Estimation of the TCDD toxic potential in the light of the Seveso accident.

Ontogeny of the rat hepatic receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin and its endocrine independence.

Effect of sodium azide on the ultrastructural preservation of tissues.

Nuclear uptake of 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57BL/6J and DBA/2J mice. Role of the hepatic cytosol receptor protein.

Immunological studies of the sperm-specific phosphoglycerate kinase-2 of mice.

Inhibitory effect of certain drugs on thyroid hormone binding by human liver cytosol.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin, kepone, and polybrominated biphenyls on transport systems in isolated rat hepatocytes.

Effects of pretreatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin on the capacity of hepatic and extrahepatic mouse tissues to convert procarcinogens to mutagens for Salmonella typhimurium auxotrophs.

An estimate of the maximum in vivo covalent binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin to rat liver protein, ribosomal RNA, and DNA.

Isolation of an acidic peptide from pyruvate kinase type M2 of chicken liver containing the phosphate acceptor site for a cyclic-AMP-independent protein.

Multiplicity of induction patterns of rat liver microsomal mono-oxygenases and other polypeptides produced by administration of various xenobiotics.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the hepatic metabolism of testosterone in the rat.

Depression of adenosine triphosphatase activities in isolated liver surface membranes of 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats: correlation with effects on ouabain biliary excretion and bile flow.

Reversal of sodium-azide mutagenicity by liver preparations and by gastric juice.

L-Thyroxine effects upon ATPase activities of several subcellular fractions of liver of the rat and the guinea pig.

In vitro metabolism of 1,2-dihaloethanes to ethylene.

Activation of rat liver guanylate cyclase by proteolysis.

Partial amino acid sequence of the glutamate dehydrogenase of human liver and a revision of the sequence of the bovine enzyme.

Metabolic activation/deactivation reactions during perinatal development.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) effects on hepatic microsomal cytochrome P-448-mediated enzyme activities.

Metabolic activation and deactivation of mutagens and carcinogens.

Conversion of 2,4,6-trinitrophenol to a mutagen by *Pseudomonas aeruginosa*.

Bioassay of dibenzo-p-dioxin for possible carcinogenicity.

Bioassay of 2,7-dichlorodibenzo-p-dioxin (DCDD) for possible carcinogenicity.

Bioassay of Nitrofen for Possible Carcinogenicity (CAS No. 1836-75-5).

2,3,7,8-Tetrachlorodibenzo-p-dioxin: covalent binding of reactive metabolic intermediates principally to protein in vitro.

Changes in steroid hormone metabolism in rat liver microsomes following administration of 2,3,7,8-tetrachlorodibenzo-p-dioxine (TCDD).

Allyl alcohol-induced changes in the rat exocrine pancreas.

Paraquat poisoning: a review.

Collagen prolyl hydroxylase levels in experimental paraquat poisoning.

The hepatotoxicity of 3-amino-1,2,4-triazole and carbon disulphide in phenobarbitone-treated starved rats.

[Pathomorphological studies in experimental simazine poisoning of sheep].

Carcinogenic bioassay of the herbicide, 2,4,5-trichlorophenoxyethanol (TCPE) with different 2,3,7,8-tetrachlorodibenzo-p-dioxin (dioxin) content in Swiss mice.

[Hexachlorbenzene (HCB) induced porphyria in rats. Influence of HCB-metabolites on the biosynthesis of heme (author's transl)].

Enzymic digestion of liver tissue to release barbiturates, salicylic acid and other acidic compounds in cases of human poisoning.

Effect of carboxylesterase inhibitors on the acute hepatotoxicity of esters of allyl alcohol.

Comparative effects of aminotriazole on normal and acatalasemic mice.

Carcinogenic and antitumor effects of aminotriazole on acatalasemic and normal catalase mice.

The effect of paraquat on the respiration of lung cell fractions.

An example of the oxidative de-esterification of an isopropyl ester. Its role in the metabolism of the herbicide flampropisopropyl.

Paraquat-induced formation of hydroperoxide in mouse liver microsomes [proceedings].

Metabolism of pentachlorophenol in vivo and in vitro.

Mutagenicity of diallate, sulfallate, and triallate and relationship between structure and mutagenic effects of carbamates used widely in agriculture.

The membrane potential of mouse ascites-tumour cells studied with the fluorescent probe 3,3'-dipropylloxadicarbocyanine. Amplitude of the depolarization caused by amino acids.

Uptake and metabolism of thyroid hormones by cultured monkey hepatocarcinoma cells. Effects of potassium cyanide and dinitrophenol.

The influence of ethanol pretreatment on the effects of nine hepatotoxic agents.

Relation of cell type and cell density in tissue culture to the isoaccepting spectra of the nucleoside Q containing tRNAs: tRNA^{Tyr}, tRNA^{His}, tRNA^{Asn} and tRNA^{Asp}.

Treatment of arterial hypertension with tienilic acid, a new diuretic with uricosuric properties.

Lack of tumor-promoting ability of certain environmental chemicals in a two-stage mouse skin tumorigenesis assay.

Stimulation of bilirubin catabolism in jaundiced Gunn rats by an induced of microsomal mixed-function monooxygenases.

Rat liver aldehyde dehydrogenase--immunochemical identity of 2,3,7,8-tetrachlorodibenzo-p-dioxin inducible normal liver and 2-acetylaminofluorene inducible hepatoma isozymes.

Large agarose beads for extracorporeal detoxification systems.

Effect of high dietary copper on the ceca of chicks.

The reduction of diamide by rat liver mitochondria and the role of glutathione.

The inhibition of amylase synthesis in the isolated perfused rat liver by cycloheximide and dinitrophenol.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the renal tubular secretion of phenolsulfonphthalein.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on lipid profiles in tissue of the Fischer rat.

Effect of polychlorinated biphenyls on drug metabolism in Japanese quail and its progeny.

The covalent structure of bovine liver rhodanese. Isolation and partial structural analysis of cyanogen bromide fragments and the complete sequence of the enzyme.

[Incorporation of S-adenosylmethionine in the isolated and perfused rat liver. Preliminary study].

Evidence in rat and mouse liver for temporal control of two forms of cytochrome P-450 inducible by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Agarose-bound horse-liver alcohol dehydrogenase. Dependence of molecular properties and activity on coupling conditions.

Selective modification of the renal and the hepatic toxicities of chloroform by induction of drug-metabolizing enzyme systems in kidney and liver.

[Investigation of adenosinetriphosphatase activity of rat liver and thymus cell nuclei].

Effect of trichlorophenols on xenobiotic metabolism in the rat.

Cancerostatics. III. Synthesis and some chemical transformations of 3-cyano-5(pyridyl-4.)pyrid-2-one.

Covalent structure of collagen: amino acid sequence of five consecutive CNBr peptides from type III collagen of human liver.

Effect of alteration of rat hepatic mixed-function oxidase (MFO) activity on the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Acinar distribution of liver cell regeneration after selective zonal injury in the rat.

Testing of known carcinogens and noncarcinogens for their ability to induce unscheduled DNA synthesis in HeLa cells.

Properties of the calcium-extruding mechanism of liver cells.

The role of acetaldehyde in mediating the deleterious effect of ethanol on pyridoxal 5'-phosphate metabolism.

Responses of the D-glucuronic acid pathway in rat tissues to treatment with tetrachlorodibenzodioxin.

Distribution of clozapine in the rat: localization in lung.

Covalent coupling of rat liver phenylalanine hydroxylase.

An improved assay of 7-ethoxycoumarin O-deethylase activity: induction of hepatic enzyme activity in C57BL/6J and DBA/2J mice by phenobarbital, 3-methylcholanthrene and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

An energy requirement for the degradation of intravenously injected ¹²⁵I-labeled albumin in mouse liver and kidney slices.

Enhancement of nitro reduction in rat liver microsomes by haemin and haemoproteins.

Preservation of rat liver tissue by endodontic therapeutic agents.

Activation of the external pathway of NADH oxidation in liver mitochondria of cold-adapted rats.

Differences in metabolism of vinylidene chloride between mice and rats.

The extent of mitochondrial F₁-ATPase and adenine nucleotide carrier activity with epsilon-ATP.

Potentialiation of toluene toxicity by hepatic enzyme inhibition in mice.

Bile secretion and liver cell heterogeneity in the rat.

Iodothyronine metabolism in rat liver homogenates.

Bioassay of picloram for possible carcinogenicity.

Bioassay of nitrofen for possible carcinogenicity.

Bioassay of trifluralin for possible carcinogenicity.

A sequential extraction method for RNA from rabbit liver.

The influence of phenobarbital, 3-methylcholanthrene and 2,3,7,8-tetrachlorodibenzo-p-dioxin on glutathione S-transferase activity of rat liver cytosol.

Time course of the induction of aryl hydrocarbon hydroxylase in rat liver nuclei and microsomes by phenobarbital, 3-methylcholanthrene, 2,3,7,8-tetrachloro-dibenzo-p-dioxin, dieldrin and other inducers.

Active transport of thiamine by freshly isolated rat hepatocytes.

The effect of repeated administration on allyl alcohol-induced hepatotoxicity in the rat [proceedings].

Evaluation of a finger prick blood collection method for the seroepidemiology of hepatitis B.

Increase of hepatic and serum aldehyde dehydrogenase activity after TCDD treatment.

Studies of soluble rat liver mitochondrial acid ATPases. II. Structural and immunological properties of ATPase 1.

3,3'-diaminobenzidine oxidation in hepatic and renal histological sections.

The in vitro metabolism of lindane by an enzyme preparation from chicken liver.

Exposure to pesticides and risk of Hodgkin lymphoma in an international consortium of agricultural cohorts (AGRICOH).

Atrazine promotes breast cancer development by suppressing immune function and upregulating MMP expression.

Parasite and Pesticide Impacts on the Bumblebee (*Bombus terrestris*) Haemolymph Proteome.

Effect of zinc supplementation on immunotoxicity induced by subchronic oral exposure to glyphosate-based herbicide (GOBARA®) in Wistar rats.

Intracellular Growth Inhibition and Host Immune Modulation of 3-Amino-1,2,4-triazole in Murine Brucellosis.

Glyphosate in house dust and risk of childhood acute lymphoblastic leukemia in California.

Fitness assessment of *Mytilus galloprovincialis* Lamarck, 1819 after exposure to herbicide metabolite propachlor ESA.

Calf thymus ds-DNA intercalation with pendimethalin herbicide at the surface of ZIF-8/Co/rGO/C(3)N(4)/ds-DNA/SPCE; A bio-sensing approach for pendimethalin quantification confirmed by molecular docking study.

The melting curves of calf thymus-DNA are buffer specific.

Shenqi formula delayed Alzheimer's disease-like symptoms by skn-1 pathway in *Caenorhabditis elegans*.

NOX1 is essential for TNF α -induced intestinal epithelial ROS secretion and inhibits M cell signatures.

Exposure to nonanoic acid alters small intestinal neuroendocrine tumor phenotype.

Pan msr gene deleted strain of *Salmonella Typhimurium* suffers oxidative stress, depicts macromolecular damage and attenuated virulence.

Effect of replacing inorganic iron with iron-rich microbial preparations on growth performance, serum parameters and iron metabolism of weaned piglets.

Transcriptome-wide profiling of acute stress induced changes in ribosome occupancy level using external standards.

Assessment of glyphosate and its metabolites' residue concentrations in cultured African Catfish offered for sale in selected markets in Ibadan, Oyo State, Nigeria.

Acute paraquat poisoning complicated by acute kidney injury and lung fibrosis: a case report from Nepal.

Co-administration of L-Ascorbic Acid and α -Tocopherol Alleviates Arsenic-Induced Immunotoxicities in the Thymus and Spleen by Dwindling Oxidative Stress-Induced Inflammation.

Prevention of DSS-induced colitis in mice with water kefir microbiota via anti-inflammatory and microbiota-balancing activity.

Effects of metamifop on ammonia production and metabolism of *Monopterus albus*.

Aggregation, Cytotoxicity and DNA Binding in a Series of Calix[4]arene Amphiphile Containing Aminotriazole Groups.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces multigenerational alterations in the expression of microRNA in the thymus through epigenetic modifications.

Effects of haloxyfop-p-methyl on the developmental toxicity, neurotoxicity, and immunotoxicity in zebrafish.

Pathogenic and Commensal Gut Bacteria Harboring Glycerol/Diol Dehydratase Metabolize Glycerol and Produce DNA-Reactive Acrolein.

Lycopene Ameliorate Atrazine-Induced Oxidative Damage in the B Cell Zone via Targeting the miR-27a-3p/Foxo1 Axis.

IL-6/STAT3/Foxo1 axis as a target of lycopene ameliorates the atrazine-induced thymic mitophagy and pyroptosis cross-talk.

Phenotypic analyses, protein localization, and bacteriostatic activity of *Drosophila melanogaster* transferrin-1.

Herbicide Roundup shows toxic effects in nontarget organism *Drosophila*.

Mass Spectrometry-Based Peptide Profiling of Haemolymph from *Pterostichus melas* Exposed to Pendimethalin Herbicide.

Protective effect of *Thymus munbyanus* aqueous extract against 2,4-dichlorophenoxyacetic acid-induced nephrotoxicity in Wistar rats.

Lycopene ameliorates atrazine-induced pyroptosis in spleen by suppressing the Ox-mtDNA/Nlrp3 inflammasome pathway.

Toxicity of commercial atrazine in *Rattus norvegicus* organs as a function of concentration: histopathological, ultrastructural and hematological evaluation.

Evaluation of the efficiency of simvastatin loaded PLGA nanoparticles against acute paraquat-intoxicated rats.

The potential risks of herbicide butachlor to immunotoxicity via induction of autophagy and apoptosis in the spleen.

Protective effect of cinnamaldehyde on channel catfish infected by drug-resistant *Aeromonas hydrophila*.

Homicidal paraquat poisoning: Poisoned while drinking.

The phytonutrient cinnamaldehyde limits intestinal inflammation and enteric parasite infection.

Peripheral tissular analysis of rapamycin's effect as a neuroprotective agent in vivo.

The effects of aerobic exercise training with octopamine supplementation on cardiomyocyte apoptosis induced by deep-frying oil: The role of caspase and procaspase 3.

Impact of mixtures of persistent organic pollutants on breast cancer aggressiveness.

Potential for TCDD to induce regulatory functions in B cells as part of the mechanism for T cell suppression in EAE.

Radiosynthesis and characterization of a carbon-11 PET tracer for receptor-interacting protein kinase 1.

Molecular characterization of the aryl hydrocarbon receptor 2 gene in black rockfish, *Sebastes schlegelii*, and its expression patterns upon exposure to benzo[a]pyrene, 2,3,7,8-tetrachlorodibenzo-p-dioxin, and β -naphthoflavone.

Acute Dyspnea and Hemoptysis in an 84-Year-Old Man With Multiple Comorbidities.

PCB126 induced toxic actions on liver energy metabolism is mediated by AhR in rats.

Suspected gut barrier disruptors and development of food allergy: Adjuvant effects and early immune responses.

A pilot evaluation on the toxicokinetics and bioaccumulation of polychlorinated naphthalenes in laying hens.

Effects of benzotriazole UV stabilizers, UV-PS and UV-P, on the differentiation of splenic regulatory T cells via aryl hydrocarbon receptor.

Glyphosate induces immune dysregulation in honey bees.

Hybridized 4-Trifluoromethyl-(1,2,3-triazol-1-yl)quinoline System: Synthesis, Photophysics, Selective DNA/HSA Bio-interactions and Molecular Docking.

TCDD Inhibition of IgG1 Production in Experimental Autoimmune Encephalomyelitis (EAE) and In Vitro.

5-Aminosalicylic Acid, A Weak Agonist for Aryl Hydrocarbon Receptor That Induces Splenic Regulatory T Cells.

Prolonged exposure to the herbicide atrazine suppresses immune cell functions by inducing spleen cell apoptosis in rats.

Toxic effects of atrazine on immune function in BALB/c mice.

Exposure to glyphosate and risk of non-Hodgkin lymphoma: an updated meta-analysis.

Atrazine-induced cell-mediated immunotoxicity in rabbits and the ameliorating role of glycyrrhizic acid.

Chronic ciprofloxacin and atrazine co-exposure aggravates locomotor and exploratory deficits in non-target detritivore speckled cockroach (*Nauphoeta cinerea*).

Effects of a mixture of glyphosate, 17 β -ethynylestradiol and amyl salicylate on cellular and biochemical parameters of the mussel *Mytilus galloprovincialis*.

Acetylcholinesterase (AChE) monoclonal antibody generation and validation for use as a biomarker of glyphosate-based herbicide exposure in commercial freshwater fish.

Evaluation of the potential teratogenic and toxic effect of the herbicide 2,4-D (DMA[®] 806) in bullfrog embryos and tadpoles (*Lithobates catesbeianus*).

The effect of chronic exposure to chloridazon and its degradation product chloridazon-desphenyl on signal crayfish *Pacifastacus leniusculus*.

Effects of chronic glyphosate exposure on antioxidative status, metabolism and immune response in tilapia (GIFT, *Oreochromis niloticus*).

Resveratrol: Isolation, and Its Nanostructured Lipid Carriers, Inhibits Cell Proliferation, Induces Cell Apoptosis in Certain Human Cell Lines Carcinoma and Exerts Protective Effect Against Paraquat-Induced Hepatotoxicity.

Essential oils and their components in combating fungal pathogens of animal and human skin.

Glyphosate inhibits melanization and increases susceptibility to infection in insects.

Protective Effects of Cinnamaldehyde on the Inflammatory Response, Oxidative Stress, and Apoptosis in Liver of *Salmonella typhimurium*-Challenged Mice.

Potential role of dietary chitosan nanoparticles against immunosuppression, inflammation, oxidative stress, and histopathological alterations induced by pendimethalin toxicity in Nile tilapia.

Exposure to pesticides and childhood leukemia risk: A systematic review and meta-analysis.

Staphylococcus aureus Peptide Methionine Sulfoxide Reductases Protect from Human Whole-Blood Killing.

The Ability of AhR Ligands to Attenuate Delayed Type Hypersensitivity Reaction Is Associated With Alterations in the Gut Microbiota.

[The Comparison of Iron Deficiency Anemia Rat Treated with Hydroxypropyl Chitosan Ferrous Ion Complex and Ferrous Sulfate].

[Aryl hydrocarbon receptor modulates airway inflammation in mice with cockroach allergen-induced asthma by regulating Th17/Treg differentiation].

The aryl hydrocarbon receptor suppresses immunity to oral squamous cell carcinoma through immune checkpoint regulation.

Role of aryl hydrocarbon receptor (AHR) in overall retinoid metabolism: Response comparisons to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure between wild-type and AHR knockout mice.

Influences of Selenium-Enriched Yeast on Growth Performance, Immune Function, and Antioxidant Capacity in Weaned Pigs Exposure to Oxidative Stress.

The antioxidant study proprieties of Thymus munbyanus aqueous extract and its beneficial effect on 2, 4-Dichlorophenoxyacetic acid -induced hepatic oxidative stress in albino Wistar rats.

AhR Ligands Differentially Regulate miRNA-132 Which Targets HMGB1 and to Control the Differentiation of Tregs and Th-17 Cells During Delayed-Type Hypersensitivity Response.

The relationship of indoxyl sulfate and p-cresyl sulfate with target cardiovascular proteins in hemodialysis patients.

Arsenite suppresses IL-2-dependent tumoricidal activities of natural killer cells.

TCDD attenuates EAE through induction of FasL on B cells and inhibition of IgG production.

Adverse effects of iron deficiency anemia on pregnancy outcome and offspring development and intervention of three iron supplements.

Biological Therapies for Atopic Dermatitis: A Systematic Review.

PCB cause global DNA hypomethylation of human peripheral blood monocytes in vitro.

Metagenomic and phytochemical analyses of kefir water and its subchronic toxicity study in BALB/c mice.

AGENT ORANGE-INDUCED Anaplastic Large-Cell Lymphoma (ALCL) with Cutaneous Involvement.

Dysregulation of murine immune functions on inhalational exposure to ammonia, dimethyl disulfide, 3-methylindole, or propionic acid.

Experimental acute arsenic toxicity in Balb/c mice: organic markers and splenic involvement.

2,3,7,8-Tetrachlorodibenzo-p-dioxin prompted differentiation to CD4(+)CD8(-)CD25(+) and CD4(+)CD8(+)CD25(+) Tregs and altered expression of immune-related genes in the thymus of chicken embryos.

Benfuresate induces developmental toxicity in zebrafish larvae by generating apoptosis and pathological modifications.

Ovarian mitochondrial and oxidative stress proteins are altered by glyphosate exposure in mice.

Depletion of NK cells attenuates paraquat-induced acute lung injury by manipulating macrophage polarization.

Exposure to glyphosate and risk of non-Hodgkin lymphoma and multiple myeloma: an updated meta-analysis.

A comprehensive analysis of the animal carcinogenicity data for glyphosate from chronic exposure rodent carcinogenicity studies.

Cinnamaldehyde Treatment of Prostate Cancer-Associated Fibroblasts Prevents Their Inhibitory Effect on T Cells Through Toll-Like Receptor 4.

Dicamba use and cancer incidence in the agricultural health study: an updated analysis.

Ingestion of organic acids and cinnamaldehyde improves tissue homeostasis of piglets exposed to enterotoxigenic *Escherichia coli* (ETEC).

Occupational Exposure to Pesticides and Chronic Lymphocytic Leukaemia in the MCC-Spain Study.

Eckol from *Ecklonia cava* Suppresses Immunoglobulin E-mediated Mast Cell Activation and Passive Cutaneous Anaphylaxis in Mice.

A murine model of *Staphylococcus aureus* infected chronic diabetic wound: A new tool to develop alternative therapeutics.

Prenatal pesticide exposure and childhood leukemia - A California statewide case-control study.

Parental occupational exposure to pesticides, animals and organic dust and risk of childhood leukemia and central nervous system tumors: Findings from the International Childhood Cancer Cohort Consortium (I4C).

Arsenic-induced immunomodulatory effects disorient the survival-death interface by stabilizing the Hsp90/Beclin1 interaction.

Characterization of a novel O-acetyl sialic acid specific lectin from the hemolymph of the marine crab, *Atergatis integerrimus* (Lamarck, 1818).

Tissue- and Region-Specific Accumulation of Arsenic Species, Especially in the Brain of Mice, After Long-term Arsenite Exposure in Drinking Water.

The in Vitro Antiplasmodial and Antiproliferative Activity of New Ferrocene-Based β -Aminocresols Targeting Hemozoin Inhibition and DNA Interaction.

How the AHR Became Important in Intestinal Homeostasis-A Diurnal FICZ/AHR/CYP1A1 Feedback Controls Both Immunity and Immunopathology.

Chronic arsenic exposure induces the time-dependent modulation of inflammation and immunosuppression in spleen.

Sarcoidosis: Causes, Diagnosis, Clinical Features, and Treatments.

Glycyrrhizic acid modulates the atrazine-induced apoptosis in rabbit spleen.

Atrazine induces necroptosis by miR-181-5p targeting inflammation and glycometabolism in carp lymphocytes.

Glyphosate use and associations with non-Hodgkin lymphoma major histological sub-types: findings from the North American Pooled Project.

Identification of signal pathways for immunotoxicity in the spleen of common carp exposed to chlorpyrifos.

Ecotoxicological hazard of a mixture of glyphosate and aminomethylphosphonic acid to the mussel *Mytilus galloprovincialis* (Lamarck 1819).

Cellular, humoral and molecular responses in rainbow trout (*Oncorhynchus mykiss*) exposed to a herbicide and subsequently infected with infectious hematopoietic necrosis virus.

Lymphocyte and its CD4+ and CD8+ subgroup changes after paraquat poisoning.

Acute exposure to chlorpyrifos and glyphosate induces changes in hemolymph biochemical parameters in the crayfish, *Astacus leptodactylus* (Eschscholtz, 1823).

Glyphosate induces benign monoclonal gammopathy and promotes multiple myeloma progression in mice.

Evaluating sub-lethal stress from Roundup(®) exposure in *Artemia franciscana* using (1)H NMR and GC-MS.

Glyphosate affects haemocyte parameters in the clam *Ruditapes philippinarum*.

Long-term Immunotoxic Effects of Oral Prenatal and Neonatal Atrazine Exposure.

Combined effect of conventional antimicrobials with essential oils and their main components against resistant *Streptococcus suis* strains.

Dioxin-like (DL-) polychlorinated biphenyls induced immunotoxicity through apoptosis in mice splenocytes via the AhR mediated mitochondria dependent signaling pathways.

Expression and Functional Analysis of Hepcidin from Mandarin Fish (*Siniperca chuatsi*).

Associations between persistent organic pollutants and risk of breast cancer metastasis.

Magnetic nanoparticles-loaded liposomes as a novel treatment agent for iron deficiency anemia: In vivo study.

Pesticide use and risk of non-Hodgkin lymphoid malignancies in agricultural cohorts from France, Norway and the USA: a pooled analysis from the AGRICOH consortium.

Incidence and mortality trends and geographic patterns of follicular lymphoma in Canada.

Iron bioavailability of four iron sources used to fortify infant cereals, using anemic weaning pigs as a model.

Genome-Wide Transcriptional Analysis Reveals Novel AhR Targets That Regulate Dendritic Cell Function during Influenza A Virus Infection.

RYR1 Sequence Variants in Myopathies: Expression and Functional Studies in Two Families.

Targeted deletion of the aryl hydrocarbon receptor in dendritic cells prevents thymic atrophy in response to dioxin.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces peripheral blood abnormalities and plasma cell neoplasms resembling multiple myeloma in mice.

AhR Activation by TCDD (2,3,7,8-Tetrachlorodibenzo-p-dioxin) Attenuates Pertussis Toxin-Induced Inflammatory Responses by Differential Regulation of Tregs and Th17 Cells Through Specific Targeting by microRNA.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced aryl hydrocarbon receptor activation enhanced the suppressive function of mesenchymal stem cells against splenocyte proliferation.

Synthesis and preclinical evaluation of the CRTH2 antagonist [(11)C]MK-7246 as a novel PET tracer and potential surrogate marker for pancreatic beta-cell mass.

Radiosynthesis and in vivo evaluation of (11)C-labeled BMS-193885 and its desmethyl analog as PET tracers for neuropeptide Y1 receptors.

Ameliorative effect of gallic acid on sodium arsenite-induced spleno-, cardio- and hemato-toxicity in rats.

Apigenin reverses lung injury and immunotoxicity in paraquat-treated mice.

Effects of aminomethylphosphonic acid, the main breakdown product of glyphosate, on cellular and biochemical parameters of the mussel *Mytilus galloprovincialis*.

Atrazine Exposure Influences Immunity in the Blue Dasher Dragonfly, *Pachydiplax longipennis* (Odonata: Libellulidae).

Atrazine promotes immunomodulation by melanomacrophage centre alterations in spleen and vascular disorders in gills from *Oreochromis niloticus*.

Alachlor Use and Cancer Incidence in the Agricultural Health Study: An Updated Analysis.

Biochemical and histological effects of sub-chronic exposure to atrazine in crayfish *Cherax destructor*.

Influences of *Chlorella vulgaris* dietary supplementation on growth performance, hematology, immune response and disease resistance in *Oreochromis niloticus* exposed to sub-lethal concentrations of penoxsulam herbicide.

The impact of Agent Orange exposure on prognosis and management in patients with chronic lymphocytic leukemia: a National Veteran Affairs Tumor Registry Study.

Effects of atrazine on vitellogenesis, steroid levels and lipid peroxidation, in female red swamp crayfish *Procambarus clarkii*.

Acrolein-induced oxidative stress and genotoxicity in rats: protective effects of whey protein and conjugated linoleic acid.

Paraquat treatment modulates integrin associated protein (CD47) and basigin (CD147) expression and mitochondrial potential on erythroid cells in mice.

Ecotoxicological risk assessment for the herbicide glyphosate to non-target aquatic species: A case study with the mussel *Mytilus galloprovincialis*.

Commercial AHAS-inhibiting herbicides are promising drug leads for the treatment of human fungal pathogenic infections.

Glyphosate Use and Cancer Incidence in the Agricultural Health Study.

Immunomodulatory and therapeutic role of *Cinnamomum verum* extracts in collagen-induced arthritic BALB/c mice.

Anti-inflammatory effect of cinnamaldehyde and linalool from the leaf essential oil of *Cinnamomum osmophloeum* Kanehira in endotoxin-induced mice.

Inhibition of HSV-2 infection by pure compounds from *Thymus capitatus* extract in vitro.

Quercetin modulates iron homeostasis and iNOS expression of splenic macrophages in a rat model of iron deficiency anemia.

Mining a KrÄhnke Pyridine Library for Anti-Arenavirus Activity.

Comparative roles of *clpA* and *clpB* in the survival of *S. Typhimurium* under stress and virulence in poultry.

Probiotic/prebiotic correction for adverse effects of iron fortification on intestinal resistance to *Salmonella* infection in weaning mice.

Exploration of intermolecular interaction of calf thymus DNA with sulfosulfuron using multi-spectroscopic and molecular docking techniques.

The effect of prenatal exposure on disposition of hexachloronaphthalene in female Wistar rats and fetal compartment.

Behavioral response and dynamics of *Eisenia fetida* hemocytes exposed to environmentally relevant concentration of sulfentrazone.

Lymphocyte-Specific Protein Tyrosine Kinase (LCK) is Involved in the Aryl Hydrocarbon Receptor-Mediated Impairment of Immunoglobulin Secretion in Human Primary B Cells.

Roles of dietary supplementation with arginine or N-carbamylglutamate in modulating the inflammation, antioxidant property, and mRNA expression of antioxidant-relative signaling molecules in the spleen of rats under oxidative stress.

Low dose exposure to HBCD, CB-153 or TCDD induces histopathological and hormonal effects and changes in brain protein and gene expression in juvenile female BALB/c mice.

Effect of cytokinins on in vitro multiplication, volatiles composition and rosmarinic acid content of *Thymus leucotrichus* Hal. shoots.

Chemical sensing in development and function of intestinal lymphocytes.

Comparison of in vivo toxicity, antioxidant and immunomodulatory activities of coconut, niphah and pineapple juice vinegars.

The potential protective role of Akropower against Atrazine- induced humoral immunotoxicity in rabbits.

Lack of immunotoxic effects of repeated exposure to atrazine associated with the adaptation of adrenal gland activation.

Efficacy of *Spirulina platensis* diet supplements on disease resistance and immune-related gene expression in *Cyprinus carpio* L. exposed to herbicide atrazine.

The association of cancer risks with pentachlorophenol exposure: Focusing on community population in the areas along certain section of Yangtze River in China.

Enhancing miR-132 expression by aryl hydrocarbon receptor attenuates tumorigenesis associated with chronic colitis.

Recurrent anaemia in a patient with lymphocytic gastritis and vitamin B(12) deficiency.

Antimicrobial agents, triclosan, chloroxylenol, methylisothiazolinone and borax, used in cleaning had genotoxic and histopathologic effects on rainbow trout.

KML001 and doxercalciferol induce synergistic antileukemic effect in acute lymphoid leukemia cells.

Direct participation of DNA in the formation of singlet oxygen and base damage under UVA irradiation.

The decreased growth performance and impaired immune function and structural integrity by dietary iron deficiency or excess are associated with TOR, NF- κ B, p38MAPK, Nrf2 and MLCK signaling in head kidney, spleen and skin of grass carp (*Ctenopharyngodon idella*).

NAD(+) loss, a new player in AhR biology: prevention of thymus atrophy and hepatosteatosis by NAD(+) repletion.

Fecal metagenomic profiles in subgroups of patients with myalgic encephalomyelitis/chronic fatigue syndrome.

Amelioration of arsenic-induced toxic effects in mice by dietary supplementation of *Syzygium cumini* leaf extract.

Dibenzo[def,p]chrysene transplacental carcinogenesis in wild-type, Cyp1b1 knockout, and CYP1B1 humanized mice.

Ion Imbalance Is Involved in the Mechanisms of Liver Oxidative Damage in Rats Exposed to Glyphosate.

Tissue breathing and topology of rats thymocytes surface under acute total \hat{I}^3 -irradiation.

Photophysicochemical, calf thymus DNA binding and in vitro photocytotoxicity properties of tetra-morpholinoethoxy-substituted phthalocyanines and their water-soluble quaternized derivatives.

Risk of lymphoma subtypes by occupational exposure in Southern Italy.

Aryl Hydrocarbon Receptor Activation Suppresses EBF1 and PAX5 and Impairs Human B Lymphopoiesis.

Arsenic exposure impels CD4 commitment in thymus and suppress T cell cytokine secretion by increasing regulatory T cells.

Toxicological characterisation of two novel selective aryl hydrocarbon receptor modulators in Sprague-Dawley rats.

New insights into the role of spermine in enhancing the antioxidant capacity of rat spleen and liver under oxidative stress.

Aryl hydrocarbon receptor activation by 2,3,7,8-tetrachlorodibenzo-p-dioxin impairs human B lymphopoiesis.

SILAC-based quantitative proteomic analysis reveals widespread molecular alterations in human skin keratinocytes upon chronic arsenic exposure.

The sublethal effects of (2,4-Dichlorophenoxy) acetic acid (2,4-D) on narrow-clawed crayfish (*Astacus leptodactylus* Eschscholtz, 1823).

Performance standard-based validation study for local lymph node assay: 5-bromo-2-deoxyuridine-flow cytometry method.

Effects of terbuthylazine-desethyl, a terbuthylazine degradation product, on red swamp crayfish (*Procambarus clarkii*).

Atrazine induces endoplasmic reticulum stress-mediated apoptosis of T lymphocytes via the caspase-8-dependent pathway.

[Experimental evaluation of the impact of low doses of the herbicide 2,4-D in drinking water on some indices of lipid and immune status].

Oral Exposure to Atrazine Induces Oxidative Stress and Calcium Homeostasis Disruption in Spleen of Mice.

Systematic review and meta-analysis of glyphosate exposure and risk of lymphohematopoietic cancers.

Skin diseases associated with Agent Orange and other organochlorine exposures.

Comparative toxicity of Paraquat herbicide and some plant extracts in *Lymnaea natalensis* snails.

Intra-laboratory study to determine the reproducibility of LLNA:BrdU-ELISA for the prediction of the skin sensitizing potential of chemicals.

Discovery of a novel anticancer agent with both anti-topoisomerase I and II activities in hepatocellular carcinoma SK-Hep-1 cells in vitro and in vivo: Cinnamomum verum component 2-methoxycinnamaldehyde.

Low dose cyclophosphamide: Mechanisms of T cell modulation.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) role in hematopoiesis and in hematologic diseases: A critical review.

Mortality risk among workers with exposure to dioxins.

Oral Toxicity of 2,4-Dinitroanisole in Rats.

TCDD modulation of gut microbiome correlated with liver and immune toxicity in streptozotocin (STZ)-induced hyperglycemic mice.

In utero and lactational dioxin exposure induces Sema3b and Sema3g gene expression in the developing mouse brain.

Effects of Fe-YM1504 on iron deficiency anemia in rats.

Aryl hydrocarbon receptor knockout rats are insensitive to the pathological effects of repeated oral exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Long-term arsenite exposure induces premature senescence in B cell lymphoma A20 cells.

Anti-tumoral effect of arsenic compound, sodium metaarsenite (KML001), in non-Hodgkin's lymphoma: an in vitro and in vivo study.

Chronic TCDD exposure results in the dysregulation of gene expression in splenic B-lymphocytes and in the impairments in T-cell and B-cell differentiation in mouse model.

Odorants specifically modulate chemotaxis and tissue retention of CD4+ T cells via cyclic adenosine monophosphate induction.

A simple standard technique for labyrinthectomy in the rat: A methodical communication with a detailed description of the surgical process.

Cobalt(III) complexes as potential anticancer agents: Physicochemical, structural, cytotoxic activity and DNA/protein interactions.

Risk Factors for Herpes Zoster Among Adults.

In vitro effect of 4-pentylphenol and 3-methyl-4-nitrophenol on murine splenic lymphocyte populations and cytokine/granzyme production.

Walnut Polyphenol Extract Attenuates Immunotoxicity Induced by 4-Pentylphenol and 3-methyl-4-nitrophenol in Murine Splenic Lymphocyte.

[STRUCTURE OF THE SPLEEN AT CHRONIC INTOXICATION OF THE ORGANISM BY SODIUM TETRABORATE AND AFTER INTOXICATION].

Nanopharmaceutical Approach for Enhanced Anti-cancer Activity of Betulinic Acid in Lung-cancer Treatment via Activation of PARP: Interaction with DNA as a Target: -Anti-cancer Potential of Nano-betulinic Acid in Lung Cancer.

Arsenite accumulation in the mouse eye.

Molecular characterization of heat-shock protein 90 gene and its expression in *Gobiocypris rarus* juveniles exposed to pentachlorophenol.

RETRACTED: Glyphosate herbicide induces genotoxic effect and physiological disturbances in *Bulinus truncatus* snails.

A Dose-Response Modeling Approach Shows That Effects From Mixture Exposure to the Skin Sensitizers Isoeugenol and Cinnamal Are in Line With Dose Addition and Not With Synergism.

Acute and subchronic toxic effects of atrazine and chlorpyrifos on common carp (*Cyprinus carpio* L.): Immunotoxicity assessments.

Agent Orange and long-term outcomes after radical prostatectomy.

Alteration in the cytokine levels and histopathological damage in common carp induced by glyphosate.

Soft tissue sarcoma, non-Hodgkin's lymphoma and chronic lymphocytic leukaemia in workers exposed to phenoxy herbicides: extended follow-up of a UK cohort.

Effects of atrazine and chlorpyrifos on oxidative stress-induced autophagy in the immune organs of common carp (*Cyprinus carpio* L.).

A critical review of the epidemiology of Agent Orange or 2,3,7,8-tetrachlorodibenzo-p-dioxin and lymphoid malignancies.

Further development of LLNA:DAE method as stand-alone skin-sensitization testing method and applied for evaluation of relative skin-sensitizing potency between chemicals.

UV and hydrogen peroxide treatment restores changes in innate immunity caused by exposure of fish to reuse water.

In vitro safety assessment of food ingredients in canine renal proximal tubule cells.

Effects of atrazine on the proliferation and cytotoxicity of murine lymphocytes with the use of carboxyfluorescein succinimidyl ester-based flow cytometric approaches.

Superantigen staphylococcal enterotoxin C1 mutant can reduce paraquat pulmonary fibrosis.

Transcription alteration of immunologic parameters and histopathological damage in common carp (*Cyprinus carpio* L.) caused by paraquat.

Cancer risks and long-term community-level exposure to pentachlorophenol in contaminated areas, China.

Antifungal Effect of Essential Oils against *Fusarium* Keratitis Isolates.

Simultaneous determination of cinnamaldehyde and its metabolite in rat tissues by gas chromatography-mass spectrometry.

Hexyl cinnamal: consideration of skin-sensitizing properties and suitability as a positive control.

Compound- and sex-specific effects on programming of energy and immune homeostasis in adult C57BL/6JxFVB mice after perinatal TCDD and PCB 153.

Residential Exposure to Pesticide During Childhood and Childhood Cancers: A Meta-Analysis.

Activation of the aryl hydrocarbon receptor during development enhances the pulmonary CD4+ T-cell response to viral infection.

Arsenic-induced dyslipidemia in male albino rats: comparison between trivalent and pentavalent inorganic arsenic in drinking water.

Sodium meta-arsenite prevents the development of autoimmune diabetes in NOD mice.

Developmental exposure to 2,3,7,8 tetrachlorodibenzo-p-dioxin attenuates later-life Notch1-mediated T cell development and leukemogenesis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin Delays Palatal Shelf Elevation and Suppresses Wnt5a and Lymphoid Enhancing-Binding Factor 1 Signaling in Developing Palate.

Simultaneous determination of phenoxyethanol and its major metabolite, phenoxyacetic acid, in rat biological matrices by LC-MS/MS with polarity switching: Application to ADME studies.

Activation of NRF2 pathway in spleen, thymus as well as peripheral blood mononuclear cells by acute arsenic exposure in mice.

Day-to-day variability of toxic events induced by organic compounds bound to size segregated atmospheric aerosol.

Protective effects of phyllanthus emblica leaf extract on sodium arsenite-mediated adverse effects in mice.

Reply to Koppe and Ten Tusscher's letter to the Editor concerning the use of human peripheral blood lymphocytes to determine relative effect potencies for dioxin like compounds.

Influence of titanium dioxide nanoparticles on 2,3,7,8-tetrachlorodibenzo-p-dioxin bioconcentration and toxicity in the marine fish European sea bass (*Dicentrarchus labrax*).

Glyphosate-rich air samples induce IL-33, TSLP and generate IL-13 dependent airway inflammation.

Carcinogenicity of metamifop, a novel herbicide, in Wistar rats following oral administration for 104 weeks.

Toxic effects of paraquat on cytokine expression in common carp, *Cyprinus carpio* L.

Pro- and anti-inflammatory cytokine expression in immune organs of the common carp exposed to atrazine and chlorpyrifos.

Elimination of young erythrocytes from blood circulation and altered erythropoietic patterns during paraquat induced anemic phase in mice.

Effects of glyphosate on growth rate, metabolic rate and energy reserves of early juvenile crayfish, *Cherax quadricarinatus* M.

Immunological effects of paraquat on common carp, *Cyprinus carpio* L.

Effect of a glyphosate-based herbicide on gene expressions of the cytokines interleukin-1 β and interleukin-10 and of heme oxygenase-1 in European sea bass, *Dicentrarchus labrax* L.

Effects of chlorophenoxy herbicides and their main transformation products on DNA damage and acetylcholinesterase activity.

The impact of Agent Orange exposure on presentation and prognosis of patients with chronic lymphocytic leukemia.

The pentachlorophenol metabolite tetrachlorohydroquinone induces massive ROS and prolonged p-ERK expression in splenocytes, leading to inhibition of apoptosis and necrotic cell death.

Melatonin Reverses Fas, E2F-1 and Endoplasmic Reticulum Stress Mediated Apoptosis and Dysregulation of Autophagy Induced by the Herbicide Atrazine in Murine Splenocytes.

Dietary essential oils improve the hepatic antioxidative status of broiler chickens.

Effect of iron supplementation on the expression of hypoxia-inducible factor and antioxidant status in rats exposed to high-altitude hypoxia environment.

A nanoparticulate ferritin-core mimetic is well taken up by HuTu 80 duodenal cells and its absorption in mice is regulated by body iron.

Sodium arsenite induces apoptosis and Epstein-Barr virus reactivation in lymphoblastoid cells.

Functional characterisation of the R2452W ryanodine receptor variant associated with malignant hyperthermia susceptibility.

Farm residence and lymphohematopoietic cancers in the Iowa Women's Health Study.

Ferroportin mediates the intestinal absorption of iron from a nanoparticulate ferritin core mimetic in mice.

Homoisoflavanone prevents mast cell activation and allergic responses by inhibition of Syk signaling pathway.

Impact of long-term exposure to sodium arsenite on cytogenetic radiation damage.

The NRF2-KEAP1 pathway is an early responsive gene network in arsenic exposed lymphoblastoid cells.

Functional characterization of 2 known ryanodine receptor mutations causing malignant hyperthermia.

Cross-talk between aryl hydrocarbon receptor and the inflammatory response: a role for nuclear factor- κ B.

Duodenal absorption and tissue utilization of dietary heme and nonheme iron differ in rats.

Epoxyalcohols: bioactivation and conjugation required for skin sensitization.

Differential relative effect potencies of some dioxin-like compounds in human peripheral blood lymphocytes and murine splenic cells.

Cytotoxic clerodane diterpenes from *Zuelania guidonia*.

Influence of zinc supplementation on histopathological changes in the stomach, liver, kidney, brain, pancreas and spleen during subchronic exposure of Wistar rats to glyphosate.

Accumulation, histopathological effects and response of biochemical markers in the spleens and head kidneys of common carp exposed to atrazine and chlorpyrifos.

The immunotoxic effects of dual exposure to PCP and TCDD.

The suppressor of cytokine signaling 2 (SOCS2) modulating the neurotransmitters release in *Eriocheir sinensis*.

Exposure to herbicides in house dust and risk of childhood acute lymphoblastic leukemia.

Effects of chemical and handling exposure on fatty acids, oxidative stress and morphological welfare indicators in gilt-head sea bream (*Sparus aurata*).

Impact of the redox-cycling herbicide diquat on transcript expression and antioxidant enzymatic activities of the freshwater snail *Lymnaea stagnalis*.

Immunotoxicity of atrazine in Balb/c mice.

Historical long-term exposure to pentachlorophenol causing risk of cancer--a community study.

Effects of atrazine and chlorpyrifos on the mRNA levels of HSP70 and HSC70 in the liver, brain, kidney and gill of common carp (*Cyprinus carpio* L.).

Oral exposure to the herbicide simazine induces mouse spleen immunotoxicity and immune cell apoptosis.

Evaluation of non-radioactive endpoints of ex vivo local lymph node assay-BrdU to investigate select contact sensitizers.

Use of biometric, hematologic, and plasma biochemical variables, and histopathology to assess the chronic effects of the herbicide prometryn on Common Carp.

Sub-acute exposure to the herbicide atrazine suppresses cell immune functions in adolescent mice.

Contact sensitizing potential of pyrogallol and 5-amino-o-cresol in female BALB/c mice.

Induction of thymic stromal lymphopoietin production by nonanoic acid and exacerbation of allergic inflammation in mice.

ITE, a novel endogenous nontoxic aryl hydrocarbon receptor ligand, efficiently suppresses EAU and T-cell-mediated immunity.

Relationships between in vitro lymphoproliferative responses and levels of contaminants in blood of free-ranging adult harbour seals (*Phoca vitulina*) from the North Sea.

Suppression of acute graft-versus-host response by TCDD is independent of the CTLA-4-IFN- γ -IDO pathway.

Arsenic induced toxicity and histopathological changes in gill and liver tissue of freshwater fish, tilapia (*Oreochromis mossambicus*).

Aryl hydrocarbon receptor activation affects the dendritic cell phenotype and function during allergic sensitization.

Indoxyl 3-sulfate stimulates Th17 differentiation enhancing phosphorylation of c-Src and STAT3 to worsen experimental autoimmune encephalomyelitis.

Aberrant pulmonary lymphatic development in the nitrofen mouse model of congenital diaphragmatic hernia.

The human Ah receptor: hints from dioxin toxicities to deregulated target genes and physiological functions.

The influence of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on hematological parameters during experimentally induced pleuritis in rats.

[Halitosis concomitant with chronic ENT pathology in children].

Sequence capture and massively parallel sequencing to detect mutations associated with malignant hyperthermia.

Vanadium toxicity in mice: possible impairment of lipid metabolism and mucosal epithelial cell necrosis in the small intestine.

Demonstration of ATP-dependent, transcellular transport of lipid across the lymphatic endothelium using an in vitro model of the lacteal.

Effect of selenomethionine supplementation in food on the excretion and toxicity of arsenic exposure in female mice.

The mortality and cancer experience of New Zealand Vietnam war veterans: a cohort study.

Dietary exposure of juvenile female mice to polyhalogenated seafood contaminants (HBCD, BDE-47, PCB-153, TCDD): comparative assessment of effects in potential target tissues.

Activation of aryl hydrocarbon receptor prolongs survival of fully mismatched cardiac allografts.

Determination of urinary 6-mercaptopurine and three of its metabolites by HPLC-UV coupled with the iodine-azide reaction.

Histopathological changes induced by paraquat on some tissues of gourami fish (*Trichogaster trichopterus*).

Treatment of mice with 2,3,7,8-Tetrachlorodibenzo-p-dioxin markedly increases the levels of a number of cytochrome P450 metabolites of omega-3 polyunsaturated fatty acids in the liver and lung.

A Systematic Review of Carcinogenic Outcomes and Potential Mechanisms from Exposure to 2,4-D and MCPA in the Environment.

Butachlor induced dissipation of mitochondrial membrane potential, oxidative DNA damage and necrosis in human peripheral blood mononuclear cells.

Immunotoxicity induced by acute subtoxic doses of paraquat herbicide: implication of shifting cytokine gene expression toward T-helper (T(H))-17 phenotype.

Methyl bromide exposure and cancer risk in the Agricultural Health Study.

Differential gene expression responses distinguish contact and respiratory sensitizers and nonsensitizing irritants in the local lymph node assay.

Schedule for rating disabilities; AL amyloidosis (primary amyloidosis). Final rule.

Developmental exposure to diuron causes splenotoxicity in male Sprague-Dawley rat pups.

Pesticide exposure in children.

Activation of the aryl hydrocarbon receptor reduces the number of precursor and effector T cells, but preserves thymic CD4+CD25+Foxp3+ regulatory T cells.

Repeated dose toxicity and relative potency of 1,2,3,4,6,7-hexachloronaphthalene (PCN 66) 1,2,3,5,6,7-hexachloronaphthalene (PCN 67) compared to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) for induction of CYP1A1, CYP1A2 and thymic atrophy in female Harlan Sprague-Dawley rats.

Tryptophan catabolism in cancer: beyond IDO and tryptophan depletion.

Arsenite-induced autophagy is associated with proteotoxicity in human lymphoblastoid cells.

Long-term toxicology and carcinogenicity of 2,4,6-trichlorophenol.

Eccrine porocarcinoma with carcinomatous lymphangitis in a patient with history of arsenic exposure: a case report.

Poly (lactide-co-glycolide) encapsulated extract of *Phytolacca decandra* demonstrates better intervention against induced lung adenocarcinoma in mice and on A549 cells.

Patch testing with the textile dyes Disperse Orange 1 and Disperse Yellow 3 and some of their potential metabolites, and simultaneous reactions to para-amino compounds.

A NUP98-HOXD13 leukemic fusion gene leads to impaired class switch recombination and antibody production.

FICZ, a tryptophan photoproduct, suppresses pulmonary eosinophilia and Th2-type cytokine production in a mouse model of ovalbumin-induced allergic asthma.

Non-dioxin-like AhR ligands in a mouse peanut allergy model.

A review of the role of lymphoma markers and occupational and environmental exposures.

Assessment of the sensitizing potential of textile disperse dyes and some of their metabolites by the loose-fit coculture-based sensitization assay (LCSA).

Prenatal exposure to TCDD triggers significant modulation of microRNA expression profile in the thymus that affects consequent gene expression.

Dihydroxy-isosteviol methyl ester of *Pulsatilla nigricans* extract reduces arsenic-induced DNA damage in testis cells of male mice: its toxicity, drug-DNA interaction and signaling cascades.

DNA binding studies of 3, 5, 6-trichloro-2-pyridinol pesticide metabolite.

Arsenic toxicity: a heart-breaking saga of a freshwater mollusc.

Lymphoma cells with increased anti-oxidant defenses acquire chemoresistance.

Protective effect of curcumin against arsenic-induced apoptosis in murine splenocytes in vitro.

Age-related effects of sodium arsenite on splenocyte proliferation and Th1/Th2 cytokine production.

The Aryl Hydrocarbon Receptor Influences Transplant Outcomes in Response to Environmental Signals.

Effects of deliberate ingestion of organophosphate or paraquat on brain stem auditory-evoked potentials.

Enhanced sensitization and elicitation responses caused by mixtures of common fragrance allergens.

Effects of glyphosate and polyoxyethylenamine on growth and energetic reserves in the freshwater crayfish *Cherax quadricarinatus* (Decapoda, Parastacidae).

Atrazine-induced apoptosis of splenocytes in BALB/C mice.

Effects of atrazine and chlorpyrifos on the mRNA levels of IL-1 and IFN- γ 2b in immune organs of common carp.

Diuron exposure induces systemic and organ-specific toxicity following acute and sub-chronic exposure in male Wistar rats.

Membrane-active antimicrobial peptides and human placental lysosomal extracts are highly active against mycobacteria.

Superoxide dismutase protects cells from DNA damage induced by trivalent methylated arsenicals.

Erythema multiforme major due to occupational exposure to the herbicides alachlor and butachlor.

The effects of Click 500 SC (terbuthylazine) on common carp *Cyprinus carpio* under (sub)chronic conditions.

Evaluation of suppressive effects of paraquat on innate immunity in Balb/c mice.

Effects of dietary supplementation with phytonutrients on vaccine-stimulated immunity against infection with *Eimeria tenella*.

Cinnamaldehyde enhances in vitro parameters of immunity and reduces in vivo infection against avian coccidiosis.

Measuring the penetration of a skin sensitizer and its delivery vehicles simultaneously with confocal Raman spectroscopy.

Construction, expression, and characterization of a single-chain variable fragment antibody against 2,4-dichlorophenoxyacetic acid in the hemolymph of silkworm larvae.

A single mid-gestation exposure to TCDD yields a postnatal autoimmune signature, differing by sex, in early geriatric C57BL/6 mice.

The possible roles of environmental factors and the aryl hydrocarbon receptor in the prevalence of thyroid diseases in Vietnam era veterans.

Activation of the aryl hydrocarbon receptor suppresses sensitization in a mouse peanut allergy model.

Effect of oral exposure to fenitrothion and 3-methyl-4-nitrophenol on splenic cell populations and histopathological alterations in spleen in Wistar rats.

Review of metastasizing (malignant) ameloblastoma (METAM): pattern of metastasis and treatment.

Heat shock protein 47 expression in oral squamous cell carcinomas and upregulated by arecoline in human oral epithelial cells.

Prenatal TCDD in mice increases adult autoimmunity.

Aryl hydrocarbon receptor activation by TCDD reduces inflammation associated with Crohn's disease.

Gene expression alterations in immune system pathways in the thymus after exposure to immunosuppressive chemicals.

Prenatal TCDD causes persistent modulation of the postnatal immune response, and exacerbates inflammatory disease, in 36-week-old lupus-like autoimmune SNF1 mice.

Resveratrol (3,5,4'-trihydroxystilbene) protects pregnant mother and fetus from the immunotoxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Activation of aryl hydrocarbon receptor (AhR) leads to reciprocal epigenetic regulation of FoxP3 and IL-17 expression and amelioration of experimental colitis.

Residential exposure to pesticides and childhood leukaemia: a systematic review and meta-analysis.

Functional Characterization of Hypertrehalosemic Hormone Receptor in Relation to Hemolymph Trehalose and to Oxidative Stress in the Cockroach *Blattella germanica*.

Stereoselective metabolism of fenoxaprop-ethyl and its chiral metabolite fenoxaprop in rabbits.

Developmental and posthatch effects of in ovo exposure to 2,3,7,8-TCDD, 2,3,4,7,8-PECDF, and 2,3,7,8-TCDF in Japanese quail (*Coturnix japonica*), common pheasant (*Phasianus colchicus*), and white leghorn chicken (*Gallus gallus domesticus*) embryos.

Sodium arsenite and hyperthermia modulate cisplatin-DNA damage responses and enhance platinum accumulation in murine metastatic ovarian cancer xenograft after hyperthermic intraperitoneal chemotherapy (HIPEC).

Hemocytes and humoral factors in silkworm blood are cooperatively involved in sheep erythrocyte aggregation.

Cigarette smoke increases susceptibility to tuberculosis--evidence from in vivo and in vitro models.

Dioxin toxicity, aryl hydrocarbon receptor signaling, and apoptosis-persistent pollutants affect programmed cell death.

Acute disruption of bone marrow hematopoiesis by benzo(a)pyrene is selectively reversed by aryl hydrocarbon receptor-mediated processes.

Changes in DNA methylation and gene expression during 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced suppression of the lipopolysaccharide-stimulated IgM response in splenocytes.

Polychlorinated dibenzo-p-dioxins and dibenzofurans in different tissues of the cormorants (*Phalacrocorax carbo*) from Dongting Lake, China.

NTP toxicity studies of toxicity studies of 2,4-decadienal (CAS No. 25152-84-5) administered by gavage to F344/N Rats and B6C3F1 mice.

Sodium arsenite mediated immuno-disruption through alteration of transcription profile of cytokines in chicken splenocytes under in vitro system.

Prior exposure to organophosphorus and organochlorine pesticides increases the allergic potential of environmental chemical allergens in a local lymph node assay.

Formation of deoxyguanosine cross-links from calf thymus DNA treated with acrolein and 4-hydroxy-2-nonenal.

Areas with high soil percolation by herbicides have higher incidence of low-grade non-Hodgkin lymphomas.

Desmoplastic small round-cell tumor: an adult with previous exposure to agent orange.

Immunotoxicity of paraquat after subacute exposure to mice.

[Thyroid disruption induced by pentachlorophenol].

Toxicokinetics and recovery studies of dicamba dimethyl amine salt in goats following single oral administration.

Arsenic trioxide and ascorbic acid demonstrate promising activity against primary human CLL cells in vitro.

Effects of strain differences and vehicles on results of local lymph node assays.

Therapeutic effects on murine oral candidiasis by oral administration of cassia (*Cinnamomum cassia*) preparation.

Interaction of paraquat with calf thymus DNA: a terbium(III) luminescent probe and multispectral study.

Toxicology and carcinogenesis studies of 3,3',4,4'-tetrachloroazobenzene (TCAB) (CAS No. 14047-09-7) in Harlan Sprague-Dawley rats and B6C3F1 mice (gavage studies).

[Establishment of an erythroleukemia model in CB6F1 mice by transplant with haploidentical mouse leukemic cell line FBL-3].

Lymphocyte-based determination of susceptibility to malignant hyperthermia: a pilot study in swine.

Anti-mutagenic and pro-apoptotic effects of apigenin on human chronic lymphocytic leukemia cells.

Aryl hydrocarbon receptor activation reduces dendritic cell function during influenza virus infection.

Functional properties of RYR1 mutations identified in Swedish patients with malignant hyperthermia and central core disease.

Identification of genes that are dispensable for animal infection by *Salmonella typhimurium*.

Toxicity of Bromkal 70-5DE, a technical mixture of polybrominated diphenyl ethers, following 28 d of oral exposure in rats and impact of analysed impurities.

Suppression of experimental autoimmune uveoretinitis by inducing differentiation of regulatory T cells via activation of aryl hydrocarbon receptor.

A hospital-based case-control study of non-Hodgkin lymphoid neoplasms in Shanghai: analysis of environmental and occupational risk factors by subtypes of the WHO classification.

Activation of the aryl hydrocarbon receptor pathway enhances cancer cell invasion by upregulating the MMP expression and is associated with poor prognosis in upper urinary tract urothelial cancer.

Perinatal exposure of mice to TCDD decreases allergic sensitisation through inhibition of IL-4 production rather than T regulatory cell-mediated suppression.

Abnormal regulation of chemokine TECK and its receptor CCR9 in the endometriotic milieu is involved in pathogenesis of endometriosis by way of enhancing invasiveness of endometrial stromal cells.

Microscopic magnetic resonance in congenital diaphragmatic hernia and associated malformations in rats.

High-protein/high red meat and high-carbohydrate weight-loss diets do not differ in their effect on faecal water genotoxicity tested by use of the WIL2-NS cell line and with other biomarkers of bowel health.

2,3,7,8-Tetrachlorodibenzo-p-dioxin impairs stable establishment of oral tolerance in mice.

Five monomeric hemocyanin subunits from *Portunus trituberculatus*: purification, spectroscopic characterization, and quantitative evaluation of phenol monooxygenase activity.

Discriminating between different acute chemical toxicities via changes in the daphnid metabolome.

Transcriptomic profile indicative of immunotoxic exposure: in vitro studies in peripheral blood mononuclear cells.

Acute toxicity of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) in male Sprague-Dawley rats: effects on hepatic oxidative stress, glutathione and metals status.

Outcomes after radical prostatectomy among men who are candidates for active surveillance: results from the SEARCH database.

Effects of in ovo exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin on hepatic AHR/ARNT-CYP1A signaling pathways in common cormorants (*Phalacrocorax carbo*).

Expression of aryl hydrocarbon receptor in human placentas and fetal tissues.

Low-dose synergistic immunosuppression of T-dependent antibody responses by polycyclic aromatic hydrocarbons and arsenic in C57BL/6J murine spleen cells.

The effect of multigenerational diet containing genetically modified triticale on immune system in mice.

[Immunotoxic effect of herbicide simazine exposure in BALB/c mice].

[Improvement of local lymph node assay for cosmetics safety evaluation].

Allergic reaction induced by dermal and/or respiratory exposure to low-dose phenoxyacetic acid, organophosphorus, and carbamate pesticides.

Occupational exposure to metribuzin and the incidence of cancer in the Agricultural Health Study.

Patterns of immunotoxicity associated with chronic as compared with acute exposure to chemical or physical stressors and their relevance with regard to the role of stress and with regard to immunotoxicity testing.

Occupational exposure to pesticides and lymphoid neoplasms among men: results of a French case-control study.

Heterocyclic aromatic amine pesticide use and human cancer risk: results from the U.S. Agricultural Health Study.

Effects of subchronic exposure to Successor 600 (pethoxamid 600 g L⁻¹) on common carp *Cyprinus carpio*.

A review: oxidative stress in fish induced by pesticides.

Systematic review and meta-analysis of mortality in crop protection product manufacturing workers.

Staphylococcal catalase regulates its virulence and induces arthritis in catalase deficient mice.

Lymphatic and portal vein absorption of organochlorine compounds in rats.

Effects of TCDD on spermatogenesis related factor-2 (SRF-2): gene expression in *Xenopus*.

Safety assessment of leaf curl virus resistant tomato developed using viral derived sequences.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin disrupts B-cell lymphopoiesis and exacerbates autoimmune disease in 24-week-old SNF1 mice.

Effects of chronic exposure to DDT and TCDD on disease activity in murine systemic lupus erythematosus.

Cancer incidence among pesticide applicators exposed to butylate in the Agricultural Health Study (AHS).

Developmental exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin alters postnatal T cell phenotypes and T cell function and exacerbates autoimmune lupus in 24-week-old SNF1 mice.

Cancer incidence in the population exposed to dioxin after the "Seveso accident": twenty years of follow-up.

Activation of aryl hydrocarbon receptor by TCDD prevents diabetes in NOD mice and increases Foxp3⁺ T cells in pancreatic lymph nodes.

Disruption of iron homeostasis and lung disease.

Residential exposure to polychlorinated biphenyls and organochlorine pesticides and risk of childhood leukemia.

PCBs and the energy cost of migration in the European eel (*Anguilla anguilla* L.).

Neonatal exposure to low-dose 2,3,7,8-tetrachlorodibenzo-p-dioxin causes autoimmunity due to the disruption of T cell tolerance.

Possible involvement of arylhydrocarbon receptor variants in TCDD-induced thymic atrophy and XRE-dependent transcriptional activity in Wistar Hannover GALAS rats.

Functional characterization of ryanodine receptor (RYR1) sequence variants using a metabolic assay in immortalized B-lymphocytes.

Evaluation of irritancy and sensitization potential of metalworking fluid mixtures and components.

A new cross-talk between the aryl hydrocarbon receptor and RelB, a member of the NF-kappaB family.

Comparison of immunotoxicity among tetrachloro-, pentachloro-, tetrabromo- and pentabromo-dibenzo-p-dioxins in mice.

Children's immunology, what can we learn from animal studies (3): Impaired mucosal immunity in the gut by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): a possible role for allergic sensitization.

Ferric carboxymaltose: a review of its use in iron-deficiency anaemia.

Thyroid lesions in the great cormorant (*Phalacrocorax carbo*) of Niigata, central Japan: a possible association with dioxin accumulation.

Reduced arsenic clearance and increased toxicity in aquaglyceroporin-9-null mice.

Involvement of Blimp-1 and AP-1 dysregulation in the 2,3,7,8-Tetrachlorodibenzo-p-dioxin-mediated suppression of the IgM response by B cells.

Effects of prometryne on apoptosis and necrosis in thymus, lymph node and spleen in mice.

TCDD-mediated suppression of the in vitro anti-sheep erythrocyte IgM antibody forming cell response is reversed by interferon-gamma.

Treatment of mice with the Ah receptor agonist and human carcinogen dioxin results in altered numbers and function of hematopoietic stem cells.

A comparative 90-day toxicity study of allyl acetate, allyl alcohol and acrolein.

A review of the immunotoxicity of the pesticide 3,4-dichloropropionanilide.

[Effect of Atrazine on the content of calcium and expression of calmodulin in splenocytes of mice].

Interlaboratory validation of 1% pluronic I92 surfactant as a suitable, aqueous vehicle for testing pesticide formulations using the murine local lymph node assay.

Combined repeated dose and reproductive/developmental toxicity screening test of the nitrophenolic herbicide dinoseb, 2-sec-butyl-4,6-dinitrophenol, in rats.

Urinary corticosterone as an indicator of stress-mediated immunological changes in rats.

Contribution of the SitABCD, MntH, and FeoB metal transporters to the virulence of avian pathogenic *Escherichia coli* O78 strain chi7122.

Thyme and cinnamon extracts induce anion secretion in piglet small intestine via cholinergic pathways.

Development of a modified in vitro skin absorption method to study the epidermal/dermal disposition of a contact allergen in human skin.

Characterization of adducts formed in reactions of acrolein with thymidine and calf thymus DNA.

Abnormal liver development and resistance to 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity in mice carrying a mutation in the DNA-binding domain of the aryl hydrocarbon receptor.

Perinatal TCDD exposure and the adult onset of autoimmune disease.

An enhanced postnatal autoimmune profile in 24 week-old C57BL/6 mice developmentally exposed to TCDD.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on heme oxygenase-1, biliverdin IXalpha reductase and delta-aminolevulinic acid synthetase 1 in rats with wild-type or variant AH receptor.

Protective effects of GH and IGF-I against iron-induced lipid peroxidation in vivo.

Fibronectin promotes cell proliferation of human pre-B cell line via its interactions with VLA-4 and VLA-5.

Evaluation of tumour promoting potency of fish borne toxaphene residues, as compared to technical toxaphene and UV-irradiated toxaphene.

Arsenic interferes with the signaling transduction pathway of T cell receptor activation by increasing basal and induced phosphorylation of Lck and Fyn in spleen cells.

Mid-gestation exposure of C57BL/6 mice to 2,3,7,8-tetrachlorodibenzo-p-dioxin causes postnatal morphologic changes in the spleen and liver.

Occupational risk factors for non-Hodgkin's lymphoma: a population-based case-control study in Northern Germany.

Mortality in a population exposed to dioxin after the Seveso, Italy, accident in 1976: 25 years of follow-up.

Relative potency based on hepatic enzyme induction predicts immunosuppressive effects of a mixture of PCDDS/PCDFS and PCBS.

The aryl hydrocarbon receptor affects distinct tissue compartments during ontogeny of the immune system.

TCDD exposure exacerbates atopic dermatitis-related inflammation in NC/Nga mice.

Identification and biochemical characterization of a novel ryanodine receptor gene mutation associated with malignant hyperthermia.

Arsenite-induced thymus atrophy is mediated by cell cycle arrest: a characteristic downregulation of E2F-related genes revealed by a microarray approach.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin administration and high-fat diet on the body weight and hepatic estrogen metabolism in female C3H/HeN mice.

[Gene cloning, sequence analysis and tissue expression of estrogen-related receptor alpha (Erralpha) in Japanese medaka and its transcriptional responses after differential EDCs exposure].

2,3,7,8-Tetrachlorodibenzo-p-dioxin-mediated impairment of B cell differentiation involves dysregulation of paired box 5 (Pax5) isoform, Pax5a.

Mdm2 as a sensitive and mechanistically informative marker for genotoxicity induced by benzo[a]pyrene and dibenzo[a,l]pyrene.

Determination of toxicity of subacute treatment of some plant growth regulators on rats.

Nucleobase-dependent reactivity of a quinone metabolite of pentachlorophenol.

Combined effects of herbicides on biomarkers reflecting immune-endocrine interactions in goldfish. Immune and antioxidant effects.

Cancer incidence and mortality in a New Zealand community potentially exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin from 2,4,5-trichlorophenoxyacetic acid manufacture.

A fluorescence-based screening assay for DNA damage induced by genotoxic industrial chemicals.

The HcaR regulatory protein of *Photobacterium luminescens* affects the production of proteins involved in oxidative stress and toxemia.

The skin sensitization potential of resorcinol: experience with the local lymph node assay.

Adipokinetic hormone-induced enhancement of antioxidant capacity of *Pyrrhocoris apterus* hemolymph in response to oxidative stress.

20-Hydroxyecdysone prevents oxidative stress damage in adult *Pyrrhocoris apterus*.

Is the titer of adipokinetic peptides in *Leptinotarsa decemlineata* fed on genetically modified potatoes increased by oxidative stress?

Household exposure to pesticides and risk of childhood hematopoietic malignancies: The ESCALE study (SFCE).

The aryl hydrocarbon receptor is required for optimal resistance to *Listeria monocytogenes* infection in mice.

Pathogenesis of aryl hydrocarbon receptor-mediated development of lymphoma is associated with increased cyclooxygenase-2 expression.

Oral sodium chlorate, topical disinfection, and younger weaning age reduce *Salmonella enterica* shedding in pigs.

Experimental investigation of the role of endothelin-1 in idiopathic portal hypertension.

Zinc supplementation of pregnant rats with adequate zinc nutrition suppresses immune functions in their offspring.

Effects of various pesticides on human 5alpha-reductase activity in prostate and LNCaP cells.

Internal dose-effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in gonadotropin-primed weanling rat model.

Uncoupling of oxidative phosphorylation enables *Candida albicans* to resist killing by phagocytes and persist in tissue.

Role of dioxin response element and nuclear factor-kappaB motifs in 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated regulation of Fas and Fas ligand expression.

ATF4-dependent oxidative induction of the DNA repair enzyme Ape1 counteracts arsenite cytotoxicity and suppresses arsenite-mediated mutagenesis.

Identification of phenolic dermal sensitizers in a wound closure tape.

Aryl hydrocarbon receptor splice variants in the dioxin-resistant rat: tissue expression and transactivational activity.

SCL-GFP transgenic zebrafish: in vivo imaging of blood and endothelial development and identification of the initial site of definitive hematopoiesis.

Concentration and distribution of dioxins and related compounds in human tissues.

Laminin and a *Plasmodium* ookinete surface protein inhibit melanotic encapsulation of Sephadex beads in the hemocoel of mosquitoes.

Single high dose dexamethasone treatment decreases the pathological score and increases the survival rate of paraquat-intoxicated rats.

Introduction of cAMP and establishment of neutral lipids alterations as pollution biomarkers using the mussel *Mytilus galloprovincialis*. Correlation with a battery of biomarkers.

Evidence for a novel endocrine disruptor: the pesticide propanil requires the ovaries and steroid synthesis to enhance humoral immunity.

Cancer incidence among pesticide applicators exposed to cyanazine in the agricultural health study.

NTP Technical Report on the comparative toxicity studies of allyl acetate (CAS No. 591-87-7), allyl alcohol (CAS No. 107-18-6) and acrolein (CAS No. 107-02-8) administered by gavage to F344/N rats and B6C3F1 mice.

Evaluation of an ex vivo murine local lymph node assay: multiple endpoint comparison.

Immunomodulatory effects of maternal atrazine exposure on male Balb/c mice.

DNA damage and repair in haemolymph cells of golden mussel (*Limnoperna fortunei*) exposed to environmental contaminants.

Paternal occupational exposure to pesticides or herbicides as risk factors for cancer in children and young adults: a case-control study from the North of England.

Advantage of using CBA/N strain mice in a non-radioisotopic modification of the local lymph node assay.

Delayed occurrence of H-ras12V-induced hepatocellular carcinoma with long-term treatment with cinnamaldehydes.

Formation of acrolein adducts with 2'-deoxyadenosine in calf thymus DNA.

MicroRNA responses to cellular stress.

Coexistence of megaloblastic anemia and iron deficiency anemia in a young woman with chronic lymphocytic thyroiditis.

Exposure to non-arsenic pesticides is associated with lymphoma among farmers in Spain.

Cancer and pesticides: an overview and some results of the Italian multicenter case-control study on hematolymphopoietic malignancies.

The therapeutic effect of tissue cultured root of wild *Panax ginseng* C.A. Mayer on spermatogenic disorder.

Ah receptor: dioxin-mediated toxic responses as hints to deregulated physiologic functions.

Molluscicidal effect of fenitrothion and anilofos on *Lymnaea natalensis* and *Biomphalaria alexandrina* snails and on the free larval stages of *Schistosoma mansoni*.

The constitutively active Ah receptor (CA-Ahr) mouse as a potential model for dioxin exposure--effects in vital organs.

A potential endogenous ligand for the aryl hydrocarbon receptor has potent agonist activity in vitro and in vivo.

Evaluation of subchronic inhalation toxicity of dimethyl disulfide in rats.

The dioxin receptor is silenced by promoter hypermethylation in human acute lymphoblastic leukemia through inhibition of Sp1 binding.

Enhanced expression of plasma glutathione peroxidase in the thymus of mice treated with TCDD and its implication for TCDD-induced thymic atrophy.

Functional properties of ryanodine receptors carrying three amino acid substitutions identified in patients affected by multi-minicore disease and central core disease, expressed in immortalized lymphocytes.

A dose-response study of the effects of prenatal and lactational exposure to TCDD on the immune response to influenza a virus.

Synergism in immunotoxicological effects due to repeated combined administration of arsenic and lead in mice.

Lymphoid leukaemia in a saker falcon.

Genetic differences in lethality of newborn mice treated in utero with coplanar versus non-coplanar hexabromobiphenyl.

CXCL12 is displayed by rheumatoid endothelial cells through its basic amino-terminal motif on heparan sulfate proteoglycans.

Potential of apoptosis by heat stress plus pesticide exposure in stress resistant human B-lymphoma cells and its attenuation through interaction with follicular dendritic cells: role for c-Jun N-terminal kinase signaling.

De novo expression of MECA-79 glycoprotein-determinant on developing B lymphocytes in gut-associated lymphoid tissues.

A study of soluble HLA-G1 protecting porcine endothelial cells against human natural killer cell-mediated cytotoxicity.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on leukocyte function-associated antigen-1 mediated splenocyte adhesion.

Effects of 2,3,7,8-tetrachloro-dibenzo-p-dioxin on the extracellular matrix of the thymus in juvenile marmosets (*Callithrix jacchus*).

Toxicology and carcinogenesis studies of a mixture of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (Cas No. 1746-01-6), 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4), and 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) in female Harlan Sprague-Dawley rats (gavage studies).

Gene expression alterations in immune system pathways following exposure to immunosuppressive chemicals.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (gavage studies).

Case report: Hydroquinone and/or glutaraldehyde induced acute myeloid leukaemia?

PACAP receptor (PAC1-R) expression in rat and rhesus monkey thymus.

Systemic and myelotoxic effects of single administration of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats.

Pesticide mixtures, endocrine disruption, and amphibian declines: are we underestimating the impact?

Acute effects of 3,4-dichloroaniline on biomarkers and spleen histology of the common goby *Pomatoschistus microps*.

Sensitising potential of four textile dyes and some of their metabolites in a modified local lymph node assay.

Constitutive activation of the aryl hydrocarbon receptor in T-lineage cells induces thymus involution independently of the Fas/Fas ligand signaling pathway.

Negative association between serum dioxin level and oxidative DNA damage markers in municipal waste incinerator workers.

Organic Chemicals Adsorbed onto Diesel Exhaust Particles Directly Alter the Differentiation of Fetal Thymocytes Through Arylhydrocarbon Receptor but Not Oxidative Stress Responses.

Oxidation and methylation status determine the effects of arsenic on the mitotic apparatus.

Antioxidant and hepatoprotective effects of *Eucalyptus maculata*.

Effect of 2,4-dichlorophenoxyacetic acid on the activities of some metabolic enzymes for generating pyridine nucleotide pool of cells from mouse liver.

The polysaccharide antibody response after *Streptococcus pneumoniae* vaccination is differentially enhanced or suppressed by 3,4-dichloropropionanilide and 2,4-dichlorophenoxyacetic acid.

Immunotoxic effects of short-term atrazine exposure in young male C57BL/6 mice.

Oral exposure to atrazine modulates cell-mediated immune function and decreases host resistance to the B16F10 tumor model in female B6C3F1 mice.

Drug-induced hypersensitivity syndrome due to cyanamide associated with multiple reactivation of human herpesviruses.

Induction of cytotoxicity, aldehydic DNA lesions, and poly(ADP-ribose) polymerase-1 activation by catechol derivatives of pentachlorophenol in calf thymus DNA and in human breast cancer cells.

Characterization of thymic atrophy and the mechanism of thymocyte depletion after in vivo exposure to a mixture of herbicides.

Modeling and predicting stress-induced immunosuppression in mice using blood parameters.

Development of a method for quantification of acrolein-deoxyguanosine adducts in DNA using isotope dilution-capillary LC/MS/MS and its application to human brain tissue.

The epidemiology of non-Hodgkin lymphoma.

Synthesis and biodistribution of (11)C-GW7845, a positron-emitting agonist for peroxisome proliferator-activated receptor- γ .

Cutting edge: activation of the aryl hydrocarbon receptor by 2,3,7,8-tetrachlorodibenzo-p-dioxin generates a population of CD4⁺ CD25⁺ cells with characteristics of regulatory T cells.

NF- κ B and not the MAPK signaling pathway regulates GADD45 β expression during acute inflammation.

Common viral infection affects pentabrominated diphenyl ether (PBDE) distribution and metabolic and hormonal activities in mice.

[Mortality for non-Hodgkin lymphoma and soft-tissue sarcoma in the surrounding area of an urban waste incinerator. Campi Bisenzio (Tuscany, Italy) 1981-2001].

Recovery from iron deficiency in rats by the intake of recombinant yeast producing human H-ferritin.

Effects of PCB 126 on primary immune organs and thymocyte apoptosis in chicken embryos.

Gastric hamartomatous tumours in a transgenic mouse model expressing an activated dioxin/Ah receptor.

Aryl hydrocarbon receptor-dependent liver development and hepatotoxicity are mediated by different cell types.

How does human stem cell therapy influence gene expression after liver injury? Microarray evaluation on a rat model.

A cyclic adenosine 3',5'-monophosphate stimulates phospholipase C γ 1-calcium signaling via the activation of tyrosine kinase in boar spermatozoa.

The development of a physiologically-based pharmacokinetic model using the distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the tissues of the eastern oyster (*Crassostrea virginica*).

Human cordonal stem cell intraperitoneal injection can represent a rescue therapy after an acute hepatic damage in immunocompetent rats.

Localization and differential activity of P-glycoprotein in the bovine olfactory and nasal respiratory mucosae.

Tetrachlorodibenzo-p-Dioxin (TCDD) Inhibits Differentiation and Increases Apoptotic Cell Death of Precursor T-Cells in the Fetal Mouse Thymus.

3D molecular modeling, free radical modulating and immune cells signaling activities of the novel peptidomimetic L-glutamyl-histamine: possible immunostimulating role.

Constitutively active aryl hydrocarbon receptor expressed specifically in T-lineage cells causes thymus involution and suppresses the immunization-induced increase in splenocytes.

A carbohydrate fraction, AIP1, from *Artemisia iwayomogi* down-regulates Fas gene expression and suppresses apoptotic death of the thymocytes induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Photodecomposition of retinyl palmitate in ethanol by UVA light-formation of photodecomposition products, reactive oxygen species, and lipid peroxides.

Differential signatures of protein expression in marmoset liver and thymus induced by single-dose TCDD treatment.

[Dioxin, poisoning information or brainwashing? On Seveso's and Yushchenko's acne].

2,3,7,8-tetrachlorodibenzo-p-dioxin enhances negative selection of T cells in the thymus but allows autoreactive T cells to escape deletion and migrate to the periphery.

Field and semifield evaluation of impacts of transgenic canola pollen on survival and development of worker honey bees.

Chlorpropham-induced splenotoxicity and its recovery in rats.

[Use of peptide bioregulators in intoxication with the herbicide 2,4-dichlorophenoxyacetic acid].

Protein binding and metabolism influence the relative skin sensitization potential of cinnamic compounds.

Genotoxicity evaluation of pesticide formulations containing alachlor and atrazine in multiple mouse tissues (blood, kidney, liver, bone marrow, spleen) by comet assay.

Effects of environmental concentrations of atrazine on hemocyte density and phagocytic activity in the pond snail *Lymnaea stagnalis* (Gastropoda, Pulmonata).

Vanin-1^{-/-} mice exhibit a glutathione-mediated tissue resistance to oxidative stress.

Cancer incidence among pesticide applicators exposed to alachlor in the Agricultural Health Study.

Evaluation of relative potencies of PCB126 and PCB169 for the immunotoxicities in ovalbumin (OVA)-immunized mice.

Microarray analysis of gene regulation in the Hepa1c1c7 cell line following exposure to the DNA methylation inhibitor 5-aza-2'-deoxycytidine and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Protective effects of vitamin A and vitamin E succinate against 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced body wasting, hepatomegaly, thymic atrophy, production of reactive oxygen species and DNA damage in C57BL/6J mice.

Arsenic-induced alterations in the contact hypersensitivity response in Balb/c mice.

Cyp1a1^(-/-) male mice: protection against high-dose TCDD-induced lethality and wasting syndrome, and resistance to intrahepatocyte lipid accumulation and uroporphyrinuria.

Agricultural pesticide use, familial cancer, and risk of non-Hodgkin lymphoma.

Persistent suppression of contact hypersensitivity, and altered T-cell parameters in F344 rats exposed perinatally to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

In vitro DNA damage by arsenic compounds in a human lymphoblastoid cell line (TK6) assessed by the alkaline Comet assay.

Geldanamycin and herbimycin A induce apoptotic killing of B chronic lymphocytic leukemia cells and augment the cells' sensitivity to cytotoxic drugs.

Activation of the aryl hydrocarbon receptor diminishes the memory response to homotypic influenza virus infection but does not impair host resistance.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on maternal immune response during pregnancy.

The transepithelial voltage of the isolated anterior stomach of mosquito larvae (*Aedes aegypti*): pharmacological characterization of the serotonin-stimulated cells.

Developmental exposure to the potent aryl hydrocarbon receptor agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin Impairs the cell-mediated immune response to infection with influenza A virus, but enhances elements of innate immunity.

Enzyme-linked immunosorbent assay for monitoring toxic dioxin congeners in milk based on a newly generated monoclonal anti-dioxin antibody.

CYP1A2 is not required for 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immunosuppression.

Quantitative analysis of cresol and its metabolites in biological materials and distribution in rats after oral administration.

Combined screening of thymocytes using apoptosis-specific cDNA array and promoter analysis yields novel gene targets mediating TCDD-induced toxicity.

Evidence for induction of apoptosis in T cells from murine fetal thymus following perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Modeling and predicting immunological effects of chemical stressors: characterization of a quantitative biomarker for immunological changes caused by atrazine and ethanol.

Assessment of statistic analysis in non-radioisotopic local lymph node assay (non-RI-LLNA) with alpha-hexylcinnamic aldehyde as an example.

Immune alterations in mice exposed to the herbicide simazine.

[Correction of immunodeficiency status caused by herbicide 2,4-D in experiment].

Assessment of cumulative allergen-activated lymph node cell proliferation using flow cytometry.

Carcinogenicity of dimethylarsinic acid in p53 heterozygous knockout and wild-type C57BL/6J mice.

Link found between Agent Orange and chronic lymphocytic leukaemia.

[Glyphosate--a non-toxic pesticide?].

[Comparative analysis of disorders in duodenal lymphoid tissue of mice treated with azathioprine and herbicide 2,4-dichlorophenoxyacetic acid and their correction by plant and animal origin remedies].

Quantitation of aberrant interlocus T-cell receptor rearrangements in mouse thymocytes and the effect of the herbicide 2,4-dichlorophenoxyacetic acid.

Formation of acrolein-derived 2'-deoxyadenosine adduct in an iron-induced carcinogenesis model.

Tolerogenic role of Kupffer cells in allergic reactions.

T cell receptor transgenic mice provide novel insights into understanding cellular targets of TCDD: suppression of antibody production, but not the response of CD8(+) T cells, during infection with influenza virus.

Cell proliferation arrest within intrathymic lymphocyte progenitor cells causes thymic atrophy mediated by the aryl hydrocarbon receptor.

T cell-specific disruption of arylhydrocarbon receptor nuclear translocator (Arnt) gene causes resistance to 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced thymic involution.

2,3,7,8-tetrachlorodibenzo-p-dioxin selectively enhances spontaneous IgE production in B cells from atopic patients.

FLT3 expressing leukemias are selectively sensitive to inhibitors of the molecular chaperone heat shock protein 90 through destabilization of signal transduction-associated kinases.

Embryonic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in chickens: effects of dose and embryonic stage on hatchability and growth.

Dermal exposure to 3-amino-5-mercapto-1,2,4-triazole (AMT) induces sensitization and airway hyperreactivity in BALB/c mice.

Allergenicity evaluation of p-chloro-m-cresol and p-chloro-m-xylene by non-radioactive murine local lymph-node assay and multiple-dose guinea pig maximization test.

Examining the relationship between impaired host resistance and altered immune function in mice treated with TCDD.

Effects of agricultural pesticides on the immune system of *Rana pipiens* and on its resistance to parasitic infection.

Methylated metabolites of arsenic trioxide are more potent than arsenic trioxide as apoptotic but not differentiation inducers in leukemia and lymphoma cells.

Functional alterations in CD11b(+)Gr-1(+) cells in mice injected with allogeneic tumor cells and treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Dose-response analysis of short-term effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in three differentially susceptible rat lines.

Effect of lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin on the susceptibility to *Listeria* infection.

Resistance to 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity and abnormal liver development in mice carrying a mutation in the nuclear localization sequence of the aryl hydrocarbon receptor.

Evidence for a role of p38 kinase in hypoxia-inducible factor 1-independent induction of vascular endothelial growth factor expression by sodium arsenite.

Aryl hydrocarbon receptor (AhR) agonists suppress interleukin-6 expression by bone marrow stromal cells: an immunotoxicology study.

TCDD-induced apoptosis in EL-4 cells deficient of the aryl hydrocarbon receptor and down-regulation of IGFBP-6 prevented the apoptotic cell death.

Formation of DNA adducts in HL-60 cells treated with the toluene metabolite p-cresol: a potential biomarker for toluene exposure.

Chemiluminescence response of beta-glucan stimulated leukocytes isolated from different tissues and peritoneal cavity of *Dicentrarchus labrax*.

Effects of early embryonal exposure to dexamethasone on malformations of neural-crest derivatives induced by nitrofen in rats.

Effects of vitamin A on malformations of neural-crest-controlled organs induced by nitrofen in rats.

[Genotoxic effect of PCP and lindane on human epithelial tonsil cells].

Incidence of CTCL in Vietnam veterans.

Effects of paraquat on essential antioxidant elements in osteogenic disorder Shionogi rat.

Evaluation of a 15-day screening assay using intact male rats for identifying antiandrogens.

Chemokine-independent preference for T-helper-1 cells in transendothelial migration.

Immunologic effects of dioxin: new results from Seveso and comparison with other studies.

Bioavailability of caseinophosphopeptide-bound iron.

2,3,7,8-tetrachlorodibenzo-p-dioxin causes alterations in lymphocyte development and thymic atrophy in hemopoietic chimeras generated from mice deficient in ARNT2.

A study on behavioral, neurotoxicological, and immunotoxicological effects of subchronic arsenic treatment in rats.

The role of Akt and RAFTK in beta1 integrin mediated survival of precursor B-acute lymphoblastic leukemia cells.

FLT3 in human hematologic malignancies.

A constitutively active dioxin/aryl hydrocarbon receptor induces stomach tumors.

Workshop report. Children as a special subpopulation: focus on immunotoxicity. Federal Institute for Health Protection of Consumers and Veterinary Medicine (BgVV), 15-16 November 2001, Berlin, Germany.

Induction of endolymphatic hydrops by directly infused monoclonal antibody against type II collagen CB11 peptide.

Effect of arsenic, cadmium and lead on the induction of apoptosis of normal human mononuclear cells.

Differential activation of the c-Jun N-terminal kinase pathway in arsenite-induced apoptosis and sensitization of chemically resistant compared to susceptible B-lymphoma cell lines.

Angiopoietin-1 and VEGF in vascular development and angiogenesis in hypoplastic lungs.

Flavopiridol inhibits vascular endothelial growth factor production induced by hypoxia or picolinic acid in human neuroblastoma.

Structure-activity relationships and dose responses of polychlorinated dibenzo-p-dioxins for short-term effects in 2,3,7,8-tetrachlorodibenzo-p-dioxin-resistant and -sensitive rat strains.

Increased vascular endothelial growth factor peptide and gene expression in hypoplastic lung in nitrofen induced congenital diaphragmatic hernia in rats.

Proinflammatory and Th1 cytokine alterations following ultraviolet radiation enhancement of disease due to influenza infection in mice.

An autopsy case of poisoning by massive absorption of cresol a short time before death.

Up-regulated expression of genes encoding Hrk and IL-3R beta subunit by TCDD in vivo and in vitro.

Dioxin-induced adseverin expression in the mouse thymus is strictly regulated and dependent on the aryl hydrocarbon receptor.

Effects of reactive oxygen species on lymphokine-activated killer cells in patients with bladder cancer.

[Acute effects of methyl bromide gas in rats and mice--studies on survival time].

Obligatory requirement of sulfation for P-selectin binding to human salivary gland carcinoma Acc-M cells and breast carcinoma ZR-75-30 cells.

Association between chronic exposure to pesticides and recorded cases of human malignancy in Gaza Governorates (1990-1999).

Dioxin in infants--an environmental hazard?

Recent advances in understanding the mechanisms of TCDD immunotoxicity.

Mechanism of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced decrease in anti-CD3-activated CD4(+) T cells: the roles of apoptosis, Fas, and TNF.

Bioavailability of the isomer mixture of phytoene and phytofluene-rich alga *Dunaliella bardawil* in rat plasma and tissues.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces Fas-dependent activation-induced cell death in superantigen-primed T cells.

Reconstitution of functional human B lymphocytes in NOD/SCID mice engrafted with ex vivo expanded CD34(+) cord blood cells.

Recognition and phagocytosis of apoptotic T cells by resident murine tissue macrophages require multiple signal transduction events.

Thyroxine reversibly inhibits the uncoupling action of protonophores on energy production in rat thymus lymphocytes.

Dioxin stimulates synthesis and secretion of IgE-dependent histamine-releasing factor.

Understanding the congener-specific toxicity in polychlorinated dibenzo-p-dioxins: chlorination pattern and molecular quadrupole moment.

Ferritin induction protects cortical astrocytes from heme-mediated oxidative injury.

Subacute toxicity of anilofos, a new organophosphorus herbicide, in male rats: effect on some physical attributes and acetylcholinesterase activity.

The effect of exposure to a commercial 2,4-D formulation during gestation on the immune response in CD-1 mice.

The suitability of hexyl cinnamic aldehyde as a calibrant for the murine local lymph node assay.

Toxic effects of the herbicide 2,4-dichlorophenoxyacetic acid on lymphoid organs of the rat.

Effects of chlorpropham (CIPC) on the hemopoietic system of rats.

Dermal exposure to cinnamaldehyde alters lymphocyte subpopulations, number of interferon-gamma-producing cells, and expression of B7 costimulatory molecules and cytokine messenger RNAs in auricular lymph nodes of B6C3F1 mice.

Biodegradation and transfer of ingested 2,4-D herbicide by a polyphagous saturniid caterpillar.

Inhibitory effect of 2'-O-benzoylcinnamaldehyde on vascular endothelial cell proliferation and migration.

T-cell-based immunity counteracts the potential toxicity of glutamate in the central nervous system.

Persistent, low-dose 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure: effect on aryl hydrocarbon receptor expression in a dioxin-resistance model.

Contribution of Mn-cofactored superoxide dismutase (SodA) to the virulence of *Streptococcus agalactiae*.

Oral administration of collagen conjugated with cholera toxin induces tolerance to type II collagen and suppresses chondritis in an animal model of autoimmune ear disease.

Hepatic vitamin A depletion is a sensitive marker of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure in four rodent species.

Suppression of allergic immune responses to house dust mite (HDM) in rats exposed to 2,3,7,8-TCDD.

Protection of the Cyp1a2(-/-) null mouse against uroporphyrin and hepatic injury following exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Chronic toxicity of dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin to mink.

Neural crest-derived defects in experimental congenital diaphragmatic hernia.

Analysis of gene expression induced by irritant and sensitizing chemicals using oligonucleotide arrays.

Method for evaluation of immunotoxicity of dioxin compounds using human T-lymphoblastic cell line, L-MAT.

Disruption of the genes for ClpXP protease in *Salmonella enterica* serovar Typhimurium results in persistent infection in mice, and development of persistence requires endogenous gamma interferon and tumor necrosis factor alpha.

Toxicity of PCB-126 in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P4501A induction in several organ systems.

Acquired resistance to Ah receptor agonists in a population of Atlantic killifish (*Fundulus heteroclitus*) inhabiting a marine superfund site: in vivo and in vitro studies on the inducibility of xenobiotic metabolizing enzymes.

Capacity of mouse mast cells to prime T cells and to induce specific antibody responses in vivo.

Aryl hydrocarbon receptor signaling plays a significant role in mediating benzo[a]pyrene- and cigarette smoke condensate-induced cytogenetic damage in vivo.

Distribution spaces for hyaluronan and albumin in rat tail tendons.

Long-lived polyclonal B-cell lines derived from midgestation mouse embryo lymphohematopoietic progenitors reconstitute adult immunodeficient mice.

Toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds.

Enhanced activation-induced cell death as a mechanism of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced immunotoxicity in peripheral T cells.

Allergenicity testing of supermethrin, phenoxyacetic acid and DNCB using in vivo and in vitro modifications of the local lymph node assays, maximization and epicutaneous testing.

Polychlorinated biphenyls, polychlorinated dibenzo-p-dioxins, and polychlorinated dibenzofurans as endocrine disrupters--what we have learned from Yusho disease.

Effects of binary mixtures of six xenobiotics on hormone concentrations and morphometric endpoints of northern bobwhite quail (*Colinus virginianus*).

Induction of direct adducts, apurinic/apyrimidinic sites and oxidized bases in nuclear DNA of human HeLa S3 tumor cells by tetrachlorohydroquinone.

Oxidative damage and direct adducts in calf thymus DNA induced by the pentachlorophenol metabolites, tetrachlorohydroquinone and tetrachloro-1,4-benzoquinone.

Aryl hydrocarbon receptor-deficient mice generate normal immune responses to model antigens and are resistant to TCDD-induced immune suppression.

The use of dogs as second species in regulatory testing of pesticides. Part II: Subacute, subchronic and chronic studies in the dog.

2,3,7,8-Tetrachlorodibenzo-p-dioxin affects the number and function of murine splenic dendritic cells and their expression of accessory molecules.

Induction of cytochrome P450 1A1 gene expression, oxidative stress, and genotoxicity by carbaryl and thiabendazole in transfected human HepG2 and lymphoblastoid cells.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of different cytotoxins on cytochrome P450 mediated monooxygenase functions and on oxidative state.

Kinetics of monochloroacetic acid in adult male rats after intravenous injection of a subtoxic and a toxic dose.

Upregulation of angiotensin-converting enzyme by vascular endothelial growth factor.

In situ hybridization and immunohistochemical analysis of cytochrome P450 1B1 expression in human normal tissues.

Metabolism of ochratoxin A: absence of formation of genotoxic derivatives by human and rat enzymes.

Cytogenetic studies of three triazine herbicides. II. In vivo micronucleus studies in mouse bone marrow.

Modeling and predicting selected immunological effects of a chemical stressor (3,4-dichloropropionanilide) using the area under the corticosterone concentration versus time curve.

Arsenic species that cause release of iron from ferritin and generation of activated oxygen.

72-kDa stress protein (hsp72) induced by administration of dimethylarsinic acid to mice accumulates in alveolar flat cells of lung, a target organ for arsenic carcinogenesis.

Increase in production of ascorbate radical in tissues of rat treated with paraquat.

In vivo cytokine production and resistance to infection after acute exposure to 3,4-dichloropropionaniline.

Subchronic toxicity of chlorpropham (CIPC) in ICR mice.

Comparison of mouse strains using the local lymph node assay.

[A cluster of doubts].

[An evaluation of the effect of 2,4-dichlorophenoxyacetic acid derivatives on humoral and cellular immunities].

Ligation of the bronchial artery in sheep attenuates early pulmonary changes following exposure to smoke.

Detection of micronuclei in haemocytes of zebra mussel and great ramshorn snail exposed to pentachlorophenol.

Genetic variation of basal iron status, ferritin and iron regulatory protein in mice: potential for modulation of oxidative stress.

A new diquat derivative appropriate for colourimetric measurements of biological materials in the presence of paraquat.

[The ultrastructural changes in the cellular lining of lymph node sinuses in organochlorine pesticide poisoning].

Sensitivity of the SRBC PFC assay versus ELISA for detection of immunosuppression by TCDD and TCDD-like congeners.

The mercapturic acid biotransformation pathway of hexachlorobenzene is not involved in the induction of splenomegaly, or skin and lung lesions in the Brown Norway rat.

Lung hypoplasia in the nitrofen model of congenital diaphragmatic hernia occurs early in development.

The effects of perinatal exposure to low doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin on immune organs in rats.

Differential effects of diethylstilbestrol and 2,3,7,8-tetrachlorodibenzo-p-dioxin on thymocyte differentiation, proliferation, and apoptosis in bcl-2 transgenic mouse fetal thymus organ culture.

Fewer T lymphocytes and decreased pulmonary influenza virus burden in mice exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Redistribution of accumulated 2,3,7,8-tetrachlorodibenzo-p-dioxin during coxsackievirus B3 infection in the mouse.

Radial arm maze performance in rats following gestational and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Soft-tissue sarcoma and non-Hodgkin's lymphoma clusters around a municipal solid waste incinerator with high dioxin emission levels.

Quantitative analysis of tyrosinase transcripts in blood.

Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) suppresses the humoral and cell-mediated immune responses to influenza A virus without affecting cytolytic activity in the lung.

Mobilization of vitamin A stores in rats after administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin: a kinetic analysis.

Transfer factors: identification of conserved sequences in transfer factor molecules.

Non-carcinogenic effects of TCDD in animals.

[Epidemiology and geo-pathology of malignant lymphomas with special emphasis on Japanese lymphomas].

Effect of iron salts, haemosiderins, and chelating agents on the lymphocytes of a thalassaemia patient without chelation therapy as measured in the comet assay.

Linking environmental cancer with occupational epidemiology research: the role of the International Agency for Research on Cancer (IARC).

Sodium arsenite induces the stress response in the gut and decreases bacterial translocation in a burned mouse model with gut-derived sepsis.

Cytokine-inducing activity and antitumor effect of a liposome-incorporated interferon-gamma-inducing molecule derived from OK-432, a streptococcal preparation.

Effects of iron salts and haemosiderin from a thalassaemia patient on oxygen radical damage as measured in the comet assay.

Monomethylarsonic acid reductase and monomethylarsonous acid in hamster tissue.

Chronic toxicity of arsenic in goats: clinicobiochemical changes, pathomorphology and tissue residues.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of different cytotoxins on cytochrome P450 isoforms expression and on glycogen content.

Developmental and tissue-specific expression of AHR1, AHR2, and ARNT2 in dioxin-sensitive and -resistant populations of the marine fish *Fundulus heteroclitus*.

Toxicity of TCDD in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P450 1A induction in several organ systems.

Pathologic alterations in adult rainbow trout, *Oncorhynchus mykiss*, exposed to dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Pathological lesions in lambs fed raw or processed cottonseed meal.

Effects of VEGF on Ca(2+)-transient in cultured lymphatic endothelial cells and mechanical activity of isolated lymph vessels.

Pathological changes of hepatic artery and portal vein, after allyl-alcohol and carbon tetrachloride administration. An experimental study.

Cloning and functional characterization of the bile acid-sensitive methotrexate carrier from rat liver cells.

Oxidative stress in female B6C3F1 mice following acute and subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Hemopoietic progenitor cells are sensitive targets of 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57BL/6J mice.

TCDD induces CYP1A4 and CYP1A5 in chick liver and kidney and only CYP1A4, an enzyme lacking arachidonic acid epoxygenase activity, in myocardium and vascular endothelium.

Toxicology of environmental chemicals in the flounder (*Platichthys flesus*) with emphasis on the immune system: field, semi-field (mesocosm) and laboratory studies.

trans-Activation of PPARalpha and PPARgamma by structurally diverse environmental chemicals.

Fragrance and contact allergens in vitro modulate the HLA-DR and E-cadherin expression on human epidermal Langerhans cells.

Cigarette smoke induces direct DNA damage in the human B-lymphoid cell line Raji.

Glutathione antagonized cyclophosphamide- and acrolein-induced cytotoxicity of PC3 cells and immunosuppressive actions in mice.

Dioxin exposure and human leukemias and lymphomas. Lessons from the Seveso accident and studies on industrial workers.

Ethanol has differential effects on rat neuron and thymocyte reactive oxygen species levels and cell viability.

Thymocyte development in Ah-receptor-deficient mice is refractory to TCDD-inducible changes.

Effect of prenatal exposure to TCDD on the promotion of endometriotic lesion growth by TCDD in adult female rats and mice.

Effects of PCB 126 on primary immune organ development in chicken embryos.

Role of Fas-Fas ligand interactions in 2,3,7,8-tetrachlorodibenzo- p-dioxin (TCDD)-induced immunotoxicity: increased resistance of thymocytes from Fas-deficient (*lpr*) and Fas ligand-defective (*gld*) mice to TCDD-induced toxicity.

Effect of a single or repeated dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on T cell subpopulations in the Long-Evans rat.

Cyclic nucleotide phosphodiesterases (PDE) 3 and 4 in normal, malignant, and HTLV-I transformed human lymphocytes.

Long term substitution and specific immune responses after transfer of bovine peripheral blood lymphocytes into severe combined immunodeficient mice.

MHC-I-induced apoptosis in human B-lymphoma cells is dependent on protein tyrosine and serine/threonine kinases.

Effects of aging on resistance to *Trichinella spiralis* infection in rodents exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Small handbook of dioxin et alias].

Arsenic-related Bowen's disease, palmar keratosis, and skin cancer.

A monoclonal antibody reactive with a 40-kDa molecule on fetal thymocytes and tumor cells blocks proliferation and stimulates aggregation and apoptosis.

Differential toxicities of TCDD in vivo among normal, c-src knockout, geldanamycin- and quercetin-treated mice.

PUVA (8-methoxy-psoralen plus ultraviolet A) induces the formation of 8-hydroxy-2'-deoxyguanosine and DNA fragmentation in calf thymus DNA and human epidermoid carcinoma cells.

p27(Kip1) induction and inhibition of proliferation by the intracellular Ah receptor in developing thymus and hepatoma cells.

Persistent suppression of delayed-type hypersensitivity in adult F344 rats after perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Toxicity of 3,3',4,4'-tetrachloroazoxybenzene in rats and mice.

Toxicity of 3,3',4,4'-tetrachloroazobenzene in rats and mice.

Low levels of p53 are associated with resistance to tetrachlorodibenzo-p-dioxin toxicity in DBA/2 mice.

Ex vivo evaluation of a Taylor-Couette flow, immobilized heparinase I device for clinical application.

Cytochrome P450 CYP1B1 determines susceptibility to 7, 12-dimethylbenz[a]anthracene-induced lymphomas.

Novel phenotype associated with in vivo activated CTL precursors.

Cellular and molecular characterization of the scurfy mouse mutant.

Establishment of a double Philadelphia chromosome-positive acute lymphoblastic leukemia-derived cell line, TMD5: effects of cytokines and differentiation inducers on growth of the cells.

Effective treatment of murine leukemia with antisense poly-2'O-(2,4-dinitrophenyl)-oligoribonucleotides.

Hodgkin's disease, work, and the environment. A review.

Effects of phenolic antioxidants and flavonoids on DNA synthesis in rat liver, spleen, and testis in vitro.

Reversible alteration of morphology in an invertebrate erythrocyte: properties of the natural inducer and the cellular response.

Vascular endothelial growth factor activates MAP kinase and enhances collagen synthesis in human mesangial cells.

Bone marrow stromal cell cytochrome P4501B1 is required for pre-B cell apoptosis induced by 7,12-dimethylbenz[a]anthracene.

Molecular cloning and characterization of a hemolymph clottable protein from tiger shrimp (*Penaeus monodon*).

Polychlorinated biphenyl mixtures (Aroclors) inhibit LPS-induced murine splenocyte proliferation in vitro.

Role of glutathione and reactive oxygen intermediates in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immune suppression in C57Bl/6 mice.

VEGF stimulates tyrosine phosphorylation of beta-catenin and small-pore endothelial barrier dysfunction.

Identification and immunolocalization of two isoforms of ATP-diphosphohydrolase (ATPDase) in the pig immune system.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of various mitogens and cytotoxins on cytochrome P450 (P450) isoforms expression and on P450 mediated monooxygenase functions.

Cellular signalling and free-radical modulating activities of the novel peptidomimetic L-glutamyl-histamine.

Structural analysis of angiotensin IV receptor (AT4) from selected bovine tissues.

Sequences within fibrinogen and intercellular adhesion molecule-1 (ICAM-1) modulate signals required for mitogenesis.

Heparinase treatment of bovine smooth muscle cells inhibits fibroblast growth factor-2 binding to fibroblast growth factor receptor but not FGF-2 mediated cellular proliferation.

Ah receptor and NF-kappaB interactions, a potential mechanism for dioxin toxicity.

Chronic dietary toxicity study on 2,4-dichlorophenoxybutyric acid in the dog.

Incidence rates of lymphomas and environmental measurements of phenoxy herbicides: ecological analysis and case-control study.

Inhibitors of branched-chain amino acid biosynthesis as potential antituberculosis agents.

Lack of mammalian mutagenicity of the potent bacterial mutagen tris(2,3-dibromopropyl) phosphate and its metabolite 2-bromoacrolein.

Temporal stability of local lymph node assay responses to hexyl cinnamic aldehyde.

Exposure to Agent Orange and occurrence of soft-tissue sarcomas or non-Hodgkin lymphomas: an ongoing study in Vietnam.

[An Italian multicenter case-control study on malignant neoplasms of the hematolymphopoietic system. Hypothesis and preliminary results on work-related risks. WILL (Working Group on Hematolymphopoietic Malignancies in Italy)].

Effects of edifenphos and glyphosate on the immune response and protein biosynthesis of boliti fish (*Tilapia nilotica*).

Effect of 2,4-dichlorophenoxyacetic acid, trifluralin and triallate herbicides on immune function.

Effect of pentachlorophenol on immune function.

S-oxygenation of thiourea results in the formation of genotoxic products.

Molecular and functional characterization of *Salmonella enterica* serovar typhimurium *poxA* gene: effect on attenuation of virulence and protection.

The Ah receptor is not involved in 2,3,7,8-tetrachlorodibenzo- p-dioxin-mediated apoptosis in human leukemic T cell lines.

Benzo[a]pyrene enhances the formation of 8-hydroxy-2'-deoxyguanosine by ultraviolet A radiation in calf thymus DNA and human epidermoid carcinoma cells.

Use of model-based compartmental analysis to study effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on vitamin A kinetics in rats.

Overexpression of the anti-apoptotic oncogene, *bcl-2*, in the thymus does not prevent thymic atrophy induced by estradiol or 2,3,7, 8-tetrachlorodibenzo-p-dioxin.

Thymic alterations induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin are strictly dependent on aryl hydrocarbon receptor activation in hemopoietic cells.

The Seveso studies on early and long-term effects of dioxin exposure: a review.

Role of altered arachidonic acid metabolism in 2,3,7, 8-tetrachlorodibenzo-p-dioxin-induced immune suppression in C57Bl/6 mice.

Differential display of genes in normal and hypoplastic fetal murine lungs.

Characterization of the effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in B6C3F1 and DBA/2 mice following single and repeated exposures.

2,3,7,8-Tetrachlorodibenzo-p-dioxin co-stimulates staphylococcal enterotoxin beta (SEB) cytokine production and phenotypic cell cycling in Long-Evans rats.

Lipopolysaccharide activation of murine splenocytes and splenic B cells increased the expression of aryl hydrocarbon receptor and aryl hydrocarbon receptor nuclear translocator.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the lymphatic absorption of a single oral dose of [³H]retinol and on the intestinal retinol esterification in the rat.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazoxybenzene (CAS No. 21232-47-3) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazobenzene (CAS No. 14047-09-7) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induction of cytochrome P450-dependent arachidonic acid metabolism in mouse liver microsomes: evidence for species-specific differences in responses.

Murine local lymph node assay for predictive testing of allergenicity: two irritants caused significant proliferation.

Level of HgCl₂-mediated phosphorylation of intracellular proteins determines death of thymic T-lymphocytes with or without DNA fragmentation.

2,3,7,8-Tetrachlorodibenzo-p-dioxin in pregnant Long Evans rats: disposition to maternal and embryo/fetal tissues.

Effect of protein kinase inhibitors on primary antibody induction in tissue cultures.

Analysis of gene expression in lung and thymus of TCDD treated C57BL/6 mice using differential display RT-PCR.

Cytochrome P450 catalyzed oxidation of monochlorobenzene, 1,2- and 1,4-dichlorobenzene in rat, mouse, and human liver microsomes.

Enhanced oxidative stress and altered antioxidants in brains of Bcl-2-deficient mice.

Elucidation of the amino acid sequence of a crustacean hyperglycaemic hormone from the spiny lobster, *Jasus lalandii*.

Chemotaxis of chinese hamster ovary cells expressing the human neutrophil formyl peptide receptor: role of signal transduction molecules and alpha5beta1 integrin.

Ultrastructural apoptotic lesions induced in rat thymocytes after borax ingestion.

Female Sprague-Dawley rats exposed to a single oral dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin exhibit sustained depletion of aryl hydrocarbon receptor protein in liver, spleen, thymus, and lung.

2,3,7,8-Tetrachlorodibenzo-p-dioxin and diethylstilbestrol affect thymocytes at different stages of development in fetal thymus organ culture.

Expression of functional aromatic hydrocarbon receptor and aromatic hydrocarbon nuclear translocator proteins in murine bone marrow stromal cells.

Isolation of a novel metabolizing system enriched in phase-II enzymes for short-term genotoxicity bioassays.

Identification of a putative surfactant convertase in rat lung as a secreted serine carboxylesterase.

Vascular endothelial growth factor/vascular permeability factor enhances vascular permeability via nitric oxide and prostacyclin.

Use of c-Src and c-Fos knockout mice for the studies on the role of c-Src kinase signaling in the expression of toxicity of TCDD.

Modulation of 2,6-dinitrotoluene genotoxicity by alachlor treatment of Fischer 344 rats.

Hemotoxicity of chlorpropham (CIPC) in F344 rats.

The immunomodulatory effects of the herbicide propanil on murine macrophage interleukin-6 and tumor necrosis factor-alpha production.

Cancer mortality in workers exposed to phenoxy herbicides, chlorophenols, and dioxins. An expanded and updated international cohort study.

[Ultrastructural changes in the wall and microcirculatory bed of the small intestinal villi of rats exposed to organochlorine toxicant].

[Case-control study of hemo-lymphopietic neoplasms and exposure to pesticides in western Liguria].

Comparison of HPLC and CE for the analysis of dichlorprop in a case of intoxication.

Immunization with alum-collagen II complex suppresses the development of collagen-induced arthritis in rats by deviating the immune response.

Induction of p53 protein expression by sodium arsenite.

Thiol modulation inhibits the interleukin (IL)-1-mediated activation of an IL-1 receptor-associated protein kinase and NF-kappa B.

Promotion of enzyme altered foci in female rat 2,3,3',4,4',5-hexachlorobiphenyl.

Alterations in the developing immune system of the F344 rat after perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: II. Effects on the pup and the adult.

Alterations in the developing immune system of the F344 rat after perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin I. [correction of II]. Effects on the fetus and the neonate.

FK-506 and cyclosporin A potentiate the IgE antibody production by contact sensitization with hapten in mice.

Tumor-specific expression of cytochrome P450 CYP1B1.

Promotion of endometriosis in mice by polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: effects on development of the male and female reproductive system of the mouse.

Membrane-bound protein disulfide isomerase (PDI) is involved in regulation of surface expression of thiols and drug sensitivity of B-CLL cells.

Brief communication: childhood leukemia in a residential small town near Barcelona.

Modification of IgH PCR clonal analysis by the addition of sucrose and cresol red directly to PCR reaction mixes.

Opposite effects of 2,2',4,4',5,5'-hexachlorobiphenyl and 2,3,7,8-tetrachlorodibenzo-p-dioxin on the antibody response to sheep erythrocytes in mice.

Mortality among Army Chemical Corps Vietnam veterans.

Altered in vivo toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C-SRC deficient mice.

CD40-triggered protein tyrosine phosphorylation on Vav and on phosphatidylinositol 3-kinase correlates with survival of the Ramos-Burkitt lymphoma B cell line.

Cancer mortality among rice growers in Novara Province, northern Italy.

Involvement of altered B7 expression in dioxin immunotoxicity: B7 transfection restores the CTL but not the autoantibody response to the P815 mastocytoma.

Pulmonary expression of vascular endothelial growth factor and myosin isoforms in rats with congenital diaphragmatic hernia.

[Complete remission achieved by L-asparaginase, vincristine and prednisolone (LVP) therapy in secondary leukemia (M5a type) with an MLL gene rearrangement].

Oxygen- and dioxin-regulated gene expression in mouse hepatoma cells.

Sulfated sialyl Lewis X, the putative L-selectin ligand, detected on endothelial cells of high endothelial venules by a distinct set of anti-sialyl Lewis X antibodies.

Cytokines (IL-1beta and TNFalpha) in relation to biochemical and immunological effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in rats.

T-cell receptor-mediated signal transduction in transformed human T-cells.

Impaired cellular immune response in rats exposed perinatally to Baltic Sea herring oil or 2,3,7,8-TCDD.

Effect of subchronic 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on immune system and target gene responses in mice: calculation of benchmark doses for CYP1A1 and CYP1A2 related enzyme activities.

[Chronic diarrhea following ingestion of Tardyferon associated with lymphocytic colitis].

Oxidative and chemical stress mimic insulin by selectively inhibiting the expression of phosphoenolpyruvate carboxykinase in hepatoma cells.

Cytochrome P450 1A1 induction in rat lymphoid tissues following in vivo and in vitro exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin requires protein kinase C.

Backbone structure and dynamics of a hemolymph protein from the mealworm beetle *Tenebrio molitor*.

Mechanical stretch induces vascular permeability factor in human mesangial cells: mechanisms of signal transduction.

Differential effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin, bis(tri-n-butyltin) oxide and cyclosporine on thymus histophysiology.

Cytokine gene expression during ontogeny in murine thymus on activation of the aryl hydrocarbon receptor by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Determination of genotoxicity of the metabolites of the pesticides Guthion, Sencor, Lorox, Reglone, Daconil and Admire by ³²P-postlabeling.

Impairment of antigen-specific antibody production in transgenic mice expressing a dominant-negative form of gp130.

Activation of the aryl hydrocarbon receptor/transcription factor and bone marrow stromal cell-dependent preB cell apoptosis.

Neutrophil-mediated activation of mitoxantrone to metabolites which form adducts with DNA.

Differential effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the expression of prostaglandin-H synthase isoenzymes in mouse tissues.

Immunotoxic effects of TCDD and toxic equivalency factors.

Tumor necrosis factor beta is a major source of antibody-activated effector cells in the killing of virally infected target cells.

3,4-Dichloropropionanilide-induced atrophy of the thymus: mechanisms of toxicity and recovery.

3-Aminobenzamide: effects on cytochrome P450-dependent metabolism of chemicals and on the toxicity of dichlobenil in the olfactory mucosa.

The effect of a herbicide--sodium salt of 2,4-dichlorophenoxyacetic acid on guerin carcinoma.

Mortality in a cohort of pentachlorophenol manufacturing workers, 1940-1989.

Cancer incidence in the rural community of Tecumseh, Michigan: a pattern of increased lymphopietic neoplasms.

Induction of micronuclei in haemocytes and gill cells of zebra mussels, *Dreissena polymorpha*, exposed to clastogens.

Oxidative DNA damage induced by activation of polychlorinated biphenyls (PCBs): implications for PCB-induced oxidative stress in breast cancer.

Functional CD40 ligand expressed by human blood dendritic cells is up-regulated by CD40 ligation.

Interactive effects between 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,2',4,4',5,5'-hexachlorobiphenyl in female B6C3F1 mice: tissue distribution and tissue-specific enzyme induction.

Effects induced by feeding organochlorine-contaminated carp from Saginaw Bay, Lake Huron, to laying White Leghorn hens. II. Embryotoxic and teratogenic effects.

Incidence rates of leukemias, lymphomas and myelomas in Italy: geographic distribution and NHL histotypes.

Effects of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) injected into the yolks of chicken (*Gallus domesticus*) eggs prior to incubation.

Inhibition of TC-1 cytokine production, effector cytotoxic T lymphocyte development and alloantibody production by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Contaminant-induced immunotoxicity in harbour seals: wildlife at risk?

Diagnostic criteria for selenium toxicosis in aquatic birds: dietary exposure, tissue concentrations, and macroscopic effects.

Target cell-induced apoptosis of interleukin-2-activated human natural killer cells: roles of cell surface molecules and intracellular events.

Promotion of endometriosis by 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats and mice: time-dose dependence and species comparison.

Role of decomposition products in sodium methyldithiocarbamate-induced immunotoxicity.

Circulating interleukin-2 receptors are a group of multimeric proteins with immunoreactivity for interleukin-2 receptor alpha, beta, and gamma chains.

Incidence and time trends for lymphomas, leukemias and myelomas: hypothesis generation. Working Group on the Epidemiology of Hematolymphopoietic Malignancies in Italy.

Target-induced death by apoptosis in human lymphokine-activated natural killer cells.

Role of tyrosine phosphorylation in radiation-induced cell cycle-arrest of leukemic B-cell precursors at the G2-M transition checkpoint.

Cell cycle defect in connection with oxygen and iron sensitivity in Fanconi anemia lymphoblastoid cells.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on humoral and cell-mediated immunity in Sprague-Dawley rats.

Host resistance to rat cytomegalovirus (RCMV) and immune function in adult PVG rats fed herring from the contaminated Baltic Sea.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on influenza virus host resistance in mice.

Mechanism underlying the inhibitory effect of high calcium carbonate intake on iron bioavailability from ferrous sulphate in anaemic rats.

[Separation of methotrexate-polyglutamates by capillary electrophoresis and its application to the measurement of gamma-glutamyl hydrolase activity in human leukemia cells in culture].

Characterization of the M(r) 65,000 lymphokine-activated killer proteins phosphorylated after tumor target binding: evidence that pp65a and pp65b are phosphorylated forms of L-plastin.

Formation of 8-hydroxydeoxyguanosine in calf thymus DNA treated with tert-butylhydroquinone, a major metabolite of butylated hydroxyanisole.

Effects of metabolic inhibitors and lectins on the menadione-dependent generation of H₂O₂ by rat thymocytes.

Cyclosporine control of recipient lymphocyte traffic to the heart allograft.

Basal metabolism of intraperitoneally injected carrier-free ⁷⁴As-labeled arsenate in rabbits.

Infection of human T lymphoid cells by human herpesvirus 6 is blocked by two unrelated protein tyrosine kinase inhibitors, biochanin A and herbimycin.

2,3,7,8-TCDD induces cytochrome P450 enzyme activity but not proliferation or phenotypical changes in human peripheral blood lymphocytes.

Lymphocyte adhesive interactions with cultured parotid salivary gland epithelial cells from rats.

Identification of functional aryl hydrocarbon receptor and aryl hydrocarbon receptor nuclear translocator in murine splenocytes.

Aryl-hydrocarbon receptor-deficient mice are resistant to 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced toxicity.

Application of a biologically-based RFD estimation method to tetrachlorodibenzo-p-dioxin (TCDD) mediated immune suppression and enzyme induction.

Rapid cytotoxicity of human B lymphocytes induced by VH4-34 (VH4.21) gene-encoded monoclonal antibodies.

Toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in two substrains of male Long-Evans rats after intravenous injection.

Persistence of decreased T-helper cell function in industrial workers 20 years after exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Influence of liver tumor promoters on apoptosis in rat hepatocytes induced by 2-acetylaminofluorene, ultraviolet light, or transforming growth factor beta 1.

Triphenyltin acetate toxicity: a biochemical and ultrastructural study on mouse thymocytes.

Induction of CYP1A1 and ALDH-3 in lymphoid tissues from Fisher 344 rats exposed to 2,3,7,8-tetrachlorodibenzodioxin (TCDD).

Expression of 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible cytochrome P4501A1 in human splenic lymphocyte cultures.

Subacute toxicity of urea herbicide, isoproturon, in male rats.

Changes in primary and secondary lymphoid organ T-cell subpopulations resulting from acute in vivo exposure to propanil.

Hodgkin's disease and Vietnam service.

Toxicity of cotoran (fluometuron) in Desert sheep.

The effects of subchronic chlorate exposure in Sprague-Dawley rats.

[Herbicides and neoplasms of the hemolymphopoietic system].

The influence of glutathione and detoxifying enzymes on DNA damage induced by 2-alkenals in primary rat hepatocytes and human lymphoblastoid cells.

Diquat increases cysteine proteinase inhibitors greatly in rat plasma and tissues.

Immunotoxic effects of exposure of rats to xenobiotics via maternal lactation. Part I 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Human glutathione S-transferase M1 null genotype is associated with a high inducibility of cytochrome P450 1A1 gene transcription.

Studies into the effect of the tyrosine kinase inhibitor herbimycin A on NF-kappa B activation in T lymphocytes. Evidence for covalent modification of the p50 subunit.

Isolation of leukocytes infiltrating the islets of Langerhans of diabetes-prone mice for flow cytometric analysis.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on anti-CD3-induced changes in T-cell subsets and cytokine production.

Dietary exposure of mink to carp from Saginaw Bay, Michigan: 2. Hematology and liver pathology.

Expression of cytokine mRNA in human melanoma tissues.

Immunologic effects of background prenatal and postnatal exposure to dioxins and polychlorinated biphenyls in Dutch infants.

Alterations in splenocyte protein kinase C (PKC) activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin in vivo.

Radiosyntheses of labeled beta-pseudothymidine ([C-11]- and [H-3]methyl) and its biodistribution and metabolism in normal and tumored mice.

Immunomodulatory effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin tested by the popliteal lymph node assay.

Adipose tissue concentrations of dioxins and dibenzofurans in patients with malignant lymphoproliferative diseases and in patients without a malignant disease.

Hypoxia-induced vascular endothelial growth factor expression in normal rat astrocyte cultures.

Alternative models for low dose-response analysis of biochemical and immunological endpoints for tetrachlorodibenzo-p-dioxin.

Immune system impairment and hepatic fibrosis in mice lacking the dioxin-binding Ah receptor.

Subchronic dose-response study of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats.

Formation of 8-hydroxydeoxyguanosine in calf thymus DNA treated in vitro with phenylhydroquinone, the major metabolite of O-phenylphenol.

Presentation of cartilage proteoglycan to a T cell hybridoma derived from a mouse with proteoglycan-induced arthritis.

Synthesis, topoisomerase I inhibitory activity, and in vivo evaluation of 11-azacampthecin analogs.

Treatment of Philadelphia-chromosome-positive human leukemia in SCID mouse model with herbimycin A, bcr-abl tyrosine kinase activity inhibitor.

Identification of domains of poly(ADP-ribose) polymerase for protein binding and self-association.

Host resistance to *Trichinella spiralis* infection in rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Non-Hodgkin's lymphoma.

Identification of a cyanogen bromide fragment of porcine type II collagen capable of modulating collagen arthritis in B10.RIII (H-2r) mice.

Characterization of sugar receptor expression by neoglycoproteins in oral and oropharyngeal squamous cell carcinomas.

An attempt to explain interindividual variability in 24-h urinary excretion of inorganic arsenic metabolites by C57 BL/6J mice.

Use of Mishell-Dutton culture for the detection of the immunosuppressive effect of iron-containing compounds.

Inhibition of tumor necrosis factor activity fails to restore 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced suppression of the antibody response to sheep red blood cells.

Kinetics of plasma membrane and mitochondrial alterations in cells undergoing apoptosis.

Possible mechanisms for PhIP-DNA adduct formation in the mammary gland of female Sprague-Dawley rats.

Comparative assessment of metabolic enzyme levels in macrophage populations of the F344 rat.

Toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) to the human thymus after implantation in SCID mice.

Lymphocyte adhesive interactions with lacrimal gland acinar epithelial cells in primary culture.

The thymus atrophy inducing organotin compound DBTC stimulates TcR alpha beta-CD3 signalling in immature rat thymocytes.

Impaired cellular immune response in harbour seals (*Phoca vitulina*) feeding on environmentally contaminated herring.

Dopamine-induced programmed cell death in mouse thymocytes.

Xenobiotic metabolism in humans during early pregnancy: peroxidase-mediated oxidation and bioactivation of 2-aminofluorene.

Effects of gestational and lactational exposure to coplanar polychlorinated biphenyl (PCB) congeners or 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on thyroid hormone concentrations in weanling rats.

Immunosuppressive activity of polychlorinated biphenyl mixtures and congeners: nonadditive (antagonistic) interactions.

A novel type of cell death of lymphocytes induced by a monoclonal antibody without participation of complement.

Halogenated aromatic hydrocarbon-induced suppression of the plaque-forming cell response in B6C3F1 splenocytes cultured with allogenic mouse serum: Ah receptor structure activity relationships.

Phenotypic analysis of spleen, thymus, and peripheral blood cells in aged C57B1/6 mice following long-term exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Suppression of cytotoxic T lymphocyte activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin occurs in vivo, but not in vitro, and is independent of corticosterone elevation.

Workshop on perinatal exposure to dioxin-like compounds. V. Immunologic effects.

[Morphologic characteristics of the thymus in pregnant and newborn mice exposed to sodium arsenite].

BW-755C diminishes smoke-induced pulmonary edema.

Oxidative stress from environmental pollutants.

Comparison of the toxicity of cinnamaldehyde when administered by microencapsulation in feed or by corn oil gavage.

Role of active oxygen species in DNA damage by pentachlorophenol metabolites.

Cyclooxygenase and lipoxygenase inhibition by BW-755C reduces acrolein smoke-induced acute lung injury.

Mortality and cancer morbidity of Finnish chlorophenoxy herbicide applicators: an 18-year prospective follow-up.

Identification and dynamics of paraquat in the bone marrow, thymus and spleen in rats using immunohistochemical techniques.

A 32P-postlabeling method for simultaneous detection and quantification of exocyclic etheno and propano adducts in DNA.

Selective myelotoxicity of propanil.

Blocking of in vitro DNA replication by deoxycytidine adducts of the mutagen and clastogen 2-bromoacrolein.

[The enzymes of mono-oxygenase oxidation in the lymphocytes and liver of persons subjected to chlorophenoxy herbicide exposure].

Characterization of a thioredoxin-related surface protein.

Inhibition of mammalian protoporphyrinogen oxidase by acifluorfen.

Immunogenicity of the Escherichia coli fimbrial antigen K99 when expressed by Salmonella enteritidis 11RX.

Lymphodepletion of the thymus cortex in rats after single oral intubation of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

A case of germinal center formation by CD45RO T and CD20 B lymphocytes in rheumatoid arthritic subchondral bone: proposal for a two-compartment model of immune-mediated disease with implications for immunotherapeutic strategies.

Time course of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced thymic atrophy in the Wistar rat.

Hypoxic stimulation of vascular endothelial growth factor expression in vitro and in vivo.

Cytoplasmic transfer of the mtDNA nt 8993 T-->G (ATP6) point mutation associated with Leigh syndrome into mtDNA-less cells demonstrates cosegregation with a decrease in state III respiration and ADP/O ratio.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the hepatic 7-ethoxyresorufin O-deethylase activity in four rodent species.

Contact sensitization induces proliferation of heterogeneous populations of hapten-specific T cells.

Deaths from primary brain cancers, lymphatic and haematopoietic cancers in agricultural workers in the Republic of Ireland.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on pulmonary influenza virus titer and natural killer (NK) activity in rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced thymic atrophy and lymphocyte stem cell alterations by mechanisms independent of the estrogen receptor.

Dexamethasone, beta-estradiol, and 2,3,7,8-tetrachlorodibenzo-p-dioxin elicit thymic atrophy through different cellular targets.

CD40 signaling pathway: anti-CD40 monoclonal antibody induces rapid dephosphorylation and phosphorylation of tyrosine-phosphorylated proteins including protein tyrosine kinase Lyn, Fyn, and Syk and the appearance of a 28-kD tyrosine phosphorylated protein.

Coxsackievirus B3 infection alters the uptake of 2,3,7,8-tetrachlorodibenzo-p-dioxin into various tissues of the mouse.

Post mortem diagnosis of *Mycobacterium bovis* infection in cattle.

Induction of heat-shock protein synthesis and thermotolerance in EL-4 ascites tumor cells by transient ATP depletion after ischemic stress.

Effects of herbimycin A and its derivatives on growth and differentiation of Ph1-positive acute lymphoid leukemia cell lines.

Assessment of host resistance to *Trichinella spiralis* in mice following preinfection exposure to 2,3,7,8-TCDD.

Developmental toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the most TCDD-resistant and -susceptible rat strains.

Reversal agent inhibition of the multidrug resistance pump in human leukemic lymphoblasts.

Evidence for the role of the Ah receptor in response to dioxin.

Alternate immune system targets for TCDD: lymphocyte stem cells and extrathymic T-cell development.

The intrathymic target cell for the thymotoxic action of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The hr locus and the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in newborn mice.

Hodgkin's and non-Hodgkin's lymphomas.

NTP Toxicology and Carcinogenesis Studies of 4,4'-Thiobis(6-*t*-butyl-*m*-cresol) (CAS No. 96-69-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Ah receptor in different tissues of C57BL/6J and DBA/2J mice: use of competitive polymerase chain reaction to measure Ah-receptor mRNA expression.

Induction in vitro of 72-kD heat shock protein in a continuous culture of rat thyroid cells, FRTL5.

T cell receptor-induced Fas ligand expression in cytotoxic T lymphocyte clones is blocked by protein tyrosine kinase inhibitors and cyclosporin A.

Tissue specific expression of the rat Ah-receptor and ARNT mRNAs.

Pathological findings in rabbits and sheep following the subacute administration of triphenyltin acetate.

An inhibitory factor in rat thymus which interferes with binding of cytosol Ah receptor to xenobiotic responsive element.

Oxidative stress-induced apoptosis prevented by Trolox.

Evidence for histamine uptake by murine hematopoietic progenitors.

The anti-tumour activity of ifosfamide on heterotransplanted testicular cancer cell lines remains unaltered by the uroprotector mesna.

Leukemia inhibitory factor and nerve growth factor are retrogradely transported and processed by cultured rat sympathetic neurons.

Serum modulation of the effects of TCDD on the in vitro antibody response and on enzyme induction in primary hepatocytes.

Mitogen-activated protein kinases and ribosomal S6 protein kinases are involved in signaling pathways shared by interleukin-11, interleukin-6, leukemia inhibitory factor, and oncostatin M in mouse 3T3-L1 cells.

The thymus does not mediate 2,3,7,8-tetrachlorodibenzo-p-dioxin-elicited alterations in bone marrow lymphocyte stem cells.

Increased proliferation, cytotoxicity, and gene expression after stimulation of human peripheral blood T lymphocytes through a surface ganglioside (GD3).

NTP Toxicology and Carcinogenesis Studies of o-Benzyl-p-Chlorophenol (CAS No. 120-32-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Dioxins and the immune system: mechanisms of interference. A meeting report.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-mediated gene expression in the immature rat thymus.

Non-Hodgkin's lymphoma in the older person: a review.

Some occupational exposures as risk factors for malignant lymphomas.

The role of agricultural pesticide use in the development of non-Hodgkin's lymphoma in women.

The toxicologic interactions resulting from inhalation of carbon black and acrolein on pulmonary antibacterial and antiviral defenses.

[Some parameters of Guerin cancer growth after exposure to Pielik (sodium salt of 2,4-dichlorophenoxyacetate)].

Biochemical and toxicological studies on the mixtures of three commonly-used herbicides in mice.

Cytotoxic effect of atrazine on murine B-lymphocytes in vitro.

Production of monoclonal antibodies against diquat and its enzyme-linked immunosorbent assay.

Haemotoxic effect of phenylurea herbicides in rats: role of haemoglobin-adduct formation in splenic toxicity.

Results with OECD recommended positive control sensitizers in the maximization, Buehler and local lymph node assays.

[N-demethylation and denitrosation activity of the rat liver, thymus lymphocytes and spleen after exposure to simazine and sodium nitrite].

Imaging of activated natural killer cells in mice by positron emission tomography: preferential uptake in tumors.

70 kDa heat shock cognate protein is a transformation-associated antigen and a possible target for the host's anti-tumor immunity.

Tumor cell heme uptake induces ferritin synthesis resulting in altered oxidant sensitivity: possible role in chemotherapy efficacy.

Evidence for a redox-sensitive protein tyrosine kinase in nuclear factor kappa B activation and interleukin 2 production in EL4.NOB1 cells.

Subchronic toxicity of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats.

Cancer incidence in a population accidentally exposed to 2,3,7,8-tetrachlorodibenzo-para-dioxin.

Iron status and growth of rats fed different dietary iron sources.

BCR/ABL oncoprotein-targeted antitumor activity of antisense oligodeoxynucleotides complementary to bcr/abl mRNA and herbimycin A, an antagonist of protein tyrosine kinase: inhibitory effects on in vitro growth of Ph1-positive leukemia cells and BCR/ABL oncoprotein-associated transformed cells.

Effects of small doses of dioxins on the immune system of marmosets and rats.

Increased formation of 8-hydroxydeoxyguanosine, an oxidative DNA damage, in lymphoblasts from Fanconi's anemia patients due to possible catalase deficiency.

Comparative potencies of Aroclors 1232, 1242, 1248, 1254, and 1260 in male Wistar rats--assessment of the toxic equivalency factor (TEF) approach for polychlorinated biphenyls (PCBs).

Gamma interferon cooperates with lipopolysaccharide to activate mouse splenic macrophages to an antihistoplasma state.

DNA topoisomerases and the DNA lesion in human genetic instability syndromes.

Effect of a single lethal dose of TCDD on the levels of monoamines, their metabolites and tryptophan in discrete brain nuclei and peripheral tissues of Long-Evans rats.

Important aspects of the evidence for TCDD carcinogenicity in man.

Role of tyrosine phosphorylation in radiation-induced activation of c-jun protooncogene in human lymphohematopoietic precursor cells.

Cell-surface heparan sulfate proteoglycan mediates HIV-1 infection of T-cell lines.

Teratogenicity and immunotoxicity of 3,3',4,4',5-pentachlorobiphenyl in C57BL/6 mice.

Malignant lymphomas and leukemias, and exposures in the wood industry: an industry-based case-referent study.

Tissue distribution and toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats after intravenous injection.

Intracellular induction pathways for CD23 antigen and surface immunoglobulins in human tonsillar B cells: the roles of protein kinase C and tyrosine kinase-mediated signals.

Apoptosis in splenic B lymphocytes. Regulation by protein kinase C and IL-4.

Direct effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on human tonsillar lymphocytes.

Inhibition of protein tyrosine kinase activity by herbimycin A prevents anti- μ but not LPS-mediated cell cycle progression and differentiation of splenic B lymphocytes.

Human non-secretory ribonucleases. I. Purification, peptide mapping and lectin blotting analysis of the kidney, liver and spleen enzymes.

NTP Toxicology and Carcinogenesis Studies of Pentachloroanisole (CAS No. 1825-21-4) in F344 Rats and B6C3F1 Mice (Feed Studies).

Acute inflammatory response to sheep red blood cell challenge in mice treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): phenotypic and functional analysis of peritoneal exudate cells.

Stimulatory effect of the CYP1A1 inducer 2,3,7,8-tetrachlorodibenzo-p-dioxin on the reproduction of HIV-1 in human lymphoid cell culture.

Ultrastructure of the cortical epithelium of the rat thymus after in vivo exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Occupational risk factors for acute leukaemia: a case-control study.

Efficiency of DNA-histone crosslinking induced by saturated and unsaturated aldehydes in vitro.

Limited immunotoxic potential of technical formulation of the herbicide atrazine (AAtrex) in mice.

Comparison of the immunotoxicity of propanil and its metabolite, 3,4-dichloroaniline, in C57Bl/6 mice.

Cytogenetic studies of herbicide interactions in vitro and in vivo using atrazine and linuron.

Smoke aldehyde component influences pulmonary edema.

[Rainbow trout and zebrafish, two models for continuous toxicity tests: relative sensitivity, species and organ specificity in cytopathologic reaction of liver and intestines to atrazine].

The effect of Lasso herbicide on human immune function as measured by in vitro assays.

The effect of a commercial 2,4-D formulation on chemical- and viral-induced tumor production in mice.

Enhancement of cytotoxic T lymphocyte growth from spleens of P815-tumor-bearing host mice with mafosfamide.

Case report: neuropathology of methyl bromide intoxication.

Protein tyrosine phosphorylation as an indicator of 2,3,7,8-tetrachloro-p-dioxin exposure in vivo and in vitro.

Immunosuppressive therapy and acquired immunological disorders.

Effect of herbimycin A, an antagonist of tyrosine kinase, on bcr/abl oncoprotein-associated cell proliferations: abrogative effect on the transformation of murine hematopoietic cells by transfection of

a retroviral vector expressing oncoprotein P210bcr/abl and preferential inhibition on Ph1-positive leukemia cell growth.

Detection of contact sensitivity of metal salts using the murine local lymph node assay.

Alterations in the cortical thymic epithelium of rats after in vivo exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): an (immuno)histological study.

Protein-linked isoprenoid lipids in dexamethasone-treated human lymphoid lines in culture.

Epstein-Barr virus enters B cells and epithelial cells by different routes.

Cancer incidence following chlorophenol exposure in a community in southern Finland.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on blood and spleen natural killer (NK) cell activity in the mouse.

The role of occupational exposure and immunodeficiency in B-cell malignancies. Working Group on the Epidemiology of Hematolymphopoietic Malignancies in Italy.

Chemicals trophic for the thymus: risk for immunodeficiency and autoimmunity.

Integration of the human lymphocyte into immunotoxicological investigations.

Cancer risk among Danish and Italian farmers.

Identification of thyroiditogenic epitope on porcine thyroid peroxidase for C57BL/6 mice.

Glycosylation-inhibiting factor from human T cell hybridomas constructed from peripheral blood lymphocytes of a bee venom-sensitive allergic patient.

Mortality of a young population after accidental exposure to 2,3,7,8-tetrachlorodibenzodioxin.

Toxicity of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats after single oral administration.

The heat shock response: potential to screen teratogens.

Amyloid enhancing factor activity is associated with ubiquitin.

Enhanced suppression of humoral immunity in DBA/2 mice following subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Cytogenetic mechanisms in the selective toxicity of cyclophosphamide analogs and metabolites towards avian embryonic B lymphocytes in vivo.

Interaction of C1q receptor with lung surfactant protein A.

Mammalian thymidine kinase 2. Direct photoaffinity labeling with [32P]dTTP of the enzyme from spleen, liver, heart and brain.

Generation and functional characterization of ovine bone marrow-derived macrophages.

Distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in splenic tissue of C57BL/6J mice.

A role for protein tyrosine kinase activity in natural cytotoxicity as well as antibody-dependent cellular cytotoxicity. Effects of herbimycin A.

Tissue distribution of monochloroacetic acid and its binding to albumin in rats.

Analysis of DNA strand breaks induced in rodent liver in vivo, hepatocytes in primary culture, and a human cell line by chlorinated acetic acids and chlorinated acetaldehydes.

[Production of monoclonal antibody against diquat and its application for forensic medicine].

[Immunomorphological analysis of prolonged intoxication by low doses of herbicide simazine].

Cancer mortality in workers exposed to chlorophenoxy herbicides and chlorophenols.

Toxicology and carcinogenesis studies of two grades of pentachlorophenol in B6C3F1 mice.

Developmental toxicity of bromoxynil in mice and rats.

Human health effects: what the data indicate.

Incidence rates of lymphomas and soft-tissue sarcomas and environmental measurements of phenoxy herbicides.

[The immunomorphological characteristics of a focal staphylococcal infection against a background of long-term exposure to low doses of simazine].

[Ultrastructural changes in the adenohipophysis-thyroid system in chronic poisoning by the herbicide linuron].

Human lymphocyte reactivity after in vitro exposure to technical and analytical grade pentachlorophenol.

Use and mechanism of action of AS101 in protecting bone marrow colony forming units-granulocyte-macrophage following purging with ASTA-Z 7557.

Increase in metallothionein produced by chemicals that induce oxidative stress.

Pharmacokinetics and metabolism of triclopyr in the crayfish (*Procambarus clarki*).

The identification of photoallergic potential in the local lymph node assay.

Inhibitory effect of interleukin-4 on the in vitro growth of Ph1-positive acute lymphoblastic leukemia cells.

Homotypic aggregation of human cell lines by HLA class II-, class Ia- and HLA-G-specific monoclonal antibodies.

The transient appearance of small blastoid cells in the marrow after bone marrow transplantation.

Engagement of interleukin-7 receptor stimulates tyrosine phosphorylation, phosphoinositide turnover, and clonal proliferation of human T-lineage acute lymphoblastic leukemia cells.

Dexamethasone and 2,3,7,8-tetrachlorodibenzo-p-dioxin can induce thymic atrophy by different mechanisms in mice.

Agricultural disorders of the lung.

Characterization of an inducible aryl hydrocarbon receptor-like protein in rat liver.

Ninety-day toxicity study of sodium monochloroacetate in Sprague-Dawley rats.

Long-term carcinogenesis studies on 2,3,7,8-tetrachlorodibenzo-p-dioxin and hexachlorodibenzo-p-dioxins.

Reversibility of thymic atrophy induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and bis(tri-n-butyltin)oxide (TBTO).

A one-year carcinogenicity study with 2,6-dichlorobenzonitrile (Dichlobenil) in male Swiss mice: preliminary note.

The tissue distribution of 2,3,7,8-chlorine substituted dibenzo-p-dioxins in humans who died of cancer.

Vitamin A deficiency and the induction of cutaneous toxicity in murine skin by TCDD.

An exploratory study of environmental and medical factors potentially related to childhood cancer.

Human exposure to 2,3,7,8-TCDD and risk of cancer.

Investigation on the dosage/efficacy relationship of iron dextran in veal calves.

Novel pathways of antigen presentation for the maintenance of memory.

Effect of rat liver cytosolic enzymes and cofactors on mutagenicity of 1-amino-8-nitropyrene.

Detection and characterization of Ah receptor in tissue and cells from human tonsils.

Cell-type-specific recognition of allogeneic cells by alloreactive cytotoxic T cells: a consequence of peptide-dependent allorecognition.

Intracellular regulation of the production and release of human erythroid-directed lymphokines.

Ten- and ninety-day toxicity studies of 1,2-dichlorobenzene administered by oral gavage to Sprague-Dawley rats.

Effects of polychlorinated biphenyls with Ah receptor affinity on lymphoid development in the thymus and the bursa of Fabricius of chick embryos in ovo and in mouse thymus anlagen in vitro.

Identification and structural characterization of Lyt-1 glycoproteins from tunicate hemocytes and mouse thymocytes.

Polyhalogenated dibenzo-p-dioxins and dibenzofurans and the immune system. 3. No immunosuppressive effect of 2,3,7,8-TCDD in the popliteal lymph node assay (PLNA) in rats.

Primary structure of the catalytic subunit of calf thymus DNA polymerase delta: sequence similarities with other DNA polymerases.

bcl-2 transgene inhibits T cell death and perturbs thymic self-censorship.

Comparison of the amino acid sequences of tissue-specific parvalbumins from chicken muscle and thymus and possible evolutionary significance.

The cortical actomyosin system of cytochalasin D-treated lymphoblasts.

Perinatal thymocyte antigen expression and postnatal immune development altered by gestational exposure to tetrachlorodibenzo-p-dioxin (TCDD).

Detection of *Streptococcus suis* type 2 in tonsils of slaughtered pigs using improved selective and differential media.

Mitochondrial 3- β -hydroxyacyl-CoA isomerase. Purification, cloning, expression, and mitochondrial import of the key enzyme of unsaturated fatty acid β -oxidation.

Evidence for arsenic as the immunosuppressive component of gallium arsenide.

Interaction between dietary vitamin A and single oral doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the TCDD-induced toxicity and on the vitamin A status in the rat.

Halogenated aryl hydrocarbon-induced suppression of the in vitro plaque-forming cell response to sheep red blood cells is not dependent on the Ah receptor.

Monoclonal anti-VH141 antibodies that specifically recognize the heavy chain variable region of, and are closely related to, MOPC141 myeloma protein whose VH gene belongs to VHQ52 family.

Complete amino acid sequence of the FK506 and rapamycin binding protein, FKBP, isolated from calf thymus.

IgG response is impaired in H2-c-fos transgenic mice.

Italian multicentre case-control study of hematolymphopoietic malignancies.

Chronic effect of atrazine on hydromineral balance in the crab.

[Exposure to agricultural chemicals and oncogenic risk].

[An immunological and morphological study of focal staphylococcal infection against a background of long-term exposure to the herbicide linuron].

[The immunomorphological characteristics of prolonged exposure to the herbicide linuron].

Toxicokinetics of monochloroacetic acid: a whole-body autoradiography study.

[The effect of chronic butyphos poisoning on protein and nucleic acid synthesis in various rat organs and activity of blood cholinesterase].

Association between soft tissue sarcomas, malignant lymphomas, and phenoxy herbicides/chlorophenols: evidence from occupational cohort studies.

Aplastic anaemia associated with organochlorine pesticide: case reports and review of evidence.

Paraquat pharmacokinetics using a subcutaneous toxic low dose in the rat.

[Distribution and elimination of C-14-2,4-dichlorophenoxyacetic acid (2,4 D) in rat tissues in acute poisoning].

Long-term carcinogenicity bioassay of the herbicide atrazine in F344 rats.

Inhibition of lung damage caused by paraquat with lymphokines or cytokines.

Determination of diquat in biological materials by electron spin resonance spectroscopy.

Role of sulfidopeptide leukotrienes in synthetic smoke inhalation injury in sheep.

Mechanisms of in vitro immunosuppression by hepatocyte-generated cyclophosphamide metabolites and 4-hydroperoxycyclophosphamide.

Intestinal absorption of cationic and anionic ferric colloids and complexes: biochemical, histochemical and morphological observations in rats.

³²P-postlabeling analysis of binding of the cyclophosphamide metabolite, acrolein, to DNA.

A critical review of the developmental toxicity and teratogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: recent advances toward understanding the mechanism.

Pesticide exposures and other agricultural risk factors for leukemia among men in Iowa and Minnesota.

Regulation of polyamine biosynthesis by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Confirmation by peptide sequence and co-expression on various cell types of the identity of CD44 and P85 glycoprotein.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-induced decrease in the fluidity of rat liver membranes.

Influence of the Ah locus on the humoral immunotoxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: evidence for Ah-receptor-dependent and Ah-receptor-independent mechanisms of immunosuppression.

Analysis of photoaffinity-labeled aryl hydrocarbon receptor heterogeneity by two-dimensional gel electrophoresis.

Differential toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C57BL/6J mice congenic at the Ah Locus.

Transfer of proteins to membranes facilitates both cyanogen bromide cleavage and two-dimensional proteolytic mapping.

Antitumor activity of T-2 toxin-conjugated monoclonal antibody to murine thymoma.

Desferrioxamine-induced alterations in hepatic iron distribution, DNA damage and lipid peroxidation in control and 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

Role of the Ah locus in suppression of cytotoxic T lymphocyte activity by halogenated aromatic hydrocarbons (PCBs and TCDD): structure-activity relationships and effects in C57Bl/6 mice congenic at the Ah locus.

Studies on specific serological antigens in metacercariae and juveniles of *Paragonimus westermani* and its monoclonal antibodies.

Synthesis of human splenin (hSP) and examination of its immunological effects on the impaired T- and B-lymphocytes in uremic patients.

[Acute myelomonocytic leukemia with mastocytosis in bone marrow].

Tissue distribution, metabolism, and excretion of ¹⁴C-TCDD in a TCDD-susceptible and a TCDD-resistant rat strain.

Relative toxicity and tumor-promoting ability of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), 2,3,4,7,8-pentachlorodibenzofuran (PCDF), and 1,2,3,4,7,8-hexachlorodibenzofuran (HCDF) in hairless mice.

Hypoxia and deposition of iron in liver and spleen of mice given iron supplement.

Cancer in Iowa farmers: recent results.

Epidemiologic studies of cancer in agricultural workers.

Cytotoxicity of lymphokine-activated killer cells against human neuroblastoma cells: modulation by neuroblast differentiation.

A new perspective of S-antigen from immunochemical analysis.

Absorption, distribution, excretion and metabolism of a single oral dose of [¹⁴C]tri-*o*-cresyl phosphate (TOCP) in the male rat.

The association of selected cancers with service in the US military in Vietnam. I. Non-Hodgkin's lymphoma. The Selected Cancers Cooperative Study Group.

Prothymocyte activity is reduced by perinatal 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

Flow cytometric analysis of lymphocyte subpopulations in the spleen and thymus of mice exposed to an acute immunosuppressive dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Structure and partial amino acid sequence of calf thymus DNA topoisomerase II: comparison with other type II enzymes.

Expression and biochemical characterization of human immunodeficiency virus type 1 nef gene product.

Glutathione enhancement in various mouse organs and protection by glutathione isopropyl ester against liver injury.

Generation and characterization of peptide-specific, MHC-restricted cytotoxic T lymphocyte (CTL) and helper T cell lines from unprimed T cells under microculture conditions.

Sequence analysis, tissue distribution and regulation by cell depolarization, and second messengers of bovine secretogranin II (chromogranin C) mRNA.

Influence of antibiotics on intestinal tract survival and translocation of environmental *Pseudomonas* species.

Molecular cloning of the CD3 zeta subunit identifies a CD3 zeta-related product in thymus-derived cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin pretreatment of female mice altered tissue distribution but not hepatic metabolism of a subsequent dose.

NTP Toxicology and Carcinogenesis Studies of Iodinated Glycerol (Organidin(R)) (CAS No. 5634-39-9) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Impairment of prothymocyte activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Glucocorticoid receptor binding to calf thymus DNA. 2. Role of a DNA-binding activity factor in receptor heterogeneity and a multistep mechanism of receptor activation.

NAD(P)H: quinone oxidoreductase (DT-diaphorase) in chick embryo liver. Comparison to activity in rat and guinea pig liver and differences in co-induction with 7-ethoxyresorufin deethylase by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Polyhalogenated dibenzo-p-dioxins and dibenzofurans and the immune system. 1. Effects on peripheral lymphocyte subpopulations of a non-human primate (*Callithrix jacchus*) after treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Disposition, elimination, and metabolism of tri-o-cresyl phosphate following daily oral administration in Fischer 344 male rats.

[The effect of 2,3,7,8-tetrachlorodibenzo-para-dioxin on the reproduction of human immunodeficiency virus in lymphoid cell cultures].

Paraquat resistance associated with reduced NADPH reductase in an energy-dependent paraquat-accumulating cell line.

Cancer risk in a cohort of licensed pesticide users.

Quantitative evaluation of chlortoluran-induced splenic hemosiderosis by means of an image analyzer.

[Pathomorphologic and hematologic studies of the immunotoxicity of the phenoxyalkane acid mecoprop in rats].

Effect of acute propanil exposure on the immune response of C57Bl/6 mice.

Effects of paternal subacute exposure to Tordon 202c on fetal growth and development in CD-1 mice.

Respiration and osmoregulation of the estuarine crab, *Rhithropanopeus harrisi* (Gould): effects of the herbicide, alachlor.

Determination of paraquat in raw and formalin-fixed tissues by electron spin resonance (ESR) spectroscopy.

Phenoxyacetic acid herbicides and chlorophenols and the etiology of lymphoma and soft-tissue neoplasms.

Elevated superoxide dismutase in Bloom's syndrome: a genetic condition of oxidative stress.

Formation of cyclic 1,N2-propanodeoxyguanosine and thymidine adducts in the reaction of the mutagen 2-bromoacrolein with calf thymus DNA.

Comparative effects of pair-feeding and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on various biochemical parameters in female rats.

The adrenocorticotrophic hormone (ACTH)-induced reversal of hemorrhagic shock.

Acute toxicity of perfluorodecanoic acid in C57BL/6 mice differs from 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Occupation and lymphoid neoplasms.

Subunit structure of the erythropoietin receptor.

Ten-year mortality study of the population involved in the Seveso incident in 1976.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) kills glucocorticoid-sensitive thymocytes in vivo.

Inhibition of c-myc gene expression in murine lymphoblastoma cells by geldanamycin and herbimycin, antibiotics of benzoquinoid ansamycin group.

Cancer incidence of workers in a Finnish sawmill.

Synthesis of [Glu34]human splenin (hSP) and examination of its immunological effect on the reduced B-lymphocytes of uremic patients.

Immunotoxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in a complex environmental mixture from the Love Canal.

Hematotoxic effects in the rat of a toluene dinitro derivative after short-term exposure.

Update of mortality among chemical workers with potential exposure to the higher chlorinated dioxins.

Development and validation of a cellular transplant model for leukemia in Fischer rats: a short-term assay for potential anti-leukemic chemicals.

Lymphocyte stem cell alterations following perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Immuno-toxicology and -pharmacology.

The effect of iron therapy on malarial infection in Papua New Guinean schoolchildren.

Differential [32P]-labeling of chemically induced stress proteins in S-phase mouse lymphoma cells.

Cell kinetic evidence suggests elevated oxidative stress in cultured cells of Bloom's syndrome.

Decreased activation of carcinogens in the liver of carcinogen-resistant rats.

Characterization of multiple forms of the Ah receptor: comparison of species and tissues.

Homology between the cDNAs encoding phosphoprotein p19 and SCG10 reveals a novel mammalian gene family preferentially expressed in developing brain.

Stimulation of in vivo hepatic uptake and in vitro hepatic binding of [125I]2-Iodo-3,7,8-trichlorodibenzo-p-dioxin by the administration of agonist for the Ah receptor.

NTP Toxicology and Carcinogenesis Studies of 2,4-Dichlorophenol (CAS No. 120-83-2) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Comparative studies on the primary structure of human cystatin as from epidermis, liver, spleen, and leukocytes.

Structural alterations in fibroblast monolayers caused by mast cell degranulation.

[Tissue distribution, inductive effect on liver enzymes and acute toxicity of 2,3,4,7,8-pentachlorodibenzofuran in Golden Syrian hamsters].

Multiple forms of recombinant murine interleukin-4 expressed in COS-7 monkey kidney cells.

NTP Toxicology and Carcinogenesis Studies of Two Pentachlorophenol Technical-Grade Mixtures (CAS No. 87-86-5) in B6C3F1 Mice (Feed Studies).

[Enhanced inhibition of splenic lymphocyte proliferation by 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57B1/10 (Ah+Ah+) mice compared to DBA/2 (AhAh) mice].

Effects of immunosuppressive chemicals on lymphoid development in foetal thymus organ cultures.

Effect of splenectomy on heparin treatment in allyl-alcohol-traumatized rat liver.

Nucleic acid binding and mutagenicity of active metabolites of 2-amino-3,8-dimethylimidazo[4,5-f]quinoxaline.

Effects of methylprednisolone on acute lung paraquat toxicity in sheep.

Mutagenicity and in vitro covalent DNA binding of 2-hydroxyamino-3-methylimidazo[4,5-f]quinoline.

DNA adduct formation by alachlor metabolites.

Elevated plasma corticosterone levels and histopathology of the adrenals and thymuses in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

Steroid hormones and medications that alter cancer risks.

Isolation and sequence analysis of amyloid protein AA from a patient with cystic fibrosis.

Screening of pharmacological agents given peripherally with respect to TCDD-induced wasting syndrome in Long-Evans rats.

The acute toxicity of 2,3,4,7,8-pentachlorodibenzofuran (4PeCDF) in the male Fischer rat.

Isolation and structural characterization of thymosin-beta 4 from a human medullary thyroid carcinoma.

An immunotoxicological evaluation of 4,4'-thiobis-(6-t-butyl-m-cresol) in female B6C3F1 mice. 2. Humoral and cell-mediated immunity, macrophage function, and host resistance.

An immunotoxicological evaluation of 4,4'-thiobis-(6-t-butyl-m-cresol) in female B6C3F1 mice. 1. Body and organ weights, hematology, serum chemistries, bone marrow cellularity, and hepatic microsomal parameters.

Catalase prevents increased lung vascular permeability during air emboli in unanesthetized sheep.

Effect of catalase on endotoxin-induced acute lung injury in unanesthetized sheep.

Effects of the TCDD congeners 3,3',4,4'-tetrachlorobiphenyl and 3,3',4,4'-tetrachloroazoxybenzene on lymphoid development in the bursa of Fabricius of the chick embryo.

Mortality among California highway workers.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxicity in yellow perch (*Perca flavescens*).

Morphologic lesions and acute toxicity in rainbow trout (*Salmo gairdneri*) treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Membrane IgM: interactions with the cortical cytoskeleton in the human lymphoblastoid cell line WiL2.

Characterization of trimetrexate transport in human lymphoblastoid cells and development of impaired influx as a mechanism of resistance to lipophilic antifolates.

K-cell-mediated cytotoxicity induced with rat monoclonal antibodies. I. Antibodies of various isotypes differ in their ability to induce cytotoxicity mediated by rat and human effectors.

Protective murine monoclonal antibodies to tetanus toxin.

Effects of TCDD and its congeners 3,3',4,4'-tetrachloroazoxybenzene and 3,3',4,4'-tetrachlorobiphenyl on lymphoid development in the thymus of avian embryos.

Down-modulation of high-affinity receptors for erythropoietin on murine erythroblasts by interleukin 3.

NTP Toxicology and Carcinogenesis Studies of Monuron (CAS No. 150-68-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Factors regulating activation and DNA alkylation by 4-(N-methyl-N-nitrosamino)-1-(3-pyridyl)-1-butanone and nitrosodimethylamine in rat lung and isolated lung cells, and the relationship to carcinogenicity.

Memory B cells express a phenotype consistent with migratory competence after secondary but not short-term primary immunization.

The production of toxic oxygen metabolites by hemocytes of different snail species.

Immunological characterization of thioltransferase from pig liver.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes increases in expression of c-erb-A and levels of protein-tyrosine kinases in selected tissues of responsive mouse strains.

Partial characterization of specific cantharidin binding sites in mouse tissues.

Lymphocyte activation and capping of hormone receptors.

Induction of cytotoxic T lymphocytes by primary in vitro stimulation with peptides.

Suppression of splenic lymphocyte function by 7,12-dimethylbenz[a]anthracene (DMBA) in vitro.

A phospholipase A2 in the supernatant fraction of rat spleen. Its similarity to rat pancreatic phospholipase A2.

Elevation of acetylpolyamine levels in mouse tissues, serum and urine after treatment with radical-producing drugs and lipopolysaccharide.

Depression in gene expression for poly(ADP-ribose) synthetase during the interferon-gamma-induced activation process of murine macrophage tumor cells.

The pathologic and immunologic effects of inhaled acrolein in rats.

Paraquat (gramoxone) poisoning in south-west Hungary, 1977-1984. Toxicological and histopathological aspects of group intoxication cases.

Cohort mortality study of chemical workers with potential exposure to the higher chlorinated dioxins.

Effects of pentachlorophenol on the in vitro and in vivo antibody response.

Background and design of a Danish cohort study of workers in phenoxy herbicide manufacture.

Immunosuppression following exposure to 7,12-dimethylbenz[a]anthracene (DMBA) in Ah-responsive and Ah-nonresponsive mice.

In vivo and in vitro interactions of TCDD and other ligands of the Ah-receptor: effect on embryonic and fetal tissues.

Effect of excess iron in milk replacer on calf performance.

Carcinogenic effects of infantile and long-term 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment in the mouse.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the lactating rat on maternal and neonatal vitamin A status.

A serine proteinase inhibitor produced by an HTLV I virus-transformed human T lymphocyte line.

Han/Wistar rats are exceptionally resistant to TCDD. I.

Endogenous peroxidase activity in human cutaneous and adenoidal mast cells.

Synthesis, cell growth inhibition, and antitumor screening of 2-(p-n-butylanilino)purines and their nucleoside analogues.

Pesticides and cancer risks in agriculture.

Ah receptor: relevance of mechanistic studies to human risk assessment.

Role of fibronectin on the clearance and tissue uptake of antigen and immune complexes in rats.

Biochemical and immunological properties of different electrophoretic forms of juvenile hormone esterase from *Trichoplusia ni* (H₄Bner).

Purification and identification by amino acid sequence analysis of the subunits of the CD3 antigen of human tonsil T-lymphocytes.

Cytotoxic T lymphocytes against a soluble protein.

Lipopolysaccharide-sensitive serine-protease zymogen (factor C) of horseshoe crab hemocytes. Identification and alignment of proteolytic fragments produced during the activation show that it is a novel type of serine protease.

An improved method for the inhibition of endogenous peroxidase non-deleterious to lymphocyte surface markers. Application to immunoperoxidase studies on eosinophil-rich tissue preparations.

3,3',4,4'-Tetrachlorobiphenyl in pregnant mice: embryotoxicity, teratogenicity, and toxic effects on the cultured embryonic thymus.

alpha-Naphthoflavone antagonism of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced murine lymphocyte ethoxoresorufin-O-deethylase activity and immunosuppression.

An in vitro model for studying the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin to human thymus.

Isolation and complete amino acid sequence of human thymopoietin and splenin.

The primary structure of pig liver thioltransferase.

Sulphotransferase-mediated covalent binding of the carcinogen 7,12-dihydroxymethylbenz[a]anthracene to calf thymus DNA and its inhibition by glutathione transferase.

Circadian alterations in prolactin, corticosterone, and thyroid hormone levels and down-regulation of prolactin receptor activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Comparative effects of BHA and ascorbic acid on the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in rats.

The roles of haemolymphatic lipoproteins in the oogenesis of *Rhodnius prolixus*.

Phosphorylation of human fibrinogen in vitro with protein kinase C: characterization of the phosphorylated sites.

Amino acid sequence of UP1, an hnRNP-derived single-stranded nucleic acid binding protein from calf thymus.

Acute effect of paraquat on lung fluid balance and prostanoid production in awake sheep.

Carcinogenicity testing of atrazine: preliminary report on a 13-month study on male Swiss albino mice treated by intraperitoneal administration.

The effect of prenatal exposure to the n-butylester of 2,4-dichlorophenoxyacetic acid (2,4-D) on the immune response in mice.

Chronic progredient diffuse alveolar damage probably related to exposure to herbicides.

Depletion of human lymphocytes from peripheral blood and bone marrow by affinity ligands conjugated to agarose-polyacrolein microsphere beads.

In vitro study of paraquat effects on malondialdehyde formation in thymus cells.

Soft-tissue sarcomas, malignant lymphomas, and 2,3,7,8-TCDD exposure in Seveso.

Induction of experimental allergic neuritis in the BN rat: P2 protein-specific T cells overcome resistance to actively induced disease.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on IgA serum and bile levels in rats.

Murine plasmacytomas constitute a class of natural heat-shock variants in which the major inducible hsp-68 gene is not expressed.

Hyperferremia in immunosuppressed patients with acute nonlymphocytic leukemia and the risk of infection.

Hematotoxic effects of 3,5-dinitro-4-chloro-alpha,alpha,alpha-trifluorotoluene, a water contaminant.

Teratologic evaluation of hexabrominated naphthalenes in C57BL/6N mice.

Synthesis, biologic and toxic effects of the major 2,3,7,8-tetrachlorodibenzo-p-dioxin metabolites in the rat.

Regression of methyl bromide-induced forestomach lesions in the rat.

The effects of nonadecafluoro-n-decanoic acid on serum retinol and hepatic retinyl palmitate hydrolase activity in male Sprague-Dawley rats.

Immunosuppression without liver induction by subchronic exposure to 2,7-dichlorodibenzo-p-dioxin in adult female B6C3F1 mice.

A monoclonal antibody preventing binding of tissue-type plasminogen activator to fibrin: useful to monitor fibrinogen breakdown during t-PA infusion.

Modulation of IgM anti-lymphocyte antibody-reactive T cell surface antigens in systemic lupus erythematosus.

Phenotypic alterations in tumors that developed from threshold subcutaneous inocula. I. Reduced binding of natural antibodies and sensitivity to hypotonic lysis.

S-antigen-specific rat T cell lines recognize peptide fragments of S-antigen and mediate experimental autoimmune uveoretinitis and pinealitis.

Syntheses and effects of [Glu34]-thymopoietin II fragment 32-45 and its analogs on the impaired T-cell transformation in a patient with common variable immunodeficiency.

Subchronic oral toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the guinea pig: comparisons with a PCB-containing transformer fluid pyrolysate.

Desensitization of contact allergy to DNFB in mice. III. Characteristics of immediate desensitization induced by haptenated spleen cells.

Interaction of monoclonal antibodies with the IgE-receptor on rat mast cells and rat basophilic leukemia (RBL) cells.

A review of porphyria and cancer and the missing link with human exposure to hexachlorobenzene.

The C57B1/6 nu/nu, lpr/lpr mouse. III. Autoimmunity status.

Effects of various inhibitors of oxidative phosphorylation on energy metabolism, macromolecular synthesis and cyclic AMP production in isolated rat thymocytes. A regulating role for the cellular energy state in macromolecular synthesis and cyclic AMP production.

Changes in hamster hepatic cytochrome P-450, ethoxycoumarin O-deethylase, and reduced NAD(P): menadione oxidoreductase following treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin. Partial dissociation of temporal and dose-response relationships from elicited toxicity.

Stimulation of cytotoxic T-lymphocyte responses by rabies virus glycoprotein and identification of an immunodominant domain.

2,3,7,8-Tetrachlorodibenzo-p-dioxin metabolism and disposition in yellow perch.

Metabolism and disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rainbow trout.

Cellular uptake of 3,5,3'-triiodothyronine and thyroxine by red blood and thymus cells.

The role of formaldehyde in hydrazine-induced methylation of liver DNA guanine.

A modified method of fine-granular cationic iron colloid preparation: its use in light and electron microscopic detection of anionic sites in the rat kidney glomerulus and certain other tissues.

Proliferative responses by immune murine popliteal lymph node cells to high-molecular-weight basic allergen of ryegrass pollen and its cyanogen bromide fragments.

Studies on the metabolism of the neurotoxic tri-o-cresyl phosphate. Distribution, excretion, and metabolism in male cats after a single, dermal application.

A carrier method for the assessment of the effectiveness of disinfectants against *Mycobacterium tuberculosis*.

Assessment of pentachlorophenol toxicity in newborn calves: clinicopathology and tissue residues.

Humoral immunotoxicity of polychlorinated diphenyl ethers, phenoxyphenols, dioxins and furans present as contaminants of technical grade pentachlorophenol.

A follow-up study of cancer incidence among workers in manufacture of phenoxy herbicides in Denmark.

Hemoperfusion-hemodialysis ineffective for paraquat removal in life-threatening poisoning?

DNA-damaging properties and cytotoxicity in human fibroblasts of tetrachlorohydroquinone, a pentachlorophenol metabolite.

Hydrogen peroxide has a role in the aggregation of human platelets.

The pulmonary uptake, accumulation, and metabolism of xenobiotics.

Evaluation of immune function in mice exposed to Ordram.

The primary structure of human tissue amyloid P component from a patient with primary idiopathic amyloidosis.

Polychlorinated dibenzofurans (PCDFs): correlation between in vivo and in vitro structure-activity relationships.

Delayed wasting syndrome and alterations of liver gluconeogenic enzymes in rats exposed to the TCDD congener 3,3', 4,4'-tetrachloroazoxybenzene.

Suppressive effect of secondary *Toxoplasma gondii* infection on antibody responses in mice.

Cyclic GMP levels in interferon treated cells.

