroscopical changes in gill, liver and kidney of *Anabas testudineus* (Bloch) after chronic intoxication of almix (metsulfuron methyl 10.1%+chlorimuron ethyl 10.1%) herbicide.

A Potential Role for Acrolein in Neutrophil-Mediated Chronic Inflammation.

Synergism of herbicide toxicity by 5-aminolevulinic acid is related to physiological and ultra-structural disorders in crickweed (*Malachium aquaticum* L.).

Successful extracorporeal membrane oxygenation therapy as a bridge to sequential bilateral lung transplantation for a patient after severe paraquat poisoning.

Neurotoxicity effects of atrazine-induced SH-SY5Y human dopaminergic neuroblastoma cells via microglial activation.

Caspase-2 protects against oxidative stress in vivo.

[Clinical significance of dynamic changes in serum inflammatory cell factors after acute paraquat poisoning].

[Inhibitory effects of curcumin on inflammatory cytokines in rats with paraquat poisoning].

[Hemoperfusion alleviated paraquat-induced kidney inflammation injury of rabbit].

[Changes of CD(4)(+) Foxp3+ regulatory T cells and CD(4)(+)IL-17+T cells in acrolein exposure rats].

[The effect of signal transduction pathway of triggering receptor-1 expressed on myeloid cells in acute lung injury induced by paraquat in rats].

NLRP3 inflammasome activation by mitochondrial reactive oxygen species plays a key role in long-term cognitive impairment induced by paraquat exposure.

Inflammatory reaction regulated by microglia plays a role in atrazine-induced dopaminergic neuron degeneration in the substantia nigra.

Carcinogenicity of lindane, DDT, and 2,4-dichlorophenoxyacetic acid.

Lethal and sub-lethal chronic effects of the herbicide diuron on seagrass.

Protective Effects of Arachidonic Acid Against Paraquat-Induced Pulmonary Injury.

Surfactant toxicity in a case of (4-chloro-2-methylphenoxy) acetic acid herbicide intoxication.

Acute eosinophilic pneumonia associated with glyphosate-surfactant exposure.

[The protective effect of ulinastatin on paraquat-induced injury in HK-2 cells and the underlying mechanisms].

Pneumomediastinum predicts early mortality in acute paraquat poisoning.

Connective tissue growth factor stimulates the proliferation, migration and differentiation of lung fibroblasts during paraquat-induced pulmonary fibrosis.

Teratogenicity, genotoxicity and oxidative stress in zebrafish embryos (*Danio rerio*) co-exposed to arsenic and atrazine.

2-Methyl-4-chlorophenoxyacetic acid and bromoxynil herbicide death.

Alteration in the cytokine levels and histopathological damage in common carp induced by glyphosate.

[The study of kidney injury in rats with acute paraquat poisoning].

[The effect of paraquat on voltage-dependent anion channel and caspase-3, 8, 9 in the mitochondria of rat lung].

Losartan attenuates paraquat-induced pulmonary fibrosis in rats.

α,β -Unsaturated aldehyde pollutant acrolein suppresses cardiomyocyte contractile function: Role of TRPV1 and oxidative stress.

Traditional chinese medicine Xuebijing treatment is associated with decreased mortality risk of patients with moderate paraquat poisoning.

The manganese-salen compound EUK-134 and N-acetyl cysteine rescue from zinc- and paraquat-induced toxicity in rat polymorphonuclear leukocytes.

[Expression of heme oxygenase-1 in lung tissue of paraquat poisoned mice and its significance].

[Inhibition of pulmonary nuclear factor κ B and tumor necrosis factor α expression by diallyl sulfide in rats with paraquat poisoning].

Betanin attenuates oxidative stress and inflammatory reaction in kidney of paraquat-treated rat.

Increased toll-like receptor 9 expression is associated with the severity of paraquat-induced lung injury in mice.

Polyphenol extract from *Phellinus igniarius* protects against acrolein toxicity in vitro and provides protection in a mouse stroke model.

The significance of serum uric acid level in humans with acute paraquat poisoning.

A case report of severe paraquat poisoning in an HIV-positive patient: an unexpected outcome and inspiration.

Molecular mechanisms of acrolein toxicity: relevance to human disease.

(1)H NMR based metabolomics approach to study the toxic effects of herbicide butachlor on goldfish (*Carassius auratus*).

Histopathological alterations in the kidney of Caspian kutum, *Rutilus frisii kutum*, larvae and fingerlings exposed to sublethal concentration of atrazine.

NLRP3 inflammasome activation is essential for paraquat-induced acute lung injury.

Dimethylarsinic acid (DMA(V)) changed the expressions of proliferative related factors and secretion of inflammatory cytokines in rat bladder.

The relation between oxidative stress, inflammation, and neopterin in the paraquat-induced lung toxicity.

Artesunate Attenuates Lung Injury in Paraquat-Intoxicated Rats via Downregulation of Inflammatory Cytokines.

Acute effects of acrolein in human volunteers during controlled exposure.

Superantigen staphylococcal enterotoxin C1 mutant can reduce paraquat pulmonary fibrosis.

[The research progress of paraquat poisoning lung molecular mechanism].

Evaluation of a multiple sclerosis cluster among nurses in an inpatient oncology ward.

Enhancement of the acrolein-induced production of reactive oxygen species and lung injury by GADD34.

Cellular RNA is chemically modified by exposure to air pollution mixtures.

Effects of rapamycin against paraquat-induced pulmonary fibrosis in mice.

Acute and long-term ocular effects of acrolein vapor on the eyes and potential therapies.

Transcription alteration of immunologic parameters and histopathological damage in common carp (*Cyprinus carpio* L.) caused by paraquat.

Mifepristone-inducible recombinant adenovirus attenuates paraquat-induced lung injury in rats.

Oral Administration of 4-Hydroxy-3-Methoxycinnamaldehyde Attenuates Atopic Dermatitis by Inhibiting T Cell and Keratinocyte Activation.

Influence of myeloperoxidase on colon tumor occurrence in inflamed versus non-inflamed colons of Apc(Min/+) mice.

Cinnamaldehyde attenuates pressure overload-induced cardiac hypertrophy.

Parkinson's disease and enhanced inflammatory response.

Increase in acrolein-conjugated immunoglobulins in saliva from patients with primary Sjögren's syndrome.

Cinnamaldehyde inhibits inflammation and brain damage in a mouse model of permanent cerebral ischaemia.

Effect of essential oils of *Syzygium aromaticum* and *Cinnamomum zeylanicum* and their major components on biofilm production in *Staphylococcus aureus* strains isolated from milk of cows with mastitis.

Lung inflammation biomarkers and lung function in children chronically exposed to arsenic.

Absence of *sodA* Increases the Levels of Oxidation of Key Metabolic Determinants of *Borrelia burgdorferi*.

TRPA1 mediates the hypothermic action of acetaminophen.

Efficacy and safety of pulse immunosuppressive therapy with glucocorticoid and cyclophosphamide in patients with paraquat poisoning: A meta-analysis.

Mechanical overloading causes mitochondrial superoxide and SOD2 imbalance in chondrocytes resulting in cartilage degeneration.

Endogenous hydrogen peroxide in the hypothalamic paraventricular nucleus regulates neurohormonal excitation in high salt-induced hypertension.

Nrf2-dependent suppression of azoxymethane/dextran sulfate sodium-induced colon carcinogenesis by the cinnamon-derived dietary factor cinnamaldehyde.

Aminotriazole alleviates acetaminophen poisoning via downregulating P450 2E1 and suppressing inflammation.

[Therapeutic effects of gastric lavage with fuller earth combined with Qingyill catharsis in treatment of oral paraquat poisoning in rabbits].

Antinociceptive effect of methanol extract of leaves of *Persicaria hydropiper* in mice.

Cinnamic aldehyde treatment alleviates chronic unexpected stress-induced depressive-like behaviors via targeting cyclooxygenase-2 in mid-aged rats.

Oxidative Stress during the Progression of β^2 -Amyloid Pathology in the Neocortex of the Tg2576 Mouse Model of Alzheimer's Disease.

Natural antioxidant betanin protects rats from paraquat-induced acute lung injury interstitial pneumonia.

Anti-inflammatory effect of cinnamaldehyde in *Helicobacter pylori* induced gastric inflammation.

Donepezil Regulates 1-Methyl-4-phenylpyridinium-Induced Microglial Polarization in Parkinson's Disease.

Functional evaluation of residues in the herbicide-binding site of *Mycobacterium tuberculosis* acetohydroxyacid synthase by site-directed mutagenesis.

[Changes of the Expression of Brain Derived Neurotrophic Factors in Rats Trachea Induced by Acrolein Exposure].

Cinnamaldehyde and nitric oxide attenuate advanced glycation end products-induced the Jak/STAT signaling in human renal tubular cells.

Proinflammatory effect of trivalent arsenical species in a co-culture of Caco-2 cells and peripheral blood mononuclear cells.

Anti-inflammatory activity of cinnamon (*C. zeylanicum* and *C. cassia*) extracts - identification of E-cinnamaldehyde and o-methoxy cinnamaldehyde as the most potent bioactive compounds.

DMA(V) in Drinking Water Activated NF- κ B Signal Pathway and Increased TGF- β 2 and IL-1 β Expressions in Bladder Epithelial Cells of Rats.

Gingiva Equivalent Secretes Negligible Amounts of Key Chemokines Involved in Langerhans Cell Migration Compared to Skin Equivalent.

Aryl Hydrocarbon Receptor Protects Lungs from Cockroach Allergen-Induced Inflammation by Modulating Mesenchymal Stem Cells.

A visible light induced photoelectrochemical aptasensor constructed by aligned ZnO@CdTe core shell nanocable arrays/carboxylated g-C₃N₄ for the detection of Proprotein convertase subtilisin/kexin type 6 gene.

Identification of *Scedosporium boydii* catalase A1 gene, a reactive oxygen species detoxification factor highly expressed in response to oxidative stress and phagocytic cells.

Polyreactive antibodies in the circulation of patients with systemic lupus erythematosus.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin Alters Lipid Metabolism and Depletes Immune Cell Populations in the Jejunum of C57BL/6 Mice.

Developmental Activation of the AHR Increases Effector CD4⁺ T Cells and Exacerbates Symptoms in Autoimmune Disease-Prone Gnaq[±] Mice.

Effects of co-exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin and polychlorinated biphenyls on nonalcoholic fatty liver disease in mice.

Reversible Splenic Lesion Syndrome (RESLES) Following Glufosinate Ammonium Poisoning.

Small molecule inhibitors of PSD95-nNOS protein-protein interactions as novel analgesics.

Activation of the Prostaglandin E2 receptor EP2 prevents house dust mite-induced airway hyperresponsiveness and inflammation by restraining mast cells' activity.

The Chronic Kidney Disease - Colonic Axis.

Ablation of XP-V gene causes adipose tissue senescence and metabolic abnormalities.

Differential Effects of Glycyrrhiza Species on Genotoxic Estrogen Metabolism: Licochalcone A Downregulates P450 1B1, whereas Isoliquiritigenin Stimulates It.

Evaluation of efficacy of resin hemoperfusion in patients with acute 2,4-dinitrophenol poisoning by dynamic monitoring of plasma toxin concentration.

Activation of the aryl hydrocarbon receptor during development enhances the pulmonary CD4+ T-cell response to viral infection.

Left ventricular global longitudinal strain is associated with cardiovascular risk factors and arterial stiffness in chronic kidney disease.

Loss of the Mono-ADP-ribosyltransferase, Tiparp, Increases Sensitivity to Dioxin-induced Steatohepatitis and Lethality.

[Virulence genes and clinical features of Clostridium difficile-associated diarrhea in children].

Tetramethylpyrazine (TMP) protects against sodium arsenite-induced nephrotoxicity by suppressing ROS production, mitochondrial dysfunction, pro-inflammatory signaling pathways and programmed cell death.

The Transcriptional Effects of PCB118 and PCB153 on the Liver, Adipose Tissue, Muscle and Colon of Mice: Highlighting of Glut4 and Lipin1 as Main Target Genes for PCB Induced Metabolic Disorders.

Environmental immune disruptors, inflammation and cancer risk.

Chemical compounds from anthropogenic environment and immune evasion mechanisms: potential interactions.

Differential regulation of Th17 and T regulatory cell differentiation by aryl hydrocarbon receptor dependent xenobiotic response element dependent and independent pathways.

Arsenic exposure and prevalence of the varicella zoster virus in the United States: NHANES (2003-2004 and 2009-2010).

Zebrafish cardiotoxicity: the effects of CYP1A inhibition and AHR2 knockdown following exposure to weak aryl hydrocarbon receptor agonists.

Identification of Environmental Chemicals Associated with the Development of Toxicant-associated Fatty Liver Disease in Rodents.

Effect of tocopherol on biochemical blood parameters in pleuritis-induced rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Ferrous sulfate, but not iron polymaltose complex, aggravates local and systemic inflammation and oxidative stress in dextran sodium sulfate-induced colitis in rats.

Low Concentrations of Uncouplers of Oxidative Phosphorylation Prevent Inflammatory Activation of Endothelial Cells by Tumor Necrosis Factor.

The aryl hydrocarbon receptor (AhR) mediates resistance to apoptosis induced in breast cancer cells.

Oligofructose protects against arsenic-induced liver injury in a model of environment/obesity interaction.

Clinical significance of C-reactive protein levels in predicting responsiveness to iron therapy in patients with inflammatory bowel disease and iron deficiency anemia.

Increasing frequency of severe clinical toxicity after use of 2,4-dinitrophenol in the UK: a report from the National Poisons Information Service.

Metabolic outcome of female mice exposed to a mixture of low-dose pollutants in a diet-induced obesity model.

Sodium meta-arsenite prevents the development of autoimmune diabetes in NOD mice.

Modulation of colon cancer by nutmeg.

Non-dioxin-like polychlorinated biphenyls (PCB 101, PCB 153 and PCB 180) induce chondrocyte cell death through multiple pathways.

Estrogenic endocrine-disrupting chemicals modulate the production of inflammatory mediators and cell viability of lipopolysaccharide-stimulated macrophages.

Controlled-release mitochondrial protonophore reverses diabetes and steatohepatitis in rats.

In Ivorian school-age children, infection with hookworm does not reduce dietary iron absorption or systemic iron utilization, whereas afebrile Plasmodium falciparum infection reduces iron absorption by half.

Associations between urinary phenol and paraben concentrations and markers of oxidative stress and inflammation among pregnant women in Puerto Rico.

The inflammation and estrogen metabolism impacts of polychlorinated biphenyls on endometrial cancer cells.

Effects of sodium arsenite on the some laboratory signs and therapeutic role of thymoquinone in the rats.

Ferric maltol (ST10): a novel oral iron supplement for the treatment of iron deficiency anemia in inflammatory bowel disease.

Novel 3'-Processing Integrase Activity Assay by Real-Time PCR for Screening and Identification of HIV-1 Integrase Inhibitors.

Indoxyl sulfate, not P-cresyl sulfate, is associated with advanced glycation end products in patients on long-term hemodialysis.

Borax partially prevents neurologic disability and oxidative stress in experimental spinal cord ischemia/reperfusion injury.

Ferric carboxymaltose: a review of its use in iron deficiency.

Exposure to As-, Cd-, and Pb-mixture induces Al^{2+} , amyloidogenic APP processing and cognitive impairments via oxidative stress-dependent neuroinflammation in young rats.

Effects of acute hypercapnia with and without acidosis on lung inflammation and apoptosis in experimental acute lung injury.

Diamide accelerates opening of the TI(+)-induced permeability transition pore in Ca^{2+} -loaded rat liver mitochondria.

Aryl hydrocarbon receptor antagonism and its role in rheumatoid arthritis.

Paraquat and psychological stressor interactions as pertains to Parkinsonian co-morbidity.

Microbiota-Dependent Priming of Antiviral Intestinal Immunity in *Drosophila*.

Monomethylarsonous Acid (MMAIII) Has an Adverse Effect on the Innate Immune Response of Human Bronchial Epithelial Cells to *Pseudomonas aeruginosa*.

The small heat shock protein, HSP30, is associated with aggresome-like inclusion bodies in proteasomal inhibitor-, arsenite-, and cadmium-treated *Xenopus* kidney cells.

Hepatotoxicity, Nephrotoxicity and Oxidative Stress in Rat Testis Following Exposure to Haloxyfop-p-methyl Ester, an Aryloxyphenoxypropionate Herbicide.

The role of thioredoxin reductase and glutathione reductase in plumbagin-induced, reactive oxygen species-mediated apoptosis in cancer cell lines.

Intestinal absorption mechanisms of MTBH, a novel hesperetin derivative, in Caco-2 cells, and potential involvement of monocarboxylate transporter 1 and multidrug resistance protein 2.

Absorption of PCB126 by upper airways impairs G protein-coupled receptor-mediated immune response.

Eicosapentaenoic acid prevents TCDD-induced oxidative stress and inflammatory response by modulating MAP kinases and redox-sensitive transcription factors.

2,3,7,8-tetrachlorodibenzo-p-dioxin decrease expression of aryl hydrocarbon receptor in peripheral lymphocyte of β -thalassemia major patients.

Tumor necrosis factor- α inhibits effects of aryl hydrocarbon receptor ligands on cell death in human lymphocytes.

Biotin amelioration of nephrotoxicity in streptozotocin-induced diabetic mice.

Silymarin attenuates paraquat-induced lung injury via Nrf2-mediated pathway *in vivo* and *in vitro*.

Green tea (*Camellia sinensis*) alleviates arsenic-induced damages to DNA and intestinal tissues in rat and in situ intestinal loop by reinforcing antioxidant system.

Acute toxicity of selected organic pollutants to saltwater (mysid *Siriella armata*) and freshwater (cladoceran *Daphnia magna*) ecotoxicological models.

The effects of drugs with immunosuppressive or immunomodulatory activities on xenobiotics-metabolizing enzymes expression in primary human hepatocytes.

Correlation of Serum Thyroid Hormones Autoantibodies with Self-Reported Exposure to Thyroid Disruptors in a Group of Nonsegmental Vitiligo Patients.

Protective effects of thalidomide on pulmonary injuries in a rat model of paraquat intoxication.

Endothelial disruptive proinflammatory effects of nicotine and e-cigarette vapor exposures.

Metabolomics Reveals that Aryl Hydrocarbon Receptor Activation by Environmental Chemicals Induces Systemic Metabolic Dysfunction in Mice.

Protective effect of telmisartan treatment against arsenic-induced testicular toxicity in rats.

Gastrointestinal protective efficacy of Kolaviron (a bi-flavonoid from *Garcinia kola*) following a single administration of sodium arsenite in rats: Biochemical and histopathological studies.

Effect of tocopherol and acetylsalicylic acid on the biochemical indices of blood in dioxin-exposed rats.

A rapid in vivo zebrafish model to elucidate oxidative stress-mediated PCB126-induced apoptosis and developmental toxicity.

Antioxidant and anti-inflammatory levan produced from *Acetobacter xylinum* NCIM2526 and its statistical optimization.

Critical Role of TAK1-Dependent Nuclear Factor- κ B Signaling in 2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced Astrocyte Activation and Subsequent Neuronal Death.

Closure of mitochondrial potassium channels favors opening of the Tl(+)-induced permeability transition pore in Ca(2+)-loaded rat liver mitochondria.

Characterization of Batracylin-induced Renal and Bladder Toxicity in Rats.

Intrathecal cannabinoid-1 receptor agonist prevents referred hyperalgesia in acute acrolein-induced cystitis in rats.

Combination effects of AHR agonists and Wnt/ β -catenin modulators in zebrafish embryos: Implications for physiological and toxicological AHR functions.

The Protective Effect of Sodium Ferulate and Oxymatrine Combination on Paraquat-induced Lung Injury.

Regulation of CYP1A1 and Inflammatory Cytokine by NCOA7 Isoform 4 in Response to Dioxin Induced Airway Inflammation.

Suspected flunixin poisoning of a wild Eurasian Griffon Vulture from Spain.

Inflammation and pyroptosis mediate muscle expansion in an interleukin-1 β (IL-1 β)-dependent manner.

Suppression of human B cell activation by 2,3,7,8-tetrachlorodibenzo-p-dioxin involves altered regulation of B cell lymphoma-6.

Quantitative analysis of pungent and anti-inflammatory phenolic compounds in olive oil by capillary electrophoresis.

Phenolic excipients of insulin formulations induce cell death, pro-inflammatory signaling and MCP-1 release.

Paraquat Poisoning: Analysis of an Uncommon Cause of Fatal Poisoning from Manipal, South India.

Naringin ameliorates sodium arsenite-induced renal and hepatic toxicity in rats: decisive role of KIM-1, Caspase-3, TGF- β 2, and TNF- α .

Synthesis, Characterization and Screening for Analgesic and Anti-inflammatory activities of 2, 5-disubstituted 1, 3, 4-oxadiazole derivatives.

Molecular biology of the stress response in the early embryo and its stem cells.

Increase in oxidative stress biomarkers in dogs with ascending-descending myelomalacia following spinal cord injury.

Oxidative stress in COPD: molecular background and clinical monitoring.

Influence of titanium dioxide nanoparticles on 2,3,7,8-tetrachlorodibenzo-p-dioxin bioconcentration and toxicity in the marine fish European sea bass (*Dicentrarchus labrax*).

Adiponectin protects against paraquat-induced lung injury by attenuating oxidative/nitrative stress.

Evaluation of ettringite-related swelling mechanisms for treated chromite ore processing residue.

Repositioning of 2,4-dichlorophenoxy acetic acid as a potential anti-inflammatory agent: in silico and pharmaceutical formulation study.

Protective effect of Xuebijing injection on paraquat-induced pulmonary injury via down-regulating the expression of p38 MAPK in rats.

Salidroside alleviates paraquat-induced rat acute lung injury by repressing TGF- β 1 expression.

The role of p38 MAPK in acute paraquat-induced lung injury in rats.

Ozone therapy ameliorates paraquat-induced lung injury in rats.

Therapeutical effects and mechanism of salubrinal combined with ulinastatin on treating paraquat poisoning.

Glyphosate-rich air samples induce IL-33, TSLP and generate IL-13 dependent airway inflammation.

[Progress on pathogenesis and treatment of paraquat-induced pulmonary fibrosis].

Tissue sensitivity of the rat upper and lower extrapulmonary airways to the inhaled electrophilic air pollutants diacetyl and acrolein.

Negative effects of low dose atrazine exposure on the development of effective immunity to FV3 in *Xenopus laevis*.

Immediate and delayed effects of subchronic Paraquat exposure during an early differentiation stage in 3D-rat brain cell cultures.

Prediction of paraquat exposure and toxicity in clinically ill poisoned patients: a model based approach.

The experimental autoimmune encephalomyelitis disease course is modulated by nicotine and other cigarette smoke components.

Acrolein induced both pulmonary inflammation and the death of lung epithelial cells.

Pro- and anti-inflammatory cytokine expression in immune organs of the common carp exposed to atrazine and chlorpyrifos.

Glucocorticoid with cyclophosphamide for paraquat-induced lung fibrosis.

Agent Orange exposure and disease prevalence in Korean Vietnam veterans: the Korean veterans health study.

FTY720 attenuates paraquat-induced lung injury in mice.

Modulatory effects of curcumin on redox status, mitochondrial function, and caspase-3 expression during atrazine-induced toxicity.

Acrolein decreases endothelial cell migration and insulin sensitivity through induction of let-7a.

Betanin attenuates paraquat-induced liver toxicity through a mitochondrial pathway.

Acrolein induction of oxidative stress and degranulation in mast cells.

[Tumor necrosis factor- α induced protein 6 attenuates acute kidney injury following paraquat poisoning in rats].

[The interventional effect of Xuebijing injection on expression of mitochondrial fusion protein 2 and the ultrastructure changes in lung tissues in rats with paraquat poisoning].

[Early acute liver injury in paraquat poisoning rats].

New insights into antioxidant strategies against paraquat toxicity.

Airborne acrolein induces keratin-8 (Ser-73) hyperphosphorylation and intermediate filament ubiquitination in bronchiolar lung cell monolayers.

Naringenin exerts cytoprotective effect against paraquat-induced toxicity in human bronchial epithelial BEAS-2B cells through NRF2 activation.

Exacerbation of symptoms in agricultural pesticide applicators with asthma.

Effect of transforming growth factor- β 1 on acute lung injury caused by paraquat.

Inflammatory and cytotoxic effects of acrolein, nicotine, acetaldehyde and cigarette smoke extract on human nasal epithelial cells.

In vitro biological activity of decoction of Joshanda.

Evaluation of exhaled nitric oxide in acute paraquat poisoning: a pilot study.

[Protective effect and mechanisms of pituitrin on acute paraquat-induced lung injury in rats].

Addition of immunosuppressive treatment to hemoperfusion is associated with improved survival after paraquat poisoning: a nationwide study.

Trivalent arsenic species induce changes in expression and levels of proinflammatory cytokines in intestinal epithelial cells.

Acrolein, a highly toxic aldehyde generated under oxidative stress in vivo, aggravates the mouse liver damage after acetaminophen overdose.

Cytoprotective effect of kaempferol on paraquat-exposed BEAS-2B cells via modulating expression of MUC5AC.

CB2 receptor activation ameliorates the proinflammatory activity in acute lung injury induced by paraquat.

Herbicide paraquat induces sex-specific variation of neuroinflammation and neurodegeneration in *Drosophila melanogaster*.

Protective effects of intranasal curcumin on paraquat induced acute lung injury (ALI) in mice.

Immune suppressive effect of cinnamaldehyde due to inhibition of proliferation and induction of apoptosis in immune cells: implications in cancer.

Atorvastatin attenuates the paraquat-induced pulmonary inflammation via PPAR γ receptors: a new indication for atorvastatin.

Possible role of Toll-like receptor-2 in the intracellular survival of *Staphylococcus aureus* in murine peritoneal macrophages: involvement of cytokines and anti-oxidant enzymes.

3-(2-oxoethylidene)indolin-2-one derivatives activate Nrf2 and inhibit NF- κ B: potential candidates for chemoprevention.

Gallic acid functions as a TRPA1 antagonist with relevant antinociceptive and antiedematogenic effects in mice.

Acrolein detection: potential theranostic utility in multiple sclerosis and spinal cord injury.

Liposome-encapsulated cinnamaldehyde enhances zebrafish (*Danio rerio*) immunity and survival when challenged with *Vibrio vulnificus* and *Streptococcus agalactiae*.

Acrolein involvement in sensory and behavioral hypersensitivity following spinal cord injury in the rat.

The pentachlorophenol metabolite tetrachlorohydroquinone induces massive ROS and prolonged p-ERK expression in splenocytes, leading to inhibition of apoptosis and necrotic cell death.

Antinociceptive and anti-inflammatory activities of extract and two isolated flavonoids of *Carthamus tinctorius* L.

[Oral health care by utilizing food function].

TRPA1: a transducer and amplifier of pain and inflammation.

Structure, activity, and inhibition of the Carboxyltransferase β -subunit of acetyl coenzyme A carboxylase (AccD6) from *Mycobacterium tuberculosis*.

Somatosensory and vasomotor manifestations of individual and combined stimulation of TRPM8 and TRPA1 using topical L-menthol and trans-cinnamaldehyde in healthy volunteers.

[The effect of selective phosphatase inhibitors Salubrinal on autophagy and apoptosis in the lung tissue of rats with acute paraquat poisoning].

Enhanced toxicity of binary mixtures of *Bacillus thuringiensis* subsp. *israelensis* and three essential oil major constituents to wild *Anopheles sinensis* (Diptera: Culicidae) and *Aedes albopictus* (Diptera: Culicidae).

Recharging mitochondrial batteries in old eyes. Near infra-red increases ATP.

Acrolein relaxes mouse isolated tracheal smooth muscle via a TRPA1-dependent mechanism.

Health effects and arsenic species in urine of copper smelter workers.

p-Cresol affects reactive oxygen species generation, cell cycle arrest, cytotoxicity and inflammation/atherosclerosis-related modulators production in endothelial cells and mononuclear cells.

Withania somnifera alleviates parkinsonian phenotypes by inhibiting apoptotic pathways in dopaminergic neurons.

Sodium arsenite induces apoptosis and Epstein-Barr virus reactivation in lymphoblastoid cells.

Global metabolomic profiling of acute myocarditis caused by *Trypanosoma cruzi* infection.

The role of nitrosonone in tyrosine pathway disorders.

Atorvastatin ameliorates arsenic-induced hypertension and enhancement of vascular redox signaling in rats.

The aryl hydrocarbon receptor suppresses osteoblast proliferation and differentiation through the activation of the ERK signaling pathway.

Uremic toxicity and sclerostin in chronic kidney disease patients.

Effect of mitochondrial metabolism-interfering agents on cancer cell mitochondrial function and radio/chemosensitivity.

[Rheumatology: Progress in Diagnosis and Treatments. Topics: III. Rheumatoid Arthritis and Allied Conditions; 2. Allied Conditions. 2) Polymyalgia rheumatica].

The novel regulations of MEF2A, CAMKK2, CALM3, and TNNI3 in ventricular hypertrophy induced by arsenic exposure in rats.

Microcytic anemia.

Mitochondrial uncoupling as a regulator of life-history trajectories in birds: an experimental study in the zebra finch.

Safety and efficacy of lactoferrin versus ferrous sulphate in curing iron deficiency and iron deficiency anaemia in hereditary thrombophilia pregnant women: an interventional study.

The Ah receptor regulates growth factor expression in head and neck squamous cell carcinoma cell lines.

Cardiac myocyte-specific AHR activation phenocopies TCDD-induced toxicity in zebrafish.

Targeting mitochondria-derived reactive oxygen species to reduce epithelial barrier dysfunction and colitis.

Persistent organic pollutants and inflammatory markers in a cross-sectional study of elderly Swedish people: the PIVUS cohort.

Involvement of COX2-thromboxane pathway in TCDD-induced precardiac edema in developing zebrafish.

Indoxyl sulfate and p-cresyl sulfate in chronic kidney disease. Could these toxins modulate the antioxidant Nrf2-Keap1 pathway?

Effects of iron supplementation on dominant bacterial groups in the gut, faecal SCFA and gut inflammation: a randomised, placebo-controlled intervention trial in South African children.

Developmental exposure of mice to dioxin promotes transgenerational testicular inflammation and an increased risk of preterm birth in unexposed mating partners.

Effects of ferrofluid and phytoalexin spirobrassinin on thioflavin-T-based fluorescence in cerebrospinal fluid of the elderly and multiple sclerosis patients.

Yashada bhasma (Zinc calx) and Tankana (Borax) inhibit *Propionibacterium acne* and suppresses acne induced inflammation in vitro.

Activation of the aryl hydrocarbon receptor affects activation and function of human monocyte-derived dendritic cells.

The association of uremic toxins and inflammation in hemodialysis patients.

Liver tumor promotion by 2,3,7,8-tetrachlorodibenzo-p-dioxin is dependent on the aryl hydrocarbon receptor and TNF/IL-1 receptors.

Thrombin-facilitated efflux of D-[3H]-aspartate from cultured astrocytes and neurons under hyponatremia and chemical ischemia.

Mitochondrial dysfunction promotes and aggravates the inflammatory response in normal human synoviocytes.

Yusho patients show increased serum IL-17, IL-23, IL-1 β , and TNF α levels more than 40 years after accidental polychlorinated biphenyl poisoning.

Production of the anti-inflammatory compound 6-O-palmitoyl-3-O-β-D-glucopyranosylcampesterol by Callus cultures of *Lopezia racemosa* Cav. (Onagraceae).

Increase in reports of toxicity from fat burning supplement seen in UK.

Novel preoperative pharmacologic methods of preventing postoperative sore throat due to tracheal intubation.

Effects of acute dietary iron overload in pigs (*Sus scrofa*) with induced type 2 diabetes mellitus.

2,3,7,8-Tetrachlorodibenzo-p-dioxin promotes astrocyte activation and the secretion of tumor necrosis factor-α via PKC/SSeCKS-dependent mechanisms.

Tetrachlorobenzoquinone induces acute liver injury, up-regulates HO-1 and NQO1 expression in mice model: the protective role of chlorogenic acid.

Protein-bound uremic toxins, inflammation and oxidative stress: a cross-sectional study in stage 3-4 chronic kidney disease.

Interaction between arsenic exposure from drinking water and genetic susceptibility in carotid intima-media thickness in Bangladesh.

Ultrasound-guided interventional procedures around the shoulder.

Evidence that p-cresol and IL-6 are adsorbed by the HFR cartridge: towards a new strategy to decrease systemic inflammation in dialyzed patients?

Augmented atherogenesis in ApoE-null mice co-exposed to polychlorinated biphenyls and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Increased expression of the aryl hydrocarbon receptor in patients with chronic inflammatory skin diseases.

Alcohol-induced autophagy contributes to loss in skeletal muscle mass.

Homoisoflavanone prevents mast cell activation and allergic responses by inhibition of Syk signaling pathway.

Alcohol oxidizing enzymes and ethanol-induced cytotoxicity in rat pancreatic acinar AR42J cells.

The gut microbiome, kidney disease, and targeted interventions.

The regulation of 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone-induced lung tumor promotion by estradiol in female A/J mice.

The aryl hydrocarbon receptor-activating effect of uremic toxins from tryptophan metabolism: a new concept to understand cardiovascular complications of chronic kidney disease.

Drug-induced injury in the gastrointestinal tract.

Hepatoprotective activity of *Tephrosia purpurea* against arsenic induced toxicity in rats.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin modulates dysregulation of the lipid metabolism in mouse offspring fed a high-calorie diet.

Protein-bound uremic toxins: new culprits of cardiovascular events in chronic kidney disease patients.

Benzimidazoisoquinolines: a new class of rapidly metabolized aryl hydrocarbon receptor (AhR) ligands that induce AhR-dependent Tregs and prevent murine graft-versus-host disease.

Oxidative stress-inducible truncated serine/arginine-rich splicing factor 3 regulates interleukin-8 production in human colon cancer cells.

Modulation of telomerase activity, bTERT and c-Myc induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin during Bovine Herpesvirus 1 infection in MDBK cells.

Cross-talk between aryl hydrocarbon receptor and the inflammatory response: a role for nuclear factor- κ B.

MRNA and miRNA expression patterns associated to pathways linked to metal mixture health effects.

Plant-derived anti-inflammatory compounds: hopes and disappointments regarding the translation of preclinical knowledge into clinical progress.

Rapid iron desensitization after generalized urticaria and facial angioedema.

Expansion of urease- and uricase-containing, indole- and p-cresol-forming and contraction of short-chain fatty acid-producing intestinal microbiota in ESRD.

Arsenic reduces the antipyretic activity of paracetamol in rats: modulation of brain COX-2 activity and CB δ receptor expression.

Serum concentrations of p-cresyl sulfate and indoxyl sulfate, but not inflammatory markers, increase in incident peritoneal dialysis patients in parallel with loss of residual renal function.

p-cresyl sulphate has pro-inflammatory and cytotoxic actions on human proximal tubular epithelial cells.

Animal models of Parkinson's disease: a gateway to therapeutics?

Aryl hydrocarbon receptor-dependent induction of liver fibrosis by dioxin.

Effects of sivelestat treatment on acute lung injury in paraquat-intoxicated rats.

Ligand binding and functional selectivity of L-tryptophan metabolites at the mouse aryl hydrocarbon receptor (mAHR).

Development of inhibitors of the 2C-methyl-D-erythritol 4-phosphate (MEP) pathway enzymes as potential anti-infective agents.

In vitro propagation and analysis of secondary metabolites in *Glossogyne tenuifolia* (Hsiang-Ju) - a medicinal plant native to Taiwan.

The preventive effect of atorvastatin on paraquat-induced pulmonary fibrosis in the rats.

Y3+, La3+, and some bivalent metals inhibited the opening of the Tl+-induced permeability transition pore in Ca2+-loaded rat liver mitochondria.

Low level tumor necrosis factor-alpha protects cardiomyocytes against high level tumor necrosis factor-alpha: brief insight into a beneficial paradox.

Hepatic oxidative status and metal homeostasis disturbance of 2-hydroxylated dioxin in ICR mice.

A novel protective role for the innate immunity Toll-Like Receptor 3 (TLR3) in the retina via Stat3.

Toll-like receptor 4 implicated in acute lung injury induced by paraquat poisoning in mice.

Lipid peroxidation in Rheumatoid arthritis; consequences and monitoring.

Differential susceptibility of human peripheral blood T cells to suppression by environmental levels of sodium arsenite and monomethylarsonous acid.

Atorvastatin restores arsenic-induced vascular dysfunction in rats: modulation of nitric oxide signaling and inflammatory mediators.

Potential role of catalase in mice with lipopolysaccharide/D-galactosamine-induced fulminant liver injury.

Polychlorinated biphenyls (PCB 101, PCB 153 and PCB 180) alter leptin signaling and lipid metabolism in differentiated 3T3-L1 adipocytes.

Glyphosate poisoning with acute pulmonary edema.

NADPH oxidase and the cardiovascular toxicity associated with smoking.

Developmental toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in artificially fertilized crucian carp (*Carassius auratus*) embryo.

Expression and functional regulation of the nuclear receptors AHR, PXR, and CAR, and the transcription factor Nrf2 in rat parotid gland.

Survival predictors in paraquat intoxication and role of immunosuppression.

Histopathologic alterations associated with global gene expression due to chronic dietary TCDD exposure in juvenile zebrafish.

Standardization of in vitro Cell-based Model for Renal Ischemia and Reperfusion Injury.

An aberrant leukotriene A4 hydrolase-proline-glycine-proline pathway in the pathogenesis of chronic obstructive pulmonary disease.

Neutrophil-derived microparticles induce myeloperoxidase-mediated damage of vascular endothelial cells.

The induction of long-term potentiation in spinal dorsal horn after peripheral nociceptive stimulation and contribution of spinal TRPV1 in rats.

Alterations in auxin homeostasis suppress defects in cell wall function.

Demographics, clinical characteristics and management of herbicide poisoning in tertiary care hospital.

Microbiome-derived tryptophan metabolites and their aryl hydrocarbon receptor-dependent agonist and antagonist activities.

Fish oil rich in eicosapentaenoic acid protects against oxidative stress-related renal dysfunction induced by TCDD in Wistar rats.

Novel resveratrol-based substrates for human hepatic, renal, and intestinal UDP-glucuronosyltransferases.

No requirement of TRPV1 in long-term potentiation or long-term depression in the anterior cingulate cortex.

Perinatal low-dose iron treatment influences susceptibility to diet-induced adipogenesis in early-aged male Wistar rats.

Modulation of gene-expression profiles associated with sodium arsenite-induced cardiotoxicity by p-coumaric acid, a common dietary polyphenol.

Treatment with a cannabinoid receptor 2 agonist decreases severity of established cystitis.

Swelling and morphology of calcium pectinate gel beads obtained from *Silene vulgaris* callus modified pectins.

Increases in levels of epoxyeicosatrienoic and dihydroxyeicosatrienoic acids (EETs and DHETs) in liver and heart in vivo by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and in hepatic EET:DHET ratios by cotreatment with TCDD and the soluble epoxide hydrolase inhibitor AUDA.

Mechanism for the protective effect of diallyl disulfide against cyclophosphamide acute urotoxicity in rats.

Arsenic trioxide and other arsenical compounds inhibit the NLRP1, NLRP3, and NAIP5/NLRC4 inflammasomes.

Pill -Induced Erosive Esophagitis in Children.

Chemoprevention against arsenic-induced mutagenic DNA breakage and apoptotic liver damage in rat via antioxidant and SOD1 upregulation by green tea (*Camellia sinensis*) which recovers broken DNA resulted from arsenic-H₂O₂ related in vitro oxidant stress.

Influence of dioxin intoxication on the human system and possibilities of limiting its negative effects on the environment and living organisms.

Effect of SP-A/B in lipoic acid on acute paraquat poisoning.

The aryl hydrocarbon receptor: multitasking in the immune system.

Korean Red Ginseng water extract inhibits COX-2 expression by suppressing p38 in acrolein-treated human endothelial cells.

Toward understanding the role of aryl hydrocarbon receptor in the immune system: current progress and future trends.

[Clarification of molecular targets of dioxin toxicity].

Does drug-induced emphysema exist?

Oral lesions and pulmonary fibrosis after ingesting grapes.

Silymarin- and melatonin-mediated changes in the expression of selected genes in pesticides-induced Parkinsonism.

The effects of acetaldehyde and acrolein on muscle catabolism in C2 myotubes.

Aldose reductase regulates acrolein-induced cytotoxicity in human small airway epithelial cells.

The immunotoxic effects of dual exposure to PCP and TCDD.

Factors associated with severe effects following acute glufosinate poisoning.

Diphenyl diselenide prevents hepatic alterations induced by paraquat in rats.

Curcumin analog 1, 5-bis (2-trifluoromethylphenyl)-1, 4-pentadien-3-one exhibits enhanced ability on Nrf2 activation and protection against acrolein-induced ARPE-19 cell toxicity.

Mechanisms of permanent loss of olfactory receptor neurons induced by the herbicide 2,6-dichlorobenzonitrile: effects on stem cells and noninvolvement of acute induction of the inflammatory cytokine IL-6.

Using bosentan to treat paraquat poisoning-induced acute lung injury in rats.

Toll-like receptor 4 is involved in myocardial damage following paraquat poisoning in mice.

Effect of acrolein, a hazardous air pollutant in smoke, on human middle ear epithelial cells.

Inhibitory effects of rosiglitazone on paraquat-induced acute lung injury in rats.

Effect of methylsulfonylmethane on paraquat-induced acute lung and liver injury in mice.

Phytotoxicity of four photosystem II herbicides to tropical seagrasses.

Paraquat poisoning induces TNF- α -dependent iNOS/NO mediated hyporesponsiveness of the aorta to vasoconstrictors in rats.

Agent Orange exposure and prevalence of self-reported diseases in Korean Vietnam veterans.

YjcC, a c-di-GMP phosphodiesterase protein, regulates the oxidative stress response and virulence of *Klebsiella pneumoniae* CG43.

PACAP deficiency sensitizes nigrostriatal dopaminergic neurons to paraquat-induced damage and modulates central and peripheral inflammatory activation in mice.

Propanil-induced histopathological changes in the liver and kidney of mice.

[The relationship of endoplasmic reticulum stress with paraquat induced lung fibrosis in rats].

Paraquat poisoning in pediatric patients.

[Effect of thalidomide in a mouse model of paraquat-induced acute lung injury and the underlying mechanisms].

Comments on 'Spectrum of toxic hepatitis following intentional paraquat ingestion'.

Severe adverse effects related to dermal exposure to a glyphosate-surfactant herbicide.

Biochemical and molecular mechanisms of N-acetyl cysteine and silymarin-mediated protection against maneb- and paraquat-induced hepatotoxicity in rats.

Paraquat-induced retinal degeneration is exaggerated in CX3CR1-deficient mice and is associated with increased retinal inflammation.

Renal replacement therapy in acute poisonings--one center experience.

Acrolein-induced inflammatory signaling in vascular smooth muscle cells requires activation of serum response factor (SRF) and NF- κ B.

Oral administration of pentachlorophenol induces interferon signaling mRNAs in C57BL/6 male mouse liver.

Docosahexaenoic acid (DHA) attenuated paraquat induced lung damage in mice.

Amelioration of paraquat-induced pulmonary injury by mesenchymal stem cells.

Paraquat research: do recent advances in limiting its toxicity make its use safer?

Differential regulation of the rainbow trout (*Oncorhynchus mykiss*) MT-A gene by nuclear factor interleukin-6 and activator protein-1.

Structures of native, substrate-bound and inhibited forms of *Mycobacterium tuberculosis* imidazoleglycerol-phosphate dehydratase.

Antinociceptive effects of ethanolic extract from the flowers of *Acmella oleracea* (L.) R.K. Jansen in mice.

Fluridone as a new anti-inflammatory drug.

Protective effects of cinnamic acid and cinnamic aldehyde on isoproterenol-induced acute myocardial ischemia in rats.

Acrolein exposure suppresses antigen-induced pulmonary inflammation.

New insights in the pathogenesis of multiple sclerosis--role of acrolein in neuronal and myelin damage.

Anti-inflammatory effect of thalidomide in paraquat-induced pulmonary injury in mice.

Role of aldose reductase in the metabolism and detoxification of carnosine-acrolein conjugates.

Bronchoconstriction induced by increasing airway temperature in ovalbumin-sensitized rats: role of tachykinins.

Plant derived aporphinic alkaloid S-(+)-dicentrine induces antinociceptive effect in both acute and chronic inflammatory pain models: evidence for a role of TRPA1 channels.

The dose of cyclophosphamide for treating paraquat-induced rat lung injury.

Cyclophosphamide dose: how much is needed to win the war against paraquat poisoning?

Chemical composition and hypoglycemic and pancreas-protective effect of leaf essential oil from indigenous cinnamon (*Cinnamomum osmophloeum* Kanehira).

Activation of cannabinoid receptor 2 inhibits experimental cystitis.

Identification of aldo-keto reductases as NRF2-target marker genes in human cells.

9-cis retinoic acid is the ALDH1A1 product that stimulates melanogenesis.

Central nervous system damage due to acute paraquat poisoning: an experimental study with rat model.

Secondary and tertiary sulfonamides: a patent review (2008 - 2012).

The ultra-early protective effect of ulinastatin on rabbit acute lung injury induced by paraquat.

Combined treatment with bone marrow mesenchymal stem cells and methylprednisolone in paraquat-induced acute lung injury.

Synthesis of novel phosphorylated guanidine derivatives from cyanamide and their anti-inflammatory activity.

Sub-acute exposure to the herbicide atrazine suppresses cell immune functions in adolescent mice.

Protective effects of dietary arginine supplementation against oxidative stress in weaned piglets.

Neuroprotective effect of trans-cinnamaldehyde on the 6-hydroxydopamine-induced dopaminergic injury.

Antioxidant action of ellagic acid ameliorates paraquat-induced A549 cytotoxicity.

Assays for the measurement of lipid peroxidation.

Contact sensitizing potential of pyrogallol and 5-amino-o-cresol in female BALB/c mice.

Singlet oxygen mediated DNA damage induced phototoxicity by ketoprofen resulting in mitochondrial depolarization and lysosomal destabilization.

The neurological effects of methyl bromide intoxication.

Novel whole-tissue quantitative assay of nitric oxide levels in *Drosophila* neuroinflammatory response.

Induction of thymic stromal lymphopoietin production by nonanoic acid and exacerbation of allergic inflammation in mice.

TI(+) induces both cationic and transition pore permeability in the inner membrane of rat heart mitochondria.

Protein-bound uremic toxins stimulate crosstalk between leukocytes and vessel wall.

Differential influences of the aryl hydrocarbon receptor on Th17 mediated responses in vitro and in vivo.

ITE, a novel endogenous nontoxic aryl hydrocarbon receptor ligand, efficiently suppresses EAU and T-cell-mediated immunity.

Stability and performance of rapid-acting insulin analogs used for continuous subcutaneous insulin infusion: a systematic review.

Kidney hypoxia, attributable to increased oxygen consumption, induces nephropathy independently of hyperglycemia and oxidative stress.

Aryl hydrocarbon receptor and experimental autoimmune arthritis.

Pretreatment with TCDD exacerbates liver injury from Concanavalin A: critical role for NK cells.

Involvement of HIF-2 α -mediated inflammation in arsenite-induced transformation of human bronchial epithelial cells.

Effect of simultaneous supplementation of vitamin A and iron on diarrheal and respiratory tract infection in preschool children in Chengdu City, China.

Plasma and urine metabolic fingerprinting of type 1 diabetic children.

TRPM8 is the principal mediator of menthol-induced analgesia of acute and inflammatory pain.

Reduction of CC-chemokine ligand 5 by aryl hydrocarbon receptor ligands.

MicroRNA-132 suppresses autoimmune encephalomyelitis by inducing cholinergic anti-inflammation: a new Ahr-based exploration.

Cytologic and histologic findings of iron pill-induced injury of the lower respiratory tract.

Impaired cardiovascular function caused by different stressors elicits a common pathological and transcriptional response in zebrafish embryos.

Suppression of acute graft-versus-host response by TCDD is independent of the CTLA-4-IFN- γ -IDO pathway.

Sox9b is required for epicardium formation and plays a role in TCDD-induced heart malformation in zebrafish.

Arsenic induced toxicity and histopathological changes in gill and liver tissue of freshwater fish, tilapia (*Oreochromis mossambicus*).

Plasma p-cresol lowering effect of sevelamer in peritoneal dialysis patients: evidence from a Cross-Sectional Observational Study.

Mitochondrial respiratory chain dysfunction modulates metalloproteases -1, -3 and -13 in human normal chondrocytes in culture.

Effect of huanglianjiedu tang on fever in rats induced by 2, 4-dinitrophenol.

Specific roles for Group V secretory PLA₂, in retinal iron-induced oxidative stress. Implications for age-related macular degeneration.

Individuals' half-lives for 2,3,4,7,8-penta-chlorodibenzofuran (PeCDF) in blood: correlation with clinical manifestations and laboratory results in subjects with Yusho.

Role of the Toll Like receptor (TLR) radical cycle in chronic inflammation: possible treatments targeting the TLR4 pathway.

Relationship between the autoantibody and expression of β ²₃-adrenoceptor in lung and heart.

Indoxyl 3-sulfate stimulates Th17 differentiation enhancing phosphorylation of c-Src and STAT3 to worsen experimental autoimmune encephalomyelitis.

A facile synthesis, anti-inflammatory and analgesic activity of isoxazolyl-2,3-dihydrospiro[benzo[f]isoindole-1,3'-indoline]-2',4,9-triones.

Proteomic analysis of arsenic-exposed zebrafish (*Danio rerio*) identifies altered expression in proteins involved in fibrosis and lipid uptake in a gender-specific manner.

Does p-cresylglucuronide have the same impact on mortality as other protein-bound uremic toxins?

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced inflammatory activation is mediated by intracellular free calcium in microglial cells.

Iron plays a certain role in patterned hair loss.

The aryl hydrocarbon receptor and food allergy.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) enhances placental inflammation.

The roles of aryl hydrocarbon receptor in immune responses.

Effects of iron polymaltose complex, ferrous fumarate and ferrous sulfate treatments in anemic pregnant rats, their fetuses and placentas.

The human Ah receptor: hints from dioxin toxicities to deregulated target genes and physiological functions.

The weeding of *Ambrosia artemisiifolia* and sanitary risks.

Severe anemia in 3 toddlers with gastric lactobezoar.

Activation of the aryl hydrocarbon receptor sensitizes mice to nonalcoholic steatohepatitis by deactivating mitochondrial sirtuin deacetylase Sirt3.

The aryl hydrocarbon receptor: a novel target for immunomodulation in organ transplantation.

Aryl hydrocarbon receptor and lung cancer.

p-Cresyl sulfate causes renal tubular cell damage by inducing oxidative stress by activation of NADPH oxidase.

The influence of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on hematological parameters during experimentally induced pleuritis in rats.

Differential sensitivity to pro-oxidant exposure in two populations of killifish (*Fundulus heteroclitus*).

Impaired mitochondrial metabolism and mammary carcinogenesis.

Nuclear import and export signals control the subcellular localization of Nurr1 protein in response to oxidative stress.

Arsenic increases Pi-mediated vascular calcification and induces premature senescence in vascular smooth muscle cells.

Methane biogenesis during sodium azide-induced chemical hypoxia in rats.

Inorganic arsenic impairs differentiation and functions of human dendritic cells.

2,3,7,8-TCDD enhances the sensitivity of mice to concanavalin A immune-mediated liver injury.

Cultured human peripheral blood mononuclear cells alter their gene expression when challenged with endocrine-disrupting chemicals.

[Halitosis concomitant with chronic ENT pathology in children].

Occurrence of disseminated intravascular coagulation in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced pneumonia in the rat.

Removal of protein-bound uraemic toxins by haemodialysis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin promotes BHV-1 infection in mammalian cells by interfering with iron homeostasis regulation.

A genetically encoded FRET lactate sensor and its use to detect the Warburg effect in single cancer cells.

Human neuromelanin: an endogenous microglial activator for dopaminergic neuron death.

Comparison of destructive periodontal disease in blue iris mink to PCB 126-induced mandibular and maxillary squamous epithelial proliferation in natural dark mink.

p-Cresol sulfate and indoxyl sulfate induce similar cellular inflammatory gene expressions in cultured proximal renal tubular cells.

Genetically modified foods: safety, risks and public concerns-a review.

Characterization of the carrier-mediated transport of ketoprofen, a nonsteroidal anti-inflammatory drug, in rabbit corneal epithelium cells.

Protective effects of pulmonary epithelial lining fluid on oxidative stress and DNA single-strand breaks caused by ultrafine carbon black, ferrous sulphate and organic extract of diesel exhaust particles.

Impact of 2,3,7,8-tetrachlorodibenzo-p-dioxin on cutaneous wound healing.

Toxicity of polyamines and their metabolic products.

Characterization of bladder sensory neurons in the context of myelination, receptors for pain modulators, and acute responses to bladder inflammation.

Gastrointestinal stromal tumors: a case-only analysis of single nucleotide polymorphisms and somatic mutations.

Purification of an IgA Monoclonal Antibody Specific for the Acr Protein of Mycobacterium tuberculosis by Immunoaffinity Chromatography.

Paraquat poisoning: experience in hospital taiping (year 2008 - october 2011).

Paraquat Exposure Up-regulates Cyclooxygenase-2 in the Lungs, Liver and Kidneys in Rats.

Toxicogenomic evaluation of long-term hepatic effects of TCDD in immature, ovariectomized C57BL/6 mice.

Toxicogenomics-based identification of mechanisms for direct immunotoxicity.

Gene expression and pathologic alterations in juvenile rainbow trout due to chronic dietary TCDD exposure.

Spectrum of corrosive esophageal injury after intentional paraquat or glyphosate-surfactant herbicide ingestion.

Emerging causes of iron deficiency anemia refractory to oral iron supplementation.

Histopathological changes in the liver of rabbits exposed to high nitrate ingestion in drinking water.

Cell to organ: physiological, immunotoxic and oxidative stress responses of Lamellidens marginalis to inorganic arsenite.

Quartz crystal microbalance measurements of mitochondrial depolarization predicting chemically induced toxicity of vascular cells and macrophages.

Sepiapterin reductase mediates chemical redox cycling in lung epithelial cells.

Oral administration of hesperidin, a citrus flavonone, in rats counteracts the oxidative stress, the inflammatory cytokine production, and the hepatotoxicity induced by the ingestion of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

The protective effects of the proteasome inhibitor bortezomib (velcade) on ischemia-reperfusion injury in the rat retina.

Loss of Neil3, the major DNA glycosylase activity for removal of hydantoins in single stranded DNA, reduces cellular proliferation and sensitizes cells to genotoxic stress.

Increased polyamines alter chromatin and stabilize autoantigens in autoimmune diseases.

Critical role of aldehydes in cigarette smoke-induced acute airway inflammation.

Removal of airborne toxic chemicals by porous organic polymers containing metal-catecholates.

Activation of aryl hydrocarbon receptor prolongs survival of fully mismatched cardiac allografts.

Embryonic exposure to butachlor in zebrafish (*Danio rerio*): endocrine disruption, developmental toxicity and immunotoxicity.

Comparison of routine prenatal iron prophylaxis and screening and treatment for anaemia: pregnancy results and preliminary birth results from a pragmatic randomised controlled trial (PROFEG) in Maputo, Mozambique.

Metabolic profiling of the impact of oligofructose-enriched inulin in Crohn's disease patients: a double-blinded randomized controlled trial.

Histopathological changes induced by paraquat on some tissues of gourami fish (*Trichogaster trichopterus*).

Therapeutic effects of smecta or smectite powder on rats with paraquat toxication.

Human cell toxicogenomic analysis linking reactive oxygen species to the toxicity of monohaloacetic acid drinking water disinfection byproducts.

Polyamines and their metabolites as diagnostic markers of human diseases.

Glutathione in multiple sclerosis.

Cancer incidence in pulmonary vasculitis.

Role of lipid peroxidation-derived $\hat{\pm}$, $\hat{2}$ -unsaturated aldehydes in vascular dysfunction.

Nrf2 protection against liver injury produced by various hepatotoxicants.

Regulation of NF- $\hat{9}$ B-induced inflammatory signaling by lipid peroxidation-derived aldehydes.

Neonatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin increases the mRNA expression of prostatic proteins in C57BL mice.

Proteoglycans act as cellular hepatitis delta virus attachment receptors.

Metabolic signatures of extreme longevity in northern Italian centenarians reveal a complex remodeling of lipids, amino acids, and gut microbiota metabolism.

A novel murine model to deplete hepatic stellate cells uncovers their role in amplifying liver damage in mice.

Paraquat-induced pulmonary fibrosis starts at an early stage of inflammation in rats.

The oxidative damage and inflammation caused by pesticides are reverted by lipoic acid in rat brain.

Diuron-induced rat bladder epithelial cytotoxicity.

Pesticide use, immunologic conditions, and risk of non-Hodgkin lymphoma in Canadian men in six provinces.

Cigarette smoke and its component acrolein augment IL-8/CXCL8 mRNA stability via p38 MAPK/MK2 signaling in human pulmonary cells.

[Effects of human umbilical cord mesenchymal stem cells in the treatment of paraquat-induced lung injury].

Recombinant adenovirus Ad-RUNrf2 reduces paraquat-induced A549 injury.

Immunotoxicity induced by acute subtoxic doses of paraquat herbicide: implication of shifting cytokine gene expression toward T-helper (T(H))-17 phenotype.

Nrf2 protects against diquat-induced liver and lung injury.

Overexpression of stanniocalcin-1 inhibits reactive oxygen species and renal ischemia/reperfusion injury in mice.

Spectrum of toxic hepatitis following intentional paraquat ingestion: analysis of 187 cases.

Effect of pirfenidone on pulmonary fibrosis due to paraquat poisoning in rats.

Pathological and toxicological findings in glyphosate-surfactant herbicide fatality: a case report.

Antioxidant effect of silymarin on paraquat-induced human lung adenocarcinoma A549 cell line.

Comparison of TRPA1-versus TRPV1-mediated cough in guinea pigs.

Prior exposure to acrolein accelerates pulmonary inflammation in influenza A-infected mice.

Glucocorticoid with cyclophosphamide for paraquat-induced lung fibrosis.

Acrolein effects in pulmonary cells: relevance to chronic obstructive pulmonary disease.

Interferon- \hat{I}^3 plays a role in paraquat-induced neurodegeneration involving oxidative and proinflammatory pathways.

[Expression of the 4-hydroxynonenal in lung tissue in rats with paraquat poisoned and the effect of ulinastatin].

Bark extract of *Bathysa cuspidata* attenuates extra-pulmonary acute lung injury induced by paraquat and reduces mortality in rats.

Paraquat application and respiratory health effects among South Korean farmers.

Contrasted effects of an oxidative challenge and \hat{I}^{\pm} -melanocyte-stimulating hormone on cellular immune responsiveness: an experiment with red-legged partridges *Alectoris rufa*.

Viral-toxin interactions and Parkinson's disease: poly I:C priming enhanced the neurodegenerative effects of paraquat.

Successful treatment of patients with paraquat intoxication: three case reports and review of the literature.

Sublethal effects of atrazine on embryo-larval development of *Rhinella arenarum* (Anura: Bufonidae).

[Paraquat poisoning. Case report and overview].

Resveratrol potentiates cytochrome P450 2 d22-mediated neuroprotection in maneb- and paraquat-induced parkinsonism in the mouse.

[The relationship between HIF-1 \pm expression and the early lung fibrosis in rats with acute paraquat poisoning].

[The effects of Nrf2 gene expression induced by RU486 at different doses on A549 cell damage induced by paraquat].

Role of secondary mediators in caffeine-mediated neuroprotection in maneb- and paraquat-induced Parkinson's disease phenotype in the mouse.

Melatonin suppresses acrolein-induced IL-8 production in human pulmonary fibroblasts.

[Presentation of a case of Paraquat poisoning].

Insights into the toxicity mechanism of and cell response to the herbicide 2,4-D in plants.

Hypercholesterolemia and oxidative stress inhibit endothelial cell healing after arterial injury.

Early hemoperfusion may improve survival of severely paraquat-poisoned patients.

Acrolein induces endoplasmic reticulum stress and causes airspace enlargement.

Concordant signaling pathways produced by pesticide exposure in mice correspond to pathways identified in human Parkinson's disease.

4-iodophenyl isothiocyanate: a neuroprotective compound.

Effect of bark extract of *Bathysa cuspidata* on hepatic oxidative damage and blood glucose kinetics in rats exposed to paraquat.

The tobacco smoke component, acrolein, suppresses innate macrophage responses by direct alkylation of c-Jun N-terminal kinase.

Whiskey congeners suppress LPS/IFN γ -induced NO production in murine macrophage RAW 264 cells by inducing heme oxygenase-1 expression.

2'-Benzoyloxy-cinnamaldehyde inhibits nitric oxide production in lipopolysaccharide-stimulated RAW 264.7 cells via regulation of AP-1 pathway.

Elevated neutrophil elastase and acrolein-protein adducts are associated with W256 regression.

Transient receptor potential channels mediate the tussive response to prostaglandin E2 and bradykinin.

The comparison of β -bromo-4-chlorocinnamaldehyde and cinnamaldehyde on coxsackie virus B3-induced myocarditis and their mechanisms.

Aminotriazole attenuated carbon tetrachloride-induced oxidative liver injury in mice.

Potential use of nitrate reductase as a biomarker for the identification of active and dormant inhibitors of *Mycobacterium tuberculosis* in a THP1 infection model.

Attenuation of mouse somatic and emotional inflammatory pain by hydralazine through scavenging acrolein and inhibiting neuronal activation.

Resveratrol inhibits paraquat-induced oxidative stress and fibrogenic response by activating the nuclear factor erythroid 2-related factor 2 pathway.

Neurotoxin-based models of Parkinson's disease.

Effect of cigarette smoking on cough reflex induced by TRPV1 and TRPA1 stimulations.

2-methoxycinnamaldehyde from *Cinnamomum cassia* reduces rat myocardial ischemia and reperfusion injury in vivo due to HO-1 induction.

[Design of a polymer drug for serological diagnosis of hepatitis C].

Reactive carbonyl compounds (RCCs) cause aggregation and dysfunction of fibrinogen.

Molecular effects of activated BV-2 microglia by mitochondrial toxin 1-methyl-4-phenylpyridinium.

The cyclophosphamide metabolite, acrolein, induces cytoskeletal changes and oxidative stress in Sertoli cells.

Silibinin ameliorates arsenic induced nephrotoxicity by abrogation of oxidative stress, inflammation and apoptosis in rats.

Toxicity of untreated and ozone-treated oil sands process-affected water (OSPW) to early life stages of the fathead minnow (*Pimephales promelas*).

Synergistic effect of conjugated linolenic acid isomers against induced oxidative stress, inflammation and erythrocyte membrane disintegrity in rat model.

Animal models used to examine the role of the environment in the development of autoimmune disease: findings from an NIEHS Expert Panel Workshop.

Metabolomics identifies an inflammatory cascade involved in dioxin- and diet-induced steatohepatitis.

Tryptophan catabolism in cancer: beyond IDO and tryptophan depletion.

Reduction of Na⁺, K⁺-ATPase activity and expression in cerebral cortex of glutaryl-CoA dehydrogenase deficient mice: a possible mechanism for brain injury in glutaric aciduria type I.

Enhanced apoptosis in retinal pigment epithelium under inflammatory stimuli and oxidative stress.

Immunomodulatory potential of partially hydrolyzed β -lactoglobulin and large synthetic peptides.

Progesterone-dependent regulation of endometrial cannabinoid receptor type 1 (CB1-R) expression is disrupted in women with endometriosis and in isolated stromal cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Temperature and cell-type dependency of sulfide effects on mitochondrial respiration.

Eccrine porocarcinoma with carcinomatous lymphangitis in a patient with history of arsenic exposure: a case report.

Development of brucine-loaded microsphere/thermally responsive hydrogel combination system for intra-articular administration.

Baicalein induces G1 arrest in oral cancer cells by enhancing the degradation of cyclin D1 and activating AhR to decrease Rb phosphorylation.

Suicidal sodium azide intoxication: An analytical challenge based on a rare case.

Photoinactivation of cell-free human immunodeficiency virus by hematoporphyrin monomethyl ether.

Glutamine suppresses dinitrophenol fluorobenzene-induced allergic contact dermatitis and itching: inhibition of contact dermatitis by glutamine.

Mechanistic exploration of AhR-mediated host protection against *Streptococcus pneumoniae* infection.

Intracellular accumulation of bilirubin as a defense mechanism against increased oxidative stress.

Metabolite profiling of plasma and urine from rats with TNBS-induced acute colitis using UPLC-ESI-QTOF-MS-based metabolomics--a pilot study.

Oxidative stress inhibits axonal transport: implications for neurodegenerative diseases.

A review of the role of lymphoma markers and occupational and environmental exposures.

Circulating microRNA-122 as a potential biomarker for liver injury.

Evaluation of paclitaxel/carboplatin in a dose dense or weekly regimen in 66 patients with recurrent or primary metastatic cervical cancer.

Iron requirements based upon iron absorption tests are poorly predicted by haematological indices in patients with inactive inflammatory bowel disease.

Aryl hydrocarbon receptor controls regulatory CD4+ T cell function.

[Brucine chitosan thermosensitive hydrogel for intra-articular injection].

Protein alteration of HepG2.2.15 cells induced by iron overload.

Aryl hydrocarbon receptor-mediated induction of EBV reactivation as a risk factor for Sjögren's syndrome.

2,3,7,8-tetrachlorodibenzo-p-dioxin induces transcriptional activity of the human polymorphic hs1,2 enhancer of the 3' IgH regulatory region.

Synthesis and evaluation of novel monosubstituted sulfonylurea derivatives as antituberculosis agents.

Aryl hydrocarbon receptor (AhR) regulates silica-induced inflammation but not fibrosis.

Inflammatory pathway genes belong to major targets of persistent organic pollutants in adipose cells.

Two different dosing regimens of human recombinant erythropoietin beta during preoperative autologous blood donation in patients having hip arthroplasty.

Narrow-band UVB irradiation stimulates the migration and functional development of vitiligo-IgG antibodies-treated pigment cells.

Potential biomarkers for identification of mycobacterial cultures by proton transfer reaction mass spectrometry analysis.

Induction of mitochondrial uncoupling enhances VEGF β , α , ϵ but reduces MCP-1 release in mature 3T3-L1 adipocytes: possible regulatory mechanism through endogenous ER stress and AMPK-related pathways.

Plant expression, lyophilisation and storage of HBV medium and large surface antigens for a prototype oral vaccine formulation.

Subacute arsenic exposure through drinking water reduces the pharmacodynamic effects of ketoprofen in male rats.

Cyclo(His-Pro) exerts anti-inflammatory effects by modulating NF- κ B and Nrf2 signalling.

Inhibition of VCAM-1 expression in endothelial cells by CORM-3: the role of the ubiquitin-proteasome system, p38, and mitochondrial respiration.

The vimentin-tubulin binding site peptide (Vim-TBS.58-81) crosses the plasma membrane and enters the nuclei of human glioma cells.

Melatonin as a neuroprotective agent in the rodent models of Parkinson's disease: is it all set to irrefutable clinical translation?

ErbB1/2 tyrosine kinase inhibitor mediates oxidative stress-induced apoptosis in inflammatory breast cancer cells.

Novel phage amplified multichannel series piezoelectric quartz crystal sensor for rapid and sensitive detection of Mycobacterium tuberculosis.

Analgesic and antipyretic activities of *Drymaria cordata* (Linn.) Willd (Caryophyllaceae) extract.

Uremia suppresses immune signal-induced CYP27B1 expression in human monocytes.

Global DNA methylation not increased in chronic hemodialysis patients: a case-control study.

Gender differences in transcriptional signature of developing rat testes and ovaries following embryonic exposure to 2,3,7,8-TCDD.

Coupled nitric oxide and autonomic receptor functional responses in the normal and inflamed urinary bladder of the rat.

Exogenous inflammatory acne due to combined application of cosmetic and facial rubbing.

Classic and new animal models of Parkinson's disease.

Enhancing effects of trichloroethylene and tetrachloroethylene on type I allergic responses in mice.

An update on protein-bound uremic retention solutes.

Relevance of protein fermentation to gut health.

Mechanism for the uncoupling of oxidative phosphorylation by juliprosopine on rat brain mitochondria.

1 α ,25 dihydroxyvitamin D₃ enhances cellular defences against UV-induced oxidative and other forms of DNA damage in skin.

Xylo-oligosaccharide (XOS) in combination with inulin modulates both the intestinal environment and immune status in healthy subjects, while XOS alone only shows prebiotic properties.

Streptococcus pneumoniae uses glutathione to defend against oxidative stress and metal ion toxicity.

Environmentally persistent free radicals decrease cardiac function and increase pulmonary artery pressure.

Aryl hydrocarbon receptor-dependence of dioxin's effects on constitutive mouse hepatic cytochromes P450 and growth hormone signaling components.

VP2118 has major roles in *Vibrio parahaemolyticus* response to oxidative stress.

Toxicogenomic profiles in relation to maternal immunotoxic exposure and immune functionality in newborns.

The contribution of thioredoxin-2 reductase and glutathione peroxidase to H₂O₂ detoxification of rat brain mitochondria.

Identification of novel bioactive aldehyde-modified phosphatidylethanolamines formed by lipid peroxidation.

Bladder urotoxicity pathophysiology induced by the oxazaphosphorine alkylating agents and its chemoprevention.

Poor air quality in classrooms related to asthma and rhinitis in primary schoolchildren of the French 6 Cities Study.

Role of chondroitin sulfate C in the action of anthrax toxin.

Unexpected gender difference in sensitivity to the acute toxicity of dioxin in mice.

Acute and subacute oral toxicity of polychlorinated diphenyl sulfides in mice: determining LD₅₀ and assessing the status of hepatic oxidative stress.

In vitro propagation of *Dioscorea alata* var. *purpurea*.

Protective effect of *Enicostema axillare* on mutagenicity of *Salmonella typhimurium* by increasing free radical scavenging abilities.

Lymphoma cells with increased anti-oxidant defenses acquire chemoresistance.

Meta-analysis of data from human *ex vivo* placental perfusion studies on genotoxic and immunotoxic agents within the integrated European project NewGeneris.

Suppressive effects of *Schizandra chinensis* Baillon water extract on allergy-related cytokine generation and degranulation in IgE-antigen complex-stimulated RBL-2H3 cells.

Clinical outcome of veterans with acute coronary syndrome who had been exposed to agent orange.

Acute inhalation study of allyl alcohol for derivation of acute exposure guideline levels.

7-Substituted-pyrrolo[3,2-d]pyrimidine-2,4-dione derivatives as antagonists of the transient receptor potential ankyrin 1 (TRPA1) channel: a promising approach for treating pain and inflammation.

Site-specific oxidation of apolipoprotein A-I impairs cholesterol export by ABCA1, a key cardioprotective function of HDL.

Inhibition of heme oxygenase-1 partially reverses the arsenite-mediated decrease of CYP1A1, CYP1A2, CYP3A23, and CYP3A2 catalytic activity in isolated rat hepatocytes.

Comparative Studies of the (Anti) Mutagenicity of *Baccharis dracunculifolia* and Artepillin C by the Bacterial Reverse Mutation Test.

Evaluation of rheological properties and swelling behaviour of sonicated scleroglucan samples.

Age-related effects of sodium arsenite on splenocyte proliferation and Th1/Th2 cytokine production.

Kynurenic acid: a metabolite with multiple actions and multiple targets in brain and periphery.

A mouse model of accelerated liver aging caused by a defect in DNA repair.

Mast cells in the intestine and gills of the sea bream, *Sparus aurata*, exposed to a polychlorinated biphenyl, PCB 126.

Antioxidant Potential of *Fagonia arabica* against the Chemical Ischemia-Induced in PC12 Cells.

[Expression of membrane and intracellular markers in workers exposed to phenols].

Tumor necrosis factor α stimulates expression and secretion of urokinase plasminogen activator in human dental pulp cells.

Transient receptor potential ankyrin 1 channel localized to non-neuronal airway cells promotes non-neurogenic inflammation.

Role of the Arylhydrocarbon Receptor (AhR) in the Pathology of Asthma and COPD.

Functional analysis of colonic bacterial metabolism: relevant to health?

Identification of ketoconazole as an AhR-Nrf2 activator in cultured human keratinocytes: the basis of its anti-inflammatory effect.

Differential regional expression patterns of α -synuclein, TNF- α , and IL-1 β ; and variable status of dopaminergic neurotoxicity in mouse brain after Paraquat treatment.

Chronic oral exposure to the aldehyde pollutant acrolein induces dilated cardiomyopathy.

Epidemiologic studies of glyphosate and non-cancer health outcomes: a review.

Medical management of paraquat ingestion.

[Effects of hemoperfusion on plasma concentration and histopathological changes in paraquat poisoning rabbits].

Protective effect of 4,4'-diaminodiphenylsulfone against paraquat-induced mouse lung injury.

Hepatotoxicity of silica nanoparticles with a diameter of 100 nm.

Acrolein - a pulmonary hazard.

Acrolein-mediated injury in nervous system trauma and diseases.

Neuroprotective effect of Cu,Zn-superoxide dismutase fused to a TCTP-derived protein transduction domain.

Lysine acetylsalicylate ameliorates lung injury in rats acutely exposed to paraquat.

The impact of the herbicide atrazine on growth and photosynthesis of seagrass, *Zostera marina* (L.), seedlings.

The efficacy of high doses of vitamin C in patients with paraquat poisoning.

A novel human volunteer pain model using contact heat evoked potentials (CHEP) following topical skin application of transient receptor potential agonists capsaicin, menthol and cinnamaldehyde.

Granulocyte macrophage-colony stimulating factor protects against substantia nigra dopaminergic cell loss in an environmental toxin model of Parkinson's disease.

Improved survival in severe paraquat poisoning with repeated pulse therapy of cyclophosphamide and steroids.

Role of growth factors in acute lung injury induced by paraquat in a rat model.

Membrane-active antimicrobial peptides and human placental lysosomal extracts are highly active against mycobacteria.

Acrolein induces myelin damage in mammalian spinal cord.

Protection of bone marrow mesenchymal stem cells from acute lung injury induced by paraquat poisoning.

Therapeutic hypothermia attenuates acute lung injury in paraquat intoxication in rats.

[Clinical study of dynamic change of inflammatory factors in serum of acute paraquat rats].

Protective effects of the aqueous extract of *Scutellaria baicalensis* against acrolein-induced oxidative stress in cultured human umbilical vein endothelial cells.

Aseptic meningitis in association with glyphosate-surfactant herbicide poisoning.

Toxicity of S-metolachlor containing formulation and heavy metals to chicken embryos.

Protective effect of ambroxol against paraquat-induced pulmonary fibrosis in rats.

Edaravone, a novel antidote against lung injury and pulmonary fibrosis induced by paraquat?

Effects of paraquat and capsaicin on the expression of genes related to inflammatory, immune responses and cell death in immortalized human HaCat keratinocytes.

Apolipoprotein D mediates autocrine protection of astrocytes and controls their reactivity level, contributing to the functional maintenance of paraquat-challenged dopaminergic systems.

Complement inhibition alleviates paraquat-induced acute lung injury.

The involvement of TRPA1 channel activation in the inflammatory response evoked by topical application of cinnamaldehyde to mice.

TRPA1 receptor modulation attenuates bladder overactivity induced by spinal cord injury.

Isopentenyl pyrophosphate is a novel antinociceptive substance that inhibits TRPV3 and TRPA1 ion channels.

Low-dose oral immunization with lyophilized tissue of herbicide-resistant lettuce expressing hepatitis B surface antigen for prototype plant-derived vaccine tablet formulation.

Oral exposure to acrolein exacerbates atherosclerosis in apoE-null mice.

Endothelial dysfunction and claudin 5 regulation during acrolein-induced lung injury.

Unbalanced MMP/TIMP-1 expression during the development of experimental pulmonary fibrosis with acute paraquat poisoning.

Anti-acrolein treatment improves behavioral outcome and alleviates myelin damage in experimental autoimmune encephalomyelitis mouse.

Consumption of hydrogen water reduces paraquat-induced acute lung injury in rats.

2'-Hydroxycinnamaldehyde targets low-density lipoprotein receptor-related protein-1 to inhibit lipopolysaccharide-induced microglial activation.

Synthesis of functionalized cinnamaldehyde derivatives by an oxidative Heck reaction and their use as starting materials for preparation of Mycobacterium tuberculosis 1-deoxy-D-xylulose-5-phosphate reductoisomerase inhibitors.

Reagent precoated targets for rapid in-tissue derivatization of the anti-tuberculosis drug isoniazid followed by MALDI imaging mass spectrometry.

Transient receptor potential ankyrin 1 is expressed by inhibitory motoneurons of the mouse intestine.

Murine hepatic aldehyde dehydrogenase 1a1 is a major contributor to oxidation of aldehydes formed by lipid peroxidation.

Phytotoxic, antifungal activities and acute toxicity studies of the crude extract and compounds from *Diospyros canaliculata*.

Increased oxidative/nitrosative stress markers measured non-invasively in patients with high 2,3,7,8-tetrachloro-dibenzo-p-dioxin plasma level.

TRPA1 receptors mediate environmental irritant-induced meningeal vasodilatation.

A single mid-gestation exposure to TCDD yields a postnatal autoimmune signature, differing by sex, in early geriatric C57BL/6 mice.

Chronic subhepatotoxic exposure to arsenic enhances hepatic injury caused by high fat diet in mice.

Effects of oleanolic acid on pulmonary morphofunctional and biochemical variables in experimental acute lung injury.

Controlling viral immuno-inflammatory lesions by modulating aryl hydrocarbon receptor signaling.

Aryl hydrocarbon receptor-mediated induction of Stearoyl-CoA desaturase 1 alters hepatic fatty acid composition in TCDD-elicited steatosis.

MicroRNAs in inflammation and response to injuries induced by environmental pollution.

Supplementation with oral vs. intravenous iron for anemia with IBD or gastrointestinal bleeding: is oral iron getting a bad rap?

Air pollution in autoimmune rheumatic diseases: a review.

Potential protective mechanisms of aryl hydrocarbon receptor (AHR) signaling in benign prostatic hyperplasia.

Discovery of potent, selective, and orally bioavailable alkynylphenoxyacetic acid CRTH2 (DP2) receptor antagonists for the treatment of allergic inflammatory diseases.

Nrf2 protects against 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced oxidative injury and steatohepatitis.

An endogenous tumour-promoting ligand of the human aryl hydrocarbon receptor.

The possible roles of environmental factors and the aryl hydrocarbon receptor in the prevalence of thyroid diseases in Vietnam era veterans.

Activation of the aryl hydrocarbon receptor suppresses sensitization in a mouse peanut allergy model.

Animal models of Parkinson's disease: a source of novel treatments and clues to the cause of the disease.

Molecular targets that link dioxin exposure to toxicity phenotypes.

Inhibition of fatty acid amide hydrolase suppresses referred hyperalgesia induced by bladder inflammation.

Synthesis and evaluation of novel carbon-11 labeled oxopurine analogues for positron emission tomography imaging of translocator protein (18 kDa) in peripheral organs.

Immune interactions in endometriosis.

Vascular hyperpermeability in response to inflammatory mustard oil is mediated by Rho kinase in mice systemically exposed to arsenic.

Vitamin B12 protects against superoxide-induced cell injury in human aortic endothelial cells.

Prenatal zinc supplementation of zinc-adequate rats adversely affects immunity in offspring.

Preconception omega-3 fatty acid supplementation of adult male mice with a history of developmental 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure prevents preterm birth in unexposed female partners.

Interaction of aryl hydrocarbon receptor and NF- κ B subunit RelB in breast cancer is associated with interleukin-8 overexpression.

Fulminant hepatic failure in woman with iron and non-steroidal anti-inflammatory drug intoxication.

Could *Malassezia* yeasts be implicated in skin carcinogenesis through the production of aryl-hydrocarbon receptor ligands?

Activation of aryl hydrocarbon receptor induces vascular inflammation and promotes atherosclerosis in apolipoprotein E^{-/-} mice.

Regulation of type 17 helper T-cell function by nitric oxide during inflammation.

Vascular incompetence in dialysis patients--protein-bound uremic toxins and endothelial dysfunction.

[Non dietetic environmental risk factors in prostate cancer].

Nitric oxide-mediated intracellular growth restriction of pathogenic *Rhodococcus equi* can be prevented by iron.

Role of the xenobiotic receptor in inflammatory bowel disease.

Antioxidant effect of vegetable oils containing conjugated linolenic acid isomers against induced tissue lipid peroxidation and inflammation in rat model.

Quantitation of branched-chain amino acids in ascites by capillary electrophoresis with light-emitting diode-induced fluorescence detection.

Uremic toxins and oral adsorbents.

Developmental dioxin exposure of either parent is associated with an increased risk of preterm birth in adult mice.

Developmental exposure to TCDD reduces fertility and negatively affects pregnancy outcomes across multiple generations.

Prenatal TCDD in mice increases adult autoimmunity.

[High doses of tocopherol in the prevention and potentiation of dioxin in experimental inflammation-potential application].

Surviving a life-threatening 2,4-DNP intoxication: 'Almost dying to be thin'.

Aryl hydrocarbon receptor activation by TCDD reduces inflammation associated with Crohn's disease.

Suppression of cytokine-mediated complement factor gene expression through selective activation of the Ah receptor with 3',4'-dimethoxy- β -naphthoflavone.

Gene expression alterations in immune system pathways in the thymus after exposure to immunosuppressive chemicals.

p-Cresyl sulphate and indoxyl sulphate predict progression of chronic kidney disease.

Oxidative stress and hepatic stellate cell activation are key events in arsenic induced liver fibrosis in mice.

Aryl hydrocarbon receptor ligand 2,3,7,8-tetrachlorodibenzo-p-dioxin enhances liver damage in bile duct-ligated mice.

Prenatal TCDD causes persistent modulation of the postnatal immune response, and exacerbates inflammatory disease, in 36-week-old lupus-like autoimmune SNF1 mice.

Suppression of the proinflammatory response of metastatic melanoma cells increases TRAIL-induced apoptosis.

Case-control study of risk factors of myelodysplastic syndromes according to World Health Organization classification in a Chinese population.

Applicability of an exaggerated forearm wash test for efficacy testing of two corticosteroids, tacrolimus and glycerol, in topical formulations against skin irritation induced by two different irritants.

Resveratrol (3,5,4'-trihydroxystilbene) protects pregnant mother and fetus from the immunotoxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

AhR2-mediated, CYP1A-independent cardiovascular toxicity in zebrafish (*Danio rerio*) embryos exposed to retene.

Activation of aryl hydrocarbon receptor (AhR) leads to reciprocal epigenetic regulation of FoxP3 and IL-17 expression and amelioration of experimental colitis.

Does uremia cause vascular dysfunction?

Metabolomic study of a rat fever model induced with 2,4-dinitrophenol and the therapeutic effects of a crude drug derived from *Coptis chinensis*.

Risk-managed production of bioactive recombinant proteins using a novel plant virus vector with a helper plant to complement viral systemic movement.

Actions of juglone on energy metabolism in the rat liver.

Dietary ligands of the aryl hydrocarbon receptor induce anti-inflammatory and immunoregulatory effects on murine dendritic cells.

TRPV1, TRPA1, and CB1 in the isolated vagus nerve--axonal chemosensitivity and control of neuropeptide release.

Vanin-1: a potential biomarker for nephrotoxicant-induced renal injury.

In vitro efficacy of acetohydroxyacid synthase inhibitors against clinical strains of *Mycobacterium tuberculosis* isolated from a hospital in Beijing, China.

Non-additive hepatic gene expression elicited by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and 2,2',4,4',5,5'-hexachlorobiphenyl (PCB153) co-treatment in C57BL/6 mice.

Developmental effects related to angiogenesis and osteogenic differentiation in Salmon larvae continuously exposed to dioxin-like 3,3',4,4'-tetrachlorobiphenyl (congener 77).

Transient receptor potential A1 channels: insights into cough and airway inflammatory disease.

Swelling the hydrophobic core of surfactant-suspended single-walled carbon nanotubes: a SANS study.

Transcriptomics identifies differences between ultrapure non-dioxin-like polychlorinated biphenyls (PCBs) and dioxin-like PCB126 in cultured peripheral blood mononuclear cells.

Effect of oral coadministration of artesunate with ferrous sulfate on rat liver mitochondrial membrane permeability transition.

Modulation of mast cell adhesion, proliferation, and cytokine secretion on electrospun bioresorbable vascular grafts.

Oral ferrous sulfate does not increase preoperative hemoglobin in patients scheduled for hip or knee arthroplasty.

TRP channels: emerging targets for respiratory disease.

Effect of sodium arsenite dose administered in the drinking water on the urinary bladder epithelium of female arsenic (+3 oxidation state) methyltransferase knockout mice.

Effect of efflux pump inhibitors on drug susceptibility of ofloxacin resistant *Mycobacterium tuberculosis* isolates.

Mechanisms of induction of cytosolic and microsomal glutathione transferase (GST) genes by xenobiotics and pro-inflammatory agents.

Effect of pertussis toxin and herbimycin A on proteinase-activated receptor 2-mediated cyclooxygenase 2 expression in *Helicobacter pylori*-infected gastric epithelial AGS cells.

Cigarette smoke increases susceptibility to tuberculosis--evidence from in vivo and in vitro models.

[Differences in prenatal care between health services under the Family Health Strategy and traditional primary care clinics in Rio Grande, Rio Grande do Sul State, Brazil].

c-Src is required for complex formation between the hepatitis C virus-encoded proteins NS5A and NS5B: a prerequisite for replication.

Influence of Tl(+) on mitochondrial permeability transition pore in Ca(2+)-loaded rat liver mitochondria.

Cyclooxygenase-2 contributes to functional changes seen on experimental hemorrhagic cystitis induced by ifosfamide in rat urinary bladder.

Synthesis of new visnagen and khellin furochromone pyrimidine derivatives and their anti-inflammatory and analgesic activity.

C-reactive protein makes human endothelium stiff and tight.

Stiff endothelial cell syndrome in vascular inflammation and mineralocorticoid excess.

Human CYP2S1 metabolizes cyclooxygenase- and lipoxygenase-derived eicosanoids.

A dominant negative zebrafish Ahr2 partially protects developing zebrafish from dioxin toxicity.

Protective Effects of Liposomal N-Acetylcysteine against Paraquat-Induced Cytotoxicity and Gene Expression.

NTP toxicity studies of toxicity studies of 2,4-decadienal (CAS No. 25152-84-5) administered by gavage to F344/N Rats and B6C3F1 mice.

DNA damage induced by shikonin in the presence of Cu(II) ions: potential mechanism of its activity to apoptotic cell death.

Expression and purification of the membrane protein p7 from hepatitis C virus.

Prior exposure to organophosphorus and organochlorine pesticides increases the allergic potential of environmental chemical allergens in a local lymph node assay.

Cytotoxicity and gene array analysis of alveolar epithelial A549 cells exposed to paraquat.

[Hypothetical link between endometriosis and xenobiotics-associated genetically modified food].

Effects of prenatal exposure to a low dose atrazine metabolite mixture on pubertal timing and prostate development of male Long-Evans rats.

[Effects of enalapril on IL-1beta, IL-6 expression in rat lung exposure to acrolein].

Glyphosate-surfactant herbicide-induced reversible encephalopathy.

Exposure to acrolein by inhalation causes platelet activation.

[Clinical analysis of five cases of necrosis of femoral head after acute paraquat poisoning].

[Paraquat lung and monoamine transporter].

Severe paraquat poisoning: clinical and radiological findings in a survivor.

Systemic contact dermatitis presenting as lichen planus of the lip.

Spectrum of corrosive esophageal injury after intentional paraquat ingestion.

Glucocorticoid with cyclophosphamide for paraquat-induced lung fibrosis.

Desmoplastic small round-cell tumor: an adult with previous exposure to agent orange.

Simvastatin attenuates acrolein-induced mucin production in rats: involvement of the Ras/extracellular signal-regulated kinase pathway.

[Expression of angiotensin converting enzyme and angiotensin converting enzyme 2 gene in lung of paraquat poisoning rats and protection of sodium dimercaptopropane sulfonate].

Cigarette smoke total particulate matter increases mucous secreting cell numbers in vitro: a potential model of goblet cell hyperplasia.

[Expression of NF-kappaB and its downstream products in human umbilical vascular endothelial cells treated with paraquat].

[Changes of proteomics in the lung of rats subjected to acrolein inhalation after enalapril administration].

Paraquat-induced oxidative stress response during amphibian early embryonic development.

Intermediate filament carbonylation during acute acrolein toxicity in A549 lung cells: functional consequences, chaperone redistribution, and protection by bisulfite.

Low concentrations of atrazine, glyphosate, 2,4-dichlorophenoxyacetic acid, and triadimefon exposures have diverse effects on *Xenopus laevis* organ morphogenesis.

Rhinitis associated with pesticide use among private pesticide applicators in the agricultural health study.

Tacrolimus modulates dendritic cell activation in the sensitization phase of allergic contact dermatitis.

Failed rescue therapy with rapamycin after paraquat intoxication.

Degradation of fifteen emerging contaminants at microg L(-1) initial concentrations by mild solar photo-Fenton in MWTP effluents.

Acetaminophen, via its reactive metabolite N-acetyl-p-benzo-quinoneimine and transient receptor potential ankyrin-1 stimulation, causes neurogenic inflammation in the airways and other tissues in rodents.

Influence of cinnamaldehyde on viral myocarditis in mice.

Subanesthetic dose of isoflurane protects against zymosan-induced generalized inflammation and its associated acute lung injury in mice.

Selective stimulation by cinnamaldehyde of progesterone secretion in human adrenal cells.

Ocotea quixos Lam. essential oil: in vitro and in vivo investigation on its anti-inflammatory properties.

Modulation of SCF beta-TrCP-dependent I kappaB alpha ubiquitination by hydrogen peroxide.

Substance MCS-18 isolated from *Helleborus purpurascens* is a potent antagonist of the capsaicin receptor, TRPV1, in rat cultured sensory neurons.

Protective effects of the synthetic cannabinoids CP55,940 and JWH-015 on rat brain mitochondria upon paraquat exposure.

TRPA1-expressing primary afferents synapse with a morphologically identified subclass of substantia gelatinosa neurons in the adult rat spinal cord.

Role of the DinB homologs Rv1537 and Rv3056 in *Mycobacterium tuberculosis*.

Effect of dietary tea polyphenols on growth performance and cell-mediated immune response of post-weaning piglets under oxidative stress.

Regulatory effect of cinnamaldehyde on monocyte/macrophage-mediated inflammatory responses.

Cinnamaldehyde up-regulates the mRNA expression level of TRPV1 receptor potential ion channel protein and its function in primary rat DRG neurons in vitro.

High-throughput gene expression analysis of intestinal intraepithelial lymphocytes after oral feeding of carvacrol, cinnamaldehyde, or Capsicum oleoresin.

An endogenous aryl hydrocarbon receptor ligand acts on dendritic cells and T cells to suppress experimental autoimmune encephalomyelitis.

[Inspect aging psoriasis patients minutely! Psoriasis or skin cancer?].

Tyrosine sulfation of the amino terminus of PSGL-1 is critical for enterovirus 71 infection.

Breast cancer stem-like cells are inhibited by a non-toxic aryl hydrocarbon receptor agonist.

Toxicology and carcinogenesis studies of 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (CAS No. 31508-00-6) in female harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 3,3',4,4'-tetrachloroazobenzene (TCAB) (CAS No. 14047-09-7) in Harlan Sprague-Dawley rats and B6C3F1 mice (gavage studies).

A case of black urine and dark skin - cresol poisoning.

A cluster of inflammatory breast cancer (IBC) in an office setting: additional evidence of the importance of environmental factors in IBC etiology.

Recruitment maneuver in experimental acute lung injury: the role of alveolar collapse and edema.

TCDD induced pericardial edema and relative COX-2 expression in medaka (*Oryzias Latipes*) embryos.

The high level of RANTES in the ectopic milieu recruits macrophages and induces their tolerance in progression of endometriosis.

Evolution and prognosis of necrotic primary teeth after pulpectomy.

Non-genomic action of TCDD to induce inflammatory responses in HepG2 human hepatoma cells and in liver of C57BL/6J mice.

2,3,7,8-Tetrachlorodibenzo-p-dioxin modifies expression and nuclear/cytosolic localization of bovine herpesvirus 1 immediate-early protein (bICP0) during infection.

Strepsils[®] tablets reduce sore throat and hoarseness after tracheal intubation.

Identification and investigation of mitochondria lacking cytochrome c oxidase activity in axons.

Mechanistic insights into the events that lead to synergistic induction of interleukin 6 transcription upon activation of the aryl hydrocarbon receptor and inflammatory signaling.

'Fatal 2,4-dinitrophenol poisoning... coming to a hospital near you'.

Early onset of neurological symptoms in fragile X premutation carriers exposed to neurotoxins.

Does polyamine oxidase activity influence the oxidative metabolism of children who suffer of diabetes mellitus?

Assisted ventilation modes reduce the expression of lung inflammatory and fibrogenic mediators in a model of mild acute lung injury.

Activation of the aryl hydrocarbon receptor pathway may ameliorate dextran sodium sulfate-induced colitis in mice.

Serological cardiovascular and mortality risk predictors in dialysis patients receiving sevelamer: a prospective study.

Elevated soluble transferrin receptor levels reflect increased erythropoietic drive rather than iron deficiency in pediatric sickle cell disease.

Functional and phenotypic effects of AhR activation in inflammatory dendritic cells.

Lactoferrin efficacy versus ferrous sulfate in curing iron deficiency and iron deficiency anemia in pregnant women.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces disruption of glands of the prostate and fibrosis in rhesus monkeys.

Development of a selective modulator of aryl hydrocarbon (Ah) receptor activity that exhibits anti-inflammatory properties.

Synthesis of 3-((2,4-dichlorophenoxy)methyl)-1,2,4-triazolo(thiadiazoles and thiadiazines) as anti-inflammatory and molluscicidal agents.

Kynurenic acid is a potent endogenous aryl hydrocarbon receptor ligand that synergistically induces interleukin-6 in the presence of inflammatory signaling.

5-FU for genital warts in non-immunocompromised individuals.

Enhancement of TAT cell membrane penetration efficiency by dimethyl sulphoxide.

Differential gene regulation by the human and mouse aryl hydrocarbon receptor.

Suppression of experimental autoimmune uveoretinitis by inducing differentiation of regulatory T cells via activation of aryl hydrocarbon receptor.

HBx targeting to mitochondria and ROS generation are necessary but insufficient for HBV-induced cyclooxygenase-2 expression.

Free p-cresylsulphate is a predictor of mortality in patients at different stages of chronic kidney disease.

Octatropine methyl bromide and diazepam combination (Valpinax) in patients with irritable bowel syndrome: a multicentre, randomized, placebo-controlled trial.

[Chemical contamination of the environment and development of allergic and autoimmune diseases].

AHR activation by tryptophan--pathogenic hallmark of Th17-mediated inflammation in eosinophilic fasciitis, eosinophilia-myalgia-syndrome and toxic oil syndrome?

[A case of severe bronchial mucosal injury caused by iron pill aspiration].

Features and prognostic factors for elderly with acute poisoning in the emergency department.

Ground-glass-like hepatocellular inclusions in the course of adult-onset Still's disease.

Ischemia-activated microglia induces neuronal injury via activation of gp91phox NADPH oxidase.

Increased levels of total P-Cresylsulphate and indoxyl sulphate are associated with coronary artery disease in patients with diabetic nephropathy.

[Neurodevelopmental disorders in response to hormonally active environmental pollutants].

Protective role of zinc in ameliorating arsenic-induced oxidative stress and histological changes in rat liver.

Efficacy and safety of ferric carboxymaltose in correcting iron-deficiency anemia: a review of randomized controlled trials across different indications.

Indian spice curcumin may be an effective strategy to combat the genotoxicity of arsenic in Swiss albino mice.

Histopathological evaluation of root canal filling materials for primary teeth.

Perinatal exposure of mice to TCDD decreases allergic sensitisation through inhibition of IL-4 production rather than T regulatory cell-mediated suppression.

Dioxin and immune regulation: emerging role of aryl hydrocarbon receptor in the generation of regulatory T cells.

A case of human poisoning with a flufenoxuron-containing insecticide.

Neuroprotective effect of s-methylisothiourea in transient focal cerebral ischemia in rat.

Evidence supporting a role for N-(3-formyl-3,4-dehydropiperidino)lysine accumulation in Müller glia dysfunction and death in diabetic retinopathy.

Effects of selected food phytochemicals in reducing the toxic actions of TCDD and p,p'-DDT in U937 macrophages.

Effects of the compounds MV8608 and MV8612 obtained from *Mandevilla velutina* in the model of hemorrhagic cystitis induced by cyclophosphamide in rats.

Metals, oxidative stress and neurodegenerative disorders.

Injury and differentiation following inhibition of mitochondrial respiratory chain complex IV in rat oligodendrocytes.

2,3,7,8-Tetrachlorodibenzo-p-dioxin impairs stable establishment of oral tolerance in mice.

Serum protein-bound uraemic toxins and clinical outcomes in haemodialysis patients.

Alkylation of the tumor suppressor PTEN activates Akt and β -catenin signaling: a mechanism linking inflammation and oxidative stress with cancer.

Guar gum and scleroglucan interactions with borax: experimental and theoretical studies of an unexpected similarity.

Matrix metalloproteinase-9 and -2 expression in the olfactory bulb following methyl bromide gas exposure.

Transcription of the Epstein-Barr virus lytic cycle activator BZLF-1 during oxidative stress induction.

Stress inducible heat shock protein 70: a potent molecular and toxicological signature in arsenic exposed broiler chickens.

Gene expression profile and cytotoxicity of human bronchial epithelial cells exposed to crotonaldehyde.

Genomic indicators in the blood predict drug-induced liver injury.

Occurrence and risk assessment of acidic pharmaceuticals in the Yellow River, Hai River and Liao River of north China.

Sensory detection and responses to toxic gases: mechanisms, health effects, and countermeasures.

Transcriptional regulation of bone sialoprotein gene by *Porphyromonas gingivalis* lipopolysaccharide.

Microglial peroxiredoxin V acts as an inducible anti-inflammatory antioxidant through cooperation with redox signaling cascades.

Enhanced translocation of bacteria across metabolically stressed epithelia is reduced by butyrate.

Low-dose synergistic immunosuppression of T-dependent antibody responses by polycyclic aromatic hydrocarbons and arsenic in C57BL/6J murine spleen cells.

Metabolic correlations of glucocorticoids and polyamines in inflammation and apoptosis.

Influence of blood meal on the responsiveness of olfactory receptor neurons in antennal sensilla trichodea of the yellow fever mosquito, *Aedes aegypti*.

Transient receptor potential channels as novel drug targets in respiratory diseases.

Implication of oxidative stress as a cause of autoimmune hemolytic anemia in NZB mice.

Intravital fluorescent microscopic evaluation of bacterial cellulose as scaffold for vascular grafts.

TCDD and a putative endogenous AhR ligand, ITE, elicit the same immediate changes in gene expression in mouse lung fibroblasts.

Radical-scavenging activity and cytotoxicity of p-methoxyphenol and p-cresol dimers.

TCDD-induced cyclooxygenase-2 expression is mediated by the nongenomic pathway in mouse MMDD1 macula densa cells and kidneys.

Arylhydrocarbon receptor activation in NCI-H441 cells and C57BL/6 mice: possible mechanisms for lung dysfunction.

Exposure to 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin and tetraethyl lead affects lung mitochondria bioenergetics.

Histone deacetylase inhibitors decrease the antigen presenting activity of murine bone marrow derived dendritic cells.

Interferon-gamma deficiency modifies the motor and co-morbid behavioral pathology and neurochemical changes provoked by the pesticide paraquat.

The role of T cells in the regulation of acrolein-induced pulmonary inflammation and epithelial-cell pathology.

Paraquat (PQ)-induced pulmonary fibrosis increases exercise metabolic cost, reducing aerobic performance in rats.

Clinical implication of urinary neutrophil gelatinase-associated lipocalin and kidney injury molecule-1 in patients with acute paraquat intoxication.

Rhinitis associated with pesticide exposure among commercial pesticide applicators in the Agricultural Health Study.

Rotenone and paraquat do not directly activate microglia or induce inflammatory cytokine release.

Intraoral contact mucositis induced by cinnamon-flavored chewing gum--a case report.

Vasogenic edema in striatum following ingestion of glufosinate-containing herbicide.

Postmortem analyses unveil the poor efficacy of decontamination, anti-inflammatory and immunosuppressive therapies in paraquat human intoxications.

Glycogen content is affected differently in acute pulmonary and extra-pulmonary lung injury.

p38 MAPK and MMP-9 cooperatively regulate mucus overproduction in mice exposed to acrolein fog.

Effects of 2,4-dichlorophenoxyacetic acid formulation on medulla spinalis of *Poecilia reticulata*: a histopathological study.

Pathogenic stimulation of intestinal stem cell response in *Drosophila*.

Inflammatory priming of the substantia nigra influences the impact of later paraquat exposure: Neuroimmune sensitization of neurodegeneration.

[Pathologic changes and expression of Heme oxygenase-1 in paraquat-induced renal injury].

Allergic reaction induced by dermal and/or respiratory exposure to low-dose phenoxyacetic acid, organophosphorus, and carbamate pesticides.

Fatal diquat intoxication.

[Effects of ulinastatin to pro-inflammatory mediators in rats with acute paraquat intoxication].

Delayed immunosuppressive treatment in life-threatening paraquat ingestion: a case report.

Immunohistochemical and histopathological evaluation of 2,4-dichlorophenoxyacetic acid-induced changes in rat kidney cortex.

Occupational exposure to pesticides and lymphoid neoplasms among men: results of a French case-control study.

Acrolein activates matrix metalloproteinases by increasing reactive oxygen species in macrophages.

Morbidity in former sawmill workers exposed to pentachlorophenol (PCP): a cross-sectional study in New Zealand.

Protection against paraquat and A53T alpha-synuclein toxicity by cabergoline is partially mediated by dopamine receptors.

[Expression of inflammatory factors in lung tissue of acute paraquat poisoned rats].

[Changes in nitric oxide, prostaglandins and myeloperoxidase activity in acrolein-induced cystitis in rats].

An effective antidote for paraquat poisonings: the treatment with lysine acetylsalicylate.

Collaborative work on evaluation of ovarian toxicity. 14) Two- or four-week repeated-dose studies and fertility study of atrazine in female rats.

[Influence of early effective control for inflammatory exudation on survival rate of acute paraquat poisoning].

Oxidative and inflammatory pathways in Parkinson's disease.

Inhibitory effects of Geijigajakyak-Tang on trinitrobenzene sulfonic acid-induced colitis.

Increased sensitivity of glutathione S-transferase P-null mice to cyclophosphamide-induced urinary bladder toxicity.

Staphylococcal catalase regulates its virulence and induces arthritis in catalase deficient mice.

Acrolein, a ubiquitous pollutant and lipid hydroperoxide product, inhibits antiviral activity of interferon-alpha: relevance to hepatitis C.

Rosiglitazone, a peroxisome proliferator-activated receptor-gamma agonist, attenuates acrolein-induced airway mucus hypersecretion in rats.

Influence of cyclophosphamide and its metabolic products on the activity of peritoneal macrophages in mice.

TRPV1-mediated itch in seasonal allergic rhinitis.

Effect of sildenafil on acrolein-induced airway inflammation and mucus production in rats.

Antiinflammatory effects of hydrogen peroxide in neutrophil activation and acute lung injury.

Spice active principles as the inhibitors of human platelet aggregation and thromboxane biosynthesis.

Protective effect of montelukast on paraquat-induced lung toxicity in rats.

Effect of long-term exposure to simazine on histopathology, hematological, and biochemical parameters in *Cyprinus carpio*.

Azide and Tween-20 reduce binding to autoantibody epitopes of islet antigen-2; implications for assay performance and reproducibility.

Antioxidant activity of mangostin in cell-free system and its effect on K562 leukemia cell line in photodynamic therapy.

Reproductive lesions in female Harlan Sprague-Dawley rats following two-year oral treatment with dioxin and dioxin-like compounds.

The pneumococcal response to oxidative stress includes a role for Rgg.

Arsenic exacerbates atherosclerotic lesion formation and inflammation in ApoE^{-/-} mice.

Inflammatory and chloracne-like skin lesions in B6C3F1 mice exposed to 3,3',4,4'-tetrachloroazobenzene for 2 years.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin disrupts B-cell lymphopoiesis and exacerbates autoimmune disease in 24-week-old SNF1 mice.

Marked iron overload related to ribavirin and iron sulfate treatment in a patient with active viral C cirrhosis.

[Acute and subacute chemical pneumonitis].

Effects of chronic exposure to DDT and TCDD on disease activity in murine systemic lupus erythematosus.

Developmental exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin alters postnatal T cell phenotypes and T cell function and exacerbates autoimmune lupus in 24-week-old SNF1 mice.

Oral and intravenous iron treatment in inflammatory bowel disease: hematological response and quality of life improvement.

Post-exposure treatment with nasal atropine methyl bromide protects against microinstillation inhalation exposure to sarin in guinea pigs.

Synthesis of some novel triazole derivatives as anti-nociceptive and anti-inflammatory agents.

Disruption of nNOS-PSD95 protein-protein interaction inhibits acute thermal hyperalgesia and chronic mechanical allodynia in rodents.

Expression of constitutively-active aryl hydrocarbon receptor in T-cells enhances the down-regulation of CD62L, but does not alter expression of CD25 or suppress the allogeneic CTL response.

Mechanisms of non-genotoxic carcinogens and importance of a weight of evidence approach.

Lysozyme, a mediator of sepsis that intrinsically generates hydrogen peroxide to cause cardiovascular dysfunction.

Autologous melanoma vaccine induces antitumor and self-reactive immune responses that affect patient survival and depend on MHC class II expression on vaccine cells.

Activation of aryl hydrocarbon receptor by TCDD prevents diabetes in NOD mice and increases Foxp3+ T cells in pancreatic lymph nodes.

Protection of bleomycin-induced fibrosis and inflammation by taurine.

Immunogenicity of a standard trivalent influenza vaccine in patients on long-term hemodialysis: an open-label trial.

Prone position prevents regional alveolar hyperinflation and mechanical stress and strain in mild experimental acute lung injury.

Peroxiredoxin 6 fails to limit phospholipid peroxidation in lung from Cfr-knockout mice subjected to oxidative challenge.

Melatonin reduces acute lung injury in endotoxemic rats.

[Model establishment of liver fibrosis in oral arsenic solution exposed mice].

Characterization of inflammatory bowel disease with urinary metabolic profiling.

Dexamethasone enhances basal and TNF-alpha-stimulated production of PAI-1 via the glucocorticoid receptor regardless of 11beta-hydroxysteroid dehydrogenase 2 status in human proximal renal tubular cells.

Neonatal exposure to low-dose 2,3,7,8-tetrachlorodibenzo-p-dioxin causes autoimmunity due to the disruption of T cell tolerance.

Differentiation of human osteosarcoma cells by isolated phlorotannins is subtly linked to COX-2, iNOS, MMPs, and MAPK signaling: implication for chronic articular disease.

Ethnicity and incidence of Hodgkin lymphoma in Canadian population.

Mitochondrial changes within axons in multiple sclerosis.

The conversion of rapid TCCD nongenomic signals to persistent inflammatory effects via select protein kinases in MCF10A cells.

The soluble nickel component of residual oil fly ash alters pulmonary host defense in rats.

Characterization of the pattern of the nongenomic signaling pathway through which TCDD-induces early inflammatory responses in U937 human macrophages.

Cell-mediated immune response to unrelated proteins and unspecific inflammation blocked by orally tolerated proteins.

The significance of the nongenomic pathway in mediating inflammatory signaling of the dioxin-activated Ah receptor to cause toxic effects.

A new cross-talk between the aryl hydrocarbon receptor and RelB, a member of the NF-kappaB family.

TCDD induces cell migration via NFATc1/ATX-signaling in MCF-7 cells.

[The specific features of the clinical course of tuberculosis and enhancement of its treatment efficiency in fertile-age women with iron-deficiency anemia].

Mass spectrometric and peptide chip epitope mapping of rheumatoid arthritis autoantigen RA33.

Ferric carboxymaltose: a review of its use in iron-deficiency anaemia.

Intravenous iron sucrose is superior to oral iron sulphate for correcting anaemia and restoring iron stores in IBD patients: A randomized, controlled, evaluator-blind, multicentre study.

Therapeutic surfactants modulate the viability of eosinophils and induce inflammatory mediator release.

Iron medication-induced gastric mucosal injury.

Targeting of aryl hydrocarbon receptor-mediated activation of cyclooxygenase-2 expression by the indole-3-carbinol metabolite 3,3'-diindolylmethane in breast cancer cells.

Developmental immunotoxicology: focus on health risks.

Heparan sulfate proteoglycans are required for cellular binding of the hepatitis E virus ORF2 capsid protein and for viral infection.

The pleiotropy of dioxin toxicity--xenobiotic misappropriation of the aryl hydrocarbon receptor's alternative physiological roles.

Evaluation of phagocytic activity and nitric oxide generation by molluscan haemocytes as biomarkers of inorganic arsenic exposure.

The mammalian aryl hydrocarbon (Ah) receptor: from mediator of dioxin toxicity toward physiological functions in skin and liver.

Hemangiomas, angiosarcomas, and vascular malformations represent the signaling abnormalities of pathogenic angiogenesis.

Transepithelial transport of macromolecular substances in IL-4 treated human intestinal T84 cell monolayers.

Structural basis for the inhibition of Mycobacterium tuberculosis glutamine synthetase by novel ATP-competitive inhibitors.

Synthesis and pharmacological evaluation of 1,3,4-oxadiazole bearing bis(heterocycle) derivatives as anti-inflammatory and analgesic agents.

Acacia Senegal gum exudate offers protection against cyclophosphamide-induced urinary bladder cytotoxicity.

Systematic gene expression profile of hypothalamus in calorie-restricted mice implicates the involvement of mTOR signaling in neuroprotective activity.

Low dose of 2,3,7,8 tetrachlorodibenzo-p-dioxin induces testicular oxidative stress in adult rats under the influence of corticosterone.

Functionalized 3-amino-imidazo[1,2-a]pyridines: a novel class of drug-like Mycobacterium tuberculosis glutamine synthetase inhibitors.

Modulation of carcinogen metabolism by nitric oxide-aspirin 2 is associated with suppression of DNA damage and DNA adduct formation.

Rescue of anaemia and autoimmune responses in SOD1-deficient mice by transgenic expression of human SOD1 in erythrocytes.

[Production of marker-free plants expressing the gene of the hepatitis B virus surface antigen].

Distinct roles of two zebrafish AHR repressors (AHRRa and AHRRb) in embryonic development and regulating the response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Biotechnological and industrial significance of cyanobacterial secondary metabolites.

Effects of TI(+) on ion permeability, membrane potential and respiration of isolated rat liver mitochondria.

Chiral analysis of anti-acquired immunodeficiency syndrome drug, 9-(R)-[2-(phosphonomethoxy)propyl]adenine (tenofovir), and related antiviral acyclic nucleoside phosphonates by CE using beta-CD as chiral selector.

CYP1A1 and CYP1A2 expression: comparing 'humanized' mouse lines and wild-type mice; comparing human and mouse hepatoma-derived cell lines.

Non-carcinogenic carbon sorbents for respiratory protection.

Involvement of Blimp-1 and AP-1 dysregulation in the 2,3,7,8-Tetrachlorodibenzo-p-dioxin-mediated suppression of the IgM response by B cells.

In vivo and in vitro evaluation of an Acetobacter xylinum synthesized microbial cellulose membrane intended for guided tissue repair.

Studies on histopathological changes in the gill, liver and kidney of Channa punctatus (Bloch) exposed to Alachlor.

Experimental study of the tissue reaction caused by the presence of cellulose produced by Acetobacter xylinum in the nasal dorsum of rabbits.

5,7-dihydroxy-3,4,6-trimethoxyflavone inhibits the inflammatory effects induced by Bacteroides fragilis enterotoxin via dissociating the complex of heat shock protein 90 and I kappaB alpha and I kappaB kinase-gamma in intestinal epithelial cell culture.

C-reactive protein modulates human lung fibroblast migration.

Refractory cardiopulmonary failure after glyphosate surfactant intoxication: a case report.

Beyond toxicity: aryl hydrocarbon receptor-mediated functions in the immune system.

Effects of prevalent freshwater chemical contaminants on in vitro growth of Escherichia coli and Klebsiella pneumoniae.

Rhabdomyolysis from an intramuscular injection of glyphosate-surfactant herbicide.

Individual and joint toxic effects of pentachlorophenol and bisphenol A on the development of zebrafish (*Danio rerio*) embryo.

[Influence of pyrrolidine dithiocarbamate (PDTC) on expression of transforming growth factor beta(1), matrix metalloproteinase-2 and tissue inhibitor-1 of metalloproteinase in rats with pulmonary damage induced by paraquat].

The involvement of nitric oxide in maneb- and paraquat-induced oxidative stress in rat polymorphonuclear leukocytes.

A review of the immunotoxicity of the pesticide 3,4-dichloropropionanilide.

Spermatogenesis, epididymis morphology and plasma sex steroid secretion in the male lizard *Podarcis sicula* exposed to diuron.

Oral mucosal response to exposure to diquat: a rare occupational injury.

Use of sirolimus in a case of severe paraquat poisoning.

An outbreak of fatal pneumonitis caused by contamination of illicit alcohol with paraquat.

Establishing the use of melatonin as an adjuvant therapeutic against paraquat-induced lung toxicity in rats.

Nonredundant functions of alphabeta and gammadelta T cells in acrolein-induced pulmonary pathology.

The cannabinoid CP55,940 prolongs survival and improves locomotor activity in *Drosophila melanogaster* against paraquat: implications in Parkinson's disease.

The effectiveness of combined treatment with methylprednisolone and cyclophosphamide in oral paraquat poisoning.

How irritating: the role of TRPA1 in sensing cigarette smoke and aerogenic oxidants in the airways.

Blockade of NGF and trk receptors inhibits increased peripheral mechanical sensitivity accompanying cystitis in rats.

Modulation of signal transduction pathways in lymphocytes due to sub-lethal toxicity of chlorinated phenol.

Triptolide protects against 1-methyl-4-phenyl pyridinium-induced dopaminergic neurotoxicity in rats: implication for immunosuppressive therapy in Parkinson's disease.

Reduced toxicological activity of cigarette smoke by the addition of ammonia magnesium phosphate to the paper of an electrically heated cigarette: subchronic inhalation toxicology.

Acrolein induces inflammatory response underlying endothelial dysfunction: a risk factor for atherosclerosis.

Acute renal failure induced by bentazone: 2 case reports and a comprehensive review.

Application of physiological computational fluid dynamics models to predict interspecies nasal dosimetry of inhaled acrolein.

Respiratory tract responses in male rats following subchronic acrolein inhalation.

Protective effects of ethyl pyruvate treatment on paraquat-intoxicated rats.

Acrolein: sources, metabolism, and biomolecular interactions relevant to human health and disease.

Keap1/Nrf2 signaling regulates oxidative stress tolerance and lifespan in *Drosophila*.

Photoreceptor oxidative damage in sympathetic ophthalmia.

Cannabinoid receptor 2 is increased in acutely and chronically inflamed bladder of rats.

Tyrosine phosphatase SHP-1 in oxidative stress and development of allergic airway inflammation.

Cyclooxygenase-2 deficiency modifies the neurochemical effects, motor impairment and co-morbid anxiety provoked by paraquat administration in mice.

[Interventions of enalapril on airway inflammation in rat models induced by acrolein].

Prostaglandins inhibit cytochrome P450 4A activity and contribute to endotoxin-induced hypotension in rats via nitric oxide production.

Cigarette smoke-induced neurogenic inflammation is mediated by alpha,beta-unsaturated aldehydes and the TRPA1 receptor in rodents.

Acrolein inhalation suppresses lipopolysaccharide-induced inflammatory cytokine production but does not affect acute airways neutrophilia.

Inhibition of acrolein-stimulated MUC5AC production by fucoidan in human bronchial epithelial cells.

Tear cytokine and ocular surface alterations following brief passive cigarette smoke exposure.

Dynamics of glyphosate-induced conformational changes of *Mycobacterium tuberculosis* 5-enolpyruvylshikimate-3-phosphate synthase (EC 2.5.1.19) determined by hydrogen-deuterium exchange and electrospray mass spectrometry.

Cinnamaldehyde inhibits the tumor necrosis factor-alpha-induced expression of cell adhesion molecules in endothelial cells by suppressing NF-kappaB activation: effects upon IkappaB and Nrf2.

Anti-inflammation activities of essential oil and its constituents from indigenous cinnamon (*Cinnamomum osmophloeum*) twigs.

Distribution and function of the hydrogen sulfide-sensitive TRPA1 ion channel in rat urinary bladder.

Cinnamaldehyde inhibits pro-inflammatory cytokines secretion from monocytes/macrophages through suppression of intracellular signaling.

Significance of the nongenomic, inflammatory pathway in mediating the toxic action of TCDD to induce rapid and long-term cellular responses in 3T3-L1 adipocytes.

Decoy receptor 3 expression in AsPC-1 human pancreatic adenocarcinoma cells via the phosphatidylinositol 3-kinase-, Akt-, and NF-kappa B-dependent pathway.

Initial and extended inflammatory messages of the nongenomic signaling pathway of the TCDD-activated Ah receptor in U937 macrophages.

Sodium azide induces necrotic cell death in rat squamous cell carcinoma SCC131.

Dihydrolipoic acid inhibits tetrachlorohydroquinone-induced tumor promotion through prevention of oxidative damage.

Synthesis of biologically active N-methyl derivatives of amidines and cyclized five-membered products of amidines with oxalyl chloride.

Pleural mesothelial cells express both BLT2 and PPARalpha and mount an integrated response to pleural leukotriene B4.

Fluorescence confocal laser scanning microscopy for in vivo imaging of epidermal reactions to two experimental irritants.

Identification of Inonotus obliquus and analysis of antioxidation and antitumor activities of polysaccharides.

Characterization of the transduction pathway involved in c-fos and c-jun expression induced by Aggregatibacter actinomycetemcomitans lipopolysaccharides in human gingival fibroblasts.

Perinatal TCDD exposure and the adult onset of autoimmune disease.

Recent progress and diverse effects in developmental immunotoxicology: overview of a symposium at the 46th Annual SOT Meeting, Charlotte, NC.

An enhanced postnatal autoimmune profile in 24 week-old C57BL/6 mice developmentally exposed to TCDD.

Critical role of cyclooxygenase-2 activation in pathogenesis of hydronephrosis caused by lactational exposure of mice to dioxin.

A role for the aryl hydrocarbon receptor and the dioxin TCDD in rheumatoid arthritis.

Functional characterization and gene expression analysis of CD4+ CD25+ regulatory T cells generated in mice treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Synthesis and evaluation in vitro and in vivo of a ¹¹C-labeled cyclooxygenase-2 (COX-2) inhibitor.

Oxidative inactivation of the proteasome in retinal pigment epithelial cells. A potential link between oxidative stress and up-regulation of interleukin-8.

Combination of estrogen and dioxin is involved in the pathogenesis of endometriosis by promoting chemokine secretion and invasion of endometrial stromal cells.

Relationship of impaired olfactory function in ESRD to malnutrition and retained uremic molecules.

Inorganic arsenic exposure affects pain behavior and inflammatory response in rat.

Polychlorinated biphenyl-77 induces adipocyte differentiation and proinflammatory adipokines and promotes obesity and atherosclerosis.

Multiple cutaneous precanceroses and carcinomas from combined iatrogenic/professional exposure to arsenic.

CYP1A/regucalcin gene expression and edema formation in zebrafish embryos exposed to 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Dioxin may promote inflammation-related development of endometriosis.

A novel intravenous iron formulation for treatment of anemia in inflammatory bowel disease: the ferric carboxymaltose (FERINJECT) randomized controlled trial.

Control of T(reg) and T(H)17 cell differentiation by the aryl hydrocarbon receptor.

The aryl hydrocarbon receptor links TH17-cell-mediated autoimmunity to environmental toxins.

High prevalence of celiac disease in Mexican Mestizo adults with type 1 diabetes mellitus.

Comparative genomics identifies genes mediating cardiotoxicity in the embryonic zebrafish heart.

[Analytic role in clinical toxicology--impact on the diagnosis and treatment of a poisoned patient].

Sodium arsenite reduces severity of dextran sulfate sodium-induced ulcerative colitis in rats.

Sodium arsenite induces heat shock protein 70 expression and protects against secretagogue-induced trypsinogen and NF-kappaB activation.

Gastrointestinal microbial ecology and the safety of our food supply as related to Salmonella.

Synthesis, antimicrobial and anti-inflammatory activities of some 1,2,4-triazolo[3,4-b][1,3,4]thiadiazoles and 1,2,4-triazolo[3,4-b][1,3,4]thiadiazines bearing trichlorophenyl moiety.

Relative potency based on hepatic enzyme induction predicts immunosuppressive effects of a mixture of PCDDS/PCDFS and PCBS.

[An overview on biomarkers of arsenic-induced health hazardsan].

High dietary fat exacerbates arsenic-induced liver fibrosis in mice.

Decreased epithelial barrier function evoked by exposure to metabolic stress and nonpathogenic E. coli is enhanced by TNF-alpha.

The aryl hydrocarbon receptor affects distinct tissue compartments during ontogeny of the immune system.

TCDD exposure exacerbates atopic dermatitis-related inflammation in NC/Nga mice.

Health effects of early life exposure to arsenic.

Hepatocyte mitochondrion electron-transport chain alterations in CCl(4) and alcohol induced hepatitis in rats and their correction with simvastatin.

Subhepatotoxic exposure to arsenic enhances lipopolysaccharide-induced liver injury in mice.

[Outdoor work-related health hazards].

Anemia management in peritoneal dialysis patients: can an iron supplement maintain a normal transferrin saturation and hemoglobin level?

Humoral response against *Mycobacterium bovis* Hsp65 derived fragments in children and young people with various disorders.

Effects of 4-tert-Octylphenol on the incubation of eggs in Japanese brown frogs (*Rana japonica*).

Cytotoxicity, histopathological, microbiological and clinical aspects of an endodontic iodoform-based paste used in pediatric dentistry: a review.

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters the differentiation of alloreactive CD8⁺ T cells toward a regulatory T cell phenotype by a mechanism that is dependent on aryl hydrocarbon receptor in CD4⁺ T cells.

Endocrine disruptors and estrogenic effects on male reproductive axis.

Pesticides and atopic and nonatopic asthma among farm women in the Agricultural Health Study.

C-reactive protein induces endothelial cell apoptosis and matrix metalloproteinase-9 production in human mononuclear cells: Implications for the destabilization of atherosclerotic plaque.

Swelling the micelle core surrounding single-walled carbon nanotubes with water-immiscible organic solvents.

Matrix metalloproteinase-2 and -9 are induced differently by metal nanoparticles in human monocytes: The role of oxidative stress and protein tyrosine kinase activation.

Induction of cellular stress overcomes the requirement of herpes simplex virus type 1 for immediate-early protein ICPO and reactivates expression from quiescent viral genomes.

Combining ligand-based pharmacophore modeling, quantitative structure-activity relationship analysis and in silico screening for the discovery of new potent hormone sensitive lipase inhibitors.

2,3,7,8-tetrachlorodibenzo-p-dioxin regulates bovine herpesvirus type 1 induced apoptosis by modulating Bcl-2 family members.

Lipoic acid as an anti-inflammatory and neuroprotective treatment for Alzheimer's disease.

Cytokine-induced arginase activity in pulmonary endothelial cells is dependent on Src family tyrosine kinase activity.

Lack of TRPV1 inhibits cystitis-induced increased mechanical sensitivity in mice.

Structural, biochemical, and in vivo investigations of the threonine synthase from *Mycobacterium tuberculosis*.

Phospholipase A(2), reactive oxygen species, and lipid peroxidation in CNS pathologies.

Plasmalogen deficiency in cerebral adrenoleukodystrophy and its modulation by lovastatin.

Study of the effect of SH-groups on respiration and swelling of rat heart mitochondria.

Tracheal inflammatory response to bacterial cellulose dressing after surgical scarification in rabbits.

Molecular characterization of TRPA1 channel activation by cysteine-reactive inflammatory mediators.

Genes related to apoptosis predict necrosis of the liver as a phenotype observed in rats exposed to a compendium of hepatotoxicants.

Acetobacter indonesiensis pneumonia after lung transplant.

In vitro and ex vivo activity of new derivatives of acetohydroxyacid synthase inhibitors against Mycobacterium tuberculosis and non-tuberculous mycobacteria.

Presence of qnr gene in Escherichia coli and Klebsiella pneumoniae resistant to ciprofloxacin isolated from pediatric patients in China.

Electrokinetic supercharging for on-line preconcentration of seven non-steroidal anti-inflammatory drugs in water samples.

Histopathological alterations of Nile tilapia, Oreochromis niloticus in acute and subchronic alachlor exposure.

Inorganic phosphate stimulates the toxic effects of Tl⁺ in rat liver mitochondria.

Suppression of NO production and 8-nitroguanosine formation by phenol-containing endocrine-disrupting chemicals in LPS-stimulated macrophages: involvement of estrogen receptor-dependent or -independent pathways.

NF- κ B and caspases are involved in the hyaluronan and chondroitin-4-sulphate-exerted antioxidant effect in fibroblast cultures exposed to oxidative stress.

UVB-dependent generation of reactive oxygen species by catalase and IgG under UVB light: Inhibition by antioxidants and anti-inflammatory drugs.

The concept of neurogenic inflammation.

Dynamics of intracellular oxygen in PC12 Cells upon stimulation of neurotransmission.

Development of a human adipocyte model derived from human mesenchymal stem cells (hMSC) as a tool for toxicological studies on the action of TCDD.

The effect of suspended particles coated by humic acid on the toxicity of pharmaceuticals, estrogens, and phenolic compounds.

Enhancing effect of chlorinated organic solvents on histamine release and inflammatory mediator production.

Inhibition of estrogen-mediated uterine gene expression responses by dioxin.

2,3,7,8-Tetrachlorodibenzo-p-dioxin increases Bovine Herpesvirus type-1 (BHV-1) replication in Madin-Darby Bovine Kidney (MDBK) cells in vitro.

CD8+ T cells contribute to macrophage accumulation and airspace enlargement following repeated irritant exposure.

Immunosuppressive therapy in lung injury due to paraquat poisoning: a meta-analysis.

Case report: mixed cholestatic/hepatocellular liver injury induced by the herbicide quizalofop-p-ethyl.

In vitro atrazine exposure affects the phenotypic and functional maturation of dendritic cells.

[Increased expression of placenta growth factor in lung tissue of paraquat-induced rat pulmonary fibrosis model].

Pathophysiological aspects of cyclophosphamide and ifosfamide induced hemorrhagic cystitis; implication of reactive oxygen and nitrogen species as well as PARP activation.

Autophagic and lysosomal reactions to stress in the hepatopancreas of blue mussels.

[Immunosuppressive treatment due to paraquat poisoning].

Microglia-mediated neurotoxicity is inhibited by morphine through an opioid receptor-independent reduction of NADPH oxidase activity.

Pesticide poisoning.

Sodium salicylate prevents paraquat-induced apoptosis in the rat lung.

Integrating approaches to paraquat poisoning.

3,4-dichloropropionaniline suppresses normal macrophage function.

The concept of "aldehyde load" in neurodegenerative mechanisms: cytotoxicity of the polyamine degradation products hydrogen peroxide, acrolein, 3-aminopropanal, 3-acetamidopropanal and 4-aminobutanal in a retinal ganglion cell line.

Butachlor-induced acute toxic hepatitis.

Plasma cell gingivitis among herbal toothpaste users: a report of three cases.

Direct and indirect effects of the herbicides Glyphosate, Bentazone and MCPA on eelgrass (*Zostera marina*).

Full survival of paraquat-exposed rats after treatment with sodium salicylate.

Mouse model of paraquat-poisoned lungs and its gene expression profile.

Combined effects of herbicides on biomarkers reflecting immune-endocrine interactions in goldfish. Immune and antioxidant effects.

Rosiglitazone protects human neuroblastoma SH-SY5Y cells against MPP+ induced cytotoxicity via inhibition of mitochondrial dysfunction and ROS production.

Atrazine-induced reproductive tract alterations after transplacental and/or lactational exposure in male Long-Evans rats.

Microglial activation as a priming event leading to paraquat-induced dopaminergic cell degeneration.

Paraquat and maneb induced neurotoxicity.

Amifostine and glutathione prevent ifosfamide- and acrolein-induced hemorrhagic cystitis.

Fragrances as a cause of food allergy.

Reactive aldehyde modification of thioredoxin-1 activates early steps of inflammation and cell adhesion.

4-Hydroxynonenal, an endogenous aldehyde, causes pain and neurogenic inflammation through activation of the irritant receptor TRPA1.

Sensitization of TRPA1 by PAR2 contributes to the sensation of inflammatory pain.

Acute acrolein-induced cystitis in mice.

Prostacyclin prevents pulmonary endothelial cell apoptosis induced by cigarette smoke.

[Chemistry and toxicology of cigarette smoke in the lungs].

Binge ethanol administration enhances the MDMA-induced long-term 5-HT neurotoxicity in rat brain.

Suppression of age-related inflammatory NF-kappaB activation by cinnamaldehyde.

Induction of COX-2 by acrolein in rat lung epithelial cells.

Molecularly imprinted polymers for triazine herbicides prepared by multi-step swelling and polymerization method. Their application to the determination of methylthiotriazine herbicides in river water.

2-hydroxycinnamaldehyde inhibits SW620 colon cancer cell growth through AP-1 inactivation.

Measurement uncertainty arising from trueness of the analysis of two endocrine disruptors and their metabolites in environmental samples. Part II. Solid-phase extraction from environmental natural waters.

Paraquat increases cyanide-insensitive respiration in murine lung epithelial cells by activating an NAD(P)H:paraquat oxidoreductase: identification of the enzyme as thioredoxin reductase.

Targeting the methyl erythritol phosphate (MEP) pathway for novel antimalarial, antibacterial and herbicidal drug discovery: inhibition of 1-deoxy-D-xylulose-5-phosphate reductoisomerase (DXR) enzyme.

Agmatine transport into spinal nerve terminals is modulated by polyamine analogs.

Anti-inflammatory lipid mediator 15d-PGJ2 inhibits translation through inactivation of eIF4A.

Hepatitis B virus infection initiates with a large surface protein-dependent binding to heparan sulfate proteoglycans.

Effects of 4-chloro-2,6-bis-(2-hydroxyl-benzyl)-phenol on healing of skin wounds and growth of bacteria.

Mode of antibacterial action of a signal peptide, Pep27 from *Streptococcus pneumoniae*.

Porphyria cutanea tarda as rare cutaneous manifestation of hepatic metastases treated with interferon.

Role of AHR2 in the expression of novel cytochrome P450 1 family genes, cell cycle genes, and morphological defects in developing zebra fish exposed to 3,3',4,4',5-pentachlorobiphenyl or 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Arsenic neurotoxicity--a review.

Studies on the cell treatment conditions to elicit lipolytic responses from 3T3-L1 adipocytes to TCDD, 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Lafora-like ground-glass inclusions in hepatocytes of pediatric patients: a report of two cases.

Enhancement of allergic responses in vivo and in vitro by butylated hydroxytoluene.

Toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the developing male Wistar(Han) rat. I: No decrease in epididymal sperm count after a single acute dose.

Association between serum concentrations of persistent organic pollutants and self-reported cardiovascular disease prevalence: results from the National Health and Nutrition Examination Survey, 1999-2002.

Development of a conditional bioluminescent transplant model for TPM3-ALK-induced tumorigenesis as a tool to validate ALK-dependent cancer targeted therapy.

Aryl hydrocarbon receptor activation during influenza virus infection unveils a novel pathway of IFN-gamma production by phagocytic cells.

Oxidative stress kills human primary oligodendrocytes via neutral sphingomyelinase: implications for multiple sclerosis.

Positive associations of serum concentration of polychlorinated biphenyls or organochlorine pesticides with self-reported arthritis, especially rheumatoid type, in women.

Chemical contaminants, health indicators, and reproductive biomarker responses in fish from the Colorado River and its tributaries.

Association of allergic rhinitis with pesticide use among grape farmers in Crete, Greece.

Vitamin A deficiency (VAD), teratogenic, and surgical models of congenital diaphragmatic hernia (CDH).

Some clinico and histopathological changes in female goats experimentally exposed to dioxin.

Visual diagnosis: an adolescent who has fever, joint pain, a rash, and "blacking out" episodes.

Zinc supplementation of pregnant rats with adequate zinc nutriture suppresses immune functions in their offspring.

Antinuclear antibodies and bromoxynil exposure in a rural sample.

Iron therapy for renal anemia: how much needed, how much harmful?

Role of heat shock protein 70 in hepatic ischemia-reperfusion injury in mice.

Atmospheric photochemical transformations enhance 1,3-butadiene-induced inflammatory responses in human epithelial cells: The role of ozone and other photochemical degradation products.

Synthesis and in vitro evaluation of targeted tetracycline derivatives: effects on inhibition of matrix metalloproteinases.

Rickettsial and other tick-borne infections.

Occupational exposure to methyl iodide.

Hsp90 inhibitors suppress HCV replication in replicon cells and humanized liver mice.

[Arsenical poisoning: how and why to diagnose it].

P-cresylsulphate, the main in vivo metabolite of p-cresol, activates leucocyte free radical production.

Involvement of cannabinoid CB2 receptors in the IgE-mediated triphasic cutaneous reaction in mice.

Analgesic, antipyretic and anti-inflammatory properties of *Mezoneuron benthamianum* Baill (Caesalpinaceae).

Design and synthesis of some new thiazolo [3,2-b]-1,2,4-triazole-5(6H)-ones substituted with flurbiprofen as anti-inflammatory and analgesic agents.

[Hepatocyte mitochondrion respiratory chain in rats with experimental toxic hepatitis].

Decreased treatment failure rates following duodenal release ferrous glycine sulfate in iron deficiency anemia associated with autoimmune gastritis and *Helicobacter pylori* gastritis.

Is any link between inflammation and coronary artery ectasia?

Involvement of substance P and neurogenic inflammation in arsenic-induced early vascular dysfunction.

Effect of a topical antimicrobial paste on healing after extraction of molars in HIV positive patients: randomised controlled clinical trial.

Mitochondrial swelling impairs the transport of organelles in cerebellar granule neurons.

Platelet-endothelial cell adhesion molecule-1-directed endothelial targeting of superoxide dismutase alleviates oxidative stress caused by either extracellular or intracellular superoxide.

Alpha,beta-unsaturated aldehydes in cigarette smoke release inflammatory mediators from human macrophages.

Lipid peroxidation-induced DNA damage in cancer-prone inflammatory diseases: a review of published adduct types and levels in humans.

Potentiating effect of an endocrine disruptor, paronylphenol, on the generation of reactive oxygen species (ROS) in human venous blood -- association with the activation of signal transduction pathway.

Tumor necrosis factor-alpha modulates effects of aryl hydrocarbon receptor ligands on cell proliferation and expression of cytochrome P450 enzymes in rat liver "stem-like" cells.

Arsenite induced oxidative damage in mouse liver is associated with increased cytokeratin 18 expression.

Catalase takes part in rat liver mitochondria oxidative stress defense.

Thyroid ultrasound volume, structure and function after long-term high exposure of large population to polychlorinated biphenyls, pesticides and dioxin.

Functional ryanodine receptors are expressed by human microglia and THP-1 cells: Their possible involvement in modulation of neurotoxicity.

Evaluation of a diverse set of potential P1 carboxylic acid bioisosteres in hepatitis C virus NS3 protease inhibitors.

Glutamate release from activated microglia requires the oxidative burst and lipid peroxidation.

Resveratrol increases vascular oxidative stress resistance.

Selection of background electrolyte for CZE analysis by a chemometric approach. Part I. Separation of a mixture of acidic non-steroidal anti-inflammatory drugs.

Cigarette smoking as a risk factor for atherosclerosis and renal disease: novel pathogenic insights.

In vitro effects of reactive oxygen metabolites, with and without flunixin meglumine, on equine colonic mucosa.

Inhibitory and enhancing effects of piroxicam on whole blood chemiluminescence.

Uniform-sized molecularly imprinted polymer for metsulfuron-methyl by one-step swelling and polymerization method.

AccD6, a member of the Fas II locus, is a functional carboxyltransferase subunit of the acyl-coenzyme A carboxylase in *Mycobacterium tuberculosis*.

PLA2 mediated arachidonate free radicals: PLA2 inhibition and neutralization of free radicals by anti-oxidants--a new role as anti-inflammatory molecule.

The anti-apoptotic activity of albumin for endothelium is mediated by a partially cryptic protein domain and reduced by inhibitors of G-coupled protein and PI-3 kinase, but is independent of radical scavenging or bound lipid.

Increase in the toxic effects of Tl⁺ on isolated rat liver mitochondria in the presence of nonactin.

Use of model-based compartmental analysis to study vitamin A kinetics and metabolism.

Influence on mitochondria and cytotoxicity of different antibiotics administered in high concentrations on primary human osteoblasts and cell lines.

Lipoic acid as a novel treatment for Alzheimer's disease and related dementias.

Acrolein induces vasodilatation of rodent mesenteric bed via an EDHF-dependent mechanism.

Adverse effects of herbicide MCPA on dogs in a 90 day toxicological study.

Experience with paraquat poisoning in a respiratory intensive care unit in North India.

A model of hemorrhagic cystitis induced with acrolein in mice.

Molecular epidemiologic evidence for diabetogenic effects of dioxin exposure in U.S. Air force veterans of the Vietnam war.

Health status of Army Chemical Corps Vietnam veterans who sprayed defoliant in Vietnam.

P-glycoprotein induction: an antidotal pathway for paraquat-induced lung toxicity.

Single high dose dexamethasone treatment decreases the pathological score and increases the survival rate of paraquat-intoxicated rats.

DNA microarray analysis of pulmonary fibrosis three months after exposure to paraquat in rats.

Green tea extract inhibits paraquat-induced pulmonary fibrosis by suppression of oxidative stress and endothelin-I expression.

Evidence for a novel endocrine disruptor: the pesticide propanil requires the ovaries and steroid synthesis to enhance humoral immunity.

Cross-reactions in patch testing with ketoprofen, fragrance mix and cinnamic derivatives.

Histological changes and micronucleus induction in the zebra mussel *Dreissena polymorpha* after paraquat exposure.

NTP Technical Report on the comparative toxicity studies of allyl acetate (CAS No. 591-87-7), allyl alcohol (CAS No. 107-18-6) and acrolein (CAS No. 107-02-8) administered by gavage to F344/N rats and B6C3F1 mice.

Acute paraquat poisoning: report of a survival case following intake of a potential lethal dose.

Immunomodulatory effects of maternal atrazine exposure on male Balb/c mice.

Indomethacin induces small intestinal damage and inhibits amitrole-associated thyroid carcinogenesis in rats initiated with N-bis(2-hydroxypropyl)nitrosamine.

Protective effects of N-acetylcysteine treatment post acute paraquat intoxication in rats and in human lung epithelial cells.

[Propofol protecting rats from paraquat induced lung injury].

Acrolein is a mitochondrial toxin: effects on respiratory function and enzyme activities in isolated rat liver mitochondria.

Respiratory distress, pneumonic changes on chest X-ray, hypoxaemia, oral candidiasis in a homosexual male: not always *Pneumocystis carinii* pneumonia.

Endocrine disrupting chemical atrazine causes degranulation through Gq/11 protein-coupled neurosteroid receptor in mast cells.

TRPA1 mediates the inflammatory actions of environmental irritants and proalgesic agents.

Neuregulin 1-Beta cytoprotective role in AML 12 mouse hepatocytes exposed to pentachlorophenol.

Repeated pulse of methylprednisolone and cyclophosphamide with continuous dexamethasone therapy for patients with severe paraquat poisoning.

[Fatal poisoning caused by the ingestion of a concentrated solution of 2,4-D and MCPP].

Peroxiredoxin 6 gene-targeted mice show increased lung injury with paraquat-induced oxidative stress.

Atrazine increases ranavirus susceptibility in the tiger salamander, *Ambystoma tigrinum*.

Cinnamaldehyde reduces IL-1beta-induced cyclooxygenase-2 activity in rat cerebral microvascular endothelial cells.

[Therapeutic effect of somatostatin on acute respiratory distress syndrome in experimental rats].

Strategies for reducing the risk of Lyme borreliosis in North America.

Gene expression of cytokines and growth factors in the lungs after paraquat administration in mice.

Effects of alpha tocopherol and probucol supplements on allergen-induced airway inflammation and hyperresponsiveness in a mouse model of allergic asthma.

Acrolein generation stimulates hypercontraction in isolated human blood vessels.

2-methoxycinnamaldehyde reduces IL-1beta-induced prostaglandin production in rat cerebral endothelial cells.

Impaired intestinal iron absorption in Crohn's disease correlates with disease activity and markers of inflammation.

Novel selective orally active CRTH2 antagonists for allergic inflammation developed from in silico derived hits.

Mitochondrial reactive oxygen species and nitric oxide-mediated cancer cell apoptosis in 2-butylamino-2-demethoxyhyppocrellin B photodynamic treatment.

Serum dioxin, testosterone, and subsequent risk of benign prostatic hyperplasia: a prospective cohort study of Air Force veterans.

Environmental arsenic exposure and sputum metalloproteinase concentrations.

Coexistence of megaloblastic anemia and iron deficiency anemia in a young woman with chronic lymphocytic thyroiditis.

Today's epidemics in children: possible relations to environmental pollution and suggested preventive measures.

Protection against lethal challenge with *Streptococcus pneumoniae* is conferred by aryl hydrocarbon receptor activation but is not associated with an enhanced inflammatory response.

The uremic solute p-cresol decreases leukocyte transendothelial migration in vitro.

Aqueous extract of *Trigonella foenum-graecum* L. ameliorates additive urotoxicity of buthionine sulfoximine and cyclophosphamide in mice.

Ground-glass, polyglucosan-like hepatocellular inclusions: A "new" diagnostic entity.

Low-energy helium-neon laser induces locomotion of the immature melanoblasts and promotes melanogenesis of the more differentiated melanoblasts: recapitulation of vitiligo repigmentation in vitro.

Secreted protein-based reporter systems for monitoring inflammatory events: critical interference by endoplasmic reticulum stress.

Cell death, caspase activation, and HMGB1 release of porcine choroid plexus epithelial cells during *Streptococcus suis* infection in vitro.

HCV proteins increase expression of heme oxygenase-1 (HO-1) and decrease expression of Bach1 in human hepatoma cells.

Proinflammatory changes in human umbilical cord vein endothelial cells can be induced neither by native nor by modified CRP.

Safe use of hazardous chemicals.

NTP technical report on the toxicology and carcinogenesis studies of 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (Gavage studies).

Synchrotron microradiography study on acute lung injury of mouse caused by PM(2.5) aerosols.

Enhanced expression of plasma glutathione peroxidase in the thymus of mice treated with TCDD and its implication for TCDD-induced thymic atrophy.

Functional properties of ryanodine receptors carrying three amino acid substitutions identified in patients affected by multi-minicore disease and central core disease, expressed in immortalized lymphocytes.

NTP technical report on the toxicology and carcinogenesis studies of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (CAS No. 1746-01-6) in female Harlan Sprague-Dawley rats (Gavage Studies).

Effects of combined 17beta-estradiol with TCDD on secretion of chemokine IL-8 and expression of its receptor CXCR1 in endometriotic focus-associated cells in co-culture.

Bothrops moojeni myotoxin-II, a Lys49-phospholipase A2 homologue: an example of function versatility of snake venom proteins.

Free serum concentrations of the protein-bound retention solute p-cresol predict mortality in hemodialysis patients.

Age-dependent cell death and the role of ATP in hydrogen peroxide-induced apoptosis and necrosis.

An antioxidative and antiinflammatory agent for potential treatment of osteoarthritis from *Ecklonia cava*.

Semen quality in fertile US men in relation to geographical area and pesticide exposure.

Divergent risk of multiple sclerosis in two anabaptist communities in America.

Comment on "Pediatric fatality following ingestion of Dinitrophenol: postmortem identification of a 'dietary supplement'".

Molecular mechanisms of 2,3,7,8-tetrachlorodibenzo-p-dioxin cardiovascular embryotoxicity.

NTP toxicology and carcinogenesis studies of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (CAS No. 57465-28-8) in female Harlan Sprague-Dawley rats (Gavage Studies).

CXCL12 is displayed by rheumatoid endothelial cells through its basic amino-terminal motif on heparan sulfate proteoglycans.

Synthesis of 5-phenyl-1-(3-pyridyl)-1H-1,2,4-triazole-3-carboxylic acid derivatives of potential anti-inflammatory activity.

Understanding dioxin developmental toxicity using the zebrafish model.

Detection of equine herpesvirus type 1 using a real-time polymerase chain reaction.

A study of soluble HLA-G1 protecting porcine endothelial cells against human natural killer cell-mediated cytotoxicity.

Immunotoxic effects of chemicals: A matrix for occupational and environmental epidemiological studies.

Modeling inflammation-drug interactions in vitro: a rat Kupffer cell-hepatocyte coculture system.

Toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in developing red seabream (*Pagrus major*) embryo: an association of morphological deformities with AHR1, AHR2 and CYP1A expressions.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on leukocyte function-associated antigen-1 mediated splenocyte adhesion.

Influx of macrophages into livers of rats treated with hepatotoxicants (thioacetamide, allyl alcohol, D-galactosamine) induces expression of HSP25.

Liver glycogen bodies: ground-glass hepatocytes in transplanted patients.

Effects of weak acids, UV and proton motive force inhibitors on pyrazinamide activity against *Mycobacterium tuberculosis* in vitro.

The role of reduced iron powder in the fermentative production of tetanus toxin.

Impaired volume regulation is the mechanism of excitotoxic sensitization to complement.

Epidermal growth factor synergistically enhances interleukin-8 production in human gingival fibroblasts stimulated with interleukin-1beta.

Investigation on a new scleroglucan/borax hydrogel: structure and drug release.

Toxicology and carcinogenesis studies of a mixture of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (Cas No. 1746-01-6), 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4), and 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) in female Harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4) in female Harlan Sprague-Dawley rats (gavage studies).

Gene expression alterations in immune system pathways following exposure to immunosuppressive chemicals.

Roles of cellular activation and sulfated glycans in *Haemophilus somnus* adherence to bovine brain microvascular endothelial cells.

C-Reactive protein upregulates receptor for advanced glycation end products expression in human endothelial cells.

Regulation of the CYP1A1 gene by 2,3,7,8-tetrachlorodibenzo-p-dioxin but not by beta-naphthoflavone or 3-methylcholanthrene is altered in hepatitis C virus replicon-expressing cells.

The role of the aryl hydrocarbon receptor pathway in mediating synergistic developmental toxicity of polycyclic aromatic hydrocarbons to zebrafish.

Toll-like receptor priming sensitizes macrophages to proinflammatory cytokine gene induction by deoxynivalenol and other toxicants.

Crystal structure of *Mycobacterium tuberculosis* shikimate kinase in complex with shikimic acid and an ATP analogue.

A fatal case of saponated cresol ingestion.

Gene expression profile by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the liver of wild-type (AhR+/+) and aryl hydrocarbon receptor-deficient (AhR-/-) mice.

[Cytoprotective effects of heat shock protein-70 in bronchial epithelium against neutrophil elastase-induced cell injury].

Cortical microtubule arrays lose uniform alignment between cells and are oryzalin resistant in the *Arabidopsis* mutant, radially swollen 6.

[Public perceptions of the risk of Asian dust storms in Seoul and its metropolitan area].

Leukocytic myeloperoxidase-mediated formation of bromohydrins and lysophospholipids from unsaturated phosphatidylcholines.

Chitosan nanoparticles as a potential drug delivery system for the ocular surface: toxicity, uptake mechanism and in vivo tolerance.

Cytochrome P4501A is induced in endothelial cell lines from the kidney and lung of the bottlenose dolphin, *Tursiops truncatus*.

Acute depletion of reduced glutathione causes extensive carbonylation of rat brain proteins.

Identification of zebrafish ARNT1 homologs: 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity in the developing zebrafish requires ARNT1.

Urinary oxidative stress markers in young patients with type 1 diabetes.

Synthetic smooth muscle cell phenotype is associated with increased nicotinamide adenine dinucleotide phosphate oxidase activity: effect on collagen secretion.

Piceatannol upregulates endothelial heme oxygenase-1 expression via novel protein kinase C and tyrosine kinase pathways.

Regulation of bone sialoprotein (BSP) gene transcription by lipopolysaccharide.

Loss of mitochondrial membrane potential is associated with increase in mitochondrial volume: physiological role in neurones.

Basic fibroblast growth factor promotes melanocyte migration via increased expression of p125(FAK) on melanocytes.

Enterocyte cytoskeleton changes are crucial for enhanced translocation of nonpathogenic Escherichia coli across metabolically stressed gut epithelia.

CYP2A5-mediated activation and early ultrastructural changes in the olfactory mucosa: studies on 2,6-dichlorophenyl methylsulfone.

Comparative effects of the Roundup and glyphosate on mitochondrial oxidative phosphorylation.

The need for translational research on antidotes for pesticide poisoning.

Myeloperoxidase-generated oxidants modulate left ventricular remodeling but not infarct size after myocardial infarction.

Systemic exposure to paraquat and maneb models early Parkinson's disease in young adult rats.

[Toxicity effects of pentachlorophenol on Brachydanio rerio].

Acrolein in cigarette smoke inhibits T-cell responses.

The polysaccharide antibody response after Streptococcus pneumoniae vaccination is differentially enhanced or suppressed by 3,4-dichloropropionanilide and 2,4-dichlorophenoxyacetic acid.

Alachlor and carbaryl suppress lipopolysaccharide-induced iNOS expression by differentially inhibiting NF-kappaB activation.

Cyanamide-induced aplastic anemia.

Decreasing the oxidant stress from paraquat in isolated perfused rat lung using captopril and niacin.

Inhaled nitric oxide improves the survival of the paraquat-injured rats.

Drug-induced hypersensitivity syndrome due to cyanamide associated with multiple reactivation of human herpesviruses.

Mother and fetus both survive from severe paraquat intoxication.

Arsenic-induced micronuclei formation in mammalian cells and its counteraction by tea.

Long-lived alphaMUPA transgenic mice show reduced SOD2 expression, enhanced apoptosis and reduced susceptibility to the carcinogen dimethylhydrazine.

Regulation of constitutive neutrophil apoptosis by the alpha,beta-unsaturated aldehydes acrolein and 4-hydroxynonenal.

Acrolein impairs ATP binding cassette transporter A1-dependent cholesterol export from cells through site-specific modification of apolipoprotein A-I.

Ragweed (Ambrosia) progression and its health risks: will Switzerland resist this invasion?

Expression of gastrointestinal glutathione peroxidase is inversely correlated to the presence of hepatitis C virus subgenomic RNA in human liver cells.

Inhibition of NFkappaB activation and IL-8 expression in human bronchial epithelial cells by acrolein.

Modeling and predicting stress-induced immunosuppression in mice using blood parameters.

Chiral separation of beta-adrenergic antagonists, profen non-steroidal anti-inflammatory drugs and chlorophenoxypropionic acid herbicides using teicoplanin as the chiral selector in capillary liquid chromatography.

Characterization of acetohydroxyacid synthase from Mycobacterium tuberculosis and the identification of its new inhibitor from the screening of a chemical library.

Influence of smectite hydration and swelling on atrazine sorption behavior.

Acrolein induces oxidative stress in brain mitochondria.

Inhibitory effects of vitamin A on TCDD-induced cytochrome P-450 1A1 enzyme activity and expression.

Heart malformation is an early response to TCDD in embryonic zebrafish.

AMG 9810 [(E)-3-(4-t-butylphenyl)-N-(2,3-dihydrobenzo[b][1,4] dioxin-6-yl)acrylamide], a novel vanilloid receptor 1 (TRPV1) antagonist with antihyperalgesic properties.

Cell death induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (2,3,7,8-TCDD) in AtT-20 pituitary cells.

Tyrosine kinase inhibitors attenuate Japanese encephalitis virus-induced neurotoxicity.

[Experimental study on pharmacodynamical of Oxalis griffithii, a national medicine in Guizhou].

Effect of oral chronic intoxication with sodium arsenite on murine giardiasis.

Pediatric fatality following ingestion of dinitrophenol: postmortem identification of a "dietary supplement".

Olfactory epithelial metaplasia and hyperplasia in female Harlan Sprague-Dawley rats following chronic treatment with polychlorinated biphenyls.

The epidemiology of non-Hodgkin lymphoma.

Aryl hydrocarbon receptor-independent toxicity of weathered crude oil during fish development.

High prevalence of the plasmid-mediated quinolone resistance determinant qnrA in multidrug-resistant Enterobacteriaceae from blood cultures in Liverpool, UK.

Darbepoetin alfa treatment for post-renal transplantation anemia during pregnancy.

Effects of ferrous sulphate and non-ionic iron-polymaltose complex on markers of oxidative tissue damage in patients with inflammatory bowel disease.

Effect of pollen-mediated oxidative stress on immediate hypersensitivity reactions and late-phase inflammation in allergic conjunctivitis.

Nonsteroidal anti-inflammatory drugs differentially affect the heat shock response in cultured spinal cord cells.

Cutting edge: activation of the aryl hydrocarbon receptor by 2,3,7,8-tetrachlorodibenzo-p-dioxin generates a population of CD4⁺ CD25⁺ cells with characteristics of regulatory T cells.

[Study on the antipyretic, analgesic effects of qingkailing freeze-dried powder for injection and its antipyretic mechanism].

Bitterness and toxicity in wild yam (*Dioscorea* spp.) tubers of Nepal.

Ultrastructural findings in feline corneal sequestra.

Induction of the heat shock response in vivo inhibits NF-kappaB activity and protects murine liver from endotoxemia-induced injury.

Time profiles of peritoneal and renal clearances of different uremic solutes in incident peritoneal dialysis patients.

A histochemical and pathological study on the interrelationship between TCDD-induced AhR expression, AhR activation, and hepatotoxicity in mice.

Sodium methyldithiocarbamate inhibits MAP kinase activation through toll-like receptor 4, alters cytokine production by mouse peritoneal macrophages, and suppresses innate immunity.

Genomic damage and circulating AGE levels in patients undergoing daily versus standard haemodialysis.

Increased mortality associated with TCDD exposure in mice infected with influenza A virus is not due to severity of lung injury or alterations in Clara cell protein content.

Monitoring of hematological, inflammatory and oxidative reactions to acute oral iron exposure in human volunteers: preliminary screening for selection of potentially-responsive biomarkers.

Gene expression changes in human small airway epithelial cells exposed to Delta9-tetrahydrocannabinol.

Biomarkers of exposure, effect, and susceptibility of arsenic-induced health hazards in Taiwan.

Photosensitizing properties of 6-methoxy-2-naphthylacetic acid, the major metabolite of the phototoxic non-steroidal anti-inflammatory and analgesic drug nabumetone.

A study into the plaque-inhibitory activity of experimental toothpaste formulations containing antimicrobial agents.

Combined effects of protein kinase inhibitors and 5-fluorouracil on CEA expression in human colon cancer cells.

Induction of p53 by urokinase in lung epithelial cells.

One agent, many diseases: exposure-response data and comparative risks of different outcomes following silica exposure.

Activation of the aryl hydrocarbon receptor increases pulmonary neutrophilia and diminishes host resistance to influenza A virus.

NF-kappaB and not the MAPK signaling pathway regulates GADD45beta expression during acute inflammation.

Identification of three mutations in the Cu,Zn-superoxide dismutase (Cu,Zn-SOD) gene with familial amyotrophic lateral sclerosis: transduction of human Cu,Zn-SOD into PC12 cells by HIV-1 TAT protein basic domain.

Role of autoimmune gastritis, Helicobacter pylori and celiac disease in refractory or unexplained iron deficiency anemia.

Dioxin: a review of its environmental effects and its aryl hydrocarbon receptor biology.

Detection and precipitation of hepatitis B core antigen using a fusion bacteriophage.

Kupffer cell ablation improves hepatic microcirculation after trauma and sepsis.

Rubidium-87 magnetic resonance spectroscopy and imaging for analysis of mammalian K⁺ transport.

Heat shock protein 90 is required for increased DNA binding activity of activator protein-1, a heterodimer of Fos/JunD, in rheumatoid synovial cells under inflammatory stimuli.

Effects of PCB 126 on primary immune organs and thymocyte apoptosis in chicken embryos.

Good bug, bad bug: in the case of enteric inflammatory disease does the epithelium decide?

Efficacy of sublingual coseasonal immunotherapy with a monomeric allergoid in Cupressaceae pollen allergy--preliminary data.

Is oxidative stress the mechanism of blue sac disease in retene-exposed trout larvae?

Reaction orders for thermal mortality of third instars of Mexican fruit fly (Diptera: Tephritidae).

Non-specific effects of 4-chloro-m-cresol may cause calcium flux and respiratory burst in human neutrophils.

Protection of mitochondrial integrity from oxidative stress by selenium-containing glutathione transferase.

Differential inhibitory effect of long-chain acyl-CoA esters on succinate and glutamate transport into rat liver mitochondria and its possible implications for long-chain fatty acid oxidation defects.

Antimutagenic and anti-oxidant activities of the non-steroidal anti-inflammatory drug celecoxib.

Inhibition of IgE-dependent mouse triphasic cutaneous reaction by a boiling water fraction separated from mycelium of *Phellinus linteus*.

Differential effects of eicosapentaenoic and docosahexaenoic acids upon oxidant-stimulated release and uptake of arachidonic acid in human lymphoma U937 cells.

Aspects of dioxin toxicity are mediated by interleukin 1-like cytokines.

Cardiovascular gene expression profiles of dioxin exposure in zebrafish embryos.

Mechanisms of exocrine pancreatic toxicity induced by oral treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Harlan Sprague-Dawley Rats.

Platelet-activating factor increases VE-cadherin tyrosine phosphorylation in mouse endothelial cells and its association with the PtdIns3'-kinase.

Platelets can neutralize hydrogen peroxide in an acute toxicity model with cells involved in granulation tissue formation.

Inorganic arsenite alters macrophage generation from human peripheral blood monocytes.

Mechanism of TNF- α modulation of Caco-2 intestinal epithelial tight junction barrier: role of myosin light-chain kinase protein expression.

Optimisation of the coupled monoclonal antibody density for recombinant hepatitis B virus surface antigen immunopurification.

Separation and on-column preconcentration of some nonsteroidal anti-inflammatory drugs by microemulsion electrokinetic capillary chromatography using high-speed separations.

Attenuation of cyclosporine A toxicity by sublethal heat shock. Role of catalase.

Bacterial cellulose as a potential scaffold for tissue engineering of cartilage.

Scleroglucan: a versatile polysaccharide for modified drug delivery.

A new scleroglucan/borax hydrogel: swelling and drug release studies.

Severe acute hepatitis in a burns patient.

Chymase is activated in the pulmonary inflammation and fibrosis induced by paraquat in hamsters.

Glyphosate herbicide formulation: a potentially lethal ingestion.

Acute upper-airway obstruction in a two-year-old child who ingested an herbicide preparation.

Itraconazole-induced acute hepatitis in an agricultural worker: susceptibility or drug interaction?

The interactive effects of the antifouling herbicides Irgarol 1051 and Diuron on the seagrass *Zostera marina* (L.).

NTP toxicology and carcinogenesis studies of trans-cinnamaldehyde (CAS No. 14371-10-9) in F344/N rats and B6C3F1 mice (feed studies).

Multiple medical problems following agent orange exposure.

Glyphosate poisoning.

[A case of acute poisoning caused by the inhalation of a nonselective herbicide REBIN GT SC (butafenacil and glyphosate isopropylamine)].

Anandamide-evoked activation of vanilloid receptor 1 contributes to the development of bladder hyperreflexia and nociceptive transmission to spinal dorsal horn neurons in cystitis.

Vanin-1^{-/-} mice exhibit a glutathione-mediated tissue resistance to oxidative stress.

High levels of catalase and glutathione peroxidase activity dampen H₂O₂ signaling in human alveolar macrophages.

Impairment of the transcriptional responses to oxidative stress in the heart of aged C57BL/6 mice.

Noxious cold ion channel TRPA1 is activated by pungent compounds and bradykinin.

Acetaldehyde accumulation suppresses Kupffer cell release of TNF-Alpha and modifies acute hepatic inflammation in rats.

Impairment of small intestinal protein assimilation in patients with end-stage renal disease: extending the malnutrition-inflammation-atherosclerosis concept.

Structure of shikimate kinase from *Mycobacterium tuberculosis* reveals the binding of shikimic acid.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces suppressor of cytokine signaling 2 in murine B cells.

Arsenic exposure exacerbates atherosclerotic plaque formation and increases nitrotyrosine and leukotriene biosynthesis.

Pathogenesis of collagen-induced arthritis: modulation of disease by arthritogenic T-cell epitope location.

ARNT2 is not required for TCDD developmental toxicity in zebrafish.

Effect of ryanodine receptor mutations on interleukin-6 release and intracellular calcium homeostasis in human myotubes from malignant hyperthermia-susceptible individuals and patients affected by central core disease.

Heparanase uptake is mediated by cell membrane heparan sulfate proteoglycans.

Feasibility of "directly observed home-based twice-daily iron therapy" (DOHBIT) for management of anemia in rural patients: a pilot study.

Contact urticaria due to p-chloro-m-cresol.

Dying to be thin: a dinitrophenol related fatality.

Women and omega-3 Fatty acids.

Response of soluble transferrin receptor and iron-related parameters to iron supplementation in elite, iron-depleted, nonanemic female athletes.

Magnifying endoscopy with indigo carmine contrast for differential diagnosis of neoplastic and nonneoplastic colonic polyps.

Arsenic-induced alterations in the contact hypersensitivity response in Balb/c mice.

The topical application of 2,3,7,8-tetrachlorodibenzo-p-dioxin lacks skin tumor-promoting potency but induces hepatic injury and tumor necrosis factor-alpha expression in ICR male mice.

Aromatic hydrocarbon receptor status in the metabolism of xenobiotics under normal and pathophysiological conditions.

Intravesical resiniferatoxin decreases spinal c-fos expression and increases bladder volume to reflex micturition in rats with chronic inflamed urinary bladders.

Branch retinal artery occlusion: a complication of iron-deficiency anemia in a young adult with a rectal carcinoid.

Exocrine pancreatic pathology in female Harlan Sprague-Dawley rats after chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and dioxin-like compounds.

Ferrous sulfate does not affect mycophenolic acid pharmacokinetics in kidney transplant patients.

Fibroblast growth-stimulating activity of S100A9 (MRP-14).

NTP toxicology and carcinogenesis studies of triethanolamine (Cas No. 102-71-6) in B6C3F1 mice (dermal studies).

2,3,7,8-Tetrachlorodibenzo-p-dioxin inhibits regression of the common cardinal vein in developing zebrafish.

Decreased expression of voltage-gated K⁺ channels in pulmonary artery smooth muscles cells in nitrofen-induced congenital diaphragmatic hernia in rats.

Synthesis and analgesic evaluation of some 5-[beta-(10-phenothiazinyl)ethyl]-1-(acyl)-1,2,3,4-tetrazoles.

The role of B7 molecules in the cell contact-mediated suppression of T cell mitogenesis by immunosuppressive macrophages induced with mycobacterial infection.

Rat models of dementia based on reductions in regional glucose metabolism, cerebral blood flow and cytochrome oxidase activity.

Epithelia under metabolic stress perceive commensal bacteria as a threat.

Water permeability and TCDD-induced edema in zebrafish early-life stages.

Modulation of AhR-mediated CYP1A1 mRNA and EROD activities by 17beta-estradiol and dexamethasone in TCDD-induced H411E cells.

Interactions between 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and hypoxia signaling pathways in zebrafish: hypoxia decreases responses to TCDD in zebrafish embryos.

Role of capsaicin-sensitive afferent nerves in different models of gastric inflammation in rats.

Intra-strain dioxin sensitivity and morphometric effects in swim-up rainbow trout (*Oncorhynchus mykiss*).

[Study on a new antarthritic injection--O-carboxymethyl chitosan].

Comparison of the hemolytic activity of isopropoxyethanol and phenoxyethanol.

Activation of inflammatory mediators and potential role of ah-receptor ligands in foam cell formation.

Antibodies against the CB10 fragment of type II collagen in rheumatoid arthritis.

Detection of *Erysipelothrix rhusiopathiae* in clinical and environmental samples.

Analgesic and anti-inflammatory activities evaluation of (-)-O-acetyl, (-)-O-methyl, (-)-O-dimethylethylamine cubebin and their preparation from (-)-cubebin.

Regulation by sulfanylurea receptor type 1 of a non-selective cation channel involved in cytotoxic edema of reactive astrocytes.

Comparison between exhaled and sputum oxidative stress biomarkers in chronic airway inflammation.

Human bronchial smooth muscle cell proliferation via thromboxane A2 receptor.

EGR1 is a novel target for AhR agonists in human lung epithelial cells.

Effects of 1,3-butadiene, isoprene, and their photochemical degradation products on human lung cells.

Matrix metalloproteinase-1 and tissue inhibitor of metalloproteinase-1 production in human gingival fibroblasts: the role of protein kinase C.

Redox modulation of chromatin remodeling: impact on histone acetylation and deacetylation, NF-kappaB and pro-inflammatory gene expression.

2,3,7,8-Tetrachlorodibenzo-p-dioxin activation of the aryl hydrocarbon receptor/aryl hydrocarbon receptor nuclear translocator pathway causes developmental toxicity through a CYP1A-independent mechanism in zebrafish.

The sphingomyelin/ceramide pathway is involved in ERK1/2 phosphorylation, cell proliferation, and uPAR overexpression induced by tissue-type plasminogen activator.

Src kinase mediates angiotensin II-dependent increase in pulmonary endothelial nitric oxide synthase.

Interleukin-1 inhibits voltage-dependent P/Q-type Ca²⁺ channel associated with the inhibition of the rise of intracellular free Ca²⁺ concentration and catecholamine release in adrenal chromaffin cells.

A novel mechanism of regulation of cardiac contractility by mitochondrial functional state.

p38 Mitogen-activated protein kinase mediates synergistic induction of inducible nitric-oxide synthase by lipopolysaccharide and interferon-gamma through signal transducer and activator of transcription 1 Ser727 phosphorylation in murine aortic endothelial cells.

The low molecular weight heparan sulfate-mimetic, PI-88, inhibits cell-to-cell spread of herpes simplex virus.

Neutrophils contribute to endotoxin enhancement of allyl alcohol hepatotoxicity.

Presence and functional activity of the aryl hydrocarbon receptor in isolated murine cerebral vascular endothelial cells and astrocytes.

Activation of the aryl hydrocarbon receptor diminishes the memory response to homotypic influenza virus infection but does not impair host resistance.

Cytochrome P450-dependent toxicity of environmental polycyclic aromatic hydrocarbons towards human macrophages.

Developmental exposure to the potent aryl hydrocarbon receptor agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin Impairs the cell-mediated immune response to infection with influenza a virus, but enhances elements of innate immunity.

Enhancing effect of the endocrine disruptor para-nonylphenol on the generation of reactive oxygen species in human blood neutrophils.

CYP1A2 is not required for 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immunosuppression.

Polycyclic aromatic hydrocarbon increases mRNA level for interleukin 1 beta in human fibroblast-like synoviocyte line via aryl hydrocarbon receptor.

Divergent roles of hepatitis B virus X-associated protein 2 (XAP2) in human versus mouse Ah receptor complexes.

Potent, selective and cell-mediated inhibition of human herpesvirus 6 at an early stage of viral replication by the non-nucleoside compound CMV423.

Effect of acute exposure to arsenic on formalin-induced nociception and tramadol-mediated antinociception in mice.

Toxicity, histopathological alterations and immunohistochemical CYP1A induction in the early life stages of the seabream, *Sparus aurata*, following waterborne exposure to B(a)P and TCDD.

Cerebrosides and a monoacylmonogalactosylglycerol from *Clinacanthus nutans*.

Urokinase receptor mRNA stability involves tyrosine phosphorylation in lung epithelial cells.

'Proximal-type' epithelioid sarcoma: is Agent Orange still at large?

Prospects for treatment of paraquat-induced lung fibrosis with immunosuppressive drugs and the need for better prediction of outcome: a systematic review.

The Metropolitan Atlanta Congenital Defects Program: 35 years of birth defects surveillance at the Centers for Disease Control and Prevention.

The herbicide dicamba (2-methoxy-3,6-dichlorobenzoic acid) interacts with mitochondrial bioenergetic functions.

Consecutive administration of paraquat to rats induces enhanced cholesterol peroxidation and lung injury.

[Correction of immunodeficiency status caused by herbicide 2,4-D in experiment].

Identification and quantitation of xenobiotics by ¹H NMR spectroscopy in poisoning cases.

Cytotoxic effects of the herbicide 2,4-dichlorophenoxyacetic acid in HepG2 cells.

Lung function and airway inflammation in rats following exposure to combustion products of carbon-graphite/epoxy composite material: comparison to a rodent model of acute lung injury.

Combined initial cyclophosphamide with repeated methylprednisolone pulse therapy for severe paraquat poisoning from dermal exposure.

[Comparative analysis of disorders in duodenal lymphoid tissue of mice treated with azathioprine and herbicide 2,4-dichlorophenoxyacetic acid and their correction by plant and animal origin remedies].

Pentachlorophenol poisoning.

Methylprednisolone effects on oxygenation and histology in a rat model of acute lung injury.

Comparative effects of herbicide dicamba and related compound on plant mitochondrial bioenergetics.

Focal transmural necrotic tracheitis in commercial meat turkeys.

[Effect of guizhi tang and its active components on the fever induced by EP3 agonist].

Cigarette smoke triggers macrophage adhesion and activation: role of lipid peroxidation products and scavenger receptor.

Formation of advanced glycosylation end products and oxidative stress in young patients with type 1 diabetes.

Alcohol potentiates hepatitis C virus replicon expression.

Oxidative stress and altered antioxidant defenses in children with acute exacerbation of atopic dermatitis.

The selenoprotein GPX4 is essential for mouse development and protects from radiation and oxidative damage insults.

Structural bioinformatics study of EPSP synthase from *Mycobacterium tuberculosis*.

FK506 attenuates 1-methyl-4-phenylpyridinium- and 3-nitropropionic acid-evoked inhibition of kynurenic acid synthesis in rat cortical slices.

Tolerogenic role of Kupffer cells in allergic reactions.

Novel 3,3a,4,5,6,7-hexahydroindazole and arylthiazolylpyrazoline derivatives as anti-inflammatory agents.

Mild hypothermia reduces expression of heat shock protein 60 in leukocytes from severely head-injured patients.

Dioxin and cancer: a critical review.

Connective molecular pathways of experimental bladder inflammation.

Fewer CTL, not enhanced NK cells, are sufficient for viral clearance from the lungs of immunocompromised mice.

Immunoglobulin E is not required for but enhances airway inflammation and hyperresponsiveness.

Arsenic exposure accelerates atherogenesis in apolipoprotein E(-/-) mice.

T cell receptor transgenic mice provide novel insights into understanding cellular targets of TCDD: suppression of antibody production, but not the response of CD8(+) T cells, during infection with influenza virus.

Cell proliferation arrest within intrathymic lymphocyte progenitor cells causes thymic atrophy mediated by the aryl hydrocarbon receptor.

Aryl hydrocarbon receptor 2 mediates 2,3,7,8-tetrachlorodibenzo-p-dioxin developmental toxicity in zebrafish.

2,3,7,8-tetrachlorodibenzo-p-dioxin selectively enhances spontaneous IgE production in B cells from atopic patients.

Comparative study on the effects of ointments of tinidazole, hydrocortisone and clobetasol on animal models for inflammatory dermatitis in mice.

Mechanisms of TCDD-induced abnormalities and embryo lethality in white leghorn chickens.

The effect of ingestion of ferrous sulfate on the absorption of oral methotrexate in patients with rheumatoid arthritis.

Medication-induced oesophageal disorders.

Angiotensin II phosphorylation of extracellular signal-regulated kinases in rat anterior pituitary cells.

MCSF expression is induced in healing myocardial infarcts and may regulate monocyte and endothelial cell phenotype.

Increased expression of ICAM-1 and VCAM-1 in the lung of nitrofen-induced congenital diaphragmatic hernia in rats.

Examining the relationship between impaired host resistance and altered immune function in mice treated with TCDD.

[Neuroimaging abnormalities in parkinsonism: study of five cases].

Induction of cytochrome P450 1A is required for circulation failure and edema by 2,3,7,8-tetrachlorodibenzo-p-dioxin in zebrafish.

Human health effects of sodium azide exposure: a literature review and analysis.

Human RPE-monocyte co-culture induces chemokine gene expression through activation of MAPK and NIK cascade.

Effects of metronidazole and tinidazole ointments on models for inflammatory dermatitis in mice.

123I-Interleukin-2: biochemical characterization and in vivo use for imaging autoimmune diseases.

Increased expression of IgE-dependent histamine-releasing factor in endometriotic implants.

Neurokinin 1 receptors and neprilysin modulation of mouse bladder gene regulation.

Identification and characterization of KvgAS, a two-component system in *Klebsiella pneumoniae* CG43.

Hyperoxia prevents carrageenan-induced enlargement of functional residual lung capacity in rats.

Antiperoxidative, anti-inflammatory, and antimutagenic activities of ethanol extract of the mycelium of *Ganoderma lucidum* occurring in South India.

Crosslinking of fibrinogen and fibronectin by free radicals: a possible initial step in adhesion formation in osteoarthritis of the temporomandibular joint.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced accumulation of biliverdin and hepatic peliosis in rats.

Ryanodine receptor antibodies in myasthenia gravis: epitope mapping and effect on calcium release in vitro.

Iron supplementation improves iron status and reduces morbidity in children with or without upper respiratory tract infections: a randomized controlled study in Colombo, Sri Lanka.

Involvement of protein tyrosine kinase in Toll-like receptor 4-mediated NF-kappa B activation in human peripheral blood monocytes.

Oxidative stress-induced cell death of human oral neutrophils.

Disruption of cellulose synthesis by isoxaben causes tip swelling and disorganizes cortical microtubules in elongating conifer pollen tubes.

Myeloperoxidase-induced formation of chlorohydrins and lysophospholipids from unsaturated phosphatidylcholines.

Bradykinin B2 receptor-mediated proliferation via activation of the Ras/Raf/MEK/MAPK pathway in rat vascular smooth muscle cells.

Subcellular localization of herpes simplex virus type 1 UL51 protein and role of palmitoylation in Golgi apparatus targeting.

Tetanus toxin abolishes exocytosis of ROMK1 induced by inhibition of protein tyrosine kinase.

3-methylcholanthrene activates human immunodeficiency virus type 1 replication via aryl hydrocarbon receptor.

Aryl hydrocarbon receptor (AhR) agonists suppress interleukin-6 expression by bone marrow stromal cells: an immunotoxicology study.

TCDD-induced apoptosis in EL-4 cells deficient of the aryl hydrocarbon receptor and down-regulation of IGFBP-6 prevented the apoptotic cell death.

The role of hepatocellular oxidative stress in Kupffer cell activation during 1,2-dichlorobenzene-induced hepatotoxicity.

Cellular binding of hepatitis C virus envelope glycoprotein E2 requires cell surface heparan sulfate.

The requirement of ammonium or other cations linked with p-cresol sulfate for cross-reactivity with a peptide of myelin basic protein.

Toxicogenomic effects of marine brevetoxins in liver and brain of mouse.

Thallium induces opening of the mitochondrial permeability transition pore in the inner membrane of rat liver mitochondria.

Structural and rheological characterization of Scleroglucan/borax hydrogel for drug delivery.

Activation and inhibition of cellular calcium and tyrosine kinase signaling pathways identify targets of the HBx protein involved in hepatitis B virus replication.

Scleroglucan/borax: characterization of a novel hydrogel system suitable for drug delivery.

Activation of protein kinase C by phorbol esters in human macrophages reduces the metabolism of modified LDL by down-regulation of scavenger receptor activity.

Corneal IL-8 expression following adenovirus infection is mediated by c-Src activation in human corneal fibroblasts.

Mutation or drug-dependent microtubule disruption causes radial swelling without altering parallel cellulose microfibril deposition in Arabidopsis root cells.

Reactive oxygen species mediate endotoxin-induced human dermal endothelial NF-kappaB activation.

Leiomyosarcoma of urinary bladder following cyclophosphamide therapy: report of two cases.

Combined methylprednisolone and dexamethasone therapy for paraquat poisoning.

Differential heat shock gene hsp70-1 response to toxicants revealed by in vivo study of lungs in transgenic mice.

Effects of early embryonal exposure to dexamethasone on malformations of neural-crest derivatives induced by nitrofen in rats.

Methylprednisolone does not enhance the surfactant effects on oxygenation and histology in paraquat-induced rat lung injury.

[An unusual case of toxic hepatitis from paraquat].

Teratogenic effects of amitraz, 2,4-dimethylaniline, and paraquat on developing frog (*Xenopus*) embryos.

Pathways involved in mild gastrointestinal inflammation induced by a low level exposure to a food contaminant.

[Effects of pesticides on cytokines production by human peripheral blood mononuclear cells--fenitrothion and glyphosate].

Virulence of *Streptococcus pneumoniae*: PsaA mutants are hypersensitive to oxidative stress.

Developmental disorders in embryos of the frog *Xenopus laevis* induced by chloroacetanilide herbicides and their degradation products.

[Herbicides and congenital malformations in Meta, Colombia].

Changes in urinary bladder cytokine mRNA and protein after cyclophosphamide-induced cystitis.

Male rats exposed to linuron in utero exhibit permanent changes in anogenital distance, nipple retention, and epididymal malformations that result in subsequent testicular atrophy.

The role of sodium cromolyn in treatment of paraquat-induced pulmonary fibrosis in rat.

Is *Lolium* pollen from an urban environment more allergenic than rural pollen?

A review on usnic acid, an interesting natural compound.

Lipid peroxidation contributes to immune reactions associated with alcoholic liver disease.

Chemokine-independent preference for T-helper-1 cells in transendothelial migration.

Allergenic relevance of *Cupressus arizonica* pollen extract and biological characterization of the allergoid.

Immunologic effects of dioxin: new results from Seveso and comparison with other studies.

P-cresol, a uremic toxin, decreases endothelial cell response to inflammatory cytokines.

Activation of mitogen-activated protein kinases during granulocyte apoptosis in patients with severe sepsis.

Role of bioavailable iron in coal dust-induced activation of activator protein-1 and nuclear factor of activated T cells: difference between Pennsylvania and Utah coal dusts.

[Photocontact dermatitis due to ketoprofen and photosensitization to tetrachlorosalicylanide and to Fenticlor(R)].

Indirect effects of oral tolerance to ovalbumin interfere with the immune responses triggered by *Schistosoma mansoni* eggs.

Arsenic induces peroxynitrite generation and cyclooxygenase-2 protein expression in aortic endothelial cells: possible role in atherosclerosis.

Effects of chronic dietary exposure to environmentally relevant concentrations to 2,3,7,8-tetrachlorodibenzo-p-dioxin on survival, growth, reproduction and biochemical responses of female rainbow trout (*Oncorhynchus mykiss*).

The Belgian PCB/dioxin incident: a critical review of health risks evaluations.

Antipruritic and antiinflammatory effects of aqueous extract from Si-Wu-Tang.

Mortality in dioxin-exposed mice infected with influenza: mitochondrial toxicity (reye's-like syndrome) versus enhanced inflammation as the mode of action.

Dioxin stimulates RANTES expression in an in-vitro model of endometriosis.

Streptococcus sanguis modulates type II collagen-induced arthritis in DBA/1J mice.

Laboratory safety.

Entacapone does not induce conformational changes in liver mitochondria or skeletal muscle in vivo.

Induction of endolymphatic hydrops by directly infused monoclonal antibody against type II collagen CB11 peptide.

Endothelial PAS domain protein 1 (EPAS1) induces adrenomedullin gene expression in cardiac myocytes: role of EPAS1 in an inflammatory response in cardiac myocytes.

The stress response decreases NF-kappaB activation in liver of endotoxemic mice.

Platelet endothelial cell adhesion molecule-1 (PECAM-1/CD31) acts as a regulator of B-cell development, B-cell antigen receptor (BCR)-mediated activation, and autoimmune disease.

Flavopiridol inhibits vascular endothelial growth factor production induced by hypoxia or picolinic acid in human neuroblastoma.

Type II collagen deposition in cruciate ligament precedes osteoarthritis in the guinea pig knee.

Increased vascular endothelial growth factor peptide and gene expression in hypoplastic lung in nitrofen induced congenital diaphragmatic hernia in rats.

Proinflammatory and Th1 cytokine alterations following ultraviolet radiation enhancement of disease due to influenza infection in mice.

Tumor necrosis factor-alpha and interleukin-1beta mediate the production of nitric oxide involved in the pathogenesis of ifosfamide induced hemorrhagic cystitis in mice.

A proteasome inhibitor confers cardioprotection.

Syndrome of iron pill aspiration.

Up-regulated expression of genes encoding Hrk and IL-3R beta subunit by TCDD in vivo and in vitro.

[Immunoenzyme analysis of natural antibodies to endogenous bioregulators in patients with systemic lupus erythematosus].

[Acute effects of methyl bromide gas in rats and mice--studies on survival time].

Heat shock response reduces intestinal permeability in septic mice: potential role of interleukin-10.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on trace elements, inflammation and viral clearance in the myocardium during coxsackievirus B3 infection in mice.

Skin irritation typing and grading based on laser Doppler perfusion imaging.

Tumor necrosis factor alpha stimulates invasion of Src-activated intestinal cells.

Recent advances in understanding the mechanisms of TCDD immunotoxicity.

Bactericidal activities of commonly used antiseptics against multidrug-resistant mycobacterium tuberculosis.

Phenol toxicity and conjugation in human colonic epithelial cells.

Extracellular signal-regulated kinases and G protein-coupled receptors in megakaryocytic human erythroleukemia cells: selective activation, differential regulation, and dissociation from mitogenesis.

H₂O₂ activates ryanodine receptor but has little effect on recovery of releasable Ca²⁺ content after fatigue.

Regulation of directional expansion by the cortical microtubule array in roots of *Lemna minor*.

Extravascular collagen in the human epileptic brain: a potential substrate for aberrant cell migration in cases of temporal lobe epilepsy.

Impairment of mycophenolate mofetil absorption by calcium polycarbophil.

Mycosin-1, a subtilisin-like serine protease of *Mycobacterium tuberculosis*, is cell wall-associated and expressed during infection of macrophages.

Ketoprofen-induced intestinal permeability changes studied in side-by-side diffusion cells.

Mutant alleles of *Arabidopsis* RADIALLY SWOLLEN 4 and 7 reduce growth anisotropy without altering the transverse orientation of cortical microtubules or cellulose microfibrils.

Atypical mechanism of NF- κ B activation during reoxygenation stress in microvascular endothelium: a role for tyrosine kinases.

Arsenite inhibits interleukin-6 production in human intestinal epithelial cells by down-regulating nuclear factor- κ B activity.

Cyclosporin A-sensitive permeability transition pore is involved in Cd(2+)-induced dysfunction of isolated rat liver mitochondria: doubts no more.

Oxidative stress and gene transcription in asthma and chronic obstructive pulmonary disease: antioxidant therapeutic targets.

Tumor necrosis factor alpha (TNF- α)-induced prostaglandin E₂ release is mediated by the activation of cyclooxygenase-2 (COX-2) transcription via NF κ B in human gingival fibroblasts.

Efficacy of common antiseptics against multidrug-resistant *Mycobacterium tuberculosis*.

Hypochlorous acid inhibits glutathione S-conjugate export from human erythrocytes.

The effect of oxidative stress on ERalpha and ERbeta expression.

Signal pathways involved in the production of MMP-1 and MMP-3 in human gingival fibroblasts.

Simple fibroblast-based assay for screening of new antimicrobial drugs against Mycobacterium tuberculosis.

Urokinase induces its own expression in Beas2B lung epithelial cells.

Molecular model of shikimate kinase from Mycobacterium tuberculosis.

[Changes in the level of short-chain volatile fatty acids and their aldehydes in oral air and fluid during inflammation of oral tissues].

Activation of Wiskott-Aldrich syndrome protein and its association with other proteins by stromal cell-derived factor-1alpha is associated with cell migration in a T-lymphocyte line.

Effects of glucocorticoids on generation of reactive oxygen species in platelets.

Rac GTPase activity is essential for lipopolysaccharide signaling to extracellular signal-regulated kinase and p38 MAP kinase activation in rat-2 fibroblasts.

Crystal structure of shikimate kinase from Mycobacterium tuberculosis reveals the dynamic role of the LID domain in catalysis.

Generation of hydroxyl radicals mediated by streptozotocin in pancreatic islets of mice in vitro.

Enantioseparation of novel COX-2 anti-inflammatory drugs by capillary electrophoresis using single and dual cyclodextrin systems.

Retardation of organic contaminants in natural fractures in chalk.

Circulating lysozyme and hepatic CYP1A activities during a chronic dietary exposure to tributyltin (TBT) and 3,3',4,4',5-pentachlorobiphenyl (PCB-126) mixtures in channel catfish, *Ictalurus punctatus*.

Soluble fibrinogen modulates neutrophil functionality through the activation of an extracellular signal-regulated kinase-dependent pathway.

HSP90 inhibitors alter capsaicin- and ATP-induced currents in rat dorsal root ganglion neurons.

The production of macrophage inflammatory protein-2 induced by soluble intercellular adhesion molecule-1 in mouse astrocytes is mediated by src tyrosine kinases and p42/44 mitogen-activated protein kinase.

Red wine polyphenols increase calcium in bovine aortic endothelial cells: a basis to elucidate signalling pathways leading to nitric oxide production.

Thrombin-stimulated cell proliferation mediated through activation of Ras/Raf/MEK/MAPK pathway in canine cultured tracheal smooth muscle cells.

Intracellular Ca²⁺ homeostatic regulation and 4-hydroxynonenal-induced aortic endothelial dysfunction.

TNF-alpha suppresses bone sialoprotein (BSP) expression in ROS17/2.8 cells.

Neoductular progenitor cells regenerate hepatocytes in severely damaged liver: a comparative ultrastructural study.

The Belgian PCB/dioxin incident: analysis of the food chain contamination and health risk evaluation.

Ethanol metabolism and transcription factor activation in pancreatic acinar cells in rats.

Cytokine-activated Jak-2 is involved in inducible nitric oxide synthase expression independent from NF-kappaB activation in vascular smooth muscle cells.

Surfactant and corticosteroid effects on lung function in a rat model of acute lung injury.

Induction of sister chromatid exchanges by 2,4-dichlorophenoxyacetic acid in somatic and germ cells of mice exposed in vivo.

Assessment of pentachlorophenol-exposed timber workers using a test-of-poisoning model.

Differential effects of trivalent and pentavalent arsenicals on cell proliferation and cytokine secretion in normal human epidermal keratinocytes.

Effects of atrazine on embryos, larvae, and adults of anuran amphibians.

The role of nitric oxide in paraquat-induced cytotoxicity in the human A549 lung carcinoma cell line.

Effects of diquat, an aquatic herbicide, on the development of mallard embryos.

Reproductive toxicity of MCPA (4-chloro-2-methylphenoxyacetic acid) in the rat.

Inhibition of neutrophil apoptosis by acrolein: a mechanism of tobacco-related lung disease?

Expression of inducible nitric oxide synthase in primary culture of rat bladder smooth muscle cells by plasma from cyclophosphamide-treated rats.

Influence of caffeine on allyl alcohol-induced hepatotoxicity in rats. I. In vivo study.

Propanil inhibits tumor necrosis factor-alpha production by reducing nuclear levels of the transcription factor nuclear factor-kappaB in the macrophage cell line ic-21.

Total synthesis of the immunosuppressant FR901483 via an amidoacrolein cycloaddition.

Cigarette smoke impairs neutrophil respiratory burst activation by aldehyde-induced thiol modifications.

Role of the epithelium in opposing H₂O₂-induced modulation of acetylcholine-induced contractions in rabbit intrapulmonary bronchiole.

Nontraditional microbial bioactive metabolites.

Role of tyrosine phosphorylation in ligand-independent sequestration of CXCR4 in human primary monocytes-macrophages.

DJ-1 is an indicator for endogenous reactive oxygen species elicited by endotoxin.

Environmental contaminants as etiologic factors for diabetes.

Macrophage migration inhibitory factor as a redox-sensitive cytokine in cardiac myocytes.

Mutations to Gly2370, Gly2373 or Gly2375 in malignant hyperthermia domain 2 decrease caffeine and cresol sensitivity of the rabbit skeletal-muscle Ca²⁺-release channel (ryanodine receptor isoform 1).

Non-Hodgkin's lymphoma and specific pesticide exposures in men: cross-Canada study of pesticides and health.

Identification of genes induced in vivo during *Klebsiella pneumoniae* CG43 infection.

Mast cell regulation of inflammation and gene expression during antigen-induced bladder inflammation in mice.

[Epidemiology of soft tissue sarcomas in adults].

A dot-immunobinding assay (dot-Iba) for rapid diagnosis of pulmonary tuberculosis.

Secretion of gelatinases and activation of gelatinase A (MMP-2) by human rheumatoid synovial fibroblasts.

T-cell-based immunity counteracts the potential toxicity of glutamate in the central nervous system.

[Pseudo-Acanthosis nigricans in a 12 year old boy after kidney transplantation].

Effects of calorie restriction on polymicrobial peritonitis induced by cecum ligation and puncture in young C57BL/6 mice.

Cell swelling and a nonselective cation channel regulated by internal Ca²⁺ and ATP in native reactive astrocytes from adult rat brain.

Effects of chemical modifications of crotoxin B, the phospholipase A(2) subunit of crotoxin from *Crotalus durissus terrificus* snake venom, on its enzymatic and pharmacological activities.

[CD7(+) acute myeloid leukemia (M0) associated with a mediastinal bulky mass lesion].

Iron supplementation inhibits cough associated with ACE inhibitors.

Oral administration of collagen conjugated with cholera toxin induces tolerance to type II collagen and suppresses chondritis in an animal model of autoimmune ear disease.

Suppression of allergic immune responses to house dust mite (HDM) in rats exposed to 2,3,7,8-TCDD.

The hepatitis B virus HBx protein induces adherens junction disruption in a src-dependent manner.

Cartilage and bone biological markers in the synovial fluid of osteoarthritic patients after hyaluronan injections in the knee.

Chronic toxicity of dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin to mink.

Collagen-induced arthritis.

Etiologic factors in soft tissue sarcomas.

Association of reversible alopecia with occupational topical exposure to common borax-containing solutions.

Dissociation of enzymatic and pharmacological properties of piratoxins-I and -III, two myotoxic phospholipases A2 from Bothrops pirajai snake venom.

A Kampo formulation: Byakko-ka-ninjin-to (Bai-Hu-Jia-Ren-Sheng-Tang) inhibits IgE-mediated triphasic skin reaction in mice: the role of its constituents in expression of the efficacy.

Effect of diesel exhaust particles and their components on the allergen-specific IgE and IgG1 response in mice.

Characterization of endogenous amino acid efflux from hippocampal slices during chemically-induced ischemia.

Ethanol activates NFkappaB DNA binding and p56lck protein tyrosine kinase in human osteoblast-like cells.

A study to assess the plaque inhibitory action of a new zinc citrate toothpaste formulation.

Successful repigmentation of six cases of herpes-labialis-induced lip leucoderma by micropigmentation.

Thyroid hormones, acute iron overload and the pathogenesis of cloudy swelling.

Pesticides as a cause of occupational skin diseases in farmers.

[Volatile compounds in air and oral saliva in healthy people, and in periodontitis and gingivitis patients].

Effect of sodium arsenite on iNOS expression and vascular hyporeactivity associated with cecal ligation and puncture in the rat.

Analysis of collagenase-cleavage of type II collagen using a neoepitope ELISA.

The effect of beta-carotene on the expression of interleukin-6 and heme oxygenase-1 in UV-irradiated human skin fibroblasts in vitro.

B-subunit of phosphate-specific transporter from Mycobacterium tuberculosis is a thermostable ATPase.

A study of the effects of indometacin on liver mitochondria from rats, mice and humans.

Effects of indomethacin on energy metabolism in rat and human jejunal tissue in vitro.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) inhibition of coronary development is preceded by a decrease in myocyte proliferation and an increase in cardiac apoptosis.

Identification of biochemical pathways for the metabolism of oxidized low-density lipoprotein derived aldehyde-4-hydroxy trans-2-nonenal in vascular smooth muscle cells.

Functional expression of P-glycoprotein in rat brain microglia.

Formation of spiroiminodihydantoin nucleoside by reaction of 8-oxo-7,8-dihydro-2'-deoxyguanosine with hypochlorous acid or a myeloperoxidase-H(2)O(2)-Cl(-) system.

Bivalent metal ions modulate Cd²⁺ effects on isolated rat liver mitochondria.

Ascorbate and low concentrations of FeSO₄ induce Ca²⁺-dependent pore in rat liver mitochondria.

TAT peptide on the surface of liposomes affords their efficient intracellular delivery even at low temperature and in the presence of metabolic inhibitors.

Involvement of cyclooxygenase-2 in the potentiation of allyl alcohol-induced liver injury by bacterial lipopolysaccharide.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces apoptotic cell death and cytochrome P4501A expression in developing *Fundulus heteroclitus* embryos.

Synthesis of novel anti-inflammatory peptides derived from the amino-acid sequence of the bioactive protein SV-IV.

Human eosinophils induce histamine release from antigen-activated rat peritoneal mast cells: a possible role for mast cells in late-phase allergic reactions.

Requirement of chondroitin sulfate/dermatan sulfate recognition in midkine-dependent migration of macrophages.

[Effect of perftoran on experimental hepatitis].

Mechanisms of thrombin-induced MAPK activation associated with cell proliferation in human cultured tracheal smooth muscle cells.

Mitogenic effect of oxidized low-density lipoprotein on vascular smooth muscle cells mediated by activation of Ras/Raf/MEK/MAPK pathway.

Aryl hydrocarbon receptor-deficient mice generate normal immune responses to model antigens and are resistant to TCDD-induced immune suppression.

2,3,7,8-Tetrachlorodibenzo-p-dioxin affects the number and function of murine splenic dendritic cells and their expression of accessory molecules.

Long-term toxic impact of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the reproduction, sexual differentiation, and development of different life stages of *Gobiocypris rarus* and *Daphnia magna*.

Cryptococcus neoformans induces macrophage inflammatory protein 1 α (MIP-1 α) and MIP-1 β in human microglia: role of specific antibody and soluble capsular polysaccharide.

Effects of cresols (o-, m-, and p-isomers) on the bioenergetic system in isolated rat liver mitochondria.

Clonal anergy induced in a CD8⁺ hapten-specific cytotoxic T-cell clone by an altered hapten-peptide ligand.

Effects of tyrosine kinase inhibitors on cell death induced by sodium fluoride and pertussis toxin in the pancreatic beta-cell line, RINm5F.

Inhalation toxicity studies of the alpha,beta-unsaturated ketones: 2-cyclohexene-1-one.

Pretreatment of whole blood for use in immunochromatographic assays for hepatitis B virus surface antigen.

Modeling and predicting selected immunological effects of a chemical stressor (3,4-dichloropropionilide) using the area under the corticosterone concentration versus time curve.

Chronic ingestion of a potential food contaminant induces gastrointestinal inflammation in rats: role of nitric oxide and mast cells.

Clinical presentations and prognostic factors of a glyphosate-surfactant herbicide intoxication: a review of 131 cases.

[Hypersensitivity vasculitis caused by the herbicide containing the isopropylamine salt of glyphosate].

Effects of the herbicide Roundup on the ultrastructural pattern of hepatocytes in carp (*Cyprinus carpio*).

Effects of environmental pollutants on airways, allergic inflammation, and the immune response.

The non-mevalonate isoprenoid biosynthesis of plants as a test system for new herbicides and drugs against pathogenic bacteria and the malaria parasite.

[Pentachlorophenol poisoning. Report of 4 cases and review of the literature].

NMDA receptor activation: critical role in oxidant tissue injury.

Cyanamide-induced liver dysfunction after abstinence in alcoholics: a long-term follow-up study on four cases.

Comparison of cyanamide and disulfiram in effects on liver function.

Ligation of the bronchial artery in sheep attenuates early pulmonary changes following exposure to smoke.

Stimulated pulmonary cell hyperplasia underlies resistance to alpha-naphthylthiourea.

Pulmonary protective effects of curcumin against paraquat toxicity.

Role of reactive oxygen intermediates in the decrease of hepatic cytochrome P450 activity by serum of humans and rabbits with an acute inflammatory reaction.

Cyclophosphamide-induced cystitis in freely-moving conscious rats: behavioral approach to a new model of visceral pain.

Structure-activity relationship in potentially anti-tumor promoting benzalacetone derivatives, as assayed by the Epstein-Barr virus early antigen activation.

Sensitivity of the SRBC PFC assay versus ELISA for detection of immunosuppression by TCDD and TCDD-like congeners.

The mercapturic acid biotransformation pathway of hexachlorobenzene is not involved in the induction of splenomegaly, or skin and lung lesions in the Brown Norway rat.

Immunologic effects of background exposure to polychlorinated biphenyls and dioxins in Dutch preschool children.

Chronic peritoneal inflammation by cyanate in rats.

Arsenic methylation capacity and skin cancer.

Antenatal dexamethasone enhances surfactant protein synthesis in the hypoplastic lung of nitrofen-induced diaphragmatic hernia in rats.

Pseudomonas pickettii: a common soil and groundwater aerobic bacteria with pathogenic and biodegradation properties.

Selective involvement of reactive oxygen intermediates in platelet-activating factor-mediated activation of NF-kappaB.

Immunological and in-vivo neurological studies on a benzoic acid-specific T cell-derived antigen-binding molecule from the serum of a toluene-sensitive patient.

Comparison of HOCl traps with myeloperoxidase inhibitors in prevention of low density lipoprotein oxidation.

Negative regulation of FcepsilonRI signaling by FcgammaRII costimulation in human blood basophils.

Redistribution of accumulated 2,3,7,8-tetrachlorodibenzo-p-dioxin during coxsackievirus B3 infection in the mouse.

Endocytic recycling is required for the presentation of an exogenous peptide via MHC class II molecules.

[Anti-inflammatory activity of copper and zinc p-cresol dihydrate].

Induction of the stress response in vivo decreases nuclear factor-kappa B activity in jejunal mucosa of endotoxemic mice.

Structural and functional characterization of BnSP-7, a Lys49 myotoxic phospholipase A(2) homologue from *Bothrops neuwiedi pauloensis* venom.

Arsenic and portal hypertension.

Ligation of IgE receptors causes an anaphylactic response and neutrophil infiltration but does not induce eosinophilic inflammation in mice.

Iron supplementation affects the production of pro-inflammatory cytokines in IL-10 deficient mice.

Annexin I is a stress protein induced by heat, oxidative stress and a sulfhydryl-reactive agent.

S-adenosylmethionine and *Pneumocystis carinii*.

Identification of the copper-zinc superoxide dismutase activity in *Mycoplasma hyopneumoniae*.

Herbimycin A in the treatment of experimental proliferative vitreoretinopathy: toxicity and efficacy study.

Response to replacement iron therapy in sideropenic individuals with recrudescing herpes labialis.

Active movement of T cells away from a chemokine.

Uncoupling of intestinal mitochondrial oxidative phosphorylation and inhibition of cyclooxygenase are required for the development of NSAID-enteropathy in the rat.

IL-2 signaling in human monocytes involves the phosphorylation and activation of p59hck.

p-Cresol sulfate is the dominant component of urinary myelin basic protein like material.

Role of manganese-containing superoxide dismutase in oxidative stress and virulence of *Streptococcus pneumoniae*.

Transfer factors: identification of conserved sequences in transfer factor molecules.

[An analysis of the immunity indices of patients with iron-deficiency anemia].

Caspase-3 protease activation during the process of genistein-induced apoptosis in TM4 testicular cells.

Photobiological properties of nabumetone (4-[6-methoxy-2-naphthalenyl]-2-butanone), a novel non-steroidal anti-inflammatory and analgesic agent.

P2Y₂ receptor-mediated proliferation of C(6) glioma cells via activation of Ras/Raf/MEK/MAPK pathway.

[Clinical experience with the use of benzylalcohol and amyl-m-cresol (Strepsils) in stomatological diseases].

Inhibition of irritation and contact hypersensitivity by phenoxyacetic acid methyl ester in mice.

Drug-induced oesophageal disorders: pathogenesis, incidence, prevention and management.

Neurokinin-1 (NK-1) receptor is required in antigen-induced cystitis.

Induction and regulation of xenobiotic-metabolizing cytochrome P450s in the human A549 lung adenocarcinoma cell line.

Trypsin stimulates integrin alpha(5)beta(1)-dependent adhesion to fibronectin and proliferation of human gastric carcinoma cells through activation of proteinase-activated receptor-2.

Regional differences in hypoxic depolarization and swelling in hippocampal slices.

Differential effect of antiallergic drugs on IgE-mediated cutaneous reaction in passively sensitized mice.

Macrophage migration inhibitory factor up-regulates expression of matrix metalloproteinases in synovial fibroblasts of rheumatoid arthritis.

Morphologic, biochemical and molecular mitochondrial changes during reperfusion phase following brief renal ischemia.

Synthesis of [I-NaI³] thymopoietin II and examination of its immunological effect on the uremic T-lymphocytes.

Antenatal dexamethasone administration inhibits smooth-muscle-cell DNA synthesis in pulmonary-arterial media in nitrofen-induced congenital diaphragmatic hernia in rats.

Impairment of mycophenolate mofetil absorption by iron ion.

Subcellular localization of the aryl hydrocarbon receptor is modulated by the immunophilin homolog hepatitis B virus X-associated protein 2.

Down-regulation of L-selectin expression in neutrophils by nonsteroidal anti-inflammatory drugs: role of intracellular ATP concentration.

Evaluation of leukocyte adhesion on polyurethanes: the effects of shear stress and blood proteins.

Chronic toxicity of arsenic in goats: clinicobiochemical changes, pathomorphology and tissue residues.

Hemodynamic dysfunction and cytochrome P4501A mRNA expression induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin during embryonic stages of lake trout development.

Pathologic alterations in adult rainbow trout, *Oncorhynchus mykiss*, exposed to dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Characterization of cardiotoxicity induced by 2,3,7, 8-tetrachlorodibenzo-p-dioxin and related chemicals during early chick embryo development.

Experimental model of hepatic fibrosis following repeated periportal necrosis induced by allyl alcohol.

Interleukin-6 negatively regulates the expression of pregnane X receptor and constitutively activated receptor in primary human hepatocytes.

Induction of angiotensin-converting enzyme by oncostatin m in human endothelial cells.

Actions of epoxyeicosatrienoic acid on large-conductance Ca(2+)-activated K(+) channels in pituitary GH(3) cells.

Interleukin 10 modulation of tumour necrosis factor receptors requires tyrosine kinases but not the PI 3-kinase/p70 S6 kinase pathway.

Pentoxifylline attenuates bacterial lipopolysaccharide-induced enhancement of allyl alcohol hepatotoxicity.

Synergistic activation of NF-kappaB and inducible isoform of nitric oxide synthase induction by interferon-gamma and tumor necrosis factor-alpha in INS-1 cells.

Activation of NFkappaB is necessary for IL-1beta-induced cyclooxygenase-2 (COX-2) expression in human gingival fibroblasts.

Pathological changes of hepatic artery and portal vein, after allyl-alcohol and carbon tetrachloride administration. An experimental study.

Specific inhibition of stretch-induced increase in L-type calcium channel currents by herbimycin A in canine basilar arterial myocytes.

Tumour necrosis factor-alpha- and interleukin-1beta-stimulated cell proliferation through activation of mitogen-activated protein kinase in canine tracheal smooth muscle cells.

Green tea polyphenols and tannic acid act as potent inhibitors of phorbol ester-induced nitric oxide generation in rat hepatocytes independent of their antioxidant properties.

Anti-inflammatory effect of heat shock protein induction is related to stabilization of I kappa B alpha through preventing I kappa B kinase activation in respiratory epithelial cells.

The involvement of caspases in the CD95(Fas/Apo-1)- but not swelling-induced cellular taurine release from Jurkat T-lymphocytes.

Orosomucoid has a cAMP-dependent effect on human endothelial cells and inhibits the action of histamine.

Deficiency of the stress kinase p38alpha results in embryonic lethality: characterization of the kinase dependence of stress responses of enzyme-deficient embryonic stem cells.

NTP Toxicology and Carcinogenesis Studies of Pyridine (CAS No. 110-86-1) in F344/N Rats, Wistar Rats, and B6C3F1 Mice (Drinking Water Studies).

Thiobencarb-induced embryotoxicity in medaka (*Oryzias latipes*): stage-specific toxicity and the protective role of chorion.

Accumulation of rifampicin by *Mycobacterium aurum*, *Mycobacterium smegmatis* and *Mycobacterium tuberculosis*.

Platelet-activating factor activates mitogen-activated protein kinases through the activation of phosphatidylinositol 3-kinase and tyrosine kinase in human eosinophils.

Rapid lethal intoxication caused by the herbicide glyphosate-trimesium (Touchdown).

Maternal exposure to atrazine during lactation suppresses suckling-induced prolactin release and results in prostatitis in the adult offspring.

Pneumonitis and herbicide exposure.

Acute basagran poisoning mimicking neuroleptic malignant syndrome.

Glutathione antagonized cyclophosphamide- and acrolein-induced cytotoxicity of PC3 cells and immunosuppressive actions in mice.

[*Pneumocystis carinii* pneumonia in an immunocompetent patient after paraquat spraying].

Acute poisoning with a herbicide containing imazapyr (Arsenal): a report of six cases.

Pharmacological and molecular evidence for kinin B1 receptor expression in urinary bladder of cyclophosphamide-treated rats.

Monocyte inflammation augments acrolein-induced Muc5ac expression in mouse lung.

Regulation of human airway mucins by acrolein and inflammatory mediators.

Oxidative stress as a mechanism of chronic cadmium-induced hepatotoxicity and renal toxicity and protection by antioxidants.

Ethanol co-exposure increases lethality of allyl alcohol in male Sprague-Dawley rats.

Regulation of hmp gene transcription in *Mycobacterium tuberculosis*: effects of oxygen limitation and nitrosative and oxidative stress.

Effect of Shimotsu-to (a Kampo medicine, Si-Wu-Tang) and its constituents on triphasic skin reaction in passively sensitized mice.

[Dietary fiber inhibits the incidence of hepatic metastasis with the anti-oxidant activity and portal scavenging functions].

Synthesis and evaluation of anti-inflammatory activity of some thiazolo[3,2-b]-1,2,4-triazole-5(6H)-ones and their Michael addition products.

Acute arsenic poisoning: clinical and histopathological features.

Thymocyte development in Ah-receptor-deficient mice is refractory to TCDD-inducible changes.

Rapid diagnosis of tuberculous meningitis by a dot immunobinding assay To detect mycobacterial antigen in cerebrospinal fluid specimens.

Heat shock protein suppresses the senescent lung cytokine response to acute endotoxemia.

Erosive injury to the upper gastrointestinal tract in patients receiving iron medication: an underrecognized entity.

Prenatal immunotoxicant exposure and postnatal autoimmune disease.

Cyclic nucleotide phosphodiesterases (PDE) 3 and 4 in normal, malignant, and HTLV-I transformed human lymphocytes.

[Occupational agents and endocrine function: an update of the experimental and human evidence].

Complementation between HLA-DR4 (DRB1*0401) and specific H2-A molecule in transgenic mice leads to collagen-induced arthritis.

Long term substitution and specific immune responses after transfer of bovine peripheral blood lymphocytes into severe combined immunodeficient mice.

Anti-lactoferrin antibodies and other types of anti-neutrophil cytoplasmic antibodies (ANCA) in reactive arthritis and ankylosing spondylitis.

Effects of aging on resistance to *Trichinella spiralis* infection in rodents exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Connective tissue responses to calcium hydroxide-based root canal medicaments.

Low-dose oral iron absorption test in anaemic patients with and without iron deficiency determined by bone marrow iron content.

A monoclonal antibody reactive with a 40-kDa molecule on fetal thymocytes and tumor cells blocks proliferation and stimulates aggregation and apoptosis.

The myeloperoxidase system of human phagocytes generates N-epsilon-(carboxymethyl)lysine on proteins: a mechanism for producing advanced glycation end products at sites of inflammation.

A chimeric aryl hydrocarbon receptor knockout mouse model indicates that aryl hydrocarbon receptor activation in hematopoietic cells contributes to the hepatic lesions induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Prevalence of antinuclear antibodies in a rural population.

Secretory phospholipase A2 induces phospholipase C γ -1 activation and Ca²⁺ mobilization in the human astrocytoma cell line 1321N1 by a mechanism independent of its catalytic activity.

Analysis of urinary nitric oxide metabolites in healthy subjects.

Serum dioxin and immunologic response in veterans of Operation Ranch Hand.

Antiproliferative and apoptosis-inducing effects of an antitumor glycoprotein from *Streptococcus pyogenes*.

Involvement of tyrosine protein kinase in IFN- γ -induced human endothelial cell apoptosis.

Toxicity of 3,3',4,4'-tetrachloroazoxybenzene in rats and mice.

N-acetylneuraminic acid transport by *Streptococcus oralis* strain AR3.

Heat-shock protein-73 protects against small intestinal warm ischemia-reperfusion injury in the rat.

The heparin/heparan sulfate-binding site on apo-serum amyloid A. Implications for the therapeutic intervention of amyloidosis.

[Oxidative injury and its defense system in vivo].

Phototoxicity of quinalphos under sunlight in vitro and in vivo.

Quantification of axonal damage in traumatic brain injury: affinity purification and characterization of cerebrospinal fluid tau proteins.

Human cytochrome P4501A2.

Uremic ultrafiltrate inhibits platelet-activating factor synthesis.

A 63 kDa skeletal muscle protein associated with eye muscle inflammation in Graves' disease is identified as the calcium binding protein calsequestrin.

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters cardiovascular and craniofacial development and function in sac fry of rainbow trout (*Oncorhynchus mykiss*).

Use of indirectly immobilized recombinant p17 antigen for detection of antibodies to HIV-1 by enzyme immunoassay.

Inhibitory mechanisms of glycoprotein fraction derived from *Miscanthus sinensis* for the immediate phase response of an IgE-mediated cutaneous reaction.

Hodgkin's disease, work, and the environment. A review.

Lipopolysaccharides and cytokines downregulate the angiotensin II type 2 receptor in rat cardiac fibroblasts.

Hyposmolality stimulates apical membrane Na(+)/H(+) exchange and HCO(3)(-) absorption in renal thick ascending limb.

NTP Toxicology and Carcinogenesis Studies of Triethanolamine (CAS No. 102-71-6) in F344 Rats and B6C3F1 Mice (Dermal Studies).

Role of glutathione and reactive oxygen intermediates in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immune suppression in C57Bl/6 mice.

Trimethylamine oxide transport across plasma membranes of elasmobranch erythrocytes.

Synthesis and anti-inflammatory activities of some thiazolo[3,2-a]pyrimidine derivatives.

Participation of different cell types in the restitutive response of the rat liver to periportal injury induced by allyl alcohol.

Early effects of protein kinase modulators on DNA synthesis in rat cerebral cortex.

Increased group IV cytosolic phospholipase A2 activity in lungs of sheep after smoke inhalation injury.

Stress response decreases the interleukin-1beta-induced production of complement component C3 in human intestinal epithelial cells.

Nitric oxide acts as a postsynaptic signaling molecule in calcium/calmodulin-induced synaptic potentiation in hippocampal CA1 pyramidal neurons.

The role of calcium stores in fatigue of isolated single muscle fibres from the cane toad.

Mechanisms of D-aspartate release under ischemic conditions in mouse hippocampal slices.

LDL stimulates mitogen-activated protein kinase phosphatase-1 expression, independent of LDL receptors, in vascular smooth muscle cells.

The CC-chemokine RANTES increases the attachment of human immunodeficiency virus type 1 to target cells via glycosaminoglycans and also activates a signal transduction pathway that enhances viral infectivity.

Disruption of male sex hormones with regard to pesticides: pathophysiological and regulatory aspects.

Activation of Akt/protein kinase B after stimulation with angiotensin II in vascular smooth muscle cells.

An inhibitor of exported Mycobacterium tuberculosis glutamine synthetase selectively blocks the growth of pathogenic mycobacteria in axenic culture and in human monocytes: extracellular proteins as potential novel drug targets.

Pasteurella haemolytica leukotoxin and endotoxin induced cytokine gene expression in bovine alveolar macrophages requires NF-kappaB activation and calcium elevation.

Uncouplers of oxidative phosphorylation can enhance a Fas death signal.

[Effects of hepatoprotective agents containing phospholipids on cytochrome P-450-dependent antitoxic liver function during experimental toxic hepatitis].

Human immunodeficiency virus-1 infection requires pertussis toxin sensitive G-protein-coupled signalling and mediates cAMP downregulation.

Regulation of IL-8RA (CXCR1) expression in polymorphonuclear leukocytes by hypoxia/reoxygenation.

Lysophosphatidic acid-induced calcium mobilization and proliferation in kidney proximal tubular cells.

The human immunodeficiency virus-1 Tat protein increases cell proliferation, alters sensitivity to zinc chelator-induced apoptosis, and changes Sp1 DNA binding in HeLa cells.

Novel co-operation between eotaxin and substance-P in inducing eosinophil-derived neurotoxin release.

Ah receptor and NF-kappaB interactions, a potential mechanism for dioxin toxicity.

Primary hepatic angiosarcoma: report of a case involving environmental arsenic exposure.

Herbicide (Roundup) pneumonitis.

Involvement of capsaicin-sensitive nerves in paraquat-induced mortality.

Inhibitors of branched-chain amino acid biosynthesis as potential antituberculosis agents.

The nature of antioxidant defense mechanisms: a lesson from transgenic studies.

Acute 2,4-D poisoning in tench (*Tinca tinca* L.): lesions in the hematopoietic portion of the kidney.

Health effects of occupational pentachlorophenol exposure in timber sawmill employees: a preliminary study.

Urinary excretion and pharmacokinetics of acrolein and its parent drug cyclophosphamide in bone marrow transplant patients.

Clinical experience with pendimethalin (STOMP) poisoning in Taiwan.

Dermatotoxicity of agricultural chemicals in the dorsal skin of hairless dogs.

Inorganic and methylated arsenic compounds induce cell death in murine macrophages via different mechanisms.

[Paraquat poisoning in children].

Susceptibility to skin stinging, non-immunologic contact urticaria and acute skin irritation; is there a relationship?

Kaposi's sarcoma in dog with acquired immunodeficiency after phosphate poisoning.

Acrolein: a respiratory toxin that suppresses pulmonary host defense.

'Golf ball liver': a cause of chronic hepatitis?

Cytokine-mediated induction of ceramide production is redox-sensitive. Implications to proinflammatory cytokine-mediated apoptosis in demyelinating diseases.

Genes for 2,4,5-trichlorophenoxyacetic acid metabolism in *Burkholderia cepacia* AC1100: characterization of the tftC and tftD genes and locations of the tft operons on multiple replicons.

Influence of incubation time and rinsing buffer on the distribution of the tracer lanthanum in canine heart muscle.

Experimental study of oxidative DNA damage.

Concentrated cresol intoxication.

Enantiomers of flurbiprofen can distinguish key pathophysiological steps of NSAID enteropathy in the rat.

IL-12 enhances antibody responses to T-independent polysaccharide vaccines in the absence of T and NK cells.

Herbimycin-A attenuates ischaemia-reperfusion induced pulmonary neutrophil infiltration.

Oncostatin M up-regulates tissue inhibitor of metalloproteinases-3 gene expression in articular chondrocytes via de novo transcription, protein synthesis, and tyrosine kinase- and mitogen-activated protein kinase-dependent mechanisms.

Molecular and functional aspects of the hairless (hr) gene in laboratory rodents and humans.

Quantitation of CD38 expression using QuantiBRITE beads.

Epidermal Langerhans cell apoptosis is induced in vivo by nonanoic acid but not by sodium lauryl sulphate.

Stimulation of the stress-induced expression of stress proteins by curcumin in cultured cells and in rat tissues in vivo.

Thermoregulation in rats exposed perinatally to dioxin: core temperature stability to altered ambient temperature, behavioral thermoregulation, and febrile response to lipopolysaccharide.

A case-control study of occupational and environmental risk factors for Parkinson's disease in the Emilia-Romagna region of Italy.

Inhibition of guinea pig skin allergic reactions by nonpeptide bradykinin B2 receptor antagonist FR173657.

A novel dosage approach for evaluation of SMANCS [poly-(styrene-co-maleyl-half-n-butylate) - neocarcinostatin] in the treatment of primary hepatocellular carcinoma.

[Immunotoxicology in occupational and environmental medicine: prospectives, limitations, and research objectives].

Intracellular Signal-transducing elements involved in transendothelial migration of lymphoma cells.

[The use of benzyl alcohol and amyl-m-cresol (Strepsils) in the oral cavity. (Review of the literature and first clinical experiences)].

Atherogenic lipoproteins enhance mesangial cell expression of platelet-derived growth factor: role of protein tyrosine kinase and cyclic AMP-dependent protein kinase A.

Thymic alterations induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin are strictly dependent on aryl hydrocarbon receptor activation in hemopoietic cells.

Some aspects of the etiology of non-Hodgkin's lymphoma.

Aryl hydrocarbon receptor-dependent suppression by 2,3,7, 8-tetrachlorodibenzo-p-dioxin of IgM secretion in activated B cells.

Role of altered arachidonic acid metabolism in 2,3,7, 8-tetrachlorodibenzo-p-dioxin-induced immune suppression in C57Bl/6 mice.

Collagen-induced arthritis in nonhuman primates: multiple epitopes of type II collagen can induce autoimmune-mediated arthritis in outbred cynomolgus monkeys.

Effective utilization of erythropoietin with intravenous iron therapy.

Dioxin exposure and non-malignant health effects: a mortality study.

[Synthesis and properties of 5(4,6-diphenyl-2-pyrimidin-2-yl)-1,2,4-triazolin-3-thione and derivatives].

Acute intoxication with trichloroethene: clinical symptoms, toxicokinetics, metabolism, and development of biochemical parameters for renal damage.

The 64-kilodalton eye muscle protein is the flavoprotein subunit of mitochondrial succinate dehydrogenase: the corresponding serum antibodies are good markers of an immune-mediated damage to the eye muscle in patients with Graves' hyperthyroidism.

Sensitive enzyme immunoassay of antibodies to HIV-1 p17 antigen using indirectly immobilized recombinant p17 for diagnosis of HIV-1 infection.

An unusual exposure to methyl bromide leading to fatality.

Environmental and occupational aspects on the etiology of non-Hodgkin's lymphoma.

Effects of the nonsteroidal anti-inflammatory drug nimesulide on energy metabolism in livers from adjuvant-induced arthritic rats.

[Long-term ecological and genetic consequences of use of dioxin-containing environmental agents].

Possible role of nitric oxide in IgE-mediated allergic cutaneous reaction in mice.

1,2-Dichlorobenzene-induced lipid peroxidation in male Fischer 344 rats is Kupffer cell dependent.

Delta opiate receptors account for the castration-induced unmasking of gonadotropin-releasing hormone binding sites in the rat pituitary.

Mannitol at clinical concentrations activates multiple signaling pathways and induces apoptosis in endothelial cells.

Anaphylatoxins C5a and C3a induce nuclear factor kappaB activation in human peripheral blood monocytes.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazoxybenzene (CAS No. 21232-47-3) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

Cytochrome P450 1B1: a major P450 isoenzyme in human blood monocytes and macrophage subsets.

Structural and functional comparison of agents interfering with dihydroorotate, succinate and NADH oxidation of rat liver mitochondria.

Effect of protein kinase inhibitors on primary antibody induction in tissue cultures.

On the role of the peroxisome in the metabolism of drugs and xenobiotics.

CD40-mediated signal transduction in human airway smooth muscle.

SPARC inhibits endothelial cell adhesion but not proliferation through a tyrosine phosphorylation-dependent pathway.

The malonyl-CoA-sensitive form of carnitine palmitoyltransferase is not localized exclusively in the outer membrane of rat liver mitochondria.

Military history of patients with inflammatory bowel disease: an epidemiological study among U.S. veterans.

p38 mitogen-activated protein kinase inhibition attenuates intercellular adhesion molecule-1 up-regulation on human pulmonary microvascular endothelial cells.

Stress-induced fractal rearrangement of the endothelial cell cytoskeleton causes apoptosis.

Chemotaxis of chinese hamster ovary cells expressing the human neutrophil formyl peptide receptor: role of signal transduction molecules and alpha5beta1 integrin.

Inactivation of mycobacteriophage D29 using ferrous ammonium sulphate as a tool for the detection of viable *Mycobacterium smegmatis* and *M. tuberculosis*.

The cellular stress response increases measles virus-induced cytopathic effect.

Mycobacterium tuberculosis mannose-capped lipoarabinomannan can induce NF-kappaB-dependent activation of human immunodeficiency virus type 1 long terminal repeat in T cells.

Fast and sensitive method for simultaneous measurement of cell proliferation rate and drug sensitivity in rat cerebral cortex.

Inflammatory cytokines (IL-1alpha, TNF-alpha) and LPS modulate the Ca²⁺ signaling pathway in osteoblasts.

Suppression of C/EBPalpha and induction of C/EBPbeta by 2,3,7,8-tetrachlorodibenzo-p-dioxin in mouse adipose tissue and liver.

Anti-immunoglobulin E antibody treatment blocks histamine release and tissue contraction in sensitized mice.

Effects of indomethacin on mitochondrial oxygen uptake in intestine.

Interleukin 1beta and interleukin 6, but not tumor necrosis factor alpha, inhibit insulin-stimulated glycogen synthesis in rat hepatocytes.

The tyrosine kinase p56lck mediates activation of swelling-induced chloride channels in lymphocytes.

Cd2+ effects on respiration and swelling of rat liver mitochondria were modified by monovalent cations.

Immune cell functions in industrial workers after exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: dissociation of antigen-specific T-cell responses in cultures of diluted whole blood and of isolated peripheral blood mononuclear cells.

Immunologic findings in workers formerly exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin and its congeners.

Involvement of calcium and arachidonate metabolism in acetylated-low-density-lipoprotein-stimulated tumor-necrosis-factor-alpha production by rat peritoneal macrophages.

2,3,7,8-Tetrachlorodibenzo-p-dioxin and diethylstilbestrol affect thymocytes at different stages of development in fetal thymus organ culture.

Tumor necrosis factor-alpha regulates the gene expression of macrophage migration inhibitory factor through tyrosine kinase-dependent pathway in 3T3-L1 adipocytes.

The effects of serum iminodipeptides and prednisolone on superoxide generation and tyrosyl phosphorylation of proteins in neutrophils from a patient with prolidase deficiency.

Biological characterization of human fibroblast-derived mitogenic factors for human melanocytes.

Cell-specific differences in the susceptibility of potential cellular targets of human origin derived from blood and lung following treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Interleukin 1 beta and tumour necrosis factor alpha inhibit acid secretion in cultured rabbit parietal cells by multiple pathways.

Hepatitis B virus X-associated protein 2 is a subunit of the unliganded aryl hydrocarbon receptor core complex and exhibits transcriptional enhancer activity.

Identification of a region of the herpes simplex virus single-stranded DNA-binding protein involved in cooperative binding.

Unintentional fatal paraquat poisonings among agricultural workers in Costa Rica: report of 15 cases.

Laryngeal survey in glyphosate intoxication: a pathophysiological investigation.

Effect of roundup and tordon 202C herbicides on antibody production in mice.

Propanil poisoning.

"Golf ball liver": agent orange hepatitis.

A fatal case of drinking and cyanamide intake.

Homicidal poisoning by paraquat.

Drug eruption induced by cyanamide (carbimide): a clinical and histopathologic study of 7 patients.

Paraquat-induced formation of leukotriene B₄ in rat lungs: modulation by N-acetylcysteine.

Transgenerational effects of maternal exposure to chemicals on the functional development of the brain in the offspring.

Human neutrophils employ the myeloperoxidase-hydrogen peroxide-chloride system to convert hydroxy-amino acids into glycolaldehyde, 2-hydroxypropanal, and acrolein. A mechanism for the generation of highly reactive alpha-hydroxy and alpha,beta-unsaturated aldehydes by phagocytes at sites of inflammation.

Cigarette smoke induces interleukin-8 release from human bronchial epithelial cells.

Hydrogen peroxide (H₂O₂) increases the steady-state mRNA levels of collagenase/MMP-1 in human dermal fibroblasts.

Immunization with alum-collagen II complex suppresses the development of collagen-induced arthritis in rats by deviating the immune response.

Induction of p53 protein expression by sodium arsenite.

Evidence that singlet oxygen-induced human T helper cell apoptosis is the basic mechanism of ultraviolet-A radiation phototherapy.

Activation induces apoptosis in Herpesvirus saimiri-transformed T cells independent of CD95 (Fas, APO-1).

Alterations in the developing immune system of the F344 rat after perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin I. [correction of II]. Effects on the fetus and the neonate.

Possible involvement of rapamycin-sensitive pathway in Bcl-2 expression in human neuroblastoma SH-SY5Y cells.

The epidemiology of soft tissue sarcoma.

FK-506 and cyclosporin A potentiate the IgE antibody production by contact sensitization with hapten in mice.

Haemophilus somnus immunoglobulin binding proteins and surface fibrils.

Mitochondrial damage: a possible mechanism of the "topical" phase of NSAID induced injury to the rat intestine.

Differential effects on TNF alpha production by pharmacological agents with varying molecular sites of action.

Estrogens attenuate neuronal injury due to hemoglobin, chemical hypoxia, and excitatory amino acids in murine cortical cultures.

Pneumocystis carinii cysts are susceptible to inactivation by chemical disinfectants.

T cell responses to human type II collagen in patients with rheumatoid arthritis and healthy controls.

Opposite effects of 2,2',4,4',5,5'-hexachlorobiphenyl and 2,3,7,8-tetrachlorodibenzo-p-dioxin on the antibody response to sheep erythrocytes in mice.

Arsenic can mediate skin neoplasia by chronic stimulation of keratinocyte-derived growth factors.

Ferrous sulfate-induced increase in requirement for thyroxine in a patient with primary hypothyroidism.

Inhibition of protein tyrosine kinases or protein kinase C prevents nonspecific killer T lymphocyte-mediated tumoricidal activity.

Altered in vivo toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C-SRC deficient mice.

Some peculiarities of hepatobiliary diseases in Vietnam.

Helicobacter pylori stimulates granulocyte-macrophage colony-stimulating factor (GM-CSF) production from cultured antral biopsies and a human gastric epithelial cell line.

Induction of human endothelial cell apoptosis requires both heat shock and oxidative stress responses.

Detection of peroxisome proliferators using a reporter construct derived from the rat acyl-CoA oxidase promoter in the rat liver cell line H-4-II-E.

Expression of the aryl hydrocarbon receptor (AhR) and AhR nuclear translocator during chick cardiogenesis is consistent with 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced heart defects.

Activation of mitogenic signaling by endothelin 1 in ovarian carcinoma cells.

Design, synthesis, and antiviral evaluation of 2-substituted 4,5-dichloro- and 4,6-dichloro-1-beta-D-ribofuranosylbenzimidazoles as potential agents for human cytomegalovirus infections.

Synthesis and antiproliferative and antiviral activity of carbohydrate-modified pyrrolo[2,3-d]pyridazin-7-one nucleosides.

The role of oxygen free radicals in occupational and environmental lung diseases.

Cytokines (IL-1beta and TNFalpha) in relation to biochemical and immunological effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in rats.

T-cell receptor-mediated signal transduction in transformed human T-cells.

More sensitive immune complex transfer enzyme immunoassay for antibody IgG to p17 of HIV-1 with shorter incubation time for immunoreactions and larger volumes of serum samples.

Early life stage toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in zebrafish (Danio rerio).

Midkine, a retinoic acid-inducible heparin-binding cytokine, is a novel regulator of intracellular calcium in human neutrophils.

Is exposure to bacterial endotoxin a determinant of susceptibility to intoxication from xenobiotic agents?

Gadolinium chloride reduces cytochrome P450: relevance to chemical-induced hepatotoxicity.

Characterization of intracellular calcium responses produced by polycyclic aromatic hydrocarbons in surface marker-defined human peripheral blood mononuclear cells.

4,6-Dinitro-o-cresol uncouples oxidative phosphorylation and induces membrane permeability transition in rat liver mitochondria.

Apoptotic cell death of erythrocytes in *Xenopus* larvae exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Differential effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin, bis(tri-n-butyltin) oxide and cyclosporine on thymus histophysiology.

Integrin stimulation regulates polymorphonuclear leukocytes inflammatory cytokine expression.

Differences in platelet-activating factor receptor mediated Ca^{++} response between hamster and guinea pig alveolar macrophages.

The role of tyrosine phosphorylation in lipopolysaccharide- and zymosan-induced procoagulant activity and tissue factor expression in macrophages.

[Comparative study of the effect of paracetamol, phenacetin and amidopyrine on mitochondrial function in isolated rat hepatocytes].

Glycogenolysis stimulation by non-steroidal anti-inflammatories in the perfused rat liver is not accompanied by Ca^{2+} release.

Changes in barrier function of a model intestinal epithelium by intraepithelial lymphocytes require new protein synthesis by epithelial cells.

Inflammatory damage to skin by prolonged contact with 1,2-dichlorobenzene and chloropentafluorobenzene.

Correlation of 2,3,7,8-tetrachlorodibenzo-p-dioxin induction of cytochrome P4501A in vascular endothelium with toxicity in early life stages of lake trout.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on tumor necrosis factor (TNF) production by peritoneal cells.

Inhibitors of protein kinases and phosphatases alter root morphology and disorganize cortical microtubules.

Cryptic gonadotropin-releasing hormone receptors of rat pituitary cells in culture are unmasked by epidermal growth factor.

[Respiration and ion permeability of the inner membrane in rat "sodium" liver mitochondria].

Tumor necrosis factor beta is a major source of antibody-activated effector cells in the killing of virally infected target cells.

Effects of protein tyrosine kinase inhibitors on the replication of herpes simplex virus and the phosphorylation of viral proteins.

Cross-reactions in patch testing and photopatch testing with ketoprofen, thiaprophenic acid, and cinnamic aldehyde.

Alleviation of paraquat-induced lung injury by pretreatment with bifunctional liposomes containing alpha-tocopherol and glutathione.

Cellular target of cyclophosphamide toxicity in the murine liver: role of glutathione and site of metabolic activation.

Pulse therapy with cyclophosphamide and methylprednisolone in patients with moderate to severe paraquat poisoning: a preliminary report.

Oxidative DNA damage and cell proliferation in the livers of B6C3F1 mice exposed to pentachlorophenol in their diet.

[Distribution of ventilation-perfusion ratios in paraquat-induced interstitial pneumonia in dogs].

In vivo and in vitro analysis of Bordetella pertussis catalase and Fe-superoxide dismutase mutants.

Assessment of the biochemical effects of percutaneous exposure of sulphur mustard in an in vitro human skin system.

Methyl iodide poisoning: report of two cases.

Retinoic acid affects the expression rate of the differentiation-related genes aryl hydrocarbon receptor, ARNT and keratin 4 in proliferative keratinocytes only.

The beneficial effect of taurine on the prevention of human endothelial cell death.

Effects induced by feeding organochlorine-contaminated carp from Saginaw Bay, Lake Huron, to laying White Leghorn hens. II. Embryotoxic and teratogenic effects.

Effects of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) injected into the yolks of chicken (*Gallus domesticus*) eggs prior to incubation.

Inhibition of TC-1 cytokine production, effector cytotoxic T lymphocyte development and alloantibody production by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Evaluating the antioxidant potential of new treatments for inflammatory bowel disease using a rat model of colitis.

Fatal accident resulting from methyl bromide poisoning after fumigation of a neighbouring house; leakage through sewage pipes.

Fulminant malignant hyperthermia associated with ketoacidotic diabetic coma.

In ovo 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure in three avian species. 1. Effects on thyroid hormones and growth during the perinatal period.

Identification of a cell-specific transcription activation domain within the human Ah receptor nuclear translocator.

Activation of phospholipase D is tightly coupled to the phagocytosis of *Mycobacterium tuberculosis* or opsonized zymosan by human macrophages.

Tri-chloroacetic acid: a cause of vulvar vestibulitis.

Synthesis, characterization, and immunological properties in mice of conjugates composed of detoxified lipopolysaccharide of *Salmonella paratyphi A* bound to tetanus toxoid with emphasis on the role of O acetyls.

Decreased cerebral glucose utilization in rats during the ebb phase of thermal injury.

Iron deficiency and intestinal malabsorption in HIV disease.

Promotion of endometriosis by 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats and mice: time-dose dependence and species comparison.

Exogenous catalase may potentiate oxidant-mediated lung injury in the female Sprague-Dawley rat.

Circulating interleukin-2 receptors are a group of multimeric proteins with immunoreactivity for interleukin-2 receptor alpha, beta, and gamma chains.

Incidence and time trends for lymphomas, leukemias and myelomas: hypothesis generation. Working Group on the Epidemiology of Hematolymphopoietic Malignancies in Italy.

Target-induced death by apoptosis in human lymphokine-activated natural killer cells.

Prenatal hormonal therapy improves pulmonary compliance in the nitrofen-induced CDH rat model.

The effect of intra-articular capsaicin on nerve fibres within the synovium of the rat knee joint.

Airborne pollutants and the immune system.

Immunity to the G1 globular domain of the cartilage proteoglycan aggrecan can induce inflammatory erosive polyarthritis and spondylitis in BALB/c mice but immunity to G1 is inhibited by covalently bound keratan sulfate in vitro and in vivo.

Cell cycle defect in connection with oxygen and iron sensitivity in Fanconi anemia lymphoblastoid cells.

Increased expression of intercellular adhesion molecule 1, CD11/CD18 cell surface adhesion glycoproteins and alpha 4 beta 1 integrin in a rat model of chronic interstitial lung fibrosis.

Type II collagen-induced autoimmune ear disease in mice: a preliminary report on an epitope of the type II collagen molecule that induced inner ear lesions.

Comparative epitope mapping of antibodies to collagen in women with silicone breast implants, systemic lupus erythematosus and rheumatoid arthritis.

Infection of human T lymphoid cells by human herpesvirus 6 is blocked by two unrelated protein tyrosine kinase inhibitors, biochanin A and herbimycin.

[Bladder neoplasms and cyclophosphamide. Apropos of 3 cases and review of the literature].

2,3,7,8-TCDD induces cytochrome P450 enzyme activity but not proliferation or phenotypical changes in human peripheral blood lymphocytes.

Heat shock response inhibits cytokine-inducible nitric oxide synthase expression in rat hepatocytes.

CD14-mediated signal pathway of Porphyromonas gingivalis lipopolysaccharide in human gingival fibroblasts.

Degradation of cross-linked fibrin by matrix metalloproteinase 3 (stromelysin 1): hydrolysis of the gamma Gly 404-Ala 405 peptide bond.

Bladder augmentation in the prevention of cyclophosphamide-induced haemorrhagic cystitis in the rat model.

Anti-herpes simplex virus activity of n-docosanol correlates with intracellular metabolic conversion of the drug.

Toxic equivalency factors of polybrominated dibenzo-p-dioxin, dibenzofuran, biphenyl, and polyhalogenated diphenyl ether congeners based on rainbow trout early life stage mortality.

Identification of a second Mycobacterium tuberculosis gene cluster encoding proteins of an ABC phosphate transporter.

Dioxin activates human immunodeficiency virus-1 expression in chronically infected promonocytic U1 cells by enhancing NF-kappa B activity and production of tumor necrosis factor-alpha.

Effects and mechanisms of environmental temperature on carp (Cyprinus carpio) anti-DNP antibody response and non-specific cytotoxic cell activity: a kinetic study.

Purification and partial characterization of an indomethacin hydrolyzing enzyme from pig liver.

Anti-inflammatory properties of human serum IgA: induction of IL-1 receptor antagonist and Fc alpha R (CD89)-mediated down-regulation of tumour necrosis factor-alpha (TNF-alpha) and IL-6 in human monocytes.

Aryl-hydrocarbon receptor-deficient mice are resistant to 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced toxicity.

Uptake of duck hepatitis B virus into hepatocytes occurs by endocytosis but does not require passage of the virus through an acidic intracellular compartment.

Effects of protein tyrosine kinase inhibitors on cytokine-induced adhesion molecule expression by human umbilical vein endothelial cells.

Application of a biologically-based RFD estimation method to tetrachlorodibenzo-p-dioxin (TCDD) mediated immune suppression and enzyme induction.

The effect of vapor polarity and boiling point on breakthrough for binary mixtures on respirator carbon.

Disulfide bond structure determination and biochemical analysis of glycoprotein C from herpes simplex virus.

Interleukin 4 or oncostatin M induces a prolonged increase in P-selectin mRNA and protein in human endothelial cells.

Role of tumor necrosis factor-alpha on mesangial cell MCP-1 expression and monocyte migration: mechanisms mediated by signal transduction.

Analysis of recombinant human tumour necrosis factor-alpha-induced CD4 expression on human eosinophils.

Transduction mechanisms involved in thrombin receptor-induced nerve growth factor secretion and cell division in primary cultures of astrocytes.

PLD activation in Chinese hamster ovary (CHO) cells transfected with PGF2 alpha receptor cDNA.

Cell kinetics of repair after allyl alcohol-induced liver necrosis in mice.

Persistence of decreased T-helper cell function in industrial workers 20 years after exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Dynamic production of tumour necrosis factor-alpha (TNF-alpha) messenger RNA, intracellular and extracellular TNF-alpha by murine macrophages and possible association with protein tyrosine phosphorylation of STAT1 alpha and ERK2 as an early signal.

src-related tyrosine kinases regulate transcriptional activation of the interstitial collagenase gene, MMP-1, in interleukin-1-stimulated synovial fibroblasts.

Triphenyltin acetate toxicity: a biochemical and ultrastructural study on mouse thymocytes.

TNF-alpha participates in an IgE-mediated cutaneous reaction in mast cell deficient, WBB6F1-W/Wv mice.

Role of tyrosine kinases, protein kinase C, and protein kinase A in the regulation of interferon-alpha production induced by herpes simplex virus type 1.

Signaling by hemolytically inactive C5b67, an agonist of polymorphonuclear leukocytes.

Detection of non-steroidal anti-inflammatory drugs in equine plasma and urine by gas chromatography-mass spectrometry.

[Purification of the natural 24kd (P24) of the type-1 human immunodeficiency virus (HIV-1) using immunoaffinity].

[The effect of Cd²⁺ on the respiration and swelling of isolated rat liver mitochondria in incubation media of different compositions].

Role of cell surface glycosaminoglycans of human T cells in human immunodeficiency virus type-1 (HIV-1) infection.

Anisoosmotic regulation of hepatic gene expression.

Involvement of tyrosine phosphorylation in endothelial adhesion molecule induction.

Effects of the nonsteroidal anti-inflammatory drug piroxicam on rat liver mitochondria.

Modulation of chemical-induced lung and liver toxicity by all-trans-retinol in the male Sprague-Dawley rat.

Effect of glutathione depletion on metallothionein synthesis induced by paraquat in mice.

Heterologous expression of selenium-dependent glutathione peroxidase affords cellular resistance to paraquat.

Cyanamide-associated alcoholic liver disease: a sequential histological evaluation.

The role of free radicals in paraquat-induced corneal lesions.

Chelation of organoarsenate with dimercaptosuccinic acid.

On the effects of paraquat on isolated mitochondria. Evidence that paraquat causes opening of the cyclosporin A-sensitive permeability transition pore synergistically with nitric oxide.

Lung damage in paraquat poisoning and hyperbaric oxygen exposure: superoxide-mediated inhibition of phospholipase A2.

Fate and effects of acrolein.

Pulmonary damage due to paraquat poisoning through skin absorption.

[New legislation from the Politique Agricole Commune passed in 1994 and its impact on the spread of ragweed. The public health laws are the responsibility of the mayor, the health department, the General Council and the State Council].

[The campaign against the spread of ragweed: the Quebec model].

[A microtitration variant of the latex agglutination reaction in the diagnosis of leprosy].

Induction of heat shock protein 72 prevents neutrophil-mediated human endothelial cell necrosis.

Skin irritation in man: a comparative bioengineering study using improved reflectance spectroscopy.

Anti-collagen antibodies in systemic sclerosis and in primary Raynaud's phenomenon.

Cryptosporidiosis at ICAAC.

[Comparative study on pharmacological effects of various species of Pueraria].

Purification and identification of mouse lung microvessel endothelial cell-derived chemoattractant for lung-metastasizing murine RAW117 large-cell lymphoma cells: identification as mouse monocyte chemotactic protein 1.

Identification and characterization of a major tolerogenic T-cell epitope of type II collagen that suppresses arthritis in B10.RIII mice.

Expression of cytokine mRNA in human melanoma tissues.

Induction of macrophage procoagulant activity by murine hepatitis virus strain 3: role of tyrosine phosphorylation.

Immunologic effects of background prenatal and postnatal exposure to dioxins and polychlorinated biphenyls in Dutch infants.

Role of lipopolysaccharide and tumor necrosis factor-alpha in induction of hepatocyte necrosis.

Serum erythropoietin levels in patients with severe anemia secondary to inflammatory bowel disease and the use of recombinant human erythropoietin in patients with anemia refractory to treatment.

Integrin-mediated tyrosine phosphorylation and cytokine message induction in monocytic cells. A possible signaling role for the Syk tyrosine kinase.

Immunomodulatory effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin tested by the popliteal lymph node assay.

The efficacy of erythropoietin in human immunodeficiency virus-infected end-stage renal disease patients treated by maintenance hemodialysis.

Triclosan inhibits histamine-induced inflammation in human skin.

Alternative models for low dose-response analysis of biochemical and immunological endpoints for tetrachlorodibenzo-p-dioxin.

The role of protein kinase in human synovial fibroblast growth.

Hepatic microsomal ethoxyresorufin O-deethylase-inducing potency in ovo and cytosolic Ah receptor binding affinity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: comparison of four avian species.

Induction of endometriosis in mice: a new model sensitive to estrogen.

Localization of porcine cardiac myosin epitopes that induce experimental autoimmune myocarditis.

Resinifying therapy in endodontics. A clinical and radiological evaluation.

Presentation of cartilage proteoglycan to a T cell hybridoma derived from a mouse with proteoglycan-induced arthritis.

Antibody reactivity to mycobacterial 65 kDa heat shock protein: relevance to autoimmunity.

Treatment of Philadelphia-chromosome-positive human leukemia in SCID mouse model with herbimycin A, bcr-abl tyrosine kinase activity inhibitor.

A morphological study of liver lesions in *Xenopus* larvae exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) with special reference to apoptosis of hepatocytes.

Image processing of 20 MHz B-scan recordings of irritant reactions.

Antioxidant effect of a Ginkgo biloba extract (EGb 761) on the retina.

Non-Hodgkin's lymphoma.

Analysis of the relationship between hemoglobin-oxygen affinity and lipid peroxidation during fever.

Identification of a cyanogen bromide fragment of porcine type II collagen capable of modulating collagen arthritis in B10.RIII (H-2r) mice.

Immunosuppressive potential of several polycyclic aromatic hydrocarbons (PAHs) found at a Superfund site: new model used to evaluate additive interactions between benzo[a]pyrene and TCDD.

Lung retention and bioavailability of arsenic after single intratracheal administration of sodium arsenite, sodium arsenate, fly ash and copper smelter dust in the hamster.

Tyrosine protein kinase inhibitors prevent activation of cardiac swelling-induced chloride current.

Sequential activation of MAP kinase cascade by angiotensin II in opossum kidney cells.

Use of Mishell-Dutton culture for the detection of the immunosuppressive effect of iron-containing compounds.

Inhibition of tumor necrosis factor activity fails to restore 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced suppression of the antibody response to sheep red blood cells.

N-acetylcysteine pretreatment attenuates paraquat-induced lung leak in rats.

Kinetics of plasma membrane and mitochondrial alterations in cells undergoing apoptosis.

Evaluation of the significance of polyamines and their oxidases in the aetiology of human cervical carcinoma.

Effects of fluoride and cholera and pertussis toxins on sensory transduction in the carotid body.

Comparative assessment of metabolic enzyme levels in macrophage populations of the F344 rat.

Structural analysis of the oligosaccharides derived from glycodefin, a human glycoprotein with potent immunosuppressive and contraceptive activities.

GRO is Chemotactic for Human Intestinal Intraepithelial Lymphocytes.

Purification and application of a single-chain Fv antibody fragment specific to hepatitis B virus surface antigen.

Impaired cellular immune response in harbour seals (*Phoca vitulina*) feeding on environmentally contaminated herring.

Cyclophosphamide: review of its mutagenicity for an assessment of potential germ cell risks.

Immunosuppressive activity of polychlorinated biphenyl mixtures and congeners: nonadditive (antagonistic) interactions.

A novel type of cell death of lymphocytes induced by a monoclonal antibody without participation of complement.

A peptide, ALTTE, within the fimbrial subunit protein from *Porphyromonas gingivalis*, induces production of interleukin 6, gene expression and protein phosphorylation in human peripheral blood mononuclear cells.

Site-specific crosslinking of 4-thiouridine-modified human tRNA(3Lys) to reverse transcriptase from human immunodeficiency virus type I.

Inhibition of viral replication by nitric oxide and its reversal by ferrous sulfate and tricarboxylic acid cycle metabolites.

Halogenated aromatic hydrocarbon-induced suppression of the plaque-forming cell response in B6C3F1 splenocytes cultured with allogenic mouse serum: Ah receptor structure activity relationships.

Dioxin activates HIV-1 gene expression by an oxidative stress pathway requiring a functional cytochrome P450 CYP1A1 enzyme.

Suppression of cytotoxic T lymphocyte activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin occurs in vivo, but not in vitro, and is independent of corticosterone elevation.

Hydrogen peroxide induces microvilli on human retinal pigment epithelial cells in culture.

Proliferative capacity of marmoset lymphocytes after tetanus vaccination and lack of 2,3,7,8-tetrachlorodibenzo-p-dioxin to reduce a booster effect.

Chlorinated dibenzo-p-dioxins and dibenzofurans and the human immune system. 2. In vitro proliferation of lymphocytes from workers with quantified moderately-increased body burdens.

BW-755C diminishes smoke-induced pulmonary edema.

Toxicology of methyl bromide.

Atypical apoptotic cell death induced in L929 targets by exposure to tumor necrosis factor.

Analysis of whole-blood cyclosporin G by liquid chromatography in renal transplant recipients.

Mechanisms controlling nitric oxide synthesis in osteoblasts.

[Pathologic characteristics of diffuse alveolar damage induced by paraquat in rat lungs].

Nitric oxide as a mediator of oxidant lung injury due to paraquat.

Cyclooxygenase and lipoxygenase inhibition by BW-755C reduces acrolein smoke-induced acute lung injury.

Paraquat poisoning by skin absorption: report of two cases.

Interactions of herbicides 2,4-D and dinoseb with liver mitochondrial bioenergetics.

Remodeling of the alveolar structure in the paraquat lung of humans: a morphometric study.

[Allergic diseases caused by pesticides: 3 case reports].

Regulation of antioxidant enzymes in lung after oxidant injury.

Characterization of the capsaicin-sensitive component of cyclophosphamide-induced inflammation in the rat urinary bladder.

Acute intramuscular injection of oils or the oleic acid component protects mice against paraquat lethality.

Effect of Tordon 2,4-D 64/240 triethanolamine BR on the energy metabolism of rat liver mitochondria.

Histochemical demonstration of hydrogen peroxide production by leukocytes in fixed-frozen tissue sections of inflammatory lesions.

Effect of in vivo desensitization to leukotriene B₄ on eosinophil infiltration in response to C5a in guinea-pig skin.

Antibodies to collagen: comparative epitope mapping in women with silicone breast implants, systemic lupus erythematosus and rheumatoid arthritis.

[Respiratory disease in the tertiary emergency hospital].

[Mechanisms for cell damage in acute pancreatitis using isolated acinar cells].

[Erythropoietin].

T cell regulation of collagen-induced arthritis in mice. III. Is T cell vaccination a valuable therapy?

Tyrosine kinase activation by Newcastle disease virus is required for TNF- α gene induction in astrocytes.

Menière's disease: role of antibodies against basement membrane antigens.

Selective closure of the vascular bed of an experimental glioma model during in situ saline perfusion.

Reaction of inflamed periapical tissue to intracanal medicaments and root canal sealers.

A case of germinal center formation by CD45RO T and CD20 B lymphocytes in rheumatoid arthritic subchondral bone: proposal for a two-compartment model of immune-mediated disease with implications for immunotherapeutic strategies.

Swine testis cells contain functional heparan sulfate but are defective in entry of herpes simplex virus.

Analgesic effects of callus culture extracts from selected species of *Phyllanthus* in mice.

Echographic evaluation with image analysis of irritant reactions induced by nonanoic acid and hydrochloric acid.

Acute inflammatory response to sheep red blood cells in mice treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin: the role of proinflammatory cytokines, IL-1 and TNF.

CD40 signaling pathway: anti-CD40 monoclonal antibody induces rapid dephosphorylation and phosphorylation of tyrosine-phosphorylated proteins including protein tyrosine kinase Lyn, Fyn, and Syk and the appearance of a 28-kD tyrosine phosphorylated protein.

Coxsackievirus B3 infection alters the uptake of 2,3,7,8-tetrachlorodibenzo-p-dioxin into various tissues of the mouse.

[SMANCS/lipiodol].

Post mortem diagnosis of *Mycobacterium bovis* infection in cattle.

Anaemia, iron deficiency and malaria in a rural community in Brazilian Amazon.

[The mechanism of articular cartilage degeneration in osteoarthritis].

Identification of antibody epitopes in the CB-11 peptide of bovine type II collagen recognized by sera from arthritis-susceptible and -resistant rhesus monkeys.

Monitoring biological effects of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls in great blue heron chicks (*Ardea herodias*) in British Columbia.

Identification of heat shock proteins binding to an immunodominant uveitopathogenic peptide of IRBP.

Y2 receptors for neuropeptide Y are coupled to three intracellular signal transduction pathways in a human neuroblastoma cell line.

Clofazimine alters the energy metabolism and inhibits the growth rate of a human lung-cancer cell line in vitro and in vivo.

Characterization of the T cell determinants in the induction of autoimmune arthritis by bovine alpha 1(II)-CB11 in H-2q mice.

Increased native chemiluminescence in granulocytes isolated from synovial fluid and peripheral blood of patients with rheumatoid arthritis.

The induction of persistence of I-A expression by macrophages from Bcgr mice occurs via a protein kinase C-dependent pathway.

Regulation of the BZLF1 promoter of Epstein-Barr virus by second messengers in anti-immunoglobulin-treated B cells.

Developmental toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the most TCDD-resistant and -susceptible rat strains.

Human intestinal alkaline phosphatase-binding IgG in patients with severe bacterial infections.

Histochemical demonstration of free radicals (H₂O₂) in ischemic brain edema and protective effects of human recombinant superoxide dismutase on ischemic neuronal damage.

Combining estimates of the odds ratio: the state of the art.

The rice culture filtrate of *Bacillus cereus* isolated from emetic-type food poisoning causes mitochondrial swelling in a HEP-2 cell.

Hodgkin's and non-Hodgkin's lymphomas.

Purification of NADPH-dependent dehydroascorbate reductase from rat liver and its identification with 3 alpha-hydroxysteroid dehydrogenase.

Lipid peroxidation and chemiluminescence during naproxen metabolism in rat liver microsomes.

Influence of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on TNF-alpha levels in the skin of congenic haired and hairless mice.

Induction in vitro of 72-kD heat shock protein in a continuous culture of rat thyroid cells, FRTL5.

Genistein reduces tumor necrosis factor alpha-induced plasminogen activator inhibitor-1 transcription but not urokinase expression in human endothelial cells.

Characterisation of oxidative injury to an intestinal cell line (HT-29) by hydrogen peroxide.

Heat shock-induced cell death in murine microvascular endothelial cells depends on priming with tumor necrosis factor-alpha or interferon-gamma.

Effect of rate of intracellular transport and diacytosis on cytotoxicity of hybrid toxins. Study with hybrids using hepatic asialoglycoprotein receptor-mediated endocytosis.

Inhibitory effects of calcium antagonists on mitochondrial swelling induced by lipid peroxidation or arachidonic acid in the rat brain in vitro.

Role of neutrophils and nitric oxide in lung alveolar injury from smoke inhalation.

Pathological findings in rabbits and sheep following the subacute administration of triphenyltin acetate.

A volume-activated taurine channel in skate hepatocytes: membrane polarity and role of intracellular ATP.

Human growth hormone increases cytosolic free calcium in cultured human IM-9 lymphocytes: a novel mechanism of growth hormone transmembrane signalling.

Specificity of antibodies to type II collagen in early rheumatoid arthritis.

VIP enhances and nitric oxide synthase inhibitor reduces survival of rat lungs perfused ex vivo.

Stimulation of collagen alpha 1(I) gene expression is associated with lipid peroxidation in hepatocellular injury: a link to tissue fibrosis?

The interaction of immunosuppressive compounds in tandem stimulated peripheral human lymphocytes.

Acetylsalicylate (ASA)-induced mitochondrial dysfunction and its potentiation by Ca²⁺.

Effects of oxidative stress on expression of extracellular superoxide dismutase, CuZn-superoxide dismutase and Mn-superoxide dismutase in human dermal fibroblasts.

Serum modulation of the effects of TCDD on the in vitro antibody response and on enzyme induction in primary hepatocytes.

NTP Toxicology and Carcinogenesis Studies of o-Benzyl-p-Chlorophenol (CAS No. 120-32-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Lack of direct immunosuppressive effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on human peripheral blood lymphocyte subsets in vitro.

Dioxin-enhanced expression of interleukin-1 beta in human epidermal keratinocytes: potential role in the modulation of immune and inflammatory responses.

[The place of pentachlorophenol in general medicinal practice].

Human pentachlorophenol poisoning.

Viral infections and chemical exposures as risk factors for hepatocellular carcinoma in Vietnam.

Phototoxic contact dermatitis with toxic hepatitis due to the percutaneous absorption of paraquat.

The pneumotoxicant paraquat induces IL-8 mRNA in human mononuclear cells and pulmonary epithelial cells.

The toxicologic interactions resulting from inhalation of carbon black and acrolein on pulmonary antibacterial and antiviral defenses.

Parkinson's disease: a test of the multifactorial etiologic hypothesis.

N-acetylcysteine delays the infiltration of inflammatory cells into the lungs of paraquat-intoxicated rats.

Acrolein increases airway sensitivity to substance P and decreases NEP activity in guinea pigs.

[Intoxications by a weedkiller preparation containing glyphosate].

Toxicological and immune findings in workers exposed to pentachlorophenol (PCP).

Community exposure to a paraquat drift.

Protective role for neuropeptides in acute pulmonary response to acrolein in guinea pigs.

Methoxyacetaldehyde, an intermediate metabolite of 2-methoxyethanol, is immunosuppressive in the rat.

PGI₂ production and angiotensin converting enzyme activity in cultured porcine pulmonary artery endothelial cells treated with paraquat.

Superoxide dismutase activity of *Mycobacterium avium* complex (MAC) strains isolated from AIDS patients.

Differential patterns of epidermal leukocyte infiltration in patch test reactions to structurally unrelated chemical irritants.

Isomer-specific analysis and toxic evaluation of polychlorinated biphenyls in striped dolphins affected by an epizootic in the western Mediterranean sea.

AIDS and agricultural production. Report of a land utilization survey, Masaka and Rakai districts of Uganda.

Liver damage due to free radicals.

T cell epitopes of type II collagen that regulate murine collagen-induced arthritis.

Increased formation of 8-hydroxydeoxyguanosine, an oxidative DNA damage, in lymphoblasts from Fanconi's anemia patients due to possible catalase deficiency.

Inhibitory effects of alpha- and beta-carotene on croton oil-induced or enzymatic lipid peroxidation and hydroperoxide production in mouse skin epidermis.

Environmental antecedents of young-onset Parkinson's disease.

An acute model for IgA-mediated glomerular inflammation in rats induced by monoclonal polymeric rat IgA antibodies.

Increased serum catalase activity in rats subjected to thermal skin injury.

Calcium ions are required for cell fusion mediated by the CD4-human immunodeficiency virus type 1 envelope glycoprotein interaction.

Prevention of experimental autoimmune arthritis with a peptide fragment of type II collagen.

Quantitative immunoassays for type II collagen and its cyanogen bromide peptides.

Cell-surface heparan sulfate proteoglycan mediates HIV-1 infection of T-cell lines.

Teratogenicity and immunotoxicity of 3,3',4,4',5-pentachlorobiphenyl in C57BL/6 mice.

Chronic arsenicism: criminal poisoning or drug-intoxication? Report of two cases.

Microinjection of a monoclonal antibody against SPN antigen, now identified by peptide sequences as the NuMA protein, induces micronuclei in PtK2 cells.

Skin dendritic cell-lymphocyte interactions in autologous system.

Lactoferrin co-purifies with myeloperoxidase and is recognised by anti-neutrophil cytoplasm antibodies.

T-cell activation influences initial DNA synthesis of simian immunodeficiency virus in resting T lymphocytes from macaques.

Cadmium induces interleukin-8 production in human peripheral blood mononuclear cells with the concomitant generation of superoxide radicals.

Singlet oxygen induces collagenase expression in human skin fibroblasts.

The effect of cytoplasmic domain mutations on membrane anchoring and glycoprotein processing of herpes simplex virus type 1 glycoprotein C.

Restricted transport of cyclosporin A across the blood-brain barrier by a multidrug transporter, P-glycoprotein.

Allyl compounds selectively killed human immunodeficiency virus (type 1)-infected cells.

Influence of some biological response modifiers on swelling of rat liver mitochondria in vitro.

Modulatory effect of hyperthermia on hepatic microsomal cytochrome P450 in mice.

Isolated human and rabbit eye: Models of corneal toxicity.

Tyrosyl radical generated by myeloperoxidase catalyzes the oxidative cross-linking of proteins.

Lipid peroxidation of the brush-border membrane: membrane physical properties and glucose transport.

Protein kinase C and protein tyrosine kinase activity contribute to mitogenic signaling by endothelin-1. Cross-talk between G protein-coupled receptors and pp60c-src.

NTP Toxicology and Carcinogenesis Studies of Pentachloroanisole (CAS No. 1825-21-4) in F344 Rats and B6C3F1 Mice (Feed Studies).

Acute inflammatory response to sheep red blood cell challenge in mice treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): phenotypic and functional analysis of peritoneal exudate cells.

Stimulatory effect of the CYP1A1 inducer 2,3,7,8-tetrachlorodibenzo-p-dioxin on the reproduction of HIV-1 in human lymphoid cell culture.

Stereoselective determination of the active metabolites of a new anti-inflammatory agent (CS-670) in human and rat plasma using antibody-mediated extraction and high-performance liquid chromatography.

The herpes simplex virus type 1 US11 gene product is a phosphorylated protein found to be non-specifically associated with both ribosomal subunits.

Dityrosine, a specific marker of oxidation, is synthesized by the myeloperoxidase-hydrogen peroxide system of human neutrophils and macrophages.

One-year toxicity of orally administered acrolein to the beagle dog.

Chronic liver injury in phenoxy herbicide-exposed Vietnam veterans.

Cutaneous toxicity and absorption of paraquat in porcine skin.

[Toxic and drug-induced lesions of the pulmonary parenchyma].

The acrolein cytotoxicity and cytoprotective action of alpha-tocopherol in primary cultured rat hepatocytes.

Acute toxicological studies on paraquat: pathological findings in beagle dogs following single subcutaneous injections.

Smoke aldehyde component influences pulmonary edema.

Morphological changes on nerves and histopathological effects on liver and kidney of rats by pentachlorophenol (PCP).

Mechanisms of aldehyde-induced bronchial reactivity: role of airway epithelium.

Cytogenetic effects of alachlor and/or atrazine in vivo and in vitro.

Lung injury induced by paraquat, hyperoxia and cobalt chloride: effects of ambroxol.

Fatal paraquat poisoning: a light microscopic study in eight autopsy cases.

Immunocytochemical observation of paraquat-induced alveolitis with special reference to class II MHC antigens.

The effect of Lasso herbicide on human immune function as measured by in vitro assays.

Microtiter particle agglutination test for diagnosis of leprosy.

Platelet prevention of oxidant lung oedema is not mediated through scavenging of hydrogen peroxide.

Selective eosinophil leukocyte recruitment by transendothelial migration and not by leukocyte-endothelial cell adhesion.

Pharmacologically active phenylpropanoids from *Senra incana*.

Preservation of keratin expression in oral mucosa using a novel transport medium.

Responses of vascular endothelial oxidant metabolism to lipopolysaccharide and tumor necrosis factor- α .

Coenzyme A esters of 2-aryloxyphenoxypropionate herbicides and 2-arylpropionate antiinflammatory drugs are potent and stereoselective inhibitors of rat liver acetyl-CoA carboxylase.

Case report: neuropathology of methyl bromide intoxication.

Evidence of a neurogenic component during IgE-mediated inflammation in mouse skin.

Mucosal reactive oxygen metabolite production in duodenal ulcer disease.

Inhibition of acute TCDD toxicity by treatment with anti-tumor necrosis factor antibody or dexamethasone.

Immunosuppressive therapy and acquired immunological disorders.

Cytochemical detection of superoxide in cerebral inflammation and ischemia in vivo.

Iron deficiency and anemia of chronic disease. Clues to differentiating these conditions.

Endoscopic treatment of vesicoureteral reflux with a self-detachable balloon system.

Collagen-induced arthritis in rats. Examination of the epitope specificities of circulating and cartilage-bound antibodies produced by outbred and inbred rats using cyanogen bromide-derived peptides purified from heterologous and homologous type II collagens.

A case of ulcerative colitis induced by oral ferrous sulfate.

Immunogenetics of collagen-induced arthritis in rats. Both MHC and non-MHC gene products determine the epitope specificity of immune response to bovine and chick type II collagens.

Type I keratinocyte transglutaminase: expression in human skin and psoriasis.

Chemiluminescence assay of mucosal reactive oxygen metabolites in inflammatory bowel disease.

Anti-Ro autoantibody with cross-reactive binding to the heavy chain of immunoglobulin G.

Hepatotoxicity and carcinogenicity in female Sprague-Dawley rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): a pathology working group reevaluation.

Modulation of type II collagen-induced arthritis in DBA/1 mice by intravenous application of a peptide from the C1q-A chain.

Epstein-Barr virus enters B cells and epithelial cells by different routes.

Relationship between thermal tolerance and protein degradation in temperature-sensitive mouse cells.

The role of occupational exposure and immunodeficiency in B-cell malignancies. Working Group on the Epidemiology of Hematolymphopoietic Malignancies in Italy.

Risk factors for adult soft tissue sarcoma in northern Italy.

Chemicals trophic for the thymus: risk for immunodeficiency and autoimmunity.

Integration of the human lymphocyte into immunotoxicological investigations.

Identification of thyroiditogenic epitope on porcine thyroid peroxidase for C57BL/6 mice.

[Phenazon metabolism in children with liver diseases].

[Problems and eradication of *Ambrosia artemisiifolia* L. in Quebec in the urban and suburban environments].

Permeation and destructive effects of disinfectants on protective gloves.

Identification, purification, and partial sequence analysis of autotaxin, a novel motility-stimulating protein.

Antioxidant activity of bronchoalveolar lavage fluid in the adult respiratory distress syndrome.

Metabolically dependent blood-brain barrier breakdown in chronic relapsing experimental allergic encephalomyelitis.

Fatal systemic poisoning after skin exposure to monochloroacetic acid.

Epitope specificity of antibodies to type II collagen in rheumatoid arthritis and systemic lupus erythematosus.

Clinical and cytologic aspects of ocular late-phase reaction in the guinea pig.

Amelioration of dermal lesions in streptozotocin-induced diabetic rats by aminoguanidine.

Amyloid enhancing factor activity is associated with ubiquitin.

Enhanced suppression of humoral immunity in DBA/2 mice following subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Siderophore production and membrane alterations by *Bordetella pertussis* in response to iron starvation.

Tiaprofenic acid-induced photohemolysis in vitro is inhibited by nimesulide.

IgE-mediated inhalant allergy in inhabitants of a building infested by the rice weevil (*Sitophilus oryzae*).

Antibody epitopes sensitive to the state of human immunodeficiency virus type 1 gp41 oligomerization map to a putative alpha-helical region.

Disulfide bond structure of glycoprotein D of herpes simplex virus types 1 and 2.

Use of multiple-cause mortality data in epidemiologic analyses: US rate and proportion files developed by the National Institute for Occupational Safety and Health and the National Cancer Institute.

Synergism among oxidants, proteinases, phospholipases, microbial hemolysins, cationic proteins, and cytokines.

Identification of genes encoding two capsid proteins (VP24 and VP26) of herpes simplex virus type 1.

The potentiation of 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity by tamoxifen in female CD1 mice.

Computer modelling of the transmembrane channel formed by a CNBr peptide of diphtheria toxin B fragment.

Participation of tyrosine phosphorylation in the cytopathic effect of human immunodeficiency virus-1.

[Use of 2,4-dinitrophenol for immunosuppressive action on the recipient in implantation of fetal organs in mice].

Taurine transport in skate hepatocytes. II. Volume activation, energy, and sulfhydryl dependence.

NTP Toxicology and Carcinogenesis Studies of Monochloroacetic Acid (CAS No. 79-11-8) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on benzo(a)pyrene hydroxylase activity in embryos of the Japanese medaka (*Oryzias latipes*).

[The effect of osmotic pressure on oligomycin-sensitive ATPase activity and the liberation of Mg²⁺ from liver mitochondria of rats of various ages].

Type I lipid photo-oxidation by the nonsteroidal anti-inflammatory drug suprofen: a possible key to its photosensitivity.

The upper respiratory tract: mucous membrane irritation.

Fructose 1,6-diphosphate augments paraquat injury in isolated dog lungs.

[Arachidonic acid metabolism and angiotensin converting enzyme activity by cultured porcine pulmonary artery endothelial cells are affected with paraquat].

Betamethasone effects on paraquat lung toxicity.

Immunological consequences of exposure to pentachlorophenol.

[Cholestatic hepatitis caused by cyanamide].

[The immunomorphological characteristics of a focal staphylococcal infection against a background of long-term exposure to low doses of simazine].

Taiwan National Poison Center survey of glyphosate--surfactant herbicide ingestions.

Effects of 2,4,5-trichlorophenoxyacetic acid, pentachlorophenol, methylprednisolone, and Freund's adjuvant on 2-hydroxyethylnitrosourea carcinogenesis in MRC-Wistar rats.

[Ultrastructural changes in the adenohypophysis-thyroid system in chronic poisoning by the herbicide linuron].

Acute poisoning with a glyphosate-surfactant herbicide ('Roundup'): a review of 93 cases.

[Morphological evidence of the possible role of cytochrome P-450 in the development of an autoimmune process in the liver].

Uptake and metabolism of iodine is crucial for the development of thyroiditis in obese strain chickens.

Induction of NAD(P)H:quinone reductase in human peripheral blood lymphocytes.

The degradation of type II collagen in rheumatoid arthritis: an immunoelectron microscopic study.

Induction of hepatic metallothionein by nonmetallic compounds associated with acute-phase response in inflammation.

Great Lakes embryo mortality, edema, and deformities syndrome (GLEMEDS) in colonial fish-eating birds: similarity to chick-edema disease.

Molecular mechanism of drug photosensitization. Part 3. Photohemolysis sensitized by diflunisal.

Ninety day toxicity study of chloroacetic acids in rats.

A continuously rotating passive agglutination method using rapidly precipitable latex particles and its application.

Ah receptor mediating induction of cytochrome P450IA1 in a novel continuous human liver cell line (Mz-Hep-1). Detection by binding with [3H]2,3,7,8-tetrachlorodibenzo-p-dioxin and relationship to the activity of aryl hydrocarbon hydroxylase.

Scanning electron microscopic observations on muscle cells of experimental mitochondrial myopathy produced by 2, 4-dinitrophenol.

In-vivo epidermal nuclear reactions: a selective process.

Heat treatment induces an increase in intracellular cyclic AMP content in human epidermoid A-431 cells.

Mechanisms of disruption of the articular cartilage surface in inflammation. Neutrophil elastase increases availability of collagen type II epitopes for binding with antibody on the surface of articular cartilage.

[Intestinal obstruction caused by non-absorbable tablets and Budd-Chiari syndrome in a patient with Crohn's disease].

Engraftment and development of human T and B cells in mice after bone marrow transplantation.

Comparison of 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated hepatotoxicity in C57BL/6J and DBA/2J mice.

Washed human platelets prevent ischemia-reperfusion edema in isolated rabbit lungs.

Dioxin contamination and growth and development in great blue heron embryos.

Oxidation of articular cartilage glyceraldehyde-3-phosphate dehydrogenase (G3PDH) occurs in vivo during carrageenin-induced arthritis.

Histological study of therapy for infected nonvital permanent teeth with incompletely formed apices.

Reversibility of thymic atrophy induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and bis(tri-n-butyltin)oxide (TBTO).

[Role of collagen conformation in type II anticollagen immunity in rheumatoid polyarthritis].

Tear volume in early and late phases of ocular anaphylaxis in guinea pigs.

Intra- and inter-individual variations in cornified envelope peptide composition in normal and psoriatic skin.

Structure-function studies of S-antigen: use of proteases to reveal a dominant uveitogenic site.

Identification of antibody epitopes within the CB-11 peptide of type II collagen. II. Computer modelling studies of peptides and the interpretation of epitope scanning results.

Identification of antibody epitopes within the CB-11 peptide of type II collagen. I: Detection of antibody binding sites by epitope scanning.

Diversity of the immune response to bovine type II and XI collagens in rats.

Suppression of type II collagen-induced arthritis by monoclonal antibodies.

On the mechanism of action of interferons: interaction with nonsteroidal anti-inflammatory agents, pentoxifylline (Trental) and cGMP inducers.

Morphological changes of isolated rat liver mitochondria during Fe²⁺/ascorbate-induced peroxidation and the effect of thiocitacid.

Evaluation of potential chemoprotectants against microcystin-LR hepatotoxicity in mice.

Characterization of fusion from without induced by herpes simplex virus.

Toxic interactions in the rat nose: pollutants from soiled bedding and methyl bromide.

Polyhalogenated dibenzo-p-dioxins and dibenzofurans and the immune system. 3. No immunosuppressive effect of 2,3,7,8-TCDD in the popliteal lymph node assay (PLNA) in rats.

Primary structure of the catalytic subunit of calf thymus DNA polymerase delta: sequence similarities with other DNA polymerases.

Effect of endocytic and metabolic inhibitors on the internalization and intracellular growth of *Brucella abortus* in Vero cells.

NTP Toxicology and Carcinogenesis Studies of Sodium Azide (CAS: 26628-22-8) in F344 Rats (Gavage Studies).

Inhibition of human immunodeficiency virus type-1-induced syncytium formation and cytopathicity by complestatin.

[Oxidative activity and Delta(Psi) of liver mitochondria of active and hibernating ground squirrels during various incubation conditions].

Uptake of glutathione by renal cortical mitochondria.

Evidence for arsenic as the immunosuppressive component of gallium arsenide.

Expression of the core antigen gene of hepatitis B virus (HBV) in *Acetobacter methanolicus* using broad-host-range vectors.

Effects of environmental toxins on lymphocyte function: studies in rhesus and man.

Role of eicosanoids, inositol phosphates and extracellular Ca²⁺ in cell-volume regulation of rat liver.

Protection by human serum from the immunosuppression induced by spermine in vitro.

Halogenated aryl hydrocarbon-induced suppression of the in vitro plaque-forming cell response to sheep red blood cells is not dependent on the Ah receptor.

Complete amino acid sequence of the FK506 and rapamycin binding protein, FKBP, isolated from calf thymus.

Lichen planus-like eruption with esophageal involvement as a result of cyanamide.

Biochemical alterations in skeletal muscle induced by 2,4-dichlorophenoxyacetic butyl ester during chick embryonic development.

Toxicity of lindane, atrazine, and deltamethrin to early life stages of zebrafish (*Brachydanio rerio*).

[An immunological and morphological study of focal staphylococcal infection against a background of long-term exposure to the herbicide linuron].

[Scanning electron microscopic study of rat lungs in experimental chronic paraquat poisoning].

[The immunomorphological characteristics of prolonged exposure to the herbicide linuron].

Chronic toxicity and oncogenicity of picloram in Fischer 344 rats.

Involvement of prostaglandins in paraquat intoxication.

[Pulmonary lesion of paraquat poisoning on high resolution CT].

Initial accumulation of paraquat in the heart leading to acute death.

Inhibition of lung damage caused by paraquat with lymphokines or cytokines.

Oxygen radicals in lung pathology.

Role of sulfidopeptide leukotrienes in synthetic smoke inhalation injury in sheep.

Derecruitment of filtration surface area in paraquat-injured isolated dog lungs.

Co-existence of hepatocyte ground-glass inclusions from several causes.

Mechanisms of in vitro immunosuppression by hepatocyte-generated cyclophosphamide metabolites and 4-hydroperoxycyclophosphamide.

[Analysis of musk rheumatic oil by GC/FTIR].

Hydrogen peroxide-induced alterations in prostaglandin secretion in the rat colon in vitro.

Arachidonic acid metabolism by dioxin-induced cytochrome P-450: a new hypothesis on the role of P-450 in dioxin toxicity.

Towards a more effective management of pregnancy related anaemias in Africa.

End-tidal CO₂, CO₂ production, and O₂ consumption as early indicators of approaching hyperthermia.

Human HLA-DR beta gene hypervariable region homology in the biobreeding BB rat: selection of the diabetic-resistant subline as a rheumatoid arthritis research tool to characterize the immunopathologic response to human type II collagen.

Specificity of antibodies to type II collagen in rheumatoid arthritis.

Human immunodeficiency virus I-induced expression of P-glycoprotein.

[Excretion of phenol and p-cresol in the urine in fasting obese individuals and in persons treated with total enteral nutrition].

Photosensitizing potential of benzanthrone.

Late pulmonary allergic responses in actively but not passively IgE-sensitized rats.

Diversity of antibodies to type II collagen in patients with rheumatoid arthritis: detection by binding to alpha-chains and to cyanogen bromide peptides.

Influence of the Ah locus on the humoral immunotoxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: evidence for Ah-receptor-dependent and Ah-receptor-independent mechanisms of immunosuppression.

Differential toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C57BL/6J mice congenic at the Ah Locus.

Intraabdominal sepsis: effects on polymorphonuclear leukocyte Fc receptor-mediated phagocytosis.

Identification of cytochrome P450IA2 as a human autoantigen.

Stable expression of mouse Cyp1a1 and human CYP1A2 cDNAs transfected into mouse hepatoma cells lacking detectable P450 enzyme activity.

Isoproterenol-induced maximal heart rate in normothermic and hyperthermic horses.

Decreased survival rate of pancreatic acinar cells isolated from rats with acute pancreatitis.

Molecular cloning of a cDNA encoding a major pathogenic domain of the Heymann nephritis antigen gp330.

Risk factors for squamous cell carcinoma of the skin in Saskatchewan, Canada.

Histological examination of the temporal bone in medicolegal cases of asphyxia.

Ibuprofen, a putative anti-cataract drug, protects the lens against cyanate and galactose.

Neurogenic inflammation, vascular permeability, and mast cells. Capsaicin desensitization fails to influence IgE-anti-DNP induced vascular permeability in rat airways.

Antibodies to type II collagen in SLE: a role in the pathogenesis of deforming arthritis?

Unintentional methyl bromide gas release--Florida, 1988.

Cornified envelopes in congenital disorders of keratinization.

The antioxidative properties of carnosine and other drugs.

Cross-antigenicity between the major surface proteins (ospA and ospB) and other proteins of *Borrelia burgdorferi*.

Simulation of aspects of ischemia in cell culture: changes in lactate compartmentation.

Inhibition of lipoxygenase of rat dental pulp and human platelets by phenolic dental medicaments.

Local mechanical oscillations of the cell surface within the range 0.2-30 Hz.

A new perspective of S-antigen from immunochemical analysis.

Lung injury in Fischer but not Sprague-Dawley rats after short-term hyperoxia.

[Effect of inflammatory mediators on respiration in rat liver mitochondria].

Prothymocyte activity is reduced by perinatal 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

Drug-induced esophageal injury. Histopathological study in a rabbit model.

Reduction of phosphate-induced dysfunction in rat heart mitochondria by carnitine.

Lysis of fibrillar collagen by neutrophils in synovial fluid. A role for surface-bound immunoglobulins.

Comparison of the intoxication pathways of tumor necrosis factor and diphtheria toxin.

[Ifosfamide-induced urinary bladder lesion and its inhibition by mesna].

Flow cytometric analysis of lymphocyte subpopulations in the spleen and thymus of mice exposed to an acute immunosuppressive dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

[Morphofunctional status of blood and bone marrow cells in acute experimental hepatitis induced by allyl alcohol].

Expression and biochemical characterization of human immunodeficiency virus type 1 nef gene product.

Immunosuppressive activities of polychlorinated biphenyls in C57BL/6N mice: structure-activity relationships as Ah receptor agonists and partial antagonists.

Characteristics of histamine release from rat mast cells induced by a bracken toxin, braxin A1.

Respiratory inhibitors and uncouplers prevent the aeration-induced increase in mitochondrial anion conductivity.

NTP Toxicology and Carcinogenesis Studies of Iodinated Glycerol (Organidin(R).) (CAS No. 5634-39-9) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Arrangement of disulfide bridges and positions of sulfhydryl groups in tetanus toxin.

Herpes simplex virus type 1 ribonucleotide reductase: selective and synergistic inactivation by A1110U and its iron complex.

Isolation and sequencing of NOP1. A yeast gene encoding a nucleolar protein homologous to a human autoimmune antigen.

Use of the acyl azide method for cross-linking collagen-rich tissues such as pericardium.

Dioxin levels in adipose tissues of hospitalized women living in the south of Vietnam in 1984-89 with a brief review of their clinical histories.

Effect of PO₂ and metabolic inhibitors on ionic fluxes across the isolated rabbit corneal endothelium.

Structure and interaction with model membranes of a CNBR peptide of diphtheria toxin B fragment.

[The effect of 2,3,7,8-tetrachlorodibenzo-para-dioxin on the reproduction of human immunodeficiency virus in lymphoid cell cultures].

Multiple, spatially distinct T cell epitopes within a pathogenic 123 residue cyanogen bromide peptide of bovine retinal s-antigen.

Effect of herbicide banvel on rabbit vaginal mucus membrane.

Acute health effects of community exposure to cotton defoliants.

[Photoallergic dermatitis caused by the herbicide phenmedipham].

Total exclusion from external respiration protects lungs from development of fibrosis after paraquat intoxication.

[Hepatotoxicity induced by cyanamide. A review of the anatomicopathological changes apropos a case].

Contact stomatitis caused by toothpaste.

Bronchial artery ligation modifies pulmonary edema after exposure to smoke with acrolein.

[A clinical study of pulmonary edema on paraquat poisoning by double indicator dilution method using heat and sodium].

[Paraquat poisoning. Pulmonary lesions].

The effects of 24% paraquat (1,1'-dimethyl-4,4'-bipyridylium dichloride) on hemodynamics, blood gases, plasma lactate and plasma catecholamines in dogs.

[Paraquat poisoning: clinical and anatomopathologic aspects in 3 cases].

[Lung changes in rats under the action of paraquat and the importance of antioxidants].

An evaluation of purified reconstituted type 1 collagen fibers.

Experimental pulmonary fibrosis induced by paraquat plus oxygen in rats: a morphologic and biochemical sequential study.

Bronchial responsiveness and inflammation in guinea pigs exposed to acrolein.

Chromatographic approaches to the quality control of chiral propionate anti-inflammatory drugs and herbicides.

Identification of an immunosuppressive epitope of type II collagen that confers protection against collagen-induced arthritis.

Pattern of humoral reactivity to type II collagen in rheumatoid arthritis.

Epidermal damage induced by irritants in man: a light and electron microscopic study.

[Noncirrhotic liver fibrosis after chronic arsenic poisoning].

Identification of T cell recognition sites in S-antigen: dissociation of proliferative and pathogenic sites.

Collagen types and matrix protein content in human abdominal aortic aneurysms.

Prediction and evaluation of the effect of iron treatment in anaemic RA patients.

Characteristics of 2,3,7,8-tetrachlorodibenzo-p-dioxin induced endotoxin hypersensitivity: association with hepatotoxicity.

Sex-linked differences in susceptibility of cynomolgus monkeys to type II collagen-induced arthritis. Evidence that epitope-specific immune suppression is involved in the regulation of type II collagen autoantibody formation.

[Rapid local oscillations of the surface of the human erythrocyte].

Chronic arsenicism with vitiligo, hyperthyroidism, and cancer.

Skin reactions to irritants assessed by non-invasive bioengineering methods.

Covalent structure of collagen. Amino acid sequence of an arthritogenic cyanogen bromide peptide from type II collagen of bovine cartilage.

Developmental toxicity of perfluorodecanoic acid in C57BL/6N mice.

The anti-inflammatory effects of phenolic dental medicaments as determined by mouse ear edema assay.

In vivo susceptibility of *Campylobacter pylori*.

Binding sites of attachment-inhibiting monoclonal antibodies and antibodies from patients on peptide fragments of the *Mycoplasma pneumoniae* adhesin.

[A case of remarkable bronchial stenosis due to aspiration of delayed-release iron tablet].

Carriage of *Staphylococcus aureus* and inflamed infusion sites with insulin-pump therapy.

Detection of activated lymphocyte subsets by fluorescence and MTT staining.

The epidemiology of non-Hodgkin's lymphoma in the north-east of Italy: a hospital-based case-control study.

Monitoring of genetic instability in subjects with increased risk of cancer.

Reproductive toxicity and pharmacokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin. 1. Effects of high doses on the fertility of male rats.

Oxygen free radicals and corneal endothelium.

Immunopharmacological studies on *Picrorhiza kurroa* Royle-ex-Benth. Part IV: Cellular mechanisms of anti-inflammatory action.

Multiple mutations in the variable region of the kappa light chains of three monoclonal human IgM with anti-myelin-associated glycoprotein activity.

Diacytosis of asialoglycoprotein in isolated hepatocytes is dependent on the structure of ligand and cellular distribution of the receptors.

Photolabeling of Glu-129 of the S-1 subunit of pertussis toxin with NAD.

Variable porosity of the mitochondrial inner membrane induced by energization.

Translocation of diphtheria toxin A-fragment to the cytosol. Role of the site of interfragment cleavage.

Seasonal variation of skin resistance to irritants.

Metabolism of phenol and hydroquinone to reactive products by macrophage peroxidase or purified prostaglandin H synthase.

Synthesis, cytotoxicity, and antiviral activity of certain 7-[(2-hydroxyethoxy)methyl]pyrrolo[2,3-d]pyrimidine nucleosides related to toyocamycin and sangivamycin.

Benzoyl peroxide interaction with mitochondria: inhibition of respiration and induction of rapid, large-amplitude swelling.

Perturbations of the immune system by xenobiotics.

Molecular cloning and characterization of protective outer membrane protein P.69 from *Bordetella pertussis*.

Characterization of the calmodulin-binding and of the catalytic domains of *Bordetella pertussis* adenylate cyclase.

NTP Toxicology and Carcinogenesis Studies of Two Pentachlorophenol Technical-Grade Mixtures (CAS No. 87-86-5) in B6C3F1 Mice (Feed Studies).

Interaction of human eosinophils or neutrophils with *Trypanosoma cruzi* in vitro causes bystander cardiac cell damage.

Efficiency of respirator canisters with methyl bromide.

Effects of immunosuppressive chemicals on lymphoid development in foetal thymus organ cultures.

The use of multiple endpoints to define the mechanism of action of reproductive toxicants and germ cell mutagens.

[Catalytic component of calmodulin-independent adenylate cyclase from bovine brain. Isolation and determination of partial amino acid sequence].

Cationic polyelectrolytes: potent opsonic agents which activate the respiratory burst in leukocytes.

Effect of cellular function inhibitors on the infection of Frp/3 cells by hepatitis A virus.

Identification of the main immunogenic region of retinal S-antigen: subordinate influence of MHC, IGH, species or strain differences on the specificity of the antibody response.

Health and reproductive outcomes among American Legionnaires in relation to combat and herbicide exposure in Vietnam.

Topical non-steroidal anti-inflammatory drugs inhibit non-immunologic immediate contact reactions.

Brain damage due to paraquat poisoning: a fatal case with neuropathological examination of the brain.

Radiotherapy for the treatment of pulmonary complications of paraquat poisoning.

Synthetic smoke with acrolein but not HCl produces pulmonary edema.

Adverse effects of (15S)-15-methyl-prostaglandin E1 in normal and paraquat-exposed rats.

N-acetylcysteine in paraquat toxicity: toxicological and histological evaluation in rats.

Pulmonary elastic fiber degradation in paraquat toxicity. An electron microscopic immunohistochemical study.

Protective role of sulfhydryl reagents in oxidant lung injury.

The effect of paraquat lung on mononuclear cells.

Enhancement of in vivo and in vitro murine immune responses by the cyclophosphamide metabolite acrolein.

Protective effect of alpha-human atrial natriuretic polypeptide (alpha-hANP) on chemical-induced pulmonary edema.

Spontaneous lung chemiluminescence upon paraquat administration.

The development of a C1q anti-C1q immunoabsorbent for removal of immune complexes from plasma.

Stimulation of interleukin-1 alpha and interleukin-1 beta release from human monocytes by cyanogen bromide peptides of type II collagen.

Chemically induced inflammation in rat oral mucosa.

Kappa/lambda immunoglobulin distribution in Graves' thyroid-stimulating antibodies. Simultaneous analysis of C lambda gene polymorphisms.

Demonstration and characterization of a transient arthritis in rats following sensitization of synovial mast cells with antigen-specific IgE and parenteral challenge with specific antigen.

Virucidal efficacy of physico-chemical treatments against coronaviruses and parvoviruses of laboratory animals.

Synthetic peptides derived from IRBP induce EAU and EAP in Lewis rats.

[Effects of traxanox sodium on experimental nasal allergy].

Morphological and biochemical characterization of the cornified envelopes from human epidermal keratinocytes of different origin.

Dermal dysplasia characterized by collagen disorder-related skin fragility in a cow.

Skin lesions due to exposure to methyl bromide.

An immunotoxicological evaluation of 4,4'-thiobis-(6-t-butyl-m-cresol) in female B6C3F1 mice. 1. Body and organ weights, hematology, serum chemistries, bone marrow cellularity, and hepatic microsomal parameters.

Synthesis and pharmacological screening of some new triazoles.

Toxicity and disposition of 2,3,4,7,8-pentachlorodibenzofuran (4PeCDF) in the rhesus monkey (*Macaca mulatta*).

Cyanogen bromide fragments of bovine interphotoreceptor retinoid-binding protein induce experimental autoimmune uveoretinitis in Lewis rats.

HIV infection and dioxin exposure: risk factors for Kaposi sarcoma and malignant lymphoma?

Catalase prevents increased lung vascular permeability during air emboli in unanesthetized sheep.

Perfluoro-n-decanoic acid: induction of peroxisomal beta-oxidation by a fatty acid with dioxin-like toxicity.

Effect of catalase on endotoxin-induced acute lung injury in unanesthetized sheep.

Altered elastin and collagen synthesis associated with progressive pulmonary hypertension induced by monocrotaline. A biochemical and ultrastructural study.

Immunosuppressive effects of dioxin in the development of Kaposi's sarcoma and non-Hodgkin's lymphoma.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxicity in yellow perch (*Perca flavescens*).

Synthesis of ¹¹C-methylated inulin as a radiopharmaceutical for imaging brain edema and pulmonary edema.

[Multiple squamous cell cancer as a late effect following arsenic treatment of psoriasis].

Partial amino acid sequence analysis and variable subgroup determination (VH and VL) of a monoclonal rheumatoid factor derived from a rheumatoid arthritis patient.

Forestomach carcinogens: pathology and relevance to man.

NTP Toxicology and Carcinogenesis Studies of C.I. Acid Orange 3 (CAS No. 6373-74-6) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Heat-shock induction of the human immunodeficiency virus long terminal repeat.

Protective murine monoclonal antibodies to tetanus toxin.

Epitope mapping of bovine retinal S-antigen with monoclonal antibodies.

Crystal violet as an uncoupler of oxidative phosphorylation in rat liver mitochondria.

Evidence for immunoglobulin Fc receptor-mediated prostaglandin₂ and platelet-activating factor formation by cultured rat mesangial cells.

Localization of a biologically important epitope on toxic-shock-syndrome toxin-1.

Immunosuppressive activities of polychlorinated dibenzofuran congeners: quantitative structure-activity relationships and interactive effects.

Glycogenolysis in the rat isolated perfused liver as a measure of chemically induced liver toxicity.

Suppression of splenic lymphocyte function by 7,12-dimethylbenz[a]anthracene (DMBA) in vitro.

Action of the nonsteroidal anti-inflammatory agent, flufenamic acid, on calcium movements in isolated mitochondria.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on murine skin.

The pH-dependent conformational change of diphtheria toxin.

Assignment of several epitopes to cyanogen bromide peptides of bovine retinal S-antigen by immunoblotting with peptide-specific antibodies.

Effect of sodium and calcium channel blockade on the increase in spontaneous transmitter release produced by the mitochondrial inhibitor, dinitrophenol.

Structural characterization of recombinant hepatitis B surface antigen protein by mass spectrometry.

Stimulatory and inhibitory effects of sodium salts on adenylate cyclase of rat liver. Implications for salt modulation of guanine nucleotide-binding regulatory component function.

Molecular cloning and analysis of P. 69, a vir-controlled protein from Bordetella pertussis.

Selective pancreatic toxicity of palmitoylpentachlorophenol.

Acute, pharmacokinetic, and subchronic toxicological studies of 2,4-dichlorophenoxyacetic acid.

Acute sensitivity of BHT-induced alveolar toxicity to a diquat challenge in murine lungs.

Recovery after radiotherapy from severe interstitial pneumonia due to paraquat poisoning.

Cyanamide hepatotoxicity. Incidence and clinico-pathological features.

Eighty-five day postexposure follow-up study in Fischer 344 rats after repeated exposures to methyl isocyanate vapor.

[Clinicopathological evaluation of the lungs with unusual distribution of paraquat lesions].

[Immunodepressive effects of the herbicide 2,4-D on mice].

Effects of pentachlorophenol on the in vitro and in vivo antibody response.

Critical role of iodination for T cell recognition of thyroglobulin in experimental murine thyroid autoimmunity.

Acetylsalicylic acid inhibits non-immunologic contact urticaria.

3-amino-triazole effects on the eye of young and adult rabbits in the presence and absence of hydrogen peroxide.

Role of acetaldehyde in the ethanol-induced impairment of hepatic glycoprotein secretion in the rat in vivo.

Immunosuppression following exposure to 7,12-dimethylbenz[a]anthracene (DMBA) in Ah-responsive and Ah-nonresponsive mice.

An attempt at objectivity of post mortem diagnostic of brain oedema.

The effect of IgE-mediated mast cell degranulation on the expression of experimental contact sensitivity in the mouse.

Pulmonary interstitial fibrosis induced in hapten-immune hamsters.

Antigenicity and uveitogenicity of partially purified peptides of a retinal autoantigen, S-antigen.

[Treatment of anemia].

Apparent effect of catalase on airway edema in guinea pigs. Role of endotoxin contamination.

Type II collagen arthritis: identification of arthritogenic epitopes using fractionated anticollagen IgG.

Identification of a uveitogenic cyanogen bromide peptide of bovine retinal S-antigen and preparation of a uveitogenic, peptide-specific T cell line.

Clinical reports on plasma exchange in the Kidney Center, Tokai University School of Medicine.

Orientation staining for the demonstration of Mycobacterium leprae in semithin sections.

Oral toxicity of trichlorobenzyl chloride and its acid derivative.

[Experimental studies of the inflammation-inducing action of various agents used in the treatment of pulp diseases in deciduous teeth].

Exposure to hair dyes and polychlorinated dibenzo-p-dioxins in AIDS patients with Kaposi sarcoma: an epidemiological investigation.

[Acute lung failure--a critical analysis].

Reactions of oxyphenbutazone with active oxygen species.

Rat hepatic mitochondria are more sensitive to allyl alcohol than are those of mice.

Primary and secondary structure of bovine retinal S antigen (48-kDa protein).

Purification and characterization of rabbit ocular mucin.

The production of pregnancy associated alpha glycoprotein (PAG) from human peripheral blood mononuclear cells.

Liposome-mediated augmentation of catalase in alveolar type II cells protects against H₂O₂ injury.

An in vitro model for studying the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin to human thymus.

Affinity purification of tetanus toxin using polyclonal and monoclonal antibody immunoabsorbents.

Monoclonal B-cell response to diphtheria toxoid: evidence for cross-reactive epitopes.

Acute toxicity in the guinea pig and in vitro "dioxin-like" activity of the environmental contaminant 1,2,4,5,7,8-hexachloro (9H)xanthene.

Mechanisms of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin (HpCDD)-induced humoral immune suppression: evidence of primary defect in T-cell regulation.

Measurement of in vivo lipid peroxidation and toxicological significance.

Exochelin-mediated iron acquisition by the leprosy bacillus, *Mycobacterium leprae*.

Urticaria from contact with pentachlorophenate.

Synthetic seleno-organic compound with glutathione peroxidase-like activity in the chick.

Acute effect of paraquat on lung fluid balance and prostanoid production in awake sheep.

Hepatic disease associated with ground-glass inclusions in hepatocytes after cyanamide therapy.

Severe acute oxidant exposure: morphological damage and aerobic metabolism in the lung.

Case-control study of multiple myeloma and farming.

[Observations on paraquat lung during the recovery course by X-ray CT (three-window method)].

The effect of topically applied n-butylester of 2,4-dichlorophenoxyacetic acid on the immune response in mice.

The corrected collagen content in paraquat lungs.

Effects of acrolein on macrophage functions in rats.

Biological effects of the superoxide radical.

The impact of inhaled acrolein on hypertension-sensitive and resistant rats.

Further studies of lipid peroxidation in human paraquat poisoning.

Pseudomembranous colitis in a patient of paraquat intoxication.

Specific hemoperfusion through agarose acrobeads.

Paraquat-induced neutrophil alveolitis: reduction of the inflammatory response by pretreatment with endotoxin and hyperoxia.

Glial fibrillary acidic protein from normal and gliosed human brain. Demonstration of multiple related polypeptides.

Effect of polycations and polyanions on behavior of sheep red blood cell rosettes of human lymphocytes.

[Pulmonary edema due to inhalation of gas and vapors].

The ultrastructure and time sequence of the early stages of paraquat lung in rats.

Paraquat lung: a reappraisal.

The pathogenesis and structure of paraquat-induced pulmonary fibrosis in rats.

Fatal pulmonary intra-alveolar fibrosis after paraquat ingestion.

[Alveolitis and pulmonary fibrosis--an attempt at a synopsis].

Toxic effects of the herbicide paraquat.

Letter: Induction of giant mitochondria in mouse hepatocytes by diethyldithiocarbamate (DDC).

The effect of simazin on the ultrastructure and activities of some hydrolases of the rat liver.

New aspects of laboratory techniques for studies of Colorado tick fever.

[Agglutination reaction of antibody-sensitized erythrocytes with Colorado tick fever virus].

[Oxidative phosphorylation in the skeletal muscles of rabbits in the dynamics of dinitrophenol hyperthermia].

An immunoadsorbent process for removing hepatitis antigen from blood and plasma.

Studies on the species-variability of experimental allergic encephalomyelitis in guinea pigs and rats.

The complete amino-acid sequence of non-immunoglobulin amyloid fibril protein AS in rheumatoid arthritis.

Suppression of cellular immunity in rats and mice by maternal treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Evidence for a common synthetic origin for secretory and serum IgA.

Liver biopsy in psoriatics previously treated with potassium arsenite. A controlled study.

The incidence and antigenic specificity of antibodies against denatured human collagen in rheumatoid arthritis.

[Proceedings: Isolation and characterization of peptides obtained by the action of cyanogen bromide on fragment B of diphtheria toxin].

Affinity chromatography purification of diphtheria toxin.

Table 2A-6 – Titles of Pubmed Records Related to Skin Adverse Events Following Herbicide Exposure

ALOPECIA; *BLISTER*; *BULLOUS*; *CUTANEOUS*; *DERM*; *ECZEMA*; *ERUPT*; *ERYTHEMAE*; *FLUSHING*; *LESION*; *LICHEN*; *MELANOMA*; *PEMPHIGUS*; *PITYRIASIS*; *PRURIT*; *PSORIA*; *PUSTUL*; * RASH *; * SKIN *; *SWEET SYNDROME*; *URTICARIA*; RASH; SKIN (4340)
--

Mitochondrial reactive oxygen species initiate gasdermin D-mediated pyroptosis and contribute to paraquat-induced nephrotoxicity.

Pubertal glyphosate-based herbicide exposure aggravates high-fat diet-induced obesity in female mice.

Paraquat and Parkinson's Disease: The Molecular Crosstalk of Upstream Signal Transduction Pathways Leading to Apoptosis.

Amphibian-derived peptide RL-RF10 ameliorates paraquat-induced pulmonary fibrosis injury.

Autophagy mediated FTH1 degradation activates gasdermin E dependent pyroptosis contributing to diquat induced kidney injury.

Memory impairment with symmetrical hippocampal lesions following acute glufosinate-ammonium intoxication.

Pesticide exposure in greenspaces: Comparing field measurement of dermal contamination with values predicted by registration models.

Vascular read-out for TRP channel functionality on distal peripheral nerve endings in healthy men.

Fungal derived herbicidal metabolite loaded starch-chitosan-gum acacia-agar based bio composite: Preparation, characterization, herbicidal activity, release profile and biocompatibility.

Forensic significance of Roundup Full[®] II effect on the development of *Dermestes maculatus* (Coleoptera: Dermestidae) and *Lucilia sericata* (Diptera: Calliphoridae).

An in vitro evaluation of the effects of fluoride, CPP-ACP, or resin infiltration on discoloration caused by pediatric supplements.

Regulation of stress granule formation in human oligodendrocytes.

Microbial-influenced pesticide removal co-occurs with antibiotic resistance gene variation in soil-earthworm-maize system.

Luteolin Is a Potential Immunomodulating Natural Compound against Pulpal Inflammation.

Prenatal treprostinil improves pulmonary arteriolar hypermuscularization in the rabbit model of congenital diaphragmatic hernia.

MicroRNA-124-3p Modulates Alpha-Synuclein Expression Levels in a Paraquat-Induced in vivo Model for Parkinson's Disease.

Meptyldinocap induces implantation failure by forcing cell cycle arrest, mitochondrial dysfunction, and endoplasmic reticulum stress in porcine trophoctoderm and endometrial luminal epithelial cells.

Norflurazon causes cell death and inhibits implantation-related genes in porcine trophoctoderm and uterine luminal epithelial cells.

Toxicity of two pesticides in binary mixture on survival and enzymatic response of *Cerastoderma edule* - The warming influence.

Assessing and mitigating foodborne acetochlor exposure induced ileum toxicity in broiler chicks: The role of omega-3 polyunsaturated fatty acids supplementation and molecular pathways analysis.

Chemical mixture that targets the epidermal growth factor pathway impairs human trophoblast cell functions.

Concentration and non-dietary human health risk assessment of pesticide residues in soil of farms in Golestan province, Iran.

Aldo-keto reductase 1B10 as a Carcinogenic but Not a Prognostic Factor in Colorectal Cancer.

Establishment and Characterization of Amitrole-Induced Mouse Thyroid Adenomatous Nodule-Derived Cell Lines.

Positive Association of Urinary Dimethylarsinic Acid (DMA(V)) with Serum 25(OH)D in Adults Living in an Area of Water-Borne Arsenicosis in Shanxi, China.

TRPA1 as a promising target in ischemia/reperfusion: A comprehensive review.

Evaluating the risk of phthalate and non-phthalate plasticizers in dust samples from 100 Japanese houses.

Concentration and sources of persistent organic pollutants within the vicinity of a scrap-iron smelting plant: Seasonal pattern and health risk assessment.

Persistent Neutrophil Infiltration and Unique Ocular Surface Microbiome Typify Dupilumab-Associated Conjunctivitis in Patients with Atopic Dermatitis.

Phenol Toxicity.

Hydrogen cyanamide exposure: a case series from Pavia Poison Control Centre.

Use of in silico and in vitro methods as a potential new approach methodologies (NAMs) for (photo)mutagenicity and phototoxicity risk assessment of agrochemicals.

Adaptation of the metolachlor-degrading fungus *Trichoderma harzianum* to the simultaneous presence of low-density polyethylene (LDPE) microplastics.

Voluntary wheel-running improved pulmonary fibrosis by reducing epithelial mesenchymal transformation.

Effect of sublethal concentrations of glyphosate-based herbicides (Roundup Active®) on skin of the tropical frog (*Dendropsophus molitor*).

Nano-TiO₂ aggravates the adverse effect of pentachlorophenol on antioxidant and immune response in anti-predatory mussels.

The Protective Role of Oleuropein Aglycone against Pesticide-Induced Toxicity in a Human Keratinocytes Cell Model.

Toxicity of glyphosate and aminomethylphosphonic acid (AMPA) to the early stages of development of *Steindachneridion melanodermatum*, an endangered endemic species of Southern Brazil.

Biomarkers of pollution by glyphosate in the lichens, *Parmotrema tinctorium* and *Usnea barbata*.

Spatiotemporal variations of 2,4-dichlorophenoxy acetic acid with the role of sugarcane industry and related human health risk assessments in the Shadegan International Wetland.

Tolerance of microorganisms to residual herbicides found in eucalyptus plantations.

[Experimental study on the toxicokinetics and gastrointestinal damage in rats poisoned with acute diquat poisoning at different exposure doses].

A mixture of 13 pesticides, contaminants, and food additives below individual NOAELs produces histopathological and organ weight changes in rats.

Pendimethalin exposure disrupts mitochondrial function and impairs processes related to implantation.

Degradation of four pesticides in five urban landscape soils: human and environmental health risk assessment.

A novel mechanism of Dimethyl ester of Alpha-ketoglutarate in suppressing Paraquat-induced BEAS-2B cell injury by alleviating GSDME dependent pyroptosis.

Complex mixtures of pesticides and metabolites modulate the malignant phenotype of murine melanoma B16-F1 cells.

Allergic contact dermatitis caused by herbicide containing glyphosate-isopropylamine salt.

Atrazine modifies markers of melanocyte maturation and apoptosis in primary skin cultures.

Human health risks and hepatotoxicity associated with exposure to atrazine surveyed in drinking water from Ijebu-North, Southwest, Nigeria.

Dimethyl fumarate attenuates paraquat-induced pulmonary oxidative stress, inflammation and fibrosis in mice.

Postnatal exposure to a glyphosate-based herbicide interferes with the development and growth of the mammary gland of pre-pubertal Ewe lambs.

Dietary myricetin assuages atrazine-mediated hypothalamic-pituitary-testicular axis dysfunction in rats.

Chitosan nanocomposite as an effective carrier of potential herbicidal metabolites for noteworthy phytotoxic effect against major aquatic invasive weed water hyacinth (*Eichhornia crassipes*).

Treatment with paraquat affects the expression of ferroptosis-related genes.

A mass event of paraquat poisoning via inhalation.

Evaluating the Anti-Melanoma Effects and Toxicity of Cinnamaldehyde Analogues.

Computational biology and in vitro studies for anticipating cancer-related molecular targets of sweet wormwood (*Artemisia annua*).

Predicting the relationship between pesticide genotoxicity and breast cancer risk in South Indian women in in vitro and in vivo experiments.

Hydralazine plays an immunomodulation role of pro-regeneration in a mouse model of spinal cord injury.

Inactivation of microglia dampens blood-brain barrier permeability and loss of dopaminergic neurons in paraquat-lesioned mice.

Clinical and pathological characteristics of diquat poisoning-related acute kidney injury.

Follow-up of patients with a 5-year survival after paraquat poisoning using computed tomography images and spirometry.

Herbicide exposure during occupational knapsack spraying in French gardeners and municipal workers.

Trichoderma virens exerts herbicidal effect on *Arabidopsis thaliana* via modulation of amino acid metabolism.

Dermal Toxicity from a Paraquat-Poisoned Patient's Urine.

Safety and efficacy of once-daily HU6 versus placebo in people with non-alcoholic fatty liver disease and high BMI: a randomised, double-blind, placebo-controlled, phase 2a trial.

Refrigerated multi-dose insulin vials remain sterile through 6 months of use.

Xenobiotic Exposure and Migraine-Associated Signaling: A Multimethod Experimental Study Exploring Cellular Assays in Combination with Ex Vivo and In Vivo Mouse Models.

Carbon Nitride-Based siRNA Vectors with Self-Produced O₂ Effects for Targeting Combination Therapy of Liver Fibrosis via HIF-1 α -Mediated TGF- β ¹/Smad Pathway.

Mitochondrial superoxide dismutase Sod2 suppresses nuclear genome instability during oxidative stress.

Gene deletion of long-chain acyl-CoA synthetase 4 attenuates xenobiotic chemical-induced lung injury via the suppression of lipid peroxidation.

Human Preadipocytes Differentiated under Hypoxia following PCB126 Exposure during Proliferation: Effects on Differentiation, Glucose Uptake and Adipokine Profile.

Synthesis and Preclinical Evaluation of [Methylpiperazine-(11)C]brigatinib as a PET Tracer Targeting Both Mutated Epidermal Growth Factor Receptor and Anaplastic Lymphoma Kinase.

CKBA suppresses mast cell activation via ERK signaling pathway in murine atopic dermatitis.

Glycopolymer-based multifunctional antibacterial hydrogel dressings for accelerating cutaneous wound healing.

Targeting Colon Cancer Cells with Pyrazino-Imidazolinone Derivatives: Synthesis, Molecular Docking, and in Vitro Evaluation of Anti-Proliferative and Pro-Apoptotic Activities.

Ultra-stretchable, tissue-adhesive, shape-adaptive, self-healing, on-demand removable hydrogel dressings with multiple functions for infected wound healing in regions of high mobility.

4,4'-Thiobis(2-tert-butyl-5-methylphenol), an antioxidant in medical devices that may cause allergic contact dermatitis.

Impact of the pentose phosphate pathway on metabolism and pathogenesis of *Staphylococcus aureus*.

Diosmin exerts hepatoprotective and antihyperglycemic effects against sodium arsenite-induced toxicity through the modulation of oxidative stress and inflammation in mice.

Nephroprotective Effects of Selenium Nanoparticles Against Sodium Arsenite-Induced Damages.

The effect of *Alnus incana* (L.) Moench extracts in ameliorating iron overload-induced hepatotoxicity in male albino rats.

The direct catalytic synthesis of ultrasmall Cu(2)O-coordinated carbon nitrides on ceria for multimodal antitumor therapy.

A novel non-invasive colorectal cancer diagnostic method: Volatile organic compounds as biomarkers.

Acetaldehyde dehydrogenase 2 activation attenuates sepsis-induced brain injury through NLRP3 inflammasome regulation.

Chitosan-based carbon nitride-polydopamine-silver composite dressing with antibacterial properties for wound healing.

NKG2D Ligand Expression Induced by Oxidative Stress Mitigates Cutaneous Ischemia-Reperfusion Injury.

Iron pill-induced gastritis: an unrecognized side effect of iron-deficiency anemia.

Endocrine disruptors and endometriosis.

Exosomes released by environmental pollutant-stimulated Keratinocytes/PBMCs can trigger psoriatic inflammation in recipient cells via the AhR signaling pathway.

Disentangling the Tissue-Specific Variations of Volatile Flavor Profiles of the *Lentinula edodes* Fruiting Body.

Corrigendum: Development of skin diseases following systemic exposure: example of dioxins.

Skin-protective biological activities of bio-fermented *Aframomum angustifolium* extract by a consortium of microorganisms.

Regenerating Saffron (*Crocus sativus* L.) from Corm Lateral Buds via Indirect Somatic Embryogenesis.

Delta Storage Pool Deficiency: A Pediatric Case Report and Review of the Literature.

MiR-96-5p Suppresses Progression of Arsenite-Induced Human Keratinocyte Proliferation and Malignant Transformation by Targeting Denticleless E3 Ubiquitin Protein Ligase Homolog.

Carnosine synthase deficiency aggravates neuroinflammation in multiple sclerosis.

Application of an Antioxidant Response Element-Nuclear Factor Erythroid 2 Luciferase Assay for Assessing the Skin Sensitization Potential of Agrochemicals.

A multifunctional hydrogel dressing with high tensile and adhesive strength for infected skin wound healing in joint regions.

Exposure to the aryl hydrocarbon receptor agonist dioxin disrupts formation of the muscle, nerves, and vasculature in the developing jaw.

Effect of Hydralazine on Angiotensin II-Induced Abdominal Aortic Aneurysm in Apolipoprotein E-Deficient Mice.

Bifenox compromises porcine trophectoderm and luminal epithelial cells in early pregnancy by arresting cell cycle progression and impairing mitochondrial and calcium homeostasis.

Use of pesticides and risk perception of environmental contamination by farmers surrounding the Menoua River (West Cameroon).

Metabolomics reveal metabolic variation caused by co-culture of *Arthrobacter ureafaciens* and *Trichoderma harzianum* and their impacts on wheat germination.

Assessing the potential molecular mechanism of arsenite-induced skin cell senescence.

An eco-friendly system for stabilization of retinol: A step towards attending performance with improved environmental respect.

Carcinogenic and non-carcinogenic health risk assessment of organic compounds and heavy metals in electronic cigarettes.

Enrichment of carcinogen-driven "mitochondria-primed" human skin stem cells and their identification using single-cell analyses.

Exposure to arsenic, polycyclic aromatic hydrocarbons, metals, and association with skin cancers in the US adults.

Increased anti-oxidative action compensates for collagen tissue degeneration in vitiligo dermis.

Controllable-Swelling Microneedle-Assisted Ultrasensitive Paper Sensing Platforms for Personal Health Monitoring.

Development of skin diseases following systemic exposure: example of dioxins.

Risk assessment of sediment PAH, BTEX, and emerging contaminants in Chanomi Creek Niger Delta, Nigeria.

Case report: Reversible splenic lesion syndrome caused by diquat poisoning.

Laser Biostimulation Induces Wound Healing-Promoter β 2-Defensin Expression in Human Keratinocytes via Oxidative Stress.

Case report: Occupational poisoning incident from a leak of chloroacetyl chloride in Jinan, Shandong, China.

Air, Dermal, and Urinary Metabolite Levels of Backpack and Tractor Sprayers Using the Herbicide Acetochlor in Thailand.

Atrazine residue in waters of Ijebu-North local government, Nigeria: implications on human health, hematological, and biochemical parameters.

Protein adducts with lipid peroxidation products in patients with psoriasis.

Novel Use of Cell Profiling Technology to Visualize Mitochondrial Responses of Humpback Whale Fibroblasts to Chemical Exposure.

Retraction notice to "Lab-on-fruit skin and lab-on-leaf towards recognition of trifluralin using Ag-citrate/GQDs nanocomposite stabilized on the flexible substrate: A new platform for the electroanalysis of herbicides using direct writing of nano-inks and pen-on paper technology" [Heliyon 6 (2020) e05779].

Bensulide exposure causes cell division cycle arrest and apoptosis in porcine trophectoderm and uterine luminal epithelial cells.

Development of Biocellulose Sheet Incorporating Aloe vera Gel Extract for Diabetic Wound Healing.

Picolinafen exposure induces ROS accumulation and calcium depletion, leading to apoptosis in porcine embryonic trophectoderm and uterine luminal epithelial cells during the peri-implantation period.

Cell cycle dysregulation on prenatal and postnatal arsenic exposure in skin of Wistar rat neonates.

Oryzalin impairs maternal-fetal interaction during early pregnancy via ROS-mediated P38 MAPK/AKT and OXPHOS downregulation.

Excretion kinetics of 1,3-dichlorobenzene and its urinary metabolites after controlled airborne exposure in human volunteers.

Serum Level of Protein-Bound Uraemic Toxins in Haemodialysis Patients with Chronic Kidney Disease-Associated Pruritus: Myths and Facts.

Can Sulfonylureas for Agricultural Use Cause Diabetes? A Report of Three Cases.

Vineyard Management and Physicochemical Parameters of Soil Affect Native Trichoderma Populations, Sources of Biocontrol Agents against *Phaeoacremonium minimum*.

Changes of Gut Microbiome in Adolescent Patients with Chronic Spontaneous Urticaria After Omalizumab Treatment.

Purification and biochemical characterization of two laccase isoenzymes isolated from *Trichoderma harzianum* S7113 and its application for bisphenol A degradation.

PROFESSIONAL RISKS FOR AGRICULTURAL PERSONNEL TREATING BERRIES AND MELON CROPS WITH PESTICIDES.

Spectroscopic contribution to glyphosate toxicity profile and the remedial effects of *Momordica charantia*.

Pathophysiological Changes in Rhesus Monkeys with Paraquat-Induced Pulmonary Fibrosis.

Unveiling the nexus between parental exposure to toxicants and heritable spermiotoxicity - Is life history a shield or a shadow?

The toxicokinetics of acute paraquat poisoning in specific patients: a case series.

[Study on the Protective effect and mechanism of Nicotinamide Riboside on lung injury in paraquat intoxicated mice].

Subacute dermal toxicity study of bensulfuron-methyl in Sprague-Dawley rats.

Protective role of green tea against paraquat toxicity in *Allium cepa* L.: physiological, cytogenetic, biochemical, and anatomical assessment.

First report on the production of phytotoxic metabolites by *Mycoleptodiscus indicus* under optimized conditions of submerged fermentation.

Aqueous *Thunbergia laurifolia* leaf extract alleviates paraquat-induced lung injury in rats by inhibiting oxidative stress and inflammation.

Toxicity of commercial atrazine in *Rattus norvegicus* organs as a function of concentration: histopathological, ultrastructural and hematological evaluation.

Health risk assessment of exposure to atrazine in the soil of Shiraz farmlands, Iran.

Multidimensional bioresponses in nematodes contribute to the antagonistic toxic interaction between pentachlorophenol and TiO₂ nanoparticles in soil.

DNA Double-Strand Breaks Induced in Human Cells by 6 Current Pesticides: Intercomparisons and Influence of the ATM Protein.

Attenuating effect of *Prosopis cineraria* against paraquat-induced toxicity in prepubertal mice, *Mus musculus*.

Disruption of developmental programming with long-term consequences after exposure to a glyphosate-based herbicide in a rat model.

Prediction of optical coherence tomography-detected calcified nodules using coronary computed tomography angiography.

A proposed NAM-based tiered phototoxicity testing and human risk assessment framework for agrochemicals.

The immediate patch test reaction to fragrance in patients with allergic contact dermatitis to fragrance: A prospective study.

Network pharmacology and molecular docking-based prediction of active compounds and mechanisms of action of *Cnidii Fructus* in treating atopic dermatitis.

Arsenic exposure and respiratory outcomes during childhood in the INMA study.

Evaluation of cinnamaldehyde mucoadhesive patches on minor recurrent aphthous stomatitis: a randomized, double-blind, placebo-controlled clinical trial.

Protective effect of cinnamaldehyde on channel catfish infected by drug-resistant *Aeromonas hydrophila*.

[Imaging features of 10 patients with toxic encephalopathy caused by diquat].

Wnt-induced secreted proteins-1 play an important role in paraquat-induced pulmonary fibrosis.

[Clinical features of 86 cases of acute diquat poisoning].

[A five-year follow-up report on lung imaging and exercise endurance of a patient with paraquat poisoning].

Cinnamaldehyde as antimicrobial in cellulose-based dental appliances.

Anticancer Effects of Cinnamaldehyde Through Inhibition of ErbB2/HSF1/LDHA Pathway in 5637 Cell Line of Bladder Cancer.

Fluroxypyr-1-methylheptyl ester induced ROS production and mitochondrial apoptosis through the MAPK signaling cascade in porcine trophectoderm and uterine luminal epithelial cells.

The shikimate pathway regulates programmed cell death.

Cinnamaldehyde-Based Self-Nanoemulsion (CA-SNEDDS) Accelerates Wound Healing and Exerts Antimicrobial, Antioxidant, and Anti-Inflammatory Effects in Rats' Skin Burn Model.

Ethalfuralin impairs implantation by aggravation of mitochondrial viability and function during early pregnancy.

Dinitramine induces implantation failure by cell cycle arrest and mitochondrial dysfunction in porcine trophectoderm and luminal epithelial cells.

Dimethylmonothioarsenate Is Highly Toxic for Plants and Readily Translocated to Shoots.

Hexagonal liquid crystalline system containing cinnamaldehyde for enhancement of skin permeation of sinomenine hydrochloride.

Firefighters' urinary concentrations of VOC metabolites after controlled-residential and training fire responses.

Single-Center Experience With Paraquat Exposure in Nine Patients.

TRPA1 Channel Activation With Cinnamaldehyde Induces Cutaneous Vasodilation Through NOS, but Not COX and KCa Channel, Mechanisms in Humans.

BDE-209 and TCDD enhance metastatic characteristics of melanoma cells after chronic exposure.

A cell-based evaluation of human tyrosinase-mediated metabolic activation of leukoderma-inducing phenolic compounds.

A NIR-II light-modulated injectable self-healing hydrogel for synergistic photothermal/chemodynamic/chemo-therapy of melanoma and wound healing promotion.

Severe methyl bromide poisoning causing early acute renal failure and anuria: a case report.

Histopathological and immunohistochemical evaluation for detecting changes in blood hormone levels caused by endocrine disruptors in a 28-day repeated-dose study in rats.

The effect of iron sulfate nanoparticles and their fortified bread on Wistar rats and human cell lines.

Contact allergy to the Dexcom G6 glucose monitoring system-Role of 2,2'-methylenebis(6-tert-butyl-4-methylphenol) monoacrylate in the new adhesive.

Barbaloin attenuates pulmonary fibrosis through TGF- β 1/Smads/p38 pathway.

Nano-silica particles synergistically IgE-mediated mast cell activation exacerbating allergic inflammation in mice.

Further Evidence of Allergic Contact Dermatitis Caused by 2,2'-Methylenebis(6- tert -Butyl-4-Methylphenol) Monoacrylate, a New Sensitizer in the Dexcom G6 Glucose Sensor.

Eyelid malignancies in young individuals: clinical peculiarities.

Mild Mitochondrial Uncoupling Decreases Experimental Atherosclerosis, A Proof of Concept.

Sodium arsenite does not affect prostate carcinogenesis in a chemically-hormonally-induced rat model.

Rosmarinus officinalis L. Leaf Extracts and Their Metabolites Inhibit the Aryl Hydrocarbon Receptor (AhR) Activation In Vitro and in Human Keratinocytes: Potential Impact on Inflammatory Skin Diseases and Skin Cancer.

Toxic Effects of Endocrine Disruptor Exposure on Collagen-Induced Arthritis.

Severe cresol poisoning caused by massive dermal exposure.

Initial Real-World Experience With Cenobamate in Adolescents and Adults: A Single Center Experience.

TCDD aggravates the formation of the atherosclerotic plaque in ApoE KO mice with a sexual dimorphic pattern.

Flavoring agent dihydrocoumarin alleviates IgE-mediated mast cell activation and allergic inflammation.

Cancer and occupational exposure to pesticides: a bibliometric study of the past 10 years.

Metabolic trade-offs favor regulated hypothermia and inhibit fever in immune-challenged chicks.

Ubiquitinated gasdermin D mediates arsenic-induced pyroptosis and hepatic insulin resistance in rat liver.

False-negative chemicals in ESR-based photosafety test (ESR-PT) and their significance for photosafety evaluations: examples of bithionol, fenticlor and cilnidipine.

Oxidative Damage Induced Telomere Mediated Genomic Instability in Cells from Ataxia Telangiectasia Patients.

Rare fatal poisoning through dermal exposure to paraquat.

Quercetin Zinc and Iron Metal Complexes Protect against Sodium Arsenite Intoxication in the Hepato-Renal System of Wistar Rats via the Oxidative Stress Pathway.

Oxidized sodium alginate crosslinked silk fibroin composite scaffold for skin tissue engineering.

Assessment of Cosmetic and Dermatological Properties and Safety of Use of Model Skin Tonics with Kombucha-Fermented Red Berry Extracts.

Adjuvants in fungicide formulations can be skin sensitizers and cause different types of cell stress responses.

Post-Translational Modifications Evoked by Reactive Carbonyl Species in Ultraviolet-A-Exposed Skin: Implication in Fibroblast Senescence and Skin Photoaging.

Structures and Biological Activities of Secondary Metabolites from *Trichoderma harzianum*.

Optical characteristics of the skin with dark circles using pump-probe imaging.

Aclonifen could induce implantation failure during early embryonic development through apoptosis of porcine trophoblast and uterine luminal epithelial cells.

Partition of phthalates among air, PM_{2.5}, house dust and skin in residential indoor environments.

Microbiome alterations from volatile organic compounds (VOC) exposures among workers in salons primarily serving women of color.

Targeted medical examinations for workers exposed to fumigants.

Microplastic-Induced Oxidative Stress in Metolachlor-Degrading Filamentous Fungus *Trichoderma harzianum*.

Chemical Composition and Cytotoxic Activity of Extracts from *Carpesium divaricatum*: In Vitro- versus Field-Grown Plants.

Trade-off for survival: Microbiome response to chemical exposure combines activation of intrinsic resistances and adapted metabolic activity.

Approaches for the establishment of optimized co-culture system of multiple *Trichoderma* strains for culture metabolites highly effective in cucumber growth promotion.

First report on atrazine monitoring in drinking water from Ijebu-North, South-West Nigeria: Human health risk evaluation and reproductive toxicity studies.

Efficacy of kangfuxin liquid on radiotherapy-induced oral mucositis for patients with head and neck squamous cell carcinoma and its effect on salivary glands and immune function.

Food-derived bioactive oligopeptide iron complexes ameliorate iron deficiency anemia and offspring development in pregnant rats.

A prominent dual heterojunction framed CuWO₄/Bi₂WO₆/MnS ternary NCs for para-chlorophenol degradation, Cr(VI) reduction & toxicity studies.

Health risk assessment of polychlorinated biphenyls (PCBs) in baby clothes. A preliminary study.

Microbiome profiling of nasal extracellular vesicles in patients with allergic rhinitis.

Beneficial effect on the soil microenvironment of *Trichoderma* applied after fumigation for cucumber production.

Supporting discovery and development of medical countermeasures for chemical injury to eye and skin.

Dietary *Bacillus licheniformis* improves the effect of *Astragalus membranaceus* extract on blood glucose by regulating antioxidation activity and intestinal microbiota in InR[E19]/TM2 *Drosophila melanogaster*.

In Vitro Assessment of Pesticides Toxicity and Data Correlation with Pesticides Physicochemical Properties for Prediction of Toxicity in Gastrointestinal and Skin Contact Exposure.

The combined effects of Map3k1 mutation and dioxin on differentiation of keratinocytes derived from mouse embryonic stem cells.

Improving knowledge on genotoxicity dynamics in somatic and germ cells of crayfish (*Procambarus clarkii*).

Comparison of "click-to-sense" assay with frozen section analysis using simulated surgical margins in breast cancer patients.

Effects of Autophagy Modulators and Dioxin on the Expression of Epidermal Differentiation Proteins on Psoriasis-Like Keratinocytes in vitro and ex vivo.

Outcome of the first survey of atrazine in drinking water from Ijebu-North, South-West, Nigeria: Human health risk and neurotoxicological implications.

Organic and Conventional Bean Pesticides in Development of Autochthonous *Trichoderma* Strains.

Red propolis reduces inflammation in cyclophosphamide-induced hemorrhagic cystitis in rats.

The Anti-CGRP Antibody Fremanezumab Lowers CGRP Release from Rat Dura Mater and Meningeal Blood Flow.

Inclusion of Montmorillonite Clays in Environmental Barrier Formulations to Reduce Skin Exposure to Water-Soluble Chemicals from Polluted Water.

Prediction of tissue and urine concentrations of 2-phenoxyethanol and its metabolite 2-phenoxyacetic acid in rat and human after oral and dermal exposures via GastroPlus(TM) physiologically based pharmacokinetic modelling.

Cytotoxic effects of Roundup Classic and its components on NE-4C and MC3T3-E1 cell lines determined by biochemical and flow cytometric assays.

[A case of occupational allyl alcohol inhalation poisoning].

Valorization of Kiwiberry Leaves Recovered by Ultrasound-Assisted Extraction for Skin Application: A Response Surface Methodology Approach.

The bZIP Ap1 transcription factor is a negative regulator of virulence attributes of the anthropophilic dermatophyte *Trichophyton rubrum*.

Thunbergia laurifolia aqueous leaf extract ameliorates paraquat-induced kidney injury by regulating NADPH oxidase in rats.

Dermal Exposure to Hazardous Chemicals in Baby Diapers: A Re-Evaluation of the Quantitative Health Risk Assessment Conducted by The French Agency for Food, Environmental and Occupational Health and Safety (ANSES).

Diquat Poisoning: Care Management and Medico-Legal Implications.

Assessing the Role of Carbonyl Adducts, Particularly Malondialdehyde Adducts, in the Development of Dermis Yellowing Occurring during Skin Photoaging.

Laser-induced choroidal neovascularization detected on optical coherence tomography angiography in patients with diabetic retinopathy.

Plant-Derived Molecule 4-Methylumbelliferone Suppresses Fc ϵ RI-Mediated Mast Cell Activation and Allergic Inflammation.

Degradation of 2,6-dichlorophenol by *Trichoderma longibraciatum* Isolated from an industrial Soil Sample in Dammam, Saudi Arabia.

Profile occurrences and in vitro effects of toxic organic pollutants in metal shredding facilities in Wallonia (Belgium).

Some novel hybrid quinazoline-based heterocycles as potent cytotoxic agents.

6-Formylindolo[3,2-b]carbazole, a Potent Ligand for the Aryl Hydrocarbon Receptor Produced Both Endogenously and by Microorganisms, can Either Promote or Restrain Inflammatory Responses.

Salicylic Acid Acts Antagonistically to Plastid Retrograde Signaling by Promoting the Accumulation of Photosynthesis-associated Proteins in Arabidopsis.

Contact allergy to fragrance mix I and its components in individuals with photocontact allergy to ketoprofen.

Thoracic radiographic features of fatal paraquat intoxication in eleven dogs.

Evaluation of the genotoxic, mutagenic, and histopathological hepatic effects of polyoxyethylene amine (POEA) and glyphosate on *Dendropsophus minutus* tadpoles.

Subchronic exposure to a glyphosate-based herbicide causes dysplasia in the digestive tract of Wistar rats.

Antioxidative Composites Based on Multienzyme Systems Encapsulated in Metal-Organic Frameworks.

Multiple Level Effects of Imazethapyr on *Leptodactylus latinasus* (Anura) Adult Frogs.

Co-formulants and adjuvants affect the acute aquatic and terrestrial toxicity of a cycloxydim herbicide formulation to European common frogs (*Rana temporaria*).

Use of *Lens culinaris* Med test as environmental bioindicator to identify the cytogenotoxic effect of paraquat pesticide.

Chemical Burns from Secondary Exposure to Paraquat Through Mishandling Urine of a Patient with Toxic Exposure.

Glyphosate and Polyoxyethyleneamine Ingestion Leading to Renal, Hepatic, and Pulmonary Failure.

Glyphosate use in urban landscape soils: Fate, distribution, and potential human and environmental health risks.

Roles of Bak and Sirt3 in Paraquat-Induced Cochlear Hair Cell Damage.

Route of exposure influences pesticide body burden and the hepatic metabolome in post-metamorphic leopard frogs.

Amazonian soil fungi are efficient degraders of glyphosate herbicide; novel isolates of *Penicillium*, *Aspergillus*, and *Trichoderma*.

Effects of the emulsifiable herbicide Dicamba on amphibian tadpoles: an underestimated toxicity risk?

Paraquat pharmacokinetics in primates and extrapolation to humans.

Carcinogenicity and chronic toxicity of acrolein in rats and mice by two-year inhalation study.

In vitro dosimetry analyses for acrolein exposure in normal human lung epithelial cells and human lung cancer cells.

Modulation of BAG3 expression in human normal urothelial cells by Diuron.

Specific collagens maintain the cuticle permeability barrier in *Caenorhabditis elegans*.

Evaluation of the potential teratogenic and toxic effect of the herbicide 2,4-D (DMA[®] 806) in bullfrog embryos and tadpoles (*Lithobates catesbeianus*).

A Phosphonate Natural Product Made by *Pantoea ananatis* is Necessary and Sufficient for the Hallmark Lesions of Onion Center Rot.

Evaluation of dietary dose administration as an alternative to oral gavage in the rodent uterotrophic and Hershberger assays.

Genotoxic and epigenetic effects of diuron in the Pacific oyster: in vitro evidence of interaction between DNA damage and DNA methylation.

Fragrance- and Botanical-Related Allergy and Associated Concomitant Reactions: A Retrospective Analysis of the North American Contact Dermatitis Group Data 2007-2016.

Agrochemicals in freshwater systems and their potential as endocrine disrupting chemicals: A South African context.

Carnosine quenches the reactive carbonyl acrolein in the central nervous system and attenuates autoimmune neuroinflammation.

Digital image processing: a useful tool in the analysis of lung injuries caused by chronic inhalation of agricultural herbicides.

Cinnamaldehyde inhibits psoriasis-like inflammation by suppressing proliferation and inflammatory response of keratinocytes via inhibition of NF- κ B and JNK signaling pathways.

Antibiotics and Imiquimod for Cutaneous T-Cell Lymphoma in Veterans: A Patient Population with Agent Orange Exposure.

Acrolein Induces Systemic Coagulopathy via Autophagy-dependent Secretion of von Willebrand Factor in Mice after Traumatic Brain Injury.

Evaluation of Multiple Organ Dysfunction Score (MODS) and the Sequential Organ Failure Assessment (SOFA) score as in-hospital outcome predictors among cases of hydrogen cyanamide exposure: a cross-sectional study.

[A case of allergic cutaneous vasculitis caused by glyphosate].

High-dose diquat poisoning: a case report.

Health-Related Quality of Life and Angina in Fractional Flow Reserve- Versus Angiography-Guided Coronary Artery Bypass Grafting: FARGO Trial (Fractional Flow Reserve Versus Angiography Randomization for Graft Optimization).

Essential oils and their components in combating fungal pathogens of animal and human skin.

Assessment of the different skin sensitization potentials of irritants and allergens as single substances and in combination using the KeratinoSens assay.

Acrolein scavenger dimercaprol offers neuroprotection in an animal model of Parkinson's disease: implication of acrolein and TRPA1.

The Onset of Systemic Oxidative Stress Associated with the Accumulation of Lipid Peroxidation Product Acrolein in the Skin of Patients with Small-Vessel Vasculitis.

Emerging Pathogens and a Current-Use Pesticide: Potential Impacts on Eastern Hellbenders.

Potential of *Trichoderma harzianum* and Its Metabolites to Protect Wheat Seedlings against *Fusarium culmorum* and 2,4-D.

Cytotoxic effects on cancerous and non-cancerous cells of trans-cinnamaldehyde, carvacrol, and eugenol.

Cause Clarification of Cysteine Oxidation by Active Species Generated during the Oxidation Process of Cinnamaldehyde and Impact on an In Chemico Alternative Method for Skin Sensitization Using a Nucleophilic Reagent Containing Cysteine.

Effects of sodium arsenite and dimethyl arsenic acid on Liaoning cashmere goat skin fibroblasts.

Rare, Protein-Altering Variants in AS3MT and Arsenic Metabolism Efficiency: A Multi-Population Association Study.

Chrysin attenuates sodium arsenite-induced nephrotoxicity in rats by suppressing oxidative stress and inflammation.

Behavioural responses of *Phlebotomus duboscqi* to plant-derived volatile organic compounds.

Bikini textile contact dermatitis: A Sherlockian approach revealing 2,4-dichlorophenol as a potential textile contact allergen.

Aryl Hydrocarbon Receptor Repressor Is Hypomethylated in Psoriasis and Promotes Psoriasis-like Inflammation in HaCaT Cells.

Role of AHR Ligands in Skin Homeostasis and Cutaneous Inflammation.

DNA Damage and Expression Profile of Genes Associated with Nephrotoxicity Induced by Butralin and Ameliorating Effect of Arabic Gum in Female Rats.

Respiratory characteristics of the tammar wallaby pouch young and functional limitations in a newborn with skin gas exchange.

A UVB-responsive common variant at chromosome band 7p21.1 confers tanning response and melanoma risk via regulation of the aryl hydrocarbon receptor, AHR.

Staphylococcus aureus Peptide Methionine Sulfoxide Reductases Protect from Human Whole-Blood Killing.

Associations between Exposure to Organochlorine Chemicals and Endometriosis: A Systematic Review of Experimental Studies and Integration of Epidemiological Evidence.

Iron preparations for women of reproductive age with iron deficiency anaemia in pregnancy (FRIDA): a systematic review and network meta-analysis.

Dynamic alteration in miRNA and mRNA expression profiles at different stages of chronic arsenic exposure-induced carcinogenesis in a human cell culture model of skin cancer.

Chloracne: a case series on cutaneous expression of CYP1A1 as diagnostic biomarker.

Role of inhibiting Chk1-p53 pathway in hepatotoxicity caused by chronic arsenic exposure from coal-burning.

Gallic acid ameliorates sodium arsenite-induced renal and hepatic toxicity in rats.

Pharmacology of Cenobamate: Mechanism of Action, Pharmacokinetics, Drug-Drug Interactions and Tolerability.

Regulated hypothermia in response to endotoxin in birds.

Benzo(a)pyrene Enhanced Dermatophagoides Group 1 (Der f 1)-Induced TGF β 1 Signaling Activation Through the Aryl Hydrocarbon Receptor-RhoA Axis in Asthma.

Rapamycin Alleviates 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Induced Aggravated Dermatitis in Mice with Imiquimod-Induced Psoriasis-Like Dermatitis by Inducing Autophagy.

The ups and downs of alkyl-carbamates in epilepsy therapy: How does cenobamate differ?

Impact of congenital diaphragmatic hernia on diaphragm muscle function in neonatal rats.

Microbial metabolism of L-tyrosine protects against allergic airway inflammation.

Insulin, Not the Preservative m-cresol, Instigates Loss of Infusion Site Patency Over Extended Durations of CSII in Diabetic Swine.

Pbx1, Meis1, and Runx1 Expression Is Decreased in the Diaphragmatic and Pulmonary Mesenchyme of Rats with Nitrofen-Induced Congenital Diaphragmatic Hernia.

Kindlin-3 and RASSF6 are probable biomarkers for predicting metastasis in cutaneous melanoma.

Why is the Incidence of Type 1 Diabetes Increasing?

Biological Therapies for Atopic Dermatitis: A Systematic Review.

Epithelial cell-adhesion protein cadherin 26 is dysregulated in congenital diaphragmatic hernia and congenital pulmonary airway malformation.

Exposure to pollutants altered glucocorticoid signaling and clock gene expression in female mice. Evidence of tissue- and sex-specificity.

Neurological Sequela of Acute Pesticide Poisoning Among Adults in Central Taiwan.

Suppression of apoptotic signaling in rat hepatocytes by non-dioxin-like polychlorinated biphenyls depends on the receptors CAR and PXR.

Chronic Dietary Exposure of Roosters to a Glyphosate-Based Herbicide Increases Seminal Plasma Glyphosate and AMPA Concentrations, Alters Sperm Parameters, and Induces Metabolic Disorders in the Progeny.

Impact of heat on biological concentrations of toluene and acetone resulting from exposure by inhalation: A pilot study.

On the Flip Side of Mask Wearing: Increased Exposure to Volatile Organic Compounds and a Risk-Reducing Solution.

Evaluation of Behavioral Changes and Tissue Damages in Common Carp (*Cyprinus carpio*) after Exposure to the Herbicide Glyphosate.

Effect of fermentation time on the content of bioactive compounds with cosmetic and dermatological properties in Kombucha Yerba Mate extracts.

Construction and Validation of a Novel Immunosignature for Overall Survival in Uveal Melanoma.

Polychlorinated biphenyls in indoor dust from urban dwellings of Lahore, Pakistan: Congener profile, toxicity equivalency, and human health implications.

Cutaneous Effects of In Utero and Lactational Exposure of C57BL/6J Mice to 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

A Combination Sulfuryl Fluoride and Propylene Oxide Treatment for *Trogoderma granarium* (Coleoptera: Dermestidae).

Personal exposure assessment of pesticides in residents: The association between hand wipes and urinary biomarkers.

Can kissing cause paraquat poisoning: A case report and review of literature.

Cigarette Smoke Containing Acrolein Upregulates EGFR Signaling Contributing to Oral Tumorigenesis In Vitro and In Vivo.

Advancing continuous subcutaneous insulin infusion in vivo: New insights into tissue challenges.

Novel Extract from Beetle *Ulomoides dermestoides*: A Study of Composition and Antioxidant Activity.

Harzianic Acid from *Trichoderma afroharzianum* Is a Natural Product Inhibitor of Acetohydroxyacid Synthase.

Pharmacokinetics of 2-phenoxyethanol and its major metabolite, phenoxyacetic acid, after dermal and inhaled routes of exposure: application to development PBPK model in rats.

Combination of Modified Atmosphere and Irradiation for the Phytosanitary Disinfestation of *Trogoderma granarium* Everts (Coleoptera: Dermestidae).

Tenuazonic Acid-Triggered Cell Death Is the Essential Prerequisite for *Alternaria alternata* (Fr.) Keissler to Infect Successfully Host *Ageratina adenophora*.

Combined toxic effects of dioxin-like PCB77 with Fe-based nanoparticles in earthworm *Eisenia fetida*.

Complex Coronary Instant Chronic Total Occlusion Lesions: Oxidative Stress, Inflammation, and Coronary Stent Lengths.

Prolonged cognitive dysfunction in patient with splenic lesion of the corpus callosum caused by glufosinate ammonium poisoning.

AGENT ORANGE-INDUCED Anaplastic Large-Cell Lymphoma (ALCL) with Cutaneous Involvement.

Toxicity of boric acid, borax and other boron containing compounds: A review.

Neuropathy and chloracne induced by 3,5,6-trichloropyridin-2-ol sodium: Report of three cases.

Genome-wide association study in hexaploid wheat identifies novel genomic regions associated with resistance to root lesion nematode (*Pratylenchus thornei*).

Analysis of the Soil Fumigant, Dimethyl Disulfide, in Swine Blood by Dynamic Headspace Gas Chromatography-Mass Spectroscopy.

NF-Y is critical for the proper growth of zebrafish embryonic heart and its cardiomyocyte proliferation.

Design of epidermal growth factor immobilization on 3D biocompatible scaffolds to promote tissue repair and regeneration.

Targeted Metabolomics Identifies Plasma Biomarkers in Mice with Metabolically Heterogeneous Melanoma Xenografts.

2,4-Dichlorophenoxyacetic Acid Poisoning Mimicking as Organophosphorus Poisoning.

Arsenic-induced HER2 promotes proliferation, migration and angiogenesis of bladder epithelial cells via activation of multiple signaling pathways in vitro and in vivo.

Oxidative Stress and Lipid Mediators Modulate Immune Cell Functions in Autoimmune Diseases.

Protective effect of melatonin against herbicides-induced hepatotoxicity in rats.

Urinary glyphosate biomonitoring of sprayers in vegetable farm in Thailand.

Effects of wood distillate (pyroligneous acid) on sensitive bioindicators (lichen and moss).

Octreotide alleviates pancreatic damage caused by paraquat in rats by reducing inflammatory responses and oxidative stress.

Toxicological impacts of herbicide paraquat dichloride on histological profile (gills, liver, and kidney) of freshwater fish *Channa punctatus* (Bloch).

Effect of zinc supplementation on chronic hepatorenal toxicity following oral exposure to glyphosate-based herbicide (Bushfire[®]) in rats.

[Treatment of "hydration therapy" for acute paraquat poisoning].

Cichoric acid attenuates the toxicity of mesotrione. Effect on in vitro skin cell model.

Exposure to a Glyphosate-based Herbicide Alters the Expression of Key Regulators of Mammary Gland Development on Pre-pubertal Male Rats.

Relationship between agrochemical compounds and mammary gland development and breast cancer.

Environmental Pollution, Oxidative Stress and Thioretinaco Ozonide: Effects of Glyphosate, Fluoride and Electromagnetic Fields on Mitochondrial Dysfunction in Carcinogenesis, Atherogenesis and Aging.

Lipids, proteins and extracellular metabolites of *Trichoderma harzianum* modifications caused by 2,4-dichlorophenoxyacetic acid as a plant growth stimulator.

An integrated transcriptomic- and proteomic-based approach to evaluate the human skin sensitization potential of glyphosate and its commercial agrochemical formulations.

Exposure to diclofop-methyl induces cardiac developmental toxicity in zebrafish embryos.

Potential Role of Selenium Against Hepatotoxicity Induced by 2,4-Dichlorophenoxyacetic Acid in Albino Wistar Rats.

Increased severity associated with tallowamine in acute glyphosate poisoning.

[CT manifestations and prognosis of acute paraquat induced lung injury].

2,4-Dichlorophenoxyacetic Thiosemicarbazides as a New Class of Compounds Against Stomach Cancer Potentially Intercalating with DNA.

A comprehensive analysis of the animal carcinogenicity data for glyphosate from chronic exposure rodent carcinogenicity studies.

A Biostimulant Obtained from the Seaweed *Ascophyllum nodosum* Protects *Arabidopsis thaliana* from Severe Oxidative Stress.

A *Caenorhabditis elegans* ortholog of human selenium-binding protein 1 is a pro-aging factor protecting against selenite toxicity.

Effects of DNA polymerase kappa and mismatch repair on dose-responses of chromosome aberrations induced by three oxidative genotoxins in human cells.

Endoplasmic reticulum stress-related neuroinflammation and neural stem cells decrease in mice exposure to paraquat.

Effects of Cinnamon (*Cinnamomum* spp.) in Dentistry: A Review.

Co-hybridized composite nanovesicles for enhanced transdermal eugenol and cinnamaldehyde delivery and their potential efficacy in ulcerative colitis.

In vitro efficacy study of *Cinnamomum zeylanicum* essential oil and cinnamaldehyde against the larval stage of *Echinococcus granulosus*.

Identification of a cytochrome P450 hydroxylase, CYP81E22, as a causative gene for the high sensitivity of soybean to herbicide bentazon.

Topical Delivery of Four Neuroprotective Ingredients by Ethosome-Gel: Synergistic Combination for Treatment of Oxaliplatin-Induced Peripheral Neuropathy.

Phoneutria toxin PnTx3-5 inhibits TRPV1 channel with antinociceptive action in an orofacial pain model.

Cinnamon extract inhibits allergen-specific immune responses in human and murine allergy models.

Antifungal and Antimicrobial Trichothecene Sesquiterpenes from the Marine Algicolous Fungus *Trichoderma brevicompactum* A-DL-9-2.

Spatial distribution, ecological and health risk assessment and source identification of atrazine in Shadegan international wetland, Iran.

Application of mixed natural preservatives to improve the quality of vacuum skin packaged beef during refrigerated storage.

Pilot study evaluating inhalation and dermal glyphosate exposure resulting from simulated heavy residential consumer application of Roundup®.

Development of a chromophore-solid phase peptide reaction assay (C-SPRA) for assessing skin sensitization in vitro.

Chemical Defoliant Promotes Leaf Abscission by Altering ROS Metabolism and Photosynthetic Efficiency in *Gossypium hirsutum*.

Influence of a Commercial Biological Fungicide containing *Trichoderma harzianum* Rifai T-22 on Dissipation Kinetics and Degradation of Five Herbicides in Two Types of Soil.

Biotransformation and detoxification of chloroacetanilide herbicides by *Trichoderma* spp. with plant growth-promoting activities.

Do you smell the danger? Effects of three commonly used pesticides on the olfactory-mediated antipredator response of zebrafish (*Danio rerio*).

Dermal absorption of diquat and potential occupational risk.

Arsenic compounds activate the MAPK and caspase pathways to induce apoptosis in OECM1 gingival epidermal carcinoma.

Cenobamate for the treatment of focal epilepsies.

Histone demethylase JHDM2A regulates H3K9 dimethylation in response to arsenic-induced DNA damage and repair in normal human liver cells.

Polyphenol-rich fraction of *Alchornea cordifolia* leaf ameliorates arsenite-induced infertility in male rats.

Cisplatin-Induced Giant Cells Formation Is Involved in Chemoresistance of Melanoma Cells.

Glufosinate constrains synchronous and metachronous metastasis by promoting anti-tumor macrophages.

Pdgfr β -Cre mediated knockout of the aryl hydrocarbon receptor protects mice from high-fat diet induced obesity and hepatic steatosis.

[Biomonitoring of environmental exposure to inorganic arsenic].

Prebiotic inulin consumption reduces dioxin-like PCB 126-mediated hepatotoxicity and gut dysbiosis in hyperlipidemic Ldlr deficient mice.

Oct4 plays a role in 2, 3, 7, 8 - tetrachlorobenzo-p-dioxin (TCDD) inducing cleft palate and inhibiting mesenchymal proliferation.

Aryl Hydrocarbon Receptor-Dependent inductions of omega-3 and omega-6 polyunsaturated fatty acid metabolism act inversely on tumor progression.

Eckol from *Ecklonia cava* Suppresses Immunoglobulin E-mediated Mast Cell Activation and Passive Cutaneous Anaphylaxis in Mice.

Chronic Systemic Exposure to Low-Dose Rotenone Induced Central and Peripheral Neuropathology and Motor Deficits in Mice: Reproducible Animal Model of Parkinson's Disease.

The role of PSMB5 in sodium arsenite-induced oxidative stress in L-02 cells.

Alcohol-Related Dermatitis: A Review.

Inorganic arsenic methylation capacity and breast cancer by immunohistochemical subtypes in northern Mexican women.

A murine model of *Staphylococcus aureus* infected chronic diabetic wound: A new tool to develop alternative therapeutics.

Death of an apprentice bodybuilder following 2,4-dinitrophenol and clenbuterol intake.

Allergy to metacresol in a type 2 diabetes patient.

Research Note: Evaluation of dietary administration of sodium chlorate and sodium nitrate for *Histomonas meleagridis* prophylaxis in turkeys.

Pegylated carbon nitride nanosheets for enhanced reactive oxygen species generation and photodynamic therapy under hypoxic conditions.

The association between pesticide use and cutaneous melanoma: a systematic review and meta-analysis.

Role of Aryl Hydrocarbon Receptor Activation and Autophagy in Psoriasis-Related Inflammation.

Enhanced antitumor potential induced by chloroacetate-loaded benzophenones acting as fused tubulin-pyruvate dehydrogenase kinase 1 (PDHK1) ligands.

Synthesis of 2'-Deoxyuridine Modified with a 3,5-Difluoro-4-Methoxybenzylidene Imidazolinone Derivative for Incorporation into Oligonucleotide Probes for Detection of HER2 Breast Cancer Marker.

M2-like polarization of THP-1 monocyte-derived macrophages under chronic iron overload.

Synthesis and Characterization of Ru(II) Complexes with π -Expansive Imidazophen Ligands for the Photokilling of Human Melanoma Cells.

PCB126 blocks the thermogenic beiging response of adipocytes.

Cytochrome P450 1A2 activity and incidence of thyroid disease and cancer after chronic or acute exposure to dioxins.

Evolution-guided discovery of antibiotics that inhibit peptidoglycan remodelling.

Cecal Tumorigenesis in Aryl Hydrocarbon Receptor-Deficient Mice Depends on Cecum-Specific Mitogen-Activated Protein Kinase Pathway Activation and Inflammation.

Microcomedones in non-lesional acne prone skin New orientations on comedogenesis and its prevention.

In vivo acute toxicity and anti-gastric evaluation of a novel dichloro Schiff base: Bax and HSP70 alteration.

Skin application of glutathione and iron sulfate can inhibit elicitation of allergic contact dermatitis from hexavalent chromium.

Contact sensitization to cosmetic series of allergens in patients with rosacea: A prospective controlled study.

Prostate Cancer Screening Guidelines for African American Veterans: A New Perspective.

Understanding skin absorption of common aldehyde vapours from exposure during hazardous material incidents.

Is the skin an important exposure route for workers during cyanogen fumigation?

Transient receptor potential ankyrin 1 (TRPA1)-mediated toxicity: friend or foe?

An Ascophyllum nodosum-Derived Biostimulant Protects Model and Crop Plants from Oxidative Stress.

Lab-on-fruit skin and lab-on-leaf towards recognition of trifluralin using Ag-citrate/GQDs nanocomposite stabilized on the flexible substrate: A new platform for the electroanalysis of herbicides using direct writing of nano-inks and pen-on paper technology.

The Metabolomics of Childhood Atopic Diseases: A Comprehensive Pathway-Specific Review.

Wearable Bracelet Monitoring the Solar Ultraviolet Radiation for Skin Health Based on Hybrid IPN Hydrogels.

Mucuna pruriens in Parkinson's and in some other diseases: recent advancement and future prospective.

Impact of AHR Ligand TCDD on Human Embryonic Stem Cells and Early Differentiation.

Effects of Yeast Mannan Which Promotes Beneficial Bacteroides on the Intestinal Environment and Skin Condition: A Randomized, Double-Blind, Placebo-Controlled Study.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin Regulates the Expression of Aryl Hydrocarbon Receptor-Related Factors and Cytokines in Peripheral Blood Mononuclear Cells and CD4⁺ T cells from Patients with Atopic Dermatitis and Psoriasis.

TCDD-induced multi- and transgenerational changes in the methylome of male zebrafish gonads.

Efficacy of Mushroom Metabolites (*Pleurotus ostreatus*) as A Natural Product for the Suppression of Broomrape Growth (*Orobancha crenata* Forsk) in Faba Bean Plants.

Regulation of the Morphological and Physical Properties of a Soft Tissue Scaffold by Manipulating DD and DS of O-Carboxymethyl Chitin.

Not All Fun and Games: A Case Report of Contact Dermatitis Related to Slime and Play-Doh.

[Hyper-Resistance of the *Bacillus licheniformis* 24 Strain to Oxidative Stress Is Associated with Overexpression of Enzymatic Antioxidant System Genes].

Protective effects of phenelzine administration on synaptic and non-synaptic cortical mitochondrial function and lipid peroxidation-mediated oxidative damage following TBI in young adult male rats.

Severe chemical burns related to dermal exposure to herbicide containing glyphosate and glufosinate with surfactant in Korea.

Herbicidal efficacy of harzianins produced by the biofertilizer fungus, *Trichoderma brevicompactum*.

Skin burns from monochloroacetic acid leak in a chemical plant: a case report.

Ethanedinitrile as a Fumigant for *Lasioderma serricorne* (Coleoptera: Anobiidae), and *Rhyzopertha dominica* (Coleoptera: Bostrichidae): Toxicity and Mode of Action.

Cytoprotection, Genoprotection, and Dermal Exposure Assessment of Chitosan-Based Agronanofungicides.

Sodium arsenite toxicity on hematology indices and reproductive parameters in Teddy goat bucks and their amelioration with vitamin C.

Chronic arsenic exposure impairs adaptive thermogenesis in male C57BL/6J mice.

Chitosan-Based Agronanofungicides as a Sustainable Alternative in the Basal Stem Rot Disease Management.

Sarcoidosis: Causes, Diagnosis, Clinical Features, and Treatments.

Potential Beneficial Effects of *Digitaria ciliaris* Flower Absolute on the Wound Healing-Linked Activities of Fibroblasts and Keratinocytes.

In utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure exacerbates urinary dysfunction in hormone-treated C57BL/6J mice through a non-malignant mechanism involving proteomic changes in the prostate that differ from those elicited by testosterone and estradiol.

Protective Effect of the Aqueous Extract of *Deschampsia antarctica* (EDAFENCE(®)) on Skin Cells against Blue Light Emitted from Digital Devices.

Evaluation of the Effects of Agro Pesticides Use on Liver and Kidney Function in Farmers from Buea, Cameroon.

The Arabidopsis receptor kinase STRUBBELIG regulates the response to cellulose deficiency.

In-Vivo Optical Monitoring of the Efficacy of Epidermal Growth Factor Receptor Targeted Photodynamic Therapy: The Effect of Fluence Rate.

Diosmin ameliorative effects on oxidative stress and fibrosis in paraquat-induced lung injury in mice.

Assessment of oxidative stress and phospholipids alterations in chloroacetanilides-degrading *Trichoderma* spp.

Protective effect of *Ganoderma atrum* polysaccharide on acrolein-induced macrophage injury via autophagy-dependent apoptosis pathway.

Effects of 2,4-D-based herbicide (DMA(®) 806) on sensitivity, respiration rates, energy reserves and behavior of tadpoles.

Toxicology and human health risk assessment of polyethoxylated tallow amine surfactant used in glyphosate formulations.

The evaluation of the potential ecotoxicity of pyroligneous acid obtained from fast pyrolysis.

Biodegradation of diuron by endophytic *Bacillus licheniformis* strain SDS12 and its application in reducing diuron toxicity for green algae.

Determination of LC₅₀ of aerosolized paraquat and its pulmonary toxic implications in non-anesthetized rats.

[Protective effects of oligomeric proanthocyanidins in mice exposed to paraquat].

Acute in vitro exposure to environmentally relevant atrazine levels perturbs bovine preimplantation embryo metabolism and cell number.

Validating buccal swabbing as a minimal-invasive method to detect pesticide exposure in squamate reptiles.

[Treatment and nursing of one patient with burns on perineal region and complicated by secondary multiple organ injuries by exposing to paraquat fluid].

Glyphosate induces benign monoclonal gammopathy and promotes multiple myeloma progression in mice.

Mechanisms behind the atherothrombotic effects of acrolein, a review.

Toxicological effects of anthropogenic activities in *Geophagus brasiliensis* from a coastal river of southern Brazil: A biomarker approach.

Mutational signatures of redox stress in yeast single-strand DNA and of aging in human mitochondrial DNA share a common feature.

Homicidal Paraquat Poisoning.

Use of Pesticides and Health Risk among Farmers in Sunsari District, Nepal.

The MEK/ERK/CREB signaling pathway is involved in atrazine induced hippocampal neurotoxicity in Sprague Dawley rats.

Effects of glyphosate and aminomethylphosphonic acid on an isogenic model of the human blood-brain barrier.

The life-threatening rash of poisoning.

"Pink Sign": The Importance of Short-Term Occlusive Testing in Suspected Cases of Contact Urticaria.

Setal-epidermal, muscular and enzymatic anomalies induced by certain agrochemicals in the earthworm *Eudrilus eugeniae* (Kinberg).

Hepatotoxicity and reproductive disruption in male lizards (*Eremias argus*) exposed to glufosinate-ammonium contaminated soil.

Alleviation of paraquat-induced oxidative lung injury by betaine via regulation of sulfur-containing amino acid metabolism despite the lack of betaine-homocysteine methyltransferase (BHMT) in the lung.

Neonatal exposure to a glyphosate-based herbicide alters the histofunctional differentiation of the ovaries and uterus in lambs.

An approach to testing undiluted e-cigarette aerosol in vitro using 3D reconstituted human airway epithelium.

Biomarkers at different levels of organisation after atrazine formulation (SIPTRAN 500SC(®)) exposure in *Rhinella schneideri* (Anura: Bufonidae) Neotropical tadpoles.

Dual drug-loaded cubic liquid crystal gels for transdermal delivery: inner structure and percutaneous mechanism evaluations.

Brain ethanol-metabolizing enzymes are differentially expressed in lead-exposed animals after voluntary ethanol consumption: Pharmacological approaches.

In vitro activity of carvacrol, cinnamaldehyde and thymol combined with antifungals against *Malassezia pachydermatis*.

Side Effects of Coronary Stenting such as Severe Coronary Stenosis and Multiple Coronary Chronic Total Occlusions in Elderly Patients via Induced Proinflammatory and Prooxidative Stress.

Antimicrobial effects of cinnamon essential oil and cinnamaldehyde combined with EDTA against canine otitis externa pathogens.

Oxidative stress in vagal neurons promotes parkinsonian pathology and intercellular α -synuclein transfer.

Paraquat Preferentially Induces Apoptosis of Late Stage Effector Lymphocyte and Impairs Memory Immune Response in Mice.

The inhibition of hypoxia-induced angiogenesis and metastasis by cinnamaldehyde is mediated by decreasing HIF-1 α protein synthesis via PI3K/Akt pathway.

Topical Application of Cinnamaldehyde Promotes Faster Healing of Skin Wounds Infected with *Pseudomonas aeruginosa*.

Phytochemicals of Cinnamomi Cortex: Cinnamic Acid, but not Cinnamaldehyde, Attenuates Oxaliplatin-Induced Cold and Mechanical Hypersensitivity in Rats.

Cinnamaldehyde and eugenol attenuates collagen induced arthritis via reduction of free radicals and pro-inflammatory cytokines.

Temporal and spatial changes of peroxiredoxin 2 levels in aortic media at very early stages of atherosclerotic lesion formation in apoE-knockout mice.

Potent Phytotoxic Harziane Diterpenes from a Soft Coral-Derived Strain of the Fungus *Trichoderma harzianum* XS-20090075.

Cinnamaldehyde application decreases tail temperature in ovariectomized rats with and without estradiol administration.

REACH Worker Exposure Model for Co-formulants Used in Plant Protection Products.

Reduction of Kiss1 expression in the anteroventral periventricular nucleus is associated with atrazine-induced attenuation of the luteinizing hormone surge in female rats.

Chloracne and Hyperpigmentation Caused by Exposure to Hazardous Aryl Hydrocarbon Receptor Ligands.

Ischemic gastritis due to oral iron.

Lesion of the Locus Coeruleus Damages Learning and Memory Performance in Paraquat and Maneb-induced Mouse Parkinson's Disease Model.

Subcutaneous Injection of Drugs: Literature Review of Factors Influencing Pain Sensation at the Injection Site.

Photoelectrochemical detection of breast cancer biomarker based on hexagonal carbon nitride tubes.

Novel polymerase spiral reaction assay for the visible molecular detection of porcine circovirus type 3.

CDK4/6 inhibitor palbociclib suppresses IgE-mediated mast cell activation.

An All-Organic Semiconductor C(3) N(4) /PDINH Heterostructure with Advanced Antibacterial Photocatalytic Therapy Activity.

Extragenital cutaneous warts - clinical presentation, diagnosis and treatment.

Human exposure risk to semivolatile organic compounds via soil in automobile workshops in Awka, South Eastern, Nigeria.

Allergic contact dermatitis caused by isopropyl methylphenol, a new hapten.

Wound healing potential of oil extracted from *Parrotiopsis jacquemontiana* (Decne) Rehder.

Slime dermatitis.

Homemade slime: A contact dermatitis "perfect storm".

Development of Ion Mobility Spectrometry with Novel Atmospheric Electron Emission Ionization for Field Detection of Gaseous and Blister Chemical Warfare Agents.

A novel target for the promotion of dermal wound healing: Ryanodine receptors.

Mitochondrial Impairment in Oligodendroglial Cells Induces Cytokine Expression and Signaling.

A Toxicogenomic Approach Reveals a Novel Gene Regulatory Network Active in In Vitro and In Vivo Models of Thyroid Carcinogenesis.

Depressed prostaglandins and leukotrienes in veterans with Gulf War illness.

High Pesticide Exposure Events and Olfactory Impairment among U.S. Farmers.

Exposure to environmental concentrations of hexachlorobenzene induces alterations associated with endometriosis progression in a rat model.

Assessment of the nitrofen model of congenital diaphragmatic hernia and of the dysregulated factors involved in pulmonary hypoplasia.

Expression of dispatched RND transporter family member 1 is decreased in the diaphragmatic and pulmonary mesenchyme of nitrofen-induced congenital diaphragmatic hernia.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces peripheral blood abnormalities and plasma cell neoplasms resembling multiple myeloma in mice.

Allergic contact dermatitis to slime: The epidemic of isothiazolinone allergy encompasses school glue.

Novel metabolites from *Trichoderma atroviride* against human prostate cancer cells and their inhibitory effect on *Helicobacter pylori* and Shigella toxin producing *Escherichia coli*.

A "seasonal bromoderma" in a farmer.

Aryl Hydrocarbon Receptor Modulates the Expression of TNF- α and IL-8 in Human Sebocytes via the MyD88-p65NF- κ B/p38MAPK Signaling Pathways.

The higher prevalence of developmental defects of enamel in the dioxin-affected region than non-dioxin-affected region: result from a cross-sectional study in Vietnam.

Soil microalgae and cyanobacteria: the biotechnological potential in the maintenance of soil fertility and health.

Levels and risk assessment of residual phthalates, polycyclic aromatic hydrocarbons and semi-volatile chlorinated organic compounds in toilet tissue papers.

Estrogen withdrawal and replacement differentially target liver and adipose tissues in female mice fed a high-fat high-sucrose diet: impact of a chronic exposure to a low-dose pollutant mixture(â~†).

Differences in classification for skin corrosion/irritation in EU and Ukraine: Case study of alternative (in vitro and in silico) methods application for classification of pesticide active ingredient imazamox.

Toxicogenomic analyses of the effects of BDE-47/209, TBBPA/S and TCBPA on early neural development with a human embryonic stem cell in vitro differentiation system.

The successful treatment of systemic toxic induced paraquat poisoning by skin absorption: case reports and a literature review.

Obesity and cancer: A mechanistic overview of metabolic changes in obesity that impact genetic instability.

Comparison of modes of action among different trophic levels of aquatic organisms for pesticides and medications based on interspecies correlations and excess toxicity: Theoretical consideration.

The Effect of UVB Irradiation and Oxidative Stress on the Skin Barrier-A New Method to Evaluate Sun Protection Factor Based on Electrical Impedance Spectroscopy.

Epidemiology of ocular surface squamous neoplasia in veterans: a retrospective case-control study.

A Potent Antifungal Agent for Basal Stem Rot Disease Treatment in Oil Palms Based on Chitosan-Dazomet Nanoparticles.

Food risk characterization from exposure to persistent organic pollutants and metals contaminating eels from an Italian lake.

A Protective Role of Aryl Hydrocarbon Receptor Repressor in Inflammation and Tumor Growth.

Effects of Phenezine Administration on Mitochondrial Function, Calcium Handling, and Cytoskeletal Degradation after Experimental Traumatic Brain Injury.

Control of *Trogoderma granarium* (Coleoptera: Dermestidae) Using High Temperatures.

Extract of *Deschampsia antarctica* (EDA) Prevents Dermal Cell Damage Induced by UV Radiation and 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Compositional and Functional Differences between Microbiota and Cervical Carcinogenesis as Identified by Shotgun Metagenomic Sequencing.

Characterizing the microbial diversity and major metabolites of Sichuan bran vinegar augmented by *Monascus purpureus*.

Dioxin and AHR impairs mesoderm gene expression and cardiac differentiation in human embryonic stem cells.

TRPA1 Channel as a Regulator of Neurogenic Inflammation and Pain: Structure, Function, Role in Pathophysiology, and Therapeutic Potential of Ligands.

Primary green turtle (*Chelonia mydas*) skin fibroblasts as an in vitro model for assessing genotoxicity and oxidative stress.

Cascade Reaction in Human Live Tissue Allows Clinically Applicable Diagnosis of Breast Cancer Morphology.

Ameliorative effect of gallic acid on sodium arsenite-induced spleno-, cardio- and hemato-toxicity in rats.

Atypical Gasdermin D and Mixed Lineage Kinase Domain-like Protein Leakage Aggravates Tetrachlorobenzoquinone-Induced Nod-like Receptor Protein 3 Inflammasome Activation.

Apigenin reverses lung injury and immunotoxicity in paraquat-treated mice.

Assessment of adverse outcome of Excel Mera 71 in *Anabas testudineus* by histological and ultrastructural alterations.

Genotoxicity by long-term exposure to the auxinic herbicides 2,4-dichlorophenoxyacetic acid and dicamba on *Cnesterodon decemmaculatus* (Pisces: Poeciliidae).

Evaluating Mode of Action of Acrolein Toxicity in an In Vitro Human Airway Tissue Model.

Evaluation of Dermal Exposure to the Herbicide Alachlor Among Vegetable Farmers in Thailand.

Potential of *Trichoderma koningii* to eliminate alachlor in the presence of copper ions.

Trichoderma harzianum diminished oxidative stress caused by 2,4-dichlorophenoxyacetic acid (2,4-D) in wheat, with insights from lipidomics.

The mechanism of DNA damage induced by Roundup 360 PLUS, glyphosate and AMPA in human peripheral blood mononuclear cells - genotoxic risk assessment.

Acute and subchronic effects of three herbicides on biomarkers and reproduction in earthworm *Dendrobaena veneta*.

[The Role of TSP-1-CD47 in ROS-mediated Pulmonary Fibrosis Induced by Paraquat].

Atrazine promotes immunomodulation by melanomacrophage centre alterations in spleen and vascular disorders in gills from *Oreochromis niloticus*.

The role of contamination history and gender on the genotoxic responses of the crayfish *Procambarus clarkii* to a penoxsulam-based herbicide.

Marine environmental risk assessment and acute water quality criterion for pentachlorophenol in coastal waters.

Diabetes, Cardiovascular Disorders and 2,3,7,8-Tetrachlorodibenzo-p-Dioxin Body Burden in Czech Patients 50 Years After the Intoxication.

Enhanced mitochondrial DNA repair of the common disease-associated variant, Ser326Cys, of hOGG1 through small molecule intervention.

Postnatal exposure to a glyphosate-based herbicide modifies mammary gland growth and development in Wistar male rats.

Pesticides and public health: an analysis of the regulatory approach to assessing the carcinogenicity of glyphosate in the European Union.

Derivation of avian dermal LD50 values for dermal exposure models using in vitro percutaneous absorption of [(14)C]-atrazine through rat, mallard, and northern bobwhite full thickness skin.

Characteristics of acute occupational pesticide exposures reported to poison control centers in Texas, 2000-2015.

Comparative Assessment on Mechanism Underlying Renal Toxicity of Commercial Formulation of Roundup Herbicide and Glyphosate Alone in Male Albino Rat.

Effects of glyphosate and its commercial formulation, Roundup(®) Ultramax, on liver histology of tadpoles of the neotropical frog, *Leptodactylus latrans* (amphibia: Anura).

The herbicide atrazine affects sperm quality and the expression of antioxidant and spermatogenesis genes in zebrafish testes.

Commentary: IARC Monographs Program and public health under siege by corporate interests.

Induction of chronic migraine phenotypes in a rat model after environmental irritant exposure.

Genetic control of predominantly error-free replication through an acrolein-derived minor-groove DNA adduct.

An engineered cell line lacking OGG1 and MUTYH glycosylases implicates the accumulation of genomic 8-oxoguanine as the basis for paraquat mutagenicity.

Protective Effects of Olive Leaf Extract on Acrolein-Exacerbated Myocardial Infarction via an Endoplasmic Reticulum Stress Pathway.

Glyphosate ingestion causing multiple organ failure: a near-fatal case report.

Occupational koebnerization of psoriasis caused by glyphosate.

Chronic toxicity of 1,3,5-triazine herbicides in the postembryonic development of the western clawed frog *Silurana tropicalis*.

Phytantriol-based lyotropic liquid crystal as a transdermal delivery system.

Combined treatment with cinnamaldehyde and PTH enhances the therapeutic effect on glucocorticoid-induced osteoporosis through inhibiting osteoclastogenesis and promoting osteoblastogenesis.

NRF2 Activation Inhibits Both TGF- β 1- and IL-13-Mediated Periostin Expression in Fibroblasts: Benefit of Cinnamaldehyde for Antifibrotic Treatment.

Orthogonal self-assembly of an organoplatinum(II) metallacycle and cucurbit[8]uril that delivers curcumin to cancer cells.

Effects of arsenic methylation and metabolism on the changes of arsenic-related skin lesions.

Autolytic enzymes are responsible for increased melanization of carbon stressed *Aspergillus nidulans* cultures.

Combination Therapy with Pirfenidone plus Prednisolone Ameliorates Paraquat-Induced Pulmonary Fibrosis.

Immunomodulatory and therapeutic role of *Cinnamomum verum* extracts in collagen-induced arthritic BALB/c mice.

Biomethylation metabolism study of arsenite in SCC-7 cells by reversed phase ion pair high performance liquid chromatography-inductively coupled plasma-mass spectrometry.

Effect of Fluorination on Skin Sensitization Potential and Fragrant Properties of Cinnamyl Compounds.

Effects of the herbicides linuron and S-metolachlor on Perez's frog embryos.

Preparation of Fish Skin Gelatin-Based Nanofibers Incorporating Cinnamaldehyde by Solution Blow Spinning.

Photolysis of clethodim herbicide and a formulation in aquatic environments: Fate and ecotoxicity assessment of photoproducts by QSAR models.

Detoxification Mechanism of α,β -Unsaturated Carbonyl Compounds in Cigarette Smoke Observed in Sheep Erythrocytes.

Retinoic acid co-treatment aggravates severity of dioxin-induced skin lesions in hairless mice via induction of inflammatory response.

A study of the intrinsic variability and the effect of environmental conditions on the formation of a postmortem root band.

A follow-up study of the development of skin lesions associated with arsenic exposure duration.

Recognising the return of nutritional deficiencies: a modern pellagra puzzle.

Contact dermatitis from Do-It-Yourself slime.

Impaired lipid and glucose homeostasis in male mice offspring after combined exposure to low-dose bisphenol A and arsenic during the second half of gestation.

Mitochondrial uncoupling prodrug improves tissue sparing, cognitive outcome, and mitochondrial bioenergetics after traumatic brain injury in male mice.

Pesticide contact dermatitis in agricultural workers of Himachal Pradesh (India).

miR-145 via targeting ERCC2 is involved in arsenite-induced DNA damage in human hepatic cells.

[Risk assessment of dioxin in the surrounding area of a waste incineration plant in Beijing].

"Slime" May Not be so Benign: A Cause of Hand Dermatitis.

Cytochrome C oxidase Inhibition and Cold Plasma-derived Oxidants Synergize in Melanoma Cell Death Induction.

Selective synthesis of 7-O-substituted luteolin derivatives and their melanogenesis and proliferation inhibitory activity in B16 melanoma cells.

RASopathic comedone-like or cystic lesions induced by vemurafenib: a model of skin lesions similar but not identical to those induced by dioxins MADISH.

Evaluation of metabolic reactivity in macrophages from mice with chronic sodium arsenite intake and experimental carcinogenesis.

Hyperpigmentation and higher incidence of cutaneous malignancies in moderate-high PCB- and dioxin exposed individuals.

Arsenic induces cardiac rhythm dysfunction and acylcarnitines metabolism perturbation in rats.

Anti-amyloidogenic and neurotrophic effects of tetrahydroxystilbene glucoside on a chronic mitochondrial dysfunction rat model induced by sodium azide.

Photosensitized Protein-Damaging Activity, Cytotoxicity, and Antitumor Effects of P(V)porphyrins Using Long-Wavelength Visible Light through Electron Transfer.

Assessing Residential Exposure Risk from Spills of Flowback Water from Marcellus Shale Hydraulic Fracturing Activity.

Dioxin-like PCB 126 Increases Systemic Inflammation and Accelerates Atherosclerosis in Lean LDL Receptor-Deficient Mice.

Gata-6 expression is decreased in diaphragmatic and pulmonary mesenchyme of fetal rats with nitrofen-induced congenital diaphragmatic hernia.

Prenatal exposure to TCDD and atopic conditions in the Seveso second generation: a prospective cohort study.

Probiotic/prebiotic correction for adverse effects of iron fortification on intestinal resistance to Salmonella infection in weaning mice.

Safety evaluation of DAS-44406-6 soybeans in Wistar rats.

Decreased Expression of Integrin Subunits $\alpha 3$, $\alpha 6$, and $\alpha 8$ in the Branching Airway Mesenchyme of Nitrofen-Induced Hypoplastic Lungs.

The effect of association between inefficient arsenic methylation capacity and demographic characteristics on the risk of skin lesions.

Latent forms of the carious lesion of human lower third molars.

[About a cresol intoxication].

Utility of fur as a biomarker for persistent organic pollutants in Australian fur seals (*Arctocephalus pusillus doriferus*).

Morphological characteristics and human papillomavirus genotype predict the treatment response in cutaneous warts.

Dermal Absorption of Pesticide Residues.

Release and toxicity of adipose tissue-stored TCDD: Direct evidence from a xenografted fat model.

Endogenous and exogenous biomarker analysis in terrestrial phase amphibians (*Lithobates sphenoccephala*) following dermal exposure to pesticide mixtures.

Brazil nut improves the oxidative metabolism of superoxide-hydrogen peroxide chemically-imbalanced human fibroblasts in a nutrigenomic manner.

Fatty acids, polychlorinated dibenzo-p-dioxins and dibenzofurans, and dioxin-like polychlorinated biphenyls in paired muscle and skin from fish from the Bohai coast, China: Benefits and risks associated with fish consumption.

The Chemical Compositions of *Angelica pubescens* Oil and Its Prevention of UV-B Radiation-Induced Cutaneous Photoaging.

Fabrication of functionalized citrus pectin/silk fibroin scaffolds for skin tissue engineering.

From TCDD-mediated toxicity to searches of physiologic AHR functions.

Glyphosate-based herbicide enhances the uterine sensitivity to estradiol in rats.

Gain-of-function mutation of *AtDICE1*, encoding a putative endoplasmic reticulum-localized membrane protein, causes defects in anisotropic cell elongation by disturbing cell wall integrity in *Arabidopsis*.

Cutaneous Adnexal Cysts Revisited: What We Know and What We Think We Know.

Protein-bounded uremic toxin p-cresylsulfate induces vascular permeability alternations.

Continuous Infusion of Phenelzine, Cyclosporine A, or Their Combination: Evaluation of Mitochondrial Bioenergetics, Oxidative Damage, and Cytoskeletal Degradation following Severe Controlled Cortical Impact Traumatic Brain Injury in Rats.

The Role of Uron and Chlorobenzene Derivatives, as Potential Endocrine Disrupting Compounds, in the Secretion of ACTH and PRL.

A Review of Environmental Occurrence, Fate, Exposure, and Toxicity of Benzothiazoles.

sEcad and EGF Levels Increased in Urine of Non-ferrous Metal Workers and Medium of Uroepithelial Cell Line Treated by Arsenic.

Epidermal Growth Factor Receptor Signaling Disruption by Endocrine and Metabolic Disrupting Chemicals.

Arsenic Attenuates Heparin-Binding EGF-Like Growth Factor/EGFR Signaling That Promotes Matrix Metalloprotease 9-Dependent Astrocyte Damage in the Developing Rat Brain.

Association of textile industry effluent with mutagenicity and its toxic health implications upon acute and sub-chronic exposure.

Use of polychlorinated biphenyl and toxic equivalent concentrations in scat from mink (*Neovison vison*) fed fish from the upper Hudson River to predict dietary and hepatic concentrations and health effects.

Anti-mutagenic and Anti-oxidant Potencies of *Cetraria Aculeata* (Schreb.) Fr., *Cladonia Chlorophaea* (Flörke ex Sommerf.) Spreng. and *Cetrelia olivetorum* (Nyl.) W.L. Culb. & C.F. Culb.).

Impacts of glyphosate-based herbicides on disease resistance and health of crops: a review.

Histodifferentiation of oil palm somatic embryo development at low auxin concentration.

A case of herbicide-induced acute fibrinous and organizing pneumonia?

Propolis supplementation attenuates the negative effects of oxidative stress induced by paraquat injection on productive performance and immune function in turkey poults.

In vitro assessment of skin sensitization, photosensitization and phototoxicity potential of commercial glyphosate-containing formulations.

Mixture Toxicity of Bensulfuron-Methyl and Acetochlor to Red Swamp Crayfish (*Procambarus clarkii*): Behavioral, Morphological and Histological Effects.

Health risk assessment of an abandoned herbicide factory site for transportation use in Dalian, China.

Reproductive toxicity of Roundup herbicide exposure in male albino rat.

Comparative toxic responses of male and female lizards (*Eremias argus*) exposed to (S)-metolachlor-contaminated soil.

Evaluation of imazethapyr-induced DNA oxidative damage by alkaline Endo III- and Fpg-modified single-cell gel electrophoresis assay in *Hypsiboas pulchellus* tadpoles (*Anura*, *Hylidae*).

Derivation of predicted no-effect concentration and ecological risk for atrazine better based on reproductive fitness.

The health consequences of aerial spraying illicit crops: The case of Colombia.

Morphoanatomical and physiological changes in *Bauhinia variegata* L. as indicators of herbicide diuron action.

DNA damage and methylation induced by glyphosate in human peripheral blood mononuclear cells (in vitro study).

Acrolein Can Cause Cardiovascular Disease: A Review.

Time-dependent haemoperfusion after acute paraquat poisoning.

Symptoms from masked acrolein exposure suggest altered trigeminal reactivity in chemical intolerance.

Dendritic cells' death induced by contact sensitizers is controlled by Nrf2 and depends on glutathione levels.

Lichen microalgae are sensitive to environmental concentrations of atrazine.

Genotoxicity of the herbicide imazethapyr in mammalian cells by oxidative DNA damage evaluation using the Endo III and FPG alkaline comet assays.

Effects of melatonin in rats in the initial third stage of pregnancy exposed to sub-lethal doses of herbicides.

Phycoerythrin averts intracellular ROS generation and physiological functional decline in eukaryotes under oxidative stress.

Quizalofop-P-ethyl exposure increases estrogen axis activity in male and slightly decreases estrogen axis activity in female zebrafish (*Danio rerio*).

Detection of herbicide effects on pigment composition and PSII photochemistry in *Helianthus annuus* by Raman spectroscopy and chlorophyll a fluorescence.

Liver X Receptor Agonist TO901317 Attenuates Paraquat-Induced Acute Lung Injury through Inhibition of NF- κ B and JNK/p38 MAPK Signal Pathways.

Oxidative stress intensity-related effects of cadmium (Cd) and paraquat (PQ) on UV-damaged-DNA binding and excision repair activities in zebrafish (*Danio rerio*) embryos.

Cinnamaldehyde induces fat cell-autonomous thermogenesis and metabolic reprogramming.

An investigation of the health effects caused by exposure to arsenic from drinking water and coal combustion: arsenic exposure and metabolism.

The relationships between arsenic methylation and both skin lesions and hypertension caused by chronic exposure to arsenic in drinking water.

Contact sensitizers trigger human CD1-autoreactive T-cell responses.

Sodium chlorate induces DNA damage and DNA-protein cross-linking in rat intestine: A dose dependent study.

Antipruritic Effect of Cold-induced and Transient Receptor Potential-agonist-induced Counter-irritation on Histaminergic Itch in Humans.

Local upregulation of transient receptor potential ankyrin 1 and transient receptor potential vanilloid 1 ion channels in rectosigmoid deep infiltrating endometriosis.

Analysis of sugarcane herbicides in marine turtle nesting areas and assessment of risk using *in vitro* toxicity assays.

Changes in the mitochondrial protein profile due to ROS eruption during ageing of elm (*Ulmus pumila* L.) seeds.

Autophagy deficient keratinocytes display increased DNA damage, senescence and aberrant lipid composition after oxidative stress in vitro and in vivo.

Conjugation of nitrated acetaminophen to Der p1 amplifies peripheral blood monocyte response to Der p1.

Chloracne in a Farming Family.

Pathogenesis of deep endometriosis.

Hijiki and sodium arsenite stimulate growth of human colorectal adenocarcinoma cells through ERK1/2 activation.

From the Cover: High Susceptibility of Lrig1 Sebaceous Stem Cells to TCDD in Mice.

Case-control study of chronic low-level exposure of inorganic arsenic species and non-melanoma skin cancer.

A dioxin-like compound induces hyperplasia and branching morphogenesis in mouse mammary gland, through alterations in TGF- β 1 and aryl hydrocarbon receptor signaling.

Heme Biosynthetic Pathway is Functionally Linked to Adipogenesis via Mitochondrial Respiratory Activity.

Do PCDD/PCDF standard solutions used in dioxin analysis pose a risk as potentially acutely toxic to lab personnel?

Dioxin Receptor Adjusts Liver Regeneration After Acute Toxic Injury and Protects Against Liver Carcinogenesis.

Antimicrobial agents, triclosan, chloroxylenol, methylisothiazolinone and borax, used in cleaning had genotoxic and histopathologic effects on rainbow trout.

Studies of the antitumor mechanism of action of dermaseptin B2, a multifunctional cationic antimicrobial peptide, reveal a partial implication of cell surface glycosaminoglycans.

Broad Spectrum Macromolecular Antimicrobials with Biofilm Disruption Capability and In Vivo Efficacy.

High Consumption of Iron Exacerbates Hyperlipidemia, Atherosclerosis, and Female Sterility in Zebrafish via Acceleration of Glycation and Degradation of Serum Lipoproteins.

Correlation Between Nasal Epithelial Injury and In Vitro Cytotoxicity Using a Series of Small Molecule Protein Tyrosine Phosphatase 1B Inhibitors Investigated for Reversal of Leptin Resistance in Obesity.

Thiamine and benfotiamine prevent stress-induced suppression of hippocampal neurogenesis in mice exposed to predation without affecting brain thiamine diphosphate levels.

Outbreak of Occupational Dermatitis Associated With *Pyemotes ventricosus*.

Direct participation of DNA in the formation of singlet oxygen and base damage under UVA irradiation.

The history of arsenical pesticides and health risks related to the use of Agent Blue.

β -catenin Mutations Are Not Involved in Early-stage Hepatocarcinogenesis Induced by Protoporphyrinogen Oxidase Inhibitors in Mice.

The decreased growth performance and impaired immune function and structural integrity by dietary iron deficiency or excess are associated with TOR, NF- κ B, p38MAPK, Nrf2 and MLCK signaling in head kidney, spleen and skin of grass carp (*Ctenopharyngodon idella*).

TCF21 and the environmental sensor aryl-hydrocarbon receptor cooperate to activate a pro-inflammatory gene expression program in coronary artery smooth muscle cells.

Elastase and matrix metalloproteinase activities are associated with pulmonary vascular disease in the nitrofen rat model of congenital diaphragmatic hernia.

The unusual presentation of a burn from methyl bromide exposure: A case report and review of the literature.

Tyrosine kinase inhibition is an important factor for gene expression of CRTH2 in human eosinophils and lymphocytes: A novel mechanism for explaining eosinophils recruitment by the neuro-immune axis in allergic rhinitis.

Inhibition of Kupffer cell functions modulates arsenic intoxication in Wistar rats.

Dioxin-like rather than non-dioxin-like PCBs promote the development of endometriosis through stimulation of endocrine-inflammation interactions.

Strain differences in arsenic-induced oxidative lesion via arsenic biomethylation between C57BL/6J and 129X1/SvJ mice.

IL-27 triggers IL-10 production in Th17 cells via a c-Maf/ROR γ t/Blimp-1 signal to promote the progression of endometriosis.

Pharmacologic Impact (aka "Breaking Bad") of Medications on Wound Healing and Wound Development: A Literature-based Overview.

Expression of T-box transcription factors 2, 4 and 5 is decreased in the branching airway mesenchyme of nitrofen-induced hypoplastic lungs.

Toxico-vigilance - An inevitable prerequisite to keep a watch on toxins around you.

Associations of arsenic metabolites, methylation capacity, and skin lesions caused by chronic exposure to high arsenic in tube well water.

Toxicity of Juniperus oxycedrus oil constituents and related compounds and the efficacy of oil spray formulations to Dermatophagoides farinae (Acari: Pyroglyphidae).

Lung regeneration after toxic injury is improved in absence of dioxin receptor.

Continuation of non-essential medications in actively dying hospitalised patients.

Editor's Highlight: Ah Receptor Activation Potentiates Neutrophil Chemoattractant (C-X-C Motif) Ligand 5 Expression in Keratinocytes and Skin.

Acetolactate Synthase-Inhibiting Gametocide Amidosulfuron Causes Chloroplast Destruction, Tissue Autophagy, and Elevation of Ethylene Release in Rapeseed.

The endocrine disrupting alkylphenols and 4,4'-DDT interfere with estrogen conversion and clearance by mouse liver cytosol.

Polychlorinated biphenyls disrupt hepatic epidermal growth factor receptor signaling.

Assessing human health risks from pesticide use in conventional and innovative cropping systems with the BROWSE model.

Dermal absorption of fumigant gases during HAZMAT incident exposure scenarios-Methyl bromide, sulfuryl fluoride, and chloropicrin.

Squamous epithelium formation in the respiratory intestine of the bronze Corydoras Corydoras aeneus (Callichthyidae Teleostei).

Histopathological changes in zebrafish embryos exposed to DLPCBs extract from Zhanjiang coastal sediment.

Novel keratin modified bacterial cellulose nanocomposite production and characterization for skin tissue engineering.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-mediated deregulation of myeloid and sebaceous gland stem/progenitor cell homeostasis.

A useful way to develop effective in vivo skin optical clearing agents.

Acute water quality criteria for polycyclic aromatic hydrocarbons, pesticides, plastic additives, and 4-Nonylphenol in seawater.

A potential role for chondroitin sulfate/dermatan sulfate in arm regeneration in *Amphiuira filiformis*.

Fumarate Copolymer-Chitosan Cross-Linked Scaffold Directed to Osteochondrogenic Tissue Engineering.

Dermostyx (IB1) - High efficacy and safe topical skin protectant against percutaneous toxic agents.

Toxic Epidermal Necrolysis and Acute Kidney Injury due to Glyphosate Ingestion.

The toxic effects of chlorophenols and associated mechanisms in fish.

SILAC-based quantitative proteomic analysis reveals widespread molecular alterations in human skin keratinocytes upon chronic arsenic exposure.

Toxicity studies of o-chloropyridine administered dermally and in drinking water to F344/N rats and B6C3F1/N mice.

[Two death cases of lung damage due to paraquat posion caused by skin contant].

Uncovering the Molecular Mechanism of Anti-Allergic Activity of Silkworm Pupa-Grown *Cordyceps militaris* Fruit Body.

Wartime toxin exposure: recognising the silent killer.

Paraquat intoxication and associated pathological findings in three dogs in South Africa.

Organic honey supplementation reverses pesticide-induced genotoxicity by modulating DNA damage response.

Foliar penetration enhanced by biosurfactant rhamnolipid.

High-Concentration L-Menthol Exhibits Counter-Irritancy to Neurogenic Inflammation, Thermal and Mechanical Hyperalgesia Caused by Trans-cinnamaldehyde.

The Protective Role of Thiourea on *Leuciscus cephalus* Exposed to Sublethal Doses of Pendigan 330EC (Pendimethalin) Herbicide.

Effects of glyphosate and the glyphosate based herbicides Roundup Original(®) and Roundup Transorb(®) on respiratory morphophysiology of bullfrog tadpoles.

Paraquat tongue.

Nucleotide excision repair deficiency increases levels of acrolein-derived cyclic DNA adduct and sensitizes cells to apoptosis induced by docosahexaenoic acid and acrolein.

Occupational allergic airborne contact dermatitis caused by pethoxamid - a new herbicide.

Effects of glyphosate on hepatic tissue evaluating melanomacrophages and erythrocytes responses in neotropical anuran *Leptodactylus latinasus*.

Palmoplantar keratoses and Bowen's disease in a Vietnam veteran: Could Agent Blue be implicated?

Occupational Exposure to Pesticides With Occupational Sun Exposure Increases the Risk for Cutaneous Melanoma.

Hepatic effects of the clomazone herbicide in both its free form and associated with chitosan-alginate nanoparticles in bullfrog tadpoles.

Oligonucleotide-Mediated Genome Editing Provides Precision and Function to Engineered Nucleases and Antibiotics in Plants.

The effect of two glyphosate formulations on a small, diurnal lizard (*Oligosoma polychroma*).

Atrazine and malathion shorten the maturation process of *Xenopus laevis* oocytes and have an adverse effect on early embryo development.

Exposure to different glyphosate formulations on the oxidative and histological status of *Rhamdia quelen*.

Combined Effects of Pesticides and Trematode Infections on Hourglass Tree Frog *Polypedates cruciger*.

Cytotoxicity of Thirdhand Smoke and Identification of Acrolein as a Volatile Thirdhand Smoke Chemical That Inhibits Cell Proliferation.

Analysis of possible genotoxicity of the herbicide flurochloridone and its commercial formulations: Endo III and Fpg alkaline comet assays in Chinese hamster ovary (CHO-K1) cells.

Constitutive active/androstane receptor, peroxisome proliferator-activated receptor α , and cytotoxicity are involved in oxadiazon-induced liver tumor development in mice.

The role of L-type amino acid transporters in the uptake of glyphosate across mammalian epithelial tissues.

Parental exposure to the herbicide diuron results in oxidative DNA damage to germinal cells of the Pacific oyster *Crassostrea gigas*.

Common and distinct mechanisms of induced pulmonary fibrosis by particulate and soluble chemical fibrogenic agents.

Skin diseases associated with Agent Orange and other organochlorine exposures.

Yap1 and Skn7 genetically interact with Rad51 in response to oxidative stress and DNA double-strand break in *Saccharomyces cerevisiae*.

Intra-laboratory study to determine the reproducibility of LLNA:BrdU-ELISA for the prediction of the skin sensitizing potential of chemicals.

Selective inhibition of JAK2/STAT1 signaling and iNOS expression mediates the anti-inflammatory effects of coniferyl aldehyde.

Cinnamaldehyde modulates LPS-induced systemic inflammatory response syndrome through TRPA1-dependent and independent mechanisms.

Recent Progress in Analytical Methods for Determination of Urinary 3-Hydroxypropylmercapturic Acid, a Major Metabolite of Acrolein.

Chyawanprash, a formulation of traditional Ayurvedic medicine, shows a protective effect on skin photoaging in hairless mice.

Risk assessment and technical feasibility of usage of paper mill sludge biochar-based exhausted adsorbent for geopolymeric brick formation.

Somatic embryogenesis and direct as well as indirect organogenesis in *Lilium pumilum* DC. Fisch., an endangered ornamental and medicinal plant.

TRPA1 activation leads to neurogenic vasodilatation: involvement of reactive oxygen nitrogen species in addition to CGRP and NO.

[The expressions of intercellular adhesion molecule-1 in renal tissue of rats with paraquat poisoning and the effect of melatonin].

New experimental data on the human dermal absorption of Simazine and Carbendazim help to refine the assessment of human exposure.

Oral Toxicity of 2,4-Dinitroanisole in Rats.

Reduced stress granule formation and cell death in fibroblasts with the A382T mutation of TARDBP gene: evidence for loss of TDP-43 nuclear function.

Combination screening in vitro identifies synergistically acting KP372-1 and cytarabine against acute myeloid leukemia.

Modern Strategy for Identification of Congenital Heart Defects in the Neonatal Period.

Efficacy and safety of adjuvant recombinant human erythropoietin and ferrous sulfate as treatment for iron deficiency anemia during the third trimester of pregnancy.

p-Cresyl sulfate promotes the formation of atherosclerotic lesions and induces plaque instability by targeting vascular smooth muscle cells.

History of chemical sensitivity and diagnosis.

Octopamine stabilizes conduction reliability of an unmyelinated axon during hypoxic stress.

Attenuation of DMBA/croton oil induced mouse skin papilloma by *Apodytes dimidiata* mediated by its antioxidant and antimutagenic potential.

Hydrolysed inulin alleviates the azoxymethane-induced preneoplastic aberrant crypt foci by altering selected intestinal microbiota in Sprague-Dawley rats.

Alterations in juvenile diploid and triploid African catfish skin gelatin yield and amino acid composition: Effects of chlorpyrifos and butachlor exposures.

Genome-wide association study identifies novel susceptibility loci for cutaneous squamous cell carcinoma.

Toward elucidation of dioxin-mediated chloracne and Ah receptor functions.

Previously Unclassified Mutation of mtDNA m.3472T>C: Evidence of Pathogenicity in Leber's Hereditary Optic Neuropathy.

Arsenite and Cadmium Activate MAPK/ERK via Membrane Estrogen Receptors and G-Protein Coupled Estrogen Receptor Signaling in Human Lung Adenocarcinoma Cells.

Skin testing of gallic acid-based hair dye in paraphenylenediamine/paratoluenediamine-reactive patients.

Detection of Melanoma Cancer Biomarker Dimethyl Disulfide Using Cavity Ringdown Spectroscopy at 2666 nm.

Enhanced cyclooxygenase-2 expression levels and metalloproteinase 2 and 9 activation by Hexachlorobenzene in human endometrial stromal cells.

Digoxin reduces atherosclerosis in apolipoprotein E-deficient mice.

Public health and international drug policy.

In Utero and Lactational TCDD Exposure Increases Susceptibility to Lower Urinary Tract Dysfunction in Adulthood.

Antimicrobial films obtained from latex particles functionalized with quaternized block copolymers.

Comparative experimental investigation on the efficacy of mono- and multiprobiotic strains in non-alcoholic fatty liver disease prevention.

[Incidence and risk factors associated with nosocomial infection in pediatric heart surgery].

Mesenchymal expression of the FRAS1/FREM2 gene unit is decreased in the developing fetal diaphragm of nitrofen-induced congenital diaphragmatic hernia.

Gene Expression of FRAS1-Related Extracellular Matrix 1 Is Decreased in Nitrofen-Induced Congenital Diaphragmatic Hernia.

Therapeutic evaluation of HIV transduction basic domain-conjugated superoxide dismutase solution on suppressive effects of the formation of peroxynitrite and expression of COX-2 in murine skin.

Exaggerated arsenic nephrotoxicity in female mice through estrogen-dependent impairments in the autophagic flux.

Mass Spectrometric Approaches to the Identification of Potential Ingredients in Cigarette Smoke Causing Cytotoxicity.

Increased Levels of Total p-Cresylsulfate Are Associated with Pruritus in Patients with Chronic Kidney Disease.

Sesamin attenuates mast cell-mediated allergic responses by suppressing the activation of p38 and nuclear factor- κ B.

A novel synthetic Piper amide derivative NED-180 inhibits hyperpigmentation by activating the PI3K and ERK pathways and by regulating Ca²⁺ influx via TRPM1 channels.

Haptotactic Plasma Polymerized Surfaces for Rapid Tissue Regeneration and Wound Healing.

Carbon-14 radiolabeling and tissue distribution evaluation of MMV390048.

The Synthesis and Accumulation of Resveratrol Are Associated with Veraison and Abscisic Acid Concentration in Beihong (*Vitis vinifera* — *Vitis amurensis*) Berry Skin.

Soil organic matter content effects on dermal pesticide bioconcentration in American toads (*Bufo americanus*).

Study of the inhibition effect of thiazone on muscle optical clearing.

Endophytic *Trichoderma gamsii* YIM PH30019: a promising biocontrol agent with hyperosmolar, mycoparasitism, and antagonistic activities of induced volatile organic compounds on root-rot pathogenic fungi of *Panax notoginseng*.

A simple standard technique for labyrinthectomy in the rat: A methodical communication with a detailed description of the surgical process.

Identification of aryl hydrocarbon receptor signaling pathways altered in TCDD-treated red seabream embryos by transcriptome analysis.

Ablation of the mitochondrial complex IV assembly protein Surf1 leads to increased expression of the UPR(MT) and increased resistance to oxidative stress in primary cultures of fibroblasts.

Optical coherence tomography angiography offers comprehensive evaluation of skin optical clearing in vivo by quantifying optical properties and blood flow imaging simultaneously.

Oxidative DNA damage enhances the carcinogenic potential of in vitro chronic arsenic exposures.

Embryotoxicity of nitrophenols to the early life stages of zebrafish (*Danio rerio*).

Diversity of Cultivated Fungi Associated with Conventional and Transgenic Sugarcane and the Interaction between Endophytic *Trichoderma virens* and the Host Plant.

Multivariate approach to gill pathology in European sea bass after experimental exposure to cadmium and terbuthylazine.

Insights into reptile dermal contaminant exposure: Reptile skin permeability to pesticides.

Direct somatic embryogenesis of *Malaxis densiflora* (A. Rich.) Kuntze.

p-cresol but not p-cresyl sulfate stimulate MCP-1 production via NF- κ B p65 in human vascular smooth muscle cells.

Toxicity studies of sodium thioglycolate administered dermally to F344/N rats and B6C3F1/N mice.

Aortic smooth muscle cell alterations in mice systemically exposed to arsenic.

Pressurized liquid extraction-gas chromatography-mass spectrometry for confirming the photo-induced generation of dioxin-like derivatives and other cosmetic preservative photoproducts on artificial skin.

Acute Sodium Arsenite-Induced Hematological and Biochemical Changes in Wistar Rats: Protective Effects of Ethanol Extract of *Ageratum conyzoides*.

Glycine supplementation in vitro enhances porcine preimplantation embryo cell number and decreases apoptosis but does not lead to live births.

Cellular and molecular changes associated with competence acquisition during passion fruit somatic embryogenesis: ultrastructural characterization and analysis of SERK gene expression.

Ah Receptor Activation by Dioxin Disrupts Activin, BMP, and WNT Signals During the Early Differentiation of Mouse Embryonic Stem Cells and Inhibits Cardiomyocyte Functions.

Adolescent pesticide exposures reported to Texas poison centers.

Prime and boost aerosol exposure via fog machine or shisha smoke followed by cinnamon hypersensitivity and anaphylaxis to spiced food.

Effect of probiotic and prebiotic fermented milk on skin and intestinal conditions in healthy young female students.

Effects of Antioxidant N-acetylcysteine Against Paraquat-Induced Oxidative Stress in Vital Tissues of Mice.

Arsenite accumulation in the mouse eye.

Intracellular Metabolism of α,β -Unsaturated Carbonyl Compounds, Acrolein, Crotonaldehyde and Methyl Vinyl Ketone, Active Toxicants in Cigarette Smoke: Participation of Glutathione Conjugation Ability and Aldehyde-Ketone Sensitive Reductase Activity.

A novel host-vector system for heterologous protein co-expression and purification in the *Trichoderma reesei* industrial strain RUT-C30.

Histopathological and ultramicroscopical changes in gill, liver and kidney of *Anabas testudineus* (Bloch) after chronic intoxication of almix (metsulfuron methyl 10.1%+chlorimuron ethyl 10.1%) herbicide.

Uptake and toxicity of glyphosate in the lichen *Xanthoria parietina* (L.) Th. Fr.

Dual regulation of skin sensitizer-induced HMOX1 expression by Bach1 and Nrf2: Comparison to regulation of the AKR1C2-ARE element in the KeratinoSens cell line.

Dermatoprotective effects of some plant extracts (genus *Ficus*) against experimentally induced toxicological insults in rabbits.

RIFM fragrance ingredient safety assessment, α -butylcinnamaldehyde, CAS Registry Number 7492-44-6.

Caspase-2 protects against oxidative stress in vivo.

[Successful treatment of one case after acute paraquat intoxication complicated with pulmonary fibrosis, mediastinal emphysema and subcutaneous emphysema].

A Dose-Response Modeling Approach Shows That Effects From Mixture Exposure to the Skin Sensitizers Isoeugenol and Cinnamal Are in Line With Dose Addition and Not With Synergism.

Use of acetochlor and cancer incidence in the Agricultural Health Study.

Genotoxicity evaluation of the herbicide Garlon(\hat{A}) and its active ingredient (triclopyr) in fish (*Anguilla anguilla* L.) using the comet assay.

[A Case of Corneal Injury due to Herbicide Containing Paraquat: Effectiveness of 2% Rebamipide Eye Drops].

Acute effects of a prooxidant herbicide on the microalga *Chlamydomonas reinhardtii*: Screening cytotoxicity and genotoxicity endpoints.

Evaluation of early changes induced by diuron in the rat urinary bladder using different processing methods for scanning electron microscopy.

An experimentally refined tool to assess the risks of the human dermal exposure to herbicide chlorotoluron.

Survival of a patient after self-injection of paraquat and surgical excision of the injection site.

[The study of kidney injury in rats with acute paraquat poisoning].

Cinnamon spice and everything not nice: many features of intraoral allergy to cinnamic aldehyde.

Dicamba affects sex steroid hormone level and mRNA expression of related genes in adult rare minnow (*Gobiocypris rarus*) at environmentally relevant concentrations.

Traditional chinese medicine Xuebijing treatment is associated with decreased mortality risk of patients with moderate paraquat poisoning.

The volume ratio of ground glass opacity in early lung CT predicts mortality in acute paraquat poisoning.

Further development of LLNA:DAE method as stand-alone skin-sensitization testing method and applied for evaluation of relative skin-sensitizing potency between chemicals.

Sublethal exposure to commercial formulations of the herbicides dicamba, 2,4-dichlorophenoxyacetic acid, and glyphosate cause changes in antibiotic susceptibility in *Escherichia coli* and *Salmonella enterica* serovar Typhimurium.

ROS-triggered signaling pathways involved in the cytotoxicity and tumor promotion effects of pentachlorophenol and tetrachlorohydroquinone.

Acute toxicity and sublethal effects of the mixture glyphosate (Roundup Active) and Cosmo-Flux 411F to anuran embryos and tadpoles of four Colombian species.

Allergic contact dermatitis to hexyl cinnamaldehyde, cinnamaldehyde, and 3,4 methylbenzylidene camphor in a patient with previous photoallergic contact dermatitis to dexketoprofen.

Molecular mechanisms of acrolein toxicity: relevance to human disease.

Dimethylarsinic acid (DMA(V)) changed the expressions of proliferative related factors and secretion of inflammatory cytokines in rat bladder.

A cell type-specific view on the translation of mRNAs from ROS-responsive genes upon paraquat treatment of *Arabidopsis thaliana* leaves.

Clostridium tertium bacteremia in a patient with glyphosate ingestion.

Use of In Vivo and In Vitro Data to Derive a Chronic Reference Value for Crotonaldehyde Based on Relative Potency to Acrolein.

Paraquat Poisoning Followed by Toxic Epidermal Necrolysis: A Report of Two Cases and Published Work Review.

[Can a sensitizer potency be attenuated?].

DNaseI protects against Paraquat-induced acute lung injury and pulmonary fibrosis mediated by mitochondrial DNA.

North American contact dermatitis group patch test results: 2011-2012.

Reply: association between agent orange exposure and nonmelanotic invasive skin cancer: a pilot study.

Association between agent orange exposure and nonmelanotic invasive skin cancer: a pilot study.

Application of a redox-proteomics toolbox to *Daphnia magna* challenged with model pro-oxidants copper and paraquat.

Oral Administration of 4-Hydroxy-3-Methoxycinnamaldehyde Attenuates Atopic Dermatitis by Inhibiting T Cell and Keratinocyte Activation.

Topically applied metal chelator reduces thermal injury progression in a rat model of brass comb burn.

Acrolein contributes to TRPA1 up-regulation in peripheral and central sensory hypersensitivity following spinal cord injury.

The Genetic Architecture of Arsenic Metabolism Efficiency: A SNP-Based Heritability Study of Bangladeshi Adults.

A human surrogate model of itch utilizing the TRPA1 agonist trans-cinnamaldehyde.

TRPA1 mediates the hypothermic action of acetaminophen.

Role of aldehyde dehydrogenase in hypoxic vasodilator effects of nitrite in rats and humans.

Antinociceptive effect of methanol extract of leaves of *Persicaria hydropiper* in mice.

Dynamic differences in oxidative stress and the regulation of metabolism with age in visceral versus subcutaneous adipose.

Evaluation of the combined effect of thymol, carvacrol and (E)-cinnamaldehyde on *Amblyomma sculptum* (Acari: Ixodidae) and *Dermacentor nitens* (Acari: Ixodidae) larvae.

Comparison on the fatty acid profiles of liver, subcutaneous fat and muscle from feedlot steers finished on diets supplemented with or without cinnamaldehyde or monensin.

Gingiva Equivalent Secretes Negligible Amounts of Key Chemokines Involved in Langerhans Cell Migration Compared to Skin Equivalent.

Hexyl cinnamal: consideration of skin-sensitizing properties and suitability as a positive control.

Micellar formulation of indocyanine green for phototherapy of melanoma.

Development of a physiologically-based pharmacokinetic model of 2-phenoxyethanol and its metabolite phenoxyacetic acid in rats and humans to address toxicokinetic uncertainty in risk assessment.

Reversible Splenic Lesion Syndrome (RESLES) Following Glufosinate Ammonium Poisoning.

Cutaneous drug toxicity from 2,4-dinitrophenol (DNP): Case report and histological description.

Cyclodextrin-modified MEKC method for quantification of selected acidic metabolites of catecholamines in the presence of various biogenic amines. Application to diagnosis of neuroblastoma.

Modulation of aryl hydrocarbon receptor-regulated enzymes by trimethylarsine oxide in C57BL/6 mice: In vivo and in vitro studies.

Current skin symptoms of Yusho patients exposed to high levels of 2,3,4,7,8-pentachlorinated dibenzofuran and polychlorinated biphenyls in 1968.

Activation of the Prostaglandin E2 receptor EP2 prevents house dust mite-induced airway hyperresponsiveness and inflammation by restraining mast cells' activity.

Association between levels of persistent organic pollutants in adipose tissue and cryptorchidism in early childhood: a case-control study.

Using Insulin Infusion Sets in CSII for Longer Than the Recommended Usage Time Leads to a High Risk for Adverse Events: Results From a Prospective Randomized Crossover Study.

Yusho and its latest findings-A review in studies conducted by the Yusho Group.

Ablation of XP-V gene causes adipose tissue senescence and metabolic abnormalities.

Dioxin receptor regulates aldehyde dehydrogenase to block melanoma tumorigenesis and metastasis.

Allergic contact dermatitis to nickel is characterized by a specific micro-RNA signature.

Application of the KeratinoSens[®] assay for assessing the skin sensitization potential of agrochemical active ingredients and formulations.

Effect of Sodium Arsenite on Mouse Skin Carcinogenesis.

Kif7 expression is decreased in the diaphragmatic and pulmonary mesenchyme of nitrofen-induced congenital diaphragmatic hernia.

[Latest Findings of Yusho and Its Therapeutic Development].

Monochloroacetic acid application is an effective alternative to cryotherapy for common and plantar warts in primary care: a randomized controlled trial.

Increasing frequency of severe clinical toxicity after use of 2,4-dinitrophenol in the UK: a report from the National Poisons Information Service.

2,3,7,8-Tetrachlorodibenzo-p-dioxin modulates estradiol-induced aldehydic DNA lesions in human breast cancer cells through alteration of CYP1A1 and CYP1B1 expression.

TCDD-induced activation of aryl hydrocarbon receptor regulates the skin stem cell population.

Health related quality of life and polychlorinated biphenyls and dibenzofurans exposure: 30 years follow-up of Yucheng cohort.

Lineage-dependent effects of aryl hydrocarbon receptor agonists contribute to liver tumorigenesis.

Aryl Hydrocarbon Receptor Activation in Acne Vulgaris Skin: A Case Series from the Region of Naples, Italy.

L-Tryptophan as a Novel Potential Pharmacological Treatment for Wound Healing via Aryl Hydrocarbon Receptor Activation.

KML001 enhances anticancer activity of gemcitabine against pancreatic cancer cells.

Serum free indoxyl sulfate associated with in-stent restenosis after coronary artery stentings.

Volatile emission of decomposing pig carcasses (*Sus scrofa domesticus* L.) as an indicator for the postmortem interval.

Nostoc sp. extract induces oxidative stress-mediated root cell destruction in *Mimosa pigra* L.

Toxicity studies of 5-amino-o-cresol administered dermally to F344/NTac rats and B6C3F1/N mice.

Simultaneous determination of phenoxyethanol and its major metabolite, phenoxyacetic acid, in rat biological matrices by LC-MS/MS with polarity switching: Application to ADME studies.

Mechanism of triphenylmethane Cresol Red degradation by *Trichoderma harzianum* M06.

Transplanted Lichen *Pseudovernia furfuracea* as a Multi-Tracer Monitoring Tool Near a Solid Waste Incinerator in Italy: Assessment of Airborne Incinerator-Related Pollutants.

Pesticide Uptake Across the Amphibian Dermis Through Soil and Overspray Exposures.

High accumulation of arsenic in the esophagus of mice after exposure to arsenite.

Modification of Bacterial Cellulose with Organosilanes to Improve Attachment and Spreading of Human Fibroblasts.

Comparison of toxicity values across zebrafish early life stages and mammalian studies: Implications for chemical testing.

Lipid Peroxide-Derived Short-Chain Carbonyls Mediate Hydrogen Peroxide-Induced and Salt-Induced Programmed Cell Death in Plants.

Dioxin disrupts cranial cartilage and dermal bone development in zebrafish larvae.

Guanine-based structural coloration as an indicator of oxidative stress in a cichlid fish.

Role of *Bacillus subtilis* DNA Glycosylase MutM in Counteracting Oxidatively Induced DNA Damage and in Stationary-Phase-Associated Mutagenesis.

Expression of a cystatin transgene can confer resistance to root lesion nematodes in *Lilium longiflorum* cv. 'Nellie White'.

Phosphatidylcholine Specific PLC-Induced Dysregulation of Gap Junctions, a Robust Cellular Response to Environmental Toxicants, and Prevention by Resveratrol in a Rat Liver Cell Model.

Comparative transcriptome analysis reveals carbohydrate and lipid metabolism blocks in *Brassica napus* L. male sterility induced by the chemical hybridization agent monosulfuron ester sodium.

Characterization and risk assessment of polychlorinated biphenyls in city park soils of Xi'an, China.

Lipotubuloids in ovary epidermis of *Ornithogalum umbellatum* act as metabolons: suggestion of the name 'lipotubuloid metabolon'.

Production of anti-cancer triterpene (betulinic acid) from callus cultures of different *Ocimum* species and its elicitation.

The aryl hydrocarbon receptor: a review of its role in the physiology and pathology of the integument and its relationship to the tryptophan metabolism.

Nicotinamide enhances repair of arsenic and ultraviolet radiation-induced DNA damage in HaCaT keratinocytes and ex vivo human skin.

Phenolic excipients of insulin formulations induce cell death, pro-inflammatory signaling and MCP-1 release.

Glu504Lys Single Nucleotide Polymorphism of Aldehyde Dehydrogenase 2 Gene and the Risk of Human Diseases.

Increase in oxidative stress biomarkers in dogs with ascending-descending myelomalacia following spinal cord injury.

Influence of titanium dioxide nanoparticles on 2,3,7,8-tetrachlorodibenzo-p-dioxin bioconcentration and toxicity in the marine fish European sea bass (*Dicentrarchus labrax*).

The effect of Agent Orange on nonmelanoma skin cancer regression rates.

Metallothioneins attenuate paraquat-induced acute lung injury in mice through the mechanisms of anti-oxidation and anti-apoptosis.

Progression of DNA damage induced by a glyphosate-based herbicide in fish (*Anguilla anguilla*) upon exposure and post-exposure periods--insights into the mechanisms of genotoxicity and DNA repair.

Are DNA-damaging effects induced by herbicide formulations (Roundup® and Garlon®) in fish transient and reversible upon cessation of exposure?

Induction of micronuclei and nuclear lesions in *Channa punctatus* following exposure to carbosulfan, glyphosate and atrazine.

Erythema multiforme-like eruption following acute allergic contact dermatitis after exposure to the emulsified herbicide acetochlor.

From surface to intracellular non-invasive nanoscale study of living cells impairments.

[Clinical analysis of two cases of skin burned by paraquat].

Unilateral hippocampal infarction associated with an attempted suicide: a case report.

The impact of Agent Orange on characteristics of coronary artery lesion and repeat revascularization.

Exacerbation of symptoms in agricultural pesticide applicators with asthma.

Dermal developmental toxicity of N-phenylimide herbicides in rats.

Post-Vietnam military herbicide exposures in UC-123 Agent Orange spray aircraft.

Allergic dermatitis from cyanamide for chronic alcoholism detoxification.

Species-dependent effects of biochar amendment on bioaccumulation of atrazine in earthworms.

Association between Agent Orange exposure and nonmelanotic invasive skin cancer: a pilot study.

Flurochloridone-based herbicides induced genotoxicity effects on *Rhinella arenarum* tadpoles (Anura: Bufonidae).

Stable isotope labeling method for the investigation of protein haptentation by electrophilic skin sensitizers.

XRCC1 Arg194Trp and Arg399Gln polymorphisms and arsenic methylation capacity are associated with urothelial carcinoma.

Differences of urinary arsenic metabolites and methylation capacity between individuals with and without skin lesions in Inner Mongolia, Northern China.

Research on tumorigenicity of cinnamaldehyde in melanoma cell lines and its mechanism.

Biodegradation of sulfosulphuron in agricultural soil by *Trichoderma* sp.

Estimating terrestrial amphibian pesticide body burden through dermal exposure.

Somatosensory and vasomotor manifestations of individual and combined stimulation of TRPM8 and TRPA1 using topical L-menthol and trans-cinnamaldehyde in healthy volunteers.

OxyR and SoxR modulate the inducible oxidative stress response and are implicated during different stages of infection for the bacterial phytopathogen *Pantoea stewartii* subsp. *stewartii*.

An increase of oxidised nucleotides activates DNA damage checkpoint pathway that regulates post-embryonic development in *Caenorhabditis elegans*.

Acrolein modification impairs key functional features of rat apolipoprotein E: identification of modified sites by mass spectrometry.

Organophosphate pesticide exposure and dialkyl phosphate urinary metabolites among chili farmers in northeastern Thailand.

Human skin in vitro permeation of bentazon and isoproturon formulations with or without protective clothing suit.

Uremic toxicity and sclerostin in chronic kidney disease patients.

AhR signalling and dioxin toxicity.

The novel regulations of MEF2A, CAMKK2, CALM3, and TNNI3 in ventricular hypertrophy induced by arsenic exposure in rats.

Effects of in utero exposure of C57BL/6J mice to 2,3,7,8-tetrachlorodibenzo-p-dioxin on epidermal permeability barrier development and function.

The Ah receptor regulates growth factor expression in head and neck squamous cell carcinoma cell lines.

The formation of DNA single-strand breaks and alkali-labile sites in human blood lymphocytes exposed to 365-nm UVA radiation.

Yashada bhasma (Zinc calx) and Tankana (Borax) inhibit *Propionibacterium acne* and suppresses acne induced inflammation in vitro.

Responsiveness of hepatic and cerebral cytochrome P450 in rat offspring prenatally and lactationally exposed to a reconstituted PCB mixture.

Androgen receptor signaling in hepatocellular carcinoma and pancreatic cancers.

Joint effects of urinary arsenic methylation capacity with potential modifiers on arsenicosis: a cross-sectional study from an endemic arsenism area in Huhhot Basin, northern China.

Gold nanoshells-mediated bimodal photodynamic and photothermal cancer treatment using ultra-low doses of near infra-red light.

Hepatoprotective and anticlastogenic effects of ethanol extract of *Irvingia gabonensis* (IG) leaves in sodium arsenite-induced toxicity in male Wistar rats.

The acquisition of cancer stem cell-like properties and neoplastic transformation of human keratinocytes induced by arsenite involves epigenetic silencing of *let-7c* via Ras/NF- κ B.

Mammalian microtubule P-body dynamics are mediated by nesprin-1.

Synthesis and biological evaluation of 10-(11) C-dihydratetrabenazine as a vesicular monoamine transporter 2 radioligand.

The thiocarbamate disulphide drug, disulfiram induces osteopenia in rats by inhibition of osteoblast function due to suppression of acetaldehyde dehydrogenase activity.

First demonstration of gold nanorods-mediated photodynamic therapeutic destruction of tumors via near infra-red light activation.

Augmented atherogenesis in ApoE-null mice co-exposed to polychlorinated biphenyls and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The emerging role of Nrf2 in dermatotoxicology.

Increased expression of the aryl hydrocarbon receptor in patients with chronic inflammatory skin diseases.

Activation of Nrf2 in keratinocytes causes chloracne (MADISH)-like skin disease in mice.

Downregulation of p300 gene expression in airway mesenchyme of nitrofen-induced hypoplastic lungs.

Homoisoflavanone prevents mast cell activation and allergic responses by inhibition of Syk signaling pathway.

Effects of incapacitant spray deployed in the restraint and arrest of detainees in the Metropolitan Police Service area, London, UK: a prospective study.

A new alternative method for testing skin irritation using a human skin model: a pilot study.

Accidental exposure to polychlorinated biphenyls (PCB) in waste cargo after heavy seas. Global waste transport as a source of PCB exposure.

A novel 2,6-diformyl-4-methylphenol based chemosensor for Zn(II) ions by ratiometric displacement of Cd(II) ions and its application for cell imaging on human melanoma cancer cells.

Effects of intestinal bacteria-derived p-cresyl sulfate on Th1-type immune response in vivo and in vitro.

[The functional state of the kidneys after adenosine triphosphate-sensitive potassium channels activation in experimental acute hypoxia].

Histopathological evaluation of tumor necrosis and volume after cyanogenic chemotherapy.

Chemopreventive activity of turmeric essential oil and possible mechanisms of action.

Rapid iron desensitization after generalized urticaria and facial angioedema.

Induction of a chloracne phenotype in an epidermal equivalent model by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) is dependent on aryl hydrocarbon receptor activation and is not reproduced by aryl hydrocarbon receptor knock down.

Lack of nrf2 results in progression of proliferative lesions to neoplasms induced by long-term exposure to non-genotoxic hepatocarcinogens involving oxidative stress.

Mutation spectra of Kras and Tp53 in urethral and lung neoplasms in B6C3F1 mice treated with 3,3',4,4'-tetrachloroazobenzene.

Trichoderma genes in plants for stress tolerance- status and prospects.

Epoxyalcohols: bioactivation and conjugation required for skin sensitization.

Quantitative analysis of volatile organic compounds released and consumed by rat L6 skeletal muscle cells in vitro.

[Experimental evaluation of pure traditional Chinese medical mouth rinse on skin and mucosa stimulation and bacteriostatic-bactericidal effect].

Toothache caused by trigeminal neuralgia of vestibular schwannoma: a case report. [Corrected].

Atorvastatin restores arsenic-induced vascular dysfunction in rats: modulation of nitric oxide signaling and inflammatory mediators.

Glyphosate poisoning with acute pulmonary edema.

Transplanted human adipose tissue-derived stem cells engraft and induce regeneration in mice olfactory neuroepithelium in response to dichlobenil subadministration.

The regeneration of P2 olfactory sensory neurons is selectively impaired following methyl bromide lesion.

The combined treatment with chloroquine and the enzymatic oxidation products of spermine overcomes multidrug resistance of melanoma M14 ADR2 cells: a new therapeutic approach.

Aryl hydrocarbon receptor mediated activities in road dust from a metropolitan area, Hanoi-Vietnam: contribution of polycyclic aromatic hydrocarbons (PAHs) and human risk assessment.

Two-stage culture procedure using thidiazuron for efficient micropropagation of *Stevia rebaudiana*, an anti-diabetic medicinal herb.

Polychlorinated Biphenyls in Residential Soils and their Health Risk and Hazard in an Industrial City in India.

Histopathologic alterations associated with global gene expression due to chronic dietary TCDD exposure in juvenile zebrafish.

[Effect of tumor necrosis factor receptor associated factor 6 gene silencing by small interfering RNA on proliferation of odontoblast cells].

[The first stage of toxicology evaluation and analysis of 1502 pesticide samples].

Metabolic activation of the antibacterial agent triclocarban by cytochrome P450 1A1 yielding glutathione adducts.

The induction of long-term potentiation in spinal dorsal horn after peripheral nociceptive stimulation and contribution of spinal TRPV1 in rats.

Global assessment of arsenic pollution using sperm whales (*Physeter macrocephalus*) as an emerging aquatic model organism.

Bifidobacterium fermented milk and galacto-oligosaccharides lead to improved skin health by decreasing phenols production by gut microbiota.

Glyphosate surfactant herbicide poisoning and management.

TCDD induces dermal accumulation of keratinocyte-derived matrix metalloproteinase-10 in an organotypic model of human skin.

Production of crude cellulase and xylanase from *Trichoderma harzianum* PPDDN10 NFCCI-2925 and its application in photocopier waste paper recycling.

Persistent organic pollutant levels in semi-domesticated reindeer (*Rangifer tarandus tarandus* L.), feed, lichen, blood, milk, placenta, foetus and calf.

Label-retaining, quiescent globose basal cells are found in the olfactory epithelium.

Hypoxia perturbs aryl hydrocarbon receptor signaling and CYP1A1 expression induced by PCB 126 in human skin and liver-derived cell lines.

Mechanism for the protective effect of diallyl disulfide against cyclophosphamide acute urotoxicity in rats.

Dermal uptake of organic vapors commonly found in indoor air.

Conflicts of interests, confidentiality and censorship in health risk assessment: the example of an herbicide and a GMO.

History of Chemistry in the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK).

Viscous optical clearing agent for in vivo optical imaging.

Alpha-lipoic acid protects oxidative stress, changes in cholinergic system and tissue histopathology during co-exposure to arsenic-dichlorvos in rats.

Oral lesions and pulmonary fibrosis after ingesting grapes.

High level of dioxin-TEQ in tissue is associated with Agent Orange exposure but not with biochemical recurrence after radical prostatectomy.

[Two case reports of scrotal skin burn complicated with organ function lesion caused by paraquat].

Mechanisms involved in oxidative stress regulation.

Mechanisms of permanent loss of olfactory receptor neurons induced by the herbicide 2,6-dichlorobenzonitrile: effects on stem cells and noninvolvement of acute induction of the inflammatory cytokine IL-6.

Toll-like receptor 4 is involved in myocardial damage following paraquat poisoning in mice.

Dose-response of diuron [3-(3,4-dichlorophenyl)-1,1-dimethylurea] in the urothelial mucosa of Wistar rats.

Evaluation of hydroxyatrazine in the endocrine disruptor screening and testing program's male and female pubertal protocols.

Oxidative stress-induced mutagenesis in single-strand DNA occurs primarily at cytosines and is DNA polymerase zeta-dependent only for adenines and guanines.

Procedures to evaluate the efficiency of protective clothing worn by operators applying pesticide.

Agent Orange exposure and prevalence of self-reported diseases in Korean Vietnam veterans.

Evaluation of selected biomarkers for the detection of chemical sensitization in human skin: a comparative study applying THP-1, MUTZ-3 and primary dendritic cells in culture.

Clinicopathological features of mycosis fungoides in patients exposed to Agent Orange during the Vietnam War.

Questions concerning the potential impact of glyphosate-based herbicides on amphibians.

Effects of the herbicide atrazine in neotropical catfish (*Rhamdia quelen*).

Spinal transient receptor potential ankyrin 1 channel induces mechanical hypersensitivity, increases cutaneous blood flow, and mediates the pronociceptive action of dynorphin A.

CT imaging as a prognostic indicator for patients with pulmonary injury from acute paraquat poisoning.

Specific pesticide-dependent increases in α -synuclein levels in human neuroblastoma (SH-SY5Y) and melanoma (SK-MEL-2) cell lines.

The sensitivity of the KeratinoSens[®] assay to evaluate plant extracts: a pilot study.

Severe adverse effects related to dermal exposure to a glyphosate-surfactant herbicide.

Paraquat-induced retinal degeneration is exaggerated in CX3CR1-deficient mice and is associated with increased retinal inflammation.

Allergic contact dermatitis due to dazomet absorbed by agricultural rubber boots.

Arsenic metabolism efficiency has a causal role in arsenic toxicity: Mendelian randomization and gene-environment interaction.

Slow accumulation of mutations in Xpc^{-/-} mice upon induction of oxidative stress.

Protective effects of cinnamic acid and cinnamic aldehyde on isoproterenol-induced acute myocardial ischemia in rats.

Participation of catalase in voluntary ethanol consumption in perinatally low-level lead-exposed rats.

Cinnamomum cassia essential oil inhibits α -MSH-induced melanin production and oxidative stress in murine B16 melanoma cells.

Plant derived aporphinic alkaloid S-(+)-dicentrine induces antinociceptive effect in both acute and chronic inflammatory pain models: evidence for a role of TRPA1 channels.

The dose of cyclophosphamide for treating paraquat-induced rat lung injury.

Mitochondria-targeted antioxidant peptide SS31 protects the retinas of diabetic rats.

Thermal grill-evoked sensations of heat correlate with cold pain threshold and are enhanced by menthol and cinnamaldehyde.

Regular ingestion of cinnamomi cortex pulveratus offers gastroprotective activity in mice.

9-cis retinoic acid is the ALDH1A1 product that stimulates melanogenesis.

Acrolein-conjugated low-density lipoprotein induces macrophage foam cell formation.

Thirteen week rodent feeding study with grain from molecular stacked trait lepidopteran and coleopteran protected (DP- α -4114-3) maize.

2-Hydroxycinnamaldehyde inhibits the epithelial-mesenchymal transition in breast cancer cells.

Evaluation of non-radioactive endpoints of ex vivo local lymph node assay-BrdU to investigate select contact sensitizers.

Repair kinetics of acrolein- and (E)-4-hydroxy-2-nonenal-derived DNA adducts in human colon cell extracts.

LESION SIMULATING DISEASE1 interacts with catalases to regulate hypersensitive cell death in Arabidopsis.

Reactive oxygen species promote chloroplast dysfunction and salicylic acid accumulation in fumonisin B1-induced cell death.

Translesion synthesis past acrolein-derived DNA adducts by human mitochondrial DNA polymerase β .

Direct detection of chlorpropham on potato skin using desorption electrospray ionization.

Assessment of the acaricidal activity of carvacrol, (E)-cinnamaldehyde, trans-anethole, and linalool on larvae of *Rhipicephalus microplus* and *Dermacentor nitens* (Acari: Ixodidae).

Contact sensitizing potential of pyrogallol and 5-amino-o-cresol in female BALB/c mice.

Singlet oxygen mediated DNA damage induced phototoxicity by ketoprofen resulting in mitochondrial depolarization and lysosomal destabilization.

The neurological effects of methyl bromide intoxication.

Induction of thymic stromal lymphopoietin production by nonanoic acid and exacerbation of allergic inflammation in mice.

The dioxin receptor has tumor suppressor activity in melanoma growth and metastasis.

Photosensitization of singlet oxygen and in vivo photodynamic therapeutic effects mediated by PEGylated W(18)O(49) nanowires.

Stability and performance of rapid-acting insulin analogs used for continuous subcutaneous insulin infusion: a systematic review.

Association between blood levels of PCDDs/PCDFs/dioxin-like PCBs and history of allergic and other diseases in the Japanese population.

Reduction of CC-chemokine ligand 5 by aryl hydrocarbon receptor ligands.

Iron supplementation among pregnant women: results from a population-based survey study.

Malassezia yeasts produce a collection of exceptionally potent activators of the Ah (dioxin) receptor detected in diseased human skin.

Sensitizing capacity of Disperse Orange 1 and its potential metabolites from azo reduction and their cross-reactivity pattern.

Renal metabolic profiling of early renal injury and renoprotective effects of *Poria cocos* epidermis using UPLC Q-TOF/HSMS/MSE.

Monoisoamyl 2,3-dimercaptosuccinic acid attenuates arsenic induced toxicity: behavioral and neurochemical approach.

Longwave UV light induces the aging-associated progerin.

Genotoxic and clastogenic effects of monohaloacetic acid drinking water disinfection by-products in primary human lymphocytes.

Reduction in impulse noise-induced permanent threshold shift with intracochlear application of an NADPH oxidase inhibitor.

Iron plays a certain role in patterned hair loss.

The human Ah receptor: hints from dioxin toxicities to deregulated target genes and physiological functions.

EMT and CSC-like properties mediated by the IKK β /I κ B α /RelA signal pathway via the transcriptional regulator, Snail, are involved in the arsenite-induced neoplastic transformation of human keratinocytes.

Epigenetics and pesticides.

[Effects of Shenwu capsule on learning-memory ability and cholinergic function of brain in AD-like rat model induced by chronic infusion of sodium azide by minipump].

[Effects of icariin on beta-amyloid and neurotrophic factors in brain of mitochondrial deficiency model rats].

Action of hexachlorobenzene on tumor growth and metastasis in different experimental models.

Biological and tumor-promoting effects of dioxin-like and non-dioxin-like polychlorinated biphenyls in mouse liver after single or combined treatment.

Teratogenic effects of 4-nonylphenol on early embryonic and larval development of the catfish *Heteropneustes fossilis*.

Association between exposure to dioxin-like polychlorinated biphenyls and miR-191 expression in human peripheral blood mononuclear cells.

Fentichlor photocontact dermatitis: a persistent enigma.

Cases from NACCT acute and intensive care symposium: altered mental status, seizures, and rash in a fumigation company employee.

Mortality of American bullfrog tadpoles *Lithobates catesbeianus* infected by *Gyrodactylus jennyae* and experimentally exposed to *Batrachochytrium dendrobatidis*.

Spontaneous renal tumors in two rats from a thirteen week rodent feeding study with grain from molecular stacked trait lepidopteran and coleopteran resistant (DP- \sim 4114-3) maize.

Enhanced carcinogenicity by coexposure to arsenic and iron and a novel remediation system for the elements in well drinking water.

Blood levels of PCDDs, PCDFs, and coplanar PCBs in Yusho mothers and their descendants: association with fetal Yusho disease.

CD44v6 expression in human skin keratinocytes as a possible mechanism for carcinogenesis associated with chronic arsenic exposure.

Increased kidney metabolism as a pathway to kidney tissue hypoxia and damage: effects of triiodothyronine and dinitrophenol in normoglycemic rats.

Accidental occupational exposure to phytosanitary products: experience of the Poison Control Center in Marseille from 2008 to 2010.