Pharmacokinetics of elimination of 6-mercaptopurine in the urine of children with acute lymphoblastic leukemia.

Effect of thyroidectomy and thyroxine on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immunotoxicity.

Inducing potency of aryl hydrocarbon hydroxylase activity in human lymphoblastoid cells and mice by polychlorinated dibenzofuran congeners.

Further studies on the activation of glucocerebrosidase by a heat-stable factor from Gaucher spleen.

The role of receptors in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) toxicity.

Structural properties of the methionine-containing subfraction of rat liver histone H1.

NTP Toxicology and Carcinogenesis Studies of 1,2-Dichlorobenzene (o-Dichlorobenzene) (CAS No. 95-50-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Influence of high dietary iron as ferrous carbonate and ferrous sulfate on iron metabolism in young calves.

Analysis of the binding of a hemopoietic growth factor, P-cell-stimulating factor, to a cell surface receptor using quantitative absorption of bioactivity.

Amino acid sequence of the UP1 calf thymus helix-destabilizing protein and its homology to an analogous protein from mouse myeloma.

The primary structure of two polypeptide chains from preparations of homeostatic thymus hormone (HTH alpha and HTH beta) entire-chain identities to two histones.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the uptake, distribution and excretion of a single oral dose of [11,12-³H]retinyl acetate and on the vitamin A status in the rat.

Polychlorinated aromatic hydrocarbon lethality, mixed-function oxidase induction, and uroporphyrinogen decarboxylase inhibition in the chick embryo: dissociation of dose-response relationships.

Selective depression of thymus-independent anti-DNP antibody responses induced by adult but not neonatal splenectomy.

A hydroxylapatite microassay for receptor binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3-methylcholanthrene in various target tissues.

Fetal thymus organ culture as an in vitro model for the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin and its congeners.

The acute effects of single and repeated injections of acrolein and other aldehydes.

Antibody-dependent cytotoxicity of human and mouse mononuclear cells against *Trypanosoma cruzi* epimastigotes.

Release of amino-terminal procollagen peptides in paraquat-induced acute pulmonary fibrosis.

Hexadecane increases the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): is brown adipose tissue the primary target in TCDD-induced wasting syndrome?

Enhancing effects of monocytes on modulation of a lymphocyte membrane antigen.

Immunosuppression in weanling and adult Sprague-Dawley rats induced by acute exposure to 3,3',4,4'-tetrachloroazoxybenzene.

Separation of wasting syndrome and lethality caused by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

A monoclonal antibody to hemoglobin F.

Synergistic effects of antigen and soluble T-cell factors in B-lymphocyte activation.

Polychlorinated dibenzofurans (PCDFs): effects of structure on binding to the 2,3,7,8-TCDD cytosolic receptor protein, AHH induction and toxicity.

Monoclonal antibody to murine gamma interferon inhibits lymphokine-induced antiviral and macrophage tumoricidal activities.

Dioxin in soil: bioavailability after ingestion by rats and guinea pigs.

Identification of an anti-monocyte monoclonal antibody that is specific for membrane complement receptor type one (CR1).

Effect of thyroidectomy and thyroxine on 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induced toxicity.

Purification to homogeneity and partial characterization of interleukin 2 from a human T-cell leukemia.

Iron pharmacokinetics after administration of ferric-hydroxide-polymaltose complex in rats.

Toxicologic, pathologic, and immunotoxic effects of 2,4-dichlorophenol in rats.

Lymphocyte bacterial rosette test: methodological details and effect of metabolic inhibitors and divalent cations.

Cathepsins J and K: high molecular weight cysteine proteinases from human tissues.

The covalent protein structure of insecticyanin, a blue biliprotein from the hemolymph of the tobacco hornworm, *Manduca sexta* L.

Use of bacteria and yeasts to identify T lymphocytes in peripheral blood and lymphoid tissues of healthy guinea pigs and guinea pigs fed aflatoxin.

Oxygen uptake associated with Sendai-virus-stimulated chemiluminescence in rat thymocytes contains a significant non-mitochondrial component.

Conservation in rat liver of light and heavy subunit sequences of mammalian ferritin. Presence of unique octopeptide in the light subunit.

Cellular distribution of thyroid myosin.

Different susceptibility of mouse tissues to porphyrinogenic effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Ontogeny of the cytosolic receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in rat liver, lung, and thymus.

Differential induction of two 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible forms of cytochrome P-450 in extrahepatic versus hepatic tissues.

Sensitivity to suppression of cytotoxic T cell generation by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) is dependent on the Ah genotype of the murine host.

The in vitro metabolism by homogenates of goldfish (*Carassius auratus*) liver of pentachloro-2-(chloromethyl sulphonamido) diphenyl ether, the major component and active ingredient of the mothproofing agent Eulan WA New.

Pharmacologic modulation in vitro of human histamine-induced suppressor cell activity.

Toxicologic studies in a fatal overdose of 2,4-D, MCP, and chlorpyrifos.

[Histological picture of the internal organs of rats poisoned with 2,4-dichlorophenoxyacetic acid].

Iron overload of spleen, liver and kidney as a consequence of hemolytic anaemia.

Lymphocyte transformation to connective tissue antigens in adult and juvenile rheumatoid arthritis, osteoarthritis, ankylosing spondylitis, systemic lupus erythematosus, and a nonarthritic control population.

Energy-dependent reduced drug binding as a mechanism of Vinca alkaloid resistance in human leukemic lymphoblasts.

[Relaxation of DNA-protein interactions in mouse lymphoblastic leukemic cells exposed to antineoplastic agents].

Epidemiological study of socioeconomic factors and clinical findings in Hodgkin's disease, and reanalysis of previous data regarding chemical exposure.

Enhancement of carrageenan and dextran-induced edemas by 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds.

Molecular basis of hypoxanthine-guanine phosphoribosyltransferase deficiency in a patient with the Lesch-Nyhan syndrome.

Isolation and characterization of a CNBr cleavage peptide of influenza viral hemagglutinin stimulatory for mouse cytolytic T lymphocytes.

Suppression of unprimed T and B cells in antibody responses by irradiation-resistant and plastic-adherent suppressor cells in *Toxoplasma gondii*-infected mice.

Plasma membrane-acting drugs inhibit the effect of dengue virus-induced cytotoxic factor.

Impairment of blastogenic response of splenic lymphocytes from iron-deficient mice: in vivo repletion.

[Pharmacological and clinico-pharmacological studies of a combination preparation for calves having antianemia and general tonic action].

The T8 antigen is a multimeric complex of two distinct subunits on human thymocytes but consists of homomultimeric forms on peripheral blood T lymphocytes.

A monoclonal antibody with ability to distinguish between NH₂-terminal fragments derived from fibrinogen and fibrin.

Inhibitory effect of bovine serum albumin on acid deoxyribonuclease from rat small intestinal mucosa.

Cellular and genetic basis for suppression of cytotoxic T cell generation by haloaromatic hydrocarbons.

Purification of pregnancy-specific beta 1-glycoprotein with a monoclonal antibody immunoadsorbent.

Enzymatic toxicogenation of "activated" cyclophosphamide by 3'-5' exonucleases.

Toxicity of 3,3',4,4'- and 2,2',5,5'-tetrabromobiphenyl: correlation of activity with aryl hydrocarbon hydroxylase induction and lack of protection by antioxidants.

[Migration and adhesiveness of human and rabbit blood leukocytes under the influence of metabolic blocking agents and hirudin].

Mortality of 2,4-dichlorophenoxyacetic acid and 2,4,5-trichlorophenoxyacetic acid herbicide applicators in Finland: first report of an ongoing prospective cohort study.

Immunotoxicity of technical pentachlorophenol (PCP-T): depressed humoral immune responses to T-dependent and T-independent antigen stimulation in PCP-T exposed mice.

Young Scientists Award lecture 1981: The identification of an accumulation system for diamines and polyamines into the lung and its relevance to paraquat toxicity.

Influence of diuretics on urinary general base catalytic activity and cyclophosphamide-induced bladder toxicity.

The accumulation of diamines and polyamines into rat lung slices.

Leukemia and farm practices in Iowa.

Immunity to homologous type III collagen after partial meniscectomy and sham surgery in rabbits.

The influence of antigen density and a comparison of IgG and IgM antibodies in the anti-complementary modulation of lymphocytic surface immunoglobulin.

Synthesis of pseudo cofactor analogues as potential inhibitors of the folate enzymes.

Cancer risks associated with agriculture: epidemiologic evidence.

Epidemiological study of nasal and nasopharyngeal cancer and their relation to phenoxy acid or chlorophenol exposure.

[Ability to redistribute surface receptors in transplantable cell lines].

Differential effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on nuclear RNA polymerase activity in the rat liver and thymus.

Antigenic polypeptide fragments of a receptor related to the Fab fragment of human immunoglobulin from thymus-derived lymphocytes.

[Untersuchungen über Triacin-Rückstände in Thymus vulgaris und Salvia officinalis nach Anwendung der Herbizide Gesagard 50 und Semeron 25.].

[Der Einsatz von Prometryn und Desmetryn bei Thymus vulgaris, Salvia officinalis und Silybum marianum und ihre Auswirkung auf Ertrag und Inhaltsstoffe].

The immunosuppressive effects of trichothecenes and cyclochlorotine on the antibody responses in guinea pigs.

Cytosolic and nuclear binding proteins for 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat thymus.

Inhibition of E-rosette formation and phagocytosis by human blood leucocytes after treatment with the dengue virus-induced cytotoxic factor.

[The use of AET-pretreated sheep red blood cells in the detection of lymphocytes with limited affinity for E receptors].

Toxicity of chlorinated phenoxy acids in combination with 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57BL/6 male mice.

Subchronic administration of technical pentachlorophenol to lactating dairy cattle: immunotoxicologic evaluation.

Pseudodiphtheria: prominent pharyngeal membrane associated with fatal paraquat ingestion.

Carcinogenicity of picloram.

Tissue retention of arsenic in rats fed with founder or cacodylic acid.

[Pentachlorophenol concentrations in tissues and body fluids of normal persons (author's transl)].

Antigen receptors on murine T lymphocytes in contact sensitivity. I. Functional inhibition of effector T cells by monovalent 2,4-dinitrophenol: implication for a two-receptor model.

The role of iron in the toxicity of 2,3,7,8-tetrachlorodibenzo-(p)-dioxin (TCDD).

Nonspecific suppression of initiation of memory cells in *Toxoplasma gondii*-infected mice.

Nonspecific suppression of primary antibody responses and presence of plastic-adherent suppressor cells in *Toxoplasma gondii*-infected mice.

A comparison of purified poly(ADP-ribose) polymerases from Ehrlich ascites tumor cells, pig thymus, and HeLa S3 cells.

Specific hypo-responsive granulomatous tissue reactions in *Brugia pahangi*-infected jirds.

Production and characterization of a monoclonal antibody against the seed lectin of the *Dolichos biflorus* plant.

Adenylate cyclase and guanylate cyclase activity in normal and leukemic human lymphocytes.

Lymphocytotoxins in infectious mononucleosis: a non-cytotoxic effect on lymphocytes at 37 degrees C and the influence of cell metabolism on their cytotoxicity in vitro.

Vitamin B12-dependent methyltetrahydrofolate: homocysteine methyltransferase activity in normal and leukemic human hematopoietic cells.

The influence of malnutrition on the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in rats.

Antigenic modulation of lymphocytic surface immunoglobulin yielding resistance to complement-mediated lysis. II. Relationship to redistribution of the antigen.

Estimation of genetic risks of alkylating agents. VI. Exposure of mice and bacteria to methyl bromide.

Hemoglobins, XXXVIII. Amino acid sequence of a dimeric hemoglobin (erythrocrucorin), component VI from *Chironomus thummi thummi* (CTT VI).

Porphyrogenic effect of chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin in female rats. Dose-effect relationship following urinary excretion of porphyrins.

Complete amino acid sequence of bovine thymosin beta 4: a thymic hormone that induces terminal deoxynucleotidyl transferase activity in thymocyte populations.

Amino acid sequence homologies between the high-mobility-group proteins, HMG-T from trout testis and HMG-1 and -2 from calf thymus: is the poly-aspartic-glutamic acid polypeptide within the main chain?

Toxicity and bioaccumulation of pentachlorophenol in broiler chickens.

The chronic toxicity of technical and analytical pentachlorophenol in cattle. I. Clinicopathology.

Optimal fixation conditions for the immunoperoxidase identification of human J chain from tissue sections.

Effect of chlorophenols on porphyrin metabolism in rats and chick embryo.

Lymphocyte capping induced by polycationized ferritin.

Folate analogues altered in the C9-N10 bridge region. 16. Synthesis and antifolate activity of 11-thiohomoaminopterin.

Antibodies specific for histone H2b fragments 1-58 and 63-125 in antisera to H2b and to the fragments: probes for histone evolution.

Antileukemic activity of 2-bis(2-methylthio)vinyl-1-methylquinolinium iodides.

Modification of mitochondrial respiration by aging and dietary restriction.

General health effects of prolonged exposure to 3,3',4,4'-tetrachloroazobenzene and 3,3',4,4'-tetrachloroazoxybenzene in rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin: segregation of toxicity with the Ah locus.

Role of the endocrine system in the action of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the thymus.

Examination of bone marrow, immunologic parameters and host susceptibility following pre- and postnatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Effect of polychlorinated biphenyl, dibenzofuran and dibenzo-p-dioxin on the susceptibility of male mice to endotoxin.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on macrophage and natural killer cell-mediated cytotoxicity in mice.

The renal cortical lymphatic system in dogs with unimpeded lymph and urine flow.

Bioassay of Phenol for Possible Carcinogenicity (CAS No.108-95-2).

Effect of acute exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin on humoral antibody production in mice.

Necrotropic protective effect of Ca-Mg gluconolactate on allyl alcohol-induced liver necrosis in rats.

The effect of acute administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on humoral antibody production and cell-mediated activities in mice.

[Histo enzymatic reactions in the cells of the reticuloendothelial system of the liver and spleen and hepatocytes in acute Morfamquat dichloride poisoning].

[Action of herbicide "Atrazine" on thymus and bursa in chickens].

Induction in vitro of reversible immunosuppression and inhibition of B cell receptor regeneration by defined metabolites of cyclophosphamide.

Augmentation of antitumor cytotoxicity of MOPC-315 tumor bearer spleen cells by depletion of dinitrophenol-adherent cells prior to in vitro immunization.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on splenic lymphocyte transformation in mice after single and repeated exposures.

Laboratory studies on the immune effects of halogenated aromatics.

Long-term toxicologic studies of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in laboratory animals.

Isolation and immunochemical characterization of antibodies from the sera of cancer patients which are reactive against human melanoma cell membranes by affinity chromatography.

Capping of surface immunoglobulin on 'hairy cells' is independent of energy production.

Malignant lymphoma of histiocytic type and exposure to phenoxyacetic acids or chlorophenols.

Detection of early lymphocyte activation by the fluorescent cell membrane probe N-phenyl-1-naphthylamine.

The isolation and partial sequence of peptides produced by cyanogen bromide cleavage of calf thymus non-histone chromosomal high-mobility-group protein 2. Sequence homology with non-histone chromosomal high-mobility-group protein 1.

Studies of the mechanisms of toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Fragmentation of the human transplantation antigen heavy chain by limited proteolysis, acid cleavage, and cyanogen bromide treatment.

Toxicity of 4-chloro-O-cresol to rat: I. Light microscopy and chemical observations.

Bioassay of calcium cyanamide for possible carcinogenicity.

Bioassay of 2,7-dichlorodibenzo-p-dioxin (DCDD) for possible carcinogenicity.

The effect of perinatal exposure to tetrachlorodibenzo-p-dioxin on the immune response of young mice.

Effects of 2,3,7,8-tetrachlorodibenzofuran (TCDF) on the immune system in guinea pigs.

[Lung alterations after paraquat poisoning (author's transl)].

Carcinogenic and antitumor effects of aminotriazole on acatalasemic and normal catalase mice.

[Chemical weed control in plantations of thyme (*Thymus vulgaris* L.)].

Binding to radioactivity from [¹⁴C] paraquat to rat lung protein, in vitro.

Migration of human lymphocytes. II. Variation of lymphocyte distribution.

[Some peculiarities of ATPase in tumor mitochondria].

Leukocyte surface origin of human alpha1-acid glycoprotein (orosomuroid).

The distribution of antigen in flare up reaction in contact sensitivity to DNCB.

Studies on 2,3,7,8-tetrachlorodibenzo-p-dioxin induced immune suppression and decreased resistance to infection: endotoxin hypersensitivity, serum zinc concentrations and effect of thymosin treatment.

Isolation and partial sequence of the cyanogen bromide peptides from calf thymus non-histone chromosomal protein HMG 1.

[Investigation of adenosinetriphosphatase activity of rat liver and thymus cell nuclei].

Distribution of clozapine in the rat: localization in lung.

Short-term toxicity of allyl alcohol in rats.

Molecular weights of the Thy-1 glycoproteins from rat thymus and brain in the presence and absence of deoxycholate.

[Effect of 2,4-dinitrophenol on transmembrane potential difference in frog tissues].

Concentration levels of 2,4-D and 2,4,5-T in forensic material.

Acute and subchronic toxicity of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in male rat. I. Light microscopy and tissue concentrations of MCPA.

[The toxic effects of 2,4,5-trichlorophenoxyacetic acid on the quail].

Impairment of thymus-dependent immune functions by exposure of the developing immune system to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Expression of protein HC on the plasma membrane of different human cell types.

Suppressor cells in tolerance to contact sensitivity active against hapten-syngeneic and hapten-allogeneic determinants.

[Some additional facts about thymus (author's transl)].

Mechanism of uptake of nitrosoureas by L5178Y lymphoblasts in vitro.

Molecular characterization of limulin, a sialic acid binding lectin from the hemolymph of the horseshoe crab, *Limulus polyphemus*.

Energy metabolism and T-cell-mediated cytotoxicity. I. Synergism between inhibitors of respiration and glycolysis.

Nitric oxide activates guanylate cyclase and increases guanosine 3':5'-cyclic monophosphate levels in various tissue preparations.

Regulation of cardiac output during 2,4-dinitrophenol-induced tissue hypermetabolism in the dog.

Effect of various reagents on the susceptibility of target cells to the cytotoxicity of guinea pig lymphotoxin (GLT).

Strain differences in histopathologic, hematologic, and blood chemistry changes induced in mice by a technical and a purified preparation of 2,4,5-trichlorophenoxyacetic acid.

Mutagenicity and toxicity of amitrole. II. Human lymphocyte culture tests.

Sequential histopathologic, hematologic, and blood chemistry changes induced in mice by a technical and a purified preparation of 2,4,5-trichlorophenoxyacetic acid.

Liver enlargement induced by the herbicide 2,4,5-trichlorophenoxyacetic acid (2,4,5-T).

High uptake in the erythrocytes and the spleen of the quaternary dipyridylum salt paraquat injected intravenously in hypotonic solutions.

Immunologic response and factors affecting its assessment.

Human lymphocyte motility: normal characteristics and anomalous behavior of chronic lymphocytic leukemia cells.

Sheep erythrocytes binding ability on a mouse renal adenocarcinoma cell line and its hybrid with human lymphocytes.

[On the chloranilic acid reaction (RAC) proposed by Closs (author's transl)].

Synthesis of the antileukemic compound N,N(11)-[5-[bis(2-chloroethyl)amino]-1, 3-phenylene]bisurea.

Factor B of the alternative complement pathway on human lymphocytes.

Analysis of T-cell-specific functions in continuous lymphocytic cell lines. II. A T-cell line which forms rosettes with normal thymocytes of the same species.

Properties of Fc γ receptors in normal and malignant human tissues.

Hemocyanin of the horseshoe crab, *Limulus polyphemus*. Structural differentiation of the isolated components.

Ca²⁺ -uptake into noradrenaline-storing granules of bovine splenic nerves.

Homocysteine thiolactone metabolism in malignant cells.

[Continuous inhalation of small amounts of formaldehyde: experimental study in the rat].

The dependence of specific nuclear binding of glucocorticoids by rat thymus cells on cellular ATP levels.

The significance of ¹²⁵I as a tracer for lymphocytes, liver cells and erythrocytes after iodination by the lactoperoxidase-H₂O₂ technique.

Short-term oral and dermal toxicity of MCPA and MCPP.

Irritancy of cyclophosphamide-derived aldehydes (acrolein, chloracetaldehyde) and their effect on lymphocyte distribution in vivo: protective effect of thiols and bisulphite ions¹.

Isolation and characterization of CNBr peptides of human (α 1 (III))₃ collagen and tissue distribution of (α 1 (I))₂ α 2 and (α 1 (III))₃ collagens.

Increased susceptibility to bacterial infection as a sequela of exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Tissue distribution, excretion and biological effects of [¹⁴C]tetrachlorodibenzo-p-dioxin in rats.

Epstein-barr virus-induced cap formation in human lymphoblastoid cells.

The involvement of receptro sulphhydryl groups in the binding of steroids to the cytoplasmic glucocorticoid receptor from rat thymus.

Specific suppression of the antibody response in vitro by serum from paralyzed mice.

Mechanism and site of small intestinal absorption of alpha-tocopherol in the rat.

The methionine-containing subfraction of F1 histone from rat tissues.

Lymphocyte subpopulations. Human red blood cell rosettes.

Effect of polycations and polyanions on behavior of sheep red blood cell rosettes of human lymphocytes.

[Alveolitis and pulmonary fibrosis--an attempt at a synopsis].

[Dynamics of changes in the immune structure of the lymphatic follicles of the spleen in pesticide poisoning].

Fetal uptake and embryogenetic effects of aminotriazole in mice.

The preparation and purification of HL-A monospecific antigens using platelets and various lymphoid sources.

X-accumulation of labelled aminotriazole in some transplanted tumours in mice.

Movement of IgG receptors on the lymphocyte surface induced by protein A of Staphylococcus aureus.

Suppression of cellular immunity in rats and mice by maternal treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Histone and casein kinases of lactating bovine mammary gland.

Histones of Drosophila embryos. Electrophoretic isolation and structural studies.

Partial amino acid sequence of two new arginine-serine rich histones from male gonads of the sea urchin (*Parechinus angulosus*).

Residual bromide in tissues of rats fed methyl bromide fumigated diets.

Chemical studies of histone acetylation. Substrate specificity of a histone deacetylase from calf thymus nuclei.

Table 2A-14 – Titles of Pubmed Records Related to Gastrointestinal Adverse Events Following Herbicide Exposure

APPENDICITIS; *BOWEL*; *CELIAC*; *COLITIS*; * COLON *; *CONSTIPAT*; *CROHN*; *DIARRH*; *DIGESTIVE*; *DIVERTICULITIS*; *ESOPHAG*; *GASTRINOMA*; *HEMORRHOID*; *NAUSEA*; *PANCREATITIS*; *PHARYNGITIS*; *RECTAL*; *SPLEEN*; *STOMACH*; *TRACHE*; *ULCER*; *VOMIT*; COLON (2505)

Inhaled paraquat-induced lung injury in rat, improved by the extract of *Zataria multiflora* boiss and PPAR α agonist, pioglitazone.

Investigating adverse effects of chronic dietary exposure to herbicide glyphosate on zootechnical characteristics and clinical, biochemical and immunological blood parameters in broiler chickens.

Glyphosate Disorders Soil Enchytraeid Gut Microbiota and Increases Its Antibiotic Resistance Risk.

Biochemical and physiological alterations caused by Diuron and Triclosan in mussels (*Mytilus galloprovincialis*).

Atrazine exposure promotes cardiomyocyte pyroptosis to exacerbate cardiotoxicity by activating NF- κ B pathway.

Synthesis, Characterization, Antioxidant, and Anticancer Activity against Colon Cancer Cells of Some Cinnamaldehyde-Based Chalcone Derivatives.

Inclusion of trans-cinnamaldehyde and caprylic acid in feed results in detectable concentrations in the chicken gut and reduces foodborne pathogen carriage.

A Forensic Case of Suicide Ingestion of Paraquat Herbicide: New Histological Insights and Revision of the Literature.

Cinnamic Aldehyde Causing Chronic Oral Mucosal Ulcerations.

Volatilomic signatures of different strains of *Helicobacter pylori*.

Supplementation with sesame oil suppresses genotoxicity, hepatotoxicity and enterotoxicity induced by sodium arsenite in rats.

Food for thought-The link between *Clostridioides difficile* metabolism and pathogenesis.

Endoscopic Diagnosis of Hookworm Disease in a Patient with Severe Iron Deficiency Anemia: A Case Report.

Plasma metabolites of aromatic amino acids associate with clinical severity and gut microbiota of Parkinson's disease.

Pan msr gene deleted strain of Salmonella Typhimurium suffers oxidative stress, depicts macromolecular damage and attenuated virulence.

Management of Acute Ferrous Sulfate Poisoning Using Activated Charcoal Monotherapy: A Case Report.

Acute oral poisoning due to pretilachlor herbicide - a rare case report from Nepal.

Effect of replacing inorganic iron with iron-rich microbial preparations on growth performance, serum parameters and iron metabolism of weaned piglets.

Changes in the Phenotype of Intramural Inhibitory Neurons of the Porcine Descending Colon Resulting from Glyphosate Administration.

Influence of in vitro gastrointestinal digestion and colonic fermentation on carbonyl scavenging capacity of fiber-bound polyphenols from quinoa.

The Effects of Dietary Silybin Supplementation on the Growth Performance and Regulation of Intestinal Oxidative Injury and Microflora Dysbiosis in Weaned Piglets.

Assessment of glyphosate and its metabolites' residue concentrations in cultured African Catfish offered for sale in selected markets in Ibadan, Oyo State, Nigeria.

Autoantibodies to beta tubulin in autoimmune liver diseases - relation to pANCA and clinical relevance.

Acute paraquat poisoning complicated by acute kidney injury and lung fibrosis: a case report from Nepal.

Carbonyl cyanide-4-(trifluoromethoxy)phenylhydrazone-induced toxicities in rats: comparative study with other mitochondrial uncouplers (2,4-dinitrophenol, OPC-163493 and tolcapone).

Microbial dietary protein metabolism regulates GLP-1 mediated intestinal transit.

A fixed 20:1 combination of cafedrine/theodrenaline increases cytosolic Ca(2+) concentration in human tracheal epithelial cells via ryanodine receptor-mediated Ca(2+) release.

Co-administration of L-Ascorbic Acid and $\hat{\pm}$ -Tocopherol Alleviates Arsenic-Induced Immunotoxicities in the Thymus and Spleen by Dwindling Oxidative Stress-Induced Inflammation.

Features of fatal pesticide ingestion in South Australia.

Case report: Occupational poisoning incident from a leak of chloroacetyl chloride in Jinan, Shandong, China.

Prevention of DSS-induced colitis in mice with water kefir microbiota via anti-inflammatory and microbiota-balancing activity.

Environmental cadmium exposure alters the internal microbiota and metabolome of Sprague-Dawley rats.

Untargeted Analysis of Serum Metabolomes in Dogs with Exocrine Pancreatic Insufficiency.

Development and Evaluation of In Situ Gel Formation for Treatment of Mouth Ulcer.

Safety monitoring of oral iron supplements in pregnant women with anemia: a multi-center observational clinical study.

The Effect of Oral Iron Supplementation on Gut Microbial Composition: a Secondary Analysis of a Double-Blind, Randomized Controlled Trial among Cambodian Women of Reproductive Age.

Altered fecal microbiome and metabolome profiles in rat models of short bowel syndrome.

Diagnostic Dilemma in Fatal Paraquat Poisoning: An Autopsy Case Report.

A case of severe paraquat poisoning treated by continuous hemodiafiltration without sequelae.

Protective effects of *Acetobacter ghanensis* against gliadin toxicity in intestinal epithelial cells with immunoregulatory and gluten-digestive properties.

Acute pesticide poisoning in the central part of Iran: A 4-year cross-sectional study.

Overview of Adductomics in Toxicology.

Mulberry leaf extract improves intestinal barrier function and displays beneficial effects on colonic microbiota and microbial metabolism in weaned piglets.

Beneficial metabolic transformations and prebiotic potential of hemp bran and its alcalase hydrolysate, after colonic fermentation in a gut model.

Andrographolide-based potential anti-inflammatory transcription inhibitors against nuclear factor NF-kappa-B p50 subunit (NF- κ B p50): an integrated molecular and quantum mechanical approach.

Glutathione Protects against Paraquat-Induced Oxidative Stress by Regulating Intestinal Barrier, Antioxidant Capacity, and CAR Signaling Pathway in Weaned Piglets.

Treatment of Gastrointestinal Corrosive Burns Caused by Highly Lethal Glyphosate Solution Poisoning.

Glyphosate-Based Herbicide Causes Cellular Alterations to Gut Epithelium of the Neotropical Stingless Bee *Melipona quadrifasciata quadrifasciata* (Hymenoptera: Meliponini).

Identification of environmental factors that promote intestinal inflammation.

Gut dysfunction may be the source of pathological aggregation of alpha-synuclein in the central nervous system through Paraquat exposure in mice.

Histopathological, immunohistochemical, and molecular investigation of atrazine toxic effect on some organs of adult male albino rats with a screening of *Acacia nilotica* as a protective trial.

Lycopene Ameliorate Atrazine-Induced Oxidative Damage in the B Cell Zone via Targeting the miR-27a-3p/Foxo1 Axis.

Evidence for the efficacy of the emetic PP796 in paraquat SL20 formulations - a narrative review of published and unpublished evidence.

A dose-related positive effect of inhaled simvastatin-loaded PLGA nanoparticles on paraquat-induced pulmonary fibrosis in rats.

Digestive tract toxicity associated with exposure to 2,4-dichlorophenoxyacetic acid in rats.

The toxicokinetics of acute paraquat poisoning in specific patients: a case series.

Biochemical and cellular responses of the freshwater mussel, *Hyriopsis bialata*, to the herbicide atrazine.

Time-resolved proteome and transcriptome of paraquat-induced pulmonary fibrosis.

Phenotypic analyses, protein localization, and bacteriostatic activity of *Drosophila melanogaster* transferrin-1.

The study of human serum metabolome on the health effects of glyphosate and early warning of potential damage.

Glyphosate exposure modulates lipid composition, histo-architecture and oxidative stress status and induces neurotoxicity in the smooth scallop *Flexopecten glaber*.

Histopathological, Immunohistochemical, And Molecular Alterations In Brain Tissue And Submandibular Salivary Gland Of Atrazine-Induced Toxicity In Male Rats.

Lycopene ameliorates atrazine-induced pyroptosis in spleen by suppressing the Ox-mtDNA/Nlrp3 inflammasome pathway.

[Preliminary study on time-dependent changes of intestinal tract and brain-gut axis in mice model of Parkinson's disease induced by paraquat].

Toxicity of commercial atrazine in *Rattus norvegicus* organs as a function of concentration: histopathological, ultrastructural and hematological evaluation.

Does roundup affect zinc functions in a bivalve mollusk in ex vivo exposure?

Toxicity of the herbicides used on herbicide-tolerant crops, and societal consequences of their use in France.

Evaluation of myenteric neurons in the colon of rats exposed to 2,4 dichlorophenoxyacetic acid herbicide.

The potential risks of herbicide butachlor to immunotoxicity via induction of autophagy and apoptosis in the spleen.

Lung transplantation in a woman with paraquat poisoning that led to pulmonary fibrosis-Widely reported by the media: A case report.

[Glyphosate detection in the duodenal fluid of horses with gastric ulcer syndrome].

Acute diquat poisoning causes rhabdomyolysis.

Effects of replacing fish meal with cottonseed protein concentrate on the growth, immune responses, digestive ability and intestinal microbial flora in *Litopenaeus vannamei*.

Evaluation of cinnamaldehyde mucoadhesive patches on minor recurrent aphthous stomatitis: a randomized, double-blind, placebo-controlled clinical trial.

Protective effect of cinnamaldehyde on channel catfish infected by drug-resistant *Aeromonas hydrophila*.

Homicidal paraquat poisoning: Poisoned while drinking.

[Clinical features of 86 cases of acute diquat poisoning].

Cinnamaldehyde induces autophagy-mediated cell death through ER stress and epigenetic modification in gastric cancer cells.

Quaternion of paraquat poisoning: icterus, oral ulceration, acute respiratory and renal failure.

The Metabolite Content of the Post-Culture Medium of the Tree Fern *Cyathea delgadii* Sternb. Cell Suspension Cultured in the Presence of 2,4-D and BAP.

Ellagic acid prevents gut damage via ameliorating microbe-associated intestinal lymphocyte imbalance.

Peripheral tissular analysis of rapamycin's effect as a neuroprotective agent in vivo.

A clinico-epidemiological Study of acute Self-poisoning by different Types of herbicidal Substances used in agricultural Fields: A Study from Patients admitted in a Tertiary Care Hospital in West Bengal.

A Deadly Herbicide 'Paraquat Poisoning' and Miserable Death of a 19 Years Boy.

Single-Center Experience With Paraquat Exposure in Nine Patients.

Protective effect of the *Spirulina platensis* against toxicity induced by Diuron exposure in *Mytilus galloprovincialis*.

The effect of tracheal occlusion in congenital diaphragmatic hernia in the nitrofen rat lung explant model.

Nano-formulations in treatment of iron deficiency anaemia: An overview.

Potential for TCDD to induce regulatory functions in B cells as part of the mechanism for T cell suppression in EAE.

The AHR target gene scinderin activates the WNT pathway by facilitating the nuclear translocation of β -catenin.

Synbiotics, prebiotics and probiotics for solid organ transplant recipients.

Lactoferrin for iron-deficiency anemia in children with inflammatory bowel disease: a clinical trial.

Sub-lethal concentration of metamifop exposure impair gut health of zebrafish (*Danio rerio*).

[The Role of Emergency Departments in Cross-Contamination: The Case of VRE].

Radiosynthesis and characterization of a carbon-11 PET tracer for receptor-interacting protein kinase 1.

A Paternal Fish Oil Diet Preconception Modulates the Gut Microbiome and Attenuates Necrotizing Enterocolitis in Neonatal Mice.

Molecular characterization of the aryl hydrocarbon receptor 2 gene in black rockfish, *Sebastes schlegelii*, and its expression patterns upon exposure to benzo[a]pyrene, 2,3,7,8-tetrachlorodibenzo-p-dioxin, and 1^β-naphthoflavone.

Geospatial Assessment of Pesticide Concentration in Ambient Air and Colorectal Cancer Incidence in Arkansas, 2013-2017.

Acute Dyspnea and Hemoptysis in an 84-Year-Old Man With Multiple Comorbidities.

Reduced Colonic Mucosal Injury in 2,3,7,8-Tetrachlorodibenzo-p-Dioxin Poly ADP-Ribose Polymerase (TIPARP/PARP7)-Deficient Mice.

Pretreatment optimization of tissue metabolomics in colorectal cancer.

Potential therapies for sodium azide intoxication; a case report and review of the literature.

Novel intestinal dialysis interventions and microbiome modulation to control uremia.

Gut mobilization improves behavioral symptoms and modulates urinary p-cresol in chronically constipated autistic children: A prospective study.

How to Optimize the Effectiveness and Safety of Parkinson's Disease Therapy? - A Systematic Review of Drugs Interactions with Food and Dietary Supplements.

Gut Microbiome-Dependent Metabolic Pathways and Risk of Lethal Prostate Cancer: Prospective Analysis of a PLCO Cancer Screening Trial Cohort.

Ethnicity Associated Microbial and Metabonomic Profiling in Newly Diagnosed Ulcerative Colitis.

Environmentally relevant atrazine exposure leads to increases in DNA damage and changes in morphology in the hepatopancreas of crayfish (*Faxonius virilis*).

The desmoplastic growth pattern is associated with second-stage completion and longer survival in 2-stage hepatectomy for colorectal cancer liver metastases.

Sodium acetate/sodium butyrate alleviates lipopolysaccharide-induced diarrhea in mice via regulating the gut microbiota, inflammatory cytokines, antioxidant levels, and NLRP3/Caspase-1 signaling.

Chemical Composition and Cytotoxic Activity of Extracts from *Carpesium divaricatum*: In Vitro- versus Field-Grown Plants.

Periplaneta americana Extract Pretreatment Alleviates Oxidative Stress and Inflammation and Increases the Abundance of Gut *Akkermansia muciniphila* in Diquat-Induced Mice.

Cytotoxic and Apoptotic Effects of the Combination of Borax (Sodium Tetraborate) and 5-Fluorouracil on DLD-1 Human Colorectal Adenocarcinoma Cell Line.

A pilot evaluation on the toxicokinetics and bioaccumulation of polychlorinated naphthalenes in laying hens.

The Effects of Resistant Starch Consumption in Adult Patients With Chronic Kidney Disease: A Systematic Review.

Porcine Epidemic Diarrhea Virus Infection Subverts Arsenite-Induced Stress Granules Formation.

Tocopherol Enhances the Antioxidant Defense System and Histomorphometric Parameters in The Gastrointestinal Tract of Rats Treated with Sodium Arsenite.

Human Adult Microbiota in a Static Colon Model: AhR Transcriptional Activity at the Crossroads of Host-Microbe Interaction.

Dietary High Dose of Iron Aggravates the Intestinal Injury but Promotes Intestinal Regeneration by Regulating Intestinal Stem Cells Activity in Adult Mice With Dextran Sodium Sulfate-Induced Colitis.

Effects of benzotriazole UV stabilizers, UV-PS and UV-P, on the differentiation of splenic regulatory T cells via aryl hydrocarbon receptor.

Substitution of Refined Conventional Wheat Flour with Wheat High in Resistant Starch Modulates the Intestinal Microbiota and Fecal Metabolites in Healthy Adults: A Randomized, Controlled Trial.

Red propolis reduces inflammation in cyclophosphamide-induced hemorrhagic cystitis in rats.

Fate of undigested proteins in the pig large intestine: What impact on the colon epithelium?

Daily versus every other day oral iron supplementation in patients with iron deficiency anemia (DEODO): study protocol for a phase 3 multicentered, pragmatic, open-label, pilot randomized controlled trial.

The Potential Role of Mitochondrial Acetaldehyde Dehydrogenase 2 in Urological Cancers From the Perspective of Ferroptosis and Cellular Senescence.

Diquat Poisoning: Care Management and Medico-Legal Implications.

Distinguish oral-source VOCs and control their potential impact on breath biomarkers.

Interference of dietary polyphenols with potentially toxic amino acid metabolites derived from the colonic microbiota.

5-Aminosalicylic Acid, A Weak Agonist for Aryl Hydrocarbon Receptor That Induces Splenic Regulatory T Cells.

Subchronic exposure to a glyphosate-based herbicide causes dysplasia in the digestive tract of Wistar rats.

Prolonged exposure to the herbicide atrazine suppresses immune cell functions by inducing spleen cell apoptosis in rats.

Influence of Herbicide Exposure and Ranavirus Infection on Growth and Survival of Juvenile Red-Eared Slider Turtles (*Trachemys scripta elegans*).

Toxic effects of atrazine on immune function in BALB/c mice.

Acrolein contributes to human colorectal tumorigenesis through the activation of RAS-MAPK pathway.

Carvacrol and PPAR α agonist, pioglitazone, affects inhaled paraquat-induced lung injury in rats.

A mixture containing the herbicides Mesotrione and Atrazine imposes toxicological risks on workers of *Partamona helleri*.

Pneumoperitoneum from pneumomediastinum in paraquat poisoning.

A case of fatal intoxication by ingestion of an herbicide formulation containing fluroxypyr-meptyl and triclopyr.

Effects of a mixture of glyphosate, 17 β -ethynylestradiol and amyl salicylate on cellular and biochemical parameters of the mussel *Mytilus galloprovincialis*.

Acetylcholinesterase (AChE) monoclonal antibody generation and validation for use as a biomarker of glyphosate-based herbicide exposure in commercial freshwater fish.

Evaluation of the potential teratogenic and toxic effect of the herbicide 2,4-D (DMA $\text{\textcircled{R}}$ 806) in bullfrog embryos and tadpoles (*Lithobates catesbeianus*).

Genotoxic and epigenetic effects of diuron in the Pacific oyster: in vitro evidence of interaction between DNA damage and DNA methylation.

Common and particular biochemical responses of *Unio tumidus* to herbicide, pharmaceuticals and their combined exposure with heating.

Effects of chronic glyphosate exposure on antioxidative status, metabolism and immune response in tilapia (GIFT, *Oreochromis niloticus*).

Risk in the circular food economy: Glyphosate-based herbicide residues in manure fertilizers decrease crop yield.

Resveratrol: Isolation, and Its Nanostructured Lipid Carriers, Inhibits Cell Proliferation, Induces Cell Apoptosis in Certain Human Cell Lines Carcinoma and Exerts Protective Effect Against Paraquat-Induced Hepatotoxicity.

Association between pesticide exposure and colorectal cancer risk and incidence: A systematic review.

Evaluation of Multiple Organ Dysfunction Score (MODS) and the Sequential Organ Failure Assessment (SOFA) score as in-hospital outcome predictors among cases of hydrogen cyanamide exposure: a cross-sectional study.

Dietary cinnamaldehyde nanoemulsion boosts growth and transcriptomes of antioxidant and immune related genes to fight *Streptococcus agalactiae* infection in Nile tilapia (*Oreochromis niloticus*).

Cinnamaldehyde and hesperetin attenuate TNBS-induced ulcerative colitis in rats through modulation of the JAK2/STAT3/SOCS3 pathway.

Protective Effects of Cinnamaldehyde on the Inflammatory Response, Oxidative Stress, and Apoptosis in Liver of *Salmonella typhimurium*-Challenged Mice.

Esophagitis dissecans superficialis associated with acute transoral paraquat poisoning: Clinical study of 15 cases.

Corrosive Airway and Esophageal Injury in Paraquat Intoxication.

Suppression of Th17 cell differentiation via sphingosine-1-phosphate receptor 2 by cinnamaldehyde can ameliorate ulcerative colitis.

Cinnamaldehyde Could Reduce the Accumulation of Diarrhetic Shellfish Toxins in the Digestive Gland of the Mussel *Perna viridis* under Laboratory Conditions.

Novel FXR agonist nelumal A suppresses colitis and inflammation-related colorectal carcinogenesis.

[Analysis of clinical characteristics and prognostic factors in 40 cases of acute glyphosate poisoning].

The TRPA1 Agonist Cinnamaldehyde Induces the Secretion of HCO₃⁽⁻⁾ by the Porcine Colon.

Anti-*Enterococcus Faecalis*, Cytotoxicity, Phytotoxicity, and Anticancer Studies on *Clausena excavata* Burum. f. (Rutaceae) Leaves.

New Insights into the Antimicrobial Action of Cinnamaldehyde towards *Escherichia coli* and Its Effects on Intestinal Colonization of Mice.

Arsenic-induced lung inflammation and fibrosis in a rat model: Contribution of the HMGB1/RAGE, PI3K/AKT, and TGF- β ¹/SMAD pathways.

Potential role of dietary chitosan nanoparticles against immunosuppression, inflammation, oxidative stress, and histopathological alterations induced by pendimethalin toxicity in Nile tilapia.

Metabolite Profiling of Rosemary Cell Lines with Antiproliferative Potential against Human HT-29 Colon Cancer Cells.

Staphylococcus aureus Peptide Methionine Sulfoxide Reductases Protect from Human Whole-Blood Killing.

Intravenous iron is non-inferior to oral iron regarding cell growth and iron metabolism in colorectal cancer associated with iron-deficiency anaemia.

Iron preparations for women of reproductive age with iron deficiency anaemia in pregnancy (FRIDA): a systematic review and network meta-analysis.

Efficacy and safety of cenobamate in patients with uncontrolled focal seizures: A meta-analysis.

Oral Ferric Maltol Does Not Adversely Affect the Intestinal Microbiome of Patients or Mice, But Ferrous Sulphate Does.

[The Comparison of Iron Deficiency Anemia Rat Treated with Hydroxypropyl Chitosan Ferrous Ion Complex and Ferrous Sulfate].

Beverages containing *Lactobacillus paracasei* LC-37 improved functional dyspepsia through regulation of the intestinal microbiota and their metabolites.

[Risk factors associated with acute kidney injury caused by pesticide poisoning].

"That's Not His Regular Formula": A Case of Organophosphate Poisoning in an Infant.

Oligosaccharides increase the genotoxic effect of colibactin produced by pks+ Escherichia coli strains.

Comparison between oral ferrous sulfate and intravenous ferric carboxymaltose in children with restless sleep disorder.

Proportionate mortality study of unionized maintenance of way railroad workers.

Mucosal Deposition of Ferrous Sulfate Leading to Esophagitis Dissecans Superficialis.

TCDD attenuates EAE through induction of FasL on B cells and inhibition of IgG production.

Adverse effects of iron deficiency anemia on pregnancy outcome and offspring development and intervention of three iron supplements.

The impact of dextran sodium sulphate and probiotic pre-treatment in a murine model of Parkinson's disease.

Alginate-coated activated charcoal enhances fecal excretion of 2,3,7,8-tetrachlorodibenzo-p-dioxin in mice, with fewer side effects than uncoated one.

Could Mesna and Celery Seed Cootherapy Modulate Oxidative Stress and Inflammation of the Urinary Bladder Induced by Ifosfamide in Rabbits?

An electrochemical immunosensor for the detection of carcinoembryonic antigen based on Au/g-C(3)N(4) NSs-modified electrode and CuCo/CNC as signal tag.

Lipid oxidation and aldehyde formation during in vitro gastrointestinal digestion of roasted scallop (*Patinopecten yessoensis*) - the role of added antioxidant of bamboo leaves.

[Vigilance against a highly lethal insecticide chlorfenapyr poisoning (report of 4 cases and literature review)].

GDNF requires HIF-1 α and RET activation for suppression of programmed cell death of enteric neurons by metabolic challenge.

Author Correction: Acrolein contributes to human colorectal tumorigenesis through the activation of RAS-MAPK pathway.

Effects of Coated Cysteamine on Oxidative Stress and Inflammation in Weaned Pigs.

Can kissing cause paraquat poisoning: A case report and review of literature.

Resveratrol Attenuates Diquat-Induced Oxidative Stress by Regulating Gut Microbiota and Metabolome Characteristics in Piglets.

Chloroacetanilide herbicide-induced rat enterochromaffin cell tumors: a case study within the context of the IPCS framework, for analyzing the relevance of a cancer mode of action for humans.

Metagenomic and phytochemical analyses of kefir water and its subchronic toxicity study in BALB/c mice.

Evaluation of pentoxifylline and ferrous sulfate for treatment of lower limb venous ulcers.

Comparison of Pancreatic Damage in Rats for Two Methods of Paraquat Administration.

Tracheary elements from calli of Japanese horse chestnut (*Aesculus turbinata*) form perforation-like structures.

Paraquat poisoning in Andaman and Nicobar Islands - Government must intervene.

In vitro and in vivo digestion of red cured cooked meat: oxidation, intestinal microbiota and fecal metabolites.

Experimental acute arsenic toxicity in Balb/c mice: organic markers and splenic involvement.

Occupational use of agrochemicals results in inhibited cholinesterase activity and altered reproductive hormone levels in male farmers from Buea, Cameroon.

Analysis of the Soil Fumigant, Dimethyl Disulfide, in Swine Blood by Dynamic Headspace Gas Chromatography-Mass Spectroscopy.

Report of a Case of Paraquat Poisoning and Mediastinal Involvement.

Quercetin Alleviates Oxidative Damage by Activating Nuclear Factor Erythroid 2-Related Factor 2 Signaling in Porcine Enterocytes.

2,4-Dichlorophenoxyacetic Acid Poisoning Mimicking as Organophosphorus Poisoning.

The mycobiome in murine intestine is more perturbed by food arsenic exposure than in excreted feces.

Synthesis and Screening of New [1,3,4]Oxadiazole, [1,2,4]Triazole, and [1,2,4]Triazolo[4,3-b][1,2,4]triazole Derivatives as Potential Antitumor Agents on the Colon Carcinoma Cell Line (HCT-116).

Is Gluten the Only Culprit for Non-Celiac Gluten/Wheat Sensitivity?

The protective effects of melatonin on survival, immune response, digestive enzymes activities and intestinal microbiota diversity in Chinese mitten crab (*Eriocheir sinensis*) exposed to glyphosate.

Ion transport mechanisms for smoke inhalation-injured airway epithelial barrier.

The glyphosate formulation Roundup® LB plus influences the global metabolome of pig gut microbiota in vitro.

Transcriptomic and metabolomic landscape of the molecular effects of glyphosate commercial formulation on *Apis mellifera ligustica* and *Apis cerana cerana*.

Physiological mechanisms and phytoremediation potential of the macrophyte *Salvinia biloba* towards a commercial formulation and an analytical standard of glyphosate.

Ovarian mitochondrial and oxidative stress proteins are altered by glyphosate exposure in mice.

Depletion of NK cells attenuates paraquat-induced acute lung injury by manipulating macrophage polarization.

[Nursing care of esophagitis *dissecans superficialis* caused by acute paraquat poisoning].

Systemic Paraquat Intoxication Presenting with Peripheral Ulcerative Keratitis: A Case Report and Literature Review.

Glyphosate-induced Delayed Pyloric Obstruction, Ulcer and Scar Changes.

Does pendimethalin develop in pancreatic cancer induced inflammation?

Toxicity of diuron metabolites in human cells.

Formation of di-cysteine acrolein adduct decreases cytotoxicity of acrolein by ROS alleviation and apoptosis intervention.

Antioxidant and Anti-Inflammatory Effects of Different Zinc Sources on Diquat-Induced Oxidant Stress in a Piglet Model.

The effects of glyphosate and AMPA on the mediterranean mussel *Mytilus galloprovincialis* and its microbiota.

2,4-Dichlorophenoxyacetic Thiosemicarbazides as a New Class of Compounds Against Stomach Cancer Potentially Intercalating with DNA.

Increased risk of head and neck cancer in Agent Orange exposed Vietnam Era veterans.

Cinnamaldehyde Treatment of Prostate Cancer-Associated Fibroblasts Prevents Their Inhibitory Effect on T Cells Through Toll-Like Receptor 4.

Dicamba use and cancer incidence in the agricultural health study: an updated analysis.

Co-hybridized composite nanovesicles for enhanced transdermal eugenol and cinnamaldehyde delivery and their potential efficacy in ulcerative colitis.

Lethal diquat poisoning manifesting as central pontine myelinolysis and acute kidney injury: A case report and literature review.

[Therapeutic effect of cinnamaldehyde on ulcerative colitis in mice induced by dextran sulfate sodium with *Candida albicans* colonization and its effect on dectin-1/TLRs/NF- κ B signaling pathway].

Biogenic selenium nanoparticles synthesized by *Lactobacillus casei* ATCC 393 alleviate diquat-induced intestinal barrier dysfunction in C57BL/6 mice through their antioxidant activity.

Protective effects of Alda-1, an ALDH2 activator, on alcohol-derived DNA damage in the esophagus of human ALDH2*2 (Glu504Lys) knock-in mice.

Rationally Designed Polymer Conjugate for Tumor-Specific Amplification of Oxidative Stress and Boosting Antitumor Immunity.

Ingestion of organic acids and cinnamaldehyde improves tissue homeostasis of piglets exposed to enterotoxigenic *Escherichia coli* (ETEC).

Use of low-molecular-weight heparin in severe paraquat poisoning: a case report.

Transient receptor potential ankyrin-1 causes rapid bronchodilation via nonepithelial PGE(2).

Bioaccessibility of arsenic from gastropod along the Xiangjiang River: Assessing human health risks using an in vitro digestion model.

AhR Activation Leads to Alterations in the Gut Microbiome with Consequent Effect on Induction of Myeloid Derived Suppressor Cells in a CXCR2-Dependent Manner.

Comparison between Iberet Folic(Â®) and Zincofer(Â®) in treatment of iron deficiency anaemia in pregnancy.

The Impact of Low-Level Iron Supplements on the Faecal Microbiota of Irritable Bowel Syndrome and Healthy Donors Using In Vitro Batch Cultures.

[Omphalomesenteric fistulas; epidemiological diagnostic and therapeutic features: study of four cases in the Department of Pediatric Surgery at the Aristide Le Dantec University Hospital in Dakar].

Baicalein Restores the Balance of Th17/Treg Cells via Aryl Hydrocarbon Receptor to Attenuate Colitis.

In Vitro Studies on Therapeutic Potential of Probiotic Yeasts Isolated from Various Sources.

Developmental 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure of either parent enhances the risk of necrotizing enterocolitis in neonatal mice.

In vitro study of pharmacobezoar formation in simulated acetaminophen overdose.

Efficacy of a High-Iron Dietary Intervention in Women with Celiac Disease and Iron Deficiency without Anemia: A Clinical Trial.

Wheat flour fortification with iron for reducing anaemia and improving iron status in populations.

Microbiota Composition and Metabolism Are Associated With Gut Function in Parkinson's Disease.

Magnetic organic porous polymer as a solid-phase extraction adsorbent for enrichment and quantitation of gastric cancer biomarkers (P-cresol and 4-hydroxybenzoic acid) in urine samples by UPLC.

Randomized phase 2 study of adjunctive cenobamate in patients with uncontrolled focal seizures.

Gut microbiota generation of protein-bound uremic toxins and related metabolites is not altered at different stages of chronic kidney disease.

Genomic data reveal international lineages of critical priority Escherichia coli harbouring wide resistome in Andean condors (Vultur gryphus Linnaeus, 1758).

A murine model of Staphylococcus aureus infected chronic diabetic wound: A new tool to develop alternative therapeutics.

Occupational exposures and odds of gastric cancer: a StoP project consortium pooled analysis.

Cecal Tumorigenesis in Aryl Hydrocarbon Receptor-Deficient Mice Depends on Cecum-Specific Mitogen-Activated Protein Kinase Pathway Activation and Inflammation.

In vivo acute toxicity and anti-gastric evaluation of a novel dichloro Schiff base: Bax and HSP70 alteration.

Arsenic-induced immunomodulatory effects disorient the survival-death interface by stabilizing the Hsp90/Beclin1 interaction.

The Dark Side of Iron.

Microbiome and Metabolome Profiles Associated With Different Types of Short Bowel Syndrome: Implications for Treatment.

Bowel Habits and the Association With Uremic Toxins in Non-Dialysis-Dependent Chronic Kidney Disease Patients.

Distribution and risk factor analysis for Clostridium difficile-associated diarrhea among hospitalized children over one year of age.

Attenuation of potassium dichromate and sodium arsenite toxicities by methanol extract of Rauvolfia vomitoria in mice.

Responses of Intestinal Microbiota and Immunity to Increasing Dietary Levels of Iron Using a Piglet Model.

Tissue- and Region-Specific Accumulation of Arsenic Species, Especially in the Brain of Mice, After Long-term Arsenite Exposure in Drinking Water.

Separating the Empirical Wheat From the Pseudoscientific Chaff: A Critical Review of the Literature Surrounding Glyphosate, Dysbiosis and Wheat-Sensitivity.

Moderate Wine Consumption Reduces Faecal Water Cytotoxicity in Healthy Volunteers.

Chronic and acute arsenic exposure enhance EGFR expression via distinct molecular mechanisms.

Course of matrix metalloproteinase-1 and pulmonary oxygenation in acute respiratory distress syndrome caused by oral ingestion of large doses of oxadiazon/butachlor emulsion: a case report.

Introducing of potent cytotoxic novel 2-(aroylamino)cinnamamide derivatives against colon cancer mediated by dual apoptotic signal activation and oxidative stress.

Chronic arsenic exposure induces the time-dependent modulation of inflammation and immunosuppression in spleen.

Caspofungin induces the release of Ca(2+) ions from internal stores by activating ryanodine receptor-dependent pathways in human tracheal epithelial cells.

Enhanced alcohol degradation and hepatic protective effects of an Acetobacter Pasteurianus-derived product, CureZyme-ACE, in an acute intoxication rat model.

The Role of Vitamin D Receptor Gene Polymorphisms in Colorectal Cancer Risk.

Iron Overload in Gastric Mucosa: Underdiagnosed Condition Rarely Documented in Clinical and Pathology Reports.

Ferrous Sulfate-Induced Esophageal Injury Leading to Esophagitis Dissecans Superficialis.

Sarcoidosis: Causes, Diagnosis, Clinical Features, and Treatments.

Acute obstructive fibrinous laryngotracheobronchitis induced by severe glyphosate surfactant intoxication: A case report.

Erratum: Esophageal perforation and death following glyphosate poisoning.

Glycyrrhizic acid modulates the atrazine-induced apoptosis in rabbit spleen.

Atrazine induces necroptosis by miR-181-5p targeting inflammation and glycometabolism in carp lymphocytes.

Identification of signal pathways for immunotoxicity in the spleen of common carp exposed to chlorpyrifos.

Decrease in Butyrylcholinesterase Accompanied by Intermediate-like Syndrome after Massive Ingestion of a Glyphosate-surfactant.

Ecotoxicological hazard of a mixture of glyphosate and aminomethylphosphonic acid to the mussel *Mytilus galloprovincialis* (Lamarck 1819).

Cellular, humoral and molecular responses in rainbow trout (*Oncorhynchus mykiss*) exposed to a herbicide and subsequently infected with infectious hematopoietic necrosis virus.

Comparison of four pharmacological strategies aimed to prevent the lung inflammation and paraquat-induced alveolar damage.

Effects of the glyphosate-based herbicide roundup on the survival, immune response, digestive activities and gut microbiota of the Chinese mitten crab, *Eriocheir sinensis*.

Clinical features and risk factors of acute kidney injury in children with acute paraquat intoxication.

Serial measurement of glyphosate blood concentration in a glyphosate potassium herbicide-intoxicated patient: A case report.

Clinical outcome of paraquat poisoning during pregnancy.

Glyphosate induces benign monoclonal gammopathy and promotes multiple myeloma progression in mice.

Surgical treatment of pyloric stenosis caused by glyphosate poisoning: A case report.

Retrospective study of clinical features and prognosis of edaravone in the treatment of paraquat poisoning.

Pulmonary Tumor Thrombotic Microangiopathy Mimicking Inhalation Lung Injury.

Homicidal Paraquat Poisoning.

Use of Pesticides and Health Risk among Farmers in Sunsari District, Nepal.

Long-term Immunotoxic Effects of Oral Prenatal and Neonatal Atrazine Exposure.

Toxicological impact of oxyfluorfen 24% herbicide on the reproductive system, antioxidant enzymes, and endocrine disruption of *Biomphalaria alexandrina* (Ehrenberg, 1831) snails.

Alleviation of paraquat-induced oxidative lung injury by betaine via regulation of sulfur-containing amino acid metabolism despite the lack of betaine-homocysteine methyltransferase (BHMT) in the lung.

Cinnamaldehyde enhances apoptotic effect of oxaliplatin and reverses epithelial-mesenchymal transition and stemness in hypoxic colorectal cancer cells.

Altered gastric tone and motility response to brain-stem dopamine in a rat model of parkinsonism.

Doxycycline alleviates paraquat-induced acute lung injury by inhibiting neutrophil-derived matrix metalloproteinase 9.

trans-Cinnamaldehyde mitigated intestinal inflammation induced by *Cronobacter sakazakii* in newborn mice.

Activation of Nrf2 attenuates delayed gastric emptying in obesity induced diabetic (T2DM) female mice.

Acid-responsive nanoparticles as a novel oxidative stress-inducing anticancer therapeutic agent for colon cancer.

Suppression of miR-21 and miR-155 of macrophage by cinnamaldehyde ameliorates ulcerative colitis.

Effects of Sublethal Thymol, Carvacrol, and trans-Cinnamaldehyde Adaptation on Virulence Properties of *Escherichia coli* O157:H7.

[Brain abscess revealing trilogy of Fallot in a child: about a case at the University Teaching Hospital of Parakou, Benin].

Ischemic gastritis due to oral iron.

Dioxin-like (DL-) polychlorinated biphenyls induced immunotoxicity through apoptosis in mice splenocytes via the AhR mediated mitochondria dependent signaling pathways.

Expression and Functional Analysis of Hepcidin from Mandarin Fish (*Siniperca chuatsi*).

Lesion of the Locus Coeruleus Damages Learning and Memory Performance in Paraquat and Maneb-induced Mouse Parkinson's Disease Model.

Radiomics Nomogram Analyses for Differentiating Pneumonia and Acute Paraquat Lung Injury.

Magnetic nanoparticles-loaded liposomes as a novel treatment agent for iron deficiency anemia: In vivo study.

Divergent Synthesis and Evaluation of the in vitro Cytotoxicity Profiles of 3,4-Ethylenedioxythiophenyl-2-propen-1-one Analogues.

Fecal Changes Following Introduction of Milk in Infants With Outgrowing Non-IgE Cow's Milk Protein Allergy Are Influenced by Previous Consumption of the Probiotic LGG.

Iron bioavailability of four iron sources used to fortify infant cereals, using anemic weaning pigs as a model.

LC-MS/MS study of the degradation processes of nitisinone and its by-products.

Comparison of iron-reduced and iron-supplemented semisynthetic diets in T cell transfer colitis.

Molecular analysis and genotyping of pathogenicity locus in *Clostridioides difficile* strains isolated from patients in Tehran hospitals during the years 2007-2010.

Faecal volatile biomarkers of *Clostridium difficile* infection.

Chiral phenoxyacetic acid analogues inhibit colon cancer cell proliferation acting as PPAR γ partial agonists.

2,3,7,8-tetrachlorodibenzo-p-dioxin suppresses the growth of human colorectal cancer cells in vitro: Implication of the aryl hydrocarbon receptor signaling.

Crizotinib-induced erosive esophagitis in a pediatric patient with neuroblastoma.

Development of iron(II) sulfate nanoparticles produced by hot-melt extrusion and their therapeutic potentials for colon cancer.

[Mortality in the population surrounding an aluminum foundry in Eastern Piedmont, Italy, 1980-2017].

High Pesticide Exposure Events and Olfactory Impairment among U.S. Farmers.

Modelling the role of microbial p-cresol in colorectal genotoxicity.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces peripheral blood abnormalities and plasma cell neoplasms resembling multiple myeloma in mice.

A method of detecting two tumor markers (p-hydroxybenzoic acid and p-cresol) in human urine using a porous magnetic β -cyclodextrine polymer as solid phase extractant, an alternative for early gastric cancer diagnosis.

Assessment of Acute Serum Iron, Non-Transferrin-Bound Iron, and Gastrointestinal Symptoms with 3-Week Consumption of Iron-Enriched *Aspergillus oryzae* Compared with Ferrous Sulfate.

Oxidative stress, lysosomal damage and dysfunctional autophagy in molluscan hepatopancreas (digestive gland) induced by chemical contaminants.

Gut Microbiota in Alcoholic Hepatitis is Disparate from Those in Acute Alcoholic Pancreatitis and Biliary Disease.

AhR Activation by TCDD (2,3,7,8-Tetrachlorodibenzo-p-dioxin) Attenuates Pertussis Toxin-Induced Inflammatory Responses by Differential Regulation of Tregs and Th17 Cells Through Specific Targeting by microRNA.

Clinical Features, Treatment, Prognosis, and Mortality in Paraquat Poisonings: A Hospital-Based Study in Iran.

Tannic acid modulates intestinal barrier functions associated with intestinal morphology, antioxidative activity, and intestinal tight junction in a diquat-induced mouse model.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced aryl hydrocarbon receptor activation enhanced the suppressive function of mesenchymal stem cells against splenocyte proliferation.

Gut microbial transformation of the dietary mutagen MeIQx may reduce exposure levels without altering intestinal transport.

Severe ARDS Complicating an Acute Intentional Cresol Poisoning.

Metabolism of 3-[5'-deoxy-5'-(dimethylarsinoyl)- β -ribofuranosyloxy]-2-hydroxypropylene glycol in an artificial digestive system.

Comparing the Microbial Community in Four Stomach of Dairy Cattle, Yellow Cattle and Three Yak Herds in Qinghai-Tibetan Plateau.

Esophageal Pharmacobezoar in a Patient with Achalasia: A Case Report.

Hermetia illucens larvae as a potential dietary protein source altered the microbiota and modulated mucosal immune status in the colon of finishing pigs.

Pollutants released from the pulp paper industry: Aquatic toxicity and their health hazards.

Identification of acrolein metabolites in human buccal cells, blood, and urine after consumption of commercial fried food.

Formation of dioxins from triclosan with active chlorine: A potential risk assessment.

The Impact of Long-term Exposure to Low Levels of Inorganic Arsenic on the Hypomethylation of SEPT9 Promoter in Epithelial-Mesenchymal Transformed Colorectal Cancer Cell Lines.

Synthesis and preclinical evaluation of the CRTH2 antagonist [(11)C]MK-7246 as a novel PET tracer and potential surrogate marker for pancreatic beta-cell mass.

Glutathione peroxidase-1 inhibits transcription of regenerating islet-derived protein-2 in pancreatic islets.

ER stress differentially affects pro-inflammatory changes induced by mitochondrial dysfunction in the human monocytic leukemia cell line, THP-1.

Radiosynthesis and in vivo evaluation of (11)C-labeled BMS-193885 and its desmethyl analog as PET tracers for neuropeptide Y1 receptors.

The effects of hesperidin on sodium arsenite-induced different organ toxicity in rats on metabolic enzymes as antidiabetic and anticholinergics potentials: A biochemical approach.

Bacterial community and metabolome shifts in the cecum and colon of captive sika deer (*Cervus nippon*) from birth to post weaning.

Ameliorative effect of gallic acid on sodium arsenite-induced spleno-, cardio- and hemato-toxicity in rats.

Metabolic Basis for Mutualism between Gut Bacteria and Its Impact on the *Drosophila melanogaster* Host.

Microscopic structure of albino rats' small intestine.

Macrophytes are highly sensitive to the herbicide diquat dibromide in test systems of varying complexity.

Apigenin reverses lung injury and immunotoxicity in paraquat-treated mice.

Effects of aminomethylphosphonic acid, the main breakdown product of glyphosate, on cellular and biochemical parameters of the mussel *Mytilus galloprovincialis*.

Beneficial effects of ascorbic acid to treat lung fibrosis induced by paraquat.

Acute and subchronic effects of three herbicides on biomarkers and reproduction in earthworm *Dendrobaena veneta*.

Vitamin D treatment abrogates the inflammatory response in paraquat-induced lung fibrosis.

Atrazine promotes immunomodulation by melanomacrophage centre alterations in spleen and vascular disorders in gills from *Oreochromis niloticus*.

Pre-protective effects of dietary chitosan supplementation against oxidative stress induced by diquat in weaned piglets.

Influences of *Chlorella vulgaris* dietary supplementation on growth performance, hematology, immune response and disease resistance in *Oreochromis niloticus* exposed to sub-lethal concentrations of penoxsulam herbicide.

Ecotoxicological effects of the herbicide glyphosate in non-target aquatic species: Transcriptional responses in the mussel *Mytilus galloprovincialis*.

Acrolein-induced oxidative stress and genotoxicity in rats: protective effects of whey protein and conjugated linoleic acid.

Is endotracheal intubation a non-beneficial treatment in patients with respiratory failure due to paraquat poisoning?

Paraquat treatment modulates integrin associated protein (CD47) and basigin (CD147) expression and mitochondrial potential on erythroid cells in mice.

Ecotoxicological risk assessment for the herbicide glyphosate to non-target aquatic species: A case study with the mussel *Mytilus galloprovincialis*.

Glyphosate ingestion causing multiple organ failure: a near-fatal case report.

Lethal Bentazone Intoxication - A Report of Two Cases.

Commercial AHAS-inhibiting herbicides are promising drug leads for the treatment of human fungal pathogenic infections.

Novel cinnamaldehyde-based aspirin derivatives for the treatment of colorectal cancer.

FGF21 attenuates pulmonary fibrogenesis through ameliorating oxidative stress in vivo and in vitro.

Submicron emulsion of cinnamaldehyde ameliorates bleomycin-induced idiopathic pulmonary fibrosis via inhibition of inflammation, oxidative stress and epithelial-mesenchymal transition.

Short communication: Investigation of antibiotic alternatives to improve health and growth of veal calves.

Immunomodulatory and therapeutic role of *Cinnamomum verum* extracts in collagen-induced arthritic BALB/c mice.

Anti-inflammatory effect of cinnamaldehyde and linalool from the leaf essential oil of *Cinnamomum osmophloeum* Kanehira in endotoxin-induced mice.

Cow's milk neutralizes the cytotoxicity of acrolein, a putative carcinogen in cigarette smoke.

Caprylic acid and nonanoic acid upregulate endogenous host defense peptides to enhance intestinal epithelial immunological barrier function via histone deacetylase inhibition.

Cigarette Smoke Toxins-Induced Mitochondrial Dysfunction and Pancreatitis Involves Aryl Hydrocarbon Receptor Mediated Cyp1 Gene Expression: Protective Effects of Resveratrol.

Recognising the return of nutritional deficiencies: a modern pellagra puzzle.

Preoperative Epoetin- $\hat{\pm}$ with Intravenous or Oral Iron for Major Orthopedic Surgery: A Randomized Controlled Trial.

Para-cresol production by *Clostridium difficile* affects microbial diversity and membrane integrity of Gram-negative bacteria.

Effect of various calcium salts on non-heme iron bioavailability in fasted women of childbearing age.

Quercetin modulates iron homeostasis and iNOS expression of splenic macrophages in a rat model of iron deficiency anemia.

Sensitization of colorectal cancer cells to irinotecan by the Survivin inhibitor LLP3 depends on XAF1 proficiency in the context of mutated p53.

Pea Ferritin Stability under Gastric pH Conditions Determines the Mechanism of Iron Uptake in Caco-2 Cells.

Acute Metam Sodium Poisoning Caused by Occupational Exposure at a Flower Farm - Uganda, October 2016.

Food and nutrition insecurity indicators associated with iron deficiency anemia in Brazilian children: a systematic review.

Comparative roles of *clpA* and *clpB* in the survival of *S. Typhimurium* under stress and virulence in poultry.

Sucrosomial Iron Supplementation in Anemic Patients with Celiac Disease Not Tolerating Oral Ferrous Sulfate: A Prospective Study.

Probiotic/prebiotic correction for adverse effects of iron fortification on intestinal resistance to *Salmonella* infection in weaning mice.

[About a cresol intoxication].

Nutritional status affects the bioaccessibility and speciation of arsenic from soils in a simulator of the human intestinal microbial ecosystem.

The effect of prenatal exposure on disposition of hexachloronaphthalene in female Wistar rats and fetal compartment.

Reduced intestinal epithelial mitochondrial function enhances in vitro interleukin-8 production in response to commensal *Escherichia coli*.

Roles of dietary supplementation with arginine or N-carbamylglutamate in modulating the inflammation, antioxidant property, and mRNA expression of antioxidant-relative signaling molecules in the spleen of rats under oxidative stress.

Photocatalytic decomposition of selected biologically active compounds in environmental waters using TiO₂/polyaniline nanocomposites: Kinetics, toxicity and intermediates assessment.

Bioaccumulation of As, Hg, and Se in tunas *Thunnus albacares* and *Katsuwonus pelamis* from the Eastern Pacific: tissue distribution and As speciation.

The impact of short-chain fatty acids on GLP-1 and PYY secretion from the isolated perfused rat colon.

Ferric citrate and ferric EDTA but not ferrous sulfate drive amphiregulin-mediated activation of the MAP kinase ERK in gut epithelial cancer cells.

Enzyme polymorphism, oxygen and injury: a lipidomic analysis of flight-induced oxidative damage in a succinate dehydrogenase d (Sdh_d)-polymorphic insect.

ER-stress mobilization of death-associated protein kinase-1-dependent xenophagy counteracts mitochondria stress-induced epithelial barrier dysfunction.

Green synthesis of NiO nanoparticles using *Aegle marmelos* leaf extract for the evaluation of in-vitro cytotoxicity, antibacterial and photocatalytic properties.

Dysregulation of antioxidant responses in patients diagnosed with concomitant Primary Sclerosing Cholangitis/Inflammatory Bowel Disease.

Risk factors for intestinal colonization with vancomycin resistant enterococci' A prospective study in a level III pediatric intensive care unit.

Comparison of in vivo toxicity, antioxidant and immunomodulatory activities of coconut, niphah and pineapple juice vinegars.

The potential protective role of Akropower against Atrazine- induced humoral immunotoxicity in rabbits.

Oxidative stress induced by glyphosate-based herbicide on freshwater turtles.

Mixture Toxicity of Bensulfuron-Methyl and Acetochlor to Red Swamp Crayfish (*Procambarus clarkii*): Behavioral, Morphological and Histological Effects.

[Paraquat poisoning mechanism and its clinical treatment progress].

Lack of immunotoxic effects of repeated exposure to atrazine associated with the adaptation of adrenal gland activation.

Efficacy of *Spirulina platensis* diet supplements on disease resistance and immune-related gene expression in *Cyprinus carpio* L. exposed to herbicide atrazine.

[The study of using salvianolate treat acute lung injury in rats induced by paraquat].

Effects of airborne toxicants on pulmonary function and mitochondrial DNA damage in rodent lungs.

Paraquat poisoning: Acute lung injury - a missed diagnosis.

[Evaluation of adsorption effect of activated charcoal on oral paraquat poisoning: an experimental study on large animal].

Investigation Paraquat Poisoning in Southwest of Iran - from Sign to Mortality and Morbidity.

Aldo-keto reductase 1B10 protects human colon cells from DNA damage induced by electrophilic carbonyl compounds.

A Nigro-Vagal Pathway Controls Gastric Motility and Is Affected in a Rat Model of Parkinsonism.

Novel tetrazole and cyanamide derivatives as inhibitors of cyclooxygenase-2 enzyme: design, synthesis, anti-inflammatory evaluation, ulcerogenic liability and docking study.

Coadministration of isomalto-oligosaccharides augments metabolic health benefits of cinnamaldehyde in high fat diet fed mice.

Cinnamon reduces inflammatory response in intestinal fibroblasts in vitro and in colitis in vivo leading to decreased fibrosis.

Carbenoxolone inhibits TRPV4 channel-initiated oxidative urothelial injury and ameliorates cyclophosphamide-induced bladder dysfunction.

Targeted proteome analysis with isotope-coded protein labels for monitoring the influence of dietary phytochemicals on the expression of cytoprotective proteins in primary human colon cells.

Novel 2,4-dichlorophenoxy acetic acid substituted thiazolidin-4-ones as anti-inflammatory agents: Design, synthesis and biological screening.

Cytotoxicity and cellular response mechanisms of water-soluble platinum(II) complexes of lidocaine and phenylcyanamide derivatives.

Different Routes for Conifer- and Sinapaldehyde and Higher Saccharification upon Deficiency in the Dehydrogenase CAD1.

In vitro study of soil arsenic release by human gut microbiota and its intestinal absorption by Caco-2 cells.

The Cystic Fibrosis Transmembrane Conductance Regulator Potentiator Ivacaftor Augments Mucociliary Clearance Abrogating Cystic Fibrosis Transmembrane Conductance Regulator Inhibition by Cigarette Smoke.

Conjugation of nitrated acetaminophen to Der p1 amplifies peripheral blood monocyte response to Der p1.

Hijiki and sodium arsenite stimulate growth of human colorectal adenocarcinoma cells through ERK1/2 activation.

Point-of-use fortification of foods with micronutrient powders containing iron in children of preschool and school-age.

Paclitaxel-mediated human aryl hydrocarbon receptor mRNA translation by an internal ribosomal entry site-dependent mechanism.

Enhancing miR-132 expression by aryl hydrocarbon receptor attenuates tumorigenesis associated with chronic colitis.

Linking arsenite- and cadmium-generated oxidative stress to microsatellite instability in vitro and in vivo.

The relationship between dioxins exposure and risk of prostate cancer with steroid hormone and age in Vietnamese men.

Effects of Orally Ingested Arsenic on Respiratory Epithelial Permeability to Bacteria and Small Molecules in Mice.

Antimicrobial agents, triclosan, chloroxylenol, methylisothiazolinone and borax, used in cleaning had genotoxic and histopathologic effects on rainbow trout.

Short Chain Fatty Acids Enhance Aryl Hydrocarbon (Ah) Responsiveness in Mouse Colonocytes and Caco-2 Human Colon Cancer Cells.

Absence of the NOD2 protein renders epithelia more susceptible to barrier dysfunction due to mitochondrial dysfunction.

Iron supplementation in singleton pregnancy: Is there a benefit to doubling the dose of elemental iron in iron-deficient pregnant women? a randomized controlled trial.

Effect of Low-Dose Ferrous Sulfate vs Iron Polysaccharide Complex on Hemoglobin Concentration in Young Children With Nutritional Iron-Deficiency Anemia: A Randomized Clinical Trial.

The history of arsenical pesticides and health risks related to the use of Agent Blue.

The decreased growth performance and impaired immune function and structural integrity by dietary iron deficiency or excess are associated with TOR, NF- κ B, p38MAPK, Nrf2 and MLCK signaling in head kidney, spleen and skin of grass carp (*Ctenopharyngodon idella*).

Levels and profiles of organohalogenated contaminants in human blood from Egypt.

Oral Iron Treatment Response and Predictors in Anaemic Adolescents and Adults with IBD: A Prospective Controlled Open-Label Trial.

Antagonistic and Quantitative Assessment of Indigenous Lactic acid Bacteria in Different Varieties of Ogi against Gastrointestinal Pathogens.

Iron Supplements Modulate Colon Microbiota Composition and Potentiate the Protective Effects of Probiotics in Dextran Sodium Sulfate-induced Colitis.

Fecal metagenomic profiles in subgroups of patients with myalgic encephalomyelitis/chronic fatigue syndrome.

Saccharomyces boulardii probiotic-associated fungemia: questioning the safety of this preventive probiotic's use.

Acute esophageal injury and strictures following corrosive ingestions in a 27year cohort.

Amelioration of arsenic-induced toxic effects in mice by dietary supplementation of *Syzygium cumini* leaf extract.

Randomized clinical trial of preoperative oral versus intravenous iron in anaemic patients with colorectal cancer.

[Uremic toxins and gut micro biome].

Determination of S-methyl-L-methionine (SMM) from Brassicaceae Family Vegetables and Characterization of the Intestinal Transport of SMM by Caco-2 Cells.

Ion Imbalance Is Involved in the Mechanisms of Liver Oxidative Damage in Rats Exposed to Glyphosate.

A fatal case of acute bentazone overdose despite cricothyroidotomy during cardiopulmonary resuscitation.

Fertility enhancing activity and toxicity profile of aqueous extract of *Chasmanthera dependens* roots in male rats.

In Silico Analysis of Putrefaction Pathways in Bacteria and Its Implication in Colorectal Cancer.

Novel Pathways of Ponatinib Disposition Catalyzed By CYP1A1 Involving Generation of Potentially Toxic Metabolites.

Gut Microbial Transformation of the Dietary Imidazoquinoxaline Mutagen MeIQx Reduces Its Cytotoxic and Mutagenic Potency.

Arsenic exposure impels CD4 commitment in thymus and suppress T cell cytokine secretion by increasing regulatory T cells.

Patchouli oil ameliorates acute colitis: A targeted metabolite analysis of 2,4,6-trinitrobenzenesulfonic acid-induced rats.

Squamous epithelium formation in the respiratory intestine of the bronze Corydoras *Corydoras aeneus* (Callichthyidae Teleostei).

Interactive effects of protein and carbohydrates on production of microbial metabolites in the large intestine of growing pigs.

Butyrate alters expression of cytochrome P450 1A1 and metabolism of benzo[a]pyrene via its histone deacetylase activity in colon epithelial cell models.

A rare case of epilepsy and acute pancreatitis induced by severe paraquat poisoning.

New insights into the role of spermine in enhancing the antioxidant capacity of rat spleen and liver under oxidative stress.

SILAC-based quantitative proteomic analysis reveals widespread molecular alterations in human skin keratinocytes upon chronic arsenic exposure.

Differential effect of early antibiotic intervention on bacterial fermentation patterns and mucosal gene expression in the colon of pigs under diets with different protein levels.

Mumps caused by paraquat-induced poisoning: A case report.

Cellular ROS imaging with hydro-Cy3 dye is strongly influenced by mitochondrial membrane potential.

[Dose-effect relationship between vitamin C and paraquat poisoning rats].

Histone deacetylase inhibitors mediate DNA damage repair in ameliorating hemorrhagic cystitis.

Effect of atrazine on immunocompetence of red-eared slider turtle (*Trachemys scripta*).

Glyphosate (Pesticides).

Atrazine induces endoplasmic reticulum stress-mediated apoptosis of T lymphocytes via the caspase-8-dependent pathway.

[Clinical effect of compound monoammonium glycyrrhizinate combined with dandelion in treatment of acute paraquat poisoning].

Protective effect of *Berberis vulgaris* fruit extract against Paraquat-induced pulmonary fibrosis in rats.

The role of ions, heavy metals, fluoride, and agrochemicals: critical evaluation of potential aetiological factors of chronic kidney disease of multifactorial origin (CKDmfo/CKDu) and recommendations for its eradication.

Combined Effects of Pesticides and Trematode Infections on Hourglass Tree Frog *Polypedates cruciger*.

Acute paraquat exposure impairs colonic motility by selectively attenuating nitrergic signalling in the mouse.

[Experimental evaluation of the impact of low doses of the herbicide 2,4-D in drinking water on some indices of lipid and immune status].

Oral Exposure to Atrazine Induces Oxidative Stress and Calcium Homeostasis Disruption in Spleen of Mice.

[The protective effect of bone marrow mesenchymal stem cells carrying antioxidant gene superoxide dismutase on paraquat lung injury in mice].

New water-soluble palladium(II) complexes of lidocaine and phenylcyanamide derivative ligands: cytotoxicity and cellular response mechanisms.

p-Hydroxycinnamaldehyde induces the differentiation of oesophageal carcinoma cells via the cAMP-RhoA-MAPK signalling pathway.

Cinnamaldehydes in Cancer Chemotherapy.

Superoxide-hydrogen peroxide imbalance interferes with colorectal cancer cells viability, proliferation and oxaliplatin response.

Cinnamaldehyde affects the biological behavior of human colorectal cancer cells and induces apoptosis via inhibition of the PI3K/Akt signaling pathway.

Discovery of a novel anticancer agent with both anti-topoisomerase I and II activities in hepatocellular carcinoma SK-Hep-1 cells in vitro and in vivo: Cinnamomum verum component 2-methoxycinnamaldehyde.

Knockdown of Drosophila hemoglobin suggests a role in O₂ homeostasis.

Appetite-enhancing Effects of trans-Cinnamaldehyde, Benzylacetone and 1-Phenyl-2-butanone by Inhalation.

A characteristic biosignature for discrimination of gastric cancer from healthy population by high throughput GC-MS analysis.

Disseminated tungiasis in a 78-year-old woman from Tanzania: a case report.

Mortality risk among workers with exposure to dioxins.

Aryl Hydrocarbon Receptor Ligands in Cigarette Smoke Induce Production of Interleukin-22 to Promote Pancreatic Fibrosis in Models of Chronic Pancreatitis.

Oral Toxicity of 2,4-Dinitroanisole in Rats.

Synthesis of phenylpiperazine derivatives of 1,4-benzodioxan as selective COX-2 inhibitors and anti-inflammatory agents.

Phase I and pharmacokinetic evaluation of the anti-telomerase agent KML-001 with cisplatin in advanced solid tumors.

Syndromic microphthalmia-3 caused by a mutation on gene SOX2 in a Colombian male patient.

Pseudomelanosis duodeni: is there a common denominator?

Improved pulmonary function in the nitrofen model of congenital diaphragmatic hernia following prenatal maternal dexamethasone and/or sildenafil.

Osler-Weber-Rendu syndrome.

Octopamine stabilizes conduction reliability of an unmyelinated axon during hypoxic stress.

Death within 44 days of 2,4-dinitrophenol intake.

Hydrolysed inulin alleviates the azoxymethane-induced preneoplastic aberrant crypt foci by altering selected intestinal microbiota in Sprague-Dawley rats.

Effects of solmach on alcohol hangover model in mice.

TCDD modulation of gut microbiome correlated with liver and immune toxicity in streptozotocin (STZ)-induced hyperglycemic mice.

In utero and lactational dioxin exposure induces Sema3b and Sema3g gene expression in the developing mouse brain.

Comparison of the Efficacies of Parenteral Iron Sucrose and Oral Iron Sulfate for Anemic Patients with Inflammatory Bowel Disease in Korea.

Colon-derived uremic biomarkers induced by the acute toxicity of Kansui radix: A metabolomics study of rat plasma and intestinal contents by UPLC-QTOF-MS(E).

Effects of Fe-YM1504 on iron deficiency anemia in rats.

METABOLIC DYSBIOSIS OF THE GUT MICROBIOTA AND ITS BIOMARKERS.

[Acute poisoning by pesticides in children].

Slow intestinal transit contributes to elevate urinary p-cresol level in Italian autistic children.

Tracheal occlusion and ventilation changes the nitric oxide pathway in congenital diaphragmatic hernia model.

Combined antenatal therapy with retinoic acid and tracheal occlusion in a rat model of congenital diaphragmatic hernia.

[Incidence and risk factors associated with nosocomial infection in pediatric heart surgery].

Evaluation of Safety of Iron-Fortified Soybean Sprouts, a Potential Component of Functional Food, in Rat.

Evaluation of cytotoxicity and genotoxicity of Hancornia speciosa latex in Allium cepa root model.

Synthesis and Pharmacological Evaluation of Tetrazolobenzimidazoles as Novel Anti-inflammatory Agents.

Chronic TCDD exposure results in the dysregulation of gene expression in splenic B-lymphocytes and in the impairments in T-cell and B-cell differentiation in mouse model.

Synthesis, Characterization & Screening for Anti-Inflammatory & Analgesic Activity of Quinoline Derivatives Bearing Azetidinones Scaffolds.

Residential agricultural pesticide exposures and risks of selected birth defects among offspring in the San Joaquin Valley of California.

Initial Serum Ammonia as a Predictor of Neurologic Complications in Patients with Acute Glufosinate Poisoning.

Molecular imaging of aurora kinase A (AURKA) expression: Synthesis and preclinical evaluation of radiolabeled alisertib (MLN8237).

How we diagnose and treat iron deficiency anemia.

Characterization of the *Clostridium difficile* volatile metabolome using comprehensive two-dimensional gas chromatography time-of-flight mass spectrometry.

Formyl peptide receptor modulators: a patent review and potential applications for inflammatory diseases (2012-2015).

Vam3, a Compound Derived from *Vitis amurensis* Rupr., Attenuated Colitis-Related Tumorigenesis by Inhibiting NF- κ B Signaling Pathway.

Screening for Intestinal Colonization with Vancomycin Resistant Enterococci and Associated Risk Factors among Patients Admitted to an Adult Intensive Care Unit of a Large Teaching Hospital.

[The effect and injury to the airways of different sputum aspiration pressure in a rat model of mucus hypersecretion].

In vitro effect of 4-pentylphenol and 3-methyl-4-nitrophenol on murine splenic lymphocyte populations and cytokine/granzyme production.

A double-blind, randomized, and active-controlled phase III study of Herbiron drink in the treatment of iron-deficiency anemia in premenopausal females in Taiwan.

The *Helicobacter pylori* CZB Cytoplasmic Chemoreceptor TlpD Forms an Autonomous Polar Chemotaxis Signaling Complex That Mediates a Tactic Response to Oxidative Stress.

Walnut Polyphenol Extract Attenuates Immunotoxicity Induced by 4-Pentylphenol and 3-methyl-4-nitrophenol in Murine Splenic Lymphocyte.

[STRUCTURE OF THE SPLEEN AT CHRONIC INTOXICATION OF THE ORGANISM BY SODIUM TETRABORATE AND AFTER INTOXICATION].

Treatment of Resistant Cyclophosphamide Induced Haemorrhagic Cystitis: Review of Literature and Three Case Reports.

How does cigarette smoking cause acute pancreatitis?

Combined effects of n-TiO₂ and 2,3,7,8-TCDD in *Mytilus galloprovincialis* digestive gland: A transcriptomic and immunohistochemical study.

Effect of probiotic and prebiotic fermented milk on skin and intestinal conditions in healthy young female students.

Acute Illness Associated with Exposure to a New Soil Fumigant Containing Dimethyl Disulfide-Hillsborough County, Florida, 2014.

Arsenite accumulation in the mouse eye.

Acute and additive toxicity of ten photosystem-II herbicides to seagrass.

[Effect of total flavonoids from *Astragalus complanatus* on paraquat poisoning-induced pulmonary fibrosis in rats and its mechanisms].

Molecular characterization of heat-shock protein 90 gene and its expression in *Gobiocypris rarus* juveniles exposed to pentachlorophenol.

[Digestive system injury caused by paraquat poisoning and treatment].

Use of acetochlor and cancer incidence in the Agricultural Health Study.

Influence of pesticide exposure on carbonic anhydrase II from sheep stomach.

2,4-Dichlorophenoxyacetic acid and non-Hodgkin's lymphoma, gastric cancer, and prostate cancer: meta-analyses of the published literature.

Acute and subchronic toxic effects of atrazine and chlorpyrifos on common carp (*Cyprinus carpio* L.): Immunotoxicity assessments.

Spectrum of patients intentionally poisoned with an emulsified concentrate pendimethalin herbicide.

Alteration in the cytokine levels and histopathological damage in common carp induced by glyphosate.

Effects of atrazine and chlorpyrifos on oxidative stress-induced autophagy in the immune organs of common carp (*Cyprinus carpio* L.).

UV and hydrogen peroxide treatment restores changes in innate immunity caused by exposure of fish to reuse water.

[Clinical study on the treatment of acute paraquat poisoning with sequential whole gastric and bowel irrigation].

Influenza A infection attenuates relaxation responses of mouse tracheal smooth muscle evoked by acrolein.

Effects of atrazine on the proliferation and cytotoxicity of murine lymphocytes with the use of carboxyfluorescein succinimidyl ester-based flow cytometric approaches.

Clostridium tertium bacteremia in a patient with glyphosate ingestion.

Superantigen staphylococcal enterotoxin C1 mutant can reduce paraquat pulmonary fibrosis.

[A case of acute paraquat poisoning lead to esophageal obstruction].

Transcription alteration of immunologic parameters and histopathological damage in common carp (*Cyprinus carpio* L.) caused by paraquat.

Cancer risks and long-term community-level exposure to pentachlorophenol in contaminated areas, China.

Influence of myeloperoxidase on colon tumor occurrence in inflamed versus non-inflamed colons of *Apc*(Min/+) mice.

Nrf2-dependent suppression of azoxymethane/dextran sulfate sodium-induced colon carcinogenesis by the cinnamon-derived dietary factor cinnamaldehyde.

Anti-inflammatory effect of cinnamaldehyde in *Helicobacter pylori* induced gastric inflammation.

[Changes of the Expression of Brain Derived Neurotrophic Factors in Rats Trachea Induced by Acrolein Exposure].

Simultaneous determination of cinnamaldehyde and its metabolite in rat tissues by gas chromatography-mass spectrometry.

Anti-obesity and anti-hyperglycemic effects of cinnamaldehyde via altered ghrelin secretion and functional impact on food intake and gastric emptying.

Cinnamaldehyde derivative (CB-PIC) sensitizes chemo-resistant cancer cells to drug-induced apoptosis via suppression of MDR1 and its upstream STAT3 and AKT signalling.

Cytotoxicity of PEGylated liposomes co-loaded with novel pro-apoptotic drug NCL-240 and the MEK inhibitor cobimetinib against colon carcinoma in vitro.

Drugs That Bind to α -Synuclein: Neuroprotective or Neurotoxic?

Compound- and sex-specific effects on programming of energy and immune homeostasis in adult C57BL/6JxFVB mice after perinatal TCDD and PCB 153.

Paraoxonase 1 and cytochrome P450 polymorphisms in susceptibility to acute organophosphorus poisoning in Egyptians.

Interactive Effects of Indigestible Carbohydrates, Protein Type, and Protein Level on Biomarkers of Large Intestine Health in Rats.

Aryl hydrocarbon receptor agonists upregulate VEGF secretion from bronchial epithelial cells.

Ethanol enhances arsenic-induced cyclooxygenase-2 expression via both NFAT and NF- κ B signalings in colorectal cancer cells.

Medical interventions to reverse pulmonary hypoplasia in the animal model of congenital diaphragmatic hernia: A systematic review.

Environmental pesticides increase the risk of developing hypertrophic pyloric stenosis.

[Virulence genes and clinical features of Clostridium difficile-associated diarrhea in children].

Porcine epidemic diarrhea virus uses cell-surface heparan sulfate as an attachment factor.

Lower NPAS3 expression during the later stages of abnormal lung development in rat congenital diaphragmatic hernia.

The Transcriptional Effects of PCB118 and PCB153 on the Liver, Adipose Tissue, Muscle and Colon of Mice: Highlighting of Glut4 and Lipin1 as Main Target Genes for PCB Induced Metabolic Disorders.

Arsenic-induced dyslipidemia in male albino rats: comparison between trivalent and pentavalent inorganic arsenic in drinking water.

Ferrous sulfate, but not iron polymaltose complex, aggravates local and systemic inflammation and oxidative stress in dextran sodium sulfate-induced colitis in rats.

Clinical significance of C-reactive protein levels in predicting responsiveness to iron therapy in patients with inflammatory bowel disease and iron deficiency anemia.

Increasing frequency of severe clinical toxicity after use of 2,4-dinitrophenol in the UK: a report from the National Poisons Information Service.

Sodium meta-arsenite prevents the development of autoimmune diabetes in NOD mice.

3-(Benzo[d][1,3]dioxol-5-ylamino)-N-(4-fluorophenyl)thiophene-2-carboxamide overcomes cancer chemoresistance via inhibition of angiogenesis and P-glycoprotein efflux pump activity.

Modulation of colon cancer by nutmeg.

Solid lipid nanoparticles loaded with iron to overcome barriers for treatment of iron deficiency anemia.

Ferric maltol (ST10): a novel oral iron supplement for the treatment of iron deficiency anemia in inflammatory bowel disease.

L-Tryptophan as a Novel Potential Pharmacological Treatment for Wound Healing via Aryl Hydrocarbon Receptor Activation.

Ferric carboxymaltose: a review of its use in iron deficiency.

Liquid chromatography with tandem mass spectrometry for the determination of flufenoxuron in blood using automatic solid phase extraction and its application to a fatal case of flufenoxuron poisoning.

Simultaneous determination of phenoxyethanol and its major metabolite, phenoxyacetic acid, in rat biological matrices by LC-MS/MS with polarity switching: Application to ADME studies.

Treatment Following Intoxication With Lethal Dose of Paraquat: A Case Report and Review of Literature.

Cigarette smoke has sensory effects through nicotinic and TRPA1 but not TRPV1 receptors on the isolated mouse trachea and larynx.

Activation of NRF2 pathway in spleen, thymus as well as peripheral blood mononuclear cells by acute arsenic exposure in mice.

Aryl Hydrocarbon Receptor Activity of Tryptophan Metabolites in Young Adult Mouse Colonocytes.

High accumulation of arsenic in the esophagus of mice after exposure to arsenite.

[Fatal course following poisoning with an illegal weight-reducing agent].

Highly Expressed Genes in Rapidly Proliferating Tumor Cells as New Targets for Colorectal Cancer Treatment.

Paralytic ileus induced by glyphosate intoxication successfully treated using Kampo medicine.

Comet assay evaluation of six chemicals of known genotoxic potential in rats.

Gastrointestinal protective efficacy of Kolaviron (a bi-flavonoid from *Garcinia kola*) following a single administration of sodium arsenite in rats: Biochemical and histopathological studies.

A bioassay to measure energy metabolism in mouse colonic crypts, organoids, and sorted stem cells.

Towards microbial fermentation metabolites as markers for health benefits of prebiotics.

Clinical features and prognosis of paraquat poisoning: a review of 41 cases.

Characterization of mucosa-associated bacterial communities in abomasal ulcers by pyrosequencing.

An estimation of the carcinogenic risk associated with the intake of multiple relevant carcinogens found in meat and charcuterie products.

Protective effects of phyllanthus emblica leaf extract on sodium arsenite-mediated adverse effects in mice.

Aryl hydrocarbon receptor 2 mediates the toxicity of Paclitaxel on the digestive system of zebrafish embryos.

Reply to Koppe and Ten Tusscher's letter to the Editor concerning the use of human peripheral blood lymphocytes to determine relative effect potencies for dioxin like compounds.

Paraquat Poisoning: Analysis of an Uncommon Cause of Fatal Poisoning from Manipal, South India.

[The influence of iron ions on ATP-hydrolases activity of cell membranes of rat colon smooth muscle and kidney].

Microencapsulation of insulin using a W/O/W double emulsion followed by complex coacervation to provide protection in the gastrointestinal tract.

Influence of titanium dioxide nanoparticles on 2,3,7,8-tetrachlorodibenzo-p-dioxin bioconcentration and toxicity in the marine fish European sea bass (*Dicentrarchus labrax*).

Agent Orange exposure and cancer incidence in Korean Vietnam veterans: a prospective cohort study.

Tissue sensitivity of the rat upper and lower extrapulmonary airways to the inhaled electrophilic air pollutants diacetyl and acrolein.

Toxic effects of paraquat on cytokine expression in common carp, *Cyprinus carpio* L.

Pro- and anti-inflammatory cytokine expression in immune organs of the common carp exposed to atrazine and chlorpyrifos.

Agent Orange exposure and disease prevalence in Korean Vietnam veterans: the Korean veterans health study.

Esophageal perforation and death following glyphosate poisoning.

Elimination of young erythrocytes from blood circulation and altered erythropoietic patterns during paraquat induced anemic phase in mice.

Chaetoglobosins from *Chaetomium globosum*, an endophytic fungus in *Ginkgo biloba*, and their phytotoxic and cytotoxic activities.

Immunological effects of paraquat on common carp, *Cyprinus carpio* L.

Effect of a glyphosate-based herbicide on gene expressions of the cytokines interleukin-1^β and interleukin-10 and of heme oxygenase-1 in European sea bass, *Dicentrarchus labrax* L.

[The Fuller's earth and other digestive decontamination measures in the treatment of poisoning].

Association between Agent Orange exposure and nonmelanotic invasive skin cancer: a pilot study.

Genotoxic and biochemical effects of atrazine and Roundup[®], alone and in combination, on the Asian clam *Corbicula fluminea*.

Clinical characteristics of patients after dicamba herbicide ingestion.

Consensus diagnoses and mode of action for the formation of gastric tumors in rats treated with the chloroacetanilide herbicides alachlor and butachlor.

Agent Orange exposure and risk of death in Korean Vietnam veterans: Korean Veterans Health Study.

EGR1-dependent PTEN upregulation by 2-benzoyloxycinnamaldehyde attenuates cell invasion and EMT in colon cancer.

The pentachlorophenol metabolite tetrachlorohydroquinone induces massive ROS and prolonged p-ERK expression in splenocytes, leading to inhibition of apoptosis and necrotic cell death.

Effect of lung fibrosis on glycogen content in different extrapulmonary tissues.

Cinnamaldehyde/chemotherapeutic agents interaction and drug-metabolizing genes in colorectal cancer.

Melatonin Reverses Fas, E2F-1 and Endoplasmic Reticulum Stress Mediated Apoptosis and Dysregulation of Autophagy Induced by the Herbicide Atrazine in Murine Splenocytes.

Acrolein relaxes mouse isolated tracheal smooth muscle via a TRPA1-dependent mechanism.

Regulation of anthocyanin biosynthesis in *Arabidopsis thaliana* red pap1-D cells metabolically programmed by auxins.

Effect of iron supplementation on the expression of hypoxia-inducible factor and antioxidant status in rats exposed to high-altitude hypoxia environment.

A nanoparticulate ferritin-core mimetic is well taken up by HuTu 80 duodenal cells and its absorption in mice is regulated by body iron.

Fructo-oligosaccharides and iron bioavailability in anaemic rats: the effects on iron species distribution, ferroportin-1 expression, crypt bifurcation and crypt cell proliferation in the caecum.

Targeting mitochondria-derived reactive oxygen species to reduce epithelial barrier dysfunction and colitis.

Clinical and etiological heterogeneity in patients with tracheo-esophageal malformations and associated anomalies.

HuR regulates alternative splicing of the TRA2^β gene in human colon cancer cells under oxidative stress.

Bluish vomiting: a rare clinical presentation of poisoning.

Ferroportin mediates the intestinal absorption of iron from a nanoparticulate ferritin core mimetic in mice.

Metabolites of tobacco smoking and colorectal cancer risk.

Increase in reports of toxicity from fat burning supplement seen in UK.

A rapid, simple questionnaire to assess gastrointestinal symptoms after oral ferrous sulphate supplementation.

Novel preoperative pharmacologic methods of preventing postoperative sore throat due to tracheal intubation.

Effects of the continuous intake of a milk drink containing *Lactobacillus casei* strain Shirota on abdominal symptoms, fecal microbiota, and metabolites in gastrectomized subjects.

Ulceration of the oral mucosa following direct contact with ferrous sulfate in elderly patients: a case report and a review of the French National Pharmacovigilance Database.

Homoisoflavanone prevents mast cell activation and allergic responses by inhibition of Syk signaling pathway.

Alcohol oxidizing enzymes and ethanol-induced cytotoxicity in rat pancreatic acinar AR42J cells.

Enteric nervous system and esophageal-gastrointestinal motility in experimental congenital diaphragmatic hernia.

Oxidative stress-inducible truncated serine/arginine-rich splicing factor 3 regulates interleukin-8 production in human colon cancer cells.

Plastid-bearing sea slugs fix CO₂ in the light but do not require photosynthesis to survive.

GM crops and the rat digestive tract: a critical review.

Duodenal absorption and tissue utilization of dietary heme and nonheme iron differ in rats.

High dose of prebiotics reduces fecal water cytotoxicity in healthy subjects.

Effect of increasing dietary fiber on plasma levels of colon-derived solutes in hemodialysis patients.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induced cell-specific drug transporters with acquired cisplatin resistance in cisplatin sensitive cancer cells.

Arsenic thiolation and the role of sulfate-reducing bacteria from the human intestinal tract.

Carprofen-induced oxidative stress in mitochondria of the colonic mucosa of the dog.

Bifidobacterium fermented milk and galacto-oligosaccharides lead to improved skin health by decreasing phenols production by gut microbiota.

Differential relative effect potencies of some dioxin-like compounds in human peripheral blood lymphocytes and murine splenic cells.

Pill -Induced Erosive Esophagitis in Children.

History of Chemistry in the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK).

Influence of zinc supplementation on histopathological changes in the stomach, liver, kidney, brain, pancreas and spleen during subchronic exposure of Wistar rats to glyphosate.

Oral lesions and pulmonary fibrosis after ingesting grapes.

Accumulation, histopathological effects and response of biochemical markers in the spleens and head kidneys of common carp exposed to atrazine and chlorpyrifos.

The immunotoxic effects of dual exposure to PCP and TCDD.

Cancer incidence in Korean Vietnam veterans during 1992-2003: the Korean veterans health study.

Factors associated with severe effects following acute glufosinate poisoning.

Specific proteomic response of *Unio pictorum* mussel to a mixture of glyphosate and microcystin-LR.

Agent Orange exposure and prevalence of self-reported diseases in Korean Vietnam veterans.

Triketone toxicity: a report on two cases of sulcotrione poisoning.

Effects of chemical and handling exposure on fatty acids, oxidative stress and morphological welfare indicators in gilt-head sea bream (*Sparus aurata*).

Paraquat poisoning in pediatric patients.

Determination of glyphosate and AMPA in blood and urine from humans: about 13 cases of acute intoxication.

Changes in differential gene expression in fibroblast cells from patients with triple A syndrome under oxidative stress.

Impact of the redox-cycling herbicide diquat on transcript expression and antioxidant enzymatic activities of the freshwater snail *Lymnaea stagnalis*.

Immunotoxicity of atrazine in Balb/c mice.

Historical long-term exposure to pentachlorophenol causing risk of cancer--a community study.

Effects of atrazine and chlorpyrifos on the mRNA levels of HSP70 and HSC70 in the liver, brain, kidney and gill of common carp (*Cyprinus carpio* L.).

Oral exposure to the herbicide simazine induces mouse spleen immunotoxicity and immune cell apoptosis.

Effect of intravenous or oral sodium chlorate administration on the fecal shedding of *Escherichia coli* in sheep.

Cigarette smoke induces systemic defects in cystic fibrosis transmembrane conductance regulator function.

Bronchoconstriction induced by increasing airway temperature in ovalbumin-sensitized rats: role of tachykinins.

Extracts from black carrot tissue culture as potent anticancer agents.

Regular ingestion of cinnamomi cortex pulveratus offers gastroprotective activity in mice.

Use of biometric, hematologic, and plasma biochemical variables, and histopathology to assess the chronic effects of the herbicide prometryn on Common Carp.

Repair kinetics of acrolein- and (E)-4-hydroxy-2-nonenal-derived DNA adducts in human colon cell extracts.

Sub-acute exposure to the herbicide atrazine suppresses cell immune functions in adolescent mice.

Malabsorption anemia and iron supplement induced constipation in post-Roux-en-Y gastric bypass (RYGB) patients.

Ets1 and heat shock factor 1 regulate transcription of the Transformer 2¹² gene in human colon cancer cells.

Effect of simultaneous supplementation of vitamin A and iron on diarrheal and respiratory tract infection in preschool children in Chengdu City, China.

Cytologic and histologic findings of iron pill-induced injury of the lower respiratory tract.

Integration of halofuginone lactate treatment and disinfection with p-chloro-m-cresol to control natural cryptosporidiosis in calves.

Interventions for preventing diarrhea-associated hemolytic uremic syndrome: systematic review.

Aryl hydrocarbon receptor activation affects the dendritic cell phenotype and function during allergic sensitization.

Expression and potential role of apolipoprotein D on the death-survival balance of human colorectal cancer cells under oxidative stress conditions.

Severe anemia in 3 toddlers with gastric lactobezoar.

Development of a newly large-volume injection system for dioxin determinations in blood of Yusho patients.

Removal of protein-bound, hydrophobic uremic toxins by a combined fractionated plasma separation and adsorption technique.

The influence of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on hematological parameters during experimentally induced pleuritis in rats.

Exhaled breath and fecal volatile organic biomarkers of chronic kidney disease.

Of pills, plants, and paraquat: the relevance of poison centers in emergency medicine.

Urinary p-cresol in autism spectrum disorder.

Peripheral neuropathy due to dinitrophenol used for weight loss: something old, something new.

Potential carcinogenic effects of world trade center dust after intratracheal instillation to Sprague-Dawley rats: first observation.

Accidental occupational exposure to phytosanitary products: experience of the Poison Control Center in Marseille from 2008 to 2010.

Warburg and Crabtree effects in premalignant Barrett's esophagus cell lines with active mitochondria.

Basolateral invasion and trafficking of *Campylobacter jejuni* in polarized epithelial cells.

KML001 displays vascular disrupting properties and irinotecan combined antitumor activities in a murine tumor model.

Iron autointoxication in a 16-year-old girl: a protective role for hepcidin?

Vanadium toxicity in mice: possible impairment of lipid metabolism and mucosal epithelial cell necrosis in the small intestine.

Glyphosate, pathways to modern diseases II: Celiac sprue and gluten intolerance.

Effect of selenomethionine supplementation in food on the excretion and toxicity of arsenic exposure in female mice.

Intestinal transport of 3,6'-disinapoylsucrose, a major active component of *Polygala tenuifolia*, using Caco-2 cell monolayer and in situ rat intestinal perfusion models.

Spectrum of corrosive esophageal injury after intentional paraquat or glyphosate-surfactant herbicide ingestion.

Emerging causes of iron deficiency anemia refractory to oral iron supplementation.

Histopathological changes in the liver of rabbits exposed to high nitrate ingestion in drinking water.

Cell to organ: physiological, immunotoxic and oxidative stress responses of *Lamellidens marginalis* to inorganic arsenite.

Synthesis and cytotoxicity of oligomycin A derivatives modified in the side chain.

Dietary exposure of juvenile female mice to polyhalogenated seafood contaminants (HBCD, BDE-47, PCB-153, TCDD): comparative assessment of effects in potential target tissues.

Activation of aryl hydrocarbon receptor prolongs survival of fully mismatched cardiac allografts.

Variation of content of lipid classes, sterols and fatty acids in gonads and digestive glands of *Scrobicularia plana* in relation to environment pollution levels.

Beta-catenin signaling induces CYP1A1 expression by disrupting adherens junctions in Caco-2 human colon carcinoma cells.

Comparison of routine prenatal iron prophylaxis and screening and treatment for anaemia: pregnancy results and preliminary birth results from a pragmatic randomised controlled trial (PROFEG) in Maputo, Mozambique.

Metabolic profiling of the impact of oligofructose-enriched inulin in Crohn's disease patients: a double-blinded randomized controlled trial.

Histopathological changes induced by paraquat on some tissues of gourami fish (*Trichogaster trichopterus*).

Therapeutic effects of smecta or smectite powder on rats with paraquat toxication.

Treatment of mice with 2,3,7,8-Tetrachlorodibenzo-p-dioxin markedly increases the levels of a number of cytochrome P450 metabolites of omega-3 polyunsaturated fatty acids in the liver and lung.

Changes in the expression of vascular endothelial growth factor after fetal tracheal occlusion in an experimental model of congenital diaphragmatic hernia.

Immunotoxicity induced by acute subtoxic doses of paraquat herbicide: implication of shifting cytokine gene expression toward T-helper (T(H))-17 phenotype.

Pathological and toxicological findings in glyphosate-surfactant herbicide fatality: a case report.

Methyl bromide exposure and cancer risk in the Agricultural Health Study.

Effects of RNA interference-induced Smad3 gene silencing on pulmonary fibrosis caused by paraquat in mice.

[Paraquat poisoning. Case report and overview].

Superoxide dismutase activity of *Helicobacter pylori* per se from 158 clinical isolates and the characteristics.

[The experimental study of therapeutical effects of KANGFUXINYE on upper gastrointestinal injury induced by paraquat in rats].

Accidental chemical burns of oral mucosa by herbicide.

Dramatic increase in glycerol biosynthesis upon oxidative stress in the anaerobic protozoan parasite *Entamoeba histolytica*.

Developmental exposure to diuron causes splenotoxicity in male Sprague-Dawley rat pups.

Effect of chronic pesticide exposure in farm workers of a Mexico community.

A longer tracheal occlusion period results in increased lung growth in the nitrofen rat model.

Acute intoxication with the adjuvant itself for Gramoxone INTEON.

Comparative computational modeling of airflows and vapor dosimetry in the respiratory tracts of rat, monkey, and human.

A lung dosimetry model of vapor uptake and tissue disposition.

Effects of a wheat bran extract containing arabinoxylan oligosaccharides on gastrointestinal health parameters in healthy adult human volunteers: a double-blind, randomised, placebo-controlled, cross-over trial.

Ethanol enhances tumor angiogenesis in vitro induced by low-dose arsenic in colon cancer cells through hypoxia-inducible factor 1 alpha pathway.

Autophagy is a cell self-protective mechanism against arsenic-induced cell transformation.

Activation of the aryl hydrocarbon receptor reduces the number of precursor and effector T cells, but preserves thymic CD4+CD25+Foxp3+ regulatory T cells.

A weight-of-evidence review of colorectal cancer in pesticide applicators: the agricultural health study and other epidemiologic studies.

Eccrine porocarcinoma with carcinomatous lymphangitis in a patient with history of arsenic exposure: a case report.

Suicidal sodium azide intoxication: An analytical challenge based on a rare case.

Treatment of mild non-chemotherapy-induced iron deficiency anemia in cancer patients: comparison between oral ferrous bisglycinate chelate and ferrous sulfate.

Mortality study of chemical workers exposed to dioxins: follow-up 23 years after chemical plant closure.

In vitro and in vivo biological evaluation of new 4,5-disubstituted 1,2,3-triazoles as cis-constrained analogs of combretastatin A4.

A NUP98-HOXD13 leukemic fusion gene leads to impaired class switch recombination and antibody production.

FICZ, a tryptophan photoproduct, suppresses pulmonary eosinophilia and Th2-type cytokine production in a mouse model of ovalbumin-induced allergic asthma.

Metabolite profiling of plasma and urine from rats with TNBS-induced acute colitis using UPLC-ESI-QTOF-MS-based metabolomics--a pilot study.

Non-dioxin-like AhR ligands in a mouse peanut allergy model.

Control of Giardia infections with ronidazole and intensive hygiene management in a dog kennel.

Iron requirements based upon iron absorption tests are poorly predicted by haematological indices in patients with inactive inflammatory bowel disease.

Src-mediated aryl hydrocarbon and epidermal growth factor receptor cross talk stimulates colon cancer cell proliferation.

Uremic solutes from colon microbes.

Treatment with endotracheal therapeutics after sarin microinstillation inhalation exposure increases blood cholinesterase levels in guinea pigs.

An arabinoxylan-rich fraction from wheat enhances caecal fermentation and protects colonocyte DNA against diet-induced damage in pigs.

[Plummer-Vinson syndrome: report of a case and review of literature].

Aldehyde dehydrogenases and cell proliferation.

Distinct urinary metabolic profile of human colorectal cancer.

Iron depletion and repletion with ferrous sulfate or electrolytic iron modifies the composition and metabolic activity of the gut microbiota in rats.

[Suicidal intoxication with sodium azide--a case report].

Relevance of protein fermentation to gut health.

Sodium chlorate reduces the presence of *Escherichia coli* in feces of lambs and ewes managed in shed-lambing systems.

Protective effect of curcumin against arsenic-induced apoptosis in murine splenocytes in vitro.

Comparing performance of three oscillating positive expiratory pressure devices at similar amplitude and frequencies of oscillations on displacement of mucus inside trachea during cough.

Acute inhalation study of allyl alcohol for derivation of acute exposure guideline levels.

Comparative Studies of the (Anti) Mutagenicity of *Baccharis dracunculifolia* and Artepillin C by the Bacterial Reverse Mutation Test.

Age-related effects of sodium arsenite on splenocyte proliferation and Th1/Th2 cytokine production.

Aberrant activation of ubiquitin D at G2 phase and apoptosis by carcinogens that evoke cell proliferation after 28-day administration in rats.

Neuropsychiatric manifestations of methyl iodide.

Angiogenesis inhibitor vasohibin-1 enhances stress resistance of endothelial cells via induction of SOD2 and SIRT1.

The Aryl Hydrocarbon Receptor Influences Transplant Outcomes in Response to Environmental Signals.

Functional analysis of colonic bacterial metabolism: relevant to health?

Cigarette smoke targets glutaredoxin 1, increasing s-glutathionylation and epithelial cell death.

Atrazine-induced apoptosis of splenocytes in BALB/C mice.

Toxicology and risk assessment of acrolein in food.

Comparison of nitrofen uptake via water and food and its distribution in tissue of common carp, *Cyprinus carpio* L.

Effects of atrazine and chlorpyrifos on the mRNA levels of IL-1 and IFN- γ 2b in immune organs of common carp.

Diuron exposure induces systemic and organ-specific toxicity following acute and sub-chronic exposure in male Wistar rats.

Environmental factors in the etiology of esophageal atresia.

Mortality of US pentachlorophenol production workers through 2005.

A review of epidemiologic studies of triazine herbicides and cancer.

Superoxide dismutase protects cells from DNA damage induced by trivalent methylated arsenicals.

Ferulic acid attenuation of advanced glycation end products extends the lifespan of *Caenorhabditis elegans*.

Inadvertent poisoning of seven teenagers with monosodium methanearsonate.

[Prolonged convulsion after intoxication of alachlor herbicide (Lasso): a case report].

The effects of Click 500 SC (terbuthylazine) on common carp *Cyprinus carpio* under (sub)chronic conditions.

Evaluation of suppressive effects of paraquat on innate immunity in Balb/c mice.

The cinnamon-oil ingredient trans-cinnamaldehyde fails to target *Campylobacter jejuni* strain KC 40 in the broiler chicken cecum despite marked in vitro activity.

Effects of dietary supplementation with phytonutrients on vaccine-stimulated immunity against infection with *Eimeria tenella*.

Cinnamaldehyde enhances in vitro parameters of immunity and reduces in vivo infection against avian coccidiosis.

Antimicrobial edible apple films inactivate antibiotic resistant and susceptible *Campylobacter jejuni* strains on chicken breast.

Preferential activation of the vagal nodose nociceptive subtype by TRPA1 agonists in the guinea pig esophagus.

Transient receptor potential ankyrin 1 is expressed by inhibitory motoneurons of the mouse intestine.

A single mid-gestation exposure to TCDD yields a postnatal autoimmune signature, differing by sex, in early geriatric C57BL/6 mice.

Intermittent iron supplementation for reducing anaemia and its associated impairments in menstruating women.

Supplementation with oral vs. intravenous iron for anemia with IBD or gastrointestinal bleeding: is oral iron getting a bad rap?

Polymorphism of the aryl-hydrocarbon receptor gene in intron 10 of human cancers.

Activation of the aryl hydrocarbon receptor suppresses sensitization in a mouse peanut allergy model.

Calcium does not inhibit the absorption of 5 milligrams of nonheme or heme iron at doses less than 800 milligrams in nonpregnant women.

Colonic contribution to uremic solutes.

Surprises perilous: toxic health hazards for employees unloading fumigated shipping containers.

The epidemiology and type of medication errors reported to the National Poisons Information Centre of Ireland.

Effect of oral exposure to fenitrothion and 3-methyl-4-nitrophenol on splenic cell populations and histopathological alterations in spleen in Wistar rats.

Exposure to iodomethane and dichloromethane associated with a confusional state.

Role of the xenobiotic receptor in inflammatory bowel disease.

Prenatal TCDD in mice increases adult autoimmunity.

Central and peripheral mechanisms underlying gastric distention inhibitory reflex responses in hypercapnic-acidotic rats.

Aryl hydrocarbon receptor activation by TCDD reduces inflammation associated with Crohn's disease.

Effects of synbiotic treatment on serum level of p-cresol in haemodialysis patients: a preliminary study.

Prenatal TCDD causes persistent modulation of the postnatal immune response, and exacerbates inflammatory disease, in 36-week-old lupus-like autoimmune SNF1 mice.

Abnormal development of the enteric nervous system in rat embryos and fetuses with congenital diaphragmatic hernia.

Activation of aryl hydrocarbon receptor (AhR) leads to reciprocal epigenetic regulation of FoxP3 and IL-17 expression and amelioration of experimental colitis.

Stereoselective metabolism of fenoxaprop-ethyl and its chiral metabolite fenoxaprop in rabbits.

Inhibition by resistant starch of red meat-induced promutagenic adducts in mouse colon.

A metabolic system-wide characterisation of the pig: a model for human physiology.

Developmental and posthatch effects of in ovo exposure to 2,3,7,8-TCDD, 2,3,4,7,8-PECDF, and 2,3,7,8-TCDF in Japanese quail (*Coturnix japonica*), common pheasant (*Phasianus colchicus*), and white leghorn chicken (*Gallus gallus domesticus*) embryos.

Sodium arsenite and hyperthermia modulate cisplatin-DNA damage responses and enhance platinum accumulation in murine metastatic ovarian cancer xenograft after hyperthermic intraperitoneal chemotherapy (HIPEC).

Metam sodium intoxication: the specific role of degradation products--methyl isothiocyanate and carbon disulphide--as a function of exposure.

Oral ferrous sulfate does not increase preoperative hemoglobin in patients scheduled for hip or knee arthroplasty.

GLT-1 overexpression attenuates bladder nociception and local/cross-organ sensitization of bladder nociception.

Effect of pertussis toxin and herbimycin A on proteinase-activated receptor 2-mediated cyclooxygenase 2 expression in *Helicobacter pylori*-infected gastric epithelial AGS cells.

Cigarette smoke increases susceptibility to tuberculosis--evidence from in vivo and in vitro models.

Tissue-specific and dose-related accumulation of arsenic in mouse offspring following maternal consumption of arsenic-contaminated water.

Changes in DNA methylation and gene expression during 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced suppression of the lipopolysaccharide-stimulated IgM response in splenocytes.

(14)C radiolabeling of proteins to monitor biodistribution of ingested proteins.

Polychlorinated dibenzo-p-dioxins and dibenzofurans in different tissues of the cormorants (*Phalacrocorax carbo*) from Dongting Lake, China.

Shellfish and residual chemical contaminants: hazards, monitoring, and health risk assessment along French coasts.

NTP toxicity studies of toxicity studies of 2,4-decadienal (CAS No. 25152-84-5) administered by gavage to F344/N Rats and B6C3F1 mice.

Sodium arsenite mediated immuno-disruption through alteration of transcription profile of cytokines in chicken splenocytes under in vitro system.

A fatal case of paraquat ingestion: clinical course and review of pathophysiology.

[Effects of acrolein exposure on the expression of Muc5ac in the airway of rats].

Glyphosate-surfactant herbicide-induced reversible encephalopathy.

Predicting acute complicated glyphosate intoxication in the emergency department.

Evaluation of diuron (3-[3,4-dichlorophenyl]-1,1-dimethyl urea) in a two-stage mouse skin carcinogenesis assay.

Spectrum of corrosive esophageal injury after intentional paraquat ingestion.

Fatality in paraquat poisoning.

Postmortem distribution of ametryn in the blood and organ tissues of an herbicide-poisoning victim.

Immunotoxicity of paraquat after subacute exposure to mice.

Toxicokinetics and recovery studies of dicamba dimethyl amine salt in goats following single oral administration.

The cinnamon-derived dietary factor cinnamic aldehyde activates the Nrf2-dependent antioxidant response in human epithelial colon cells.

Lipid peroxidation product acrolein as a predictive biomarker of prostate carcinoma relapse after radical surgery.

Ozone activates airway nerves via the selective stimulation of TRPA1 ion channels.

Dose response to cinnamaldehyde supplementation in growing beef heifers: ruminal and intestinal digestion.

Characterization of the intestinal absorption of arsenate, monomethylarsonic acid, and dimethylarsinic acid using the Caco-2 cell line.

Intracellular ROS level is increased in fibroblasts of triple A syndrome patients.

Toxicology and carcinogenesis studies of 3,3',4,4'-tetrachloroazobenzene (TCAB) (CAS No. 14047-09-7) in Harlan Sprague-Dawley rats and B6C3F1 mice (gavage studies).

Iron pill-induced tumefactive mucosal injury of the hypopharynx.

Body mass index, agricultural pesticide use, and cancer incidence in the Agricultural Health Study cohort.

[Establishment of an erythroleukemia model in CB6F1 mice by transplant with haploidentical mouse leukemic cell line FBL-3].

Connective tissue growth factor expression pattern in lung development.

Protective effects of crude garlic by reducing iron-mediated oxidative stress, proliferation and autophagy in rats.

Short course pre-operative ferrous sulphate supplementation--is it worthwhile in patients with colorectal cancer?

Strepsils[®] tablets reduce sore throat and hoarseness after tracheal intubation.

Sodium azide-associated laryngospasm after air bag deployment.

Antenatal steroid and tracheal occlusion restore vascular endothelial growth factor receptors in congenital diaphragmatic hernia rat model.

Activation of the aryl hydrocarbon receptor pathway may ameliorate dextran sodium sulfate-induced colitis in mice.

Identification of genes that are dispensable for animal infection by *Salmonella typhimurium*.

The use of haemofiltration for severe iron overdose.

Withdrawal symptoms after gabapentin discontinuation.

Toxicity of Bromkal 70-5DE, a technical mixture of polybrominated diphenyl ethers, following 28 d of oral exposure in rats and impact of analysed impurities.

The effect of in vitro tracheal occlusion on branching morphogenesis in fetal lung explants from the rat nitrofen model of congenital diaphragmatic hernia.

Incidence and risk factors for the development of anemia following gastric bypass surgery.

Adverse effects of drugs on the esophagus.

Suppression of experimental autoimmune uveoretinitis by inducing differentiation of regulatory T cells via activation of aryl hydrocarbon receptor.

Distribution and speciation of arsenic by transplacental and early life exposure to inorganic arsenic in offspring rats.

Octatropine methyl bromide and diazepam combination (Valpinax) in patients with irritable bowel syndrome: a multicentre, randomized, placebo-controlled trial.

Colon cancer chemopreventive activities of pomegranate ellagitannins and urolithins.

Deliberate poisoning with dinitrophenol (DNP): an unlicensed weight loss pill.

Bronchopulmonary innervation defects in infants and rats with congenital diaphragmatic hernia.

Albumin as an adjunct to tracheal occlusion in fetal rats with congenital diaphragmatic hernia: a placebo-controlled study.

Interactions of airflow oscillation, tracheal inclination, and mucus elasticity significantly improve simulated cough clearance.

Efficacy and safety of ferric carboxymaltose in correcting iron-deficiency anemia: a review of randomized controlled trials across different indications.

Perinatal exposure of mice to TCDD decreases allergic sensitisation through inhibition of IL-4 production rather than T regulatory cell-mediated suppression.

Pseudomelanosis of the stomach.

Microscopic magnetic resonance in congenital diaphragmatic hernia and associated malformations in rats.

High-protein/high red meat and high-carbohydrate weight-loss diets do not differ in their effect on faecal water genotoxicity tested by use of the WIL2-NS cell line and with other biomarkers of bowel health.

Metabolic bioactivation of oestradiol-17beta (E2beta) in mouse colon epithelial cells bearing ApcMin mutation.

A study of neurologic symptoms on exposure to organophosphate pesticides in the children of agricultural workers.

Aryl hydrocarbon receptor is a transcriptional activator of the human breast cancer resistance protein (BCRP/ABCG2).

Effects of in ovo exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin on hepatic AHR/ARNT-CYP1A signaling pathways in common cormorants (*Phalacrocorax carbo*).

Expression of aryl hydrocarbon receptor in human placentas and fetal tissues.

Arsenic metabolism by human gut microbiota upon in vitro digestion of contaminated soils.

Enhanced translocation of bacteria across metabolically stressed epithelia is reduced by butyrate.

Low-dose synergistic immunosuppression of T-dependent antibody responses by polycyclic aromatic hydrocarbons and arsenic in C57BL/6J murine spleen cells.

The effect of multigenerational diet containing genetically modified triticale on immune system in mice.

Assessment of nicotine inhalation exposure and urinary cotinine of tobacco processing workers.

A complex suicide.

Acetaldehyde and the hypothermic effects of ethanol in mice.

[Immunotoxic effect of herbicide simazine exposure in BALB/c mice].

Glycogen content is affected differently in acute pulmonary and extra-pulmonary lung injury.

Acute intentional self-poisoning with a herbicide product containing fenoxaprop-P-ethyl, ethoxysulfuron, and isoxadifen ethyl: a prospective observational study.

Allergic reaction induced by dermal and/or respiratory exposure to low-dose phenoxyacetic acid, organophosphorus, and carbamate pesticides.

Fatal diquat intoxication.

Patterns of immunotoxicity associated with chronic as compared with acute exposure to chemical or physical stressors and their relevance with regard to the role of stress and with regard to immunotoxicity testing.

Acrolein-derived DNA adduct formation in human colon cancer cells: its role in apoptosis induction by docosahexaenoic acid.

The level and clinical significance of pancreatic enzymes in survivors of acute paraquat poisoning.

Acute gastroduodenal injury after ingestion of diluted herbicide pendimethalin.

Heterocyclic aromatic amine pesticide use and human cancer risk: results from the U.S. Agricultural Health Study.

Inactivation of *Enterobacter sakazakii* in reconstituted infant formula by trans-cinnamaldehyde.

Effects of subchronic exposure to Successor 600 (pethoxamid 600 g L⁻¹) on common carp *Cyprinus carpio*.

A review: oxidative stress in fish induced by pesticides.

Systematic review and meta-analysis of mortality in crop protection product manufacturing workers.

The adverse effects of hydrogen cyanamide on human health: an evaluation of inquiries to the New Zealand National Poisons Centre.

Inhibitory effects of Geijigajakyak-Tang on trinitrobenzene sulfonic acid-induced colitis.

Modulation of intercellular ROS signaling of human tumor cells.

Increased sensitivity of glutathione S-transferase P-null mice to cyclophosphamide-induced urinary bladder toxicity.

Staphylococcal catalase regulates its virulence and induces arthritis in catalase deficient mice.

Edible apple film wraps containing plant antimicrobials inactivate foodborne pathogens on meat and poultry products.

Evaluation of diquat against an acute experimental infection of *Flavobacterium columnare* in channel catfish, *Ictalurus punctatus* (Rafinesque).

Antiinflammatory effects of hydrogen peroxide in neutrophil activation and acute lung injury.

Metabolism of flufenpyr-ethyl in rats and mice.

Safety assessment of leaf curl virus resistant tomato developed using viral derived sequences.

Inflammatory and chloracne-like skin lesions in B6C3F1 mice exposed to 3,3',4,4'-tetrachloroazobenzene for 2 years.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin disrupts B-cell lymphopoiesis and exacerbates autoimmune disease in 24-week-old SNF1 mice.

Ingestion of ferrous sulfate increases ferremia in patients with short bowel syndrome.

A pilot study of faecal volatile organic compounds in faeces from cholera patients in Bangladesh to determine their utility in disease diagnosis.

Effects of chronic exposure to DDT and TCDD on disease activity in murine systemic lupus erythematosus.

Oral and intravenous iron treatment in inflammatory bowel disease: hematological response and quality of life improvement.

Post-exposure treatment with nasal atropine methyl bromide protects against microinstillation inhalation exposure to sarin in guinea pigs.

Expression of chloride channels in trachea-occluded hyperplastic lungs and nitrofen-induced hypoplastic lungs in rats.

Causes and types of health effects during the use of crop protection chemicals: data from a survey of over 6,300 smallholder applicators in 24 different countries.

In vitro evaluation of ferrihydrite as an enterosorbent for arsenic from contaminated drinking water.

Adherence and side effects of three ferrous sulfate treatment regimens on anemic pregnant women in clinical trials.

The myenteric plexus of the esophagus is abnormal in an experimental congenital diaphragmatic hernia model.

Characterization of inflammatory bowel disease with urinary metabolic profiling.

Role of iron in the pathogenesis of cysteamine-induced duodenal ulceration in rats.

PCBs and the energy cost of migration in the European eel (*Anguilla anguilla* L.).

Comparative effects of very low-carbohydrate, high-fat and high-carbohydrate, low-fat weight-loss diets on bowel habit and faecal short-chain fatty acids and bacterial populations.

Aryl hydrocarbon receptor pathway activation enhances gastric cancer cell invasiveness likely through a c-Jun-dependent induction of matrix metalloproteinase-9.

Potential therapeutic significance of increased expression of aryl hydrocarbon receptor in human gastric cancer.

CYP1B1, but not CYP1A1, is downregulated by promoter methylation in colorectal cancers.

Carcinogenesis studies of cresols in rats and mice.

The soluble nickel component of residual oil fly ash alters pulmonary host defense in rats.

Controlled, household-randomized, open-label trial of the effect of treatment of *Helicobacter pylori* infection on iron deficiency among children in rural Alaska: results at 40 months.

Functionally modified gelatin microspheres impregnated collagen scaffold as novel wound dressing to attenuate the proteases and bacterial growth.

Comparison of immunotoxicity among tetrachloro-, pentachloro-, tetrabromo- and pentabromo-dibenzo-p-dioxins in mice.

Toxicology laboratory analysis and human exposure to p-chloroaniline.

Efficacy and tolerability of oral bovine lactoferrin compared to ferrous sulfate in pregnant women with iron deficiency anemia: a prospective controlled randomized study.

Ferric carboxymaltose: a review of its use in iron-deficiency anaemia.

Oral carcinogenicity and toxicity of 2-amino-4-chlorophenol in rats.

Intravenous iron sucrose is superior to oral iron sulphate for correcting anaemia and restoring iron stores in IBD patients: A randomized, controlled, evaluator-blind, multicentre study.

Iron medication-induced gastric mucosal injury.

Melanosis ilei associated with chronic ingestion of oral iron.

Synthesis and pharmacological evaluation of 1,3,4-oxadiazole bearing bis(heterocycle) derivatives as anti-inflammatory and analgesic agents.

Reduced arsenic clearance and increased toxicity in aquaglyceroporin-9-null mice.

Studies supporting the development of a physiologically based pharmacokinetic (PBPK) model for methyl iodide: pharmacokinetics of sodium iodide (NaI) in pregnant rabbits.

Influence of inorganic and organic iron compounds on parameters of cell growth and survival in human colon cells.

Involvement of Blimp-1 and AP-1 dysregulation in the 2,3,7,8-Tetrachlorodibenzo-p-dioxin-mediated suppression of the IgM response by B cells.

Effects of prometryne on apoptosis and necrosis in thymus, lymph node and spleen in mice.

5,7-dihydroxy-3,4,6-trimethoxyflavone inhibits the inflammatory effects induced by *Bacteroides fragilis* enterotoxin via dissociating the complex of heat shock protein 90 and I kappaB alpha and I kappaB kinase-gamma in intestinal epithelial cell culture.

Microbial cellulose wound dressing in the treatment of nonhealing lower extremity ulcers.

Arabinoxylan-oligosaccharides (AXOS) affect the protein/carbohydrate fermentation balance and microbial population dynamics of the Simulator of Human Intestinal Microbial Ecosystem.

TCDD-mediated suppression of the in vitro anti-sheep erythrocyte IgM antibody forming cell response is reversed by interferon-gamma.

Subchronic inhalation of mixtures of cigarette smoke constituents in Xpa^{-/-}p53^{+/-} knock-out mice: a comparison of intermittent with semi-continuous exposure to acetaldehyde, formaldehyde, and acrolein.

Prostaglandin analogue misoprostol attenuates neurotoxin 1-methyl-4-phenylpyridinium-induced mitochondrial damage and cell death in differentiated PC12 cells.

A comparative 90-day toxicity study of allyl acetate, allyl alcohol and acrolein.

S-ethyl-N,N-dipropylthiocarbamate exposure and cancer incidence among male pesticide applicators in the agricultural health study: a prospective cohort.

Level of contamination and impact of pesticides in cupped oyster, *Crassostrea gigas*, reared in a shellfish production area in Normandy (France).

Oral mucosal response to exposure to diquat: a rare occupational injury.

Acute alachlor and butachlor herbicide poisoning.

[Effect of Atrazine on the content of calcium and expression of calmodulin in splenocytes of mice].

Acrolein health effects.

Hemoperfusion using dual pulsatile pump in paraquat poisoning.

Severe acute poisoning due to a glufosinate containing preparation without mitochondrial involvement.

Cancer incidence among pesticide applicators exposed to trifluralin in the Agricultural Health Study.

Combined repeated dose and reproductive/developmental toxicity screening test of the nitrophenolic herbicide dinoseb, 2-sec-butyl-4,6-dinitrophenol, in rats.

[Meta-analysis of association between pentachlorophenol exposure and cancer risk].

Acute renal failure induced by bentazone: 2 case reports and a comprehensive review.

Acute pancreatitis caused by severe glyphosate-surfactant oral intoxication.

A fatal intoxication from ingestion of 2-methyl-4-chlorophenoxyacetic acid (MCPA).

Metabolic acidosis in prometryn (triazine herbicide) self-poisoning.

Improvement in survival after paraquat ingestion following introduction of a new formulation in Sri Lanka.

Perturbation of organogenesis by the herbicide atrazine in the amphibian *Xenopus laevis*.

Growth inhibition of human colon cancer cells by plant compounds.

Acrolein inhalation suppresses lipopolysaccharide-induced inflammatory cytokine production but does not affect acute airways neutrophilia.

Contribution of the SitABCD, MntH, and FeoB metal transporters to the virulence of avian pathogenic *Escherichia coli* O78 strain chi7122.

Maternal administration of betamethasone inhibits proliferation induced by fetal tracheal occlusion in the nitrofen rat model for congenital diaphragmatic hernia: a placebo-controlled study.

Abnormal development of tracheal innervation in rats with experimental diaphragmatic hernia.

Effects of dietary iron levels on growth performance, hematological status, liver mineral concentration, fecal microflora, and diarrhea incidence in weanling pigs.

Heat shock protein 90 inhibitors suppress aryl hydrocarbon receptor-mediated activation of CYP1A1 and CYP1B1 transcription and DNA adduct formation.

Omeprazole alleviates benzo[a]pyrene cytotoxicity by inhibition of CYP1A1 activity in human and mouse hepatoma cells.

Endoscopic removal of iron bezoar following acute overdose.

[Severe esophagitis due to overdose of iron tablets].

Temporal metabonomic modeling of l-arginine-induced exocrine pancreatitis.

An enhanced postnatal autoimmune profile in 24 week-old C57BL/6 mice developmentally exposed to TCDD.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on heme oxygenase-1, biliverdin IXalpha reductase and delta-aminolevulinic acid synthetase 1 in rats with wild-type or variant AH receptor.

Protective effects of GH and IGF-I against iron-induced lipid peroxidation in vivo.

The effect of tracheal occlusion on lung branching in the rat nitrofen CDH model.

Arsenic interferes with the signaling transduction pathway of T cell receptor activation by increasing basal and induced phosphorylation of Lck and Fyn in spleen cells.

Mid-gestation exposure of C57BL/6 mice to 2,3,7,8-tetrachlorodibenzo-p-dioxin causes postnatal morphologic changes in the spleen and liver.

Enhanced detection of autoantibodies on protein microarrays using a modified protein digestion technique.

High potency of bioactivation of 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) in mouse colon epithelial cells with Apc(Min) mutation.

[Headache caused by pesticides--a review of the literature].

A novel intravenous iron formulation for treatment of anemia in inflammatory bowel disease: the ferric carboxymaltose (FERINJECT) randomized controlled trial.

High prevalence of celiac disease in Mexican Mestizo adults with type 1 diabetes mellitus.

Sodium arsenite reduces severity of dextran sulfate sodium-induced ulcerative colitis in rats.

Sodium arsenite induces heat shock protein 70 expression and protects against secretagogue-induced trypsinogen and NF-kappaB activation.

Relative potency based on hepatic enzyme induction predicts immunosuppressive effects of a mixture of PCDDS/PCDFS and PCBS.

Neurological manifestation of methyl bromide intoxication.

Decreased epithelial barrier function evoked by exposure to metabolic stress and nonpathogenic E. coli is enhanced by TNF-alpha.

TCDD exposure exacerbates atopic dermatitis-related inflammation in NC/Nga mice.

A role for iron in Wnt signalling.

Environmental factors in the etiology of esophageal atresia and congenital diaphragmatic hernia: results of a case-control study.

[Gene cloning, sequence analysis and tissue expression of estrogen-related receptor alpha (Erralpha) in Japanese medaka and its transcriptional responses after differential EDCs exposure].

Metabolic fate of [14C] chlorophenols in radish (*Raphanus sativus*), lettuce (*Lactuca sativa*), and spinach (*Spinacia oleracea*).

2,3,7,8-Tetrachlorodibenzo-p-dioxin-mediated impairment of B cell differentiation involves dysregulation of paired box 5 (Pax5) isoform, Pax5a.

Tracheal inflammatory response to bacterial cellulose dressing after surgical scarification in rabbits.

Boronate-containing polymers form affinity complexes with mucin and enable tight and reversible occlusion of mucosal lumen by poly(vinyl alcohol) gel.

Wholegrain foods made from a novel high-amylose barley variety (Himalaya 292) improve indices of bowel health in human subjects.

Modulatory effect of *Byrsonima basiloba* extracts on the mutagenicity of certain direct and indirect-acting mutagens in *Salmonella typhimurium* assays.

Gene expression profiling in Caco-2 human colon cells exposed to TCDD, benzo[a]pyrene, and natural Ah receptor agonists from cruciferous vegetables and citrus fruits.

Basal and inducible CYP1 mRNA quantitation and protein localization throughout the mouse gastrointestinal tract.

Influence of TCDD and natural Ah receptor agonists on benzo[a]pyrene-DNA adduct formation in the Caco-2 human colon cell line.

2,3,7,8-Tetrachlorodibenzo-p-dioxin increases Bovine Herpesvirus type-1 (BHV-1) replication in Madin-Darby Bovine Kidney (MDBK) cells in vitro.

Determination of toxicity of subacute treatment of some plant growth regulators on rats.

Identification of an alginate-based formulation of paraquat to reduce the exposure of the herbicide following oral ingestion.

Aldo-keto reductase family 1 B10 gene silencing results in growth inhibition of colorectal cancer cells: Implication for cancer intervention.

Autophagic and lysosomal reactions to stress in the hepatopancreas of blue mussels.

Blue-green vomit.

An antisense oligonucleotide to HSP47 inhibits paraquat-induced pulmonary fibrosis in rats.

Pesticide poisoning.

An unusual toxic cause of hemolytic-uremic syndrome.

Tongue erosions and diet cola.

Combined effects of herbicides on biomarkers reflecting immune-endocrine interactions in goldfish. Immune and antioxidant effects.

Epidemiological and clinical investigations among employees in a former herbicide production process.

Pesticide exposure among farm workers.

4-Hydroxynonenal, an endogenous aldehyde, causes pain and neurogenic inflammation through activation of the irritant receptor TRPA1.

Binge ethanol administration enhances the MDMA-induced long-term 5-HT neurotoxicity in rat brain.

Distribution of ¹⁴C-atrazine following an acute lactational exposure in the Wistar rat.

2-hydroxycinnamaldehyde inhibits SW620 colon cancer cell growth through AP-1 inactivation.

Oxidative stress impairs heme detoxification in the midgut of the cattle tick, *Rhipicephalus (Boophilus) microplus*.

Iron supplementation in pregnancy--does the preparation matter?

The aryl hydrocarbon receptor is required for optimal resistance to *Listeria monocytogenes* infection in mice.

Pharmacokinetics of 3-[125I]iodo-alpha-methyl-L-tyrosine, a tumor imaging agent, after probenecid loading in mice implanted with colon cancer DLD-1 cells.

A preliminary investigation into the use of biosensors to screen stomach contents for selected poisons and drugs.

[The etiology of congenital diaphragmatic hernia and esophageal atresia: the Hox genes].

Fetal tracheal occlusion for the treatment of congenital diaphragmatic hernia.

Control of piglet coccidiosis by chemical disinfection with a cresol-based product (Neopredisan 135-1).

Pesticide use and colorectal cancer risk in the Agricultural Health Study.

Experimental investigation of the role of endothelin-1 in idiopathic portal hypertension.

[Cancers and pesticides].

[Phyt'attitude: network for toxicovigilance in agriculture].

Agricultural exposures and gastric cancer risk in Hispanic farm workers in California.

Decreased lung fibroblast growth factor 18 and elastin in human congenital diaphragmatic hernia and animal models.

Zinc supplementation of pregnant rats with adequate zinc nutrition suppresses immune functions in their offspring.

Iron-induced esophageal ulceration.

P-selectin mediates metastatic progression through binding to sulfatides on tumor cells.

Uncoupling of oxidative phosphorylation enables *Candida albicans* to resist killing by phagocytes and persist in tissue.

Iron(III)-hydroxide polymaltose complex in iron deficiency anemia / review and meta-analysis.

Analgesic, antipyretic and anti-inflammatory properties of *Mezoneuron benthamianum* Baill (Caesalpinaceae).

Design and synthesis of some new thiazolo [3,2-b]-1,2,4-triazole-5(6H)-ones substituted with flurbiprofen as anti-inflammatory and analgesic agents.

Decreased treatment failure rates following duodenal release ferrous glycine sulfate in iron deficiency anemia associated with autoimmune gastritis and *Helicobacter pylori* gastritis.

A critical comparison of murine pathology and epidemiological data of TCDD, PCB126, and PeCDF.

Constitutive mRNA expression of various glutathione S-transferase isoforms in different tissues of mice.

Metabolic fate of [(14)C]-2,4-dichlorophenol in tobacco cell suspension cultures.

Concentration and distribution of dioxins and related compounds in human tissues.

In vitro effects of reactive oxygen metabolites, with and without flunixin meglumine, on equine colonic mucosa.

Disruption of iron homeostasis increases phosphine toxicity in *Caenorhabditis elegans*.

Mouse lung CYP1A1 catalyzes the metabolic activation of 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP).

Synthesis of 6-chloroisoquinoline-5,8-diones and pyrido[3,4-b]phenazine-5,12-diones and evaluation of their cytotoxicity and DNA topoisomerase II inhibitory activity.

Single high dose dexamethasone treatment decreases the pathological score and increases the survival rate of paraquat-intoxicated rats.

Cancer incidence among pesticide applicators exposed to dicamba in the agricultural health study.

Toxicity of glyphosate as Glypro and LI700 to red-eared slider (*trachemys scripta elegans*) embryos and early hatchlings.

Introduction of cAMP and establishment of neutral lipids alterations as pollution biomarkers using the mussel *Mytilus galloprovincialis*. Correlation with a battery of biomarkers.

Investigation of cancer occurrences associated with an herbicide manufacturing facility.

Evidence for a novel endocrine disruptor: the pesticide propanil requires the ovaries and steroid synthesis to enhance humoral immunity.

Histological changes and micronucleus induction in the zebra mussel *Dreissena polymorpha* after paraquat exposure.

NTP Technical Report on the comparative toxicity studies of allyl acetate (CAS No. 591-87-7), allyl alcohol (CAS No. 107-18-6) and acrolein (CAS No. 107-02-8) administered by gavage to F344/N rats and B6C3F1 mice.

Immunomodulatory effects of maternal atrazine exposure on male Balb/c mice.

Indomethacin induces small intestinal damage and inhibits amitrole-associated thyroid carcinogenesis in rats initiated with N-bis(2-hydroxypropyl)nitrosamine.

[One patient with rupture of esophagus induced by paraquat poisoning].

Orphan nuclear receptor pregnane X receptor sensitizes oxidative stress responses in transgenic mice and cancerous cells.

[Fatal poisoning caused by the ingestion of a concentrated solution of 2,4-D and MCPP].

Tissue distribution of lipid peroxidation product acrolein in human colon carcinogenesis.

Delayed occurrence of H-ras12V-induced hepatocellular carcinoma with long-term treatment with cinnamaldehydes.

Determination and assay validation of the bioactive sesquiterpene lactone xanthatin isolated from *Xanthium cavanillesii* using capillary electrophoresis.

Oral mucosal ulceration due to ferrous sulphate tablets: report of a case.

Pharmacologic and functional characterization of malignant hyperthermia in the R163C RyR1 knock-in mouse.

Impaired intestinal iron absorption in Crohn's disease correlates with disease activity and markers of inflammation.

Impact of weekly treatment with ferrous sulfate on hemoglobin level, morbidity and nutritional status of anemic infants.

The therapeutic effect of tissue cultured root of wild *Panax ginseng* C.A. Mayer on spermatogenetic disorder.

Ground-glass, polyglucosan-like hepatocellular inclusions: A "new" diagnostic entity.

Inhibitory effect of caffeic acid phenethyl ester on the growth of SW480 colorectal tumor cells involves beta-catenin associated signaling pathway down-regulation.

Severe adverse cutaneous reaction to insulin due to cresol sensitivity.

The constitutively active Ah receptor (CA-Ahr) mouse as a potential model for dioxin exposure--effects in vital organs.

Lung morphology after late fetal tracheal ligation in rats.

Relative cancer potencies of selected dioxin-like compounds on a body-burden basis: comparison to current toxic equivalency factors (TEFs).

Pendimethalin exposure and cancer incidence among pesticide applicators.

Synchrotron microradiography study on acute lung injury of mouse caused by PM(2.5) aerosols.

Enhanced expression of plasma glutathione peroxidase in the thymus of mice treated with TCDD and its implication for TCDD-induced thymic atrophy.

A dose-response study of the effects of prenatal and lactational exposure to TCDD on the immune response to influenza a virus.

Synergism in immunotoxicological effects due to repeated combined administration of arsenic and lead in mice.

Depletion of securin increases arsenite-induced chromosome instability and apoptosis via a p53-independent pathway.

Genetic differences in lethality of newborn mice treated in utero with coplanar versus non-coplanar hexabromobiphenyl.

Occupational factors and risk of adult bone sarcomas: a multicentric case-control study in Europe.

A randomized controlled trial of oral versus intravenous iron in chronic kidney disease.

Synthesis of 5-phenyl-1-(3-pyridyl)-1H-1,2,4-triazole-3-carboxylic acid derivatives of potential anti-inflammatory activity.

Glycerol uptake in HCT-15 human colon cancer cell line by Na(+)-dependent carrier-mediated transport.

The influence of inulin on the absorption of nitrogen and the production of metabolites of protein fermentation in the colon.

De novo expression of MECA-79 glycoprotein-determinant on developing B lymphocytes in gut-associated lymphoid tissues.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on leukocyte function-associated antigen-1 mediated splenocyte adhesion.

Liver glycogen bodies: ground-glass hepatocytes in transplanted patients.

Duox2 exhibits potent heme peroxidase activity in human respiratory tract epithelium.

Toxicology and carcinogenesis studies of 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4) in female Harlan Sprague-Dawley rats (gavage studies).

Gene expression alterations in immune system pathways following exposure to immunosuppressive chemicals.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (gavage studies).

A fatal case of saponated cresol ingestion.

Higher extracellular pH suppresses tracheary element differentiation by affecting auxin uptake.

Enhancing effects of simultaneous treatment with sodium nitrite on 2-amino-3-methylimidazo[4,5-f]quinoline-induced rat liver, colon and Zymbal's gland carcinogenesis after initiation with diethylnitrosamine and 1,2-dimethylhydrazine.

Dioxin cancer risk--example of hormesis?

Historical approaches to post-combat disorders.

Protein carbonylation and heat shock response in *Ruditapes decussatus* following p,p'-dichlorodiphenyldichloroethylene (DDE) exposure: a proteomic approach reveals that DDE causes oxidative stress.

Influence of phenol, p-cresol and indole on growth and survival of intestinal lactic acid bacteria.

Acute effects of 3,4-dichloroaniline on biomarkers and spleen histology of the common goby *Pomatoschistus microps*.

Constitutive activation of the aryl hydrocarbon receptor in T-lineage cells induces thymus involution independently of the Fas/Fas ligand signaling pathway.

The isolated anterior stomach of larval mosquitoes (*Aedes aegypti*): voltage-clamp measurements with a tubular epithelium.

Mutagenicity study of butachlor and its metabolites using *Salmonella typhimurium*.

[Paraquat intoxication and hemocarboperfusion].

Antioxidant and hepatoprotective effects of *Eucalyptus maculata*.

Effect of 2,4-dichlorophenoxyacetic acid on the activities of some metabolic enzymes for generating pyridine nucleotide pool of cells from mouse liver.

GSH poisoning.

The polysaccharide antibody response after *Streptococcus pneumoniae* vaccination is differentially enhanced or suppressed by 3,4-dichloropropionanilide and 2,4-dichlorophenoxyacetic acid.

Immunotoxic effects of short-term atrazine exposure in young male C57BL/6 mice.

Update: hydrogen cyanamide-related illnesses--Italy, 2002-2004.

Oral exposure to atrazine modulates cell-mediated immune function and decreases host resistance to the B16F10 tumor model in female B6C3F1 mice.

A risk assessment of atrazine use in California: human health and ecological aspects.

Poisoning due to urea herbicides.

Mortality in New Zealand workers exposed to phenoxy herbicides and dioxins.

Modeling and predicting stress-induced immunosuppression in mice using blood parameters.

Gibberellin inhibitors improve embryogenic tissue initiation in conifers.

Disruption of thyroid hormone homeostasis at weaning of Holtzman rats by lactational but not in utero exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Comparative susceptibility of newborn and young rats to six industrial chemicals.

Effects of ferrous sulphate and non-ionic iron-polymaltose complex on markers of oxidative tissue damage in patients with inflammatory bowel disease.

[Application of a 3D reconstruction model for the analysis of nitrofen induced intrathoracic malformations].

Multilocus sequence analysis and comparative evolution of virulence-associated genes and housekeeping genes of *Clostridium difficile*.

Synthesis and biodistribution of (11)C-GW7845, a positron-emitting agonist for peroxisome proliferator-activated receptor- γ .

Cutting edge: activation of the aryl hydrocarbon receptor by 2,3,7,8-tetrachlorodibenzo-p-dioxin generates a population of CD4⁺ CD25⁺ cells with characteristics of regulatory T cells.

Ultrastructural findings in feline corneal sequestra.

Gene expression changes in human small airway epithelial cells exposed to Delta9-tetrahydrocannabinol.

Combined effects of protein kinase inhibitors and 5-fluorouracil on CEA expression in human colon cancer cells.

Evaluation of pseudo-affective responses to noxious colorectal distension in rats by manometric recordings.

Effect of caffeic acid phenethyl ester on proliferation and apoptosis of colorectal cancer cells in vitro.

Congenital diaphragmatic hernia, tracheal occlusion, thyroid transcription factor-1, and fetal pulmonary epithelial maturation.

NF- κ B and not the MAPK signaling pathway regulates GADD45 β expression during acute inflammation.

Morbidity and mortality following inadvertent poisoning with decanted chemicals.

High susceptibility of human c-Ha-ras proto-oncogene transgenic rats to carcinogenesis: a cancer-prone animal model.

Common viral infection affects pentabrominated diphenyl ether (PBDE) distribution and metabolic and hormonal activities in mice.

[Possible candidates for the compound which is expected to attenuate dioxin toxicity].

Role of autoimmune gastritis, *Helicobacter pylori* and celiac disease in refractory or unexplained iron deficiency anemia.

The dioxin/aryl hydrocarbon receptor mediates downregulation of osteopontin gene expression in a mouse model of gastric tumorigenesis.

Recovery from iron deficiency in rats by the intake of recombinant yeast producing human H-ferritin.

Good bug, bad bug: in the case of enteric inflammatory disease does the epithelium decide?

Gastric hamartomatous tumours in a transgenic mouse model expressing an activated dioxin/Ah receptor.

Insulinlike growth factor I gene expression is increased in the fetal lung after tracheal ligation.

How does human stem cell therapy influence gene expression after liver injury? Microarray evaluation on a rat model.

A cyclic adenosine 3',5'-monophosphate stimulates phospholipase C γ 1-calcium signaling via the activation of tyrosine kinase in boar spermatozoa.

Sodium arsenite-induced inhibition of eukaryotic translation initiation factor 4E (eIF4E) results in cytotoxicity and cell death.

The development of a physiologically-based pharmacokinetic model using the distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the tissues of the eastern oyster (*Crassostrea virginica*).

Human cordonal stem cell intraperitoneal injection can represent a rescue therapy after an acute hepatic damage in immunocompetent rats.

Mechanisms underlying the relaxation response induced by bradykinin in the epithelium-intact guinea-pig trachea in vitro.

3D molecular modeling, free radical modulating and immune cells signaling activities of the novel peptidomimetic L-glutamyl-histamine: possible immunostimulating role.

Constitutively active aryl hydrocarbon receptor expressed specifically in T-lineage cells causes thymus involution and suppresses the immunization-induced increase in splenocytes.

Mechanism of TNF- α modulation of Caco-2 intestinal epithelial tight junction barrier: role of myosin light-chain kinase protein expression.

Human cytochrome p450 2s1: lack of activity in the metabolic activation of several cigarette smoke carcinogens and in the metabolism of nicotine.

Purification and characterization of carbonic anhydrase from bovine stomach and effects of some known inhibitors on enzyme activity.

Transport of thalidomide by the human intestinal caco-2 monolayers.

Local prevention of oxidative stress in the intestinal epithelium of the rat by adhesive liposomes of superoxide dismutase and tempamine.

Contribution of the *Helicobacter pylori* thiol peroxidase bacterioferritin comigratory protein to oxidative stress resistance and host colonization.

Retrospective case series of suspected intentional paraquat poisonings: diagnostic findings and risk factors for death.

Toxicology and carcinogenesis studies of microencapsulated trans-cinnamaldehyde in rats and mice.

Antioxidant enzymes and thiol/disulfide status in the digestive gland of the brown mussel *Perna perna* exposed to lead and paraquat.

Chlorpropham-induced splenotoxicity and its recovery in rats.

Mortality and cancer incidence among alachlor manufacturing workers 1968-99.

[Use of peptide bioregulators in intoxication with the herbicide 2,4-dichlorophenoxyacetic acid].

NTP toxicology and carcinogenesis studies of trans-cinnamaldehyde (CAS No. 14371-10-9) in F344/N rats and B6C3F1 mice (feed studies).

Poisoning due to chlorophenoxy herbicides.

Genotoxicity evaluation of pesticide formulations containing alachlor and atrazine in multiple mouse tissues (blood, kidney, liver, bone marrow, spleen) by comet assay.

The vagus and recurrent laryngeal nerves in experimental congenital diaphragmatic hernia.

2'-benzyloxycinnamaldehyde induces apoptosis in human carcinoma via reactive oxygen species.

Brown spots in the bowel.

The potential role of NaFeEDTA as an iron fortificant.

Effects of separate delivery of zinc or zinc and vitamin A on hemoglobin response, growth, and diarrhea in young Peruvian children receiving iron therapy for anemia.

Comparative analysis of Clostridium difficile clinical isolates belonging to different genetic lineages and time periods.

Evaluation of relative potencies of PCB126 and PCB169 for the immunotoxicities in ovalbumin (OVA)-immunized mice.

Heparanase uptake is mediated by cell membrane heparan sulfate proteoglycans.

Feasibility of "directly observed home-based twice-daily iron therapy" (DOHBIT) for management of anemia in rural patients: a pilot study.

Reduction of the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in mice using an antiulcer drug, geranylgeranylacetone.

Agricultural pesticide use and adenocarcinomas of the stomach and oesophagus.

Branch retinal artery occlusion: a complication of iron-deficiency anemia in a young adult with a rectal carcinoid.

[The effectiveness of three regimens using ferrous sulfate to treat anemia in pregnant women].

NTP toxicology and carcinogenesis studies of triethanolamine (Cas No. 102-71-6) in B6C3F1 mice (dermal studies).

Cyp1a1(-/-) male mice: protection against high-dose TCDD-induced lethality and wasting syndrome, and resistance to intrahepatocyte lipid accumulation and uroporphyrinuria.

Synthesis and analgesic evaluation of some 5-[beta-(10-phenothiazinyl)ethyl]-1-(acyl)-1,2,3,4-tetrazoles.

Epithelia under metabolic stress perceive commensal bacteria as a threat.

An NADPH quinone reductase of *Helicobacter pylori* plays an important role in oxidative stress resistance and host colonization.

Soft-tissue sarcoma and dioxin: A case-control study.

Treatment of iron deficiency anemia with Ferro-Folgamma.

Combined devascularization and proximal splenorenal shunt: is this a better option than either procedure alone?

Effect of epidermal growth factor on pulmonary hypoplasia in experimental diaphragmatic hernia.

Nitrofen-induced congenital diaphragmatic hernia in rat embryo: what model?

Ascorbic acid in nasal and tracheobronchial airway lining fluids.

Human health risks from arsenic in soils: does one model fit all?

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on maternal immune response during pregnancy.

The transepithelial voltage of the isolated anterior stomach of mosquito larvae (*Aedes aegypti*): pharmacological characterization of the serotonin-stimulated cells.

Developmental exposure to the potent aryl hydrocarbon receptor agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin Impairs the cell-mediated immune response to infection with influenza A virus, but enhances elements of innate immunity.

Enzyme-linked immunosorbent assay for monitoring toxic dioxin congeners in milk based on a newly generated monoclonal anti-dioxin antibody.

CYP1A2 is not required for 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immunosuppression.

Quantitative analysis of cresol and its metabolites in biological materials and distribution in rats after oral administration.

Effects of sodium chlorate on toxin production by *Escherichia coli* O157:H7.

Nucleotidase activities in membrane preparations of nervous ganglia and digestive gland of the snail *Helix aspersa*.

Determination of phenol and o-cresol by GC/MS in a fatal poisoning case.

Modeling and predicting immunological effects of chemical stressors: characterization of a quantitative biomarker for immunological changes caused by atrazine and ethanol.

Fatal overdose of the herbicide bentazone.

Immune alterations in mice exposed to the herbicide simazine.

Antitumor effect of the cinnamaldehyde derivative CB403 through the arrest of cell cycle progression in the G2/M phase.

Mortality among triazine herbicide manufacturing workers.

Fatal acute poisoning by bentazon.

Pentachlorophenol poisoning.

[Paraquat intoxication].

Focal transmural necrotic tracheitis in commercial meat turkeys.

Comparison of cyanamide and placebo in the treatment of alcohol dependence of adolescents.

Differential induction of Mn-containing superoxide dismutase by paraquat in peripheral lymphocytes of normal subjects and gastric cancer patients.

Effects of dietary essential oil components on growth performance, digestive enzymes and lipid metabolism in female broiler chickens.

Chondroitin sulfate proteoglycans are required for lung growth and morphogenesis in vitro.

Biological activity of pentachlorophenol on the digestive gland cells of the freshwater mussel *Unio tumidus*.

SKN-1 links *C. elegans* mesendodermal specification to a conserved oxidative stress response.

[Acute poisoning caused by intravenous arsenic].

'Iron lung': distinctive bronchoscopic features of acute iron tablet aspiration.

Tolerogenic role of Kupffer cells in allergic reactions.

Novel 3,3a,4,5,6,7-hexahydroindazole and arylthiazolypyrazoline derivatives as anti-inflammatory agents.

Immunoglobulin E is not required for but enhances airway inflammation and hyperresponsiveness.

T cell-specific disruption of arylhydrocarbon receptor nuclear translocator (*Arnt*) gene causes resistance to 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced thymic involution.

Embryonic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in chickens: effects of dose and embryonic stage on hatchability and growth.

Medication-induced oesophageal disorders.

Dermal exposure to 3-amino-5-mercapto-1,2,4-triazole (AMT) induces sensitization and airway hyperreactivity in BALB/c mice.

Short- and long-term morbidity and mortality in the population exposed to dioxin after the "Seveso accident".

Markers of genetic susceptibility in human environmental hygiene and toxicology: the role of selected CYP, NAT and GST genes.

Human health effects of sodium azide exposure: a literature review and analysis.

Effects of agricultural pesticides on the immune system of *Rana pipiens* and on its resistance to parasitic infection.

A neuropsychotoxicological assessment of workers in a sodium azide production plant.

Functional alterations in CD11b(+)Gr-1(+) cells in mice injected with allogeneic tumor cells and treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Esophageal injury as a result of ingestion of iron tablets.

Tropical chronic pancreatitis: an update.

¹²³I-Interleukin-2: biochemical characterization and in vivo use for imaging autoimmune diseases.

Escherichia coli O157:H7 populations in sheep can be reduced by chlorate supplementation.

Ring around the cardia: a watermelon stomach variant.

Embryological origins and development of the rat diaphragm.

Prevention of iron deficiency anemia in adolescent and adult pregnancies.

Increase in cardiovascular pathology in female Sprague-Dawley rats following chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3,3',4,4',5-pentachlorobiphenyl.

Hyperoxia prevents carrageenan-induced enlargement of functional residual lung capacity in rats.

[Effect of teeth protector on dental injuries during general anesthesia].

Effect of lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin on the susceptibility to *Listeria* infection.

Oxidative stress-induced cell death of human oral neutrophils.

Disruption of cellulose synthesis by isoxaben causes tip swelling and disorganizes cortical microtubules in elongating conifer pollen tubes.

Hepatocellular injury with hyperaminotransferasemia after cresol ingestion.

[Studies on gastrointestinal absorption enhancement effect and mechanism of sodium N-[8-(2-hydroxybenzyl)amino] caprylate to insulin solution].

Cell-specific expression of CYP2A5 in the mouse respiratory tract: effects of olfactory toxicants.

Kinetics of monochloroacetic acid at subtoxic and toxic doses in rats after single oral and dermal administrations.

NTP toxicology and carcinogenesis Studies of 2,4-hexadienal (89% trans,trans isomer, CAS No. 142-83-6; 11% cis,trans isomer) (Gavage Studies).

New method to study oxidative damage and antioxidants in the human small bowel: effects of iron application.

Soluble extracts from *Helicobacter pylori* induce dome formation in polarized intestinal epithelial monolayers in a laminin-dependent manner.

Determining whether transgenic and endogenous plant DNA and transgenic protein are detectable in muscle from swine fed Roundup Ready soybean meal.

Chemiluminescence response of beta-glucan stimulated leukocytes isolated from different tissues and peritoneal cavity of *Dicentrarchus labrax*.

Differential modulation of cytochrome P-450 1A and P-glycoprotein expression by aryl hydrocarbon receptor agonists and thyroid hormone in *Xenopus laevis* liver and intestine.

Whole-grain rye and wheat foods and markers of bowel health in overweight middle-aged men.

Progression of alachlor-induced olfactory mucosal tumours.

The chelating treatment is not useful in human's intoxication with acute herbicidal organic arsenic.

[Genotoxic effect of PCP and lindane on human epithelial tonsil cells].

Responses of microbial activity and decomposer organisms to contamination in microcosms containing coniferous forest soil.

Methylprednisolone does not enhance the surfactant effects on oxygenation and histology in paraquat-induced rat lung injury.

Toxicokinetics, recovery, and metabolism of triclopyr butotyl (ACTP) ester in goats.

Environmental agents as cause of health disorders in children presented at an outpatient unit of environmental medicine.

Pathways involved in mild gastrointestinal inflammation induced by a low level exposure to a food contaminant.

Lysosomal response of earthworm (*Eisenia fetida*) coelomocytes to the fungicide copper oxychloride and relation to life-cycle parameters.

Occupational voice disorders due to workplace exposure to irritants--a review of the literature.

What is a spontaneous pneumothorax?

Effects of paraquat on essential antioxidant elements in osteogenic disorder Shionogi rat.

In vitro effect of air pollutants on human bronchi.

A fatal human intoxication with the herbicide allyl alcohol (2-propen-1-ol).

Evaluation of a 15-day screening assay using intact male rats for identifying antiandrogens.

Combined effect of chronic hypoxia and in vitro exposure to gas pollutants on airway reactivity.

Essential role of ferritin Pfr in *Helicobacter pylori* iron metabolism and gastric colonization.

Soy protein reduces paraquat-induced oxidative stress in rats.

Chemokine-independent preference for T-helper-1 cells in transendothelial migration.

Src/ERK but not phospholipase D is involved in keratinocyte growth factor-stimulated secretion of matrix metalloprotease-9 and urokinase-type plasminogen activator in SNU-16 human stomach cancer cell.

The Coca-Cola incident in Belgium, June 1999.

Bioavailability of caseinophosphopeptide-bound iron.

Increased arylhydrocarbon receptor expression offers a potential therapeutic target for pancreatic cancer.

Molecular analysis of the pathogenicity locus and polymorphism in the putative negative regulator of toxin production (TcdC) among *Clostridium difficile* clinical isolates.

A study on behavioral, neurotoxicological, and immunotoxicological effects of subchronic arsenic treatment in rats.

Murine nitrofen-induced pulmonary hypoplasia does not involve induction of TGF-beta signaling.

A constitutively active dioxin/aryl hydrocarbon receptor induces stomach tumors.

[Neurotoxicity in sodium azide poisoning].

Induction of HSP72 by sodium arsenite fails to protect against cholecystokinin-octapeptide-induced acute pancreatitis in rats.

E-selectin modulates the malignant properties of T84 colon carcinoma cells.

Case-control study evaluating the homogeneity and heterogeneity of risk factors between sinonasal and nasopharyngeal cancers.

An autopsy case of poisoning by massive absorption of cresol a short time before death.

[Acute effects of methyl bromide gas in rats and mice--studies on survival time].

Recurrent stroke in a young patient with celiac disease and hyperhomocysteinemia.

Obligatory requirement of sulfation for P-selectin binding to human salivary gland carcinoma Acc-M cells and breast carcinoma ZR-75-30 cells.

Association between chronic exposure to pesticides and recorded cases of human malignancy in Gaza Governorates (1990-1999).

Dioxin in infants--an environmental hazard?

Src tyrosine kinase augments taxotere-induced apoptosis through enhanced expression and phosphorylation of Bcl-2.

Tumor necrosis factor alpha stimulates invasion of Src-activated intestinal cells.

Differentiation-dependent induction of CYP1A1 in cultured rat small intestinal epithelial cells, colonocytes, and human colon carcinoma cells: basement membrane-mediated apoptosis.

Monoclonal antibodies recognizing epitopes of calretinins: dependence on Ca²⁺-binding status and differences in antigen accessibility in colon cancer cells.

Phenol toxicity and conjugation in human colonic epithelial cells.

Metabolism and excretion of 2-nitro-p-cresol in rats.

Oral bioaccessibility of dioxins/furans at low concentrations (50-350 ppt toxicity equivalent) in soil.

Comparative study of the xenobiotic metabolising system in the digestive gland of the bivalve molluscs in different aquatic ecosystems and in aquaria experiments.

Different toxicological profile of two COMT inhibitors in vivo: the role of uncoupling effects.

Indolo[3,2-b]carbazole inhibits gap junctional intercellular communication in rat primary hepatocytes and acts as a potential tumor promoter.

Effects of entacapone and tolcapone on mitochondrial membrane potential.

Bioavailability of the isomer mixture of phytoene and phytofluene-rich alga *Dunaliella bardawil* in rat plasma and tissues.

Reconstitution of functional human B lymphocytes in NOD/SCID mice engrafted with ex vivo expanded CD34(+) cord blood cells.

Portal absorption of ¹⁴C after ingestion of spiked milk with ¹⁴C-phenanthrene, ¹⁴C-benzo[a]pyrene or ¹⁴C-TCDD in growing pigs.

Modeling digestive tract absorption and desorption of lipophilic organic contaminants in humans.

Role of pp60(c-src) and p(44/42) MAPK in ANG II-induced contraction of rat tonic gastrointestinal smooth muscles.

Synthesis and cytotoxic activity of N-(2-diethylamino)ethylcarboxamide and other derivatives of 10H-quindoline.

Sensory nerve-mediated nasal vasodilatory response to inspired ethyl acrylate.

Thrombin-stimulated cell proliferation mediated through activation of Ras/Raf/MEK/MAPK pathway in canine cultured tracheal smooth muscle cells.

Ferritin induction protects cortical astrocytes from heme-mediated oxidative injury.

Acute sodium arsenite administration induces pulmonary CYP1A1 mRNA, protein and activity in the rat.

Ethanol metabolism and transcription factor activation in pancreatic acinar cells in rats.

Neutropenia induced by paraquat poisoning.

Subacute toxicity of anilofos, a new organophosphorus herbicide, in male rats: effect on some physical attributes and acetylcholinesterase activity.

Surfactant and corticosteroid effects on lung function in a rat model of acute lung injury.

The effect of exposure to a commercial 2,4-D formulation during gestation on the immune response in CD-1 mice.

[Genotoxic effect of the insecticides pentachlorophenol and lindane on human nasal mucosal epithelium].

Tracheal injury caused by ingested paraquat.

Evaluation of the toxicity of chemical compounds using digestive acini of the bivalve mollusc *Pecten maximus* L. maintained alive in vitro.

Toxic effects of the herbicide 2,4-dichlorophenoxyacetic acid on lymphoid organs of the rat.

Pesticide poisoning initially suspected as a natural death.

Pancreatitis induced by environmental toxins.

Chronic low-level administration of diquat increases the nociceptive response to gastric distension in rats: role of mast cells and tachykinin receptor activation.

Effects of chlorpropham (CIPC) on the hemopoietic system of rats.

Ceramide-mediated apoptosis in lung epithelial cells is regulated by glutathione.

Biodegradation and transfer of ingested 2,4-D herbicide by a polyphagous saturniid caterpillar.

Hydrogen peroxide detoxification in the midgut of the blood-sucking insect, *Rhodnius prolixus*.

Cholinergic nerves mediate acetaldehyde action in the gastrointestinal tract.

Sensory-nerve-mediated nasal vasodilatory response to inspired acetaldehyde and acetic acid vapors.

Selected contribution: effect of the aldehyde acrolein on acetylcholine-induced membrane current in airway smooth muscle cells.

Three cases of acute methyl bromide poisoning in a seedling farm family.

T-cell-based immunity counteracts the potential toxicity of glutamate in the central nervous system.

Contribution of Mn-cofactored superoxide dismutase (SodA) to the virulence of *Streptococcus agalactiae*.

Suppression of allergic immune responses to house dust mite (HDM) in rats exposed to 2,3,7,8-TCDD.

Anorectal atresia. An experimental model in the rat.

Health effects of dioxin exposure: a 20-year mortality study.

Chronic toxicity of dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin to mink.

Fetal tracheal occlusion in the rat model of nitrofen-induced congenital diaphragmatic hernia: tracheal occlusion reverses the arterial structural abnormality.

Will genetically modified foods be allergenic?

2,3,7,8-Tetrachlorodibenzo-p-dioxin and diindolylmethanes differentially induce cytochrome P450 1A1, 1B1, and 19 in H295R human adrenocortical carcinoma cells.

Disruption of the genes for ClpXP protease in *Salmonella enterica* serovar Typhimurium results in persistent infection in mice, and development of persistence requires endogenous gamma interferon and tumor necrosis factor alpha.

Toxicity of PCB-126 in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P4501A induction in several organ systems.

Alternative activation of extracellular signal-regulated protein kinases in curcumin and arsenite-induced HSP70 gene expression in human colorectal carcinoma cells.

Acquired resistance to Ah receptor agonists in a population of Atlantic killifish (*Fundulus heteroclitus*) inhabiting a marine superfund site: in vivo and in vitro studies on the inducibility of xenobiotic metabolizing enzymes.

Differential expression of Hox A5 in human colon cancer cell differentiation: a quantitative study using real-time RT-PCR.

5-Aminolaevulinic acid methyl ester transport on amino acid carriers in a human colon adenocarcinoma cell line.

Capacity of mouse mast cells to prime T cells and to induce specific antibody responses in vivo.

BAPS prize-1999: Lung growth induced by prenatal tracheal occlusion and its modifying factors: a study in the rat model of congenital diaphragmatic hernia.

Insecticidal activity of glufosinate through glutamine depletion in a caterpillar.

Aryl hydrocarbon receptor signaling plays a significant role in mediating benzo[a]pyrene- and cigarette smoke condensate-induced cytogenetic damage in vivo.

Evidence of P-glycoprotein mediated apical to basolateral transport of flunisolide in human broncho-tracheal epithelial cells (Calu-3).

Reductions in systemic oxygen delivery induce a hypometabolic state in the turtle *Trachemys scripta*.

Fatal poisoning by butachlor and chlornitrofen ingested from a bottle marked as nitrofen.

Characteristics of transport of fluoresceinated methotrexate in rat small intestine.

Effects of binary mixtures of six xenobiotics on hormone concentrations and morphometric endpoints of northern bobwhite quail (*Colinus virginianus*).

Mechanisms of thrombin-induced MAPK activation associated with cell proliferation in human cultured tracheal smooth muscle cells.

Aryl hydrocarbon receptor-deficient mice generate normal immune responses to model antigens and are resistant to TCDD-induced immune suppression.

The use of dogs as second species in regulatory testing of pesticides. Part II: Subacute, subchronic and chronic studies in the dog.

Chlorophyll derived from *Chlorella* inhibits dioxin absorption from the gastrointestinal tract and accelerates dioxin excretion in rats.

Establishment of orally-administered *Lactobacillus gasseri* SBT2055SR in the gastrointestinal tract of humans and its influence on intestinal microflora and metabolism.

2,3,7,8-Tetrachlorodibenzo-p-dioxin affects the number and function of murine splenic dendritic cells and their expression of accessory molecules.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of different cytotoxins on cytochrome P450 mediated monooxygenase functions and on oxidative state.

Acute and repeated vapor exposure toxicology of 3-(methylthio)propionaldehyde.

Cytogenetic studies of three triazine herbicides. II. In vivo micronucleus studies in mouse bone marrow.

Modeling and predicting selected immunological effects of a chemical stressor (3,4-dichloropropionanilide) using the area under the corticosterone concentration versus time curve.

[Paraquat poisoning. A study of 29 cases and evaluation of the effectiveness of the "Caribbean scheme"].

Arsenic species that cause release of iron from ferritin and generation of activated oxygen.

72-kDa stress protein (hsp72) induced by administration of dimethylarsinic acid to mice accumulates in alveolar flat cells of lung, a target organ for arsenic carcinogenesis.

Chronic ingestion of a potential food contaminant induces gastrointestinal inflammation in rats: role of nitric oxide and mast cells.

Cancer mortality in four northern wheat-producing states.

[Poisonings with the herbicides glyphosate and glyphosate-trimesium].

Lung toxicity of paraquat in the rat.

Clinical presentations and prognostic factors of a glyphosate-surfactant herbicide intoxication: a review of 131 cases.

Increase in production of ascorbate radical in tissues of rat treated with paraquat.

In vivo cytokine production and resistance to infection after acute exposure to 3,4-dichloropropionaniline.

Subchronic toxicity of chlorpropham (CIPC) in ICR mice.

Ethane sulfonate metabolite of alachlor: assessment of oncogenic potential based on metabolic and mechanistic considerations.

Cellular mechanisms of acrolein-induced alteration in calcium signaling in airway smooth muscle.

A fatal case of chlorate poisoning: confirmation by ion chromatography of body fluids.

Quantitative determination of paraquat in a fatal intoxication by HPLC-DAD following chemical reduction with sodium borohydride.

Detection of 2,4-dichlorophenoxyacetic acid (2,4-D) residues in neonates breast-fed by 2,4-D exposed dams.

Genetic variation of basal iron status, ferritin and iron regulatory protein in mice: potential for modulation of oxidative stress.

A new diquat derivative appropriate for colourimetric measurements of biological materials in the presence of paraquat.

Clinical effects and plasma concentration determination after 2,4-dichlorophenoxyacetic acid 200 mg/kg administration in the dog.

Mechanisms of toxicity, clinical features, and management of diquat poisoning: a review.

Mechanisms of toxicity, clinical features, and management of acute chlorophenoxy herbicide poisoning: a review.

Results of dental amalgam removal and mercury detoxification using DMPS and neural therapy.

Evaluation of a novel antimicrobial polymer for the control of porcine postweaning colibacillosis.

Comparative metabolism of chloroacetamide herbicides and selected metabolites in human and rat liver microsomes.

Sensitivity of the SRBC PFC assay versus ELISA for detection of immunosuppression by TCDD and TCDD-like congeners.

The mercapturic acid biotransformation pathway of hexachlorobenzene is not involved in the induction of splenomegaly, or skin and lung lesions in the Brown Norway rat.

Induction of the stress response increases interleukin-6 production in the intestinal mucosa of endotoxaemic mice.

The effects of perinatal exposure to low doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin on immune organs in rats.

[Diagnosis of acute poisoning].

Iron deficiency due to excessive therapeutic phlebotomy in hemochromatosis.

Injection of iron compounds followed by induction of the stress response causes tissue injury and apoptosis.

Central versus peripheral mediation of naloxone's perfusion effects in endotoxic rats.

In vivo, in utero microscopic magnetic resonance imaging: application in a rat model of diaphragmatic hernia.

Redistribution of accumulated 2,3,7,8-tetrachlorodibenzo-p-dioxin during coxsackievirus B3 infection in the mouse.

Quantitative analysis of tyrosinase transcripts in blood.

Benzylidene lactam compound, KNK437, a novel inhibitor of acquisition of thermotolerance and heat shock protein induction in human colon carcinoma cells.

Iron supplementation affects the production of pro-inflammatory cytokines in IL-10 deficient mice.

Uncoupling of intestinal mitochondrial oxidative phosphorylation and inhibition of cyclooxygenase are required for the development of NSAID-enteropathy in the rat.

Transfer factors: identification of conserved sequences in transfer factor molecules.

Increase of specific symptoms after long-term use of chlorophenol polluted drinking water in a community.

[Clinical experience with the use of benzylalcohol and amyl-m-cresol (Strepsils) in stomatological diseases].

Drug-induced oesophageal disorders: pathogenesis, incidence, prevention and management.

Trypsin stimulates integrin alpha(5)beta(1)-dependent adhesion to fibronectin and proliferation of human gastric carcinoma cells through activation of proteinase-activated receptor-2.

Analysis of the pathogenicity locus in Clostridium difficile strains.

Mass psychogenic illness attributed to toxic exposure at a high school.

Pharmacokinetics of orally administered camptothecins.

Effect of iron salts, haemosiderins, and chelating agents on the lymphocytes of a thalassaemia patient without chelation therapy as measured in the comet assay.

Sodium arsenite induces the stress response in the gut and decreases bacterial translocation in a burned mouse model with gut-derived sepsis.

Cytokine-inducing activity and antitumor effect of a liposome-incorporated interferon-gamma-inducing molecule derived from OK-432, a streptococcal preparation.

Effects of iron salts and haemosiderin from a thalassaemia patient on oxygen radical damage as measured in the comet assay.

The effect of cysteine and 2,4-dinitrophenol on heme and nonheme absorption in a rat intestinal model.

Monomethylarsonic acid reductase and monomethylarsonous acid in hamster tissue.

Chronic toxicity of arsenic in goats: clinicobiochemical changes, pathomorphology and tissue residues.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of different cytotoxins on cytochrome P450 isoforms expression and on glycogen content.

Developmental and tissue-specific expression of AHR1, AHR2, and ARNT2 in dioxin-sensitive and -resistant populations of the marine fish *Fundulus heteroclitus*.

Toxicity of TCDD in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P450 1A induction in several organ systems.

Pathologic alterations in adult rainbow trout, *Oncorhynchus mykiss*, exposed to dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Biochemical evidence for ATPase activity in CFTR-enriched apical membrane vesicles from tracheal epithelium.

Pathological lesions in lambs fed raw or processed cottonseed meal.

Transforming growth factor- α -mediated growth pathways in human gastro-intestinal cell lines in relation to the gastrin autocrine pathway.

Tumour necrosis factor- α - and interleukin-1 β -stimulated cell proliferation through activation of mitogen-activated protein kinase in canine tracheal smooth muscle cells.

Cloning and functional characterization of the bile acid-sensitive methotrexate carrier from rat liver cells.

A novel function of thyrotropin as a potentiator of electrolyte secretion from the tracheal gland.

Oxidative stress in female B6C3F1 mice following acute and subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

TCDD induces CYP1A4 and CYP1A5 in chick liver and kidney and only CYP1A4, an enzyme lacking arachidonic acid epoxygenase activity, in myocardium and vascular endothelium.

Toxicology of environmental chemicals in the flounder (*Platichthys flesus*) with emphasis on the immune system: field, semi-field (mesocosm) and laboratory studies.

NTP Toxicology and Carcinogenesis Studies of Pyridine (CAS No. 110-86-1) in F344/N Rats, Wistar Rats, and B6C3F1 Mice (Drinking Water Studies).

Cromakalim-induced membrane current in guinea-pig tracheal smooth muscle cells.

[Chemical accident in Sch \ddot{A} nbeck--an assessment of the risk to health and environment].

Rapid lethal intoxication caused by the herbicide glyphosate-trimesium (Touchdown).

trans-Activation of PPAR α and PPAR γ by structurally diverse environmental chemicals.

Associations between stomach cancer incidence and drinking water contamination with atrazine and nitrate in Ontario (Canada) agroecosystems, 1987-1991.

Cardiogenic shock in a patient with glyphosate-surfactant poisoning.

Renal failure and corrosive airway and gastrointestinal injury after ingestion of diluted diquat solution.

Cigarette smoke induces direct DNA damage in the human B-lymphoid cell line Raji.

Fatal paraquat poisoning: report of two cases.

Acute basagran poisoning mimicking neuroleptic malignant syndrome.

Clinical impact of upper gastrointestinal tract injuries in glyphosate-surfactant oral intoxication.

Glutathione antagonized cyclophosphamide- and acrolein-induced cytotoxicity of PC3 cells and immunosuppressive actions in mice.

Homicide by paraquat poisoning.

An evaluation of the carcinogenic potential of the herbicide alachlor to man.

Vaginally applied diquat intoxication.

Acute poisoning with a herbicide containing imazapyr (Arsenal): a report of six cases.

³²P-postlabelling with high-performance liquid chromatography for analysis of abundant DNA adducts in human tissues.

Auxin is required for leaf vein pattern in Arabidopsis.

Sensory nerve-mediated immediate nasal responses to inspired acrolein.

[Dietary fiber inhibits the incidence of hepatic metastasis with the anti-oxidant activity and portal scavenging functions].

Synthesis and evaluation of anti-inflammatory activity of some thiazolo[3,2-b]-1,2,4-triazole-5(6H)-ones and their Michael addition products.

Occupational exposures and risk of gastric cancer in a population-based case-control study.

Risk of stomach cancer associated with 12 workplace hazards: analysis of death certificates from 24 states of the United States with the aid of job exposure matrices.

Erosive injury to the upper gastrointestinal tract in patients receiving iron medication: an underrecognized entity.

Effect of a single or repeated dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on T cell subpopulations in the Long-Evans rat.

Long term substitution and specific immune responses after transfer of bovine peripheral blood lymphocytes into severe combined immunodeficient mice.

Mutation of beta-catenin is an early event in chemically induced mouse hepatocellular carcinogenesis.

Effects of aging on resistance to *Trichinella spiralis* infection in rodents exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Fetal tracheal occlusion in the rat model of nitrofen-induced congenital diaphragmatic hernia.

Heparin/heparan sulfate interacting protein gene expression is up-regulated in human colorectal carcinoma and correlated with differentiation status and metastasis.

Geographical differences of cancer incidence in Costa Rica in relation to environmental and occupational pesticide exposure.

Randomized placebo-controlled trial of *Helicobacter pylori* eradication for iron-deficiency anemia in preadolescent children and adolescents.

4-chloro-m-cresol is a trigger of malignant hyperthermia in susceptible swine.

Toxicity of 3,3',4,4'-tetrachloroazoxybenzene in rats and mice.

Toxicity of 3,3',4,4'-tetrachloroazobenzene in rats and mice.

Influence of phosphotyrosine kinase inhibitors on adhesive properties of highly and poorly metastatic HT-29 colon carcinoma cells to collagen.

Ex vivo evaluation of a Taylor-Couette flow, immobilized heparinase I device for clinical application.

[Oxidative injury and its defense system in vivo].

Novel phenotype associated with in vivo activated CTL precursors.

v-src induces cisplatin resistance by increasing the repair of cisplatin-DNA interstrand cross-links in human gallbladder adenocarcinoma cells.

Effective treatment of murine leukemia with antisense poly-2'O-(2,4-dinitrophenyl)-oligoribonucleotides.

Oral ferrous sulfate supplements increase the free radical-generating capacity of feces from healthy volunteers.

Isoform-specific induction of a human aldo-keto reductase by polycyclic aromatic hydrocarbons (PAHs), electrophiles, and oxidative stress: implications for the alternative pathway of PAH activation catalyzed by human dihydrodiol dehydrogenase.

Human cytochrome P4501A2.

The tracheobronchial tree is abnormal in experimental congenital diaphragmatic hernia.

Hodgkin's disease, work, and the environment. A review.

Effects of phenolic antioxidants and flavonoids on DNA synthesis in rat liver, spleen, and testis in vitro.

Binding capacity of various fibre to pesticide residues under simulated gastrointestinal conditions.

Polychlorinated biphenyl mixtures (Aroclors) inhibit LPS-induced murine splenocyte proliferation in vitro.

pH-dependent uptake of irinotecan and its active metabolite, SN-38, by intestinal cells.

NTP Toxicology and Carcinogenesis Studies of Triethanolamine (CAS No. 102-71-6) in F344 Rats and B6C3F1 Mice (Dermal Studies).

Role of glutathione and reactive oxygen intermediates in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immune suppression in C57Bl/6 mice.

Amount and fate of egg protein escaping assimilation in the small intestine of humans.

Identification and immunolocalization of two isoforms of ATP-diphosphohydrolase (ATPDase) in the pig immune system.

Acute iron intoxication: the efficacy of deferiprone and sodium bicarbonate in the prevention of iron absorption from the digestive tract.

Effects of dexamethasone, growth factors, and tracheal ligation on the development of nitrofen-exposed hypoplastic murine fetal lungs in organ culture.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of various mitogens and cytotoxins on cytochrome P450 (P450) isoforms expression and on P450 mediated monooxygenase functions.

Hypoxic hypometabolism in the anesthetized turtle, *Trachemys scripta*.

p120(ctn) acts as an inhibitory regulator of cadherin function in colon carcinoma cells.

[Effect of green vegetable on digestive tract absorption of polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans in rats].

[Effect of protoporphyrin on digestive tract absorption of dioxins in rats].

Cellular signalling and free-radical modulating activities of the novel peptidomimetic L-glutamyl-histamine.

Superficial buffer barrier and preferentially directed release of Ca²⁺ in canine airway smooth muscle.

Dietary intrinsic phytate protects colon from lipid peroxidation in pigs with a moderately high dietary iron intake.

Subcellular localization of meta-tetra (hydroxyphenyl) chlorin in human tumor cells subjected to photodynamic treatment.

Four amino acid changes are associated with the Aldh3a1 locus polymorphism in mice which may be responsible for corneal sensitivity to ultraviolet light.

Species differences in hepatocyte induction of CYP1A1 and CYP1A2 by omeprazole.

Induction of collagenase-3 (MMP-13) expression in human skin fibroblasts by three-dimensional collagen is mediated by p38 mitogen-activated protein kinase.

Apoptosis of the intestinal principal cells of *Xenopus* larvae exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Glyphosate toxicosis in domestic animals: a survey from the data of the Centre National d'Informations Toxicologiques Veterinaires (CNITV).

Chronic dietary toxicity study on 2,4-dichlorophenoxybutyric acid in the dog.

Postservice mortality of US Air Force veterans occupationally exposed to herbicides in Vietnam: 15-year follow-up.

Inhibitors of branched-chain amino acid biosynthesis as potential antituberculosis agents.

Airspace configuration at different transpulmonary pressures in normal and paraquat-induced lung injury in rats.

Health effects of occupational pentachlorophenol exposure in timber sawmill employees: a preliminary study.

Surfactant therapy restores gas exchange in lung injury due to paraquat intoxication in rats.

Involvement of oxidative stress in paraquat-induced metallothionein synthesis under glutathione depletion.

Malicious paraquat poisoning in Oklahoma dogs.

Clinical experience with pendimethalin (STOMP) poisoning in Taiwan.

Effects of edifenphos and glyphosate on the immune response and protein biosynthesis of bolti fish (*Tilapia nilotica*).

Effect of 2,4-dichlorophenoxyacetic acid, trifluralin and triallate herbicides on immune function.

Thermally oxidized dietary fat and colon carcinogenesis in rodents.

Free radicals and antioxidant status following pylorus ligation induced gastric mucosal injury in rats.

Effect of pentachlorophenol on immune function.

Calcium signaling in airway smooth muscle cells is altered by in vitro exposure to the aldehyde acrolein.

Gastric and intestinal ethanol toxicity in the rat. Effect on glutathione level and role of alcohol and acetaldehyde metabolisms.

Periplasmic copper-zinc superoxide dismutase protects *Haemophilus ducreyi* from exogenous superoxide.

Expression of mucin-associated sulfo-Lea carbohydrate epitopes on human colon carcinoma cells.

Concentrated cresol intoxication.

Molecular and functional characterization of *Salmonella enterica* serovar typhimurium *poxA* gene: effect on attenuation of virulence and protection.

Enantiomers of flurbiprofen can distinguish key pathophysiological steps of NSAID enteropathy in the rat.

Hepatocyte extracellular matrix modulates expression of growth factors and growth factor receptors in human colon cancer cells.

A large mouth ulcer, caused by a ferrous sulphate tablet in direct contact with oral mucosa in a patient with senile dementia.

Low-dose oral iron absorption test: establishment of a reference interval.

Occupational risk factors for cancer of the gastric cardia. Analysis of death certificates from 24 US states.

Regulation of cytochrome P450 enzymes by aryl hydrocarbon receptor in human cells: CYP1A2 expression in the LS180 colon carcinoma cell line after treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin or 3-methylcholanthrene.

Oral teratogenicity studies of methyl bromide in rats and rabbits.

Role of altered arachidonic acid metabolism in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immune suppression in C57Bl/6 mice.

Differential display of genes in normal and hypoplastic fetal murine lungs.

Characterization of the effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in B6C3F1 and DBA/2 mice following single and repeated exposures.

Aryl hydrocarbon receptor-inducible or constitutive expression of human UDP glucuronosyltransferase UGT1A6.

Endotracheal inhalatory sodium nitroprusside in severely hypoxic newborns.

2,3,7,8-Tetrachlorodibenzo-p-dioxin co-stimulates staphylococcal enterotoxin beta (SEB) cytokine production and phenotypic cell cycling in Long-Evans rats.

Chemical warfare agents: estimating oral reference doses.

Lipopolysaccharide activation of murine splenocytes and splenic B cells increased the expression of aryl hydrocarbon receptor and aryl hydrocarbon receptor nuclear translocator.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazoxybenzene (CAS No. 21232-47-3) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazobenzene (CAS No. 14047-09-7) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induction of cytochrome P450-dependent arachidonic acid metabolism in mouse liver microsomes: evidence for species-specific differences in responses.

Heat shock protein improves cold preserved small bowel grafts.

2,3,7,8-Tetrachlorodibenzo-p-dioxin in pregnant Long Evans rats: disposition to maternal and embryo/fetal tissues.

Effect of protein kinase inhibitors on primary antibody induction in tissue cultures.

Evidence for impaired assimilation and increased colonic fermentation of protein, related to gastric acid suppression therapy.

CD40-mediated signal transduction in human airway smooth muscle.

Military history of patients with inflammatory bowel disease: an epidemiological study among U.S. veterans.

p38 mitogen-activated protein kinase expression and activation in smooth muscle.

Enhanced oxidative stress and altered antioxidants in brains of Bcl-2-deficient mice.

Neuron density and distribution of NADPH-diaphorase positive neurons in the human stomach.

Anti-immunoglobulin E antibody treatment blocks histamine release and tissue contraction in sensitized mice.

Colony-stimulating factor-1 stimulates the fusion process in osteoclasts.

Female Sprague-Dawley rats exposed to a single oral dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin exhibit sustained depletion of aryl hydrocarbon receptor protein in liver, spleen, thymus, and lung.

The effects of serum iminodipeptides and prednisolone on superoxide generation and tyrosyl phosphorylation of proteins in neutrophils from a patient with prolidase deficiency.

Mechanical strain increases protein tyrosine phosphorylation in airway smooth muscle cells.

Identification of a putative surfactant convertase in rat lung as a secreted serine carboxylesterase.

Correlation of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced apoptotic cell death in the embryonic vasculature with embryotoxicity.

Hemotoxicity of chlorpropham (CIPC) in F344 rats.

A review of epidemiologic studies of triazine herbicides and cancer.

A case of paraquat poisoning and subsequent fatality presenting to an emergency department.

A case-control study of lung cancer among Vietnam veterans.

The immunomodulatory effects of the herbicide propanil on murine macrophage interleukin-6 and tumor necrosis factor-alpha production.

Quantitative distributions of different cholinesterases and inhibition of acetylcholinesterase by metidathion and paraquat in alimentary canal of common carp.

The oral and intratracheal toxicities of ROUNDUP and its components to rats.

A fatal case of drinking and cyanamide intake.

Inhibition of intracellular Ca²⁺ signalling, cytotoxicity and antitumor activity of the herbicide oryzalin and its analogues.

Comparison of HPLC and CE for the analysis of dichlorprop in a case of intoxication.

[Late pseudo-appendicular syndrome after Roundup poisoning].

Lipid peroxidation and histopathological changes in the digestive gland of a freshwater snail *Planorbium corneum* L. (Gastropoda, Pulmonata) exposed to chronic and sub-chronic concentrations of PCP.

Use of estrogen therapy in a patient with gastrointestinal bleeding secondary to arteriovenous malformations.

Dioxin exposure and cancer risk: a 15-year mortality study after the "Seveso accident".

Evidence for protein dolichylation.

Alterations in the developing immune system of the F344 rat after perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: II. Effects on the pup and the adult.

The role of NAD(P)H:quinone oxidoreductase in quinone-mediated p21 induction in human colon carcinoma cells.

Lateral hypothalamic injection of GABA(A) antagonist induces gastric vagus-mediated hypocalcemia in the rat.

Mitochondrial damage: a possible mechanism of the "topical" phase of NSAID induced injury to the rat intestine.

Thiamine uptake in human intestinal biopsy specimens, including observations from a patient with acute thiamine deficiency.

Mechanisms involved in Helicobacter pylori-induced interleukin-8 production by a gastric cancer cell line, MKN45.

Mitochondrial proliferation and paradoxical membrane depolarization during terminal differentiation and apoptosis in a human colon carcinoma cell line.

Tumor-specific expression of cytochrome P450 CYP1B1.

Opposite effects of 2,2',4,4',5,5'-hexachlorobiphenyl and 2,3,7,8-tetrachlorodibenzo-p-dioxin on the antibody response to sheep erythrocytes in mice.

Mortality among Army Chemical Corps Vietnam veterans.

Regulation of dioxin receptor function by omeprazole.

Helicobacter pylori stimulates granulocyte-macrophage colony-stimulating factor (GM-CSF) production from cultured antral biopsies and a human gastric epithelial cell line.

Cancer mortality among rice growers in Novara Province, northern Italy.

Involvement of altered B7 expression in dioxin immunotoxicity: B7 transfection restores the CTL but not the autoantibody response to the P815 mastocytoma.

Psoralens: novel modulators of Cl⁻ secretion.

Protein phosphatase in neuroblastoma cells: [3H]cantharidin binding site in relation to cytotoxicity.

Position statement: ipecac syrup. American Academy of Clinical Toxicology; European Association of Poisons Centres and Clinical Toxicologists.

Impaired cellular immune response in rats exposed perinatally to Baltic Sea herring oil or 2,3,7,8-TCDD.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and congeners in infants. A toxicokinetic model of human lifetime body burden by TCDD with special emphasis on its uptake by nutrition.

[Chronic diarrhea following ingestion of Tardyferon associated with lymphocytic colitis].

Digestive tract neoplasms among employees with past exposure to brominated dioxins.

Zinc supplementation reduced morbidity, but neither zinc nor iron supplementation affected growth or body composition of Mexican preschoolers.

Cytochrome P450 1A1 induction in rat lymphoid tissues following in vivo and in vitro exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin requires protein kinase C.

Is exposure to bacterial endotoxin a determinant of susceptibility to intoxication from xenobiotic agents?

Metabolism of 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) by human cytochrome P4501B1.

Impairment of antigen-specific antibody production in transgenic mice expressing a dominant-negative form of gp130.

Nitric oxide decreases intestinal haemorrhagic lesions in rat anaphylaxis independently of mast cell activation.

Differential effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the expression of prostaglandin-H synthase isoenzymes in mouse tissues.

Effects of K⁺ channel inhibitors and antagonists on NS-004 evoked relaxations in guinea-pig isolated trachea.

[Lesions of the tracheobronchial tree after the aspiration of a tablet of ferrous sulfate].

Suspected herbicide toxicosis in a dog.

Acute oral toxicity of the herbicide BUREX EKO in pheasants.

Alleviation of paraquat-induced lung injury by pretreatment with bifunctional liposomes containing alpha-tocopherol and glutathione.

Cancer incidence among alachlor manufacturing workers.

Evaluation of mortality and cancer incidence among alachlor manufacturing workers.

[Paraquat poisoning. Description of a case].

The expressed protein in glyphosate-tolerant soybean, 5-enolpyruvylshikimate-3-phosphate synthase from *Agrobacterium* sp. strain CP4, is rapidly digested in vitro and is not toxic to acutely gavaged mice.

Effect of dietary paraquat on a rat mutant unable to synthesize ascorbic acid.

Mortality in a cohort of pentachlorophenol manufacturing workers, 1940-1989.

The effects of chronic sidestream cigarette smoke exposure on eicosanoid production by tracheal epithelium.

Active transport of glutathione S-conjugate in human colon adenocarcinoma cells.

Effects induced by feeding organochlorine-contaminated carp from Saginaw Bay, Lake Huron, to laying White Leghorn hens. II. Embryotoxic and teratogenic effects.

Effects of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) injected into the yolks of chicken (*Gallus domesticus*) eggs prior to incubation.

Gaseous disinfection of *Cryptosporidium parvum* oocysts.

Inhibition of TC-1 cytokine production, effector cytotoxic T lymphocyte development and alloantibody production by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Evaluating the antioxidant potential of new treatments for inflammatory bowel disease using a rat model of colitis.

Fatal accident resulting from methyl bromide poisoning after fumigation of a neighbouring house; leakage through sewage pipes.

Cause specific mortality and cancer incidence among employees exposed to 2,3,7,8-TCDD after a 1953 reactor accident.

Mechanisms of colon cancer binding to substratum and cells.

Diagnostic criteria for selenium toxicosis in aquatic birds: dietary exposure, tissue concentrations, and macroscopic effects.

Cancer incidence and specific occupational exposures in the Swedish leather tanning industry: a cohort based case-control study.

Pirenzepine versus scopolamine methyl bromide in double-contrast barium enema study of large bowel.

Lung collagen cross-links in rats with experimentally induced pulmonary fibrosis.

Exogenous catalase may potentiate oxidant-mediated lung injury in the female Sprague-Dawley rat.

Factors influencing the development of sigmoid colon cancer. Bacteriologic and biochemical studies.

Role of decomposition products in sodium methylthiocarbamate-induced immunotoxicity.

Glutathione S-transferase-pi is secreted as a monomer into human plasma by platelets and tumor cells.

Safety assessment based on irrelevant toxicologic data: an extraordinary case of bromomethane used as a fumigant.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on humoral and cell-mediated immunity in Sprague-Dawley rats.

Evaluation of reactive oxygen species involvement in amiodarone pulmonary toxicity in vivo and in vitro.

Reactive airway dysfunction syndrome due to sodium azide inhalation.

Host resistance to rat cytomegalovirus (RCMV) and immune function in adult PVG rats fed herring from the contaminated Baltic Sea.

Curcumin induces apoptosis in immortalized NIH 3T3 and malignant cancer cell lines.

Therapeutic efficacy of povidone-iodine (Betadine) and dichloroxylenol (Septocid) in Holstein cows affected with endometritis and/or cervicitis.

Mechanism underlying the inhibitory effect of high calcium carbonate intake on iron bioavailability from ferrous sulphate in anaemic rats.

Basal metabolism of intraperitoneally injected carrier-free ⁷⁴As-labeled arsenate in rabbits.

Stereoselective action of (R*,R*)-(+/-)-methyl-4-[2-[2-hydroxy-2-(3-chlorophenyl)ethylamino] propyl]-phenoxyacetic acid (BRL37344) on beta-adrenoceptors and metabolic chiral inversion.

Identification and characterisation of a superoxide dismutase and catalase from *Mycobacterium ulcerans*.

Inhibitory effect of tyrosine kinase inhibitors on antigen-induced tracheal contraction and histamine release in guinea pigs.

Tissue-specific 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible expression of human UDP-glucuronosyltransferase UGT1A6.

Bladder augmentation in the prevention of cyclophosphamide-induced haemorrhagic cystitis in the rat model.

Human and rat airway smooth muscle responsiveness after ozone exposure in vitro.

Metabolism of alcohol by human gastric cells: relation to first-pass metabolism.

Identification of functional aryl hydrocarbon receptor and aryl hydrocarbon receptor nuclear translocator in murine splenocytes.

The primary structure of the major pepsinogen from the gastric mucosa of tuna stomach.

The use of a new viability assay to determine the susceptibility of *Cryptosporidium* and *Eimeria* sporozoites to respiratory inhibitors and extremes of pH.

Enumeration of human colonic bacteria producing phenolic and indolic compounds: effects of pH, carbohydrate availability and retention time on dissimilatory aromatic amino acid metabolism.

Aryl-hydrocarbon receptor-deficient mice are resistant to 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced toxicity.

Non-, mono-, and di-o-chlorobiphenyl concentrations and their toxic equivalents to 2,3,7,8-tetrachlorodibenzo[p]dioxin in Aroclors(R) and digestive glands from American lobster (*Homarus americanus*) captured in Atlantic Canada.

Epithelium-linked smooth muscle hyperresponsiveness in ferret tracheae exposed to acrolein.

Application of a biologically-based RFD estimation method to tetrachlorodibenzo-p-dioxin (TCDD) mediated immune suppression and enzyme induction.

Pharmacological study of atypical beta-adrenoceptors in rat esophageal smooth muscle.

Rapid cytotoxicity of human B lymphocytes induced by VH4-34 (VH4.21) gene-encoded monoclonal antibodies.

The capability of rat colon tissue slices to metabolize the cooked-food carcinogen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine.

Comparison of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) disposition following pulmonary, oral, dermal, and parenteral exposures to rats.

Diallyl disulfide induces apoptosis of human colon tumor cells.

Induction of CYP1A1 and ALDH-3 in lymphoid tissues from Fisher 344 rats exposed to 2,3,7,8-tetrachlorodibenzodioxin (TCDD).

Methyl bromide intoxication during grain store fumigation.

Expression of 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible cytochrome P4501A1 in human splenic lymphocyte cultures.

Calcium absorption in rats with distal intestinal resection: influence of type of dietary fat, cholecalciferol and nature of the adaptative response.

Intratracheally administered liposomal alpha-tocopherol protects the lung against long-term toxic effects of paraquat.

Subacute toxicity of urea herbicide, isoproturon, in male rats.

Acrolein-induced smooth muscle hyperresponsiveness and eicosanoid release in excised ferret tracheae.

Changes in primary and secondary lymphoid organ T-cell subpopulations resulting from acute in vivo exposure to propanil.

The role of free radicals in paraquat-induced corneal lesions.

Chelation of organoarsenate with dimercaptosuccinic acid.

Toxicity of cotoran (fluometuron) in Desert sheep.

The effects of subchronic chlorate exposure in Sprague-Dawley rats.

A 2,4-dichlorophenoxyacetic acid induced fatality.

Survival in a case of massive paraquat ingestion.

Liposomal alpha-tocopherol alleviates the progression of paraquat-induced lung damage.

Acute-phase reactant proteins and antioxidants in rats intoxicated chronically with paraquat.

Pentachlorophenol accumulation in the freshwater mussels *Anodonta anatina* and *Pseudanodonta complanata*, and some physiological consequences of laboratory maintenance.

Diquat increases cysteine proteinase inhibitors greatly in rat plasma and tissues.

Species-specific antagonism of Ah receptor action by 2,2',5,5'-tetrachloro- and 2,2',3,3',4,4'-hexachlorobiphenyl.

Immunotoxic effects of exposure of rats to xenobiotics via maternal lactation. Part I 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Isolation of leukocytes infiltrating the islets of Langerhans of diabetes-prone mice for flow cytometric analysis.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on anti-CD3-induced changes in T-cell subsets and cytokine production.

Quantitative analysis of collagen and collagen subtypes I, III, and V in human pancreatic cancer, tumor-associated chronic pancreatitis, and alcoholic chronic pancreatitis.

Preferential requirement for protein tyrosine phosphatase activity in the 12-O-tetradecanoylphorbol-13-acetate-induced differentiation of human colon cancer cells.

Intestinal rotation in experimental congenital diaphragmatic hernia.

Dietary exposure of mink to carp from Saginaw Bay, Michigan: 2. Hematology and liver pathology.

Serum erythropoietin levels in patients with severe anemia secondary to inflammatory bowel disease and the use of recombinant human erythropoietin in patients with anemia refractory to treatment.

Iron overdose and detection of gastrointestinal bleeding with the hemocult and gastrocult assays.

Alterations in splenocyte protein kinase C (PKC) activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin in vivo.

Radiosyntheses of labeled beta-pseudothymidine ([C-11]- and [H-3]methyl) and its biodistribution and metabolism in normal and tumored mice.

Immune system impairment and hepatic fibrosis in mice lacking the dioxin-binding Ah receptor.

[The use of tardyferon in the combined treatment of patients with chronic atrophic gastritis and peptic ulcer complicated by hemorrhage].

Identity and pathogenesis of stomach tumors in Sprague-Dawley rats associated with the dietary administration of butachlor.

A study of the mechanism of butachlor-associated gastric neoplasms in Sprague-Dawley rats.

Presentation of cartilage proteoglycan to a T cell hybridoma derived from a mouse with proteoglycan-induced arthritis.

Synthesis, topoisomerase I inhibitory activity, and in vivo evaluation of 11-azacampthecin analogs.

Acinar cell respiration in experimental acute pancreatitis.

Onco-fetal/laminin-binding collagen from colon carcinoma: detection of new sequences.

Host resistance to *Trichinella spiralis* infection in rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Effect of epidermal growth factor on cadherin-mediated adhesion in a human oesophageal cancer cell line.

Effect of supplementation with an iron-fortified milk on incidence of diarrhea and respiratory infection in urban-resident infants.

A new gastric ulcer model in rats produced by ferrous iron and ascorbic acid injection.

Induction of preneoplastic lesions by sodium arsenite in human fetal respiratory epithelia in organ culture.

Colonic protein fermentation and promotion of colon carcinogenesis by thermolyzed casein.

Lung retention and bioavailability of arsenic after single intratracheal administration of sodium arsenite, sodium arsenate, fly ash and copper smelter dust in the hamster.

An attempt to explain interindividual variability in 24-h urinary excretion of inorganic arsenic metabolites by C57 BL/6J mice.

Use of Mishell-Dutton culture for the detection of the immunosuppressive effect of iron-containing compounds.

Inhibition of tumor necrosis factor activity fails to restore 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced suppression of the antibody response to sheep red blood cells.

Comparative assessment of metabolic enzyme levels in macrophage populations of the F344 rat.

A comparison of the effects of SCA40, NS 004 and NS 1619 on large conductance Ca(2+)-activated K⁺ channels in bovine tracheal smooth muscle cells in culture.

Immunosuppressive activity of polychlorinated biphenyl mixtures and congeners: nonadditive (antagonistic) interactions.

Application of high-performance liquid chromatography to a fatality involving azide.

A novel type of cell death of lymphocytes induced by a monoclonal antibody without participation of complement.

Halogenated aromatic hydrocarbon-induced suppression of the plaque-forming cell response in B6C3F1 splenocytes cultured with allogenic mouse serum: Ah receptor structure activity relationships.

Proportionate mortality study of Vietnam-era veterans of Michigan.

Phenotypic analysis of spleen, thymus, and peripheral blood cells in aged C57B1/6 mice following long-term exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Suppression of cytotoxic T lymphocyte activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin occurs in vivo, but not in vitro, and is independent of corticosterone elevation.

Regulation of interleukin-8 production in a human colon epithelial cell line (HT-29).

Expression of xenobiotic-metabolizing enzymes in cultured rat tracheal epithelial cells.

Synthesis, Structure of Nitrogen-Containing Phosphinogold(I) Ferrocenes. In vitro Activity against Bladder and Colon Carcinoma Cell Lines.

Comparison of the toxicity of cinnamaldehyde when administered by microencapsulation in feed or by corn oil gavage.

Sclerodermatous syndrome after occupational exposure to herbicides--response to systemic steroids.

Survival of paraquat intoxication complicated with mediastinal emphysema: a case report.

Acute 2,4-dichlorophenoxyacetic acid intoxication in cattle.

The use of human lung slices in toxicology.

Cinnamaldehyde-induced micronuclei in rodent liver.

Identification and dynamics of paraquat in the bone marrow, thymus and spleen in rats using immunohistochemical techniques.

Selective myelotoxicity of propanil.

Assessment of lipid peroxidation associated with lung damage induced by oxidative stress. In vivo and in vitro studies.

Methemoglobinemia following ingestion of a monolinuron/paraquat herbicide (Gramonol).

Free radicals in the pathophysiology of pulmonary injury and disease.

Concomitant increases in galectin-1 and its glycoconjugate ligands (carcinoembryonic antigen, lamp-1, and lamp-2) in cultured human colon carcinoma cells by sodium butyrate.

Effect of arsenic exposure on alveolar macrophage function. I. Effect of soluble as(III) and as(V).

[Mechanisms for cell damage in acute pancreatitis using isolated acinar cells].

Etiological aspects of congenital diaphragmatic hernia: results of a case comparison study.

Time course of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced thymic atrophy in the Wistar rat.

Dentate gyrus and olfactory bulb responses to olfactory and noxious stimulation in urethane anaesthetized rats.

Morbidity follow up study of BASF employees exposed to 2,3,7, 8-tetrachlorodibenzo-p-dioxin (TCDD) after a 1953 chemical reactor incident.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on pulmonary influenza virus titer and natural killer (NK) activity in rats.

Evaluation of lung function changes before and after surfactant application during artificial ventilation in newborn rats with congenital diaphragmatic hernia.

Bioavailability of iron from oral ferric polymaltose in humans.

Coxsackievirus B3 infection alters the uptake of 2,3,7,8-tetrachlorodibenzo-p-dioxin into various tissues of the mouse.

Action of dietary trypsin, pressed coffee oil, silymarin and iron salt on 1,2-dimethylhydrazine tumorigenesis by gavage.

Photoaffinity labeling of the Ah receptor with 3-[3H]methylcholanthrene and formation of a 165-kDa complex between the ligand-binding subunit and a novel cytosolic protein.

Monitoring biological effects of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls in great blue heron chicks (*Ardea herodias*) in British Columbia.

Side effects of iron supplements in blood donors: superior tolerance of heme iron.

TCDD-induced hypophagia is not explained by nausea.

The rice culture filtrate of *Bacillus cereus* isolated from emetic-type food poisoning causes mitochondrial swelling in a HEp-2 cell.

NTP Toxicology and Carcinogenesis Studies of 4,4'-Thiobis(6-*t*-butyl-*m*-cresol) (CAS No. 96-69-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Ah receptor in different tissues of C57BL/6J and DBA/2J mice: use of competitive polymerase chain reaction to measure Ah-receptor mRNA expression.

Induction in vitro of 72-kD heat shock protein in a continuous culture of rat thyroid cells, FRTL5.

Comparative mutagenicity of chemicals selected for test in the International Program on Chemical Safety's collaborative study on plant systems for the detection of environmental mutagens.

Model of bicarbonate secretion by resting frog stomach fundus mucosa. I. Transepithelial measurements.

Effects of induction and age-dependent enzyme expression on lung bioavailability, metabolism, and DNA binding of urban air particulate-absorbed benzo[a]pyrene, 2-nitrofluorene, and 3-amino-1,4-dimethyl-5H-pyridol-(4,3)-indole.

Tissue specific expression of the rat Ah-receptor and ARNT mRNAs.

Mechanism of cholinergic stimulation of glucose oxidation in isolated gastric glands.

Effect of glutathione depletion and inhibition of glucuronidation and sulfation on 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) metabolism, PhIP-DNA adduct formation and unscheduled DNA synthesis in primary rat hepatocytes.

Demonstration of an ectoATP-diphosphohydrolase (E.C.3.6.1.5.) in non-vascular smooth muscles of the bovine trachea.

Evidence for histamine uptake by murine hematopoietic progenitors.

Antioxidant properties of guinea pig tracheal epithelial cells in vitro.

Serum modulation of the effects of TCDD on the in vitro antibody response and on enzyme induction in primary hepatocytes.

NTP Toxicology and Carcinogenesis Studies of o-Benzyl-p-Chlorophenol (CAS No. 120-32-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Effect of in vitro exposure to acrolein on carbachol responses in rat trachealis muscle.

Biochemical and toxicological studies on the mixtures of three commonly-used herbicides in mice.

Cytotoxic effect of atrazine on murine B-lymphocytes in vitro.

Production of monoclonal antibodies against diquat and its enzyme-linked immunosorbent assay.

Haemotoxic effect of phenylurea herbicides in rats: role of haemoglobin-adduct formation in splenic toxicity.

Acrolein increases airway sensitivity to substance P and decreases NEP activity in guinea pigs.

[Intoxications by a weedkiller preparation containing glyphosate].

Protection of a rat tracheal epithelial cell line from paraquat toxicity by inhibition of glucose-6-phosphate dehydrogenase.

Cell proliferation in the respiratory tract of the rat after acute inhalation of formaldehyde or acrolein.

Developmental toxicity of acrolein in New Zealand white rabbits.

Community exposure to a paraquat drift.

Immunohistochemical localization and dynamics of paraquat in the stomach and esophagus of rats.

Protective role for neuropeptides in acute pulmonary response to acrolein in guinea pigs.

[N-demethylation and denitrosation activity of the rat liver, thymus lymphocytes and spleen after exposure to simazine and sodium nitrite].

Imaging of activated natural killer cells in mice by positron emission tomography: preferential uptake in tumors.

70 kDa heat shock cognate protein is a transformation-associated antigen and a possible target for the host's anti-tumor immunity.

Adenocarcinoma production in rats administered 1,2-dimethylhydrazine and fed iron salt and guar gum diets.

Tumor cell heme uptake induces ferritin synthesis resulting in altered oxidant sensitivity: possible role in chemotherapy efficacy.

Subchronic toxicity of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats.

Gastric vagus mediates immobilization-induced hypocalcemia in rats.

[Preoperative collection of autologous blood with recombinant human erythropoietin therapy].

Carcinoembryonic antigen mediates in vitro cell aggregation induced by interferon-gamma in a human colon cancer cell line: requirement for active metabolism and intact cytoskeleton.

A new form of tumor and fetal collagen that binds laminin.

Iron status and growth of rats fed different dietary iron sources.

NAD(P)H:quinone oxidoreductase1 (DT-diaphorase) expression in normal and tumor tissues.

Effects of substrate and inhibition of oxidative metabolism on contraction and myosin phosphorylation in ASM.

Tumors produced in rats with a single dosage of 1,2-dimethylhydrazine.

Chronic iron intake and diarrhoeal disease in infants. A field study in a less-developed country.

Gamma interferon cooperates with lipopolysaccharide to activate mouse splenic macrophages to an antihistoplasma state.

Effect of a single lethal dose of TCDD on the levels of monoamines, their metabolites and tryptophan in discrete brain nuclei and peripheral tissues of Long-Evans rats.

Iron protein succinylate in the treatment of iron deficiency: controlled, double-blind, multicenter clinical trial on over 1,000 patients.

Effects of restricted feeding on the absorption, metabolism, and accumulation of pentachlorobenzene in rats.

Teratogenicity and immunotoxicity of 3,3',4,4',5-pentachlorobiphenyl in C57BL/6 mice.

Mechanisms of carcinogenicity of methyl halides.

Tissue distribution and toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats after intravenous injection.

Ifosfamide. Patient care management.

Apoptosis in splenic B lymphocytes. Regulation by protein kinase C and IL-4.

Direct effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on human tonsillar lymphocytes.

Measurement of the epithelial barrier integrity in tracheal cell cultures exposed to irritant compounds.

Inhibition of protein tyrosine kinase activity by herbimycin A prevents anti-mu but not LPS-mediated cell cycle progression and differentiation of splenic B lymphocytes.

Light microscopic catalase histochemistry in mussel digestive gland tissue.

Human non-secretory ribonucleases. I. Purification, peptide mapping and lectin blotting analysis of the kidney, liver and spleen enzymes.

NTP Toxicology and Carcinogenesis Studies of Pentachloroanisole (CAS No. 1825-21-4) in F344 Rats and B6C3F1 Mice (Feed Studies).

Acute inflammatory response to sheep red blood cell challenge in mice treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): phenotypic and functional analysis of peritoneal exudate cells.

Propachlor-S-cysteine: a major circulating metabolite in the calf, pig and rat after administration of propachlor.

Gastrointestinal effects of single and repeated doses of ferrous sulphate in rats.

Intestinal solubility and absorption of ferrous iron in growing rats are affected by different dietary pectins.

Protective effect of liposome-associated alpha-tocopherol against paraquat-induced acute lung toxicity.

One-year toxicity of orally administered acrolein to the beagle dog.

Nitrofen-induced diaphragmatic hernias in rats: pulmonary antioxidant enzyme activities.

Reproductive study of acrolein on two generations of rats.

Tracheal epithelium in culture: a model for toxicity testing of inhaled molecules.

Limited immunotoxic potential of technical formulation of the herbicide atrazine (AAtrex) in mice.

Comparison of the immunotoxicity of propanil and its metabolite, 3,4-dichloroaniline, in C57Bl/6 mice.

Cytogenetic studies of herbicide interactions in vitro and in vivo using atrazine and linuron.

Upper gastrointestinal injury caused by diquat.

Subacute toxicity of paraquat in beagle dogs: clinicopathology and pathologic examinations.

Mechanisms of aldehyde-induced bronchial reactivity: role of airway epithelium.

Lung injury induced by paraquat, hyperoxia and cobalt chloride: effects of ambroxol.

Fatal paraquat poisoning: a light microscopic study in eight autopsy cases.

[Rainbow trout and zebrafish, two models for continuous toxicity tests: relative sensitivity, species and organ specificity in cytopathologic reaction of liver and intestines to atrazine].

Efficacy of whole bowel irrigation using solutions with or without adsorbent in the removal of paraquat in dogs.

Enhancement of cytotoxic T lymphocyte growth from spleens of P815-tumor-bearing host mice with mafosfamide.

Regulation of cytochrome P450IA1 gene expression in a human intestinal cell line, Caco-2.

Quercetin, an inhibitor of heat shock protein synthesis, inhibits the acquisition of thermotolerance in a human colon carcinoma cell line.

Mucosal reactive oxygen metabolite production in duodenal ulcer disease.

A case of ulcerative colitis induced by oral ferrous sulfate.

Chemiluminescence assay of mucosal reactive oxygen metabolites in inflammatory bowel disease.

Large hiatal hernias, anemia, and linear gastric erosion: studies of etiology and medical therapy.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on blood and spleen natural killer (NK) cell activity in the mouse.

Integration of the human lymphocyte into immunotoxicological investigations.

Cancer risk among Danish and Italian farmers.

Toxicity of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats after single oral administration.

Tardyferon therapy in hyposiderosis of infancy and childhood.

Influence of ethanol on survival of acinar cells isolated from rat pancreas.

[Experimental congenital diaphragmatic hernia with pulmonary hypoplasia in a rat model].

Reconciling old and new findings on dioxin.

The heat shock response: potential to screen teratogens.

Amyloid enhancing factor activity is associated with ubiquitin.

Microbial transformation of deoxynivalenol (vomitoxin).

Environmental monitoring in Lithuania. Environmental distress signals: gastrointestinal epithelial barrier after exposure to chemical agents.

Surgical and pharmacological dissociation of cardiovascular and emetic responses to intragastric CuSO₄.

Mammalian thymidine kinase 2. Direct photoaffinity labeling with [32P]dTTP of the enzyme from spleen, liver, heart and brain.

[Detection of an inhibition of benzo(a)pyrene and sodium azide induced mutagenesis by extracts from human feces].

Influence of metabolic inhibitors on the degradation of tight junctions in HT29 cells.

Distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in splenic tissue of C57BL/6J mice.

Purification and localization of brain-type creatine kinase in sodium chloride transporting epithelia of the spiny dogfish, *Squalus acanthias*.

NTP Toxicology and Carcinogenesis Studies of Monochloroacetic Acid (CAS No. 79-11-8) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Tissue distribution of monochloroacetic acid and its binding to albumin in rats.

Cellular sequence of tracheal repair in sheep after smoke inhalation injury.

Analysis of DNA strand breaks induced in rodent liver *in vivo*, hepatocytes in primary culture, and a human cell line by chlorinated acetic acids and chlorinated acetaldehydes.

[Production of monoclonal antibody against diquat and its application for forensic medicine].

Marijuana and tobacco smoke gas-phase cytotoxins.

Toxicology and carcinogenesis studies of two grades of pentachlorophenol in B6C3F1 mice.

Developmental toxicity of bromoxynil in mice and rats.

Human health effects: what the data indicate.

Oral and pulmonary toxicology of the surfactant used in roundup herbicide.

Use and mechanism of action of AS101 in protecting bone marrow colony forming units-granulocyte-macrophage following purging with ASTA-Z 7557.

Increase in metallothionein produced by chemicals that induce oxidative stress.

Metabolism of glyphosate in Sprague-Dawley rats: tissue distribution, identification, and quantitation of glyphosate-derived materials following a single oral dose.

Gastrointestinal absorption of paraquat in the isolated mucosa of the rat.

Effect of pentachlorophenol on the activation of 2,6-dinitrotoluene to genotoxic urinary metabolites in CD-1 mice: a comparison of GI enzyme activities and urine mutagenicity.

Pyostomatitis vegetans: oral manifestation of ulcerative colitis.

Effect of herbimycin A on growth and pp60c-src activity in human colon tumor cell lines.

Aromatic hydrocarbon responsiveness-receptor agonists generated from indole-3-carbinol in vitro and in vivo: comparisons with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Specific adhesion of carcinoembryonic antigen-bearing colorectal cancer cells to immobilized carcinoembryonic antigen.

Detection and characterization of the Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in the human colon adenocarcinoma cell line LS180.

Tolerability of iron: a comparison of bis-glycino iron II and ferrous sulfate.

Influence of anoxia, reoxygenation, and uncoupling on survival, respiration, and trypsin-inhibiting capacity of isolated pancreatic acinar cells.

Use of whole bowel irrigation in an infant following iron overdose.

[Reports on medico-legal data from the massive-investigation performed by the Medico-Legal Society of Japan--a statistical study of death by poisoning. Investigation Committee of the Medico-Legal Society of Japan].

[Intestinal obstruction caused by non-absorbable tablets and Budd-Chiari syndrome in a patient with Crohn's disease].

Ninety-day toxicity study of sodium monochloroacetate in Sprague-Dawley rats.

Pharmacokinetics of quinolones: newer aspects.

Dioxin contamination and growth and development in great blue heron embryos.

Transfusion of type-A and type-B blood to cats.

Cancer mortality in workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Influence of extracellular pH on the accumulation and cytotoxicity of N-(4-methylphenylsulfonyl)-N'-(4-chlorophenyl)urea in human cell lines.

Mass poisoning by sodium arsenite.

The tissue distribution of 2,3,7,8-chlorine substituted dibenzo-p-dioxins in humans who died of cancer.

Chronic inhalation toxicity and carcinogenicity study of methyl bromide in Wistar rats.

[Massive hemoptysis ten days after bronchial extraction of an accidentally inhaled tablet of ferrous sulfate].

Influence of aprotinin and promazine on survival of isolated pancreatic acinar cells.

Investigation on the dosage/efficacy relationship of iron dextran in veal calves.

Response of the antral mucosa of the rat stomach to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

NTP technical report on the toxicity studies of Cresols (CAS Nos. 95-48-7, 108-39-4, 106-44-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Evidence for regulatory control of iron uptake from ferric maltol across the small intestine of the rat.

Primary cultures of tracheal epithelial cells for the evaluation of respiratory toxicity.

Cell-type-specific recognition of allogeneic cells by alloreactive cytotoxic T cells: a consequence of peptide-dependent allorecognition.

Ten- and ninety-day toxicity studies of 1,2-dichlorobenzene administered by oral gavage to Sprague-Dawley rats.

Effect of iron succinyl-protein complexes on gastrointestinal motility in the fasting dog.

Differentiation by hydroquinone of relaxations induced by exogenous and endogenous nitrates in non-vascular smooth muscle: role of superoxide anions.

Mitochondrial 3- β -hydroxyacyl-CoA isomerase. Purification, cloning, expression, and mitochondrial import of the key enzyme of unsaturated fatty acid beta-oxidation.

Formation of DNA adducts in F-344 rats after oral administration or inhalation of [14 C]methyl bromide.

Evidence for arsenic as the immunosuppressive component of gallium arsenide.

Effects of chlordane on parameters of liver and muscle toxicity in man and experimental animals.

Halogenated aryl hydrocarbon-induced suppression of the in vitro plaque-forming cell response to sheep red blood cells is not dependent on the Ah receptor.

Monoclonal anti-VH141 antibodies that specifically recognize the heavy chain variable region of, and are closely related to, MOPC141 myeloma protein whose VH gene belongs to VHQ52 family.

IgG response is impaired in H2-c-fos transgenic mice.

Association between exposure to a stenching agent in a herbicide packing plant and the occurrence of headache and lethargy.

Lichen planus-like eruption with esophageal involvement as a result of cyanamide.

[Exposure to agricultural chemicals and oncogenic risk].

Paraquat poisoning. An overview of the current status.

Toxicokinetics of monochloroacetic acid: a whole-body autoradiography study.

[The effect of chronic butyphos poisoning on protein and nucleic acid synthesis in various rat organs and activity of blood cholinesterase].

Acrolein depletes the neuropeptides CGRP and substance P in sensory nerves in rat respiratory tract.

Paraquat pharmacokinetics using a subcutaneous toxic low dose in the rat.

An unusual case of fatal accidental paraquat poisoning.

[Distribution and elimination of C-14-2,4-dichlorophenoxyacetic acid (2,4 D) in rat tissues in acute poisoning].

Inhibition of lung damage caused by paraquat with lymphokines or cytokines.

Determination of diquat in biological materials by electron spin resonance spectroscopy.

[Biochemical changes in the brain tissue of white rats exposed to the herbicide acetochlor under acute and subacute oral experimental conditions].

Possible role of acetaldehyde in ethanol-related rectal cocarcinogenesis in the rat.

Alterations of arachidonate metabolism in cardiovascular system by cigarette smoking.

Mechanisms of in vitro immunosuppression by hepatocyte-generated cyclophosphamide metabolites and 4-hydroperoxycyclophosphamide.

Intestinal absorption of cationic and anionic ferric colloids and complexes: biochemical, histochemical and morphological observations in rats.

Hypergastrinemia is associated with decreased gastric acid secretion in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

[Experimental study of combined effects of benzo(a)pyrene and ortho-cresol on the body].

Hydrogen peroxide-induced alterations in prostaglandin secretion in the rat colon in vitro.

Towards a more effective management of pregnancy related anaemias in Africa.

Human body burden of polychlorinated dibenzofurans associated with toxicity based on the yusho and yucheng incidents.

End-tidal CO₂, CO₂ production, and O₂ consumption as early indicators of approaching hyperthermia.

Regulation of polyamine biosynthesis by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Two modes of idiotypic stimulation of T lymphocytes from patients with Chagas' disease: correlations with clinical forms of infection.

[Excretion of phenol and p-cresol in the urine in fasting obese individuals and in persons treated with total enteral nutrition].

Neutral and acidic human tracheobronchial mucin. Isolation and characterization of core protein.

Differential toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C57BL/6J mice congenic at the Ah Locus.

[Evolution of autotransfusion: effect of a diet with and without the ingestion of iron].

Pulmonary diffusing capacities for nitric oxide and carbon monoxide determined by rebreathing in dogs.

Influence of dissolution rate and pH of oral medications on drug-induced esophageal injury.

Gastric delivery system for iron supplementation.

Isoproterenol-induced maximal heart rate in normothermic and hyperthermic horses.

Decreased survival rate of pancreatic acinar cells isolated from rats with acute pancreatitis.

Immunogenicity of collagenous implants.

Studies on the cellular pharmacology of N-(4-methylphenylsulfonyl)-N'-(4-chlorophenyl)-urea.

Role of the Ah locus in suppression of cytotoxic T lymphocyte activity by halogenated aromatic hydrocarbons (PCBs and TCDD): structure-activity relationships and effects in C57Bl/6 mice congenic at the Ah locus.

Studies on specific serological antigens in metacercariae and juveniles of *Paragonimus westermani* and its monoclonal antibodies.

[Acute myelomonocytic leukemia with mastocytosis in bone marrow].

Relative toxicity and tumor-promoting ability of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), 2,3,4,7,8-pentachlorodibenzofuran (PCDF), and 1,2,3,4,7,8-hexachlorodibenzofuran (HCDF) in hairless mice.

Evidence for mitochondrial localization of N-(4-methylphenylsulfonyl)-N'-(4-chlorophenyl)urea in human colon adenocarcinoma cells.

Airway opioid receptors mediate inhibition of cough and reflex bronchoconstriction in guinea pigs.

Neurogenic inflammation, vascular permeability, and mast cells. Capsaicin desensitization fails to influence IgE-anti-DNP induced vascular permeability in rat airways.

Changes in the composition and metabolism of arterial collagens during the development of pulmonary hypertension in rabbits.

Structural determinants of phenoxazine type compounds required to modulate the accumulation of vinblastine and vincristine in multidrug-resistant cell lines.

Death following accidental sodium azide ingestion.

Hypoxia and deposition of iron in liver and spleen of mice given iron supplement.

Mortality and morbidity among Army Chemical Corps Vietnam veterans: a preliminary report.

Epidemiologic studies of cancer in agricultural workers.

Role of hypergastrinemia in the antiatropy effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on oxyntic gland mucosa of the rat stomach.

Comparison of anti-anaemic effects of iron protein succinylate (ITF 282) and ferrous sulfate in the rat.

Absorption, distribution, excretion and metabolism of a single oral dose of [¹⁴C]tri-o-cresyl phosphate (TOCP) in the male rat.

Cloning of the H,K-ATPase beta subunit. Tissue-specific expression, chromosomal assignment, and relationship to Na,K-ATPase beta subunits.

Hepatic aryl hydrocarbon hydroxylase and cytochrome P450 induction following the transpulmonary absorption of TCDD from intratracheally instilled particles.

Prothymocyte activity is reduced by perinatal 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

Drug-induced esophageal injury. Histopathological study in a rabbit model.

Guanylate cyclase in olfactory cilia from rat and pig.

2-Nitrofluorene metabolism in the rat lung. Pharmacokinetic and metabolic effects of beta-naphthoflavone treatment.

Flow cytometric analysis of lymphocyte subpopulations in the spleen and thymus of mice exposed to an acute immunosuppressive dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Oxygen uptake and mean blood pressure as indicators of induced hyperthermia.

End-tidal carbon dioxide concentration, carbon dioxide production, heart rate, and blood pressure as indicators of induced hyperthermia.

Glutathione enhancement in various mouse organs and protection by glutathione isopropyl ester against liver injury.

Generation and characterization of peptide-specific, MHC-restricted cytotoxic T lymphocyte (CTL) and helper T cell lines from unprimed T cells under microculture conditions.

Sequence analysis, tissue distribution and regulation by cell depolarization, and second messengers of bovine secretogranin II (chromogranin C) mRNA.

Influence of antibiotics on intestinal tract survival and translocation of environmental *Pseudomonas* species.

Acetobacter cellulose pellicle as a temporary skin substitute.

2,3,7,8-Tetrachlorodibenzo-p-dioxin pretreatment of female mice altered tissue distribution but not hepatic metabolism of a subsequent dose.

NTP Toxicology and Carcinogenesis Studies of Iodinated Glycerol (Organidin(R)) (CAS No. 5634-39-9) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Impairment of prothymocyte activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Respiratory tract epithelium in primary culture: Effects of ciliotoxic compounds.

Differences in time course of hepatocyte and pancreocyte damage after incubation with trypsin, chymotrypsin and 2,4-dinitrophenol.

Disposition, elimination, and metabolism of tri-o-cresyl phosphate following daily oral administration in Fischer 344 male rats.

Acute health effects of community exposure to cotton defoliants.

Quantitative evaluation of chlortoluran-induced splenic hemosiderosis by means of an image analyzer.

[Pathomorphologic and hematologic studies of the immunotoxicity of the phenoxyalkane acid mecoprop in rats].

Effect of acute propanil exposure on the immune response of C57Bl/6 mice.

Rat urinary bladder epithelial lesions induced by acrolein.

Effects of paternal subacute exposure to Tordon 202c on fetal growth and development in CD-1 mice.

Determination of paraquat in raw and formalin-fixed tissues by electron spin resonance (ESR) spectroscopy.

Cyanamide and its calcium form: do they differ with respect to their action on the liver cell? Experimental study in the rat.

[The reaction of the endocrine cells of the gastrointestinal tract in response to exposure to 3,6-dichloropicolinic acid].

Detection of free radicals as a consequence of dog tracheal epithelial cellular xenobiotic metabolism.

The adrenocorticotrophic hormone (ACTH)-induced reversal of hemorrhagic shock.

[Noncirrhotic liver fibrosis after chronic arsenic poisoning].

Evaluation of the carcinogenic potential of pesticides. 1. Acifluorfen.

Mechanism of transport and intracellular binding of porfiromycin in HCT 116 human colon carcinoma cells.

Cottonseed meal (gossypol) toxicosis in a swine herd.

Regional hemodynamic responses to hypoxia and hypermetabolism in polycythemic dogs.

Subunit structure of the erythropoietin receptor.

2,3,7,8-Tetrachlorodibenzo-p-dioxin enhancement of N-methyl-N'-nitro-N-nitrosoguanidine-induced transformation of rat tracheal epithelial cells in culture.

Effects of trypsin, chymotrypsin, and uncoupling on survival of isolated acinar cells from rat pancreas.

[Histologic evaluation of gastric tolerability in rats of ferritin compared with ferrous sulfate].

Mast cell chymase. A potent secretagogue for airway gland serous cells.

In vivo susceptibility of *Campylobacter pylori*.

Immunotoxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in a complex environmental mixture from the Love Canal.

Hematotoxic effects in the rat of a toluene dinitro derivative after short-term exposure.

Update of mortality among chemical workers with potential exposure to the higher chlorinated dioxins.

Development and validation of a cellular transplant model for leukemia in Fischer rats: a short-term assay for potential anti-leukemic chemicals.

The effect of iron therapy on malarial infection in Papua New Guinean schoolchildren.

The role of mucus sol phase in clearance by simulated cough.

A pharmacological approach to cellular mechanisms of PGI₂-induced gastric cytoprotection on ethanol-induced gastric mucosal damage in rats.

Differential [³²P]-labeling of chemically induced stress proteins in S-phase mouse lymphoma cells.

Presence of multiple species of polypeptides immunologically related to transcription factor TFIIIA in adult *Xenopus* tissues.

Homology between the cDNAs encoding phosphoprotein p19 and SCG10 reveals a novel mammalian gene family preferentially expressed in developing brain.

Stimulation of in vivo hepatic uptake and in vitro hepatic binding of [¹²⁵I]2-Iodo-3,7,8-trichlorodibenzo-p-dioxin by the administration of agonist for the Ah receptor.

Comparative studies on the primary structure of human cystatin as from epidermis, liver, spleen, and leukocytes.

Ouabain-sensitive H⁺-K⁺ exchange mechanism in the apical membrane of guinea pig colon.

Management of acute iron overdose.

NTP Toxicology and Carcinogenesis Studies of Two Pentachlorophenol Technical-Grade Mixtures (CAS No. 87-86-5) in B6C3F1 Mice (Feed Studies).

[Enhanced inhibition of splenic lymphocyte proliferation by 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57B1/10 (Ah+Ah+) mice compared to DBA/2 (AhAh) mice].

Effect of splenectomy on heparin treatment in allyl-alcohol-traumatized rat liver.

Characteristics of the gastrointestinal absorption of morphine in rats.

Anti-ulcer activity of procyanidins preparation of water-soluble procyanidin-cimetidine complexes.

Health and reproductive outcomes among American Legionnaires in relation to combat and herbicide exposure in Vietnam.

[The influence of long-term utilization of some herbicides on oral cavity tissues of white rats].

Paraquat poisoning: biological presentation.

DNA damage in stomach, kidney, liver and lung of rats treated with atrazine.

Toxicokinetics and bioavailability of paraquat in rats following different routes of administration.

Hormonal induction and antihormonal inhibition of tracheary element differentiation in *Zinnia* cell cultures.

Effect of aerosol challenge with sensitising antigen on the permeability of the surface of the rat trachea in life.

Isolation and sequence analysis of amyloid protein AA from a patient with cystic fibrosis.

The acute toxicity of 2,3,4,7,8-pentachlorodibenzofuran (4PeCDF) in the male Fischer rat.

Induction of antigen-specific IgA-forming cells in the middle ear mucosa.

Developmental toxicity evaluation of Bendectin in CD rats.

An immunotoxicological evaluation of 4,4'-thiobis-(6-t-butyl-m-cresol) in female B6C3F1 mice. 2. Humoral and cell-mediated immunity, macrophage function, and host resistance.

An immunotoxicological evaluation of 4,4'-thiobis-(6-t-butyl-m-cresol) in female B6C3F1 mice. 1. Body and organ weights, hematology, serum chemistries, bone marrow cellularity, and hepatic microsomal parameters.

[Diabetogenic tropical pancreatitis].

Toxicity and disposition of 2,3,4,7,8-pentachlorodibenzofuran (4PeCDF) in the rhesus monkey (*Macaca mulatta*).

Effect of oral iron therapy on the upper gastrointestinal tract. A prospective evaluation.

Body iron stores in patients subjected to surgery of the large bowel.

Mortality among California highway workers.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxicity in yellow perch (*Perca flavescens*).

Morphologic lesions and acute toxicity in rainbow trout (*Salmo gairdneri*) treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Oral and dermal toxicity of MSMA to New Zealand white rabbits, *Oryctolagus cuniculus*.

In vitro (organ culture) studies of the toxicity of specific A-gliadin peptides in celiac disease.

Forestomach carcinogens: pathology and relevance to man.

NTP Toxicology and Carcinogenesis Studies of C.I. Acid Orange 3 (CAS No. 6373-74-6) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

K-cell-mediated cytotoxicity induced with rat monoclonal antibodies. I. Antibodies of various isotypes differ in their ability to induce cytotoxicity mediated by rat and human effectors.

Protective murine monoclonal antibodies to tetanus toxin.

Ifosfamide and mesna: marginally active in patients with advanced carcinoma of the pancreas.

Down-modulation of high-affinity receptors for erythropoietin on murine erythroblasts by interleukin 3.

New aspects in the study of the mechanism of intestinal absorption of thiamine in rats.

Transfer of functional immunoglobulin G (IgG) antibody into the gastrointestinal tract accounts for IgG clearance in calves.

Immunological characterization of thioltransferase from pig liver.

Partial characterization of specific cantharidin binding sites in mouse tissues.

Nuclear aberrations and micronuclei induction in the digestive tract of mice treated with different iron salts.

Lymphocyte activation and capping of hormone receptors.

Induction of cytotoxic T lymphocytes by primary in vitro stimulation with peptides.

Suppression of splenic lymphocyte function by 7,12-dimethylbenz[a]anthracene (DMBA) in vitro.

A phospholipase A2 in the supernatant fraction of rat spleen. Its similarity to rat pancreatic phospholipase A2.

Elevation of acetylpolyamine levels in mouse tissues, serum and urine after treatment with radical-producing drugs and lipopolysaccharide.

Localization of high benzaldehyde dehydrogenase activity in rat upper gastrointestinal tract mucosa: a quantitative histochemical study.

Immunohistochemical evidence for neural mediation of VIP activity in the dogfish rectal gland.

Antigenic contraction of guinea pig tracheal preparations passively sensitized with monoclonal IgE: pharmacological modulation.

The pathologic and immunologic effects of inhaled acrolein in rats.

Effect of paraquat on the oral mucosa.

Chronic carcinogenesis studies of acrolein and related compounds.

Lung fibrosis induced by diquat after intratracheal administration.

Paraquat (gramoxone) poisoning in south-west Hungary, 1977-1984. Toxicological and histopathological aspects of group intoxication cases.

Cohort mortality study of chemical workers with potential exposure to the higher chlorinated dioxins.

[Gastrectomy in a rare caustic injury].

Effects of pentachlorophenol on the in vitro and in vivo antibody response.

Treatment of paraquat poisoning in man: methods to prevent absorption.

Analysis of pentachlorophenol in water and urine by enrichment with Lipidex 5000.

Nucleic acid content and residue determination in tissues of chicks born from 2,4-dichlorophenoxyacetic butyl ester treated eggs.

Immunosuppression following exposure to 7,12-dimethylbenz[a]anthracene (DMBA) in Ah-responsive and Ah-nonresponsive mice.

Effect of excess iron in milk replacer on calf performance.

Mortality among flavour and fragrance chemical plant workers in the United States.

Adolescent colorectal cancer and dioxin exposure.

ATP requirement for induced tight junction formation in HT 29 adenocarcinoma cells.

Pulmonary interstitial fibrosis induced in hapten-immune hamsters.

Colony size, cell density and nature of the tumor promoter are critical variables in expression of a transformed phenotype (focus formation) in co-cultures of UV-TDTx and C3H10T1/2 cells.

[Hemorrhaging esophageal varices treated by Mansel solution instead of the Sengstaken-Blakemore tube].

Apparent effect of catalase on airway edema in guinea pigs. Role of endotoxin contamination.

Clinical reports on plasma exchange in the Kidney Center, Tokai University School of Medicine.

Emergency gastrotomy: treatment of choice for iron bezoar.

Han/Wistar rats are exceptionally resistant to TCDD. I.

The role of mucus viscoelasticity in cough clearance.

Potent effects of the monoclonal antibody-mitomycin C conjugate on human colon cancers.

[Dynamic aspects of mineral metabolism in dry cows, puerperants and calves].

Antineoplastic activity of azacarbazoles. II. Effect of alpha-carboline and its derivatives on transplantable animal neoplasms.

Development of resistance and characteristics of a human colon carcinoma subline resistant to mitoxantrone in vitro.

Metabolism and excretion of gallium arsenide and arsenic oxides by hamsters following intratracheal instillation.

Role of fibronectin on the clearance and tissue uptake of antigen and immune complexes in rats.

[Emotional behavior disorders in rats during the formation of a generator of pathologically enhanced excitation in the basomedial nuclei of the amygdaloid complex].

Purification and characterization of rabbit ocular mucin.

Histopathology of acute toxic responses in selected tissues from rats exposed by inhalation to methyl bromide.

Induction of sister-chromatid exchanges by pesticides in primary rat tracheal epithelial cells and Chinese hamster ovary cells.

alpha-Naphthoflavone antagonism of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced murine lymphocyte ethoxyresorufin-O-deethylase activity and immunosuppression.

The purification and characterization of glutathione S-transferase from the hepatopancreas of the blue crab, *Callinectes sapidus*.

Isolation and complete amino acid sequence of human thymopoietin and splenin.

Ultrastructural changes in the respiratory tract of rats following methyl isocyanate inhalation.

Studies on the mechanism of action of diallyl sulfide, an inhibitor of the genotoxic effects of cyclophosphamide.

The synergistic effects of concurrent administration to rats of EDTA and sodium salicylate on the rectal absorption of sodium cefoxitin and the effects of inhibitors.

Circadian alterations in prolactin, corticosterone, and thyroid hormone levels and down-regulation of prolactin receptor activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Solubility, retention, and metabolism of intratracheally and orally administered inorganic arsenic compounds in the hamster.

Combinations of mesna with cyclophosphamide or adriamycin in the treatment of mice with tumors.

Phosphorylation of human fibrinogen in vitro with protein kinase C: characterization of the phosphorylated sites.

Health effects of phenoxy herbicides. A review.

Management of acute childhood poisonings caused by selected insecticides and herbicides.

Pseudomembranous colitis in a patient of paraquat intoxication.

The effect of prenatal exposure to the n-butylester of 2,4-dichlorophenoxyacetic acid (2,4-D) on the immune response in mice.

The toxic effect of diquat on the rat lung after intratracheal administration.

Bacterial infection and acute lung injury in hamsters.

Toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in cold-adapted rats.

Modified selective medium for isolation of *Campylobacter* spp. from feces: comparison with Preston medium, a blood-free medium, and a filtration system.

Effects of BHA and related phenols on the forestomach of rats.

Hematotoxic effects of 3,5-dinitro-4-chloro-alpha,alpha,alpha-trifluorotoluene, a water contaminant.

Methyl isocyanate subchronic vapor inhalation studies with Fischer 344 rats.

Teratologic evaluation of hexabrominated naphthalenes in C57BL/6N mice.

Synthesis, biologic and toxic effects of the major 2,3,7,8-tetrachlorodibenzo-p-dioxin metabolites in the rat.

Regression of methyl bromide-induced forestomach lesions in the rat.

Lanthanum penetration of the trachea after the immediate response of sensitized rats to aerosol antigen.

In vitro determination of intestinal amino acid (14C-L-glycine) absorption during cholera.

Immunosuppression without liver induction by subchronic exposure to 2,7-dichlorodibenzo-p-dioxin in adult female B6C3F1 mice.

A monoclonal antibody preventing binding of tissue-type plasminogen activator to fibrin: useful to monitor fibrinogen breakdown during t-PA infusion.

S-antigen-specific rat T cell lines recognize peptide fragments of S-antigen and mediate experimental autoimmune uveoretinitis and pinealitis.

Identification of ferrous sulfate toxicity in a commercial broiler flock.

Desensitization of contact allergy to DNFB in mice. III. Characteristics of immediate desensitization induced by haptenated spleen cells.

Carbonyl iron therapy for iron deficiency anemia.

The effect of sodium tetraborate and alum in the management of acute childhood diarrhoea.

Interaction of monoclonal antibodies with the IgE-receptor on rat mast cells and rat basophilic leukemia (RBL) cells.

Relationship of the wasting syndrome to lethality in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Lung neoplasms in rodents after chronic administration of dimethyl hydrogen phosphite.

Preservation of mucus in situ in rat colon.

Stimulation of cytotoxic T-lymphocyte responses by rabies virus glycoprotein and identification of an immunodominant domain.

2,3,7,8-Tetrachlorodibenzo-p-dioxin metabolism and disposition in yellow perch.

Metabolism and disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rainbow trout.

Intestinal surface acid microclimate in vitro and in vivo in the rat.

A modified method of fine-granular cationic iron colloid preparation: its use in light and electron microscopic detection of anionic sites in the rat kidney glomerulus and certain other tissues.

The increase of body iron stores estimated by the increase of serum ferritin concentration during ferrous sulphate treatment after gastrointestinal surgery.

Studies on the metabolism of the neurotoxic tri-o-cresyl phosphate. Distribution, excretion, and metabolism in male cats after a single, dermal application.

Relevance of gas and particulate phases of tobacco smoke for lung cancer formation: an experimental study in Syrian golden hamsters.

A carrier method for the assessment of the effectiveness of disinfectants against *Mycobacterium tuberculosis*.

Species comparison of drug absorption from the lung after aerosol inhalation or intratracheal injection.

Assessment of pentachlorophenol toxicity in newborn calves: clinicopathology and tissue residues.

Humoral immunotoxicity of polychlorinated diphenyl ethers, phenoxyphenols, dioxins and furans present as contaminants of technical grade pentachlorophenol.

Experimental cytotoxic cystitis and prevention by acetylcysteine.

Herbicides and colon cancer.

Sequential bilateral lung transplantation for paraquat poisoning. A case report. The Toronto Lung Transplant group.

Hemoperfusion-hemodialysis ineffective for paraquat removal in life-threatening poisoning?

Therapy of digoxin intoxication in dogs by specific hemoperfusion through agarose polyacrolein microsphere beads-antidigoxin antibodies.

The role of neutrophils in the development of cadmium chloride-induced emphysema in lathyrogen-fed hamsters.

Protective effects of trifluralin on benzo(a)pyrene-induced tumors in A/J mice.

Application of rapid freezing followed by freeze-substitution acrolein fixation for cytochemical studies of the rat stomach.

Evaluation of immune function in mice exposed to Ordram.

The primary structure of human tissue amyloid P component from a patient with primary idiopathic amyloidosis.

Gastric damage from ingested acid in children.

Polychlorinated dibenzofurans (PCDFs): correlation between in vivo and in vitro structure-activity relationships.

[Blood chemiluminescence in the diagnosis of acute inflammatory diseases of the abdominal organs].

The mortality of boot and shoe makers, with special reference to cancer.

[Isolated exocrine pancreas cells--a model for the study of the pathogenesis of experimental acute pancreatitis].

Suppressive effect of secondary *Toxoplasma gondii* infection on antibody responses in mice.

Effect of thyroidectomy and thyroxine on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immunotoxicity.

Lack of adverse side effects of oral ferrous sulfate therapy in 1-year-old infants.

Whole bowel irrigation for toxic ingestions.

Respiratory functional changes on intratracheal challenge of sensitized rats.

[Determination of free serum phenol by gas-liquid chromatography in hemosorption].

Evaluation of chemicals used for drinking water disinfection for production of chromosomal damage and sperm-head abnormalities in mice.

Further studies on the activation of glucocerebrosidase by a heat-stable factor from Gaucher spleen.

NTP Toxicology and Carcinogenesis Studies of Dimethyl Hydrogen Phosphite (CAS No. 868-85-9) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

NTP Toxicology and Carcinogenesis Studies of 1,2-Dichlorobenzene (o-Dichlorobenzene) (CAS No. 95-50-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Influence of high dietary iron as ferrous carbonate and ferrous sulfate on iron metabolism in young calves.

Calcium secretion in canine tracheal mucosa.

Effect of dinitrophenol and anoxia on isometric tension in rabbit colon smooth muscle.

Effects of dinitrophenol on phosphorylase a activity, adenine nucleotide levels and tension in rabbit colon smooth muscle.

Selective depression of thymus-independent anti-DNP antibody responses induced by adult but not neonatal splenectomy.

[Secretin and pancreatic secretion in iron absorption].

Characterization of Ca²⁺ transport and enzyme activity in microsomes isolated from guinea-pig stomach smooth muscle.

Marijuana. Health and treatment issues.

Human health effects of 2,4,5-T and its toxic contaminants.

The acute effects of single and repeated injections of acrolein and other aldehydes.

Acute diquat intoxication. Interest of its repeated determination in urine and the evaluation of renal proximal tubule integrity.

Antibody-dependent cytotoxicity of human and mouse mononuclear cells against *Trypanosoma cruzi* epimastigotes.

Organ and cellular distribution of inhaled metallic mercury in the rat and Marmoset monkey (*Callithrix jacchus*): influence of ethyl alcohol pretreatment.

Metabolism and excretion of orally administered dimethylarsinic acid in the hamster.

Possible role for a human adenovirus in the pathogenesis of celiac disease.

[Medical topics: chlorophenol and cancer/spiral bacteria in stomach].

Immunosuppression in weanling and adult Sprague-Dawley rats induced by acute exposure to 3,3',4,4'-tetrachloroazoxybenzene.

Studies of stools from pseudomembranous colitis, rotaviral, and other diarrheal syndromes by frequency-pulsed electron capture gas-liquid chromatography.

A monoclonal antibody to hemoglobin F.

The pharmacological profile of the thromboxane A₂ antagonist BM 13.177. A new anti-platelet and anti-thrombotic drug.

Effect of lactoferrin on the growth of a human colon adenocarcinoma cell line--comparison with transferrin.

Monoclonal antibody to murine gamma interferon inhibits lymphokine-induced antiviral and macrophage tumoricidal activities.

Methylbromide: carcinogenic effects in the rat forestomach.

Mortality of workers potentially exposed to organic and inorganic brominated chemicals, DBCP, TRIS, PBB, and DDT.

Cytofluorescence localization of adriamycin in resistant colon cancer cells.

On the absorption of divalent and trivalent iron in living rats.

Iron pharmacokinetics after administration of ferric-hydroxide-polymaltose complex in rats.

Toxicologic, pathologic, and immunotoxic effects of 2,4-dichlorophenol in rats.

Combined measurement and significance of lipid-bound sialic acid and carcinoembryonic antigen in detection of human cancer.

Biochemical activity of intestinal microflora in adult coeliac disease.

Cathepsins J and K: high molecular weight cysteine proteinases from human tissues.

Short-chain fatty acid fermentation products of plant fiber affect glucose metabolism of isolated rat hepatocytes.

A Mg²⁺-independent high-affinity Ca²⁺-stimulated adenosine triphosphatase in the plasma membrane of rat stomach smooth muscle. Subcellular distribution and inhibition by Mg²⁺.

Use of bacteria and yeasts to identify T lymphocytes in peripheral blood and lymphoid tissues of healthy guinea pigs and guinea pigs fed aflatoxin.

Respiratory tract lesions induced by sensory irritants at the RD50 concentration.

[Determination of the ecological niche of Bacteroides in the gastrointestinal tract--a study of a model of sterile intestines in germ-free animals].

Ion transport by rabbit descending colon: mechanisms of transepithelial potassium transport.

Conservation in rat liver of light and heavy subunit sequences of mammalian ferritin. Presence of unique octopeptide in the light subunit.

Gastrointestinal absorption and metabolism of capsaicin and dihydrocapsaicin in rats.

Oxalate and chloride absorption by the rabbit colon: sensitivity to metabolic and anion transport inhibitors.

Sensitivity of cAMP-stimulated salt secretion in shark rectal gland to "loop" diuretics.

Different susceptibility of mouse tissues to porphyrinogenic effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Differential induction of two 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible forms of cytochrome P-450 in extrahepatic versus hepatic tissues.

Influence of anoxia and dinitrophenol on Ca²⁺ efflux and phosphorylase a activity in rabbit colon smooth muscle.

The in vitro metabolism by homogenates of goldfish (*Carassius auratus*) liver of pentachloro-2-(chloromethyl sulphonamido) diphenyl ether, the major component and active ingredient of the mothproofing agent Eulan WA New.

Active pyrimidine absorption by chicken colon.

Medical and morbidity surveillance findings among employees potentially exposed to TCDD.

Malathion and phenthoate carboxylesterase activities in pulmonary alveolar macrophages as indicators of lung injury.

Pentachlorophenol poisoning.

[Prognostic factors in acute paraquat poisoning. A retrospective study of cases registered by the Poison Control Center of Paris in 1981].

[Clinical findings and treatment of paraquat poisoning in childhood].

Diquat intoxication.

[Hypo-oxygenation in paraquat poisoning. Apropos of 6 cases].

[Histological picture of the internal organs of rats poisoned with 2,4-dichlorophenoxyacetic acid].

Iron overload of spleen, liver and kidney as a consequence of hemolytic anaemia.

Histochemical demonstration of enteropeptidase activity. New method with a synthetic substrate and its comparison with the trypsinogen procedure.

Epidemiological study of socioeconomic factors and clinical findings in Hodgkin's disease, and reanalysis of previous data regarding chemical exposure.

Selected cancer mortality and farm practices in Iowa.

Hypothyroxinemia and hypothermia in rats in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin administration.

Isolation and characterization of a CNBr cleavage peptide of influenza viral hemagglutinin stimulatory for mouse cytolytic T lymphocytes.

Activation of phosphorylase by anoxia and dinitrophenol in rabbit colon smooth muscle: relation to release of calcium from mitochondria.

Influence of anoxia and dinitrophenol on the phosphorylase a activity and the cyclic nucleotide content of smooth muscle.

Suppression of unprimed T and B cells in antibody responses by irradiation-resistant and plastic-adherent suppressor cells in *Toxoplasma gondii*-infected mice.

Plasma membrane-acting drugs inhibit the effect of dengue virus-induced cytotoxic factor.

Effect of vagal cooling on lung functional residual capacity in rats with pneumonia.

Levallorphan methyl iodide (SR 58002), a potent narcotic antagonist with peripheral selectivity superior to that of other quaternary compounds.

Impairment of blastogenic response of splenic lymphocytes from iron-deficient mice: in vivo repletion.

Characterization of messenger RNA specific for carcinoembryonic antigen.

[Pharmacological and clinico-pharmacological studies of a combination preparation for calves having antianemia and general tonic action].

A monoclonal antibody with ability to distinguish between NH₂-terminal fragments derived from fibrinogen and fibrin.

Nuclear magnetic resonance contrast enhancement study of the gastrointestinal tract of rats and a human volunteer using nontoxic oral iron solutions.

A technique for the isolation of submucosal gland cells from cat trachea.

Inhibitory effect of bovine serum albumin on acid deoxyribonuclease from rat small intestinal mucosa.

Death and injury caused by methyl bromide, an insecticide fumigant.

Absorption of aerosolized drugs from the rat lung.

Purification of pregnancy-specific beta 1-glycoprotein with a monoclonal antibody immunoabsorbent.

Metabolism of mercapturic acid-pathway metabolites of 2-chloro-N-isopropylacetanilide (propachlor) by gastrointestinal bacteria.

Isophosphoramidate mustard, a metabolite of ifosfamide with activity against murine tumours comparable to cyclophosphamide.

Toxicity of 3,3',4,4'- and 2,2',5,5'-tetrabromobiphenyl: correlation of activity with aryl hydrocarbon hydroxylase induction and lack of protection by antioxidants.

Characterization of pulmonary cellular influx differentials to known toxic agents between species.

[Paraquat poisoning. Prognostic and therapeutic evaluation in 28 cases].

Prognosis and treatment of paraquat poisoning: a review of 28 cases.

Immunotoxicity of technical pentachlorophenol (PCP-T): depressed humoral immune responses to T-dependent and T-independent antigen stimulation in PCP-T exposed mice.

Pentachlorophenol pancreatitis.

Efficacy of charcoal hemoperfusion in paraquat poisoning.

[Massive poisoning by paraquat with early death (19 hours). Apropos of a case with ultrastructure study].

Young Scientists Award lecture 1981: The identification of an accumulation system for diamines and polyamines into the lung and its relevance to paraquat toxicity.

Urinary enzymes, nephrotoxicity and renal disease.

Influence of diuretics on urinary general base catalytic activity and cyclophosphamide-induced bladder toxicity.

The accumulation of diamines and polyamines into rat lung slices.

Primary structure of the CFA1 fimbrial protein from human enterotoxigenic Escherichia coli strains.

Immunity to homologous type III collagen after partial meniscectomy and sham surgery in rabbits.

Cancer risks associated with agriculture: epidemiologic evidence.

Epidemiological study of nasal and nasopharyngeal cancer and their relation to phenoxy acid or chlorophenol exposure.

The functional and ultrastructural changes of hepatic mitochondria in acute experimental pancreatitis in dogs treated with prostacyclin.

Mortality study of persons exposed to dioxin in a trichlorophenol-process accident that occurred in the BASF AG on November 17, 1953.

Met- and leu-enkephalin immuno- and bio-reactivity in human stomach and pancreas.

The immunosuppressive effects of trichothecenes and cyclochlorotine on the antibody responses in guinea pigs.

The effects of antibiotics in the weanling pig diet on growth and the excretion of volatile phenolic and aromatic bacterial metabolites.

Inhibition of E-rosette formation and phagocytosis by human blood leucocytes after treatment with the dengue virus-induced cytotoxic factor.

Potassium transport by rabbit descending colon.

Subchronic administration of technical pentachlorophenol to lactating dairy cattle: immunotoxicologic evaluation.

Carcinogenicity of picloram.

Cardiovascular changes during the calcium carbimide-ethanol interaction.

Repeated exposure to alpha-ethylacrolein vapour: subacute toxicity study in rats.

[Use of histological methods for the demonstration of the anti-inflammatory activity of fusafungin (author's transl)].

The influence of putrefactive changes on the determination of Paraquat in autopsy materials.

Pulmonary fibrosis in experimental acute respiratory disease.

Tissue retention of arsenic in rats fed with founder or cacodylic acid.

[Pentachlorophenol concentrations in tissues and body fluids of normal persons (author's transl)].

Growth of *Bacteroides fragilis* in rabbit tracheal organ culture: anaerobiosis and tissue respiration.

Nonspecific suppression of initiation of memory cells in *Toxoplasma gondii*-infected mice.

Nonspecific suppression of primary antibody responses and presence of plastic-adherent suppressor cells in *Toxoplasma gondii*-infected mice.

Relation of soft-tissue sarcoma, malignant lymphoma and colon cancer to phenoxy acids, chlorophenols and other agents.

Production and characterization of a monoclonal antibody against the seed lectin of the *Dolichos biflorus* plant.

Isolation and characterization of subcellular membranes from canine stomach smooth muscle.

Estimation of genetic risks of alkylating agents. VI. Exposure of mice and bacteria to methyl bromide.

In vitro metabolism of inorganic arsenic by the gastro-intestinal microflora of the rat.

Hydrogen peroxide contracts airway smooth muscle: a possible endogenous mechanism.

An organ culture method for glandular stomach of new born rat.

Effects of brief and intermediate exposures to sulfate submicron aerosols and sulfate injections and cardiopulmonary function of dogs and tracheal mucous velocity of sheep.

Porphyrogenic effect of chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin in female rats. Dose-effect relationship following urinary excretion of porphyrins.

Studies on mutagenic constituents of apple brandy and various alcoholic beverages collected in western France, a high incidence area for oesophageal cancer.

Effect of glucose and hyperosmolality on the electrical characteristics of dog colon mucosa in vivo.

Effect of lactobacilli on urinary indican excretion in gnotobiotic rats and in man.

Alteration of urinary levels of the carcinogen, N-hydroxy-2-naphthylamine, and its N-glucuronide in the rat by control of urinary pH, inhibition of metabolic sulfation, and changes in biliary excretion.

Toxicity and bioaccumulation of pentachlorophenol in broiler chickens.

The chronic toxicity of technical and analytical pentachlorophenol in cattle. I. Clinicopathology.

Herbicide exposure and tumor mortality. An updated epidemiologic investigation on Swedish railroad workers.

The changing pattern of paraquat poisoning in man.

A comparison of the effects of paraquat and diquat on lung compliance, lung volumes and single breath diffusing capacity in the rat.

Normobaric oxygen toxicity of the lung.

Optimal fixation conditions for the immunoperoxidase identification of human J chain from tissue sections.

Effect of chlorophenols on porphyrin metabolism in rats and chick embryo.

Metabolic dependence of the electromyogram of the cat colon.

[Problems arising from disease during the periods of breeding and rearing canaries and other aviary birds (author's transl)].

Modification of mitochondrial respiration by aging and dietary restriction.

Corrosive gastritis as a result of ferrous sulphate ingestion.

General health effects of prolonged exposure to 3,3',4,4'-tetrachloroazobenzene and 3,3',4,4'-tetrachloroazoxybenzene in rats.

The therapeutics of peptic ulcers: clinical evaluation of C-Fe therapy.

Role of the endocrine system in the action of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the thymus.

Esophagitis caused by oral medication.

Examination of bone marrow, immunologic parameters and host susceptibility following pre- and postnatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Effect of polychlorinated biphenyl, dibenzofuran and dibenzo-p-dioxin on the susceptibility of male mice to endotoxin.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on macrophage and natural killer cell-mediated cytotoxicity in mice.

Characterization of Na-K-ATPase in dog tracheal epithelium: enzymatic and ion transport measurements.

Stimulus-secretion coupling in rat pancreas: role of sodium, calcium and cyclic nucleotides studied by X-537A and BrX-537A.

Necrotropic protective effect of Ca-Mg gluconolactate on allyl alcohol-induced liver necrosis in rats.

Fingerprint analyses of plant and animal tissues with respect to the occurrence of foreign compounds.

Effects of phenol and dinitrophenol on acid and alkaline phosphatases in tissues of a fish (*Notopterus notopterus*).

The toxicity and renal handling of paraquat in cynomolgus monkeys.

[Acute pharyngitis caused by inhalation of diquat (author's transl)].

Acute toxicity of oral diquat (1,1'-ethylene-2,2'-bipyridinium) in cynomolgus monkeys.

[A case of acute acrolein poisoning].

[Histo enzymatic reactions in the cells of the reticuloendothelial system of the liver and spleen and hepatocytes in acute Morfamquat dichloride poisoning].

Toxicity of 1,1'-alkyl-4,4'-bipyridylium salts in the rat.

[Fatal paraquat poisoning, a case report].

Tissue distribution of paraquat and diquat after oral administration in rats.

Induction in vitro of reversible immunosuppression and inhibition of B cell receptor regeneration by defined metabolites of cyclophosphamide.

Role of peripheral tissue receptors in stimulation of ventilation by 2,4-dinitrophenol.

Augmentation of antitumor cytotoxicity of MOPC-315 tumor bearer spleen cells by depletion of dinitrophenol-adherent cells prior to in vitro immunization.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on splenic lymphocyte transformation in mice after single and repeated exposures.

Laboratory studies on the immune effects of halogenated aromatics.

Long-term toxicologic studies of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in laboratory animals.

Selective and differential medium for isolation of *Clostridium difficile*.

Self-poisoning by sodium chlorate--some unusual features.

Detection of early lymphocyte activation by the fluorescent cell membrane probe N-phenyl-1-naphthylamine.

Comparison of the bronchodilator and vasodilator activity of sodium azide and sodium nitroprusside in the guinea-pig.

Fragmentation of the human transplantation antigen heavy chain by limited proteolysis, acid cleavage, and cyanogen bromide treatment.

Toxicity of 4-chloro-O-cresol to rat: I. Light microscopy and chemical observations.

The gastrointestinal absorption of paracetamol in the rat.

The effect of perinatal exposure to tetrachlorodibenzo-p-dioxin on the immune response of young mice.

Oesophageal perforation due to paraquat.

[2,4-D poisoning].

Binding to radioactivity from [¹⁴C] paraquat to rat lung protein, in vitro.

Effect of nighttime anisotropine methyl bromide of duodenal ulcer healing and pain: a double-blind controlled trial.

Methylnitrosophenylurea--a highly carcinogenic compound.

Iron absorption in patients with polycythemia vera: a comparative study using the whole-body counter and the ferrous sulfate absorption test.

Distribution of clozapine in the rat: localization in lung.

Some properties of Ca-binding microsomal subfractions isolated from rabbit colon muscle.

Short-term toxicity of allyl alcohol in rats.

Bioassay of trifluralin for possible carcinogenicity.

Bioassay of sulfallate for possible carcinogenicity (CAS No. 95-06-7).

[Effect of 2,4-dinitrophenol on transmembrane potential difference in frog tissues].

Concentration levels of 2,4-D and 2,4,5-T in forensic material.

Effects of diquat on the gastrointestinal tract of rats.

Acute and subchronic toxicity of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in male rat. I. Light microscopy and tissue concentrations of MCPA.

Acute respiratory distress in the dog associated with paraquat poisoning.

Environmental agents altering lung biochemistry.

[The toxic effects of 2,4,5-trichlorophenoxyacetic acid on the quail].

The effect of two pesticides, Miedzian 50 and Gesagard 50, on the development of tadpoles of *Rana temporaria*.

Lung pH and pulmonary absorption of nonvolatile drugs in the rat.

Suppressor cells in tolerance to contact sensitivity active against hapten-syngeneic and hapten-allogeneic determinants.

[Treatment of anemia in pregnancy].

Gap junctions. Structural changes after uncoupling procedures.

Effects of sodium nitroprusside, nitroglycerin, and sodium azide on levels of cyclic nucleotides and mechanical activity of various tissues.

Nitric oxide activates guanylate cyclase and increases guanosine 3':5'-cyclic monophosphate levels in various tissue preparations.

[Effect of antidotes on the rate of absorption of 2,4-dinitrophenol from the digestive tract into the blood].

Regulation of cardiac output during 2,4-dinitrophenol-induced tissue hypermetabolism in the dog.

Stimulation of guanylate cyclase by sodium nitroprusside, nitroglycerin and nitric oxide in various tissue preparations and comparison to the effects of sodium azide and hydroxylamine.

Strain differences in histopathologic, hematologic, and blood chemistry changes induced in mice by a technical and a purified preparation of 2,4,5-trichlorophenoxyacetic acid.

Effect of paraquat-induced lung damage on permeability of rat lung to drugs.

[Intestinal elimination of uremic metabolites by the adsorbents].

Sequential histopathologic, hematologic, and blood chemistry changes induced in mice by a technical and a purified preparation of 2,4,5-trichlorophenoxyacetic acid.

Formation of mutagenic N-nitroso compounds from the pesticides prometryne, dodine and carbaryl in the presence of nitrite at pH 1.

Liver enlargement induced by the herbicide 2,4,5-trichlorophenoxyacetic acid (2,4,5-T).

High uptake in the erythrocytes and the spleen of the quaternary dipyridylium salt paraquat injected intravenously in hypotonic solutions.

The production of urinary phenols by gut bacteria and their possible role in the causation of large bowel cancer.

Immunologic response and factors affecting its assessment.

Ulceration by oral ferrous sulfate.

Modifications and evaluation of double antibody radioimmunoassay of human carcinoembryonic antigen.

[The dynamics of changes in oxygen tension, circulatory rats, muscular and rectal temperatures in dinitrophenol hyperthermia].

[Pharmacological studies on basic ethers (R111 and R97) with antispasmodic activity].

Value of urinary simple phenol and indican determinations in the diagnosis of the stagnant loop syndrome.

Properties of Fcγ receptors in normal and malignant human tissues.

Ca²⁺ -uptake into noradrenaline-storing granules of bovine splenic nerves.

Mechanism and site of small intestinal uptake of vitamin D₃ in pharmacological concentrations.

Vitamin K₂ absorption by rat everted small intestinal sacs.

[Continuous inhalation of small amounts of formaldehyde: experimental study in the rat].

Gastrointestinal effects of acute ferrous sulfate poisoning in rats.

Lung collagen heterogeneity. Synthesis of type I and type III collagen by rabbit and human lung cells in culture.

The significance of ¹²⁵I as a tracer for lymphocytes, liver cells and erythrocytes after iodination by the lactoperoxidase-H₂O₂ technique.

Calcium-activated ATPase activity in a plasma membrane-rich preparation of rat pancreas.

Acute toxicity of lomex--a petroleum weedicide.

New low-toxicity phosphonic acid esters for use as defoliating, desiccating, and herbicidal agents.

Lung function in acute paraquat intoxication.

Short-term oral and dermal toxicity of MCPA and MCPP.

Irritancy of cyclophosphamide-derived aldehydes (acrolein, chloracetaldehyde) and their effect on lymphocyte distribution in vivo: protective effect of thiols and bisulphite ions¹).

Blockade by metal complexing agents and by catalase of the effects of arachidonic acid on platelets: relevance to the study of anti-inflammatory mechanisms.

Isolation and characterization of CNBr peptides of human (alpha 1 (III))₃ collagen and tissue distribution of (alpha 1 (I))₂ alpha 2 and (alpha 1 (III))₃ collagens.

Tritiated methylmercury in the brain of squirrel monkeys.

Ferrous and hemoglobin-⁵⁹Fe absorption from supplemented cow milk in infants with normal and depleted iron stores.

Fatal self-administration of sodium azide.

Iron poisoning in children.

A further investigation into the energy dependence of angiotensin II-induced contractions of isolated smooth muscle preparations.

Chemical studies on a monoclonal immunoglobulin from a patient with carcinoma of the colon.

Experimental studies on cholera immunization. 4. The antibody response to formalinized *Vibrio cholerae* and purified endotoxin with special reference to protective capacity.

The effect of 2, 4-dinitrophenol on the growth of *Bordetella pertussis* in chick tracheal organ culture.

Specific suppression of the antibody response in vitro by serum from paralyzed mice.

Effect of anaerobiosis, dinitrophenol and fluoride on the active intestinal transport of galactose in snail.

Mechanism and site of small intestinal absorption of alpha-tocopherol in the rat.

Effective treatment for paraquat poisoning in rats and its relevance to treatment of paraquat poisoning in man.

[Syndrome of ophthalmological manifestations caused by a generalized intoxication with defoliant and herbicides].

[Alveolitis and pulmonary fibrosis--an attempt at a synopsis].

[Massive paraquat poisoning, fatal within 24 hours. Toxicologic and anatomo-clinical data].

[Dynamics of changes in the immune structure of the lymphatic follicles of the spleen in pesticide poisoning].

Fetal uptake and embryogenetic effects of aminotriazole in mice.

[Effect of 2,4-dichlorophenoxyacetic acid on organogenesis and tracheogenesis in *Digitalis purpurea* L].

[The reaction of nitrite with pesticides. Formation, chemical properties and carcinogenic activity of the N-nitroso compound of the herbicide N-methyl-N'-(2-benzothiazolyl)-urea (benzthiazuron) (author's trans)].

Absorption of herbicides from the rat lung.

X-accumulation of labelled aminotriazole in some transplanted tumours in mice.

Movement of IgG receptors on the lymphocyte surface induced by protein A of Staphylococcus aureus.

Suppression of cellular immunity in rats and mice by maternal treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Histone and casein kinases of lactating bovine mammary gland.

Lung collagen heterogeneity.

Residual bromide in tissues of rats fed methyl bromide fumigated diets.

Table 2A-15 – Titles of Pubmed Records Related to Lung Adverse Events Following Herbicide Exposure

ASTHMA; *BREATH*; *BRONCH*; *CONGESTION*; *COPD*; *EMPHYSEMA*; * LUNG *; LUNG; *PULMONARY*; *RESPIRATORY*; *SARCOIDOSIS*; *WHEEZ* (5058)
--

Integrated analysis of ceRNA-miRNA changes in paraquat-induced pulmonary epithelial-mesenchymal transition via high-throughput sequencing.

Biological-based techniques for real-time water-quality studies: Assessment of non-invasive (swimming consistency and respiration) and toxicity (antioxidants) biomarkers of zebrafish.

Inhaled paraquat-induced lung injury in rat, improved by the extract of Zataria multiflora boiss and PPAR α agonist, pioglitazone.

Regulation of NCOA4-mediated iron recycling ameliorates paraquat-induced lung injury by inhibiting ferroptosis.

Spatiotemporal Visualization of Paraquat Distribution, Toxicokinetics, and Its Detoxification in Zebrafish Using Matrix-Assisted Laser Desorption Ionization Mass Spectrometry Imaging.

Acrolein suppresses anticancer drug-induced toxicity mediated by activating claudin-1 and Nrf2 axis in a spheroid model of human lung squamous cell carcinoma cells.

The Peptide DH β -(4-pentenyl)-ANPQIR-NH(2) Exhibits Antifibrotic Activity in Multiple Pulmonary Fibrosis Models Induced by Particulate and Soluble Chemical Fibrogenic Agents.

Analysis of abnormal expression of signaling pathways in PQ-induced acute lung injury in SD rats based on RNA-seq technology.

Ferulic acid grafted into β -cyclodextrin nanospheres ameliorates Paraquat-induced human MRC-5 fibroblast injury.

Protective Effect of Quercetin against Paraquat-induced Brain Mitochondrial Disruption in Mice.

Protective effects of natural compounds against paraquat-induced pulmonary toxicity: the role of the Nrf2/ARE signaling pathway.

Synthesis, Characterization, Antioxidant, and Anticancer Activity against Colon Cancer Cells of Some Cinnamaldehyde-Based Chalcone Derivatives.

An Updated Evaluation of Atrazine-Cancer Incidence Associations among Pesticide Applicators in the Agricultural Health Study Cohort.

Amphibian-derived peptide RL-RF10 ameliorates paraquat-induced pulmonary fibrosis injury.

A case of severe paraquat poisoning treated by continuous hemodiafiltration without sequelae.

Influence of puff topographies on e-liquid heating temperature, emission characteristics and modeled lung deposition of Puff Bar(â,,ç).

A Nomogram for Early Diagnosis of Community-Acquired Pneumonia Based on Bronchoalveolar Lavage Fluid Metabolomics.

Chemical characterization of combustion engine exhaust and assessment of helicopter deck operator occupational exposures on an offshore frigate class ship.

Chorioallantoic membrane assay revealed the role of TIPARP (2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible poly (ADP-ribose) polymerase) in lung adenocarcinoma-induced angiogenesis.

Microbial Virulence Factors, Antimicrobial Resistance Genes, Metabolites, and Synthetic Chemicals in Cabins of Commercial Aircraft.

LC-MS/MS Based Volatile Organic Compound Biomarkers Analysis for Early Detection of Lung Cancer.

Pesticide exposure and asthma morbidity in children residing in urban, multi-family housing.

Overview of Adductomics in Toxicology.

Protective effects of zingerone against sodium arsenite-induced lung toxicity: A multi-biomarker approach.

Andrographolide alleviates paraquat-induced acute lung injury by activating the Nrf2/HO-1 pathway.

Mutual promotion of mitochondrial fission and oxidative stress contributes to mitochondrial-DNA-mediated inflammation and epithelial-mesenchymal transition in paraquat-induced pulmonary fibrosis.

Andrographolide-based potential anti-inflammatory transcription inhibitors against nuclear factor NF-kappa-B p50 subunit (NF-ÎB p50): an integrated molecular and quantum mechanical approach.

Ever and cumulative occupational exposure and lung function decline in longitudinal population-based studies: a systematic review and meta-analysis.

Signaling pathways involved in paraquat-induced pulmonary toxicity: Molecular mechanisms and potential therapeutic drugs.

Perinatal exposure to glyphosate-based herbicides impairs progeny health and placental angiogenesis by disturbing mitochondrial function.

Glyphosate differentially affects the allergic immune response across generations in mice.

Cannabinoid Analogue WIN 55212-2 Protects Paraquat-Induced Lung Injury and Enhances Macrophage M2 Polarization.

YAP1 silencing attenuated lung injury/fibrosis but worsened diaphragmatic function by regulating oxidative stress and inflammation response in mice.

Study of paraquat-induced pulmonary fibrosis using biomimetic micro-lung chips.

Smoking-Associated Exposure of Human Primary Bronchial Epithelial Cells to Aldehydes: Impact on Molecular Mechanisms Controlling Mitochondrial Content and Function.

Phlebotomy-induced iron deficiency attenuates the pulmonary toxicity of paraquat in mice.

Acrolein Increases the Pulmonary Tumorigenic Activity of the Tobacco-Specific Nitrosamine 4-(Methylnitrosamino)-1-(3-pyridyl)-1-butanone (NNK).

Pathophysiological Changes in Rhesus Monkeys with Paraquat-Induced Pulmonary Fibrosis.

A dose-related positive effect of inhaled simvastatin-loaded PLGA nanoparticles on paraquat-induced pulmonary fibrosis in rats.

Whey protein protects liver mitochondrial function against oxidative stress in rats exposed to acrolein.

Agent Orange Exposure and Risk of Idiopathic Pulmonary Fibrosis among U.S. Veterans.

The toxicokinetics of acute paraquat poisoning in specific patients: a case series.

Cross-sectional and longitudinal associations of acrolein exposure with pulmonary function alteration: Assessing the potential roles of oxidative DNA damage, inflammation, and pulmonary epithelium injury in a general adult population.

Mitoquinone mitigates paraquat-induced A549 lung epithelial cell injury by promoting MFN1/MFN2-mediated mitochondrial fusion.

Ginsenoside Rg1 suppresses paraquat-induced epithelial cell senescence by enhancing autophagy in an ATG12-dependent manner.

Pentachlorophenol mediated regulation of DAMPs and inflammation: In vitro study.

Verbascoside inhibits paraquat-induced pulmonary toxicity via modulating oxidative stress, inflammation, apoptosis and DNA damage in A549 cell.

[Study on the Protective effect and mechanism of Nicotinamide Riboside on lung injury in paraquat intoxicated mice].

Time-resolved proteome and transcriptome of paraquat-induced pulmonary fibrosis.

Effects of exposure to glyphosate on oxidative stress, inflammation, and lung function in maize farmers, Northern Thailand.

Comparative study of oral versus parenteral crocin in mitigating acrolein-induced lung injury in albino rats.

Pesticides and farmers' health: an analysis of variables related to management and property.

Ginkgolide C Alleviates Acute Lung Injury Caused by Paraquat Poisoning via Regulating the Nrf2 and NF- κ B Signaling Pathways.

Vesicle transport related protein Synaptotagmin-1 mediates paraquat transport to antagonize paraquat toxicity.

Clinicohematological, Mutagenic, and Oxidative Stress Induced by Pendimethalin in Freshwater Fish Bighead Carp (*Hypophthalmichthys nobilis*).

Histopathological, Immunohistochemical, And Molecular Alterations In Brain Tissue And Submandibular Salivary Gland Of Atrazine-Induced Toxicity In Male Rats.

Aqueous *Thunbergia laurifolia* leaf extract alleviates paraquat-induced lung injury in rats by inhibiting oxidative stress and inflammation.

Human Amnion-Derived MSCs Alleviate Acute Lung Injury and Hinder Pulmonary Fibrosis Caused by Paraquat in Rats.

Protective effect of dexamethasone against paraquat-triggered toxicity in A549 cells through inhibiting inflammation, apoptosis and TGF- β 1/Smad3 pathway.

Quantification and toxicokinetics of paraquat in mouse plasma and lung tissues by internal standard surface-enhanced Raman spectroscopy.

Apiaceous vegetables protect against acrolein-induced pulmonary injuries through modulating hepatic detoxification and inflammation in C57BL/6 male mice.

Acute exposure to paraquat affects the phenotypic differentiation of substantia nigra microglia in rats.

Exploring the molecular mechanisms of the inhibition of acrolein-induced BEAS-2B cytotoxicity by luteolin using network pharmacology and cell biology technology.

5-Aminosalicylic acid attenuates paraquat-induced lung fibroblast activation and pulmonary fibrosis of rats.

Tenascin-C Participates Pulmonary Injury Induced by Paraquat Through Regulating TLR4 and TGF- β 2 Signaling Pathways.

The STING-IRF3 pathway contributes to paraquat-induced acute lung injury.

Toxicity mechanism of acrolein on DNA damage and apoptosis in BEAS-2B cells: Insights from cell biology and molecular docking analyses.

[Effects on extravascular lung water of lung protective ventilation strategy applied on piglets with acute respiratory distress syndrome induced by paraquat].

Searching for biomarkers of early detection of 2,4-D effects in a native tree species from the Brazilian Cerrado biome.

Evaluation of the efficiency of simvastatin loaded PLGA nanoparticles against acute paraquat-intoxicated rats.

Farming, pesticide exposure and respiratory health: a cross-sectional study in Thailand.

Lung transplantation in a woman with paraquat poisoning that led to pulmonary fibrosis-Widely reported by the media: A case report.

Paraquat is an agonist of STIM1 and increases intracellular calcium levels.

Lung Cancer in the French West Indies: Role of Sugarcane Work and Other Occupational Exposures.

Quantitation of DNA Adducts Resulting from Acrolein Exposure and Lipid Peroxidation in Oral Cells of Cigarette Smokers from Three Racial/Ethnic Groups with Differing Risks for Lung Cancer.

The Long-Term Respiratory Perils of War.

Arsenic exposure and respiratory outcomes during childhood in the INMA study.

Cinnamaldehyde decreases the invasion and u-PA expression of osteosarcoma by down-regulating the FAK signalling pathway.

Homicidal paraquat poisoning: Poisoned while drinking.

Acute diquat poisoning resulting in toxic encephalopathy: a report of three cases.

An Inhibitor of Nuclear Factor-Kappa B Pathway Attenuates the Release of TGF- β 1 and Inhibits the Fibrogenic Progress in a Model of Airway Remodeling Induced by Acrolein.

Wnt-induced secreted proteins-1 play an important role in paraquat-induced pulmonary fibrosis.

Acrolein inhalation acutely affects the regulation of mitochondrial metabolism in rat lung.

Successful Treatment of Severe Toxic Hepatitis and Encephalopathy Without Respiratory Failure Caused by Paraquat Intoxication.

Histopathological Findings in a Fatal Case of Paraquat Poisoning.

[A five-year follow-up report on lung imaging and exercise endurance of a patient with paraquat poisoning].

C. elegans as an in vivo model system for the phenotypic drug discovery for treating paraquat poisoning.

MyD88 deficiency ameliorates weight loss caused by intestinal oxidative injury in an autophagy-dependent mechanism.

Quaternion of paraquat poisoning: icterus, oral ulceration, acute respiratory and renal failure.

Effect of Cinnamaldehyde on *C. albicans* cell wall and (1,3)- β -D-glucans in vivo.

Asthma attacks: Patients who survived paraquat poisoning.

Factors associated with respiratory symptoms among herbicide applicators and assistant applicators in maize field.

[Effects of arsenic and its main metabolites on A549 cell apoptosis and the expression of pro-apoptotic genes Bad and Bik].

Ethalfuralin impairs implantation by aggravation of mitochondrial viability and function during early pregnancy.

A clinico-epidemiological Study of acute Self-poisoning by different Types of herbicidal Substances used in agricultural Fields: A Study from Patients admitted in a Tertiary Care Hospital in West Bengal.

A Deadly Herbicide 'Paraquat Poisoning' and Miserable Death of a 19 Years Boy.

The effects of aerobic exercise training with octopamine supplementation on cardiomyocyte apoptosis induced by deep-frying oil: The role of caspase and procaspase 3.

Firefighters' urinary concentrations of VOC metabolites after controlled-residential and training fire responses.

Single-Center Experience With Paraquat Exposure in Nine Patients.

Design, Synthesis and Antiproliferative Evaluation of Bis-Indole Derivatives with a Phenyl Linker: Focus on Autophagy.

The effect of tracheal occlusion in congenital diaphragmatic hernia in the nitrofen rat lung explant model.

Preparation and inhibitory effect of salicin dimethyl ether in Laryngeal cancer cells through the apoptosis activation.

Treatment with Amniotic Fluid Stem Cell Extracellular Vesicles Promotes Fetal Lung Branching and Cell Differentiation at Canalicular and Saccular Stages in Experimental Pulmonary Hypoplasia Secondary to Congenital Diaphragmatic Hernia.

Severe methyl bromide poisoning causing early acute renal failure and anuria: a case report.

Arsenic induces bronchial epithelial carcinogenesis with mitochondrial dysfunction through AKAP95-mediated cell cycle alterations.

Urinary polycyclic aromatic hydrocarbon, arsenic, and metal exposure and correlation with emphysema in smokers.

Barbaloin attenuates pulmonary fibrosis through TGF- β 1/Smads/p38 pathway.

Autophagy Is Impaired in Fetal Hypoplastic Lungs and Rescued by Administration of Amniotic Fluid Stem Cell Extracellular Vesicles.

Hot Air Treatment Elicits Disease Resistance against *Colletotrichum gloeosporioides* and Improves the Quality of Papaya by Metabolomic Profiling.

Ingestion poisoning related lung injury- a pictorial review.

Association between environmental toxic metals, arsenic and polycyclic aromatic hydrocarbons and chronic obstructive pulmonary disease in the US adult population.

Nano-silica particles synergistically IgE-mediated mast cell activation exacerbating allergic inflammation in mice.

Prenatal treprostinil reduces the pulmonary hypertension phenotype in the rat model of congenital diaphragmatic hernia.

Flurochloridone induces responses of free radical reactions and energy metabolism disorders to BRL-3A cell.

Neonatal rodent ventilation and clinical correlation in congenital diaphragmatic hernia.

A novel surgical toxicological-free model of diaphragmatic hernia in fetal rats.

Supercomplex supercomplexes: Raison d'etre and functional significance of supramolecular organization in oxidative phosphorylation.

N6-Acetyl-L-Lysine and p-Cresol as Key Metabolites in the Pathogenesis of COVID-19 in Obese Patients.

The Aryl Hydrocarbon Receptor Modulates T Follicular Helper Cell Responses to Influenza Virus Infection in Mice.

Yes-associated protein is dysregulated during nitrofen-induced hypoplastic lung development due to congenital diaphragmatic hernia.

Redox-dependent loss of flavin by mitochondria complex I is different in brain and heart.

Arsenic alters nitric oxide signaling similar to autism spectrum disorder and Alzheimer's disease-associated mutations.

Environmental Substances Associated with Chronic Obstructive Pulmonary Disease-A Scoping Review.

Toenail speciation biomarkers in arsenic-related disease: a feasibility study for investigating the association between arsenic exposure and chronic disease.

Metabolic trade-offs favor regulated hypothermia and inhibit fever in immune-challenged chicks.

Acute Dyspnea and Hemoptysis in an 84-Year-Old Man With Multiple Comorbidities.

Synthesis and anti-inflammatory activities of glycyrrhetic acid derivatives containing disulfide bond.

Ni(2+) Catalyzed Cleavage of TrpLE-Fused Small Transmembrane Peptides.

Rare fatal poisoning through dermal exposure to paraquat.

Carbonyl Profiles of Electronic Nicotine Delivery System (ENDS) Aerosols Reflect Both the Chemical Composition and the Numbers of E-Liquid Ingredients-Focus on the In Vitro Toxicity of Strawberry and Vanilla Flavors.

E2F1 regulates miR-215-5p to aggravate paraquat-induced pulmonary fibrosis via repressing BMPR2 expression.

Urinary volatile organic compound metabolites and reduced lung function in U.S. adults.

Toxic effects of pesticides on cellular and humoral immunity: an overview.

Acetobacter tropicalis bacteraemia in an immunocompromised patient: case report.

The Mitochondrial Alternative Oxidase in *Ustilago maydis* Is Not Involved in Response to Oxidative Stress Induced by Paraquat.

Metabolic Regulation Effect and Potential Metabolic Biomarkers of Pre-Treated Delphinidin on Oxidative Damage Induced by Paraquat in A549 Cells.

Comparative Biochemical Profiling of Aluminum Chloride and Sodium Azide Induced Neuroinflammation and Cardiometabolic Disturbance.

Microbiome alterations from volatile organic compounds (VOC) exposures among workers in salons primarily serving women of color.

Ethoxyquin is a Competent Radical-Trapping Antioxidant for Preventing Ferroptosis in Doxorubicin Cardiotoxicity.

AhR Mediated Activation of Pro-Inflammatory Response of RAW 264.7 Cells Modulate the Epithelial-Mesenchymal Transition.

Oxaloacetate acid ameliorates paraquat-induced acute lung injury by alleviating oxidative stress and mitochondrial dysfunction.

C-X-C-Chemokine-Receptor-Type-4 Inhibitor AMD3100 Attenuates Pulmonary Inflammation and Fibrosis in Silicotic Mice.

An online atlas of human plasma metabolite signatures of gut microbiome composition.

Assessment of Semen Respiratory Activity of Domesticated Species before and after Cryopreservation: Boars, Bulls, Stallions, Reindeers and Roosters.

The Joint Influence of TI(+) and Thiol-Modifying Agents on Rat Liver Mitochondrial Parameters In Vitro.

Allergic and non-allergic wheeze among farm women in the Agricultural Health Study (2005-2010).

Mild pentachlorophenol-mediated uncoupling of mitochondria depletes ATP but does not cause an oxidized redox state or dopaminergic neurodegeneration in *Caenorhabditis elegans*.

Genetic background modulates the sensitivity of *Caenorhabditis elegans* to the toxic effects of vehicular air pollution.

Heme-bound tyrosine vibrations in hemoglobin M: Resonance Raman, crystallography, and DFT calculation.

Metabolites From Trypanosome-Infected Cattle as Sensitive Biomarkers for Animal Trypanosomosis.

Comparative effects of Curcuma longa and curcumin on paraquat-induced systemic and lung oxidative stress and inflammation in rats.

Disinfection byproducts in chlorinated or brominated swimming pools and spas: Role of brominated DBPs and association with mutagenicity.

Comparative study of free respiration in liver mitochondria during oxidation of various electron donors and under conditions of shutdown of complex III of the respiratory chain.

Metformin Regulates Alveolar Macrophage Polarization to Protect Against Acute Lung Injury in Rats Caused by Paraquat Poisoning.

In Vivo Estimation of the Biological Effects of Endocrine Disruptors in Rabbits after Combined and Long-Term Exposure: Study Protocol.

Distinct Epithelial Cell Profiles in Normal Versus Induced-Congenital Diaphragmatic Hernia Fetal Lungs.

Interference with connective tissue growth factor attenuated fibroblast-to-myofibroblast transition and pulmonary fibrosis.

Voltage Dependent Anion Channel 3 (VDAC3) protects mitochondria from oxidative stress.

Dioxin Disrupts Thyroid Hormone and Glucocorticoid Induction of klf9, a Master Regulator of Frog Metamorphosis.

[A case of occupational allyl alcohol inhalation poisoning].

The Potential Role of Mitochondrial Acetaldehyde Dehydrogenase 2 in Urological Cancers From the Perspective of Ferroptosis and Cellular Senescence.

Effects of Montelukast on Arsenic-Induced Epithelial-Mesenchymal Transition and the Role of Reactive Oxygen Species Production in Human Bronchial Epithelial Cells.

Breath chemical markers of sexual arousal in humans.

Residential proximity to crops and agricultural pesticide use and cause-specific mortality: A prospective census-based cohort study in the Netherlands.

Paraquat Induces Lung Injury via miR-199-Mediated SET in a Mouse Model.

Kidney and lung injury in rats following acute diquat exposure.

Diquat Poisoning: Care Management and Medico-Legal Implications.

Enhancement of cancer-cell-selective cytotoxicity by a dicopper complex with a phenanthrene amide-tether ligand conjugate via mitochondrial apoptosis.

NMR Spectroscopy Identifies Chemicals in Cigarette Smoke Condensate That Impair Skeletal Muscle Mitochondrial Function.

Correction to: Quantification and toxicokinetics of paraquat in mouse plasma and lung tissues by internal standard surface enhanced Raman spectroscopy.

Distinguish oral-source VOCs and control their potential impact on breath biomarkers.

Exploring breath biomarkers in BLM-induced pulmonary fibrosis mice with associative ionization time-of-flight mass spectrometry.

Mitochondrial proteomics reveals new insights into embryogenic competence acquisition in *Carica papaya* L. callus.

Role of Lung P450 Oxidoreductase in Paraquat-Induced Collagen Deposition in the Lung.

Alkaline Diuresis as Treatment for 2,4-D Dimethylamine Herbicide Intoxication.

Retraction Note: Carvacrol and PPAR α agonist, pioglitazone, affects inhaled paraquat-induced lung injury in rats.

Sensitive Micro-Breathing Sensing and Highly-Effective Photothermal Antibacterial Cinnamomum camphora Bark Micro-Structural Cotton Fabric via Electrostatic Self-Assembly of MXene/HACC.

Arsenite-induced cytotoxicity is regulated by p38-SQSTM1/p62 and JNK-BNIP3L/Nix signaling in lung cancer cells.

Proton motive force underpins respiration-mediated potentiation of aminoglycoside lethality in pathogenic *Escherichia coli*.

Arctigenin attenuates paraquat-induced human lung epithelial A549 cell injury by suppressing ROS/p38 mitogen-activated protein kinases-mediated apoptosis.

Paraquat poisoning with spontaneous pneumothorax in the era of online shopping.

Inhibition of Wnt10b/ β -catenin signaling alleviates pulmonary fibrogenesis induced by paraquat in vivo and in vitro.

Lung inflammation from repeated exposure to LPS and glyphosate.

Effects of chronic prometryn exposure on antioxidative status, intestinal morphology, and microbiota in sea cucumber (*Apostichopus japonicus*).

Elevated pulmonary levels of Axin2 in mice exposed to herbicide 2,4-D with or without endotoxin.

Assessment of glufosinate-containing herbicide exposure: A multi-center retrospective study.

Thoracic radiographic features of fatal paraquat intoxication in eleven dogs.

Atrazine Inhalation Worsen Pulmonary Fibrosis Regulating the Nuclear Factor-Erythroid 2-Related Factor (Nrf2) Pathways Inducing Brain Comorbidities.

Whole-body bioconcentration and biochemical and morphological responses of gills of the neotropical fish *Prochilodus lineatus* exposed to 2,4-dichlorophenoxyacetic acid or fipronil individually or in a mixture.

Atrazine intoxication in cattle, confirmed by gas chromatography-mass spectrometry.

Conjugated linoleic acid protects brain mitochondrial function in acrolein induced male rats.

Subchronic exposure to a glyphosate-based herbicide causes dysplasia in the digestive tract of Wistar rats.

Farmers' Knowledge, Attitudes, and Perceptions Regarding Carcinogenic Pesticides in Fez Meknes Region (Morocco).

Paraquat promotes acute lung injury in rats by regulating alveolar macrophage polarization through glycolysis.

Sex-dependent acrolein sensitivity in mice is associated with differential lung cell, protein, and transcript changes.

Exposure to glyphosate and tetrachlorvinphos induces cytotoxicity and global DNA methylation in human cells.

Pectin/chitosan/tripolyphosphate encapsulation protects the rat lung from fibrosis and apoptosis induced by paraquat inhalation.

Improving pollutants environmental risk assessment using a multi model toxicity determination with *in vitro*, bacterial, animal and plant model systems: The case of the herbicide alachlor.

Epigenome-Wide DNA Methylation and Pesticide Use in the Agricultural Lung Health Study.

Long noncoding RNA HOTAIR functions as ceRNA to regulate MMP2 in paraquat induced lung epithelial-mesenchymal transition.

Glyphosate and Polyoxyethyleneamine Ingestion Leading to Renal, Hepatic, and Pulmonary Failure.

The effect of *Zataria multiflora* hydroalcoholic extract on memory and lung changes induced by rats that inhaled paraquat.

Immediate and late systemic and lung effects of inhaled paraquat in rats.

Using the Matrix to bridge the epidemiology/risk assessment gap: a case study of 2,4-D.

Pulmonary inflammatory response from co-exposure to LPS and glyphosate.

Overexpression of TOLLIP Protects against Acute Kidney Injury after Paraquat Intoxication through Inhibiting NLRP3 Inflammasome Activation Modulated by Toll-Like Receptor 2/4 Signaling.

Exposure to Atrazine Induces Lung Inflammation through Nrf2-HO1 and Beclin 1/LC3 Pathways.

Glyphosate-based herbicides: Evidence of immune-endocrine alteration.

Endoplasmic reticulum stress promotes epithelial-mesenchymal transition via the PERK signaling pathway in paraquat-induced pulmonary fibrosis.

Pulmonary toxicity associated with occupational and environmental exposure to pesticides and herbicides.

Glucocorticoid with cyclophosphamide for oral paraquat poisoning.

Mendelian randomization analysis of arsenic metabolism and pulmonary function within the Hispanic Community Health Study/Study of Latinos.

Fluorfenidone attenuates paraquat-induced pulmonary fibrosis by regulating the PI3K/Akt/mTOR signaling pathway and autophagy.

The effects of carbon monoxide releasing molecules on paraquat-induced pulmonary interstitial inflammation and fibrosis.

Lipoxin A4 protects against paraquat-induced acute lung injury by inhibiting the TLR4/MyD88-mediated activation of the NF- κ B and PI3K/AKT pathways.

Aspirin eugenol ester ameliorates paraquat-induced oxidative damage through ROS/p38-MAPK-mediated mitochondrial apoptosis pathway.

Carvacrol and PPAR γ agonist, pioglitazone, affects inhaled paraquat-induced lung injury in rats.

Paraquat herbicide diminishes chemoreflex sensitivity, induces cardiac autonomic imbalance and impair cardiac function in rats.

Assessment of the impacts of glyphosate and its commercial formulation Roundup ® on the respiratory tree of the sea cucumber *Holothuria forskali* using a multivariate biomarker approach.

In vitro dosimetry analyses for acrolein exposure in normal human lung epithelial cells and human lung cancer cells.

Cardiogenic shock with first-degree heart block in a patient with glyphosate-surfactant poisoning.

A novel idea for establishing Parkinson's disease mouse model by intranasal administration of paraquat.

Pneumoperitoneum from pneumomediastinum in paraquat poisoning.

Evaluation of the potential teratogenic and toxic effect of the herbicide 2,4-D (DMA ® 806) in bullfrog embryos and tadpoles (*Lithobates catesbeianus*).

Paraquat Inhalation, a Translationally Relevant Route of Exposure: Disposition to the Brain and Male-Specific Olfactory Impairment in Mice.

Hepatotoxic Effects of Atrazine on *Clarias gariepinus* (Burchell, 1822): Biochemical and Histopathological Studies.

The use of combined high-fructose diet and glyphosate to model rats type 2 diabetes symptomatology.

Modeling paraquat-induced lung fibrosis in *C. elegans* reveals KRIT1 as a key regulator of collagen gene transcription.

Effects of subchronic exposure to environmentally relevant concentrations of the herbicide atrazine in the Neotropical fish *Astyanax altiparanae*.

Glyphosate poisoning - a case report.

The herbicide paraquat-induced molecular mechanisms in the development of acute lung injury and lung fibrosis.

Diclofenac and atrazine restrict the growth of a synchronous *Chlamydomonas reinhardtii* population via various mechanisms.

Using benchmark dose modeling for the quantitative risk assessment: Carbon nanotubes, asbestos, glyphosate.

Paraquat Poisoning in Children: A 5-Year Review.

Study on the Efficacy and Safety of Ambroxol Combined with Methylprednisolone in Patients with Acute Lung Injury.

Differences in epithelial-mesenchymal-transition in paraquat-induced pulmonary fibrosis in BALB/C and BALB/C (nu/nu) nude mice.

Digital image processing: a useful tool in the analysis of lung injuries caused by chronic inhalation of agricultural herbicides.

Identification of hub genes and key pathways of paraquat-induced human embryonic pulmonary fibrosis by bioinformatics analysis and in vitro studies.

[Two case reports: chronic obstructive pulmonary disease developed in long term survived patients after acute paraquat poisoning].

Coniferyl aldehyde alleviates LPS-induced WI-38 cell apoptosis and inflammation injury via JAK2-STAT1 pathway in acute pneumonia.

Association between pesticide exposure and colorectal cancer risk and incidence: A systematic review.

High-dose diquat poisoning: a case report.

Esophagitis dissecans superficialis associated with acute transoral paraquat poisoning: Clinical study of 15 cases.

Effect of Fluorofenidone Against Paraquat-Induced Pulmonary Fibrosis Based on Metabolomics and Network Pharmacology.

Effect and Safety of Cinnamaldehyde on Immunosuppressed Mice with Invasive Pulmonary Candidiasis.

[Progress in the study of pulmonary fibrosis signaling pathways caused by paraquat poisoning].

Association of Agricultural, Occupational, and Military Inhalants With Autoantibodies and Disease Features in US Veterans With Rheumatoid Arthritis.

[Analysis of the level of T lymphocyte subsets and the relationship with the prognosis of pulmonary fibrosis in patients with paraquat poisoning].

Thal protects against paraquat-induced lung injury through a microRNA-141/HDAC6/Î±BÎ±-NF-Î±B axis in rat and cell models.

Arenaria kansuensis attenuates pulmonary fibrosis in mice via the activation of Nrf2 pathway and the inhibition of NF-kB/TGF-beta1/Smad2/3 pathway.

[Analysis of clinical characteristics and prognostic factors in 40 cases of acute glyphosate poisoning].

Acrolein but not its metabolite, 3-Hydroxypropylmercapturic acid (3HPMA), activates vascular transient receptor potential Ankyrin-1 (TRPA1): Physiological to toxicological implications.

[The effect of diallyl sulfide on the lung tissue of rats poisoned by paraquat].

An Intensified Acrolein Exposure Can Affect Memory and Cognition in Rat.

Proximity-dependent biotinylation detects associations between SARS coronavirus nonstructural protein 1 and stress granule-associated proteins.

Arsenic-induced lung inflammation and fibrosis in a rat model: Contribution of the HMGB1/RAGE, PI3K/AKT, and TGF-Î²1/SMAD pathways.

Platelet autophagic machinery involved in thrombosis through a novel linkage of AMPK-MTOR to sphingolipid metabolism.

Potential role of dietary chitosan nanoparticles against immunosuppression, inflammation, oxidative stress, and histopathological alterations induced by pendimethalin toxicity in Nile tilapia.

Respiratory characteristics of the tammar wallaby pouch young and functional limitations in a newborn with skin gas exchange.

AMP deamination is sufficient to replicate an atrophy-like metabolic phenotype in skeletal muscle.

Prenatal exposure to arsenic and lung function in children from the New Hampshire Birth Cohort Study.

A new insight into the role of aryl hydrocarbon receptor (AhR) in the migration of glioblastoma by AhR-IL24 axis regulation.

Prenatal Molecular Hydrogen Administration Ameliorates Several Findings in Nitrofen-Induced Congenital Diaphragmatic Hernia.

Untargeted metabolomics and transcriptomics identified glutathione metabolism disturbance and PCS and TMAO as potential biomarkers for ER stress in lung.

Paraquat lung - a rare cause of diffuse parenchymal lung disease.

Skeletal myopathy in CKD: a comparison of adenine-induced nephropathy and 5/6 nephrectomy models in mice.

Regulated hypothermia in response to endotoxin in birds.

[Aryl hydrocarbon receptor modulates airway inflammation in mice with cockroach allergen-induced asthma by regulating Th17/Treg differentiation].

[Risk factors associated with acute kidney injury caused by pesticide poisoning].

COPD-derived fibroblasts secrete higher levels of senescence-associated secretory phenotype proteins.

Benzo(a)pyrene Enhanced Dermatophagoides Group 1 (Der f 1)-Induced TGF β 1 Signaling Activation Through the Aryl Hydrocarbon Receptor-RhoA Axis in Asthma.

Protective effect of toll-interacting protein overexpression against paraquat-induced lung injury in mice and A549 cells through inhibiting oxidative stress, inflammation, and NF- κ B signaling pathway.

"That's Not His Regular Formula": A Case of Organophosphate Poisoning in an Infant.

Vitamin D improves pulmonary function in a rat model for congenital diaphragmatic hernia.

Thrombolome and Its Emerging Role in Chronic Kidney Diseases.

Peripheral nerve injury in patients exposed to n-hexane: an analysis of eight cases.

Impact of congenital diaphragmatic hernia on diaphragm muscle function in neonatal rats.

Microbial metabolism of L-tyrosine protects against allergic airway inflammation.

Au doped poly-thionine and poly-m-Cresol purple: Synthesis and their application in simultaneously electrochemical detection of two lung cancer markers CEA and CYFRA21-1.

Inhibition of anti-viral stress granule formation by coronavirus endoribonuclease nsp15 ensures efficient virus replication.

Sustained high expression of NRF2 and its target genes induces dysregulation of cellular proliferation and apoptosis is associated with arsenite-induced malignant transformation of human bronchial epithelial cells.

The Aryl Hydrocarbon Receptor Attenuates Acute Cigarette Smoke-Induced Airway Neutrophilia Independent of the Dioxin Response Element.

Proportionate mortality study of unionized maintenance of way railroad workers.

Inorganic arsenic-mediated upregulation of AS3MT promotes proliferation of nonsmall cell lung cancer cells by regulating cell cycle genes.

Pbx1, Meis1, and Runx1 Expression Is Decreased in the Diaphragmatic and Pulmonary Mesenchyme of Rats with Nitrofen-Induced Congenital Diaphragmatic Hernia.

Transamniotic Stem Cell Therapy for Experimental Congenital Diaphragmatic Hernia: Structural, Transcriptional, and Cell Kinetics Analyses in the Nitrofen Model.

A prolonged exposure of human lung carcinoma epithelial cells to benzo[a]pyrene induces p21-dependent epithelial-to-mesenchymal transition (EMT)-like phenotype.

Epithelial cell-adhesion protein cadherin 26 is dysregulated in congenital diaphragmatic hernia and congenital pulmonary airway malformation.

A treatise on Organophosphate pesticide pollution: Current strategies and advancements in their environmental degradation and elimination.

A Preconception Paternal Fish Oil Diet Prevents Toxicant-Driven New Bronchopulmonary Dysplasia in Neonatal Mice.

Endogenous regulation of the Akt pathway by the aryl hydrocarbon receptor (AhR) in lung fibroblasts.

Case Report: Delayed Lung Transplantation With Intraoperative ECMO Support for Herbicide Intoxication-Related Irreversible Pulmonary Fibrosis: Strategy and Outcome.

Pulmonary histopathology in fatal paraquat poisoning.

Inhibitory effect of pirfenidone on pulmonary fibrosis in patients with acute paraquat poisoning.

Paraquat Poisoning Associated With Daisley Barton Syndrome: A Case Report.

An electrochemical immunosensor for the detection of carcinoembryonic antigen based on Au/g-C(3)N(4) NSs-modified electrode and CuCo/CNC as signal tag.

Impact of heat on biological concentrations of toluene and acetone resulting from exposure by inhalation: A pilot study.

Comparative Genotoxicity and Mutagenicity of Cigarette, Cigarillo, and Shisha Tobacco Products in Epithelial and Cardiac Cells.

Prediction of potential passive exposure from commercial electronic nicotine delivery systems using exhaled breath analysis and computational fluid dynamic techniques.

Impact of whole-body versus nose-only inhalation exposure systems on systemic, respiratory, and cardiovascular endpoints in a 2-month cigarette smoke exposure study in the ApoE(-/-) mouse model.

[Vigilance against a highly lethal insecticide chlorfenapyr poisoning (report of 4 cases and literature review)].

Rapid Glomerulotubular Nephritis as an Initial Presentation of a Lethal Diquat Ingestion.

Cimicifuga racemosa Extract Ze 450 Re-Balances Energy Metabolism and Promotes Longevity.

Curcumin pre-treatment may protect against mitochondrial damage in LRRK2-mutant Parkinson's disease and healthy control fibroblasts.

A Common Insecticide Induced-Oxidative Stress in Wistar Rats: Significance for Humans and Implications for Nutritional Modulation of Insecticide Toxicity.

Effect of paraquat on cytotoxicity involved in oxidative stress and inflammatory reaction: A review of mechanisms and ecological implications.

Colorimetry-Based Detection of Nitric Oxide from Exhaled Breath for Quantification of Oxidative Stress in Human Body.

Mechanistic Investigation of Xuebijing for Treatment of Paraquat-Induced Pulmonary Fibrosis by Metabolomics and Network Pharmacology.

Fine particulate matter air pollution and aortic perivascular adipose tissue: Oxidative stress, leptin, and vascular dysfunction.

Can kissing cause paraquat poisoning: A case report and review of literature.

The Aryl Hydrocarbon Receptor Suppresses Chronic Smoke-Induced Pulmonary Inflammation.

Assessment of the in vivo genotoxicity of pendimethalin via mitochondrial bioenergetics and transcriptional profiles during embryogenesis in zebrafish: Implication of electron transport chain activity and developmental defects.

Pharmacokinetics of 2-phenoxyethanol and its major metabolite, phenoxyacetic acid, after dermal and inhaled routes of exposure: application to development PBPK model in rats.

Crucial cytotoxic and antimicrobial activity changes driven by amount of doped silver in biocompatible carbon nitride nanosheets.

Correction to: Exposures to 2,4-Dichlorophenoxyacetic acid with or without endotoxin upregulate small cell lung cancer pathway.

Effect of exposure to 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and polychlorinated biphenyls (PCBs) on mitochondrial DNA (mtDNA) copy number in rats.

Exposures to 2,4-Dichlorophenoxyacetic acid with or without endotoxin upregulate small cell lung cancer pathway.

Paraquat poisoning in Andaman and Nicobar Islands - Government must intervene.

TET-mediated DNA demethylation plays an important role in arsenic-induced HBE cells oxidative stress via regulating promoter methylation of OGG1 and GSTP1.

Lung Metabolomics Profiling of Congenital Diaphragmatic Hernia in Fetal Rats.

Opposing Effects of TGF β 2 and BMP in the Pulmonary Vasculature in Congenital Diaphragmatic Hernia.

HGF-Modified Dental Pulp Stem Cells Mitigate the Inflammatory and Fibrotic Responses in Paraquat-Induced Acute Respiratory Distress Syndrome.

Smoke Chemistry, In Vitro Cytotoxicity, and Genotoxicity Demonstrates Enhanced Toxicity of Cigarillos Compared With Cigarettes.

The Impacts of Illegal Toxic Waste Dumping on Children's Health: A Review and Case Study from Pasir Gudang, Malaysia.

Analysis of the Soil Fumigant, Dimethyl Disulfide, in Swine Blood by Dynamic Headspace Gas Chromatography-Mass Spectroscopy.

Convergent evolution of plant specialized 1,4-naphthoquinones: metabolism, trafficking, and resistance to their allelopathic effects.

WITHDRAWN: Trimethylation of H4K20 regulated by RBL1/KMT5B/E2F3 signaling pathway played a protective role in attenuating paraquat-induced acute lung injury.

Report of a Case of Paraquat Poisoning and Mediastinal Involvement.

Downregulation of epithelial DUOX1 in chronic obstructive pulmonary disease.

2,4-Dichlorophenoxyacetic Acid Poisoning Mimicking as Organophosphorus Poisoning.

Atomic structures of respiratory complex III(2), complex IV, and supercomplex III(2)-IV from vascular plants.

Protective effect of melatonin against herbicides-induced hepatotoxicity in rats.

Urinary glyphosate biomonitoring of sprayers in vegetable farm in Thailand.

Evaluation of aryl hydrocarbon receptor expression in oral squamous cell carcinoma and normal oral mucosa using western blot.

Role of epithelial-to-mesenchymal transition in the pulmonary fibrosis induced by paraquat in rats.

Liquid Biopsies in a Veteran Patient Population With Advanced Prostate and Lung Non-Small Cell Carcinomas: A New Paradigm and Unique Challenge in Personalized Medicine.

Ion transport mechanisms for smoke inhalation-injured airway epithelial barrier.

ROBO2 signaling in lung development regulates SOX2/SOX9 balance, branching morphogenesis and is dysregulated in nitrofen-induced congenital diaphragmatic hernia.

[Simultaneous determination of paraquat and diquat in plasma and urine by ion chromatography-triple quadrupole mass spectrometry].

A rabbit model for evaluating ocular damage from acrolein toxicity in vivo.

Effects of tacrolimus on the TGF β 1/SMAD signaling pathway in paraquat-exposed rat alveolar type II epithelial cells.

Reduction by, ligand exchange among, and covalent binding to glutathione and cellular thiols link metabolism and disposition of dietary arsenic species with toxicity.

Acrolein in cigarette smoke attenuates the innate immune responses mediated by surfactant protein D.

Toxicological impacts of herbicide paraquat dichloride on histological profile (gills, liver, and kidney) of freshwater fish *Channa punctatus* (Bloch).

Evaluation of modes of action of pesticides to *Daphnia magna* based on QSAR, excess toxicity and critical body residues.

Paraquat induces pulmonary fibrosis through Wnt/ β -catenin signaling pathway and myofibroblast differentiation.

FoxF1 protects rats from paraquat-evoked lung injury following HDAC2 inhibition via the microRNA-342/KLF5/ β -catenin/NF- κ B p65 axis.

Imrecoxib Inhibits Paraquat-Induced Pulmonary Fibrosis through the NF- κ B/Snail Signaling Pathway.

The multiplex interactions and molecular mechanism on genotoxicity induced by formaldehyde and acrolein mixtures on human bronchial epithelial BEAS-2B cells.

The scavenging capacity of \hat{I}^3 -aminobutyric acid for acrolein and the cytotoxicity of the formed adduct.

The PARK2 Mutation Associated with Parkinson's Disease Enhances the Vulnerability of Peripheral Blood Lymphocytes to Paraquat.

Hematological and immunological responses in the African catfish *Clarias gairepinus* exposed to sublethal concentrations of herbicide Ronstar[®].

Role of the Hippo signaling pathway in safflower yellow pigment treatment of paraquat-induced pulmonary fibrosis.

Depletion of NK cells attenuates paraquat-induced acute lung injury by manipulating macrophage polarization.

Orthotopic foetal lung tissue direct injection into lung showed a preventive effect against paraquat-induced acute lung injury in mice.

Albumin Protects Lung Cells against Acrolein Cytotoxicity and Acrolein-Adducted Albumin Increases Heme Oxygenase 1 Transcripts.

Combined signaling of NF-kappaB and IL-17 contributes to Mesenchymal stem cells-mediated protection for Paraquat-induced acute lung injury.

The MUC5B Mucin Is Involved in Paraquat-Induced Lung Inflammation.

Evaluation of buccal damage associated with acute inhalation exposure to 2,4-dichlorophenoxyacetic acid (2,4-D) in mice.

Influence of strengthened hemoperfusion combined with continuous venovenous hemofiltration on prognosis of patients with acute paraquat poisoning: SHP+CVVH improve prognosis of acute PQ patients.

[Treatment of "hydration therapy" for acute paraquat poisoning].

Link between increased cellular senescence and extracellular matrix changes in COPD.

Exploration of therapeutic role of montelukast and dexamethasone combination against paraquat induced inhalational toxicity.

[Clinical analysis of 15 cases of acute glufosinate poisoning].

[Effect of bone marrow mesenchymal stem cells on paraquat-induced pulmonary fibrosis in rats].

[The expression of Nrf2 in the lung tissue of rats with acute diquat poisoning and the distribution of diquat in lungs].

Effects of cinnamaldehyde on anti-respiratory syncytial virus: A protocol of systematic review and meta-analysis.

Dynamic assessment of lung injury by ultrasound in patients with acute paraquat poisoning.

Adjuvant contributes Roundup's unexpected effects on A549 cells.

[One case successfully rescued acute poisoning caused by misadministration of large amount of glufosinate].

Formation of di-cysteine acrolein adduct decreases cytotoxicity of acrolein by ROS alleviation and apoptosis intervention.

Cyclosporine attenuates Paraquat-induced mitophagy and pulmonary fibrosis.

Where ferroptosis inhibitors and paraquat detoxification mechanisms intersect, exploring possible treatment strategies.

Pesticide exposure and lung function: a systematic review and meta-analysis.

Dimethylarsinic acid (DMA) enhanced lung carcinogenesis via histone H3K9 modification in a transplacental mouse model.

Increased severity associated with tallowamine in acute glyphosate poisoning.

[CT manifestations and prognosis of acute paraquat induced lung injury].

Glyphosate-based herbicide impairs energy metabolism and increases autophagy in C6 astrogloma cell line.

Human amniotic mesenchymal stem cells alleviate paraquat-induced pulmonary fibrosis in rats by inhibiting the inflammatory response.

Toxicology of paraquat and pharmacology of the protective effect of 5-hydroxy-1-methylhydantoin on lung injury caused by paraquat based on metabolomics.

Chronic pesticide mixture exposure including paraquat and respiratory outcomes among Colombian farmers.

MiR-130a-5p/Foxa2 axis modulates fetal lung development in congenital diaphragmatic hernia by activating the Shh/Gli1 signaling pathway.

Continuous hemoperfusion relieves pulmonary fibrosis in patients with acute mild and moderate paraquat poisoning.

Analysis of microRNA expression profiling during paraquat-induced injury of murine lung alveolar epithelial cells.

Amelioration of paraquat-induced pulmonary fibrosis in mice by regulating miR-140-5p expression with the fibrogenic inhibitor Xuebijing.

Protective Effects of Cinnamaldehyde against Mesenteric Ischemia-Reperfusion-Induced Lung and Liver Injuries in Rats.

Pathological Role of Unsaturated Aldehyde Acrolein in Diabetic Retinopathy.

Analysis of Acrolein Exposure Induced Pulmonary Response in Seven Inbred Mouse Strains and Human Primary Bronchial Epithelial Cells Cultured at Air-Liquid Interface.

Inhibition of TBK1 by amlexanox attenuates paraquat-induced acute lung injury.

Combination Therapy with Cinnamaldehyde and Hyperthermia Induces Apoptosis of A549 Non-Small Cell Lung Carcinoma Cells via Regulation of Reactive Oxygen Species and Mitogen-Activated Protein Kinase Family.

Dicamba use and cancer incidence in the agricultural health study: an updated analysis.

[Therapeutic effect of cinnamaldehyde on ulcerative colitis in mice induced by dextran sulfate sodium with *Candida albicans* colonization and its effect on dectin-1/TLRs/NF- κ B signaling pathway].

Klotho Alleviates Lung Injury Caused by Paraquat via Suppressing ROS/P38 MAPK-Regulated Inflammatory Responses and Apoptosis.

Protective effects of Alda-1, an ALDH2 activator, on alcohol-derived DNA damage in the esophagus of human ALDH2*2 (Glu504Lys) knock-in mice.

[Hydrogen water alleviates paraquat-induced lung fibroblast injury in vitro by enhancing Nrf2 expression].

trans-Cinnamaldehyde Prevents Oxidative Stress-Induced Apoptosis in V79-4 Chinese Hamster Lung Fibroblasts through the Nrf2-Mediated HO-1 Activation.

Cinnamon extract inhibits allergen-specific immune responses in human and murine allergy models.

A retrospective analysis reveals a predictor of survival for the patient with paraquat intoxication.

Metabolic profiling of rats poisoned with paraquat and treated with Xuebijing using a UPLC-QTOF-MS/MS metabolomics approach.

Understanding the Functional Impact of VOC-Ozone Mixtures on the Chemistry of RNA in Epithelial Lung Cells.

[Efficacy of hemoperfusion combined with continuous veno-venous hemofiltration on the treatment of paraquat poisoning: a Meta-analysis].

Transient receptor potential ankyrin-1 causes rapid bronchodilation via nonepithelial PGE(2).

Acrolein, e-cigarettes, and pulmonary and vascular damage.

Combined cell death of co-exposure to aldehyde mixtures on human bronchial epithelial BEAS-2B cells: Molecular insights into the joint action.

Rapamycin attenuates the paraquat-induced pulmonary fibrosis through activating Nrf2 pathway.

miR-200 family expression during normal and abnormal lung development due to congenital diaphragmatic hernia at the later embryonic stage in the nitrofen rat model.

Evaluation of the effectiveness of valproic acid for treating cyanotic breath holding spells: A Pilot prospective study.

The joint effect of ambient air pollution and agricultural pesticide exposures on lung function among children with asthma.

Metabolic and Hematological Responses to Endotoxin-Induced Inflammation in Chicks Experiencing Embryonic 2,3,7,8-Tetrachlorodibenzodioxin Exposure.

Methyl-bromide and asthma emergency department visits in California, USA from 2005 to 2011.

High-Resolution Respirometry Reveals MPP(+) Mitochondrial Toxicity Mechanism in a Cellular Model of Parkinson's Disease.

Autophagy mediates bronchial cell malignant transformation induced by chronic arsenic exposure via MEK/ERK1/2 pathway.

Impact of environmental exposure to persistent organic pollutants on lung cancer risk.

Extracellular vesicles influence the pulmonary arterial extracellular matrix in congenital diaphragmatic hernia.

Cancer incidence in the vicinity of a waste incineration plant in the Nice area between 2005 and 2014.

Single-cell RNA-seq Analysis Reveals That Prenatal Arsenic Exposure Results in Long-term, Adverse Effects on Immune Gene Expression in Response to Influenza A Infection.

Extracellular Vesicles Attenuate Nitrofen-Mediated Human Pulmonary Artery Endothelial Dysfunction: Implications for Congenital Diaphragmatic Hernia.

Environmental Toxic Exposures Using Companion Animals as an Indicator of Human Toxicity: A Case Report and Discussion.

Overexpression of miR-455-5p affects retinol (vitamin A) absorption by downregulating STRA6 in a nitrofen-induced CDH with lung hypoplasia rat model.

Small molecule proteomics quantifies differences between normal and fibrotic pulmonary extracellular matrices.

Aryl Hydrocarbon Receptor-Dependent inductions of omega-3 and omega-6 polyunsaturated fatty acid metabolism act inversely on tumor progression.

Arsenic and benzo[a]pyrene co-exposure acts synergistically in inducing cancer stem cell-like property and tumorigenesis by epigenetically down-regulating SOCS3 expression.

Embelin impact on paraquat-induced lung injury through suppressing oxidative stress, inflammatory cascade, and MAPK/NF- κ B signaling pathway.

Nicotine exposure potentiates lung tumorigenesis by perturbing cellular surveillance.

Congenital diaphragmatic hernia as a potential target for transamniotic stem cell therapy.

Acute occupational phosphine intoxications in the maritime shipping sector: Belgian and French reported cases.

Tandem mass tag (TMT) proteomic analysis of fetal lungs revealed differential expression of tight junction proteins in a rat model of congenital diaphragmatic hernia.

Procyanidin B2 Suppresses Lipopolysaccharides-Induced Inflammation and Apoptosis in Human Type II Alveolar Epithelial Cells and Lung Fibroblasts.

Understanding skin absorption of common aldehyde vapours from exposure during hazardous material incidents.

Is the skin an important exposure route for workers during cyanogen fumigation?

Lung surfactant monolayer - A good natural barrier against dibenzo-p-dioxins.

Naturally-derived diterpenoid sphaeropsidin C as an activator of Nrf2/ARE pathway and its potential capability of relieving intracellular oxidative stress in human lung epithelial cells.

Transient receptor potential ankyrin 1 (TRPA1)-mediated toxicity: friend or foe?

Pesticide exposure and lung cancer risk: A case-control study in Nakhon Sawan, Thailand.

Mitochondrial oxidative stress causes insulin resistance without disrupting oxidative phosphorylation.

Treatment of Paraquat-Induced Lung Injury With an Anti-C5a Antibody: Potential Clinical Application.

Patients with mild paraquat poisoning treated with prolonged low-dose methylprednisolone have better lung function: A retrospective analysis.

Is endotracheal intubation a non-beneficial treatment in patients with respiratory failure due to paraquat poisoning?

Mesenchymal stem cell therapy for paraquat poisoning: A systematic review and meta-analysis of preclinical studies.

Acrolein Exposure in Hookah Smokers and Non-Smokers Exposed to Hookah Tobacco Secondhand Smoke: Implications for Regulating Hookah Tobacco Products.

A new cell culture exposure system for studying the toxicity of volatile chemicals at the air-liquid interface.

[Effect of sucralfate on cytokines in rat with paraquat poisoning].

In vitro genotoxicity assessment of dinitroaniline herbicides pendimethalin and trifluralin.

Triptolide suppresses paraquat induced idiopathic pulmonary fibrosis by inhibiting TGF β 1-dependent epithelial mesenchymal transition.

Prognostic comparison of goal-oriented hemoperfusion and routine hemoperfusion combined with continuous venovenous hemofiltration for paraquat poisoning.

Methemoglobinemia Following Monolinuron Ingestion: A Case Report in a Child.

Ratio of Injured Lung Volume Fraction in Prognosis Evaluation of Acute PQ Poisoning.

Pirfenidone protects against paraquat-induced lung injury and fibrosis in mice by modulation of inflammation, oxidative stress, and gene expression.

Eukaryotic translation initiation factor 2 subunit $\hat{1}\pm$ (eIF2 $\hat{1}\pm$) inhibitor salubrinal attenuates paraquat-induced human lung epithelial-like A549 cell apoptosis by regulating the PERK-eIF2 $\hat{1}\pm$ signaling pathway.

Inflammatory effects of acrolein, crotonaldehyde and hexanal vapors on human primary bronchial epithelial cells cultured at air-liquid interface.

Preference of Aerosolized Pirfenidone to Oral Intake: An Experimental Model of Pulmonary Fibrosis by Paraquat.

[Effect of paraquat on the expression of a disintegrin and metalloproteinase-17 in A549 cells].

Glyphosate ingestion causing multiple organ failure: a near-fatal case report.

MnTMPyP inhibits paraquat-induced pulmonary epithelial-like cell injury by inhibiting oxidative stress.

HIV and paraquat poisoning: fighting fire with fire?

Treatment Outcome of Combined Continuous Venovenous Hemofiltration and Hemoperfusion in Acute Paraquat Poisoning: A Prospective Controlled Trial.

Lethal Bentazone Intoxication - A Report of Two Cases.

Effects of prolonged methylprednisolone treatment after pulse therapy for paraquat-intoxicated rats.

Protective Effects of a Rho Kinase Inhibitor on Paraquat-Induced Acute Lung Injuries in Rats.

Prolonged low-dose cyclophosphamide treatment after pulse therapy attenuates lung injury in rats with paraquat intoxication.

Self-reported physician-diagnosed chronic obstructive pulmonary disease and spirometry patterns in Vietnam Era US Army Chemical Corps veterans: A retrospective cohort study.

The KCa3.1 blocker TRAM-34 inhibits proliferation of fibroblasts in paraquat-induced pulmonary fibrosis.

Paraquat toxicity is attenuated by 4-phenylbutyrate-induced phosphorylation of ERK2 via PI3K in A549 cells.

The activation of STIM1 mediates S-phase arrest and cell death in paraquat induced acute lung intoxication.

FGF21 attenuates pulmonary fibrogenesis through ameliorating oxidative stress in vivo and in vitro.

Submicron emulsion of cinnamaldehyde ameliorates bleomycin-induced idiopathic pulmonary fibrosis via inhibition of inflammation, oxidative stress and epithelial-mesenchymal transition.

Time for Targeted Therapies in Acute Respiratory Distress Syndrome? Understanding Every Single Piece of the Puzzle.

Varying susceptibility of clinical and environmental *Scedosporium* isolates to chemical oxidative stress in conidial germination.

Neutrophil extracellular traps in acrolein promoted hepatic ischemia reperfusion injury: Therapeutic potential of NOX2 and p38MAPK inhibitors.

Protective Effects of Chymostatin on Paraquat-Induced Acute Lung Injury in Mice.

Combination Therapy with Pirfenidone plus Prednisolone Ameliorates Paraquat-Induced Pulmonary Fibrosis.

Orofacial antinociceptive effect of *Mimosa tenuiflora* (Willd.) Poiret.

Hesperetin mitigates acrolein-induced apoptosis in lung cells in vitro and in vivo.

Low-concentration exposure to glyphosate-based herbicide modulates the complexes of the mitochondrial respiratory chain and induces mitochondrial hyperpolarization in the *Danio rerio* brain.

[Effect of hemoperfusion combined with continuous veno-venous hemofiltration on acute paraquat poisoning: a Meta-analysis].

Diquat-induced oxidative stress increases intestinal permeability, impairs mitochondrial function, and triggers mitophagy in piglets.

EF-Tu From Non-typeable *Haemophilus influenzae* Is an Immunogenic Surface-Exposed Protein Targeted by Bactericidal Antibodies.

The Aryl Hydrocarbon Receptor and the Maintenance of Lung Health.

Intra-amniotic Sildenafil Treatment Modulates Vascular Smooth Muscle Cell Phenotype in the Nitrofen Model of Congenital Diaphragmatic Hernia.

Quantitative assessment of cyanide in cystic fibrosis sputum and its oxidative catabolism by hypochlorous acid.

Cigarette Smoke Toxins-Induced Mitochondrial Dysfunction and Pancreatitis Involves Aryl Hydrocarbon Receptor Mediated Cyp1 Gene Expression: Protective Effects of Resveratrol.

Prenatal treatment with rosiglitazone attenuates vascular remodeling and pulmonary monocyte influx in experimental congenital diaphragmatic hernia.

Fetal lung transcriptome patterns in an ex vivo compression model of diaphragmatic hernia.

Upregulated EFNB2 and EPHB4 promotes lung development in a nitrofen-induced congenital diaphragmatic hernia rat model.

Cohort study of workers at a New Zealand agrochemical plant to assess the effect of dioxin exposure on mortality.

Anemia in Older Adults.

Plasma metabolite profiles in children with current asthma.

[Risk assessment of dioxin in the surrounding area of a waste incineration plant in Beijing].

Angptl2 deficiency attenuates paraquat (PQ)-induced lung injury in mice by altering inflammation, oxidative stress and fibrosis through NF- κ B pathway.

Expression of extracellular polysaccharides and proteins by clinical isolates of *Pseudomonas aeruginosa* in response to environmental conditions.

Lung function and pulmonary artery blood flow following prenatal maternal retinoic acid and imatinib in the nitrofen model of congenital diaphragmatic hernia.

Chemical Tools for Targeted Amplification of Reactive Oxygen Species in Neutrophils.

[Clinical features and prognosis analysis of the elderly and youth patients with acute severe poisoning].

Treatment of rat congenital diaphragmatic hernia with sildenafil and NS-304, selexipag's active compound, at the pseudoglandular stage improves lung vasculature.

Adaptive changes in global gene expression profile of lung carcinoma A549 cells acutely exposed to distinct types of AhR ligands.

N(6)-methyladenosine mediates the cellular proliferation and apoptosis via microRNAs in arsenite-transformed cells.

Evaluation of metabolic reactivity in macrophages from mice with chronic sodium arsenite intake and experimental carcinogenesis.

Oxymatrine attenuates lipopolysaccharide-induced acute lung injury by activating the epithelial sodium channel and suppressing the JNK signaling pathway.

2,4 Dinitrophenol Attenuates Mitochondrial Dysfunction and Improves Neurobehavioral Outcomes Postanoxia in Neonatal Rats.

Iron pill aspiration: Cytologic and histologic findings of a potential life-threatening airway injury. A Case report and literature review.

Metabolic profiles in community-acquired pneumonia: developing assessment tools for disease severity.

Acute Metam Sodium Poisoning Caused by Occupational Exposure at a Flower Farm - Uganda, October 2016.

Food and nutrition insecurity indicators associated with iron deficiency anemia in Brazilian children: a systematic review.

Pesticide Use and Asthma in Alberta Grain Farmers.

Diterpene ginkgolides meglumine injection protects against paraquat-induced lung injury and pulmonary fibrosis in rats.

Gata-6 expression is decreased in diaphragmatic and pulmonary mesenchyme of fetal rats with nitrofen-induced congenital diaphragmatic hernia.

Prenatal exposure to TCDD and atopic conditions in the Seveso second generation: a prospective cohort study.