Estimation of the enamel and dentin mineral content from the refractive index.

Comparison of destructive periodontal disease in blue iris mink to PCB 126-induced mandibular and maxillary squamous epithelial proliferation in natural dark mink.

Linkages between the life-history evolution of tropical and temperate birds and the resistance of cultured skin fibroblasts to oxidative and non-oxidative chemical injury.

Oxysterols modulate calcium signalling in the A7r5 aortic smooth muscle cell-line.

Impact of 2,3,7,8-tetrachlorodibenzo-p-dioxin on cutaneous wound healing.

Functional recovery of odor representations in regenerated sensory inputs to the olfactory bulb.

Glyphosate, pathways to modern diseases II: Celiac sprue and gluten intolerance.

Demonstration of ATP-dependent, transcellular transport of lipid across the lymphatic endothelium using an in vitro model of the lacteal.

Paraquat poisoning by skin absorption: Two case reports and a literature review.

Rodent models of Parkinson's disease: beyond the motor symptomatology.

Comparative developmental toxicity of new aromatic halogenated DBPs in a chlorinated saline sewage effluent to the marine polychaete *Platynereis dumerilii*.

Spatial distribution of polychlorinated dibenzo-p-dioxins and dibenzo-furans (PCDDs/Fs) in dust, soil, sediment and health risk assessment from an intensive electronic waste recycling site in Southern China.

Resveratrol stimulates mitochondrial bioenergetics to protect retinal pigment epithelial cells from oxidative damage.

Gene expression and pathologic alterations in juvenile rainbow trout due to chronic dietary TCDD exposure.

A new in vivo model of pantothenate kinase-associated neurodegeneration reveals a surprising role for transcriptional regulation in pathogenesis.

Acute toxicity of some synthetic cyanogens in rats: time-dependent cyanide generation and cytochrome oxidase inhibition in soft tissues after sub-lethal oral intoxication.

Emptying of Intracellular Calcium Pool and Oxidative Stress Imbalance Are Associated with the Glyphosate-Induced Proliferation in Human Skin Keratinocytes HaCaT Cells.

Transplantation of induced pluripotent stem cells without C-Myc attenuates retinal ischemia and reperfusion injury in rats.

Lignin isolated from steam-exploded eucalyptus wood chips by phase separation and its affinity to *Trichoderma reesei* cellulase.

Synthesis and cytotoxicity of oligomycin A derivatives modified in the side chain.

Dietary carnosine prevents early atherosclerotic lesion formation in apolipoprotein E-null mice.

Switchable skin window induced by optical clearing method for dermal blood flow imaging.

Two-photon microscopy and fluorescence lifetime imaging of retinal pigment epithelial cells under oxidative stress.

Targeting ALDH1A1 to treat pigmentary disorders.

Loss of Neil3, the major DNA glycosylase activity for removal of hydantoins in single stranded DNA, reduces cellular proliferation and sensitizes cells to genotoxic stress.

Influence of cyclic mechanical stretch and tissue constraints on cellular and collagen alignment in fibroblast-derived cell sheets.

Cortical microtubule arrays are initiated from a nonrandom prepattern driven by atypical microtubule initiation.

Global expression profiling of globose basal cells and neurogenic progression within the olfactory epithelium.

Cancer incidence in pulmonary vasculitis.

Generation of rice mutants by chemical mutagenesis.

Effects of bioreactive acrolein from automotive exhaust gases on human cells in vitro.

Mechanisms underlying the inhibitory effects of arsenic compounds on protein tyrosine phosphatase (PTP).

The involvement of Arabidopsis glutathione peroxidase 8 in the suppression of oxidative damage in the nucleus and cytosol.

A step further toward glyphosate-induced epidermal cell death: involvement of mitochondrial and oxidative mechanisms.

Hepatic protein expression networks associated with masculinization in the female fathead minnow (*Pimephales promelas*).

[Therapeutic effects of epidermal growth factor (EGF) combined with plasma cryoprecipitate (CRYO) on the corneal injury induced by paraquat].

Peripheral nerve and skin damage associated with working in a STCP factory: report of four cases.

Differential genotoxicity of Roundup(®) formulation and its constituents in blood cells of fish (*Anguilla anguilla*): considerations on chemical interactions and DNA damaging mechanisms.

Effects of herbicides and the chytrid fungus *Batrachochytrium dendrobatidis* on the health of post-metamorphic northern leopard frogs (*Lithobates pipiens*).

Subchronic exposure to atrazine induces biochemical and histopathological changes in the gills of a Neotropical freshwater fish, *Prochilodus lineatus*.

Successful treatment of patients with paraquat intoxication: three case reports and review of the literature.

[Paraquat poisoning. Case report and overview].

Effect of topical dimethylarsinic acid on the expression of apoptosis-related proteins in mouse skin.

Farmers' exposure to herbicides in North Italy: assessment under real-life conditions in small-size rice and corn farms.

[The relationship between HIF-1 α expression and the early lung fibrosis in rats with acute paraquat poisoning].

Glyphosate-induced stiffening of HaCaT keratinocytes, a Peak Force Tapping study on living cells.

Animal models of Parkinson's disease.

DNA damage in fish (*Anguilla anguilla*) exposed to a glyphosate-based herbicide -- elucidation of organ-specificity and the role of oxidative stress.

Renal, hepatic, pulmonary and adrenal tumors induced by prenatal inorganic arsenic followed by dimethylarsinic acid in adulthood in CD1 mice.

[Experimental anticoagulant therapy of acute lung injury induced by paraquat].

Effects of subchronic exposure to atrazine on zebrafish (*Danio rerio*).

The effects of subchronic exposure to metribuzin on *Danio rerio*.

Effect of chronic pesticide exposure in farm workers of a Mexico community.

Exposure to a commercial glyphosate formulation (Roundup[®]) alters normal gill and liver histology and affects male sexual activity of *Jenynsia multidentata* (Anablepidae, Cyprinodontiformes).

Methylation capacity of arsenic and skin lesions in smelter plant workers.

In vitro induction of tetraploid garlic with trifluralin.

Monoclonal antibody against protein-bound glutathione: use of glutathione conjugate of acrolein-modified proteins as an immunogen.

Attenuation of mouse somatic and emotional inflammatory pain by hydralazine through scavenging acrolein and inhibiting neuronal activation.

Resveratrol inhibits paraquat-induced oxidative stress and fibrogenic response by activating the nuclear factor erythroid 2-related factor 2 pathway.

TRPA1 is functionally expressed in melanoma cells but is not critical for impaired proliferation caused by allyl isothiocyanate or cinnamaldehyde.

Evaluating the efficacy of cinnamaldehyde and *Echinacea purpurea* plant extract in broilers against *Eimeria acervulina*.

Inverse correlation between stroke and urinary 3-hydroxypropyl mercapturic acid, an acrolein-glutathione metabolite.

Stability of selected volatile contact allergens in different patch test chambers under different storage conditions.

Molecular characterization of the putative transcription factor SebA involved in virulence in *Aspergillus fumigatus*.

Effect of carcinogenic acrolein on DNA repair and mutagenic susceptibility.

Function and immunocytochemical localization of two novel odorant-binding proteins in olfactory sensilla of the scarab beetle *Holotrichia oblita* Faldermann (Coleoptera: Scarabaeidae).

TRPA1 is functionally expressed primarily by IB4-binding, non-peptidergic mouse and rat sensory neurons.

Biosynthesis and functions of a melanoid pigment produced by species of the sporothrix complex in the presence of L-tyrosine.

Enhanced apoptosis in retinal pigment epithelium under inflammatory stimuli and oxidative stress.

Predictors of cure, amputation and follow-up dropout among patients with mycetoma seen at the Mycetoma Research Centre, University of Khartoum, Sudan.

Necrosis and apoptosis of renal tubular epithelial cells in rats exposed to 3-methyl-4-nitrophenol.

Adverse alterations in mitochondrial function contribute to type 2 diabetes mellitus-related endothelial dysfunction in humans.

Eccrine porocarcinoma with carcinomatous lymphangitis in a patient with history of arsenic exposure: a case report.

Suicidal sodium azide intoxication: An analytical challenge based on a rare case.

Patch testing with the textile dyes Disperse Orange 1 and Disperse Yellow 3 and some of their potential metabolites, and simultaneous reactions to para-amino compounds.

Glutamine suppresses dinitrophenol fluorobenzene-induced allergic contact dermatitis and itching: inhibition of contact dermatitis by glutamine.

In vitro and in vivo biological evaluation of new 4,5-disubstituted 1,2,3-triazoles as cis-constrained analogs of combretastatin A4.

Tumors and proliferative lesions in adult offspring after maternal exposure to methylarsonous acid during gestation in CD1 mice.

Inorganic arsenic and basal cell carcinoma in areas of Hungary, Romania, and Slovakia: a case-control study.

Src-mediated aryl hydrocarbon and epidermal growth factor receptor cross talk stimulates colon cancer cell proliferation.

Assessment of the sensitizing potential of textile disperse dyes and some of their metabolites by the loose-fit coculture-based sensitization assay (LCSA).

Cross-regulations among NRFs and KEAP1 and effects of their silencing on arsenic-induced antioxidant response and cytotoxicity in human keratinocytes.

Metformin reduces endogenous reactive oxygen species and associated DNA damage.

Isolation and identification of C-19 fatty acids with anti-tumor activity from the spores of *Ganoderma lucidum* (reishi mushroom).

A fatal case of mothball intoxication presenting with refractory pruritus and ichthyosis.

Effects of prenatal exposure to sodium arsenite on motor and food-motivated behaviors from birth to adulthood in C57BL6/J mice.

ErbB1/2 tyrosine kinase inhibitor mediates oxidative stress-induced apoptosis in inflammatory breast cancer cells.

Up-regulation of osteopontin expression by aryl hydrocarbon receptor via both ligand-dependent and ligand-independent pathways in lung cancer.

Evidence of a suffocation alarm system within the periaqueductal gray matter of the rat.

Quantitative proteomic analyses of cerebrospinal fluid using iTRAQ in a primate model of iron deficiency anemia.

Exogenous inflammatory acne due to combined application of cosmetic and facial rubbing.

Enhancing effects of trichloroethylene and tetrachloroethylene on type I allergic responses in mice.

Genome-wide association study identifies chromosome 10q24.32 variants associated with arsenic metabolism and toxicity phenotypes in Bangladesh.

The pulmonary mesenchymal tissue layer is defective in an in vitro recombinant model of nitrofen-induced lung hypoplasia.

The cutaneous lesions of dioxin exposure: lessons from the poisoning of Victor Yushchenko.

In vitro evaluation of betamethasone esters for phototoxic potential.

Contact and fumigant toxicities of 3-methylphenol isolated from *Ostericum koreanum* and its derivatives against house dust mites.

Chitinolytic assay of indigenous *Trichoderma* isolates collected from different geographical locations of Chhattisgarh in Central India.

Arsenate reduction and methylation in the cells of *Trichoderma asperellum* SM-12F1, *Penicillium janthinellum* SM-12F4, and *Fusarium oxysporum* CZ-8F1 investigated with X-ray absorption near edge structure.

1 α ,25 dihydroxyvitamin D₃ enhances cellular defences against UV-induced oxidative and other forms of DNA damage in skin.

The effect of aryl hydrocarbon receptor ligands on the expression of polymerase (DNA directed) κ (Pol^{κ}), polymerase RNA II (DNA directed) polypeptide A (PolR2a), CYP1B1 and CYP1A1 genes in rat liver.

Incidence of jaw lesions and activity and gene expression of hepatic P4501A enzymes in mink (*Mustela vison*) exposed to dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin, 2,3,7,8-tetrachlorodibenzofuran, and 2,3,4,7,8-pentachlorodibenzofuran.

The osteogenesis of bacterial cellulose scaffold loaded with bone morphogenetic protein-2.

Mutagenic and antimutagenic properties of some lichen species grown in the Eastern Anatolia Region of Turkey.

Accumulation and toxic effect of arsenic and other heavy metals in a contaminated area of West Bengal, India, in the lichen *Pyxine coccinea* (Sw.) Nyl.

A New Rice Disease, Black Sheath Spot, Caused by *Curvularia fallax* in China.

Poor air quality in classrooms related to asthma and rhinitis in primary schoolchildren of the French 6 Cities Study.

Role of chondroitin sulfate C in the action of anthrax toxin.

Somatic embryogenesis of a wild passion fruit species *Passiflora cincinnata* Masters: histocytological and histochemical evidences.

Enhanced optical clearing of skin in vivo and optical coherence tomography in-depth imaging.

Metabolism of the antibacterial triclocarban by human epidermal keratinocytes to yield protein adducts.

Protective effect of *Enicostema axillare* on mutagenicity of *Salmonella typhimurium* by increasing free radical scavenging abilities.

GSTO and AS3MT genetic polymorphisms and differences in urinary arsenic concentrations among residents in Bangladesh.

Clinical outcome of veterans with acute coronary syndrome who had been exposed to agent orange.

Extracellular tyrosinase from the fungus *Trichoderma reesei* shows product inhibition and different inhibition mechanism from the intracellular tyrosinase from *Agaricus bisporus*.

Acute inhalation study of allyl alcohol for derivation of acute exposure guideline levels.

Maternal exposure to drinking-water chlorination by-products and small-for-gestational-age neonates.

Site-specific oxidation of apolipoprotein A-I impairs cholesterol export by ABCA1, a key cardioprotective function of HDL.

Ovariectomized mouse uterotrophic assay of 36 chemicals.

The Aryl Hydrocarbon Receptor Influences Transplant Outcomes in Response to Environmental Signals.

Enzymatic degradation of endocrine-disrupting chemicals in aquatic plants and relations to biological Fenton reaction.

Computer controlled chamber measurements for clay adherence relevant for potential dioxin exposure through skin.

Biological analysis of endocrine-disrupting chemicals in animal meats from the Pearl River Delta, China.

Effects of deliberate ingestion of organophosphate or paraquat on brain stem auditory-evoked potentials.

Enhanced sensitization and elicitation responses caused by mixtures of common fragrance allergens.

Removal of reactive oxygen species-induced 3'-blocked ends by XPF-ERCC1.

Amphibians at risk? Susceptibility of terrestrial amphibian life stages to pesticides.

Demasculinization and feminization of male gonads by atrazine: consistent effects across vertebrate classes.

Protective effect of 4,4'-diaminodiphenylsulfone against paraquat-induced mouse lung injury.

Toxicology and risk assessment of acrolein in food.

Comparison of nitrofen uptake via water and food and its distribution in tissue of common carp, *Cyprinus carpio* L.

³H-Hydroxy-1,N2-propano-2'-deoxyguanosine DNA adduct conjugates the N-terminal amine of the KWKK peptide via a carbinolamine linkage.

A novel human volunteer pain model using contact heat evoked potentials (CHEP) following topical skin application of transient receptor potential agonists capsaicin, menthol and cinnamaldehyde.

Acrolein inhalation prevents vascular endothelial growth factor-induced mobilization of Flk-1+/Sca-1+ cells in mice.

Waterborne exposure to clodinafop-propargyl disrupts the posterior and ventral development of zebrafish embryos.

Granulocyte macrophage-colony stimulating factor protects against substantia nigra dopaminergic cell loss in an environmental toxin model of Parkinson's disease.

Systemic contact dermatitis in children: how an avoidance diet can make a difference.

Neonatal exposure to herbicide acetochlor alters pubertal development in female wistar rats.

Histopathological changes in gill, liver and kidney of neotropical fish *Colossoma macropomum* exposed to paraquat at different temperatures.

Effects of atrazine, agricultural runoff, and selected effluents on antimicrobial activity of skin peptides in *Xenopus laevis*.

Acrolein, an I- κ B α -independent downregulator of NF- κ B activity, causes the decrease in nitric oxide production in human malignant keratinocytes.

A review of epidemiologic studies of triazine herbicides and cancer.

Ferulic acid attenuation of advanced glycation end products extends the lifespan of *Caenorhabditis elegans*.

Liquid chromatographic-electrospray mass spectrometric determination of 1-methyl-4-phenylpyridine (MPP+) in discrete regions of murine brain.

Chronic progressive nephropathy in male F344 rats in 90-day toxicity studies: its occurrence and association with renal tubule tumors in subsequent 2-year bioassays.

Erythema multiforme major due to occupational exposure to the herbicides alachlor and butachlor.

The effects of Click 500 SC (terbuthylazine) on common carp *Cyprinus carpio* under (sub)chronic conditions.

Pesticide risk assessment: A study on inhalation and dermal exposure to 2,4-D and paraquat among Malaysian paddy farmers.

Glycogen synthase kinase 3 β and its phosphorylated form (Y216) in the paraquat-induced model of parkinsonism.

A guide to neurotoxic animal models of Parkinson's disease.

The involvement of TRPA1 channel activation in the inflammatory response evoked by topical application of cinnamaldehyde to mice.

Isopentenyl pyrophosphate is a novel antinociceptive substance that inhibits TRPV3 and TRPA1 ion channels.

A pathway-based analysis of urinary arsenic metabolites and skin lesions.

Oral exposure to acrolein exacerbates atherosclerosis in apoE-null mice.

Arsenic methylation capacity and its correlation with skin lesions induced by contaminated drinking water consumption in residents of chronic arsenicosis area.

Carnosine protects against the neurotoxic effects of a serotonin-derived melanoid.

Mitochondrial dysfunction in skin fibroblasts from a Parkinson's disease patient with an alpha-synuclein triplication.

Measuring the penetration of a skin sensitizer and its delivery vehicles simultaneously with confocal Raman spectroscopy.

Patch testing for food-associated allergies in orofacial granulomatosis.

Application of liquid chromatography-direct-electron ionization-MS in an in vitro dermal absorption study: quantitative determination of trans-cinnamaldehyde.

Dermal carbonyl modification is related to the yellowish color change of photo-aged Japanese facial skin.

Reagent precoated targets for rapid in-tissue derivatization of the anti-tuberculosis drug isoniazid followed by MALDI imaging mass spectrometry.

Assessment of dermal exposure to pesticide residues during re-entry.

Herbicidal activity of culture filtrates of *Trichoderma* spp. against two problematic weeds of wheat.

A tingling sanshool derivative excites primary sensory neurons and elicits nocifensive behavior in rats.

Contact and fumigant toxicity of cinnamaldehyde and cinnamic acid and related compounds to *Dermatophagoides farinae* and *Dermatophagoides pteronyssinus* (Acari: Pyroglyphidae).

Occupational hand dermatitis among cement workers in Taiwan.

The management of iron deficiency in menometrorrhagia.

Controlling viral immuno-inflammatory lesions by modulating aryl hydrocarbon receptor signaling.

Environmental- and injury-related epidemic-assistance investigations, 1946-2005.

Regulation of apoptosis in human melanoma and neuroblastoma cells by statins, sodium arsenite and TRAIL: a role of combined treatment versus monotherapy.

Retinoic acid drives aryl hydrocarbon receptor expression and is instrumental to dioxin-induced toxicity during palate development.

Air pollution in autoimmune rheumatic diseases: a review.

Effect of iron on enamel demineralization and remineralization in vitro.

Discovery of potent, selective, and orally bioavailable alkynylphenoxyacetic acid CRTH2 (DP2) receptor antagonists for the treatment of allergic inflammatory diseases.

Heated indoor swimming pools, infants, and the pathogenesis of adolescent idiopathic scoliosis: a neurogenic hypothesis.

Animal models of Parkinson's disease: a source of novel treatments and clues to the cause of the disease.

Exposure to 3-methyl-4-nitrophenol affects testicular morphology and induces spermatogenic cell apoptosis in immature male rats.

Biophoton emissions from cell cultures: biochemical evidence for the plasma membrane as the primary source.

Antiproliferative and anti-invasive effects of inorganic and organic arsenic compounds on human and murine melanoma cells in vitro.

Topical absorption and systemic toxicity.

The embryology of the diaphragm.

Surprises perilous: toxic health hazards for employees unloading fumigated shipping containers.

Could *Malassezia* yeasts be implicated in skin carcinogenesis through the production of aryl-hydrocarbon receptor ligands?

Activation and up-regulation of translation initiation factor 4B contribute to arsenic-induced transformation.

Activation of aryl hydrocarbon receptor induces vascular inflammation and promotes atherosclerosis in apolipoprotein E^{-/-} mice.

Exposure to iodomethane and dichloromethane associated with a confusional state.

Long-term effects on humoral immunity among workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Insulin allergy.

2, 4-dinitrophenol poisoning caused by non-oral exposure.

Plasma levels of polychlorinated biphenyls and risk of cutaneous malignant melanoma: a preliminary study.

Activation of c-Src/HER1/STAT5b and HER1/ERK1/2 signaling pathways and cell migration by hexachlorobenzene in MDA-MB-231 human breast cancer cell line.

Aryl hydrocarbon receptor activation during pregnancy, and in adult nulliparous mice, delays the subsequent development of DMBA-induced mammary tumors.

Arsenite-induced apoptosis is prevented by selenite in A375 cell line.

Abnormal expression of MAPK, EGFR, CK17 and TGK in the skin lesions of chloracne patients exposed to dioxins.

Arsenic: toxicity, oxidative stress and human disease.

Metabolic profile and assessment of occupational arsenic exposure in copper- and steel-smelting workers in China.

Acute tubular necrosis due to cutaneous contact with cresol.

Oxidative stress and hepatic stellate cell activation are key events in arsenic induced liver fibrosis in mice.

Beneficial network effects of methylene blue in an amnesic model.

Suppression of the proinflammatory response of metastatic melanoma cells increases TRAIL-induced apoptosis.

Applicability of an exaggerated forearm wash test for efficacy testing of two corticosteroids, tacrolimus and glycerol, in topical formulations against skin irritation induced by two different irritants.

Carcinogenic effects of "whole-life" exposure to inorganic arsenic in CD1 mice.

Arsenic biotransformation by arsenic-resistant fungi *Trichoderma asperellum* SM-12F1, *Penicillium janthinellum* SM-12F4, and *Fusarium oxysporum* CZ-8F1.

An Exo2 derivative affects ER and Golgi morphology and vacuolar sorting in a tissue-specific manner in arabidopsis.

Attenuating effect of lycopene and ellagic acid on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced spermotoxicity and testicular apoptosis.

Photoirradiation of dehydropyrrolizidine alkaloids--formation of reactive oxygen species and induction of lipid peroxidation.

Protective effects of methanol extracts from *Cladonia rangiformis* and *Umbilicaria vellea* against known mutagens sodium azide and 9-aminoacridine.

Urinary arsenic metabolites of subjects exposed to elevated arsenic present in coal in Shaanxi Province, China.

Metam sodium intoxication: the specific role of degradation products--methyl isothiocyanate and carbon disulphide--as a function of exposure.

Role of mitochondria in the maintenance of platelet function during in vitro storage.

Novel hormonal delivery method using the ink-jet technology: application to pulmonary insulin therapies.

Cigarette smoke increases susceptibility to tuberculosis--evidence from in vivo and in vitro models.

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters sebaceous gland cell differentiation in vitro.

Manganese uptake and distribution in the brain after methyl bromide-induced lesions in the olfactory epithelia.

Effects of a cellulose mask synthesized by a bacterium on facial skin characteristics and user satisfaction.

Mutagenicity induced by UVC in *Escherichia coli* cells: reactive oxygen species involvement.

NTP toxicity studies of toxicity studies of 2,4-decadienal (CAS No. 25152-84-5) administered by gavage to F344/N Rats and B6C3F1 mice.

Analytical method for assessing potential dermal exposure to pesticides of a non-agricultural occupationally exposed population.

Biosynthesis of the cyanogenic glucosides linamarin and lotaustralin in cassava: isolation, biochemical characterization, and expression pattern of CYP71E7, the oxime-metabolizing cytochrome P450 enzyme.

Prior exposure to organophosphorus and organochlorine pesticides increases the allergic potential of environmental chemical allergens in a local lymph node assay.

Nitric oxide in paraquat-mediated toxicity: A review.

Occupational allergy to cinnamal in a baker.

Hydroxytyrosol protects against oxidative damage by simultaneous activation of mitochondrial biogenesis and phase II detoxifying enzyme systems in retinal pigment epithelial cells.

Identification of PDL-1 as a novel biomarker of sensitizer exposure in dendritic-like cells.

Evaluation of diuron (3-[3,4-dichlorophenyl]-1,1-dimethyl urea) in a two-stage mouse skin carcinogenesis assay.

Combined exposure of peripubertal male rats to the endocrine-disrupting compound atrazine and power-frequency electromagnetic fields causes degranulation of cutaneous mast cells: a new toxic environmental hazard?

Morphological damages of a glyphosate-treated human keratinocyte cell line revealed by a micro- to nanoscale microscopic investigation.

Severe paraquat poisoning: clinical and radiological findings in a survivor.

Systemic contact dermatitis presenting as lichen planus of the lip.

Quantitative risk assessment of contact sensitization: clinical data to assess utility of the model.

Paraquat and Parkinson's disease.

Paraquat ingestion: a challenging diagnosis.

Simvastatin attenuates acrolein-induced mucin production in rats: involvement of the Ras/extracellular signal-regulated kinase pathway.

Acrolein increases 5-lipoxygenase expression in murine macrophages through activation of ERK pathway.

Atrazine affects kidney and adrenal hormones (AHs) related genes expressions of rare minnow (*Gobiocypris rarus*).

Spontaneous mutation frequency is elevated in skin of harlequin (hq)/Big Blue mice.

Oral administration of paraquat perturbs immunoglobulin productivity in mouse.

Urethral carcinoma and hyperplasia in male and female B6C3F1 mice treated with 3,3',4,4'-tetrachloroazobenzene (TCAB).

Impact of alpha-hydroxy-propanodeoxyguanine adducts on DNA duplex energetics: opposite base modulation and implications for mutagenicity and genotoxicity.

Suppression of ROS generation by 4,4-diaminodiphenylsulfone in non-phagocytic human diploid fibroblasts.

Studies on glyphosate-induced carcinogenicity in mouse skin: a proteomic approach.

Tacrolimus modulates dendritic cell activation in the sensitization phase of allergic contact dermatitis.

Cytotoxicity and regenerative proliferation as the mode of action for diuron-induced urothelial carcinogenesis in the rat.

Landscape-scale distribution and persistence of genetically modified oilseed rape (*Brassica napus*) in Manitoba, Canada.

Oxidatively generated DNA damage induced by 3-amino-5-mercapto-1,2,4-triazole, a metabolite of carcinogenic amitrole.

Behavioral evidence of thermal hyperalgesia and mechanical allodynia induced by intradermal cinnamaldehyde in rats.

Impact of smoking and chewing tobacco on arsenic-induced skin lesions.

Differential effects of substance P or hemokinin-1 on transient receptor potential channels, TRPV1, TRPA1 and TRPM8, in the rat.

Potential effects of the herbicide Diuron on mammary and urinary bladder two-stage carcinogenesis in a female Swiss mouse model.

Effects of strain differences and vehicles on results of local lymph node assays.

Substance MCS-18 isolated from *Helleborus purpurascens* is a potent antagonist of the capsaicin receptor, TRPV1, in rat cultured sensory neurons.

Urinary biomarker, dermal, and air measurement results for 2,4-D and chlorpyrifos farm applicators in the Agricultural Health Study.

Evidence for the pathophysiological relevance of TRPA1 receptors in the cardiovascular system in vivo.

Minor groove orientation of the KWKK peptide tethered via the N-terminal amine to the acrolein-derived 1,N2-gamma-hydroxypropanodeoxyguanosine lesion with a trimethylene linkage.

Topical application of TRPA1 agonists and brief cold exposure accelerate skin permeability barrier recovery.

Role of the DinB homologs Rv1537 and Rv3056 in *Mycobacterium tuberculosis*.

NMR structure of duplex DNA containing the alpha-OH-PdG.dA base pair: a mutagenic intermediate of acrolein.

Effects of estrogen on lung development in a rat model of diaphragmatic hernia.

Thyroid follicular lesions induced by oral treatment for 2 years with 2,3,7,8-tetrachlorodibenzo-p-dioxin and dioxin-like compounds in female Harlan Sprague-Dawley rats.

[Inspect aging psoriasis patients minutely! Psoriasis or skin cancer?].

Toxicology and carcinogenesis studies of 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (CAS No. 31508-00-6) in female harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 3,3',4,4'-tetrachloroazobenzene (TCAB) (CAS No. 14047-09-7) in Harlan Sprague-Dawley rats and B6C3F1 mice (gavage studies).

Embryonic Wnt gene expression in the nitrofen-induced hypoplastic lung using 3-dimensional imaging.

A case of black urine and dark skin - cresol poisoning.

Toxicogenomic analysis of exposure to TCDD, PCB126 and PCB153: identification of genomic biomarkers of exposure to AhR ligands.

Arsenic-induced cell proliferation is associated with enhanced ROS generation, Erk signaling and CyclinA expression.

Evolution and prognosis of necrotic primary teeth after pulpectomy.

Clinical, pathologic, and ultrastructural studies of progressive macular hypomelanosis.

Short course pre-operative ferrous sulphate supplementation--is it worthwhile in patients with colorectal cancer?

Food safety.

Heart tissue of harlequin (hq)/Big Blue mice has elevated reactive oxygen species without significant impact on the frequency and nature of point mutations in nuclear DNA.

Manipulating tumor acidification as a cancer treatment strategy.

Reduction of cutaneous photosensitivity by application of ointment containing ferrous or cobaltous ions concomitant with the use of topical protoporphyrin IX precursors.

Genome-wide expression analysis of human in vivo irritated epidermis: differential profiles induced by sodium lauryl sulfate and nonanoic acid.

Reactive oxygen species (ROS) reduce the expression of BRAK/CXCL14 in human head and neck squamous cell carcinoma cells.

alpha-Synuclein- and MPTP-generated rodent models of Parkinson's disease and the study of extracellular striatal dopamine dynamics: a microdialysis approach.

Chloracne: still cause for concern.

Polychlorinated dibenzofurans as a causal agent of fetal Yusho.

The repressive effect of NF-kappaB on p53 by mot-2 is involved in human keratinocyte transformation induced by low levels of arsenite.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces disruption of glands of the prostate and fibrosis in rhesus monkeys.

Hepatoprotective effects of apple polyphenols on CCl4-induced acute liver damage in mice.

Arsenic exposure in utero and nonepidermal proliferative response in adulthood in Tg.AC mice.

Complex gene-chemical interactions: hepatic uroporphyrin as a paradigm.

[Tungiasis in native Amerindians in VaupÃ©s province: epidemiology, clinical aspects, treatment, and prevention].

Adverse effects of drugs on the esophagus.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on scratching behavior in mice.

Ground-glass-like hepatocellular inclusions in the course of adult-onset Still's disease.

Increase in in utero exposure to a migrant, 4,4'-butylidenebis(6-t-butyl-m-cresol), from nitrile-butadiene rubber gloves on brain aromatase activity in male rats.

The absence of interleukin-6 enhanced arsenite-induced renal injury by promoting autophagy of tubular epithelial cells with aberrant extracellular signal-regulated kinase activation.

The malondialdehyde-derived fluorophore DHP-lysine is a potent sensitizer of UVA-induced photooxidative stress in human skin cells.

Recombinant self-assembling peptides as biomaterials for tissue engineering.

Numerical variations and spontaneous malformations in the early embryos of the Korean salamander, *Hynobius leechii*, in the farmlands of Korea.

Metabolic stress-induced programmed cell death in *Xanthomonas*.

Influence of the photostabilizer in the photoprotective effects of a formulation containing UV-filters and vitamin A.

Expression of pax6 and sox2 in adult olfactory epithelium.

Development of an acellular bioengineered matrix with a dominant vascular pedicle.

Matrix metalloproteinase-9 and -2 expression in the olfactory bulb following methyl bromide gas exposure.

Risk Assessment Methods for the Ringspot Pathogen *Mycosphaerella brassicicola* in Vegetable Brassica Crops.

Predicting PCDD/F and dioxin-like PCB contamination levels in bovine edible tissues from in vivo sampling.

A case of toxic epidermal necrolysis (ten) with severe chronic ocular complications in a healthy 46-year-old woman.

Dissecting the role of Fgf signaling during gastrulation and left-right axis formation in mouse embryos using chemical inhibitors.

Stabilization of flux during dead-end ultra-low pressure ultrafiltration.

Dermal uptake of arsenic through human skin depends strongly on its speciation.

Synergistic effect of ultrasound and thiazone-PEG 400 on human skin optical clearing in vivo.

Characterization of a novel 2,4,6-trichlorophenol-inducible gene encoding chlorophenol O-methyltransferase from *Trichoderma longibrachiatum* responsible for the formation of chloroanisoles and detoxification of chlorophenols.

Acetic acid bacterial lipids improve cognitive function in dementia model rats.

Induction of GST-P-positive proliferative lesions facilitating lipid peroxidation with possible involvement of transferrin receptor up-regulation and ceruloplasmin down-regulation from the early stage of liver tumor promotion in rats.

Xenobiotic-metabolizing cytochromes p450 in human white adipose tissue: expression and induction.

Imaging dermal blood flow through the intact rat skin with an optical clearing method.

Programmed cell death in plants: protective effect of phenolic compounds against chitosan and H₂O₂.

Heparan sulfation-dependent fibroblast growth factor signaling maintains embryonic stem cells primed for differentiation in a heterogeneous state.

Biocompatibility and growth of human keratinocytes and fibroblasts on biosynthesized cellulose-chitosan film.

Surfactant effects on skin absorption of model organic chemicals: implications for dermal risk assessment studies.

Blue-light irradiation regulates proliferation and differentiation in human skin cells.

Simultaneous quantification of 1,N²-propano-2'-deoxyguanosine adducts derived from acrolein and crotonaldehyde in human placenta and leukocytes by isotope dilution nanoflow LC nanospray ionization tandem mass spectrometry.

Arsenate and dimethylarsinic acid in drinking water did not affect DNA damage repair in urinary bladder transitional cells or micronuclei in bone marrow.

Safe transport of cyanamide.

Intraoral contact mucositis induced by cinnamon-flavored chewing gum--a case report.

Postmortem analyses unveil the poor efficacy of decontamination, anti-inflammatory and immunosuppressive therapies in paraquat human intoxications.

Comparative DNA microarray analysis of human monocyte derived dendritic cells and MUTZ-3 cells exposed to the moderate skin sensitizer cinnamaldehyde.

[Acute glyphosate-surfactant poisoning with neurological sequels and fatal outcome].

Subchronic feeding study of grain from herbicide-tolerant maize DP-9814-6 in Sprague-Dawley rats.

[Pathologic changes and expression of Heme oxygenase-1 in paraquat-induced renal injury].

Proteomic profiling of rat lung epithelial cells induced by acrolein.

Evidence for toxicity differences between inorganic arsenite and thioarsenicals in human bladder cancer cells.

Allergic reaction induced by dermal and/or respiratory exposure to low-dose phenoxyacetic acid, organophosphorus, and carbamate pesticides.

Oryzalin bodies: in addition to its anti-microtubule properties, the dinitroaniline herbicide oryzalin causes nodulation of the endoplasmic reticulum.

Fatal diquat intoxication.

Marked recovery from paraquat-induced lung injury during long-term follow-up.

Effects of an epidermal growth factor receptor inhibitor on arsenic associated toxicity in the rat bladder epithelium.

Dimethylarsinic acid in drinking water changed the morphology of urinary bladder but not the expression of DNA repair genes of bladder transitional epithelium in F344 rats.

[Dimethylarsinous acid-promoted skin tumorigenesis through the induction of oxidative stress in mice].

Chemistry and biology of DNA containing 1,N(2)-deoxyguanosine adducts of the alpha,beta-unsaturated aldehydes acrolein, crotonaldehyde, and 4-hydroxynonenal.

Chronic exposure to high levels of atrazine alters expression of genes that regulate immune and growth-related functions in developing *Xenopus laevis* tadpoles.

OECD validation of phase 3 Hershberger assay in Korea using surgically castrated male rats with coded chemicals.

Acrolein activates matrix metalloproteinases by increasing reactive oxygen species in macrophages.

The antioxidant glutathione in the fish cell lines EPC and BCF-2: response to model pro-oxidants as measured by three different fluorescent dyes.

Solution structure of DNA containing alpha-OH-PdG: the mutagenic adduct produced by acrolein.

Age-related differences in oxidative protein-damage in young and senescent fibroblasts.

Potential method to determine irritant potency in vitro - Comparison of two reconstructed epidermal culture models with different barrier competency.

Acute exposure of the aquatic macrophyte *Callitriche obtusangula* to the herbicide oxadiazon: the protective role of N-acetylcysteine.

Heterocyclic aromatic amine pesticide use and human cancer risk: results from the U.S. Agricultural Health Study.

Effects of molinate on survival and development of *Bombina orientalis* (Boulenger) embryos.

Gene profiles of a human alveolar epithelial cell line after in vitro exposure to respiratory (non-)sensitizing chemicals: identification of discriminating genetic markers and pathway analysis.

Herbicide-treated hay as a possible cause of dermatitis in horses.

Leaf anatomy and morphometry in three eucalypt clones treated with glyphosate.

Arsenite and its mono- and dimethylated trivalent metabolites enhance the formation of benzo[a]pyrene diol epoxide-DNA adducts in *Xeroderma pigmentosum* complementation group A cells.

Toxicity of formulated glyphosate (glyphos) and cosmo-flux to larval Colombian frogs 1. Laboratory acute toxicity.

Disulfiram-like syndrome after hydrogen cyanamide professional skin exposure: two case reports in France.

The effect of gonadectomy and estradiol on sensitivity to oxidative stress.

The adverse effects of hydrogen cyanamide on human health: an evaluation of inquiries to the New Zealand National Poisons Centre.

Matrix metalloproteinase-14 mediates a phenotypic shift in the airways to increase mucin production.

Influence of cyclophosphamide and its metabolic products on the activity of peritoneal macrophages in mice.

Evaluation of diquat against an acute experimental infection of *Flavobacterium columnare* in channel catfish, *Ictalurus punctatus* (Rafinesque).

TRPV1-mediated itch in seasonal allergic rhinitis.

Effect of sildenafil on acrolein-induced airway inflammation and mucus production in rats.

The cinnamon-derived Michael acceptor cinnamic aldehyde impairs melanoma cell proliferation, invasiveness, and tumor growth.

Pharmacokinetics of trifluralin in blood and heart tissue of mice.

Determination of the effective dermal penetration barrier pH of porcine skin.

Reduced O₂ and elevated ROS in sea urchin embryos leads to defects in ectoderm differentiation.

Polynucleotide phosphorylase protects *Escherichia coli* against oxidative stress.

Generation and characterization of cells that can be conditionally depleted of mitochondrial SOD2.

Poisoning deaths in China: type and prevalence detected at the Tongji Forensic Medical Center in Hubei.

Reproductive lesions in female Harlan Sprague-Dawley rats following two-year oral treatment with dioxin and dioxin-like compounds.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces a reduction in epididymal and ejaculated sperm number in rhesus monkeys.

Arsenic exacerbates atherosclerotic lesion formation and inflammation in ApoE^{-/-} mice.

Inflammatory and chloracne-like skin lesions in B6C3F1 mice exposed to 3,3',4,4'-tetrachloroazobenzene for 2 years.

Amended safety assessment of sodium picramate and picramic acid.

Initial report of a family registry of multiple myeloma.

Comparative hepatotoxicity and clastogenicity of sodium arsenite and three petroleum products in experimental Swiss Albino Mice: the modulatory effects of Aloe vera gel.

Dioxin receptor deficiency impairs angiogenesis by a mechanism involving VEGF-A depletion in the endothelium and transforming growth factor-beta overexpression in the stroma.

Toward the development of a plant-based vaccine against reovirus.

Impact of life stage and duration of exposure on arsenic-induced proliferative lesions and neoplasia in C3H mice.

Autologous melanoma vaccine induces antitumor and self-reactive immune responses that affect patient survival and depend on MHC class II expression on vaccine cells.

Synthesis and preclinical evaluation of [(11)C]PAQ as a PET imaging tracer for VEGFR-2.

Protein-bound toxins--update 2009.

Immunogenicity of a standard trivalent influenza vaccine in patients on long-term hemodialysis: an open-label trial.

Repression of aryl hydrocarbon receptor transcriptional activity by epidermal growth factor.

Parental exposure to pesticides and childhood brain cancer: U.S. Atlantic coast childhood brain cancer study.

Transplacental and early life exposure to inorganic arsenic affected development and behavior in offspring rats.

Arsenic activates EGFR pathway signaling in the lung.

Influence of aryl hydrocarbon- (Ah) receptor and genotoxins on DNA repair gene expression and cell survival of mouse hepatoma cells.

Neonatal exposure to low-dose 2,3,7,8-tetrachlorodibenzo-p-dioxin causes autoimmunity due to the disruption of T cell tolerance.

[Evaluation of dermatological symptom of Yusho patients in the annual examination in 2005-2007].

Attenuation of 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity by resveratrol: a comparative study with different routes of administration.

Mitochondrial changes within axons in multiple sclerosis.

The use of Fluoro-Jade in primary neuronal cell cultures.

Carcinogenesis studies of cresols in rats and mice.

Evaluation of irritancy and sensitization potential of metalworking fluid mixtures and components.

Pulmonary lesion induced by low and high positive end-expiratory pressure levels during protective ventilation in experimental acute lung injury.

Tumor promoting and co-carcinogenic effects in medium-term rat hepatocarcinogenesis are not modified by co-administration of 12 pesticides in mixture at acceptable daily intake.

Activation of the aryl hydrocarbon receptor by TCDD inhibits senescence: a tumor promoting event?

Positron emission tomography (PET) imaging with [11C]-labeled erlotinib: a micro-PET study on mice with lung tumor xenografts.

Dermatitis herpetiformis flare associated with use of triiodomethane packing strips for alveolar osteitis.

Cytotoxicity and phytotoxicity of trichothecene macrolides from *Myrothecium gramminum*.

Toxicology laboratory analysis and human exposure to p-chloroaniline.

Ferric carboxymaltose: a review of its use in iron-deficiency anaemia.

Oral carcinogenicity and toxicity of 2-amino-4-chlorophenol in rats.

Iron medication-induced gastric mucosal injury.

Thyroid lesions in the great cormorant (*Phalacrocorax carbo*) of Niigata, central Japan: a possible association with dioxin accumulation.

Arsenic induced apoptosis in malignant melanoma cells is enhanced by menadione through ROS generation, p38 signaling and p53 activation.

The mammalian aryl hydrocarbon (Ah) receptor: from mediator of dioxin toxicity toward physiological functions in skin and liver.

A novel approach using DNA-repair-deficient chicken DT40 cell lines for screening and characterizing the genotoxicity of environmental contaminants.

Hemangiomas, angiosarcomas, and vascular malformations represent the signaling abnormalities of pathogenic angiogenesis.

Histological lesions in mink jaws are a highly sensitive biomarker of effect after exposure to TCDD-like chemicals: field and literature-based confirmations.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) poisoning in Victor Yushchenko: identification and measurement of TCDD metabolites.

A critical review: 2,3,7,8-tetrachlorodibenzo-p-dioxin (2,3,7,8-TCDD) effects on gonad development in bivalve mollusks.

Caveolin-1 plays important role in EGF-induced migration and proliferation of mouse embryonic stem cells: involvement of PI3K/Akt and ERK.

Activation of MAPKs influences the expression of drug-metabolizing enzymes in primary human hepatocytes.

Endocrine disruptive effect of 3-methyl-4-nitrophenol isolated from diesel exhaust particles in Hershberger assay using castrated immature rats.

Inhibitory effects of guarana seed extract on passive cutaneous anaphylaxis and mast cell degranulation.

Cytotoxicity of spermine oxidation products to multidrug resistant melanoma M14 ADR2 cells: sensitization by the MDL 72527 lysosomotropic compound.

Chronic low-level arsenic exposure causes gender-specific alterations in locomotor activity, dopaminergic systems, and thioredoxin expression in mice.

Performance of different work clothing types for reducing skin exposure to pesticides during open field treatment.

Lipopolysaccharide-induced apoptosis in transformed bovine brain endothelial cells and human dermal microvessel endothelial cells: the role of JNK.

Biological safety of LipoFullerene composed of squalane and fullerene-C60 upon mutagenesis, photocytotoxicity, and permeability into the human skin tissue.

Iodomethane human health risk characterization.

Evaluation of possible modes of action for acute effects of methyl iodide in laboratory animals.

Evaluation of respiratory parameters in rats and rabbits exposed to methyl iodide.

Dioxin-induced up-regulation of the active form of vitamin D is the main cause for its inhibitory action on osteoblast activities, leading to developmental bone toxicity.

Mechanisms of stress resistance in Snell dwarf mouse fibroblasts: enhanced antioxidant and DNA base excision repair capacity, but no differences in mitochondrial metabolism.

Dioxin and dioxin-like PCB profiles in the serum of industrial and municipal waste incinerator workers in Korea.

Permeability and toxicological profile estimation of organochlorine compounds by biopartitioning micellar chromatography.

In vivo and in vitro evaluation of an *Acetobacter xylinum* synthesized microbial cellulose membrane intended for guided tissue repair.

Gene profiles of a human bronchial epithelial cell line after in vitro exposure to respiratory (non-)sensitizing chemicals: identification of discriminating genetic markers and pathway analysis.

Microbial cellulose wound dressing in the treatment of nonhealing lower extremity ulcers.

The usual suspects-influence of physicochemical properties on lag time, skin deposition, and percutaneous penetration of nine model compounds.

A gene-shuffled glyphosate acetyltransferase protein from *Bacillus licheniformis* (GAT4601) shows no evidence of allergenicity or toxicity.

Formation of dimethylthioarsenicals in red blood cells.

Nucleotide excision repair and the degradation of RNA pol II by the *Caenorhabditis elegans* XPA and Rsp5 orthologues, RAD-3 and WWP-1.

Arsenic speciation analysis in human saliva.

G-protein-coupled receptor 30 and estrogen receptor-alpha are involved in the proliferative effects induced by atrazine in ovarian cancer cells.

Rhabdomyolysis from an intramuscular injection of glyphosate-surfactant herbicide.

Contact dermatitis in dairy cattle caused by calcium cyanamide.

Increased oxidative stress and antioxidant expression in mouse keratinocytes following exposure to paraquat.

[Clinical study on treatment of acute paraquat poisoning].

Interlaboratory validation of 1% pluronic I92 surfactant as a suitable, aqueous vehicle for testing pesticide formulations using the murine local lymph node assay.

Pesticide-associated pemphigus vulgaris.

Erythema multiforme-like eruption due to an irritant contact dermatitis from a glyphosate pesticide.

Variations in relative stomatal and biochemical limitations to photosynthesis in a young blackbutt (*Eucalyptus pilularis*) plantation subjected to different weed control regimes.

Review of developmental toxicity of nitrophenolic herbicide dinoseb, 2-sec-butyl-4,6-dinitrophenol.

Application of physiological computational fluid dynamics models to predict interspecies nasal dosimetry of inhaled acrolein.

Respiratory tract responses in male rats following subchronic acrolein inhalation.

Prevalence of patch test results from 1970 to 2002 in a multi-centre population in North America (NACDG).

Protein carbonyls damage the water-holding capacity of the stratum corneum.

Allergic contact dermatitis with a fertilizer containing hydrogen cyanamide (Dormex).

Pesticide-related dermatitis in Saku district, Japan, 1975-2000.

Catalytic metalloporphyrin protects against paraquat neurotoxicity in vivo.

Mutations of the withered (*whd*) gene in *Drosophila melanogaster* confer hypersensitivity to oxidative stress and are lesions of the carnitine palmitoyltransferase I (CPT I) gene.

Acrolein-activated matrix metalloproteinase 9 contributes to persistent mucin production.

Effects of TRPA1 agonists mustard oil and cinnamaldehyde on lumbar spinal wide-dynamic range neuronal responses to innocuous and noxious cutaneous stimuli in rats.

Spatial distribution of cytosolic NADP(+)-isocitrate dehydrogenase in pine embryos and seedlings.

Tissue distribution and urinary excretion of inorganic arsenic and its methylated metabolites in C57BL6 mice following subchronic exposure to arsenate in drinking water.

Cinnamoyl-based Nrf2-activators targeting human skin cell photo-oxidative stress.

Skin decontamination of glyphosate from human skin in vitro.

Chronic ethanol ingestion alters xenobiotic absorption through the skin: potential role of oxidative stress.

Change in optical properties of stratum corneum induced by protein carbonylation in vitro.

Development of a modified in vitro skin absorption method to study the epidermal/dermal disposition of a contact allergen in human skin.

An unusual and serious complication of topical wart treatment with monochloroacetic acid.

The effects of in utero exposure to a migrant, 4,4'-butylidenebis(6-t-butyl-m-cresol), from nitrile-butadiene rubber gloves on monoamine neurotransmitter in rats.

Dihydrolipoic acid inhibits tetrachlorohydroquinone-induced tumor promotion through prevention of oxidative damage.

Postoperative pain following the use of two different intracanal medications.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) affects bone tissue in rhesus monkeys.

Fluorescence confocal laser scanning microscopy for in vivo imaging of epidermal reactions to two experimental irritants.

Clinical outcome of the endodontic treatment of teeth with apical periodontitis using an antimicrobial protocol.

Transposition of the great arteries.

Effect of hand dermatitis on the total body burden of chromium after ferrous sulfate application in cement among cement workers.

Liver is a target of arsenic carcinogenesis.

Mitotic arrest-associated apoptosis induced by sodium arsenite in A375 melanoma cells is BUBR1-dependent.

KML001 cytotoxic activity is associated with its binding to telomeric sequences and telomere erosion in prostate cancer cells.

Transgenerational effects from exposure to environmental toxic substances.

Animal model of posterior cingulate cortex hypometabolism implicated in amnesic MCI and AD.

Can folate intake reduce arsenic toxicity?

Multiple cutaneous precanceroses and carcinomas from combined iatrogenic/professional exposure to arsenic.

Sensitivity to sodium arsenite in human melanoma cells depends upon susceptibility to arsenite-induced mitotic arrest.

A study of the process of apoptosis in animals infected with the contagious ecthyma virus.

The preparation and characterization of anti-VEGFR2 conjugated, paclitaxel-loaded PLLA or PLGA microspheres for the systemic targeting of human prostate tumors.

Neuropharmacological profile of novel and selective 5-HT₆ receptor agonists: WAY-181187 and WAY-208466.

Capillary electrophoretic studies on the photogenotoxic potential of pharmaceutical substances.

Expression of AhR, CYP1A1, GSTA1, c-fos and TGF- α in skin lesions from dioxin-exposed humans with chloracne.

Microvascular free-tissue transfer for head and neck reconstruction in Jehovah's Witness patients.

A Weibull-PBPK model for assessing risk of arsenic-induced skin lesions in children.

Dose response evaluation of gene expression profiles in the skin of K6/ODC mice exposed to sodium arsenite.

Relative potency based on hepatic enzyme induction predicts immunosuppressive effects of a mixture of PCDDS/PCDFS and PCBS.

Resveratrol sensitizes melanomas to TRAIL through modulation of antiapoptotic gene expression.

[An overview on biomarkers of arsenic-induced health hazards].

Neurological manifestation of methyl bromide intoxication.

TCDD exposure exacerbates atopic dermatitis-related inflammation in NC/Nga mice.

Environmental risk assessment of genetically engineered herbicide-tolerant *Zoysia japonica*.

[Outdoor work-related health hazards].

Anaphylaxis to oral iron salts. desensitization protocol for tolerance induction.

Oxidative damage induced genotoxic effects in human fibroblasts from Xeroderma Pigmentosum group A patients.

Tissue levels of arsenicals and skin tumor response following administration of monomethylarsonous acid and arsenite to K6/ODC mice.

The connection between C-reactive protein and atherosclerosis.

Pesticides and atopic and nonatopic asthma among farm women in the Agricultural Health Study.

Date palm pollen allergoid: characterization of its chemical-physical and immunological properties.

Chondroitin sulfate and heparan sulfate-containing proteoglycans are both partners and targets of basic fibroblast growth factor-mediated proliferation in human metastatic melanoma cell lines.

Maintaining epitheliopoietic potency when culturing olfactory progenitors.

Combining ligand-based pharmacophore modeling, quantitative structure-activity relationship analysis and in silico screening for the discovery of new potent hormone sensitive lipase inhibitors.

Reactive oxygen species in programmed death of pea guard cells.

A potential role of connexin 43 in epidermal growth factor-induced proliferation of mouse embryonic stem cells: involvement of Ca²⁺/PKC, p44/42 and p38 MAPKs pathways.

Auxin-Induced Resistance to Common Scab Disease of Potato Linked to Inhibition of Thaxtomin A Toxicity.

Successful desensitization with human insulin in a patient with an insulin allergy and hypersensitivity to protamine: a case report.

Monoxygenase activity of *Octopus vulgaris* hemocyanin.

Development of human dermal epithelial cell-based bioassay for the dioxins.

Toxic tetrapyrrole accumulation in protoporphyrinogen IX oxidase-overexpressing transgenic rice plants.

NF- κ B and caspases are involved in the hyaluronan and chondroitin-4-sulphate-exerted antioxidant effect in fibroblast cultures exposed to oxidative stress.

Vascular leakage induced by exposure to arsenic via increased production of NO, hydroxyl radical and peroxynitrite.

Expression of multiple chondroitin/dermatan sulfotransferases in the neurogenic regions of the embryonic and adult central nervous system implies that complex chondroitin sulfates have a role in neural stem cell maintenance.

Glycerol metabolism and bitterness producing lactic acid bacteria in cidermaking.

Metabolism and disposition of [¹⁴C]5-amino-o-cresol in female F344 rats and B6C3F1 mice.

In vitro and in vivo reduction of sodium arsenite induced toxicity by aqueous garlic extract.

Enhancing effect of chlorinated organic solvents on histamine release and inflammatory mediator production.

Estimation of atrazine in the stratum corneum and its toxic effects in skin following topical application to rabbits.

Anti-allergic properties of a new all-D synthetic immunoglobulin-binding peptide.

2,3,7,8-Tetrachlorodibenzo-p-dioxin increases Bovine Herpesvirus type-1 (BHV-1) replication in Madin-Darby Bovine Kidney (MDBK) cells in vitro.

Murine bone marrow-derived dendritic cells as a potential in vitro model for predictive identification of chemical sensitizers.

Environmental toxins and health--the health impact of pesticides.

Hepatotoxicity related to paraquat and diquat absorption through intact skin.

Retinoic acid-mediated differentiation protects against nitrofen-induced apoptosis.

Cutaneous reactions simulating erythema multiforme and Stevens Johnson syndrome due to occupational exposure to a plant-growth regulator.

Microbial toxicity of pesticide derivatives produced with UV-photodegradation.

Trifluralin toxicity in a Chagas disease mouse model.

Toxicity of dimethylmonothioarsinic acid toward human epidermoid carcinoma A431 cells.

Further evidence against a direct genotoxic mode of action for arsenic-induced cancer.

Pesticide poisoning.

Induction of tibial dyschondroplasia by carbamate and thiocarbamate pesticides.

No direct hepatotoxic potential following a multiple-low dose paraquat exposure in rat as related to its bioaccumulation.

Butachlor-induced acute toxic hepatitis.

Plasma cell gingivitis among herbal toothpaste users: a report of three cases.

Tongue erosions and diet cola.

Full survival of paraquat-exposed rats after treatment with sodium salicylate.

The effect of amifostine, a cytoprotective agent, on paraquat toxicity in mice.

Surflan and oryzalin impair reproduction in the teleost medaka (*Oryzias latipes*).

A fatal case of paraquat poisoning following minimal dermal exposure.

Cells deficient in the FANC/BRCA pathway are hypersensitive to plasma levels of formaldehyde.

Chromosome doubling in a *Rosa rugosa* Thunb. hybrid by exposure of in vitro nodes to oryzalin: the effects of node length, oryzalin concentration and exposure time.

Parthenium: a wide angle view.

Skin contact transfer of three fragrance residues from candles to human hands.

Arsenic metabolism, genetic susceptibility, and risk of premalignant skin lesions in Bangladesh.

Acrolein induces cyclooxygenase-2 and prostaglandin production in human umbilical vein endothelial cells: roles of p38 MAP kinase.

The skin sensitization potential of resorcinol: experience with the local lymph node assay.

Arsenic methylation, GSTT1, GSTM1, GSTP1 polymorphisms, and skin lesions.

Lack of mutagenicity of acrolein-induced DNA adducts in mouse and human cells.

Defense against dermal exposures is only skin deep: significantly increased penetration through slightly damaged skin.

Developmental plasticity of glandular trichomes into somatic embryogenesis in *Tilia amurensis*.

Cyanide-induced death of cells in plant leaves.

In vitro studies on the integrated control of rapeseed white stem rot disease through the application of herbicides and *Trichoderma* species.

Effect of the expression of cyanamide hydratase on metabolites in cyanamide-treated soybean plants kept in the light or dark.

Moisturizing lotions can increase transdermal absorption of the herbicide 2,4-dichlorophenoxyacetic acid across hairless mouse skin.

Binding of dimethylarsinous acid to cys-13 α of rat hemoglobin is responsible for the retention of arsenic in rat blood.

Pulmonary lesions in female Harlan Sprague-Dawley rats following two-year oral treatment with dioxin-like compounds.

Effects of 4-chloro-2,6-bis-(2-hydroxyl-benzyl)-phenol on healing of skin wounds and growth of bacteria.

Folate deficiency enhances arsenic effects on expression of genes involved in epidermal differentiation in transgenic K6/ODC mouse skin.

Mode of antibacterial action of a signal peptide, Pep27 from *Streptococcus pneumoniae*.

Porphyria cutanea tarda as rare cutaneous manifestation of hepatic metastases treated with interferon.

Chronic disease and early exposure to air-borne mixtures. 2. Exposure assessment.

Arsenic neurotoxicity--a review.

Effect of antenatal tetrandrine administration on endothelin-1 and epidermal growth factor levels in the lungs of rats with experimental diaphragmatic hernia.

2,3,7,8-TCDD exposure, endothelial dysfunction and impaired microvascular reactivity.

Isolation and characterization of arsenite-resistant human epidermoid carcinoma KB cells.

Enhancement of allergic responses in vivo and in vitro by butylated hydroxytoluene.

p53 response to arsenic exposure in epithelial cells: protein kinase B/Akt involvement.

Goserelin acetate 10.8 mg plus iron versus iron monotherapy prior to surgery in premenopausal women with iron-deficiency anemia due to uterine leiomyomas: results from a Phase III, randomized, multicenter, double-blind, controlled trial.

Delayed-type hypersensitivity reaction to the meta-cresol component of insulin.

Combination of 17 β -estradiol with the environmental pollutant TCDD is involved in pathogenesis of endometriosis via up-regulating the chemokine I-309-CCR8.

Imatinib mesylate inhibits cell invasion of malignant peripheral nerve sheath tumor induced by platelet-derived growth factor-BB.

Workshop overview: arsenic research and risk assessment.

Transplacental arsenic carcinogenesis in mice.

Efficacy of 2,6-dichlorophenol lure to control *Dermacentor nitens*.

[Phyt'attitude: network for toxicovigilance in agriculture].

[Chloracne after exposure to dioxin].

Sequential treatment by ionizing radiation and sodium arsenite dramatically accelerates TRAIL-mediated apoptosis of human melanoma cells.

Chemical contaminants, health indicators, and reproductive biomarker responses in fish from the Colorado River and its tributaries.

Association of allergic rhinitis with pesticide use among grape farmers in Crete, Greece.

[Relationship between blood dioxin levels and present/past clinical symptoms in Kanemi Yusho patients].

Genetic modification of chondrocytes with insulin-like growth factor-1 enhances cartilage healing in an equine model.

Pro-angiogenesis action of arsenic and its reversal by selenium-derived compounds.

In utero arsenic exposure induces early onset of atherosclerosis in ApoE^{-/-} mice.

Long-term effects of subcutaneously injected 2,3,7,8-tetrachlorodibenzo-p-dioxin on the liver of rhesus monkeys.

Rickettsial and other tick-borne infections.

Occupational exposure to methyl iodide.

Severe skin reaction due to excipients of an oral iron treatment.

Effects of 3-methyl-4-nitrophenol in diesel exhaust particles on the regulation of testicular function in immature male rats.

[Arsenical poisoning: how and why to diagnose it].

Dose- and time-dependent effects of 2,3,7,8-tetrabromodibenzo-p-dioxin on rat liver.

Intravenous ferric gluconate significantly improves response to epoetin alfa versus oral iron or no iron in anemic patients with cancer receiving chemotherapy.

Effect of alpha-asarone and a derivative on lipids, bile flow and Na⁺/K⁺-ATPase in ethinyl estradiol-induced cholestasis in the rat.

Fetal onset of aberrant gene expression relevant to pulmonary carcinogenesis in lung adenocarcinoma development induced by in utero arsenic exposure.

Involvement of cannabinoid CB2 receptors in the IgE-mediated triphasic cutaneous reaction in mice.

Microarray analysis of gene expression in peripheral blood mononuclear cells from dioxin-exposed human subjects.

Vesicle disruption, plasma membrane bleb formation, and acute cell death caused by illumination with blue light in acridine orange-loaded malignant melanoma cells.

Periradicular repair after two-visit endodontic treatment using two different intracanal medications compared to single-visit endodontic treatment.

Residual antibacterial activity of chlorhexidine digluconate and camphorated p-monochlorophenol in calcium hydroxide-based root canal dressings.

Alcoholic myopathy and acetaldehyde.

Design and synthesis of some new thiazolo [3,2-b]-1,2,4-triazole-5(6H)-ones substituted with flurbiprofen as anti-inflammatory and analgesic agents.

Arsenic methylation, urinary arsenic metabolites and human diseases: current perspective.

Involvement of substance P and neurogenic inflammation in arsenic-induced early vascular dysfunction.

Phytanic acid impairs mitochondrial respiration through protonophoric action.

An adaptable internal dose model for risk assessment of dietary and soil dioxin exposures in young children.

Tissue iron distribution and urinary mineral excretion vary depending on the form of iron (FeSO₄ or NaFeEDTA) and the route of administration (oral or subcutaneous) in rats given high doses of iron.

Identification of phenolic dermal sensitizers in a wound closure tape.

Investigation of conditions involved in the susceptibility of the dermatophyte *Trichophyton rubrum* to photodynamic treatment.

Early maturation of gonadotropin-releasing hormone secretion and sexual precocity after exposure of infant female rats to estradiol or dichlorodiphenyltrichloroethane.

Model selection and evaluation for risk assessment of dioxin-contaminated sites.

Src family tyrosine kinases mediate contraction of rat isolated tail arteries in response to a hyposmotic stimulus.

Surface desorption atmospheric pressure chemical ionization mass spectrometry for direct ambient sample analysis without toxic chemical contamination.

SCL-GFP transgenic zebrafish: in vivo imaging of blood and endothelial development and identification of the initial site of definitive hematopoiesis.

[Study on the interaction between the skin detoxifying enzyme glutathione S-transferase and the substances listed in the CE/39/2000 rules with the "skin" annotation, finalized to the biological monitoring of exposed subjects].

Sodium arsenite affects Na⁺ transport in the isolated skin of the toad *Pleurodema thaul*.

Nonintegrin laminin receptor precursor protein is expressed on olfactory stem and progenitor cells.

Role of O6-methylguanine-DNA methyltransferase in protecting from alkylating agent-induced toxicity and mutations in mice.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) exposure of normal human dermal fibroblasts results in AhR-dependent and -independent changes in gene expression.

Tissue residues, metabolism, and excretion of radiolabeled sodium chlorate (Na[³⁶Cl]O₃) in rats.

The Slr2-type MAP kinase Bmp3 of *Botrytis cinerea* is required for normal saprotrophic growth, conidiation, plant surface sensing and host tissue colonization.

The development of an aquatic bivalve model: evaluating the toxic effects on gametogenesis following 2,3,7,8-tetrachlorodibenzo-p-dioxin (2,3,7,8-TCDD) exposure in the eastern oyster (*Crassostrea virginica*).

Reduction of *Phytophthora cactorum* in Strawberry Fields by *Trichoderma* spp. and Soil Solarization.

Histological observation of somatic embryogenesis from cultured embryos of *Quercus variabilis* Bl.

Skin-derived fibroblasts from long-lived species are resistant to some, but not all, lethal stresses and to the mitochondrial inhibitor rotenone.

In vitro and in vivo characterization of alkyl hydroperoxide reductase mutant strains of *Helicobacter hepaticus*.

Photo-irradiation of Aloe vera by UVA--formation of free radicals, singlet oxygen, superoxide, and induction of lipid peroxidation.

Determination of phenolic compounds in grape skin by capillary electrophoresis with simultaneous dual fluorescence and diode array absorption detection after dynamic superheated liquid leaching.

Biomarkers for oxidative stress: clinical application in pediatric medicine.

TCDD-induced alterations in gene expression profiles of the developing mouse paw do not influence morphological differentiation of this potential target tissue.

Lack of the aryl hydrocarbon receptor leads to impaired activation of AKT/protein kinase B and enhanced sensitivity to apoptosis induced via the intrinsic pathway.

Introduction of the anti-apoptotic baculovirus p35 gene in passion fruit induces herbicide tolerance, reduced bacterial lesions, but does not inhibit passion fruit woodiness disease progress induced by cowpea aphid-borne mosaic virus (CABMV).

Aconitase plays a role in regulating resistance to oxidative stress and cell death in *Arabidopsis* and *Nicotiana benthamiana*.

Adverse effects of herbicide MCPA on dogs in a 90 day toxicological study.

A model of hemorrhagic cystitis induced with acrolein in mice.

Lack of effects of atrazine on estrogen-responsive organs and circulating hormone concentrations in sexually immature female Japanese quail (*Coturnix coturnix japonica*).

Anterograde amnesia with hippocampal lesions following glufosinate intoxication.

Cross-reactions in patch testing with ketoprofen, fragrance mix and cinnamic derivatives.

Cancer and occupational exposure to pentachlorophenol and tetrachlorophenol (Canada).

Histological changes and micronucleus induction in the zebra mussel *Dreissena polymorpha* after paraquat exposure.

Effects of Diuron [3-(3,4-dichlorophenyl)-1,1-dimethylurea] on the urinary bladder of male Wistar rats.

NTP Technical Report on the comparative toxicity studies of allyl acetate (CAS No. 591-87-7), allyl alcohol (CAS No. 107-18-6) and acrolein (CAS No. 107-02-8) administered by gavage to F344/N rats and B6C3F1 mice.

Acute paraquat poisoning: report of a survival case following intake of a potential lethal dose.

Evaluation of an ex vivo murine local lymph node assay: multiple endpoint comparison.

Immunomodulatory effects of maternal atrazine exposure on male Balb/c mice.

Indomethacin induces small intestinal damage and inhibits amitrole-associated thyroid carcinogenesis in rats initiated with N-bis(2-hydroxypropyl)nitrosamine.

Dimethylarsinic acid: results of chronic toxicity/oncogenicity studies in F344 rats and in B6C3F1 mice.

Effects of pentachlorophenol on the reproduction of Japanese medaka (*Oryzias latipes*).

Broken hyphae of the basidiomycete *Crinipellis perniciosa* allow quantitative assay of toxicity.

Neuregulin 1-Beta cytoprotective role in AML 12 mouse hepatocytes exposed to pentachlorophenol.

Dermal exposure to the herbicide-paraquat results in genotoxic and cytotoxic damage to germ cells in the male rat.

[Fatal poisoning caused by the ingestion of a concentrated solution of 2,4-D and MCPP].

Advantage of using CBA/N strain mice in a non-radioisotopic modification of the local lymph node assay.

Nonpersistent pesticide exposure self-report versus biomonitoring in farm pesticide applicators.

Analgesia mediated by the TRPM8 cold receptor in chronic neuropathic pain.

Alcohol alters skeletal muscle heat shock protein gene expression in rats: these effects are moderated by sex, raised endogenous acetaldehyde, and starvation.

Simultaneous sensitivity to fragrances.

Delayed occurrence of H-ras12V-induced hepatocellular carcinoma with long-term treatment with cinnamaldehydes.

Death of stomal guard cells in leaf epidermis under disturbance of energy provision.

Interactions of skin thickness and physicochemical properties of test compounds in percutaneous penetration studies.

Enigma, a mitochondrial protein affecting lifespan and oxidative stress response in *Drosophila*.

Distribution of urinary selenium and arsenic among pregnant women exposed to arsenic in drinking water.

Serum dioxin-like compounds and aromatase (CYP19) expression in endometriotic tissues.

Sodium arsenite accelerates TRAIL-mediated apoptosis in melanoma cells through upregulation of TRAIL-R1/R2 surface levels and downregulation of cFLIP expression.

Developmental dental toxicity of dioxin and related compounds--a review.

Oral mucosal ulceration due to ferrous sulphate tablets: report of a case.

[Peripheral neuropathy induced by acute methyl bromide skin exposure: a case report].

Induction of cyclin D1 by submicromolar concentrations of arsenite in human epidermal keratinocytes.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (Cas No. 31508-00-6) in female Harlan Sprague-Dawley rats (gavage studies).

[Current progress in animal models of arsenic carcinogenesis].

[Effect and significance of tetrandrine on epidermal growth factor and its receptor in the lung of congenital diaphragmatic hernia rat model].

Folate and arsenic metabolism: a double-blind, placebo-controlled folic acid-supplementation trial in Bangladesh.

Effect of a calcium hydroxide-based root canal dressing on periapical repair in dogs: a histological study.

Correlated resistance to glucose deprivation and cytotoxic agents in fibroblast cell lines from long-lived pituitary dwarf mice.

Airway smooth muscle dysfunction precedes teratogenic congenital diaphragmatic hernia and may contribute to hypoplastic lung morphogenesis.

Carcinogenicity of "non-dioxinlike" polychlorinated biphenyls.

Risk assessments of polychlorinated dibenzo- p-dioxins, polychlorinated dibenzofurans, and dioxin-like polychlorinated biphenyls in food.

Interferon-gamma plays protective roles in sodium arsenite-induced renal injury by up-regulating intrarenal multidrug resistance-associated protein 1 expression.

Carcinogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in experimental models.

Antimutagenic activity of methanolic extract of *Ganoderma lucidum* and its effect on hepatic damage caused by benzo[a]pyrene.

Association of 24-hour activity levels with the clinical severity of chronic venous disease.

Anti-irritants II: Efficacy against cumulative irritation.

Anti-irritants I: Dose-response in acute irritation.

Dioxin-induced chloracne--reconstructing the cellular and molecular mechanisms of a classic environmental disease.

Low-energy helium-neon laser induces locomotion of the immature melanoblasts and promotes melanogenesis of the more differentiated melanoblasts: recapitulation of vitiligo repigmentation in vitro.

Severe adverse cutaneous reaction to insulin due to cresol sensitivity.

Cutaneous poisoning syndromes in children: a review.

Stress resistance and aging: influence of genes and nutrition.

The constitutively active Ah receptor (CA-Ahr) mouse as a potential model for dioxin exposure--effects in vital organs.

[Immunization with cellulose-immobilized antigens. The development of A. E. Gurvitch concept].

Iatrogenic full-thickness chemical burns from monochloroacetic acid.

A comparative study on the antimutagenicity of atorvastatin and lovastatin against directly acting mutagens.

Lethal acute lung injury and hypoglycemia after subcutaneous administration of monochloroacetic acid.

In vitro stability of insulin lispro in continuous subcutaneous insulin infusion.

The effect of perinatal TCDD exposure on caries susceptibility in rats.

NTP technical report on the toxicology and carcinogenesis studies of 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (Gavage studies).

Regulation of the mitogen-activated protein kinase p44 ERK activity during anoxia/recovery in rainbow trout hypodermal fibroblasts.

Diffuse lesion in the splenium of the corpus callosum in patients with methyl bromide poisoning.

Dual treatment with COX-2 inhibitor and sodium arsenite leads to induction of surface Fas Ligand expression and Fas-Ligand-mediated apoptosis in human melanoma cells.

Assessment of effects in mink caused by consumption of carp collected from the Saginaw River, Michigan, USA.

NTP technical report on the toxicology and carcinogenesis studies of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (CAS No. 1746-01-6) in female Harlan Sprague-Dawley rats (Gavage Studies).

[Advance of research on skin injury after exposure to 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin].

Identifying soil cleanup criteria for dioxins in urban residential soils: how have 20 years of research and risk assessment experience affected the analysis?

Silybin and dehydrosilybin inhibit cytochrome P450 1A1 catalytic activity: a study in human keratinocytes and human hepatoma cells.

Effects of dimethylsulphoxide on mice arsenite-induced dysmorphogenesis in embryo culture and cytotoxicity in embryo cells.

Occupational exposure to toluene and its possible causative role in renal damage development in shoe workers.

Bacterial leakage in roots filled with different medicaments and sealed with Cavit.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces matrix metalloproteinase (MMP) expression and invasion in A2058 melanoma cells.

Gestational and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin affects social behaviors between developing rhesus monkeys (*Macaca mulatta*).

Assessing neuroprotection in Parkinson's disease: from the animal models to molecular neuroimaging in vivo.

[The influence of polyunsaturated fat acids on the development of artificially caused exudative skin necrosis in rats].

Polychlorinated biphenyls (PCBs): routes of exposure and effects on human health.

NTP toxicology and carcinogenesis studies of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (CAS No. 57465-28-8) in female Harlan Sprague-Dawley rats (Gavage Studies).

Effects of caffeine, halothane, and 4-chloro-m-cresol on skeletal muscle lactate and pyruvate in malignant hyperthermia-susceptible and normal swine as assessed by microdialysis.

Analytical studies on the prediction of photosensitive/phototoxic potential of pharmaceutical substances.

The aryl hydrocarbon receptor directly regulates expression of the potent mitogen epiregulin.

Effect of EGF on [3H]-thymidine incorporation and cell cycle regulatory proteins in primary cultured chicken hepatocytes: Involvement of Ca²⁺/PKC and MAPKs.

Odorant identification and quality perception following methyl bromide-induced lesions of the olfactory epithelium.

Differentiation-specific factors modulate epidermal CYP1-4 gene expression in human skin in response to retinoic acid and classic aryl hydrocarbon receptor ligands.

TNF-alpha, IFN-gamma, and IL-1beta modulate hyaluronan synthase expression in human skin fibroblasts: synergistic effect by concomitant treatment with FeSO4 plus ascorbate.

Acetylcholinesterase inhibition and gill lesions in *Rasbora caverii*, an indigenous fish inhabiting rice field associated waterbodies in Sri Lanka.

EGF-induced inhibition of glucose transport is mediated by PKC and MAPK signal pathways in primary cultured chicken hepatocytes.

Epidermal growth factor synergistically enhances interleukin-8 production in human gingival fibroblasts stimulated with interleukin-1beta.

Effects of 2,3,7,8-tetrachloro-dibenzo-p-dioxin on the extracellular matrix of the thymus in juvenile marmosets (*Callithrix jacchus*).

Toxicology and carcinogenesis studies of a mixture of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (Cas No. 1746-01-6), 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4), and 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) in female Harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4) in female Harlan Sprague-Dawley rats (gavage studies).

Results of a long-term carcinogenicity bioassay on Sprague-Dawley rats exposed to sodium arsenite administered in drinking water.

Anti-androgenic activity of 3-methyl-4-nitrophenol in diesel exhaust particles.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (gavage studies).

The role of the aryl hydrocarbon receptor pathway in mediating synergistic developmental toxicity of polycyclic aromatic hydrocarbons to zebrafish.

Cortical microtubule arrays lose uniform alignment between cells and are oryzalin resistant in the *Arabidopsis* mutant, radially swollen 6.

Dietary exposure of mink (*Mustela vison*) to fish from the Housatonic River, Berkshire County, Massachusetts, USA: effects on organ weights and histology and hepatic concentrations of polychlorinated biphenyls and 2,3,7,8-tetrachlorodibenzo-P-dioxin toxic equivalence.

Exposure of mice to arsenic and/or benzo[a]pyrene does not increase the frequency of Aprt-deficient cells recovered from explanted skin of Aprt heterozygous mice.

Enhancing effects of simultaneous treatment with sodium nitrite on 2-amino-3-methylimidazo[4,5-f]quinoline-induced rat liver, colon and Zymbal's gland carcinogenesis after initiation with diethylnitrosamine and 1,2-dimethylhydrazine.

Dioxin cancer risk--example of hormesis?

The effects of vehicles on the human dermal irritation potentials of allyl esters.

Bioaccumulation of copper by *Trichoderma viride*.

Interference by 2,3,7,8-tetrachlorodibenzo-p-dioxin with cultured mouse submandibular gland branching morphogenesis involves reduced epidermal growth factor receptor signaling.

Analytical methods for trace levels of reactive carbonyl compounds formed in lipid peroxidation systems.

Desensitization of platelet-derived growth factor receptor-beta by oxidized lipids in vascular cells and atherosclerotic lesions: prevention by aldehyde scavengers.

Membrane protein carbonylation in non-leukodepleted CPDA-preserved red blood cells.

UVA1 radiation (340-400 nm) interferes with the perforin-granule system of CD8hi+ cytotoxic T lymphocytes in vitro.

Sensitising potential of four textile dyes and some of their metabolites in a modified local lymph node assay.

Environmental toxicants and effects on female reproductive function.

Basic fibroblast growth factor promotes melanocyte migration via increased expression of p125(FAK) on melanocytes.

Co-administration of zinc and n-acetylcysteine prevents arsenic-induced tissue oxidative stress in male rats.

Cluster analysis of the dermal permeability and stratum corneum/solvent partitioning of ten chemicals in twenty-four chemical mixtures in porcine skin.

Arabidopsis and tobacco plants ectopically expressing the soybean antiquitin-like ALDH7 gene display enhanced tolerance to drought, salinity, and oxidative stress.

PKC and MAPKs pathways mediate EGF-induced stimulation of 2-deoxyglucose uptake in mouse embryonic stem cells.

CYP2A5-mediated activation and early ultrastructural changes in the olfactory mucosa: studies on 2,6-dichlorophenyl methylsulfone.

EGF stimulates proliferation of mouse embryonic stem cells: involvement of Ca²⁺ influx and p44/42 MAPKs.

[Paraquat intoxication and hemocarboperfusion].

A stomatitis due to artificial cinnamon-flavored chewing gum.

Applicator exposure to acetochlor based on biomonitoring.

The *Helicobacter pylori* MutS protein confers protection from oxidative DNA damage.

The role of trivalent dimethylated arsenic in dimethylarsinic acid-promoted skin and lung tumorigenesis in mice: tumor-promoting action through the induction of oxidative stress.

Toxicity testing of herbicide norflurazon on an aquatic bioindicator species--the planarian *Polycelis felina* (Daly.).

Fragrance material review on cinnamaldehyde.

A toxicologic and dermatologic assessment of cinnamyl alcohol, cinnamaldehyde and cinnamic acid when used as fragrance ingredients.

Postservice mortality of Air Force veterans occupationally exposed to herbicides during the Vietnam War: 20-year follow-up results.

Toxicity of organic compounds to marine invertebrate embryos and larvae: a comparison between the sea urchin embryogenesis bioassay and alternative test species.

Hospital-based survey of pesticide poisoning in Japan, 1998--2002.

Patch testing with a new fragrance mix - reactivity to the individual constituents and chemical detection in relevant cosmetic products.

Patch testing with a new fragrance mix detects additional patients sensitive to perfumes and missed by the current fragrance mix.

Oral exposure to atrazine modulates cell-mediated immune function and decreases host resistance to the B16F10 tumor model in female B6C3F1 mice.

Allergic contact dermatitis from cyanamide.

Determination of biological reference values for chlorpyrifos metabolites in human urine using a toxicokinetic approach.

Drug-induced hypersensitivity syndrome due to cyanamide associated with multiple reactivation of human herpesviruses.

Induction of cytotoxicity, aldehydic DNA lesions, and poly(ADP-ribose) polymerase-1 activation by catechol derivatives of pentachlorophenol in calf thymus DNA and in human breast cancer cells.

Vitamins C and E reverse effect of herbicide-induced toxicity on human epidermal cells HaCaT: a biochemometric approach.

Arsenic-induced micronuclei formation in mammalian cells and its counteraction by tea.

Operator exposure when applying amenity herbicides by all-terrain vehicles and controlled droplet applicators.

Neuropathological studies on cycloate-induced neuronal cell death in the rat brain.

Acrolein impairs ATP binding cassette transporter A1-dependent cholesterol export from cells through site-specific modification of apolipoprotein A-I.

Forced uptake of trivalent and pentavalent methylated and inorganic arsenic and its cyto-/genotoxicity in fibroblasts and hepatoma cells.

Acrolein modifies apolipoprotein A-I in the human artery wall.

Influence of atrazine administration and reduction of calorie intake on prostate carcinogenesis in probasin/SV40 T antigen transgenic rats.

Urinary trivalent methylated arsenic species in a population chronically exposed to inorganic arsenic.

Very-long-chain fatty acids activate lysosomal hydrolases in neonatal human skin tissue.

Tamoxifen up-regulates catalase production, inhibits vessel wall neutrophil infiltration, and attenuates development of experimental abdominal aortic aneurysms.

Development of a method for quantification of acrolein-deoxyguanosine adducts in DNA using isotope dilution-capillary LC/MS/MS and its application to human brain tissue.

DNA damage in leukocytes of workers occupationally exposed to arsenic in copper smelters.

Coherent phase microscopy in cell biology: visualization of metabolic states.

Novel genomic targets in oxidant-induced vascular injury.

Genotoxic and cytotoxic effects in the bone marrow of rats exposed to a low dose of paraquat via the dermal route.

Dermal absorption of 2,4-D: a review of species differences.

Formation of embryogenic cell clumps from carrot epidermal cells is suppressed by 5-azacytidine, a DNA methylation inhibitor.

Fibroblast cell lines from young adult mice of long-lived mutant strains are resistant to multiple forms of stress.

Induction of heat shock protein 70 in rat olfactory epithelium by toxic chemicals: in vitro and in vivo studies.

Met5-enkephalin-induced cardioprotection occurs via transactivation of EGFR and activation of PI3K.

Association of micropenis with Pro185Ala polymorphism of the gene for aryl hydrocarbon receptor repressor involved in dioxin signaling.

Chloracne due to o-dichlorobenzene in a laboratory worker.

Chemical-induced atrial thrombosis in NTP rodent studies.

Characterization of spontaneous and chemically induced cardiac lesions in rodent model systems: the national toxicology program experience.

Classification of proliferative hepatocellular lesions in harlan sprague-dawley rats chronically exposed to dioxin-like compounds.

Gingival carcinogenicity in female Harlan Sprague-Dawley rats following two-year oral treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and dioxin-like compounds.

The epidemiology of non-Hodgkin lymphoma.

Glycolytic glioma cells with active glycogen synthase are sensitive to PTEN and inhibitors of PI3K and gluconeogenesis.

Vitamin E and organoselenium prevent the cocarcinogenic activity of arsenite with solar UVR in mouse skin.

Validation of Haber's Rule (dose x time = constant) in rats and mice for monochloroacetic acid and 2,3,7,8-tetrachlorodibenzo-p-dioxin under conditions of kinetic steady state.

Darbepoetin alfa treatment for post-renal transplantation anemia during pregnancy.

LAIS Allergoid.

Histologic evaluation of periradicular tissues in dogs treated with calcium hydroxide in combination with HCT20 and camphorated P-chlorophenol.

Ultrastructural findings in feline corneal sequestra.

The European standard series in 9 European countries, 2002/2003 -- first results of the European Surveillance System on Contact Allergies.

A histochemical and pathological study on the interrelationship between TCDD-induced AhR expression, AhR activation, and hepatotoxicity in mice.

Lecozotan (SRA-333): a selective serotonin 1A receptor antagonist that enhances the stimulated release of glutamate and acetylcholine in the hippocampus and possesses cognitive-enhancing properties.

Sodium methyldithiocarbamate inhibits MAP kinase activation through toll-like receptor 4, alters cytokine production by mouse peritoneal macrophages, and suppresses innate immunity.

Genomic damage and circulating AGE levels in patients undergoing daily versus standard haemodialysis.

Low level, long-term inorganic arsenite exposure causes generalized resistance to apoptosis in cultured human keratinocytes: potential role in skin co-carcinogenesis.

Biomarkers of exposure, effect, and susceptibility of arsenic-induced health hazards in Taiwan.

Immortalized mouse mammary fibroblasts lacking dioxin receptor have impaired tumorigenicity in a subcutaneous mouse xenograft model.

Photosensitizing properties of 6-methoxy-2-naphthylacetic acid, the major metabolite of the phototoxic non-steroidal anti-inflammatory and analgesic drug nabumetone.

Reply to the comments by Coenraads and Tang 'Chloracne due to o-dichlorobenzene in a laboratory worker', Contact Dermatitis 2005; 52: 108.

An epidemiological study of poisoning cases reported to the National Poisons Information Centre, All India Institute of Medical Sciences, New Delhi.

High susceptibility of human c-Ha-ras proto-oncogene transgenic rats to carcinogenesis: a cancer-prone animal model.

The heat shock protein 90 inhibitor, 17-allylamino-17-demethoxygeldanamycin, enhances osteoclast formation and potentiates bone metastasis of a human breast cancer cell line.

Effect of endodontic procedures on enterococci, enteric bacteria and yeasts in primary endodontic infections.

Acute methyl iodide exposure with delayed neuropsychiatric sequelae: report of a case.

[Skin symptoms in Yusho patients related to blood dioxin level].

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) affects tooth development in rhesus monkeys.

Chronic toxicity and carcinogenicity of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin displays a distinct dose/time toxicity threshold ($c \times t = k$) and a life-prolonging subthreshold effect.

Methyl bromide intoxication causes reversible symmetric brainstem and cerebellar MRI lesions.

Did TCDD exposure or service in Southeast Asia increase the risk of cancer in air force Vietnam veterans who did not spray agent orange?

Effects of PCB 126 on primary immune organs and thymocyte apoptosis in chicken embryos.

Efficacy of sublingual coseasonal immunotherapy with a monomeric allergoid in Cupressaceae pollen allergy--preliminary data.

Health status and plasma dioxin levels in chloracne cases 20 years after the Seveso, Italy accident.

Squamous epithelial lesion of the mandibles and maxillae of wild mink (*Mustela vison*) naturally exposed to polychlorinated biphenyls.

Dioxin toxicity and chloracne in the Ukraine.

Co-mutagenic activity of arsenic and benzo[a]pyrene in mouse skin.

Antimutagenicity and cytotoxicity of the constituents from the aerial parts of *Rumex acetosa*.

Predicting skin permeability from complex chemical mixtures.

First Report of *Sclerotinia minor* on *Sida spinosa* in North Carolina.

Chemicals as tumor-inducing agents.

[Political poisoning with dioxins--a weapon of chemical "disgracefulness"].

Effects of AV3V lesion on pilocarpine-induced pressor response and salivary gland vasodilation.

Effects of epidermal growth factor receptor deficiency and 2,3,7,8-tetrachlorodibenzo-p-dioxin on fetal development in mice.

NTP toxicology and carcinogenesis studies of triethanolamine (Cas No. 102-71-6) in B6C3F1 mice (dermal studies).

Characterization of bronchiolar metaplasia of the alveolar epithelium in female Sprague-Dawley rats exposed to 3,3',4,4',5-pentachlorobiphenyl (PCB126).

Effect of sodium arsenite on peripheral lymphocytes in vitro: individual susceptibility among a population exposed to arsenic through the drinking water.

Limited effect of selected organic pollutants on cytokine production by peripheral blood leukocytes.

Arsenic-induced enhancement of ultraviolet radiation carcinogenesis in mouse skin: a dose-response study.

How environmental hazards in childhood have been discovered: carcinogens, teratogens, neurotoxicants, and others.

Persistent suppression of contact hypersensitivity, and altered T-cell parameters in F344 rats exposed perinatally to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Soft-tissue sarcoma and dioxin: A case-control study.

Role of capsaicin-sensitive afferent nerves in different models of gastric inflammation in rats.

Phthalate ester-induced gubernacular lesions are associated with reduced *insl3* gene expression in the fetal rat testis.

Protective effects of ursodeoxycholic acid against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced testicular damage in mice.

Effects of odd-numbered medium-chain fatty acids on the accumulation of long-chain 3-hydroxy-fatty acids in long-chain L-3-hydroxyacyl CoA dehydrogenase and mitochondrial trifunctional protein deficient skin fibroblasts.

Comparison of the hemolytic activity of isopropoxyethanol and phenoxyethanol.

Effects of airbag deployment: lesions, epidemiology, and management.

Liquid growth hormone: preservatives and buffers.

Activation of inflammatory mediators and potential role of *ah*-receptor ligands in foam cell formation.

Treatment of iron deficiency anemia with Ferro-Folgamma.

Antibodies against the CB10 fragment of type II collagen in rheumatoid arthritis.

Assessing the toxicity and teratogenicity of pond water in north-central Minnesota to amphibians.

Detection of *Erysipelothrix rhusiopathiae* in clinical and environmental samples.

Follicular epithelial cell hypertrophy induced by chronic oral administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Harlan Sprague-Dawley rats.

Effect of epidermal growth factor on pulmonary hypoplasia in experimental diaphragmatic hernia.

Nitrofen-induced congenital diaphragmatic hernia in rat embryo: what model?

Induction of tumors of the liver, lung, ovary and adrenal in adult mice after brief maternal gestational exposure to inorganic arsenic: promotional effects of postnatal phorbol ester exposure on hepatic and pulmonary, but not dermal cancers.

Human bronchial smooth muscle cell proliferation via thromboxane A₂ receptor.

Expression patterns of basic helix-loop-helix transcription factors define subsets of olfactory progenitor cells.

Morphohistological analysis and histochemistry of *Feijoa sellowiana* somatic embryogenesis.

Regulation of N-acetyl-beta-D-glucosaminidase produced by *Trichoderma harzianum*: evidence that cAMP controls its expression.

Semiochemistry of the goldeneyed lacewing *Chrysopa oculata*: attraction of males to a male-produced pheromone.

Air bags and the skin.

Src kinase mediates angiotensin II-dependent increase in pulmonary endothelial nitric oxide synthase.

Blood-brain barrier permeability of novel [D-arg2]dermorphin (1-4) analogs: transport property is related to the slow onset of antinociceptive activity in the central nervous system.

Interaction between the aryl hydrocarbon receptor and retinoic acid pathways increases matrix metalloproteinase-1 expression in keratinocytes.

Reduction of DNA fragmentation and hydroxyl radical production by hyaluronic acid and chondroitin-4-sulphate in iron plus ascorbate-induced oxidative stress in fibroblast cultures.

Evidence that inhibited prostatic epithelial bud formation in 2,3,7,8-tetrachlorodibenzo-p-dioxin-exposed C57BL/6J fetal mice is not due to interruption of androgen signaling in the urogenital sinus.

Epidermal growth factor inhibits 14C-alpha-methyl-D-glucopyranoside uptake in renal proximal tubule cells: involvement of PLC/PKC, p44/42 MAPK, and cPLA2.

Versican V1 isoform induces neuronal differentiation and promotes neurite outgrowth.

Aryl hydrocarbon receptors in urogenital sinus mesenchyme mediate the inhibition of prostatic epithelial bud formation by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effect of arsenic on benzo[a]pyrene DNA adduct levels in mouse skin and lung.

Altered epithelial density and expansion of bulbar projections of a discrete HSP70 immunoreactive subpopulation of rat olfactory receptor neurons in reconstituting olfactory epithelium following exposure to methyl bromide.

Multipotency of purified, transplanted globose basal cells in olfactory epithelium.

Ultraviolet A-induced production of matrix metalloproteinase-1 is mediated by macrophage migration inhibitory factor (MIF) in human dermal fibroblasts.

Odorant receptor expression patterns are restored in lesion-recovered rat olfactory epithelium.

Effect of the oxidative phosphorylation uncoupler 2,4-dinitrophenol on hypoxia-inducible factor-regulated gene expression in bovine blastocysts.

Toxicity, histopathological alterations and immunohistochemical CYP1A induction in the early life stages of the seabream, Sparus aurata, following waterborne exposure to B(a)P and TCDD.

Vascular permeability alterations induced by arsenic.

An assessment of the genotoxicity and human health risk of topical use of kojic acid [5-hydroxy-2-(hydroxymethyl)-4H-pyran-4-one].

A case of multiple skin cancers after occupational exposure to pesticides.

'Proximal-type' epithelioid sarcoma: is Agent Orange still at large?

Assessment of statistic analysis in non-radioisotopic local lymph node assay (non-RI-LLNA) with alpha-hexylcinnamic aldehyde as an example.

Role of chloroplast photosystems II and I in apoptosis of pea guard cells.

Comparative evaluation of the bioreactivity and mutagenic spectra of acrolein-derived alpha-HOPdG and gamma-HOPdG regioisomeric deoxyguanosine adducts.

Biochemical and histopathological effects of glyphosate herbicide on Nile tilapia (*Oreochromis niloticus*).

Impact of Agent Orange exposure among Korean Vietnam veterans.

Altered gene expression during rat Wolffian duct development in response to in utero exposure to the antiandrogen linuron.

Changes in the fatty acid composition and hydroxyproline content in rat lung in relation to collagen synthesis after paraquat administration.

Health effects on nearby residents of a wood treatment plant.

Parental occupational exposure to pesticides and childhood brain cancer.

Occupational airborne contact allergy to cyanamide and dibenzyl phosphite.

[Correction of immunodeficiency status caused by herbicide 2,4-D in experiment].

Assessment of cumulative allergen-activated lymph node cell proliferation using flow cytometry.

Skin tumor-promoting potential and systemic effects of pentachlorophenol and its major metabolite tetrachlorohydroquinone in CD-1 Mice.

The 5-enolpyruvylshikimate-3-phosphate synthase of glyphosate-tolerant soybean expressed in *Escherichia coli* shows no severe allergenicity.

Contact urticaria from cinnamal leading to anaphylaxis.

Cinnamic compound metabolism in human skin and the role metabolism may play in determining relative sensitisation potency.

Carcinogenicity of dimethylarsinic acid in p53 heterozygous knockout and wild-type C57BL/6J mice.

Deodorants: an experimental provocation study with cinnamic aldehyde.

Translesion synthesis past acrolein-derived DNA adduct, gamma-hydroxypropanodeoxyguanosine, by yeast and human DNA polymerase eta.

Combined initial cyclophosphamide with repeated methylprednisolone pulse therapy for severe paraquat poisoning from dermal exposure.

Pentachlorophenol poisoning.

Focal transmural necrotic tracheitis in commercial meat turkeys.

Pentachlorophenol (but not phenobarbital) promotes intrahepatic biliary cysts induced by diethylnitrosamine to cholangio cystic neoplasms in B6C3F1 mice possibly due to oxidative stress.

Comparison of cyanamide and placebo in the treatment of alcohol dependence of adolescents.

Lack of modifying effects of atrazine and/or tamoxifen on thyroid carcinogenesis in rats pretreated with N-bis(2-hydroxypropyl)nitrosamine (DHPN).

Effects of oxygen on the antioxidant responses of normal and transformed cells.

Oxidative stress and altered antioxidant defenses in children with acute exacerbation of atopic dermatitis.

Cell type-specific hypersensitivity to oxidative damage in CSB and XPA mice.

Chondroitin sulfate proteoglycans are required for lung growth and morphogenesis in vitro.

Biological activity of pentachlorophenol on the digestive gland cells of the freshwater mussel *Unio tumidus*.

Tissue-specific expression and localization of safener-induced glutathione S-transferase proteins in *Triticum tauschii*.

SKN-1 links *C. elegans* mesendodermal specification to a conserved oxidative stress response.

Induction of oxidative DNA damage by arsenite and its trivalent and pentavalent methylated metabolites in cultured human cells and isolated DNA.

Induction of glutathione S-transferase placental form positive foci in liver and epithelial hyperplasia in urinary bladder, but no tumor development in male Fischer 344 rats treated with monomethylarsonic acid for 104 weeks.

Photodegradation pathways and the in vitro phototoxicity of pyrazinamide, a phototoxic antitubercular drug.

Tolerogenic role of Kupffer cells in allergic reactions.

Lack of expression of EGF and TGF- α in the fetal mouse alters formation of prostatic epithelial buds and influences the response to TCDD.

An unusual cause of burn injury: skin exposure to monochloroacetic acid.

Arsenic exposure accelerates atherogenesis in apolipoprotein E(-/-) mice.

Systemic effects and skin injury after experimental dermal exposure to monochloroacetic acid.

2,3,7,8-tetrachlorodibenzo-p-dioxin selectively enhances spontaneous IgE production in B cells from atopic patients.

Treatment of post-burns bacterial infections by Fenton reagent, particularly the ubiquitous multiple drug resistant *Pseudomonas* spp.

Effect of corticosteroid on lung parenchyma remodeling at an early phase of acute lung injury.

Nonanoic acid--an experimental irritant.

Comparative study on the effects of ointments of tinidazole, hydrocortisone and clobetasol on animal models for inflammatory dermatitis in mice.

Dermal exposure to 3-amino-5-mercapto-1,2,4-triazole (AMT) induces sensitization and airway hyperreactivity in BALB/c mice.

Angiotensin II phosphorylation of extracellular signal-regulated kinases in rat anterior pituitary cells.

Allergenicity evaluation of p-chloro-m-cresol and p-chloro-m-xlenol by non-radioactive murine local lymph-node assay and multiple-dose guinea pig maximization test.

The reliability of long-term storage of direct immunofluorescent staining slides at room temperature.

Assessment of irritant skin reactions using electrical impedance--a comparison between 2 laboratories.

Role of elastin in pathologic calcification of xenograft heart valves.

UVB light stimulates production of reactive oxygen species: unexpected role for catalase.

Antiallergic activity of ginseng and its ginsenosides.

Association between arsenic exposure from a coal-burning power plant and urinary arsenic concentrations in Prievidza District, Slovakia.

Globose basal cells are required for reconstitution of olfactory epithelium after methyl bromide lesion.

Dioxin residues in the edible tissue of broiler chicken.

Spectrum of cross-photosensitization in 18 consecutive patients with contact photoallergy to ketoprofen: associated photoallergies to non-benzophenone-containing molecules.

Effects of metronidazole and tinidazole ointments on models for inflammatory dermatitis in mice.

Erythropoietin therapy in pre-dialysis patients with chronic renal failure: lack of need for parenteral iron.

Influence of 5-aminolevulinic acid and red light on collagen metabolism of human dermal fibroblasts.

Increase in cardiovascular pathology in female Sprague-Dawley rats following chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3,3',4,4',5-pentachlorobiphenyl.

Studies on type I collagen in skin fibroblasts cultured from twins with lethal osteogenesis imperfecta.

[Occupational epidemiology: from analysis of the apparent to investigation of the unknown].

Antiperoxidative, anti-inflammatory, and antimutagenic activities of ethanol extract of the mycelium of *Ganoderma lucidum* occurring in South India.

Transplacental carcinogenicity of inorganic arsenic in the drinking water: induction of hepatic, ovarian, pulmonary, and adrenal tumors in mice.

EGF and TGF- α expression influence the developmental toxicity of TCDD: dose response and AhR phenotype in EGF, TGF- α , and EGF + TGF- α knockout mice.

Pre- or post-treatment with the mitochondrial uncoupler 2,4-dinitrophenol attenuates striatal quinolinate lesions.

Oviposition response of the mosquito, *Culex quinquefasciatus* to the secondary metabolite(s) of the fungus, *Trichoderma viride*.

Mutagenic and antimutagenic potential of the medicinal plants *M. laevigata* and *C. xanthocarpa*.

Randomization of cortical microtubules in root epidermal cells induces root hair initiation in lettuce (*Lactuca sativa* L.) seedlings.

Blood-brain barrier transport of a novel micro 1-specific opioid peptide, H-Tyr-D-Arg-Phe-beta-Ala-OH (TAPA).

Measurement of retinoids and beta-carotene 15,15'-dioxygenase activity in HR-1 hairless mouse skin with UV exposure.

Effects of magnesium on the production of extracellular matrix metalloproteinases in cultured rat vascular smooth muscle cells.

Effect of epidermal growth factor on phosphate uptake in renal proximal tubule cells: involvement of PKC, MAPK, and cPLA2.

Epidermal growth factor regulates Ca²⁺ uptake in primary cultured renal proximal tubule cells: involvement of cAMP, PKC and cPLA2.

Proteoglycans on bone marrow endothelial cells bind and present SDF-1 towards hematopoietic progenitor cells.

Sensitivity and specificity of different staining methods to monitor apoptosis induced by oxidative stress in adherent cells.

Kinetics of monochloroacetic acid at subtoxic and toxic doses in rats after single oral and dermal administrations.

Alteration of keratinocyte differentiation and senescence by the tumor promoter dioxin.

NTP toxicology and carcinogenesis Studies of 2,4-hexadienal (89% trans,trans isomer, CAS No. 142-83-6; 11% cis,trans isomer) (Gavage Studies).

Simulation of dioxin accumulation in human tissues and analysis of reproductive risk.

Somatic embryogenesis in sisal (*Agave sisalana* Perr. ex. Engelm).

Mislocalization of membrane proteins associated with multidrug resistance in cisplatin-resistant cancer cell lines.

Characterization of an inducible chlorophenol O-methyltransferase from *Trichoderma longibrachiatum* involved in the formation of chloroanisoles and determination of its role in cork taint of wines.

On the significance of the role of cellular stress response reactions in the toxic actions of dioxin.

p38 mitogen-activated protein kinase activation by ultraviolet A radiation in human dermal fibroblasts.

Upregulation of cellular NF-kappa B activity by alkylating carcinogens in human epidermal keratinocytes.

Soluble extracts from *Helicobacter pylori* induce dome formation in polarized intestinal epithelial monolayers in a laminin-dependent manner.

Mutation or drug-dependent microtubule disruption causes radial swelling without altering parallel cellulose microfibril deposition in *Arabidopsis* root cells.

Reactive oxygen species mediate endotoxin-induced human dermal endothelial NF-kappaB activation.

Three-dimensional mapping of the lesions induced by beta-beta'-iminodipropionitrile, methyl iodide and methyl methacrylate in the rat nasal cavity.

Occurrence of *Botrytis cinerea* and Subsequent Disease Expression at Different Positions on Leaves and Bunches of Grape.

[Single and binary-combined toxicity of methamidophos, acetochlor and Cu on earthworm *Eisenia foetida*].

Role of the different mitogen-activated protein kinase subfamilies in the stimulation of dog and human thyroid epithelial cell proliferation by cyclic adenosine 5'-monophosphate and growth factors.

Developmental exposure to the pesticides paraquat and maneb and the Parkinson's disease phenotype.

Effect of chemical interactions in pentachlorophenol mixtures on skin and membrane transport.

[Effect of combined radioactive and chemical (heavy metals, herbicides) pollution on the yield of cytogenetic disruptions in the intercalary meristem of spring barley].

Environmental agents as cause of health disorders in children presented at an outpatient unit of environmental medicine.

Error prone translesion synthesis past gamma-hydroxypropano deoxyguanosine, the primary acrolein-derived adduct in mammalian cells.

Predictors of survival after acute paraquat poisoning.

Effects of in utero linuron exposure on rat Wolffian duct development.

Incidence of CTCL in Vietnam veterans.

In vivo genotoxicity evaluation of dimethylarsinic acid in MutaMouse.

An analysis of glyphosate data from the California Environmental Protection Agency Pesticide Illness Surveillance Program.

Sunscreens can increase dermal penetration of 2,4-dichlorophenoxyacetic acid.

A 'single toxin-double lesion' rat model of striatonigral degeneration by intrastriatal 1-methyl-4-phenylpyridinium ion injection: a motor behavioural analysis.

In vitro effect of air pollutants on human bronchi.

Lesions induced by 2,4-D and chlorpyrifos in tench (*Tinca tinca* L.): implication in toxicity studies.

Effects of nonylphenol, 1,1-dichloro-2,2-bis(p-chlorophenyl)ethylene (p,p'-DDE), and pentachlorophenol on the adult female guinea pig reproductive tract.

[Chlorophenols: intermediate by-products of 2,4-dichlorophenoxyacetic acid synthesis. Toxicity and hazard].

Male rats exposed to linuron in utero exhibit permanent changes in anogenital distance, nipple retention, and epididymal malformations that result in subsequent testicular atrophy.

Mutagenesis by acrolein-derived propanodeoxyguanosine adducts in human cells.

The role of sodium cromolyn in treatment of paraquat-induced pulmonary fibrosis in rat.

Carcinogenicity of dimethylarsinic acid in male F344 rats and genetic alterations in induced urinary bladder tumors.

Promoting effects of monomethylarsonic acid, dimethylarsinic acid and trimethylarsine oxide on induction of rat liver preneoplastic glutathione S-transferase placental form positive foci: a possible reactive oxygen species mechanism.

Is *Lolium* pollen from an urban environment more allergenic than rural pollen?

Mucin apoprotein expression in COPD.

A review on usnic acid, an interesting natural compound.

Analysis of DNA adducts in rats exposed to pentachlorophenol.

Inhibition of cell proliferation and AP-1 activity by acrolein in human A549 lung adenocarcinoma cells due to thiol imbalance and covalent modifications.

Ozone-induced ethylene production is dependent on salicylic acid, and both salicylic acid and ethylene act in concert to regulate ozone-induced cell death.

Systemic uptake and cutaneous disposition of pentachlorophenol in a sequential exposure scenario: effects of skin preexposure to benzo[a]pyrene.

The barley MLO modulator of defense and cell death is responsive to biotic and abiotic stress stimuli.

Involvement of chloroplasts in the programmed death of plant cells.

Assessment of the rhizosphere competency and pentachlorophenol-metabolizing activity of a pesticide-degrading strain of *Trichoderma harzianum* introduced into the root zone of corn seedlings.

9-polylysine protein transduction domain: enhanced penetration efficiency of superoxide dismutase into mammalian cells and skin.

Genotoxic mechanism for the major acrolein-derived deoxyguanosine adduct in human cells.

Involvement of the *Arabidopsis* alpha-DOX1 fatty acid dioxygenase in protection against oxidative stress and cell death.

Cell enlargement of plant tissue explants oscillates with a temperature-compensated period of ca. 24 min.

Phosphorylated alpha-synuclein is ubiquitinated in alpha-synucleinopathy lesions.

Mesenchymal nuclear transcription factors in nitrofen-induced hypoplastic lung.

Contact allergy to o-cresol--a sensitizer in phenol-formaldehyde resin.

Natal and neonatal teeth in relation to environmental toxicants.

Role of bioavailable iron in coal dust-induced activation of activator protein-1 and nuclear factor of activated T cells: difference between Pennsylvania and Utah coal dusts.

The influence of a residual group in low-molecular-weight allergoids of *Artemisia vulgaris* pollen on their allergenicity, IgE- and IgG-binding properties.

The Coca-Cola incident in Belgium, June 1999.

The clinicopathologic significance of enriching grated cassava mash with red palm oil in the production of gari.

[Phenomenon of pseudomutagenesis: experiments with modifiers of cell metabolism in human lymphocytes].

[Photocontact dermatitis due to ketoprofen and photosensitization to tetrachlorosalicylanide and to Fenticlor(R)].

Sodium arsenite-induced stress-related gene expression in normal human epidermal, HaCaT, and HEL30 keratinocytes.

Arsenite cocarcinogenesis: an animal model derived from genetic toxicology studies.

Lipid metabolism and neuropsychological follow-up study of workers exposed to 2,3,7,8-tetrachlorodibenzo- p-dioxin.

Effect of in utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on rat molar development: the role of exposure time.

Fibrinogen induces chemotactic activity in endothelial cells.

Antipruritic and antiinflammatory effects of aqueous extract from Si-Wu-Tang.

Challenging embryological theories on congenital diaphragmatic hernia: future therapeutic implications for paediatric surgery.

Induction of HSP72 by sodium arsenite fails to protect against cholecystokinin-octapeptide-induced acute pancreatitis in rats.

The stress response decreases NF-kappaB activation in liver of endotoxemic mice.

Role of ATP in the sensitivity to heat and the induction of apoptosis in mammalian cells.

Mechanisms of 2-butoxyethanol carcinogenicity: studies on Syrian Hamster Embryo (SHE) cell transformation.

Comparison of acute toxicities of indolo[3,2-b]carbazole (ICZ) and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in TCDD-sensitive rats.

Cancer chemopreventive and antioxidant activities of pterostilbene, a naturally occurring analogue of resveratrol.

Studies on the photostability and phototoxicity of aloe-emodin, emodin and rhein.

Low doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin increase transforming growth factor beta and cause myocardial fibrosis in marmosets (*Callithrix jacchus*).

Incidence of postoperative pain after intracanal procedures based on an antimicrobial strategy.

[Iron supplementation in a child with severe burns].

Decrease in 4-aminobiphenyl-induced methemoglobinemia in Cyp1a2(-/-) knockout mice.

Algal dermatitis in cichlids.

Recognition and management of acute pesticide poisoning.

[The prevalence of iron deficiency anemia among 6- to 18-month-old children in Japan].

Physiologic levels of epidermal growth factor in saliva stimulate cell migration of an oral epithelial cell line, HO-1-N-1.

Developmental stage-specific effects of perinatal 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on reproductive organs of male rat offspring.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on trace elements, inflammation and viral clearance in the myocardium during coxsackievirus B3 infection in mice.

Skin irritation typing and grading based on laser Doppler perfusion imaging.

Dioxin in infants--an environmental hazard?

A correlative study on antimutagenic and chemopreventive activity of *Acacia auriculiformis* A. Cunn. and *Acacia nilotica* (L.) Willd. Ex Del.

Maternal immune stimulation in mice decreases fetal malformations caused by teratogens.

Lack of promoting effect due to oral administration of dimethylarsinic acid on rat lung carcinogenesis initiated with N-bis(2-hydroxypropyl)nitrosamine.

A possible relationship between bumblefoot responsive to potassium arsenite and micrococci in the blood of three birds of prey.

Expression of the uncoupling protein 1 from the aP2 gene promoter stimulates mitochondrial biogenesis in unilocular adipocytes in vivo.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) disrupts early morphogenetic events that form the lower reproductive tract in female rat fetuses.

Interactions in developmental toxicology: effects of concurrent exposure to lead, organic mercury, and arsenic in pregnant mice.

Genomic analysis of alachlor-induced oncogenesis in rat olfactory mucosa.

Identification of 2,4-dichlorophenol in females of the American dog tick, *Dermacentor variabilis* (Acari: Ixodidae), and its possible role as a component of the attractant sex pheromone.

Methylene blue restores spatial memory retention impaired by an inhibitor of cytochrome oxidase in rats.

Enhancement of alpha-adrenoceptor-mediated responses in prostate of testosterone-treated rat.

Intake fraction for multimedia pollutants: a tool for life cycle analysis and comparative risk assessment.

Involvement of reactive oxygen species in arsenite-induced downregulation of phospholipid hydroperoxide glutathione peroxidase in human epidermoid carcinoma A431 cells.

Signal pathways involved in the production of MMP-1 and MMP-3 in human gingival fibroblasts.

In utero exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin causes accelerated terminal differentiation in fetal mouse skin.

Tissue-specific expression of AHR2, ARNT2, and CYP1A in zebrafish embryos and larvae: effects of developmental stage and 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

Synthesis and cytotoxic activity of N-(2-diethylamino)ethylcarboxamide and other derivatives of 10H-quindoline.

Chronic acquired dyskeratotic papulosis of the face.

Benzo(a)pyrene, but not 2,3,7,8-tetrachlorodibenzo-p-dioxin, alters cell adhesion proteins in human uterine RL95-2 cells.

Alteration in ovarian gene expression in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin: reduction of cyclooxygenase-2 in the blockage of ovulation.

Evidence for high activity of xylem parenchyma and ray cells in the interface of host stem and *Agrobacterium tumefaciens*-induced tumours of *Ricinus communis*.

Oversulfated chondroitin/dermatan sulfates containing GlcAbeta1/IdoAalpha1-3GalNAc(4,6-O-disulfate) interact with L- and P-selectin and chemokines.

Unique property of some synthetic retinoids: activation of the aryl hydrocarbon receptor pathway.

Multidrug-resistance *mdr1a/1b* double knockout mice are more sensitive than wild type mice to acute arsenic toxicity, with higher arsenic accumulation in tissues.

In vitro cytotoxicity testing with fluorescence-based assays in cultured human lung and dermal cells.

Acute sodium arsenite treatment induces Cyp2a5 but not Cyp1a1 in the C57Bl/6 mouse in a tissue (kidney) selective manner.

Acute sodium arsenite administration induces pulmonary CYP1A1 mRNA, protein and activity in the rat.

Toxicity testing and chemical analyses of recycled fibre-based paper for food contact.

Tissue concentrations and induction of a hepatic monooxygenase in male Wistar rats after repeated doses of defined polychlorinated dibenzo-p-dioxin and dibenzofuran (PCDDs and PCDFs) mixtures.

Understanding fragrance allergy using an exposure-based risk assessment approach.

Changes in plasma antiproteases in paraquat poisoned rats using micro two-dimensional electrophoretic analysis.

DNA damage by cadmium and arsenic salts assessed by the single cell gel electrophoresis assay.

Environmental and occupational skin diseases in Taiwan.

Paraquat in developing countries.

Diquat poisoning of dairy cattle by topical application.

Oral exposure of dimethylarsinic acid, a main metabolite of inorganic arsenics, in mice leads to an increase in 8-Oxo-2'-deoxyguanosine level, specifically in the target organs for arsenic carcinogenesis.

Paraquat poisoning in a burn patient.

Langerhans cells and immature dendritic cells as model systems for screening of skin sensitizers.

Carrier-mediated processes in blood--brain barrier penetration and neural uptake of paraquat.

Unique renal tubule changes induced in rats and mice by the peroxisome proliferators 2,4-dichlorophenoxyacetic acid (2,4-D) and WY-14643.

The development of a new method to estimate total daily dose of pesticides in professional turf applicators following multiple and varied exposures in occupational settings.

Assessment of pentachlorophenol-exposed timber workers using a test-of-poisoning model.

Release of markedly increased quantities of prostaglandin D2 from the skin in vivo in humans after the application of cinnamic aldehyde.

The suitability of hexyl cinnamic aldehyde as a calibrant for the murine local lymph node assay.

Parkinsonism after glycine-derivate exposure.

Differential effects of trivalent and pentavalent arsenicals on cell proliferation and cytokine secretion in normal human epidermal keratinocytes.

Intracerebral administration of 2,4-dichlorophenoxyacetic acid induces behavioral and neurochemical alterations in the rat brain.

Attenuation of paraquat-induced dopaminergic toxicity on the substantia nigra by (-)-deprenyl in vivo.

Evaluation of the mutagenic potential of the principal DNA adduct of acrolein.

A concise review of the toxicity and carcinogenicity of dimethylarsinic acid.

Carcinogenicity assays of wood dust and wood additives in rats exposed by long-term inhalation.

No parallel relationship between nitric oxide production and wet dog shakes susceptible to nitric oxide synthase inhibitors following systemic administration of paraquat in rats.

Centrilobular endothelial cell injury by diquat in the selenium-deficient rat liver.

Effects of diquat, an aquatic herbicide, on the development of mallard embryos.

Reproductive toxicity of MCPA (4-chloro-2-methylphenoxyacetic acid) in the rat.

Complications of chronic arsenic poisoning.

Urothelial cytotoxicity and regeneration induced by dimethylarsinic acid in rats.

Immunohistochemical detection of lipid peroxidation products, protein-bound acrolein and 4-hydroxynonenal protein adducts, in actinic elastosis of photodamaged skin.

Dermal exposure to cinnamaldehyde alters lymphocyte subpopulations, number of interferon-gamma-producing cells, and expression of B7 costimulatory molecules and cytokine messenger RNAs in auricular lymph nodes of B6C3F1 mice.

Influence of caffeine on allyl alcohol-induced hepatotoxicity in rats. I. In vivo study.

Mixture component effects on the in vitro dermal absorption of pentachlorophenol.

Low-activity allele of copper-zinc superoxide dismutase (CuZnSOD) in *Drosophila* increases paraquat genotoxicity but does not affect near UV radiation damage.

High-performance liquid chromatography method for the quantification of non-radiolabelled cinnamic compounds in analytes derived from human skin absorption and metabolism experiments.

Development of sampling and analytical methods for concerted determination of commonly used chloroacetanilide, chlorotriazine, and 2,4-D herbicides in hand-wash, dermal-patch, and air samples.

Protection from drug-induced hepatocellular changes by pretreatment with conjugating enzyme inhibitors in rats.

Oxidative stress and usnic acid content in *Parmelia caperata* and *Parmelia soledians* (Lichenes).

Involvement of cortical microtubules in plastic extension regulated by gibberellin in *Lemna minor* root.

Accumulation of heavy metals in epidermal glands of the waterlily (*Nymphaeaceae*).

Oxidative stress inhibits the mitochondrial import of preproteins and leads to their degradation.

Acrolein induces activation of the epidermal growth factor receptor of human keratinocytes for cell death.

Cutaneous elimination of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Developmental dental defects in children who reside by a river polluted by dioxins and furans.

Dioxin body burdens in operation ranch hand veterans: promotion blocking and cancer causation.

Secretion of gelatinases and activation of gelatinase A (MMP-2) by human rheumatoid synovial fibroblasts.

Arsenite is a cocarcinogen with solar ultraviolet radiation for mouse skin: an animal model for arsenic carcinogenesis.

[Pseudo-Acanthosis nigricans in a 12 year old boy after kidney transplantation].

Do cool water or physiologic saline compresses enhance resolution of experimentally-induced irritant contact dermatitis?

Dioxins in adipose tissue of non-occupationally exposed persons in France: correlation with individual food exposure.

[CD7(+) acute myeloid leukemia (M0) associated with a mediastinal bulky mass lesion].

Severe 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) intoxication: clinical and laboratory effects.

In utero/lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure impairs molar tooth development in rats.

Down-regulation of regulatory proteins for differentiation and proliferation in murine fetal hypoplastic lungs: altered mesenchymal-epithelial interactions.

Absence of Crabtree effect in human melanoma cells adapted to growth at low pH: reversal by respiratory inhibitors.

[A case of chronic methyl bromide intoxication showing symmetrical lesions in the basal ganglia and brain stem on magnetic resonance imaging].

Modulatory effects of neonatal exposure to TCDD, or a mixture of PCBs, p,p'-DDT, and p,p'-DDE, on methylnitrosourea-induced mammary tumor development in the rat.

Identification of rab7 as a melanosome-associated protein involved in the intracellular transport of tyrosinase-related protein 1.

Differential effects of circulating IgA isolated from patients with IgA nephropathy on superoxide and fibronectin production of mesangial cells.

Teratogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice lacking the expression of EGF and/or TGF-alpha.

Hypoxia-inducible factor 1alpha and 1beta proteins share common signaling pathways in human prostate cancer cells.

Cardioprotective effect of propranolol from alcohol-induced heart muscle damage as assessed by plasma cardiac troponin-t.

Dietary exposure to 3,3',4,4',5-pentachlorobiphenyl (PCB 126) or 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) does not induce proliferation of squamous epithelium or osteolysis in the jaws of weanling rats.

Chronic toxicity of dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin to mink.

Arrest of rat molar tooth development by lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effects of chronic sodium azide on brain and muscle cytochrome oxidase activity: a potential model to investigate environmental contributions to neurodegenerative diseases.

[The changes of PCBs and PCDFs as well as symptoms in Yusho patients for 30 years].

Gene expression of insulin-like growth factor-1 and epidermal growth factor is downregulated in the heart of rats with nitrofen-induced diaphragmatic hernia.

Oral administration of dimethylarsinic acid, a main metabolite of inorganic arsenic, in mice promotes skin tumorigenesis initiated by dimethylbenz(a)anthracene with or without ultraviolet B as a promoter.

Analysis of gene expression induced by irritant and sensitizing chemicals using oligonucleotide arrays.

Fate of PCDF/PCB congeners and change of clinical symptoms in patients with Yusho PCB poisoning for 30 years.

Rhinotomy is disrupted during the re-innervation of the olfactory bulb that follows transection of the olfactory nerve.

Recent advances in arsenic carcinogenesis: modes of action, animal model systems, and methylated arsenic metabolites.

Comparative analysis of amyloid-beta chemical structure and amyloid plaque morphology of transgenic mouse and Alzheimer's disease brains.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on fetal mouse urinary tract epithelium in vitro.

[Chronic arsenicism].

Pesticide-related illness and injuries among banana workers in Costa Rica: a comparison between 1993 and 1996.

Toxicity of PCB-126 in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P4501A induction in several organ systems.

Effect of iron on the virulence of *Trichomonas vaginalis*.

Comparative biodistribution and metabolism of carbon-11-labeled N-[2-(dimethylamino)ethyl]acridine-4-carboxamide and DNA-intercalating analogues.

Association of reversible alopecia with occupational topical exposure to common borax-containing solutions.

Notification of occupational and work-related diseases and poisonings in Malaysia, 1997-1998.

Subchronic sodium chlorate exposure in drinking water results in a concentration-dependent increase in rat thyroid follicular cell hyperplasia.

A Kampo formulation: Byakko-ka-ninjin-to (Bai-Hu-Jia-Ren-Sheng-Tang) inhibits IgE-mediated triphasic skin reaction in mice: the role of its constituents in expression of the efficacy.

Squamous epithelial proliferation in the jaws of mink fed diets containing 3,3',4,4',5-pentachlorobiphenyl (PCB 126) or 2,3,7,8-tetrachlorodibenzo-P-dioxin (TCDD).

Effect of oral administration of excessive iron in adult ponies.

Dioxin exposure is an environmental risk factor for ischemic heart disease.

Successful repigmentation of six cases of herpes-labialis-induced lip leucoderma by micropigmentation.

Final report on the safety assessment of Juniperus communis Extract, Juniperus oxycedrus Extract, Juniperus oxycedrus Tar, Juniperus phoenicea extract, and Juniperus virginiana Extract.

Synthesis and evaluation of anticonvulsant activities of some new arylhexahydropyrimidine-2,4-diones.

Pesticides as a cause of occupational skin diseases in farmers.

The effect of beta-carotene on the expression of interleukin-6 and heme oxygenase-1 in UV-irradiated human skin fibroblasts in vitro.

Enhanced systemic tissue distribution after dermal versus intravenous 3,3',4,4'-tetrachlorobiphenyl exposure: limited utility of radiolabel blood area under the curve and excretion data in dermal absorption calculations and tissue exposure assessment.

Acute exposure to organochlorine pesticides does not affect striatal dopamine in mice.

Expression of human and mouse genes encoding polkappa: testis-specific developmental regulation and AhR-dependent inducible transcription.

Distinct pathways in the over-expression of matrix metalloproteinases in human fibroblasts by relaxation of mechanical tension.

Identification of the epidermal growth factor-like domains of thrombomodulin essential for the acceleration of thrombin-mediated inactivation of single-chain urokinase-type plasminogen activator.

Semi-solid-state fermentation of Eicchornia crassipes biomass as lignocellulosic biopolymer for cellulase and 3-glucosidase production by cocultivation of Aspergillus niger RK3 and Trichoderma reesei MTCC164.

Specific induction of metallothionein synthesis by mitochondrial oxidative stress.

Toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds.

UVA-340 as energy source, mimicking natural sunlight, activates the transcription factor AP-1 in cultured fibroblasts: evidence for involvement of protein kinase-C.

Allergenicity testing of supermethrin, phenoxyacetic acid and DNCB using in vivo and in vitro modifications of the local lymph node assays, maximization and epicutaneous testing.

Fusarium solani major allergen peptide IV-1 binds IgE but does not release histamine.

Skin surface electric potential induced by ion-flux through epidermal cell layers.

c-Jun N-terminal kinase activation by hydrogen peroxide in endothelial cells involves SRC-dependent epidermal growth factor receptor transactivation.

Requirement of chondroitin sulfate/dermatan sulfate recognition in midkine-dependent migration of macrophages.

Effects of environmental antiandrogens on reproductive development in experimental animals.

Polychlorinated biphenyls, polychlorinated dibenzo-p-dioxins, and polychlorinated dibenzofurans as endocrine disrupters--what we have learned from Yusho disease.

Toxicology of metam sodium.

Control of chemical risks during the treatment of soil contaminated with chlorophenol, creosote and copper-chrome-arsenic-wood preservatives.

Oxidative damage and direct adducts in calf thymus DNA induced by the pentachlorophenol metabolites, tetrachlorohydroquinone and tetrachloro-1,4-benzoquinone.

Quantitative exposure assessment: application of physiologically-based pharmacokinetic (PBPK) modeling of low-dose, long-term exposures of organic acid toxicant in the brain.

Acclimative changes in root epidermal cell fate in response to Fe and P deficiency: a specific role for auxin?

Survival and proliferation of alginate encapsulated Trichoderma spp. in Egyptian soil in comparison with allyl alcohol soil fumigation.

Metabolism of ochratoxin A: absence of formation of genotoxic derivatives by human and rat enzymes.

Inhalation toxicity studies of the alpha,beta-unsaturated ketones: 2-cyclohexene-1-one.

[Paraquat poisoning. A study of 29 cases and evaluation of the effectiveness of the "Caribbean scheme"].

Comparative toxicity of trivalent and pentavalent inorganic and methylated arsenicals in rat and human cells.

[Hypersensitivity vasculitis caused by the herbicide containing the isopropylamine salt of glyphosate].

Estrogen reduces acute striatal dopamine responses in vivo to the neurotoxin MPP+ in female, but not male rats.

Promotion of skin carcinogenesis by dimethylarsinic acid in keratin (K6)/ODC transgenic mice.

Comparison of mouse strains using the local lymph node assay.

Prolonged cholestasis after acute paraquat poisoning through skin absorption.

Safety evaluation and risk assessment of the herbicide Roundup and its active ingredient, glyphosate, for humans.

Cyanamide-induced liver dysfunction after abstinence in alcoholics: a long-term follow-up study on four cases.

Effects of L-2-oxothiazolidine-4-carboxylate on the cytotoxic activity and toxicity of cyclophosphamide in mice bearing B16F10 melanoma liver metastases.

Stimulated pulmonary cell hyperplasia underlies resistance to alpha-naphthylthiourea.

Mechanisms of toxicity, clinical features, and management of acute chlorophenoxy herbicide poisoning: a review.

The expression of surface markers on dendritic cells as indicators for the sensitizing potential of chemicals.

Human skin absorption and metabolism of the contact allergens, cinnamic aldehyde, and cinnamic alcohol.

The role of orally administered dimethylarsinic acid, a main metabolite of inorganic arsenics, in the promotion and progression of UVB-induced skin tumorigenesis in hairless mice.

The frequency of fragrance allergy in a patch-test population over a 17-year period.

New strategies in dandruff treatment: growth control of *Malassezia ovalis*.

Preliminary results on embryo rescue for circumventing hybridization barriers in *Asparagus*.

Automated In Vitro Dermal Absorption (AIVDA): predicting skin permeation of atrazine with finite and infinite (swimming/bathing) exposure models.

Metabolism of fluroxypyr, fluroxypyr methyl ester, and the herbicide fluroxypyr methylheptyl ester. II: in rat skin homogenates.

Metabolism of fluroxypyr, fluroxypyr methyl ester, and the herbicide fluroxypyr methylheptyl ester. I: during percutaneous absorption through fresh rat and human skin in vitro.

Contribution of planar (0-1 ortho) and nonplanar (2-4 ortho) fractions of Aroclor 1260 to the induction of altered hepatic foci in female Sprague-Dawley rats.

Teratological effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): induction of cleft palate in the ddY and C57BL/6 mouse.

The mercapturic acid biotransformation pathway of hexachlorobenzene is not involved in the induction of splenomegaly, or skin and lung lesions in the Brown Norway rat.

Partial characterization of an abundant human skin melanosomal 66 kDa protein (MP 66) and investigation to purify a similar protein from B16 murine melanoma tumours.

Induction of the stress response increases interleukin-6 production in the intestinal mucosa of endotoxaemic mice.

[Diagnosis of acute poisoning].

Induction of lung lesions in female rats following chronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Arsenic methylation capacity and skin cancer.

Punctate keratoderma-like lesions on the palms and soles in a patient with chloracne: a new clinical manifestation of dioxin intoxication?

Injection of iron compounds followed by induction of the stress response causes tissue injury and apoptosis.

Dose-response relationships for induction of CYP1A1 and CYP1A2 enzyme activity in liver, lung, and skin in female mice following subchronic exposure to polychlorinated biphenyls.

[Prophylaxis of anemia of prematurity with erythropoietin. Case control study].

Redistribution of accumulated 2,3,7,8-tetrachlorodibenzo-p-dioxin during coxsackievirus B3 infection in the mouse.

Quantitative analysis of tyrosinase transcripts in blood.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin induces developmental defects in the rat vagina.

Anaphylaxis to chlorhexidine. Case report. Implication of immunoglobulin E antibodies and identification of an allergenic determinant.

Arsenic and portal hypertension.

Airbag dermatitis.

Southeast Asia, promotability and dioxin's relationship to cancer incidence in operation ranch hand veterans.

Statistical analysis of skin tumor data from Tg.AC mouse bioassays.

Herbimycin A in the treatment of experimental proliferative vitreoretinopathy: toxicity and efficacy study.

Interaction of estradiol and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in an ovulation model: evidence for systemic potentiation and local ovarian effects.

Effect of CGS 26303, an endothelin-converting enzyme-neutral endopeptidase inhibitor, on nitrofen-induced congenital diaphragmatic hernia in the rat.

Diflubenzuron, a benzoyl-urea insecticide, is a potent inhibitor of TCDD-induced CYP1A1 expression in HepG2 cells.

Density-dependent growth of normal and nodular hepatocytes.

Human health effects after exposure to 2,3,7,8-TCDD.

Animal studies addressing the carcinogenicity of TCDD (or related compounds) with an emphasis on tumour promotion.

Photobiological properties of nabumetone (4-[6-methoxy-2-naphthalenyl]-2-butanone), a novel non-steroidal anti-inflammatory and analgesic agent.

Inhibition of UV irradiation-induced oxidative stress and apoptotic biochemical changes in human epidermal carcinoma A431 cells by genistein.

Improved selective, simple, and contrast staining of acidophilic neurons with vanadium acid fuchsin.

Toxicity of chronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in diethylnitrosamine-initiated ovariectomized rats implanted with subcutaneous 17 beta-estradiol pellets.

Expression of neuronal nitric oxide synthase/NADPH-diaphorase during olfactory deafferentation and regeneration.

Second primary neoplasms following non-Hodgkin's lymphoma in New South Wales, Australia.

Chemokine receptors CXCR-1/2 activate mitogen-activated protein kinase via the epidermal growth factor receptor in ovarian cancer cells.

Increase of specific symptoms after long-term use of chlorophenol polluted drinking water in a community.

Inhibition of irritation and contact hypersensitivity by phenoxyacetic acid methyl ester in mice.

Drug-induced oesophageal disorders: pathogenesis, incidence, prevention and management.

In vivo treatment of mutant FLT3-transformed murine leukemia with a tyrosine kinase inhibitor.

Toxic action/toxicity.

Differential effect of antiallergic drugs on IgE-mediated cutaneous reaction in passively sensitized mice.

Central nervous system toxicity and early peripheral neuropathy following dermal exposure to methyl bromide.

Infusion of total dose iron versus oral iron supplementation in ambulatory peritoneal dialysis patients: a prospective, cross-over trial.

Linking environmental cancer with occupational epidemiology research: the role of the International Agency for Research on Cancer (IARC).

The future relationship between the media, the food industry and the consumer.

Comparison of solvents for removing pesticides from skin using an in vitro porcine model.

Anti-tumor effect of N-beta-alanyl-5-S-glutathionyl dihydroxyphenylalanine (5-S-GAD), a novel anti-bacterial substance from an insect.

Fumigant-related illnesses: Washington State's five-year experience.

A role for MHR1, a gene required for mitochondrial genetic recombination, in the repair of damage spontaneously introduced in yeast mtDNA.

[Hand injuries caused by self-made bombs. Observations and reconstructoin techniques. Report of 7 cases].

A laboratory comparison of two media for use in the assessment of dermal exposure to pesticides.

Estrogen modulation of prolactin gene expression requires an intact mitogen-activated protein kinase signal transduction pathway in cultured rat pituitary cells.

Chronic toxicity of arsenic in goats: clinicobiochemical changes, pathomorphology and tissue residues.

Gag3p, an outer membrane protein required for fission of mitochondrial tubules.

Air bag injury and the dermatologist.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of different cytotoxins on cytochrome P450 isoforms expression and on glycogen content.

Somatic embryogenesis induced by the simple application of abscisic acid to carrot (*Daucus carota* L.) seedlings in culture.

Pamlin-induced tyrosine phosphorylation of SUP62 protein in primary mesenchyme cells during early embryogenesis in the sea urchin, *Hemicentrotus pulcherrimus*.

Effect of O6-benzylguanine on alkylating agent-induced toxicity and mutagenicity. In Chinese hamster ovary cells expressing wild-type and mutant O6-alkylguanine-DNA alkyltransferases.

Hemodynamic dysfunction and cytochrome P4501A mRNA expression induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin during embryonic stages of lake trout development.

Toxicity of TCDD in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P450 1A induction in several organ systems.

Pathologic alterations in adult rainbow trout, *Oncorhynchus mykiss*, exposed to dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Characterization of cardiotoxicity induced by 2,3,7, 8-tetrachlorodibenzo-p-dioxin and related chemicals during early chick embryo development.

Structure-activity relationships in the induction of DNA-protein cross-links by hematotoxic ring-opened benzene metabolites and related compounds in HL60 cells.

Morphohistological study of the different constituents of a banana (*Musa AAA*, cv. Grande naine) embryogenic cell suspension.

Molecular characterization and developmental expression of the aryl hydrocarbon receptor from the chick embryo.

Pathological lesions in lambs fed raw or processed cottonseed meal.

Transforming growth factor-alpha-mediated growth pathways in human gastro-intestinal cell lines in relation to the gastrin autocrine pathway.

Occupational fatalities associated with 2,4-dichlorophenol (2,4-DCP) exposure, 1980-1998.

Gonadotropin-releasing hormone (GnRH) partially reverses the inhibitory effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on ovulation in the immature gonadotropin-treated rat.

Cytotoxicity and keratinocyte microsome-mediated mutagenic activation of carcinogens in cultured epidermal cells.

Dermal penetration and metabolism of five glycidyl ethers in human, rat and mouse skin.

Effect of gestational and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on the level and catalytic activities of hepatic microsomal CYP1A in prepubertal and adult rats.

Sodium arsenite-induced dysregulation of proteins involved in proliferative signaling.

Time course of arsenite-induced copper accumulation in rat kidney.

Dermal absorption and tissue disposition of 3,3',4,4'-tetrachlorobiphenyl (TCB) in an ex-vivo pig model: assessing the impact of dermal exposure variables.

Toxicology of environmental chemicals in the flounder (*Platichthys flesus*) with emphasis on the immune system: field, semi-field (mesocosm) and laboratory studies.

NTP Toxicology and Carcinogenesis Studies of Pyridine (CAS No. 110-86-1) in F344/N Rats, Wistar Rats, and B6C3F1 Mice (Drinking Water Studies).

Angiotensin II stimulates endothelial vascular cell adhesion molecule-1 via nuclear factor-kappaB activation induced by intracellular oxidative stress.

The role of protein-tyrosine phosphorylation and gelatinase production in the migration and proliferation of smooth muscle cells.

Attraction of immature stages of the American dog tick (*Dermacentor variabilis*) to 2,6-dichlorophenol.

Experimental exposure of rat skin to methyl bromide: a toxicokinetic and histopathological study.

Preparation of oligomeric beta-glycosides from cellulose and hemicellulosic polysaccharides via the glycosyl transferase activity of a *trichoderma reesei* cellulase.

Delamination and tyrosine phosphorylation of SUp62 during early embryogenesis of sea urchin.

Signaling regulation for synergistic effects of substance P and insulin-like growth factor-1 or epidermal growth factor on corneal epithelial migration.

Lichenoid drug eruption due to cyanamide.

Multiple logistic regression analysis of plasma paraquat concentrations as a predictor of outcome in 375 cases of paraquat poisoning.

Fragrance and contact allergens in vitro modulate the HLA-DR and E-cadherin expression on human epidermal Langerhans cells.

Human isolated airway contraction: interaction between air pollutants and passive sensitization.

Role of glutathione S-transferase 8-8 in allylamine resistance of vascular smooth muscle cells in vitro.

Homicide by paraquat poisoning.

An ecological risk assessment for the use of Irgarol 1051 as an algaecide for antifoulant paints.

Occupational risk factors for sarcoma subtypes.

Toxic action of the herbicide 2,4-D on the neuroepithelial synapse and on the nonstimulated skin of the frog *Caudiverbera caudiverbera*.

Positive correlation between mammalian life span and cellular resistance to stress.

Eczematous erythroderma induced by cyanamide.

Administration of potentially antiandrogenic pesticides (procymidone, linuron, iprodione, chlozolinate, p,p'-DDE, and ketoconazole) and toxic substances (dibutyl- and diethylhexyl phthalate, PCB 169, and ethane dimethane sulphonate) during sexual differentiation produces diverse profiles of reproductive malformations in the male rat.

Fragrance sensitivity in allergic contact dermatitis.

SODs are involved in the regulation of ICAM-1 expression in human melanoma and endothelial cells.

In vitro and in vivo comparison between the effects of treatment with adenosine triphosphate and treatment with buthionine sulfoximine on chemosensitization and tumour growth of B16 melanoma.

Evidence for site-specific bioactivation of alachlor in the olfactory mucosa of the Long-Evans rat.

Pentachlorophenol (PCP) produces liver oxidative stress and promotes but does not initiate hepatocarcinogenesis in B6C3F1 mice.

Regulation of human airway mucins by acrolein and inflammatory mediators.

Protein-bound acrolein: a novel marker of oxidative stress in Alzheimer's disease.

Effects of natural and synthetic auxins on the gravitropic growth habit of roots in two auxin-resistant mutants of *Arabidopsis*, *axr1* and *axr4*: evidence for defects in the auxin influx mechanism of *axr4*.

The p66shc adaptor protein controls oxidative stress response and life span in mammals.

Daily injections of cyanamide enhance both ethanol-induced locomotion and brain catalase activity.

HPLC-accelerator MS measurement of atrazine metabolites in human urine after dermal exposure.

Effects of secretable SOD delivered by genetically modified cells on xanthine/xanthine oxidase and paraquat-induced cytotoxicity in vitro.

Reactive oxygen species participate in *mdr1b* mRNA and P-glycoprotein overexpression in primary rat hepatocyte cultures.

The effects of superoxide and the peripheral benzodiazepine receptor ligands on the mitochondrial processing of manganese-dependent superoxide dismutase.

Role of 1,N²-propanodeoxyguanosine adducts as endogenous DNA lesions in rodents and humans.

Effect of Shimotsu-to (a Kampo medicine, Si-Wu-Tang) and its constituents on triphasic skin reaction in passively sensitized mice.

Study of the photochemical and in vitro phototoxicity of chlortalidone [2-chloro-5-(1-hydroxy-3-oxo-1-isoindolinyl)benzene sulfonamide].

Acute arsenic poisoning: clinical and histopathological features.

In vitro phototoxicity of new quinolones: production of active oxygen species and photosensitized lipid peroxidation.

[Biological actions of acetaldehyde].

Skeletal malformations associated with congenital diaphragmatic hernia: experimental and human studies.

Effect of prenatal exposure to TCDD on the promotion of endometriotic lesion growth by TCDD in adult female rats and mice.

Antimutagenic effects of centchroman--a contraceptive and a candidate drug for breast cancer in multiple mutational assays.

Blood lipid concentrations of dioxins and dibenzofurans causing chloracne.

Reinnervation of the rat olfactory bulb after methyl bromide-induced lesion: timing and extent of reinnervation.

Connective tissue responses to calcium hydroxide-based root canal medicaments.

Pheomelanin as a binding site for drugs and chemicals.

Altered *bcl-2* family expression during non-genotoxic hepatocarcinogenesis in mice.

Arsenic-related Bowen's disease, palmar keratosis, and skin cancer.

Regulation of matrix metalloproteinase-2 (MMP-2) by hepatocyte growth factor/scatter factor (HGF/SF) in human glioma cells: HGF/SF enhances MMP-2 expression and activation accompanying up-regulation of membrane type-1 MMP.

PUVA (8-methoxy-psoralen plus ultraviolet A) induces the formation of 8-hydroxy-2'-deoxyguanosine and DNA fragmentation in calf thymus DNA and human epidermoid carcinoma cells.

Hypoxia potentiates ultraviolet A-induced riboflavin cytotoxicity.

A chimeric aryl hydrocarbon receptor knockout mouse model indicates that aryl hydrocarbon receptor activation in hematopoietic cells contributes to the hepatic lesions induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Geographical differences of cancer incidence in Costa Rica in relation to environmental and occupational pesticide exposure.

Irritant contact dermatitis caused by methyl iodide.

Serum dioxin and immunologic response in veterans of Operation Ranch Hand.

Heart hypoplasia in experimental congenital diaphragmatic hernia.

Influence of phosphotyrosine kinase inhibitors on adhesive properties of highly and poorly metastatic HT-29 colon carcinoma cells to collagen.

Serum dioxin and cancer in veterans of Operation Ranch Hand.

Induction of altered hepatic foci by a mixture of dioxin-like compounds with and without 2,2',4,4',5,5'-hexachlorobiphenyl in female Sprague-Dawley rats.

Energy metabolism inhibition impairs amyloid precursor protein secretion from Alzheimer's fibroblasts.

Cytochrome P450 CYP1B1 determines susceptibility to 7,12-dimethylbenz[a]anthracene-induced lymphomas.

Recombinant human erythropoietin alpha in the correction of anaemia in epidermolysis bullosa.

[Oxidative injury and its defense system in vivo].

Phototoxicity of quinalphos under sunlight in vitro and in vivo.

The potential role of environmental toxins in the pathophysiology of endometriosis.

Long-pulse dye laser for photodynamic therapy: investigations in vitro and in vivo.

Inhibitory mechanisms of glycoprotein fraction derived from *Miscanthus sinensis* for the immediate phase response of an IgE-mediated cutaneous reaction.

Effect of overproduction of interleukin 5 on dinitrofluorobenzene-induced allergic cutaneous response in mice.

Direct somatic embryogenesis on leaf explants of *Oncidium Gower Ramsey* and subsequent plant regeneration.

NTP Toxicology and Carcinogenesis Studies of Triethanolamine (CAS No. 102-71-6) in F344 Rats and B6C3F1 Mice (Dermal Studies).

Anaphylaxis inhibitory factor in IgE-dependent mast cell stimulation.

The EL sampler: a press sampler for the quantitative estimation of dermal exposure to pesticides in housedust.

Effects of an environmental endocrine disruptor on fetal development, estrogen receptor(alpha) and epidermal growth factor receptor expression in the porcine male genital tract.

Expression and activity of cyclic and linear analogues of esculentin-1, an anti-microbial peptide from amphibian skin.

Effects of dexamethasone, growth factors, and tracheal ligation on the development of nitrofen-exposed hypoplastic murine fetal lungs in organ culture.

Suppression of sclerotinia stem rot of soybean by lactofen herbicide treatment.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of various mitogens and cytotoxins on cytochrome P450 (P450) isoforms expression and on P450 mediated monooxygenase functions.

Role of O6-alkylguanine-DNA alkyltransferase in protecting against cyclophosphamide-induced toxicity and mutagenicity.

MAP kinase-independent induction of proto-oncogene c-fos mRNA by hemin in human cells.

Arsenic toxicity and accumulation in turnip as affected by arsenic chemical speciation.

Singlet oxygen mediates the UVA-induced generation of the photoaging-associated mitochondrial common deletion.

The effect of EGF on electrolyte transport is mediated by tyrosine kinases in the rabbit cortical collecting duct.

Involvement of tyrosine kinases on cyclooxygenase expression and prostaglandin E2 production in human gingival fibroblasts stimulated with interleukin-1beta and epidermal growth factor.

NTP Toxicology and Carcinogenesis Studies of Pentachlorophenol (CAS NO. 87-86-5) in F344/N Rats (Feed Studies).

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-mediated membrane translocation of c-Src protein kinase in liver WB-F344 cells.

Carbonyl stress in the pathogenesis of diabetic nephropathy.

Immunohistochemical evidence for an increased oxidative stress and carbonyl modification of proteins in diabetic glomerular lesions.

Inhibition of protoporphyrinogen oxidase expression in Arabidopsis causes a lesion-mimic phenotype that induces systemic acquired resistance.

Induction of collagenase-3 (MMP-13) expression in human skin fibroblasts by three-dimensional collagen is mediated by p38 mitogen-activated protein kinase.

[Genetic algorithms in 3D-QSAR: Predicting the toxicity of dibenzodioxins, dibenzofurans and biphenyls].

Promotion of NCI-Black-Reiter male rat bladder carcinogenesis by dimethylarsinic acid an organic arsenic compound.

Behavioral responses to atrazine and diuron in goldfish.

Acute 2,4-D poisoning in tench (*Tinca tinca* L.): lesions in the hematopoietic portion of the kidney.

The role of glutathione S-transferases as a defense against reactive electrophiles in the blood vessel wall.

From toxicological problem to therapeutic use: the discovery of the mode of action of 2-(2-nitro-4-trifluoromethylbenzoyl)-1,3-cyclohexanedione (NTBC), its toxicology and development as a drug.

The organochlorine herbicide chloridazon interacts with cell membranes.

Temporal stability of local lymph node assay responses to hexyl cinnamic aldehyde.

The reproductive toxicity of molinate and metabolites to the male rat: effects on testosterone and sperm morphology.

Airborne contact dermatitis from cacodylic acid.

Involvement of oxidative stress in paraquat-induced metallothionein synthesis under glutathione depletion.

Malicious paraquat poisoning in Oklahoma dogs.

Clinical experience with pendimethalin (STOMP) poisoning in Taiwan.

Dermatotoxicity of agricultural chemicals in the dorsal skin of hairless dogs.

Molinate: rodent reproductive toxicity and its relevance to humans--a review.

Testicular toxicity of molinate in the rat: metabolic activation via sulfoxidation.

Allergic contact dermatitis from ethoxymethylenemalononitrile in an agrochemical chemist.

Acute 2,4-dichlorophenoxyacetic acid intoxication in broiler chicks.

Paraquat poisoning: an experimental model of dose-dependent acute lung injury due to surfactant dysfunction.

Augmentation of allergic reactions by several pesticides.

Susceptibility to skin stinging, non-immunologic contact urticaria and acute skin irritation; is there a relationship?

Evaluation of the genotoxic properties of paraquat in V79 Chinese hamster cells.

Cytoplasmic liver cell inclusions--a typical feature of porphyria cutanea tarda--are absent in porphyria-related hepatic neoplasias.

The utility of patch tests using larger screening series of allergens.

Chloracne and morbidity after dioxin exposure (preliminary results).

A morbidity study of former pentachlorophenol-production workers.

Comparison of sex differences in guinea-pig maximization test for detection of skin-sensitizing potential using OECD recommended positive control sensitizers.

Protein-bound acrolein: potential markers for oxidative stress.

Deodorants on the European market: quantitative chemical analysis of 21 fragrances.

Analytical performance of accelerator mass spectrometry and liquid scintillation counting for detection of ¹⁴C-labeled atrazine metabolites in human urine.

Drinking patterns in genetic low-alcohol-drinking (LAD) rats after systemic cyanamide and cerebral injections of THP or 6-OHDA.

Differential role of catalase and glutathione peroxidase in cultured human fibroblasts under exposure of H₂O₂ or ultraviolet B light.

Gastric and intestinal ethanol toxicity in the rat. Effect on glutathione level and role of alcohol and acetaldehyde metabolisms.

Concentrated cresol intoxication.

Clinical morphology of sodium lauryl sulfate (SLS) and nonanoic acid (NAA) irritant patch test reactions at 48 h and 96 h in 152 subjects.

Molecular and functional aspects of the hairless (hr) gene in laboratory rodents and humans.

S 18126 ([2-[4-(2,3-dihydrobenzo[1,4]dioxin-6-yl)piperazin-1-yl methyl]indan-2-yl]), a potent, selective and competitive antagonist at dopamine D₄ receptors: an in vitro and in vivo comparison with L 745,870 (3-(4-[4-chlorophenyl]piperazin-1-yl)methyl-1H-pyrrolo[2, 3b]pyridine) and raclopride.

Epidermal Langerhans cell apoptosis is induced in vivo by nonanoic acid but not by sodium lauryl sulphate.

A case-control study of occupational and environmental risk factors for Parkinson's disease in the Emilia-Romagna region of Italy.

Cardiac teratogenicity of trichloroethylene metabolites.

Alterations in the growth factor signal transduction pathways and modulators of the cell cycle in endocervical cells from macaques exposed to TCDD.

Inhibition of guinea pig skin allergic reactions by nonpeptide bradykinin B₂ receptor antagonist FR173657.

P-selectin mediates adhesion of the human melanoma cell line NKI-4: identification of glycoprotein ligands.

Benzo[a]pyrene enhances the formation of 8-hydroxy-2'-deoxyguanosine by ultraviolet A radiation in calf thymus DNA and human epidermoid carcinoma cells.

Atherosclerotic risks from chemicals: part II. A RASH analysis of in vitro and in vivo bioassay data to evaluate 45 potentially hazardous compounds.

Contact sensitivity to chromate: comparison at a London contact dermatitis clinic over a 10-year period.

Suppression of decorin expression and partial induction of anchorage-independent growth by the v-src oncogene in human fibroblasts.

Reproductive toxicity and tissue concentrations of low doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin in male offspring rats exposed throughout pregnancy and lactation.

A novel dosage approach for evaluation of SMANCS [poly-(styrene-co-maleyl-half-n-butylate) - neocarzinostatin] in the treatment of primary hepatocellular carcinoma.

Oral teratogenicity studies of methyl bromide in rats and rabbits.

Respiratory and cardiovascular effects of the mu-opioid receptor agonist [Lys7]dermorphin in awake rats.

Effect of *Rehmannia glutinosa* on immediate type allergic reaction.

Interruption of estradiol signal transduction by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) through disruption of the protein phosphorylation pathway in adipose tissues from immature and mature female rats.

Epidermal growth factor protects neuronal cells in vivo and in vitro against transient forebrain ischemia- and free radical-induced injuries.

Abnormality in catalase import into peroxisomes leads to severe neurological disorder.

Plasma hydrogen peroxide production in hypertensives and normotensive subjects at genetic risk of hypertension.

Tyrosine kinase-dependent modulation of 3-hydroxy-3-methylglutaryl-CoA reductase in human breast adenocarcinoma SKBR-3 cells.

Effective utilization of erythropoietin with intravenous iron therapy.

Cancer chemopreventive and therapeutic activities of red ginseng.

Differential induction of Cyp1a1, Cyp1b1, Ahd4, and Nmo1 in murine skin tumors and adjacent normal epidermis by ligands of the aryl hydrocarbon receptor.

A27L protein mediates vaccinia virus interaction with cell surface heparan sulfate.

Activation of beta1 integrin signaling stimulates tyrosine phosphorylation of p190RhoGAP and membrane-protrusive activities at invadopodia.

Chemical warfare agents: estimating oral reference doses.

Possible role of nitric oxide in IgE-mediated allergic cutaneous reaction in mice.

Epidermal growth factor receptor as a mediator of developmental toxicity of dioxin in mouse embryonic teeth.

Adult olfactory epithelium contains multipotent progenitors that give rise to neurons and non-neural cells.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazoxybenzene (CAS No. 21232-47-3) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

Cytochrome P450 1B1: a major P450 isoenzyme in human blood monocytes and macrophage subsets.

Toxicokinetics of an environmentally relevant mixture of dioxin-like PHAHs with or without a non-dioxin-like PCB in a semi-chronic exposure study in female Sprague Dawley rats.

Effect of herbimycin A on tyrosine kinase receptors and platelet derived growth factor (PDGF)-induced signal transduction.

Unequal divisions at the third cleavage increase the number of primary mesenchyme cells in sea urchin embryos.

Differential regulation of potassium currents by FGF-1 and FGF-2 in embryonic *Xenopus laevis* myocytes.

Heparan sulfate proteoglycans control intracellular processing of bFGF in vascular smooth muscle cells.

In vivo percutaneous absorption of boric acid, borax, and disodium octaborate tetrahydrate in humans compared to in vitro absorption in human skin from infinite and finite doses.

Capillary gas chromatographic assay of camphor and m-cresol in dermatological creams.

Regulation of BMP7 expression during kidney development.

Investigations of the pathways of toxicity of methyl iodide in the rat nasal cavity.

Cytotoxic effects and induction of cytochromes P450 1A1/2 by insecticides, in hepatic or epidermal cells: binding capability to the Ah receptor.

Ah receptor, ARNT, glucocorticoid receptor, EGF receptor, EGF, TGF alpha, TGF beta 1, TGF beta 2, and TGF beta 3 expression in human embryonic palate, and effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Ultrastructural apoptotic lesions induced in rat thymocytes after borax ingestion.

Human in vivo and in vitro hydroquinone topical bioavailability, metabolism, and disposition.

Development of a model for classification of toxin-induced lesions using ¹H NMR spectroscopy of urine combined with pattern recognition.

The role of glutathione S-transferase- and cytochrome P450-dependent metabolism in the olfactory toxicity of methyl iodide in the rat.

Suppression of immunoglobulin E-mediated anaphylactic reaction by Hwanglyun-Haedok-Tang water extract.

Treatment of rats during pubertal development with 2,3,7,8-tetrachlorodibenzo-p-dioxin alters both signaling kinase activities and epidermal growth factor receptor binding in the testis and the motility and acrosomal reaction of sperm.

Characterization of glycerol uptake and glycerol kinase activity in rat hepatocytes cultured under different hormonal conditions.

A selective historical review of congener-specific human tissue measurements as sensitive and specific biomarkers of exposure to dioxins and related compounds.

Analysis of matrix protein components of the dermis-like structure formed in a long-term culture of human fibroblasts: type VI collagen is a major component.

The effects of serum iminodipeptides and prednisolone on superoxide generation and tyrosyl phosphorylation of proteins in neutrophils from a patient with prolidase deficiency.

Biological characterization of human fibroblast-derived mitogenic factors for human melanocytes.

1,N²-propanodeoxyguanosine adducts: potential new biomarkers of smoking-induced DNA damage in human oral tissue.

Comparative toxicology of borates.

In vitro percutaneous absorption of boron as boric acid, borax, and disodium octaborate tetrahydrate in human skin: a summary.

Endogenous and exogenous DNA lesions recognized by N-alkylpurine-DNA glycosylases.

Use of c-Src and c-Fos knockout mice for the studies on the role of c-Src kinase signaling in the expression of toxicity of TCDD.

Respiratory symptoms, spirometry and chronic occupational paraquat exposure.

Promotion of rat hepatocarcinogenesis by dimethylarsinic acid: association with elevated ornithine decarboxylase activity and formation of 8-hydroxydeoxyguanosine in the liver.

Unintentional fatal paraquat poisonings among agricultural workers in Costa Rica: report of 15 cases.

Cyanamide-induced granulocytopenia.

Possible carcinogenic potential of dimethylarsinic acid as assessed in rat in vivo models: a review.

Occupational allergic contact dermatitis from 2-tert-butylamino-4-cyclopropylamino-6-methylthio-1,3,5-triazine.

Characterization of risks associated with the use of molinate.

Occupational depigmentation from dinoterbe.

Effects of dichlobenil on ultrastructural morphology and cell replication in the mouse olfactory mucosa.

In vitro cytotoxic effects of 4,4'-bipyridyl on normal human keratinocytes.

Inhibition of intracellular Ca²⁺ signalling, cytotoxicity and antitumor activity of the herbicide oryzalin and its analogues.

[Ultrastructure of the kidney in paraquat-poisoned rats. Comparative study with literature data on man and animal].

Drug eruption induced by cyanamide (carbimide): a clinical and histopathologic study of 7 patients.

Comparative ³²P-postlabeling analysis of exogenous and endogenous DNA adducts in mouse skin exposed to a wood-preserving waste extract, a complex mixture of polycyclic and polychlorinated chemicals.

Comparative pharmacokinetics of [¹⁴C]metosulam (N-[2,6-dichloro-3-methylphenyl]-5,7-dimethoxy-1,2,4-triazolo[1,5a]-pyrimidine-2-sulfonamide) in rats, mice and dogs.

Inhibition of sulfotransferase affecting in vivo genotoxicity and DNA adducts induced by safrole in rat liver.

Pentachlorophenol dermal absorption and disposition from soil in swine: effects of occlusion and skin microorganism inhibition.

[Effect of activity of semicarbazide-sensitive aminooxidases and cellular glutathione on the cytotoxic effect of allylamine, acrolein, and formaldehyde in human cultured endothelial cells].

Hydrogen peroxide (H₂O₂) increases the steady-state mRNA levels of collagenase/MMP-1 in human dermal fibroblasts.

Mustard oil and garlic extract as inhibitors of sodium arsenite-induced chromosomal breaks in vivo.

Failure of monochloroacetic acid and trichloroacetic acid administered in the drinking water to produce liver cancer in male F344/N rats.

From discovery to eradication of schistosomiasis in Japan: 1847-1996.

Allergy to cocamidopropyl betaine may be due to amidoamine: a patch test and product use test study.

Evidence that singlet oxygen-induced human T helper cell apoptosis is the basic mechanism of ultraviolet-A radiation phototherapy.

Sodium arsenite disturbs mitosis and induces chromosome loss in human fibroblasts.

Promotion of enzyme altered foci in female rat 2,3,3',4,4',5-hexachlorobiphenyl.

Evidence for protein dolichylation.

FK-506 and cyclosporin A potentiate the IgE antibody production by contact sensitization with hapten in mice.

Study of the enzymatic transformation of fluorescently labeled oligosaccharides in human epidermoid cells using capillary electrophoresis with laser-induced fluorescence detection.

2,3,7,8-Tetrachlorodibenzo-p-dioxin increases mRNA levels for interleukin-1beta, urokinase plasminogen activator, and tumor necrosis factor-alpha in human uterine endometrial adenocarcinoma RL95-2 cells.

[Acute myeloblastic leukemia showing pronounced skin infiltration during administration of low-dose cytarabine and etoposide with granulocyte colony-stimulating factor].

Effects of the protein tyrosine kinase inhibitor, herbimycin A, on prolactin gene expression in GH3 and 235-1 pituitary tumor cells.

Inhibition of clastogenic effects of arsenic through continued oral administration of garlic extract in mice in vivo.

Determination of the p-monochlorophenol residue in the calcium hydroxide + P-monochlorophenol combination used as an intracanal dressing in pulpless teeth of dogs with induced chronic periapical lesion.

Cross-reaction patterns in patients with contact allergy to simple methylol phenols.

Upregulation of acidic fibroblast growth factor during development of experimental lung fibrosis.

Serum beta-carotene level, arsenic methylation capability, and incidence of skin cancer.

Activity and inducibility of drug-metabolizing enzymes in immortalized hepatocyte-like cells (mhPKT) derived from a L-PK/Tag1 transgenic mouse.

Differential vulnerability of the CA1 and CA3 subfields of the hippocampus to superoxide and hydroxyl radicals in vitro.

Promotion of endometriosis in mice by polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls.

A novel derivatization of phenol after extraction from human serum using perfluorooctanoyl chloride for gas chromatography-mass spectrometric confirmation and quantification.

Isolation of three contiguous genes, ACR1, ACR2 and ACR3, involved in resistance to arsenic compounds in the yeast *Saccharomyces cerevisiae*.

[Randomized multi-center trial of the administration of erythropoietin in anemia of prematurity].

Effect of hepatic methyl donor status on urinary excretion and DNA damage in B6C3F1 mice treated with sodium arsenite.

Spontaneous and induced sister chromatid exchanges and delayed cell proliferation in peripheral lymphocytes of Bowen's disease patients and matched controls of arseniasis-hyperendemic villages in Taiwan.

Cytogenetic effects in human exposure to arsenic.

Arsenic can mediate skin neoplasia by chronic stimulation of keratinocyte-derived growth factors.

Carcinogenic polycyclic aromatic hydrocarbons increase intracellular Ca²⁺ and cell proliferation in primary human mammary epithelial cells.

Downregulation of aryl hydrocarbon receptor function and cytochrome P450 1A1 induction by expression of Ha-ras oncogenes.

Mortality among Army Chemical Corps Vietnam veterans.

Altered in vivo toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C-SRC deficient mice.

Hyporesponsiveness of inflamed human gingival fibroblasts from patients with chronic periodontal diseases against cell surface components of *Porphyromonas gingivalis*.

Some peculiarities of hepatobiliary diseases in Vietnam.

Role of cytochrome P450 enzyme induction in the metabolic activation of benzo[c]phenanthrene in human cell lines and mouse epidermis.

Mechanism of inhibition of MDA-MB-468 breast cancer cell growth by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Cell adhesion molecules and insulin-like growth factor-1 in vascular disease.

Tyrosine kinase signaling pathways control the expression of retinoic acid receptor-alpha in SK-BR-3 breast cancer cells.

Skin reactions to pesticides.

Activation of mitogenic signaling by endothelin 1 in ovarian carcinoma cells.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) affects keratin 1 and keratin 17 gene expression and differentially induces keratinization in hairless mouse skin.

Selected other effects and TEFs.

Acute work-related poisoning by pesticides in The Netherlands; a one year follow-up study.

Regulation of the release of tumour necrosis factor (TNF)alpha and soluble TNF receptor by gamma irradiation and interferon gamma in Ewing's sarcoma/peripheral primitive neuroectodermal tumour cells.

Altered profile of urinary arsenic metabolites in adults with chronic arsenicism. A pilot study.

Continuous exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin inhibits the growth of surgically induced endometriosis in the ovariectomized mouse treated with high dose estradiol.

Early life stage toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in zebrafish (*Danio rerio*).

Dose-response relationships for polyhalogenated dioxins and dibenzofurans following subchronic treatment in mice. I. CYP1A1 and CYP1A2 enzyme activity in liver, lung, and skin.

Inhibitory effects of genistein on ATP-sensitive K⁺ channels in rabbit portal vein smooth muscle.

Odorant threshold following methyl bromide-induced lesions of the olfactory epithelium.

[Activation of skin cells by inorganic compounds].

Percutaneous penetration of 2-phenoxyethanol through rat and human skin.

There is temporal and spatial expression of alpha1 (IV), alpha2 (IV), alpha5 (IV), alpha6 (IV) collagen chains and beta1 integrins during the development of the basal lamina in an "in vitro" skin model.

Singlet oxygen is an early intermediate in cytokine-dependent ultraviolet-A induction of interstitial collagenase in human dermal fibroblasts in vitro.

In vitro dermal absorption of two commercial formulations of 2,4-dichlorophenoxyacetic acid dimethylamine (2,4-D amine) in rat, guinea pig and human skin.

Comparative biochemical analysis of sea urchin peristome and rat tail tendon collagen.

Singlet oxygen mediates the activation of JNK by UVA radiation in human skin fibroblasts.

Mobilization of iron from neoplastic cells by some iron chelators is an energy-dependent process.

Effects of TCDD on Ah receptor, ARNT, EGF, and TGF-alpha expression in embryonic mouse urinary tract.

Interleukin-2 increases intracellular glutathione levels and reverses the growth inhibiting effects of cyclophosphamide on B16 melanoma cells.

Inflammatory damage to skin by prolonged contact with 1,2-dichlorobenzene and chloropentafluorobenzene.

Effect of cell density and epidermal growth factor on the inducible expression of CYP3A and CYP1A genes in human hepatocytes in primary culture.

Can skin cancer in humans be prevented by alleviation of oxidative stress?

Cytochrome P450 isoenzyme activities in cultured rat and mouse liver slices.

Correlation of 2,3,7,8-tetrachlorodibenzo-p-dioxin induction of cytochrome P4501A in vascular endothelium with toxicity in early life stages of lake trout.

Increase of glycocalyx and altered lectin agglutination profiles of *Pasteurella haemolytica* A1 after incubation in bovine subcutaneous tissue chambers in vivo or in ruminant serum in vitro.

Effects of acute and chronic arsenic exposure of human-derived keratinocytes in an In Vitro human skin equivalent system: a novel model of human arsenicism.

Cryptic gonadotropin-releasing hormone receptors of rat pituitary cells in culture are unmasked by epidermal growth factor.

Nitric oxide decreases intestinal haemorrhagic lesions in rat anaphylaxis independently of mast cell activation.

[Urinary sulfates as a biologic indicator of exposure to methylsulfate compounds in manufacture of sulfate cellulose].

An assessment of boric acid and borax using the IEHR Evaluative Process for Assessing Human Developmental and Reproductive Toxicity of Agents. Expert Scientific Committee.

[Lesions of the tracheobronchial tree after the aspiration of a tablet of ferrous sulfate].

Selected lesions of dioxin in laboratory rodents.

Allergic contact dermatitis from norflurazon (Predict).

Cross-reactions in patch testing and photopatch testing with ketoprofen, thiaprophenic acid, and cinnamic aldehyde.

Histological changes in rat embryonic blood cells as a possible mechanism for ventricular septal defects produced by an N-phenylimide herbicide.

Promoting effects of dimethylarsinic acid on N-butyl-N-(4-hydroxybutyl)nitrosamine-induced urinary bladder carcinogenesis in rats.

In vivo percutaneous absorption of acetochlor in the rhesus monkey: dose-response and exposure risk assessment.

Subchronic, developmental, and genetic toxicology studies with the ethane sulfonate metabolite of alachlor.

Acute, subchronic and chronic 2,4-dichlorophenoxyacetic acid (2,4-D) intoxication in rats.

Photodermatitis from plant derivatives in topical and oral medicaments.

Experimental ureterohydronephrosis in fetal rats.

In vitro percutaneous absorption of model compounds glyphosate and malathion from cotton fabric into and through human skin.

Effect of soil loading on dermal absorption efficiency from contaminated soils.

Threshold responses in cinnamic-aldehyde-sensitive subjects: results and methodological aspects.

Effects of paraquat on the substantia nigra of the wistar rats: neurochemical, histological, and behavioral studies.

Overexpression of a Rrp1 transgene reduces the somatic mutation and recombination frequency induced by oxidative DNA damage in *Drosophila melanogaster*.

Detection of 1, N2-propanodeoxyguanosine adducts as potential endogenous DNA lesions in rodent and human tissues.

Developmental and dysmorphogenic effects of glufosinate ammonium on mouse embryos in culture.

DNA damage induced in mouse tissues by organic wood preserving waste extracts as assayed by 32P-postlabeling.

Characterization of olfactory deficits in the rat following administration of 2,6-dichlorobenzonitrile (dichlobenil), 3,3'-iminodipropionitrile, or methimazole.

Inhibition of glutathione S-transferase activity in human melanoma cells by alpha,beta-unsaturated carbonyl derivatives. Effects of acrolein, cinnamaldehyde, citral, crotonaldehyde, curcumin, ethacrynic acid, and trans-2-hexenal.

An interlaboratory evaluation of the Buehler test for the identification and classification of skin sensitizers.

The area postrema is involved in paraquat-induced conditioned aversion behavior and neuroendocrine activation of the hypothalamic-pituitary-adrenal axis.

Cancer incidence in the rural community of Tecumseh, Michigan: a pattern of increased lymphopoietic neoplasms.

A maternal requirement for glutamine synthetase I for the mitotic cycles of syncytial *Drosophila* embryos.

Identification of a novel growth-promoting factor with a wide target cell spectrum from various tumor cells as catalase.

Assessment of the biochemical effects of percutaneous exposure of sulphur mustard in an in vitro human skin system.

Percutaneous absorption of 2,4-dichlorophenoxyacetic acid from soil with respect to soil load and skin contact time: in vivo absorption in rhesus monkey and in vitro absorption in human skin.

Oxidative DNA lesions in V79 cells mediated by pentachlorophenol metabolites.

Different pathways in irritant contact eczema? Early differences in the epidermal elemental content and expression of cytokines after application of 2 different irritants.

Methyl iodide poisoning: report of two cases.

Retinoic acid affects the expression rate of the differentiation-related genes aryl hydrocarbon receptor, ARNT and keratin 4 in proliferative keratinocytes only.

12-Lipoxygenase in A431 cells: genetic identity, modulation of expression, and intracellular localization.

150-kD oxygen-regulated protein is expressed in human atherosclerotic plaques and allows mononuclear phagocytes to withstand cellular stress on exposure to hypoxia and modified low density lipoprotein.

Arsenic induces interleukin-8 expression in cultured keratinocytes.

Photosensitization of uroporphyrin augments the ultraviolet A-induced synthesis of matrix metalloproteinases in human dermal fibroblasts.

Contribution of oxygen-sensitive neurons of the rostral ventrolateral medulla to hypoxic cerebral vasodilatation in the rat.

[The perioperative use of recombinant erythropoietin (rhEPO) in Jehovah's witnesses].

Chromium allergy in consecutive patients in a country where ferrous sulfate has been added to cement since 1981.

Disturbed host defense in peritoneal cavity during CAPD: characterization of responsible factors in dwell fluid.

In ovo 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure in three avian species. 1. Effects on thyroid hormones and growth during the perinatal period.

An effect of K-ras gene mutation on epidermal growth factor receptor signal transduction in PANC-1 pancreatic carcinoma cells.

Herbimycin A, a tyrosine kinase inhibitor, impairs hypercalcemia associated with a human squamous cancer producing interleukin-6 in nude mice.

[Occupational asthma in an agricultural setting].

Synthesis, characterization, and immunological properties in mice of conjugates composed of detoxified lipopolysaccharide of *Salmonella paratyphi* A bound to tetanus toxoid with emphasis on the role of O acetyls.

Target cell-induced apoptosis of interleukin-2-activated human natural killer cells: roles of cell surface molecules and intracellular events.

Chemical exposures, medical history, and risk of squamous and basal cell carcinoma of the skin.

Osteopontin activation of c-src in human melanoma cells requires the cytoplasmic domain of the integrin alpha v-subunit.

Modeling the number and size of hepatic focal lesions following exposure to 2,3,7,8-TCDD.

Exogenous catalase may potentiate oxidant-mediated lung injury in the female Sprague-Dawley rat.

Cells in vivo and in vitro from osteopetrotic mice homozygous for c-src disruption show suppression of synthesis of osteopontin, a multifunctional extracellular matrix protein.

Circulating interleukin-2 receptors are a group of multimeric proteins with immunoreactivity for interleukin-2 receptor alpha, beta, and gamma chains.

Synthesis of [11C-methyl]-alpha-aminoisobutyric acid (AIB).

Subcutaneous epoetin alfa as an adjunct to autologous blood donation before elective coronary artery bypass graft surgery.

Perisurgical use of epoetin alfa in orthopedic surgery patients.

Potential of epoetin alfa in patients in autologous blood donation programs for orthopedic surgery.

Genoprotection by UDP-glucuronosyltransferases in peroxidase-dependent, reactive oxygen species-mediated micronucleus initiation by the carcinogens 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone and benzo[a]pyrene.

Isolation and characterization of variant benzo[a]pyrene-resistant T47D human breast-cancer cells.

Different mechanisms are responsible for c-jun mRNA induction by cisplatin and ultraviolet light.

Supernumerary lumbar rib: manifestation of basic alteration in embryonic development of ribs.

Correlation of impedance response patterns to histological findings in irritant skin reactions induced by various surfactants.

Safety assessment based on irrelevant toxicologic data: an extraordinary case of bromomethane used as a fumigant.

Balloon angioplasty significantly increases collagen content but does not alter collagen subtype I/III ratios in the atherosclerotic rabbit iliac model.

Effects of tyrosine kinase inhibitors on the proliferation of human breast cancer cell lines and proteins important in the ras signaling pathway.

Energy-ubiquitin-dependent muscle proteolysis during sepsis in rats is regulated by glucocorticoids.

Arsenite, but not cadmium, induces ornithine decarboxylase and heme oxygenase activity in rat liver: relevance to arsenic carcinogenesis.

Curcumin induces apoptosis in immortalized NIH 3T3 and malignant cancer cell lines.

Splice site mutation causing deletion of exon 21 sequences from the pro alpha 2(I) chain of type I collagen in a patient with severe dentinogenesis imperfecta but very mild osteogenesis imperfecta.

Cancers of skin, bone, connective tissues, brain, eye, thyroid and other specified and unspecified sites in Inuit.

Addition of ferrous sulfate to cement and risk of chromium dermatitis among construction workers.

Mutation in the carboxy-terminal propeptide of the Pro alpha 1(I) chain of type I collagen in a child with severe osteogenesis imperfecta (OI type III): possible implications for protein folding.

Type II collagen-induced autoimmune ear disease in mice: a preliminary report on an epitope of the type II collagen molecule that induced inner ear lesions.

Characterization of the M(r) 65,000 lymphokine-activated killer proteins phosphorylated after tumor target binding: evidence that pp65a and pp65b are phosphorylated forms of L-plastin.

Pharmacokinetic model of dioxin and furan levels in adipose tissue from sawmill work involving chlorophenolate fungicides.

Immunoaffinity chromatographic purification of cellobiohydrolase II mutants from recombinant trichoderma reesei strains devoid of major endoglucanase genes.

Evidence that fibroblast growth factors 1 and 4 participate in regulation of cardiogenesis.

Binding of tissue factor pathway inhibitor to cultured endothelial cells-influence of glycosaminoglycans.

Inducibility of cytochromes P-450 by dioxin in liver and extrahepatic tissues of the marmoset monkey (*Callithrix jacchus*).

Mechanism of toxic action of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in cultured human luteinized granulosa cells.

Assessment of aspects of the toxicity of *Clostridium perfringens* epsilon-toxin using the MDCK cell line.

Degradation of cross-linked fibrin by matrix metalloproteinase 3 (stromelysin 1): hydrolysis of the gamma Gly 404-Ala 405 peptide bond.

Mutagenic responses of L5178Y mouse cells at the tk and hpert loci.

The fifth epidermal growth factor-like domain of thrombomodulin does not have an epidermal growth factor-like disulfide bonding pattern.

Somatic embryogenesis and plant regeneration in *Sorghum bicolor* (L.) Moench.

Bipyridyl dihydrochloride inhibits tumor necrosis factor- α secretion by human keratinocytes on ultraviolet irradiation.

Aryl-hydrocarbon receptor-deficient mice are resistant to 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced toxicity.

Differential regulation of mouse Ah receptor gene expression in cell lines of different tissue origins.

Efficient tissue repair underlies the resiliency of postnatally developing rats to chlordecone + CCl₄ hepatotoxicity.

Fibroblast growth factor-2 stimulates embryonic cardiac mesenchymal cell proliferation.

Lipopolysaccharide inhibits in vitro luteinizing hormone-stimulated rat ovarian granulosa cell estradiol but not progesterone secretion.

Chronic in vivo sodium azide infusion induces selective and stable inhibition of cytochrome c oxidase.

Polychlorinated dibenzo-p-dioxins and dibenzofurans via mother's milk may cause developmental defects in the child's teeth.

Purification and partial characterization of the Cu,Zn superoxide dismutase from the dermatophyte *Trichophyton mentagrophytes* var. *interdigitale*.

Comparison of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) disposition following pulmonary, oral, dermal, and parenteral exposures to rats.

Differences in binding of epidermal growth factor to liver membranes of TCDD-resistant and TCDD-sensitive rats after a single dose of TCDD.

Diallyl disulfide induces apoptosis of human colon tumor cells.

Influence of liver tumor promoters on apoptosis in rat hepatocytes induced by 2-acetylaminofluorene, ultraviolet light, or transforming growth factor beta 1.

Mammalian plasma and tissue-bound semicarbazide-sensitive amine oxidases: biochemical, pharmacological and toxicological aspects.

Arsenic-copper interaction in the kidney of the rat: influence of arsenic metabolites.

TNF- α participates in an IgE-mediated cutaneous reaction in mast cell deficient, WBB6F1-W/W^v mice.

Differential ability of 2,4-dinitrophenol to modulate etoposide cytotoxicity in mammalian tumor cell lines associated with inhibition of macromolecular synthesis.

Growth modulation of hepatocytes and rat liver epithelial cells (WB-F344) by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Changes in taurine as an indicator of hepatic dysfunction and biochemical perturbations. Studies in vivo and in vitro.

Lichen acids as uncouplers of oxidative phosphorylation of mouse-liver mitochondria.

Monomeric chemically modified allergens: immunologic and physicochemical characterization.

Effect of arsenic and cadmium on the persistence of mutagen-induced DNA lesions in human cells.

Handwipe sampling and analysis procedure for the measurement of dermal contact with pesticides.

A mechanistic model of effects of dioxin on thyroid hormones in the rat.

Involvement of wound-associated factors in rat brain astrocyte migratory response to axonal injury: in vitro simulation.

Tissue distribution after a single subcutaneous administration of 2,3,7,8-tetrabromodibenzo-p-dioxin in comparison with toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Wistar rats.

Modulation of chemical-induced lung and liver toxicity by all-trans-retinol in the male Sprague-Dawley rat.

[Paraquat-induced acute dermatitis in a child after playing with a discarded container].

Patch testing with fragrances: results of a multicenter study of the European Environmental and Contact Dermatitis Research Group with 48 frequently used constituents of perfumes.

[Eating cinnamon in cinnamaldehyde allergy].

Risk factors for occupational illnesses associated with the use of paraquat (1,1'-dimethyl-4,4'-bipyridylium dichloride) in California.

The role of free radicals in paraquat-induced corneal lesions.

Photodamage and skin cancer among paraquat workers.

Induction of 8-hydroxy-2-deoxyguanosine and single-strand breaks in DNA of V79 cells by tetrachloro-p-hydroquinone.

Developmental toxicity and structure-activity relationships of chlorophenols using human embryonic palatal mesenchymal cells.

Toxicity of cotoran (fluometuron) in Desert sheep.

Olfactory toxicity of diethyldithiocarbamate (DDTC) and disulfiram and the protective effect of DDTC against the olfactory toxicity of dichlobenil.

Cancer induction by an organic arsenic compound, dimethylarsinic acid (cacodylic acid), in F344/DuCrj rats after pretreatment with five carcinogens.

[Retrospective study of the morbidity in a group occupationally exposed to chlorotriazine herbicides: preliminary results].

Fate and effects of acrolein.

Mixed diquat/paraquat-induced burns.

Survival in a case of massive paraquat ingestion.

Pulmonary damage due to paraquat poisoning through skin absorption.

Contact allergy to cinnamic aldehyde and cinnamic alcohol in *Olea europaea*.

The guinea pig maximization test--with a multiple dose design.

Biological monitoring of commercial pesticide applicators for urine metabolites of the herbicide alachlor.

Further evidence that the blood/brain barrier impedes paraquat entry into the brain.

Protective effects of prostaglandin E2 on the paraquat-induced constriction of the fetal ductus arteriosus in the rat.

Review of the interaction between TCDD and glucocorticoids in embryonic palate.

Type 1 collagen synthesis by skin fibroblasts from 17 patients with osteogenesis imperfecta type III.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced anorexia and wasting syndrome in rats: aggravation after ventromedial hypothalamic lesion.

Induction of the 72-kD heat shock protein in human skin melanoma and squamous cell carcinoma cell lines.

Skin irritation in man: a comparative bioengineering study using improved reflectance spectroscopy.

Anti-collagen antibodies in systemic sclerosis and in primary Raynaud's phenomenon.

Persistence of TCDD-induced hepatic cell proliferation and growth of enzyme altered foci after chronic exposure followed by cessation of treatment in DEN initiated female rats.

Differential response of normal and HPV immortalized ectocervical epithelial cells to B[a]P.

Inhibition of the oncogene product p185erbB-2 in vitro and in vivo by geldanamycin and dihydrogeldanamycin derivatives.

2,3,7,8-Tetrachlorodibenzo-p-dioxin sensitization of cultured human epidermal cells to carcinogenic heterocyclic amine toxicity.

Expression of cytokine mRNA in human melanoma tissues.

Ligand-dependent and -independent activation of the transcription factor gamma RF-1 in a cell-free system.

Biochemical mechanisms and cancer risk assessment models for dioxin.

Reconstitution of the rat olfactory epithelium after methyl bromide-induced lesion.

Physiological and histological recovery of the olfactory mucosa of the frog after a dichlobenil injection.

Distribution of microsomal epoxide hydrolase and glutathione S-transferase in the rat olfactory mucosa: relevance to distribution of lesions caused by systemically-administered olfactory toxicants.

Serum erythropoietin levels in patients with severe anemia secondary to inflammatory bowel disease and the use of recombinant human erythropoietin in patients with anemia refractory to treatment.

H-ras oncogene mutation spectra in B6C3F1 and C57BL/6 mouse liver tumors provide evidence for TCDD promotion of spontaneous and vinyl carbamate-initiated liver cells.

Type I collagen biosynthesis by skin fibroblasts from patients with idiopathic juvenile osteoporosis.

Immunomodulatory effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin tested by the popliteal lymph node assay.

Accidental fatal monochloroacetic acid poisoning.

Triclosan inhibits histamine-induced inflammation in human skin.

Spreading and focal contact formation of human melanoma cells in response to the stimulation of both melanoma-associated proteoglycan (NG2) and alpha 4 beta 1 integrin.

Alpha-subunit of beta-conglycinin, an allergenic protein recognized by IgE antibodies of soybean-sensitive patients with atopic dermatitis.

Hepatic microsomal ethoxyresorufin O-deethylase-inducing potency in ovo and cytosolic Ah receptor binding affinity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: comparison of four avian species.

Identity and pathogenesis of stomach tumors in Sprague-Dawley rats associated with the dietary administration of butachlor.

Protection of UV-radiation induced skin toxicity by reactive oxygen scavengers.

Localization of porcine cardiac myosin epitopes that induce experimental autoimmune myocarditis.

Irritant dermatitis among workers cleaning up a pesticide spill: California 1991.

Workers' response to risk notification.

[Multiple palmoplantar keratoses, basalomas and porocarcinomas after arsenic therapy].

Resistance of melanoma cell lines to interferons correlates with reduction of IFN-induced tyrosine phosphorylation. Induction of the anti-viral state by IFN is prevented by tyrosine kinase inhibitors.

Expression of de-N-acetyl-gangliosides in human melanoma cells is induced by genistein or nocodazole.

Reconstitution of TCR alpha-chain expression in deletion mutants restores dinitrophenyl-specific/class I MHC-restricted suppressor molecule production.

Activation of casein kinase II in ML-1 human myeloblastic leukemia cells requires IGF-1 and transferrin.

The adverse effects of long-term cassava (*Manihot esculenta* Crantz) consumption.

Effects of inhalative exposure to dioxins in wood preservatives on cell-mediated immunity in day-care center teachers.

Embryonic cell death patterns associated with nitrofen-induced congenital diaphragmatic hernia.

Effect of epidermal growth factor on cadherin-mediated adhesion in a human oesophageal cancer cell line.

A morphological study of liver lesions in *Xenopus* larvae exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) with special reference to apoptosis of hepatocytes.

Image processing of 20 MHz B-scan recordings of irritant reactions.

[Medical and biological aspects of the dioxin problem].

Sodium arsenite induces chromosome endoreduplication and inhibits protein phosphatase activity in human fibroblasts.

Induction of preneoplastic lesions by sodium arsenite in human fetal respiratory epithelia in organ culture.

The importance of pharmacokinetics in determining the relative potency of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,7,8-tetrachlorodibenzofuran.

2,3,7,8-Tetrachlorodibenzo-p-dioxin inhibits DNA synthesis in rat primary hepatocytes.

An attempt to explain interindividual variability in 24-h urinary excretion of inorganic arsenic metabolites by C57 BL/6J mice.

Alkylating agents induce UVM, a *recA*-independent inducible mutagenic phenomenon in *Escherichia coli*.

Toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) to the human thymus after implantation in SCID mice.

Effects of monoisoamyl meso-2,3-dimercaptosuccinate on arsenite-induced maternal and developmental toxicity in mice.

Immunochemical characterization of recombinant and native tropomyosins as a new allergen from the house dust mite, *Dermatophagoides farinae*.

Glutathione S-transferase 8-8 is localized in smooth muscle cells of rat aorta and is induced in an experimental model of atherosclerosis.

Temperature regulation and metabolism in rats exposed perinatally to dioxin: permanent change in regulated body temperature?

A new method for estimating dermal absorption from chemical exposure. 3. Compared with steady-state methods for prediction and data analysis.

A stereotypic, transplantable liver tissue-culture system.

TCDD reduces rat hepatic epidermal growth factor receptor: comparison of binding, immunodetection, and autophosphorylation.

Ethanol ingestion on allylamine-induced experimental subendocardial fibrosis.

Chronic UVB- and all-trans retinoic-acid-induced qualitative and quantitative changes in hairless mouse skin.

Metaanalysis of 4 Swedish case-control studies on exposure to pesticides as risk-factor for soft-tissue sarcoma including the relation to tumor-localization and histopathological type.

A human erythrocyte-derived growth-promoting factor with a wide target cell spectrum: identification as catalase.

Estimating skin permeation. The validation of five mathematical skin permeation models.

Indices of TCDD exposure and TCDD body burden in veterans of Operation Ranch Hand.

Oxidation and reduction of cytochrome c by mitochondrial enzymes of *Setaria cervi*.

Workshop on perinatal exposure to dioxin-like compounds. VI. Role of biomarkers.

[Morphologic characteristics of the thymus in pregnant and newborn mice exposed to sodium arsenite].

Dose-response relationships of tissue distribution and induction of CYP1A1 and CYP1A2 enzymatic activities following acute exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice.

Arsenic increased lipid peroxidation in rat tissues by a mechanism independent of glutathione levels.

CYP1 induction, binding to the hepatic aromatic hydrocarbon receptor and mutagenicity of a series of 11-alkoxy cyclopenta[a]phenanthren-17-ones: a structure activity relationship.

Effect of aluminum and lead salts on lipid peroxidation and cell survival in human skin fibroblasts.

Toxicology of methyl bromide.

Selective increase of rat lung cytochrome P450 1A1 dependent monooxygenase activity after acute sodium arsenite administration.

Interactive effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and retinoids on proliferation and differentiation in cultured human keratinocytes: quantification of cross-linked envelope formation.

Allergic contact dermatitis from the herbicides trifluralin and benefin.

Sclerodermatous syndrome after occupational exposure to herbicides--response to systemic steroids.

Allergic contact dermatitis from cyanamide: report of 3 cases.

Arsenic-related Bowen's disease and paraquat-related skin cancerous lesions show no detectable ras and p53 gene alterations.

Nephrotoxicity and hepatotoxicity of 5,6-dichloro-4-thia-5-hexenoic acid: evidence for fatty acid beta-oxidation-dependent bioactivation.

Contact urticaria from cinnamic aldehyde and benzaldehyde in a confectioner.

[Pathologic characteristics of diffuse alveolar damage induced by paraquat in rat lungs].

Paraquat poisoning by skin absorption: report of two cases.

Constrictive effects of paraquat on the ductus arteriosus in fetal rats.

Remodeling of the alveolar structure in the paraquat lung of humans: a morphometric study.

Olfactory toxicity resulting from dermal application of 2,6-dichlorobenzonitrile (dichlobenil) in the C57Bl mouse.

Evaluation of ocular health among alachlor manufacturing workers.

[Allergic diseases caused by pesticides: 3 case reports].

Diagnosis and treatment of soft tissue sarcomas in adults.

Substituted ureas.

Pathobiological effects of acetaldehyde in cultured human epithelial cells and fibroblasts.

A ³²P-postlabeling method for simultaneous detection and quantification of exocyclic etheno and propano adducts in DNA.

Bilateral spontaneous pneumothoraces, pneumopericardium, pneumomediastinum, and subcutaneous emphysema: a rare presentation of paraquat intoxication.

Chloracne, palmoplantar keratoderma and localized scleroderma in a weed sprayer.

Effect of ethanol on paraquat toxicity in F344 rats.

Acrolein genotoxicity in *Drosophila melanogaster*. II. Influence of mus201 and mus308 mutations.

Patch testing with fragrance mix and its constituents in a Hungarian population.

Experimental metolachlor toxicosis in Nubian goats in the Sudan.

Histochemical demonstration of hydrogen peroxide production by leukocytes in fixed-frozen tissue sections of inflammatory lesions.

A survey of actinic keratoses among paraquat production workers and a nonexposed friend reference group.

The pentachlorophenol metabolite tetrachloro-p-hydroquinone induces the formation of 8-hydroxy-2-deoxyguanosine in liver DNA of male B6C3F1 mice.

Detection of exocyclic 1,N2-propanodeoxyguanosine adducts as common DNA lesions in rodents and humans.

The predictive accuracy of in vitro measurements for the dermal absorption of a lipophilic penetrant (fluazifop-butyl) through rat and human skin.

Effect of dosing vehicle on the dermal absorption of fluazifop-butyl and fomesafen in rats in vivo.

Identification of nondisulfided pro alpha 1 (IV) chain produced by cultured B16 melanoma cells.

Menière's disease: role of antibodies against basement membrane antigens.

Therapy with recombinant human erythropoietin in patients with myelodysplastic syndromes.

Extracellular matrix remodeling after balloon angioplasty injury in a rabbit model of restenosis.

In vitro phototoxic activities of new quinolone antibacterial agents: lipid peroxidative potentials.

Reaction of inflamed periapical tissue to intracanal medicaments and root canal sealers.

Echographic evaluation with image analysis of irritant reactions induced by nonanoic acid and hydrochloric acid.

Modulation of nucleocytosolic $[Ca^{2+}]$ gradient in smooth muscle by protein phosphorylation.

Contact sensitization induces proliferation of heterogeneous populations of hapten-specific T cells.

Study of the effector mechanism involved in the production of haemorrhagic necrosis of the small intestine in rat passive anaphylaxis.

Radiographic and microbiologic evaluation of posttreatment apical and periapical repair of root canals of dogs' teeth with experimentally induced chronic lesion.

Morbidity follow up study of BASF employees exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) after a 1953 chemical reactor incident.

Accelerated degradation of 160 kDa epidermal growth factor (EGF) receptor precursor by the tyrosine kinase inhibitor herbimycin A in the endoplasmic reticulum of A431 human epidermoid carcinoma cells.

Conversion of epidermal growth factor (EGF) into a stimulatory ligand for A431-cell growth by herbimycin A by decreasing the level of expression of EGF receptor.

Chloracne. Some recent issues.

Treatment of deeply infiltrating endometriosis.

Effects of 2,3,7,8-tetrachloro- and 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin on the proliferation of preneoplastic liver cells in the rat.

Coxsackievirus B3 infection alters the uptake of 2,3,7,8-tetrachlorodibenzo-p-dioxin into various tissues of the mouse.

Substitution of an aspartic acid for glycine 700 in the alpha 2(I) chain of type I collagen in a recurrent lethal type II osteogenesis imperfecta dramatically affects the mineralization of bone.

Failure of recombinant human interleukin-3 therapy to induce erythropoiesis in patients with refractory Diamond-Blackfan anemia.

Post mortem diagnosis of *Mycobacterium bovis* infection in cattle.

[The mechanism of articular cartilage degeneration in osteoarthritis].

Substitution of cysteine for glycine-946 in the alpha 1(I) chain of type I procollagen causes lethal osteogenesis imperfecta.

Co-expression of human CYP1A1 and a human analog of cytochrome P450-EF in response to 2,3,7,8-tetrachloro-dibenzo-p-dioxin in the human mammary carcinoma-derived MCF-7 cells.

PCB and dioxin re-entry criteria for building surfaces and air.

Clofazimine alters the energy metabolism and inhibits the growth rate of a human lung-cancer cell line in vitro and in vivo.

Promotion of preneoplastic foci in rat liver with 2,3,7,8-tetrachlorodibenzo-p-dioxin, 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin and a defined mixture of 49 polychlorinated dibenzo-p-dioxins.

On the formation of neuromata in the primary olfactory projection.

Modulating effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on skin carcinogenesis initiated by the weak inducer 7,12-dimethylbenz(a)anthracene.

2,3,7,8-Tetrachlorodibenzo-p-dioxin as growth modulator in mouse hepatocytes with high and low affinity Ah receptor.

Dose-response relationship in multistage carcinogenesis: promoters.

Multiple mechanisms are responsible for altered expression of gap junction genes during oncogenesis in rat liver.

Porphyrin studies in TCDD-exposed workers.

Rat fibrosarcoma as a source of stable co-polymer of type I and type III collagens.

The hr locus and the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in newborn mice.

In vitro dermal absorption of pesticides: V. In vivo and in vitro comparison of the herbicide 2,4-dichlorophenoxyacetic acid in rat, guinea pig, pig, human and tissue-cultured skin.

NTP Toxicology and Carcinogenesis Studies of 4,4'-Thiobis(6-*t*-butyl-*m*-cresol) (CAS No. 96-69-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Retroviral lineage studies of the rat olfactory epithelium.

Plant biochemistry of xenobiotics: isolation and characterization of a soybean O-glucosyltransferase of DDT metabolism.

Influence of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on TNF-alpha levels in the skin of congenic haired and hairless mice.

Olfactory mucosal lesions in F344 rats following inhalation exposure to pyridine at threshold limit value concentrations.

Identification of a biochemical lesion, and characteristic response to lipopolysaccharide (LPS) of a cultured macrophage-like cell mutant with defective LPS-binding.

Vehicle effects on in vitro percutaneous absorption through rat and human skin.

Systemic or local administration of azide produces striatal lesions by an energy impairment-induced excitotoxic mechanism.

In vitro tape stripping as a model for in vivo skin stripping.

Pathological findings in rabbits and sheep following the subacute administration of triphenyltin acetate.

Differences in indirect risk methodologies: dioxin emissions from combustion facilities.

Identification of regions of bovine factor VII essential for binding to tissue factor.

Potential of bleomycin cytotoxicity in *Saccharomyces cerevisiae*.

Two collagen-binding proteins, osteonectin and HSP47, are coordinately induced in transformed keratinocytes by heat and other stresses.

Cross-linking of dermal collagen induced by singlet oxygen.

UV-dependent quinolone-induced human erythrocyte membrane lipid peroxidation: studies on the phototoxicity of Y-26611, a new quinolone derivative.

Effects of oxidative stress on expression of extracellular superoxide dismutase, CuZn-superoxide dismutase and Mn-superoxide dismutase in human dermal fibroblasts.

Crosslinked CNBr-activated hyaluronan-collagen matrices: effects on fibroblast contraction.

Identity of the core proteins of the large chondroitin sulphate proteoglycans synthesized by skeletal muscle and prechondrogenic mesenchyme.

A simple method for screening assessment of skin and eye irritation.

NTP Toxicology and Carcinogenesis Studies of o-Benzyl-p-Chlorophenol (CAS No. 120-32-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Dose-response relationships in mice following subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: CYP1A1, CYP1A2, estrogen receptor, and protein tyrosine phosphorylation.

Lipid peroxidation and oxidative stress during acute allylamine-induced cardiovascular toxicity.

A physiologically based mathematical model of dermal absorption in man.

Electron microscopic and molecular characterization of turnip vein-clearing virus.

Dioxin-enhanced expression of interleukin-1 beta in human epidermal keratinocytes: potential role in the modulation of immune and inflammatory responses.

[The place of pentachlorophenol in general medicinal practice].

Effects of 2-[1-(ethoxyimino)propyl]-3-hydroxy-5-(2,4,6-trimethylphenyl) cyclohex-2-enone on hepatic haem biosynthesis: species differences in hepatic porphyria.

Human pentachlorophenol poisoning.

Hepatic alterations in experimental paraquat intoxication.

Skin symptoms among workers in a spice factory.

Phototoxic contact dermatitis with toxic hepatitis due to the percutaneous absorption of paraquat.

Histometric changes in connective fibers of the lung following paraquat administration in rats.

The genotoxicity of the waste water discharged from paraquat manufacturing and its pyridyl components.

Herbicides to curb human parasitic infections: in vitro and in vivo effects of trifluralin on the trypanosomatid protozoans.

Paraquat.

Immunohistochemical localization of paraquat in skin and eye of rat.

Thiol status and cytopathological effects of acrolein in normal and xeroderma pigmentosum skin fibroblasts.

Haemotoxic effect of phenylurea herbicides in rats: role of haemoglobin-adduct formation in splenic toxicity.

An epidemiological study of the health of Sri Lankan tea plantation workers associated with long term exposure to paraquat.

Results with OECD recommended positive control sensitizers in the maximization, Buehler and local lymph node assays.

Allergic contact dermatitis from the herbicide Alachlor.

Renal lesions induced in F344/DuCrj rats by 4-weeks oral administration of dimethylarsinic acid.

Ocular injury caused by Preeglox-L, a herbicide containing paraquat, diquat and surfactants.

The effect of paraquat on the radiosensitivity of melanoma cells: the role of superoxide dismutase & catalase.

Production of transgenic mice expressing the Ki-ras oncogene under the control of a thyroglobulin promoter.

Paraquat-induced lung injury: prevention by vasoactive intestinal peptide and related peptide helodermin.

Lung growth and maturation in the rat model of experimentally induced congenital diaphragmatic hernia.

Hydrogen peroxide as an inducer of elevated tyrosinase level in melanoma cells.

Markers of occupational exposure to pentachlorophenol.

Absorption and metabolism of 2-chloro-2,6-diethyl-N-(butoxymethyl)acetanilide (butachlor) in human skin in vitro.

[Biological monitoring of workers exposed to nitrofen and experimental study on its skin permeability].

Failure of the 5-HT₂ receptor antagonist, ritanserin, to alter preference for alcohol in drinking rats.

Modelling dermal pharmacokinetics using in vitro data. Part II. Fluazifop-butyl in man.

Modelling dermal pharmacokinetics using in vitro data. Part I. Fluazifop-butyl in the rat.

In vitro percutaneous absorption and metabolism in man of 2-chloro-4-ethylamino-6-isopropylamine-s-triazine (atrazine).

Fate of fluzifop butyl in rat and human skin in vitro.

Determination of atrazine metabolites in human urine: development of a biomarker of exposure.

Occupational exposure of Sri Lankan tea plantation workers to paraquat.

Erythropoietin increases hemoglobin in cancer patients during radiation therapy.

Adenocarcinoma production in rats administered 1,2-dimethylhydrazine and fed iron salt and guar gum diets.

Tumor cell heme uptake induces ferritin synthesis resulting in altered oxidant sensitivity: possible role in chemotherapy efficacy.

Comparing the results of a Monte Carlo analysis with EPA's reasonable maximum exposed individual (RMEI): a case study of a former wood treatment site.

TCDD-mediated changes in hepatic epidermal growth factor receptor may be a critical event in the hepatocarcinogenic action of TCDD.

Differential patterns of epidermal leukocyte infiltration in patch test reactions to structurally unrelated chemical irritants.

Chromium content in human skin after in vitro application of ordinary cement and ferrous-sulphate-reduced cement.

Dermatitis on construction sites.

Angiosarcoma, porphyria cutanea tarda, and probable chloracne in a worker exposed to waste oil contaminated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

A new form of tumor and fetal collagen that binds laminin.

Characterization of an arginine 789 to cysteine substitution in alpha 1 (II) collagen chains of a patient with spondyloepiphyseal dysplasia.

Exposure to 2,3,7,8-tetrachlorodibenzo-para-dioxin leads to defective dentin formation and pulpal perforation in rat incisor tooth.

Contact dermatitis due to Metasol D3T in a Jay cushion.

Dermatitis in bulb growers.

Herbimycin A, a pp60c-src tyrosine kinase inhibitor, inhibits osteoclastic bone resorption in vitro and hypercalcemia in vivo.

Inhibitory effects of alpha- and beta-carotene on croton oil-induced or enzymatic lipid peroxidation and hydroperoxide production in mouse skin epidermis.

An acute model for IgA-mediated glomerular inflammation in rats induced by monoclonal polymeric rat IgA antibodies.

Comparative immunochemistry and ontogeny of two closely related coated pit proteins. The 280-kd target of teratogenic antibodies and the 330-kd target of nephritogenic antibodies.

Tumors produced in rats with a single dosage of 1,2-dimethylhydrazine.

Peroxisome proliferators: paradigms and prospects.

Effect of processing cement to concrete on hexavalent chromium levels.

Increased serum catalase activity in rats subjected to thermal skin injury.

DNA topoisomerases and the DNA lesion in human genetic instability syndromes.

[Neurotoxicity of methyl bromide--neuropathologic evaluation--preliminary study].

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the epidermal growth factor receptor in hepatic plasma membranes of rainbow trout (*Oncorhynchus mykiss*).

The natural history of congenital diaphragmatic hernia and pulmonary hypoplasia in the embryo.

Iron protein succinylate in the treatment of iron deficiency: controlled, double-blind, multicenter clinical trial on over 1,000 patients.

[Participation of environmental chemicals in experimental allergic conjunctivitis].

Prevention of experimental autoimmune arthritis with a peptide fragment of type II collagen.

Red blood cell regeneration induced by subcutaneous recombinant erythropoietin: iron-deficient erythropoiesis in iron-replete subjects.

Effect of intracanal dressings on repair and apical bridging of teeth with incomplete root formation.

An arm immersion model of compromised skin (I). Influence on irritation reactions.

Effect of thyrotropin-releasing hormone on pentobarbitone-induced sleep in rats: continuous treatment with a sustained release injectable formulation.

Osteogenesis imperfecta and type-I collagen mutations. A lethal variant caused by a Gly910-->Ala substitution in the alpha 1 (I) chain.

A study of the binding of immunoglobulin G and immunoglobulin E from children with bronchial asthma to peptides derived from group II antigen of *Dermatophagoides pteronyssinus*.

Chronic arsenicism: criminal poisoning or drug-intoxication? Report of two cases.

Activation of tumoricidal properties in macrophages by lipopolysaccharide requires protein-tyrosine kinase activity.

Skin dendritic cell-lymphocyte interactions in autologous system.

An intronic deletion leading to skipping of exon 21 of COL1A2 in a boy with mild osteogenesis imperfecta.

Developmental and reproductive toxicity of dioxins and related compounds: cross-species comparisons.

Comparative bioavailability of ferric polymaltose and ferrous sulphate in iron-deficient blood donors.

Approach to risk assessment of PCDDs and PCDFs in Canada.

The penetration of 2,3,7,8-tetrachlorodibenzo-p-dioxin into viable and non-viable porcine skin in vitro.

Singlet oxygen induces collagenase expression in human skin fibroblasts.

Biochemical Basis of Resistance of Tobacco Callus Tissue Cultures to Hydroxyphenylethylamines.

Estimation of octanol-water partition coefficients and correlation with dermal absorption for several polyhalogenated aromatic hydrocarbons.

Triggering of cellulase biosynthesis by cellulose in *Trichoderma reesei*. Involvement of a constitutive, sophorose-inducible, glucose-inhibited beta-diglycoside permease.

Intra-species cross-reactivity of house dust mite allergens separated by protein blotting and detected by selective elution of mite components and IgE antibodies.

Histopathologic approaches to chemical toxicity using primary cultures of dissociated neural cells grown in chamber slides.

Oxidative tyrosylation of high density lipoprotein by peroxidase enhances cholesterol removal from cultured fibroblasts and macrophage foam cells.

A mouse 3T6 fibroblast cell culture model for the study of normal and protein-engineered collagen synthesis and deposition into the extracellular matrix.

A physiologically based pharmacokinetic model for 2,3,7,8-tetrabromodibenzo-p-dioxin (TBDD) in the rat: tissue distribution and CYP1A induction.

Mapping the locations of the epitopes of five monoclonal antibodies to the core protein of dermatan sulfate proteoglycan II (decorin).

Characterization of phosphofructokinase II and regulation of fructose 2,6-bisphosphate levels in *Trichoderma reesei*.

Tyrosyl radical generated by myeloperoxidase catalyzes the oxidative cross-linking of proteins.

Gene expression and cell proliferation in rat liver after 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

A mechanistic model of effects of dioxin on gene expression in the rat liver.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) accelerates differentiation of murine preimplantation embryos in vitro.

Evidence for involvement of the growth hormone receptor-associated tyrosine kinase in actions of growth hormone.

NTP Toxicology and Carcinogenesis Studies of Pentachloroanisole (CAS No. 1825-21-4) in F344 Rats and B6C3F1 Mice (Feed Studies).

Maturation changes in dermal absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in Fischer 344 rats.

Toxicology, structure-function relationship, and human and environmental health impacts of polychlorinated biphenyls: progress and problems.

Reduction of hepatic phosphoenolpyruvate carboxykinase (PEPCK) activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) is due to decreased mRNA levels.

The herpes simplex virus type 1 US11 gene product is a phosphorylated protein found to be non-specifically associated with both ribosomal subunits.

Nonresponsiveness of normal human fibroblasts to dioxin correlates with the presence of a constitutive xenobiotic response element-binding factor.

Evaluation of collagen cross-linking techniques for the stabilization of tissue matrices.

Semicarbazide protection from in vivo oxidant injury of vascular tissue by allylamine.

Nature and role of xenobiotic metabolizing esterases in rat liver, lung, skin and blood.

Gastrointestinal effects of single and repeated doses of ferrous sulphate in rats.

Effects of acute sodium arsenite administration on the pulmonary chemical metabolizing enzymes, cytochrome P-450 monooxygenase, NAD(P)H:quinone acceptor oxidoreductase and glutathione S-transferase in guinea pig: comparison with effects in liver and kidney.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the epidermal growth factor receptor in hepatic plasma membranes of rainbow trout.

Modulation of protooncogene expression in rat aortic smooth muscle cells by benzo[a]pyrene.

Ligand/receptor binding for 2,3,7,8-TCDD: implications for risk assessment.

Developmental analysis of primary and secondary somatic embryogenesis in soybean tissue culture.

Growth stimulation of primary rat hepatocytes by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Neurotoxic effects induced by intracerebral and systemic injection of paraquat in rats.

Chronic liver injury in phenoxy herbicide-exposed Vietnam veterans.

Methyl isothiocyanate in wine.

Reproductive study of acrolein on two generations of rats.

[A cardiac lesion secondary to paraquat].

Dioxin intoxication from chronic exposure of horses to pentachlorophenol-contaminated wood shavings.

NTP technical report on the toxicity studies of Glyphosate (CAS No. 1071-83-6) Administered In Dosed Feed To F344/N Rats And B6C3F1 Mice.

Cutaneous toxicity and absorption of paraquat in porcine skin.

Studies of the quenching phenomenon.

[Toxic and drug-induced lesions of the pulmonary parenchyma].

Two-year toxicity and carcinogenicity study of acrolein in rats.

Acute toxicological studies on paraquat: pathological findings in beagle dogs following single subcutaneous injections.

Role of lipid peroxidation and DNA damage in paraquat toxicity and the interaction of paraquat with ionizing radiation.

Subacute toxicity of paraquat in beagle dogs: clinicopathology and pathologic examinations.

Distribution of paraquat into the brain after its systemic injection in rats.

Regression mechanism of cyanamide-induced inclusion bodies in the rat: a useful experimental pattern to study the beta-glycogen metabolism of hepatocytes.

Age dependent development of ethanol drinking in rats after inhibition of aldehyde dehydrogenase.

Selective reduction by the 5-HT antagonist amperozide of alcohol preference induced in rats by systemic cyanamide.

Skin sensitization to cinnamic alcohol: the role of skin metabolism.

The effects of goitrogenesis, involution, and goitrogenic rechallenge on the clonogenic cell content of the rat thyroid.

Enhancement of cytotoxic T lymphocyte growth from spleens of P815-tumor-bearing host mice with mafosfamide.

Preservation of keratin expression in oral mucosa using a novel transport medium.

Dermal absorption of the phenoxy herbicide 2,4-D dimethylamine in humans: effect of DEET and anatomic site.

Pharmacokinetics of fluazifop-butyl in human volunteers. II: Dermal dosing.

In vivo percutaneous absorption and skin decontamination of alachlor in rhesus monkey.

Inhibition of the sodium transport by pentachlorophenol (PCP) in toad skin (*Pleurodema thaul*).

Clinical responses in relation to blood acetaldehyde levels.

Conifer seedling nursery worker exposure to glyphosate.

Oral and dermal application of 2,4-dichlorophenoxyacetic acid sodium and dimethylamine salts to male rats: investigations on absorption and excretion as well as induction of hepatic mixed-function oxidase activities.

Effect of herbicides on human skin. Penetration of herbicides through the epidermis "in vitro".

Case report: neuropathology of methyl bromide intoxication.

Influence of irrigation and intracanal dressing on the healing process of dogs' teeth with apical periodontitis.

Evidence of a neurogenic component during IgE-mediated inflammation in mouse skin.

Integrated approach for evaluating species and interindividual differences in responsiveness to dioxins and structural analogs.

Cell transforming and oncogenic activity of 2,3,7,8-tetrachloro--and 2,3,7,8 tetrabromodibenzo-p-dioxin.

Myalgia and elevated creatine kinase activity associated with subcutaneous injections of diluent.

Modification of bleomycin-induced chromosome aberrations by hyperthermia and under energy depleting conditions in human peripheral lymphocytes.

Amyotrophic lateral sclerosis: increased solubility of skin collagen.

A dominant mutation in the COL1A1 gene that substitutes glycine for valine causes recurrent lethal osteogenesis imperfecta.

Detection of contact sensitivity of metal salts using the murine local lymph node assay.

Expression of mutant alpha (I)-procollagen in osteoblast and fibroblast cultures from a proband with osteogenesis imperfecta type IV.

Chronic sodium azide treatment impairs learning of the Morris water maze task.

Chemopreventive effects of green tea components on hepatic carcinogenesis.

Type I keratinocyte transglutaminase: expression in human skin and psoriasis.

Growth inhibitory and antimitogenic activity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in T47D human breast cancer cells.

Neoplastic transformation of immortalized human keratinocytes by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Detection and characterisation of an overmodified type III collagen by analysis of non-cutaneous connective tissues in a patient with Ehlers-Danlos syndrome IV.

Hepatotoxicity and carcinogenicity in female Sprague-Dawley rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): a pathology working group reevaluation.

Extraembryonic tissue changes induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,4,7,8-pentachlorodibenzofuran with a note on direction of maternal blood flow in the labyrinth of C57BL/6N mice.

Modulation of type II collagen-induced arthritis in DBA/1 mice by intravenous application of a peptide from the C1q-A chain.

Large hiatal hernias, anemia, and linear gastric erosion: studies of etiology and medical therapy.

In utero and lactational exposure of male rats to 2,3,7,8-tetrachlorodibenzo-p-dioxin. 3. Effects on spermatogenesis and reproductive capability.

Synthesis and anticonvulsant activity of some new 4-aryl-4-imidazoline-2-one derivatives.

Mitochondrial dysfunction observed in situ in cardiomyocytes of rats in experimental diabetes.

Chemical burn with cresol intoxication and multiple organ failure.

Identification of *Candida albicans* antigens reactive with immunoglobulin E antibody of human sera.

Identification of thyroiditogenic epitope on porcine thyroid peroxidase for C57BL/6 mice.

Cytochrome oxidase inhibition: a novel animal model of Alzheimer's disease.

Lysyl hydroxylation in collagens from hyperplastic callus and embryonic bones.

Permeation and destructive effects of disinfectants on protective gloves.

Altered ratio of collagen chains in bone of a patient with non-lethal osteogenesis imperfecta.

Identification, purification, and partial sequence analysis of autotaxin, a novel motility-stimulating protein.

An osteopenic nonfracture syndrome with features of mild osteogenesis imperfecta associated with the substitution of a cysteine for glycine at triple helix position 43 in the pro alpha 1(I) chain of type I collagen.

Allergic contact dermatitis from dazomet.

Chemical modification of bovine pericardium and its effect on calcification in the rat subdermal model.

Differential ability of occupational chemical contact and respiratory allergens to cause immediate and delayed dermal hypersensitivity reactions in mice.

Toxicity of monochloroacetic acid administered by gavage to F344 rats and B6C3F1 mice for up to 13 weeks.

Fatal systemic poisoning after skin exposure to monochloroacetic acid.

Amelioration of dermal lesions in streptozotocin-induced diabetic rats by aminoguanidine.

[Contact fentichlor photoallergy from soap for handwashing].

Toxicity of pentachlorophenol to six species of white rot fungi as a function of chemical dose.

IgE-mediated inhalant allergy in inhabitants of a building infested by the rice weevil (*Sitophilus oryzae*).

Effect of enhanced erythropoiesis on iron absorption.

Aflatoxin toxicity in cultured human epidermal cells: stimulation by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Potential by m-cresol on transepithelial sodium transport across frog skin induced by insulin.

Genotoxicity of environmental agents in human mammary epithelial cells.

Percutaneous absorption of nicotinic acid, phenol, benzoic acid and triclopyr butoxyethyl ester through rat and human skin in vitro: further validation of an in vitro model by comparison with in vivo data.

Dimethyl disulfide mimics the effects of milk on fetal behavior and responsiveness to cutaneous stimuli.

The potentiation of 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity by tamoxifen in female CD1 mice.

Dermal absorption of chemicals: effect of application of chemicals as a solid, aqueous paste, suspension, or in volatile vehicle.

Evaluation of the role of electrostatic residues in human epidermal growth factor by site-directed mutagenesis and chemical modification.

Pig ear skin as an in-vitro model for human skin permeability.

Health status and needs of migrant farm workers in the United States: a literature review.

Decontamination of human skin exposed to 2,3,7,8-tetrachlorodibenzo-p-Dioxin (TCDD) in vitro.

Skin photosensitizing agents and the role of reactive oxygen species in photoaging.

Recent developments on the hazards posed by 2,3,7,8-tetrachlorodibenzo-p-dioxin in soil: implications for setting risk-based cleanup levels at residential and industrial sites.

Altered expression of a mouse epidermal cytoskeletal protein is a sensitive marker for proliferation induced by tumor promoters.

Induction of the 72-kD heat shock protein in organ-cultured normal human skin.

The amino-acid sequence of a lectin from conger eel, *Conger myriaster*, skin mucus.

[Use of 2,4-dinitrophenol for immunosuppressive action on the recipient in implantation of fetal organs in mice].

NTP Toxicology and Carcinogenesis Studies of Methyl Bromide (CAS: 74-83-9) in B6C3F1 Mice (Inhalation Studies).

2,3,7,8-Tetrachlorodibenzo-p-dioxin and ethinylestradiol as co-mitogens in cultured rat hepatocytes.

Purification and localization of brain-type creatine kinase in sodium chloride transporting epithelia of the spiny dogfish, *Squalus acanthias*.

Carrier-mediated uptake of pravastatin by rat hepatocytes in primary culture.

An automated in vitro dermal absorption procedure: II. Comparative in vivo and in vitro dermal absorption of the herbicide fenoxaprop-ethyl (HOE 33171) in rats.

NTP Toxicology and Carcinogenesis Studies of Monochloroacetic Acid (CAS No. 79-11-8) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Effect of methyl bromide on regional brain glutathione, glutathione-S-transferases, monoamines, and amino acids in F344 rats.

Accidental death caused by the absorption of 2,4-dichlorophenol through the skin.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on benzo(a)pyrene hydroxylase activity in embryos of the Japanese medaka (*Oryzias latipes*).

Decreased hepatic phosphoenolpyruvate carboxykinase gene expression after 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment: implications for the acute toxicity of chlorinated dibenzo-p-dioxins in the rat.

The barrier function in atopic dry skin. Disturbance of membrane-coating granule exocytosis and formation of epidermal lipids?