[Effects of prenatal tetrandrine treatment on the expression of Kruppel-like factor 5 and Survivin in the lung of congenital diaphragmatic hernia rat model induced by nitrofen].

Cellular shear stiffness reflects progression of arsenic-induced transformation during G1.

Increased CaSR and TRPC6 pulmonary vascular expression in the nitrofen-induced model of congenital diaphragmatic hernia.

Downregulated Elastin Microfibril Interfacer 1 Expression in the Pulmonary Vasculature of Experimental Congenital Diaphragmatic Hernia.

Decreased Expression of Integrin Subunits $\alpha 3$, $\alpha 6$, and $\alpha 8$ in the Branching Airway Mesenchyme of Nitrofen-Induced Hypoplastic Lungs.

The Influence of Genetic Stability on *Aspergillus fumigatus* Virulence and Azole Resistance.

Pesticide use, allergic rhinitis, and asthma among US farm operators.

[About a cresol intoxication].

Thymoquinone is protective against 2,3,7,8-tetrachlorodibenzo-p-dioxin induced hepatotoxicity.

STATs in Lung Development: Distinct Early and Late Expression, Growth Modulation and Signaling Dysregulation in Congenital Diaphragmatic Hernia.

Perturbations in Endothelial Dysfunction-Associated Pathways in the Nitrofen-Induced Congenital Diaphragmatic Hernia Model.

Prenatal exposure to dioxin-like compounds is associated with decreased cord blood IgE and increased risk of wheezing in children aged up to 7years: The Hokkaido study.

Parkinsonian Neurotoxins Impair the Pro-inflammatory Response of Glial Cells.

Therapy with high-dose long-term antioxidant free radicals for severe paraquat poisoning: A pilot study.

CYP1A1 and 1B1-mediated metabolic pathways of dolutegravir, an HIV integrase inhibitor.

[Paraquat induced acute pulmonary injury: an update on mechanisms].

Sodium arsenite exposure inhibits histone acetyltransferase p300 for attenuating H3K27ac at enhancers in mouse embryonic fibroblast cells.

Sevoflurane inhibits cardiac function in pulmonary fibrosis mice through the TLR4 signaling pathway.

Real-time carbon allocation into biogenic volatile organic compounds (BVOCs) and respiratory carbon dioxide (CO₂) traced by PTR-TOF-MS, ¹³CO₂ laser spectroscopy and ¹³C-pyruvate labelling.

Bushfire smoke is pro-inflammatory and suppresses macrophage phagocytic function.

A multicenter retrospective survey of poisoning after ingestion of herbicides containing glyphosate potassium salt or other glyphosate salts in Japan.

Paraquat induce pulmonary epithelial-mesenchymal transition through transforming growth factor- β 1-dependent mechanism.

Successful Extracorporeal Life Support in a Case of Severe Glyphosate-Surfactant Intoxication.

Tumor necrosis factor- α induced protein 6 attenuates acute lung injury following paraquat exposure.

Chloroquine rescues A549 cells from paraquat-induced death.

Inhalation of the reactive aldehyde acrolein promotes antigen sensitization to ovalbumin and enhances neutrophilic inflammation.

Acrolein preferentially damages nucleolus eliciting ribosomal stress and apoptosis in human cancer cells.

New water-soluble palladium(II) complexes of lidocaine and phenylcyanamide derivative ligands: cytotoxicity and cellular response mechanisms.

Integrated long non-coding RNA analyses identify novel regulators of epithelial-mesenchymal transition in the mouse model of pulmonary fibrosis.

Cardiac-Specific Knockout of ETA Receptor Mitigates Paraquat-Induced Cardiac Contractile Dysfunction.

Histidine biosynthesis plays a crucial role in metal homeostasis and virulence of *Aspergillus fumigatus*.

Cinnamaldehyde is an effective anti-inflammatory agent for treatment of allergic rhinitis in a rat model.

SIRT1 exerts protective effects against paraquat-induced injury in mouse type II alveolar epithelial cells by deacetylating NRF2 in vitro.

HIF-1 α regulates EMT via the Snail and β -catenin pathways in paraquat poisoning-induced early pulmonary fibrosis.

3-Aminotriazole protects from CoCl₂-induced ototoxicity by inhibiting the generation of reactive oxygen species and proinflammatory cytokines in mice.

Perfluorocarbon attenuates inflammatory cytokines, oxidative stress and histopathologic changes in paraquat-induced acute lung injury in rats.

Diet-induced and mono-genetic obesity alter volatile organic compound signature in mice.

Resveratrol protects mice from paraquat-induced lung injury: The important role of SIRT1 and NRF2 antioxidant pathways.

Cinnamomum verum Component 2-Methoxycinnamaldehyde: A Novel Anticancer Agent with Both Anti-Topoisomerase I and II Activities in Human Lung Adenocarcinoma A549 Cells In Vitro and In Vivo.

Lysyl oxidase promotes epithelial-to-mesenchymal transition during paraquat-induced pulmonary fibrosis.

Protective Effect of Astragaloside IV Against Paraquat-Induced Lung Injury in Mice by Suppressing Rho Signaling.

Polymeric micellar nanoplateforms for Fenton reaction as a new class of antibacterial agents.

Discovery of a novel anticancer agent with both anti-topoisomerase I and II activities in hepatocellular carcinoma SK-Hep-1 cells in vitro and in vivo: Cinnamomum verum component 2-methoxycinnamaldehyde.

[The effect of resveratrol on paraquat-induced acute lung injury in mice and its mechanism].

Comparative cytotoxicity of fourteen trivalent and pentavalent arsenic species determined using real-time cell sensing.

Acrolein and thiol-reactive electrophiles suppress allergen-induced innate airway epithelial responses by inhibition of DUOX1 and EGFR.

2-Phenethyl Isothiocyanate, Glutathione S-transferase M1 and T1 Polymorphisms, and Detoxification of Volatile Organic Carcinogens and Toxicants in Tobacco Smoke.

Overexpression of human SOD1 in VDAC1-less yeast restores mitochondrial functionality modulating beta-barrel outer membrane protein genes.

Knockdown of Drosophila hemoglobin suggests a role in O₂ homeostasis.

Both foliar and residual applications of herbicides that inhibit amino acid biosynthesis induce alternative respiration and aerobic fermentation in pea roots.

Effects of Bleaching by Nitrogen Deficiency on the Quantum Yield of Photosystem II in *Synechocystis* sp. PCC 6803 Revealed by Chl Fluorescence Measurements.

Cytoprotective Effect of Makgeolli Lees on Paraquat Induced Oxidative Stress in A549 Cells via Activation of NRF2 and Antioxidant Genes.

Neuropathic organophosphates: from Scruham, Heim and Lorot to Jake leg paralysis.

Downregulation of Forkhead box F1 gene expression in the pulmonary vasculature of nitrofen-induced congenital diaphragmatic hernia.

p-Cresyl sulfate affects the oxidative burst, phagocytosis process, and antigen presentation of monocyte-derived macrophages.

Lipocalin 2 as a new biomarker for fetal lung hypoplasia in congenital diaphragmatic hernia.

Methyl Iodide Exposure Presenting as Severe Chemical Burn Injury with Neurological Complications and Prolonged Respiratory Insufficiency.

Clinically relevant timing of antenatal sildenafil treatment reduces pulmonary vascular remodeling in congenital diaphragmatic hernia.

Improved pulmonary function in the nitrofen model of congenital diaphragmatic hernia following prenatal maternal dexamethasone and/or sildenafil.

Antenatal Saireito (TJ-114) Can Improve Pulmonary Hypoplasia and Pulmonary Vascular Remodeling in Nitrofen-Induced Congenital Diaphragmatic Hernia.

Chronic Arsenic Exposure-Induced Oxidative Stress is Mediated by Decreased Mitochondrial Biogenesis in Rat Liver.

Enhanced Pulmonary Vascular and Alveolar Development via Prenatal Administration of a Slow-Release Synthetic Prostacyclin Agonist in Rat Fetal Lung Hypoplasia.

Tyrosine Phosphorylation of Focal Adhesion Anchoring Proteins Enhances Human Pancreatic Cancer Cell Invasion.

Previously Unclassified Mutation of mtDNA m.3472T>C: Evidence of Pathogenicity in Leber's Hereditary Optic Neuropathy.

[Acute poisoning by pesticides in children].

Oxygen consumption deficit in Huntington disease mouse brain under metabolic stress.

Arsenite and Cadmium Activate MAPK/ERK via Membrane Estrogen Receptors and G-Protein Coupled Estrogen Receptor Signaling in Human Lung Adenocarcinoma Cells.

Decreased expression of miR-33 in fetal lungs of nitrofen-induced congenital diaphragmatic hernia rat model.

Tracheal occlusion and ventilation changes the nitric oxide pathway in congenital diaphragmatic hernia model.

Inhalation Exposure to Dioxins and dl-PCBs Depending on the Season in Upper Silesia, Poland: A Pilot Study.

Detection of Melanoma Cancer Biomarker Dimethyl Disulfide Using Cavity Ringdown Spectroscopy at 266â€%nm.

Decreased expression of monocarboxylate transporter 1 and 4 in the branching airway epithelium of nitrofen-induced congenital diaphragmatic hernia.

Combined antenatal therapy with retinoic acid and tracheal occlusion in a rat model of congenital diaphragmatic hernia.

Definite hereditary hemorrhagic telangiectasia in a 60-year-old black Kenyan woman: a case report.

[Clinical value of serum presepsin (SCD14-ST) concentration measurement in patients with pesticide poisoning].

[Role of nuclear factor E2 related factor 2 signaling pathway in malignant transformation induced by sodium arsenite].

Increased c-kit and stem cell factor expression in the pulmonary vasculature of nitrofen-induced congenital diaphragmatic hernia.

The transcriptome of nitrofen-induced pulmonary hypoplasia in the rat model of congenital diaphragmatic hernia.

Public health and international drug policy.

Effective Valsalva maneuvering during TCCD and unrevealed etiology of RLS.

Antenatal retinoic acid administration increases trophoblastic retinol-binding protein dependent retinol transport in the nitrofen model of congenital diaphragmatic hernia.

TCDD-Induced Activation of Aryl Hydrocarbon Receptor Inhibits Th17 Polarization and Regulates Non-Eosinophilic Airway Inflammation in Asthma.

[Effects of Tetrandrine Prenatal Intervention on Alveolar Epithelial Cells Type I Differentiation in Rat Model of Nitrofen-induced Congenital Diaphragmatic Hernia].

Effects of in Utero Exposure to Arsenic during the Second Half of Gestation on Reproductive End Points and Metabolic Parameters in Female CD-1 Mice.

Upregulation of S1P1 and Rac1 receptors in the pulmonary vasculature of nitrofen-induced congenital diaphragmatic hernia.

The Role of Activin Receptor-Like Kinase 1 Signaling in the Pulmonary Vasculature of Experimental Diaphragmatic Hernia.

Possible role of increased oxidative stress in pulmonary hypertension in experimental diaphragmatic hernia.

Prenatal exposure to persistent organic pollutants and offspring allergic sensitization and lung function at 20 years of age.

Synthesis of novel ethyl 1-ethyl-6-fluoro-7-(fatty amido)-1,4-dihydro-4-oxoquinoline-3-carboxylate derivatives and their biological evaluation.

Mass Spectrometric Approaches to the Identification of Potential Ingredients in Cigarette Smoke Causing Cytotoxicity.

Initial Serum Ammonia as a Predictor of Neurologic Complications in Patients with Acute Glufosinate Poisoning.

Oxidative stress-related liver dysfunction by sodium arsenite: Alleviation by Pistacia lentiscus oil.

Epigenetic Regulation of Interleukin 6 by Histone Acetylation in Macrophages and Its Role in Paraquat-Induced Pulmonary Fibrosis.

Riluzole But Not Melatonin Ameliorates Acute Motor Neuron Degeneration and Moderately Inhibits SOD1-Mediated Excitotoxicity Induced Disrupted Mitochondrial Ca²⁺ Signaling in Amyotrophic Lateral Sclerosis.

[Study on Identification of PBDEs and Characteristic Information Extraction of Biological Toxicity Based on Infrared Spectrum Partition].

Autism genes are selectively targeted by environmental pollutants including pesticides, heavy metals, bisphenol A, phthalates and many others in food, cosmetics or household products.

Dialysis catheter-related pulmonary embolism in a patient with paraquat intoxication.

Tumor necrosis factor receptor-associated protein 1 improves hypoxia-impaired energy production in cardiomyocytes through increasing activity of cytochrome c oxidase subunit II.

Formyl peptide receptor modulators: a patent review and potential applications for inflammatory diseases (2012-2015).

[Recent advance of cytokines in the pathogenesis of lung injury induced by paraquat poisoning].

[Effect of rhubarb as the main composition of sequential treatment in patients with acute paraquat poisoning: a prospective clinical research].

Diuron in water: functional toxicity and intracellular detoxification patterns of active concentrations assayed in tandem by a yeast-based probe.

The volume ratio of ground glass opacity in early lung CT predicts mortality in acute paraquat poisoning.

Proposal for novel metabolic pathway of highly toxic dimethylated arsenics accompanied by enzymatic sulfuration, desulfuration and oxidation.

Increased toll-like receptor 9 expression is associated with the severity of paraquat-induced lung injury in mice.

Paraquat induces epithelial-mesenchymal transition-like cellular response resulting in fibrogenesis and the prevention of apoptosis in human pulmonary epithelial cells.

Effects of noninvasive positive pressure ventilation on oxygenation status and prognosis in patients with acute paraquat-induced lung injury.

PSTK is a novel gene associated with early lung injury in Paraquat Poisoning.

Influenza A infection attenuates relaxation responses of mouse tracheal smooth muscle evoked by acrolein.

Effects of different tidal volume ventilation on paraquat-induced acute lung injury in piglets.

APACHE score, Severity Index of Paraquat Poisoning, and serum lactic acid concentration in the prognosis of paraquat poisoning of Chinese Patients.

Molecular mechanisms of acrolein toxicity: relevance to human disease.

Early haemoperfusion with continuous venovenous haemofiltration improves survival of acute paraquat-poisoned patients.

NLRP3 inflammasome activation is essential for paraquat-induced acute lung injury.

Extracellular signal-regulated kinase pathway play distinct role in acetochlor-mediated toxicity and intrinsic apoptosis in A549 cells.

The relation between oxidative stress, inflammation, and neopterin in the paraquat-induced lung toxicity.

Hepatoprotective effect of *Matricaria chamomilla*.L in paraquat induced rat liver injury.

Artesunate Attenuates Lung Injury in Paraquat-Intoxicated Rats via Downregulation of Inflammatory Cytokines.

Acute effects of acrolein in human volunteers during controlled exposure.

Use of In Vivo and In Vitro Data to Derive a Chronic Reference Value for Crotonaldehyde Based on Relative Potency to Acrolein.

Superantigen staphylococcal enterotoxin C1 mutant can reduce paraquat pulmonary fibrosis.

Toxicity assessment of 2,4-D and MCPA herbicides in primary culture of fish hepatic cells.

[The research progress of paraquat poisoning lung molecular mechanism].

[Observation on the best dose of methylprednisolone improving lung injury in swine with paraquat intoxication].

Enhancement of the acrolein-induced production of reactive oxygen species and lung injury by GADD34.

DNase1 protects against Paraquat-induced acute lung injury and pulmonary fibrosis mediated by mitochondrial DNA.

Cellular RNA is chemically modified by exposure to air pollution mixtures.

Acrolein inhalation alters arterial blood gases and triggers carotid body-mediated cardiovascular responses in hypertensive rats.

Effects of rapamycin against paraquat-induced pulmonary fibrosis in mice.

The mechanism of rapamycin in the intervention of paraquat-induced acute lung injury in rats.

Mifepristone-inducible recombinant adenovirus attenuates paraquat-induced lung injury in rats.

Superoxide produced in the matrix of mitochondria enhances methylmercury toxicity in human neuroblastoma cells.

[Expression of the pulmonary surfactant in rat with paraquat-induced acute lung injury].

Cinnamaldehyde attenuates pressure overload-induced cardiac hypertrophy.

Lung inflammation biomarkers and lung function in children chronically exposed to arsenic.

Long-lasting facilitation of respiratory rhythm by treatment with TRPA1 agonist, cinnamaldehyde.

Rapamycin reverses paraquat-induced acute lung injury in a rat model through inhibition of NF- κ B activation.

[Therapeutic effects of gastric lavage with fuller earth combined with Qingyill catharsis in treatment of oral paraquat poisoning in rabbits].

Elevated levels of mercapturic acids of acrolein and crotonaldehyde in the urine of Chinese women in Singapore who regularly cook at home.

Coniferyl aldehyde reduces radiation damage through increased protein stability of heat shock transcriptional factor 1 by phosphorylation.

Natural antioxidant betanin protects rats from paraquat-induced acute lung injury interstitial pneumonia.

The distribution in tissues and urine of arsenic metabolites after subchronic exposure to dimethylarsinic acid (DMAV) in rats.

Menthol attenuates respiratory irritation and elevates blood cotinine in cigarette smoke exposed mice.

Activation of auxin signalling counteracts photorespiratory H₂O₂-dependent cell death.

Cinnamaldehyde derivative (CB-PIC) sensitizes chemo-resistant cancer cells to drug-induced apoptosis via suppression of MDR1 and its upstream STAT3 and AKT signalling.

Aryl Hydrocarbon Receptor Protects Lungs from Cockroach Allergen-Induced Inflammation by Modulating Mesenchymal Stem Cells.

Identification of *Scenedosporium boydii* catalase A1 gene, a reactive oxygen species detoxification factor highly expressed in response to oxidative stress and phagocytic cells.

Continuous activation of Nrf2 and its target antioxidant enzymes leads to arsenite-induced malignant transformation of human bronchial epithelial cells.

The aryl hydrocarbon receptor suppresses cigarette-smoke-induced oxidative stress in association with dioxin response element (DRE)-independent regulation of sulfiredoxin 1.

Paraoxonase 1 and cytochrome P450 polymorphisms in susceptibility to acute organophosphorus poisoning in Egyptians.

Aryl hydrocarbon receptor agonists upregulate VEGF secretion from bronchial epithelial cells.

Epigenetic mechanisms underlying arsenic-associated lung carcinogenesis.

Maternal occupational pesticide exposure and risk of congenital heart defects in the National Birth Defects Prevention Study.

2,3,5-Trimethoxy-4-cresol, an anti-metastatic constituent from the solid-state cultured mycelium of *Antrodia cinnamomea* and its mechanism.

Activation of the Prostaglandin E2 receptor EP2 prevents house dust mite-induced airway hyperresponsiveness and inflammation by restraining mast cells' activity.

Human bronchial epithelial BEAS-2B cells, an appropriate in vitro model to study heavy metals induced carcinogenesis.

A Curcumin Derivative That Inhibits Vinyl Carbamate-Induced Lung Carcinogenesis via Activation of the Nrf2 Protective Response.

Increased pulmonary RhoA expression in the nitrofen-induced congenital diaphragmatic hernia rat model.

Persistent reduced oxygen requirement following blood transfusion during recovery from hemorrhagic shock.

Dioxin receptor regulates aldehyde dehydrogenase to block melanoma tumorigenesis and metastasis.

Neuroendocrine factors regulate retinoic acid receptors in normal and hypoplastic lung development.

Activation of the aryl hydrocarbon receptor during development enhances the pulmonary CD4+ T-cell response to viral infection.

Medical interventions to reverse pulmonary hypoplasia in the animal model of congenital diaphragmatic hernia: A systematic review.

Defective parasympathetic innervation is associated with airway branching abnormalities in experimental CDH.

Lower NPAS3 expression during the later stages of abnormal lung development in rat congenital diaphragmatic hernia.

Chronic inorganic arsenic exposure in vitro induces a cancer cell phenotype in human peripheral lung epithelial cells.

The Use of Chemical-Chemical Interaction and Chemical Structure to Identify New Candidate Chemicals Related to Lung Cancer.

Environmental immune disruptors, inflammation and cancer risk.

Kif7 expression is decreased in the diaphragmatic and pulmonary mesenchyme of nitrofen-induced congenital diaphragmatic hernia.

Increased expression of activated pSTAT3 and PIM-1 in the pulmonary vasculature of experimental congenital diaphragmatic hernia.

Involvement of iron depletion in palmitate-induced lipotoxicity of beta cells.

Novel Mitochondrial Cationic Uncoupler C4R1 Is an Effective Treatment for Combating Obesity in Mice.

Increased pulmonary vascular expression of receptor for advanced glycation end products (RAGE) in experimental congenital diaphragmatic hernia.

Ventilation causes pulmonary vascular dilation and modulates the NOS and VEGF pathway on newborn rats with CDH.

Increasing frequency of severe clinical toxicity after use of 2,4-dinitrophenol in the UK: a report from the National Poisons Information Service.

Quantitative analysis of volatile metabolites released in vitro by bacteria of the genus *Stenotrophomonas* for identification of breath biomarkers of respiratory infection in cystic fibrosis.

Prevention of pulmonary hypoplasia and pulmonary vascular remodeling by antenatal simvastatin treatment in nitrofen-induced congenital diaphragmatic hernia.

Chronic cardiovascular disease-associated gene network analysis in human umbilical vein endothelial cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Lysyl oxidase expression is decreased in the developing diaphragm and lungs of nitrofen-induced congenital diaphragmatic hernia.

Metabolic disturbances of the vitamin A pathway in human diaphragmatic hernia.

MicroRNA-21, up-regulated by arsenite, directs the epithelial-mesenchymal transition and enhances the invasive potential of transformed human bronchial epithelial cells by targeting PDCD4.

Prenatal Exposure to Sodium Arsenite Alters Placental Glucose 1, 3, and 4 Transporters in Balb/c Mice.

Decidual β -carotene-15,15'-oxygenase-1 and 2 (BCMO1,2) expression is increased in nitrofen model of congenital diaphragmatic hernia.

Effects of acute hypercapnia with and without acidosis on lung inflammation and apoptosis in experimental acute lung injury.

EPHECT III: Health risk assessment of exposure to household consumer products.

Monomethylarsonous Acid (MMAIII) Has an Adverse Effect on the Innate Immune Response of Human Bronchial Epithelial Cells to *Pseudomonas aeruginosa*.

Seahorse Xfe 24 Extracellular Flux Analyzer-Based Analysis of Cellular Respiration in *Caenorhabditis elegans*.

Simultaneous determination of phenoxyethanol and its major metabolite, phenoxyacetic acid, in rat biological matrices by LC-MS/MS with polarity switching: Application to ADME studies.

The role of thioredoxin reductase and glutathione reductase in plumbagin-induced, reactive oxygen species-mediated apoptosis in cancer cell lines.

Absorption of PCB126 by upper airways impairs G protein-coupled receptor-mediated immune response.

High accumulation of arsenic in the esophagus of mice after exposure to arsenite.

ELECTROCHEMICAL POTENTIAL OF THE INNER MITOCHONDRIAL MEMBRANE AND Ca^{2+} HOMEOSTASIS OF MYOMETRIUM CELLS.

Silymarin attenuates paraquat-induced lung injury via Nrf2-mediated pathway *in vivo* and *in vitro*.

Reproduction of the Medicinal Plant *Pelargonium sidoides* via Somatic Embryogenesis.

The deleterious metabolic and genotoxic effects of the bacterial metabolite p-cresol on colonic epithelial cells.

Protective effects of thalidomide on pulmonary injuries in a rat model of paraquat intoxication.

Endothelial disruptive proinflammatory effects of nicotine and e-cigarette vapor exposures.

Comparative Risks of Aldehyde Constituents in Cigarette Smoke Using Transient Computational Fluid Dynamics/Physiologically Based Pharmacokinetic Models of the Rat and Human Respiratory Tracts.

Pharmacokinetic and Genomic Effects of Arsenite in Drinking Water on Mouse Lung in a 30-Day Exposure.

Mitochondrial Morphology and Fundamental Parameters of the Mitochondrial Respiratory Chain Are Altered in *Caenorhabditis elegans* Strains Deficient in Mitochondrial Dynamics and Homeostasis Processes.

AhR-dependent secretion of PDGF-BB by human classically activated macrophages exposed to DEP extracts stimulates lung fibroblast proliferation.

Clinical features and prognosis of paraquat poisoning: a review of 41 cases.

The Protective Effect of Sodium Ferulate and Oxymatrine Combination on Paraquat-induced Lung Injury.

Regulation of CYP1A1 and Inflammatory Cytokine by NCOA7 Isoform 4 in Response to Dioxin Induced Airway Inflammation.

Human inhalation exposures to toluene, ethylbenzene, and m-xylene and physiologically based pharmacokinetic modeling of exposure biomarkers in exhaled air, blood, and urine.

Regulation of human hepatic drug transporter activity and expression by diesel exhaust particle extract.

[Gender-dependent expression of ER α in arsenic exposed mice offspring's lung tissue].

Ulinastatin suppresses endoplasmic reticulum stress and apoptosis in the hippocampus of rats with acute paraquat poisoning.

Abscisic acid (ABA) regulates grape bud dormancy, and dormancy release stimuli may act through modification of ABA metabolism.

Paraquat Poisoning: Analysis of an Uncommon Cause of Fatal Poisoning from Manipal, South India.

Modulation of aryl hydrocarbon receptor regulated genes by acute administration of trimethylarsine oxide in the lung, kidney and heart of C57BL/6 mice.

Oxidative stress in COPD: molecular background and clinical monitoring.

Adiponectin protects against paraquat-induced lung injury by attenuating oxidative/nitrative stress.

Protective effect of Xuebijing injection on paraquat-induced pulmonary injury via down-regulating the expression of p38 MAPK in rats.

Salidroside alleviates paraquat-induced rat acute lung injury by repressing TGF- β 1 expression.

Acute systemic accumulation of acrolein in mice by inhalation at a concentration similar to that in cigarette smoke.

Continuous renal replacement therapy circuit failure after antidote administration.

The role of p38 MAPK in acute paraquat-induced lung injury in rats.

Ozone therapy ameliorates paraquat-induced lung injury in rats.

Therapeutical effects and mechanism of salubrinal combined with ulinastatin on treating paraquat poisoning.

Paraquat increases connective tissue growth factor expression and impairs lung fibroblast proliferation and viscoelasticity.

Psychiatric comorbidity and its impact on mortality in patients who attempted suicide by paraquat poisoning during 2000-2010.

Glyphosate-rich air samples induce IL-33, TSLP and generate IL-13 dependent airway inflammation.

[Progress on pathogenesis and treatment of paraquat-induced pulmonary fibrosis].

[Progress in the mechanism of cytokine on lung injury caused by acute paraquat poisoning].

[Effect of thalidomide in a mouse model of paraquat-induced acute lung injury and the underlying mechanisms].

Diagnostic and therapeutic approach for acute paraquat intoxication.

Tissue sensitivity of the rat upper and lower extrapulmonary airways to the inhaled electrophilic air pollutants diacetyl and acrolein.

Metallothioneins attenuate paraquat-induced acute lung injury in mice through the mechanisms of anti-oxidation and anti-apoptosis.

Exchange transfusion can be life-saving in severe propanil poisoning: a case report.

Acrolein induced both pulmonary inflammation and the death of lung epithelial cells.

Biochemical effects of glyphosate based herbicide, Excel Mera 71 on enzyme activities of acetylcholinesterase (AChE), lipid peroxidation (LPO), catalase (CAT), glutathione-S-transferase (GST) and protein content on teleostean fishes.

Acrolein-exposed normal human lung fibroblasts in vitro: cellular senescence, enhanced telomere erosion, and degradation of Werner's syndrome protein.

Glucocorticoid with cyclophosphamide for paraquat-induced lung fibrosis.

Agent Orange exposure and disease prevalence in Korean Vietnam veterans: the Korean veterans health study.

FTY720 attenuates paraquat-induced lung injury in mice.

Toxicity of the herbicide linuron as assessed by bacterial and mitochondrial model systems.

Acrolein induction of oxidative stress and degranulation in mast cells.

Esophageal perforation and death following glyphosate poisoning.

Clinical characteristics of paraquat poisoning in 22 Chinese children.

[Total flavonoids from *Astragalus complanatus* attenuates lung injury following paraquat poisoning in rats through inhibiting excessive endoplasmic reticulum stress and c-Jun N-terminal kinase pathway].

Methylene blue protects against paraquat-induced acute lung injury in rats.

New insights into antioxidant strategies against paraquat toxicity.

Responses of soil microbial community to different concentration of fomesafen.

Acrolein and asthma attack prevalence in a representative sample of the United States adult population 2000-2009.

Airborne acrolein induces keratin-8 (Ser-73) hyperphosphorylation and intermediate filament ubiquitination in bronchiolar lung cell monolayers.

[Prognosis value of urine paraquat semi-quantitative in the patients with acute paraquat poisoning].

Vocal fold ion transport and mucin expression following acrolein exposure.

Naringenin exerts cytoprotective effect against paraquat-induced toxicity in human bronchial epithelial BEAS-2B cells through NRF2 activation.

Exacerbation of symptoms in agricultural pesticide applicators with asthma.

Adaptation to acrolein through upregulating the protection by glutathione in human bronchial epithelial cells: the materialization of the hormesis concept.

Effect of transforming growth factor- β 1 on acute lung injury caused by paraquat.

Molecular mechanisms of paraquat-induced acute lung injury: a current review.

Systems biology approach for evaluating the biological impact of environmental toxicants in vitro.

[Protective effect of ghrelin against paraquat-induced acute lung injury in mice].

In vitro biological activity of decoction of Joshanda.

Identification of toxicants in cinnamon-flavored electronic cigarette refill fluids.

A single exposure to acrolein desensitizes baroreflex responsiveness and increases cardiac arrhythmias in normotensive and hypertensive rats.

Evaluation of exhaled nitric oxide in acute paraquat poisoning: a pilot study.

[Protective effect and mechanisms of pituitrin on acute paraquat-induced lung injury in rats].

Addition of immunosuppressive treatment to hemoperfusion is associated with improved survival after paraquat poisoning: a nationwide study.

Cytoprotective effect of kaempferol on paraquat-exposed BEAS-2B cells via modulating expression of MUC5AC.

CB2 receptor activation ameliorates the proinflammatory activity in acute lung injury induced by paraquat.

Therapeutic effect of magnesium isoglycyrrhizinate in rats on lung injury induced by paraquat poisoning.

[Curcumin reduces paraquat-induced oxidative injury in A549 cells by activation of the Nrf2-ARE pathway].

Hemodialysis clearance of glyphosate following a life-threatening ingestion of glyphosate-surfactant herbicide.

Characterization of intracellular inclusions in the urothelium of mice exposed to inorganic arsenic.

Agent Orange exposure and risk of death in Korean Vietnam veterans: Korean Veterans Health Study.

Protective effects of intranasal curcumin on paraquat induced acute lung injury (ALI) in mice.

Atorvastatin attenuates the paraquat-induced pulmonary inflammation via PPAR γ receptors: a new indication for atorvastatin.

Statil suppresses cancer cell growth and proliferation by the inhibition of tumor marker AKR1B10.

Imbalance of caveolin-1 and eNOS expression in the pulmonary vasculature of experimental diaphragmatic hernia.

Effect of lung fibrosis on glycogen content in different extrapulmonary tissues.

Metabolism of propylisulfuron: ¹⁴C excretion, ¹⁴C concentration in plasma and tissues, and amount of metabolites in rats.

[The effect of selective phosphatase inhibitors Salubrinal on autophagy and apoptosis in the lung tissue of rats with acute paraquat poisoning].

Acrolein relaxes mouse isolated tracheal smooth muscle via a TRPA1-dependent mechanism.

Acrolein activates cell survival and apoptotic death responses involving the endoplasmic reticulum in A549 lung cells.

The dormancy-breaking stimuli "chilling, hypoxia and cyanamide exposure" up-regulate the expression of α -amylase genes in grapevine buds.

Health effects and arsenic species in urine of copper smelter workers.

Prenatal administration of neuropeptide bombesin promotes lung development in a rat model of nitrofen-induced congenital diaphragmatic hernia.

Prenatal administration of all-trans retinoic acid upregulates leptin signaling in hypoplastic rat lungs with experimental congenital diaphragmatic hernia.

Increased pulmonary vascular expression of Kr μ ppel-like factor 5 and activated survivin in experimental congenital diaphragmatic hernia.

Cognitive impairment associated with low ferritin responsive to iron supplementation.

Antenatal use of bosentan and/or sildenafil attenuates pulmonary features in rats with congenital diaphragmatic hernia.

Effects of developmental activation of the AhR on CD4+ T-cell responses to influenza virus infection in adult mice.

Effect of mitochondrial metabolism-interfering agents on cancer cell mitochondrial function and radio/chemosensitivity.

Epimorphin expression in a rat model of pulmonary hypoplasia associated with congenital diaphragmatic hernia.

Evidence for decreased lipofibroblast expression in hypoplastic rat lungs with congenital diaphragmatic hernia.

Nitrofen increases total retinol levels in placenta during lung morphogenesis in the nitrofen model of congenital diaphragmatic hernia.

Monitoring chlorinated persistent organic pollutants in adolescents in Flanders (Belgium): concentrations, trends and dose-effect relationships (FLEHS II).

Therapeutic potential of mesenchymal stem cell transplantation in a nitrofen-induced congenital diaphragmatic hernia rat model.

Mitochondrial reactive oxygen species production and respiratory complex activity in rats with pressure overload-induced heart failure.

Doppler parameters of fetal lung hypoplasia and impact of sildenafil.

The importance of heart murmur in the neonatal period and justification of echocardiographic review.

The involvement of the Mid1/Cch1/Yvc1 calcium channels in *Aspergillus fumigatus* virulence.

Lung tumors in mice induced by "whole-life" inorganic arsenic exposure at human-relevant doses.

Clinical and etiological heterogeneity in patients with tracheo-esophageal malformations and associated anomalies.

The aryl hydrocarbon receptor ligand omeprazole inhibits breast cancer cell invasion and metastasis.

Amphiphilic block copolymers bearing six-membered ortho ester ring in side chains as potential drug carriers: synthesis, characterization, and in vivo toxicity evaluation.

Postnatal development of eupneic ventilation and metabolism in rats chronically exposed to moderate hyperoxia.

TCDD promotes lung tumors via attenuation of apoptosis through activation of the Akt and ERK1/2 signaling pathways.

Prenatal retinoic acid increases lipofibroblast expression in hypoplastic rat lungs with experimental congenital diaphragmatic hernia.

Upregulation of serotonin-receptor-2a and serotonin transporter expression in the pulmonary vasculature of nitrofen-induced congenital diaphragmatic hernia.

Increased uptake of dietary retinoids at the maternal-fetal barrier in the nitrofen model of congenital diaphragmatic hernia.

Amniotic fluid derived mesenchymal stromal cells augment fetal lung growth in a nitrofen explant model.

Relationship between urine dichlorophenol levels and asthma morbidity.

Aryl hydrocarbon receptor (AhR) agonists increase airway epithelial matrix metalloproteinase activity.

Standardization of pulmonary ventilation technique using volume-controlled ventilators in rats with congenital diaphragmatic hernia.

Iron supplementation does not worsen respiratory health or alter the sputum microbiome in cystic fibrosis.

Ulceration of the oral mucosa following direct contact with ferrous sulfate in elderly patients: a case report and a review of the French National Pharmacovigilance Database.

Downregulation of p300 gene expression in airway mesenchyme of nitrofen-induced hypoplastic lungs.

The regulation of 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone-induced lung tumor promotion by estradiol in female A/J mice.

Expression of Eya1 and Six1 is decreased in distal airways of rats with experimental pulmonary hypoplasia.

VEGF receptor expression decreases during lung development in congenital diaphragmatic hernia induced by nitrofen.

Disruption of THY-1 signaling in alveolar lipofibroblasts in experimentally induced congenital diaphragmatic hernia.

Decreased apelin and apelin-receptor expression in the pulmonary vasculature of nitrofen-induced congenital diaphragmatic hernia.

Prenatal administration of retinoic acid increases the trophoblastic insulin-like growth factor 2 protein expression in the nitrofen model of congenital diaphragmatic hernia.

Pulmonary FGF9 gene expression is downregulated during the pseudoglandular stage in nitrofen-induced hypoplastic lungs.

Accidental exposure to polychlorinated biphenyls (PCB) in waste cargo after heavy seas. Global waste transport as a source of PCB exposure.

Chronic exposure to chlorophenol related compounds in the pesticide production workplace and lung cancer: a meta-analysis.

Sildenafil stimulates and dexamethasone inhibits pulmonary vascular development in congenital diaphragmatic hernia rat lungs.

Aryl hydrocarbon receptor (AhR) modulates cockroach allergen-induced immune responses through active TGF β 1 release.

Bronchial stenosis following ferrous sulfate aspiration: Case report and review of the literature.

Effects of sivelestat treatment on acute lung injury in paraquat-intoxicated rats.

The toxic chemistry of methyl bromide.

Mutation spectra of Kras and Tp53 in urethral and lung neoplasms in B6C3F1 mice treated with 3,3',4,4'-tetrachloroazobenzene.

The preventive effect of atorvastatin on paraquat-induced pulmonary fibrosis in the rats.

Inhalable constituents of thirdhand tobacco smoke: chemical characterization and health impact considerations.

BMP4 and LGL1 are Down Regulated in an Ovine Model of Congenital Diaphragmatic Hernia.

Acute paraquat poisoning with sinus bradycardia: A case report.

Aryl hydrocarbon receptor-dependent regulation of miR-196a expression controls lung fibroblast apoptosis but not proliferation.

Toll-like receptor 4 implicated in acute lung injury induced by paraquat poisoning in mice.

Quantitative analysis of volatile organic compounds released and consumed by rat L6 skeletal muscle cells in vitro.

Differential susceptibility of human peripheral blood T cells to suppression by environmental levels of sodium arsenite and monomethylarsonous acid.

Glyphosate poisoning with acute pulmonary edema.

Effects of fullerene nanoparticles on acetamiprid induced cytotoxicity and genotoxicity in cultured human lung fibroblasts.

Critical role of cellular glutathione homeostasis for trivalent inorganic arsenite-induced oxidative damage in human bronchial epithelial cells.

Histological and histometrical study of the protective role of α -tocopherol against sodium arsenite toxicity in rat ovaries.

[The first stage of toxicology evaluation and analysis of 1502 pesticide samples].

Ameliorative effect of *Matricaria chamomilla* .L on paraquat: Induced oxidative damage in lung rats.

A case report of acute severe paraquat poisoning and long-term follow-up.

An aberrant leukotriene A4 hydrolase-proline-glycine-proline pathway in the pathogenesis of chronic obstructive pulmonary disease.

Children's exposure to secondhand and thirdhand smoke carcinogens and toxicants in homes of hookah smokers.

Effect of paraquat-induced oxidative stress on gene expression and aging of the filamentous ascomycete *Podospora anserina*.

Environmentally persistent free radicals inhibit cytochrome P450 activity in rat liver microsomes.

Demographics, clinical characteristics and management of herbicide poisoning in tertiary care hospital.

Mitochondrial targeting of cytochrome P450 (CYP) 1B1 and its role in polycyclic aromatic hydrocarbon-induced mitochondrial dysfunction.

Edaravone decreases paraquat toxicity in A549 cells and lung isolated mitochondria.

Next-generation airbags and the possibility of negative outcomes due to thoracic injury.

Plant extracts of the family Lauraceae: a potential resource for chemopreventive agents that activate the nuclear factor-erythroid 2-related factor 2/antioxidant response element pathway.

[Effect of synchronous perfusion of NaN₃ in changes in content of cholinergic neurotransmitter in medial prefrontal cortex and hippocampal extra-cellular fluid].

Adaptive response of *Amphibacillus xylanus* to normal aerobic and forced oxidative stress conditions.

Urinary metabolites of a polycyclic aromatic hydrocarbon and volatile organic compounds in relation to lung cancer development in lifelong never smokers in the Shanghai Cohort Study.

Republished study: long-term toxicity of a Roundup herbicide and a Roundup-tolerant genetically modified maize.

Effect of SP-A/B in lipoic acid on acute paraquat poisoning.

Inhaled environmental allergens and toxicants as determinants of the asthma phenotype.

Maternal concentrations of persistent organochlorine pollutants and the risk of asthma in offspring: results from a prospective cohort with 20 years of follow-up.

Isolation of a high malic and low acetic acid-producing sake yeast *Saccharomyces cerevisiae* strain screened from respiratory inhibitor 2,4-dinitrophenol (DNP)-resistant strains.

Predictors of acute respiratory distress syndrome in patients with paraquat intoxication.

Does drug-induced emphysema exist?

Oral lesions and pulmonary fibrosis after ingesting grapes.

Aldose reductase regulates acrolein-induced cytotoxicity in human small airway epithelial cells.

Quercetin reduces oxidative damage induced by paraquat via modulating expression of antioxidant genes in A549 cells.

Cancer incidence in Korean Vietnam veterans during 1992-2003: the Korean veterans health study.

Mechanisms involved in oxidative stress regulation.

Factors associated with severe effects following acute glufosinate poisoning.

Mechanisms of permanent loss of olfactory receptor neurons induced by the herbicide 2,6-dichlorobenzonitrile: effects on stem cells and noninvolvement of acute induction of the inflammatory cytokine IL-6.

Using bosentan to treat paraquat poisoning-induced acute lung injury in rats.

Effect of acrolein, a hazardous air pollutant in smoke, on human middle ear epithelial cells.

Inhibitory effects of rosiglitazone on paraquat-induced acute lung injury in rats.

Methylene blue protects against paraquat-induced acute lung injury in rats.

Proteomic analysis of rat cerebral cortex following subchronic acrolein toxicity.

Effect of methylsulfonylmethane on paraquat-induced acute lung and liver injury in mice.

Paraquat poisoning induces TNF- α -dependent iNOS/NO mediated hyporesponsiveness of the aorta to vasoconstrictors in rats.

Tissue concentration of paraquat on day 32 after intoxication and failed bridge to transplantation by extracorporeal membrane oxygenation therapy.

Agent Orange exposure and prevalence of self-reported diseases in Korean Vietnam veterans.

Effect of intravenous lipid emulsion in patients with acute glyphosate intoxication.

Photocatalytic degradation of the herbicide clomazone in natural water using TiO₂: kinetics, mechanism, and toxicity of degradation products.

Paraquat-induced convulsion and death: a report of five cases.

Protective effects of naringin against paraquat-induced acute lung injury and pulmonary fibrosis in mice.

Docosahexaenoic acid (DHA) ameliorates paraquat-induced pulmonary fibrosis in rats possibly through up-regulation of Smad 7 and SnoN.

Propanil-induced histopathological changes in the liver and kidney of mice.

[The relationship of endoplasmic reticulum stress with paraquat induced lung fibrosis in rats].

CT imaging as a prognostic indicator for patients with pulmonary injury from acute paraquat poisoning.

[Effects of pyrrolidine dithiocarbamate on expressions of α -smooth muscle actin, integrin α 5 and fibronectin in acute paraquat poisoned rats].

Paraquat poisoning in pediatric patients.

In vitro effects of aldehydes present in tobacco smoke on gene expression in human lung alveolar epithelial cells.

Hypoxia stress test reveals exaggerated cardiovascular effects in hypertensive rats after exposure to the air pollutant acrolein.

Sodium tauroursodeoxycholate prevents paraquat-induced cell death by suppressing endoplasmic reticulum stress responses in human lung epithelial A549 cells.

Determination of glyphosate and AMPA in blood and urine from humans: about 13 cases of acute intoxication.

In vitro toxicological characterisation of the S-containing arsenic metabolites thio-dimethylarsinic acid and dimethylarsinic glutathione.

[Effect of thalidomide in a mouse model of paraquat-induced acute lung injury and the underlying mechanisms].

Mutagenic/recombinogenic effects of four lipid peroxidation products in Drosophila.

Acrolein-induced activation of mitogen-activated protein kinase signaling is mediated by alkylation of thioredoxin reductase and thioredoxin 1.

Severe chlorate poisoning successfully treated with methylene blue.

Ratio of angiopoietin-2 to angiopoietin-1 predicts mortality in acute lung injury induced by paraquat.

Renal replacement therapy in acute poisonings--one center experience.

Cytoprotective effect of alpha-lipoic acid on paraquat-exposed human bronchial epithelial cells via activation of nuclear factor erythroid related factor-2 pathway.

[Intervention of pyrrolidine dithiocarbamate on expressions of connective tissue growth factor, type I collagen, and type III collagen in acute paraquat poisoned rats].

Acute kidney injury following Paraquat poisoning in India.

Docosahexaenoic acid (DHA) attenuated paraquat induced lung damage in mice.

Amelioration of paraquat-induced pulmonary injury by mesenchymal stem cells.

Effect of CpG methylation at different sequence context on acrolein- and BPDE-DNA binding and mutagenesis.

A nationwide evidence-based study of factors associated with hospitalisations due to unintentional poisoning and poisoning mortality in Taiwan.

The antidote effect of quinone oxidoreductase 2 inhibitor against paraquat-induced toxicity in vitro and in vivo.

Are the smoking-induced diseases an acquired form of cystic fibrosis?

Slow accumulation of mutations in Xpc^{-/-} mice upon induction of oxidative stress.

Cigarette smoke induces systemic defects in cystic fibrosis transmembrane conductance regulator function.

Antifibrotic effect of atorvastatin on paraquat-induced pulmonary fibrosis: role of PPAR γ receptors.

Metabolic shift in lung alveolar cell mitochondria following acrolein exposure.

Acrolein exposure suppresses antigen-induced pulmonary inflammation.

Anti-inflammatory effect of thalidomide in paraquat-induced pulmonary injury in mice.

Expression and significance of HIF-1 α in pulmonary fibrosis induced by paraquat.

Bronchoconstriction induced by increasing airway temperature in ovalbumin-sensitized rats: role of tachykinins.

The dose of cyclophosphamide for treating paraquat-induced rat lung injury.

Cyclophosphamide dose: how much is needed to win the war against paraquat poisoning?

Identification of aldo-keto reductases as NRF2-target marker genes in human cells.

2-Hydroxycinnamaldehyde inhibits the epithelial-mesenchymal transition in breast cancer cells.

The ultra-early protective effect of ulinastatin on rabbit acute lung injury induced by paraquat.

Combined treatment with bone marrow mesenchymal stem cells and methylprednisolone in paraquat-induced acute lung injury.

A cigarette component acrolein induces accelerated senescence in human diploid fibroblast IMR-90 cells.

[Distribution of arsenic species and its DNA damage in subchronic arsenite-exposed mice].

Can mitochondrial dysfunction be initiated by dissociative electron attachment to xenobiotics?

Impaired chemoreflex sensitivity during septic shock induced by cecal ligation and perforation.

Protein-bound uremic toxins stimulate crosstalk between leukocytes and vessel wall.

Mechanical ventilation causes pulmonary mitochondrial dysfunction and delayed alveolarization in neonatal mice.

Dioxin and estrogen signaling in lung adenocarcinoma cells with different aryl hydrocarbon receptor/estrogen receptor \pm phenotypes.

The dioxin receptor has tumor suppressor activity in melanoma growth and metastasis.

[Protective effects of exogenous reduced glutathione on sodium arsenite-induced genotoxicity and oxidative stress].

Spatiotemporal alterations in Sprouty-2 expression and tyrosine phosphorylation in nitrofen-induced pulmonary hypoplasia.

Expression of Sproutys and SPREDs is decreased during lung branching morphogenesis in nitrofen-induced pulmonary hypoplasia.

Pulmonary FGF-18 gene expression is downregulated during the canalicular-saccular stages in nitrofen-induced hypoplastic lungs.

Involvement of HIF-2 \pm -mediated inflammation in arsenite-induced transformation of human bronchial epithelial cells.

Effect of simultaneous supplementation of vitamin A and iron on diarrheal and respiratory tract infection in preschool children in Chengdu City, China.

Expression of zinc-deficient human superoxide dismutase in Drosophila neurons produces a locomotor defect linked to mitochondrial dysfunction.

Cytologic and histologic findings of iron pill-induced injury of the lower respiratory tract.

The mitochondrial dysfunction plays an important role in urethane-induced lung carcinogenesis.

Dual role of resveratrol in modulation of genotoxicity induced by sodium arsenite via oxidative stress and apoptosis.

Arsenic induced toxicity and histopathological changes in gill and liver tissue of freshwater fish, tilapia (*Oreochromis mossambicus*).

Mitochondrial respiratory chain dysfunction modulates metalloproteases -1, -3 and -13 in human normal chondrocytes in culture.

Downregulated bone morphogenetic protein signaling in nitrofen-induced congenital diaphragmatic hernia.

Disruption of the bone morphogenetic protein receptor 2 pathway in nitrofen-induced congenital diaphragmatic hernia.

Role of the Toll Like receptor (TLR) radical cycle in chronic inflammation: possible treatments targeting the TLR4 pathway.

Relationship between the autoantibody and expression of β -adrenoceptor in lung and heart.

[Effectiveness of iron amino acid chelate versus ferrous sulfate as part of a food complement in preschool children with iron deficiency, Medellín, 2011].

Aberrant pulmonary lymphatic development in the nitrofen mouse model of congenital diaphragmatic hernia.

[Effects of icariin on beta-amyloid and neurotrophic factors in brain of mitochondrial deficiency model rats].

The weeding of *Ambrosia artemisiifolia* and sanitary risks.

Action of hexachlorobenzene on tumor growth and metastasis in different experimental models.

Aryl hydrocarbon receptor and lung cancer.

Health risk assessment of occupational exposure to hazardous volatile organic compounds in swine gestation, farrowing and nursery barns.

Cases from NACCT acute and intensive care symposium: altered mental status, seizures, and rash in a fumigation company employee.

Amniotic lamellar body count and congenital diaphragmatic hernia in humans and in a rat model.

Uncoupling mitochondrial activity maintains body [Formula: see text] during hemorrhage-induced O₂ deficit in the anesthetized rat.

Exhaled breath and fecal volatile organic biomarkers of chronic kidney disease.

Genetic susceptibility to dioxin-like chemicals' induction of cytochrome P4501A2 in the human adult linked to specific AhRR polymorphism.

Urinary p-cresol in autism spectrum disorder.

Potential carcinogenic effects of world trade center dust after intratracheal instillation to Sprague-Dawley rats: first observation.

[Halitosis concomitant with chronic ENT pathology in children].

Bronchial stenosis after iron pill aspiration.

Increased activation of NADPH oxidase 4 in the pulmonary vasculature in experimental diaphragmatic hernia.

Decreased pulmonary c-Cbl expression and tyrosine phosphorylation in the nitrofen-induced rat model of congenital diaphragmatic hernia.

Increased trophoblastic apoptosis mediated by neutrophil gelatinase-associated lipocalin (NGAL) activation in the nitrofen model of congenital diaphragmatic hernia.

Amniotic fluid stem cells rescue both in vitro and in vivo growth, innervation, and motility in nitrofen-exposed hypoplastic rat lungs through paracrine effects.

Timing and expression of the angiopoietin-1-Tie-2 pathway in murine lung development and congenital diaphragmatic hernia.

Modulation of aryl hydrocarbon receptor-regulated genes by acute administration of ammonium metavanadate in kidney, lung and heart of C57BL/6 mice.

Surface fluorescence studies of tissue mitochondrial redox state in isolated perfused rat lungs.

Induction of apoptotic death and retardation of neuronal differentiation of human neural stem cells by sodium arsenite treatment.

Protective effects of pulmonary epithelial lining fluid on oxidative stress and DNA single-strand breaks caused by ultrafine carbon black, ferrous sulphate and organic extract of diesel exhaust particles.

The accumulations of HIF-1 α and HIF-2 α by JNK and ERK are involved in biphasic effects induced by different levels of arsenite in human bronchial epithelial cells.

Visible light alters yeast metabolic rhythms by inhibiting respiration.

Sodium arsenite and arsenic trioxide differently affect the oxidative stress, genotoxicity and apoptosis in A549 cells: an implication for the paradoxical mechanism.

A case of occupational asthma in a plastic injection process worker.

Novel Fluorometric Tool to Assess Mitochondrial Redox State of Isolated Perfused Rat Lungs after Exposure to Hyperoxia.

Paraquat poisoning: experience in hospital taiping (year 2008 - october 2011).

Paraquat Exposure Up-regulates Cyclooxygenase-2 in the Lungs, Liver and Kidneys in Rats.

Resveratrol stimulates mitochondrial bioenergetics to protect retinal pigment epithelial cells from oxidative damage.

Spectrum of corrosive esophageal injury after intentional paraquat or glyphosate-surfactant herbicide ingestion.

Study the catalyzing mechanism of dissolved redox mediators on bio-denitrification by metabolic inhibitors.

Sepiapterin reductase mediates chemical redox cycling in lung epithelial cells.

Paraquat - A deadly poison: Report of a case and review.

Critical role of aldehydes in cigarette smoke-induced acute airway inflammation.

Application of the electronic nose technique to differentiation between model mixtures with COPD markers.

The mitochondrial unfolded protein response activator ATFS-1 protects cells from inhibition of the mevalonate pathway.

Toxicity detection of sodium nitrite, borax and aluminum potassium sulfate using electrochemical method.

Pulmonary GLP-1 receptor increases at birth and exogenous GLP-1 receptor agonists augmented surfactant-protein levels in litters from normal and nitrofen-treated pregnant rats.

A novel colorimetric biosensor for monitoring and detecting acute toxicity in water.

Therapeutic effects of smecta or smectite powder on rats with paraquat toxication.

Binding interaction between (-)-epigallocatechin gallate causes impaired spreading of cancer cells on fibrinogen.

Ameliorative Effects of Acacia Honey against Sodium Arsenite-Induced Oxidative Stress in Some Viscera of Male Wistar Albino Rats.

Treatment of mice with 2,3,7,8-Tetrachlorodibenzo-p-dioxin markedly increases the levels of a number of cytochrome P450 metabolites of omega-3 polyunsaturated fatty acids in the liver and lung.

Cancer incidence in pulmonary vasculitis.

Changes in the expression of vascular endothelial growth factor after fetal tracheal occlusion in an experimental model of congenital diaphragmatic hernia.

Enhanced expression of cystine/glutamate transporter in the lung caused by the oxidative-stress-inducing agent paraquat.

Therapeutic potential of intravenous Xuebijing on transforming growth factor beta1 and procollagen type III peptide in patients with acute paraquat poisoning.

Paraquat-induced pulmonary fibrosis starts at an early stage of inflammation in rats.

Pesticide use, immunologic conditions, and risk of non-Hodgkin lymphoma in Canadian men in six provinces.

Cigarette smoke and its component acrolein augment IL-8/CXCL8 mRNA stability via p38 MAPK/MK2 signaling in human pulmonary cells.

[Effects of human umbilical cord mesenchymal stem cells in the treatment of paraquat-induced lung injury].

Long term toxicity of a Roundup herbicide and a Roundup-tolerant genetically modified maize.

Biochemical and histological evaluation of kidney damage after sub-acute exposure to 2,4-dichlorophenoxyacetic herbicide in rats: involvement of oxidative stress.

Chaperone heat shock protein 90 mobilization and hydralazine cytoprotection against acrolein-induced carbonyl stress.

Nrf2 protects against diquat-induced liver and lung injury.

Paraquat induces lung alveolar epithelial cell apoptosis via Nrf-2-regulated mitochondrial dysfunction and ER stress.

Spectrum of toxic hepatitis following intentional paraquat ingestion: analysis of 187 cases.

[Influence factors for prognosis in patients with acute oral poisoning with paraquat].

[Experimental study on the therapeutic effect of C-phycoyanin against pulmonary fibrosis induced by paraquat in rats].

[Optimal conditions of bone marrow mesenchymal stem cells on paraquat-induced acute lung injury in rats].

The time between paraquat ingestion and a negative dithionite urine test in an independent risk factor for death and organ failure in acute paraquat intoxication.

Effect of pirfenidone on pulmonary fibrosis due to paraquat poisoning in rats.

Antioxidant effects of selenium on lung injury in paraquat intoxicated rats.

Pathological and toxicological findings in glyphosate-surfactant herbicide fatality: a case report.

Antioxidant effect of silymarin on paraquat-induced human lung adenocarcinoma A549 cell line.

Comparison of TRPA1-versus TRPV1-mediated cough in guinea pigs.

Prior exposure to acrolein accelerates pulmonary inflammation in influenza A-infected mice.

The role of pentraxin-3 as a prognostic biomarker in paraquat poisoning.

Glucocorticoid with cyclophosphamide for paraquat-induced lung fibrosis.

Acrolein effects in pulmonary cells: relevance to chronic obstructive pulmonary disease.

Sensory irritation response in rats II: recovery and dose-dependence.

[Expression of the 4-hydroxynonenal in lung tissue in rats with paraquat poisoned and the effect of ulinastatin].

Acute human glufosinate-containing herbicide poisoning.

Bark extract of *Bathysa cuspidata* attenuates extra-pulmonary acute lung injury induced by paraquat and reduces mortality in rats.

Paraquat application and respiratory health effects among South Korean farmers.

[Study the effects of *Salvia miltiorrhiza* monomer IH764-3 on the expression of matrix metalloproteinase in lungs of rats exposed to Paraquat (PQ)].

Effects of RNA interference-induced Smad3 gene silencing on pulmonary fibrosis caused by paraquat in mice.

Successful treatment of patients with paraquat intoxication: three case reports and review of the literature.

[Paraquat poisoning. Case report and overview].

Overexpression of TFAM, NRF-1 and myr-AKT protects the MPP(+)-induced mitochondrial dysfunctions in neuronal cells.

[The relationship between HIF-1 α expression and the early lung fibrosis in rats with acute paraquat poisoning].

Differential gene expression responses distinguish contact and respiratory sensitizers and nonsensitizing irritants in the local lymph node assay.

Melatonin suppresses acrolein-induced IL-8 production in human pulmonary fibroblasts.

Renal, hepatic, pulmonary and adrenal tumors induced by prenatal inorganic arsenic followed by dimethylarsinic acid in adulthood in CD1 mice.

[Presentation of a case of Paraquat poisoning].

[Experimental anticoagulant therapy of acute lung injury induced by paraquat].

Effects of manganese and arsenic species on the level of energy related nucleotides in human cells.

Plasma dioxin levels and cause-specific mortality in an occupational cohort of workers exposed to chlorophenoxy herbicides, chlorophenols and contaminants.

Protective effect of methylprednisolone on paraquat-induced A549 cell cytotoxicity via induction of efflux transporter, P-glycoprotein expression.

Sequential organ failure assessment score can predict mortality in patients with paraquat intoxication.

Acrolein induces endoplasmic reticulum stress and causes airspace enlargement.

Developmental exposure to diuron causes splenotoxicity in male Sprague-Dawley rat pups.

Effect of chronic pesticide exposure in farm workers of a Mexico community.

A longer tracheal occlusion period results in increased lung growth in the nitrofen rat model.

The tobacco smoke component, acrolein, suppresses innate macrophage responses by direct alkylation of c-Jun N-terminal kinase.

Elevated neutrophil elastase and acrolein-protein adducts are associated with W256 regression.

Transient receptor potential channels mediate the tussive response to prostaglandin E2 and bradykinin.

[Effect of acrolein exposure on the percentage of CD4⁺CD25⁺ regulatory T cells and expression of transcription factor Foxp3 in asthmatic rats].

Resveratrol inhibits paraquat-induced oxidative stress and fibrogenic response by activating the nuclear factor erythroid 2-related factor 2 pathway.

Molecular characterization of the putative transcription factor SebA involved in virulence in *Aspergillus fumigatus*.

Quantification of paraquat in postmortem samples by gas chromatography-ion trap mass spectrometry and review of the literature.

2-methoxycinnamaldehyde from *Cinnamomum cassia* reduces rat myocardial ischemia and reperfusion injury in vivo due to HO-1 induction.

Mitochondrial ROS-K⁺ channel signaling pathway regulated secretion of human pulmonary artery endothelial cells.

[Effects of high temperature and hydrogen cyanamide on dormant nectarine's floral bud respiratory metabolism].

Comparative computational modeling of airflows and vapor dosimetry in the respiratory tracts of rat, monkey, and human.

Hypoxia and hydrogen cyanamide induce bud-break and up-regulate hypoxic responsive genes (HRG) and VvFT in grapevine-buds.

Effect of carcinogenic acrolein on DNA repair and mutagenic susceptibility.

A lung dosimetry model of vapor uptake and tissue disposition.

Disruption of alternative NAD(P)H dehydrogenases leads to decreased mitochondrial ROS in *Neurospora crassa*.

Thioredoxin reductase deficiency potentiates oxidative stress, mitochondrial dysfunction and cell death in dopaminergic cells.

Increased expression of SVCT2 in a new mouse model raises ascorbic acid in tissues and protects against paraquat-induced oxidative damage in lung.

Impairment of carbon metabolism induced by the herbicide glyphosate.

Mitochondrial function is involved in regulation of cholesterol efflux to apolipoprotein (apo)A-I from murine RAW 264.7 macrophages.

Autophagy is a cell self-protective mechanism against arsenic-induced cell transformation.

Repeated dose toxicity and relative potency of 1,2,3,4,6,7-hexachloronaphthalene (PCN 66) 1,2,3,5,6,7-hexachloronaphthalene (PCN 67) compared to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) for induction of CYP1A1, CYP1A2 and thymic atrophy in female Harlan Sprague-Dawley rats.

Reduction of Na⁺, K⁺-ATPase activity and expression in cerebral cortex of glutaryl-CoA dehydrogenase deficient mice: a possible mechanism for brain injury in glutaric aciduria type I.

Invited review: Efficacy, metabolism, and toxic responses to chlorate salts in food and laboratory animals.

Poly (lactide-co-glycolide) encapsulated extract of *Phytolacca decandra* demonstrates better intervention against induced lung adenocarcinoma in mice and on A549 cells.

Suicidal sodium azide intoxication: An analytical challenge based on a rare case.

Expression and purification of coronavirus envelope proteins using a modified \hat{I}^2 -barrel construct.

Mortality study of chemical workers exposed to dioxins: follow-up 23 years after chemical plant closure.

Relationship between respiration deficiency and azole resistance in clinical *Candida glabrata*.

Mechanistic exploration of AhR-mediated host protection against *Streptococcus pneumoniae* infection.

Optimization of a histopathological biomarker for sphingomyelin accumulation in acid sphingomyelinase deficiency.

FICZ, a tryptophan photoproduct, suppresses pulmonary eosinophilia and Th2-type cytokine production in a mouse model of ovalbumin-induced allergic asthma.

Mitochondrial inhibition in rat retinal cell cultures as a model of metabolic compromise: mechanisms of injury and neuroprotection.

Yusho: 43 years later.

Oxidative stress fuels *Trypanosoma cruzi* infection in mice.

Prenatal retinoic acid improves lung vascularization and VEGF expression in CDH rat.

Antenatal imatinib treatment reduces pulmonary vascular remodeling in a rat model of congenital diaphragmatic hernia.

Tumors and proliferative lesions in adult offspring after maternal exposure to methylarsonous acid during gestation in CD1 mice.

Novel method for simultaneous determination of p-cresylsulphate and p-cresylglucuronide: clinical data and pathophysiological implications.

Alterations of peroxisome proliferator-activated receptor \hat{I}^3 and monocyte chemoattractant protein 1 gene expression in the nitrofen-induced hypoplastic lung.

Pulmonary function reductions among potentially susceptible subgroups of agricultural workers in Colorado and Nebraska.

Treatment with endotracheal therapeutics after sarin microinstillation inhalation exposure increases blood cholinesterase levels in guinea pigs.

Aryl hydrocarbon receptor (AhR) regulates silica-induced inflammation but not fibrosis.

Local fetal lung renin-angiotensin system as a target to treat congenital diaphragmatic hernia.

Aldehyde dehydrogenases and cell proliferation.

Defective pulmonary innervation and autonomic imbalance in congenital diaphragmatic hernia.

Prenatal retinoic acid upregulates connexin 43 (Cx43) gene expression in pulmonary hypoplasia in the nitrofen-induced congenital diaphragmatic hernia rat model.

Nitrofen interferes with trophoblastic expression of retinol-binding protein and transthyretin during lung morphogenesis in the nitrofen-induced congenital diaphragmatic hernia model.

Upregulation of fibroblast growth factor receptor 2 and 3 in the late stages of fetal lung development in the nitrofen rat model.

Smad1 and WIF1 genes are downregulated during saccular stage of lung development in the nitrofen rat model.

Up-regulation of osteopontin expression by aryl hydrocarbon receptor via both ligand-dependent and ligand-independent pathways in lung cancer.

Evidence of a suffocation alarm system within the periaqueductal gray matter of the rat.

ANG-1 TIE-2 and BMPR signalling defects are not seen in the nitrofen model of pulmonary hypertension and congenital diaphragmatic hernia.

The pulmonary mesenchymal tissue layer is defective in an in vitro recombinant model of nitrofen-induced lung hypoplasia.

Aryl hydrocarbon receptor agonists induce microRNA-335 expression and inhibit lung metastasis of estrogen receptor negative breast cancer cells.

Akt activation is responsible for enhanced migratory and invasive behavior of arsenic-transformed human bronchial epithelial cells.

Retinoic acid rescues deficient airway innervation and peristalsis of hypoplastic rat lung explants.

Bronchoscopic and histological changes over time following acute ferrous sulphate tablet aspiration.

Ozone toxicity and walking response of populations of *Sitophilus zeamais* (Coleoptera: Curculionidae).

Permeation and metabolism of cocaine in the nasal mucosa.

Environmentally persistent free radicals decrease cardiac function and increase pulmonary artery pressure.

Simultaneous analysis of 28 urinary VOC metabolites using ultra high performance liquid chromatography coupled with electrospray ionization tandem mass spectrometry (UPLC-ESI/MSMS).

Anaerobic respiration using a complete oxidative TCA cycle drives multicellular swarming in *Proteus mirabilis*.

Poor air quality in classrooms related to asthma and rhinitis in primary schoolchildren of the French 6 Cities Study.

Effect of mercury on aryl hydrocarbon receptor-regulated genes in the extrahepatic tissues of C57BL/6 mice.

Differential modulation of aryl hydrocarbon receptor regulated enzymes by arsenite in the kidney, lung, and heart of C57BL/6 mice.

Osmosensitive changes of carbohydrate metabolism in response to cellulose biosynthesis inhibition.

Oxidant-induced cell death and Nrf2-dependent antioxidative response are controlled by Fra-1/AP-1.

Suppressive effects of *Schizandra chinensis* Baillon water extract on allergy-related cytokine generation and degranulation in IgE-antigen complex-stimulated RBL-2H3 cells.

Preliminary evaluation of the human relevance of respiratory tumors observed in rodents exposed to naphthalene.

Urinary levels of volatile organic carcinogen and toxicant biomarkers in relation to lung cancer development in smokers.

Comparing performance of three oscillating positive expiratory pressure devices at similar amplitude and frequencies of oscillations on displacement of mucus inside trachea during cough.

Acute inhalation study of allyl alcohol for derivation of acute exposure guideline levels.

Changes in expression of drug-metabolizing enzymes by single-walled carbon nanotubes in human respiratory tract cells.

Multidrug resistance protein (MRP) 4 attenuates benzo[a]pyrene-mediated DNA-adduct formation in human bronchoalveolar H358 cells.

A method to estimate the chronic health impact of air pollutants in U.S. residences.

Mast cells in the intestine and gills of the sea bream, *Sparus aurata*, exposed to a polychlorinated biphenyl, PCB 126.

Characterization of TCHQ-induced genotoxicity and mutagenesis using the pSP189 shuttle vector in mammalian cells.

The relationship between platelet endothelial cell adhesion molecule-1 and paraquat-induced lung injury in rabbits.

Prospective experimental studies on the renal protective effect of ulinastatin after paraquat poisoning.

Edaravone attenuates paraquat-induced lung injury by inhibiting oxidative stress in human type II alveolar epithelial cells.

Takotsubo cardiomyopathy as a delayed complication with a herbicide containing glufosinate ammonium in a suicide attempt: a case report.

Angiogenesis inhibitor vasohibin-1 enhances stress resistance of endothelial cells via induction of SOD2 and SIRT1.

Transient receptor potential ankyrin 1 channel localized to non-neuronal airway cells promotes non-neurogenic inflammation.

Role of the Arylhydrocarbon Receptor (AhR) in the Pathology of Asthma and COPD.

Functional analysis of colonic bacterial metabolism: relevant to health?

Identification of differentially expressed genes by 2,3,7,8-tetrachlorodibenzo-p-dioxin in human bronchial epithelial cells.

Surfactant volume is an essential element in human toxicity in acute glyphosate herbicide intoxication.

Menthol attenuates respiratory irritation responses to multiple cigarette smoke irritants.

Clinical outcome of acute intoxication due to ingestion of auxin-like herbicides.

2,4-Dichlorophenoxyacetic acid effects on nephrotoxicity in rats during late pregnancy and early postnatal periods.

Epidemiologic studies of glyphosate and non-cancer health outcomes: a review.

Medical management of paraquat ingestion.

Cigarette smoke targets glutaredoxin 1, increasing s-glutathionylation and epithelial cell death.

Proteomic profiling of acrolein adducts in human lung epithelial cells.

[Effects of hemoperfusion on plasma concentration and histopathological changes in paraquat poisoning rabbits].

[Pulmonary platelet endothelial cell adhesion molecule-1 (PECAM-1) in rabbits after acute paraquat (PQ) poisoning].

Paraquat induces behavioral changes and cortical and striatal mitochondrial dysfunction.

Protective effect of 4,4'-diaminodiphenylsulfone against paraquat-induced mouse lung injury.

Continuous hypoxia attenuates paraquat-induced cytotoxicity in the human A549 lung carcinoma cell line.

Cancer incidence of 2,4-D production workers.

Acrolein - a pulmonary hazard.

The protective effect of C-phycoerythrin on paraquat-induced acute lung injury in rats.

Integrative metabolome and transcriptome profiling reveals discordant energetic stress between mouse strains with differential sensitivity to acrolein-induced acute lung injury.

Acrolein induced DNA damage, mutagenicity and effect on DNA repair.

Lysine acetylsalicylate ameliorates lung injury in rats acutely exposed to paraquat.

[A case report of successful treatment of severe acute paraquat poisoning with pulmonary aspergillus infection].

[Clinical analysis of multiple organ dysfunction syndrome caused by acute paraquat poisoning].

Mitochondrial aconitase knockdown attenuates paraquat-induced dopaminergic cell death via decreased cellular metabolism and release of iron and H₂O₂.

Structure and epitope distribution of heparan sulfate is disrupted in experimental lung hypoplasia: a glyco-biological epigenetic cause for malformation?

Improved survival in severe paraquat poisoning with repeated pulse therapy of cyclophosphamide and steroids.

Role of growth factors in acute lung injury induced by paraquat in a rat model.

[Effect of ulinastatin on the expression of heat shock protein 70 and NF- κ B in lung tissue in rats with paraquat poisoned].

[Studying the therapeutic effects of hemoperfusion with continuous venovenous hemofiltration on the patients with acute paraquat poisoning].

Protection of bone marrow mesenchymal stem cells from acute lung injury induced by paraquat poisoning.

Mortality of US pentachlorophenol production workers through 2005.

Therapeutic hypothermia attenuates acute lung injury in paraquat intoxication in rats.

In vitro study of P-glycoprotein induction as an antidotal pathway to prevent cytotoxicity in Caco-2 cells.

[Clinical study of dynamic change of inflammatory factors in serum of acute paraquat rats].

[Prolonged convulsion after intoxication of alachlor herbicide (Lasso): a case report].

Effect of pulse therapy with glucocorticoid and cyclophosphamide in lung fibrosis due to paraquat poisoning in rats.

Protective effects of the aqueous extract of *Scutellaria baicalensis* against acrolein-induced oxidative stress in cultured human umbilical vein endothelial cells.

[The study of effects of pirfenidone on the pulmonary fibrosis induced by paraquat in mice].

Aseptic meningitis in association with glyphosate-surfactant herbicide poisoning.

Prostate cancer risk and exposure to pesticides in British Columbia farmers.

Analysis of acrolein-derived 1,N²-propanodeoxyguanosine adducts in human leukocyte DNA from smokers and nonsmokers.

Protective effect of ambroxol against paraquat-induced pulmonary fibrosis in rats.

[Expression of nuclear factor kappaB and tumor necrosis factor $\hat{\pm}$ in lung tissue of paraquat poisoned rats].

Edaravone, a novel antidote against lung injury and pulmonary fibrosis induced by paraquat?

Suicide victim of paraquat poisoning make suitable corneal donor.

The effects of catalase inhibition into the fourth cerebral ventricle on the Bezold-Jarisch reflex in spontaneously hypertensive rats.

Complement inhibition alleviates paraquat-induced acute lung injury.

Haplotype association mapping of acute lung injury in mice implicates activin a receptor, type 1.

Endothelial dysfunction and claudin 5 regulation during acrolein-induced lung injury.

Unbalanced MMP/TIMP-1 expression during the development of experimental pulmonary fibrosis with acute paraquat poisoning.

Consumption of hydrogen water reduces paraquat-induced acute lung injury in rats.

Acrolein sensitizes human renal cancer Caki cells to TRAIL-induced apoptosis via ROS-mediated up-regulation of death receptor-5 (DR5) and down-regulation of Bcl-2.

Catalase activity prevents exercise-induced up-regulation of vasoprotective proteins in venous tissue.

Perturbations of amino acid metabolism associated with glyphosate-dependent inhibition of shikimic acid metabolism affect cellular redox homeostasis and alter the abundance of proteins involved in photosynthesis and photorespiration.

Unraveling the role of fermentation in the mode of action of acetolactate synthase inhibitors by metabolic profiling.

Sensitivity of bronchopulmonary receptors to cold and heat mediated by transient receptor potential cation channel subtypes in an ex vivo rat lung preparation.

Proteomics of the oxidative stress response induced by hydrogen peroxide and paraquat reveals a novel AhpC-like protein in *Pseudomonas aeruginosa*.

A ternary mechanism for NADH oxidation by positively charged electron acceptors, catalyzed at the flavin site in respiratory complex I.

Cigarette smoke and $\hat{\pm}, \hat{1}^2$ -unsaturated aldehydes elicit VEGF release through the p38 MAPK pathway in human airway smooth muscle cells and lung fibroblasts.

Increased oxidative/nitrosative stress markers measured non-invasively in patients with high 2,3,7,8-tetrachloro-dibenzo-p-dioxin plasma level.

TRPA1 receptors mediate environmental irritant-induced meningeal vasodilatation.

Effects of oleanolic acid on pulmonary morphofunctional and biochemical variables in experimental acute lung injury.

17 β -estradiol protects the lung against acute injury: possible mediation by vasoactive intestinal polypeptide.

Activation of the aryl hydrocarbon receptor by TCDD inhibits mammary tumor metastasis in a syngeneic mouse model of breast cancer.

Mitochondrial respiratory complex I dysfunction promotes tumorigenesis through ROS alteration and AKT activation.

Effect of *Helicobacter pylori* infection on iron absorption in asymptomatic adults consuming wheat flour fortified with iron and zinc.

Molecular changes during arsenic-induced cell transformation.

Air pollution in autoimmune rheumatic diseases: a review.

Discovery of potent, selective, and orally bioavailable alkynylphenoxyacetic acid CRTH2 (DP2) receptor antagonists for the treatment of allergic inflammatory diseases.

Up-regulation of cyclin D1 by JNK1/c-Jun is involved in tumorigenesis of human embryo lung fibroblast cells induced by a low concentration of arsenite.

Heated indoor swimming pools, infants, and the pathogenesis of adolescent idiopathic scoliosis: a neurogenic hypothesis.

Arsenicals affect base excision repair by several mechanisms.

Synthesis and evaluation of novel carbon-11 labeled oxopurine analogues for positron emission tomography imaging of translocator protein (18 kDa) in peripheral organs.

The embryology of the diaphragm.

Surprises perilous: toxic health hazards for employees unloading fumigated shipping containers.

Interactive effect of arsenic and fluoride on cardio-respiratory disorders in male rats: possible role of reactive oxygen species.

Fulminant hepatic failure in woman with iron and non-steroidal anti-inflammatory drug intoxication.

Review of metastasizing (malignant) ameloblastoma (METAM): pattern of metastasis and treatment.

Prenatal administration of retinoic acid upregulates connective tissue growth factor in the nitrofen CDH model.

Antenatal sildenafil treatment attenuates pulmonary hypertension in experimental congenital diaphragmatic hernia.

[Protective effects of tetrandrine against congenital diaphragmatic hernia in rats].

2, 4-dinitrophenol poisoning caused by non-oral exposure.

Prenatal administration of retinoic acid upregulates insulin-like growth factor receptors in the nitrofen-induced hypoplastic lung.

Resveratrol interacts with estrogen receptor- β to inhibit cell replicative growth and enhance stress resistance by upregulating mitochondrial superoxide dismutase.

Haemoglobin mass in an anaemic female endurance runner before and after iron supplementation.

Clinical features and treatment in patients with acute 2,4-dinitrophenol poisoning.

Synergism between 2,3,7,8-tetrachlorodibenzo-p-dioxin and 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone on lung tumor incidence in mice.

Downregulation of Midkine gene expression and its response to retinoic acid treatment in the nitrofen-induced hypoplastic lung.

Prenatal retinoic acid treatment upregulates late gestation lung protein 1 in the nitrofen-induced hypoplastic lung in late gestation.

Effect of insulin-like growth factors on lung development in a nitrofen-induced CDH rat model.

Expression of Iroquois genes is up-regulated during early lung development in the nitrofen-induced pulmonary hypoplasia.

Down-regulation of lung Kruppel-like factor in the nitrofen-induced hypoplastic lung.

Downregulation of FGFR1 contributes to the development of the diaphragmatic defect in the nitrofen model of congenital diaphragmatic hernia.

Carcinogenic effects of "whole-life" exposure to inorganic arsenic in CD1 mice.

Prenatal treatment with retinoic acid activates parathyroid hormone-related protein signaling in the nitrofen-induced hypoplastic lung.

Visualization of mitochondrial respiratory function using cytochrome c oxidase/succinate dehydrogenase (COX/SDH) double-labeling histochemistry.

Quantitation of benzo[a]pyrene metabolic profiles in human bronchoalveolar (H358) cells by stable isotope dilution liquid chromatography-atmospheric pressure chemical ionization mass spectrometry.

A novel application of the Margin of Exposure approach: segregation of tobacco smoke toxicants.

Transient receptor potential A1 channels: insights into cough and airway inflammatory disease.

Role of vermicompost chemical composition, microbial functional diversity, and fungal community structure in their microbial respiratory response to three pesticides.

Enhancing effect of zinc on L-histidine transport in rat lung microvascular endothelial cells.

Characterization of iodinated adrenomedullin derivatives suitable for lung nuclear medicine.

Metam sodium intoxication: the specific role of degradation products--methyl isothiocyanate and carbon disulphide--as a function of exposure.

TRP channels: emerging targets for respiratory disease.

Novel hormonal delivery method using the ink-jet technology: application to pulmonary insulin therapies.

Cigarette smoke increases susceptibility to tuberculosis--evidence from in vivo and in vitro models.

Influence of Tl(+) on mitochondrial permeability transition pore in Ca(2+)-loaded rat liver mitochondria.

Chlorinated benzenes cause concomitantly oxidative stress and induction of apoptotic markers in lung epithelial cells (A549) at nonacute toxic concentrations.

Regulation of benzo[a]pyrene-mediated DNA- and glutathione-adduct formation by 2,3,7,8-tetrachlorodibenzo-p-dioxin in human lung cells.

Saturated hydrogen saline protects rats from acute lung injury induced by paraquat.

Imaging in detecting sites of pulmonary fibrosis induced by paraquat.

Polychlorinated dibenzo-p-dioxins and dibenzofurans in different tissues of the cormorants (*Phalacrocorax carbo*) from Dongting Lake, China.

Acute mitochondrial actions of glitazones on the liver: a crucial parameter for their antidiabetic properties.

Protective Effects of Liposomal N-Acetylcysteine against Paraquat-Induced Cytotoxicity and Gene Expression.

NTP toxicity studies of toxicity studies of 2,4-decadienal (CAS No. 25152-84-5) administered by gavage to F344/N Rats and B6C3F1 mice.

IGFBP-4 gene overexpression in the nitrofen-induced hypoplastic lung.

KB-R7943, an inhibitor of the reverse Na⁺ /Ca²⁺ exchanger, blocks N-methyl-D-aspartate receptor and inhibits mitochondrial complex I.

Maneb and paraquat-induced modulation of toxicant responsive genes in the rat liver: comparison with polymorphonuclear leukocytes.

Cytotoxicity and gene array analysis of alveolar epithelial A549 cells exposed to paraquat.

Rosmarinic acid antagonized 1-methyl-4-phenylpyridinium (MPP⁺)-induced neurotoxicity in MES23.5 dopaminergic cells.

[Effects of enalapril on IL-1beta, IL-6 expression in rat lung exposure to acrolein].

[Effects of enalapril on NF-kappaB expression in mucus hypersecretion rats induced by acrolein exposure].

[Effects of acrolein exposure on the expression of Muc5ac in the airway of rats].

[Study on the change of angiotensin II expression in rat lung exposure to acrolein].

Nitric oxide in paraquat-mediated toxicity: A review.

Glyphosate-surfactant herbicide-induced reversible encephalopathy.

Exposure to acrolein by inhalation causes platelet activation.

[Role of connective tissue growth factor and α -smooth muscle actin in pulmonary fibrosis among acute paraquat poisoned rats].

[Experimental therapy of penehyclidine hydrochloride on paraquat-induced acute lung injury].

[Extreme hyperkalemia in a patient with a new glyphosate potassium herbicide poisoning: report of a case].

Enzymatic-spectrophotometric determination of paraquat in urine samples: a method based on its toxic mechanism.

Toxicity of the herbicide atrazine: effects on lipid peroxidation and activities of antioxidant enzymes in the freshwater fish *Channa punctatus* (Bloch).

Predicting acute complicated glyphosate intoxication in the emergency department.

Protective effect of quercetin against paraquat-induced lung injury in rats.

Inhibitory concentrations of 2,4D and its possible intermediates in sulfate reducing biofilms.

[Paraquat lung and monoamine transporter].

Severe paraquat poisoning: clinical and radiological findings in a survivor.

Glucocorticoid with cyclophosphamide for paraquat-induced lung fibrosis.

Paraquat ingestion: a challenging diagnosis.

Simvastatin attenuates acrolein-induced mucin production in rats: involvement of the Ras/extracellular signal-regulated kinase pathway.

Mortality patterns of Army Chemical Corps veterans who were occupationally exposed to herbicides in Vietnam.

[Expression of angiotensin converting enzyme and angiotensin converting enzyme 2 gene in lung of paraquat poisoning rats and protection of sodium dimercaptopropane sulfonate].

Cigarette smoke total particulate matter increases mucous secreting cell numbers in vitro: a potential model of goblet cell hyperplasia.

Paraquat increases connective tissue growth factor and collagen expression via angiotensin signaling pathway in human lung fibroblasts.

Increased expression of endothelial iNOS accounts for hyporesponsiveness of pulmonary artery to vasoconstrictors after paraquat poisoning.

Transposon insertion in a serine-specific minor tRNA coding sequence affects intraperitoneal survival of *Haemophilus influenzae* in the infant rat model.

[Changes of proteomics in the lung of rats subjected to acrolein inhalation after enalapril administration].

[Changes of proteomics in the injured lung of adult rats subjected to acrolein inhalation].

Acrolein induces apoptosis through the death receptor pathway in A549 lung cells: role of p53.

Chymase mediates paraquat-induced collagen production in human lung fibroblasts.

Intermediate filament carbonylation during acute acrolein toxicity in A549 lung cells: functional consequences, chaperone redistribution, and protection by bisulfite.

Water-Soluble alpha,beta-unsaturated aldehydes of cigarette smoke induce carbonylation of human serum albumin.

Toxicity of smoke extracts towards A549 lung cells: role of acrolein and suppression by carbonyl scavengers.

A prospective observational study of the clinical toxicology of glyphosate-containing herbicides in adults with acute self-poisoning.

Oxidative stress response and gene expression with atrazine exposure in adult female zebrafish (*Danio rerio*).

[Acute poisoning due to chemical substances inducing methemoglobinemia--two cases report].

[Clinical research on high-dosage ambroxol hydrochloride associated with ulinastatin in improvement of lung tissue injury of patients with paraquat poisoning].

Mutagenicity of acrolein and acrolein-induced DNA adducts.

Failed rescue therapy with rapamycin after paraquat intoxication.

Cause-specific mortality of Dutch chlorophenoxy herbicide manufacturing workers.

Acetaminophen, via its reactive metabolite N-acetyl-p-benzo-quinoneimine and transient receptor potential ankyrin-1 stimulation, causes neurogenic inflammation in the airways and other tissues in rodents.

Subanesthetic dose of isoflurane protects against zymosan-induced generalized inflammation and its associated acute lung injury in mice.

Modulation of SCF beta-TrCP-dependent I kappaB alpha ubiquitination by hydrogen peroxide.

Ozone activates airway nerves via the selective stimulation of TRPA1 ion channels.

A mitochondrial superoxide signal triggers increased longevity in *Caenorhabditis elegans*.

Comparison of glutathione peroxidase 1 and peroxiredoxin 6 in protection against oxidative stress in the mouse lung.

Mitochondrial aldehyde dehydrogenase mediates vasodilator responses of glyceryl trinitrate and sodium nitrite in the pulmonary vascular bed of the rat.

The protective role of D-glucose against 1-methyl-4-phenylpyridinium ion (MPP⁺): induced mitochondrial dysfunction in C6 astroglial cells.

Selective induction of catalase-mediated autophagy by dihydrocapsaicin in lung cell lines.

Mitochondrial dysfunction confers resistance to multiple drugs in *Caenorhabditis elegans*.

ATZ (3-amino-1,2,4-triazole) injected into the fourth cerebral ventricle influences the Bezold-Jarisch reflex in conscious rats.

Effects of estrogen on lung development in a rat model of diaphragmatic hernia.

Breast cancer stem-like cells are inhibited by a non-toxic aryl hydrocarbon receptor agonist.

Toxicology and carcinogenesis studies of 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (CAS No. 31508-00-6) in female Harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 3,3',4,4'-tetrachloroazobenzene (TCAB) (CAS No. 14047-09-7) in Harlan Sprague-Dawley rats and B6C3F1 mice (gavage studies).

Embryonic Wnt gene expression in the nitrofen-induced hypoplastic lung using 3-dimensional imaging.

Recruitment maneuver in experimental acute lung injury: the role of alveolar collapse and edema.

Body mass index, agricultural pesticide use, and cancer incidence in the Agricultural Health Study cohort.

[Establishment of an erythroleukemia model in CB6F1 mice by transplant with haploidentical mouse leukemic cell line FBL-3].

Connective tissue growth factor expression pattern in lung development.

Abnormal platelet-derived growth factor signaling accounting for lung hypoplasia in experimental congenital diaphragmatic hernia.

Prenatal retinoic acid upregulates pulmonary gene expression of PI3K and AKT in nitrofen-induced pulmonary hypoplasia.

Identification and investigation of mitochondria lacking cytochrome c oxidase activity in axons.

Mutant Parkin impairs mitochondrial function and morphology in human fibroblasts.

[Effect of ambroxol on lung development of rat models with nitrofen-induced congenital diaphragmatic hernia].

Antenatal steroid and tracheal occlusion restore vascular endothelial growth factor receptors in congenital diaphragmatic hernia rat model.

'Fatal 2,4-dinitrophenol poisoning... coming to a hospital near you'.

Aryl hydrocarbon receptor activation reduces dendritic cell function during influenza virus infection.

Assisted ventilation modes reduce the expression of lung inflammatory and fibrogenic mediators in a model of mild acute lung injury.

Iron deficiency induces changes in riboflavin secretion and the mitochondrial electron transport chain in hairy roots of *Hyoscyamus albus*.

Gene expression analysis in hypoplastic lungs in the nitrofen model of congenital diaphragmatic hernia.

p52-Bcl3 complex promotes cyclin D1 expression in BEAS-2B cells in response to low concentration arsenite.

Insulinlike growth factor receptor type 1 and type 2 are downregulated in the nitrofen-induced hypoplastic lung.

Reversible mitochondrial uncoupling in the cold phase during liver preservation/reperfusion reduces oxidative injury in the rat model.

Deciphering diseases and biological targets for environmental chemicals using toxicogenomics networks.

Insulin receptor is downregulated in the nitrofen-induced hypoplastic lung.

The effect of in vitro tracheal occlusion on branching morphogenesis in fetal lung explants from the rat nitrofen model of congenital diaphragmatic hernia.

Progesterone receptor membrane component 1 (Pgrmc1): a heme-1 domain protein that promotes tumorigenesis and is inhibited by a small molecule.

Dietary administration of sodium arsenite to rats: relations between dose and urinary concentrations of methylated and thio-metabolites and effects on the rat urinary bladder epithelium.

Expression and function of phosphodiesterases in nitrofen-induced congenital diaphragmatic hernia in rats.

Is there a role for antioxidants in prevention of pulmonary hypoplasia in nitrofen-induced rat model of congenital diaphragmatic hernia?

Out-of-hospital cardiac arrest caused by acute intoxication.

Environmental toxins and Parkinson's disease: putative roles of impaired electron transport chain and oxidative stress.

[A case of severe bronchial mucosal injury caused by iron pill aspiration].

Features and prognostic factors for elderly with acute poisoning in the emergency department.

Spatiotemporal alteration in phosphatidylinositide 3-kinase-serine/threonine protein kinase B signaling in the nitrofen-induced hypoplastic lung.

Bronchopulmonary innervation defects in infants and rats with congenital diaphragmatic hernia.

Albumin as an adjunct to tracheal occlusion in fetal rats with congenital diaphragmatic hernia: a placebo-controlled study.

Interactions of airflow oscillation, tracheal inclination, and mucus elasticity significantly improve simulated cough clearance.

Re: False-positive results in cancer epidemiology: a plea for epistemological modesty.

Function and expression of ATP-binding cassette transporters in cultured human Y79 retinoblastoma cells.

Aryl hydrocarbon receptor functions as a potent coactivator of E2F1-dependent transcription activity.

Chemical target and pathway toxicity mechanisms defined in primary human cell systems.

Disturbance of parathyroid hormone-related protein signaling in the nitrofen-induced hypoplastic lung.

Microscopic magnetic resonance in congenital diaphragmatic hernia and associated malformations in rats.

Upregulation of endothelin receptors A and B in the nitrofen induced hypoplastic lung occurs early in gestation.

Downregulation of insulin-like growth factor binding protein 3 and 5 in nitrofen-induced pulmonary hypoplasia.

Early development of the primordial mammalian diaphragm and cellular mechanisms of nitrofen-induced congenital diaphragmatic hernia.

Pyrrolidine dithiocarbamate (PDTC)/Cu complex induces lung epithelial cell apoptosis through mitochondria and ER-stress pathways.

Effects of the compounds MV8608 and MV8612 obtained from *Mandevilla velutina* in the model of hemorrhagic cystitis induced by cyclophosphamide in rats.

Injury and differentiation following inhibition of mitochondrial respiratory chain complex IV in rat oligodendrocytes.

Evaluation of the genotoxicity of 10 selected dietary/environmental compounds with the in vitro micronucleus cytokinesis-block assay in an interlaboratory comparison.

Gene expression profile and cytotoxicity of human bronchial epithelial cells exposed to crotonaldehyde.

Effects of in ovo exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin on hepatic AHR/ARNT-CYP1A signaling pathways in common cormorants (*Phalacrocorax carbo*).

Pulmonary artery pressure responses to increased cardiac output in chickens with raised metabolic rate.

Deletion of the mitochondrial NADH kinase increases mitochondrial DNA stability and life span in the filamentous fungus *Podospora anserina*.

Sensory detection and responses to toxic gases: mechanisms, health effects, and countermeasures.

Lipid peroxidation-derived reactive aldehydes directly and differentially impair spinal cord and brain mitochondrial function.

A case of toxic epidermal necrolysis (ten) with severe chronic ocular complications in a healthy 46-year-old woman.

Mapping of cerebral oxidative metabolism with MRI.

Nitrofen induces apoptosis independently of retinaldehyde dehydrogenase (RALDH) inhibition.

Two modes of mitochondrial dysfunction lead independently to lifespan extension in *Caenorhabditis elegans*.

Transient receptor potential channels as novel drug targets in respiratory diseases.

Elevated levels of volatile organic carcinogen and toxicant biomarkers in Chinese women who regularly cook at home.

Evaluating use of ferricyanide-mediated respiration bioassays to quantify stimulatory and inhibitory effects on *Escherichia coli* populations.

TCDD and a putative endogenous AhR ligand, ITE, elicit the same immediate changes in gene expression in mouse lung fibroblasts.

The mitochondrial PPR protein LOVASTATIN INSENSITIVE 1 plays regulatory roles in cytosolic and plastidial isoprenoid biosynthesis through RNA editing.

Arylhydrocarbon receptor activation in NCI-H441 cells and C57BL/6 mice: possible mechanisms for lung dysfunction.

Enhanced metallothionein gene expression induced by mitochondrial oxidative stress is reduced in phospholipid hydroperoxide glutathione peroxidase-overexpressed cells.

Expression of heat shock protein 70 in lung tissues of acute paraquat poisoned rats and intervention of ulinastatin.

The new generation of intravenous iron: chemistry, pharmacology, and toxicology of ferric carboxymaltose.

Comparison of carcinogen, carbon monoxide, and ultrafine particle emissions from narghile waterpipe and cigarette smoking: Sidestream smoke measurements and assessment of second-hand smoke emission factors.

Exposure to 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin and tetraethyl lead affects lung mitochondria bioenergetics.

Pyrrroquinoline quinone stimulates mitochondrial biogenesis through cAMP response element-binding protein phosphorylation and increased PGC-1 α expression.

Altered metabolisms of mediators controlling vascular function and enhanced oxidative stress in asymptomatic children with congenital portosystemic venous shunt.

Lipid oxidation and peroxidation in CNS health and disease: from molecular mechanisms to therapeutic opportunities.

Assessment of nicotine inhalation exposure and urinary cotinine of tobacco processing workers.

The role of T cells in the regulation of acrolein-induced pulmonary inflammation and epithelial-cell pathology.

Successful treatment of paraquat poisoning by Xuebijing, an injection concocted from multiple Chinese medicinal herbs: a case report.

Paraquat (PQ)-induced pulmonary fibrosis increases exercise metabolic cost, reducing aerobic performance in rats.

Excessive longitudinal FEV1 decline and risks to future health: a case-control study.

Differential contribution of the mitochondrial respiratory chain complexes to reactive oxygen species production by redox cycling agents implicated in parkinsonism.

Toxicity assessment of the herbicide metolachlor comparative effects on bacterial and mitochondrial model systems.

Acrolein induces a cellular stress response and triggers mitochondrial apoptosis in A549 cells.

[Acute glyphosate-surfactant poisoning with neurological sequels and fatal outcome].

Glycogen content is affected differently in acute pulmonary and extra-pulmonary lung injury.

p38 MAPK and MMP-9 cooperatively regulate mucus overproduction in mice exposed to acrolein fog.

Effects of 2,4-dichlorophenoxyacetic acid formulation on medulla spinalis of *Poecilia reticulata*: a histopathological study.

Mortality rates among trichlorophenol workers with exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Oxidative stress of acute paraquat poisoned rats and sodium dimercaptopropene sulfonate intervention].

[Pathologic changes and expression of Heme oxygenase-1 in paraquat-induced renal injury].

[Changes of cytokine and nuclear factor-kappa B in acute paraquat poisoned rats].

[Change of oxidative stress and nuclear factor-kappa B in acute paraquat poisoned rats].

[Expression of thrombomodulin, endothelial protein C receptor in lung tissue of acute paraquat poisoned rats and intervention of sodium dimercaptopropene sulfonate].

Comparative effects of the formulation of glyphosate-surfactant herbicides on hemodynamics in swine.

The area of ground glass opacities of the lungs as a predictive factor in acute paraquat intoxication.

The epidemiology of glyphosate-surfactant herbicide poisoning in Taiwan, 1986-2007: a poison center study.

Long-lived ames dwarf mice are resistant to chemical stressors.

Proteomic profiling of rat lung epithelial cells induced by acrolein.

Allergic reaction induced by dermal and/or respiratory exposure to low-dose phenoxyacetic acid, organophosphorus, and carbamate pesticides.

Fatal diquat intoxication.

Marked recovery from paraquat-induced lung injury during long-term follow-up.

Clinical outcome of paraquat poisoning.

Delayed immunosuppressive treatment in life-threatening paraquat ingestion: a case report.

Immunohistochemical and histopathological evaluation of 2,4-dichlorophenoxyacetic acid-induced changes in rat kidney cortex.

Glutathione-S-transferase P protects against endothelial dysfunction induced by exposure to tobacco smoke.

Immunotoxicological effects of a sub-chronic exposure to selected current-use pesticides in rainbow trout (*Oncorhynchus mykiss*).

Protective effect of lipoic acid against acrolein-induced cytotoxicity in IMR-90 human fibroblasts.

Human cord blood CD133+ stem cells transplanted to nod-scid mice provide conditions for regeneration of olfactory neuroepithelium after permanent damage induced by dichlobenil.

Western blot analysis for 4-hydroxy-2-nonenal (HNE)-modified proteins in paraquat-treated mice.

Mutagenicity and sequence specificity of acrolein-DNA adducts.

The effects of acrolein on peroxiredoxins, thioredoxins, and thioredoxin reductase in human bronchial epithelial cells.

[Expression of inflammatory factors in lung tissue of acute paraquat poisoned rats].

Gene profiles of a human alveolar epithelial cell line after in vitro exposure to respiratory (non-)sensitizing chemicals: identification of discriminating genetic markers and pathway analysis.

A review: oxidative stress in fish induced by pesticides.

Chapter 22 The uptake and interactions of the redox cyler paraquat with mitochondria.

Prostate cancer control and survival in Vietnam veterans exposed to Agent Orange.

TRPA1 agonists evoke coughing in guinea pig and human volunteers.

Matrix metalloproteinase-14 mediates a phenotypic shift in the airways to increase mucin production.

Recruitment maneuver: RAMP versus CPAP pressure profile in a model of acute lung injury.

Mortality rates among workers exposed to dioxins in the manufacture of pentachlorophenol.

4-Methoxycinnamaldehyde inhibited human respiratory syncytial virus in a human larynx carcinoma cell line.

The effects of N-acetyl cysteine, buthionine sulfoximine, diethyldithiocarbamate or 3-amino-1,2,4-triazole on antimycin A-treated Calu-6 lung cells in relation to cell growth, reactive oxygen species and glutathione.

Increased sensitivity of myoblasts to oxidative stress in amyotrophic lateral sclerosis peripheral tissues.

Rosiglitazone, a peroxisome proliferator-activated receptor-gamma agonist, attenuates acrolein-induced airway mucus hypersecretion in rats.

[Analysis of bialaphos and its active metabolite L-glufosinate in biological specimens by HPLC].

Comparison of rat olfactory mucosal responses to carcinogenic and non-carcinogenic chloracetanilides.

Protective effects of a superoxide dismutase/catalase mimetic compound against paraquat pneumotoxicity in rat lung.

Effect of sildenafil on acrolein-induced airway inflammation and mucus production in rats.

Antiinflammatory effects of hydrogen peroxide in neutrophil activation and acute lung injury.

Mutations in the *C. elegans* succinate dehydrogenase iron-sulfur subunit promote superoxide generation and premature aging.

Pyrrolidine dithiocarbamate attenuates paraquat-induced lung injury in rats.

Protective effect of montelukast on paraquat-induced lung toxicity in rats.

Two novel phospholipid hydroperoxide glutathione peroxidase genes of *Paragonimus westermani* induced by oxidative stress.

Respiratory irritants in Australian bushfire smoke: air toxics sampling in a smoke chamber and during prescribed burns.

DIC-1 over-expression enhances respiratory activity in *Caenorhabditis elegans* by promoting mitochondrial cristae formation.

Prolonged recruitment manoeuvre improves lung function with less ultrastructural damage in experimental mild acute lung injury.

Up-regulation of Wnt5a gene expression in the nitrofen-induced hypoplastic lung.

The pneumococcal response to oxidative stress includes a role for Rgg.

Safety assessment of leaf curl virus resistant tomato developed using viral derived sequences.

Upregulation of Slit-2 and Slit-3 gene expressions in the nitrofen-induced hypoplastic lung.

[Acute and subacute chemical pneumonitis].

Prenatal retinoic acid up-regulates pulmonary gene expression of COUP-TFII, FOG2, and GATA4 in pulmonary hypoplasia.

Post-exposure treatment with nasal atropine methyl bromide protects against microinstillation inhalation exposure to sarin in guinea pigs.

Mortality in workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin at a trichlorophenol plant in New Zealand.

Expression of chloride channels in trachea-occluded hyperplastic lungs and nitrofen-induced hypoplastic lungs in rats.

Differential effects of PINK1 nonsense and missense mutations on mitochondrial function and morphology.

Impact of life stage and duration of exposure on arsenic-induced proliferative lesions and neoplasia in C3H mice.

Effect of prenatal tetrandrine administration on transforming growth factor-beta1 level in the lung of nitrofen-induced congenital diaphragmatic hernia rat model.

Arsenite enhances the benzo[a]pyrene diol epoxide (BPDE)-induced mutagenesis with no marked effect on repair of BPDE-DNA adducts in human lung cells.

Protection of bleomycin-induced fibrosis and inflammation by taurine.

Disruption of iron homeostasis and lung disease.

Prone position prevents regional alveolar hyperinflation and mechanical stress and strain in mild experimental acute lung injury.

Peroxiredoxin 6 fails to limit phospholipid peroxidation in lung from Cfr-knockout mice subjected to oxidative challenge.

Melatonin reduces acute lung injury in endotoxemic rats.

Effects of frequency and inspiratory plateau pressure during recruitment manoeuvres on lung and distal organs in acute lung injury.

Arsenic activates EGFR pathway signaling in the lung.

Mitochondrial changes within axons in multiple sclerosis.

Dimethylarsine likely acts as a mouse-pulmonary tumor initiator via the production of dimethylarsine radical and/or its peroxy radical.

Dimethylarsine likely acts as a mouse-pulmonary tumor initiator via the production of dimethylarsine radical and/or its peroxy radical.

Methylbromide intoxication: a clinical case study.

Effects of nickel, chromate, and arsenite on histone 3 lysine methylation.

The soluble nickel component of residual oil fly ash alters pulmonary host defense in rats.

Detection of odorous compounds in breath.

Pulmonary lesion induced by low and high positive end-expiratory pressure levels during protective ventilation in experimental acute lung injury.

Controlled, household-randomized, open-label trial of the effect of treatment of *Helicobacter pylori* infection on iron deficiency among children in rural Alaska: results at 40 months.

[A series of observation on the expression of TGF-beta1 in the lung of nitrofen-induced congenital diaphragmatic hernia rat model].

Positron emission tomography (PET) imaging with [11C]-labeled erlotinib: a micro-PET study on mice with lung tumor xenografts.

[The specific features of the clinical course of tuberculosis and enhancement of its treatment efficiency in fertile-age women with iron-deficiency anemia].

Therapeutic surfactants modulate the viability of eosinophils and induce inflammatory mediator release.

Developmental immunotoxicology: focus on health risks.

[Assessment of mitochondrial metabolic oxidative state in living cardiomyocytes with spectrally-resolved fluorescence lifetime spectroscopy of NAD(P)H].

Cytotoxicity and mitochondrial dysfunction of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in isolated rat hepatocytes.

Chlorate metabolism in pure cultures of *Escherichia coli* O157:H7 pretreated with either nitrate or chlorate.

Sonic hedgehog gene expression in nitrofen induced hypoplastic lungs in mice.

Highly effective binding of viologens by p-sulfonatocalixarenes for the treatment of viologen poisoning.

Extension of *Drosophila* life span by RNAi of the mitochondrial respiratory chain.

Acacia Senegal gum exudate offers protection against cyclophosphamide-induced urinary bladder cytotoxicity.

Exposure to monomethylarsonous acid (MMA(III)) leads to altered selenoprotein synthesis in a primary human lung cell model.

[Effect of bromoxynil on membrane potential and respiratory control rate in isolated mitochondria from mice liver and intervention effect of NAC].

Effects of environmental contaminants on hemoglobin gene expression in *Daphnia magna*: a potential biomarker for freshwater quality monitoring.

Evaluation of a novel inhalation exposure system to determine acute respiratory responses to tobacco and polymer pyrolysate mixtures in Swiss-Webster mice.

Effects of TI(+) on ion permeability, membrane potential and respiration of isolated rat liver mitochondria.

Direct toxicity assessment of toxic chemicals with electrochemical method.

In vitro glutathione conjugation of methyl iodide in rat, rabbit, and human blood and tissues.

Evaluation of respiratory parameters in rats and rabbits exposed to methyl iodide.

Two-day inhalation toxicity study of methyl iodide in the rat.

Dynamic behavior of Arabidopsis eIF4A-III, putative core protein of exon junction complex: fast relocation to nucleolus and splicing speckles under hypoxia.

Effects of aerobic and anaerobic metabolic inhibitors on avian intrapulmonary chemoreceptors.

Non-carcinogenic carbon sorbents for respiratory protection.

Experimental study of the tissue reaction caused by the presence of cellulose produced by *Acetobacter xylinum* in the nasal dorsum of rabbits.

Neuroprotective role of delta-opioid receptors against mitochondrial respiratory chain injury.

Up-regulation of COUP-TFII gene expression in the nitrofen-induced hypoplastic lung.

C-reactive protein modulates human lung fibroblast migration.

Lung development in the Holtzman rat is adversely affected by gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Gene profiles of a human bronchial epithelial cell line after in vitro exposure to respiratory (non-)sensitizing chemicals: identification of discriminating genetic markers and pathway analysis.

[Hepatocyte mitochondrion respiratory chain in rats with experimental toxic hepatitis].

Kidney development in the nitrofen-induced pulmonary hypoplasia and congenital diaphragmatic hernia in rats.

Requirement of aryl hydrocarbon receptor overexpression for CYP1B1 up-regulation and cell growth in human lung adenocarcinomas.

Iron supplementation maintains ventilatory threshold and improves energetic efficiency in iron-deficient nonanemic athletes.

ATF4-dependent oxidative induction of the DNA repair enzyme Ape1 counteracts arsenite cytotoxicity and suppresses arsenite-mediated mutagenesis.

Oxidative metabolism of lung macrophages exposed to sodium arsenite.

Mitochondrial swelling impairs the transport of organelles in cerebellar granule neurons.

Uridine-5'-triphosphate (UTP) maintains cardiac mitochondrial function following chemical and hypoxic stress.

In vitro toxicity assay using human bronchial epithelial cell, Beas-2B, for the screening of toxicological risk of dioxin-like compounds sampled from small sized Korean waste incineration plants.

Fibroblast growth factor-binding protein and N-deacetylase/N-sulfotransferase-1 expression in type II cells is modulated by heparin and extracellular matrix.

Exposure to arsenic at levels found in U.S. drinking water modifies expression in the mouse lung.

Alpha,beta-unsaturated aldehydes in cigarette smoke release inflammatory mediators from human macrophages.

Immunomodulatory effects of organochlorine mixtures upon in vitro exposure of peripheral blood leukocytes differ between free-ranging and captive southern sea otters (*Enhydra lutris*).

New concept for a toxicity assay based on multiple indexes from the wave shape of damped metabolic oscillation induced in living yeast cells (part II): application to analytical toxicology.

Potentiating effect of an endocrine disruptor, paronylphenol, on the generation of reactive oxygen species (ROS) in human venous blood -- association with the activation of signal transduction pathway.

Metabolism of benzo[a]pyrene in human bronchoalveolar H358 cells using liquid chromatography-mass spectrometry.

Horse heart myoglobin catalyzes the H₂O₂-dependent oxidative dehalogenation of chlorophenols to DNA-binding radicals and quinones.

Catalase takes part in rat liver mitochondria oxidative stress defense.

Towards improved artificial lungs through biocatalysis.

Acute and sub-lethal toxicity of three POEA surfactant formulations to *Daphnia magna*.

The role of oxidative stress in hormesis induced by sodium arsenite in human embryo lung fibroblast (HELFI) cellular proliferation model.

Glutamate release from activated microglia requires the oxidative burst and lipid peroxidation.

Gpx4 protects mitochondrial ATP generation against oxidative damage.

4-Methoxyestradiol-induced oxidative injuries in human lung epithelial cells.

Inhibitory and enhancing effects of piroxicam on whole blood chemiluminescence.

Mouse lung CYP1A1 catalyzes the metabolic activation of 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP).

Effect of 2,4-dinitrophenol under non-oxygenated condition in pons-medulla-spinal cord preparations in newborn rats: comparison with medulla-spinal cord preparations.

Comparative developmental toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the hamster, rat and guinea pig.

Cryopreservation of human hepatocytes alters the mitochondrial respiratory chain complex 1.

Modulation of the respiratory burst by organochlorine mixtures in marine mammals, humans, and mice.

Influence on mitochondria and cytotoxicity of different antibiotics administered in high concentrations on primary human osteoblasts and cell lines.

Human CYP1A1GFP expression in transgenic mice serves as a biomarker for environmental toxicant exposure.

Capillary zone electrophoresis method for fingerprint of allantoic fluid in normal and infected SPF embryonated chicken eggs.

Identification of linear heparin-binding peptides derived from human respiratory syncytial virus fusion glycoprotein that inhibit infectivity.

Synthesis of 6-chloroisoquinoline-5,8-diones and pyrido[3,4-b]phenazine-5,12-diones and evaluation of their cytotoxicity and DNA topoisomerase II inhibitory activity.

Experience with paraquat poisoning in a respiratory intensive care unit in North India.

Characterizing the reproducibility of a protein profiling method for the analysis of mouse bronchoalveolar lavage fluid.

Health status of Army Chemical Corps Vietnam veterans who sprayed defoliant in Vietnam.

Smoking and lung cancer--a new role for an old toxicant?

Acrolein is a major cigarette-related lung cancer agent: Preferential binding at p53 mutational hotspots and inhibition of DNA repair.

P-glycoprotein induction: an antidotal pathway for paraquat-induced lung toxicity.

Single high dose dexamethasone treatment decreases the pathological score and increases the survival rate of paraquat-intoxicated rats.

DNA microarray analysis of pulmonary fibrosis three months after exposure to paraquat in rats.

Cancer incidence among pesticide applicators exposed to dicamba in the agricultural health study.

Green tea extract inhibits paraquat-induced pulmonary fibrosis by suppression of oxidative stress and endothelin-I expression.

Practical use of modified maximum likelihoods for stratified data.

Temporal effects of paraquat/maneb on microglial activation and dopamine neuronal loss in older rats.

Kinetics of paraquat in the isolated rat lung: Influence of sodium depletion.

Cancer incidence among pesticide applicators exposed to cyanazine in the agricultural health study.

Effects of antioxidant vitamins on molecular regulators involved in lung hypoplasia induced by nitrofen.

A case-control study of myelodysplastic syndromes in Belgrade (Serbia Montenegro).

NTP Technical Report on the comparative toxicity studies of allyl acetate (CAS No. 591-87-7), allyl alcohol (CAS No. 107-18-6) and acrolein (CAS No. 107-02-8) administered by gavage to F344/N rats and B6C3F1 mice.

Sequential radiologic and functional pulmonary changes in patients with paraquat intoxication.

Acute paraquat poisoning: report of a survival case following intake of a potential lethal dose.

Protective effects of N-acetylcysteine treatment post acute paraquat intoxication in rats and in human lung epithelial cells.

Cancer incidence among pesticide applicators exposed to metolachlor in the Agricultural Health Study.

[Influence of ambroxol on paraquat-induced lung tissue injury and change of pulmonary surfactant-associated protein A in the experimental rats].

Lisinopril ameliorates paraquat-induced lung fibrosis.

Gene expression of cytokines and growth factors in the lungs after paraquat administration in mice.

Effects of alpha tocopherol and probucol supplements on allergen-induced airway inflammation and hyperresponsiveness in a mouse model of allergic asthma.

Paraquat-induced lipid peroxidation: effects of ovariectomy and estrogen receptor antagonist.

Gene expression in rat lungs during early response to paraquat-induced oxidative stress.

Pharmacologic and functional characterization of malignant hyperthermia in the R163C RyR1 knock-in mouse.

Cellular uptake of magnetic nanoparticle is mediated through energy-dependent endocytosis in A549 cells.

Spatial and temporal expression of glucocorticoid, retinoid, and thyroid hormone receptors is not altered in lungs of congenital diaphragmatic hernia.

Novel selective orally active CRTH2 antagonists for allergic inflammation developed from in silico derived hits.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (Cas No. 31508-00-6) in female Harlan Sprague-Dawley rats (gavage studies).

[Effect and significance of tetrandrine on epidermal growth factor and its receptor in the lung of congenital diaphragmatic hernia rat model].

Airway smooth muscle dysfunction precedes teratogenic congenital diaphragmatic hernia and may contribute to hypoplastic lung morphogenesis.

Environmental arsenic exposure and sputum metalloproteinase concentrations.

Today's epidemics in children: possible relations to environmental pollution and suggested preventive measures.

Protection against lethal challenge with *Streptococcus pneumoniae* is conferred by aryl hydrocarbon receptor activation but is not associated with an enhanced inflammatory response.

Comparison of chronic toxicity and carcinogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in 2-year bioassays in female Sprague-Dawley rats.

Peristalsis of airway smooth muscle is developmentally regulated and uncoupled from hypoplastic lung growth.

Myocardium expression of connexin 43, SERCA2a, and myosin heavy chain isoforms are preserved in nitrofen-induced congenital diaphragmatic hernia rat model.

Connexin 43 gene expression in mice with cardiopulmonary developmental defects.

The constitutively active Ah receptor (CA-Ahr) mouse as a potential model for dioxin exposure--effects in vital organs.

Pesticides associated with wheeze among commercial pesticide applicators in the Agricultural Health Study.

Lung morphology after late fetal tracheal ligation in rats.

Lethal acute lung injury and hypoglycemia after subcutaneous administration of monochloroacetic acid.

NTP technical report on the toxicology and carcinogenesis studies of 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (Gavage studies).

Pendimethalin exposure and cancer incidence among pesticide applicators.

Synchrotron microradiography study on acute lung injury of mouse caused by PM(2.5) aerosols.

NTP technical report on the toxicology and carcinogenesis studies of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (CAS No. 1746-01-6) in female Harlan Sprague-Dawley rats (Gavage Studies).

A dose-response study of the effects of prenatal and lactational exposure to TCDD on the immune response to influenza a virus.

Congenital diaphragmatic hernia prevents absorption of distal air space fluid in late-gestation rat fetuses.

Possible discovery of Chinese lung fluke, *Paragonimus skrjabini* in Manipur, India.

Germ-line mutations at a mouse *ESTR (Pc-3)* locus and human microsatellite loci.

Molecular biology of the nasal airways: how do we assess cellular and molecular responses in the nose?

NTP toxicology and carcinogenesis studies of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (CAS No. 57465-28-8) in female Harlan Sprague-Dawley rats (Gavage Studies).

Altered renin-angiotensin system gene expression causes renal hypoplasia in the rats with nitrofen-induced diaphragmatic hernia.

Retinoic acid rescues lung hypoplasia in nitrofen-induced hypoplastic foetal rat lung explants.

TCDD decreases ATP levels and increases reactive oxygen production through changes in mitochondrial F(0)F(1)-ATP synthase and ubiquinone.

KIADH3, a gene encoding a mitochondrial alcohol dehydrogenase, affects respiratory metabolism and cytochrome content in *Kluyveromyces lactis*.

IL-6 is constitutively expressed during lung morphogenesis and enhances fetal lung explant branching.

Expression of heat shock protein and hemoglobin genes in *Chironomus tentans* (Diptera, chironomidae) larvae exposed to various environmental pollutants: a potential biomarker of freshwater monitoring.

Duox2 exhibits potent heme peroxidase activity in human respiratory tract epithelium.

Toxicology and carcinogenesis studies of a mixture of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (Cas No. 1746-01-6), 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4), and 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) in female Harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4) in female Harlan Sprague-Dawley rats (gavage studies).

Results of a long-term carcinogenicity bioassay on Sprague-Dawley rats exposed to sodium arsenite administered in drinking water.

Effect of physical exertion on the biological monitoring of exposure of various solvents following exposure by inhalation in human volunteers: I. Toluene.

Effect of protective filters on fire fighter respiratory health during simulated bushfire smoke exposure.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (gavage studies).

Pollutant particles enhanced H₂O₂ production from NAD(P)H oxidase and mitochondria in human pulmonary artery endothelial cells.

Case report: Hydroquinone and/or glutaraldehyde induced acute myeloid leukaemia?

Arsenicals in maternal and fetal mouse tissues after gestational exposure to arsenite.

["Oxygen regulation" of the respiratory chain composition in the yeast *Debaryomyces hansenii* under multiple stress].

Tissue specific induction of cytochrome P450 (CYP) 1A1 and 1B1 in rat liver and lung following in vitro (tissue slice) and in vivo exposure to benzo(a)pyrene.

Enhancing effects of simultaneous treatment with sodium nitrite on 2-amino-3-methylimidazo[4,5-f]quinoline-induced rat liver, colon and Zymbal's gland carcinogenesis after initiation with diethylnitrosamine and 1,2-dimethylhydrazine.

Toluene toxicokinetics and metabolism parameters in the rat and guinea pig.

[Public perceptions of the risk of Asian dust storms in Seoul and its metropolitan area].

Protective effect of *Phyllanthus fraternus* against allyl alcohol-induced oxidative stress in liver mitochondria.

Effect of VEGF on the branching morphogenesis of normal and nitrofen-induced hypoplastic fetal rat lung explants.

Induction of DNA strand breaks, DNA-protein crosslinks and sister chromatid exchanges by arsenite in a human lung cell line.

Cytochrome P4501A is induced in endothelial cell lines from the kidney and lung of the bottlenose dolphin, *Tursiops truncatus*.

Changes in intracellular pH play a secondary role in hydrogen sulfide-induced nasal cytotoxicity.

The ROS production induced by a reverse-electron flux at respiratory-chain complex 1 is hampered by metformin.

[The relationship between hormesis of proliferation and oxidative stress induced by sodium arsenite in human embryo lung fibroblasts].

Phospholipase A2, reactive oxygen species, and lipid peroxidation in cerebral ischemia.

Loss of mitochondrial membrane potential is associated with increase in mitochondrial volume: physiological role in neurones.

Environmental toxicants and effects on female reproductive function.

Peroxynitrite can affect platelet responses by inhibiting energy production.

Competing roles of aldo-keto reductase 1A1 and cytochrome P4501B1 in benzo[a]pyrene-7,8-diol activation in human bronchoalveolar H358 cells: role of AKRs in P4501B1 induction.

Dinitrophenol-induced mitochondrial uncoupling in vivo triggers respiratory adaptation in HepG2 cells.

Specific induction of oxidative stress in terminal bronchiolar Clara cells during dimethylarsenic-induced lung tumor promoting process in mice.

[Carbimide overdose: description of a case and review of the literature].

Comparative effects of the Roundup and glyphosate on mitochondrial oxidative phosphorylation.

[Paraquat intoxication and hemocarboperfusion].

[Inhibitory effects of phenolic ecotoxicants on photobacteria at various pH values].

Subacute pulmonary manifestation in a survivor of severe paraquat intoxication.

Myeloperoxidase-generated oxidants modulate left ventricular remodeling but not infarct size after myocardial infarction.

Clinical implications of the ethane in exhaled breath in patients with acute paraquat intoxication.

Intentional self-poisoning with the chlorophenoxy herbicide 4-chloro-2-methylphenoxyacetic acid (MCPA).

Respiratory health effects due to long-term low-level paraquat exposure.

The role of trivalent dimethylated arsenic in dimethylarsinic acid-promoted skin and lung tumorigenesis in mice: tumor-promoting action through the induction of oxidative stress.

Activity of NADPH-cytochrome P-450 reductase of the human heart, liver and lungs in the presence of (-)-epigallocatechin gallate, quercetin and resveratrol: an in vitro study.

Decreasing the oxidant stress from paraquat in isolated perfused rat lung using captopril and niacin.

The role of microglia in paraquat-induced dopaminergic neurotoxicity.

Update: hydrogen cyanamide-related illnesses--Italy, 2002-2004.

Inhaled nitric oxide improves the survival of the paraquat-injured rats.

Paraquat poisoning.

Determination of biological reference values for chlorpyrifos metabolites in human urine using a toxicokinetic approach.

Expression of vasoactive mediators during mechanical ventilation in nitrofen-induced diaphragmatic hernia in rats.

Illnesses related to shank application of metam-sodium, Arvin, California, July 2002.

Arsenic-induced micronuclei formation in mammalian cells and its counteraction by tea.

Differential effects of vitamin A on fetal lung growth and diaphragmatic formation in nitrofen-induced rat model.

Transforming growth factor-beta1 upregulation is independent of angiotensin in paraquat-induced lung fibrosis.

Ragweed (Ambrosia) progression and its health risks: will Switzerland resist this invasion?

The aldehyde acrolein induces apoptosis via activation of the mitochondrial pathway.

Paraquat poisoning.

Inhibition of NFkappaB activation and IL-8 expression in human bronchial epithelial cells by acrolein.

Bioactive metabolites from the fungus *Nectria galligena*, the main apple canker agent in Chile.

Differential impact of environmental stresses on the pea mitochondrial proteome.

Tissue distribution and urinary excretion of inorganic arsenic and its methylated metabolites in mice following acute oral administration of arsenate.

Tissue distribution of arsenic species in rabbits after single and multiple parenteral administration of arsenic trioxide: tissue accumulation and the reversibility after washout are tissue-selective.

Tissue, species, and environmental differences in absolute quantities of murine mRNAs coding for alpha, mu, omega, pi, and theta glutathione S-transferases.

Antioxidant properties of cystic fibrosis sputum.

Induction of heat shock protein 70 in rat olfactory epithelium by toxic chemicals: in vitro and in vivo studies.

Can maternal vitamin e supplementation prevent lung hypoplasia in the nitrofen-induced rat model of congenital diaphragmatic hernia?

Fryns syndrome without diaphragmatic hernia. Report on a new case and review of the literature.

Pediatric fatality following ingestion of dinitrophenol: postmortem identification of a "dietary supplement".

[Health risk related to municipal waste incineration].

Effect of nitric oxide on the development of nitrofen-induced fetal hypoplastic lung explants.

Olfactory epithelial metaplasia and hyperplasia in female Harlan Sprague-Dawley rats following chronic treatment with polychlorinated biphenyls.

Quantitative analysis of cereulide, an emetic toxin of *Bacillus cereus*, by using rat liver mitochondria.

Dose-additive carcinogenicity of a defined mixture of "dioxin-like compounds".

Positive end-expiratory pressure prevents lung mechanical stress caused by recruitment/derecruitment.

Serum soluble transferrin receptor is a valuable diagnostic tool in iron deficiency of breath-holding spells.

Tissue Doppler-derived indices predict exercise capacity in patients with apical hypertrophic cardiomyopathy.

Nitrovasodilator responses in pulmonary arterioles from rats with nitrofen-induced congenital diaphragmatic hernia.

Adrenomedullin is up-regulated in nitrofen-induced fetal pulmonary hypoplasia.

Effect of pollen-mediated oxidative stress on immediate hypersensitivity reactions and late-phase inflammation in allergic conjunctivitis.

Severe cyanide toxicity from 'vitamin supplements'.

A new paradigm in respiratory hygiene: increasing the cohesivity of airway secretions to improve cough interaction and reduce aerosol dispersion.

Induction of the heat shock response in vivo inhibits NF-kappaB activity and protects murine liver from endotoxemia-induced injury.

Increased mortality associated with TCDD exposure in mice infected with influenza A virus is not due to severity of lung injury or alterations in Clara cell protein content.

Gene expression changes in human small airway epithelial cells exposed to Delta9-tetrahydrocannabinol.

Congenital diaphragmatic hernia: a retinoid-signaling pathway disruption during lung development?

Glycation of mitochondrial proteins from diabetic rat kidney is associated with excess superoxide formation.

Induction of p53 by urokinase in lung epithelial cells.

Role of mitochondria in the regulation of hypoxia-inducible factor-1alpha in the rat carotid body glomus cells.

One agent, many diseases: exposure-response data and comparative risks of different outcomes following silica exposure.

Public health benefits of compliance with current E.U. emissions standards for municipal waste incinerators: a health risk assessment with the CalTox multimedia exposure model.

Activation of the aryl hydrocarbon receptor increases pulmonary neutrophilia and diminishes host resistance to influenza A virus.

Congenital diaphragmatic hernia, tracheal occlusion, thyroid transcription factor-1, and fetal pulmonary epithelial maturation.

Acute methyl iodide exposure with delayed neuropsychiatric sequelae: report of a case.

Peroxiredoxin 6, a 1-Cys peroxiredoxin, functions in antioxidant defense and lung phospholipid metabolism.

Role of autoimmune gastritis, *Helicobacter pylori* and celiac disease in refractory or unexplained iron deficiency anemia.

Localization of cytochrome P450 CYP2S1 expression in human tissues by in situ hybridization and immunohistochemistry.

Chronic toxicity and carcinogenicity of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin displays a distinct dose/time toxicity threshold ($c \times t = k$) and a life-prolonging subthreshold effect.

Detection of volatile compounds emitted by *Pseudomonas aeruginosa* using selected ion flow tube mass spectrometry.

Effect of a chemical manufacturing plant on community cancer rates.

Antenatal vitamin A administration attenuates lung hypoplasia by interfering with early instead of late determinants of lung underdevelopment in congenital diaphragmatic hernia.

Efficacy of sublingual coseasonal immunotherapy with a monomeric allergoid in Cupressaceae pollen allergy--preliminary data.

Insulinlike growth factor I gene expression is increased in the fetal lung after tracheal ligation.

Structural and functional alterations in mitochondrial membrane in picrotoxin-induced epileptic rat brain.

Co-mutagenic activity of arsenic and benzo[a]pyrene in mouse skin.

Non-specific effects of 4-chloro-m-cresol may cause calcium flux and respiratory burst in human neutrophils.

Differential inhibitory effect of long-chain acyl-CoA esters on succinate and glutamate transport into rat liver mitochondria and its possible implications for long-chain fatty acid oxidation defects.

Endogenous vascular hydrogen peroxide regulates arteriolar tension in vivo.

A polychromatic staining method for epoxy embedded tissue: a new combination of methylene blue and basic fuchsine for light microscopy.

Age-associated decline in mitochondrial respiration and electron transport in *Drosophila melanogaster*.

Localization and differential activity of P-glycoprotein in the bovine olfactory and nasal respiratory mucosae.

Assessment of baseline toxicity of mono-cyclic aromatic compounds by *pseudomonas* initial oxygen uptake assay.

Role of adenosine A1 and A3 receptors in regulation of cardiomyocyte homeostasis after mitochondrial respiratory chain injury.

Scope for regulation of cigarette smoke toxicity: the case for including charcoal filters.

Scope for regulation of cigarette smoke toxicity according to brand differences in published toxicant emissions.

Type-3 ryanodine receptors mediate hypoxia-, but not neurotransmitter-induced calcium release and contraction in pulmonary artery smooth muscle cells.

Platelets can neutralize hydrogen peroxide in an acute toxicity model with cells involved in granulation tissue formation.

Effects of elastase on the mechanical and failure properties of engineered elastin-rich matrices.

Microbial dechlorination of dioxins in estuarine enrichment cultures: effects of respiratory conditions and priming compound on community structure and dechlorination patterns.

Human cytochrome p450 2s1: lack of activity in the metabolic activation of several cigarette smoke carcinogens and in the metabolism of nicotine.

Carcinogenic activity of cigarette smoke gas phase and its modulation by beta-carotene and N-acetylcysteine.

Competing roles of cytochrome P450 1A1/1B1 and aldo-keto reductase 1A1 in the metabolic activation of (+/-)-7,8-dihydroxy-7,8-dihydro-benzo[a]pyrene in human bronchoalveolar cell extracts.

Hemodynamic and respiratory responses to microinjection of ATP into the intermediate and caudal NTS of awake rats.

A throat lozenge containing amyl meta cresol and dichlorobenzyl alcohol has a direct virucidal effect on respiratory syncytial virus, influenza A and SARS-CoV.

Pesticides and lung cancer risk in the agricultural health study cohort.

Fatal paraquat poisoning in seven Portland, Oregon, dogs.

Pulmonary function and exercise-associated changes with chronic low-level paraquat exposure.

Cancer incidence among pesticide applicators exposed to atrazine in the Agricultural Health Study.

Chlorpropham-induced splenotoxicity and its recovery in rats.

Chymase is activated in the pulmonary inflammation and fibrosis induced by paraquat in hamsters.

The role of active arsenic species produced by metabolic reduction of dimethylarsinic acid in genotoxicity and tumorigenesis.

Metallothionein (I/II) suppresses genotoxicity caused by dimethylarsinic acid.

Response of rat alveolar type II cells and human lung tumor cells towards oxidative stress induced by hydrogen peroxide and paraquat.

Glyphosate herbicide formulation: a potentially lethal ingestion.

[Human health and pesticides used in the spraying of illicit crops: an issue of science or politics?].

Gene expression analysis of the lung following paraquat administration in rats using DNA microarray.

Foetal rat lung epithelial (FRLE) cells: partial characterisation and response to pneumotoxins.

Multiple medical problems following agent orange exposure.

Glyphosate poisoning.

Poisoning due to chlorophenoxy herbicides.

Association between lung function and exposure to smoke among firefighters at prescribed burns.

The involvement of p53 in paraquat-induced apoptosis in human lung epithelial-like cells.

Effects of environmental concentrations of atrazine on hemocyte density and phagocytic activity in the pond snail *Lymnaea stagnalis* (Gastropoda, Pulmonata).

Concentration of TBA-reactive substances in type II pneumocytes exposed to oxidative stress.

Time course of respiratory mechanics and pulmonary structural remodelling in acute lung injury.

Early differential gene expression of rat lung after exposure to paraquat.

Internal recycling of respiratory CO₂ in pods of chickpea (*Cicer arietinum* L.): the role of pod wall, seed coat, and embryo.

Stable compounds of cigarette smoke induce endothelial superoxide anion production via NADPH oxidase activation.

New-onset asthma associated with exposure to 3-amino-5-mercapto-1,2,4-triazole.

Impairment of small intestinal protein assimilation in patients with end-stage renal disease: extending the malnutrition-inflammation-atherosclerosis concept.

A chronic Alzheimer's model evoked by mitochondrial poison sodium azide for pharmacological investigations.

Systemic-to-pulmonary collaterals: a source of flow energy loss in Fontan physiology.

Role of estrogen receptor in regulation of polycyclic aromatic hydrocarbon metabolic activation in lung.

Animal models for arsenic carcinogenesis: inorganic arsenic is a transplacental carcinogen in mice.

Understanding arsenic carcinogenicity by the use of animal models.

[Bronchial impairment of main bronchus by aspiration of ferrous sulphate tablet].

The relationship of diaphragmatic defect, liver growth, and lung hypoplasia in nitrofen-induced congenital diaphragmatic hernia in the rat.

Human muscle sarcoplasmic reticulum function during submaximal exercise in normoxia and hypoxia.

Pulmonary vascular morphology in a fetal rabbit model for congenital diaphragmatic hernia.

Modeling of methyl isothiocyanate air concentrations associated with community illnesses following a metam-sodium sprinkler application.

Antioxidant capacity of cultured mammalian cells estimated by ESR method.

Warm or cold ischemia in animal models of lung ischemia-reperfusion injury: is there a difference?

VEGF expression is downregulated in nitrofen-induced congenital diaphragmatic hernia.

Mechanisms underlying arsenic carcinogenesis: hypersensitivity of mice exposed to inorganic arsenic during gestation.

Characterization of bronchiolar metaplasia of the alveolar epithelium in female Sprague-Dawley rats exposed to 3,3',4,4',5-pentachlorobiphenyl (PCB126).

Pulmonary elastin expression is decreased in the nitrofen-induced rat model of congenital diaphragmatic hernia.

Early-life environmental risk factors for asthma: findings from the Children's Health Study.

Differential regulation of calcium homeostasis in adenocarcinoma cell line A549 and its Taxol-resistant subclone.

Reductions in the incidence of nitrofen-induced diaphragmatic hernia by vitamin A and retinoic acid.

Reduction of androgen receptor expression by benzo[alpha]pyrene and 7,8-dihydro-9,10-epoxy-7,8,9,10-tetrahydrobenzo[alpha]pyrene in human lung cells.

Oxygen-regulated expression of the RNA-binding proteins RBM3 and CIRP by a HIF-1-independent mechanism.

Decreased expression of voltage-gated K⁺ channels in pulmonary artery smooth muscles cells in nitrofen-induced congenital diaphragmatic hernia in rats.

Role of oxidative damage in Friedreich's ataxia.

Endogenous mitochondrial oxidative stress: neurodegeneration, proteomic analysis, specific respiratory chain defects, and efficacious antioxidant therapy in superoxide dismutase 2 null mice.

Treatment of iron deficiency anemia with Ferro-Folgamma.

Effect of epidermal growth factor on pulmonary hypoplasia in experimental diaphragmatic hernia.

Nitrofen-induced congenital diaphragmatic hernia in rat embryo: what model?

Study on the organoleptic intensity scale for measuring oral malodor.

Induction of tumors of the liver, lung, ovary and adrenal in adult mice after brief maternal gestational exposure to inorganic arsenic: promotional effects of postnatal phorbol ester exposure on hepatic and pulmonary, but not dermal cancers.

Comparison between exhaled and sputum oxidative stress biomarkers in chronic airway inflammation.

Human bronchial smooth muscle cell proliferation via thromboxane A2 receptor.

EGR1 is a novel target for AhR agonists in human lung epithelial cells.

Higher respiratory activity decreases mitochondrial reactive oxygen release and increases life span in *Saccharomyces cerevisiae*.

Expression patterns of basic helix-loop-helix transcription factors define subsets of olfactory progenitor cells.

Strain-specific of alachlor on murine olfactory mucosal responses.

Effects of 1,3-butadiene, isoprene, and their photochemical degradation products on human lung cells.

Ascorbic acid in nasal and tracheobronchial airway lining fluids.

Menadione reduces rotenone-induced cell death in cerebellar granule neurons.

Redox modulation of chromatin remodeling: impact on histone acetylation and deacetylation, NF-kappaB and pro-inflammatory gene expression.

Src kinase mediates angiotensin II-dependent increase in pulmonary endothelial nitric oxide synthase.

Stimulators of AMP-activated protein kinase inhibit the respiratory burst in human neutrophils.

Gene interaction network suggests dioxin induces a significant linkage between aryl hydrocarbon receptor and retinoic acid receptor beta.

Exponential modeling, washout curve reconstruction, and estimation of half-life of toluene and its metabolites.

Transport of deslorelin, an LHRH agonist, is vectorial and exhibits regional variation in excised bovine nasal tissue.

Heparin affects signaling pathways stimulated by fibroblast growth factor-1 and -2 in type II cells.

Catalase binds Grb2 in tumor cells when stimulated with serum or ligands for integrin receptors.

The human CYP1A1 gene is regulated in a developmental and tissue-specific fashion in transgenic mice.

Activation of the aryl hydrocarbon receptor diminishes the memory response to homotypic influenza virus infection but does not impair host resistance.

A screening-level assessment of the health risks of chronic smoke exposure for wildland firefighters.

Developmental exposure to the potent aryl hydrocarbon receptor agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin Impairs the cell-mediated immune response to infection with influenza a virus, but enhances elements of innate immunity.

Enhancing effect of the endocrine disruptor para-nonylphenol on the generation of reactive oxygen species in human blood neutrophils.

Effect of arsenic on benzo[a]pyrene DNA adduct levels in mouse skin and lung.

Differential role of Janus family kinases (JAKs) in interferon-gamma-induced lung epithelial ICAM-1 expression: involving protein interactions between JAKs, phospholipase Cgamma, c-Src, and STAT1.

Perinatal dioxin exposure and later effects--a review.

A comparative study on the effects of 2,3,7,8,-tetrachlorodibenzo-p-dioxin polychlorinated biphenyl126 and estrogen in human bronchial epithelial cells.

Impact of mitochondrial inhibition on excitability and cytosolic Ca²⁺ levels in brainstem motoneurons from mouse.

DNA adduct formation in precision-cut rat liver and lung slices exposed to benzo[a]pyrene.

Nitric oxide and platelet energy metabolism.

Urokinase receptor mRNA stability involves tyrosine phosphorylation in lung epithelial cells.

Changes in mitochondrial electron partitioning in response to herbicides inhibiting branched-chain amino acid biosynthesis in soybean.

Prospects for treatment of paraquat-induced lung fibrosis with immunosuppressive drugs and the need for better prediction of outcome: a systematic review.

Birth malformations and other adverse perinatal outcomes in four U.S. Wheat-producing states.

The herbicide dicamba (2-methoxy-3,6-dichlorobenzoic acid) interacts with mitochondrial bioenergetic functions.

[Ginkgo biloba extract protection in acute paraquat poisoning of rat lung tissue].

Changes in the fatty acid composition and hydroxyproline content in rat lung in relation to collagen synthesis after paraquat administration.

Health effects on nearby residents of a wood treatment plant.

Consecutive administration of paraquat to rats induces enhanced cholesterol peroxidation and lung injury.

Mortality among triazine herbicide manufacturing workers.

Fatal acute poisoning by bentazon.

Lung function and airway inflammation in rats following exposure to combustion products of carbon-graphite/epoxy composite material: comparison to a rodent model of acute lung injury.

Pentachlorophenol poisoning.

The mitochondrial complex I inhibitor annonacin is toxic to mesencephalic dopaminergic neurons by impairment of energy metabolism.

Methylprednisolone effects on oxygenation and histology in a rat model of acute lung injury.

[Paraquat intoxication].

Comparative effects of herbicide dicamba and related compound on plant mitochondrial bioenergetics.

Focal transmural necrotic tracheitis in commercial meat turkeys.

Evaluation of genotoxicity of PCP and 2,4-D by micronucleus test in freshwater fish *Channa punctatus*.

Cigarette smoke triggers macrophage adhesion and activation: role of lipid peroxidation products and scavenger receptor.

Effects of oxygen on the antioxidant responses of normal and transformed cells.

Modulation of benzo[a]pyrene-induced p53 DNA activity by acrolein.

Immediate sensory nerve-mediated respiratory responses to irritants in healthy and allergic airway-diseased mice.

Reduction of paraquat-induced oxidative stress in rats by dietary soy peptide.

Chondroitin sulfate proteoglycans are required for lung growth and morphogenesis in vitro.

Accumulation and metabolism of arsenic in mice after repeated oral administration of arsenate.

Induction of 1-cys peroxiredoxin expression by oxidative stress in lung epithelial cells.

Acrolein-induced vasomotor responses of rat aorta.

[Effect of aminotriazole on the activity of catalase and glucose-6-phosphate dehydrogenase in tissues of two frog species--*Rana ridibunda* and *Rana esculenta*].

Change in the concentration of vitamins C and E in rat tissues by paraquat administration.

The role of oxidative stress in the in vitro induction of micronuclei by pesticides in mouse lung fibroblasts.

[Acute poisoning caused by intravenous arsenic].

Dioxins released from incineration plants and mortality from major diseases: an analysis of statistical data by municipalities.

'Iron lung': distinctive bronchoscopic features of acute iron tablet aspiration.

Evidence for impaired assimilation of protein in chronic renal failure.

Effects of mitochondrial inhibitors and uncouplers on hypoxic vasoconstriction in rabbit lungs.

Experience of the small size (25 mm) Sorin Bicarbon bileaflet prosthetic valve in patients with small mitral annuli.

Fewer CTL, not enhanced NK cells, are sufficient for viral clearance from the lungs of immunocompromised mice.

Immunoglobulin E is not required for but enhances airway inflammation and hyperresponsiveness.

Pulmonary surfactant protein A, B, and C mRNA and protein expression in the nitrofen-induced congenital diaphragmatic hernia rat model.

Unbalanced collagenases/TIMP-1 expression and epithelial apoptosis in experimental lung fibrosis.

Effect of pesticide exposure on HER-2/neu overexpression seen in patients with extensive stage small cell lung carcinoma.

2,3,7,8-tetrachlorodibenzo-p-dioxin selectively enhances spontaneous IgE production in B cells from atopic patients.

Fetal heart development in the nitrofen-induced CDH rat model: the role of mechanical and nonmechanical factors.

Effect of corticosteroid on lung parenchyma remodeling at an early phase of acute lung injury.

Cancer risk for chemical workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Dermal exposure to 3-amino-5-mercapto-1,2,4-triazole (AMT) induces sensitization and airway hyperreactivity in BALB/c mice.

Short- and long-term morbidity and mortality in the population exposed to dioxin after the "Seveso accident".

Prenatal vitamin E improves lung and heart hypoplasia in experimental diaphragmatic [correction of diaphragmatic] hernia.

Gene expression of fibroblast growth factors 10 and 7 is downregulated in the lung of nitrofen-induced diaphragmatic hernia in rats.

Increased expression of ICAM-1 and VCAM-1 in the lung of nitrofen-induced congenital diaphragmatic hernia in rats.

Examining the relationship between impaired host resistance and altered immune function in mice treated with TCDD.

Large-conductance K⁺ channel openers NS1619 and NS004 as inhibitors of mitochondrial function in glioma cells.

Aryl hydrocarbon receptor gene silencing with small inhibitory RNA differentially modulates Ah-responsiveness in MCF-7 and HepG2 cancer cells.

Expression and activity of matrix metallo proteinases 2 and 9 and their inhibitors in rat lungs during the perinatal period and in diaphragmatic hernia.

Protective effect of melatonin against mitochondrial injury induced by ischemia and reperfusion of rat liver.

Globose basal cells are required for reconstitution of olfactory epithelium after methyl bromide lesion.

Human health effects of sodium azide exposure: a literature review and analysis.

Heat shock protein (HSP72) and p38 MAPK involvement in sublethal hemorrhage (SLH)-induced tolerance.

Effects of agricultural pesticides on the immune system of *Rana pipiens* and on its resistance to parasitic infection.

Health impacts of pesticide exposure in a cohort of outdoor workers.

Risk factors associated with lung cancer in Hong Kong.

Essential role of complex II of the respiratory chain in hypoxia-induced ROS generation in the pulmonary vasculature.

Etiology of congenital diaphragmatic hernia: the retinoid hypothesis.

Airway smooth muscle changes in the nitrofen-induced congenital diaphragmatic hernia rat model.

Matrix metalloproteinase-9 and tissue inhibitor of metalloproteinase-1: expression in the lung of fetal rats with nitrofen-induced diaphragmatic hernia.

Toxicokinetics of DL-glufosinate enantiomer in human BASTA poisoning.

Edaravone protects against ischemia/reperfusion-induced oxidative damage to mitochondria in rat liver.

Down-regulation of sonic hedgehog expression in pulmonary hypoplasia is associated with congenital diaphragmatic hernia.

Different effects of metabolic inhibitors and cyclosporin A on daunorubicin transport in leukemia cells from patients with AML.

Embryological origins and development of the rat diaphragm.

[Inhibition of ABC-transporter(s)' function in non-small cell lung cancer cells by platinum drugs].

Hyperoxia prevents carrageenan-induced enlargement of functional residual lung capacity in rats.

[Occupational epidemiology: from analysis of the apparent to investigation of the unknown].

Transplacental carcinogenicity of inorganic arsenic in the drinking water: induction of hepatic, ovarian, pulmonary, and adrenal tumors in mice.

Iron supplementation improves iron status and reduces morbidity in children with or without upper respiratory tract infections: a randomized controlled study in Colombo, Sri Lanka.

Protein tyrosine phosphatase activity regulates endothelial cell-cell interactions, the paracellular pathway, and capillary tube stability.

Damage to developing mouse skeletal muscle myotubes in culture: protective effect of heat shock proteins.

Involvement of protein tyrosine kinase in Toll-like receptor 4-mediated NF-kappa B activation in human peripheral blood monocytes.

Oxidative stress-induced cell death of human oral neutrophils.

Relationships between respiration and susceptibility to azole antifungals in *Candida glabrata*.

Acutely administered melatonin restores hepatic mitochondrial physiology in old mice.

Endothelial contraction and monolayer hyperpermeability are regulated by Src kinase.

Photosynthetic and respiratory electron transport in the alkaliphilic cyanobacterium *Arthrospira* (*Spirulina*) *platensis*.

Determination of patterns of biologically relevant aldehydes in exhaled breath condensate of healthy subjects by liquid chromatography/atmospheric chemical ionization tandem mass spectrometry.

Cell-specific expression of CYP2A5 in the mouse respiratory tract: effects of olfactory toxicants.

TA-270 [4-hydroxy-1-methyl-3-octyloxy-7-sinapinoylamino-2(1H)-quinolinone], an anti-asthmatic agent, inhibits leukotriene production induced by IgE receptor stimulation in RBL-2H3 cells.

NTP toxicology and carcinogenesis Studies of 2,4-hexadienal (89% trans,trans isomer, CAS No. 142-83-6; 11% cis,trans isomer) (Gavage Studies).

Lethal and sublethal effects of atrazine, carbaryl, endosulfan, and octylphenol on the streamside salamander (*Ambystoma barbouri*).

Simulation of dioxin accumulation in human tissues and analysis of reproductive risk.

Heparan sulfates expressed in the distal lung are required for Fgf10 binding to the epithelium and for airway branching.

[Methodology in occupational and environmental epidemiology].

Dimethyl disulfide exerts insecticidal neurotoxicity through mitochondrial dysfunction and activation of insect K(ATP) channels.

A cuvette-based fluorometric analysis of mitochondrial membrane potential measured in cultured astrocyte monolayers.

Effects of garage employment and tobacco smoking on breathing-zone concentrations of carbonyl compounds.

Genomic and proteomic profiling of responses to toxic metals in human lung cells.

Chemiluminescence response of beta-glucan stimulated leukocytes isolated from different tissues and peritoneal cavity of *Dicentrarchus labrax*.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on chorionic gonadotrophin activity in pregnant macaques.

RNA interference-mediated silencing of *Sod2* in *Drosophila* leads to early adult-onset mortality and elevated endogenous oxidative stress.

Progression of alachlor-induced olfactory mucosal tumours.

Combined methylprednisolone and dexamethasone therapy for paraquat poisoning.

Role of antioxidants in paraquat toxicity.

Differential heat shock gene hsp70-1 response to toxicants revealed by in vivo study of lungs in transgenic mice.

Effects of early embryonal exposure to dexamethasone on malformations of neural-crest derivatives induced by nitrofen in rats.

Paraquat-induced gene expression in rat lung tissues using a differential display reverse transcription-polymerase chain reaction.

Methylprednisolone does not enhance the surfactant effects on oxygenation and histology in paraquat-induced rat lung injury.

Environmental agents as cause of health disorders in children presented at an outpatient unit of environmental medicine.

Protective effect of aminoguanidine against paraquat-induced oxidative stress in the lung of mice.

Predictors of survival after acute paraquat poisoning.

Differential effects of olfactory toxicants on olfactory regeneration.

What is a spontaneous pneumothorax?

Oxysterols as indices of oxidative stress in man after paraquat ingestion.

A 16-year-old boy with rapidly progressing pulmonary fibrosis.

Acrolein-induced cytotoxicity in cultured human bronchial epithelial cells. Modulation by alpha-tocopherol and ascorbic acid.

Paraquat-induced oxidative stress and dysfunction of the glutathione redox cycle in pulmonary microvascular endothelial cells.

In vivo genotoxicity evaluation of dimethylarsinic acid in MutaMouse.

Fetotoxic action of 2,4-dichlorophenoxyacetic acid (2,4-D). III. Morphological changes in rat kidneys.

An analysis of glyphosate data from the California Environmental Protection Agency Pesticide Illness Surveillance Program.

Severe propanil [N-(3,4-dichlorophenyl) propanamide] pesticide self-poisoning.

In vitro effect of air pollutants on human bronchi.

Population growth kinetics and bulk membrane lipid alterations in *Tetrahymena pyriformis*: exposure to pentachlorophenol.

Involvement of N-methyl-D-aspartate receptors in nociception in the cyclophosphamide-induced vesical pain model in the conscious rat.

Evaluation of the protective effect of oestradiol against toxicity induced by 6-hydroxydopamine and 1-methyl-4-phenylpyridinium ion (Mpp+) towards dopaminergic mesencephalic neurones in primary culture.

[War and medicine in a culture of peace. 3. Synopsis of chemical warfare agents].

Failure of continuous venovenous hemofiltration to prevent death in paraquat poisoning.

The role of sodium cromolyn in treatment of paraquat-induced pulmonary fibrosis in rat.

Mucin apoprotein expression in COPD.

Serum SP-D is a marker of lung injury in rats.

Inhibition of cell proliferation and AP-1 activity by acrolein in human A549 lung adenocarcinoma cells due to thiol imbalance and covalent modifications.

Mitochondrial-driven bicarbonate transport supports photosynthesis in a marine microalga.

Soy protein reduces paraquat-induced oxidative stress in rats.

In vitro effect of eugenol and cinnamaldehyde on membrane potential and respiratory chain complexes in isolated rat liver mitochondria.

Acrolein causes transcriptional induction of phase II genes by activation of Nrf2 in human lung type II epithelial (A549) cells.

Systemic uptake of inhaled arsenic in rabbits.

Chemiluminescence of superoxide generated by *Candida albicans*: differential effects of the superoxide generator paraquat on a wild-type strain and a respiratory mutant.

Direct analysis of volatile organic compounds in human breath using a miniaturized cylindrical ion trap mass spectrometer with a membrane inlet.

Erythromycin slows aging of *Saccharomyces cerevisiae*.

Mesenchymal nuclear transcription factors in nitrofen-induced hypoplastic lung.

Community exposures to airborne agricultural pesticides in California: ranking of inhalation risks.

Pulmonary effects of ultrafine and fine ammonium salts aerosols in healthy and monocrotaline-treated rats following short-term exposure.

Antenatal dexamethasone enhances endothelin-1 synthesis and gene expression in the heart in congenital diaphragmatic hernia in rats.

Iron-induced bronchial injury.

Role of bioavailable iron in coal dust-induced activation of activator protein-1 and nuclear factor of activated T cells: difference between Pennsylvania and Utah coal dusts.

Cytoskeletal structure of myoblasts with the mitochondrial DNA 3243A-->G mutation and of osteosarcoma cells with respiratory chain deficiency.

Arsenite cocarcinogenesis: an animal model derived from genetic toxicology studies.

Indirect effects of oral tolerance to ovalbumin interfere with the immune responses triggered by *Schistosoma mansoni* eggs.

Expression of surfactant proteins and thyroid transcription factor 1 in an ovine model of congenital diaphragmatic hernia.

Differential toxicogenomic responses to 2,3,7,8-tetrachlorodibenzo-p-dioxin in malignant and nonmalignant human airway epithelial cells.

Clinical approach to chronic beryllium disease and other nonpneumoconiotic interstitial lung diseases.

Mortality in dioxin-exposed mice infected with influenza: mitochondrial toxicity (reye's-like syndrome) versus enhanced inflammation as the mode of action.

Nitrofen inhibition of pulmonary growth and development occurs in the early embryonic mouse.

Thyroid transcription factor-1 expression during normal human lung development and in patients with congenital diaphragmatic hernia.

Effect of mechanical ventilation on the pulmonary expression and production of elastin in nitrofen-induced diaphragmatic hernia in rats.

Oxidation-reduction (redox) controls fetal hypoplastic lung growth.

Murine nitrofen-induced pulmonary hypoplasia does not involve induction of TGF-beta signaling.

Stress protection by a fluorescent Hsp27 chimera that is independent of nuclear translocation or multimeric dissociation.

Workshop report. Children as a special subpopulation: focus on immunotoxicity. Federal Institute for Health Protection of Consumers and Veterinary Medicine (BgVV), 15-16 November 2001, Berlin, Germany.

Challenging embryological theories on congenital diaphragmatic hernia: future therapeutic implications for paediatric surgery.

Induction of HSP72 by sodium arsenite fails to protect against cholecystokinin-octapeptide-induced acute pancreatitis in rats.

Does iron have a place in the management of breath holding spells?

Angiopoietin-1 and VEGF in vascular development and angiogenesis in hypoplastic lungs.

Immunologic biomarkers in relation to exposure markers of PCBs and dioxins in Flemish adolescents (Belgium).

Increased vascular endothelial growth factor peptide and gene expression in hypoplastic lung in nitrofen induced congenital diaphragmatic hernia in rats.

Effect of prenatal glucocorticoids and postnatal nitric oxide inhalation on survival of newborn rats with nitrofen-induced congenital diaphragmatic hernia.

Proinflammatory and Th1 cytokine alterations following ultraviolet radiation enhancement of disease due to influenza infection in mice.

Tumor necrosis factor-alpha and interleukin-1beta mediate the production of nitric oxide involved in the pathogenesis of ifosfamide induced hemorrhagic cystitis in mice.

Syndrome of iron pill aspiration.

Marginal iron deficiency without anemia impairs aerobic adaptation among previously untrained women.

[Acute effects of methyl bromide gas in rats and mice--studies on survival time].

Chemical predictors of wheeze among farmer pesticide applicators in the Agricultural Health Study.

Non-ahr gene susceptibility Loci for porphyria and liver injury induced by the interaction of 'dioxin' with iron overload in mice.

Arsenic-induced Mre11 phosphorylation is cell cycle-dependent and defective in NBS cells.

Decrease in K-ras p21 and increase in Raf1 and activated Erk 1 and 2 in murine lung tumors initiated by N-nitrosodimethylamine and promoted by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Association between chronic exposure to pesticides and recorded cases of human malignancy in Gaza Governorates (1990-1999).

Identification of a novel dioxin-inducible cytochrome P450.

Lack of promoting effect due to oral administration of dimethylarsinic acid on rat lung carcinogenesis initiated with N-bis(2-hydroxypropyl)nitrosamine.

[Exposure to selected aldehydes among municipal transport bus drivers].

Expression of the uncoupling protein 1 from the aP2 gene promoter stimulates mitochondrial biogenesis in unilocular adipocytes in vivo.

Metabolism and excretion of 2-nitro-p-cresol in rats.

Acute arsenite-induced 8-hydroxyguanine is associated with inhibition of repair activity in cultured human cells.

Role of oxidative phosphorylation and ATP release in mediating birth-related pulmonary vasodilation in fetal lambs.

Cyclosporin A-sensitive permeability transition pore is involved in Cd(2+)-induced dysfunction of isolated rat liver mitochondria: doubts no more.

Oxidative stress and gene transcription in asthma and chronic obstructive pulmonary disease: antioxidant therapeutic targets.

Biochemical evidence for transcytotic absorption of polyaspartamide from the rat lung: effects of temperature and metabolic inhibitors.

Hazardous air pollutants and asthma.

Severe 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) intoxication: insights into the measurement of hepatic cytochrome P450 1A2 induction.

Simple fibroblast-based assay for screening of new antimicrobial drugs against *Mycobacterium tuberculosis*.

Urokinase induces its own expression in Beas2B lung epithelial cells.

Mechanism of cytotoxicity of paraquat.

The effect of ascorbic acid and ethanol on the level of thiobarbituric acid reactive substances (TBARS) in selected tissues of albino BALB/c mice.

Sensory nerve-mediated nasal vasodilatory response to inspired ethyl acrylate.

Stereoselective transport of histidine in rat lung microvascular endothelial cells.

Induction of CYP1A1 and CYP1A2 expressions by prototypic and atypical inducers in the human lung.

[Inhibitors of complex III and IV of the mitochondrial respiratory chain].

[Changes of thioredoxin mRNA level in neurons insulted by sodium azide].

Thrombin-stimulated cell proliferation mediated through activation of Ras/Raf/MEK/MAPK pathway in canine cultured tracheal smooth muscle cells.

Effect of the new matrix metalloproteinase inhibitor RO-28-2653 on mitochondrial function.

Activation of the hexose monophosphate shunt in rat type II pneumocytes as an early marker of oxidative stress caused by cobalt particles.

Arsenic induces oxidative stress and activates stress gene expressions in cultured lung epithelial cells.

In vitro cytotoxicity testing with fluorescence-based assays in cultured human lung and dermal cells.

Acute sodium arsenite administration induces pulmonary CYP1A1 mRNA, protein and activity in the rat.

Captopril inhibits the pulmonary toxicity of paraquat in rats.

Changes in plasma antiproteases in paraquat poisoned rats using micro two-dimensional electrophoretic analysis.

DNA damage by cadmium and arsenic salts assessed by the single cell gel electrophoresis assay.

Changes in concentrations of type IV collagen and tissue inhibitor of metalloproteinase-1 in patients with paraquat poisoning.

Surfactant and corticosteroid effects on lung function in a rat model of acute lung injury.

Paraquat in developing countries.

Cardiac gene expression and synthesis of atrial natriuretic peptide in the nitrofen model of congenital diaphragmatic hernia in rats: effect of prenatal dexamethazone treatment.

Restoring effects of vitamin A on surfactant synthesis in nitrofen-induced congenital diaphragmatic hernia in rats.

Lung tissue mechanics and extracellular matrix remodeling in acute lung injury.

Oral exposure of dimethylarsinic acid, a main metabolite of inorganic arsenics, in mice leads to an increase in 8-Oxo-2'-deoxyguanosine level, specifically in the target organs for arsenic carcinogenesis.

Role of heat shock protein 60 (HSP60) on paraquat intoxication.

Oxidized forms of peroxiredoxins and DJ-1 on two-dimensional gels increased in response to sublethal levels of paraquat.

Decreased plasma and cerebrospinal fluid glutamine concentrations in a patient with bialaphos poisoning.

Carrier-mediated processes in blood--brain barrier penetration and neural uptake of paraquat.

Assessment of pentachlorophenol-exposed timber workers using a test-of-poisoning model.

Metabolic complications of organophosphate and carbamate poisoning.

Prenatal exposure to nitrofen induces Fryns phenotype in mice.

Tracheal injury caused by ingested paraquat.

Effects of atrazine on embryos, larvae, and adults of anuran amphibians.

A concise review of the toxicity and carcinogenicity of dimethylarsinic acid.

Carcinogenicity assays of wood dust and wood additives in rats exposed by long-term inhalation.

The role of nitric oxide in paraquat-induced cytotoxicity in the human A549 lung carcinoma cell line.

Effect of cigarette smoke extract on neonatal porcine vascular smooth muscle cells.

Association of elevated blood levels of pentachlorophenol (PCP) with cellular and humoral immunodeficiencies.

Pentachlorophenol potentiates benzo[a]pyrene DNA adduct formation in adult but not infant B6C3F1 male mice.

Urothelial cytotoxicity and regeneration induced by dimethylarsinic acid in rats.

Cigarette smoke inhibits human bronchial epithelial cell repair processes.

Altered gene level expression of thyroid hormone receptors alpha-1 and beta-1 in the lung of nitrofen-induced diaphragmatic hernia.

Inhibition of neutrophil apoptosis by acrolein: a mechanism of tobacco-related lung disease?

Heterozygosity for the mouse Apex gene results in phenotypes associated with oxidative stress.

Hyperbaric oxygenation pretreatment induces catalase and reduces infarct size in ischemic rat myocardium.

Chronic low-level administration of diquat increases the nociceptive response to gastric distension in rats: role of mast cells and tachykinin receptor activation.

Overexpression of manganese superoxide dismutase protects lung epithelial cells against oxidant injury.

Impaired spreading of surfactant phospholipids in the lungs of newborn rats with pulmonary hypoplasia as a model of congenital diaphragmatic hernia induced by nitrofen.

Effects of chlorpropham (CIPC) on the hemopoietic system of rats.

Haemonchus contortus utilises catalase in defence against exogenous hydrogen peroxide in vitro.

Ceramide-mediated apoptosis in lung epithelial cells is regulated by glutathione.

Sensory-nerve-mediated nasal vasodilatory response to inspired acetaldehyde and acetic acid vapors.

Cigarette smoke impairs neutrophil respiratory burst activation by aldehyde-induced thiol modifications.

Metabolism and distribution of [2,3-(14)C]acrolein in lactating goats.

Role of the epithelium in opposing H₂O₂-induced modulation of acetylcholine-induced contractions in rabbit intrapulmonary bronchiole.

Hyperoxia inhibits oxidant-induced apoptosis in lung epithelial cells.

DJ-1 is an indicator for endogenous reactive oxygen species elicited by endotoxin.

Decreased lung function associated with perinatal exposure to Dutch background levels of dioxins.

Expression of MRP1 and related transporters in human lung cells in culture.

A dot-immunobinding assay (dot-Iba) for rapid diagnosis of pulmonary tuberculosis.

[A case of fatal acute sodium azide poisoning].

Butylhydroxytoluene (BHT) increases susceptibility of transgenic rasH2 mice to lung carcinogenesis.

Decreased mitogen activated protein kinase activities in congenital diaphragmatic hernia-associated pulmonary hypoplasia.

Iron supplementation inhibits cough associated with ACE inhibitors.

Down-regulation of regulatory proteins for differentiation and proliferation in murine fetal hypoplastic lungs: altered mesenchymal-epithelial interactions.

Absence of Crabtree effect in human melanoma cells adapted to growth at low pH: reversal by respiratory inhibitors.

Use of a toxicokinetic model in the analysis of cancer mortality in relation to the estimated absorbed dose of dioxin (2,3,7,8-tetrachlorodibenzo-p-dioxin, TCDD).

Suppression of allergic immune responses to house dust mite (HDM) in rats exposed to 2,3,7,8-TCDD.

Health effects of dioxin exposure: a 20-year mortality study.

Fetal tracheal occlusion in the rat model of nitrofen-induced congenital diaphragmatic hernia: tracheal occlusion reverses the arterial structural abnormality.

Neural crest-derived defects in experimental congenital diaphragmatic hernia.

Dioxin exposure and public health in Chapaevsk, Russia.

Structural immaturity of the heart in congenital diaphragmatic hernia in rats.

Phosphorylation of xanthine dehydrogenase/oxidase in hypoxia.

Suppression of CYP1A1 expression by 4-nonylphenol in murine Hepa-1c1c7 cells.

[Prognostic indexes derived from ventricular morphology in congenital diaphragmatic hernia induced by nitrofen].

Oxygen-induced vasodilation is blunted in pulmonary arterioles from fetal rats with nitrofen-induced congenital diaphragmatic hernia.

Lung carcinogenesis: resveratrol modulates the expression of genes involved in the metabolism of PAH in human bronchial epithelial cells.

Notification of occupational and work-related diseases and poisonings in Malaysia, 1997-1998.

Identification by mass spectrometry of a new alpha-tubulin isotype expressed in human breast and lung carcinoma cell lines.

BAPS prize-1999: Lung growth induced by prenatal tracheal occlusion and its modifying factors: a study in the rat model of congenital diaphragmatic hernia.

Separation of cold medicine ingredients by capillary electrophoresis.

Evidence of P-glycoprotein mediated apical to basolateral transport of flunisolide in human broncho-tracheal epithelial cells (Calu-3).

Respiratory chain network in mitochondria of *Candida parapsilosis*: ADP/O appraisal of the multiple electron pathways.

Histopathological alterations and induction of cytochrome P-450 1A in the liver and gills of the gilthead seabream (*Sparus aurata*) exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Analysis of volatile sulphur compounds in breath by gas chromatography-mass spectrometry using a three-stage cryogenic trapping preconcentration system.

Toxicological relevance of the multidrug resistance protein 1, MRP1 (ABCC1) and related transporters.

Reductions in systemic oxygen delivery induce a hypometabolic state in the turtle *Trachemys scripta*.

Characterization of three bioenergetically active respiratory terminal oxidases in the cyanobacterium *Synechocystis* sp. strain PCC 6803.

Role of substrates in the regulation of mitochondrial function in situ.

Pulmonary Cyp1A1 and CYP1A2 levels and activities in adult male and female offspring of rats exposed during gestation and lactation to 2,3,7, 8-tetrachlorodibenzo-p-dioxin.

Serine proteases increase oxidative stress in lung cells.

Bivalent metal ions modulate Cd²⁺ effects on isolated rat liver mitochondria.

Cytotoxic effects of cigarette smoke extract on an alveolar type II cell-derived cell line.

TAT peptide on the surface of liposomes affords their efficient intracellular delivery even at low temperature and in the presence of metabolic inhibitors.

Fusarium solani major allergen peptide IV-1 binds IgE but does not release histamine.

Sodium arsenite enhances AP-1 and NFkappaB DNA binding and induces stress protein expression in precision-cut rat lung slices.

Pressure drop and service life predictions for respirator canisters.

Toxicology of metam sodium.

Mechanisms of thrombin-induced MAPK activation associated with cell proliferation in human cultured tracheal smooth muscle cells.

Mitochondrial adaptation to in vivo polyunsaturated fatty acid deficiency: increase in phosphorylation efficiency.

Effects of cresols (o-, m-, and p-isomers) on the bioenergetic system in isolated rat liver mitochondria.

Prolonged hypoxia during cell development protects mature manganese superoxide dismutase-deficient astrocytes from damage by oxidative stress.

Effect of the respiratory activity on photoinhibition of the cyanobacterium *Synechocystis* sp.

Cultured rat vascular smooth muscle cells are resistant to methylamine toxicity: no correlation to semicarbazide-sensitive amine oxidase.

Application of the nitroblue tetrazolium-reduction method for studies on the production of reactive oxygen species in insect haemocytes.

Nitroxide TEMPOL impairs mitochondrial function and induces apoptosis in HL60 cells.

Genotoxic effects of carbon black particles, diesel exhaust particles, and urban air particulates and their extracts on a human alveolar epithelial cell line (A549) and a human monocytic cell line (THP-1).

Carcinogen biomarkers for lung or oral cancer chemoprevention trials.

Metabolic fate of [14C]-ethanol into endothelial cell phospholipids including platelet-activating factor, sphingomyelin and phosphatidylethanol.

Inhalation toxicity studies of the alpha,beta-unsaturated ketones: 2-cyclohexene-1-one.

Acute and repeated vapor exposure toxicology of 3-(methylthio)propionaldehyde.

Evolution of alachlor-induced nasal neoplasms in the Long-Evans rat.

[Paraquat poisoning. A study of 29 cases and evaluation of the effectiveness of the "Caribbean scheme"].

72-kDa stress protein (hsp72) induced by administration of dimethylarsinic acid to mice accumulates in alveolar flat cells of lung, a target organ for arsenic carcinogenesis.

[Poisonings with the herbicides glyphosate and glyphosate-trimesium].

Lung toxicity of paraquat in the rat.

Comparative toxicity of trivalent and pentavalent inorganic and methylated arsenicals in rat and human cells.

Clinical presentations and prognostic factors of a glyphosate-surfactant herbicide intoxication: a review of 131 cases.

Induction of microsatellite mutations by oxidative agents in human lung cancer cell lines.

Increase in production of ascorbate radical in tissues of rat treated with paraquat.

Effects of environmental pollutants on airways, allergic inflammation, and the immune response.

Propofol improves recovery from paraquat acute toxicity in vitro and in vivo.

Subchronic toxicity of chlorpropham (CIPC) in ICR mice.

Correlating the severity of paraquat poisoning with specific hemodynamic and oxygen metabolism variables.

The effect of exposure to a commercial 2,4-D herbicide formulation during gestation on urethan-induced lung adenoma formation in CD-1 mice.

No significant paraquat-induced oxidative DNA damage in rats.

NMDA receptor activation: critical role in oxidant tissue injury.

Cellular mechanisms of acrolein-induced alteration in calcium signaling in airway smooth muscle.

Effects of methacrolein on the respiratory tract in mice.

A fatal case of chlorate poisoning: confirmation by ion chromatography of body fluids.

Paraquat-induced membrane dysfunction in pulmonary microvascular endothelial cells.

Ligation of the bronchial artery in sheep attenuates early pulmonary changes following exposure to smoke.

Paraquat induces different pulmonary biochemical responses in Wistar rats and Swiss mice.