Reproductive toxicity and toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin. 3. Effects of single doses on the testis of male rats.

The possibility of lidocaine ion pair absorption through excised hairless mouse skin.

Reduced expression of manganese superoxide dismutase in cells resistant to cytolysis by tumor necrosis factor.

Evidence that paraquat is able to cross the blood-brain barrier to a different extent in rats of various age.

Toxicology and carcinogenesis studies of two grades of pentachlorophenol in B6C3F1 mice.

[Fatal voluntary poisoning by parenteral paraquat].

Assessment of lawn care worker exposure to dithiopyr.

[Changes in the laboratory rat during development after parenteral administration of the herbicide Zeazin S-40. II. Morphologic findings].

[Observations of the fibrosing process in paraquat lung injury by chest X-ray and CT].

Human health effects: what the data indicate.

[Occupational asthma caused by scented gravel in cat litter boxes].

Paraquat induced pulmonary fibrosis in three survivors.

Allylamine and acrolein toxicity in perfused rat hearts.

[Elevated pentachlorophenol in urine following Fungifen therapy].

Interaction of xenobiotics on the glucose-transport system and the Na⁺/K⁽⁺⁾-ATPase of human skin fibroblasts.

Inhibition of human and rabbit platelet aggregation by chlorophenoxyacid herbicides.

Acute poisoning with a glyphosate-surfactant herbicide ('Roundup'): a review of 93 cases.

A new insight into the histogenesis of 'mesodermomas'--malignant mesotheliomas.

Studies of the quenching phenomenon in delayed contact hypersensitivity reactions.

An overview of peroxisome proliferator-induced hepatocarcinogenesis.

Dose-dependent increases in metallothionein synthesis in the lung and liver of paraquat-treated rats.

Residues of pentachlorophenol and other chlorinated contaminants in human tissues: analysis by electron capture gas chromatography and electron capture negative ion mass spectrometry.

Increase in metallothionein produced by chemicals that induce oxidative stress.

The influence of skin structure on permeability: an intersite and interspecies comparison with hydrophilic penetrants.

Glyphosate skin binding, absorption, residual tissue distribution, and skin decontamination.

Urinary excretion of acetylcyanamide in rat and human after oral and dermal application of hydrogen cyanamide (H₂N₂CN).

Dermatitis among workers cleaning the Sacramento River after a chemical spill--California, 1991.

The identification of photoallergic potential in the local lymph node assay.

Relative liver tumour promoting activity and toxicity of some polychlorinated dibenzo-p-dioxin- and dibenzofuran-congeners in female Sprague-Dawley rats.

Pathology reevaluation of the Kociba et al. (1978) bioassay of 2,3,7,8-TCDD: implications for risk assessment.

Arsenite as the probable active species in the human carcinogenicity of arsenic: mouse micronucleus assays on Na and K arsenite, orpiment, and Fowler's solution.

Hemolytic activity of ethylene glycol phenyl ether (EGPE) in rabbits.

Induction of hepatic metallothionein by nonmetallic compounds associated with acute-phase response in inflammation.

Toxic and neoplastic responses in the nasal passages: future research needs.

Induction of hsp 72/73 by herbimycin A, an inhibitor of transformation by tyrosine kinase oncogenes.

Great Lakes embryo mortality, edema, and deformities syndrome (GLEMEDS) in colonial fish-eating birds: similarity to chick-edema disease.

Inhibition of mitochondrial respiratory function by an organic solvent extractable component from an extract of burn eschar.

The acute effects of S-(1,2-dichlorovinyl)-L-cysteine and related chemicals on renal function and ultrastructure in the pentobarbital-anesthetized dog: structure-activity relationships, biotransformation, and unique site-specific nephrotoxicity.

In-vivo epidermal nuclear reactions: a selective process.

Symptoms among workers with long-term exposure to methyl bromide. An epidemiological study.

Heat treatment induces an increase in intracellular cyclic AMP content in human epidermoid A-431 cells.

[Coplanar PCBs, PCDFs and PCDDs in the subcutaneous adipose tissue of Yusho patients and normal controls].

Ninety-day toxicity study of sodium monochloroacetate in Sprague-Dawley rats.

PDGF, CSF-1, and EGF induce tyrosine phosphorylation of p120, a pp60src transformation-associated substrate.

[Experience of the Toxicology Information Center in Prague with pesticides].

Dioxin contamination and growth and development in great blue heron embryos.

Hydronephrosis in mice exposed to TCDD-contaminated breast milk: identification of the peak period of sensitivity and assessment of potential recovery.

Evaluation of the persistence of hydronephrosis induced in mice following in utero and/or lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Stimulation by Bt2cAMP of epidermal mucous metaplasia in retinol-pretreated chick embryonic cultured skin, and its inhibition by herbimycin A, an inhibitor for protein-tyrosine kinase.

Ovarian hormones enhance 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated increases in cell proliferation and preneoplastic foci in a two-stage model for rat hepatocarcinogenesis.

TCDD exposure of human embryonic palatal shelves in organ culture alters the differentiation of medial epithelial cells.

Histological study of therapy for infected nonvital permanent teeth with incompletely formed apices.

Long-term carcinogenesis studies on 2,3,7,8-tetrachlorodibenzo-p-dioxin and hexachlorodibenzo-p-dioxins.

A one-year carcinogenicity study with 2,6-dichlorobenzonitrile (Dichlobenil) in male Swiss mice: preliminary note.

Reproductive toxicity and toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin. 2. Problem of paternally-mediated abnormalities in the progeny of rat.

Allergic contact dermatitis to two antioxidants in latex gloves: 4,4'-thiobis(6-tert-butyl-meta-cresol) (Lowinox 44S36) and butylhydroxyanisole. Allergen alternatives for glove-allergic patients.

Vitamin A deficiency and the induction of cutaneous toxicity in murine skin by TCDD.

Mechanisms of cell death.

Phenotypic variability and abnormal type I collagen unstable at body temperature in a family with mild dominant osteogenesis imperfecta.

Chronic inhalation toxicity and carcinogenicity study of methyl bromide in Wistar rats.

Intra- and inter-individual variations in cornified envelope peptide composition in normal and psoriatic skin.

Differential effects of sodium lauryl sulphate and non-anoic acid on the expression of CD1a and ICAM-1 in human epidermis.

Phosphorylation of lipocortin-1 by the epidermal growth factor receptor.

Heat shock proteins in cultured human keratinocytes and fibroblasts.

Influence of the Ah locus on the effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the hepatic epidermal growth factor receptor.

Flap erupts over dioxin meeting.

A re-appraisal of multiplicity of endoglucanase I from *Trichoderma reesei* using monoclonal antibodies and plasma desorption mass spectrometry.

NTP technical report on the toxicity studies of Cresols (CAS Nos. 95-48-7, 108-39-4, 106-44-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Involvement of singlet oxygen in chloroaluminum phthalocyanine tetrasulfonate-mediated photoenhancement of lipid peroxidation in rat epidermal microsomes.

Absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) after low dose dermal exposure.

Amsacrine-induced lesions in DNA and their modulation by novobiocin and 2,4-dinitrophenol.

Alterations in the cross-links of skin collagen of rats treated with biosynthetic growth hormone.

Penetration, distribution and kinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in human skin in vitro.

Ten- and ninety-day toxicity studies of 1,2-dichlorobenzene administered by oral gavage to Sprague-Dawley rats.

[A gas-chromatographic method of analysis of monochloroacetic acid and its sodium salt in the air, skin washings, protective clothing extracts and urine].

Toxic interactions in the rat nose: pollutants from soiled bedding and methyl bromide.

Factors influencing the latency of the peroxisomal enzyme dihydroxyacetone-phosphate acyltransferase (DHAP-AT) in permeabilized human skin fibroblasts.

NTP Toxicology and Carcinogenesis Studies of Sodium Azide (CAS: 26628-22-8) in F344 Rats (Gavage Studies).

Induction of a 31,000-dalton stress protein by prostaglandins D2 and J2 in porcine aortic endothelial cells.

Toxicity of 2,6-dichlorothiobenzamide (chlorthiamid) and 2,6-dichlorobenzamide in the olfactory nasal mucosa of mice.

Oxygen uptake of isolated toad skin epithelium: micromerement and effect of ionic acclimation.

Dual-column high-performance liquid chromatographic cleanup procedure for the determination of polychlorinated dibenzo-p-dioxins and dibenzofurans in fish tissue.

Nature of plant stimulators in the production of *Acetobacter xylinum* ("tea fungus") biofilm used in skin therapy.

Assessment of mitochondrial membrane potential as an indicator of cytotoxicity.

Tissue-specific and organ-specific expression of soybean auxin-responsive transcripts GH3 and SAURs.

Lichen planus-like eruption with esophageal involvement as a result of cyanamide.

Immediate contact reactions to chemicals in the fragrance mix and a study of the quenching action of eugenol.

Cinnamic aldehyde 2% pet. is irritant on patch testing.

Comparison of the activity of topically applied pesticides and the herbicide 2,4-D in two short-term in vivo assays of genotoxicity in the mouse.

Dermal toxicity to rats of isoproturon technical and formulation.

[Scanning electron microscopic study of rat lungs in experimental chronic paraquat poisoning].

Selective vulnerability of hippocampal CA3 neurones after microinfusion of paraquat into the rat substantia nigra or into the ventral tegmental area.

[The immunomorphological characteristics of prolonged exposure to the herbicide linuron].

Ground-glass hepatocytes: light and electron microscopy. Characterization of the different types.

Chronic toxicity and oncogenicity of picloram in Fischer 344 rats.

Inhibition of rat heart mitochondrial electron transport in vitro: implications for the cardiotoxic action of allylamine or its primary metabolite, acrolein.

Failure of acrolein to produce sensitization in the guinea pig maximization test.

Summary of safety evaluation toxicity studies of glufosinate ammonium.

[Permissible dermal exposure dose and safety level for herbicide residues as an occupational hygiene standard for the evaluation of exposure].

PO₂ modulation of paraquat-induced microvascular injury in isolated dog lungs.

Irreversible binding and toxicity of the herbicide dichlobenil (2,6-dichlorobenzonitrile) in the olfactory mucosa of mice.

[Pulmonary lesion of paraquat poisoning on high resolution CT].

Full thickness skin burns secondary to an unusual exposure to diquat dibromide.

Paraquat pharmacokinetics using a subcutaneous toxic low dose in the rat.

An unusual case of fatal accidental paraquat poisoning.

Poisoning by some insecticides, herbicides and fungicides.

Long-term carcinogenicity bioassay of the herbicide atrazine in F344 rats.

Absence of delayed neurotoxicity and increased plasma butyrylcholinesterase activity in triallate-treated hens.

Chloracne associated with employment in the production of pentachlorophenol.

A possible role for calcium in oxidative plant stress.

Health status of Air Force veterans occupationally exposed to herbicides in Vietnam. I. Physical health.

Central action of an inhibitor of brain dopa-decarboxylase, NSD-1015, on cyanamide-induced alcohol drinking in rats.

The spectrum of contact urticaria. Wheals, erythema, and pruritus.

Effects of skin preapplication treatments and postapplication cleansing agents on dermal absorption of 2,4-dichlorophenoxyacetic acid dimethylamine by Fischer 344 rats.

Dermal absorption of the phenoxy herbicides 2,4-D, 2,4-D amine, 2,4-D isooctyl, and 2,4,5-T in rabbits, rats, rhesus monkeys, and humans: a cross-species comparison.

TCDD-induced altered expression of growth factors may have a role in producing cleft palate and enhancing the incidence of clefts after coadministration of retinoic acid and TCDD.

Human body burden of polychlorinated dibenzofurans associated with toxicity based on the yusho and yucheng incidents.

Embryotoxic effects of sodium azide infusions in the Syrian hamster.

Substitution of arginine for glycine at position 847 in the triple-helical domain of the alpha 1 (I) chain of type I collagen produces lethal osteogenesis imperfecta. Molecules that contain one or two abnormal chains differ in stability and secretion.

A base substitution at a splice site in the COL3A1 gene causes exon skipping and generates abnormal type III procollagen in a patient with Ehlers-Danlos syndrome type IV.

Inhibition of testicular steroidogenesis in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats: evidence that the key lesion occurs prior to or during pregnenolone formation.

Confirmation by peptide sequence and co-expression on various cell types of the identity of CD44 and P85 glycoprotein.

Lead exposure lowers the set point for food consumption and growth in weanling rats.

Photosensitizing potential of benzanthrone.

[Diagnosis of dermatitis due to plants].

Organization and disorganization of actin filaments in human epidermal keratinocytes: heat-shock treatment and recovery process.

Inhibition of high-density growth arrest in human squamous carcinoma cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

An approach towards understanding the genesis of sunlight-induced skin cancer.

Contact sensitization by pesticides in farmers.

Another mechanism for the defect in type III collagen accumulation in Ehlers-Danlos syndrome type IV: increased intracellular degradation of the procollagen.

Effects of FeSO₄ on B16 melanoma cells differentiation and proliferation.

Differential toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C57BL/6J mice congenic at the Ah Locus.

Characterization of the peak period of sensitivity for the induction of hydronephrosis in C57BL/6N mice following exposure to 2,3,7, 8-tetrachlorodibenzo-p-dioxin.

Alteration of collagen composition and cross-linking in keloid tissues.

Influence of dissolution rate and pH of oral medications on drug-induced esophageal injury.

[The nature, severity and distribution of obstructive airway lesions in COPD studied by morphometry and computer-assisted 3-D reconstruction].

Purification and characterization of a Mr approximately 66,000 lung-derived (paracrine) growth factor that preferentially stimulates the in vitro proliferation of lung-metastasizing tumor cells.

Studies on the role of lipid peroxidation in the acute toxicity of TCDD in rats.

Rat embryonic palatal shelves respond to TCDD in organ culture.

Induction of DNA damage by dimethylarsine, a metabolite of inorganic arsenics, is for the major part likely due to its peroxy radical.

Immunogenicity of collagenous implants.

Stress protein synthesis in human keratinocytes treated with sodium arsenite, phenyldichloroarsine, and nitrogen mustard.

Influence of habitat modification on the intestinal helminth community ecology of cottontail rabbit populations.

Preparation of triazolo[1,5-c]pyrimidines as potential antiasthma agents.

Risk factors for squamous cell carcinoma of the skin in Saskatchewan, Canada.

Winter's skin.

[Acute myelomonocytic leukemia with mastocytosis in bone marrow].

Methyl bromide myoclonus: an electrophysiological study.

Ethylene dichloride: the influence of disulfiram or ethanol on oncogenicity, metabolism, and DNA covalent binding in rats.

Relative toxicity and tumor-promoting ability of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), 2,3,4,7,8-pentachlorodibenzofuran (PCDF), and 1,2,3,4,7,8-hexachlorodibenzofuran (HCDF) in hairless mice.

Neurogenic inflammation, vascular permeability, and mast cells. Capsaicin desensitization fails to influence IgE-anti-DNP induced vascular permeability in rat airways.

Cornified envelopes in congenital disorders of keratinization.

A host-mediated in vivo/in vitro assay with peritoneal murine macrophages for the detection of carcinogenic chemicals.

Methemoglobinemia with oxidized hemoglobins and modified hemoglobins found in bloods of workers handling aromatic compounds and in those of a man who drank cresol solution.

Effects of TCDD on embryonic ureteric epithelial EGF receptor expression and cell proliferation.

[The intensification of lipid peroxidation in the skin for the suppression of experimental dermatitis].

The effects of TCDD on receptors for epidermal growth factor, glucocorticoid, and estrogen in Ah-responsive and -nonresponsive congenic mice and the effects of TCDD on estradiol metabolism in a liver tumor promotion model in female rats.

Comparative genetic mechanisms of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced tumors.

Thirty-four-year mortality follow-up of BASF employees exposed to 2,3,7,8-TCDD after the 1953 accident.

Natural chemicals, synthetic chemicals, risk assessment, and cancer.

Marfan syndrome: absence of type I or III collagen structural defects in 25 patients.

The effects of medium chain fatty acids and fluoride on fissure caries in Wistar rats.

Induction of ethoxyresorufin-O-deethylase and inhibition of glucocorticoid receptor binding in skin and liver of haired and hairless HRS/J mice by topically applied 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Changes in disposition kinetics of sulphadimidine in response to acute regional liver damage in sheep.

Memory consolidation of weak training experiences by hormonal treatments.

Cleavage specificity of human skin type IV collagenase (gelatinase). Identification of cleavage sites in type I gelatin, with confirmation using synthetic peptides.

Regulation of the spatial order of cortical microtubules in developing guard cells of *Allium*.

Nature's chemicals and synthetic chemicals: comparative toxicology.

Drug-induced esophageal injury. Histopathological study in a rabbit model.

UV-induced protein alterations and lipid oxidation in erythrocyte membranes.

2,3,7,8-Tetrachlorodibenzo-p-dioxin inhibition of 17 beta-estradiol-induced increases in rat uterine epidermal growth factor receptor binding activity and gene expression.

Oxidant stress leads to transcriptional activation of the human heme oxygenase gene in cultured skin fibroblasts.

[The effects of metabolic inhibitors on the excitability of the cells in embryonic epidermis of *Cynops orientalis*].

[Ifosfamide-induced urinary bladder lesion and its inhibition by mesna].

Age-related changes in dermal absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,4,7,8-pentachlorodibenzofuran.

The phosphocreatine shuttle of sea urchin sperm: flagellar creatine kinase resulted from a gene triplication.

A highly specific and quantitative method for determining type III/I collagen ratios in tissues.

Intracellular accumulation of azithromycin by cultured human fibroblasts.

Acetobacter cellulose pellicle as a temporary skin substitute.

NTP Toxicology and Carcinogenesis Studies of Iodinated Glycerol (Organidin(R)) (CAS No. 5634-39-9) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Kinetic studies of plasminogen activation by epithelial tissue plasminogen activator.

Effects of sodium arsenite on the cytotoxicity of bleomycin.

Isolation and sequencing of NOP1. A yeast gene encoding a nucleolar protein homologous to a human autoimmune antigen.

Patterns of expression of the JIM4 arabinogalactan-protein epitope in cell cultures and during somatic embryogenesis in *Daucus carota* L.

Attempts to identify the causative allergen in cases of allergic contact dermatitis using an in vitro lymphocyte transformation test.

Preservatives in insulin preparations impair leukocyte function. In vitro study.

Polyhalogenated dibenzo-p-dioxins and dibenzofurans and the immune system. 1. Effects on peripheral lymphocyte subpopulations of a non-human primate (*Callithrix jacchus*) after treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Studies on the pharmacokinetics and mutagenic potential of rhodamine B.

Complex chlorinated hydrocarbons: occupational exposure in the sawmill industry.

Oxidative stress induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Persistence of various polychlorinated dibenzo-p-dioxins and dibenzofurans (PCDDs and PCDFs) in hepatic and adipose tissue of marmoset monkeys.

Placental markers of human exposure to polychlorinated dibenzofurans and polychlorinated biphenyls: implications for risk assessment.

Carcinogenic activity associated with halogenated acetones and acroleins in the mouse skin assay.

The safety of roundup pesticide.

[Photoallergic dermatitis caused by the herbicide phenmedipham].

Exposure to paraquat through skin absorption: clinical and laboratory observations of accidental splashing on healthy skin of agricultural workers.

Oral and dermal pharmacokinetics of triclopyr in human volunteers.

[Structural changes in the rat cerebral cortex induced by alcohol in combination with aldehyde dehydrogenase inhibitors].

Effects of a diphenyl ether herbicide (CNP emulsion) on mouse fetuses.

Induction of *sfIA* SOS function by peroxides using three different *E. coli* strains.

Cancer risk in a cohort of licensed pesticide users.

Comparative toxicity of allylamine and acrolein in cultured myocytes and fibroblasts from neonatal rat heart.

Paraquat poisoning by skin absorption.

Effect of acute propanil exposure on the immune response of C57Bl/6 mice.

[Paraquat poisoning. Pulmonary lesions].

Rat urinary bladder epithelial lesions induced by acrolein.

Contact leucoderma from paraquat dichloride?

Dinoseb toxicosis in two dogs.

Teratological evaluation of the phenoxyacid herbicide MCPA in the regenerating forelimb of the adult newt.

Contact dermatitis in children.

Interaction of hexachlorocyclohexane (HCH) and chlorpropham (CIPC) in male rats.

The behavioral effects of pesticides in male mice.

Application of an immunoassay for cyclic acrolein deoxyguanosine adducts to assess their formation in DNA of *Salmonella typhimurium* under conditions of mutation induction by acrolein.

[Lung changes in rats under the action of paraquat and the importance of antioxidants].

[The pulmonary lesions in paraquat poisoning].

An immunohistochemical study of the fibrosing process in paraquat lung injury.

Paraquat is not accumulated in B16 tumor cells by the polyamine transport system.

Effects of 2,4-dichlorophenoxyacetic acid (2,4-D) on biogenic amines and their acidic metabolites in brain and cerebrospinal fluid of rats.

Tumour initiatory activity of a herbicide diuron on mouse skin.

Aspects of pharmaceutical and chemical standardization of patch test materials.

Experimental pulmonary fibrosis induced by paraquat plus oxygen in rats: a morphologic and biochemical sequential study.

Cyanamide and its calcium form: do they differ with respect to their action on the liver cell? Experimental study in the rat.

Cross-sensitization patterns in guinea pigs between cinnamaldehyde, cinnamyl alcohol and cinnamic acid.

Inhibition of brain dopa-decarboxylase by RO 4-4602 infused ICV blocks alcohol drinking induced in rats by cyanamide.

Near real-time monitoring of potential dermal exposure during backpack herbicide spraying.

Changes in catalase, glutathione peroxidase and glutathione-S-transferase activities in the liver of newts exposed to 2-methyl-4-chlorophenoxyacetic acid (MCPA).

Differential effects of hyperoxia and hydrogen peroxide on DNA damage, polyadenosine diphosphate-ribose polymerase activity, and nicotinamide adenine dinucleotide and adenosine triphosphate contents in cultured endothelial cells and fibroblasts.

Penetration of the fragrance compounds, cinnamaldehyde and cinnamyl alcohol, through human skin in vitro.

Disposition of 2,4-dichlorophenoxyacetic acid dimethylamine by Fischer 344 rats dosed orally and dermally.

2,3,7,8-tetrachlorodibenzo-p-dioxin-induced porphyria cutanea tarda among pediatric patients.

Epidermal damage induced by irritants in man: a light and electron microscopic study.

[In vivo study of the analgesic action of different methods and drugs in endodontics].

[Noncirrhotic liver fibrosis after chronic arsenic poisoning].

Effect of subacute low level dietary sodium arsenite on dogs.

Human skin and post-burn scar hyaluronan: demonstration of the association with collagen and other proteins.

Induction of in vitro differentiation of mouse embryonal carcinoma (F9) and erythroleukemia (MEL) cells by herbimycin A, an inhibitor of protein phosphorylation.

Mortality in an area contaminated by TCDD following an industrial incident.

Retinoid receptor antisense DNAs inhibit alkaline phosphatase induction and clonogenicity in malignant keratinocytes.

Ten-year mortality study of the population involved in the Seveso incident in 1976.

Effect of TCDD on the density of Langerhans cells in murine skin.

Target tissue morphology and serum biochemistry following 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure in a TCDD-susceptible and a TCDD-resistant rat strain.

Chronic arsenicism with vitiligo, hyperthyroidism, and cancer.

Skin reactions to irritants assessed by non-invasive bioengineering methods.

Follow-up of workers from the prefabricated concrete industry after the addition of ferrous sulphate to Danish cement.

[Fibrogenesis and glycoconjugates].

Cancer incidence of workers in a Finnish sawmill.

Dynamics of epidermal growth factor receptor internalization studied by Nanovid light microscopy and electron microscopy in combination with immunogold labeling.

Carriage of Staphylococcus aureus and inflamed infusion sites with insulin-pump therapy.

Iodides and bromides.

Serum-free culture of insulin-secreting clonal cells from a hamster insulinoma.

Development and validation of a cellular transplant model for leukemia in Fischer rats: a short-term assay for potential anti-leukemic chemicals.

Follow-up of subjects who developed chloracne following TCDD exposure at Seveso.

Monitoring of genetic instability in subjects with increased risk of cancer.

Reproductive toxicity and pharmacokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin. 1. Effects of high doses on the fertility of male rats.

Assessment of hazards to workers applying pesticides.

Prevalence of cement eczema in Denmark before and since addition of ferrous sulfate to Danish cement.

[Contact eczema caused by pesticides in East Germany].

A pharmacological approach to cellular mechanisms of PGI₂-induced gastric cytoprotection on ethanol-induced gastric mucosal damage in rats.

[Recent experience with mites in stored products].

Cleavage specificity of type IV collagenase (gelatinase) from human skin. Use of synthetic peptides as model substrates.

In vivo activation of peripheral blood polymorphonuclear neutrophils by gamma interferon results in enhanced fungal killing.

Seasonal variation of skin resistance to irritants.

[Urinary bioavailability of sodium-2-mercaptoethanesulfonate (Uromitexan) following intravenous, subcutaneous and continuous subcutaneous administration].

Proteoglycans of the articular disc of the bovine temporomandibular joint. II. Low molecular weight dermatan sulphate proteoglycan.

Characterization of 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated decreases in dexamethasone binding to rat hepatic cytosolic glucocorticoid receptor.

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters embryonic palatal medial epithelial cell differentiation in vitro.

Collagen metabolism in ultraviolet irradiated hairless mouse skin and its correlation to histochemical observations.

Effects of pulsed electromagnetic fields on rat skin metabolism.

Differential cytotoxicity of sodium arsenite in human fibroblasts and Chinese hamster ovary cells.

Urinary arsenic concentrations and speciation in Cornwall residents.

NTP Toxicology and Carcinogenesis Studies of 2,4-Dichlorophenol (CAS No. 120-83-2) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Comparative studies on the primary structure of human cystatin as from epidermis, liver, spleen, and leukocytes.

Prevention of cytotoxicity and inhibition of intercellular communication by antioxidant catechins isolated from Chinese green tea.

Functional characterization of monoclonal antibodies directed against fibrin binding domains of tissue-type plasminogen activator.

[Tissue distribution, inductive effect on liver enzymes and acute toxicity of 2,3,4,7,8-pentachlorodibenzofuran in Golden Syrian hamsters].

Decreased ligand binding to the hepatic glucocorticoid and epidermal growth factor receptors after 2,3,4,7,8-pentachlorodibenzofuran and 1,2,3,4,7,8-hexachlorodibenzofuran treatment of pregnant mice.

[Polychlorinated dibenzo-p-dioxins in the subcutaneous adipose tissue of yusho patients].

Synergistic toxicity between arsenic and methylated selenium compounds.

³²P-postlabeling assay for carcinogen-DNA adducts and other dna modifications.

Somatic embryogenesis and plants from immature zygotic embryos of the species *Musa acuminata* and *Musa balbisiana*.

NTP Toxicology and Carcinogenesis Studies of Two Pentachlorophenol Technical-Grade Mixtures (CAS No. 87-86-5) in B6C3F1 Mice (Feed Studies).

Microthrombomodulin. Residues 310-486 from the epidermal growth factor precursor homology domain of thrombomodulin will accelerate protein C activation.

Surface tension in the developing mammal: anisotropic tension generation in the dorsal skin of the perinatal rat.

[Local and skin-resorptive effects of monochloroacetic acid chloranhydride].

Interaction of human eosinophils or neutrophils with *Trypanosoma cruzi* in vitro causes bystander cardiac cell damage.

Comparative dermal absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin and three polychlorinated dibenzofurans.

Heme oxygenase is the major 32-kDa stress protein induced in human skin fibroblasts by UVA radiation, hydrogen peroxide, and sodium arsenite.

Effects of immunosuppressive chemicals on lymphoid development in foetal thymus organ cultures.

The use of multiple endpoints to define the mechanism of action of reproductive toxicants and germ cell mutagens.

Genotoxicity of azidoalanine in mammalian cells.

Spectroscopic studies of cutaneous photosensitizing agents--XIII. pH dependence of the photochemistry of photoallergens bithionol and fentichlor: an electron spin resonance study of the free radical photoproducts.

Polychlorinated biphenyls (PCBs): mutagenicity and carcinogenicity.

Neuropathological lesions after microinfusion of paraquat and MPP⁺ into different areas of the rat brain.

Health and reproductive outcomes among American Legionnaires in relation to combat and herbicide exposure in Vietnam.

[No Parkinsonian syndrome following acute paraquat poisoning].

[A case of bullous contact dermatitis caused by butifos].

[Hygienic standardization of monochloroacetic acid chloranhydride in the air of the work area].

Evaluation of the carcinogenic risk of the phenoxyherbicide MCPA to an urodele amphibian.

Functional teratogens of the rat kidney. II. Nitrofen and ethylenethiourea.

[20 years' experience with dermatologic assessment of herbicides and pesticides].

Topical non-steroidal anti-inflammatory drugs inhibit non-immunologic immediate contact reactions.

Mutagenesis of xeroderma pigmentosum fibroblasts by acrolein.

[Liver lesion caused by cyanamide. Study of a case and review of the bibliography].

Limited dermal ossification: a case report.

Immune-mediated glomerulonephritis after exposure to paraquat.

Paraquat poisoning by skin absorption: a review.

Prevention of occupational skin disease.

Autoradiography of [¹⁴C]paraquat or [¹⁴C]diquat in frogs and mice: accumulation in neuromelanin.

DNA damage in stomach, kidney, liver and lung of rats treated with atrazine.

Toxicokinetics and bioavailability of paraquat in rats following different routes of administration.

The accumulation and localisation of putrescine, spermidine, spermine and paraquat in the rat lung. In vitro and in vivo studies.

Altered regulation of P-450IA1 expression in a multidrug-resistant MCF-7 human breast cancer cell line.

Type II achondrogenesis-hypochondrogenesis: identification of abnormal type II collagen.

Cutaneous manifestations of tetrachlorodibenzo-p-dioxin in children and adolescents. Follow-up 10 years after the Seveso, Italy, accident.

Steroid hormones and medications that alter cancer risks.

Chemically induced inflammation in rat oral mucosa.

Molecular diversity in the abdominal aortic aneurysm phenotype.

[Effectiveness of introducing individual protection measures for workers in the phenazone industry].

Screening of pharmacological agents given peripherally with respect to TCDD-induced wasting syndrome in Long-Evans rats.

Suppression of keratinocyte differentiation in SSC-9 human squamous carcinoma cells by benzo[a]pyrene, 12-O-tetradecanoylphorbol-13-acetate and hydroxyurea.

Carcinogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the Syrian golden hamster.

A medical follow-up of the health effects of long-term exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Type I procollagen in the severe non-lethal form of osteogenesis imperfecta. Defective pro-alpha 1(I) chains in a patient with abnormal proteoglycan metabolism and mineral deposits in the dermis.

[Health survey on morbidity and accidents in various productive agricultural sectors].

Morphological and biochemical characterization of the cornified envelopes from human epidermal keratinocytes of different origin.

Monoclonal antibodies to type IV collagenase recognize a protein with limited sequence homology to interstitial collagenase and stromelysin.

Dermal dysplasia characterized by collagen disorder-related skin fragility in a cow.

Skin lesions due to exposure to methyl bromide.

An immunotoxicological evaluation of 4,4'-thiobis-(6-t-butyl-m-cresol) in female B6C3F1 mice. 2. Humoral and cell-mediated immunity, macrophage function, and host resistance.

Photoallergic contact dermatitis from fentichlor.

Toxicity and disposition of 2,3,4,7,8-pentachlorodibenzofuran (4PeCDF) in the rhesus monkey (*Macaca mulatta*).

Landspreading dioxin-contaminated papermill sludge: a complex problem.

Doxorubicin cellular pharmacokinetics and DNA breakage in a multi-drug resistant B16 melanoma cell line.

Species differences in 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity and biotransformation in fish.

Altered elastin and collagen synthesis associated with progressive pulmonary hypertension induced by monocrotaline. A biochemical and ultrastructural study.

Variants of human tissue-type plasminogen activator. Fibrin binding, fibrinolytic, and fibrinogenolytic characterization of genetic variants lacking the fibronectin finger-like and/or the epidermal growth factor domains.

Mortality among California highway workers.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxicity in yellow perch (*Perca flavescens*).

Morphologic lesions and acute toxicity in rainbow trout (*Salmo gairdneri*) treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Oral and dermal toxicity of MSMA to New Zealand white rabbits, *Oryctolagus cuniculus*.

Retained T-cell reactivity of rye grass pollen extract following cleavage with cyanogen bromide and nitrothiocyanobenzoic acid.

Biological effects of epidermal growth factor and 2,3,7,8-tetrachlorodibenzo-p-dioxin on developmental parameters of neonatal mink.

[Multiple squamous cell cancer as a late effect following arsenic treatment of psoriasis].

Rabbit serum hypertriglyceridemia after administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Forestomach carcinogens: pathology and relevance to man.

Dynamic behavior of the transferrin receptor followed in living epidermoid carcinoma (A431) cells with nanovid microscopy.

NTP Toxicology and Carcinogenesis Studies of C.I. Acid Orange 3 (CAS No. 6373-74-6) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Characterization of type I collagen from the skin of blue grenadier (*Macrurus novaezelandiae*).

Early changes in dermal collagen of mice exposed to chronic UVB irradiation and the effects of a UVB sunscreen.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-induced alterations in lipid peroxidation, enzymes, and divalent cations in rat testis.

Autoradiographic studies of the renal clearance of circulating type I collagen fragments in the rat.

Degeneration and regeneration of the olfactory epithelium following inhalation exposure to methyl bromide: pathology, cell kinetics, and olfactory function.

Partial characterization of specific cantharidin binding sites in mouse tissues.

A 10-kDa cyanogen bromide fragment from the epidermal growth factor homology domain of rabbit thrombomodulin contains the primary thrombin binding site.

Differential role of reactive oxygen intermediates in photofrin-I- and photofrin-II-mediated photoenhancement of lipid peroxidation in epidermal microsomal membranes.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on murine skin.

Bioavailability of soil-bound TCDD: dermal bioavailability in the rat.

CO₂ production of the chick embryo during the first day of post-laying development.

Metabolic activation of the mutagen azide in biological systems.

The permeability of grafted human transplant skin in athymic mice.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes an increase in protein kinases associated with epidermal growth factor receptor in the hepatic plasma membrane.

Pharmacokinetics and biological activity of 2,3,7,8-tetrachlorodibenzo-p-dioxin. 1. Dose-dependent tissue distribution and induction of hepatic ethoxyresorufin O-deethylase in rats following a single injection.

Neoplastic transformation of Chinese hamster cells in vitro after treatment with flavoring agents.

Acute, pharmacokinetic, and subchronic toxicological studies of 2,4-dichlorophenoxyacetic acid.

Evidence for participation of lipid peroxidation and iron in diquat-induced hepatic necrosis in vivo.

Eighty-five day postexposure follow-up study in Fischer 344 rats after repeated exposures to methyl isocyanate vapor.

[Clinicopathological evaluation of the lungs with unusual distribution of paraquat lesions].

Operator exposure from closed system loading and application of alachlor herbicide.

Effect of BCNU pretreatment on diquat-induced oxidant stress and hepatotoxicity.

Effect of tridiphane on reproductive parameters in Fischer 344 rats.

Occupational risk and the development of premalignant skin lesions among paraquat manufacturers.

Worker exposure to a herbicide applied with ground sprayers in the United Kingdom.

[Morphologic lesions in paraquat poisoning].

Paraquat poisoning: clinical features and immediate general management.

Mechanism of paraquat toxicity in lung and its relevance to treatment.

Paraquat--a review of safety in agricultural and horticultural use.

Critical role of iodination for T cell recognition of thyroglobulin in experimental murine thyroid autoimmunity.

Cyanamide given ICV or systemically to the rat alters subsequent alcohol drinking.

Allyl alcohol liver injury: suppression by ethanol and relation to transient glutathione depletion.

Autoradiographic studies on in vivo covalent binding of N-hydroxy-2-acetylaminofluorene in rat liver containing gamma-glutamyltranspeptidase-positive foci. The effect of the sulfation-inhibitor pentachlorophenol.

Initiation of hepatocarcinogenesis in infant male B6C3F1 mice by N-hydroxy-2-aminofluorene or N-hydroxy-2-acetylaminofluorene depends primarily on metabolism to N-sulfooxy-2-aminofluorene and formation of DNA-(deoxyguanosin-8-yl)-2-aminofluorene adducts.

Acetylsalicylic acid inhibits non-immunologic contact urticaria.

Paraquat-induced, dose-dependent conditioned taste aversions and weight loss mediated by the area postrema.

Elimination kinetics of ethanol and acetaldehyde in healthy men during the calcium carbimide-alcohol flush reaction.

Modification of intracellular glucose metabolism in human skin fibroblast preincubated with p-chlorophenoxyisobutyrate.

Exposure of the skin to methyl bromide: a study of six cases occupationally exposed to high concentrations during fumigation.

Alterations in lipid-linked oligosaccharide metabolism in human melanoma cells concomitant with induction of stress proteins.

[An immunotoxicologic experiment performed with the pesticide dinoseb].

Irritation and sensitization potential of pesticides.

Irritant dermatitis from tri-butyl tin oxide and contact allergy from chlorocresol.

Alterations in the expression of specific epidermal keratin markers in the hairless mouse by the topical application of the tumor promoters 2,3,7,8-tetrachlorodibenzo-p-dioxin and the phorbol ester 12-O-tetradecanoylphorbol-13-acetate.

[Toxico-allergic dermatitis induced by ethylenediamine in the manufacture of the herbicide zineb].

The effect of IgE-mediated mast cell degranulation on the expression of experimental contact sensitivity in the mouse.

Inactivation of *Bacillus piliformis* spores by heat and certain chemical disinfectants.

Fungicidal activity of human neutrophils and monocytes on dermatophyte fungi, *Trichophyton quinckeanum* and *Trichophyton rubrum*.

Pulmonary interstitial fibrosis induced in hapten-immune hamsters.

Dermatitis in a rubber tyre factory.

Reproductive tract lesions resulting from subchronic administration (63 days) of tri-o-cresyl phosphate in male rats.

Growth inhibitory effect of sodium azide in chemosensitivity assays.

A structural mutation of the collagen alpha 1(I)CB7 peptide in lethal perinatal osteogenesis imperfecta.

Immunochemical characterization of fibrinogen, fibrin I, and fibrin II in human thrombi and atherosclerotic lesions.

Catalase in cultured skin fibroblasts from patients with the cerebro-hepato-renal (Zellweger) syndrome: normal maturation in peroxisome-deficient cells.

Drug-induced cholestasis.

Clinical reports on plasma exchange in the Kidney Center, Tokai University School of Medicine.

[Epicutaneous testing with plant protective and pest control agents (pesticides)].

Orientation staining for the demonstration of *Mycobacterium leprae* in semithin sections.

Identification and subcellular distribution of cornified envelope precursor proteins in the transformed human keratinocyte line SV-K14.

UVB-induced collagen changes in the skin of the hairless albino mouse.

The ethylester of monochloroacetic acid.

Endogenous peroxidase activity in human cutaneous and adenoidal mast cells.

Induction of photoallergy in guinea-pigs by injection of photoallergen-protein conjugates.

Urinary chlorophenols in sawmill workers.

A canine model for the study of hapten-specific suppression of IgE-mediated bronchoconstriction and anaphylaxis.

Antineoplastic activity of azacarbazoles. II. Effect of alpha-carboline and its derivatives on transplantable animal neoplasms.

Pesticides and cancer risks in agriculture.

[Acute lung failure--a critical analysis].

[Follow-up of patients with chloracne in the Seveso area].

Prevention of cement dermatitis in construction workers with iron sulphate.

Triazene metabolism. VI. 3-Azidomethyl-3-alkyl-1-aryltriazenes, a new class of anti-tumour triazene with potential pro-drug applications.

Ah receptor: relevance of mechanistic studies to human risk assessment.

Cantharidin poisoning associated with specific binding site in liver.

Interaction of the mutagenic metabolite of sodium azide, synthesized in vitro, with DNA of barley embryos.

Both near ultraviolet radiation and the oxidizing agent hydrogen peroxide induce a 32-kDa stress protein in normal human skin fibroblasts.

The Mr 24,000 phosphoprotein from developing bone is the NH₂-terminal propeptide of the alpha 1 chain of type I collagen.

Spectroscopic studies of cutaneous photosensitizing agents--XII. Spin trapping study of the free radicals generated during the photolysis of photoallergens bithionol and fentichlor.

Evidence that 2,3,7,8-tetrachlorodibenzo-p-dioxin and thyroid hormones act through different mechanisms in human keratinocytes.

[Effect of highly dispersed iron powder and iron salt on the endogenous level of iron and zinc in animal organs and tissues].

Reversed short-circuit current across isolated skin of the toad *Bufo arenarum*.

TCDD (2,3,7,8-tetrachlorodibenzo-p-dioxin) causes an increase in protein tyrosine kinase activities at an early stage of poisoning in vivo in rat hepatocyte membranes.

Oxygen metabolite-induced cytotoxicity to cultured rat gastric mucosal cells.

Studies on the skin uptake and efflux kinetics of N-phenyl-p-phenylenediamine: an aromatic amine intermediate.

Dermal absorption of the antioxidant 4,4'-thiobis(6-tert-butyl-m-cresol) in Sencar mice and Fischer rats.

Binding and internalization of recombinant human erythropoietin in murine erythroid precursor cells.

Effect of metabolic inhibitors on platelet attachment, spreading and aggregation on collagen-coated surfaces.

Depression of rat testicular 17-hydroxylase and 17,20-lyase after administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Combinations of mesna with cyclophosphamide or adriamycin in the treatment of mice with tumors.

The toxicological significance of 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds in human adipose tissue.

Pathobiological effects of aldehydes in cultured human bronchial cells.

Central nervous system toxicity of some common environmental residues in the mouse.

Comparison of the penetration of 14 pesticides through the skin of young and adult rats.

[Excretory function of the liver with an allyl alcohol lesion and the antioxidant correction of the disorders].

Dome formation in cell cultures of chick embryo retinal pigment epithelium and effects of ouabain and 2,4-dinitrophenol thereon.

Measurement of in vivo lipid peroxidation and toxicological significance.

Urticaria from contact with pentachlorophenolate.

[Occupational eczema in billposters].

Acute, 14-day repeated dosing, and 90-day subchronic toxicity studies of potassium picloram.

The toxicity of 2,4-dichlorophenoxyacetic acid to the adult crested newt.

Toxicity of 2-methyl-4-chlorophenoxyacetic acid to the adult crested newt.

Hepatic disease associated with ground-glass inclusions in hepatocytes after cyanamide therapy.

Irritation, sensitization, photoirritation and photosensitization assays with a glyphosate herbicide.

Chloracne from pentachlorophenol-preserved wood.

Cheilitis: occult allergy to cinnamic aldehyde.

The effect of topically applied n-butylester of 2,4-dichlorophenoxyacetic acid on the immune response in mice.

The corrected collagen content in paraquat lungs.

The role of pesticides in skin disease.

Neurotoxicologic examination of rats dermally exposed to 2,4-D amine for three weeks.

[A case of acne in a subject exposed to paraquat].

Dioxin exposure. CDC study still at square one.

Management of acute childhood poisonings caused by selected insecticides and herbicides.

Allergic contact dermatitis from aminotriazole.

[Lung damage caused by paraquat. 1. Histologic, histochemical and pathophysiologic findings in rat lungs following acute paraquat poisoning].

Skin lesions as a sign of subacute pentachlorophenol intoxication.

[Ultrastructural changes on the alveolar surface in experimental respiratory distress syndrome with emphasis on the detection of surfactants].

Drug-alcohol flush reaction and breath acetaldehyde concentration: no interference with an infrared breath alcohol analyzer.

Diphenhydramine and the calcium carbimide-ethanol reaction: a placebo-controlled clinical study.

Lack of neuropathologic consequences of repeated dermal exposure to 2,4-dichlorophenoxyacetic acid in rats.

Dermal exposure and urinary metabolite excretion in farmers repeatedly exposed to 2,4-D amine.

Altered lung function and structure in the rat after subchronic exposure to acrolein.

Collagen defects in lethal perinatal osteogenesis imperfecta.

Induction of 32- and 34-kDa stress proteins by sodium arsenite, heavy metals, and thiol-reactive agents.

Effects of BHA and related phenols on the forestomach of rats.

Methyl isocyanate subchronic vapor inhalation studies with Fischer 344 rats.

Teratologic evaluation of hexabrominated naphthalenes in C57BL/6N mice.

Regression of methyl bromide-induced forestomach lesions in the rat.

Biosynthesis of electron transfer flavoprotein in a cell-free system and in cultured human fibroblasts. Defect in the alpha subunit synthesis is a primary lesion in glutaric aciduria type II.

The molecular defect in an autosomal dominant form of osteogenesis imperfecta. Synthesis of type I procollagen containing cysteine in the triple-helical domain of pro-alpha 1(I) chains.

Clinical variability of osteogenesis imperfecta reflecting molecular heterogeneity: cysteine substitutions in the alpha 1(I) collagen chain producing lethal and mild forms.

Heat stress proteins and experimental cancer metastasis.

A novel biologically active seleno-organic compound--VI. Protection by ebselen (PZ 51) against galactosamine/endotoxin-induced hepatitis in mice.

Effect of mouse skin tumor promoters upon [3H]uridine exchange and focus formation in cultures of C3H/10T1/2 mouse fibroblasts.

Effect of combined treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and phototherapy on bilirubin metabolism in the jaundiced Gunn rat.

Evaluating toxin-induced hepatic injury in rats by laboratory results and discriminant analysis.

Health effects of long-term exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Phenotypic alterations in tumors that developed from threshold subcutaneous inocula. I. Reduced binding of natural antibodies and sensitivity to hypotonic lysis.

S-antigen-specific rat T cell lines recognize peptide fragments of S-antigen and mediate experimental autoimmune uveoretinitis and pinealitis.

Collagen in human aorta. Changes in the type III/I ratio and concentration of the reducible crosslink, dehydrohydroxylysinonorleucine in ascending aorta from healthy subjects of different age and patients with annulo-aortic ectasia.

Identification of ferrous sulfate toxicity in a commercial broiler flock.

Uptake of 2,3,7,8-tetrachlorodibenzo-p-dioxin from plasma lipoproteins by cultured human fibroblasts.

Desensitization of contact allergy to DNFB in mice. III. Characteristics of immediate desensitization induced by haptenated spleen cells.

Further discussion concerning porphyria cutanea tarda and TCDD exposure.

The diagnosis of dioxin-associated illness.

Interaction of monoclonal antibodies with the IgE-receptor on rat mast cells and rat basophilic leukemia (RBL) cells.

A variant primary structure of apolipoprotein C-II in individuals of African descent.

The human immune response to reconstituted bovine collagen.

A pilot epidemiologic study of possible health effects associated with 2,3,7,8-tetrachlorodibenzo-p-dioxin contaminations in Missouri.

Changes in the physical and chemical properties of skin collagen from broiler chickens exhibiting oily bird syndrome.

Lung neoplasms in rodents after chronic administration of dimethyl hydrogen phosphite.

Sodium arsenite potentiates the clastogenicity and mutagenicity of DNA crosslinking agents.

Analysis of the intermediate and basement membrane collagens in fibrous atherosclerotic lesions of human aorta.

Interstitial collagens in fibrous atherosclerotic lesions of human aorta.

Distribution of 2,4-dinitrophenyl groups on the epidermal Langerhans cells of guinea pigs following skin painting with 2,4-dinitrochlorobenzene.

A review of porphyria and cancer and the missing link with human exposure to hexachlorobenzene.

[Evaluation of the biological effect of polishing powders].

Contact sensitivity to arsenical compounds. Clinical and experimental studies.

[Occurrence of drug reactions].

Peroxidase, an alternate pathway to cytochrome P-450 for xenobiotic metabolism in skin: partial purification and properties of the enzyme from neonatal rat skin.

Chemical and biological characterization of low-molecular-weight human skeletal growth factor.

Health risk analysis of human exposures to soil amended with sewage sludge contaminated with polychlorinated dibenzodioxins and dibenzofurans.

Binding of a metabolite of 3,4,3',4'-tetrachlorobiphenyl to transthyretin reduces serum vitamin A transport by inhibiting the formation of the protein complex carrying both retinol and thyroxin.

A critical examination of assumptions used in risk assessments of dioxin contaminated soil.

Covalent coupling of neutralizing factors from *Xenopus* to Sepharose beads: no decrease of inducing activity.

Role of structure in diphenyl ether teratogenesis.

Acute toxicity of pesticides in adult and weanling rats.

Disulfide bond formation between nerve growth factor and the nerve growth factor receptor from embryonic sensory neurons.

Interactive effects of estradiol and 2,3,7,8-tetrachlorodibenzo-p-dioxin on hepatic cytochrome P-450 and mouse uterus.

Immunoaffinity chromatography of carcinogen DNA adducts with polyclonal antibodies directed against benzo[a]pyrene diol-epoxide-DNA.

2,3,7,8-Tetrachlorodibenzo-p-dioxin metabolism and disposition in yellow perch.

Metabolism and disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rainbow trout.

Influence of skin source, penetration cell fluid, and partition coefficient on in vitro skin penetration.

Functional hepatocellular heterogeneity determined by the hepatotoxins allyl alcohol and bromobenzene in immature and adult Fischer 344 rats.

Identification of a thrombin sequence with growth factor activity on macrophages.

Studies on the metabolism of the neurotoxic tri-o-cresyl phosphate. Distribution, excretion, and metabolism in male cats after a single, dermal application.

Demonstration of sensory cutaneous nerve fibers in guinea-pig lip using endogenous oxidase histochemistry.

Amitrole: strain differences in morphological response of the liver following subchronic administration to mice.

The duration of the pulmonary paraquat toxicity--enhancement effect of O₂ in the rat.

Assessment of pentachlorophenol toxicity in newborn calves: clinicopathology and tissue residues.

Comparative behavioral, biochemical and pigmentary effects of MPTP, MPP⁺ and paraquat in *Rana pipiens*.

Mitochondrial injury of pulmonary alveolar epithelial cells in acute paraquat intoxication.

Chloracne and chloracnegens.

Human assay for identifying substances which induce non-allergic contact urticaria: the NICU-test.

Contact dermatitis to paraquat.

Systematically applied chemicals that damage lung tissue.

Allergic contact dermatitis due to a herbicide (barban).

Changes in rat lung structure and composition as a result of subchronic exposure to acrolein.

Complete recovery from paraquat poisoning causing severe unilateral pulmonary lesion.

Health hazards of natural and introduced chemical components of boatbuilding woods.

Perfume dermatitis.

Failure of desferrioxamine to modify the toxicity of paraquat in rats.

Effects of thyroid hormone on Na-K-adenosine triphosphatase activity along the rat nephron.

Long refractory period after one application of nonimmunologic contact urticaria agents to the guinea pig ear.

The role of neutrophils in the development of cadmium chloride-induced emphysema in lathyrogen-fed hamsters.

Hydrogen peroxide has a role in the aggregation of human platelets.

The cumulative contact enhancement test.

The metabolic fate of 2,4-dichlorophenoxyacetic acid-n-butyl ester in the Wistar rat.

A comparative study of the inhibition of hepatic aldehyde dehydrogenases in the rat by methyltetrazolethiol, calcium carbimide, and disulfiram.

Procedure for the determination of 2,4-D and dicamba in inhalation, dermal, hand-wash, and urine samples from spray applicators.

High-performance liquid chromatographic identification of beta-lactam antibiotics produced by dermatophytes.

Skin irritancy from nonanoic acid.

Mitochondrial cytochemistry in experimental myopathies.

Actions of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on human epidermal keratinocytes in culture.

Hypophagia-induced weight loss in mice, rats, and guinea pigs treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Problems in the assessment of human exposure to tetrachlorodibenzodioxin (TCDD): the marker chloracne.

Chloracne, "the hallmark of dioxin intoxication".

Comparative hepatic response to bromobenzene and allyl alcohol in the vitamin D-replete and vitamin D-depleted rat.

Toxicity and fetotoxicity of TCDD, TCDF and PCB isomers in rhesus macaques (*Macaca mulatta*).

Toxicity of chlorinated aromatic compounds in animals and humans: in vitro approaches to toxic mechanisms and risk assessment.

Cell-cycle-dependent expression of human melanoma membrane antigen analyzed by flow cytometry.

Hair and fingernail changes in acquired and congenital pernicious anemia.

Studies to evaluate the effectiveness of sex pheromone-impregnated formulations for control of populations of the American dog tick, *Dermacentor variabilis* (Say) (Acari: Ixodidae).

Cutaneous histologic findings in chemical workers with and without chloracne with past exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Synthesis of an altered type III procollagen in a patient with type IV Ehlers-Danlos syndrome. A structural change in the alpha 1(III) chain which makes the protein more susceptible to proteinases.

Altered triple helical structure of type I procollagen in lethal perinatal osteogenesis imperfecta.

[Multiple basalomas as a late consequence of acute iatrogenic arsenic poisoning in childhood].

[Multiple basalomas following long-term intake of arsenic].

The role of receptors in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) toxicity.

NTP Toxicology and Carcinogenesis Studies of Dimethyl Hydrogen Phosphite (CAS No. 868-85-9) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

NTP Toxicology and Carcinogenesis Studies of 1,2-Dichlorobenzene (o-Dichlorobenzene) (CAS No. 95-50-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Dermal absorption of pesticides calculated by deconvolution.

Conversion of 5-aminolaevulinate into haem by homogenates of human liver. Comparison with rat and chick-embryo liver homogenates.

Carcinogenicity of diallylnitrosamine following intragastric administration to Syrian hamsters.

Standardization of house dust mite extracts. Liberation of allergenic and antigenic components in relation to extraction conditions.

Polychlorinated aromatic hydrocarbon lethality, mixed-function oxidase induction, and uroporphyrinogen decarboxylase inhibition in the chick embryo: dissociation of dose-response relationships.

Effects of oxygen radicals on cerebral arterioles.

Determination of acute toxic effects in mice following exposure to methyl bromide.

Cyclophosphamide teratogenesis: a review.

Production and characterization of monoclonal antibodies to bovine skin proteodermatan sulfate.

Human effects of TCDD exposure.

The epidemiology and toxicology of TCDD.

[Allergy to decorative plants].

Diminution of immediate reactions to cinnamic aldehyde by eugenol.

Experimental paraquat poisoning--histological, electron microscopic and autoradiographic changes in the lung.

[Skin-irritating and sensitizing effects of the pesticide acetochlor].

Acute and environmental toxicity studies with hexazinone.

Collagen stimulating factors from lung in experimental paraquat poisoning demonstrated in vitro and in vivo.

Paraquat: model for oxidant-initiated toxicity.

Cinnamic aldehyde test concentrations.

Structural hepatic changes associated with cyanamide treatment: cholangiolar proliferation, fibrosis and cirrhosis.

Pathogenesis of paraquat-induced pulmonary hemorrhage in hamsters with special reference to arterial constriction.

Paraquat-induced pulmonary fibrosis. Role of the alveolitis in modulating the development of fibrosis.

Biochemical study of pentachlorophenol workers.

[Changes in the lung tissue of newborn rats after paraquat as a model of respiratory distress].

Cyanamide-induced liver cell injury. Experimental study in the rat.

The effect of quenching agents on contact urticaria caused by cinnamic aldehyde.

The metabolic fate of the herbicide nitratin in the rat.

Biochemical characteristics of rat superoxide dismutase and the effect caused by paraquat injection on the enzyme activity in various tissues.

Occupational exposure of herbicide applicators to herbicides used along electric power transmission line right-of-way.

Hepatic angiosarcoma and bronchioloalveolar carcinoma induced by Fowler's solution.

Epitopes immunologically related to glycophorin A on human malignant and non-malignant cells in culture.

Histologic changes produced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the skin of mice carrying mutations that affect the integument.

Immunologic effects of TCDD exposure in humans.

Evaluation of pesticides which pose carcinogenicity potential in animal testing. II. Consideration of human exposure conditions for regulatory decision making.

A heterozygous defect for structurally altered pro-alpha 2 chain of type I procollagen in a mild variant of osteogenesis imperfecta. The altered structure decreases the thermal stability of procollagen and makes it resistant to procollagen N-proteinase.

Biochemical and genetic analysis of variant mouse hepatoma cells which overtranscribe the cytochrome P1-450 gene in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The effectiveness of chemical carcinogens to induce atherosclerosis in the white Carneau pigeon.

Cysteine in the triple-helical domain of one allelic product of the alpha 1(I) gene of type I collagen produces a lethal form of osteogenesis imperfecta.

Suppression of type II collagen-induced arthritis by the intravenous administration of type II collagen or its constituent peptide alpha 1 (II) CB10.

Distribution of different collagen types and fibronectin in neurofibromatosis tumours.

Cutaneous signs of dioxin exposure.

Quantitation of types I and III collagens in human tissue samples and cell culture by cyanogen bromide peptide analysis.

Tissue plasminogen activator: peptide analyses confirm an indirectly derived amino acid sequence, identify the active site serine residue, establish glycosylation sites, and localize variant differences.

[The most common diseases caused by the adverse effect of phenols and chlorophenols].

Connective tissue antigens stimulate collagenase production in arthritic diseases.

Dermatitis in a dog associated with exposure to an arsenic compound.

Lipid abnormalities in workers exposed to dioxin.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces hyperplasia in confluent cultures of human keratinocytes.

Collagen composition of normal and myxomatous human mitral heart valves.

DMSA, DMPS, and DMPA--as arsenic antidotes.

Cutaneous signs of systemic toxicity due to dioxins and related chemicals.

Porphyria cutanea tarda and sarcoma in a worker exposed to 2, 3, 7, 8-tetrachlorodibenzodioxin--Missouri.

Benoxaprofen photosensitization of cell membrane disruption.

Opposing effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and hydrocortisone on growth and differentiation of cultured malignant human keratinocytes.

Acute effects of 12-O-tetradecanoylphorbol-13-acetate, teleocidin B, or 2,3,7,8-tetrachlorodibenzo-p-dioxin on cultured normal human bronchial epithelial cells.

The effects of sucrose loading on lysosomal hydrolases.

Calcium is a competitive inhibitor of gentamicin-renal membrane binding interactions and dietary calcium supplementation protects against gentamicin nephrotoxicity.

Transplantation studies on induced and spontaneous nodules from B6C3F1 mouse liver.

Abnormal type I collagen metabolism by cultured fibroblasts in lethal perinatal osteogenesis imperfecta.

[Experimental porphyria induced by chlorinated hydrocarbons. Studies of porphyrinogen carboxy-lyase in the experimental model of human cutaneous delayed porphyria].

Decreased induction of aryl hydrocarbon hydroxylase activity in hyperproliferative hairless mouse epidermis.

Incorporation of alphafetoprotein by the MCF-7 human breast cancer cell line.

Polychlorinated biphenyls (PCBs) and polybrominated biphenyls (PBBs): biochemistry, toxicology, and mechanism of action.

Campylobacter jejuni and Campylobacter coli Production of a Cytotoxic Toxin Immunologically Similar to Cholera Toxin.

Effects of in vivo-administered 2,3,7,8-tetrachlorodibenzo-p-dioxin on receptor binding of epidermal growth factor in the hepatic plasma membrane of rat, guinea pig, mouse, and hamster.

Cyclophosphamide resistance developed in a human melanoma cell line.

Production of chemotactic activity for polymorphonuclear leukocytes by cultured rat hepatocytes exposed to ethanol.

N-(2,3-dimercaptopropyl)phthalamidic acid: protection, in vivo and in vitro, against arsenic intoxication.

An in vitro approach to studying cutaneous metabolism and disposition of topically applied xenobiotics.

Serum gamma glutamyl transferase as a specific indicator of bile duct lesions in the rat liver.

Respiratory tract lesions induced by sensory irritants at the RD50 concentration.

Participation of the alpha 2(I) chain of bovine skin collagen in the formation of mature crosslinks.

Increased epidermal transglutaminase activity following 2,3,7,8-tetrachlorodibenzo-p-dioxin: in vivo and in vitro studies with mouse skin.

Kinetics of the activation of plasminogen by natural and recombinant tissue-type plasminogen activator.

Initiation of callus and somatic embryos from explants of mature cotton (*Gossypium klotzschianum* Anderss).

Bioconcentration and metabolism of picric acid (2,4,6-trinitrophenol) and picramic acid (2-amino-4,6-dinitrophenol) in rainbow trout *Salmo gairdneri*.

Cinnamic aldehyde: a survey of consumer patch-test sensitization.

Nitrofen: a review and perspective.

Carcinogenicity and toxicity of 2,4-dichlorophenoxy-acetic acid.

The effects on rat pups when nitrofen (4-(2,4-dichlorophenoxy)nitrobenzene) was applied dermally to the dam during organogenesis.

Interaction effects of permethrin and atrazine combinations towards several nontarget microorganisms.

Cyanamide-induced liver injury. A predictable lesion.

Near fatal percutaneous paraquat poisoning.

[Prognostic factors in acute paraquat poisoning. A retrospective study of cases registered by the Poison Control Center of Paris in 1981].

[Clinical findings and treatment of paraquat poisoning in childhood].

Commercial PCP: Toxic Impurities.

Paraquat poisoning: evidence of systemic toxicity after dermal exposure.

Paraquat-induced enhancement of vascular permeability.

Contact dermatitis due to cinnamic aldehyde induced in a deodorant manufacturing process.

Occupational dermatitis from pesticides: patch testing procedures.

Review of the effects of Agent Orange: a psychiatric perspective on the controversy.

Sensitivity to the weed killer DNA-nitralin and cross-sensitivity to dinitrochlorobenzene.

Effects of a dermal dose of S,S,S,-tri-n-butyl phosphorotrithioate on brain acetylcholinesterase, acid phosphatase, and 2',3'-cyclic nucleotide-3' phosphohydrolase and plasma butyrylcholinesterase in hens.

Hepatitis induced by drugs used as alcohol aversion therapy.

[Irritant and sensitizing effect of the herbicide propachlor].

The role of respiratory protection on increased survival of *Treponema pallidum* (Nichols) when cocultivated with mammalian cells in vitro.

Abnormal response of ataxia-telangiectasia cells to agents that break the deoxyribose moiety of DNA via a targeted free radical mechanism.

Correlation between brain tissue and cerebrospinal fluid concentrations of selected compounds in rats with intact and injured blood-brain barrier.

A placebo-controlled double-blind comparative clinical study of the disulfiram- and calcium carbimide-acetaldehyde mediated ethanol reactions in social drinkers.

Studies on phenoxy acid herbicides. II. Oral and dermal uptake and elimination in urine of MCPA in humans.

Studies on phenoxy acid herbicides. I. Field study. Occupational exposure to phenoxy acid herbicides (MCPA, dichlorprop, mecoprop and 2,4-D) in agriculture.

Procedure for the determination of residues of (2,4-dichlorophenoxy)acetic acid in dermal exposure pads, hand rinses, urine, and perspiration from agricultural workers exposed to the herbicide.

Microbial degradation of trifluralin by *Aspergillus carneus*, *Fusarium oxysporum* and *Trichoderma viride*.

Biochemical modulation of angiogenesis in the chorioallantoic membrane of the chick embryo.

Decreased liver delta-aminolaevulinate dehydratase activity in porphyria cutanea tarda and in alcoholism.

Induction of 7-ethoxycoumarin o-deethylase activity in cultured human epithelial cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): evidence for TCDD receptor.

Effects of cytochrome P1-450 inducers on the cell-surface receptors for epidermal growth factor, phorbol 12,13-dibutyrate, or insulin of cultured mouse hepatoma cells.

[Brain death in secondary brain lesion].

Tumor initiating activity of 9- and 10-fluoro-7,12-dimethylbenz[a]-anthracene (DMBA) and the effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on tumor initiation by monofluoro derivatives of DMBA in SENCAR mice.

Langerhans cell--mononuclear cell contacts are not specific for allergy in patch tests.

Synthesis of a shortened pro-alpha 2(I) chain and decreased synthesis of pro-alpha 2(I) chains in a proband with osteogenesis imperfecta.

Analysis of cyanogen bromide peptides of type I collagen from a patient with lethal osteogenesis imperfecta.

Enhancement of carrageenan and dextran-induced edemas by 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds.

Differential proteolysis and evidence for a residue exchange in tissue plasminogen activator suggest possible association between two types of protein microheterogeneity.

The role of growth of normal and preneoplastic cell populations for tumor promotion in rat liver.

Abnormal alpha 2-chain in type I collagen from a patient with a form of osteogenesis imperfecta.

Assessment of skin irritancy: measurement of skin fold thickness.

Enhancement of the skin tumor-initiating activity of polycyclic aromatic hydrocarbons by methyl-substitution at non-benzo 'bay-region' positions.

A comparative cytogenetic study on cases of induced abortions in TCDD-exposed and nonexposed women.

Effect of high fat and iron levels on the growth and mortality of chickens.

Purification and properties of human erythrocyte uroporphyrinogen decarboxylase: immunological demonstration of the enzyme defect in porphyria cutanea tarda.

Oxygen radicals and vascular damage.

[Pharmacological and clinico-pharmacological studies of a combination preparation for calves having antianemia and general tonic action].

Acute dermal toxicity of tetrachlorophenols in the rat.

Natural history of TCDD-induced liver lesions in rats as observed by transmission electron microscopy during a 32-week period after a single intraperitoneal injection.

Inhalation of products of combustion.

Uptake and retention of moulting hormones by the integument of crayfishes in vitro. II. Influence of metabolic inhibitors and sulphhydryl group inhibitors.

Oxygen and redox-active drugs: shared toxicity sites.

Lipid peroxidation as a possible cause of TCDD toxicity.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) effects on hepatic microsomal steroid metabolism and serum estradiol of pregnant rats.

Higher Chlorinated Dioxins Implicated in the Mortality of Young Pigs Kept on a Pentachlorophenol-treated Wooden Floor.

Effect of polycyclic aromatic compounds and phorbol esters on ornithine decarboxylase and aryl hydrocarbon hydroxylase activities in mouse liver.

Occurrence of 2,6-dichlorophenol in *Dermacentor albipictus* and *Haemaphysalis leporispalustris* (acari: Ixodidae).

Phagocytosis of mast cell granules by cultured fibroblasts.

Sensitivity of passive cutaneous anaphylaxis in rats. I. Inverse relationship between PCA sensitivity and amount of IgE present on mast cells.

Mechanism of skin surface lipid peroxidation.

Extensive labelling of injured insect neurons with seven different heme peptides.

[Paraquat poisoning. Prognostic and therapeutic evaluation in 28 cases].

Measurement of 2,4-dichlorophenoxyacetic acid (2,4-D) after occupational exposure.

[Experimental chronic paraquat poisoning. Functional and histopathological pulmonary changes].

Allergic contact dermatitis to chloridazon.

Allergic hypersensitivity to the herbicide 2,4-D in BALB/c mice.

Skin absorption of paraquat.

Prognosis and treatment of paraquat poisoning: a review of 28 cases.

Fatal paraquat poisonings after skin absorption.

Non-occupational exposure to pentachlorophenol: clinical findings and plasma-PCP-concentrations in three families.

Studies of the occupational exposure of Malaysian plantation workers to paraquat.

Increase in the penetration of tracer compounds into the rat brain during 2-methyl-4-chlorophenoxyacetic acid (MCPA) intoxication.

Effects of the bipyridilium herbicides, diquat and paraquat, on in vivo hexose absorption and fluid transfer in adult mice.

[Paraquat intoxication, an ultra-structural study of lung lesions. In connection with a case study (author's transl)].

Ultrastructural evidence of pulmonary capillary endothelial damage from paraquat.

Correlation between the loss of the transformed phenotype and an increase in superoxide dismutase activity in a revertant subclone of sarcoma virus-infected mammalian cells.

Possible cardiovascular hazards of the alcohol-calcium carbimide interaction.

Antimutators of mitochondrial and nuclear DNA in *Saccharomyces cerevisiae*. Relationship with gamma-ray sensitivity.

Tumour promotion by TCDD in skin of HRS/J hairless mice.

[Drug-induced lesions of the esophagus].

Industrial contact dermatitis due to nitro and amino derivatives. 2nd report: experimental study of cross sensitivities of amino derivatives.

Differential effects of 2,4-dinitrophenol and valinomycin (+ K⁺) on uncoupler-stimulated ATPase of human tumor mitochondria.

Autocatabolism of surface macromolecules shed by human melanoma cells.

Nonhelical, fibronectin-binding basement-membrane collagen from endodermal cell culture.

Human skin collagenase in recessive dystrophic epidermolysis bullosa. Purification of a mutant enzyme from fibroblast cultures.

Medicinal arsenic and internal malignancies.

Increased urinary D-glucaric acid excretion by children living in an area polluted with tetrachlorodibenzoparadioxin (TCDD).

Collagen polymorphism in the normal and diseased blood vessel wall. Investigation of collagens types I, III and V.

Immunity to homologous type III collagen after partial meniscectomy and sham surgery in rabbits.

[Pathogenesis of hyperlipidemia and fatty liver of rabbits induced by methyl iodide. Increased synthesis and secretion of triglyceride in the liver].

Influence of selected fatty acids upon plaque formation and caries in the rat.

Molecular steps in the action and regulation of epidermal growth factor: a cellular mitogen.

Structural properties of Type I collagen isolated from chickens with scoliosis.

Health effects of chlorophenol wood preservatives on sawmill workers.

Mortality study of persons exposed to dioxin in a trichlorophenol-process accident that occurred in the BASF AG on November 17, 1953.

Toxicity of 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin (TCDD).

Corneocyte morphology and formation rate in lichen planus and experimental parakeratosis in subjects with and without psoriasis.

Delayed-type hypersensitivity in rabbits. Comparison of the adjuvants dimethyl dioctadecyl ammonium bromide and Freund's complete adjuvant.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-mediated depression of rat testicular heme synthesis and microsomal cytochrome P-450.

Effects of PAM, proPAM, and DFP on behavior, thermoregulation, and brain AChE in rats.

2-14C-1-Allyl-3,5-diethyl-6-chlorouracil I: Synthesis, absorption in human skin, excretion, distribution, and metabolism in rats and rabbits.

[Reaction of rat subcutaneous connective tissue to camphorated parachlorophenol and aqueous 2% parachlorophenol].

Effect of certain pesticides on active sodium transport in the epithelium of isolated frog skin.

Collagen metabolism in rat incisor predentine in vivo: synthesis and maturation of type I, alpha 1 (I) trimer, and type V collagens.

Collagens from the skin and cartilage of the larval salamander *Ambystoma tigrinum*.

Increases in choline levels in rat brain elicited by meclofenoxate.

Carcinogenesis Bioassay of 2,3,7,8-Tetrachlorodibenzo-p-dioxin (CAS No. 1746-01-6) in Swiss-Webster Mice (Dermal Study).

Mitochondrial bioenergetics during the initiation of mercuric chloride-induced renal injury. II. Functional alterations of renal cortical mitochondria isolated after mercuric chloride treatment.

Effect of phospholipase A2 on calcium transport in brain synaptosomes.

Adjuvant activity of dimethyl dioctadecyl ammonium bromide in guinea pigs. I. Skin test reactions.

The toxicokinetics of 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin in mammalian systems.

Histamine release from rat peritoneal mast cells exposed to ultraviolet light.

Allergic contact dermatitis to cyanamide (carbodiimide).

Allergen replacement (alternatives) in the management of contact dermatitis.

Subchronic administration of technical pentachlorophenol to lactating dairy cattle: immunotoxicologic evaluation.

The disulfiram (Antabuse)-Alcohol reaction in male alcoholics: its efficient management by 4-methylpyrazole.

Non-Hodgkin's lymphoma of the skin and occupational exposure to herbicides.

Hepatic injury associated with paraquat toxicity in humans.

Preliminary experimental contribution to the study of possible carcinogenic activity of two herbicides containing atrazine-simazine and trifluralin as active principles.

Paraquat poisoning in Papua New Guinea.

A comparative study on the effects of paraquat and diquat on cultured human cells.

Potential exposure of humans to 2,4,5-T and TCDD in the Oregon coast ranges.

Diquat intoxication: report of two cases and review of the literature.

Inhalation toxicity of acrylic acid.

Allergic contact dermatitis from methylisothiocyanate in soil disinfectants.

Acute poisoning due to Wright's vaporizing fluid.

Epidermal growth factor induces tyrosine hydroxylase in a clonal pheochromocytoma cell line, PC-G2.

Nonanoic acid irritation - a positive control at routine patch testing?

Acute human exposure to TCDD in Seveso, Italy.

Collagen biosynthesis by human skin fibroblasts. II. Isolation and further characterization of type I and type III procollagens synthesized in culture.

Bioassay of a Mixture of 1,2,3,6,7,8-Hexachlorodibenzo-p-dioxin and 1,2,3,7,8,9-Hexachlorodibenzo-p-dioxin (Gavage) for Possible Carcinogenicity (CAS No. 57653-85-7, CAS No. 19408-74-3).

Bioassay of a Mixture of 1,2,3,6,7,8-Hexachlorodibenzo-p-dioxin and 1,2,3,7,8,9-Hexachlorodibenzo-p-dioxin (Dermal Study) for Possible Carcinogenicity (CAS No. 57653-85-7; CAS No. 19408-74-3).

[Liver regeneration characteristics in young rats in allyl alcohol lesion of the periportal areas].

Influence of hypoxia on the hepatotoxic effects of carbon tetrachloride, paracetamol, allyl alcohol, bromobenzene and thioacetamide.

Collagen synthesis and turnover following particle phagocytosis in dermal fibroblasts.

In vitro synthesis of tissue-specific type II collagen by healing cartilage. I. Short-term repair of cartilage by mature rabbits.

Effect of 2,4-dichlorophenoxyacetic acid on multiplication of tobacco mosaic virus in protoplasts from local-lesion and systemic-responding tobaccos.

Combined action of hepatotoxic substances and increased environmental temperature on the liver of rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxic effects and tissue levels in animals from the contaminated area of Seveso, Italy.

Occupational exposures to pesticides containing organoarsenicals in California.

Delayed neurotoxic, late acute and cholinergic effects of S,S,S-tributyl phosphorotrithioate (DEF): subchronic (90 days) administration in hens.

Biochemical and morphological correlation of oxidant-induced pulmonary injury: low dose exposure to paraquat, oxygen, and ozone.

[Effect of a dinitro-o-cresol-containing herbicide (Hedolit) on human reproduction].

A clinical survey of paraquat formulation workers.

Effects of paraquat aerosol on mouse lung.

[Skin sensitization to wood preservatives containing pentachlorophenol (PGP)].

Vehicle alteration of paraquat lethality in mice.

Early bronchiolar damage following paraquat poisoning in mice.

Carcinogenicity testing of herbicide 2,4,5-trichlorophenoxyethanol containing dioxin and of pure dioxin in Swiss mice.

Pulmonary effects of contact exposure to paraquat: a clinical and experimental study.

[Current dermatological problem: skin diseases caused by pesticides].

Toxicity of 1,1'-alkyl-4,4'-bipyridylium salts in the rat.

Allergic contact dermatitis from Betanal (phenmedipham).

Review of the toxicology of paraquat (1,1'-dimethyl-4,4'-bipyridinium chloride).

Propanil-chloracne and methomyl toxicity in workers of a pesticide manufacturing plant.

The effect of some selected pesticides on the embryonal development of *Acheta domesticus*.

[Allergic contact dermatitis due to propachlor (author's transl)].

Influence of histamine on estrogen-induced inhibition of compensatory ovarian hypertrophy in hemiovariectomized rats.

Tissue distribution of paraquat and diquat after oral administration in rats.

The effect of oxygen and paraquat on the ¹⁴C-glucose oxidation of rabbit alveolar macrophages and lung slices.

[Alterations in the survival of x-irradiated cells by 2,4-dinitrophenol depending on ATP deprivation].

Anticarcinogenic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on benzo(a)pyrene and 7,12-dimethylbenz(a)anthracene tumor initiation and its relationship to DNA binding.

Acute pulmonary injury in rats by nitrofurantoin and modification by vitamin E, dietary fat, and oxygen.

Human health effects from accidental release of tetrachlorodibenzo-p-dioxin (TCDD) at Seveso, Italy.

Nature of collagen in dermatofibrosarcoma protuberans.

Isolation and immunochemical characterization of antibodies from the sera of cancer patients which are reactive against human melanoma cell membranes by affinity chromatography.

Longitudinal study of tolyl-reactive IgE antibodies in workers hypersensitive to TDI.

Contact dermatitis from hydrazine derivatives.

Specific IgE antibodies to platinum salts in sensitized workers.

2,3,7,8-Tetrachlorodibenzo-P-dioxin: potent anticarcinogenic activity in CD-1 mice.

Skin responses to ultraviolet radiation in contact photodermatitis due to fentichlor.

Abnormal protein synthesis in malignant melanoma cells.

Alterations in the survival of X-irradiated cells by 2,4-dinitrophenol depending on ATP deprivation.

Estimation of the TCDD toxic potential in the light of the Seveso accident.

Bovine type I collagen: A study of cross-linking in various mature tissues.

The covalent structure of calf skin type III collagen. VI. The amino acid sequence of the carboxyterminal cyanogen bromide peptide alpha 1(III)CB9B (position 928--1028).

The covalent structure of calf skin type III collagen. V. The amino acid sequence of the cyanogen bromide peptide alpha 1(III)CB9A (position 789 to 927).

The covalent structure of calf skin type III collagen. IV. The amino acid sequence of the cyanogen bromide peptide alpha 1(III)CB5 (positions 552--788).

The covalent structure of calf skin type III collagen. III. The amino acid sequence of the cyanogen bromide peptide alpha 1(III)CB4 (positions 403--551).

The covalent structure of calf skin type III collagen. II. The amino acid sequence of the cyanogen bromide peptide alpha 1(III)CB1,8,10,2 (Positions 223--402).

Cell-mediated immune response to dog pulpal tissue altered by camphor paramonochlorophenol.

The formation of dihydrodiols by the chemical or enzymic oxidation of 7-hydroxymethyl-12-methylbenz[alpha]anthracene and the possible role of hydroxymethyl dihydrodiols in the metabolic activation of 7,12-dimethylbenz[alpha]anthracene.

Local aggregation of hormone-receptor complexes is required for activation by epidermal growth factor.

Isolation and characterization of a double chain intermolecular cross-linked peptide from insoluble calf bone collagen.

Evidence that induction and suppression of mutations and recombinations by chemical mutagens in *S. cerevisiae* during mitosis are jointly correlated.

Bioassay of dibenzo-p-dioxin for possible carcinogenicity.

Bioassay of 2,7-dichlorodibenzo-p-dioxin (DCDD) for possible carcinogenicity.

The effect of perinatal exposure to tetrachlorodibenzo-p-dioxin on the immune response of young mice.

An immunoperoxidase method for the demonstration of allergen-specific IgE in serum.

Percutaneous paraquat absorption. An association with cutaneous lesions and respiratory failure.

An effect of paraquat on the lungs of rabbits. Its implications in smoking contaminated marijuana.

[Chemical dermatoses from nitrophenol exposure].

The pathology and biochemistry of paraquat.

Dermal exposure to paraquat.

Acute percutaneous paraquat poisoning.

[Pathomorphological studies in experimental simazine poisoning of sheep].

Poisoning 1978--a medical problem, or a social lesion.

Comparative effects of aminotriazole on normal and acatalasemic mice.

[Parthenium hysterophorus allergy. A weed problem in India (author's transl)].

An assessment of human exposure to N-nitroso compounds.

2,3,7,8-tetrachlorodibenzo-p-dioxin as cocarcinogen causing 3-methylcholanthrene-initiated subcutaneous tumors in mice genetically "nonresponsive" at Ah locus.

Medical problems raised by the TCDD contamination in Seveso, Italy.

Nasopharyngeal carcinoma associated with long-term arsenic ingestion.

Lack of tumor-promoting ability of certain environmental chemicals in a two-stage mouse skin tumorigenesis assay.

The distribution of antigen in flare up reaction in contact sensitivity to DNCB.

Collagen polymorphism in pathologic human scars.

Nonsecreting myeloma variants with heavy-chain carbohydrate deficiencies.

Cell-mediated and humoral immunity to chick type II collagen and its cyanogen bromide peptides in guinea-pigs.

[Contact acne: a typical civilizational dermatosis (author's transl)].

The biosynthesis of phosphoporphyrins and dentin collagen in the continuously erupting rat incisor.

[Cyanogen bromide fractionation by skin collagen].

Human skin collagen. Presence of type I and type III at all levels of the dermis.

Bioassay of picloram for possible carcinogenicity.

Bioassay of trifluralin for possible carcinogenicity.

Bioassay of sulfallate for possible carcinogenicity (CAS No. 95-06-7).

[Occupational liver lesions].

Pulmonary reactions to drugs.

[Pulmonary injury of mice produced by chronically peroral treatment with different substances (author's transl)].

Chloracne from manufacture of a new herbicide.

Pulmonary ultrastructure after oral and intravenous dosage of paraquat to rats.

Contact dermatitis and depigmentation produced by the herbicide Carbyne.

[Severe accidental acrolein intoxication in the home (author's transl)].

[Experimental substantiation of the maximum permissible concentration of Reglone in the air of a work environment].

[Acute poisonings with Gramoxone (paraquat)].

[Dermatological views on the use of chemical substances in modern agriculture].

Allergic contact dermatitis to herbicides.

Contact urticarial skin responses to cinnamaldehyde.

In vivo oxidation of reduced nicotinamide-adenine dinucleotide phosphate by paraquat and diquat in rat lung.

[Characteristics of the skin resorptive action of new pesticides belonging to different chemical groups].

Effect of herbicidal killing of shrubs on abundance of adult *Dermaceter andersoni* (Acarina: Ixodidae) in British Columbia.

[Mechanism of metabolic and ionic germination of "Bacillus licheniformis" spores treated with hydrogen peroxide (author's transl)].

[Chloracne due to tetrachloro-2,3,7,8-dibenzo-p-dioxin in children (author's transl)].

Human dander in house dust allergy.

Tumor-initiating ability of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and Arochlor 1254 in the two-stage system of mouse skin carcinogenesis.

Dioxin: a new biological probe?

Morphological changes in monkeys consuming a diet containing low levels of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Cytogenetic study of the mutagenic properties of the repellents dimethyl phthalate and phenoxyacetic acid N,N-diethylamide].

Suppressor cells in tolerance to contact sensitivity active against hapten-syngeneic and hapten-allogeneic determinants.

Purification of equine infectious anemia virus antigen by affinity chromatography.

Epidemiology and pathology of a tetrachlorodibenzodioxin poisoning episode.

The collagen of heart valve.

Synthesis of types I and III procollagen and collagen by monkey aortic smooth muscle cells in vitro.

SDS-polyacrylamide gel electrophoretic determination of type I and type III collagen in small skin samples.

Melittin: an allergen of honeybee venom.

The effect of aeration and metabolic inhibitors on resistance to amphotericin in starved cultures of *Candida albicans*.

Resolution of parameters in the equivalent electrical circuit of the sodium transport mechanism across toad skin.

Bioassay of chloramben for possible carcinogenicity.

Effect of inhibitors on transepithelial efflux of Na and nonelectrolytes in frog skin.

Recovery from inhalation of diquat aerosol.

Tumorigenic effect of 3-amino-1H-1,2,4-triazole on rat thyroid.

Strain differences in histopathologic, hematologic, and blood chemistry changes induced in mice by a technical and a purified preparation of 2,4,5-trichlorophenoxyacetic acid.

[Chloracne, porphyria cutanea tarda, and other poisonings due to the herbicides].

Bioassay of 2, 4, 5-trichlorophenoxyacetic acid for carcinogenicity in mice.

Effects of vehicles and elicitation concentration in contact dermatitis testing. I. Experimental contact sensitization in humans.

3,4,3',4'-Tetrachloro azoxybenzene and azobenzene: potent inducers of aryl hydrocarbon hydroxylase.

Metabolism of [1-(14)C] and [2-(14)C] leucine in cultured skin fibroblasts from patients with isovaleric acidemia. Characterization of metabolic defects.

Anti-tumorigenic effect of maleic hydrazide on mouse skin.

Effects of selected herbicides and plant hormones on *Prototheca wickerhamii*.

Sequential histopathologic, hematologic, and blood chemistry changes induced in mice by a technical and a purified preparation of 2,4,5-trichlorophenoxyacetic acid.

High uptake in the erythrocytes and the spleen of the quaternary dipyridylum salt paraquat injected intravenously in hypotonic solutions.

Binding of chick skin collagen alpha 1 chain by isolated membranes from human platelets.

Preparation of intact monomeric collagen from rat tail tendon and skin and the structure of the nonhelical ends in solution.

Studies on the modification of renal lesions due to aspirin and oxyphenbutazone in the rat and the effects on the kidney of 2:4 dinitrophenol.

NH₂-terminal extensions on skin collagen from sheep with a genetic defect in conversion of procollagen into collagen.

Collagen polymorphism in idiopathic chronic pulmonary fibrosis.

Effect of hypothyroidism on responsiveness to beta-adrenergic stimulation.

From fentichlor sensitivity to actinic reticuloid?

Toxicity of methyl bromide and other gaseous insecticides to *Triatoma infestans*.

Isolation and characterization of CNBr derived peptides of the alpha1 (III) chain of pepsin-solubilized calf skin collagen.

Isolation of a crosslinked cyanogen-bromide peptide from insoluble rabbit collagen. Tissue differences in hydroxylation and glycosylation of the crosslink.

¹²⁵I-labeled human epidermal growth factor. Binding, internalization, and degradation in human fibroblasts.

Saturation kinetics of sodium efflux across isolated frog skin.

Homocysteine thiolactone metabolism in malignant cells.

Cytochrome P-450 content and mixed-function oxidase activity in microsomes isolated from mouse skin.

Irritant dermatitis from diallylglycol carbonate monomer in the optical industry: clinical and experimental studies of cutaneous tolerance and chemical investigations.

Collagen-and collagen peptide-induced chemotaxis of human blood monocytes.

Active sodium uptake by the skin of foetal sheep and pigs.

Gastrointestinal effects of acute ferrous sulfate poisoning in rats.

Percutaneous penetration and metabolism of topical (¹⁴C)flutamide in men.

Lung collagen heterogeneity. Synthesis of type I and type III collagen by rabbit and human lung cells in culture.

The cyanogen bromide peptides of bovine soluble and insoluble collagens. II. Tissue specific cross-linked peptides of insoluble skin and dentin collagen.

Experimental study on contact dermatitis due to herbicides sodium chlorate and sodium 2,2-dichloropropionate.

Skin disorders caused by herbicides sodium chlorate and sodium 2,2-dichloropropionate.

Toxicity studies with 5-bromo-3-sec-butyl-6-methyluracil.

[Morphological and toxicological studies of experimental diquat poisoning].

[Clinical and laboratory findings in the acute damage by precursors of the weed-killer "burex" (author's transl)].

[Ultrastructural study of a renal biopsy in a patient poisoned by paraquat].

[Treatment of dermatoses caused by pesticides].

[Acute toxic liver lesion through industrial noxious substances and drugs in higher than therapeutic doses].

Sensitivity to cinnamic aldehyde in a toothpaste. 2. Further studies.

Cinnamic aldehyde in toothpaste. 1. Clinical aspects and patch tests.

Cinnamic aldehyde allergy.

Short-term oral and dermal toxicity of MCPA and MCPP.

Aroma chemicals: Reference sources for perfume and flavour ingredients with special reference to cinnamic aldehyde.

Contact dermatitis from lead cyanamide.

Pathological changes in the liver of mice given 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Influence of IgG antibody and glycopeptide allergens on the correlation between the radioallergosorbent test (RAST) and skin testing or bronchial challenge with alternaria.

Reduced beta-adrenergic responsiveness in hypothyroid rats.

Basement membranes: structural and biosynthetic considerations.

Angiosarcoma of the liver associated with Fowler's solution (potassium arsenite).

A histochemical study of the liver lesion induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (dioxin) in rats.

Immunoglobulin E antibody formation in response to homologous rabbit albumin heavily substituted with dinitrophenol: effect of adjuvant.

Patients with Ehlers-Danlos syndrome type IV lack type III collagen.

Comparison of the cyanogen bromide peptides of insoluble guinea-pig skin and scar collagen.

Antigenic activity, in humans, of purified low molecular weight fractions of timothy pollen.

Asthma in the highlands of New Guinea Total IgE levels and incidence of IgE antibodies to house dust mite and *Ascaris lumbricoides*.

Serum IgE levels during the potentiated reagin response to egg albumin in rats infected with *Nippostrongylus brasiliensis*.

Drug-induced dyskinesia in monkeys.

Dihydroxydichlorodiphenylmonosulphide in a deodorant.

Liver biopsy in methotrexate-treated psoriatics-a re-evaluation.

Inhibition of peptide chain initiation in lysates from ATP-depleted cells. I. Stages in the evolution of the lesion and its reversal by thiol compounds, cyclic AMP or purine derivatives and phosphorylated sugars.

The covalent structure of collagen. The chymotrypsin, trypsin and hydroxylamine peptides derived from alpha2-CB4 of calf-skin collagen.

Isolation, chemical and electron microscopical characterization of neutral-salt-soluble type III collagen and procollagen from fetal bovine skin.

Some features of hydrogen (ion) secretion by the frog skin.

Interaction of a chick skin collagen fragment (alpha1-CB5) with human platelets. Biochemical studies during the aggregation and release reaction.

Chloride transport across isolated skin of *Rana pipiens*.

The order of cyanogen-bromide peptides and location of carbohydrate in the alpha2 chain of guinea-pig skin collagen.

The amino acid sequence of chick skin collagen alpha1-CB7.

Mitochondria and polarity in the egg of *Smittia spec.* (Diptera, Chironomidae): UV irradiation, respiration measurements, ATP determination and application of inhibitors.

Covalent structure of collagen: amino acid sequence of alpha1-CB6A of chick skin collagen.

Covalent structure of collagen: amino acid sequence of alpha1-CB3 of chick skin collagen.

[Isolation and properties of a preparation of arterial collagen solubilized by pretreatment with alkali (author's transl)].

Fractionation and characterization of surface antigens from group A *Neisseria meningitidis*.

The covalent structure of collagen: amino-acid sequence of the cyanogen-bromide peptides alpha1-CB2, alpha1-CB4 and alpha1-CB5 from calf-skin collagen.

Microbodies and an anomalous "microcylinder" in the ultrastructure of plants with Crassulacean acid metabolism.

Effects of exogenous ATP on short-circuit current and potential difference of the isolated frog skin.

A household remedy misused--fatal cresol poisoning following cutaneous absorption (a case report).

A radioimmunoassay for chemically modified grass pollen allergen.

[Pulmonary edema due to inhalation of gas and vapors].

Paraquat lung: a reappraisal.

[Leukonychia in bands due to paraquat].

[Modification of infrared irradiation of the skin after the effect of various indifferent substances].

Letter: Nail damage caused by weed killers and insecticides.

Editorial: Arsenic makes a comeback.

[Alveolitis and pulmonary fibrosis--an attempt at a synopsis].

[Acne chlorina, porphyria cutanea tarda and other manifestations of general poisoning during the manufacture of herbicides. II].

Toxic effects of the herbicide paraquat.

Direct injection of experimental mammary adenocarcinoma with picloram.

Proceedings: Investigations on the embryotoxic effect of 2,4,5-T in NMRI-mice.

[Modification of the heat transfer coefficient of the skin following the effect of various substances].

The covalent structure of collagen: amino acid sequence of the N-terminal region of alpha2-CB3 from rat skin collagen and alpha2-CB3.5 from calf skin collagen.

Carcinogenic activity of smoke condensate from cigarettes with ammonium sulfamate-treated paper.

Interaction of an active glycopeptide from chick skin collagen (alpha 1-CB5) with human platelets.

A morphological study of the liver lesion induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats.

Suppression of cellular immunity in rats and mice by maternal treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Liver biopsy in psoriatics previously treated with potassium arsenite. A controlled study.

Allergens of mammalian origin. III. Properties of a major feline allergen.

Purification of large crosslinked peptides from insoluble calf bone and skin collagens by hydroxyapatite chromatography.

Chemical studies on the cyanogen bromide peptides of rat skin collagen. Amino acid sequence of alpha 1-CB3.

Lung collagen heterogeneity.

Regulation of organogenesis in small explants of superficial tissue of *Nicotiana tabacum* L.

(Alpha1(3))3 human skin collagen. Release by pepsin digestion and preponderance in fetal life.

Isolation, characterization and comparative studies of the N-terminal peptides from soluble pig skin collagen.

Non-immunogenicity of purified hyaluronic acid preparations tested by passive cutaneous anaphylaxis.

Table 2A-7 – Titles of Pubmed Records Related to Endocrine/Metabolic Adverse Events Following Herbicide Exposure

ADDISON; *ADRENAL*; *CUSHING*; *DIABET*; *FABRY*; *GLAND*; *GOITER*; *GOITRE*; *GRAVE*; *HASHIMOTO*; *HORMON*; *METABOL*; *OBESE*; *OBESITY*; *PANCREA*; *PITUITARY*; *POLYCYSTIC OVARIAN SYNDROME*; *PORPHYRIA*; *THYROID* (15402)

A review of the impact of herbicides and insecticides on the microbial communities.

Assessing the ecological impact of pesticides/herbicides on algal communities: A comprehensive review.

Neurotoxicity of glyphosate: Focus on molecular mechanisms probably associated with alterations in cognition and behavior.

Co-exposure to environmental microplastic and the pesticide 2,4-dichlorophenoxyacetic acid (2,4-D) induce distinctive alterations in the metabolome and microbial community structure in the gut of the earthworm *Eisenia andrei*.

Usefulness of oxidative stress biomarkers in native species for the biomonitoring of pesticide pollution in a shallow lake of the Austral Pampas, Argentina.

Regulation of NCOA4-mediated iron recycling ameliorates paraquat-induced lung injury by inhibiting ferroptosis.

Developmental regulation of cellular metabolism is required for intestinal elongation and rotation.

Association of UGT1A1 gene variants, expression levels, and enzyme concentrations with 2,3,7,8-TCDD exposure in individuals exposed to Agent Orange/Dioxin.

A combination of silymarin and garlic extract enhances thyroid hormone activation and body metabolism in orally intoxicated male rats with atrazine: Impact on hepatic iodothyronine deiodinase type 1.

Pubertal glyphosate-based herbicide exposure aggravates high-fat diet-induced obesity in female mice.

Understanding atrazine elimination via treatment of the enzyme-based Fenton reaction: Kinetics, mechanism, reaction pathway, and metabolites toxicity.

In vivo estrogenicity of glyphosate, its formulations, and AMPA on transgenic zebrafish (*Danio rerio*) embryos.

In vitro antiandrogenic effects of the herbicide linuron and its metabolites.

Hormonal and haematological biomarkers as indicators of stress induced by Diuron herbicide toxicity on *Clarias gariepinus* (Burchell, 1822) sub-adults.

Abalone peptide increases stress resilience and cost-free longevity via SKN-1-governed transcriptional metabolic reprogramming in *C. elegans*.

Intergenerational consequences of an auxin-like herbicide on plant sensitivity to a graminicide mediated by a fungal endophyte.

Glyphosate Disorders Soil Enchytraeid Gut Microbiota and Increases Its Antibiotic Resistance Risk.

Metabolomic Changes in Rat Serum after Chronic Exposure to Glyphosate-Based Herbicide.

Exposure to pentachlorophenol destructs the symbiotic relationship between zooxanthellae and host and induces pathema in coral *Porites lutea*.

Biochemical and physiological alterations caused by Diuron and Triclosan in mussels (*Mytilus galloprovincialis*).

The ROS/SIRT1/STAR axis as a target for melatonin ameliorating atrazine-induced mitochondrial dysfunction and steroid disorders in granulosa cells.

Atrazine exposure caused oxidative stress in male rats and inhibited brain-pituitary-testicular functions.

Evaluation of neurological behavior alterations and metabolic changes in mice under chronic glyphosate exposure.

Diuron and its metabolites induce mitochondrial dysfunction-mediated cytotoxicity in urothelial cells.

A mixture of glyphosate and 2,4-D herbicides enhances the deleterious reproductive outcomes induced by Western diet in obese male mice.

Ultimate fate, transformation, and toxicological consequences of herbicide pretilachlor to biotic components and associated environment: An overview.

2,4-D mediated moderation of aluminum tolerance in *Salvinia molesta* D. Mitch. with regards to bioexclusion and related physiological and metabolic changes.

Analysis of the association between urinary glyphosate exposure and fatty liver index: a study for US adults.

Association of hair polychlorinated biphenyls and multiclass pesticides with obesity, diabetes, hypertension and dyslipidemia in NESCAV study.

Trp-574-Leu mutation and metabolic resistance by cytochrome P450 gene conferred high resistance to ALS-inhibiting herbicides in *Descurainia sophia*.

ATR induces hepatic lipid metabolism disorder in rats by activating IRE1 $\hat{\pm}$ /XBP1 signaling pathway.

Cinnamaldehyde as a Promising Dietary Phytochemical Against Metabolic Syndrome: A Systematic Review.

Degradation study of the trans-cinnamaldehyde and limonene biopesticides and their metabolites in cucumber by GC and UHPLC-HRMS: Laboratory and greenhouse studies.

Flow cytometric assessments of metabolic activity in bacterial assemblages provide insight into ecosystem condition along the Buffalo National River, Arkansas.

Insights on cyclophosphamide metabolism and anticancer mechanism of action: A computational study.

Chiral herbicide imazethapy influences plant-soil feedback on nitrogen metabolism by shaping rhizosphere microorganisms.

Protective mechanisms of neral as a plant-derived safener against fenoxaprop-p-ethyl injury in rice.

Perioperative exposure to volatile organic compounds in neonates undergoing cardiac surgery.

Pyroxasulfone Metabolism in Resistant *Lolium rigidum*: Is It All Down to GST Activity?

Glyphosate (Roundup) as phosphorus nutrient enhances carbon and nitrogen accumulation and up-regulates phosphorus metabolisms in the haptophyte *Isochrysis galbana*.

Effects and mechanisms of glyphosate as phosphorus nutrient on element stoichiometry and metabolism in the diatom *Phaeodactylum tricornutum*.

Associations of maternal exposure to 2,4-dichlorophenoxyacetic acid during early pregnancy with steroid hormones among one-month-old infants.

Non-cytochrome P450 enzyme aldehyde oxidase is involved in the oxidative metabolic pathway of diquat and its detoxification effect.

Fungal derived herbicidal metabolite loaded starch-chitosan-gum acacia-agar based bio composite: Preparation, characterization, herbicidal activity, release profile and biocompatibility.

Exposure levels and health implications of fungicides, neonicotinoid insecticides, triazine herbicides and their associated metabolites in pregnant women and men.

Factors influencing occupational exposure to pyrethroids and glyphosate: An analysis of urinary biomarkers in Malaysia, Uganda and the United Kingdom.

Surface multi-walled carbon nanotube modified quaternary amine-functionalized polymers for purification and determination of glyphosate and its four metabolites in plasma samples.

Leaching of herbicides and their metabolites in lysimeters filled with soils from railway tracks.

Exogenous Melatonin Alleviates Atrazine-Induced Glucose Metabolism Disorders in Mice Liver via Suppressing Endoplasmic Reticulum Stress.

Glyphosate effect on biofilms formation, mutagenesis and stress response of *E. coli*.

Metabolic insights into how multifunctional microbial consortium enhances atrazine removal and phosphorus uptake at low temperature.

Evaluating the imazethapyr herbicide mediated regulation of phenol and glutathione metabolism and antioxidant activity in lentil seedlings.

Disturbed nutrient accumulation and cell wall metabolism in panicles are responsible for rice straighthead disease.

Occurrence, ecological risk, and advanced removal methods of herbicides in waters: a timely review.

Triazine herbicide reduced the toxicity of the harmful dinoflagellate *Karenia mikimotoi* by impairing its photosynthetic systems.

Application of 3D-printed pollen traps as a useful tool for exposure and risk assessment of pesticide residues on bumblebees.

Phytotoxic fungal secondary metabolites as herbicides.

Methyl viologen-induced changes in the *Arabidopsis* proteome implicate PATELLIN 4 in oxidative stress responses.

Risk of papillary thyroid carcinoma and nodular goiter associated with exposure to semi-volatile organic compounds: A multi-pollutant assessment based on machine learning algorithms.

Synthetic polyploidization induces enhanced phytochemical profile and biological activities in *Thymus vulgaris* L. essential oil.

Volatilomic signatures of different strains of *Helicobacter pylori*.

The aryl hydrocarbon receptor in β -cells mediates the effects of TCDD on glucose homeostasis in mice.

Associations of chronic exposure to a mixture of pesticides and type 2 diabetes mellitus in a Chinese elderly population.

Conjugating uncoupler compounds with hydrophobic hydrocarbon chains to achieve adipose tissue selective drug accumulation.

ALDH2 deficiency exacerbates MCD-diet induced MASLD by modulating bile acid metabolism.

Regulation of stress granule formation in human oligodendrocytes.

The people behind the papers - Julia Grzymkowski and Nanette Nascone-Yoder.

Can our microbiome break our hearts? Collaborative production of p-cresol sulfate and indoxyl sulfate by commensal microbes increases susceptibility to thrombosis.

Enrichment and distribution of 3,6-dichlorocarbazole in red crucian carp (*Carassius auratus*) and its hepatotoxicity.

Agricultural exposure and risk of ovarian cancer in the AGRiculture and CANcer (AGRICAN) cohort.

Association between dietary pesticide exposure profiles and body weight change in French adults: Results from the NutriNet-Santé cohort.

Risk factors for childhood brain tumours: A systematic review and meta-analysis of observational studies from 1976 to 2022.

Investigation of the activity of a novel tropolone in osteosarcoma.

Transcriptomic and metabolomic profile changes in the liver of Sprague Dawley rat offspring after maternal PFOS exposure during gestation and lactation.

Synthetic GPR40/FFAR1 agonists: An exhaustive survey on the most recent chemical classes and their structure-activity relationships.

Dioxin(-like)-Related Biological Effects through Integrated Chemical-wide and Metabolome-wide Analyses.

Prenatal Phenol and Paraben Exposures and Adverse Birth Outcomes: A Prospective Analysis of U.S. Births.

Inhibition of the urea cycle by the environmental contaminant 2,3,7,8-tetrachlorodibenzo-p-dioxin increases serum ammonia levels in mice.

Construction of algal-bacterial consortia using green microalgae *Chlorella vulgaris* and As(III)-oxidizing bacteria: As tolerance and metabolomic profiling.

Chemical analysis of wetland plants to evaluate the bioaccumulation and metabolism of hexachlorocyclohexane (HCH).

Environmentally relevant concentrations of 2,3,7,8-TCDD induced inhibition of multicellular alternative splicing and transcriptional dysregulation.

Chemicals in menstrual products: A systematic review.

Risk assessment of pesticides used in the eastern Avocado Belt of Michoacan, Mexico: A survey and water monitoring approach.

Both acute glyphosate and the aminomethylphosphonic acid intoxication decreased the acetylcholinesterase activity in rat hippocampus, prefrontal cortex and gastrocnemius muscle.

Identification of endocrine-disrupting chemicals targeting key DCM-associated genes via bioinformatics and machine learning.

MicroRNA-124-3p Modulates Alpha-Synuclein Expression Levels in a Paraquat-Induced in vivo Model for Parkinson's Disease.

Exposure to polycyclic aromatic hydrocarbons, volatile organic compounds, and tobacco-specific nitrosamines and incidence of esophageal cancer.

Metabolism of the 4-Hydroxyphenylpyruvate Dioxygenase Inhibitor, Mesotrione, in Multiple-Herbicide-Resistant Palmer amaranth (*Amaranthus palmeri*).

An Update on the Formation in Tobacco, Toxicity, and Carcinogenicity of N'-Nitrosornicotine and 4-(Methylnitrosamino)-1-(3-pyridyl)-1-butanone.

Association of pesticide exposure with neurobehavioral outcomes among avocado farmworkers in Mexico.

Hepatic glucuronidation of tetrabromobisphenol A and tetrachlorobisphenol A: interspecies differences in humans and laboratory animals and responsible UDP-glucuronosyltransferase isoforms in humans.

Oxidative stress in the bivalve *Diplodon chilensis* under direct and dietary glyphosate-based formulation exposure.

(Non)targeted Chemical Analysis and Risk Assessment of Organic Contaminants in Darkibor Kale Grown at Rural and Urban Farms.

Hepatic effects of acetochlor chiral isomers in zebrafish and L02 cells.

Gut microbiota disorders aggravate terbuthylazine-induced mitochondrial quality control disturbance and PANoptosis in chicken hepatocyte through gut-liver axis.

Impact of chronic exposure to field level glyphosate on the food consumption, survival, gene expression, gut microbiota, and metabolomic profiles of honeybees.

Disruption of spermatogenesis in testicular adult Wistar rats after short-term exposure to high dose of glyphosate based-herbicide: Histopathological and biochemical changes.

Short-term effects of sodium arsenite (AsIII) and sodium arsenate (AsV) on carbohydrate metabolism in the perfused rat liver.

Urinary and household chemical exposures in pet dogs with urothelial cell carcinoma.

Genotoxicity in humans exposed to arsenic, lithium, and boron in drinking water in the Bolivian Andes-A cross sectional study.

Associations of Urinary Total Arsenic and Arsenic Species and Periodontitis.

Metabolic Resistance to Protoporphyrinogen Oxidase-Inhibitor Herbicides in a Palmer amaranth Population from Kansas.

High-throughput screening of the effects of 90 xenobiotics on the simplified human gut microbiota model (SIHUMIX): a metaproteomic and metabolomic study.

RNA and protein biomarkers for detecting enhanced metabolic resistance to herbicides mesosulfuron-methyl and fenoxaprop-ethyl in black-grass (*Alopecurus myosuroides*).

Developmental toxicity and metabolomics analyses of zebrafish (*Danio rerio*) embryos exposed to Fenoxaprop-p-ethyl.

Anionic polysaccharides benefit the bioavailability of pork myofibrillar protein gels: Evidence from a perspective of protein absorption and metabolism.

Engineering *Camelina sativa* Seeds as a Green Bioreactor for the Production of Affordable Human Pro-insulin that Demonstrates Anti-diabetic Efficacy in Rats.

Demonstrating the reliability of in vivo metabolomics based chemical grouping: towards best practice.

Loss of flavin-containing monooxygenase 3 modulates dioxin-like polychlorinated biphenyl 126-induced oxidative stress and hepatotoxicity.

Investigating open access new approach methods (NAM) to assess biological points of departure: A case study with 4 neurotoxic pesticides.

Curative effects of tectochrysin on paraquat-instigated testicular toxicity in rats: A biochemical and histopathological based study.

The urinary metabolites of volatile organic compounds and asthma in young children: NHANES 2011-2018.

Metabolites and MRI-Derived Markers of AD/ADRD Risk in a Puerto Rican Cohort.

Renoprotective effect of esculetin against ischemic acute kidney injury-diabetic comorbidity.

Decrease in Sperm Parameters in the 21st Century: Obesity, Lifestyle, or Environmental Factors? An Updated Narrative Review.

Early and transitory hypoactivity and olfactory alterations after chronic atrazine exposure in female Sprague-Dawley rats.

Metabolic Synergy of Dehalococcoides Populations Leading to Greater Reductive Dechlorination of Polychlorinated Biphenyls.

The study of the protective effect of mitochondrial uncouplers during acute toxicity of the fungicide difenoconazole in different organs of mice.

Differential eigengene network analysis reveals benzo[a]pyrene and 2,3,7,8-tetrachlorodibenzo-p-dioxin consensus regulatory network in human liver cell line HepG2.

Integrating shotgun metagenomics and metabolomics to elucidate the dynamics of microbial communities and metabolites in fine flavor cocoa fermentation in Hainan.

The BCKDK inhibitor BT2 is a chemical uncoupler that lowers mitochondrial ROS production and de novo lipogenesis.

A Narrative Review of Contemporary Lethal Pesticides: Unveiling the Ongoing Threat of Pesticide Poisoning.

Prenatal current-use pesticide exposure and children's neurodevelopment at one year of age in the Infants' Environmental Health (ISA) birth cohort, Costa Rica.

Enhanced metabolic detoxification is associated with fluroxypyr resistance in *Bassia scoparia*.

Establishment and Characterization of Amitrole-Induced Mouse Thyroid Adenomatous Nodule-Derived Cell Lines.

Analysis of Relationships between Metabolic Changes and Selected Nutrient Intake in Women Environmentally Exposed to Arsenic.

Assessing the impact and mechanisms of environmental pollutants (heavy metals and pesticides) on the male reproductive system: a comprehensive review.

Positive Association of Urinary Dimethylarsinic Acid (DMA(V)) with Serum 25(OH)D in Adults Living in an Area of Water-Borne Arsenicosis in Shanxi, China.

Chronic arsenic exposure-provoked biotoxicity involved in liver-microbiota-gut axis disruption in chickens based on multi-omics technologies.

Screening of Secondary Metabolites Produced by *Nigrospora sphaerica* Associated with the Invasive Weed *Cenchrus ciliaris* Reveals Two New Structurally Related Compounds.

Core taxa, co-occurrence pattern, diversity, and metabolic pathways contributing to robust anaerobic biodegradation of chlorophenol.

Effects of Aminomethylphosphonic Acid on the Transcriptome and Metabolome of Red Swamp Crayfish, *Procambarus clarkii*.

Evaluation of *Salvia hispanica* as a Therapeutic Agent against Sodium Arsenic-Induced Testicular Toxicity in a Male Rats Model.

Differential Modulatory Effects of Methylmercury (MeHg) on Ahr-regulated Genes in Extrahepatic Tissues of C57BL/6 Mice.

Salvianolic acid A attenuates arsenic-induced ferroptosis and kidney injury via HIF-2 \uparrow /DUOX1/GPX4 and iron homeostasis.

2,4-D Herbicide-Induced Hepatotoxicity: Unveiling Disrupted Liver Functions and Associated Biomarkers.

Degradation kinetics of veterinary antibiotics and estrogenic hormones in a claypan soil.

Exploring Metabolic and Gut Microbiome Responses to Paraquat Administration in Male Wistar Rats: Implications for Oxidative Stress.

Association between urinary arsenic concentration and genetic polymorphisms in Korean adults.

Evaluation of the diphenyl herbicide, oxyfluorfen, for effects on thyroid hormones in the juvenile rat.

Elucidating the efficacy of functionalized multi-walled carbon nanotube in the biogenesis of L-Dopa and antioxidant metabolites in cell cultures of *Hybanthus enneaspermus*.

Uptake, translocation, accumulation, and metabolism of fluroxypyr-meptyl and oxidative stress induction in rice seedling.

Building a highly efficient *Streptomyces* super-chassis for secondary metabolite production by reprogramming naturally-evolved multifaceted shifts.

Transcriptome analysis reveal the effect of freshwater sediments containing 2,3,7,8-tetrachlorodibenzo-p-dioxin on the *Macrobrachium rosenbergii* hepatopancreas, intestine, and muscle.

Impaired Detoxification of Trans, Trans-2,4-Decadienal, an Oxidation Product from Omega-6 Fatty Acids, Alters Insulin Signaling, Gluconeogenesis and Promotes Microvascular Disease.

Ifosfamide-induced nephrotoxicity in oncological patients.

Distribution, Metabolism, and Excretion of Cenobamate in Adult, Fetal, Neonatal, and Lactating Rats.

Towards non-target proactive food safety: identification of active compounds in convenience tomato products by ten-dimensional hyphenation with integrated simulated gastrointestinal digestion.

Development and inter-laboratory validation of analytical methods for glufosinate and its two metabolites in foods of plant origin.

Organophosphate Toxicity.

[Favorable evolution of severe paraquat poisoning. Treatment with gastric lavage, activated charcoal, cyclophosphamide + corticoids, and conventional daily hemodialysis: case study at the Franck Joly Hospital Center in French Guiana].

Maternal exposure of mice to glyphosate induces depression- and anxiety-like behavior in the offspring via alterations of the gut-brain axis.

Integrating transcriptome and physiological analyses to elucidate the molecular responses of sorghum to fluxofenim and metolachlor herbicide.

Enhanced metabolic resistance mechanism endows resistance to metamifop in *Echinochloa crus-galli* (L.) P. Beauv.

2-Methoxyestradiol ameliorates paraquat-induced pulmonary fibrosis by inhibiting the TGF- β 1/Smad2/3 signaling pathway.

Serum metabolome and liver transcriptome reveal acrolein inhalation-induced sex-specific homeostatic dysfunction.

Modifying effects of 2,4-D and Glyphosate exposures on gut-liver-adipose tissue axis of diet-induced non-alcoholic fatty liver disease in mice.

Effect of atrazine on testicular toxicity involves accommodative disorder of xenobiotic metabolizing enzymes system and testosterone synthesis in European quail (*Coturnix coturnix*).

Hormesis of glyphosate on ferulic acid metabolism and antifungal volatile production in rice root biocontrol endophyte *Burkholderia cepacia* LS-044.

Association of glyphosate exposure with multiple adverse outcomes and potential mediators.

Dietary curcumin supplementation alleviates diquat-induced oxidative stress in the liver of broilers.

Salmonella mutant strains resistant to herbicides - Acetohydroxyacid synthase inhibitors and their use at the Ames test.

Involvement of glyphosate in disruption of biotransformation P450 enzymes and hepatic lipid metabolism in chicken.

Sub-acute toxicity of the herbicide glufosinate-ammonium exposure in adult red swamp crayfish (*Procambarus clarkii*).

Effect of perinatal exposure to glyphosate and its mixture with 2,4-D and dicamba on rat dam kidney and thyroid function and offspring's health.

Mutagenic effects of a commercial glyphosate-based herbicide formulation on the soil filamentous fungus *Aspergillus nidulans* depending on the mode of exposure.

Determination of the elimination half-life of Glyphosate and its main metabolite, AMPA, in chicken plasma.

Toxicity assessment and detoxification metabolism of sodium pentachlorophenol (PCP-Na) on marine economic species: a case study of *Moerella iridescens* and *Exopalaemon carinicauda*.

Abnormalities of serum lipid metabolism in patients with acute paraquat poisoning caused by ferroptosis.

Effects of glyphosate exposure on western diet-induced non-alcoholic fatty liver disease in mice.

Pentachlorophenol exposure induced neurotoxicity by disrupting citrulline metabolism in larvae and adult zebrafish.

Cyanobacterial degradation of herbicide 2,4-dichlorophenoxyacetic acid (2,4-D): Its response to the oxidative stress induced by the primary degradation product 2,4-dichlorophenol (2,4-DCP).

Glyphosate-based herbicide (GBH) challenged thermoregulation in lizards (*Eremias argus*), compensatory warming could mitigate this effect.

Zinc Oxide Nanoparticles and Vitamin C Ameliorate Atrazine-Induced Hepatic Apoptosis in Rat via CYP450s/ROS Pathway and Immunomodulation.

Enantioselective in vitro metabolism of the herbicide diclofop-methyl: Prediction of toxicokinetic parameters and reaction phenotyping.

Mitochondrial and Proteasome Dysfunction Occurs in the Hearts of Mice Treated with Triazine Herbicide Prometryn.

Glyphosate and environmental toxicity with "One Health" approach, a review.

Groundwater constituents and the incidence of kidney cancer.

Delineating the cascade of molecular events in protein aggregation triggered by Glyphosate, aminomethylphosphonic acid, and Roundup in serum albumins.

Long-Term Effects of Perinatal Exposure to a Glyphosate-Based Herbicide on Melatonin Levels and Oxidative Brain Damage in Adult Male Rats.

Effect of sublethal concentrations of glyphosate-based herbicides (Roundup Active®) on skin of the tropical frog (*Dendropsophus molitor*).

Mapping the key characteristics of carcinogens for glyphosate and its formulations: A systematic review.

Glyphosate affects larval gut microbiota and metamorphosis of honey bees with differences between rearing procedures.

The Protective Role of Oleuropein Aglycone against Pesticide-Induced Toxicity in a Human Keratinocytes Cell Model.

Contribution of differential alteration in oxidative stress and anti-oxidation related molecular signals to toxicity difference between atrazine and its main metabolites in nematodes.

Detoxification mechanism of herbicide in *Polypogon fugax* and its influence on rhizosphere enzyme activities.

Multiomics reveals new biomarkers and mechanistic insights into the combined toxicity effects of 2,2',4,4',5,5'-hexachlorobiphenyl and atrazine exposures in MCF-7 cells.

Estrogens and endocrine-disrupting chemicals differentially impact the bioenergetic fluxes of mammary epithelial cells in two- and three-dimensional models.

Effects of glyphosate-based herbicides and glyphosate exposure on sex hormones and the reproductive system: From epidemiological evidence to mechanistic insights.

2,4-dichlorophenoxyacetic acid (2,4-D) exposure during postnatal development alters the effects of western diet on mouse prostate.

Chronic dietary exposure to a glyphosate-based herbicide in broiler hens has long-term impacts on the progeny metabolism.

Toxicological effects of ocular acrolein exposure to eyelids in rabbits in vivo.

High doses of clethodim-based herbicide GrassOut Max poses reproductive hazard by affecting male reproductive function and early embryogenesis in Swiss albino mice.

A comparative review and computational assessment of acetochlor toxicity in fish: A novel endocrine disruptor?

Acyl-CoA dehydrogenase substrate promiscuity: Challenges and opportunities for development of substrate reduction therapy in disorders of valine and isoleucine metabolism.

Herbicide atrazine impairs metabolic plasticity of mixotrophic organisms: Evidence in photochemistry, morphology, and gene expression.

Analysis and management of herbicidal mixtures in a high-intensity agricultural landscape in Belgium.

Biomarkers of pollution by glyphosate in the lichens, *Parmotrema tinctorium* and *Usnea barbata*.

Assessment of the impact of glyphosate and 2,4-D herbicides on the kidney injury and transcriptome changes in obese mice fed a Western diet.

Subacute exposure to Roundup® changes steroidogenesis and gene expression of the glutathione-glutaredoxin system in rat ovaries: Implications for ovarian toxicity of this glyphosate-based herbicide.

Functional characterization of rice (*Oryza sativa*) thioredoxins for detoxification and degradation of atrazine.

The diabetogenic effects of pesticides: Evidence based on epidemiological and toxicological studies.

Synergistic toxicity of 2,4-dichlorophenoxyacetic acid and arsenic alters biomarkers in rats.

Dimethylarsinic acid induces bladder carcinogenesis via the amphiregulin pathway.

Transcriptomic analysis of maize uncovers putative genes involved in metabolic detoxification under four safeners treatment.

Mammary gland development in male rats perinatally exposed to propiconazole, glyphosate, or their mixture.

Exposure to herbicides mixtures in relation to type 2 diabetes mellitus among Chinese rural population: Results from different statistical models.

Integrated metabolomics and transcriptomics reveal glyphosate based-herbicide induced reproductive toxicity through disturbing energy and nucleotide metabolism in mice testes.

Mitochondrial Complex I Inhibition in Dopaminergic Neurons Causes Altered Protein Profile and Protein Oxidation: Implications for Parkinson's disease.

Effects of Atrazine exposure on human bone marrow-derived mesenchymal stromal cells assessed by combinatorial assay matrix.

[Investigation on health status of workers exposed to glyphosate].

Urinary glyphosate and AMPA levels in a cross-sectional study of postmenopausal women: Associations with organic eating behavior and dietary intake.

Promoted dissipation and detoxification of atrazine by graphene oxide coexisting in water.

Immunotoxicity of relevant mixtures of pesticides and metabolites on THP-1 cells.

Comparative proteomic and physiological analyses reveal tribenuron-methyl phytotoxicity and nontarget-site resistance mechanisms in *Brassica napus*.

Maternal pre-conceptional glyphosate exposure impacts the offspring hepatic and ovarian proteome.

The combined effects of atrazine and warming on environmental adaptability in lizards (*Eremias argus*) from the perspective of a life-history traits trade-off: Gender differences in trade-off strategies may reverse mortality risk.

Validation and Application of UPLC-MS/MS Method to Analysis of Glyphosate and its Metabolites in Water.

Atrazine exposure can dysregulate the immune system and increase the susceptibility against pathogens in honeybees in a dose-dependent manner.

Effects of Glyphosate on Female Reproductive Output in the Marine Polychaete Worm *Ophryotrocha diadema*.

Sex-specific respiratory and systemic endocrine effects of acute acrolein and trichloroethylene inhalation.

Glyphosate induces autophagy in hepatic L824 cell line through NO-mediated activation of RAS/RAF/MEK/ERK signaling pathway and energy metabolism disorders.

Integrated physiological and metabolomic analysis reveals new insights into toxicity pathways of paraquat to *Microcystis aeruginosa*.

Oral administration of curcumin and gallic acid alleviates pentachlorophenol-induced oxidative damage in rat intestine.

Leaching of herbicides mixtures from pre-exposed agricultural plastics severely impact microalgae.

1²-triketone herbicide exposure cause tyrosine and fat accumulation in *Caenorhabditis elegans*.

Fungal biodegradation of chlorinated herbicides: an overview with an emphasis on 2,4-D in Argentina.

Isolation and characterization of indigenous bacterial assemblage for biodegradation of persistent herbicides in the soil.

Looking beyond Cancer: Glyphosate and Liver, Metabolic Diseases in Youth.

Therapeutic effect of gossypetin against paraquat-induced testicular damage in male rats: a histological and biochemical study.

Kinetics, mechanism, and tautomerism in ametryn acid hydrolysis: From molecular structure to environmental impacts.

TDP-43 is a potential marker of dopaminergic neuronal damage caused by atrazine exposure.

Glyphosate exposure and urinary oxidative stress biomarkers in the Agricultural Health Study.

Atrazine contaminated sites and bullfrog tadpoles: evasive trends and biochemical consequences.

Role of the tyrosine aminotransferase AccTATN gene in the response to pesticide and heavy metal stress in *Apis cerana cerana*.

Transcriptome changes in chlorsulfuron-treated plants are caused by acetolactate synthase inhibition and not induction of a herbicide detoxification system in *Marchantia polymorpha*.

Design, synthesis and mechanism research of novel algicide based on bioactive fragments synthesis strategy.

The effects of short-term glyphosate-based herbicide exposure on insect gene expression profiles.

Evaluation of the herbicide glyphosate, (aminomethyl)phosphonic acid, and glyphosate-based formulations for genotoxic activity using in vitro assays.

Human 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure and thyroid cancer risk.

Impact of sub-acute acrolein inhalation on the molecular regulation of mitochondrial metabolism in rat lung.

Lycopene ameliorates atrazine-induced spatial learning and memory impairments by inhibiting ferroptosis in the hippocampus of mice.

A novel mechanism of Dimethyl ester of Alpha-ketoglutarate in suppressing Paraquat-induced BEAS-2B cell injury by alleviating GSDME dependent pyroptosis.

Complex mixtures of pesticides and metabolites modulate the malignant phenotype of murine melanoma B16-F1 cells.

Effects of the herbicide ametryn on development and thyroidogenesis of bullfrog tadpoles (*Aquarana catesbeiana*) under different temperatures.

Enhanced detoxification via Cyt-P450 governs cross-tolerance to ALS-inhibiting herbicides in weed species of *Centaurea*.

Behind the plant-bacteria system: The role of zucchini and its secondary metabolite in shaping functional microbial diversity in MCPA-contaminated soil.

Investigating the effects of glyphosate on the bumblebee proteome and microbiota.

The Tobacco Smoke Component, Acrolein, as a Major Culprit in Lung Diseases and Respiratory Cancers: Molecular Mechanisms of Acrolein Cytotoxic Activity.

[Determination of phenoxyacetic herbicides, metabolites of organophosphorus and pyrethroid pesticides in human urine using solid phase extraction coupled with ultra-performance liquid chromatography-tandem mass spectrometry].

Cyhalofop-butyl exposure induces the severe hepatotoxicity and immunotoxicity in zebrafish embryos.

Toxicity of herbicide glyphosate to planarian *Dugesia japonica* and its potential molecular mechanisms.

Minor metabolomic disturbances induced by glyphosate-isopropylammonium exposure at environmentally relevant concentrations in an aquatic turtle, *Pelodiscus sinensis*.

Adult exposure of atrazine alone or in combination with carbohydrate diet hastens the onset/progression of type 2 diabetes in *Drosophila*.

Hydroxytyrosol attenuates diquat-induced oxidative stress by activating Nrf2 pathway and modulating colonic microbiota in mice.

Transcriptome analysis reveals the mechanisms of hepatic injury caused by long-term environmental exposure to atrazine in juvenile common carp (*Cyprinus carpio* L.).

The mechanism of different cyanobacterial responses to glyphosate.

Pentachlorophenol causes redox imbalance, inhibition of brush border membrane and metabolic enzymes, DNA damage and histological alterations in rat kidney.

Toxic effects of glyphosate on histopathology and intestinal microflora of juvenile *Litopenaeus vannamei*.

Glyphosate based-herbicide disrupts energy metabolism and activates inflammatory response through oxidative stress in mice liver.

Noval bio-organic fertilizer containing *Arthrobacter* sp. DNS10 alleviates atrazine-induced growth inhibition on soybean by improving atrazine removal and nitrogen accumulation.

Postnatal exposure to a glyphosate-based herbicide interferes with the development and growth of the mammary gland of pre-pubertal Ewe lambs.

Global warming and glyphosate toxicity (I): Adult zebrafish modelling with behavioural, immunohistochemical and metabolomic approaches.

Mitigating effect of L-carnitine against atrazine-induced hepatotoxicity: histopathological and biochemical analyses in albino rats.

Dietary myricetin assuages atrazine-mediated hypothalamic-pituitary-testicular axis dysfunction in rats.

Chitosan nanocomposite as an effective carrier of potential herbicidal metabolites for noteworthy phytotoxic effect against major aquatic invasive weed water hyacinth (*Eichhornia crassipes*).

Field-realistic acute exposure to glyphosate-based herbicide impairs fine-color discrimination in bumblebees.

In vitro study of glyphosate effects on thyroid cells.

Exposure to the pesticides linuron, dimethomorph and imazalil alters steroid hormone profiles and gene expression in developing rat ovaries.

Enhanced degradation of atrazine through UV/bisulfite: Mechanism, reaction pathways and toxicological analysis.

Disruption of the Molecular Regulation of Mitochondrial Metabolism in Airway and Lung Epithelial Cells by Cigarette Smoke: Are Aldehydes the Culprit?

Metabolism of guarana (*Paullinia cupana* Kunth var. *sorbilis*) plants and fruit production subjected to glyphosate doses.

Herbicide prometryn adversely affects the development and reproduction of *Tigriopus japonicus* by disturbing the ecdysone signal pathway and chitin metabolic pathway.

Study on the toxic effects of sodium pentachlorophenol (PCP-Na) on razor clam (*Sinonovacula constricta*).

Human serum lipidomics analysis revealed glyphosate may lead to lipid metabolism disorders and health risks.

Atrazine alters early sexual development of the South American silverside, *Odontesthes bonariensis*.

Disturbance of cellular calcium homeostasis plays a pivotal role in glyphosate-based herbicide-induced oxidative stress.

Chronic effects of environmental concentrations of antifoulant diuron on two marine fish: Assessment of hormone levels, immunity, and antioxidant defense system.

Mitochondrial dysfunction due to in vitro exposure to atrazine and its metabolite in striatum.

Structure-based discovery of pyrazole-benzothiadiazole hybrid as human HPPD inhibitors.

Exposure to Agent Orange and Hepatocellular Carcinoma Among US Military Personnel.

Associations between urinary glyphosate and diabetes mellitus in the US general adult: a cross-sectional study from NHANES 2013-2016.

Glyphosate-induced glioblastoma cell proliferation: Unraveling the interplay of oxidative, inflammatory, proliferative, and survival signaling pathways.

Effects of glyphosate exposure on gut-liver axis: Metabolomic and mechanistic analysis in grass carp (*Ctenopharyngodon idellus*).

Metabolomics analyses of cancer tissue from patients with colorectal cancer.

Genetic Susceptibility to Neurotoxicity Related to Prenatal Inorganic Arsenic Exposure in Young Spanish Children.

A review of the characteristic properties of selected tobacco chemicals and their associated etiological risks.

Computational biology and in vitro studies for anticipating cancer-related molecular targets of sweet wormwood (*Artemisia annua*).

Liquid Chromatography-Mass Spectrometry Screening of Cyclophosphamide DNA Damage In Vitro and in Patients Undergoing Chemotherapy Treatment.

Triazine herbicides exposure, natural immunoglobulin M antibodies, and fasting plasma glucose changes: Association and mediation analyses in general Chinese urban adults.

Glyphosate potentiates insulin resistance in skeletal muscle through the modulation of IRS-1/PI3K/Akt mediated mechanisms: An in vivo and in silico analysis.

Acrolein adducts and responding autoantibodies correlate with metabolic disturbance in Alzheimer's disease.

Acrolein Exposure Impaired Glucose Homeostasis and Increased Risk of Type 2 Diabetes: An Urban Adult Population-Based Cohort Study with Repeated Measures.

Glyphosate-induced autophagy inhibition results in hepatic steatosis via mediating epigenetic reprogramming of PPAR α in roosters.

Hydralazine plays an immunomodulation role of pro-regeneration in a mouse model of spinal cord injury.

Exposure to Volatile Organic Compounds Is Associated with Hypertension in Black Adults: The Jackson Heart Study.

Diet as a Source of Acrolein: Molecular Basis of Aldehyde Biological Activity in Diabetes and Digestive System Diseases.

Arsenic metabolism, N6AMT1 and AS3MT single nucleotide polymorphisms, and their interaction on gestational diabetes mellitus in Chinese pregnant women.

Association of Lifetime Exposure to Glyphosate and Aminomethylphosphonic Acid (AMPA) with Liver Inflammation and Metabolic Syndrome at Young Adulthood: Findings from the CHAMACOS Study.

Snake venom nerve growth factor-inspired designing of novel peptide therapeutics for the prevention of paraquat-induced apoptosis, neurodegeneration, and alteration of metabolic pathway genes in the rat pheochromocytoma PC-12 cell.

LC-MS/MS methods for the determination of 30 quaternary ammonium compounds including benzalkonium and paraquat in human serum and urine.

Carbohydrate metabolism dynamic in chlorpropham- and 1,4-dimethylnaphthalene-treated potatoes and its effect on the browning of French fries.

Structure-activity relationship of 2,4-D correlates auxinic activity with the induction of somatic embryogenesis in *Arabidopsis thaliana*.

A neuroprotective dose of trehalose is harmless to metabolic organs: comprehensive histopathological analysis of liver, pancreas, and kidney.

Target-Site and Metabolic Resistance Mechanisms to Penoxsulam in Late Watergrass (*Echinochloa phyllopogon*) in China.

[A Preliminary Study on the Plasma Metabolomic Profiles of Patients Suffering From Acute Diquat Poisoning].

Epilithic biofilms as a discriminating matrix for long-term and growing season pesticide contamination in the aquatic environment: Emphasis on glyphosate and metabolite AMPA.

Influence of genetic polymorphisms on arsenic methylation efficiency during pregnancy: Evidence from a Spanish birth cohort.

Sciadopitysin mitigates spermatological and testicular damage instigated by paraquat administration in male albino rats.

Polyamine-Derived Aminoaldehydes and Acrolein: Cytotoxicity, Reactivity and Analysis of the Induced Protein Modifications.

Selenium-dependent glutathione peroxidase 1 regulates transcription of elongase 3 in murine tissues.

How Benthic Sediment Microbial Communities Respond to Glyphosate and Its Metabolite: a Microcosm Experiment.

Fate of glyphosate and its metabolite AminoMethylPhosponic acid (AMPA) from point source through wastewater sludge and advanced treatment.

Online solid phase extraction high-performance liquid chromatography - Isotope dilution - Tandem mass spectrometry quantification of organophosphate pesticides, synthetic pyrethroids, and selected herbicide metabolites in human urine.

Terminal Residue and Dietary Risk Assessment of Atrazine and Isoxaflutole in Corn Using High-Performance Liquid Chromatography-Tandem Mass Spectrometry.

Integrating environmental carry capacity based on pesticide risk assessment in soil management: A case study for China.

Urinary Glyphosate, 2,4-D and DEET Biomarkers in Relation to Neurobehavioral Performance in Ecuadorian Adolescents in the ESPINA Cohort.

The effects of glyphosate-based herbicide on the hypothalamic-pituitary thyroid axis are tissue-specific and dependent on age exposure.

Soil metabolomics: A powerful tool for predicting and specifying pesticide sorption.

Treatment of atrazine-containing wastewater by algae-bacteria consortia: Signal transmission and metabolic mechanism.

Comparison of urinary mercapturic acid excretions in users of various tobacco/nicotine products.

Atrazine decontamination by a newly screened psychrotroph *Paenarthrobacter* sp. KN0901 in an aquatic system: Metabolic pathway, kinetics, and hydroponics experiment.

Effects of atrazine on microbial metabolic limitations in black soils: Evidence from enzyme stoichiometry.

Recombinant glutathione transferases from flufenacet-resistant black-grass (*Alopecurus myosuroides* Huds.) form different flufenacet metabolites and differ in their interaction with pre- and post-emergence herbicides.

Development of a specific and sensitive method for the detection of glyphosate pesticide and its metabolite in tea using dummy molecularly imprinted solid-phase extraction coupled with liquid chromatography-tandem quadrupole mass spectrometry.

Fitness assessment of *Mytilus galloprovincialis* Lamarck, 1819 after exposure to herbicide metabolite propachlor ESA.

Target-site mutation and enhanced metabolism endow resistance to nicosulfuron in a *Digitaria sanguinalis* population.

Defining the toxicological profile of 4-hydroxyphenylpyruvate dioxygenase-directed herbicides to *Aedes aegypti* and *Amblyomma americanum*.

ACCase gene mutations and P450-mediated metabolism contribute to cyhalofop-butyl resistance in *Eleusine indica* biotypes from direct-seeding paddy fields.

Enhanced metabolic ability enabled wild panicgrass (*Panicum miliaceum* L. var. *ruderales* Kit.) resistance to ALS inhibitor herbicide.

Disruption of oogenesis and molting by methoprene and glyphosate in *Gammarus fossarum*: involvement of retinoic acid?

Metamifop resistance in *Echinochloa glabrescens* via glutathione S-transferases-involved enhanced metabolism.

Multiple Metabolism Pathways of Bentazone Potentially Regulated by Metabolic Enzymes in Rice.

Novel In Vitro Intestinal Microbiome Model to Study Lipidomic and Metabolomic Adaptations Due to Exposure to Glyphosate, Perfluorooctanoic Acid, and Docusate Sodium.

Integrated physiological, metabolite and proteomic analysis reveal the glyphosate stress response mechanism in tea plant (*Camellia sinensis*).

Insights into the metabolic pathways and biodegradation mechanisms of chloroacetamide herbicides.

Simultaneous and sensitive analysis of glyphosate, glufosinate, and their metabolites in surface water by HPLC-ICP-MS/MS.

Elucidation of the environmental reductive metabolism of the herbicide tritosulfuron assisted by electrochemistry and mass spectrometry.

Trichoderma virens exerts herbicidal effect on *Arabidopsis thaliana* via modulation of amino acid metabolism.

Metabolic resistance to acetolactate synthase inhibitors in *Beckmannia syzigachne*: identification of CYP81Q32 and its transcription regulation.

Simultaneous determination of glyphosate, glufosinate, and their metabolites in honey using liquid chromatography-tandem mass spectrometry and solid-phase extraction.

Multiple Metabolic Enzymes Can Be Involved in Cross-Resistance to 4-Hydroxyphenylpyruvate-Dioxygenase-Inhibiting Herbicides in Wild Radish.

Ion chromatography for the analysis of glyphosate and its selected metabolites. A review.

Mutation at the 197 site and P450-mediated metabolic resistance are involved in bensulfuron-methyl resistance in *Sagittaria trifolia*.

Metabolomics profile of plasma in acute diquat-poisoned patients using gas chromatography-mass spectrometry.

Current insights into the microbial degradation of nicosulfuron: Strains, metabolic pathways, and molecular mechanisms.

Highly-Selective Analytical Strategy for 90 Pesticides and Metabolites Residues in Fish and Shrimp Samples.

Metabolic Exploration for Cyhalofop-Butyl Antagonism in Barnyardgrass [*Echinochloa crus-galli* (L.) P. Beauv.] Following Pretreatment of Malathion.

Mutation of *Arabidopsis* SME1 and Sm core assembly improves oxidative stress resilience.

Increased Levels of the Acrolein Metabolite 3-Hydroxypropyl Mercapturic Acid in the Urine of e-Cigarette Users.

Detoxification and metabolism of glyphosate by a *Pseudomonas* sp. via biogenic manganese oxidation.

Insights into the effects of sublethal doses of pesticides glufosinate-ammonium and sulfoxaflor on honey bee health.

Metabolomic Responses of Lettuce (*Lactuca sativa*) to Allelopathic Benzoquinones from *Iris sanguinea* Seeds.

Prenatal arsenic exposure, arsenic metabolism and neurocognitive development of 2-year-old children in low-arsenic areas.

HPLC-MS/MS determination and the postmortem distribution or postmortem redistribution of paraquat and its metabolites in four fatal intoxication cases.

Associations of arsenic exposure with liver injury in US adults: NHANES 2003-2018.

Absorption, translocation, and metabolism of atrazine, carbamazepine, and sulfamethoxazole by the macrophyte Orange King Humbert canna lily (*Canna*—*generalis* L.H. Bailey (pro sp.) [*glauca*—*indica*]).

Glyphosate and Aminomethylphosphonic Acid (AMPA) Modulate Glutathione S-Transferase in Non-Tumorigenic Prostate Cells.

Use of computational toxicology models to predict toxicological points of departure: A case study with triazine herbicides.

Cyhalofop-butyl and pyribenzoxim-induced oxidative stress and transcriptome changes in the muscle of crayfish (*Procambarus clarkii*).

Effects of copper sulfate algaecide on the cell growth, physiological characteristics, the metabolic activity of *Microcystis aeruginosa* and raw water application.

Modeling and optimization of chlorpyrifos and glyphosate biodegradation using RSM and ANN: Elucidating their degradation pathways by GC-MS based metabolomics.

The retinoid metabolism of *Gammarus fossarum* is disrupted by exogenous all-trans retinoic acid, citral, and methoprene but not by the technical formulation of glyphosate.

Exogenous application of *Bradyrhizobium japonicum* AC20 enhances soybean tolerance to atrazine via regulating rhizosphere soil microbial community and amino acid, carbohydrate metabolism related genes expression.

Effect of herbicide stress on synchronization of carbon and nitrogen metabolism in lentil (*Lens culinaris* Medik.).

Systematic metabolic engineering of *Escherichia coli* for the enhanced production of cinnamaldehyde.

Urine glyphosate exposure and serum sex hormone disruption within the 2013-2014 National Health and Nutrition Examination survey (NHANES).

Glyphosate metabolism in *Tetrahymena thermophila*: A shotgun proteomic analysis approach.

Assessment of exposure to pesticide mixtures in five European countries by a harmonized urinary suspect screening approach.

Cinnamaldehyde affects lipid droplets metabolism after adipogenic differentiation of C2C12 cells.

Mitigation of atrazine-induced oxidative stress on soybean seedlings after co-inoculation with atrazine-degrading bacterium *Arthrobacter* sp. DNS10 and inorganic phosphorus-solubilizing bacterium *Enterobacter* sp. P1.

Mechanistic modeling indicates rapid glyphosate dissipation and sorption-driven persistence of its metabolite AMPA in soil.

The Lethal and Sub-Lethal Effects of Fluorinated and Copper-Based Pesticides-A Review.

Prostaglandin Metabolome Profiles in Zebrafish (*Danio rerio*) Exposed to Acetochlor and Butachlor.

Developmental toxicity of prometryn induces mitochondrial dysfunction, oxidative stress, and failure of organogenesis in zebrafish (*Danio rerio*).

The role of surface activity on the amyloid fibrillation pathway of bovine serum albumin upon interaction with glyphosate.

Closed Bipolar Electrode-Enabled Electrochromic Sensing of Multiple Metabolites in Whole Blood.

Exposure of children to glyphosate in Morocco: Urinary levels and predictors of exposure.

Urinary concentrations and determinants of glyphosate and glufosinate in pregnant Canadian participants in the MIREC study.

Impacts of a bacterial algicide on metabolic pathways in *Chlorella vulgaris*.

Ecological risk assessment of glyphosate and its possible effect on bacterial community in surface sediments of a typical shallow Lake, northern China.

Mycoremediation of pretilachlor and its metabolite by *Aspergillus ficuum*.

Low doses of glyphosate do not damage the secondary metabolism of common bean.

Integrated transcriptomic-metabolomic analysis reveals that cinnamaldehyde exposure positively regulates the phenylpropanoid pathway in postharvest Satsuma mandarin (*Citrus unshiu*).

Arsenic exposure induces urinary metabolome disruption in Pakistani male population.

The effect and mechanism of Fushen Granule on gut microbiome in the prevention and treatment of chronic renal failure.

m(6)A methylation-mediated PGC-1 α contributes to ferroptosis via regulating GSTK1 in arsenic-induced hepatic insulin resistance.

Does prenatal exposure to multiple airborne and tap-water pollutants increase neonatal thyroid-stimulating hormone concentrations? Data from the Picardy region, France.

Untargeted serum metabolomics reveals novel metabolite associations and disruptions in amino acid and lipid metabolism in Parkinson's disease.

Inflammation and cardiometabolic diseases induced by persistent organic pollutants and nutritional interventions: Effects of multi-organ interactions.

Arsenic exposure caused male infertility indicated by testis and sperm metabolic dysfunction in SD rats.

Arsenic induces metabolome remodeling in mature human adipocytes.

Urinary arsenic metabolism, genetic susceptibility, and their interaction on type 2 diabetes.

Safety and efficacy of once-daily HU6 versus placebo in people with non-alcoholic fatty liver disease and high BMI: a randomised, double-blind, placebo-controlled, phase 2a trial.

Metformin alleviates sodium arsenite-induced hepatotoxicity and glucose intolerance in mice by suppressing oxidative stress, inflammation, and apoptosis.

The sodium borate relieves the hypertrophic damage induced during pregnancy, it improves contractibility, reduces oxidative stress and stimulates cell proliferation.

Multi-omics analysis reveals that the metabolite profile of raw milk is associated with dairy cows' health status.

Untargeted metabolomics reveals dynamic changes in metabolic profiles of rat supraspinatus tendon at three different time points after diabetes induction.

Remote effects of kidney drug transporter OAT1 on gut microbiome composition and urate homeostasis.

In vitro and in silico prediction of antibacterial interaction between essential oils via graph embedding approach.

High-Soluble-Fiber Diet Attenuates Hypoxia-Induced Vascular Remodeling and the Development of Hypoxic Pulmonary Hypertension.

Dysregulated meta-organismal metabolism of aromatic amino acids in alcohol-associated liver disease.

Phloretin as an add-on therapy to losartan attenuates diabetes-induced AKI in rats: A potential therapeutic approach targeting TLR4-induced inflammation.

Overactivated Epithelial NF- κ B Disrupts Lung Development in Congenital Diaphragmatic Hernia.

Mitochondrial Dysfunction After Repeated Mild Blast Traumatic Brain Injury Is Attenuated by a Mild Mitochondrial Uncoupling Prodrug.

Postictal hypoxia involves reactive oxygen species and is ameliorated by chronic mitochondrial uncoupling.

Knockdown of IL4I1 Improved High Glucose-evoked Insulin Resistance in HepG2 Cells by Alleviating Inflammation and Lipotoxicity Through AHR Activation.

Haloxypop-P-methyl induces immunotoxicity and glucose metabolism disorders and affects the Nrf2/ARE pathway mediated antioxidant system in *Chiromantes dehaani*.

Characterizing the impact of simvastatin co-treatment of cell specific TCDD-induced gene expression and systemic toxicity.

The effects of environmental aryl hydrocarbon receptor ligands on signaling and cell metabolism in cancer.

Association between maternal use of spray formulations and offspring urological anomalies: The Japan Environment and Children's Study.

p-Cresol Sulfate Is a Sensitive Urinary Marker of Fecal Microbiota Transplantation and Antibiotics Treatments in Human Patients and Mouse Models.

Exposure to pesticides and the risk of hypothyroidism: a systematic review and meta-analysis.

Human Preadipocytes Differentiated under Hypoxia following PCB126 Exposure during Proliferation: Effects on Differentiation, Glucose Uptake and Adipokine Profile.

Deciphering the metabolic profile and anti-colorectal cancer mechanism of Capilliposide A using ultra performance liquid chromatography mass spectrometry combined with non-targeted metabolomics studies.

Liver enzymes mediate the association between aldehydes co-exposure and hypertriglyceridemia.

2,3,7,8-tetrachlorodibenzo-p-dioxin induces multigenerational testicular toxicity and biosynthetic disorder of testosterone in BALB/C mice: Transcriptional, histopathological and hormonal determinants.

Assessing farmer's exposure to pesticides and the risk for non-communicable diseases: A biomonitoring study.

Short-term triphenyltin exposure alters microbial homeostasis in the silkworm (*Bombyx mori*) midgut.

Sublethal toxicities of 2,4-dinitrophenol as inferred from online self-reports.

Precision modulation of dysbiotic adult microbiomes with a human-milk-derived synbiotic reshapes gut microbial composition and metabolites.

[Hyperoxia caused intestinal metabolism disorder in mice].

Antibiotics augment the impact of iron deficiency on metabolism in a piglet model.

Non-Cardiotoxic Tetradecanoic Acid-2,4-Dinitrophenol Ester Nanomicelles in Microneedles Exert Potent Anti-Obesity Effect by Regulating Adipocyte Browning and Lipogenesis.

Intestinal GPDH-1 regulates high glucose diet induced lifespan extension in aged worms.

A phenome-wide association study (PheWAS) to identify the health impacts of 4-cresol sulfate in the Nagahama Study.

Basidiomycota species in *Drosophila* gut are associated with host fat metabolism.

Atlas of gut microbe-derived products from aromatic amino acids and risk of cardiovascular morbidity and mortality.

Magnesium lithospermate B ameliorates diabetic nephropathy by suppressing the uremic toxin formation mediated by gut microbiota.

The health risk of acetochlor metabolite CMEPA is associated with lipid accumulation induced liver injury.

Exposome epidemiology for suspect environmental chemical exposures during pregnancy linked to subsequent breast cancer diagnosis.

Hepatoprotective and anti-hyperglycemic effects of ferulic acid in arsenic-exposed mice.

Arsenic reduces the GATA3 expression associated with an increase in proliferation and migration of mammary epithelial cell line MCF-10A.

Untargeted Multiomics Approach Coupling Lipidomics and Metabolomics Profiling Reveals New Insights in Diabetic Retinopathy.

Altered Gut Microbiota as Potential Biomarkers for Autism Spectrum Disorder in Early Childhood.

TCDD dysregulation of lncRNA expression, liver zonation and intercellular communication across the liver lobule.

Impact of the pentose phosphate pathway on metabolism and pathogenesis of *Staphylococcus aureus*.

Biomolecular phase separation in stress granule assembly and virus infection.

Exposure to p-dichlorobenzene and prevalent endocrine-related reproductive cancers among US women.

Resveratrol ameliorates ortho- polychlorinated biphenyls' induced toxicity in ovary cells.

Torsemide increases arsenic concentrations by inhibition of multidrug resistance protein 4 in arsenic trioxide treated acute promyelocytic leukemia patients.

Exposure to phenols, chlorophenol pesticides, phthalate and PAHs and mortality risk: A prospective study based on 6 rounds of NHANES.

Association between polychlorinated biphenyls exposure and incident type 2 diabetes mellitus: A nested case-control study.

Diosmin exerts hepatoprotective and antihyperglycemic effects against sodium arsenite-induced toxicity through the modulation of oxidative stress and inflammation in mice.

Durvillaea antarctica: A Seaweed for Enhancing Immune and Cardiometabolic Health and Gut Microbiota Composition Modulation.

Fetal and neonatal dioxin exposure causes sex-specific metabolic alterations in mice.

Cystine/Glutamate Xc(-) Antiporter Induction Compensates for Transsulfuration Pathway Repression by 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) to Ensure Cysteine for Hepatic Glutathione Biosynthesis.

Transcriptional, hormonal and histological alterations in the ovaries of BALB/c mice exposed to TCDD in connection with multigenerational female infertility.

Polychlorinated biphenyls, polychlorinated dibenzo-p-dioxins, polychlorinated dibenzofurans, pesticides, and diabetes in the Anniston Community Health Survey follow-up (ACHS II): single exposure and mixture analysis approaches.

Possible Effects of Uremic Toxins p-Cresol, Indoxyl Sulfate, p-Cresyl Sulfate on the Development and Progression of Colon Cancer in Patients with Chronic Renal Failure.

Changes in metabolic landscapes shape divergent but distinct mutational signatures and cytotoxic consequences of redox stress.

Concomitant inhibition of TLR-4 and SGLT2 by phloretin and empagliflozin prevents diabetes-associated ischemic acute kidney injury.

Removal of iodine by dry adsorbents in filtered containment venting system after 10 years of Fukushima accident.

Ferrous sulfate reverses cerebral metabolic abnormality induced by minimal hepatic encephalopathy.

Impaired pancreatic beta-cell function after a single dose of oral iron: A before-and-after (pre-post) study.

Biodegradable Hollow Nanoscavengers Restore Liver Functions to Reverse Insulin Resistance in Type 2 Diabetes.

Regenerative plantlets with improved agronomic characteristics caused by anther culture of tetraploid potato (*Solanum tuberosum* L.).

Serum Levels of Indoxyl Sulfate and P-cresol in Type II Diabetic Patients With and Without Nephropathy.

Citicoline ameliorates arsenic-induced hepatotoxicity and diabetes in mice by overexpression of VAMP2, PPAR- γ , As3MT, and SIRT3.

Effect of the probiotic strain, *Lactiplantibacillus plantarum* P9, on chronic constipation: A randomized, double-blind, placebo-controlled study.

Activation of the Cap'n'collar C pathway (Nrf2 pathway in vertebrates) signaling in insulin pathway compromised *Drosophila melanogaster* flies ameliorates the diabetic state upon pro-oxidant conditions.

Polyhalogenated carbazoles induce hepatic metabolic disorders in mice via alteration in gut microbiota.

Steatosis and Metabolic Disorders Associated with Synergistic Activation of the CAR/RXR Heterodimer by Pesticides.

The vitamin B(12) analog cobinamide ameliorates azide toxicity in cells, *Drosophila melanogaster*, and mice.

α -Lipoic acid eliminates dioxin-induced offspring sexual immaturity by improving abnormalities in folic acid metabolism.

Endocrine-disrupting chemicals (EDCs) and cancer: new perspectives on an old relationship.

Disruption of mitochondrial function augments the radiosensitivity of prostate cancer cell lines.

Exposure to nonanoic acid alters small intestinal neuroendocrine tumor phenotype.

Consequences of reprogramming acetyl-CoA metabolism by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the mouse liver.

Associations of metal mixtures with metabolic-associated fatty liver disease and non-alcoholic fatty liver disease: NHANES 2003-2018.

Ifosfamide - History, efficacy, toxicity and encephalopathy.

The capsaicinoid nonivamide suppresses the inflammatory response and attenuates the progression of steatosis in a NAFLD-rat model.

A screening test proposal for congenital defects based on maternal serum metabolomics profile.

Assessment of uremic toxins in advanced chronic kidney disease patients on maintenance hemodialysis by LC-ESI-MS/MS.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces liver lipid metabolism disorder via the ROS/AMPK/CD36 signaling pathway.

Phosphine gas in the dark induces severe phytotoxicity in *Arabidopsis thaliana* by increasing a hypoxia stress response and disrupting the energy metabolism: Transcriptomic approaches.

Rapid and sustainable HPLC method for the determination of uremic toxins in human plasma samples.

Metabolomic Analyses to Identify Candidate Biomarkers of Cystinosis.

Diagnostic biomarker panels of osteoarthritis: UPLC-QToF/MS-based serum metabolic profiling.

Food for thought-The link between *Clostridioides difficile* metabolism and pathogenesis.

Toward an understanding of the role of the exposome on fragile X phenotypes.

Association of the gut microbiome with kidney function and damage in the Hispanic Community Health Study/Study of Latinos (HCHS/SOL).

The Aryl Hydrocarbon Receptor Ligand 6-Formylindolo(3,2-b)carbazole Promotes Estrogen Receptor Alpha and c-Fos Protein Degradation and Inhibits MCF-7 Cell Proliferation and Migration.

Bile acid metabolism involved into the therapeutic action of Xiaojianzhong Tang via gut microbiota to treat chronic atrophic gastritis in rats.

Alpha-lipoic acid inhibits sodium arsenite-mediated autophagic death of rat insulinoma cells.

Endocrine disruptors and endometriosis.

The environmental pollutant, polychlorinated biphenyl 126, alters liver function in a rodent model of alcohol-associated liver disease.

On-Demand Removable Self-Healing and pH-Responsive Europium-Releasing Adhesive Dressing Enables Inflammatory Microenvironment Modulation and Angiogenesis for Diabetic Wound Healing.

Multi-omics reveals diet-induced metabolic disorders and liver inflammation via microbiota-gut-liver axis.

Temporal decline of sperm concentration: role of endocrine disruptors.

Betaine protects against sodium arsenite-induced diabetes and hepatotoxicity in mice.

Effect of glyphosate, its metabolite AMPA, and the glyphosate formulation Roundup(®) on brown trout (*Salmo trutta f. fario*) gut microbiome diversity.

Metabolic Communication by SGLT2 Inhibition.

Antioxidant Vitamins Attenuate Glyphosate-Induced Development of Type-2 Diabetes Through the Activation of Glycogen Synthase Kinase-3 β and Forkhead Box Protein O-1 in the Liver of Adult Male Rats.

Genome-Wide Identification and Expression Analysis Reveals the B3 Superfamily Involved in Embryogenesis and Hormone Responses in *Dimocarpus longan* Lour.

Toxic risk evaluation of effluents from a swine biodigester in the plant models *Lactuca sativa* and *Allium cepa*.

An insight into the critical role of gut microbiota in triggering the phthalate-induced toxicity and its mitigation using probiotics.

Toxicological evaluation of TBBPA by common carp (*Cyprinus carpio*) about the in vivo/vitro disturbance of the AHR pathway.

Plasma metabolites of aromatic amino acids associate with clinical severity and gut microbiota of Parkinson's disease.

Arsenic-Induced Thyroid Hormonal Alterations and Their Putative Influence on Ovarian Follicles in Balb/c Mice.

Untargeted Metabolomics Analyses and Contaminant Chemistry of Dreissenid Mussels at the Maumee River Area of Concern in the Great Lakes.

Association between Environmental Exposure to Multiclass Organic Pollutants and Sex Steroid Hormone Levels in Women of Reproductive Age.

Hormonal Status of Transgenic Birch with a Pine Glutamine Synthetase Gene during Rooting In Vitro and Budburst Outdoors.

Indoor metabolites and chemicals outperform microbiome in classifying childhood asthma and allergic rhinitis.

Age-dependent changes in the gut microbiota and serum metabolome correlate with renal function and human aging.

Thiosulfate sulfurtransferase deficiency promotes oxidative distress and aberrant NRF2 function in the brain.

Uroprotective Potential of Campesterol in Cyclophosphamide Induced Interstitial Cystitis; Molecular Docking Studies.

Characterization of fifteen key genes involved in iron metabolism and their responses to dietary iron sources in yellow catfish *Pelteobagrus fulvidraco*.

Impact of endocrine disruptors on peripheral blood mononuclear cells in vitro: role of gender.

Effect of replacing inorganic iron with iron-rich microbial preparations on growth performance, serum parameters and iron metabolism of weaned piglets.

Changes in the Phenotype of Intramural Inhibitory Neurons of the Porcine Descending Colon Resulting from Glyphosate Administration.

Evaluation of arsenic metabolism and tight junction injury after exposure to arsenite and monomethylarsonous acid using a rat in vitro blood-Brain barrier model.

Differential transcriptomic alterations in nasal versus lung tissue of acrolein-exposed rats.

Influence of in vitro gastrointestinal digestion and colonic fermentation on carbonyl scavenging capacity of fiber-bound polyphenols from quinoa.

Influences of continuous and pulse atrazine exposure on intestinal flora and metabolites of *Pelophylax nigromaculatus* tadpoles.

Cross species extrapolation of the disruption of thyroid hormone synthesis by oxyfluorfen using in vitro data, physiologically based pharmacokinetic (PBPK), and thyroid hormone kinetics models.

Micropropagation and Acclimatization of *Gymnocalycium* cv. Fancy (Cactaceae): Developmental Responses to Different Explant Types and Hormone Conditions.

Metabolic Pathways for Removing Reactive Aldehydes are Diminished in Atrophic Muscle During Heart Failure.

Implication of amino acid metabolism and cell surface integrity for the thermotolerance mechanism in the thermally adapted acetic acid bacterium *Acetobacter pasteurianus* TH-3.

An overview of ATP synthase, inhibitors, and their toxicity.

Time-Dependent Proteomic Signatures Associated with Embryogenic Callus Induction in *Carica papaya* L.

ALS gene overexpression and enhanced metabolism conferring *Digitaria sanguinalis* resistance to nicosulfuron in China.

The response of nitrifying activated sludge to chlorophenols: Insights from metabolism and redox homeostasis.

Spatiotemporal accumulation differences of volatile compounds and bacteria metabolizing pickle like odor compounds during stacking fermentation of Maotai-flavor baijiu.

Mixture effect assessment applying in vitro bioassays to in-tissue silicone extracts of traditional foods prepared from beluga whale blubber.

Microbe-derived uremic solutes enhance thrombosis potential in the host.

In Vitro and In Vivo Evaluation for Antioxidant and Anti-Diabetic Properties of *Cyperus rotundus* L. Kombucha.

Proteomic characterization of a lutein-hyperaccumulating *Chlamydomonas reinhardtii* mutant reveals photoprotection-related factors as targets for increasing cellular carotenoid content.

Resveratrol Attenuates 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Mediated Induction of Myeloid-Derived Suppressor Cells (MDSC) and Their Functions.

DNA Methylation Aberrations in Dimethylarsinic Acid-Induced Bladder Carcinogenesis.

Assessment of glyphosate and its metabolites' residue concentrations in cultured African Catfish offered for sale in selected markets in Ibadan, Oyo State, Nigeria.

Epidemiology and etiology of diffuse large B-cell lymphoma.

Bifenox induces programmed cell death in bovine mammary epithelial cells by impairing calcium homeostasis, triggering ER stress, and altering the signaling cascades of PI3K/AKT and MAPK.

3-Methylglutaryl carnitine: A biomarker of mitochondrial dysfunction.

Sub-lethal toxicity of five disinfection by-products on microalgae determined by flow cytometry - Lines of evidence for adverse outcome pathways.

Determination of urinary deanol-N-oxide excretion profiles after ingestion of nutritional supplements containing deanol.

Stable isotope synthesis of glycine transporter 1 inhibitor Iclepertin (BI 425809) and its major metabolites.

Urinary acrolein protein conjugates-to-creatinine ratio is positively associated with diabetic peripheral neuropathy in patients with type 2 diabetes mellitus.

Dimethenamid promotes oxidative stress and apoptosis leading to cardiovascular, hepatic, and pancreatic toxicities in zebrafish embryo.

Deeper insights into the effects of low dietary levels of polychlorinated biphenyls on pig metabolism using gas chromatography-high resolution mass spectrometry metabolomics.

Uncovering the impact of agricultural activities and urbanization on rivers from the Piracicaba, Capivari, and Jundiaí basin in São Paulo, Brazil: A survey of pesticides, hormones, pharmaceuticals, industrial chemicals, and PFAS.

Developmental toxicity of flufenacet including vascular, liver, and pancreas defects is mediated by apoptosis and alters the Mapk and PI3K/Akt signal transduction in zebrafish.

Gut Microbiota and Its Role in the Brain-Gut-Kidney Axis in Hypertension.

Acrolein induces mitochondrial dysfunction and insulin resistance in muscle and adipose tissues in vitro and in vivo.

Huangqi Jianzhong Tang treats chronic atrophic gastritis rats by regulating intestinal flora and conjugated bile acid metabolism.

Inhibition of *Spartina alterniflora* growth alters soil bacteria and their regulation of carbon metabolism.

A critical review on environmental risk and toxic hazards of refractory pollutants discharged in chlorolignin waste of pulp and paper mills and their remediation approaches for environmental safety.

Metabolomics reveal metabolic variation caused by co-culture of *Arthrobacter ureafaciens* and *Trichoderma harzianum* and their impacts on wheat germination.

Acetobacter pomorum in the Drosophila gut microbiota buffers against host metabolic impacts of dietary preservative formula and batch variation in dietary yeast.

Comprehensive genomic and metabolomic analysis revealed the physiological characteristics and pickle like odor compounds metabolic pathways of Bacillus amyloliquefaciens ZZ7 isolated from fermented grains of Maotai-flavor baijiu.

Developmental and cardiovascular toxicities of acetochlor and its chiral isomers in zebrafish embryos through oxidative stress.

Reductive stress induced by NRF2/G6PD through glucose metabolic reprogramming promotes malignant transformation in Arsenite-exposed human keratinocytes.

Including the bioconcentration of pesticide metabolites in plant uptake modeling.

Regulating mechanism of denitrifier Comamonas sp. YSF15 in response to carbon deficiency: Based on carbon/nitrogen functions and bioaggregation.

Fibroblast Growth Factor 21 in Gestational Diabetes Mellitus and Type 2 Diabetes Mellitus.

Investigation of the Persistence, Toxicological Effects, and Ecological Issues of S-Triazine Herbicides and Their Biodegradation Using Emerging Technologies: A Review.

Bioactive strawberry fruit (Arbutus unedo L.) extract remedies paraquat-induced neurotoxicity in the offspring prenatally exposed rats.

Comprehensive insights into herbicide resistance mechanisms in weeds: a synergistic integration of transcriptomic and metabolomic analyses.

A review of food contaminant 2,3,7,8-tetrachlorodibenzo-p-dioxin and its toxicity associated with metabolic disorders.

Protective effect of didymin against 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin-induced reproductive toxicity in male rats.

Memory Reflections of the Microbiota-Gut and Oligodendrocyte Axis.

Untargeted Metabolomic Analyses of Body Fluids to Differentiate TBI DOC and NTBI DOC.

Acute paraquat poisoning complicated by acute kidney injury and lung fibrosis: a case report from Nepal.

Carbonyl cyanide-4-(trifluoromethoxy)phenylhydrazone-induced toxicities in rats: comparative study with other mitochondrial uncouplers (2,4-dinitrophenol, OPC-163493 and tolcapone).

Microbial metabolism and health risk assessment of kitchen waste odor VOCs.

Microbial dietary protein metabolism regulates GLP-1 mediated intestinal transit.

Interactions of arsenic exposure, arsenic metabolism with red blood cell folate on the risk of hypertension: NHANES 2007-2016.

Metagenomics and metabolomics of Toddy, an Indian fermented date palm beverage.

Alterations of Bax/Bcl-2 ratio contribute to NaAsO₂ induced thyrotoxicity in human thyroid follicular epithelial cells and SD rats.

Adverse bioenergetic effects of N-acyl amino acids in human adipocytes overshadow beneficial mitochondrial uncoupling.

Pelargonic acid vanillylamide alleviates hepatic autophagy and ER stress in hepatic steatosis model.

Effects of temperature-humidity index on blood metabolites of German dairy cows and their female calves.

Attenuation of sodium arsenite mediated ovarian DNA damage, follicular atresia, and oxidative injury by combined application of vitamin E and C in post pubertal Wistar rats.

Effect of Intestinal Flora on Hyperuricemia-Induced Chronic Kidney Injury in Type 2 Diabetic Patients and the Therapeutic Mechanism of New Anti-Diabetic Prescription Medications.

[Research on Occupational Poisoning and Biological Monitoring].

The impact of Parkinson's disease-associated gut microbiota on the transcriptome in *Drosophila*.

Full-length transcriptome analysis revealed that 2,4-dichlorophenoxyacetic acid promoted in vitro bulblet initiation in lily by affecting carbohydrate metabolism and auxin signaling.

Interspecific insights into direct and indirect effects of acetochlor on interactions between daphnids and microalgae: Toxic, trophic, and grazer-infochemical responses.

Levels of Urinary Mercapturic Acids of Acrolein, Methacrolein, Crotonaldehyde, and Methyl Vinyl Ketone in Relationship to Chronic Obstructive Pulmonary Disease in Cigarette Smokers of the Subpopulations and Intermediate Outcome Measures in COPD Study (SPIROMICS).

Oligomeric Changes Regulate Flavin Transfer in Two-Component FMN Reductases Involved in Sulfur Metabolism.

Pesticide residues in honey bee (*Apis mellifera*) pollen collected in two ornamental plant nurseries in Connecticut: Implications for bee health and risk assessment.

A comprehensive review of chlorophenols: Fate, toxicology and its treatment.

Stable Isotope Dilution Analysis (SIDA) to Determine Metabolites of Furan and 2-Methylfuran in Human Urine Samples: A Pilot Study.

Effects of Chronic Roundup Exposure on Medaka Larvae.

Effects of Biological Nitrogen Metabolism on Glufosinate-Susceptible and -Resistant Goosegrass (*Eleusine indica* L.).

Chronic Interstitial Nephritis in Agricultural Communities: Observational and Mechanistic Evidence Supporting the Role of Nephrotoxic Agrochemicals.

Hairy root culture: a potent method for improved secondary metabolite production of Solanaceous plants.

The response of microbial compositions and functions to chronic single and multiple antibiotic exposure by batch experiment.

Acetobacter pasteurianus BP2201 alleviates alcohol-induced hepatic and neuro-toxicity and modulate gut microbiota in mice.

Fluchloralin induces developmental toxicity in heart, liver, and nervous system during early zebrafish embryogenesis.

Connecting Suborganismal Data to Bioenergetic Processes: Killifish Embryos Exposed to a Dioxin-Like Compound.

Controllable-Swelling Microneedle-Assisted Ultrasensitive Paper Sensing Platforms for Personal Health Monitoring.

Cytochrome P450s-Involved Enhanced Metabolism Contributes to the High Level of Nicosulfuron Resistance in *Digitaria sanguinalis* from China.

Metformin Overcomes the Consequences of NKX3.1 Loss to Suppress Prostate Cancer Progression.

Development of skin diseases following systemic exposure: example of dioxins.

Three-Way Cell-Based Screening of Antistress Compounds: Identification, Validation, and Relevance to Old-Age-Related Pathologies.

The BCKDK inhibitor BT2 is a chemical uncoupler that lowers mitochondrial ROS production and de novo lipogenesis.

Integrated physiological and transcriptome analysis reveals potential toxicity mechanism of haloxyfop-P-methyl to *Chiromantes dehaani*.

Risk assessment of predatory lady beetle *Propylea japonica*'s multi-generational exposure to three non-insecticidal agrochemicals.

Lycopene supplementation: effects on oxidative stress, sex hormones, gonads and thyroid tissue in tilapia *Oreochromis niloticus* during Harness(Â®) exposure.

Subchronic Arsenite Exposure Induced Atrophy and Erythropoietin Sensitivity Reduction in Skeletal Muscle Were Relevant to Declined Serum Melatonin Levels in Middle-Aged Rats.

Roles of DNA Target in Cancer Cell-Selective Cytotoxicity by Dicopper Complexes with DNA Target/Ligand Conjugates.

Antioxidant Effects of Argan Oil and Olive Oil against Iron-Induced Oxidative Stress: In Vivo and In Vitro Approaches.

Restoration of energy homeostasis under oxidative stress: Duo synergistic AMPK pathways regulating arginine kinases.

The Arabidopsis Target of Rapamycin kinase regulates ammonium assimilation and glutamine metabolism.

Effects of Prometryn Exposure on Hepatopancreas Oxidative Stress and Intestinal Flora in *Eriocheir sinensis* (Crustacea: Decapoda).

Isolation of Aroma-Producing *Wickerhamomyces anomalus* Yeast and Analysis of Its Typical Flavoring Metabolites.

Updating "Dataset of transcriptomic changes that occur in human preadipocytes over a 3-day course of exposure to 3,3',4,4',5-Pentachlorobiphenyl (PCB126)" with additional data on exposure to 2,2',5,5'-tetrachlorobiphenyl (PCB52) or its 4-hydroxy metabolite (4-OH-PCB52).

Global survey of dioxin- and thyroid hormone-like activities in consumer products and toys.

Comparative analysis of toxicity and metabolomic profiling of rac-glufosinate and L-glufosinate in zebrafish.

Evidence for crosstalk between the aryl hydrocarbon receptor and the translocator protein in mouse lung epithelial cells.

Identification of two possible metabolic pathways responsible for the biodegradation of 3, 5, 6-trichloro-2-pyridinol in *Micrococcus luteus* ML.

[8] and [10]-Gingerol reduces urothelial damage in ifosfamide-induced hemorrhagic cystitis via JAK/STAT/FOXO signaling pathway via IL-10.

Prevention of DSS-induced colitis in mice with water kefir microbiota via anti-inflammatory and microbiota-balancing activity.

Development of Simultaneous Determination Method of Pesticide High Toxic Metabolite 3,4-Dichloroaniline and 3,5 Dichloroaniline in Chives Using HPLC-MS/MS.

Environmental cadmium exposure alters the internal microbiota and metabolome of Sprague-Dawley rats.

Rapid Detection of Volatile Organic Metabolites in Urine by High-Pressure Photoionization Mass Spectrometry for Breast Cancer Screening: A Pilot Study.

Agent Orange Causes Metabolic Dysfunction and Molecular Pathology Reminiscent of Alzheimer's Disease.

Microbial metabolite p-cresol inhibits gut hormone expression and regulates small intestinal transit in mice.

Air, Dermal, and Urinary Metabolite Levels of Backpack and Tractor Sprayers Using the Herbicide Acetochlor in Thailand.

Protective effect of vitamin C against tetrachlorobenzoquinone-induced 5-hydroxymethylation-dependent apoptosis in HepG2 cells mainly via the mitochondrial apoptosis pathway.

Adsorption of glyphosate and metabolite aminomethylphosphonic acid (AMPA) from water by polymer-based spherical activated carbon (PBSAC).

Untargeted Analysis of Serum Metabolomes in Dogs with Exocrine Pancreatic Insufficiency.

Exploring breast tissue microbial composition and the association with breast cancer risk factors.

Anti-osteoporotic drugs affect the pathogenesis of gut microbiota and its metabolites: a clinical study.

Conservation linkages of endangered medicinal plant and exploration of phytochemicals, pharmaceutical screening and in silico validation against diabetics using in vivo wild and in vitro regenerated plant *Boucerosia diffusa* Wight.

Joint effects of phenol, chlorophenol pesticide, phthalate, and polycyclic aromatic hydrocarbon on bone mineral density: comparison of four statistical models.

Protein adducts with lipid peroxidation products in patients with psoriasis.

Studies of Endocrine Disruptors: Nonylphenol and Isomers in Biological Models.

Secondary Metabolites with Herbicidal and Antifungal Activities from Marine-Derived Fungus *Alternaria iridiauxalis*.

Exposome Epidemiology for Suspect Environmental Chemical Exposures during Pregnancy Linked to Subsequent Breast Cancer Diagnosis.

Effects of prometryn on oxidative stress, immune response and apoptosis in the hepatopancreas of *Eriocheir sinensis* (Crustacea: Decapoda).

Specialized Metabolites Accumulation Pattern in Buckwheat Is Strongly Influenced by Accession Choice and Co-Existing Weeds.

Insights into the Ecotoxicology of Radicinin and (10S,11S)-(-)-epi-Pyriculol, Fungal Metabolites with Potential Application for Buffelgrass (*Cenchrus ciliaris*) Biocontrol.

Interaction between Phthalate Ester and Rice Plants: Novel Transformation Pathways and Metabolic-Network Perturbations.

The exposure to volatile organic chemicals associates positively with rheumatoid arthritis: a cross-sectional study from the NHANES program.

Altered fecal microbiome and metabolome profiles in rat models of short bowel syndrome.

Hormetic Effect of Glyphosate on the Morphology, Physiology and Metabolism of Coffee Plants.

Novel 2-alkylthio-4-chloro-N-[imino(heteroaryl)methyl]benzenesulfonamide Derivatives: Synthesis, Molecular Structure, Anticancer Activity and Metabolic Stability.

Dissecting the effects of paraquat-induced pulmonary injury in rats using UPLC-Q-TOF-MS/MS-based metabolomics.

Effects of metamifop on ammonia production and metabolism of *Monopterus albus*.

The antifungal effect induced by itraconazole in *Candida parapsilosis* largely depends on the oxidative stress generated at the mitochondria.

Associations between biomarkers of nicotine/tobacco exposure and respiratory symptoms among adults who exclusively smoke cigarettes in the U.S.: Findings from the PATH Study Waves 1-4 (2013-2017).

Engineering *Komagataella phaffii* to biosynthesize cordycepin from methanol which drives global metabolic alterations at the transcription level.

Sex-specific effects of prenatal organophosphate ester (OPE) metabolite mixtures and adverse infant birth outcomes in the maternal and developmental risks from environmental and social stressors (MADRES) pregnancy cohort.

The metabolic processes of selected pesticides and their influence on plant metabolism. A case study of two field-cultivated wheat varieties.

Ecotoxicological risk assessment of 14 pesticides and corresponding metabolites to groundwater and soil organisms using China-PEARL model and RQ approach.

Dietary rumen-protected choline supplementation regulates blood biochemical profiles and urinary metabolome and improves growth performance of growing lambs.

Agrobacterium-mediated direct transformation of wheat mature embryos through organogenesis.

Efficient Plant Regeneration System from Leaf Explant Cultures of *Daphne genkwa* via Somatic Embryogenesis.

GC-MS based untargeted metabolomics reveals the metabolic response of earthworm (*Eudrilus eugeniae*) after chronic combinatorial exposure to three different pesticides.

Development of Biocellulose Sheet Incorporating Aloe vera Gel Extract for Diabetic Wound Healing.

Human exposure to pesticides and thyroid cancer: a worldwide systematic review of the literatures.

Pentachlorophenol-induced hemotoxicity diminishes antioxidant potential and oxidizes proteins, thiols, and lipids in rat blood: An in vivo study.

Effects of perinatal stress on the metabolites and lipids in plasma of dairy goats.

In utero arsenic exposure and early childhood motor development in the New Hampshire Birth Cohort Study.

Exogenous spermine alleviates the negative effects of combined salinity and paraquat in tomato plants by decreasing stress-induced oxidative damage.

Effect of butachlor on *Microcystis aeruginosa*: Cellular and molecular mechanisms of toxicity.

Inhibition of the Beta-oxidation Pathway of Fatty Acids and Dopamine- Beta-hydroxylase by Phenyl Derivatives of Short- Chain Fatty Acids from Gastrointestinal Clostridia Bacteria is a (the) Major Cause of Autism.

Regulatory networks of hormone-involved transcription factors and their downstream pathways during somatic embryogenesis of *Arabidopsis thaliana*.

First study of bromophenols and hexabromocyclododecanes in seafood from North Africa (case of Bizerte Lagoon, Tunisia): occurrence and human health risk.

Urinary concentration of phthalates and bisphenol A during minipuberty is associated with reproductive hormone concentrations in infant boys.

Exposure to phthalates and DiNCH among preschool children in Sweden: Urinary metabolite concentrations and predictors of exposure.

Metabolomics Differences of the Donor Livers Between In Situ and Ex Situ Conditions During Ischemia-free Liver Transplantation.

Exposure to oxyfluorfen-induced hematobiochemical alterations, oxidative stress, genotoxicity, and disruption of sex hormones in male African catfish and the potential to confront by *Chlorella vulgaris*.

Urine Metabolomic Signature of People Diagnosed with Balkan Endemic Nephropathy and Other Types of Chronic Kidney Disease Compared with Healthy Subjects in Romania.

The Effects of Sodium Tetraborate against Lead Toxicity in Rats: The Behavior of Some Metabolic Enzymes.

Biological effects of sub-lethal doses of glyphosate and AMPA on cardiac myoblasts.

Novel approach for verification of a human PBPK modeling strategy using chimeric mice in the health risk assessment of epyrifenacil.

Two decades of the EU Water Framework Directive: Evidence of success and failure from a lowland arable catchment (River Wensum, UK).

Pretreatment of ellagic acid protects ifosfamide-induced acute nephrotoxicity in rat kidneys: A mitochondrial, histopathological and oxidative stress approaches.

Enhanced Herbicide Metabolism and Target-Site Mutations Confer Multiple Resistance to Fomesafen and Nicosulfuron in *Amaranthus retroflexus* L.

Sodium arsenite-induced changes in the wood of esca-diseased grapevine at cytological and metabolomic levels.

Exploratory Analysis on Herbicide Metabolism and Very-Long-Chain Fatty Acid Production in Metolachlor-Resistant Palmer Amaranth (*Amaranthus palmeri* S. Wats.).

Characterization of the Aroma Profiles of Guangdong Black Teas Using Non-Targeted Metabolomics.

The capillary-leakage syndrome caused by glyphosate poisoning: a case report.

Interosseous Membrane Stimulation: A Treatment for Painful Peripheral Neuropathy.

Toxicity and ecological risk assessment for two AhR agonistic pesticides mepanipyrim and cyprodinil and their metabolites.

Accumulation and metabolism of pyroxasulfone in tomato seedlings.

Nicosulfuron stress on the glyoxalase system and endogenous hormone content in sweet maize seedlings.

Excretion kinetics of 1,3-dichlorobenzene and its urinary metabolites after controlled airborne exposure in human volunteers.

Acetyltransferase OsACE2 acts as a regulator to reduce the environmental risk of oxyfluorfen to rice production.

Pesticides and Parabens Contaminating Aquatic Environment: Acute and Sub-Chronic Toxicity towards Early-Life Stages of Freshwater Fish and Amphibians.

Route of Arsenic Exposure Differentially Impacts the Expression of Genes Involved in Gut-Mucosa-Associated Immune Responses and Gastrointestinal Permeability.

Development of Boron-Containing PVA-Based Cryogels with Controllable Boron Releasing Rate and Altered Influence on Osteoblasts.

Specialized Metabolites Produced by Phytotopatogen Fungi to Control Weeds and Parasite Plants.

Sexual dysfunction precedes motor defects, dopaminergic neuronal degeneration, and impaired dopamine metabolism: Insights from Drosophila model of Parkinson's disease.

Production of Secondary Metabolites from Cell Cultures of *Sageretia thea* (Osbeck) M.C. Johnst. Using Balloon-Type Bubble Bioreactors.

Association of bone mineral density with trichlorophenol: a population-based study.

Unravelling the Phytotoxic Effects of Glyphosate on Sensitive and Resistant *Amaranthus palmeri* Populations by GC-MS and LC-MS Metabolic Profiling.

Pyruvate kinase M2 modification by a lipid peroxidation byproduct acrolein contributes to kidney fibrosis.

Associations between residential volatile organic compound exposures and liver injury markers: The role of biological sex and race.

Dynamic changes of quality and flavor characterization of Zhejiang rosy vinegar during fermentation and aging based on untargeted metabolomics.

Metabolomic analysis of the effects of a mixed culture of *Saccharomyces cerevisiae* and *Lactiplantibacillus plantarum* on the physicochemical and quality characteristics of apple cider vinegar.

Ceruloplasmin Interferes with the Assessment of Blood Lipid Hydroperoxide Content in Small Ruminants.

Molecular and Biochemical Evidence of the Toxic Effects of Terbutylazine and Malathion in Zebrafish.

Can Sulfonylureas for Agricultural Use Cause Diabetes? A Report of Three Cases.

Bioherbicidal Activity and Metabolic Profiling of Allelopathic Metabolites of Three *Cassia* species using UPLC-qTOF-MS/MS and Molecular Networking.

Availability of aldo-keto reductase 1C3 and ATP-binding cassette B1 as therapeutic targets for alleviating paclitaxel resistance in breast cancer MCF7 cells.

Interpretation of ametryn biodegradation in rice based on joint analyses of transcriptome, metabolome and chemo-characterization.

Combined effects of high temperature and pesticide mixture exposure on free-swimming behaviors and hepatic cytochrome P450 1A expression in goldfish, *Carassius auratus*.

Characterization of a New *Pseudomonas Putida* Strain Ch2, a Degradator of Toxic Anthropogenic Compounds Epsilon-Caprolactam and Glyphosate.

Rural Land Management and Kidney Health.

A Nomogram for Early Diagnosis of Community-Acquired Pneumonia Based on Bronchoalveolar Lavage Fluid Metabolomics.

AhR-mediated lipid peroxidation contributes to TCDD-induced cardiac defects in zebrafish.

ROS downregulate TCA activity to modulate energy metabolism via the HIF/miR-34/ACS-PK pathway for lifespan extension in *Helicoverpa armigera*.

Metabolic reconstruction of the near complete microbiome of the model sponge *Ianthella basta*.

Autophagy and its mediated mitochondrial quality control maintain pollen tube growth and male fertility in *Arabidopsis*.

Effects of p-cresol, a uremic toxin, on cancer cells.

Phytochemical Composition and Biological Activities of Extracts from Early, Mature, and Germinated Somatic Embryos of *Cotyledon orbiculata* L.

Implications of atrazine concentrations in drinking water from Ijebu-North, Southwest Nigeria on the hypothalamic-pituitary-adrenal axis.

The quest for metabolic biomarkers of agrochemicals exposure via in vitro studies and suspect screening.

Microbial Virulence Factors, Antimicrobial Resistance Genes, Metabolites, and Synthetic Chemicals in Cabins of Commercial Aircraft.

Effects on *Pseudomonas plecoglossicida* 2,4-D and Humic Substances on the Growth, Pigment Indices and Concentration of Hormones in Wheat Seedlings Grown under Water Deficit.

Multi-Omics Analyses Reveal the Mechanisms of Early Stage Kidney Toxicity by Diquat.

Vineyard Management and Physicochemical Parameters of Soil Affect Native *Trichoderma* Populations, Sources of Biocontrol Agents against *Phaeoacremonium minimum*.

Design, Synthesis, and Metabolism Studies of N-1,4-Diketophenyltriazinones as Protoporphyrinogen IX Oxidase Inhibitors.

Global Metabolome of Palmer Amaranth (*Amaranthus palmeri*) Populations Highlights the Specificity and Inducibility of Phytochemical Responses to Abiotic Stress.

Pesticide exposure and asthma morbidity in children residing in urban, multi-family housing.

The association analysis between exposure to volatile organic chemicals and obesity in the general USA population: A cross-sectional study from NHANES program.

Azole pesticide products and their hepatic metabolites cause endocrine disrupting potential by suppressing the homo-dimerization of human estrogen receptor alpha.

Melatonin alleviates arsenic (As) toxicity in rice plants via modulating antioxidant defense system and secondary metabolites and reducing oxidative stress.

Do changes in persistent organic pollutants after bariatric surgery cause endocrine disruption?

Mercury and methylmercury differentially modulate hepatic cytochrome P450 1A1 and 1A2 in vivo and in vitro.

Mulberry leaf extract improves intestinal barrier function and displays beneficial effects on colonic microbiota and microbial metabolism in weaned piglets.

Transcriptomics provides insights into toxicological effects and molecular mechanisms associated with the exposure of Chinese mitten crab, *Eriocheir sinensis*, to dioxin.

Risk Assessment of Pesticide Residues by GC-MSMS and UPLC-MSMS in Edible Vegetables.

Beneficial metabolic transformations and prebiotic potential of hemp bran and its alcalase hydrolysate, after colonic fermentation in a gut model.

The kidney drug transporter OAT1 regulates gut microbiome-dependent host metabolism.

Protection of Mitochondrial Potential and Activity by Oxyprenylated Phenylpropanoids.

Dynamics in fermentation quality, bacterial community, and metabolic profile during silage fermentation of late-harvested elephant grass.

Metamifop as an estrogen-like chemical affects the pituitary-hypothalamic-gonadal (HPG) axis of female rice field eels (*Monopterus albus*).

Metabolism Difference Is Involved in Mesosulfuron-Methyl Selectivity between *Aegilops tauschii* and *Triticum aestivum*.

Enhanced Glycolysis Confers Resistance Against Photon but Not Carbon Ion Irradiation in Human Glioma Cell Lines.

Secondary Metabolites from *Aspergillus sparsus* NBERC_28952 and Their Herbicidal Activities.

A host-gut microbial amino acid co-metabolite, p-cresol glucuronide, promotes blood-brain barrier integrity in vivo.

Rhamnazin ameliorates 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin-evoked testicular toxicity by restoring biochemical, spermatogenic and histological profile in male albino rats.

The Effect of Sub-chronic Linuron Exposure on Thyroid, Liver, and Kidney Function in Male Wistar Rats.

Biotransformation and detoxification mechanism of inorganic arsenic in a freshwater benthic fish *Tachysurus fulvidraco* with dietborne exposure.

Planting models and mulching materials management to improve anti-oxidant defense system, grain hormone balance and production of maize in semi-arid regions.

Toxicological effects and transcriptome mechanisms of rice (*Oryza sativa* L.) under stress of quinclorac and polystyrene nanoplastics.

Assessment of exposure to volatile organic compounds through urinary concentrations of their metabolites in pet dogs and cats from the United States.

Environmentally relevant uptake, elimination, and metabolic changes following early embryonic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in zebrafish.

Amyotrophic Lateral Sclerosis Pathoetiology and Pathophysiology: Roles of Astrocytes, Gut Microbiome, and Muscle Interactions via the Mitochondrial Melatonergic Pathway, with Disruption by Glyphosate-Based Herbicides.

Ultimate fate and possible ecological risks associated with atrazine and its principal metabolites (DIA and DEA) in soil and water environment.

Identification of a Novel 2,4-D Metabolic Detoxification Pathway in 2,4-D-Resistant Waterhemp (*Amaranthus tuberculatus*).

Probiotics ameliorate growth retardation of glyphosate by regulating intestinal microbiota and metabolites in crucian carp (*Carassius auratus*).

Glyphosate disturbs various epigenetic processes in vitro and in vivo - A mini review.

Impact of Glyphosate on the Development of Insulin Resistance in Experimental Diabetic Rats: Role of NF- κ B Signalling Pathways.

Toxic Effects Induced by Diuron and Its Metabolites in *Caenorhabditis elegans*.

Atrazine exposure induces necroptosis through the P450/ROS pathway and causes inflammation in the gill of common carp (*Cyprinus carpio* L.).

Protective effect of biogenic selenium nanoparticles against diquat-induced acute toxicity via regulation of gut microbiota and its metabolites.

Comparative assessment of individual and mixture chronic toxicity of glyphosate and glufosinate ammonium on amphibian tadpoles: A multibiomarker approach.

Glyphosate excessive use chronically disrupts the shikimate pathway and can affect photosynthesis and yield in citrus trees.

Exposure to the environmentally toxic pesticide maneb induces Parkinson's disease-like neurotoxicity in mice: A combined proteomic and metabolomic analysis.

Feeding behavior of early life stages of the zebrafish *Danio rerio* is altered by exposure to glyphosate.

Effects of Subtoxic Concentrations of Atrazine, Cypermethrin, and Vinclozolin on microRNA-Mediated PI3K/Akt/mTOR Signaling in SH-SY5Y Cells.

Use of plant growth regulators to reduce 2-methyl-4-chlorophenoxy acetic acid-Na (MPCA-Na) damage in cotton (*Gossypium hirsutum*).

A Human Biomonitoring Study Assessing Glyphosate and Aminomethylphosphonic Acid (AMPA) Exposures among Farm and Non-Farm Families.

PsbA gene over-expression and enhanced metabolism conferring resistance to atrazine in *Commelina communis*.

Pendimethalin exposure induces bovine mammary epithelial cell death through excessive ROS production and alterations in the PI3K and MAPK signaling pathways.

Transcriptome analysis reveals hepatotoxicity in zebrafish induced by cyhalofop-butyl.

Influence of glyphosate and its metabolite aminomethylphosphonic acid on aquatic plants in different ecological niches.

Gut dysfunction may be the source of pathological aggregation of alpha-synuclein in the central nervous system through Paraquat exposure in mice.

Paraquat exposure induces Parkinsonism by altering lipid profile and evoking neuroinflammation in the midbrain.

Histopathological, immunohistochemical, and molecular investigation of atrazine toxic effect on some organs of adult male albino rats with a screening of *Acacia nilotica* as a protective trial.

Identification of differentially expressed genes and pathways in diquat and paraquat poisoning using bioinformatics analysis.

Allelopathic Toxicity of Cyanamide Could Control Amaranth (*Amaranthus retroflexus* L.) in Alfalfa (*Medicago sativa* L.) Field.

Pathogenic and Commensal Gut Bacteria Harboring Glycerol/Diol Dehydratase Metabolize Glycerol and Produce DNA-Reactive Acrolein.

Glyphosate, AMPA and glyphosate-based herbicide exposure leads to GFAP, PCNA and caspase-3 increased immunoreactive area on male offspring rat hypothalamus.

Immunotoxicity of pentachlorophenol to a marine bivalve species and potential toxification mechanisms underpinning.

Diazabicyclo derivatives as safeners protect cotton from injury caused by flumioxazin.

Effects of endocrine active contaminating pesticides on RACK1 expression and immunological consequences in THP-1 cells.

Did decades of glyphosate use have selected for resistant amphibians in agricultural habitats?

Molecular signatures associated with diuron exposure on rat urothelial mitochondria.

Chronic dietary exposure to a glyphosate-based herbicide results in total or partial reversibility of plasma oxidative stress, cecal microbiota abundance and short-chain fatty acid composition in broiler hens.

Characterization of a new selenoprotein methionine sulfoxide reductase from *Haematococcus pluvialis* and its antioxidant activity in response to high light intensity, hydrogen peroxide, glyphosate, and cadmium exposure.

Cross-sectional and longitudinal associations of acrolein exposure with pulmonary function alteration: Assessing the potential roles of oxidative DNA damage, inflammation, and pulmonary epithelium injury in a general adult population.

Biochemical and cellular responses of the freshwater mussel, *Hyriopsis bialata*, to the herbicide atrazine.

Oxidative stress of glyphosate, AMPA and metabolites of pyrethroids and chlorpyrifos pesticides among primary school children in Cyprus.

A systematic review and meta-analysis of the impacts of glyphosate on the reproductive hormones.

Thyroid Cancer and Pesticide Use in a Central California Agricultural Area: A Case Control Study.

Short-Term Test for Toxicogenomic Analysis of Ecotoxic Modes of Action in *Lemna minor*.

Metabolomic analysis of honey bee (*Apis mellifera* L.) response to glyphosate exposure.

Transcriptomic response of *Pseudomonas nicosulfuron*ens LAM1902 to the sulfonyleurea herbicide nicosulfuron.

Urinary glyphosate kinetics after occupational exposure.

Metabolomics analysis of the potential toxicological mechanisms of diquat dibromide herbicide in adult zebrafish (*Danio rerio*) liver.

Time-resolved proteome and transcriptome of paraquat-induced pulmonary fibrosis.

Effects of glyphosate on cladocera: A synthetic review.

UV activated sodium percarbonate to accelerate degradation of atrazine: Mechanism, intermediates, and evaluation on residual toxicity by metabolomics.

Alfalfa's response to atrazine stress and its secreted atrazine metabolites.

Influence of temperature on growth, development and thyroid metabolism of American bullfrog tadpoles (*Lithobates catesbeianus*) exposed to the herbicide tebuthiuron.

Chronic dietary exposure to a glyphosate-based herbicide results in reversible increase early embryo mortality in chicken.

Comparison between the mechanisms of Clearfield \hat{A} ® wheat and *Lolium rigidum* multiple resistant to acetyl CoA carboxylase and acetolactate synthase inhibitors.

Glyphosate, AMPA and glufosinate in soils and earthworms in a French arable landscape.

Curcumin improves the protective effects of quercetin against atrazine-induced testicular injury in adult Wistar rats.

Physiological and metabolic effects of glyphosate as the sole P source on a cosmopolitan phytoplankton and biogeochemical implications.

Herbicide Roundup shows toxic effects in nontarget organism *Drosophila*.

Alternation between toxic and proliferative effects of Roundup® on human thyroid cells at different concentrations.

Effects of Curcumin on Mitochondrial Function, Endoplasmic Reticulum Stress, and Mitochondria-Associated Endoplasmic Reticulum Membranes in the Jejunum of Oxidative Stress Piglets.

Acer pseudoplatanus: A Potential Risk of Poisoning for Several Herbivore Species.

Mass Spectrometry-Based Peptide Profiling of Haemolymph from *Pterostichus melas* Exposed to Pendimethalin Herbicide.

Effects of Anthropogenic Pollutants Identified in Pampas Lakes on the Development and Reproduction of Pejerrey Fish *Odontesthes bonariensis*.

Simultaneous determination of diquat and its two primary metabolites in rat plasma by ultraperformance liquid chromatography-tandem mass spectrometry and its application to the toxicokinetic study.

Developmental and behavioral toxicity assessment of glyphosate and its main metabolite aminomethylphosphonic acid (AMPA) in zebrafish embryos/larvae.

The study of human serum metabolome on the health effects of glyphosate and early warning of potential damage.

The Association Between 2, 4-Dichlorophenoxyacetic Acid and Erectile Dysfunction.

Co-exposure of Monensin Increased the Risks of Atrazine to Earthworms.

Pesticides Inhibit Retinoic Acid Catabolism in PLHC-1 and ZFL Fish Hepatic Cell Lines.

Community metabolomics provides insights into mechanisms of pollution-induced community tolerance of periphyton.

Exposure to glyphosate-based herbicide during early stages of development increases insulin sensitivity and causes liver inflammation in adult mice offspring.

Phytotoxicity and cytogenetic action mechanism of leaf extracts of *Psidium cattleianum* Sabine in plant bioassays.

Glyphosate exposure modulates lipid composition, histo-architecture and oxidative stress status and induces neurotoxicity in the smooth scallop *Flexopecten glaber*.

Cross-resistance of barnyardgrass [*Echinochloa crus-galli* (L.) P. Beauv.] to aryloxyphenoxypropionate herbicides.

Comparing toxicity and biodegradation of racemic glufosinate and L-glufosinate in green algae *Scenedesmus obliquus*.

Anaerobic biodegradation and detoxification of chloroacetamide herbicides by a novel *Proteomiclasticum sediminis* BAD-10(T).

Ecotoxicity testing of paraquat metabolites degraded by filamentous fungi in model organism.

Transcriptome analysis and the identification of genes involved in the metabolic pathways of fenoxaprop-P-ethyl in rice treated with isoxadifen-ethyl hydrolysate.

Developmental toxicity of glyphosate on embryo-larval zebrafish (*Danio rerio*).

Endocrine, immune and renal toxicity in male largemouth bass after chronic exposure to glyphosate and Rodeo®.

Integrating network pharmacology and *in vitro* model to investigate hippocampal neurotoxicity induced by atrazine.

3,4-Dihydroxybenzaldehyde attenuates pentachlorophenol-induced cytotoxicity, DNA damage and collapse of mitochondrial membrane potential in isolated human blood cells.

Specialized Metabolites from the Allelopathic Plant *Retama raetam* as Potential Biopesticides.

Atrazine exposure and recovery alter the intestinal structure, bacterial composition and intestinal metabolites of male *Pelophylax nigromaculatus*.

Probing Herbicide Toxicity to Algae (*Selenastrum capricornutum*) by Lipid Profiling with Machine Learning and Microchip/MALDI-TOF Mass Spectrometry.

Do commonly used herbicides (atrazine and glyphosate) have the potential to impair the contractions, prostaglandin releasing and conducting of oxytocin signal at the bovine cervix *in vitro*?

Realistic exposure to fipronil, 2,4-D, vinasse and their mixtures impair larval amphibian physiology.

CYP81A68 confers metabolic resistance to ALS and ACCase-inhibiting herbicides and its epigenetic regulation in *Echinochloa crus-galli*.

Comparison of the Toxicological Effects of Pesticides in Non-Tumorigenic MCF-12A and Tumorigenic MCF-7 Human Breast Cells.

Histopathological, Immunohistochemical, And Molecular Alterations In Brain Tissue And Submandibular Salivary Gland Of Atrazine-Induced Toxicity In Male Rats.

Effects of chiral herbicide dichlorprop on *Arabidopsis thaliana* metabolic profile and its implications for microbial communities in the phyllosphere.

Proteomic profiling of royal jelly produced by *Apis mellifera* L. exposed to food containing herbicide-based glyphosate.

Metabolism of glyphosate by the human fecal microbiota.

First report on the production of phytotoxic metabolites by *Mycoleptodiscus indicus* under optimized conditions of submerged fermentation.

Long-term exposure to polyethylene microplastics and glyphosate interferes with the behavior, intestinal microbial homeostasis, and metabolites of the common carp (*Cyprinus carpio* L.).

Lycopene ameliorates atrazine-induced pyroptosis in spleen by suppressing the Ox-mtDNA/Nlrp3 inflammasome pathway.

Effects of Phosphonate Herbicides on the Secretions of Plant-Beneficial Compounds by Two Plant Growth-Promoting Soil Bacteria: A Metabolomics Investigation.

Prediction of the human pharmacokinetics of epyrifenacil and its major metabolite, S-3100-CA, by a physiologically based pharmacokinetic modeling using chimeric mice with humanized liver.

Mild chronic exposure to pesticides alters physiological markers of honey bee health without perturbing the core gut microbiota.

Metabolomic and Transcript Analysis Revealed a Sex-Specific Effect of Glyphosate in Zebrafish Liver.

Integrated metabolomics and transcriptomics analysis reveals new biomarkers and mechanistic insights on atrazine exposures in MCF-7 cells.

Apiaceous vegetables protect against acrolein-induced pulmonary injuries through modulating hepatic detoxification and inflammation in C57BL/6 male mice.

Does roundup affect zinc functions in a bivalve mollusk in ex vivo exposure?

Effects of algae and fungicides on the fate of a sulfonylurea herbicide in a water-sediment system.

Impacts of early-life paraquat exposure on gut microbiota and body weight in adult mice.

Pathogenic potential and phytotoxic effects of *Coniolaria gamsii* Iran 2506C on Iranian knapweed (*Centaurea depressa*).

Evaluation of genotoxicity induced by herbicide pendimethalin in fresh water fish *Clarias batrachus* (Linn.) and possible role of oxidative stress in induced DNA damage.

The Effects of Benoxacor on the Liver and Gut Microbiome of C57BL/6 Mice.

A Novel Algicidal Bacterium, *Microbulbifer* sp. YX04, Triggered Oxidative Damage and Autophagic Cell Death in *Phaeocystis globosa*, Which Causes Harmful Algal Blooms.

Effects of co-exposure of the triazine herbicides atrazine, prometryn and terbutryn on *Phaeodactylum tricornutum* photosynthesis and nutritional value.

Cardiotoxicity of cyclophosphamide's metabolites: an in vitro metabolomics approach in AC16 human cardiomyocytes.

Comparison of quintrione and quinclorac on mechanism of action.

Phytotoxic compounds from endophytic fungi.

Effects of glyphosate exposure on honeybees.

Paraquat exposure impairs porcine oocyte meiotic maturation.

Ameliorative effects of biochar on persistency, dissipation, and toxicity of atrazine in three contrasting soils.

Insights into ROS-dependent signalling underlying transcriptomic plant responses to the herbicide 2,4-D.

Attenuating effect of *Prosopis cineraria* against paraquat-induced toxicity in prepubertal mice, *Mus musculus*.

Amelioration of sodium and arsenic toxicity in *Salvinia natans* L. with 2,4-D priming through physiological responses.

Prolonged atrazine exposure beginning in utero and adult uterine morphology in mice.

Enhanced Biodegradation of Phenylurea Herbicides by *Ochrobactrum anthropi* CD3 Assessment of Its Feasibility in Diuron-Contaminated Soils.

Resveratrol protected acrolein-induced ferroptosis and insulin secretion dysfunction via ER-stress-related PERK pathway in MIN6 cells.

Minimized Atrazine Risks to Crop Security and Its Residue in the Environment by a Rice Methyltransferase as a Regulation Factor.

Oxidative Stress and Metabolism: A Mechanistic Insight for Glyphosate Toxicology.

Searching for biomarkers of early detection of 2,4-D effects in a native tree species from the Brazilian Cerrado biome.

Induced Hepatic Glutathione and Metabolomic Alterations Following Mixed Pesticide and Fertilizer Exposures in Juvenile Leopard Frogs (*Lithobates sphenoccephala*).

Hydrogen sulfide as a potent scavenger of toxicant acrolein.

Resistance to mesosulfuron-methyl in *Beckmannia syzigachne* may involve ROS burst and non-target-site resistance mechanisms.

Physiological and transcriptomic analyses reveal the threat of herbicides glufosinate and glyphosate to the scleractinian coral *Pocillopora damicornis*.

In vitro cytotoxicity and genotoxicity of single and combined pesticides used by Bolivian farmers.

Disruption of developmental programming with long-term consequences after exposure to a glyphosate-based herbicide in a rat model.

Perinatal exposure to the thyroperoxidase inhibitors methimazole and amitrole perturbs thyroid hormone system signaling and alters motor activity in rat offspring.

ABC transporter slr0982 affects response of *Synechocystis* sp. PCC 6803 to oxidative stress caused by methyl viologen.

Mabea fistulifera and Zeyheria tuberculosa can be indicated for phytoremediation programs of soils contaminated with hormonal herbicides.

Atrazine uptake, translocation, bioaccumulation and biodegradation in cattail (*Typha latifolia*) as a function of exposure time.

The effects of syringic acid on the properties of MCPA-contaminated soil and the growth of two cucurbit species.

Characterization and Quantification of Acrolein-Induced Modifications in Hemoglobin by Mass Spectrometry—Effect of Cigarette Smoking.

Plant regeneration from leaf mesophyll derived protoplasts of cassava (*Manihot esculenta* Crantz).

Inorganic arsenic induces MDM2, p53, and their phosphorylation and affects the MDM2/p53 complex in vitro.

[Glyphosate detection in the duodenal fluid of horses with gastric ulcer syndrome].

Network pharmacology and molecular docking-based prediction of active compounds and mechanisms of action of *Cnidii Fructus* in treating atopic dermatitis.

Metolachlor Poisoning with Lactic Acidosis Improved by Thiamine Administration: A Case Report.

Comparative Assessment of the Inhibitory Potential of the Herbicide Glyphosate and Its Structural Analogs on RGD-Specific Integrins Using Enzyme-Linked Immunosorbent Assays.

DNA Damage and Oxidative Stress of Tobacco Smoke Condensate in Human Bladder Epithelial Cells.

The Therapeutic Roles of Cinnamaldehyde against Cardiovascular Diseases.

Acrolein plays a culprit role in the pathogenesis of diabetic nephropathy in vitro and in vivo.

Novel anti-arthritic mechanisms of trans-cinnamaldehyde against complete Freund's adjuvant-induced arthritis in mice: involvement of NF- κ B/TNF- α and IL-6/IL-23/IL-17 pathways in the immunoinflammatory responses.

A Composition of Phytonutrients for Glycemic and Weight Management.

pH-responsive cinnamaldehyde-TiO₂ nanotube coating: fabrication and functions in a simulated diabetes condition.

Effects of replacing fish meal with cottonseed protein concentrate on the growth, immune responses, digestive ability and intestinal microbial flora in *Litopenaeus vannamei*.

Antagonism of Cyanamide-3-O-glucoside and protocatechuic acid on Aflatoxin B₁-induced toxicity in zebrafish larva (*Danio rerio*).

The methyltransferase METTL3-mediated fatty acid metabolism revealed the mechanism of cinnamaldehyde on alleviating steatosis.

Pentachlorophenol exposure in early pregnancy and gestational diabetes mellitus: A nested case-control study.

Protective Effects of Cinnamaldehyde on the Oxidative Stress, Inflammatory Response, and Apoptosis in the Hepatocytes of Salmonella Gallinarum-Challenged Young Chicks.

Effects of cinnamaldehyde on glucose-6-phosphate dehydrogenase activity, some biochemical and hematological parameters in diabetic rats.

Homicidal paraquat poisoning: Poisoned while drinking.

Cinnamaldehyde treatment during adolescence improves white and brown adipose tissue metabolism in a male rat model of early obesity.

Acrolein inhalation acutely affects the regulation of mitochondrial metabolism in rat lung.

MyD88 deficiency ameliorates weight loss caused by intestinal oxidative injury in an autophagy-dependent mechanism.

The phytonutrient cinnamaldehyde limits intestinal inflammation and enteric parasite infection.

Combination of TRP channel dietary agonists induces energy expending and glucose utilizing phenotype in HFD-fed mice.

Urinary acrolein metabolites, systemic inflammation, and blood lipids: Results from the National Health and Nutrition Examination Survey.

Eliminating the ecological hazards of Heterosigma akashiwo bloom by a microbial algicide: removal of nitrite contamination, redirection of carbon flow and restoration of metabolic generalists.

Metabolomic Analysis of Microcystis aeruginosa After Exposure to the Algicide L-Lysine.

[Determination of 107 typical pesticides and metabolites in raw water and drinking water by online-solid phase extraction coupled with ultra performance liquid chromatography-triple quadrupole mass spectrometry].

Pesticide exposure and cortical brain activation among farmworkers in Costa Rica.

Occurrence of emerging organic contaminants and endocrine disruptors in different water compartments in Mexico - A review.

Target gene mutation and enhanced metabolism confer fomesafen resistance in an Amaranthus retroflexus L. population from China.

Tribenuron-methyl metabolism and the rare Pro197Phe double mutation together with 2,4-D metabolism and reduced absorption can evolve in Papaver rhoeas with multiple and cross herbicide resistance to ALS inhibitors and auxin mimics.

Glyphosate and its breakdown product AMPA elicit cytoprotective responses in haemocytes of the Mediterranean mussel (Mytilus galloprovincialis).

Direct toxicity of the herbicide florasulam against Chlorella vulgaris: An integrated physiological and metabolomic analysis.

Dinitroaniline herbicides: a comprehensive review of toxicity and side effects on animal non-target organisms.

The strategy of arsenic metabolism in an arsenic-resistant bacterium *Stenotrophomonas maltophilia* SC5000 isolated from fish gut.

Contribution of gut bacteria to arsenic metabolism in the first year of life in a prospective birth cohort.

Using Computational Drug-Gene Analysis to Identify Novel Therapeutic Candidates for Retinal Neuroprotection.

Effects of nicosulfuron on plant growth and sugar metabolism in sweet maize (*Zea mays* L.).

Simultaneous determination of glyphosate, glufosinate ammonium and their metabolites in maize and soybean by ultra-performance liquid chromatography with tandem mass spectrometry.

Cytochrome P450 BcCYP99A44 and BcCYP704A177 Confer Metabolic Resistance to ALS Herbicides in *Beckmannia syzigachne*.

Bensulfuron-Methyl, Terbutylazine, and 2,4-D Butylate Disturb Plant Growth and Resistance by Deteriorating Rhizosphere Environment and Plant Secondary Metabolism in Wheat Seedlings.

The Metabolite Content of the Post-Culture Medium of the Tree Fern *Cyathea delgadii* Sternb. Cell Suspension Cultured in the Presence of 2,4-D and BAP.

Peripheral tissular analysis of rapamycin's effect as a neuroprotective agent in vivo.

Aryl hydrocarbon receptor agonist diuron and its metabolites cause reproductive disorders in male marine medaka (*Oryzias melastigma*).

The shikimate pathway regulates programmed cell death.

Interspecies Metabolic Interactions in a Synergistic Consortium Drive Efficient Degradation of the Herbicide Bromoxynil Octanoate.

[Effects of arsenic and its main metabolites on A549 cell apoptosis and the expression of pro-apoptotic genes Bad and Bik].

Investigating the Metabolic Resistance to Mesosulfuron-Methyl in *Aegilops tauschii* Coss. By Transcriptome Sequencing Combined with the Reference Genome.

Higher proportion of agricultural land use around the residence is associated with higher urinary concentrations of AMPA, a glyphosate metabolite.

ROS-derived lipid peroxidation is prevented in barley leaves during senescence.

Detection of Atrazine and Its Metabolites in Natural Water Samples Using Photonic Molecularly Imprinted Sensors.

Responses of soil fertility and microbiomes of atrazine contaminated soil to remediation by hydrochar and persulfate.

Association of urinary metabolites of non-persistent pesticides with serum sex hormones among the US females: NHANES 2013-2014.

Occurrence of Banned and Currently Used Herbicides, in Groundwater of Northern Greece: A Human Health Risk Assessment Approach.

Determination of Glyphosate and AMPA in Blood Can Predict the Severity of Acute Glyphosate Herbicide Poisoning.

Bioremediation of quinclorac injury on tobacco by a rhizosphere bacterium.

Enhanced production of water-soluble cinmethylin metabolites by *Lolium rigidum* populations with reduced cinmethylin sensitivity.

Acid-Responsive Micelles Releasing Cinnamaldehyde Enhance RSL3-Induced Ferroptosis in Tumor Cells.

P450s mediated enhanced herbicide metabolism involved in the thifensulfuron-methyl resistance in *Ipomoea purpurea* L.

In vitro toxicity of glyphosate in Atlantic salmon evaluated with a 3D hepatocyte-kidney co-culture model.

Cinnamaldehyde Regulates the Generation of $\hat{\text{I}}^3$ -aminobutyric Acid to Exert Sedation via Irreversible Inhibition of ENO1 in the Cerebellar Granular Layer.

The Metabolism of a Novel Cytochrome P450 (CYP77B34) in Tribenuron-Methyl-Resistant *Descurainia sophia* L. to Herbicides with Different Mode of Actions.

Enantioselective Response of Wheat Seedlings to Imazethapyr: From the Perspective of Fe and the Secondary Metabolite DIMBOA.

Design and synthesis of amphiphilic carboxyl-functionalized magnetic polymer microspheres for fast determination of paraquat and its four metabolites in human urine samples prior to ultra-high performance liquid chromatography-high resolution mass spectrometry.

Impacts of dietary exposure to pesticides on faecal microbiome metabolism in adult twins.

The chlorophenoxy herbicide MCPA: a mechanistic basis for the observed differences in toxicological profile in humans and rats versus dogs.

Firefighters' urinary concentrations of VOC metabolites after controlled-residential and training fire responses.

Primary metabolism in an *Amaranthus palmeri* population with multiple resistance to glyphosate and pyrithiobac herbicides.

The role of endogenous versus exogenous sources in the exposome of putative genotoxins and consequences for risk assessment.

Metabolic Investigation on the Interaction Mechanism between Dietary Dihydrochalcone Intake and Lipid Peroxidation Product Acrolein Reduction.

Alterations at biochemical, proteomic and transcriptomic levels in liver of tilapia (*Oreochromis niloticus*) under chronic exposure to environmentally relevant level of glyphosate.

A cell-based electrochemical sensor for assessing immunomodulatory effects by atrazine and its metabolites.

Environmental fate studies with (14)C-polyoxyethylene tallow amine (POE-T) to characterize environmental exposure and inform environmental risk assessments.

Prenatal arsenic exposure, arsenic methylation efficiency, and neuropsychological development among preschool children in a Spanish birth cohort.

Expression of CYP76C6 Facilitates Isoproturon Metabolism and Detoxification in Rice.

Association of Glyphosate Exposure with Blood DNA Methylation in a Cross-Sectional Study of Postmenopausal Women.

Metabolic stability of glyphosate and its environmental metabolite (aminomethylphosphonic acid) in the ruminal content of cattle.

Herbicidal activity and differential metabolism of lactofen in rat and loach on an enantiomeric level.

Tribenuron-methyl-resistant *Descurainia sophia* L. exhibits negative cross-resistance to imazethapyr conferred by a Pro197Ser mutation in acetolactate synthase and reduced metabolism.

Metabolomics insight into the influence of environmental factors in responses of freshwater biofilms to the model herbicide diuron.

The association between urinary glyphosate and aminomethyl phosphonic acid with biomarkers of oxidative stress among pregnant women in the PROTECT birth cohort study.

[Rapid and simultaneous determination of glyphosate, glufosinate, and their metabolites in soil by high performance liquid chromatography-tandem mass spectrometry].

Parental diuron exposure causes lower hatchability and abnormal ovarian development in offspring of medaka (*Oryzias melastigma*).

Capillary electrophoresis applied for the determination of acidity constants and limiting electrophoretic mobilities of ionizable herbicides including glyphosate and its metabolites and for their simultaneous separation.

TRPA1 Channel Activation With Cinnamaldehyde Induces Cutaneous Vasodilation Through NOS, but Not COX and KCa Channel, Mechanisms in Humans.

Glyphosate and glufosinate-ammonium in aquaculture ponds and aquatic products: Occurrence and health risk assessment.

Identification of essential genes involved in metabolism-based resistance mechanism to fenoxaprop-P-ethyl in *Polypogon fugax*.

In situ application of the diffusive gradients in thin film technique in aquaculture ponds for monitoring antibiotics, hormones, and herbicides.

Analytical method for sequential determination of persistent herbicides and their metabolites in fish tissues by UPLC-MS/MS.

Contaminants of emerging concern (CECs) in *Zea mays*: Uptake, translocation and distribution tissue patterns over the time and its relation with physicochemical properties and plant transpiration rate.

Phytochemicals mitigation of *Brassica napus* by IAA grown under Cd and Pb toxicity and its impact on growth responses of *Anagallis arvensis*.

Occurrence and spatial-temporal distribution of atrazine and its metabolites in the aquatic environment of the Volturno River estuary, southern Italy.

A structure-guided computational screening approach for predicting plant enzyme-metabolite interactions.

Transcriptomic signaling in zebrafish (*Danio rerio*) embryos exposed to environmental concentrations of glyphosate.

Comprehending the Role of Endocrine Disruptors in Inducing Epigenetic Toxicity.

Absorption, translocation, and metabolism of floupyrauxifen-benzyl and cyhalofop-butyl in cyhalofop-butyl-resistant barnyardgrass [*Echinochloa crus-galli* (L.) P. Beauv.].

Protective effect of the *Spirulina platensis* against toxicity induced by Diuron exposure in *Mytilus galloprovincialis*.

Weed control by metabolites produced from *Diaporthe schini*.

Probiotic Bifidobacteria Mitigate the Deleterious Effects of para-Cresol in a *Drosophila melanogaster* Toxicity Model.

Pro-Inflammatory Interactions of Dolutegravir with Human Neutrophils in an In Vitro Study.

[Expression and Regulatory Mechanism of Autophagy-related Genes in Synovial Tissues of Patients with Rheumatoid Arthritis].

Promising hepatoprotective effects of lycopene in different liver diseases.

Hibiscus sabdariffa L. polyphenolic-rich extract promotes muscle glucose uptake and inhibits intestinal glucose absorption with concomitant amelioration of Fe(2+) -induced hepatic oxidative injury.

Evaluation of the mode of action and human relevance of liver tumors in male mice treated with epyrifenacil.

Efficacy and Mechanism of Buxue Yimu Pills on Gynecological Anemia: A Combination of Clinical and Network Pharmacology Study.

The Clostridium Metabolite P-Cresol Sulfate Relieves Inflammation of Primary Biliary Cholangitis by Regulating Kupffer Cells.

Lactobacillus reuteri tryptophan metabolism promotes host susceptibility to CNS autoimmunity.