Stimulated pulmonary cell hyperplasia underlies resistance to alpha-naphthylthiourea.

A long-term follow-up of lung function in survivors of paraquat poisoning.

[Liver steatosis and disorders of mitochondrial oxidative phosphorylation after experimental administration of simazine].

Effects of parasitism and pesticide exposure on characteristics and functions of hemocyte populations in the freshwater snail *Lymnaea palustris* (Gastropoda, Pulmonata).

A case of transient diabetes insipidus associated with poisoning by a herbicide containing glufosinate.

Mechanisms of toxicity, clinical features, and management of acute chlorophenoxy herbicide poisoning: a review.

Pulmonary protective effects of curcumin against paraquat toxicity.

Micronucleus test of herbicide terbutol and its metabolites in cultured Chinese hamster lung cells and male CD-1 mice.

Preventive effects of dietary cabbage acylated anthocyanins on paraquat-induced oxidative stress in rats.

Activation of JNK, p38 and ERK mitogen-activated protein kinases by chromium(VI) is mediated through oxidative stress but does not affect cytotoxicity.

Seasonal changes in lung function in a farming population.

Cyclophosphamide-induced cystitis in freely-moving conscious rats: behavioral approach to a new model of visceral pain.

Antenatal dexamethasone enhances endothelin receptorB expression in hypoplastic lung in nitrofen-induced diaphragmatic hernia in rats.

Antenatal dexamethasone improves atrial natriuretic peptide receptors in hypoplastic lung in nitrofen-induced diaphragmatic hernia in rats.

Evidence for a role of chloroethylaziridine in the cytotoxicity of cyclophosphamide.

7-Hydroperoxycholesterol as a marker of oxidative stress in rat kidney induced by paraquat.

Role of phosphoglucomutase of *Bordetella bronchiseptica* in lipopolysaccharide biosynthesis and virulence.

Ferric reduction by iron-limited *Chlamydomonas* cells interacts with both photosynthesis and respiration.

Dose-dependent effects on tissue distribution and metabolism of dimethylarsinic acid in the mouse after intravenous administration.

Multiple respiratory bursts as a response to veratrate stress in *Rhodococcus erythropolis* cells.

The mercapturic acid biotransformation pathway of hexachlorobenzene is not involved in the induction of splenomegaly, or skin and lung lesions in the Brown Norway rat.

Immunologic effects of background exposure to polychlorinated biphenyls and dioxins in Dutch preschool children.

Antenatal dexamethasone administration increases fetal lung DNA synthesis and RNA and protein content in nitrofen-induced congenital diaphragmatic hernia in rats.

Prenatal dexamethasone rescues heart hypoplasia in fetal rats with congenital diaphragmatic hernia.

Lung hypoplasia in the nitrofen model of congenital diaphragmatic hernia occurs early in development.

[Bernardino Ramazzini. *Ante litteram epidemiologist*].

Chronic peritoneal inflammation by cyanate in rats.

[Diagnosis of acute poisoning].

Induction of lung lesions in female rats following chronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The transcriptional signature of dioxin in human hepatoma HepG2 cells.

Antenatal dexamethasone enhances surfactant protein synthesis in the hypoplastic lung of nitrofen-induced diaphragmatic hernia in rats.

Heart-related indices in experimental diaphragmatic hernia.

Selective involvement of reactive oxygen intermediates in platelet-activating factor-mediated activation of NF-kappaB.

Taxol mediates serine phosphorylation of the 66-kDa Shc isoform.

Fewer T lymphocytes and decreased pulmonary influenza virus burden in mice exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Effect of prenatal tetrandrine therapy on pulmonary vascular structural remodeling in the nitrofen-induced CDH rat model.

The association between meconium and the production and reabsorption of lung liquid and lactate loss by in vitro lungs from fetal guinea pigs.

Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) suppresses the humoral and cell-mediated immune responses to influenza A virus without affecting cytolytic activity in the lung.

"Difficult-to-treat" asthma-like symptoms in a 12-yr-old atopic female.

In vitro effects of growth factors on lung hypoplasia in a model of congenital diaphragmatic hernia.

Down-regulation of thyroid transcription factor-1 gene expression in fetal lung hypoplasia is restored by glucocorticoids.

Annexin I is a stress protein induced by heat, oxidative stress and a sulfhydryl-reactive agent.

Effect of CGS 26303, an endothelin-converting enzyme-neutral endopeptidase inhibitor, on nitrofen-induced congenital diaphragmatic hernia in the rat.

Role of manganese-containing superoxide dismutase in oxidative stress and virulence of *Streptococcus pneumoniae*.

Studies of cancer in humans.

Animal studies addressing the carcinogenicity of TCDD (or related compounds) with an emphasis on tumour promotion.

Isolation of a 41-kDa protein with cell adhesion activity for animal tumor cells from the mushroom *Hypsizygus marmoreus* by affinity chromatography with type IV collagen immobilized on agarose.

Dual-hit hypothesis explains pulmonary hypoplasia in the nitrofen model of congenital diaphragmatic hernia.

Possible role of ROS as mediators of hypoxia-induced ion transport inhibition of alveolar epithelial cells.

Increase of specific symptoms after long-term use of chlorophenol polluted drinking water in a community.

The impact of 4-chloro-m-cresol in heparin formulas on malignant hyperthermia: in vitro and in vivo.

Iron supplementation improves endurance after training in iron-depleted, nonanemic women.

Induction and regulation of xenobiotic-metabolizing cytochrome P450s in the human A549 lung adenocarcinoma cell line.

Chronic ethanol ingestion increases efficiency of oxidative phosphorylation in rat liver mitochondria.

Toxic action/toxicity.

Mass psychogenic illness attributed to toxic exposure at a high school.

Effect of hyperoxia on surfactant protein gene expression in hypoplastic lung in nitrofen-induced diaphragmatic hernia in rats.

Antenatal dexamethasone administration inhibits smooth-muscle-cell DNA synthesis in pulmonary-arterial media in nitrofen-induced congenital diaphragmatic hernia in rats.

Fumigant-related illnesses: Washington State's five-year experience.

Cell proliferation and apoptosis in experimental lung hypoplasia.

Early lung malformations in congenital diaphragmatic hernia.

Administration of antenatal glucocorticoids upregulates peptide growth factor gene expression in nitrofen-induced congenital diaphragmatic hernia in rats.

Glycosaminoglycan sulfation requirements for respiratory syncytial virus infection.

The carbon source influences the energetic efficiency of the respiratory chain of N₂-fixing *Acetobacter diazotrophicus*.

Dose distribution measurements by MRI of a phantom containing lung tissue equivalent compartments made of ferrous sulphate gel.

Hemodynamic dysfunction and cytochrome P4501A mRNA expression induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin during embryonic stages of lake trout development.

TNF-alpha-induced cyclooxygenase-2 expression in human lung epithelial cells: involvement of the phospholipase C-gamma 2, protein kinase C-alpha, tyrosine kinase, NF-kappa B-inducing kinase, and I-kappa B kinase 1/2 pathway.

Genotoxicity of urban air pollutants in the Czech Republic. Part II. DNA adduct formation in mammalian cells by extractable organic matter.

Dexamethasone enhances ras-recision gene expression in cultured murine fetal lungs: role in development.

Roles of respiratory oxidases in protecting Escherichia coli K12 from oxidative stress.

Excretion of hexachlorobenzene and metabolites in feces in a highly exposed human population.

Tumour necrosis factor-alpha- and interleukin-1beta-stimulated cell proliferation through activation of mitogen-activated protein kinase in canine tracheal smooth muscle cells.

Anti-inflammatory effect of heat shock protein induction is related to stabilization of I kappa B alpha through preventing I kappa B kinase activation in respiratory epithelial cells.

Metabolic inactivation of five glycidyl ethers in lung and liver of humans, rats and mice in vitro.

Oxidative stress in female B6C3F1 mice following acute and subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

TCDD induces CYP1A4 and CYP1A5 in chick liver and kidney and only CYP1A4, an enzyme lacking arachidonic acid epoxygenase activity, in myocardium and vascular endothelium.

Angiotensin II stimulates endothelial vascular cell adhesion molecule-1 via nuclear factor-kappaB activation induced by intracellular oxidative stress.

Polyamines in the lung: polyamine uptake and polyamine-linked pathological or toxicological conditions.

1,2-Dichlorobenzene-mediated hepatocellular oxidative stress in Fischer-344 and Sprague-Dawley rats.

Cromakalim-induced membrane current in guinea-pig tracheal smooth muscle cells.

Candida albicans mutants deficient in respiration are resistant to the small cationic salivary antimicrobial peptide histatin 5.

Respiratory state and phosphatidylserine import in brain mitochondria in vitro.

Heparin and in-vitro experimental lung hypoplasia.

Influence of cytoskeletal agents on the respiratory electron transport pathways in the cells of winter wheat leaves.

[Chemical accident in SchÃ¶nbeck--an assessment of the risk to health and environment].

Uncoupling effect of anacardic acids from cashew nut shell oil on oxidative phosphorylation of rat liver mitochondria.

Rapid lethal intoxication caused by the herbicide glyphosate-trimesium (Touchdown).

Nitrofen-induced congenital malformations of the heart and great vessels in rats: an animal model.

A mechanism of paraquat toxicity involving nitric oxide synthase.

Multiple logistic regression analysis of plasma paraquat concentrations as a predictor of outcome in 375 cases of paraquat poisoning.

Renal failure and corrosive airway and gastrointestinal injury after ingestion of diluted diquat solution.

Acute paraquat intoxication: using nuclear pulmonary studies to predict patient outcome.

Effects of a herbicide formulation, Tordon 75D, and its individual components on the oxidative functions of mitochondria.

Fatal paraquat poisoning: report of two cases.

Human isolated airway contraction: interaction between air pollutants and passive sensitization.

Selenium-dependent cellular glutathione peroxidase protects mice against a pro-oxidant-induced oxidation of NADPH, NADH, lipids, and protein.

Homicide by paraquat poisoning.

Long-term respiratory health effects of the herbicide, paraquat, among workers in the Western Cape.

Dimethylarsinic acid effects on DNA damage and oxidative stress related biochemical parameters in B6C3F1 mice.

Protective effects of dietary nasunin on paraquat-induced oxidative stress in rats.

A toxicokinetic analysis in a patient with acute glufosinate poisoning.

Acrolein-induced toxicity--defective mitochondrial function as a possible mechanism.

Acrolein toxicity: comparative in vitro study with lung slices and pneumocytes type II cell line from rats.

Paraquat myopathy: report on two suicide cases.

The first ever report of homicidal poisoning by intramuscular injection of gramoxone (paraquat).

Acute pulmonary toxicity of acrolein in rats--underlying mechanism.

Clinical course of a fatal ingestion of diquat.

Increased myofibroblast contractile sensitivity in paraquat pretreated rat lung tissue.

Acute poisoning with a herbicide containing imazapyr (Arsenal): a report of six cases.

Monocyte inflammation augments acrolein-induced Muc5ac expression in mouse lung.

Vitamin A decreases the incidence and severity of nitrofen-induced congenital diaphragmatic hernia in rats.

Evidence for site-specific bioactivation of alachlor in the olfactory mucosa of the Long-Evans rat.

Acrolein causes inhibitor kappaB-independent decreases in nuclear factor kappaB activation in human lung adenocarcinoma (A549) cells.

Regulation of human airway mucins by acrolein and inflammatory mediators.

Hydrogen peroxide in the breath of rats: the effects of hypoxia and paraquat.

³²P-postlabelling with high-performance liquid chromatography for analysis of abundant DNA adducts in human tissues.

Sensory nerve-mediated immediate nasal responses to inspired acrolein.

Oxidative stress sensitivity and superoxide dismutase of a wild-type parent strain and a respiratory mutant of *Candida albicans*.

Superoxide production from paraquat evoked by exogenous NADPH in pulmonary endothelial cells.

Effects of secretable SOD delivered by genetically modified cells on xanthine/xanthine oxidase and paraquat-induced cytotoxicity in vitro.

Acrolein cytotoxicity and glutathione depletion in n-3 fatty acid sensitive- and resistant human tumor cells.

[Absence of cardiac hypoplasia in an experimental model of congenital diaphragmatic hernia].

Fatal privet (*Ligustrum amurese*) toxicosis in Tennessee cows.

Implication of mitochondria-derived reactive oxygen species, cytochrome C and caspase-3 in N-(4-hydroxyphenyl)retinamide-induced apoptosis in cervical carcinoma cells.

Antenatal dexamethasone suppresses tumor necrosis factor-alpha expression in hypoplastic lung in nitrofen-induced diaphragmatic hernia in rats.

Heat shock protein suppresses the senescent lung cytokine response to acute endotoxemia.

Reinnervation of the rat olfactory bulb after methyl bromide-induced lesion: timing and extent of reinnervation.

Connective tissue responses to calcium hydroxide-based root canal medicaments.

Cardiovascular malformations in experimental congenital diaphragmatic hernia.

Fetal tracheal occlusion in the rat model of nitrofen-induced congenital diaphragmatic hernia.

Geographical differences of cancer incidence in Costa Rica in relation to environmental and occupational pesticide exposure.

Biochemistry of hemlock (*Conium maculatum* L.) alkaloids and their acute and chronic toxicity in livestock. A review.

Cancer, heart disease, and diabetes in workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Delayed acute toxicity of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin (HpCDD), after oral administration, Obeys Haber's rule of inhalation toxicology.

Increased tropoelastin and procollagen expression in the lung of nitrofen-induced diaphragmatic hernia in rats.

Heart hypoplasia in experimental congenital diaphragmatic hernia.

Cytochrome P450 CYP1B1 determines susceptibility to 7, 12-dimethylbenz[a]anthracene-induced lymphomas.

[Oxidative injury and its defense system in vivo].

Tumor necrosis factor-alpha stimulates attachment of small cell lung carcinoma to endothelial cells.

Sodium arsenite enhances copper accumulation in human lung adenocarcinoma cells.

The genetics of endometriosis.

Dioxin is a systemic promoter blocker, II.

Differential response to benzo[A]pyrene in human lung adenocarcinoma cell lines: the absence of aryl hydrocarbon receptor activation.

Lung hypoplasia caused by nitrofen is mediated by down-regulation of thyroid transcription factor TTF-1.

The tracheobronchial tree is abnormal in experimental congenital diaphragmatic hernia.

Pulmonary neuroendocrine cells in nitrofen-induced diaphragmatic hernia and the effect of prenatal glucocorticoids.

Effect of antenatal glucocorticoid administration on insulin-like growth factor I and II levels in hypoplastic lung in nitrofen-induced congenital diaphragmatic hernia in rats.

Prenatal vitamin E treatment improves lung growth in fetal rats with congenital diaphragmatic hernia.

Trovafloxacin: an overview.

Biological monitoring of occupational exposure to inorganic arsenic.

Hypoxia upregulates activity and expression of the glucose transporter GLUT1 in alveolar epithelial cells.

VEGF stimulates tyrosine phosphorylation of beta-catenin and small-pore endothelial barrier dysfunction.

Amount and fate of egg protein escaping assimilation in the small intestine of humans.

Postservice mortality of US Air Force veterans occupationally exposed to herbicides in Vietnam: 15-year follow-up.

The nature of antioxidant defense mechanisms: a lesson from transgenic studies.

Airspace configuration at different transpulmonary pressures in normal and paraquat-induced lung injury in rats.

Health effects of occupational pentachlorophenol exposure in timber sawmill employees: a preliminary study.

Surfactant therapy restores gas exchange in lung injury due to paraquat intoxication in rats.

Single lung transplantation for adult respiratory distress syndrome after paraquat poisoning.

Cellular glutathione peroxidase is the mediator of body selenium to protect against paraquat lethality in transgenic mice.

Paraquat-induced renal injury studied by ¹H nuclear magnetic resonance spectroscopy of urine.

Malicious paraquat poisoning in Oklahoma dogs.

Clinical experience with pendimethalin (STOMP) poisoning in Taiwan.

Second follow-up of a Dutch cohort occupationally exposed to phenoxy herbicides, chlorophenols, and contaminants.

[Lethal paraquat poisoning caused by spraying in a vinyl greenhouse of causing pulmonary fibrosis with a hepatorenal dysfunction].

Dimethylarsinic acid, a main metabolite of inorganic arsenics, has tumorigenicity and progression effects in the pulmonary tumors of A/J mice.

Paraquat poisoning: an experimental model of dose-dependent acute lung injury due to surfactant dysfunction.

G-protein activation and expression in lung injury.

Mitochondrial NADH-quinone oxidoreductase of the outer membrane is responsible for paraquat cytotoxicity in rat livers.

Apoptosis in human lung epithelial cells: triggering by paraquat and modulation by antioxidants.

Nitric oxide inhalation for paraquat--surviving both poisoning and therapy?

Nitric oxide inhalation for paraquat-induced lung injury.

Acrolein: a respiratory toxin that suppresses pulmonary host defense.

Accentuation of paraquat-induced toxicity by L-carnitine in mice.

In vivo dual effects of vitamin C on paraquat-induced lung damage: dependence on released metals from the damaged tissue.

Pulmonary arterioles from rats with congenital diaphragmatic hernias are hypoplastic but not hyperresponsive.

Hypoxic pulmonary vasoconstriction is impaired in rats with nitrofen-induced congenital diaphragmatic hernia.

Asbestos-induced lung epithelial permeability: potential role of nonoxidant pathways.

Role of tumor necrosis factor-alpha in regulating fibrotic lung repair.

Effect of dexamethasone on endothelial nitric oxide synthase in experimental congenital diaphragmatic hernia.

Nitro blue tetrazolium inhibits but does not mimic hypoxic vasoconstriction in isolated rabbit lungs.

Endothelin-1 pulmonary vasoconstriction in rats with diaphragmatic hernia.

Hypoxia-specific upregulation of calpain activity and gene expression in pulmonary artery endothelial cells.

Health effects associated with sulfuric fluoride and methyl bromide exposure among structural fumigation workers.

Concentrated cresol intoxication.

Differential gene expression at gestational days 14 and 16 in normal and nitrogen-induced hypoplastic murine fetal lungs with coexistent diaphragmatic hernia.

Herbimycin-A attenuates ischaemia-reperfusion induced pulmonary neutrophil infiltration.

Immunologic cross-reactivity between respiratory chemical sensitizers: reactive dyes and cyanuric chloride.

Induction of cytochrome P-450 1A1 by omeprazole in human HepG2 cells is protein tyrosine kinase-dependent and is not inhibited by alpha-naphthoflavone.

Binding of the epoxide cryptophycin analog, LY355703 to albumin and its effect on in vitro antiproliferative activity.

Micellar electrokinetic chromatography for the determination of urinary desmosine and isodesmosine in patients affected by chronic obstructive pulmonary disease.

Calcitonin gene-related peptide expression is altered in pulmonary neuroendocrine cells in developing lungs of rats with congenital diaphragmatic hernia.

Administration of antenatal glucocorticoids prevents pulmonary artery structural changes in nitrofen-induced congenital diaphragmatic hernia in rats.

Effects of glucose deprivation, chemical hypoxia, and simulated ischemia on Na⁺ homeostasis in rat spinal cord astrocytes.

Respiratory and cardiovascular effects of the mu-opioid receptor agonist [Lys7]dermorphin in awake rats.

The Seveso studies on early and long-term effects of dioxin exposure: a review.

Inhibition of vascular and epithelial differentiation in murine nitrofen-induced diaphragmatic hernia.

The genetics of endometriosis.

Power and sample size for stratified prospective studies using the score method for testing relative risk.

Levels and membrane localization of the c-K-ras p21 protein in lungs of mice of different genetic strains and effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and Aroclor 1254.

Differential display of genes in normal and hypoplastic fetal murine lungs.

Micropreparation of tissue collagenase fragments of type I collagen in the form of surfactant-peptide complexes and their identification by capillary electrophoresis and partial sequencing.

Dioxin exposure and non-malignant health effects: a mortality study.

Antenatal glucocorticoid therapy suppresses angiotensin-converting enzyme activity in rats with nitrofen-induced congenital diaphragmatic hernia.

Surfactant protein A is decreased in a rat model of congenital diaphragmatic hernia.

The 64-kilodalton eye muscle protein is the flavoprotein subunit of mitochondrial succinate dehydrogenase: the corresponding serum antibodies are good markers of an immune-mediated damage to the eye muscle in patients with Graves' hyperthyroidism.

Aryl hydrocarbon receptor-inducible or constitutive expression of human UDP glucuronosyltransferase UGT1A6.

[Management of hydatid disease of the lung].

Induction of hydrogen peroxide production and Bax expression by caspase-3(-like) proteases in tyrosine kinase inhibitor-induced apoptosis in human small cell lung carcinoma cells.

Endotracheal inhalatory sodium nitroprusside in severely hypoxic newborns.

Effects of the nonsteroidal anti-inflammatory drug nimesulide on energy metabolism in livers from adjuvant-induced arthritic rats.

Pulmonary vascular balance in congenital diaphragmatic hernia: enhanced endothelin-1 gene expression as a possible cause of pulmonary vasoconstriction.

Effect of prenatal glucocorticoids on pulmonary vascular muscularisation in nitrofen-induced congenital diaphragmatic hernia.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazoxybenzene (CAS No. 21232-47-3) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

Aromatic and polycyclic hydrocarbons in air and their urinary metabolites in coke plant workers.

Structural and functional comparison of agents interfering with dihydroorotate, succinate and NADH oxidation of rat liver mitochondria.

Analysis of gene expression in lung and thymus of TCDD treated C57BL/6 mice using differential display RT-PCR.

Evidence for impaired assimilation and increased colonic fermentation of protein, related to gastric acid suppression therapy.

Tyrosine phosphorylation regulates H₂O₂ production in lung fibroblasts stimulated by transforming growth factor beta1.

Biological monitoring of occupational exposure to arsenic by determining urinary content of inorganic arsenic and its methylated metabolites.

Regulation of BMP7 expression during kidney development.

Investigations of the pathways of toxicity of methyl iodide in the rat nasal cavity.

p38 mitogen-activated protein kinase inhibition attenuates intercellular adhesion molecule-1 up-regulation on human pulmonary microvascular endothelial cells.

Species- and sex-related differences in metabolism of trichloroethylene to yield chloral and trichloroethanol in mouse, rat, and human liver microsomes.

p38 mitogen-activated protein kinase expression and activation in smooth muscle.

Oxidative phosphorylation in intact hepatocytes: quantitative characterization of the mechanisms of change in efficiency and cellular consequences.

The effect of Ba²⁺ on the nitrergic mechanism in the isolated frog lung preparation.

The role of glutathione S-transferase- and cytochrome P450-dependent metabolism in the olfactory toxicity of methyl iodide in the rat.

Tyrosine kinases and calcium dependent activation of endothelial cell phospholipase D by diperoxovanadate.

2,4 Dinitrophenol-uncoupling effect on delta psi in living hepatocytes depends on reducing-equivalent supply.

Impact of dioxin-type induction of drug-metabolizing enzymes on the metabolism of endo- and xenobiotics.

Cd²⁺ effects on respiration and swelling of rat liver mitochondria were modified by monovalent cations.

Female Sprague-Dawley rats exposed to a single oral dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin exhibit sustained depletion of aryl hydrocarbon receptor protein in liver, spleen, thymus, and lung.

Cigarette smoke extract inhibits fibroblast-mediated collagen gel contraction.

Mechanical strain increases protein tyrosine phosphorylation in airway smooth muscle cells.

The effect of tyrosine kinase inhibitors on IgE-mediated histamine release from human lung mast cells and basophils.

Identification of a putative surfactant convertase in rat lung as a secreted serine carboxylesterase.

Metabolic interaction between toluene, trichloroethylene and n-hexane in humans.

Cell-specific differences in the susceptibility of potential cellular targets of human origin derived from blood and lung following treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Toxicity of linoleic acid hydroperoxide to *Saccharomyces cerevisiae*: involvement of a respiration-related process for maximal sensitivity and adaptive response.

Metabolic Study of Isoproterenol in Goats Following a Single Oral Administration: Toxicokinetics and Recovery.

Mixed effects of 2,6-dithiopurine against cyclophosphamide mediated bladder and lung toxicity in mice.

Substrate-dependent cadmium toxicity affecting energy-linked K⁺/86Rb transport in *Staphylococcus aureus*.

Enzymatic methylation of arsenic compounds. V. Arsenite methyltransferase activity in tissues of mice.

Mitochondrial dysfunction in the senescence accelerated mouse (SAM).

Respiratory symptoms, spirometry and chronic occupational paraquat exposure.

Chemically reactive intermediates and pulmonary xenobiotic toxicity.

Hemotoxicity of chlorpropham (CIPC) in F344 rats.

Unintentional fatal paraquat poisonings among agricultural workers in Costa Rica: report of 15 cases.

Laryngeal survey in glyphosate intoxication: a pathophysiological investigation.

Relationships between cell density, glutathione and proliferation of A549 human lung adenocarcinoma cells treated with acrolein.

Successful single-lung transplantation after paraquat intoxication.

A case of paraquat poisoning and subsequent fatality presenting to an emergency department.

Determination of 8-hydroxy-deoxyguanosine formation in rat organs: assessment of paraquat-evoked oxidative DNA damage.

A case-control study of lung cancer among Vietnam veterans.

Acrolein-induced cell death in human alveolar macrophages.

Cancer mortality in workers exposed to phenoxy herbicides, chlorophenols, and dioxins. An expanded and updated international cohort study.

Effects of oxygen pressure and medium volume on the toxicity of paraquat in rat and human type II pneumocytes.

The oral and intratracheal toxicities of ROUNDUP and its components to rats.

Pesticides and cancer.

Biochemical studies on the toxicity of 1, 1'-dimethyl-4, 4'-bipyridylium dichloride in the rat.

Upper respiratory tract surface areas and volumes of laboratory animals and humans: considerations for dosimetry models.

A fatal case of drinking and cyanamide intake.

Cell-nuclear accumulation of 72-kDa stress protein induced by dimethylated arsenics.

Homicidal poisoning by paraquat.

Inhibition of intracellular Ca²⁺ signalling, cytotoxicity and antitumor activity of the herbicide oryzalin and its analogues.

Inhibitory effect of nicotinamide to paraquat toxicity and the reaction site on complex I.

Dimethylarsinic acid treatment alters six different rat biochemical parameters: relevance to arsenic carcinogenesis.

Paraquat-induced formation of leukotriene B₄ in rat lungs: modulation by N-acetylcysteine.

Atrial natriuretic peptide accounts for increased cGMP in hypoxia-induced hypertensive rat lungs.

Selective and transient in vitro effects of heat shock on alveolar type II cell gene expression.

Herbicide and estrogen effects on the metabolic activity of *Elliptio complanata* measured by calorimetry.

SlyA, a transcriptional regulator of *Salmonella typhimurium*, is required for resistance to oxidative stress and is expressed in the intracellular environment of macrophages.

Cigarette smoke induces interleukin-8 release from human bronchial epithelial cells.

Changes of energy metabolism induced by 1-methyl-4-phenylpyridinium (MPP⁺)-related compounds in rat pheochromocytoma PC12 cells.

Transforming growth factor-beta1 coregulates mRNA expression of aryl hydrocarbon receptor and cell-cycle-regulating genes in human cancer cell lines.

Induction and prevention of squamous transformation of bronchial epithelial cells by phenolic compounds.

[Bronchial stenosis secondary to aspiration of a ferrous sulfate tablet].

Immune dysfunction in uremia.

Dioxin exposure and cancer risk: a 15-year mortality study after the "Seveso accident".

Thyroid hormones in the pathogenesis of lung hypoplasia and immaturity induced in fetal rats by prenatal exposure to nitrofen.

Upregulation of acidic fibroblast growth factor during development of experimental lung fibrosis.

Effect of 2,4-dinitrophenol on the hypometabolic response to hypoxia of conscious adult rats.

Pathogenesis of nitrofen-induced congenital diaphragmatic hernia in fetal rats.

Pneumocystis carinii cysts are susceptible to inactivation by chemical disinfectants.

Prenatal hormones alter antioxidant enzymes and lung histology in rats with congenital diaphragmatic hernia.

Arsenic alters cytosine methylation patterns of the promoter of the tumor suppressor gene p53 in human lung cells: a model for a mechanism of carcinogenesis.

Mortality among Army Chemical Corps Vietnam veterans.

The multidrug-resistant human lung tumour cell line, DLKP-A10, expresses novel drug accumulation and sequestration systems.

Mitochondrial dysfunction in neurodegeneration.

Inhaled nitric oxide increases survival rates in newborn rats with congenital diaphragmatic hernia.

Effectiveness of iron therapy on breath-holding spells.

Pulmonary expression of vascular endothelial growth factor and myosin isoforms in rats with congenital diaphragmatic hernia.

Role of iron in ischemia-reperfusion oxidative injury of rat lungs.

Modulation of macrophage function for defence of the lung against *Pseudomonas aeruginosa*.

Nitrofen dose-dependent gestational day-specific murine lung hypoplasia and left-sided diaphragmatic hernia.

The role of oxygen free radicals in occupational and environmental lung diseases.

Protective effect of captopril on ischemic myocardium.

Expression of CYP1B1 in human adult and fetal tissues and differential inducibility of CYP1B1 and CYP1A1 by Ah receptor ligands in human placenta and cultured cells.

[Assessment of neurotoxic effects of methyl bromide in exposed workers].

Effect of subchronic 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on immune system and target gene responses in mice: calculation of benchmark doses for CYP1A1 and CYP1A2 related enzyme activities.

Selective photoaffinity labelling of one mitochondrial protein in living cells of *Saccharomyces cerevisiae* with the fluorescent probe APMC. Identification of the target protein as subunit I of cytochrome c oxidase.

Tissue factor pathway inhibitor in endothelial cells colocalizes with glycolipid microdomains/caveolae. Regulatory mechanism(s) of the anticoagulant properties of the endothelium.

Gp60 activation mediates albumin transcytosis in endothelial cells by tyrosine kinase-dependent pathway.

Actions of 4-chloro-3-ethyl phenol on internal Ca^{2+} stores in vascular smooth muscle and endothelial cells.

The Low Biomass Yields of the Acetic Acid Bacterium *Acetobacter pasteurianus* Are Due to a Low Stoichiometry of Respiration-Coupled Proton Translocation.

Oleic acid reduces oxidant stress in cultured pulmonary artery endothelial cells.

Impairment of respiration and oxidative phosphorylation by redox cyclers 2-nitrosofluorene and menadione.

Airborne arsenic and urinary excretion of arsenic metabolites during boiler cleaning operations in a Slovak coal-fired power plant.

Immunochemical, ^{32}P -postlabeling, and GC/MS detection of 4-aminobiphenyl-DNA adducts in human peripheral lung in relation to metabolic activation pathways involving pulmonary N-oxidation, conjugation, and peroxidation.

Phosphatase inhibitors potentiate 4-hydroxynonenal-induced phospholipase D activation in vascular endothelial cells.

Inhibition of protein kinase C prevents asbestos-induced c-fos and c-jun proto-oncogene expression in mesothelial cells.

Cytotoxic effects of 2,6-di-tert-butyl-4-methylphenyl N-methylcarbamate (terbutol) herbicide on hepatocytes and mitochondria isolated from male rats.

Mitochondrial Respiration and Hemoglobin Gene Expression in Barley Aleurone Tissue.

Endotoxin induces endothelial barrier dysfunction through protein tyrosine phosphorylation.

SEB is cytotoxic and alters EC barrier function through protein tyrosine phosphorylation in vitro.

Mitochondrial function is required for resistance to oxidative stress in the yeast *Saccharomyces cerevisiae*.

Endothelial cells protect vascular smooth muscle cells from H_2O_2 attack.

Differences in platelet-activating factor receptor mediated Ca^{++} response between hamster and guinea pig alveolar macrophages.

Resazurin reduction as a function of respiratory burst in bovine neutrophils.

The role of tyrosine phosphorylation in lipopolysaccharide- and zymosan-induced procoagulant activity and tissue factor expression in macrophages.

[Comparative study of the effect of paracetamol, phenacetin and amidopyrine on mitochondrial function in isolated rat hepatocytes].

The toxicity of substituted phenolic compounds to a detoxifying and an acetic acid bacterium.

The ability of a new hypoglycaemic agent, A-4166, compared to sulphonylureas, to increase cytosolic Ca²⁺ in pancreatic beta-cells under metabolic inhibition.

Neutrophil-mediated activation of mitoxantrone to metabolites which form adducts with DNA.

Review and update of the results of the NIOSH medical study of workers exposed to chemicals contaminated with 2,3,7,8-tetrachlorodibenzodioxin.

[Modulation of respiratory activity of renal macrophages in sea bass (*Dicentrarchus labrax*) by chronic exposure to sublethal concentration of ammonia].

A dual effect of 1-methyl-4-phenylpyridinium (MPP⁺)-analogs on the respiratory chain of bovine heart mitochondria.

Urinary excretion of phenols as an indicator of occupational exposure in the coke-plant industry.

[Lesions of the tracheobronchial tree after the aspiration of a tablet of ferrous sulfate].

Urinary excretion of ifosfamide, 4-hydroxyifosfamide, 3- and 2-dechloroethylifosfamide, mesna, and dimesna in patients on fractionated intravenous ifosfamide and concomitant mesna therapy.

Regulation of protein-tyrosine phosphorylation and human sperm capacitation by reactive oxygen derivatives.

Human bronchial smooth muscle responsiveness after in vitro exposure to oxidizing pollutants.

Alleviation of paraquat-induced lung injury by pretreatment with bifunctional liposomes containing alpha-tocopherol and glutathione.

Effect of paraquat intoxication and ambroxol treatment on hydrogen peroxide production and lipid peroxidation in selected organs of rat.

Acute, subchronic and chronic 2,4-dichlorophenoxyacetic acid (2,4-D) intoxication in rats.

Studies on the basis for the toxicity of acrolein mercapturates.

Experimental ureterohydronephrosis in fetal rats.

A metalloporphyrin superoxide dismutase mimetic protects against paraquat-induced lung injury in vivo.

Pulse therapy with cyclophosphamide and methylprednisolone in patients with moderate to severe paraquat poisoning: a preliminary report.

[Paraquat poisoning. Description of a case].

Pulmonary dysfunction in survivors of acute paraquat poisoning.

Cancer mortality in German male workers exposed to phenoxy herbicides and dioxins.

Paraquat toxicity and oxidative damage. Reduction by melatonin.

CT appearance of interstitial pulmonary emphysema.

Pesticide applicators, biocides, and birth defects in rural Minnesota.

Experience with acute paraquat poisoning in Crete.

Exposure to dimethylarsinic acid, a main metabolite of inorganic arsenics, strongly promotes tumorigenesis initiated by 4-nitroquinoline 1-oxide in the lungs of mice.

[Distribution of ventilation-perfusion ratios in paraquat-induced interstitial pneumonia in dogs].

Effect of transfection with superoxide dismutase expression plasmid on superoxide anion induced cytotoxicity in cultured rat lung cells.

Changes in the nasal epithelium of rats exposed by inhalation to mixtures of formaldehyde, acetaldehyde, and acrolein.

Sensory irritation to mixtures of formaldehyde, acrolein, and acetaldehyde in rats.

DNA damage induced in mouse tissues by organic wood preserving waste extracts as assayed by ³²P-postlabeling.

Effects of paraquat on mitochondrial electron transport system and catecholamine contents in rat brain.

Effect of dietary paraquat on a rat mutant unable to synthesize ascorbic acid.

Inhibition of NADH oxidation by 1-methyl-4-phenylpyridinium analogs as the basis for the prediction of the inhibitory potency of novel compounds.

Paraquat causes S-phase arrest of rat liver and lung cells in vivo.

Herbicide: fatal ammonium thiocyanate and aminotriazole poisoning.

N-acetylcysteine increases the glutathione content and protects rat alveolar type II cells against paraquat-induced cytotoxicity.

Biotransformation of acrolein in rat: excretion of mercapturic acids after inhalation and intraperitoneal injection.

In vivo and in vitro analysis of Bordetella pertussis catalase and Fe-superoxide dismutase mutants.

Increased activity and sensitivity of mitochondrial respiratory enzymes to tumor necrosis factor alpha-mediated inhibition is associated with increased cytotoxicity in drug-resistant leukemic cell lines.

Role of manganese superoxide dismutase in a mucoid isolate of Pseudomonas aeruginosa: adaptation to oxidative stress.

Metabolic activation of 2,6-dichlorobenzonitrile, an olfactory-specific toxicant, by rat, rabbit, and human cytochromes P450.

The effects of chronic sidestream cigarette smoke exposure on eicosanoid production by tracheal epithelium.

Nitric oxide exposure and sulfhydryl modulation alter L-arginine transport in cultured pulmonary artery endothelial cells.

Effects of the stress response in septic rats and LPS-stimulated alveolar macrophages: evidence for TNF-alpha posttranslational regulation.

Methyl iodide poisoning: report of two cases.

Developmental toxicity of Exell, a surfactant mixture, in rats and rabbits.

Purification and characterization of a 93 kDa *Aspergillus fumigatus* antigen with diagnostic potential.

The beneficial effect of taurine on the prevention of human endothelial cell death.

Embryology of congenital diaphragmatic hernia.

Bronchial necrosis induced by inhalation of an iron tablet.

Prenatal glucocorticoid therapy reverses pulmonary immaturity in congenital diaphragmatic hernia in fetal sheep.

A 100-kDa protein tyrosine phosphorylation is concurrent with beta 1 integrin-mediated morphological differentiation in neuroblastoma and small cell lung cancer cells.

Prenatal hormonal therapy improves pulmonary morphology in rats with congenital diaphragmatic hernia.

Cause specific mortality and cancer incidence among employees exposed to 2,3,7,8-TCDD after a 1953 reactor accident.

Exposures and health effects: an evaluation of workers at a sodium azide production plant.

Role of endothelium-derived nitric oxide in the modulation of canine myocardial mitochondrial respiration in vitro. Implications for the development of heart failure.

Fulminant malignant hyperthermia associated with ketoacidotic diabetic coma.

Decreased pulmonary nitric oxide synthase activity in the rat model of congenital diaphragmatic hernia.

Disturbed host defense in peritoneal cavity during CAPD: characterization of responsible factors in dwell fluid.

[Occupational asthma in an agricultural setting].

Cancer incidence and specific occupational exposures in the Swedish leather tanning industry: a cohort based case-control study.

Respiratory activity is essential for post-exponential-phase production of type 5 capsular polysaccharide by *Staphylococcus aureus*.

Lung collagen cross-links in rats with experimentally induced pulmonary fibrosis.

Purification and characterization of a protein that permits early detection of lung cancer. Identification of heterogeneous nuclear ribonucleoprotein-A2/B1 as the antigen for monoclonal antibody 703D4.

Dysfunction of polymorphonuclear leukocytes in uremia.

Exogenous catalase may potentiate oxidant-mediated lung injury in the female Sprague-Dawley rat.

Prenatal hormonal therapy improves pulmonary compliance in the nitrofen-induced CDH rat model.

Glutathione transferase activity and formation of macromolecular adducts in two cases of acute methyl bromide poisoning.

Airborne pollutants and the immune system.

Autocrine growth of small cell lung cancer mediated by coexpression of c-kit and stem cell factor.

Arsenite, but not cadmium, induces ornithine decarboxylase and heme oxygenase activity in rat liver: relevance to arsenic carcinogenesis.

Increased expression of intercellular adhesion molecule 1, CD11/CD18 cell surface adhesion glycoproteins and alpha 4 beta 1 integrin in a rat model of chronic interstitial lung fibrosis.

Evaluation of reactive oxygen species involvement in amiodarone pulmonary toxicity in vivo and in vitro.

The pulmonary uptake of intravenously administered liposomal alpha-tocopherol is augmented in acute lung injury.

Reactive airway dysfunction syndrome due to sodium azide inhalation.

Induction of chromosomal aberrations by 2,4-dichloro-6-aminophenol in cultured V79 cells.

Properties controlling the diffusion and release of water-soluble solutes from poly(ethylene oxide) hydrogels. 4. Extended constant rate release from partly-coated spheres.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on influenza virus host resistance in mice.

Lung hypoplasia and surfactant system immaturity induced in the fetal rat by prenatal exposure to nitrofen.

Two distinct loci affecting conversion to mucoidy in *Pseudomonas aeruginosa* in cystic fibrosis encode homologs of the serine protease HtrA.

Inhibition of mitochondrial respiration and oxygen uptake in isolated rat renal tubular fragments by atractyloside.

Isolation and characterization of a novel gene induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in rat liver.

Oxygen dependence of respiration in coupled and uncoupled endothelial cells.

The heat-shock response attenuates lipopolysaccharide-mediated apoptosis in cultured sheep pulmonary artery endothelial cells.

Subcellular localization of TCDD differs between the liver, lungs, and kidneys after acute and subchronic exposure: species/dose comparisons and possible mechanism.

Inducibility of cytochromes P-450 by dioxin in liver and extrahepatic tissues of the marmoset monkey (*Callithrix jacchus*).

Peroxynitrite augments fMLP-stimulated chemiluminescence by neutrophils in human whole blood.

Tissue-specific 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible expression of human UDP-glucuronosyltransferase UGT1A6.

Subchronic dispositional and toxicological effects of arsenate administered in drinking water to mice.

Identification of low molecular weight probes on perforin- and Fas-based killing mediated by cytotoxic T lymphocytes.

Human and rat airway smooth muscle responsiveness after ozone exposure in vitro.

Baculovirus-mediated expression and characterization of rat CYP2A3 and human CYP2a6: role in metabolic activation of nasal toxicants.

Role of protein tyrosine phosphorylation in H₂O₂-induced activation of endothelial cell phospholipase D.

The use of a new viability assay to determine the susceptibility of *Cryptosporidium* and *Eimeria* sporozoites to respiratory inhibitors and extremes of pH.

Increased intracellular levels of calcitonin gene-related peptide-like immunoreactivity in pulmonary endocrine cells in an experimental model of congenital diaphragmatic hernia.

The effect of vapor polarity and boiling point on breakthrough for binary mixtures on respirator carbon.

The effect of the lipid peroxidation product 4-hydroxynonenal and of its metabolite 4-hydroxynonenic acid on respiration of rat kidney cortex mitochondria.

Chronic in vivo sodium azide infusion induces selective and stable inhibition of cytochrome c oxidase.

The nature of uncoupling by n-hexane, 1-hexanethiol and 1-hexanol in rat liver mitochondria.

Comparison of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) disposition following pulmonary, oral, dermal, and parenteral exposures to rats.

Diallyl disulfide induces apoptosis of human colon tumor cells.

Mechanical strain induces pp60src activation and translocation to cytoskeleton in fetal rat lung cells.

Analytical findings in a suicide involving sodium azide.

Mechanisms involved in eosinophil migration. Platelet-activating factor-induced chemotaxis and interleukin-5-induced chemokinesis are mediated by different signals.

Development of a caffeine breath test to measure cytochrome P450-1A activity in birds.

Methyl bromide intoxication during grain store fumigation.

The volume-activated chloride current in endothelial cells from bovine pulmonary artery is not modulated by phosphorylation.

Protection against oxidative injury and permeability alteration in cultured alveolar epithelium by transferrin-catalase conjugate.

Signaling by hemolytically inactive C5b67, an agonist of polymorphonuclear leukocytes.

Synergistic action of NS-004 and internal Ca^{2+} concentration in modulating pulmonary artery K^{+} channels.

[The effect of Cd^{2+} on the respiration and swelling of isolated rat liver mitochondria in incubation media of different compositions].

Induction of cytochromes P450 by dioxins in liver and lung of marmoset monkeys (*Callithrix jacchus*).

Lichen acids as uncouplers of oxidative phosphorylation of mouse-liver mitochondria.

Effects of the nonsteroidal anti-inflammatory drug piroxicam on rat liver mitochondria.

Induction of apoptosis in NK cells by monocyte-derived reactive oxygen metabolites.

Modulation of chemical-induced lung and liver toxicity by all-trans-retinol in the male Sprague-Dawley rat.

Intratracheally administered liposomal alpha-tocopherol protects the lung against long-term toxic effects of paraquat.

A metalloporphyrin superoxide dismutase mimetic protects against paraquat-induced endothelial cell injury, *in vitro*.

Recovery of respiratory function in survivors with paraquat intoxication.

Acrolein-induced smooth muscle hyperresponsiveness and eicosanoid release in excised ferret tracheae.

EPR studies of spin-trapped free radicals in paraquat-treated lung microsomes.

Reduction of intrapulmonary shunt by low-dose inhaled nitric oxide in a patient with late-stage respiratory distress associated with paraquat poisoning.

A new mask filter cartridge used to determine applicator inhalation exposure to an alachlor herbicide (Lasso) during normal spraying operations.

Risk factors for occupational illnesses associated with the use of paraquat (1,1'-dimethyl-4,4'-bipyridylium dichloride) in California.

Treatment of IPF. What does the future hold?

An easy and economical method to prepare cells for cytologic analyses.

Pronounced activation of protein kinase C, ornithine decarboxylase and c-jun proto-oncogene by paraquat-generated active oxygen species in WI-38 human lung cells.

[Paraquat poisoning. Treatment and prognosis].

Xanthine oxidase mediates paraquat-induced toxicity on cultured endothelial cell.

Induction of 8-hydroxy-2-deoxyguanosine and single-strand breaks in DNA of V79 cells by tetrachloro-p-hydroquinone.

Toxicity of cotoran (fluometuron) in Desert sheep.

On the effects of paraquat on isolated mitochondria. Evidence that paraquat causes opening of the cyclosporin A-sensitive permeability transition pore synergistically with nitric oxide.

Mitochondrial bioenergetics is affected by the herbicide paraquat.

Paraquat poisoning of the lung: thin-section CT findings.

Atrazine toxicity on transport properties of hemocyanin in the crab *Oziotelphusa senex senex*.

Lung damage in paraquat poisoning and hyperbaric oxygen exposure: superoxide-mediated inhibition of phospholipase A2.

Fate and effects of acrolein.

Potent protective effect of melatonin on in vivo paraquat-induced oxidative damage in rats.

Survival in a case of massive paraquat ingestion.

Pulmonary damage due to paraquat poisoning through skin absorption.

Liposomal alpha-tocopherol alleviates the progression of paraquat-induced lung damage.

[Fatal fibrosing interstitial pneumopathy of uncommon cause].

Immunohistochemical dynamics of leukotoxin (9,10-epoxy-12-octadecenoic acid) in lungs of rats.

Toxicity of 3-methylindole, 1-nitronaphthalene and paraquat in precision-cut rat lung slices.

Pulmonary endothelial nitric oxide synthase gene expression is decreased in a rat model of congenital diaphragmatic hernia.

Cigarette smoke inhibits lung fibroblast proliferation and chemotaxis.

Putrescine uptake in hamster lung slices and primary cultures of type II pneumocytes.

Isolation and characterization of rat primary lung cells.

Effects of cigarette smoke extract on bovine bronchial epithelial cell attachment and migration.

Oxidant resistance of cadmium-adapted human lung fibroblasts.

Induction of the 72-kD heat shock protein in human skin melanoma and squamous cell carcinoma cell lines.

Expression of iNOS in cultured rat pulmonary artery smooth muscle cells is inhibited by the heat shock response.

Fibroblasts isolated after fibrotic lung injury induce apoptosis of alveolar epithelial cells in vitro.

Induction of heat shock protein 72 prevents neutrophil-mediated human endothelial cell necrosis.

Promotion of N-nitrosodiethylamine-initiated hepatocellular tumors and hepatoblastomas by 2,3,7,8-tetrachlorodibenzo-p-dioxin or Aroclor 1254 in C57BL/6, DBA/2, and B6D2F1 mice.

Intestinal rotation in experimental congenital diaphragmatic hernia.

Purification and identification of mouse lung microvessel endothelial cell-derived chemoattractant for lung-metastasizing murine RAW117 large-cell lymphoma cells: identification as mouse monocyte chemotactic protein 1.

Dietary exposure of mink to carp from Saginaw Bay, Michigan: 2. Hematology and liver pathology.

Bilateral idiopathic loss of peripheral vestibular function with normal hearing.

Immunologic effects of background prenatal and postnatal exposure to dioxins and polychlorinated biphenyls in Dutch infants.

Reconstitution of the rat olfactory epithelium after methyl bromide-induced lesion.

Health effects related to releases of hazardous substances on the Superfund priority list.

Promotion of N-nitrosodimethylamine-initiated mouse lung tumors following single or multiple low dose exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Dioxin--an analysis of the major human studies: comparison with animal-based cancer risks.

Neonatal lethality associated with respiratory distress in mice lacking cytochrome P450 1A2.

Efficient induction of chromosome-type aberrations by topoisomerase II inhibitors closely associated with stabilization of the cleavable complex in cultured fibroblastic cells.

Workers' response to risk notification.

Acinar cell respiration in experimental acute pancreatitis.

Prenatal hormonal therapy improves pulmonary compliance in the nitrofen-induced CDH rat model.

Pulmonary neuroendocrine cells in neonatal rats with congenital diaphragmatic hernia.

Mechanisms of uremic inhibition of phagocyte reactive species production: characterization of the role of p-cresol.

Embryonic cell death patterns associated with nitrofen-induced congenital diaphragmatic hernia.

Flow cytometric analysis of the granulocyte respiratory burst: a comparison study of fluorescent probes.

Effect of supplementation with an iron-fortified milk on incidence of diarrhea and respiratory infection in urban-resident infants.

Survival after a severe iron poisoning treated with intermittent infusions of deferoxamine.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on growth factor expression in the human breast cancer cell line MCF-7.

Induction of preneoplastic lesions by sodium arsenite in human fetal respiratory epithelia in organ culture.

Angiotensin-converting enzyme activity is increased in lungs of rats with pulmonary hypoplasia and congenital diaphragmatic hernia.

Role of the lung in accumulation and metabolism of xenobiotic compounds--implications for chemically induced toxicity.

Lung retention and bioavailability of arsenic after single intratracheal administration of sodium arsenite, sodium arsenate, fly ash and copper smelter dust in the hamster.

An attempt to explain interindividual variability in 24-h urinary excretion of inorganic arsenic metabolites by C57 BL/6J mice.

N-acetylcysteine pretreatment attenuates paraquat-induced lung leak in rats.

Down-regulation of tumor necrosis factor receptors by blockade of mitochondrial respiration.

Adenosine accumulation as an indicator of cell-specific toxicity in rat lung slices.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces diverse retinoic acid metabolites in multiple tissues of the Sprague-Dawley rat.

Transport of dehydroepiandrosterone and dehydroepiandrosterone sulphate into rat hepatocytes.

Bivascular liver perfusion in the anterograde and retrograde modes: zonation of the response to inhibitors of oxidative phosphorylation.

Immunoquantification of type I, III, IV and V collagen in small samples of human lung parenchyma.

Octanoate affects 2,4-dinitrophenol uncoupling in intact isolated rat hepatocytes.

Mechanism of uptake of technetium-tetrofosmin. II: Uptake into isolated adult rat heart mitochondria.

An ATP-sensitive potassium conductance in rabbit arterial endothelial cells.

Mutagens from heated Chinese and U.S. cooking oils.

Thrombin induces the preproendothelin-1 gene in endothelial cells by a protein tyrosine kinase-linked mechanism.

Identification of a rat adrenal cytochrome P450 active in polycyclic hydrocarbon metabolism as rat CYP1B1. Demonstration of a unique tissue-specific pattern of hormonal and aryl hydrocarbon receptor-linked regulation.

A metabolite of carcinogenic 2-acetylaminofluorene, 2-nitrosofluorene, induces redox cycling in mitochondria.

Expression of xenobiotic-metabolizing enzymes in cultured rat tracheal epithelial cells.

Differential toxicities of cyclophosphamide and its glutathione metabolites to A549 cells.

Dose-response relationships of tissue distribution and induction of CYP1A1 and CYP1A2 enzymatic activities following acute exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice.

Interleukin-3 facilitates glucose transport in a myeloid cell line by regulating the affinity of the glucose transporter for glucose: involvement of protein phosphorylation in transporter activation.

[Participation of tachykinins in experimental models of lung damage].

Olfactory toxicity of methyl iodide in the rat.

Isolation and characterization of mutants defective in the cyanide-insensitive respiratory pathway of *Pseudomonas aeruginosa*.

BW-755C diminishes smoke-induced pulmonary edema.

Toxicology of methyl bromide.

Selective increase of rat lung cytochrome P450 1A1 dependent monooxygenase activity after acute sodium arsenite administration.

Identification of urinary metabolites of human subjects exposed to o-dichlorobenzene.

Mechanism of cytotoxicity of paraquat. III. The effects of acute paraquat exposure on the electron transport system in rat mitochondria.

A fatal case of paraquat poisoning in a Nigerian.

Inhibition of T3-receptor binding by Nitrofen.

Primary and immortalized (BEAS 2B) human bronchial epithelial cells have significant antioxidative capacity in vitro.

Survival of paraquat intoxication complicated with mediastinal emphysema: a case report.

The site of elevated vascular resistance in early paraquat lungs: a morphometric study of pulmonary arteries.

Acute 2,4-dichlorophenoxyacetic acid intoxication in cattle.

Effect of selenium deficiency and glutathione-modulating agents on diquat toxicity and lipid peroxidation in rats.

[Pathologic characteristics of diffuse alveolar damage induced by paraquat in rat lungs].

DNA damage induced in cultured human alveolar (L-132) cells by exposure to dimethylarsinic acid.

Nitric oxide as a mediator of oxidant lung injury due to paraquat.

Cyclooxygenase and lipoxygenase inhibition by BW-755C reduces acrolein smoke-induced acute lung injury.

Paraquat poisoning by skin absorption: report of two cases.

Prevention of paraquat toxicity in suspensions of alveolar type II cells by paraquat-specific antibodies.

Comparison of effects of margarite extract and recombinant human superoxide dismutase on paraquat-induced superoxide anion radicals in rat lung.

Paraquat induces irreversible actin cytoskeleton disruption in cultured human lung cells.

Persistent respiratory health effects after a metam sodium pesticide spill.

Remodeling of the alveolar structure in the paraquat lung of humans: a morphometric study.

Studies on the neuromuscular blocking action of commercial paraquat in mouse phrenic nerve-diaphragm.

The use of human lung slices in toxicology.

[Allergic diseases caused by pesticides: 3 case reports].

Nitric oxide mediates oxidant tissue injury caused by paraquat and xanthine oxidase.

Regulation of antioxidant enzymes in lung after oxidant injury.

Pathobiological effects of acetaldehyde in cultured human epithelial cells and fibroblasts.

Bilateral spontaneous pneumothoraces, pneumopericardium, pneumomediastinum, and subcutaneous emphysema: a rare presentation of paraquat intoxication.

Potential of oxidant-induced toxicity in hamster lung slices by dimethylthiourea.

Assessment of lipid peroxidation associated with lung damage induced by oxidative stress. In vivo and in vitro studies.

Effect of ethanol on paraquat toxicity in F344 rats.

Dose-response assessment of airborne methyl isothiocyanate (MITC) following a metam sodium spill.

[Alteration of lipid peroxidation and the activity of peroxide metabolism enzymes in the liver, kidney and lung following the administration of paraquat in mice].

Effect of Tordon 2,4-D 64/240 triethanolamine BR on the energy metabolism of rat liver mitochondria.

[Paraquat lung].

Inhaled nitric oxide in advanced paraquat intoxication.

Methemoglobinemia following ingestion of a monolinuron/paraquat herbicide (Gramonol).

Free radicals in the pathophysiology of pulmonary injury and disease.

Experimental metolachlor toxicosis in Nubian goats in the Sudan.

Human bronchial smooth muscle responsiveness after in vitro exposure to acrolein.

Tamoxifen: evidence by ³²P-postlabeling and use of metabolic inhibitors for two distinct pathways leading to mouse hepatic DNA adduct formation and identification of 4-hydroxytamoxifen as a proximate metabolite.

Putrescine and paraquat uptake in human lung slices and isolated type II pneumocytes.

Inhibition of degranulation of polymorphonuclear leukocytes by angiogenin and its tryptic fragment.

[Respiratory disease in the tertiary emergency hospital].

Effect of arsenic exposure on alveolar macrophage function. I. Effect of soluble as(III) and as(V).

Alveolar epithelial composition and architecture of the late fetal pulmonary acinus: an immunocytochemical and morphometric study in a rat model of pulmonary hypoplasia and congenital diaphragmatic hernia.

Etiological aspects of congenital diaphragmatic hernia: results of a case comparison study.

Can cohort studies detect any human cancer excess that may result from exposure to dioxin? Maybe.

Dust exposure indices and lung function changes in longshoremen and dock workers.

[Shock caused by poisoning. Use of cardiotropic agents].

Competitive inhibition by genistein and ATP dependence of daunorubicin transport in intact MRP overexpressing human small cell lung cancer cells.

Swine testis cells contain functional heparan sulfate but are defective in entry of herpes simplex virus.

Bronchial necrosis and granuloma induced by the aspiration of a tablet of ferrous sulphate.

Survey of health and use characterization of pesticide applicators in Minnesota.

Hypoxia induces the synthesis of tropomyosin in cultured porcine pulmonary artery endothelial cells.

Sodium azide--a rare poisoning.

Surveillance for emergency events involving hazardous substances--United States, 1990-1992.

Morbidity follow up study of BASF employees exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) after a 1953 chemical reactor incident.

Iron supplementation in children after cardiopulmonary bypass for surgical repair of congenital heart disease.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on pulmonary influenza virus titer and natural killer (NK) activity in rats.

Evaluation of lung function changes before and after surfactant application during artificial ventilation in newborn rats with congenital diaphragmatic hernia.

Postischemic inhibition of cerebral cortex pyruvate dehydrogenase.

Effects of various drugs (staurosporine, herbimycin A, ketotifen, theophylline, FK506 and cyclosporin A) on eosinophil viability.

Adverse effect of iron supplementation on weight gain of iron-replete young children.

Factors that influence the formation and stability of hydrated ferrous sulfate in coal dusts. Possible relation to the emphysema of coal miners.

Antenatal glucocorticoid corrects pulmonary immaturity in experimentally induced congenital diaphragmatic hernia in rats.

Expression of heme oxygenase in arsenic-resistant human lung adenocarcinoma cells.

Induction of heat-shock protein synthesis and thermotolerance in EL-4 ascites tumor cells by transient ATP depletion after ischemic stress.

Clofazimine alters the energy metabolism and inhibits the growth rate of a human lung-cancer cell line in vitro and in vivo.

Surveillance of hazardous substance releases and related health effects.

Transforming growth factor-beta 1 inhibits TCDD-induced cytochrome P450IA1 expression in human lung cancer A549 cells.

The rice culture filtrate of *Bacillus cereus* isolated from emetic-type food poisoning causes mitochondrial swelling in a HEP-2 cell.

[Prevention of infectious endocarditis].

Effect on tissue vitamin A levels in the rat following subchronic exposure to four individual PCB congeners (IUPAC 77, 118, 126, and 153).

Role of ATP and sodium in polyamine transport in bovine pulmonary artery smooth cells.

Vapor phase exposure to acetaldehyde generated from ethanol inhibits bovine bronchial epithelial cell ciliary motility.

Effects of induction and age-dependent enzyme expression on lung bioavailability, metabolism, and DNA binding of urban air particulate-absorbed benzo[a]pyrene, 2-nitrofluorene, and 3-amino-1,4-dimethyl-5H-pyridol-(4,3)-indole.

Differential cytotoxic effects of arsenic on human and animal cells.

Tissue specific expression of the rat Ah-receptor and ARNT mRNAs.

Respiratory enzymes of *Thiobacillus ferrooxidans*. Kinetic properties of an acid-stable iron:rusticyanin oxidoreductase.

Interaction of basic fibroblast growth factor (FGF-2) with nonresponsive HeLa cells.

Role of neutrophils and nitric oxide in lung alveolar injury from smoke inhalation.

Localization of peroxidase activity in tegumental, muscle, and parenchymal cells of the lung fluke *Paragonimus miyazakii* (Digenea: Troglotrematidae).

Effects of arsenic on DNA damage and repair in human fetal lung fibroblasts.

VIP enhances and nitric oxide synthase inhibitor reduces survival of rat lungs perfused ex vivo.

Spin trapping of azidyl and hydroxyl radicals in azide-inhibited rat brain submitochondrial particles.

Fungal metabolites. X. The effect of peptide antibiotics, trichosporin-Bs, on the respiratory activity of mitochondria.

Glucose-6-phosphate dehydrogenase is enriched in oligodendrocytes of the rat spinal cord. Enzyme histochemical and immunocytochemical studies.

Cyclophosphamide-induced lung toxicity: mechanism of endothelial cell injury.

Toxicology of selected nitric oxide-donating xenobiotics, with particular reference to azide.

Effect of low-intensity argon laser irradiation on mitochondrial respiration.

Human pentachlorophenol poisoning.

Bronchiectasis in a child after acrolein inhalation.

Mechanism of cytotoxicity of paraquat. II. Organ specificity of paraquat-stimulated lipid peroxidation in the inner membrane of mitochondria.

Neonatal exposure to paraquat or MPTP induces permanent changes in striatum dopamine and behavior in adult mice.

Acrolein-induced injury to cultured pulmonary artery endothelial cells.

The pneumotoxicant paraquat induces IL-8 mRNA in human mononuclear cells and pulmonary epithelial cells.

The toxicologic interactions resulting from inhalation of carbon black and acrolein on pulmonary antibacterial and antiviral defenses.

Histometric changes in connective fibers of the lung following paraquat administration in rats.

Effect of in vitro exposure to acrolein on carbachol responses in rat trachealis muscle.

Effect of dehydroproline as a collagen synthetic inhibitor in paraquat-induced pulmonary fibrosis in beagle dogs.

N-acetylcysteine delays the infiltration of inflammatory cells into the lungs of paraquat-intoxicated rats.

Effects on thyroid hormone metabolism and depletion of lung vitamin A in rats by airborne particulate matter.

Chlorpromazine and paraquat poisoning.

Acrolein increases airway sensitivity to substance P and decreases NEP activity in guinea pigs.

Gene damage induced in human alveolar type II (L-132) cells by exposure to dimethylarsinic acid.

Protection of a rat tracheal epithelial cell line from paraquat toxicity by inhibition of glucose-6-phosphate dehydrogenase.

Cell proliferation in the respiratory tract of the rat after acute inhalation of formaldehyde or acrolein.

An epidemiological study of the health of Sri Lankan tea plantation workers associated with long term exposure to paraquat.

Occupational exposure to phenoxy herbicides and chlorophenols and cancer mortality in The Netherlands.

[Acute oral toxicity of bentazon, an herbicide developed in Czechoslovakia, in pheasants and rabbits and the clinical symptoms of poisoning].

Community exposure to a paraquat drift.

Synergic lung changes in rats receiving combined exposure to paraquat and ionizing radiation.

[Cytokines and pulmonary fibroses].

Paraquat-induced lung injury: prevention by vasoactive intestinal peptide and related peptide helodermin.

The mechanisms by which mild respiratory chain inhibitors inhibit hepatic gluconeogenesis.

[Antibacterial activity of thymol, carvacrol and cinnamaldehyde alone or in combination].

Lung growth and maturation in the rat model of experimentally induced congenital diaphragmatic hernia.

Protective role for neuropeptides in acute pulmonary response to acrolein in guinea pigs.

Studies on the inhibition of collagen synthesis in fibroblasts treated with paraquat.

[Biological monitoring of workers exposed to nitrofen and experimental study on its skin permeability].

PGI₂ production and angiotensin converting enzyme activity in cultured porcine pulmonary artery endothelial cells treated with paraquat.

Eosinophils increase lung microvascular permeability via the peroxidase-hydrogen peroxide-halide system. Bronchoconstriction and vasoconstriction unaffected by eosinophil peroxidase inhibition.

Lung glutathione reductase induction in aging catalase-depleted frogs correlates with early survival throughout the life span.

Evidence for peroxidase-mediated metabolism of cyclophosphamide.

Kinetics and cellular localisation of putrescine uptake in human lung tissue.

Ultrastructural features of alveolar epithelial cells in the late fetal pulmonary acinus: a comparison between normal and hypoplastic lungs using a rat model of pulmonary hypoplasia and congenital diaphragmatic hernia.

Subchronic toxicity of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats.

[Iron deficiency anemia is not always simple].

Resistance to aflatoxin B₁ is associated with the expression of a novel aldo-keto reductase which has catalytic activity towards a cytotoxic aldehyde-containing metabolite of the toxin.

Inhibition of uncoupled respiration in tumor cells. A possible role of mitochondrial Ca²⁺ efflux.

Inactivation of alpha 1-antitrypsin by aqueous coal solutions: possible relation to the emphysema of coal workers.

Human health effects of agrichemical use.

NAD(P)H:quinone oxidoreductase1 (DT-diaphorase) expression in normal and tumor tissues.

Hyperoxic lung injury in Fischer-344 and Sprague-Dawley rats in vivo.

Increased serum catalase activity in rats subjected to thermal skin injury.

Biochemical immaturity of lungs in congenital diaphragmatic hernia.

The natural history of congenital diaphragmatic hernia and pulmonary hypoplasia in the embryo.

A study of the binding of immunoglobulin G and immunoglobulin E from children with bronchial asthma to peptides derived from group II antigen of *Dermatophagoides pteronyssinus*.

The mortality experience of workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin in a trichlorophenol process accident.

Lactoferrin co-purifies with myeloperoxidase and is recognised by anti-neutrophil cytoplasm antibodies.

A sensitive colorimetric assay for the release of tryptase from human lung mast cells in vitro.

[The effect of bovine serum albumin conjugates with polyalkylene oxides on the respiration of heart mitochondria].

Tissue distribution and toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats after intravenous injection.

Cytochrome P4501A1 mediates the metabolism of 2,3,7,8-tetrachlorodibenzofuran in the rat and human.

Induction of neutrophil homotypic adhesion via sialophorin (CD43), a surface sialoglycoprotein restricted to haemopoietic cells.

Purification and characterization of catalase from goat (*Capra capra*) lung.

Comparison of the structures of the quinone-binding sites in beef heart mitochondria.

A ferro-heme protein senses oxygen levels, which modulate the glucagon-dependent activation of the phosphoenolpyruvate carboxykinase gene in rat hepatocyte cultures.

Responses of smooth muscle cells to platelet-derived growth factor are inhibited by herbimycin-A tyrosine kinase inhibitor.

Evaluation of human blood lymphocytes as a model to study the effects of drugs on human mitochondria. Effects of low concentrations of amiodarone on fatty acid oxidation, ATP levels and cell survival.

Influence of some biological response modifiers on swelling of rat liver mitochondria in vitro.

Measurement of the epithelial barrier integrity in tracheal cell cultures exposed to irritant compounds.

Effects of metabolic inhibition on cytoplasmic calcium and contraction in smooth muscle of rat portal vein.

Enhancement of neutrophil-mediated injury to bovine pulmonary endothelial cells by *Pasteurella haemolytica* leukotoxin.

Arsenic-induced DNA-strand breaks associated with DNA-protein crosslinks in human fetal lung fibroblasts.

[Toxicology of tobacco].

NTP Toxicology and Carcinogenesis Studies of Pentachloroanisole (CAS No. 1825-21-4) in F344 Rats and B6C3F1 Mice (Feed Studies).

Mechanism of putrescine transport in human pulmonary artery endothelial cells.

Uncoupling of rat liver mitochondrial oxidative phosphorylation by the fasciolicide triclabendazole and its sulfoxide and sulfone metabolites.

Mitochondria as a source of reactive oxygen species during reductive stress in rat hepatocytes.

Ferrous-iron induces lipid peroxidation with little damage to energy transduction in mitochondria.

Inhibition of mitochondrial oxidative phosphorylation and its electron transport pathway by a polycation in vitro.

Nature and role of xenobiotic metabolizing esterases in rat liver, lung, skin and blood.

Volatile metabolites in occupational exposure to organic sulfur compounds.

Effects of acute sodium arsenite administration on the pulmonary chemical metabolizing enzymes, cytochrome P-450 monooxygenase, NAD(P)H:quinone acceptor oxidoreductase and glutathione S-transferase in guinea pig: comparison with effects in liver and kidney.

Evaluation of the role of reactive oxygen species in the interactive toxicity of carbide-cobalt mixtures on macrophages in culture.

Reabsorption of lung liquid produced by 2,4-dinitrophenol in in vitro lungs from fetal guinea pigs.

Comparative pharmacokinetics of ifosfamide, 4-hydroxyifosfamide, chloroacetaldehyde, and 2- and 3-dechloroethylifosfamide in patients on fractionated intravenous ifosfamide therapy.

A comparison of the effects of aphidicolin and other inhibitors on topoisomerase II-directed cytotoxic drugs.

Resistance of murine lung tumors to xenobiotic-induced cytotoxicity.

[The influence of paraquat on cell cycle--analysis of cell kinetics using DNA/BrdU staining].

Protective effect of liposome-associated alpha-tocopherol against paraquat-induced acute lung toxicity.

One-year toxicity of orally administered acrolein to the beagle dog.

Nitrofen-induced diaphragmatic hernias in rats: pulmonary antioxidant enzyme activities.

Tissue-binding and toxicity of compounds structurally related to the herbicide dichlobenil in the mouse olfactory mucosa.

Association of asthma with use of pesticides. Results of a cross-sectional survey of farmers.

The kidney in the fetal rat model of congenital diaphragmatic hernia induced by nitrofen.

Pulmonary hemodynamics and lung function during chronic paraquat poisoning in sheep. Possible role of reactive oxygen species.

A novel pharmacological approach for paraquat poisoning in rat and A549 cell line using ambroxol, a lung surfactant synthesis inducer.

Acute renal failure in a case of paraquat poisoning with relative absence of pulmonary toxicity.

[A cardiac lesion secondary to paraquat].

Effects of concentration reduction and partial replacement of paraquat by diquat on human toxicity: a clinical survey.

Mitochondrial breakage induced by the herbicide paraquat in cultured human lung cells.

[Toxic and drug-induced lesions of the pulmonary parenchyma].

Alveolar damage due to inhalation of amitrole-containing herbicide.

Paraquat poisoning in children: survival of three cases.

Acute toxicological studies on paraquat: pathological findings in beagle dogs following single subcutaneous injections.

[The effect of Bentazone, a Czechoslovak developmental herbicide, on health status indicators in sheep during subchronic poisoning].

Acute effects of acrolein on breathing: role of vagal bronchopulmonary afferents.

Preferential increase of heterochromatin in venular endothelium of lung in mice after administration of dimethylarsinic acid, a major metabolite of inorganic arsenics.

Effect of lung irradiation on mice following paraquat intoxication.

Relationship of resistance to oxygen free radicals to CuZn-superoxide dismutase activity in transgenic, transfected, and trisomic cells.

Subacute toxicity of paraquat in beagle dogs: clinicopathology and pathologic examinations.

[A successful treatment of patient with paraquat poisoning].

Smoke aldehyde component influences pulmonary edema.

Lung protection against paraquat is calcium dependent.

Mechanisms of aldehyde-induced bronchial reactivity: role of airway epithelium.

Effect of preinduction of metallothionein on paraquat toxicity in mice.

Lung injury induced by paraquat, hyperoxia and cobalt chloride: effects of ambroxol.

Effect of L-cystine on toxicity of paraquat in mice.

Fatal paraquat poisoning: a light microscopic study in eight autopsy cases.

Taurine protection of lungs in hamster models of oxidant injury: a morphologic time study of paraquat and bleomycin treatment.

Immunocytochemical observation of paraquat-induced alveolitis with special reference to class II MHC antigens.

Effect of iron chelators on paraquat toxicity in rats and alveolar type II cells.

Efficacy of whole bowel irrigation using solutions with or without adsorbent in the removal of paraquat in dogs.

Platelet prevention of oxidant lung oedema is not mediated through scavenging of hydrogen peroxide.

The effect of a commercial 2,4-D formulation on chemical- and viral-induced tumor production in mice.

Effect of artificial ventilation on pulmonary antioxidant enzyme activities in a congenital diaphragmatic hernia rat model.

The pharmacological activity of nitroxyl: a potent vasodilator with activity similar to nitric oxide and/or endothelium-derived relaxing factor.

Role of cellular defense against hydrogen peroxide-induced inhibition of myocyte respiration.

Forest worker exposure to airborne herbicide residues in smoke from prescribed fires in the southern United States.

Regulation of hydrogen peroxide generation in cultured endothelial cells.

Paraquat-induced lung injury: prevention by N-tert-butyl-alpha-phenylnitrone, a free-radical spin-trapping agent.

Insight into the nature and site of oxygen-centered free radical generation by endothelial cell monolayers using a novel spin trapping technique.

Mitochondrial ATP-synthase deficiency in a child with 3-methylglutaconic aciduria.

Integrated approach for evaluating species and interindividual differences in responsiveness to dioxins and structural analogs.

Increased serum catalase activity in septic patients with the adult respiratory distress syndrome.

[Pulmonary surfactant in experimental congenital diaphragmatic hernia].

Pulmonary vascular abnormalities in experimentally induced congenital diaphragmatic hernia in rats.

Dynamic changes in the functional characteristics of the interstitial fibroblast during lung repair.

Urinary ortho-cresol concentrations as an indicator of toluene inhalation in glue-sniffers.

Chronic sodium azide treatment impairs learning of the Morris water maze task.

Influence of stepwise uncoupling and temporary anoxia on pancreatic enzyme secretion by isolated rat acini.

Effects of acid-base status on acute hypoxic pulmonary vasoconstriction and gas exchange.

Mitochondrial ATP-synthase activity in cardiomyocytes after aerobic-anaerobic metabolic transition.

Identification of *Candida albicans* antigens reactive with immunoglobulin E antibody of human sera.

Antioxidant activity of bronchoalveolar lavage fluid in the adult respiratory distress syndrome.

Potential antitumor agents. 64. Synthesis and antitumor evaluation of dibenzo[1,4]dioxin-1-carboxamides: a new class of weakly binding DNA-intercalating agents.

Differential ability of occupational chemical contact and respiratory allergens to cause immediate and delayed dermal hypersensitivity reactions in mice.

[Experimental congenital diaphragmatic hernia with pulmonary hypoplasia in a rat model].

Old and new reflections on dioxin.

Reconciling old and new findings on dioxin.

Methylbromide intoxication: a case report.

Energy-dependent processes involved in reduced drug accumulation in multidrug-resistant human lung cancer cell lines without P-glycoprotein expression.

Characterization of volatile sulphur compounds production at individual gingival crevicular sites in humans.

IgE-mediated inhalant allergy in inhabitants of a building infested by the rice weevil (*Sitophilus oryzae*).

Zymosan-triggered tyrosine phosphorylation in mouse bone-marrow-derived macrophages is enhanced by respiratory-burst priming agents.

Ferritin: a cytoprotective antioxidant strategem of endothelium.

Characterization of an Electron Transport Pathway Associated with Glucose and Fructose Respiration in the Intact Chloroplasts of *Chlamydomonas reinhardtii* and Spinach.

[The spatial distribution of mitochondrial respiration and oxidative phosphorylation along the small intestine in rats of different ages].

Mechanism of citrinin-induced dysfunction of mitochondria. II. Effect on respiration, enzyme activities, and membrane potential of liver mitochondria.

Induction of cystine transport in bovine pulmonary artery endothelial cells by sodium arsenite.

Increased hydrogen peroxide concentration in human tumor cells due to a nitroxide free radical.

Dark Respiration Protects Photosynthesis Against Photoinhibition in Mesophyll Protoplasts of Pea (*Pisum sativum*).

Health status and needs of migrant farm workers in the United States: a literature review.

Thermoregulatory, carboxyatractylate-sensitive uncoupling in heart and skeletal muscle mitochondria of the ground squirrel correlates with the level of free fatty acids.

Distribution of cytochrome P450 1A1 and NADPH-cytochrome P450 reductase in lungs of rabbits treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin: ultrastructural immunolocalization and in situ hybridization.

Relation between airborne arsenic trioxide and urinary excretion of inorganic arsenic and its methylated metabolites.

Interaction of C1q receptor with lung surfactant protein A.

Methanol and ethanol oxidase respiratory chains of the methylotrophic acetic acid bacterium, *Acetobacter methanolicus*.

Generation and functional characterization of ovine bone marrow-derived macrophages.

Mechanisms of extracellular reactive oxygen species injury to the pulmonary microvasculature.

Studies on curare-like action of 2,2',2''-tripyrindine in the mouse phrenic nerve-diaphragm.

[The effect of isomeric alkyl (C19--C25) methoxybenzoquinones on mitochondrial respiration].

Tricarboxylic acid cycle activity in perfused rat lungs after O₂ exposure.

Liquid flow across the epithelium of the artificially perfused lung of fetal and postnatal sheep.

Magnetic resonance imaging of Fricke-doped agarose gels for the visualization of radiotherapy dose distributions in a lung phantom.

NTP Toxicology and Carcinogenesis Studies of Monochloroacetic Acid (CAS No. 79-11-8) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

[Production of monoclonal antibody against diquat and its application for forensic medicine].

[Effect of almitrine in acute canine lung injury induced by paraquat].

The upper respiratory tract: mucous membrane irritation.

Marijuana and tobacco smoke gas-phase cytotoxins.

Fructose 1,6-diphosphate augments paraquat injury in isolated dog lungs.

Failure of radiotherapy to resolve fatal lung damage due to paraquat poisoning.

Paraquat poisoning: findings on chest radiography and CT in 42 patients.

[Is it appropriate to consider wood preservative poisoning in the differential diagnosis of chronic recurrent respiratory tract infections?].

[Fatal voluntary poisoning by parenteral paraquat].

Confirmation of chemical sensitivity by means of double-blind inhalant challenge of toxic volatile chemicals.

[Arachidonic acid metabolism and angiotensin converting enzyme activity by cultured porcine pulmonary artery endothelial cells are affected with paraquat].

Protection of rats against the effects of alpha-naphthylthiourea (ANTU) by elevation of non-protein sulphhydryl levels.

Reduction of paraquat and related bipyridylium compounds to free radical metabolites by rat hepatocytes.

Free radical-induced carbonyl content in protein of estrogen-treated hamsters assayed by sodium boro[³H]hydride reduction.

Betamethasone effects on paraquat lung toxicity.

Comparison of one-electron reduction activity against the bipyridylium herbicides, paraquat and diquat, in microsomal and mitochondrial fractions of liver, lung and kidney (in vitro).

The effects of Tordon 202c exposure on urethan-induced lung adenoma formation in female CD-1 mice.

[Changes in the laboratory rat during development after parenteral administration of the herbicide Zeazin S-40. II. Morphologic findings].

Effects of pneumotoxic trialkylphosphorothioates on the pentose phosphate pathway in rat lung slices.

[Observations of the fibrosing process in paraquat lung injury by chest X-ray and CT].

Cellular response to oxidative damage in lung induced by the administration of dimethylarsinic acid, a major metabolite of inorganic arsenics, in mice.

[Occupational asthma caused by scented gravel in cat litter boxes].

Paraquat induced pulmonary fibrosis in three survivors.

Mortality and incidence of cancer at four factories making phenoxy herbicides.

A fatal case of parenteral paraquat poisoning.

Immunohistochemical localization of paraquat in lung and brain.

Taiwan National Poison Center survey of glyphosate--surfactant herbicide ingestions.

Acute toxicology of components of vegetation smoke.

Effects of 2,4,5-trichlorophenoxyacetic acid, pentachlorophenol, methylprednisolone, and Freund's adjuvant on 2-hydroxyethylnitrosourea carcinogenesis in MRC-Wistar rats.

Evaluation of organ injuries in Paraquat intoxication.

Acute and chronic effects of parathion and 2,4 D on the oxygen consumption of *Chasmagnathus granulata* (Decapoda, Brachyura).

Oral and pulmonary toxicology of the surfactant used in roundup herbicide.

Acute poisoning with a glyphosate-surfactant herbicide ('Roundup'): a review of 93 cases.

Compensatory growth in fibrotic lung injury.

Tumor necrosis factor- α increases Mn-SOD expression: protection against oxidant injury.

Steroid responsiveness of fibroblasts of paraquat injured lungs.

Dose-dependent increases in metallothionein synthesis in the lung and liver of paraquat-treated rats.

Mechanism of paraquat-stimulated lipid peroxidation in mouse brain and pulmonary microsomes.

Molecular features necessary for the uptake of diamines and related compounds by the polyamine receptor of rat lung slices.

Effects of MPTP, MPP⁺, and paraquat on NADPH-dependent lipid peroxidation in mouse brain and lung microsomes.

Diamine uptake by rat lung type II cells in vitro.

Different effects of paraquat on microsomal lipid peroxidation in mouse brain, lung and liver.

Occupational exposure of forest workers to glyphosate during brush saw spraying work.

Evaluation of chronic bronchitis, chronic obstructive pulmonary disease, and ventilatory function among workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Decreased activities of ubiquinol:ferricytochrome c oxidoreductase (complex III) and ferrocyclochrome c: oxygen oxidoreductase (complex IV) in liver mitochondria from rats with hydroxycobalamin[c-lactam]-induced methylmalonic aciduria.

Human AH locus polymorphism and cancer: inducibility of CYP1A1 and other genes by combustion products and dioxin.

Arsenite as the probable active species in the human carcinogenicity of arsenic: mouse micronucleus assays on Na and K arsenite, orpiment, and Fowler's solution.

Hemolytic activity of ethylene glycol phenyl ether (EGPE) in rabbits.

Toxic and neoplastic responses in the nasal passages: future research needs.

Chloracne caused by ingestion of olive oil contaminated with PCDDs and PCDFs.

Inhibition of mitochondrial respiratory function by an organic solvent extractable component from an extract of burn eschar.

Ninety day toxicity study of chloroacetic acids in rats.

Agricultural disorders of the lung.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the vitamin A status of Hartley guinea pigs, Sprague-Dawley rats, C57Bl/6 mice, DBA/2 mice, and Golden Syrian hamsters.

Washed human platelets prevent ischemia-reperfusion edema in isolated rabbit lungs.

Promotion of mouse lung tumors by bioaccumulated polychlorinated aromatic hydrocarbons.

Cancer mortality in workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

A one-year carcinogenicity study with 2,6-dichlorobenzonitrile (Dichlobenil) in male Swiss mice: preliminary note.

Inhalation exposure of mice to trimellitic anhydride induces both IgG and IgE anti-hapten antibody.

Human exposure to 2,3,7,8-TCDD and risk of cancer.

[Massive hemoptysis ten days after bronchial extraction of an accidentally inhaled tablet of ferrous sulfate].

Altered metabolic response of iron-deficient women during graded, maximal exercise.

Iron lung: bronchoscopic and pathological consequences of aspiration of ferrous sulphate.

Lung calcium-dependent phospholipid-binding proteins: structure and function.

Primary cultures of tracheal epithelial cells for the evaluation of respiratory toxicity.

Nature of enhanced mitochondrial oxidative metabolism by a calf blood extract.

Effect of aclarubicin and doxorubicin on rat liver mitochondrial oxidative phosphorylation.

Glutathione redox cycle is an important defense system of endothelial cells against chronic hyperoxia.

Vagal amplification of phrenic nerve activity at different levels of ventilation in spontaneously breathing cats.

Microphotometric determination of enzymes in brain sections. IV. Isocitrate dehydrogenases.

Studies in tobacco carcinogenesis.

Toxic interactions in the rat nose: pollutants from soiled bedding and methyl bromide.

The role of metabolism in chemical-induced pulmonary toxicity.

A comparative study of the effects of phebrol on the respiratory chains of rat liver, *Biomphalaria glabrata* and *Oncomelania nosophora*.

[The isolation of mitochondria from different sections of the small intestine and their functional characteristics].

Metabolic activation of chlorpromazine by stimulated human polymorphonuclear leukocytes. Induction of covalent binding of chlorpromazine to nucleic acids and proteins.

Protein-ubiquinone interaction in bovine heart mitochondrial succinate-cytochrome c reductase.

Synthesis and biological properties of fluorine substituted ubiquinone derivatives.

Isolation and characterization of rat lung *Pneumocystis carinii* gp120.

A serine esterase released by human alveolar macrophages is closely related to liver microsomal carboxylesterases.

Characterization of a novel glutathione S-transferase isoenzyme from mouse lung and liver having structural similarity to rat glutathione S-transferase 8-8.

NTP Toxicology and Carcinogenesis Studies of Sodium Azide (CAS: 26628-22-8) in F344 Rats (Gavage Studies).

Lung liquid production by in vitro lungs from fetal guinea pigs: studies with metabolic inhibitors.

Hydrogen peroxide production by alveolar type II cells, alveolar macrophages, and endothelial cells.

Uptake of glutathione by renal cortical mitochondria.

Toxicity of 2,6-dichlorothiobenzamide (chlorthiamid) and 2,6-dichlorobenzamide in the olfactory nasal mucosa of mice.

The pyrimido-pyrimidine derivative RA-642: a potent inhibitor of ferrous-induced lipid peroxidation in cell membranes.

Reconstitution of the ethanol oxidase respiratory chain in membranes of quinoprotein alcohol dehydrogenase-deficient *Gluconobacter suboxydans* subsp. alpha strains.

Breath-by-breath measurement of oxygen consumption and FIO₂-FEO₂ with increased oxygen demand.

An evaluation of the redox cycling potencies of paraquat and nitrofurantoin in microsomal and lung slice systems.

[Pesticide-induced pulmonary fibrosis].

[Oxidant-induced lung injury].

Biochemical changes in rat lung during acute paraquat intoxication.

Interactions between paraquat, endogenous lung amines' antioxidants and isolated mouse Clara cells.

[Exposure to agricultural chemicals and oncogenic risk].

[Protective effect of hyperbaric hypoxxygenation for paraquat poisoning in the rat].

Nitrofen-induced diaphragmatic hernias in rats: an animal model.

[Scanning electron microscopic study of rat lungs in experimental chronic paraquat poisoning].

Effects of paraquat on mortality and cardiorespiratory function of catfish fry *Plecostomus commersoni*.

Paraquat poisoning. An overview of the current status.

[Free radicals in industrial medicine: their mechanisms of toxicity and biological relevance].

Mechanism of protection of alveolar type II cells against paraquat-induced cytotoxicity by deferoxamine.

PO₂ modulation of paraquat-induced microvascular injury in isolated dog lungs.

In vitro studies of aldehyde effects related to human respiratory carcinogenesis.

Irreversible binding and toxicity of the herbicide dichlobenil (2,6-dichlorobenzonitrile) in the olfactory mucosa of mice.

[Toxicity of paraquat used in the form of aerosols in experimental studies].

Evaluation of N-acetylcysteine and methylprednisolone as therapies for oxygen and acrolein-induced lung damage.

The effects of drugs, other foreign compounds, and cigarette smoke on the synthesis of protein by lung slices.

An assessment of the role of redox cycling in mediating the toxicity of paraquat and nitrofurantoin.

Xanthine oxidase is increased and contributes to paraquat-induced acute lung injury.

The importance of epithelial uptake systems in lung toxicity.

A novel lung slice system with compromised antioxidant defenses.

Acrolein depletes the neuropeptides CGRP and substance P in sensory nerves in rat respiratory tract.

Involvement of prostaglandins in paraquat intoxication.

[Pulmonary lesion of paraquat poisoning on high resolution CT].

Pulmonary toxicity induced by chemical agents.

Initial accumulation of paraquat in the heart leading to acute death.

Potentialiation of the cell specific toxicity of paraquat by 1,3-bis(2-chloroethyl)-1-nitrosourea (BCNU). Implications for the heterogeneous distribution of glutathione (GSH) in rat lung.

Electroencephalographical analysis of acute paraquat poisoning.

Toxicokinetics of paraquat in humans.

Paraquat pharmacokinetics using a subcutaneous toxic low dose in the rat.

Correlation between lipid peroxidation and morphological manifestation of paraquat-induced lung injury in rats.

An unusual case of fatal accidental paraquat poisoning.

[Structural changes in the lung in the late stage of fatal paraquat poisoning].

Inhibition of lung damage caused by paraquat with lymphokines or cytokines.

Free malondialdehyde levels in the urine of rats intoxicated with paraquat.

Oxygen radicals in lung pathology.

Comparison of the toxicology of the herbicide roundup by oral and pulmonary routes of exposure.

Tyrosine kinase activation during lung injury, fibrosis, and compensatory lung growth.

Role of sulfidopeptide leukotrienes in synthetic smoke inhalation injury in sheep.

Derecruitment of filtration surface area in paraquat-injured isolated dog lungs.

Acid-base balance and cardiac index in SO₂-bronchitic, papaine-empysematous and paraquat-fibrotic rats after isoproterenol treatment.

Alterations of arachidonate metabolism in cardiovascular system by cigarette smoking.

Comparison of uncoupling activities of chlorophenoxy herbicides in rat liver mitochondria.

Aminotriazole effects on lung and heart H₂O₂ detoxifying enzymes and TBA-RS at two pO₂.

End-tidal CO₂, CO₂ production, and O₂ consumption as early indicators of approaching hyperthermia.

Late pulmonary allergic responses in actively but not passively IgE-sensitized rats.

Neutral and acidic human tracheobronchial mucin. Isolation and characterization of core protein.

Ontogeny of mitochondrial calcium transport in spontaneously hypertensive (SHR) and WKY rats.

Intraabdominal sepsis: effects on polymorphonuclear leukocyte Fc receptor-mediated phagocytosis.

Pulmonary diffusing capacities for nitric oxide and carbon monoxide determined by rebreathing in dogs.

[Development of the concept of antidotes: the contribution of clinical toxicology].

[The nature, severity and distribution of obstructive airway lesions in COPD studied by morphometry and computer-assisted 3-D reconstruction].

Purification and characterization of a Mr approximately 66,000 lung-derived (paracrine) growth factor that preferentially stimulates the in vitro proliferation of lung-metastasizing tumor cells.

Effect of sodium azide on hydrogen peroxide production by zymosan-activated human neutrophils.

Experimentally induced congenital diaphragmatic hernia in rats.

Preparation of triazolo[1,5-c]pyrimidines as potential antiasthma agents.

Radiological "metamorphosis" in a patient with severe congenital osteogenesis imperfecta.

Studies on specific serological antigens in metacercariae and juveniles of *Paragonimus westermani* and its monoclonal antibodies.

Histological examination of the temporal bone in medicolegal cases of asphyxia.

Ethylene dichloride: the influence of disulfiram or ethanol on oncogenicity, metabolism, and DNA covalent binding in rats.

Airway opioid receptors mediate inhibition of cough and reflex bronchoconstriction in guinea pigs.

The effect of mitochondrial inhibitors on calcium homeostasis in tumor mast cells.

Neurogenic inflammation, vascular permeability, and mast cells. Capsaicin desensitization fails to influence IgE-anti-DNP induced vascular permeability in rat airways.

Changes in the composition and metabolism of arterial collagens during the development of pulmonary hypertension in rabbits.

Unintentional methyl bromide gas release--Florida, 1988.

Methyl bromide intoxication in four field-workers during removal of soil fumigation sheets.

Unit length as the denominator for quantitation of cell proliferation in nasal epithelia.

Differential enzyme induction of mouse liver and lung following a single low or high dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Lung injury in Fischer but not Sprague-Dawley rats after short-term hyperoxia.

Mitochondrial respiratory inhibition by N-methylated beta-carboline derivatives structurally resembling N-methyl-4-phenylpyridine.

Influence of SK&F 95587 and BN 50730 on bronchoconstrictor responses in the cat.

Dual effect of amiodarone on mitochondrial respiration. Initial protonophoric uncoupling effect followed by inhibition of the respiratory chain at the levels of complex I and complex II.

Uptake and retention of hexakis (2-methoxyisobutyl isonitrile) technetium(I) in cultured chick myocardial cells. Mitochondrial and plasma membrane potential dependence.

[Effect of inflammatory mediators on respiration in rat liver mitochondria].

Carboxyatractylate-sensitive uncoupling in liver mitochondria from ground squirrels during hibernation and arousal.

Hepatic aryl hydrocarbon hydroxylase and cytochrome P450 induction following the transpulmonary absorption of TCDD from intratracheally instilled particles.

Reduction of phosphate-induced dysfunction in rat heart mitochondria by carnitine.

Respiration and Motility in Starfish Spermatozoa at Various Times in the Breeding Season: (starfish/sperm, motility/respiration).

2-Nitrofluorene metabolism in the rat lung. Pharmacokinetic and metabolic effects of beta-naphthoflavone treatment.

Inorganic arsenic methylation by rat tissue slices.

End-tidal carbon dioxide concentration, carbon dioxide production, heart rate, and blood pressure as indicators of induced hyperthermia.

The role of cytochromes P-450 and flavin-containing monooxygenase in the metabolism of (S)-nicotine by rabbit lung.

Glutathione enhancement in various mouse organs and protection by glutathione isopropyl ester against liver injury.

Rapid toxicity testing based on yeast respiratory activity.

Respiratory inhibitors and uncouplers prevent the aeration-induced increase in mitochondrial anion conductivity.

Effect of polymorphonuclear leukocyte-derived oxygen free radicals and hypochlorous acid on cardiac function and some biochemical parameters.

Isolation to homogeneity and partial characterization of a histo-blood group A defined Fuc alpha 1----2Gal alpha 1----3-N-acetylgalactosaminyltransferase from human lung tissue.

Respiratory tract epithelium in primary culture: Effects of ciliotoxic compounds.

Sodium-azide-evoked noradrenaline release from peripheral nerves of rabbit pulmonary artery.

Microphotometric determination of enzymes in brain sections. III. Glutamate dehydrogenase.

Microphotometric determination of enzymes in brain sections. II. GABA transaminase.

Effects of perfluoro-n-decanoic acid on the respiratory activity of isolated rat liver mitochondria.

Metabolism and pulmonary toxicity of cyclophosphamide.

ICRF 187 and polyhydroxyphenyl derivatives fail to protect against bleomycin induced lung injury.

Paraquat poisoning: per vagina.

Total exclusion from external respiration protects lungs from development of fibrosis after paraquat intoxication.

Paraquat poisoning.

Effect of paraquat on serum and lung angiotensin I converting enzyme (AICE) activity in beagle dogs.

Bronchial artery ligation modifies pulmonary edema after exposure to smoke with acrolein.

DNA strand breaks in mammalian tissues induced by methylarsenics.

[Failure of a cyclophosphamide-dexamethasone combination in paraquat poisoning].

[Paraquat poisoning].

[Clinical studies on paraquat poisoning; prognosis and severity index of paraquat poisoning using the urine levels].

Acute vapour inhalation toxicity of acrolein and its influence as a trace contaminant in 2-methoxy-3,4-dihydro-2H-pyran.

[A clinical study of pulmonary edema on paraquat poisoning by double indicator dilution method using heat and sodium].

[Paraquat poisoning. Pulmonary lesions].

Effects of paraquat on canine bronchoalveolar lavage fluid.

The effects of 24% paraquat (1,1'-dimethyl-4,4'-bipyridylium dichloride) on hemodynamics, blood gases, plasma lactate and plasma catecholamines in dogs.

Continuous intravenous infusion of deferoxamine reduces mortality by paraquat in vitamin E-deficient rats.

Free radical effects on lung metabolism.

[Paraquat poisoning: clinical and anatomopathologic aspects in 3 cases].

Dinoseb toxicosis in two dogs.

Effectiveness of vitamin E and colchicine in amelioration of paraquat lung injuries using an experimental model.

A new method for predicting the outcome and survival period in paraquat poisoning.

Mechanistic studies: their role in the toxicological evaluation of pesticides.

[Lung changes in rats under the action of paraquat and the importance of antioxidants].

[Paraquat and diquat: mechanisms of toxicity].

[Problem of correlating the effect of carbon fiber dust on the body and the degree of migration of residual monomers and the products of their thermal destruction in a model biological media].

[The pulmonary lesions in paraquat poisoning].

An immunohistochemical study of the fibrosing process in paraquat lung injury.

Paraquat is not accumulated in B16 tumor cells by the polyamine transport system.

Experimental pulmonary fibrosis induced by paraquat plus oxygen in rats: a morphologic and biochemical sequential study.

Bronchial responsiveness and inflammation in guinea pigs exposed to acrolein.

Evolution of metaplastic squamous cells of alveolar walls in pulmonary fibrosis produced by paraquat. An ultrastructural and immunohistochemical study.

Relationship between changes in alveolar surfactant levels and lung defence mechanisms.

Spermidine uptake by type II pneumocytes: interactions of amine uptake pathways.

Nuclearly inherited diuron-resistant mutations conferring a deficiency in the NADH--or succinate--ubiquinone oxidoreductase activity in *Saccharomyces cerevisiae*.

Resistance of rat pulmonary alveolar epithelial cells to neutrophil- and oxidant-induced injury.

Hydroxylamine is a vasorelaxant and a possible intermediate in the oxidative conversion of L-arginine to nitric oxide.

Sulfidopeptide leukotrienes mediate acrolein-induced bronchial hyperresponsiveness.

N-methylation as a toxication route for xenobiotics. II. In vivo formation of N,N'-dimethyl-4,4'-bipyridyl ion (paraquat) from 4,4'-bipyridyl in the guinea pig.

The accumulation of cystamine and its metabolism to taurine in rat lung slices.

Metallothionein-I accumulation in the rat lung following a single paraquat administration.

Spermidine uptake by type II pulmonary epithelial cells in primary culture.

Teratogenic assessment of 2,4-dichlorophenol in Fischer 344 rats.

Protein kinase-C-induced down-regulation of calcitonin receptors and calcitonin-activated adenylate cyclase in T47D and BEN cells.

Purification and characterization of recombinant human parathyroid hormone-related protein.

Cottonseed meal (gossypol) toxicosis in a swine herd.

Simultaneous determination of L-homoserine and L-homoserine lactone by reversed-phase liquid chromatography in acid hydrolysates of proteins after cyanogen bromide treatment.

Mechanism of tolerance to renal ischemia in harbor seal: role of membranes.

Suppression of aryl hydrocarbon hydroxylase activity in human primary lung carcinoma x mouse hepatoma somatic cell hybrids.

Hemodynamic effects of experimental iron poisoning.

Mitochondrial function in carbon tetrachloride-induced cirrhosis in the rat. Qualitative and quantitative defects.

Absence of alpha 2(1) procollagen synthesis in a clone of SV40-transformed WI-38 human fibroblasts.

[Fibrogenesis and glycoconjugates].

Mode of metabolism is altered in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treated rats.

In vivo susceptibility of *Campylobacter pylori*.

[A case of remarkable bronchial stenosis due to aspiration of delayed-release iron tablet].

Hematotoxic effects in the rat of a toluene dinitro derivative after short-term exposure.

Involvement of ventral medullary surface in respiratory responses induced by 2,4-dinitrophenol.

Antigen-induced bronchopulmonary alterations in the guinea pig: a new model of passive sensitization mediated by mouse IgE antibodies.

The role of mucus sol phase in clearance by simulated cough.

Iodine-131 MIBG scintigraphy in small cell lung cancer.

Collagens of normal and cirrhotic human liver.

Dimethylated arsenics induce DNA strand breaks in lung via the production of active oxygen in mice.

Prolonged aerobic exercise: physiological studies in rat gastrocnemius with additional observations on the effects of acute mitochondrial blockade.

Effects of the new nitrosourea derivative, fotemustine, on the glutathione reductase activity in rat tissues in vivo and in isolated rat hepatocytes.

Bradykinin and inositol 1,4,5-trisphosphate-stimulated calcium release from intracellular stores in cultured bovine endothelial cells.

Effects of metabolic inhibitors and incubation temperature on the saturable uptake of propranolol by isolated rat lung tissue.

Differential effects of osmotic pressure on mitochondrial respiratory chain and indices of oxidative phosphorylation.

Metabolic activation and nucleic acid binding of acetaminophen and related arylamine substrates by the respiratory burst of human granulocytes.

Site-directed inactivation of human lung acidic glutathione S-transferase by 1-chloro-2,4-dinitrobenzene in the absence of glutathione.

Effects of 2,4-dinitrophenol and anoxia on the inorganic-pyrophosphate content of the spadix of *Arum maculatum* and the root apices of *Pisum sativum*.

Effects of hypoxic hypoxia and reoxygenation on H₂O₂ production in rat brain in vivo.

Benzoyl peroxide interaction with mitochondria: inhibition of respiration and induction of rapid, large-amplitude swelling.

Mitochondrial porin regulates the sensitivity of anion carriers to inhibitors.

Iron stimulation of free radical-mediated porphyrinogen oxidation by hepatic and renal mitochondria.

Uptake of CD-349 and nitrendipine into bovine intrapulmonary artery and vein.

Preparation of diastereomeric beta-d-glucuronides of the bronchodilator procaterol using immobilized rabbit liver microsomal enzymes.

Non-mitochondrial calcium ion regulation in rat ventricular myocytes.

Activation of the food-derived mutagen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine by rabbit and human liver microsomes and purified forms of cytochrome P-450.

Rat lung glucose metabolism after 24 h of exposure to 100% oxygen.

Genotoxic effects of paraquat and diquat evaluated by sister-chromatid exchange, chromosomal aberration and cell-cycle rate.

Intestinal maturation: characterization of mitochondrial calcium transport in the rat.

Efficiency of respirator canisters with methyl bromide.

Metabolism of transplacental carcinogens.

Cationic polyelectrolytes: potent opsonic agents which activate the respiratory burst in leukocytes.

Adhering lung macrophages produce superoxide demonstrated with desferal-Mn(IV).

Dimethylthiourea prevents hydrogen peroxide and neutrophil mediated damage to lung endothelial cells in vitro and disappears in the process.

Sodium-azide-evoked noradrenaline and catecholamine release from peripheral sympathetic nerves and chromaffin cells.

H₂O₂ and cGMP may function as an O₂ sensor in the pulmonary artery.

Membrane oxidative metabolism of human eosinophilic cell line EoL-1 in response to phorbol diester and formyl peptide: synergistic augmentation by interferon-gamma and tumor necrosis factor.

Neonatal paraquat poisoning: a case report.

Pulmonary fibrosis following paraquat poisoning.

Influence of bipyridylum compounds on microsomal mixed-function oxidation activities.

Effect of paraquat on lung calcium transport.

Current perspectives on clinical and experimental single lung transplantation.

Brain damage due to paraquat poisoning: a fatal case with neuropathological examination of the brain.

Radiotherapy for the treatment of pulmonary complications of paraquat poisoning.

Prolonged, intravenous paraquat infusion in the rat. II. Paraquat-induced alterations in lung polyamine metabolism.

Early radiotherapy in the treatment of paraquat poisoning.

[Immunohistochemical study of alveolar epithelium in paraquat poisoning].

Pulmonary effects of repeated exposures to paraquat aerosol in guinea pigs.

Paraquat poisoning: biological presentation.

Pathobiological effects of acrolein in cultured human bronchial epithelial cells.

Changes in elastic-related fibers in the human paraquat lung.

Alveolar cell carcinoma in a cook.

Synthetic smoke with acrolein but not HCl produces pulmonary edema.

Ultrastructure of canine lung during the proliferative phase of paraquat toxicity.

Adverse effects of (15S)-15-methyl-prostaglandin E1 in normal and paraquat-exposed rats.

Limited dermal ossification: a case report.

Toxicokinetics of paraquat through the heart-lung block. Six cases of acute human poisoning.

N-acetylcysteine in paraquat toxicity: toxicological and histological evaluation in rats.

Pulmonary elastic fiber degradation in paraquat toxicity. An electron microscopic immunohistochemical study.

[Failure of chemotherapy and radiotherapy in pulmonary fibrosis caused by paraquat].

Immune-mediated glomerulonephritis after exposure to paraquat.

Evaluation of monoclonal antibody against human pulmonary surfactant apoprotein.

[Pathomorphology of lung changes caused by gramoxone poisoning. Human pathologic and animal experimental studies].

Effects of methylprednisolone on acute lung paraquat toxicity in sheep.

Effects of Gramoxone-induced reactive oxygen radicals on eicosanoid synthesis of mouse lung.

Protective role of sulfhydryl reagents in oxidant lung injury.

The effect of paraquat lung on mononuclear cells.

Respiratory chain inhibitors slow gluconeogenesis.

Prolonged, intravenous paraquat infusion in the rat. I. Failure of coinfused putrescine to attenuate pulmonary paraquat uptake, paraquat-induced biochemical changes, or lung injury.

Protective effect of alpha-human atrial natriuretic polypeptide (alpha-hANP) on chemical-induced pulmonary edema.

[The phenomenon of the accumulation of biological and nonbiological corpuscular particles in mammalian lungs].

DNA damage in stomach, kidney, liver and lung of rats treated with atrazine.

Urinary atrazine metabolites as indicators for rat and human exposure to atrazine.

Pulmonary indoleamine 2,3-dioxygenase activity and its significance in the response of rats, mice, and rabbits to oxidative stress.

Molecular basis for resistance to antimycin and diuron, Q-cycle inhibitors acting at the Qi site in the mitochondrial ubiquinol-cytochrome c reductase in *Saccharomyces cerevisiae*.

Toxicokinetics and bioavailability of paraquat in rats following different routes of administration.

The accumulation and localisation of putrescine, spermidine, spermine and paraquat in the rat lung. In vitro and in vivo studies.

Spontaneous lung chemiluminescence upon paraquat administration.

Adult rat lung in dynamic organ culture: a new tool in pharmacology.

Low level chemiluminescence from isolated rat hepatocytes, intact lung and intestine in situ.

Effect of aerosol challenge with sensitising antigen on the permeability of the surface of the rat trachea in life.

Altered production of the active oxygen species is involved in enhanced cytotoxic action of acylated derivatives of ascorbate to tumor cells.

Fibronectin: source of mannose in a highly purified respiratory mucin.

[Respiratory distress syndrome in a case of ferrous sulfate poisoning].

Enzyme-linked immunosorbent assay of core antigens for clinical diagnosis of influenza.

Degrading process of acute ischemic myocardial cells.

Catalase prevents increased lung vascular permeability during air emboli in unanesthetized sheep.

The effect of iron therapy on the exercise capacity of nonanemic iron-deficient adolescent runners.

Effect of catalase on endotoxin-induced acute lung injury in unanesthetized sheep.

Altered elastin and collagen synthesis associated with progressive pulmonary hypertension induced by monocrotaline. A biochemical and ultrastructural study.

Abnormal methylation capacity in human liver cirrhosis.

Mortality among California highway workers.

Farming and exposure to chemicals in male lung cancer patients and their siblings.

Synthesis of ¹¹C-methylated inulin as a radiopharmaceutical for imaging brain edema and pulmonary edema.

The activator protein for glucosylceramide beta-glucosidase from guinea pig liver. Improved isolation method and complete amino acid sequence.

Assessment of the relative hazard involved with airborne irritants with additional hepatotoxic or nephrotoxic properties in mice.

Hydroperoxide metabolism of amphibia: tissue catalases of leopard frogs.

Xenopus spermatozoon: is there any correlation between motility and oxygen consumption?

Alkane production by isolated rat heart and lung.

Central respiratory inhibition by angiotensin II in anesthetized cats.

Metabolism of round spermatids: gossypol induces uncoupling of respiratory chain and oxidative phosphorylation.

Isolation and characterization of two beta-type cardiac myosin in the canine atrium.

The effect of molecular weight/lipophilicity on clearance of organic compounds from lungs.

Teratogenic effects of nitrofen on cellular and functional maturation of the rat lung.

Unexpected stimulation of mitochondrial ADP-ribosylation by cyanide.

Crystal violet as an uncoupler of oxidative phosphorylation in rat liver mitochondria.

Factors regulating activation and DNA alkylation by 4-(N-methyl-N-nitrosamino)-1-(3-pyridyl)-1-butanone and nitrosodimethylamine in rat lung and isolated lung cells, and the relationship to carcinogenicity.

Modulation of the in vitro candidacidal activity of human neutrophil defensins by target cell metabolism and divalent cations.

Role of transferrin and ceruloplasmin in antioxidant activity of lung epithelial lining fluid.

A highly sensitive gas chromatographic method does not detect exhalation of volatile hydrocarbons from isolated ventilated lungs under massive peroxidative stress.

Respiratory Properties of Mitochondria from Rice Seedlings Germinated under Water and Their Changes during Air Adaptation.

Effects of piperine on bioenergetic functions of isolated rat liver mitochondria.

Application of linear integration in the morphometric study of mild and severe pulmonary alveolar injury.

CO₂ production of the chick embryo during the first day of post-laying development.

Regulation of human basophil and lung mast cell function by cyclic adenosine monophosphate.

Cardiac transplantation in a Jehovah's witness.

Comparison of the action of epinephrine and a respiratory chain uncoupler, 2,4-dinitrophenol, on Ca²⁺-mobilization in isolated hepatocytes and perfused livers.

Antigenic contraction of guinea pig tracheal preparations passively sensitized with monoclonal IgE: pharmacological modulation.

Effects of arachidonic acid on respiratory activities in isolated brain mitochondria.

[Inhibition of mitochondrial respiration by mepivacaine].

The pathologic and immunologic effects of inhaled acrolein in rats.

Acute sensitivity of BHT-induced alveolar toxicity to a diquat challenge in murine lungs.

Recovery after radiotherapy from severe interstitial pneumonia due to paraquat poisoning.

Effect of paraquat on plasma fibronectin, serum free hydroxyproline, serum ceruloplasmin and lung collagen content in monkeys.

Lung fibrosis induced by diquat after intratracheal administration.

[Paraquat-induced pulmonary fibrosis].

Eighty-five day postexposure follow-up study in Fischer 344 rats after repeated exposures to methyl isocyanate vapor.

Paraquat (gramoxone) poisoning in south-west Hungary, 1977-1984. Toxicological and histopathological aspects of group intoxication cases.

Specific polyclonal and monoclonal antibody prevents paraquat accumulation into rat lung slices.

[Low-dose radiotherapy of pulmonary complications resulting from paraquat intoxication: report of a case].

[An ultrastructural study of paraquat-induced intra-alveolar fibrosis of the lung].

Concentration-dependent respiratory response of guinea pigs to paraquat aerosol.

Quantifiable morphologic evaluation of paraquat pulmonary toxicity in rats.

Worker exposure to a herbicide applied with ground sprayers in the United Kingdom.

Use of the oxidase electrode to determine tumor cell metabolism of peroxide.

A case of fatal sodium azide ingestion.

Liver histology in chronic metribuzin poisoning of the guinea-pig.

Relationship of alterations in energy metabolism to hypophagia in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Occurrence of drug reactions].

Cell number and size in selected organs of fetuses of rats malnourished and exposed to nitrofen.

Possible ethnic difference in toluene metabolism: a comparative study among Chinese, Turkish and Japanese solvent workers.

A quantitative evaluation of the extent of inner mitochondrial membrane destruction after freezing-thawing based on functional studies.

Respiration in Eggs of the Echiuroid, *Urechis unicinctus*, Before and After Fertilization: echiuroid eggs/fertilization/respiration/redox dyes/uncoupler of oxidative phosphorylation.

The cytochrome P-450 monooxygenase system of rabbit lung enzyme components, activities, and induction in the nonciliated bronchiolar epithelial (Clara) cell, alveolar type II cell, and alveolar macrophage.

Rat lung microsomal lipid peroxidation: effects of vitamin E and reduced glutathione.

In vivo and in vitro evaluations of spermatotoxicity induced by 2-ethoxyethanol treatment.

N-alkylaminobenzotriazoles as isozyme-selective suicide inhibitors of rabbit pulmonary microsomal cytochrome P-450.

The action of mouse liver and lung homogenates on the ESR signal of a spin-labelled antiviral compound.

Ah receptor mediating induction of aryl hydrocarbon hydroxylase: detection in human lung by binding of 2,3,7,8-[3H]tetrachlorodibenzo-p-dioxin.

Metabolic inhibitors block anaphase A in vivo.

The glutathione redox cycle as a defense system against hydrogen-peroxide-induced prostanoid formation and vasoconstriction in rabbit lungs.

Evidence that the development of hepatic fatty acid oxidation at birth in the rat is concomitant with an increased intramitochondrial CoA concentration.

Tissue-specific expression of the mouse dioxin-inducible P(1)450 and P(3)450 genes: differential transcriptional activation and mRNA stability in liver and extrahepatic tissues.

Arsenic levels in blood, urine, and hair of workers applying monosodium methanearsonate (MSMA).

The effects of inhalation of organic chemical air contaminants on murine lung host defenses.

Pyruvate metabolism of perfused rat lungs after exposure to 100% oxygen.

The effect of substrate on the expression of activity catalyzed by cytochrome P-450: metabolism mediated by rabbit isozyme 6 in pulmonary microsomal and reconstituted monooxygenase systems.

Influence of pulmonary blood flow and O₂ flux on DO₂ in avian lungs.

Airborne arsenic and urinary excretion of metabolites of inorganic arsenic among smelter workers.

Relevance of gas and particulate phases of tobacco smoke for lung cancer formation: an experimental study in Syrian golden hamsters.

Iron-induced peroxidative injury to isolated rat hepatic mitochondria.

Characterization and control of cytosolic binding proteins for 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the rat lung.

Studies on cytochrome-c oxidase, XIII. Amino-acid sequence of the small membrane polypeptide VIIIc from bovine heart respiratory complex IV.

Respiratory adjustments of the unanaesthetized chicken, *Gallus domesticus*, to elevated metabolism elicited by 2,4-dinitrophenol or cold exposure.

Species comparison of drug absorption from the lung after aerosol inhalation or intratracheal injection.

Paraquat toxicity.

Cardio-respiratory effects of paraquat with and without emetics on Wistar rats.

The duration of the pulmonary paraquat toxicity--enhancement effect of O₂ in the rat.

Pulmonary dysfunction during paraquat-induced lung injury: a model of acute alveolar injury.

A new model of diffuse interstitial pulmonary fibrosis in the rat.

Lung irradiation for paraquat toxicity.

A cautionary note on the resolution of paraquat lung damage after radiotherapy.

Stimulation and inhibition of DNA synthesis and cell growth by paraquat in cultured cells.

Mitochondrial injury of pulmonary alveolar epithelial cells in acute paraquat intoxication.

A follow-up study of cancer incidence among workers in manufacture of phenoxy herbicides in Denmark.

Systematically applied chemicals that damage lung tissue.

Sequential bilateral lung transplantation for paraquat poisoning. A case report. The Toronto Lung Transplant group.

[Oxygen therapy in toxic pulmonary edema of various etiologies (review of the literature)].

Elucidating the effects of pure glyphosate and a commercial formulation on early life stages of zebrafish using a complete biomarker approach: All-or-nothing!

Study on the toxicity prediction model of acetolactate synthase inhibitor herbicides based on human serum albumin and superoxide dismutase binding information.

Melatonin increased antioxidant capacity to ameliorate growth retardation and intestinal epithelial barrier dysfunction in diquat-challenged piglets.

Impact of pesticides exposure on *Archachatina marginata* snails in four Cameroon monomodal rainforest sites.

Integrated analysis of ceRNA-miRNA changes in paraquat-induced pulmonary epithelial-mesenchymal transition via high-throughput sequencing.

Neurotoxicity of glyphosate: Focus on molecular mechanisms probably associated with alterations in cognition and behavior.

A potential mechanism clue to the periodic storm from microglia activation and progressive neuron damage induced by paraquat exposure.

Prometryn exposure disrupts the intestinal health of *Eriocheir sinensis*: Physiological responses and underlying mechanism.

Impact of exposure to glyphosate-based herbicide on morphological and physiological parameters in embryonic and larval development of zebrafish.

Inhaled paraquat-induced lung injury in rat, improved by the extract of *Zataria multiflora* boiss and PPAR γ agonist, pioglitazone.

Targeted upregulation of dMyc restricts JNK-mediated degeneration of dopaminergic neurons in the paraquat-induced Parkinson's disease model of *Drosophila*.

Pelargonidin alleviates acrolein-induced inflammation in human umbilical vein endothelial cells by reducing COX-2 expression through the NF- κ B pathway.

Research on phytotoxicity assessment and photosynthetic characteristics of nicosulfuron residues on *Beta vulgaris* L.

Mitochondrial reactive oxygen species initiate gasdermin D-mediated pyroptosis and contribute to paraquat-induced nephrotoxicity.

Regulation of NCOA4-mediated iron recycling ameliorates paraquat-induced lung injury by inhibiting ferroptosis.

Transcriptomic and behavioral analyses reveal unique target tissues and molecular pathways associated with embryonic exposure to low level glyphosate and metal mixtures in zebrafish.

Melatonin inhibits atrazine-induced mitochondrial impairment in cerebellum of mice: Modulation of cGAS-STING-NLRP3 axis-dependent cell pyroptosis.

Association of UGT1A1 gene variants, expression levels, and enzyme concentrations with 2,3,7,8-TCDD exposure in individuals exposed to Agent Orange/Dioxin.

A combination of silymarin and garlic extract enhances thyroid hormone activation and body metabolism in orally intoxicated male rats with atrazine: Impact on hepatic iodothyronine deiodinase type 1.

Induction of Paraquat-Mediated Parkinsonian Phenotype in Zebrafish.

Glyphosate: Impact on the microbiota-gut-brain axis and the immune-nervous system, and clinical cases of multiorgan toxicity.

Peripubertal exposure of atrazine cause decrease in exploratory activity, deficits in sociability and few alterations on brain monoaminergic systems of rats.

Toxicity assessment of commercial herbicide formulations to *Eisenia andrei* (Bouché, 1972) in oxisols.

Combined effect of fungicide, herbicide and plant elicitor used in apple orchards on non-target epiphytic moss *Hypnum cupressiforme*.

In vivo estrogenicity of glyphosate, its formulations, and AMPA on transgenic zebrafish (*Danio rerio*) embryos.

Paraquat (herbicide) as a cause of Parkinson's Disease.

Comparative deterministic and probabilistic approaches for assessing the aquatic ecological risk of pesticides in a mixed land use basin: A case study in Uruguay.

Abalone peptide increases stress resilience and cost-free longevity via SKN-1-governed transcriptional metabolic reprogramming in *C. elegans*.

Assessment of oxidative stress biomarkers in the threatened annual killifish *Austrolebias charrua* exposed to Roundup.

Investigating adverse effects of chronic dietary exposure to herbicide glyphosate on zootechnical characteristics and clinical, biochemical and immunological blood parameters in broiler chickens.

Glyphosate Disorders Soil Enchytraeid Gut Microbiota and Increases Its Antibiotic Resistance Risk.

The Peptide DH β -(4-pentenyl)-ANPQIR-NH(2) Exhibits Antifibrotic Activity in Multiple Pulmonary Fibrosis Models Induced by Particulate and Soluble Chemical Fibrogenic Agents.

From dysbiosis to neuropathologies: Toxic effects of glyphosate in zebrafish.

Elevated parkinsonism pathological markers in dopaminergic neurons with developmental exposure to atrazine.

Metabolomic Changes in Rat Serum after Chronic Exposure to Glyphosate-Based Herbicide.

Exposure to sublethal concentrations of imidacloprid, pyraclostrobin, and glyphosate harm the behavior and fat body cells of the stingless bee *Scaptotrigona postica*.

The Association of Agent Orange Exposure with the progression of λ monoclonal gammopathy of undetermined significance to multiple myeloma: a population-based study of Vietnam War Era Veterans.

Agent Orange Herbicidal Toxin-Initiation of Alzheimer-Type Neurodegeneration.

Amentoflavone mediated hepatoprotection to counteract paraquat instigated hepatotoxicity via modulating Nrf2/keap1 pathway: A biochemical, inflammatory, apoptotic and histopathological study.

Analysis of abnormal expression of signaling pathways in PQ-induced acute lung injury in SD rats based on RNA-seq technology.

The ROS/SIRT1/STAR axis as a target for melatonin ameliorating atrazine-induced mitochondrial dysfunction and steroid disorders in granulosa cells.

Aqueous leaf extract of *Phyllanthus amarus* protects against oxidative stress and misfiring of dopaminergic neurons in Paraquat-induced Parkinson's disease-like model of adult Wistar rats.

Atrazine exposure caused oxidative stress in male rats and inhibited brain-pituitary-testicular functions.

Evaluation of neurological behavior alterations and metabolic changes in mice under chronic glyphosate exposure.

MicroRNA-217-5p triggers dopaminergic neuronal degeneration via autophagy activation under Atrazine exposure.

Testosterone restores TM3 and TM4 cell viability, reduces reactive oxygen species generation, and protects against atrazine-induced stereological changes in rat testes.

Sulfate radical-based advanced oxidation process effects on tire wear particles aging and ecotoxicity.

Diuron and its metabolites induce mitochondrial dysfunction-mediated cytotoxicity in urothelial cells.

Ferulic acid grafted into β -cyclodextrin nanosponges ameliorates Paraquat-induced human MRC-5 fibroblast injury.

A mixture of glyphosate and 2,4-D herbicides enhances the deleterious reproductive outcomes induced by Western diet in obese male mice.

Ultimate fate, transformation, and toxicological consequences of herbicide pretilachlor to biotic components and associated environment: An overview.

Paraquat and Parkinson's Disease: The Molecular Crosstalk of Upstream Signal Transduction Pathways Leading to Apoptosis.

Atrazine exposure promotes cardiomyocyte pyroptosis to exacerbate cardiotoxicity by activating NF- κ B pathway.

Analysis of the association between urinary glyphosate exposure and fatty liver index: a study for US adults.

Cinnamaldehyde attenuates TNF- α induced skeletal muscle loss in C2C12 myotubes via regulation of protein synthesis, proteolysis, oxidative stress and inflammation.

Glyphosate and neurotoxicity - a call for scientific renewal.

Survival in Agent Orange exposed and unexposed Vietnam-era veterans who were diagnosed with lymphoid malignancies.

Agricultural paraquat dichloride use and Parkinson's disease in California's Central Valley.

Elucidating the mechanisms underlying astrocyte-microglia crosstalk in hippocampal neuroinflammation induced by acute diquat exposure.

Curcumin alleviates atrazine-induced cardiotoxicity by inhibiting endoplasmic reticulum stress-mediated apoptosis in mice through ATF6/Chop/Bcl-2 signaling pathway.

Amphibian-derived peptide RL-RF10 ameliorates paraquat-induced pulmonary fibrosis injury.

Inclusion of trans-cinnamaldehyde and caprylic acid in feed results in detectable concentrations in the chicken gut and reduces foodborne pathogen carriage.

Autophagy mediated FTH1 degradation activates gasdermin E dependent pyroptosis contributing to diquat induced kidney injury.

Memory impairment with symmetrical hippocampal lesions following acute glufosinate-ammonium intoxication.

Association of hair polychlorinated biphenyls and multiclass pesticides with obesity, diabetes, hypertension and dyslipidemia in NESCAV study.

Association Between Urinary Glyphosate Exposure and Cognitive Impairment in Older Adults from NHANES 2013-2014.

ATR induces hepatic lipid metabolism disorder in rats by activating IRE1 α /XBP1 signaling pathway.

Mid-to-late stage diquat accumulation in the central nervous system: A severe case of oral poisoning.

A rat model established by simulating genetic-environmental interactions recapitulates human Alzheimer's disease pathology.

Occult paraquat poisoning causing pneumomediastinum and organizing pneumonia.

Cinnamaldehyde as a Promising Dietary Phytochemical Against Metabolic Syndrome: A Systematic Review.

Vascular read-out for TRP channel functionality on distal peripheral nerve endings in healthy men.

Protective mechanisms of neral as a plant-derived safener against fenoxaprop-p-ethyl injury in rice.

A Forensic Case of Suicide Ingestion of Paraquat Herbicide: New Histological Insights and Revision of the Literature.

Perioperative exposure to volatile organic compounds in neonates undergoing cardiac surgery.

Effects and mechanisms of glyphosate as phosphorus nutrient on element stoichiometry and metabolism in the diatom *Phaeodactylum tricornutum*.

Association of urine glyphosate levels with renal injury biomarkers in children living close to major vegetable-producing regions in China.

Cinnamaldehyde protects cardiomyocytes from oxygen-glucose deprivation/reoxygenation-induced lipid peroxidation and DNA damage via activating the Nrf2 pathway.

Cinnamon and cognitive function: a systematic review of preclinical and clinical studies.

Development and validation of a prognostic nomogram for predicting in-hospital mortality of patients with acute paraquat poisoning.

Exogenous Melatonin Alleviates Atrazine-Induced Glucose Metabolism Disorders in Mice Liver via Suppressing Endoplasmic Reticulum Stress.

Disturbed nutrient accumulation and cell wall metabolism in panicles are responsible for rice straighthead disease.

Grape seed-derived procyanidin inhibits glyphosate-induced hepatocyte ferroptosis via enhancing crosstalk between Nrf2 and FGF12.

Triazine herbicide reduced the toxicity of the harmful dinoflagellate *Karenia mikimotoi* by impairing its photosynthetic systems.

Application of 3D-printed pollen traps as a useful tool for exposure and risk assessment of pesticide residues on bumblebees.

Diuron-induced fetal Leydig cell dysfunction in in vitro organ cultured fetal testes.

Biochemical and teratogenic effects of a mixture of pyriproxyfen and glyphosate.

Methyl viologen-induced changes in the Arabidopsis proteome implicate PATELLIN 4 in oxidative stress responses.

Cinnamic Aldehyde Causing Chronic Oral Mucosal Ulcerations.

Broad host-range pathogens as bioherbicides: managing nontarget plant disease risk.

Machine learning-driven identification of air toxic combinations associated with asthma symptoms among elementary school children in Spokane, Washington, USA.

Proteomic insight towards key modulating proteins regulated by the aryl hydrocarbon receptor involved in ovarian carcinogenesis and chemoresistance.

A regulatory module comprising G3BP1-FBXL5-IRP2 axis determines sodium arsenite-induced ferroptosis.

The aryl hydrocarbon receptor in β^2 -cells mediates the effects of TCDD on glucose homeostasis in mice.

Efficacy and safety of six new antiseizure medications for adjunctive treatment of focal epilepsy and epileptic syndrome: A systematic review and network meta-analysis.

African swine fever virus maintains de novo global cellular protein synthesis and inhibits stress granules formation via dephosphorylating eIF2 $\hat{\pm}$.

Associations of chronic exposure to a mixture of pesticides and type 2 diabetes mellitus in a Chinese elderly population.

Upregulated LncRNA-Meg3 modulates the proliferation and survival of MEPM cells via interacting with Smad signaling in TCDD-induced cleft palate.

Arsenic-induced IGF-1 signaling impairment and neurite shortening: The protective roles of IGF-1 through the PI3K/Akt axis.

Baicalin and lung diseases.

Congenital diaphragmatic hernia: phosphodiesterase-5 and Arginase inhibitors prevent pulmonary vascular hypoplasia in rat lungs.

"Comparative evaluation of different chemical agents induced Autism Spectrum Disorder in experimental Wistar rats".

ALDH2 deficiency exacerbates MCD-diet induced MASLD by modulating bile acid metabolism.

Evaluation of a pharmacist-managed anemia service in pregnant patients.

Regulation of stress granule formation in human oligodendrocytes.

Can our microbiome break our hearts? Collaborative production of p-cresol sulfate and indoxyl sulfate by commensal microbes increases susceptibility to thrombosis.

The association between polychlorinated dibenzo-p-dioxin exposure and cancer mortality in the general population: a cohort study.

Enrichment and distribution of 3,6-dichlorocarbazole in red crucian carp (*Carassius auratus*) and its hepatotoxicity.

Exploring *Caenorhabditis elegans* as Parkinson's Disease Model: Neurotoxins and Genetic Implications.

The characteristics of suicide attempters in Chinese patients: Comparison of adolescents, youths, middle-aged and elderly.

Association between dietary pesticide exposure profiles and body weight change in French adults: Results from the NutriNet-Santé cohort.

Reductions in concomitant antiseizure medication drug load during adjunctive cenobamate therapy: Post-hoc analysis of a subset of patients from a phase 3, multicenter, open-label study.

Prenatal arsenite exposure alters maternal cardiac remodeling during late pregnancy.

Anaemia among school children of different socioeconomical status in a city of Southern Brazil.

Self-heating mitochondrion-induced free radical blast for immunogenic cell death stimulation and HCC immunotherapy.

Characterizing the cumulative health risks of 19 kinds of pesticides in Chinese food from the cancer and non-cancer perspective.

Risk factors for childhood brain tumours: A systematic review and meta-analysis of observational studies from 1976 to 2022.

Investigation of the activity of a novel tropolone in osteosarcoma.

m-Cresol, a pesticide intermediate, induces hepatotoxicity and behavioral abnormalities in zebrafish larvae through oxidative stress, apoptosis.

Dysregulation of CITED2 in abnormal lung development in the nitrofen rat model.

[Analysis on early predictors of respiratory depression in patients with glufosinate poisoning].

Transgenerational Transmission of 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) Effects in Human Granulosa Cells: The Role of MicroRNAs.

Transcriptomic and metabolomic profile changes in the liver of Sprague Dawley rat offspring after maternal PFOS exposure during gestation and lactation.

A conformationally-locked p-hydroxybenzylidene imidazolinone derivative for detecting $A\beta(42)$ aggregation.

Synthetic GPR40/FFAR1 agonists: An exhaustive survey on the most recent chemical classes and their structure-activity relationships.

Switching from zonisamide to perampanel improved the frequency of seizures caused by hyperthermia in Dravet syndrome: a case report.

Fungicides as a risk factor for the development of neurological diseases and disorders in humans: a systematic review.

The urinary level of 2,4,5-trichlorophenol was positively associated with both all-cause and cause-specific mortalities in general adult residents of United States.

Prenatal treprostinil improves pulmonary arteriolar hypermuscularization in the rabbit model of congenital diaphragmatic hernia.

Design and evaluation of antibacterials crosslinked chitosan nanoparticle as a novel carrier for the delivery of metronidazole to treat bacterial vaginosis.

Case of Hemolytic Disease of the Fetus and Newborn Treated Without Blood Products.

Inhibition of the urea cycle by the environmental contaminant 2,3,7,8-tetrachlorodibenzo-p-dioxin increases serum ammonia levels in mice.

Association between cumulative airborne dioxin exposure and non-Hodgkin's lymphoma risk in a nested case-control study within the French E3N cohort.

Glufosinate-ammonium causes liver injury in zebrafish by blocking the Nrf2 pathway.

Mitochondria-targeted Uncouplers Decrease Inflammatory Reactions in Endothelial Cells by Enhancing Methylation of the ICAM1 Gene Promoter.

Local Regrowth and the Risk of Distant Metastases Among Patients Undergoing Watch-and-Wait for Rectal Cancer: What Is the Best Control Group? Multicenter Retrospective Study.

Gut Microbiota and Uremic Retention Solutes in Adults With Moderate CKD: A 6-Day Controlled Feeding Study.

The role of thioredoxin and glutathione systems in arsenic-induced liver injury in rats under glutathione depletion.

Screening of core microorganisms in healthy and diseased peaches and effect evaluation of biocontrol bacteria (*Burkholderia* sp.).

Mutagenesis of Ile184 in the cd-loop of the photosystem II D1 protein modifies acceptor-side function via spontaneous mutation of D1-His252 in *Synechocystis* sp. PCC 6803.

Environmentally relevant concentrations of 2,3,7,8-TCDD induced inhibition of multicellular alternative splicing and transcriptional dysregulation.

Carbon nitride dots do not impair the growth, development, and telomere length of tadpoles.

Both acute glyphosate and the aminomethylphosphonic acid intoxication decreased the acetylcholinesterase activity in rat hippocampus, prefrontal cortex and gastrocnemius muscle.

Identification of endocrine-disrupting chemicals targeting key DCM-associated genes via bioinformatics and machine learning.

Behavioral and biochemical consequences after chronic exposition to the herbicide atrazine in tadpoles.

Potential AhR-independent mechanisms of 2,3,7,8-Tetrachlorodibenzo-p-dioxin inhibition of human glioblastoma A172 cells migration.

MicroRNA-124-3p Modulates Alpha-Synuclein Expression Levels in a Paraquat-Induced in vivo Model for Parkinson's Disease.

Metabolism of the 4-Hydroxyphenylpyruvate Dioxygenase Inhibitor, Mesotrione, in Multiple-Herbicide-Resistant Palmer amaranth (*Amaranthus palmeri*).

Meptyldinocap induces implantation failure by forcing cell cycle arrest, mitochondrial dysfunction, and endoplasmic reticulum stress in porcine trophoblast and endometrial luminal epithelial cells.

Single-cell RNA-sequencing of cellular heterogeneity and pathogenic mechanisms in paraquat-induced Parkinson's disease with depression.

2,3,7,8-Tetrachlorodibenzo-p-dioxin and kynurenine induce Parkin expression in neuroblastoma cells through different signaling pathways mediated by the aryl hydrocarbon receptor.

Norflurazon causes cell death and inhibits implantation-related genes in porcine trophoblast and uterine luminal epithelial cells.

Identification of novel potential drugs for the treatment and prevention of osteoarthritis.

The uses of zebrafish (*Danio rerio*) as an in vivo model for toxicological studies: A review based on bibliometrics.

Hydrogen sulfide regulates arsenic-induced cell death in yeast cells by modulating the antioxidative system.

Bacterial Strains Isolated from Stingless Bee Workers Inhibit the Growth of *Apis mellifera* Pathogens.

Maternal exposure to glyphosate-based herbicide causes vascular dysfunction in offspring female rats.

Gut microbiota disorders aggravate terbuthylazine-induced mitochondrial quality control disturbance and PANoptosis in chicken hepatocyte through gut-liver axis.

Impact of chronic exposure to field level glyphosate on the food consumption, survival, gene expression, gut microbiota, and metabolomic profiles of honeybees.

Disruption of spermatogenesis in testicular adult Wistar rats after short-term exposure to high dose of glyphosate based-herbicide: Histopathological and biochemical changes.

The exposure in ovo to glyphosate on the integrity of intestinal epithelial tight junctions of chicks.

Short-term effects of sodium arsenite (AsIII) and sodium arsenate (AsV) on carbohydrate metabolism in the perfused rat liver.

Synergistic effect of spermidine and ciprofloxacin against Alzheimer's disease in male rat via ferroptosis modulation.

Effects of Intranasal Dantrolene Nanoparticles on Brain Concentration and Behavior in PS19 Tau Transgenic Mice.

Clinical characteristics of survivors versus non-survivors after acute diquat poisoning: a comparative study-comment.

Ecotoxicity studies reveal that organic cations in dicamba-derived ionic liquids can pose a greater environmental risk than the herbicide itself.

Co-exposure to pentachlorophenol (PCP) and cadmium (Cd) triggers apoptosis-like cell death in *Escherichia coli*.

Geniposide from *Gardeniae Fructus* exerts antipyretic effect in febrile rats through modulating the TLR4/NF- κ B signaling pathway.

Effects of sodium arsenite exposure on behavior, ultrastructure and gene expression of brain in adult zebrafish (*Danio rerio*).

Developmental toxicity and metabolomics analyses of zebrafish (*Danio rerio*) embryos exposed to Fenoxaprop-p-ethyl.

Corrigendum to "Elevated parkinsonism pathological markers in dopaminergic neurons with developmental exposure to atrazine" [Sci. Total Environ. 908 2024: Article 168307].

Loss of flavin-containing monooxygenase 3 modulates dioxin-like polychlorinated biphenyl 126-induced oxidative stress and hepatotoxicity.

MAPK/NF- κ B signaling mediates atrazine-induced cardiorenal syndrome and antagonism of lycopene.

Curative effects of tectochrysin on paraquat-instigated testicular toxicity in rats: A biochemical and histopathological based study.

Stereoselective toxicity of acetochlor chiral isomers on the nervous system of zebrafish larvae.

Metabolites and MRI-Derived Markers of AD/ADRD Risk in a Puerto Rican Cohort.

Pesticide use and inflammatory bowel disease in licensed pesticide applicators and spouses in the Agricultural Health Study.

Renoprotective effect of esculetin against ischemic acute kidney injury-diabetic comorbidity.

Roles of oxidative stress/JNK/ERK signals in paraquat-triggered hepatic apoptosis.

Pesticides in Ethiopian surface waters: A meta-analytic based ecological risk assessment.

Early and transitory hypoactivity and olfactory alterations after chronic atrazine exposure in female Sprague-Dawley rats.

Combined toxicity and adverse outcome pathways of common pesticides on *Chlorella pyrenoidosa*.

Magnolol extends lifespan and improves age-related neurodegeneration in *Caenorhabditis elegans* via increase of stress resistance.

Similar toxicity potential of glyphosate and glyphosate-based herbicide on cerebellar development after maternal exposure in rats.

Chronic arsenic exposure affects stromal cells and signaling in the small intestine in a sex-specific manner.

Assessing and mitigating foodborne acetochlor exposure induced ileum toxicity in broiler chicks: The role of omega-3 polyunsaturated fatty acids supplementation and molecular pathways analysis.

The study of the protective effect of mitochondrial uncouplers during acute toxicity of the fungicide difenoconazole in different organs of mice.

TCDD and CH223191 Alter T Cell Balance but Fail to Induce Anti-Inflammatory Response in Adult Lupus Mice.

Mitochondrial impairment related to the immunotoxicity of the herbicides clomazone, glyphosate and sulfentrazone in THP-1 cells.

Chemical mixture that targets the epidermal growth factor pathway impairs human trophoblast cell functions.

Embryonic Exposure to the Benzotriazole Ultraviolet Stabilizer 2-(2H-benzotriazol-2-yl)-4-methylphenol Decreases Fertility of Adult Zebrafish (*Danio rerio*).

Identification and functional prediction of long non-coding RNAs related to oxidative stress in the jejunum of piglets.

Concentration and non-dietary human health risk assessment of pesticide residues in soil of farms in Golestan province, Iran.

Clarification of the molecular mechanisms underlying glyphosate-induced major depressive disorder: a network toxicology approach.

The BCKDK inhibitor BT2 is a chemical uncoupler that lowers mitochondrial ROS production and de novo lipogenesis.

Influence of triazines and lipopolysaccharide coexposure on inflammatory response and histopathological changes in the testis and liver of BalB/c mice.

The effectiveness of oral bovine lactoferrin compared to iron supplementation in patients with a low hemoglobin profile: A systematic review and meta-analysis of randomized clinical trials.

A Narrative Review of Contemporary Lethal Pesticides: Unveiling the Ongoing Threat of Pesticide Poisoning.

Maternal Fatigue after Postpartum Anemia Treatment with Intravenous Ferric Carboxymaltose vs. Intravenous Ferric Derisomaltose vs. Oral Ferrous Sulphate: A Randomized Controlled Trial.

Aldo-keto reductase 1B10 as a Carcinogenic but Not a Prognostic Factor in Colorectal Cancer.

Immunocytochemical Analysis of Crocin against Oxidative Stress in Trigeminal Sensory Neurons Innervating the Cornea.

Chronic arsenic exposure-provoked biotoxicity involved in liver-microbiota-gut axis disruption in chickens based on multi-omics technologies.

Correction: Glyphosate infiltrates the brain and increases pro-inflammatory cytokine TNF α : implications for neurodegenerative disorders.

Proteomic-miRNA Biomics Profile Reveals 2D Cultures of Human iPSC-Derived Neural Progenitor Cells More Sensitive than 3D Spheroid System Against the Experimental Exposure to Arsenic.

Fluorochloridone induces mitochondrial dysfunction and apoptosis in primary goat Sertoli cells.

Updated Intrinsic Role of Phytochemicals against Glyphosate-induced Neurotoxicity: Systematic Review.

Occupational exposure to polychlorinated biphenyls: Development of neuropsychological functions over time.

Evaluation of *Salvia hispanica* as a Therapeutic Agent against Sodium Arsenic-Induced Testicular Toxicity in a Male Rats Model.

Cardiac Radiofrequency Ablation Exacerbates Myocardial Injury through Pro-Inflammatory Response and Pro-Oxidative Stress in Elderly Patients with Persistent Atrial Fibrillation.

Salvianolic acid A attenuates arsenic-induced ferroptosis and kidney injury via HIF-2 \uparrow /DUOX1/GPX4 and iron homeostasis.

A study of the pesticide residues in rapeseeds in China: Levels, distribution and health risk assessment.

Zingerone attenuates sciatic nerve damage caused by sodium arsenite by inhibiting NF- κ B, caspase-3, and ATF-6/CHOP pathways and activating the Akt2/FOXO1 pathway.

TRPA1 as a promising target in ischemia/reperfusion: A comprehensive review.

Elucidating the efficacy of functionalized multi-walled carbon nanotube in the biogenesis of L-Dopa and antioxidant metabolites in cell cultures of *Hybanthus enneaspermus*.

Impaired Detoxification of Trans, Trans-2,4-Decadienal, an Oxidation Product from Omega-6 Fatty Acids, Alters Insulin Signaling, Gluconeogenesis and Promotes Microvascular Disease.

Persistent Neutrophil Infiltration and Unique Ocular Surface Microbiome Typify Dupilumab-Associated Conjunctivitis in Patients with Atopic Dermatitis.

Examination of urinary pesticide concentrations, protective behaviors, and risk perceptions among Latino and Latina farmworkers in Southwestern Idaho.

Agent Orange Toxicity.

Phenol Toxicity.

Organophosphate Toxicity.

[Favorable evolution of severe paraquat poisoning. Treatment with gastric lavage, activated charcoal, cyclophosphamide + corticoids, and conventional daily hemodialysis: case study at the Franck Joly Hospital Center in French Guiana].

Holistic Assessment Based On Hepatocyte Mitochondria: Lycopene Repairs Oxidized mtDNA to Alleviate Mitochondrial Stress Induced by Atrazine.

Maternal exposure of mice to glyphosate induces depression- and anxiety-like behavior in the offspring via alterations of the gut-brain axis.

Selectivity of herbicides used in corn on *Crotalaria ochroleuca* G. Don.

Dienediamine: A safe surrogate for the herbicide paraquat.

Integrating transcriptome and physiological analyses to elucidate the molecular responses of sorghum to fluxofenim and metolachlor herbicide.

2-Methoxyestradiol ameliorates paraquat-induced pulmonary fibrosis by inhibiting the TGF- β 1/Smad2/3 signaling pathway.

Serum metabolome and liver transcriptome reveal acrolein inhalation-induced sex-specific homeostatic dysfunction.

Self-reported and urinary biomarker-based measures of exposure to glyphosate and mancozeb and sleep problems among smallholder farmers in Uganda.

Modifying effects of 2,4-D and Glyphosate exposures on gut-liver-adipose tissue axis of diet-induced non-alcoholic fatty liver disease in mice.

Effect of atrazine on testicular toxicity involves accommodative disorder of xenobiotic metabolizing enzymes system and testosterone synthesis in European quail (*Coturnix coturnix*).

The inadequacy of current pesticide regulations for protecting brain health: the case of glyphosate and Parkinson's disease.

Unraveling the combined deleterious effects of ochratoxin A and atrazine upon broiler's health: Toxicopathological, serum biochemical and immunological perspectives.

Association of glyphosate exposure with multiple adverse outcomes and potential mediators.

Impact of Agent Orange Exposure on Non-muscle Invasive Bladder Cancer Outcomes.

The effects of metallothionein in paraquat-induced Parkinson disease model of zebrafish.

Fostering temporal crop diversification to reduce pesticide use.

Sub-acute toxicity of the herbicide glufosinate-ammonium exposure in adult red swamp crayfish (*Procambarus clarkii*).

Mutagenicity, hepatotoxicity, and neurotoxicity of glyphosate and fipronil commercial formulations in Amazon turtles neonates (*Podocnemis expansa*).

Investigating the effects of mesotrione/atrazine-based herbicide on honey bee foragers.

Ecotoxicology of the herbicide paraquat: effects on wildlife and knowledge gaps.

The novel peptide DR4penA attenuates the bleomycin- and paraquat-induced pulmonary fibrosis by suppressing the TGF- β 2/Smad signaling pathway.

Toxicity assessment and detoxification metabolism of sodium pentachlorophenol (PCP-Na) on marine economic species: a case study of *Moerella iridescens* and *Exopalaemon carinicauda*.

The effects of *Crocus sativus* extract on inhaled paraquat-induced lung inflammation, oxidative stress, pathological changes and tracheal responsiveness in rats.

Abnormalities of serum lipid metabolism in patients with acute paraquat poisoning caused by ferroptosis.

Phytotoxicity and cytogenotoxicity of pesticide mixtures: analysis of the effects of environmentally relevant concentrations on the aquatic environment.

Molecular mechanism of paraquat-induced ferroptosis leading to pulmonary fibrosis mediated by Keap1/Nrf2 signaling pathway.

Effects of glyphosate exposure on western diet-induced non-alcoholic fatty liver disease in mice.

Cyanobacterial degradation of herbicide 2,4-dichlorophenoxyacetic acid (2,4-D): Its response to the oxidative stress induced by the primary degradation product 2,4-dichlorophenol (2,4-DCP).

Acrolein increases the concentration of intracellular Zn(2)⁺ by producing mitochondrial reactive oxygen species in A549 cells.

Exposure to pesticides and risk of Hodgkin lymphoma in an international consortium of agricultural cohorts (AGRICOH).

Zinc Oxide Nanoparticles and Vitamin C Ameliorate Atrazine-Induced Hepatic Apoptosis in Rat via CYP450s/ROS Pathway and Immunomodulation.

Neurotoxicity of Glyphosate to Planarian *Dugesia japonica*.

Higher urinary glyphosate exposure is associated with increased risk of liver dysfunction in adults: An analysis of NHANES, 2013-2016.

Glyphosate and environmental toxicity with "One Health" approach, a review.

Long-Term Effects of Perinatal Exposure to a Glyphosate-Based Herbicide on Melatonin Levels and Oxidative Brain Damage in Adult Male Rats.

Effects of defoliant exposure and medication use on the development of Parkinson's disease in veterans.

Predicting acute paraquat toxicity using physiologically based kinetic modelling incorporating in vitro active renal excretion via the OCT2 transporter.

Effect of sublethal concentrations of glyphosate-based herbicides (Roundup Active®) on skin of the tropical frog (*Dendropsophus molitor*).

Adverse developmental impacts in progeny of zebrafish exposed to the agricultural herbicide atrazine during embryogenesis.

Hydrolysis of propyrisulfuron in water: Kinetics, influence of 34 environmental factors, transformation products identification, mechanisms and toxicities.

Astaxanthin ameliorates dopaminergic neuron damage in paraquat-induced SH-SY5Y cells and mouse models of Parkinson's disease.

Sulfoxaflor effects depend on the interaction with other pesticides and *Nosema ceranae* infection in the honey bee (*Apis mellifera*).

FAM13A regulates cellular senescence marker p21 and mitochondrial reactive oxygen species production in airway epithelial cells.

Paraquat-induced ferroptosis suppression via NRF2 expression regulation.

Nano-TiO₂ aggravates the adverse effect of pentachlorophenol on antioxidant and immune response in anti-predatory mussels.

The Protective Role of Oleuropein Aglycone against Pesticide-Induced Toxicity in a Human Keratinocytes Cell Model.

Microglia-derived exosomal circZNF1 alleviates paraquat-induced neuronal cell damage via miR-17-5p.

Measurement of an intestinal biomarker during poisonings from select toxicants and toxins.

Effects of acephate and glyphosate-based agrochemicals on the survival and flight of *Plebeia lucii* Moure, 2004 (Apidae: Meliponini).

Acrolein Induces Retinal Abnormalities of Alzheimer's Disease in Mice.

Effects of glyphosate-based herbicides and glyphosate exposure on sex hormones and the reproductive system: From epidemiological evidence to mechanistic insights.

2,4-dichlorophenoxyacetic acid (2,4-D) exposure during postnatal development alters the effects of western diet on mouse prostate.

Chronic dietary exposure to a glyphosate-based herbicide in broiler hens has long-term impacts on the progeny metabolism.

Toxicological effects of ocular acrolein exposure to eyelids in rabbits in vivo.

Acyl-CoA dehydrogenase substrate promiscuity: Challenges and opportunities for development of substrate reduction therapy in disorders of valine and isoleucine metabolism.

Herbicide atrazine impairs metabolic plasticity of mixotrophic organisms: Evidence in photochemistry, morphology, and gene expression.

[Study on the occupational exposure limit of glyphosate in the air of workplace].

Response to oxidative stress of AML12 hepatocyte cells with knockout of methionine sulfoxide reductases.

Assessment of the impact of glyphosate and 2,4-D herbicides on the kidney injury and transcriptome changes in obese mice fed a Western diet.

Subacute exposure to Roundup® changes steroidogenesis and gene expression of the glutathione-glutaredoxin system in rat ovaries: Implications for ovarian toxicity of this glyphosate-based herbicide.

The diabetogenic effects of pesticides: Evidence based on epidemiological and toxicological studies.

A single exposure to sub-lethal concentrations of a glyphosate-based herbicide or fluoxetine-based agent on growth performance in Nile tilapia.

Synergistic toxicity of 2,4-dichlorophenoxyacetic acid and arsenic alters biomarkers in rats.

Development of a microplate-based novel toxicity bioassay using Chlorophyta and Phaeophyceae macroalgae.

Dimethylarsinic acid induces bladder carcinogenesis via the amphiregulin pathway.

Transcriptomic analysis of maize uncovers putative genes involved in metabolic detoxification under four safeners treatment.

Integrated metabolomics and transcriptomics reveal glyphosate based-herbicide induced reproductive toxicity through disturbing energy and nucleotide metabolism in mice testes.

Mitochondrial Complex I Inhibition in Dopaminergic Neurons Causes Altered Protein Profile and Protein Oxidation: Implications for Parkinson's disease.

Acrolein produced during acute kidney injury promotes tubular cell death.

Acute toxicity of three herbicide formulations of *Astyanax altiparanae* (Characiformes, Characidae), an emerging neotropical fish model species.

Variations in the Behaviour, Survival, Haematology, and Biochemistry of *Ctenopharyngodon idella* (Grass Carp) After Exposure to Commercial Grade Atrazine.

Upregulation of mitochondrial calcium uniporter contributes to paraquat-induced neuropathology linked to Parkinson's disease via imbalanced OPA1 processing.

The acute effects of fipronil and 2,4-D, individually and in mixture: a threat to the freshwater Calanoida copepod *Notodiaptomus iheringi*.

The role of acrolein for E-cigarette vapour condensate mediated activation of NADPH oxidase in cultured endothelial cells and macrophages.

Immunotoxicity of relevant mixtures of pesticides and metabolites on THP-1 cells.

Elucidating the effects of acute and chronic exposure to 2,4-Dichlorophenoxyacetic acid on fathead minnow (*Pimephales promelas*) innate immunity.

Selected herbicides screened for toxicity and analysed as inhibitors of both cholinesterases.

Association of PKLR gene copy number, expression levels and enzyme activity with 2,3,7,8-TCDD exposure in individuals exposed to Agent Orange/Dioxin in Vietnam.

Co-exposure of iron oxide nanoparticles with glyphosate herbicides in *Poecilia reticulata*: Fish liver damages is reversible during iron accumulation and elimination period.

Chlorogenic acid protective effects on paraquat-induced pulmonary oxidative damage and fibrosis in rats.

Maternal pre-conceptual glyphosate exposure impacts the offspring hepatic and ovarian proteome.

Comparative toxicity assessment of glyphosate and two commercial formulations in the planarian *Dugesia japonica*.

Embryonic abnormalities and genotoxicity induced by 2,4-dichlorophenoxyacetic acid during indirect somatic embryogenesis in *Coffea*.

Atrazine exposure can dysregulate the immune system and increase the susceptibility against pathogens in honeybees in a dose-dependent manner.

DNA Damage Estimation after Chronic and Combined Exposure to Endocrine Disruptors: An In Vivo Real-Life Risk Simulation Approach.

Cannabidiol Protects Dopaminergic-like Neurons against Paraquat- and Maneb-Induced Cell Death through Safeguarding DJ-1/CYS(106) and Caspase 3 Independently of Cannabinoid Receptors: Relevance in Parkinson's Disease.

Safety profile evaluation of different herbicides used on peach rootstock seedlings.

Intralipid and caffeic acid phenethyl ester reverse the neurotoxic effects of organophosphate poisoning in rats.

[Experimental study on the toxicokinetics and gastrointestinal damage in rats poisoned with acute diquat poisoning at different exposure doses].

Neurotoxic effects of exposure to glyphosate in rat striatum: Effects and mechanisms of action on dopaminergic neurotransmission.

Sex-specific respiratory and systemic endocrine effects of acute acrolein and trichloroethylene inhalation.

Low-dose glyphosate exposure alters gut microbiota composition and modulates gut homeostasis.

The impact of early-life exposure to three agrochemicals on survival, behavior, and gut microbiota of stingless bees (*Partamona helleri*).

Glyphosate induces autophagy in hepatic L8824 cell line through NO-mediated activation of RAS/RAF/MEK/ERK signaling pathway and energy metabolism disorders.

Paraquat-induced neurogenesis abnormalities via Drp1-mediated mitochondrial fission.

Hydrogen sulfide protects Sertoli cells against toxicant Acrolein-induced cell injury.

Evaluation of nano-curcumin against inhaled paraquat-induced lung injury in rats.

Fungal biodegradation of chlorinated herbicides: an overview with an emphasis on 2,4-D in Argentina.

Glyphosate-induced liver and kidney dysfunction, oxidative stress, immunosuppression in Nile tilapia, but ginger showed a protection role.

Highly Diluted Glyphosate Mitigates Its Effects on *Artemia salina*: Physicochemical Implications.

Nitric oxide-mediated the therapeutic properties of induced pluripotent stem cell for paraquat-induced acute lung injury.

Melatonin ameliorates acute lung injury caused by paraquat poisoning by promoting PINK1 and BNIP3 expression.

Prepubertal to adulthood exposure to low doses of glyphosate-based herbicide increases the expression of the Havcr1 (Kim1) biomarker and causes mild kidney alterations.

Looking beyond Cancer: Glyphosate and Liver, Metabolic Diseases in Youth.

Glyphosate-based formulation affects *Tetragonisca angustula* worker's locomotion, behavior and biology.

Toxicity of fipronil and 2,4-D pesticides in *Daphnia similis*: a multiple endpoint approach.

Xylopia aethiopica suppresses markers of oxidative stress, inflammation, and cell death in the brain of Wistar rats exposed to glyphosate.

Therapeutic effect of gossypetin against paraquat-induced testicular damage in male rats: a histological and biochemical study.

Toxicity of antifouling biocides on planktonic and benthic neotropical species.

A mixture of 13 pesticides, contaminants, and food additives below individual NOAELs produces histopathological and organ weight changes in rats.

Pendimethalin exposure disrupts mitochondrial function and impairs processes related to implantation.

Predicting structural features of selected flavonoids responsible for neuroprotection in a *Drosophila* model of Parkinson's disease.

The Parkinson-Associated Toxin Paraquat Shifts Physiological β -Synuclein Tetramers toward Monomers That Can Be Calpain-Truncated and Form Oligomers.

Prolonged exposure to the herbicide atrazine promotes kidney fibrosis by activating Wnt/ β -catenin signaling in rats.

Glyphosate Interference in Follicular Organization in the Wall Lizard *Podarcis siculus*.

The interplay between lncRNA NR_030777 and SF3B3 in neuronal damage caused by paraquat.

Atrazine contaminated sites and bullfrog tadpoles: evasive trends and biochemical consequences.

Realistic scenarios of pesticide exposure alters multiple biomarkers in BOANA PULCHELLA (ANURA) Adult Frogs.

Role of NF- κ B/IL-1 β Pathway and Caspase 3 in Mediating the Hepatoprotective Effect of Rutin against Paraquat-Induced Liver Toxicity in Male Rats.

Sulforaphane suppresses paraquat-induced oxidative damage in bovine *in vitro*-matured oocytes through Nrf2 transduction pathway.

Therapeutic potential of amitriptyline for paraquat-induced pulmonary fibrosis: Involvement of caveolin-1-mediated anti-epithelial-mesenchymal transition and inhibition of apoptosis.

Human 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure and thyroid cancer risk.

An analysis of birth defects and developmental disabilities for children of participants of the Air Force Health Study.

Impact of sub-acute acrolein inhalation on the molecular regulation of mitochondrial metabolism in rat lung.

Lycopene ameliorates atrazine-induced spatial learning and memory impairments by inhibiting ferroptosis in the hippocampus of mice.

A novel mechanism of Dimethyl ester of Alpha-ketoglutarate in suppressing Paraquat-induced BEAS-2B cell injury by alleviating GSDME dependent pyroptosis.

A search for acrolein scavengers among food components.

Complex mixtures of pesticides and metabolites modulate the malignant phenotype of murine melanoma B16-F1 cells.

Effects of the herbicide ametryn on development and thyroidogenesis of bullfrog tadpoles (*Aquarana catesbeiana*) under different temperatures.

Piranhea trifoliata extracts ameliorate muscular decline in *Drosophila melanogaster* exposed to Paraquat.

Using membrane-water partition coefficients in a critical membrane burden approach to aid the identification of neutral and ionizable chemicals that induce acute toxicity below narcosis levels.

Perinatal exposure to high concentration glyphosate-based herbicides induces intestinal apoptosis by activating endoplasmic reticulum stress in offspring.

A Roundup herbicide causes high mortality and impairs development of *Chrysoperla carnea* (Stephens) (Neuroptera: Chrysopidae).

Contrasting effects of fungicide and herbicide active ingredients and their formulations on bumblebee learning and behaviour.

Investigating the effects of glyphosate on the bumblebee proteome and microbiota.

Parasite and Pesticide Impacts on the Bumblebee (*Bombus terrestris*) Haemolymph Proteome.

The Tobacco Smoke Component, Acrolein, as a Major Culprit in Lung Diseases and Respiratory Cancers: Molecular Mechanisms of Acrolein Cytotoxic Activity.

Cyhalofop-butyl exposure induces the severe hepatotoxicity and immunotoxicity in zebrafish embryos.

Toxicity of herbicide glyphosate to planarian *Dugesia japonica* and its potential molecular mechanisms.

Atrazine induces phagocytotic dysfunction of microglia depends on nucleocytoplasmic translocation of acetylated HMGB1.

Maternal exposure to a glyphosate-based herbicide impairs placental development through endoplasmic reticulum stress in mice.

Tripterygium wilfordii Hook.f. ameliorates paraquat-induced lung injury by reducing oxidative stress and ferroptosis via Nrf2/HO-1 pathway.

Toxicity of POEA-containing glyphosate-based herbicides to amphibians is mainly due to the surfactant, not to the active ingredient.

Adult exposure of atrazine alone or in combination with carbohydrate diet hastens the onset/progression of type 2 diabetes in *Drosophila*.

Screening potential toxicity of currently used herbicides in the freshwater amphipod *Gammarus fossarum* based on multi-level biomarker responses to field-realistic exposures.

Phytogenotoxicity of thymol and semisynthetic thymoxyacetic acid in pre/post emergence of model plants and weeds.

Transcriptome analysis reveals the mechanisms of hepatic injury caused by long-term environmental exposure to atrazine in juvenile common carp (*Cyprinus carpio* L.).

Behavioral and neuroinflammatory changes caused by glyphosate: Base herbicide in mice offspring.

Combined toxicity of Cd and 2,4-dichlorophenoxyacetic acid on the earthworm *Eisenia andrei* under biochar amendment.

Glyphosate-triggered hepatocyte ferroptosis via suppressing Nrf2/GSH/GPX4 axis exacerbates hepatotoxicity.

Rapid determination of polyethoxylated tallow amine surfactants in human plasma by LC-MSMS.

Does atrazine induce changes in predator recognition, growth, morphology, and metamorphic traits of larval skipper frogs (*Euphyctis cyanophlyctis*)?

Chitooligosaccharides Derivatives Protect ARPE-19 Cells against Acrolein-Induced Oxidative Injury.

Integrin Mac1 mediates paraquat and maneb-induced learning and memory impairments in mice through NADPH oxidase-NLRP3 inflammasome axis-dependent microglial activation.

Human health risks and hepatotoxicity associated with exposure to atrazine surveyed in drinking water from Ijebu-North, Southwest, Nigeria.

Sorption behaviour and toxicity of an herbicide safener "cyprosulfamide".

Single-cell transcriptome analysis reveals liver injury induced by glyphosate in mice.

Bioinformatics analysis of the potential mechanisms of Alzheimer's disease induced by exposure to combined triazine herbicides.

Dimethyl fumarate attenuates paraquat-induced pulmonary oxidative stress, inflammation and fibrosis in mice.

Alterations in cell viability, reactive oxygen species production, and modulation of gene expression involved in mitogen-activated protein kinase/extracellular regulating kinase signaling pathway by glyphosate and its commercial formulation in hepatocellular carcinoma cells.

Glyphosate based-herbicide disrupts energy metabolism and activates inflammatory response through oxidative stress in mice liver.

Water quality criteria derivation and tiered ecological risk evaluation of antifouling biocides in marine environment.

Multi-and transgenerational synergistic effects of glyphosate and chlorpyrifos at environmentally relevant concentrations in the estuarine rotifer *Proales similis*.

Global warming and glyphosate toxicity (I): Adult zebrafish modelling with behavioural, immunohistochemical and metabolomic approaches.

Mitigating effect of L-carnitine against atrazine-induced hepatotoxicity: histopathological and biochemical analyses in albino rats.

Effect of three commercial algaecides on cyanobacteria and microcystin-LR: implications for drinking water treatment using activated carbon.

Pterostilbene Confers Protection against Diquat-Induced Intestinal Damage with Potential Regulation of Redox Status and Ferroptosis in Broiler Chickens.

[The risk prediction value of paraquat poisoning dose, urine protein and myocardial enzymes].

Responses of *Chironomus sancticarloi* to the simulation of environmental contamination by sugarcane management practices: Water and sediment toxicity.

Field-realistic acute exposure to glyphosate-based herbicide impairs fine-color discrimination in bumblebees.

Is nanoparaquat safer than bulk paraquat? An in vitro and in vivo evaluation.

Exposure to the pesticides linuron, dimethomorph and imazalil alters steroid hormone profiles and gene expression in developing rat ovaries.

Ecotoxicological relevance of glyphosate and flazasulfuron to soil habitat and retention functions - Single vs combined exposures.

Disruption of the Molecular Regulation of Mitochondrial Metabolism in Airway and Lung Epithelial Cells by Cigarette Smoke: Are Aldehydes the Culprit?

Magnolol supplementation alleviates diquat-induced oxidative stress via PI3K-Akt in broiler chickens.

Can herbicides of different mode of action cause injury symptoms in non-herbicide-tolerant young soybean due to simulated drift?

Soybean injury caused by the application of subdoses of 2,4-D or dicamba, in simulated drift.

Physiological and growth responses of cacao to glyphosate exposure.

Effect of zinc supplementation on immunotoxicity induced by subchronic oral exposure to glyphosate-based herbicide (GOBARA[®]) in Wistar rats.

Evaluation of acute toxicity and histology effect on liver of glyphosate and atrazine in the African catfish *Clarias gariepinus* (Burchell 1822).

Herbicide prometryn adversely affects the development and reproduction of *Tigriopus japonicus* by disturbing the ecdysone signal pathway and chitin metabolic pathway.

Ecogenotoxicity of environmentally relevant atrazine concentrations: A threat to aquatic bioindicators.

Maternal exposure to glyphosate-based herbicide causes changes in the vascular function of offspring adult rats.

Paraquat induces different programmed cell death patterns in *Microcystis aeruginosa* and *Chlorella luteoviridis*.

DNA methylation and histone methylation involved in multi-/trans-generational reproductive effects in *Caenorhabditis elegans* induced by Atrazine.

Human serum lipidomics analysis revealed glyphosate may lead to lipid metabolism disorders and health risks.

HIF-1 α promotes paraquat induced acute lung injury and implicates a role NF- κ B and Rac2 activity.

Disturbance of cellular calcium homeostasis plays a pivotal role in glyphosate-based herbicide-induced oxidative stress.

Chronic effects of environmental concentrations of antifoulant diuron on two marine fish: Assessment of hormone levels, immunity, and antioxidant defense system.

Comparison of the effect of glyphosate and glyphosate-based herbicide on hippocampal neurogenesis after developmental exposure in rats.

Toxicity comparison of atrazine on *Eisenia fetida* in artificial soil and three natural soils.

Short and long-term exposure to the pesticides fipronil and 2,4-D: Effects on behavior and life history of *Daphnia magna*.

Cryptotanshinone protects against oxidative stress in the paraquat-induced Parkinson's disease model.

The aquatic macrophyte *Salvinia molesta* mitigates herbicides (glyphosate and aminomethylphosphonic acid) effects to aquatic invertebrates.

Synergistic toxicity of ethanol and 2,4-dichlorophenoxyacetic acid enhances oxidant status, DNA damage, inflammation, and apoptosis in rats.

Systematic literature review of the epidemiology of glyphosate and neurological outcomes.

Suppressor of cytokine signaling 3-derived peptide as a therapeutic for inflammatory and oxidative stress-induced damage to the retina.

A mass event of paraquat poisoning via inhalation.

Structure-based discovery of pyrazole-benzothiadiazole hybrid as human HPPD inhibitors.

[Protective effect of metformin on pulmonary fibrosis caused by paraquat through activating AMP-activated protein kinase pathway].

Exposure to Agent Orange and Hepatocellular Carcinoma Among US Military Personnel.

Integrated untargeted and targeted proteomics to unveil plasma prognostic markers for patients with acute paraquat poisoning: A pilot study.

Subchronic feeding study of glyphosate-tolerant maize GG2 with the gr79-epsps and gat genes in Wistar Han RCC rats.

Effects of glyphosate exposure on gut-liver axis: Metabolomic and mechanistic analysis in grass carp (*Ctenopharyngodon idellus*).

Effect of glyphosate-based herbicide roundup on hemato-biochemistry of *Labeo rohita* (Hamilton, 1822) and susceptibility to *Aeromonas hydrophila* infection.

Metabolomics analyses of cancer tissue from patients with colorectal cancer.

106 Cases of homicide poisoning in China-A retrospective study.

Evaluating the Anti-Melanoma Effects and Toxicity of Cinnamaldehyde Analogues.

Genetic Susceptibility to Neurotoxicity Related to Prenatal Inorganic Arsenic Exposure in Young Spanish Children.

Study on the therapeutic effect of glucocorticoids on acute kidney injury in rats exposed to diquat.

Single-chemical and mixture effects of multiple volatile organic compounds exposure on liver injury and risk of non-alcoholic fatty liver disease in a representative general adult population.

Acrolein produced by glioma cells under hypoxia inhibits neutrophil AKT activity and suppresses anti-tumoral activities.

A review of the characteristic properties of selected tobacco chemicals and their associated etiological risks.

Computational biology and in vitro studies for anticipating cancer-related molecular targets of sweet wormwood (*Artemisia annua*).

Remarkable Recovery in a Patient with Lethal Dose Paraquat Poisoning: A Case Report.

Clinical and pathological characteristics of acute kidney injury caused by diquat poisoning.

Sympathetic and angiotensinergic activity in spontaneously hypertensive rats treated with 3-amino-1,2,4-triazole.

Assessment of pulmonary fibrosis induced by paraquat using Al(18)F-NODA-FAPI-04 PET/CT.

Hydralazine Promotes Central Nervous System Recovery after Spinal Cord Injury by Suppressing Oxidative Stress and Inflammation through Macrophage Regulation.

Impacts of the COVID-19 pandemic on landfilling and recycling in the city of Fargo, North Dakota, USA.

Exposure to environmental concentrations of glyphosate induces cardiotoxicity through cellular senescence and reduced cell proliferation capacity.

Soluble thrombomodulin alleviates Diquat-induced acute kidney injury by inhibiting the HMGB1/IL-1 β /NF- κ B signalling pathway.

Triazine herbicides exposure, natural immunoglobulin M antibodies, and fasting plasma glucose changes: Association and mediation analyses in general Chinese urban adults.

CtBP Neuroprotective Role in Toxin-Based Parkinson's Disease Models: From Expression Pattern to Dopaminergic Survival.

The contribution of initial concussive forces and resulting acrolein surge to β -amyloid accumulation and functional alterations in neuronal networks using a TBI-on-a-chip model.

[Predictive value of serum lactate dehydrogenase on prognosis of patients with paraquat poisoning].

Glyphosate Causes Vascular Toxicity through Cellular Senescence and Lipid Accumulation.