A cell-based evaluation of human tyrosinase-mediated metabolic activation of leukoderma-inducing phenolic compounds.

Association of ambient fine particulate matter exposure with gestational diabetes mellitus and blood glucose levels during pregnancy.

Pharmacological testing of therapeutics using normothermic machine perfusion: A pilot study of 2,4-dinitrophenol delivery to steatotic human livers.

Development and Validation of a UHPLC-MS/MS-Based Method to Quantify Cenobamate in Human Plasma Samples.

2,4-Dinitrophenol as an Uncoupler Augments the Anthracyclines Toxicity against Prostate Cancer Cells.

The synergy of β amyloid 1-42 and oxidative stress in the development of Alzheimer's disease-like neurodegeneration of hippocampal cells.

Treatment with Amniotic Fluid Stem Cell Extracellular Vesicles Promotes Fetal Lung Branching and Cell Differentiation at Canalicular and Saccular Stages in Experimental Pulmonary Hypoplasia Secondary to Congenital Diaphragmatic Hernia.

The AHR target gene scinderin activates the WNT pathway by facilitating the nuclear translocation of β -catenin.

Analysis of environmental chemical mixtures and nonalcoholic fatty liver disease: NHANES 1999-2014.

N-myc downstream regulated gene 1 (ndrg1) functions as a molecular switch for cellular adaptation to hypoxia.

A Combination Therapy Using Electrical Stimulation and Adaptive, Conductive Hydrogels Loaded with Self-Assembled Nanogels Incorporating Short Interfering RNA Promotes the Repair of Diabetic Chronic Wounds.

Comparative plasma metabolomic analysis to identify biomarkers for lead-induced cognitive impairment.

LC-MS metabolomics of urine reveals distinct profiles for non-muscle-invasive and muscle-invasive bladder cancer.

Polyhalogenated carbazoles (PHCZs) induce cardiotoxicity and behavioral changes in zebrafish at early developmental stages.

Histopathological and immunohistochemical evaluation for detecting changes in blood hormone levels caused by endocrine disruptors in a 28-day repeated-dose study in rats.

Urinary organic acids spectra in children with altered gut microbiota composition and autistic spectrum disorder.

Trace Element Interactions, Inflammatory Signaling, and Male Sex Implicated in Reduced Growth Following Excess Oral Iron Supplementation in Pre-Weanling Rats.

The Autism Spectrum Disorder-Associated Bacterial Metabolite p-Cresol Derails the Neuroimmune Response of Microglial Cells Partially via Reduction of ADAM17 and ADAM10.

Synbiotics, prebiotics and probiotics for solid organ transplant recipients.

Mass Spectrometric Quantitation of N'-Nitrosornicotine-1N-oxide in the Urine of Cigarette Smokers and Smokeless Tobacco Users.

Metabolomics for exposure assessment and toxicity effects of occupational pollutants: current status and future perspectives.

Dioxin-elicited decrease in cobalamin redirects propionyl-CoA metabolism to the β^2 -oxidation-like pathway resulting in acrylyl-CoA conjugate buildup.

Sub-lethal concentration of metamifop exposure impair gut health of zebrafish (*Danio rerio*).

Transcriptome sequencing of 3,3',4,4',5-Pentachlorobiphenyl (PCB126)-treated human preadipocytes demonstrates progressive changes in pathways associated with inflammation and diabetes.

The Accumulation of Gut Microbiome-derived Indoxyl Sulfate and P-Cresyl Sulfate in Patients With End-stage Renal Disease.

Ameliorative role of inducible nitric oxide synthase inhibitors against sodium arsenite-induced renal and hepatic dysfunction in rats.

Selective removal of radioactive iodine from water using reusable Fe@Pt adsorbents.

Autophagy Is Impaired in Fetal Hypoplastic Lungs and Rescued by Administration of Amniotic Fluid Stem Cell Extracellular Vesicles.

HDL functionality in type 1 diabetes: enhancement of cholesterol efflux capacity in relationship with decreased HDL carbamylation after improvement of glycemic control.

Hot Air Treatment Elicits Disease Resistance against *Colletotrichum gloeosporioides* and Improves the Quality of Papaya by Metabolomic Profiling.

Removal of Uremic Solutes from Dialysate by Activated Carbon.

Effects of perinatal TCDD exposure on colonic microbiota and metabolism in offspring and mother mice.

Suppressed farnesoid X receptor by iron overload in mice and humans potentiates iron-induced hepatotoxicity.

The Association between Blood Concentrations of PCDD/DFs, DL-PCBs and the Risk of Type 2 Diabetes Mellitus and Thyroid Cancer in South Korea.

Prenatal treprostinil reduces the pulmonary hypertension phenotype in the rat model of congenital diaphragmatic hernia.

Pharmacological Management of Obesity: A Century of Expert Opinions in Cecil Textbook of Medicine.

Flurochloridone induces responses of free radical reactions and energy metabolism disorders to BRL-3A cell.

Radiosynthesis and characterization of a carbon-11 PET tracer for receptor-interacting protein kinase 1.

Boron compound administration; A novel agent in weight management: A systematic review and meta-analysis of animal studies.

Prevalence of type 2 diabetes mellitus in relation to arsenic exposure and metabolism in Mexican women.

AhR Activation Leads to Attenuation of Murine Autoimmune Hepatitis: Single-Cell RNA-Seq Analysis Reveals Unique Immune Cell Phenotypes and Gene Expression Changes in the Liver.

Thermogenic T cells: a cell therapy for obesity?

Physiologically-based pharmacokinetic model for 2,4-dinitrophenol.

Mild Mitochondrial Uncoupling Decreases Experimental Atherosclerosis, A Proof of Concept.

Sodium arsenite does not affect prostate carcinogenesis in a chemically-hormonally-induced rat model.

Supercomplex supercomplexes: Raison d'etre and functional significance of supramolecular organization in oxidative phosphorylation.

Feeding cats with chronic kidney disease food supplemented with betaine and prebiotics increases total body mass and reduces uremic toxins.

N6-Acetyl-L-Lysine and p-Cresol as Key Metabolites in the Pathogenesis of COVID-19 in Obese Patients.

Gut-derived bacterial toxins impair memory CD4+ T cell mitochondrial function in HIV-1 infection.

[Mechanism and material basis of Sparganii Rhizoma and vinegar-processed Sparganii Rhizoma in treatment of hyperlipidemia based on network pharmacology].

The metabolite p-cresol impairs dendritic development, synaptogenesis, and synapse function in hippocampal neurons: Implications for autism spectrum disorder.

Redox-dependent loss of flavin by mitochondria complex I is different in brain and heart.

Flumioxazin, a PPO inhibitor: A weight-of-evidence consideration of its mode of action as a developmental toxicant in the rat and its relevance to humans.

Clostridioides difficile Infection Dysregulates Brain Dopamine Metabolism.

OXPPOS deficiencies affect peroxisome proliferation by downregulating genes controlled by the SNF1 signaling pathway.

Bacterial neurotoxic metabolites in multiple sclerosis cerebrospinal fluid and plasma.

Curcumin Facilitates Aryl Hydrocarbon Receptor Activation to Ameliorate Inflammatory Astroglia.

Rosmarinus officinalis L. Leaf Extracts and Their Metabolites Inhibit the Aryl Hydrocarbon Receptor (AhR) Activation In Vitro and in Human Keratinocytes: Potential Impact on Inflammatory Skin Diseases and Skin Cancer.

Toxic Effects of Endocrine Disruptor Exposure on Collagen-Induced Arthritis.

Molecular characterization of the aryl hydrocarbon receptor 2 gene in black rockfish, *Sebastes schlegelii*, and its expression patterns upon exposure to benzo[a]pyrene, 2,3,7,8-tetrachlorodibenzo-p-dioxin, and β -naphthoflavone.

A Novel Ferritin-Core Analog Is a Safe and Effective Alternative to Oral Ferrous Iron for Treating Iron Deficiency during Pregnancy in Mice.

Toenail speciation biomarkers in arsenic-related disease: a feasibility study for investigating the association between arsenic exposure and chronic disease.

Oxidative stress-induced alterations in retinal glucose metabolism in Retinitis Pigmentosa.

Tryptophan Metabolites Regulate Neuropentraxin 1 Expression in Endothelial Cells.

Metabolic trade-offs favor regulated hypothermia and inhibit fever in immune-challenged chicks.

Natural Dietary Compound Xanthohumol Regulates the Gut Microbiota and Its Metabolic Profile in a Mouse Model of Alzheimer's Disease.

Integrated molecular biology and metabolomics approach to understand the mechanism underlying reduction of insulin resistance by corn silk decoction.

Ubiquitinated gasdermin D mediates arsenic-induced pyroptosis and hepatic insulin resistance in rat liver.

PCB126 induced toxic actions on liver energy metabolism is mediated by AhR in rats.

Comparative Effects between Oral Lactoferrin and Ferrous Sulfate Supplementation on Iron-Deficiency Anemia: A Comprehensive Review and Meta-Analysis of Clinical Trials.

A randomized double-blind cross-over trial to study the effects of resistant starch prebiotic in chronic kidney disease (ReSPECKD).

Measurement of Urinary Triclocarban and 2,4-Dichlorophenol Concentration and Their Relationship with Obesity and Predictors of Cardiovascular Diseases among Children and Adolescents in Kerman, Iran.

An evidence-based definition of anemia for singleton, uncomplicated pregnancies.

Oxidative Stress and Toxicity in Reproductive Biology and Medicine: A Comprehensive Update on Male Infertility Volume II - Conclusion.

Pretreatment optimization of tissue metabolomics in colorectal cancer.

Gut Microbiome-Dependent Metabolic Pathways and Risk of Lethal Prostate Cancer: Prospective Analysis of a PLCO Cancer Screening Trial Cohort.

Biotic Supplements in Patients With Chronic Kidney Disease: Meta-Analysis of Randomized Controlled Trials.

Associations between persistent organic pollutants and endometriosis: A multiblock approach integrating metabolic and cytokine profiling.

Metabolome-wide association study of serum exogenous chemical residues in a cohort with 5 major chronic diseases.

Household kindling behaviours and potential health risks of dioxins exposure in rural Northern China.

Sodium arsenite-mediated upregulation of circDHX34 promotes apoptosis in hormone-independent breast cancer cells by regulating apoptotic genes.

Acrolein-inducing ferroptosis contributes to impaired peripheral neurogenesis in zebrafish.

Role of oxidative stress in the physiology of sensitive and resistant *Amaranthus palmeri* populations treated with herbicides inhibiting acetolactate synthase.

Establishment of a Method for the Detection of Indaziflam, Spirotetramat, Cyantraniliprole, and Their Metabolites and Application for Fruit and Vegetable Risk Assessment.

Impact of Pasture-Based Diets on the Untargeted Metabolomics Profile of Sarda Sheep Milk.

Roundup in the Reproduction of Crucian Carp (*Carassius carassius*): An In Vitro Effect on the Pituitary Gland and Ovary.

[Advances in the biosynthesis of L-homoserine and its derivatives by metabolic engineering of *Escherichia coli*].

Effects of Pesticide Intake on Gut Microbiota and Metabolites in Healthy Adults.

Integrated transcriptomic and metabolomic analyses of the molecular mechanisms of two highland barley genotypes with pyroxsulam responses.

Mitochondrial uncoupler DNP induces coexistence of dual-state hyper-energy metabolism leading to tumor growth advantage in human glioma xenografts.

Treatment with MDL 72527 Ameliorated Clinical Symptoms, Retinal Ganglion Cell Loss, Optic Nerve Inflammation, and Improved Visual Acuity in an Experimental Model of Multiple Sclerosis.

Superior dimethyl disulfide degradation in a microbial fuel cell: Extracellular electron transfer and hybrid metabolism pathways.

DNP and ATP modulate the developments of pulp softening and breakdown in *Phomopsis longanae* Chi-infected fresh longan through regulating the cell wall polysaccharides metabolism.

Comprehensive analysis of the carboxylesterase gene reveals that NtCXE22 regulates axillary bud growth through strigolactone metabolism in tobacco.

Characterization of multiple pesticide exposure in pregnant women in Brittany, France.

Early life organophosphate ester exposures and bone health at age 12 years: The Health Outcomes and Measures of the Environment (HOME) Study.

Insights into metabolic and pharmacological profiling of *Aspergillus ficuum* through bioinformatics and experimental techniques.

Ethnicity Associated Microbial and Metabonomic Profiling in Newly Diagnosed Ulcerative Colitis.

Involvement of miRNAs in Metabolic Herbicide Resistance to Bispyribac-Sodium in *Echinochloa crus-galli* (L.) P. Beauv.

Environmentally relevant atrazine exposure leads to increases in DNA damage and changes in morphology in the hepatopancreas of crayfish (*Faxonius virilis*).

Investigation of diverse biosynthetic secondary metabolites gene clusters using genome mining of indigenous *Streptomyces* strains isolated from saline soils in Iran.

Can probiotic, prebiotic, and synbiotic supplementation modulate the gut-liver axis in type 2 diabetes? A narrative and systematic review of clinical trials.

A pilot study of oral iron therapy in erythropoietic protoporphyria and X-linked protoporphyria.

Urinary volatile organic compound metabolites and reduced lung function in U.S. adults.

DEAD box RNA helicases protect Antarctic *Pseudomonas syringae* Lz4W against oxidative stress.

Effect of syringic acid on steroid and gonadotropic hormones, hematological indices, sperm characteristics and morphologies, and markers of tissue damage in methyl cellosolve-administered rats.

Degradation of seven pesticides and two metabolites before and during aquifer storage transfer and recovery operation.

Toxic effects of pesticides on cellular and humoral immunity: an overview.

DAF-16 is involved in colonic metabolites of ferulic acid-promoted longevity and stress resistance of *Caenorhabditis elegans*.

Diverse mechanisms associated with cyhalofop-butyl resistance in Chinese sprangletop (*Leptochloa chinensis* (L.) Nees): Characterization of target-site mutations and metabolic resistance-related genes in two resistant populations.

Application of comparative genomics of *Acetobacter* species facilitates genome-scale metabolic reconstruction of the *Acetobacter ghanensis* LMG 23848(T) and *Acetobacter senegalensis* 108B cocoa strains.

Assessment of Cosmetic and Dermatological Properties and Safety of Use of Model Skin Tonics with Kombucha-Fermented Red Berry Extracts.

Toxicity alleviation and metabolism enhancement of nonylphenol in green algae *Dictyosphaerium* sp. by NaHCO₃.

Adjuvants in fungicide formulations can be skin sensitizers and cause different types of cell stress responses.

Low Temperature Inhibits the Defoliation Efficiency of Thidiazuron in Cotton by Regulating Plant Hormone Synthesis and the Signaling Pathway.

Chlorinated Polycyclic Aromatic Hydrocarbons Induce Immunosuppression in THP-1 Macrophages Characterized by Disrupted Amino Acid Metabolism.

The modulation of gut microbiota by herbal medicine to alleviate diabetic kidney disease - A review.

An Asp376Glu substitution in ALS gene and enhanced metabolism confers high tribenuron-methyl resistance in *Sinapis alba*.

Metabolic Regulation Effect and Potential Metabolic Biomarkers of Pre-Treated Delphinidin on Oxidative Damage Induced by Paraquat in A549 Cells.

Characterization of Urinary Pesticide Metabolite Concentrations of Pregnant Women in Suriname.

Reliable determination of the main metabolites of 2-phenoxyethanol in human blood and urine using LC-MS/MS analysis.

Structures and Biological Activities of Secondary Metabolites from *Trichoderma harzianum*.

Comparative Biochemical Profiling of Aluminum Chloride and Sodium Azide Induced Neuroinflammation and Cardiometabolic Disturbance.

Proteomic and Metabolomic Evaluation of Insect- and Herbicide-Resistant Maize Seeds.

Endocrine disruptor chemicals as obesogen and diabetogen: Clinical and mechanistic evidence.

The dichloroacetamide safener benoxacor is enantioselectively metabolized by monkey liver microsomes and cytosol.

Sodium arsenite but not aluminum chloride stimulates ABC transporter activity in renal proximal tubules of killifish (*Fundulus heteroclitus*).

Environmental behaviour of a pesticide metabolite, the AMPA. Sequestration of Ca^{2+} , Mg^{2+} , Cu^{2+} , Zn^{2+} and Al^{3+} .

Dynamics of microbial populations and metabolites of fermenting saps throughout tapping process of ron and oil palm trees in Cote d'Ivoire.

Drug transporters OAT1 and OAT3 have specific effects on multiple organs and gut microbiome as revealed by contextualized metabolic network reconstructions.

Accumulation, metabolites formation and elimination behavior of rac-glufosinate-ammonium and glufosinate-P in zebrafish (*Danio rerio*).

The formation mechanisms of key flavor substances in stinky tofu brine based on metabolism of aromatic amino acids.

Ethyl Methane Sulfonate and Sodium Azide-Mediated Chemical and X-ray-Mediated Physical Mutagenesis Positively Regulate Peroxidase 1 Gene Activity and Biosynthesis of Antineoplastic Vinblastine in *Catharanthus roseus*.

Low-Dose Dioxin Reduced Glucose Uptake in C2C12 Myocytes: The Role of Mitochondrial Oxidative Stress and Insulin-Dependent Calcium Mobilization.

Dynamics of Microbial Communities, Flavor, and Physicochemical Properties during *Ziziphus jujube* Vinegar Fermentation: Correlation between Microorganisms and Metabolites.

Sugar and acid profile of loquat (*Eriobotrya japonica* Lindl.), enzymes assay and expression profiling of their metabolism-related genes as influenced by exogenously applied boron.

Trans enantiomeric separation of MESA and MOXA, two environmentally important metabolites of the herbicide, metolachlor.

Photo-oxidation and Photoreduction of Catechols by Chlorophyll Metabolites and Methylene Blue.

Metabolite Profiling of Paraquat Tolerant *Arabidopsis thaliana* Radical-induced Cell Death1 (*rcd1*)-A Mediator of Antioxidant Defence Mechanisms.

Assessing the colonization by *Daphnia magna* of pesticide-disturbed habitats (chlorpyrifos, terbuthylazine and their mixtures) and the behavioral and neurotoxic effects.

The Role of Acrolein in Neurodegenerative Diseases and Its Protective Strategy.

Oxaloacetate acid ameliorates paraquat-induced acute lung injury by alleviating oxidative stress and mitochondrial dysfunction.

Metabolic reprogramming enables the auxiliary diagnosis of breast cancer by automated breast volume scanner.

The dynamics of microbial community and flavor metabolites during the acetic acid fermentation of Hongqu aromatic vinegar.

Idiopathic unilateral third nerve palsy with pupillary sparing in 10-year-old child -a case report.

High-throughput identification of oxidative stress-inducing environmental chemicals in the *C. elegans* system.

Trade-off for survival: Microbiome response to chemical exposure combines activation of intrinsic resistances and adapted metabolic activity.

Exploring the dynamic of microbial community and metabolic function in food waste composting amended with traditional Chinese medicine residues.

Isoforms of the transcriptional cofactor SIN3 differentially regulate genes necessary for energy metabolism and cell survival.

The involvement of branched-chain amino acids (BCAAs) in aromatic trihalogenated DBP exposure-induced kidney damage in mice.

Approaches for the establishment of optimized co-culture system of multiple *Trichoderma* strains for culture metabolites highly effective in cucumber growth promotion.

Altered gut microbiota and gut-derived p-cresyl sulfate serum levels in peritoneal dialysis patients.

Interference of Dihydrocoumarin with Hormone Transduction and Phenylpropanoid Biosynthesis Inhibits Barnyardgrass (*Echinochloa crus-galli*) Root Growth.

First report on atrazine monitoring in drinking water from Ijebu-North, South-West Nigeria: Human health risk evaluation and reproductive toxicity studies.

Regulation of gut microbiota of *Astragali Radix* in treating for chronic atrophic gastritis rats based on metabolomics coupled with 16S rRNA gene sequencing.

An online atlas of human plasma metabolite signatures of gut microbiome composition.

Assessment of Semen Respiratory Activity of Domesticated Species before and after Cryopreservation: Boars, Bulls, Stallions, Reindeers and Roosters.

[Determination of chlorobenzene metabolite-p-chlorophenol in urine by solid phase extraction-gas chromatography].

Differential Effects of Arsenic in Drinking Water on Mouse Hepatic and Intestinal Heme Oxygenase-1 Expression.

Efficacy of kangfuxin liquid on radiotherapy-induced oral mucositis for patients with head and neck squamous cell carcinoma and its effect on salivary glands and immune function.

Occurrence and distribution of persistent organic pollutants in the liver and muscle of Atlantic blue sharks: Relevance and health risks.

Cobinamide is a strong and versatile antioxidant that overcomes oxidative stress in cells, flies, and diabetic mice.

Abscisic Acid Improves Rice Thermo-Tolerance by Affecting Trehalose Metabolism.

Periplaneta americana Extract Pretreatment Alleviates Oxidative Stress and Inflammation and Increases the Abundance of Gut *Akkermansia muciniphila* in Diquat-Induced Mice.

Ioxynil and diethylstilbestrol increase the risks of cardiovascular and thyroid dysfunction in zebrafish.

Protection against Paraquat-Induced Oxidative Stress by *Curcuma longa* Extract-Loaded Polymeric Nanoparticles in Zebrafish Embryos.

Influence of Plant Growth Regulators on Glandular Trichome Density and Steviol Glycosides Accumulation in *Stevia rebaudiana*.

Plant hormone signals regulate trehalose accumulation against osmotic stress in watermelon cells.

Life Cycle Exposure to Cyhalofop-Butyl Induced Reproductive Toxicity in Zebrafish.

Sludge reduction and microbial community evolution of activated sludge induced by metabolic uncoupler o-chlorophenol in long-term anaerobic-oxic process.

Adult health and transition stage-specific rotenone-mediated *Drosophila* model of Parkinson's disease: Impact on late-onset neurodegenerative disease models.

The effects of secondary bacterial metabolites on photosynthesis in microalgae cells.

Microbiome profiling of nasal extracellular vesicles in patients with allergic rhinitis.

Mild pentachlorophenol-mediated uncoupling of mitochondria depletes ATP but does not cause an oxidized redox state or dopaminergic neurodegeneration in *Caenorhabditis elegans*.

Agent Orange Exposure, Transformation From MGUS to Multiple Myeloma, and Outcomes in Veterans.

Oral administration of pentachlorophenol impairs antioxidant system, inhibits enzymes of brush border membrane, causes DNA damage and histological changes in rat intestine.

E-cigarette aerosol exacerbates cardiovascular oxidative stress in mice with an inactive aldehyde dehydrogenase 2 enzyme.

Interindividual variation contributes to differential PCB 126 induced gene expression in primary breast epithelial cells and tissues.

Metabolic Engineering of Rice Cells with Vanillin Synthase Gene (VpVAN) to Produce Vanillin.

Boron Compounds Exhibit Protective Effects against Aluminum-Induced Neurotoxicity and Genotoxicity: In Vitro and In Vivo Study.

Artemisia argyi allelopathy: a generalist compromises hormone balance, element absorption, and photosynthesis of receptor plants.

Atrazine Exposure Induces Hepatic Metabolism Disorder in Male Adult Zebrafish.

Diverse Effects of Amino Acids on Monascus Pigments Biosynthesis in *Monascus purpureus*.

Metabolites From Trypanosome-Infected Cattle as Sensitive Biomarkers for Animal Trypanosomiasis.

Dietary *Bacillus licheniformis* improves the effect of *Astragalus membranaceus* extract on blood glucose by regulating antioxidation activity and intestinal microbiota in InR[E19]/TM2 *Drosophila melanogaster*.

In Vitro Assessment of Pesticides Toxicity and Data Correlation with Pesticides Physicochemical Properties for Prediction of Toxicity in Gastrointestinal and Skin Contact Exposure.

Integrated Multilayer Omics Reveals the Genomic, Proteomic, and Metabolic Influences of Histidyl Dipeptides on the Heart.

Aryl Hydrocarbon Receptor (AhR)-Mediated Signaling in iPSC-Derived Human Motor Neurons.

Cytomegalovirus-related Cystitis in a Patient with Membranous Glomerulonephritis Receiving Cyclophosphamide: A Case Study.

Improving knowledge on genotoxicity dynamics in somatic and germ cells of crayfish (*Procambarus clarkii*).

[Determination of dazomet and its metabolite methyl isothiocyanate residues in plant-derived foods by gas chromatography-triple quadrupole mass spectrometry].

Effects of dietary 2-(2H-benzotriazol-2-yl)-4-methylphenol (UV-P) exposure on Japanese medaka (*Oryzias latipes*) in a short-term reproduction assay.

Evaluation of dioxin induced transcriptomic responses in a 3D human liver microtissue model.

Tocopherol Enhances the Antioxidant Defense System and Histomorphometric Parameters in The Gastrointestinal Tract of Rats Treated with Sodium Arsenite.

Human Adult Microbiota in a Static Colon Model: AhR Transcriptional Activity at the Crossroads of Host-Microbe Interaction.

In vivo toxicity evaluations of halophenolic disinfection byproducts in drinking water: A multi-omics analysis of toxic mechanisms.

Melatonin Prevents NaAsO₂-Induced Developmental Cardiotoxicity in Zebrafish through Regulating Oxidative Stress and Apoptosis.

Dynamic Transcriptome Analysis Reveals Complex Regulatory Pathway Underlying Induction and Dose Effect by Different Exogenous Auxin IAA and 2,4-D During in vitro Embryogenic Redifferentiation in Cotton.

Effects of Vine Tea Extract on Meat Quality, Gut Microbiota and Metabolome of Wenchang Broiler.

Exposure to 3,3',4,4',5-Pentachlorobiphenyl (PCB126) Causes Widespread DNA Hypomethylation in Adult Zebrafish Testis.

The Role of Insect Symbiotic Bacteria in Metabolizing Phytochemicals and Agrochemicals.

Pro-197-Ser Mutation and Cytochrome P450-Mediated Metabolism Conferring Resistance to Flucarbazono-Sodium in *Bromus japonicus*.

Chronic Toxicity of Primary Metabolites of Chloroacetamide and Glyphosate to Early Life Stages of Marbled Crayfish *Procambarus virginalis*.

Effects of the Herbicide Atrazine on Crustacean Reproduction. Mini-Review.

Exposure to the Dioxin-like Pollutant PCB 126 Afflicts Coronary Endothelial Cells via Increasing 4-Hydroxy-2 Nonenal: A Role for Aldehyde Dehydrogenase 2.

Isobaric 4-Plex Tagging for Absolute Quantitation of Biological Acids in Diabetic Urine Using Capillary LC-MS/MS.

Chemical manipulation of mitochondrial function affects metabolism of red carotenoids in a marine copepod (*Tigriopus californicus*).

Biodegradation and Subsequent Toxicity Reduction of Co-contaminants Tribenuron Methyl and Metsulfuron Methyl by a Bacterial Consortium B2R.

Impact of Ferrous Sulfate on Thylakoidal Multiprotein Complexes, Metabolism and Defence of *Brassica juncea* L. under Arsenic Stress.

Integration of Metabolomics and Transcriptomics for Investigating the Tolerance of Foxtail Millet (*Setaria italica*) to Atrazine Stress.

Substitution of Refined Conventional Wheat Flour with Wheat High in Resistant Starch Modulates the Intestinal Microbiota and Fecal Metabolites in Healthy Adults: A Randomized, Controlled Trial.

Development and Automation of a Bacterial Biosensor to the Targeting of the Pollutants Toxic Effects by Portable Raman Spectrometer.

Impact of a 7-day homogeneous diet on interpersonal variation in human gut microbiomes and metabolomes.

Red propolis reduces inflammation in cyclophosphamide-induced hemorrhagic cystitis in rats.

Comparison of the toxic effects of organic and inorganic arsenic in *Caenorhabditis elegans* using a multigenerational approach.

Alachlor breaks down intracellular calcium homeostasis and leads to cell cycle arrest through JNK/MAPK and PI3K/AKT signaling mechanisms in bovine mammary gland epithelial cells.

Mitochondrial uncouplers induce proton leak by activating AAC and UCP1.

Fate of undigested proteins in the pig large intestine: What impact on the colon epithelium?

Effects of 1,3,7-tribromodibenzo-p-dioxin, a natural dioxin on chicken embryos: Comparison with effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Use of in vitro metabolism and biokinetics assays to refine predicted in vivo and in vitro internal exposure to the cosmetic ingredient, phenoxyethanol, for use in risk assessment.

Relationship between dioxins and steroid hormone in 6-year-olds: A follow-up study in an e-waste region of China.

Metabolomics and lipidomics to identify biomarkers of effect related to exposure to non-dioxin-like polychlorinated biphenyls in pigs.

Simultaneous determination of isoxaflutole and its two metabolites in corn under field conditions by LC-MS/MS.

Antimicrobial Mechanism and Secondary Metabolite Profiles of Biocontrol Agent *Streptomyces lydicus* M01 Based on Ultra-High-Performance Liquid Chromatography Connected to a Quadrupole Time-of-Flight Mass Spectrometer Analysis and Genome Sequencing.

Physiological and Metabolic Response of *Arthrospira maxima* to Organophosphates.

[Determination of acetochlor and its metabolites in urine using liquid chromatography-tandem mass spectrometry].

Distinct Epithelial Cell Profiles in Normal Versus Induced-Congenital Diaphragmatic Hernia Fetal Lungs.

Bioinspired Synthesis of Pinoxaden Metabolites Using a Site-Selective C-H Oxidation Strategy.

Pesticide exposure in New Zealand school-aged children: Urinary concentrations of biomarkers and assessment of determinants.

Dioxin-like polychlorinated biphenyl 126 (PCB126) disrupts gut microbiota-host metabolic dysfunction in mice via aryl hydrocarbon receptor activation.

Prediction of tissue and urine concentrations of 2-phenoxyethanol and its metabolite 2-phenoxyacetic acid in rat and human after oral and dermal exposures via GastroPlus(TM) physiologically based pharmacokinetic modelling.

Associations of total urinary arsenic with total cholesterol and high-density lipoprotein among 12-17-year-old participants from the 2009-2016 NHANES cycles: A cross-sectional study.

Evaluation of the Acute Effects of Arsenic on Adults of the Neotropical Native Fish *Cnesterodon decemmaculatus* Using a Set of Biomarkers.

Simultaneous determination of pinoxaden, cloquintocet-mexyl, clodinafop-propargyl ester and its major metabolite in barley products and soil using QuEChERS modified with multi-walled carbon nanotubes coupled with LC-MS/MS.

Effects of Different Formulations of Glyphosate on Rumen Microbial Metabolism and Bacterial Community Composition in the Rumen Simulation Technique System.

Ferrous Bisglycinate Supplementation Modulates Intestinal Antioxidant Capacity via the AMPK/FOXO Pathway and Reconstitutes Gut Microbiota and Bile Acid Profiles in Pigs.

Dioxin Disrupts Thyroid Hormone and Glucocorticoid Induction of *klf9*, a Master Regulator of Frog Metamorphosis.

[A case of occupational allyl alcohol inhalation poisoning].

The Potential Role of Mitochondrial Acetaldehyde Dehydrogenase 2 in Urological Cancers From the Perspective of Ferroptosis and Cellular Senescence.

Environmental induced transgenerational inheritance impacts systems epigenetics in disease etiology.

Assessment of Physicochemical, Microbiological and Toxicological Hazards at an Illegal Landfill in Central Poland.

Breath chemical markers of sexual arousal in humans.

Corrigendum to "Enantioselective metabolomic modulations in *Arabidopsis thaliana* leaf induced by the herbicide dichlorprop" [Sci. Total Environ. 797 (2021) 149015].

Agent Orange Reviewed: Potential Role in Peripheral Neuropathy and Neurodegeneration.

Potent mutagenicity of an azide, 3-azido-1,2-propanediol, in human TK6 cells.

Determination of Glyphosate, Glufosinate, and Their Major Metabolites in Tea Infusions by Dual-Channel Capillary Electrophoresis following Solid-Phase Extraction.

Connecting primary and specialized metabolism: Amino acid conjugation of phytohormones by GRETCHEN HAGEN 3 (GH3) acyl acid amido synthetases.

A Negative Feedback Loop and Transcription Factor Cooperation Regulate Zonal Gene Induction by 2, 3, 7, 8-Tetrachlorodibenzo-p-Dioxin in the Mouse Liver.

Physiological role of isocitrate lyase in dibenzo-p-dioxin and dibenzofuran metabolism by *Sphingomonas wittichii* RW1.

Effects of essential oil mixtures on nitrogen metabolism and odor emission via in vitro simulated digestion and in vivo growing pig experiments.

Profiles of Cytokinins Metabolic Genes and Endogenous Cytokinins Dynamics during Shoot Multiplication In Vitro of Phalaenopsis.

Minimum variance optimized Fisher ratio analysis of comprehensive two-dimensional gas chromatography / mass spectrometry data: Study of the pacu fish metabolome.

Insight in Hypoxia-Mimetic Agents as Potential Tools for Mesenchymal Stem Cell Priming in Regenerative Medicine.

Membrane Hormone Receptors and Their Signaling Pathways as Targets for Endocrine Disruptors.

Expression Pattern of Entire Cytochrome P450 Genes and Response of Defenses in a Metabolic-Herbicide-Resistant Biotype of *Polypogon fugax*.

Cytochrome P450 CYP709C56 metabolizing mesosulfuron-methyl confers herbicide resistance in *Alopecurus aequalis*.

Enhancement of cancer-cell-selective cytotoxicity by a dicopper complex with a phenanthrene amide-tether ligand conjugate via mitochondrial apoptosis.

Comprehensive characterization of the bacterial community structure and metabolite composition of food waste fermentation products via microbiome and metabolome analyses.

The aryl hydrocarbon receptor: A predominant mediator for the toxicity of emerging dioxin-like compounds.

Gut microbial metabolite p-cresol alters biotransformation of bisphenol A: Enzyme competition or gene induction?

Novel Coconut Vinegar Attenuates Hepatic and Vascular Oxidative Stress in Rats Fed a High-Cholesterol Diet.

Microbial Interactions in Kombucha through the Lens of Metabolomics.

Is the Use of Glyphosate in Modern Agriculture Resulting in Increased Neuropsychiatric Conditions Through Modulation of the Gut-brain-microbiome Axis?

Improving the Acetic Acid Fermentation of *Acetobacter pasteurianus* by Enhancing the Energy Metabolism.

Disulfiram Produces Potent Anxiolytic-Like Effects Without Benzodiazepine Anxiolytics-Related Adverse Effects in Mice.

Metabolomic and transcriptomic investigation of the mechanism involved in enantioselective toxicity of imazamox in *Lemna minor*.

Fungicide-loaded mesoporous silica nanoparticles promote rice seedling growth by regulating amino acid metabolic pathways.

More than Meets the Eye: The Aryl Hydrocarbon Receptor is an Environmental Sensor, Physiological Regulator and a Therapeutic Target in Ocular Disease.

Metabolic profiling of serum and urine in lactating dairy cows affected by subclinical ketosis using proton nuclear magnetic resonance spectroscopy.

Identification of the AccCDK1 gene in *Apis cerana cerana* and its relationship with the oxidative stress response.

Significant Correlations between p-Cresol Sulfate and Mycophenolic Acid Plasma Concentrations in Adult Kidney Transplant Recipients.

Laser-induced choroidal neovascularization detected on optical coherence tomography angiography in patients with diabetic retinopathy.

Distinguish oral-source VOCs and control their potential impact on breath biomarkers.

Concentrations and Toxic Implications of Dioxin-Like Polychlorinated Biphenyls in Soil Samples from Electrical Power Stations in Lagos, Nigeria.

Using metabolomic profiling to inform use of surrogate species in ecological risk assessment practices.

Cyhalofop-butyl resistance conferred by a novel Trp-2027-Leu mutation of acetyl-CoA carboxylase and enhanced metabolism in *Leptochloa chinensis*.

Effects of the L-tyrosine-derived bacterial metabolite p-cresol on colonic and peripheral cells.

Interference of dietary polyphenols with potentially toxic amino acid metabolites derived from the colonic microbiota.

Root exudation of prometryn and its metabolites from Chinese celery (*Apium graveolens*).

The OxyR and SoxR transcriptional regulators are involved in a broad oxidative stress response in *Paraburkholderia xenovorans* LB400.

Pharmacological Inhibition of Spermine Oxidase Suppresses Excitotoxicity Induced Neuroinflammation in Mouse Retina.

Inhibitory effect of individual and mixtures of nitrophenols on anaerobic toxicity assay of anaerobic systems: Metabolism and evaluation modeling.

Unravelling the contribution of nitrifying and methanotrophic bacteria to micropollutant co-metabolism in rapid sand filters.

Comparative metabolomics and microbial communities associated network analysis of black and white horse-sourced koumiss.

Mitochondrial proteomics reveals new insights into embryogenic competence acquisition in *Carica papaya* L. callus.

Potential neurotoxicity, immunotoxicity, and carcinogenicity induced by metribuzin and tebuconazole exposure in earthworms (*Eisenia fetida*) revealed by transcriptome analysis.

Aclonifen induces bovine mammary gland epithelial cell death by disrupting calcium homeostasis and inducing ROS production.

Removal of azimsulfuron and zoxamide using a tapered variable diameter biological fluidized bed combined with electrochemistry: Mass fraction division, energy metabolism activity and carbon emissions.

Pesticides alter ecosystem respiration via phytoplankton abundance and community structure: Effects on the carbon cycle?

Identifying potential thyroid hormone disrupting effects among diphenyl ether structure pesticides and their metabolites in silico.

Effect of freeze-dried kombucha culture on microbial composition and assessment of metabolic dynamics during fermentation.

Instrumental and bioanalytical assessment of pharmaceuticals and hormone-like compounds in a major drinking water source-wastewater receiving Zayandeh Rood river, Iran.

Probiotic *Bacillus* Alleviates Oxidative Stress-Induced Liver Injury by Modulating Gut-Liver Axis in a Rat Model.

Algae and Their Metabolites as Potential Bio-Pesticides.

Why Do High-Risk Patients Develop or Not Develop Coronary Artery Disease? Metabolic Insights from the CAPIRE Study.

[Relationship between pesticide exposure and lipid metabolism in population].

Glyphosate vs. Glyphosate-Based Herbicides Exposure: A Review on Their Toxicity.

Oxyfluorfen induces hepatotoxicity through lipo-sugar accumulation and inflammation in zebrafish (*Danio rerio*).

Hormonal interactions underlying parthenocarpic fruit formation in horticultural crops.

Locust density shapes energy metabolism and oxidative stress resulting in divergence of flight traits.

Naltrexone Transport by a Proton-Coupled Organic Cation Antiporter in hCMEC/D3 Cells, an in Vitro Human Blood-Brain Barrier Model.

Gut neurotoxin p-cresol induces brain-derived neurotrophic factor secretion and increases the expression of neurofilament subunits in PC-12 cells.

Temporal Modulation of Differential Alternative Splicing in HaCaT Human Keratinocyte Cell Line Chronically Exposed to Arsenic for up to 28 Wk.

A direct and simple immobilization route for immunosensors by CNBr activation for covalent attachment of anti-leptin: obesity diagnosis point of view.

Fluroxypyr-1-methylheptyl ester causes apoptosis of bovine mammary gland epithelial cells by regulating PI3K and MAPK signaling pathways and endoplasmic reticulum stress.

Biofilm formed by *Hanschlegelia zihuaiae* S113 on root surface mitigates the toxicity of bensulfuron-methyl residues to maize.

Juvenile hormone mimics with phenyl ether and amide functionality to be insect growth regulators (IGRs): synthesis, characterization, computational and biological study.

Aminomethylphosphonic acid (AMPA) alters oxidative status during embryonic development in an amphibian species.

Bioaccumulation, metabolism and endocrine-reproductive effects of metolachlor and its S-enantiomer in adult zebrafish (*Danio rerio*).

Insight investigation of the on-site activated sludge reduction induced by metabolic uncoupler: Effects of 2,6-dichlorophenol on soluble microbial products, microbial activity, and environmental impact.

Exposome of attention deficit hyperactivity disorder in Taiwanese children: exploring risks of endocrine-disrupting chemicals.

Infrared thermography can detect previsual bacterial growth in a laboratory setting via metabolic heat detection.

Soybean isoflavones protect SH-SY5Y neurons from atrazine-induced toxicity by activating mitophagy through stimulation of the BEX2/BNIP3/NIX pathway.

Generational effects of a chronic exposure to a low environmentally relevant concentration of glyphosate on rainbow trout, *Oncorhynchus mykiss*.

Effects of Pesticides on Longevity and Bioenergetics in Invertebrates-The Impact of Polyphenolic Metabolites.

Alterations in small RNA profiles in liver following a subchronic exposure to a low-dose pesticide mixture in Sprague-Dawley rats.

ADME/T-based strategies for paraquat detoxification: Transporters and enzymes.

Salicylic Acid Acts Antagonistically to Plastid Retrograde Signaling by Promoting the Accumulation of Photosynthesis-associated Proteins in Arabidopsis.

Repeated Low-Dose Acrolein Triggers Irreversible Lamina Propria Edema in Urinary Bladder, Transient Voiding Behavior and Widening of Eyes to Mechanical Stimuli.

An NMR-based metabolomics study on sea anemones *Exaiptasia diaphana* (Rapp, 1829) with atrazine exposure.

Superabsorbent polymer as a supplement substrate of constructed wetland to retain pesticides from agricultural runoff.

Application of the health risk assessment of acetochlor in the development of water quality criteria.

Acute exposition to Roundup Transorb[®] induces systemic oxidative stress and alterations in the expression of newly sequenced genes in silverside fish (*Odontesthes humensis*).

Enantioselective metabolomic modulations in *Arabidopsis thaliana* leaf induced by the herbicide dichlorprop.

An integrated host-microbiome response to atrazine exposure mediates toxicity in *Drosophila*.

Pleiotropic Outcomes of Glyphosate Exposure: From Organ Damage to Effects on Inflammation, Cancer, Reproduction and Development.

Review: Mechanisms of Glyphosate and Glyphosate-Based Herbicides Action in Female and Male Fertility in Humans and Animal Models.

Proteomic Profile of Glyphosate-Resistant Soybean under Combined Herbicide and Drought Stress Conditions.

Quinoxaline derivatives as herbicide safeners by improving *Zea mays* tolerance.

The phytotoxicity mechanism of florypyrauxifen-benzyl to *Echinochloa crus-galli* (L.) P. Beauv and weed control effect.

The effect of atrazine on intestinal histology, microbial community and short chain fatty acids in *Pelophylax nigromaculatus* tadpoles.

Herbicide atrazine exposure induce oxidative stress, immune dysfunction and WSSV proliferation in red swamp crayfish *Procambarus clarkii*.

Exposure to the herbicide butachlor activates hepatic stress signals and disturbs lipid metabolism in mice.

Soil bacterial community dynamics following bioaugmentation with *Paenarthrobacter* sp. W11 in atrazine-contaminated soil.

Paraquat promotes acute lung injury in rats by regulating alveolar macrophage polarization through glycolysis.

Endophytic bacterium CIMAP-A7 mediated amelioration of atrazine induced phyto-toxicity in *Andrographis paniculata*.

Sex-dependent acrolein sensitivity in mice is associated with differential lung cell, protein, and transcript changes.

Functional roles of polyamines and their metabolite acrolein in eukaryotic cells.

Negative cross-resistance to clomazone in imazethapyr-resistant *Echinochloa crus-galli* caused by increased metabolism.

Effects of co-formulants on the absorption and secretion of active substances in plant protection products in vitro.

Melatonin Increases Life Span, Restores the Locomotor Activity, and Reduces Lipid Peroxidation (LPO) in Transgenic Knockdown Parkin *Drosophila melanogaster* Exposed to Paraquat or Paraquat/Iron.

Improving screening model of pesticide risk assessment in surface soils: Considering degradation metabolites.

Prenatal exposure to organophosphate and pyrethroid insecticides and the herbicide 2,4-dichlorophenoxyacetic acid and size at birth in urban pregnant women.

Global transcriptome profiling reveals antagonizing response of head kidney of juvenile common carp exposed to glyphosate.

Exposure to 2,4-D herbicide induces hepatotoxicity in zebrafish larvae.

Reproductive toxicity due to herbicide exposure in freshwater organisms.

Growth and metabolic responses to methyl viologen (1,1'-dimethyl - 4,4'-bipyridinium dichloride) on *Chlorella vulgaris*.

Phytotoxicity of the chiral herbicide dichlorprop: Cross-talk between nitric oxide, reactive oxygen species and phytohormones.

Olfactory perception of herbicide butachlor by GOBP2 elicits ecdysone biosynthesis and detoxification enzyme responsible for chlorpyrifos tolerance in *Spodoptera litura*.

Paraquat-induced cholesterol biosynthesis proteins dysregulation in human brain microvascular endothelial cells.

Perinatal exposure to a glyphosate-based herbicide causes dysregulation of dynorphins and an increase of neural precursor cells in the brain of adult male rats.

Modified zeolite-supported biofilm in service of pesticide biodegradation.

Immunological and metabolic effects of acute sublethal exposure to glyphosate or glyphosate-based herbicides on juvenile rainbow trout, *Oncorhynchus mykiss*.

Assessment of risks to listed species from the use of atrazine in the USA: a perspective.

Fragment Recombination Design, Synthesis, and Safener Activity of Novel Ester-Substituted Pyrazole Derivatives.

3,5,6-trichloro-2-pyridinol intensifies the effect of chlorpyrifos on the paracrine function of Sertoli cells by preventing binding of testosterone and the androgen receptor.

Developmental effect of parental or direct chronic exposure to environmental concentration of glyphosate on the larvae of rainbow trout, *Oncorhynchus mykiss*.

Effects of the herbicide Irgarol 1051 on the transcriptome of hermatypic coral *Acropora tenuis* and its symbiotic dinoflagellates.

Toxicological status changes the susceptibility of the honey bee *Apis mellifera* to a single fungicidal spray application.

Route of exposure influences pesticide body burden and the hepatic metabolome in post-metamorphic leopard frogs.

Phytotoxicity of *Schiekia timida* Seed Extracts, a Mixture of Phenylphenalenones.

Whole transcriptome analysis resulted in the identification of Chinese sprangletop (*Leptochloa chinensis*) genes involved in cyhalofop-butyl tolerance.

Low-Dose Acrolein, an Endogenous and Exogenous Toxic Molecule, Inhibits Glucose Transport via an Inhibition of Akt-Regulated GLUT4 Signaling in Skeletal Muscle Cells.

Glyphosate-based herbicides: Evidence of immune-endocrine alteration.

N-acetylcysteine is more effective than ellagic acid in preventing acrolein induced dysfunction in mitochondria isolated from rat liver.

Paraquat induces redox imbalance and disrupts glutamate and energy metabolism in the hippocampus of prepubertal rats.

Proteome of *Saccharomyces cerevisiae* under paraquat stress regulated by therapeutic concentration of copper ions.

Exposure to sublethal concentrations of the glyphosate-based herbicide Faena[®] increases sensitivity in the progeny of the American cladoceran *Daphnia exilis* (Herrick, 1895).

Metazachlor effect on poplar - Pioneer plant species for riparian buffers.

Mendelian randomization analysis of arsenic metabolism and pulmonary function within the Hispanic Community Health Study/Study of Latinos.

Possible effects of agent orange and posttraumatic stress disorder on hyperglycemia in Korean veterans from the US-Vietnam war.

Amazonian soil fungi are efficient degraders of glyphosate herbicide; novel isolates of *Penicillium*, *Aspergillus*, and *Trichoderma*.

Changes in soil microbial community and activity caused by application of dimethachlor and linuron.

Perinatal exposure to low doses of glyphosate-based herbicide combined with a high-fat diet in adulthood causes changes in the jejunums of mice.

Acrolein-conjugated proteomics in brains of adult C57BL/6 mice chronically exposed to acrolein and aged APP/PS1 transgenic AD mice.

Modeling acetylcholine esterase inhibition resulting from exposure to a mixture of atrazine and chlorpyrifos using a physiologically-based kinetic model in fish.

Physiological and metagenomic strategies uncover the rhizosphere bacterial microbiome succession underlying three common environmental stresses in cassava.

Current insights into the microbial degradation for butachlor: strains, metabolic pathways, and molecular mechanisms.

Genotoxicity of chloroacetamide herbicides and their metabolites *in vitro* and *in vivo*.

Ground-glass hepatocellular inclusions are associated with polypharmacy.

Identification of lncRNA expression profiles and analysis of ceRNA in the hippocampus of perinatal glyphosate-exposed mice.

Atrazine-induced cell-mediated immunotoxicity in rabbits and the ameliorating role of glycyrrhizic acid.

Effects of the emulsifiable herbicide Dicamba on amphibian tadpoles: an underestimated toxicity risk?

Influence of temperature on biomarker responses and histology of the liver of American bullfrog tadpoles (*Lithobates catesbeianus*, Shaw, 1802) exposed to the herbicide Tebuthiuron.

Intergenerational thyroid hormone homeostasis imbalance in cerebellum of rats perinatally exposed to glyphosate-based herbicide.

The hepatotoxicity of atrazine exposure in mice involves the intestinal microbiota.

Toxicity assessment at different experimental scenarios with glyphosate, chlorpyrifos and antibiotics in *Rhinella arenarum* (Anura: Bufonidae) tadpoles.

Chloroplast-derived photo-oxidative stress causes changes in H₂O₂ and EGSH in other subcellular compartments.

Micronucleus Formation Induced by Glyphosate and Glyphosate-Based Herbicides in Human Peripheral White Blood Cells.

Epigenetic Changes Associated With Exposure to Glyphosate-Based Herbicides in Mammals.

Synergistic effects of glyphosate and multiwall carbon nanotubes on *Arabidopsis thaliana* physiology and metabolism.

Compositional differences in hybrids between protoporphyrinogen IX oxidase (PPO)-inhibiting herbicide-resistant transgenic rice and weedy rice accessions.

Ubiquinone Metabolism and Transcription HIF-1 Targets Pathway Are Toxicity Signature Pathways Present in Extracellular Vesicles of Paraquat-Exposed Human Brain Microvascular Endothelial Cells.

Pesticides in a case study on no-tillage farming systems and surrounding forest patches in Brazil.

Analysis of Biomechanical Parameters of Muscle Soleus Contraction and Blood Biochemical Parameters in Rat with Chronic Glyphosate Intoxication and Therapeutic Use of C(60) Fullerene.

Carryover effect of atrazine and its metabolite from treated bovine spermatozoa to the embryo's transcriptome.

Developmental atrazine exposure in zebrafish produces the same major metabolites as mammals along with altered behavioral outcomes.

Mutation of the Cytochrome P450 CYP360A8 Gene Increases Sensitivity to Paraquat in *Daphnia magna*.

Exposure Impacts of Environmentally Relevant Concentrations of a Glufosinate Ammonium Herbicide Formulation on Larval Development and Thyroid Histology of *Xenopus laevis*.

Transcriptome analysis reveals gene responses to herbicide, tribenuron methyl, in *Brassica napus* L. during seed germination.

Multi-omics phenotyping of the gut-liver axis reveals metabolic perturbations from a low-dose pesticide mixture in rats.

Phytotoxic Secondary Metabolites from Fungi.

A simple paper-based colorimetric analytical device for rapid detection of *Enterococcus faecalis* under the stress of chlorophenols.

In vitro Interference of a Glyphosate Commercial Formulation with the Stimulation of Ovarian Maturation by Progesterone, in the Estuarine Crab *Neohelice granulata*.

Agent Orange Exposure and Dementia Diagnosis in US Veterans of the Vietnam Era.

Characterizing the protracted neurobiological and neuroanatomical effects of paraquat in a murine model of Parkinson's disease.

A novel idea for establishing Parkinson's disease mouse model by intranasal administration of paraquat.

No hints at glyphosate-induced ruminal dysbiosis in cows.

Developmental toxicity and transcriptome analysis of zebrafish (*Danio rerio*) embryos following exposure to chiral herbicide safener benoxacor.

Could Glyphosate and Glyphosate-Based Herbicides Be Associated With Increased Thyroid Diseases Worldwide?

Controversies on Endocrine and Reproductive Effects of Glyphosate and Glyphosate-Based Herbicides: A Mini-Review.

The oxidative stress caused by atrazine in root exudation of *Pennisetum americanum* (L.) K. Schum.

Investigation of in vivo unscheduled DNA synthesis in rabbit corneas following instillation of genotoxic agents.

Effects of a mixture of glyphosate, 17 β -ethynylestradiol and amyl salicylate on cellular and biochemical parameters of the mussel *Mytilus galloprovincialis*.

Transcriptomic profiling of atrazine phytotoxicity and comparative study of atrazine uptake, movement, and metabolism in *Potamogeton crispus* and *Myriophyllum spicatum*.

Effects of glyphosate-based herbicide-contaminated diets on reproductive organ toxicity and hypothalamic-pituitary-ovarian axis hormones in weaned piglets.

Developmental assays using invasive cane toads, *Rhinella marina*, reveal safety concerns of a common formulation of the rice herbicide, butachlor.

Comparison of the Effect on Fetal Growth of a Mixture of Atrazine and Nitrates in Drinking Water and of Active Tobacco Exposure during Pregnancy.

Assessment of Glyphosate Impact on the Agrofood Ecosystem.

PET nanoplastics interactions with water contaminants and their impact on human cells.

Effects of glyphosate residues and different concentrate feed proportions in dairy cow rations on hepatic gene expression, liver histology and biochemical blood parameters.

Low-dose exposure of glyphosate-based herbicides disrupt the urine metabolome and its interaction with gut microbiota.

Glycolate combats massive oxidative stress by restoring redox potential in *Caenorhabditis elegans*.

Concealed metabolic reprogramming induced by different herbicides in tomato.

A novel UDP-glycosyltransferase 91C1 confers specific herbicide resistance through detoxification reaction in *Arabidopsis*.

Protective effects of black seed (*Nigella sativa*) diet supplementation in common carp (*Cyprinus carpio*) against immune depression, oxidative stress and metabolism dysfunction induced by glyphosate.

Environmental disappearance of acetochlor and its bioavailability to weed: A general prototype for reduced herbicide application instruction.

Pentachlorophenol and ciprofloxacin present dissimilar joint toxicities with carbon nanotubes to *Bacillus subtilis*.

The use of combined high-fructose diet and glyphosate to model rats type 2 diabetes symptomatology.

Genotoxic and epigenetic effects of diuron in the Pacific oyster: in vitro evidence of interaction between DNA damage and DNA methylation.

Characterization, genome functional analysis, and detoxification of atrazine by *Arthrobacter* sp. C2.

A single gene inherited trait confers metabolic resistance to chlorsulfuron in grain sorghum (*Sorghum bicolor*).

Evaluation on reprogrammed biological processes in transgenic maize varieties using transcriptomics and metabolomics.

The effect of chronic exposure to chloridazon and its degradation product chloridazon-desphenyl on signal crayfish *Pacifastacus leniusculus*.

The agrochemical S-metolachlor disrupts molecular mediators and morphology of the swim bladder: Implications for locomotor activity in zebrafish (*Danio rerio*).

Effects of subchronic exposure to environmentally relevant concentrations of the herbicide atrazine in the Neotropical fish *Astyanax altiparanae*.

2, 4-D removal efficiency of *Salvinia natans* L. and its tolerance to oxidative stresses through glutathione metabolism under induction of light and darkness.

Common and particular biochemical responses of *Unio tumidus* to herbicide, pharmaceuticals and their combined exposure with heating.

Paraquat exposure over generation affects lifespan and reproduction through mitochondrial disruption in *C. elegans*.

Melatonin alleviates the deterioration of oocytes and hormonal disorders from mice subjected to glyphosate.

Profiling and fingerprinting strategies to assess exposure of edible plants to herbicides.

Chloro-s-triazines-toxicokinetic, Toxicodynamic, Human Exposure, and Regulatory Considerations.

Use of Shotgun Metagenomics and Metabolomics to Evaluate the Impact of Glyphosate or Roundup MON 52276 on the Gut Microbiota and Serum Metabolome of Sprague-Dawley Rats.

RNA-Seq transcriptome analysis to identify candidate genes involved in non-target site-based mesosulfuron-methyl resistance in *Beckmannia syzigachne*.

Impact of chronic exposure of rainbow trout, *Oncorhynchus mykiss*, to low doses of glyphosate or glyphosate-based herbicides.

Herbicides glyphosate and glufosinate ammonium negatively affect human sperm mitochondria respiration efficiency.

HSPB5 (β -crystallin) confers protection against paraquat-induced oxidative stress at the organismal level in a tissue-dependent manner.

Changes induced by atrazine in *Clarias gariepinus* provide insight into alterations in ovarian histoarchitecture and direct effects on oogenesis.

Agrochemicals in freshwater systems and their potential as endocrine disrupting chemicals: A South African context.

Hormesis in plants: Physiological and biochemical responses.

Effects of chronic glyphosate exposure on antioxidative status, metabolism and immune response in tilapia (*GIFT, Oreochromis niloticus*).

Life-threatening triclopyr poisoning due to diethylene glycol monoethyl ether solvent.

Short-term changes related to autotetraploidy in essential oil composition of *Eucalyptus benthamii* Maiden & Cambage and its applications in different bioassays.

Resistance to a nonselective 4-hydroxyphenylpyruvate dioxygenase-inhibiting herbicide via novel reduction-dehydration-glutathione conjugation in *Amaranthus tuberculatus*.

In vitro activities of carvacrol, cinnamaldehyde and thymol against *Candida* biofilms.

Exposure to 2,4-dichlorophenol, 2,4,6-trichlorophenol, pentachlorophenol and risk of thyroid cancer: a case-control study in China.

Reduced Acrolein Detoxification in *akr1a1a* Zebrafish Mutants Causes Impaired Insulin Receptor Signaling and Microvascular Alterations.

Protective effect of genistein pre-treatment on paraquat hepatotoxicity in rats.

The relationship between chronic arsenic exposure and body measures among US adults: National Health and Nutrition Examination Survey 2009-2016.

Monomethylated arsenic was the Major methylated arsenic in Red blood cells of acute promyelocytic leukemia patients treated with arsenic trioxide.

Psychosocial impairment following mild blast-induced traumatic brain injury in rats.

Cinnamaldehyde Improves Metabolic Functions in Streptozotocin-Induced Diabetic Mice by Regulating Gut Microbiota.

Pilot study on the urinary excretion of the glyphosate metabolite aminomethylphosphonic acid and breast cancer risk: The Multiethnic Cohort study.

Mechanistic role of antioxidants in rescuing delayed gastric emptying in high fat diet induced diabetic female mice.

Urinary total arsenic and arsenic methylation capacity in pregnancy and gestational diabetes mellitus: A case-control study.

Neuroprotective effects of pomegranate (*Punica granatum* L.) juice and seed extract in paraquat-induced mouse model of Parkinson's disease.

The Onset of Systemic Oxidative Stress Associated with the Accumulation of Lipid Peroxidation Product Acrolein in the Skin of Patients with Small-Vessel Vasculitis.

Effect of Fluorofenidone Against Paraquat-Induced Pulmonary Fibrosis Based on Metabolomics and Network Pharmacology.

Neuroprotective potential of cinnamon and its metabolites in Parkinson's disease: Mechanistic insights, limitations, and novel therapeutic opportunities.

Cinnamaldehyde mitigates placental vascular dysfunction of gestational diabetes and protects from the associated fetal hypoxia by modulating placental angiogenesis, metabolic activity and oxidative stress.

Polyamine biomarkers as indicators of human disease.

Suppression of Th17 cell differentiation via sphingosine-1-phosphate receptor 2 by cinnamaldehyde can ameliorate ulcerative colitis.

Urinary Levels of the Acrolein Conjugates of Carnosine Are Associated with Cardiovascular Disease Risk.

Cinnamaldehyde Could Reduce the Accumulation of Diarrhetic Shellfish Toxins in the Digestive Gland of the Mussel *Perna viridis* under Laboratory Conditions.

Glyphosate-induced lipid metabolism disorder contributes to hepatotoxicity in juvenile common carp.

Metabolic Pathways for S-Metolachlor Detoxification Differ Between Tolerant Corn and Multiple-Resistant Waterhemp.

Titanium dioxide-coated core-shell silica microspheres-based solid-phase extraction combined with sheathless capillary electrophoresis-mass spectrometry for analysis of glyphosate, glufosinate and their metabolites in baby foods.

Potential of *Trichoderma harzianum* and Its Metabolites to Protect Wheat Seedlings against *Fusarium culmorum* and 2,4-D.

Antibacterial and herbicidal properties of secondary metabolites from fungi.

Absorption, Distribution, Metabolism, and Excretion of a New Herbicide, Epyrifenacil, in Rats.

Adduct Formation of Acrolein with Cyanidin-3-O-glucoside and Its Degradants/Metabolites during Thermal Processing or In Vivo after Consumption of Red Bayberry.

Target site mutations and cytochrome P450s-involved metabolism confer resistance to nicosulfuron in green foxtail (*Setaria viridis*).

E-cigarette vaping liquids and the flavoring chemical cinnamaldehyde perturb bone, cartilage and vascular development in zebrafish embryos.

Transcriptome and metabolome analyses of response of *Synechocystis* sp. PCC 6803 to methyl viologen.

Metabolic and residual characteristic of different arsenic species contained in laver during mouse digestion.

Identification of adducts formed between acrolein and alanine or serine in fried potato crisps and the cytotoxicity-lowering effect of acrolein in three cell lines.

Residues and dietary intake risk assessments of clomazone, fomesafen, haloxyfop-methyl and its metabolite haloxyfop in spring soybean field ecosystem.

Interconversion and Acrolein-Trapping Capacity of Cardamonin/Alpinetin and Their Metabolites In Vitro and In Vivo.

Identification of the organic anion transporting polypeptides responsible for the hepatic uptake of the major metabolite of epyrifenacil, S-3100-CA, in mice.

The hidden effects of agrochemicals on plant metabolism and root-associated microorganisms.

Antifungal activity of glyphosate against fungal blast disease on glyphosate-tolerant OsmEPSPS transgenic rice.

Simultaneous determination of triazine herbicides and their metabolites in shellfish by HPLC-MS/MS combined with Q/E-Orbitrap HRMS.

Epigenome-wide association study for glyphosate induced transgenerational sperm DNA methylation and histone retention epigenetic biomarkers for disease.

Inhibition of amyloid formation of amyloid \tilde{I}^2 (1-42), amylin and insulin by 1,5-diazacyclooctanes, a spermine-acrolein conjugate.

Accelerated atrazine degradation and altered metabolic pathways in goat manure assisted soil bioremediation.

Effective and rugged analysis of glyphosate, glufosinate, and metabolites in *Tenebrio molitor* larva (mealworms) using liquid chromatography tandem mass spectrometry.

Acrolein but not its metabolite, 3-Hydroxypropylmercapturic acid (3HPMA), activates vascular transient receptor potential Ankyrin-1 (TRPA1): Physiological to toxicological implications.

Bioconcentration and Metabolism of the New Herbicide Methiozolin in Ricefish (*Oryzias latipes*).

Study of muscle fibers of the extensor digitorum longus and soleus muscles of C57BL/6 females exposed to glyphosate during pregnancy and lactation.

Two Auxinic Herbicides Affect *Brassica napus* Plant Hormone Levels and Induce Molecular Changes in Transcription.

A simple method for the determination of glyphosate, glufosinate and their metabolites in biological specimen by liquid chromatography/tandem mass spectrometry: an application for forensic toxicology.

Leaf metabolic influence of glyphosate and nanotubes on the *Arabidopsis thaliana* phyllosphere.

Establishment of a HPLC-MS/MS Detection Method for Glyphosate, Glufosinate-Ammonium, and Aminomethyl Phosphoric Acid in Tea and Its Use for Risk Exposure Assessment.

One-step purification/extraction method to access glyphosate, glufosinate, and their metabolites in natural waters.

The Herbicide Atrazine Potentiates Angiotensin II-Induced Aldosterone Synthesis and Release From Adrenal Cells.

Cytotoxicity and effects of curcumin and cinnamaldehyde hybrids on biofilms of oral pathogens.

Maternal urinary levels of glyphosate during pregnancy and anogenital distance in newborns in a US multicenter pregnancy cohort.

Different leaf-mediated deposition, absorbed and metabolism behaviors of 2,4-D isooctyl ester between *Triticum aestivum* and *Aegilops tauschii* Coss.

Metribuzin-induced non-adverse liver changes result in rodent-specific non-adverse thyroid effects via uridine 5'-diphospho-glucuronosyltransferase (UDPGT, UGT) modulation.

Selective β -Mono-Glycosylation of a C15-Hydroxylated Metabolite of the Agricultural Herbicide Cinmethylin Using Leloir Glycosyltransferases.

The TRPA1 Agonist Cinnamaldehyde Induces the Secretion of HCO₃⁻ by the Porcine Colon.

Metabolomic analysis of *Schoenoplectus juncooides* reveals common markers of acetolactate synthase inhibition among paddy weeds.

Origins, fate, and actions of methylated trivalent metabolites of inorganic arsenic: progress and prospects.

Exposure to volatile organic compounds - acrolein, 1,3-butadiene, and crotonaldehyde - is associated with vascular dysfunction.

Enhanced metabolism confers a high level of cyhalofop-butyl resistance in a Chinese sprangletop (*Leptochloa chinensis* (L.) Nees) population.

Regulation of secondary metabolite biosynthesis in *Monascus purpureus* via cofactor metabolic engineering strategies.

Arsenic Exposure, Arsenic Metabolism, and Glycemia: Results from a Clinical Population in New York City.

Rare, Protein-Altering Variants in AS3MT and Arsenic Metabolism Efficiency: A Multi-Population Association Study.

Dietary intake and urinary excretion of methylated arsenicals of Japanese adults consuming marine foods and rice.

Coexisting antibiotic changes the persistence and metabolic profile of atrazine in the environment.

Enhanced metabolism and target gene overexpression confer resistance against acetolactate synthase-inhibiting herbicides in *Bromus sterilis*.

Influence of Cd on atrazine degradation and the formation of three primary metabolites in water under the combined pollution.

Investigating the Mechanism of Metabolic Resistance to Tribenuron-Methyl in *Capsella bursa-pastoris* (L.) Medik. by Full-Length Transcriptome Assembly Combined with RNA-Seq.

The Effect of Glyphosate on the Reproduction of Estuarine Crabs: *Neohelice granulata* as a Study Model.

Whole-genome sequencing, genome mining, metabolic reconstruction and evolution of pentachlorophenol and other xenobiotic degradation pathways in *Bacillus tropicus* strain AOA-CPS1.

Determination of glyphosate, glufosinate and their major metabolites in urine by the UPLC-MS/MS method applicable to biomonitoring and epidemiological studies.

Cytochrome P450 metabolism-based herbicide resistance to imazamox and 2,4-D in *Papaver rhoeas*.

Comprehensive analyses of degradative enzymes associated with mesotrione-degraded process in rice for declining environmental risks.

LC-MS untargeted metabolomics assesses the delayed response of glufosinate treatment of transgenic glufosinate resistant (GR) buffalo grasses (*Stenotaphrum secundatum* L.).

Aquaculture-derived distribution, partitioning, migration, and transformation of atrazine and its metabolites in seawater, sediment, and organisms from a typical semi-closed mariculture bay.

Secondary Metabolites, Ferulic Acid and p-Hydroxybenzoic Acid Induced Toxic Effects on Photosynthetic Process in *Rumex acetosa* L.

Simultaneous determination of the herbicide bixlozone and its metabolites in plant and animal samples by liquid chromatography-tandem mass spectrometry.

Concentrations of selected arsenic species in urine across various stages of renal function including hyperfiltration.

Effects of simazine and food deprivation chronic stress on energy allocation among the costly physiological processes of male lizards (*Eremias argus*).

Micropropagation and Secondary Metabolites Content of White-Purple Varieties of *Orthosiphon aristatus* Blume Miq.

Indaziflam sorption-desorption and its three metabolites from biochars- and their raw feedstock-amended agricultural soils using radiometric technique.

Understanding the origins of herbicides metabolites in an agricultural watershed through their spatial and seasonal variations.

Ecological risk assessment of current-use pesticides and biocides in soils, sediments and surface water of a mixed land-use basin of the Pampas region, Argentina.

The problem with implementing fish farms in agricultural regions: A trial in a pampean pond highlights potential risks to both human and fish health.

The challenge of detecting the herbicide glyphosate and its metabolite AMPA in seawater - Method development and application in the Baltic Sea.

Cytochrome P450 CYP81A10v7 in *Lolium rigidum* confers metabolic resistance to herbicides across at least five modes of action.

Melanophryniscus admirabilis tadpoles' responses to sulfentrazone and glyphosate-based herbicides: an approach on metabolism and antioxidant defenses.

Cytochrome P450-mediated herbicide metabolism in plants: current understanding and prospects.

Effects of Different Intensity Exercise on Glucose Metabolism and Hepatic IRS/PI3K/AKT Pathway in SD Rats Exposed with TCDD.

Low-dose PCB126 exposure disrupts cardiac metabolism and causes hypertrophy and fibrosis in mice.

Chemical constituents and medicinal properties of *Allium* species.

Platelet autophagic machinery involved in thrombosis through a novel linkage of AMPK-MTOR to sphingolipid metabolism.

Evaluating Glycemic Control During Basalin or Lantus Administration in Adults With Controlled Type 2 Diabetes Mellitus Using Continuous Glucose Monitoring.

Metabolomic Profiling of Poor Ovarian Response Identifies Potential Predictive Biomarkers.

Carbohydrate Sulfation As a Mechanism for Fine-Tuning Siglec Ligands.

Aryl Hydrocarbon Receptor (AhR) Activation by 2,3,7,8-Tetrachlorodibenzo-p-Dioxin (TCDD) Dose-Dependently Shifts the Gut Microbiome Consistent with the Progression of Non-Alcoholic Fatty Liver Disease.

Gut Microbiota and Their Derived Metabolites, a Search for Potential Targets to Limit Accumulation of Protein-Bound Uremic Toxins in Chronic Kidney Disease.

Role of AHR Ligands in Skin Homeostasis and Cutaneous Inflammation.

Neurons die with heightened but functional macro- and chaperone mediated autophagy upon increased amyloid- β induced toxicity with region-specific protection in prolonged intermittent fasting.

The Role of Iron and Zinc in the Treatment of ADHD among Children and Adolescents: A Systematic Review of Randomized Clinical Trials.

Polychlorinated environmental toxicants affect sphingolipid metabolism during neurogenesis in vitro.

Aryl hydrocarbon receptor (AHR) functions in infectious and sterile inflammation and NAD(+)-dependent metabolic adaptation.

Impaired Tubular Secretion of Organic Solutes in Advanced Chronic Kidney Disease.

Untargeted serum metabolomics and potential biomarkers for Sjögren's syndrome.

Joint effect of urinary arsenic species and serum one-carbon metabolism nutrients on gestational diabetes mellitus: A cross-sectional study of Chinese pregnant women.

Respiratory characteristics of the tammar wallaby pouch young and functional limitations in a newborn with skin gas exchange.

Computational studies on bacterial secondary metabolites against breast cancer.

The protective effect of *Xanthoceras sorbifolia* Bunge husks on cognitive disorder based on metabolomics and gut microbiota analysis.

An Overview: The Toxicity of *Ageratina adenophora* on Animals and Its Possible Interventions.

AMP deamination is sufficient to replicate an atrophy-like metabolic phenotype in skeletal muscle.

Metabolomics profiling for identification of potential biomarkers in chickens infected with avian leukosis virus subgroup J (ALV-J).

The protein-bound uremic toxin p-cresyl-sulfate promotes intracellular ROS production and lipid peroxidation in 3T3-L1 adipose cells.

Lipid metabolism disorders associated with dioxin exposure in a cohort of Chinese male workers revealed by a comprehensive lipidomics study.

The consequences of altered microbiota in immune-related chronic kidney disease.

Transcriptome-based analysis of blood samples reveals elevation of DNA damage response, neutrophil degranulation, cancer and neurodegenerative pathways in *Plasmodium falciparum* patients.

Evaluation of arsenic species in leukocytes and granulocytes of acute promyelocytic leukemia patients treated with arsenic trioxide.

Metabolite Profiling of Rosemary Cell Lines with Antiproliferative Potential against Human HT-29 Colon Cancer Cells.

The Aryl hydrocarbon receptor mediates reproductive toxicity of polychlorinated biphenyl congener 126 in rats.

Effects of the prenatal environment on cryptorchidism: A narrative review.

Efficient flavinylation of glycosomal fumarate reductase by its own ApbE domain in *Trypanosoma brucei*.

Citrullinated and homocitrullinated low-density lipoprotein in rheumatoid arthritis.

A case of iron deficiency anemia with extremely hyperferritinemia responds well to oral iron: the first identified hereditary hyperferritinemia cataract syndrome in China.

Maternal 3,3-Dimethyl-1-Butanol Therapy Protects Adult Male Rat Offspring against Hypertension Programmed by Perinatal TCDD Exposure.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin (TCDD)-Inducible Poly-ADP-Ribose Polymerase (TIPARP/PARP7) Catalytic Mutant Mice (TiparpH532A) Exhibit Increased Sensitivity to TCDD-Induced Hepatotoxicity and Lethality.

Fenofibrate, a peroxisome proliferator-activated receptor- α agonist, blocks steatosis and alters the inflammatory response in a mouse model of inflammation-dioxin interaction.

Dietary Selenium Deficiency Partially Mimics the Metabolic Effects of Arsenic.

Metabolic signatures in the conversion from gestational diabetes mellitus to postpartum abnormal glucose metabolism: a pilot study in Asian women.

Perspective on prenatal polychlorinated biphenyl exposure and the development of the progeny nervous system (Review).

A molecular signature for the metabolic syndrome by urine metabolomics.

Untargeted metabolomics and transcriptomics identified glutathione metabolism disturbance and PCS and TMAO as potential biomarkers for ER stress in lung.

Circulating p-Cresyl Sulfate, Non-Hepatic Alkaline Phosphatase and Risk of Bone Fracture Events in Chronic Kidney Disease-Mineral Bone Disease.

The microbial metabolite p-Cresol induces autistic-like behaviors in mice by remodeling the gut microbiota.

Surface-Enhanced Raman Spectroscopy of Bacterial Metabolites for Bacterial Growth Monitoring and Diagnosis of Viral Infection.

Oxidative stress inducers potentiate 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated pre-cardiac edema in larval zebrafish.

Intravenous iron is non-inferior to oral iron regarding cell growth and iron metabolism in colorectal cancer associated with iron-deficiency anaemia.

Skeletal myopathy in CKD: a comparison of adenine-induced nephropathy and 5/6 nephrectomy models in mice.

A novel imidazolinone metformin-methylglyoxal metabolite promotes endothelial cell angiogenesis via the eNOS/HIF-1 α pathway.

Effects of 2,4-dichlorophenol exposure on zebrafish: Implications for the sex hormone synthesis.

Iron overload during the embryonic period develops hyperactive like behavior and dysregulation of biogenic amines in *Drosophila melanogaster*.

Chloracne: a case series on cutaneous expression of CYP1A1 as diagnostic biomarker.

Gallic acid ameliorates sodium arsenite-induced renal and hepatic toxicity in rats.

Effect of Polyploidy Induction on Natural Metabolite Production in Medicinal Plants.

Unconjugated p-cresol activates macrophage macropinocytosis leading to increased LDL uptake.

Association between pesticide exposure and obesity: A cross-sectional study of 20,295 farmers in Thailand.

Urinary Volatilomics Unveils a Candidate Biomarker Panel for Noninvasive Detection of Clear Cell Renal Cell Carcinoma.

Gene expression profile analysis and target gene discovery of *Mycobacterium tuberculosis* biofilm.

Regulated hypothermia in response to endotoxin in birds.

Beverages containing *Lactobacillus paracasei* LC-37 improved functional dyspepsia through regulation of the intestinal microbiota and their metabolites.

Prolonged Low-Dose Dioxin Exposure Impairs Metabolic Adaptability to High-Fat Diet Feeding in Female but Not Male Mice.

Inulin supplementation ameliorates hyperuricemia and modulates gut microbiota in Uox-knockout mice.

Thidiazuron suppresses breast cancer via targeting miR-132 and dysregulation of the PI3K-Akt signaling pathway mediated by the miR-202-5p-PTEN axis.

Biochemistry of Terpenes and Recent Advances in Plant Protection.

[Risk factors associated with acute kidney injury caused by pesticide poisoning].

TP53INP1 exerts neuroprotection under ageing and Parkinson's disease-related stress condition.

Identification and prioritization of the potent components for combined exposure of multiple persistent organic pollutants associated with gestational diabetes mellitus.

Exposure to non-persistent pesticides and puberty timing: a systematic review of the epidemiological evidence.

Role of Endocrine-Disrupting Chemicals in the Pathogenesis of Non-Alcoholic Fatty Liver Disease: A Comprehensive Review.

Hard as Iron: A Case of Delayed Presentation of Severe Iron Toxicity With Diagnostic and Treatment Dilemmas.

Pathology of salivary gland dysfunction and restoration of function.

Associations among total p-cresylsulfate, indoxyl sulfate and hippuric acid levels with hemodialysis quality indicators in maintenance hemodialysis patients.

Non-targeted metabolomics analyses by mass spectrometry to explore metabolic stress after six training weeks in high level swimmers.

Postnatal Iron Supplementation with Ferrous Sulfate vs. Ferrous Bis-Glycinate Chelate: Effects on Iron Metabolism, Growth, and Central Nervous System Development in Sprague Dawley Rat Pups.

Dietary Strategies for Management of Metabolic Syndrome: Role of Gut Microbiota Metabolites.

Circulating short and medium chain fatty acids are associated with normoalbuminuria in type 1 diabetes of long duration.

High Serum-Induced AhRL Is Associated with Prevalent Metabolic Syndrome and Future Impairment of Glucose Tolerance in the Elderly.

Attenuation of growth hormone production at the fetal stage is critical for dioxin-induced developmental disorder in rat offspring.

2,4-Dinitrophenol overdose - Everything old is new again.

Role of aryl hydrocarbon receptor (AHR) in overall retinoid metabolism: Response comparisons to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure between wild-type and AHR knockout mice.

Pre- and post-diagnostic blood profiles of chlorinated persistent organic pollutants and metabolic markers in type 2 diabetes mellitus cases and controls; a pilot study.

Regulation of Mitochondrial Function by Epac2 Contributes to Acute Inflammatory Hyperalgesia.

Influences of Selenium-Enriched Yeast on Growth Performance, Immune Function, and Antioxidant Capacity in Weaned Pigs Exposure to Oxidative Stress.

Environmental exposures to endocrine disrupting chemicals (EDCs) and their role in endometriosis: a systematic literature review.

Thrombolome and Its Emerging Role in Chronic Kidney Diseases.

Microbial metabolism of L-tyrosine protects against allergic airway inflammation.

Assessment of fibrotic pathways induced by environmental chemicals using 3D-human liver microtissue model.

Insulin, Not the Preservative m-cresol, Instigates Loss of Infusion Site Patency Over Extended Durations of CSII in Diabetic Swine.

Cenobamate: Neuroprotective Potential of a New Antiepileptic Drug.

The Role of Gut Bacterial Metabolites in Brain Development, Aging and Disease.

Pharmacological inhibition of catalase induces peroxisome leakage and suppression of LPS induced inflammatory response in Raw 264.7 cell.

Carbon nitride nanoparticles as ultrasensitive fluorescent probes for the detection of β -glucosidase activity and inhibitor screening.

Proportionate mortality study of unionized maintenance of way railroad workers.

A Positive Relationship between Exposure to Heavy Metals and Development of Chronic Diseases: A Case Study from Chile.

Predicting changes in renal metabolism after compound exposure with a genome-scale metabolic model.

Potent aneugenicity of 1-methylpyrene in human cells dependent on metabolic activation by endogenous enzymes.

Platinum and zinc oxide modified carbon nitride electrode as non-enzymatic highly selective and reusable electrochemical diabetic sensor in human blood.

Adverse effects of iron deficiency anemia on pregnancy outcome and offspring development and intervention of three iron supplements.

Aryl Hydrocarbon Receptor and Dioxin-Related Health Hazards-Lessons from Yusho.

An enriched biosignature of gut microbiota-dependent metabolites characterizes maternal plasma in a mouse model of fetal alcohol spectrum disorder.

Cardiovascular risk factors associated with coronary ectasia and acute myocardial infarction.

Elucidation of the species differences of epyrifenacil-induced hepatotoxicity between mice and humans by mass spectrometry imaging analysis in chimeric mice with humanized liver.

Protein-Bound Uremic Toxins and Immunity.

Reno-Hepatoprotective and Antidiabetic Properties of Methanol Leaf Extract of *Laportea Aestuans* in Wistar Rats.

Why is the Incidence of Type 1 Diabetes Increasing?

Amniotic fluid metabolic fingerprinting indicated metabolites which may play a role in the pathogenesis of foetal Down syndrome - a preliminary report.

Arsenic metabolism differs between child and adult patients during acute arsenic poisoning.

Forensic taphonomy: Characterization of the gravesoil chemistry using a multivariate approach combining chemical and volatile analyses.

Pesticide exposure and incident thyroid cancer among male pesticide applicators in agricultural health study.

Prenatal exposure to glycol ethers and visual contrast sensitivity in 6-year-old children in the PELAGIE mother-child cohort.

Hypusination of Eif5a regulates cytoplasmic TDP-43 aggregation and accumulation in a stress-induced cellular model.

Association of urinary chlorophenols with central obesity in Korean girls.

Single-Nuclei RNA Sequencing Assessment of the Hepatic Effects of 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Exposure to pollutants altered glucocorticoid signaling and clock gene expression in female mice. Evidence of tissue- and sex-specificity.

Phytotoxic metabolites produced by Diaporthe eres involved in cane blight of grapevine in Italy.

Co-metabolic biodegradation of 4-chlorophenol by photosynthetic bacteria.

Differences in exposure to toxic and/or carcinogenic volatile organic compounds between Black and White cigarette smokers.

An update of the Worldwide Integrated Assessment (WIA) on systemic insecticides. Part 1: new molecules, metabolism, fate, and transport.

Co-exposure to nTiO₂ impairs arsenic metabolism and affects antioxidant capacity in the marine shrimp *Litopenaeus vannamei*.

Sex-specific Associations Between Type 2 Diabetes Incidence and Exposure to Dioxin and Dioxin-like Pollutants: A Meta-analysis.

A Glyphosate-Based Herbicide in Soil Differentially Affects Hormonal Homeostasis and Performance of Non-target Crop Plants.

Vegan Diet Is Associated With Favorable Effects on the Metabolic Performance of Intestinal Microbiota: A Cross-Sectional Multi-Omics Study.

Evidence-Based Challenges to the Continued Recommendation and Use of Peroxidatively-Susceptible Polyunsaturated Fatty Acid-Rich Culinary Oils for High-Temperature Frying Practises: Experimental Revelations Focused on Toxic Aldehydic Lipid Oxidation Products.

Associations Between Residential Exposure to Volatile Organic Compounds and Liver Injury Markers.

Forming 4-Methylcatechol as the Dominant Bioavailable Metabolite of Intraruminal Rutin Inhibits p-Cresol Production in Dairy Cows.

Profiling of co-metabolic degradation of tetracycline by the bio-cathode in microbial fuel cells.

Somatic Embryo Yield and Quality From Norway Spruce Embryogenic Tissue Proliferated in Suspension Culture.

Overexpression of CERKL Protects Retinal Pigment Epithelium Mitochondria from Oxidative Stress Effects.

Yeast β -Glucan Altered Intestinal Microbiome and Metabolome in Older Hens.

Dietary supplements consumption and its association with socioeconomic factors, obesity and main non-communicable chronic diseases in the north of Iran: the PERSIAN Guilan Cohort Study (PGCS).

Protracted Impairment of Maternal Metabolic Health in Mouse Dams Following Pregnancy Exposure to a Mixture of Low Dose Endocrine-Disrupting Chemicals, a Pilot Study.

Proteomics and metabolic phenotyping define principal roles for the aryl hydrocarbon receptor in mouse liver.

The Improvement of the Adaptation Process of Tocopherol and Acetylsalicylic Acid in Offspring of Mothers Exposed to TCDD.

Miniaturized multiresidue method for determination of 267 pesticides, their metabolites and polychlorinated biphenyls in low mass bee bread samples by liquid and gas chromatography coupled with tandem mass spectrometry.

In vitro metabolism of tebuconazole, flurtamone, fenhexamid, metalaxyl-M and spirotolifen in *Cannabis sativa* L. (hemp) callus cultures.

Protective Effect of Dictyophora Polysaccharides on Sodium Arsenite-Induced Hepatotoxicity: A Proteomics Study.

Chronic Dietary Exposure of Roosters to a Glyphosate-Based Herbicide Increases Seminal Plasma Glyphosate and AMPA Concentrations, Alters Sperm Parameters, and Induces Metabolic Disorders in the Progeny.

Comparative hepatotoxicity of a herbicide, epyrifenacil, in humans and rodents by comparing the dynamics and kinetics of its causal metabolite.

Formation of Cytoplasmic Actin-Cofilin Rods is Triggered by Metabolic Stress and Changes in Cellular pH.

Urinary metabolites of multiple volatile organic compounds among general population in Wuhan, central China: Inter-day reproducibility, seasonal difference, and their associations with oxidative stress biomarkers.

A novel dominant selection system for plant transgenics based on phosphite metabolism catalyzed by bacterial alkaline phosphatase.

Stepwise increase of thaxtomins production in *Streptomyces albidoflavus* J1074 through combinatorial metabolic engineering.

A mixture of 15 phthalates and pesticides below individual chemical no observed adverse effect levels (NOAELs) produces reproductive tract malformations in the male rat.

Effects of Acute 2,3,7,8-Tetrachlorodibenzo-p-Dioxin Exposure on the Circulating and Cecal Metabolome Profile.

Arnica montana Cell Culture Establishment, and Assessment of Its Cytotoxic, Antibacterial, α -Amylase Inhibitor, and Antioxidant In Vitro Bioactivities.

BiG-MAP: an Automated Pipeline To Profile Metabolic Gene Cluster Abundance and Expression in Microbiomes.

The Role of Bacterial-Derived Aromatic Amino Acids Metabolites Relevant in Autism Spectrum Disorders: A Comprehensive Review.

Residues of Reduced Herbicides Terbutylazine, Ametryn, and Atrazine and Toxicology to Maize and the Environment through Salicylic Acid.

Earthworms accelerated the degradation of the highly toxic acetochlor S-enantiomer by stimulating soil microbiota in repeatedly treated soils.

Catalytic promiscuity of rice 2-oxoglutarate/Fe(II)-dependent dioxygenases supports xenobiotic metabolism.

REPRODUCTIVE TOXICOLOGY: Impact of endocrine disruptors on neurons expressing GnRH or kisspeptin and pituitary gonadotropins.

Transcriptomic evaluation on methyl bromide-induced phytotoxicity in *Arabidopsis thaliana* and its mode of phytotoxic action via the occurrence of reactive oxygen species and uneven distribution of auxin hormones.

The correlation between the level of 3-hydroxypropyl mercapturic acid, CYP2B6 polymorphisms, and hematuria occurrences after cyclophosphamide administration and its bioanalytical methods: A systematic review.

Low-Dose Cyclophosphamide Induces Nerve Injury and Functional Overactivity in the Urinary Bladder of Rats.

Metabolic programming of *Rhododendron chrysanthum* leaves following exposure to UVB irradiation.

Absence of prostacyclin greatly relieves cyclophosphamide-induced cystitis and bladder pain in mice.

Bone toxicity induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and the retinoid system: A causality analysis anchored in osteoblast gene expression and mouse data.

Exposure impacts of Imazapyr formulation on larval development and thyroid histology of *Xenopus laevis*.

ABA signalling promotes cell totipotency in the shoot apex of germinating embryos.

In-vessel composting of HMX and RDX contaminated sludge using microbes isolated from contaminated site.

The use of biomarkers associated with leaky gut as a diagnostic tool for early intervention in autism spectrum disorder: a systematic review.

Bioherbicidal Activity and Metabolic Profiling of Potent Allelopathic Plant Fractions Against Major Weeds of Wheat-Way Forward to Lower the Risk of Synthetic Herbicides.

Cimicifuga racemosa Extract Ze 450 Re-Balances Energy Metabolism and Promotes Longevity.

Impacts of Decaying Aromatic Plants on the Soil Microbial Community and on Tomato Seedling Growth and Metabolism: Suppression or Stimulation?

ROCK1 Mediates Retinal Glial Cell Migration Promoted by Acrolein.

Simultaneous Enantiomeric Separation of Carfentrazone-Ethyl Herbicide and Its Hydrolysis Metabolite Carfentrazone by Cyclodextrin Electrokinetic Chromatography. Analysis of Agrochemical Products and a Degradation Study.

[Toxic effects of sublethal acetochlor with sublethal doses on earthworms in soil using multi-endpoints system].

GDNF requires HIF-1 α and RET activation for suppression of programmed cell death of enteric neurons by metabolic challenge.

Xenopus laevis tadpoles exposed to metamifop: Changes in growth, behavioral endpoints, neurotransmitters, antioxidant system and thyroid development.

Effect of Dietary Inulin Supplementation on the Gut Microbiota Composition and Derived Metabolites of Individuals Undergoing Hemodialysis: A Pilot Study.

Acclimation to cold stress reduces injury from low temperature and bispyribac-sodium on rice.

3-Hydroxypropionic acid contributes to the antibacterial activity of glycerol metabolism by the food microbe *Limosilactobacillus reuteri*.

Endocrine disrupting chemicals and bone.

Mechanisms of Neurotoxicity Associated with Exposure to the Herbicide Atrazine.

Impact of broad-spectrum pesticides used in the agricultural and forestry sector on the pesticide profile in wild boar, roe deer and deer and risk assessment for venison consumers.

Cutaneous Effects of In Utero and Lactational Exposure of C57BL/6J Mice to 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Growth, secondary metabolite production, and in vitro antiplasmodial activity of *Sonchus arvensis* L. callus under dolomite [CaMg(CO₃)₂] treatment.

The flavin monooxygenase Bs3 triggers cell death in plants, impairs growth in yeast and produces H₂O₂ in vitro.

Intakes of Fish and Long-chain n-3 Polyunsaturated Fatty Acid Supplements During Pregnancy and Subsequent Risk of Type 2 Diabetes in a Large Prospective Cohort Study of Norwegian Women.

Impact of Estrogen Withdrawal and Replacement in Female Mice along the Intestinal Tract. Comparison of E2 Replacement with the Effect of a Mixture of Low Dose Pollutants.

Characterization of human sulfotransferases catalyzing the formation of p-cresol sulfate and identification of mefenamic acid as a potent metabolism inhibitor and potential therapeutic agent for detoxification.

Insight into metabolism pathways of pesticide fomesafen in rice: Reducing cropping and environmental risks.

Predictive Biomarkers of Intensive Care Unit and Mechanical Ventilation Duration in Critically-Ill Coronavirus Disease 2019 Patients.

Effects of sublethal concentration of metamifop on hepatic lipid metabolism in adult zebrafish (*Danio rerio*).

Induction of *Catharanthus roseus* Secondary Metabolites When *Calotropis procera* Was Used as Bio-Stimulant.

Microbial Diversity and Metabolite Profile of Fermenting Millet in the Production of Hausa koko, a Ghanaian Fermented Cereal Porridge.

Mechanistic Investigation of Xuebijing for Treatment of Paraquat-Induced Pulmonary Fibrosis by Metabolomics and Network Pharmacology.

Thioesterase induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin results in a futile cycle that inhibits hepatic β -oxidation.

Potential secondary metabolite from Indonesian Actinobacteria (InaCC A758) against *Mycobacterium tuberculosis*.

Bioassays to screen the toxicity in drinking water samples collected in Brazilian rural area.

Unraveling the metabolic network of organic acids in solid-state fermentation of Chinese cereal vinegar.

Comparison of the *in vitro* assays to investigate the hepatic metabolism of seven pesticides in *Cyprinus carpio* and *Oncorhynchus mykiss*.

Fine particulate matter air pollution and aortic perivascular adipose tissue: Oxidative stress, leptin, and vascular dysfunction.

Arc1 and the microbiota together modulate growth and metabolic traits in *Drosophila*.

Age and sex modify cellular proliferation responses to oxidative stress and glucocorticoid challenges in baboon cells.

Personal exposure assessment of pesticides in residents: The association between hand wipes and urinary biomarkers.

Characterisation of (anti-)progestogenic and (anti-)androgenic activities in surface and wastewater using high resolution effectdirected analysis.

Arsenic-induced uterine apoptotic damage is protected by ethyl acetate fraction of *Camellia sinensis* (green tea) via Bcl-2-BAX through NF- κ B regulations in Wistar rats.

Methylene blue can act as an antidote to pesticide poisoning of bumble bee mitochondria.

Independent and combined associations of urinary heavy metals exposure and serum sex hormones among adults in NHANES 2013-2016.

Metabolic process and spatial partition dynamics of Atrazine in an estuary-to-bay system, Jiaozhou bay.

Resveratrol Attenuates Diquat-Induced Oxidative Stress by Regulating Gut Microbiota and Metabolome Characteristics in Piglets.

Conserved Metabolic and Evolutionary Themes in Microbial Degradation of Carbamate Pesticides.

Determination of Pendimethalin Dynamic Residual Distribution in Crucian Carp Tissues and Associated Risk Assessment.

Metabolic profile of main organic acids and its regulatory mechanism in solid-state fermentation of Chinese cereal vinegar.

Predicting consequences of POP-induced disruption of blubber glucose uptake, mass gain rate and thyroid hormone levels for weaning mass in grey seal pups.

Hair versus urine for the biomonitoring of pesticide exposure: Results from a pilot cohort study on pregnant women.

TCDD induced lipid accumulation by impairment of autophagic flux in THP-1 macrophages.

Advancing continuous subcutaneous insulin infusion in vivo: New insights into tissue challenges.

Protective and therapeutic effect of hydrogen sulfide on hemorrhagic cystitis and testis dysfunction induced with cyclophosphamide.

Pesticide-induced multigenerational effects on amphibian reproduction and metabolism.

Herbicides Tolerance in a Pseudomonas Strain Is Associated With Metabolic Plasticity of Antioxidative Enzymes Regardless of Selection.

In Vitro Selection of Probiotics, Prebiotics, and Antioxidants to Develop an Innovative Synbiotic (NatuREN G) and Testing Its Effect in Reducing Uremic Toxins in Fecal Batches from CKD Patients.

Effects of p-Cresol on Oxidative Stress, Glutathione Depletion, and Necrosis in HepaRG Cells: Comparisons to Other Uremic Toxins and the Role of p-Cresol Glucuronide Formation.

Assessment of the in vivo genotoxicity of pendimethalin via mitochondrial bioenergetics and transcriptional profiles during embryogenesis in zebrafish: Implication of electron transport chain activity and developmental defects.

Impacts of type II toxin-antitoxin systems on cell physiology and environmental behavior in acetic acid bacteria.

Endocrine, metabolic and apical effects of in utero and lactational exposure to non-dioxin-like 2,2',3,4,4',5,5'-heptachlorobiphenyl (PCB 180): A postnatal follow-up study in rats.

Mitochondrial activities play a pivotal role in regulating cell cycle in response to doxorubicin.

Pharmacokinetics of 2-phenoxyethanol and its major metabolite, phenoxyacetic acid, after dermal and inhaled routes of exposure: application to development PBPK model in rats.

Antibiotic exposure decreases soil arsenic oral bioavailability in mice by disrupting ileal microbiota and metabolic profile.

Phytotoxic property of metabolites isolated from *Garcinia gardneriana*.

Xanthohumol prolongs lifespan and decreases stress-induced mortality in *Drosophila melanogaster*.

Changes induced by chronic exposure to high arsenic concentrations in the intestine and its microenvironment.

Genetics-Based Approach to Identify Novel Genes Regulated by the Aryl Hydrocarbon Receptor in Mouse Liver.

Multiple persistent organic pollutants in mothers' breastmilk: Implications for infant dietary exposure and maternal thyroid hormone homeostasis in Uganda, East Africa.

Ablation of Selenbp1 Alters Lipid Metabolism via the Ppar β Pathway in Mouse Kidney.

Role of Fucoïdan on the Growth Behavior and Blood Metabolites and Toxic Effects of Atrazine in Nile Tilapia *Oreochromis niloticus* (Linnaeus, 1758).

Assessing Vesicular Monoamine Transport and Toxicity Using Fluorescent False Neurotransmitters.

Hormones induce the metabolic growth and cytotoxin production of *Microcystis aeruginosa* under terpinolene stress.

Glyphosate, aminomethylphosphonic acid, and glufosinate ammonium in agricultural groundwater and surface water in China from 2017 to 2018: Occurrence, main drivers, and environmental risk assessment.

Hidroxiacetone Counteracts Cyclophosphamide-Induced Male Infertility through NRF2 Pathways in a Mouse Model.

Side Effects of Pesticides and Metabolites in Groundwater: Impact on Denitrification.

Functional regulation of an outer retina hyporeflexive band on optical coherence tomography images.

Comparative Evaluation of Microbiota Dynamics and Metabolites Correlation Between Spontaneous and Inoculated Fermentations of Nanfeng Tangerine Wine.

Predicted Metabolic Function of the Gut Microbiota of *Drosophila melanogaster*.

Disruption of the Diurnal Cortisol Hormone Pattern by Pesticide Use in a Longitudinal Study of Farmers in Thailand.

Removal of the fishy malodor from *Bangia fusco-purpurea* via fermentation of *Saccharomyces cerevisiae*, *Acetobacter pasteurianus*, and *Lactobacillus plantarum*.

Simultaneous determination and dietary risk assessment of clethodim and its metabolites in different fruits and vegetables.

2,3,7,8-Tetrachlorodibenzo-p-dioxin exposure disrupts development of the visceral and ocular vasculature.

Urinary arsenic species and methylation efficiency during pregnancy: Concentrations and associated factors in Spanish pregnant women.

Metabolic network of ammonium in cereal vinegar solid-state fermentation and its response to acid stress.

An Antifungal Polycyclic Tetramate Macrolactam, Heat-Stable Antifungal Factor (HSAF), Is a Novel Oxidative Stress Modulator in *Lysobacter enzymogenes*.

Comparison of Pancreatic Damage in Rats for Two Methods of Paraquat Administration.

Combined toxic effects of dioxin-like PCB77 with Fe-based nanoparticles in earthworm *Eisenia fetida*.

Structure-Activity Relationship Investigation on Reaction Mechanism between Chlorinated Quinoid Carcinogens and Clinically-Used Aldoxime Nerve-Agent Antidote under Physiological Condition.

Uremic Toxins in Organ Crosstalk.

The effect of *Ulva lactuca* and *Sargassum hemiphyllum* var. *chinense* on arsenic metabolites and enzymes in broilers.

Strategies for Enhancing in vitro Degradation of Linuron by *Variovorax* sp. Strain SRS 16 Under the Guidance of Metabolic Modeling.

Chronic pesticide exposure elicits a subtle carry-over effect on the metabolome of *Aurelia coerulea* ephyrae.

Flexibility of equine bioenergetics and muscle plasticity in response to different types of training: An integrative approach, questioning existing paradigms.

Mentha pulegium L.: A Plant Underestimated for Its Toxicity to Be Recovered from the Perspective of the Circular Economy.

Ethanol extract of *Vitellaria paradoxa* (Gaertn, F) leaves protects against sodium arsenite - induced toxicity in male wistar rats.

Paraquat poisoning in Andaman and Nicobar Islands - Government must intervene.

Point Mutations as Main Resistance Mechanism Together With P450-Based Metabolism Confer Broad Resistance to Different ALS-Inhibiting Herbicides in *Glebionis coronaria* From Tunisia.

In vitro and in vivo digestion of red cured cooked meat: oxidation, intestinal microbiota and fecal metabolites.

Self-referencing optical fiber pH sensor for marine microenvironments.

Physical activity, body mass index and arsenic metabolism among Mexican women.

Toxicokinetic analysis of commonly used pesticides using data on acute poisoning cases from Hyderabad, South India.

Effects of different hormonal treatments on growth parameters and secondary metabolite production in organ culture of *Hyssopus officinalis* L.

Impact of multigenerational exposure to AgNO₃ or NM300K Ag NPs on antioxidant defense and oxidative stress in *Caenorhabditis elegans*.

Adaptation of *Dinoroseobacter shibae* to oxidative stress and the specific role of RirA.

Direct and Indirect Somatic Embryogenesis Induction in *Camellia oleifera* Abel.

Regulatory groundwater monitoring: Realistic residues of pinoxaden and metabolites at vulnerable locations.

Lung Metabolomics Profiling of Congenital Diaphragmatic Hernia in Fetal Rats.

Gas chromatography-mass spectrometry-based metabolomics analysis of metabolites in commercial and inoculated pickles.

Reproductive Toxicity of 3,4-dichloroaniline (3,4-DCA) on Javanese Medaka (*Oryzias javanicus*, Bleeker 1854).

Adenosine Receptor and Its Downstream Targets, Mod(mdg4) and Hsp70, Work as a Signaling Pathway Modulating Cytotoxic Damage in *Drosophila*.

Immune and Nervous Systems Interaction in Endocrine Disruptors Toxicity: The Case of Atrazine.

Primary hepatocytes isolated from human and porcine donors display similar patterns of cytochrome p450 expression following exposure to prototypical activators of AhR, CAR and PXR.

Computational study on the metabolic activation mechanism of PeCDD by Cytochrome P450 1A1.

Sodium arsenite induces spatial learning and memory impairment associated with oxidative stress and activates the Nrf2/PPAR γ pathway against oxidative injury in mice hippocampus.

Occupational use of agrochemicals results in inhibited cholinesterase activity and altered reproductive hormone levels in male farmers from Buea, Cameroon.

Impact of manipulation of glycerol/diol dehydratase activity on intestinal microbiota ecology and metabolism.

Oxidative testicular injury: effect of L-leucine on redox, cholinergic and purinergic dysfunctions, and dysregulated metabolic pathways.

New sample preparation method to analyse 15 specific and non-specific pesticide metabolites in human urine using LC-MS/MS.

Effect of uncouplers of oxidative phosphorylation on metabolism of propionate in liver explants from dairy cows.

Acetobacter orientalis XJC-C with a high lignocellulosic biomass-degrading ability improves significantly composting efficiency of banana residues by increasing metabolic activity and functional diversity of bacterial community.

Effects of 2,4,6-trichlorophenol and its intermediates on acute toxicity of sludge from wastewater treatment and functional gene expression.

Smoke Chemistry, In Vitro Cytotoxicity, and Genotoxicity Demonstrates Enhanced Toxicity of Cigarillos Compared With Cigarettes.

Enantioselective effects of imazethapyr on the secondary metabolites and nutritional value of wheat seedlings.

Endocrine Disruptor Potential of Short- and Long-Chain Perfluoroalkyl Substances (PFASs)-A Synthesis of Current Knowledge with Proposal of Molecular Mechanism.

Proteomics Reveals Octyl Gallate as an Environmentally Friendly Wood Preservative Leading to Reactive Oxygen Species-Driven Metabolic Inflexibility and Growth Inhibition in White-Rot Fungi (*Lenzites betulina* and *Trametes versicolor*).

Extended suspect screening to identify contaminants of emerging concern in riverine and coastal ecosystems and assessment of environmental risks.

Importance of monitoring arsenic methylation metabolism in acute promyelocytic leukemia patients receiving the treatment of arsenic trioxide.

Convergent evolution of plant specialized 1,4-naphthoquinones: metabolism, trafficking, and resistance to their allelopathic effects.

Isolation and characterization of arsenic-binding siderophores from *Rhodococcus erythropolis* S43: role of heterobactin B and other heterobactin variants.

A targeted ultra performance liquid chromatography - Tandem mass spectrometric assay for tyrosine and metabolites in urine and plasma: Application to the effects of antibiotics on mice.

The insulin-like growth factor system: A target for endocrine disruptors?

Selective beta-cell toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin on isolated pancreatic islets.

Fungal diversity and metabolomic profiles in GM and isogenic non-GM maize cultivars from Brazil.

Lipidomics reveals multiple stressor effects (temperature and mitochondrial toxicant) in the zebrafish embryo toxicity test.

Tetrachlorobenzoquinone exposure triggers ferroptosis contributing to its neurotoxicity.

UHPLC/GC-TOF-MS metabolomics, MTT assay, and molecular docking studies reveal physostigmine as a new anticancer agent from the ethyl acetate and butanol fractions of *Kigelia africana* (Lam.) Benth. fruit extracts.

Cyclophosphamide arrhythmogenicity testing using human-induced pluripotent stem cell-derived cardiomyocytes.

Simultaneous Determination of Multiple Reactive Carbonyl Species in High Fat Diet-Induced Metabolic Disordered Mice and the Inhibitory Effects of Rosemary on Carbonyl Stress.

Targeted Metabolomics Identifies Plasma Biomarkers in Mice with Metabolically Heterogeneous Melanoma Xenografts.

Arsenic-induced HER2 promotes proliferation, migration and angiogenesis of bladder epithelial cells via activation of multiple signaling pathways in vitro and in vivo.

Acute Changes in Thyroid Hormone Levels among Thai Pesticide Sprayers.

Identification of molecular toxicity pathways across early life-stages of zebrafish exposed to PCB126 using a whole transcriptomics approach.

PCB153 reduces apoptosis in primary cultures of murine pituitary cells through the activation of NF- κ B mediated by PI3K/Akt.

Oxidative Stress and Lipid Mediators Modulate Immune Cell Functions in Autoimmune Diseases.

Antagonistic Interaction between Phosphinothricin and Nepeta rtanjensis Essential Oil Affected Ammonium Metabolism and Antioxidant Defense of Arabidopsis Grown In Vitro.

Lysosomal SLC46A3 modulates hepatic cytosolic copper homeostasis.

Acrolein and other toxicant exposures in relation to cardiovascular disease among marijuana and tobacco smokers in a longitudinal cohort of HIV-positive and negative adults.

Genome Sequence of Acetobacter tropicalis DmPark25_167, a Bacterium Isolated from a Drosophila melanogaster Genetic Model of Parkinson's Disease.

Disturbances in Microbial and Metabolic Communication across the Gut-Liver Axis Induced by a Dioxin-like Pollutant: An Integrated Metagenomics and Metabolomics Analysis.

Chlorogenic acid abates male reproductive dysfunction in arsenic-exposed mice via attenuation of testicular oxido-inflammatory stress and apoptotic responses.

[Risks associated with the consumption of inorganic and organic arsenic].

Endocrine disrupting chemicals and reproductive disorders in women, men, and animal models.

Identification of odor biomarkers in irradiation injury urine based on headspace SPME-GC-MS.

Live Cell Imaging Using Riboswitch-Spinach tRNA Fusions as Metabolite-Sensing Fluorescent Biosensors.

Oleuropein attenuates the 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-perturbing effects on pancreatic β -cells.

Cruciferous vegetables (Brassica oleracea) confer cytoprotective effects in Drosophila intestines.

Short-term metabolic disruptions in urine of mouse models following exposure to low doses of oxygen ion radiation.

Renal tubular injury induced by glyphosate combined with hard water: the role of cytosolic phospholipase A2.

Neurophysiological and behavioral responses of blacklegged ticks to host odors.

Associations of PCBs, dioxins and furans with follicle-stimulating hormone and luteinizing hormone in postmenopausal women: National Health and Nutrition Examination Survey 1999-2002.

Fish consumption is an indicator of exposure to non-dioxin like polychlorinated biphenyls in cumulative risk assessments based on a probabilistic and sensitive approach.

Transgenerational disease specific epigenetic sperm biomarkers after ancestral exposure to dioxin.

Roundup causes embryonic development failure and alters metabolic pathways and gut microbiota functionality in non-target species.

Non-targeted metabolomic profiling of atrazine in *Caenorhabditis elegans* using UHPLC-QE Orbitrap/MS.

Integrated proteomics, metabolomics and physiological analyses for dissecting the toxic effects of halosulfuron-methyl on soybean seedlings (*Glycine max merr.*).

The impact and toxicity of glyphosate and glyphosate-based herbicides on health and immunity.

Exposure to the herbicide 2,4-dichlorophenoxyacetic acid impairs mitochondrial function, oxidative status, and behavior in adult zebrafish.

Mucosal-associated invariant T-Cell (MAIT) activation is altered by chlorpyrifos- and glyphosate-treated commensal gut bacteria.

Neuroprotective Metabolites from Vietnamese Marine Derived Fungi of *Aspergillus* and *Penicillium* Genera.

Chronic Atrazine Exposure Beginning Prenatally Impacts Liver Function and Sperm Concentration With Multi-Generational Consequences in Mice.

The glyphosate formulation Roundup® LB plus influences the global metabolome of pig gut microbiota in vitro.

Acrolein: A Potential Mediator of Oxidative Damage in Diabetic Retinopathy.

Transcriptomic and metabolomic landscape of the molecular effects of glyphosate commercial formulation on *Apis mellifera ligustica* and *Apis cerana cerana*.

lanostane Triterpenoid Metabolites from a *Penares* sp. Marine Sponge Protect Neuro-2a Cells against Paraquat Neurotoxicity.

Spn modulates lipid droplet content in adult *Drosophila* glial cells and protects against paraquat toxicity.

Piperine-Coated Gold Nanoparticles Alleviate Paraquat-Induced Neurotoxicity in *Drosophila melanogaster*.

Quantitative in Vitro to in Vivo Extrapolation (QIVIVE) for Predicting Reduced Anogenital Distance Produced by Anti-Androgenic Pesticides in a Rodent Model for Male Reproductive Disorders.

Reduction by, ligand exchange among, and covalent binding to glutathione and cellular thiols link metabolism and disposition of dietary arsenic species with toxicity.

Aminomethylphosphonic acid alters amphibian embryonic development at environmental concentrations.

High throughput deep sequencing elucidates the important role of lncRNAs in Foxtail millet response to herbicides.

Octreotide alleviates pancreatic damage caused by paraquat in rats by reducing inflammatory responses and oxidative stress.

Toxicological impacts of herbicide paraquat dichloride on histological profile (gills, liver, and kidney) of freshwater fish *Channa punctatus* (Bloch).

Herbicide Glyphosate: Toxicity and Microbial Degradation.

Mixtures of an insecticide, a fungicide and a herbicide induce high toxicities and systemic physiological disturbances in winter *Apis mellifera* honey bees.

Aqueous Bark Extract of *Ceiba speciosa* (A. St.-Hill) Ravenna Protects against Glucose Toxicity in *Caenorhabditis elegans*.

Degradation of the Organochlorinated Herbicide Diuron by Rainforest Basidiomycetes.

Toxicities of Neonicotinoid-Containing Pesticide Mixtures on Nontarget Organisms.

Transcriptome analysis of *Panax vannamei* hepatopancreas reveals differences in toxicity mechanisms between phoxim and prometryne.

Insecticidal activity and mechanism of cinnamaldehyde in *C. elegans*.

Neonatal exposure to a glyphosate-based herbicide alters the uterine differentiation of prepubertal ewe lambs.

Invasive species versus pollutants: Potential of *Limnoperna fortunei* to degrade glyphosate-based commercial formulations.

Perinatal exposure to glyphosate or a glyphosate-based formulation disrupts hormonal and uterine milieu during the receptive state in rats.

Ovarian mitochondrial and oxidative stress proteins are altered by glyphosate exposure in mice.

Determination of arsenicals in mouse tissues after simulated exposure to arsenic from rice for sixteen weeks and the effects on histopathological features.

Cross-Taxa Distinctions in Mechanisms of Developmental Effects for Aquatic Species Exposed to Trifluralin.

Polyps of the Jellyfish *Aurelia aurita* Are Unaffected by Chronic Exposure to a Combination of Pesticides.

Orthotopic foetal lung tissue direct injection into lung showed a preventive effect against paraquat-induced acute lung injury in mice.

AhR-activating pesticides increase the bovine ABCG2 efflux activity in MDCKII-bABCG2 cells.

Effect of zinc supplementation on chronic hepatorenal toxicity following oral exposure to glyphosate-based herbicide (Bushfire[®]) in rats.

Does pendimethalin develop in pancreatic cancer induced inflammation?

Toxicity of diuron metabolites in human cells.

The selected epigenetic effects of aminomethylphosphonic acid, a primary metabolite of glyphosate on human peripheral blood mononuclear cells (in vitro).

A Geometric Clustering Tool (AGCT) to robustly unravel the inner cluster structures of time-series gene expressions.

Changes in thyroid hormone levels and related gene expressions in embryo-larval zebrafish exposed to binary combinations of bifenthrin and acetochlor.

Long-term effects of in ovo exposure to an environmentally relevant dose of atrazine on the thyroid gland of *Caiman latirostris*.

The enantioselective enrichment, metabolism, and toxicity of fenoxaprop-ethyl and its metabolites in zebrafish.

Embryotoxicity of atrazine and its degradation products to early life stages of zebrafish (*Danio rerio*).

Control of the neuroprotective Lipocalin Apolipoprotein D expression by alternative promoter regions and differentially expressed mRNA 5' UTR variants.

Agrochemicals and neurogenesis.

Emerging contaminants in water used for maize irrigation: Economic and food safety losses associated with ciprofloxacin and glyphosate.

Osteonecrosis of Femoral Head, An Overlooked Long-Term Complication after Paraquat Intoxication: A Retrospective Cohort Study.

Exposure to a Glyphosate-based Herbicide Alters the Expression of Key Regulators of Mammary Gland Development on Pre-pubertal Male Rats.

Glyphosate Induces Metaphase II Oocyte Deterioration and Embryo Damage by Zinc Depletion and Overproduction of Reactive Oxygen Species.

Exposure to inorganic arsenic and its methylated metabolites alters metabolomics profiles in INS-1 832/13 insulinoma cells and isolated pancreatic islets.

Titanium dioxide nanoparticles enhanced thyroid endocrine disruption of pentachlorophenol rather than neurobehavioral defects in zebrafish larvae.

Cytogenotoxic effect of propanil using the *Lens culinaris* Med and *Allium cepa* L test.

Identification of chromosomes in *Triticum aestivum* possessing genes that confer tolerance to the synthetic auxin herbicide haloxyfop-methyl.

Maternal glyphosate exposure causes autism-like behaviors in offspring through increased expression of soluble epoxide hydrolase.

Relationship between agrochemical compounds and mammary gland development and breast cancer.

Transgenerational epigenetic effects from male exposure to endocrine-disrupting compounds: a systematic review on research in mammals.

Prenatal exposure to glufosinate ammonium disturbs gut microbiome and induces behavioral abnormalities in mice.

Environmental Pollution, Oxidative Stress and Thioretinaco Ozonide: Effects of Glyphosate, Fluoride and Electromagnetic Fields on Mitochondrial Dysfunction in Carcinogenesis, Atherogenesis and Aging.

Comparison of the effects of resveratrol and its derivative pterostilbene on hepatic oxidative stress and mitochondrial dysfunction in piglets challenged with diquat.

Acrolein contributes to urothelial carcinomas in patients with chronic kidney disease.

Lipids, proteins and extracellular metabolites of *Trichoderma harzianum* modifications caused by 2,4-dichlorophenoxyacetic acid as a plant growth stimulator.

Effects of fertilization on the triafamone photodegradation in aqueous solution: Kinetic, identification of photoproducts and degradation pathway.

Reproductive cycle progression arrest and modification of cell morphology (shape and biovolume) in the alga *Pseudokirchneriella subcapitata* exposed to metolachlor.

Understanding the influence of glyphosate on the structure and function of freshwater microbial community in a microcosm.

Sub-chronic exposure to Kalach 360 SL, Glyphosate-based Herbicide, induced bone rarefaction in female Wistar rats.

Effects of parental exposure to glyphosate-based herbicides on embryonic development and oxidative status: a long-term experiment in a bird model.

Environmentally relevant mixture of S-metolachlor and its two metabolites affects thyroid metabolism in zebrafish embryos.

Postnatal zinc or paraquat administration increases paraquat or zinc-induced loss of dopaminergic neurons: insight into augmented neurodegeneration.

Distinct m(6)A methylome profiles in poly(A) RNA from *Xenopus laevis* testis and that treated with atrazine.

Transgenerational disrupting impacts of atrazine in zebrafish: Beneficial effects of dietary spirulina.

Metabolic profiles in the course of the shikimic acid pathway of *Raphanus sativus* var. *longipinnatus* exposed to mesotrione and its degradation products.

Glyphosate-based herbicide exposure during pregnancy and lactation malprograms the male reproductive morphofunction in F1 offspring.

Where ferroptosis inhibitors and paraquat detoxification mechanisms intersect, exploring possible treatment strategies.

Effect of Plant Growth Regulators on Coloured Callus Formation and Accumulation of Azadirachtin, an Essential Biopesticide in *Azadirachta indica*.

Hyperamylasemia as an early predictor of mortality in patients with acute paraquat poisoning.

Transcriptome profiling of the fungus *Aspergillus nidulans* exposed to a commercial glyphosate-based herbicide under conditions of apparent herbicide tolerance.

Dimethylarsinic acid (DMA) enhanced lung carcinogenesis via histone H3K9 modification in a transplacental mouse model.

Dipteryx alata, a tree native to the Brazilian Cerrado, is sensitive to the herbicide nicosulfuron.

Light and temperature influence on diuron bioaccumulation and toxicity in biofilms.

Association of urinary metabolites of organophosphate and pyrethroid insecticides, and phenoxy herbicides with endometriosis.

Modulation of antioxidant gene expressions by Roundup® exposure in the decapod *Macrobrachium potiana*.

The effects of glyphosate and AMPA on the mediterranean mussel *Mytilus galloprovincialis* and its microbiota.

Quantification of selected aroma compounds in e-cigarette products and toxicity evaluation in HUVEC/Tert2 cells.

Glyphosate affects methylation in the promoter regions of selected tumor suppressors as well as expression of major cell cycle and apoptosis drivers in PBMCs (in vitro study).

Effects of glyphosate exposure on human health: Insights from epidemiological and in vitro studies.

Glyphosate-based herbicide impairs energy metabolism and increases autophagy in C6 astrogloma cell line.

Uric acid induces stress resistance and extends the life span through activating the stress response factor DAF-16/FOXO and SKN-1/NRF2.

A comprehensive analysis of the animal carcinogenicity data for glyphosate from chronic exposure rodent carcinogenicity studies.

Changes in Microbiome Confer Multigenerational Host Resistance after Sub-toxic Pesticide Exposure.

Glyphosate-based herbicide induces hyperplastic ducts in the mammary gland of aging Wistar rats.

Glyphosate does not show higher phytotoxicity than cadmium: Cross talk and metabolic changes in common herb.

Toxicology of paraquat and pharmacology of the protective effect of 5-hydroxy-1-methylhydantoin on lung injury caused by paraquat based on metabolomics.

Biodegradation Potential and Ecotoxicity Assessment in Soil Extracts Amended with Phenoxy Acid Herbicide (2,4-D) and a Structurally-Similar Plant Secondary Metabolite (Ferulic Acid).

Effects of L-Glufosinate-ammonium and temperature on reproduction controlled by neuroendocrine system in lizard (*Eremias argus*).

Effects of acrolein in comparison to its prodrug cyclophosphamide on human primary endothelial cells in vitro.

In vitro effects of glyphosate and Roundup on Sertoli cell physiology.

Effects of glyphosate and a commercial formulation Roundup® exposures on maturation of *Xenopus laevis* oocytes.

Effects of metazachlor and its major metabolite metazachlor OA on early life stages of marbled crayfish.

Seasonal variations in the dose-response relationship of acetylcholinesterase activity in freshwater fish exposed to chlorpyrifos and glyphosate.

A Biostimulant Obtained from the Seaweed *Ascophyllum nodosum* Protects *Arabidopsis thaliana* from Severe Oxidative Stress.

Comparative acute toxicity of glyphosate-based herbicide (GBH) to *Daphnia magna*, *Tisbe longicornis*, and *Emerita analoga*.

Secretogranin III upregulation is involved in parkinsonian toxin-mediated astroglia activation.

Interference of an atrazine commercial formulation with the endocrine control of ovarian growth exerted by the eyestalks.

Frequently encountered pesticides can cause multiple disorders in developing worker honey bees.

Increased risk of head and neck cancer in Agent Orange exposed Vietnam Era veterans.

A Synthetic Snake-Venom-Based Tripeptide Protects PC12 Cells from the Neurotoxicity of Acrolein by Improving Axonal Plasticity and Bioenergetics.

Evaluation of apoptotic potential of glyphosate metabolites and impurities in human peripheral blood mononuclear cells (in vitro study).

In vitro assessment of corticosteroid effects of eight chiral herbicides.

Assessment of the effects of metribuzin, glyphosate, and their mixtures on the metabolism of the model plant *Lemna minor* L. applying metabolomics.

Magnesium supplementation ameliorates toxic effects of 2,4-dichlorophenoxyacetic acid in rat model.

Identification of potential post-ethylene events in the signaling cascade induced by stimuli of bud dormancy release in grapevine.

Coniferaldehyde ameliorates the lipid and glucose metabolism in palmitic acid-induced HepG2 cells via the LKB1/AMPK signaling pathway.

Pathological Role of Unsaturated Aldehyde Acrolein in Diabetic Retinopathy.

Combination of Quercetin, Hirudin and Cinnamaldehyde Promotes Schwann Cell Differentiation and Myelination against High Glucose by Inhibiting ERK Signaling Pathway.

Study the antibacterial mechanism of cinnamaldehyde against drug-resistant *Aeromonas hydrophila* in vitro.

Quantification of 3-Hydroxypropyl Mercapturic Acid in the Urine of Patients with Breast Cancer to Monitor Cyclophosphamide Toxicity.

Cystitis-Related Bladder Pain Involves ATP-Dependent HMGB1 Release from Macrophages and Its Downstream H₂S/Ca^v3.2 Signaling in Mice.

Nrf-2: The Target of Vascular Dysfunction in Diabetes.

Cinnamaldehyde Ameliorates Vascular Dysfunction in Diabetic Mice by Activating Nrf2.

Cardiospecific Overexpression of ATPGD1 (Carnosine Synthase) Increases Histidine Dipeptide Levels and Prevents Myocardial Ischemia Reperfusion Injury.

Protective effects of Alda-1, an ALDH2 activator, on alcohol-derived DNA damage in the esophagus of human ALDH2*2 (Glu504Lys) knock-in mice.

The polypharmacy reduction potential of cinnamic acids and some related compounds in pre- and post-onset management of type 2 diabetes mellitus.

Stephalagine, an aporphine alkaloid from *Annona crassiflora* fruit peel, induces antinociceptive effects by TRPA1 and TRPV1 channels modulation in mice.

Treatment with cinnamaldehyde reduces the visceral adiposity and regulates lipid metabolism, autophagy and endoplasmic reticulum stress in the liver of a rat model of early obesity.

Untargetted Metabolomic Exploration of the *Mycobacterium tuberculosis* Stress Response to Cinnamon Essential Oil.

Use of human neuroblastoma SH-SY5Y cells to evaluate glyphosate-induced effects on oxidative stress, neuronal development and cell death signaling pathways.

Aldehyde Dehydrogenase Inhibition Ameliorates Cardiac Dysfunction and Exacerbates Hypotension Caused by Alcohol in Female Rats.

Acrolein is involved in ischemic stroke-induced neurotoxicity through spermidine/spermine-N1-acetyltransferase activation.

A novel TIPT double mutation in EPSPS conferring glyphosate resistance in tetraploid *Bidens subalternans*.

Water management affects arsenic uptake and translocation by regulating arsenic bioavailability, transporter expression and thiol metabolism in rice (*Oryza sativa* L.).

Trapping Acrolein by Theophylline/Caffeine and Their Metabolites from Green Tea and Coffee in Mice and Humans.

Cover crops, hormones and herbicides: Priming an integrated weed management strategy.

Loss of trifluralin metabolic resistance in *Lolium rigidum* plants exposed to prosulfocarb recurrent selection.

Comparing the effects of different exogenous hormone combinations on seed-derived callus induction in *Nicotiana tabacum*.

[NEURO-HUMORAL DISORDERS OF THE ADAPTATION SYSTEM UNDER THE ACTION OF CERTAIN CLASSES OF PESTICIDES].

Direct Analysis of Glyphosate, Glufosinate, and Their Metabolites in Palm Oil Using Liquid Chromatography with Tandem Mass Spectrometry.

Secondary Metabolites and Their Bioactivities Produced by *Paecilomyces*.

Metabolomic profiling and comparison of major cinnamon species using UHPLC-HRMS.

Leaching of herbicidal residues from gravel surfaces - A lysimeter-based study comparing gravels with agricultural topsoil.

Glyphosate-based herbicides influence antioxidants, reproductive hormones and gut microbiome but not reproduction: A long-term experiment in an avian model.

Metribuzin resistance via enhanced metabolism in a multiple herbicide resistant *Lolium rigidum* population.

Proteomic signatures of acute oxidative stress response to paraquat in the mouse heart.

Sisters in structure but different in character, some benzaldehyde and cinnamaldehyde derivatives differentially tune *Aspergillus flavus* secondary metabolism.

Ultimate fate of herbicide tembotrione and its metabolite TCMBA in soil.

Simultaneous determination of tiafenacil and its six metabolites in fruits using ultra-high-performance liquid chromatography/tandem mass spectrometry.

Metabolic profiling of rats poisoned with paraquat and treated with Xuebijing using a UPLC-QTOF-MS/MS metabolomics approach.

Benoxacor is enantioselectively metabolized by rat liver subcellular fractions.

Dissipation of Herbicide Methiozolin and Its Metabolites in Aerobic Sediment-Water Systems.

Cytotoxicity and hormonal activity of glyphosate-based herbicides.

Organic diet intervention significantly reduces urinary glyphosate levels in U.S. children and adults.

Dysregulation of prostaglandin E2 and BDNF signaling mediated by estrogenic dysfunction induces primary hippocampal neuronal cell death after single and repeated paraquat treatment.

Cinnamaldehyde changes the dynamic balance of glucose metabolism by targeting ENO1.

TOR kinase activity in *Chlamydomonas reinhardtii* is modulated by cellular metabolic states.

Review of the pharmacokinetics and metabolism of triclopyr herbicide in mammals: Impact on safety assessments.

Children exposure to inorganic and organic arsenic metabolites: A cohort study in Northeast Italy.

Biodegradation of Butachlor by *Bacillus altitudinis* and Identification of Metabolites.

Safening activity and metabolism of the safener cyprosulfamide in maize and wheat.

Dimethylarsinic acid is the causal agent inducing rice straighthead disease.

Enantioselectivity effects of imazethapyr enantiomers to metabolic responses in mice.

Review and analysis of the potential for glyphosate to interact with the estrogen, androgen and thyroid pathways.

Metabolic resistance to S-metolachlor in two waterhemp (*Amaranthus tuberculatus*) populations from Illinois, USA.

Uptake, translocation, and metabolism of glyphosate, glufosinate, and dicamba mixtures in *Echinochloa crus-galli* and *Amaranthus palmeri*.

Silicon tackles butachlor toxicity in rice seedlings by regulating anatomical characteristics, ascorbate-glutathione cycle, proline metabolism and levels of nutrients.

Enantioselective in vitro metabolism and in vitro-in vivo correlation of the herbicide ethofumesate in a human model.

Genome-scale reconstruction of *Paenarthrobacter aurescens* TC1 metabolic model towards the study of atrazine bioremediation.

As3MT and GST Polymorphisms Influencing Arsenic Metabolism in Human Exposure to Drinking Groundwater.

Complex study of glyphosate and metabolites influence on enzymatic activity and microorganisms association in soil enriched with *Pseudomonas fluorescens* and sewage sludge.

Pilot study evaluating inhalation and dermal glyphosate exposure resulting from simulated heavy residential consumer application of Roundup(®).

Understanding the Functional Impact of VOC-Ozone Mixtures on the Chemistry of RNA in Epithelial Lung Cells.

Mitochondrial metabolism is central for response and resistance of *Saccharomyces cerevisiae* to exposure to a glyphosate-based herbicide.

The quick and the dead: a new model for the essential role of ABA accumulation in synthetic auxin herbicide mode of action.

Transcriptomics in *Erigeron canadensis* reveals rapid photosynthetic and hormonal responses to auxin herbicide application.

Reactivity of vadose-zone solids to S-metolachlor and its two main metabolites: case of a glaciofluvial aquifer.

Chronic exposure to glyphosate induces transcriptional changes in honey bee larva: A toxicogenomic study.

Agnes Rimando, a Pioneer in the Fate of Glyphosate and Its Primary Metabolite in Plants.

Transient receptor potential ankyrin-1 causes rapid bronchodilation via nonepithelial PGE(2).

Evolution of resistance to HPPD-inhibiting herbicides in a wild radish population via enhanced herbicide metabolism.

Concentration Distribution and Analysis of Urinary Glyphosate and Its Metabolites in Occupationally Exposed Workers in Eastern China.

Chemical Defoliant Promotes Leaf Abscission by Altering ROS Metabolism and Photosynthetic Efficiency in *Gossypium hirsutum*.

Structure-Dependent Effects of Cinnamaldehyde Derivatives on TRPA1-Induced Serotonin Release in Human Intestinal Cell Models.

Protective effect of catechin on pentachlorophenol-induced cytotoxicity and genotoxicity in isolated human blood cells.

2,4-D exposure and urinary markers of oxidative DNA damage and lipid peroxidation: a longitudinal study.

Combined cell death of co-exposure to aldehyde mixtures on human bronchial epithelial BEAS-2B cells: Molecular insights into the joint action.

Influence of eco-friendly phytotoxic metabolites from *Lasiodiplodia pseudotheobromae* C1136 on physiological, biochemical, and ultrastructural changes on tested weeds.

Introducing selective agrochemical manipulation of gibberellin metabolism into a cereal crop.

Biotransformation and detoxification of chloroacetanilide herbicides by *Trichoderma* spp. with plant growth-promoting activities.

Maternal and Fetal Blood Pharmacokinetics and Organ Distribution of Atrazine, Propazine, Simazine, and Their Metabolites in Pregnant Rats After Chronic Oral Administration.

A Val-202-Phe β -tubulin mutation and enhanced metabolism confer dinitroaniline resistance in a single *Lolium rigidum* population.

Utilization of GC-MS untargeted metabolomics to assess the delayed response of glufosinate treatment of transgenic herbicide resistant (HR) buffalo grasses (*Stenotaphrum secundatum* L.).

Herbicidal Secondary Metabolites from Actinomycetes: Structure Diversity, Modes of Action, and Their Roles in the Development of Herbicides.

Loss of CNDP causes a shorter lifespan and higher sensitivity to oxidative stress in *Drosophila melanogaster*.

Thermal decomposition kinetics of glyphosate (GP) and its metabolite aminomethylphosphonic acid (AMPA).

Levothyroxine Therapy in Thyroidectomized Patients.

The Aryl Hydrocarbon Receptor in Energy Balance: The Road from Dioxin-Induced Wasting Syndrome to Combating Obesity with Ahr Ligands.

The Impact of Low-Level Iron Supplements on the Faecal Microbiota of Irritable Bowel Syndrome and Healthy Donors Using In Vitro Batch Cultures.

Female mice exposed to low doses of dioxin during pregnancy and lactation have increased susceptibility to diet-induced obesity and diabetes.

ALS-Linked Mutant SOD1 Associates with TIA-1 and Alters Stress Granule Dynamics.

Aryl hydrocarbon receptor (AHR)-mediated inflammation and resolution: Non-genomic and genomic signaling.

Catechol protects against iron-mediated oxidative brain injury by restoring antioxidative metabolic pathways; and modulation of purinergic and cholinergic enzymes activities.

US EPA's regulatory pesticide evaluations need clearer guidelines for considering mammary gland tumors and other mammary gland effects.

Role of sodium tetraborate as a cardioprotective or competitive agent: Modulation of hypertrophic intracellular signals.

Exposure to Endocrine Disrupting Chemicals and Risk of Breast Cancer.

Effects of Fecal Microbiota Transplantation on Composition in Mice with CKD.

Integrative transcriptomics and metabolomics explore the mechanism of kaempferol on improving nonalcoholic steatohepatitis.

4E-BP1 Protects Neurons from Misfolded Protein Stress and Parkinson's Disease Toxicity by Inducing the Mitochondrial Unfolded Protein Response.

Polyphenol-rich fraction of *Alchornea cordifolia* leaf ameliorates arsenite-induced infertility in male rats.

Matching Minute Ventilation in Hypermetabolic State of Dinitrophenol Poisoning.

Reply: Matching Minute Ventilation in the Hypermetabolic State of Dinitrophenol Poisoning.

Weight of Evidence and Human Relevance Evaluation of the Benfluralin Mode of Action in Rats (Part II): Thyroid carcinogenesis.

Metabolic and Hematological Responses to Endotoxin-Induced Inflammation in Chicks Experiencing Embryonic 2,3,7,8-Tetrachlorodibenzodioxin Exposure.

Serum indoxyl sulfate concentrations associate with progression of chronic kidney disease in children.

Cisplatin-Induced Giant Cells Formation Is Involved in Chemoresistance of Melanoma Cells.

High-Resolution Respirometry Reveals MPP(+) Mitochondrial Toxicity Mechanism in a Cellular Model of Parkinson's Disease.

Distinct Fecal and Plasma Metabolites in Children with Autism Spectrum Disorders and Their Modulation after Microbiota Transfer Therapy.

Glufosinate constrains synchronous and metachronous metastasis by promoting anti-tumor macrophages.

Dexamethasone-Loaded Thermosensitive Hydrogel Suppresses Inflammation and Pain in Collagen-Induced Arthritis Rats.

Interactions of arsenic metabolism with arsenic exposure and individual factors on diabetes occurrence: Baseline findings from Arsenic and Non-Communicable disease cohort (AsNCD) in China.

In Vitro Studies on Therapeutic Potential of Probiotic Yeasts Isolated from Various Sources.

Serum concentrations of pesticides including organophosphates, pyrethroids and neonicotinoids in a population with osteoarthritis in Saudi Arabia.

A metabolomics approach to investigate urine levels of neurotransmitters and related metabolites in autistic children.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) dysregulates hepatic one carbon metabolism during the progression of steatosis to steatohepatitis with fibrosis in mice.

Distinguishing mode of action of compounds inducing craniofacial malformations in zebrafish embryos to support dose-response modeling in combined exposures.

Evaluation of the Aryl Hydrocarbon Receptor Response in LMH 3D Spheroids.

Influence of Resveratrol on the Cardiovascular Health Effects of Chronic Kidney Disease.

Prenatal exposure to organic pollutants in northwestern Spain using non-invasive matrices (placenta and meconium).

Gestational dioxin exposure suppresses prolactin-stimulated nursing in lactating dam rats to impair development of postnatal offspring.

Aryl hydrocarbon receptor (AHR) functions: Balancing opposing processes including inflammatory reactions.

In utero exposure to arsenite contributes to metabolic and reproductive dysfunction in male offspring of CD-1 mice.

Longitudinal metabolic and gut bacterial profiling of pregnant women with previous bariatric surgery.

Targeting on Gut Microbiota-Derived Metabolite Trimethylamine to Protect Adult Male Rat Offspring against Hypertension Programmed by Combined Maternal High-Fructose Intake and Dioxin Exposure.

Impact of pesticide exposure on adipose tissue development and function.

Pdgfr β -Cre mediated knockout of the aryl hydrocarbon receptor protects mice from high-fat diet induced obesity and hepatic steatosis.

Occupational Exposure to Pesticides and Chronic Lymphocytic Leukaemia in the MCC-Spain Study.

AHR is a tunable knob that controls HTLV-1 latency-reactivation switching.

Environmental Toxic Exposures Using Companion Animals as an Indicator of Human Toxicity: A Case Report and Discussion.

Capsaicinoid nonivamide improves nonalcoholic fatty liver disease in rats fed a high-fat diet.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) alters hepatic polyunsaturated fatty acid metabolism and eicosanoid biosynthesis in female Sprague-Dawley rats.

Microbiota Composition and Metabolism Are Associated With Gut Function in Parkinson's Disease.

Maternal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin suppresses male reproductive functions in their adulthood.

Marrubium vulgare L.: A Phytochemical and Pharmacological Overview.

Gut microbiota generation of protein-bound uremic toxins and related metabolites is not altered at different stages of chronic kidney disease.

Volatile Organic Compounds of Endophytic Burkholderia pyrrocinia Strain JK-SH007 Promote Disease Resistance in Poplar.

Prebiotic inulin consumption reduces dioxin-like PCB 126-mediated hepatotoxicity and gut dysbiosis in hyperlipidemic Ldlr deficient mice.

Boric acid and Borax Supplementation Reduces Weight Gain in Overweight Rats and Alter L-Carnitine and IGF-I Levels.

Human CYP2E1-activated mutagenicity of dioxin-like PCBs 105 and 118-Experimental data consistent with molecular docking results.

Aryl Hydrocarbon Receptor-Dependent inductions of omega-3 and omega-6 polyunsaturated fatty acid metabolism act inversely on tumor progression.

Effects of the oral adsorbent AST-120 on fecal p-cresol and indole levels and on the gut microbiota composition.

Chronic Kidney Disease-Associated Immune Dysfunctions: Impact of Protein-Bound Uremic Retention Solutes on Immune Cells.

Quantification of microbiota-related phenols and aromatic acids in mouse feces of a diabetic nephropathy model by simultaneous BDAPE derivatization using ultra-performance liquid chromatography-tandem mass spectrometry.

Inorganic arsenic methylation capacity and breast cancer by immunohistochemical subtypes in northern Mexican women.

Arsenic Exposure Decreases Adiposity During High-Fat Feeding.

Identification of environmental chemicals targeting miscarriage genes and pathways using the comparative toxicogenomics database.

A murine model of Staphylococcus aureus infected chronic diabetic wound: A new tool to develop alternative therapeutics.

Inulin-type fructan intervention restricts the increase in gut microbiome-generated indole in patients with peritoneal dialysis: a randomized crossover study.

Allergy to metacresol in a type 2 diabetes patient.

Low concentrations of sodium arsenite induce hepatotoxicity in prepubertal male rats.

Urine metabolomic analysis in clear cell and papillary renal cell carcinoma: A pilot study.

Applying mass spectrometry-based assays to explore gut microbial metabolism and associations with disease.

Streptococcal H₂O₂ inhibits IgE-triggered degranulation of RBL-2H3 mast cell/basophil cell line by inducing cell death.

Pediatric glioblastoma target-specific efficient delivery of gemcitabine across the blood-brain barrier via carbon nitride dots.

Gut-Derived Metabolites and Their Role in Immune Dysfunction in Chronic Kidney Disease.

A combination of monosodium glutamate and high-fat and high-fructose diets increases the risk of kidney injury, gut dysbiosis and host-microbial co-metabolism.

Metabolomic alternations of follicular fluid of obese women undergoing in-vitro fertilization treatment.

Prenatal dioxin exposure and thyroid hormone levels in the Seveso second generation study.

Lactobacillus salivarius BP121 prevents cisplatin-induced acute kidney injury by inhibition of uremic toxins such as indoxyl sulfate and p-cresol sulfate via alleviating dysbiosis.

Polymorphisms in arsenic (+³ oxidation state) methyltransferase (AS3MT) predict the occurrence of hyperleukocytosis and arsenic metabolism in APL patients treated with As₂O₃.

Diet aid or aid to die: an update on 2,4-dinitrophenol (2,4-DNP) use as a weight-loss product.

Taurocholic acid inhibits features of age-related macular degeneration in vitro.

Dioxin and endometriosis: a new possible relation based on epigenetic theory.

The anti-inflammatory effect of omega-3 polyunsaturated fatty acids dramatically decreases by iron in the hippocampus of diabetic rats.

Isolation and Quantification of Uremic Toxin Precursor-Generating Gut Bacteria in Chronic Kidney Disease Patients.

Effect of fatty fish or nut consumption on concentrations of persistent organic pollutants in overweight or obese men and women: A randomized controlled clinical trial.

A Young Man with Accelerated Hyperthermia, Hypercapnia, and Profound Muscle Rigidity after Ingestion of a Weight Loss Agent.

PCB126 blocks the thermogenic beiging response of adipocytes.

Cytochrome P450 1A2 activity and incidence of thyroid disease and cancer after chronic or acute exposure to dioxins.

The impaired redox balance in peroxisomes of catalase knockout mice accelerates nonalcoholic fatty liver disease through endoplasmic reticulum stress.

The Natural Metabolite 4-Cresol Improves Glucose Homeostasis and Enhances β^2 -Cell Function.

Evolution-guided discovery of antibiotics that inhibit peptidoglycan remodelling.

Association of Maternal Exposure to Persistent Organic Pollutants in Early Pregnancy With Fetal Growth.

Prenatal exposure to glycol ethers and response inhibition in 6-year-old children: The PELAGIE cohort study.

Longitudinal association of biomarkers of pesticide exposure with cardiovascular disease risk factors in youth with diabetes.

Novel 5-(1-aryl-1H-pyrazol-3-yl)-1H-tetrazoles as glycogen phosphorylase inhibitors: An in vivo antihyperglycemic activity study.

Understanding ligands driven mechanism of wild and mutant aryl hydrocarbon receptor in presence of phytochemicals combating Parkinson's disease: an in silico and in vivo study.

Tagetnoic acid, a new lipoxygenase inhibitor peroxy fatty acid from *Tagetes minuta* growing in Saudi Arabia.

Long-term metabolic consequences of acute dioxin exposure differ between male and female mice.

Molecular and Cellular Mechanisms that Induce Arterial Calcification by Indoxyl Sulfate and P-Cresyl Sulfate.

Human CYP1B1-dependent genotoxicity of dioxin-like polychlorinated biphenyls in mammalian cells.

High-throughput sequencing analysis of intestinal flora changes in ESRD and CKD patients.

An unsupervised learning approach to identify novel signatures of health and disease from multimodal data.

In vivo acute toxicity and anti-gastric evaluation of a novel dichloro Schiff base: Bax and HSP70 alteration.

Bibliometrics and Visualization of the Mechanisms of Parkinson's Diseases Based on Animal Models.

Resveratrol Regulates Nrf2-Mediated Expression of Antioxidant and Xenobiotic Metabolizing Enzymes in Pesticides-Induced Parkinsonism.

Gut Microbiota as Diagnostic Tools for Mirroring Disease Progression and Circulating Nephrotoxin Levels in Chronic Kidney Disease: Discovery and Validation Study.

Porphobilinogen synthase: An equilibrium of different assemblies in human health.

Tandem mass tag (TMT) proteomic analysis of fetal lungs revealed differential expression of tight junction proteins in a rat model of congenital diaphragmatic hernia.

Physiologically based toxicokinetic models and in silico predicted partition coefficients to estimate tetrachlorodibenzo-p-dioxin transfer from feed into growing pigs.

Prenatal dioxin exposure and glucose metabolism in the Seveso Second Generation study.

Effects of arsenic exposure on D-serine metabolism in the hippocampus of offspring mice at different developmental stages.

Multiple pesticides in mothers' hair samples and children's measurements at birth: Results from the French national birth cohort (ELFE).

Arsenic-induced immunomodulatory effects disorient the survival-death interface by stabilizing the Hsp90/Beclin1 interaction.

Metformin as a protective agent against natural or chemical toxicities: a comprehensive review on drug repositioning.

Microbiome and Metabolome Profiles Associated With Different Types of Short Bowel Syndrome: Implications for Treatment.

Bowel Habits and the Association With Uremic Toxins in Non-Dialysis-Dependent Chronic Kidney Disease Patients.

Ferric-Induced Pancreatic Injury Involves Exacerbation of Cholinergic and Proteolytic Activities, and Dysregulation of Metabolic Pathways: Protective Effect of Caffeic Acid.

Distribution and Determinants of Chronic Kidney Disease of Unknown Etiology: A Brief Overview.

Pesticide exposure among Bolivian farmers: associations between worker protection and exposure biomarkers.

Anaerobic biodegradation of pyrene by *Klebsiella* sp. LZ6 and its proposed metabolic pathway.

The ability of arsenic metabolism affected the expression of lncRNA PANDAR, DNA damage, or DNA methylation in peripheral blood lymphocytes of laborers.

Inhibitory effect of isomaltodextrin on tyrosine metabolite production in rat gut microbiota.

May agricultural water sources containing mixtures of agrochemicals cause hormonal disturbances?

Biodegradation and toxicity reduction of nonylphenol, 4-tert-octylphenol and 2,4-dichlorophenol by the ascomycetous fungus *Thielavia* sp HJ22: Identification of fungal metabolites and proposal of a putative pathway.

Characterizing the potential estrogenic and androgenic activities of two disinfection byproducts, mono-haloacetic acids and haloacetamides, using *in vitro* bioassays.

Quantitative seasonal variation of the faltarinol-type polyacetylene (3S)-16,17-didehydrofaltarinol and its spatial tissue distribution in *Tridax procumbens*.

Risk factors for abdominal wall defects.

Formation of microbial products by activated sludge in the presence of a metabolic uncoupler o-chlorophenol in long-term operated sequencing batch reactors.

Cyclophosphamide-induced cystitis results in NLRP3-mediated inflammation in the hippocampus and symptoms of depression in rats.

Skeletal toxicity resulting from exposure of growing male rats to coplanar PCB 126 is associated with disruption of calcium homeostasis and the GH-IGF-1 axis and direct effects on bone formation.

Loss of the mitochondrial lipid cardiolipin leads to decreased glutathione synthesis.

Association of dioxin in maternal breast milk and salivary steroid hormone levels in preschool children: A five-year follow-up study of a Vietnam cohort.

Degradation studies of dimethachlor in soils and water by UHPLC-HRMS: putative elucidation of unknown metabolites.

Biomonitoring of non-persistent pesticides in urine from lactating mothers: Exposure and risk assessment.

Changes in urinary excretion of phthalates, phthalate substitutes, bisphenols and other polychlorinated and phenolic substances in young Danish men; 2009-2017.

Candidate Gene Networks for Acylsugar Metabolism and Plant Defense in Wild Tomato *Solanum pennellii*.

Which chemicals should be grouped together for mixture risk assessments of male reproductive disorders?

Analysis of 2,4-Dinitrophenol in Postmortem Blood and Urine by Gas Chromatography-Mass Spectrometry: Method Development and Validation and Report of Three Fatalities in the United States.

An unexpected new pathway for nitroxide radical production via more reactive nitrogen-centered amidyl radical intermediate during detoxification of the carcinogenic halogenated quinones by N-alkyl hydroxamic acids.

Integrative Metagenomics-Metabolomics for Analyzing the Relationship Between Microorganisms and Non-volatile Profiles of Traditional Xiaoqu.

Transporter Gene Regulation in Sandwich Cultured Human Hepatocytes Through the Activation of Constitutive Androstane Receptor (CAR) or Aryl Hydrocarbon Receptor (AhR).

Predominance of Metabolic Resistance in a Six-Way-Resistant Palmer Amaranth (*Amaranthus palmeri*) Population.

Curing of Cocoa Beans: Fine-Scale Monitoring of the Starter Cultures Applied and Metabolomics of the Fermentation and Drying Steps.

An *Ascophyllum nodosum*-Derived Biostimulant Protects Model and Crop Plants from Oxidative Stress.

Changes in the Serum Metabolome of Patients Treated With Broad-Spectrum Antibiotics.

Fast and Easy Phage-Tagging and Live/Dead Analysis for the Rapid Monitoring of Bacteriophage Infection.

The Protective Effect of Aspirin Eugenol Ester on Paraquat-Induced Acute Liver Injury Rats.

The Metabolomics of Childhood Atopic Diseases: A Comprehensive Pathway-Specific Review.

Secondary Metabolites with Agricultural Antagonistic Potentials from *Beauveria felina*, a Marine-Derived Entomopathogenic Fungus.

Cytochrome P450 Expression and Chemical Metabolic Activity before Full Liver Development in Zebrafish.

Characterization, Genetic Analyses, and Identification of QTLs Conferring Metabolic Resistance to a 4-Hydroxyphenylpyruvate Dioxygenase Inhibitor in Sorghum (*Sorghum bicolor*).

A Case of Paraquat Poisoning Presenting With Spontaneous Pneumothorax and Pneumomediastinum.

Coexpression Clusters and Allele-Specific Expression in Metabolism-Based Herbicide Resistance.

Toxicological effects of chlorophenols to green algae observed at various pH and concentration of humic acid.

Whether Gametophytes are Reduced or Unreduced in Angiosperms Might Be Determined Metabolically.

Endocrine-Disrupting Air Pollutants and Their Effects on the Hypothalamus-Pituitary-Gonadal Axis.

Impact of environmental toxin exposure on male fertility potential.

Modulating microbiota metabolism via bioaugmentation with *Lactobacillus casei* and *Acetobacter pasteurianus* to enhance acetoin accumulation during cereal vinegar fermentation.

Mucuna pruriens in Parkinson's and in some other diseases: recent advancement and future prospective.

Effects on the Liver Transcriptome in Baltic Salmon: Contributions of Contamination with Organohalogen Compounds and Origin of Salmon.

UbK is Involved in the Resistance of *Bacillus Subtilis* to Oxidative Stress.

Heat-not-burn tobacco products: an emerging threat to cardiovascular health.

Genome-scale metabolic modeling of *Acetobacter pasteurianus* 386B reveals its metabolic adaptation to cocoa fermentation conditions.

The impact of endocrine-disrupting chemical exposure in the mammalian hypothalamic-pituitary axis.

Exposure and cumulative risk assessment to non-persistent pesticides in Spanish children using biomonitoring.

Effects of agricultural pesticides on the reproductive system of aquatic wildlife species, with crocodylians as sentinel species.

Agrochemicals with estrogenic endocrine disrupting properties: Lessons Learned?

Metabolomics Profiling and Diagnosis Biomarkers Searching for Drug-Induced Liver Injury Implicated to *Polygonum multiflorum*: A Cross-Sectional Cohort Study.

Wrangling Shape-Shifting Morpheesins to Tackle Disease and Approach Drug Discovery.

Advancements in Low-Chill Blueberry *Vaccinium corymbosum* L. Tissue Culture Practices.

Evaluation of Callus Cultures to Elucidate the Metabolism of Tebuconazole, Flurtamone, Fenhexamid, and Metalaxyl-M in *Brassica napus* L., *Glycine max* (L.) Merr., *Zea mays* L., and *Triticum aestivum* L.

Risk Assessment of Pesticide Mixtures in Australian Rivers Discharging to the Great Barrier Reef.

Cytochrome P450 Herbicide Metabolism as the Main Mechanism of Cross-Resistance to ACCase- and ALS-Inhibitors in *Lolium* spp. Populations From Argentina: A Molecular Approach in Characterization and Detection.

Screening of Bioactive Metabolites and Biological Activities of Calli, Shoots, and Seedlings of *Mertensia maritima* (L.) Gray.

A laboratory investigation into features of morphology and physiology for their potential to predict reproductive success in male frogs.

Metabolic impact of persistent organic pollutants on gut microbiota.

A Comprehensive Review on Source, Types, Effects, Nanotechnology, Detection, and Therapeutic Management of Reactive Carbonyl Species Associated with Various Chronic Diseases.

Analysis of urinary VOCs using mass spectrometric methods to diagnose cancer: A review.

Correlation between the uncoupling metabolism induced by 2,4,6-trichlorophenol and sludge toxicity in sequence batch reactors.

Outcome of Canine Multicentric Lymphoma after Single or Divided Treatment with Cyclophosphamide in Multidrug Chemotherapy.

Tissue- and Region-Specific Accumulation of Arsenic Species, Especially in the Brain of Mice, After Long-term Arsenite Exposure in Drinking Water.

Occupational exposure to organophosphorus and carbamates in farmers in La Cienega, Jalisco, Mexico: oxidative stress and membrane fluidity markers.

Simultaneous determination of polar pesticides in human blood serum by liquid chromatography coupled to triple quadrupole mass spectrometer.

Variation in surface properties, metabolic capping, and antibacterial activity of biosynthesized silver nanoparticles: comparison of bio-fabrication potential in phytohormone-regulated cell cultures and naturally grown plants.

Analysis of large-scale monitoring data to identify spatial and temporal trend of risk for terbuthylazine and desethyl-terbuthylazine in surface water bodies of Po plain (Italy).

Online Headspace-Solid Phase Microextraction-Gas Chromatography-Mass Spectrometry-based untargeted volatile metabolomics for studying emerging complex biopesticides: A proof of concept.

Effects of oral exposure to arsenite on arsenic metabolism and transport in rat kidney.

Cloning, overexpression, purification, characterization and structural modelling of a metabolically active Fe(2+) dependent 2,6-dichloro-p-hydroquinone 1,2-dioxygenase (CpsA) from *Bacillus cereus* strain AOA-CPS_1.

Phytotoxicity, Morphological, and Metabolic Effects of the Sesquiterpenoid Nerolidol on *Arabidopsis thaliana* Seedling Roots.

Synthesis and antiproliferative effect of the proposed stereoisomer of the marine sponge metabolite halisphingosine A.

Longitudinal Study of Thyroid Hormones between Conventional and Organic Farmers in Thailand.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin Regulates the Expression of Aryl Hydrocarbon Receptor-Related Factors and Cytokines in Peripheral Blood Mononuclear Cells and CD4+ T cells from Patients with Atopic Dermatitis and Psoriasis.

In vitro effects of selected endocrine disruptors (DEHP, PCB118, BPA) on narrow-clawed crayfish (*Astacus leptodactylus*) primary cells.

Development and establishment of a QuEChERS-based extraction method for determining tembotrione and its metabolite AE 1417268 in corn, corn oil and certain animal-origin foods by HPLC-MS/MS.

Plasmid-Mediated Biodegradation of Chlorpyrifos and Analysis of Its Metabolic By-Products.

Serum metabolic changes associated with dioxin exposure in a Chinese male cohort.

Association of dietary intake and urinary excretion of inorganic arsenic in the Japanese subjects.

In Vitro Detoxification Studies of p-Cresol by Intestinal Bacteria Isolated from Human Feces.

Functional analysis of newly identified RYR1 variants in patients susceptible to malignant hyperthermia.

Xanthohumol Effect on 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Treated Japanese Quails in Terms of Serum Lipids, Liver Enzymes, Estradiol, and Thyroid Hormones.

Physiological and Oxidative Stress Responses of Lettuce to Cleomside A: A Thiohydroximate, as a New Allelochemical from *Cleome arabica* L.

TCDD-induced multi- and transgenerational changes in the methylome of male zebrafish gonads.

Nanometer accuracy statistical interferometric technique in monitoring the short-term effects of exogenous plant hormones, auxin and gibberellic acid, on rice plants.

Efficacy of Mushroom Metabolites (*Pleurotus ostreatus*) as A Natural Product for the Suppression of Broomrape Growth (*Orobancha crenata* Forsk) in Faba Bean Plants.

Gut Bacterial Species Distinctively Impact Host Purine Metabolites during Aging in *Drosophila*.

Correlation of polyamines, acrolein-conjugated lysine and polyamine metabolic enzyme levels with age in human liver.

Assessment of arsenic-induced modifications in the DNA methylation of insulin-related genes in rat pancreatic islets.

Moderate Wine Consumption Reduces Faecal Water Cytotoxicity in Healthy Volunteers.

Comparison of the basic morphology and function of 3D lung epithelial cultures derived from several donors.

High Throughput Residue Analysis of Indaziflam and its Metabolites in Palm Oil Using Liquid Chromatography-Tandem Mass Spectrometry.

Inhibition of rat brain and human red cell acetylcholinesterase by thiocarbamate herbicides.

Role of CAPE in reducing oxidative stress in animal models with traumatic brain injury.

Oxidative stress via the Maillard reaction is associated with the occurrence of internal browning in roots of sweetpotato (*Ipomoea batatas*).

Influence of surface water - groundwater interactions on the spatial distribution of pesticide metabolites in groundwater.

Urinary biomonitoring of subjects with different smoking habits. Part II: an untargeted metabolomic approach and the comparison with the targeted measurement of mercapturic acids.

Fungal and plant metabolites in industrially-processed fruit juices in Nigeria.

The Morphoregulatory Role of Thidiazuron: Metabolomics-Guided Hypothesis Generation for Mechanisms of Activity.

Predictors of Urinary Pyrethroid and Organophosphate Compound Concentrations among Healthy Pregnant Women in New York.

Metabolic cross-feeding in imbalanced diets allows gut microbes to improve reproduction and alter host behaviour.

Comparative assessment of the acute toxicity, haematological and genotoxic effects of ten commonly used pesticides on the African Catfish, *Clarias gariepinus* Burchell 1822.

Nanoparticles in Agroindustry: Applications, Toxicity, Challenges, and Trends.

Study of uptake, translocation, and metabolic behavior of pesticides in water milfoil.

Development of an ELISA for Measurement of Urinary 3-Hydroxypropyl Mercapturic Acid (3-HPMA), the Marker of Stroke.

Saliva as a non-invasive tool for monitoring oxidative stress in swimmers athletes performing a VO₂(max) cycle ergometer test.

Induction of Callogenesis, Organogenesis, and Embryogenesis in Non-Meristematic Explants of Bleeding Heart and Evaluation of Chemical Diversity of Key Metabolites from Callus.

Varying Protein Levels Influence Metabolomics and the Gut Microbiome in Healthy Adult Dogs.

How the AHR Became Important in Intestinal Homeostasis-A Diurnal FICZ/AHR/CYP1A1 Feedback Controls Both Immunity and Immunopathology.

Protective Effect of Fenofibrate on Oxidative Stress-Induced Apoptosis in Retinal-Choroidal Vascular Endothelial Cells: Implication for Diabetic Retinopathy Treatment.

Metabolite Profile and Immunomodulatory Properties of Bellflower Root Vinegar Produced Using *Acetobacter pasteurianus* A11-2.

Aqueous Humor Outflow Requires Active Cellular Metabolism in Mice.

Dietary Components, Microbial Metabolites and Human Health: Reading between the Lines.

The relationship between perinatal exposure to dioxins and serum steroid hormone levels in preschool-aged children at an e-waste region in China.

Metabolic and proteomic analysis of nitrogen metabolism mechanisms involved in the sugarcane - *Fusarium verticillioides* interaction.

Visual system: An understudied target of aquatic toxicology.

Bioactivity of the Novel Fungicide SYP-14288 Against Plant Pathogens and the Study of its Mode of Action Based on Untargeted Metabolomics.

Net release and uptake of xenometabolites across intestinal, hepatic, muscle, and renal tissue beds in healthy conscious pigs.

Agrochemicals disrupt multiple endocrine axes in amphibians.

Potentials and pitfalls of transient in vitro reporter bioassays: interference by vector geometry and cytotoxicity in recombinant zebrafish cell lines.

Energy pathways associated with sustained spermatozoon motility in the endangered Siberian sturgeon *Acipenser baerii*.

Spatiotemporal variation in occurrence and co-occurrence of pesticides, hormones, and other organic contaminants in rivers in the Chesapeake Bay Watershed, United States.

Assessment of the absorbed dose after exposure to surgical smoke in an operating room.

Mass Balance, Metabolism, and Excretion of Cenobamate, a New Antiepileptic Drug, After a Single Oral Administration in Healthy Male Subjects.

Urinary Biomarkers of Exposure to Volatile Organic Compounds from the Population Assessment of Tobacco and Health Study Wave 1 (2013-2014).

Synergy between Experiments and Computations: A Green Channel for Revealing Metabolic Mechanism of Xenobiotics in Chemical Toxicology.

One pot green synthesis of m-aminophenol-urea-glyoxal resin as pipette tip solid-phase extraction adsorbent for simultaneous determination of four plant hormones in watermelon juice.

Synthesis of cyclophosphamide metabolites by a peroxygenase from *Marasmius rotula* for toxicological studies on human cancer cells.

Temporal Shotgun Metagenomics Revealed the Potential Metabolic Capabilities of Specific Microorganisms During Lambic Beer Production.

Organic selenium supplement partially alleviated diquat-induced oxidative insults and hepatic metabolic stress in nursery pigs.

Cardiac amyloidosis possibly secondary to Agent Orange exposure.

Quantitative Proteomic Profiling of Mitochondrial Toxicants in a Human Cardiomyocyte Cell Line.

Reproductive enhancement in buffalo: looking at urinary pheromones and hormones.

Uroprotective mechanisms of natural products against cyclophosphamide-induced urinary bladder toxicity: A comprehensive review.

Tissue distribution, hormonal regulation, ontogeny, diurnal expression, and induction of mouse cystine transporters *Slc3a1* and *Slc7a9*.

Dioxin-like and non-dioxin-like PCBs differentially regulate the hepatic proteome and modify diet-induced nonalcoholic fatty liver disease severity.

Enantioselective effects of imazethapyr residues on *Arabidopsis thaliana* metabolic profile and phyllosphere microbial communities.

Functional modulation of sarcolemmal K(ATP) channels by atrial natriuretic peptide-elicited intracellular signaling in adult rabbit ventricular cardiomyocytes.

The association between dioxins and steroid hormones in general adult males: a cross-sectional study in an e-waste region of China.

Review of Health Consequences of Electronic Cigarettes and the Outbreak of Electronic Cigarette, or Vaping, Product Use-Associated Lung Injury.

Intergenerational toxicity of nonylphenol ethoxylate (NP-9) in *Caenorhabditis elegans*.

Urinary biomonitoring of subjects with different smoking habits. Part I: Profiling mercapturic acids.

Recyclable Eu(3+) functionalized Hf-MOF fluorescent probe for urinary metabolites of some organophosphorus pesticides.

Causes and possibilities to circumvent cyclophosphamide toxicity.

Gut microbiota and blood metabolomics in weaning multiparous sows: Associations with oestrous.

Cross-Sectional and Longitudinal Effects of PCB Exposure on Human Stress Hormones in the German HELPCB Surveillance Program.

Metabolic Cooperation among Commensal Bacteria Supports *Drosophila* Juvenile Growth under Nutritional Stress.

Exploring the effects of carbon source level on the degradation of 2,4,6-trichlorophenol in the co-metabolism process.

Longitudinal Study of Metabolic Biomarkers among Conventional and Organic Farmers in Thailand.

Structural Studies of Glutamate Dehydrogenase (Isoform 1) From *Arabidopsis thaliana*, an Important Enzyme at the Branch-Point Between Carbon and Nitrogen Metabolism.

Regulation of Spermine Oxidase through Hypoxia-Inducible Factor-1 α Signaling in Retinal Glial Cells under Hypoxic Conditions.

Evaluation of different types of arsenic methylation and its relationship with metabolic syndrome in an area chronically exposed to arsenic.

Oxidative stress delays development and alters gene expression in the agricultural pest moth, *Helicoverpa armigera*.

In older women, a high-protein diet including animal-sourced foods did not impact serum levels and urinary excretion of trimethylamine-N-oxide.

Structural and metabolic performance of p-cresol producing microbiota in different carbon sources.

Multigenerational and transgenerational effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on ovarian reserve and follicular development through AMH/AMHR2 pathway in adult female rats.

Metabolomic and Transcriptomic Investigation of Metabolic Perturbations in *Oryza sativa* L. Triggered by Three Pesticides.

Fluxes of agricultural nitrogen and metolachlor metabolites are highly correlated in a first order stream in Maryland, USA.

Microencapsulation of luteinizing hormone-releasing hormone agonist in poly (lactic-co-glycolic acid) microspheres by spray-drying.

Non-Targeted Metabolomic Profiling of Coronary Heart Disease Patients With Taohong Siwu Decoction Treatment.

Production of the secondary metabolite catechin by in vitro cultures of *Camellia sinensis* L.

Instability of urinary excreted methyl-2-acetamido-2-deoxy-1-seleno- β -D-galactopyranoside (selenosugar 1), the main elimination product of human selenium metabolism, and measures for its stabilization.

Genotoxicant exposure, activation of the aryl hydrocarbon receptor, and lipid peroxidation in cultured human alveolar type II A549 cells.

N,O-Nucleoside Analogues: Metabolic and Apoptotic Activity.

Exposure assessment of toxic metals and organochlorine pesticides among employees of a natural history museum.

Sodium arsenite toxicity on hematology indices and reproductive parameters in Teddy goat bucks and their amelioration with vitamin C.

A comparison of the fate of diflufenican in agricultural sandy soil and gravel used in urban areas.

Chronic arsenic exposure impairs adaptive thermogenesis in male C57BL/6J mice.

Compositional profiles, persistency and toxicity of polychlorinated naphthalene (PCN) congeners in edible cod liver products from 1972 to 2017.

Immunohistochemical and histological evaluations of cyclophosphamide-induced acute cardiotoxicity in wistar rats: The role of turmeric extract (curcuma).

Kaempferol modulates TCDD- and t-BHQ-induced drug-metabolizing enzymes and luteolin enhances this effect.

Decreased Glucose Utilization Contributes to Memory Impairment in Patients with Glufosinate Ammonium Intoxication.

Metabolomic Profiling Revealed Potential Biomarkers in Patients With Moyamoya Disease.

Icariin protects against sodium azide-induced neurotoxicity by activating the PI3K/Akt/GSK-3 β signaling pathway.

P-cresol Alters Brain Dopamine Metabolism and Exacerbates Autism-Like Behaviors in the BTBR Mouse.

Assessing the impact of arsenic metabolism efficiency on DNA methylation using Mendelian randomization.

Dioxin male rat reproductive toxicity mode of action and relative potency of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,7,8-tetrachlorodibenzofuran characterized by fetal pituitary and testis transcriptome profiling.

Dietary exposure to pesticide residues and associated health risks in infants and young children - Results of the French infant total diet study.

The potential endocrine disruption of pesticide transformation products (TPs): The blind spot of pesticide risk assessment.

Urinary Arsenic Species are Detectable in Urban Underserved Hispanic/Latino Populations: A Pilot Study from the Study of Latinos: Nutrition & Physical Activity Assessment Study (SOLNAS).

Manipulating Gibberellin Control Over Growth and Fertility as a Possible Target for Managing Wild Radish Weed Populations in Cropping Systems.

Simultaneous Analysis and Dietary Exposure Risk Assessment of Fomesafen, Clomazone, Clethodim and Its Two Metabolites in Soybean Ecosystem.

Drosophila SLC22 Orthologs Related to OATs, OCTs, and OCTNs Regulate Development and Responsiveness to Oxidative Stress.

Dissipation behavior, residues distribution and dietary risk assessment of tembotrione and its metabolite in maize via QuEChERS using HPLC-MS/MS technique.

Metformin lowers glucose 6-phosphate in hepatocytes by activation of glycolysis downstream of glucose phosphorylation.

Establishment of an in vitro regeneration system and genetic transformation of the Tunisian 'Maltese half-blood' (*Citrus sinensis*): an agro-economically important variety.

Does the application of human waste as a fertilization material in agricultural production pose adverse effects on human health attributable to contaminants of emerging concern?

Evaluation of potential sodium-iodide symporter (NIS) inhibitors using a secondary Fischer rat thyroid follicular cell (FRTL-5) radioactive iodide uptake (RAIU) assay.

Primary Metabolite Responses to Oxidative Stress in Early-Senescing and Paraquat Resistant *Arabidopsis thaliana* rcd1 (Radical-Induced Cell Death1).

Phytotoxic Metabolites from Three *Neofusicoccum* Species Causal Agents of *Botryosphaeria* Dieback in Australia, Luteopyroxin, Neoanthraquinone, and Luteoxepinone, a Disubstituted Furo- $\hat{\pm}$ -pyrone, a Hexasubstituted Anthraquinone, and a Trisubstituted Oxepi-2-one from *Neofusicoccum luteum*.

In utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure exacerbates urinary dysfunction in hormone-treated C57BL/6J mice through a non-malignant mechanism involving proteomic changes in the prostate that differ from those elicited by testosterone and estradiol.

Water Deficit Affects the Growth and Leaf Metabolite Composition of Young Loquat Plants.

Current Perspectives on the Auxin-Mediated Genetic Network that Controls the Induction of Somatic Embryogenesis in Plants.

Identification of Serum-Based Metabolic Feature and Characteristic Metabolites in Paraquat Intoxicated Mouse Models.

Characterization of Volatile Organic Compound Metabolites in Cigarette Smokers, Electronic Nicotine Device Users, Dual Users, and Nonusers of Tobacco.

Diabetes and Toxicant Exposure.

Mechanisms of Metabolism Interaction Between p-Cresol and Mycophenolic Acid.

Metabolic profile and behavior of clethodim and spirotetramat in herbs during plant growth and processing under controlled conditions.

High resolution respirometry to assess function of mitochondria in native homogenates of human heart muscle.

Novel imaging biomarkers for mapping the impact of mild mitochondrial uncoupling in the outer retina in vivo.

Curcumin Attenuates Acrolein-induced COX-2 Expression and Prostaglandin Production in Human Umbilical Vein Endothelial Cells.

Graves' disease: Epidemiology, genetic and environmental risk factors and viruses.

An Analysis of Biomarkers in Patients with Chronic Pain.

Erratum to: Identification of phenol- and p-cresol-producing intestinal bacteria by using media supplemented with tyrosine and its metabolites.

Developmental Exposure to PCB153 (2,2',4,4',5,5'-Hexachlorobiphenyl) Alters Circadian Rhythms and the Expression of Clock and Metabolic Genes.

Metabolic switch in energy metabolism mediates the sublethal effects induced by glyphosate-based herbicide on tadpoles of a farmland frog *Microhyla fissipes*.

Cost-effective detection of genome-wide signatures for 2,4-D herbicide resistance adaptation in red clover.

Acute and chronic toxicity of herbicides and their mixtures measured by *Aliivibrio fischeri* ecotoxicological assay.

Adipocyte epigenetic alterations and potential therapeutic targets in transgenerationally inherited lean and obese phenotypes following ancestral exposures.

Comparative cyto- and genotoxicity assessment of glyphosate and glyphosate-based herbicides in human peripheral white blood cells.

Glycyrrhizic acid modulates the atrazine-induced apoptosis in rabbit spleen.

Environmental risk assessment of triazine herbicides in the Bohai Sea and the Yellow Sea and their toxicity to phytoplankton at environmental concentrations.

Paraquat exposure delays late-stage Leydig cell differentiation in rats during puberty.

Aldo-keto Reductase Metabolizes Glyphosate and Confers Glyphosate Resistance in *Echinochloa colona*.

Physiologically Based Pharmacokinetic Modeling of Salivary Concentrations for Noninvasive Biomonitoring of 2,4-Dichlorophenoxyacetic Acid (2,4-D).

Atrazine-induced toxicity in goat spermatozoa is alleviated to some extent by polyphenol-enriched feed.

Immunotoxicity and transcriptome analysis of zebrafish embryos in response to glufosinate-ammonium exposure.

Effect of the herbicide atrazine and its major metabolite, DACT, on bovine sperm cryotolerance.

Gut microbiota and neurological effects of glyphosate.

Antigerminative comparison between naturally occurring naphthoquinones and commercial pesticides.
Soil dehydrogenase activity used as bioindicator to test soil toxicity.

Pesticide and trace element residues in honey and beeswax combs from Israel in association with human risk assessment and honey adulteration.

Comparative molecular and metabolic responses of wheat seedlings (*Triticum aestivum* L.) to the imazethapyr enantiomers S-IM and R-IM.

[From the traces in the wells of the urban aqueduct network to the subsequent prohibition of the use of glyphosate: the case of an area of high-intensity wine production in the province of Treviso, Veneto].

Novel insights into the mechanism of cyclophosphamide-induced bladder toxicity: chloroacetaldehyde's contribution to urothelial dysfunction in vitro.

Atrazine induces necroptosis by miR-181-5p targeting inflammation and glycometabolism in carp lymphocytes.

A glyphosate-based herbicide induces sub-lethal effects in early life stages and liver cell line of rainbow trout, *Oncorhynchus mykiss*.

Genotoxic, cytotoxic, and cytopathological effects in rats exposed for 18 months to a mixture of 13 chemicals in doses below NOAEL levels.

The response of the algae *Fucus virsoides* (Fucales, Ochrophyta) to Roundup® solution exposure: A metabolomics approach.

Effects of chronic glyphosate exposure to pregnant mice on hepatic lipid metabolism in offspring.

Effects of 2,4-D-based herbicide (DMA® 806) on sensitivity, respiration rates, energy reserves and behavior of tadpoles.

Imbalances in the male reproductive function of the estuarine crab *Neohelice granulata*, caused by glyphosate.

Impact of diuron and S-metolachlor on the freshwater diatom *Gomphonema gracile*: Complementarity between fatty acid profiles and different kinds of ecotoxicological impact-endpoints.

Ecotoxicological hazard of a mixture of glyphosate and aminomethylphosphonic acid to the mussel *Mytilus galloprovincialis* (Lamarck 1819).

Nuclear receptor AHR-mediated xenobiotic detoxification pathway involves in atrazine-induced nephrotoxicity in quail (*Coturnix C. coturnix*).

Paraquat induced impaired reproductive function and modulation of retinal and extra-retinal photoreceptors in Japanese quail (*Coturnix coturnix japonica*).

Cytochrome P450 and Glutathione-S-Transferase Activity are Altered Following Environmentally Relevant Atrazine Exposures in Crayfish (*Faxoniusvirilis*).

Animal models in the neurotoxicology of 2,4-D.

Kinetics of the metabolic effects, distribution spaces and lipid-bilayer affinities of the organo-chlorinated herbicides 2,4-D and picloram in the liver.

Protective mechanism of 1-methylhydantoin against lung injury induced by paraquat poisoning.

Arsenite and its trivalent methylated metabolites inhibit glucose-stimulated calcium influx and insulin secretion in murine pancreatic islets.

Effects of the glyphosate-based herbicide roundup on the survival, immune response, digestive activities and gut microbiota of the Chinese mitten crab, *Eriocheir sinensis*.

Xenobiotic mediated diabetogenesis: Developmental exposure to dichlorvos or atrazine leads to type 1 or type 2 diabetes in *Drosophila*.

[Exposure of vapors to formaldehyde and acrolein: A systematic review].

Melatonin protects against Fenoxaprop-ethyl exposure-induced meiotic defects in mouse oocytes.

Maternal glyphosate-based herbicide exposure alters antioxidant-related genes in the brain and serum metabolites of male rat offspring.

Transcriptome responses to the natural phytotoxin t-chalcone in *Arabidopsis thaliana* L.

Conserved roles of glucose in suppressing reactive oxygen species-induced cell death and animal survival.

Effects of ecologically relevant concentrations of Boral[®] 500 SC, Glifosato[®] Biocarb, and a blend of both herbicides on markers of metabolism, stress, and nutritional condition factors in bullfrog tadpoles.

Acute in vitro exposure to environmentally relevant atrazine levels perturbs bovine preimplantation embryo metabolism and cell number.

Atrazine induced transgenerational reproductive effects in medaka (*Oryzias latipes*).

Quizalofop-p-Ethyl Induces Adipogenesis in 3T3-L1 Adipocytes.

Serial measurement of glyphosate blood concentration in a glyphosate potassium herbicide-intoxicated patient: A case report.

The effects of Roundup[®] in embryo development and energy metabolism of the zebrafish (*Danio rerio*).

Activation of the N-methyl-d-aspartate receptor is involved in glyphosate-induced renal proximal tubule cell apoptosis.

Cytotoxic activity of pentachlorophenol and its active metabolites in SH-SY5Y neuroblastoma cells.

Exposure to herbicides reduces larval sensitivity to insecticides in *Spodoptera litura* (Lepidoptera: Noctuidae).

Thyroid Hormones in Conventional and Organic Farmers in Thailand.

Effects of short-time exposure to atrazine on miRNA expression profiles in the gonad of common carp (*Cyprinus carpio*).

Microcosm study of atrazine bioremediation by indigenous microorganisms and cytotoxicity of biodegraded metabolites.

Glyphosate-based herbicides at low doses affect canonical pathways in estrogen positive and negative breast cancer cell lines.

Effects of low glyphosate-based herbicide concentrations on endocrine-related gene expression in the decapoda *Macrobrachium potiuna*.

Evaluating sub-lethal stress from Roundup(®) exposure in *Artemia franciscana* using (1)H NMR and GC-MS.

Effect of Individual and Combined Treatments of Pesticide, Fertilizer, and Salt on Growth and Corticosterone Levels of Larval Southern Leopard Frogs (*Lithobates sphenoccephala*).

Exploring the glyphosate-degrading characteristics of a newly isolated, highly adapted indigenous bacterial strain, *Providencia rettgeri* GDB 1.

Unravelling mesosulfuron-methyl phytotoxicity and metabolism-based herbicide resistance in *Alopecurus aequalis*: Insight into regulatory mechanisms using proteomics.

Impact of the glyphosate-based commercial herbicide, its components and its metabolite AMPA on non-target aquatic organisms.

Enrofloxacin and Roundup(®) interactive effects on the aquatic macrophyte *Elodea canadensis* physiology.

Reactive oxygen species trigger the fast action of glufosinate.

Gene expression patterns and related enzymatic activities of detoxification and oxidative stress systems in zebrafish larvae exposed to the 2,4-dichlorophenoxyacetic acid herbicide.

Neuroprotective effects of PACAP against paraquat-induced oxidative stress in the *Drosophila* central nervous system.

Glimepiride prevents paraquat-induced Parkinsonism in mice: involvement of oxidative stress and neuroinflammation.

Metabolic response of bacteria to elevated concentrations of glyphosate-based herbicide.

Impacts of S-metolachlor and terbuthylazine in fatty acid and carbohydrate composition of the benthic clam *Scrobicularia plana*.

Inflammatory Effects of Subacute Exposure of Roundup in Rat Liver and Adipose Tissue.

Effect of glyphosate on the growth, morphology, ultrastructure and metabolism of *Scenedesmus vacuolatus*.

How Glyphosate Impairs Liver Condition in the Field Lizard *Podarcis siculus* (Rafinesque-Schmaltz, 1810): Histological and Molecular Evidence.

Mutational signatures of redox stress in yeast single-strand DNA and of aging in human mitochondrial DNA share a common feature.

Comparative studies on endogenous stress hormones, antioxidant, biochemical and hematological status of metabolic disturbance in albino rat exposed to roundup herbicide and its active ingredient glyphosate.

Histopathological and ultrastructural indices for the assessment of glyphosate-based herbicide cytotoxicity in decapod crustacean hepatopancreas.

Prenatal exposure to the herbicide 2,4-D is associated with deficits in auditory processing during infancy.

Acrolein Is Involved in the Synergistic Potential of Cigarette Smoking- and Betel Quid Chewing-Related Human Oral Cancer.

Paraquat Exposure Increases Oxidative Stress Within the Dorsal Striatum of Male Mice With a Genetic Deficiency in One-carbon Metabolism.

The Alexipharmic Mechanisms of Five Licorice Ingredients Involved in CYP450 and Nrf2 Pathways in Paraquat-Induced Mice Acute Lung Injury.

Assessment of Glyphosate Induced Epigenetic Transgenerational Inheritance of Pathologies and Sperm Epimutations: Generational Toxicology.

Glyphosate, but not its metabolite AMPA, alters the honeybee gut microbiota.

Metabolomics Analysis in Acute Paraquat Poisoning Patients Based on UPLC-Q-TOF-MS and Machine Learning Approach.

Metabolic profiling of amino acids in paraquat-induced acute kidney injury.

Is soil contamination by a glyphosate commercial formulation truly harmless to non-target plants? - Evaluation of oxidative damage and antioxidant responses in tomato.

2,4-Dichlorophenoxyacetic acid containing herbicide impairs essential visually guided behaviors of larval fish.

Identification of the first glyphosate transporter by genomic adaptation.

Demonstrating the need for chemical exposure characterisation in a microplate test system: toxicity screening of sixteen pesticides on two marine microalgae.

Long-term Immunotoxic Effects of Oral Prenatal and Neonatal Atrazine Exposure.

Effects of glyphosate and aminomethylphosphonic acid on an isogenic model of the human blood-brain barrier.

Combined effects of pentachlorophenol and its byproduct hexachlorobenzene on endocrine and reproduction in zebrafish.

The GMO90+ Project: Absence of Evidence for Biologically Meaningful Effects of Genetically Modified Maize-based Diets on Wistar Rats After 6-Months Feeding Comparative Trial.

The Impact of Agent Orange Exposure on Prostate Cancer Outcomes.

Short-term glucose dysregulation following acute poisoning with organophosphorus insecticides but not herbicides, carbamate or pyrethroid insecticides in South Asia.

Subchronic low-dose 2,4-D exposure changed plasma acylcarnitine levels and induced gut microbiome perturbations in mice.

The Ramazzini Institute 13-week pilot study glyphosate-based herbicides administered at human-equivalent dose to Sprague Dawley rats: effects on development and endocrine system.

Toxicological impact of oxyfluorfen 24% herbicide on the reproductive system, antioxidant enzymes, and endocrine disruption of *Biomphalaria alexandrina* (Ehrenberg, 1831) snails.

Physiological responses of eelgrass (*Zostera marina*) to ambient stresses such as herbicide, insufficient light, and high water temperature.

Antioxidative status, immunological responses, and heat shock protein expression in hepatopancreas of Chinese mitten crab, *Eriocheir sinensis* under the exposure of glyphosate.

Hepatotoxicity and reproductive disruption in male lizards (*Eremias argus*) exposed to glufosinate-ammonium contaminated soil.

PBTK model for assessment of operator exposure to haloxyfop using human biomonitoring and toxicokinetic data.

Effects of dietary antioxidants and environmental stressors on immune function and condition in *Lithobates* (*Rana*) *sylvaticus*.

CYP81A P450s are involved in concomitant cross-resistance to acetolactate synthase and acetyl-CoA carboxylase herbicides in *Echinochloa phyllopogon*.

Enantioselective thyroid disruption in zebrafish embryo-larvae via exposure to environmental concentrations of the chloroacetamide herbicide acetochlor.

Alleviation of paraquat-induced oxidative lung injury by betaine via regulation of sulfur-containing amino acid metabolism despite the lack of betaine-homocysteine methyltransferase (BHMT) in the lung.

Assessment of the ecotoxicological impact of natural and synthetic β^2 -triketone herbicides on the diversity and activity of the soil bacterial community using omic approaches.

Male mammary gland development and methylation status of estrogen receptor alpha in Wistar rats are modified by the developmental exposure to a glyphosate-based herbicide.

Cyanobacterial antimetabolite 7-deoxy-sedoheptulose blocks the shikimate pathway to inhibit the growth of prototrophic organisms.

Adverse effects of acrolein, a ubiquitous environmental toxicant, on muscle regeneration and mass.

Moderation of physiological responses in rice plants with Azolla under 2,4-Dichlorophenoxy acetic acid stress.

Modeling microbial communities from atrazine contaminated soils promotes the development of biostimulation solutions.

Disruption of oocyte maturation by selected environmental chemicals in zebrafish.

Using mathematical modeling to infer the valence state of arsenicals in tissues: A PBPK model for dimethylarsinic acid (DMA(V)) and dimethylarsinous acid (DMA(III)) in mice.

Longitudinal stability in cigarette smokers of urinary biomarkers of exposure to the toxicants acrylonitrile and acrolein.

Modeling the mobility of glyphosate from two contrasting agricultural soils in laboratory column experiments.

Respiration induced by substrate and bacteria diversity after application of diuron, hexazinone, and sulfometuron-methyl alone and in mixture.

Effects of s-metolachlor on early life stages of marbled crayfish.

Herbicide Paraquat provokes the stress responses of HPA axis of laboratory mouse, *Mus musculus*.

Neuroprotective action of Eicosapentaenoic (EPA) and Docosahexaenoic (DHA) acids on Paraquat intoxication in *Drosophila melanogaster*.

Atrazine exposure triggers common carp neutrophil apoptosis via the CYP450s/ROS pathway.

Effect of trans-Cinnamaldehyde on Methicillin-Resistant *Staphylococcus aureus* Biofilm Formation: Metabolic Activity Assessment and Analysis of the Biofilm-Associated Genes Expression.

Brain ethanol-metabolizing enzymes are differentially expressed in lead-exposed animals after voluntary ethanol consumption: Pharmacological approaches.

Effect of Fenofibrate on the Expression of Inflammatory Mediators in a Diabetic Rat Model.

Association of plasma folate, vitamin B12 levels, and arsenic methylation capacity with developmental delay in preschool children in Taiwan.

Evaluation of relaxant responses properties of cinnamon essential oil and its major component, cinnamaldehyde on human and rat corpus cavernosum.

Speciation analysis of arsenic in urine samples from APL patients treated with single agent As(2)O(3) by HPLC-HG-AFS.

The relationship between acrolein and oxidative stress in COPD: in systemic plasma and in local lung tissue.

Cinnamaldehyde Ameliorates High-Glucose-Induced Oxidative Stress and Cardiomyocyte Injury Through Transient Receptor Potential Ankyrin 1.

Photobiomodulation therapy reduces acute pain and inflammation in mice.

Mendelian randomization of inorganic arsenic metabolism as a risk factor for hypertension- and diabetes-related traits among adults in the Hispanic Community Health Study/Study of Latinos (HCHS/SOL) cohort.

Anti-inflammatory effect of trans-4-methoxycinnamaldehyde from *Etilingera pavieana* in LPS-stimulated macrophages mediated through inactivation of NF- κ B and JNK/c-Jun signaling pathways and in rat models of acute inflammation.

Activation of Nrf2 attenuates delayed gastric emptying in obesity induced diabetic (T2DM) female mice.

Cinnamaldehyde regulates H₂O₂-induced skeletal muscle atrophy by ameliorating the proteolytic and antioxidant defense systems.

Topical Application of Cinnamaldehyde Promotes Faster Healing of Skin Wounds Infected with *Pseudomonas aeruginosa*.

Time course of arsenic species in red blood cells of acute promyelocytic leukemia (APL) patients treated with single agent arsenic trioxide.

Exposure to atrazine during puberty reduces sperm viability, increases weight gain and alters the expression of key metabolic genes in the liver of male mice.

On the Use of Hair Analysis for Assessing Arsenic Intoxication.

Inhibition of the Nrf2/HO-1 Axis Suppresses the Mitochondria-Related Protection Promoted by Gastrodin in Human Neuroblastoma Cells Exposed to Paraquat.

Curcumin and Cinnamaldehyde as PTP1B Inhibitors With Antidiabetic and Anticancer Potential.

Cinnamaldehyde ameliorates STZ-induced rat diabetes through modulation of IRS1/PI3K/AKT2 pathway and AGEs/RAGE interaction.

Mitochondrial superoxide generation induces a parkinsonian phenotype in zebrafish and huntingtin aggregation in human cells.

Urinary acrolein metabolite levels in severe acute alcoholic hepatitis patients.

Hydrogen cyanamide induces grape bud endodormancy release through carbohydrate metabolism and plant hormone signaling.

Enhanced Metabolic Degradation: The Last Evolved Glyphosate Resistance Mechanism of Weeds?

Sustained Human Background Exposure to Acrolein Evidenced by Monitoring Urinary Exposure Biomarkers.

Investigation of the presence of glyphosate and its major metabolite AMPA in Greek soils.

Assessment of hematological, hepato-renal, antioxidant, and hormonal responses of *Clarias gariepinus* exposed to sub-lethal concentrations of oxyfluorfen.

Superoxide-hydrogen peroxide imbalance differentially modulates the keratinocytes cell line (HaCaT) oxidative metabolism via Keap1-Nrf2 redox signaling pathway.

Purification, molecular characterization and metabolic mechanism of an aerobic tetrabromobisphenol A dehalogenase, a key enzyme of halorespiration in *Ochrobactrum* sp. T.

Trp-1999-Ser mutation of acetyl-CoA carboxylase and cytochrome P450s-involved metabolism confer resistance to fenoxaprop-P-ethyl in *Polypogon fugax*.

Short-chain lipid peroxidation products form covalent adducts with pyruvate kinase and inhibit its activity in vitro and in breast cancer cells.

Analysis of Soybean Somatic Embryogenesis Using Chromosome Segment Substitution Lines and Transcriptome Sequencing.

Mitochondrial Oxidative Stress Impairs Energy Metabolism and Reduces Stress Resistance and Longevity of *C. elegans*.

Rapid metabolism increases the level of 2,4-D resistance at high temperature in common waterhemp (*Amaranthus tuberculatus*).

Enhanced metabolism causes reduced flufenacet sensitivity in black-grass (*Alopecurus myosuroides* Huds.) field populations.

Unsaturated Aldehyde Acrolein Promotes Retinal Glial Cell Migration.

Isolation, identification and characterization of *Streptomyces* metabolites as a potential bioherbicide.

Cellular Uptake and Clearance of Oxidatively-modified Apolipoprotein E3 by Cerebral Cortex Endothelial Cells.

The Antialgal Mechanism of Luteolin-7-O-Glucuronide on *Phaeocystis globosa* by Metabolomics Analysis.

Fast analysis of glufosinate, glyphosate and its main metabolite, aminomethylphosphonic acid, in edible oils, by liquid chromatography coupled with electrospray tandem mass spectrometry.

Speciation transformation of arsenic in abalone viscera hydrolysate fraction: In vitro digestion and in vivo metabolism.

2,4-D causes oxidative stress induction and apoptosis in human dental pulp stem cells (hDPSCs).

Bioavailability and metabolism in a soil-crop system compared using DGT and conventional extraction techniques.

NMR-based metabolomics and bioassays to study phytotoxic extracts and putative phytotoxins from Mediterranean plant species.

Genotoxicity of water samples from an area of the Pampean region (Argentina) impacted by agricultural and livestock activities.

Role of Glutamine Synthetase Isogenes and Herbicide Metabolism in the Mechanism of Resistance to Glufosinate in *Lolium perenne* L. spp. multiflorum Biotypes from Oregon.

Metabolism and disposition of arsenic species from controlled dosing with dimethylarsinic acid (DMA(V)) in adult female CD-1 mice. V. Toxicokinetic studies following oral and intravenous administration.

Residues of pesticides and some metabolites in dissolved and particulate phase in surface stream water of Cachapoal River basin, central Chile.

Target-Site and Metabolic Resistance Mechanisms to Penoxsulam in Barnyardgrass (*Echinochloa crus-galli* (L.) P. Beauv).

A urinary metabolomics study of a Polish subpopulation environmentally exposed to arsenic.

Salicylic acid alleviates glyphosate-induced oxidative stress in *Hordeum vulgare* L.

Biological effect of protein modifications by lipid peroxidation products.

Concentration of metabolites from *Phoma* sp. using microfiltration membrane for increasing bioherbicidal activity.

Metabolic Activation and Cytotoxicity of Aloe-Emodin Mediated by Sulfotransferases.

Role of CYP81A cytochrome P450s in clomazone metabolism in *Echinochloa phyllopogon*.

Behavior of the Chiral Herbicide Imazamox in Soils: pH-Dependent, Enantioselective Degradation, Formation and Degradation of Several Chiral Metabolites.

Diquat Determines a Deregulation of lncRNA and mRNA Expression in the Liver of Postweaned Piglets.

Pentachlorophenol-induced cytotoxicity in human erythrocytes: enhanced generation of ROS and RNS, lowered antioxidant power, inhibition of glucose metabolism, and morphological changes.

Towards integrated multi-sensor platform using dual electrochemical and optical detection for on-site pollutant detection in water.

Direct Determination of Glyphosate and its Metabolite AMPA in Soil Using Mixed-Mode Solid-Phase Purification and LC-MS/MS Determination on a Hypercarb Column.

Effect of roxarsone metabolites in chicken manure on soil biological property.

â€¦ Fell Upas Sits, the Hydra-Tree of Death (â€¦), or the Phytotoxicity of Trees.

Dual-template imprinted polymers for class-selective solid-phase extraction of seventeen triazine herbicides and metabolites in agro-products.

Use of an integrated metabolomics platform for mechanistic investigations of three commonly used algaecides on cyanobacterium, *Microcystis aeruginosa*.

Simultaneous determination of saflufenacil and three metabolites in five agriculture products using liquid chromatography-Tandem mass spectrometry.

Effects of inhibition of hepatic sulfotransferase activity on renal genotoxicity induced by lucidin-3-O-primeveroside.

Detection of glyphosate and its metabolites in food of animal origin based on ion-chromatography-high resolution mass spectrometry (IC-HRMS).

Interaction of methyl viologen-induced chloroplast and mitochondrial signalling in Arabidopsis.

Gene-environment interaction and maternal arsenic methylation efficiency during pregnancy.

Removal of batch effects using stratified subsampling of metabolomic data for in vitro endocrine disruptors screening.

A method for determining glyphosate and its metabolite aminomethyl phosphonic acid by gas chromatography-flame photometric detection.

Recent developments in metabolomics-based research in understanding transgenic grass metabolism.

Does juvenile hormone prompt oxidative stress in male damselflies?

Effects of 2,4-Dichlorophenoxyacetic Acid on Cucumber Fruit Development and Metabolism.

Redox-dependent catalase mimetic cerium oxide-based nanozyme protect human hepatic cells from 3-AT induced acatalasemia.

Yeast chemogenomic screen identifies distinct metabolic pathways required to tolerate exposure to phenolic fermentation inhibitors ferulic acid, 4-hydroxybenzoic acid and coniferyl aldehyde.

Metribuzin Resistance in a Wild Radish (*Raphanus raphanistrum*) Population via Both psbA Gene Mutation and Enhanced Metabolism.

Reduced Absorption and Impaired Translocation Endows Glyphosate Resistance in *Amaranthus palmeri* Harvested in Glyphosate-Resistant Soybean from Argentina.

Metabolic activity testing can underestimate acute drug cytotoxicity as revealed by HepG2 cell clones overexpressing cytochrome P450 2C19 and 3A4.

Development of native forest species of the Atlantic forest in soil contaminated with hormonal herbicides.

[Determination of Flufenacet and Its Metabolites in Agricultural Products by LC-MS/MS].

Reduction of Kiss1 expression in the anteroventral periventricular nucleus is associated with atrazine-induced attenuation of the luteinizing hormone surge in female rats.

Serum Proteomic Profiling Analysis of Rats Chronically Exposed to Arsenic.

Serum P-Cresyl Sulfate Is a Predictor of Central Arterial Stiffness in Patients on Maintenance Hemodialysis.

Hypertension in Relation to Dioxins and Polychlorinated Biphenyls from the Anniston Community Health Survey Follow-Up.

Geographic distribution and environmental risk factors of lymphoma in dogs under primary-care in the UK.

Aryl hydrocarbon receptor pathway: Role, regulation and intervention in atherosclerosis therapy (Review).

The gut microbiota and its relationship with chronic kidney disease.

Dioxin-like (DL-) polychlorinated biphenyls induced immunotoxicity through apoptosis in mice splenocytes via the AhR mediated mitochondria dependent signaling pathways.

Environmental exposures in young adults with declining kidney function in a population at risk of Mesoamerican nephropathy.

Simultaneous quantification of estrogens and glucocorticoids in human adipose tissue by liquid-chromatography-tandem mass spectrometry.

LncRNA-241 inhibits 1,2-Dichloroethane-induced hepatic apoptosis.

Prenatal exposure to glycol ethers and motor inhibition function evaluated by functional MRI at the age of 10 to 12 years in the PELAGIE mother-child cohort.

Mitochondrial Uncoupling Coordinated With PDH Activation Safely Ameliorates Hyperglycemia via Promoting Glucose Oxidation.

High fat diet deteriorates the memory impairment induced by arsenic in mice: a sub chronic in vivo study.

Clinical association between the metabolite of healthy gut microbiota, 3-indolepropionic acid and chronic kidney disease.

Plasma Metabolic Profiling Analysis of Gout Party on Acute Gout Arthritis Rats Based on UHPLC-Q-TOF/MS Combined with Multivariate Statistical Analysis.

Expression and Functional Analysis of Hepcidin from Mandarin Fish (*Siniperca chuatsi*).

Metabolomics for improved treatment monitoring of phenylketonuria: urinary biomarkers for non-invasive assessment of dietary adherence and nutritional deficiencies.

Discovery of HWL-088: A highly potent FFA1/GPR40 agonist bearing a phenoxyacetic acid scaffold.

Nephrotoxic metals of cadmium, lead, mercury and arsenic and the odds of kidney stones in adults: An exposure-response analysis of NHANES 2007-2016.

Functions of aryl hydrocarbon receptor (AHR) and CD38 in NAD metabolism and nonalcoholic steatohepatitis (NASH).

In utero dioxin exposure and cardiometabolic risk in the Seveso Second Generation Study.

NLRX1 Regulation Following Acute Mitochondrial Injury.

Epigenetic Activation of BRCA1 by Genistein In Vivo and Triple Negative Breast Cancer Cells Linked to Antagonism toward Aryl Hydrocarbon Receptor.

Epidemic of Chronic Kidney Disease of Nontraditional Etiology in El Salvador: Integrated Health Sector Action and South-South Cooperation.

Creatine is Neuroprotective to Retinal Neurons In Vitro But Not In Vivo.

Metal-induced nephrotoxicity to diabetic and non-diabetic Wistar rats.

GH3 and RC-4BC cell lines are not suitable as in vitro models to study prolactin modulation and AHR responsiveness in rat pituitary.

Design, synthesis and biological evaluation of novel FFA1/GPR40 agonists: New breakthrough in an old scaffold.

Mass spectrometry-based urinary metabolomics for the investigation on the mechanism of action of *Eleutherococcus senticosus* (Rupr. & Maxim.) Maxim. leaves against ischemic stroke in rats.

Tissue-Specific Peculiarities of Vibration-Induced Hypoxia in Rabbit Liver and Kidney.

Food as medicine: Selenium enriched lentils offer relief against chronic arsenic poisoning in Bangladesh.

Multi-Compartment Profiling of Bacterial and Host Metabolites Identifies Intestinal Dysbiosis and Its Functional Consequences in the Critically Ill Child.

Can contamination of the environment by dioxins cause craniofacial defects?

Role of epigenetic regulation of Igf2 and H19 in 2,3,7,8-Tetrachlorobenzo-p-dioxin (TCDD)-induced ovarian toxicity in offspring rats.

Targetome analysis of chaperone-mediated autophagy in cancer cells.

Fecal Changes Following Introduction of Milk in Infants With Outgrowing Non-IgE Cow's Milk Protein Allergy Are Influenced by Previous Consumption of the Probiotic LGG.

Selected persistent organic pollutants associated with the risk of primary ovarian insufficiency in women.

Interleukin 33 Expression Induced by Aryl Hydrocarbon Receptor in Macrophages.

A comprehensive review on hepatoprotective and nephroprotective activities of chrysin against various drugs and toxic agents.

Effects of dietary fat on gut microbiota and faecal metabolites, and their relationship with cardiometabolic risk factors: a 6-month randomised controlled-feeding trial.

LC-MS/MS study of the degradation processes of nitisinone and its by-products.

Relative Effect Potency Estimates for Dioxin-Like Compounds in Pregnant Women with Gestational Diabetes Mellitus and Blood Glucose Outcomes Based on a Nested Case-control Study.

Effects of Aryl Hydrocarbon Receptor Deficiency on PCB-77-Induced Impairment of Glucose Homeostasis during Weight Loss in Male and Female Obese Mice.

Stress granules are formed in renal proximal tubular cells during metabolic stress and ischemic injury for cell survival.

Chlorinated persistent organic pollutants and type 2 diabetes - A population-based study with pre- and post- diagnostic plasma samples.

Psammalyisin F increases the efficacy of bortezomib and sorafenib through regulation of stress granule formation.

Persistent organic pollutants, pesticides, and the risk of thyroid cancer: systematic review and meta-analysis.

The AtHSP17.4C1 Gene Expression Is Mediated by Diverse Signals that Link Biotic and Abiotic Stress Factors with ROS and Can Be a Useful Molecular Marker for Oxidative Stress.

Role of dantrolene in dinitrophenol (DNP) overdose: A continuing question?

High temperature aggravates the effects of pesticides in goldfish.

Slime dermatitis.

Pesticide use and incident hyperthyroidism in farmers in the Agricultural Health Study.

Aryl hydrocarbon receptor (AHR) functions in NAD(+) metabolism, myelopoiesis and obesity.

Prenatal exposure to organohalogen compounds and children's mental and motor development at 18 and 30 months of age.

Development of the LC-MS/MS method for determining the p-cresol level in plasma.

Metabolic perturbation, proliferation and reactive oxygen species jointly contribute to cytotoxicity of human breast cancer cell induced by tetrabromo and tetrachloro bisphenol A.

Characterization of dissolved organic carbon in shallow groundwater of chronic kidney disease affected regions in Sri Lanka.

Chiral phenoxyacetic acid analogues inhibit colon cancer cell proliferation acting as PPAR γ partial agonists.

The 2nd to 4th digit length ratio (2D:4D) among children of Seveso women exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Respiratory analysis as a tool to detect physiological changes in Anisakis larvae subjected to stress.

Effect of continuous venovenous haemodialysis on outcome and pharmacokinetics of arsenic species in a patient with acute promyelocytic leukaemia and acute kidney injury.

Non-targeted metabolomic biomarkers and metabolotypes of type 2 diabetes: A cross-sectional study of PREDIMED trial participants.

Adhesion and invasion of gingival epithelial cells by Porphyromonas gulae.

Arsenic-induced BRCA1 CpG promoter methylation is associated with the downregulation of ER α and resistance to tamoxifen in MCF7 breast cancer cells and mouse mammary tumor xenografts.

Persistent organic pollutants and gestational diabetes: A multi-center prospective cohort study of healthy US women.

Cell surface heparan sulfate proteoglycans are involved in the extracellular Hsp90-stimulated migration and invasion of cancer cells.

Long-term airborne dioxin exposure and breast cancer risk in a case-control study nested within the French E3N prospective cohort.

The role of prostaglandin E(2) receptor EP1 in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced neonatal hydronephrosis in mice.

Associations between endocrine disrupting chemicals and equine metabolic syndrome phenotypes.

Urinary 2,5-dichlorophenol and 2,4-dichlorophenol concentrations and prevalent disease among adults in the National Health and Nutrition Examination Survey (NHANES).

Identification of Metabolites Associated with Onset of CAD in Diabetic Patients Using CE-MS Analysis: A Pilot Study.

Moderate Physical Activity in an Aquatic Environment During Pregnancy (SWEP Study) and Its Influence in Preventing Postpartum Depression.

Synbiotic meal decreases uremic toxins in hemodialysis individuals: A placebo-controlled trial.

A two-photon excited O(2)-evolving nanocomposite for efficient photodynamic therapy against hypoxic tumor.

Targeted deletion of the aryl hydrocarbon receptor in dendritic cells prevents thymic atrophy in response to dioxin.

The protective effect exerted by dietary borax on toxicity metabolism in rainbow trout (*Oncorhynchus mykiss*) tissues.

Gas chromatography-mass spectrometry based metabolomics profile of hippocampus and cerebellum in mice after chronic arsenic exposure.

Konzo: a distinct neurological disease associated with food (cassava) cyanogenic poisoning.

Mechanisms of Developmental Toxicity of Dioxins and Related Compounds.

Polychlorinated biphenyl exposures differentially regulate hepatic metabolism and pancreatic function: Implications for nonalcoholic steatohepatitis and diabetes.

A Toxicogenomic Approach Reveals a Novel Gene Regulatory Network Active in In Vitro and In Vivo Models of Thyroid Carcinogenesis.

Depressed prostaglandins and leukotrienes in veterans with Gulf War illness.

Biochanin A prevents 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced adipocyte dysfunction in cultured 3T3-L1 cells.

Hygienic assessment of the effects of pesticides application on children population morbidity with thyroid gland diseases.

Modelling the role of microbial p-cresol in colorectal genotoxicity.

Gut microbiome disruption altered the biotransformation and liver toxicity of arsenic in mice.

Metabolism and disposition of arsenic species from oral dosing with sodium arsenite in neonatal CD-1 mice. IV. Toxicokinetics following gavage administration and lactational transfer.

Novel metabolites from *Trichoderma atroviride* against human prostate cancer cells and their inhibitory effect on *Helicobacter pylori* and *Shigella* toxin producing *Escherichia coli*.

A "seasonal bromoderma" in a farmer.

Moderate Renal Impairment and Toxic Metabolites Produced by the Intestinal Microbiome: Dietary Implications.

The specific impact of uremic toxins upon cognitive domains: a review.

Aryl Hydrocarbon Receptor Modulates the Expression of TNF- α and IL-8 in Human Sebocytes via the MyD88-p65NF- κ B/p38MAPK Signaling Pathways.

Comparison of the Androgenic Response of Spring and Winter Wheat (*Triticum aestivum* L.).

Basin-scale monitoring and risk assessment of emerging contaminants in South American Atlantic coastal lagoons.

Method Development for Effect-Directed Analysis of Endocrine Disrupting Compounds in Human Amniotic Fluid.

Environmental Chemical Diethylhexyl Phthalate Alters Intestinal Microbiota Community Structure and Metabolite Profile in Mice.

Improvised method for urinary p-cresol detection and measurement using high performance liquid chromatography/mass spectrometry.

Integrative Metabolomic and Metallomic Analysis in a Case-Control Cohort With Parkinson's Disease.

Genome-Scale Metabolic Reconstruction of *Acetobacter pasteurianus* 386B, a Candidate Functional Starter Culture for Cocoa Bean Fermentation.

Associations of Benzo(ghi)perylene and Heptachlorodibenzo-p-dioxin in Serum of Service Personnel Deployed to Balad, Iraq, and Bagram, Afghanistan Correlates With Perturbed Amino Acid Metabolism in Human Lung Fibroblasts.

Synthesis and characterization of a 5-membered ring cyclic hydroxylamine coupled to triphenylphosphonium to detect mitochondrial superoxide by EPR spectrometry.

Secondary metabolites that could contribute to the monodominance of *Erythrina fusca* in the Brazilian Pantanal.

Oxidative stress, lysosomal damage and dysfunctional autophagy in molluscan hepatopancreas (digestive gland) induced by chemical contaminants.

Genome-Scale Characterization of Toxicity-Induced Metabolic Alterations in Primary Hepatocytes.

Soil microalgae and cyanobacteria: the biotechnological potential in the maintenance of soil fertility and health.

Soil attribute regulates assimilation of roxarsone metabolites by rice (*Oryza sativa* L.).

Arsenic metabolism in technical biogas plants: possible consequences for resident microbiota and downstream units.

Dietary Supplementation With Citrus Extract Altered the Intestinal Microbiota and Microbial Metabolite Profiles and Enhanced the Mucosal Immune Homeostasis in Yellow-Feathered Broilers.

Combination of yeast-based *in vitro* screens with high-performance thin-layer chromatography as a novel tool for the detection of hormonal and dioxin-like compounds.

Effect of Zearalenone and Hormone Regulators on Microspore Embryogenesis in Anther Culture of Wheat.

Effect of Heat Stress on Bacterial Composition and Metabolism in the Rumen of Lactating Dairy Cows.

Gut Microbiota in Alcoholic Hepatitis is Disparate from Those in Acute Alcoholic Pancreatitis and Biliary Disease.

Characterizing the Role of HMG-CoA Reductase in Aryl Hydrocarbon Receptor-Mediated Liver Injury in C57BL/6 Mice.

Degradation of Fenoxaprop-p-Ethyl and Its Metabolite in Soil and Wheat Crops.

A dual mixture of persistent organic pollutants modifies carbohydrate metabolism in the human hepatic cell line HepaRG.

Ultrasonic energy-assisted *in-situ* synthesis of Ru(0)/PANI/g-C(3)N(4) nanocomposite: Application for picomolar-level electrochemical detection of endocrine disruptor (Bisphenol-A) in humans and animals.

Metabolism and disposition of arsenic species from controlled dosing with sodium arsenite in adult and neonatal rhesus monkeys. VI. Toxicokinetic studies following oral administration.

Metabolomics as read-across tool: An example with 3-aminopropanol and 2-aminoethanol.

The Effect of an Iron Supplement on Lycopene Metabolism and Absorption During Digestion in Healthy Humans.

Cholestatic liver disease results increased production of reactive aldehydes and an atypical periportal hepatic antioxidant response.

Acetaldehyde Induces an Endothelium-Dependent Relaxation of Superior Mesenteric Artery: Potential Role in Postprandial Hyperemia.

Enantioselective Degradation and Chiral Stability of Glufosinate in Soil and Water Samples and Formation of 3-Methylphosphinicopropionic Acid and N-Acetyl-glufosinate Metabolites.

Temporal Dynamics of the Soil Metabolome and Microbiome During Simulated Anaerobic Soil Disinfestation.

In vitro application of sodium arsenite to mice testicular and epididymal organ cultures induces oxidative, biochemical, hormonal, and genotoxic stress.

Energy Metabolism and Redox State in Brains of Wistar Audiogenic Rats, a Genetic Model of Epilepsy.

Estrogen withdrawal and replacement differentially target liver and adipose tissues in female mice fed a high-fat high-sucrose diet: impact of a chronic exposure to a low-dose pollutant mixture(â~+).

Blood pharmacokinetic of 17 common pesticides in mixture following a single oral exposure in rats: implications for human biomonitoring and exposure assessment.

Xenopus laevis as a Bioindicator of Endocrine Disruptors in the Region of Central Chile.

Arsenic impairs GLUT1 trafficking through the inhibition of the calpain system in lymphocytes.

Simultaneous analysis of indaziflam and its metabolites in pitaya using dispersive solid phase extraction coupled with liquid chromatography coupled with tandem mass spectrometry.

Aryl hydrocarbon receptor ligands increase ABC transporter activity and protein expression in killifish (Fundulus heteroclitus) renal proximal tubules.

10,000-Times Diluted Doses of ACCase-Inhibiting Herbicides Can Permanently Change the Metabolomic Fingerprint of Susceptible Avena fatua L. Plants.

Updated peer review of the pesticide risk assessment for the active substance terbuthylazine in light of confirmatory data submitted.

Enterobacter asburiae Reduces Cadmium Toxicity in Maize Plants by Repressing Iron Uptake-Associated Pathways.

Hepatic heparan sulfate is a master regulator of hepcidin expression and iron homeostasis in human hepatocytes and mice.

Neuroprotective effects of anthocyanins and its major component cyanidin-3-O-glucoside (C3G) in the central nervous system: An outlined review.

Monitoring of organophosphate and pyrethroid metabolites in human urine samples by an automated method (TurboFlow(â,,ç)) coupled to ultra-high performance liquid chromatography-Orbitrap mass spectrometry.

Pyrazinamide may possess cardioprotective properties.

Pesticide metabolite concentrations in Queensland pre-schoolers - Exposure trends related to age and sex using urinary biomarkers.

Temporal variability in urinary pesticide concentrations in repeated-spot and first-morning-void samples and its association with oxidative stress in healthy individuals.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the differentiation of embryonic stem cells towards pancreatic lineage and pancreatic beta cell function.

Relationship between faecal microbiota and plasma metabolome in rats fed NK603 and MON810 GM maize from the GMO90+ study.

Obesity and cancer: A mechanistic overview of metabolic changes in obesity that impact genetic instability.

Gut microbial transformation of the dietary mutagen MeIQx may reduce exposure levels without altering intestinal transport.

Simultaneous Determination of Rimsulfuron and Haloxyfop-P-methyl and Its Metabolite Haloxyfop in Tobacco Leaf by LC-MS/MS.

Comparison of Urinary Biomarkers of Exposure in Humans Using Electronic Cigarettes, Combustible Cigarettes, and Smokeless Tobacco.

Astrocytic Oxidative/Nitrosative Stress Contributes to Parkinson's Disease Pathogenesis: The Dual Role of Reactive Astrocytes.

Defining the Contribution of CYP1A1 and CYP1A2 to Drug Metabolism Using Humanized CYP1A1/1A2 and Cyp1a1/Cyp1a2 Knockout Mice.

Composition and endocrine effects of water collected in the Kibale national park in Uganda.

The impact of maternally derived dioxins on embryonic development and hepatic AHR signaling in a long-lived apex predator.

Development and validation of a sensitive liquid-chromatography tandem mass spectrometry assay for mycophenolic acid and metabolites in HepaRG cell culture: Characterization of metabolism interactions between p-cresol and mycophenolic acid.

Gas chromatography-mass spectrometry metabolomics-based prediction of potato tuber sprouting during long-term storage.

Metabolism of 3-[5'-deoxy-5'-(dimethylarsinoyl)- β -ribofuranosyloxy]-2-hydroxypropylene glycol in an artificial digestive system.

Systematic Isolation and Structure Elucidation of Urinary Metabolites Optimized for the Analytical-Scale Molecular Profiling Laboratory.

Occurrence and ecological risk of pharmaceuticals and personal care products (PPCPs) and pesticides in typical surface watersheds, China.

Metabolomic analysis of energy regulated germination and sprouting of organic mung bean (*Vigna radiata*) using NMR spectroscopy.

Status Epilepticus Caused by an Herbicide Poisoning.

Comparing the Microbial Community in Four Stomach of Dairy Cattle, Yellow Cattle and Three Yak Herds in Qinghai-Tibetan Plateau.

Photodegradation of Myrigalone A, an Allelochemical from *Myrica gale*: Photoproducts and Effect of Terpenes.

3-Chloro-5-trifluoromethylpyridine-2-carboxylic acid, a Metabolite of the Fungicide Fluopyram, Causes Growth Disorder in *Vitis vinifera*.

Multiple Metabolic Pathways of 2,4,6-Tribromophenol in Rice Plants.

Effects of Pinacidil and Calcium on Succinate-Energized Rat Heart Mitochondria in the Presence of Rotenone.

Proposed Key Characteristics of Female Reproductive Toxicants as an Approach for Organizing and Evaluating Mechanistic Data in Hazard Assessment.

Alcohol dehydrogenase 1 participates in the Crabtree effect and connects fermentative and oxidative metabolism in the Zygomycete *Mucor circinelloides*.

Effect of plant extracts on the genotoxicity of 1'-hydroxy alkenylbenzenes.

Neuroprotective Role of Selected Antioxidant Agents in Preventing Cisplatin-Induced Damage of Human Neurons In Vitro.

Bacterial diversity and metabolite profiles of curd prepared by natural fermentation of raw milk and back sloping of boiled milk.

A Quantitative HILIC-MS/MS Assay of the Metabolic Response of Huh-7 Cells Exposed to 2,3,7,8-Tetrachlorodibenzo-p-Dioxin.

Hermetia illucens larvae as a potential dietary protein source altered the microbiota and modulated mucosal immune status in the colon of finishing pigs.

Host Gender and Androgen Levels Regulate Gut Bacterial Taxa in Pigs Leading to Sex-Biased Serum Metabolite Profiles.

Study on the Metabolism of Six Systemic Insecticides in a Newly Established Cell Suspension Culture Derived from Tea (*Camellia Sinensis* L.) Leaves.

Toxicity of perfluorooctane sulfonate on *Phanerochaete chrysosporium*: Growth, pollutant degradation and transcriptomics.

Scientific Opinion on the setting of health-based reference values for metabolites of the active substance terbuthylazine.

[Effects of exogenous ABA on translocation of photosynthate to fruit of Fuji apple during late stage of fruit rapid-swelling.].

Pollutants released from the pulp paper industry: Aquatic toxicity and their health hazards.

An LC-MS/MS method to profile urinary mercapturic acids, metabolites of electrophilic intermediates of occupational and environmental toxicants.

Toxicity of binary mixtures of pesticides to the marine microalgae *Tisochrysis lutea* and *Skeletonema marinoi*: Substance interactions and physiological impacts.

Thyroid and reproductive hormones in relation to pesticide use in an agricultural population in Southern Brazil.

Measurement of Respiration Rate in Live *Caenorhabditis elegans*.

Very Low Protein Diet for Patients with Chronic Kidney Disease: Recent Insights.

Thiamine and benfotiamine protect neuroblastoma cells against paraquat and $\text{A}\beta$ -amyloid toxicity by a coenzyme-independent mechanism.

ifl54 (*ifl*) plays a central role in carbon metabolism in the industrially relevant *Clostridium beijerinckii*.

Growth and metabolite production of a grape sour rot yeast-bacterium consortium on different carbon sources.

Identification of acrolein metabolites in human buccal cells, blood, and urine after consumption of commercial fried food.

Gender- and dose-related metabolome alterations in rat offspring after in utero and lactational exposure to PCB 180.

Attenuation of the effects of oxidative stress by the MAO-inhibiting antidepressant and carbonyl scavenger phenelzine.

Heavy metal exposure causes changes in the metabolic health-associated gut microbiome and metabolites.

Prebiotic Supplementation of In Vitro Fecal Fermentations Inhibits Proteolysis by Gut Bacteria, and Host Diet Shapes Gut Bacterial Metabolism and Response to Intervention.

Arsenic-Induced Neurotoxicity by Dysfunctioning Cholinergic and Dopaminergic System in Brain of Developing Rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin abolishes circadian regulation of hepatic metabolic activity in mice.

Metabolic functions of the human gut microbiota: the role of metalloenzymes.

The stimulating role of syringic acid, a plant secondary metabolite, in the microbial degradation of structurally-related herbicide, MCPA.

Polychlorinated Biphenyls and Nonalcoholic Fatty Liver Disease.

Synthesis and preclinical evaluation of the CRTH2 antagonist [(11)C]MK-7246 as a novel PET tracer and potential surrogate marker for pancreatic beta-cell mass.

Characterization of interactions between a metabolic uncoupler O-chlorophenol and extracellular polymeric substances of activated sludge.

Organic diet intervention significantly reduces urinary pesticide levels in U.S. children and adults.

Immunomodulatory effects of synthetic endocrine disrupting chemicals on the development and functions of human immune cells.

Glutathione peroxidase-1 inhibits transcription of regenerating islet-derived protein-2 in pancreatic islets.

Corrigendum: Identification of phenol- and p-cresol-producing intestinal bacteria by using media supplemented with tyrosine and its metabolites.

Serum folate levels and urinary arsenic methylation profiles in the US population: NHANES, 2003-2012.

Administration of Fenugreek Seed Extract Produces Better Effects in Glibenclamide-Induced Inhibition in Hepatic Lipid Peroxidation: An in vitro Study.

Lipidomic profiling of subchronic As(4)S(4) exposure identifies inflammatory mediators as sensitive biomarkers in rats.

Elevated arsenic exposure and efficient arsenic metabolism in indigenous women around Lake Poopó³, Bolivia.

Transcriptomic Impact of IMA-08401, a Novel AHR Agonist Resembling Laquinimod, on Rat Liver.

Depressive Symptoms After PCB Exposure: Hypotheses for Underlying Pathomechanisms via the Thyroid and Dopamine System.

The histone methyltransferase G9a regulates tolerance to oxidative stress-induced energy consumption.

The Main Metabolites of Fluorouracil + Adriamycin + Cyclophosphamide (FAC) Are Not Major Contributors to FAC Toxicity in H9c2 Cardiac Differentiated Cells.

Excessive Reactive Iron Impairs Hematopoiesis by Affecting Both Immature Hematopoietic Cells and Stromal Cells.

Compositional and Functional Differences between Microbiota and Cervical Carcinogenesis as Identified by Shotgun Metagenomic Sequencing.

Characterizing the microbial diversity and major metabolites of Sichuan bran vinegar augmented by *Monascus purpureus*.

Effects of glyphosate on soybean metabolism in strains bred for glyphosate-resistance.

Na(+) and Cl(-) induce differential physiological, biochemical responses and metabolite modulations in vitro in contrasting salt-tolerant soybean genotypes.

Ioxynil and diethylstilbestrol disrupt vascular and heart development in zebrafish.

ABA promotes starch synthesis and storage metabolism in dormant grapevine buds.

ER stress differentially affects pro-inflammatory changes induced by mitochondrial dysfunction in the human monocytic leukemia cell line, THP-1.

The endocrine-disrupting potential of four chlorophenols by *in vitro* and *in silico* assay.

Nonderivatization method for determination of glyphosate, glufosinate, bialaphos, and their main metabolites in environmental waters based on magnetic metal-organic framework pretreatment.

Oxidative stress induces release of 2'-AMP from microglia.

Cilostazol Attenuates Retinal Oxidative Stress and Inflammation in a Streptozotocin-Induced Diabetic Animal Model.

Abscisic acid prevents pollen abortion under high-temperature stress by mediating sugar metabolism in rice spikelets.

Environmental toxicants in breast milk of Norwegian mothers and gut bacteria composition and metabolites in their infants at 1 month.

Evaluation of PCDD/Fs, dioxin-like PCBs and PBDEs in sperm whales from the Mediterranean Sea.

Differential Production of Phenylpropanoid Metabolites in Callus Cultures of *Ocimum basilicum* L. with Distinct *In Vitro* Antioxidant Activities and *In Vivo* Protective Effects against UV stress.

Native roles of Baeyer-Villiger monooxygenases in the microbial metabolism of natural compounds.

Radiosynthesis and *in vivo* evaluation of (11)C-labeled BMS-193885 and its desmethyl analog as PET tracers for neuropeptide Y1 receptors.

Optimization and establishment of QuEChERS based method for determination of propoxycarbazone and its metabolite in food commodities by liquid chromatography coupled to tandem mass spectrometry.

Study of the Potential Endocrine-Disrupting Effects of Phenylurea Compounds on Neurohypophysis Cells *In Vitro*.

Effect of metabolic uncoupler, 2,4-dinitrophenol (DNP) on sludge properties and fouling potential in ultrafiltration membrane process.

IPSE, a urogenital parasite-derived immunomodulatory protein, ameliorates ifosfamide-induced hemorrhagic cystitis through downregulation of pro-inflammatory pathways.

The effects of hesperidin on sodium arsenite-induced different organ toxicity in rats on metabolic enzymes as antidiabetic and anticholinergics potentials: A biochemical approach.

Bacterial community and metabolome shifts in the cecum and colon of captive sika deer (*Cervus nippon*) from birth to post weaning.

Organochlorine pesticides and polychlorinated biphenyls (PCBs) in early adulthood and blood lipids over a 23-year follow-up.

High accumulation of tilianin in in-vitro cultures of *Agastache mexicana* and its potential vasorelaxant action.

Molecular mechanism involved in cyclophosphamide-induced cardiotoxicity: Old drug with a new vision.

Environmental pollutant-mediated disruption of gut microbial metabolism of the prebiotic inulin.

Is CYP1B1 involved in the metabolism of dioxins in the pig?

Combined Toxicity of 2,4-Dichlorophenoxyacetic Acid and Its Metabolites 2,4-Dichlorophenol (2,4-DCP) on Two Nontarget Organisms.

Cascade Reaction in Human Live Tissue Allows Clinically Applicable Diagnosis of Breast Cancer Morphology.

RiboTag translational profiling of *Drosophila* oenocytes under aging and induced oxidative stress.

Metabolic Basis for Mutualism between Gut Bacteria and Its Impact on the *Drosophila melanogaster* Host.

Exposure to Herbicides Prime P450-Mediated Detoxification of *Helicoverpa armigera* against Insecticide and Fungal Toxin.

[Determination of glufosinate-ammonium and its three metabolites in litchi and banana by high performance liquid chromatography coupled with triple quadrupole mass spectrometry].

The antiSMASH database version 2: a comprehensive resource on secondary metabolite biosynthetic gene clusters.

Estimation of potential risk of allyl alcohol induced liver injury in diabetic patients using type 2 diabetes spontaneously diabetic Torii-Lepr(fa) (SDT fatty) rats.

Bioactive Lipids in Cancer, Inflammation and Related Diseases : Acute and Chronic Mild Traumatic Brain Injury Differentially Changes Levels of Bioactive Lipids in the CNS Associated with Headache.

Regulation of organohalide respiration.

An Increased Level of Aryl Hydrocarbon Receptor in Patients with Pancreatic Cancer.

Embryonic arsenic exposure reduces intestinal cell proliferation and alters hepatic IGF mRNA expression in killifish (*Fundulus heteroclitus*).

High frequency somatic embryogenesis and plant regeneration of interspecific ginseng hybrid between *Panax ginseng* and *Panax quinquefolius*.

Longitudinal, Seasonal, and Occupational Trends of Multiple Pesticides in House Dust.

An imazamox-based herbicide causes apoptotic changes in rat liver and pancreas.

Taurine rescues the arsenic-induced injury in the pancreas of rat offsprings and in the INS-1 cells.

Rewiring metabolic network by chemical modulator based laboratory evolution doubles lipid production in *Cryptocodium cohnii*.

Protective effect of lycopene against chemical and natural toxins: A review.

Thermal processing food-related toxicants: a review.

The distinct ripening processes in the reproductive and non-reproductive parts of the fig syconium are driven by ABA.

A GC-MS untargeted metabolomics approach for the classification of chemical differences in grape juices based on fungal pathogen.

[Exploration about the protection mechanism of 5-hydroxy-1-methylhydantoin on paraquat poisoning model].

Multiple effects of the herbicide glufosinate-ammonium and its main metabolite on neural stem cells from the subventricular zone of newborn mice.

Differences in apoptotic signaling and toxicity between dimethylmonothioarsinic acid (DMMTA(V)) and its active metabolite, dimethylarsinous acid (DMA(III)), in HepaRG cells: Possibility of apoptosis cascade based on diversity of active metabolites of DMMTA(V).

Effects of glyphosate on the ovarian function of pregnant mice, the secretion of hormones and the sex ratio of their fetuses.

Effects of aminomethylphosphonic acid, the main breakdown product of glyphosate, on cellular and biochemical parameters of the mussel *Mytilus galloprovincialis*.

Chronic toxicity of metolachlor OA on growth, ontogenetic development, antioxidant biomarkers and histopathology of early life stages of marbled crayfish.

Müller glial dysfunction during diabetic retinopathy in rats is reduced by the acrolein-scavenging drug, 2-hydrazino-4,6-dimethylpyrimidine.

Designing strategies for operating Microbial Electrochemical Systems to clean up polluted soils under non-flooded conditions.

Specialisation events of fungal metacommunities exposed to a persistent organic pollutant are suggestive of augmented pathogenic potential.

Biochemical responses of the golden mussel *Limnoperna fortunei* under dietary glyphosate exposure.

Identification and validation of QTL and their associated genes for pre-emergent metribuzin tolerance in hexaploid wheat (*Triticum aestivum* L.).

Effects of the herbicide Roundup® on the metabolic activity of *Gammarus fossarum* Koch, 1836 (Crustacea; Amphipoda).

Acute renal toxicity of sodium chlorate: Redox imbalance, enhanced DNA damage, metabolic alterations and inhibition of brush border membrane enzymes in rats.

Changes in hypopharyngeal glands of nurse bees (*Apis mellifera*) induced by pollen-containing sublethal doses of the herbicide Roundup®.

Influence of microplastic addition on glyphosate decay and soil microbial activities in Chinese loess soil.

Toxicity induced by glyphosate and glyphosate-based herbicides in the zebrafish hepatocyte cell line (ZF-L).

Potential of *Trichoderma koningii* to eliminate alachlor in the presence of copper ions.

Protective effects of curcumin on acrolein-induced neurotoxicity in HT22 mouse hippocampal cells.

Changes in thyroid status of *Menidia beryllina* exposed to the antifouling booster irgarol: Impacts of temperature and salinity.

The mechanism of DNA damage induced by Roundup 360 PLUS, glyphosate and AMPA in human peripheral blood mononuclear cells - genotoxic risk assessment.

Transplacental transfer and metabolism of diuron in human placenta.

Acrolein induces ribotoxic stress in human cancer cells regardless of p53 status.

Exposure Through Runoff and Ground Water Contamination Differentially Impact Behavior and Physiology of Crustaceans in Fluvial Systems.

Acrolein-induced autophagy-dependent apoptosis via activation of the lysosomal-mitochondrial pathway in EAhy926 cells.

Modulation of physiological responses with TiO₂ nano-particle in *Azolla pinnata* R.Br. under 2,4-D toxicity.

Perinatal Glyphosate-Based Herbicide Exposure in Rats Alters Brain Antioxidant Status, Glutamate and Acetylcholine Metabolism and Affects Recognition Memory.

The P450 gene CYP749A16 is required for tolerance to the sulfonylurea herbicide trifloxysulfuron sodium in cotton (*Gossypium hirsutum* L.).

Pesticide Use and Incident Hypothyroidism in Pesticide Applicators in the Agricultural Health Study.

Inhibition effects of pesticides on glutathione-S-transferase enzyme activity of Van Lake fish liver.

Joint toxicity on hepatic detoxication enzymes in goldfish (*Carassius auratus*) exposed to binary mixtures of lead and paraquat.

Acrolein, a commonly found environmental toxin, causes oocyte mitochondrial dysfunction and negatively affects embryo development.

Atrazine-xenobiotic nuclear receptor interactions induce cardiac inflammation and endoplasmic reticulum stress in quail (*Coturnix coturnix coturnix*).

Endocrine disruptors in breeding ponds and reproductive health of toads in agricultural, urban and natural landscapes.

Diabetes, Cardiovascular Disorders and 2,3,7,8-Tetrachlorodibenzo-p-Dioxin Body Burden in Czech Patients 50 Years After the Intoxication.

Changes in hepatic phase I and phase II biotransformation enzyme expression and glutathione levels following atrazine exposure in female rats.

Jasmonic Acids Facilitate the Degradation and Detoxification of Herbicide Isoproturon Residues in Wheat Crops (*Triticum aestivum*).

Pancreatic function and histoarchitecture in Wistar rats following chronic exposure to Bushfire[®]: the mitigating role of zinc.

Biochemical and histological effects of sub-chronic exposure to atrazine in crayfish *Cherax destructor*.

Characterization and safety evaluation of HPPD W336, a modified 4-hydroxyphenylpyruvate dioxygenase protein, and the impact of its expression on plant metabolism in herbicide-tolerant MST-FG[~]72-2 soybean.

Postnatal exposure to a glyphosate-based herbicide modifies mammary gland growth and development in Wistar male rats.

Pesticides as risk factors for head and neck cancer: A review.

An integrative omics approach to unravel toxicity mechanisms of environmental chemicals: effects of a formulated herbicide.

Biodegradation and toxicity of a maize herbicide mixture: mesotrione, nicosulfuron and S-metolachlor.

Circular RNA expression profiles in hippocampus from mice with perinatal glyphosate exposure.

Effects of the chloro-s-triazine herbicide terbuthylazine on DNA integrity in human and mouse cells.

In vivo NMR investigations of glyphosate influences on plant metabolism.

Selective and context-dependent effects of chemical stress across trophic levels at the basis of marine food webs.

Expression of the human gene CYP1A2 enhances tolerance and detoxification of the phenylurea herbicide linuron in *Arabidopsis thaliana* plants and *Escherichia coli*.

Atrazine Triggers Mitochondrial Dysfunction and Oxidative Stress in Quail (*Coturnix C. coturnix*) Cerebrum via Activating Xenobiotic-Sensing Nuclear Receptors and Modulating Cytochrome P450 Systems.

Metabolome disruption of pregnant rats and their offspring resulting from repeated exposure to a pesticide mixture representative of environmental contamination in Brittany.

Glyphosate affects the secretion of regulators of uterine contractions in cows while it does not directly impair the motoric function of myometrium in vitro.

Effects of environmentally relevant sub-chronic atrazine concentrations on African clawed frog (*Xenopus laevis*) survival, growth and male gonad development.

Effect of glyphosate-based herbicide on hematological and hemopoietic parameters in common carp (*Cyprinus carpio* L).

Ecotoxicological effects of the herbicide glyphosate in non-target aquatic species: Transcriptional responses in the mussel *Mytilus galloprovincialis*.

The Ramazzini Institute 13-week study on glyphosate-based herbicides at human-equivalent dose in Sprague Dawley rats: study design and first in-life endpoints evaluation.

Proteomic analysis of ametryn toxicity in zebrafish embryos.

2-Methyl-4-chlorophenoxyacetic acid (MCPA) and bromoxynil herbicide ingestion.

Environmental risk assessment of pesticides in the River Madre de Dios, Costa Rica using PERPEST, SSD, and msPAF models.

Toxicological responses on cytochrome P450 and metabolic transferases in liver of goldfish (*Carassius auratus*) exposed to lead and paraquat.

Melatonin preserves ovarian tissues of rats exposed to chronic TCDD: An electron microscopic approach to effects of TCDD on ovarian cells.

Changes in gene expression following long-term in vitro exposure of *Macaca mulatta* trophoblast stem cells to biologically relevant levels of endocrine disruptors.

Effects of atrazine on vitellogenesis, steroid levels and lipid peroxidation, in female red swamp crayfish *Procambarus clarkii*.

Acrolein-induced oxidative stress and genotoxicity in rats: protective effects of whey protein and conjugated linoleic acid.

Deficiency of Atg6 impairs beneficial effect of metformin on intestinal stem cell aging in *Drosophila*.

Metabolic Profiling of Amino Acids Associated with Mortality in Patients with Acute Paraquat Poisoning.

Acrolein Exposure in Hookah Smokers and Non-Smokers Exposed to Hookah Tobacco Secondhand Smoke: Implications for Regulating Hookah Tobacco Products.

Changes in intermediate metabolism and oxidative balance parameters in sexually matured three-barbeled catfishes exposed to herbicides from rice crops (Roundup[®], Primoleo[®] and Facet[®]).

Caloric restriction ameliorates acrolein-induced neurotoxicity in rats.

Effects of glyphosate on early life stages: comparison between *Cyprinus carpio* and *Danio rerio*.

Celecoxib, a cyclooxygenase-2 inhibitor, offers chemoprevention against reproductive and neurobehavioural abnormalities induced by atrazine in male Wistar rats.

Associations of maternal exposure to organophosphate and pyrethroid insecticides and the herbicide 2,4-D with birth outcomes and anogenital distance at 3 months in the Odense Child Cohort.

Isolated and mixed effects of diuron and its metabolites on biotransformation enzymes and oxidative stress response of Nile tilapia (*Oreochromis niloticus*).

Hepatotoxicity of paraquat on common carp (*Cyprinus carpio* L.).

Do host-associated gut microbiota mediate the effect of an herbicide on disease risk in frogs?

Potential biomarkers for monitoring the toxicity of long-term exposure to atrazine in rat by metabolomic analysis.

Genetic control of predominantly error-free replication through an acrolein-derived minor-groove DNA adduct.

Changes in Sensitivity to the Effects of Atrazine on the Luteinizing Hormone Surge in Female Sprague-Dawley Rats after Repeated Daily Doses: Correlation with Liver Enzyme Expression.

Atrazine suppresses FSH-induced steroidogenesis and LH-dependent expression of ovulatory genes through PDE-cAMP signaling pathway in human cumulus granulosa cells.

Evidence the U.S. autism epidemic initiated by acetaminophen (Tylenol) is aggravated by oral antibiotic amoxicillin/clavulanate (Augmentin) and now exponentially by herbicide glyphosate (Roundup).

No treatment-related effects with aryloxyalkanoate dioxygenase-12 in three 28-day mouse toxicity studies.

The sensitivity of soil enzymes, microorganisms and spring wheat to soil contamination with carfentrazone-ethyl.

Neurotransmitter changes in rat brain regions following glyphosate exposure.

Ecotoxicological risk assessment for the herbicide glyphosate to non-target aquatic species: A case study with the mussel *Mytilus galloprovincialis*.

Mitochondrial bioenergetics and locomotor activity are altered in zebrafish (*Danio rerio*) after exposure to the bipyridylum herbicide diquat.

Glyphosate has limited short-term effects on commensal bacterial community composition in the gut environment due to sufficient aromatic amino acid levels.

Metabolic reduction of resazurin; location within the cell for cytotoxicity assays.

Assessment of hepatic metabolism-dependent nephrotoxicity on an organs-on-a-chip microdevice.

Arsenite and methylarsonite inhibit mitochondrial metabolism and glucose-stimulated insulin secretion in INS-1 832/13 β^2 cells.

Analysis of earthworm sublethal toxic responses to atrazine exposure using (^1H) nuclear magnetic resonance (NMR)-based metabolomics.

[The impact of electronic cigarettes usage on the endothelial function and the progression of atherosclerosis].

Glyphosate ingestion causing multiple organ failure: a near-fatal case report.

Flumioxazin metabolism in pregnant animals and cell-based protoporphyrinogen IX oxidase (PPO) inhibition assay of fetal metabolites in various animal species to elucidate the mechanism of the rat-specific developmental toxicity.

Transketolase Is Identified as a Target of Herbicidal Substance $\hat{\pm}$ -Terthienyl by Proteomics.

Effects on metabolic parameters in young rats born with low birth weight after exposure to a mixture of pesticides.

Acrolein-induced atherogenesis by stimulation of hepatic flavin containing monooxygenase 3 and a protection from hydroxytyrosol.

Dependence of growth inhibiting action of increased planting density on capacity of lettuce plants to synthesize ABA.

Elimination and detoxification of 2,4-D by *Umbelopsis isabellina* with the involvement of cytochrome P450.

Treatment Outcome of Combined Continuous Venovenous Hemofiltration and Hemoperfusion in Acute Paraquat Poisoning: A Prospective Controlled Trial.

Effect on the dopaminergic metabolism induced by oral exposure to simazine during the prepubertal period in rats.

Paraquat affects mitochondrial bioenergetics, dopamine system expression, and locomotor activity in zebrafish (*Danio rerio*).

Chronic toxicity of 1,3,5-triazine herbicides in the postembryonic development of the western clawed frog *Silurana tropicalis*.

Lethal Bentazone Intoxication - A Report of Two Cases.

Neuroprotective Activity of Some Marine Fungal Metabolites in the 6-Hydroxydopamin- and Paraquat-Induced Parkinson's Disease Models.

Combined treatment with cinnamaldehyde and PTH enhances the therapeutic effect on glucocorticoid-induced osteoporosis through inhibiting osteoclastogenesis and promoting osteoblastogenesis.

Cytotoxicity of the natural herbicidal chemical, berberine, on *Nicotiana tabacum* Bright yellow-2 cells.

Cinnamaldehyde exerts vasculoprotective effects in hypercholesterolemic rabbits.

Cinnamic aldehyde inhibits vascular smooth muscle cell proliferation and neointimal hyperplasia in Zucker Diabetic Fatty rats.

'Real-world' compensatory behaviour with low nicotine concentration e-liquid: subjective effects and nicotine, acrolein and formaldehyde exposure.

Orthogonal self-assembly of an organoplatinum(II) metallacycle and cucurbit[8]uril that delivers curcumin to cancer cells.

Aldehyde dehydrogenase 2 activation ameliorates cyclophosphamide-induced acute cardiotoxicity via detoxification of toxic aldehydes and suppression of cardiac cell death.

Effects of arsenic methylation and metabolism on the changes of arsenic-related skin lesions.

Acrolein Contributes to the Neuropathic Pain and Neuron Damage after Ischemic-Reperfusion Spinal Cord Injury.

Allergenicity of acrolein-treated shrimp tropomyosin evaluated using RBL-2H3 cell and mouse model.

FGF21 attenuates pulmonary fibrogenesis through ameliorating oxidative stress in vivo and in vitro.

Astrocytic JWA deletion exacerbates dopaminergic neurodegeneration by decreasing glutamate transporters in mice.

Expression of the methionine sulfoxide reductase lost during evolution extends *Drosophila* lifespan in a methionine-dependent manner.

Acid-activatable oxidative stress-inducing polysaccharide nanoparticles for anticancer therapy.

Anti-inflammatory effect of cinnamaldehyde and linalool from the leaf essential oil of *Cinnamomum osmophloeum* Kanehira in endotoxin-induced mice.

Alterations in Acrolein Metabolism Contribute to Alzheimer's Disease.

Identity and Activity of 2,4-Dichlorophenoxyacetic Acid Metabolites in Wild Radish (*Raphanus raphanistrum*).

Antibiotics may increase triazine herbicide exposure risk via disturbing gut microbiota.

Urinary concentrations and profiles of organophosphate and pyrethroid pesticide metabolites and phenoxyacid herbicides in populations in eight countries.

Interspecific and intraspecific transference of metabolism-based mesotrione resistance in dioecious weedy *Amaranthus*.

Stress Resistance Development and Genome-Wide Transcriptional Response of *Escherichia coli* O157:H7 Adapted to Sublethal Thymol, Carvacrol, and trans-Cinnamaldehyde.

Exogenous Melatonin Mitigates Methyl Viologen-Triggered Oxidative Stress in Poplar Leaf.

Inhibition of catalase activity with 3-amino-1,2,4-triazole intensifies bisphenol A (BPA)-induced toxicity in granulosa cells of female albino rats.

Evaluation of Alkaloids Isolated from *Ruta graveolens* as Photosynthesis Inhibitors.

Method Development and Validation of Indaziflam and Its Five Metabolites in Soil, Water, and Fruits by Modified QuEChERS and UHPLC-MS/MS.

Atrazine and nicosulfuron affect the reproductive fitness of the predator *Podisus nigrispinus* (Hemiptera: Pentatomidae).

Culturable epiphytic bacteria isolated from *Teleogryllus occipitalis* crickets metabolize insecticides.

Biomethylation metabolism study of arsenite in SCC-7 cells by reversed phase ion pair high performance liquid chromatography-inductively coupled plasma-mass spectrometry.

Metabolism of 2,4-dichlorophenoxyacetic acid contributes to resistance in a common waterhemp (*Amaranthus tuberculatus*) population.

Enhanced Herbicide Metabolism and Metabolic Resistance Genes Identified in Tribenuron-Methyl Resistant *Myosoton aquaticum* L.

[Determination of glyphosate, glufosinate, and main metabolite aminomethylphosphonic acid residues in dry tea using ultra-high performance liquid chromatography-tandem mass spectrometry].

Characterization of Activation of the Hypothalamic-Pituitary-Adrenal Axis by the Herbicide Atrazine in the Female Rat.

Isolation and identification of a novel algicidal peptide from mackerel muscle hydrolysate.

Global transcriptomic analysis of *Rhodococcus erythropolis* D310-1 in responding to chlorimuron-ethyl.

Highly Accurate Detection and Identification Methodology of Xenobiotic Metabolites Using Stable Isotope Labeling, Data Mining Techniques, and Time-Dependent Profiling Based on LC/HRMS/MS.

Metabolic Profiling of Chloroacetanilide Herbicides in Earthworm Coelomic Fluid Using $(1)H$ NMR and GC-MS.

Multidrug Resistance Protein 1 (MRP1/ABCC1)-Mediated Cellular Protection and Transport of Methylated Arsenic Metabolites Differs between Human Cell Lines.

Enhanced Trifluralin Metabolism Can Confer Resistance in *Lolium rigidum*.

Recent insights into the microbial catabolism of aryloxyphenoxy-propionate herbicides: microbial resources, metabolic pathways and catabolic enzymes.

Dietary flavonoids improve urinary arsenic elimination among Mexican women.

Overexpression of PDX-II gene in potato (*Solanum tuberosum* L.) leads to the enhanced accumulation of vitamin B6 in tuber tissues and tolerance to abiotic stresses.

On the metabolites produced by *Colletotrichum gloeosporioides* a fungus proposed for the *Ambrosia artemisiifolia* biocontrol; spectroscopic data and absolute configuration assignment of colletochlorin A.

2,4-dichlorophenoxyacetic acid-induced oxidative stress: Metabolome and membrane modifications in *Umbelopsis isabellina*, a herbicide degrader.

Pyroxasulfone resistance in *Lolium rigidum* is metabolism-based.

Breakthrough dynamics of s-metolachlor metabolites in drinking water wells: Transport pathways and time to trend reversal.

Exposure to 2,4-dichlorophenoxyacetic acid induced PPAR α -dependent disruption of glucose metabolism in HepG2 cells.

Influence of exposure to pesticide mixtures on the metabolomic profile in post-metamorphic green frogs (*Lithobates clamitans*).

Using in vitro derived enzymatic reaction rates of metabolism to inform pesticide body burdens in amphibians.

Metabolic Resistance to Acetolactate Synthase Inhibiting Herbicide Tribenuron-Methyl in *Descurainia sophia* L. Mediated by Cytochrome P450 Enzymes.

Cultivable fungi present in Antarctic soils: taxonomy, phylogeny, diversity, and bioprospecting of antiparasitic and herbicidal metabolites.

Salinity reduces 2,4-D efficacy in *Echinochloa crusgalli* by affecting redox balance, nutrient acquisition, and hormonal regulation.

Interactions of cinnamaldehyde and its metabolite cinnamic acid with human serum albumin and interference of other food additives.

Acrolein-stressed threshold adaptation alters the molecular and metabolic bases of an engineered *Saccharomyces cerevisiae* to improve glutathione production.

Impacts of Salinity and Temperature on the Thyroidogenic Effects of the Biocide Diuron in *Menidia beryllina*.

Effect on transcriptome and metabolome of stacked transgenic maize containing insecticidal cry and glyphosate tolerance epsps genes.

Comparative Metabolomic Analyses of *Ipomoea lacunosa* Biotypes with Contrasting Glyphosate Tolerance Captures Herbicide-Induced Differential Perturbations in Cellular Physiology.

Metabolic Hydrolysis of Aromatic Amides in Selected Rat, Minipig, and Human In Vitro Systems.

Associations between Methylated Metabolites of Arsenic and Selenium in Urine of Pregnant Bangladeshi Women and Interactions between the Main Genes Involved.

Are the adverse effects of stressors on amphibians mediated by their effects on stress hormones?

Evidence of co-metabolic bentazone transformation by methanotrophic enrichment from a groundwater-fed rapid sand filter.

An assessment of the acute dietary exposure to glyphosate using deterministic and probabilistic methods.

Gut Microbial Glycerol Metabolism as an Endogenous Acrolein Source.

Taurine Inhibits TRPV-Dependent Activity to Overcome Oxidative Stress in *Caenorhabditis elegans*.

Catabolic task division between two near-isogenic subpopulations co-existing in a herbicide-degrading bacterial consortium: consequences for the interspecies consortium metabolic model.

Diuron metabolites act as endocrine disruptors and alter aggressive behavior in Nile tilapia (*Oreochromis niloticus*).

Ametryn removal by *Metarhizium brunneum*: Biodegradation pathway proposal and metabolic background revealed.

Determination of triazine herbicides and their metabolites in multiple medicinal parts of traditional Chinese medicines using streamlined pretreatment and UFLC-ESI-MS/MS.

Dantrolene is not the answer to 2,4-dinitrophenol poisoning: more heated debate.

Association between Protein-Bound Uremic Toxins and Asymptomatic Cardiac Dysfunction in Patients with Chronic Kidney Disease.

The Aryl Hydrocarbon Receptor and the Maintenance of Lung Health.

Association between maternal urinary speciated arsenic concentrations and gestational diabetes in a cohort of Canadian women.

Associations of cumulative exposure to heavy metal mixtures with obesity and its comorbidities among U.S. adults in NHANES 2003-2014.

Flavin homeostasis in the mouse retina during aging and degeneration.

Profile of three boron-containing compounds on the body weight, metabolism and inflammatory markers of diabetic rats.

Hexachloronaphthalene (HxCN) as a potential endocrine disruptor in female rats.

Quantitative assessment of cyanide in cystic fibrosis sputum and its oxidative catabolism by hypochlorous acid.

Impairment of ovaries by 2,3,7,8-tetrachlorobenzo-p-dioxin (TCDD) exposure in utero associated with BMP15 and GDF9 in the female offspring rat.

Cigarette Smoke Toxins-Induced Mitochondrial Dysfunction and Pancreatitis Involves Aryl Hydrocarbon Receptor Mediated Cyp1 Gene Expression: Protective Effects of Resveratrol.

AHR gene-dioxin interactions and birthweight in the Seveso Second Generation Health Study.

Increases in bioactive lipids accompany early metabolic changes associated with β^2 -cell expansion in response to short-term high-fat diet.

Dinitrophenol (DNP) Fatality Associated with a Falsely Elevated Salicylate Level: a Case Report with Verification of Laboratory Cross Reactivity.

Development of Biomarkers for Inhibition of SLC6A19 (B⁰AT1)-A Potential Target to Treat Metabolic Disorders.

Genetic background and window of exposure contribute to thyroid dysfunction promoted by low-dose exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in mice.

Dioxin-like PCB 126 increases intestinal inflammation and disrupts gut microbiota and metabolic homeostasis.

Morphological evaluation of liposomal iron carriers.

Impaired lipid and glucose homeostasis in male mice offspring after combined exposure to low-dose bisphenol A and arsenic during the second half of gestation.

Upregulated EFNB2 and EPHB4 promotes lung development in a nitrofen-induced congenital diaphragmatic hernia rat model.

Cohort study of workers at a New Zealand agrochemical plant to assess the effect of dioxin exposure on mortality.

Arsenite methyltransferase (AS3MT) polymorphisms and arsenic methylation in children in rural Bangladesh.

Sperm epigenome as a marker of environmental exposure and lifestyle, at the origin of diseases inheritance.

Mitochondrial uncoupling prodrug improves tissue sparing, cognitive outcome, and mitochondrial bioenergetics after traumatic brain injury in male mice.

Isolated hypospadias: The impact of prenatal exposure to pesticides, as determined by meconium analysis.

Hepatocyte-Specific Deletion of TIPARP, a Negative Regulator of the Aryl Hydrocarbon Receptor, Is Sufficient to Increase Sensitivity to Dioxin-Induced Wasting Syndrome.

Plasma metabolite profiles in children with current asthma.

Biomarkers for detection, prognosis and therapeutic assessment of neurological disorders.

Efficacy of Lactoferrin Oral Administration in the Treatment of Anemia and Anemia of Inflammation in Pregnant and Non-pregnant Women: An Interventional Study.

Para-cresol production by *Clostridium difficile* affects microbial diversity and membrane integrity of Gram-negative bacteria.

Exploring a Novel Screening Method for Patients with Oral Squamous Cell Carcinoma: A plasma Metabolomics Analysis.

Impacts of Indoxyl Sulfate and p-Cresol Sulfate on Chronic Kidney Disease and Mitigating Effects of AST-120.

Uremic Toxins Activates Na/K-ATPase Oxidant Amplification Loop Causing Phenotypic Changes in Adipocytes in In Vitro Models.

Diagnostic meaning of blood p-cresol concentration in forensic autopsy cases.

Predictive metabolomic signatures of end-stage renal disease: A multivariate analysis of population-based data.

Incident thyroid disease in female spouses of private pesticide applicators.

Ursodeoxycholic acid improves liver function via phenylalanine/tyrosine pathway and microbiome remodelling in patients with liver dysfunction.

[Clinical features and prognosis analysis of the elderly and youth patients with acute severe poisoning].

Integrated transcriptomics and metabolomics reveal signatures of lipid metabolism dysregulation in HepaRG liver cells exposed to PCB 126.

Clinical pharmacokinetics and safety profile of single agent arsenic trioxide by continuous slow-rate infusion in patients with newly diagnosed acute promyelocytic leukemia.

Associations of Arsenic Exposure With Telomere Length and Na⁺-ve T Cells in Childhood-A Birth Cohort Study.

The aryl hydrocarbon receptor is indispensable for dioxin-induced defects in sexually-dimorphic behaviors due to the reduction in fetal steroidogenesis of the pituitary-gonadal axis in rats.

Treatment of rat congenital diaphragmatic hernia with sildenafil and NS-304, selexipag's active compound, at the pseudoglandular stage improves lung vasculature.

LC-Q-TOF-MS based plasma metabolomic profile of subclinical pelvic inflammatory disease: A pilot study.

N(6)-methyladenosine mediates the cellular proliferation and apoptosis via microRNAs in arsenite-transformed cells.

RASopathic comedone-like or cystic lesions induced by vemurafenib: a model of skin lesions similar but not identical to those induced by dioxins MADISH.

The Association of Arsenic Exposure and Arsenic Metabolism With the Metabolic Syndrome and Its Individual Components: Prospective Evidence From the Strong Heart Family Study.

Protective Effect of Ellagic Acid Against Sodium Arsenite-Induced Cardio- and Hematotoxicity in Rats.

Evaluation of metabolic reactivity in macrophages from mice with chronic sodium arsenite intake and experimental carcinogenesis.

Associations between persistent organic pollutants and metabolic syndrome in morbidly obese individuals.

Arsenic speciation in hair and nails of acute promyelocytic leukemia (APL) patients undergoing arsenic trioxide treatment.

The Influence of Obesity on the Pharmacokinetics of Dioxin in Mice: An Assessment Using Classical and PBPK Modeling.

Arsenic induces cardiac rhythm dysfunction and acylcarnitines metabolism perturbation in rats.

Toluene and methylethylketone: effect of combined exposure on their metabolism in rat.

Endoribonuclease YbeY Is Linked to Proper Cellular Morphology and Virulence in *Brucella abortus*.

Increasing kynurenine brain levels reduces ethanol consumption in mice by inhibiting dopamine release in nucleus accumbens.

Of mice and men - environmental temperature, body temperature, and treatment of obesity.

Serum folate and cobalamin levels and urinary dimethylarsinic acid in US children and adults.

Metabolic Activation of the Cooked Meat Carcinogen 2-Amino-1-Methyl-6-Phenylimidazo[4,5-b]Pyridine in Human Prostate.

Non-dioxin-like polychlorinated biphenyls in early pregnancy and risk of gestational diabetes mellitus.

SLC6A19 is a novel putative gene, induced by dioxins via AhR in human hepatoma HepG2 cells.

Plasma p-cresol lowering effect of sevelamer in non-dialysis CKD patients: evidence from a randomized controlled trial.

A delayed proinflammatory response of human preadipocytes to PCB126 is dependent on the aryl hydrocarbon receptor.

Possible Obesogenic Effects of Bisphenols Accumulation in the Human Brain.

Metabolic profiles in community-acquired pneumonia: developing assessment tools for disease severity.

Deficiency of aldose reductase exacerbates early pressure overload-induced cardiac dysfunction and autophagy in mice.

Metabolism and disposition of arsenic species after repeated oral dosing with sodium arsenite in drinking water. II. Measurements in pregnant and fetal CD-1 mice.

Persistent organic pollutants and risk of type 2 diabetes: A prospective investigation among middle-aged women in Nurses' Health Study II.

Modulation of intestinal microbiota, control of nitrogen products and inflammation by pre/probiotics in chronic kidney disease: a systematic review.

Optically-controlled bacterial metabolite for cancer therapy.

Relationship between serum trimethylamine N-oxide and exposure to dioxin-like pollutants.

In rats gestational iron deficiency does not change body fat or hepatic mitochondria in the aged offspring.

Anti-inflammatory evaluation and characterization of leaf extract of *Ananas comosus*.

Host biotin is required for liver stage development in malaria parasites.

Extended Duration Nocturnal Hemodialysis and Changes in Plasma Metabolite Profiles.

Exploration of the Fecal Microbiota and Biomarker Discovery in Equine Grass Sickness.

Performance Verification of Alternative Quality Control Materials for Urine Albumin Assessment.

Contributory Role of Gut Microbiota and Their Metabolites Toward Cardiovascular Complications in Chronic Kidney Disease.

Microbial volatiles as plant growth inducers.

Environmental pollutant hexachlorobenzene induces hypertension in a rat model.

Receptor activities of persistent pollutant serum mixtures and breast cancer risk.

Anti-oxidants correct disturbance of redox enzymes in the hearts of rat fetuses with congenital diaphragmatic hernia.

Metabolic characterization of human aqueous humor in the cataract progression after pars plana vitrectomy.

Does bird metabolic rate influence mosquito feeding preference?

iTRAQ-based quantitative proteomic analysis reveals important metabolic pathways for arsenic-induced liver fibrosis in rats.

Disorder of gut amino acids metabolism during CKD progression is related with gut microbiota dysbiosis and metagenome change.

Differences in fecal microbial metabolites and microbiota of children with autism spectrum disorders.

PCB95 and PCB153 change dopamine levels and turn-over in PC12 cells.

Association of urinary concentrations of four chlorophenol pesticides with cardiometabolic risk factors and obesity in children and adolescents.

Arsenic exposure induces glucose intolerance and alters global energy metabolism.

Roles of cytosolic phospholipase A(2) in reproductive and systemic toxicities in 2,3,7,8-tetrachlorodibenzo-p-dioxin-exposed mice.

Aberrant expression of miR-451a contributes to 1,2-dichloroethane-induced hepatic glycerol gluconeogenesis disorder by inhibiting glycerol kinase expression in NIH Swiss mice.

Redox cycling induces spermatosis and necrosis in stallion spermatozoa while the hydroxyl radical (OH•) only induces spermatosis.

Occupational pesticide exposure and subclinical hypothyroidism among male pesticide applicators.

A comparison of clinical efficacy and economic value in Basalin- and Lantus-treated patients with type 2 diabetes using continuous glucose monitoring system.

The Role of Cytochromes P450 in Infection.

Association between diabetes and pesticides: a case-control study among Thai farmers.

The aryl hydrocarbon receptor regulates the expression of TIPARP and its cis long non-coding RNA, TIPARP-AS1.

High AHR expression in breast tumors correlates with expression of genes from several signaling pathways namely inflammation and endogenous tryptophan metabolism.

Recent decreasing trends of exposure to PCDDs/PCDFs/dioxin-like PCBs in general populations, and associations with diabetes, metabolic syndrome, and gout/hyperuricemia.

Untargeted metabolomics approach (UPLC-Q-TOF-MS) explores the biomarkers of serum and urine in overweight/obese young men.

[Importance of Two Birth Cohorts (n=20,926 and n=514): 15 Years' Experience of the Hokkaido Study on Environment and Children's Health: Malformation, Development and Allergy].

Hygienic assessment of the effects of pesticides application on adult population morbidity with thyroid gland diseases.

Arsenic Exposure in Relation to Ischemic Stroke: The Reasons for Geographic and Racial Differences in Stroke Study.

Evidence for estrogeno-mimetic effects of a mixture of low-dose pollutants in a model of ovariectomized mice.

Epigenetic Therapy: Novel Translational Implications for Arrest of Environmental Dioxin-Induced Disease in Females.

Prenatal exposure to glycol ethers and cryptorchidism and hypospadias: a nested case-control study.

Morbidity in New Zealand pesticide producers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Microbiota-derived uremic retention solutes: perpetrators of altered nonrenal drug clearance in kidney disease.

Effects of Endocrine-Disrupting Chemicals and Epigenetic Modifications in Ovarian Cancer: A Review.

Elucidating Conserved Transcriptional Networks Underlying Pesticide Exposure and Parkinson's Disease: A Focus on Chemicals of Epidemiological Relevance.

Parkinsonian Neurotoxins Impair the Pro-inflammatory Response of Glial Cells.

Degradation of pendimethalin by the yeast YC2 and determination of its two main metabolites.

Effects of Polychlorinated Pesticides and Their Metabolites on Phospholipid Organization in Model Microbial Membranes.

TCDD Toxicity Mediated by Epigenetic Mechanisms.

CYP1A1 and 1B1-mediated metabolic pathways of dolutegravir, an HIV integrase inhibitor.

Production of bioactive cyclotides in somatic embryos of *Viola odorata*.

Arsenic exposure, profiles of urinary arsenic species, and polymorphism effects of glutathione-s-transferase and metallothioneins.

Enantioselective bioaccumulation and metabolism of lactofen in zebrafish *Danio rerio* and combined effects with its metabolites.

Differences in reproductive toxicity of TBBPA and TCBPA exposure in male *Rana nigromaculata*.

Effect of explant type and plant growth regulators on callus induction, growth and secondary metabolites production in *Cnidium officinale* Makino.

Study of metabolic activity of human embryos focused on amino acids by capillary electrophoresis with light-emitting diode-induced fluorescence detection.

Glutathione-S-transferase-theta genotypes and the risk of cyclophosphamide toxicity in dogs.

Pharmaceuticals, hormones, pesticides, and other bioactive contaminants in water, sediment, and tissue from Rocky Mountain National Park, 2012-2013.

Toxicity of aqueous mixture of phenol and chlorophenols upon photosensitized oxidation initiated by sunlight or vis-lamp.

Endogenous and exogenous biomarker analysis in terrestrial phase amphibians (*Lithobates sphenoccephala*) following dermal exposure to pesticide mixtures.

Surface-Enhanced Raman Spectroscopy for the Detection of a Metabolic Product in the Headspace Above Live Bacterial Cultures.

Diversity and predictive metabolic pathways of the prokaryotic microbial community along a groundwater salinity gradient of the Pearl River Delta, China.

Metabolic Pathway of Topramezone in Multiple-Resistant Waterhemp (*Amaranthus tuberculatus*) Differs From Naturally Tolerant Maize.

Persistent Organic Pollutant Burden, Experimental POP Exposure, and Tissue Properties Affect Metabolic Profiles of Blubber from Gray Seal Pups.

Wort Substrate Consumption and Metabolite Production During Lambic Beer Fermentation and Maturation Explain the Successive Growth of Specific Bacterial and Yeast Species.

2,6-Dihydroxybenzaldehyde Analogues of the Iron Chelator Salicylaldehyde Isonicotinoyl Hydrazone: Increased Hydrolytic Stability and Cytoprotective Activity against Oxidative Stress.

Tissue-specific bioaccumulation, depuration and metabolism of 4,4'-dichlorodiphenyl sulfide in the freshwater mussel *Anodonta woodiana*.

Pesticide toxicity: a mechanistic approach.

A novel decarboxylating amidohydrolase involved in avoiding metabolic dead ends during cyanuric acid catabolism in *Pseudomonas* sp. strain ADP.

Antiobesity Effect of Fermented Chokeberry Extract in High-Fat Diet-Induced Obese Mice.

The impact and prospect of natural product discovery in agriculture: New technologies to explore the diversity of secondary metabolites in plants and microorganisms for applications in agriculture.

Elucidation of the Amygdalin Pathway Reveals the Metabolic Basis of Bitter and Sweet Almonds (*Prunus dulcis*).

Metabolism and disposition of arsenic species from controlled dosing with sodium arsenite in adult female CD-1 mice. III. Toxicokinetic studies following oral and intravenous administration.

Brazil nut improves the oxidative metabolism of superoxide-hydrogen peroxide chemically-imbalanced human fibroblasts in a nutrigenomic manner.

Glutathione S-transferase P deficiency induces glucose intolerance via JNK-dependent enhancement of hepatic gluconeogenesis.

Exposure to bisphenol A, chlorophenols, benzophenones, and parabens in relation to reproductive hormones in healthy women: A chemical mixture approach.

Multiple pesticide analysis in hair samples of pregnant French women: Results from the ELFE national birth cohort.

Screening of bacterial endophytes as potential biocontrol agents against soybean diseases.

The effect of prenatal exposure on disposition of hexachloronaphthalene in female Wistar rats and fetal compartment.

Microbiome-Metabolomics Analysis of the Impacts of Long-Term Dietary Advanced-Glycation-End-Product Consumption on C57BL/6 Mouse Fecal Microbiota and Metabolites.

Glyphosate-based herbicide enhances the uterine sensitivity to estradiol in rats.

Comparison of the Metabolic Behaviors of Six Systemic Insecticides in a Newly Established Cell Suspension Culture Derived from Tea (*Camellia sinensis* L.) Leaves.

Data on recurrent somatic embryogenesis and in vitro micropropagation of *Cnidium officinale* Makino.

Gut microbiota influences Alzheimer's disease pathogenesis by regulating acetate in *Drosophila* model.

Metabolite profiles of callus and cell suspension cultures of mangosteen.

Ancestral TCDD Exposure Induces Multigenerational Histologic and Transcriptomic Alterations in Gonads of Male Zebrafish.

Sex-related differences in the associations between maternal dioxin-like compounds and reproductive and steroid hormones in cord blood: The Hokkaido study.

Behaviour of S-metolachlor and its oxanilic and ethanesulfonic acids metabolites under fresh vs. partially decomposed cover crop mulches: A laboratory study.

The Role of Endocrine and Dioxin-Like Activity of Extracts of Petroleum Substances in Developmental Toxicity as Detected in a Panel of CALUX Reporter Gene Assays.

Effects of Prebiotic Fiber Xylooligosaccharide in Adenine-Induced Nephropathy in Mice.

Acetyl-L-Carnitine Attenuates Arsenic-Induced Oxidative Stress and Hippocampal Mitochondrial Dysfunction.

Serum metabolome profiling revealed potential biomarkers for milk protein yield in dairy cows.

A Suspect Screening Method for Characterizing Multiple Chemical Exposures among a Demographically Diverse Population of Pregnant Women in San Francisco.

Metabolomics Discovers Early-Response Metabolic Biomarkers that Can Predict Chronic Reproductive Fitness in Individual *Daphnia magna*.

Food Chemicals Disrupt Human Gut Microbiota Activity And Impact Intestinal Homeostasis As Revealed By In Vitro Systems.

Metabolomic analysis of serum from rats following long-term intake of Chinese sausage.

Advancing Patient Safety and Access to Concentrated Insulin (U-500 Regular Insulin) in the Veterans Health Administration: A Clinician Education Program in the Primary Care Setting.

Toward an adverse outcome pathway for impaired growth: Mitochondrial dysfunction impairs growth in early life stages of the fathead minnow (*Pimephales promelas*).

Nuclear magnetic resonance- and gas chromatography/mass spectrometry-based metabolomic characterization of water-soluble and volatile compound profiles in cabbage vinegar.

The impact of short-chain fatty acids on GLP-1 and PYY secretion from the isolated perfused rat colon.

Arsenic methylation capacity in relation to nutrient intake and genetic polymorphisms in one-carbon metabolism.

Acclimation process of cultivating *Chlorella vulgaris* in toxic excess sludge extract and its response mechanism.

Association of dioxin exposure and reproductive hormone levels in men living near the Bien Hoa airbase, Vietnam.

Exposure and risk assessment to arsenic species in Spanish children using biomonitoring.

Melatonin Rescues Mesenchymal Stem Cells from Senescence Induced by the Uremic Toxin p-Cresol via Inhibiting mTOR-Dependent Autophagy.

Transcriptomic evidence for involvement of reactive oxygen species in *Rhizoctonia solani* AG1 IA sclerotia maturation.

Systemic Acrolein Elevations in Mice With Experimental Autoimmune Encephalomyelitis and Patients With Multiple Sclerosis.

The gut microbiota metabolite indole alleviates liver inflammation in mice.

Metabolomic assessment of arsenite toxicity and novel biomarker discovery in early development of zebrafish embryos.

Cutaneous Adnexal Cysts Revisited: What We Know and What We Think We Know.

Dynamic microbial succession of Shanxi aged vinegar and its correlation with flavor metabolites during different stages of acetic acid fermentation.

Urinary metabolites of volatile organic compounds of infants in the neonatal intensive care unit.

The ability of human intestinal anaerobes to metabolize different oligosaccharides: Novel means for microbiota modulation?

High-throughput assessment of oxidative respiration in fish embryos: Advancing adverse outcome pathways for mitochondrial dysfunction.

Characterization of toluene metabolism by methanotroph and its effect on methane oxidation.

Explaining the accelerated degradation of ciprofloxacin, sulfamethazine, and erythromycin in different soil exposure scenarios by their aqueous extractability.

Peripubertal serum dioxin concentrations and subsequent sperm methylome profiles of young Russian adults.

PCB126 Inhibits the Activation of AMPK-CREB Signal Transduction Required for Energy Sensing in Liver.

Continuous Infusion of Phenyline, Cyclosporine A, or Their Combination: Evaluation of Mitochondrial Bioenergetics, Oxidative Damage, and Cytoskeletal Degradation following Severe Controlled Cortical Impact Traumatic Brain Injury in Rats.

Accumulation properties of polychlorinated biphenyl congeners in Yusho patients and prediction of their cytochrome P450-dependent metabolism by in silico analysis.

The Role of Uron and Chlorobenzene Derivatives, as Potential Endocrine Disrupting Compounds, in the Secretion of ACTH and PRL.

Factors Influencing in Vitro Organogenesis of *Chrysanthemum morifolium* cv. 'Resomee Splendid'.

Effects of biochar on the fate and toxicity of herbicide fenoxaprop-ethyl in soil.

Electrochemical simulation of triclosan metabolism and toxicological evaluation.

Human biomonitoring reference values for some non-persistent chemicals in blood and urine derived from the Canadian Health Measures Survey 2009-2013.

Transformation techniques for metabolic engineering of diatoms and haptophytes: current state and prospects.

From lignin to nylon: Cascaded chemical and biochemical conversion using metabolically engineered *Pseudomonas putida*.

Developing a piggyBac Transposon System and Compatible Selection Markers for Insertional Mutagenesis and Genome Engineering in *Yarrowia lipolytica*.

Somatic embryogenesis of muskmelon (*Cucumis melo* L.) and genetic stability assessment of regenerants using flow cytometry and ISSR markers.

Palmitic acid induces neurotoxicity and gliatotoxicity in SH-SY5Y human neuroblastoma and T98G human glioblastoma cells.

Phytotoxic and Antifungal Metabolites from *Curvularia crepinii* QTYC-1 Isolated from the Gut of *Pantala flavescens*.

Improved safety margin for embryotoxicity in rats for the new endoperoxide artefenomel (OZ439) as compared to artesunate.

A Three-Ring Circus: Metabolism of the Three Proteogenic Aromatic Amino Acids and Their Role in the Health of Plants and Animals.

Pasture Feeding Changes the Bovine Rumen and Milk Metabolome.

Molecular Mechanism of Alternative P450-Catalyzed Metabolism of Environmental Phenolic Endocrine-Disrupting Chemicals.

Adolescent Exposure to Toxic Volatile Organic Chemicals From E-Cigarettes.

Prenatal exposure to glycol ethers and sex steroid hormones at birth.

Ophthalmic acid is a marker of oxidative stress in plants as in animals.

A comparison of fish pesticide metabolic pathways with those of the rat and goat.

Using *Chlorella vulgaris* to treat toxic excess sludge extract, and identification of its response mechanism by proteomics approach.

Epidermal Growth Factor Receptor Signaling Disruption by Endocrine and Metabolic Disrupting Chemicals.

Cellular and Molecular Effects of Prolonged Low-Level Sodium Arsenite Exposure on Human Hepatic HepaRG Cells.

Pretty Good or Pretty Bad? The Ovary and Chemicals in Personal Care Products.

Metabolite profiling and isolation of biologically active compounds from *Scadoxus puniceus*, a highly traded South African medicinal plant.

Curcumin and its derivatives inhibit 2,3,7,8,-tetrachloro-dibenzo-p-dioxin-induced expression of drug metabolizing enzymes through aryl hydrocarbon receptor-mediated pathway.

Simultaneous determination and method validation of clethodim and its metabolites clethodim sulfoxide and clethodim sulfone in tobacco by LC-MS/MS.

Integrated metabolic models for xenobiotic induced mitochondrial toxicity in skeletal muscle.

Enzyme polymorphism, oxygen and injury: a lipidomic analysis of flight-induced oxidative damage in a succinate dehydrogenase d (Sdhd)-polymorphic insect.

The aryl hydrocarbon receptor and retinoid receptors cross-talk at the CYP1A1 promoter in vitro.

ER-stress mobilization of death-associated protein kinase-1-dependent xenophagy counteracts mitochondria stress-induced epithelial barrier dysfunction.

The Effect of Oxidative Stress Towards The Expression of Thiamine Biosynthesis Genes (THIC and THI1/THI4) in Oil Palm (*Elaeis guineensis*).

Differential induction of polar and non-polar metabolism during wound-induced suberization in potato (*Solanum tuberosum* L.) tubers.

Phenyl sulfate, indoxyl sulfate and p-cresyl sulfate decrease glutathione level to render cells vulnerable to oxidative stress in renal tubular cells.

Dysregulation of Intestinal Health by Environmental Pollutants: Involvement of the Estrogen Receptor and Aryl Hydrocarbon Receptor.

Prenatal dioxin exposure estimated from dioxins in breast milk and sex hormone levels in umbilical cord blood in Vietnamese newborn infants.

Association of prenatal exposure to PCDD/Fs and PCBs with maternal and infant thyroid hormones: The Hokkaido Study on Environment and Children's Health.

Effects of sulfur-fumigation on the pharmacokinetics, metabolites and analgesic activity of *Radix Paeoniae Alba*.

Haloacetic Acid Water Disinfection Byproducts Affect Pyruvate Dehydrogenase Activity and Disrupt Cellular Metabolism.

The rolB plant oncogene affects multiple signaling protein modules related to hormone signaling and plant defense.

Persistence behavior of metamifop and its metabolite in rice ecosystem.

Synthesis of Scutellarein Derivatives with a Long Aliphatic Chain and Their Biological Evaluation against Human Cancer Cells.

Sensitive and rapid determination of glyphosate, glufosinate, bialaphos and metabolites by UPLC-MS/MS using a modified Quick Polar Pesticides Extraction method.

Differential exposure and acute health impacts of inhaled solid-fuel emissions from rudimentary and advanced cookstoves in female CD-1 mice.

Effects of arsenolipids on in vitro blood-brain barrier model.

A hierarchical testing strategy for micropollutants in drinking water regarding their potential endocrine-disrupting effects-towards health-related indicator values.

The Contribution of Superoxide Radical to Cadmium Toxicity in E. coli.

Plant hormone cytokinins control cell cycle progression and plastid replication in apicomplexan parasites.

Aryl hydrocarbon receptor signaling modulates antiviral immune responses: ligand metabolism rather than chemical source is the stronger predictor of outcome.

Development and Metabolite Profiling of Elephant Garlic Vinegar.

Compensation for chronic oxidative stress in ALADIN null mice.

Comprehensive genome-wide analysis of Glutathione S-transferase gene family in potato (*Solanum tuberosum* L.) and their expression profiling in various anatomical tissues and perturbation conditions.

The levels of peroxisomal catalase protein and activity modulate the onset of cell death in tobacco BY-2 cells via reactive oxygen species levels and autophagy.

Electronic cigarette-generated aldehydes: The contribution of e-liquid components to their formation and the use of urinary aldehyde metabolites as biomarkers of exposure.

[Determination of Hexazinone and Its Major Metabolites in Livestock Products by LC-MS/MS].

[Polymorphisms of the Arsenite Methyltransferase (As3MT) gene and urinary efficiency of arsenic metabolism in a population in northern Mexico].

A Review on the Expression and Metabolic Features of Orphan Human Cytochrome P450 2S1 (CYP2S1).

Novel Biosensors for the Rapid Detection of Toxicants in Foods.

Cigarette Smoke Extract Disrupts Transcriptional Activities Mediated by Thyroid Hormones and Its Receptors.

Self-Directed in Cell Production of Methionine Analogue Azidohomoalanine by Synthetic Metabolism and Its Incorporation into Model Proteins.

Dioxin Exposure Alters Molecular and Morphological Responses to Thyroid Hormone in *Xenopus laevis* Cultured Cells and Prometamorphic Tadpoles.

Neighborhood Factors and Urinary Metabolites of Nicotine, Phthalates, and Dichlorobenzene.

Enabling the valorization of guaiacol-based lignin: Integrated chemical and biochemical production of cis,cis-muconic acid using metabolically engineered *Amycolatopsis* sp ATCC 39116.

Metabolism and disposition of arsenic species from controlled oral dosing with sodium arsenite in adult female CD-1 mice. I. Pilot study to determine dosing, analytical measurements, and sampling strategies.

Combined toxicity of triclosan, 2,4-dichlorophenol and 2,4,6-trichlorophenol to zebrafish (*Danio rerio*).

Early Metabolome Profiling and Prognostic Value in Paraquat-Poisoned Patients: Based on Ultraperformance Liquid Chromatography Coupled To Quadrupole Time-of-Flight Mass Spectrometry.

Enantioselective disturbance of chiral herbicide dichlorprop to nitrogen metabolism of *Arabidopsis thaliana*: Regular analysis and stable isotope attempt.

Cytogenetic damage in peripheral blood lymphocytes of children exposed to pesticides in agricultural areas of the department of Cordoba, Colombia.

Effects of glyphosate residues and different concentrate feed proportions on performance, energy metabolism and health characteristics in lactating dairy cows.

Effects of glyphosate-based herbicides on survival, development and growth of invasive snail (*Pomacea canaliculata*).

Effects of glyphosate-based herbicide on pintado da AmazÃ´nia: Hematology, histological aspects, metabolic parameters and genotoxic potential.

Tissue metabolic changes for effects of pirfenidone in rats of acute paraquat poisoning by GC-MS.

Editor's Highlight: Structure-Based Investigation on the Binding and Activation of Typical Pesticides With Thyroid Receptor.

RNA sequencing indicates that atrazine induces multiple detoxification genes in *Daphnia magna* and this is a potential source of its mixture interactions with other chemicals.

Exposures to arsenite and methylarsonite produce insulin resistance and impair insulin-dependent glycogen metabolism in hepatocytes.

Acrolein Disrupts Tight Junction Proteins and Causes Endoplasmic Reticulum Stress-Mediated Epithelial Cell Death Leading to Intestinal Barrier Dysfunction and Permeability.

Facts and Fallacies in the Debate on Glyphosate Toxicity.

Genetic variation in Dip5, an amino acid permease, and Pdr5, a multiple drug transporter, regulates glyphosate resistance in *S. cerevisiae*.

Agricultural expansion as risk to endangered wildlife: Pesticide exposure in wild chimpanzees and baboons displaying facial dysplasia.

Dopaminergic Dysfunction in Mammalian Dopamine Neurons Induced by Simazine Neurotoxicity.

The hepatoprotective effects of aquatic extract of *Levisticum officinale* against paraquat hepatocyte toxicity.

Fluazifop-P-butyl induced ROS generation with IAA (indole-3-acetic acid) oxidation in *Acanthospermum hispidum* D.C.

Mechanism of resistance to cyhalofop-butyl in Chinese sprangletop (*Leptochloa chinensis* (L.) Nees).

Characterization of glutathione S-transferases in the detoxification of metolachlor in two maize cultivars of differing herbicide tolerance.

Multiple mechanisms are involved in new imazamox-resistant varieties of durum and soft wheat.

Induction of the PDH bypass and upregulation of the ALDH7B4 in plants treated with herbicides inhibiting amino acid biosynthesis.

Proteomic analysis of the soil filamentous fungus *Aspergillus nidulans* exposed to a Roundup formulation at a dose causing no macroscopic effect: a functional study.

The dissipation and risk assessment of 2,4-D sodium, a preharvest anti-fruit-drop plant hormone in bayberries.

Glyphosate-induced oxidative stress in *Arabidopsis thaliana* affecting peroxisomal metabolism and triggers activity in the oxidative phase of the pentose phosphate pathway (OxPPP) involved in NADPH generation.

Atrazine exposure decreases the activity of DNMTs, global DNA methylation levels, and dnmt expression.

Exposure of frogs and tadpoles to chiral herbicide fenoxaprop-ethyl.

Serine alleviates oxidative stress via supporting glutathione synthesis and methionine cycle in mice.

Epi/perineural and Schwann Cells as Well as Perineural Sheath Integrity are Affected Following 2,4-D Exposure.

Detoxification of Atrazine by Low Molecular Weight Thiols in Alfalfa (*Medicago sativa*).

Assessment of genotoxicity of four volatile pollutants from cigarette smoke based on the in vitro $^3\text{H}2\text{AX}$ assay using high content screening.

Influence of sublethal doses of acetamiprid and halosulfuron-methyl on metabolites of zebra fish (*Brachydanio rerio*).

Neonatal exposure to a glyphosate-based herbicide alters uterine decidualization in rats.

Effects of sub-chronic exposure to terbuthylazine on DNA damage, oxidative stress and parent compound/metabolite levels in adult male rats.

Lack of immunotoxic effects of repeated exposure to atrazine associated with the adaptation of adrenal gland activation.

Herbicide glufosinate inhibits yeast growth and extends longevity during wine fermentation.

Atrazine induced epigenetic transgenerational inheritance of disease, lean phenotype and sperm epimutation pathology biomarkers.

Reproductive toxicity of Roundup herbicide exposure in male albino rat.

Simultaneous determination of bentazone and its metabolites in postmortem whole blood using liquid chromatography-tandem mass spectrometry.

The metabolic effects of diuron in the rat liver.

Insights into the differential toxicological and antioxidant effects of 4-phenylchalcogenil-7-chloroquinolines in *Caenorhabditis elegans*.

Cyclophosphamide and acrolein induced oxidative stress leading to deterioration of metaphase II mouse oocyte quality.

Gender-specific histopathological response in guppies *Poecilia reticulata* exposed to glyphosate or its metabolite aminomethylphosphonic acid.

Toxicity of two classes of arsenolipids and their water-soluble metabolites in human differentiated neurons.

Exogenous Acrolein intensifies sensory hypersensitivity after spinal cord injury in rat.

Role of metabolites of cyclophosphamide in cardiotoxicity.

Distribution and incorporation mode of the herbicide MCPA in soil derived organo-clay complexes.

Respiratory Effects and Systemic Stress Response Following Acute Acrolein Inhalation in Rats.

Biomarkers of Chronic Acrolein Inhalation Exposure in Mice: Implications for Tobacco Product-Induced Toxicity.

Tanshinone I Induces Mitochondrial Protection through an Nrf2-Dependent Mechanism in Paraquat-Treated Human Neuroblastoma SH-SY5Y Cells.

[Experimental study scavenging effect of paraquat by hemoperfusion].

Metabolic profiling of goldfish (*Carassius auratus*) after long-term glyphosate-based herbicide exposure.

Influence of temperature on the antioxidant responses and lipid peroxidation of two species of tadpoles (*Rhinella schneideri* and *Physalaemus nattereri*) exposed to the herbicide sulfentrazone (Boral 500SC[®]).

Effects of monosulfuron-ester on metabolic processes of nitrogen-fixing cyanobacteria *Anabaena flos-aquae* and *Anabaena azotica*.

In utero exposure to atrazine analytes and early menarche in the Avon Longitudinal Study of Parents and Children Cohort.

Effect of glyphosate acid on biochemical markers of periphyton exposed in outdoor mesocosms in the presence and absence of the mussel *Limnoperna fortunei*.

DNA damage and methylation induced by glyphosate in human peripheral blood mononuclear cells (in vitro study).

Glucose Metabolism and AMPK Signaling Regulate Dopaminergic Cell Death Induced by Gene (±-Synuclein)-Environment (Paraquat) Interactions.

Arginine metabolism and its protective effects on intestinal health and functions in weaned piglets under oxidative stress induced by diquat.

Is it time to reassess current safety standards for glyphosate-based herbicides?

Activating nuclear xenobiotic receptors and triggering ER stress and hepatic cytochromes P450 systems in quails (*Coturnix C. coturnix*) during atrazine exposure.

Evidence for direct effects of glyphosate on ovarian function: glyphosate influences steroidogenesis and proliferation of bovine granulosa but not theca cells in vitro.

Exchange of polar lipids from adults to neonates in *Daphnia magna*: Perturbations in sphingomyelin allocation by dietary lipids and environmental toxicants.

Isoxadifen safening mechanism in sweet corn genotypes with differential response to P450-metabolized herbicides.

Isolation and characterization of two glutathione S-transferases from freshwater bivalve *Anodonta woodiana*: Chronic effects of pentachlorophenol on gene expression profiles.

Weight-of-the-evidence evaluation of 2,4-D potential for interactions with the estrogen, androgen and thyroid pathways and steroidogenesis.

Root-level exposure reveals multiple physiological toxicity of triazine xenobiotics in *Arabidopsis thaliana*.

Reduced expression of selective immune-related genes in silver catfish (*Rhamdia quelen*) monocytes exposed to atrazine.

Effects of atrazine and chlorothalonil on the reproductive success, development, and growth of early life stage sockeye salmon (*Oncorhynchus nerka*).

Effects of three triazine metabolites and their mixture at environmentally relevant concentrations on early life stages of marbled crayfish (*Procambarus fallax f. virginalis*).

Metabolic Interference of sod gene mutations on catalase activity in *Escherichia coli* exposed to Gramoxone® (paraquat) herbicide.

The association of cancer risks with pentachlorophenol exposure: Focusing on community population in the areas along certain section of Yangtze River in China.

Sodium chlorate, a major water disinfection byproduct, alters brush border membrane enzymes, carbohydrate metabolism and impairs antioxidant system of Wistar rat intestine.

Assessing genotoxicity of diuron on *Drosophila melanogaster* by the wing-spot test and the wing imaginal disk comet assay.

Effects of melatonin in rats in the initial third stage of pregnancy exposed to sub-lethal doses of herbicides.

Evaluation of various glyphosate concentrations on DNA damage in human Raji cells and its impact on cytotoxicity.

Biological responses to phenylurea herbicides in fish and amphibians: New directions for characterizing mechanisms of toxicity.

Acrolein increases macrophage atherogenicity in association with gut microbiota remodeling in atherosclerotic mice: protective role for the polyphenol-rich pomegranate juice.

Effects of a glyphosate-based herbicide on the uterus of adult ovariectomized rats.

The chronic effects of terbuthylazine-2-hydroxy on early life stages of marbled crayfish (*Procambarus fallax f. virginalis*).

Mapping Proteome-wide Targets of Glyphosate in Mice.

Identification of sulfonylurea biodegradation pathways enabled by a novel nicosulfuron-transforming strain *Pseudomonas fluorescens* SG-1: Toxicity assessment and effect of formulation.

Perinatal exposure to glyphosate-based herbicide alters the thyrotrophic axis and causes thyroid hormone homeostasis imbalance in male rats.

Fast pesticide detection inside microfluidic device with integrated optical pH, oxygen sensors and algal fluorescence.

Ustiloxin G, a New Cyclopeptide Mycotoxin from Rice False Smut Balls.

Quizalofop-P-ethyl exposure increases estrogen axis activity in male and slightly decreases estrogen axis activity in female zebrafish (*Danio rerio*).

Biodegradation of the Herbicide 2,4-Dichlorophenoxyacetic Acid by a New Isolated Strain of *Achromobacter* sp. LZ35.

Effects of atrazine on ovarian growth, in the estuarine crab *Neohelice granulata*.

A glyphosate-based herbicide induces histomorphological and protein expression changes in the liver of the female guppy *Poecilia reticulata*.

Mixtures of herbicides and metals affect the redox system of honey bees.

Neonatal exposure to a glyphosate based herbicide alters the development of the rat uterus.

Protective effects of activated signaling pathways by insulin on C6 glial cell model of MPP(+)-induced Parkinson's disease.

The protective effects of *Cichorium glandulosum* seed and cynarin against cyclophosphamide and its metabolite acrolein-induced hepatotoxicity in vivo and in vitro.

Toxicity of Plant Secondary Metabolites Modulating Detoxification Genes Expression for Natural Red Palm Weevil Pesticide Development.

Acrolein and Human Disease: Untangling the Knotty Exposure Scenarios Accompanying Several Diverse Disorders.

Pesticide Chemical Research in Toxicology: Lessons from Nature.

Multiomics reveal non-alcoholic fatty liver disease in rats following chronic exposure to an ultra-low dose of Roundup herbicide.

Protective action of Omega-3 on paraquat intoxication in *Drosophila melanogaster*.

[Unexplored Chemical Reactions of Endogenous Acrolein: Detection, Toxicity, and Biological Roles].

A longitudinal study of atrazine and 2,4-D exposure and oxidative stress markers among Iowa corn farmers.

Biomarker analysis of American toad (*Anaxyrus americanus*) and grey tree frog (*Hyla versicolor*) tadpoles following exposure to atrazine.

Effect of the herbicide atrazine and its metabolite DACT on bovine sperm quality.

Sodium chlorate, a herbicide and major water disinfectant byproduct, generates reactive oxygen species and induces oxidative damage in human erythrocytes.

Effects of glyphosate acid and the glyphosate-commercial formulation (Roundup) on *Dimorphandra wilsonii* seed germination: Interference of seed respiratory metabolism.

Immunotoxic effects of atrazine and its main metabolites at environmental relevant concentrations on larval zebrafish (*Danio rerio*).

Pentachlorophenol affected both reproductive and interrenal systems: In silico and in vivo evidence.

Embryo-larval exposure to atrazine reduces viability and alters oxidative stress parameters in *Drosophila melanogaster*.

Prometryn and humic acid induce Cytochrome P450 1A expression in *Danio rerio* (zebrafish).

Short-term phytotoxicity in *Brassica napus* (L.) in response to pre-emergently applied metazachlor: A microcosm study.

Beneficial Effects of the Amino Acid Glycine.

Population and life-stage-specific effects of two herbicide formulations on the aquatic development of European common frogs (*Rana temporaria*).

Association of Low-Moderate Arsenic Exposure and Arsenic Metabolism with Incident Diabetes and Insulin Resistance in the Strong Heart Family Study.

Cinnamaldehyde induces fat cell-autonomous thermogenesis and metabolic reprogramming.

Soluble Vascular Adhesion Protein-1 Mediates Spermine Oxidation as Semicarbazide-Sensitive Amine Oxidase: Possible Role in Proliferative Diabetic Retinopathy.

An investigation of the health effects caused by exposure to arsenic from drinking water and coal combustion: arsenic exposure and metabolism.

Coadministration of isomalto-oligosaccharides augments metabolic health benefits of cinnamaldehyde in high fat diet fed mice.

Acrolein Scavenger Hydralazine Prevents Streptozotocin-Induced Painful Diabetic Neuropathy and Spinal Neuroinflammation in Rats.

Combined Catalase and ADH Inhibition Ameliorates Ethanol-Induced Myocardial Dysfunction Despite Causing Oxidative Stress in Conscious Female Rats.

Individual Amino Acid Supplementation Can Improve Energy Metabolism and Decrease ROS Production in Neuronal Cells Overexpressing Alpha-Synuclein.

Carbenoxolone inhibits TRPV4 channel-initiated oxidative urothelial injury and ameliorates cyclophosphamide-induced bladder dysfunction.

Targeted proteome analysis with isotope-coded protein labels for monitoring the influence of dietary phytochemicals on the expression of cytoprotective proteins in primary human colon cells.

Fusarium infection causes genotoxic disorders and antioxidant-based damages in *Orobancha* spp.

Cinnamaldehyde in diabetes: A review of pharmacology, pharmacokinetics and safety.

4-Hydroxyphenylpyruvate Dioxygenase and Its Inhibition in Plants and Animals: Small Molecules as Herbicides and Agents for the Treatment of Human Inherited Diseases.

Computational study involving identification of endocrine disrupting potential of herbicides: Its implication in TDS and cancer progression in CRPC patients.

Cinnamaldehyde potentially attenuates gestational hyperglycemia in rats through modulation of PPAR α , proinflammatory cytokines and oxidative stress.

In vitro antioxidant activities of resveratrol, cinnamaldehyde and their synergistic effect against cyadox-induced cytotoxicity in rabbit erythrocytes.

Effects of cinnamaldehyde or monensin on performance of weaned Holstein dairy heifers.

Diquat-induced cellular pyridine nucleotide redox changes and alteration of metabolic enzyme activities in colonic carcinoma cells.

Cinnamaldehyde Ameliorates Diet-Induced Obesity in Mice by Inducing Browning of White Adipose Tissue.

Local upregulation of transient receptor potential ankyrin 1 and transient receptor potential vanilloid 1 ion channels in rectosigmoid deep infiltrating endometriosis.

Localization of Acrolein-Lysine Adduct in Fibrovascular Tissues of Proliferative Diabetic Retinopathy.

Antifungal Activity of *Ramulus cinnamomi* Explored by $^1\text{H-NMR}$ Based Metabolomics Approach.

[Confirmation and analysis of the metabolites of pentachlorophenol in loaches using ultra-performance liquid chromatography-high resolution mass spectrometry].

A CRISPR screen identifies a pathway required for paraquat-induced cell death.

Metabolomic analysis of oxidative stress: Superoxide dismutase mutation and paraquat induced stress in *Drosophila melanogaster*.

Unusual arsenic metabolism in Giant Pandas.

Phytotoxic activity against *Bromus tectorum* for secondary metabolites of a seed-pathogenic *Fusarium* strain belonging to the *F. tricinctum* species complex.

Chloroplast-associated metabolic functions influence the susceptibility of maize to *Ustilago maydis*.

Foliar Glyphosate Treatment Alters Transcript and Hormone Profiles in Crown Buds of Leafy Spurge and Induces Dwarfed and Bushy Phenotypes throughout its Perennial Lifecycle.

Microbial catabolism of chemical herbicides: Microbial resources, metabolic pathways and catabolic genes.

Different Routes for Conifer- and Sinapaldehyde and Higher Saccharification upon Deficiency in the Dehydrogenase CAD1.

Multiple spectroscopic analyses reveal the fate and metabolism of sulfamide herbicide triafamone in agricultural environments.

The inhibition of myometrial contractions by chlorinated herbicides (atrazine and linuron), and their disruptive effect on the secretory functions of uterine and ovarian cells in cow, in vitro.

Phytochemicals reduce aflatoxin-induced toxicity in chicken embryos.

Using short-term bioassays to evaluate the endocrine disrupting capacity of the pesticides linuron and fenoxycarb.

An accurate and robust LC-MS/MS method for the quantification of chlorfenvinphos, ethion and linuron in liver samples.

Biochemical characterization of metabolism-based atrazine resistance in *Amaranthus tuberculatus* and identification of an expressed GST associated with resistance.

Uptake, Translocation, Metabolism, and Distribution of Glyphosate in Nontarget Tea Plant (*Camellia sinensis* L.).

Combination of quercetin, cinnamaldehyde and hirudin protects rat dorsal root ganglion neurons against high glucose-induced injury through Nrf-2/HO-1 activation and NF- κ B inhibition.

Enantioselective accumulation, metabolism and phytoremediation of lactofen by aquatic macrophyte *Lemna minor*.

Biodegradation of diuron by an endophytic fungus *Neurospora intermedia* DP8-1 isolated from sugarcane and its potential for remediating diuron-contaminated soils.

Identification and Biological Evaluation of Secondary Metabolites from Marine Derived Fungi-*Aspergillus* sp. SCSLOW3, Cultivated in the Presence of Epigenetic Modifying Agents.

Evidence of *in vitro* metabolic interaction effects of a chlorfenvinphos, ethion and linuron mixture on human hepatic detoxification rates.

Biokinetic Analysis and Metabolic Fate of 2,4-D in 2,4-D-Resistant Soybean (*Glycine max*).

Estimating Pesticide Attenuation From Water Dating and the Ratio of Metabolite to Parent Compound.

Iron and Zinc Supplementation Does Not Impact Urinary Arsenic Excretion in Mexican School Children.

The metabolic pathway of metamifop degradation by consortium ME-1 and its bacterial community structure.

A drastic superoxide-dependent oxidative stress is prerequisite for the down-regulation of IRP1: Insights from studies on SOD1-deficient mice and macrophages treated with paraquat.

ROS regulation of axonal mitochondrial transport is mediated by Ca²⁺ and JNK in *Drosophila*.

Optimization and Validation of a Residue Analysis Method for Glyphosate, Glufosinate, and Their Metabolites in Plant Matrixes by Liquid Chromatography with Tandem Mass Spectrometry.

Changes in the mitochondrial protein profile due to ROS eruption during ageing of elm (*Ulmus pumila* L.) seeds.

Metabolic parameters and oxidative balance in juvenile *Rhamdia quelen* exposed to rice paddy herbicides: Roundup(®), Primoleo(®), and Facet(®).

Formation of 2,4-D bound residues in soils: New insights into microbial metabolism.

Autophagy deficient keratinocytes display increased DNA damage, senescence and aberrant lipid composition after oxidative stress *in vitro* and *in vivo*.

Simple and sensitive determination of atrazine and its toxic metabolites in environmental water by carboxyl modified polyacrylonitrile nanofibers mat-based solid-phase extraction coupled with liquid chromatography-diode array detection.

Urinary Concentrations of Insecticide and Herbicide Metabolites among Pregnant Women in Rural Ghana: A Pilot Study.

Interaction of chiral herbicides with soil microorganisms, algae and vascular plants.

Metabolome based volatiles profiling in 13 date palm fruit varieties from Egypt via SPME GC-MS and chemometrics.

In vitro study of soil arsenic release by human gut microbiota and its intestinal absorption by Caco-2 cells.

Phorate can reverse P450 metabolism-based herbicide resistance in *Lolium rigidum*.

Effect of pesticides and metabolites on groundwater bacterial community.

The Mitochondrial Lon Protease Is Required for Age-Specific and Sex-Specific Adaptation to Oxidative Stress.

Enhanced Indirect Somatic Embryogenesis from Shoot-Tip Explants of Date Palm by Gradual Reductions of 2,4-D Concentration.

Phytotoxic, Antifungal and Immunosuppressive Metabolites from *Aspergillus terreus* QT122 Isolated from the Gut of Dragonfly.

Occurrence of the herbicide glyphosate and its metabolite AMPA in surface waters in Switzerland determined with on-line solid phase extraction LC-MS/MS.

Novel insights into the metabolic pathway of iprodione by soil bacteria.

Impact of the Oral Adsorbent AST-120 on Organ-Specific Accumulation of Uremic Toxins: LC-MS/MS and MS Imaging Techniques.

Effects of Nrf2 deficiency on arsenic metabolism in mice.

Diverse pathways of epithelial mesenchymal transition related with cancer progression and metastasis and potential effects of endocrine disrupting chemicals on epithelial mesenchymal transition process.

Environmental estrogen-like endocrine disrupting chemicals and breast cancer.

Chloracne in a Farming Family.

p-Cresyl glucuronide is a major metabolite of p-cresol in mouse: in contrast to p-cresyl sulphate, p-cresyl glucuronide fails to promote insulin resistance.

Persistent Endocrine-Disrupting Chemicals and Fatty Liver Disease.

From the Cover: High Susceptibility of Lrig1 Sebaceous Stem Cells to TCDD in Mice.

The Effects of an Environmentally Relevant Level of Arsenic on the Gut Microbiome and Its Functional Metagenome.

Editor's Highlight: PCB126 Exposure Increases Risk for Peripheral Vascular Diseases in a Liver Injury Mouse Model.

Elucidation of protective efficacy of Pentahydroxy flavone isolated from *Madhuca indica* against arsenite-induced cardiomyopathy: Role of Nrf-2, PPAR- γ , c-fos and c-jun.

Genetic susceptibility to breast cancer risk associated with inorganic arsenic exposure.

Maternal Resveratrol Treatment Reduces the Risk of Mammary Carcinogenesis in Female Offspring Prenatally Exposure to 2,3,7,8-Tetrachlorodibenzo-p-Dioxin.

Changes in vasoactive pathways in congenital diaphragmatic hernia associated pulmonary hypertension explain unresponsiveness to pharmacotherapy.

Enoxacin with UVA Irradiation Induces Apoptosis in the AsPC1 Human Pancreatic Cancer Cell Line Through ROS Generation.

Obesogenic endocrine disruptors and obesity: myths and truths.

A dioxin-like compound induces hyperplasia and branching morphogenesis in mouse mammary gland, through alterations in TGF- β 1 and aryl hydrocarbon receptor signaling.

Microbiome perturbation by oral vancomycin reduces plasma concentration of two gut-derived uremic solutes, indoxyl sulfate and p-cresyl sulfate, in end-stage renal disease.

Targeting energy metabolism of cancer cells: Combined administration of NCL-240 and 2-DG.

[Sensory axonal polyneuropathy due to 2,4-dinitrophenol].

Mitochondrial uncoupling in the melanocortin system differentially regulates NPY and POMC neurons to promote weight-loss.

Association Between Dioxin and Metabolic Syndrome by Age and Sex in an Endemic Area of Exposure in Taiwan.

Heme Biosynthetic Pathway is Functionally Linked to Adipogenesis via Mitochondrial Respiratory Activity.

Mixture effects of 30 environmental contaminants on incident metabolic syndrome-A prospective study.

Effect of dioxin and 17 β -estradiol on the expression of cytochrome P450 1A1 gene via an estrogen receptor dependent pathway in cellular and xenografted models.

The relationship between dioxins exposure and risk of prostate cancer with steroid hormone and age in Vietnamese men.

The human bitter taste receptor T2R38 is broadly tuned for bacterial compounds.

Overexpression of the Transcriptional Regulator WOR1 Increases Susceptibility to Bile Salts and Adhesion to the Mouse Gut Mucosa in *Candida albicans*.

Adipose Tissue as a Site of Toxin Accumulation.

Chronic exposure of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces an obesogenic effect in C57BL/6J mice fed a high fat diet.

Changes in Serum Adiponectin in Mice Chronically Exposed to Inorganic Arsenic in Drinking Water.

Metabolic inhibition reduces cardiac L-type Ca²⁺ channel current due to acidification caused by ATP hydrolysis.

Relationships between serum-induced AhR bioactivity or mitochondrial inhibition and circulating polychlorinated biphenyls (PCBs).

Distribution, lipid-bilayer affinity and kinetics of the metabolic effects of dinoseb in the liver.

Increased Frequency of Rheumatoid Arthritis and Allergic Rhinitis among Pesticide Sprayers and Associations with Pesticide Use.

The Complex Biology of the Aryl Hydrocarbon Receptor and Its Role in the Pituitary Gland.

Tert-butylhydroquinone protects PC12 cells against ferrous sulfate-induced oxidative and inflammatory injury via the Nrf2/ARE pathway.

An infant and mother with severe B(12) deficiency: vitamin B(12) status assessment should be determined in pregnant women with anaemia.

Benign and tumor parenchyma metabolomic profiles affect compensatory renal growth in renal cell carcinoma surgical patients.

Key Role for the Organic Anion Transporters, OAT1 and OAT3, in the in vivo Handling of Uremic Toxins and Solutes.

High Consumption of Iron Exacerbates Hyperlipidemia, Atherosclerosis, and Female Sterility in Zebrafish via Acceleration of Glycation and Degradation of Serum Lipoproteins.

Insights into the intracellular mechanisms of citronellal in *Candida albicans*: implications for reactive oxygen species-mediated necrosis, mitochondrial dysfunction, and DNA damage.

Correlation Between Nasal Epithelial Injury and In Vitro Cytotoxicity Using a Series of Small Molecule Protein Tyrosine Phosphatase 1B Inhibitors Investigated for Reversal of Leptin Resistance in Obesity.

Downregulation of androgen receptors by NaAsO₂ via inhibition of AKT-NF- κ B and HSP90 in castration resistant prostate cancer.

Role of the aryl hydrocarbon receptor in carcinogenesis and potential as an anti-cancer drug target.

Thiamine and benfotiamine prevent stress-induced suppression of hippocampal neurogenesis in mice exposed to predation without affecting brain thiamine diphosphate levels.

Absence of the NOD2 protein renders epithelia more susceptible to barrier dysfunction due to mitochondrial dysfunction.

Effect of pistachio consumption on the modulation of urinary gut microbiota-related metabolites in prediabetic subjects.

Direct participation of DNA in the formation of singlet oxygen and base damage under UVA irradiation.

Protective effect of hydroxytyrosol in arsenic-induced mitochondrial dysfunction in rat brain.

Indole-3-carbinol, a plant nutrient and AhR-Ligand precursor, supports oral tolerance against OVA and improves peanut allergy symptoms in mice.

Dioxin-induced increase in leukotriene B₄ biosynthesis through the aryl hydrocarbon receptor and its relevance to hepatotoxicity owing to neutrophil infiltration.

Mitochondrion to endoplasmic reticulum apposition length in zebrafish embryo spinal progenitors is unchanged in response to perturbations associated with Alzheimer's disease.

Progesterone resistance in endometriosis: origins, consequences and interventions.

Levels and profiles of organohalogenated contaminants in human blood from Egypt.

Polychlorinated biphenyls exposure-induced insulin resistance is mediated by lipid droplet enlargement through Fsp27.

NAD(+) loss, a new player in AhR biology: prevention of thymus atrophy and hepatosteatosis by NAD(+) repletion.

TCF21 and the environmental sensor aryl-hydrocarbon receptor cooperate to activate a pro-inflammatory gene expression program in coronary artery smooth muscle cells.

Iron Supplements Modulate Colon Microbiota Composition and Potentiate the Protective Effects of Probiotics in Dextran Sodium Sulfate-induced Colitis.

Elastase and matrix metalloproteinase activities are associated with pulmonary vascular disease in the nitrofen rat model of congenital diaphragmatic hernia.

Limited reduction in uremic solute concentrations with increased dialysis frequency and time in the Frequent Hemodialysis Network Daily Trial.

The unusual presentation of a burn from methyl bromide exposure: A case report and review of the literature.

Dose-Response Relationship between Inorganic Arsenic Exposure and Lung Cancer among Arseniasis Residents with Low Methylation Capacity.

DNP, mitochondrial uncoupling, and neuroprotection: A little dab'll do ya.

Fecal metagenomic profiles in subgroups of patients with myalgic encephalomyelitis/chronic fatigue syndrome.

Lipidomic Evaluation of Aryl Hydrocarbon Receptor-Mediated Hepatic Steatosis in Male and Female Mice Elicited by 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Relation of polymorphism of arsenic metabolism genes to arsenic methylation capacity and developmental delay in preschool children in Taiwan.

Prevalence and pattern of potential drug-drug interactions among chronic kidney disease patients in south-western Nigeria.

Cost-effectiveness analysis of ultrasonography screening for nonalcoholic fatty liver disease in metabolic syndrome patients.

Endocrine disrupting compounds modulates adiponectin secretion, expression of its receptors and action on steroidogenesis in ovarian follicle.

Tyrosine kinase inhibition is an important factor for gene expression of CRTH2 in human eosinophils and lymphocytes: A novel mechanism for explaining eosinophils recruitment by the neuro-immune axis in allergic rhinitis.

Persistent organic pollutants and diabetes among Inuit in the Canadian Arctic.

1,2-Dichloroethane impairs glucose and lipid homeostasis in the livers of NIH Swiss mice.

Evaluation of sodium arsenite exposure on reproductive competence in pregnant and postlactational dams and their offspring.

Intracellular ATP in balance of pro- and anti-inflammatory cytokines in adipose tissue with and without tissue expansion.

Protective effects of levamisole, acetylsalicylic acid, and α -tocopherol against dioxin toxicity measured as the expression of AhR and COX-2 in a chicken embryo model.

In utero and childhood DDT, DDE, PBDE and PCBs exposure and sex hormones in adolescent boys: The CHAMACOS study.

Immunomodulation of cell-penetrating tat-metallothionein for successful outcome of xenotransplanted pancreatic islet.

Iron Deficiency Anemia in Adolescents Who Present with Heavy Menstrual Bleeding.

Prenatal Exposure to Glycol Ethers and Neurocognitive Abilities in 6-Year-Old Children: The PELAGIE Cohort Study.

Dioxin-like rather than non-dioxin-like PCBs promote the development of endometriosis through stimulation of endocrine-inflammation interactions.

Dose-response characteristics of Clematis triterpenoid saponins and clematichinenoside AR in rheumatoid arthritis rats by liquid chromatography/mass spectrometry-based serum and urine metabolomics.

Strain differences in arsenic-induced oxidative lesion via arsenic biomethylation between C57BL/6J and 129X1/SvJ mice.

Hyperglycemia enhances arsenic-induced platelet and megakaryocyte activation.

Bisphenol A and its derivatives tetrabromobisphenol A and tetrachlorobisphenol A induce apelin expression and secretion in ovarian cancer cells through a peroxisome proliferator-activated receptor gamma-dependent mechanism.

Pharmacologic Impact (aka "Breaking Bad") of Medications on Wound Healing and Wound Development: A Literature-based Overview.

Endocrine Disruptors and Obesity.

Targeted mitochondrial uncoupling beyond UCP1 - The fine line between death and metabolic health.

Chronic Exposure to Low Doses of Dioxin Promotes Liver Fibrosis Development in the C57BL/6J Diet-Induced Obesity Mouse Model.

Arsenite in drinking water produces glucose intolerance in pregnant rats and their female offspring.

Pesticides: an update of human exposure and toxicity.

Epidemiology of endometriosis and its comorbidities.

p-Cresyl Sulfate.

Aryl hydrocarbon receptor/cytochrome P450 1A1 pathway mediates breast cancer stem cells expansion through PTEN inhibition and β -Catenin and Akt activation.

Urinary metabolomics revealed arsenic exposure related to metabolic alterations in general Chinese pregnant women.

[Uremic toxins and gut micro biome].

[Molecular Mechanism Whereby Maternal Exposure to Dioxin Suppresses Sexual Maturation of the Offspring after Growing Up].

Probiotics for experimental obesity prevention: focus on strain dependence and viability of composition.

From Weed Killer to Wonder Drug.

Dioxin-metabolizing genes in relation to effects of prenatal dioxin levels and reduced birth size: The Hokkaido study.

Flavin nucleotides act as electron shuttles mediating reduction of the [2Fe-2S] clusters in mitochondrial outer membrane protein mitoNEET.

Determination of S-methyl-L-methionine (SMM) from Brassicaceae Family Vegetables and Characterization of the Intestinal Transport of SMM by Caco-2 Cells.

Persistent organic pollutants in early pregnancy and risk of gestational diabetes mellitus.

Genome Editing with Engineered Nucleases in Economically Important Animals and Plants: State of the Art in the Research Pipeline.

Targeted Modification of Mitochondrial ROS Production Converts High Glucose-Induced Cytotoxicity to Cytoprotection: Effects on Anesthetic Preconditioning.

Associations of arsenic metabolites, methylation capacity, and skin lesions caused by chronic exposure to high arsenic in tube well water.

A relationship in adrenal androgen levels between mothers and their children from a dioxin-exposed region in Vietnam.

Identification, Synthesis, and Safety Assessment of Thidiazuron [1-Phenyl-3-(1,2,3-thiadiazol-5-yl)urea] and Its Metabolites in Kiwifruits.

Biomarkers identification by a combined clinical and metabolomics analysis in Henoch-Schonlein purpura nephritis children.

The Fate of Glyphosate and AMPA in a Freshwater Endorheic Basin: An Ecotoxicological Risk Assessment.

Synergistic Effect in Core Microbiota Associated with Sulfur Metabolism in Spontaneous Chinese Liquor Fermentation.

Receptor-interacting protein 140 as a co-repressor of Heat Shock Factor 1 regulates neuronal stress response.

The genomic study of an environmental isolate of *Scedosporium apiospermum* shows its metabolic potential to degrade hydrocarbons.

Identification of differentially expressed genes response to TCDD in rat brain after long-term low-dose exposure.

Tissue breathing and topology of rats thymocytes surface under acute total $\hat{1}^3$ -irradiation.

Effects of water extracts of *Rehmannia glutinosa* on antioxidant system of Nrf2 in paraquat-induced insulin resistance diabetic rat model.

Microbial metabolism directly affects trace gases in (sub) polar snowpacks.

Caffeine - rich infusion from *Cola nitida* (kola nut) inhibits major carbohydrate catabolic enzymes; abates redox imbalance; and modulates oxidative dysregulated metabolic pathways and metabolites in Fe(2+)-induced hepatic toxicity.

Hexachlorobenzene as a persistent organic pollutant: Toxicity and molecular mechanism of action.

Endocrine disruptors affect larval zebrafish behavior: Testing potential mechanisms and comparisons of behavioral sensitivity to alternative biomarkers.

A fatal case of acute bentazone overdose despite cricothyroidotomy during cardiopulmonary resuscitation.

Morphological and morphometrical changes on adult Wistar rat testis caused by chronic sodium arsenite exposure.

Actein alleviates 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated cellular dysfunction in osteoblastic MC3T3-E1 cells.

2, 3, 7, 8-Tetrachlorodibenzo-p-dioxin promotes endothelial cell apoptosis through activation of EP3/p38MAPK/Bcl-2 pathway.

Molecular interactions of dioxins and DLCs with the xenosensors (PXR and CAR): An in silico risk assessment approach.

Comparative metabolomics in vanilla pod and vanilla bean revealing the biosynthesis of vanillin during the curing process of vanilla.

Hydrogeological characteristics influencing the occurrence of pesticides and pesticide metabolites in groundwater across the Republic of Ireland.

Interaction of mammary bovine ABCG2 with AFB1 and its metabolites and regulation by PCB 126 in a MDCKII in vitro model.

Evaluation of 2,4-dichlorophenol exposure of Japanese medaka, *Oryzias latipes*, using a metabolomics approach.

Toxic effects of polybrominated diphenyl ethers (BDE 47 and 99) and localization of BDE-99-induced cyp1a mRNA in zebrafish larvae.

In Silico Analysis of Putrefaction Pathways in Bacteria and Its Implication in Colorectal Cancer.

Pinocembrin, a novel histidine decarboxylase inhibitor with anti-allergic potential in in vitro.

Editor's Highlight: Ah Receptor Activation Potentiates Neutrophil Chemoattractant (C-X-C Motif) Ligand 5 Expression in Keratinocytes and Skin.

The Burden of Mental Illness Among Veterans: Use of VHA Health Care Services by Those With Service-connected Conditions.

Neuroprotective effects of hydrogen sulfide on sodium azide-induced autophagic cell death in PC12 cells.

Concentrations of urinary arsenic species in relation to rice and seafood consumption among children living in Spain.

Synergistic antimutagenic effect of isothiocyanates against varied mutagens.

Demonstrating Principles of Metabolism through Herbicide Treatment of Microalgae.

Assessment of prescribed medications and pattern of distribution for potential drug-drug interactions among chronic kidney disease patients attending the Nephrology Clinic of Lagos University Teaching Hospital in Sub-Saharan West Africa.

Residue Dynamics and Risk Assessment of Prochloraz and Its Metabolite 2,4,6-Trichlorophenol in Apple.

Polychlorinated biphenyls and depression: cross-sectional and longitudinal investigation of a dopamine-related Neurochemical path in the German HELPCB surveillance program.

Transcriptomic and Functional Analyses on the Effects of Dioxin on Insulin Secretion of Pancreatic Islets and β -Cells.

Rice 7-Hydroxymethyl Chlorophyll a Reductase Is Involved in the Promotion of Chlorophyll Degradation and Modulates Cell Death Signaling.

Novel Pathways of Ponatinib Disposition Catalyzed By CYP1A1 Involving Generation of Potentially Toxic Metabolites.

Toxicological interactions of pesticide mixtures: an update.

24-Epibrassinolide alleviates organic pollutants-retarded root elongation by promoting redox homeostasis and secondary metabolism in *Cucumis sativus* L.

The roles of metabolic thermogenesis in body fat regulation in striped hamsters fed high-fat diet at different temperatures.

Phospholipase D γ negatively regulates plant thermotolerance by destabilizing cortical microtubules in *Arabidopsis*.

Microbial metabolites are associated with a high adherence to a Mediterranean dietary pattern using a (1)H-NMR-based untargeted metabolomics approach.

Design of anti-thyroid drugs: Binding studies and structure determination of the complex of lactoperoxidase with 2-mercaptoimidazole at 2.30 Å... resolution.

Protein-bound uremic toxins impaired mitochondrial dynamics and functions.

Acetolactate Synthase-Inhibiting Gametocide Amidosulfuron Causes Chloroplast Destruction, Tissue Autophagy, and Elevation of Ethylene Release in Rapeseed.

Energy status regulates disease development and respiratory metabolism of *Lasiodiplodia theobromae* (Pat.) Griff. & Maubl.-infected longan fruit.

Enhanced 2,4-D Metabolism in Two Resistant *Papaver rhoeas* Populations from Spain.

Alterations in the programming of energy metabolism in adolescents with background exposure to dioxins, dl-PCBs and PBDEs.

Benzene exposure is associated with cardiovascular disease risk.

Peer review of the pesticide risk assessment of the potential endocrine disrupting properties of glyphosate.

Protective efficacy of various carbonyl compounds and their metabolites, and nutrients against acute toxicity of some cyanogens in rats: biochemical and physiological studies.

(1)H NMR and MVA metabolomic profiles of urines from piglets fed with boluses contaminated with a mixture of five mycotoxins.

Incidence and pathological study of *Explanatum explanatum* (Creplin, 1847) Fukui, 1929 in goats in Andhra Pradesh, India.

Acetobacter pasteurianus metabolic change induced by initial acetic acid to adapt to acetic acid fermentation conditions.

Epigenetic Regulation by Agonist-Specific Aryl Hydrocarbon Receptor Recruitment of Metastasis-Associated Protein 2 Selectively Induces Stanniocalcin 2 Expression.

Gut Microbial Transformation of the Dietary Imidazoquinoxaline Mutagen MelQx Reduces Its Cytotoxic and Mutagenic Potency.

The endocrine disrupting alkylphenols and 4,4'-DDT interfere with estrogen conversion and clearance by mouse liver cytosol.

Tissue-specific distributions of inorganic arsenic and its methylated metabolites, especially in cerebral cortex, cerebellum and hippocampus of mice after a single oral administration of arsenite.

Polychlorinated biphenyls disrupt hepatic epidermal growth factor receptor signaling.

Unraveling the correlation between microbiota succession and metabolite changes in traditional Shanxi aged vinegar.

Ifosfamide-Induced Malignancy of Ureter and Bladder.

Effect of spermine-derived AGEs on oxidative stress and polyamine metabolism.

Metabolism of Foodborne Heterocyclic Aromatic Amines by *Lactobacillus reuteri* DSM 20016.

Deficiency of long isoforms of Nfe2l1 sensitizes MIN6 pancreatic β cells to arsenite-induced cytotoxicity.

Metabolite profiling and volatiles of pineapple wine and vinegar obtained from pineapple waste.

Determination and dissipation of mesotrione and its metabolites in rice using UPLC and triple-quadrupole tandem mass spectrometry.

Patchouli oil ameliorates acute colitis: A targeted metabolite analysis of 2,4,6-trinitrobenzenesulfonic acid-induced rats.

Toxicity of 56 substances to trees.

Targeted metabolomics analysis of aromatic amino acids and their gut microbiota-host cometabolites in rat serum and urine by liquid chromatography coupled with tandem mass spectrometry.

Identification of tissue-specific transcriptional markers of caloric restriction in the mouse and their use to evaluate caloric restriction mimetics.

Catalase increases ethanol oxidation through the purine catabolism in rat liver.

Effects of unintentional PCBs in pigments and chemical products on transcriptional activity via aryl hydrocarbon and nuclear hormone receptors.

Accumulation of Arsenic Speciation and In Vivo Toxicity Following Oral Administration of a Chinese Patent Medicine Xiao-Er-Zhi-Bao-Wan in Rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-elicited effects on bile acid homeostasis: Alterations in biosynthesis, enterohepatic circulation, and microbial metabolism.

Transcriptome and Metabolite Changes during Hydrogen Cyanamide-Induced Floral Bud Break in Sweet Cherry.

Deficiencies in mitochondrial dynamics sensitize *Caenorhabditis elegans* to arsenite and other mitochondrial toxicants by reducing mitochondrial adaptability.

Age and Chronicity of Administration Dramatically Influenced the Impact of Low Dose Paraquat Exposure on Behavior and Hypothalamic-Pituitary-Adrenal Activity.

The Association of Combined GSTM1 and CYP2C9 Genotype Status with the Occurrence of Hemorrhagic Cystitis in Pediatric Patients Receiving Myeloablative Conditioning Regimen Prior to Allogeneic Hematopoietic Stem Cell Transplantation.

Flavin-containing monooxygenases in aging and disease: Emerging roles for ancient enzymes.

Zinc and Copper Metabolism and Risk of Autism: a reply to Sayehmiri et al.

Further evidence for the association of CYP2D6*4 gene polymorphism with Parkinson's disease: a case control study.

Co-Administration of Vitamin E and Testosterone Attenuates The Atrazine-Induced Toxic Effects on Sperm Quality and Testes in Rats.

Mitochondrial activity and oxidative stress functions are influenced by the activation of AhR-induced CYP1A1 overexpression in cardiomyocytes.

Metabolic engineering of *Gluconobacter oxydans* 621H for increased biomass yield.

Phenolic metabolism and molecular mass distribution of polysaccharides in cellulose-deficient maize cells.

Toxicological characterisation of two novel selective aryl hydrocarbon receptor modulators in Sprague-Dawley rats.

Potential role of heme metabolism in the inducible expression of heme oxygenase-1.

Xenobiotic transporters and kidney injury.

A systematic review of the risks factors associated with the onset and natural progression of spina bifida.

Peer review of the pesticide risk assessment for the active substance terbuthylazine in light of confirmatory data submitted.

Pharmacological manipulations of autophagy modulate paraquat-induced cytotoxicity in PC12 cells.

Effect of aspartic acid and glutamate on metabolism and acid stress resistance of *Acetobacter pasteurianus*.

Peer review of the pesticide risk assessment for the active substance metazachlor in light of confirmatory data submitted.

Activated thyroid hormone receptor modulates dioxin-inducible aryl hydrocarbon receptor-mediated CYP1A1 induction in human hepatocytes but not in human hepatocarcinoma HepG2 cells.

Relation of dietary inorganic arsenic exposure and urinary inorganic arsenic metabolites excretion in Japanese subjects.

Squamous epithelium formation in the respiratory intestine of the bronze Corydoras *Corydoras aeneus* (Callichthyidae Teleostei).

The Toxic Effects of Tetrachlorobisphenol A in *Saccharomyces cerevisiae* Cells via Metabolic Interference.

Single-cell time-lapse imaging of intracellular O₂ in response to metabolic inhibition and mitochondrial cytochrome-c release.

Interactive effects of protein and carbohydrates on production of microbial metabolites in the large intestine of growing pigs.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-mediated deregulation of myeloid and sebaceous gland stem/progenitor cell homeostasis.

Exposure to endocrine disruptors during adulthood: consequences for female fertility.

Exposure to polycyclic aromatic hydrocarbons and volatile organic compounds among recently pregnant rural Guatemalan women cooking and heating with solid fuels.

Evaluation of various approaches to the isolation of steroid hormones from urine samples prior to FASS-MEKC analysis.

Multiple AMPK activators inhibit l-carnitine uptake in C2C12 skeletal muscle myotubes.

Expression of advanced glycation end-products and NF κ B in chick embryos exposed to dioxins and treated with acetylsalicylic acid and α -tocopherol.

Soil microorganisms can overcome respiration inhibition by coupling intra- and extracellular metabolism: (13)C metabolic tracing reveals the mechanisms.

Benzene and 2-ethyl-phthalate induce proliferation in normal rat pituitary cells.

Metabolic Investigations of the Molecular Mechanisms Associated with Parkinson's Disease.

Biofilm vs. Planktonic Lifestyle: Consequences for Pesticide 2,4-D Metabolism by *Cupriavidus necator* JMP134.

Oxidative metabolism of curcumin-glucuronide by peroxidases and isolated human leukocytes.

Levels of infants' urinary arsenic metabolites related to formula feeding and weaning with rice products exceeding the EU inorganic arsenic standard.

Cerebellar Molecular and Cellular Characterization in Rat Models of Alzheimer's Disease: Neuroprotective Mechanisms of Garcinia Biflavonoid Complex.

Sodium meta-arsenite induced reactive oxygen species in human red blood cells: impaired antioxidant and membrane redox systems, haemoglobin oxidation, and morphological changes.

Lycopene, resveratrol, vitamin C and FeSO₄ increase damage produced by pro-oxidant carcinogen 4-nitroquinoline-1-oxide in *Drosophila melanogaster*: Xenobiotic metabolism implications.

Butyrate alters expression of cytochrome P450 1A1 and metabolism of benzo[a]pyrene via its histone deacetylase activity in colon epithelial cell models.

Ingestion of Bt rice pollen does not reduce the survival or hypopharyngeal gland development of *Apis mellifera* adults.

Metabolomics analysis of urine from rats administered with long-term, low-dose acrylamide by ultra-performance liquid chromatography-mass spectrometry.

Diet-induced obesity alters dorsal CGRP release and potentiates TRPA1-mediated trigeminovascular responses.

Uncovering Potential Applications of Cyanobacteria and Algal Metabolites in Biology, Agriculture and Medicine: Current Status and Future Prospects.

Toward the Design of Less Hazardous Chemicals: Exploring Comparative Oxidative Stress in Two Common Animal Models.

Saving the injured: Rescue behavior in the termite-hunting ant *Megaponera analis*.

A rare case of epilepsy and acute pancreatitis induced by severe paraquat poisoning.

Cell and region specificity of Aryl hydrocarbon Receptor (AhR) system in the testis and the epididymis.

Human and rodent aryl hydrocarbon receptor (AHR): from mediator of dioxin toxicity to physiologic AHR functions and therapeutic options.

Metabolomic responses to sublethal contaminant exposure in neonate and adult *Daphnia magna*.

Metabonomic analysis of quercetin against the toxicity of acrylamide in rat urine.

Early-life chemical exposures and risk of metabolic syndrome.

Nicotine, Carcinogen, and Toxin Exposure in Long-Term E-Cigarette and Nicotine Replacement Therapy Users: A Cross-sectional Study.

Carnosine Attenuates the Development of both Type 2 Diabetes and Diabetic Nephropathy in BTBR ob/ob Mice.

The association of peripubertal serum concentrations of organochlorine chemicals and blood lead with growth and pubertal development in a longitudinal cohort of boys: a review of published results from the Russian Children's Study.

Characterization of E-NTPDase (EC 3.6.1.5) activity in hepatic lymphocytes: A different activity profile from peripheral lymphocytes.

The toxic effects of chlorophenols and associated mechanisms in fish.

Mechanism of synergistic DNA damage induced by the hydroquinone metabolite of brominated phenolic environmental pollutants and Cu(II): Formation of DNA-Cu complex and site-specific production of hydroxyl radicals.

Arsenic-induced genotoxic responses and their amelioration by diphenylene iodonium, 24-epibrassinolide and proline in *Glycine max* L.

Development of Rapid and Economical Colorimetric Screening Method for p-Phenylenediamine in Variety of Biological Matrices and its Application to Eleven Fatal Cases of p-Phenylenediamine Poisoning.

Differential effect of early antibiotic intervention on bacterial fermentation patterns and mucosal gene expression in the colon of pigs under diets with different protein levels.

Molecular responses of genetically modified maize to abiotic stresses as determined through proteomic and metabolomic analyses.

Cyanogen Metabolism in Cassava Roots: Impact on Protein Synthesis and Root Development.

Pharmacodynamics of S-dimethylarsino-glutathione, a putative metabolic intermediate of inorganic arsenic, in mice.

De novo transcriptome assembly analysis of weed *Apera spica-venti* from seven tissues and growth stages.

Lethal and sub-lethal effects of triclosan toxicity to the earthworm *Eisenia fetida* assessed through GC-MS metabolomics.

Quantitative Global Proteomics of Yeast PBP1 Deletion Mutants and Their Stress Responses Identifies Glucose Metabolism, Mitochondrial, and Stress Granule Changes.

Beyond the Aryl Hydrocarbon Receptor: Pathway Interactions in the Hepatotoxicity of 2,3,7,8-Tetrachlorodibenzo-p-dioxin and Related Compounds.

Is chronic AhR activation by rapidly metabolized ligands safe for the treatment of immune-mediated diseases?

Elevated Urinary Glyphosate and Clostridia Metabolites With Altered Dopamine Metabolism in Triplets With Autistic Spectrum Disorder or Suspected Seizure Disorder: A Case Study.

Expression profiles and hormonal regulation of tobacco NtEXGT gene and its involvement in abiotic stress response.

A novel continuous two-phase partitioning bioreactor operated with polymeric tubing: Performance validation for enhanced biological removal of toxic substrates.

Arsenic levels among pregnant women and newborns in Canada: Results from the Maternal-Infant Research on Environmental Chemicals (MIREC) cohort.

Use of read-across to simplify the toxicological assessment of a complex mixture of lysimeter leachate metabolites on the basis of chemical similarity and ADME behavior.

Structural-functional adaptations of porcine CYP1A1 to metabolize polychlorinated dibenzo-p-dioxins.

Exposure to Nicotine and Selected Toxicants in Cigarette Smokers Who Switched to Electronic Cigarettes: A Longitudinal Within-Subjects Observational Study.

Review of Advances in Uroprotective Agents for Cyclophosphamide- and Ifosfamide-induced Hemorrhagic Cystitis.

Non-dioxin-like organic toxicant PCB153 modulates sphingolipid metabolism in liver progenitor cells: its role in Cx43-formed gap junction impairment.

The Anti-Inflammatory and Vasodilating Effects of Three Selected Dietary Organic Sulfur Compounds from *Allium* Species.

Beta-Glucans Supplementation Associates with Reduction in P-Cresyl Sulfate Levels and Improved Endothelial Vascular Reactivity in Healthy Individuals.

Metabolite exchange between microbiome members produces compounds that influence *Drosophila* behavior.

The antiSMASH database, a comprehensive database of microbial secondary metabolite biosynthetic gene clusters.

Urinary Arsenic Speciation in Children and Pregnant Women from Spain.

Crosstalk between Aryl Hydrocarbon Receptor and Glucocorticoid Receptor in Human Retinal Pigment Epithelial Cells.

Benefits of Alcohol on Arsenic Toxicity in Rats.

Feeble Antipyretic, Analgesic, and Anti-inflammatory Activities were Found with Regular Dose 4'-O- β -D-Glucosyl-5-O-Methylvisamminol, One of the Conventional Marker Compounds for Quality Evaluation of Radix Saposhnikoviae.

Possible health impacts of Bt toxins and residues from spraying with complementary herbicides in genetically engineered soybeans and risk assessment as performed by the European Food Safety Authority EFSA.

Secondary Hemochromatosis due to Chronic Oral Iron Supplementation.

Tetrachloro-1,4-benzoquinone induces apoptosis of mouse embryonic stem cells.

Urinary 3-hydroxypropyl mercapturic acid (3-HPMA) concentrations in dogs with acute spinal cord injury due to intervertebral disc herniation.

Occupational exposure to pesticides, reproductive hormone levels and sperm quality in young Brazilian men.

β -Lipoic acid potentially targets AMP-activated protein kinase and energy production in the fetal brain to ameliorate dioxin-produced attenuation in fetal steroidogenesis.

Secondary metabolites of endophytic Xylaria species with potential applications in medicine and agriculture.

Effect of phytotoxic secondary metabolites and semisynthetic compounds from endophytic fungus Xylaria feejeensis strain SM3e-1b on spinach chloroplast photosynthesis.

Exploring the Impacts of Postharvest Processing on the Microbiota and Metabolite Profiles during Green Coffee Bean Production.

Interactive Influence of N6AMT1 and As3MT Genetic Variations on Arsenic Metabolism in the Population of Inner Mongolia, China.

From dioxin toxicity to putative physiologic functions of the human Ah receptor in homeostasis of stem/progenitor cells.

Effect of three safeners on sulfur assimilation and iron deficiency response in barley (*Hordeum vulgare*) plants.

Novel roles for AhR and ARNT in the regulation of alcohol dehydrogenases in human hepatic cells.

Influence of waterborne gallic and pelargonic acid exposures on biochemical and reproductive parameters in the zebrafish (*Danio rerio*).

Histone deacetylase inhibitors mediate DNA damage repair in ameliorating hemorrhagic cystitis.

The sublethal effects of (2,4-Dichlorophenoxy) acetic acid (2,4-D) on narrow-clawed crayfish (*Astacus leptodactylus* Eschscholtz, 1823).

Changing agricultural practices: potential consequences to aquatic organisms.

Effect of single and combination of three triazine metabolites at environmental concentrations on early life stages of common carp (*Cyprinus carpio* L.).

Individual and joint toxicity of the herbicide S-metolachlor and a metabolite, deethylatrazine on aquatic crustaceans: Difference between ecological groups.

Influence of imazethapyr and quizalofop-p-ethyl application on microbial biomass and enzymatic activity in peanut grown soil.

PPAR α -dependent cholesterol/testosterone disruption in Leydig cells mediates 2,4-dichlorophenoxyacetic acid-induced testicular toxicity in mice.

Effects of anti-androgens cyproterone acetate, linuron, vinclozolin, and p,p'-DDE on the reproductive organs of the copepod *Acartia tonsa*.

Antioxidant and neuroprotective effects of *Dictyophora indusiata* polysaccharide in *Caenorhabditis elegans*.

Examination of in vivo mutagenicity of sodium arsenite and dimethylarsinic acid in gpt delta rats.

Physiological Stress Responses in Amphibian Larvae to Multiple Stressors Reveal Marked Anthropogenic Effects even below Lethal Levels.

Effects of alkylphenols on the biotransformation of diuron and enzymes involved in the synthesis and clearance of sex steroids in juvenile male tilapia (*Oreochromis mossambica*).

Antioxidative response in variegated *Pelargonium zonale* leaves and generation of extracellular H₂O₂ in (peri)vascular tissue induced by sunlight and paraquat.

Identification of Homogentisate Dioxygenase as a Target for Vitamin E Biofortification in Oilseeds.

Metabolomics as read-across tool: A case study with phenoxy herbicides.

Interactive effects of herbicide and enhanced UV-B on growth, oxidative damage and the ascorbate-glutathione cycle in two *Azolla* species.

Mechanism of glyphosate control of *Phelipanche aegyptiaca*.

Glyphosate and aminomethylphosphonic acid chronic risk assessment for soil biota.

The receptor for activated C kinase 1 (RACK1) functions in hematopoiesis through JNK activation in Chinese mitten crab *Eriocheir sinensis*.

Glyphosate: environmental contamination, toxicity and potential risks to human health via food contamination.

Cleaning-up atrazine-polluted soil by using Microbial Electroremediating Cells.

Carcinogenic compounds in alcoholic beverages: an update.

Effects of terbutylazine-desethyl, a terbutylazine degradation product, on red swamp crayfish (*Procambarus clarkii*).

Effects of 2,4-dichlorophenoxyacetic acid on the ventral prostate of rats during the peri-pubertal, pubertal and adult stage.

Acute Acrolein Exposure Induces Impairment of Vocal Fold Epithelial Barrier Function.

Triazine herbicides inhibit relaxin signaling and disrupt nitric oxide homeostasis.

[Phytotoxic metabolite from QTYC01, a fungus residing in the gut of *Pantala flavescens* larvae].

Embryonic Atrazine Exposure Elicits Alterations in Genes Associated with Neuroendocrine Function in Adult Male Zebrafish.

An assessment of dietary exposure to glyphosate using refined deterministic and probabilistic methods.

Evaluating long-term cellular effects of the arsenic species thio-DMA(V): qPCR-based gene expression as screening tool.

Gene expression profiles in testis of developing male *Xenopus laevis* damaged by chronic exposure of atrazine.

Investigations on the possible impact of a glyphosate-containing herbicide on ruminal metabolism and bacteria *in vitro* by means of the 'Rumen Simulation Technique'.

Effects of atrazine on growth and sex differentiation, in juveniles of the freshwater crayfish *Cherax quadricarinatus*.

Evaluation of potential mechanisms of atrazine-induced reproductive impairment in fathead minnow (*Pimephales promelas*) and Japanese medaka (*Oryzias latipes*).

Characterization and genome functional analysis of a novel metamidron-degrading strain *Rhodococcus* sp. MET via both triazinone and phenyl rings cleavage.

Role of adipokinetic hormone and adenosine in the anti-stress response in *Drosophila melanogaster*.

Does nitrate co-pollution affect biological responses of an aquatic plant to two common herbicides?

Response of selenium-dependent glutathione peroxidase in the freshwater bivalve *Anodonta woodiana* exposed to 2,4-dichlorophenol, 2,4,6-trichlorophenol and pentachlorophenol.

Accumulation and detoxication responses of the gastropod *Lymnaea stagnalis* to single and combined exposures to natural (cyanobacteria) and anthropogenic (the herbicide RoundUp® Flash) stressors.

Assessment of oxidative stress responses and the cytotoxic and genotoxic potential of the herbicide tembotrione in HepG2 cells.

Effects of glyphosate and the glyphosate based herbicides Roundup Original[®] and Roundup Transorb[®] on respiratory morphophysiology of bullfrog tadpoles.

Lycopene ameliorates atrazine-induced oxidative damage in adrenal cortex of male rats by activation of the Nrf2/HO-1 pathway.

Identification of transcriptome involved in atrazine detoxification and degradation in alfalfa (*Medicago sativa*) exposed to realistic environmental contamination.

Synergistic stress exacerbation in hippocampal neurons: Evidence favoring the dual-hit hypothesis of neurodegeneration.

Determination of glyphosate and its metabolite in emergency room in Korea.

Atrazine alters expression of reproductive and stress genes in the developing hypothalamus of the snapping turtle, *Chelydra serpentina*.

[The change of cancer-related genes expression profile in Nthy-ori-3-1 cell induced by the pesticide amitrole].

Multiple effects of a commercial Roundup[®] formulation on the soil filamentous fungus *Aspergillus nidulans* at low doses: evidence of an unexpected impact on energetic metabolism.

Differential protein expression in the estuarine copepod *Eurytemora affinis* after diuron and alkylphenol exposures.

Production of a toxic metabolite in 2,4-D-resistant GM crop plants.

Effect of glyphosate on reproductive organs in male rat.

Effects of pentachlorophenol on the detoxification system in white-rumped munia (*Lonchura striata*).

HIGH PREVALENCE OF AGENT ORANGE EXPOSURE AMONG THYROID CANCER PATIENTS IN THE NATIONAL VA HEALTHCARE SYSTEM.

Modulation of NADH Levels by Arabidopsis Nudix Hydrolases, AtNUDX6 and 7, and the Respective Proteins Themselves Play Distinct Roles in the Regulation of Various Cellular Responses Involved in Biotic/Abiotic Stresses.

Comparative embryotoxicity and genotoxicity of the herbicide diuron and its metabolites in early life stages of *Crassostrea gigas*: Implication of reactive oxygen species production.

Atrazine blocks ovulation via suppression of Lhr and Cyp19a1 mRNA and estradiol secretion in immature gonadotropin-treated rats.

Imazapyr+imazapic herbicide determines acute toxicity in silver catfish *Rhamdia quelen*.

Thyroid endocrine disruption of acetochlor on zebrafish (*Danio rerio*) larvae.

The developmental effects of pentachlorophenol on zebrafish embryos during segmentation: A systematic view.

Changes in rhizosphere bacterial gene expression following glyphosate treatment.

The metabolite 3,4,3',4'-tetrachloroazobenzene (TCAB) exerts a higher ecotoxicity than the parent compounds 3,4-dichloroaniline (3,4-DCA) and propanil.

Effects of glyphosate on hepatic tissue evaluating melanomacrophages and erythrocytes responses in neotropical anuran *Leptodactylus latinasus*.

Multifactorial theory applied to the neurotoxicity of paraquat and paraquat-induced mechanisms of developing Parkinson's disease.

Evaluation of the toxic effect of the herbicide 2, 4-D on rat hepatocytes: an FT-IR spectroscopic study.

Acute paraquat exposure determines dose-dependent oxidative injury of multiple organs and metabolic dysfunction in rats: impact on exercise tolerance.

Advances in the mechanism of paraquat-induced pulmonary injury.

The effect of two glyphosate formulations on a small, diurnal lizard (*Oligosoma polychroma*).

Atrazine and its main metabolites alter the locomotor activity of larval zebrafish (*Danio rerio*).

Influence of dioxin exposure upon levels of prostate-specific antigen and steroid hormones in Vietnamese men.

Atrazine exposure causes mitochondrial toxicity in liver and muscle cell lines.

Estrogenic activities of diuron metabolites in female Nile tilapia (*Oreochromis niloticus*).

Establishing a herbicide-metabolizing enzyme library in *Beckmannia syzigachne* to identify genes associated with metabolic resistance.

Melatonin inhibits paraquat-induced cell death in bovine preimplantation embryos.

Co-Formulants in Glyphosate-Based Herbicides Disrupt Aromatase Activity in Human Cells below Toxic Levels.

Cdk12 Is A Gene-Selective RNA Polymerase II Kinase That Regulates a Subset of the Transcriptome, Including Nrf2 Target Genes.

An embryonic atrazine exposure results in reproductive dysfunction in adult zebrafish and morphological alterations in their offspring.

Concerns over use of glyphosate-based herbicides and risks associated with exposures: a consensus statement.

Changes in the metabolome of rats after exposure to arginine and N-carbamylglutamate in combination with diquat, a compound that causes oxidative stress, assessed by ¹H NMR spectroscopy.

Constitutive active/androstane receptor, peroxisome proliferator-activated receptor $\hat{\pm}$, and cytotoxicity are involved in oxadiazon-induced liver tumor development in mice.

Reduced salinity increases susceptibility of zooxanthellate jellyfish to herbicide toxicity during a simulated rainfall event.

Exogenous jasmonic acid induces stress tolerance in tobacco (*Nicotiana tabacum*) exposed to imazapic.

Perturbations in polar lipids, starvation survival and reproduction following exposure to unsaturated fatty acids or environmental toxicants in *Daphnia magna*.

Toxicological effects of pet food ingredients on canine bone marrow-derived mesenchymal stem cells and enterocyte-like cells.

Transcriptional profiles of glutathione-S-Transferase isoforms, Cyp, and AOE genes in atrazine-exposed zebrafish embryos.

Degradation and Isotope Source Tracking of Glyphosate and Aminomethylphosphonic Acid.

Toxicity of AMPA to the earthworm *Eisenia andrei* Bouché, 1972 in tropical artificial soil.

Multiple biomarker responses in *Prochilodus lineatus* subjected to short-term in situ exposure to streams from agricultural areas in Southern Brazil.

[Experimental evaluation of the impact of low doses of the herbicide 2,4-D in drinking water on some indices of lipid and immune status].

A novel metabolic activation associated with glutathione in dimethylmonothioarsinic acid (DMMTA(V))-induced toxicity obtained from in vitro reaction of DMMTA(V) with glutathione.

Successful Extracorporeal Life Support in a Case of Severe Glyphosate-Surfactant Intoxication.

Effects of Neonicotinoids on Promoter-Specific Expression and Activity of Aromatase (CYP19) in Human Adrenocortical Carcinoma (H295R) and Primary Umbilical Vein Endothelial (HUVEC) Cells.

Metabolic changes in rat urine after acute paraquat poisoning and discriminated by support vector machine.

Effects of the terbuthylazine metabolite terbuthylazine-desethyl on common carp embryos and larvae.

Skin diseases associated with Agent Orange and other organochlorine exposures.

Association between arsenic exposure and thyroid function: data from NHANES 2007-2010.

Metabolomic Analysis Provides Insights on Paraquat-Induced Parkinson-Like Symptoms in *Drosophila melanogaster*.

Comparative toxicity of Paraquat herbicide and some plant extracts in *Lymnaea natalensis* snails.

Acrolein preferentially damages nucleolus eliciting ribosomal stress and apoptosis in human cancer cells.

Uremic toxins: some thoughts on acrolein and spermine.

Role of phytochemicals in the management of metabolic syndrome.

Reversal of diabetes-induced behavioral and neurochemical deficits by cinnamaldehyde.

Association between Exposure to Endocrine Disruptors in Drinking Water and Preterm Birth, Taking Neighborhood Deprivation into Account: A Historic Cohort Study.

Discovery of a novel anti-cancer agent targeting both topoisomerase I and II in hepatocellular carcinoma Hep 3B cells in vitro and in vivo: Cinnamomum verum component 2-methoxycinnamaldehyde.

Development of a combined method to assess the complex effect of atrazine on sex steroid synthesis in H295R cells.

Roles of catalase and glutathione peroxidase in the tolerance of a pulmonate gastropod to anoxia and reoxygenation.

Arsenic Metabolism in Children Differs From That in Adults.

Acrolein metabolites, diabetes and insulin resistance.

Cinnamaldehyde and allopurinol reduce fructose-induced cardiac inflammation and fibrosis by attenuating CD36-mediated TLR4/6-IRAK4/1 signaling to suppress NLRP3 inflammasome activation.

A carnosine intervention study in overweight human volunteers: bioavailability and reactive carbonyl species sequestering effect.

Cinnamaldehydes in Cancer Chemotherapy.

Inhibition of para-Hydroxyphenylpyruvate Dioxygenase by Analogues of the Herbicide Nitisinone As a Strategy to Decrease Homogentisic Acid Levels, the Causative Agent of Alkaptonuria.

Impact of 3-Amino-1,2,4-Triazole (3-AT)-Derived Increase in Hydrogen Peroxide Levels on Inflammation and Metabolism in Human Differentiated Adipocytes.

Parkinson-Related LRRK2 Mutation R1628P Enables Cdk5 Phosphorylation of LRRK2 and Upregulates Its Kinase Activity.

Cinnamaldehyde supplementation prevents fasting-induced hyperphagia, lipid accumulation, and inflammation in high-fat diet-fed mice.

Structural and biochemical abnormalities in the absence of acute deficits in mild primary blast-induced head trauma.

Diet-induced and mono-genetic obesity alter volatile organic compound signature in mice.

Exceptions in patterns of arsenic compounds in urine of acute promyelocytic leukaemia patients treated with As₂O₃.

Discovery of a novel anticancer agent with both anti-topoisomerase I and II activities in hepatocellular carcinoma SK-Hep-1 cells in vitro and in vivo: Cinnamomum verum component 2-methoxycinnamaldehyde.

Novel Role of Endogenous Catalase in Macrophage Polarization in Adipose Tissue.

Recent Progress in Analytical Methods for Determination of Urinary 3-Hydroxypropylmercapturic Acid, a Major Metabolite of Acrolein.

Low dose cyclophosphamide: Mechanisms of T cell modulation.

Mutant characterization and in vivo conditional repression identify aromatic amino acid biosynthesis to be essential for *Aspergillus fumigatus* virulence.

An integrated multi-omics analysis of the NK603 Roundup-tolerant GM maize reveals metabolism disturbances caused by the transformation process.

Influence of Temperature on the Thyroidogenic Effects of Diuron and Its Metabolite 3,4-DCA in Tadpoles of the American Bullfrog (*Lithobates catesbeianus*).

Rapid selective accelerated solvent extraction and simultaneous determination of herbicide atrazine and its metabolites in fruit by ultra high performance liquid chromatography.

Climate change increases the risk of herbicide-resistant weeds due to enhanced detoxification.

Polymorphic variants of MRP4/ABCC4 differentially modulate the transport of methylated arsenic metabolites and physiological organic anions.

Thiolated arsenicals in arsenic metabolism: Occurrence, formation, and biological implications.

Sex differences in the reduction of arsenic methylation capacity as a function of urinary total and inorganic arsenic in Mexican children.

Herbicide-related signaling in plants reveals novel insights for herbicide use strategies, environmental risk assessment and global change assessment challenges.

Detection of three herbicide, and one metabolite, residues in brown rice and rice straw using various versions of the QuEChERS method and liquid chromatography-tandem mass spectrometry.

Metabolism and Residues of 2,4-Dichlorophenoxyacetic Acid in DAS-40278-9 Maize (*Zea mays*) Transformed with Aryloxyalkanoate Dioxygenase-1 Gene.

Effects of Food Components That Activate TRPA1 Receptors on Mucosal Ion Transport in the Mouse Intestine.

Combined herbicide and saline stress differentially modulates hormonal regulation and antioxidant defense system in *Oryza sativa* cultivars.

Environmental Metabolic Footprinting: A novel application to study the impact of a natural and a synthetic \hat{I}^2 -triketone herbicide in soil.

Stable Isotope Resolved Metabolomics Reveals the Role of Anabolic and Catabolic Processes in Glyphosate-Induced Amino Acid Accumulation in *Amaranthus palmeri* Biotypes.

A full evaluation for the enantiomeric impacts of lactofen and its metabolites on aquatic macrophyte *Lemna minor*.

Metabolism and Bioactivation of Fluorochloridone, a Novel Selective Herbicide, in Vivo and in Vitro.

Validation of a liquid chromatography ultraviolet method for determination of herbicide diuron and its metabolites in soil samples.

Genetics of metabolic resistance.

Novel NAD⁺-Farnesal Dehydrogenase from *Polygonum minus* Leaves. Purification and Characterization of Enzyme in Juvenile Hormone III Biosynthetic Pathway in Plant.

Metabolic engineering of microbial competitive advantage for industrial fermentation processes.

Metabolism of Pyriithobac Sodium in Soils and Sediment, Addressing Bound Residues via Kinetics Modeling.

Molecular Responses to Small Regulating Molecules against Huanglongbing Disease.

2,4-D and IAA Amino Acid Conjugates Show Distinct Metabolism in Arabidopsis.

Arsenic Metabolites, Including N-Acetyl-4-hydroxy-m-arsanilic Acid, in Chicken Litter from a Roxarsone-Feeding Study Involving 1600 Chickens.

2-Phenethyl Isothiocyanate, Glutathione S-transferase M1 and T1 Polymorphisms, and Detoxification of Volatile Organic Carcinogens and Toxicants in Tobacco Smoke.

The Impact of Glyphosate, Its Metabolites and Impurities on Viability, ATP Level and Morphological changes in Human Peripheral Blood Mononuclear Cells.

Phytotoxic Potential of Secondary Metabolites and Semisynthetic Compounds from Endophytic Fungus *Xylaria feejeensis* Strain SM3e-1b Isolated from *Sapium macrocarpum*.

Differential effects of glyphosate and aminomethylphosphonic acid (AMPA) on photosynthesis and chlorophyll metabolism in willow plants.

Overexpression of human SOD1 in VDAC1-less yeast restores mitochondrial functionality modulating beta-barrel outer membrane protein genes.

Knockdown of *Drosophila* hemoglobin suggests a role in O₂ homeostasis.

Novel Approach for High-Throughput Metabolic Screening of Whole Plants by Stable Isotopes.

Both foliar and residual applications of herbicides that inhibit amino acid biosynthesis induce alternative respiration and aerobic fermentation in pea roots.

Phaseolus vulgaris L. Seedlings Exposed to Prometryn Herbicide Contaminated Soil Trigger an Oxidative Stress Response.

PBPK Model for Atrazine and Its Chlorotriazine Metabolites in Rat and Human.

Arsenic Metabolites and Methylation Capacity Among Individuals Living in a Rural Area with Endemic Arseniasis in Inner Mongolia, China.

Cinnamaldehyde Characterization as an Antibacterial Agent toward *E. coli* Metabolic Profile Using 96-Blade Solid-Phase Microextraction Coupled to Liquid Chromatography-Mass Spectrometry.

Atrazine and its metabolites degradation in mineral salts medium and soil using an enrichment culture.

Synthesis of docosahexaenoic acid from eicosapentaenoic acid in retina neurons protects photoreceptors from oxidative stress.

Effects of TRP channel agonist ingestion on metabolism and autonomic nervous system in a randomized clinical trial of healthy subjects.

Arsenic speciation and susceptibility to oxidative stress in the fanworm *Sabella spallanzanii* (Gmelin) (Annelida, Sabellidae) under naturally acidified conditions: An in situ transplant experiment in a Mediterranean CO₂ vent system.

Cytoprotective Effect of Makgeolli Lees on Paraquat Induced Oxidative Stress in A549 Cells via Activation of NRF2 and Antioxidant Genes.

Widespread occurrence of both metabolic and target-site herbicide resistance mechanisms in *Lolium rigidum* populations.

Metabolic engineering of *Escherichia coli* for the production of cinnamaldehyde.

Risk assessment of triazine herbicides in surface waters and bioaccumulation of Irgarol and M1 by submerged aquatic vegetation in Southeast Florida.

Light-induced biochemical variations in secondary metabolite production and antioxidant activity in callus cultures of *Stevia rebaudiana* (Bert).

Anti-oxidative and anti-inflammatory effects of cinnamaldehyde on protecting high glucose-induced damage in cultured dorsal root ganglion neurons of rats.

Hormonal and epigenetic regulation during embryogenic tissue habituation in *Cucurbita pepo* L.

A characteristic biosignature for discrimination of gastric cancer from healthy population by high throughput GC-MS analysis.

Disseminated tungiasis in a 78-year-old woman from Tanzania: a case report.

Semilobar holoprosencephaly in a 12-month-old baby boy born to a primigravida patient with type 1 diabetes mellitus: a case report.

The Role of Mitochondrial Aldehyde Dehydrogenase 2 (ALDH2) in Neuropathology and Neurodegeneration.

Metabolism and toxicity of arsenicals in mammals.

Protein-bound toxins: has the Cinderella of uraemic toxins turned into a princess?

Aryl Hydrocarbon Receptor Ligands in Cigarette Smoke Induce Production of Interleukin-22 to Promote Pancreatic Fibrosis in Models of Chronic Pancreatitis.

Dose-Dependent Metabolic Reprogramming and Differential Gene Expression in TCDD-Elicited Hepatic Fibrosis.

Association of GSTT1 and GSTM1 gene polymorphisms with coronary artery disease in North Indian Punjabi population: a case-control study.

Enhanced Production of Anthraquinones and Phenolic Compounds and Biological Activities in the Cell Suspension Cultures of *Polygonum multiflorum*.

Oral Toxicity of 2,4-Dinitroanisole in Rats.

Exposure to polychlorinated biphenyl-153 decreases incidence of autoimmune Type 1 diabetes in non-obese diabetic mice.

An Aryl Hydrocarbon Receptor-Mediated Amplification Loop That Enforces Cell Migration in ER-/PR-/Her2- Human Breast Cancer Cells.

Pesticide exposure and thyroid function in an agricultural population in Brazil.

A comparison of biomarker responses in juvenile diploid and triploid African catfish, *Clarias gariepinus*, exposed to the pesticide butachlor.

Electrophoretic stacking for sensitive determination of antibiotic ceftazidime in human blood and microdialysates from diabetic foot.

Combination screening in vitro identifies synergistically acting KP372-1 and cytarabine against acute myeloid leukemia.

Metabolomics approach reveals metabolic disorders and potential biomarkers associated with the developmental toxicity of tetrabromobisphenol A and tetrachlorobisphenol A.

Pseudomelanosis duodeni: is there a common denominator?

Mammary Gland Evaluation in Juvenile Toxicity Studies: Temporal Developmental Patterns in the Male and Female Harlan Sprague-Dawley Rat.

The effects of fat loss after bariatric surgery on inflammation, serum hepcidin, and iron absorption: a prospective 6-mo iron stable isotope study.

Hypoxic Preconditioning Improves the Therapeutic Potential of Aging Bone Marrow Mesenchymal Stem Cells in Streptozotocin-Induced Type-1 Diabetic Mice.

Participation of protein kinases in cytotoxic and proapoptotic effects of ethylene glycol ethers and their metabolites in SH-SY5Y cells.

Para-Dichlorobenzene Exposure Is Associated with Thyroid Dysfunction in US Adolescents.

Arsenic and subclinical vascular damage in a sample of Italian young adults: a cross-sectional analysis.

Polyuria-associated hydronephrosis induced by xenobiotic chemical exposure in mice.

From the Cover: Tetrachlorobenzoquinone Exerts Neurological Proinflammatory Activity by Promoting HMGB1 Release, Which Induces TLR4 Clustering within the Lipid Raft.

Relationship of polychlorinated biphenyls (PCBs) with parasitism, iron homeostasis, and other health outcomes: Results from a cross-sectional study on recently arrived African immigrants.

Hypermetabolism in B-lymphocytes from malignant hyperthermia susceptible individuals.

Death within 44 days of 2,4-dinitrophenol intake.

Diabetes Prevalence in Relation to Serum Concentrations of Polychlorinated Biphenyl (PCB) Congener Groups and Three Chlorinated Pesticides in a Native American Population.

Sodium arsenite inhibited genomic estrogen signaling but induced pER \pm (Ser118) via MAPK pathway in breast cancer cells.

Enhanced Pulmonary Vascular and Alveolar Development via Prenatal Administration of a Slow-Release Synthetic Prostacyclin Agonist in Rat Fetal Lung Hypoplasia.

Tyrosine Phosphorylation of Focal Adhesion Anchoring Proteins Enhances Human Pancreatic Cancer Cell Invasion.

TCDD modulation of gut microbiome correlated with liver and immune toxicity in streptozotocin (STZ)-induced hyperglycemic mice.

Protective effect of prostacyclin against pre-cardiac edema caused by 2,3,7,8-tetrachlorodibenzo-p-dioxin and a thromboxane receptor agonist in developing zebrafish.

In vitro and in vivo effects of the phytohormone inhibitor fluridone against *Neospora caninum* infection.

Toward elucidation of dioxin-mediated chloracne and Ah receptor functions.

Colon-derived uremic biomarkers induced by the acute toxicity of Kansui radix: A metabolomics study of rat plasma and intestinal contents by UPLC-QTOF-MS(E).

Metabolism, Protein Binding, and Renal Clearance of Microbiota-Derived p-Cresol in Patients with CKD.

METABOLIC DYSBIOSIS OF THE GUT MICROBIOTA AND ITS BIOMARKERS.

Previously Unclassified Mutation of mtDNA m.3472T>C: Evidence of Pathogenicity in Leber's Hereditary Optic Neuropathy.

Physiological Aspects of Female Fertility: Role of the Environment, Modern Lifestyle, and Genetics.

Oxygen consumption deficit in Huntington disease mouse brain under metabolic stress.

Elucidating the chemical structure of native 1-deoxysphingosine.

Dioxin-like pollutants increase hepatic flavin containing monooxygenase (FMO3) expression to promote synthesis of the pro-atherogenic nutrient biomarker trimethylamine N-oxide from dietary precursors.

Alterations in glutamate cysteine ligase content in the retina of two retinitis pigmentosa animal models.

A Systems Biology Approach Reveals Converging Molecular Mechanisms that Link Different POPs to Common Metabolic Diseases.

Increased p-cresyl sulfate level is independently associated with poor outcomes in patients with heart failure.

Endocrine-disrupting chemicals, risk of type 2 diabetes, and diabetes-related metabolic traits: A systematic review and meta-analysis.

Effect of colestimide on the concentrations of polychlorinated dibenzo-p-dioxins, polychlorinated dioxofurans, and polychlorinated biphenyls in blood of Yusho patients.

Inflammation, glucose, and vascular cell damage: the role of the pentose phosphate pathway.

Enhanced cyclooxygenase-2 expression levels and metalloproteinase 2 and 9 activation by Hexachlorobenzene in human endometrial stromal cells.

Association of dioxins, furans and dioxin-like PCBs in human blood with nephropathy among US teens and young adults.

Involvement of Mouse Constitutive Androstane Receptor in Acifluorfen-Induced Liver Injury and Subsequent Tumor Development.

Aryl hydrocarbon receptor knockout rats are insensitive to the pathological effects of repeated oral exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

New insights into BaP-induced toxicity: role of major metabolites in transcriptomics and contribution to hepatocarcinogenesis.

Metabonomic study of the fruits of *Alpinia oxyphylla* as an effective treatment for chronic renal injury in rats.

The effect of a vegetarian versus conventional hypocaloric diet on serum concentrations of persistent organic pollutants in patients with type 2 diabetes.

Microbial-Derived Metabolites Reflect an Altered Intestinal Microbiota during Catch-Up Growth in Undernourished Neonatal Mice.

Digoxin reduces atherosclerosis in apolipoprotein E-deficient mice.

Resistant starch alters gut microbiome and metabolomic profiles concurrent with amelioration of chronic kidney disease in rats.

Free p-Cresol Alters Neutrophil Function in Dogs.

Urinary concentrations of 2,5-dichlorophenol and diabetes in US adults.

Investigating paternal preconception risk factors for adverse pregnancy outcomes in a population of internet users.

Beware the yellow slimming pill: fatal 2,4-dinitrophenol overdose.

Public health and international drug policy.

In Utero and Lactational TCDD Exposure Increases Susceptibility to Lower Urinary Tract Dysfunction in Adulthood.

Development and validation of a LC-MS/MS method for quantitative analysis of uraemic toxins p-cresol sulphate and indoxyl sulphate in saliva.

SCO₂ Mediates Oxidative Stress-Induced Glycolysis to Oxidative Phosphorylation Switch in Hematopoietic Stem Cells.

Gut microbiome in chronic kidney disease.

Comparative experimental investigation on the efficacy of mono- and multiprobiotic strains in non-alcoholic fatty liver disease prevention.

Association between Blood Dioxin Level and Chronic Kidney Disease in an Endemic Area of Exposure.

Untargeted plasma and tissue metabolomics in rats with chronic kidney disease given AST-120.

[Effects of Tetrandrine Prenatal Intervention on Alveolar Epithelial Cells Type I Differentiation in Rat Model of Nitrofen-induced Congenital Diaphragmatic Hernia].

Diabetes in Native Americans: elevated risk as a result of exposure to polychlorinated biphenyls (PCBs).

Effects of in Utero Exposure to Arsenic during the Second Half of Gestation on Reproductive End Points and Metabolic Parameters in Female CD-1 Mice.

[Not Available].

Metformin Scavenges Methylglyoxal To Form a Novel Imidazolinone Metabolite in Humans.

Urban Endocrine Disruptors Targeting Breast Cancer Proteins.

Effects of dioxin-related compounds on bone mineral density in patients affected by the Yusho incident.

Cottonseed Oil in Diets for Broilers in the Pre-Starter and Starter Phases.

Determination of multiple human arsenic metabolites employing high performance liquid chromatography inductively coupled plasma mass spectrometry.

Abdominal Obesity and Insulin Resistance in People Exposed to Moderate-to-High Levels of Dioxin.

Activation of ALDH2 with Low Concentration of Ethanol Attenuates Myocardial Ischemia/Reperfusion Injury in Diabetes Rat Model.

Melatonergic System in Parkinson's Disease: From Neuroprotection to the Management of Motor and Nonmotor Symptoms.

Increased Levels of Total p-Cresylsulfate Are Associated with Pruritus in Patients with Chronic Kidney Disease.

[Application of Metabolomics to Multiple Chemical Sensitivity Research].

Tetrachlorobenzoquinone exhibits neurotoxicity by inducing inflammatory responses through ROS-mediated IKK/ $\text{I}\hat{\text{I}}^{\text{B}}$ /NF- $\hat{\text{I}}^{\text{B}}$ signaling.

The role of aryl hydrocarbon receptor (AhR) in the pathology of pleomorphic adenoma in parotid gland.

PCB126-Induced Disruption in Gluconeogenesis and Fatty Acid Oxidation Precedes Fatty Liver in Male Rats.

Associations between urinary concentrations of 2,5-dichlorophenol and metabolic syndrome among non-diabetic adults.

Oxidative stress-related liver dysfunction by sodium arsenite: Alleviation by Pistacia lentiscus oil.

Riluzole But Not Melatonin Ameliorates Acute Motor Neuron Degeneration and Moderately Inhibits SOD1-Mediated Excitotoxicity Induced Disrupted Mitochondrial Ca⁽²⁺⁾ Signaling in Amyotrophic Lateral Sclerosis.

Pyruvate attenuates the anti-neoplastic effect of carnosine independently from oxidative phosphorylation.

Characterization of the Clostridium difficile volatile metabolome using comprehensive two-dimensional gas chromatography time-of-flight mass spectrometry.

Effects of PCB 126 and PCB 153 on secretion of steroid hormones and mRNA expression of steroidogenic genes (STAR, HSD3B, CYP19A1) and estrogen receptors (ER¹, ER²) in prehierarchical chicken ovarian follicles.

Concentration and congener pattern of polychlorinated biphenyls in blubber and liver of Hubbs' beaked whale (Mesoplodon carlhubbsi), using a sulfoxide and an Ag-ION solid phase extraction cartridge as a simplified cleanup technique for biological samples.

A high fat diet does not affect the iron bioavailability in Wistar rats fed with chia and increases gene expression of iron metabolism proteins.

Single Heteroatom Substitutions in the Efavirenz Oxazinone Ring Impact Metabolism by CYP2B6.

Influence of LED light spectra on in vitro somatic embryogenesis and LC-MS analysis of chlorogenic acid and rutin in Peucedanum japonicum Thunb.: a medicinal herb.

The mutagenic assessment of an electronic-cigarette and reference cigarette smoke using the Ames assay in strains TA98 and TA100.

Effect of early antibiotic administration on cecal bacterial communities and their metabolic profiles in pigs fed diets with different protein levels.

Diazepam influences urinary bioindicator of occupational toluene exposure.

Mitochondrial ATP is required for the maintenance of membrane integrity in stallion spermatozoa, whereas motility requires both glycolysis and oxidative phosphorylation.

Changes in fatty acid composition of Stenotrophomonas maltophilia KB2 during co-metabolic degradation of monochlorophenols.

Evaluation of sludge reduction of three metabolic uncouplers in laboratory-scale anaerobic-anoxic-oxic process.

In vitro mutagenic, antimutagenic, and antioxidant activities evaluation and biotransformation of some bioactive 4-substituted 1-(2-methoxyphenyl)piperazine derivatives.

Toxicological characterisation of a thio-arsenosugar-glycerol in human cells.

Toxic effects of arsenic on semen and hormonal profile and their amelioration with vitamin E in Teddy goat bucks.

Sex Steroid Hormone Single-Nucleotide Polymorphisms, Pesticide Use, and the Risk of Prostate Cancer: A Nested Case-Control Study within the Agricultural Health Study.

Sulfur Metabolism Pathways in *Sulfobacillus acidophilus* TPY, A Gram-Positive Moderate Thermoacidophile from a Hydrothermal Vent.

Comparative liver accumulation of dioxin-like compounds in sheep and cattle: Possible role of AhR-mediated xenobiotic metabolizing enzymes.

The Synthesis and Accumulation of Resveratrol Are Associated with Veraison and Abscisic Acid Concentration in Beihong (*Vitis vinifera* L.— *Vitis amurensis*) Berry Skin.

Global metabolic changes induced by plant-derived pyrrolizidine alkaloids following a human poisoning outbreak and in a mouse model.

Protective Effects of Essential Oils as Natural Antioxidants against Hepatotoxicity Induced by Cyclophosphamide in Mice.

A high-throughput screen for mitochondrial function reveals known and novel mitochondrial toxicants in a library of environmental agents.

Structure-Based Virtual Screening Protocol for in Silico Identification of Potential Thyroid Disrupting Chemicals Targeting Transthyretin.

Retrospective analysis of pesticide metabolites in urine using liquid chromatography coupled to high-resolution mass spectrometry.

Relative effect potency estimates of dioxin-like activity for dioxins, furans, and dioxin-like PCBs in adults based on cytochrome P450 1A1 and 1B1 gene expression in blood.

Dietary micronutrient intake and its relationship with arsenic metabolism in Mexican women.

N-methyltetrahydropyridines and pyridinium cations as toxins and comparison with naturally-occurring alkaloids.

Dietary Omega-3 Polyunsaturated Fatty Acids Prevent Vascular Dysfunction and Attenuate Cytochrome P4501A1 Expression by 2,3,7,8-Tetrachlorodibenzo-P-Dioxin.

Quantum-mechanical parameters for the risk assessment of multi-walled carbon-nanotubes: A study using adsorption of probe compounds and its application to biomolecules.

Salicylic acid mediates antioxidant defense system and ABA pathway related gene expression in *Oryza sativa* against quinclorac toxicity.

Influence of the metabolic state on the tolerance of *Pichia kudriavzevii* to heavy metals.

Multi-residue analysis of pesticides, plant hormones, veterinary drugs and mycotoxins using HILIC chromatography - MS/MS in various food matrices.

Dioxin induces Ahr-dependent robust DNA demethylation of the Cyp1a1 promoter via Tdg in the mouse liver.

1,5-Diazacyclooctanes, as Exclusive Oxidative Polyamine Metabolites, Inhibit Amyloid- β (1-40) Fibrillization.

Mechanisms of Action Point Towards Combined PBDE/NDL-PCB Risk Assessment.

Histological and Transcriptomic Changes in Male Zebrafish Testes Due to Early Life Exposure to Low Level 2,3,7,8-Tetrachlorodibenzo-p-Dioxin.

Tumor necrosis factor receptor-associated protein 1 improves hypoxia-impaired energy production in cardiomyocytes through increasing activity of cytochrome c oxidase subunit II.

In vitro toxicity of reuterin, a potential food biopreservative.

Cigarette smoking behaviour and blood metabolomics.

Nutrient Intake Is Associated with Longevity Characterization by Metabolites and Element Profiles of Healthy Centenarians.

Diminished Phosphorylation of CREB Is a Key Event in the Dysregulation of Gluconeogenesis and Glycogenolysis in PCB126 Hepatotoxicity.

Activating Transcription Factor 4 (ATF4)-ATF3-C/EBP Homologous Protein (CHOP) Cascade Shows an Essential Role in the ER Stress-Induced Sensitization of Tetrachlorobenzoquinone-Challenged PC12 Cells to ROS-Mediated Apoptosis via Death Receptor 5 (DR5) Signaling.

Comparative study of chemical and physical methods for distinguishing between passive and metabolically active mechanisms of water contaminant removal by biofilms.

Acrolein Is a Pathogenic Mediator of Alcoholic Liver Disease and the Scavenger Hydralazine Is Protective in Mice.

Urinary Metabotyping of Hepatocellular Carcinoma in a UK Cohort Using Proton Nuclear Magnetic Resonance Spectroscopy.

Genotoxicity Expert Panel review: weight of evidence evaluation of the genotoxicity of glyphosate, glyphosate-based formulations, and aminomethylphosphonic acid.

Glyphosate rodent carcinogenicity bioassay expert panel review.

Diabetes Impairs the Aldehyde Detoxifying Capacity of the Retina.

Impact of co-exposure with butachlor and triadimefon on thyroid endocrine system in larval zebrafish.

Toxicogenomic applications of Chinese rare minnow (*Gobiocypris rarus*) in aquatic toxicology.

Perinatal exposure to dioxins and dioxin-like compounds and infant growth and body mass index at seven years: A pooled analysis of three European birth cohorts.

Molecular impacts of perfluorinated chemicals (PFASs) in the liver and testis of male largemouth bass (*Micropterus salmoides*) in Minnesota Lakes.

Plasma metabolomics study on toxicity biomarker in rats treated with *Euphorbia fischeriana* based on LC-MS.

Aryl hydrocarbon receptor-ligand axis mediates pulmonary fibroblast migration and differentiation through increased arachidonic acid metabolism.

Exposure to Inorganic Arsenic Is Associated with Increased Mitochondrial DNA Copy Number and Longer Telomere Length in Peripheral Blood.

Tyrosine Detoxification Is an Essential Trait in the Life History of Blood-Feeding Arthropods.

[Effect of chronic arsenic exposure on mouse brain tissue and serum metabolomics].

Identification and Molecular Interaction Studies of Thyroid Hormone Receptor Disruptors among Household Dust Contaminants.

BDE-99, but not BDE-47, is a transient aryl hydrocarbon receptor agonist in zebrafish liver cells.

Nrf2-dependent protection against acute sodium arsenite toxicity in zebrafish.

How PBDEs Are Transformed into Dihydroxylated and Dioxin Metabolites Catalyzed by the Active Center of Cytochrome P450s: A DFT Study.

The role of AHR-inducible cytochrome P450s in metabolism of polyunsaturated fatty acids.

Association between polymorphisms in arsenic metabolism genes and urinary arsenic methylation profiles in girls and boys chronically exposed to arsenic.

Toxicity of 3,5,6-trichloro-2-pyridinol tested at multiple stages of zebrafish (*Danio rerio*) development.

Mitochondrial-targeted aryl hydrocarbon receptor and the impact of 2,3,7,8-tetrachlorodibenzo-p-dioxin on cellular respiration and the mitochondrial proteome.

In vitro toxicity assessment of sediment samples from Huangpu River and Suzhou River, Shanghai, China.

Microbial communities from different subsystems in biological heap leaching system play different roles in iron and sulfur metabolisms.

Arsenic Species in Chicken Breast: Temporal Variations of Metabolites, Elimination Kinetics, and Residual Concentrations.

Hepatic Aryl Hydrocarbon Receptor Attenuates Fibroblast Growth Factor 21 Expression.

Metabolic Pathway Involved in 6-Chloro-2-Benzoxazolinone Degradation by *Pigmentiphaga* sp. Strain DL-8 and Identification of the Novel Metal-Dependent Hydrolase CbaA.

Multi-tissue metabolic responses of goldfish (*Carassius auratus*) exposed to glyphosate-based herbicide.

Chemical Constituents, Antimicrobial, Cytotoxicity, Mutagenic and Antimutagenic Effects of *Artemisia ciniformis*.

Alteration of human hepatic drug transporter activity and expression by cigarette smoke condensate.

Chronic dietary exposure to pesticide residues and associated risk in the French ELFE cohort of pregnant women.

Experimental and modeling of the unsaturated transports of S-metolachlor and its metabolites in glaciofluvial vadose zone solids.

Mitigation of sensory and motor deficits by acrolein scavenger phenelzine in a rat model of spinal cord contusive injury.

Urinary Phthalate Metabolites in American Alligators (*Alligator mississippiensis*) from Selected Florida Wetlands.

Bisphenol Analogues Other Than BPA: Environmental Occurrence, Human Exposure, and Toxicity-A Review.

Involvement of endogenous antioxidant systems in the protective activity of pituitary adenylate cyclase-activating polypeptide against hydrogen peroxide-induced oxidative damages in cultured rat astrocytes.

Chiral quizalofop-ethyl and its metabolite quizalofop-acid in soils: Enantioselective degradation, enzymes interaction and toxicity to *Eisenia foetida*.

Exposure to butachlor causes thyroid endocrine disruption and promotion of metamorphosis in *Xenopus laevis*.

Organic contaminants in Great Lakes tributaries: Prevalence and potential aquatic toxicity.

The effects of CYP1A inhibition on alkyl-phenanthrene metabolism and embryotoxicity in marine medaka (*Oryzias melastigma*).

A Microfabricated Platform for Generating Physiologically-Relevant Hepatocyte Zonation.

Impact of dioxins on antipyrine metabolism in firefighters.

A biological indicator of inorganic arsenic exposure using the sum of urinary inorganic arsenic and monomethylarsonic acid concentrations.

Deleterious Effect of p-Cresol on Human Colonic Epithelial Cells Prevented by Proanthocyanidin-Containing Polyphenol Extracts from Fruits and Proanthocyanidin Bacterial Metabolites.

Identification of flurochloridone metabolites in rat urine using liquid chromatography/high resolution mass spectrometry.

Skatole (3-Methylindole) Is a Partial Aryl Hydrocarbon Receptor Agonist and Induces CYP1A1/2 and CYP1B1 Expression in Primary Human Hepatocytes.

Preparation of Methylated Products of A-type Procyranidin Trimers in Cinnamon Bark and Their Protective Effects on Pancreatic β^2 -Cell.

Synthesis and Preclinical Evaluation of ^{11}C -UCB-J as a PET Tracer for Imaging the Synaptic Vesicle Glycoprotein 2A in the Brain.

Bacterial dynamics and metabolite changes in solid-state acetic acid fermentation of Shanxi aged vinegar.

Safety assessment of a standardized polyphenolic extract of clove buds: Subchronic toxicity and mutagenicity studies.

Pesticide Mixture Toxicity in Surface Water Extracts in Snails (*Lymnaea stagnalis*) by an in Vitro Acetylcholinesterase Inhibition Assay and Metabolomics.

Treatment of Resistant Cyclophosphamide Induced Haemorrhagic Cystitis: Review of Literature and Three Case Reports.

Energy Utilization for Survival and Fertilization-Parsimonious Quiescent Sperm Turn Extravagant on Motility Activation in Rat.

Polychlorinated biphenyl 126 exposure in L6 myotubes alters glucose metabolism: a pilot study.

Retrospective screening of pesticide metabolites in ambient air using liquid chromatography coupled to high-resolution mass spectrometry.

Pesticides in the Ebro River basin: Occurrence and risk assessment.

Effects of Common Pesticides on Prostaglandin D2 (PGD2) Inhibition in SC5 Mouse Sertoli Cells, Evidence of Binding at the COX-2 Active Site, and Implications for Endocrine Disruption.

Assessment of Exposure to VOCs among Pregnant Women in the National Children's Study.

Microbial diversity and metabolite composition of Belgian red-brown acidic ales.

Underestimation of the Maximal Capacity of the Mitochondrial Electron Transport System in Oligomycin-Treated Cells.

Attenuation of hepatotoxicity and oxidative stress in diabetes STZ-induced type 1 by biotin in Swiss albino mice.

A urinary metabolomics analysis of long-term effect of acetochlor exposure on rats by ultra-performance liquid chromatography/mass spectrometry.

Proton-Coupled Organic Cation Antiporter Contributes to the Hepatic Uptake of Matrine.

Pretilachlor has the potential to induce endocrine disruption, oxidative stress, apoptosis and immunotoxicity during zebrafish embryo development.

Glycine supplementation in vitro enhances porcine preimplantation embryo cell number and decreases apoptosis but does not lead to live births.

Toxicity assessment of atmospheric particulate matter in the Mediterranean and Black Seas open waters.

Lysines, Achilles' heel in alpha-synuclein conversion to a deadly neuronal endotoxin.

Inhibition of ATP synthesis by fenbufen and its conjugated metabolites in rat liver mitochondria.

How does cigarette smoking cause acute pancreatitis?

Characterization of triclosan metabolism in *Sphingomonas* sp. strain YL-JM2C.

Combined effects of n-TiO₂ and 2,3,7,8-TCDD in *Mytilus galloprovincialis* digestive gland: A transcriptomic and immunohistochemical study.

Novel human hepatic organoid model enables testing of drug-induced liver fibrosis in *in vitro*.

Differential effects of metal ions on TCDD-induced cytotoxicity and cytochrome P4501A1 gene expression in a zebrafish liver (ZFL) cell-line.

Pyruvate Kinase Isoform Switching and Hepatic Metabolic Reprogramming by the Environmental Contaminant 2,3,7,8-Tetrachlorodibenzo-p-Dioxin.

Metabolism of the (14)C-labeled herbicide clodinafop-propargyl in plant cell cultures of wheat and tobacco.

Role of transpiration and metabolism in translocation and accumulation of cadmium in tobacco plants (*Nicotiana tabacum* L.).

Human CYP2E1-dependent mutagenicity of mono- and dichlorobiphenyls in Chinese hamster (V79)-derived cells.

Redirection of metabolite biosynthesis from hydroxybenzoates to volatile terpenoids in green hairy roots of *Daucus carota*.

Multistress effects on goldfish (*Carassius auratus*) behavior and metabolism.

Protective Effects of Zinc Against Acute Arsenic Toxicity by Regulating Antioxidant Defense System and Cumulative Metallothionein Expression.

Dysfunctional chloroplasts up-regulate the expression of mitochondrial genes in *Arabidopsis* seedlings.

Kolaviron was protective against sodium azide (NaN₃) induced oxidative stress in the prefrontal cortex.

Astaxanthin Inhibits Expression of Retinal Oxidative Stress and Inflammatory Mediators in Streptozotocin-Induced Diabetic Rats.

Divergent Effects of Dioxin- or Non-Dioxin-Like Polychlorinated Biphenyls on the Apoptosis of Primary Cell Culture from the Mouse Pituitary Gland.

Evaluation and identification of dioxin exposure biomarkers in human urine by high-resolution metabolomics, multivariate analysis and *in vitro* synthesis.

[Toxicological characteristics of the main lipid oxidation products].

Toward understanding the impacts of sediment contamination on a native fish species: transcriptional effects, EROD activity, and biliary PAH metabolites.

The pretransplant systemic metabolic profile reflects a risk of acute graft versus host disease after allogeneic stem cell transplantation.

Aryl Hydrocarbon Receptor Activation by TCDD Modulates Expression of Extracellular Matrix Remodeling Genes during Experimental Liver Fibrosis.

Evaluation of metabolomics profiles of grain from maize hybrids derived from near-isogenic GM positive and negative segregant inbreds demonstrates that observed differences cannot be attributed unequivocally to the GM trait.

Intracellular Metabolism of α,β -Unsaturated Carbonyl Compounds, Acrolein, Crotonaldehyde and Methyl Vinyl Ketone, Active Toxicants in Cigarette Smoke: Participation of Glutathione Conjugation Ability and Aldehyde-Ketone Sensitive Reductase Activity.

Evaluating the Effects of Tetrachloro-1,4-benzoquinone, an Active Metabolite of Pentachlorophenol, on the Growth of Human Breast Cancer Cells.

Antioxidant Potential of *Spirulina platensis* Mitigates Oxidative Stress and Reprotoxicity Induced by Sodium Arsenite in Male Rats.

Sensitivity of KATP channels to cellular metabolic disorders and the underlying structural basis.

Somatic Embryogenesis in Horse Chestnut (*Aesculus hippocastanum* L.).

The combined effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and the phytoestrogen genistein on steroid hormone secretion, AhR and ER α expression and the incidence of apoptosis in granulosa cells of medium porcine follicles.

Phenylephrine preconditioning in embryonic heart H9c2 cells is mediated by up-regulation of SUR2B/Kir6.2: A first evidence for functional role of SUR2B in sarcolemmal KATP channels and cardioprotection.

Methylation of inorganic arsenic by murine fetal tissue explants.

Tick-borne encephalitis--lipid peroxidation and its consequences.

Interplay of metabolizing enzymes and transporter of xenobiotics.

The role of oxidative stress on carotene production by *Blakeslea trispora* in submerged fermentation.

Genome-Wide Transcriptional Profiling and Metabolic Analysis Uncover Multiple Molecular Responses of the Grass Species *Lolium perenne* Under Low-Intensity Xenobiotic Stress.

Tribenuron-Methyl Induces Male Sterility through Anther-Specific Inhibition of Acetolactate Synthase Leading to Autophagic Cell Death.

trans-Cinnamaldehyde stimulates mitochondrial biogenesis through PGC-1 α and PPAR α leading to enhanced GLUT4 expression.

Atrazine triggers developmental abnormality of ovary and oviduct in quails (*Coturnix Coturnix coturnix*) via disruption of hypothalamo-pituitary-ovarian axis.

Executive Summary to EDC-2: The Endocrine Society's Second Scientific Statement on Endocrine-Disrupting Chemicals.

Prenatal pesticide exposure and otitis media during early childhood in the PELAGIE mother-child cohort.

Histopathological and ultramicroscopical changes in gill, liver and kidney of *Anabas testudineus* (Bloch) after chronic intoxication of almix (metsulfuron methyl 10.1%+chlorimuron ethyl 10.1%) herbicide.

The enzymatic and antioxidative stress response of *Lemna minor* to copper and a chloroacetamide herbicide.

Differential effects of bevacizumab, ranibizumab and aflibercept on cell viability, phagocytosis and mitochondrial bioenergetics of retinal pigment epithelial cell.

Oral exposure of pubertal male mice to endocrine-disrupting chemicals alters fat metabolism in adult livers.

Abnormal pancreatic enzymes and their prognostic role after acute paraquat poisoning.

Protective effects of caffeic acid phenethyl ester on dose-dependent intoxication of rats with paraquat.

Antifungal, Phytotoxic, and Cytotoxic Activities of Metabolites from *Epichloa bromicola*, a Fungus Obtained from *Elymus tangutorum* Grass.

Effect of Age, Duration of Exposure, and Dose of Atrazine on Sexual Maturation and the Luteinizing Hormone Surge in the Female Sprague-Dawley Rat.

Impairment of striatal mitochondrial function by acute paraquat poisoning.

The Effect of Exposure to Atrazine on Dopaminergic Development in Pubertal Male SD Rats.

Toxicological evaluation of ametryn effects in Wistar rats.

Potential toxic effects of glyphosate and its commercial formulations below regulatory limits.

Environmental pollutants parathion, paraquat and bisphenol A show distinct effects towards nuclear receptors-mediated induction of xenobiotics-metabolizing cytochromes P450 in human hepatocytes.

A Novel Aldo-Keto Reductase (AKR17A1) of *Anabaena* sp. PCC 7120 Degrades the Rice Field Herbicide Butachlor and Confers Tolerance to Abiotic Stresses in *E. coli*.

Effect of acetochlor on transcription of genes associated with oxidative stress, apoptosis, immunotoxicity and endocrine disruption in the early life stage of zebrafish.

A collection of cytochrome P450 monooxygenase genes involved in modification and detoxification of herbicide atrazine in rice (*Oryza sativa*) plants.

Oxidative stress and metabolic perturbations in *Escherichia coli* exposed to sublethal levels of 2,4-dichlorophenoxyacetic acid.

Use of acetochlor and cancer incidence in the Agricultural Health Study.

Chlamydomonas reinhardtii cells adjust the metabolism to maintain viability in response to atrazine stress.

Protective role of bacillithiol in superoxide stress and Fe-S metabolism in *Bacillus subtilis*.

Proteomics analysis of *Xenopus laevis* gonad tissue following chronic exposure to atrazine.

The Effects of Simazine, a Chlorotriazine Herbicide, on the Expression of Genes in Developing Male *Xenopus laevis*.

Spectrum of patients intentionally poisoned with an emulsified concentrate pendimethalin herbicide.

Arsenic and Its Methylated Metabolites Inhibit the Differentiation of Neural Plate Border Specifier Cells.

Analyzing *Arabidopsis thaliana* root proteome provides insights into the molecular bases of enantioselective imazethapyr toxicity.

Proteomic and histopathological response in the gills of *Poecilia reticulata* exposed to glyphosate-based herbicide.

Anti-androgenic activities of diuron and its metabolites in male Nile tilapia (*Oreochromis niloticus*).

Pronamide: Weight of evidence for potential estrogen, androgen or thyroid effects.

Pronamide: Human relevance of liver-mediated rat leydig cell tumors.

Atrazine Triggers DNA Damage Response and Induces DNA Double-Strand Breaks in MCF-10A Cells.

Molecular cytotoxicity mechanisms of allyl alcohol (acrolein) in budding yeast.

Mercapturic Acids Derived from the Toxicants Acrolein and Crotonaldehyde in the Urine of Cigarette Smokers from Five Ethnic Groups with Differing Risks for Lung Cancer.

Glutathione S-transferase P protects against cyclophosphamide-induced cardiotoxicity in mice.

2-Methyl-4-chlorophenoxyacetic acid and bromoxynil herbicide death.

Transcriptional profiling of the soil invertebrate *Folsomia candida* in pentachlorophenol-contaminated soil.

Soft tissue sarcoma, non-Hodgkin's lymphoma and chronic lymphocytic leukaemia in workers exposed to phenoxy herbicides: extended follow-up of a UK cohort.

Aminomethylphosphonic acid has low chronic toxicity to *Daphnia magna* and *Pimephales promelas*.

Rapid fluorescence-based measurement of toxicity in anaerobic digestion.

Effects of currently used pesticides and their mixtures on the function of thyroid hormone and aryl hydrocarbon receptor in cell culture.

Dicamba affects sex steroid hormone level and mRNA expression of related genes in adult rare minnow (*Gobiocypris rarus*) at environmentally relevant concentrations.

Gulpyrones A and B and Phomentrioloxins B and C Produced by *Diaporthe gulyae*, a Potential Mycoherbicide for Saffron Thistle (*Carthamus lanatus*).

Diuron in water: functional toxicity and intracellular detoxification patterns of active concentrations assayed in tandem by a yeast-based probe.

Mode of action and human relevance of pronamide-induced rat thyroid tumors.

An efficient machine learning approach for diagnosis of paraquat-poisoned patients.

How the edaphic *Bacillus megaterium* strain Mes11 adapts its metabolism to the herbicide mesotrione pressure.

Subcellular energy balance of *Odontesthes bonariensis* exposed to a glyphosate-based herbicide.

Metabolic profiling of *Lolium perenne* shows functional integration of metabolic responses to diverse subtoxic conditions of chemical stress.

Proposal for novel metabolic pathway of highly toxic dimethylated arsenics accompanied by enzymatic sulfuration, desulfuration and oxidation.

Physiological effects of temperature on turfgrass tolerance to amicarbazone.

Kernel compositions of glyphosate-tolerant and corn rootworm-protected MON 88017 sweet corn and insect-protected MON 89034 sweet corn are equivalent to that of conventional sweet corn (*Zea mays*).

ROS-triggered signaling pathways involved in the cytotoxicity and tumor promotion effects of pentachlorophenol and tetrachlorohydroquinone.

Effect of arsenic compounds on the in vitro differentiation of mouse embryonic stem cells into cardiomyocytes.

RNA-Seq transcriptome analysis of maize inbred carrying nicosulfuron-tolerant and nicosulfuron-susceptible alleles.

[Clinical study on the treatment of acute paraquat poisoning with sequential whole gastric and bowel irrigation].

Evaluation of carcinogenic potential of the herbicide glyphosate, drawing on tumor incidence data from fourteen chronic/carcinogenicity rodent studies.

The invertebrate *Caenorhabditis elegans* biosynthesizes ascorbate.

Assessment of pesticide residues and gene expression in common carp exposed to atrazine and chlorpyrifos: Health risk assessments.

Modeling of degradation kinetic and toxicity evaluation of herbicides mixtures in water using the UV/H₂O₂ process.

Genetic and physiological responses of three freshwater diatoms to realistic diuron exposures.

Molecular mechanisms of acrolein toxicity: relevance to human disease.

(1)H NMR based metabolomics approach to study the toxic effects of herbicide butachlor on goldfish (*Carassius auratus*).

Relative developmental toxicities of pentachloroanisole and pentachlorophenol in a zebrafish model (*Danio rerio*).

Dimethylarsinic acid (DMA(V)) changed the expressions of proliferative related factors and secretion of inflammatory cytokines in rat bladder.

Global transcriptomic profiling demonstrates induction of oxidative stress and of compensatory cellular stress responses in brown trout exposed to glyphosate and Roundup.

Study of Cytotoxic Effects of Benzonitrile Pesticides.

Serum Metabolomics in Rats after Acute Paraquat Poisoning.

Metabolic changes in paraquat poisoned patients and support vector machine model of discrimination.

Clearance rate and BP-ANN model in paraquat poisoned patients treated with hemoperfusion.

Environmental hormones and their impacts on sex differentiation in fathead minnows.

Acute Effects of 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) or Paraquat on Core Temperature in C57BL/6J Mice.

Effect of titanium dioxide nanoparticles on the bioavailability, metabolism, and toxicity of pentachlorophenol in zebrafish larvae.

Effects of glyphosate on juvenile rainbow trout (*Oncorhynchus mykiss*): transcriptional and enzymatic analyses of antioxidant defence system, histopathological liver damage and swimming performance.

Combined effects of repeated administration of Bretmont Wipeout (glyphosate) and Ultrazin (atrazine) on testosterone, oxidative stress and sperm quality of Wistar rats.

Isolation of arginine kinase from *Apis cerana cerana* and its possible involvement in response to adverse stress.

Superoxide produced in the matrix of mitochondria enhances methylmercury toxicity in human neuroblastoma cells.

EDC-2: The Endocrine Society's Second Scientific Statement on Endocrine-Disrupting Chemicals.

Cinnamaldehyde attenuates pressure overload-induced cardiac hypertrophy.

Increase in acrolein-conjugated immunoglobulins in saliva from patients with primary Sjögren's syndrome.

Evaluation of dementia by acrolein, amyloid- β^2 and creatinine.

The Genetic Architecture of Arsenic Metabolism Efficiency: A SNP-Based Heritability Study of Bangladeshi Adults.

Methylated arsenic metabolites bind to PML protein but do not induce cellular differentiation and PML-RAR α protein degradation.

Antifungal Effect of Essential Oils against *Fusarium* Keratitis Isolates.

Controlling *Aspergillus flavus* and *Aspergillus parasiticus* growth and aflatoxin production in poultry feed using carvacrol and trans-cinnamaldehyde.

Effect of essential oils of *Syzygium aromaticum* and *Cinnamomum zeylanicum* and their major components on biofilm production in *Staphylococcus aureus* strains isolated from milk of cows with mastitis.

Absence of *sodA* Increases the Levels of Oxidation of Key Metabolic Determinants of *Borrelia burgdorferi*.

Soluble Epoxide Hydrolase Deficiency or Inhibition Attenuates MPTP-Induced Parkinsonism.

Endogenous hydrogen peroxide in the hypothalamic paraventricular nucleus regulates neurohormonal excitation in high salt-induced hypertension.

Partitioning of dietary energy of chickens fed maize- or wheat-based diets with and without a commercial blend of phytogenic feed additives.

Elevated levels of mercapturic acids of acrolein and crotonaldehyde in the urine of Chinese women in Singapore who regularly cook at home.

Cinnamic aldehyde treatment alleviates chronic unexpected stress-induced depressive-like behaviors via targeting cyclooxygenase-2 in mid-aged rats.

Distinguishing mild cognitive impairment from Alzheimer's disease with acrolein metabolites and creatinine in urine.

Cinnamic acid exerts anti-diabetic activity by improving glucose tolerance in vivo and by stimulating insulin secretion in vitro.

Cinnamaldehyde Contributes to Insulin Sensitivity by Activating PPAR α , PPAR δ , and RXR.

[Changes in mRNA expression of p53 and related downstream genes in peripheral blood lymphocytes in workers occupationally exposed to arsenic].

Detoxification of Atrazine by Endophytic *Streptomyces* sp. Isolated from Sugarcane and Detection of Nontoxic Metabolite.

Dynamic differences in oxidative stress and the regulation of metabolism with age in visceral versus subcutaneous adipose.

The ethanol metabolite acetaldehyde induces water and salt intake via two distinct pathways in the central nervous system of rats.

Reduction of the Pentavalent Arsenical Dimethylarsinic Acid and the GSTO1 Substrate S-(4-Nitrophenacyl)glutathione by Rat Liver Cytosol: Analyzing the Role of GSTO1 in Arsenic Reduction.

Renal function is associated with indicators of arsenic methylation capacity in Bangladeshi adults.

Metabolic and process engineering of *Clostridium cellulovorans* for biofuel production from cellulose.

Metabolic Profiling and Enzyme Analyses Indicate a Potential Role of Antioxidant Systems in Complementing Glyphosate Resistance in an *Amaranthus palmeri* Biotype.

Catabolism of coniferyl aldehyde, ferulic acid and p-coumaric acid by *Saccharomyces cerevisiae* yields less toxic products.

Measuring Rates of Herbicide Metabolism in Dicot Weeds with an Excised Leaf Assay.

In Silico Approach To Identify Potential Thyroid Hormone Disruptors among Currently Known Dust Contaminants and Their Metabolites.

Differential tissue accumulation of 2,3,7,8-Tetrachlorinated dibenzo-p-dioxin in *Arabidopsis thaliana* affects plant chronology, lipid metabolism and seed yield.

Metabolism and dissipation kinetics of a novel protoporphyrinogen IX oxidase herbicide [oxadiargyl] in various buffered aqueous system under laboratory-simulated condition.

Absorption, translocation and metabolism of bispyribac-sodium on rice seedlings under cold stress.

Mechanism study of alachlor biodegradation by *Paecilomyces marquandii* with proteomic and metabolomic methods.

Oxidative and reductive metabolism of lipid-peroxidation derived carbonyls.

A pesticide monitoring survey in rivers and lakes of northern Greece and its human and ecotoxicological risk assessment.

Cinnamaldehyde and nitric oxide attenuate advanced glycation end products-induced the Jak/STAT signaling in human renal tubular cells.

Metabolism of agrochemicals and related environmental chemicals based on cytochrome P450s in mammals and plants.

Glyphosate's impact on vegetative growth in leafy spurge identifies molecular processes and hormone cross-talk associated with increased branching.

An Efficient Protocol for Plantlet Regeneration via Direct Organogenesis by Using Nodal Segments from Embryo-Cultured Seedlings of *Cinnamomum camphora* L.

Measuring oxidative stress resistance of *Caenorhabditis elegans* in 96-well microtiter plates.

Steady-state metabolism of ethanol in perfused rat livers treated with cyanamide: quantitative analysis of acetaldehyde effects on the metabolic flux rates.

Effects of atrazine on estrogen receptor $\hat{\pm}$ - and G protein-coupled receptor 30-mediated signaling and proliferation in cancer cells and cancer-associated fibroblasts.

Modelling the biodegradation kinetics of the herbicide propanil and its metabolite 3,4-dichloroaniline.

Genotoxicity of 1-methylpyrene and 1-hydroxymethylpyrene in Chinese hamster V79-derived cells expressing both human CYP2E1 and SULT1A1.

The distribution in tissues and urine of arsenic metabolites after subchronic exposure to dimethylarsinic acid (DMAV) in rats.

Metabolic process engineering of *Clostridium tyrobutyricum* Δ ack-adhE2 for enhanced n-butanol production from glucose: effects of methyl viologen on NADH availability, flux distribution, and fermentation kinetics.

Proinflammatory effect of trivalent arsenical species in a co-culture of Caco-2 cells and peripheral blood mononuclear cells.

Electrochemical sensor for simultaneous determination of herbicide MCPA and its metabolite 4-chloro-2-methylphenol. Application to photodegradation environmental monitoring.

Hydrophilic interaction liquid chromatography coupled with tandem mass spectrometry for acidic herbicides and metabolites analysis in fresh water.

Menthol attenuates respiratory irritation and elevates blood cotinine in cigarette smoke exposed mice.

Activation of auxin signalling counteracts photorespiratory H₂O₂-dependent cell death.

[Relationships between H₂O₂ metabolism and Ca²⁺ transport in dormancy-breaking process of nectarine floral buds].

Expression of cytochrome P450 CYP81A6 in rice: tissue specificity, protein subcellular localization, and response to herbicide application.

A micro-QuEChERS method coupled to GC-MS for the quantification of pesticides in specific maternal and fetal tissues.

A potential role for endogenous microflora in dormancy release, cytokinin metabolism and the response to fluridone in *Lolium rigidum* seeds.

Analysis of benzobicyclon and its metabolite in brown rice and rice straw after field application using liquid chromatography-tandem mass spectrometry.

Simultaneous determination of cinnamaldehyde and its metabolite in rat tissues by gas chromatography-mass spectrometry.

Influence of the level of arsenic (As) exposure and the presence of T860C polymorphism in human As urinary metabolic profile.

Anti-obesity and anti-hyperglycemic effects of cinnamaldehyde via altered ghrelin secretion and functional impact on food intake and gastric emptying.

DMA(V) in Drinking Water Activated NF- κ B Signal Pathway and Increased TGF- β 2 and IL-1 β Expressions in Bladder Epithelial Cells of Rats.

Metabolic fate of the (14)C-labeled herbicide clodinafop-propargyl in a sediment-water system.

Cinnamaldehyde prevents endothelial dysfunction induced by high glucose by activating Nrf2.

Winery vermicomposts to control the leaching of diuron, imidacloprid and their metabolites: role of dissolved organic carbon content.

Ryecyanatines A and B and ryecarbonitrilines A and B, substituted cyanatophenol, cyanatobenzo[1,3]dioxole, and benzo[1,3]dioxolecarbonitriles from rye (*Secale cereale* L.) root exudates: Novel metabolites with allelopathic activity on *Orobanche* seed germination and radicle growth.

Urinary arsenic speciation profile in ethnic group of the Atacama desert (Chile) exposed to variable arsenic levels in drinking water.

Risk of Soil Recontamination Due to Using *Eleusine coracana* and *Panicum maximum* Straw After Phytoremediation of Picloram.

Effective attenuation of atrazine-induced histopathological changes in testicular tissue by antioxidant N-phenyl-4-aryl-polyhydroquinolines.

Selective phytotoxic activity of 2,3,11¹²,13-tetrahydroaromaticin and ilicic acid isolated from *Inula graveolens*.

Drugs That Bind to α -Synuclein: Neuroprotective or Neurotoxic?

Progression of micronutrient alteration and hepatotoxicity following acute PCB126 exposure.

Compound- and sex-specific effects on programming of energy and immune homeostasis in adult C57BL/6JxFVB mice after perinatal TCDD and PCB 153.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin Alters Lipid Metabolism and Depletes Immune Cell Populations in the Jejunum of C57BL/6 Mice.

Paraoxonase 1 and cytochrome P450 polymorphisms in susceptibility to acute organophosphorus poisoning in Egyptians.

Short-Term Changes in Body Composition and Response to Micronutrient Supplementation After Laparoscopic Sleeve Gastrectomy.

Effects of co-exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin and polychlorinated biphenyls on nonalcoholic fatty liver disease in mice.

Design, synthesis and biological activity of phenoxyacetic acid derivatives as novel free fatty acid receptor 1 agonists.

Green tea inhibited the elimination of nephro-cardiovascular toxins and deteriorated the renal function in rats with renal failure.

Design, Synthesis and in Vivo Evaluation of Novel Glycosylated Sulfonylureas as Antihyperglycemic Agents.

In utero/lactational and adult exposures to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) show differential effects on craniofacial development and growth in rats.

Development of a physiologically-based pharmacokinetic model of 2-phenoxyethanol and its metabolite phenoxyacetic acid in rats and humans to address toxicokinetic uncertainty in risk assessment.

Evaluating microRNA profiles reveals discriminative responses following genotoxic or non-genotoxic carcinogen exposure in primary mouse hepatocytes.

Correlation between dioxin and endometriosis: an epigenetic route to unravel the pathogenesis of the disease.

Reversible Splenic Lesion Syndrome (RESLES) Following Glufosinate Ammonium Poisoning.

Cutaneous drug toxicity from 2,4-dinitrophenol (DNP): Case report and histological description.

Epigenetic mechanisms underlying arsenic-associated lung carcinogenesis.

Cyclodextrin-modified MEKC method for quantification of selected acidic metabolites of catecholamines in the presence of various biogenic amines. Application to diagnosis of neuroblastoma.

A constitutive active MAPK/ERK pathway due to BRAFV600E positively regulates AHR pathway in PTC.

Association between Dioxin and Diabetes Mellitus in an Endemic Area of Exposure in Taiwan: A Population-Based Study.

17-Allylamino-17-demethoxygeldanamycin and Herbimycin A Induce Cell Death by Modulating β -Catenin and PI3K/AKT Signaling in FRO Anaplastic Thyroid Carcinoma Cells.

Proximal tubular efflux transporters involved in renal excretion of p-cresyl sulfate and p-cresyl glucuronide: Implications for chronic kidney disease pathophysiology.

Modulation of Glycosaminoglycans Affects PrPSc Metabolism but Does Not Block PrPSc Uptake.

Current skin symptoms of Yusho patients exposed to high levels of 2,3,4,7,8-pentachlorinated dibenzofuran and polychlorinated biphenyls in 1968.

Vitamin B12 and folate levels increase during treatment of iron deficiency anaemia in young adult woman.

Activation of the Prostaglandin E2 receptor EP2 prevents house dust mite-induced airway hyperresponsiveness and inflammation by restraining mast cells' activity.

Continuous Reduction of Protein-Bound Uraemic Toxins with Improved Oxidative Stress by Using the Oral Charcoal Adsorbent AST-120 in Haemodialysis Patients.

Using Insulin Infusion Sets in CSII for Longer Than the Recommended Usage Time Leads to a High Risk for Adverse Events: Results From a Prospective Randomized Crossover Study.

NADPH Oxidase-Mediated Superoxide Production by Intermediary Bacterial Metabolites of Dibenzofuran: A Potential Cause for Trans-Mitochondrial Membrane Potential ($\Delta\psi_m$) Collapse in Human Hepatoma Cells.

Dietary protein-fiber ratio associates with circulating levels of indoxyl sulfate and p-cresyl sulfate in chronic kidney disease patients.

Detection of urine metabolites in polycystic ovary syndrome by UPLC triple-TOF-MS.

Ablation of XP-V gene causes adipose tissue senescence and metabolic abnormalities.

Differential Effects of Glycyrrhiza Species on Genotoxic Estrogen Metabolism: Licochalcone A Downregulates P450 1B1, whereas Isoliquiritigenin Stimulates It.

The Role of Liver in Determining Serum Colon-Derived Uremic Solutes.

Gut-Microbiota-Metabolite Axis in Early Renal Function Decline.

Malignant hyperthermia: a review.

Medical interventions to reverse pulmonary hypoplasia in the animal model of congenital diaphragmatic hernia: A systematic review.

Fluorimetric screening assay for protein carbonyl evaluation in biological samples.

Left ventricular global longitudinal strain is associated with cardiovascular risk factors and arterial stiffness in chronic kidney disease.

[Reevaluation of the concept of developmental abnormality: the importance of faulty perinatal imprinting].

The AhR Ligand, TCDD, Regulates Androgen Receptor Activity Differently in Androgen-Sensitive versus Castration-Resistant Human Prostate Cancer Cells.

Anti-obesity and metabolic efficacy of the β -adrenergic agonist, CL316243, in mice at thermoneutrality compared to 22°C.

Improved method for quantitative analysis of methylated phosphatidylethanolamine species and its application for analysis of diabetic-mouse liver samples.

The Transcriptional Effects of PCB118 and PCB153 on the Liver, Adipose Tissue, Muscle and Colon of Mice: Highlighting of Glut4 and Lipin1 as Main Target Genes for PCB Induced Metabolic Disorders.

Arsenic-induced dyslipidemia in male albino rats: comparison between trivalent and pentavalent inorganic arsenic in drinking water.

Environmental immune disruptors, inflammation and cancer risk.

The effect of environmental chemicals on the tumor microenvironment.

Activation of aryl hydrocarbon receptor dissociates fatty liver from insulin resistance by inducing fibroblast growth factor 21.

Serum aryl hydrocarbon receptor ligand activity is associated with insulin resistance and resulting type 2 diabetes.

Effect of tocopherol on biochemical blood parameters in pleuritis-induced rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Aminomethylphosphonic acid and methoxyacetic acid induce apoptosis in prostate cancer cells.

Omeprazole Inhibits Pancreatic Cancer Cell Invasion through a Nongenomic Aryl Hydrocarbon Receptor Pathway.

Involvement of iron depletion in palmitate-induced lipotoxicity of beta cells.

[Latest Findings of Yusho and Its Therapeutic Development].

[The Distribution of Dioxin Concentrations in the Blood of Yusho Patients].

[Bone Mineral Density in Yusho Health Examination].

[Serum Levels of Regulatory T Cell in the Yusho Patients].

Foreword. The Twenty-five Reports of the Study on Yusho--PCBs and Dioxin-Related Compounds.

Novel Mitochondrial Cationic Uncoupler C4R1 Is an Effective Treatment for Combating Obesity in Mice.

Luteolin suppresses TCDD-induced wasting syndrome in a cultured adipocyte model.

The aryl hydrocarbon receptor (AhR) mediates resistance to apoptosis induced in breast cancer cells.

Effect of vitamin D supplementation during pregnancy on maternal and neonatal outcomes: a systematic review and meta-analysis of randomized controlled trials.

Oligofructose protects against arsenic-induced liver injury in a model of environment/obesity interaction.

The drosophila T-box transcription factor midline functions within Insulin/Akt and c-Jun-N terminal kinase stress-reactive signaling pathways to regulate interommatial bristle formation and cell survival.

Anti-leukemic effect of sodium metaarsenite (KML001) in acute myeloid leukemia with breaking-down the resistance of cytosine arabinoside.

Time- and spectrally resolved characteristics of flavin fluorescence in U87MG cancer cells in culture.

2,3,7,8-Tetrachlorodibenzo-p-dioxin modulates estradiol-induced aldehydic DNA lesions in human breast cancer cells through alteration of CYP1A1 and CYP1B1 expression.

Metabolic outcome of female mice exposed to a mixture of low-dose pollutants in a diet-induced obesity model.

Sodium meta-arsenite prevents the development of autoimmune diabetes in NOD mice.

Modulation of colon cancer by nutmeg.

Mitochondrial vulnerability and increased susceptibility to nutrient-induced cytotoxicity in fibroblasts from leigh syndrome French canadian patients.

Quantitative analysis of volatile metabolites released in vitro by bacteria of the genus *Stenotrophomonas* for identification of breath biomarkers of respiratory infection in cystic fibrosis.

Associations of plasma concentrations of dichlorodiphenyldichloroethylene and polychlorinated biphenyls with prostate cancer: a case-control study in Guadeloupe (French West Indies).

Gestational exposure to the AhR agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin induces BRCA-1 promoter hypermethylation and reduces BRCA-1 expression in mammary tissue of rat offspring: preventive effects of resveratrol.

A potential synergy between incomplete arsenic methylation capacity and demographic characteristics on the risk of hypertension: findings from a cross-sectional study in an arsenic-endemic area of inner Mongolia, China.

Inorganic Arsenic-induced cellular transformation is coupled with genome wide changes in chromatin structure, transcriptome and splicing patterns.

Mitochondrial superoxide in osteocytes perturbs canalicular networks in the setting of age-related osteoporosis.

Dose-response relationship between serum 2,3,7,8-tetrachlorodibenzo-p-dioxin and diabetes mellitus: a meta-analysis.

Controlled-release mitochondrial protonophore reverses diabetes and steatohepatitis in rats.

Synergic actions of polyphenols and cyanogens of peanut seed coat (*Arachis hypogaea*) on cytological, biochemical and functional changes in thyroid.

The cellular and molecular progression of mitochondrial dysfunction induced by 2,4-dinitrophenol in developing zebrafish embryos.

In Ivorian school-age children, infection with hookworm does not reduce dietary iron absorption or systemic iron utilization, whereas afebrile *Plasmodium falciparum* infection reduces iron absorption by half.

Serum metabolomics reveals that arsenic exposure disrupted lipid and amino acid metabolism in rats: a step forward in understanding chronic arsenic toxicity.

TCDD-induced activation of aryl hydrocarbon receptor regulates the skin stem cell population.

Internal exposure to organochlorine pollutants and cadmium and self-reported health status: a prospective study.

The inflammation and estrogen metabolism impacts of polychlorinated biphenyls on endometrial cancer cells.

Behavioral characterization of mouse models of neuroferritinopathy.

Novel heat shock protein 90 inhibitor NVP-AUY922 synergizes with the histone deacetylase inhibitor PXD101 in induction of death of anaplastic thyroid carcinoma cells.

Aryl hydrocarbon receptor SNP -130 C/T associates with dioxins susceptibility through regulating its receptor activity and downstream effectors including interleukin 24.

Metabolic disturbances of the vitamin A pathway in human diaphragmatic hernia.

Urinary amino acid alterations in 3-year-old children with neurodevelopmental effects due to perinatal dioxin exposure in Vietnam: a nested case-control study for neurobiomarker discovery.

Aryl Hydrocarbon Receptor Activation in Acne Vulgaris Skin: A Case Series from the Region of Naples, Italy.

Dioxin-Produced Alteration in the Profiles of Fecal and Urinary Metabolomes: A Change in Bile Acids and Its Relevance to Toxicity.

In Vitro Protective Potentials of *Annona muricata* Leaf Extracts Against Sodium Arsenite-induced Toxicity.

Indoxyl sulfate, not P-cresyl sulfate, is associated with advanced glycation end products in patients on long-term hemodialysis.

KML001 enhances anticancer activity of gemcitabine against pancreatic cancer cells.

Synthesis and biological evaluation of phenoxyacetic acid derivatives as novel free fatty acid receptor 1 agonists.

Antiandrogenic mechanisms of pesticides in human LNCaP prostate and H295R adrenocortical carcinoma cells.

Genetic variation in arsenic (+3 oxidation state) methyltransferase (AS3MT), arsenic metabolism and risk of basal cell carcinoma in a European population.

Alterations of platelet functions in children and adolescents with iron-deficiency anemia and response to therapy.

Microbial Metabolism Shifts Towards an Adverse Profile with Supplementary Iron in the TIM-2 In vitro Model of the Human Colon.

Genes of the de novo and Salvage Biosynthesis Pathways of Vitamin B6 are Regulated under Oxidative Stress in the Plant Pathogen *Rhizoctonia solani*.

Light Inhibition of Shoot Regeneration Is Regulated by Endogenous Abscisic Acid Level in Calli Derived from Immature Barley Embryos.

Atrazine Exposure and Reproductive Dysfunction through the Hypothalamus-Pituitary-Gonadal (HPG) Axis.

Aryl hydrocarbon receptor antagonism and its role in rheumatoid arthritis.

[Determination of 135 pesticides and their metabolites in *Angelica sinensis* by ultra-fast liquid chromatography-tandem mass spectrometry coupled with solid-phase extraction].

Effect of in utero exposure to endocrine disruptors on fetal steroidogenesis governed by the pituitary-gonad axis: a study in rats using different ways of administration.

Determination of endocrine disruptors and endogenic androgens and estrogens in rat serum by high-performance liquid chromatography-tandem mass spectrometry.

Metabolic pathway involved in 2-methyl-6-ethylaniline degradation by *Sphingobium* sp. strain MEA3-1 and cloning of the novel flavin-dependent monooxygenase system *meaBA*.

Effects of iron-glycine chelate on growth, carcass characteristic, liver mineral concentrations and haematological and biochemical blood parameters in broilers.

Paraquat and psychological stressor interactions as pertains to Parkinsonian co-morbidity.

Monomethylarsonous Acid (MMAIII) Has an Adverse Effect on the Innate Immune Response of Human Bronchial Epithelial Cells to *Pseudomonas aeruginosa*.

Snapping Turtles (*Chelydra serpentina*) from Canadian Areas of Concern across the southern Laurentian Great Lakes: Chlorinated and brominated hydrocarbon contaminants and metabolites in relation to circulating concentrations of thyroxine and vitamin A.

Simultaneous determination of phenoxyethanol and its major metabolite, phenoxyacetic acid, in rat biological matrices by LC-MS/MS with polarity switching: Application to ADME studies.

Comparison of alternative remediation technologies for recycled gravel contaminated with heavy metals.

Efflux systems in bacteria and their metabolic engineering applications.

Biochemical characterization of embryogenic calli of *Vanilla planifolia* in response to two years of thidiazuron treatment.

Evaluation of [(11)C]methyl-losartan and [(11)C]methyl-EXP3174 for PET imaging of renal AT1receptor in rats.

Differential embryotoxicity of the organic pollutants in rural and urban air particles.

Mechanism of triphenylmethane Cresol Red degradation by *Trichoderma harzianum* M06.

The fish embryo test (FET): origin, applications, and future.

Do hormone-modulating chemicals impact on reproduction and development of wild amphibians?

Synthesis, Molecular Structure, Metabolic Stability and QSAR Studies of a Novel Series of Anticancer N-Acylbenzenesulfonamides.

Hepatotoxicity, Nephrotoxicity and Oxidative Stress in Rat Testis Following Exposure to Haloxyfop-p-methyl Ester, an Aryloxyphenoxypropionate Herbicide.

The role of thioredoxin reductase and glutathione reductase in plumbagin-induced, reactive oxygen species-mediated apoptosis in cancer cell lines.

Transcriptional profiling of rat white adipose tissue response to 2,3,7,8-tetrachlorodibenzo-*p*-dioxin.

Screening a mouse liver gene expression compendium identifies modulators of the aryl hydrocarbon receptor (AhR).

[2, 4, 6-Trichlorophenol Mineralization Promoted by Anaerobic Reductive Dechlorination of Acclimated Sludge and Extracellular Respiration Dechlorination Pathway].

Predictive modes of action of pesticides in uterine adenocarcinoma development in rats.

Activation of NRF2 pathway in spleen, thymus as well as peripheral blood mononuclear cells by acute arsenic exposure in mice.

Levels of selected urinary metabolites of volatile organic compounds among children aged 6-11 years.

Combination effects of nano-TiO₂ and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on biotransformation gene expression in the liver of European sea bass *Dicentrarchus labrax*.

Metabolic engineering of *Escherichia coli* to enhance acetol production from glycerol.

Toxicogenetic effects of low concentrations of the pesticides imidacloprid and sulfentrazone individually and in combination in *in vitro* tests with HepG2 cells and *Salmonella typhimurium*.

Aryl Hydrocarbon Receptor Activity of Tryptophan Metabolites in Young Adult Mouse Colonocytes.

Removing selected steroid hormones, biocides and pharmaceuticals from water by means of biogenic manganese oxide nanoparticles *in situ* at ppb levels.

Comparative proteomics of oxidative stress response in three cyanobacterial strains native to Indian paddy fields.

[Fatal course following poisoning with an illegal weight-reducing agent].

Hydroxyl metabolite of PCB 180 induces DNA damage signaling and enhances the DNA damaging effect of benzo[a]pyrene.

Expression of aryl hydrocarbon receptor 1 (AHR1), AHR1 nuclear translocator 1 (ARNT1) and CYP1 family monooxygenase mRNAs and their activity in chicken ovarian follicles following *in vitro* exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Synthesis and phototoxicity of isomeric 7,9-diglutathione pyrrole adducts: Formation of reactive oxygen species and induction of lipid peroxidation.

A microdroplet cell culture based high frequency somatic embryogenesis system for pigeonpea, *Cajanus cajan* (L.) Millsp.

Low-level sodium arsenite induces apoptosis through inhibiting TrxR activity in pancreatic β -cells.

Biotin amelioration of nephrotoxicity in streptozotocin-induced diabetic mice.

Distributions of selected urinary metabolites of volatile organic compounds by age, gender, race/ethnicity, and smoking status in a representative sample of U.S. adults.

Exogenous plant hormones and cyclotide expression in *Viola uliginosa* (Violaceae).

Evaluation of exposure to organophosphate, carbamate, phenoxy acid, and chlorophenol pesticides in pregnant women from 10 Caribbean countries.

Toxicokinetic Model Development for the Insensitive Munitions Component 2,4-Dinitroanisole.

Two persistent organic pollutants which act through different xenosensors (α -endosulfan and 2,3,7,8 tetrachlorodibenzo-p-dioxin) interact in a mixture and downregulate multiple genes involved in human hepatocyte lipid and glucose metabolism.

Aquatic risk assessment of priority and other river basin specific pesticides in surface waters of Mediterranean river basins.

Biochemical and Molecular Alterations Following Arsenic-Induced Oxidative Stress and Mitochondrial Dysfunction in Rat Brain.

Green tea (*Camellia sinensis*) alleviates arsenic-induced damages to DNA and intestinal tissues in rat and in situ intestinal loop by reinforcing antioxidant system.

TCDD and corticosterone on testicular steroidogenesis and antioxidant system of epididymal sperm in rats.

Body Mass Parameters, Lipid Profiles and Protein Contents of Zebrafish Embryos and Effects of 2,4-Dinitrophenol Exposure.

Male and female mice show significant differences in hepatic transcriptomic response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Identification of Microbial Metabolites Elevating Vitamin Contents in Barley Seeds.

Application of liquid chromatography/electrospray ionization tandem mass spectrometry for the elucidation of hydroxyl radical oxidation of metsulfuron methyl and related sulfonylurea pesticide products: evidence for the triazine skeleton scission.

Genetic Deficiency of Glutathione S-Transferase P Increases Myocardial Sensitivity to Ischemia-Reperfusion Injury.

Reproduction of the Medicinal Plant *Pelargonium sidoides* via Somatic Embryogenesis.

The mitochondrial uncoupler DNP triggers brain cell mTOR signaling network reprogramming and CREB pathway up-regulation.

The effects of drugs with immunosuppressive or immunomodulatory activities on xenobiotics-metabolizing enzymes expression in primary human hepatocytes.

The deleterious metabolic and genotoxic effects of the bacterial metabolite p-cresol on colonic epithelial cells.

Correlation of Serum Thyroid Hormones Autoantibodies with Self-Reported Exposure to Thyroid Disruptors in a Group of Nonsegmental Vitiligo Patients.

Rapid kinetics of dehalogenation promoted by iodotyrosine deiodinase from human thyroid.

Simple and sensitive GC/MS-method for the quantification of urinary phenol, o- and m-cresol and ethylphenols as biomarkers of exposure to industrial solvents.

Butafenacil: A positive control for identifying anemia- and variegate porphyria-inducing chemicals.

Metabolomics Reveals that Aryl Hydrocarbon Receptor Activation by Environmental Chemicals Induces Systemic Metabolic Dysfunction in Mice.

Metabolic Effect Level Index Links Multivariate Metabolic Fingerprints to Ecotoxicological Effect Assessment.

Phytoremedial effect of *Withania somnifera* against arsenic-induced testicular toxicity in Charles Foster rats.

Effects of Endocrine-Disrupting Chemicals on the Ovary.

Effect of tocopherol and acetylsalicylic acid on the biochemical indices of blood in dioxin-exposed rats.

A multiplexed assay for determination of neurotoxicant effects on spontaneous network activity and viability from microelectrode arrays.

A bioassay to measure energy metabolism in mouse colonic crypts, organoids, and sorted stem cells.

Analysis of 18 urinary mercapturic acids by two high-throughput multiplex-LC-MS/MS methods.

Analysis of amicarbazone and its two metabolites in grains and soybeans by liquid chromatography with tandem mass spectrometry.

Guanine-based structural coloration as an indicator of oxidative stress in a cichlid fish.

A rapid in vivo zebrafish model to elucidate oxidative stress-mediated PCB126-induced apoptosis and developmental toxicity.

Identification, quantification, spatiotemporal distribution and genetic variation of major latex secondary metabolites in the common dandelion (*Taraxacum officinale* agg.).

Mechanisms of Fatal Cardiotoxicity following High-Dose Cyclophosphamide Therapy and a Method for Its Prevention.

Two-Dimensional Algal Collection and Assembly by Combining AC-Dielectrophoresis with Fluorescence Detection for Contaminant-Induced Oxidative Stress Sensing.

Glucose stimulates neurotensin secretion from the rat small intestine by mechanisms involving SGLT1 and GLUT2, leading to cell depolarization and calcium influx.

Human FMO2-based microbial whole-cell catalysts for drug metabolite synthesis.

Towards microbial fermentation metabolites as markers for health benefits of prebiotics.

Planteose as a storage carbohydrate required for early stage of germination of *Orobancha minor* and its metabolism as a possible target for selective control.

Steroid hormone related effects of marine persistent organic pollutants in human H295R adrenocortical carcinoma cells.

Application of (1)h NMR profiling to assess seed metabolomic diversity. A case study on a soybean era population.

[The Effect of Maternal Exposure to Dioxins on the Level of Thyroid Hormone in Developing Pups].

A new *P. putida* instrumental toxicity bioassay.

Metabolic switching: synergistic induction of carotenogenesis in the aerial microalga, *Vischeria helvetica*, under environmental stress conditions by inhibitors of fatty acid biosynthesis.

Increased brain nitric oxide levels following ethanol administration.

Utility of cell viability assays for use with ex vivo vocal fold epithelial tissue.

Neuropathological effect of dimethyl disulfide on neurons of the desert locust *Schistocerca gregaria*.

±-Naphthoflavone Increases Lipid Accumulation in Mature Adipocytes and Enhances Adipocyte-Stimulated Endothelial Tube Formation.

Sex-related differences in murine hepatic transcriptional and proteomic responses to TCDD.

Role of ALADIN in human adrenocortical cells for oxidative stress response and steroidogenesis.

Use status and metabolism of realgar in Chinese patent medicine.

Triphenyl phosphate-induced developmental toxicity in zebrafish: potential role of the retinoic acid receptor.

Synthesis and biological evaluation of [¹⁴C]AZ12504948; a novel tracer for imaging of glucokinase in pancreas and liver.

Human inhalation exposures to toluene, ethylbenzene, and m-xylene and physiologically based pharmacokinetic modeling of exposure biomarkers in exhaled air, blood, and urine.

Regulation of human hepatic drug transporter activity and expression by diesel exhaust particle extract.

Comparative transcriptome analysis reveals carbohydrate and lipid metabolism blocks in *Brassica napus* L. male sterility induced by the chemical hybridization agent monosulfuron ester sodium.

Alcohol induced alterations to the human fecal VOC metabolome.

Inflammation and pyroptosis mediate muscle expansion in an interleukin-1² (IL-1²)-dependent manner.

[Influence of abscisic acid and fluridone on the content of phytohormones and polyamines and the level of oxidative stress in plants of *Mesembryanthemum crystallinum* L. under salinity].

Contraction of gut smooth muscle cells assessed by fluorescence imaging.

Comparison of the in vitro effects of TCDD, PCB 126 and PCB 153 on thyroid-restricted gene expression and thyroid hormone secretion by the chicken thyroid gland.

Abscisic acid (ABA) regulates grape bud dormancy, and dormancy release stimuli may act through modification of ABA metabolism.

Identification of 2-aminothiazolobenzazepine metabolites in human, rat, dog, and monkey microsomes by ion-molecule reactions in linear quadrupole ion trap mass spectrometry.

Lipotubuloids in ovary epidermis of *Ornithogalum umbellatum* act as metabolons: suggestion of the name 'lipotubuloid metabolon'.

Longitudinal assessment of occupational exposures to the organophosphorous insecticides chlorpyrifos and profenofos in Egyptian cotton field workers.

Hypoxia-induced localization of chemotaxis-related signaling proteins in *Vibrio cholerae*.

The toxicity of sediments from Taihu Lake evaluated by several in vitro bioassays.

Production of anti-cancer triterpene (betulinic acid) from callus cultures of different *Ocimum* species and its elicitation.

The effects of dietary boron compounds in supplemented diet on hormonal activity and some biochemical parameters in rats.

The aryl hydrocarbon receptor: a review of its role in the physiology and pathology of the integument and its relationship to the tryptophan metabolism.

Nitric oxide production and sequestration in the sinus gland of the green shore crab *Carcinus maenas*.

Quantitative proteomics and transcriptomics reveal key metabolic processes associated with cotton fiber initiation.

Dinitrophenol modulates gene expression levels of angiogenic, cell survival and cardiomyogenic factors in bone marrow derived mesenchymal stem cells.

Pollutants in pet dogs: a model for environmental links to breast cancer.

Risk assessment based prioritization of 200 organic micropollutants in 4 Iberian rivers.

Metabolomic pattern analysis after mediterranean diet intervention in a nondiabetic population: a 1- and 3-year follow-up in the PREDIMED study.

[The Relationship of Obesity to the Character of Nutrition].

The Role of the Metabolism of Anticancer Drugs in Their Induced-Cardiotoxicity.

Glu504Lys Single Nucleotide Polymorphism of Aldehyde Dehydrogenase 2 Gene and the Risk of Human Diseases.

Applications of Metabonomics in Pesticide Toxicology.

Cyclic Adenosine Monophosphate-Mediated Enhancement of Vascular Endothelial Growth Factor Released by Differentiated Human Monocytic Cells: The Role of Protein Kinase A.

Autotetraploid plant regeneration by indirect somatic embryogenesis from leaf mesophyll protoplasts of diploid *Gentiana decumbens* L.f.

Molecular biology of the stress response in the early embryo and its stem cells.

Plant growth hormones suppress the development of *Harpophora maydis*, the cause of late wilt in maize.

Listeria monocytogenes batch culture growth response to metabolic inhibitors.

Oxidative stress in COPD: molecular background and clinical monitoring.

Association between maternal urinary arsenic species and infant cord blood leptin levels in a New Hampshire Pregnancy Cohort.

Human fetal ventricular cardiomyocyte, RL-14 cell line, is a promising model to study drug metabolizing enzymes and their associated arachidonic acid metabolites.

Chronic exposure to low-dose arsenic modulates lipogenic gene expression in mice.

Repositioning of 2,4-dichlorophenoxy acetic acid as a potential anti-inflammatory agent: in silico and pharmaceutical formulation study.

Short-term oral atrazine exposure alters the plasma metabolome of male C57BL/6 mice and disrupts $\hat{\pm}$ -linolenate, tryptophan, tyrosine and other major metabolic pathways.

Diet with diphenyl diselenide mitigates quinclorac toxicity in silver catfish (*Rhamdia quelen*).

Acute systemic accumulation of acrolein in mice by inhalation at a concentration similar to that in cigarette smoke.

Effects of atrazine in fish, amphibians, and reptiles: an analysis based on quantitative weight of evidence.

Transcriptional changes induced by in vivo exposure to pentachlorophenol (PCP) in *Chironomus riparius* (Diptera) aquatic larvae.

Proteome-wide light/dark modulation of thiol oxidation in cyanobacteria revealed by quantitative site-specific redox proteomics.

Agent Orange exposure and cancer incidence in Korean Vietnam veterans: a prospective cohort study.

The roles of the shikimate pathway genes, *aroA* and *aroB*, in virulence, growth and UV tolerance of *Burkholderia glumae* strain 411gr-6.

Unraveling the toxicity mechanisms of the herbicide diclofop-methyl in rice: modulation of the activity of key enzymes involved in citrate metabolism and induction of cell membrane anion channels.

Perturbed porphyrin biosynthesis contributes to differential herbicidal symptoms in photodynamically stressed rice (*Oryza sativa*) treated with 5-aminolevulinic acid and oxyfluorfen.

Various effects of the photosystem II--inhibiting herbicides on 5-n-alkylresorcinol accumulation in rye seedlings.

Gene expression profiles of *Arabidopsis* under the stress of methyl viologen: a microarray analysis.

Carcinogenicity of metamifop, a novel herbicide, in Wistar rats following oral administration for 104 weeks.

Metabolic and behavior changes in surubim acutely exposed to a glyphosate-based herbicide.

Soil surface colonization by phototrophic indigenous organisms, in two contrasted soils treated by formulated maize herbicide mixtures.

Characterization of nuclear receptor-mediated murine hepatocarcinogenesis of the herbicide pronamide and its human relevance.

Guarana (*Paullinia cupana* Mart.) prevents β -amyloid aggregation, generation of advanced glycation-end products (AGEs), and acrolein-induced cytotoxicity on human neuronal-like cells.

Agrichemicals chronically inhibit the cortisol response to stress in fish.

Oxidative stress response induced by atrazine in *Palaemonetes argentinus*: the protective effect of vitamin E.

An unusual case of non-fatal poisoning due to herbicide 4-chloro-2-methyl phenoxyacetic acid (MCPA).

Prediction of paraquat exposure and toxicity in clinically ill poisoned patients: a model based approach.

Butachlor causes disruption of HPG and HPT axes in adult female rare minnow (*Gobiocypris rarus*).

De novo transcriptome assembly for rudimentary leaves in *Litchi chinensis* Sonn. and identification of differentially expressed genes in response to reactive oxygen species.

Alterations in energy/redox metabolism induced by mitochondrial and environmental toxins: a specific role for glucose-6-phosphate-dehydrogenase and the pentose phosphate pathway in paraquat toxicity.

Reductive detoxification of acrolein as a potential role for aldehyde reductase (AKR1A) in mammals.

Erythema multiforme-like eruption following acute allergic contact dermatitis after exposure to the emulsified herbicide acetochlor.

Alteration of plant physiology by glyphosate and its by-product aminomethylphosphonic acid: an overview.

Atrazine reduces reproduction in Japanese medaka (*Oryzias latipes*).

Antioxidant and neurotoxicity markers in the model organism *Enchytraeus albidus* (Oligochaeta): mechanisms of response to atrazine, dimethoate and carbendazim.

Effects of glyphosate-based herbicides on survival, development, growth and sex ratios of wood frog (*Lithobates sylvaticus*) tadpoles. II: agriculturally relevant exposures to Roundup WeatherMax[®] and Vision[®] under laboratory conditions.

Effects of glyphosate-based herbicides on survival, development, growth and sex ratios of wood frogs (*Lithobates sylvaticus*) tadpoles. I: chronic laboratory exposures to VisionMax[®].

Earthworm tolerance to residual agricultural pesticide contamination: field and experimental assessment of detoxification capabilities.

[Cloning of full-length cDNA of HMGR from *Gobiocypris rarus* and analysis of its expression profiles in male exposed to pentachlorophenol].

Toxicity endpoint selections for a simazine risk assessment.

Cytotoxic effects of pentachlorophenol (PCP) and its metabolite tetrachlorohydroquinone (TCHQ) on liver cells are modulated by antioxidants.

A quantitative HPLC-MS/MS method for studying internal concentrations and toxicokinetics of 34 polar analytes in zebrafish (*Danio rerio*) embryos.

Methyl viologen responsive proteome dynamics of *Anabaena* sp. strain PCC7120.

Agent Orange exposure and disease prevalence in Korean Vietnam veterans: the Korean veterans health study.