PRKN/parkin-mediated mitophagy is induced by the probiotics *Saccharomyces boulardii* and *Lactococcus lactis*.

Acrolein adducts and responding autoantibodies correlate with metabolic disturbance in Alzheimer's disease.

[Epidemiological characteristics of pesticide poisoning in Chengdu City from 2012 to 2021].

TRPA1 deficiency aggravates dilated cardiomyopathy by promoting S100A8 expression to induce M1 macrophage polarization in rats.

Paraquat, Parkinson's Disease, and Agnotology.

Trehalose prevents glyphosate-induced hepatic steatosis in roosters by activating the Nrf2 pathway and inhibiting NLRP3 inflammasome activation.

Acrolein Exposure Impaired Glucose Homeostasis and Increased Risk of Type 2 Diabetes: An Urban Adult Population-Based Cohort Study with Repeated Measures.

Hypoxia inducible factor-1 α (HIF-1 α) as an early predictor of acute hydrogen cyanamide (Dormex) poisoning.

Glyphosate-induced autophagy inhibition results in hepatic steatosis via mediating epigenetic reprogramming of PPAR α in roosters.

Hydralazine plays an immunomodulation role of pro-regeneration in a mouse model of spinal cord injury.

[A case of delayed peripheral neuropathy caused by diquat poisoning].

Inactivation of microglia dampens blood-brain barrier permeability and loss of dopaminergic neurons in paraquat-lesioned mice.

Paraquat exposure produces sex-dependent reduction in binge-like alcohol drinking in high alcohol-preferring mice.

Sensitization of GSH synthesis by curcumin curtails acrolein-induced alveolar epithelial apoptosis via Keap1 cysteine conjugation: A randomized controlled trial and experimental animal model of pneumonitis.

Diet as a Source of Acrolein: Molecular Basis of Aldehyde Biological Activity in Diabetes and Digestive System Diseases.

Proximity to residential and workplace pesticides application and the risk of progression of Parkinson's diseases in Central California.

Association of Lifetime Exposure to Glyphosate and Aminomethylphosphonic Acid (AMPA) with Liver Inflammation and Metabolic Syndrome at Young Adulthood: Findings from the CHAMACOS Study.

Prenatal exposure to pesticides and domain-specific neurodevelopment at age 12 and 18 months in Nanjing, China.

Inhibition of soluble epoxide hydrolase reduces paraquat neurotoxicity in rodents.

Snake venom nerve growth factor-inspired designing of novel peptide therapeutics for the prevention of paraquat-induced apoptosis, neurodegeneration, and alteration of metabolic pathway genes in the rat pheochromocytoma PC-12 cell.

The trend of ammonia levels in patients with glufosinate ammonium poisoning with respect to neurotoxicity.

[Effect of pirfenidone on paraquat-induced pulmonary fibrosis in rats].

[Effects of Nintedanib associated with Shenfu Injection on paraquat-induced lung injury in rats].

Glyphosate in house dust and risk of childhood acute lymphoblastic leukemia in California.

Sodium arsenite and dimethylarsenic acid induces apoptosis in OC3 oral cavity cancer cells.

Organotin and organochlorine toxicants activate key translational regulatory proteins in human immune cells.

Dietary cinnamaldehyde improves muscle protein content by promoting muscle fiber growth via PTP1B/IGF1/PI3K/AKTs-TOR/FOXO3a signaling pathway in grass carp (*Ctenopharyngodon idella*).

Clinical and pathological characteristics of diquat poisoning-related acute kidney injury.

Urinary Amino Acid-Conjugated Acrolein and Taurine as New Biomarkers for Detection of Dementia.

Follow-up of patients with a 5-year survival after paraquat poisoning using computed tomography images and spirometry.

Dose ingested, vomiting, and outcome in patients ingesting a standard paraquat 20SL formulation.

Arsenic exposure and prevalence of human papillomavirus in the US male population.

A neuroprotective dose of trehalose is harmless to metabolic organs: comprehensive histopathological analysis of liver, pancreas, and kidney.

[A Preliminary Study on the Plasma Metabolomic Profiles of Patients Suffering From Acute Diquat Poisoning].

Sciadopitysin mitigates spermatological and testicular damage instigated by paraquat administration in male albino rats.

Polyamine-Derived Aminoaldehydes and Acrolein: Cytotoxicity, Reactivity and Analysis of the Induced Protein Modifications.

Herbicides may threaten advances in biological control of diseases and pests.

Selenium-dependent glutathione peroxidase 1 regulates transcription of elongase 3 in murine tissues.

Methylothetic methanogens and bacteria synergistically demethylate dimethylarsenate in paddy soil and alleviate rice straighthead disease.

Terminal Residue and Dietary Risk Assessment of Atrazine and Isoxaflutole in Corn Using High-Performance Liquid Chromatography-Tandem Mass Spectrometry.

The herbicide glyphosate inhibits hippocampal long-term potentiation and learning through activation of pro-inflammatory signaling.

[A Meta-analysis of the predictive value of peripheral blood neutrophil to lymphocyte ratio in mortality of patients with acute paraquat poisoning].

Human health risk assessment based on direct and indirect exposure to endocrine disrupting herbicides in drinking, ground, and surface water in Croatia.

Roundup® disrupts tissue architecture, attenuates Na(+)/K(+)-ATPase expression, and induces protein oxidation/nitration, cellular apoptosis, and antioxidant enzyme expressions in the gills of goldfish, *Carassius auratus*.

The effects of glyphosate-based herbicide on the hypothalamic-pituitary thyroid axis are tissue-specific and dependent on age exposure.

Teratogenic effects of the dicamba herbicide in Zebrafish (*Danio rerio*) embryos.

Herbicide exposure during occupational knapsack spraying in French gardeners and municipal workers.

Contaminant occurrence, water quality criteria and tiered ecological risk assessment in water: A case study of antifouling biocides in the Qiantang River and its estuary, Eastern China.

Peroxiredoxin 5 overexpression decreases oxidative stress and dopaminergic cell death mediated by paraquat.

Fitness assessment of *Mytilus galloprovincialis* Lamarck, 1819 after exposure to herbicide metabolite propachlor ESA.

Simultaneous determination and dietary intake risk assessment of 60 herbicide residues in aquatic products.

Novel In Vitro Intestinal Microbiome Model to Study Lipidomic and Metabolomic Adaptations Due to Exposure to Glyphosate, Perfluorooctanoic Acid, and Docusate Sodium.

The significance of APACHE II as a predictor of mortality in paraquat poisoning: A systematic review and meta-analysis.

Farm Machinery Injuries: A Retrospective Analysis of Admissions at a Level I Trauma Center in North Dakota.

Influences of glyphosate residues and different concentrate feed proportions in dairy cow rations during early gestation on performance, blood parameters, functional properties and DNA damage of blood cells in cows and their offspring.

Opinion: "High-Dose Immunosuppression to Prevent Death after Paraquat Self-Poisoning"- Under Estimation of a Significant Effect with Small Mortality Rate Reduction.

Tracking Targets of Dynamic Super-Enhancers in Vitro to Better Characterize Osteoclastogenesis and to Evaluate the Effect of Diuron on the Maturation of Human Bone Cells.

Ovaries of guppies (*Poecilia reticulata*) investigated in pre-embryonic, embryonic and post-embryonic stages after exposure to maghemite nanoparticles ($\gamma\text{-Fe(2)O(3)}$) associated with Roundup® and glyphosate, followed by recovery period evaluation.

Metabolomics profile of plasma in acute diquat-poisoned patients using gas chromatography-mass spectrometry.

Chemical monitoring and risk assessment of 56 pesticides in the Ave River and adjoining Atlantic coastline (Iberian Peninsula, Portugal).

Mutation of Arabidopsis SME1 and Sm core assembly improves oxidative stress resilience.

Occurrence, fate, seasonal variability, and risk assessment of twelve triazine herbicides and eight related derivatives in source, treated, and tap water of Wuhan, Central China.

Melatonin ameliorates glyphosate- and hard water-induced renal tubular epithelial cell senescence via PINK1-Parkin-dependent mitophagy.

Insights into the effects of sublethal doses of pesticides glufosinate-ammonium and sulfoxaflor on honey bee health.

Safety assessment of subchronic feeding of insect-resistant and herbicide-resistant transgenic soybeans to juvenile channel catfish (*Ictalurus punctatus*).

HPLC-MS/MS determination and the postmortem distribution or postmortem redistribution of paraquat and its metabolites in four fatal intoxication cases.

Associations of arsenic exposure with liver injury in US adults: NHANES 2003-2018.

Evaluating pesticide mixture risks in French Mediterranean coastal lagoons waters.

Comprehensive Assessment of Enantioselective Bioactivity, Toxicity, and Dissipation in Soil of the Chiral Herbicide Flurtamone.

Refining acute human exposure assessment to pesticides in surface water: An integrated data-driven modeling approach.

Dose-dependent inhibitory effects of glyphosate on invasive *Pomacea canaliculata* reproductive and developmental growth under oxidative deposition.

Cyhalofop-butyl and pyribenzoxim-induced oxidative stress and transcriptome changes in the muscle of crayfish (*Procambarus clarkii*).

The retinoid metabolism of *Gammarus fossarum* is disrupted by exogenous all-trans retinoic acid, citral, and methoprene but not by the technical formulation of glyphosate.

Urine glyphosate exposure and serum sex hormone disruption within the 2013-2014 National Health and Nutrition Examination survey (NHANES).

Glyphosate metabolism in *Tetrahymena thermophila*: A shotgun proteomic analysis approach.

Field evaluation of spray drift and nontargeted soybean injury from unmanned aerial spraying system herbicide application under acceptable operation conditions.

Impact of Chronic Multi-Generational Exposure to an Environmentally Relevant Atrazine Concentration on Testicular Development and Function in Mice.

Chronic dietary exposure to total arsenic, inorganic arsenic and water-soluble organic arsenic species based on results of the first German total diet study.

Developmental toxicity of prometryn induces mitochondrial dysfunction, oxidative stress, and failure of organogenesis in zebrafish (*Danio rerio*).

Molecular Characteristics of Toxicity of Acrolein Produced from Spermine.

The role of surface activity on the amyloid fibrillation pathway of bovine serum albumin upon interaction with glyphosate.

Pharmacokinetic and Permeation Studies in Rat Brain of Natural Compounds Led to Investigate Eugenol as Direct Activator of Dopamine Release in PC12 Cells.

Reduction of Dimethylarsenate to Highly Toxic Dimethylarsenite in Paddy Soil and Rice Plants.

Ecological risk assessment of glyphosate and its possible effect on bacterial community in surface sediments of a typical shallow Lake, northern China.

Arsenic exposure induces urinary metabolome disruption in Pakistani male population.

Multi-site field trials demonstrate the effectiveness of silicon fertilizer on suppressing dimethylarsenate accumulation and mitigating straighthead disease in rice.

New insights from a plant immune receptor may help design of disease resistant crops.

The effect and mechanism of Fushen Granule on gut microbiome in the prevention and treatment of chronic renal failure.

Chaenomeles sinensis polysaccharide and its carboxymethylated derivative alleviate dextran sulfate sodium-induced ulcerative colitis via suppression of inflammation and oxidative stress.

m(6)A methylation-mediated PGC-1 α contributes to ferroptosis via regulating GSTK1 in arsenic-induced hepatic insulin resistance.

Untargeted serum metabolomics reveals novel metabolite associations and disruptions in amino acid and lipid metabolism in Parkinson's disease.

Inflammation and cardiometabolic diseases induced by persistent organic pollutants and nutritional interventions: Effects of multi-organ interactions.

Arsenic exposure caused male infertility indicated by testis and sperm metabolic dysfunction in SD rats.

Static Magnetic Field Reduces Intracellular ROS Levels and Protects Cells Against Peroxide-Induced Damage: Suggested Roles for Catalase.

Effect of acupuncture at neck-Jiaji (EX-B 2) and tuina on the cognitive function in the patients with subjective cognitive decline.

Terbutylazine exposure induces innate immune response and inflammation through activating cGAS-STING/NF- κ B pathway in myocardium of broiler chicken (Gallus gallus).

Nephroprotective effect of diosmin against sodium arsenite-induced renal toxicity is mediated via attenuation of oxidative stress and inflammation in mice.

Associations between relapse and drinking behaviors in patients with alcohol use disorders: A 6-month prospective study.

Kynurenine attenuates mitochondrial depolarization and neuronal cell death induced by rotenone exposure independently of AhR-mediated parkin induction in SH-SY5Y differentiated cells.

Arsenic induces metabolome remodeling in mature human adipocytes.

Urinary arsenic metabolism, genetic susceptibility, and their interaction on type 2 diabetes.

CDNF overexpression prevents motor-cognitive dysfunction by intrastriatal CPP-based delivery system in a Parkinson's disease animal model.

Apply Anticoagulants after Discharge not Benefit to the Incidence of Symptomatic Thrombus in High-Altitude Areas: A Retrospective Study.

Safety and efficacy of once-daily HU6 versus placebo in people with non-alcoholic fatty liver disease and high BMI: a randomised, double-blind, placebo-controlled, phase 2a trial.

Airway Injury Caused by Aspiration of Iron Sulfate Pills: A Series of 11 Cases.

Metformin alleviates sodium arsenite-induced hepatotoxicity and glucose intolerance in mice by suppressing oxidative stress, inflammation, and apoptosis.

Metformin and Trehalose-Modulated Autophagy Exerts a Neurotherapeutic Effect on Parkinson's Disease.

The sodium borate relieves the hypertrophic damage induced during pregnancy, it improves contractibility, reduces oxidative stress and stimulates cell proliferation.

Characterization of the congenital diaphragmatic hernia model in C57BL/6J fetal mice: a step toward lineage tracing experiments.

Developmental and neurobehavioral toxicity of 2,2'-methylenebis(6-tert-butyl-4-methylphenol) (antioxidant AO2246) during the early life stage of zebrafish.

Shenqi formula delayed Alzheimer's disease-like symptoms by skn-1 pathway in *Caenorhabditis elegans*.

Copper-Loaded Nanoheterojunction Enables Superb Orthotopic Osteosarcoma Therapy via Oxidative Stress and Cell Cuproptosis.

Anti-inflammatory effects of antenatal administration of stem cell derived extracellular vesicles in the brain of rat fetuses with congenital diaphragmatic hernia.

Remote effects of kidney drug transporter OAT1 on gut microbiome composition and urate homeostasis.

Characterization of Oyster Protein Hydrolysate-Iron Complexes and their In Vivo Protective Effects against Iron Deficiency-Induced Symptoms in Mice.

Occupational exposure to pesticides and endometrial cancer in the Screenwide case-control study.

Xenobiotic Exposure and Migraine-Associated Signaling: A Multimethod Experimental Study Exploring Cellular Assays in Combination with Ex Vivo and In Vivo Mouse Models.

Agricultural exposures and risk of childhood neuroblastoma: a systematic review and meta-analysis.

High-Soluble-Fiber Diet Attenuates Hypoxia-Induced Vascular Remodeling and the Development of Hypoxic Pulmonary Hypertension.

Dysregulated meta-organismal metabolism of aromatic amino acids in alcohol-associated liver disease.

Phloretin as an add-on therapy to losartan attenuates diabetes-induced AKI in rats: A potential therapeutic approach targeting TLR4-induced inflammation.

Incorporating Uremic Solute-mediated Inhibition of OAT1/3 Improves PBPK Prediction of Tenofovir Renal and Systemic Disposition in Patients with Severe Kidney Disease.

Overactivated Epithelial NF- κ B Disrupts Lung Development in Congenital Diaphragmatic Hernia.

The Use of Multiple Biomarkers to Assess the Health of Anuran Amphibians in the Brazilian Cerrado Savanna: An Ecotoxicological Approach.

Mitochondrial Dysfunction After Repeated Mild Blast Traumatic Brain Injury Is Attenuated by a Mild Mitochondrial Uncoupling Prodrug.

Postictal hypoxia involves reactive oxygen species and is ameliorated by chronic mitochondrial uncoupling.

Knockdown of IL4I1 Improved High Glucose-evoked Insulin Resistance in HepG2 Cells by Alleviating Inflammation and Lipotoxicity Through AHR Activation.

A Novel Quinazoline Derivative Prevents and Treats Arsenic-Induced Liver Injury by Regulating the Expression of RecQ Family Helicase.

Effect of Long-Term Low-Dose Arsenic Exposure on DNA Methylation and Gene Expression in Human Liver Cells.

Haloxyfop-P-methyl induces immunotoxicity and glucose metabolism disorders and affects the Nrf2/ARE pathway mediated antioxidant system in *Chiromantes dehaani*.

Comparing the enantioselective toxicity on cell cycle and apoptosis of DL-glufosinate and L-glufosinate to SH-SY5Y cells.

SLC22A11 Inserts the Uremic Toxins Indoxyl Sulfate and P-Cresol Sulfate into the Plasma Membrane.

Characterizing the impact of simvastatin co-treatment of cell specific TCDD-induced gene expression and systemic toxicity.

Irritant asthma and work: cases from the UK SWORD reporting scheme from 1999 to 2018.

Exposure to bromoxynil octanoate herbicide induces oxidative stress, inflammation, and apoptosis in testicular tissue via modulating NF- κ B pathway.

Gene deletion of long-chain acyl-CoA synthetase 4 attenuates xenobiotic chemical-induced lung injury via the suppression of lipid peroxidation.

Association between maternal use of spray formulations and offspring urological anomalies: The Japan Environment and Children's Study.

Effect of cresol isomers on reproduction and gene expression in *Daphnia magna*.

Female-to-male differential transcription patterns of miRNA-mRNA networks in the livers of dioxin-exposed mice.

p-Cresol Sulfate Is a Sensitive Urinary Marker of Fecal Microbiota Transplantation and Antibiotics Treatments in Human Patients and Mouse Models.

2,4-Dinitrophenol does not exert neuro-regenerative potential in experimental autoimmune neuritis.

Human Preadipocytes Differentiated under Hypoxia following PCB126 Exposure during Proliferation: Effects on Differentiation, Glucose Uptake and Adipokine Profile.

2,3,7,8-tetrachlorodibenzo-p-dioxin induces multigenerational testicular toxicity and biosynthetic disorder of testosterone in BALB/C mice: Transcriptional, histopathological and hormonal determinants.

Assessing farmer's exposure to pesticides and the risk for non-communicable diseases: A biomonitoring study.

Iron Preparations in the Management of Iron Deficiency Anemia in Infants and Children: A Systematic Review and Meta-Analysis.

Sublethal toxicities of 2,4-dinitrophenol as inferred from online self-reports.

Deciphering migraine pain mechanisms through electrophysiological insights of trigeminal ganglion neurons.

[Hyperoxia caused intestinal metabolism disorder in mice].

Antimicrobial effect of oral care gel containing hinokitiol and 4-isopropyl-3-methylphenol against intraoral pathogenic microorganisms.

Persistent organic pollutants promote aggressiveness in prostate cancer.

Iron deficiency in young basketball players: Is a 100 µg/L ferritin cut-off appropriate for iron supplementation?: Results of a randomized placebo-controlled study.

Chronic exposure to inorganic arsenic and fluoride induces redox imbalance, inhibits the transsulfuration pathway, and alters glutamate receptor expression in the brain, resulting in memory impairment in adult male mouse offspring.

Alterations in interleukin-1^β and nuclear factor kappa beta activity (NF-κB) in rat liver due to the co-exposure of Cadmium and Arsenic: Protective role of curcumin.

CKBA suppresses mast cell activation via ERK signaling pathway in murine atopic dermatitis.

Neonatal outcomes from a randomized controlled trial of maternal treatment of iron deficiency anemia with intravenous ferumoxytol vs oral ferrous sulfate.

Intravenous infusions of ferumoxytol compared to oral ferrous sulfate for the treatment of anemia in pregnancy: a randomized controlled trial.

Antibiotics augment the impact of iron deficiency on metabolism in a piglet model.

In vitro phenotypic evidence for the utilization of iron from different sources and siderophores production in the fish pathogen *Tenacibaculum dicentrarchi*.

Intestinal GPDH-1 regulates high glucose diet induced lifespan extension in aged worms.

A phenome-wide association study (PheWAS) to identify the health impacts of 4-cresol sulfate in the Nagahama Study.

Arsenic exposure and lung fibrotic changes-evidence from a longitudinal cohort study and experimental models.

Atlas of gut microbe-derived products from aromatic amino acids and risk of cardiovascular morbidity and mortality.

Uremic Toxins Induce THP-1 Monocyte Endothelial Adhesion and Migration through Specific miRNA Expression.

Increased Production of Pathogenic, Airborne Fungal Spores upon Exposure of a Soil Mycobiota to Chlorinated Aromatic Hydrocarbon Pollutants.

Magnesium lithospermate B ameliorates diabetic nephropathy by suppressing the uremic toxin formation mediated by gut microbiota.

The health risk of acetochlor metabolite CMEPA is associated with lipid accumulation induced liver injury.

Endocrine-disrupting chemicals and autoimmune diseases.

Occupational exposure to pesticides and symptoms of depression in agricultural workers. A systematic review.

High quality diet attenuated the positive association between polychlorinated biphenyls and premature mortality among middle-aged and older adults.

Glycopolymer-based multifunctional antibacterial hydrogel dressings for accelerating cutaneous wound healing.

Arsenic trioxide (ATO) up-regulates cytochrome P450 1A (CYP1A) enzymes in murine hepatoma Hepa-1c1c7 cell line.

Arsenic, polycyclic aromatic hydrocarbons, and metal exposure and risk assessment of stroke.

Hepatoprotective and anti-hyperglycemic effects of ferulic acid in arsenic-exposed mice.

Is exposure to chemical pollutants associated with sleep outcomes? A systematic review.

Correlation of heavy metals' exposure with the prevalence of coronary heart disease among US adults: findings of the US NHANES from 2003 to 2018.

Aryl hydrocarbon receptor (AHR): Towards understanding intestinal microbial ligands including vitamin B12 and folic acid as natural antagonists.

Targeting Colon Cancer Cells with Pyrazino-Imidazolinone Derivatives: Synthesis, Molecular Docking, and in Vitro Evaluation of Anti-Proliferative and Pro-Apoptotic Activities.

Establishment and characterization of Yellow River carp (*Cyprinus carpio haematopterus*) muscle cell line and its application to fish virology and immunology.

Is a Lower Dose of More Bioavailable Iron (18-mg Ferrous Bisglycinate) Noninferior to 60-mg Ferrous Sulfate in Increasing Ferritin Concentrations While Reducing Gut Inflammation and Enteropathogen Detection in Cambodian Women? A Randomized Controlled Noninferiority Trial.

Proteomic Profiling of Hypoplastic Lungs Suggests an Underlying Inflammatory Response in the Pathogenesis of Abnormal Lung Development in Congenital Diaphragmatic Hernia.

Untargeted Multiomics Approach Coupling Lipidomics and Metabolomics Profiling Reveals New Insights in Diabetic Retinopathy.

Hypoxia-induced mitochondrial stress granules.

Altered Gut Microbiota as Potential Biomarkers for Autism Spectrum Disorder in Early Childhood.

TCDD dysregulation of lncRNA expression, liver zonation and intercellular communication across the liver lobule.

Impact of the pentose phosphate pathway on metabolism and pathogenesis of *Staphylococcus aureus*.

Biomolecular phase separation in stress granule assembly and virus infection.

Effects of food-derived oligopeptide iron chelates on liver injury and gut microbiota homeostasis in iron-deficiency anemia female rats: a pilot study.

Resveratrol ameliorates ortho- polychlorinated biphenyls' induced toxicity in ovary cells.

Temporary alteration of neuronal network communication is a protective response to redox imbalance that requires GPI-anchored prion protein.

Torsemide increases arsenic concentrations by inhibition of multidrug resistance protein 4 in arsenic trioxide treated acute promyelocytic leukemia patients.

Exposure to phenols, chlorophenol pesticides, phthalate and PAHs and mortality risk: A prospective study based on 6 rounds of NHANES.

Borax regulates iron chaperone- and autophagy-mediated ferroptosis pathway in glioblastoma cells.

Diosmin exerts hepatoprotective and antihyperglycemic effects against sodium arsenite-induced toxicity through the modulation of oxidative stress and inflammation in mice.

Toxicity effects of disinfection byproduct chloroacetic acid to *Microcystis aeruginosa*: Cytotoxicity and mechanisms.

Durvillaea antarctica: A Seaweed for Enhancing Immune and Cardiometabolic Health and Gut Microbiota Composition Modulation.

Surveillance of pesticide poisoning in an East and a West Malaysian hospital: characteristics of pesticide poisoning and the early impact of a national Paraquat ban.

Fetal and neonatal dioxin exposure causes sex-specific metabolic alterations in mice.

Single-cell transcriptomic profiling of microvascular endothelial cell heterogeneity in congenital diaphragmatic hernia.

Development of a novel PET ligand, [(11)C]GO289 targeting CK2 expressed in the brain.

Histoplasma capsulatum Relies on Tryptophan Biosynthesis To Proliferate within the Macrophage Phagosome.

Transcriptional, hormonal and histological alterations in the ovaries of BALB/c mice exposed to TCDD in connection with multigenerational female infertility.

Possible Effects of Uremic Toxins p-Cresol, Indoxyl Sulfate, p-Cresyl Sulfate on the Development and Progression of Colon Cancer in Patients with Chronic Renal Failure.

Nephroprotective Effects of Selenium Nanoparticles Against Sodium Arsenite-Induced Damages.

Biological Hyperthermia-Inducing Nanoparticles for Specific Remodeling of the Extracellular Matrix Microenvironment Enhance Pro-Apoptotic Therapy in Fibrosis.

Changes in metabolic landscapes shape divergent but distinct mutational signatures and cytotoxic consequences of redox stress.

Concomitant inhibition of TLR-4 and SGLT2 by phloretin and empagliflozin prevents diabetes-associated ischemic acute kidney injury.

Poisonous Plants of the Genus Pimelea: A Menace for the Australian Livestock Industry.

Synthesis of Antiepileptic Drug (R)-Lacosamide and Chronic Pain Reliever (S)-Lacosamide from Chiral Glycine Enolate Equivalent.

Clinical features of COVID-19 rapid antigen test exposures reported by an Australian poisons information centre: a prospective study.

Disruption of the mouse liver epitranscriptome by long-term aroclor 1260 exposure.

Maternal polychlorinated biphenyl 126 (PCB 126) exposure modulates offspring gut microbiota irrespective of diet and exercise.

An active new formulation of iron carried by aspartyl casein for iron-deficiency anemia: results of the ACCESS trial.

Ferrous sulfate reverses cerebral metabolic abnormality induced by minimal hepatic encephalopathy.

Carvacrol reduces abnormal and dead sperm counts by attenuating sodium arsenite-induced oxidative stress, inflammation, apoptosis, and autophagy in the testicular tissues of rats.

Environmentally Mediated Health Disparities.

Impaired pancreatic beta-cell function after a single dose of oral iron: A before-and-after (pre-post) study.

Stress Granules Inhibit Coxsackievirus B3-Mediated Cell Death via Reduction of Mitochondrial Reactive Oxygen Species and Viral Extracellular Release.

[A study on occupational peripheral nerve disorders: a general view].

Corn-Based Fluorescent Light-Up Biosensors with Improved Signal-to-Background Ratio for Label-Free Detection of Long Noncoding RNAs.

Biodegradable Hollow Nanoscavengers Restore Liver Functions to Reverse Insulin Resistance in Type 2 Diabetes.

Experimental models of chemically induced Parkinson's disease in zebrafish at the embryonic larval stage: a systematic review.

A pesticide and iPSC dopaminergic neuron screen identifies and classifies Parkinson-relevant pesticides.

The effect of *Alnus incana* (L.) Moench extracts in ameliorating iron overload-induced hepatotoxicity in male albino rats.

The effects of sucrose and arsenic on muscular insulin signaling pathways differ between the gastrocnemius and quadriceps muscles.

Serum Levels of Indoxyl Sulfate and P-cresol in Type II Diabetic Patients With and Without Nephropathy.

Citicoline ameliorates arsenic-induced hepatotoxicity and diabetes in mice by overexpression of VAMP2, PPAR- β , As3MT, and SIRT3.

Effect of the probiotic strain, *Lactiplantibacillus plantarum* P9, on chronic constipation: A randomized, double-blind, placebo-controlled study.

Modeling historic environmental pollutant exposures and non-Hodgkin lymphoma risk.

Long-term reproductive effects in male rats prenatally exposed to sodium arsenite.

A Tracheal Aspirate-derived Airway Basal Cell Model Reveals a Proinflammatory Epithelial Defect in Congenital Diaphragmatic Hernia.

Polyhalogenated carbazoles induce hepatic metabolic disorders in mice via alteration in gut microbiota.

Steatosis and Metabolic Disorders Associated with Synergistic Activation of the CAR/RXR Heterodimer by Pesticides.

Fetal lung hypoxia and energetic cell failure in the nitrofen-induced congenital diaphragmatic hernia rat model.

Individual, Independent, and Joint Associations of Toxic Metals and Manganese on Hypertensive Disorders of Pregnancy: Results from the MIREC Canadian Pregnancy Cohort.

Thioredoxin A of *Streptococcus suis* Serotype 2 Contributes to Virulence by Inhibiting the Expression of Pentraxin 3 to Promote Survival Within Macrophages.

The vitamin B(12) analog cobinamide ameliorates azide toxicity in cells, *Drosophila melanogaster*, and mice.

α -Lipoic acid eliminates dioxin-induced offspring sexual immaturity by improving abnormalities in folic acid metabolism.

Zingerone reduces sodium arsenite-induced nephrotoxicity by regulating oxidative stress, inflammation, apoptosis and histopathological changes.

Efficacy of ferric carboxymaltose for treatment of iron deficiency anemia diagnosed in the third trimester of pregnancy: A case-control study.

Detection of drug safety signal of drug-induced neutropenia and agranulocytosis in all-aged patients using electronic medical records.

NOX1 is essential for TNF α -induced intestinal epithelial ROS secretion and inhibits M cell signatures.

Reduced Transcriptome Analysis of Zebrafish Embryos Prioritizes Environmental Compounds with Adverse Cardiovascular Activities.

Electrochemical and Optical Sensors for the Detection of Chemical Carcinogens Causing Leukemia.

Intravenous ferric carboxymaltose versus oral ferrous sulfate replacement in elderly patients after acute non-variceal gastrointestinal bleeding (FIERCE): protocol of a multicentre, open-label, randomised controlled trial.

Associations of metal mixtures with metabolic-associated fatty liver disease and non-alcoholic fatty liver disease: NHANES 2003-2018.

A novel non-invasive colorectal cancer diagnostic method: Volatile organic compounds as biomarkers.

Ifosfamide - History, efficacy, toxicity and encephalopathy.

Identification of key genes in hepatocellular carcinoma associated with exposure to TCDD and $\hat{\pm}$ -endosulfan by WGCNA.

Acetaldehyde dehydrogenase 2 activation attenuates sepsis-induced brain injury through NLRP3 inflammasome regulation.

Is it really safe to replace decabromodiphenyl ether (BDE209) with decabromodiphenyl ethane (DBDPE)?: A perspective from hepatotoxicity.

Chronic exposure to metam sodium-based pesticide in mice during adulthood elevated anxiety and depression-like behaviors: Involvement of serotonergic depletion and gut microbiota dysbiosis.

The capsaicinoid nonivamide suppresses the inflammatory response and attenuates the progression of steatosis in a NAFLD-rat model.

Gestational organophosphate ester exposure and preschool attention-deficit/hyperactivity disorder in the Norwegian Mother, Father, and Child cohort study.

A screening test proposal for congenital defects based on maternal serum metabolomics profile.

A Paternal Fish Oil Diet Preconception Reduces Lung Inflammation in a Toxicant-Driven Murine Model of New Bronchopulmonary Dysplasia.

Adverse health effects of emerging contaminants on inflammatory bowel disease.

Assessment of uremic toxins in advanced chronic kidney disease patients on maintenance hemodialysis by LC-ESI-MS/MS.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces liver lipid metabolism disorder via the ROS/AMPK/CD36 signaling pathway.

Role of Astrocytes in Parkinson's Disease Associated with Genetic Mutations and Neurotoxicants.

Vitamin E protective effects on genomic and cellular damage caused by paediatric preventive supplementation for anaemia: an experimental model.

Acute Pesticide Poisoning in Tobacco Farming, According to Different Criteria.

Evolutionary emergence and divergence of an Ig regulatory node: An environmental sensor getting cues from the aryl hydrocarbon receptor?

NKG2D Ligand Expression Induced by Oxidative Stress Mitigates Cutaneous Ischemia-Reperfusion Injury.

Alternate day versus daily oral iron for treatment of iron deficiency anemia: a randomized controlled trial.

Rapid and sustainable HPLC method for the determination of uremic toxins in human plasma samples.

Mechanistic insights on the possible protective role of polyphenols extracted from *Tamarix aphylla* aerial parts against sodium arsenite-induced hepatotoxicity in rats.

Arsenic compounds activate MAPK and inhibit Akt pathways to induce apoptosis in MA-10 mouse Leydig tumor cells.

Iron pill-induced gastritis: an unrecognized side effect of iron-deficiency anemia.

A Comprehensive Investigation on Potential Risk Factors for NSCLC/P in a Rural District of Hebei Province, China.

Single-cell transcriptomics shows dose-dependent disruption of hepatic zonation by TCDD in mice.

Metabolomic Analyses to Identify Candidate Biomarkers of Cystinosis.

Supplementation with sesame oil suppresses genotoxicity, hepatotoxicity and enterotoxicity induced by sodium arsenite in rats.

Sample preparation and chromatographic methods for the determination of protein-bound uremic retention solutes in human biological samples: An overview.

Diagnostic biomarker panels of osteoarthritis: UPLC-QToF/MS-based serum metabolic profiling.

Food for thought-The link between *Clostridioides difficile* metabolism and pathogenesis.

Prion Protein Overexpression in Adipose-Derived Mesenchymal Stem Cells (ADMSCs) Effectively Protected Rodent Kidney Against Ischemia-Reperfusion Injury Via Enhancing ATP/Mitochondrial Biogenesis-Role of ADMSC Rejuvenation and Proliferation.

Toward an understanding of the role of the exposome on fragile X phenotypes.

[Clinical case report of acute dinitrophenol poisoning with a fatal outcome of Udmurt Republic].

Effectiveness of curcumin-based antimicrobial photodynamic therapy against *Staphylococcus aureus*.

Improved β_2 -Microglobulin and Phosphorous Removal with Expanded Hemodialysis and Online Hemodiafiltration versus High-Flux Hemodialysis: A Cross-Over Randomized Clinical Trial.

Exposure to bisphenol A or its phenolic analogs during early life induces different types of anxiety-like behaviors after maturity in male mice.

Association of the gut microbiome with kidney function and damage in the Hispanic Community Health Study/Study of Latinos (HCHS/SOL).

Paternal occupational exposures and infant congenital heart defects in the Japan Environment and Children's Study.

DPP4 Inhibitor Sitagliptin Reduces Inflammatory Responses and Mast Cell Activation in Allergic Rhinitis.

The Aryl Hydrocarbon Receptor Ligand 6-Formylindolo(3,2-b)carbazole Promotes Estrogen Receptor Alpha and c-Fos Protein Degradation and Inhibits MCF-7 Cell Proliferation and Migration.

Bile acid metabolism involved into the therapeutic action of Xiaojianzhong Tang via gut microbiota to treat chronic atrophic gastritis in rats.

Alpha-lipoic acid inhibits sodium arsenite-mediated autophagic death of rat insulinoma cells.

PD-L1 upregulation promotes drug-induced pulmonary fibrosis by inhibiting vimentin degradation.

Upregulated TSP1 and CD47 expression in the lung in nitrofen-induced congenital diaphragmatic hernia.

Porcine deltacoronavirus uses heparan sulfate as an attachment receptor.

Endocrine disruptors and endometriosis.

The environmental pollutant, polychlorinated biphenyl 126, alters liver function in a rodent model of alcohol-associated liver disease.

In vitro and in vivo assessments of the genotoxic potential of 3-chloroallyl alcohol.

Early functional analysis on the pulmonary hemodynamic effects of Transamniotic Stem Cell Therapy (TRASCET) in the nitrofen model of congenital diaphragmatic hernia.

Multi-omics reveals diet-induced metabolic disorders and liver inflammation via microbiota-gut-liver axis.

Temporal decline of sperm concentration: role of endocrine disruptors.

Betaine protects against sodium arsenite-induced diabetes and hepatotoxicity in mice.

The Mechanisms Underlying the Pharmacological Effects of GuiPi Decoction on Major Depressive Disorder based on Network Pharmacology and Molecular Docking.

Systematic Review: Association of Pesticide Exposure and Child Wheeze and Asthma.

Elucidations of Molecular Mechanism and Mechanistic Effects of Environmental Toxicants in Neurological Disorders.

Iron supplementation given to nonanemic infants: neurocognitive functioning at 16 years.

Comparing Sequential Organ Failure Assessment Score, Acute Physiology and Chronic Health Evaluation II, Modified Acute Physiology and Chronic Health Evaluation II, Simplified Acute Physiology Score II and Poisoning Severity Score for Outcome Prediction of Pesticide Poisoned Patients Admitted to the Intensive Care Unit.

Effect of glyphosate, its metabolite AMPA, and the glyphosate formulation Roundup(®) on brown trout (*Salmo trutta f. fario*) gut microbiome diversity.

Exosomes released by environmental pollutant-stimulated Keratinocytes/PBMCs can trigger psoriatic inflammation in recipient cells via the AhR signaling pathway.

Gold@mesoporous polydopamine nanoparticles modified self-healing hydrogel for sport-injuring therapy.

Nano-Agrochemicals as Substitutes for Pesticides: Prospects and Risks.

Club Cells-A Guardian against Occupational Hazards.

Metabolic Communication by SGLT2 Inhibition.

Corrigendum: Development of skin diseases following systemic exposure: example of dioxins.

Effect of Arabinogalactans on Induction of White-Opaque Somatic Embryos of Avocado (*Persea americana* Mill.) cv. Duke-7.

Association between 2,4-dichlorophenoxyacetic acid and cognitive impairment in older adults: a cross-sectional study from NHANES 2001-2002 and 2011-2014.

Cytotoxicity of 19 Pesticides in Rainbow Trout Gill, Liver, and Intestinal Cell Lines.

Lipid peroxidation: Reactive carbonyl species, protein/DNA adducts, and signaling switches in oxidative stress and cancer.

loxynil and diethylstilbestrol impair cardiac performance and shell growth in the mussel *Mytilus coruscus*.

Acute Toxicity Assays with Adult Coral Fragments: A Method for Standardization.

Ginkgo Biloba Extract Can Antagonize Subchronic Arsenite Exposure-Induced Hepatocyte Senescence by Inhibiting Oxidative Damage and Inflammation in Rats.

Buspironone Enhances Cell Survival and Preserves Structural Integrity during Oxidative Injury to the Retinal Pigment Epithelium.

Endoscopic Diagnosis of Hookworm Disease in a Patient with Severe Iron Deficiency Anemia: A Case Report.

Dysregulation of immunity by cigarette smoking promotes inflammation and cancer: A review.

An insight into the critical role of gut microbiota in triggering the phthalate-induced toxicity and its mitigation using probiotics.

Toxicological evaluation of TBBPA by common carp (*Cyprinus carpio*) about the in vivo/vitro disturbance of the AHR pathway.

Differential Effects of Paraquat, Rotenone, and MPTP on Cellular Bioenergetics of Undifferentiated and Differentiated Human Neuroblastoma Cells.

Plasma metabolites of aromatic amino acids associate with clinical severity and gut microbiota of Parkinson's disease.

Arsenic-Induced Thyroid Hormonal Alterations and Their Putative Influence on Ovarian Follicles in Balb/c Mice.

Delta Storage Pool Deficiency: A Pediatric Case Report and Review of the Literature.

Insight into the emerging and common experimental in-vivo models of Alzheimer's disease.

Sub-lethal but potentially devastating - The novel insecticide flupyradifurone impairs collective brood care in bumblebees.

Clinical characteristics of survivors versus non-survivors after acute diquat poisoning: a comparative study.

Analysis of gasoline-related pollutant exposures and risks in California between 1996 and 2014.

Management of Acute Ferrous Sulfate Poisoning Using Activated Charcoal Monotherapy: A Case Report.

Population fraction of Parkinson's disease attributable to preventable risk factors.

The Role of BNIP3 and Blocked Autophagy Flux in Arsenic-Induced Oxidative Stress-Induced Liver Injury in Rats.

Hormonal Status of Transgenic Birch with a Pine Glutamine Synthetase Gene during Rooting In Vitro and Budburst Outdoors.

Indoor metabolites and chemicals outperform microbiome in classifying childhood asthma and allergic rhinitis.

MiR-96-5p Suppresses Progression of Arsenite-Induced Human Keratinocyte Proliferation and Malignant Transformation by Targeting Denticleless E3 Ubiquitin Protein Ligase Homolog.

Acute oral poisoning due to pretilachlor herbicide - a rare case report from Nepal.

Effects of terbuthylazine on myocardial oxidative stress and ferroptosis via Nrf2/HO-1 signaling pathway in broilers.

Plant-derived squalene supplementation improves growth performance and alleviates acute oxidative stress-induced growth retardation and intestinal damage in piglets.

Effects of glyphosate herbicide ingestion on kidney function in rats on a balanced diet.

Paraquat ingestion in an adult with cystic fibrosis (CF): Diagnostic and management dilemmas.

Hemoadsorption and continuous venovenous hemodiafiltration in the management of paraquat poisoning during pregnancy: A case report.

Age-dependent changes in the gut microbiota and serum metabolome correlate with renal function and human aging.

Thiosulfate sulfurtransferase deficiency promotes oxidative distress and aberrant NRF2 function in the brain.

Ultrasonic neural regulation over two-dimensional graphene analog biomaterials: Enhanced PC12 cell differentiation under diverse ultrasound excitation.

How single-cell transcriptomics provides insight on hepatic responses to TCDD.

Paraquat induced acute kidney and lung injury with a dramatic response to methylprednisolone: A case report.

Carnosine synthase deficiency aggravates neuroinflammation in multiple sclerosis.

Sodium arsenite exposure enhances H3K14 acetylation and impairs male spermatogenesis in rat testes.

Development of a simplified human embryonic stem cell-based retinal pre-organoid model for toxicity evaluations of common pollutants.

The worm Adult Activity Test (wAAT): A de novo mathematical model for detecting acute chemical effects in *Caenorhabditis elegans*.

Developmental synapse pathology triggered by maternal exposure to the herbicide glufosinate ammonium.

Evaluation of arsenic metabolism and tight junction injury after exposure to arsenite and monomethylarsonous acid using a rat in vitro blood-Brain barrier model.

Differential transcriptomic alterations in nasal versus lung tissue of acrolein-exposed rats.

Metabolic Pathways for Removing Reactive Aldehydes are Diminished in Atrophic Muscle During Heart Failure.

Transcriptome-wide profiling of acute stress induced changes in ribosome occupancy level using external standards.

An overview of ATP synthase, inhibitors, and their toxicity.

Analysis of mitochondrial DNA copy number variation in Brazilian farmers occupationally exposed to pesticides.

The response of nitrifying activated sludge to chlorophenols: Insights from metabolism and redox homeostasis.

Exposure to the aryl hydrocarbon receptor agonist dioxin disrupts formation of the muscle, nerves, and vasculature in the developing jaw.

Caffeic acid recarbonization: A green chemistry, sustainable carbon nano material platform to intervene in neurodegeneration induced by emerging contaminants.

Association between glyphosate exposure and cognitive function, depression, and neurological diseases in a representative sample of US adults: NHANES 2013-2014 analysis.

Suppressed Histone H3 Lysine 18 Acetylation Is Involved in Arsenic-Induced Liver Fibrosis in Rats by Triggering the Dedifferentiation of Liver Sinusoidal Endothelial Cells.

Microbe-derived uremic solutes enhance thrombosis potential in the host.

Glyphosate impairs aversive learning in bumblebees.

Discussion to AATS 2023: Exposure to Agent Orange is associated with increased recurrence after surgical treatment of stage I non-small cell lung cancer.

The Effects of Dietary Silybin Supplementation on the Growth Performance and Regulation of Intestinal Oxidative Injury and Microflora Dysbiosis in Weaned Piglets.

Neurotoxicity Assessment in Adult *Danio rerio* using a Battery of Behavioral Tests in a Single Tank.

Effect of Hydralazine on Angiotensin II-Induced Abdominal Aortic Aneurysm in Apolipoprotein E-Deficient Mice.

Epidemiology and etiology of diffuse large B-cell lymphoma.

Mild Oxidative Stress Induced by Sodium Arsenite Reduces Lipocalin-2 Expression Levels in Cortical Glial Cells.

Bifenox compromises porcine trophectoderm and luminal epithelial cells in early pregnancy by arresting cell cycle progression and impairing mitochondrial and calcium homeostasis.

Bifenox induces programmed cell death in bovine mammary epithelial cells by impairing calcium homeostasis, triggering ER stress, and altering the signaling cascades of PI3K/AKT and MAPK.

3-Methylglutaryl-carnitine: A biomarker of mitochondrial dysfunction.

Alcohol degradation, learning, and memory-enhancing effect of *Acetobacter pasteurianus* BP2201 in *Caenorhabditis elegans* model.

Hepatic cholesterol biosynthesis and dioxin-induced dysregulation: A multiscale computational approach.

Biomechanical performance of talon cannulated compression device in pauwels type III fractures: a comparative study.

The neuroprotective effect of quercetin nanoparticles in the therapy of neuronal damage stimulated by acrolein.

Urinary acrolein protein conjugates-to-creatinine ratio is positively associated with diabetic peripheral neuropathy in patients with type 2 diabetes mellitus.

Dimethenamid promotes oxidative stress and apoptosis leading to cardiovascular, hepatic, and pancreatic toxicities in zebrafish embryo.

Nilotinib alleviates paraquat-induced hepatic and pulmonary injury in rats via the Nrf2/Nf-kB axis.

Deeper insights into the effects of low dietary levels of polychlorinated biphenyls on pig metabolism using gas chromatography-high resolution mass spectrometry metabolomics.

Gut Microbiota and Its Role in the Brain-Gut-Kidney Axis in Hypertension.

Acrolein induces mitochondrial dysfunction and insulin resistance in muscle and adipose tissues in vitro and in vivo.

Huangqi Jianzhong Tang treats chronic atrophic gastritis rats by regulating intestinal flora and conjugated bile acid metabolism.

Analysis of Human microRNA Expression Profiling During Diquat-Induced Renal Proximal Tubular Epithelial Cell Injury.

Bacterial respiratory inhibition triggers dispersal of *Pseudomonas aeruginosa* biofilms.

A Review on the Role of Phytoconstituents Chrysin on the Protective Effect on Liver and Kidney.

2,4-Dichlorophenoxyacetic Acid Induces Degeneration of mDA Neurons In Vitro.

Predicting mortality in paraquat poisoning through clinical findings, with a focus on pulmonary and cardiovascular system disorders.

Reproducibility, reliability, and regulatory relevance of plant visual injury assessments.

Propyrisulfuron plus cyhalofop butyl as one-shot herbicides provide high weed control efficiency and net economic performance in mechanically transplanted rice.

Changes in Whole Blood Polyamine Levels and Their Background in Age-Related Diseases and Healthy Longevity.

Microbial signatures in amniotic fluid at preterm birth and association with bronchopulmonary dysplasia.

Micropollutants but high risks: Human multiple stressors increase risks of freshwater ecosystems at the megacity-scale.

Exposure to metam sodium-based pesticide impaired cognitive performances in adult mice: Involvement of oxidative damage and glial activation.

Transcriptome reveals the toxicity difference of dimethyl disulfide by contact and fumigation on *Meloidogyne incognita* through calcium channel-mediated oxidative phosphorylation.

Regulating mechanism of denitrifier *Comamonas* sp. YSF15 in response to carbon deficiency: Based on carbon/nitrogen functions and bioaggregation.

Fibroblast Growth Factor 21 in Gestational Diabetes Mellitus and Type 2 Diabetes Mellitus.

Investigation of the Persistence, Toxicological Effects, and Ecological Issues of S-Triazine Herbicides and Their Biodegradation Using Emerging Technologies: A Review.

Autoantibodies to beta tubulin in autoimmune liver diseases - relation to pANCA and clinical relevance.

A review of food contaminant 2,3,7,8-tetrachlorodibenzo-p-dioxin and its toxicity associated with metabolic disorders.

The Association of Agent Orange (AO) Exposure with Monoclonal Gammopathy of Undetermined Significance (MGUS) to Multiple Myeloma (MM) Progression: A Population-based Study of Vietnam War Era Veterans.

Atrazine: cytotoxicity, oxidative stress, apoptosis, testicular effects and chemopreventive Interventions.

Total analysis system for the determination of uremic toxins in human plasma based on bead injection solid phase extraction hyphenated to mass spectrometry.

2,4-Dichlorophenol Shows Estrogenic Endocrine Disruptor Activity by Altering Male Rat Sexual Behavior.

Early-Life Exposure to Paraquat Aggravates Sex-Specific and Progressive Abnormal Non-Motor Neurobehavior in Aged Mice.

Protective effect of didymin against 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin-induced reproductive toxicity in male rats.

Memory Reflections of the Microbiota-Gut and Oligodendrocyte Axis.

Untargeted Metabolomic Analyses of Body Fluids to Differentiate TBI DOC and NTBI DOC.

Sexually dimorphic mechanisms of VGLUT-mediated protection from dopaminergic neurodegeneration.

Effect of TCDD exposure in adult female and male mice on the expression of miRNA in the ovaries and testes and associated reproductive functions.

Biological Characterization of Cleome felina L.f. Extracts for Phytochemical, Antimicrobial, and Hepatoprotective Activities in Wister Albino Rats.

Evaluating the potential of Hibiscus sabdariffa beverage to address the prevalence of iron deficiency in sub-Saharan Africa.

Acute paraquat poisoning complicated by acute kidney injury and lung fibrosis: a case report from Nepal.

Parkinson's disease updates: Addressing the pathophysiology, risk factors, genetics, diagnosis, along with the medical and surgical treatment.

Carbonyl cyanide-4-(trifluoromethoxy)phenylhydrazone-induced toxicities in rats: comparative study with other mitochondrial uncouplers (2,4-dinitrophenol, OPC-163493 and tolcapone).

Role of NRF2 and reactive aldehydes in acute cellular rejection in liver transplant recipients.

Microbial dietary protein metabolism regulates GLP-1 mediated intestinal transit.

Evaluation of Lac and NGAL on the Condition and Prognosis of Patients with Diquat Poisoning.

Ferroptosis contributes to cyclophosphamide-induced hemorrhagic cystitis.

Alterations of Bax/Bcl-2 ratio contribute to NaAsO₂ induced thyrotoxicity in human thyroid follicular epithelial cells and SD rats.

Dynamic relationship between the aryl hydrocarbon receptor and long noncoding RNA balances cellular and toxicological responses.

Effects of temperature-humidity index on blood metabolites of German dairy cows and their female calves.

Biliverdin as a disease-modifying agent: An integrated viewpoint.

Ethyl caffeate attenuates Al^{3+} -induced toxicity in *Caenorhabditis elegans* AD models via the insulin/insulin-like growth factor-1 signaling pathway.

Terbutryn causes developmental toxicity in zebrafish (*Danio rerio*) via apoptosis and major organ malformation in the early stages of embryogenesis.

Attenuation of sodium arsenite mediated ovarian DNA damage, follicular atresia, and oxidative injury by combined application of vitamin E and C in post pubertal Wistar rats.

Prenatal Arsenite Exposure Alters Maternal Cardiac Remodeling During Late Pregnancy.

Effect of Intestinal Flora on Hyperuricemia-Induced Chronic Kidney Injury in Type 2 Diabetic Patients and the Therapeutic Mechanism of New Anti-Diabetic Prescription Medications.

Profile of Acute Poisoning among Adult Patients at the Emergency Room of a Tertiary Hospital, South-western Nigeria.

The impact of Parkinson's disease-associated gut microbiota on the transcriptome in *Drosophila*.

Acute diquat poisoning case with multiorgan failure and a literature review: A case report.

Aberrant differentiation of epithelial progenitors is accompanied by a hypoxic microenvironment in the paraquat-injured human lung.

Carcinogenic and non-carcinogenic health risk assessment of organic compounds and heavy metals in electronic cigarettes.

Optimization of Plant Growth Regulators for In Vitro Mass Propagation of a Disease-Free 'Shine Muscat' Grapevine Cultivar.

Fate, detection technologies and toxicity of heterocyclic PAHs in the aquatic and soil environments.

Levels of Urinary Mercapturic Acids of Acrolein, Methacrolein, Crotonaldehyde, and Methyl Vinyl Ketone in Relationship to Chronic Obstructive Pulmonary Disease in Cigarette Smokers of the Subpopulations and Intermediate Outcome Measures in COPD Study (SPIROMICS).

Single and combined effects of polyethylene microplastics and acetochlor on accumulation and intestinal toxicity of zebrafish (*Danio rerio*).

Pesticide residues in honey bee (*Apis mellifera*) pollen collected in two ornamental plant nurseries in Connecticut: Implications for bee health and risk assessment.

Effects of Chronic Roundup Exposure on Medaka Larvae.

Alleviation of banded leaf and sheath blight disease incidence in maize by bacterial volatile organic compounds and molecular docking of targeted inhibitors in *Rhizoctonia solani*.

Prognostic Value of the Average Lung CT Number in Patients with Acute Paraquat Poisoning.

Exposure to Agent Orange is associated with increased recurrence after surgical treatment of stage I non-small cell lung cancer.

Oral iron supplementation ameliorated alterations in iron uptake and utilization in copper-toxic female Wistar rats.

Chronic Interstitial Nephritis in Agricultural Communities: Observational and Mechanistic Evidence Supporting the Role of Nephrotoxic Agrochemicals.

Association between urinary glyphosate levels and serum neurofilament light chain in a representative sample of US adults: NHANES 2013-2014.

Impact of pesticide regulations on mortality from suicide by pesticide in China: an interrupted time series analysis.

Features of fatal pesticide ingestion in South Australia.

The survival and flight capacity of commercial honeybees and endangered stingless bees are impaired by common agrochemicals.

The response of microbial compositions and functions to chronic single and multiple antibiotic exposure by batch experiment.

Exposure to arsenic, polycyclic aromatic hydrocarbons, metals, and association with skin cancers in the US adults.

Acetobacter pasteurianus BP2201 alleviates alcohol-induced hepatic and neuro-toxicity and modulate gut microbiota in mice.

Fluchloralin induces developmental toxicity in heart, liver, and nervous system during early zebrafish embryogenesis.

Uro-protective role of chrysin against cyclophosphamide-induced hemorrhagic cystitis in rats involving the turning-off NF- κ B/P38-MAPK, NO/PARP-1 and STAT-3 signaling cascades.

Increased anti-oxidative action compensates for collagen tissue degeneration in vitiligo dermis.

Metformin Overcomes the Consequences of NKX3.1 Loss to Suppress Prostate Cancer Progression.

Development of skin diseases following systemic exposure: example of dioxins.

Three-Way Cell-Based Screening of Antistress Compounds: Identification, Validation, and Relevance to Old-Age-Related Pathologies.

Case report: Reversible splenic lesion syndrome caused by diquat poisoning.

Predictors of Testicular Cancer Mortality in Brazil: A 20-Year Ecological Study.

The BCKDK inhibitor BT2 is a chemical uncoupler that lowers mitochondrial ROS production and de novo lipogenesis.

Impact of occupational pesticide exposure on the human gut microbiome.

Subchronic Arsenite Exposure Induced Atrophy and Erythropoietin Sensitivity Reduction in Skeletal Muscle Were Relevant to Declined Serum Melatonin Levels in Middle-Aged Rats.

Iron pill aspiration syndrome: A case report and literature review.

Air Pollutant Patterns and Human Health Risk following the East Palestine, Ohio, Train Derailment.

Restoration of energy homeostasis under oxidative stress: Duo synergistic AMPK pathways regulating arginine kinases.

The Arabidopsis Target of Rapamycin kinase regulates ammonium assimilation and glutamine metabolism.

Effects of Prometryn Exposure on Hepatopancreas Oxidative Stress and Intestinal Flora in *Eriocheir sinensis* (Crustacea: Decapoda).

Case report: Occupational poisoning incident from a leak of chloroacetyl chloride in Jinan, Shandong, China.

Acute and chronic effects of sublethal neonicotinoid thiacloprid to Asian honey bee (*Apis cerana cerana*).

Updating "Dataset of transcriptomic changes that occur in human preadipocytes over a 3-day course of exposure to 3,3',4,4',5-Pentachlorobiphenyl (PCB126)" with additional data on exposure to 2,2',5,5'-tetrachlorobiphenyl (PCB52) or its 4-hydroxy metabolite (4-OH-PCB52).

Comparative analysis of toxicity and metabolomic profiling of rac-glufosinate and L-glufosinate in zebrafish.

Bioactive superparamagnetic iron oxide-gold nanoparticles regulated by a dynamic magnetic field induce neuronal Ca(2+) influx and differentiation.

Prevention of DSS-induced colitis in mice with water kefir microbiota via anti-inflammatory and microbiota-balancing activity.

Environmental cadmium exposure alters the internal microbiota and metabolome of Sprague-Dawley rats.

Synthesis, X-ray Structures, and Optical and Magnetic Properties of Cu(II) Octafluoro-octakisperfluoro(isopropyl)phthalocyanine: The Effects of Electron Addition and Fluorine Accretion.

Rapid Detection of Volatile Organic Metabolites in Urine by High-Pressure Photoionization Mass Spectrometry for Breast Cancer Screening: A Pilot Study.

Agent Orange Causes Metabolic Dysfunction and Molecular Pathology Reminiscent of Alzheimer's Disease.

Protective Effects of Polyphenol-Rich Extracts against Neurotoxicity Elicited by Paraquat or Rotenone in Cellular Models of Parkinson's Disease.

Microbial metabolite p-cresol inhibits gut hormone expression and regulates small intestinal transit in mice.

Case report: Lung transplantation for treatment of paraquat intoxication: timing of transplantation.

Protective effect of vitamin C against tetrachlorobenzoquinone-induced 5-hydroxymethylation-dependent apoptosis in HepG2 cells mainly via the mitochondrial apoptosis pathway.

Adsorption of glyphosate and metabolite aminomethylphosphonic acid (AMPA) from water by polymer-based spherical activated carbon (PBSAC).

Untargeted Analysis of Serum Metabolomes in Dogs with Exocrine Pancreatic Insufficiency.

Internet-Purchased Sodium Azide Used in a Fatal Suicide Attempt: A Case Report and Review of the Literature.

Cystoisospora suis in Portugal: an observational study of prevalence, management, and risk factors.

Exploring breast tissue microbial composition and the association with breast cancer risk factors.

Anti-osteoporotic drugs affect the pathogenesis of gut microbiota and its metabolites: a clinical study.

Noninvasive Colorimetric Detection of Acetic Acid in Human Breath Based on an Alginate/Ni-Al-LDH/Dye Composite Film.

The regulation of TRPA1 expression and function by Th1 and Th2-type inflammation in human A549 lung epithelial cells.

Pollution and risk assessment of phenolic compounds in drinking water sources from South-Western Nigeria.

Protein adducts with lipid peroxidation products in patients with psoriasis.

E-cigarette effects on vascular function in animals and humans.

Mechanistic investigation of the differential synergistic neurotoxicity between pesticide metam sodium and copper or zinc.

RNA-binding proteins that are highly expressed and enriched in healthy cartilage but suppressed in osteoarthritis.

Aquatic photolysis of high-risk chemicals of emerging concern from secondary effluent mediated by sunlight irradiation for ecological safety and the enhanced methods.

Safety monitoring of oral iron supplements in pregnant women with anemia: a multi-center observational clinical study.

Effects of prometryn on oxidative stress, immune response and apoptosis in the hepatopancreas of *Eriocheir sinensis* (Crustacea: Decapoda).

Biogenic polymer-based patches for congenital cardiac surgery: a feasibility study.

The exposure to volatile organic chemicals associates positively with rheumatoid arthritis: a cross-sectional study from the NHANES program.

Herbicide propisochlor exposure induces intestinal barrier impairment, microbiota dysbiosis and gut pyroptosis.

Agent Orange exposure and prostate cancer risk in the Million Veteran Program.

Herbicides in Water Sources: Communicating Potential Risks to the Population of Mangaung Metropolitan Municipality, South Africa.

The Effect of Oral Iron Supplementation on Gut Microbial Composition: a Secondary Analysis of a Double-Blind, Randomized Controlled Trial among Cambodian Women of Reproductive Age.

Long-term exposure to arsenic in drinking water leads to myocardial damage by oxidative stress and reduction in NO.

Human amnion-derived mesenchymal stem cells attenuate acute lung injury in two different acute lung injury mice models.

Combining crop-exposure matrices and land use data to estimate indices of environmental and occupational exposure to pesticides.

Altered fecal microbiome and metabolome profiles in rat models of short bowel syndrome.

The herbicides glyphosate and glufosinate and the cyanotoxin \hat{I}^2 -N-methylamino-l-alanine induce long-term motor disorders following postnatal exposure: the importance of prior asymptomatic maternal inflammatory sensitization.

Homeostatic Effect of Glyphosate on the Morphology, Physiology and Metabolism of Coffee Plants.

Sucrosomial(\hat{A} [®]) Iron: An Updated Review of Its Clinical Efficacy for the Treatment of Iron Deficiency.

Diagnostic Dilemma in Fatal Paraquat Poisoning: An Autopsy Case Report.

Dissecting the effects of paraquat-induced pulmonary injury in rats using UPLC-Q-TOF-MS/MS-based metabolomics.

Caustic injury resulting from borax powder ingestion.

Bensulide exposure causes cell division cycle arrest and apoptosis in porcine trophectoderm and uterine luminal epithelial cells.

The antifungal effect induced by itraconazole in *Candida parapsilosis* largely depends on the oxidative stress generated at the mitochondria.

Exposure to the persistent organic pollutant 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD, dioxin) disrupts development of the zebrafish inner ear.

Associations between biomarkers of nicotine/tobacco exposure and respiratory symptoms among adults who exclusively smoke cigarettes in the U.S.: Findings from the PATH Study Waves 1-4 (2013-2017).

Pesticide residues in nectar and pollen of melon crops: Risk to pollinators and effects of a specific pesticide mixture on *Bombus terrestris* (Hymenoptera: Apidae) micro-colonies.

Ecotoxicological risk assessment of 14 pesticides and corresponding metabolites to groundwater and soil organisms using China-PEARL model and RQ approach.

Minocycline as a Neuroprotective Agent in Arsenic-Induced Neurotoxicity in PC12 Cells.

Rarely Encountered Gram-Negative Rods and Lung Transplant Recipients: A Narrative Review.

GC-MS based untargeted metabolomics reveals the metabolic response of earthworm (*Eudrilus eugeniae*) after chronic combinatorial exposure to three different pesticides.

Population fraction of Parkinson's disease attributable to preventable risk factors.

Mobitz type I as manifestation of acute lithium cardiotoxicity.

Development of Biocellulose Sheet Incorporating Aloe vera Gel Extract for Diabetic Wound Healing.

Sublethal exposure to agrochemicals impairs zooplankton ability to face future global change challenges.

Chemical Survey and Risk Assessment of 56 Pesticides in the Sado River Estuary (Iberian Peninsula, Portugal).

Arsenite-induced cytotoxicity is regulated by poly-ADP ribose polymerase 1 activation and parthanatos in p53-deficient H1299 cells: The roles of autophagy and p53.

Pentachlorophenol-induced hemotoxicity diminishes antioxidant potential and oxidizes proteins, thiols, and lipids in rat blood: An in vivo study.

Modulating AHR function offers exciting therapeutic potential in gut immunity and inflammation.

Effects of perinatal stress on the metabolites and lipids in plasma of dairy goats.

Effects of intranasal dantrolene nanoparticles on brain concentration and behavior in PS19 tau transgenic mice.

In utero arsenic exposure and early childhood motor development in the New Hampshire Birth Cohort Study.

(\pm)-3-Deoxyradicinin Induces Stomata Opening and Chloroplast Oxidative Stress in Tomato (*Solanum lycopersicum* L.).

The herbicide glyphosate inhibits hippocampal long-term potentiation and learning through activation of pro-inflammatory signaling.

Effect of butachlor on *Microcystis aeruginosa*: Cellular and molecular mechanisms of toxicity.

Inhibition of the Beta-oxidation Pathway of Fatty Acids and Dopamine- Beta-hydroxylase by Phenyl Derivatives of Short- Chain Fatty Acids from Gastrointestinal Clostridia Bacteria is a (the) Major Cause of Autism.

An autopsy report with a diagnostic clinical profile on fatal overdose of life-saving iron supplement.

Clinical characteristics of acute kidney injury in patients with glyphosate surfactant herbicide poisoning.

Metabolomics Differences of the Donor Livers Between In Situ and Ex Situ Conditions During Ischemia-free Liver Transplantation.

Exposure to oxyfluorfen-induced hematobiochemical alterations, oxidative stress, genotoxicity, and disruption of sex hormones in male African catfish and the potential to confront by *Chlorella vulgaris*.

The relationship between experimental 2,4-Dinitrophenol administration and neurological oxidative stress: in terms of dose, time and gender differences.

4-Chloro-2-Methyl-Phenoxy Acetic Acid-Induced Liver Injury: A Case Report.

Safety Evaluation and Probabilistic Health Risk Assessment of Cow Milk Produced in Northern Italy According to Dioxins and PCBs Contamination Levels.

Urine Metabolomic Signature of People Diagnosed with Balkan Endemic Nephropathy and Other Types of Chronic Kidney Disease Compared with Healthy Subjects in Romania.

Differentiation Disorders of *Chara vulgaris* Spermatids following Treatment with Propyzamide.

Biological effects of sub-lethal doses of glyphosate and AMPA on cardiac myoblasts.

Chemical and genetic carotenoid deficiency delays growth in dark-grown *Euglena gracilis*.

Post-thaw quality of ram sperm frozen with different concentrations of low-density lipoproteins associated with non-enzymatic antioxidants.

Exposure and Risk Assessment to Airborne dl-PCBs and Dioxins in the Population Living in the Neighborhood of a Cement Plant: A Pilot Study in the Valencian Region of Spain.

Enhancing Immune Protection in Hemodialysis Patients: Role of the Polymethyl Methacrylate Membrane.

Retrospective analysis of 217 fatal intoxication autopsy cases from 2009 to 2021: temporal trends in fatal intoxication at Tongji center for medicolegal expertise, Hubei, China.

Picolinafen exposure induces ROS accumulation and calcium depletion, leading to apoptosis in porcine embryonic trophectoderm and uterine luminal epithelial cells during the peri-implantation period.

Two decades of the EU Water Framework Directive: Evidence of success and failure from a lowland arable catchment (River Wensum, UK).

Pretreatment of ellagic acid protects ifosfamide-induced acute nephrotoxicity in rat kidneys: A mitochondrial, histopathological and oxidative stress approaches.

Sodium arsenite-induced changes in the wood of esca-diseased grapevine at cytological and metabolomic levels.

Construction of a clinical nursing pathway for acute paraquat poisoning: Evidence-based research.

Abcisic Acid Inhibits Cortical Microtubules Reorganization and Enhances Ultraviolet-B Tolerance in *Arabidopsis thaliana*.

Effect of 650 nm laser photobiomodulation therapy on the HT-7 (shenmen) acupoint in the *Mus musculus* model of Parkinson's disease.

Cell cycle dysregulation on prenatal and postnatal arsenic exposure in skin of Wistar rat neonates.

Erratum: Plasma Oligomeric Beta Amyloid in Alzheimer's Disease with History of Agent Orange Exposure.

Berberine ameliorates chronic kidney disease through inhibiting the production of gut-derived uremic toxins in the gut microbiota.

The capillary-leakage syndrome caused by glyphosate poisoning: a case report.

Toxicity and ecological risk assessment for two AhR agonistic pesticides mepanipyrim and cyprodinil and their metabolites.

Investigating the bioaccumulation potential of anionic organic compounds using a permanent rainbow trout liver cell line.

Oryzalin impairs maternal-fetal interaction during early pregnancy via ROS-mediated P38 MAPK/AKT and OXPHOS downregulation.

Small molecule agonist of mitochondrial fusion repairs mitochondrial dysfunction.

Pesticides and Parabens Contaminating Aquatic Environment: Acute and Sub-Chronic Toxicity towards Early-Life Stages of Freshwater Fish and Amphibians.

Contaminants of Emerging Concern (CECs) and Male Reproductive Health: Challenging the Future with a Double-Edged Sword.

Prenatal Environmental Stressors and DNA Methylation Levels in Placenta and Peripheral Tissues of Mothers and Neonates Evaluated by Applying Artificial Neural Networks.

Endometriosis: Update of Pathophysiology, (Epi) Genetic and Environmental Involvement.

Sexual dysfunction precedes motor defects, dopaminergic neuronal degeneration, and impaired dopamine metabolism: Insights from Drosophila model of Parkinson's disease.

Serum Level of Protein-Bound Uraemic Toxins in Haemodialysis Patients with Chronic Kidney Disease-Associated Pruritus: Myths and Facts.

Pyruvate kinase M2 modification by a lipid peroxidation byproduct acrolein contributes to kidney fibrosis.

Exposure to the persistent organic pollutant 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD, dioxin) disrupts development of the zebrafish inner ear.

Associations between residential volatile organic compound exposures and liver injury markers: The role of biological sex and race.

Contamination Pattern and Risk Assessment of Polar Compounds in Snow Melt: An Integrative Proxy of Road Runoffs.

Molecular and Biochemical Evidence of the Toxic Effects of Terbutylazine and Malathion in Zebrafish.

A case of severe paraquat poisoning treated by continuous hemodiafiltration without sequelae.

Interpretation of ametryn biodegradation in rice based on joint analyses of transcriptome, metabolome and chemo-characterization.

Research progress on residual characteristics, ecological risk, and abatement of fomesafen in farmland soil.

Rural Land Management and Kidney Health.

A Nomogram for Early Diagnosis of Community-Acquired Pneumonia Based on Bronchoalveolar Lavage Fluid Metabolomics.

SIRT1/PGC-1 β is involved in arsenic-induced male reproductive damage through mitochondrial dysfunction, which is blocked by the antioxidative effect of zinc.

Comparison of the chronic and multigenerational toxicity of racemic glufosinate and l-glufosinate to *Caenorhabditis elegans* at environmental concentrations.

The use of a simple model for the regulatory environmental risk assessment of pesticides in Ethiopia.

Protective effects of *Acetobacter ghanensis* against gliadin toxicity in intestinal epithelial cells with immunoregulatory and gluten-digestive properties.

Chorioallantoic membrane assay revealed the role of TIPARP (2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible poly (ADP-ribose) polymerase) in lung adenocarcinoma-induced angiogenesis.

Microbial Virulence Factors, Antimicrobial Resistance Genes, Metabolites, and Synthetic Chemicals in Cabins of Commercial Aircraft.

Effects of *Pseudomonas plecoglossicida* 2,4-D and Humic Substances on the Growth, Pigment Indices and Concentration of Hormones in Wheat Seedlings Grown under Water Deficit.

Organochlorine pesticides and polycyclic aromatic hydrocarbons in serum of Beijing population: Exposure and health risk assessment.

Effects of the Vitamin D3 on Alleviating the Oxidative Stress Induced by Diquat in Wenchang Chickens.

Multi-Omics Analyses Reveal the Mechanisms of Early Stage Kidney Toxicity by Diquat.

Vineyard Management and Physicochemical Parameters of Soil Affect Native *Trichoderma* Populations, Sources of Biocontrol Agents against *Phaeoacremonium minimum*.

Development toxicity and cytotoxicity of pyroxsulam on embryos and adults of zebrafish (*Danio rerio*).

LC-MS/MS Based Volatile Organic Compound Biomarkers Analysis for Early Detection of Lung Cancer.

Randomized Controlled Trial Comparing Ferrous Sulfate and Iron Sucrose in Iron Deficiency Anemia in Pregnancy.

Pesticide exposure and asthma morbidity in children residing in urban, multi-family housing.

Melatonin Ameliorates Diquat-Induced Testicular Toxicity via Reducing Oxidative Stress, Inhibiting Apoptosis, and Maintaining the Integrity of Blood-Testis Barrier in Mice.

Acute pesticide poisoning in the central part of Iran: A 4-year cross-sectional study.

Could Vitamins Have a Positive Impact on the Treatment of Parkinson's Disease?

Absorption and Transport Mechanism of Red Meat-Derived N-glycolylneuraminic Acid and Its Damage to Intestinal Barrier Function through the NF- κ B Signaling Pathway.

Changes of Gut Microbiome in Adolescent Patients with Chronic Spontaneous Urticaria After Omalizumab Treatment.

Case report: Successful outcome of a young patient with rhabdomyolysis and shock caused by diquat poisoning.

Overview of Adductomics in Toxicology.

Ecological risk assessment of pesticides in sediments of Pampean streams, Argentina.

Melatonin alleviates arsenic (As) toxicity in rice plants via modulating antioxidant defense system and secondary metabolites and reducing oxidative stress.

Mixture Toxicity of Three Unconventional Gas Fracking Chemicals, Barium, O-Cresol, and Sodium Chloride, to the Freshwater Shrimp *Paratya australiensis*.

Do changes in persistent organic pollutants after bariatric surgery cause endocrine disruption?

Biotransformation and oxidative stress responses in fish (*Astyanax aeneus*) inhabiting a Caribbean estuary contaminated with pesticide residues from agricultural runoff.

Transcriptomics provides insights into toxicological effects and molecular mechanisms associated with the exposure of Chinese mitten crab, *Eriocheir sinensis*, to dioxin.

Inorganic arsenic alters the development of dopaminergic neurons but not serotonergic neurons and induces motor neuron development via Sonic hedgehog pathway in zebrafish.

Poisoning Regulation, Research, Health, and the Environment: The Glyphosate-Based Herbicides Case in Canada.

Dual role of Apolipoprotein D as long-term instructive factor and acute signal conditioning microglial secretory and phagocytic responses.

The kidney drug transporter OAT1 regulates gut microbiome-dependent host metabolism.

Neurodevelopmental Effects of Perinatal TCDD Exposure Differ from Those of Other PCDD/Fs in Vietnamese Children Living near the Former US Air Base in Da Nang, Vietnam.

[Preliminary study on the effect of fecal microbiota transplantation on neurobehavior and gut microbiota of offspring rats exposed to arsenic].

Selectively mixed matrix hemodialysis membrane for adequate clearance of p-cresol by the incorporation of imprinted zeolite.

Effects of Pollution on Pregnancy and Infants.

Negligible Toxicokinetic Differences of Glyphosate by Different Vehicles in Rats.

Enhanced Glycolysis Confers Resistance Against Photon but Not Carbon Ion Irradiation in Human Glioma Cell Lines.

Rhamnazin ameliorates 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin-evoked testicular toxicity by restoring biochemical, spermatogenic and histological profile in male albino rats.

Evaluation of the cytotoxicity and genotoxicity of glufosinate-ammonium at technical and commercial grades in HepG2 cells.

Gestational arsenic exposure induces anxiety-like behaviors in F1 female mice by dysregulation of neurological and immunological markers.

The possible cytotoxicity and genotoxicity assessment of indaziflam on HepG2 cells.

Andrographolide alleviates paraquat-induced acute lung injury by activating the Nrf2/HO-1 pathway.

Mutual promotion of mitochondrial fission and oxidative stress contributes to mitochondrial-DNA-mediated inflammation and epithelial-mesenchymal transition in paraquat-induced pulmonary fibrosis.

The Effect of Sub-chronic Linuron Exposure on Thyroid, Liver, and Kidney Function in Male Wistar Rats.

Ameliorating effect of *Mucuna pruriens* seed extract on sodium arsenite-induced testicular toxicity and hepato-renal histopathology in rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces multigenerational alterations in the expression of microRNA in the thymus through epigenetic modifications.

Andrographolide-based potential anti-inflammatory transcription inhibitors against nuclear factor NF-kappa-B p50 subunit (NF- κ B p50): an integrated molecular and quantum mechanical approach.

Occurrence, spatiotemporal dynamics, and ecological risk of fungicides in a reservoir-regulated basin.

Bioactive diterpenoids and sesquiterpenoids with different skeletons from *Salvia digitaloides* Diels.

Assessment of exposure to volatile organic compounds through urinary concentrations of their metabolites in pet dogs and cats from the United States.

Neurotoxic and behavioral deficit in *Drosophila melanogaster* co-exposed to rotenone and iron.

Environmentally relevant uptake, elimination, and metabolic changes following early embryonic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in zebrafish.

Trehalose prevents glyphosate-induced testicular damage in roosters via its antioxidative properties.

Epidemiology and renal injury following 2-methyl-4-chlorophenoxyacetic acid (MCPA) poisoning.

Insulin Signaling Disruption and INF- γ Upregulation Induce A β (1-42) and Hyperphosphorylated-Tau Proteins Synthesis and Cell Death after Paraquat Treatment of Primary Hippocampal Cells.

Glyphosate effects on the female reproductive systems: a systematic review.

Characterization of glyphosate-induced cardiovascular toxicity and apoptosis in zebrafish.

Probiotics ameliorate growth retardation of glyphosate by regulating intestinal microbiota and metabolites in crucian carp (*Carassius auratus*).

Glyphosate disturbs various epigenetic processes in vitro and in vivo - A mini review.

Impact of Glyphosate on the Development of Insulin Resistance in Experimental Diabetic Rats: Role of NF- κ B Signalling Pathways.

Treatment of Gastrointestinal Corrosive Burns Caused by Highly Lethal Glyphosate Solution Poisoning.

[Effects and significance of continuous hemoperfusion on patients with diquat poisoning].

Tannic acid antagonizes atrazine exposure-induced autophagy and DNA damage crosstalk in grass carp hepatocytes via NO/iNOS/NF- κ B signaling pathway to maintain stable immune function.

SRT1720 as an SIRT1 activator for alleviating paraquat-induced models of Parkinson's disease.

Glyphosate-Based Herbicide Causes Cellular Alterations to Gut Epithelium of the Neotropical Stingless Bee *Melipona quadrifasciata quadrifasciata* (Hymenoptera: Meliponini).

Environmental quality and ecotoxicity of sediments from the lower Salado River basin (Santa Fe, Argentina) on amphibian larvae.

Toxic Effects Induced by Diuron and Its Metabolites in *Caenorhabditis elegans*.

Perinatal exposure to glyphosate-based herbicides impairs progeny health and placental angiogenesis by disturbing mitochondrial function.

Atrazine exposure induces necroptosis through the P450/ROS pathway and causes inflammation in the gill of common carp (*Cyprinus carpio*L.).

Protective effect of biogenic selenium nanoparticles against diquat-induced acute toxicity via regulation of gut microbiota and its metabolites.

Comparative assessment of individual and mixture chronic toxicity of glyphosate and glufosinate ammonium on amphibian tadpoles: A multibiomarker approach.

Anxiety-related behavior and associated brain transcriptome and epigenome alterations in adult female zebrafish exposed to atrazine during embryogenesis.

Glyphosate excessive use chronically disrupts the shikimate pathway and can affect photosynthesis and yield in citrus trees.

Exposure to the environmentally toxic pesticide maneb induces Parkinson's disease-like neurotoxicity in mice: A combined proteomic and metabolomic analysis.

Persistent and transgenerational effects of pesticide residues in zebrafish.

Glyphosate differentially affects the allergic immune response across generations in mice.

2,4-Dichlorophenoxyacetic acid (2,4-D) affects DNA integrity and retina structure in zebrafish larvae.

Cannabinoid Analogue WIN 55212-2 Protects Paraquat-Induced Lung Injury and Enhances Macrophage M2 Polarization.

Heavy Metals, Halogenated Hydrocarbons, Phthalates, Glyphosate, Cordycepin, Alcohol, Drugs, and Herbs, Assessed for Liver Injury and Mechanistic Steps.

Pre-Conceptional Exposure to Glyphosate Affects the Maternal Hepatic and Ovarian Proteome.

Effects of Subtoxic Concentrations of Atrazine, Cypermethrin, and Vinclozolin on microRNA-Mediated PI3K/Akt/mTOR Signaling in SH-SY5Y Cells.

YAP1 silencing attenuated lung injury/fibrosis but worsened diaphragmatic function by regulating oxidative stress and inflammation response in mice.

Avoidance responses by *Danio rerio* reveal interactive effects of warming, pesticides and their mixtures.

Smoking-Associated Exposure of Human Primary Bronchial Epithelial Cells to Aldehydes: Impact on Molecular Mechanisms Controlling Mitochondrial Content and Function.

Phlebotomy-induced iron deficiency attenuates the pulmonary toxicity of paraquat in mice.

Acute toxicity of atrazine, alachlor, and chlorpyrifos mixtures to honey bees.

Pendimethalin exposure induces bovine mammary epithelial cell death through excessive ROS production and alterations in the PI3K and MAPK signaling pathways.

Oocyte Development and Quality in Young and Old Mice following Exposure to Atrazine.

Impairment of Endothelial Function by Cigarette Smoke Is Not Caused by a Specific Smoke Constituent, but by Vagal Input From the Airway.

Identification of environmental factors that promote intestinal inflammation.

Transcriptome analysis reveals hepatotoxicity in zebrafish induced by cyhalofop-butyl.

Mechanism of 2,4-Dichlorophenoxyacetic acid-induced damage to rat testis via Fas/FasL pathway and the protective effect of *Lycium barbarum* polysaccharides.

Gut dysfunction may be the source of pathological aggregation of alpha-synuclein in the central nervous system through Paraquat exposure in mice.

Paraquat induces microglial cause early neuronal synaptic deficits through activation of the classical complement cascade response.

Perinatal exposure to a glyphosate pesticide formulation induces offspring liver damage.

Paraquat exposure induces Parkinsonism by altering lipid profile and evoking neuroinflammation in the midbrain.

Atrazine and estradiol effects on development of *Acris blanchardi* (Blanchard's cricket frog) exposed in outdoor enclosures.

Degradation of micropollutants in flow-through UV/chlorine reactors: Kinetics, mechanism, energy requirement and toxicity evaluation.

Combining Polar Organic Chemical Integrative Samplers (POCIS) with Toxicity Testing on Microalgae to Evaluate the Impact of Herbicide Mixtures in Surface Waters.

Effects of glyphosate and glyphosate-based herbicides like Roundup[®] on the mammalian nervous system: A review.

Histopathological, immunohistochemical, and molecular investigation of atrazine toxic effect on some organs of adult male albino rats with a screening of *Acacia nilotica* as a protective trial.

E-cigarettes and their lone constituents induce cardiac arrhythmia and conduction defects in mice.

Pathogenic and Commensal Gut Bacteria Harboring Glycerol/Diol Dehydratase Metabolize Glycerol and Produce DNA-Reactive Acrolein.

Intra-specific variation in sensitivity of *Bombus terrestris* and *Osmia bicornis* to three pesticides.

The exposure in ovo of embryos belonging to Amazonian turtle species *Podocnemis expansa* (Testudines) to commercial glyphosate and fipronil formulations impairs their growth and changes their skeletal development.

Lycopene Ameliorate Atrazine-Induced Oxidative Damage in the B Cell Zone via Targeting the miR-27a-3p/Foxo1 Axis.

Pathophysiological Changes in Rhesus Monkeys with Paraquat-Induced Pulmonary Fibrosis.

Cyclooxygenase-2 activates the free radical-mediated apoptosis of polymorphonuclear leukocytes in the maneb- and paraquat-intoxicated rats.

Diazabicyclo derivatives as safeners protect cotton from injury caused by flumioxazin.

Effects of the herbicide glyphosate on fish from embryos to adults: a review addressing behavior patterns and mechanisms behind them.

Immunosuppressive therapies attenuate paraquat-induced renal dysfunction by suppressing inflammatory responses and lipid peroxidation.

Evidence for the efficacy of the emetic PP796 in paraquat SL20 formulations - a narrative review of published and unpublished evidence.

Bumblebees can be Exposed to the Herbicide Glyphosate when Foraging.

A dose-related positive effect of inhaled simvastatin-loaded PLGA nanoparticles on paraquat-induced pulmonary fibrosis in rats.

Perinatal exposure to glyphosate-based herbicides induced neurodevelopmental behaviors impairments and increased oxidative stress in the prefrontal cortex and hippocampus in offspring.

Glyphosate decreases bovine oocyte quality by inducing oxidative stress and apoptosis.

Molecular signatures associated with diuron exposure on rat urothelial mitochondria.

Molecularly imprinted core-shell Au nanoparticles for 2,4-dichlorophenoxyacetic acid detection in milk using surface-enhanced Raman spectroscopy.

Neurotoxicity of pesticides - A link to neurodegeneration.

Agent Orange Exposure and Risk of Idiopathic Pulmonary Fibrosis among U.S. Veterans.

Chronic dietary exposure to a glyphosate-based herbicide results in total or partial reversibility of plasma oxidative stress, cecal microbiota abundance and short-chain fatty acid composition in broiler hens.

Digestive tract toxicity associated with exposure to 2,4-dichlorophenoxyacetic acid in rats.

What you don't know can still hurt you - underreporting in EU pesticide regulation.

The toxicokinetics of acute paraquat poisoning in specific patients: a case series.

Potential Mechanisms Involved in Chronic Kidney Disease of Unclear Etiology.

Cross-sectional and longitudinal associations of acrolein exposure with pulmonary function alteration: Assessing the potential roles of oxidative DNA damage, inflammation, and pulmonary epithelium injury in a general adult population.

Biochemical and cellular responses of the freshwater mussel, *Hyriopsis bialata*, to the herbicide atrazine.

Potential of paraquat toxicity by inhibition of the antioxidant defenses and protective effect of the natural antioxidant, 4-hydroxyisophthalic acid in *Drosophila melanogaster*.

Mitoquinone mitigates paraquat-induced A549 lung epithelial cell injury by promoting MFN1/MFN2-mediated mitochondrial fusion.

Ginsenoside Rg1 suppresses paraquat-induced epithelial cell senescence by enhancing autophagy in an ATG12-dependent manner.

Pentachlorophenol mediated regulation of DAMPs and inflammation: In vitro study.

Effect of dielectric barrier discharge plasma on persulfate activation for rapid degradation of atrazine: Optimization, mechanism and energy consumption.

Verbascoside inhibits paraquat-induced pulmonary toxicity via modulating oxidative stress, inflammation, apoptosis and DNA damage in A549 cell.

IL-6/STAT3/Foxo1 axis as a target of lycopene ameliorates the atrazine-induced thymic mitophagy and pyroptosis cross-talk.

Roundup and glyphosate's impact on GABA to elicit extended proconvulsant behavior in *Caenorhabditis elegans*.

[Study on the Protective effect and mechanism of Nicotinamide Riboside on lung injury in paraquat intoxicated mice].

Citric Acid-Derived Carbon Quantum Dots Attenuate Paraquat-Induced Neuronal Compromise In Vitro and In Vivo.

Potential Effects on Mental Health Status Associated with Occupational Exposure to Pesticides among Thai Farmers.

New is not always better: Toxicity of novel copper based algacides to *Daphnia magna*.

Melatonin ameliorates renal dysfunction in glyphosate- and hard water-treated mice.

Metabolomics analysis of the potential toxicological mechanisms of diquat dibromide herbicide in adult zebrafish (*Danio rerio*) liver.

Time-resolved proteome and transcriptome of paraquat-induced pulmonary fibrosis.

Effects of glyphosate on cladocera: A synthetic review.

UV activated sodium percarbonate to accelerate degradation of atrazine: Mechanism, intermediates, and evaluation on residual toxicity by metabolomics.

Influence of temperature on growth, development and thyroid metabolism of American bullfrog tadpoles (*Lithobates catesbeianus*) exposed to the herbicide tebuthiuron.

Chronic dietary exposure to a glyphosate-based herbicide results in reversible increase early embryo mortality in chicken.

Effects of atrazine and diuron on life parameters, antioxidant response, and multixenobiotic resistance in non-targeted marine zooplankton.

Effects of environmentally relevant concentrations of atrazine and glyphosate herbicides, isolated and in mixture, on two generation of the freshwater microcrustacean *Daphnia magna*.

Neurotoxicological Profiling of Paraquat in Zebrafish Model.

Glyphosate-based herbicide induces long-lasting impairment in neuronal and glial differentiation.

Curcumin improves the protective effects of quercetin against atrazine-induced testicular injury in adult Wistar rats.

Herbicide Roundup shows toxic effects in nontarget organism *Drosophila*.

Alternation between toxic and proliferative effects of Roundup® on human thyroid cells at different concentrations.

A Case of Severe 2,4-Dichlorophenoxyacetic Acid Poisoning Causing Diagnostic and Treatment Challenges.

The adverse impact of herbicide Roundup Ultra Plus in human spermatozoa plasma membrane is caused by its surfactant.

Glyphosate infiltrates the brain and increases pro-inflammatory cytokine TNF α : implications for neurodegenerative disorders.

Glyphosate-based herbicide exposure: effects on gill microbiota of rainbow trout (*Oncorhynchus mykiss*) and the aquatic bacterial ecosystem.

Effects of Curcumin on Mitochondrial Function, Endoplasmic Reticulum Stress, and Mitochondria-Associated Endoplasmic Reticulum Membranes in the Jejunum of Oxidative Stress Piglets.

Acer pseudoplatanus: A Potential Risk of Poisoning for Several Herbivore Species.

Molecular Physicochemical Properties of Selected Pesticides as Predictive Factors for Oxidative Stress and Apoptosis-Dependent Cell Death in Caco-2 and HepG2 Cells.

Modulation of atrazine-induced chromosomal aberrations and cyclin-dependent kinases by aqueous extract of *Roylea cinerea* (D. Don) Baillon leaves in *Allium cepa*.

Rapid Communication: oxidative stress induced by mixed exposure to glyphosate and silver nanoparticles.

Glyphosate-based herbicide causes spermatogenesis disorder and spermatozoa damage of the Chinese mitten crab (*Eriocheir sinensis*) by affecting testes characteristic enzymes, antioxidant capacities and inducing apoptosis.

Acrolein, an environmental toxicant and its applications to in vivo and in vitro atherosclerosis models: An update.

The Cardiotoxic Effect of Roundup® is not Induced by Glyphosate: A Non-specific Blockade of Human Ca(V)_{1.2} Channels.

Neuro-hepatopathological changes in juvenile *Oreochromis niloticus* exposed to sublethal concentrations of commercial herbicides.

Investigating mitochondria-immune responses in zebrafish, *Danio rerio* (Hamilton, 1822): A case study with the herbicide dinoseb.

The study of human serum metabolome on the health effects of glyphosate and early warning of potential damage.

Impaired initial development and behavior in zebrafish exposed to environmentally relevant concentrations of widely used pesticides.

Derivation of water quality criteria for glyphosate and its formulations to protect aquatic life in China.

Agent Orange and dioxin-induced myeloid leukemia: a weaponized vehicle of leukemogenesis.

Pterocarpus mildbraedii leaf extract ebbs propanil-induced oxidative and apoptotic damage in the liver of rats.

The Association Between 2, 4-Dichlorophenoxyacetic Acid and Erectile Dysfunction.

Co-exposure of Monensin Increased the Risks of Atrazine to Earthworms.

Comparative study of oral versus parenteral crocin in mitigating acrolein-induced lung injury in albino rats.

Risk assessment of glyphosate and malathion pollution and their potential impact on *Oreochromis niloticus*: role of organic selenium supplementation.

Pesticides and farmers' health: an analysis of variables related to management and property.

Community metabolomics provides insights into mechanisms of pollution-induced community tolerance of periphyton.

Isorhapontigenin Modulates SOX9/TOLLIP Expression to Attenuate Cell Apoptosis and Oxidative Stress in Paraquat-Induced Acute Kidney Injury.

Ginkgolide C Alleviates Acute Lung Injury Caused by Paraquat Poisoning via Regulating the Nrf2 and NF- κ B Signaling Pathways.

Glyphosate impairs bee thermoregulation.

Glyphosate impairs collective thermoregulation in bumblebees.

Gelatin-derived carbon quantum dots mitigate herbicide-induced neurotoxic effects in vitro and in vivo.

Glyphosate exposure modulates lipid composition, histo-architecture and oxidative stress status and induces neurotoxicity in the smooth scallop *Flexopecten glaber*.

Subacute dermal toxicity study of bensulfuron-methyl in Sprague-Dawley rats.

Paraquat-induced oxidative stress regulates N6-methyladenosine (m(6)A) modification of long noncoding RNAs in Neuro-2a cells.

A time-course study of microglial activation and dopaminergic neuron loss in the substantia nigra of mice with paraquat-induced Parkinson's disease.

Cellular and Molecular Events Leading to Paraquat-Induced Apoptosis: Mechanistic Insights into Parkinson's Disease Pathophysiology.

An in vitro strategy using multiple human induced pluripotent stem cell-derived models to assess the toxicity of chemicals: A case study on paraquat.

Glyphosate and neurological outcomes: A systematic literature review of animal studies.

Lifelong Exposure to a Low-Dose of the Glyphosate-Based Herbicide RoundUp(®) Causes Intestinal Damage, Gut Dysbiosis, and Behavioral Changes in Mice.

Urinary Levels of Sirtuin-1, γ -Glutathione S-Transferase, and Mitochondrial DNA in Maize Farmer Occupationally Exposed to Herbicide.

Age-related tolerance to paraquat-induced parkinsonism in *Drosophila melanogaster*.

Role of OCT3 and DRP1 in the Transport of Paraquat in Astrocytes: A Mouse Study.

Ameliorative effect of selenium yeast supplementation on the physio-pathological impacts of chronic exposure to glyphosate and or malathion in *Oreochromis niloticus*.

Developmental toxicity of glyphosate on embryo-larval zebrafish (*Danio rerio*).

Paraquat-induced intracellular Zn(2+) dysregulation causes dopaminergic degeneration in the substantia nigra, but not in the striatum.

Endocrine, immune and renal toxicity in male largemouth bass after chronic exposure to glyphosate and Rodeo®.

A review of molecular mechanisms linked to potential renal injury agents in tropical rural farming communities.

Differential effects of two prevalent environmental pollutants on host-pathogen dynamics.

2,4-dichlorophenoxyacetic acid induces ROS activation in NLRP3 inflammatory body-induced autophagy disorder in microglia and the protective effect of Lycium barbarum polysaccharide.

Integrating network pharmacology and in vitro model to investigate hippocampal neurotoxicity induced by atrazine.

3,4-Dihydroxybenzaldehyde attenuates pentachlorophenol-induced cytotoxicity, DNA damage and collapse of mitochondrial membrane potential in isolated human blood cells.

Protective effect of Thymus munbyanus aqueous extract against 2,4-dichlorophenoxyacetic acid-induced nephrotoxicity in Wistar rats.

Vesicle transport related protein Synaptotagmin-1 mediates paraquat transport to antagonize paraquat toxicity.

Clinicohematological, Mutagenic, and Oxidative Stress Induced by Pendimethalin in Freshwater Fish Bighead Carp (*Hypophthalmichthys nobilis*).

Toxic Effects of Glyphosate on the Nervous System: A Systematic Review.

[Dynamic changes of locus coeruleus damage in Parkinson's disease-like mice induced by paraquat].

Tracing brain genotoxic stress in Parkinson's disease with a novel single-cell genetic sensor.

Do commonly used herbicides (atrazine and glyphosate) have the potential to impair the contractions, prostaglandin releasing and conducting of oxytocin signal at the bovine cervix in vitro?

Realistic exposure to fipronil, 2,4-D, vinasse and their mixtures impair larval amphibian physiology.

Paraquat Inhibits Autophagy Via Intensifying the Interaction Between HMGB1 and α -Synuclein.

Acrolein, an endogenous aldehyde induces synaptic dysfunction in vitro and in vivo: Involvement of RhoA/ROCK2 pathway.

Chronic environmentally relevant levels of pesticides disrupt energy reserves, feeding rates, and life-cycle responses in the amphipod *Hyalella meinerti*.

Ameliorative effect of N-acetylcysteine on the testicular tissue of adult male albino rats after glyphosate-based herbicide exposure.

Histopathological, Immunohistochemical, And Molecular Alterations In Brain Tissue And Submandibular Salivary Gland Of Atrazine-Induced Toxicity In Male Rats.

Autonomic behavioral impairment induced by simazine exposure during early life of male mouse is mediated by Lmx1a/Wnt1 pathway.

Mechanisms of acrolein induces toxicity in human umbilical vein endothelial cells: Oxidative stress, DNA damage response, and apoptosis.

First report on the production of phytotoxic metabolites by *Mycoleptodiscus indicus* under optimized conditions of submerged fermentation.

Aqueous *Thunbergia laurifolia* leaf extract alleviates paraquat-induced lung injury in rats by inhibiting oxidative stress and inflammation.

Lycopene ameliorates atrazine-induced pyroptosis in spleen by suppressing the Ox-mtDNA/Nlrp3 inflammasome pathway.

[Preliminary study on time-dependent changes of intestinal tract and brain-gut axis in mice model of Parkinson's disease induced by paraquat].

Human Amnion-Derived MSCs Alleviate Acute Lung Injury and Hinder Pulmonary Fibrosis Caused by Paraquat in Rats.

Toxicity of commercial atrazine in *Rattus norvegicus* organs as a function of concentration: histopathological, ultrastructural and hematological evaluation.

Effects of Phosphonate Herbicides on the Secretions of Plant-Beneficial Compounds by Two Plant Growth-Promoting Soil Bacteria: A Metabolomics Investigation.

Prediction of the human pharmacokinetics of epyrifenacil and its major metabolite, S-3100-CA, by a physiologically based pharmacokinetic modeling using chimeric mice with humanized liver.

Mild chronic exposure to pesticides alters physiological markers of honey bee health without perturbing the core gut microbiota.

Individual and combined multigenerational effects induced by polystyrene nanoplastic and glyphosate in *Daphnia magna* (Strauss, 1820).

Metabolomic and Transcript Analysis Revealed a Sex-Specific Effect of Glyphosate in Zebrafish Liver.

Decarboxylases as hypothetical targets for actions of organophosphates: Molecular modeling for prediction of hidden and unexpected health threats.

Nicosulfuron, a sulfonylurea herbicide, alters embryonic development and oxidative status of hatchlings at environmental concentrations in an amphibian species.

Effects of subchronic exposure to environmentally relevant concentrations of a commercial fluridone formulation on fathead minnows (*Pimephales promelas*).

Integrated metabolomics and transcriptomics analysis reveals new biomarkers and mechanistic insights on atrazine exposures in MCF-7 cells.

Changes in defense capacity to infectious hematopoietic necrosis virus (IHNV) in rainbow trout intergenerationally exposed to glyphosate.

Impact of glyphosate-based herbicide on early embryonic development of the amphibian *Xenopus laevis*.

Apiaceous vegetables protect against acrolein-induced pulmonary injuries through modulating hepatic detoxification and inflammation in C57BL/6 male mice.

Effects of algae and fungicides on the fate of a sulfonylurea herbicide in a water-sediment system.

Phenolic-rich extract of avocado *Persea americana* (var. Colinred) peel blunts paraquat/maneb-induced apoptosis through blocking phosphorylation of LRRK2 kinase in human nerve-like cells.

Low concentrations of glyphosate alone affect the pubertal male rat meiotic step: An in vitro study.

Impacts of early-life paraquat exposure on gut microbiota and body weight in adult mice.

Pathogenic potential and phytotoxic effects of *Coniolaria gamsii* Iran 2506C on Iranian knapweed (*Centaurea depressa*).

Ecotoxicity of herbicide carfentrazone-ethyl towards earthworm *Eisenia fetida* in soil.

Acute exposure to paraquat affects the phenotypic differentiation of substantia nigra microglia in rats.

Dimethylmonothioarsinic acid and dimethyldithioarsinic acid in the environment: Sorption characteristics on 2-line ferrihydrite and acute toxicity to *Daphnia magna*.

The protective effect of fluted pumpkin seeds against atrazine-induced testicular injury.

A Novel Algicidal Bacterium, *Microbulbifer* sp. YX04, Triggered Oxidative Damage and Autophagic Cell Death in *Phaeocystis globosa*, Which Causes Harmful Algal Blooms.

Nontarget Impacts of Herbicides on Spiders in Orchards.

DNA Double-Strand Breaks Induced in Human Cells by 6 Current Pesticides: Intercomparisons and Influence of the ATM Protein.

Environmental relevant herbicide prometryn induces developmental toxicity in the early life stages of marine medaka (*Oryzias melastigma*) and its potential mechanism.

Exploring the molecular mechanisms of the inhibition of acrolein-induced BEAS-2B cytotoxicity by luteolin using network pharmacology and cell biology technology.

5-Aminosalicylic acid attenuates paraquat-induced lung fibroblast activation and pulmonary fibrosis of rats.

Paraquat mediates BV-2 microglia activation by raising intracellular ROS and inhibiting Akt1 phosphorylation.

Paraquat exposure impairs porcine oocyte meiotic maturation.

A Case of a Lethal Diquat Ingestion in a Toddler.

The influence of preconditioning with low dose of LPS on paraquat-induced neurotoxicity, microglia activation and expression of α -synuclein and synphilin-1 in the dopaminergic system.

Benchmark dose and the adverse effects of exposure to pendimethalin at low dose in female rats.

Attenuating effect of *Prosopis cineraria* against paraquat-induced toxicity in prepubertal mice, *Mus musculus*.

The protective role of lycopene against toxic effects induced by the herbicide Harness[®] and its active ingredient acetochlor on the African catfish *Clarias gariepinus* (Burchell, 1822).

Tenascin-C Participates Pulmonary Injury Induced by Paraquat Through Regulating TLR4 and TGF- β^2 Signaling Pathways.

The STING-IRF3 pathway contributes to paraquat-induced acute lung injury.

Prolonged atrazine exposure beginning in utero and adult uterine morphology in mice.

Toxicity mechanism of acrolein on DNA damage and apoptosis in BEAS-2B cells: Insights from cell biology and molecular docking analyses.

[Effects on extravascular lung water of lung protective ventilation strategy applied on piglets with acute respiratory distress syndrome induced by paraquat].

Glyphosate-induced gut microbiota dysbiosis facilitates male reproductive toxicity in rats.

Ellagic acid ameliorates paraquat-induced liver injury associated with improved gut microbial profile.

Resveratrol protected acrolein-induced ferroptosis and insulin secretion dysfunction via ER-stress-related PERK pathway in MIN6 cells.

The effects of low-toxic herbicide Roundup and glyphosate on mitochondria.

MicroRNA-200b-3p as a biomarker for diagnosis and survival prognosis of multiple organ dysfunction syndrome caused by acute paraquat poisoning.

Protective Effects of N-acetylcysteine Niosome Nanoparticles on Paraquat-induced Nephrotoxicity in Male Rats.

Silymarin protects the rats against paraquat-induced acute kidney injury via Nrf2.

Cytotoxic and genotoxic effects induced by associated commercial glyphosate and 2,4-D formulations using the *Allium cepa* bioassay.

Hydrogen sulfide as a potent scavenger of toxicant acrolein.

Analysis of serum levels of organochlorine pesticides and related factors in Parkinson's disease.

The Longitudinal Profile of a Stream Contaminated With 2,4-D and its Effects on Non-Target Species.

Perinatal exposure to the thyroperoxidase inhibitors methimazole and amitrole perturbs thyroid hormone system signaling and alters motor activity in rat offspring.

Evaluation of the efficiency of simvastatin loaded PLGA nanoparticles against acute paraquat-intoxicated rats.

Prenatal exposure to paraquat and nanoscaled TiO₂ aerosols alters the gene expression of the developing brain.

Atrazine uptake, translocation, bioaccumulation and biodegradation in cattail (*Typha latifolia*) as a function of exposure time.

The relationship between pesticide exposure during critical neurodevelopment and autism spectrum disorder: A narrative review.

The potential risks of herbicide butachlor to immunotoxicity via induction of autophagy and apoptosis in the spleen.

Farming, pesticide exposure and respiratory health: a cross-sectional study in Thailand.

Prediction of optical coherence tomography-detected calcified nodules using coronary computed tomography angiography.

[The relevance of electrocardiographic abnormalities and prognosis in patients with paraquat poisoning].

Toxicity of extracellular alpha-synuclein is independent of intracellular alpha-synuclein.

Characterization and Quantification of Acrolein-Induced Modifications in Hemoglobin by Mass Spectrometry—Effect of Cigarette Smoking.

Cinnamaldehyde causes developmental neurotoxicity in zebrafish via the oxidative stress pathway that is rescued by astaxanthin.

An ecological study regarding the association between paraquat exposure and end stage renal disease.

Lung transplantation in a woman with paraquat poisoning that led to pulmonary fibrosis—Widely reported by the media: A case report.

[Glyphosate detection in the duodenal fluid of horses with gastric ulcer syndrome].

A proposed NAM-based tiered phototoxicity testing and human risk assessment framework for agrochemicals.

Paraquat is an agonist of STIM1 and increases intracellular calcium levels.

Case series: Diquat poisoning with acute kidney failure, myocardial damage, and rhabdomyolysis.

Network pharmacology and molecular docking-based prediction of active compounds and mechanisms of action of *Cnidii Fructus* in treating atopic dermatitis.

Lung Cancer in the French West Indies: Role of Sugarcane Work and Other Occupational Exposures.

Metolachlor Poisoning with Lactic Acidosis Improved by Thiamine Administration: A Case Report.

The Therapeutic Roles of Cinnamaldehyde against Cardiovascular Diseases.

Cinnamaldehyde-based poly(thioacetal): A ROS-awakened self-amplifying degradable polymer for enhanced cancer immunotherapy.

Acrolein plays a culprit role in the pathogenesis of diabetic nephropathy in vitro and in vivo.

Acute fungicide self-poisoning - a prospective case series.

Novel anti-arthritic mechanisms of trans-cinnamaldehyde against complete Freund's adjuvant-induced arthritis in mice: involvement of NF- κ B/TNF- α and IL-6/IL-23/IL-17 pathways in the immunoinflammatory responses.

Acute diquat poisoning causes rhabdomyolysis.

Impact of Environmental Risk Factors on Mitochondrial Dysfunction, Neuroinflammation, Protein Misfolding, and Oxidative Stress in the Etiopathogenesis of Parkinson's Disease.

A Comparative Study on the Effect of Acute Pharyngeal Stimulation with TRP Agonists on the Biomechanics and Neurophysiology of Swallow Response in Patients with Oropharyngeal Dysphagia.

A Composition of Phytonutrients for Glycemic and Weight Management.

Plasma treatment effects on destruction and recovery of *Porphyromonas gingivalis* biofilms.

Prediction of mortality and morbidity following paraquat poisoning based on trend of liver and kidney injury.

pH-responsive cinnamaldehyde-TiO₂ nanotube coating: fabrication and functions in a simulated diabetes condition.

Antagonism of Cyanamide-3-O-glucoside and protocatechuic acid on Aflatoxin B₁-induced toxicity in zebrafish larva (*Danio rerio*).

The methyltransferase METTL3-mediated fatty acid metabolism revealed the mechanism of cinnamaldehyde on alleviating steatosis.

Toxic effects of glyphosate on the intestine, liver, brain of carp and on epithelioma papulosum cyprinid cells: Evidence from in vivo and in vitro research.

Pretilachlor Poisoning: A Rare Case of Herbicide Poisoning with Neurotoxicity.

Cinnamaldehyde protects against ligature-induced periodontitis through the inhibition of microbial accumulation and inflammatory responses of host immune cells.

Pesticide use, agricultural outputs, and pesticide poisoning deaths in Japan.

Utilizing novel TBI-on-a-chip device to link physical impacts to neurodegeneration and decipher primary and secondary injury mechanisms.

A triphenylphosphine coordinated cinnamaldehyde-derived copper(I) Fenton-like agent with mitochondrial aggregation damage for chemodynamic therapy.

Protective Effects of Cinnamaldehyde on the Oxidative Stress, Inflammatory Response, and Apoptosis in the Hepatocytes of *Salmonella Gallinarum*-Challenged Young Chicks.

Widespread pesticide contamination of drinking water and impact on cancer risk in Brazil.

LncRNA BIRF Promotes Brain Ischemic Tolerance Induced By Cerebral Ischemic Preconditioning Through Upregulating GLT-1 via Sponging miR-330-5p.

Genomic Analyses Identify Manganese Homeostasis as a Driver of Group B Streptococcal Vaginal Colonization.

Cinnamaldehyde Mitigates Atherosclerosis Induced by High-Fat Diet via Modulation of Hyperlipidemia, Oxidative Stress, and Inflammation.

Evaluation of cinnamaldehyde mucoadhesive patches on minor recurrent aphthous stomatitis: a randomized, double-blind, placebo-controlled clinical trial.

Protective effect of cinnamaldehyde on channel catfish infected by drug-resistant *Aeromonas hydrophila*.

[Imaging features of 10 patients with toxic encephalopathy caused by diquat].

Targeted delivery of acrolein scavenger hydralazine in spinal cord injury using folate-linker-drug conjugation.

Effects of cinnamaldehyde on glucose-6-phosphate dehydrogenase activity, some biochemical and hematological parameters in diabetic rats.

Homicidal paraquat poisoning: Poisoned while drinking.

Acute diquat poisoning resulting in toxic encephalopathy: a report of three cases.

Trans-cinnamaldehyde protects against phenylephrine-induced cardiomyocyte hypertrophy through the CaMKII/ERK pathway.

[A case of acute poisoning caused by oral administration of large dose hexazinone].

Theranostic Copolymers Neutralize Reactive Oxygen Species and Lipid Peroxidation Products for the Combined Treatment of Traumatic Brain Injury.

Wnt-induced secreted proteins-1 play an important role in paraquat-induced pulmonary fibrosis.

The acute paraquat poisoning mortality (APPM) score to predict the risk of death in paraquat-poisoned patients.

Investigation of anti-Parkinson activity of dicyclomine.

Acrolein inhalation acutely affects the regulation of mitochondrial metabolism in rat lung.

[Clinical features of 86 cases of acute diquat poisoning].

Mechanisms of cinnamic aldehyde against myocardial ischemia/hypoxia injury in vivo and in vitro: Involvement of regulating PI3K/AKT signaling pathway.

Successful Treatment of Severe Toxic Hepatitis and Encephalopathy Without Respiratory Failure Caused by Paraquat Intoxication.

Histopathological Findings in a Fatal Case of Paraquat Poisoning.

Major component causing neurological toxicity in acute glufosinate ammonium poisoning: determination of glufosinate, 1-methoxy-2-propanol, and ammonia in serum and cerebrospinal fluid.

Cinnamaldehyde induces autophagy-mediated cell death through ER stress and epigenetic modification in gastric cancer cells.

[A five-year follow-up report on lung imaging and exercise endurance of a patient with paraquat poisoning].

C. elegans as an in vivo model system for the phenotypic drug discovery for treating paraquat poisoning.

MyD88 deficiency ameliorates weight loss caused by intestinal oxidative injury in an autophagy-dependent mechanism.

The phytonutrient cinnamaldehyde limits intestinal inflammation and enteric parasite infection.

Quaternion of paraquat poisoning: icterus, oral ulceration, acute respiratory and renal failure.

Effect of Cinnamaldehyde on *C. albicans* cell wall and (1,3)- β -D-glucans in vivo.

Comparison of Biochemical Parameters between Mouse Model and Human after Paraquat Poisoning.

[Analysis of 1 case of convulsion death caused by large dose of diquat poisoning].

Trans-cinnamaldehyde suppresses microtubule detyrosination and alleviates cardiac hypertrophy.

Asthma attacks: Patients who survived paraquat poisoning.

Acrolein, an endogenous aldehyde induces Alzheimer's disease-like pathologies in mice: A new sporadic AD animal model.

Taurine protects dopaminergic neurons in paraquat-induced Parkinson's disease mouse model through PI3K/Akt signaling pathways.

Combination of TRP channel dietary agonists induces energy expending and glucose utilizing phenotype in HFD-fed mice.

Association of urinary arsenic and sleep disorder in the US population: NHANES 2015-2016.

Lessons for the clinical nephrologist: acute kidney injury by a glyphosate-surfactant herbicide.

Cinnamaldehyde attenuates kidney senescence and injury through PI3K/Akt pathway-mediated autophagy via downregulating miR-155.

Oxidative stress-induced phosphorylation of JIP4 regulates lysosomal positioning in coordination with TRPML1 and ALG2.

Dinitroaniline herbicides: a comprehensive review of toxicity and side effects on animal non-target organisms.

Interactive effects of high temperature and pesticide exposure on oxidative status, apoptosis, and renin expression in kidney of goldfish: Molecular and cellular mechanisms of widespread kidney damage and renin attenuation.

Using Computational Drug-Gene Analysis to Identify Novel Therapeutic Candidates for Retinal Neuroprotection.

Chemical fumigants control apple replant disease: Microbial community structure-mediated inhibition of *Fusarium* and degradation of phenolic acids.

Ellagic acid prevents gut damage via ameliorating microbe-associated intestinal lymphocyte imbalance.

Fluroxypyr-1-methylheptyl ester induced ROS production and mitochondrial apoptosis through the MAPK signaling cascade in porcine trophectoderm and uterine luminal epithelial cells.

A reactive oxygen species-replenishing coordination polymer nanomedicine disrupts redox homeostasis and induces concurrent apoptosis-ferroptosis for combinational cancer therapy.

Peripheral tissular analysis of rapamycin's effect as a neuroprotective agent in vivo.

Aryl hydrocarbon receptor agonist diuron and its metabolites cause reproductive disorders in male marine medaka (*Oryzias melastigma*).

Application of trinity emergency nursing pathway in comprehensive treatment of acute paraquat poisoning.

The shikimate pathway regulates programmed cell death.

The absence of the queuosine tRNA modification leads to pleiotropic phenotypes revealing perturbations of metal and oxidative stress homeostasis in *Escherichia coli* K12.

[Effects of arsenic and its main metabolites on A549 cell apoptosis and the expression of pro-apoptotic genes Bad and Bik].

Sociodemographic and clinical characteristics related to the final condition of patients intoxicated by paraquat in a hospital in southwestern Colombia.

Recovery of virus-free Almond (*Prunus dulcis*) cultivars by somatic embryogenesis from meristem undergone thermotherapy.

Ablation of FUNDC1-dependent mitophagy renders myocardium resistant to paraquat-induced ferroptosis and contractile dysfunction.

Physicochemical Changes in Bone Bioapatite During the Late Postmortem Interval Pre- and Post-Burning.

Cinnamaldehyde-Based Self-Nanoemulsion (CA-SNEDDS) Accelerates Wound Healing and Exerts Antimicrobial, Antioxidant, and Anti-Inflammatory Effects in Rats' Skin Burn Model.

Ethalfuralin impairs implantation by aggravation of mitochondrial viability and function during early pregnancy.

Molecular Mechanisms of Acute Organophosphate Nephrotoxicity.

Dinitramine induces implantation failure by cell cycle arrest and mitochondrial dysfunction in porcine trophectoderm and luminal epithelial cells.

A clinico-epidemiological Study of acute Self-poisoning by different Types of herbicidal Substances used in agricultural Fields: A Study from Patients admitted in a Tertiary Care Hospital in West Bengal.

NRF2 activation by 2-methoxycinnamaldehyde attenuates inflammatory responses in macrophages via enhancing autophagy flux.

Pesticide pollutants in the environment - A critical review on remediation techniques, mechanism and toxicological impact.

Acute toxicity, bioaccumulation and elimination of prometryn in tilapia (*Oreochromis niloticus*).

Cinnamaldehyde prevents intergenerational effect of paternal depression in mice via regulating GR/miR-190b/BDNF pathway.

Occurrence of Banned and Currently Used Herbicides, in Groundwater of Northern Greece: A Human Health Risk Assessment Approach.

Determination of Glyphosate and AMPA in Blood Can Predict the Severity of Acute Glyphosate Herbicide Poisoning.

A Deadly Herbicide 'Paraquat Poisoning' and Miserable Death of a 19 Years Boy.

Bioremediation of quinclorac injury on tobacco by a rhizosphere bacterium.

Soybean dose-response to 2,4-D and dicamba at vegetative and reproductive growth stages.

Combined effects of S-metolachlor and benoxacor on embryo development in zebrafish (*Danio rerio*).

Enhanced photoelectrochemical aptasensing triggered by nitrogen deficiency and cyano group simultaneously engineered 2D carbon nitride for sensitively monitoring atrazine.

Acid-Responsive Micelles Releasing Cinnamaldehyde Enhance RSL3-Induced Ferroptosis in Tumor Cells.

The effects of aerobic exercise training with octopamine supplementation on cardiomyocyte apoptosis induced by deep-frying oil: The role of caspase and procaspase 3.

Cinnamaldehyde Regulates the Generation of $\hat{\Gamma}^3$ -aminobutyric Acid to Exert Sedation via Irreversible Inhibition of ENO1 in the Cerebellar Granular Layer.

Design and synthesis of amphiphilic carboxyl-functionalized magnetic polymer microspheres for fast determination of paraquat and its four metabolites in human urine samples prior to ultra-high performance liquid chromatography-high resolution mass spectrometry.

Impacts of dietary exposure to pesticides on faecal microbiome metabolism in adult twins.

Dynamic changes of serum cytokines in acute paraquat poisoning and changes in patients' immune function.

Metabolic Investigation on the Interaction Mechanism between Dietary Dihydrochalcone Intake and Lipid Peroxidation Product Acrolein Reduction.

Alterations at biochemical, proteomic and transcriptomic levels in liver of tilapia (*Oreochromis niloticus*) under chronic exposure to environmentally relevant level of glyphosate.

Association of Glyphosate Exposure with Blood DNA Methylation in a Cross-Sectional Study of Postmenopausal Women.

Metabolomics insight into the influence of environmental factors in responses of freshwater biofilms to the model herbicide diuron.

Comparison of modes of action between fish, cell and mitochondrial toxicity based on toxicity correlation, excess toxicity and QSAR for class-based compounds.

Single-Center Experience With Paraquat Exposure in Nine Patients.

Parental diuron exposure causes lower hatchability and abnormal ovarian development in offspring of medaka (*Oryzias melastigma*).

Glyphosate applied at a hormetic dose improves ripening without impairing sugarcane productivity and ratoon sprouting.

The combination of organic and inorganic fertilizers influence the weed growth, productivity and soil fertility of monsoon rice.

Phytochemicals mitigation of Brassica napus by IAA grown under Cd and Pb toxicity and its impact on growth responses of *Anagallis arvensis*.

Development and validation of a sensitive and high throughput UPLC-MS/MS method for determination of paraquat and diquat in human plasma and urine: application to poisoning cases at emergency departments of hospitals.

Comprehending the Role of Endocrine Disruptors in Inducing Epigenetic Toxicity.

CHANGES IN THE STATE OF VEGETATIVE NERVOUS SYSTEM OF ALBINO RATS AT THE BACKGROUND OF CHRONIC ROUNDUP POISONING.

The early impact of paraquat ban on suicide in Taiwan.

Behavioral, histopathological, and biochemical evaluations on the effects of cinnamaldehyde, naloxone, and their combination in morphine-induced cerebellar toxicity.

The effect of tracheal occlusion in congenital diaphragmatic hernia in the nitrofen rat lung explant model.

Probiotic Bifidobacteria Mitigate the Deleterious Effects of para-Cresol in a *Drosophila melanogaster* Toxicity Model.

Pro-Inflammatory Interactions of Dolutegravir with Human Neutrophils in an In Vitro Study.

Iron deficiency anemia in infants in Sousa (PB), Brazil: an association with nutritional status.

The significance of thymoquinone administration on liver toxicity of diazinon and cholinesterase activity; a recommendation for prophylaxis among individuals at risk.

Nano-formulations in treatment of iron deficiency anaemia: An overview.

Protocol for a multicenter, double-blinded placebo-controlled randomized controlled trial comparing intravenous ferric derisomaltose to oral ferrous sulfate for the treatment of iron deficiency anemia in pregnancy: The IVIDA2 trial.

Impact of mixtures of persistent organic pollutants on breast cancer aggressiveness.

Promising hepatoprotective effects of lycopene in different liver diseases.

Hibiscus sabdariffa L. polyphenolic-rich extract promotes muscle glucose uptake and inhibits intestinal glucose absorption with concomitant amelioration of Fe(2+) -induced hepatic oxidative injury.

Evaluation of the mode of action and human relevance of liver tumors in male mice treated with epyrifenacil.

Functional analysis of RYR1 variants in patients with confirmed susceptibility to malignant hyperthermia.

Effects of neuron autophagy induced by arsenic and fluoride on spatial learning and memory in offspring rats.

A CRISPR-based lateral flow assay for plant genotyping and pathogen diagnostics.

Impact of environmental toxicants exposure on gut-brain axis in Parkinson disease.

Efficacy and Mechanism of Buxue Yimu Pills on Gynecological Anemia: A Combination of Clinical and Network Pharmacology Study.

Pesticide exposure and risk of cardiovascular disease: A systematic review.

The Clostridium Metabolite P-Cresol Sulfate Relieves Inflammation of Primary Biliary Cholangitis by Regulating Kupffer Cells.

Understanding In Vitro Pathways to Drug Discovery for TDP-43 Proteinopathies.

Lactobacillus reuteri tryptophan metabolism promotes host susceptibility to CNS autoimmunity.

Oral Ferrous Sulphate Improves Functional Capacity on Heart Failure Patients with Iron Deficiency Anemia.

BDE-209 and TCDD enhance metastatic characteristics of melanoma cells after chronic exposure.

A cell-based evaluation of human tyrosinase-mediated metabolic activation of leukoderma-inducing phenolic compounds.

[Protective effect of active vitamin D on liver fibrosis induced by sodium arsenite in SD rats].

Impact of the National Amyotrophic Lateral Sclerosis Registry: Analysis of Registry-funded Research.

Flurochloridone induced abnormal spermatogenesis by damaging testicular Sertoli cells in mice.

Ferrous sulfate-loaded hydrogel cures Staphylococcus aureus infection via facilitating a ferroptosis-like bacterial cell death in a mouse keratitis model.

Potential for TCDD to induce regulatory functions in B cells as part of the mechanism for T cell suppression in EAE.

Thiobencarb induces phenotypic abnormalities, apoptosis, and cardiovascular toxicity in zebrafish embryos through oxidative stress and inflammation.

Association between trichlorophenols and neurodegenerative diseases: A cross-sectional study from NHANES 2003-2010.

Pharmacological testing of therapeutics using normothermic machine perfusion: A pilot study of 2,4-dinitrophenol delivery to steatotic human livers.

Betaine attenuates sodium arsenite-induced renal dysfunction in rats.

Lamp1 Deficiency Enhances Sensitivity to α -Synuclein and Oxidative Stress in Drosophila Models of Parkinson Disease.

2,4-Dinitrophenol as an Uncoupler Augments the Anthracyclines Toxicity against Prostate Cancer Cells.

The synergy of β amyloid 1-42 and oxidative stress in the development of Alzheimer's disease-like neurodegeneration of hippocampal cells.

Extended Conjugation Tuning Carbon Nitride for Non-sacrificial H₂ O₂ Photosynthesis and Hypoxic Tumor Therapy.

Treatment with Amniotic Fluid Stem Cell Extracellular Vesicles Promotes Fetal Lung Branching and Cell Differentiation at Canalicular and Saccular Stages in Experimental Pulmonary Hypoplasia Secondary to Congenital Diaphragmatic Hernia.

Analysis of environmental chemical mixtures and nonalcoholic fatty liver disease: NHANES 1999-2014.

Tolerability of Oral Supplementation with Microencapsulated Ferric Saccharate Compared to Ferrous Sulphate in Healthy Premenopausal Woman: A Crossover, Randomized, Double-Blind Clinical Trial.

Rapid and convenient detection of SARS-CoV-2 using a colorimetric triple-target reverse transcription loop-mediated isothermal amplification method.

N-myc downstream regulated gene 1 (ndrg1) functions as a molecular switch for cellular adaptation to hypoxia.

Carbamylation of β 2-glycoprotein I generates new autoantigens for antiphospholipid syndrome: a new tool for diagnosis of 'seronegative' patients.

Severe methyl bromide poisoning causing early acute renal failure and anuria: a case report.

Dual-dynamic-bond cross-linked injectable hydrogel of multifunction for intervertebral disc degeneration therapy.

A Combination Therapy Using Electrical Stimulation and Adaptive, Conductive Hydrogels Loaded with Self-Assembled Nanogels Incorporating Short Interfering RNA Promotes the Repair of Diabetic Chronic Wounds.

Comparative plasma metabolomic analysis to identify biomarkers for lead-induced cognitive impairment.

LC-MS metabolomics of urine reveals distinct profiles for non-muscle-invasive and muscle-invasive bladder cancer.

Physicochemical and microbiological stability of insulin eye drops in an artificial tear vehicle used in the treatment of refractory neurotrophic keratopathy.

Transcriptomics analysis of human iPSC-derived dopaminergic neurons reveals a novel model for sporadic Parkinson's disease.

Polyhalogenated carbazoles (PHCZs) induce cardiotoxicity and behavioral changes in zebrafish at early developmental stages.

Histopathological and immunohistochemical evaluation for detecting changes in blood hormone levels caused by endocrine disruptors in a 28-day repeated-dose study in rats.

Urinary organic acids spectra in children with altered gut microbiota composition and autistic spectrum disorder.

Damaged DNA Is an Early Event of Neurodegeneration in Induced Pluripotent Stem Cell-Derived Motoneurons with UBQLN2(P497H) Mutation.

Trace Element Interactions, Inflammatory Signaling, and Male Sex Implicated in Reduced Growth Following Excess Oral Iron Supplementation in Pre-Weanling Rats.

The Autism Spectrum Disorder-Associated Bacterial Metabolite p-Cresol Derails the Neuroimmune Response of Microglial Cells Partially via Reduction of ADAM17 and ADAM10.

Synbiotics, prebiotics and probiotics for solid organ transplant recipients.

Enzobiotics-A Novel Therapy for the Elimination of Uremic Toxins in Patients with CKD (EETOX Study): A Multicenter Double-Blind Randomized Controlled Trial.

Mechanism underlying the targeted regulation of the SOD1 3'UTR by the AUF1/Dicer1/miR-155/SOD1 pathway in sodium arsenite-induced liver injury.

Metabolomics for exposure assessment and toxicity effects of occupational pollutants: current status and future perspectives.

Legacy and new chlorinated persistent organic pollutants in the rivers of south India: Occurrences, sources, variations before and after the outbreak of the COVID-19 pandemic.

Correlation of inflammatory biomarkers with the diversity of Bacteroidaceae, Bifidobacteriaceae, Prevotellaceae and Lactobacillaceae families in the intestinal microbiota of patients with end stage renal disease.

Dioxin-elicited decrease in cobalamin redirects propionyl-CoA metabolism to the β^2 -oxidation-like pathway resulting in acrylyl-CoA conjugate buildup.

The SH-SY5Y human neuroblastoma cell line, a relevant in vitro cell model for investigating neurotoxicology in human: Focus on organic pollutants.

Arsenic induces bronchial epithelial carcinogenesis with mitochondrial dysfunction through AKAP95-mediated cell cycle alterations.

Urinary polycyclic aromatic hydrocarbon, arsenic, and metal exposure and correlation with emphysema in smokers.

Long-term effects of defoliant exposure on brain atrophy progression in humans.

Perinatal arsenic exposure-induced sustained microglial activation leads to impaired cognitive response in BALB/c mice.

Developmental, toxicological effects and recovery patterns in *Xenopus laevis* after exposure to penconazole-based fungicide during the metamorphosis process.

Lactoferrin for iron-deficiency anemia in children with inflammatory bowel disease: a clinical trial.

The effect of iron sulfate nanoparticles and their fortified bread on Wistar rats and human cell lines.

Sub-lethal concentration of metamifop exposure impair gut health of zebrafish (*Danio rerio*).

Transcriptome sequencing of 3,3',4,4',5-Pentachlorobiphenyl (PCB126)-treated human preadipocytes demonstrates progressive changes in pathways associated with inflammation and diabetes.

M1-linked ubiquitination facilitates NF- κ B activation and survival during sterile inflammation.

The Accumulation of Gut Microbiome-derived Indoxyl Sulfate and P-Cresyl Sulfate in Patients With End-stage Renal Disease.

Ameliorative role of inducible nitric oxide synthase inhibitors against sodium arsenite-induced renal and hepatic dysfunction in rats.

Assessment of the Proton Pump Inhibitor, Esomeprazole Magnesium Hydrate and Trihydrate, on Pathophysiological Markers of Preeclampsia in Preclinical Human Models of Disease.

Water-Tree Characteristics and Its Mechanical Mechanism of Crosslinked Polyethylene Grafted with Polar-Group Molecules.

Barbaloin attenuates pulmonary fibrosis through TGF- β 1/Smads/p38 pathway.

Damage of uremic myocardium by p-cresyl sulfate and the ameliorative effect of Klotho by regulating SIRT6 ubiquitination.

Autophagy Is Impaired in Fetal Hypoplastic Lungs and Rescued by Administration of Amniotic Fluid Stem Cell Extracellular Vesicles.

Recombinant FGF21 Attenuates Polychlorinated Biphenyl-Induced NAFLD/NASH by Modulating Hepatic Lipocalin-2 Expression.

Ginsenoside Rg1 protects mice against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced liver injury by inhibiting CYP1A1 through the aryl hydrocarbon receptor.

Fortification of foods with nano-iron: its uptake and potential toxicity: current evidence, controversies, and research gaps.

Hot Air Treatment Elicits Disease Resistance against *Colletotrichum gloeosporioides* and Improves the Quality of Papaya by Metabolomic Profiling.

Multiomics analysis of the impact of polychlorinated biphenyls on environmental liver disease in a mouse model.

Efficacy of cenobamate for uncontrolled focal seizures in patients with previous epilepsy-related surgery: Post hoc analysis of a phase 3, multicenter, open-label study.

Ingestion poisoning related lung injury- a pictorial review.

Effects of perinatal TCDD exposure on colonic microbiota and metabolism in offspring and mother mice.

Spatial-temporal distribution, cancer risk, and disease burden attributed to the dietary dioxins exposure of Chinese residents.

Association between environmental toxic metals, arsenic and polycyclic aromatic hydrocarbons and chronic obstructive pulmonary disease in the US adult population.

Suppressed farnesoid X receptor by iron overload in mice and humans potentiates iron-induced hepatotoxicity.

Nano-silica particles synergistically IgE-mediated mast cell activation exacerbating allergic inflammation in mice.

The Association between Blood Concentrations of PCDD/DFs, DL-PCBs and the Risk of Type 2 Diabetes Mellitus and Thyroid Cancer in South Korea.

Identification of the shared gene signatures and pathways between polycystic ovary syndrome and endometrial cancer: An omics data based combined approach.

Arsenic Speciation and Metallomics Profiling of Human Toenails as a Biomarker to Assess Prostate Cancer Cases: Atlantic PATH Cohort Study.

Characterization of Developmental Neurobehavioral Toxicity in a Zebrafish MPTP-Induced Model: A Novel Mechanism Involving Anemia.

MRI Spectrum of Toxic Encephalopathy-An Institutional Experience.

[The Role of Emergency Departments in Cross-Contamination: The Case of VRE].

Prenatal treprostinil reduces the pulmonary hypertension phenotype in the rat model of congenital diaphragmatic hernia.

Efficacy of cenobamate by focal seizure subtypes: Post-hoc analysis of a phase 3, multicenter, open-label study.

Flurochloridone induces responses of free radical reactions and energy metabolism disorders to BRL-3A cell.

Radiosynthesis and characterization of a carbon-11 PET tracer for receptor-interacting protein kinase 1.

Neonatal rodent ventilation and clinical correlation in congenital diaphragmatic hernia.

A novel surgical toxicological-free model of diaphragmatic hernia in fetal rats.

Xanthogranulomatous pyelonephritis in a pediatric patient.

Prognostic value of neutrophil to lymphocyte ratio in the diagnosis of neurotoxicity after glufosinate ammonium poisoning.

Quizalofop-P-ethyl induced developmental toxicity and cardiotoxicity in early life stage of zebrafish (Danio rerio).

HIF-1 α /VEGF pathway mediates 1,3,6,8-tetrabromo-9 β -H-carbazole-induced angiogenesis: a potential vascular toxicity of an emerging contaminant.

Quercetin Reduces the Development of 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Induced Cleft Palate in Mice by Suppressing CYP1A1 via the Aryl Hydrocarbon Receptor.

A Paternal Fish Oil Diet Preconception Modulates the Gut Microbiome and Attenuates Necrotizing Enterocolitis in Neonatal Mice.

Aryl Hydrocarbon Receptor Promotes Cell Growth, Stemness Like Characteristics, and Metastasis in Human Ovarian Cancer via Activation of PI3K/Akt, β -Catenin, and Epithelial to Mesenchymal Transition Pathways.

Thermogenic T cells: a cell therapy for obesity?

Integration of toxicodynamic and toxicokinetic new approach methods into a weight-of-evidence analysis for pesticide developmental neurotoxicity assessment: A case-study with DL- and L-glufosinate.

Occupational exposures to pesticides and other chemicals: a New Zealand motor neuron disease case-control study.

Pesticide use and risk of systemic autoimmune diseases in the Agricultural Health Study.

Eyelid malignancies in young individuals: clinical peculiarities.

Mild Mitochondrial Uncoupling Decreases Experimental Atherosclerosis, A Proof of Concept.

A combination of amino-functionalized fibrous silica (KCC-1-NH₂)/effectively and efficiently oxidized graphene oxide (EEGO) nanocomposite for dispersive solid-phase extraction, pre-concentration and fluorescence determination of total para-cresol in plasma samples of chronic kidney disease patients.

Supercomplex supercomplexes: Raison d'etre and functional significance of supramolecular organization in oxidative phosphorylation.

Feeding cats with chronic kidney disease food supplemented with betaine and prebiotics increases total body mass and reduces uremic toxins.

N⁶-Acetyl-L-Lysine and p-Cresol as Key Metabolites in the Pathogenesis of COVID-19 in Obese Patients.

Comparison of Ferric Sodium EDTA in Combination with Vitamin C, Folic Acid, Copper Gluconate, Zinc Gluconate, and Selenomethionine as Therapeutic Option for Chronic Kidney Disease Patients with Improvement in Inflammatory Status.

The Aryl Hydrocarbon Receptor Modulates T Follicular Helper Cell Responses to Influenza Virus Infection in Mice.

[Effect of panlong needling at Jiaji (EX-B 2) on motor dysfunction in patients with Parkinson's disease of liver and kidney deficiency: a randomized controlled trial].

Kunitz-Type Peptides from Sea Anemones Protect Neuronal Cells against Parkinson's Disease Inductors via Inhibition of ROS Production and ATP-Induced P2X7 Receptor Activation.

Gut-derived bacterial toxins impair memory CD4+ T cell mitochondrial function in HIV-1 infection.

Effects of hypericin encapsulated on Pluronic F127 photodynamic therapy against triple negative breast cancer.

The metabolite p-cresol impairs dendritic development, synaptogenesis, and synapse function in hippocampal neurons: Implications for autism spectrum disorder.

Yes-associated protein is dysregulated during nitrofen-induced hypoplastic lung development due to congenital diaphragmatic hernia.

Casein kinase I inhibitor D4476 influences autophagy and apoptosis in chloroquine-induced adult retinal pigment epithelial-19 cells.

Redox-dependent loss of flavin by mitochondria complex I is different in brain and heart.

Application of FeOOH Nano-Ellipsoids as a Novel Nano-Based Iron Supplement: an In Vivo Study.

Flumioxazin, a PPO inhibitor: A weight-of-evidence consideration of its mode of action as a developmental toxicant in the rat and its relevance to humans.

Clostridioides difficile Infection Dysregulates Brain Dopamine Metabolism.

OXPHOS deficiencies affect peroxisome proliferation by downregulating genes controlled by the SNF1 signaling pathway.

Bacterial neurotoxic metabolites in multiple sclerosis cerebrospinal fluid and plasma.

Rosmarinus officinalis L. Leaf Extracts and Their Metabolites Inhibit the Aryl Hydrocarbon Receptor (AhR) Activation In Vitro and in Human Keratinocytes: Potential Impact on Inflammatory Skin Diseases and Skin Cancer.

Phenoxyaromatic Acid Analogues as Novel Radiotherapy Sensitizers: Design, Synthesis and Biological Evaluation.

Severe cresol poisoning caused by massive dermal exposure.

Inhibition of neurite outgrowth and enhanced effects compared to baseline toxicity in SH-SY5Y cells.

A Phase 1 Clinical Study Evaluating the Effects of Cenobamate on the QT Interval.

TCDD aggravates the formation of the atherosclerotic plaque in ApoE KO mice with a sexual dimorphic pattern.

Lactic acid bacteria feeding reversed the malformed eye structures and ameliorated gut microbiota profiles of *Drosophila melanogaster* Alzheimer's disease model.

Arsenic alters nitric oxide signaling similar to autism spectrum disorder and Alzheimer's disease-associated mutations.

Environmental Substances Associated with Chronic Obstructive Pulmonary Disease-A Scoping Review.

Lentinan alleviates arsenic-induced hepatotoxicity in mice via downregulation of OX40/IL-17A and activation of Nrf2 signaling.

Flavoring agent dihydrocoumarin alleviates IgE-mediated mast cell activation and allergic inflammation.

Nontoxic Metal-Free Visible Light-Responsive Carbon Nitride Quantum Dots Cause Oxidative Stress and Cancer-Specific Membrane Damage.

Monomeric C-Reactive Protein: Current Perspectives for Utilization and Inclusion as a Prognostic Indicator and Therapeutic Target.

A Novel Ferritin-Core Analog Is a Safe and Effective Alternative to Oral Ferrous Iron for Treating Iron Deficiency during Pregnancy in Mice.

Application of neurotoxin- and pesticide-induced animal models of Parkinson's disease in the evaluation of new drug delivery systems.

Phage therapy for refractory periapical periodontitis caused by *Enterococcus faecalis* in vitro and in vivo.

Toenail speciation biomarkers in arsenic-related disease: a feasibility study for investigating the association between arsenic exposure and chronic disease.

Oxidative stress-induced alterations in retinal glucose metabolism in Retinitis Pigmentosa.

Developmental toxicity studies on triclopyr acid, triclopyr butoxyethyl ester and triclopyr triethylamine salt in the rabbit.

Iron contributes to photoreceptor degeneration and Müller glia proliferation in the zebrafish light-treated retina.

Applying reflective multicriteria decision analysis to understand the value of therapeutic alternatives in the management of gestational and peripartum anaemia in Spain.

Tryptophan Metabolites Regulate Neuropentraxin 1 Expression in Endothelial Cells.

Iron from nanostructured ferric phosphate: absorption and biodistribution in mice and bioavailability in iron deficient anemic women.

Natural Dietary Compound Xanthohumol Regulates the Gut Microbiota and Its Metabolic Profile in a Mouse Model of Alzheimer's Disease.

Integrated molecular biology and metabolomics approach to understand the mechanism underlying reduction of insulin resistance by corn silk decoction.

Bis-Amiridines as Acetylcholinesterase and Butyrylcholinesterase Inhibitors: N-Functionalization Determines the Multitarget Anti-Alzheimer's Activity Profile.

Inhibiting DHN- and DOPA-melanin biosynthesis pathway increased the therapeutic value of itraconazole in *Madurella mycetomatis* infected *Galleria mellonella*.

Cold Atmospheric Plasma Apoptotic and Oxidative Effects on MCF7 and HCC1806 Human Breast Cancer Cells.

Acute Dyspnea and Hemoptysis in an 84-Year-Old Man With Multiple Comorbidities.

Arsenic compounds induce apoptosis by activating the MAPK and caspase pathways in FaDu oral squamous carcinoma cells.

Supplementation with Sucrosomial[®] iron leads to favourable changes in the intestinal microbiome when compared to ferrous sulfate in mice.

Chemically induced models of Parkinson's disease.

Epidemiology of hospitalizations due to pesticide intoxication-associated acute kidney injury in China.

Oral iron supplementation in patients with chronic kidney disease: Can it be harmful to the gut microbiota?

PCB126 induced toxic actions on liver energy metabolism is mediated by AhR in rats.

Comparative Effects between Oral Lactoferrin and Ferrous Sulfate Supplementation on Iron-Deficiency Anemia: A Comprehensive Review and Meta-Analysis of Clinical Trials.

A randomized double-blind cross-over trial to study the effects of resistant starch prebiotic in chronic kidney disease (ReSPECKD).

Measurement of Urinary Triclocarban and 2,4-Dichlorophenol Concentration and Their Relationship with Obesity and Predictors of Cardiovascular Diseases among Children and Adolescents in Kerman, Iran.

Ni(2+) Catalyzed Cleavage of TrpLE-Fused Small Transmembrane Peptides.

Reduced Colonic Mucosal Injury in 2,3,7,8-Tetrachlorodibenzo-p-Dioxin Poly ADP-Ribose Polymerase (TIPARP/PARP7)-Deficient Mice.

An evidence-based definition of anemia for singleton, uncomplicated pregnancies.

An Electrochemiluminescence Biosensor for the Detection of Alzheimer's Tau Protein Based on Gold Nanostar Decorated Carbon Nitride Nanosheets.

Evaluation of novel cathepsin-X inhibitors in vitro and in vivo and their ability to improve cathepsin-B-directed antitumor therapy.

Impact of Uremic Toxins on Endothelial Dysfunction in Chronic Kidney Disease: A Systematic Review.

Development and Characterization of Curcumin-Silver Nanoparticles as a Promising Formulation to Test on Human Pterygium-Derived Keratinocytes.

Evaluation of the prescription pattern of ferrous sulfate as a therapy for preventing iron deficiency anemia in infants.

Oxidative Stress and Toxicity in Reproductive Biology and Medicine: A Comprehensive Update on Male Infertility Volume II - Conclusion.

Quantification of Very-Long-Chain and Branched-Chain Fatty Acids in Plasma by Liquid Chromatography-Tandem Mass Spectrometry.

Potential therapies for sodium azide intoxication; a case report and review of the literature.

Minocycline improves the functional recovery after traumatic brain injury via inhibition of aquaporin-4.

Novel intestinal dialysis interventions and microbiome modulation to control uremia.

Long-term individual retention with cenobamate in adults with focal seizures: Pooled data from the clinical development program.

Gut mobilization improves behavioral symptoms and modulates urinary p-cresol in chronically constipated autistic children: A prospective study.

How to Optimize the Effectiveness and Safety of Parkinson's Disease Therapy? - A Systematic Review of Drugs Interactions with Food and Dietary Supplements.

Gut Microbiome-Dependent Metabolic Pathways and Risk of Lethal Prostate Cancer: Prospective Analysis of a PLCO Cancer Screening Trial Cohort.

Biotic Supplements in Patients With Chronic Kidney Disease: Meta-Analysis of Randomized Controlled Trials.

Associations between persistent organic pollutants and endometriosis: A multiblock approach integrating metabolic and cytokine profiling.

Metabolome-wide association study of serum exogenous chemical residues in a cohort with 5 major chronic diseases.

The potential of lactic acid bacteria in mediating the control of plant diseases and plant growth stimulation in crop production - A mini review.

Acrolein-inducing ferroptosis contributes to impaired peripheral neurogenesis in zebrafish.

Roundup in the Reproduction of Crucian Carp (*Carassius carassius*): An In Vitro Effect on the Pituitary Gland and Ovary.

Ecological risk assessment of pesticides in the Ngouoh Ngouoh watershed of the Foubot Municipality in the west region of Cameroon using the PRIMET model.

The calcium cyanamide and polyethylene blocks the secondary transmission and infection of vegetable leaf diseases.

Rare fatal poisoning through dermal exposure to paraquat.

Mitochondrial uncoupler DNP induces coexistence of dual-state hyper-energy metabolism leading to tumor growth advantage in human glioma xenografts.

Treatment with MDL 72527 Ameliorated Clinical Symptoms, Retinal Ganglion Cell Loss, Optic Nerve Inflammation, and Improved Visual Acuity in an Experimental Model of Multiple Sclerosis.

Fossil-fuel and combustion-related air pollution and hypertension in the Sister Study.

Carbonyl Profiles of Electronic Nicotine Delivery System (ENDS) Aerosols Reflect Both the Chemical Composition and the Numbers of E-Liquid Ingredients-Focus on the In Vitro Toxicity of Strawberry and Vanilla Flavors.

Insights into metabolic and pharmacological profiling of *Aspergillus ficuum* through bioinformatics and experimental techniques.

Quercetin Zinc and Iron Metal Complexes Protect against Sodium Arsenite Intoxication in the Hepato-Renal System of Wistar Rats via the Oxidative Stress Pathway.

Evaluation of Sulfur-Based Biostimulants for the Germination of *Sclerotium cepivorum* Sclerotia and Their Interaction with Soil.

Leukemic stem cells and advances in hematopoietic stem cell transplantation for acute myeloid leukemia: a narrative review of clinical trials.

Ethnicity Associated Microbial and Metabonomic Profiling in Newly Diagnosed Ulcerative Colitis.

Environmentally relevant atrazine exposure leads to increases in DNA damage and changes in morphology in the hepatopancreas of crayfish (*Faxonius virilis*).

E2F1 regulates miR-215-5p to aggravate paraquat-induced pulmonary fibrosis via repressing BMPR2 expression.

Can probiotic, prebiotic, and synbiotic supplementation modulate the gut-liver axis in type 2 diabetes? A narrative and systematic review of clinical trials.

DEAD box RNA helicases protect Antarctic *Pseudomonas syringae* Lz4W against oxidative stress.

Determination of the relative potencies of brominated dioxins for risk assessment in aquatic environments using the early-life stage of Japanese medaka.

The environmental pollutant 3-methyl-4-nitrophenol reduces the regulatory T cells in the intestine.

Responses of bitter melon saponins to oxidative stress and aging via the IIS pathway linked with sir-2.1 and hih-30.

Estimated daily intake of phthalates, parabens, and bisphenol A in hospitalised very low birth weight infants.

Exposure to pyrazosulfuron-ethyl induces immunotoxicity and behavioral abnormalities in zebrafish embryos.

Toxic effects of pesticides on cellular and humoral immunity: an overview.

Proper modulation of AHR signaling is necessary for establishing neural connectivity and oligodendrocyte precursor cell development in the embryonic zebrafish brain.

Extracellular matrix and cyclic stretch alter fetal cardiomyocyte proliferation and maturation in a rodent model of heart hypoplasia.

Shoot organogenesis and somatic embryogenesis from leaf and petiole explants of endangered *Euryodendron excelsum*.

Comparison of the effect of ferrous sulfate and ferrous gluconate on prophylaxis of iron deficiency in toddlers 6-24 months old: A randomized clinical trial.

Toxic tests show the sensitivity of the *Daphnia similis* (Crustacea, Cladocera) and *Pseudokirchneriella subcapitata* (Chlorophyceae) to commercial pesticides.

Acetobacter tropicalis bacteraemia in an immunocompromised patient: case report.

Post-Translational Modifications Evoked by Reactive Carbonyl Species in Ultraviolet-A-Exposed Skin: Implication in Fibroblast Senescence and Skin Photoaging.

The modulation of gut microbiota by herbal medicine to alleviate diabetic kidney disease - A review.

Glycine Alleviated Intestinal Injury by Inhibiting Ferroptosis in Piglets Challenged with Diquat.

Comparative Biochemical Profiling of Aluminum Chloride and Sodium Azide Induced Neuroinflammation and Cardiometabolic Disturbance.

Epigallocatechin-3-Gallate Decreases Plasma and Urinary Levels of p-Cresol by Modulating Gut Microbiota in Mice.

Endocrine disruptor chemicals as obesogen and diabetogen: Clinical and mechanistic evidence.

Effect of water diuresis with hydrogen saturation on the course of acute kidney damage during the separation of oxidation and phosphorylation.

Diffusion-Weighted Imaging for Detecting Glufosinate Ammonium Intoxication: A Case Report.

Aclonifen could induce implantation failure during early embryonic development through apoptosis of porcine trophoderm and uterine luminal epithelial cells.

Reduced acute functional tolerance and enhanced preference for ethanol in *Caenorhabditis elegans* exposed to lead during development: Potential role of alcohol dehydrogenase.

The desmoplastic growth pattern is associated with second-stage completion and longer survival in 2-stage hepatectomy for colorectal cancer liver metastases.

Integrated biomarker approach strongly explaining in vivo sub-lethal acute toxicity of butachlor on *Labeo rohita*.

Ethoxyquin is a Competent Radical-Trapping Antioxidant for Preventing Ferroptosis in Doxorubicin Cardiotoxicity.

Sodium acetate/sodium butyrate alleviates lipopolysaccharide-induced diarrhea in mice via regulating the gut microbiota, inflammatory cytokines, antioxidant levels, and NLRP3/Caspase-1 signaling.

Targeted medical examinations for workers exposed to fumigants.

AhR Mediated Activation of Pro-Inflammatory Response of RAW 264.7 Cells Modulate the Epithelial-Mesenchymal Transition.

Plastid methylerythritol phosphate pathway participates in the hypersensitive response-related cell death in *Nicotiana benthamiana*.

Low-Dose Dioxin Reduced Glucose Uptake in C2C12 Myocytes: The Role of Mitochondrial Oxidative Stress and Insulin-Dependent Calcium Mobilization.

Metabolite Profiling of Paraquat Tolerant *Arabidopsis thaliana* Radical-induced Cell Death1 (rcd1)-A Mediator of Antioxidant Defence Mechanisms.

The Role of Acrolein in Neurodegenerative Diseases and Its Protective Strategy.

Oxaloacetate acid ameliorates paraquat-induced acute lung injury by alleviating oxidative stress and mitochondrial dysfunction.

Elevated congenital heart disease birth prevalence rates found in Central Vietnam and dioxin TCDD residuals from the use of 2, 4, 5-T herbicides (Agent Orange) in the Da Nang region.

Metabolic reprogramming enables the auxiliary diagnosis of breast cancer by automated breast volume scanner.

C-X-C-Chemokine-Receptor-Type-4 Inhibitor AMD3100 Attenuates Pulmonary Inflammation and Fibrosis in Silicotic Mice.

Ryanodine receptor-active non-dioxin-like polychlorinated biphenyls cause neurobehavioral deficits in larval zebrafish.

The Fallout of Catastrophic Technogenic Emissions of Toxic Gases Can Negatively Affect Covid-19 Clinical Course.

Changing spectrum of acute poisoning in North India: A hospital-based descriptive study.

Protective efficacy of *Coriandrum sativum* seeds against arsenic induced toxicity in Swiss albino mice.

Idiopathic unilateral third nerve palsy with pupillary sparing in 10-year-old child -a case report.

Lethal diquat poisoning manifests as acute central nervous system injury and circulatory failure: A retrospective cohort study of 50 cases.

Pendimethalin induces apoptotic cell death through activating ER stress-mediated mitochondrial dysfunction in human umbilical vein endothelial cells.

The involvement of branched-chain amino acids (BCAAs) in aromatic trihalogenated DBP exposure-induced kidney damage in mice.

Bergenin ameliorates cognitive deficits and neuropathological alterations in sodium azide-induced experimental dementia.

Somatic embryogenesis and plant regeneration from transverse thin cell layers of adult peach palm (*Bactris gasipaes*) lateral offshoots.

Intoxication-Related Deaths in a Poisoning Center in Isfahan: Demographic and Other-Related Factors.

The efficacy of hemodialysis on paraquat poisoning mortality: A systematic review and meta-analysis.

Approaches for the establishment of optimized co-culture system of multiple *Trichoderma* strains for culture metabolites highly effective in cucumber growth promotion.

Altered gut microbiota and gut-derived p-cresyl sulfate serum levels in peritoneal dialysis patients.

Interference of Dihydrocoumarin with Hormone Transduction and Phenylpropanoid Biosynthesis Inhibits Barnyardgrass (*Echinochloa crus-galli*) Root Growth.

Regulation of gut microbiota of *Astragali Radix* in treating for chronic atrophic gastritis rats based on metabolomics coupled with 16S rRNA gene sequencing.

Differential Effects of Arsenic in Drinking Water on Mouse Hepatic and Intestinal Heme Oxygenase-1 Expression.

Machine Learning Models for Identification and Prediction of Toxic Organic Compounds Using *Daphnia magna* Transcriptomic Profiles.

Cobinamide is a strong and versatile antioxidant that overcomes oxidative stress in cells, flies, and diabetic mice.

Neuroprotective effects of crocin and crocin-loaded niosomes against the paraquat-induced oxidative brain damage in rats.

Periplaneta americana Extract Pretreatment Alleviates Oxidative Stress and Inflammation and Increases the Abundance of Gut *Akkermansia muciniphila* in Diquat-Induced Mice.

In Vitro Induction of Eryptosis by Uremic Toxins and Inflammation Mediators in Healthy Red Blood Cells.

loxylinil and diethylstilbestrol increase the risks of cardiovascular and thyroid dysfunction in zebrafish.

Protection against Paraquat-Induced Oxidative Stress by *Curcuma longa* Extract-Loaded Polymeric Nanoparticles in Zebrafish Embryos.

Food-derived bioactive oligopeptide iron complexes ameliorate iron deficiency anemia and offspring development in pregnant rats.

Altered levels of variant cholinesterase transcripts contribute to the imbalanced cholinergic signaling in Alzheimer's and Parkinson's disease.

Evaluation of the toxicological effects of atrazine-metolachlor in male rats: in vivo and in silico studies.

Single-cell analysis of gene expression in the substantia nigra pars compacta of a pesticide-induced mouse model of Parkinson's disease.

Down-regulation of hepatic cytochromes P450 1A1 and 1A2 by arsenic trioxide (ATO) in vivo and in vitro: A role of heme oxygenase 1.

Vitamin C supplementation rescued meiotic arrest of spermatocytes in Balb/c mice exposed to BDE-209.

Borax relieved the acrylamide-induced hematotoxic, hepatotoxic, immunotoxic and genotoxic damages in rainbow trout by regulating apoptosis and Nrf2 signaling pathway.

Bisphenol A and 2,3,7,8-tetrachlorodibenzo-p-dioxin at non-cytotoxic doses alter the differentiation potential and cell function of rat adipose-stem cells.

The toxicological profile of polychlorinated naphthalenes (PCNs).

Removal of micropollutants by UASB reactor and post-treatment by Fenton and photo-Fenton: Matrix effect and toxicity responses.

Iron nanoparticles as a promising compound for food fortification in iron deficiency anemia: a review.

Morphology and cytochemical patterns of peripheral blood cells of tiger frog (*Rana rugulosa*).

Small molecule-mediated allosteric activation of the base excision repair enzyme 8-oxoguanine DNA glycosylase and its impact on mitochondrial function.

Sn(1/3)Na(2/3)Sn(OH)(6) Perovskite with Sn(4+)/Na(+) Disorder for Photocatalytic Degradation of 2,4-Dichlorophenol.

Ammonium tetrathiomolybdate triggers autophagy-dependent NRF2 activation in vascular endothelial cells.

Chronic atrazine exposure increases the expression of genes associated with GABAergic and glutamatergic systems in the brain of male albino rat.

The Significance of Estimated Glomerular Filtration Rate for Predicting Mortality in Glyphosate Herbicide-Intoxicated Patients: A Single-Center, Retrospective Observational Study.

Automating Predictive Toxicology Using ComptoxAI.

Selected Political Criminal Poisonings in the Years 1978-2020: Detection and Treatment.

Adult health and transition stage-specific rotenone-mediated *Drosophila* model of Parkinson's disease: Impact on late-onset neurodegenerative disease models.

Mild pentachlorophenol-mediated uncoupling of mitochondria depletes ATP but does not cause an oxidized redox state or dopaminergic neurodegeneration in *Caenorhabditis elegans*.

Beneficial effect on the soil microenvironment of *Trichoderma* applied after fumigation for cucumber production.

Agent Orange Exposure, Transformation From MGUS to Multiple Myeloma, and Outcomes in Veterans.

Arsenic exposure diminishes ovarian follicular reserve and induces abnormal steroidogenesis by DNA methylation.

Oral administration of pentachlorophenol impairs antioxidant system, inhibits enzymes of brush border membrane, causes DNA damage and histological changes in rat intestine.

Supporting discovery and development of medical countermeasures for chemical injury to eye and skin.

Multiresidue analysis and probabilistic dietary risk assessment of 241 pesticides in wheatgrass (*Triticum* sp.) using LC-MS/MS in combination with QuEChERS extraction.

Defensing against oxidative stress in *Caenorhabditis elegans* of a polysaccharide LFP-05S from *Lycii fructus*.

Tetrachlorobisphenol A mediates reproductive toxicity in *Caenorhabditis elegans* via DNA damage-induced apoptosis.

Effects of three surfactants on the degradation and environmental risk of metolachlor in aquatic environment.

Beta-glucan effects on 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) toxicity in liver and brain.

Efficacy of Oral Versus Injectable Iron in Patients With Chronic Kidney Disease: A Two-Year Cross-Sectional Study Conducted at a Rural Teaching Hospital.

Boron Compounds Exhibit Protective Effects against Aluminum-Induced Neurotoxicity and Genotoxicity: In Vitro and In Vivo Study.

Two Foreign Antimicrobial Peptides Expressed in the Chloroplast of *Porphyridium purpureum* Possessed Antibacterial Properties.

Importance of Locations of Iron Ions to Elicit Cytotoxicity Induced by a Fenton-Type Reaction.

Diquat Herbicide Organophosphate Poisoning and Multi-Organ Failure: A Case Report.

An Investigation of the Neurotoxic Effects of Malathion, Chlorpyrifos, and Paraquat to Different Brain Regions.

Genetic background modulates the sensitivity of *Caenorhabditis elegans* to the toxic effects of vehicular air pollution.

Atrazine Exposure Induces Hepatic Metabolism Disorder in Male Adult Zebrafish.

The Effects of Resistant Starch Consumption in Adult Patients With Chronic Kidney Disease: A Systematic Review.

AQP9 (Aquaporin 9) Determines Arsenic Uptake and Tolerance in Human Hepatocellular Carcinoma Cells In Vitro.

Effects of Different Environment-Friendly Gibberellic Acid Microcapsules on Herbicide Injury of Wheat.

In Silico Conformation of the Drug Colchicine into Tubulin Models and Acute Phytotoxic Activity on *Cucumis sativus* Radicles.

Paraquat induced oxidative stress, DNA damage, and cytotoxicity in lymphocytes.

Integrated Multilayer Omics Reveals the Genomic, Proteomic, and Metabolic Influences of Histidyl Dipeptides on the Heart.

Porcine Epidemic Diarrhea Virus Infection Subverts Arsenite-Induced Stress Granules Formation.

Cytomegalovirus-related Cystitis in a Patient with Membranous Glomerulonephritis Receiving Cyclophosphamide: A Case Study.

Modeling Risk Dynamics of Contaminants of Emerging Concern in a Temperate-region Wastewater Effluent-dominated Stream.

Insight into 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced disruption of zebrafish spermatogenesis via single cell RNA-seq.

[Determination of dazomet and its metabolite methyl isothiocyanate residues in plant-derived foods by gas chromatography-triple quadrupole mass spectrometry].

Hepatic Burdens of PCB and PCDD/F Congeners in Federally Endangered Shortnose Sturgeon and Atlantic Sturgeon from the Hudson River, New York, USA: Burden Patterns and Potential Consequences in Offspring.

Effects of dietary 2-(2H-benzotriazol-2-yl)-4-methylphenol (UV-P) exposure on Japanese medaka (*Oryzias latipes*) in a short-term reproduction assay.

Borax exerts protective effect against ferrocene-induced neurotoxicity in *Oncorhynchus mykiss*.

Comparison of "click-to-sense" assay with frozen section analysis using simulated surgical margins in breast cancer patients.

Fungal insecticidal activity elevated by non-risky markerless overexpression of an endogenous cysteine-free protein gene in *Beauveria bassiana*.

[2]Rotaxane as a switch for molecular electronic memory application: A molecular dynamics study.

Optimisation of an automated high-throughput micronucleus (HiTMiN) assay to measure genotoxicity of environmental contaminants.

Critical role of mitochondrial aldehyde dehydrogenase 2 in acrolein sequestering in rat spinal cord injury.

Chronic Effects of Dietary Pesticides on the Gut Microbiome and Neurodevelopment.

In vivo toxicity evaluations of halophenolic disinfection byproducts in drinking water: A multi-omics analysis of toxic mechanisms.

A New Treatment Approach for Acute Propanil Poisoning: A Case Report.

Melatonin Prevents NaAsO₂-Induced Developmental Cardiotoxicity in Zebrafish through Regulating Oxidative Stress and Apoptosis.

Effects of Autophagy Modulators and Dioxin on the Expression of Epidermal Differentiation Proteins on Psoriasis-Like Keratinocytes in vitro and ex vivo.

Dietary supplementation with biogenic selenium nanoparticles alleviate oxidative stress-induced intestinal barrier dysfunction.

Ecological Integrity Impairment and Habitat Fragmentation for Neotropical Macroinvertebrate Communities in an Agricultural Stream.

Chronic Toxicity of Primary Metabolites of Chloroacetamide and Glyphosate to Early Life Stages of Marbled Crayfish *Procambarus virginalis*.

Effects of the Herbicide Atrazine on Crustacean Reproduction. Mini-Review.

Presenilin Deficiency Increases Susceptibility to Oxidative Damage in Fibroblasts.

Exposure to the Dioxin-like Pollutant PCB 126 Afflicts Coronary Endothelial Cells via Increasing 4-Hydroxy-2 Nonenal: A Role for Aldehyde Dehydrogenase 2.

Dietary High Dose of Iron Aggravates the Intestinal Injury but Promotes Intestinal Regeneration by Regulating Intestinal Stem Cells Activity in Adult Mice With Dextran Sodium Sulfate-Induced Colitis.

Associations of Smokeless Tobacco Use With Cardiovascular Disease Risk: Insights From the Population Assessment of Tobacco and Health Study.

Oxidative Stress Protection by Canary Seed (*Phalaris canariensis* L.) Peptides in Caco-2 Cells and *Caenorhabditis elegans*.

Histopathological Alterations in the Livers of Chronic Hepatitis Patients Exposed to Agent Orange/Dioxin in Vietnam.

Detection of pesticide residues and risk assessment from the local fruits and vegetables in Incheon, Korea.

Impact of a 7-day homogeneous diet on interpersonal variation in human gut microbiomes and metabolomes.

Interference of Arabidopsis N-Acetylglucosamine-1-P Uridyltransferase Expression Impairs Protein N-Glycosylation and Induces ABA-Mediated Salt Sensitivity During Seed Germination and Early Seedling Development.

Trouble for Horses in Paradise: Toxicity and Fatality Resulting from the Consumption of *Indigofera spicata* (Fabaceae) on Oahu Island.

Organic and Conventional Bean Pesticides in Development of Autochthonous *Trichoderma* Strains.

Magnetic Resonance Imaging of Tumor-Infiltrating Lymphocytes by Anti-CD3-Conjugated Iron Oxide Nanoparticles.

Effect of cyanocobalamin (vitamin B12) on paraquat-induced brain injury in mice.

Genotoxic, biochemical and histological biomarkers of subacute concentrations of paraquat and glyphosate in Nile Tilapia.

Red propolis reduces inflammation in cyclophosphamide-induced hemorrhagic cystitis in rats.

Alachlor breaks down intracellular calcium homeostasis and leads to cell cycle arrest through JNK/MAPK and PI3K/AKT signaling mechanisms in bovine mammary gland epithelial cells.

Mitochondrial uncouplers induce proton leak by activating AAC and UCP1.

Spatial distribution, ecological and health risk assessment of organophosphorus pesticides identified in the water of Naseri artificial wetland, Iran.

Effects of 1,3,7-tribromodibenzo-p-dioxin, a natural dioxin on chicken embryos: Comparison with effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

A glyphosate-based herbicide disrupted hematopoiesis and induced organ toxicities, ameliorated by vitamin B(12) in a mouse model.

Characteristics, influence factors, and health risk assessment of volatile organic compounds through one year of high-resolution measurement at a refinery.

Metabolomics and lipidomics to identify biomarkers of effect related to exposure to non-dioxin-like polychlorinated biphenyls in pigs.

Temporal variation of imidacloprid concentration and risk in waterways discharging to the Great Barrier Reef and potential causes.

Glycine alleviated diquat-induced hepatic injury via inhibiting ferroptosis in weaned piglets.

Transgenerational male reproductive effect of prenatal arsenic exposure: abnormal spermatogenesis with Igf2/H19 epigenetic alteration in CD1 mouse.

Antimicrobial Mechanism and Secondary Metabolite Profiles of Biocontrol Agent *Streptomyces lydicus* M01 Based on Ultra-High-Performance Liquid Chromatography Connected to a Quadrupole Time-of-Flight Mass Spectrometer Analysis and Genome Sequencing.

The Anti-CGRP Antibody Fremanezumab Lowers CGRP Release from Rat Dura Mater and Meningeal Blood Flow.

Risk factors and optimal predictive scoring system of mortality for children with acute paraquat poisoning.

Investigating the Role of Spermidine in a Model System of Alzheimer's Disease Using Correlative Microscopy and Super-resolution Techniques.

Mitochondrial Inhibition by Sodium Azide Induces Assembly of eIF2 γ Phosphorylation-Independent Stress Granules in Mammalian Cells.

N-Acetylcysteine Priming Alleviates the Transplanting Injury of Machine-Transplanted Rice by Comprehensively Promoting Antioxidant and Photosynthetic Systems.

Metformin Regulates Alveolar Macrophage Polarization to Protect Against Acute Lung Injury in Rats Caused by Paraquat Poisoning.

Polyphenols Sourced from *Ilex latifolia* Thunb. Relieve Intestinal Injury via Modulating Ferroptosis in Weanling Piglets under Oxidative Stress.

Toxic Exposure to Endocrine Disruptors Worsens Parkinson's Disease Progression through NRF2/HO-1 Alteration.

Clinical characteristics, treatment and outcomes of acute propanil poisoning in a 7-year retrospective cohort study.

Daily versus every other day oral iron supplementation in patients with iron deficiency anemia (DEODO): study protocol for a phase 3 multicentered, pragmatic, open-label, pilot randomized controlled trial.

Novel Imidazole Phenoxyacetic Acids as Inhibitors of USP30 for Neuroprotection Implication via the Ubiquitin-Rho-110 Fluorometric Assay: Design, Synthesis, and In Silico and Biochemical Assays.

Response of faba bean to intercropping, biological and chemical control against broomrape and root rot diseases.

Tea polyphenols alleviates acetochlor-induced apoptosis and necroptosis via ROS/MAPK/NF- κ B signaling in Ctenopharyngodon idellus kidney cells.

Dioxin-like polychlorinated biphenyl 126 (PCB126) disrupts gut microbiota-host metabolic dysfunction in mice via aryl hydrocarbon receptor activation.

Associations of total urinary arsenic with total cholesterol and high-density lipoprotein among 12-17-year-old participants from the 2009-2016 NHANES cycles: A cross-sectional study.

Evaluation of the Acute Effects of Arsenic on Adults of the Neotropical Native Fish *Cnesterodon decemmaculatus* Using a Set of Biomarkers.

International trends in systemic human exposures to 2,4 dinitrophenol reported to poisons centres.

Anxiety and Gene Expression Enhancement in Mice Exposed to Glyphosate-Based Herbicide.

Effects of Different Formulations of Glyphosate on Rumen Microbial Metabolism and Bacterial Community Composition in the Rumen Simulation Technique System.

Preclinical In Vitro Model to Assess the Changes in Permeability and Cytotoxicity of Polarized Intestinal Epithelial Cells during Exposure Mimicking Oral or Intravenous Routes: An Example of Arsenite Exposure.

Role of Programmed Cell Death Protein-1 and Lymphocyte Specific Protein Tyrosine Kinase in the Aryl Hydrocarbon Receptor-Mediated Impairment of the IgM Response in Human CD5(+) Innate-Like B Cells.

Multiple Methods Synergistically Promote the Synchronization of Somatic Embryogenesis Through Suspension Culture in the New Hybrid Between *Pinus elliottii* and *Pinus caribaea*.