Novel molecular events associated with altered steroidogenesis induced by exposure to atrazine in the intact and castrate male rat.

Effects of glyphosate on egg incubation, larvae hatching, and ovarian rematuration in the estuarine crab *Neohelice granulata*.

Prenatal exposure to low doses of atrazine affects mating behaviors in male guppies.

Effects of Sublethal Exposure to a Glyphosate-Based Herbicide Formulation on Metabolic Activities of Different Xenobiotic-Metabolizing Enzymes in Rats.

Mechanisms underlying the neurotoxicity induced by glyphosate-based herbicide in immature rat hippocampus: involvement of glutamate excitotoxicity.

The effect of atrazine administered by gavage or in diet on the LH surge and reproductive performance in intact female Sprague-Dawley and Long Evans rats.

Developmental toxicity studies with atrazine and its major metabolites in rats and rabbits.

Atrazine contamination at the watershed scale and environmental factors affecting sampling rates of the polar organic chemical integrative sampler (POCIS).

Pentachlorophenol exposure causes Warburg-like effects in zebrafish embryos at gastrulation stage.

Effects of glyphosate on growth rate, metabolic rate and energy reserves of early juvenile crayfish, *Cherax quadricarinatus* M.

Hydrolysis reaction mechanism in atrazine metabolism and prediction of its metabolites' toxicities.

Age-dependent dopaminergic dysfunction following fetal exposure to atrazine in SD rats.

The effect of glyphosate, its metabolites and impurities on erythrocyte acetylcholinesterase activity.

Diuron-induced rat urinary bladder carcinogenesis: mode of action and human relevance evaluations using the International Programme on Chemical Safety framework.

Chaetoglobosins from *Chaetomium globosum*, an endophytic fungus in *Ginkgo biloba*, and their phytotoxic and cytotoxic activities.

Toxic effects of atrazine on reproductive system of male rats.

Identification of metabolites of propyrisulfuron in rats.

Herbicide clomazone effects on $\hat{\gamma}$ -aminolevulinic acid activity and metabolic parameters in *Cyprinus carpio*.

A unique co-culture model for fundamental and applied studies of human fetoplacental steroidogenesis and interference by environmental chemicals.

Toxicological properties of the thiolated inorganic arsenic and arsenosugar metabolite thio-dimethylarsinic acid in human bladder cells.

Does area deprivation modify the association between exposure to a nitrate and low-dose atrazine metabolite mixture in drinking water and small for gestational age? A historic cohort study.

Chronic exposure of mice to environmental endocrine-disrupting chemicals disturbs their energy metabolism.

The long-term effects of the herbicide atrazine on the dopaminergic system following exposure during pubertal development.

Chlorotriazines do not activate the aryl hydrocarbon receptor, the oestrogen receptor or the thyroid receptor in in vitro assays.

Exposure of mice to atrazine and its metabolite diaminochlorotriazine elicits oxidative stress and endocrine disruption.

Dietary administration of paraquat for 13 weeks does not result in a loss of dopaminergic neurons in the substantia nigra of C57BL/6J mice.

Herbicides induce change in metabolic and genetic diversity of bacterial community from a cold oligotrophic lake.

Genes for iron-sulphur cluster assembly are targets of abiotic stress in rice, *Oryza sativa*.

Degeneration modulates retinal response to transient exogenous oxidative injury.

Exposure to atrazine during gestation and lactation periods: toxicity effects on dopaminergic neurons in offspring by downregulation of Nurr1 and VMAT2.

The effect of metabolites and impurities of glyphosate on human erythrocytes (in vitro).

Genotoxic and biochemical effects of atrazine and Roundup(®), alone and in combination, on the Asian clam *Corbicula fluminea*.

Cellular impact of combinations of endosulfan, atrazine, and chlorpyrifos on human primary hepatocytes and HepaRG cells after short and chronic exposures.

Persistent organic pollutants and diabetes: a review of the epidemiological evidence.

Genotoxicity assessment of some cosmetic and food additives.

Longevity effect of IGF-1R(+/-) mutation depends on genetic background-specific receptor activation.

[Protective effect and mechanisms of pituitrin on acute paraquat-induced lung injury in rats].

Rotenone and paraquat perturb dopamine metabolism: A computational analysis of pesticide toxicity.

Acrolein, a highly toxic aldehyde generated under oxidative stress in vivo, aggravates the mouse liver damage after acetaminophen overdose.

The effect of subchronic metribuzin exposure to signal crayfish (*Pacifastacus leniusculus* Dana 1852).

Effects of the exposure of fish to triazine herbicides.

Evaluation of metabolic enzymes in response to Excel Mera 71, a glyphosate-based herbicide, and recovery pattern in freshwater teleostean fishes.

Engineering the metabolism of the phenylurea herbicide chlortoluron in genetically modified *Arabidopsis thaliana* plants expressing the mammalian cytochrome P450 enzyme CYP1A2.

Effect of chronic exposure to prometryne on oxidative stress and antioxidant response in red swamp crayfish (*Procambarus clarkii*).

Evaluating the degradation of the herbicides picloram and 2,4-D in a compartmentalized reactive biobarrier with internal liquid recirculation.

Environmental fate and toxicology of clomazone.

Preface. Endocrine disrupters.

Clinical characteristics of patients after dicamba herbicide ingestion.

Chronic exposure to pentachlorophenol alters thyroid hormones and thyroid hormone pathway mRNAs in zebrafish.

High cortisol and cortisone levels are associated with breast milk dioxin concentrations in Vietnamese women.

Pesticide tolerant *Azotobacter* isolates from paddy growing areas of northern Karnataka, India.

Acetohydroxyacid synthase: a target for antimicrobial drug discovery.

Consensus diagnoses and mode of action for the formation of gastric tumors in rats treated with the chloroacetanilide herbicides alachlor and butachlor.

Catalase inhibition in diabetic rats potentiates DNA damage and apoptotic cell death setting the stage for cardiomyopathy.

Arsenic methylation capacity and obesity are associated with insulin resistance in obese children and adolescents.

Agent Orange exposure and risk of death in Korean Vietnam veterans: Korean Veterans Health Study.

Is science public health's BFF?

Metabolism of arsenic trioxide in acute promyelocytic leukemia cells.

XRCC1 Arg194Trp and Arg399Gln polymorphisms and arsenic methylation capacity are associated with urothelial carcinoma.

Acrolein exposure is associated with increased cardiovascular disease risk.

Interaction of plasma glutathione redox and folate deficiency on arsenic methylation capacity in Bangladeshi adults.

Localized changes to glycogen synthase kinase-3 and collapsin response mediator protein-2 in the Huntington's disease affected brain.

Differences of urinary arsenic metabolites and methylation capacity between individuals with and without skin lesions in Inner Mongolia, Northern China.

Suppression of sulfoconjugation reduces the protective effect of ortho-aminoazotoluene on hepatocarcinogenesis induced by diethylnitrosamine in mice.

Cytotoxicity of PVPAC-treated bovine pericardium: a potential replacement for glutaraldehyde in biological heart valves.

wALADin benzimidazoles differentially modulate the function of porphobilinogen synthase orthologs.

Cinnamon extract improves insulin sensitivity in the brain and lowers liver fat in mouse models of obesity.

The pentachlorophenol metabolite tetrachlorohydroquinone induces massive ROS and prolonged p-ERK expression in splenocytes, leading to inhibition of apoptosis and necrotic cell death.

Prenatal exposure to organophosphate pesticides and neurobehavioral development of neonates: a birth cohort study in Shenyang, China.

Potential ecological roles of artemisinin produced by *Artemisia annua* L.

Effect of lung fibrosis on glycogen content in different extrapulmonary tissues.

Cinnamaldehyde/chemotherapeutic agents interaction and drug-metabolizing genes in colorectal cancer.

Synthesis, characterization, and preclinical evaluation of new thiazolidin-4-ones substituted with p-chlorophenoxy acetic acid and clofibrac acid against insulin resistance and metabolic disorder.

Rhizobium leguminosarum bv. *viciae* 3841 Adapts to 2,4-Dichlorophenoxyacetic Acid with "Auxin-Like" Morphological Changes, Cell Envelope Remodeling and Upregulation of Central Metabolic Pathways.

Large-scale functional analysis of the roles of phosphorylation in yeast metabolic pathways.

Urinary biomarkers of exposure to insecticides, herbicides, and one insect repellent among pregnant women in Puerto Rico.

Integrated electrochemical biosensor based on algal metabolism for water toxicity analysis.

Metabolism-based herbicide resistance and cross-resistance in crop weeds: a threat to herbicide sustainability and global crop production.

Dual function of the cytochrome P450 CYP76 family from *Arabidopsis thaliana* in the metabolism of monoterpenols and phenylurea herbicides.

Biodegradation of sulfosulphuron in agricultural soil by *Trichoderma* sp.

Metabolites from thermophilic bacteria I: N-propionylanthranilic acid, a co-metabolite of the bacillamide class antibiotics and tryptophan metabolites with herbicidal activity from *Laceyella sacchari*.

Effect of fungal and plant metabolites on broomrapes (*Orobanche* and *Phelipanche* spp.) seed germination and radicle growth.

Urinary metabolomics revealed arsenic internal dose-related metabolic alterations: a proof-of-concept study in a Chinese male cohort.

Enantioselective metabolism of the chiral herbicide diclofop-methyl and diclofop by HPLC in loach (*Misgurnus anguillicaudatus*) liver microsomes in vitro.

A simple method for routine monitoring of glyphosate and its main metabolite in surface waters using lyophilization and LC-FLD+MS/MS. Case study: canals with influence on Biscayne National Park.

Hypericin biosynthesis in *Hypericum hookerianum* Wight and Arn: investigation on biochemical pathways using metabolite inhibitors and suppression subtractive hybridization.

Human plasma concentrations of herbicidal carbamate molinate extrapolated from the pharmacokinetics established in in vivo experiments with chimeric mice with humanized liver and physiologically based pharmacokinetic modeling.

Determination and study on dissipation and residue determination of cyhalofop-butyl and its metabolite using HPLC-MS/MS in a rice ecosystem.

Metabolism of propyrisulfuron: ¹⁴C excretion, ¹⁴C concentration in plasma and tissues, and amount of metabolites in rats.

Centrally formed acetaldehyde mediates ethanol-induced brain PKA activation.

Phytotoxic and antibacterial metabolites from *Fusarium proliferatum* ZS07 isolated from the gut of long-horned grasshoppers.

Integrated metabolic flux and omics analysis of *Synechocystis* sp. PCC 6803 under mixotrophic and photoheterotrophic conditions.

An efficient in vitro system for somatic embryogenesis and podophyllotoxin production in *Podophyllum hexandrum* Royle.

A derivatization and validation strategy for determining the spatial localization of endogenous amine metabolites in tissues using MALDI imaging mass spectrometry.

Trivalent methylated arsenic metabolites induce apoptosis in human myeloid leukemic HL-60 cells through generation of reactive oxygen species.

Sorption of polar herbicides and herbicide metabolites by biochar-amended soil.

Novel bioassay for the discovery of inhibitors of the 2-C-methyl-D-erythritol 4-phosphate (MEP) and terpenoid pathways leading to carotenoid biosynthesis.

Ultrasound-assisted extraction with LC-TOF/MS identification and LC-UV determination of imazamox and its metabolites in leaves of wheat plants.

Metabolism and physiologically based pharmacokinetic modeling of flumioxazin in pregnant animals.

Evaluation of urinary speciated arsenic in NHANES: issues in interpretation in the context of potential inorganic arsenic exposure.

Effects of atrazine and chlorpyrifos on cytochrome P450 in common carp liver.

[Determination of three exogenous plant hormone residues in bean sprout by high performance liquid chromatography-quadrupole-time of flight mass spectrometry].

[The molecular mechanism of interaction of trivalent dimethylarsinous acid (DMA(III)) binding to rat hemoglobin].

Metabolic responses in root nodules of *Phaseolus vulgaris* and *Vicia sativa* exposed to the imazamox herbicide.

Recharging mitochondrial batteries in old eyes. Near infra-red increases ATP.

Micropropagation of *Dalbergia sissoo* Roxb. through tissue culture technique.

Why don't plants have diabetes? Systems for scavenging reactive carbonyls in photosynthetic organisms.

Regulation of anthocyanin biosynthesis in *Arabidopsis thaliana* red pap1-D cells metabolically programmed by auxins.

The dormancy-breaking stimuli "chilling, hypoxia and cyanamide exposure" up-regulate the expression of α -amylase genes in grapevine buds.

Triacylglycerol accumulation and oxidative stress in *Rhodococcus* species: differential effects of pro-oxidants on lipid metabolism.

Effect of various growth hormone concentration and combination on callus induction, nature of callus and callogenic response of *Nerium odorum*.

Metolachlor metabolite (MESA) reveals agricultural nitrate-N fate and transport in Choptank River watershed.

Pesticide exposures to migrant farmworkers in Eastern NC: detection of metabolites in farmworker urine associated with housing violations and camp characteristics.

Compositional analysis of grain and forage from MON 87427, an inducible male sterile and tissue selective glyphosate-tolerant maize product for hybrid seed production.

Studies on the anoxic dissipation and metabolism of pyribambenz propyl (ZJ0273) in soils using position-specific radiolabeling.

Metabolic pathway elucidation towards time- and dose-dependent electrophoretic screening of stable oxidative phenolic compounds.

Environmental determinants of the urinary concentrations of herbicides during pregnancy: the PELAGIE mother-child cohort (France).

Biodegradation of atrazine by *Rhodococcus* sp. BCH2 to N-isopropylammelide with subsequent assessment of toxicity of biodegraded metabolites.

In-silico analysis and expression profiling implicate diverse role of EPSPS family genes in regulating developmental and metabolic processes.

Acrolein modification impairs key functional features of rat apolipoprotein E: identification of modified sites by mass spectrometry.

New competitive dendrimer-based and highly selective immunosensor for determination of atrazine in environmental, feed and food samples: the importance of antibody selectivity for discrimination among related triazinic metabolites.

Organophosphate pesticide exposure and dialkyl phosphate urinary metabolites among chili farmers in northeastern Thailand.

Sorption-desorption of indaziflam and its three metabolites in sandy soils.

Determination of herbicides and its metabolite in soil and water samples by capillary electrophoresis-laser induced fluorescence detection using microwave-assisted derivatization.

Disposition of atrazine metabolites following uptake and degradation of atrazine in switchgrass.

Dietary essential oils improve the hepatic antioxidative status of broiler chickens.

Qualitative/quantitative strategy for the determination of glufosinate and metabolites in plants.

Metabolic fate of the (14)C-labeled herbicide clodinafop-propargyl in soil.

Molecular mechanisms of herbicide-inducible gene expression of tobacco CYP71AH11 metabolizing the herbicide chlorotoluron.

The factors influencing urinary arsenic excretion and metabolism of workers in steel and iron smelting foundry.

p-Cresol affects reactive oxygen species generation, cell cycle arrest, cytotoxicity and inflammation/atherosclerosis-related modulators production in endothelial cells and mononuclear cells.

Herbimycin A inhibits cell growth with reversal of epithelial-mesenchymal transition in anaplastic thyroid carcinoma cells.

Human CYP2E1-dependent and human sulfotransferase 1A1-modulated induction of micronuclei by benzene and its hydroxylated metabolites in Chinese hamster V79-derived cells.

Endocrine disruptive compounds and cardio-metabolic risk factors in children.

An efficient in vitro process for cyclic clonal production of shoots from adult tree of *Cassia alata* L. and evaluation of genetic stability using DNA-based markers.

Genetic deletion of LXR β prevents arsenic-enhanced atherosclerosis, but not arsenic-altered plaque composition.

Net survival after exposure to polychlorinated biphenyls and dioxins: the Yusho study.

Antagonism of ionotropic glutamate receptors attenuates chemical ischemia-induced injury in rat primary cultured myenteric ganglia.

Global metabolomic profiling of acute myocarditis caused by *Trypanosoma cruzi* infection.

Mannitol-induced drought stress on calli of *Trigonella foenum-graecum* L. Var. RMT-303.

The role of nitrotyrosine in tyrosine pathway disorders.

Dynamic changes in metabolic profiles of rats subchronically exposed to mequindox.

Arabidopsis ENHANCED DISEASE SUSCEPTIBILITY1 promotes systemic acquired resistance via azelaic acid and its precursor 9-oxo-nonanoic acid.

Effect of mitochondrial metabolism-interfering agents on cancer cell mitochondrial function and radio/chemosensitivity.

Low brain iron effects and reversibility on striatal dopamine dynamics.

Dioxin-induced fetal growth retardation: the role of a preceding attenuation in the circulating level of glucocorticoid.

Impact of agriculture on the selection of insecticide resistance in the malaria vector *Anopheles gambiae*: a multigenerational study in controlled conditions.

Increased tolerance of *Anopheles gambiae* s.s. to chemical insecticides after exposure to agrochemical mixture.

Metformin suppresses CYP1A1 and CYP1B1 expression in breast cancer cells by down-regulating aryl hydrocarbon receptor expression.

Mitochondrial uncoupling as a regulator of life-history trajectories in birds: an experimental study in the zebra finch.

Association of urinary phenols with increased body weight measures and obesity in children and adolescents.

Commentary on nephropathy and longitudinal studies of diabetes, and dioxins, furans, and dioxin-like PCBs.

Metabolites related to gut bacterial metabolism, peroxisome proliferator-activated receptor- α activation, and insulin sensitivity are associated with physical function in functionally-limited older adults.

An integrative risk assessment approach for persistent chemicals: a case study on dioxins, furans and dioxin-like PCBs in France.

A mouse strain less responsive to dioxin-induced prostaglandin E2 synthesis is resistant to the onset of neonatal hydronephrosis.

Nitric oxide as a target for the hypotensive and vasorelaxing effects induced by (Z)-ethyl 12-nitrooxy-octadec-9-enoate in rats.

Monitoring chlorinated persistent organic pollutants in adolescents in Flanders (Belgium): concentrations, trends and dose-effect relationships (FLEHS II).

Burn after feeding. An old uncoupler of oxidative phosphorylation is redesigned for the treatment of nonalcoholic fatty liver disease.

Defining molecular sensors to assess long-term effects of pesticides on carcinogenesis.

Targeting mitochondria-derived reactive oxygen species to reduce epithelial barrier dysfunction and colitis.

Radiosynthesis, photoisomerization, biodistribution, and metabolite analysis of ¹¹C-PBB3 as a clinically useful PET probe for imaging of tau pathology.

Inhibition of human drug-metabolising cytochrome P450 and UDP-glucuronosyltransferase enzyme activities in vitro by uremic toxins.

Diet pills and the cataract outbreak of 1935: reflections on the evolution of consumer protection legislation.

Pesticide use and incident diabetes among wives of farmers in the Agricultural Health Study.

Estimated infant intake of persistent organic pollutants through breast milk in New Zealand.

Toxicological profile of ultrapure 2,2',3,4,4',5,5'-heptachlorobiphenyl (PCB 180) in adult rats.

Gestational and lactational exposure to the polychlorinated biphenyl mixture Aroclor 1254 modulates retinoid homeostasis in rat offspring.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on hormones of energy balance in a TCDD-sensitive and a TCDD-resistant rat strain.

Clinical and etiological heterogeneity in patients with tracheo-esophageal malformations and associated anomalies.

Sodium arsenite induces ROS-dependent autophagic cell death in pancreatic β^2 -cells.

Morphine glucuronidation increases its analgesic effect in guinea pigs.

Androgen receptor signaling in hepatocellular carcinoma and pancreatic cancers.

Pesticide methoxychlor promotes the epigenetic transgenerational inheritance of adult-onset disease through the female germline.

The association of uremic toxins and inflammation in hemodialysis patients.

Novel benzoxazine-based aglycones block glucose uptake in vivo by inhibiting glycosidases.

Aryl hydrocarbon receptor catabolic activity in bone metabolism is osteoclast dependent in vivo.

The chemical uncoupler 2,4-dinitrophenol (DNP) protects against diet-induced obesity and improves energy homeostasis in mice at thermoneutrality.

Interplay between Dioxin-mediated signaling and circadian clock: a possible determinant in metabolic homeostasis.

KML001 inhibits cell proliferation and invasion in pancreatic cancer cells through suppression of NF- κ B and VEGF-C.

Role of the autonomic nervous system and baroreflex in stress-evoked cardiovascular responses in rats.

Marginally excessive iron loading transiently blocks mucosal iron uptake in iron-deficient rats.

Dioxins, furans and dioxin-like PCBs in human blood: causes or consequences of diabetic nephropathy?

Postnatal development of eupneic ventilation and metabolism in rats chronically exposed to moderate hyperoxia.

Metabolites of tobacco smoking and colorectal cancer risk.

Obstetric and neonatal outcomes of maternal vitamin D supplementation: results of an open-label, randomized controlled trial of antenatal vitamin D supplementation in Pakistani women.

Mitochondrial dysfunction promotes and aggravates the inflammatory response in normal human synoviocytes.

Uremic toxins impair human bone marrow-derived mesenchymal stem cells functionality in vitro.

Production of the anti-inflammatory compound 6-O-palmitoyl-3-O- β -D-glucopyranosylcampesterol by Callus cultures of *Lopezia racemosa* Cav. (Onagraceae).

Cardiovascular disease relates to intestinal uptake of p-cresol in patients with chronic kidney disease.

Relationship between urine dichlorophenol levels and asthma morbidity.

Effects of acute dietary iron overload in pigs (*Sus scrofa*) with induced type 2 diabetes mellitus.

The metabolically healthy but obese phenotype is associated with lower plasma levels of persistent organic pollutants as compared to the metabolically abnormal obese phenotype.

Determinants of cognitive performance in children relying on cyanogenic cassava as staple food.

The cytochrome c oxidase and its mitochondrial function in the whiteleg shrimp *Litopenaeus vannamei* during hypoxia.

Elevated protein carbonyl and HIF-1 α levels in eyes with proliferative diabetic retinopathy.

Heritability and clinical determinants of serum indoxyl sulfate and p-cresyl sulfate, candidate biomarkers of the human microbiome enterotype.

Association of dioxin and other persistent organic pollutants (POPs) with diabetes: epidemiological evidence and new mechanisms of beta cell dysfunction.

Tetrachlorobenzoquinone induces acute liver injury, up-regulates HO-1 and NQO1 expression in mice model: the protective role of chlorogenic acid.

Protein-bound uremic toxins, inflammation and oxidative stress: a cross-sectional study in stage 3-4 chronic kidney disease.

Effects of the continuous intake of a milk drink containing *Lactobacillus casei* strain Shirota on abdominal symptoms, fecal microbiota, and metabolites in gastrectomized subjects.

Interaction between arsenic exposure from drinking water and genetic susceptibility in carotid intima-media thickness in Bangladesh.

Cisplatin plus sodium arsenite and hyperthermia induces pseudo-G1 associated apoptotic cell death in ovarian cancer cells.

The thiocarbamate disulphide drug, disulfiram induces osteopenia in rats by inhibition of osteoblast function due to suppression of acetaldehyde dehydrogenase activity.

Fruit and vegetable intake, as reflected by serum carotenoid concentrations, predicts reduced probability of polychlorinated biphenyl-associated risk for type 2 diabetes: National Health and Nutrition Examination Survey 2003-2004.

A single inhibitory upstream open reading frame (uORF) is sufficient to regulate *Candida albicans* GCN4 translation in response to amino acid starvation conditions.

The emerging role of Nrf2 in dermatotoxicology.

Activation of Nrf2 in keratinocytes causes chloracne (MADISH)-like skin disease in mice.

Alcohol-induced autophagy contributes to loss in skeletal muscle mass.

Homoisoflavanone prevents mast cell activation and allergic responses by inhibition of Syk signaling pathway.

Alcohol oxidizing enzymes and ethanol-induced cytotoxicity in rat pancreatic acinar AR42J cells.

The gut microbiome, kidney disease, and targeted interventions.

The aryl hydrocarbon receptor-activating effect of uremic toxins from tryptophan metabolism: a new concept to understand cardiovascular complications of chronic kidney disease.

Metabonomic analysis of quercetin against the toxicity of chronic exposure to low-level dichlorvos in rats via ultra-performance liquid chromatography-mass spectrometry.

In utero exposure to compounds with dioxin-like activity and birth outcomes.

Effect of uremic serum and uremic toxins on drug metabolism in human microsomes.

Urinary concentrations of dichlorophenol pesticides and obesity among adult participants in the U.S. National Health and Nutrition Examination Survey (NHANES) 2005-2008.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin modulates dysregulation of the lipid metabolism in mouse offspring fed a high-calorie diet.

Benzimidazoisoquinolines: a new class of rapidly metabolized aryl hydrocarbon receptor (AhR) ligands that induce AhR-dependent Tregs and prevent murine graft-versus-host disease.

Predominant role of cytosolic phospholipase A₂± in dioxin-induced neonatal hydronephrosis in mice.

Expression of Eya1 and Six1 is decreased in distal airways of rats with experimental pulmonary hypoplasia.

VEGF receptor expression decreases during lung development in congenital diaphragmatic hernia induced by nitrofen.

Micronuclei in cord blood lymphocytes and associations with biomarkers of exposure to carcinogens and hormonally active factors, gene polymorphisms, and gene expression: the NewGeneris cohort.

Exploration of novel predictive markers in rat plasma of the early stages of chronic renal failure.

Methylarsonous acid causes oxidative DNA damage in cells independent of the ability to biomethylate inorganic arsenic.

Pulmonary FGF9 gene expression is downregulated during the pseudoglandular stage in nitrofen-induced hypoplastic lungs.

The aryl hydrocarbon receptor mediates raloxifene-induced apoptosis in estrogen receptor-negative hepatoma and breast cancer cells.

Effects of intestinal bacteria-derived p-cresyl sulfate on Th1-type immune response in vivo and in vitro.

Mitochondrial dysfunction, oxidative stress, and neurodegeneration elicited by a bacterial metabolite in a *C. elegans* Parkinson's model.

Plastid-bearing sea slugs fix CO₂ in the light but do not require photosynthesis to survive.

CYP1B1: a unique gene with unique characteristics.

Sodium meta-arsenite ameliorates hyperglycemia in obese diabetic db/db mice by inhibition of hepatic gluconeogenesis.

Chemopreventive activity of turmeric essential oil and possible mechanisms of action.

What would you like to eat, Mr CKD Microbiota? A Mediterranean Diet, please!

Effect of dietary supplementation of (-)-epigallocatechin gallate on gut microbiota and biomarkers of colonic fermentation in rats.

[Role of the critical period in sex and brain differentiation: learning from dioxin-induced disorders in next generations].

Expansion of urease- and uricase-containing, indole- and p-cresol-forming and contraction of short-chain fatty acid-producing intestinal microbiota in ESRD.

In utero and lactational exposure to a mixture of environmental contaminants detected in Canadian Arctic human populations alters retinoid levels in rat offspring with low margins of exposure.

Gene-environment interactions in male reproductive health: special reference to the aryl hydrocarbon receptor signaling pathway.

Micronucleus frequency in copper-mine workers exposed to arsenic is modulated by the AS3MT Met287Thr polymorphism.

Ultrahigh resolution mass spectrometry-based metabolic characterization reveals cerebellum as a disturbed region in two animal models.

Maternal exposure to dioxin imprints sexual immaturity of the pups through fixing the status of the reduced expression of hypothalamic gonadotropin-releasing hormone.

Lack of nrf2 results in progression of proliferative lesions to neoplasms induced by long-term exposure to non-genotoxic hepatocarcinogens involving oxidative stress.

The toxic chemistry of methyl bromide.

Mutation spectra of Kras and Tp53 in urethral and lung neoplasms in B6C3F1 mice treated with 3,3',4,4'-tetrachloroazobenzene.

Metabolomics differentiation of canola genotypes: toward an understanding of canola allelochemicals.

Ligand binding and functional selectivity of L-tryptophan metabolites at the mouse aryl hydrocarbon receptor (mAHR).

A novel magnetic ionic liquid modified carbon nanotube for the simultaneous determination of aryloxyphenoxy-propionate herbicides and their metabolites in water.

In vitro propagation and analysis of secondary metabolites in *Glossogyne tenuifolia* (Hsiang-Ju) - a medicinal plant native to Taiwan.

Low concentration of a dioxin (2, 3, 7, 8 TCDD) affects the glycosidases and Acid phosphatase activity in mice hepatocytes.

Early-life Exposure to Endocrine Disrupting Chemicals and Later-life Health Outcomes: An Epigenetic Bridge?

[Medication use during the first trimester of pregnancy: drug safety and adoption of folic acid and ferrous sulphate].

Endocrine disruption in human placenta: expression of the dioxin-inducible enzyme, CYP1A1, is correlated with that of thyroid hormone-regulated genes.

Glufosinate binds N-methyl-D-aspartate receptors and increases neuronal network activity in vitro.

4-methylphenol produced in freshwater sediment microcosms is not a bisphenol A metabolite.

Inhibition of ROS production through mitochondria-targeted antioxidant and mitochondrial uncoupling increases post-thaw sperm viability in yellow catfish.

Chronic mitochondrial uncoupling treatment prevents acute cold-induced oxidative stress in birds.

Transcriptional responses and embryotoxic effects induced by pyrene and methylpyrene in Japanese medaka (*Oryzias latipes*) early life stages exposed to spiked sediments.

Liquid chromatography combined with atomic and molecular mass spectrometry for speciation of arsenic in chicken liver.

Metabolic pathway for degradation of 2-chloro-4-aminophenol by *Arthrobacter* sp. SPG.

2,3,4,7,8-Pentachlorodibenzofuran is far less potent than 2,3,7,8-tetrachlorodibenzo-p-dioxin in disrupting the pituitary-gonad axis of the rat fetus.

Association of PCB, PBDE and PCDD/F body burdens with hormone levels for children in an e-waste dismantling area of Zhejiang Province, China.

Cytotoxic effects exerted by pentachlorophenol by targeting nodal pro-survival signaling pathways in human pancreatic cancer cells.

Differential Fmo3 gene expression in various liver injury models involving hepatic oxidative stress in mice.

The effect of dietary tryptophan levels on oxidative stress of liver induced by diquat in weaned piglets.

Deiodinases and thyroid metabolism disruption in teleost fish.

Acute paraquat poisoning with sinus bradycardia: A case report.

High dose of prebiotics reduces fecal water cytotoxicity in healthy subjects.

Effects of Atrazine on Reproductive Health of Nondiabetic and Diabetic Male Rats.

Estrogen receptor β and aryl hydrocarbon receptor cross-talk in a transfected hepatoma cell line (HepG2) exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Photolytic degradation products of two highly brominated flame retardants cause cytotoxicity and mRNA expression alterations in chicken embryonic hepatocytes.

Epoxyalcohols: bioactivation and conjugation required for skin sensitization.

Exposure to difenoconazole, diclofop-methyl alone and combination alters oxidative stress and biochemical parameters in albino rats.

Human urinary biomarkers of dioxin exposure: analysis by metabolomics and biologically driven data dimensionality reduction.

Comparative proteomic analysis of ovary for Chinese rare minnow (*Gobiocypris rarus*) exposed to chlorophenol chemicals.

Quantitative analysis of volatile organic compounds released and consumed by rat L6 skeletal muscle cells in vitro.

4-Amino-2-chlorophenol: Comparative in vitro nephrotoxicity and mechanisms of bioactivation.

The role lipid aldehydes and ALEs in the pathogenesis of diabetic retinopathy.

Oxidative stress affects FET proteins localization and alternative pre-mRNA processing in cellular models of ALS.

A comparison of the *Caulobacter* NA1000 and K31 genomes reveals extensive genome rearrangements and differences in metabolic potential.

Differential susceptibility of human peripheral blood T cells to suppression by environmental levels of sodium arsenite and monomethylarsonous acid.

A metabonomic analysis of the effect of quercetin on toxicity induced by chronic exposure to low-level dichlorvos in rat plasma.

Increased expression of Fe-chelatase leads to increased metabolic flux into heme and confers protection against photodynamically induced oxidative stress.

Urinary VEGF and PGE2 levels and the association with arsenical metabolites in copper-smelting workers.

Species-specific considerations in using the fish embryo test as an alternative to identify endocrine disruption.

Estimates of heavy metal tolerance and chromium(VI) reducing ability of *Pseudomonas aeruginosa* CCTCC AB93066: chromium(VI) toxicity and environmental parameters optimization.

Endogenous aryl hydrocarbon receptor promotes basal and inducible expression of tumor necrosis factor target genes in MCF-7 cancer cells.

^{11}C -ORM-13070, a novel PET ligand for brain β_1 -adrenoceptors: radiometabolism, plasma pharmacokinetics, whole-body distribution and radiation dosimetry in healthy men.

TCDD induces the hypoxia-inducible factor (HIF)-1 α regulatory pathway in human trophoblastic JAR cells.

Critical electrolyte concentration of silk gland chromatin of the sugarcane borer *Diatraea saccharalis*, induced using agrochemicals.

Combination effects of (tri)azole fungicides on hormone production and xenobiotic metabolism in a human placental cell line.

Polychlorinated biphenyls (PCB 101, PCB 153 and PCB 180) alter leptin signaling and lipid metabolism in differentiated 3T3-L1 adipocytes.

Detection of cresyl phosphate-modified butyrylcholinesterase in human plasma for chemical exposure associated with aerotoxic syndrome.

Developmental neurotoxicity of 3,3',4,4'-tetrachloroazobenzene with thyroxine deficit: Sensitivity of glia and dentate granule neurons in the absence of behavioral changes.

Glyphosate poisoning with acute pulmonary edema.

[To the question of the optimization of methods for detection of vinyl chloride and 1,2-dichloroethane, and their metabolites in biological fluids in workers involved in production of polyvinyl chloride].

NADPH oxidase and the cardiovascular toxicity associated with smoking.

Serum dioxin concentrations and thyroid hormone levels in the Seveso Women's Health Study.

The combined treatment with chloroquine and the enzymatic oxidation products of spermine overcomes multidrug resistance of melanoma M14 ADR2 cells: a new therapeutic approach.

Luteolin modulates expression of drug-metabolizing enzymes through the AhR and Nrf2 pathways in hepatic cells.

Magnas functions as a ROS regulator and provides cytoprotection against oxidative stress-mediated damages.

Structure- and concentration-specific assessment of the physiological reactivity of α -dicarbonyl glucose degradation products in peritoneal dialysis fluids.

Mammalian cytochrome P450-dependent metabolism of polychlorinated dibenzo-p-dioxins and coplanar polychlorinated biphenyls.

Two-stage culture procedure using thidiazuron for efficient micropropagation of *Stevia rebaudiana*, an anti-diabetic medicinal herb.

Acute arsenic treatment alters arachidonic acid and its associated metabolite levels in the brain of C57Bl/6 mice.

Expression and functional regulation of the nuclear receptors AHR, PXR, and CAR, and the transcription factor Nrf2 in rat parotid gland.

Improved protocol for somatic embryogenesis and calcium alginate encapsulation in *Anethum graveolens* L.: a medicinal herb.

Blood biochemistry, thyroid hormones, and oxidant/antioxidant status of guinea pigs challenged with sodium arsenite or arsenic trioxide.

Arsenite-induced changes in hepatic protein abundance in cynomolgus monkeys (*Macaca fascicularis*).

Arsenic thiolation and the role of sulfate-reducing bacteria from the human intestinal tract.

Dioxin-induced retardation of development through a reduction in the expression of pituitary hormones and possible involvement of an aryl hydrocarbon receptor in this defect: a comparative study using two strains of mice with different sensitivities to dioxin.

Assessment of oxidative stress in serum by d-ROMs test.

Improving the in vitro ethoxyresorufin-O-deethylase (EROD) assay with RTL-W1 by metabolic normalization and use of β -naphthoflavone as the reference substance.

Arsenic exposure alters expression of cell cycle and lipid metabolism genes in the liver of adult zebrafish (*Danio rerio*).

Products of the Parkinson's disease-related glyoxalase DJ-1, D-lactate and glycolate, support mitochondrial membrane potential and neuronal survival.

Redox proteomics changes in the fungal pathogen *Trichosporon asahii* on arsenic exposure: identification of protein responses to metal-induced oxidative stress in an environmentally-sampled isolate.

Honeybee colony disorder in crop areas: the role of pesticides and viruses.

Evaluation of BDE-47 hydroxylation metabolic pathways based on a strong electron-withdrawing pentafluorobenzoyl derivatization gas chromatography/electron capture negative ionization quadrupole mass spectrometry.

FGF21 as a Hepatokine, Adipokine, and Myokine in Metabolism and Diseases.

Physiological and electrochemical effects of different electron acceptors on bacterial anode respiration in bioelectrochemical systems.

Development of an analytical strategy based on LC-MS/MS for the measurement of different classes of pesticides and their metabolites in meconium: application and characterisation of foetal exposure in France.

Application of metabolic engineering for the biotechnological production of L-valine.

A PET Tracer for Brain β -Adrenoceptors, (11)^C-ORM-13070: Radiosynthesis and Preclinical Evaluation in Rats and Knockout Mice.

Biomonitoring and hormone-disrupting effect biomarkers of persistent organic pollutants in vitro and ex vivo.

Fibroblast growth factor (Fgf) 21 is a novel target gene of the aryl hydrocarbon receptor (AhR).

Metabolic activation of the antibacterial agent triclocarban by cytochrome P450 1A1 yielding glutathione adducts.

Children's exposure to secondhand and thirdhand smoke carcinogens and toxicants in homes of hookah smokers.

Effects of uremic toxin p-cresol on proliferation, apoptosis, differentiation, and glucose uptake in 3T3-L1 cells.

Potential Use of Rice Field Cyanobacterium *Nostoc muscorum* in the Evaluation of Butachlor Induced Toxicity and their Degradation.

Enantioselective metabolism of quizalofop-ethyl in rat.

Tissue-Specific Metabolic Profile Study of *Moringa oleifera* L. Using Nuclear Magnetic Resonance Spectroscopy.

[Levels distribution and risk assessment of the indicator and dioxin-like polychlorinated biphenyls in ten different species of marine fish of Bohai Bay, China].

Environmentally persistent free radicals inhibit cytochrome P450 activity in rat liver microsomes.

RNA-Seq transcriptome analysis to identify genes involved in metabolism-based diclofop resistance in *Lolium rigidum*.

Assessment of re-aggregated human pancreatic islets for secondary drug screening.

Improving the efficiency of isolated microspore culture in six-row spring barley: II-exploring novel growth regulators to maximize embryogenesis and reduce albinism.

Antimutagenic potential and modulation of carcinogen-metabolizing enzymes by ginger essential oil.

Bifidobacterium fermented milk and galacto-oligosaccharides lead to improved skin health by decreasing phenols production by gut microbiota.

Nicotinamide nucleotide transhydrogenase (Nnt) links the substrate requirement in brain mitochondria for hydrogen peroxide removal to the thioredoxin/peroxiredoxin (Trx/Prx) system.

Guanosine regulates adenosine levels in the kidney.

Improving production of malonyl coenzyme A-derived metabolites by abolishing Snf1-dependent regulation of Acc1.

Glyphosate surfactant herbicide poisoning and management.

Relationship between dioxin and steroid hormones in sera of Vietnamese men.

Wild fish from the Bay of Quinte Area of Concern contain elevated tissue concentrations of PCBs and exhibit evidence of endocrine-related health effects.

Microbiome-derived tryptophan metabolites and their aryl hydrocarbon receptor-dependent agonist and antagonist activities.

Fish oil rich in eicosapentaenoic acid protects against oxidative stress-related renal dysfunction induced by TCDD in Wistar rats.

Monomethylated trivalent arsenic species disrupt steroid receptor interactions with their DNA response elements at non-cytotoxic cellular concentrations.

Novel resveratrol-based substrates for human hepatic, renal, and intestinal UDP-glucuronosyltransferases.

In Vitro Metabolism of Flucetosulfuron by Human Liver Microsomes.

Identification of a novel mitochondrial uncoupler that does not depolarize the plasma membrane.

Nucleoside 5'-phosphorothioate derivatives are highly effective neuroprotectants.

Analysis of hepatic deiodinase 2 mRNA levels in natural fish lake populations exposed to different levels of putative thyroid disrupters.

Roxarsone and its metabolites in chicken manure significantly enhance the uptake of As species by vegetables.

loxynil and tetrabromobisphenol A suppress thyroid-hormone-induced activation of transcriptional elongation mediated by histone modifications and RNA polymerase II phosphorylation.

In vivo effects of the pure aryl hydrocarbon receptor antagonist GNF-351 after oral administration are limited to the gastrointestinal tract.

A novel MDCKII in vitro model for assessing ABCG2-drug interactions and regulation of ABCG2 transport activity in the caprine mammary gland by environmental pollutants and pesticides.

Endocrine disrupting chemicals affect the gonadotropin releasing hormone neuronal network.

Cytotoxic clerodane diterpenes from *Zuelania guidonia*.

New branches in the degradation pathway of monochlorocatechols by *Aspergillus nidulans*: a metabolomics analysis.

Development of a convenient in vivo hepatotoxin assay using a transgenic zebrafish line with liver-specific DsRed expression.

Human urinary excretion of non-persistent environmental chemicals: an overview of Danish data collected between 2006 and 2012.

Transient overexpression of *adh8a* increases allyl alcohol toxicity in zebrafish embryos.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on secretion of steroids and STAR, HSD3B and CYP19A1 mRNA expression in chicken ovarian follicles.

Comparison of the in vivo and in vitro genotoxicity of glyphosate isopropylamine salt in three different organisms.

Oxidation of metabolites highlights the microbial interactions and role of *Acetobacter pasteurianus* during cocoa bean fermentation.

Simultaneous determination of saflufenacil and its two metabolites in soil samples by ultra-performance liquid chromatography with tandem mass spectrometry.

2, 3, 7, 8-Tetrachlorodibenzo-P-dioxin (TCDD) induces premature senescence in human and rodent neuronal cells via ROS-dependent mechanisms.

Mitochondrial uncoupling reduces exercise capacity despite several skeletal muscle metabolic adaptations.

Profiling of enantiopure drugs towards aryl hydrocarbon (AhR), glucocorticoid (GR) and pregnane X (PXR) receptors in human reporter cell lines.

Proteomic approach to reveal the regulatory function of aconitase *AcnA* in oxidative stress response in the antibiotic producer *Streptomyces viridochromogenes* TÅ¼494.

[Effect of synchronous perfusion of NaN₃ in changes in content of cholinergic neurotransmitter in medial prefrontal cortex and hippocampal extra-cellular fluid].

Hypoxia perturbs aryl hydrocarbon receptor signaling and CYP1A1 expression induced by PCB 126 in human skin and liver-derived cell lines.

Increases in levels of epoxyeicosatrienoic and dihydroxyeicosatrienoic acids (EETs and DHETs) in liver and heart in vivo by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and in hepatic EET:DHET ratios by cotreatment with TCDD and the soluble epoxide hydrolase inhibitor AUDA.

Evaluation of N-acetyl-cysteine against tetrachlorobenzoquinone-induced genotoxicity and oxidative stress in HepG2 cells.

Adaptive response of *Amphibacillus xylanus* to normal aerobic and forced oxidative stress conditions.

Response to metronidazole and oxidative stress is mediated through homeostatic regulator HsrA (HP1043) in *Helicobacter pylori*.

Mechanism for the protective effect of diallyl disulfide against cyclophosphamide acute urotoxicity in rats.

Lack of isocitrate lyase in *Chlamydomonas* leads to changes in carbon metabolism and in the response to oxidative stress under mixotrophic growth.

A stable and efficient *Agrobacterium tumefaciens*-mediated genetic transformation of the medicinal plant *Digitalis purpurea* L.

Methylated pentavalent arsenic metabolites are bifunctional inducers, as they induce cytochrome P450 1A1 and NAD(P)H:quinone oxidoreductase through AhR- and Nrf2-dependent mechanisms.

Urinary metabolites of a polycyclic aromatic hydrocarbon and volatile organic compounds in relation to lung cancer development in lifelong never smokers in the Shanghai Cohort Study.

Dissipation and residues of clethodim and its oxidation metabolites in a rape-field ecosystem using QuEChERS and liquid chromatography/tandem mass spectrometry.

Republished study: long-term toxicity of a Roundup herbicide and a Roundup-tolerant genetically modified maize.

Transcriptome-metabolome wide association study (TMWAS) of maneb and paraquat neurotoxicity reveals network level interactions in toxicologic mechanism.

History of Chemistry in the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK).

Chemoprevention against arsenic-induced mutagenic DNA breakage and apoptotic liver damage in rat via antioxidant and SOD1 upregulation by green tea (*Camellia sinensis*) which recovers broken DNA resulted from arsenic-H₂O₂ related in vitro oxidant stress.

Mutagenicity and antimutagenicity of hydrophilic and lipophilic extracts of Thai northern purple rice.

Field dissipation and storage stability of glufosinate ammonium and its metabolites in soil.

Effects of short term exposure of atrazine on the liver and kidney of normal and diabetic rats.

Influence of dioxin intoxication on the human system and possibilities of limiting its negative effects on the environment and living organisms.

Influence of zinc supplementation on histopathological changes in the stomach, liver, kidney, brain, pancreas and spleen during subchronic exposure of Wistar rats to glyphosate.

Effect of SP-A/B in lipoic acid on acute paraquat poisoning.

Levels and risk assessment of chemical contaminants in byproducts for animal feed in Denmark.

[2,4-dinitrophenol--a lethal weight reducing agent].

Alteration of ROS homeostasis and decreased lifespan in *S. cerevisiae* elicited by deletion of the mitochondrial translocator FLX1.

Effects on development, growth responses and thyroid-hormone systems in eyed-eggs and yolk-sac larvae of Atlantic salmon (*Salmo salar*) continuously exposed to 3,3',4,4'-tetrachlorobiphenyl (PCB-77).

Risk ranking priority of carcinogenic and/or genotoxic environmental contaminants in food in Belgium.

3,3',4,4'-Tetrachlorobiphenyl-mediated decrease of serum thyroxine level in C57BL/6 and DBA/2 mice occurs mainly through enhanced accumulation of thyroxine in the liver.

Uptake and metabolic effects of salicylic acid on the pulvinar motor cells of *Mimosa pudica* L.

Identification of arsenolipids and their degradation products in cod-liver oil.

Serum dioxin concentrations and bone density and structure in the Seveso Women's Health Study.

Oleic acid promotes adaptability against oxidative stress in 3T3-L1 cells through lipohormesis.

A moderate toxin, GraT, modulates growth rate and stress tolerance of *Pseudomonas putida*.

Detection, fate and transport of estrogen family hormones in soil.

More than meets the eye in bacterial cellulose: biosynthesis, bioprocessing, and applications in advanced fiber composites.

Isolation of a high malic and low acetic acid-producing sake yeast *Saccharomyces cerevisiae* strain screened from respiratory inhibitor 2,4-dinitrophenol (DNP)-resistant strains.

Antioxidant, mutagenic and antimutagenic activities of an aqueous extract of *Limoniastrum guyonianum* gall.

Diuron metabolites and urothelial cytotoxicity: in vivo, in vitro and molecular approaches.

A built-in strategy to mitigate transgene spreading from genetically modified corn.

[Cyanamide-ethanol reaction induced shock: report of a case and literature review].

Microcalorimetry: a powerful and original tool for tracking the toxicity of a xenobiotic on *Tetrahymena pyriformis*.

Oxidative stress as a mechanism for toxicity of 2,4-dichlorophenoxyacetic acid (2,4-D): studies with goldfish gills.

An F1-extended one-generation reproductive toxicity study in Crl:CD(SD) rats with 2,4-dichlorophenoxyacetic acid.

Accumulation, histopathological effects and response of biochemical markers in the spleens and head kidneys of common carp exposed to atrazine and chlorpyrifos.

Changes in cellular energy allocation in *Enchytraeus albidus* when exposed to dimethoate, atrazine, and carbendazim.

Dietary predictors of young children's exposure to current-use pesticides using urinary biomonitoring.

Thermally induced process-related contaminants: the example of acrolein and the comparison with acrylamide: opinion of the Senate Commission on Food Safety (SKLM) of the German Research Foundation (DFG).

Dopaminergic neurotoxicity of S-ethyl N,N-dipropylthiocarbamate (EPTC), molinate, and S-methyl-N,N-diethylthiocarbamate (MeDETC) in *Caenorhabditis elegans*.

Aldose reductase regulates acrolein-induced cytotoxicity in human small airway epithelial cells.

Effects of low-dose exposure to pesticide mixture on physiological responses of the Pacific oyster, *Crassostrea gigas*.

Benzothiazole aniline tetra(ethylene glycol) and 3-amino-1,2,4-triazole inhibit neuroprotection against amyloid peptides by catalase overexpression in vitro.

Ethoxylated adjuvants of glyphosate-based herbicides are active principles of human cell toxicity.

Glufosinate herbicide intoxication causing unconsciousness, convulsion, and 6th cranial nerve palsy.

Acrolein-induced oxidative stress in NAD(P)H Oxidase Subunit gp91phox knock-out mice and its modulation of NF- κ B and CD36.

Specific proteomic response of *Unio pictorum* mussel to a mixture of glyphosate and microcystin-LR.

Mechanisms of permanent loss of olfactory receptor neurons induced by the herbicide 2,6-dichlorobenzonitrile: effects on stem cells and noninvolvement of acute induction of the inflammatory cytokine IL-6.

Oxidative stress responses in zebrafish *Danio rerio* after subchronic exposure to atrazine.

Alterations in fatty acids of polar lipids in *Salmo trutta* on long-term exposure to a glyphosate-based herbicide (Roundup).

Thyroid endocrine system disruption by pentachlorophenol: an in vitro and in vivo assay.

Alachlor oxidation by the filamentous fungus *Paecilomyces marquandii*.

Currently used pesticides and their mixtures affect the function of sex hormone receptors and aromatase enzyme activity.

Evaluation of hydroxyatrazine in the endocrine disruptor screening and testing program's male and female pubertal protocols.

Methylene blue protects against paraquat-induced acute lung injury in rats.

Proteomic analysis of rat cerebral cortex following subchronic acrolein toxicity.

Effects of the glyphosate-based herbicide Roundup WeatherMax[®] on metamorphosis of wood frogs (*Lithobates sylvaticus*) in natural wetlands.

Effect of fluazifop-p-butyl treatment on pigments and polyamines level within tissues of non-target maize plants.

Comparisons of metabolic and physiological changes in rats following short term oral dosing with pesticides commonly found in food.

Evaluation of biochemical markers in the golden mussel *Limnoperna fortunei* exposed to glyphosate acid in outdoor microcosms.

Transient effects of 2,4-dichlorophenoxyacetic acid (2,4-D) exposure on some metabolic and free radical processes in goldfish white muscle.

Attic dust assessment near a wood treatment plant: past air pollution and potential exposure.

Enhanced herbicide metabolism induced by 2,4-D in herbicide susceptible *Lolium rigidum* provides protection against diclofop-methyl.

Short-term atrazine exposure causes behavioral deficits and disrupts monoaminergic systems in male C57BL/6 mice.

Glyphosate induces human breast cancer cells growth via estrogen receptors.

Changes in *Lumbriculus variegatus* metabolites under hypoxic exposure to benzo(a)pyrene, chlorpyrifos and pentachlorophenol: consequences on biotransformation.

Effect of safeners on damage of human erythrocytes treated with chloroacetamide herbicides.

Dynamics and environmental risk assessment of the herbicide glyphosate and its metabolite AMPA in a small vineyard river of the Lake Geneva catchment.

Climate change, multiple stressors, and the decline of ectotherms.

The oxidizing agent, paraquat, is more toxic to *Wolbachia* than to mosquito host cells.

Prognostic value of initial arterial lactate level and lactate metabolic clearance rate in patients with acute paraquat poisoning.

YjcC, a c-di-GMP phosphodiesterase protein, regulates the oxidative stress response and virulence of *Klebsiella pneumoniae* CG43.

The chiral herbicide beflubutamid (I): Isolation of pure enantiomers by HPLC, herbicidal activity of enantiomers, and analysis by enantioselective GC-MS.

Triazine herbicides and their chlorometabolites alter steroidogenesis in BLTK1 murine Leydig cells.

In vitro toxicological characterization of two arsenosugars and their metabolites.

Exposure to 2,4-dichlorophenoxyacetic acid alters glucose metabolism in immature rat Sertoli cells.

Pharmacokinetic, neurochemical, stereological and neuropathological studies on the potential effects of paraquat in the substantia nigra pars compacta and striatum of male C57BL/6J mice.

Alteration of lipid status and lipid metabolism, induction of oxidative stress and lipid peroxidation by 2,4-dichlorophenoxyacetic herbicide in rat liver.

Effects of water contamination on site selection by amphibians: experiences from an arena approach with European frogs and newts.

Influence of increasing temperature and salinity on herbicide toxicity in estuarine phytoplankton.

PACAP deficiency sensitizes nigrostriatal dopaminergic neurons to paraquat-induced damage and modulates central and peripheral inflammatory activation in mice.

Spinal transient receptor potential ankyrin 1 channel induces mechanical hypersensitivity, increases cutaneous blood flow, and mediates the pronociceptive action of dynorphin A.

CT imaging as a prognostic indicator for patients with pulmonary injury from acute paraquat poisoning.

Application of an amphibian (*Silurana tropicalis*) metamorphosis assay to the testing of the chronic toxicity of three rice paddy herbicides: simetryn, mefenacet, and thiobencarb.

Dietary supplementation with *Lactobacillus fermentum* I5007 improves the anti-oxidative activity of weanling piglets challenged with diquat.

Synergistic effects between pesticide stress and predator cues: conflicting results from life history and physiology in the damselfly *Enallagma cyathigerum*.

[Hormonotherapy for treating femoral head necrosis induced by paraquat poisoning: a report of 2 cases].

[Effect of glyphosate on the energy exchange in carp organs].

Caloric content of *Daphnia magna* as reflect of propanil stress during a short-term exposure and its relationship to long-term responses.

Pesticide-induced decrease in rat testicular steroidogenesis is differentially prevented by lipoate and tocopherol.

Assessing eco-toxicological effects of industrial 2,4-D acid iso-octylester herbicide on rat pancreas and liver.

Enantioselective physiological effects of the herbicide diclofop on cyanobacterium *Microcystis aeruginosa*.

Oral exposure to atrazine modulates hormone synthesis and the transcription of steroidogenic genes in male peripubertal mice.

Transcriptome alterations following developmental atrazine exposure in zebrafish are associated with disruption of neuroendocrine and reproductive system function, cell cycle, and carcinogenesis.

An evaluation of 2,4-dichlorophenoxyacetic acid in the Amphibian Metamorphosis Assay and the Fish Short-Term Reproduction Assay.

Drinking-water exposure to a mixture of nitrate and low-dose atrazine metabolites and small-for-gestational age (SGA) babies: a historic cohort study.

Goldfish can recover after short-term exposure to 2,4-dichlorophenoxyacetate: use of blood parameters as vital biomarkers.

Differential toxicity and gene expression in Caco-2 cells exposed to arsenic species.

Reduction of dimethylarsinic acid to the highly toxic dimethylarsinous acid by rats and rat liver cytosol.

Bioactivation of the nasal toxicant 2,6-dichlorobenzonitrile: an assessment of metabolic activity in human nasal mucosa and identification of indicators of exposure and potential toxicity.

Effects of glyphosate-based herbicides on embryo-larval development and metamorphosis in the Pacific oyster, *Crassostrea gigas*.

Effect of dietary treatment with dimethylarsinous acid (DMA(III)) on the urinary bladder epithelium of arsenic (+3 oxidation state) methyltransferase (As3mt) knockout and C57BL/6 wild type female mice.

In vitro toxicological characterisation of the S-containing arsenic metabolites thio-dimethylarsinic acid and dimethylarsinic glutathione.

[Neurotoxicity of pesticides: its relationship with neurodegenerative diseases].

Mutagenic/recombinogenic effects of four lipid peroxidation products in *Drosophila*.

Effects of quercetin on mRNA expression of steroidogenesis genes in primary cultures of Leydig cells treated with atrazine.

Periphyton responses to nutrient and atrazine mixtures introduced through agricultural runoff.

Response of *Lumbriculus variegatus* transcriptome and metabolites to model chemical contaminants.

Severe adverse effects related to dermal exposure to a glyphosate-surfactant herbicide.

Changes in differential gene expression in fibroblast cells from patients with triple A syndrome under oxidative stress.

The effect of stereochemistry on the biological activity of natural phytotoxins, fungicides, insecticides and herbicides.

Risk assessment of herbicides and booster biocides along estuarine continuums in the Bay of Vilaine area (Brittany, France).

Biochemical and molecular mechanisms of N-acetyl cysteine and silymarin-mediated protection against maneb- and paraquat-induced hepatotoxicity in rats.

Differentiation state-dependent effects of in vitro exposure to atrazine or its metabolite diaminochlorotriazine in a dopaminergic cell line.

Influence of diet with kale on lipid peroxides and malondialdehyde levels in blood serum of laboratory rats over intoxication with paraquat.

[Glyphosate and its formulations--toxicity, occupational and environmental exposure].

The effects of atrazine exposure on early life stages of common carp (*Cyprinus carpio*).

Functional analysis of the AKR4C subfamily of *Arabidopsis thaliana*: model structures, substrate specificity, acrolein toxicity, and responses to light and [CO(2)].

Renal replacement therapy in acute poisonings--one center experience.

Oral administration of pentachlorophenol induces interferon signaling mRNAs in C57BL/6 male mouse liver.

Cytoprotective effect of alpha-lipoic acid on paraquat-exposed human bronchial epithelial cells via activation of nuclear factor erythroid related factor-2 pathway.

Evaluation of the capacity of the cyanobacterium *Microcystis novacekii* to remove atrazine from a culture medium.

Thyroid disruption in the lizard *Podarcis bocagei* exposed to a mixture of herbicides: a field study.

Involvement of interleukin-6-regulated nitric oxide synthase in hemorrhagic cystitis and impaired bladder contractions in young rats induced by acrolein, a urinary metabolite of cyclophosphamide.

The antidote effect of quinone oxidoreductase 2 inhibitor against paraquat-induced toxicity in vitro and in vivo.

Oxidative stress in ventral prostate, ovary, and breast by 2,4-dichlorophenoxyacetic acid in pre- and postnatal exposed rats.

Arsenic metabolism efficiency has a causal role in arsenic toxicity: Mendelian randomization and gene-environment interaction.

Cigarette smoke induces systemic defects in cystic fibrosis transmembrane conductance regulator function.

Fluridone as a new anti-inflammatory drug.

Metabolic shift in lung alveolar cell mitochondria following acrolein exposure.

SLCO1B1 variants and urine arsenic metabolites in the Strong Heart Family Study.

Gene expression modulation by paraquat-induced oxidative stress conditions in *Paracoccidioides brasiliensis*.

Role of aldose reductase in the metabolism and detoxification of carnosine-acrolein conjugates.

Cinnamomum cassia essential oil inhibits α -MSH-induced melanin production and oxidative stress in murine B16 melanoma cells.

European corn borer (*Ostrinia nubilalis*) induced responses enhance susceptibility in maize.

Determination of urine 3-HPMA, a stable acrolein metabolite in a rat model of spinal cord injury.

Mitochondria-targeted antioxidant peptide SS31 protects the retinas of diabetic rats.

Chemical composition and hypoglycemic and pancreas-protective effect of leaf essential oil from indigenous cinnamon (*Cinnamomum osmophloeum* Kanehira).

Mutagenic activation reduces carcinogenic activity of ortho-aminoazotoluene for mouse liver.

Arsenic speciation in saliva of acute promyelocytic leukemia patients undergoing arsenic trioxide treatment.

Atrazine biodegradation efficiency, metabolite detection, and trzD gene expression by enrichment bacterial cultures from agricultural soil.

Liquid chromatography-diode array detection to study the metabolism of glufosinate in *Triticum aestivum* T-590 and influence of the genetic modification on its resistance.

Estimation of placental and lactational transfer and tissue distribution of atrazine and its main metabolites in rodent dams, fetuses, and neonates with physiologically based pharmacokinetic modeling.

Sorption and mineralization of S-metolachlor and its ionic metabolites in soils and vadose zone solids: consequences on groundwater quality in an alluvial aquifer (Ain Plain, France).

Carotenoid deficiency impairs ABA and IAA biosynthesis and differentially affects drought and cold tolerance in rice.

Transcript profiling of common bean nodules subjected to oxidative stress.

In vivo absorption, distribution, excretion, and metabolism of a new herbicide, methiozolin, in rats following oral administration.

[Study on the optimum combinations of plant hormone in callus culture of *Thermopsis lanceolata*].

Biomonitoring short- and long-term exposure to the herbicide terbuthylazine in agriculture workers and in the general population using urine and hair specimens.

Atrazine-induced elevation or attenuation of the LH surge in the ovariectomized, estrogen-primed female rat: role of adrenal progesterone.

Identification of a role for a mouse sperm surface aldo-keto reductase (AKR1B7) and its human analogue in the detoxification of the reactive aldehyde, acrolein.

Sethoxydim treatment inhibits lipid metabolism and enhances the accumulation of anthocyanins in rape (*Brassica napus* L.) leaves.

Opposite motor responses elicited by ethanol in the posterior VTA: the role of acetaldehyde and the non-metabolized fraction of ethanol.

Interaction of phthalates and phenoxy acid herbicide environmental pollutants with intestinal intracellular lipid binding proteins.

A vortex-assisted MSPD method for the extraction of pesticide residues from fish liver and crab hepatopancreas with determination by GC-MS.

Acetaldehyde-induced cytotoxicity involves induction of spermine oxidase at the transcriptional level.

In vitro intestinal bioavailability of arsenosugar metabolites and presystemic metabolism of thio-dimethylarsinic acid in Caco-2 cells.

Extension of *Sphingobium* sp. BHC-A to a 2,4,5-trichlorophenoxyacetic acid mineralizing strain by metabolic engineering.

Soil metabolism of [¹⁴C]methiozolin under aerobic and anaerobic flooded conditions.

The chiral herbicide beflubutamid (II): Enantioselective degradation and enantiomerization in soil, and formation/degradation of chiral metabolites.

Low environmentally relevant levels of bioactive xenobiotics and associated degradation products cause cryptic perturbations of metabolism and molecular stress responses in *Arabidopsis thaliana*.

Semi-automated solid phase extraction method for the mass spectrometric quantification of 12 specific metabolites of organophosphorus pesticides, synthetic pyrethroids, and select herbicides in human urine.

Dissipation of clodinafop-propargyl and its metabolite in wheat field ecosystem.

Automated SPME-GC-MS monitoring of headspace metabolomic responses of *E. coli* to biologically active components extracted by the coating.

Enzyme inhibitor studies reveal complex control of methyl-D-erythritol 4-phosphate (MEP) pathway enzyme expression in *Catharanthus roseus*.

Integrated transcriptomic and metabolomic analysis of the central metabolism of *Synechocystis* sp. PCC 6803 under different trophic conditions.

Post-translational control of nitrate reductase activity responding to light and photosynthesis evolved already in the early vascular plants.

Carbon source utilization profiles suggest additional metabolic interactions in a synergistic linuron-degrading bacterial consortium.

Enhanced rates of herbicide metabolism in low herbicide-dose selected resistant *Lolium rigidum*.

GH3 expression and IAA-amide synthetase activity in pea (*Pisum sativum* L.) seedlings are regulated by light, plant hormones and auxinic herbicides.

Inhibitors of hydroperoxide metabolism enhance ascorbate-induced cytotoxicity.

Screening of endocrine-disrupting phenols, herbicides, steroid estrogens, and estrogenicity in drinking water from the waterworks of 35 Italian cities and from PET-bottled mineral water.

Agropyrenol, a phytotoxic fungal metabolite, and its derivatives: a structure-activity relationship study.

Acrolein and chloroacetaldehyde: an examination of the cell and cell-free biomarkers of toxicity.

In planta mechanism of action of leptospermon: impact of its physico-chemical properties on uptake, translocation, and metabolism.

Differential regulation of GLUT1 activity in human corneal limbal epithelial cells and fibroblasts.

Metabolic flux ratio analysis and multi-objective optimization revealed a globally conserved and coordinated metabolic response of *E. coli* to paraquat-induced oxidative stress.

The response of *Mucor plumbeus* to pentachlorophenol: a toxicoproteomics study.

Direct determination of glyphosate and its major metabolite, aminomethylphosphonic acid, in fruits and vegetables by mixed-mode hydrophilic interaction/weak anion-exchange liquid chromatography coupled with electrospray tandem mass spectrometry.

Atrazine inhibits pulsatile gonadotropin-releasing hormone (GnRH) release without altering GnRH messenger RNA or protein levels in the female rat.

Metabolism of quizalofop and rimsulfuron in herbicide resistant grain sorghum.

Simultaneous LC-MS/MS analysis of glyphosate, glufosinate, and their metabolic products in beer, barley tea, and their ingredients.

Uptake of arsenic species by turnip (*Brassica rapa* L.) and lettuce (*Lactuca sativa* L.) treated with roxarsone and its metabolites in chicken manure.

The herbicide glyphosate and its metabolite AMPA in the Lavaux vineyard area, western Switzerland: proof of widespread export to surface waters. Part II: the role of infiltration and surface runoff.

The herbicide glyphosate and its metabolite AMPA in the Lavaux vineyard area, Western Switzerland: proof of widespread export to surface waters. Part I: method validation in different water matrices.

Effects of cyanamide, an aldehyde dehydrogenase type 2 inhibitor, on glyceryl trinitrate- and isosorbide dinitrate-induced vasodilation in rabbit excised aorta and in anesthetized whole animal.

Persistence of herbicide fenoxaprop ethyl and its acid metabolite in soil and wheat crop under Indian tropical conditions.

The relationships between pesticide metabolites and neurobehavioral test performance in the third National Health and Nutrition Examination Survey.

Assays for the measurement of lipid peroxidation.

Propionate addition enhances the biodegradation of the xenobiotic herbicide propanil and its metabolite.

Comparing metabolic functionalities, community structures, and dynamics of herbicide-degrading communities cultivated with different substrate concentrations.

The neurological effects of methyl bromide intoxication.

Malabsorption anemia and iron supplement induced constipation in post-Roux-en-Y gastric bypass (RYGB) patients.

Calcium and magnesium elimination enhances accumulation of cardenolides in callus cultures of endemic *Digitalis* species of Turkey.

Thiamin diphosphate-dependent enzymes: from enzymology to metabolic regulation, drug design and disease models.

Mechanical ventilation causes pulmonary mitochondrial dysfunction and delayed alveolarization in neonatal mice.

Dioxin and estrogen signaling in lung adenocarcinoma cells with different aryl hydrocarbon receptor/estrogen receptor \pm phenotypes.

Bone remodelling is reduced by recovery from iron-deficiency anaemia in premenopausal women.

Role of mitogen-activated protein kinase cascades in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced apoptosis in neuronal pheochromocytoma cells.

Oxidative DNA damage and in vivo mutagenicity caused by reactive oxygen species generated in the livers of p53-proficient or -deficient gpt delta mice treated with non-genotoxic hepatocarcinogens.

Arsenic exposure affects plasma insulin-like growth factor 1 (IGF-1) in children in rural Bangladesh.

Does the adequacy parameter $Kt/V(\text{urea})$ reflect uremic toxin concentrations in hemodialysis patients?

Reversal of hypertriglyceridemia, fatty liver disease, and insulin resistance by a liver-targeted mitochondrial uncoupler.

Stability and performance of rapid-acting insulin analogs used for continuous subcutaneous insulin infusion: a systematic review.

Kidney hypoxia, attributable to increased oxygen consumption, induces nephropathy independently of hyperglycemia and oxidative stress.

Expression of Sproutys and SPREDs is decreased during lung branching morphogenesis in nitrofen-induced pulmonary hypoplasia.

New insights into the aryl hydrocarbon receptor as a modulator of host responses to infection.

In vitro-in vivo correlations for endocrine activity of a mixture of currently used pesticides.

Metabonomic study on the biochemical response of spontaneously hypertensive rats to chronic taurine supplementation using $(1)H$ NMR spectroscopic urinalysis.

Protein-bound uremic toxins – new targets to prevent insulin resistance and dysmetabolism in patients with chronic kidney disease.

Maintaining energy homeostasis is an essential component of Wld(S)-mediated axon protection.

Ets1 and heat shock factor 1 regulate transcription of the Transformer 2¹² gene in human colon cancer cells.

Association between blood levels of PCDDs/PCDFs/dioxin-like PCBs and history of allergic and other diseases in the Japanese population.

Comparisons of differential gene expression elicited by TCDD, PCB126, 1²NF, or ICZ in mouse hepatoma Hepa1c1c7 cells and C57BL/6 mouse liver.

Relationships between in vitro lymphoproliferative responses and levels of contaminants in blood of free-ranging adult harbour seals (*Phoca vitulina*) from the North Sea.

Gender-specific metabolomic profiling of obesity in leptin-deficient ob/ob mice by 1H NMR spectroscopy.

Hypothyroidism and pesticide use among male private pesticide applicators in the agricultural health study.

Control of konzo by detoxification of cassava flour in three villages in the Democratic Republic of Congo.

A population-based case-control study of urinary arsenic species and squamous cell carcinoma in New Hampshire, USA.

Plasma and urine metabolic fingerprinting of type 1 diabetic children.

Reduction of CC-chemokine ligand 5 by aryl hydrocarbon receptor ligands.

Rapid desensitization induces internalization of antigen-specific IgE on mouse mast cells.

[Role of iron in the treatment of attention deficit-hyperactivity disorder].

[Chronic combined effects of fluoride and arsenite on the Runx2 and downstream related factors of bone metabolism in rats].

Persistent organic pollutants and hyperuricemia in the U.S. general population.

Associations between plasma persistent organic pollutant levels and blood pressure in Inuit adults from Nunavik.

Neuroprotective effects of nicotinamide N-methyltransferase and its metabolite 1-methylnicotinamide.

Synthesis and evaluation of 1-[2-(4-[(11)C]methoxyphenyl)phenyl]piperazine for imaging of the serotonin 5-HT₇ receptor in the rat brain.

Low-dose food contaminants trigger sex-specific, hepatic metabolic changes in the progeny of obese mice.

Numerous protein-bound solutes are cleared by the kidney with high efficiency.

Relative efficacies of insulin and poly (lactic-co-glycolic) acid encapsulated nano-insulin in modulating certain significant biomarkers in arsenic intoxicated L6 cells.

Plasma p-cresol lowering effect of sevelamer in peritoneal dialysis patients: evidence from a Cross-Sectional Observational Study.

CYP19 expression is induced by 2,3,7,8-tetrachloro-dibenzo-para-dioxin in human glioma cells.

Addressing historic environmental exposures along the Alaska Highway.

Effect of huanglianjiedu tang on fever in rats induced by 2, 4-dinitrophenol.

Diabetes, metabolic syndrome, and obesity in relation to serum dioxin concentrations: the Seveso women's health study.

Proteomic analysis of primary cultured rat cortical neurons in chemical ischemia.

Individuals' half-lives for 2,3,4,7,8-penta-chlorodibenzofuran (PeCDF) in blood: correlation with clinical manifestations and laboratory results in subjects with Yusho.

Malassezia yeasts produce a collection of exceptionally potent activators of the Ah (dioxin) receptor detected in diseased human skin.

Role of the Toll Like receptor (TLR) radical cycle in chronic inflammation: possible treatments targeting the TLR4 pathway.

Sensitizing capacity of Disperse Orange 1 and its potential metabolites from azo reduction and their cross-reactivity pattern.

Hyperuricemia after exposure to polychlorinated dibenzo-p-dioxins and dibenzofurans near a highly contaminated area.

Renal metabolic profiling of early renal injury and renoprotective effects of Poria cocos epidermis using UPLC Q-TOF/HSMS/MSE.

A prospective study of arsenic exposure, arsenic methylation capacity, and risk of cardiovascular disease in Bangladesh.

Evaluation of the association between persistent organic pollutants (POPs) and diabetes in epidemiological studies: a national toxicology program workshop review.

Proteomic analysis of arsenic-exposed zebrafish (*Danio rerio*) identifies altered expression in proteins involved in fibrosis and lipid uptake in a gender-specific manner.

Novel cell-based assay reveals associations of circulating serum AhR-ligands with metabolic syndrome and mitochondrial dysfunction.

Abscisic Acid Promotes Susceptibility to the Rice Leaf Blight Pathogen *Xanthomonas oryzae pv oryzae* by Suppressing Salicylic Acid-Mediated Defenses.

Does p-cresylglucuronide have the same impact on mortality as other protein-bound uremic toxins?

Levels of pesticides and their metabolites in Wistar rat amniotic fluids and maternal urine upon gestational exposure.

Iron plays a certain role in patterned hair loss.

Monitoring of deiodinase deficiency based on transcriptomic responses in SH-SY5Y cells.

The human Ah receptor: hints from dioxin toxicities to deregulated target genes and physiological functions.

Multidrug resistance protein 1 (ABCC1) confers resistance to arsenic compounds in human myeloid leukemic HL-60 cells.

Metabolism of arsenic and its toxicological relevance.

Dioxin-like compounds are not associated with bone strength measured by ultrasonography in Inuit women from Nunavik (Canada): results of a cross-sectional study.

Circulating levels of persistent organic pollutants (POPs) are associated with left ventricular systolic and diastolic dysfunction in the elderly.

Action of hexachlorobenzene on tumor growth and metastasis in different experimental models.

Teratogenic effects of 4-nonylphenol on early embryonic and larval development of the catfish *Heteropneustes fossilis*.

The aryl hydrocarbon receptor: a novel target for immunomodulation in organ transplantation.

Gastrointestinal stromal tumors, somatic mutations and candidate genetic risk variants.

The changes in dioxin concentrations in the blood of Yusho patients from 2004 to 2010.

Development of a newly large-volume injection system for dioxin determinations in blood of Yusho patients.

[Serum levels of IL-10 and IL-35 in Yusho patients].

[Serum levels of IL-21 and TGF-beta in the Yusho patients].

[Relationships between concentrations of dioxin isomers and symptoms, and among concentrations and half-lives of dioxin isomers, in patients with Yusho disease].

Aryl hydrocarbon receptor and lung cancer.

Exposure to persistent organic pollutants and risk of hypertension among Inuit from Greenland.

The influence of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on hematological parameters during experimentally induced pleuritis in rats.

An integrated plasma and urinary metabolomic study using UHPLC-MS: intervention effects of *Epimedium koreanum* on 'Kidney-Yang Deficiency syndrome' rats.

Inhibition of constitutive aryl hydrocarbon receptor (AhR) signaling attenuates androgen independent signaling and growth in (C4-2) prostate cancer cells.

Differences in urinary arsenic metabolites between diabetic and non-diabetic subjects in Bangladesh.

Role of hepatic and pancreatic oxidative stress in arsenic induced diabetic condition in Wistar rats.

Exhaled breath and fecal volatile organic biomarkers of chronic kidney disease.

Impaired mitochondrial metabolism and mammary carcinogenesis.

Evaluation of gene expression changes in human primary uroepithelial cells following 24-hr exposures to inorganic arsenic and its methylated metabolites.

Peripheral neuropathy due to dinitrophenol used for weight loss: something old, something new.

Intrarenal metabolomic investigation of chronic kidney disease and its TGF- β 1 mechanism in induced-adenine rats using UPLC Q-TOF/HSMS/MS(E).

Blood levels of PCDDs, PCDFs, and coplanar PCBs in Yusho mothers and their descendants: association with fetal Yusho disease.

Chemical genetics of acetyl-CoA carboxylases.

Dioxin suppresses benzo[a]pyrene-induced mutations and DNA adduct formation through cytochrome P450 1A1 induction and (\pm)-anti-benzo[a]pyrene-7,8-diol-9,10-epoxide inactivation in human hepatoma cells.

The effect of cigarette smoke and arsenic exposure on urothelial carcinoma risk is modified by glutathione S-transferase M1 gene null genotype.

Cultured human peripheral blood mononuclear cells alter their gene expression when challenged with endocrine-disrupting chemicals.

Dynamics of organohalogenated contaminants in human serum from obese individuals during one year of weight loss treatment.

A computational approach to chemical etiologies of diabetes.

The role of aryl hydrocarbon receptor-regulated cytochrome P450 enzymes in glioma.

Increased kidney metabolism as a pathway to kidney tissue hypoxia and damage: effects of triiodothyronine and dinitrophenol in normoglycemic rats.

Correlations between BRCA1 defect and environmental factors in the risk of breast cancer.

Successful treatment of severe iron intoxication with gastrointestinal decontamination, deferoxamine, and hemodialysis.

Interactions between urinary 4-tert-octylphenol levels and metabolism enzyme gene variants on idiopathic male infertility.

2,3,7,8-Tetrachlorodibenzo-p-dioxin promotes BHV-1 infection in mammalian cells by interfering with iron homeostasis regulation.

A genetically encoded FRET lactate sensor and its use to detect the Warburg effect in single cancer cells.

Warburg and Crabtree effects in premalignant Barrett's esophagus cell lines with active mitochondria.

Basolateral invasion and trafficking of *Campylobacter jejuni* in polarized epithelial cells.

In vivo efficacy of ferrihydrite as an enterosorbent for arsenic: short-term evaluation in rodents.

Polybrominated diphenyl ethers alter hepatic phosphoenolpyruvate carboxykinase enzyme kinetics in male Wistar rats: implications for lipid and glucose metabolism.

p-Cresyl sulfate promotes insulin resistance associated with CKD.

Iron autointoxication in a 16-year-old girl: a protective role for hepcidin?

Uremic toxins inhibit renal metabolic capacity through interference with glucuronidation and mitochondrial respiration.

TCDD-elicited effects on liver, serum, and adipose lipid composition in C57BL/6 mice.

Dioxins: diagnostic and prognostic challenges arising from complex mechanisms.

Metabolomics reveals differential levels of oral metabolites in HIV-infected patients: toward novel diagnostic targets.

Effect of metabolic inhibitors on growth and carotenoid production in *Dunaliella bardawil*.

Utilizing toxicogenomic data to understand chemical mechanism of action in risk assessment.

Construction and characterization of peroxisome proliferator-activated receptor-gamma co-activator 1 alpha (PGC-1 α) over-expressing cell line derived from human hepatocyte carcinoma HepG2 cells).

Mitochondria-targeted antioxidants and metabolic modulators as pharmacological interventions to slow ageing.

Vanadium toxicity in mice: possible impairment of lipid metabolism and mucosal epithelial cell necrosis in the small intestine.

Inhibition of hepatocyte nuclear factor 1 and 4 alpha (HNF1 α and HNF4 α) as a mechanism of arsenic carcinogenesis.

The relationship between dioxins and salivary steroid hormones in Vietnamese primiparae.

Complete genome, catabolic sub-proteomes and key-metabolites of *Desulfobacula toluolica* Tol2, a marine, aromatic compound-degrading, sulfate-reducing bacterium.

Linkages between the life-history evolution of tropical and temperate birds and the resistance of cultured skin fibroblasts to oxidative and non-oxidative chemical injury.

Biotransformation of BDE-47 to potentially toxic metabolites is predominantly mediated by human CYP2B6.

Surface fluorescence studies of tissue mitochondrial redox state in isolated perfused rat lungs.

AhR-mediated changes in global gene expression in rat liver progenitor cells.

Comparison of TCDD-elicited genome-wide hepatic gene expression in Sprague-Dawley rats and C57BL/6 mice.

Monolithic columns in plant proteomics and metabolomics.

Sequential determination of metabolites involved in the biosynthesis of aromatic amino acids after ultrasound-assisted extraction from plants and reverse LC separation.

Contrasting retinoid and thyroid hormone status in differentially-contaminated northern fulmar colonies from the Canadian Arctic, Svalbard and the Faroe Islands.

Characterization of the carrier-mediated transport of ketoprofen, a nonsteroidal anti-inflammatory drug, in rabbit corneal epithelium cells.

Simultaneous monitoring of seven phenolic metabolites of endocrine disrupting compounds (EDC) in human urine using gas chromatography with tandem mass spectrometry.

Testosterone protects female embryonic heart H9c2 cells against severe metabolic stress by activating estrogen receptors and up-regulating IES SUR2B.

The toxicity of the N-hydroxy and 6-hydroxy metabolites of 3,4-dichloropropionanilide does not depend on calcium release-activated calcium channel inhibition.

Investigation of ifosfamide nephrotoxicity induced in a liver-kidney co-culture biochip.

2,3,7,8-Tetrachlorodibenzo-p-dioxin enhances CCl₄-induced hepatotoxicity in an aryl hydrocarbon receptor-dependent manner.

Predicting fish acute toxicity using a fish gill cell line-based toxicity assay.

A multimethod for the determination of 150 pesticide metabolites in surface water and groundwater using direct injection liquid chromatography-mass spectrometry.

Metabolic characteristics of the species *Variovorax paradoxus*.

Distribution variation of a metabolic uncoupler, 2,6-dichlorophenol (2,6-DCP) in long-term sludge culture and their effects on sludge reduction and biological inhibition.

Aldo-keto reductases mediate constitutive and inducible protection against aldehyde toxicity in human neuroblastoma SH-SY5Y cells.

Levels of PCBs in wild bird eggs: considering toxicity through enzyme induction potential and molecular structure.

Evolutionary, genetic, environmental and hormonal-induced plasticity in the fate of organs arising from axillary meristems in *Passiflora* spp.

Effects of butachlor on reproduction and hormone levels in adult zebrafish (*Danio rerio*).

Visible light alters yeast metabolic rhythms by inhibiting respiration.

Toxicity of polyamines and their metabolic products.

The synthesis and biodistribution of [(11)C]metformin as a PET probe to study hepatobiliary transport mediated by the multi-drug and toxin extrusion transporter 1 (MATE1) in vivo.

Seed germination-influencing bioactive secondary metabolites secreted by the endophyte *Cladosporium cladosporioides* LWL5.

[Classical oxazaphosphorines--metabolism and therapeutic properties--new implications].

Glyphosate, pathways to modern diseases II: Celiac sprue and gluten intolerance.

Demonstration of ATP-dependent, transcellular transport of lipid across the lymphatic endothelium using an in vitro model of the lacteal.

Effect of selenomethionine supplementation in food on the excretion and toxicity of arsenic exposure in female mice.

Metabolism of L-methionine linked to the biosynthesis of volatile organic sulfur-containing compounds during the submerged fermentation of *Tuber melanosporum*.

A single gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin disrupts the adult uterine response to estradiol in mice.

Effects of oral anorexiant sibutramine on the expression of cytochromes P450s in human hepatocytes and cancer cell lines.

Structure-activity relationship of selected meta- and para-hydroxylated non-dioxin like polychlorinated biphenyls: from single RyR1 channels to muscle dysfunction.

Biomonitoring of non-dioxin-like polychlorinated biphenyls in transgenic *Arabidopsis* using the mammalian pregnane X receptor system: a role of pectin in pollutant uptake.

Characterization of bladder sensory neurons in the context of myelination, receptors for pain modulators, and acute responses to bladder inflammation.

Imidazolium-based ionic liquid-type surfactant as pseudostationary phase in micellar electrokinetic chromatography of highly hydrophilic urinary nucleosides.

Degradation of 2,4-dinitroanisole (DNAN) by metabolic cooperative activity of *Pseudomonas* sp. strain FK357 and *Rhodococcus imtechensis* strain RKJ300.

The aryl receptor inhibitor epigallocatechin-3-gallate protects INS-1E beta-cell line against acute dioxin toxicity.

Dioxin pollution disrupts reproduction in male Japanese field mice.

Biomarkers of oral exposure to 3-nitro-1,2,4-triazol-5-one (NTO) and 2,4-dinitroanisole (DNAN) in blood and urine of rhesus macaques (*Macaca mulatta*).

Effective synthesis of sulfate metabolites of chlorinated phenols.

Military risk factors for cognitive decline, dementia and Alzheimer's disease.

Stereoselective toxicity and metabolism of lactofen in primary hepatocytes from rat.

Gastrointestinal stromal tumors: a case-only analysis of single nucleotide polymorphisms and somatic mutations.

670 nm light mitigates oxygen-induced degeneration in C57BL/6J mouse retina.

Assessment of arsenic exposure by measurement of urinary speciated inorganic arsenic metabolites in workers in a semiconductor manufacturing plant.

A novel ion pairing LC/MS metabolomics protocol for study of a variety of biologically relevant polar metabolites.

Potential role of epigenetic mechanisms in the regulation of drug metabolism and transport.

Emerging pesticide metabolites in groundwater and surface water as determined by the application of a multimethod for 150 pesticide metabolites.

p-Cresyl sulfate induces osteoblast dysfunction through activating JNK and p38 MAPK pathways.

Luteinizing hormone receptor (*Lhcgr*) as a marker gene for characterizing estrogenic endocrine-disrupting chemicals in zebrafish ovarian follicle cells.

Urinary glycol ether metabolites in women and time to pregnancy: the PELAGIE cohort.

Metabolomic characterization of rhubarb species by capillary electrophoresis and ultra-high-pressure liquid chromatography.

Resveratrol stimulates mitochondrial bioenergetics to protect retinal pigment epithelial cells from oxidative damage.

Gene expression and pathologic alterations in juvenile rainbow trout due to chronic dietary TCDD exposure.

In vitro neuroendocrine effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the AhR-expressing hypothalamic rat GnV-3 cell line.

Waterborne exposure of zebrafish embryos to micromole concentrations of ioxynil and diethylstilbestrol disrupts thyrocyte development.

Serum arylhydrocarbon receptor transactivating activity is elevated in type 2 diabetic patients with diabetic nephropathy.

Sexually dimorphic behavior after developmental exposure to characterize endocrine-mediated effects of different non-dioxin-like PCBs in rats.

The position of imidazopyridine and metabolic activation are pivotal factors in the antimutagenic activity of novel imidazo[1,2-a]pyridine derivatives.

Hyperglycaemia and oxidative stress upregulate HSP60 & HSP70 expression in HeLa cells.

Chemistry of the sternal gland secretion of the Mediterranean centipede *Himantarium gabrielis* (Linnaeus, 1767) (Chilopoda: Geophilomorpha: Himantariidae).

NDL-PCBs in muscle of the European catfish (*Silurus glanis*): an alert from Italian rivers.

The aryl hydrocarbon receptor interacts with nuclear factor erythroid 2-related factor 2 to mediate induction of NAD(P)H:quinoneoxidoreductase 1 by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Assessing effects of environmental chemicals on neuroendocrine systems: potential mechanisms and functional outcomes.

Quantitative and qualitative differences in the metabolism of pesticides in biobed substrates and soil.

Effects of endocrine disrupting chemicals on in vitro global DNA methylation and adipocyte differentiation.

Perinatal exposure to purity-controlled polychlorinated biphenyl 52, 138, or 180 alters toxicogenomic profiles in peripheral blood of rats after 4 months.

Emerging causes of iron deficiency anemia refractory to oral iron supplementation.

Influence of GSTT1 Genetic Polymorphisms on Arsenic Metabolism.

Serum metabolomic perturbations among workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Evaluating effects of penicillin treatment on the metabolome of rats.

Cell to organ: physiological, immunotoxic and oxidative stress responses of *Lamellidens marginalis* to inorganic arsenite.

Relative effect potency estimates of dioxin-like activity for dioxins, furans, and dioxin-like PCBs in adults based on two thyroid outcomes.

Biomarkers of toluene exposure in rats: mercapturic acids versus traditional indicators (urinary hippuric acid and o-cresol and blood toluene).

Tandem enzymatic oxygenations in biosynthesis of epoxyquinone pharmacophore of manumycin-type metabolites.

Transjecting growth hormone: continuous nightmare or controlled nuisance? Evaluation of a new needle-free device.

Bridging the gap between gene expression and metabolic phenotype via kinetic models.

Metformin increases mitochondrial energy formation in L6 muscle cell cultures.

Microbial-mammalian cometabolites dominate the age-associated urinary metabolic phenotype in Taiwanese and American populations.

Statistically enhanced spectral counting approach to TCDD cardiac toxicity in the adult zebrafish heart.

Study the catalyzing mechanism of dissolved redox mediators on bio-denitrification by metabolic inhibitors.

Oxidative DNA damage after acute exposure to arsenite and monomethylarsonous acid in biomethylation-deficient human cells.

Persistent toxic burdens of halogenated phenolic compounds in humans and wildlife.

Arsenic speciation in the blood of arsenite-treated F344 rats.

External inorganic N source enhances the uptake of As species in garland chrysanthemum (*C. coronarium*) amended with chicken manure bearing roxarsone and its metabolites.

Cyp1a reporter zebrafish reveals target tissues for dioxin.

Mitochondrial targeting of mouse NQO1 and CYP1B1 proteins.

The role of p38 in mitochondrial respiration in male and female mice.

Genetic association of aromatic hydrocarbon receptor (AHR) and cytochrome P450, family 1, subfamily A, polypeptide 1 (CYP1A1) polymorphisms with dioxin blood concentrations among pregnant Japanese women.

A screen for disruptors of the retinol (vitamin A) signaling pathway.

Physiological roles of mycothiol in detoxification and tolerance to multiple poisonous chemicals in *Corynebacterium glutamicum*.

Dietary carnosine prevents early atherosclerotic lesion formation in apolipoprotein E-null mice.

Physiology and toxicology of hormone-disrupting chemicals in higher plants.

Dietary exposure of juvenile female mice to polyhalogenated seafood contaminants (HBCD, BDE-47, PCB-153, TCDD): comparative assessment of effects in potential target tissues.

Protective effect of conjugated linolenic acid isomers present in vegetable oils against arsenite-induced renal toxicity in rat model.

Cold response of dedifferentiated barley cells at the gene expression, hormone composition, and freezing tolerance levels: studies on callus cultures.

Metabolomic profiling of in vivo plasma responses to dioxin-associated dietary contaminant exposure in rats: implications for identification of sources of animal and human exposure.

Anti-neurotrophic effects from autoantibodies in adult diabetes having primary open angle glaucoma or dementia.

The atrazine metabolite diaminochlorotriazine suppresses LH release from murine L \hat{H}^2 T2 cells by suppressing GnRH-induced intracellular calcium transients.

[On seeds and synthetic metabolism].

A novel dominant selectable system for the selection of transgenic plants under in vitro and greenhouse conditions based on phosphite metabolism.

AhR-mediated effects of dioxin on neuronal acetylcholinesterase expression in vitro.

Comparative analysis of temporal and dose-dependent TCDD-elicited gene expression in human, mouse, and rat primary hepatocytes.

Quantitative structural insight into human variegate porphyria disease.

Metabolism of profenofos to 4-bromo-2-chlorophenol, a specific and sensitive exposure biomarker.

[The gender-specific effect of maternal exposure to dioxin on fetal steroidogenesis in the adrenal gland].

Determination of urinary 6-mercaptopurine and three of its metabolites by HPLC-UV coupled with the iodine-azide reaction.

Early membrane events induced by salicylic acid in motor cells of the *Mimosa pudica* pulvinus.

Variation of content of lipid classes, sterols and fatty acids in gonads and digestive glands of *Scrobicularia plana* in relation to environment pollution levels.

Accumulation and half-lives of 13 pesticides in muscle tissue of freshwater fishes through food exposure.

Biotransformation pathways of biocides and pharmaceuticals in freshwater crustaceans based on structure elucidation of metabolites using high resolution mass spectrometry.

High-performance metabolic profiling with dual chromatography-Fourier-transform mass spectrometry (DC-FTMS) for study of the exposome.

Pulmonary GLP-1 receptor increases at birth and exogenous GLP-1 receptor agonists augmented surfactant-protein levels in litters from normal and nitrofen-treated pregnant rats.

Global metabolomics and targeted steroid profiling reveal that rifampin, a strong human PXR activator, alters endogenous urinary steroid markers.

Quenching of tryptophan fluorescence in the presence of 2,4-DNP, 2,6-DNP, 2,4-DNA and DNOC and their mechanism of toxicity.

Metabolic profiling of the impact of oligofructose-enriched inulin in Crohn's disease patients: a double-blinded randomized controlled trial.

Therapeutic effects of smecta or smectite powder on rats with paraquat toxication.

Suppression of advanced glycation and lipoxidation end products by angiotensin II type-1 receptor blocker candesartan in type 2 diabetic patients with essential hypertension.

Correlation between Serum Levels of Protein-Bound Uremic Toxins in Hemodialysis Patients Measured by LC/MS/MS.

In vitro effects of TCDD, PCB126 and PCB153 on estrogen receptors, caspases and metalloproteinase-2 mRNA expression in the chicken shell gland.

Treatment of mice with 2,3,7,8-Tetrachlorodibenzo-p-dioxin markedly increases the levels of a number of cytochrome P450 metabolites of omega-3 polyunsaturated fatty acids in the liver and lung.

Human cell toxicogenomic analysis linking reactive oxygen species to the toxicity of monohaloacetic acid drinking water disinfection byproducts.

Polyamines and their metabolites as diagnostic markers of human diseases.

Bisphenol a in chronic kidney disease.

Cancer incidence in pulmonary vasculitis.

Role of lipid peroxidation-derived $\hat{\pm}$, $\hat{2}$ -unsaturated aldehydes in vascular dysfunction.

Action of Halowax 1051 on Enzymes of Phase I (CYP1A1) and Phase II (SULT1A and COMT) Metabolism in the Pig Ovary.

Neonatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin increases the mRNA expression of prostatic proteins in C57BL mice.

Atrazine and nitrate in public drinking water supplies and non-hodgkin lymphoma in nebraska, USA.

Metabolic signatures of extreme longevity in northern Italian centenarians reveal a complex remodeling of lipids, amino acids, and gut microbiota metabolism.

A new experimental model of ATP-sensitive $\hat{2}$ channel-independent insulinotropic action of glucose: a permissive role of cAMP for triggering of insulin release from rat pancreatic $\hat{2}$ -cells.

A computational model to predict rat ovarian steroid secretion from in vitro experiments with endocrine disruptors.

In vitro propagation of ash (*Fraxinus excelsior* L.) by somatic embryogenesis.

Diurnal variation in probability of death following self-poisoning in Sri Lanka--evidence for chronotoxicity in humans.

The oxidative damage and inflammation caused by pesticides are reverted by lipoic acid in rat brain.

Acrolein cytotoxicity in hepatocytes involves endoplasmic reticulum stress, mitochondrial dysfunction and oxidative stress.

Atrazine acts as an endocrine disrupter by inhibiting cAMP-specific phosphodiesterase-4.

Toxicity of atrazine and nonylphenol in juvenile rainbow trout (*Oncorhynchus mykiss*): effects on general health, disease susceptibility and gene expression.

Long term toxicity of a Roundup herbicide and a Roundup-tolerant genetically modified maize.

Atrazine promotes biochemical changes and DNA damage in a Neotropical fish species.

Comment on "Glyphosate impairs male offspring reproductive development by disrupting gonadotropin expression" by Romano et al. 2012.

Feasibility of the extended one-generation reproductive toxicity study (OECD 443).

Effects of herbicide mixture on microbial communities in prairie wetland ecosystems: a whole wetland approach.

Activator protein-1 regulation of murine aldehyde dehydrogenase 1a1.

Mechanisms underlying the inhibitory effects of arsenic compounds on protein tyrosine phosphatase (PTP).

Atrazine effects on antioxidant status and xenobiotic metabolizing enzymes after oral administration in peripubertal male rat.

Oxidative stress response in two representative bacteria exposed to atrazine.

L-Theanine extends lifespan of adult *Caenorhabditis elegans*.

Acute and chronic toxicity of Betanal(®)Expert and its active ingredients on nontarget aquatic organisms from different trophic levels.

Protective role of glutathione reductase in paraquat induced neurotoxicity.

HRMAS NMR as a tool to study metabolic responses in heart clam *Ruditapes decussatus* exposed to Roundup®.

Hepatic protein expression networks associated with masculinization in the female fathead minnow (*Pimephales promelas*).

Developing in vitro reporter gene assays to assess the hormone receptor activities of chemicals frequently detected in drinking water.

Fibroblasts from long-lived mutant mice exhibit increased autophagy and lower TOR activity after nutrient deprivation or oxidative stress.

Impacts of low doses of pesticide mixtures on liver cell defence systems.

The protective effects of quercetin on the cytotoxicity of atrazine on rat Sertoli-germ cell co-culture.

Isolation and expression of genes for acetolactate synthase and acetyl-CoA carboxylase in *Echinochloa phyllopogon*, a polyploid weed species.

Damage to DNA caused by UV-B radiation in the desert cyanobacterium *Scytonema javanicum* and the effects of exogenous chemicals on the process.

Non-target-site-based resistance to ALS-inhibiting herbicides in six *Bromus rigidus* populations from Western Australian cropping fields.

Molecular dissection of atrazine-responsive transcriptome and gene networks in rice by high-throughput sequencing.

Responses of growth performance and tryptophan metabolism to oxidative stress induced by diquat in weaned pigs.

The combined effects of UV-B radiation and herbicides on photosynthesis, antioxidant enzymes and DNA damage in two bloom-forming cyanobacteria.

Determination of vitamin A and its metabolites in rat testis: possible involvement of vitamin A in testicular toxicity caused by molinate.

Uncaria tomentosa extracts protect human erythrocyte catalase against damage induced by 2,4-D-Na and its metabolites.

Hormones and endocrine-disrupting chemicals: low-dose effects and nonmonotonic dose responses.

Characterization of endocrine-disrupting chemicals based on hormonal balance disruption in male and female adult rats.

Contrasted effects of an oxidative challenge and α -melanocyte-stimulating hormone on cellular immune responsiveness: an experiment with red-legged partridges *Alectoris rufa*.

[Associations of exposure to dioxins and polychlorinated biphenyls with diabetes: based on epidemiological findings].

Assessing the impact of chloroacetanilide herbicides and their metabolites on periphyton in the Leyre River (SW France) via short term growth inhibition tests on autochthonous diatoms.

Effects of herbicide applications in wheat fields: is phytohormones application a remedy?

Atrazine does not induce pica behavior at doses that increase hypothalamic-pituitary-adrenal axis activation and cause conditioned taste avoidance.

[Paraquat poisoning. Case report and overview].

Investigate the chronic neurotoxic effects of diquat.

Overexpression of TFAM, NRF-1 and myr-AKT protects the MPP(+)-induced mitochondrial dysfunctions in neuronal cells.

Farmers' exposure to herbicides in North Italy: assessment under real-life conditions in small-size rice and corn farms.

The greening of pesticide-environment interactions: some personal observations.

Comparative effects of the herbicides chlortoluron and mesotrione on freshwater microalgae.

A mixture of an environmentally realistic concentration of a phthalate and herbicide reduces testosterone in male fathead minnow (*Pimephales promelas*) through a novel mechanism of action.

Bioaccumulation and catabolism of prometryne in green algae.

Analyses of gene expression and physiological changes in *Microcystis aeruginosa* reveal the phytotoxicities of three environmental pollutants.

Early cytotoxic and genotoxic effects of atrazine on Wistar rat liver: a morphological, immunohistochemical, biochemical, and molecular study.

Glyphosate impairs male offspring reproductive development by disrupting gonadotropin expression.

Extension of *Drosophila* lifespan by *Rosa damascena* associated with an increased sensitivity to heat.

DNA damage in fish (*Anguilla anguilla*) exposed to a glyphosate-based herbicide -- elucidation of organ-specificity and the role of oxidative stress.

Renal, hepatic, pulmonary and adrenal tumors induced by prenatal inorganic arsenic followed by dimethylarsinic acid in adulthood in CD1 mice.

Insights into the toxicity mechanism of and cell response to the herbicide 2,4-D in plants.

Effects of manganese and arsenic species on the level of energy related nucleotides in human cells.

A glyphosate-based herbicide induces necrosis and apoptosis in mature rat testicular cells in vitro, and testosterone decrease at lower levels.

Flow cytometric analysis to evaluate physiological alterations in herbicide-exposed *Chlamydomonas moewusii* cells.

Involvement of NADPH oxidase and glutathione in zinc-induced dopaminergic neurodegeneration in rats: similarity with paraquat neurotoxicity.

A comparison of two human cell lines and two rat gonadal cell primary cultures as in vitro screening tools for aromatase modulation.

Phytotoxic effect of 2-benzoxazolinone (BOA) against some vegetable crops.

Dramatic increase in glycerol biosynthesis upon oxidative stress in the anaerobic protozoan parasite *Entamoeba histolytica*.

Disturbed relaxin signaling pathway and testicular dysfunction in mouse offspring upon maternal exposure to simazine.

Species-dependent effects of the phenolic herbicide ioxynil with potential thyroid hormone disrupting activity: modulation of its cellular uptake and activity by interaction with serum thyroid hormone-binding proteins.

Inhibition of TDP-43 accumulation by bis(thiosemicarbazonato)-copper complexes.

Effects of butachlor on estrogen receptor, vitellogenin and P450 aromatase gene expression in the early life stage of zebrafish.

Identification and mechanism of *Echinochloa crus-galli* resistance to fenoxaprop-p-ethyl with respect to physiological and anatomical differences.

Toxic effects of four sulphonylureas herbicides on soil microbial biomass.

Gene expression responses linked to reproduction effect concentrations (EC 10,20,50,90) of dimethoate, atrazine and carbendazim, in *Enchytraeus albidus*.

Genome-wide association analysis of oxidative stress resistance in *Drosophila melanogaster*.

Developmental and reproductive outcomes in humans and animals after glyphosate exposure: a critical analysis.

4-iodophenyl isothiocyanate: a neuroprotective compound.

Prevention of paraquat-induced apoptosis in human neuronal SH-SY5Y cells by lipocalin-type prostaglandin D synthase.

Tissue biochemical alterations of *Cyprinus carpio* exposed to commercial herbicide containing clomazone under rice-field conditions.

A possible role of acrolein in diabetic retinopathy: involvement of a VEGF/TGF β ² signaling pathway of the retinal pigment epithelium in hyperglycemia.

Anticancer system created by acrolein and hydroxyl radical generated in enzymatic oxidation of spermine and other biochemical reactions.

Whole genome expression profile in neuroblastoma cells exposed to 1-methyl-4-phenylpyridine.

Transient receptor potential channels mediate the tussive response to prostaglandin E2 and bradykinin.

Antihyperglycemic and antihyperlipidemic action of cinnamaldehyde in C57BLKS/J db/db mice.

Methylation capacity of arsenic and skin lesions in smelter plant workers.

GC-MS analysis and screening of antidiabetic, antioxidant and hypolipidemic potential of Cinnamomum tamala oil in streptozotocin induced diabetes mellitus in rats.

Systematic review of pentachlorophenol occurrence in the environment and in humans in China: not a negligible health risk due to the re-emergence of schistosomiasis.

Protein carbonylation in a murine model for early alcoholic liver disease.

Targeting acetyl-CoA carboxylases: small molecular inhibitors and their therapeutic potential.

Inverse correlation between stroke and urinary 3-hydroxypropyl mercapturic acid, an acrolein-glutathione metabolite.

Hypothesis: Estrogen related thrombosis explains the pathogenesis and epidemiology of gastroschisis.

Expansins are involved in cell growth mediated by abscisic acid and indole-3-acetic acid under drought stress in wheat.

Enhanced catabolism to acetaldehyde in rostral ventrolateral medullary neurons accounts for the pressor effect of ethanol in spontaneously hypertensive rats.

Ingestion of cinnamaldehyde, a TRPA1 agonist, reduces visceral fats in mice fed a high-fat and high-sucrose diet.

Methylglyoxal activates the human transient receptor potential ankyrin 1 channel.

The relationship between obesity, insulin and arsenic methylation capability in Taiwan adolescents.

Anti-diabetic effects of TongGuanWan, a Chinese traditional herbal formula, in C57BL/KsJ-db/db mice.

Acute intoxication with the adjuvant itself for Gramoxone INTEON.

[Effect on different concentrations of exogenous hormones on baicalin in *Scutellaria baicalensis* callus].

Effects of exogenous methionine on arsenic burden and NO metabolism in brain of mice exposed to arsenite through drinking water.

Plants as biofactories: glyphosate-induced production of shikimic acid and phenolic antioxidants in wounded carrot tissue.

Metabolic ability and individual characteristics of an atrazine-degrading consortium DNC5.

High performance liquid chromatography-tandem mass spectrometry method for quantifying phenylurea herbicides and their main metabolites in amended and unamended soils.

Electrophilic aldehydes generated by sperm metabolism activate mitochondrial reactive oxygen species generation and apoptosis by targeting succinate dehydrogenase.

[Effects of high temperature and hydrogen cyanamide on dormant nectarine's floral bud respiratory metabolism].

Alterations in bioenergetic function induced by Parkinson's disease mimetic compounds: lack of correlation with superoxide generation.

Evolutions of microbial degradation pathways for parent xenobiotic and for its metabolites follow different schemes.

Enantioselective damage of diclofop acid mediated by oxidative stress and acetyl-CoA carboxylase in nontarget plant *Arabidopsis thaliana*.

Comparative computational modeling of airflows and vapor dosimetry in the respiratory tracts of rat, monkey, and human.

Two-dimensional high performance liquid chromatography separation and tandem mass spectrometry detection of atrazine and its metabolic and hydrolysis products in urine.

Decrease of herbicide bromobutide and its debromo metabolite in paddy field soil during 24 weeks after application.

Effects of auxins on the production of steroidal alkaloids in rapidly proliferating tissue and cell cultures of *Solanum lyratum*.

[Effects of typical herbicides on soil respiration and N₂O emissions from soil added with different nitrogen fertilizers].

In vitro metabolic fate of alizapride: evidence for the formation of reactive metabolites based on liquid chromatography-tandem mass spectrometry.

Transepithelial transport of 4-chloro-2-methylphenoxyacetic acid (MCPA) across human intestinal Caco-2 cell monolayers.

Diurnal dependence of growth responses to shade in *Arabidopsis*: role of hormone, clock, and light signaling.

Urinary metabolites as biomarkers of human exposure to atrazine: atrazine mercapturate in agricultural workers.

Development of *Agrobacterium*-mediated transformation technology for mature seed-derived callus tissues of indica rice cultivar IR64.

Use of a potentiometric vital dye to determine the effect of the herbicide bromoxynil octanoate on mitochondrial bioenergetics in *Chlamydomonas reinhardtii*.

Variability of retention process of isoxaflutole and its diketone nitrile metabolite in soil under conventional and conservation tillage.

Physionomics and metabolomics—two key approaches in herbicidal mode of action discovery.

Intermediate accumulation of metabolites results in a bottleneck for mineralisation of the herbicide metabolite 2,6-dichlorobenzamide (BAM) by *Aminobacter* spp.

Metabolite profiling of maize kernels—genetic modification versus environmental influence.

Effect of exogenous electron shuttles on growth and fermentative metabolism in *Clostridium* sp. BC1.

Impairment of cellulose- and cellobiose-degrading soil Bacteria by two acidic herbicides.

Absorption, translocation and metabolism of metamilon in *Chenopodium album*.

Use of liquid chromatography/electrospray ionization tandem mass spectrometry to study the degradation pathways of terbuthylazine (TER) by *Typha latifolia* in constructed wetlands: identification of a new TER metabolite.

Disruption of alternative NAD(P)H dehydrogenases leads to decreased mitochondrial ROS in *Neurospora crassa*.

Thioredoxin reductase deficiency potentiates oxidative stress, mitochondrial dysfunction and cell death in dopaminergic cells.

Combinatorial genetic transformation of cereals and the creation of metabolic libraries for the carotenoid pathway.

Cellular toxicity of surfactants used as herbicide additives.

Modulation of the metabolism of airborne pollutants by glucoraphanin-rich and sulforaphane-rich broccoli sprout beverages in Qidong, China.

Limited uptake, translocation and enhanced metabolic degradation contribute to glyphosate tolerance in *Mucuna pruriens* var. utilis plants.

Impairment of carbon metabolism induced by the herbicide glyphosate.

Uptake of triclopyr (3,5,6-trichloro-2-pyridinyloxyacetic acid) and dicamba (3,6-dichloro-2-methoxybenzoic acid) from the apical membranes of the human intestinal Caco-2 cells.

Quinclorac resistance: a concerted hormonal and enzymatic effort in *Echinochloa phyllopogon*.

The cyclophosphamide metabolite, acrolein, induces cytoskeletal changes and oxidative stress in Sertoli cells.

Effects of a wheat bran extract containing arabinoxylan oligosaccharides on gastrointestinal health parameters in healthy adult human volunteers: a double-blind, randomised, placebo-controlled, cross-over trial.

Arsenic urinary speciation in Mthfr deficient mice injected with sodium arsenate.

PANC-1 cells proliferative response to ionizing radiation is related to GSK-3 β phosphorylation.

Influence of serum in hemodialysis patients on the expression of intestinal and hepatic transporters for the excretion of pravastatin.

Silibinin ameliorates arsenic induced nephrotoxicity by abrogation of oxidative stress, inflammation and apoptosis in rats.

Toxicity of untreated and ozone-treated oil sands process-affected water (OSPW) to early life stages of the fathead minnow (*Pimephales promelas*).

Effects of choline on sodium arsenite-induced neural tube defects in chick embryos.

Reproductive hormone profile and pubertal development in 14-year-old boys prenatally exposed to polychlorinated biphenyls.

Repeated dose toxicity and relative potency of 1,2,3,4,6,7-hexachloronaphthalene (PCN 66) 1,2,3,5,6,7-hexachloronaphthalene (PCN 67) compared to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) for induction of CYP1A1, CYP1A2 and thymic atrophy in female Harlan Sprague-Dawley rats.

Metabolomics identifies an inflammatory cascade involved in dioxin- and diet-induced steatohepatitis.

Tryptophan catabolism in cancer: beyond IDO and tryptophan depletion.

Environmental arsenic exposure and DNA methylation of the tumor suppressor gene p16 and the DNA repair gene MLH1: effect of arsenic metabolism and genotype.

Reduction of Na⁺, K⁺-ATPase activity and expression in cerebral cortex of glutaryl-CoA dehydrogenase deficient mice: a possible mechanism for brain injury in glutaric aciduria type I.

The epigenetic effects of a high prenatal folate intake in male mouse fetuses exposed in utero to arsenic.

Invited review: Efficacy, metabolism, and toxic responses to chlorate salts in food and laboratory animals.

Lack of an association human dioxin detoxification gene polymorphisms with endometriosis in Japanese women: results of a pilot study.

1-(sulfonyl)-5-(arylsulfonyl)indoline as activators of the tumor cell specific M2 isoform of pyruvate kinase.

Engineering of blended nanoparticle platform for delivery of mitochondria-acting therapeutics.

Bath salt intoxication causing acute kidney injury requiring hemodialysis.

Adverse alterations in mitochondrial function contribute to type 2 diabetes mellitus-related endothelial dysfunction in humans.

Associations of dioxins, furans and dioxin-like PCBs with diabetes and pre-diabetes: is the toxic equivalency approach useful?

Progesterone-dependent regulation of endometrial cannabinoid receptor type 1 (CB1-R) expression is disrupted in women with endometriosis and in isolated stromal cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Temperature and cell-type dependency of sulfide effects on mitochondrial respiration.

Eccrine porocarcinoma with carcinomatous lymphangitis in a patient with history of arsenic exposure: a case report.

[Human biomonitoring and variation of haematic parameters in a population exposed to PCB and dioxin near a steel plant in the lower Susa Valley].

Re-analysis of Ranch Hand study supports reverse causation hypothesis between dioxin and diabetes.

Relationship between respiration deficiency and azole resistance in clinical *Candida glabrata*.

Patch testing with the textile dyes Disperse Orange 1 and Disperse Yellow 3 and some of their potential metabolites, and simultaneous reactions to para-amino compounds.

Dimethyl disulfide is an induced systemic resistance elicitor produced by *Bacillus cereus* C1L.

High correlation between clearance of renal protein-bound uremic toxins (indoxyl sulfate and p-cresyl sulfate) and renal water-soluble toxins in peritoneal dialysis patients.

Serum from methimazole-treated patients induces activation of aryl hydrocarbon receptor, a transcription factor that binds to dioxin-response elements.

Glutamine suppresses dinitrophenol fluorobenzene-induced allergic contact dermatitis and itching: inhibition of contact dermatitis by glutamine.

Intracellular accumulation of bilirubin as a defense mechanism against increased oxidative stress.

Mitochondrial inhibition in rat retinal cell cultures as a model of metabolic compromise: mechanisms of injury and neuroprotection.

Yusho: 43 years later.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces a proteomic pattern that defines cleft palate formation in mice.

Metabolite profiling of plasma and urine from rats with TNBS-induced acute colitis using UPLC-ESI-QTOF-MS-based metabolomics--a pilot study.

Non-dioxin-like AhR ligands in a mouse peanut allergy model.

Arsenic methylation, GSTO1 polymorphisms, and metabolic syndrome in an arseniasis endemic area of southwestern Taiwan.

Thyroid hormone metabolism and environmental chemical exposure.

Progesterone receptor is involved in 2,3,7,8-tetrachlorodibenzo-p-dioxin-stimulated breast cancer cells proliferation.

A review of the role of lymphoma markers and occupational and environmental exposures.

Critical role of microsomal prostaglandin E synthase-1 in the hydronephrosis caused by lactational exposure to dioxin in mice.

Tumors and proliferative lesions in adult offspring after maternal exposure to methylarsonous acid during gestation in CD1 mice.

Associations between congenital cryptorchidism in newborn boys and levels of dioxins and PCBs in placenta.

Adipose tissue and bone marrow-derived stem cells react similarly in an ischaemia-like microenvironment.

Quercetin prevents 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced testicular damage in rats.

Aryl hydrocarbon receptor-mediated induction of EBV reactivation as a risk factor for Sjögren's syndrome.

Inorganic arsenic and basal cell carcinoma in areas of Hungary, Romania, and Slovakia: a case-control study.

Assessment of the sensitizing potential of textile disperse dyes and some of their metabolites by the loose-fit coculture-based sensitization assay (LCSA).

Uremic solutes from colon microbes.

A phytochemical approach to experimental metabolic syndrome-associated renal damage and oxidative stress.

Aryl hydrocarbon receptor (AhR) regulates silica-induced inflammation but not fibrosis.

Metformin reduces endogenous reactive oxygen species and associated DNA damage.

Inflammatory pathway genes belong to major targets of persistent organic pollutants in adipose cells.

Selectively increasing the clearance of protein-bound uremic solutes.

A metabonomic study of biochemical changes characteristic of genetically hypertensive rats based on ¹H NMR spectroscopic urinalysis.

Associations of persistent organic pollutants with abdominal obesity in the elderly: The Prospective Investigation of the Vasculature in Uppsala Seniors (PIVUS) study.

Endocrine-active chemicals in mammary cancer causation and prevention.

Synthesis, in silico metabolic and toxicity prediction of some novel imidazolinones derivatives as potent anticonvulsant agents.

[The pharmacological treatment of obesity: past, present and future].

Induction of mitochondrial uncoupling enhances VEGF β , α , ϵ but reduces MCP-1 release in mature 3T3-L1 adipocytes: possible regulatory mechanism through endogenous ER stress and AMPK-related pathways.

[Metabonomic study on protective effect of ethanol extracts of drynariae rhizoma on osteoporosis in rats urine by using UPLC-MS/MS].

Subacute arsenic exposure through drinking water reduces the pharmacodynamic effects of ketoprofen in male rats.

Influence of prenatal organohalogen levels on infant male sexual development: sex hormone levels, testes volume and penile length.

Uncoupling oxidative phosphorylation with 2,4-dinitrophenol promotes development of the adhesion phenotype.

Polychlorinated biphenyl congeners that increase the glucuronidation and biliary excretion of thyroxine are distinct from the congeners that enhance the serum disappearance of thyroxine.

Serum free p-cresyl sulfate levels predict cardiovascular and all-cause mortality in elderly hemodialysis patients--a prospective cohort study.

Aldehyde dehydrogenases and cell proliferation.

Common mechanism underlies repeated evolution of extreme pollution tolerance.

Distinct urinary metabolic profile of human colorectal cancer.

Melatonin as a neuroprotective agent in the rodent models of Parkinson's disease: is it all set to irrefutable clinical translation?

Iron depletion and repletion with ferrous sulfate or electrolytic iron modifies the composition and metabolic activity of the gut microbiota in rats.

Solid phase microextraction, mass spectrometry and metabolomic approaches for detection of potential urinary cancer biomarkers--a powerful strategy for breast cancer diagnosis.

Glutathione-deficient mice are susceptible to TCDD-Induced hepatocellular toxicity but resistant to steatosis.

Mitochondria as pharmacological targets: the discovery of novel anti-obesity mitochondrial uncouplers from Africa's medicinal plants.

Global DNA methylation not increased in chronic hemodialysis patients: a case-control study.

Prenatal exposure to TCDD triggers significant modulation of microRNA expression profile in the thymus that affects consequent gene expression.

Free p-cresol sulfate is associated with survival and function of vascular access in chronic hemodialysis patients.

Oxidative stress-induced glomerular mineralocorticoid receptor activation limits the benefit of salt reduction in Dahl salt-sensitive rats.

Gender differences in transcriptional signature of developing rat testes and ovaries following embryonic exposure to 2,3,7,8-TCDD.

Coupled nitric oxide and autonomic receptor functional responses in the normal and inflamed urinary bladder of the rat.

[Exploring the mechanism of rhizoma coptidis in treating type II diabetes mellitus based on metabolomics by gas chromatography-mass spectrometry].

Exogenous inflammatory acne due to combined application of cosmetic and facial rubbing.

Genome-wide association study identifies chromosome 10q24.32 variants associated with arsenic metabolism and toxicity phenotypes in Bangladesh.

an Obituary for GFR as the main marker for kidney function?

Relevance of protein fermentation to gut health.

Indigenous American ancestry is associated with arsenic methylation efficiency in an admixed population of northwest Mexico.

The cutaneous lesions of dioxin exposure: lessons from the poisoning of Victor Yushchenko.

Maternal exposure to high levels of dioxins in relation to birth weight in women affected by Yusho disease.

Effects of arsenic exposure during the pre- and postnatal development on the puberty of female offspring.

A luminescent cyclometalated iridium(III) complex accumulates in mitochondria and induces mitochondrial shortening by conjugation to specific protein targets.

Effects of carnosine on polyamine levels in red blood cells of patients with hypertonic discirculatory encephalopathy.

1 α ,25 dihydroxyvitamin D₃ enhances cellular defences against UV-induced oxidative and other forms of DNA damage in skin.

p-cresol, but not p-cresylsulphate, disrupts endothelial progenitor cell function in vitro.

Permeation and metabolism of cocaine in the nasal mucosa.

4-Hydroxy-2-nonenal, a reactive product of lipid peroxidation, and neurodegenerative diseases: a toxic combination illuminated by redox proteomics studies.

Metabolism of 4-chloro-2-nitrophenol in a gram-positive bacterium, *Exiguobacterium* sp. PMA.

Arsenic exposure through drinking water is associated with longer telomeres in peripheral blood.

Sustained NMDA receptor activation by spreading depolarizations can initiate excitotoxic injury in metabolically compromised neurons.

[Comparison of the total arsenic concentration between saliva and blood after oral administration of sodium arsenite to rats].

Exposures to endocrine-disrupting chemicals and age of menarche in adolescent girls in NHANES (2003-2008).

The effect of aryl hydrocarbon receptor ligands on the expression of polymerase (DNA directed) kappa (Pol κ), polymerase RNA II (DNA directed) polypeptide A (PolR2a), CYP1B1 and CYP1A1 genes in rat liver.

The enzymes of biotin dependent CO $_2$ metabolism: what structures reveal about their reaction mechanisms.

Serum concentrations of p, p'-DDE, HCB, PCBs and reproductive hormones among men of reproductive age.

Oxidative stress modulates KLF6Full and its splice variants.

Simultaneous analysis of 28 urinary VOC metabolites using ultra high performance liquid chromatography coupled with electrospray ionization tandem mass spectrometry (UPLC-ESI/MSMS).

Anaerobic respiration using a complete oxidative TCA cycle drives multicellular swarming in *Proteus mirabilis*.

Use of magnetic nanoparticles to manipulate the metabolic environment of bacteria for controlled biopolymer synthesis.

Urinary biomarkers of oxidative status.

Small reactive carbonyl compounds as tissue lipid oxidation products; and the mechanisms of their formation thereby.

Aryl hydrocarbon receptor-dependence of dioxin's effects on constitutive mouse hepatic cytochromes P450 and growth hormone signaling components.

The androgenic anabolic steroid tetrahydrogestrinone produces dioxin-like effects via the aryl hydrocarbon receptor.

The contribution of thioredoxin-2 reductase and glutathione peroxidase to H $_2$ O $_2$ detoxification of rat brain mitochondria.

Development of an ion chromatography-inductively coupled plasma-mass spectrometry method to determine inorganic arsenic in liver from chickens treated with roxarsone.

Identification of novel bioactive aldehyde-modified phosphatidylethanolamines formed by lipid peroxidation.

Effects of caffeine on metabolism and mitochondria biogenesis in rhabdomyosarcoma cells compared with 2,4-dinitrophenol.

Bladder urotoxicity pathophysiology induced by the oxazaphosphorine alkylating agents and its chemoprevention.

Predicting adult fish acute lethality with the zebrafish embryo: relevance of test duration, endpoints, compound properties, and exposure concentration analysis.

Impaired adaptability of in vivo mitochondrial energetics to acute oxidative insult in aged skeletal muscle.

Engineering phosphorus metabolism in plants to produce a dual fertilization and weed control system.

Antimutagenic properties of *Mangifera indica* L. stem bark extract and evaluation of its effects on hepatic CYP1A1.

Urinary arsenic levels in the French adult population: the French National Nutrition and Health Study, 2006-2007.

An improved synthesis of lysosomal activated mustard prodrug for tumor-specific activation and its cytotoxic evaluation.

Molecular and functional characterization of riboflavin specific transport system in rat brain capillary endothelial cells.

TGF- β 1 signaling plays a dominant role in the crosstalk between TGF- β 1 and the aryl hydrocarbon receptor ligand in prostate epithelial cells.

Creatine pretreatment protects cortical axons from energy depletion in vitro.

Arsenate toxicity and stress responses in the freshwater ciliate *Tetrahymena pyriformis*.

Responses of *Phanerochaete chrysosporium* to toxic pollutants: physiological flux, oxidative stress, and detoxification.

[Mechanism of the apoptosis of rat pancreas islet β 2 cell strain (INS-1 cells) induced by sodium arsenite].

Pregnancy and the methyltransferase genotype independently influence the arsenic methylation phenotype.

DNA binding studies of 3, 5, 6-trichloro-2-pyridinol pesticide metabolite.

In vitro propagation of *Dioscorea alata* var. *purpurea*.

Quantification of main bioactive metabolites from saffron (*Crocus sativus*) stigmas by a micellar electrokinetic chromatographic (MEKC) method.

Metabolism of the antibacterial triclocarban by human epidermal keratinocytes to yield protein adducts.

Quantification of steroids and endocrine disrupting chemicals in rat ovaries by LC-MS/MS for reproductive toxicology assessment.

Transcription factor-mediated regulation of carboxylesterase enzymes in livers of mice.

Toxicity of weight loss agents.

Dioxin silences gonadotropin expression in perinatal pups by inducing histone deacetylases: a new insight into the mechanism for the imprinting of sexual immaturity by dioxin.

Characterization and expression analysis of AcSERK2, a somatic embryogenesis and stress resistance related gene in pineapple.

2,3,7,8-Tetrachlorodibenzo-p-dioxin activates the aryl hydrocarbon receptor and alters sex steroid hormone secretion without affecting growth of mouse antral follicles in vitro.

Osmosensitive changes of carbohydrate metabolism in response to cellulose biosynthesis inhibition.

Acute toxicity of chlorobenzenes in tetrahymena: estimated by microcalorimetry and mechanism.

GSTO and AS3MT genetic polymorphisms and differences in urinary arsenic concentrations among residents in Bangladesh.

Improved lycopene production by *Blakeslea trispora* with isopentenyl compounds and metabolic precursors.

Effects of oxidative stress caused by tert-butylhydroquinone on cytotoxicity in MDCK cells.

Buffalo (*Bubalus bubalis*) epiphyseal proteins counteract arsenic-induced oxidative stress in brain, heart, and liver of female rats.

Protocatechuic acid prevents reproductive damage caused by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in male rats.

Environmental nitration processes enhance the mutagenic potency of aromatic compounds.

New analytical method for sensitive quantification of urinary 3-methyl-4-nitrophenol to assess fenitrothion exposure in general population and occupational sprayers.

Effects of peroxisomal catalase inhibition on mitochondrial function.

[6]-Gingerol isolated from ginger attenuates sodium arsenite induced oxidative stress and plays a corrective role in improving insulin signaling in mice.

Phytoremediation of trichlorophenol by Phase II metabolism in transgenic *Arabidopsis* overexpressing a *Populus* glucosyltransferase.

Development and validation of RP-HPLC and RP-UPLC methods for quantification of parathyroid hormones (1-34) in medicinal product formulated with meta-cresol.

Plant regeneration from mature embryo of commercial Indian bread wheat (*Triticum aestivum* L.) cultivars.

Bacterial β -glucosidase function and metabolic activity depend on soil management in semiarid rainfed agriculture.

Alleviative effect of quercetin on germ cells intoxicated by 3-methyl-4-nitrophenol from diesel exhaust particles.

Preliminary evaluation of the human relevance of respiratory tumors observed in rodents exposed to naphthalene.

Urinary levels of volatile organic carcinogen and toxicant biomarkers in relation to lung cancer development in smokers.

Developmental toxicity and endocrine disrupting potency of 4-azapyrene, benzo[b]fluorene and retene in the zebrafish *Danio rerio*.

Impact of short-term intake of red wine and grape polyphenol extract on the human metabolome.

Significance of xenobiotic metabolism for bioaccumulation kinetics of organic chemicals in *Gammarus pulex*.

Fluorescence imaging of cellular metabolites with RNA.

Comparative proteomic analysis of auxin-induced embryogenic and nonembryogenic tissues of the solanaceous tree *Cyphomandra betacea* (Tamarillo).

Multi-residue analysis of free and conjugated hormones and endocrine disruptors in rat testis by QuEChERS-based extraction and LC-MS/MS.

Alteration of mitochondrial efficiency affects oxidative balance, development and growth in frog (*Rana temporaria*) tadpoles.

Consumption of breads containing in situ-produced arabinoxylan oligosaccharides alters gastrointestinal effects in healthy volunteers.

Combining microdilution with MicroResp[®], ζ : microbial substrate utilization, antimicrobial susceptibility and respiration.

Changes in expression of drug-metabolizing enzymes by single-walled carbon nanotubes in human respiratory tract cells.

Site-specific oxidation of apolipoprotein A-I impairs cholesterol export by ABCA1, a key cardioprotective function of HDL.

Effects of vitamin E on reproductive hormones and testis structure in chronic dioxin-treated mice.

Multidrug resistance protein (MRP) 4 attenuates benzo[a]pyrene-mediated DNA-adduct formation in human bronchoalveolar H358 cells.

Metabolic fate of 2,4-dichlorophenol and related plant residues in rats.

Metabolic activation of sulfur mustard leads to oxygen free radical formation.

C and N isotope fractionation during biodegradation of the pesticide metabolite 2,6-dichlorobenzamide (BAM): potential for environmental assessments.

Oxidative stress and autophagy: mediators of synapse growth?

Kynurenic acid: a metabolite with multiple actions and multiple targets in brain and periphery.

Large enhancement of skeletal muscle cell glucose uptake and suppression of hepatocyte glucose-6-phosphatase activity by weak uncouplers of oxidative phosphorylation.

Mitochondria as a source and target of lipid peroxidation products in healthy and diseased heart.

Harmaline and harmalol inhibit the carcinogen-activating enzyme CYP1A1 via transcriptional and posttranslational mechanisms.

Structural nucleotide analogs are potent activators/inhibitors of pancreatic \hat{I}^2 cell KATP channels: an emerging mechanism supporting their use as antidiabetic drugs.

Toxicity, dioxin-like activities, and endocrine effects of DDT metabolites--DDA, DDMU, DDMS, and DDCN.

Disruption of endocrine function in in vitro H295R cell-based and in in vivo assay in zebrafish by 2,4-dichlorophenol.

Characterization of TCHQ-induced genotoxicity and mutagenesis using the pSP189 shuttle vector in mammalian cells.

Atrazine in sub-acute exposure results in sperm DNA disintegrity and nuclear immaturity in rats.

Antioxidant Potential of Fagonia arabica against the Chemical Ischemia-Induced in PC12 Cells.

Modulation of protein fermentation does not affect fecal water toxicity: a randomized cross-over study in healthy subjects.

Aberrant activation of ubiquitin D at G2 phase and apoptosis by carcinogens that evoke cell proliferation after 28-day administration in rats.

Restoration of dioxin-induced damage to fetal steroidogenesis and gonadotropin formation by maternal co-treatment with \hat{I}^{\pm} -lipoic acid.

Action of lipopolysaccharide on interstitial cells of cajal from mouse small intestine.

[Endocrine disruptors are a novel direction of endocrinologic scientific investigation].

PCB 126 and other dioxin-like PCBs specifically suppress hepatic PEPCK expression via the aryl hydrocarbon receptor.

The Anx7(+/-) knockout mutation alters electrical and secretory responses to Ca(2+)-mobilizing agents in pancreatic \hat{I}^2 -cells.

Cyanamide potentiates the ethanol-induced impairment of receptor-mediated endocytosis in a recombinant hepatic cell line expressing alcohol dehydrogenase activity.

Modulation Role of abscisic acid (ABA) on growth, water relations and glycinebetaine metabolism in two maize (*Zea mays* L.) cultivars under drought stress.

Metabolic engineering of the iodine content in Arabidopsis.

Diverse rare lipid-related metabolites including \hat{I}° -7 and \hat{I}° -9 alkenylitaconic acids (ceriporic acids) secreted by a selective white rot fungus, *Ceriporiopsis subvermispora*.

Individual variations in arsenic metabolism in Vietnamese: the association with arsenic exposure and GSTP1 genetic polymorphism.

Functional analysis of colonic bacterial metabolism: relevant to health?

Biological analysis of endocrine-disrupting chemicals in animal meats from the Pearl River Delta, China.

Comparative metabolomic and genomic analyses of TCDD-elicited metabolic disruption in mouse and rat liver.

Endocrine disrupters: a review of some sources, effects, and mechanisms of actions on behaviour and neuroendocrine systems.

Synthesis and evaluation of PET probes for the imaging of I2 imidazoline receptors in peripheral tissues.

Urinary biomarkers of exposure to glycol ethers and chlorinated solvents during pregnancy: determinants of exposure and comparison with indirect methods of exposure assessment.

Herbicide in drinking water linked to hormonal changes.

Paraquat administration in *Drosophila* for use in metabolic studies of oxidative stress.

Surfactant volume is an essential element in human toxicity in acute glyphosate herbicide intoxication.

Sublethal effects of waterborne herbicides in tropical freshwater fish.

The enhancing effect of the antioxidant N-acetylcysteine on urinary bladder injury induced by dimethylarsinic acid.

Stereoselective metabolism and toxicity of the herbicide fluroxypyr methylheptyl ester in rat hepatocytes.

Menstrual cycle characteristics and reproductive hormone levels in women exposed to atrazine in drinking water.

Transcriptional profiling in *Saccharomyces cerevisiae* relevant for predictingalachlor mechanisms of toxicity.

Epidemiologic studies of glyphosate and non-cancer health outcomes: a review.

Acute exposure to glyphosate herbicide affects oxidative parameters in piava (*Leporinus obtusidens*).

Effects of glyphosate and polyoxyethylenamine on growth and energetic reserves in the freshwater crayfish *Cherax quadricarinatus* (Decapoda, Parastacidae).

Consideration of dosimetry in evaluation of ToxCast[®] data.

Effects of microcystin and complex cyanobacterial samples on the growth and oxidative stress parameters in green alga *Pseudokirchneriella subcapitata* and comparison with the model oxidative stressor--herbicide paraquat.

Atrazine-induced apoptosis of splenocytes in BALB/C mice.

Proteomic profiling of acrolein adducts in human lung epithelial cells.

Endocrine disrupting chemicals.

Assessment of female reproductive endpoints in Sprague-Dawley rats developmentally exposed to Diuron: potential ovary toxicity.

Atrazine and breast cancer: a framework assessment of the toxicological and epidemiological evidence.

The differential effect of atrazine on luteinizing hormone release in adrenalectomized adult female Wistar rats.

The use of environmental metabolomics to determine glyphosate level of exposure in rapeseed (*Brassica napus* L.) seedlings.

DNA damage and effects on glutathione-S-transferase activity induced by atrazine exposure in zebrafish (*Danio rerio*).

Snails as indicators of pesticide drift, deposit, transfer and effects in the vineyard.

Toxicology and risk assessment of acrolein in food.

Integrative metabolome and transcriptome profiling reveals discordant energetic stress between mouse strains with differential sensitivity to acrolein-induced acute lung injury.

Protein modification by acrolein: relevance to pathological conditions and inhibition by aldehyde sequestering agents.

Acrolein scavengers: reactivity, mechanism and impact on health.

Comparison of nitrofen uptake via water and food and its distribution in tissue of common carp, *Cyprinus carpio* L.

Dichlobenil and 2,6-dichlorobenzamide (BAM) in the environment: what are the risks to humans and biota?

Atrazine and cancer incidence among pesticide applicators in the agricultural health study (1994-2007).

Exposure to arsenic in drinking water is associated with increased prevalence of diabetes: a cross-sectional study in the Zimapán and Lagunera regions in Mexico.

Enantioselective phytotoxicity of the herbicide imazethapyr and its effect on rice physiology and gene transcription.

C. elegans metallothioneins: response to and defence against ROS toxicity.

Exposure to atrazine affects the expression of key genes in metabolic pathways integral to energy homeostasis in *Xenopus laevis* tadpoles.

Transcriptional profile of diuron-induced toxicity on the urinary bladder of male Wistar rats to inform mode of action.

Assessment of fetal brain uptake of paraquat in utero using in vivo PET/CT imaging.

Investigation into modification of mass transfer kinetics by acrolein in a renal biochip.

Tobacco chloroplast transformants expressing genes encoding dehydroascorbate reductase, glutathione reductase, and glutathione-S-transferase, exhibit altered anti-oxidant metabolism and improved abiotic stress tolerance.

Mitochondria are the main target organelle for trivalent monomethylarsonous acid (MMA(III))-induced cytotoxicity.

[Mechanism of the effects of amitrole on the thyroglobulin in Fischer rat thyroid follicle-5 cell].

Metabolites of arsenic and increased DNA damage of p53 gene in arsenic plant workers.

Gestational atrazine exposure: effects on male reproductive development and metabolite distribution in the dam, fetus, and neonate.

The effects of prenatal exposure to atrazine on pubertal and postnatal reproductive indices in the female rat.

Acrolein inhalation prevents vascular endothelial growth factor-induced mobilization of Flk-1+/Sca-1+ cells in mice.

Mitochondrial aconitase knockdown attenuates paraquat-induced dopaminergic cell death via decreased cellular metabolism and release of iron and H₂O₂.

Waterborne exposure to clodinafop-propargyl disrupts the posterior and ventral development of zebrafish embryos.

Association between arsenic exposure and behavior among first-graders from Torreón, Mexico.

Urinary biomarkers of prenatal atrazine exposure and adverse birth outcomes in the PELAGIE birth cohort.

Impact of pesticide exposure misclassification on estimates of relative risks in the Agricultural Health Study.

Use of GC–GC/TOF-MS and LC/TOF-MS for metabolomic analysis of *Hyalella azteca* chronically exposed to atrazine and its primary metabolite, desethylatrazine.

Differential stimulation pathways of progesterone secretion from newly formed corpora lutea in rats treated with ethylene glycol monomethyl ether, sulpiride, or atrazine.

Involvement of N⁶-adenine-specific DNA methyltransferase 1 (N6AMT1) in arsenic biomethylation and its role in arsenic-induced toxicity.

Further antinociceptive effects of myricitrin in chemical models of overt nociception in mice.

Environmental factors in the etiology of esophageal atresia.

Effects of atrazine, agricultural runoff, and selected effluents on antimicrobial activity of skin peptides in *Xenopus laevis*.

Maternal and fetal exposure to pesticides associated to genetically modified foods in Eastern Townships of Quebec, Canada.

Proteomics in aquatic amphipods: can it be used to determine mechanisms of toxicity and interspecies responses after exposure to atrazine?

Genetic, enzymatic and developmental alterations observed in *Caiman latirostris* exposed in ovo to pesticide formulations and mixtures in an experiment simulating environmental exposure.

Oxidative stress induced by a commercial glyphosate formulation in a tolerant strain of *Chlorella kessleri*.

Paraquat detoxification with p-sulfonatocalix-[4]arene by a pharmacokinetic study.

Modulation of steroidogenic gene expression and hormone synthesis in H295R cells exposed to PCP and TCP.

Should atrazine and related chlorotriazines be considered carcinogenic for human health risk assessment?

Mortality of US pentachlorophenol production workers through 2005.

NBHA reduces acrolein-induced changes in ARPE-19 cells: possible involvement of TGF β 2.

Physiological responses of glyphosate-resistant and glyphosate-sensitive soybean to aminomethylphosphonic acid, a metabolite of glyphosate.

Toxicity of the insecticide terbufos, its oxidation metabolites, and the herbicide atrazine in binary mixtures to *Ceriodaphnia cf dubia*.

Phenylurea herbicides induce cytogenetic effects in Chinese hamster cell lines.

[Study on the prognosis of patients with acute paraquat intoxication].

Effect of low dose exposure to the herbicide atrazine and its metabolite on cytochrome P450 aromatase and steroidogenic factor-1 mRNA levels in the brain of premetamorphic bullfrog tadpoles (*Rana catesbeiana*).

Liquid chromatographic-electrospray mass spectrometric determination of 1-methyl-4-phenylpyridine (MPP+) in discrete regions of murine brain.

Toxicological responses of *Cyprinus carpio* after exposure to a commercial herbicide containing imazethapyr and imazapic.

Commercial formulation containing quinclorac and metsulfuron-methyl herbicides inhibit acetylcholinesterase and induce biochemical alterations in tissues of *Leporinus obtusidens*.

The effects of amitrole on thyroglobulin and iodide uptake in FRTL-5 cells.

A physiologically based pharmacokinetic model for atrazine and its main metabolites in the adult male C57BL/6 mouse.

Understanding the effects of atrazine on steroidogenesis in rat granulosa and H295R adrenal cortical carcinoma cells.

Effects of nitric oxide on the primary bladder afferent activities of the rat with and without intravesical acrolein treatment.

Quantitative assessment of mammary gland development in female Long Evans rats following in utero exposure to atrazine.

The effect of lipid peroxidation products on reactive oxygen species formation and nitric oxide production in lipopolysaccharide-stimulated RAW 264.7 macrophages.

Toxicological effects of selective herbicides on plant growth promoting activities of phosphate solubilizing *Klebsiella* sp. strain PS19.

Analysis of acrolein-derived 1,N2-propanodeoxyguanosine adducts in human leukocyte DNA from smokers and nonsmokers.

Early exposure to low doses of atrazine affects behavior in juvenile and adult CD1 mice.

The effects of Click 500 SC (terbuthylazine) on common carp *Cyprinus carpio* under (sub)chronic conditions.

Before the curtain falls: endocrine-active pesticides--a German contamination legacy.

Effect of Roundup[®] (glyphosate formulation) in the energy metabolism and reproductive traits of *Hyalella castroi* (Crustacea, Amphipoda, Dogielinotidae).

Physiological effects of temperature and a herbicide mixture on the soft-shell clam *Mya arenaria* (Mollusca, Bivalvia).

Hepatic response to oxidative injury in long-lived Ames dwarf mice.

Glycogen synthase kinase 3^β and its phosphorylated form (Y216) in the paraquat-induced model of parkinsonism.

Functional characterization of transmembrane intracellular pH regulators and mechanism of alcohol-induced intracellular acidosis in human umbilical cord blood stem cell-like cells.

Protein conjugated with aldehydes derived from lipid peroxidation as an independent parameter of the carbonyl stress in the kidney damage.

Therapeutic potential of Nrf2 activators in streptozotocin-induced diabetic nephropathy.

Nrf2 activators as attractive therapeutics for diabetic nephropathy.

TRPV1 and TRPA1 stimulation induces MUC5B secretion in the human nasal airway in vivo.

Cinnamaldehyde protects from the hypertension associated with diabetes.

Proteomic analysis of the mode of antibacterial action of trans-cinnamaldehyde against *Cronobacter sakazakii* 415.

Performance of broiler chickens fed diets containing DAS-68416-4 soybean meal.

Expressions of lipid oxidation markers, N(μ)-hexanoyl lysine and acrolein in cisplatin-induced nephrotoxicity in rats.

Aldehyde reductase (AKR1B3) regulates the accumulation of advanced glycosylation end products (AGEs) and the expression of AGE receptor (RAGE).

Isopentenyl pyrophosphate is a novel antinociceptive substance that inhibits TRPV3 and TRPA1 ion channels.

A pathway-based analysis of urinary arsenic metabolites and skin lesions.

Relationship between metabolic disorders and relative risk values of brain infarction estimated by protein-conjugated acrolein, IL-6 and CRP together with age.

[Metabolism inhibition stimulates, metabolism activation inhibits cancerogenic activity of ortho-aminoazotoluene in mouse liver].

Use of polyamine metabolites as markers for stroke and renal failure.

Effect of diquat-induced oxidative stress on iron metabolism in male Fischer-344 rats.

A temporary immersion system improves in vitro regeneration of peach palm through secondary somatic embryogenesis.

TRPA1 mediates spinal antinociception induced by acetaminophen and the cannabinoid Δ^9 -tetrahydrocannabinol.

Poly(ADP-ribose) polymerase-1 protects from oxidative stress induced endothelial dysfunction.

Generation of reactive oxygen species in 1-methyl-4-phenylpyridinium (MPP+) treated dopaminergic neurons occurs as an NADPH oxidase-dependent two-wave cascade.

[Determination of linuron and its metabolite 3,4-dichloroaniline residues in meat and meat products using liquid chromatography-tandem mass spectrometry].

Soluble epoxide hydrolase contamination of specific catalase preparations inhibits epoxyeicosatrienoic acid vasodilation of rat renal arterioles.

Uptake, translocation and metabolism of aminocyclopyrachlor in prickly lettuce, rush skeletonweed and yellow starthistle.

Effects of the herbicide atrazine's metabolites on host snail mortality and production of trematode cercariae.

Botrytone, a new naphthalenone pentaketide produced by *Botrytis fabae*, the causal agent of chocolate spot disease on *Vicia faba*.

Perturbations of amino acid metabolism associated with glyphosate-dependent inhibition of shikimic acid metabolism affect cellular redox homeostasis and alter the abundance of proteins involved in photosynthesis and photorespiration.

Simulation of branched serial first-order decay of atrazine and metabolites in adapted and nonadapted soils.

Unraveling the role of fermentation in the mode of action of acetolactate synthase inhibitors by metabolic profiling.

Determination of alachlor and its metabolite 2,6-diethylaniline in microbial culture medium using online microdialysis enriched-sampling coupled to high-performance liquid chromatography.

Determination of atrazine and degradation products in Luxembourgish drinking water: origin and fate of potential endocrine-disrupting pesticides.

Residues and dissipation of the herbicide fenoxaprop-P-ethyl and its metabolite in wheat and soil.

Stereoselective metabolism of the herbicide fluroxypyr methylheptyl ester in rabbits.

Glyphosate reduces urediniospore development and *Puccinia psidii* disease severity on *Eucalyptus grandis*.

Construction, expression, and characterization of a single-chain variable fragment antibody against 2,4-dichlorophenoxyacetic acid in the hemolymph of silkworm larvae.

Rapid determination of glyphosate, glufosinate, bialaphos, and their major metabolites in serum by liquid chromatography-tandem mass spectrometry using hydrophilic interaction chromatography.

Fibroblasts from long-lived bird species are resistant to multiple forms of stress.

Mg-protoporphyrin, haem and sugar signals double cellular total RNA against herbicide and high-light-derived oxidative stress.

Quantitative evaluation of laboratory uptake rates for pesticides, pharmaceuticals, and steroid hormones using POCIS.

Murine hepatic aldehyde dehydrogenase 1a1 is a major contributor to oxidation of aldehydes formed by lipid peroxidation.

Analysis and environmental concentrations of the herbicide dichlobenil and its main metabolite 2,6-dichlorobenzamide (BAM): a review.

Enantioselective phytotoxicity of the herbicide imazethapyr on the response of the antioxidant system and starch metabolism in *Arabidopsis thaliana*.

Low ergosterol content in yeast *adh1* mutant enhances chitin maldistribution and sensitivity to paraquat-induced oxidative stress.

Direct analysis of methylated trivalent arsenicals in mouse liver by hydride generation-cryotrapping-atomic absorption spectrometry.

Regeneration of *Jatropha curcas* through efficient somatic embryogenesis and suspension culture.

Herbicidal activity of culture filtrates of *Trichoderma* spp. against two problematic weeds of wheat.

The chemotherapy metabolite acrolein upregulates thrombin generation and impairs the protein C anticoagulant pathway in animal-based and cell-based models.

Redox cycling and increased oxygen utilization contribute to diquat-induced oxidative stress and cytotoxicity in Chinese hamster ovary cells overexpressing NADPH-cytochrome P450 reductase.

Isolation and characterization of a rice glutathione S-transferase gene promoter regulated by herbicides and hormones.

Transgenic poplar expressing Arabidopsis NDPK2 enhances growth as well as oxidative stress tolerance.

Atrazine metabolite screening in human microsomes: detection of novel reactive metabolites and glutathione adducts by LC-MS.

Metabolism of a new herbicide, [(14)c]pyribenzoxim, in rice.

Changes in serum concentrations of polychlorinated biphenyls (PCBs), hydroxylated PCB metabolites and pentachlorophenol during pregnancy.

Metabolic sugar signal promotes Arabidopsis meristematic proliferation via G2.

The impact of uptake, translocation and metabolism on the differential selectivity between blackgrass and wheat for the herbicide pyroxsulam.

Effects of exogenous glutathione on arsenic burden and NO metabolism in brain of mice exposed to arsenite through drinking water.

[Modulation of T1R chemosensory receptors for sweet nutrients - new paradigms in metabolic regulation].

The impact of a rice based diet on urinary arsenic.

Arsenic methylation efficiency increases during the first trimester of pregnancy independent of folate status.

Phytotoxic and antifungal metabolites from *Curvularia* sp. FH01 isolated from the gut of *Atractomorpha sinensis*.

Increased oxidative/nitrosative stress markers measured non-invasively in patients with high 2,3,7,8-tetrachloro-dibenzo-p-dioxin plasma level.

Structure-based rational design of novel hit compounds for pyruvate dehydrogenase multienzyme complex E1 components from *Escherichia coli*.

Secondary metabolite profile in induced tetraploids of wild *Solanum commersonii* Dun.

17 β -estradiol protects the lung against acute injury: possible mediation by vasoactive intestinal polypeptide.

Antiplatelet effect by p-cresol, a uremic and environmental toxicant, is related to inhibition of reactive oxygen species, ERK/p38 signaling and thromboxane A2 production.

Activation of the aryl hydrocarbon receptor by TCDD inhibits mammary tumor metastasis in a syngeneic mouse model of breast cancer.

Protective effects of N-acetylcysteine against arsenic-induced oxidative stress and reprotoxicity in male mice.

The OBELIX project: early life exposure to endocrine disruptors and obesity.

Biotransformation enzyme-dependent formation of micronucleus and multinuclei in cell line V79-hCYP2E1-hSULT1A1 by 2-nitropropane and N-nitrosodimethylamine.

Identification of aryl hydrocarbon receptor binding targets in mouse hepatic tissue treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Low-level subchronic arsenic exposure from prenatal developmental stages to adult life results in an impaired glucose homeostasis.

Polymorphism of the aryl-hydrocarbon receptor gene in intron 10 of human cancers.

Endocrine disrupting chemicals and disease susceptibility.

Retinoic acid drives aryl hydrocarbon receptor expression and is instrumental to dioxin-induced toxicity during palate development.

Discovery of potent, selective, and orally bioavailable alkynylphenoxyacetic acid CRTH2 (DP2) receptor antagonists for the treatment of allergic inflammatory diseases.

The possible roles of environmental factors and the aryl hydrocarbon receptor in the prevalence of thyroid diseases in Vietnam era veterans.

Arsenicals affect base excision repair by several mechanisms.

Inhibition of fatty acid amide hydrolase suppresses referred hyperalgesia induced by bladder inflammation.

Comparative toxicity of arsenic metabolites in human bladder cancer EJ-1 cells.

Synthesis and evaluation of novel carbon-11 labeled oxopurine analogues for positron emission tomography imaging of translocator protein (18 kDa) in peripheral organs.

Discovery and biological characterization of 1-(1H-indol-3-yl)-9H-pyrido[3,4-b]indole as an aryl hydrocarbon receptor activator generated by photoactivation of tryptophan by sunlight.

Immune interactions in endometriosis.

Colonic contribution to uremic solutes.

2,4-dinitrophenol (DNP): a weight loss agent with significant acute toxicity and risk of death.

Aryl hydrocarbon receptor and aryl hydrocarbon nuclear translocator expression in human and rat placentas and transcription activity in human trophoblast cultures.

Cyanogenic glucosides in the biological warfare between plants and insects: the Burnet moth-Birdsfoot trefoil model system.

Metabolomics analysis reveals elevation of 3-indoxyl sulfate in plasma and brain during chemically-induced acute kidney injury in mice: investigation of nicotinic acid receptor agonists.

Comparison of the concentrations of polychlorinated biphenyls and dioxins in mothers affected by the Yusho incident and their children.

Polychlorinated biphenyls and organochlorine pesticides in plasma predict development of type 2 diabetes in the elderly: the prospective investigation of the vasculature in Uppsala Seniors (PIVUS) study.

Identification of differentially expressed genes in the livers of chronically i-As-treated hamsters.

Preconception omega-3 fatty acid supplementation of adult male mice with a history of developmental 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure prevents preterm birth in unexposed female partners.

Genetic polymorphisms in glutathione S-transferase (GST) superfamily and risk of arsenic-induced urothelial carcinoma in residents of southwestern Taiwan.

Environmental factors and endometriosis.

Could Malassezia yeasts be implicated in skin carcinogenesis through the production of aryl-hydrocarbon receptor ligands?

The effect of the uremic toxin cyanate (CNO²⁻) on anaerobic cysteine metabolism and oxidative processes in the rat liver: a protective effect of lipoate.

Effect of oral exposure to fenitrothion and 3-methyl-4-nitrophenol on splenic cell populations and histopathological alterations in spleen in Wistar rats.

Defects in myoglobin oxygenation in K(ATP)-deficient mouse hearts under normal and stress conditions characterized by near infrared spectroscopy and imaging.

Analysis of arsenic metabolites in HepG2 and AS3MT-transfected cells.

Metabolomic analysis of liver and skeletal muscle tissues in C57BL/6J and DBA/2J mice exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Reproductive toxicity parameters and biological monitoring in occupationally and environmentally boron-exposed persons in Bandirma, Turkey.

Relative survival after exposure to polychlorinated biphenyls and dioxins: a follow-up of Japanese patients affected in the Yusho incident.

Characterization of estrogen quinone-derived protein adducts and their identification in human serum albumin derived from breast cancer patients and healthy controls.

Perinatal exposure to low doses of dioxin can permanently impair human semen quality.

Association between body mass index and arsenic methylation efficiency in adult women from southwest U.S. and northwest Mexico.

Plasma levels of polychlorinated biphenyls and risk of cutaneous malignant melanoma: a preliminary study.

A novel in vitro pancreatic carcinogenesis model.

[Time serial changes in the concentrations of the related agents to fetal Yusho--dioxin-like PCBs and PCBs].

Uremic toxins and oral adsorbents.

Comparison of plasma and dry blood spots as samples for the determination of nitrofurantoin (NTBC) by high-performance liquid chromatography-tandem mass spectrometry. Study of the stability of the samples at different temperatures.

Perspectives on the potential involvement of the AH receptor-dioxin axis in cardiovascular disease.

Activation of c-Src/HER1/STAT5b and HER1/ERK1/2 signaling pathways and cell migration by hexachlorobenzene in MDA-MB-231 human breast cancer cell line.

Environmental toxicants and the developing immune system: a missing link in the global battle against infectious disease?

Prenatal TCDD in mice increases adult autoimmunity.

Metabolic stress modulates motor patterning via AMP-activated protein kinase.

Metabolic profile and assessment of occupational arsenic exposure in copper- and steel-smelting workers in China.

The nutritive value of grasspea (*Lathyrus sativus*) and allied species, their toxicity to animals and the role of malnutrition in neurotoxicity.

Gene expression alterations in immune system pathways in the thymus after exposure to immunosuppressive chemicals.

p-Cresyl sulphate and indoxyl sulphate predict progression of chronic kidney disease.

On the biomarkers and mechanisms of konzo, a distinct upper motor neuron disease associated with food (cassava) cyanogenic exposure.

Beneficial network effects of methylene blue in an amnesic model.

Effect of insulin-like growth factors on lung development in a nitrofen-induced CDH rat model.

Applicability of an exaggerated forearm wash test for efficacy testing of two corticosteroids, tacrolimus and glycerol, in topical formulations against skin irritation induced by two different irritants.

Resveratrol (3,5,4'-trihydroxystilbene) protects pregnant mother and fetus from the immunotoxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Simultaneous exposure of non-diabetics to high levels of dioxins and mercury increases their risk of insulin resistance.

[Pharmacokinetics of iron medication and efficacy of therapy with oral iron supplementation].

The association between urinary concentrations of dichlorophenol pesticides and obesity in children.

Metformin represses self-renewal of the human breast carcinoma stem cells via inhibition of estrogen receptor-mediated OCT4 expression.

An evaluation of single nucleotide polymorphisms in the human aryl hydrocarbon receptor-interacting protein (AIP) gene.

Metabolomic study of a rat fever model induced with 2,4-dinitrophenol and the therapeutic effects of a crude drug derived from *Coptis chinensis*.

Acute arsine poisoning confirmed by speciation analysis of arsenic compounds in the plasma and urine by HPLC-ICP-MS.

Gene polymorphisms of glutathione S-transferase omega 1 and 2, urinary arsenic methylation profile and urothelial carcinoma.

Inhibition of hexokinase leads to neuroprotection against excitotoxicity in organotypic hippocampal slice culture.

Carcinogenic effects of "whole-life" exposure to inorganic arsenic in CD1 mice.

Prenatal treatment with retinoic acid activates parathyroid hormone-related protein signaling in the nitrofen-induced hypoplastic lung.

Functional Characterization of Hypertrehalosemic Hormone Receptor in Relation to Hemolymph Trehalose and to Oxidative Stress in the Cockroach *Blattella germanica*.

Actions of juglone on energy metabolism in the rat liver.

Effect of dietary nitrogen content on the urine metabolite profile of dairy cows assessed by nuclear magnetic resonance (NMR)-based metabolomics.

In vitro propagation of *Cichorium intybus* L. and quantification of enhanced secondary metabolite (esculin).

Analysis of thyroid hormones in serum of Baikal seals and humans by liquid chromatography-tandem mass spectrometry (LC-MS/MS) and immunoassay methods: application of the LC-MS/MS method to wildlife tissues.

The constitutively active Ah receptor (CA-AhR) mouse as a model for dioxin exposure - effects in reproductive organs.

Bayer CropScience's position on the findings of glufosinate and its metabolite.

All-trans retinoic acid protects against arsenic-induced uterine toxicity in female Sprague-Dawley rats.

TRPV1, TRPA1, and CB1 in the isolated vagus nerve--axonal chemosensitivity and control of neuropeptide release.

Licorice extract increases cyclophosphamide teratogenicity by upregulating the expression of cytochrome P-450 2B mRNA.

Molecular mechanisms of cold-induced CYP1A activation in rat liver microsomes.

Rat H9c2 cardiac myocytes are sensitive to arsenite due to a modest activation of transcription factor Nrf2.

Quantitation of benzo[a]pyrene metabolic profiles in human bronchoalveolar (H358) cells by stable isotope dilution liquid chromatography-atmospheric pressure chemical ionization mass spectrometry.

Drosophila microbiome modulates host developmental and metabolic homeostasis via insulin signaling.

Dose-dependent urinary phenotype of inorganic arsenic methylation in mice with a focus on trivalent methylated metabolites.

Stereoselective metabolism of fenoxaprop-ethyl and its chiral metabolite fenoxaprop in rabbits.

Species diversity, community dynamics, and metabolite kinetics of the microbiota associated with traditional ecuadorian spontaneous cocoa bean fermentations.

Construction and characterization of hepatocyte nuclear factor HNF4alpha1 over-expressing cell line derived from human hepatoma HepG2 cells.

Transcriptional modulation of the NAD(P)H:quinone oxidoreductase 1 by mercury in human hepatoma HepG2 cells.

In vitro assessment of retinoic acid and aryl hydrocarbon receptor activity of treated effluent from 39 wastewater-treatment plants in Victoria, Australia.

Voltammetric and amperometric determination of 2,4-dinitrophenol metabolites.

An inter-laboratory comparison of urinary 3-hydroxypropylmercapturic acid measurement demonstrates good reproducibility between laboratories.

[Co-metabolism of dual culture in the degradation of phenolic compounds].

Mutagenicity and anti-mutagenicity of *Acanthopanax divaricatus* var. *albeofructus*.

Developmental effects related to angiogenesis and osteogenic differentiation in Salmon larvae continuously exposed to dioxin-like 3,3',4,4'-tetrachlorobiphenyl (congener 77).

Transient receptor potential A1 channels: insights into cough and airway inflammatory disease.

In vitro modulation of intracellular receptor signaling and cytotoxicity induced by extracts of cyanobacteria, complex water blooms and their fractions.

Hepatic in vitro toxicity assessment of PBDE congeners BDE47, BDE153 and BDE154 in Atlantic salmon (*Salmo salar* L.).

The effect of uremic toxin cyanate (OCN²⁻) on anaerobic sulfur metabolism and prooxidative processes in the rat kidney: a protective role of lipoate.

Oxidative modifications of proteins by sodium arsenite in human umbilical vein endothelial cells.

A highly efficient rice green tissue protoplast system for transient gene expression and studying light/chloroplast-related processes.

In vitro effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on ovarian, pituitary, and pineal function in pigs.

Photoirradiation of dehydropyrrolizidine alkaloids--formation of reactive oxygen species and induction of lipid peroxidation.

Lonidamine extends lifespan of adult *Caenorhabditis elegans* by increasing the formation of mitochondrial reactive oxygen species.

Zebrafish eleutheroembryos provide a suitable vertebrate model for screening chemicals that impair thyroid hormone synthesis.

On the antioxidant properties of kynurenic acid: free radical scavenging activity and inhibition of oxidative stress.

A metabolic system-wide characterisation of the pig: a model for human physiology.

Groundwater from infiltration galleries used for small public water supply systems: contamination with pesticides and endocrine disruptors.

Application of an integrated testing strategy to the U.S. EPA endocrine disruptor screening program.

Chemical class-specific gene expression changes in the zebrafish embryo after exposure to glycol ether alkoxy acids and 1,2,4-triazole antifungals.

A novel metabolic pathway for biodegradation of DDT by the white rot fungi, *Phlebia lindtneri* and *Phlebia brevispora*.

Enhancing effect of zinc on L-histidine transport in rat lung microvascular endothelial cells.

Paclitaxel conjugation with the analog of the gonadotropin-releasing hormone as a targeting moiety.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on steroid concentrations in blood and gonads of chicken embryo.

Effect of the traditional Chinese medicine tongxinluo on endothelial dysfunction rats studied by using urinary metabolomics based on liquid chromatography-mass spectrometry.

Hippocampal metabolomics reveals 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity associated with ageing in Sprague-Dawley rats.

Severe cyclophosphamide-induced haemorrhagic cystitis treated with hyperbaric oxygen.

Characterization of novel ligands of ER¹, ER², and PPAR³: the case of halogenated bisphenol A and their conjugated metabolites.

Organic anion transporters play an important role in the uptake of p-cresyl sulfate, a uremic toxin, in the kidney.

The cross-pathway control system regulates production of the secondary metabolite toxin, sirodesmin PL, in the ascomycete, *Leptosphaeria maculans*.

Integration of genome-wide computation DRE search, AhR CHIP-chip and gene expression analyses of TCDD-elicited responses in the mouse liver.

Herbal bioactivation, molecular targets and the toxicity relevance.

[Thiamine and its derivatives in the regulation of cell metabolism].

Validation of a simple RP-HPLC method developed for the quantification of meta-cresol in parathyroid hormones formulation.

Effect of oral coadministration of artesunate with ferrous sulfate on rat liver mitochondrial membrane permeability transition.

Reduced cytochrome P4501A activity and recovery from oxidative stress during subchronic benzo[a]pyrene and benzo[e]pyrene treatment of rainbow trout.

Coordinate regulation of cytochrome P450 1a1 expression in mouse liver by the aryl hydrocarbon receptor and the beta-catenin pathway.

Urinary concentrations of phthalates and phenols in a population of Spanish pregnant women and children.

A study of the relative importance of the peroxiredoxin-, catalase-, and glutathione-dependent systems in neural peroxide metabolism.

Effect of magnesium deficiency on antioxidant status and cadmium toxicity in rice seedlings.

Arsenic and fluoride induce neural progenitor cell apoptosis.

Linking energy metabolism to dysfunctions in mitochondrial respiration--a metabolomics in vitro approach.

Hepatic effects of a highly purified 2,2',3,4,4',5,5'-heptachlorbiphenyl (PCB 180) in male and female rats.

Lack of change in microRNA expression in adult mouse liver following treatment with benzo(a)pyrene despite robust mRNA transcriptional response.

Enhancement of cadmium bioremediation by endophytic bacterium *Bacillus* sp. L14 using industrially used metabolic inhibitors (DCC or DNP).

Protopine and allocryptopine increase mRNA levels of cytochromes P450 1A in human hepatocytes and HepG2 cells independently of AhR.

Mitochondrial dysfunction and insulin resistance: the contribution of dioxin-like substances.

Urinary arsenic metabolites of subjects exposed to elevated arsenic present in coal in Shaanxi Province, China.

Biochemical markers of contamination in fish toxicity tests.

Mercapturic acids as metabolites of alkylating substances in urine samples of German inhabitants.

Arsenic affects expression and processing of amyloid precursor protein (APP) in primary neuronal cells overexpressing the Swedish mutation of human APP.

Perinatal TCDD exposure alters developmental neuroendocrine system.

Acute exposure to 2,4-dinitrophenol alters zebrafish swimming performance and whole body triglyceride levels.

Effect of sodium arsenite dose administered in the drinking water on the urinary bladder epithelium of female arsenic (+3 oxidation state) methyltransferase knockout mice.

Activation of the aryl hydrocarbon receptor during pregnancy in the mouse alters mammary development through direct effects on stromal and epithelial tissues.

Bacterial decolorization of black liquor in axenic and mixed condition and characterization of metabolites.

An untargeted multi-technique metabolomics approach to studying intracellular metabolites of HepG2 cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The differentiation of cardiomyocytes from mouse embryonic stem cells is altered by dioxin.

[Biodegradation of o-chlorophenol by photosynthetic bacteria under co-metabolism].

Mechanisms of induction of cytosolic and microsomal glutathione transferase (GST) genes by xenobiotics and pro-inflammatory agents.

Efficient sequential synthesis of PET Probes of the COX-2 inhibitor [11C]celecoxib and its major metabolite [11C]SC-62807 and in vivo PET evaluation.

Fluorescence in situ hybridization mapping of six loci containing genes involved in the dioxin metabolism of domestic bovids.

Identification of triclosan intermediates produced by oxidative degradation using TiO₂ in pure water and their endocrine disrupting activities.

Regulation by heat shock protein 27 of osteocalcin synthesis in osteoblasts.

Novel hormonal delivery method using the ink-jet technology: application to pulmonary insulin therapies.

Effect of dioxin exposure on several indices of blood redox status in lactating buffalo cows.

In vitro toxicity profiling of ultrapure non-dioxin-like polychlorinated biphenyl congeners and their relative toxic contribution to PCB mixtures in humans.

Dynamics and species diversity of communities of lactic acid bacteria and acetic acid bacteria during spontaneous cocoa bean fermentation in vessels.

Free radical production, antioxidant capacity, and oxidative stress response signatures in fibroblasts from Lewis dwarf rats: effects of life span-extending peripubertal GH treatment.

2,3,7,8-Tetrachlorodibenzo-p-dioxin impairs iron homeostasis by modulating iron-related proteins expression and increasing the labile iron pool in mammalian cells.

Functional characterization of the CKRC1/TAA1 gene and dissection of hormonal actions in the Arabidopsis root.

Genetic control of a cytochrome P450 metabolism-based herbicide resistance mechanism in *Lolium rigidum*.

Effects of chlorinated acetates on the glutathione metabolism and on glycolysis of cultured astrocytes.

Dioxin exposure of human CD34+ hemopoietic cells induces gene expression modulation that recapitulates its in vivo clinical and biological effects.

Preabsorptive metabolism of sodium arsenate by anaerobic microbiota of mouse cecum forms a variety of methylated and thiolated arsenicals.

Differences in TCDD-elicited gene expression profiles in human HepG2, mouse Hepa1c1c7 and rat H4IIE hepatoma cells.

Vertically integrated human P450 and oxygen sensing film for the assays of P450 metabolic activities.

Activity-based protein profiling of organophosphorus and thiocarbamate pesticides reveals multiple serine hydrolase targets in mouse brain.

[Relationship between half-lives of blood dioxins and possible metabolic mechanism].

[Effects of dioxin-related compounds on bone metabolism].

Correlations of PCBs, DIOXIN, and PBDE with TSH in children's blood in areas of computer E-waste recycling.

2,3,7,8-tetrachlorodibenzo-p-dioxin potentially attenuates the gene expression of pituitary gonadotropin β^2 -subunits in a fetal age-specific fashion: a comparative study using cultured pituitaries.

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters sebaceous gland cell differentiation in vitro.

Standard operating procedures for pre-analytical handling of blood and urine for metabolomic studies and biobanks.

Structural basis of species differences between human and experimental animal CYP1A1s in metabolism of 3,3',4,4',5-pentachlorobiphenyl.

Acute disruption of bone marrow hematopoiesis by benzo(a)pyrene is selectively reversed by aryl hydrocarbon receptor-mediated processes.

Estrogenic and androgenic activities in total plasma measured with reporter-gene bioassays: relevant exposure measures for endocrine disruptors in epidemiologic studies?

Production of marker-free disease-resistant potato using isopentenyl transferase gene as a positive selection marker.

Metabolism of motile zebrafish sperm.

Cyclooxygenase-2 contributes to functional changes seen on experimental hemorrhagic cystitis induced by ifosfamide in rat urinary bladder.

A sensitive, rapid and inexpensive way to assay pesticide toxicity based on electrochemical biosensor.

Proteomic mapping of bezafibrate-treated human hepatocytes in primary culture using two-dimensional liquid chromatography.

Adenosine A2 receptors are involved in the activation of ATP-sensitive K⁺ currents during metabolic inhibition in guinea pig ventricular myocytes.

Simultaneous determination of 13 phytohormones in oilseed rape tissues by liquid chromatography-electrospray tandem mass spectrometry and the evaluation of the matrix effect.

Isotopomer enrichment assay for very short chain fatty acids and its metabolic applications.

Strategies for elimination of cyanogens from cassava for reducing toxicity and improving food safety.

Transcriptional response of hepatic largemouth bass (*Micropterus salmoides*) mRNA upon exposure to environmental contaminants.

Comparative study of human and mouse pregnane X receptor agonistic activity in 200 pesticides using in vitro reporter gene assays.

Aryl hydrocarbon receptor activation in lactotropes and gonadotropes interferes with estradiol-dependent and -independent preprolactin, glycoprotein alpha and luteinizing hormone beta gene expression.

Differential enantioselectivity of quizalofop ethyl and its acidic metabolite: direct enantiomeric separation and assessment of multiple toxicological endpoints.

Chlorinated benzenes cause concomitantly oxidative stress and induction of apoptotic markers in lung epithelial cells (A549) at nonacute toxic concentrations.

Polymorphisms in arsenic(+III oxidation state) methyltransferase (AS3MT) predict gene expression of AS3MT as well as arsenic metabolism.

C-reactive protein makes human endothelium stiff and tight.

Tissue residue concentrations of organohalogen and trace elements in adult Pacific salmon returning to the Fraser River, British Columbia, Canada.

Effects of metolachlor on transcription of thyroid system-related genes in juvenile and adult Japanese medaka (*Oryzias latipes*).

Human CYP2S1 metabolizes cyclooxygenase- and lipoxygenase-derived eicosanoids.

Structural insight into human variegate porphyria disease.

Detection of thyroid hormone receptor disruptors by a novel stable in vitro reporter gene assay.

Neural precursor cell proliferation is disrupted through activation of the aryl hydrocarbon receptor by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Intracellular trafficking of hyaluronic acid-chitosan oligomer-based nanoparticles in cultured human ocular surface cells.

Regulation and dysregulation of vitellogenin mRNA accumulation in daphnids (*Daphnia magna*).

Regulation of benzo[a]pyrene-mediated DNA- and glutathione-adduct formation by 2,3,7,8-tetrachlorodibenzo-p-dioxin in human lung cells.

Polychlorinated dibenzo-p-dioxins and dibenzofurans in different tissues of the cormorants (*Phalacrocorax carbo*) from Dongting Lake, China.

Acute mitochondrial actions of glitazones on the liver: a crucial parameter for their antidiabetic properties.

Three-generation experiment showed female C57BL/6J mice drink drainage canal water containing low level of TCDD-like activity causing high pup mortality.

Hepatic xenobiotic metabolizing enzyme and transporter gene expression through the life stages of the mouse.

Human cytochrome P450 1A1 is a novel target gene of liver X receptor $\hat{\pm}$.

Shellfish and residual chemical contaminants: hazards, monitoring, and health risk assessment along French coasts.

NTP toxicity studies of toxicity studies of 2,4-decadienal (CAS No. 25152-84-5) administered by gavage to F344/N Rats and B6C3F1 mice.

In vitro assessment of iron effect on porcine ovarian granulosa cells: secretory activity, markers of proliferation and apoptosis.

[Analysis of metribuzin and its metabolites in livestock products and seafoods by liquid chromatography-tandem mass spectrometry].

Chlorinated isomers of nonylphenol differ in estrogenic and androgenic activity.

Metabolic response to low-level toxicant exposure in a novel renal tubule epithelial cell system.

Biosynthesis of the cyanogenic glucosides linamarin and lotaustralin in cassava: isolation, biochemical characterization, and expression pattern of CYP71E7, the oxime-metabolizing cytochrome P450 enzyme.

Chronic hyperglycemia reduces substrate oxidation and impairs metabolic switching of human myotubes.

The aryl hydrocarbon receptor pathway and the response to 3-methylcholanthrene are altered in the liver of adrenalectomized rats.

Calcium/calmodulin-dependent protein kinase IV involvement in the pathophysiology of glucotoxicity in rat pancreatic β^2 -cells.

Effects of prenatal exposure to a low dose atrazine metabolite mixture on pubertal timing and prostate development of male Long-Evans rats.

Studies on the synergistic effects of extremely low-frequency magnetic fields and the endocrine-disrupting compound atrazine on the thyroid gland.

Variable toxicological response to the loss of OXPHOS through 1-methyl-4-phenylpyridinium-induced mitochondrial damage and anoxia in diverse neural immortal cell lines.

Relative inhibitory potency of molinate and metabolites with aldehyde dehydrogenase 2: implications for the mechanism of enzyme inhibition.

Mechanisms of olfactory toxicity of the herbicide 2,6-dichlorobenzonitrile: essential roles of CYP2A5 and target-tissue metabolic activation.

Identification of differential hepatic proteins in rare minnow (*Gobiocypris rarus*) exposed to pentachlorophenol (PCP) by proteomic analysis.

Proteomic analysis of diaminochlorotriazine (DACT) adducts in three brain regions of Wistar rats.

Severe systemic intoxication following triclopyr-TEA ingestion.

Diuron biotransformation and its effects on biofilm bacterial community structure.

Upregulation of peripubertal rat Leydig cell steroidogenesis following 24 h in vitro and in vivo exposure to atrazine.

PCB congener specific oxidative stress response by microarray analysis using human liver cell line.

Rasagiline protects against alpha-synuclein induced sensitivity to oxidative stress in dopaminergic cells.

Hydroxytyrosol protects against oxidative damage by simultaneous activation of mitochondrial biogenesis and phase II detoxifying enzyme systems in retinal pigment epithelial cells.

Comparative environmental impacts of glyphosate and conventional herbicides when used with glyphosate-tolerant and non-tolerant crops.

Atrazine binds to the growth hormone-releasing hormone receptor and affects growth hormone gene expression.

Evaluation of single and joint toxic effects of diuron and its main metabolites on natural phototrophic biofilms using a pollution-induced community tolerance (PICT) approach.

Assessing the cancer risk associated with arsenic-contaminated seafood.

[Extreme hyperkalemia in a patient with a new glyphosate potassium herbicide poisoning: report of a case].

Effect of glutathione administration on serum levels of reactive oxygen metabolites in patients with paraquat intoxication: a pilot study.

Differences in sensitivity but not selectivity of xenoestrogen binding to alligator versus human estrogen receptor alpha.

Effects of herbicides and freshwater discharge on water chemistry, toxicity and benthos in a Uruguayan sandy beach.

Impacts of mixtures of herbicides on molecular and physiological responses of the European flounder *Platichthys flesus*.

Hydrolysis of benzonitrile herbicides by soil actinobacteria and metabolite toxicity.

Atrazine reduces reproduction in fathead minnow (*Pimephales promelas*).

Predicting acute complicated glyphosate intoxication in the emergency department.

Repeated pesticide exposure among North Carolina migrant and seasonal farmworkers.

Evaluation of diuron (3-[3,4-dichlorophenyl]-1,1-dimethyl urea) in a two-stage mouse skin carcinogenesis assay.

Evaluation of side-effects of glyphosate mediated control of giant reed (*Arundo donax*) on the structure and function of a nearby Mediterranean river ecosystem.

The effects of simazine, a chlorotriazine herbicide, on pubertal development in the female Wistar rat.

Selective vulnerability of the striatal subregions of C57BL/6 mice to paraquat.

Desmoplastic small round-cell tumor: an adult with previous exposure to agent orange.

The toxic influence of paraquat on hippocampus of mice: involvement of oxidative stress.

Toxic effects and bioaccumulation of the herbicide isoproturon in *Tubifex tubifex* (Oligochaete, Tubificidae): a study of significance of autotomy and its utility as a biomarker.

Assessment of chemical effects on aromatase activity using the H295R cell line.

Discovery of metabolic signatures for predicting whole organism toxicology.

Gene transcription in *Daphnia magna*: effects of acute exposure to a carbamate insecticide and an acetanilide herbicide.

Atrazine affects kidney and adrenal hormones (AHs) related genes expressions of rare minnow (*Gobiocypris rarus*).

Effect of 2,4-dichlorophenoxyacetic acid on milk transfer to the litter and prolactin release in lactating rats.

Formation of a vitamin C conjugate of acrolein and its paraoxonase-mediated conversion into 5,6,7,8-tetrahydroxy-4-oxooctanal.

[Thyroid disruption induced by pentachlorophenol].

[Analysis of cardiac toxicity caused by cyclophosphamide in the H9c2 cell line and isolated and perfused rat hearts].

Urethral carcinoma and hyperplasia in male and female B6C3F1 mice treated with 3,3',4,4'-tetrachloroazobenzene (TCAB).

Herbicide formulation with glyphosate affects growth, acetylcholinesterase activity, and metabolic and hematological parameters in piava (*Leporinus obtusidens*).

Prepubertal exposure to commercial formulation of the herbicide glyphosate alters testosterone levels and testicular morphology.

Impact of alpha-hydroxy-propanodeoxyguanine adducts on DNA duplex energetics: opposite base modulation and implications for mutagenicity and genotoxicity.

Linking toxicant physiological mode of action with induced gene expression changes in *Caenorhabditis elegans*.

Atrazine induces complete feminization and chemical castration in male African clawed frogs (*Xenopus laevis*).

Effects of glyphosate and methidathion on the expression of the Dhb, Vtg, Arnt, CYP4 and CYP314 in *Daphnia magna*.

Perturbation of lipids and glucose metabolism associated with previous 2,4-D exposure: a cross-sectional study of NHANES III data, 1988-1994.

Pesticide use and thyroid disease among women in the Agricultural Health Study.

Acrolein consumption induces systemic dyslipidemia and lipoprotein modification.

Plasma level of malondialdehyde in the cases of acute paraquat intoxication.

Synthesis of sphingosine is essential for oxidative stress-induced apoptosis of photoreceptors.

Influence of environmental parameters on production of the acrolein precursor 3-hydroxypropionaldehyde by *Lactobacillus reuteri* DSMZ 20016 and its accumulation by wine lactobacilli.

Toxicokinetics and recovery studies of dicamba dimethyl amine salt in goats following single oral administration.

Side-effects of glyphosate on the life parameters of *Eriopsis connexa* (Coleoptera: Coccinellidae) in Argentina.

Ovarian folliculogenesis: detrimental effect of prenatal exposure to cyclophosphamide: a preliminary study.

A qualitative meta-analysis reveals consistent effects of atrazine on freshwater fish and amphibians.

Degradation of fifteen emerging contaminants at microg L(-1) initial concentrations by mild solar photo-Fenton in MWTP effluents.

Cytotoxicity and regenerative proliferation as the mode of action for diuron-induced urothelial carcinogenesis in the rat.

P19 neuronal differentiation and retinoic acid metabolism as criteria to investigate atrazine, nitrite, and nitrate developmental toxicity.

Oxidatively generated DNA damage induced by 3-amino-5-mercapto-1,2,4-triazole, a metabolite of carcinogenic amitrole.

Acetaminophen, via its reactive metabolite N-acetyl-p-benzo-quinoneimine and transient receptor potential ankyrin-1 stimulation, causes neurogenic inflammation in the airways and other tissues in rodents.

Exposure to hydrogen peroxide induces oxidation and activation of AMP-activated protein kinase.

Polymorphisms in one-carbon metabolism pathway genes, urinary arsenic profile, and urothelial carcinoma.

Influence of cinnamaldehyde on viral myocarditis in mice.

Insulinotropic effect of cinnamaldehyde on transcriptional regulation of pyruvate kinase, phosphoenolpyruvate carboxykinase, and GLUT4 translocation in experimental diabetic rats.

Selective stimulation by cinnamaldehyde of progesterone secretion in human adrenal cells.

Changes in testicular morphology and steroidogenesis in adult rats exposed to Atrazine.

Cinnamaldehyde impairs high glucose-induced hypertrophy in renal interstitial fibroblasts.

Impact of smoking and chewing tobacco on arsenic-induced skin lesions.

Cinnamaldehyde in feedlot cattle diets: intake, growth performance, carcass characteristics, and blood metabolites.

Ameliorative effect of the cinnamon oil from *Cinnamomum zeylanicum* upon early stage diabetic nephropathy.

Potential effects of the herbicide Diuron on mammary and urinary bladder two-stage carcinogenesis in a female Swiss mouse model.

Dioxin exposure and insulin resistance in Taiwanese living near a highly contaminated area.

Substance MCS-18 isolated from *Helleborus purpurascens* is a potent antagonist of the capsaicin receptor, TRPV1, in rat cultured sensory neurons.

Comparison of immunoassay and HPLC-MS/MS used to measure urinary metabolites of atrazine, metolachlor, and chlorpyrifos from farmers and non-farmers in Iowa.

Urinary biomarker, dermal, and air measurement results for 2,4-D and chlorpyrifos farm applicators in the Agricultural Health Study.

Dose response to cinnamaldehyde supplementation in growing beef heifers: ruminal and intestinal digestion.

Effects of repeated seafood consumption on urinary excretion of arsenic species by volunteers.

Enantioselective environmental behavior of the chiral herbicide fenoxaprop-ethyl and its chiral metabolite fenoxaprop in soil.

Metabolism and persistence of atrazine in several field soils with different atrazine application histories.

Effects of rotenone and other mitochondrial complex I inhibitors on the brine shrimp *Artemia*.

Metabolic fate of [^{14}C]diuron and [^{14}C]linuron in wheat (*Triticum aestivum*) and radish (*Raphanus sativus*).

The herbicide ketoclozoxone inhibits 1-deoxy-D-xylulose 5-phosphate synthase in the 2-C-methyl-D-erythritol 4-phosphate pathway and shows antibacterial activity against *Haemophilus influenzae*.

A systematic investigation of *Escherichia coli* central carbon metabolism in response to superoxide stress.

Modulation of embryo-forming capacity in culture through the expression of Brassica genes involved in the regulation of the shoot apical meristem.

Biodegradation pathway of mesotrione: complementarities of NMR, LC-NMR and LC-MS for qualitative and quantitative metabolic profiling.

Association of genetic variation in cystathionine-beta-synthase and arsenic metabolism.

Automated sample treatment with the injection of large sample volumes for the determination of contaminants and metabolites in urine.

Enhanced degradation and soil depth effects on the fate of atrazine and major metabolites in Colorado and Mississippi soils.

Coordination of frontline defense mechanisms under severe oxidative stress.

Genetic polymorphism of As3MT and delayed urinary DMA excretion after organic arsenic intake from oyster ingestion.

Residues of the herbicide fenoxaprop-P-ethyl, its agronomic safener isoxadifen-ethyl and their metabolites in rice after field application.

Distribution and metabolism of four different dimethylated arsenicals in hamsters.

Interaction of paraquat with calf thymus DNA: a terbium(III) luminescent probe and multispectral study. [Experimental research on Paraquat clearance rate after hemoperfusion adsorption].

Detoxification without intoxication: herbicide safeners activate plant defense gene expression.

Differential oxidative metabolism and 5-ketoclozoxone accumulation are involved in *Echinochloa phyllopogon* resistance to clomazone.

An improved high-performance liquid chromatography-tandem mass spectrometric method to measure atrazine and its metabolites in human urine.

Determination of glyphosate and its metabolites in plant material by reversed-polarity CE with indirect absorptiometric detection.

NMR structure of duplex DNA containing the alpha-OH-PdG.dA base pair: a mutagenic intermediate of acrolein.

Development and validation of a direct LC-MS-MS method to determine the acrolein metabolite 3-HPMA in urine.

Enantioselective degradation in sediment and aquatic toxicity to *Daphnia magna* of the herbicide lactofen enantiomers.

Iron and its complexation by phenolic cellular metabolites: from oxidative stress to chemical weapons.

Structural and functional changes in the insulin molecule produced by oxidative stress.

High-throughput gene expression analysis of intestinal intraepithelial lymphocytes after oral feeding of carvacrol, cinnamaldehyde, or Capsicum oleoresin.

Aryl hydrocarbon receptor nuclear translocator in hepatocytes is required for aryl hydrocarbon receptor-mediated adaptive and toxic responses in liver.

Thyroid follicular lesions induced by oral treatment for 2 years with 2,3,7,8-tetrachlorodibenzo-p-dioxin and dioxin-like compounds in female Harlan Sprague-Dawley rats.

Early life growth hormone treatment shortens longevity and decreases cellular stress resistance in long-lived mutant mice.

Intracellular ROS level is increased in fibroblasts of triple A syndrome patients.

The aryl hydrocarbon receptor-interacting protein (AIP) is required for dioxin-induced hepatotoxicity but not for the induction of the Cyp1a1 and Cyp1a2 genes.

Dioxin toxicity in vivo results from an increase in the dioxin-independent transcriptional activity of the aryl hydrocarbon receptor.

Toxicology and carcinogenesis studies of 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (CAS No. 31508-00-6) in female harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 3,3',4,4'-tetrachloroazobenzene (TCAB) (CAS No. 14047-09-7) in Harlan Sprague-Dawley rats and B6C3F1 mice (gavage studies).

A cluster of inflammatory breast cancer (IBC) in an office setting: additional evidence of the importance of environmental factors in IBC etiology.

Interrelationship between exposure to PCDD/Fs and hypertension in metabolic syndrome in Taiwanese living near a highly contaminated area.

A single prenatal exposure to the endocrine disruptor 2,3,7,8-tetrachlorodibenzo-p-dioxin alters developmental myelination and remyelination potential in the rat brain.

Body mass index, agricultural pesticide use, and cancer incidence in the Agricultural Health Study cohort.

NMR-based metabonomic analysis of the hepatotoxicity induced by combined exposure to PCBs and TCDD in rats.

Creation of a novel peptide with enhanced nuclear localization in prostate and pancreatic cancer cell lines.

Long-lasting effects of chemical hypoxia on spinal cord function in tadpoles.

Non-genomic action of TCDD to induce inflammatory responses in HepG2 human hepatoma cells and in liver of C57BL/6J mice.

Protective effects of crude garlic by reducing iron-mediated oxidative stress, proliferation and autophagy in rats.

Dioxins, the aryl hydrocarbon receptor and the central regulation of energy balance.

[Hypothyroidism as the result of drug interaction between ferrous sulfate and levothyroxine].

Identification and investigation of mitochondria lacking cytochrome c oxidase activity in axons.

A survey of phytotoxic microbial and plant metabolites as potential natural products for pest management.

The novel role of fenofibrate in preventing nicotine- and sodium arsenite-induced vascular endothelial dysfunction in the rat.

Exposure to selected endocrine disruptors and neonatal outcome of 86 healthy boys from Nice area (France).

Phenotypic anchoring of gene expression after developmental exposure to aryl hydrocarbon receptor ligands in zebrafish.

Neuroprotective effect of curcumin in arsenic-induced neurotoxicity in rats.

Genome-wide expression analysis of human in vivo irritated epidermis: differential profiles induced by sodium lauryl sulfate and nonanoic acid.

Non-dioxin-like polychlorinated biphenyls and risk of endometriosis.

Neurodevelopmental toxicity of prenatal polychlorinated biphenyls (PCBs) by chemical structure and activity: a birth cohort study.

Mechanistic insights into the events that lead to synergistic induction of interleukin 6 transcription upon activation of the aryl hydrocarbon receptor and inflammatory signaling.

'Fatal 2,4-dinitrophenol poisoning... coming to a hospital near you'.

Does polyamine oxidase activity influence the oxidative metabolism of children who suffer of diabetes mellitus?

A novel role for the dioxin receptor in fatty acid metabolism and hepatic steatosis.

Activation of the aryl hydrocarbon receptor pathway may ameliorate dextran sodium sulfate-induced colitis in mice.

Serological cardiovascular and mortality risk predictors in dialysis patients receiving sevelamer: a prospective study.

Elevated soluble transferrin receptor levels reflect increased erythropoietic drive rather than iron deficiency in pediatric sickle cell disease.

Arsenic abrogates the estrogen-signaling pathway in the rat uterus.

Sub-chronic arsenic exposure aggravates nephrotoxicity in experimental diabetic rats.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) reverses hyperglycemia in a type II diabetes mellitus rat model by a mechanism unrelated to PPAR gamma.

A pharmacokinetic and safety study of intravenous arsenic trioxide in adult cancer patients with renal impairment.

Metabolomic analysis of uremic toxins by liquid chromatography/electrospray ionization-tandem mass spectrometry.

Malaria, *Plasmodium falciparum* and its apicoplast.

Functional studies of RYR1 mutations in the skeletal muscle ryanodine receptor using human RYR1 complementary DNA.

Oxygen-dependence of metabolic rate in the muscles of craniates.

A stochastic whole-body physiologically based pharmacokinetic model to assess the impact of inter-individual variability on tissue dosimetry over the human lifespan.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces disruption of glands of the prostate and fibrosis in rhesus monkeys.

Arsenic exposure in utero and nonepidermal proliferative response in adulthood in Tg.AC mice.

Maternal dioxin exposure combined with a diet high in fat increases mammary cancer incidence in mice.

Progesterone receptor membrane component 1 (Pgrmc1): a heme-1 domain protein that promotes tumorigenesis and is inhibited by a small molecule.

Disruption of CLOCK-BMAL1 transcriptional activity is responsible for aryl hydrocarbon receptor-mediated regulation of Period1 gene.

Kynurenic acid is a potent endogenous aryl hydrocarbon receptor ligand that synergistically induces interleukin-6 in the presence of inflammatory signaling.

Metabolic alterations in the hamster co-infected with *Schistosoma japonicum* and *Necator americanus*.

Incidence and risk factors for the development of anemia following gastric bypass surgery.

Complex gene-chemical interactions: hepatic uroporphyrin as a paradigm.

N-aryltriazole ribonucleosides with potent antiproliferative activity against drug-resistant pancreatic cancer.

Differential regulation of the dioxin-induced Cyp1a1 and Cyp1b1 genes in mouse hepatoma and fibroblast cell lines.

Dietary administration of sodium arsenite to rats: relations between dose and urinary concentrations of methylated and thio-metabolites and effects on the rat urinary bladder epithelium.

Effect of anion channel blockers on L-arginine action in spermatozoa from asthenospermic men.

Temporal and anatomical sensitivities to the aryl hydrocarbon receptor agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin leading to premature acyclicity with age in rats.

Free p-cresylsulphate is a predictor of mortality in patients at different stages of chronic kidney disease.

Antioxidant, antimutagenic, and antidiabetic activities of edible leaves from *Cnidocolus chayamansa* Mc. Vaugh.

Maintenance of elevated versus physiological iron indices in non-anaemic patients with chronic kidney disease: a randomized controlled trial.

Speciation of arsenic trioxide penetrates into cerebrospinal fluid in patients with acute promyelocytic leukemia.

Colon cancer chemopreventive activities of pomegranate ellagitannins and urolithins.

AHR activation by tryptophan--pathogenic hallmark of Th17-mediated inflammation in eosinophilic fasciitis, eosinophilia-myalgia-syndrome and toxic oil syndrome?

beta-TrCP inhibition reduces prostate cancer cell growth via upregulation of the aryl hydrocarbon receptor.

Deliberate poisoning with dinitrophenol (DNP): an unlicensed weight loss pill.

Bronchopulmonary innervation defects in infants and rats with congenital diaphragmatic hernia.

Growth and thyroid function in children with in utero exposure to dioxin: a 5-year follow-up study.

Ground-glass-like hepatocellular inclusions in the course of adult-onset Still's disease.

Increased levels of total P-Cresylsulphate and indoxyl sulphate are associated with coronary artery disease in patients with diabetic nephropathy.

[Neurodevelopmental disorders in response to hormonally active environmental pollutants].

Inhibitory effects of uraemic toxins 3-indoxyl sulfate and p-cresol on losartan metabolism in vitro.

C-11 radiochemistry in cancer imaging applications.

Function and expression of ATP-binding cassette transporters in cultured human Y79 retinoblastoma cells.

Aryl hydrocarbon receptor functions as a potent coactivator of E2F1-dependent transcription activity.

Mammalian Per-Arnt-Sim proteins in environmental adaptation.

The involvement of hypophyseal-gonadal and hypophyseal-adrenal axes in arsenic-mediated ovarian and uterine toxicity: modulation by hCG.

Molecular mechanisms of the physiological functions of the aryl hydrocarbon (dioxin) receptor, a multifunctional regulator that senses and responds to environmental stimuli.

Increase in in utero exposure to a migrant, 4,4'-butylidenebis(6-t-butyl-m-cresol), from nitrile-butadiene rubber gloves on brain aromatase activity in male rats.

Receptor- and reactive intermediate-mediated mechanisms of teratogenesis.

Bidirectional correlation of NMR and capillary electrophoresis fingerprints: a new approach to investigating *Schistosoma mansoni* infection in a mouse model.

Disturbance of parathyroid hormone-related protein signaling in the nitrofen-induced hypoplastic lung.

Circular dichroism, optical rotation and absolute configuration of 2-cyclohexenone-cis-diol type phenol metabolites: redefining the role of substituents and 2-cyclohexenone conformation in electronic circular dichroism spectra.

A sub-nanomole level electrochemical method for determination of prochloraz and its metabolites based on medical stone doped disposable electrode.

Evidence supporting a role for N-(3-formyl-3,4-dehydropiperidino)lysine accumulation in Müller glia dysfunction and death in diabetic retinopathy.

Dioxins and human toxicity.

The use of in vitro toxicity data and physiologically based kinetic modeling to predict dose-response curves for in vivo developmental toxicity of glycol ethers in rat and man.

Effects of the compounds MV8608 and MV8612 obtained from *Mandevilla velutina* in the model of hemorrhagic cystitis induced by cyclophosphamide in rats.

Effect of biochemical stimulants on biomass productivity and metabolite content of the microalga, *Chlorella sorokiniana*.

Numerical variations and spontaneous malformations in the early embryos of the Korean salamander, *Hynobius leechii*, in the farmlands of Korea.

Detoxifying carcinogenic polyhalogenated quinones by hydroxamic acids via an unusual double Lossen rearrangement mechanism.

Metabolism and toxicity of menthofuran in rat liver slices and in rats.

Relationship between persistent halogenated organic contaminants and TCDD-toxic equivalents on EROD activity and retinoid and thyroid hormone status in northern fulmars.

Evaluation of a bioluminescent mouse model expressing aromatase PII-promoter-controlled luciferase as a tool for the study of endocrine disrupting chemicals.

Metabolic stress-induced programmed cell death in *Xanthomonas*.

Stability, preservation, and quantification of hormones and estrogenic and androgenic activities in surface water runoff.

Expression of *pax6* and *sox2* in adult olfactory epithelium.

In vivo alternative assessment of the chemicals that interfere with anterior pituitary POMC expression and interrenal steroidogenesis in POMC: EGFP transgenic zebrafish.

Discriminating between different acute chemical toxicities via changes in the daphnid metabolome.

Acute toxicity of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) in male Sprague-Dawley rats: effects on hepatic oxidative stress, glutathione and metals status.

Improved syntheses of non-dioxin-like polychlorinated biphenyls (PCBs) and some of their sulfur-containing metabolites.

Alkylation of the tumor suppressor PTEN activates Akt and β -catenin signaling: a mechanism linking inflammation and oxidative stress with cancer.

Debate on GMOs health risks after statistical findings in regulatory tests.

On-line drug metabolites generation and their subsequent target analysis by capillary zone electrophoresis with UV-absorption detection.

Radiosynthesis of the candidate beta-amyloid radioligand [(11)C]AZD2184: Positron emission tomography examination and metabolite analysis in cynomolgus monkeys.

Perfluorinated carboxylic acids inhibit cyclooxygenase pathway more potently than 12-lipoxygenase pathway in rat platelets.

Incorporating human dosimetry and exposure into high-throughput in vitro toxicity screening.

Comparative metabolism of cyclophosphamide and ifosfamide in the mouse using UPLC-ESI-QTOFMS-based metabolomics.

Metabolic bioactivation of oestradiol-17beta (E2beta) in mouse colon epithelial cells bearing *ApcMin* mutation.

Weight-of-evidence analysis of human exposures to dioxins and dioxin-like compounds and associations with thyroid hormone levels during early development.

National study of exposure to pesticides among professional applicators: an investigation based on urinary biomarkers.

Hormonal regulation of tomato gibberellin 20-oxidase1 expressed in *Arabidopsis*.

Transport of L-carnitine in human corneal and conjunctival epithelial cells.

[Study of between persistent organic pollutants (POPs) content in children vein blood and thyroid stimulating hormone (TSH) in the capcitors dismantlement area].

Differential effects of polychlorinated biphenyl congeners on serum thyroid hormone levels in rats.

AhR-agonistic, anti-androgenic, and anti-estrogenic potencies of 2-isopropylthioxanthone (ITX) as determined by in vitro bioassays and gene expression profiling.

Metabolic versatility of halotolerant and alkaliphilic strains of *Halomonas* isolated from alkaline black liquor.

Outcomes after radical prostatectomy among men who are candidates for active surveillance: results from the SEARCH database.

Gene-chemical interactions in the developing mammalian nervous system: Effects on proliferation, neurogenesis and differentiation.

Analytical method validation for the determination of meptyldinocap as 2,4-dinitrooctylphenol metabolite in mango and soil using LC-MS/MS and dissipation study of the fungicide in Indian mango field ecosystem.

An amperometric method for the detection of amitrole, glyphosate and its aminomethyl-phosphonic acid metabolite in environmental waters using passive samplers.

Computational experiments reveal plausible mechanisms for changing patterns of hepatic zonation of xenobiotic clearance and hepatotoxicity.

Gene expression profile and cytotoxicity of human bronchial epithelial cells exposed to crotonaldehyde.

Inhibition of connexin 43 gap junction channels by the endocrine disruptor ioxynil.

Distribution of 14C-2,3,7,8-tetrachlorodibenzo-p-dioxin to the brain and peripheral tissues of fetal rats and its comparison with adults.

Determination of Imazaquin and its metabolite by liquid chromatography-quadrupole-time of flight tandem mass.

Complex phenotypes of a mutant inactivated for CymR, the global regulator of cysteine metabolism in *Bacillus subtilis*.

Pulmonary artery pressure responses to increased cardiac output in chickens with raised metabolic rate.

Aldehyde dehydrogenase 2 knockout accentuates ethanol-induced cardiac depression: role of protein phosphatases.

Expression of aryl hydrocarbon receptor in human placentas and fetal tissues.

Deletion of the mitochondrial NADH kinase increases mitochondrial DNA stability and life span in the filamentous fungus *Podospira anserina*.

Metabolites of galangin by 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible cytochrome P450 1A1 in human intestinal epithelial Caco-2 cells and their antagonistic activity toward aryl hydrocarbon receptor.

[Effects of catalase activators and inhibitors on ethanol pharmacokinetic characteristics and ethanol and aldehyde-metabolizing enzyme activities in the rat liver and brain].

Dioxin-like and perfluorinated compounds in pigs in an Indian open waste dumping site: toxicokinetics and effects on hepatic cytochrome P450 and blood plasma hormones.

Arsenic metabolism by human gut microbiota upon in vitro digestion of contaminated soils.

Sensory detection and responses to toxic gases: mechanisms, health effects, and countermeasures.

Arsenic species, AS3MT amount, and AS3MT gene expression in different brain regions of mouse exposed to arsenite.

Enhanced translocation of bacteria across metabolically stressed epithelia is reduced by butyrate.

Arsenite induces aquaglyceroporin 9 expression in murine livers.

Mapping of cerebral oxidative metabolism with MRI.

The clock genes period 1 and period 2 mediate diurnal rhythms in dioxin-induced Cyp1A1 expression in the mouse mammary gland and liver.

Low-dose synergistic immunosuppression of T-dependent antibody responses by polycyclic aromatic hydrocarbons and arsenic in C57BL/6J murine spleen cells.

Nitrofen induces apoptosis independently of retinaldehyde dehydrogenase (RALDH) inhibition.

Maternal exposure to dioxin reduces hypothalamic but not pituitary metabolome in fetal rats: a possible mechanism for a fetus-specific reduction in steroidogenesis.

Effects of 1,2-dichlorobenzene on the growth, bioenergetics and reproduction of the amphipod, *Melita longidactyla*.

Two modes of mitochondrial dysfunction lead independently to lifespan extension in *Caenorhabditis elegans*.

Decrease of intracellular pH as possible mechanism of embryotoxicity of glycol ether alkoxyacetic acid metabolites.

Metabolic correlations of glucocorticoids and polyamines in inflammation and apoptosis.

Comparison of current-use pesticide and other toxicant urinary metabolite levels among pregnant women in the CHAMACOS cohort and NHANES.

1-(3',5'-dihydroxyphenoxy)-7-(2'',4'',6-trihydroxyphenoxy)-2,4,9-trihydroxydibenzo-1,4-dioxin inhibits adipocyte differentiation of 3T3-L1 fibroblasts.

Effects of folate on arsenic toxicity in Chang human hepatocytes: involvement of folate antioxidant properties.

Dynamic zebrafish interactome reveals transcriptional mechanisms of dioxin toxicity.

Induction of hepatic carbonyl reductase/20beta-hydroxysteroid dehydrogenase mRNA in rainbow trout downstream from sewage treatment works--possible roles of aryl hydrocarbon receptor agonists and oxidative stress.

A simple and sensitive HPLC method for quantification of the metabolin of meclofenoxate in human plasma.

Thermal sensitivity of mitochondrial metabolism in two distinct mitotypes of *Drosophila simulans*: evaluation of mitochondrial plasticity.

Elevated levels of volatile organic carcinogen and toxicant biomarkers in Chinese women who regularly cook at home.

Hepatic CYP1A induction by chlorinated dioxins and related compounds in the endangered black-footed albatross from the North Pacific.

Endocrine disruptor, dioxin (TCDD)-induced mitochondrial dysfunction and apoptosis in human trophoblast-like JAR cells.

Urinary metabolomics in Fxr-null mice reveals activated adaptive metabolic pathways upon bile acid challenge.

Aryl hydrocarbon receptor (AHR)-regulated transcriptomic changes in rats sensitive or resistant to major dioxin toxicities.

Time-dependent integrity during storage of natural surface water samples for the trace analysis of pharmaceutical products, feminizing hormones and pesticides.

Hemorrhagic cystitis in a patient receiving docetaxel for prostate cancer.

Distribution of PCBs, their hydroxylated metabolites, and other phenolic contaminants in human serum from two European countries.

Cryopreserved hepatocytes from rainbow trout (*Oncorhynchus mykiss*): a validation study to support their application in bioaccumulation assessment.

Uptake and transport of roxarsone and its metabolites in water spinach as affected by phosphate supply.

Increased vitamin C content accompanied by an enhanced recycling pathway confers oxidative stress tolerance in *Arabidopsis*.

Temporal variations of polybrominated dibenzo-p-dioxin and methoxylated diphenyl ether concentrations in fish revealing large differences in exposure and metabolic stability.

Xenobiotic-metabolizing cytochromes p450 in human white adipose tissue: expression and induction.

A critical role of SNF1A/dAMPKalpha (*Drosophila* AMP-activated protein kinase alpha) in muscle on longevity and stress resistance in *Drosophila melanogaster*.

Metabolism of mono- and dichloro-dibenzo-p-dioxins by *Phanerochaete chrysosporium* cytochromes P450.

The actions of fisetin on glucose metabolism in the rat liver.

Roles for glutathione transferases in plant secondary metabolism.

Development of TEFs for PCB congeners by using an alternative biomarker--thyroid hormone levels.

TCDD and a putative endogenous AhR ligand, ITE, elicit the same immediate changes in gene expression in mouse lung fibroblasts.

HPTLC densitometric evaluation of tissue culture extracts of *Nothapodytes foetida* compared to conventional extracts for camptothecin content and antimicrobial activity.

Effects of dinuclear copper(II) complexes with 6-(benzylamino)purine derivatives on AhR and PXR dependent expression of cytochromes P450 CYP1A2 and CYP3A4 genes in primary cultures of human hepatocytes.

Combined application of high resolution and tandem mass spectrometers to characterize methionine oxidation in a parathyroid hormone formulation.

The absorption characteristics of bifendate solid dispersion in rat intestinal tissue.

Interaction between oxidative stress sensor Nrf2 and xenobiotic-activated aryl hydrocarbon receptor in the regulation of the human phase II detoxifying UDP-glucuronosyltransferase 1A10.

Evidence for thyroid endocrine disruption in wild fish in San Francisco Bay, California, USA. Relationships to contaminant exposures.

C-fin: a cultured frog tadpole tail fin biopsy approach for detection of thyroid hormone-disrupting chemicals.

Effects of dioxin isomers on induction of AhRs and CYP1A1 in early developmental stage embryos of medaka (*Oryzias latipes*).

Oxytocin increases glucose uptake in neonatal rat cardiomyocytes.

Influence of repeated preexposure to arsenic on acetaminophen-induced oxidative stress in liver of male rats.

Effect of ferrous sulphate on aspartate and alanine aminotransferases of brain of *Tilapia mossambica*.

Albumin-derived peptides efficiently reduce renal uptake of radiolabelled peptides.

Enhanced metallothionein gene expression induced by mitochondrial oxidative stress is reduced in phospholipid hydroperoxide glutathione peroxidase-overexpressed cells.

Kinetics and metabolic versatility of highly tolerant phenol degrading *Alcaligenes* strain TW1.

Gender-linked haematopoietic and metabolic disturbances induced by a pesticide mixture administered at low dose to mice.

Historical perspective of pesticide poisoning in Japan and measures taken by the Japanese association of rural medicine.

Evaluation of mutagenicity of mebudipine, a new calcium channel blocker.

Xenobiotic metabolism of bank vole (*Myodes glareolus*) exposed to PCDDs.

Impact of a metabolic uncoupler, 2,4-dichlorophenol on minimization of activated sludge production in membrane bioreactor.

Effects of growth hormone and insulin-like growth factor-I on the iron-induced lipid peroxidation in the rat liver and porcine thyroid homogenates.

[The utility of MTT and XTT colorimetric tests in the studies conducted in vitro with *Toxoplasma gondii* tachyzoites].

Unmetabolized VOCs in urine as biomarkers of low level occupational exposure.

The environmental fate and effects of antifouling paint biocides.

Exposure to 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin and tetraethyl lead affects lung mitochondria bioenergetics.

Clonal propagation of *Cyclamen persicum* via somatic embryogenesis.

Fluorescence-based liver microsomal assay for screening of pharmaceutical reactive metabolites using a glutathione conjugated 96-well plate.

Reactions of the melatonin metabolite N(1)-acetyl-5-methoxykynuramine with carbamoyl phosphate and related compounds.

Mutagenic activities of a chlorination by-product of butamifos, its structural isomer, and their related compounds.

Arsenic (+ 3 oxidation state) methyltransferase and the methylation of arsenicals in the invertebrate chordate *Ciona intestinalis*.

Altered metabolisms of mediators controlling vascular function and enhanced oxidative stress in asymptomatic children with congenital portosystemic venous shunt.

Distinct regulation of insulin receptor substrate-1 and -2 by 90-kDa heat-shock protein in adrenal chromaffin cells.

Sublethal toxicant effects with dynamic energy budget theory: model formulation.

Lipid oxidation and peroxidation in CNS health and disease: from molecular mechanisms to therapeutic opportunities.

Human cytochrome P450 2E1 and sulfotransferase 1A1 coexpressed in Chinese hamster V79 cells enhance spontaneous mutagenesis.

Paraquat (PQ)-induced pulmonary fibrosis increases exercise metabolic cost, reducing aerobic performance in rats.

Toxicity assessment of the herbicide metolachlor comparative effects on bacterial and mitochondrial model systems.

Evaluation of genome damage and its relation to oxidative stress induced by glyphosate in human lymphocytes in vitro.

Phenoxy herbicides and fibrates potently inhibit the human chemosensory receptor subunit T1R3.

Plant availability and phytotoxicity of soil bound residues of herbicide ZJ0273, a novel acetolactate synthase potential inhibitor.

Acetaldehyde and the hypothermic effects of ethanol in mice.

Characterization of the hypothalamic-pituitary-adrenal axis response to atrazine and metabolites in the female rat.

Chlorotriazine herbicides and metabolites activate an ACTH-dependent release of corticosterone in male Wistar rats.

Detoxification of cytotoxic alachlor by glutathione: characterization of conjugated adducts by electrospray ionization tandem mass spectrometry.

Paraquat toxicity induced by voltage-dependent anion channel 1 acts as an NADH-dependent oxidoreductase.

Toxicokinetics of glyphosate and its metabolite aminomethyl phosphonic acid in rats.

Toxic influence of chronic oral administration of paraquat on nigrostriatal dopaminergic neurons in C57BL/6 mice.

Intravenous paraquat poisoning.

Acute and chronic toxicity of atrazine and its metabolites deethylatrazine and deisopropylatrazine on aquatic organisms.

Characterization of chromatin instabilities induced by glyphosate, terbuthylazine and carbofuran using cytome FISH assay.

[Effects of aerial applications of the herbicide glyphosate and insecticides on human health].

Molecular mechanisms of 4-hydroxy-2-nonenal and acrolein toxicity: nucleophilic targets and adduct formation.

Distinct non-target site mechanisms endow resistance to glyphosate, ACCase and ALS-inhibiting herbicides in multiple herbicide-resistant *Lolium rigidum*.

Role of NKX2-1 in N-bis(2-hydroxypropyl)-nitrosamine-induced thyroid adenoma in mice.

Effects of 2,4-dichlorophenoxyacetic acid formulation on medulla spinalis of *Poecilia reticulata*: a histopathological study.

Effectiveness of glyphosate and imazamox on the control of the invasive cordgrass *Spartina densiflora*.

Atrazine oral exposure of peripubertal male rats downregulates steroidogenesis gene expression in Leydig cells.

Bioaccessibility, bioavailability and ecotoxicity of pentachlorophenol in compost amended soils.

Subchronic feeding study of grain from herbicide-tolerant maize DP-9814-6 in Sprague-Dawley rats.

Trivalent methylated arsenical-induced phosphatidylserine exposure and apoptosis in platelets may lead to increased thrombus formation.

Arsenite and its metabolites, MMA(III) and DMA(III), modify CYP3A4, PXR and RXR alpha expression in the small intestine of CYP3A4 transgenic mice.

Effects of exposure to acetochlor on the expression of thyroid hormone related genes in larval and adult rare minnow (*Gobiocypris rarus*).

Mortality rates among trichlorophenol workers with exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Comparative effects of the formulation of glyphosate-surfactant herbicides on hemodynamics in swine.

Lemna minor L. as a model organism for ecotoxicological studies performing 1H NMR fingerprinting.

Assessing the toxicity of herbicide isoproturon on *Aporrectodea caliginosa* (*Oligochaeta*) and its fate in soil ecosystem.

Paraquat induces alternation of the dopamine catabolic pathways and glutathione levels in the substantia nigra of mice.

Effects of co-administration of dietary sodium arsenite and an NADPH oxidase inhibitor on the rat bladder epithelium.

Simultaneous toxic action of zinc and alachlor resulted in enhancement of zinc uptake by the filamentous fungus *Paecilomyces marquandii*.

Impact of glyphosate and benzo[a]pyrene on the tolerance of mosquito larvae to chemical insecticides. Role of detoxification genes in response to xenobiotics.

Effects of an epidermal growth factor receptor inhibitor on arsenic associated toxicity in the rat bladder epithelium.

Potential mechanism for pentachlorophenol-induced carcinogenicity: a novel mechanism for metal-independent production of hydroxyl radicals.

Effects of alachlor on biochemical parameters of the freshwater fish, *Channa punctatus* (Bloch).

[Dimethylarsinous acid-promoted skin tumorigenesis through the induction of oxidative stress in mice].

Evaluation of pathways involved in pentachlorophenol-induced apoptosis in rat neurons.

Chronic exposure to high levels of atrazine alters expression of genes that regulate immune and growth-related functions in developing *Xenopus laevis* tadpoles.

Glutathione-S-transferase P protects against endothelial dysfunction induced by exposure to tobacco smoke.

Urinary pesticide metabolites in school students from northern Thailand.

Changes of thyroid hormone levels and related gene expression in Chinese rare minnow (*Gobiocypris rarus*) during 3-amino-1,2,4-triazole exposure and recovery.

Development of PBPK model of molinate and molinate sulfoxide in rats and humans.

The level and clinical significance of pancreatic enzymes in survivors of acute paraquat poisoning.

Effects of monomethylarsonic and monomethylarsonous acid on evoked synaptic potentials in hippocampal slices of adult and young rats.

Pest toxicology: the primary mechanisms of pesticide action.

Protein modification by acrolein: formation and stability of cysteine adducts.

Solution structure of DNA containing alpha-OH-PdG: the mutagenic adduct produced by acrolein.

Morbidity in former sawmill workers exposed to pentachlorophenol (PCP): a cross-sectional study in New Zealand.

Responsiveness of the interrenal tissue of *Jundia quelen* (Rhamdia quelen) to an in vivo ACTH test following acute exposure to sublethal concentrations of agrichemicals.

Endocrine disrupting effects of herbicides and pentachlorophenol: in vitro and in vivo evidence.

[Changes in nitric oxide, prostaglandins and myeloperoxidase activity in acrolein-induced cystitis in rats].

The effects of prometryne on subchronically treated mice evaluated by SCGE assay.

SOD isoforms play no role in lifespan in ad lib or dietary restricted conditions, but mutational inactivation of SOD-1 reduces life extension by cold.

Heterocyclic aromatic amine pesticide use and human cancer risk: results from the U.S. Agricultural Health Study.

Genotoxicity of AMPA, the environmental metabolite of glyphosate, assessed by the Comet assay and cytogenetic tests.

Effects of propanil on the European eel *Anguilla anguilla* and post-exposure recovery using selected biomarkers as effect criteria.

Differential analysis of mycoalexins in confrontation zones of grapevine fungal pathogens by ultrahigh pressure liquid chromatography/time-of-flight mass spectrometry and capillary nuclear magnetic resonance.

Clinical outcomes and kinetics of propanil following acute self-poisoning: a prospective case series.

Arsenite and its mono- and dimethylated trivalent metabolites enhance the formation of benzo[a]pyrene diol epoxide-DNA adducts in *Xeroderma pigmentosum* complementation group A cells.

Acute toxic effects of three pesticides on *Pseudomonas putida* monitored by microcalorimeter.

Effect of a subchronic exposure to simazine on energetic metabolism of common carp (*Cyprinus carpio*).

Effects of atrazine and endosulfan sulphate on the ecdysteroid system of *Daphnia magna*.

Comparison of the sensitivity of different toxicity test endpoints in a microalga exposed to the herbicide paraquat.

Detection of ACCase target-site resistant *Alopecurus myosuroides* Huds. (black-grass) in Belgian populations.

Effects of subchronic exposure to Successor 600 (pethoxamid 600 g L⁻¹) on common carp *Cyprinus carpio*.

A review: oxidative stress in fish induced by pesticides.

Plant growth regulator (4-chlorophenoxy acetic acid) increases apoptosis in gonads of rats without changing hormonal levels.

Collaborative work on evaluation of ovarian toxicity. 14) Two- or four-week repeated-dose studies and fertility study of atrazine in female rats.

Glyphosate formulations induce apoptosis and necrosis in human umbilical, embryonic, and placental cells.

Effects of atrazine on hepatic metabolism and endocrine homeostasis in rainbow trout (*Oncorhynchus mykiss*).

Prostate cancer control and survival in Vietnam veterans exposed to Agent Orange.

Role of endoplasmic reticulum stress in acrolein-induced endothelial activation.

Biodegradation of fomesafen by strain *Lysinibacillus* sp. ZB-1 isolated from soil.

Effects of the endocrine disruptors atrazine and PCB 153 on the protein expression of MCF-7 human cells.

Influence of strain and sex on the metabolic profile of rats in repeated dose toxicological studies.

Increased sensitivity of glutathione S-transferase P-null mice to cyclophosphamide-induced urinary bladder toxicity.

Mortality rates among workers exposed to dioxins in the manufacture of pentachlorophenol.

Quantification of Paraquat, MPTP, and MPP⁺ in brain tissue using microwave-assisted solvent extraction (MASE) and high-performance liquid chromatography-mass spectrometry.

Electrospray ionization tandem mass spectrometric determination of monomethylarsonic acid and dimethylarsinic acid after adduct formation with citric acid.

Increased sensitivity of myoblasts to oxidative stress in amyotrophic lateral sclerosis peripheral tissues.

Acrolein, a ubiquitous pollutant and lipid hydroperoxide product, inhibits antiviral activity of interferon- α : relevance to hepatitis C.

[Analysis of bialaphos and its active metabolite L-glufosinate in biological specimens by HPLC].