Perinatal Dioxin Exposure and Attention Deficit Hyperactivity Disorder (ADHD) Symptoms in Children Living in a Dioxin Contamination Hotspot in Vietnam.

Pesticide Exposure and Risk of Rheumatoid Arthritis: A Systematic Review and Meta-Analysis.

Cytotoxic effects of Roundup Classic and its components on NE-4C and MC3T3-E1 cell lines determined by biochemical and flow cytometric assays.

[A case of occupational allyl alcohol inhalation poisoning].

Effects of Montelukast on Arsenic-Induced Epithelial-Mesenchymal Transition and the Role of Reactive Oxygen Species Production in Human Bronchial Epithelial Cells.

Suicide and Suicide Attempts Among Patients Attending Primary Health Care Facilities in Uganda: A Medical Records Review.

Environmental induced transgenerational inheritance impacts systems epigenetics in disease etiology.

Residential proximity to crops and agricultural pesticide use and cause-specific mortality: A prospective census-based cohort study in the Netherlands.

The bZIP Ap1 transcription factor is a negative regulator of virulence attributes of the anthropophilic dermatophyte *Trichophyton rubrum*.

Citrullus colocynthis Seed Ameliorates Layer Performance and Immune Response under Acute Oxidative Stress Induced by Paraquat Injection.

A retrospective analysis of honey bee (*Apis mellifera*) pesticide toxicity data.

Atrazine and Diuron Effects on Survival, Embryo Development, and Behavior in Larvae and Adult Zebrafish.

Agent Orange Reviewed: Potential Role in Peripheral Neuropathy and Neurodegeneration.

Paraquat Induces Lung Injury via miR-199-Mediated SET in a Mouse Model.

Thunbergia laurifolia aqueous leaf extract ameliorates paraquat-induced kidney injury by regulating NADPH oxidase in rats.

Kidney and lung injury in rats following acute diquat exposure.

JAK2/STAT3 pathway regulates microglia polarization involved in hippocampal inflammatory damage due to acute paraquat exposure.

Somatic embryogenesis from flower tepals of *Hippeastrum* aiming regeneration of virus-free plants.

Diquat Poisoning: Care Management and Medico-Legal Implications.

Sodium arsenite accelerates D-galactose-induced aging in the testis of the rat: Evidence for mitochondrial oxidative damage, NF- κ B, JNK, and apoptosis pathways.

Efficacy and economics evaluation of seed rhizome treatment combined with preplant soil fumigation on ginger soilborne disease, plant growth, and yield promotion.

Insight in Hypoxia-Mimetic Agents as Potential Tools for Mesenchymal Stem Cell Priming in Regenerative Medicine.

Antifungal Volatile Organic Compounds from *Streptomyces setonii* WY228 Control Black Spot Disease of Sweet Potato.

Effects of sequential blood purification on the organ function and lethality in patients with paraquat-induced multiple organ dysfunction syndrome.

A Critical Review of Zebrafish Models of Parkinson's Disease.

NMR Spectroscopy Identifies Chemicals in Cigarette Smoke Condensate That Impair Skeletal Muscle Mitochondrial Function.

Low-toxic herbicides Roundup and Atrazine disturb free radical processes in Daphnia in environmentally relevant concentrations.

Paraquat modulates immunological function in bone marrow-derived macrophages.

Is the Use of Glyphosate in Modern Agriculture Resulting in Increased Neuropsychiatric Conditions Through Modulation of the Gut-brain-microbiome Axis?

Disulfiram Produces Potent Anxiolytic-Like Effects Without Benzodiazepine Anxiolytics-Related Adverse Effects in Mice.

Genome-wide alteration of histone methylation profiles associated with cognitive changes in response to developmental arsenic exposure in mice.

More than Meets the Eye: The Aryl Hydrocarbon Receptor is an Environmental Sensor, Physiological Regulator and a Therapeutic Target in Ocular Disease.

Metabolic profiling of serum and urine in lactating dairy cows affected by subclinical ketosis using proton nuclear magnetic resonance spectroscopy.

Lead acetate versus cadmium sulfate in the modulation of main physiological pathways controlling detrusor muscle contractility in rat.

Significant Correlations between p-Cresol Sulfate and Mycophenolic Acid Plasma Concentrations in Adult Kidney Transplant Recipients.

Gestational and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin primes cortical microglia to tissue injury.

Distinguish oral-source VOCs and control their potential impact on breath biomarkers.

Concentrations and Toxic Implications of Dioxin-Like Polychlorinated Biphenyls in Soil Samples from Electrical Power Stations in Lagos, Nigeria.

Exploring breath biomarkers in BLM-induced pulmonary fibrosis mice with associative ionization time-of-flight mass spectrometry.

Method development, validation, monitoring, seasonal effect and risk assessment of multiclass multi pesticide residues in surface and ground water of new alluvial zone in eastern India.

Effects of the L-tyrosine-derived bacterial metabolite p-cresol on colonic and peripheral cells.

Plant-Derived Molecule 4-Methylumbelliferone Suppresses Fc ϵ RI-Mediated Mast Cell Activation and Allergic Inflammation.

The Toxic Influence of Excess Free Iron on Red Blood Cells in the Biophysical Experiment: An In Vitro Study.

Role of ACSL4 in the chemical-induced cell death in human proximal tubule epithelial HK-2 cells.

Glyphosate induces immune dysregulation in honey bees.

Î±-Tocopherol Prevents Sperm Apoptosis and Necrosis in Rats Exposed to 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Assessment of Selected Morphological, Physical and Chemical Parameters of the Teeth of the Offspring of Female Rats Exposed to 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD), Taking into Account the Protective Role of Selected Antioxidants-Preliminary Study.

Pharmacological Inhibition of Spermine Oxidase Suppresses Excitotoxicity Induced Neuroinflammation in Mouse Retina.

Inhibitory effect of individual and mixtures of nitrophenols on anaerobic toxicity assay of anaerobic systems: Metabolism and evaluation modeling.

Diet and food type affect urinary pesticide residue excretion profiles in healthy individuals: results of a randomized controlled dietary intervention trial.

Effect of prooxidants and chelator Desferal on the oxidative status and sperm motility of Muscovy semen.

Extranodal Diffuse Large B-Cell Lymphoma of Bone and Soft Tissue Presenting With Marked Lymphedema and Hypercalcemia.

Uncommon manifestation of poisoning with a mixture of pesticides.

Aclonifen induces bovine mammary gland epithelial cell death by disrupting calcium homeostasis and inducing ROS production.

Correlations of gestational hemoglobin level, placental trace elements content, and reproductive performances in pregnant sows.

Altered transsulfuration pathway enzymes and redox homeostasis in inherited retinal degenerative diseases.

SOD1 mutations cause hypersensitivity to high-pressure-induced oxidative stress in *Saccharomyces cerevisiae*.

Health risks of sulfentrazone exposure during zebrafish embryo-larvae development at environmental concentration.

Identifying potential thyroid hormone disrupting effects among diphenyl ether structure pesticides and their metabolites in silico.

Agricultural contaminants in amphibian breeding ponds: Occurrence, risk and correlation with agricultural land use.

Liver-specific decrease in Tff3 gene expression in infant mice perinatally exposed to 2,3,7,8-tetrabromodibenzofuran or 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Probiotic Bacillus Alleviates Oxidative Stress-Induced Liver Injury by Modulating Gut-Liver Axis in a Rat Model.

6-Formylindolo[3,2-b]carbazole, a Potent Ligand for the Aryl Hydrocarbon Receptor Produced Both Endogenously and by Microorganisms, can Either Promote or Restrain Inflammatory Responses.

Why Do High-Risk Patients Develop or Not Develop Coronary Artery Disease? Metabolic Insights from the CAPIRE Study.

Ellagic Acid Alleviates Oxidative Stress by Mediating Nrf2 Signaling Pathways and Protects against Paraquat-Induced Intestinal Injury in Piglets.

Rare co-inherited alpha-thalassemia minor and beta-thalassemia minor with heterozygous H63D mutation mistaken as iron deficiency anemia: a case report.

Calycosin Alleviates Paraquat-Induced Neurodegeneration by Improving Mitochondrial Functions and Regulating Autophagy in a Drosophila Model of Parkinson's Disease.

Alkaline Diuresis as Treatment for 2,4-D Dimethylamine Herbicide Intoxication.

Retraction Note: Carvacrol and PPAR β agonist, pioglitazone, affects inhaled paraquat-induced lung injury in rats.

Glyphosate vs. Glyphosate-Based Herbicides Exposure: A Review on Their Toxicity.

Oxyfluorfen induces hepatotoxicity through lipo-sugar accumulation and inflammation in zebrafish (*Danio rerio*).

Simazine perturbs the maturational competency of mouse oocyte through inducing oxidative stress and DNA damage.

Two genomic regions of a sodium azide induced rice mutant confer broad-spectrum and durable resistance to blast disease.

TCDD Inhibition of IgG1 Production in Experimental Autoimmune Encephalomyelitis (EAE) and In Vitro.

Arctigenin attenuates paraquat-induced human lung epithelial A549 cell injury by suppressing ROS/p38 mitogen-activated protein kinases-mediated apoptosis.

Serial blood concentration of polyethoxylated tallow amine and clinical presentations in acute herbicide poisoning.

Gut neurotoxin p-cresol induces brain-derived neurotrophic factor secretion and increases the expression of neurofilament subunits in PC-12 cells.

Paraquat poisoning with spontaneous pneumothorax in the era of online shopping.

Temporal Modulation of Differential Alternative Splicing in HaCaT Human Keratinocyte Cell Line Chronically Exposed to Arsenic for up to 28 Wk.

A direct and simple immobilization route for immunosensors by CNBr activation for covalent attachment of anti-leptin: obesity diagnosis point of view.

Isatis phytoegenic relieved atrazine induced growth retardation, hepato-renal dysfunction, and oxidative stress in Nile tilapia.

Cytoprotective effect of taurine against sodium chlorate-induced oxidative damage in human red blood cells: an ex vivo study.

5-Aminosalicylic Acid, A Weak Agonist for Aryl Hydrocarbon Receptor That Induces Splenic Regulatory T Cells.

Identification of known and novel nonpolar endocrine disruptors in human amniotic fluid.

Effects of glufosinate-ammonium on male reproductive health: Focus on epigenome and transcriptome in mouse sperm.

Sprays and diffusers as indoor air fresheners: Exposure and health risk assessment based on measurements under realistic indoor conditions.

Exposome of attention deficit hyperactivity disorder in Taiwanese children: exploring risks of endocrine-disrupting chemicals.

Soybean isoflavones protect SH-SY5Y neurons from atrazine-induced toxicity by activating mitophagy through stimulation of the BEX2/BNIP3/NIX pathway.

Generational effects of a chronic exposure to a low environmentally relevant concentration of glyphosate on rainbow trout, *Oncorhynchus mykiss*.

Naringenin alleviates paraquat-induced dopaminergic neuronal loss in SH-SY5Y cells and a rat model of Parkinson's disease.

Alterations in small RNA profiles in liver following a subchronic exposure to a low-dose pesticide mixture in Sprague-Dawley rats.

Salicylic Acid Acts Antagonistically to Plastid Retrograde Signaling by Promoting the Accumulation of Photosynthesis-associated Proteins in Arabidopsis.

Repeated Low-Dose Acrolein Triggers Irreversible Lamina Propria Edema in Urinary Bladder, Transient Voiding Behavior and Widening of Eyes to Mechanical Stimuli.

Chaperon-mediated autophagy can regulate diquat-induced apoptosis by inhibiting α -synuclein accumulation cooperatively with macroautophagy.

Toxicity effect of Diuron on gill tissue structure and the tissue residue of blood cockles (*Tegillarca granosa*).

Lung inflammation from repeated exposure to LPS and glyphosate.

Application of the health risk assessment of acetochlor in the development of water quality criteria.

LncRNA MIAT Inhibits MPP(+)-Induced Neuronal Damage Through Regulating the miR-132/SIRT1 Axis in PC12 Cells.

Long Noncoding RNA NEAT1 Knockdown Ameliorates 1-Methyl-4-Phenylpyridine-Induced Cell Injury Through MicroRNA-519a-3p/SP1 Axis in Parkinson Disease.

Effects of chronic prometryn exposure on antioxidative status, intestinal morphology, and microbiota in sea cucumber (*Apostichopus japonicus*).

A novel flowchart to predict mortality and analyse effectiveness of routinely used pharmacological regimens in paraquat poisoning.

Elevated pulmonary levels of Axin2 in mice exposed to herbicide 2,4-D with or without endotoxin.

First evaluation of the periphyton recovery after glyphosate exposure.

Berberine Attenuates MPP(+)-Induced Neuronal Injury by Regulating LINC00943/miR-142-5p/KPNA4/NF- κ B Pathway in SK-N-SH Cells.

Paraquat-induced oxidative stress regulates N6-methyladenosine (m(6)A) modification of circular RNAs.

Assessment of glufosinate-containing herbicide exposure: A multi-center retrospective study.

Bioaccumulation of current-use herbicides in fish from a global biodiversity hotspot: Lake St Lucia, South Africa.

A subchronic low-dose exposure of a glyphosate-based herbicide induces depressive and anxious-like behavior in mice: quercetin therapeutic approach.

Acute exposition to Roundup Transorb[®] induces systemic oxidative stress and alterations in the expression of newly sequenced genes in silverside fish (*Odontesthes humensis*).

Thoracic radiographic features of fatal paraquat intoxication in eleven dogs.

Inflammatory, Oxidative Stress, and Apoptosis Effects in Zebrafish Larvae after Rapid Exposure to a Commercial Glyphosate Formulation.

Atrazine Inhalation Worsen Pulmonary Fibrosis Regulating the Nuclear Factor-Erythroid 2-Related Factor (Nrf2) Pathways Inducing Brain Comorbidities.

Vitamin D(3) Protects Mice from Diquat-Induced Oxidative Stress through the NF- κ B/Nrf2/HO-1 Signaling Pathway.

Evaluation of the genotoxic, mutagenic, and histopathological hepatic effects of polyoxyethylene amine (POEA) and glyphosate on *Dendropsophus minutus* tadpoles.

Thioredoxin-1 mediates neuroprotection of Schisanhenol against MPP(+)-induced apoptosis via suppression of ASK1-P38-NF- κ B pathway in SH-SY5Y cells.

Quinoxaline derivatives as herbicide safeners by improving *Zea mays* tolerance.

Whole-body bioconcentration and biochemical and morphological responses of gills of the neotropical fish *Prochilodus lineatus* exposed to 2,4-dichlorophenoxyacetic acid or fipronil individually or in a mixture.

Exposure to Atrazine through gestation and lactation period led to impaired sexual maturation and subfertility in F1 male rats with congenital deformities in F2 progeny.

Atrazine intoxication in cattle, confirmed by gas chromatography-mass spectrometry.

Bacopaside-I Alleviates the Detrimental Effects of Acute Paraquat Intoxication in the Adult Zebrafish Brain.

Efficacy of an organically modified bentonite to adsorb 2,4-dichlorophenoxyacetic acid (2,4-D) and prevent its phytotoxicity.

Alterations in blood parameters, DNA damage, oxidative stress and antioxidant enzymes and immune-related genes expression in Nile tilapia (*Oreochromis niloticus*) exposed to glyphosate-based herbicide.

The effect of atrazine on intestinal histology, microbial community and short chain fatty acids in *Pelophylax nigromaculatus* tadpoles.

Conjugated linoleic acid protects brain mitochondrial function in acrolein induced male rats.

Bidirectional role of reactive oxygen species during inflammasome activation in acrolein-induced human EAhy926 cells pyroptosis.

Subchronic exposure to a glyphosate-based herbicide causes dysplasia in the digestive tract of Wistar rats.

Herbicide atrazine exposure induce oxidative stress, immune dysfunction and WSSV proliferation in red swamp crayfish *Procambarus clarkii*.

Exposure to the herbicide butachlor activates hepatic stress signals and disturbs lipid metabolism in mice.

Recovery trend to co-exposure of iron oxide nanoparticles (Fe_3O_4) and glyphosate in liver tissue of the fish *Poecilia reticulata*.

Chronic Exposure to Paraquat Induces Alpha-Synuclein Pathogenic Modifications in *Drosophila*.

Toxicological Parameters of a Formulation Containing Cinnamaldehyde for Use in Treatment of Oral Fungal Infections: An In Vivo Study.

Farmers' Knowledge, Attitudes, and Perceptions Regarding Carcinogenic Pesticides in Fez Meknes Region (Morocco).

Paraquat promotes acute lung injury in rats by regulating alveolar macrophage polarization through glycolysis.

Sex-dependent acrolein sensitivity in mice is associated with differential lung cell, protein, and transcript changes.

Functional roles of polyamines and their metabolite acrolein in eukaryotic cells.

Pectin/chitosan/tripolyphosphate encapsulation protects the rat lung from fibrosis and apoptosis induced by paraquat inhalation.

Negative impacts of microcystin-LR and glyphosate on zebrafish intestine: Linked with gut microbiota and microRNAs?

Effects of co-formulants on the absorption and secretion of active substances in plant protection products in vitro.

Activation of Nrf2 by methylene blue is associated with the neuroprotection against MPP(+) induced toxicity via ameliorating oxidative stress and mitochondrial dysfunction.

Melatonin Increases Life Span, Restores the Locomotor Activity, and Reduces Lipid Peroxidation (LPO) in Transgenic Knockdown Parkin *Drosophila melanogaster* Exposed to Paraquat or Paraquat/Iron.

Widespread agrochemicals differentially affect zooplankton biomass and community structure.

Short exposure to glyphosate induces locomotor, craniofacial, and bone disorders in zebrafish (*Danio rerio*) embryos.

Toxicity of 2-methyl-4-chlorophenoxy acetic acid alone and in combination with cyhalofop-butyl to *Cyprinus carpio* embryos.

Prenatal exposure to organophosphate and pyrethroid insecticides and the herbicide 2,4-dichlorophenoxyacetic acid and size at birth in urban pregnant women.

Global transcriptome profiling reveals antagonizing response of head kidney of juvenile common carp exposed to glyphosate.

Investigating the Effects of Pesticides on Ramshorn Snails (*Planorbella* [*Helisoma*] *trivolvis*) Infected with *Echinostoma* spp.

Exposure to 2,4-D herbicide induces hepatotoxicity in zebrafish larvae.

Co-formulants and adjuvants affect the acute aquatic and terrestrial toxicity of a cycloxydim herbicide formulation to European common frogs (*Rana temporaria*).

Improving pollutants environmental risk assessment using a multi model toxicity determination with in vitro, bacterial, animal and plant model systems: The case of the herbicide alachlor.

Whose Jurisdiction Is Home Contamination? Para-Occupational 'Take-Home' Herbicide Residue Exposure Risks among Forestry Workers' Families in South Africa.

Chemical Burns from Secondary Exposure to Paraquat Through Mishandling Urine of a Patient with Toxic Exposure.

Impaired mammalian sperm function and lower phosphorylation signaling caused by the herbicide Roundup® Ultra Plus are due to its surfactant component.

Neuroprotective Effect of 1,4-Naphthoquinones in an In Vitro Model of Paraquat and 6-OHDA-Induced Neurotoxicity.

Paraquat-induced cholesterol biosynthesis proteins dysregulation in human brain microvascular endothelial cells.

Epigenome-Wide DNA Methylation and Pesticide Use in the Agricultural Lung Health Study.

Perinatal exposure to a glyphosate-based herbicide causes dysregulation of dynorphins and an increase of neural precursor cells in the brain of adult male rats.

Does paraquat cause Parkinson's disease? A review of reviews.

Transient glyphosate encephalopathy due to a suicide attempt.

Increased Temperature Influenced Growth and Development of *Lithobates pipiens* Tadpoles Exposed to Leachates of the Invasive Plant European Buckthorn (*Rhamnus cathartica*) and a Triclopyr Herbicide.

CD34+ derived macrophage and dendritic cells display differential responses to paraquat.

Prolonged exposure to the herbicide atrazine suppresses immune cell functions by inducing spleen cell apoptosis in rats.

Systemic inflammation and oxidative stress induced by inhaled paraquat in rat improved by carvacrol, possible role of PPAR α receptors.

Glyphosate exposure attenuates testosterone synthesis via NR1D1 inhibition of StAR expression in mouse Leydig cells.

In vivo toxicological assessment of diquat dibromide: cytotoxic, genotoxic, and biochemical approach.

Glyphosate and Polyoxyethyleneamine Ingestion Leading to Renal, Hepatic, and Pulmonary Failure.

The effect of *Zataria multiflora* hydroalcoholic extract on memory and lung changes induced by rats that inhaled paraquat.

Immunological and metabolic effects of acute sublethal exposure to glyphosate or glyphosate-based herbicides on juvenile rainbow trout, *Oncorhynchus mykiss*.

Silicon Improves the Redox Homeostasis to Alleviate Glyphosate Toxicity in Tomato Plants-Are Nanomaterials Relevant?

Multi-generational exposure to fipronil, 2,4-D, and their mixtures in *Chironomus sancticarloi*: Biochemical, individual, and population endpoints.

Neuroprotection against 1-Methyl-4-phenylpyridinium-induced cytotoxicity by naturally occurring polydatin through activation of transcription factor MEF2D.

Fragment Recombination Design, Synthesis, and Safener Activity of Novel Ester-Substituted Pyrazole Derivatives.

Subchronic impacts of 2,4-D herbicide Weedestroy[®]AM40 on associative learning in juvenile yellow perch (*Perca flavescens*).

Developmental effect of parental or direct chronic exposure to environmental concentration of glyphosate on the larvae of rainbow trout, *Oncorhynchus mykiss*.

Evaluation of atrazine neurodevelopment toxicity in vitro-application of hESC-based neural differentiation model.

Roles of Bak and Sirt3 in Paraquat-Induced Cochlear Hair Cell Damage.

Toxicological status changes the susceptibility of the honey bee *Apis mellifera* to a single fungicidal spray application.

Pulmonary inflammatory response from co-exposure to LPS and glyphosate.

Ameliorative effect of N-acetylcysteine against glyphosate-induced hepatotoxicity in adult male albino rats: histopathological, biochemical, and molecular studies.

Atrazine Inhalation Causes Neuroinflammation, Apoptosis and Accelerating Brain Aging.

Influence of Herbicide Exposure and Ranavirus Infection on Growth and Survival of Juvenile Red-Eared Slider Turtles (*Trachemys scripta elegans*).

Assessment of the risk of death of *Clarias gariepinus* and *Oreochromis niloticus* pulse-exposed to selected agricultural pesticides.

User-safe and efficient chitosan-gated porous carbon nanopesticides and nanoherbicides.

Overexpression of TOLLIP Protects against Acute Kidney Injury after Paraquat Intoxication through Inhibiting NLRP3 Inflammasome Activation Modulated by Toll-Like Receptor 2/4 Signaling.

New Target in an Old Enemy: Herbicide (R)-Dichlorprop Induces Ferroptosis-like Death in Plants.

Phytotoxicity of *Schiekia timida* Seed Extracts, a Mixture of Phenylphenalenones.

Low-Dose Acrolein, an Endogenous and Exogenous Toxic Molecule, Inhibits Glucose Transport via an Inhibition of Akt-Regulated GLUT4 Signaling in Skeletal Muscle Cells.

N-acetylcysteine is more effective than ellagic acid in preventing acrolein induced dysfunction in mitochondria isolated from rat liver.

Paraquat induces redox imbalance and disrupts glutamate and energy metabolism in the hippocampus of prepubertal rats.

Proteome of *Saccharomyces cerevisiae* under paraquat stress regulated by therapeutic concentration of copper ions.

Exposure to multiple pesticides and neurobehavioral outcomes among smallholder farmers in Uganda.

Morphological, behavioral and genotoxic effects of glyphosate and 2,4-D mixture in tadpoles of two native species of South American amphibians.

Toxicity of fipronil and 2,4-D formulations (alone and in a mixture) to the tropical amphipod *Hyaella meinerti*.

Toxic effects of atrazine on immune function in BALB/c mice.

Meta-analysis and experimental validation identified atrazine as a toxicant in the male reproductive system.

Assessment of oxidative DNA damage, oxidative stress responses and histopathological alterations in gill and liver tissues of *Oncorhynchus mykiss* treated with linuron.

Glucocorticoid with cyclophosphamide for oral paraquat poisoning.

Unravelling Phytotoxicity and Mode of Action of Tripyrasulfone, a Novel Herbicide.

Inflammatory state and autism-like behavioral phenotype of offspring induced by maternal exposure to low-dose chemical mixtures during pregnancy in mice.

Possible effects of agent orange and posttraumatic stress disorder on hyperglycemia in Korean veterans from the US-Vietnam war.

Exposure to glyphosate and risk of non-Hodgkin lymphoma: an updated meta-analysis.

Perinatal exposure to low doses of glyphosate-based herbicide combined with a high-fat diet in adulthood causes changes in the jejunums of mice.

Acrolein-conjugated proteomics in brains of adult C57BL/6 mice chronically exposed to acrolein and aged APP/PS1 transgenic AD mice.

Neuroprotective effect of selumetinib on acrolein-induced neurotoxicity.

AQP2 as a target of lycopene protects against atrazine-induced renal ionic homeostasis disturbance.

Physiological and metagenomic strategies uncover the rhizosphere bacterial microbiome succession underlying three common environmental stresses in cassava.

Can the exposure system adopted influence the results of the atrazine toxicity in hepatic tissue of fish?

Isorhynchophylline ameliorates paraquat-induced acute kidney injury by attenuating oxidative stress and mitochondrial damage via regulating toll-interacting expression.

Glyphosate exposure induces synaptic impairment in hippocampal neurons and cognitive deficits in developing rats.

Ground-glass hepatocellular inclusions are associated with polypharmacy.

Fluorofenidone attenuates paraquat-induced pulmonary fibrosis by regulating the PI3K/Akt/mTOR signaling pathway and autophagy.

Neurotoxin-Induced Rodent Models of Parkinson's Disease: Benefits and Drawbacks.

Atrazine-induced cell-mediated immunotoxicity in rabbits and the ameliorating role of glycyrrhizic acid.

Synergy between glyphosate and cypermethrin formulations on zooplankton: evidences from a single-specie test and a community mesocosm experiment.

The hepatotoxicity of atrazine exposure in mice involves the intestinal microbiota.

Prognostic value of liver and kidney function parameters and their correlation with the ratio of urine-to-plasma paraquat in patients with paraquat poisoning.

Embryonic atrazine exposure and later in life behavioral and brain transcriptomic, epigenetic, and pathological alterations in adult male zebrafish.

Temperature and Aging Affect Glyphosate Toxicity and Fatty Acid Composition in *Allonychiurus kimi* (Lee) (Collembola).

The effects of carbon monoxide releasing molecules on paraquat-induced pulmonary interstitial inflammation and fibrosis.

Micronucleus Formation Induced by Glyphosate and Glyphosate-Based Herbicides in Human Peripheral White Blood Cells.

Epigenetic Changes Associated With Exposure to Glyphosate-Based Herbicides in Mammals.

Atrazine impairs testicular function in BalB/c mice by affecting Leydig cells.

Agrochemical pesticide production, trade, and hazard: Narrowing the information gap in Colombia.

Analysis of Biomechanical Parameters of Muscle Soleus Contraction and Blood Biochemical Parameters in Rat with Chronic Glyphosate Intoxication and Therapeutic Use of C(60) Fullerene.

Pendimethalin-based herbicide impairs cellular immune response and haemocyte morphology in a beneficial ground beetle.

Use of nontarget organism *Chironomus sancticarloi* to study the toxic effects of nanoatrazine.

Lipoxin A4 protects against paraquat-induced acute lung injury by inhibiting the TLR4/MyD88-mediated activation of the NF- κ B and PI3K/AKT pathways.

Growth performance and reproductive function impairment of glyphosate-based herbicide in male guinea pig (*Cavia porcellus*).

Evaluation of the hepatoprotective effects of curcumin and nanocurcumin against paraquat-induced liver injury in rats: Modulation of oxidative stress and Nrf2 pathway.

Chronic ciprofloxacin and atrazine co-exposure aggravates locomotor and exploratory deficits in non-target detritivore speckled cockroach (*Nauphoeta cinerea*).

Physiological and morphoanatomical effects of glyphosate in *Eugenia uniflora*, a Brazilian plant species native to the Atlantic Forest biome.

Toxicological parameters of aqueous residue after using *Plectranthus neochilus* for 2,4-D phytoremediation.

Suppression of tau-induced phenotypes by vitamin E demonstrates the dissociation of oxidative stress and phosphorylation in mechanisms of tau toxicity.

The effects of the herbicides terbutylazine and metazachlor at environmental concentration on the burrowing behaviour of red swamp crayfish.

Urinary microRNAs as non-invasive biomarkers for toxic acute kidney injury in humans.

HFE H63D Limits Nigral Vulnerability to Paraquat in Agricultural Workers.

Fluorochloridone induces autophagy in TM4 Sertoli cells: involvement of ROS-mediated AKT-mTOR signaling pathway.

Reproductive activation in honeybee (*Apis mellifera*) workers protects against abiotic and biotic stress.

[The mechanism of HDAC6 in paraquat-induced autophagy dysfunction of dopaminergic neurons by mediating aggresome-autophagy-lysosomal pathway].

Sea Cucumber-Derived Peptides Alleviate Oxidative Stress in Neuroblastoma Cells and Improve Survival in *C. elegans* Exposed to Neurotoxic Paraquat.

Aspirin eugenol ester ameliorates paraquat-induced oxidative damage through ROS/p38-MAPK-mediated mitochondrial apoptosis pathway.

Multi-omics phenotyping of the gut-liver axis reveals metabolic perturbations from a low-dose pesticide mixture in rats.

Carvacrol and PPAR α agonist, pioglitazone, affects inhaled paraquat-induced lung injury in rats.

Applied pesticide toxicity shifts toward plants and invertebrates, even in GM crops.

Hemodynamic and electromechanical effects of paraquat in rat heart.

Resting egg banks can facilitate recovery of zooplankton communities after short exposure to glyphosate.

Cardiovascular damage associated with subchronic exposure to the glyphosate herbicide in Wistar rats.

Paraquat herbicide diminishes chemoreflex sensitivity, induces cardiac autonomic imbalance and impair cardiac function in rats.

Melatonin rescues the reproductive toxicity of low-dose glyphosate-based herbicide during mouse oocyte maturation via the GPER signaling pathway.

Agent Orange Exposure and Dementia Diagnosis in US Veterans of the Vietnam Era.

Carcinogenicity and chronic toxicity of acrolein in rats and mice by two-year inhalation study.

Characterizing the protracted neurobiological and neuroanatomical effects of paraquat in a murine model of Parkinson's disease.

Glutathione is a potential therapeutic target for acrolein toxicity in the cornea.

Mitochondrial biochemical and histopathological defects induced by the herbicide pendimethalin in tilapia fish (*Oreochromis niloticus*).

Multigenerational Toxic Effects on *Daphnia magna* Induced by Silver Nanoparticles and Glyphosate Mixture.

A novel idea for establishing Parkinson's disease mouse model by intranasal administration of paraquat.

Pneumoperitoneum from pneumomediastinum in paraquat poisoning.

Modulation of BAG3 expression in human normal urothelial cells by Diuron.

Specific collagens maintain the cuticle permeability barrier in *Caenorhabditis elegans*.

Protection by rhynchophylline against MPTP/MPP(+)-induced neurotoxicity via regulating PI3K/Akt pathway.

Occupational Paraquat and Glyphosate Exposure May Decline Renal Functions among Rural Farming Communities in Sri Lanka.

Developmental toxicity and transcriptome analysis of zebrafish (*Danio rerio*) embryos following exposure to chiral herbicide safener benoxacor.

Could Glyphosate and Glyphosate-Based Herbicides Be Associated With Increased Thyroid Diseases Worldwide?

Chemical composition and phytotoxicity of essential oil from invasive plant, *Ambrosia artemisiifolia* L.

Clinical study and observation on the effect of hemoperfusion therapy treatment on central nervous system injury in patients with 2,4-dichlorophenoxyacetic acid poisoning.

2,4-Dichlorophenoxyacetic acid induced hepatic and renal toxicological perturbations in rat model: Attenuation by selenium supplementation.

A case of fatal intoxication by ingestion of an herbicide formulation containing fluroxypyr-meptyl and triclopyr.

Dietary squalene supplementation alleviates diquat-induced oxidative stress and liver damage of broiler chickens.

Drp1-mediated mitochondrial fission contributes to mitophagy in paraquat-induced neuronal cell damage.

Simultaneous determination of paraquat and diquat in human plasma by HPLC-DAD: Its application in acute poisoning patients induced by these two herbicides.

The herbicide dinitramine affects the proliferation of murine testicular cells via endoplasmic reticulum stress-induced calcium dysregulation.

Evaluation of the potential teratogenic and toxic effect of the herbicide 2,4-D (DMA[®] 806) in bullfrog embryos and tadpoles (*Lithobates catesbeianus*).

Reproductive toxicity of Roundup WG[®] herbicide: impairments in ovarian follicles of model organism *Danio rerio*.

Water contamination with atrazine: is nitric oxide able to improve *Pistia stratiotes* phytoremediation capacity?

Paraquat Inhalation, a Translationally Relevant Route of Exposure: Disposition to the Brain and Male-Specific Olfactory Impairment in Mice.

SOX21-AS1 modulates neuronal injury of MMP(+)-treated SH-SY5Y cells via targeting miR-7-5p and inhibiting IRS2.

Pre-differentiation exposure to low-dose of atrazine results in persistent phenotypic changes in human neuronal cell lines.

Drift, dissipation and risk to wildlife following targeted herbicide applications on boreal transmission rights-of-way.

PET nanoplastics interactions with water contaminants and their impact on human cells.

Effects of glyphosate residues and different concentrate feed proportions in dairy cow rations on hepatic gene expression, liver histology and biochemical blood parameters.

Chronic toxicity of technical atrazine to the fathead minnow (*Pimephales promelas*) during a full life-cycle exposure and an evaluation of the consistency of responses.

GardeninA confers neuroprotection against environmental toxin in a *Drosophila* model of Parkinson's disease.

Low-dose exposure of glyphosate-based herbicides disrupt the urine metabolome and its interaction with gut microbiota.

Development and Validation of a Radiomics Nomogram for Prognosis Prediction of Patients with Acute Paraquat Poisoning: A Retrospective Cohort Study.

A Phosphonate Natural Product Made by *Pantoea ananatis* is Necessary and Sufficient for the Hallmark Lesions of Onion Center Rot.

Hepatotoxic Effects of Atrazine on *Clarias gariepinus* (Burchell, 1822): Biochemical and Histopathological Studies.

Huang Lian Jie Du Tang attenuates paraquat-induced mitophagy in human SH-SY5Y cells: A traditional decoction with a novel therapeutic potential in treating Parkinson's disease.

Aqueous chlorination of herbicide metribuzin: Identification and elucidation of "new" disinfection by-products, degradation pathway and toxicity evaluation.

The use of combined high-fructose diet and glyphosate to model rats type 2 diabetes symptomatology.

Genotoxic and epigenetic effects of diuron in the Pacific oyster: in vitro evidence of interaction between DNA damage and DNA methylation.

Characterization, genome functional analysis, and detoxification of atrazine by *Arthrobacter* sp. C2.

A single gene inherited trait confers metabolic resistance to chlorsulfuron in grain sorghum (*Sorghum bicolor*).

Evaluation on reprogramed biological processes in transgenic maize varieties using transcriptomics and metabolomics.

A Two-in-One Strategy: Target and Nontarget Site Mechanisms Both Play Important Role in IMI-Resistant Weedy Rice.

Modeling paraquat-induced lung fibrosis in *C. elegans* reveals KRIT1 as a key regulator of collagen gene transcription.

LncRNA XIST sponges miR-199a-3p to modulate the Sp1/LRRK2 signal pathway to accelerate Parkinson's disease progression.

The effect of chronic exposure to chloridazon and its degradation product chloridazon-desphenyl on signal crayfish *Pacifastacus leniusculus*.

The agrochemical S-metolachlor disrupts molecular mediators and morphology of the swim bladder: Implications for locomotor activity in zebrafish (*Danio rerio*).

Effects of subchronic exposure to environmentally relevant concentrations of the herbicide atrazine in the Neotropical fish *Astyanax altiparanae*.

Paraquat exposure over generation affects lifespan and reproduction through mitochondrial disruption in *C. elegans*.

Melatonin alleviates the deterioration of oocytes and hormonal disorders from mice subjected to glyphosate.

Inflammatory lncRNA AK039862 regulates paraquat-inhibited proliferation and migration of microglial and neuronal cells through the Pafah1b1/Foxa1 pathway in co-culture environments.

Design, Synthesis, and SAR of Novel 1,3-Disubstituted Imidazolidine or Hexahydropyrimidine Derivatives as Herbicide Safeners.

Additional observations regarding glyphosate-based herbicides and developmental toxicity.

Reply to Reeves and Dunn: Risk for autism in offspring after maternal glyphosate exposure.

A novel simple risk model to predict the prognosis of patients with paraquat poisoning.

Interaction between pesticides applied alone or in mixtures in corn.

Tank mixture of glyphosate and 2,4-D applied on RR[®] maize crop.

Cholemic Nephrosis: An Autopsy Study of a Forgotten Entity.

Neurotoxicity associated with chronic exposure to dichlorophenoxyacetic acid (2,4-D) - a simulation of environmental exposure in adult rats.

Ecotoxicology of Glyphosate, Its Formulants, and Environmental Degradation Products.

Glyphosate poisoning - a case report.

Growth regulation of bermudagrass (*Cynodon dactylon*) and zoysiagrass (*Zoysia japonica*) with glyphosate.

The herbicide paraquat-induced molecular mechanisms in the development of acute lung injury and lung fibrosis.

The protective function of taurine on pesticide-induced permanent neurodevelopmental toxicity in juvenile rats.

RNA-Seq transcriptome analysis to identify candidate genes involved in non-target site-based mesosulfuron-methyl resistance in *Beckmannia syzigachne*.

Picolinafen exerts developmental toxicity via the suppression of oxidative stress and angiogenesis in zebrafish embryos.

Impact of chronic exposure of rainbow trout, *Oncorhynchus mykiss*, to low doses of glyphosate or glyphosate-based herbicides.

Different effects of an N-phenylimide herbicide on heme biosynthesis between human and rat erythroid cells.

Glyphosate targets fish monoaminergic systems leading to oxidative stress and anxiety.

Genotoxic effects of glyphosate on *Physalaemus* tadpoles.

Risk assessment and acute toxicological effects of atrazine on Nile tilapia larvae after stress.

Changes induced by atrazine in *Clarias gariepinus* provide insight into alterations in ovarian histoarchitecture and direct effects on oogenesis.

Using benchmark dose modeling for the quantitative risk assessment: Carbon nanotubes, asbestos, glyphosate.

Agrochemicals in freshwater systems and their potential as endocrine disrupting chemicals: A South African context.

Exposure of the alga *Pseudokirchneriella subcapitata* to environmentally relevant concentrations of the herbicide metolachlor: Impact on the redox homeostasis.

Effects of chronic glyphosate exposure on antioxidative status, metabolism and immune response in tilapia (GIFT, *Oreochromis niloticus*).

Impacts of subchronic exposure to a commercial 2,4-D herbicide on developmental stages of multiple freshwater fish species.

Fipronil and 2,4-D effects on tropical fish: Could avoidance response be explained by changes in swimming behavior and neurotransmission impairments?

Exposure to paraquat associated with periodontal disease causes motor damage and neurochemical changes in rats.

Protective efficacy of phenoxyacetyl oxazolidine derivatives as safeners against nicosulfuron toxicity in maize.

Resveratrol: Isolation, and Its Nanostructured Lipid Carriers, Inhibits Cell Proliferation, Induces Cell Apoptosis in Certain Human Cell Lines Carcinoma and Exerts Protective Effect Against Paraquat-Induced Hepatotoxicity.

Life-threatening triclopyr poisoning due to diethylene glycol monoethyl ether solvent.

Cinnamaldehyde and eugenol protect against LPS-stimulated oxidative stress and inflammation in Raw 264.7 cells.

Diquat poisoning in a pregnant woman resulting in a miscarriage and maternal death.

Effects of Trans-Cinnamaldehyde on Reperfused Ischemic Skeletal Muscle and the Relationship to Laminin.

Paraquat Poisoning in Children: A 5-Year Review.

Study on the Efficacy and Safety of Ambroxol Combined with Methylprednisolone in Patients with Acute Lung Injury.

Research on the Mechanism of Guizhi to Treat Nephrotic Syndrome Based on Network Pharmacology and Molecular Docking Technology.

Carnosine quenches the reactive carbonyl acrolein in the central nervous system and attenuates autoimmune neuroinflammation.

Differences in epithelial-mesenchymal-transition in paraquat-induced pulmonary fibrosis in BALB/C and BALB/C (nu/nu) nude mice.

Digital image processing: a useful tool in the analysis of lung injuries caused by chronic inhalation of agricultural herbicides.

Evidence of acrolein in synovial fluid of dogs with osteoarthritis as a potential inflammatory biomarker.

Impact of cinnamaldehyde on innate immunity and immune gene expression in *Channa striatus* against *Aphanomyces invadans*.

Inhibition of NLRP3 inflammasome by glibenclamide attenuated dopaminergic neurodegeneration and motor deficits in paraquat and maneb-induced mouse Parkinson's disease model.

Evaluation of prophylactic efficacy of cinnamaldehyde in murine model against *Paradendryphiella arenariae* mycotoxin tenuazonic acid-induced oxidative stress and organ toxicity.

Biofunctional chemistry and reactivity of biogenic acrolein for cancer diagnosis and therapy.

Identification of hub genes and key pathways of paraquat-induced human embryonic pulmonary fibrosis by bioinformatics analysis and in vitro studies.

[Two case reports: chronic obstructive pulmonary disease developed in long term survived patients after acute paraquat poisoning].

Coniferyl aldehyde alleviates LPS-induced WI-38 cell apoptosis and inflammation injury via JAK2-STAT1 pathway in acute pneumonia.

Reduced Acrolein Detoxification in *akr1a1a* Zebrafish Mutants Causes Impaired Insulin Receptor Signaling and Microvascular Alterations.

Cinnamaldehyde inhibits psoriasis-like inflammation by suppressing proliferation and inflammatory response of keratinocytes via inhibition of NF- κ B and JNK signaling pathways.

Neuroprotective Effect of Cinnamaldehyde on Secondary Brain Injury After Traumatic Brain Injury in a Rat Model.

Protective effect of genistein pre-treatment on paraquat hepatotoxicity in rats.

Urinary arsenic and heart disease mortality in NHANES 2003-2014.

The relationship between chronic arsenic exposure and body measures among US adults: National Health and Nutrition Examination Survey 2009-2016.

Monomethylated arsenic was the Major methylated arsenic in Red blood cells of acute promyelocytic leukemia patients treated with arsenic trioxide.

Antibiotics and Imiquimod for Cutaneous T-Cell Lymphoma in Veterans: A Patient Population with Agent Orange Exposure.

Psychosocial impairment following mild blast-induced traumatic brain injury in rats.

Celecoxib promotes survival and upregulates the expression of neuroprotective marker genes in two different in vitro models of Parkinson's disease.

[Clinical research of the differences between hematocrit and serum albumin for evaluating the severity of acute paraquat poisoning].

Association between pesticide exposure and colorectal cancer risk and incidence: A systematic review.

Acrolein Induces Systemic Coagulopathy via Autophagy-dependent Secretion of von Willebrand Factor in Mice after Traumatic Brain Injury.

Evaluation of Multiple Organ Dysfunction Score (MODS) and the Sequential Organ Failure Assessment (SOFA) score as in-hospital outcome predictors among cases of hydrogen cyanamide exposure: a cross-sectional study.

Antimicrobial Resistance Phenotypes and Genotypes of Escherichia coli Isolates from Broiler Chickens Fed Encapsulated Cinnamaldehyde and Citral.

The Stage at Presentation and Oncologic Outcomes for Agent Orange Exposed and Non-Exposed United States Veterans Diagnosed With Prostate Cancer.

Ferritinophagy-Mediated Ferroptosis Involved in Paraquat-Induced Neurotoxicity of Dopaminergic Neurons: Implication for Neurotoxicity in PD.

Novel approaches to circumvent the devastating effects of pests on sugarcane.

High-dose diquat poisoning: a case report.

Cinnamaldehyde Improves Metabolic Functions in Streptozotocin-Induced Diabetic Mice by Regulating Gut Microbiota.

Health-Related Quality of Life and Angina in Fractional Flow Reserve- Versus Angiography-Guided Coronary Artery Bypass Grafting: FARGO Trial (Fractional Flow Reserve Versus Angiography Randomization for Graft Optimization).

Dietary cinnamaldehyde nanoemulsion boosts growth and transcriptomes of antioxidant and immune related genes to fight *Streptococcus agalactiae* infection in Nile tilapia (*Oreochromis niloticus*).

[Four cases of acute diquat poisoning with prominent epileptoid seizure and literature review].

Pilot study on the urinary excretion of the glyphosate metabolite aminomethylphosphonic acid and breast cancer risk: The Multiethnic Cohort study.

Glyphosate inhibits melanization and increases susceptibility to infection in insects.

Reasons for under-reporting of paraquat poisoning in India.

Mechanistic role of antioxidants in rescuing delayed gastric emptying in high fat diet induced diabetic female mice.

Protective effect of lutein against acrolein-induced ototoxicity in rats.

Cinnamaldehyde and hesperetin attenuate TNBS-induced ulcerative colitis in rats through modulation of the JAK2/STAT3/SOCS3 pathway.

Acrolein scavenger dimercaprol offers neuroprotection in an animal model of Parkinson's disease: implication of acrolein and TRPA1.

Neuroprotective effects of pomegranate (*Punica granatum* L.) juice and seed extract in paraquat-induced mouse model of Parkinson's disease.

Inhibition of Lipopolysaccharide-Induced Inflammatory and Oxidative Responses by Trans-cinnamaldehyde in C2C12 Myoblasts.

The Onset of Systemic Oxidative Stress Associated with the Accumulation of Lipid Peroxidation Product Acrolein in the Skin of Patients with Small-Vessel Vasculitis.

Protective Effects of Cinnamaldehyde on the Inflammatory Response, Oxidative Stress, and Apoptosis in Liver of *Salmonella typhimurium*-Challenged Mice.

Esophagitis dissecans superficialis associated with acute transoral paraquat poisoning: Clinical study of 15 cases.

Effect of Fluorofenidone Against Paraquat-Induced Pulmonary Fibrosis Based on Metabolomics and Network Pharmacology.

Application of Acrolein Imines to Organic Synthesis, Biofunctional Studies, and Clinical Practice.

Neuroprotective potential of cinnamon and its metabolites in Parkinson's disease: Mechanistic insights, limitations, and novel therapeutic opportunities.

Corrosive Airway and Esophageal Injury in Paraquat Intoxication.

Effect and Safety of Cinnamaldehyde on Immunosuppressed Mice with Invasive Pulmonary Candidiasis.

[Progress in the study of pulmonary fibrosis signaling pathways caused by paraquat poisoning].

Coniferaldehyde prevents articular cartilage destruction in a murine model via Nrf2/HO-1 pathway.

Cinnamaldehyde mitigates placental vascular dysfunction of gestational diabetes and protects from the associated fetal hypoxia by modulating placental angiogenesis, metabolic activity and oxidative stress.

Taurine improves neuron injuries and cognitive impairment in a mouse Parkinson's disease model through inhibition of microglial activation.

Polyamine biomarkers as indicators of human disease.

Development of 'multiresistance rice' by an assembly of herbicide, insect and disease resistance genes with a transgene stacking system.

Association of Agricultural, Occupational, and Military Inhalants With Autoantibodies and Disease Features in US Veterans With Rheumatoid Arthritis.

Plasma acrolein level in rheumatoid arthritis increases independently of the disease characteristics.

[Analysis of the level of T lymphocyte subsets and the relationship with the prognosis of pulmonary fibrosis in patients with paraquat poisoning].

Microdesigned Nanocellulose-Based Flexible Antibacterial Aerogel Architectures Impregnated with Bioactive Cinnamomum cassia.

Pediococcus pentosaceus ZJUF-4 relieves oxidative stress and restores the gut microbiota in diquat-induced intestinal injury.

Suppression of Th17 cell differentiation via sphingosine-1-phosphate receptor 2 by cinnamaldehyde can ameliorate ulcerative colitis.

Thal protects against paraquat-induced lung injury through a microRNA-141/HDAC6/Î²-tubulin-NF-Î²B axis in rat and cell models.

Arenaria kansuensis attenuates pulmonary fibrosis in mice via the activation of Nrf2 pathway and the inhibition of NF-Î²B/TGF-beta1/Smad2/3 pathway.

Urinary Levels of the Acrolein Conjugates of Carnosine Are Associated with Cardiovascular Disease Risk.

Glyphosate-induced lipid metabolism disorder contributes to hepatotoxicity in juvenile common carp.

Novel FXR agonist nelumal A suppresses colitis and inflammation-related colorectal carcinogenesis.

An Unusual Case of Paraquat-Induced Rhabdomyolysis and Hepatic Injury Presenting With Takotsubo Cardiomyopathy.

Gallic acid exerts anti-inflammatory, anti-oxidative stress, and nephroprotective effects against paraquat-induced renal injury in male rats.

The Keap1/Nrf2-ARE signaling pathway is involved in atrazine induced dopaminergic neurons degeneration via microglia activation.

Potential of *Trichoderma harzianum* and Its Metabolites to Protect Wheat Seedlings against *Fusarium culmorum* and 2,4-D.

Plasma Concentration After the First Hemoperfusion has a High Predictive Value in Medium Level Acute Paraquat-Poisoned Patients.

Antibacterial and herbicidal properties of secondary metabolites from fungi.

Adduct Formation of Acrolein with Cyanidin-3-O-glucoside and Its Degradants/Metabolites during Thermal Processing or In Vivo after Consumption of Red Bayberry.

Interconversion and Acrolein-Trapping Capacity of Cardamonin/Alpinetin and Their Metabolites In Vitro and In Vivo.

Primary Human Hepatocyte Spheroids as Tools to Study the Hepatotoxic Potential of Non-Pharmaceutical Chemicals.

Antifungal activity of glyphosate against fungal blast disease on glyphosate-tolerant OsmEPSPS transgenic rice.

Translation, ribosome biogenesis, and oxidative damage caused by chlorpyrifos exposure to common carp (*Cyprinus carpio* L.) liver: application of combined RNA-seq with sRNA-seq in risk evaluation of environmental toxicant chlorpyrifos.

Epigenome-wide association study for glyphosate induced transgenerational sperm DNA methylation and histone retention epigenetic biomarkers for disease.

[Analysis of clinical characteristics and prognostic factors in 40 cases of acute glyphosate poisoning].

Inhibition of amyloid formation of amyloid β (1-42), amylin and insulin by 1,5-diazacyclooctanes, a spermine-acrolein conjugate.

Alveolar-arterial partial pressure difference as an early predictor for patients with acute paraquat poisoning.

Acrolein but not its metabolite, 3-Hydroxypropylmercapturic acid (3HPMA), activates vascular transient receptor potential Ankyrin-1 (TRPA1): Physiological to toxicological implications.

Essential Oil-Based Bioherbicides: Human Health Risks Analysis.

Involvement of mitochondrial fission in renal tubular pyroptosis in mice exposed to high and environmental levels of glyphosate combined with hard water.

A simple method for the determination of glyphosate, glufosinate and their metabolites in biological specimen by liquid chromatography/tandem mass spectrometry: an application for forensic toxicology.

The Arabidopsis mediator complex subunit 8 regulates oxidative stress responses.

Chronic exposure to glyphosate in Florida manatee.

[The effect of diallyl sulfide on the lung tissue of rats poisoned by paraquat].

Metribuzin-induced non-adverse liver changes result in rodent-specific non-adverse thyroid effects via uridine 5'-diphospho-glucuronosyltransferase (UDPGT, UGT) modulation.

Effect of carrier volume and spray quality on glyphosate-resistant soybean response to sublethal dicamba exposure.

Paraquat Treatment Compromises the Clearance of β -Amyloid and Tau Proteins and Induces Primary Hippocampal Neuronal Cell Death through HSP70, P20S, and TFEB Disruption.

The TRPA1 Agonist Cinnamaldehyde Induces the Secretion of HCO₃⁽⁻⁾ by the Porcine Colon.

Origins, fate, and actions of methylated trivalent metabolites of inorganic arsenic: progress and prospects.

Exposure to volatile organic compounds - acrolein, 1,3-butadiene, and crotonaldehyde - is associated with vascular dysfunction.

Cytotoxicity and genotoxicity of methomyl, carbaryl, metalaxyl, and pendimethalin in human umbilical vein endothelial cells.

Efficient chemosensors for toxic pollutants based on photoluminescent Zn(ii) and Cd(ii) metal-organic networks.

Differential sensitivity of cinnamaldehyde-evoked calcium fluxes to ruthenium red in guinea pig and mouse trigeminal sensory neurons.

Coexisting antibiotic changes the persistence and metabolic profile of atrazine in the environment.

An Intensified Acrolein Exposure Can Affect Memory and Cognition in Rat.

Trans-cinnamaldehyde protects C2C12 myoblasts from DNA damage, mitochondrial dysfunction and apoptosis caused by oxidative stress through inhibiting ROS production.

Low Doses of Glyphosate/Roundup Alter Blood-Testis Barrier Integrity in Juvenile Rats.

Anti-Enterococcus Faecalis, Cytotoxicity, Phytotoxicity, and Anticancer Studies on Clausena excavata Burum. f. (Rutaceae) Leaves.

New Insights into the Antimicrobial Action of Cinnamaldehyde towards Escherichia coli and Its Effects on Intestinal Colonization of Mice.

Aquaculture-derived distribution, partitioning, migration, and transformation of atrazine and its metabolites in seawater, sediment, and organisms from a typical semi-closed mariculture bay.

Subchronic toxicity study in rats evaluating herbicide-tolerant soybean DAS-68416-4.

A dicamba resistance-endowing IAA16 mutation leads to significant vegetative growth defects and impaired competitiveness in kochia (Bassia scoparia) (L.) .

Effects of simazine and food deprivation chronic stress on energy allocation among the costly physiological processes of male lizards (Eremias argus).

Ecological risk assessment of current-use pesticides and biocides in soils, sediments and surface water of a mixed land-use basin of the Pampas region, Argentina.

Extracellular pH and high concentration of potassium regulate the primary necrosis in the yeast *Saccharomyces cerevisiae*.

Preparation of S-iron-enriched yeast using siderophores and its effect on iron deficiency anemia in rats.

Cardioprotective and nephroprotective effects of Quercetin against different toxic agents.

Proximity-dependent biotinylation detects associations between SARS coronavirus nonstructural protein 1 and stress granule-associated proteins.

Arsenic-induced lung inflammation and fibrosis in a rat model: Contribution of the HMGB1/RAGE, PI3K/AKT, and TGF- β 1/SMAD pathways.

Efficacy of cenobamate for uncontrolled focal seizures: Post hoc analysis of a Phase 3, multicenter, open-label study.

Cortical Synaptic Reorganization Under Chronic Arsenic Exposure.

Low-dose PCB126 exposure disrupts cardiac metabolism and causes hypertrophy and fibrosis in mice.

Chemical constituents and medicinal properties of *Allium* species.

An Unusual Type of *Neoechinorhynchus cylindratus* (Acanthocephala: Neoechinorhynchidae) from *Gambusia affinis* in Peru, with Notes on Introductions.

Probing Loop-Mediated Isothermal Amplification (LAMP) targeting two gene-fragments of rose rosette virus.

Aryl Hydrocarbon Receptor Repressor Is Hypomethylated in Psoriasis and Promotes Psoriasis-like Inflammation in HaCaT Cells.

Aryl Hydrocarbon Receptor (AhR) Activation by 2,3,7,8-Tetrachlorodibenzo-p-Dioxin (TCDD) Dose-Dependently Shifts the Gut Microbiome Consistent with the Progression of Non-Alcoholic Fatty Liver Disease.

The Binding of Aripiprazole to Plasma Proteins in Chronic Renal Failure Patients.

Gut Microbiota and Their Derived Metabolites, a Search for Potential Targets to Limit Accumulation of Protein-Bound Uremic Toxins in Chronic Kidney Disease.

Role of AHR Ligands in Skin Homeostasis and Cutaneous Inflammation.

Neurons die with heightened but functional macro- and chaperone mediated autophagy upon increased amyloid- β induced toxicity with region-specific protection in prolonged intermittent fasting.

The Role of Iron and Zinc in the Treatment of ADHD among Children and Adolescents: A Systematic Review of Randomized Clinical Trials.

Polychlorinated environmental toxicants affect sphingolipid metabolism during neurogenesis in vitro.

Dinitramine induces cardiotoxicity and morphological alterations on zebrafish embryo development.

Aryl hydrocarbon receptor (AHR) functions in infectious and sterile inflammation and NAD(+)-dependent metabolic adaptation.

Potential role of dietary chitosan nanoparticles against immunosuppression, inflammation, oxidative stress, and histopathological alterations induced by pendimethalin toxicity in Nile tilapia.

A randomized controlled trial comparing the efficacy, tolerability, and cost of oral iron preparations in iron-deficiency anemia in pregnancy.

Impaired Tubular Secretion of Organic Solutes in Advanced Chronic Kidney Disease.

Untargeted serum metabolomics and potential biomarkers for Sjögren's syndrome.

DNA Damage and Expression Profile of Genes Associated with Nephrotoxicity Induced by Butralin and Ameliorating Effect of Arabic Gum in Female Rats.

Respiratory characteristics of the tammar wallaby pouch young and functional limitations in a newborn with skin gas exchange.

Computational studies on bacterial secondary metabolites against breast cancer.

The protective effect of Xanthoceras sorbifolia Bunge husks on cognitive disorder based on metabolomics and gut microbiota analysis.

An Overview: The Toxicity of Ageratina adenophora on Animals and Its Possible Interventions.

Analysis of cannabis seizures by non-targeted liquid chromatography-tandem mass spectrometry.

Passage Number-Induced Replicative Senescence Modulates the Endothelial Cell Response to Protein-Bound Uremic Toxins.

Discovery of a Potent and Selective JNK3 Inhibitor with Neuroprotective Effect Against Amyloid β -Induced Neurotoxicity in Primary Rat Neurons.

These boots are made for burnin': Inferring the position of the corpse and the presence of leather footwears during cremation through isotope (^{13}C , ^{18}O) and infrared (FTIR) analyses of experimentally burnt skeletal remains.

Human prostate epithelial cells and prostate-derived stem cells malignantly transformed in vitro with sodium arsenite show impaired Toll like receptor -3 (TLR3)-associated anti-tumor pathway.

Sphingolipid imbalance and inflammatory effects induced by uremic toxins in heart and kidney cells are reversed by dihydroceramide desaturase 1 inhibition.

Effects of prebiotic oligofructose-enriched inulin on gut-derived uremic toxins and disease progression in rats with adenine-induced chronic kidney disease.

Oral Iron Absorption Test: A Simple Test with Relevance in the Clinical Setting.

Combining in vitro assays and mathematical modelling to study developmental neurotoxicity induced by chemical mixtures.

AMP deamination is sufficient to replicate an atrophy-like metabolic phenotype in skeletal muscle.

Iron distribution in different tissues of homozygous Mask (msk/msk) mice and the effects of oral iron treatments.

Metabolomics profiling for identification of potential biomarkers in chickens infected with avian leukosis virus subgroup J (ALV-J).

Dinitrophenol-mediated modulation of an anti-PD-L1 VHH for Fc-dependent effector functions and prolonged serum half-life.

The protein-bound uremic toxin p-cresyl-sulfate promotes intracellular ROS production and lipid peroxidation in 3T3-L1 adipose cells.

Lipid metabolism disorders associated with dioxin exposure in a cohort of Chinese male workers revealed by a comprehensive lipidomics study.

Prenatal exposure to arsenic and lung function in children from the New Hampshire Birth Cohort Study.

Characteristics of arsenic species in cerebrospinal fluid (CSF) of acute promyelocytic leukaemia (APL) patients treated with arsenic trioxide plus mannitol.

Protein-Bound Uremic Toxins Lowering Effect of Sevelamer in Pre-Dialysis Chronic Kidney Disease Patients with Hyperphosphatemia: A Randomized Controlled Trial.

The consequences of altered microbiota in immune-related chronic kidney disease.

Transcriptome-based analysis of blood samples reveals elevation of DNA damage response, neutrophil degranulation, cancer and neurodegenerative pathways in Plasmodium falciparum patients.

Exposure to pesticides and childhood leukemia risk: A systematic review and meta-analysis.

Comparative Evaluation of Sucrosomial Iron and Iron Oxide Nanoparticles as Oral Supplements in Iron Deficiency Anemia in Piglets.

HSF-1 and SIR-2.1 linked insulin-like signaling is involved in goji berry (*Lycium spp.*) extracts promoting lifespan extension of *Caenorhabditis elegans*.

Evaluation of arsenic species in leukocytes and granulocytes of acute promyelocytic leukemia patients treated with arsenic trioxide.

A UVB-responsive common variant at chromosome band 7p21.1 confers tanning response and melanoma risk via regulation of the aryl hydrocarbon receptor, AHR.

YAP prevents premature senescence of astrocytes and cognitive decline of Alzheimer's disease through regulating CDK6 signaling.

Long-term safety of adjunctive cenobamate in patients with uncontrolled focal seizures: Open-label extension of a randomized clinical study.

Effect of renal impairment on arsenic accumulation, methylation capacity, and safety in acute promyelocytic leukemia (APL) patients treated with arsenic trioxide.

The Pharmacology and Clinical Efficacy of Antiseizure Medications: From Bromide Salts to Cenobamate and Beyond.

Relationship between acute kidney injury and mortality in poisoning - a systematic review and metanalysis.

Effects of the prenatal environment on cryptorchidism: A narrative review.

Mechanism of Gene-Environment Interactions Driving Glial Activation in Parkinson's Diseases.

Uremic endothelial-derived extracellular vesicles: Mechanisms of formation and their role in cell adhesion, cell migration, inflammation, and oxidative stress.

Fluroxypyr-1-methylheptyl ester interferes with the normal embryogenesis of zebrafish by inducing apoptosis, inflammation, and neurovascular toxicity.

Efficient flavinylation of glycosomal fumarate reductase by its own ApbE domain in *Trypanosoma brucei*.

Citrullinated and homocitrullinated low-density lipoprotein in rheumatoid arthritis.

Metastasizing Ameloblastoma: A 10 Year Clinicopathological Review with an Insight Into Pathogenesis.

New perspective on the regulation of acetylcholinesterase via the aryl hydrocarbon receptor.

Oral high-dose sucrosomial iron vs intravenous iron in sideropenic anemia patients intolerant/refractory to iron sulfate: a multicentric randomized study.

A case of iron deficiency anemia with extremely hyperferritinemia responds well to oral iron: the first identified hereditary hyperferritinemia cataract syndrome in China.

Prenatal Molecular Hydrogen Administration Ameliorates Several Findings in Nitrofen-Induced Congenital Diaphragmatic Hernia.

The effects of 2-aminoethoxydiphenyl borate and dantrolene on rat bones treated with NaAsO₂.

Maternal 3,3-Dimethyl-1-Butanol Therapy Protects Adult Male Rat Offspring against Hypertension Programmed by Perinatal TCDD Exposure.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin (TCDD)-Inducible Poly-ADP-Ribose Polymerase (TIPARP/PARP7) Catalytic Mutant Mice (TiparpH532A) Exhibit Increased Sensitivity to TCDD-Induced Hepatotoxicity and Lethality.

Fenofibrate, a peroxisome proliferator-activated receptor- α agonist, blocks steatosis and alters the inflammatory response in a mouse model of inflammation-dioxin interaction.

Dietary Selenium Deficiency Partially Mimics the Metabolic Effects of Arsenic.

Evaluation of Salivary Indoxyl Sulfate with Proteinuria for Predicting Graft Deterioration in Kidney Transplant Recipients.

Association between occupational exposures and sarcoma incidence and mortality: systematic review and meta-analysis.

Baseline Hemoglobin, Hepcidin, Ferritin, and Total Body Iron Stores are Equally Strong Diagnostic Predictors of a Hemoglobin Response to 12 Weeks of Daily Iron Supplementation in Cambodian Women.

In Vitro and Clinical Pharmacokinetic Studies of the Effects of Iron-containing Agents on Vadadustat, an Oral Hypoxia-inducible Factor-Prolyl Hydroxylase Inhibitor.

Overexpression of miR-19a and miR-20a in iPS-MSCs preserves renal function of chronic kidney disease with acute ischaemia-reperfusion injury in rat.

Perspective on prenatal polychlorinated biphenyl exposure and the development of the progeny nervous system (Review).

Sodium azide poisoning: a narrative review.

Direct and specific analysis of nitrite and nitrate in biological and non-biological samples by capillary ion analysis for the rapid identification of fatal intoxications with sodium nitrite.

8-Formyllophipogonanone B antagonizes doxorubicin-induced cardiotoxicity by suppressing heme oxygenase-1-dependent myocardial inflammation and fibrosis.

Glutathione: An Old and Small Molecule with Great Functions and New Applications in the Brain and in Alzheimer's Disease.

Association Between Kidney Clearance of Secretory Solutes and Cardiovascular Events: The Chronic Renal Insufficiency Cohort (CRIC) Study.

Differential activation of eMI by distinct forms of cellular stress.

A molecular signature for the metabolic syndrome by urine metabolomics.

Importance of pesticides for lethal poisoning in India during 1999 to 2018: a systematic review.

Untargeted metabolomics and transcriptomics identified glutathione metabolism disturbance and PCS and TMAO as potential biomarkers for ER stress in lung.

Staphylococcus aureus Peptide Methionine Sulfoxide Reductases Protect from Human Whole-Blood Killing.

Antioxidant and food additive BHA prevents TNF cytotoxicity by acting as a direct RIPK1 inhibitor.

Circulating p-Cresyl Sulfate, Non-Hepatic Alkaline Phosphatase and Risk of Bone Fracture Events in Chronic Kidney Disease-Mineral Bone Disease.

The microbial metabolite p-Cresol induces autistic-like behaviors in mice by remodeling the gut microbiota.

Surface-Enhanced Raman Spectroscopy of Bacterial Metabolites for Bacterial Growth Monitoring and Diagnosis of Viral Infection.

Comparison of efficacy & safety of iron polymaltose complex & ferrous ascorbate with ferrous sulphate in pregnant women with iron-deficiency anaemia.

A successful protocol for desensitization to iron salts.

Agricultural Pesticides and Shingles Risk in a Prospective Cohort of Licensed Pesticide Applicators.

Paraquat lung - a rare cause of diffuse parenchymal lung disease.

Intravenous iron is non-inferior to oral iron regarding cell growth and iron metabolism in colorectal cancer associated with iron-deficiency anaemia.

Iron preparations for women of reproductive age with iron deficiency anaemia in pregnancy (FRIDA): a systematic review and network meta-analysis.

Skeletal myopathy in CKD: a comparison of adenine-induced nephropathy and 5/6 nephrectomy models in mice.

A novel imidazolinone metformin-methylglyoxal metabolite promotes endothelial cell angiogenesis via the eNOS/HIF-1 α pathway.

Novel edible toys as iron carrier to prevent iron deficiency of postweaned pigs.

Dynamic alteration in miRNA and mRNA expression profiles at different stages of chronic arsenic exposure-induced carcinogenesis in a human cell culture model of skin cancer.

Iron overload during the embryonic period develops hyperactive like behavior and dysregulation of biogenic amines in *Drosophila melanogaster*.

Metam sodium exposure during pregnancy and lactation in mice caused behavioral abnormalities and oxidative stress in offspring.

Chloracne: a case series on cutaneous expression of CYP1A1 as diagnostic biomarker.

Role of inhibiting Chk1-p53 pathway in hepatotoxicity caused by chronic arsenic exposure from coal-burning.

Gallic acid ameliorates sodium arsenite-induced renal and hepatic toxicity in rats.

Oral Ferric Maltol Does Not Adversely Affect the Intestinal Microbiome of Patients or Mice, But Ferrous Sulphate Does.

The Ability of AhR Ligands to Attenuate Delayed Type Hypersensitivity Reaction Is Associated With Alterations in the Gut Microbiota.

Analysis of the Oxidative Stress Regulon Identifies soxS as a Genetic Target for Resistance Reversal in Multidrug-Resistant *Klebsiella pneumoniae*.

Effect of Fortification with Multiple Micronutrient Powder on the Prevention and Treatment of Iron Deficiency and Anaemia in Brazilian Children: A Randomized Clinical Trial.

Unconjugated p-cresol activates macrophage macropinocytosis leading to increased LDL uptake.

Association between pesticide exposure and obesity: A cross-sectional study of 20,295 farmers in Thailand.

Urinary Volatilomics Unveils a Candidate Biomarker Panel for Noninvasive Detection of Clear Cell Renal Cell Carcinoma.

Inhibition of triple negative breast cancer metastasis and invasiveness by novel drugs that target epithelial to mesenchymal transition.

Gene expression profile analysis and target gene discovery of Mycobacterium tuberculosis biofilm.

[The Comparison of Iron Deficiency Anemia Rat Treated with Hydroxypropyl Chitosan Ferrous Ion Complex and Ferrous Sulfate].

Pharmacology of Cenobamate: Mechanism of Action, Pharmacokinetics, Drug-Drug Interactions and Tolerability.

Detrimental effects of 6 months exposure to very low doses of a mixture of six pesticides associated with chronic vitamin deficiency on rats.

Regulated hypothermia in response to endotoxin in birds.

Testing in vitro tools for the prediction of cholestatic liver injury induced by non-pharmaceutical chemicals.

Prenatal exposure to pesticides and risk of preeclampsia among pregnant women: Results from the ELFE cohort.

Beverages containing Lactobacillus paracasei LC-37 improved functional dyspepsia through regulation of the intestinal microbiota and their metabolites.

Prolonged Low-Dose Dioxin Exposure Impairs Metabolic Adaptability to High-Fat Diet Feeding in Female but Not Male Mice.

Randomized Trial of Oral Iron and Diet Advice versus Diet Advice Alone in Young Children with Nonanemic Iron Deficiency.

Can curcumin supplementation reduce plasma levels of gut-derived uremic toxins in hemodialysis patients? A pilot randomized, double-blind, controlled study.

Thidiazuron suppresses breast cancer via targeting miR-132 and dysregulation of the PI3K-Akt signaling pathway mediated by the miR-202-5p-PTEN axis.

Poisonings due to storage in a secondary container reported to the National Poison Data System, 2007-2017.

Toxicology and predictors of death in 2,4-dinitrophenol (DNP) toxicity.

Susceptibility to DNA damage caused by abrogation of Rad54 homolog B: A putative mechanism for chemically induced cleft palate.

Biochemistry of Terpenes and Recent Advances in Plant Protection.

[Risk factors associated with acute kidney injury caused by pesticide poisoning].

Developmental and lifelong dioxin exposure induces measurable changes in cardiac structure and function in adulthood.

The role of MEG3 in the proliferation of palatal mesenchymal cells is related to the TGF β ²/Smad pathway in TCDD inducing cleft palate.

The aryl hydrocarbon receptor suppresses immunity to oral squamous cell carcinoma through immune checkpoint regulation.

Nematicidal Volatiles from *Bacillus atrophaeus* GBSC56 Promote Growth and Stimulate Induced Systemic Resistance in Tomato against *Meloidogyne incognita*.

TP53INP1 exerts neuroprotection under ageing and Parkinson's disease-related stress condition.

Multi-Nutrient Fortified Dairy-Based Drink Reduces Anaemia without Observed Adverse Effects on Gut Microbiota in Anaemic Malnourished Nigerian Toddlers: A Randomised Dose-Response Study.

Role of Endocrine-Disrupting Chemicals in the Pathogenesis of Non-Alcoholic Fatty Liver Disease: A Comprehensive Review.

Immunomorphological Changes in Neuronal and Non-Neuronal Structures in the Rat Intestine in a Toxin-Induced Model of Parkinsonism.

Effects of Low-Dose Gestational TCDD Exposure on Behavior and on Hippocampal Neuron Morphology and Gene Expression in Mice.

Hard as Iron: A Case of Delayed Presentation of Severe Iron Toxicity With Diagnostic and Treatment Dilemmas.

Pathology of salivary gland dysfunction and restoration of function.

Neurobehavioral and neurochemical effects in rats offspring co-exposed to arsenic and fluoride during development.

Associations among total p-cresylsulfate, indoxyl sulfate and hippuric acid levels with hemodialysis quality indicators in maintenance hemodialysis patients.

COPD-derived fibroblasts secrete higher levels of senescence-associated secretory phenotype proteins.

Nutritional Intervention with Dried Bonito Broth for the Amelioration of Aggressive Behaviors in Children with Prenatal Exposure to Dioxins in Vietnam: A Pilot Study.

Glycine-Conjugated Bile Acids Protect RPE Tight Junctions against Oxidative Stress and Inhibit Choroidal Endothelial Cell Angiogenesis In Vitro.

Postnatal Iron Supplementation with Ferrous Sulfate vs. Ferrous Bis-Glycinate Chelate: Effects on Iron Metabolism, Growth, and Central Nervous System Development in Sprague Dawley Rat Pups.

Dietary Strategies for Management of Metabolic Syndrome: Role of Gut Microbiota Metabolites.

Circulating short and medium chain fatty acids are associated with normoalbuminuria in type 1 diabetes of long duration.

Ferric carboxymaltose vs. ferrous sulfate for the treatment of anemia in advanced chronic kidney disease: an observational retrospective study and cost analysis.

High Serum-Induced AhRL Is Associated with Prevalent Metabolic Syndrome and Future Impairment of Glucose Tolerance in the Elderly.

Ephedra Herb, Mao, Inhibits Antigen-Induced Mast Cell Degranulation by Induction of the Affinity Receptor for IgE Internalization.

Attenuation of growth hormone production at the fetal stage is critical for dioxin-induced developmental disorder in rat offspring.

2,4-Dinitrophenol overdose - Everything old is new again.

Anti-seizure medications and efficacy against focal to bilateral tonic-clonic seizures: A systematic review with relevance for SUDEP prevention.

Pre- and post-diagnostic blood profiles of chlorinated persistent organic pollutants and metabolic markers in type 2 diabetes mellitus cases and controls; a pilot study.

Inorganic arsenic induces sex-dependent pathological hypertrophy in the heart.

Environmental exposures and the etiopathogenesis of Alzheimer's disease: The potential role of BACE1 as a critical neurotoxic target.

Protective effect of toll-interacting protein overexpression against paraquat-induced lung injury in mice and A549 cells through inhibiting oxidative stress, inflammation, and NF- κ B signaling pathway.

"That's Not His Regular Formula": A Case of Organophosphate Poisoning in an Infant.

Regulation of Mitochondrial Function by Epac2 Contributes to Acute Inflammatory Hyperalgesia.

Vitamin D improves pulmonary function in a rat model for congenital diaphragmatic hernia.

Influences of Selenium-Enriched Yeast on Growth Performance, Immune Function, and Antioxidant Capacity in Weaned Pigs Exposure to Oxidative Stress.

Bayesian Group Index Regression for Modeling Chemical Mixtures and Cancer Risk.

Environmental exposures to endocrine disrupting chemicals (EDCs) and their role in endometriosis: a systematic literature review.

Thrombolome and Its Emerging Role in Chronic Kidney Diseases.

Iron Protein Succinylate in the Management of Iron Deficiency Anemia: A Comparative Study with Ferrous Sulphate at Low and High Therapeutic Doses.

Peripheral nerve injury in patients exposed to n-hexane: an analysis of eight cases.

Effects of maternal exposure to arsenic on social behavior and related gene expression in F2 male mice.

Therapeutic potential of diosmin, a citrus flavonoid against arsenic-induced neurotoxicity via suppression of NOX 4 and its subunits.

Impact of congenital diaphragmatic hernia on diaphragm muscle function in neonatal rats.

Microbial metabolism of L-tyrosine protects against allergic airway inflammation.

Mitochondria exert age-divergent effects on recovery from spinal cord injury.

The in vitro laboratory tests and mass spectrometry-assisted quality assessment of commercial polyvalent antivenom raised against the 'Big Four' venomous snakes of India.

Assessment of fibrotic pathways induced by environmental chemicals using 3D-human liver microtissue model.

The antioxidant study proprieties of Thymus munbyanus aqueous extract and its beneficial effect on 2, 4-Dichlorophenoxyacetic acid -induced hepatic oxidative stress in albino Wistar rats.

Non-dioxin-like polychlorinated biphenyl neurotoxic equivalents found in environmental and human samples.

Cenobamate: Neuroprotective Potential of a New Antiepileptic Drug.

Clinical usefulness of a rapid molecular assay, ID NOW[®], for influenza A & B 2, in adults.

Attenuation of sodium arsenite-induced cardiotoxicity and neurotoxicity with the antioxidant, anti-inflammatory, and antiapoptotic effects of hesperidin.

Inhibition of anti-viral stress granule formation by coronavirus endoribonuclease nsp15 ensures efficient virus replication.

The Role of Gut Bacterial Metabolites in Brain Development, Aging and Disease.

Sustained high expression of NRF2 and its target genes induces dysregulation of cellular proliferation and apoptosis is associated with arsenite-induced malignant transformation of human bronchial epithelial cells.

AhR Ligands Differentially Regulate miRNA-132 Which Targets HMGB1 and to Control the Differentiation of Tregs and Th-17 Cells During Delayed-Type Hypersensitivity Response.

The Aryl Hydrocarbon Receptor Attenuates Acute Cigarette Smoke-Induced Airway Neutrophilia Independent of the Dioxin Response Element.

The relationship of indoxyl sulfate and p-cresyl sulfate with target cardiovascular proteins in hemodialysis patients.

Key Considerations for Policymakers-Iodized Salt as a Vehicle for Iron Fortification: Current Evidence, Challenges, and Knowledge Gaps.

Mechanisms involved in the possible protective effect of chrysin against sodium arsenite-induced liver toxicity in rats.

Comparison between oral ferrous sulfate and intravenous ferric carboxymaltose in children with restless sleep disorder.

Proportionate mortality study of unionized maintenance of way railroad workers.

pH-Dependent Protein Binding Properties of Uremic Toxins In Vitro.

A Positive Relationship between Exposure to Heavy Metals and Development of Chronic Diseases: A Case Study from Chile.

The aryl hydrocarbon receptor and the gut-brain axis.

Predicting changes in renal metabolism after compound exposure with a genome-scale metabolic model.

Cancer- and noncancer-specific cumulative incidence of death after exposure to polychlorinated biphenyls and dioxins: A competing risk analysis among Yusho patients.

Arsenite suppresses IL-2-dependent tumoricidal activities of natural killer cells.

Efficacy and safety of intravenous ferric carboxymaltose compared with oral iron for the treatment of iron deficiency anaemia in women after childbirth in Tanzania: a parallel-group, open-label, randomised controlled phase 3 trial.

Ameliorative role of bosentan, an endothelin receptor antagonist, against sodium arsenite-induced renal dysfunction in rats.

Pbx1, Meis1, and Runx1 Expression Is Decreased in the Diaphragmatic and Pulmonary Mesenchyme of Rats with Nitrofen-Induced Congenital Diaphragmatic Hernia.

IRE1 \pm /NOX4 signaling pathway mediates ROS-dependent activation of hepatic stellate cells in NaAsO(2)-induced liver fibrosis.

Epithelial Alteration Associated With Recovery From Laryngeal Squamous Metaplasia in Rats: Kinetics of Recovery From a Test Item-Related Change.

TCDD attenuates EAE through induction of FasL on B cells and inhibition of IgG production.

Novel tankyrase inhibitors suppress TDP-43 aggregate formation.

Gestational and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in mice: Neurobehavioral effects on female offspring.

Adverse effects of iron deficiency anemia on pregnancy outcome and offspring development and intervention of three iron supplements.

Aryl Hydrocarbon Receptor and Dioxin-Related Health Hazards-Lessons from Yusho.

Uraemic toxins impair skeletal muscle regeneration by inhibiting myoblast proliferation, reducing myogenic differentiation, and promoting muscular fibrosis.

The impact of dextran sodium sulphate and probiotic pre-treatment in a murine model of Parkinson's disease.

An enriched biosignature of gut microbiota-dependent metabolites characterizes maternal plasma in a mouse model of fetal alcohol spectrum disorder.

Impact of prenatal arsenic exposure on the testes and epididymides of prepubertal rats.

Cardiovascular risk factors associated with coronary ectasia and acute myocardial infarction.

Elucidation of the species differences of epyrifenacil-induced hepatotoxicity between mice and humans by mass spectrometry imaging analysis in chimeric mice with humanized liver.

Exposure of Environmental Contaminants and Development of Neurological Disorders.

Toxin-Related Acute Kidney Injury.

Alginate-coated activated charcoal enhances fecal excretion of 2,3,7,8-tetrachlorodibenzo-p-dioxin in mice, with fewer side effects than uncoated one.

Protein-Bound Uremic Toxins and Immunity.

Reno-Hepatoprotective and Antidiabetic Properties of Methanol Leaf Extract of *Laportea Aestuans* in Wistar Rats.

Transamniotic Stem Cell Therapy for Experimental Congenital Diaphragmatic Hernia: Structural, Transcriptional, and Cell Kinetics Analyses in the Nitrofen Model.

Biological Therapies for Atopic Dermatitis: A Systematic Review.

Effects of Uremic Toxins on the Binding of Aripiprazole to Human Serum Albumin.

Amniotic fluid metabolic fingerprinting indicated metabolites which may play a role in the pathogenesis of foetal Down syndrome - a preliminary report.

Catalase deficiency induces reactive oxygen species mediated pexophagy and cell death in the liver during prolonged fasting.

DNA Methylation Patterns in CD4+ T Cells of Na⁺ and Influenza A Virus-Infected Mice Developmentally Exposed to an Aryl Hydrocarbon Receptor Ligand.

P-cresol and Indoxyl Sulfate Impair Osteogenic Differentiation by Triggering Mesenchymal Stem Cell Senescence.

Gut microbiota as a target to limit toxic effects of traditional Chinese medicine: Implications for therapy.

Arsenic metabolism differs between child and adult patients during acute arsenic poisoning.

Forensic taphonomy: Characterization of the gravesoil chemistry using a multivariate approach combining chemical and volatile analyses.

A rat subchronic study transcriptional point of departure estimates a carcinogenicity study apical point of departure.

Effects of Probiotic Preparations on Inflammatory Cytokines in Chronic Kidney Disease Patients: A Systematic Review and Meta-Analysis.

TriTACs, a Novel Class of T-Cell-Engaging Protein Constructs Designed for the Treatment of Solid Tumors.

Epithelial cell-adhesion protein cadherin 26 is dysregulated in congenital diaphragmatic hernia and congenital pulmonary airway malformation.

Carbon nitride-based nanocaptor: An intelligent nanosystem with metal ions chelating effect for enhanced magnetic targeting phototherapy of Alzheimer's disease.

Pesticide exposure and incident thyroid cancer among male pesticide applicators in agricultural health study.

A treatise on Organophosphate pesticide pollution: Current strategies and advancements in their environmental degradation and elimination.

Hypusination of Eif5a regulates cytoplasmic TDP-43 aggregation and accumulation in a stress-induced cellular model.

Single-Nuclei RNA Sequencing Assessment of the Hepatic Effects of 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Exposure to pollutants altered glucocorticoid signaling and clock gene expression in female mice. Evidence of tissue- and sex-specificity.

A protocol of situation-dependent transfusion, erythropoietin and tranexamic acid reduces transfusion in fronto-orbital advancement for metopic and coronal craniosynostosis.

Phytotoxic metabolites produced by *Diaporthe eres* involved in cane blight of grapevine in Italy.

Synergistic properties of bioavailable phenolic compounds from olive oil: electron transfer and neuroprotective properties.

Differences in exposure to toxic and/or carcinogenic volatile organic compounds between Black and White cigarette smokers.

Co-exposure to nTiO₂ impairs arsenic metabolism and affects antioxidant capacity in the marine shrimp *Litopenaeus vannamei*.

Sex-specific Associations Between Type 2 Diabetes Incidence and Exposure to Dioxin and Dioxin-like Pollutants: A Meta-analysis.

Evidence-Based Challenges to the Continued Recommendation and Use of Peroxidatively-Susceptible Polyunsaturated Fatty Acid-Rich Culinary Oils for High-Temperature Frying Practises: Experimental Revelations Focused on Toxic Aldehydic Lipid Oxidation Products.

Associations Between Residential Exposure to Volatile Organic Compounds and Liver Injury Markers.

A Preconception Paternal Fish Oil Diet Prevents Toxicant-Driven New Bronchopulmonary Dysplasia in Neonatal Mice.

Genetic Control of MAP3K1 in Eye Development and Sex Differentiation.

Correction to: Orally delivered water soluble coenzyme Q10 (Ubisol-Q10) blocks on-going neurodegeneration in rats exposed to paraquat: potential for therapeutic application in Parkinson's disease.

Dietary supplements consumption and its association with socioeconomic factors, obesity and main non-communicable chronic diseases in the north of Iran: the PERSIAN Guilan Cohort Study (PGCS).

Neurological Sequela of Acute Pesticide Poisoning Among Adults in Central Taiwan.

Protracted Impairment of Maternal Metabolic Health in Mouse Dams Following Pregnancy Exposure to a Mixture of Low Dose Endocrine-Disrupting Chemicals, a Pilot Study.

Risk Assessment of Ozone Fumigation Under Vacuum to Control Potential Infestation of Coffee Berry Borer and Coffee Leaf Rust in Green Coffee Beans Imported Into Hawaii.

The Promising Role of Chitosan-Poloxamer 188 Nanocrystals in Improving Diosmin Dissolution and Therapeutic Efficacy against Ferrous Sulfate-Induced Hepatic Injury in Rats.

Proteomics and metabolic phenotyping define principal roles for the aryl hydrocarbon receptor in mouse liver.

The Improvement of the Adaptation Process of Tocopherol and Acetylsalicylic Acid in Offspring of Mothers Exposed to TCDD.

Resveratrol and its derivative pterostilbene attenuate oxidative stress-induced intestinal injury by improving mitochondrial redox homeostasis and function via SIRT1 signaling.

Arabidopsis aldehyde oxidase 3, known to oxidize abscisic aldehyde to abscisic acid, protects leaves from aldehyde toxicity.

Effects of Iron Supplementation on Attention Deficit Hyperactivity Disorder in Children Treated with Methylphenidate.

Case Report: Delayed Lung Transplantation With Intraoperative ECMO Support for Herbicide Intoxication-Related Irreversible Pulmonary Fibrosis: Strategy and Outcome.

Chronic Dietary Exposure of Roosters to a Glyphosate-Based Herbicide Increases Seminal Plasma Glyphosate and AMPA Concentrations, Alters Sperm Parameters, and Induces Metabolic Disorders in the Progeny.

Pulmonary histopathology in fatal paraquat poisoning.

Formation of Cytoplasmic Actin-Cofilin Rods is Triggered by Metabolic Stress and Changes in Cellular pH.

Use of the Species Sensitivity Distribution Approach to Derive Ecological Threshold of Toxicological Concern (eco-TTC) for Pesticides.

Inhibitory effect of pirfenidone on pulmonary fibrosis in patients with acute paraquat poisoning.

Exposure to acetochlor impairs swim bladder formation, induces heat shock protein expression, and promotes locomotor activity in zebrafish (*Danio rerio*) larvae.

Paraquat Toxicogenetics: Strain-Related Reduction of Tyrosine Hydroxylase Staining in Substantia Nigra in Mice.

Developmental Toxicology of Metal Mixtures in *Drosophila*: Unique Properties of Potency and Interactions of Mercury Isoforms.

Development and Validation of an LC-MS-MS Method for the Quantification of Cyanate in Rat Plasma and Its Application to Toxicokinetic Bioanalysis.

Could Mesna and Celery Seed Cotherapy Modulate Oxidative Stress and Inflammation of the Urinary Bladder Induced by Ifosfamide in Rabbits?

Paraquat-induced acute kidney and liver injury: Case report of a survivor from Bangladesh.

Seasonal Urinary Levels of Glyphosate in Children From Agricultural Communities.

Paraquat Poisoning Associated With Daisley Barton Syndrome: A Case Report.

Antioxidant, anti-inflammatory and protective potential of gallic acid against paraquat-induced liver toxicity in male rats.

Effects of Acute 2,3,7,8-Tetrachlorodibenzo-p-Dioxin Exposure on the Circulating and Cecal Metabolome Profile.

Lipid Peroxide-Derived Reactive Carbonyl Species as Mediators of Oxidative Stress and Signaling.

Comparative Genotoxicity and Mutagenicity of Cigarette, Cigarillo, and Shisha Tobacco Products in Epithelial and Cardiac Cells.

The Role of Bacterial-Derived Aromatic Amino Acids Metabolites Relevant in Autism Spectrum Disorders: A Comprehensive Review.

On the Flip Side of Mask Wearing: Increased Exposure to Volatile Organic Compounds and a Risk-Reducing Solution.

Provision of folic acid for reducing arsenic toxicity in arsenic-exposed children and adults.

Cytokine changes in fatal cases of paraquat poisoning.

Short-Chain Fatty Acids Alleviate Hepatocyte Apoptosis Induced by Gut-Derived Protein-Bound Uremic Toxins.

Comparing the Invertebrate Communities and the Decomposition Dynamics Between Dead Native and Non-Native Trees in a Seasonal Everglades Wetland.

CRISPR-mediated Mutation in Cinnamoyl-CoA Reductase 4 in Allohexaploid Oilseed Crop *Camelina sativa*, Revealed its Pivotal Role in Resistance Against *Sclerotinia sclerotiorum*.

Low-Dose Cyclophosphamide Induces Nerve Injury and Functional Overactivity in the Urinary Bladder of Rats.

Absence of prostacyclin greatly relieves cyclophosphamide-induced cystitis and bladder pain in mice.

PCB cause global DNA hypomethylation of human peripheral blood monocytes in vitro.

Potential inoculum sources of *Fusarium* species involved in asparagus decline syndrome and evaluation of soil disinfestation methods by qPCR protocols.

Arsenic disrupts neuronal insulin signaling through increasing free PI3K-p85 and decreasing PI3K activity.

Compositions, sources, and potential health risks of volatile organic compounds in the heavily polluted rural North China Plain during the heating season.

Impact of whole-body versus nose-only inhalation exposure systems on systemic, respiratory, and cardiovascular endpoints in a 2-month cigarette smoke exposure study in the ApoE(-/-) mouse model.

A Novel Supplement Attenuates Oxidative Stress-Induced TDP-43-Related Pathogenesis in TDP-43-Expressed Cells.

Variables Affecting Shoot Growth and Plantlet Recovery in Tissue Cultures of Drug-Type Cannabis sativa L.

Author Correction: Acute thiamethoxam toxicity in honeybees is not enhanced by common fungicide and herbicide and lacks stress-induced changes in mRNA splicing.

[Vigilance against a highly lethal insecticide chlorfenapyr poisoning (report of 4 cases and literature review)].

Dilated Cardiomyopathy Associated with Paraquat Herbicide Poisoning.

The AST-120 Recovers Uremic Toxin-Induced Cognitive Deficit via NLRP3 Inflammasome Pathway in Astrocytes and Microglia.

UV and temperature effects on chloroacetanilide and triazine herbicides degradation and cytotoxicity.

The use of biomarkers associated with leaky gut as a diagnostic tool for early intervention in autism spectrum disorder: a systematic review.

Rapid Glomerulotubular Nephritis as an Initial Presentation of a Lethal Diquat Ingestion.

Foliar Application of Sodium Nitroprusside Boosts Solanum lycopersicum L. Tolerance to Glyphosate by Preventing Redox Disorders and Stimulating Herbicide Detoxification Pathways.

ROCK1 Mediates Retinal Glial Cell Migration Promoted by Acrolein.

[Toxic effects of sublethal acetochlor with sublethal doses on earthworms in soil using multi-endpoints system].

Sugarcane Workweek Study: Risk Factors for Daily Changes in Creatinine.

Transcriptional profiling of Chinese hamster ovary (CHO) cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

GDNF requires HIF-1 α and RET activation for suppression of programmed cell death of enteric neurons by metabolic challenge.

Curcumin pre-treatment may protect against mitochondrial damage in LRRK2-mutant Parkinson's disease and healthy control fibroblasts.

Xenopus laevis tadpoles exposed to metamifop: Changes in growth, behavioral endpoints, neurotransmitters, antioxidant system and thyroid development.

Exposure to pesticides and oxidative stress in Brazilian agricultural communities.

Acclimation to cold stress reduces injury from low temperature and bispyribac-sodium on rice.

Clothianidin alters leukocyte profiles and elevates measures of oxidative stress in tadpoles of the amphibian, *Rana pipiens*.

Mechanisms of Neurotoxicity Associated with Exposure to the Herbicide Atrazine.

Autism-like Behaviors in Male Juvenile Offspring after Maternal Glyphosate Exposure.

Effect of paraquat on cytotoxicity involved in oxidative stress and inflammatory reaction: A review of mechanisms and ecological implications.

Exploring the Biological Mechanism of Huang Yam in Treating Tumors and Preventing Antitumor Drug-Induced Cardiotoxicity Using Network Pharmacology and Molecular Docking Technology.

Pelargonic acid vanillylamide and rosuvastatin protect against oxidized low-density lipoprotein-induced endothelial dysfunction by inhibiting the NF- κ B/NLRP3 pathway and improving cell-cell junctions.

Impact of broad-spectrum pesticides used in the agricultural and forestry sector on the pesticide profile in wild boar, roe deer and deer and risk assessment for venison consumers.

Experimental Evidence of 2,3,7,8-Tetrachlordibenzo-p-Dioxin (TCDD) Transgenerational Effects on Reproductive Health.

The flavin monooxygenase Bs3 triggers cell death in plants, impairs growth in yeast and produces H₂O₂ in vitro.

Impact of Estrogen Withdrawal and Replacement in Female Mice along the Intestinal Tract. Comparison of E2 Replacement with the Effect of a Mixture of Low Dose Pollutants.

Granulocyte-colony stimulating factor, a potential candidate for the treatment of Parkinson's disease.

Disruption of the Diurnal Cortisol Hormone Pattern by Pesticide Use in a Longitudinal Study of Farmers in Thailand.

Drivers of adoption of crop protection and soil fertility management practices among smallholder soybean farmers in Tolon district of Ghana.

Removal of the fishy malodor from *Bangia fusco-purpurea* via fermentation of *Saccharomyces cerevisiae*, *Acetobacter pasteurianus*, and *Lactobacillus plantarum*.

Simultaneous determination and dietary risk assessment of clethodim and its metabolites in different fruits and vegetables.

2,3,7,8-Tetrachlorodibenzo-p-dioxin exposure disrupts development of the visceral and ocular vasculature.

Concentration Addition, Independent Action, and Quantitative Structure-Activity Relationships for Chemical Mixture Toxicities of the Disinfection By products of Haloacetic Acids on the Green Alga *Raphidocelis subcapitata*.

Effect of exposure to 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and polychlorinated biphenyls (PCBs) on mitochondrial DNA (mtDNA) copy number in rats.

Tenuazonic Acid-Triggered Cell Death Is the Essential Prerequisite for *Alternaria alternata* (Fr.) Keissler to Infect Successfully Host *Ageratina adenophora*.

Resveratrol in Rodent Models of Parkinson's Disease: A Systematic Review of Experimental Studies.

Enantioselective toxicity and oxidative stress effects of acetochlor on earthworms (*Eisenia fetida*) by mediating the signaling pathway.

Dicopper(II) Complexes of p-Cresol-2,6-Bis(dpa) Amide-Tether Ligands: Large Enhancement of Oxidative DNA Cleavage, Cytotoxicity, and Mechanistic Insight by Intracellular Visualization.

Exposures to 2,4-Dichlorophenoxyacetic acid with or without endotoxin upregulate small cell lung cancer pathway.

Uremic Toxins in Organ Crosstalk.

Complex Coronary Instant Chronic Total Occlusion Lesions: Oxidative Stress, Inflammation, and Coronary Stent Lengths.

Impact of Chronic Exposure to Sublethal Doses of Glyphosate on Honey Bee Immunity, Gut Microbiota and Infection by Pathogens.

Chlorination decreases acute toxicity of iodophenols through the formation of iodate and chlorinated aliphatic disinfection byproducts.

Chronic pesticide exposure elicits a subtle carry-over effect on the metabolome of *Aurelia coerulea* ephyrae.

Matrix composition during ozonation of N-containing substances may influence the acute toxicity towards *Daphnia magna*.

Weeds as Pathogen Hosts and Disease Risk for Crops in the Wake of a Reduced Use of Herbicides: Evidence from Yam (*Dioscorea alata*) Fields and *Colletotrichum* Pathogens in the Tropics.

Combined Ubisol-Q(10) and Ashwagandha Root Extract Target Multiple Biochemical Mechanisms and Reduces Neurodegeneration in a Paraquat-Induced Rat Model of Parkinson's Disease.

Ethanol extract of *Vitellaria paradoxa* (Gaertn, F) leaves protects against sodium arsenite - induced toxicity in male wistar rats.

Tetrahydroxystilbene glucoside protects against sodium azide-induced mitochondrial dysfunction in human neuroblastoma cells.

Paraquat poisoning in Andaman and Nicobar Islands - Government must intervene.

Prolonged cognitive dysfunction in patient with splenic lesion of the corpus callosum caused by glufosinate ammonium poisoning.

AGENT ORANGE-INDUCED Anaplastic Large-Cell Lymphoma (ALCL) with Cutaneous Involvement.

The Association between Child and Parent Psychiatric Disorders in Families Exposed to Flood and/or Dioxin.

Acute toxicity and morphology alterations of glyphosate-based herbicides to *Daphnia magna* and *Cyclops vicinus*.

Borax-loaded injectable alginate hydrogels promote muscle regeneration in vivo after an injury.

In vitro and in vivo digestion of red cured cooked meat: oxidation, intestinal microbiota and fecal metabolites.

Dysregulation of murine immune functions on inhalational exposure to ammonia, dimethyl disulfide, 3-methylindole, or propionic acid.

PCB and TCDD derived embryonic cardiac defects result from a novel AhR pathway.

Toxicity of boric acid, borax and other boron containing compounds: A review.

Toxicokinetic analysis of commonly used pesticides using data on acute poisoning cases from Hyderabad, South India.

Zingiber officinale ethanolic extract attenuates oxidative stress, steroidogenic gene expression alterations, and testicular histopathology induced by sodium arsenite in male rats.

Impact of multigenerational exposure to AgNO₃ or NM300K Ag NPs on antioxidant defense and oxidative stress in *Caenorhabditis elegans*.

Acute liver injury associated with Oxyfluorfen toxicity.

Adaptation of *Dinoroseobacter shibae* to oxidative stress and the specific role of RirA.

Assessment of Commercial Fungicides against Onion (*Allium cepa*) Basal Rot Disease Caused by *Fusarium oxysporum* f. sp. *cepae* and *Fusarium acutatum*.

Experimental acute arsenic toxicity in Balb/c mice: organic markers and splenic involvement.

Therapeutic effects of TP5, a Cdk5/p25 inhibitor, in in vitro and in vivo models of Parkinson's disease.

Acute and chronic effects of Titanium dioxide (TiO₂) PM₁ on honey bee gut microbiota under laboratory conditions.

Detoxification of Reactive Aldehydes by Alda-1 Treatment Ameliorates Experimental Autoimmune Encephalomyelitis in Mice.

Opposing Effects of TGF β ² and BMP in the Pulmonary Vasculature in Congenital Diaphragmatic Hernia.

Immune and Nervous Systems Interaction in Endocrine Disruptors Toxicity: The Case of Atrazine.

Saul-Wilson Syndrome Missense Allele Does Not Show Obvious Golgi Defects in a *C. elegans* Model.

HGF-Modified Dental Pulp Stem Cells Mitigate the Inflammatory and Fibrotic Responses in Paraquat-Induced Acute Respiratory Distress Syndrome.

Sodium arsenite induces spatial learning and memory impairment associated with oxidative stress and activates the Nrf2/PPAR γ ³ pathway against oxidative injury in mice hippocampus.

Toxicity studies of hexachlorobenzene administered by gavage to female Sprague Dawley (Hsd:Sprague Dawley SD) rats.

Oxidative testicular injury: effect of L-leucine on redox, cholinergic and purinergic dysfunctions, and dysregulated metabolic pathways.

Novel phenylpyrimidine derivatives containing a hydrazone moiety protect rice seedlings from injury by metolachlor.

Effect of uncouplers of oxidative phosphorylation on metabolism of propionate in liver explants from dairy cows.

A novel study for joint toxicity of typical aromatic compounds in coal pyrolysis wastewater by *Tetrahymena thermophile*.

Effects of 2,4,6-trichlorophenol and its intermediates on acute toxicity of sludge from wastewater treatment and functional gene expression.

Bach1 plays an important role in angiogenesis through regulation of oxidative stress.

Dioxins and dioxin-like PCBs in the ambient air of the Valencian Region (Spain): Levels, human exposure, and risk assessment.

Simultaneous removal of ammonia and volatile organic compounds from composting of dead pigs and manure using pilot-scale biofilter.

Beyond the Tip of the Blade: An Investigation of Upper Extremity Machete Injuries in Honduras.

Antioxidant effects of *Embllica officinalis* and *Zingiber officinalis* on arsenic and lead induced toxicity on Albino rats.

Heavy Metals and Pesticides Toxicity in Agricultural Soil and Plants: Ecological Risks and Human Health Implications.

The Impacts of Illegal Toxic Waste Dumping on Children's Health: A Review and Case Study from Pasir Gudang, Malaysia.

Endocrine Disruptor Potential of Short- and Long-Chain Perfluoroalkyl Substances (PFASs)-A Synthesis of Current Knowledge with Proposal of Molecular Mechanism.

Environmental Toxins Found Historically in the Polycythemia Vera Cluster Area and their Potential for Inducing DNA Damage.

Genome-wide association study in hexaploid wheat identifies novel genomic regions associated with resistance to root lesion nematode (*Pratylenchus thornei*).

Dual Roles of GSNOR1 in Cell Death and Immunity in Tetraploid *Nicotiana tabacum*.

Importance of monitoring arsenic methylation metabolism in acute promyelocytic leukemia patients receiving the treatment of arsenic trioxide.

WITHDRAWN: Trimethylation of H4K20 regulated by RBL1/KMT5B/E2F3 signaling pathway played a protective role in attenuating paraquat-induced acute lung injury.

Benfuresate induces developmental toxicity in zebrafish larvae by generating apoptosis and pathological modifications.

The insulin-like growth factor system: A target for endocrine disruptors?

Tetrachlorobenzoquinone exposure triggers ferroptosis contributing to its neurotoxicity.

Effect of chemical alternatives to methyl bromide on soil-borne disease incidence and fungal populations in Spanish strawberry nurseries: A long-term study.

Design of epidermal growth factor immobilization on 3D biocompatible scaffolds to promote tissue repair and regeneration.

Report of a Case of Paraquat Poisoning and Mediastinal Involvement.

Cyclophosphamide arrhythmogenicity testing using human-induced pluripotent stem cell-derived cardiomyocytes.

Simultaneous Determination of Multiple Reactive Carbonyl Species in High Fat Diet-Induced Metabolic Disordered Mice and the Inhibitory Effects of Rosemary on Carbonyl Stress.

Quercetin Alleviates Oxidative Damage by Activating Nuclear Factor Erythroid 2-Related Factor 2 Signaling in Porcine Enterocytes.

Downregulation of epithelial DUOX1 in chronic obstructive pulmonary disease.

Targeted Metabolomics Identifies Plasma Biomarkers in Mice with Metabolically Heterogeneous Melanoma Xenografts.

A directional 3D neurite outgrowth model for studying motor axon biology and disease.

Acute Changes in Thyroid Hormone Levels among Thai Pesticide Sprayers.

Acute 2,3,7,8-Tetrachlorodibenzo-p-dioxin exposure in adult mice does not alter the morphology or inflammatory response of cortical microglia.

Identification of molecular toxicity pathways across early life-stages of zebrafish exposed to PCB126 using a whole transcriptomics approach.

PCB153 reduces apoptosis in primary cultures of murine pituitary cells through the activation of NF- κ B mediated by PI3K/Akt.

Oxidative Stress and Lipid Mediators Modulate Immune Cell Functions in Autoimmune Diseases.

Lysosomal SLC46A3 modulates hepatic cytosolic copper homeostasis.

Acrolein and other toxicant exposures in relation to cardiovascular disease among marijuana and tobacco smokers in a longitudinal cohort of HIV-positive and negative adults.

Genome Sequence of *Acetobacter tropicalis* DmPark25_167, a Bacterium Isolated from a *Drosophila melanogaster* Genetic Model of Parkinson's Disease.

Protective effect of melatonin against herbicides-induced hepatotoxicity in rats.

Disturbances in Microbial and Metabolic Communication across the Gut-Liver Axis Induced by a Dioxin-like Pollutant: An Integrated Metagenomics and Metabolomics Analysis.

Chlorogenic acid abates male reproductive dysfunction in arsenic-exposed mice via attenuation of testicular oxido-inflammatory stress and apoptotic responses.

Glyphosate disrupts sperm quality and induced DNA damage of rainbow trout (*Oncorhynchus mykiss*) sperm.

[Risks associated with the consumption of inorganic and organic arsenic].

Endocrine disrupting chemicals and reproductive disorders in women, men, and animal models.

Identification of odor biomarkers in irradiation injury urine based on headspace SPME-GC-MS.

Evaluation of aryl hydrocarbon receptor expression in oral squamous cell carcinoma and normal oral mucosa using western blot.

Performance of extracorporeal membrane oxygenation in patients with fatal paraquat poisoning: grasp for straws?

Role of epithelial-to-mesenchymal transition in the pulmonary fibrosis induced by paraquat in rats.

Oleuropein attenuates the 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-perturbing effects on pancreatic β -cells.

Cruciferous vegetables (*Brassica oleracea*) confer cytoprotective effects in *Drosophila* intestines.

Short-term metabolic disruptions in urine of mouse models following exposure to low doses of oxygen ion radiation.

Liquid Biopsies in a Veteran Patient Population With Advanced Prostate and Lung Non-Small Cell Carcinomas: A New Paradigm and Unique Challenge in Personalized Medicine.

Renal tubular injury induced by glyphosate combined with hard water: the role of cytosolic phospholipase A2.

Pro-inflammatory Mediators and Oxidative Stress: Therapeutic Markers for Recurrent Angina Pectoris after Coronary Artery Stenting in Elderly Patients.

Effects of heat stress on the biological Maillard reaction, oxidative stress, and occurrence of internal browning in Japanese radish (*Raphanus sativus* L.).

Tetrachlorobisphenol A induced immunosuppression and uterine injury in mice.

Neurophysiological and behavioral responses of blacklegged ticks to host odors.

G protein-coupled receptor kinase 2 modifies the ability of *Caenorhabditis elegans* to survive oxidative stress.

Transgenerational disease specific epigenetic sperm biomarkers after ancestral exposure to dioxin.

Military service and related risk factors for amyotrophic lateral sclerosis.

The Effect of Organophosphate Exposure on Neuronal Cell Coenzyme Q(10) Status.

Identify the Early Predictor of Mortality in Patients with Acute Paraquat Poisoning.

Epigenome-wide association study for atrazine induced transgenerational DNA methylation and histone retention sperm epigenetic biomarkers for disease.

Roundup causes embryonic development failure and alters metabolic pathways and gut microbiota functionality in non-target species.

Is Gluten the Only Culprit for Non-Celiac Gluten/Wheat Sensitivity?

Effects on Ultrastructure, Composition and Specific Surface Area of the Gills of *Odontesthes bonariensis* Under Subchronic Glyphosate-Based Herbicide Exposure.

A 90-day subchronic toxicity study of transgenic cotton expressing Cry1Ac, Cry2A and CP4-EPSPS proteins in Sprague-Dawley rats.

The impact and toxicity of glyphosate and glyphosate-based herbicides on health and immunity.

Renal tubular injury by glyphosate-based herbicide.

Exposure to the herbicide 2,4-dichlorophenoxyacetic acid impairs mitochondrial function, oxidative status, and behavior in adult zebrafish.

Impact of herbicide pretilachlor on reproductive physiology of walking catfish, *Clarias batrachus* (Linnaeus).

Glyphosate-based herbicide formulations and reproductive toxicity in animals.

Ion transport mechanisms for smoke inhalation-injured airway epithelial barrier.

Mucosal-associated invariant T-Cell (MAIT) activation is altered by chlorpyrifos- and glyphosate-treated commensal gut bacteria.

Neuroprotective Metabolites from Vietnamese Marine Derived Fungi of *Aspergillus* and *Penicillium* Genera.

Chronic Atrazine Exposure Beginning Prenatally Impacts Liver Function and Sperm Concentration With Multi-Generational Consequences in Mice.

Impairment of motor coordination and interneuron migration in perinatal exposure to glufosinate-ammonium.

The glyphosate formulation Roundup® LB plus influences the global metabolome of pig gut microbiota in vitro.

[Protective effects of taurine on neurons and microglia in Parkinson's disease-like mouse model induced by paraquat].

Acrolein: A Potential Mediator of Oxidative Damage in Diabetic Retinopathy.

Lanostane Triterpenoid Metabolites from a *Penares* sp. Marine Sponge Protect Neuro-2a Cells against Paraquat Neurotoxicity.

Spn modulates lipid droplet content in adult *Drosophila* glial cells and protects against paraquat toxicity.

ROBO2 signaling in lung development regulates SOX2/SOX9 balance, branching morphogenesis and is dysregulated in nitrofen-induced congenital diaphragmatic hernia.

Piperine-Coated Gold Nanoparticles Alleviate Paraquat-Induced Neurotoxicity in *Drosophila melanogaster*.

Î-opioid receptor activation protects against Parkinson's disease-related mitochondrial dysfunction by enhancing PINK1/Parkin-dependent mitophagy.

[Simultaneous determination of paraquat and diquat in plasma and urine by ion chromatography-triple quadrupole mass spectrometry].

Historical trends of the ecotoxicological pesticide risk from the main grain crops in Rolling Pampa (Argentina).

[Atrazine changes meiosis and reduces spermatogenesis in male mice].

Quantitative in Vitro to in Vivo Extrapolation (QIVIVE) for Predicting Reduced Anogenital Distance Produced by Anti-Androgenic Pesticides in a Rodent Model for Male Reproductive Disorders.

A rabbit model for evaluating ocular damage from acrolein toxicity in vivo.

Cellular injury leading to oxidative stress in acute poisoning with potassium permanganate/oxalic acid, paraquat, and glyphosate surfactant herbicide.

Reduced Dpp expression accelerates inflammation-mediated neurodegeneration through activated glial cells during altered innate immune response in *Drosophila*.

Reduction by, ligand exchange among, and covalent binding to glutathione and cellular thiols link metabolism and disposition of dietary arsenic species with toxicity.

DP-2216-6 maize does not adversely affect rats in a 90-day feeding study.

Cigarette Smoke Extract and Its Cytotoxic Factor Acrolein Inhibit Nitric Oxide Production in Human Vascular Endothelial Cells.

Acute and chronic toxicity of 2,4-D and fipronil formulations (individually and in mixture) to the Neotropical cladoceran *Ceriodaphnia silvestrii*.

Kidney developmental effects of metal-herbicide mixtures: Implications for chronic kidney disease of unknown etiology.

Assessment of lethal and sublethal effects of imidacloprid, ethion, and glyphosate on aversive conditioning, motility, and lifespan in honey bees (*Apis mellifera* L.).

Acrolein in cigarette smoke attenuates the innate immune responses mediated by surfactant protein D.

LncRNA NR_030777 Alleviates Paraquat-Induced Neurotoxicity by Regulating Zfp326 and Cpne5.

Otreotide alleviates pancreatic damage caused by paraquat in rats by reducing inflammatory responses and oxidative stress.

Toxicological impacts of herbicide paraquat dichloride on histological profile (gills, liver, and kidney) of freshwater fish *Channa punctatus* (Bloch).

Waterborne agrichemicals compromise the anti-predatory behavior of zebrafish.

Combined effects of exposure to sub-lethal concentration of the insecticide chlorpyrifos and the herbicide glyphosate on the biochemical changes in the freshwater crayfish *Pontastacus leptodactylus*.

New Lead Discovery of Herbicide Safener for Metolachlor Based on a Scaffold-Hopping Strategy.

Differential effects of pollution on adult and recruits of a canopy-forming alga: implications for population viability under low pollutant levels.

Injury to dopaminergic neurons development via the Lmx1a/Wnt1 autoregulatory loop induced by simazine.

Paraquat induces pulmonary fibrosis through Wnt/ β -catenin signaling pathway and myofibroblast differentiation.

FoxF1 protects rats from paraquat-evoked lung injury following HDAC2 inhibition via the microRNA-342/KLF5/ β /NF- κ B p65 axis.

The dietary risk index system: a tool to track pesticide dietary risks.

Toxicities of Neonicotinoid-Containing Pesticide Mixtures on Nontarget Organisms.

Life-History Traits Response to Effects of Fish Predation (Kairomones), Fipronil and 2,4-D on Neotropical Cladoceran *Ceriodaphnia silvestrii*.

Evaluation of Juvenile Freshwater Mussel Sensitivity to Multiple Forms of Florpyrauxifen-Benzyl.

Chronic exposure of human glioblastoma tumors to low concentrations of a pesticide mixture induced multidrug resistance against chemotherapy agents.

Inhibition of the antioxidant enzyme PRDX1 activity promotes MPP(+)-induced death in differentiated SH-SY5Y cells and may impair its colocalization with eEF1A2.

Knockdown of TLR4 Represses the Paraquat-Induced Neuroinflammation and Microglial M1 Polarization.

Transcriptome analysis of *Penaeus vannamei* hepatopancreas reveals differences in toxicity mechanisms between phoxim and prometryne.

Developmental toxicity of chlorpropham induces pathological changes and vascular irregularities in zebrafish embryos.

The PARK2 Mutation Associated with Parkinson's Disease Enhances the Vulnerability of Peripheral Blood Lymphocytes to Paraquat.

Individual and mixture toxicity of carbofuran and diuron to the protozoan *Paramecium caudatum* and the cladoceran *Ceriodaphnia silvestrii*.

Acrolein-Trapping Mechanism of Theophylline in Green Tea, Coffee, and Cocoa: Speedy and Successful.

Larval pesticide exposure impacts monarch butterfly performance.

Exposure to glyphosate during pregnancy induces neurobehavioral alterations and downregulation of Wnt5a-CaMKII pathway.

Perinatal exposure to glyphosate or a glyphosate-based formulation disrupts hormonal and uterine milieu during the receptive state in rats.

Ovarian mitochondrial and oxidative stress proteins are altered by glyphosate exposure in mice.

Absence of glyphosate-induced effects on ovarian folliculogenesis and steroidogenesis.

Hydrogen sulfide alleviates oxidative stress injury and reduces apoptosis induced by MPP(+) in Parkinson's disease cell model.

Brain alterations in GABA, glutamate and glutamine markers after chronic atrazine exposure in the male albino rat.

Depletion of NK cells attenuates paraquat-induced acute lung injury by manipulating macrophage polarization.

Determination of arsenicals in mouse tissues after simulated exposure to arsenic from rice for sixteen weeks and the effects on histopathological features.

Paraquat increases Interleukin-1 β in hippocampal dentate gyrus to impair hippocampal neurogenesis in adult mice.

Polyps of the Jellyfish *Aurelia aurita* Are Unaffected by Chronic Exposure to a Combination of Pesticides.

Orthotopic foetal lung tissue direct injection into lung showed a preventive effect against paraquat-induced acute lung injury in mice.

[Nursing care of esophagitis dissecans superficialis caused by acute paraquat poisoning].

Chemical and Genetic Zebrafish Models to Define Mechanisms of and Treatments for Dopaminergic Neurodegeneration.

Systemic Paraquat Intoxication Presenting with Peripheral Ulcerative Keratitis: A Case Report and Literature Review.

A Pilot Study to Assess Inhalation Exposures among Sugarcane Workers in Guatemala: Implications for Chronic Kidney Disease of Unknown Origin.

AhR-activating pesticides increase the bovine ABCG2 efflux activity in MDCKII-bABCG2 cells.

Glyphosate-induced Delayed Pyloric Obstruction, Ulcer and Scar Changes.

Effect of zinc supplementation on chronic hepatorenal toxicity following oral exposure to glyphosate-based herbicide (Bushfire[®]) in rats.

Correction to: Response to comments on: Perinatal exposure to a glyphosate-based herbicide impairs female reproductive outcomes and induces second-generation adverse effects in Wistar rats.

The Nrf2-mediated defense mechanism associated with HFE genotype limits vulnerability to oxidative stress-induced toxicity.

Pesticides used in Europe and autism spectrum disorder risk: can novel exposure hypotheses be formulated beyond organophosphates, organochlorines, pyrethroids and carbamates? - A systematic review.

Does pendimethalin develop in pancreatic cancer induced inflammation?

Difficulties in establishing a causal link between chemical exposures and cancer cannot be overcome by court assessments.

Characterization of a Parkinson's disease rat model using an upgraded paraquat exposure paradigm.

Glyphosate and its formulation Roundup impair pig oocyte maturation.

Albumin Protects Lung Cells against Acrolein Cytotoxicity and Acrolein-Adducted Albumin Increases Heme Oxygenase 1 Transcripts.

Combined signaling of NF- κ B and IL-17 contributes to Mesenchymal stem cells-mediated protection for Paraquat-induced acute lung injury.

The MUC5B Mucin Is Involved in Paraquat-Induced Lung Inflammation.

Mitochondria-Associated Degradation Pathway (MAD) Function beyond the Outer Membrane.

Evaluation of buccal damage associated with acute inhalation exposure to 2,4-dichlorophenoxyacetic acid (2,4-D) in mice.

Protective effects of *Lactobacillus fermentum* U-21 against paraquat-induced oxidative stress in *Caenorhabditis elegans* and mouse models.

Influence of strengthened hemoperfusion combined with continuous venovenous hemofiltration on prognosis of patients with acute paraquat poisoning: SHP+CVVH improve prognosis of acute PQ patients.

[Treatment of "hydration therapy" for acute paraquat poisoning].

Changes in thyroid hormone levels and related gene expressions in embryo-larval zebrafish exposed to binary combinations of bifenthrin and acetochlor.

Link between increased cellular senescence and extracellular matrix changes in COPD.

Rapid toxicity assessment of six antifouling booster biocides using a microplate-based chlorophyll fluorescence in *Undaria pinnatifida* gametophytes.

Systems Genetics and Systems Biology Analysis of Paraquat Neurotoxicity in BXD Recombinant Inbred Mice.

Haloxyfop-P-methyl induces developmental defects in zebrafish embryos through oxidative stress and anti-vasculogenesis.

The Effect of Herbicide Formulations and Herbicide-Adjuvant Mixtures on Aquatic Food Web Species of the Sacramento-San Joaquin Delta, California, USA.

Long-term effects of in ovo exposure to an environmentally relevant dose of atrazine on the thyroid gland of *Caiman latirostris*.

The enantioselective enrichment, metabolism, and toxicity of fenoxaprop-ethyl and its metabolites in zebrafish.

Embryotoxicity of atrazine and its degradation products to early life stages of zebrafish (*Danio rerio*).

[Study on the protective effect and mechanism of somatostatin on renal injury in paraquat intoxicated mice].

SSADH Variants Increase Susceptibility of U87 Cells to Mitochondrial Pro-Oxidant Insult.

Control of the neuroprotective Lipocalin Apolipoprotein D expression by alternative promoter regions and differentially expressed mRNA 5' UTR variants.

Agrochemicals and neurogenesis.

Induction of Autophagy by Vasicinone Protects Neural Cells from Mitochondrial Dysfunction and Attenuates Paraquat-Mediated Parkinson's Disease Associated α -Synuclein Levels.

Investigation of simple, objective, and effective indicators for predicting acute paraquat poisoning outcomes.

Increased basal antioxidant levels in RCAN1 - deficient mice lowers oxidative injury after acute paraquat insult.

[Predictive value of early indicators changes in blood test on the prognosis of patients with acute paraquat poisoning].

Exploration of therapeutic role of montelukast and dexamethasone combination against paraquat induced inhalational toxicity.

Osteonecrosis of Femoral Head, An Overlooked Long-Term Complication after Paraquat Intoxication: A Retrospective Cohort Study.

Pterostilbene as a protective antioxidant attenuates diquat-induced liver injury and oxidative stress in 21-day-old broiler chickens.

Glyphosate Induces Metaphase II Oocyte Deterioration and Embryo Damage by Zinc Depletion and Overproduction of Reactive Oxygen Species.

Exposure to inorganic arsenic and its methylated metabolites alters metabolomics profiles in INS-1 832/13 insulinoma cells and isolated pancreatic islets.

Glyphosate induces lymphocyte cell dysfunction and apoptosis via regulation of miR-203 targeting of PIK3R1 in common carp (*Cyprinus carpio* L.).

Accounting for Multiple Comparisons in Statistical Analysis of the Extensive Bioassay Data on Glyphosate.

Cytogenotoxic effect of propanil using the *Lens culinaris* Med and *Allium cepa* L test.

Sub-acute toxicological and behavioural effects of two candidate therapeutics, cinnamaldehyde and eugenol, for treatment of ESBL producing-quinolone resistant pathogenic Enterobacteriaceae.

Exposure to Spectracide[®] causes behavioral deficits in *Drosophila melanogaster*: Insights from locomotor analysis and molecular modeling.

Atrazine induces penis abnormalities including hypospadias in mice.

Maternal glyphosate exposure causes autism-like behaviors in offspring through increased expression of soluble epoxide hydrolase.

[Clinical analysis of 15 cases of acute glufosinate poisoning].

[Effect of bone marrow mesenchymal stem cells on paraquat-induced pulmonary fibrosis in rats].

[The expression of Nrf2 in the lung tissue of rats with acute diquat poisoning and the distribution of diquat in lungs].

Relationship between agrochemical compounds and mammary gland development and breast cancer.

Transgenerational epigenetic effects from male exposure to endocrine-disrupting compounds: a systematic review on research in mammals.

Integrin CD11b mediates locus coeruleus noradrenergic neurodegeneration in a mouse Parkinson's disease model.

Prenatal exposure to glufosinate ammonium disturbs gut microbiome and induces behavioral abnormalities in mice.

Environmental Pollution, Oxidative Stress and Thioretinaco Ozonide: Effects of Glyphosate, Fluoride and Electromagnetic Fields on Mitochondrial Dysfunction in Carcinogenesis, Atherogenesis and Aging.

Dynamic assessment of lung injury by ultrasound in patients with acute paraquat poisoning.

Comparison of the effects of resveratrol and its derivative pterostilbene on hepatic oxidative stress and mitochondrial dysfunction in piglets challenged with diquat.

Correction to: Lack of adverse effects in subchronic and chronic toxicity/carcinogenicity studies on the glyphosate-resistant genetically modified maize NK603 in Wistar Han RCC rats.

Acrolein contributes to urothelial carcinomas in patients with chronic kidney disease.

Effects of Herbicides on Flowering.

Ecotoxicological effects of new C-substituted derivatives of N-phosphonomethylglycine (glyphosate) and their preliminary evaluation towards herbicidal application in agriculture.

Effect of Exposure to Agent Orange on the Risk of Monoclonal Gammopathy and Subsequent Transformation to Multiple Myeloma: A Single-Center Experience From the Veterans Affairs Hospital, Detroit.

Reproductive cycle progression arrest and modification of cell morphology (shape and biovolume) in the alga *Pseudokirchneriella subcapitata* exposed to metolachlor.

Morphometric and proteomic responses of early-life stage rainbow trout (*Oncorhynchus mykiss*) to the aquatic herbicide diquat dibromide.

Pre- and postnatal exposure to glyphosate-based herbicide causes behavioral and cognitive impairments in adult mice: evidence of cortical and hippocampal dysfunction.

The endoplasmic reticulum stress and related signal pathway mediated the glyphosate-induced testosterone synthesis inhibition in TM3 cells.

Sub-chronic exposure to Kalach 360 SL, Glyphosate-based Herbicide, induced bone rarefaction in female Wistar rats.

[One case successfully rescued acute poisoning caused by misadministration of large amount of glufosinate].

Paternal exposure to a common herbicide alters the behavior and serotonergic system of zebrafish offspring.

Serum microRNA profiles among dioxin exposed veterans with monoclonal gammopathy of undetermined significance.

Comparing passive dosing and solvent spiking methods to determine the acute toxic effect of pentachlorophenol on *Daphnia magna*.

Cyclosporine attenuates Paraquat-induced mitophagy and pulmonary fibrosis.

A novel sigma class glutathione S-transferase gene in freshwater planarian *Dugesia japonica*: cloning, characterization and protective effects in herbicide glyphosate stress.

Postnatal zinc or paraquat administration increases paraquat or zinc-induced loss of dopaminergic neurons: insight into augmented neurodegeneration.

Correlation between neutrophil gelatinase-associated lipocalin and soluble CD14 subtype on the prognosis evaluation of acute paraquat poisoning patients.

The Ocular Protective Effects of Nano/Submicron Particles Prepared from *Lycium barbarum* Fruits Against Oxidative Stress in an Animal Model.

Exposure to diclofop-methyl induces cardiac developmental toxicity in zebrafish embryos.

HMGB1 Mediates Paraquat-Induced Neuroinflammatory Responses via Activating RAGE Signaling Pathway.

Toxicity to *Rhinella arenarum* tadpoles (Anura, Bufonidae) of herbicide mixtures commonly used to treat fallow containing resistant weeds: glyphosate-dicamba and glyphosate-flurochloridone.

Biochemical responses and DNA damage induced by herbicide QYR301 in earthworm (*Eisenia fetida*).

To evaluate the toxicity of atrazine on the freshwater microalgae *Chlorella* sp. using sensitive indices indicated by photosynthetic parameters.

Glyphosate-based herbicide exposure during pregnancy and lactation malprograms the male reproductive morphofunction in F1 offspring.

Where ferroptosis inhibitors and paraquat detoxification mechanisms intersect, exploring possible treatment strategies.

Female Guinea Pig Model for Cough Studies and Its Response to Most Common Tussive Substances.

Exposure of the African mound building termite, *Macrotermes bellicosus* workers to commercially formulated 2,4-D and atrazine caused high mortality and impaired locomotor response.

[Clinical analysis of seven cases of acute glufosinate poisoning].

[Autophagic dysfunction contributes to α -synuclein accumulation in dopaminergic neurons induced by paraquat].

Roundup-induced biochemical and histopathological changes in the liver and kidney of rats: the ameliorative effects of *Linum usitatissimum* oil.

Proconvulsant effect of trans-cinnamaldehyde in pentylenetetrazole-induced kindling model of epilepsy: The role of TRPA1 channels.

Acute toxicity assessment of arsenic, chromium and almix 20WP in *Euphyctis cyanophlyctis* tadpoles.

Attenuation of paraquat-induced inflammation by inhibitors of phosphorylation of mitogen-activated protein kinases in BV(2) microglial cells.

Sestrin2 as Serum Protein Marker and Potential Therapeutic Target for Parkinson's Disease.

Acute pesticide poisoning amongst adolescent girls and women in northern Tanzania.

Hyperamylasemia as an early predictor of mortality in patients with acute paraquat poisoning.

Dipteryx alata, a tree native to the Brazilian Cerrado, is sensitive to the herbicide nicosulfuron.

Intranasal glyphosate-based herbicide administration alters the redox balance and the cholinergic system in the mouse brain.

Association of urinary metabolites of organophosphate and pyrethroid insecticides, and phenoxy herbicides with endometriosis.

Soybean isoflavones prevent atrazine-induced neurodegenerative damage by inducing autophagy.

Acrolein-induced apoptosis of smooth muscle cells through NEAT1-Bmal1/Clock pathway and a protection from asparagus extract.

The effects of glyphosate and AMPA on the mediterranean mussel *Mytilus galloprovincialis* and its microbiota.

RNA-seq analysis of testes from flurochloridone-treated rats.

Potential Role of Selenium Against Hepatotoxicity Induced by 2,4-Dichlorophenoxyacetic Acid in Albino Wistar Rats.

Increased severity associated with tallowamine in acute glyphosate poisoning.

Parkinson's Disease in Louisiana, 1999-2012: Based on Hospital Primary Discharge Diagnoses, Incidence, and Risk in Relation to Local Agricultural Crops, Pesticides, and Aquifer Recharge.

Exposure to glyphosate and risk of non-Hodgkin lymphoma and multiple myeloma: an updated meta-analysis.

[CT manifestations and prognosis of acute paraquat induced lung injury].

[The assessment value of urinary NGAL combined with blood NLR in the early prognosis of patients with acute paraquat poisoning].

Glyphosate-based herbicide impairs energy metabolism and increases autophagy in C6 astrogloma cell line.

Human amniotic mesenchymal stem cells alleviate paraquat-induced pulmonary fibrosis in rats by inhibiting the inflammatory response.

2,4-Dichlorophenoxyacetic Thiosemicarbazides as a New Class of Compounds Against Stomach Cancer Potentially Intercalating with DNA.

A comprehensive analysis of the animal carcinogenicity data for glyphosate from chronic exposure rodent carcinogenicity studies.

Toxicology of paraquat and pharmacology of the protective effect of 5-hydroxy-1-methylhydantoin on lung injury caused by paraquat based on metabolomics.

Chronic pesticide mixture exposure including paraquat and respiratory outcomes among Colombian farmers.

Assessment of anilofos-induced mutagenicity in bone marrow and germ cells of Swiss albino mice.

Electrocardiographic abnormalities associated with acute glyphosate toxicity.

Genotoxicity of mixtures of glyphosate with 2,4-dichlorophenoxyacetic acid chemical forms towards *Cnesterodon decemmaculatus* (Pisces, Poeciliidae).

Effects of L-Glufosinate-ammonium and temperature on reproduction controlled by neuroendocrine system in lizard (*Eremias argus*).

Chemical behaviors and toxic effects of ametryn during the UV/chlorine process.

Primary hippocampal estrogenic dysfunction induces synaptic proteins alteration and neuronal cell death after single and repeated paraquat exposure.

Effects of a mixture of low doses of atrazine and benzo[a]pyrene on the rat seminiferous epithelium either during or after the establishment of the blood-testis barrier in the rat seminiferous tubule culture model.

Effects of acrolein in comparison to its prodrug cyclophosphamide on human primary endothelial cells in vitro.

In vitro effects of glyphosate and Roundup on Sertoli cell physiology.

The surfactant polyethoxylated tallowamine (POEA) reduces lifespan and inhibits fecundity in *Drosophila melanogaster*- In vivo and in vitro study.

Hydrogen Sulfide Protects against Paraquat-Induced Acute Liver Injury in Rats by Regulating Oxidative Stress, Mitochondrial Function, and Inflammation.

Seasonal variations in the dose-response relationship of acetylcholinesterase activity in freshwater fish exposed to chlorpyrifos and glyphosate.

Toxic effects of fluridone on early developmental stages of Japanese Medaka (*Oryzias latipes*).

A Biostimulant Obtained from the Seaweed *Ascophyllum nodosum* Protects *Arabidopsis thaliana* from Severe Oxidative Stress.

Evaluation of genotoxicity after acute and chronic exposure to 2,4-dichlorophenoxyacetic acid herbicide (2,4-D) in rodents using machine learning algorithms.

Aberrant miR-219-5p is correlated with TLR4 and serves as a novel biomarker in patients with multiple organ dysfunction syndrome caused by acute paraquat poisoning.

The protective impact of Trans-Cinnamaldehyde (TCA) against the IL-1b induced inflammation in in vitro osteoarthritis model by regulating PI3K/AKT pathways.

Continuous hemoperfusion relieves pulmonary fibrosis in patients with acute mild and moderate paraquat poisoning.

Analysis of microRNA expression profiling during paraquat-induced injury of murine lung alveolar epithelial cells.

Comparative acute toxicity of glyphosate-based herbicide (GBH) to *Daphnia magna*, *Tisbe longicornis*, and *Emerita analoga*.

Secretogranin III upregulation is involved in parkinsonian toxin-mediated astroglia activation.

The herbicide alachlor severely affects photosystem function and photosynthetic gene expression in the marine dinoflagellate *Prorocentrum minimum*.

Morphoanatomical injuries in *Pistia stratiotes* L. (Araceae) as a result of exposure to clomazone in water.

Immunosuppressive drugs to reduce the mortality rate in patients with moderate to severe paraquat poisoning: A Meta-analysis.

Antioxidant studies of citric acid and citrus fruits towards paraquat by cyclic voltammetry: An antidote of paraquat poisoning.

Fetal outcomes after intentional ingestion of paraquat: A case report.

Comment on response from Milesi et al. to 'Perinatal exposure to a glyphosate-based herbicide impairs female reproductive outcomes and induces second-generation adverse effects in Wistar rats'.

Frequently encountered pesticides can cause multiple disorders in developing worker honey bees.

Oxidative stress, histopathological alterations and anti-oxidant capacity in different tissues of largemouth bass (*Micropterus salmoides*) exposed to a newly developed sodium carbonate peroxyhydrate granular algaecide formulated with hydrogen peroxide.

DNA damage in kidney and parenchymal and non-parenchymal liver cells of adult Wistar rats after subchronic oral treatment with tembotrione.

A Synthetic Snake-Venom-Based Tripeptide Protects PC12 Cells from the Neurotoxicity of Acrolein by Improving Axonal Plasticity and Bioenergetics.

Involvement of ADAM10 in acrolein-induced astrocytic inflammation.

Transgene Stacking as Effective Tool for Enhanced Disease Resistance in Plants.

Environmentally relevant atrazine exposures cause DNA damage in cells of the lateral antennules of crayfish (*Faxonius virilis*).

Magnesium supplementation ameliorates toxic effects of 2,4-dichlorophenoxyacetic acid in rat model.

Early Postnatal Exposure to Paraquat and Maneb in Mice Increases Nigrostriatal Dopaminergic Susceptibility to a Re-challenge with the Same Pesticides at Adulthood: Implications for Parkinson's Disease.

Effects of DNA polymerase kappa and mismatch repair on dose-responses of chromosome aberrations induced by three oxidative genotoxins in human cells.

Posterior reversible leukoencephalopathy after cyanamide overdose.

Ischemic stroke disrupts the endothelial glycocalyx through activation of proHPSE via acrolein exposure.

Disease-associated acrolein: A possible diagnostic and therapeutic substrate for in vivo synthetic chemistry.

Protective Effects of Cinnamaldehyde against Mesenteric Ischemia-Reperfusion-Induced Lung and Liver Injuries in Rats.

Evaluation of antifungal activity of cinnamaldehyde against *Cryptococcus neoformans* var. *grubii*.

Anti-Allergic Potential of Cinnamaldehyde via the Inhibitory Effect of Histidine Decarboxylase (HDC) Producing *Klebsiella pneumoniae*.

[Effects of acute paraquat poisoning on cognitive ability in humans].

Natural Cinnamaldehyde and Its Derivatives Ameliorate Neuroinflammatory Pathways in Neurodegenerative Diseases.

Coniferaldehyde ameliorates the lipid and glucose metabolism in palmitic acid-induced HepG2 cells via the LKB1/AMPK signaling pathway.

In vitro and in vivo activity of cinnamaldehyde against *Eimeria kofoidi* in chukar partridge (*Alectoris chukar*).

Anti-hypertensive effect of hydrogen peroxide acting centrally.

Pathological Role of Unsaturated Aldehyde Acrolein in Diabetic Retinopathy.

Endoplasmic reticulum stress-related neuroinflammation and neural stem cells decrease in mice exposure to paraquat.

Analysis of Acrolein Exposure Induced Pulmonary Response in Seven Inbred Mouse Strains and Human Primary Bronchial Epithelial Cells Cultured at Air-Liquid Interface.

Cinnamaldehyde Attenuates the Progression of Rheumatoid Arthritis through Down-Regulation of PI3K/AKT Signaling Pathway.

Apolipoprotein D-mediated preservation of lysosomal function promotes cell survival and delays motor impairment in Niemann-Pick type A disease.

Inhibition of TBK1 by amlexanox attenuates paraquat-induced acute lung injury.

Acrolein Aggravates Secondary Brain Injury After Intracerebral Hemorrhage Through Drp1-Mediated Mitochondrial Oxidative Damage in Mice.

The Use of Genetic and Gene Technologies in Shaping Modern Rapeseed Cultivars (*Brassica napus* L.).

Synthesis of Pyranopyrans Related to Diplopyrone and Evaluation as Antibacterials and Herbicides.

Coniferyl Aldehyde Inhibits the Inflammatory Effects of Leptomeningeal Cells by Suppressing the JAK2 Signaling.

Effects of Cinnamon (*Cinnamomum* spp.) in Dentistry: A Review.

Combination of ellagic acid and trans-cinnamaldehyde alleviates aging-induced cognitive impairment via modulation of mitochondrial function and inflammatory and apoptotic mediators in the prefrontal cortex of aged rats.

The modulatory effects of cinnamaldehyde on uric acid level and IL-6/JAK1/STAT3 signaling as a promising therapeutic strategy against benign prostatic hyperplasia.

Cinnamaldehyde protects against rat intestinal ischemia/reperfusion injuries by synergistic inhibition of NF- κ B and p53.

Combination Therapy with Cinnamaldehyde and Hyperthermia Induces Apoptosis of A549 Non-Small Cell Lung Carcinoma Cells via Regulation of Reactive Oxygen Species and Mitogen-Activated Protein Kinase Family.

Broaden sources and reduce expenditure: Tumor-specific transformable oxidative stress nanoamplifier enabling economized photodynamic therapy for reinforced oxidation therapy.

Combination of Quercetin, Hirudin and Cinnamaldehyde Promotes Schwann Cell Differentiation and Myelination against High Glucose by Inhibiting ERK Signaling Pathway.

Dicamba use and cancer incidence in the agricultural health study: an updated analysis.

Co-hybridized composite nanovesicles for enhanced transdermal eugenol and cinnamaldehyde delivery and their potential efficacy in ulcerative colitis.

Cystitis-Related Bladder Pain Involves ATP-Dependent HMGB1 Release from Macrophages and Its Downstream H(2)S/Ca(v)3.2 Signaling in Mice.

Cinnamaldehyde Ameliorates Vascular Dysfunction in Diabetic Mice by Activating Nrf2.

Lethal diquat poisoning manifesting as central pontine myelinolysis and acute kidney injury: A case report and literature review.

[Therapeutic effect of cinnamaldehyde on ulcerative colitis in mice induced by dextran sulfate sodium with *Candida albicans* colonization and its effect on dectin-1/TLRs/NF- κ B signaling pathway].

In vitro efficacy study of *Cinnamomum zeylanicum* essential oil and cinnamaldehyde against the larval stage of *Echinococcus granulosus*.

Cinnamaldehyde protects against oxidative stress and inhibits the TNF α -induced inflammatory response in human umbilical vein endothelial cells.

Identification of a cytochrome P450 hydroxylase, CYP81E22, as a causative gene for the high sensitivity of soybean to herbicide bentazon.

Trans-Cinnamaldehyde Alleviates Amyloid-Beta Pathogenesis via the SIRT1-PGC1 β -PPAR γ Pathway in 5XFAD Transgenic Mice.

Glyphosate exposure exacerbates the dopaminergic neurotoxicity in the mouse brain after repeated administration of MPTP.

Cardiospecific Overexpression of ATPGD1 (Carnosine Synthase) Increases Histidine Dipeptide Levels and Prevents Myocardial Ischemia Reperfusion Injury.

Occupational Pesticide Use and Risk of Renal Cell Carcinoma in the Agricultural Health Study.

Klotho Alleviates Lung Injury Caused by Paraquat via Suppressing ROS/P38 MAPK-Regulated Inflammatory Responses and Apoptosis.

Topical Delivery of Four Neuroprotective Ingredients by Ethosome-Gel: Synergistic Combination for Treatment of Oxaliplatin-Induced Peripheral Neuropathy.

Cinnamaldehyde Inhibits Inflammation of Human Synoviocyte Cells Through Regulation of Jak/Stat Pathway and Ameliorates Collagen-Induced Arthritis in Rats.

Biogenic selenium nanoparticles synthesized by *Lactobacillus casei* ATCC 393 alleviate diquat-induced intestinal barrier dysfunction in C57BL/6 mice through their antioxidant activity.

Poloxamer 188-mediated anti-inflammatory effect rescues cognitive deficits in paraquat and maneb-induced mouse model of Parkinson's disease.

Rationally Designed Polymer Conjugate for Tumor-Specific Amplification of Oxidative Stress and Boosting Antitumor Immunity.

Weak acidic stable carbazate modified cellulose membranes target for scavenging carbonylated proteins in hemodialysis.

The role of Cinnamaldehyde and Phenyl ethyl alcohol as two types of precipitants affecting protein hydration levels.

Treatment with cinnamaldehyde reduces the visceral adiposity and regulates lipid metabolism, autophagy and endoplasmic reticulum stress in the liver of a rat model of early obesity.

Myelodysplastic syndromes (MDS) occurring in Agent Orange exposed individuals carry a mutational spectrum similar to that of de novo MDS.

Neuro-amelioration of cinnamaldehyde in aluminum-induced Alzheimer's disease rat model.

Glyphosate Excretion is Associated With Steatohepatitis and Advanced Liver Fibrosis in Patients With Fatty Liver Disease.

[Hydrogen water alleviates paraquat-induced lung fibroblast injury in vitro by enhancing Nrf2 expression].

Effects of encapsulated cinnamaldehyde and citral on the performance and cecal microbiota of broilers vaccinated or not vaccinated against coccidiosis.

Sub-chronic oral cinnamaldehyde treatment prevents scopolamine-induced memory retrieval deficit and hippocampal Akt and MAPK dysregulation in male mice.

Use of human neuroblastoma SH-SY5Y cells to evaluate glyphosate-induced effects on oxidative stress, neuronal development and cell death signaling pathways.

Combination of herbal components (curcumin, carvacrol, thymol, cinnamaldehyde) in broiler chicken feed: Impacts on response parameters, performance, fatty acid profiles, meat quality and control of coccidia and bacteria.

Assessing acrolein for determination of the severity of brain stroke, dementia, renal failure, and Sjögren's syndrome.

trans-Cinnamaldehyde Prevents Oxidative Stress-Induced Apoptosis in V79-4 Chinese Hamster Lung Fibroblasts through the Nrf2-Mediated HO-1 Activation.

Transmission Electron Microscopy and Morphometry of the CNS White Matter.

Coniferaldehyde attenuates Alzheimer's pathology via activation of Nrf2 and its targets.

Aldehyde Dehydrogenase Inhibition Ameliorates Cardiac Dysfunction and Exacerbates Hypotension Caused by Alcohol in Female Rats.

Glyphosate exposures and kidney injury biomarkers in infants and young children.

Phoneutria toxin PnTx3-5 inhibits TRPV1 channel with antinociceptive action in an orofacial pain model.

Acrolein is involved in ischemic stroke-induced neurotoxicity through spermidine/spermine-N1-acetyltransferase activation.

Cinnamon extract inhibits allergen-specific immune responses in human and murine allergy models.

Cinnamaldehyde Analogs: Docking Based Optimization, COX-2 Inhibitory In Vivo and In Vitro Studies.

Docking Prediction, Antifungal Activity, Anti-Biofilm Effects on *Candida* spp., and Toxicity against Human Cells of Cinnamaldehyde.

Trapping Acrolein by Theophylline/Caffeine and Their Metabolites from Green Tea and Coffee in Mice and Humans.

Use of low-molecular-weight heparin in severe paraquat poisoning: a case report.

Toxicity Changes of Heavily Polluted River Sediments on *Daphnia magna* Before and After Dredging.

A retrospective analysis reveals a predictor of survival for the patient with paraquat intoxication.

Pterocarpus mildbraedii (Harms) extract resolves propanil-induced hepatic injury via repression of inflammatory stress responses in Wistar rats.

Dicamba elevates concentrations of S-adenosyl methionine but does not induce oxidative stress or alter DNA methylation in rainbow trout (*Oncorhynchus mykiss*) hepatocytes.

[NEURO-HUMORAL DISORDERS OF THE ADAPTATION SYSTEM UNDER THE ACTION OF CERTAIN CLASSES OF PESTICIDES].

Strategies of cellular energy allocation to cope with paraquat-induced oxidative stress: Chironomids vs Planarians and the importance of using different species.

Proteomic signatures of acute oxidative stress response to paraquat in the mouse heart.

Presence and risk assessment of herbicides in the marine environment of Camps Bay (Cape Town, South Africa).

Metabolic profiling of rats poisoned with paraquat and treated with Xuebijing using a UPLC-QTOF-MS/MS metabolomics approach.

Cytotoxicity and hormonal activity of glyphosate-based herbicides.

Dysregulation of prostaglandine E2 and BDNF signaling mediated by estrogenic dysfunction induces primary hippocampal neuronal cell death after single and repeated paraquat treatment.

Safening activity and metabolism of the safener cyprosulfamide in maize and wheat.

Dimethylarsinic acid is the causal agent inducing rice straighthead disease.

Anti-Inflammatory Activity and ROS Regulation Effect of Sinapaldehyde in LPS-Stimulated RAW 264.7 Macrophages.

Sub-lethal toxicity assessment of the phenylurea herbicide linuron in developing zebrafish (*Danio rerio*) embryo/larvae.

Herbicide biomonitoring in agricultural workers in Valle del Mayo, Sonora Mexico.

Suppression of water-bloom cyanobacterium *Microcystis aeruginosa* by algaecide hydrogen peroxide maximized through programmed cell death.

Protective effects of paeoniflorin on acrolein-induced apoptosis in H9c2 cardiomyocytes.

Understanding the Functional Impact of VOC-Ozone Mixtures on the Chemistry of RNA in Epithelial Lung Cells.

Meta-analysis of the efficacy of Xuebijing combined with hemoperfusion in treating paraquat poisoning.

Effects of quercetin loaded nanostructured lipid carriers on the paraquat-induced toxicity in human lymphocytes.

The quick and the dead: a new model for the essential role of ABA accumulation in synthetic auxin herbicide mode of action.

Transcriptomics in *Erigeron canadensis* reveals rapid photosynthetic and hormonal responses to auxin herbicide application.

Ecological risk assessment of glyphosate in surface water when it is used to control floating aquatic macrophytes.

[Efficacy of hemoperfusion combined with continuous veno-venous hemofiltration on the treatment of paraquat poisoning: a Meta-analysis].

Can environmental concentrations of glyphosate affect survival and cause malformation in amphibians? Effects from a glyphosate-based herbicide on *Physalaemus cuvieri* and *P. gracilis* (Anura: Leptodactylidae).

Impaired pesticide removal and detoxification by biomixtures during the simulated pesticide application cycle of a tropical agricultural system.

Chronic exposure to glyphosate induces transcriptional changes in honey bee larva: A toxicogenomic study.

Determination of acute oral toxicity of glyphosate isopropylamine salt in rats.

Disruption of cytochrome P450 enzymes in the liver and small intestine in chicken embryos in ovo exposed to glyphosate.

Low-dose Roundup induces developmental toxicity in bovine preimplantation embryos in vitro.

Supramolecular Hunter Stationed on Red Blood Cells for Detoxification Based on Specific Molecular Recognition.

Combined cell death of co-exposure to aldehyde mixtures on human bronchial epithelial BEAS-2B cells: Molecular insights into the joint action.

Influence of eco-friendly phytotoxic metabolites from *Lasiodiplodia pseudotheobromae* C1136 on physiological, biochemical, and ultrastructural changes on tested weeds.

Honeybee and consumer's exposure and risk characterisation to glyphosate-based herbicide (GBH) and its degradation product (AMPA): Residues in beebread, wax, and honey.

Do trifluralin and tebuthiuron impair isolated rat liver mitochondria?

Hepatoprotective role of berberine against paraquat-induced liver toxicity in rat.

Dissipation of Pendimethalin in Soil Under Direct Seeded and Transplanted Rice Field.

Maternal and Fetal Blood Pharmacokinetics and Organ Distribution of Atrazine, Propazine, Simazine, and Their Metabolites in Pregnant Rats After Chronic Oral Administration.

Do you smell the danger? Effects of three commonly used pesticides on the olfactory-mediated antipredator response of zebrafish (*Danio rerio*).

Modification of HDL by reactive aldehydes alters select cardioprotective functions of HDL in macrophages.

Rapamycin attenuates the paraquat-induced pulmonary fibrosis through activating Nrf2 pathway.

Utilization of GC-MS untargeted metabolomics to assess the delayed response of glufosinate treatment of transgenic herbicide resistant (HR) buffalo grasses (*Stenotaphrum secundatum* L.).

Acid-sensitive oxidative stress inducing and photoabsorbing polysaccharide nanoparticles for combinational anticancer therapy.

Loss of CNDP causes a shorter lifespan and higher sensitivity to oxidative stress in *Drosophila melanogaster*.

Cinnamaldehyde Enhanced Functional Recovery after Sciatic Nerve Crush Injury in Rats.

Disease Profile of Paraquat Poisoning: Andaman and Nicobar experiences (Indian Islands) - DP3 study.

Levothyroxine Therapy in Thyroidectomized Patients.

The Aryl Hydrocarbon Receptor in Energy Balance: The Road from Dioxin-Induced Wasting Syndrome to Combating Obesity with Ahr Ligands.

AggreCount: an unbiased image analysis tool for identifying and quantifying cellular aggregates in a spatially defined manner.

AhR Activation Leads to Alterations in the Gut Microbiome with Consequent Effect on Induction of Myeloid Derived Suppressor Cells in a CXCR2-Dependent Manner.

Long-term spatial tracking of cells affected by environmental insults.

Gestational arsenic exposure and paternal intergenerational epigenetic inheritance.

Comparison between Iberet Folic(®) and Zincofer(®) in treatment of iron deficiency anaemia in pregnancy.

The Impact of Low-Level Iron Supplements on the Faecal Microbiota of Irritable Bowel Syndrome and Healthy Donors Using In Vitro Batch Cultures.

The carcinogenicity of pesticides used in New Zealand.

Arsenic compounds activate the MAPK and caspase pathways to induce apoptosis in OECM1 gingival epidermal carcinoma.

Female mice exposed to low doses of dioxin during pregnancy and lactation have increased susceptibility to diet-induced obesity and diabetes.

Comparative efficacy of Nano and Bulk Monoisomyl DMSA against arsenic-induced neurotoxicity in rats.

miR-200 family expression during normal and abnormal lung development due to congenital diaphragmatic hernia at the later embryonic stage in the nitrofen rat model.

ALS-Linked Mutant SOD1 Associates with TIA-1 and Alters Stress Granule Dynamics.

The ubiquitination and acetylation of histones are associated with male reproductive disorders induced by chronic exposure to arsenite.

Aryl hydrocarbon receptor (AHR)-mediated inflammation and resolution: Non-genomic and genomic signaling.

Pesticide use and incident Parkinson's disease in a cohort of farmers and their spouses.

Catechol protects against iron-mediated oxidative brain injury by restoring antioxidative metabolic pathways; and modulation of purinergic and cholinergic enzymes activities.

Epigenetic effects of low-level sodium arsenite exposure on human liver HepaRG cells.

Ferritin readings in young adult, female university student recreational runners.

Histone demethylase JHDM2A regulates H3K9 dimethylation in response to arsenic-induced DNA damage and repair in normal human liver cells.

Exposure to Endocrine Disrupting Chemicals and Risk of Breast Cancer.

An LC-MS/MS analytical method for the determination of uremic toxins in patients with end-stage renal disease.

Anti-Tumor Effects of Sodium Meta-Arsenite in Glioblastoma Cells with Higher Akt Activities.

Effects of Fecal Microbiota Transplantation on Composition in Mice with CKD.

Study on association between shear wave elastography parameters and clinicopathological characteristics in breast cancer: A protocol for systematic review.

Increased photoinactivation stress tolerance of *Streptococcus agalactiae* upon consecutive sublethal phototreatments.

Selenoprotein V protects against endoplasmic reticulum stress and oxidative injury induced by pro-oxidants.

Integrative transcriptomics and metabolomics explore the mechanism of kaempferol on improving nonalcoholic steatohepatitis.

A universal dual mechanism immunotherapy for the treatment of influenza virus infections.

4E-BP1 Protects Neurons from Misfolded Protein Stress and Parkinson's Disease Toxicity by Inducing the Mitochondrial Unfolded Protein Response.

Randomized, Placebo-Controlled Trial of Rifaximin Therapy for Lowering Gut-Derived Cardiovascular Toxins and Inflammation in CKD.

Polyphenol-rich fraction of *Alchornea cordifolia* leaf ameliorates arsenite-induced infertility in male rats.

Cenobamate (XCOPRI): Can preclinical and clinical evidence provide insight into its mechanism of action?

Toxin-Induced Parkinsonism.

Evaluation of the effectiveness of valproic acid for treating cyanotic breath holding spells: A Pilot prospective study.

Chronic stress induces formation of stress granules and pathological TDP-43 aggregates in human ALS fibroblasts and iPSC-motoneurons.

Weight of Evidence and Human Relevance Evaluation of the Benfluralin Mode of Action in Rats (Part II): Thyroid carcinogenesis.

Weight of evidence and human relevance evaluation of the benfluralin mode of action in rodents (Part I): Liver carcinogenesis.

Metabolic and Hematological Responses to Endotoxin-Induced Inflammation in Chicks Experiencing Embryonic 2,3,7,8-Tetrachlorodibenzodioxin Exposure.

Levels of polychlorinated biphenyls and organochlorine pesticides in donkey milk: Correlation with the infection level by intestinal strongyles.

Nephroprotective effects of chlorogenic acid against sodium arsenite-induced oxidative stress, inflammation, and apoptosis.

Thymoquinone protection against 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin induced nephrotoxicity in rats.

Quercetin may repair the impaired oxidant-antioxidant balance in 1, 2, 3, 4-tetrachlorodibenzo-p-dioxin induced cardiac injury in male rats.

Serum indoxyl sulfate concentrations associate with progression of chronic kidney disease in children.

From Suppressor T cells to Regulatory T cells: How the Journey That Began with the Discovery of the Toxic Effects of TCDD Led to Better Understanding of the Role of AhR in Immunoregulation.

High-Resolution Respirometry Reveals MPP(+) Mitochondrial Toxicity Mechanism in a Cellular Model of Parkinson's Disease.

Distinct Fecal and Plasma Metabolites in Children with Autism Spectrum Disorders and Their Modulation after Microbiota Transfer Therapy.

Inflammation response after the cessation of chronic arsenic exposure and post-treatment of natural astaxanthin in liver: potential role of cytokine-mediated cell-cell interactions.

Knockdown of CK2 $\hat{\pm}$ reduces P-cresol-induced fibrosis in human renal proximal tubule epithelial cells via the downregulation of profilin-1.

[Omphalomesenteric fistulas; epidemiological diagnostic and therapeutic features: study of four cases in the Department of Pediatric Surgery at the Aristide Le Dantec University Hospital in Dakar].

Comparison of the biological behaviors of palatal mesenchymal and epithelial cells induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in vitro.

A competence of embryo-derived tissues of tetraploid cultivated wheat species *Triticum dicoccum* and *Triticum timopheevii* for efficient and stable transgenesis mediated by particle inflow gun.

Boron improves cardiac contractility and fibrotic remodeling following myocardial infarction injury.

Autophagy mediates bronchial cell malignant transformation induced by chronic arsenic exposure via MEK/ERK1/2 pathway.

Interactions of arsenic metabolism with arsenic exposure and individual factors on diabetes occurrence: Baseline findings from Arsenic and Non-Communicable disease cohort (AsNCD) in China.

Mechanisms and pathogenesis underlying environmental chemical-induced necroptosis.

Evaluation of ameliorative effect of two selected plant drugs on experimentally induced arsenic toxicity in sheep.

Developmental 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure of either parent enhances the risk of necrotizing enterocolitis in neonatal mice.

A metabolomics approach to investigate urine levels of neurotransmitters and related metabolites in autistic children.

Exposure to Oxadiazon-Butachlor causes cardiac toxicity in zebrafish embryos.

In vitro propagation of three mosaic disease resistant cassava cultivars.

Effects of p-Cresol on Senescence, Survival, Inflammation, and Odontoblast Differentiation in Canine Dental Pulp Stem Cells.

Protein arginine methyltransferase-1 stimulates dopaminergic neuronal cell death in a Parkinson's disease model.

Arsenic induces dose-dependent structural and ultrastructural pathological remodeling in the heart of Wistar rats.

p-Cresol Sulfate Caused Behavior Disorders and Neurodegeneration in Mice with Unilateral Nephrectomy Involving Oxidative Stress and Neuroinflammation.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) dysregulates hepatic one carbon metabolism during the progression of steatosis to steatohepatitis with fibrosis in mice.

A Parkinson's disease CircRNAs Resource reveals a link between circSLC8A1 and oxidative stress.

Effect of Ferric Citrate versus Ferrous Sulfate on Iron and Phosphate Parameters in Patients with Iron Deficiency and CKD: A Randomized Trial.

The Succession of Flies of Forensic Importance Is Influenced by Volatiles Organic Compounds Emitted During the First Hours of Decomposition of Chicken Remains.

In-vitro testing of bacteriostatic and bactericidal efficacy of commercial disinfectants against *Salmonella* *Infantis* reveals substantial differences between products and bacterial strains.

Treatment of maternal anemia by using oral iron drugs combined with diet therapy.

Investigation of the biochemical and apoptotic changes in breast cancer cells treated with leaf extract from tea (*Camellia sinensis* L.) grown with added boric acid.

Teleost Model as an Alternative in Parkinson's Disease.

Guideline No. 405: Screening and Counselling for Alcohol Consumption During Pregnancy.

Rapid and visual detection of novel astroviruses causing fatal gout in goslings using one-step reverse transcription loop-mediated isothermal amplification.

Phase I clinical trial of KML001 monotherapy in patients with advanced solid tumors.

Optimization of the spontaneous tail coiling test for fast assessment of neurotoxic effects in the zebrafish embryo using an automated workflow in KNIME®.

Acute Consumption of Prebiotic Galacto-Oligosaccharides Increases Iron Absorption from Ferrous Fumarate, but not from Ferrous Sulfate and Ferric Pyrophosphate: Stable Iron Isotope Studies in Iron-Depleted Young Women.

Association of Serum Indoxyl Sulfate Levels with Skeletal Muscle Mass and Strength in Chronic Hemodialysis Patients: A 2-year Longitudinal Analysis.

Extracellular vesicles influence the pulmonary arterial extracellular matrix in congenital diaphragmatic hernia.

Cancer incidence in the vicinity of a waste incineration plant in the Nice area between 2005 and 2014.

Rosa persica hydroalcoholic extract improves cadmium-hepatotoxicity by modulating oxidative damage and tumor necrosis factor-alpha status.

Evaluation of the Aryl Hydrocarbon Receptor Response in LMH 3D Spheroids.

Blood vessels are primary targets for 2,3,7,8-tetrachlorodibenzo-p-dioxin in pre-cardiac edema formation in larval zebrafish.

In vitro study of pharmacobezoar formation in simulated acetaminophen overdose.

Influence of Resveratrol on the Cardiovascular Health Effects of Chronic Kidney Disease.

Evolution in crop improvement approaches and future prospects of molecular markers to CRISPR/Cas9 system.

Impaired Tubular Secretion of Organic Solutes in Acute Kidney Injury.

Effects of 2,3,7,8-Tetrachlorodibenzo-p-dioxin on T Cell Differentiation in Primary Biliary Cholangitis.

[Effects and mechanism of mitochondrial transcription factor A and cytochrome c oxidase pathway in the energy production of hypoxic cardiomyocytes of rats regulated by tumor necrosis factor receptor associated protein 1].

Pycnogenol(®) Supplementation Attenuates Memory Deficits and Protects Hippocampal CA1 Pyramidal Neurons via Antioxidative Role in a Gerbil Model of Transient Forebrain Ischemia.

Is untargeted iron supplementation harmful when iron deficiency is not the major cause of anaemia? Study protocol for a double-blind, randomised controlled trial among non-pregnant Cambodian women.

Synthesis and biological evaluation of thioadatsenin and its dialkylated products as partial 5-HT_{1A} agonists and 5-HT_{2A} antagonists for potential use in depression and anxiety disorders.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and Polychlorinated Biphenyl Coexposure Alters the Expression Profile of MicroRNAs in the Liver Associated with Atherosclerosis.

TCDD promotes liver fibrosis through disordering systemic and hepatic iron homeostasis.

Coupling of translation quality control and mRNA targeting to stress granules.

Gestational dioxin exposure suppresses prolactin-stimulated nursing in lactating dam rats to impair development of postnatal offspring.

Aryl hydrocarbon receptor (AHR) functions: Balancing opposing processes including inflammatory reactions.

Single-cell RNA-seq Analysis Reveals That Prenatal Arsenic Exposure Results in Long-term, Adverse Effects on Immune Gene Expression in Response to Influenza A Infection.

Extracellular Vesicles Attenuate Nitrofen-Mediated Human Pulmonary Artery Endothelial Dysfunction: Implications for Congenital Diaphragmatic Hernia.

In utero exposure to arsenite contributes to metabolic and reproductive dysfunction in male offspring of CD-1 mice.

Effect of sucroferic oxyhydroxide on gastrointestinal microbiome and uremic toxins in patients with chronic kidney disease undergoing hemodialysis.

Longitudinal metabolic and gut bacterial profiling of pregnant women with previous bariatric surgery.

Impact of pesticide exposure on adipose tissue development and function.

Melatonin Suppresses Renal Cortical Fibrosis by Inhibiting Cytoskeleton Reorganization and Mitochondrial Dysfunction through Regulation of miR-4516.

Scavenging Intracellular ROS Attenuates p-Cresyl Sulfate-Triggered Osteogenesis through MAPK Signaling Pathway and NF- κ B Activation in Human Arterial Smooth Muscle Cells.

Characterization of a multicenter pediatric-hydrocephalus shunt biobank.

Occupational Exposure to Pesticides and Chronic Lymphocytic Leukaemia in the MCC-Spain Study.

Efficacy of a High-Iron Dietary Intervention in Women with Celiac Disease and Iron Deficiency without Anemia: A Clinical Trial.

AHR is a tunable knob that controls HTLV-1 latency-reactivation switching.

Wheat flour fortification with iron for reducing anaemia and improving iron status in populations.

Vitamin B12 and folic acid alleviate symptoms of nutritional deficiency by antagonizing aryl hydrocarbon receptor.

A comprehensive analysis of AHRR gene as a candidate for cleft lip with or without cleft palate.

2,6-Diisobornyl-4-Methylphenol Reduces Postischemic Myocardium Remodeling in Delayed Period after Ischemia/Reperfusion in Rats.

Effects of agrochemical pollution on schistosomiasis transmission: a systematic review and modelling analysis.

A rapid novel visualized loop-mediated isothermal amplification method for Salmonella detection targeting at fimW gene.

Environmental Toxic Exposures Using Companion Animals as an Indicator of Human Toxicity: A Case Report and Discussion.

High Prevalence of Iron Deficiency Despite Standardized High-Dose Iron Supplementation During Recombinant Erythropoietin Therapy in Extremely Low Gestational Age Newborns.

Capsaicinoid nonivamide improves nonalcoholic fatty liver disease in rats fed a high-fat diet.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) alters hepatic polyunsaturated fatty acid metabolism and eicosanoid biosynthesis in female Sprague-Dawley rats.

Microbiota Composition and Metabolism Are Associated With Gut Function in Parkinson's Disease.

Protocol for a systematic review and meta-analysis of human exposure to pesticide residues in honey and other bees' products.

Leucine-rich repeat kinase-2 (LRRK2) modulates microglial phenotype and dopaminergic neurodegeneration.

Ferrous sulfate oral solution in young children with iron deficiency anemia: An open-label trial of efficacy, safety, and acceptability.

Maternal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin suppresses male reproductive functions in their adulthood.

Role of endothelial microvesicles released by p-cresol on endothelial dysfunction.

Marrubium vulgare L.: A Phytochemical and Pharmacological Overview.

Antimicrobial Efficacy of Pelargonic Acid Micelles against Salmonella varies by Surfactant, Serotype and Stress Response.

Cross-crop resistance of Spodoptera frugiperda selected on Bt maize to genetically-modified soybean expressing Cry1Ac and Cry1F proteins in Brazil.

Uremic Toxins and Vascular Dysfunction.

Therapeutic Targeting of Aristolochic Acid Induced Uremic Toxin Retention, SMAD 2/3 and JNK/ERK Pathways in Tubulointerstitial Fibrosis: Nephroprotective Role of Propolis in Chronic Kidney Disease.

Randomized phase 2 study of adjunctive cenobamate in patients with uncontrolled focal seizures.

Arsenic intoxication: general aspects and chelating agents.

Gut microbiota generation of protein-bound uremic toxins and related metabolites is not altered at different stages of chronic kidney disease.

Volatile Organic Compounds of Endophytic Burkholderia pyrrocinia Strain JK-SH007 Promote Disease Resistance in Poplar.

Associations between functional polychlorinated biphenyls in adipose tissues and prognostic biomarkers of breast cancer patients.

Overexpression of miR-455-5p affects retinol (vitamin A) absorption by downregulating STRA6 in a nitrofen-induced CDH with lung hypoplasia rat model.

Phenotypic traits of Burkholderia spp. associated with ecological adaptation and plant-host interaction.

Prebiotic inulin consumption reduces dioxin-like PCB 126-mediated hepatotoxicity and gut dysbiosis in hyperlipidemic Ldlr deficient mice.

Therapeutic potential of aryl hydrocarbon receptor ligands derived from natural products in rheumatoid arthritis.

Black urine due to cresol intoxication.

Low Doses of Arsenic in a Mouse Model of Human Exposure and in Neuronal Culture Lead to S-Nitrosylation of Synaptic Proteins and Apoptosis via Nitric Oxide.

Oct4 plays a role in 2, 3, 7, 8 - tetrachlorobenzo-p-dioxin (TCDD) inducing cleft palate and inhibiting mesenchymal proliferation.

Small molecule proteomics quantifies differences between normal and fibrotic pulmonary extracellular matrices.

Toxoplasma gondii requires its plant-like heme biosynthesis pathway for infection.

Aryl Hydrocarbon Receptor-Dependent inductions of omega-3 and omega-6 polyunsaturated fatty acid metabolism act inversely on tumor progression.

Eckol from Ecklonia cava Suppresses Immunoglobulin E-mediated Mast Cell Activation and Passive Cutaneous Anaphylaxis in Mice.

Effects of the oral adsorbent AST-120 on fecal p-cresol and indole levels and on the gut microbiota composition.

Chronic Kidney Disease-Associated Immune Dysfunctions: Impact of Protein-Bound Uremic Retention Solutes on Immune Cells.

Chronic Systemic Exposure to Low-Dose Rotenone Induced Central and Peripheral Neuropathology and Motor Deficits in Mice: Reproducible Animal Model of Parkinson's Disease.

A Prospective, Randomized, Interventional Study of Oral Iron Supplementation Comparing Daily Dose with Alternate Day Regimen Using Hepcidin as a Biomarker in Iron Deficiency Anemia.

Human Induced Pluripotent Stem Cell-Derived 3D-Neurospheres are Suitable for Neurotoxicity Screening.

Sonodynamically-induced Anticancer Effects of Polyethylene Glycol-Modified Carbon Nano Tubes.

Quantification of microbiota-related phenols and aromatic acids in mouse feces of a diabetic nephropathy model by simultaneous BDAPE derivatization using ultra-performance liquid chromatography-tandem mass spectrometry.

Genomic data reveal international lineages of critical priority *Escherichia coli* harbouring wide resistome in Andean condors (*Vultur gryphus* Linnaeus, 1758).

The role of PSMB5 in sodium arsenite-induced oxidative stress in L-02 cells.

Transgenerational epigenetic and transcriptomic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure in rat.