Influence of cyclophosphamide and its metabolic products on the activity of peritoneal macrophages in mice.

Effect of sildenafil on acrolein-induced airway inflammation and mucus production in rats.

Comparison of sensitivity to arsenic compounds between a Bhas 42 cell transformation assay and a BALB/c 3T3 cell transformation assay.

Carotenoid biosynthesis in intraerythrocytic stages of *Plasmodium falciparum*.

Mutations in the *C. elegans* succinate dehydrogenase iron-sulfur subunit promote superoxide generation and premature aging.

Inhibition of 4-hydroxyphenylpyruvate dioxygenase by 2-[2-nitro-4-(trifluoromethyl)benzoyl]-1,3-cyclohexanedione.

Oxidative stress in stroke pathophysiology validation of hydrogen peroxide metabolism as a pharmacological target to afford neuroprotection.

Chronic exposure to the herbicide, atrazine, causes mitochondrial dysfunction and insulin resistance.

Fibroblasts from long-lived mutant mice show diminished ERK1/2 phosphorylation but exaggerated induction of immediate early genes.

Changes in urinary arsenic methylation profiles in a 15-year interval after cessation of arsenic ingestion in southwest Taiwan.

Transport and metabolism of the antitumour drug candidate 2'-benzoyloxycinnamaldehyde in Caco-2 cells.

The Arabidopsis PARAQUAT RESISTANT2 gene encodes an S-nitrosoglutathione reductase that is a key regulator of cell death.

Natural variation reveals relationships between pre-stress carbohydrate nutritional status and subsequent responses to xenobiotic and oxidative stress in *Arabidopsis thaliana*.

Effects of atrazine and its withdrawal on gonadotropin-releasing hormone neuroendocrine function in the adult female Wistar rat.

Influence of cobalamin on arsenic metabolism in Bangladesh.

Bioaccumulation and biotransformation of brominated and chlorinated contaminants and their metabolites in ringed seals (*Pusa hispida*) and polar bears (*Ursus maritimus*) from East Greenland.

Gene-expression profiling of grape bud response to two alternative dormancy-release stimuli expose possible links between impaired mitochondrial activity, hypoxia, ethylene-ABA interplay and cell enlargement.

Effect of glyphosate-boron application on seed composition and nitrogen metabolism in glyphosate-resistant soybean.

Delayed degradation in soil of foliar herbicides glyphosate and sulcotrione previously absorbed by plants: consequences on herbicide fate and risk assessment.

Cycloate, an inhibitor of fatty acid elongase, modulates the metabolism of very-long-side-chain alkylresorcinols in rye seedlings.

Metabolites of the phenylurea herbicides chlorotoluron, diuron, isoproturon and linuron produced by the soil fungus *Mortierella* sp.

The expression of melanin-based plumage is separately modulated by exogenous oxidative stress and a melanocortin.

Microalgae fiber optic biosensors for herbicide monitoring using sol-gel technology.

Protective mechanism of quercetin and rutin using glutathione metabolism on HO-induced oxidative stress in HepG2 cells.

Spice active principles as the inhibitors of human platelet aggregation and thromboxane biosynthesis.

¹H NMR to investigate metabolism and energy supply in rhesus macaque sperm.

A kinetic model for the metabolism of the herbicide safener fenclorim in *Arabidopsis thaliana*.

Assessment of the pesticides atrazine, endosulfan sulphate and chlorpyrifos for juvenoid-related endocrine activity using *Daphnia magna*.

Atrazine inhibits pulsatile luteinizing hormone release without altering pituitary sensitivity to a gonadotropin-releasing hormone receptor agonist in female Wistar rats.

Metabolism of flufenpyr-ethyl in rats and mice.

Time course of arsenic species in the brain and liver of mice after oral administration of arsenate.

Metabolic effects of glyphosate change the capacity of maize culture to regenerate plants.

Dissipation and leaching of acephate, chlorpyrifos, and their main metabolites in field soils of Malaysia.

Metabolic footprinting study of white spruce somatic embryogenesis using NMR spectroscopy.

Simultaneous determination of herbicide mefenacet and its metabolites residues in river water by solid phase extraction and rapid resolution liquid chromatography-mass spectrometry with pre-column derivatization.

Two novel phospholipid hydroperoxide glutathione peroxidase genes of *Paragonimus westermani* induced by oxidative stress.

Disposition of the herbicide 2-chloro-4-(ethylamino)-6-(isopropylamino)-s-triazine (Atrazine) and its major metabolites in mice: a liquid chromatography/mass spectrometry analysis of urine, plasma, and tissue levels.

Evaluation of toxicity of *Cercospora piaropi* in a mycoherbicide formulation by using bacterial bioluminescence and the Ames mutagenicity tests.

Differential patterns of reactive oxygen species and antioxidative mechanisms during atrazine injury and sucrose-induced tolerance in *Arabidopsis thaliana* plantlets.

Paraquat is excluded by the blood brain barrier in rhesus macaque: An in vivo pet study.

Plasma pharmacokinetics and metabolism of the antitumour drug candidate 2'-benzoyloxycinnamaldehyde in rats.

Enhanced sensitivity to oxidative stress in transgenic tobacco plants with decreased glutathione reductase activity leads to a decrease in ascorbate pool and ascorbate redox state.

An experimental design approach employing artificial neural networks for the determination of potential endocrine disruptors in food using matrix solid-phase dispersion.

Lymphatic and portal vein absorption of organochlorine compounds in rats.

Utility of *Nicotiana tabacum* cell suspension cultures expressing human CYP1A1, CYP1A2 and CYP3A4 to study the oxidative metabolism of the herbicide 14C-fluometuron.

Leaching of Diuron, Linuron and their main metabolites in undisturbed field lysimeters.

Phytotoxicity of constituents of glandular trichomes and the leaf surface of camphorweed, *Heterotheca subaxillaris*.

Azide and Tween-20 reduce binding to autoantibody epitopes of islet antigen-2; implications for assay performance and reproducibility.

Transcriptional changes associated with reduced spontaneous liver tumor incidence in mice chronically exposed to high dose arsenic.

Local IGF-1 isoform protects cardiomyocytes from hypertrophic and oxidative stresses via SirT1 activity.

p-Cresyl sulfate and indoxyl sulfate in hemodialysis patients.

Systems metabolic effects of a *Necator americanus* infection in Syrian hamster.

Hypoxia and the metabolic phenotype of prostate cancer cells.

Effects of pomegranate chemical constituents/intestinal microbial metabolites on CYP1B1 in 22Rv1 prostate cancer cells.

Metabolite profiling identifies candidate markers reflecting the clinical adaptations associated with Roux-en-Y gastric bypass surgery.

Chronic expression of H-ferritin in dopaminergic midbrain neurons results in an age-related expansion of the labile iron pool and subsequent neurodegeneration: implications for Parkinson's disease.

Inflammatory and chloracne-like skin lesions in B6C3F1 mice exposed to 3,3',4,4'-tetrachloroazobenzene for 2 years.

Serum gamma-glutamyltransferase: new insights about an old enzyme.

Initial report of a family registry of multiple myeloma.

Acid-evoked Ca²⁺ signalling in rat sensory neurones: effects of anoxia and aglycaemia.

Urinary arsenic species and CKD in a Taiwanese population: a case-control study.

Polymorphisms in arsenic metabolism genes, urinary arsenic methylation profile and cancer.

Iron overload alters iron-regulatory genes and proteins, down-regulates osteoblastic phenotype, and is associated with apoptosis in fetal rat calvaria cultures.

Ingestion of ferrous sulfate increases ferremia in patients with short bowel syndrome.

Prenatal retinoic acid up-regulates pulmonary gene expression of COUP-TFII, FOG2, and GATA4 in pulmonary hypoplasia.

Effects of chronic exposure to DDT and TCDD on disease activity in murine systemic lupus erythematosus.

Organochlorine and heavy metals in newborns: results from the Flemish Environment and Health Survey (FLEHS 2002-2006).

CD147 silencing inhibits lactate transport and reduces malignant potential of pancreatic cancer cells in vivo and in vitro models.

Deleterious versus neuroprotective effect of metabolic inhibition after traumatic spinal cord injury.

Effects of prolonged iron overload and low frequency electromagnetic exposure on spatial learning and memory in the young rat.

Post-exposure treatment with nasal atropine methyl bromide protects against microinstillation inhalation exposure to sarin in guinea pigs.

Mechanisms of non-genotoxic carcinogens and importance of a weight of evidence approach.

Lysozyme, a mediator of sepsis that intrinsically generates hydrogen peroxide to cause cardiovascular dysfunction.

Inhibition of UV-C light-induced apoptosis in liver cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Differential effects of PINK1 nonsense and missense mutations on mitochondrial function and morphology.

Fetal and neonatal exposure to three typical environmental chemicals with different mechanisms of action: mixed exposure to phenol, phthalate, and dioxin cancels the effects of sole exposure on mouse midbrain dopaminergic nuclei.

Evaluation of the rodent Hershberger bioassay on intact juvenile males--testing of coded chemicals and supplementary biochemical investigations.

Impact of life stage and duration of exposure on arsenic-induced proliferative lesions and neoplasia in C3H mice.

Synthesis and preclinical evaluation of [(11)C]PAQ as a PET imaging tracer for VEGFR-2.

Characterization of MCF mammary epithelial cells overexpressing the Arylhydrocarbon receptor (AhR).

Activation of aryl hydrocarbon receptor by TCDD prevents diabetes in NOD mice and increases Foxp3+ T cells in pancreatic lymph nodes.

Effects of intrauterine 2,3,7,8-tetrachlorodibenzo-p-dioxin on the development and function of the gonadotrophin releasing hormone neuronal system in the male rat.

Reproductive and developmental toxicity of a pentabrominated diphenyl ether mixture, DE-71, to ranch mink (*Mustela vison*) and hazard assessment for wild mink in the Great Lakes region.

Thyroid hormone levels of pregnant inuit women and their infants exposed to environmental contaminants.

Characterization of inflammatory bowel disease with urinary metabolic profiling.

Effect of increasing dialyzer mass transfer area coefficient and dialysate flow on clearance of protein-bound solutes: a pilot crossover trial.

The protective role of HO-1 and its generated products (CO, bilirubin, and Fe) in ethanol-induced human hepatocyte damage.

Maternal exposure to dioxin disrupts gonadotropin production in fetal rats and imprints defects in sexual behavior.

Arsenic activates EGFR pathway signaling in the lung.

Dexamethasone enhances basal and TNF-alpha-stimulated production of PAI-1 via the glucocorticoid receptor regardless of 11beta-hydroxysteroid dehydrogenase 2 status in human proximal renal tubular cells.

PCBs and the energy cost of migration in the European eel (*Anguilla anguilla* L.).

Neonatal exposure to low-dose 2,3,7,8-tetrachlorodibenzo-p-dioxin causes autoimmunity due to the disruption of T cell tolerance.

Src supports UDP-glucuronosyltransferase-2B7 detoxification of catechol estrogens associated with breast cancer.

Agricultural pesticide use and pancreatic cancer risk in the Agricultural Health Study Cohort.

Methyl iodide-induced fetal hypothyroidism implicated in late-stage fetal death in rabbits.

Infantile iron poisoning: challenges in diagnosis and management.

Iron supplement in pregnancy and development of gestational diabetes--a randomised placebo-controlled trial.

Comparative effects of very low-carbohydrate, high-fat and high-carbohydrate, low-fat weight-loss diets on bowel habit and faecal short-chain fatty acids and bacterial populations.

Prevalence of diabetes and body burdens of polychlorinated biphenyls, polybrominated diphenyl ethers, and p,p'-diphenyldichloroethene in Great Lakes sport fish consumers.

Reproductive health of bass in the Potomac, U.S.A., drainage: part 1. Exploring the effects of proximity to wastewater treatment plant discharge.

Structure-effect relationship in the down-regulation of glutaminase in cultured human cells by phenylarsenic compounds.

Dimethylarsine likely acts as a mouse-pulmonary tumor initiator via the production of dimethylarsine radical and/or its peroxy radical.

Dimethylarsine likely acts as a mouse-pulmonary tumor initiator via the production of dimethylarsine radical and/or its peroxy radical.

Prevalence of metabolic syndrome associated with body burden levels of dioxin and related compounds among Japan's general population.

Possible involvement of arylhydrocarbon receptor variants in TCDD-induced thymic atrophy and XRE-dependent transcriptional activity in Wistar Hannover GALAS rats.

CYP1B1, but not CYP1A1, is downregulated by promoter methylation in colorectal cancers.

Weight loss and 2,4-dinitrophenol poisoning.

Functional characterization of ryanodine receptor (RYR1) sequence variants using a metabolic assay in immortalized B-lymphocytes.

The role of the dioxin-responsive element cluster between the Cyp1a1 and Cyp1a2 loci in aryl hydrocarbon receptor biology.

Toxic and chemopreventive ligands preferentially activate distinct aryl hydrocarbon receptor pathways: implications for cancer prevention.

Inhibition of androgen receptor transcriptional activity as a novel mechanism of action of arsenic.

Identification and quantification of 2',3'-cAMP release by the kidney.

Cytotoxicity and gene expression profiling of two hydroxylated polybrominated diphenyl ethers in human H295R adrenocortical carcinoma cells.

AHR signaling in prostate growth, morphogenesis, and disease.

Functionally modified gelatin microspheres impregnated collagen scaffold as novel wound dressing to attenuate the proteases and bacterial growth.

Bioactivation of the phytoestrogen diosmetin by CYP1 cytochromes P450.

Cytotoxicity and phytotoxicity of trichothecene macrolides from *Myrothecium graminum*.

Toxicology laboratory analysis and human exposure to p-chloroaniline.

Chronic health impairment due to 2,3,7,8-tetrachloro-dibenzo-p-dioxin exposure.

Effects of arsenic on maternal and fetal health.

The anti-apoptotic activity of albumin for endothelium is inhibited by advanced glycation end products restricting intramolecular movement.

[Experience in the treatment of iron deficiency anemia with ferro-folgamma].

Iron medication-induced gastric mucosal injury.

Thyroid lesions in the great cormorant (*Phalacrocorax carbo*) of Niigata, central Japan: a possible association with dioxin accumulation.

Targeting of aryl hydrocarbon receptor-mediated activation of cyclooxygenase-2 expression by the indole-3-carbinol metabolite 3,3'-diindolylmethane in breast cancer cells.

Combined analysis of prenatal (maternal hair and blood) and neonatal (infant hair, cord blood and meconium) matrices to detect fetal exposure to environmental pesticides.

Speciation of arsenic trioxide metabolites in blood cells and plasma of a patient with acute promyelocytic leukemia.

Mouse breast cancer model-dependent changes in metabolic syndrome-associated phenotypes caused by maternal dioxin exposure and dietary fat.

Differential effects of the mitochondrial uncoupling agent, 2,4-dinitrophenol, or the nitroxide antioxidant, Tempol, on synaptic or nonsynaptic mitochondria after spinal cord injury.

Effects of endocytosis inhibitors on internalization of human IgG by Caco-2 human intestinal epithelial cells.

Accumulation of polychlorinated biphenyls and organochlorine pesticide in pet cats and dogs: assessment of toxicological status.

Hepatic and vascular mRNA expression in adult zebrafish (*Danio rerio*) following exposure to benzo-a-pyrene and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Fetal arsenic exposure appears to facilitate endocrine disruption by postnatal diethylstilbestrol in neonatal mouse adrenal.

Glucocorticoid and adrenalectomy effects on the rat aryl hydrocarbon receptor pathway depend on the dosing regimen and post-surgical time.

[Assessment of mitochondrial metabolic oxidative state in living cardiomyocytes with spectrally-resolved fluorescence lifetime spectroscopy of NAD(P)H].

Prenatal exposure to organohalogens, including brominated flame retardants, influences motor, cognitive, and behavioral performance at school age.

Selenocysteine is selectively taken up by red blood cells.

¹¹C-GSK189254: a selective radioligand for in vivo central nervous system imaging of histamine H3 receptors by PET.

A *Saccharomyces cerevisiae*-based bioassay for assessing pesticide toxicity.

Metabolic effects of dark chocolate consumption on energy, gut microbiota, and stress-related metabolism in free-living subjects.

Differential effect of chlorine on the oxidative stress generation in dormant and active cells within colony biofilm.

The pleiotropy of dioxin toxicity--xenobiotic misappropriation of the aryl hydrocarbon receptor's alternative physiological roles.

The mammalian aryl hydrocarbon (Ah) receptor: from mediator of dioxin toxicity toward physiological functions in skin and liver.

Examination of Zolpidem effects on AhR- and PXR-dependent expression of drug-metabolizing cytochromes P450 in primary cultures of human hepatocytes.

The effect of dose on 2,3,7,8-TCDD tissue distribution, metabolism and elimination in CYP1A2 (-/-) knockout and C57BL/6N parental strains of mice.

Determination of optimal phenanthrene, sulfate and biomass concentrations for anaerobic biodegradation of phenanthrene by sulfate-reducing bacteria and elucidation of metabolic pathway.

Chlorate metabolism in pure cultures of *Escherichia coli* O157:H7 pretreated with either nitrate or chlorate.

Tuning diketodioxinone reactivity: biomimetic synthesis of the resorcylate antibiotic fungal metabolites ent-W1278A, -B, and -C, using iterative aromatization reactions.

Comparative analysis of AhR-mediated TCDD-elicited gene expression in human liver adult stem cells.

GintPDX1 encodes a protein involved in vitamin B6 biosynthesis that is up-regulated by oxidative stress in the arbuscular mycorrhizal fungus *Glomus intraradices*.

A genome-wide screen in *Saccharomyces cerevisiae* reveals pathways affected by arsenic toxicity.

Dioxin-like and endocrine disruptive activity of traffic-contaminated soil samples.

M-LDH physically associated with sarcolemmal K ATP channels mediates cytoprotection in heart embryonic H9C2 cells.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) poisoning in Victor Yushchenko: identification and measurement of TCDD metabolites.

Speciation, formation, stability and analytical challenges of human arsenic metabolites.

An overview of dioxin-like compounds, PCB, and pesticide exposures associated with sexual differentiation of neuroendocrine systems, fluctuating asymmetry, and behavioral effects in birds.

A critical review: 2,3,7,8 -tetrachlorodibenzo-p-dioxin (2,3,7,8-TCDD) effects on gonad development in bivalve mollusks.

Seasonal variation in the measurement of urinary pesticide metabolites among Latino farmworkers in eastern North Carolina.

Phosphinothricin-tripeptide biosynthesis: an original version of bacterial secondary metabolism?

Preventive effect of piperonyl butoxide on cyclophosphamide-induced teratogenesis in rats.

Use of metabolic control analysis to give quantitative information on control of lipid biosynthesis in the important oil crop, *Elaeis guineensis* (oilpalm).

Contamination and screening level toxicity of sediments from remediated and unremediated wetlands near Sydney, Australia.

Effects of occupational exposure to 1,4-dichlorobenzene on hematologic, kidney, and liver functions.

Brassinosteroids promote metabolism of pesticides in cucumber.

Reduced arsenic clearance and increased toxicity in aquaglyceroporin-9-null mice.

Acacia Senegal gum exudate offers protection against cyclophosphamide-induced urinary bladder cytotoxicity.

Activation of MAPKs influences the expression of drug-metabolizing enzymes in primary human hepatocytes.

Predictive modeling of a mixture of thyroid hormone disrupting chemicals that affect production and clearance of thyroxine.

Physiological modes of action of fluoxetine and its human metabolites in algae.

Thyroid function and plasma concentrations of polyhalogenated compounds in Inuit adults.

Endocrine disruptive effect of 3-methyl-4-nitrophenol isolated from diesel exhaust particles in Hershberger assay using castrated immature rats.

Temporally resolved GC-MS-based metabolic profiling of herbicide treated plants treated reveals that changes in polar primary metabolites alone can distinguish herbicides of differing mode of action.

Cytotoxicity of spermine oxidation products to multidrug resistant melanoma M14 ADR2 cells: sensitization by the MDL 72527 lysosomotropic compound.

A unique micromechanical calorimeter for simultaneous measurement of heat rate and force production of cardiac trabeculae carnea.

Species differences for stereoselective metabolism of ethofumesate and its enantiomers in vitro.

Activation of the aryl hydrocarbon receptor during different critical windows in pregnancy alters mammary epithelial cell proliferation and differentiation.

Is the gonadotropin releasing hormone system vulnerable to endocrine disruption in birds?

Specific in vitro toxicity of crude and refined petroleum products. 1. Aryl hydrocarbon receptor-mediated responses.

Preclinical activity of palifosfamide lysine (ZIO-201) in pediatric sarcomas including oxazaphosphorine-resistant osteosarcoma.

Impaired arsenic metabolism in children during weaning.

Exposure to monomethylarsonous acid (MMA(III)) leads to altered selenoprotein synthesis in a primary human lung cell model.

Pharmacometabonomic identification of a significant host-microbiome metabolic interaction affecting human drug metabolism.

Modulation of carcinogen metabolism by nitric oxide-aspirin 2 is associated with suppression of DNA damage and DNA adduct formation.

Rescue of anaemia and autoimmune responses in SOD1-deficient mice by transgenic expression of human SOD1 in erythrocytes.

An evaluation of the cytochrome P450 inhibition potential of selected pesticides in human hepatic microsomes.

Relevance of the aryl hydrocarbon receptor (AhR) for clinical toxicology.

Radiation metabolomics. 3. Biomarker discovery in the urine of gamma-irradiated rats using a simplified metabolomics protocol of gas chromatography-mass spectrometry combined with random forests machine learning algorithm.

Anti-thyroid hormone activity of bisphenol A, tetrabromobisphenol A and tetrachlorobisphenol A in an improved reporter gene assay.

Concentrations, patterns and metabolites of organochlorine pesticides in relation to xenobiotic phase I and II enzyme activities in ringed seals (*Phoca hispida*) from Svalbard and the Baltic Sea.

The role of aryl hydrocarbon receptor in regulation of enzymes involved in metabolic activation of polycyclic aromatic hydrocarbons in a model of rat liver progenitor cells.

Plant metabolites: an alternative and sustainable approach towards post harvest pest management in pulses.

Nonlinear intestinal absorption of (1 \rightarrow 3)-beta-D-glucan caused by absorptive and secretory transporting system.

Effect of chronic exposure to the aryl hydrocarbon receptor agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin in female rats on ovarian gene expression.

Relative developmental toxicity of glycol ether alkoxy acid metabolites in the embryonic stem cell test as compared with the in vivo potency of their parent compounds.

Reactive oxygen species as cardiovascular mediators: lessons from endothelial-specific protein overexpression mouse models.

Biotechnological and industrial significance of cyanobacterial secondary metabolites.

The effect of workload on biological monitoring of occupational exposure to toluene and n-Hexane: contribution of physiologically based toxicokinetic modeling.

Synergistic cytotoxic effect of tetrachlorocatechol and sodium azide in *Escherichia coli*: toxicity, metabolism, and mechanistic aspects.

The molecular mechanisms of diallyl disulfide and diallyl sulfide induced hepatocyte cytotoxicity.

Estrogen-like endocrine disrupting chemicals affecting puberty in humans--a review.

Biological safety of LipoFullerene composed of squalane and fullerene-C60 upon mutagenesis, photocytotoxicity, and permeability into the human skin tissue.

Cell death mechanisms in GT1-7 GnRH cells exposed to polychlorinated biphenyls PCB74, PCB118, and PCB153.

The relationship of Irgarol and its major metabolite to resident phytoplankton communities in a Maryland marina, river and reference area.

Pediocin A modulates intestinal microflora metabolism in swine in vitro intestinal fermentations.

Drug metabolizing enzyme expression in rat choroid plexus: effects of in vivo xenobiotics treatment.

Disruption of the thyroid system by diethylstilbestrol and ioxynil in the sea bream (*Sparus aurata*).

Detection of the anti-androgenic effect of endocrine disrupting environmental contaminants using in vivo and in vitro assays in the three-spined stickleback.

CYP1A1 and CYP1A2 expression: comparing 'humanized' mouse lines and wild-type mice; comparing human and mouse hepatoma-derived cell lines.

A piezoelectric immunosensor for the determination of pesticide residues and metabolites in fruit juices.

Dexamethasone controls aryl hydrocarbon receptor (AhR)-mediated CYP1A1 and CYP1A2 expression and activity in primary cultures of human hepatocytes.

Iodomethane human health risk characterization.

Evaluation of possible modes of action for acute effects of methyl iodide in laboratory animals.

In vitro glutathione conjugation of methyl iodide in rat, rabbit, and human blood and tissues.

Evaluation of respiratory parameters in rats and rabbits exposed to methyl iodide.

Two-day inhalation toxicity study of methyl iodide in the rat.

Folate, Cobalamin, Cysteine, Homocysteine, and Arsenic Metabolism among Children in Bangladesh.

Dioxin-induced up-regulation of the active form of vitamin D is the main cause for its inhibitory action on osteoblast activities, leading to developmental bone toxicity.

Studies supporting the development of a physiologically based pharmacokinetic (PBPK) model for methyl iodide: pharmacokinetics of sodium iodide (NaI) in pregnant rabbits.

Effects of aerobic and anaerobic metabolic inhibitors on avian intrapulmonary chemoreceptors.

Sustaining hypercitrullinemia, hypercholesterolemia and augmented oxidative stress in Japanese children with aspartate/glutamate carrier isoform 2-citrin-deficiency even during the silent period.

Using Biomonitoring Equivalents to interpret human biomonitoring data in a public health risk context.

Mechanisms of stress resistance in Snell dwarf mouse fibroblasts: enhanced antioxidant and DNA base excision repair capacity, but no differences in mitochondrial metabolism.

Transgenic mouse lines expressing rat AH receptor variants--a new animal model for research on AH receptor function and dioxin toxicity mechanisms.

Genetic polymorphisms in AS3MT and arsenic metabolism in residents of the Red River Delta, Vietnam.

Co-metabolism of 2,4-dichlorophenol and 4-Cl-m-cresol in the presence of glucose as an easily assimilated carbon source by *Staphylococcus xylosum*.

Biological safety of liposome-fullerene consisting of hydrogenated lecithin, glycine soja sterols, and fullerene-C60 upon photocytotoxicity and bacterial reverse mutagenicity.

Features of mitochondrial energetics in living unicellular eukaryote *Tetrahymena pyriformis*. A model for study of mammalian intracellular adaptation.

Influence of inorganic and organic iron compounds on parameters of cell growth and survival in human colon cells.

Mitochondrial bioenergetics of testicular cells from the domestic cat (*Felis catus*)-a model for endangered species.

Effects of smoking cessation on eight urinary tobacco carcinogen and toxicant biomarkers.

Multiple adverse thyroid and metabolic health signs in the population from the area heavily polluted by organochlorine cocktail (PCB, DDE, HCB, dioxin).

Aldose reductase decreases endoplasmic reticulum stress in ischemic hearts.

Variability in biomarkers of arsenic exposure and metabolism in adults over time.

5,7-dihydroxy-3,4,6-trimethoxyflavone inhibits the inflammatory effects induced by *Bacteroides fragilis* enterotoxin via dissociating the complex of heat shock protein 90 and I kappaB alpha and I kappaB kinase-gamma in intestinal epithelial cell culture.

Parathyroid hormone regulation of the human bone sialoprotein gene transcription is mediated through two cAMP response elements.

Expression and transcriptional regulation of ABC transporters and cytochromes P450 in hCMEC/D3 human cerebral microvascular endothelial cells.

Functional ryanodine receptors in the plasma membrane of RINm5F pancreatic beta-cells.

New insights into the role of Fur proteins: FurB (AlI2473) from *Anabaena* protects DNA and increases cell survival under oxidative stress.

CYP1A1 induction and CYP3A4 inhibition by the fungicide imazalil in the human intestinal Caco-2 cells-comparison with other conazole pesticides.

Deletion of the mitochondrial superoxide dismutase *sod-2* extends lifespan in *Caenorhabditis elegans*.

Signaling pathways involved in the effect of follicle-stimulating hormone on chick embryo testis cell proliferation.

The use of microelectrode array (MEA) to study the protective effects of potassium channel openers on metabolically compromised HL-1 cardiomyocytes.

Disruption of period gene expression alters the inductive effects of dioxin on the AhR signaling pathway in the mouse liver.

New ifosfamide analogs designed for lower associated neurotoxicity and nephrotoxicity with modified alkylating kinetics leading to enhanced in vitro anticancer activity.

Moricandia arvensis extracts protect against DNA damage, mutagenesis in bacteria system and scavenge the superoxide anion.

Relationship of urinary arsenic metabolites to intake estimates in residents of the Red River Delta, Vietnam.

Refractory cardiopulmonary failure after glyphosate surfactant intoxication: a case report.

Arabinoxylan-oligosaccharides (AXOS) affect the protein/carbohydrate fermentation balance and microbial population dynamics of the Simulator of Human Intestinal Microbial Ecosystem.

Zolpidem, a clinical hypnotic that affects electronic transfer, alters synaptic activity through potential GABA receptors in the nervous system without significant free radical generation.

Paclitaxel-resistance conferred by altered expression of efflux and influx transporters for paclitaxel in the human hepatoma cell line, HepG2.

Early biochemical and morphological modifications in the brain of a transgenic mouse model of Alzheimer's disease: a role for peroxisomes.

ABA-mediated inhibition of germination is related to the inhibition of genes encoding cell-wall biosynthetic and architecture: modifying enzymes and structural proteins in *Medicago truncatula* embryo axis.

The role of polyamine metabolism in neuronal injury following cerebral ischemia.

Green tea extract increases cyclophosphamide-induced teratogenesis by modulating the expression of cytochrome P-450 mRNA.

Searching for anthropogenic contaminants in human breast adipose tissues using gas chromatography-time-of-flight mass spectrometry.

Effects of perinatal PBDE exposure on hepatic phase I, phase II, phase III, and deiodinase 1 gene expression involved in thyroid hormone metabolism in male rat pups.

Role of the cyclooxygenase 2-thromboxane pathway in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced decrease in mesencephalic vein blood flow in the zebrafish embryo.

Minitags for small molecules: detecting targets of reactive small molecules in living plant tissues using 'click chemistry'.

Photolysis of the herbicide sulcotrione: formation of a major photoproduct and its toxicity evaluation.

Activation of NF-kappaB p65/c-Rel dimer is associated with neuroprotection elicited by mGlu5 receptor agonists against MPP(+) toxicity in SK-N-SH cells.

Comparison of the time courses of selective gene expression and dopaminergic depletion induced by MPP+ in MN9D cells.

Effect of alachlor and metolachlor on toxicity of chlorpyrifos and major detoxification enzymes in the aquatic midge, *Chironomus tentans* (Diptera: Chironomidae).

Application of biochemical fingerprinting and fatty acid methyl ester profiling to assess the effect of the pesticide Atradox on aquatic microbial communities.

Cytotoxic, genotoxic and cell-cycle disruptive effects of thio-dimethylarsinate in cultured human cells and the role of glutathione.

A gene-shuffled glyphosate acetyltransferase protein from *Bacillus licheniformis* (GAT4601) shows no evidence of allergenicity or toxicity.

Formation of dimethylthioarsenicals in red blood cells.

The 2,4-D herbicide effects on acetylcholinesterase activity and metabolic parameters of piava freshwater fish (*Leporinus obtusidens*).

Physiological and toxicological characterization of an engineered whole-cell biosensor.

Longitudinal changes in microbial planktonic communities of a French river in relation to pesticide and nutrient inputs.

Changes in muscarinic receptors in the toad urothelial cell line TBM-54 following acrolein treatment.

Arsenic speciation analysis in human saliva.

Phenoxyherbicides induce production of free radicals in human erythrocytes: oxidation of dichlorodihydrofluorescein and dihydrorhodamine 123 by 2,4-D-Na and MCPA-Na.

Bioaccumulation, sublethal toxicity, and biotransformation of sediment-associated pentachlorophenol in *Lumbricus variegatus* (Oligochaeta).

Pretreatment with near-infrared light via light-emitting diode provides added benefit against rotenone- and MPP+-induced neurotoxicity.

Effects of acrolein on leukotriene biosynthesis in human neutrophils.

Herbicidal effects of sulfamethoxazole in *Lemna gibba*: using p-aminobenzoic acid as a biomarker of effect.

G-protein-coupled receptor 30 and estrogen receptor-alpha are involved in the proliferative effects induced by atrazine in ovarian cancer cells.

The effect of alpha-synuclein knockdown on MPP+ toxicity in models of human neurons.

In vitro screening for aryl hydrocarbon receptor agonistic activity in 200 pesticides using a highly sensitive reporter cell line, DR-EcoScreen cells, and in vivo mouse liver cytochrome P450-1A induction by propanil, diuron and linuron.

Hepatoma tissue culture (HTC) cells as a model for investigating the effects of low concentrations of herbicide on cell structure and function.

Prostaglandin analogue misoprostol attenuates neurotoxin 1-methyl-4-phenylpyridinium-induced mitochondrial damage and cell death in differentiated PC12 cells.

A comparative 90-day toxicity study of allyl acetate, allyl alcohol and acrolein.

Determination of glyphosate, glyphosate metabolites, and glufosinate in human serum by gas chromatography-mass spectrometry.

Study of the toxicity of diuron and its metabolites formed in aqueous medium during application of the electrochemical advanced oxidation process "electro-Fenton".

Effects of subchronic exposure to LASSO MTX (alachlor 42% W/V) on hematological indices and histology of the common Carp, *Cyprinus carpio* L.

Atrazine and increased male production by *Daphnia*: the importance of combining field and laboratory approaches.

Toxicity assessment of the herbicides sulcotrione and mesotrione toward two reference environmental microorganisms: *Tetrahymena pyriformis* and *Vibrio fischeri*.

Spermatogenesis, epididymis morphology and plasma sex steroid secretion in the male lizard *Podarcis sicula* exposed to diuron.

Dissipation of four forest-use herbicides at high latitudes.

Difference in the sensitivity to chemical compounds between female and male neonates of *Daphnia magna*.

More toxic and photoresistant products from photodegradation of fenoxaprop-p-ethyl.

Sonophotocatalysis of endocrine-disrupting chemicals.

Cortisol response to acute stress in jundiá *Rhamdia quelen* acutely exposed to sub-lethal concentrations of agrichemicals.

Cilostazol inhibits oxidative stress-induced premature senescence via upregulation of Sirt1 in human endothelial cells.

Induction of enzymes of 2,4-dichlorophenoxyacetate degradation in *Burkholderia cepacia* 2a and toxicity of metabolic intermediates.

Biomonitoring Equivalents (BE) dossier for 2,4-dichlorophenoxyacetic acid (2,4-D) (CAS No. 94-75-7).

High doses of atrazine do not disrupt activity and expression of aromatase in female gonads of juvenile goldfish (*Carassius auratus* L.).

In vitro nephrotoxicity induced by propanil.

Mechanism of trifluralin-induced thyroid tumors in rats.

Growth and protein metabolism in red drum (*Sciaenops ocellatus*) larvae exposed to environmental levels of atrazine and malathion.

Cytotoxicity of combinations of arsenicals on rat urinary bladder urothelial cells in vitro.

Variations in relative stomatal and biochemical limitations to photosynthesis in a young blackbutt (*Eucalyptus pilularis*) plantation subjected to different weed control regimes.

Role of protein kinase Cdelta in paraquat-induced glial cell death.

Specific interactions of chloroacetanilide herbicides with human ABC transporter proteins.

Development of GCxGC/TOF-MS metabolomics for use in ecotoxicological studies with invertebrates.

Developmental exposure to pentachlorophenol affects the expression of thyroid hormone receptor beta1 and synapsin I in brain, resulting in thyroid function vulnerability in rats.

Comparative transcriptomic responses to chronic cadmium, fluoranthene, and atrazine exposure in *Lumbricus rubellus*.

Maneb potentiates paraquat neurotoxicity by inducing key Bcl-2 family members.

Enantioselectivity in toxicity and degradation of dichlorprop-methyl in algal cultures.

Variation in somatic and ovarian development: predicting susceptibility of amphibians to estrogenic contaminants.

Spiking solvent, humidity and their impact on 2,4-D and 2,4-DCP extractability from high humic matter content soils.

Proteomic analysis of diaminochlorotriazine adducts in wistar rat pituitary glands and LbetaT2 rat pituitary cells.

Induction of COX-2 expression by acrolein in the rat model of hemorrhagic cystitis.

Effect of 2,4-dichlorophenoxyacetic acid on growth, protein and chlorophyll-a content of *Chlorella vulgaris* and *Spirulina platensis* cells.

Acute pancreatitis caused by severe glyphosate-surfactant oral intoxication.

The early prognostic factors of glyphosate-surfactant intoxication.

A fatal intoxication from ingestion of 2-methyl-4-chlorophenoxyacetic acid (MCPA).

Diabetes and cancer in veterans of Operation Ranch Hand after adjustment for calendar period, days of spraying, and time spent in Southeast Asia.

Differential phosphorylation of translation initiation regulators 4EBP1, S6k1, and Erk 1/2 following inhibition of alcohol metabolism in mouse heart.

Changes in microbiological metabolism under chemical stress.

Metabolic acidosis in prometryn (triazine herbicide) self-poisoning.

Protective effect of prion protein via the N-terminal region in mediating a protective effect on paraquat-induced oxidative injury in neuronal cells.

Application of physiological computational fluid dynamics models to predict interspecies nasal dosimetry of inhaled acrolein.

Comparative cytotoxicity of alachlor, acetochlor, and metolachlor herbicides in isolated rat and cryopreserved human hepatocytes.

Bioremediation of atrazine-contaminated soil by forage grasses: transformation, uptake, and detoxification.

Coupling endoplasmic reticulum stress to the cell death program in dopaminergic cells: effect of paraquat.

Urinary corticosterone as an indicator of stress-mediated immunological changes in rats.

[Effects of amitrole on thyroid hormone-associated gene transcription in FRTL-5 cells].

Acrolein: sources, metabolism, and biomolecular interactions relevant to human health and disease.

Analysis of phenoxyacetic acid herbicides as biomarkers in human urine using liquid chromatography/triple quadrupole mass spectrometry.

UCP2 modulates cell proliferation through the MAPK/ERK pathway during erythropoiesis and has no effect on heme biosynthesis.

Anti-diabetic effects of cinnamaldehyde and berberine and their impacts on retinol-binding protein 4 expression in rats with type 2 diabetes mellitus.

Reduction in the anxiolytic effects of ethanol by centrally formed acetaldehyde: the role of catalase inhibitors and acetaldehyde-sequestering agents.

Hypothyroidism is associated with increased myostatin expression in rats.

Gene expression profiles of mouse striatum in control and maneb + paraquat-induced Parkinson's disease phenotype: validation of differentially expressed energy metabolizing transcripts.

Plasma acrolein levels and their association with delayed ischemic neurological deficits following aneurysmal subarachnoid haemorrhage: a pilot study.

Prostaglandins inhibit cytochrome P450 4A activity and contribute to endotoxin-induced hypotension in rats via nitric oxide production.

The biochemistry of heme biosynthesis.

Catalytic metalloporphyrin protects against paraquat neurotoxicity in vivo.

Mutations of the withered (whd) gene in *Drosophila melanogaster* confer hypersensitivity to oxidative stress and are lesions of the carnitine palmitoyltransferase I (CPT I) gene.

Oxidative stress as a biomarker of respiratory disturbance in patients with severe motor and intellectual disabilities.

Adipose tissue-specific PPARgamma deficiency increases resistance to oxidative stress.

PPARalpha and PPARbeta are differentially affected by ethanol and the ethanol metabolite acetaldehyde in the MCF-7 breast cancer cell line.

Spatial distribution of cytosolic NADP(+)-isocitrate dehydrogenase in pine embryos and seedlings.

Effect of different humic substances on the fate of diuron and its main metabolite 3,4-dichloroaniline in soil.

Transcriptional modulation of ethylene response factor protein JERF3 in the oxidative stress response enhances tolerance of tobacco seedlings to salt, drought, and freezing.

Temperature and water pressure head effects on the degradation of the diketonitrile metabolite of isoxaflutole in a loamy soil under two tillage systems.

New phytotoxic metabolites from *Pestalotiopsis* sp. HC02, a Fungus Residing in *Chondracris rosea* gut.

Tissue distribution and urinary excretion of inorganic arsenic and its methylated metabolites in C57BL6 mice following subchronic exposure to arsenate in drinking water.

Glutathione transferases from *Anguilla anguilla* liver: identification, cloning and functional characterization.

A SEC-HPLC-ICP MS hyphenated technique for identification of sulfur-containing arsenic metabolites in biological samples.

Molecularly imprinted polymer applied to the determination of the residual mass of atrazine and metabolites within an agricultural catchment (BrÃ©villes, France).

Metabolism of nitrodiphenyl ether herbicides by dioxin-degrading bacterium *Sphingomonas wittichii* RW1.

Role of acetaldehyde in ethanol-induced elevation of the neuroactive steroid 3alpha-hydroxy-5alpha-pregnan-20-one in rats.

Catabolism of glutathione conjugates in *Arabidopsis thaliana*. Role in metabolic reactivation of the herbicide safener fenclorim.

Quantification of atrazine and its metabolites in urine by on-line solid-phase extraction-high-performance liquid chromatography-tandem mass spectrometry.

Oxidative alterations induced by D-aspartic acid in prepubertal rat testis in vitro: a mechanistic study.

Activation of glucose transport under oxidative stress in *Escherichia coli*.

Microbial degradation of the benzonitrile herbicides dichlobenil, bromoxynil and ioxynil in soil and subsurface environments--insights into degradation pathways, persistent metabolites and involved degrader organisms.

Multi-walled carbon nanotubes as solid-phase extraction adsorbents for determination of atrazine and its principal metabolites in water and soil samples by gas chromatography-mass spectrometry.

Alteration of dopamine uptake into rat striatal vesicles and synaptosomes caused by an in vitro exposure to atrazine and some of its metabolites.

Anti-inflammation activities of essential oil and its constituents from indigenous cinnamon (*Cinnamomum osmophloeum*) twigs.

Genotoxicity of triasulfuron in the wing spot test of *Drosophila melanogaster* is modulated by winter wheat seedlings.

Improved resistance to oxidative stress by a loss-of-function mutation in the *Arabidopsis* UGT71C1 gene.

Cyanobacterial toxins as allelochemicals with potential applications as algaecides, herbicides and insecticides.

The herbicide atrazine activates endocrine gene networks via non-steroidal NR5A nuclear receptors in fish and mammalian cells.

Loss of tafazzin in yeast leads to increased oxidative stress during respiratory growth.

Developmental exposure to endocrine disruptor chemicals alters follicular dynamics and steroid levels in *Caiman latirostris*.

Nitrogen metabolism and seed composition as influenced by glyphosate application in glyphosate-resistant soybean.

New insights into a bacterial metabolic and detoxifying association responsible for the mineralization of the thiocarbamate herbicide molinate.

Extractable atrazine and its metabolites in agricultural soils from the temperate humid zone.

Genetic transformation via somatic embryogenesis to establish herbicide-resistant opium poppy.

Acrolein induces heme oxygenase-1 through PKC-delta and PI3K in human bronchial epithelial cells.

Callogenic studies of *Achyranthes aspera* leaf explant at different hormonal combinations.

In vitro regeneration of *Irvingia gabonensis* by somatic embryogenesis.

Fibroblasts from naked mole-rats are resistant to multiple forms of cell injury, but sensitive to peroxide, ultraviolet light, and endoplasmic reticulum stress.

Effects of cinnamaldehyde on PGE2 release and TRPV4 expression in mouse cerebral microvascular endothelial cells induced by interleukin-1beta.

Identification of the major arsenic-binding protein in rat plasma as the ternary dimethylarsinous-hemoglobin-haptoglobin complex.

Preventing cell death induced by carbonyl stress, oxidative stress or mitochondrial toxins with vitamin B anti-AGE agents.

Identification of metabolites during biodegradation of pendimethalin in bioslurry reactor.

Phyllostoxin and phyllostin, bioactive metabolites produced by *Phyllosticta cirsii*, a potential mycoherbicide for *Cirsium arvense* biocontrol.

Nasal uptake of inhaled acrolein in rats.

Development of a human physiologically based pharmacokinetic (PBPK) model for inorganic arsenic and its mono- and di-methylated metabolites.

Placental transfer of polychlorinated biphenyls, their hydroxylated metabolites and pentachlorophenol in pregnant women from eastern Slovakia.

Detoxification of molinate sulfoxide: comparison of spontaneous and enzymatic glutathione conjugation using human and rat liver cytosol.

Transgenic rice plants expressing human p450 genes involved in xenobiotic metabolism for phytoremediation.

Significance of the nongenomic, inflammatory pathway in mediating the toxic action of TCDD to induce rapid and long-term cellular responses in 3T3-L1 adipocytes.

Decoy receptor 3 expression in AsPC-1 human pancreatic adenocarcinoma cells via the phosphatidylinositol 3-kinase-, Akt-, and NF-kappa B-dependent pathway.

The effects of in utero exposure to a migrant, 4,4'-butylidenebis(6-t-butyl-m-cresol), from nitrile-butadiene rubber gloves on monoamine neurotransmitter in rats.

Curcumin attenuates cytochrome P450 induction in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin by ROS-dependently degrading AhR and ARNT.

Dihydrolipoic acid inhibits tetrachlorohydroquinone-induced tumor promotion through prevention of oxidative damage.

Aryl hydrocarbon receptor-interacting protein and pituitary adenomas: a population-based study on subjects exposed to dioxin after the Seveso, Italy, accident.

Effect of FeSO₄ treatment on glucose metabolism in diabetic rats.

Enhancement of hypoxia-induced gene expression in fish liver by the aryl hydrocarbon receptor (AhR) ligand, benzo[a]pyrene (BaP).

Heat shock protein 90 inhibitors suppress aryl hydrocarbon receptor-mediated activation of CYP1A1 and CYP1B1 transcription and DNA adduct formation.

Effects of 3-methyl-4-nitrophenol on the reproductive toxicity in female Japanese quail (*Coturnix japonica*).

New insights into uremic toxicity.

Elevated expression of CYP1A1 and gamma-SYNUCLEIN in human ectopic (ovarian) endometriosis compared with eutopic endometrium.

Omeprazole alleviates benzo[a]pyrene cytotoxicity by inhibition of CYP1A1 activity in human and mouse hepatoma cells.

Abnormal liver development and resistance to 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity in mice carrying a mutation in the DNA-binding domain of the aryl hydrocarbon receptor.

Genotoxic potential of Polycyclic Aromatic Hydrocarbons-coated onto airborne Particulate Matter (PM 2.5) in human lung epithelial A549 cells.

Transposition of the great arteries.

A margin-of-exposure approach to assessment of noncancer risks of dioxins based on human exposure and response data.

Potassium fluxes, energy metabolism, and oxygenation in intact diabetic rat hearts under normal and stress conditions.

Parkinson disease: primacy of age as a risk factor for mitochondrial dysfunction.

Release kinetics of intact and degraded troponin I and T after irreversible cell damage.

Temporal metabonomic modeling of l-arginine-induced exocrine pancreatitis.

An enhanced postnatal autoimmune profile in 24 week-old C57BL/6 mice developmentally exposed to TCDD.

Critical role of cyclooxygenase-2 activation in pathogenesis of hydronephrosis caused by lactational exposure of mice to dioxin.

Environmental exposures and adverse pregnancy outcomes: a review of the science.

Novel ryanodine receptor mutation that may cause malignant hyperthermia.

Associations of environmental exposure to dioxins with prevalent diabetes among general inhabitants in Japan.

Protective effects of GH and IGF-I against iron-induced lipid peroxidation in vivo.

Nonadditive effects of PAHs on Early Vertebrate Development: mechanisms and implications for risk assessment.

Synthesis and evaluation in vitro and in vivo of a ¹¹C-labeled cyclooxygenase-2 (COX-2) inhibitor.

TEQ(S) and body burden for PCDDs, PCDFs, and dioxin-like PCBs in human adipose tissue.

Evaluation of tumour promoting potency of fish borne toxaphene residues, as compared to technical toxaphene and UV-irradiated toxaphene.

Concurrent subacute exposure to arsenic through drinking water and malathion via diet in male rats: effects on hepatic drug-metabolizing enzymes.

Sodium arsenite induces orphan nuclear receptor SHP gene expression via AMP-activated protein kinase to inhibit gluconeogenic enzyme gene expression.

Automated quantitative dose-response modeling and point of departure determination for large toxicogenomic and high-throughput screening data sets.

Beneficial impact of L-carnitine in liver: a study in a rat model of syndrome X.

Toxicity of inorganic arsenic and its metabolites on haematopoietic progenitors "in vitro": comparison between species and sexes.

Neonatal thyroid function in Seveso 25 years after maternal exposure to dioxin.

Interplay between cellular methyl metabolism and adaptive efflux during oncogenic transformation from chronic arsenic exposure in human cells.

Resveratrol prevents estrogen-DNA adduct formation and neoplastic transformation in MCF-10F cells.

Arsenic trioxide and auranofin inhibit selenoprotein synthesis: implications for chemotherapy for acute promyelocytic leukaemia.

Chronic exposure to glufosinate-ammonium induces spatial memory impairments, hippocampal MRI modifications and glutamine synthetase activation in mice.

Acute energy restriction triggers Wallerian degeneration in mouse.

Animal model of posterior cingulate cortex hypometabolism implicated in amnesic MCI and AD.

Cytochrome P450 2C11 5'-flanking region and promoter: regulation by aromatic hydrocarbons in vitro.

Involvement of SREBPs in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced disruption of lipid metabolism in male guinea pig.

Inorganic arsenic exposure affects pain behavior and inflammatory response in rat.

Effect of hemolytic and iron-deficiency anemia on intestinal absorption and tissue accumulation of cadmium.

Mitochondrial translocation of alpha-synuclein is promoted by intracellular acidification.

Polychlorinated biphenyl-77 induces adipocyte differentiation and proinflammatory adipokines and promotes obesity and atherosclerosis.

Can folate intake reduce arsenic toxicity?

Enhanced detection of autoantibodies on protein microarrays using a modified protein digestion technique.

Basil extract inhibits the sulfotransferase mediated formation of DNA adducts of the procarcinogen 1'-hydroxyestragole by rat and human liver S9 homogenates and in HepG2 human hepatoma cells.

Exposure assessment of workers to airborne PCDD/Fs, PCBs and PAHs at an electric arc furnace steelmaking plant in the UK.

Relationship between insulin sensitivity and exposure to dioxins and polychlorinated biphenyls in pregnant women.

Clinical manifestations and arsenic methylation after a rare subacute arsenic poisoning accident.

High potency of bioactivation of 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) in mouse colon epithelial cells with Apc(Min) mutation.

A study of the process of apoptosis in animals infected with the contagious ecthyma virus.

Incident diabetes and pesticide exposure among licensed pesticide applicators: Agricultural Health Study, 1993-2003.

Constitutive regulation of CYP1B1 by the aryl hydrocarbon receptor (AhR) in pre-malignant and malignant mammary tissue.

Perinatal exposure of female rats to 2,3,7,8-tetrachlorodibenzo-p-dioxin induces central precocious puberty in the offspring.

Experience of nitisinone for the pharmacological treatment of hereditary tyrosinaemia type 1.

High prevalence of celiac disease in Mexican Mestizo adults with type 1 diabetes mellitus.

Metabolic flexibility permits mesenchymal stem cell survival in an ischemic environment.

Free p-cresol is associated with cardiovascular disease in hemodialysis patients.

Inhibition of astrocytic energy metabolism by D-lactate exposure impairs memory.

An improved system for exposure of cultured mammalian cells to gaseous compounds in the chromosomal aberration assay.

Mortality in a population exposed to dioxin after the Seveso, Italy, accident in 1976: 25 years of follow-up.

Sodium arsenite induces heat shock protein 70 expression and protects against secretagogue-induced trypsinogen and NF-kappaB activation.

Dose response evaluation of gene expression profiles in the skin of K6/ODC mice exposed to sodium arsenite.

[An overview on biomarkers of arsenic-induced health hazardsan].

Risk factors for ovarian cancer: an overview with emphasis on hormonal factors.

Role of hormonal and other factors in human prostate cancer.

Nutritional status has marginal influence on the metabolism of inorganic arsenic in pregnant Bangladeshi women.

The common environmental pollutant dioxin-induced memory deficits by altering estrogen pathways and a major route of retinol transport involving transthyretin.

Decreased epithelial barrier function evoked by exposure to metabolic stress and nonpathogenic *E. coli* is enhanced by TNF- α .

Dioxin-mediated up-regulation of aryl hydrocarbon receptor target genes is dependent on the calcium/calmodulin/CaMKI α pathway.

Regulation of aryl hydrocarbon receptor expression and function by glucocorticoids in mouse hepatoma cells.

Environmental exposure to dioxins and polychlorinated biphenyls reduce levels of gonadal hormones in newborns: results from the Duisburg cohort study.

Enhancements of 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone (NNK) metabolism and carcinogenic risk via NNK/arsenic interaction.

Environmental immune disruption: a comorbidity factor for reproduction?

Prenatal treatment with retinoic acid accelerates type 1 alveolar cell proliferation of the hypoplastic lung in the nitrofen model of congenital diaphragmatic hernia.

Health effects of early life exposure to arsenic.

Exploiting gene-environment interaction to detect adverse health effects of environmental chemicals on the next generation.

Essential role of the AH receptor in the dysfunction of heme metabolism induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Renoprotective action of L-carnitine in fructose-induced metabolic syndrome.

Arsenite-induced thymus atrophy is mediated by cell cycle arrest: a characteristic downregulation of E2F-related genes revealed by a microarray approach.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin administration and high-fat diet on the body weight and hepatic estrogen metabolism in female C3H/HeN mice.

Subhepatotoxic exposure to arsenic enhances lipopolysaccharide-induced liver injury in mice.

Abscisic acid controls calcium-dependent egress and development in *Toxoplasma gondii*.

The effects of gum arabic oral treatment on the metabolic profile of chronic renal failure patients under regular haemodialysis in Central Sudan.

[Outdoor work-related health hazards].

Residential exposures to pesticides and childhood leukaemia.

Integrated approach to immunotoxicity: electron transfer, reactive oxygen species, antioxidants, cell signaling, and receptors.

Environmental contaminants as risk factors for developing diabetes.

Disruption of aryl hydrocarbon receptor (AhR) induces regression of the seminal vesicle in aged male mice.

Inhalant abuse detection and evaluation in young Tunisians.

Feasibility studies of 4'-[methyl-(11)C]thiothymidine as a tumor proliferation imaging agent in mice.

Endocrine disruptors and estrogenic effects on male reproductive axis.

Effects of anoxia, aglycemia, and acidosis on cytosolic Mg²⁺, ATP, and pH in rat sensory neurons.

Does impaired mitochondrial function affect insulin signaling and action in cultured human skeletal muscle cells?

Urinary 8-hydroxydeoxyguanosine and urothelial carcinoma risk in low arsenic exposure area.

An evidence for regulatory cross-talk between aryl hydrocarbon receptor and glucocorticoid receptor in HepG2 cells.

Concentrations of urinary pesticide metabolites in small-scale farmers in Chiang Mai Province, Thailand.

Clinical applications of urinary organic acids. Part 2. Dysbiosis markers.

Preventing NAD(+) depletion protects neurons against excitotoxicity: bioenergetic effects of mild mitochondrial uncoupling and caloric restriction.

A whole-animal microplate assay for metabolic rate using zebrafish.

Arabidopsis iba response5 suppressors separate responses to various hormones.

A single administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin that produces reduced food and water intake induces long-lasting expression of corticotropin-releasing factor, arginine vasopressin, and proopiomelanocortin in rat brain.

Nonenzymatic formation of a novel hydroxylated sulfamethoxazole derivative in human liver microsomes: implications for bioanalysis of sulfamethoxazole metabolites.

Effects of 2,4-dichlorophenol on the expression of vitellogenin and estrogen receptor genes and physiology impairments in Chinese rare minnow (*Gobiocypris rarus*).

Determination of plant hormones in fertilizers by high-performance liquid chromatography with photodiode array detection: method development and single-laboratory validation.

[Gene cloning, sequence analysis and tissue expression of estrogen-related receptor alpha (Erralpha) in Japanese medaka and its transcriptional responses after differential EDCs exposure].

Comparison of enzymatic antioxidant defence systems in different metabolic types of yeasts.

Phosphorylation of xenobiotic-metabolizing cytochromes P450.

Arabidopsis AAL-toxin-resistant mutant atr1 shows enhanced tolerance to programmed cell death induced by reactive oxygen species.

Embryotoxicity hazard assessment of cadmium and arsenic compounds using embryonic stem cells.

Combining ligand-based pharmacophore modeling, quantitative structure-activity relationship analysis and in silico screening for the discovery of new potent hormone sensitive lipase inhibitors.

A human intervention study with foods containing natural Ah-receptor agonists does not significantly show AhR-mediated effects as measured in blood cells and urine.

Genetic variation for lettuce seed thermoinhibition is associated with temperature-sensitive expression of abscisic Acid, gibberellin, and ethylene biosynthesis, metabolism, and response genes.

Effects of endogenous hydrogen peroxide and glutathione on the stability of arsenic metabolites in rat bile.

Potent induction of total cellular and mitochondrial antioxidants and phase 2 enzymes by cruciferous sulforaphane in rat aortic smooth muscle cells: cytoprotection against oxidative and electrophilic stress.

Involvement of the pyrilamine transporter, a putative organic cation transporter, in blood-brain barrier transport of oxycodone.

Co-metabolic degradation of bensulfuron-methyl in laboratory conditions.

Fifteen years after "Wingspread"--environmental endocrine disrupters and human and wildlife health: where we are today and where we need to go.

New auxin analogs with growth-promoting effects in intact plants reveal a chemical strategy to improve hormone delivery.

Metabolic fate of [14C] chlorophenols in radish (*Raphanus sativus*), lettuce (*Lactuca sativa*), and spinach (*Spinacia oleracea*).

[Superoxide induces cellular growth and apoptosis of cultured human peripheral blood lymphocytes].

Formocresol blood levels in children receiving dental treatment under general anesthesia.

Identification of the functional domain of thyroid hormone receptor responsible for polychlorinated biphenyl-mediated suppression of its action in vitro.

Synthesis and in vivo evaluation of novel PET radioligands for imaging the endothelin-A receptor.

Evaluation of N (epsilon)-(3-formyl-3,4-dehydropiperidino)lysine as a novel biomarker for the severity of diabetic retinopathy.

Toxicity of analytically cleaned pentabromodiphenylether after prolonged exposure in estuarine European flounder (*Platichthys flesus*), and partial life-cycle exposure in fresh water zebrafish (*Danio rerio*).

Monitoring of dioxin-like, estrogenic and anti-androgenic activities in sediments of the Bizerta lagoon (Tunisia) by means of in vitro cell-based bioassays: contribution of low concentrations of polynuclear aromatic hydrocarbons (PAHs).

Down-regulation of the carcinogen-metabolizing enzyme cytochrome P450 1a1 by vanadium.

Phospholipase A(2), reactive oxygen species, and lipid peroxidation in CNS pathologies.

Successful desensitization with human insulin in a patient with an insulin allergy and hypersensitivity to protamine: a case report.

Mutagenicity of N-nitrosodiethanolamine in a V79-derived cell line expressing two human biotransformation enzymes.

Unbiased high-throughput screening of reactive metabolites on the linear ion trap mass spectrometer using polarity switch and mass tag triggered data-dependent acquisition.

Xenobiotic intrinsic clearance in freshly isolated hepatocytes from rainbow trout (*Oncorhynchus mykiss*): determination of trout hepatocellularity, optimization of cell concentrations and comparison of serum and serum-free incubations.

Dose-response effect of arabinoxyloligosaccharides on gastrointestinal motility and on colonic bacterial metabolism in healthy volunteers.

Metabolic reconstruction of aromatic compounds degradation from the genome of the amazing pollutant-degrading bacterium *Cupriavidus necator* JMP134.

Acetyl-L-Carnitine selectively prevents post-ischemic LTP via a possible action on mitochondrial energy metabolism.

Plasmalogen deficiency in cerebral adrenoleukodystrophy and its modulation by lovastatin.

Mild mitochondrial uncoupling in mice affects energy metabolism, redox balance and longevity.

Differences in gene expression and benzo[a]pyrene-induced DNA adduct formation in the liver of three strains of female mice with identical AhRb2 genotype treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin and/or benzo[a]pyrene.

Metabolic engineering of novel ketocarotenoid production in carrot plants.

Potential endocrine disruption of sexual development in free ranging male northern leopard frogs (*Rana pipiens*) and green frogs (*Rana clamitans*) from areas of intensive row crop agriculture.

Changes in correlation coefficients of exposure markers as a function of intensity of occupational exposure to toluene.

Alternative electron acceptors: Proposed mechanism of paraquat mitochondrial toxicity.

Molecular characterization of TRPA1 channel activation by cysteine-reactive inflammatory mediators.

Rapid screening of glutathione-trapped reactive metabolites by linear ion trap mass spectrometry with isotope pattern-dependent scanning and postacquisition data mining.

Simultaneous determination of 19 intracellular nucleotides and nucleotide sugars in Chinese Hamster ovary cells by capillary electrophoresis.

Comparative study of ezrin phosphorylation among different tissues: more is good; too much is bad.

Toxic tetrapyrrole accumulation in protoporphyrinogen IX oxidase-overexpressing transgenic rice plants.

Ghrelin infused into the portal vein inhibits glucose-stimulated insulin secretion in Wistar rats.

Gender differences in the effects of organochlorines, mercury, and lead on thyroid hormone levels in lakeside communities of Quebec (Canada).

The Duisburg birth cohort study: influence of the prenatal exposure to PCDD/Fs and dioxin-like PCBs on thyroid hormone status in newborns and neurodevelopment of infants until the age of 24 months.

Adsorptive stripping square wave voltammetry (Ad-SSWV) accomplished with second-order multivariate calibration determination of fenitrothion and its metabolites in river water samples.

Intrinsic AhR function underlies cross-talk of dioxins with sex hormone signalings.

Styrene trimer may increase thyroid hormone levels via down-regulation of the aryl hydrocarbon receptor (AhR) target gene UDP-glucuronosyltransferase.

Assessing the potential risk of oil-field produced waters using a battery of bioassays/biomarkers.

Two angular dioxygenases contribute to the metabolic versatility of dibenzofuran-degrading *Rhodococcus* sp. strain HA01.

Chemical sensitivity of the male daphnid, *Daphnia magna*, induced by exposure to juvenile hormone and its analogs.

Mutagenicity and antimutagenicity of teas used in popular medicine in the salmonella/microsome assay.

The *Caenorhabditis elegans* AMP-activated protein kinase AAK-2 is phosphorylated by LKB1 and is required for resistance to oxidative stress and for normal motility and foraging behavior.

Low-dose dioxins alter gene expression related to cholesterol biosynthesis, lipogenesis, and glucose metabolism through the aryl hydrocarbon receptor-mediated pathway in mouse liver.

Effect of dioxin exposure on aromatase expression in ovariectomized rats.

A potential route to neuroprostanes and isoprostanes: preparation of the four enantiomerically pure diastereomers of 13-F4t-neuroP.

Occurrence of endocrine-disrupting pesticide residues in wetland sediments from Beijing, China.

Spatially distributed ecological risk for fish of a coastal food web exposed to dioxins.

Quantitative analysis of three hydrogenotrophic microbial groups, methanogenic archaea, sulfate-reducing bacteria, and acetogenic bacteria, within plaque biofilms associated with human periodontal disease.

2,3,7,8-Tetrachlorodibenzo-p-dioxin exposure disrupts granule neuron precursor maturation in the developing mouse cerebellum.

TCDD deregulates contact inhibition in rat liver oval cells via Ah receptor, JunD and cyclin A.

Energy metabolism of a unique acetic acid bacterium, *Asaia bogorensis*, that lacks ethanol oxidation activity.

On-line solid phase extraction and liquid chromatography/tandem mass spectrometry to quantify pharmaceuticals, pesticides and some metabolites in wastewaters, drinking, and surface waters.

Results of the negative control chemical allyl alcohol in the 15-day intact adult male rat screening assay for endocrine activity.

Diverse mechanisms of anti-androgen action: impact on male rat reproductive tract development.

Organochlorine residues in the blubber and liver of bottlenose dolphins (*Tursiops truncatus*) stranded in the Canary Islands, North Atlantic Ocean.

A mixture of seven antiandrogens induces reproductive malformations in rats.

Toxicogenomic analysis of gender, chemical, and dose effects in livers of TCDD- or aroclor 1254-exposed rats using a multifactor linear model.

Polychlorinated biphenyls (PCBs) and hydroxy-PCBs in adipose tissue of women in Southeast Spain.

Inhibition of carrier-mediated uptake of epirubicin reduces cytotoxicity in primary culture of rat hepatocytes.

Hair analysis to document non-fatal pesticide intoxication cases.

Mechanistic aspects of 4-amino-2,6-dichlorophenol-induced in vitro nephrotoxicity.

Transient receptor potential A1 is a sensory receptor for multiple products of oxidative stress.

[Patterns of somatic embryo formation in Siberian larch: embryological aspects].

Identification of brominated and chlorinated phenols as potential thyroid-disrupting compounds in indoor dusts.

Variability of enzyme system of Nocardioform bacteria as a basis of their metabolic activity.

The concept of neurogenic inflammation.

Effect of genotype, gelling agent, and auxin on the induction of somatic embryogenesis in sweet potato (*Ipomoea batatas* Lam.).

Differential role of ferritins in iron metabolism and virulence of the plant-pathogenic bacterium *Erwinia chrysanthemi* 3937.

Acetochlor mineralization and fate of its two major metabolites in two soils under laboratory conditions.

Development and validation of a method for the analysis of cafenstrole and its metabolite in brown rice grains and rice straw using high-performance liquid chromatography.

Neuroendocrine and behavioral effects of embryonic exposure to endocrine disrupting chemicals in birds.

Antioxidant and antimutagenic activities of Mexican oregano (*Lippia graveolens* Kunth).

Cytochrome P4501A1 expression, polychlorinated biphenyls and hydroxylated metabolites, and adipocyte size of bottlenose dolphins from the Southeast United States.

Tissue dosimetry, metabolism and excretion of pentavalent and trivalent dimethylated arsenic in mice after oral administration.

Basal and inducible CYP1 mRNA quantitation and protein localization throughout the mouse gastrointestinal tract.

Glycerol metabolism and bitterness producing lactic acid bacteria in cidermaking.

Feasibility of 2,4,6-trichlorophenol and malonic acid as metabolic uncoupler for sludge reduction in the sequence batch reactor for treating organic wastewater.

Arsenic as an endocrine disruptor: arsenic disrupts retinoic acid receptor- and thyroid hormone receptor-mediated gene regulation and thyroid hormone-mediated amphibian tail metamorphosis.

Protective effect of arjunolic acid against arsenic-induced oxidative stress in mouse brain.

Teaching (and learning from) metabolomics: the 2006 PlantMetaNet ETNA Metabolomics Research School.

Metabolism and disposition of [¹⁴C]5-amino-o-cresol in female F344 rats and B6C3F1 mice.

Development of a human adipocyte model derived from human mesenchymal stem cells (hMSC) as a tool for toxicological studies on the action of TCDD.

The genome sequence of the metal-mobilizing, extremely thermoacidophilic archaeon *Metallosphaera sedula* provides insights into bioleaching-associated metabolism.

A comparison of infant hair, cord blood and meconium analysis to detect fetal exposure to environmental pesticides.

Phytoestrogens and xenoestrogens: the contribution of diet and environment to endocrine disruption.

Approach for extrapolating in vitro metabolism data to refine bioconcentration factor estimates.

Perinatal dioxin exposure, cytochrome P-450 activity, liver functions and thyroid hormones at follow-up after 7-12 years.

Long-term stability of various drugs and metabolites in urine, and preventive measures against their decomposition with special attention to filtration sterilization.

JNK inhibitor SP600125 is a partial agonist of human aryl hydrocarbon receptor and induces CYP1A1 and CYP1A2 genes in primary human hepatocytes.

Derivation of biomonitoring equivalent (BE) values for 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and related compounds: a screening tool for interpretation of biomonitoring data in a risk assessment context.

Mouse mammary tumor virus promoter-containing retroviral promoter conversion vectors for gene-directed enzyme prodrug therapy are functional in vitro and in vivo.

Protection of arsenic-induced testicular oxidative stress by arjunolic acid.

Dioxin exposure, from infancy through puberty, produces endocrine disruption and affects human semen quality.

Alpha-ketoglutarate and N-acetyl cysteine protect PC12 cells from cyanide-induced cytotoxicity and altered energy metabolism.

Chemical hypoxia-induced glucose transporter-4 translocation in neonatal rat cardiomyocytes.

P-glycoprotein-mediated efflux of phenobarbital at the blood-brain barrier evidence from transport experiments in vitro.

Molecular targets of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) within the zebrafish ovary: insights into TCDD-induced endocrine disruption and reproductive toxicity.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on testicular spermatogenesis-related panels and serum sex hormone levels in rats.

Role of the Met(287)Thr polymorphism in the AS3MT gene on the metabolic arsenic profile.

Interference of endocrine disrupting chemicals with aromatase CYP19 expression or activity, and consequences for reproduction of teleost fish.

Tissue-specific induction of EROD activity and CYP1A protein in *Sparus aurata* exposed to B(a)P and TCDD.

Evaluation of single and joint toxic effects of two antifouling biocides, their main metabolites and copper using phytoplankton bioassays.

Determination of toxicity of subacute treatment of some plant growth regulators on rats.

Mechanisms of acrolein-induced myocardial dysfunction: implications for environmental and endogenous aldehyde exposure.

Hepatotoxicity related to paraquat and diquat absorption through intact skin.

Acute effects of glyphosate herbicide on metabolic and enzymatic parameters of silver catfish (*Rhamdia quelen*).

Evaluation of the antiandrogenic effects of flutamide, DDE, and linuron in the weanling rat assay using organ weight, histopathological, and proteomic approaches.

Pesticide dose estimates for children of Iowa farmers and non-farmers.

A simple and highly repeatable colorimetric toxicity assay method using 2,6-dichlorophenolindophenol as the redox color indicator and whole eukaryote cells.

Endocrine disrupting chemicals in pesticides and herbicide in Fars Province, Iran.

Alteration of estrogen-regulated gene expression in human cells induced by the agricultural and horticultural herbicide glyphosate.

Fate of atrazine in a grassed phytoremediation system.

Acrolein inactivates paraoxonase 1: changes in free acrolein levels after hemodialysis correlate with increases in paraoxonase 1 activity in chronic renal failure patients.

Metabolic activation of herbicide products by *Vicia faba* detected in human peripheral lymphocytes using alkaline single cell gel electrophoresis.

Topological and chronological features of the impairment of glucose metabolism induced by 1-methyl-4-phenylpyridinium ion (MPP+) in rat brain slices.

Autophagic and lysosomal reactions to stress in the hepatopancreas of blue mussels.

Effects of hexazinone and atrazine on the physiology and endocrinology of smolt development in Atlantic salmon.

Trifluralin toxicity in a Chagas disease mouse model.

Toxicity of dimethylmonothioarsinic acid toward human epidermoid carcinoma A431 cells.

Functional genomic approach to identify novel genes involved in the regulation of oxidative stress resistance and animal lifespan.

Environmental genomics: mechanistic insights into toxicity of and resistance to the herbicide 2,4-D.

A proteome analysis of *Corynebacterium glutamicum* after exposure to the herbicide 2,4-dichlorophenoxy acetic acid (2,4-D).

Stereoselective toxicokinetics and tissue distribution of ethofumesate in rabbits.

Role of MGMT in protecting against cyclophosphamide-induced toxicity in cells and animals.

Biological responses of wheat (*Triticum aestivum*) plants to the herbicide chlorotoluron in soils.

Further evidence against a direct genotoxic mode of action for arsenic-induced cancer.

Arsenic-induced bladder cancer in an animal model.

The use of metabolomics for the discovery of new biomarkers of effect.

Immunomodulatory effects of the herbicide propanil on cytokine production in humans: In vivo and in vitro exposure.

Development of an immunochemical detection method for atrazine-induced albumin adducts.

Time- and dose-dependent effects of roundup on human embryonic and placental cells.

Effects of four rice herbicides on some metabolic and toxicology parameters of teleost fish (*Leporinus obtusidens*).

Toxic influence of subchronic paraquat administration on dopaminergic neurons in rats.

Nucleobase-dependent reactivity of a quinone metabolite of pentachlorophenol.

Natural products that have been used commercially as crop protection agents.

Monitoring the efficacy and metabolism of phenylcarbamates in sugar beet and black nightshade by chlorophyll fluorescence parameters.

Reduced 293T cell susceptibility to acrolein due to aldose reductase-like-1 protein expression.

No direct hepatotoxic potential following a multiple-low dose paraquat exposure in rat as related to its bioaccumulation.

The concept of "aldehyde load" in neurodegenerative mechanisms: cytotoxicity of the polyamine degradation products hydrogen peroxide, acrolein, 3-aminopropanal, 3-acetamidopropanal and 4-aminobutanal in a retinal ganglion cell line.

[Proteolytic stress induced by environmental toxins in dopaminergic neurons: an experimental study].

An unusual toxic cause of hemolytic-uremic syndrome.

Atrazine-induced aromatase expression is SF-1 dependent: implications for endocrine disruption in wildlife and reproductive cancers in humans.

On the mechanism of action and selectivity of the corn herbicide topramezone: a new inhibitor of 4-hydroxyphenylpyruvate dioxygenase.

Impaired alveolar epithelial cell differentiation in the hypoplastic lung in nitrofen-induced congenital diaphragmatic hernia.

Cytotoxicity of chloroacetanilide herbicide alachlor in HepG2 cells independent of CYP3A4 and CYP3A7.

Altered regulation of retinoic acid synthesis in nitrofen-induced hypoplastic lung.

P38 and ERK mitogen-activated protein kinases mediate acrolein-induced apoptosis in Chinese hamster ovary cells.

Mammary gland development as a sensitive end point after acute prenatal exposure to an atrazine metabolite mixture in female Long-Evans rats.

Atrazine and reproductive function: mode and mechanism of action studies.

Safeners coordinately induce the expression of multiple proteins and MRP transcripts involved in herbicide metabolism and detoxification in *Triticum tauschii* seedling tissues.

Adenine nucleotide pool perturbation is a metabolic trigger for AMP deaminase inhibitor-based herbicide toxicity.

Gestational exposure to nonylphenol causes precocious mammary gland development in female rat offspring.

Effect of the herbicide flumioxazin on photosynthetic performance of grapevine (*Vitis vinifera* L.).

Dopaminergic toxicity of the herbicide atrazine in rat striatal slices.

The effect of amifostine, a cytoprotective agent, on paraquat toxicity in mice.

[Study of the mechanism of thyroid hormone disrupted by pentachlorophenol in FRTL-5 cell].

Dopaminergic toxicity associated with oral exposure to the herbicide atrazine in juvenile male C57BL/6 mice.

Toxic effects of pentachlorophenol on *Lemna polyrhiza*.

Characterization of hepatic glutathione S-transferases in coho salmon (*Oncorhynchus kisutch*).

Follow-up testing of rodent carcinogens not positive in the standard genotoxicity testing battery: IWGT workgroup report.

Assessment of the potential toxicity of herbicides and their degradation products to nontarget cells using two microorganisms, the bacteria *Vibrio fischeri* and the ciliate *Tetrahymena pyriformis*.

Atrazine-induced reproductive tract alterations after transplacental and/or lactational exposure in male Long-Evans rats.

Identification of *Caenorhabditis elegans* genes regulating longevity using enhanced RNAi-sensitive strains.

Phytotoxicity of volatile oil from *Eucalyptus citriodora* against some weedy species.

Preliminary examination of short-term cellular toxicological responses of the coral *Madracis mirabilis* to acute Irgarol 1051 exposure.

The hormonal herbicide, 2,4-dichlorophenoxyacetic acid, inhibits *Xenopus* oocyte maturation by targeting translational and post-translational mechanisms.

2,4-D butoxyethyl ester kinetics in embryos of *Xenopus laevis*: the role of the embryonic jelly coat in reducing chemical absorption.

Urinary pesticide concentrations among children, mothers and fathers living in farm and non-farm households in Iowa.

Epidemiological and clinical investigations among employees in a former herbicide production process.

Bioaccumulation of paraquat by *Lumbriculus variegatus* in the presence of dissolved natural organic matter and impact on energy costs, biotransformation and antioxidative enzymes.

Amifostine and glutathione prevent ifosfamide- and acrolein-induced hemorrhagic cystitis.

Dacthal and chlorophenoxy herbicides and chlorothalonil fungicide in eggs of osprey (*Pandion haliaetus*) from the Duwamish-Lake Washington-Puget Sound area of Washington state, USA.

Mitochondrial effects of lipid-derived neurotoxins.

Arsenic speciation of two specimens of Napoleon's hair.

Research toward the development of a biologically based dose response assessment for inorganic arsenic carcinogenicity: a progress report.

Arsenic metabolism, genetic susceptibility, and risk of premalignant skin lesions in Bangladesh.

Carcinogenicity of dimethylarsinic acid in Ogg1-deficient mice.

Acrolein induces cyclooxygenase-2 and prostaglandin production in human umbilical vein endothelial cells: roles of p38 MAP kinase.

Acute acrolein-induced cystitis in mice.

Evaluation of oxidative stress in D-serine induced nephrotoxicity.

A possible role of thioredoxin interacting protein in the pathogenesis of streptozotocin-induced diabetic nephropathy.

Cinnamaldehyde--a potential antidiabetic agent.

Lack of mutagenicity of acrolein-induced DNA adducts in mouse and human cells.

Genome-wide interacting effects of sucrose and herbicide-mediated stress in *Arabidopsis thaliana*: novel insights into atrazine toxicity and sucrose-induced tolerance.

Tomato plants overexpressing CaKR1 enhanced tolerance to salt and oxidative stress.

Nitrogen metabolism and flower symmetry of petunia corollas treated with glyphosate.

Metabolic profiling using Fourier-transform ion-cyclotron-resonance mass spectrometry.

Tracing 2,4-D metabolism in *Cupriavidus necator* JMP134 with ¹³C-labelling technique and fatty acid profiling.

Seasonal variations of selected herbicides and related metabolites in water, sediment, seaweed and clams in the Sacca di Goro coastal lagoon (Northern Adriatic).

Concentrations and specific loads of glyphosate, diuron, atrazine, nonylphenol and metabolites thereof in French urban sewage sludge.

Oral absorption and oxidative metabolism of atrazine in rats evaluated by physiological modeling approaches.

Processes affecting the dissipation of the herbicide isoxaflutole and its diketonitrile metabolite in agricultural soils under field conditions.

Mechanism of the cytotoxicity of the diazoparaquinone antitumor antibiotic kinamycin F.

Assessing exposure to atrazine and its metabolites using biomonitoring.

Formation of an adduct between insulin and the toxic lipoperoxidation product acrolein decreases both the hypoglycemic effect of the hormone in rat and glucose uptake in 3T3 adipocytes.

[Determination of atrazine and its metabolites in human urines using gas chromatography].

Characterization of diuron N-demethylation by mammalian hepatic microsomes and cDNA-expressed human cytochrome P450 enzymes.

Identification of human urinary metabolites of acetochlor in exposed herbicide applicators by high-performance liquid chromatography-tandem mass spectrometry.

Adipokinetic hormone-induced enhancement of antioxidant capacity of *Pyrrhocoris apterus* hemolymph in response to oxidative stress.

Pesticide urinary metabolite levels of children in eastern North Carolina farmworker households.

Developmental plasticity of glandular trichomes into somatic embryogenesis in *Tilia amurensis*.

Disruption of thyroid hormone binding to sea bream recombinant transthyretin by ioxinyl and polybrominated diphenyl ethers.

Thio-dimethylarsinate is a common metabolite in urine samples from arsenic-exposed women in Bangladesh.

Modification by acrolein, a component of tobacco smoke and age-related oxidative stress, mediates functional impairment of human apolipoprotein E.

Tissue distribution and urinary excretion of dimethylated arsenic and its metabolites in dimethylarsinic acid- or arsenate-treated rats.

Influence of rainfall distribution on simulations of atrazine, metolachlor, and isoxaflutole/metabolite transport in subsurface drained fields.

Application of genetic algorithm for selection of variables for the BLLS method applied to determination of pesticides and metabolites in wine.

[Structure-activity relationship of phenylallyl compounds inhibiting PGE₂ release in mouse cerebral microvascular endothelial cells induced by IL-1 β].

Trace analysis of sulfonyleurea herbicides and their metabolites in water using a combination of off-line or on-line solid-phase extraction and liquid chromatography-tandem mass spectrometry.

Induction of COX-2 by acrolein in rat lung epithelial cells.

Solid phase extraction of phosphorus-containing amino acid-type herbicides and their metabolites from human blood with titania for determination by capillary electrophoresis.

Distribution of ¹⁴C-atrazine following an acute lactational exposure in the Wistar rat.

Improved HPLC-MS/MS method for determination of isoxaflutole (balance) and its metabolites in soils and forage plants.

Glyphosate-resistant and -susceptible soybean (*Glycine max*) and canola (*Brassica napus*) dose response and metabolism relationships with glyphosate.

Quantification of atrazine, phenylurea, and sulfonyleurea herbicide metabolites in urine by high-performance liquid chromatography-tandem mass spectrometry.

Determination of xenobiotic intrinsic clearance in freshly isolated hepatocytes from rainbow trout (*Oncorhynchus mykiss*) and rat and its application in bioaccumulation assessment.

Consumption of folate-related nutrients and metabolism of arsenic in Bangladesh.

Is the titer of adipokinetic peptides in *Leptinotarsa decemlineata* fed on genetically modified potatoes increased by oxidative stress?

Measurement uncertainty arising from trueness of the analysis of two endocrine disruptors and their metabolites in environmental samples. Part I: ultrasonic extraction from diverse sediment matrices.

Measurement uncertainty arising from trueness of the analysis of two endocrine disruptors and their metabolites in environmental samples. Part II. Solid-phase extraction from environmental natural waters.

Estimating constants for metabolism of atrazine in freshly isolated rat hepatocytes by kinetic modeling.

Plastid biotechnology: prospects for herbicide and insect resistance, metabolic engineering and molecular farming.

Effect of norflurazon on resorcinolic lipid metabolism in rye seedlings.

Ifosfamide toxicity in cultured proximal renal tubule cells.

Effect of arbuscular mycorrhizal fungus (*Glomus caledonium*) on the accumulation and metabolism of atrazine in maize (*Zea mays* L.) and atrazine dissipation in soil.

Poly-beta-hydroxybutyrate accumulation in *Nostoc muscorum*: effects of metabolic inhibitors.

Degradation and sorption of fluometuron and metabolites in conservation tillage soils.

Evaluation of the three most commonly used analytical methods for determination of inorganic arsenic and its metabolites in urine.

Sequestration of a fluorinated analog of 2,4-dichlorophenol and metabolic products by *L. minor* as evidenced by ¹⁹F NMR.

Degradation of the herbicide dichlobenil and its metabolite BAM in soils and subsurface sediments.

Metabolic differences between two dimethylthioarsenicals in rats.

Effect of the expression of cyanamide hydratase on metabolites in cyanamide-treated soybean plants kept in the light or dark.

Polychlorinated biphenyls and their hydroxylated metabolites (OH-PCBS) in pregnant women from eastern Slovakia.

Agmatine transport into spinal nerve terminals is modulated by polyamine analogs.

Binding of dimethylarsinous acid to cys-13 α of rat hemoglobin is responsible for the retention of arsenic in rat blood.

Effect of fasting on the pattern of urinary arsenic excretion.

Degradation and mineralization of nanomolar concentrations of the herbicide dichlobenil and its persistent metabolite 2,6-dichlorobenzamide by *Aminobacter* spp. isolated from dichlobenil-treated soils.

Bioconcentration, biomagnification and metabolism of ¹⁴C-terbutryn and ¹⁴C-benzo[a]pyrene in *Gammarus fossarum* and *Asellus aquaticus*.

Fate of Irgarol 1051, diuron and their main metabolites in two UK marine systems after restrictions in antifouling paints.

Organochlorines and risk of non-Hodgkin lymphoma.

Anti-inflammatory lipid mediator 15d-PGJ2 inhibits translation through inactivation of eIF4A.

Pulmonary lesions in female Harlan Sprague-Dawley rats following two-year oral treatment with dioxin-like compounds.

Evaluation of electrospray ionization and atmospheric pressure chemical ionization for simultaneous detection of estrone and its metabolites using high-performance liquid chromatography/tandem mass spectrometry.

Identification of interspecies concordance of mechanisms of arsenic-induced bladder cancer.

Increased plasma malondialdehyde and fructosamine in iron deficiency anemia: effect of treatment.

Folate deficiency enhances arsenic effects on expression of genes involved in epidermal differentiation in transgenic K6/ODC mouse skin.

Autism: transient in utero hypothyroxinemia related to maternal flavonoid ingestion during pregnancy and to other environmental antithyroid agents.

[A protector effect of cytokinin preparations on the photosynthetic apparatus of wheat plants under water deficiency conditions].

Pharmacokinetics of 3-[125I]iodo-alpha-methyl-L-tyrosine, a tumor imaging agent, after probenecid loading in mice implanted with colon cancer DLD-1 cells.

Porphyria cutanea tarda as rare cutaneous manifestation of hepatic metastases treated with interferon.

Determination of glyoxal and methylglyoxal in the serum of diabetic patients by MEKC using stilbenediamine as derivatizing reagent.

Arsenic neurotoxicity--a review.

Mechanisms of action of the congenital diaphragmatic hernia-inducing teratogen nitrofen.

Serum profiles of PCDDs and PCDFs, in individuals near the Escambia Wood Treating Company Superfund site in Pensacola, FL.

Effects of dinoseb on energy reserves in the soil arthropod *Folsomia candida*.

Cortical spreading depression releases ATP into the extracellular space and purinergic receptor activation contributes to the induction of ischemic tolerance.

Relationship between serum concentrations of persistent organic pollutants and the prevalence of metabolic syndrome among non-diabetic adults: results from the National Health and Nutrition Examination Survey 1999-2002.

Functional characterization of the promoter of human carbonyl reductase 1 (CBR1). Role of XRE elements in mediating the induction of CBR1 by ligands of the aryl hydrocarbon receptor.

Embryonic essential myosin light chain regulates fetal lung development in rats.

Comparison of fathead minnow ovary explant and H295R cell-based steroidogenesis assays for identifying endocrine-active chemicals.

Cobaltous chloride and hypoxia inhibit aryl hydrocarbon receptor-mediated responses in breast cancer cells.

Goserelin acetate 10.8 mg plus iron versus iron monotherapy prior to surgery in premenopausal women with iron-deficiency anemia due to uterine leiomyomas: results from a Phase III, randomized, multicenter, double-blind, controlled trial.

Delayed-type hypersensitivity reaction to the meta-cresol component of insulin.

Interference of contaminated sediment extracts and environmental pollutants with retinoid signaling.

Polychlorinated biphenyls modulated tumorigenesis in Sprague Dawley rats: correlation with mixed function oxidase activities and superoxide (O_2^*) formation potentials and implied mode of action.

Mitochondrial respiratory inhibition and oxidative stress elevate beta-secretase (BACE1) proteins and activity in vivo in the rat retina.

Workshop overview: arsenic research and risk assessment.

Transplacental arsenic carcinogenesis in mice.

Fasting enhances p-Cresol production in the rat intestinal tract.

Insulin resistance and the mitochondrial link. Lessons from cultured human myotubes.

Dinitrophenol and obesity: an early twentieth-century regulatory dilemma.

Serum dioxin concentrations and risk of uterine leiomyoma in the Seveso Women's Health Study.

Subchronic feeding study of DAS-59122-7 maize grain in Sprague-Dawley rats.

Pesticides and their metabolites in the homes and urine of farmworker children living in the Salinas Valley, CA.

Ferula gummosa Boiss. Embryogenic culture and karyological changes.

Elevation of 8-hydroxydeoxyguanosine and cell proliferation via generation of oxidative stress by organic arsenicals contributes to their carcinogenicity in the rat liver and bladder.

The menace of endocrine disruptors on thyroid hormone physiology and their impact on intrauterine development.

Maternal exposure of low dose of TCDD modulates the expression of estrogen receptor subunits of male gonads in offspring.

Positive associations of serum concentration of polychlorinated biphenyls or organochlorine pesticides with self-reported arthritis, especially rheumatoid type, in women.

Estrogen metabolism and formation of estrogen-DNA adducts in estradiol-treated MCF-10F cells. The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin induction and catechol-O-methyltransferase inhibition.

Proteome and cytoskeleton responses in osteosarcoma cells with reduced OXPHOS activity.

Symptomatic response of erythropoietic protoporphyria to iron supplementation.

Concentrations of organochlorine pollutants in mothers who gave birth to neonates with congenital hypothyroidism.

Effects of 3-methyl-4-nitrophenol in diesel exhaust particles on the regulation of reproductive function in immature female Japanese quail (*Coturnix japonica*).

Aryl hydrocarbon receptor plays a significant role in mediating airborne particulate-induced carcinogenesis in mice.

Molecular mechanisms of the diabetogenic effects of arsenic: inhibition of insulin signaling by arsenite and methylarsonous acid.

Post-Injury Administration of Mitochondrial Uncouplers Increases Tissue Sparing and Improves Behavioral Outcome following Traumatic Brain Injury in Rodents.

Inhibition of NF- κ B does not induce c-Jun N-terminal kinase-mediated apoptosis in reperfusion injury.

Inhibiting glycosphingolipid synthesis improves glycemic control and insulin sensitivity in animal models of type 2 diabetes.

Ketone bodies alter dinitrophenol-induced glucose uptake through AMPK inhibition and oxidative stress generation in adult cardiomyocytes.

Some clinico and histopathological changes in female goats experimentally exposed to dioxin.

Ubiquitinated-protein aggregates form in pancreatic beta-cells during diabetes-induced oxidative stress and are regulated by autophagy.

Zinc supplementation of pregnant rats with adequate zinc nutrition suppresses immune functions in their offspring.

Antinuclear antibodies and bromoxynil exposure in a rural sample.

Prevention of aneuploidy by S-adenosyl-methionine in human cells treated with sodium arsenite.

Effects of various pesticides on human 5 α -reductase activity in prostate and LNCaP cells.

Prenatal TCDD exposure predisposes for mammary cancer in rats.

Thirteen week feeding study with transgenic maize grain containing event DAS- \sim 15 \sim 7-1 in Sprague-Dawley rats.

Developmental exposure of mice to TCDD elicits a similar uterine phenotype in adult animals as observed in women with endometriosis.

Internal dose-effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in gonadotropin-primed weanling rat model.

Different states of energy metabolism in the vertebrate retina can be identified by stimulus-related changes in near UV transmission.

Suppression of fetal testicular cytochrome P450 17 by maternal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: a mechanism involving an initial effect on gonadotropin synthesis in the pituitary.

Inhibition of CYP1A enzymes by alpha-naphthoflavone causes both synergism and antagonism of retene toxicity to rainbow trout (*Oncorhynchus mykiss*).

Serum dioxin concentrations and quality of ovarian function in women of Seveso.

Pesticide exposure and self-reported gestational diabetes mellitus in the Agricultural Health Study.

Association of a polychlorinated dibenzo-p-dioxin, a polychlorinated biphenyl, and DDT with diabetes in the 1999-2002 National Health and Nutrition Examination Survey.

Benzo[a]pyrene-7,8-dihydrodiol promotes checkpoint activation and G2/M arrest in human bronchoalveolar carcinoma H358 cells.

Effects of 3-methyl-4-nitrophenol in diesel exhaust particles on the regulation of testicular function in immature male rats.

Pharmacokinetics of arsenic species in Japanese patients with relapsed or refractory acute promyelocytic leukemia treated with arsenic trioxide.

Nucleotide metabolizing ecto-enzymes in Walker 256 tumor cells: molecular identification, kinetic characterization and biochemical properties.

Reduced expression of aquaporin 5 water channel in nitrofen-induced hypoplastic lung with congenital diaphragmatic hernia rat model.

Neurological and neurophysiological examinations on workers with chronic poisoning by 2,3,7,8-TCDD: follow-up 35 years after exposure.

Fetal onset of aberrant gene expression relevant to pulmonary carcinogenesis in lung adenocarcinoma development induced by in utero arsenic exposure.

P-selectin mediates metastatic progression through binding to sulfatides on tumor cells.

P-cresylsulphate, the main in vivo metabolite of p-cresol, activates leucocyte free radical production.

4-monochlorobiphenyl (PCB3) induces mutations in the livers of transgenic Fisher 344 rats.

Effect of iron repletion and correction of iron deficiency on thyroid function in iron-deficient Iranian adolescent girls.

Genetic polymorphisms in MTHFR 677 and 1298, GSTM1 and T1, and metabolism of arsenic.

Transcriptional control of energy homeostasis through the PGC1 coactivators.

Transcriptional control of mitochondrial energy metabolism through the PGC1 coactivators.

[Sodium azide--clinical course of the poisoning and treatment].

[11C]Vinblastine syntheses and preliminary imaging in cancer patients.

Rapid screening assay of trimethylaminuria in urine with matrix-assisted laser desorption/ionization time-of-flight mass spectrometry.

Altered subcellular distribution of the Alzheimer's amyloid precursor protein under stress conditions.

Arsenic methylation, urinary arsenic metabolites and human diseases: current perspective.

Fatty acid biosynthesis as a drug target in apicomplexan parasites.

Is any link between inflammation and coronary artery ectasia?

Taurine release in mouse brain stem slices under cell-damaging conditions.

Toxicity and metabolism of p-chlorophenol in the marine microalga *Tetraselmis marina*.

Endocrine-disrupting potential of bisphenol A, bisphenol A dimethacrylate, 4-n-nonylphenol, and 4-n-octylphenol in vitro: new data and a brief review.

Semen quality in relation to xenohormone and dioxin-like serum activity among Inuits and three European populations.

A critical comparison of murine pathology and epidemiological data of TCDD, PCB126, and PeCDF.

Association of thyroid hormone concentrations with levels of organochlorine compounds in cord blood of neonates.

Mitochondrial P450-dependent arachidonic acid metabolism by TCDD-induced hepatic CYP1A5; conversion of EETs to DHETs by mitochondrial soluble epoxide hydrolase.

Constitutive mRNA expression of various glutathione S-transferase isoforms in different tissues of mice.

Thyroxine-metabolizing rat uridine diphosphate-glucuronosyltransferase 1A7 is regulated by thyroid hormone receptor.

Dioxin affects glucose transport via the arylhydrocarbon receptor signal cascade in pluripotent embryonic carcinoma cells.

Constitutive expression and inducibility of CYP1A1 in the H9c2 rat cardiomyoblast cells.

Oxidative metabolism of lung macrophages exposed to sodium arsenite.

Online monitoring of BALB/3T3 metabolism and adhesion with multiparametric chip-based system.

A new electro-optical approach to rapid assay of cell viability.

Polychlorinated biphenyls 105 and 118 form thyroid hormone receptor agonists after cytochrome P4501A1 activation in rat pituitary GH3 cells.

Treatment of municipal wastewater with the sequence batch reactor under uncoupling metabolic conditions.

Influence of different organic amendments on the degradation, metabolism, and adsorption of terbuthylazine.

Metabolic fate of [(14)C]-2,4-dichlorophenol in tobacco cell suspension cultures.

Detection and structural characterization of glutathione-trapped reactive metabolites using liquid chromatography-high-resolution mass spectrometry and mass defect filtering.

Disruption of clock gene expression alters responses of the aryl hydrocarbon receptor signaling pathway in the mouse mammary gland.

Exposure to arsenic at levels found in U.S. drinking water modifies expression in the mouse lung.

Effects of either glucose or fructose and metabolic regulators on bovine embryo development and lipid accumulation in vitro.

The nitric oxide prodrug, V-PYRRO/NO, mitigates arsenic-induced liver cell toxicity and apoptosis.

Structure of *Arabidopsis thaliana* 5-methylthioribose kinase reveals a more occluded active site than its bacterial homolog.

Induction of somatic embryogenesis in saffron using thidiazuron (TDZ).

Genetic determinants of mitochondrial response to arsenic in yeast *Saccharomyces cerevisiae*.

Growth optimization of *Zataria multiflora* Boiss. tissue cultures and rosmarinic acid production improvement.

Effects of genistein and herbimycin, tyrosine kinase inhibitors, on catecholamine release in bovine adrenal chromaffin cells.

Folic acid supplementation lowers blood arsenic.

Determination of alachlor, metolachlor, and their acidic metabolites in soils by microwave-assisted extraction (MAE) combined with solid phase extraction (SPE) coupled with GC-MS and HPLC-UV analysis.

New concept for a toxicity assay based on multiple indexes from the wave shape of damped metabolic oscillation induced in living yeast cells (part II): application to analytical toxicology.

Oxidative stress and antioxidant defenses in goldfish liver in response to short-term exposure to arsenite.

Accumulation of hypoxia-inducible factor-1 α through a novel electrophilic, thiol antioxidant-sensitive mechanism.

Comparative evaluation of biomarkers of occupational exposure to toluene.

In vitro release study of mono-PEGylated growth hormone-releasing peptide-6 from PLGA microspheres.

Aryl hydrocarbon receptor splice variants in the dioxin-resistant rat: tissue expression and transactivational activity.

Importance of hepatic induction of constitutive androstane receptor and other transcription factors that regulate xenobiotic metabolism and transport.

Early maturation of gonadotropin-releasing hormone secretion and sexual precocity after exposure of infant female rats to estradiol or dichlorodiphenyltrichloroethane.

Environmental toxicants may modulate osteoblast differentiation by a mechanism involving the aryl hydrocarbon receptor.

Simultaneous determination of terbuthylazine and its major hydroxy and dealkylated metabolites in wetland water samples using solid-phase extraction and high-performance liquid chromatography with diode-array detection.

Evaluation of novel microtubules interfering agents myoseverin, tubulyzine and E2GG in primary cultures of rat hepatocytes.

[Enhancement of biodegradation of 4-chlorophenol during co-metabolic process by immobilized-cells of *Pseudomonas putida*].

Potentiating effect of an endocrine disruptor, paranonylphenol, on the generation of reactive oxygen species (ROS) in human venous blood -- association with the activation of signal transduction pathway.

An angiotensin II type-I receptor blocker, olmesartan medoxomil, attenuates lipid peroxidation in renal injury induced by subtotal nephrectomy.

3-Methyl-4-nitrophenol metabolism by uridine diphosphate glucuronosyltransferase and sulfotransferase in liver microsomes of mice, rats, and Japanese quail (*Coturnix japonica*).

Metabolism of benzo[a]pyrene in human bronchoalveolar H358 cells using liquid chromatography-mass spectrometry.

Modulation of TASK-like background potassium channels in rat arterial chemoreceptor cells by intracellular ATP and other nucleotides.

Tumor necrosis factor-alpha modulates effects of aryl hydrocarbon receptor ligands on cell proliferation and expression of cytochrome P450 enzymes in rat liver "stem-like" cells.

A new bioluminescent cellular assay to measure the transcriptional effects of chemicals that modulate the alpha-1 thyroid hormone receptor.

The mode of action of thidiazuron: auxins, indoleamines, and ion channels in the regeneration of *Echinacea purpurea* L.

Arsenite induced oxidative damage in mouse liver is associated with increased cytokeratin 18 expression.

Catalase takes part in rat liver mitochondria oxidative stress defense.

Metabolic activation of herbal and dietary constituents and its clinical and toxicological implications: an update.

Relationships of thyroid hormones with polychlorinated biphenyls, dioxins, furans, and DDE in adults.

Surface desorption atmospheric pressure chemical ionization mass spectrometry for direct ambient sample analysis without toxic chemical contamination.

Thyroid ultrasound volume, structure and function after long-term high exposure of large population to polychlorinated biphenyls, pesticides and dioxin.

Hemodynamic consequences of chronic parasympathetic blockade with a peripheral muscarinic antagonist.

In vitro and in vivo characterization of [3H]CNS-5161--a use-dependent ligand for the N-methyl-D-aspartate receptor in rat brain.

Current role of liquid chromatography-mass spectrometry in clinical and forensic toxicology.

Short-term hormone release from adult female rat hypothalamic and pituitary explants is not altered by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Soil metabolism of a new herbicide, [14C]Pyribenzoxim, under flooded conditions.

Arecoline inhibits the 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced cytochrome P450 1A1 activation in human hepatoma cells.

Hexavalent chromium reduction by *Acinetobacter haemolyticus* isolated from heavy-metal contaminated wastewater.

Cellular thiol pools are responsible for sequestration of cytotoxic reactive aldehydes: central role of free cysteine and cysteamine.

Cytotoxic effects and aromatase inhibition by xenobiotic endocrine disrupters alone and in combination. [Occupational and environmental exposure to anilide and dicarboximide pesticides].

Aryl-hydrocarbon receptor activation regulates constitutive androstane receptor levels in murine and human liver.

Gonadotropin-releasing hormone neurons express estrogen receptor-beta.

Genes, enzymes, and regulation of para-cresol metabolism in *Geobacter metallireducens*.

Effects of long-term alachlor exposure on hepatic antioxidant defense and detoxifying enzyme activities in crucian carp (*Carassius auratus*).

Anaerobic co-metabolic oxidation of 4-alkylphenols with medium-length or long alkyl chains by *Thauera* sp., strain R5.

FaGT2: a multifunctional enzyme from strawberry (*Fragaria x ananassa*) fruits involved in the metabolism of natural and xenobiotic compounds.

Identification of residues of sulfosulfuron and its metabolites in subsoil-dissipation kinetics and factors influencing the stability and degradation of residues from topsoil to subsoil under predominant cropping conditions.

Sodium arsenite affects Na⁺ transport in the isolated skin of the toad *Pleurodema thaul*.

Coordinate regulation of Phase I and II xenobiotic metabolisms by the Ah receptor and Nrf2.

Metabolic footprinting: a new approach to identify physiological changes in complex microbial communities upon exposure to toxic chemicals.

Toxicity of substituted anilines to *Pseudokirchneriella subcapitata* and quantitative structure-activity relationship analysis for polar narcotics.

Toxicological characterization of 2,4,6-trinitrotoluene, its transformation products, and two nitramine explosives.

Use of a trapping agent for simultaneous capturing and high-throughput screening of both "soft" and "hard" reactive metabolites.

Characterization of a C-C bond hydrolase from *Sphingomonas wittichii* RW1 with novel specificities towards polychlorinated biphenyl metabolites.

Molecular characterization of cytochrome P450 1A1, 1A2, and 1B1, and effects of polychlorinated dibenzo-p-dioxin, dibenzofuran, and biphenyl congeners on their hepatic expression in Baikal seal (*Pusa sibirica*).

Overexpression of thioredoxin1 in transgenic mice suppresses development of diabetic nephropathy.

Dissipation of sulfosulfuron in water - bioaccumulation of residues in fish - LC-MS/MS-ESI identification and quantification of metabolites.

Possible role of carbonic anhydrase in rat pancreatic islets: enzymatic, secretory, metabolic, ionic, and electrical aspects.

The anti-mutagenic and antioxidant effects of bile pigments in the Ames Salmonella test.

Chronic exposure to sub-lethal concentration of a glyphosate-based herbicide alters hormone profiles and affects reproduction of female Jundiã (*Rhamdia quelen*).

[Analysis of residual nature of dioxins in blood of Yusho patients and controls in relation to the Yusho oil and food as respective exposure routes].

[Estimation of urinary diacetylspermine in Yusho patients].

Is the natural PCDD/PCDF mixture toxic for human placental JEG-3 cell line? The action of the toxicants on hormonal profile, CYP1A1 activity, DNA damage and cell apoptosis.

Differential regulation of thyroid hormone receptor-mediated function by endocrine disruptors.

Relation of diclofop-methyl toxicity and degradation in algae cultures.

A two-component small multidrug resistance pump functions as a metabolic valve during nicotine catabolism by *Arthrobacter nicotinovorans*.

Development and evaluation of an electrochemical method for studying reactive phase-I metabolites: correlation to in vitro drug metabolism.

4-Methoxyestradiol-induced oxidative injuries in human lung epithelial cells.

Kinetics and functional assay of liver repopulation after human cord blood transplantation.

Cell death and impairment of glucose-stimulated insulin secretion induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the beta-cell line INS-1E.

Transplacental exposure to inorganic arsenic at a hepatocarcinogenic dose induces fetal gene expression changes in mice indicative of aberrant estrogen signaling and disrupted steroid metabolism.

Reproductive functions and hypothalamic catecholamines in response to the soil fumigant metam sodium: adaptations to extended exposures.

Role of O6-methylguanine-DNA methyltransferase in protecting from alkylating agent-induced toxicity and mutations in mice.

N-methyltetrahydro-beta-carboline analogs of 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) neurotoxin are oxidized to neurotoxic beta-carbolinium cations by heme peroxidases.

[Relationship between 5,10-methylenetetrahydrofolate reductase genetic polymorphism and arsenic metabolism].

Non-heme induction of heme oxygenase-1 does not alter cellular iron metabolism.

Urinary arsenic metabolites in children and adults exposed to arsenic in drinking water in Inner Mongolia, China.

Quantitative structure-activity relationship modeling on in vitro endocrine effects and metabolic stability involving 26 selected brominated flame retardants.

Analysis of lipid peroxidation in human spermatozoa using BODIPY C11.

Alterations in proteoglycan synthesis selectively impair FSH-induced particulate cAMP-phosphodiesterase 4 (PDE4) activation in immature rat Sertoli cells.

Concentration and distribution of dioxins and related compounds in human tissues.

Human urine certified reference material CZ 6010: creatinine and toluene metabolites (hippuric acid and o-cresol) and a benzene metabolite (phenol).

Intestinal transport and metabolism of acrylamide.

Tissue residues, metabolism, and excretion of radiolabeled sodium chlorate (Na[³⁶Cl]O₃) in rats.

Cigarette smoking as a risk factor for atherosclerosis and renal disease: novel pathogenic insights.

Impairment of cellulose synthases required for Arabidopsis secondary cell wall formation enhances disease resistance.

In vitro effects of reactive oxygen metabolites, with and without flunixin meglumine, on equine colonic mucosa.

Fibronectin and laminin induce expression of islet cell markers in hepatic oval cells in culture.

New insights on toluene biodegradation by *Pseudomonas putida* F1: influence of pollutant concentration and excreted metabolites.

Mouse lung CYP1A1 catalyzes the metabolic activation of 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP).

Can radiation-induced apoptosis be modulated by inhibitors of energy metabolism?

Plasma polymer coated surfaces for serum-free culture of limbal epithelium for ocular surface disease.

Relation between serum xenobiotic-induced receptor activities and sperm DNA damage and sperm apoptotic markers in European and Inuit populations.

Chironomids: suitable test organisms for risk assessment investigations on the potential endocrine disrupting properties of pesticides.

Zea mays: benzoxazolinone detoxification under sulfur deficiency conditions--a complex allelopathic alliance including endophytic *Fusarium verticillioides*.

Skin-derived fibroblasts from long-lived species are resistant to some, but not all, lethal stresses and to the mitochondrial inhibitor rotenone.

Involvement of the *cynABDS* operon and the CO₂-concentrating mechanism in the light-dependent transport and metabolism of cyanate by cyanobacteria.

Ovarian endocrine disruption underlies premature reproductive senescence following environmentally relevant chronic exposure to the aryl hydrocarbon receptor agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Expression and activity of arsenic methyltransferase Cyt19 in rat tissues.

[Metabolic dependence of cooling-induced action potential generation in excitable cells of pumpkin stem].

Imazaquin degradation and metabolism in a sandy loam soil amended with farm litters.

Cryopreservation of human hepatocytes alters the mitochondrial respiratory chain complex 1.

Investigating the in vitro metabolism of fipexide: characterization of reactive metabolites using liquid chromatography/mass spectrometry.

The environmental fate of organic pollutants through the global microbial metabolism.

PLA2 mediated arachidonate free radicals: PLA2 inhibition and neutralization of free radicals by antioxidants--a new role as anti-inflammatory molecule.

The anti-apoptotic activity of albumin for endothelium is mediated by a partially cryptic protein domain and reduced by inhibitors of G-coupled protein and PI-3 kinase, but is independent of radical scavenging or bound lipid.

Increase in the toxic effects of Tl⁺ on isolated rat liver mitochondria in the presence of nonactin.

LC-MS-MS analysis of 2,4-dinitrophenol and its phase I and II metabolites in a case of fatal poisoning.

Use of model-based compartmental analysis to study vitamin A kinetics and metabolism.

Biomarkers for oxidative stress: clinical application in pediatric medicine.

Contained metabolic engineering in tomatoes by expression of carotenoid biosynthesis genes from the plastid genome.

Effect of in vitro administered 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on DNA-binding activities of nuclear transcription factors in NIH-3T3 mouse fibroblasts.

De novo synthesis vs. sequestration: negatively correlated metabolic traits and the evolution of host plant specialization in cyanogenic butterflies.

Influence on mitochondria and cytotoxicity of different antibiotics administered in high concentrations on primary human osteoblasts and cell lines.

Human CYP1A1GFP expression in transgenic mice serves as a biomarker for environmental toxicant exposure.

Aryl hydrocarbon receptor activation impairs extracellular matrix remodeling during zebra fish fin regeneration.

Effects of *Lactobacillus casei* Shirota, *Bifidobacterium breve*, and oligofructose-enriched inulin on colonic nitrogen-protein metabolism in healthy humans.

Dynamic analysis of ABA accumulation in relation to the rate of ABA catabolism in maize tissues under water deficit.

White adipose tissue: storage and effector site for environmental pollutants.

Accumulation of organic and inorganic contaminants in shellfish collected in estuarine waters near Pensacola, Florida: contamination profiles and risks to human consumers.

Acrolein induces vasodilatation of rodent mesenteric bed via an EDHF-dependent mechanism.

Toxicity of a trivalent organic arsenic compound, dimethylarsinous glutathione in a rat liver cell line (TRL 1215).

Intrastriatal infusion of the Parkinsonian neurotoxin, MPP(+), induces damage of striatal cell nuclei in Sprague-Dawley rats.

Aldehyde load in ischemia-reperfusion brain injury: neuroprotection by neutralization of reactive aldehydes with phenelzine.

A model of hemorrhagic cystitis induced with acrolein in mice.

Molecular epidemiologic evidence for diabetogenic effects of dioxin exposure in U.S. Air force veterans of the Vietnam war.

Health status of Army Chemical Corps Vietnam veterans who sprayed defoliant in Vietnam.

Comparative cytotoxicity of alachlor on RTG-2 trout and SH-SY5Y human cells.

Comparative genotoxicity of the herbicides Roundup, Stomp and Reglone in plant and mammalian test systems.

Toxicity assessment of metabolites of fungal biocontrol agents using two different (*Artemia salina* and *Daphnia magna*) invertebrate bioassays.

Evaluation of the effect of acetochlor on thyroid hormone receptor gene expression in the brain and behavior of *Rana catesbeiana* tadpoles.

Atrazine stimulates hemoglobin accumulation in *Daphnia magna*: is it hormonal or hypoxic?

Effect of two insecticides and two herbicides on the porcine sperm motility patterns using computer-assisted semen analysis (CASA) in vitro.

Lack of effects of atrazine on estrogen-responsive organs and circulating hormone concentrations in sexually immature female Japanese quail (*Coturnix coturnix japonica*).

Effect of glyphosate herbicide on acetylcholinesterase activity and metabolic and hematological parameters in piava (*Leporinus obtusidens*).

Introduction of cAMP and establishment of neutral lipids alterations as pollution biomarkers using the mussel *Mytilus galloprovincialis*. Correlation with a battery of biomarkers.

[Inhibition of carbohydrate metabolism enzymes by pentachlorophenol in cells of pectinolytic bacteria from gastrointestinal tract of animals and effect of clinoptilolite adsorbents on this process].

Proteomic analysis of root meristems and the effects of acetohydroxyacid synthase-inhibiting herbicides in the root of *Medicago truncatula*.

Evidence for a novel endocrine disruptor: the pesticide propanil requires the ovaries and steroid synthesis to enhance humoral immunity.

Evaluation of DNA damage induced by atrazine and atrazine-based herbicide in human lymphocytes in vitro using a comet and DNA diffusion assay.

2,4-Dichlorophenoxyacetic acid (2,4-D) biodegradation in river sediments of Northeast-Scotland and its effect on the microbial communities (PLFA and DGGE).

Effects of clomazone herbicide on hematological and some parameters of protein and carbohydrate metabolism of silver catfish *Rhamdia quelen*.

Effects of antioxidant vitamins on molecular regulators involved in lung hypoplasia induced by nitrofen.

Histological changes and micronucleus induction in the zebra mussel *Dreissena polymorpha* after paraquat exposure.

NTP Technical Report on the comparative toxicity studies of allyl acetate (CAS No. 591-87-7), allyl alcohol (CAS No. 107-18-6) and acrolein (CAS No. 107-02-8) administered by gavage to F344/N rats and B6C3F1 mice.

Old yellow enzymes protect against acrolein toxicity in the yeast *Saccharomyces cerevisiae*.

Teratological study of the herbicide 4-chloro-2-methylphenoxyacetic acid in rabbits.

In ovo exposure to a triazine herbicide: effects of atrazine on circulating reproductive hormones and gonadal histology in young Japanese quail.

Indomethacin induces small intestinal damage and inhibits amitrole-associated thyroid carcinogenesis in rats initiated with N-bis(2-hydroxypropyl)nitrosamine.

[Effects of 2,4-D butylate herbicides on thyroid gland and testis of mice].

Dimethylarsinic acid: results of chronic toxicity/oncogenicity studies in F344 rats and in B6C3F1 mice.

Pseudomonas putida KT2440 responds specifically to chlorophenoxy herbicides and their initial metabolites.

Gene expression patterns in rainbow trout, *Oncorhynchus mykiss*, exposed to a suite of model toxicants.

Paternal occupational exposure to pesticides or herbicides as risk factors for cancer in children and young adults: a case-control study from the North of England.

Plasma steroid hormone concentrations, aromatase activities and GSI in ranid frogs collected from agricultural and non-agricultural sites in Michigan (USA).

Assessment of the risk posed by the antifouling booster biocides Irgarol 1051 and diuron to freshwater macrophytes.

Body residues as dose for sublethal responses in alevins of landlocked salmon (*Salmo salar* m. sebago): a direct calorimetry study.

Ghrelin expression in human and rat fetal lungs and the effect of ghrelin administration in nitrofen-induced congenital diaphragmatic hernia.

Analysis of reproductive toxicity and classification of glufosinate-ammonium.

Characterizing the ovotoxicity of cyclophosphamide metabolites on cultured mouse ovaries.

Metabolism of arsenic in *Drosophila melanogaster* and the genotoxicity of dimethylarsinic acid in the *Drosophila* wing spot test.

TRPA1 mediates the inflammatory actions of environmental irritants and proalgesic agents.

Strategies to assess systemic exposure of chemicals in subchronic/chronic diet and drinking water studies.

Toxic actions of dinoseb in medaka (*Oryzias latipes*) embryos as determined by in vivo ³¹P NMR, HPLC-UV and ¹H NMR metabolomics.

Distinct gene expression profiles in immortalized human urothelial cells exposed to inorganic arsenite and its methylated trivalent metabolites.

Toxicity assessment of 40 herbicides to the green alga *Raphidocelis subcapitata*.

Hydralazine inhibits rapid acrolein-induced protein oligomerization: role of aldehyde scavenging and adduct trapping in cross-link blocking and cytoprotection.

Evaluation of different biological test systems to assess the toxicity of metabolites from fungal biocontrol agents.

Methylated arsenicals: the implications of metabolism and carcinogenicity studies in rodents to human risk assessment.

A presumption of illness.

Effects of environmentally relevant concentrations of atrazine on gonadal development of snapping turtles (*Chelydra serpentina*).

Monomethylarsonic acid and dimethylarsinic acid: developmental toxicity studies with risk assessment.

Cytotoxic effects and apoptosis induction of atrazine in a grass carp (*Ctenopharyngodon idellus*) cell line.

Mortality from ischemic heart disease and diabetes mellitus (type 2) in four U.S. wheat-producing states: a hypothesis-generating study.

Orphan nuclear receptor pregnane X receptor sensitizes oxidative stress responses in transgenic mice and cancerous cells.

Effects of insect growth regulators on the nontarget soil arthropod *Folsomia candida* (Collembola).

A comparative study of the sub-chronic toxic effects of three organic arsenical compounds on the urothelium in F344 rats; gender-based differences in response.

Antioxidant activity of L-ascorbic acid in wild-type and superoxide dismutase deficient strains of *Saccharomyces cerevisiae*.

[Fatal poisoning caused by the ingestion of a concentrated solution of 2,4-D and MCPP].

Effects of atrazine on sexual maturation in female Japanese quail induced by photostimulation or exogenous gonadotropin.

Decrease in NADPH-cytochrome P450 reductase activity of the human heart, Liver and lungs in the presence of alpha-lipoic acid.

Cytogenetic effect of technical glyphosate on cultivated bovine peripheral lymphocytes.

Organ-specific expression of glutathione S-transferases and the efficacy of herbicide safeners in *Arabidopsis*.

The endocrine disruptor atrazine accounts for a dimorphic somatostatinergic neuronal expression pattern in mice.

Growth rate effects, responses of antioxidant enzymes and metabolic fate of the herbicide Propanil in the aquatic plant *Lemna minor*.

Transient effect of the herbicide flazasulfuron on carbohydrate physiology in *Vitis vinifera* L.

Polyamines in renal failure.

Degeneration of dopaminergic mesocortical neurons and activation of compensatory processes induced by a long-term paraquat administration in rats: implications for Parkinson's disease.

Nonpersistent pesticide exposure self-report versus biomonitoring in farm pesticide applicators.

Cinnamaldehyde reduces IL-1beta-induced cyclooxygenase-2 activity in rat cerebral microvascular endothelial cells.

Simultaneous sensitivity to fragrances.

Studies on the goitrogenic mechanism of action of N,N,N',N'-tetramethylthiourea.

An oral adsorbent, AST-120, suppresses oxidative stress in uremic rats.

Effects of alpha tocopherol and probucol supplements on allergen-induced airway inflammation and hyperresponsiveness in a mouse model of allergic asthma.

Drought effects on carbon and nitrogen metabolism of pea nodules can be mimicked by paraquat: evidence for the occurrence of two regulation pathways under oxidative stresses.

GC-MS based metabolite profiling implies three interdependent ways of ammonium assimilation in *Medicago truncatula* root nodules.

Cinnamaldehyde induces endothelium-dependent and -independent vasorelaxant action on isolated rat aorta.

Acute administration of 3-nitropropionic acid, a reactive oxygen species generator, boosts ethanol-induced locomotor stimulation. New support for the role of brain catalase in the behavioural effects of ethanol.

Transformation of the herbicide 2,6-dichlorobenzonitrile to the persistent metabolite 2,6-dichlorobenzamide (BAM) by soil bacteria known to harbour nitrile hydratase or nitrilase.

2-methoxycinnamaldehyde reduces IL-1beta-induced prostaglandin production in rat cerebral endothelial cells.

Ethanol-induced apoptosis in polarized hepatic cells possibly through regulation of the Fas pathway.

Hormone-regulated inflorescence induction and TFL1 expression in *Arabidopsis* callus in vitro.

Leaching potential of some phenylureas and their main metabolites through laboratory studies.

Clarification of pathway-specific inhibition by Fourier transform ion cyclotron resonance/mass spectrometry-based metabolic phenotyping studies.

Herbicide-affected plant metabolism reduces virus propagation.

Effects of cyanobacterial toxins and cyanobacterial cell-free crude extract on germination of alfalfa (*Medicago sativa*) and induction of oxidative stress.

A connection between iron-sulfur cluster metabolism and the biosynthesis of 4-amino-5-hydroxymethyl-2-methylpyrimidine pyrophosphate in *Salmonella enterica*.

Selective disruption of wheat secondary metabolism by herbicide safeners.

Comparison of a non-aqueous capillary electrophoresis method with high performance liquid chromatography for the determination of herbicides and metabolites in water samples.

Paraquat-induced lipid peroxidation: effects of ovariectomy and estrogen receptor antagonist.

Contractile mechanisms coupled to TRPA1 receptor activation in rat urinary bladder.

Separation of plant hormones from biofertilizer by capillary electrophoresis using a capillary coated dynamically with polycationic polymers.

Metabolism of [¹⁴C]-2,4-dichlorophenol in edible plants.

Mineralisation of atrazine, metolachlor and their respective metabolites in vegetated filter strip and cultivated soil.

Identification of a metabolite of atrazine, N-ethyl-6-methoxy-N'-(1-methylethyl)-1,3,5-triazine-2,4-diamine, upon incubation with rat liver microsomes.

Enhanced co-metabolism of TCDD in the presence of high concentrations of phenoxy herbicides.

Determination of atrazine and its metabolites in mouse urine and plasma by LC-MS analysis.

New insights on glyphosate mode of action in nodular metabolism: Role of shikimate accumulation.

Formation of acrolein adducts with 2'-deoxyadenosine in calf thymus DNA.

Somatic embryogenesis in wild relatives of cotton (*Gossypium* Spp.).

Uptake, translocation and metabolism of the herbicide florasulam in wheat and broadleaf weeds.

Metabolic profile in workers occupationally exposed to arsenic: role of GST polymorphisms.

Conversion of *Sphingobium chlorophenolicum* ATCC 39723 to a hexachlorobenzene degrader by metabolic engineering.

Direct aqueous injection liquid chromatography/electrospray ionization-mass spectrometry/mass spectrometry analysis of water for atrazine, simazine, and their chlorotriazine metabolites.

Enigma, a mitochondrial protein affecting lifespan and oxidative stress response in *Drosophila*.

Quantification of six herbicide metabolites in human urine.

Induction and expression of GST-Pi foci in the liver of Cyclophosphamide-administered rats.

Microbial degradation of organophosphorus xenobiotics: metabolic pathways and molecular basis.

Biotransformation of the triketone herbicide mesotrione by a *Bacillus* strain. Metabolite profiling using liquid chromatography/electrospray ionization quadrupole time-of-flight mass spectrometry.

Novel electrochemical approach to enhanced toxicity of 4-oxo-2-nonenal vs. 4-hydroxy-2-nonenal (role of imine): oxidative stress and therapeutic modalities.

Distribution of urinary selenium and arsenic among pregnant women exposed to arsenic in drinking water.

Chloroacetaldehyde- and acrolein-induced death of human proximal tubule cells.

Plasma organochlorine concentrations and bone ultrasound measurements: a cross-sectional study in peri- and postmenopausal Inuit women from Greenland.

Developmental toxicity of 4-ring polycyclic aromatic hydrocarbons in zebrafish is differentially dependent on AH receptor isoforms and hepatic cytochrome P4501A metabolism.

Anthropometric and metabolic factors and risk of benign prostatic hyperplasia: a prospective cohort study of Air Force veterans.

Pharmacologic and functional characterization of malignant hyperthermia in the R163C RyR1 knock-in mouse.

Cellular uptake of magnetic nanoparticle is mediated through energy-dependent endocytosis in A549 cells.

Spatial and temporal expression of glucocorticoid, retinoid, and thyroid hormone receptors is not altered in lungs of congenital diaphragmatic hernia.

Acute activation of glucose uptake by glucose deprivation in L929 fibroblast cells.

Comparative toxicogenomic analysis of the hepatotoxic effects of TCDD in Sprague Dawley rats and C57BL/6 mice.

Lipid oxidative damage and distribution of inorganic arsenic and its metabolites in the rat nervous system after arsenite exposure: influence of alpha tocopherol supplementation.

Novel selective orally active CRTH2 antagonists for allergic inflammation developed from in silico derived hits.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (Cas No. 31508-00-6) in female Harlan Sprague-Dawley rats (gavage studies).

[Current progress in animal models of arsenic carcinogenesis].

Thiazopyr and thyroid disruption: case study within the context of the 2006 IPCS Human Relevance Framework for analysis of a cancer mode of action.

Folate and arsenic metabolism: a double-blind, placebo-controlled folic acid-supplementation trial in Bangladesh.

Endocrine disruptors--potential modulators of the immune system and allergic response.

Correlated resistance to glucose deprivation and cytotoxic agents in fibroblast cell lines from long-lived pituitary dwarf mice.

Environmental arsenic exposure and sputum metalloproteinase concentrations.

Coexistence of megaloblastic anemia and iron deficiency anemia in a young woman with chronic lymphocytic thyroiditis.

Carcinogenicity of "non-dioxinlike" polychlorinated biphenyls.

Today's epidemics in children: possible relations to environmental pollution and suggested preventive measures.

Carcinogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in experimental models.

Aqueous extract of *Trigonella foenum-graecum* L. ameliorates additive urotoxicity of buthionine sulfoximine and cyclophosphamide in mice.

Bifunctional modulating effects of an indigo dimer (bisindigotin) to CYP1A1 induction in H4IIE cells.

Pathological circumstances impair the ability of "dark" neurons to undergo spontaneous recovery.

Clozapine bioactivation induces dose-dependent, drug-specific toxicity of human bone marrow stromal cells: a potential in vitro system for the study of agranulocytosis.

Novel functional association of serine palmitoyltransferase subunit 1-A peptide in sphingolipid metabolism with cytochrome P4501A1 transactivation and proliferative capacity of the human Glioma LN18 brain tumor cell line.

Ground-glass, polyglucosan-like hepatocellular inclusions: A "new" diagnostic entity.

Connexin 43 gene expression in mice with cardiopulmonary developmental defects.

Molecular mechanism of inhibitory aryl hydrocarbon receptor-estrogen receptor/Sp1 cross talk in breast cancer cells.

Ah receptor: dioxin-mediated toxic responses as hints to deregulated physiologic functions.

Decreased nitric oxide production in the rat brain after chronic arsenic exposure.

On-capillary derivatization and analysis of amino acids in human plasma by capillary electrophoresis with laser-induced fluorescence detection: application to diagnosis of aminoacidopathies.

Stress resistance and aging: influence of genes and nutrition.

Mechanisms of 2-butoxyethanol-induced hemangiosarcomas.

The constitutively active Ah receptor (CA-Ahr) mouse as a potential model for dioxin exposure--effects in vital organs.

For dioxin-induced birth defects, mouse or human CYP1A2 in maternal liver protects whereas mouse CYP1A1 and CYP1B1 are inconsequential.

Multitrait evolution in lines of *Drosophila melanogaster* selected for increased starvation resistance: the role of metabolic rate and implications for the evolution of longevity.

Effect of biochanin A on the aryl hydrocarbon receptor and cytochrome P450 1A1 in MCF-7 human breast carcinoma cells.

A strong dose-response relation between serum concentrations of persistent organic pollutants and diabetes: results from the National Health and Examination Survey 1999-2002.

Maternal hair--an appropriate matrix for detecting maternal exposure to pesticides during pregnancy.

Arsenic speciation transported through the placenta from mother mice to their newborn pups.

In vitro stability of insulin lispro in continuous subcutaneous insulin infusion.

The aryl hydrocarbon receptor pathway and sexual differentiation of neuroendocrine functions.

A potential endogenous ligand for the aryl hydrocarbon receptor has potent agonist activity in vitro and in vivo.

Metabolic effects of dinoseb, diazinon and esfenvalerate in eyed eggs and alevins of Chinook salmon (*Oncorhynchus tshawytscha*) determined by ¹H NMR metabolomics.

NTP technical report on the toxicology and carcinogenesis studies of 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (Gavage studies).

[Effects of MRP2-GSH cotransport system on hepatic arsenic metabolism in rats].

Clinical pharmacokinetic study of arsenic trioxide in an acute promyelocytic leukemia (APL) patient: speciation of arsenic metabolites in serum and urine.

The binding of 2,4-dinitrophenol to wild-type and amyloidogenic transthyretin.

Evaluation of subchronic inhalation toxicity of dimethyl disulfide in rats.

Oxidation of myosin heavy chain and reduction in force production in hyperthyroid rat soleus.

Microtubules are more stable and more highly acetylated in ethanol-treated hepatic cells.

Motor stimulant effects of ethanol injected into the substantia nigra pars reticulata: importance of catalase-mediated metabolism and the role of acetaldehyde.

Role of CYP3A4 in the regulation of the aryl hydrocarbon receptor by omeprazole sulphide.

Enhanced expression of plasma glutathione peroxidase in the thymus of mice treated with TCDD and its implication for TCDD-induced thymic atrophy.

In vivo-in vitro toxicogenomic comparison of TCDD-elicited gene expression in Hepa1c1c7 mouse hepatoma cells and C57BL/6 hepatic tissue.

Loss of glial lazarrillo, a homolog of apolipoprotein D, reduces lifespan and stress resistance in *Drosophila*.

Adverse health effects in humans exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

[Thyroid C cells are decreased in experimental CDH].

NTP technical report on the toxicology and carcinogenesis studies of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (CAS No. 1746-01-6) in female Harlan Sprague-Dawley rats (Gavage Studies).

Two deaths attributed to the use of 2,4-dinitrophenol.

Novel neuroprotective, neuritogenic and anti-amyloidogenic properties of 2,4-dinitrophenol: the gentle face of Janus.

Clinical and experimental applications of NIR-LED photobiomodulation.

The effects of biocides (antiseptics and disinfectants) on the endospores of *Rhinosporidium seeberi*.

Patterns of hospital transfer for self-poisoned patients in rural Sri Lanka: implications for estimating the incidence of self-poisoning in the developing world.

Involvement of cytoskeleton in AhR-dependent CYP1A1 expression.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induced cytochrome P450s alter the formation of reactive oxygen species in liver cells.

Boron ameliorates fulminant hepatic failure by counteracting the changes associated with the oxidative stress.

Silybin and dehydrosilybin inhibit cytochrome P450 1A1 catalytic activity: a study in human keratinocytes and human hepatoma cells.

Endocrine disrupters and female reproductive health.

Global gene expression associated with hepatocarcinogenesis in adult male mice induced by in utero arsenic exposure.

System level metabolic effects of a *Schistosoma japonicum* infection in the Syrian hamster.

Time-course changes of mixture effects on AhR binding-dependent luciferase activity in a crude extract from a compost sample.

Assessment of genotoxicity of 14 chemical agents used in dental practice: ability to induce chromosome aberrations in Syrian hamster embryo cells.

Biosynthesis of 14C-phytoene from tomato cell suspension cultures (*Lycopersicon esculentum*) for utilization in prostate cancer cell culture studies.

An antioxidative and antiinflammatory agent for potential treatment of osteoarthritis from *Ecklonia cava*.

Semen quality in fertile US men in relation to geographical area and pesticide exposure.

Fetal pituitary gonadotropin as an initial target of dioxin in its impairment of cholesterol transportation and steroidogenesis in rats.

Diabetogenic effects and pancreatic oxidative damage in rats subchronically exposed to arsenite.

Chloroacetaldehyde as a sulfhydryl reagent: the role of critical thiol groups in ifosfamide nephropathy.

Divergent risk of multiple sclerosis in two anabaptist communities in America.

Polychlorinated biphenyls (PCBs): routes of exposure and effects on human health.

[The multifaceted effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in organisms, especially dentition changes].

NTP toxicology and carcinogenesis studies of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (CAS No. 57465-28-8) in female Harlan Sprague-Dawley rats (Gavage Studies).

[Exposure to endocrine disrupting chemicals and children's health: problems in epidemiological studies].

Arsenic exposure in Hungary, Romania and Slovakia.

Effects of caffeine, halothane, and 4-chloro-m-cresol on skeletal muscle lactate and pyruvate in malignant hyperthermia-susceptible and normal swine as assessed by microdialysis.

Glycerol uptake in HCT-15 human colon cancer cell line by Na(+)-dependent carrier-mediated transport.

A cluster of hypoplastic left heart malformation in Baltimore, Maryland.

Induction of cytochrome P450-1A by the equine estrogen equilenin, a new endogenous aryl hydrocarbon receptor ligand.

Increased manganese uptake by primary astrocyte cultures with altered iron status is mediated primarily by divalent metal transporter.

The effect of aryl hydrocarbon receptor ligands on the expression of AhR, AhRR, ARNT, Hif1alpha, CYP1A1 and NQO1 genes in rat liver.

Effect of EGF on [3H]-thymidine incorporation and cell cycle regulatory proteins in primary cultured chicken hepatocytes: Involvement of Ca²⁺/PKC and MAPKs.

Association between the levels of biogenic amines and superoxide anion production in brain regions of rats after subchronic exposure to TCDD.

Detection of Exposure to Environmental Pesticides During Pregnancy by the Analysis of Maternal Hair Using GC-MS.

Differential expression of genes involved in iron metabolism in *Aspergillus fumigatus*.

The influence of inulin on the absorption of nitrogen and the production of metabolites of protein fermentation in the colon.

De novo expression of MECA-79 glycoprotein-determinant on developing B lymphocytes in gut-associated lymphoid tissues.

Dihydroxy-, hydroxyspirolactone-, and dihydroxyspirolactone-urochlorins induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the liver of mice.

KIADH3, a gene encoding a mitochondrial alcohol dehydrogenase, affects respiratory metabolism and cytochrome content in *Kluyveromyces lactis*.

Differentiation-specific factors modulate epidermal CYP1-4 gene expression in human skin in response to retinoic acid and classic aryl hydrocarbon receptor ligands.

Determination of malachite green and leucomalachite green in edible goldfish muscle by liquid chromatography-ion trap mass spectrometry.

Rapid determination of histamine and its metabolites in mice hair by ultra-performance liquid chromatography with time-of-flight mass spectrometry.

Serum dioxin-like activity is associated with reproductive parameters in young men from the general Flemish population.

K⁺ transport and energetics in Kir6.2(-/-) mouse hearts assessed by ⁸⁷Rb and ³¹P magnetic resonance and optical spectroscopy.

Metabolism of dopamine by the nasal mucosa.

Associations of organochlorines with endogenous hormones in male Great Lakes fish consumers and nonconsumers.

Analysis of pesticides and metabolites in Spanish surface waters by isotope dilution gas chromatography/mass spectrometry with previous automated solid-phase extraction Estimation of the uncertainty of the analytical results.

Cytotoxic effects of S-(dimethylarsino)-glutathione: a putative intermediate metabolite of inorganic arsenicals.

Duox2 exhibits potent heme peroxidase activity in human respiratory tract epithelium.

Identification and characterization of genes susceptible to transcriptional cross-talk between the hypoxia and dioxin signaling cascades.

Mitogen-activated protein kinases inhibit the ROMK (Kir 1.1)-like small conductance K channels in the cortical collecting duct.

Sublethal effects of three pesticides on activities of selected target and detoxification enzymes in the aquatic midge, *Chironomus tentans* (diptera: chironomidae).

Developmental and hormonal regulation of direct shoot organogenesis and somatic embryogenesis in sugarcane (*Saccharum* spp. interspecific hybrids) leaf culture.

EGF-induced inhibition of glucose transport is mediated by PKC and MAPK signal pathways in primary cultured chicken hepatocytes.

Validation of a prediction model for estimating serum concentrations of chemicals which are equivalent to toxic concentrations in vitro.

Effects of 2,3,7,8-tetrachloro-dibenzo-p-dioxin on the extracellular matrix of the thymus in juvenile marmosets (*Callithrix jacchus*).

Exposure to PCB 77 induces tissue-dependent changes in iodothyronine deiodinase activity patterns in the embryonic chicken.

Toxicology and carcinogenesis studies of a mixture of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (Cas No. 1746-01-6), 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4), and 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) in female Harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4) in female Harlan Sprague-Dawley rats (gavage studies).

Effect of sodium azide on the metabolic activity of cultured fetal cells.

Gene expression alterations in immune system pathways following exposure to immunosuppressive chemicals.

Enzymatic mechanisms of ethanol oxidation in the brain.

C-Reactive protein upregulates receptor for advanced glycation end products expression in human endothelial cells.

Negative regulation of superoxide dismutase-1 promoter by thyroid hormone.

Effects of xenobiotics and steroids on renal and hepatic estrogen metabolism in lake trout.

Incorporating variations in pesticide catabolic activity into a GIS-based groundwater risk assessment.

Anti-androgenic activity of 3-methyl-4-nitrophenol in diesel exhaust particles.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (gavage studies).

Aryl hydrocarbon receptor activation produces heart-specific transcriptional and toxic responses in developing zebrafish.

Effects of hypoxia and limited diffusion in tumor cell microenvironment on bystander effect of P450 prodrug therapy.

Arsenicals in maternal and fetal mouse tissues after gestational exposure to arsenite.

Influence of antimonite, selenite, and mercury on the toxicity of arsenite in primary rat hepatocytes.

Gene expression profile by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the liver of wild-type (AhR+/+) and aryl hydrocarbon receptor-deficient (AhR-/-) mice.

PACAP receptor (PAC1-R) expression in rat and rhesus monkey thymus.

Nonezymatic formation of succinate in mitochondria under oxidative stress.

Sorption-desorption of flucarbazonone and propoxycarbazonone and their benzenesulfonamide and triazolinone metabolites in two soils.

Higher extracellular pH suppresses tracheary element differentiation by affecting auxin uptake.

Sodium arsenite impairs insulin secretion and transcription in pancreatic beta-cells.

Hypoxic vasoconstriction of partial muscular intra-acinar pulmonary arteries in murine precision cut lung slices.

Kinetics of arsenic methylation by freshly isolated B6C3F1 mouse hepatocytes.

Brief report: embryonic growth and hatching implications of developmental 670-nm phototherapy and dioxin co-exposure.

Targeting dinitrophenol to mitochondria: limitations to the development of a self-limiting mitochondrial protonophore.

Impairment of testicular function in adult male Japanese quail (*Coturnix japonica*) after a single administration of 3-methyl-4-nitrophenol in diesel exhaust particles.

Regulation of human male germ cell death by modulators of ATP production.

A novel integrin alpha5beta1 binding domain in module 4 of connective tissue growth factor (CCN2/CTGF) promotes adhesion and migration of activated pancreatic stellate cells.

Tissue specific induction of cytochrome P450 (CYP) 1A1 and 1B1 in rat liver and lung following in vitro (tissue slice) and in vivo exposure to benzo(a)pyrene.

The potential steroid hormone contribution of farm animals to freshwaters, the United Kingdom as a case study.

Chemical modification at subunit 1 of rat kidney Alpha class glutathione transferase with 2,3,5,6-tetrachloro-1,4-benzoquinone: close structural connectivity between glutathione conjugation activity and non-substrate ligand binding.

15-Deoxy-Delta(12,14)-prostaglandin J(2) suppresses IL-6-induced STAT3 phosphorylation via electrophilic reactivity in endothelial cells.

Enhancing effects of simultaneous treatment with sodium nitrite on 2-amino-3-methylimidazo[4,5-f]quinoline-induced rat liver, colon and Zymbal's gland carcinogenesis after initiation with diethylnitrosamine and 1,2-dimethylhydrazine.

Toluene toxicokinetics and metabolism parameters in the rat and guinea pig.

Chronic exposure to dioxin-like compounds and thyroid function among New York anglers.

Body burdens of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls and their relations to estrogen metabolism in pregnant women.

A toxicokinetic model for the carry-over of dioxins and PCBs from feed and soil to eggs.

The effect of ethanol, ethanol metabolizing enzyme inhibitors, and Vitamin E on regulating glutathione, glutathione S-transferase, and S-adenosylmethionine in mouse primary hepatocyte.

Toxicokinetic study of dioxins and furans in laying chickens.

Bioaccumulation of copper by *Trichoderma viride*.

Dioxin effects on neonatal and infant thyroid function: routes of perinatal exposure, mechanisms of action and evidence from epidemiology studies.

Interference by 2,3,7,8-tetrachlorodibenzo-p-dioxin with cultured mouse submandibular gland branching morphogenesis involves reduced epidermal growth factor receptor signaling.

Protein carbonylation and heat shock response in *Ruditapes decussatus* following p,p'-dichlorodiphenyldichloroethylene (DDE) exposure: a proteomic approach reveals that DDE causes oxidative stress.

Detection of hormone receptor ligands in yeast by fluorogenic methods.

Cytochrome P450 expression and metabolic activation of cooked food mutagen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) in MCF10A breast epithelial cells.

Pesticide mixtures, endocrine disruption, and amphibian declines: are we underestimating the impact?

The opening effect of pregabalin on ATP-sensitive potassium channels in differentiated hippocampal neuron-derived H19-7 cells.

Chitosan nanoparticles as a potential drug delivery system for the ocular surface: toxicity, uptake mechanism and in vivo tolerance.

Effect of a single in ovo injection of 2,3,7,8-tetrachlorodibenzo-p-dioxin on protein expression in liver and ovary of the one-day-old chick analyzed by fluorescent two-dimensional difference gel electrophoresis and mass spectrometry.

Study on the mutagenicity and antimutagenicity of beta-ionone in the Salmonella/microsome assay.

Multiresidue liquid chromatography tandem mass spectrometry determination of 52 non gas chromatography-amenable pesticides and metabolites in different food commodities.

The aryl hydrocarbon receptor activates the retinoic acid receptor α through SMRT antagonism.

Biosynthetic requirements for the repair of sublethal membrane damage in *Escherichia coli* cells after pulsed electric fields.

Sunlight generates multiple tryptophan photoproducts eliciting high efficacy CYP1A induction in chick hepatocytes and in vivo.

Effect of organophosphate pesticide diazinon on expression and activity of intestinal P-glycoprotein.

Human sulphotransferases are involved in the activation of aristolochic acids and are expressed in renal target tissue.

Enantiomeric separation of metolachlor and its metabolites using LC-MS and CZE.

Effects of chronic exposure to sodium arsenite on hypothalamo-pituitary-testicular activities in adult rats: possible an estrogenic mode of action.

Sensitising potential of four textile dyes and some of their metabolites in a modified local lymph node assay.

Toxoplasma gondii acyl-lipid metabolism: de novo synthesis from apicoplast-generated fatty acids versus scavenging of host cell precursors.

The ROS production induced by a reverse-electron flux at respiratory-chain complex 1 is hampered by metformin.

In vitro cytotoxicity of TCDD on SPC-A1 cells.

Gene expression profiling in common cormorant liver with an oligo array: assessing the potential toxic effects of environmental contaminants.

Survivorship and mortality implications of developmental 670-nm phototherapy: dioxin co-exposure.

Urinary oxidative stress markers in young patients with type 1 diabetes.

Chemical manipulation of glucose metabolism in porcine oocytes: effects on nuclear and cytoplasmic maturation in vitro.

Phospholipase A2, reactive oxygen species, and lipid peroxidation in cerebral ischemia.

2-Deoxyglucose and NMDA inhibit protein synthesis in neurons and regulate phosphorylation of elongation factor-2 by distinct mechanisms.

Constitutive activation of the aryl hydrocarbon receptor in T-lineage cells induces thymus involution independently of the Fas/Fas ligand signaling pathway.

Recent female mouse models displaying advanced reproductive aging.

AhR-agonist-induced transcriptional changes of genes involved in thyroid function in primary porcine thyrocytes.

Regulation of bone sialoprotein (BSP) gene transcription by lipopolysaccharide.

LTBP-1 blockade in dioxin receptor-null mouse embryo fibroblasts decreases TGF-beta activity: Role of extracellular proteases plasmin and elastase.

Synthesis, structure and assessment of the cytotoxic properties of 2,5-dimethylazaferrocenyl phosphonates.

Effects of endocrine disrupters on the expression of growth hormone and prolactin mRNA in the rainbow trout pituitary.

Cholecystokinin stimulates the recruitment of the Src-RhoA-phosphoinositide 3-kinase pathway by Vav-2 downstream of G(alpha13) in pancreatic acini.

Functional expression of the maize mitochondrial URF13 down-regulates galactose-induced GAL1 gene expression in Saccharomyces cerevisiae.

Effect of dissolved organic matter on the toxicity of chlorotoluron to Triticum aestivum.

Environmental toxicants and effects on female reproductive function.

Peroxynitrite can affect platelet responses by inhibiting energy production.

Some chemical contaminant of surface sediments at the Baltic Sea coastal region with special emphasis on androgenic and anti-androgenic compounds.

Dopamine-beta-hydroxylase immunohistochemical study in the locus coeruleus of neonate rats exposed to 2,4-dichlorophenoxyacetic acid through mother's milk.

Metabolic regulation of in vitro-produced bovine embryos. II. Effects of phenazine ethosulfate, sodium azide and 2,4-dinitrophenol during post-compaction development on glucose metabolism and lipid accumulation.

Metabolic regulation of in-vitro-produced bovine embryos. I. Effects of metabolic regulators at different glucose concentrations with embryos produced by semen from different bulls.

CYP1A in TCDD toxicity and in physiology-with particular reference to CYP dependent arachidonic acid metabolism and other endogenous substrates.

[11C]SMe-ADAM, an imaging agent for the brain serotonin transporter: synthesis, pharmacological characterization and microPET studies in rats.

Effect of isomalt consumption on faecal microflora and colonic metabolism in healthy volunteers.

Competing roles of aldo-keto reductase 1A1 and cytochrome P4501B1 in benzo[a]pyrene-7,8-diol activation in human bronchoalveolar H358 cells: role of AKRs in P4501B1 induction.

Involvement of soluble sugars in reactive oxygen species balance and responses to oxidative stress in plants.

Dinitrophenol-induced mitochondrial uncoupling in vivo triggers respiratory adaptation in HepG2 cells.

Enterocyte cytoskeleton changes are crucial for enhanced translocation of nonpathogenic Escherichia coli across metabolically stressed gut epithelia.

Amine oxidases in apoptosis and cancer.

CYP2A5-mediated activation and early ultrastructural changes in the olfactory mucosa: studies on 2,6-dichlorophenyl methylsulfone.

Tyrosine kinase and mitogen-activated protein kinase/extracellularly regulated kinase differentially regulate intracellular calcium concentration responses to angiotensin II/III and bradykinin in rat cortical thick ascending limb.

Induction of beta3-adrenergic receptor functional expression following chronic stimulation with noradrenaline in neonatal rat cardiomyocytes.

Effects of acute and chronic exposure to the aryl hydrocarbon receptor agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin on the transition to reproductive senescence in female Sprague-Dawley rats.

New evidences for old biomarkers: effects of several xenobiotics on EROD and AChE activities in Zebra mussel (*Dreissena polymorpha*).

Transport of N-acetyl-D-galactosamine in *Escherichia coli* K92: effect on acetyl-amino sugar metabolism and polysialic acid production.

Specific induction of oxidative stress in terminal bronchiolar Clara cells during dimethylarsenic-induced lung tumor promoting process in mice.

Mutagenicity study of butachlor and its metabolites using *Salmonella typhimurium*.

Detection of thyroid system-disrupting chemicals using in vitro and in vivo screening assays in *Xenopus laevis*.

Gene expression profiling of responses to dimethylarsinic acid in female F344 rat urothelium.

Regulation of oxidative stress by the anti-aging hormone klotho.

Differential metamorphosis alters the endocrine response in anuran larvae exposed to T3 and atrazine.

Oxidation and methylation status determine the effects of arsenic on the mitotic apparatus.

Triazine herbicides and epithelial ovarian cancer risk in central California.

A rapid, physiologic protocol for testing transcriptional effects of thyroid-disrupting agents in premetamorphic *Xenopus* tadpoles.

Applicator exposure to acetochlor based on biomonitoring.

Paraquat neurotoxicity is distinct from that of MPTP and rotenone.

Effects of 2,4-D and DCP on the DHT-induced androgenic action in human prostate cancer cells.

Ability of the Hershberger assay protocol to detect thyroid function modulators.

Toxicokinetics of ¹⁴C-atrazine and its metabolites in stage-66 *Xenopus laevis*.

Effect of 2,4-dichlorophenoxyacetic acid on the activities of some metabolic enzymes for generating pyridine nucleotide pool of cells from mouse liver.

Alterations induced by glyphosate on lupin photosynthetic apparatus and nodule ultrastructure and some oxygen diffusion related proteins.

Effects of different soil types on the Collembolans *Folsomia candida* and *Hypogastrura assimilis* using the herbicide Phenmedipham.

Environmental levels of atrazine and its degradation products impair survival skills and growth of red drum larvae.

A slowly developing dysfunction of dopaminergic nigrostriatal neurons induced by long-term paraquat administration in rats: an animal model of preclinical stages of Parkinson's disease?

Developmental pesticide models of the Parkinson disease phenotype.

Adverse effects of prenatal exposure to atrazine during a critical period of mammary gland growth.

Paraquat induces selective dopaminergic nigrostriatal degeneration in aging C57BL/6 mice.

The role of trivalent dimethylated arsenic in dimethylarsinic acid-promoted skin and lung tumorigenesis in mice: tumor-promoting action through the induction of oxidative stress.

Activity of NADPH-cytochrome P-450 reductase of the human heart, liver and lungs in the presence of (-)-epigallocatechin gallate, quercetin and resveratrol: an in vitro study.

Preventive mechanism of cellular glutathione in monomethylarsonic acid-induced cytolethality.

Immunotoxic effects of short-term atrazine exposure in young male C57BL/6 mice.

Toxicity testing of herbicide norflurazon on an aquatic bioindicator species--the planarian *Polycelis felina* (Daly.).

Effects of the herbicide isoproturon on metallothioneins, growth, and antioxidative defenses in the aquatic worm *Tubifex tubifex* (Oligochaeta, Tubificidae).

Atrazine and the hypothalamo-pituitary-gonadal axis in sexually maturing precocial birds: studies in male Japanese quail.

Sustained exposure to the widely used herbicide atrazine: altered function and loss of neurons in brain monoamine systems.

The comparative toxicology of 4-chloro-2-methylphenoxyacetic acid and its plant metabolite 4-chloro-2-carboxyphenoxyacetic acid in rats.

Plasma concentrations of estradiol and testosterone, gonadal aromatase activity and ultrastructure of the testis in *Xenopus laevis* exposed to estradiol or atrazine.

Effect of urea on degradation of terbuthylazine in soil.

Thyroid function in nestling tree swallows and eastern bluebirds exposed to non-persistent pesticides and p, p'-DDE in apple orchards of southern Ontario, Canada.

A risk assessment of atrazine use in California: human health and ecological aspects.

Inorganic arsenic compounds and methylated metabolites induce morphological transformation in two-stage BALB/c 3T3 cell assay and inhibit metabolic cooperation in V79 cell assay.

Salicylic acid triggers genotoxic adaptation to methyl mercuric chloride and ethyl methane sulfonate, but not to maleic hydrazide in root meristem cells of *Allium cepa* L.

Determination of biological reference values for chlorpyrifos metabolites in human urine using a toxicokinetic approach.

Effect of the herbicide glyphosate on liver lipoperoxidation in pregnant rats and their fetuses.

Different cytoprotective effect of antioxidants and change in the iron regulatory system in rodent cells exposed to paraquat or formaldehyde.

Promutagen activation of triazine herbicides metribuzin and ametryn through *Vicia faba* metabolism inducing sister chromatid exchanges in human lymphocytes in vitro and in *V. faba* root tip meristems.

Acute exposure to molinate alters neuroendocrine control of ovulation in the rat.

Hepatic porphyria induced by the herbicide tralkoxydim in small mammals is species-specific.

Identification of the herbicide Surflan and its active ingredient oryzalin, a dinitrosulfonamide, as xenoestrogens.

Characterization of thymic atrophy and the mechanism of thymocyte depletion after in vivo exposure to a mixture of herbicides.

Poisoning due to urea herbicides.

Fate of mutagenicity produced during anaerobic biodegradation of the herbicide chlornitrofen (CNP).

Phytoremediation of atrazine by poplar trees: toxicity, uptake, and transformation.

Biomonitoring for farm families in the farm family exposure study.

Molecular identification and expression study of differentially regulated genes in the Pacific oyster *Crassostrea gigas* in response to pesticide exposure.

Review of the genotoxicity of 4-chloro-2-methylphenoxyacetic acid.

What limits herb biomass in grasslands: competition or herbivory?

Nonosmotic release of vasopressin and renal aquaporins in impaired urinary dilution in hypothyroidism.

Forced uptake of trivalent and pentavalent methylated and inorganic arsenic and its cyto-/genotoxicity in fibroblasts and hepatoma cells.

[WITHDRAWN] Overexpression of superoxide dismutase or glutathione peroxidase protects against the paraquat + maneb-induced Parkinson disease phenotype.

[Examination of urine acrolein in Yusho victims].

Urinary trivalent methylated arsenic species in a population chronically exposed to inorganic arsenic.

Tamoxifen up-regulates catalase production, inhibits vessel wall neutrophil infiltration, and attenuates development of experimental abdominal aortic aneurysms.

Possible enhancing effects of atrazine on growth of 7,12-dimethylbenz(a) anthracene-induced mammary tumors in ovariectomized Sprague-Dawley rats.

The evaluation of different sorbents for the preconcentration of phenoxyacetic acid herbicides and their metabolites from soils.

Concentrations of polybrominated diphenyl ethers, polychlorinated biphenyls, and polychlorobiphenyls in serum from pregnant Faroese women and their children 7 years later.

Differential regulation of proopiomelanocortin (POMC) mRNA expression in hypothalamus and anterior pituitary following repeated cyanamide with ethanol administration.

Folate, homocysteine, and arsenic metabolism in arsenic-exposed individuals in Bangladesh.

Degradation and metabolism of hexazinone by two isolated bacterial strains from soil.

Effect of corn root exudates on the degradation of atrazine and its chlorinated metabolites in soils.

Determination of glyphosate and its metabolite aminomethylphosphonic acid in fruit juices using supported-liquid membrane preconcentration method with high-performance liquid chromatography and UV detection after derivatization with p-toluenesulphonyl chloride.

Leaching of metribuzin metabolites and the associated contamination of a sandy Danish aquifer.

Proteomic analysis of grapevine (*Vitis vinifera* L.) tissues subjected to herbicide stress.

Adaptive response of antioxidant enzymes to catalase inhibition by aminotriazole in goldfish liver and kidney.

The decrease in level of serum thyroxine by 2,2',4,5,5'-pentachlorobiphenyl in rats and mice: no correlation with formation of methylsulfonyl metabolites.

Model study on the effect of 15 phenolic olive mill wastewater constituents on seed germination and *Vibrio fischeri* metabolism.

Bioactive metabolites from the fungus *Nectria galligena*, the main apple canker agent in Chile.

Investigation of the accumulation of 2,4-dichlorophenoxyacetic acid (2,4-D) in rat kidneys.

Role of the alkali labile sites, reactive oxygen species and antioxidants in DNA damage induced by methylated trivalent metabolites of inorganic arsenic.

Protective role of hydrogen peroxide in oxygen-deprived dopaminergic neurones of the rat substantia nigra.

Effects of bisphenol-A (BPA), dibutylphtalate (DBP), benzophenone-2 (BP2), procymidone (Proc), and linurone (Lin) on fat tissue, a variety of hormones and metabolic parameters: a 3 months comparison with effects of estradiol (E2) in ovariectomized (ovx) rats.

Comparison of sorption and diffusion by pyridate and its polar metabolite in isolated cuticular wax of *Chenopodium album* and *Hordeum vulgare*.

Effect of ascorbate on acrolein modification of very low density lipoprotein and uptake of oxidized apolipoprotein e by hepatocytes.

Expression of a fungal cyanamide hydratase in transgenic soybean detoxifies cyanamide in tissue culture and in planta to provide cyanamide resistance.

Resistance cost of a cytochrome P450 herbicide metabolism mechanism but not an ACCase target site mutation in a multiple resistant *Lolium rigidum* population.

Application of Alamar blue/5-carboxyfluorescein diacetate acetoxymethyl ester as a noninvasive cell viability assay in primary hepatocytes from rainbow trout.

Identification of rat urinary and fecal metabolites of a new herbicide, pyribenzoxim.

Rapid determination of aniline metabolites of chlorpropham in potatoes by micellar electrokinetic chromatography using negative-charged mixed micelles and laser-induced fluorescence detection.

DNA damage in leukocytes of workers occupationally exposed to arsenic in copper smelters.

Coherent phase microscopy in cell biology: visualization of metabolic states.

Novel genomic targets in oxidant-induced vascular injury.

Application of artificial neural networks for prediction of retention factors of triazine herbicides in reversed-phase liquid chromatography.

Influence of soil properties on the adsorption-desorption of sulcotrione and its hydrolysis metabolites on various soils.

Translation of in vitro inhibition by marine natural products of the C₄ acid cycle enzyme pyruvate P(i) dikinase to in vivo C₄ plant tissue death.

Acrolein induces Hsp72 via both PKC δ /JNK and calcium signaling pathways in human umbilical vein endothelial cells.

Influence of paraquat on dopaminergic transporter in the rat brain.

Determination of hydroxylated polychlorinated biphenyls (HO-PCBs) in blood plasma by high-performance liquid chromatography-electrospray ionization-tandem quadrupole mass spectrometry.

Tissue distribution and urinary excretion of inorganic arsenic and its methylated metabolites in mice following acute oral administration of arsenate.

Formation of refractory ring-expanded triazine intermediates during the photocatalyzed mineralization of the endocrine disruptor amitrole and related triazole derivatives at UV-irradiated TiO₂/H₂O interfaces.

Inhibition of acetaldehyde metabolism decreases acetylcholine release in medial frontal cortex of freely moving rats.

Botryane metabolites from the fungus *Geniculosporium* sp. isolated from the marine red alga *Polysiphonia*.

Induction of thioredoxin reductase as an adaptive response to acrolein in human umbilical vein endothelial cells.

Tissue distribution of arsenic species in rabbits after single and multiple parenteral administration of arsenic trioxide: tissue accumulation and the reversibility after washout are tissue-selective.

A novel test for identifying genes involved in aldehyde detoxification in the yeast. Increased sensitivity of superoxide-deficient yeast to aldehydes and their metabolic precursors.

Oxidative metabolites are involved in polyamine-induced microglial cell death.

Influence of protein binding on acrolein turnover in vitro by oxazaphosphorines and liver microsomes.

Evolution of endogenous hormone concentration in embryogenic cultures of carrot during early expression of somatic embryogenesis.

Molecular events associated with arsenic-induced malignant transformation of human prostatic epithelial cells: aberrant genomic DNA methylation and K-ras oncogene activation.

Fibroblast cell lines from young adult mice of long-lived mutant strains are resistant to multiple forms of stress.

Disruption of thyroid hormone homeostasis at weaning of Holtzman rats by lactational but not in utero exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Suppressive effects of caraway (*Carum carvi*) extracts on 2, 3, 7, 8-tetrachloro-dibenzo-p-dioxin-dependent gene expression of cytochrome P450 1A1 in the rat H4IIE cells.

Transduced Tat-SOD fusion protein protects against ischemic brain injury.

Identification of aldehyde oxidase 1 and aldehyde oxidase homologue 1 as dioxin-inducible genes.

Cell death induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (2,3,7,8-TCDD) in AtT-20 pituitary cells.

Mitochondrial O₂^{*}- and H₂O₂ mediate glucose deprivation-induced stress in human cancer cells.

[Not only eggs from free roaming chickens are contaminated. How dangerous is dioxin in foods?].

Assessment of human contamination of estrogenic endocrine-disrupting chemicals and their risk for human reproduction.

Background exposure to PCDDs/PCDFs/PCBs and its potential health effects: a review of epidemiologic studies.

Paradoxical effects of green tea (*Camellia sinensis*) and antioxidant vitamins in diabetic rats: improved retinopathy and renal mitochondrial defects but deterioration of collagen matrix glycoxidation and cross-linking.

Effects of arsenite on cell cycle progression in a human bladder cancer cell line.

Transcriptional activation of the membrane-bound progesterone receptor (mPR) by dioxin, in endocrine-responsive tissues.

Deregulation of cell proliferation by polycyclic aromatic hydrocarbons in human breast carcinoma MCF-7 cells reflects both genotoxic and nongenotoxic events.

Aminolevulinic acid: from its unique biological function to its star role in photodynamic therapy.

[Ferro-folgamma--a good alternative in the treatment of iron deficiency anemia and depleted iron stores in pregnant women].

Pediatric fatality following ingestion of dinitrophenol: postmortem identification of a "dietary supplement".

[Health risk related to municipal waste incineration].

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and leptin on hypothalamic mRNA expression of factors participating in food intake regulation in a TCDD-sensitive and a TCDD-resistant rat strain.

Celecoxib inhibits proliferation and induces apoptosis via cyclooxygenase-2 pathway in human pancreatic carcinoma cells.

The epidemiology of pesticide exposure and cancer: A review.

[Effects of Tianzhi Keli on extracellular acetylcholine and catecholamine levels in striatum of rats with neuromitochondrial impairment].

Ability of fourteen chemical agents used in dental practice to induce chromosome aberrations in Syrian hamster embryo cells.

Role of aldehyde dehydrogenase isozymes in the defense of rat lens and human lens epithelial cells against oxidative stress.

Lack of CYP1A1 expression is involved in unresponsiveness of the human hepatoma cell line SK-HEP-1 to dioxin.

Toxicology and carcinogenesis studies of sodium chlorate (Cas No. 7775-09-9) in F344/N rats and B6C3F1 mice (drinking water studies).

Persistent organochlorine chemicals in plasma and risk of non-Hodgkin's lymphoma.

High prevalence of the plasmid-mediated quinolone resistance determinant qnrA in multidrug-resistant Enterobacteriaceae from blood cultures in Liverpool, UK.

Glycolytic glioma cells with active glycogen synthase are sensitive to PTEN and inhibitors of PI3K and gluconeogenesis.

In utero and lactational exposure to TCDD; steroidogenic outcomes differ in male and female rat pups.

Review of the toxicology of carbonyl sulfide, a new grain fumigant.

Effects of chemical ischemia in cerebral cortex slices. Focus on nitric oxide.

Hypothyroidism attenuates protein tyrosine nitration, oxidative stress and renal damage induced by ischemia and reperfusion: effect unrelated to antioxidant enzymes activities.

Genetic and environmental influences on malformations of the cardiac outflow tract.

Effects of ferrous sulphate and non-ionic iron-polymaltose complex on markers of oxidative tissue damage in patients with inflammatory bowel disease.

Synthesis and biodistribution of (11)C-GW7845, a positron-emitting agonist for peroxisome proliferator-activated receptor- γ .

Severe cyanide toxicity from 'vitamin supplements'.

Insulin neuroprotection against oxidative stress in cortical neurons--involvement of uric acid and glutathione antioxidant defenses.

Identification of BCRP as transporter of benzo[a]pyrene conjugates metabolically formed in Caco-2 cells and its induction by Ah-receptor agonists.

Adhesion and Rac1-dependent regulation of biglycan gene expression by transforming growth factor-beta. Evidence for oxidative signaling through NADPH oxidase.

Assay of the synthetic estrogen fosfestrol in pharmaceutical formulations using capillary electrophoresis.

Retinoid status and responsiveness to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice lacking retinoid binding protein or retinoid receptor forms.

Time profiles of peritoneal and renal clearances of different uremic solutes in incident peritoneal dialysis patients.

Expression of sucrose synthase genes involved in enhanced elongation of pondweed (*Potamogeton distinctus*) turions under anoxia.

Cytochrome P450 1B1 is overexpressed and regulated by hypomethylation in prostate cancer.

The hangover gene defines a stress pathway required for ethanol tolerance development.

Biomarkers of exposure, effect, and susceptibility of arsenic-induced health hazards in Taiwan.

Immortalized mouse mammary fibroblasts lacking dioxin receptor have impaired tumorigenicity in a subcutaneous mouse xenograft model.

An assessment of PCBs and OC pesticides in eggs of double-crested (*Phalacrocorax auritus*) and Pelagic (*P. pelagicus*) cormorants from the west coast of Canada, 1970 to 2002.

Photosensitizing properties of 6-methoxy-2-naphthylacetic acid, the major metabolite of the phototoxic non-steroidal anti-inflammatory and analgesic drug nabumetone.

Gas chromatographic-mass spectrometric analysis for measurement of p-cresol and its conjugated metabolites in uremic and normal serum.

Congenital diaphragmatic hernia: a retinoid-signaling pathway disruption during lung development?

Glycation of mitochondrial proteins from diabetic rat kidney is associated with excess superoxide formation.

Synthesis and in vivo evaluation of [11C]PJ34, a potential radiotracer for imaging the role of PARP-1 in necrosis.

Theophylline pharmacokinetics: comparison of Cyp1a1(-/-) and Cyp1a2(-/-) knockout mice, humanized hCYP1A1_1A2 knock-in mice lacking either the mouse Cyp1a1 or Cyp1a2 gene, and Cyp1(+/+) wild-type mice.

Characterization of the monomethylarsonate reductase and dehydroascorbate reductase activities of Omega class glutathione transferase variants: implications for arsenic metabolism and the age-at-onset of Alzheimer's and Parkinson's diseases.

Congenital diaphragmatic hernia, tracheal occlusion, thyroid transcription factor-1, and fetal pulmonary epithelial maturation.

New paradigms in the treatment of restless legs syndrome.

Interactions between metabolism of trace metals and xenobiotic agonists of the aryl hydrocarbon receptor in the antarctic fish *Trematomus bernacchii*: environmental perspectives.

[Experimental behavioral tests using monkey and rat offspring born from mothers exposed perinatally to EDCs].

Sodium azide and 2-deoxy-D-glucose-induced cellular stress affects phosphorylation-dependent AbetaPP processing.

An epidemiological study of poisoning cases reported to the National Poisons Information Centre, All India Institute of Medical Sciences, New Delhi.

High susceptibility of human c-Ha-ras proto-oncogene transgenic rats to carcinogenesis: a cancer-prone animal model.

Induction and activation of the aryl hydrocarbon receptor by IL-4 in B cells.

Peroxiredoxin 6, a 1-Cys peroxiredoxin, functions in antioxidant defense and lung phospholipid metabolism.

Common viral infection affects pentabrominated diphenyl ether (PBDE) distribution and metabolic and hormonal activities in mice.

Temporal and dose-dependent hepatic gene expression patterns in mice provide new insights into TCDD-Mediated hepatotoxicity.

Perinatal exposure to the fungicide prochloraz feminizes the male rat offspring.

Transcriptional regulation of NF-E2 p45-related factor (NRF2) expression by the aryl hydrocarbon receptor-xenobiotic response element signaling pathway: direct cross-talk between phase I and II drug-metabolizing enzymes.

Ah receptor- and TCDD-mediated liver tumor promotion: clonal selection and expansion of cells evading growth arrest and apoptosis.

Dioxin: a review of its environmental effects and its aryl hydrocarbon receptor biology.

Localization of cytochrome P450 CYP2S1 expression in human tissues by in situ hybridization and immunohistochemistry.

Organic anion transporter (Slc22a) family members as mediators of toxicity.

The dioxin/aryl hydrocarbon receptor mediates downregulation of osteopontin gene expression in a mouse model of gastric tumorigenesis.

Methyl bromide intoxication causes reversible symmetric brainstem and cerebellar MRI lesions.

Rubidium-87 magnetic resonance spectroscopy and imaging for analysis of mammalian K⁺ transport.

Effects of PCB 126 on primary immune organs and thymocyte apoptosis in chicken embryos.

Good bug, bad bug: in the case of enteric inflammatory disease does the epithelium decide?

Neonatally administered tert-octylphenol affects onset of puberty and reproductive development in female rats.

Gastric hamartomatous tumours in a transgenic mouse model expressing an activated dioxin/Ah receptor.

Insulinlike growth factor I gene expression is increased in the fetal lung after tracheal ligation.

Is oxidative stress the mechanism of blue sac disease in retene-exposed trout larvae?

Developmental pesticide exposures and the Parkinson's disease phenotype.

Amalgam exposure and neurological function.

Structural and functional alterations in mitochondrial membrane in picrotoxin-induced epileptic rat brain.

Prospective protective role of melatonin against arsenic-induced metabolic toxicity in Wistar rats.

Phosphorylation of cytochromes P450: first discovery of a posttranslational modification of a drug-metabolizing enzyme.

Aryl hydrocarbon receptor-dependent liver development and hepatotoxicity are mediated by different cell types.

Mitochondrial function in Leydig cell steroidogenesis.

Analysis of urinary biomarkers for exposure to alkyl benzenes by isotope dilution gas chromatography-mass spectrometry.

A truncated haemoglobin implicated in oxygen metabolism by the microaerophilic food-borne pathogen *Campylobacter jejuni*.

Dioxin-like activity and maternal thyroid hormone levels in second trimester maternal serum.

Mitochondria are fast Ca^{2+} sinks in rat extraocular muscles: a novel regulatory influence on contractile function and metabolism.

Protective effects of ellagic and chlorogenic acids against oxidative stress in PC12 cells.

The role of oxidative stress in the modulation of aryl hydrocarbon receptor-regulated genes by As^{3+} , Cd^{2+} , and Cr^{6+} .

Non-genomic effects of endocrine disrupters: inhibition of estrogen sulfotransferase by phenols and chlorinated phenols.

Induction of cytochrome P450 1A5 mRNA, protein and enzymatic activities by dioxin-like compounds, and congener-specific metabolism and sequestration in the liver of wild jungle crow (*Corvus macrorhynchos*) from Tokyo, Japan.

Bioactivation of 4-methylphenol (p-cresol) via cytochrome P450-mediated aromatic oxidation in human liver microsomes.

An assessment of the toxicological significance of anthropogenic contaminants in Canadian arctic wildlife.

Organochlorine compounds in liver and concentrations of vitellogenin and 17beta-estradiol in plasma of sea bass fed with a commercial or with a natural diet.

GC-MS analysis of dichlobenil and its metabolites in groundwater.

Tissue-specific, inducible, and hormonal control of the human UDP-glucuronosyltransferase-1 (UGT1) locus.

Sodium arsenite-induced inhibition of eukaryotic translation initiation factor 4E (eIF4E) results in cytotoxicity and cell death.

Identification and characterization of a Na⁺-dependent neutral amino acid transporter, ASCT1, in rabbit corneal epithelial cell culture and rabbit cornea.

Function of nuclear sex hormone receptors in gene regulation.

In utero exposure to dioxins and polychlorinated biphenyls and its relations to thyroid function and growth hormone in newborns.

Thyroid-hormone-disrupting chemicals: evidence for dose-dependent additivity or synergism.

Differential inhibitory effect of long-chain acyl-CoA esters on succinate and glutamate transport into rat liver mitochondria and its possible implications for long-chain fatty acid oxidation defects.

Toxicogenomic profile of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the murine fetal heart: modulation of cell cycle and extracellular matrix genes.

SKS6, a multicopper oxidase-like gene, participates in cotyledon vascular patterning during Arabidopsis thaliana development.

Dose-dependent liver regeneration in chloroform, trichloroethylene and allyl alcohol ternary mixture hepatotoxicity in rats.

Urinary and hand wipe pesticide levels among farmers and nonfarmers in Iowa.

Tissue dosimetry, metabolism and excretion of pentavalent and trivalent monomethylated arsenic in mice after oral administration.

[Political poisoning with dioxins--a weapon of chemical "disgracefulness"].

New organochlorine contaminants and metabolites in plasma and eggs of glaucous gulls (Larus hyperboreus) from the Norwegian Arctic.

Effect-directed analysis of mutagens and ethoxyresorufin-o-deethylase inducers in aquatic sediments.

Pharmacokinetics of glutathione and its metabolites in normal subjects.

New glycol radical enzymes catalysing key metabolic steps in anaerobic bacteria.

Allyl alcohol and garlic (*Allium sativum*) extract produce oxidative stress in *Candida albicans*.

Lifespan and stress resistance of *Caenorhabditis elegans* are increased by expression of glutathione transferases capable of metabolizing the lipid peroxidation product 4-hydroxynonenal.

Oxidative phosphorylation and the tricarboxylic acid cycle are essential for normal development of mouse ovarian follicles.

Fermentative metabolism is induced by inhibiting different enzymes of the branched-chain amino acid biosynthesis pathway in pea plants.

Alkoxyresorufin-O-deethylase activities and polychlorinated biphenyl patterns in shrews as biomarkers in environmental risk assessments: sensitivity and specificity.

Effects of AV3V lesion on pilocarpine-induced pressor response and salivary gland vasodilation.

Determination of triazines and dealkylated and hydroxylated metabolites in river water using a propazine-imprinted polymer.

Toxicological implications of polymorphisms in receptors for xenobiotic chemicals: the case of the aryl hydrocarbon receptor.

Sulfonation of environmental chemicals and their metabolites in the polar bear (*Ursus maritimus*).

Regulation of mouse organic anion-transporting polypeptides (Oatps) in liver by prototypical microsomal enzyme inducers that activate distinct transcription factor pathways.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) alters the mRNA expression of critical genes associated with cholesterol metabolism, bile acid biosynthesis, and bile transport in rat liver: a microarray study.

Concentrations and hazard assessment of polychlorinated biphenyls and organochlorine pesticides in shark liver from the Mediterranean Sea.

Physiological increases in uncoupling protein 3 augment fatty acid oxidation and decrease reactive oxygen species production without uncoupling respiration in muscle cells.

Tissue-dependent distribution and accumulation of chlorobenzenes by vegetables in urban area.

The dioxin-like PCB 77 but not the ortho-substituted PCB 153 interferes with chicken embryo thyroid hormone homeostasis and delays hatching.

Evaluation of mutagenic and antimutagenic activities of alpha-bisabolol in the Salmonella/microsome assay.

Metabolism, excretion, and pharmacokinetics of (3-[[4-tert-butyl-benzyl)-(pyridine-3-sulfonyl)-amino]-methyl]-phenoxy)-acetic acid, an EP2 receptor-selective prostaglandin E2 agonist, in male and female Sprague-Dawley rats.

Human CD34-positive hematopoietic stem cells constitute targets for carcinogenic polycyclic aromatic hydrocarbons.

Altered retinoid metabolism in female Long-Evans and Han/Wistar rats following long-term 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treatment.

The development of a physiologically-based pharmacokinetic model using the distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the tissues of the eastern oyster (*Crassostrea virginica*).

Effects of dioxin on metabolism of estrogens in waste incinerator workers.

Manipulation of plant tolerance to herbicides through co-ordinated metabolic engineering of a detoxifying glutathione transferase and thiol cosubstrate.

Plasma protein level changes in waste incineration workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Localization and differential activity of P-glycoprotein in the bovine olfactory and nasal respiratory mucosae.

The effect of landuse on soil organic carbon chemistry and sorption of pesticides and metabolites.

Mechanisms underlying the relaxation response induced by bradykinin in the epithelium-intact guinea-pig trachea in vitro.

Induction of the multidrug resistance-associated protein family of transporters by chemical activators of receptor-mediated pathways in mouse liver.

Quantification of phenolic metabolites of environmental chemicals in human urine using gas chromatography-tandem mass spectrometry and isotope dilution quantification.

Glutathione conjugates of 4-hydroxy-2(E)-nonenal as biomarkers of hepatic oxidative stress-induced lipid peroxidation in rats.

Metabolism of dibenzofuran and dibenzo-p-dioxin by the biphenyl dioxygenase of *Burkholderia xenovorans* LB400 and *Comamonas testosteroni* B-356.

Tissue distribution, elimination, and metabolism of dietary sodium [³⁶Cl]chlorate in beef cattle.

Hepatic CYP1A induction by dioxin-like compounds, and congener-specific metabolism and sequestration in wild common cormorants from Lake Biwa, Japan.

Evaluation of immuno- and reproductive toxicities and association between immunotoxicological and genotoxicological parameters in waste incineration workers.

Potential sulfur metabolisms and associated bacteria within anoxic surface sediment from saline meromictic Lake Kaiike (Japan).

Altered thyroxin and retinoid metabolic response to 2,3,7,8-tetrachlorodibenzo-p-dioxin in aryl hydrocarbon receptor-null mice.

Functional importance of the family 1 glucosyltransferase UGT72B1 in the metabolism of xenobiotics in *Arabidopsis thaliana*.

Energy substrate requirements for survival of rat retinal cells in culture: the importance of glucose and monocarboxylates.

Cardiovascular gene expression profiles of dioxin exposure in zebrafish embryos.

Mechanisms of exocrine pancreatic toxicity induced by oral treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Harlan Sprague-Dawley Rats.

Adenosine 5'-monophosphate-activated protein kinase and p38 mitogen-activated protein kinase participate in the stimulation of glucose uptake by dinitrophenol in adult cardiomyocytes.

Gentisic acid, an aspirin metabolite, inhibits oxidation of low-density lipoprotein and the formation of cholesterol ester hydroperoxides in human plasma.

Noradrenaline involvement in the memory-enhancing effects of exposure to a complex rhythm stimulus following discriminated passive avoidance training in the young chick.

GMD@CSB.DB: the Golm Metabolome Database.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced impairment of glucose-stimulated insulin secretion in isolated rat pancreatic islets.

Ascorbic acid and alpha-tocopherol as potent modulators of apoptosis on arsenic induced toxicity in rats.

Kinetic modelling of the intestinal transport of sarafloxacin. Studies in situ in rat and in vitro in Caco-2 cells.

Type-3 ryanodine receptors mediate hypoxia-, but not neurotransmitter-induced calcium release and contraction in pulmonary artery smooth muscle cells.

Thyroid lesions and dioxin accumulation in the livers of jungle crows (*Corvus macrorhynchos*) in urban and suburban Tokyo.

Paired cysteine mutagenesis to establish the pattern of disulfide bonds in the functional intact secretin receptor.

Effects of elastase on the mechanical and failure properties of engineered elastin-rich matrices.

C-reactive protein does not relax vascular smooth muscle: effects mediated by sodium azide in commercially available preparations.

A new metabolic pathway of arsenite: arsenic-glutathione complexes are substrates for human arsenic methyltransferase Cyt19.

The effects of gestational arsenic exposure and dietary selenium deficiency on selenium and selenoenzymes in maternal and fetal tissues in mice.

Determination of urinary ortho- and meta-cresol in humans by headspace SPME gas chromatography/mass spectrometry.

Determination of chloroacetanilides, triazines and phenylureas and some of their metabolites in soils by pressurised liquid extraction, GC-MS/MS, LC-MS and LC-MS/MS.

[In vitro regeneration and callogenesis in tissue culture of floral organs of the genus *Iris* (Iridaceae)].

Effect of testosterone and steroids homologues on indolamines and lipid peroxidation in rat brain.

Proteomic characterization of rat liver exposed to 2,3,7,8-tetrachlorobenzo-p-dioxin.

Constitutively active aryl hydrocarbon receptor expressed specifically in T-lineage cells causes thymus involution and suppresses the immunization-induced increase in splenocytes.

Mechanism of TNF- α modulation of Caco-2 intestinal epithelial tight junction barrier: role of myosin light-chain kinase protein expression.

Carrier mediated transport of chlorpheniramine and chlorcyclizine across bovine olfactory mucosa: implications on nose-to-brain transport.

Inhibition of cyclooxygenase activity, platelet aggregation and thromboxane B₂ production by two environmental toxicants: m- and o-cresol.

Human cytochrome p450 2s1: lack of activity in the metabolic activation of several cigarette smoke carcinogens and in the metabolism of nicotine.

Glutathione reductase inhibition and methylated arsenic distribution in Cd1 mice brain and liver.

Characterization of the metabolic interaction between trihalomethanes and chloroacetic acids using rat liver microsomes.

Anti-thyroid hormonal activity of tetrabromobisphenol A, a flame retardant, and related compounds: Affinity to the mammalian thyroid hormone receptor, and effect on tadpole metamorphosis.

Phase I study of MetXia-P450 gene therapy and oral cyclophosphamide for patients with advanced breast cancer or melanoma.

Natural furocoumarins as inducers and inhibitors of cytochrome P450 1A1 in rat hepatocytes.

[Differentiation of rat bone marrow derived Thy-1+ beta2M- cells into hepatocytes].

A carbohydrate fraction, AIP1, from *Artemisia iwayomogi* down-regulates Fas gene expression and suppresses apoptotic death of the thymocytes induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Competing roles of cytochrome P450 1A1/1B1 and aldo-keto reductase 1A1 in the metabolic activation of (+/-)-7,8-dihydroxy-7,8-dihydro-benzo[a]pyrene in human bronchoalveolar cell extracts.

Monochloroacetic acid inhibits liver gluconeogenesis by inactivating glyceraldehyde-3-phosphate dehydrogenase.

Photodecomposition of retinyl palmitate in ethanol by UVA light-formation of photodecomposition products, reactive oxygen species, and lipid peroxides.

Comparison of atomic absorption and fluorescence spectroscopic methods for the routine determination of urinary arsenic.

Overexpression of a eukaryotic glutathione reductase gene from *Brassica campestris* improved resistance to oxidative stress in *Escherichia coli*.

A practical note on the use of cytotoxicity assays.

Simultaneous fluorimetric determination of glyphosate and its metabolite, aminomethylphosphonic acid, in water, previous derivatization with NBD-Cl and by partial least squares calibration (PLS).

Modulation at a cellular level of the thyroid hormone receptor-mediated gene expression by 1,2,5,6,9,10-hexabromocyclododecane (HBCD), 4,4'-diiodobiphenyl (DIB), and nitrofen (NIP).

Differential signatures of protein expression in marmoset liver and thymus induced by single-dose TCDD treatment.

Prostaglandin E1 transport into rat intestinal cryptic cell line IEC-6.

Detection of Several Classes of Pesticides and Metabolites in Meconium by Gas Chromatography-Mass Spectrometry.

Studies of the toxicological potential of tripeptides (L-valyl-L-prolyl-L-proline and L-isoleucyl-L-prolyl-L-proline): IX. Evaluation of the mutagenic potential of synthesized L-valyl-L-prolyl-L-proline in the *Salmonella-Escherichia coli*/microsome, incorporation assay.

A mixture of ammonium perchlorate and sodium chlorate enhances alterations of the pituitary-thyroid axis caused by the individual chemicals in adult male F344 rats.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on vitamin A metabolism in mice.

Cytotoxicity and mutagenicity study of waste and purified water samples from electroplating industries prepared by use of ferrous sulfate and wood fly ash.

Microbial metabolism of 2-chlorophenol, phenol and rho-cresol by *Rhodococcus erythropolis* M1 in co-culture with *Pseudomonas fluorescens* P1.

[Dioxin, poisoning information or brainwashing? On Seveso's and Yushchenko's acne].

Synthesis and characterization of EADAM: a selective radioligand for mapping the brain serotonin transporters by positron emission tomography.

Hepatocyte-targeted nuclear imaging using ^{99m}Tc-galactosylated chitosan: conjugation, targeting, and biodistribution.

2,3,7,8-tetrachlorodibenzo-p-dioxin enhances negative selection of T cells in the thymus but allows autoreactive T cells to escape deletion and migrate to the periphery.

Aryl hydrocarbon receptor-activating polychlorinated biphenyls and their hydroxylated metabolites induce cell proliferation in contact-inhibited rat liver epithelial cells.

The transcriptional response to a peroxisome proliferator-activated receptor alpha agonist includes increased expression of proteome maintenance genes.

The relationship of urinary metabolites of carbaryl/naphthalene and chlorpyrifos with human semen quality.

[Alzheimer's disease with secondary Parkinson's syndrome. Case report of a patient with dementia and Parkinson's syndrome after long-term occupational exposure to insecticides, herbicides, and pesticides].

Genetic engineering of glycinebetaine synthesis in tomato protects seeds, plants, and flowers from chilling damage.

Sensitivity of zebrafish to environmental toxins implicated in Parkinson's disease.

Toxicology and carcinogenesis studies of microencapsulated trans-cinnamaldehyde in rats and mice.

Antioxidant enzymes and thiol/disulfide status in the digestive gland of the brown mussel *Perna perna* exposed to lead and paraquat.

Cigarette suppresses the expression of P4Halpha and vascular collagen production.

[Research advances in wheat (*Triticum aestivum*) allelopathy].

Serum luteinizing hormone response to administration of gonadotropin-releasing hormone to atrazine-treated gilts.

G209A mutant alpha synuclein expression specifically enhances dopamine induced oxidative damage.

Effects of long-term exposure of the red swamp crawfish *Procambarus clarkii* to a mixture of two herbicides, 2,4-dichlorophenoxyacetic acid and monosodium methanearsonate, and associated human health risks.

Toxicity of dipyriddy compounds and related compounds.

Chlorpropham induces mitochondrial dysfunction in rat hepatocytes.

Toxicity of glyphosate-based pesticides to four North American frog species.

The role of active arsenic species produced by metabolic reduction of dimethylarsinic acid in genotoxicity and tumorigenesis.

Microbial metabolite of dimethylarsinic acid is highly toxic and genotoxic.

Mortality and cancer incidence among alachlor manufacturing workers 1968-99.

Metallothionein (I/II) suppresses genotoxicity caused by dimethylarsinic acid.

An in vitro procedure for evaluation of early stage oxidative stress in an established fish cell line applied to investigation of PHAH and pesticide toxicity.

Combined effects of ethanol and cinnamaldehyde in the Japanese medaka embryo-larval assay (MELA).

Chromosomal aberrations, micronuclei and nuclear buds induced in human lymphocytes by 2,4-dichlorophenoxyacetic acid pesticide formulation.

Comparative inter-species pharmacokinetics of phenoxyacetic acid herbicides and related organic acids. evidence that the dog is not a relevant species for evaluation of human health risk.

[Use of peptide bioregulators in intoxication with the herbicide 2,4-dichlorophenoxyacetic acid].

Comparison of anti-androgenic activity of flutamide, vinclozolin, procymidone, linuron, and p, p'-DDE in rodent 10-day Hershberger assay.

Detection of acrolein-lysine adducts in plasma low-density lipoprotein and in aorta of cyclophosphamide-administered rats.

Glyphosate herbicide formulation: a potentially lethal ingestion.

Pentachlorophenol (PCP) bioaccumulation and effect on heat production on salmon eggs at different stages of development.

Attenuation of paraquat-induced motor behavior and neurochemical disturbances by L-valine in vivo.

[Using the FRTL-5 cell to screen the thyroxine disrupting effects of the two pesticides-ethylenethiourea and pendimethalin].

Gene expression analysis of the lung following paraquat administration in rats using DNA microarray.

Regulation of catabolic enzymes during long-term exposure of *Delftia acidovorans* MC1 to chlorophenoxy herbicides.

Detoxication of the environmental pollutant acrolein by a rat liver aldo-keto reductase.

Effects of atrazine on sex steroid dynamics, plasma vitellogenin concentration and gonad development in adult goldfish (*Carassius auratus*).

Biotransformation of chlorpropham (CIPC) in isolated rat hepatocytes and xenoestrogenic activity of CIPC and its metabolites by in vitro assays.

The effect of estradiol on the oxidative damage and trace element level determined in the liver of rats treated with dimethylarsinic acid.

Protein binding and metabolism influence the relative skin sensitization potential of cinnamic compounds.

Exposure parameters necessary for delayed puberty and mammary gland development in Long-Evans rats exposed in utero to atrazine.

Oocyte maturation in *Xenopus laevis* is blocked by the hormonal herbicide, 2,4-dichlorophenoxy acetic acid.

Mutation analysis of the different *tfd* genes for degradation of chloroaromatic compounds in *Ralstonia eutropha* JMP134.

Carbonyl stress and detoxification ability in the male genital tract and testis of rats.

The FEMA GRAS assessment of cinnamyl derivatives used as flavor ingredients.

15-deoxy prostaglandin J2 enhances allyl alcohol-induced toxicity in rat hepatocytes.

Foetal rat lung epithelial (FRLE) cells: partial characterisation and response to pneumotoxins.

Multiple medical problems following agent orange exposure.

Glyphosate poisoning.

Cross resistance to accase herbicide in *Lolium rigidum*.

Poisoning due to chlorophenoxy herbicides.

External Qi therapy to treat symptoms of Agent Orange Sequelae in Korean combat veterans of the Vietnam War.

Alpha and beta estradiol protect neuronal but not native PC12 cells from paraquat-induced oxidative stress.

2,4,5-T and 2,4,5-TCP induce oxidative damage in human erythrocytes: the role of glutathione.

Herbicide safety relative to common targets in plants and mammals.

Antioxidants effectively prevent oxidation-induced protein damage in OLN 93 cells.

Arsenic drinking water exposure and urinary excretion among adults in the Yaqui Valley, Sonora, Mexico.

The cytotoxic activity of lactoperoxidase: enhancement and inhibition by neuroactive compounds.

Sulfur-containing arsenical mistaken for dimethylarsinous acid [DMA(III)] and identified as a natural metabolite in urine: major implications for studies on arsenic metabolism and toxicity.

Vanin-1^{-/-} mice exhibit a glutathione-mediated tissue resistance to oxidative stress.

Possible mechanism for medial smooth muscle cell injury in diabetic nephropathy: glycooxidation-mediated local complement activation.

Activities of UDP-glucuronyltransferase, beta-glucuronidase and deiodinase types I and II in hyper- and hypothyroid rats.

Resistance of mitochondrial DNA-depleted cells against cell death: role of mitochondrial superoxide dismutase.

Arsenic speciation in urine from acute promyelocytic leukemia patients undergoing arsenic trioxide treatment.

Metabolism of metamitron in goat following a single oral administration of a nontoxic dose level: a continued study.

Pistil induction by hormones from callus of *Oryza sativa* in vitro.

Activities of fructan- and sucrose-metabolizing enzymes in wheat stems subjected to water stress during grain filling.

Antioxidants and ocular cell type differences in cytoprotection from formic acid toxicity in vitro.

Chloroacetanilide herbicide metabolites in Wisconsin groundwater: 2001 survey results.

Hydrophobic metabolites of 2,4-dichlorophenoxyacetic acid (2,4-D) in cultured coconut tissue.

The activities of antioxidant enzymes in response to oxidative stresses and hormones in paraquat-tolerant *Rehmannia glutinosa* plants.

Sorption of the herbicide dichlobenil and the metabolite 2,6-dichlorobenzamide on soils and aquifer sediments.

Aminomethylphosphonic acid, a metabolite of glyphosate, causes injury in glyphosate-treated, glyphosate-resistant soybean.

Role of mitochondrial aldehyde dehydrogenase in nitroglycerin-induced vasodilation of coronary and systemic vessels: an intact canine model.

A review of the enzymology of arsenic metabolism and a new potential role of hydrogen peroxide in the detoxication of the trivalent arsenic species.

Catalase-independent early-gene expression in rat brain following acute ethanol exposure.

Distribution and metabolism of D/L-, L- and D-glufosinate in transgenic, glufosinate-tolerant crops of maize (*Zea mays* L ssp *mays*) and oilseed rape (*Brassica napus* L var *napus*).

Simultaneous quantification of glyphosate, glufosinate, and their major metabolites in rice and soybean sprouts by gas chromatography with pulsed flame photometric detector.

Monitoring of urinary acrolein concentration in patients receiving cyclophosphamide and ifosfamide.

Phytotoxins from the leaves of *Ruta graveolens*.

Influence of vitamin E, sodium selenite, and astrocyte-conditioned medium on neuronal survival after chronic exposure to ethanol.

Contamination of honey by the herbicide asulam and its antibacterial active metabolite sulfanilamide.

Sorption, mineralization and mobility of N-(phosphonomethyl)glycine (glyphosate) in five different types of gravel.

Evidence that atrazine and diaminochlorotriazine inhibit the estrogen/progesterone induced surge of luteinizing hormone in female Sprague-Dawley rats without changing estrogen receptor action.

[Determination of glyphosate and its principal metabolite residues in banana and its irrigation water by GC-MS].

Preconcentration of the herbicide glyphosate and its metabolite AMPA by immobilised metal ion affinity chromatography (IMAC).

Adsorption and desorption of metolachlor and metolachlor metabolites in vegetated filter strip and cultivated soil.

A liquid chromatography--tandem mass spectrometry multiresidue method for quantification of specific metabolites of organophosphorus pesticides, synthetic pyrethroids, selected herbicides, and deet in human urine.

Interaction of xenobiotics with estrogen receptors alpha and beta and a putative plasma sex hormone-binding globulin from channel catfish (*Ictalurus punctatus*).

Crosstalk and differential response to abiotic and biotic stressors reflected at the transcriptional level of effector genes from secondary metabolism.

[Induction of embryogenic calli from caryopses of common bermudagrass and ultrastructure of embryogenic cells as well as plant regeneration].

Chirality of pollutants--effects on metabolism and fate.

Quantification of the new triketone herbicides, sulcotrione and mesotrione, and other important herbicides and metabolites, at the ng/l level in surface waters using liquid chromatography-tandem mass spectrometry.

[Quantitative evaluation of interaction between toxic substances in overall soil pollution].

[Cultivation of *Iris ensata* Thunb. callus tissue].

Degradation and sorption of metribuzin and primary metabolites in a sandy soil.

An endogenous metabolite of dopamine, 3,4-dihydroxyphenylethanol, acts as a unique cytoprotective agent against oxidative stress-induced injury.

Comparative effect of cyanamide and sodium nitroprusside on indolamine and lipid peroxidation levels in rat brain.

Inhibition of cardiac myocyte contraction by 4-hydroxy-trans-2-nonenal.

Absorption, distribution, metabolism and excretion of 4-chloro-2-methylphenoxyacetic acid (MCPA) in rats.

Recruitment of thyroid hormone receptor/retinoblastoma-interacting protein 230 by the aryl hydrocarbon receptor nuclear translocator is required for the transcriptional response to both dioxin and hypoxia.

The assessment of the viability of the endospores of *Rhinosporidium seeberi* with MTT (3-[4, 5-dimethyl-2-thiazolyl]-2, 5-diphenyl-2H-tetrazolium bromide).

Disruption of estrogen-regulated gene expression by dioxin: downregulation of a gene associated with the onset of non-insulin-dependent diabetes mellitus (type 2 diabetes).

Magnification and toxicity of PCBs, PCDDs, and PCDFs in upriver-migrating Pacific salmon.

Impairment of small intestinal protein assimilation in patients with end-stage renal disease: extending the malnutrition-inflammation-atherosclerosis concept.

Uptake of inorganic and organic derivatives of arsenic associated with induced cytotoxic and genotoxic effects in Chinese hamster ovary (CHO) cells.

[Treatment of disorders of iron metabolism].

The potential role of NaFeEDTA as an iron fortificant.

Cancer cluster investigations: use of a hybrid approach in a rural county.

Design and synthesis of highly potent and selective (2-arylcarbamoyl-phenoxy)-acetic acid inhibitors of aldose reductase for treatment of chronic diabetic complications.

Evaluation of relative potencies of PCB126 and PCB169 for the immunotoxicities in ovalbumin (OVA)-immunized mice.

Effects of TGF-beta, TNF-alpha, IL-beta and IL-6 alone or in combination, and tyrosine kinase inhibitor on cyclooxygenase expression, prostaglandin E2 production and bone resorption in mouse calvarial bone cells.

The putative glutamate receptor 1.1 (AtGLR1.1) in *Arabidopsis thaliana* regulates abscisic acid biosynthesis and signaling to control development and water loss.

Dying to be thin: a dinitrophenol related fatality.

Ex vivo evaluation of erythrocytosis-enhanced platelet thrombus formation using the cone and plate(let) analyzer: effect of platelet antagonists.

Women and omega-3 Fatty acids.

Breast cancer incidence and its possible spatial association with pesticide application in two counties of England.

Modulation of aryl hydrocarbon receptor-regulated gene expression by arsenite, cadmium, and chromium.

Lack of effects of postnatal exposure to a mixture of aryl hydrocarbon-receptor agonists on the development of methylnitrosourea-induced mammary tumors in sprague-dawley rats.

A chronic Alzheimer's model evoked by mitochondrial poison sodium azide for pharmacological investigations.

Significant association between nonsyndromic oral clefts and arylhydrocarbon receptor nuclear translocator (ARNT).

Protective effects of vitamin A and vitamin E succinate against 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced body wasting, hepatomegaly, thymic atrophy, production of reactive oxygen species and DNA damage in C57BL/6J mice.

Role of estrogen receptor in regulation of polycyclic aromatic hydrocarbon metabolic activation in lung.

Metabonomic investigations in mice infected with *Schistosoma mansoni*: an approach for biomarker identification.

Molecular mechanisms of alcoholic fatty liver: role of sterol regulatory element-binding proteins.

[Toxic effect of arsenite on the expression of liver multidrug resistance-associated protein 2 in rat].

Male reproductive toxicity of sodium arsenite in mice.

Histomorphometric alteration and cell-type specific modulation of arylhydrocarbon receptor and estrogen receptor expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin and 17beta-estradiol in mouse experimental model of endometriosis.

The accumulation and toxicity of methylated arsenicals in endothelial cells: important roles of thiol compounds.

Evidence that arsenite acts as a cocarcinogen in skin cancer.

Animal models for arsenic carcinogenesis: inorganic arsenic is a transplacental carcinogen in mice.

Understanding arsenic carcinogenicity by the use of animal models.

Proteomic response to amino acid starvation in *Candida albicans* and *Saccharomyces cerevisiae*.

Expression, purification, and C-terminal amidation of recombinant human glucagon-like peptide-1.

The topical application of 2,3,7,8-tetrachlorodibenzo-p-dioxin lacks skin tumor-promoting potency but induces hepatic injury and tumor necrosis factor-alpha expression in ICR male mice.

Mechanism of hepatic insulin resistance in non-alcoholic fatty liver disease.

The Ah receptor inhibits estrogen-induced estrogen receptor beta in breast cancer cells.

A constitutively active dioxin/aryl hydrocarbon receptor promotes hepatocarcinogenesis in mice.

In utero effects of chemicals on reproductive tissues in females.

Dioxin alters the human low-density and very low-density lipoprotein structure with evidence for specific quenching of Trp-48 in apolipoprotein C-II.

Aromatic hydrocarbon receptor status in the metabolism of xenobiotics under normal and pathophysiological conditions.

Contaminant effects on the teleost fish thyroid.

Intravesical resiniferatoxin decreases spinal c-fos expression and increases bladder volume to reflex micturition in rats with chronic inflamed urinary bladders.

Functional characterization of malignant hyperthermia-associated RyR1 mutations in exon 44, using the human myotube model.

Expression of hypothalamic neuropeptides after acute TCDD treatment and distribution of Ah receptor repressor.

SUR2A C-terminal fragments reduce KATP currents and ischaemic tolerance of rat cardiac myocytes.

Endocrine disrupting pesticides: a leading cause of cancer among rural people in Pakistan.

Effects of cyclooxygenase-2 antisense vector on proliferation of human cholangiocarcinoma cells.

Exocrine pancreatic pathology in female Harlan Sprague-Dawley rats after chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and dioxin-like compounds.

Mechanisms underlying arsenic carcinogenesis: hypersensitivity of mice exposed to inorganic arsenic during gestation.

The dioxin-like pollutant PCB 126 (3,3',4,4',5-pentachlorobiphenyl) affects risk factors for cardiovascular disease in female rats.

NTP toxicology and carcinogenesis studies of triethanolamine (Cas No. 102-71-6) in B6C3F1 mice (dermal studies).

Hexachlorobenzene, a dioxin-like compound, disrupts auditory function in rat.

Cyp1a1(-/-) male mice: protection against high-dose TCDD-induced lethality and wasting syndrome, and resistance to intrahepatocyte lipid accumulation and uroporphyrinuria.

BMK1 is activated in glomeruli of diabetic rats and in mesangial cells by high glucose conditions.

Crystal structure of protoporphyrinogen IX oxidase: a key enzyme in haem and chlorophyll biosynthesis.

Patent ductus venosus and dioxin resistance in mice harboring a hypomorphic Arnt allele.

First evidence of endocrine disruption in feral carp from the Ebro River.

Reduction of androgen receptor expression by benzo[alpha]pyrene and 7,8-dihydro-9,10-epoxy-7,8,9,10-tetrahydrobenzo[alpha]pyrene in human lung cells.

Role of mediator in transcriptional activation by the aryl hydrocarbon receptor.

Treating obesity: pharmacology of energy expenditure.

Association of liver hemangiosarcoma and secondary iron overload in B6C3F1 mice--the National Toxicology Program experience.

Breast cancer and environmental risks: where is the link?

In utero pesticide exposure, maternal paraoxonase activity, and head circumference.

Rat models of dementia based on reductions in regional glucose metabolism, cerebral blood flow and cytochrome oxidase activity.

Epithelia under metabolic stress perceive commensal bacteria as a threat.

Tissue-specific effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the activity of 5'-deiodinases I and II in rats.

Modulation of AhR-mediated CYP1A1 mRNA and EROD activities by 17beta-estradiol and dexamethasone in TCDD-induced H411E cells.

Phthalate ester-induced gubernacular lesions are associated with reduced insl3 gene expression in the fetal rat testis.

Interaction between genetic polymorphism of cytochrome P450-1B1 and environmental pollutants in breast cancer risk.

Intra-strain dioxin sensitivity and morphometric effects in swim-up rainbow trout (*Oncorhynchus mykiss*).

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on fatty acid availability and neural tube formation in cynomolgus macaque, *Macaca fascicularis*.

The nematode *Caenorhabditis elegans* as a model of organophosphate-induced mammalian neurotoxicity.

Protective effects of ursodeoxycholic acid against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced testicular damage in mice.

Effects of odd-numbered medium-chain fatty acids on the accumulation of long-chain 3-hydroxy-fatty acids in long-chain L-3-hydroxyacyl CoA dehydrogenase and mitochondrial trifunctional protein deficient skin fibroblasts.

A comparison of human H295R and rat R2C cell lines as in vitro screening tools for effects on aromatase.

Comparison of the hemolytic activity of isopropoxyethanol and phenoxyethanol.

Liquid growth hormone: preservatives and buffers.

Activation of inflammatory mediators and potential role of ah-receptor ligands in foam cell formation.

Physiological and morphological changes in autolyzing *Aspergillus nidulans* cultures.

Aryl hydrocarbon receptor-mediated inhibition of LNCaP prostate cancer cell growth and hormone-induced transactivation.

Metallic taste and retronasal smell.

Metabolic activation of polycyclic aromatic hydrocarbons to carcinogens by cytochromes P450 1A1 and 1B1.

Follicular epithelial cell hypertrophy induced by chronic oral administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Harlan Sprague-Dawley rats.

Induction of tumors of the liver, lung, ovary and adrenal in adult mice after brief maternal gestational exposure to inorganic arsenic: promotional effects of postnatal phorbol ester exposure on hepatic and pulmonary, but not dermal cancers.

Role of stromal-epithelial interactions in hormonal responses.

Effects of endocrine disrupters on sex steroid synthesis and metabolism pathways in fish.

Metabolism of polychlorinated dibenzo-p-dioxins by cytochrome P450 BM-3 and its mutant.

Brain catalase activity inhibition as well as opioid receptor antagonism increases ethanol-induced HPA axis activation.

Disruption of rapid, nongenomic steroid actions by environmental chemicals: interference with progestin stimulation of sperm motility in Atlantic croaker.

Characteristics of 3,5,3'-triiodothyronine (T3)-uptake system of tadpole red blood cells: effect of endocrine-disrupting chemicals on cellular T3 response.

Occurrence and transport of Irgarol 1051 and its major metabolite in coastal waters from South Florida.

Olfactory mucosal toxicity screening and multivariate QSAR modeling for chlorinated benzene derivatives.

Human bronchial smooth muscle cell proliferation via thromboxane A2 receptor.

Higher respiratory activity decreases mitochondrial reactive oxygen release and increases life span in *Saccharomyces cerevisiae*.

Regulatory role of dADAR in ROS metabolism in *Drosophila* CNS.

Gestational exposure of Ahr and Arnt hypomorphs to dioxin rescues vascular development.

Analysis of endocrine disrupting alkylphenols, chlorophenols and bisphenol-A using hollow fiber-protected liquid-phase microextraction coupled with injection port-derivatization gas chromatography-mass spectrometry.

Determination of weakly acidic endocrine-disrupting compounds by liquid chromatography-mass spectrometry with post-column base addition.

Src tyrosine kinase regulates CYP17 expression and androstenedione secretion in theca-enriched mouse ovarian cells.

[Effects of cytokinin preparations on the stability of the photosynthetic apparatus of two wheat cultivars under water deficiency].

Potential roles of the aryl hydrocarbon receptor in female reproductive senescence.

Down regulation of hepatic PPARalpha function by AhR ligand.

Strain-specific of alachlor on murine olfactory mucosal responses.

Acetate threshold concentrations suggest varying energy requirements during anaerobic respiration by *Anaeromyxobacter dehalogenans*.

Alpha-tocotrienol provides the most potent neuroprotection among vitamin E analogs on cultured striatal neurons.

Functional characterization of the carrier-mediated transport system for glycerol in everted sacs of the rat small intestine.

Rgg regulates growth phase-dependent expression of proteins associated with secondary metabolism and stress in *Streptococcus pyogenes*.

Determination of 4-amino-m-cresol and 5-amino-o-cresol and metabolites in human keratinocytes (HaCaT) by high-performance liquid chromatography with DAD and MS detection.

Determination of icariin and metabolites in rat serum by capillary zone electrophoresis: rat pharmacokinetic studies after administration of icariin.

Histologic changes in thyroid glands from great cormorant (*Phalacrocorax carbo*) in Tokyo Bay, Japan: possible association with environmental contaminants.

Comparison of metabolic oscillations from mouse pancreatic beta cells and islets.

Overexpression of short heterodimer partner recovers impaired glucose-stimulated insulin secretion of pancreatic beta-cells overexpressing UCP2.

Prolonged exercise to fatigue in humans impairs skeletal muscle Na⁺-K⁺-ATPase activity, sarcoplasmic reticulum Ca²⁺ release, and Ca²⁺ uptake.

Hydroxylated and methyl sulfone PCB metabolites in adipose and whole blood of polar bear (*Ursus maritimus*) from East Greenland.

Semiochemistry of the goldeneyed lacewing *Chrysopa oculata*: attraction of males to a male-produced pheromone.

Direct differentiation of somatic embryos on different regions of intact seedlings of *Azadirachta* in response to thidiazuron.

The in vivo use of the stable isotope-labelled biomarkers lactose-[¹⁵N]ureide and [²H₄]tyrosine to assess the effects of pro- and prebiotics on the intestinal flora of healthy human volunteers.

Analysis of HO-PCBs and PCP in blood plasma from individuals with high PCB exposure living on the Chukotka Peninsula in the Russian Arctic.

Identification of the growth hormone-releasing peptide binding site in CD36: a photoaffinity cross-linking study.

Effects of beta-naphthoflavone, phenobarbital and dichlobenil on the drug-metabolizing system of liver and nasal mucosa of Italian water frogs.

Transcriptional regulation of cyclooxygenase-2 gene in pancreatic beta-cells.

Interleukin-1 inhibits voltage-dependent P/Q-type Ca²⁺ channel associated with the inhibition of the rise of intracellular free Ca²⁺ concentration and catecholamine release in adrenal chromaffin cells.

Avian exocrine secretions. I. Chemical characterization of the volatile fraction of the uropygial secretion of the green woodhoopoe, *Phoeniculus purpureus*.

Myocardial oxygen demand and redox state affect fatty acid oxidation in the potassium-arrested heart.

A novel mechanism of regulation of cardiac contractility by mitochondrial functional state.

Sequential metabolism of 2,3,7-trichlorodibenzo-p-dioxin (2,3,7-triCDD) by cytochrome P450 and UDP-glucuronosyltransferase in human liver microsomes.

Exponential modeling, washout curve reconstruction, and estimation of half-life of toluene and its metabolites.

Toxicokinetics of PCDD, PCDF, and coplanar PCB congeners in Baikal seals, *Pusa sibirica*: age-related accumulation, maternal transfer, and hepatic sequestration.

Determination of aldicarb, carbofuran and some of their main metabolites in groundwater by application of micellar electrokinetic capillary chromatography with diode-array detection and solid-phase extraction.

Dimethylthioarsenicals as arsenic metabolites and their chemical preparations.

Transport of deslorelin, an LHRH agonist, is vectorial and exhibits regional variation in excised bovine nasal tissue.

Metabolic fate of [14C]-2,4-dichlorophenol in macrophytes.

Fluorescence spectroscopic detection of mitochondrial flavoprotein redox oscillations and transient reduction of the NADPH oxidase-associated flavoprotein in leukocytes.

Some polybrominated diphenyl ether (PBDE) flame retardants with wide environmental distribution inhibit TCDD-induced EROD activity in primary cultured carp (*Cyprinus carpio*) hepatocytes.

Rapid analysis of antimicrobial metabolites monoacetylphloroglucinol and 2,4-diacetylphloroglucinol using capillary zone electrophoresis.

Platelet-derived growth factor-induced arachidonic acid release for enhancement of prostaglandin E(2) synthesis in human gingival fibroblasts pretreated with interleukin-1beta.

D-mannose transport and metabolism in isolated enterocytes.

Conductometric tyrosinase biosensor for the detection of diuron, atrazine and its main metabolites.

Aryl hydrocarbon receptor-mediated induction of microsomal drug-metabolizing enzyme activity by indirubin and indigo.

Studies on the metabolism and the toxicological analysis of the nootropic drug fipexide in rat urine using gas chromatography-mass spectrometry.

Cytochrome P450-dependent toxicity of environmental polycyclic aromatic hydrocarbons towards human macrophages.

The aryl hydrocarbon receptor-mediated disruption of vitellogenin synthesis in the fish liver: Cross-talk between AHR- and ERalpha-signalling pathways.

[Effect of zenkor on the amount of glucose and activity of gluconeogenesis enzymes in carp's (*Cyprinus carpio* L.) tissues at different temperatures].

Pharmacokinetic analysis of factors determining elimination pathways for sulfate and glucuronide metabolites of xenobiotics. III: mechanisms for sinusoidal efflux of 4-methylumbelliferone sulfate.

Involvement of P-glycoprotein in the transport of saquinavir and indinavir in rat brain microvessel endothelial and microglia cell lines.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on maternal immune response during pregnancy.

Use of genetically manipulated *Salmonella typhimurium* strains to evaluate the role of sulfotransferases and acetyltransferases in nitrofen mutagenicity.

Sphingomonas sp. strain SB5 degrades carbofuran to a new metabolite by hydrolysis at the furanyl ring.

Static magnetic fields-induced bone sialoprotein (BSP) expression is mediated through FGF2 response element and pituitary-specific transcription factor-1 motif.

Chlorophenol production by anaerobic microorganisms: transformation of a biogenic chlorinated hydroquinone metabolite.

Enhancing effect of the endocrine disruptor para-nonylphenol on the generation of reactive oxygen species in human blood neutrophils.

Screening for estrogen and androgen receptor activities in 200 pesticides by in vitro reporter gene assays using Chinese hamster ovary cells.

Glutathione-S-transferase A4-4 modulates oxidative stress in endothelium: possible role in human atherosclerosis.

Modulation of in vitro fungicidal activity of human lactoferrin against Candida albicans by extracellular cation concentration and target cell metabolic activity.

CYP1A2 is not required for 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immunosuppression.

Regulation of mitochondrial energy production in cardiac cells of rainbow trout (*Oncorhynchus mykiss*).

A novel effect of dioxin: exposure during pregnancy severely impairs mammary gland differentiation.

Cell-based assay for the detection of chemically induced cellular stress by immortalized untransformed transgenic hepatocytes.

Determination of dithiocarbamates and metabolites in plants by liquid chromatography-mass spectrometry.

The effect of *Smallanthus sonchifolius* leaf extracts on rat hepatic metabolism.

Quantitative analysis of cresol and its metabolites in biological materials and distribution in rats after oral administration.

Antimutagenicity of herbal detoxification formula Smoke Shield against environmental mutagens.

Nucleotidase activities in membrane preparations of nervous ganglia and digestive gland of the snail *Helix aspersa*.

Benzylmercapturic acid is superior to hippuric acid and o-cresol as a urinary marker of occupational exposure to toluene.

Combined screening of thymocytes using apoptosis-specific cDNA array and promoter analysis yields novel gene targets mediating TCDD-induced toxicity.

Evidence for induction of apoptosis in T cells from murine fetal thymus following perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Perinatal dioxin exposure and later effects--a review.

Overexpression of latent transforming growth factor-beta binding protein 1 (LTBP-1) in dioxin receptor-null mouse embryo fibroblasts.

Characterization of the adrenal-specific antigen IZA (inner zone antigen) and its role in the steroidogenesis.

A comparative study on the effects of 2,3,7,8,-tetrachlorodibenzo-p-dioxin polychlorinated biphenyl126 and estrogen in human bronchial epithelial cells.

Impact of mitochondrial inhibition on excitability and cytosolic Ca²⁺ levels in brainstem motoneurons from mouse.

Formation and urinary excretion of arsenic triglutathione and methylarsenic diglutathione.

Physiological role of mGSTA4-4, a glutathione S-transferase metabolizing 4-hydroxynonenal: generation and analysis of mGsta4 null mouse.

2,3,7,8-tetrachlorodibenzo-p-dioxin augments the modulation of gene expression mediated by the thyroid hormone receptor.

DNA adduct formation in precision-cut rat liver and lung slices exposed to benzo[a]pyrene.

Substrate specificities and electron paramagnetic resonance properties of benzylsuccinate synthases in anaerobic toluene and m-xylene metabolism.

Potential of carbon tetrachloride hepatotoxicity and lethality in type 2 diabetic rats.

Effects of acute postnatal exposure to 3,3',4,4'-tetrachlorobiphenyl on sperm function and hormone levels in adult rats.

Recombinant human estrogen, androgen and progesterone receptors for detection of potential endocrine disruptors.

Using a linked soil model emulator and unsaturated zone leaching model to account for preferential flow when assessing the spatially distributed risk of pesticide leaching to groundwater in England and Wales.

Effect of insulin-like growth factor-1 and 2,3,7,8-tetrachlorodibenzo-p-dioxin on the expression of luteinizing hormone receptors in cultured granulosa cells.

A chronic implant to record electroretinogram, visual evoked potentials and oscillatory potentials in awake, freely moving rats for pharmacological studies.

Gene expression profiles of mouse aorta and cultured vascular smooth muscle cells differ widely, yet show common responses to dioxin exposure.

Update on olfactory mucosal metabolic enzymes: age-related changes and N-acetyltransferase activities.

Nitric oxide and platelet energy metabolism.

Toxicity, histopathological alterations and immunohistochemical CYP1A induction in the early life stages of the seabream, *Sparus aurata*, following waterborne exposure to B(a)P and TCDD.

A comparison of callus induction and plant regeneration from different embryo explants of triticale (x *Triticosecale wittmack*).

Different global gene expression profiles in benzo[a]pyrene- and dioxin-treated vascular smooth muscle cells of AHR-knockout and wild-type mice.

Thermochemical characteristics of 2,4-dichlorophenol degrading strain *Pseudomonas* GT241-1 of growth metabolism by microcalorimetry.

Toxicokinetic and genomic analysis of chronic arsenic exposure in multidrug-resistance *mdr1a/1b*(-/-) double knockout mice.

Infiltration of acetochlor and two of its metabolites in two contrasting soils.

Toxicological profiling of sediments using in vitro bioassays, with emphasis on endocrine disruption.

Transport of ^{99m}Tc-MAG3 via rat renal organic anion transporter 1.

Expression of genes in the TGF-beta signaling pathway is significantly deregulated in smooth muscle cells from aorta of aryl hydrocarbon receptor knockout mice.

The olivacine derivative **s 16020** (9-hydroxy-5,6-dimethyl-N-[2-(dimethylamino)ethyl]-6H-pyrido(4,3-B)-carbazole-1-carboxamide) induces CYP1A and its own metabolism in human hepatocytes in primary culture.