Arsenic Exposure Decreases Adiposity During High-Fat Feeding.

Iron pill-induced duodenitis: A distinct pattern of duodenal mucosal injury in a patient with a duodenal mass.

Identification of environmental chemicals targeting miscarriage genes and pathways using the comparative toxicogenomics database.

A murine model of *Staphylococcus aureus* infected chronic diabetic wound: A new tool to develop alternative therapeutics.

Death of an apprentice bodybuilder following 2,4-dinitrophenol and clenbuterol intake.

2,4-Dinitrophenol exposures and deaths in Australia after the 2017 up-scheduling.

Prenatal pesticide exposure and childhood leukemia - A California statewide case-control study.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on spontaneous movement of human neuroblastoma cells.

Delayed iron improves iron status without altering malaria risk in severe malarial anemia.

Identification and characterization of differentially expressed lncRNA in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced cleft palate.

Role of Metallothionein-1 and Metallothionein-2 in the Neuroprotective Mechanism of Sevoflurane Preconditioning in Mice.

Inulin-type fructan intervention restricts the increase in gut microbiome-generated indole in patients with peritoneal dialysis: a randomized crossover study.

Low concentrations of sodium arsenite induce hepatotoxicity in prepubertal male rats.

Iron absorption from supplements is greater with alternate day than with consecutive day dosing in iron-deficient anemic women.

Urine metabolomic analysis in clear cell and papillary renal cell carcinoma: A pilot study.

Applying mass spectrometry-based assays to explore gut microbial metabolism and associations with disease.

Streptococcal H₂O₂ inhibits IgE-triggered degranulation of RBL-2H3 mast cell/basophil cell line by inducing cell death.

Dimethyl disulfide exerts antifungal activity against *Sclerotinia minor* by damaging its membrane and induces systemic resistance in host plants.

Demyelination associated with chronic arsenic exposure in Wistar rats.

Gut-Derived Metabolites and Their Role in Immune Dysfunction in Chronic Kidney Disease.

A combination of monosodium glutamate and high-fat and high-fructose diets increases the risk of kidney injury, gut dysbiosis and host-microbial co-metabolism.

COVID-19: Hygiene and Public Health to the front.

Historical Perspective: Models of Parkinson's Disease.

Fractional iron absorption from enteric-coated ferrous sulphate tablet.

Research Note: Evaluation of dietary administration of sodium chlorate and sodium nitrate for *Histomonas meleagridis* prophylaxis in turkeys.

Lactobacillus salivarius BP121 prevents cisplatin-induced acute kidney injury by inhibition of uremic toxins such as indoxyl sulfate and p-cresol sulfate via alleviating dysbiosis.

Polymorphisms in arsenic (+³ oxidation state) methyltransferase (AS3MT) predict the occurrence of hyperleukocytosis and arsenic metabolism in APL patients treated with As₂O₃.

Diet aid or aid to die: an update on 2,4-dinitrophenol (2,4-DNP) use as a weight-loss product.

Arsenic and benzo[a]pyrene co-exposure acts synergistically in inducing cancer stem cell-like property and tumorigenesis by epigenetically down-regulating SOCS3 expression.

Association between prenatal arsenic exposure, birth outcomes, and pregnancy complications: An observational study within the National Children's Study cohort.

Embelin impact on paraquat-induced lung injury through suppressing oxidative stress, inflammatory cascade, and MAPK/NF- κ B signaling pathway.

Occupational exposures and odds of gastric cancer: a StoP project consortium pooled analysis.

Combined toxicity of imidacloprid, acetochlor, and tebuconazole to zebrafish (*Danio rerio*): acute toxicity and hepatotoxicity assessment.

Dioxin and endometriosis: a new possible relation based on epigenetic theory.

The association between pesticide use and cutaneous melanoma: a systematic review and meta-analysis.

The P5-type ATPase Spf1 is required for development and virulence of the rice blast fungus *Pyricularia oryzae*.

Genetically modified crops: current status and future prospects.

Role of Aryl Hydrocarbon Receptor Activation and Autophagy in Psoriasis-Related Inflammation.

Composition-based prediction and rational manipulation of prion-like domain recruitment to stress granules.

The anti-inflammatory effect of omega-3 polyunsaturated fatty acids dramatically decreases by iron in the hippocampus of diabetic rats.

2,4-Dichlorophenol induces feminization of zebrafish (*Danio rerio*) via DNA methylation.

Isolation and Quantification of Uremic Toxin Precursor-Generating Gut Bacteria in Chronic Kidney Disease Patients.

Effect of fatty fish or nut consumption on concentrations of persistent organic pollutants in overweight or obese men and women: A randomized controlled clinical trial.

Pesticide exposure and risk of aggressive prostate cancer among private pesticide applicators.

A Case of a 15-Month-Old With Periorbital Edema and Severe Anemia.

Nucleation and kinetics of SOD1 aggregation in human cells for ALS1.

M2-like polarization of THP-1 monocyte-derived macrophages under chronic iron overload.

Nicotine exposure potentiates lung tumorigenesis by perturbing cellular surveillance.

Monitoring oral iron therapy in children with iron deficiency anemia: an observational, prospective, multicenter study of AIEOP patients (Associazione Italiana Emato-Oncologia Pediatrica).

Temporal and tissue-specific activation of aryl hydrocarbon receptor in discrete mouse models of kidney disease.

Dose addition in chemical mixtures inducing craniofacial malformations in zebrafish (*Danio rerio*) embryos.

Randomized, Placebo-Controlled Trial of Ferrous Sulfate to Treat Insomnia in Children With Autism Spectrum Disorders.

Is 1,8-Cineole-Rich Extract of Small Cardamom Seeds More Effective in Preventing Alzheimer's Disease than 1,8-Cineole Alone?

Cytochrome P450 1A2 activity and incidence of thyroid disease and cancer after chronic or acute exposure to dioxins.

Preliminary Results, Perspectives, and Proposal for a Screening Method of In Vitro Susceptibility of Prototheca Species to Antimicrotubular Agents.

The impaired redox balance in peroxisomes of catalase knockout mice accelerates nonalcoholic fatty liver disease through endoplasmic reticulum stress.

Characterization of Glyceollins as Novel Aryl Hydrocarbon Receptor Ligands and Their Role in Cell Migration.

The Natural Metabolite 4-Cresol Improves Glucose Homeostasis and Enhances β^2 -Cell Function.

A Comparison of Potential Azide Antidotes in a Mouse Model.

Antioxidative and antiapoptosis: Neuroprotective effects of dauricine in Alzheimer's disease models.

Parental occupational exposure to pesticides, animals and organic dust and risk of childhood leukemia and central nervous system tumors: Findings from the International Childhood Cancer Cohort Consortium (I4C).

CharXgen-Activated Bamboo Charcoal Encapsulated in Sodium Alginate Microsphere as the Absorbent of Uremic Toxins to Retard Kidney Function Deterioration.

Evidence Implicating Non-Dioxin-Like Congeners as the Key Mediators of Polychlorinated Biphenyl (PCB) Developmental Neurotoxicity.

Evolution-guided discovery of antibiotics that inhibit peptidoglycan remodelling.

Simple and visible detection of duck hepatitis B virus in ducks and geese using loop-mediated isothermal amplification.

Association of Maternal Exposure to Persistent Organic Pollutants in Early Pregnancy With Fetal Growth.

Improving the clearance of protein-bound uremic toxins using cationic liposomes as an adsorbent in dialysate.

Prenatal exposure to the pesticide metam sodium induces sensorimotor and neurobehavioral abnormalities in mice offspring.

Chlorogenic acid prevents hepatotoxicity in arsenic-treated mice: role of oxidative stress and apoptosis.

Prenatal exposure to glycol ethers and response inhibition in 6-year-old children: The PELAGIE cohort study.

Longitudinal association of biomarkers of pesticide exposure with cardiovascular disease risk factors in youth with diabetes.

Congenital diaphragmatic hernia as a potential target for transamniotic stem cell therapy.

Cecal Tumorigenesis in Aryl Hydrocarbon Receptor-Deficient Mice Depends on Cecum-Specific Mitogen-Activated Protein Kinase Pathway Activation and Inflammation.

Higher cerebrospinal fluid to plasma ratio of p-cresol sulfate and indoxyl sulfate in patients with Parkinson's disease.

Reproductive disorders in female rats after prenatal exposure to sodium arsenite.

Understanding ligands driven mechanism of wild and mutant aryl hydrocarbon receptor in presence of phytochemicals combating Parkinson's disease: an in silico and in vivo study.

Tagetnoic acid, a new lipoxygenase inhibitor peroxy fatty acid from *Tagetes minuta* growing in Saudi Arabia.

Clinical and Lifestyle Factors and Risk of Amyotrophic Lateral Sclerosis: A Population-Based Case-Control Study.

Ginseng protein protects against mitochondrial dysfunction and neurodegeneration by inducing mitochondrial unfolded protein response in *Drosophila melanogaster* PINK1 model of Parkinson's disease.

Long-term metabolic consequences of acute dioxin exposure differ between male and female mice.

Effectiveness of outpatient treatment with intravenous iron in selected primary Care patients.

P-Cresylsulfate, the Protein-Bound Uremic Toxin, Increased Endothelial Permeability Partly Mediated by Src-Induced Phosphorylation of VE-Cadherin.

Anemia management in non-menopausal women in a primary care setting: a prospective evaluation of clinical practice.

Molecular and Cellular Mechanisms that Induce Arterial Calcification by Indoxyl Sulfate and P-Cresyl Sulfate.

Multiple distinct pathways lead to hyperubiquitylated insoluble TDP-43 protein independent of its translocation into stress granules.

Health effects of nutrients and environmental pollutants in Baltic herring and salmon: a quantitative benefit-risk assessment.

High-throughput sequencing analysis of intestinal flora changes in ESRD and CKD patients.

An unsupervised learning approach to identify novel signatures of health and disease from multimodal data.

In vivo acute toxicity and anti-gastric evaluation of a novel dichloro Schiff base: Bax and HSP70 alteration.

Acute occupational phosphine intoxications in the maritime shipping sector: Belgian and French reported cases.

[The use of retinoids to stimulate the regenerative process in trepanation cavity after "open" sanitizing surgery on the middle ear].

Recommendation and use of ferrous sulphate in 12- and 24-month-old children: evaluation in the 2015 Pelotas Birth Cohort.

Bibliometrics and Visualization of the Mechanisms of Parkinson's Diseases Based on Animal Models.

Denouement of Chemicals on Amyotrophic Lateral Sclerosis: Is Green Chemistry the Answer.

Resveratrol Regulates Nrf2-Mediated Expression of Antioxidant and Xenobiotic Metabolizing Enzymes in Pesticides-Induced Parkinsonism.

Gut Microbiota as Diagnostic Tools for Mirroring Disease Progression and Circulating Nephrotoxin Levels in Chronic Kidney Disease: Discovery and Validation Study.

Quantitative Mass Spectrometric Assay of Whole and CNBr-Cleaved Amyloid- β Peptides in Human Brain.

Identification and Functional Analysis of RYR1 Variants in a Family with a Suspected Myopathy and Associated Malignant Hyperthermia.

Transfusion-Free Cranial Vault Remodeling: A Novel, Multifaceted Approach.

Tandem mass tag (TMT) proteomic analysis of fetal lungs revealed differential expression of tight junction proteins in a rat model of congenital diaphragmatic hernia.

Prenatal dioxin exposure and glucose metabolism in the Seveso Second Generation study.

A mitochondrial uncoupler prodrug protects dopaminergic neurons and improves functional outcome in a mouse model of Parkinson's disease.

Preliminary evaluation of fecal fatty acid concentrations in cats with chronic kidney disease and correlation with indoxyl sulfate and p-cresol sulfate.

Procyanidin B2 Suppresses Lipopolysaccharides-Induced Inflammation and Apoptosis in Human Type II Alveolar Epithelial Cells and Lung Fibroblasts.

Arsenic-induced immunomodulatory effects disorient the survival-death interface by stabilizing the Hsp90/Beclin1 interaction.

The Dark Side of Iron.

Microbiome and Metabolome Profiles Associated With Different Types of Short Bowel Syndrome: Implications for Treatment.

Bowel Habits and the Association With Uremic Toxins in Non-Dialysis-Dependent Chronic Kidney Disease Patients.

Prostate Cancer Screening Guidelines for African American Veterans: A New Perspective.

Ferric-Induced Pancreatic Injury Involves Exacerbation of Cholinergic and Proteolytic Activities, and Dysregulation of Metabolic Pathways: Protective Effect of Caffeic Acid.

Distribution and Determinants of Chronic Kidney Disease of Unknown Etiology: A Brief Overview.

A comparative study to evaluate oral iron and intravenous iron sucrose for treatment of anemia in pregnancy in a poor socioeconomic region of Northeast India.

Pesticide exposure among Bolivian farmers: associations between worker protection and exposure biomarkers.

May agricultural water sources containing mixtures of agrochemicals cause hormonal disturbances?

How many premature deaths from pesticide suicide have occurred since the agricultural Green Revolution?

Distribution and risk factor analysis for Clostridium difficile-associated diarrhea among hospitalized children over one year of age.

The developmental neurotoxicity of legacy vs. contemporary polychlorinated biphenyls (PCBs): similarities and differences.

Ferulic acid attenuates arsenic-induced cardiotoxicity in rats.

Risk factors for abdominal wall defects.

Uremic toxins promote accumulation of oxidized protein and increased sensitivity to hydrogen peroxide in endothelial cells by impairing the autophagic flux.

TCDD inhibited the osteogenic differentiation of human fetal palatal mesenchymal cells through AhR and BMP-2/TGF- β ²/Smad signaling.

Cyclophosphamide-induced cystitis results in NLRP3-mediated inflammation in the hippocampus and symptoms of depression in rats.

Impact of environmental contaminants on reproductive health of male domestic ruminants: a review.

Curcumin ameliorates oxidative stress-induced intestinal barrier injury and mitochondrial damage by promoting Parkin dependent mitophagy through AMPK-TFEB signal pathway.

Loss of the mitochondrial lipid cardiolipin leads to decreased glutathione synthesis.

Soil contact bioassay for rapid determination of acute toxicity with *Eisenia foetida*.

New disease-resistant, seedless grapes are developed using embryo rescue and molecular markers.

Anti-inflammatory Effect of AZD6244 on Acrolein-Induced Neuroinflammation.

2,3,7,8-Tetrachlorodibenzo-p-dioxin and up-regulation of neurofilament expression in neuronal cells: Evaluation of AhR and MAPK pathways.

Naturally-derived diterpenoid sphaeropsidin C as an activator of Nrf2/ARE pathway and its potential capability of relieving intracellular oxidative stress in human lung epithelial cells.

In vitro effects of PNP and PNMC on apoptosis and proliferation in the hen ovarian stroma and prehierarchal follicles.

Which chemicals should be grouped together for mixture risk assessments of male reproductive disorders?

Analysis of 2,4-Dinitrophenol in Postmortem Blood and Urine by Gas Chromatography-Mass Spectrometry: Method Development and Validation and Report of Three Fatalities in the United States.

Transient receptor potential ankyrin 1 (TRPA1)-mediated toxicity: friend or foe?

Involvement of metallothionein, homocysteine and B-vitamins in the attenuation of arsenic-induced uterine disorders in response to the oral application of hydro-ethanolic extract of *Moringa oleifera* seed: a preliminary study.

Paraquat Reduces the Female Fertility by Impairing the Oocyte Maturation in Mice.

Changes in the Serum Metabolome of Patients Treated With Broad-Spectrum Antibiotics.

HspB5 protects mouse neural stem/progenitor cells from paraquat toxicity.

A Paper-Based Analytical Device for Analysis of Paraquat in Urine and Its Validation with Optical-Based Approaches.

[The role of noninvasive hemodynamic monitoring in the evaluation of acute and severe pesticide poisoning].

Reduction of Management Costs and Avoidance of Air Release of Carcinogens Through a Waste Segregation Program in a Brazilian Medical Institution.

The Resistance of *Drosophila melanogaster* to Oxidative, Genotoxic, Proteotoxic, Osmotic Stress, Infection, and Starvation Depends on Age According to the Stress Factor.

In Vitro and In Vivo Inhibitory Effect of Citrus Junos Tanaka Peel Extract against Oxidative Stress-Induced Apoptotic Death of Lung Cells.

Whether Gametophytes are Reduced or Unreduced in Angiosperms Might Be Determined Metabolically.

Telomeric injury by KML001 in human T cells induces mitochondrial dysfunction through the p53-PGC-1 β pathway.

Risk-Benefit Modeling to Guide Health Research in Collaboration with Great Lakes Fish Consuming Native American Communities.

Impact of environmental toxin exposure on male fertility potential.

Oral mucosa changes associated with chronic oral and inhalation exposure to 2,4-dichlorophenoxyacetic acid (2,4-D) in Wistar rats.

Pretilachlor poisoning: A rare case of a herbicide masquerading as organophosphate toxicity.

Mucuna pruriens in Parkinson's and in some other diseases: recent advancement and future prospective.

Effects on the Liver Transcriptome in Baltic Salmon: Contributions of Contamination with Organohalogen Compounds and Origin of Salmon.

Telomeres as targets for the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and polychlorinated biphenyls (PCBs) in rats.

Dioxin Disrupts Dynamic DNA Methylation Patterns in Genes That Govern Cardiomyocyte Maturation.

Heat-not-burn tobacco products: an emerging threat to cardiovascular health.

An aryl hydrocarbon receptor agonist suppresses the growth of human umbilical vein endothelial cells in vitro: Potent effect with polyunsaturated fatty acids.

The MT1G Gene in LUHMES Neurons Is a Sensitive Biomarker of Neurotoxicity.

Development of an in vitro approach to point-of-contact inhalation toxicity testing of volatile compounds, using organotypic culture and air-liquid interface exposure.

Metabolomics Profiling and Diagnosis Biomarkers Searching for Drug-Induced Liver Injury Implicated to *Polygonum multiflorum*: A Cross-Sectional Cohort Study.

Wrangling Shape-Shifting Morpheins to Tackle Disease and Approach Drug Discovery.

Pesticide mixtures show potential toxicity to aquatic life in U.S. streams, water years 2013-2017.

Aspirin Eugenol Ester Protects Vascular Endothelium From Oxidative Injury by the Apoptosis Signal Regulating Kinase-1 Pathway.

Sub-ohm vaping increases the levels of carbonyls, is cytotoxic, and alters gene expression in human bronchial epithelial cells exposed at the air-liquid interface.

Emerging contaminant 1,3,6,8-tetrabromocarbazole induces oxidative damage and apoptosis during the embryonic development of zebrafish (*Danio rerio*).

Amperometric Cytosensor for Studying Mitochondrial Interferences Induced by Plasticizers Bisphenol B and Bisphenol A.

A Comprehensive Review on Source, Types, Effects, Nanotechnology, Detection, and Therapeutic Management of Reactive Carbonyl Species Associated with Various Chronic Diseases.

Multi-sites polycyclodextrin adsorbents for removal of protein-bound uremic toxins combining with hemodialysis.

Outcome of Canine Multicentric Lymphoma after Single or Divided Treatment with Cyclophosphamide in Multidrug Chemotherapy.

Environmental neurotoxic pollutants: review.

Photo-polymerizable ferrous sulfate liposomes as vehicles for iron fortification of food.

Occupational exposure to organophosphorus and carbamates in farmers in La Cienega, Jalisco, Mexico: oxidative stress and membrane fluidity markers.

Occupational pesticide use and self-reported olfactory impairment in US farmers.

Aspirin Eugenol Ester Attenuates Paraquat-Induced Hepatotoxicity by Inhibiting Oxidative Stress.

Reducing toxicity and antimicrobial activity of a pesticide mixture via photo-Fenton in different aqueous matrices using iron complexes.

Continuous, Automated Breathing Rate and Body Motion Monitoring of Rats With Paraquat-Induced Progressive Lung Injury.

Behavioral Tests in Neurotoxin-Induced Animal Models of Parkinson's Disease.

Effects of oral exposure to arsenite on arsenic metabolism and transport in rat kidney.

Does Hemoperfusion Increase Survival in Acute Paraquat Poisoning? A Retrospective Multicenter Study.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin Regulates the Expression of Aryl Hydrocarbon Receptor-Related Factors and Cytokines in Peripheral Blood Mononuclear Cells and CD4+ T cells from Patients with Atopic Dermatitis and Psoriasis.

[Biocontrol potential of *Talaromyces purpogenus* and its regulation on soil microbial community].

In vitro effects of selected endocrine disruptors (DEHP, PCB118, BPA) on narrow-clawed crayfish (*Astacus leptodactylus*) primary cells.

Environmental risk dynamics of pesticides toxicity in a Mediterranean micro-estuary.

Mitochondrial Complex I Mutations Predispose *Drosophila* to Isoflurane Neurotoxicity.

Serum metabolic changes associated with dioxin exposure in a Chinese male cohort.

In Vitro Detoxification Studies of p-Cresol by Intestinal Bacteria Isolated from Human Feces.

Effects of curcumin, D-pinitol alone or in combination in cytotoxicity induced by arsenic in PC12 cells.

Functional analysis of newly identified RYR1 variants in patients susceptible to malignant hyperthermia.

Effects of Different Doses of Excessive Iron in Diets on Oxidative Stress in Immune Organs of Sheep.

Chronic High Glyphosate Exposure Delays Individual Worker Bee (*Apis mellifera* L.) Development under Field Conditions.

Sublethal Paraquat Confers Multidrug Tolerance in *Pseudomonas aeruginosa* by Inducing Superoxide Dismutase Activity and Lowering Envelope Permeability.

Separating the Empirical Wheat From the Pseudoscientific Chaff: A Critical Review of the Literature Surrounding Glyphosate, Dysbiosis and Wheat-Sensitivity.

Is arsenic responsible for the toxicity of the hyperaccumulating mushroom *Sarcosphaera coronaria*?

Dibenzoylthiamine Has Powerful Antioxidant and Anti-Inflammatory Properties in Cultured Cells and in Mouse Models of Stress and Neurodegeneration.

Exposures to uranium and arsenic alter intraepithelial and innate immune cells in the small intestine of male and female mice.

Dietary Iron Overload Differentially Modulates Chemically-Induced Liver Injury in Rats.

Comparison of the basic morphology and function of 3D lung epithelial cultures derived from several donors.

Herbicide Widespread: The Effects of Pethoxamid on Nonalcoholic Fatty Liver Steatosis In Vitro.

Inhibition of rat brain and human red cell acetylcholinesterase by thiocarbamate herbicides.

Role of CAPE in reducing oxidative stress in animal models with traumatic brain injury.

Chronic and acute arsenic exposure enhance EGFR expression via distinct molecular mechanisms.

SVCT2-Dependent plasma and mitochondrial membrane transport of ascorbic acid in differentiating myoblasts.

Behavioral impairments in infant and adult mouse offspring exposed to 2,3,7,8-tetrabromodibenzofuran in utero and via lactation.

Oxidative stress via the Maillard reaction is associated with the occurrence of internal browning in roots of sweetpotato (*Ipomoea batatas*).

Over-gene expression in the apoptotic, oxidative damage and liver injury in female rats exposed to butralin.

PCB52 exposure alters the neurotransmission ligand-receptors in male offspring and contributes to sex-specific neurodevelopmental toxicity.

Adverse effects of pesticides on the functions of immune system.

Environmental risk assessment of pesticides currently applied in Ghana.

Course of matrix metalloproteinase-1 and pulmonary oxygenation in acute respiratory distress syndrome caused by oral ingestion of large doses of oxadiazon/butachlor emulsion: a case report.

Comparative assessment of the acute toxicity, haematological and genotoxic effects of ten commonly used pesticides on the African Catfish, *Clarias gariepinus* Burchell 1822.

How the AHR Became Important in Intestinal Homeostasis-A Diurnal FICZ/AHR/CYP1A1 Feedback Controls Both Immunity and Immunopathology.

Protective Effect of Fenofibrate on Oxidative Stress-Induced Apoptosis in Retinal-Choroidal Vascular Endothelial Cells: Implication for Diabetic Retinopathy Treatment.

Dietary Components, Microbial Metabolites and Human Health: Reading between the Lines.

Protective effect of *Mucuna pruriens* against arsenic-induced liver and kidney dysfunction and neurobehavioral alterations in rats.

P-cresyl sulfate causes mitochondrial hyperfusion in H9C2 cardiomyoblasts.

Metabolic and proteomic analysis of nitrogen metabolism mechanisms involved in the sugarcane - *Fusarium verticillioides* interaction.

Visual system: An understudied target of aquatic toxicology.

Bioactivity of the Novel Fungicide SYP-14288 Against Plant Pathogens and the Study of its Mode of Action Based on Untargeted Metabolomics.

Net release and uptake of xenometabolites across intestinal, hepatic, muscle, and renal tissue beds in healthy conscious pigs.

Introducing of potent cytotoxic novel 2-(aroylamino)cinnamamide derivatives against colon cancer mediated by dual apoptotic signal activation and oxidative stress.

Agrochemicals disrupt multiple endocrine axes in amphibians.

Protective effects of phenelzine administration on synaptic and non-synaptic cortical mitochondrial function and lipid peroxidation-mediated oxidative damage following TBI in young adult male rats.

Assessment of the absorbed dose after exposure to surgical smoke in an operating room.

Chronic arsenic exposure induces the time-dependent modulation of inflammation and immunosuppression in spleen.

Efficacy of high-dose ambroxol for paraquat poisoning: A meta-analysis of randomized controlled trials.

Kaempferol Protects Blood Vessels From Damage Induced by Oxidative Stress and Inflammation in Association With the Nrf2/HO-1 Signaling Pathway.

Piceatannol Ameliorates Hepatic Oxidative Damage and Mitochondrial Dysfunction of Weaned Piglets Challenged with Diquat.

Severe chemical burns related to dermal exposure to herbicide containing glyphosate and glufosinate with surfactant in Korea.

Dryland Cropping Systems, Weed Communities, and Disease Status Modulate the Effect of Climate Conditions on Wheat Soil Bacterial Communities.

Organic selenium supplement partially alleviated diquat-induced oxidative insults and hepatic metabolic stress in nursery pigs.

Cardiac amyloidosis possibly secondary to Agent Orange exposure.

Neuroprotection Against Parkinson's Disease Through the Activation of Akt/GSK3 β Signaling Pathway by Tovophyllin A.

Shoot organogenesis and somatic embryogenesis from leaf and root explants of *Scaevola sericea*.

Quantitative Proteomic Profiling of Mitochondrial Toxicants in a Human Cardiomyocyte Cell Line.

Short-term e-cigarette vapour exposure causes vascular oxidative stress and dysfunction: evidence for a close connection to brain damage and a key role of the phagocytic NADPH oxidase (NOX-2).

Toxicity of Gold Nanoparticles in Mice due to Nanoparticle/Drug Interaction Induces Acute Kidney Damage.

Uroprotective mechanisms of natural products against cyclophosphamide-induced urinary bladder toxicity: A comprehensive review.

Dioxin-like and non-dioxin-like PCBs differentially regulate the hepatic proteome and modify diet-induced nonalcoholic fatty liver disease severity.

Functional modulation of sarcolemmal K(ATP) channels by atrial natriuretic peptide-elicited intracellular signaling in adult rabbit ventricular cardiomyocytes.

Rethinking toxicity testing: Influence of aging on the outcome of long-term toxicity testing and possible remediation.

Review of Health Consequences of Electronic Cigarettes and the Outbreak of Electronic Cigarette, or Vaping, Product Use-Associated Lung Injury.

Cross-Sectional and Longitudinal Effects of PCB Exposure on Human Stress Hormones in the German HELPCB Surveillance Program.

Effect of Oral Supplementation of Healthy Pregnant Sows with Sucrosomial Ferric Pyrophosphate on Maternal Iron Status and Hepatic Iron Stores in Newborn Piglets.

Platelet-Rich Fibrin Can Neutralize Hydrogen Peroxide-Induced Cell Death in Gingival Fibroblasts.

SKN-1 is involved in combination of apple peels and blueberry extracts synergistically protecting against oxidative stress in *Caenorhabditis elegans*.

Pharmacological inhibition of lipid peroxidative damage by the 21-aminosteroid U-74389G improves cortical mitochondrial function following traumatic brain injury in young adult male rats.

Longitudinal Study of Metabolic Biomarkers among Conventional and Organic Farmers in Thailand.

Complex Regulatory Role of the TRPA1 Receptor in Acute and Chronic Airway Inflammation Mouse Models.

Enhanced alcohol degradation and hepatic protective effects of an *Acetobacter Pasteurianus*-derived product, CureZyme-ACE, in an acute intoxication rat model.

Regulation of Spermine Oxidase through Hypoxia-Inducible Factor-1 α Signaling in Retinal Glial Cells under Hypoxic Conditions.

Protective effects of taurine against muscle damage induced by diquat in 35-day weaned piglets.

[Injury of L-02 hepatocytes induced by NaAsO₂ is related to down-regulated expression of p14ARF and increased expression of MDM2 and p53].

Evaluation of different types of arsenic methylation and its relationship with metabolic syndrome in an area chronically exposed to arsenic.

Polydatin relieves paraquat-induced human MRC-5 fibroblast injury through inhibiting the activation of the NLRP3 inflammasome.

Oxidative stress delays development and alters gene expression in the agricultural pest moth, *Helicoverpa armigera*.

In older women, a high-protein diet including animal-sourced foods did not impact serum levels and urinary excretion of trimethylamine-N-oxide.

The aryl hydrocarbon receptor mediates sex ratio distortion in the embryos sired by TCDD-exposed male mice.

Circulating oxidized LDL, increased in patients with acute myocardial infarction, is accompanied by heavily modified HDL.

Agronomic Factors Associated with Bacterial Leaf Streak Development Caused by *Xanthomonas vasicola* pv. *vasculorum* in Corn.

Multigenerational and transgenerational effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on ovarian reserve and follicular development through AMH/AMHR2 pathway in adult female rats.

Cytoprotection, Genoprotection, and Dermal Exposure Assessment of Chitosan-Based Agronomofungicides.

Taurine Alleviates Intestinal Injury by Mediating Tight Junction Barriers in Diquat-Challenged Piglet Models.

The Role of Vitamin D Receptor Gene Polymorphisms in Colorectal Cancer Risk.

Iron Overload in Gastric Mucosa: Underdiagnosed Condition Rarely Documented in Clinical and Pathology Reports.

New insight into Parkinson's disease pathogenesis from reactive oxygen species-mediated extracellular Zn(2+) influx.

Non-Targeted Metabolomic Profiling of Coronary Heart Disease Patients With Taohong Siwu Decoction Treatment.

Devil's claw (*Harpagophytum procumbens*) ameliorates the neurobehavioral changes and neurotoxicity in female rats exposed to arsenic.

Microglia depletion prior to lipopolysaccharide and paraquat treatment differentially modulates behavioral and neuronal outcomes in wild type and G2019S LRRK2 knock-in mice.

Toxicity in Goats Exposed to Arsenic in the Region Lagunera, Northern Mexico.

N,O-Nucleoside Analogues: Metabolic and Apoptotic Activity.

Arsenic represses airway epithelial mucin expression by affecting retinoic acid signaling pathway.

Strawberries at the Crossroads: Management of Soilborne Diseases in California Without Methyl Bromide.

Sodium arsenite toxicity on hematology indices and reproductive parameters in Teddy goat bucks and their amelioration with vitamin C.

Chronic arsenic exposure impairs adaptive thermogenesis in male C57BL/6J mice.

Pro-inflammatory cytokines, oxidative stress and diffuse coronary reocclusions in elderly patients after coronary stenting.

Daily stream samples reveal highly complex pesticide occurrence and potential toxicity to aquatic life.

Exposure effects of iron oxide nanoparticles and iron salts in blackfish (*Capoeta fusca*): Acute toxicity, bioaccumulation, depuration, and tissue histopathology.

Immunohistochemical and histological evaluations of cyclophosphamide-induced acute cardiotoxicity in wistar rats: The role of turmeric extract (curcuma).

Correlation and prognostic significance of serum amylase, serum lipase, and plasma cholinesterase in acute organophosphorus poisoning.

Decreased Glucose Utilization Contributes to Memory Impairment in Patients with Glufosinate Ammonium Intoxication.

Metabolomic Profiling Revealed Potential Biomarkers in Patients With Moyamoya Disease.

Occurrence and risk assessment of organic micropollutants in freshwater systems within the Lake Victoria South Basin, Kenya.

Ferrous Sulfate-Induced Esophageal Injury Leading to Esophagitis Dissecans Superficialis.

Chitosan-Based Agronofungicides as a Sustainable Alternative in the Basal Stem Rot Disease Management.

P-cresol Alters Brain Dopamine Metabolism and Exacerbates Autism-Like Behaviors in the BTBR Mouse.

Sarcoidosis: Causes, Diagnosis, Clinical Features, and Treatments.

Assessing the impact of arsenic metabolism efficiency on DNA methylation using Mendelian randomization.

Air quality biomonitoring of trace elements in the metropolitan area of Huancayo, Peru using transplanted *Tillandsia capillaris* as a biomonitor.

Dietary Puerarin Supplementation Alleviates Oxidative Stress in the Small Intestines of Diquat-Challenged Piglets.

Acute toxicity dataset for QSAR modeling and predicting missing data of six pesticides.

Chemical characterization, phytotoxic, and cytotoxic activities of essential oil of *Mentha longifolia*.

EGCG ameliorates neuronal and behavioral defects by remodeling gut microbiota and TotM expression in *Drosophila* models of Parkinson's disease.

Dietary exposure to pesticide residues and associated health risks in infants and young children - Results of the French infant total diet study.

Biological variation in kidney injury and kidney function biomarkers among farmers in Lamphun province, Thailand.

Chronic exposure to arsenite enhances influenza virus infection in cultured cells.

Effect of α -lipoic acid on spatial memory and structural integrity of developing hippocampal neurons in rats subjected to sodium arsenite exposure.

Urinary Arsenic Species are Detectable in Urban Underserved Hispanic/Latino Populations: A Pilot Study from the Study of Latinos: Nutrition & Physical Activity Assessment Study (SOLNAS).

Profile and outcome of patients presenting with agrochemical poisoning to the emergency department.

High-Sensitivity Detection of the Lung Cancer Biomarker CYFRA21-1 in Serum Samples Using a Carboxyl-MoS₂ Functional Film for SPR-Based Immunosensors.

Herbicide Diuron as Endocrine Disrupting Chemicals (EDCs) through Histopathological Analysis in Gonads of Javanese Medaka (*Oryzias javanicus*, Bleeker 1854).

Manipulating Gibberellin Control Over Growth and Fertility as a Possible Target for Managing Wild Radish Weed Populations in Cropping Systems.

Selenium-Enriched Yeast Alleviates Oxidative Stress-Induced Intestinal Mucosa Disruption in Weaned Pigs.

An Experimental Swallow Evoked Potential Protocol to Investigate the Neural Substrates of Swallowing.

Simultaneous Analysis and Dietary Exposure Risk Assessment of Fomesafen, Clomazone, Clethodim and Its Two Metabolites in Soybean Ecosystem.

Arsenic induces platelet shape change through altering focal adhesion kinase-mediated actin dynamics, contributing to increased platelet reactivity.

Gut neurotoxin p-cresol induces differential expression of GLUN2B and GLUN2A subunits of the NMDA receptor in the hippocampus and nucleus accumbens in healthy and audiogenic seizure-prone rats.

Efficacy of Divinylbenzenic Resin in Removing Indoxyl Sulfate and P-Cresol Sulfate in Hemodialysis Patients: Results From an In Vitro Study and An In Vivo Pilot Trial (xuanro4-Nature 3.2).

Metformin lowers glucose 6-phosphate in hepatocytes by activation of glycolysis downstream of glucose phosphorylation.

Paraquat Poisoning: A Retrospective Study of 55 Patients From a Tertiary Care Center in Southern India.

Chronic methyl bromide toxicity is ameliorated by haemodialysis.

Use of Insecticides in Agriculture and the Prevention of Vector-Borne Diseases: Population Knowledge, Attitudes, Practices and Beliefs in Elibou, South CÔte d'Ivoire.

Clinical significance of serum levels of microRNA-27a and its correlation with interleukin-10 in patients with multiple organ dysfunction syndrome caused by acute paraquat poisoning.

Cigarette smoke extract induces ferroptosis in vascular smooth muscle cells.

Primary Metabolite Responses to Oxidative Stress in Early-Senescing and Paraquat Resistant Arabidopsis thaliana rcd1 (Radical-Induced Cell Death1).

Uncovering pathophysiological changes in frontotemporal dementia using serum lipids.

Early Neurotoxic Effects of Inorganic Arsenic Modulate Cortical GSH Levels Associated With the Activation of the Nrf2 and NFÎB Pathways, Expression of Amino Acid Transporters and NMDA Receptors and the Production of Hydrogen Sulfide.

Effect of cAMP Receptor Protein Gene on Growth Characteristics and Stress Resistance of Haemophilus parasuis Serovar 5.

Plant Lipid Bodies Traffic on Actin to Plasmodesmata Motorized by Myosin XIs.

Lactobacillus probiotics improved the gut microbiota profile of a Drosophila melanogaster Alzheimer's disease model and alleviated neurodegeneration in the eye.

Regulation of Aryl Hydrocarbon Receptor Signaling Pathway and Dioxin Toxicity by Novel Agonists and Antagonists.

Bioisosteric Replacement of Amide Group with 1,2,3-Triazoles in Acetaminophen Addresses Reactive Oxygen Species-Mediated Hepatotoxic Insult in Wistar Albino Rats.

Corrigendum to "Transgenerational impairment of ovarian induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) associated with Igf2 and H19 in adult female rat" [Toxicology 428 (2019) 152311].

Plant tissue analysis as a tool for predicting fertiliser needs for low cyanogenic glucoside levels in cassava roots: An assessment of its possible use.

When scientists become detectives: investigating systematic tree poisoning in a protected cove.

Identification of Serum-Based Metabolic Feature and Characteristic Metabolites in Paraquat Intoxicated Mouse Models.

Characterization of Volatile Organic Compound Metabolites in Cigarette Smokers, Electronic Nicotine Device Users, Dual Users, and Nonusers of Tobacco.

Diabetes and Toxicant Exposure.

Mechanisms of Metabolism Interaction Between p-Cresol and Mycophenolic Acid.

Iron Deficiency in Menstruating Adult Women: Much More than Anemia.

Evaluation of the Effects of Agro Pesticides Use on Liver and Kidney Function in Farmers from Buea, Cameroon.

The Arabidopsis receptor kinase STRUBBELIG regulates the response to cellulose deficiency.

High resolution respirometry to assess function of mitochondria in native homogenates of human heart muscle.

In-Vivo Optical Monitoring of the Efficacy of Epidermal Growth Factor Receptor Targeted Photodynamic Therapy: The Effect of Fluence Rate.

ROCK inhibitors upregulate the neuroprotective Parkin-mediated mitophagy pathway.

Arsenic and smokeless tobacco exposure induces DNA damage and oxidative stress in reproductive organs of female Swiss albino mice.

Noscapine Modulates Neuronal Response to Oxygen-glucose Deprivation/Reperfusion Injury Via Activation of Sigma-1 Receptor in Primary Cortical Cultures.

Curcumin Attenuates Acrolein-induced COX-2 Expression and Prostaglandin Production in Human Umbilical Vein Endothelial Cells.

Intra-Amniotic Sildenafil Treatment Promotes Lung Growth and Attenuates Vascular Remodeling in an Experimental Model of Congenital Diaphragmatic Hernia.

Evaluation of gastric lavage efficiency and utility using a rapid quantitative method in a swine paraquat poisoning model.

Effects of sublethal and realistic concentrations of the commercial herbicide atrazine in Pacu (*Piaractus mesopotamicus*): Long-term exposure and recovery assays.

Graves' disease: Epidemiology, genetic and environmental risk factors and viruses.

Acute obstructive fibrinous laryngotracheobronchitis induced by severe glyphosate surfactant intoxication: A case report.

An Analysis of Biomarkers in Patients with Chronic Pain.

Neuropsychiatric manifestations of methyl iodide toxicity.

Erratum: Esophageal perforation and death following glyphosate poisoning.

Green-Synthesized FeSO₄ Nanoparticles Exhibit Antibacterial and Cytotoxic Activity by DNA Degradation.

Developmental Exposure to PCB153 (2,2',4,4',5,5'-Hexachlorobiphenyl) Alters Circadian Rhythms and the Expression of Clock and Metabolic Genes.

Biologically Active Echinulin-Related Indolediketopiperazines from the Marine Sediment-Derived Fungus *Aspergillus niveoglaucus*.

Microplastics modify the toxicity of glyphosate on *Daphnia magna*.

Distract, delay, disrupt: examples of manufactured doubt from five industries.

Acute thiamethoxam toxicity in honeybees is not enhanced by common fungicide and herbicide and lacks stress-induced changes in mRNA splicing.

Acute and chronic toxicity of herbicides and their mixtures measured by *Aliivibrio fischeri* ecotoxicological assay.

A cellular defense memory imprinted by early life toxic stress.

Adipocyte epigenetic alterations and potential therapeutic targets in transgenerationally inherited lean and obese phenotypes following ancestral exposures.

Sub-chronic exposure to Kalach 360 SL-induced damage in rats' liver and hematological system.

Diosmin ameliorative effects on oxidative stress and fibrosis in paraquat-induced lung injury in mice.

Response to comments on: Perinatal exposure to a glyphosate-based herbicide impairs female reproductive outcomes and induces second-generation adverse effects in Wistar rats.

Comparative cyto- and genotoxicity assessment of glyphosate and glyphosate-based herbicides in human peripheral white blood cells.

Glycyrrhizic acid modulates the atrazine-induced apoptosis in rabbit spleen.

Impact of electronic cigarette heating coil resistance on the production of reactive carbonyls, reactive oxygen species and induction of cytotoxicity in human lung cancer cells in vitro.

Acute uterine effects and long-term reproductive alterations in postnatally exposed female rats to a mixture of commercial formulations of endosulfan and glyphosate.

Atrazine-induced toxicity in goat spermatozoa is alleviated to some extent by polyphenol-enriched feed.

Clethodim exposure induced development toxicity and behaviour alteration in early stages of zebrafish life.

Comparative effects of parent and heated cinnamaldehyde on the function of human iPSC-derived cardiac myocytes.

Accidental paraquat induced hypersalivation: a case report.

Curcumin relieves paraquat-induced lung injury through inhibiting the thioredoxin interacting protein/NLR pyrin domain containing 3-mediated inflammatory pathway.

Effect of the herbicide atrazine and its major metabolite, DACT, on bovine sperm cryotolerance.

Gut microbiota and neurological effects of glyphosate.

Effects of environmental chemicals on the proliferation and differentiation of neural stem cells.

Ozonation of the algaecide irgarol: Kinetics, transformation products, and toxicity.

Single and joint effects of chronic exposure to chlorpyrifos and glyphosate based pesticides on structural biomarkers in *Cnesterodon decemmaculatus*.

Autophagy Stimulation Decreases Dopaminergic Neuronal Death Mediated by Oxidative Stress.

Costo de la intoxicación por Paraquat en Colombia.

Assessing crop damage from dicamba on non-dicamba-tolerant soybean by hyperspectral imaging through machine learning.

Diuron exposure and Akt overexpression promote glioma formation through DNA hypomethylation.

Ventilator settings and outcome of respiratory failure in paraquat-induced pulmonary injury.

Responses of morphological, physiological, and biochemical characteristics of maize (*Zea mays* L.) seedlings to atrazine stress.

Factors adversely influencing neurodevelopment.

[Xuebijing improves clinical prognosis and reduces mortality in patients with acute paraquat poisoning: a Meta-analysis included 1 429 patients].

Atrazine induces necroptosis by miR-181-5p targeting inflammation and glycometabolism in carp lymphocytes.

The organochlorine pesticides pentachlorophenol and dichlorodiphenyltrichloroethane increase secretion and production of interleukin 6 by human immune cells.

A glyphosate-based herbicide induces sub-lethal effects in early life stages and liver cell line of rainbow trout, *Oncorhynchus mykiss*.

Genotoxic, cytotoxic, and cytopathological effects in rats exposed for 18 months to a mixture of 13 chemicals in doses below NOAEL levels.

Protective effect of *Ganoderma atrum* polysaccharide on acrolein-induced macrophage injury via autophagy-dependent apoptosis pathway.

Effects of chronic glyphosate exposure to pregnant mice on hepatic lipid metabolism in offspring.

N-acetylcysteine alleviated paraquat-induced mitochondrial fragmentation and autophagy in primary murine neural progenitor cells.

Paraquat as an Environmental Risk Factor in Parkinson's Disease Accelerates Age-Related Degeneration Via Rapid Influx of Extracellular Zn(2+) into Nigral Dopaminergic Neurons.

Metformin Activates the Protective Effects of the AMPK Pathway in Acute Lung Injury Caused by Paraquat Poisoning.

Effects of 2,4-D-based herbicide (DMA® 806) on sensitivity, respiration rates, energy reserves and behavior of tadpoles.

Safeners Improve Maize Tolerance under Herbicide Toxicity Stress by Increasing the Activity of Enzymes in Vivo.

Decrease in Butyrylcholinesterase Accompanied by Intermediate-like Syndrome after Massive Ingestion of a Glyphosate-surfactant.

Hepatoprotective effect of N-acetylcystein loaded niosomes on liver function in paraquat-induced acute poisoning.

Cellular, humoral and molecular responses in rainbow trout (*Oncorhynchus mykiss*) exposed to a herbicide and subsequently infected with infectious hematopoietic necrosis virus.

Hepatoprotective effects of the n-butanol extract from *Perralderia coronopifolia* Coss. against PCP-induced toxicity in Wistar albino rats.

Toxicity of the aquatic herbicide, reward[®], to the northwestern salamander.

Hemotoxic effects of some herbicides on juvenile of Nile tilapia *Oreochromis niloticus*.

Ghrelin ameliorates A549 cell apoptosis caused by paraquat via p38-MAPK regulated mitochondrial apoptotic pathway.

Nuclear receptor AHR-mediated xenobiotic detoxification pathway involves in atrazine-induced nephrotoxicity in quail (*Coturnix C. coturnix*).

Paraquat induced impaired reproductive function and modulation of retinal and extra-retinal photoreceptors in Japanese quail (*Coturnix coturnix japonica*).

Animal models in the neurotoxicology of 2,4-D.

Glyphosate- and Fipronil-Based Agrochemicals and Their Mixtures Change Zebrafish Behavior.

The Effects of Maternal Atrazine Exposure and Swimming Training on Spatial Learning Memory and Hippocampal Morphology in Offspring Male Rats via PSD95/NR2B Signaling Pathway.

Identification of miRNA-7 as a regulator of brain-derived neurotrophic factor/ α -synuclein axis in atrazine-induced Parkinson's disease by peripheral blood and brain microRNA profiling.

Genotoxic effect of dimethylarsinic acid and the influence of co-exposure to titanium nanodioxide (nTiO₂) in *Laonereis culveri* (Annelida, Polychaeta).

Chronic Kidney Disease in Agricultural Communities.

The evaluation of the potential ecotoxicity of pyroligneous acid obtained from fast pyrolysis.

Protective mechanism of 1-methylhydantoin against lung injury induced by paraquat poisoning.

[High frequency hearing among rural workers exposed to pesticides].

Comparison of four pharmacological strategies aimed to prevent the lung inflammation and paraquat-induced alveolar damage.

Innate immune responses to paraquat exposure in a *Drosophila* model of Parkinson's disease.

Neutrophil-lymphocyte ratio as an early predictor for patients with acute paraquat poisoning: A retrospective analysis.

Design, Synthesis and Evaluation of Novel Trichloromethyl Dichlorophenyl Triazole Derivatives as Potential Safener.

Ameliorative role of aspirin in paraquat-induced lung toxicity via mitochondrial mechanisms.

Arsenite and its trivalent methylated metabolites inhibit glucose-stimulated calcium influx and insulin secretion in murine pancreatic islets.

Reprotoxicity of glyphosate-based formulation in *Caenorhabditis elegans* is not due to the active ingredient only.

Effect of endoplasmic reticulum calcium on paraquat-induced apoptosis of human lung type II alveolar epithelial A549 cells.

Xenobiotic mediated diabetogenesis: Developmental exposure to dichlorvos or atrazine leads to type 1 or type 2 diabetes in *Drosophila*.

Clinical features and risk factors of acute kidney injury in children with acute paraquat intoxication.

Paraquat modulates microglia M1/M2 polarization via activation of TLR4-mediated NF- κ B signaling pathway.

Biochemical and molecular impacts of glyphosate-based herbicide on the gills of common carp.

Maternal glyphosate-based herbicide exposure alters antioxidant-related genes in the brain and serum metabolites of male rat offspring.

Neurotoxicity of pesticides.

Serum ammonia as an early predictor of in-hospital mortality in patients with glufosinate poisoning.

Lymphocyte and its CD4+ and CD8+ subgroup changes after paraquat poisoning.

Molecular mechanisms of adaptive evolution revealed by global selection for glyphosate resistance.

Subacute acrolein exposure to rat larynx in vivo.

Determination of LCt(50) of aerosolized paraquat and its pulmonary toxic implications in non-anesthetized rats.

Spirometric Pulmonary Restriction in Herbicide-Exposed U.S. Vietnam War Veterans.

Chloramphenicol Mitigates Oxidative Stress by Inhibiting Translation of Mitochondrial Complex I in Dopaminergic Neurons of Toxin-Induced Parkinson's Disease Model.

[Protective effects of oligomeric proanthocyanidins in mice exposed to paraquat].

Perinatal dioxin exposure and neurodevelopment of 2-year-old Vietnamese children in the most contaminated area from Agent Orange in Vietnam.

Conserved roles of glucose in suppressing reactive oxygen species-induced cell death and animal survival.

Low dose of flurochloridone affected reproductive system of male rats but not fertility and early embryonic development.

[Experience of continuous fluid therapy in successfully rescuing a patient with acute severe paraquat poisoning].

[Early white blood cell count in predicting mortality after acute paraquat poisoning: a Meta-analysis].

Lethal toxicity of the herbicides acetochlor, ametryn, glyphosate and metribuzin to tropical frog larvae.

Cardiotoxicity in African clawed frog (*Xenopus laevis*) sub-chronically exposed to environmentally relevant atrazine concentrations: Implications for species survival.

Effects of atrazine on life parameters, oxidative stress, and ecdysteroid biosynthetic pathway in the marine copepod *Tigriopus japonicus*.

Acute in vitro exposure to environmentally relevant atrazine levels perturbs bovine preimplantation embryo metabolism and cell number.

Atrazine induced transgenerational reproductive effects in medaka (*Oryzias latipes*).

Acute exposure to chlorpyrifos and glyphosate induces changes in hemolymph biochemical parameters in the crayfish, *Astacus leptodactylus* (Eschscholtz, 1823).

Serial measurement of glyphosate blood concentration in a glyphosate potassium herbicide-intoxicated patient: A case report.

Gene expression, genotoxicity, and physiological responses in an Amazonian fish, *Colossoma macropomum* (CUVIER 1818), exposed to Roundup® and subsequent acute hypoxia.

The effects of Roundup® in embryo development and energy metabolism of the zebrafish (*Danio rerio*).

Exposures to the environmental contaminants pentachlorophenol and dichlorodiphenyltrichloroethane increase production of the proinflammatory cytokine, interleukin-1 β , in human immune cells.

Cytotoxic activity of pentachlorophenol and its active metabolites in SH-SY5Y neuroblastoma cells.

Burning mouth syndrome triggered by cinnamal present in a denture fixative cream.

Reducing injection ameliorates paraquat-induced acute lung injury by regulating AMPK/MAPK/NF- κ B signaling.

Clinical outcome of paraquat poisoning during pregnancy.

Glyphosate's Synergistic Toxicity in Combination with Other Factors as a Cause of Chronic Kidney Disease of Unknown Origin.

Thyroid Hormones in Conventional and Organic Farmers in Thailand.

Detoxification, Apoptosis, and Immune Transcriptomic Responses of the Gill Tissue of Bay Scallop Following Exposure to the Algicide Thiazolidinedione 49.

[Treatment and nursing of one patient with burns on perineal region and complicated by secondary multiple organ injuries by exposing to paraquat fluid].

Exposure to Roundup® affects behaviour, head regeneration and reproduction of the freshwater planarian *Girardia tigrina*.

Fate and effects of two pesticide formulations in the invertebrate *Folsomia candida* using a natural agricultural soil.

Monocytes as an Early Predictor for Patients with Acute Paraquat Poisoning: A Retrospective Analysis.

Glyphosate-based herbicides at low doses affect canonical pathways in estrogen positive and negative breast cancer cell lines.

Glyphosate induces benign monoclonal gammopathy and promotes multiple myeloma progression in mice.

Surgical treatment of pyloric stenosis caused by glyphosate poisoning: A case report.

Systematic review and meta-analysis of the efficacy and safety of immunosuppressive pulse therapy in the treatment of paraquat poisoning.

Auxinic herbicides induce oxidative stress on *Cnesterodon decemmaculatus* (Pisces: Poeciliidae).

Evaluating sub-lethal stress from Roundup® exposure in *Artemia franciscana* using ¹H NMR and GC-MS.

Combined cytotoxicity of co-exposure to aldehyde mixtures on human bronchial epithelial BEAS-2B cells.

A new split-luciferase complementation assay identifies pentachlorophenol as an inhibitor of apoptosome formation.

Mechanisms behind the atherothrombotic effects of acrolein, a review.

Development and application of a multispecies toxicity test with tropical freshwater microalgae.

Beclin 1, LC3, and p62 expression in paraquat-induced pulmonary fibrosis.

Human exposure to banned pesticides reported to the French Poison Control Centers: 2012-2016.

Parkinsonism Relating to Intoxication with Glyphosate.

Conditional Haploinsufficiency of β -Catenin Aggravates Neuronal Damage in a Paraquat-Based Mouse Model of Parkinson Disease.

[Clinical analysis of 6 cases of acute diquat poisoning].

Unravelling mesosulfuron-methyl phytotoxicity and metabolism-based herbicide resistance in *Alopecurus aequalis*: Insight into regulatory mechanisms using proteomics.

Foliar Roundup application has minor effects on the compositional and functional diversity of soil microorganisms in a short-term greenhouse experiment.

Leucine-rich repeat kinase-2 (LRRK2) modulates paraquat-induced inflammatory sickness and stress phenotype.

Impact of the glyphosate-based commercial herbicide, its components and its metabolite AMPA on non-target aquatic organisms.

Insight into the confusion over surfactant co-formulants in glyphosate-based herbicides.

Reactive oxygen species trigger the fast action of glufosinate.

Chemometric modeling of *Daphnia magna* toxicity of agrochemicals.

Toxicological effects of anthropogenic activities in *Geophagus brasiliensis* from a coastal river of southern Brazil: A biomarker approach.

Neuroprotective effects of PACAP against paraquat-induced oxidative stress in the *Drosophila* central nervous system.

Renal cortical hypoperfusion caused by glyphosate-surfactant herbicide.

Inhibition of mesenchymal stromal cells' chemotactic effect to ameliorate paraquat-induced pulmonary fibrosis.

Glimepiride prevents paraquat-induced Parkinsonism in mice: involvement of oxidative stress and neuroinflammation.

Blockade of Rapid Influx of Extracellular Zn(2+) into Nigral Dopaminergic Neurons Overcomes Paraquat-Induced Parkinson's Disease in Rats.

Inflammatory Effects of Subacute Exposure of Roundup in Rat Liver and Adipose Tissue.

[Establishment and evaluation of acute diquat poisoning model in Wistar rats].

[Doxycycline inhibits paraquat-induced pulmonary fibrosis via TGF- β 1/Smad pathway].

The significance of serum HMGB1 level in humans with acute paraquat poisoning.

Rosiglitazone attenuates paraquat-induced lung fibrosis in rats in a PPAR gamma-dependent manner.

Toxicity of diuron in HepG2 cells and zebrafish embryos.

How Glyphosate Impairs Liver Condition in the Field Lizard *Podarcis siculus* (Rafinesque-Schmaltz, 1810): Histological and Molecular Evidence.

Mutational signatures of redox stress in yeast single-strand DNA and of aging in human mitochondrial DNA share a common feature.

Toxicological Effects of Traumatic Acid and Selected Herbicides on Human Breast Cancer Cells: In Vitro Cytotoxicity Assessment of Analyzed Compounds.

Platelet-lymphocyte ratio is not a prognostic predictor for acute paraquat-intoxicated patients: A retrospective analysis.

Retrospective study of clinical features and prognosis of edaravone in the treatment of paraquat poisoning.

Histopathological and ultrastructural indices for the assessment of glyphosate-based herbicide cytotoxicity in decapod crustacean hepatopancreas.

Prenatal exposure to the herbicide 2,4-D is associated with deficits in auditory processing during infancy.

NF- κ B/mTOR-mediated autophagy can regulate diquat-induced apoptosis.

Acrolein Is Involved in the Synergistic Potential of Cigarette Smoking- and Betel Quid Chewing-Related Human Oral Cancer.

Laboratory and field tests for risk assessment of metsulfuron-methyl-based herbicides for soil fauna.

Paraquat Exposure Increases Oxidative Stress Within the Dorsal Striatum of Male Mice With a Genetic Deficiency in One-carbon Metabolism.

Pulmonary Tumor Thrombotic Microangiopathy Mimicking Inhalation Lung Injury.

Homicidal Paraquat Poisoning.

Rapamycin reduces mortality in acute-stage paraquat-induced toxicity in zebrafish.

Chemical profiling, cytotoxicity and phytotoxicity of foliar volatiles of *Hyptis suaveolens*.

Broad-scale effect of herbicides on functional properties in benthic invertebrate communities of rivers: An integrated analysis of biomonitoring and exposure evaluations.

The Alexipharmic Mechanisms of Five Licorice Ingredients Involved in CYP450 and Nrf2 Pathways in Paraquat-Induced Mice Acute Lung Injury.

Use of Pesticides and Health Risk among Farmers in Sunsari District, Nepal.

Pesticides use and exposure among yam farmers in the Nanumba traditional area of Ghana.

Assessment of Glyphosate Induced Epigenetic Transgenerational Inheritance of Pathologies and Sperm Epimutations: Generational Toxicology.

[Lung transplantation in patients with paraquat poisoning: a case report and literature review].

Melittin Exerts Beneficial Effects on Paraquat-Induced Lung Injuries In Mice by Modifying Oxidative Stress and Apoptosis.

TLR3 is involved in paraquat-induced acute renal injury.

Metabolomics Analysis in Acute Paraquat Poisoning Patients Based on UPLC-Q-TOF-MS and Machine Learning Approach.

The MEK/ERK/CREB signaling pathway is involved in atrazine induced hippocampal neurotoxicity in Sprague Dawley rats.

Mesenchymal Stem Cells Alleviate Acute Lung Injury and Inflammatory Responses Induced by Paraquat Poisoning.

What'S New in Shock, April 2019?

Metabolic profiling of amino acids in paraquat-induced acute kidney injury.

DNA damage exerted by mixtures of commercial formulations of glyphosate and imazethapyr herbicides in *Rhinella arenarum* (Anura, Bufonidae) tadpoles.

Role of bone marrow mesenchymal stem cells in the development of PQ-induced pulmonary fibrosis.

Antioxidant and cytoprotective effects of N-acetylcysteine against subchronic oral glyphosate-based herbicide-induced oxidative stress in rats.

NADPH oxidase regulates paraquat and maneb-induced dopaminergic neurodegeneration through ferroptosis.

Lack of adverse effects in subchronic and chronic toxicity/carcinogenicity studies on the glyphosate-resistant genetically modified maize NK603 in Wistar Han RCC rats.

High-Dose Paraquat Induces Human Bronchial 16HBE Cell Death and Aggravates Acute Lung Intoxication in Mice by Regulating Keap1/p65/Nrf2 Signal Pathway.

Inhibition of MAPKs Signaling Pathways Prevents Acrolein-Induced Neurotoxicity in HT22 Mouse Hippocampal Cells.

Paraquat affects the differentiation of neural stem cells and impairs the function of vascular endothelial cells: a study of molecular mechanism.

Is soil contamination by a glyphosate commercial formulation truly harmless to non-target plants? - Evaluation of oxidative damage and antioxidant responses in tomato.

2,4-Dichlorophenoxyacetic acid containing herbicide impairs essential visually guided behaviors of larval fish.

Effects of glyphosate and aminomethylphosphonic acid on an isogenic model of the human blood-brain barrier.

Combined effects of pentachlorophenol and its byproduct hexachlorobenzene on endocrine and reproduction in zebrafish.

The GMO90+ Project: Absence of Evidence for Biologically Meaningful Effects of Genetically Modified Maize-based Diets on Wistar Rats After 6-Months Feeding Comparative Trial.

Developmental effects of neonatal fractionated co-exposure to low-dose gamma radiation and paraquat on behaviour in adult mice.

The Impact of Agent Orange Exposure on Prostate Cancer Outcomes.

Short-term glucose dysregulation following acute poisoning with organophosphorus insecticides but not herbicides, carbamate or pyrethroid insecticides in South Asia.

Use of qSOFA Score in Predicting the Outcomes of Patients With Glyphosate Surfactant Herbicide Poisoning Immediately Upon Arrival at the Emergency Department.

Protective effects of 3^β-angeloyloxy-8^β, 10^β-dihydroxyremophila-7(11)-en-12, 8^β-lactone on paraquat-induced oxidative injury in SH-SY5Y cells.

Intra-abdominal follicular lymphoma masquerading as severe cardiopulmonary disease in a Vietnam War veteran exposed to agent orange.

Prenatal and infant exposure to ambient pesticides and autism spectrum disorder in children: population based case-control study.

Quantitative and Site-Specific Chemoproteomic Profiling of Targets of Acrolein.

Subchronic low-dose 2,4-D exposure changed plasma acylcarnitine levels and induced gut microbiome perturbations in mice.

The Ramazzini Institute 13-week pilot study glyphosate-based herbicides administered at human-equivalent dose to Sprague Dawley rats: effects on development and endocrine system.

Acute toxic limbic encephalopathy following glyphosate intoxication.

The life-threatening rash of poisoning.

Comment on 'Perinatal exposure to a glyphosate-based herbicide impairs female reproductive outcomes and induces second-generation adverse effects in Wistar rats', Arch Toxicol 92:2629-2643 : On the impairment of female reproductive performance by developmental exposure to a glyphosate-based herbicide.

Toxicological impact of oxyfluorfen 24% herbicide on the reproductive system, antioxidant enzymes, and endocrine disruption of *Biomphalaria alexandrina* (Ehrenberg, 1831) snails.

Learning and memory impairments associated to acetylcholinesterase inhibition and oxidative stress following glyphosate based-herbicide exposure in mice.

Tribolium castaneum as a whole-animal screening system for the detection and characterization of neuroprotective substances.

Impact, recovery and carryover effect of Roundup® on predator recognition in common spiny loach, *Lepidocephalichthys thermalis*.

Maternal pentachlorophenol exposure induces developmental toxicity mediated by autophagy on pregnancy mice.

Hepatotoxicity and reproductive disruption in male lizards (*Eremias argus*) exposed to glufosinate-ammonium contaminated soil.

Cellular uptake of paraquat determines subsequent toxicity including mitochondrial damage in lung epithelial cells.

Effects of cypermethrin (pyrethroid), glyphosate and chlorpyrifos (organophosphorus) on the endocrine and immune system of *Salvator merianae* (Argentine tegu).

Fenoxaprop-ethyl affects mouse oocyte quality and the underlying mechanisms.

Alleviation of paraquat-induced oxidative lung injury by betaine via regulation of sulfur-containing amino acid metabolism despite the lack of betaine-homocysteine methyltransferase (BHMT) in the lung.

Analysis of Acrolein-Derived 1, N(2)-Propanodeoxyguanosine Adducts in Human Lung DNA from Smokers and Nonsmokers.

Burden of paraquat poisoning in the department of Antioquia, Colombia.

[Clinical effect of haemoperfusion combined with continuous veno-veno haemofiltration in treatment of paraquat poisoning: a Meta-analysis].

Successful extracorporeal membrane oxygenation support for severe acute diquat and glyphosate poisoning: A case report.

Cyanobacterial antimetabolite 7-deoxy-sedoheptulose blocks the shikimate pathway to inhibit the growth of prototrophic organisms.

Acute exposure to a glyphosate-containing herbicide formulation inhibits Complex II and increases hydrogen peroxide in the model organism *Caenorhabditis elegans*.

Aspirin-triggered resolvin D1 alleviates paraquat-induced acute lung injury in mice.

Effects of AT-RvD1 on paraquat-induced acute renal injury in mice.

Histological evaluation of vital organs of the livebearer *Jenynsia multidentata* (Jenyns, 1842) exposed to glyphosate: A comparative analysis of Roundup(®) formulations.

The effects of 3 fish oil emulsion-based parenteral nutrition plus combination treatment for acute paraquat poisoning.

Adverse effects of acrolein, a ubiquitous environmental toxicant, on muscle regeneration and mass.

Increased 90-Day Mortality in Spontaneously Breathing Patients With Paraquat Poisoning: In Addition to Disease Severity, Lung Strain May Play a Role.

Ambient Particulate Matter and Acrolein Co-Exposure Increases Myocardial Dyssynchrony in Mice via TRPA1.

Exogenous Tetranectin Protects Against 1-Methyl-4-Phenylpyridine-Induced Neurotoxicity by Inhibiting Apoptosis and Autophagy Through Ribosomal Protein S6 Kinase Beta-1.

Sodium tanshinone IIA sulfate protects myocardium against paraquat-induced toxicity through activating the Nrf2 signaling pathway in rats.

Identification of intermediates, acute toxicity removal, and kinetics investigation to the Ametryn treatment by direct photolysis (UV(254)), UV(254)/H(2)O(2), Fenton, and photo-Fenton processes.

Environmental Control of Astrocyte Pathogenic Activities in CNS Inflammation.

Claudins, VEGF, Nrf2, Keap1, and Nonspecific Airway Hyper-Responsivity Are Increased in Mice Co-Exposed to Allergen and Acrolein.

Resveratrol improves intestinal barrier function, alleviates mitochondrial dysfunction and induces mitophagy in diquat challenged piglets(1).

A Synthetic Receptor as a Specific Antidote for Paraquat Poisoning.

Epigenetic disruption of estrogen receptor alpha is induced by a glyphosate-based herbicide in the preimplantation uterus of rats.

Linalool- and α -terpineol-induced programmed cell death in *Chlamydomonas reinhardtii*.

Using mathematical modeling to infer the valence state of arsenicals in tissues: A PBPK model for dimethylarsinic acid (DMA(V)) and dimethylarsinous acid (DMA(III)) in mice.

Paraquat and Parkinson's disease: a systematic review and meta-analysis of observational studies.

Protective Effect of Taurine on Paraquat-Induced Lung Epithelial Cell Injury.

Pequi enriched diets protect *Drosophila melanogaster* against paraquat-induced locomotor deficits and oxidative stress.

Development, characterisation and efficacy evaluation of biochemical fungicidal formulations for postharvest control of anthracnose (*Colletotrichum gloeosporioides* Penz) disease in mango.

Degradation of atrazine by catalytic ozonation in the presence of iron scraps: performance, transformation pathway, and acute toxicity.

Effects of s-metolachlor on early life stages of marbled crayfish.

Increasing tolerance to bispyribac-sodium is able to allow glutathione homeostasis to recover in indica rice compared with japonica rice.

Bacopa monnieri Supplements Offset Paraquat-Induced Behavioral Phenotype and Brain Oxidative Pathways in Mice.

Changes in hemocytes of *Biomphalaria glabrata* infected with *Echinostoma paraensei* and exposed to glyphosate-based herbicide.

Roundup® Herbicide Decreases Quality Parameters of Spermatozoa of Silversides *Odontesthes Humensis*.

Neuroprotective action of Eicosapentaenoic (EPA) and Docosahexaenoic (DHA) acids on Paraquat intoxication in *Drosophila melanogaster*.

Paraquat exposure and Parkinson's disease: A systematic review and meta-analysis.

Comment on: Perinatal exposure to a glyphosate-based herbicide impairs female reproductive outcomes and induces second-generation adverse effects in Wistar rats.

Oxadiazon affects the expression and activity of aldehyde dehydrogenase and acylphosphatase in human striatal precursor cells: A possible role in neurotoxicity.

Biomarkers at different levels of organisation after atrazine formulation (SIPTRAN 500SC(®)) exposure in *Rhinella schneideri* (Anura: Bufonidae) Neotropical tadpoles.

Atrazine exposure triggers common carp neutrophil apoptosis via the CYP450s/ROS pathway.

Short-term to long-term extrapolation of lethal effects of an herbicide on the marine mysid shrimp *Americamysis Bahía* by use of the General Unified Threshold Model of Survival (GUTS).

Carfentrazone-ethyl and glyphosate drift inhibits uredinial formation of *Austropuccinia psidii* on *Eucalyptus grandis* leaves.

Prognostic factor determination mortality of acute glufosinate-poisoned patients.

Cinnamaldehyde and Phenyl Ethyl Alcohol promote the entrapment of intermediate species of HEWL, as revealed by structural, kinetics and thermal stability studies.

Cinnamaldehyde inhibits type three secretion system in *Salmonella enterica* serovar Typhimurium by affecting the expression of key effector proteins.

Dual drug-loaded cubic liquid crystal gels for transdermal delivery: inner structure and percutaneous mechanism evaluations.

The effect of coniferaldehyde on neurite outgrowth in neuroblastoma Neuro2a cells.

Loss of methionine sulfoxide reductases increases resistance to oxidative stress.

In vitro activity of carvacrol, cinnamaldehyde and thymol combined with antifungals against *Malassezia pachydermatis*.

The effects of Cinnamaldehyde on early brain injury and cerebral vasospasm following experimental subarachnoid hemorrhage in rabbits.

Side Effects of Coronary Stenting such as Severe Coronary Stenosis and Multiple Coronary Chronic Total Occlusions in Elderly Patients via Induced Proinflammatory and Prooxidative Stress.

Cinnamaldehyde inhibits *Candida albicans* growth by causing apoptosis and its treatment on vulvovaginal candidiasis and oropharyngeal candidiasis.

Cardioprotective Effects of Atorvastatin Are Mediated Through PPAR γ in Paraquat-Exposed Rats.

Trans-cinnamaldehyde improves neuroinflammation-mediated NMDA receptor dysfunction and memory deficits through blocking NF- κ B pathway in presenilin1/2 conditional double knockout mice.

Characterization of the Basic Membrane Properties of Neurons of the Rat Dorsal Motor Nucleus of the Vagus in Paraquat-Induced Models of Parkinsonism.

Trans-cinnamaldehyde shows anti-depression effect in the forced swimming test and possible involvement of the endocannabinoid system.

Conjugal multiple system atrophy: Chance, shared risk factors, or evidence of transmissibility?

Cinnamaldehyde enhances apoptotic effect of oxaliplatin and reverses epithelial-mesenchymal transition and stemness in hypoxic colorectal cancer cells.

Effect of Fenofibrate on the Expression of Inflammatory Mediators in a Diabetic Rat Model.

Association of plasma folate, vitamin B12 levels, and arsenic methylation capacity with developmental delay in preschool children in Taiwan.

Evaluation of relaxant responses properties of cinnamon essential oil and its major component, cinnamaldehyde on human and rat corpus cavernosum.

Clock-Bmal1 mediates MMP9 induction in acrolein-promoted atherosclerosis associated with gut microbiota regulation.

Neuroprotective Effects of Methylene Blue In Vivo and In Vitro.

Neuroprotective Effects of Methanolic Extract of Avocado Persea americana (var. Colinred) Peel on Paraquat-Induced Locomotor Impairment, Lipid Peroxidation and Shortage of Life Span in Transgenic knockdown Parkin Drosophila melanogaster.

Vaporized E-Cigarette Liquids Induce Ion Transport Dysfunction in Airway Epithelia.

Effect of Vasicinone against Paraquat-Induced MAPK/p53-Mediated Apoptosis via the IGF-1R/PI3K/AKT Pathway in a Parkinson's Disease-Associated SH-SY5Y Cell Model.

Cinnamaldehyde attenuates atherosclerosis via targeting the $\text{I}\hat{\text{I}}^{\text{a}}\text{B}/\text{NF-}\hat{\text{I}}^{\text{a}}\text{B}$ signaling pathway in high fat diet-induced ApoE(-/-) mice.

Speciation analysis of arsenic in urine samples from APL patients treated with single agent As(2)O(3) by HPLC-HG-AFS.

The relationship between acrolein and oxidative stress in COPD: in systemic plasma and in local lung tissue.

Cinnamaldehyde Ameliorates High-Glucose-Induced Oxidative Stress and Cardiomyocyte Injury Through Transient Receptor Potential Ankyrin 1.

Acrolein-mediated alpha-synuclein pathology involvement in the early post-injury pathogenesis of mild blast-induced Parkinsonian neurodegeneration.

Photobiomodulation therapy reduces acute pain and inflammation in mice.

Altered gastric tone and motility response to brain-stem dopamine in a rat model of parkinsonism.

Doxycycline alleviates paraquat-induced acute lung injury by inhibiting neutrophil-derived matrix metalloproteinase 9.

Oxidative stress in vagal neurons promotes parkinsonian pathology and intercellular $\hat{\text{I}}^{\text{I}}\text{-synuclein}$ transfer.

Paraquat Preferentially Induces Apoptosis of Late Stage Effector Lymphocyte and Impairs Memory Immune Response in Mice.

Anti-oxidant and anti-inflammatory effects of cinnamaldehyde and eugenol on mononuclear cells of rheumatoid arthritis patients.

Effects of pesticides on exposure and susceptibility to parasites can be generalised to pesticide class and type in aquatic communities.

Combined effect of conventional antimicrobials with essential oils and their main components against resistant *Streptococcus suis* strains.

trans-Cinnamaldehyde mitigated intestinal inflammation induced by *Cronobacter sakazakii* in newborn mice.

Anti-inflammatory effect of trans-4-methoxycinnamaldehyde from *Etilingera pavieana* in LPS-stimulated macrophages mediated through inactivation of NF- κ B and JNK/c-Jun signaling pathways and in rat models of acute inflammation.

Trans-Cinnamaldehyde Inhibits IL-1 β -Stimulated Inflammation in Chondrocytes by Suppressing NF- κ B and p38-JNK Pathways and Exerts Chondrocyte Protective Effects in a Rat Model of Osteoarthritis.

Efficacy of plant-derived antimicrobials for controlling *Salmonella Schwarzengrund* on dry pet food.

Combined treatment with 2'-hydroxycinnamaldehyde and temozolomide suppresses glioblastoma tumorspheres by decreasing stemness and invasiveness.

The inhibition of hypoxia-induced angiogenesis and metastasis by cinnamaldehyde is mediated by decreasing HIF-1 α protein synthesis via PI3K/Akt pathway.

Activation of Nrf2 attenuates delayed gastric emptying in obesity induced diabetic (T2DM) female mice.

Cinnamaldehyde regulates H₂O₂-induced skeletal muscle atrophy by ameliorating the proteolytic and antioxidant defense systems.

Topical Application of Cinnamaldehyde Promotes Faster Healing of Skin Wounds Infected with *Pseudomonas aeruginosa*.

Time course of arsenic species in red blood cells of acute promyelocytic leukemia (APL) patients treated with single agent arsenic trioxide.

Selective mitochondrial superoxide generation in vivo is cardioprotective through hormesis.

Exposure to atrazine during puberty reduces sperm viability, increases weight gain and alters the expression of key metabolic genes in the liver of male mice.

Upregulated lncRNA small nucleolar RNA host gene 1 promotes 1-methyl-4-phenylpyridinium ion-induced cytotoxicity and reactive oxygen species production through miR-15b-5p/GSK3 β axis in human dopaminergic SH-SY5Y cells.

Protective effects of febuxostat against paraquat-induced lung toxicity in rats: Impact on RAGE/PI3K/Akt pathway and downstream inflammatory cascades.

Inhibition of the Nrf2/HO-1 Axis Suppresses the Mitochondria-Related Protection Promoted by Gastrodin in Human Neuroblastoma Cells Exposed to Paraquat.

Acid-responsive nanoparticles as a novel oxidative stress-inducing anticancer therapeutic agent for colon cancer.

Cinnamaldehyde and eugenol attenuates collagen induced arthritis via reduction of free radicals and pro-inflammatory cytokines.

Valuable Lung Injury Lessons From a Little Known Disease.

Suppression of miR-21 and miR-155 of macrophage by cinnamaldehyde ameliorates ulcerative colitis.

The Methodological Challenges of Using Veterans Benefits Administration Disability Codes to Ascertain Agent Orange Exposure Among Vietnam Theater Veterans With Service-connected Disabilities.

Cinnamaldehyde ameliorates STZ-induced rat diabetes through modulation of IRS1/PI3K/AKT2 pathway and AGEs/RAGE interaction.

Revisiting the Paraquat-Induced Sporadic Parkinson's Disease-Like Model.

Overview of Biotechnology-Derived Herbicide Tolerance and Insect Resistance Traits in Plant Agriculture.

Mitochondrial superoxide generation induces a parkinsonian phenotype in zebrafish and huntingtin aggregation in human cells.

Urinary acrolein metabolite levels in severe acute alcoholic hepatitis patients.

The potential role of acrolein in plant ferroptosis-like cell death.

Herbicide-tolerant endophytic bacteria of rice plants as the biopriming agents for fertility recovery and disease suppression of unhealthy rice seeds.

Assessment of hematological, hepato-renal, antioxidant, and hormonal responses of *Clarias gariepinus* exposed to sub-lethal concentrations of oxyfluorfen.

Short-term developmental toxicity and potential mechanisms of the herbicide metamifop to zebrafish (*Danio rerio*) embryos.

Auxin protects *Arabidopsis thaliana* cell suspension cultures from programmed cell death induced by the cellulose biosynthesis inhibitors thaxtomin A and isoxaben.

Short-chain lipid peroxidation products form covalent adducts with pyruvate kinase and inhibit its activity in vitro and in breast cancer cells.

Mitochondrial Oxidative Stress Impairs Energy Metabolism and Reduces Stress Resistance and Longevity of *C. elegans*.

Mitigating the risk of atrazine exposure: Identifying hot spots and hot times in surface waters across Nebraska, USA.

Dietary determinants of inorganic arsenic exposure in the Strong Heart Family Study.

Forkhead box O3 protects the heart against paraquat-induced aging-associated phenotypes by upregulating the expression of antioxidant enzymes.

Cellular Uptake and Clearance of Oxidatively-modified Apolipoprotein E3 by Cerebral Cortex Endothelial Cells.

The effect of cinnamaldehyde on passive avoidance memory and hippocampal Akt, ERK and GSK-3 β in mice.

Anti-cancer effects of cinnamon: Insights into its apoptosis effects.

Effects of flavoring compounds used in electronic cigarette refill liquids on endothelial and vascular function.

Toxicity of atrazine and the products of its homogeneous photocatalytic degradation on the aquatic organisms *Lemna minor* and *Daphnia magna*.

2,4-D causes oxidative stress induction and apoptosis in human dental pulp stem cells (hDPSCs).

Effect of in vitro glyphosate on *Fusarium* spp. growth and disease severity in maize.

Loss of RNA binding protein, human antigen R enhances mitochondrial elongation by regulating Drp1 expression in SH-SY5Y cells.

Metabolism and disposition of arsenic species from controlled dosing with dimethylarsinic acid (DMA(V)) in adult female CD-1 mice. V. Toxicokinetic studies following oral and intravenous administration.

Cinnamaldehyde protects from methylglyoxal-induced vascular damage: Effect on nitric oxide and advanced glycation end products.

A urinary metabolomics study of a Polish subpopulation environmentally exposed to arsenic.

Inorganic arsenic exposure and neuropsychological development of children of 4-5 years of age living in Spain.

Impairment of testicular function in electronic cigarette (e-cig, e-cigs) exposed rats under low-voltage and nicotine-free conditions.

Biological effect of protein modifications by lipid peroxidation products.

Common E-Cigarette Flavoring Chemicals Impair Neutrophil Phagocytosis and Oxidative Burst.

Possible involvement of transcriptional activation of nuclear factor erythroid 2-related factor 2 (Nrf2) in the protective effect of caffeic acid on paraquat-induced oxidative damage in *Drosophila melanogaster*.

Chlorogenic acid prevents paraquat-induced apoptosis via Sirt1-mediated regulation of redox and mitochondrial function.

Alkaline Ceramidase Mediates the Oxidative Stress Response in *Drosophila melanogaster* Through Sphingosine.

Pentachlorophenol-induced cytotoxicity in human erythrocytes: enhanced generation of ROS and RNS, lowered antioxidant power, inhibition of glucose metabolism, and morphological changes.

The effects of cinnamaldehyde on acute or chronic stress-induced anxiety-related behavior and locomotion in male mice.

â€¦ Fell Upas Sits, the Hydra-Tree of Death (â€¦), or the Phytotoxicity of Trees.

Interaction of methyl viologen-induced chloroplast and mitochondrial signalling in Arabidopsis.

Removal of batch effects using stratified subsampling of metabolomic data for in vitro endocrine disruptors screening.

Glyphosate disrupts redox status and up-regulates metallothionein I and II genes expression in the liver of adult rats. Alleviation by quercetin.

Cinnamaldehyde in flavored e-cigarette liquids temporarily suppresses bronchial epithelial cell ciliary motility by dysregulation of mitochondrial function.

Redox-dependent catalase mimetic cerium oxide-based nanozyme protect human hepatic cells from 3-AT induced acatalasemia.

Lignan and flavonoid support the prevention of cinnamon against oxidative stress related diseases.

Response to The Methodological Challenges of Using Veterans Benefits Administration Disability Codes to Ascertain Agent Orange Exposure Among Vietnam Theater Veterans With Service-connected Disabilities.

Reduced Absorption and Impaired Translocation Endows Glyphosate Resistance in *Amaranthus palmeri* Harvested in Glyphosate-Resistant Soybean from Argentina.

Metabolic activity testing can underestimate acute drug cytotoxicity as revealed by HepG2 cell clones overexpressing cytochrome P450 2C19 and 3A4.

Carnosine protects cardiac myocytes against lipid peroxidation products.

Effective attenuation of glyphosate-induced oxidative stress and granulosa cell apoptosis by vitamins C and E in caprines.

Serum Proteomic Profiling Analysis of Rats Chronically Exposed to Arsenic.

Serum P-Cresyl Sulfate Is a Predictor of Central Arterial Stiffness in Patients on Maintenance Hemodialysis.

Siderophore (from *Synechococcus* sp. PCC 7002)-Chelated Iron Promotes Iron Uptake in Caco-2 Cells and Ameliorates Iron Deficiency in Rats.

Studies on Dibenzylamines as Inhibitors of Venezuelan Equine Encephalitis Virus.

[Brain abscess revealing trilogy of Fallot in a child: about a case at the University Teaching Hospital of Parakou, Benin].

Geographic distribution and environmental risk factors of lymphoma in dogs under primary-care in the UK.

Activation of aryl hydrocarbon receptor by dioxin directly shifts gut microbiota in zebrafish.

Aryl hydrocarbon receptor pathway: Role, regulation and intervention in atherosclerosis therapy (Review).

Transgenerational impairment of ovarian induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) associated with Igf2 and H19 in adult female rat.

Environmental challenges for the nervous system and the brain in Japan.

Disease modifying mitochondrial uncouplers, MP101, and a slow release ProDrug, MP201, in models of Multiple Sclerosis.

The gut microbiota and its relationship with chronic kidney disease.

First steps in the development of a liquid biopsy in situ hybridization protocol to determine circular RNA biomarkers in rat biofluids.

Environmental exposures in young adults with declining kidney function in a population at risk of Mesoamerican nephropathy.

Simultaneous quantification of estrogens and glucocorticoids in human adipose tissue by liquid-chromatography-tandem mass spectrometry.

An intra-amniotic injection of mesenchymal stem cells promotes lung maturity in a rat congenital diaphragmatic hernia model.

LncRNA-241 inhibits 1,2-Dichloroethane-induced hepatic apoptosis.

Mitochondrial Uncoupling Coordinated With PDH Activation Safely Ameliorates Hyperglycemia via Promoting Glucose Oxidation.

Indoxyl sulfate associates with cardiovascular phenotype in children with chronic kidney disease.

High fat diet deteriorates the memory impairment induced by arsenic in mice: a sub chronic in vivo study.

Clinical association between the metabolite of healthy gut microbiota, 3-indolepropionic acid and chronic kidney disease.

Carbon Nanotube/Conducting Polymer Hybrid Nanofibers as Novel Organic Bioelectronic Interfaces for Efficient Removal of Protein-Bound Uremic Toxins.

Prostate Cancer-associated SPOP mutations enhance cancer cell survival and docetaxel resistance by upregulating Caprin1-dependent stress granule assembly.

Star-PAP controlled alternative polyadenylation coupled poly(A) tail length regulates protein expression in hypertrophic heart.

Plasma Metabolic Profiling Analysis of Gout Party on Acute Gout Arthritis Rats Based on UHPLC-Q-TOF/MS Combined with Multivariate Statistical Analysis.

Expression and Functional Analysis of Hepcidin from Mandarin Fish (*Siniperca chuatsi*).

Metabolomics for improved treatment monitoring of phenylketonuria: urinary biomarkers for non-invasive assessment of dietary adherence and nutritional deficiencies.

(11)C-Labeled Pictilisib (GDC-0941) as a Molecular Tracer Targeting Phosphatidylinositol 3-Kinase (PI3K) for Breast Cancer Imaging.

Extracorporeal treatment in children with acute severe poisoning.

Lesion of the Locus Coeruleus Damages Learning and Memory Performance in Paraquat and Maneb-induced Mouse Parkinson's Disease Model.

Common differentially expressed proteins were found in mouse cleft palate models induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin and retinoic acid.

Exosomal MALAT1 derived from hepatic cells is involved in the activation of hepatic stellate cells via miRNA-26b in fibrosis induced by arsenite.

Discovery of HWL-088: A highly potent FFA1/GPR40 agonist bearing a phenoxyacetic acid scaffold.

Functions of aryl hydrocarbon receptor (AHR) and CD38 in NAD metabolism and nonalcoholic steatohepatitis (NASH).

Increase of core temperature affected the progression of kidney injury by repeated heat stress exposure.

Associations between persistent organic pollutants and risk of breast cancer metastasis.

In utero dioxin exposure and cardiometabolic risk in the Seveso Second Generation Study.

Administration of ferrous sulfate drops has significant effects on the gut microbiota of iron-sufficient infants: a randomised controlled study.

NLRX1 Regulation Following Acute Mitochondrial Injury.

In Vitro and In Vivo Evaluations of Mesoporous Iron Particles for Iron Bioavailability.

Radiomics Nomogram Analyses for Differentiating Pneumonia and Acute Paraquat Lung Injury.

Alternative Protein and Iron Sources from Edible Insects but Not *Solanum torvum* Improved Body Composition and Iron Status in Malnourished Rats.

Unambiguous Characterization of p-Cresyl Sulfate, a Protein-Bound Uremic Toxin, as Biomarker of Heart and Kidney Disease.

The effect of chronic vitamin deficiency and long term very low dose exposure to 6 pesticides mixture on neurological outcomes - A real-life risk simulation approach.

[Clinical observation on the inflammatory indexes in septic gastrointestinal dysfunction treated with acupuncture at Jiaji (EX-B 2)].

Epidemic of Chronic Kidney Disease of Nontraditional Etiology in El Salvador: Integrated Health Sector Action and South-South Cooperation.

Creatine is Neuroprotective to Retinal Neurons In Vitro But Not In Vivo.

Occupational Health and Safety in the Palm Oil Industry: A Systematic Review.

AhR Activation Leads to Massive Mobilization of Myeloid-Derived Suppressor Cells with Immunosuppressive Activity through Regulation of CXCR2 and MicroRNA miR-150-5p and miR-543-3p That Target Anti-Inflammatory Genes.

Metal-induced nephrotoxicity to diabetic and non-diabetic Wistar rats.

Magnetic nanoparticles-loaded liposomes as a novel treatment agent for iron deficiency anemia: In vivo study.

Impaired intestinal barrier function in a mouse model of hyperuricemia.

RNA processing bodies are disassembled during Old World alphavirus infection.

Dietary iron deficiency impaired intestinal immune function of on-growing grass carp under the infection of *Aeromonas hydrophila*: Regulation of NF- κ B and TOR signaling.

Oral ferrous citrate or ferrous sulfate use during predialysis may reduce serum phosphate level at dialysis initiation©.

NEAT1 is overexpressed in Parkinson's disease substantia nigra and confers drug-inducible neuroprotection from oxidative stress.

Design, synthesis and biological evaluation of novel FFA1/GPR40 agonists: New breakthrough in an old scaffold.

Killing Effects of IFN R(-/-) Mouse NK Cells Activated by HN Protein of NDV on Mouse Hepatoma Cells and Possible Mechanism with Syk and NF- κ B.

Pesticide use and risk of non-Hodgkin lymphoid malignancies in agricultural cohorts from France, Norway and the USA: a pooled analysis from the AGRICOH consortium.

The negative impact of the environment on methylation/epigenetic marking in gametes and embryos: A plea for action to protect the fertility of future generations.

Borax Alleviates Copper-Induced Renal Injury via Inhibiting the DNA Damage and Apoptosis in Rainbow Trout.

Comparison of ferrous sulfate, polymaltose complex and iron-zinc in iron deficiency anemia.

8-plex LC-MS/MS Analysis of Permethylated N-Glycans Achieved by Using Stable Isotopic Iodomethane.

Identification and Molecular Characterization of Superoxide Dismutases Isolated From A Scuticociliate Parasite: Physiological Role in Oxidative Stress.

Mass spectrometry-based urinary metabolomics for the investigation on the mechanism of action of *Eleutherococcus senticosus* (Rupr. & Maxim.) Maxim. leaves against ischemic stroke in rats.

Assessment of the carcinogenic effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin using mouse embryonic stem cells to form teratoma in vivo.

Circular RNA TLK1 Aggravates Neuronal Injury and Neurological Deficits after Ischemic Stroke via miR-335-3p/TIPARP.

Development and validation of a UHPLC-MS/MS method for measurement of a gut-derived uremic toxin panel in human serum: An application in patients with kidney disease.

Novel polymerase spiral reaction assay for the visible molecular detection of porcine circovirus type 3.

Flow Cytometry Reveals the Nature of Oncotic Cells.

An assessment for diagnostic and therapeutic modalities for management of pediatric Iron deficiency Anemia in Saudi Arabia: a cross-sectional study.

Asymptomatic Helicobacter Pylori Infection in Preschool Children and Young Women Does Not Predict Iron Bioavailability from Iron-Fortified Foods.

Tissue-Specific Peculiarities of Vibration-Induced Hypoxia in Rabbit Liver and Kidney.

Food as medicine: Selenium enriched lentils offer relief against chronic arsenic poisoning in Bangladesh.

2,3,7,8-Tetrachlorodibenzo-p-dioxin promotes injury-induced vascular neointima formation in mice.

Aryl Hydrocarbon Receptor Signaling Prevents Activation of Hepatic Stellate Cells and Liver Fibrogenesis in Mice.

Multi-Compartment Profiling of Bacterial and Host Metabolites Identifies Intestinal Dysbiosis and Its Functional Consequences in the Critically Ill Child.

Novel diterpenoid-type activators of the Keap1/Nrf2/ARE signaling pathway and their regulation of redox homeostasis.

NO/cGMP/PKG activation protects Drosophila cells subjected to hypoxic stress.

Understanding Environmental Contaminants' Direct Effects on Non-alcoholic Fatty Liver Disease Progression.

Role of epigenetic regulation of Igf2 and H19 in 2,3,7,8-Tetrachlorobenzo-p-dioxin (TCDD)-induced ovarian toxicity in offspring rats.

Targetome analysis of chaperone-mediated autophagy in cancer cells.

Atypical myopathy-associated hypoglycin A toxin remains in sycamore seedlings despite mowing, herbicidal spraying or storage in hay and silage.

CDK4/6 inhibitor palbociclib suppresses IgE-mediated mast cell activation.

Does Improvement of Low Serum Ferritin Improve Symptoms of Restless Legs Syndrome in a Cohort of Pediatric Patients?

Incidence and mortality trends and geographic patterns of follicular lymphoma in Canada.

Daily versus twice daily dose of ferrous sulphate supplementation in pregnant women: A randomized clinical trial.

Evaluating the efficacy of a ferrous-ion-chelating peptide from Alaska pollock frame for the improvement of iron nutritional status in rats.

A case of fatal 2,4-dinitrophenol (2,4-DNP) intoxication with delayed onset methaemoglobinaemia.

Death is in the air: Confirmation of decomposition without a corpse.

Protective effect of gallic acid against arsenic-induced anxiety-/depression- like behaviors and memory impairment in male rats.

The potential therapeutic benefit of resveratrol on Th17/Treg imbalance in immune thrombocytopenic purpura.

Effects of dietary fat on gut microbiota and faecal metabolites, and their relationship with cardiometabolic risk factors: a 6-month randomised controlled-feeding trial.

The role of posttranslational modifications of α -synuclein and LRRK2 in Parkinson's disease: Potential contributions of environmental factors.

Establishing a role for environmental toxicant exposure induced epigenetic remodeling in malignant transformation.

Oxidative Stress and Genomic Damage Induced In Vitro in Human Peripheral Blood by Two Preventive Treatments of Iron Deficiency Anemia.

Iron bioavailability of four iron sources used to fortify infant cereals, using anemic weaning pigs as a model.

Industrial, Biocide, and Cosmetic Chemical Inducers of Cholestasis.

LC-MS/MS study of the degradation processes of nitisinone and its by-products.

Childhood Drug and Non-Drug Poisoning in Nigeria: An Economic Appraisal.

Comparison of iron-reduced and iron-supplemented semisynthetic diets in T cell transfer colitis.

A Bifunctional Adsorber Particle for the Removal of Hydrophobic Uremic Toxins from Whole Blood of Renal Failure Patients.

Effects of Aryl Hydrocarbon Receptor Deficiency on PCB-77-Induced Impairment of Glucose Homeostasis during Weight Loss in Male and Female Obese Mice.

Selective Transport of Protein-Bound Uremic Toxins in Erythrocytes.

Gene expression alterations of human liver cancer cells following borax exposure.

Advances in nanomaterials for use in photothermal and photodynamic therapeutics (Review).

Development of a rapid viability polymerase chain reaction method for detection of *Yersinia pestis*.

Stress granules are formed in renal proximal tubular cells during metabolic stress and ischemic injury for cell survival.

Improving rates of ferrous sulfate prescription for suspected iron deficiency anaemia in infants.

Bioaccumulation, behavior changes and physiological disruptions with gender-dependent in lizards (*Eremias argus*) after exposure to glufosinate-ammonium and l-glufosinate-ammonium.

Antioxidant, immunomodulatory, oxidative stress inhibitory and iron supplementation effect of Astragalus membranaceus polysaccharide-iron (III) complex on iron-deficiency anemia mouse model.

Molecular analysis and genotyping of pathogenicity locus in *Clostridioides difficile* strains isolated from patients in Tehran hospitals during the years 2007-2010.

Persistent organic pollutants, pesticides, and the risk of thyroid cancer: systematic review and meta-analysis.

Cardioprotective properties of opioid receptor agonists in rats with stress-induced cardiac injury.

The AtHSP17.4C1 Gene Expression Is Mediated by Diverse Signals that Link Biotic and Abiotic Stress Factors with ROS and Can Be a Useful Molecular Marker for Oxidative Stress.

In Vitro and In Vivo Anti-Breast Cancer Activities of Some Newly Synthesized 5-(thiophen-2-yl)thieno-[2,3-d]pyrimidin-4-one Candidates.

[Effect of electroacupuncture at "Jiaji" (EX-B 2) points combined with nerve mobilization on motor function and mRNA and protein expression of RhoA in rabbits with sciatic nerve injury].

Extragenital cutaneous warts - clinical presentation, diagnosis and treatment.

Regeneration and evaluation of somaclones of sugarcane variety Co86032 for yellow leaf disease resistance and yield traits.

Role of dantrolene in dinitrophenol (DNP) overdose: A continuing question?

Rapid Analysis of Effects of Environmental Toxicants on Tumorigenesis and Inflammation Using a Transgenic Zebrafish Model for Liver Cancer.

Arsenic and sulfur dioxide co-exposure induce renal injury via activation of the NF- κ B and caspase signaling pathway.

Grapevine trunk diseases under thermal and water stresses.

Association of the human aryl hydrocarbon receptor repressor (AhRR)-c.565C>G transversion with male infertility: A case-control study from Iran.

Preventing complications by persistence with iron replacement therapy: a comprehensive literature review.

Wound healing potential of oil extracted from *Parrotiopsis jacquemontiana* (Decne) Rehder.

Disruption of Telomere Integrity and DNA Repair Machineries by KML001 Induces T Cell Senescence, Apoptosis, and Cellular Dysfunctions.

The Effect of Sevelamer on Serum Levels of Gut-Derived Uremic Toxins: Results from In Vitro Experiments and A Multicenter, Double-Blind, Placebo-Controlled, Randomized Clinical Trial.

High temperature aggravates the effects of pesticides in goldfish.

3-Methylcholanthrene Induces Chylous Ascites in TCDD-Inducible Poly-ADP-Ribose Polymerase (Tiparp) Knockout Mice.

Comparative liver function assessment of natural and available drug (Ferrous sulfate) for iron-deficiency anemia in rat model.

Chronic Interstitial Nephritis in Agricultural Communities (CINAC) in Sri Lanka.

Rescue of degenerating neurons and cells by stem cell released molecules: using a physiological renormalization strategy.

Consumption of Galacto-Oligosaccharides Increases Iron Absorption from Ferrous Fumarate: A Stable Iron Isotope Study in Iron-Depleted Young Women.

A Study on Deliberately Self-Poisoned In-Hospital Patients in a Tertiary Health Care Center in Northeast India: A Cross-Sectional Review.

Inorganic arsenic exposure induces sex-disparate effects and exacerbates ischemia-reperfusion injury in the female heart.

Pulmonary hypertension secondary to congenital diaphragmatic hernia: factors and pathways involved in pulmonary vascular remodeling.

Prenatal exposure to organohalogen compounds and children's mental and motor development at 18 and 30 months of age.

Increasing the removal of protein-bound uremic toxins by liposome-supported hemodialysis.

Prenatal microRNA miR-200b Therapy Improves Nitrofen-induced Pulmonary Hypoplasia Associated With Congenital Diaphragmatic Hernia.

Environmental toxins and the impact of other endocrine disrupting chemicals in women's reproductive health.

RYR1 Sequence Variants in Myopathies: Expression and Functional Studies in Two Families.

Intracellular Fe(2+) accumulation in endothelial cells and pericytes induces blood-brain barrier dysfunction in secondary brain injury after brain hemorrhage.

The proportion of alveolar type 1 cells decreases in murine hypoplastic congenital diaphragmatic hernia lungs.

Development of the LC-MS/MS method for determining the p-cresol level in plasma.

Characterization of dissolved organic carbon in shallow groundwater of chronic kidney disease affected regions in Sri Lanka.

Measuring serum total and free indoxyl sulfate and p-cresyl sulfate in chronic kidney disease using UPLC-MS/MS.

The 2nd to 4th digit length ratio (2D:4D) among children of Seveso women exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Inhibition of NADPH oxidase by apocynin prevents learning and memory deficits in a mouse Parkinson's disease model.

Respiratory analysis as a tool to detect physiological changes in Anisakis larvae subjected to stress.

Improved dialysis removal of protein-bound uremic toxins by salvianolic acids.

Mangiferin alleviates arsenic induced oxidative lung injury via upregulation of the Nrf2-HO1 axis.

MIF inhibition enhances pulmonary angiogenesis and lung development in congenital diaphragmatic hernia.

Use of a Probiotic to Enhance Iron Absorption in a Randomized Trial of Pediatric Patients Presenting with Iron Deficiency.

Excess active P13K rescues huntingtin-mediated neuronal cell death but has no effect on axonal transport defects.

2,3,7,8-tetrachlorodibenzo-p-dioxin suppresses the growth of human colorectal cancer cells in vitro: Implication of the aryl hydrocarbon receptor signaling.

Effect of continuous venovenous haemodialysis on outcome and pharmacokinetics of arsenic species in a patient with acute promyelocytic leukaemia and acute kidney injury.

Polychlorinated biphenyls influence on autism spectrum disorder risk in the MARBLES cohort.

Role of thymoquinone and ebselen in the prevention of sodium arsenite-induced nephrotoxicity in female rats.

Disease model organism for Parkinson disease: *Drosophila melanogaster*.

Arsenic induces fibrogenic changes in human kidney epithelial cells potentially through epigenetic alterations in DNA methylation.

Non-targeted metabolomic biomarkers and metabolotypes of type 2 diabetes: A cross-sectional study of PREDIMED trial participants.

Crizotinib-induced erosive esophagitis in a pediatric patient with neuroblastoma.

Role of Aryl Hydrocarbon Receptor (AhR) in the Regulation of Immunity and Immunopathology During *Trypanosoma cruzi* Infection.

PCB 126 induces monocyte/macrophage polarization and inflammation through AhR and NF- κ B pathways.

Nrf2 deficiency aggravates the increase in osteoclastogenesis and bone loss induced by inorganic arsenic.

Characterizing Dysgeusia in Hemodialysis Patients.

[Mortality in the population surrounding an aluminum foundry in Eastern Piedmont, Italy, 1980-2017].

Cardiovascular Effects of PCB 126 (3,3',4,4',5-Pentachlorobiphenyl) in Zebrafish Embryos and Impact of Co-Exposure to Redox Modulating Chemicals.

A novel target for the promotion of dermal wound healing: Ryanodine receptors.

Arsenic-induced BRCA1 CpG promoter methylation is associated with the downregulation of ER α and resistance to tamoxifen in MCF7 breast cancer cells and mouse mammary tumor xenografts.

Sodium azide induces mitochondria-mediated apoptosis in PC12 cells through Pgc β -associated signaling pathway.

Cell surface heparan sulfate proteoglycans are involved in the extracellular Hsp90-stimulated migration and invasion of cancer cells.

Prenatal Iron Deficiency and Replete Iron Status Are Associated with Adverse Birth Outcomes, but Associations Differ in Ghana and Malawi.

Iron Oversupplementation Causes Hippocampal Iron Overloading and Impairs Social Novelty Recognition in Nursing Piglets.

The fecal microbiome and serum concentrations of indoxyl sulfate and p-cresol sulfate in cats with chronic kidney disease.

Bioluminescence imaging of Arc expression in mouse brain under acute and chronic exposure to pesticides.

Associations between endocrine disrupting chemicals and equine metabolic syndrome phenotypes.

Urinary 2,5-dichlorophenol and 2,4-dichlorophenol concentrations and prevalent disease among adults in the National Health and Nutrition Examination Survey (NHANES).

The aquaporin-4 inhibitor AER-271 blocks acute cerebral edema and improves early outcome in a pediatric model of asphyxial cardiac arrest.

hsa-miR-500a-3P alleviates kidney injury by targeting MLKL-mediated necroptosis in renal epithelial cells.

Exposure to 3-methyl-4-nitrophenol facilitates development of intestinal allergy.

Identification of Metabolites Associated with Onset of CAD in Diabetic Patients Using CE-MS Analysis: A Pilot Study.

Enhanced PAPSS2/VCAN sulfation axis is essential for Snail-mediated breast cancer cell migration and metastasis.

Moderate Physical Activity in an Aquatic Environment During Pregnancy (SWEP Study) and Its Influence in Preventing Postpartum Depression.

Manganese Detoxification by MntE Is Critical for Resistance to Oxidative Stress and Virulence of Staphylococcus aureus.

Zirconium-Based Metal-Organic Frameworks for the Removal of Protein-Bound Uremic Toxin from Human Serum Albumin.

A Neuron-Glial Trans-Signaling Cascade Mediates LRRK2-Induced Neurodegeneration.

[Effect of emodin on gut microbiota of rats with acute kidney failure].

Synbiotic meal decreases uremic toxins in hemodialysis individuals: A placebo-controlled trial.

Aryl hydrocarbon receptor pathway participates in myocardial ischemia reperfusion injury by regulating mitochondrial apoptosis.

KML001, an arsenic compound, as salvage chemotherapy in refractory biliary tract cancers: A prospective study.

Evolution of protein-bound uremic toxins indoxyl sulphate and p-cresyl sulphate in acute kidney injury.

Sodium arsenite exposure impairs B cell proliferation and enhances vascular inflammation in *Plasmodium berghei* mouse model.

Mitochondrial Impairment in Oligodendroglial Cells Induces Cytokine Expression and Signaling.

Expression of Nitric Oxide Synthase Interacting Protein (NOSIP) is Decreased in the Pulmonary Vasculature of Nitrofen-Induced Congenital Diaphragmatic Hernia.

Cytotoxic and genotoxic effect of oxyfluorfen on hemocytes of *Biomphalaria glabrata*.

Gas chromatography-mass spectrometry based metabolomics profile of hippocampus and cerebellum in mice after chronic arsenic exposure.

Integrating data gap filling techniques: A case study predicting TEFs for neurotoxicity TEQs to facilitate the hazard assessment of polychlorinated biphenyls.

Konzo: a distinct neurological disease associated with food (cassava) cyanogenic poisoning.

Stabilization of cell-cell junctions by active vitamin D ameliorates uraemia-induced loss of human endothelial barrier function.

TUDCA-Treated Mesenchymal Stem Cells Protect against ER Stress in the Hippocampus of a Murine Chronic Kidney Disease Model.

Differences in Dialysis Efficacy Have Limited Effects on Protein-Bound Uremic Toxins Plasma Levels over Time.

Polychlorinated biphenyl exposures differentially regulate hepatic metabolism and pancreatic function: Implications for nonalcoholic steatohepatitis and diabetes.

Transition metal-coordinated graphitic carbon nitride dots as a sensitive and facile fluorescent probe for $\text{A}\beta$ -amyloid peptide detection.

A Toxicogenomic Approach Reveals a Novel Gene Regulatory Network Active in In Vitro and In Vivo Models of Thyroid Carcinogenesis.

Iron for the treatment of restless legs syndrome.

Role of mitochondrial DNA in oxidative damage induced by sodium arsenite in human bronchial epithelial cells.

Sodium Arsenite Inhibits Lung Fibroblast Differentiation and Pulmonary Fibrosis.

Cardiotoxicity induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure through lactation in mice.

The problem of acute pesticide poisonings of agricultural workers in Ukraine under the conditions of the new business patterns.

Depressed prostaglandins and leukotrienes in veterans with Gulf War illness.

Biochanin A prevents 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced adipocyte dysfunction in cultured 3T3-L1 cells.

Hygienic assessment of the effects of pesticides application on children population morbidity with thyroid gland diseases.

Protein-Bound Solute Clearance During Hemodialysis.

High Pesticide Exposure Events and Olfactory Impairment among U.S. Farmers.

Iron Deficiency in Heart Failure: An Overview.

Determining Pollen-Mediated Gene Flow in Transgenic Cotton.

Exposure to environmental concentrations of hexachlorobenzene induces alterations associated with endometriosis progression in a rat model.

Endoplasmic reticulum stress response is activated in pulmonary hypoplasia secondary to congenital diaphragmatic hernia, but is decreased by administration of amniotic fluid stem cells.

Assessment of the nitrofen model of congenital diaphragmatic hernia and of the dysregulated factors involved in pulmonary hypoplasia.

Expression of dispatched RND transporter family member 1 is decreased in the diaphragmatic and pulmonary mesenchyme of nitrofen-induced congenital diaphragmatic hernia.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces peripheral blood abnormalities and plasma cell neoplasms resembling multiple myeloma in mice.

Metabolism and disposition of arsenic species from oral dosing with sodium arsenite in neonatal CD-1 mice. IV. Toxicokinetics following gavage administration and lactational transfer.

Circulating miR-421 Targeting Leucocytic Angiotensin Converting Enzyme 2 Is Elevated in Patients with Chronic Kidney Disease.

Novel metabolites from *Trichoderma atroviride* against human prostate cancer cells and their inhibitory effect on *Helicobacter pylori* and *Shigella* toxin producing *Escherichia coli*.

Prepubertal exposure to low doses of sodium arsenite impairs spermatogenesis and epididymal histophysiology in rats.

A "seasonal bromoderma" in a farmer.

Long-term arsenite exposure induces testicular toxicity by redox imbalance, G2/M cell arrest and apoptosis in mice.

Effects of Simvastatin on Fetal Cardiac Impairment in the Diaphragmatic Experimental Hernia Model.

Moderate Renal Impairment and Toxic Metabolites Produced by the Intestinal Microbiome: Dietary Implications.

The specific impact of uremic toxins upon cognitive domains: a review.

Comprehensive Analysis of Neurotoxin-Induced Ablation of Dopaminergic Neurons in Zebrafish Larvae.

[Determination of arsenic species compound in blood by high performance liquid chromatographyatomic fluorescence spectrometry].

Environmental Chemical Diethylhexyl Phthalate Alters Intestinal Microbiota Community Structure and Metabolite Profile in Mice.

Improvised method for urinary p-cresol detection and measurement using high performance liquid chromatography/mass spectrometry.

Integrative Metabolomic and Metallomic Analysis in a Case-Control Cohort With Parkinson's Disease.

Assessment of Acute Serum Iron, Non-Transferrin-Bound Iron, and Gastrointestinal Symptoms with 3-Week Consumption of Iron-Enriched *Aspergillus oryzae* Compared with Ferrous Sulfate.

Paraquat: The Poison Potion.

Associations of Benzo(ghi)perylene and Heptachlorodibenzo-p-dioxin in Serum of Service Personnel Deployed to Balad, Iraq, and Bagram, Afghanistan Correlates With Perturbed Amino Acid Metabolism in Human Lung Fibroblasts.

Oxidative stress, lysosomal damage and dysfunctional autophagy in molluscan hepatopancreas (digestive gland) induced by chemical contaminants.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) Disrupts Control of Cell Proliferation and Apoptosis in a Human Model of Adult Liver Progenitors.

Soil attribute regulates assimilation of roxarsone metabolites by rice (*Oryza sativa* L.).

Loss of Tiparp Results in Aberrant Layering of the Cerebral Cortex.

Coupling the Patern $\tilde{\Delta}^2$ -B $\tilde{\Delta}^{\frac{1}{2}}$ chi (PB) Reaction With Mass Spectrometry to Study Unsaturated Fatty Acids in Mouse Model of Multiple Sclerosis.

Extracellular vesicles derived from human Wharton's jelly mesenchymal stem cells protect hippocampal neurons from oxidative stress and synapse damage induced by amyloid- β^2 oligomers.

Prometryn induces apoptotic cell death through cell cycle arrest and oxidative DNA damage.

Activation of cannabinoid receptor type 2 reduces lung ischemia reperfusion injury through PI3K/Akt pathway.

Gut Microbiota in Alcoholic Hepatitis is Disparate from Those in Acute Alcoholic Pancreatitis and Biliary Disease.

Therapeutic potential of *Origanum vulgare* leaf hydroethanolic extract against renal oxidative stress and nephrotoxicity induced by paraquat in rats.

Characterizing the Role of HMG-CoA Reductase in Aryl Hydrocarbon Receptor-Mediated Liver Injury in C57BL/6 Mice.

Wnt1 silencing enhances neurotoxicity induced by paraquat and maneb in SH-SY5Y cells.

A dual mixture of persistent organic pollutants modifies carbohydrate metabolism in the human hepatic cell line HepaRG.

Effect of in ovo glyphosate injection on embryonic development, serum biochemistry, antioxidant status and histopathological changes in newly hatched chicks.

Ultrasonic energy-assisted in-situ synthesis of Ru(0)/PANI/g-C(3)N(4) nanocomposite: Application for picomolar-level electrochemical detection of endocrine disruptor (Bisphenol-A) in humans and animals.

Metabolism and disposition of arsenic species from controlled dosing with sodium arsenite in adult and neonatal rhesus monkeys. VI. Toxicokinetic studies following oral administration.

The Customizable E-cigarette Resistance Influences Toxicological Outcomes: Lung Degeneration, Inflammation, and Oxidative Stress-Induced in a Rat Model.

Cholestatic liver disease results increased production of reactive aldehydes and an atypical periportal hepatic antioxidant response.

Chronic unpredictable stress influenced the behavioral but not the neurodegenerative impact of paraquat.

Detection of mitochondrial dysfunction in vitro by laser-induced autofluorescence.

8-Formylpiperonyl piperazine B Antagonizes Paraquat-Induced Hepatotoxicity by Suppressing Oxidative Stress.

Acetaldehyde Induces an Endothelium-Dependent Relaxation of Superior Mesenteric Artery: Potential Role in Postprandial Hyperemia.

Botrysphin D attenuates arsenic-induced oxidative stress in human lung epithelial cells via activating Nrf2/ARE signaling pathways.

TCDD-Inducible Poly-ADP-Ribose Polymerase (TIPARP), A Novel Therapeutic Target Of Breast Cancer.

AhR Activation by TCDD (2,3,7,8-Tetrachlorodibenzo-p-dioxin) Attenuates Pertussis Toxin-Induced Inflammatory Responses by Differential Regulation of Tregs and Th17 Cells Through Specific Targeting by microRNA.

Effects of the Herbicide Glyphosate on Honey Bee Sensory and Cognitive Abilities: Individual Impairments with Implications for the Hive.

Clinical Features, Treatment, Prognosis, and Mortality in Paraquat Poisonings: A Hospital-Based Study in Iran.

Temporal Dynamics of the Soil Metabolome and Microbiome During Simulated Anaerobic Soil Disinfection.

Effectiveness of Iron Therapy on Breath Holding Spells in the Children.

Energy Metabolism and Redox State in Brains of Wistar Audiogenic Rats, a Genetic Model of Epilepsy.

Estrogen withdrawal and replacement differentially target liver and adipose tissues in female mice fed a high-fat high-sucrose diet: impact of a chronic exposure to a low-dose pollutant mixture(â~†).

Arsenic impairs GLUT1 trafficking through the inhibition of the calpain system in lymphocytes.

Nrf2-regulated miR-380-3p Blocks the Translation of Sp3 Protein and Its Mediation of Paraquat-Induced Toxicity in Mouse Neuroblastoma N2a Cells.

Arsenic exposure during prepuberty alters prostate maturation in pubescent rats.

Enhancement of fipronil degradation with eliminating its toxicity in a microbial fuel cell and the catabolic versatility of anodic biofilm.

Association of Serum Paraoxonase/Arylesterase Activity With All-Cause Mortality in Maintenance Hemodialysis Patients.

Probiotic Bacillus Attenuates Oxidative Stress- Induced Intestinal Injury via p38-Mediated Autophagy.

Glyphosate Primes Mammary Cells for Tumorigenesis by Reprogramming the Epigenome in a TET3-Dependent Manner.

Novel Thiazole Phenoxy pyridine Derivatives Protect Maize from Residual Pesticide Injury Caused by PPO-Inhibitor Fomesafen.

Acute toxicity evolution during ozonation of mono-chlorophenols and initial identification of highly toxic intermediates.

Quantitation of Lipid Peroxidation Product DNA Adducts in Human Prostate by Tandem Mass Spectrometry: A Method That Mitigates Artifacts.

Toxicogenomic analyses of the effects of BDE-47/209, TBBPA/S and TCBPA on early neural development with a human embryonic stem cell in vitro differentiation system.

Neuroprotective effects of anthocyanins and its major component cyanidin-3-O-glucoside (C3G) in the central nervous system: An outlined review.

The successful treatment of systemic toxic induced paraquat poisoning by skin absorption: case reports and a literature review.

Zinc treatment modulates hematological and morphological changes in rat erythrocytes following arsenic exposure.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced aryl hydrocarbon receptor activation enhanced the suppressive function of mesenchymal stem cells against splenocyte proliferation.

Application of qualitative and quantitative uncertainty assessment tools in developing ranges of plausible toxicity values for 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Pyrazinamide may possess cardioprotective properties.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the differentiation of embryonic stem cells towards pancreatic lineage and pancreatic beta cell function.

Relationship between pesticide accumulation in transplanted zebra mussel (*Dreissena polymorpha*) and community structure of aquatic macroinvertebrates.

Subcellular Targets of Zinc Oxide Nanoparticles During the Aging Process: Role of Cross-talk Between Mitochondrial Dysfunction and Endoplasmic Reticulum Stress in the Genotoxic Response.

Obesity and cancer: A mechanistic overview of metabolic changes in obesity that impact genetic instability.

Effects of astrocyte conditioned medium on neuronal AChE expression upon 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

Recovery after surgery: do not forget to check iron status before.

Severe ARDS Complicating an Acute Intentional Cresol Poisoning.

Comparison of Urinary Biomarkers of Exposure in Humans Using Electronic Cigarettes, Combustible Cigarettes, and Smokeless Tobacco.

Bioconcentrations of herbicides used in sugarcane crops in tilapia (*Oreochromis niloticus*) and the risk for human consumption.

2,3,7,8-Tetrachlorodibenzo-p-dioxin modifies alternative splicing in mouse liver.

Screening of Amaryllidaceae alkaloids in bulbs and tissue cultures of *Narcissus papyraceus* and four varieties of *N. tazetta*.

Surgical decontamination in ferrous sulfate intoxication.

Astrocytic Oxidative/Nitrosative Stress Contributes to Parkinson's Disease Pathogenesis: The Dual Role of Reactive Astrocytes.

Ecological risk assessment of agricultural pesticides in the highly productive Ndop flood plain in Cameroon using the PRIMET model.

Oxidative stress resistance as a factor in aging: evidence from an extended longevity phenotype of *Drosophila melanogaster*.

Joint Probabilistic Analysis of Risk for Aquatic Species and Exceedence Frequency for the Agricultural Use of Chlorpyrifos in the Pampean Region, Argentina.

Presenilin 1 Regulates $[Ca^{2+}]_i$ and Mitochondria/ER Interaction in Cultured Rat Hippocampal Neurons.

Effects of cenobamate (YKP3089), a newly developed anti-epileptic drug, on voltage-gated sodium channels in rat hippocampal CA3 neurons.

Status Epilepticus Caused by an Herbicide Poisoning.

3-Chloro-5-trifluoromethylpyridine-2-carboxylic acid, a Metabolite of the Fungicide Fluopyram, Causes Growth Disorder in *Vitis vinifera*.

Esophageal Pharmacobezoar in a Patient with Achalasia: A Case Report.

Proposed Key Characteristics of Female Reproductive Toxicants as an Approach for Organizing and Evaluating Mechanistic Data in Hazard Assessment.

Effects of Low, Subchronic Exposure of 2,4-Dichlorophenoxyacetic Acid (2,4-d) and Commercial 2,4-d Formulations on Early Life Stages of Fathead Minnows (*Pimephales promelas*).

Subchronic Toxicity of 2,4-Dichlorophenoxyacetic Acid (2,4-D) to Early Life Stages of Fish.

Effect of Seed Treatment and Foliar Crop Protection Products on Sudden Death Syndrome and Yield of Soybean.

Effect of the SSeCKS-TRAF6 interaction on gastrodin-mediated protection against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced astrocyte activation and neuronal death.

The protective effects of bone mesenchymal stem cells on paraquat-induced acute lung injury via the muc5b and ERK/MAPK signaling pathways.

Altered Gene Expression in Dioxin-Like and Non-Dioxin-Like PCB Exposed Peripheral Blood Mononuclear Cells.

PAX3 Confers Functional Heterogeneity in Skeletal Muscle Stem Cell Responses to Environmental Stress.

Development of a carbon-11 PET radiotracer for imaging TRPC5 in the brain.

Panax Notoginseng Saponins Ameliorate $\text{A}\beta^2$ -Mediated Neurotoxicity in *C. elegans* through Antioxidant Activities.

Review of a Case of Paraquat Poisoning in a Tertiary Care Rural-based ICU.

The Chemical Forms of Iron in Commercial Prenatal Supplements Are Not Always the Same as Those Tested in Clinical Trials.

DISC1 promotes translation maintenance during sodium arsenite-induced oxidative stress.

Pollutants released from the pulp paper industry: Aquatic toxicity and their health hazards.

Identification of contaminants of concern in the upper Tagus river basin (central Spain). Part 2: Spatio-temporal analysis and ecological risk assessment.

Relative Importance of Posttraumatic Stress Disorder and Depression in Predicting Risk of Suicide among a Cohort of Vietnam Veterans.

Flavin Oxidase-Induced ROS Generation Modulates PKC Biphasic Effect of Resveratrol on Endothelial Cell Survival.

The Effect of UVB Irradiation and Oxidative Stress on the Skin Barrier-A New Method to Evaluate Sun Protection Factor Based on Electrical Impedance Spectroscopy.

L-tryptophan Enhances Intestinal Integrity in Diquat-Challenged Piglets Associated with Improvement of Redox Status and Mitochondrial Function.

Measurement of Respiration Rate in Live *Caenorhabditis elegans*.

Physiological disorder of plants depending on clopyralid concentration in the soil and plant.

Very Low Protein Diet for Patients with Chronic Kidney Disease: Recent Insights.

A Nutraceutical Strategy to Slowing Down the Progression of Cone Death in an Animal Model of Retinitis Pigmentosa.

Exposure to arsenic during embryogenesis impairs olfactory sensory neuron differentiation and function into adulthood.

Thiamine and benfotiamine protect neuroblastoma cells against paraquat and β -amyloid toxicity by a coenzyme-independent mechanism.

ifl54 (*ifl*) plays a central role in carbon metabolism in the industrially relevant *Clostridium beijerinckii*.

Occurrence of disinfection by-products in swimming pools and the estimated resulting cytotoxicity.

A Potent Antifungal Agent for Basal Stem Rot Disease Treatment in Oil Palms Based on Chitosan-Dazomet Nanoparticles.

Growth and metabolite production of a grape sour rot yeast-bacterium consortium on different carbon sources.

Identification of acrolein metabolites in human buccal cells, blood, and urine after consumption of commercial fried food.

Food risk characterization from exposure to persistent organic pollutants and metals contaminating eels from an Italian lake.

Attenuation of the effects of oxidative stress by the MAO-inhibiting antidepressant and carbonyl scavenger phenelzine.

Comparison of temperate and tropical freshwater species' acute sensitivities to chemicals: An update.

High resolution approaches for the identification of amyloid fragments in brain.

Sodium Arsenite Injection Induces Ovarian Oxidative Stress and Affects Steroidogenesis in Rats.

Arsenic-Induced Neurotoxicity by Dysfunctional Cholinergic and Dopaminergic System in Brain of Developing Rats.

Metabolic functions of the human gut microbiota: the role of metalloenzymes.

An In Vitro Study on Mitochondrial Compensatory Response Induced by Gliadin Peptides in Caco-2 Cells.

Effects of Phenelzine Administration on Mitochondrial Function, Calcium Handling, and Cytoskeletal Degradation after Experimental Traumatic Brain Injury.

Astrocytes Do Not Forfeit Their Neuroprotective Roles After Surviving Intense Oxidative Stress.

Synthesis of 2-Monochloropropanol Fatty Acid Esters and Their Acute Oral Toxicities in Swiss Mice.

Polychlorinated Biphenyls and Nonalcoholic Fatty Liver Disease.

Effects of acetochlor on neurogenesis and behaviour in zebrafish at early developmental stages.

Data on the sub-chronic toxicity in rats after 30 days of oral realgar administration and the accumulation and distribution of arsenic species.

Synthesis and preclinical evaluation of the CRTH2 antagonist [(11)C]MK-7246 as a novel PET tracer and potential surrogate marker for pancreatic beta-cell mass.

Alpha-lipoic acid attenuates p-cresyl sulfate-induced renal tubular injury through suppression of apoptosis and autophagy in human proximal tubular epithelial cells.

Immunomodulatory effects of synthetic endocrine disrupting chemicals on the development and functions of human immune cells.

TRPA1 channel contributes to myocardial ischemia-reperfusion injury.

Administration of Fenugreek Seed Extract Produces Better Effects in Glibenclamide-Induced Inhibition in Hepatic Lipid Peroxidation: An in vitro Study.

Enzyme kinetics of dUTPase from the planarian *Dugesia ryukyuensis*.

Lipidomic profiling of subchronic As(4)S(4) exposure identifies inflammatory mediators as sensitive biomarkers in rats.

Transcriptomic Impact of IMA-08401, a Novel AHR Agonist Resembling Laquinimod, on Rat Liver.

Trends in pesticide suicide in South Korea, 1983-2014.

Extract of *Deschampsia antarctica* (EDA) Prevents Dermal Cell Damage Induced by UV Radiation and 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Effects of fermentable high fiber diet supplementation on gut derived and conventional nitrogenous product in patients on maintenance hemodialysis: a randomized controlled trial.

The histone methyltransferase G9a regulates tolerance to oxidative stress-induced energy consumption.

Excessive Reactive Iron Impairs Hematopoiesis by Affecting Both Immature Hematopoietic Cells and Stromal Cells.

Compositional and Functional Differences between Microbiota and Cervical Carcinogenesis as Identified by Shotgun Metagenomic Sequencing.

Protective effects of resveratrol on biomarkers of oxidative stress, biochemical and histopathological changes induced by sub-chronic oral glyphosate-based herbicide in rats.

Acute toxicity of copper hydroxide and glyphosate mixture in *Clarias gariepinus*: interaction and prediction using mixture assessment models.

An isopentenyl-substituted flavonoid norartocarpin activates Nrf2 signalling pathway and prevents oxidative insults in human lung epithelial cells.

Ioxynil and diethylstilbestrol disrupt vascular and heart development in zebrafish.

Enhancement of corneal epithelium cell survival, proliferation and migration by red light: Relevance to corneal wound healing.

Oxidative stress induces release of 2'-AMP from microglia.

Neuroprotective effects of baicalein in animal models of Parkinson's disease: A systematic review of experimental studies.

Evaluation of PCDD/Fs, dioxin-like PCBs and PBDEs in sperm whales from the Mediterranean Sea.

Dioxin and AHR impairs mesoderm gene expression and cardiac differentiation in human embryonic stem cells.

The Oral NOAEL of Flurochloridone in Male Wistar Rats in Ninety-Day Subchronic Toxicity Test Was 3mg/kg/day.

Effectiveness of AOS-iron on iron deficiency anemia in rats.

Hatching failure and accumulation of organic pollutants through the terrestrial food web of a declining songbird in Western Europe.

Extended suspect screening strategy to identify characteristic toxicants in the discharge of a chemical industrial park based on toxicity to *Daphnia magna*.

The testing of an artificial modified bacterial cellulose auricle skeleton in an animal model.

IPSE, a urogenital parasite-derived immunomodulatory protein, ameliorates ifosfamide-induced hemorrhagic cystitis through downregulation of pro-inflammatory pathways.

The effects of hesperidin on sodium arsenite-induced different organ toxicity in rats on metabolic enzymes as antidiabetic and anticholinergics potentials: A biochemical approach.

TRPA1 Channel as a Regulator of Neurogenic Inflammation and Pain: Structure, Function, Role in Pathophysiology, and Therapeutic Potential of Ligands.

Chronic low dose arsenic exposure preferentially perturbs mitotic phase of the cell cycle.

Nrf2 overexpression protects against paraquat-induced A549 cell injury primarily by upregulating P-glycoprotein and reducing intracellular paraquat accumulation.

Acute toxicities and effects on multixenobiotic resistance activity of eight pesticides to the earthworm *Eisenia andrei*.

Molecular mechanism involved in cyclophosphamide-induced cardiotoxicity: Old drug with a new vision.

Primary green turtle (*Chelonia mydas*) skin fibroblasts as an in vitro model for assessing genotoxicity and oxidative stress.

Environmental pollutant-mediated disruption of gut microbial metabolism of the prebiotic inulin.

Ecological risk assessment of pesticide residues in arable soils of the Czech Republic.

Newer pharmacological approaches for antioxidant neuroprotection in traumatic brain injury.

Does hemoperfusion in combination with other treatments reduce the mortality of patients with paraquat poisoning more than hemoperfusion alone: A systematic review with meta-analysis.

Correction: Identification of potential serum biomarkers of acute paraquat poisoning in humans using an iTRAQ quantitative proteomic.

An Efficient Somatic Embryo Liquid Culture System for Potential Use in Large-Scale and Synchronic Production of *Anthurium andraeanum* Seedlings.

Phenazine and 1-Undecene Producing *Pseudomonas chlororaphis* subsp. *aurantiaca* Strain KNU17Pc1 for Growth Promotion and Disease Suppression in Korean Maize Cultivars.

Cascade Reaction in Human Live Tissue Allows Clinically Applicable Diagnosis of Breast Cancer Morphology.

Acute glufosinate-based herbicide treatment in rats leads to increased ocular interleukin-1 β and c-Fos protein levels, as well as intraocular pressure.

RiboTag translomic profiling of *Drosophila* oenocytes under aging and induced oxidative stress.

Ameliorative effect of gallic acid on sodium arsenite-induced spleno-, cardio- and hemato-toxicity in rats.

Lung injury from inhaling butane hash oil mimics pneumonia.

Paternal Environmental Toxicant Exposure and Risk of Adverse Pregnancy Outcomes.

Estimation of potential risk of allyl alcohol induced liver injury in diabetic patients using type 2 diabetes spontaneously diabetic Torii-Lepr(fa) (SDT fatty) rats.

Bioactive Lipids in Cancer, Inflammation and Related Diseases : Acute and Chronic Mild Traumatic Brain Injury Differentially Changes Levels of Bioactive Lipids in the CNS Associated with Headache.

Association of East Asian Variant Aldehyde Dehydrogenase 2 Genotype (ALDH2*2*) with Coronary Spasm and Acute Myocardial Infarction.

Evaluation of in vitro genotoxic effects induced by in vitro anther culture conditions in sunflower.

BubR1 Is Essential for Thio-Dimethylarsinic Acid-Induced Spindle Assembly Checkpoint and Mitotic Cell Death for Preventing the Accumulation of Abnormal Cells.

RESPIRATORY IMPACT OF ELECTRONIC CIGARETTES AND "LOW-RISK" TOBACCO.

An imazamox-based herbicide causes apoptotic changes in rat liver and pancreas.

Taurine rescues the arsenic-induced injury in the pancreas of rat offsprings and in the INS-1 cells.

Acetochlor poisoning presenting as acute genital edema: A case report.

Protective effect of lycopen against chemical and natural toxins: A review.

Characterization of Bacteria in Nigerian Yogurt as Promising Alternative to Antibiotics in Gastrointestinal Infections.

Effect of sub-chronic ferrous sulfate treatment on motor skills, hematological and biochemical parameters in rats.

[Predictive value of neutrophil-to-lymphocyte ratio in 30-day mortality of patients with acute paraquat poisoning].

Estimated Residential Exposure to Agricultural Chemicals and Premature Mortality by Parkinson's Disease in Washington State.

[Exploration about the protection mechanism of 5-hydroxy-1-methylhydantoin on paraquat poisoning model].

Differential impact of pure glyphosate and glyphosate-based herbicide in a model of peripheral nervous system myelination.

Glyphosate is lethal and Cry toxins alter the development of the stingless bee *Melipona quadrifasciata*.

Apigenin reverses lung injury and immunotoxicity in paraquat-treated mice.

Protective effects of SOD2 overexpression in human umbilical cord mesenchymal stem cells on lung injury induced by acute paraquat poisoning in rats.

Assessment of adverse outcome of Excel Mera 71 in *Anabas testudineus* by histological and ultrastructural alterations.

Multiple effects of the herbicide glufosinate-ammonium and its main metabolite on neural stem cells from the subventricular zone of newborn mice.

Bacopa monnieri alleviates paraquat induced toxicity in *Drosophila* by inhibiting jnk mediated apoptosis through improved mitochondrial function and redox stabilization.

Atrazine induced oxidative stress and mitochondrial dysfunction in quail (*Coturnix C. coturnix*) kidney via modulating Nrf2 signaling pathway.

Effects of glyphosate on the ovarian function of pregnant mice, the secretion of hormones and the sex ratio of their fetuses.

Immunofluorescence/fluorescence assessment of brain-derived neurotrophic factor, c-Fos activation, and apoptosis in the brain of zebrafish (*Danio rerio*) larvae exposed to glufosinate.

LGK974, a PORCUPINE inhibitor, mitigates cytotoxicity in an in vitro model of Parkinson's disease by interfering with the WNT/ β -CATENIN pathway.

Evaluating Mode of Action of Acrolein Toxicity in an In Vitro Human Airway Tissue Model.

Chronic toxicity of metolachlor OA on growth, ontogenetic development, antioxidant biomarkers and histopathology of early life stages of marbled crayfish.

Involvement of PINK1/Parkin-mediated mitophagy in paraquat- induced apoptosis in human lung epithelial-like A549 cells.

Glyphosate-based herbicides modulate oxidative stress response in the nematode *Caenorhabditis elegans*.

Assessment of river sediment toxicity: Combining empirical zebrafish embryotoxicity testing with in silico toxicity characterization.

Cinnamaldehyde and related phenylpropanoids, natural repellents, and insecticides against *Sitophilus zeamais* (Motsch.). A chemical structure-bioactivity relationship.

Specialisation events of fungal metacommunities exposed to a persistent organic pollutant are suggestive of augmented pathogenic potential.

Lycopene Triggers Nrf2-AMPK Cross Talk to Alleviate Atrazine-Induced Nephrotoxicity in Mice.

[The experimental study of diquat on the half-Lethal dose and pathological injury of related organs in wistar rats].

Pendimethalin-induced oxidative stress, DNA damage and activation of anti-inflammatory and apoptotic markers in male rats.

Sequential organ failure assessment in predicting mortality after paraquat poisoning: A meta-analysis.

Atorvastatin attenuates paraquat poisoning-induced epithelial-mesenchymal transition via downregulating hypoxia-inducible factor-1 alpha.

Evaluation of Dermal Exposure to the Herbicide Alachlor Among Vegetable Farmers in Thailand.

Enantioselective Acute Toxicity and Bioactivity of Carfentrazone-ethyl enantiomers.

Exploring the potential benefit of natural product extracts in paraquat toxicity.

Role of Cerium Oxide Nanoparticles in a Paraquat-Induced Model of Oxidative Stress: Emergence of Neuroprotective Results in the Brain.

Effects of whey protein and conjugated linoleic acid on acrolein-induced cardiac oxidative stress, mitochondrial dysfunction and dyslipidemia in rats.

Mice exposure to haloxyfop-p-methyl ester at predicted environmentally relevant concentrations leads to anti-predatory response deficit.

Assessment of the oxidative and genotoxic effects of the glyphosate-based herbicide roundup on the freshwater shrimp, *Macrobrachium nipponensis*.

Modification of Wnt signaling pathway on paraquat-induced inhibition of neural progenitor cell proliferation.

Acute renal toxicity of sodium chlorate: Redox imbalance, enhanced DNA damage, metabolic alterations and inhibition of brush border membrane enzymes in rats.

Mutation of hop-1 and pink-1 attenuates vulnerability of neurotoxicity in *C. elegans*: the role of mitochondria-associated membrane proteins in Parkinsonism.

Behavior responses of zebrafish (*Danio rerio*) to aquatic environmental stresses in the characteristic of circadian rhythms.

Increased plasma prothrombin time is associated with poor prognosis in patients with paraquat poisoning.

Paraquat and Maneb Exposure Alters Rat Neural Stem Cell Proliferation by Inducing Oxidative Stress: New Insights on Pesticide-Induced Neurodevelopmental Toxicity.

The qSOFA Score: A Simple and Accurate Predictor of Outcome in Patients with Glyphosate Herbicide Poisoning.

Human and experimental toxicology of diquat poisoning: Toxicokinetics, mechanisms of toxicity, clinical features, and treatment.

Presumption of Herbicide Exposure and Presumption of Disability During Service for Reservists Presumed Exposed to Herbicides. Final rule.

Glyphosate impairs learning in *Aedes aegypti* mosquito larvae at field-realistic doses.

A commercial Roundup[®] formulation induced male germ cell apoptosis by promoting the expression of XAF1 in adult mice.

A new leaf.

Glyphosate affects the larval development of honey bees depending on the susceptibility of colonies.

Paraquat poisoning in Western French Guyana: a public health problem persisting ten years after its withdrawal from the French market.

Protective effects of curcumin on acrolein-induced neurotoxicity in HT22 mouse hippocampal cells.

Evidence of risks of renal function reduction due to occupational exposure to agrochemicals: A systematic review.

Does cyclophosphamide still play a role in glomerular diseases?

LC3-II may mediate ATR-induced mitophagy in dopaminergic neurons through SQSTM1/p62 pathway.

Procyanidin B2 protects rats from paraquat-induced acute lung injury by inhibiting NLRP3 inflammasome activation.

2,4-D poisoning: a review with illustration of two cases.

Acrolein induces ribotoxic stress in human cancer cells regardless of p53 status.

Exposure Through Runoff and Ground Water Contamination Differentially Impact Behavior and Physiology of Crustaceans in Fluvial Systems.

Effects of low, subchronic exposure of 2,4-Dichlorophenoxyacetic acid (2,4-D) and commercial 2,4-D formulations on early life stages of fathead minnows (*Pimephales promelas*).

Acrolein-induced autophagy-dependent apoptosis via activation of the lysosomal-mitochondrial pathway in EAhy926 cells.

Acute and subchronic effects of three herbicides on biomarkers and reproduction in earthworm *Dendrobaena veneta*.

Formulants of glyphosate-based herbicides have more deleterious impact than glyphosate on TM4 Sertoli cells.

Epigallocatechin-3-Gallate Protects and Prevents Paraquat-Induced Oxidative Stress and Neurodegeneration in Knockdown dj-1- $\hat{1}^2$ *Drosophila melanogaster*.

Perinatal Glyphosate-Based Herbicide Exposure in Rats Alters Brain Antioxidant Status, Glutamate and Acetylcholine Metabolism and Affects Recognition Memory.

NF- $\hat{1}^B$ /p53-activated inflammatory response involves in diquat-induced mitochondrial dysfunction and apoptosis.

Vitamin D treatment abrogates the inflammatory response in paraquat-induced lung fibrosis.

Pesticide Use and Incident Hypothyroidism in Pesticide Applicators in the Agricultural Health Study.

Mesotrione herbicide does not cause genotoxicity, but modulates the genotoxic effects of Atrazine when assessed in mixture using a plant test system (*Allium cepa*).

Transchem project - Part I: Impact of long-term exposure to pendimethalin on the health status of rainbow trout (*Oncorhynchus mykiss* L.) genitors.

Tanshinone IIA attenuates paraquat-induced acute lung injury by modulating angiotensin-converting enzyme 2/angiotensin(1-7) in rats.

Atrazine promotes immunomodulation by melanomacrophage centre alterations in spleen and vascular disorders in gills from *Oreochromis niloticus*.

Naringin protects acrolein-induced pulmonary injuries through modulating apoptotic signaling and inflammation signaling pathways in mice.

Acute toxicity and effects of Roundup Original \hat{A} [®] on pintado da Amaz \hat{A} 'nia.

Effects of water temperature and light intensity on the acute toxicity of herbicide thiobencarb to a green alga, *Raphidocelis subcapitata*.

Opposite effects of mixtures of commercial formulations of glyphosate with auxinic herbicides on the ten spotted live-bearer fish *Cnesterodon decemmaculatus* (Pisces, Poeciliidae).

Atrazine-xenobiotic nuclear receptor interactions induce cardiac inflammation and endoplasmic reticulum stress in quail (*Coturnix coturnix coturnix*).

Ameliorative effect of resveratrol on testicular oxidative stress, spermatological parameters and DNA damage in glyphosate-based herbicide-exposed rats.

Toxicity prediction and assessment of an environmentally realistic pesticide mixture to *Daphnia magna* and *Raphidocelis subcapitata*.

Sensitivities of three tropical indigenous freshwater invertebrates to single and mixture exposures of diuron and carbofuran and their commercial formulations.

Marine environmental risk assessment and acute water quality criterion for pentachlorophenol in coastal waters.

Diabetes, Cardiovascular Disorders and 2,3,7,8-Tetrachlorodibenzo-p-Dioxin Body Burden in Czech Patients 50 Years After the Intoxication.

Reduced oxygen tension culturing conditionally alters toxicogenic response of differentiated H9c2 cardiomyoblasts to acrolein.

Effects of glyphosate formulations on the population dynamics of two freshwater cladoceran species.

Seagrass wasting disease: Nitrate enrichment and exposure to a herbicide (Diuron) increases susceptibility of *Zostera marina* to infection.

Embryonic atrazine exposure elicits proteomic, behavioral, and brain abnormalities with developmental time specific gene expression signatures.

Enhanced mitochondrial DNA repair of the common disease-associated variant, Ser326Cys, of hOGG1 through small molecule intervention.

Predictive value of the maximum serum creatinine value and growth rate in acute paraquat poisoning patients.

A new sight for paraquat poisoning from immunology.

Pancreatic function and histoarchitecture in Wistar rats following chronic exposure to Bushfire[®]: the mitigating role of zinc.

Toxic effects of cyhalofop-butyl on embryos of the Yellow River carp (*Cyprinus carpio* var.): alters embryos hatching, development failure, mortality of embryos, and apoptosis.

Decay of Quinclorac in Acidic Paddy Soil and Risk Evaluation to the Subsequent Crop, Tobacco (*Nicotiana tabacum* L.).

Perinatal exposure to a glyphosate-based herbicide impairs female reproductive outcomes and induces second-generation adverse effects in Wistar rats.

Biochemical and histological effects of sub-chronic exposure to atrazine in crayfish *Cherax destructor*.

Postnatal exposure to a glyphosate-based herbicide modifies mammary gland growth and development in Wistar male rats.

The presence of algae mitigates the toxicity of copper-based algaecides to a nontarget organism.

High-dose acute exposure of paraquat induces injuries of swim bladder, gastrointestinal tract and liver via neutrophil-mediated ROS in zebrafish and their relevance for human health risk assessment.

An integrative omics approach to unravel toxicity mechanisms of environmental chemicals: effects of a formulated herbicide.

A user-friendly herbicide derived from photo-responsive supramolecular vesicles.

A retrospective analysis of leucocyte count as a strong predictor of survival for patients with acute paraquat poisoning.

[The effects of Xuebijing injection on apoptosis and expression of regulatory factors TNF- α , NF- κ B and Caspase-3 expression in the lung tissues of acute paraquat-induced rats].

Sex-specific effects of perinatal dioxin exposure on eating behavior in 3-year-old Vietnamese children.

Characteristics of acute occupational pesticide exposures reported to poison control centers in Texas, 2000-2015.

Circular RNA expression profiles in hippocampus from mice with perinatal glyphosate exposure.

[Acute pulmonary fibrosis associated with Paraquat poisoning. Report of one case].

A survival case of intravenous paraquat intoxication: A case report.

Jock McCulloch (1945-2018): A Tribute.

Comparative Assessment on Mechanism Underlying Renal Toxicity of Commercial Formulation of Roundup Herbicide and Glyphosate Alone in Male Albino Rat.

Effects of the chloro-s-triazine herbicide terbuthylazine on DNA integrity in human and mouse cells.

Reactive oxygen species, antioxidant enzyme activity, and gene expression patterns in a pair of nearly isogenic lines of nicosulfuron-exposed waxy maize (*Zea mays* L.).

NFE2L2, PPAR γ , and pesticides and Parkinson's disease risk and progression.

Paraquat and MPTP induce alteration in the expression profile of long noncoding RNAs in the substantia nigra of mice: Role of the transcription factor Nrf2.

Effects of glyphosate and its commercial formulation, Roundup(®) Ultramax, on liver histology of tadpoles of the neotropical frog, *Leptodactylus latrans* (amphibia: Anura).

Paraquat initially damages cochlear support cells leading to anoikis-like hair cell death.

Yeast polyubiquitin gene UBI4 deficiency leads to early induction of apoptosis and shortened replicative lifespan.

High-dose immunosuppression to prevent death after paraquat self-poisoning - a randomised controlled trial.

Atrazine Triggers Mitochondrial Dysfunction and Oxidative Stress in Quail (*Coturnix C. coturnix*) Cerebrum via Activating Xenobiotic-Sensing Nuclear Receptors and Modulating Cytochrome P450 Systems.

A comparison of the effects of agricultural pesticide uses on peripheral nerve conduction in China.

Efficacy of initial haemopurification strategy for acute paraquat poisoning in adults: study protocol for a randomised controlled trial (HeSAPP).

Metabolome disruption of pregnant rats and their offspring resulting from repeated exposure to a pesticide mixture representative of environmental contamination in Brittany.

Glyphosate affects the secretion of regulators of uterine contractions in cows while it does not directly impair the motoric function of myometrium in vitro.

Label-free optical biosensor for real-time monitoring the cytotoxicity of xenobiotics: A proof of principle study on glyphosate.

Redox imbalance caused by pesticides: a review of OPENTOX-related research.

Oxidative stress, cholinesterase activity, and DNA damage in the liver, whole blood, and plasma of Wistar rats following a 28-day exposure to glyphosate.

Protective role of thymoquinone against paraquat-induced hepatotoxicity in mice.

Interactions between tetrahydroisoindoline-1,3-dione derivatives and human serum albumin via multiple spectroscopy techniques.

Influences of *Chlorella vulgaris* dietary supplementation on growth performance, hematology, immune response and disease resistance in *Oreochromis niloticus* exposed to sub-lethal concentrations of penoxsulam herbicide.

Effects of environmentally relevant sub-chronic atrazine concentrations on African clawed frog (*Xenopus laevis*) survival, growth and male gonad development.

Investigating global trends in paraquat intoxication research from 1962 to 2015 using bibliometric analysis.

Identification of circular RNAs and their alterations involved in developing male *Xenopus laevis* chronically exposed to atrazine.

Glyphosate residues in Swiss market foods: monitoring and risk evaluation.

The impact of Agent Orange exposure on prognosis and management in patients with chronic lymphocytic leukemia: a National Veteran Affairs Tumor Registry Study.

The relationship between serum ammonia level and neurologic complications in patients with acute glufosinate ammonium poisoning: A prospective observational study.

Neuroprotective effects of *Cassia tora* against paraquat-induced neurodegeneration: relevance for Parkinson's disease.

Paraquat induced acute kidney injury and lung fibrosis: a case report from Bangladesh.

The Ramazzini Institute 13-week study on glyphosate-based herbicides at human-equivalent dose in Sprague Dawley rats: study design and first in-life endpoints evaluation.

[The anti-inflammatory effect of hesperetin on lung damage induced by paraquat in rats].

[The effect of pulmonary injury in rats induced by paraquat].

Mitochondrial oxidative stress causes insulin resistance without disrupting oxidative phosphorylation.

Apple procyanidins promote mitochondrial biogenesis and proteoglycan biosynthesis in chondrocytes.

Impact of presumed service-connected diagnosis on the Department of Veterans Affairs healthcare utilization patterns of Vietnam-Theater Veterans: A cross-sectional study.

Neuroprotective action of 4-Hydroxyisophthalic acid against paraquat-induced motor impairment involves amelioration of mitochondrial damage and neurodegeneration in *Drosophila*.

Glyphosate based- herbicide exposure affects gut microbiota, anxiety and depression-like behaviors in mice.

Atrazine affects craniofacial chondrogenesis and axial skeleton mineralization in zebrafish (*Danio rerio*).

Taurine protects noradrenergic locus coeruleus neurons in a mouse Parkinson's disease model by inhibiting microglial M1 polarization.

Serum immune responses in common carp (*Cyprinus carpio* L.) to paraquat exposure: The traditional parameters and circulating microRNAs.

Proteomic analysis of ametryn toxicity in zebrafish embryos.

Impact of a commercial glyphosate formulation on adsorption of Cd(II) and Pb(II) ions on paddy soil.

Do recommended doses of glyphosate-based herbicides affect soil invertebrates? Field and laboratory screening tests to risk assessment.

Synergism of mixtures of dicamba and 2,4-dichlorophenoxyacetic acid herbicide formulations on the neotropical fish *Cnesterodon decemmaculatus* (Pisces, Poeciliidae).

Reversible Parkinsonism induced by acute exposure glyphosate.

HFE Genotype Restricts the Response to Paraquat in a Mouse Model of Neurotoxicity.

Lethal and Sublethal Effects of the Herbicide Atrazine in the Early Stages of Development of *Physalaemus gracilis* (Anura: Leptodactylidae).

Treatment of Paraquat-Induced Lung Injury With an Anti-C5a Antibody: Potential Clinical Application.

Succession of Fungal and Oomycete Communities in Glyphosate-Killed Wheat Roots.

Paraquat and MPTP alter microRNA expression profiles, and downregulated expression of miR-17-5p contributes to PQ-induced dopaminergic neurodegeneration.

Investigation of Acute and Chronic Toxicity Trends of Pesticides Using High-Throughput Bioluminescence Assay Based on the Test Organism *Vibrio fischeri*.

Impaired associative learning after chronic exposure to pesticides in young adult honey bees.

Patients with mild paraquat poisoning treated with prolonged low-dose methylprednisolone have better lung function: A retrospective analysis.

Clinical features and prognosis of paraquat poisoning in French Guiana: A review of 62 cases.

Taurine protects dopaminergic neurons in a mouse Parkinson's disease model through inhibition of microglial M1 polarization.

Melatonin preserves ovarian tissues of rats exposed to chronic TCDD: An electron microscopic approach to effects of TCDD on ovarian cells.

Changes in gene expression following long-term in vitro exposure of *Macaca mulatta* trophoblast stem cells to biologically relevant levels of endocrine disruptors.

Low concentrations of glyphosate-based herbicide cause complete loss of sperm motility of yellowtail tetra fish *Astyanax lacustris*.

Effects of atrazine on vitellogenesis, steroid levels and lipid peroxidation, in female red swamp crayfish *Procambarus clarkii*.

Sub-lethal effects of herbicides penoxsulam, imazamox, fluridone and glyphosate on Delta Smelt (*Hypomesus transpacificus*).

Protective effect of *Uncaria tomentosa* extract against oxidative stress and genotoxicity induced by glyphosate-Roundup® using zebrafish (*Danio rerio*) as a model.

Assessment of atrazine toxicity to the estuarine phytoplankton, *Dunaliella tertiolecta* (Chlorophyta), under varying nutrient conditions.

Acute and single repeated dose effects of low concentrations of chlorpyrifos, diuron, and their combination on chicken.

Acute and chronic toxicity of pesticides on tadpoles of *Physalaemus cuvieri* (Anura, Leptodactylidae).

Evaluation of 30% DAS-444~6-6 soybean meal in a subchronic rat toxicity study.

A glyphosate-based herbicide reduces fertility, embryonic upper thermal tolerance and alters embryonic diapause of the threatened annual fish *Austrolebias nigrofasciatus*.

Seizures in patients with acute pesticide intoxication, with a focus on glufosinate ammonium.

Is endotracheal intubation a non-beneficial treatment in patients with respiratory failure due to paraquat poisoning?

Deficiency of Atg6 impairs beneficial effect of metformin on intestinal stem cell aging in *Drosophila*.

Mesenchymal stem cell therapy for paraquat poisoning: A systematic review and meta-analysis of preclinical studies.

Metabolic Profiling of Amino Acids Associated with Mortality in Patients with Acute Paraquat Poisoning.

Effects of surface charge and palladium on hepatic and kidney injury induced by polystyrene nanoparticles co-administered to mice with paraquat and cisplatin.

Lipopolysaccharide-Induced Striatal Nitrosative Stress and Impaired Social Recognition Memory Are Not Magnified by Paraquat Coexposure.

Caloric restriction ameliorates acrolein-induced neurotoxicity in rats.

Effects of glyphosate on early life stages: comparison between *Cyprinus carpio* and *Danio rerio*.

Celecoxib, a cyclooxygenase-2 inhibitor, offers chemoprevention against reproductive and neurobehavioural abnormalities induced by atrazine in male Wistar rats.

Isolated and mixed effects of diuron and its metabolites on biotransformation enzymes and oxidative stress response of Nile tilapia (*Oreochromis niloticus*).

Sirt3 confers protection against acrolein-induced oxidative stress in cochlear nucleus neurons.

Fluorochloridone induces primary cultured Sertoli cells apoptosis: Involvement of ROS and intracellular calcium ions-mediated ERK1/2 activation.

Induction of chronic migraine phenotypes in a rat model after environmental irritant exposure.

Triptolide suppresses paraquat induced idiopathic pulmonary fibrosis by inhibiting TGF β 1-dependent epithelial mesenchymal transition.

Environmental and health effects of the herbicide glyphosate.

Hepatotoxicity of paraquat on common carp (*Cyprinus carpio* L.).

Prognostic comparison of goal-oriented hemoperfusion and routine hemoperfusion combined with continuous venovenous hemofiltration for paraquat poisoning.

Do host-associated gut microbiota mediate the effect of an herbicide on disease risk in frogs?

Potential biomarkers for monitoring the toxicity of long-term exposure to atrazine in rat by metabonomic analysis.

Sodium Selenite Prevents Paraquat-Induced Neurotoxicity in Zebrafish.

Ratio of Injured Lung Volume Fraction in Prognosis Evaluation of Acute PQ Poisoning.

Protective Effects of Olive Leaf Extract on Acrolein-Exacerbated Myocardial Infarction via an Endoplasmic Reticulum Stress Pathway.

Atrazine suppresses FSH-induced steroidogenesis and LH-dependent expression of ovulatory genes through PDE-cAMP signaling pathway in human cumulus granulosa cells.

Oxidative stress and DNA damage in common carp (*Cyprinus carpio*) exposed to the herbicide mesotrione.

Evidence the U.S. autism epidemic initiated by acetaminophen (Tylenol) is aggravated by oral antibiotic amoxicillin/clavulanate (Augmentin) and now exponentially by herbicide glyphosate (Roundup).

A glyphosate micro-emulsion formulation displays teratogenicity in *Xenopus laevis*.

Pirfenidone protects against paraquat-induced lung injury and fibrosis in mice by modulation of inflammation, oxidative stress, and gene expression.

Acrolein toxicity at advanced age: present and future.

PBPK/PD assessment for Parkinson's disease risk posed by airborne pesticide paraquat exposure.

Neurotransmitter changes in rat brain regions following glyphosate exposure.

Mitochondrial bioenergetics and locomotor activity are altered in zebrafish (*Danio rerio*) after exposure to the bipyridylum herbicide diquat.

Silymarin attenuated paraquat-induced cytotoxicity in macrophage by regulating Trx/TXNIP complex, inhibiting NLRP3 inflammasome activation and apoptosis.

Are the damaging effects induced by the imazethapyr formulation Pivot(®) H in *Boana pulchella* (Anura) reversible upon ceasing exposure?

Assessment of hepatic metabolism-dependent nephrotoxicity on an organs-on-a-chip microdevice.

Arsenite and methylarsonite inhibit mitochondrial metabolism and glucose-stimulated insulin secretion in INS-1 832/13 β^2 cells.

Analysis of earthworm sublethal toxic responses to atrazine exposure using (1) H nuclear magnetic resonance (NMR)-based metabolomics.

Neurological and Neurophysiological Findings in Workers with Chronic 2,3,7,8-Tetrachlorodibenzo-p-Dioxin Intoxication 50 Years After Exposure.

Subchronic exposure to kalach 360 SL-induced endocrine disruption and ovary damage in female rats.

Preference of Aerosolized Pirfenidone to Oral Intake: An Experimental Model of Pulmonary Fibrosis by Paraquat.

Cardiovascular Effects and Fatality May Differ According to the Formulation of Glyphosate Salt Herbicide.

Cellular Senescence Is Induced by the Environmental Neurotoxin Paraquat and Contributes to Neuropathology Linked to Parkinson's Disease.

[The impact of electronic cigarettes usage on the endothelial function and the progression of atherosclerosis].

[The protective effect of Xuebijing on paraquat-induced HK-2 cells apoptosis and the underlying mechanisms].

Glyphosate ingestion causing multiple organ failure: a near-fatal case report.

Effects on metabolic parameters in young rats born with low birth weight after exposure to a mixture of pesticides.

MnTMPyP inhibits paraquat-induced pulmonary epithelial-like cell injury by inhibiting oxidative stress.

Transcription factor NFE2L2/NRF2 modulates chaperone-mediated autophagy through the regulation of LAMP2A.

A simple and economical method of gas chromatography-mass spectrometry to determine the presence of 6 pesticides in human plasma and its clinical application in patients with acute poisoning.

Necrosis in human neuronal cells exposed to paraquat.

A comparative study on subacute toxicity of arsenic trioxide and dimethylarsinic acid on antioxidant status in Crandell Rees feline kidney (CRFK), human hepatocellular carcinoma (PLC/PRF/5), and epithelioma papulosum cyprini (EPC) cell lines.

HIV and paraquat poisoning: fighting fire with fire?

Toxicity of formulants and heavy metals in glyphosate-based herbicides and other pesticides.

Chronic exposure to a glyphosate-containing pesticide leads to mitochondrial dysfunction and increased reactive oxygen species production in *Caenorhabditis elegans*.

Estrogenic and anti-androgenic effects of the herbicide tebuthiuron in male Nile tilapia (*Oreochromis niloticus*).

Treatment Outcome of Combined Continuous Venovenous Hemofiltration and Hemoperfusion in Acute Paraquat Poisoning: A Prospective Controlled Trial.

Effect on the dopaminergic metabolism induced by oral exposure to simazine during the prepubertal period in rats.

Atrazine-induced environmental nephrosis was mitigated by lycopene via modulating nuclear xenobiotic receptors-mediated response.

Ovarian growth impairment after chronic exposure to Roundup Ultramax[®] in the estuarine crab *Neohelice granulata*.

Mitigating effects of pollen during paraquat exposure on gene expression and pathogen prevalence in *Apis mellifera* L.

Paraquat affects mitochondrial bioenergetics, dopamine system expression, and locomotor activity in zebrafish (*Danio rerio*).

Effects of endosulfan, thiamethoxam, and indoxacarb in combination with atrazine on multi-biomarkers in *Gammarus kischineffensis*.

Chronic toxicity of 1,3,5-triazine herbicides in the postembryonic development of the western clawed frog *Silurana tropicalis*.

Neuroprotective Effects of Baicalein on Acrolein-induced Neurotoxicity in the Nigrostriatal Dopaminergic System of Rat Brain.

Lethal Bentazone Intoxication - A Report of Two Cases.

Effects of prolonged methylprednisolone treatment after pulse therapy for paraquat-intoxicated rats.

TRPM2 Promotes Neurotoxin MPP(+)/MPTP-Induced Cell Death.

Trans-cinnamaldehyde Modulates Hippocampal Nrf2 Factor and Inhibits Amyloid Beta Aggregation in LPS-Induced Neuroinflammation Mouse Model.

Lack of superoxide dismutase in a rad51 mutant exacerbates genomic instability and oxidative stress-mediated cytotoxicity in *Saccharomyces cerevisiae*.

The effect of commercial herbicide exposure on the life history and insecticide resistance phenotypes of the major malaria vector *Anopheles arabiensis* (Diptera: culicidae).

Protective Effects of a Rho Kinase Inhibitor on Paraquat-Induced Acute Lung Injuries in Rats.

Whole Genome Sequencing of a Vietnamese Family from a Dioxin Contamination Hotspot Reveals Novel Variants in the Son with Undiagnosed Intellectual Disability.

Neuroprotective Activity of Some Marine Fungal Metabolites in the 6-Hydroxydopamin- and Paraquat-Induced Parkinson's Disease Models.

Cytotoxicity of the natural herbicidal chemical, berberine, on *Nicotiana tabacum* Bright yellow-2 cells.

Letter to the editor re: Cheng, YH., Chou, WC., Yang, YF. et al. *Environ Sci Pollut Res* (2017).
<https://doi.org/10.1007/s11356-017-0875-4>.

Response to "Letter to the editor re: Cheng YH, Chou WC, Yang YF, et al. *Environ Sci Pollut Res* (2018).
<https://doi.org/10.107/s11356-017-0875-4>".

"Reversible Parkinsonism" following glyphosate exposure.

Reply for the comment on "Reversible Parkinsonism induced by acute exposure glyphosate".

Prolonged low-dose cyclophosphamide treatment after pulse therapy attenuates lung injury in rats with paraquat intoxication.

Commercial AHAS-inhibiting herbicides are promising drug leads for the treatment of human fungal pathogenic infections.

Cinnamic aldehyde inhibits vascular smooth muscle cell proliferation and neointimal hyperplasia in Zucker Diabetic Fatty rats.

Self-reported physician-diagnosed chronic obstructive pulmonary disease and spirometry patterns in Vietnam Era US Army Chemical Corps veterans: A retrospective cohort study.

The KCa3.1 blocker TRAM-34 inhibits proliferation of fibroblasts in paraquat-induced pulmonary fibrosis.

'Real-world' compensatory behaviour with low nicotine concentration e-liquid: subjective effects and nicotine, acrolein and formaldehyde exposure.

Novel action of vinpocetine in the prevention of paraquat-induced parkinsonism in mice: involvement of oxidative stress and neuroinflammation.

Paraquat toxicity is attenuated by 4-phenylbutyrate-induced phosphorylation of ERK2 via PI3K in A549 cells.

Cinnamaldehyde Improves Lifespan and Healthspan in *Drosophila melanogaster* Models for Alzheimer's Disease.

NRF2 Activation Inhibits Both TGF- β 1- and IL-13-Mediated Periostin Expression in Fibroblasts: Benefit of Cinnamaldehyde for Antifibrotic Treatment.

Aldehyde dehydrogenase 2 activation ameliorates cyclophosphamide-induced acute cardiotoxicity via detoxification of toxic aldehydes and suppression of cardiac cell death.

Effects of arsenic methylation and metabolism on the changes of arsenic-related skin lesions.

Acrolein Contributes to the Neuropathic Pain and Neuron Damage after Ischemic-Reperfusion Spinal Cord Injury.

The activation of STIM1 mediates S-phase arrest and cell death in paraquat induced acute lung intoxication.

Necrostatin-1 Protects Against Paraquat-Induced Cardiac Contractile Dysfunction via RIP1-RIP3-MLKL-Dependent Necroptosis Pathway.

Protective Effects of Brain Infarction by N-Acetylcysteine Derivatives.

FGF21 attenuates pulmonary fibrogenesis through ameliorating oxidative stress in vivo and in vitro.

Submicron emulsion of cinnamaldehyde ameliorates bleomycin-induced idiopathic pulmonary fibrosis via inhibition of inflammation, oxidative stress and epithelial-mesenchymal transition.

Time for Targeted Therapies in Acute Respiratory Distress Syndrome? Understanding Every Single Piece of the Puzzle.

Targeting Aged Astrocytes May Be a New Therapeutic Strategy in Parkinson's Disease.

Short communication: Investigation of antibiotic alternatives to improve health and growth of veal calves.

Autolytic enzymes are responsible for increased melanization of carbon stressed *Aspergillus nidulans* cultures.

Glyphosate Use and Cancer Incidence in the Agricultural Health Study.

How glyphosate affects plant disease development: it is more than enhanced susceptibility.

Protective effect of ALDH2 against cyclophosphamide-induced acute hepatotoxicity via attenuating oxidative stress and reactive aldehydes.

Varying susceptibility of clinical and environmental *Scedosporium* isolates to chemical oxidative stress in conidial germination.

Acrolein-mediated neuronal cell death and alpha-synuclein aggregation: Implications for Parkinson's disease.

Complement receptor 3 mediates NADPH oxidase activation and dopaminergic neurodegeneration through a Src-Erk-dependent pathway.

Neutrophil extracellular traps in acrolein promoted hepatic ischemia reperfusion injury: Therapeutic potential of NOX2 and p38MAPK inhibitors.

Astrocytic JWA deletion exacerbates dopaminergic neurodegeneration by decreasing glutamate transporters in mice.

Enhanced Production of Fatty Acids via Redirection of Carbon Flux in Marine Microalga *Tetraselmis* sp.

Agrochemicals increase risk of human schistosomiasis by supporting higher densities of intermediate hosts.

The Neuroprotective Effects of Cinnamic Aldehyde in an MPTP Mouse Model of Parkinson's Disease.

Protective Effects of Chymostatin on Paraquat-Induced Acute Lung Injury in Mice.

Combination Therapy with Pirfenidone plus Prednisolone Ameliorates Paraquat-Induced Pulmonary Fibrosis.

Neuroprotective effects of coenzyme Q10 on paraquat-induced Parkinson's disease in experimental animals.

Purinergic receptor P2Y6 contributes to 1-methyl-4-phenylpyridinium-induced oxidative stress and cell death in neuronal SH-SY5Y cells.

Immunomodulatory and therapeutic role of *Cinnamomum verum* extracts in collagen-induced arthritic BALB/c mice.

[Analysis of acute pesticide poisoning in Ningbo city from 2011 to 2016].

6-OHDA-induced dopaminergic neurodegeneration in *Caenorhabditis elegans* is promoted by the engulfment pathway and inhibited by the transthyretin-related protein TTR-33.

Mutations in *Caenorhabditis elegans* neuroligin-like glit-1, the apoptosis pathway and the calcium chaperone crt-1 increase dopaminergic neurodegeneration after 6-OHDA treatment.

Acid-activatable oxidative stress-inducing polysaccharide nanoparticles for anticancer therapy.

DJ-1 Suppresses Cytoplasmic TDP-43 Aggregation in Oxidative Stress-Induced Cell Injury.

Molecular characterization and efficacy evaluation of a transgenic corn event for insect resistance and glyphosate tolerance.

Glyphosate and AMPA of agricultural soil, surface water, groundwater and sediments in areas prevalent with chronic kidney disease of unknown etiology, Sri Lanka.

Orofacial antinociceptive effect of *Mimosa tenuiflora* (Willd.) Poiret.

Alterations in Acrolein Metabolism Contribute to Alzheimer's Disease.

Acrolein: An Effective Biomarker for Tissue Damage Produced from Polyamines.

Molecular cloning, characterization, expression and enzyme activity of catalase from planarian *Dugesia japonica* in response to environmental pollutants.

Hesperetin mitigates acrolein-induced apoptosis in lung cells in vitro and in vivo.

Acrolein induces NLRP3 inflammasome-mediated pyroptosis and suppresses migration via ROS-dependent autophagy in vascular endothelial cells.

Anti-inflammatory effects of cinnamon extract and identification of active compounds influencing the TLR2 and TLR4 signaling pathways.

Inhibition of catalase activity with 3-amino-1,2,4-triazole intensifies bisphenol A (BPA)-induced toxicity in granulosa cells of female albino rats.

Low-concentration exposure to glyphosate-based herbicide modulates the complexes of the mitochondrial respiratory chain and induces mitochondrial hyperpolarization in the *Danio rerio* brain.

Gene expression in response to glyphosate treatment in fleabane (*Conyza bonariensis*) - glyphosate death response and candidate resistance genes.

Exercise and β^2 -alanine supplementation on carnosine-acrolein adduct in skeletal muscle.

[Effect of hemoperfusion combined with continuous veno-venous hemofiltration on acute paraquat poisoning: a Meta-analysis].

Multidrug Resistance Protein 1 (MRP1/ABCC1)-Mediated Cellular Protection and Transport of Methylated Arsenic Metabolites Differs between Human Cell Lines.

Extended fish short term reproduction assays with the fathead minnow and Japanese medaka: No evidence of impaired fecundity from exposure to atrazine.

Developmental Exposure to Atrazine Impairs Spatial Memory and Downregulates the Hippocampal D1 Dopamine Receptor and cAMP-Dependent Signaling Pathway in Rats.

Dietary flavonoids improve urinary arsenic elimination among Mexican women.

Effects of an early-life paraquat exposure on adult resistance to oxidative stress, plumage colour and sperm performance in a wild bird.

Chronic adriamycin treatment impairs CGRP-mediated functions of meningeal sensory nerves.

Chimeric mice with humanized liver as a model for testing organophosphate and carbamate pesticide exposure.

Diquat-induced oxidative stress increases intestinal permeability, impairs mitochondrial function, and triggers mitophagy in piglets.

Glyphosate application increased catabolic activity of gram-negative bacteria but impaired soil fungal community.

Cultivable fungi present in Antarctic soils: taxonomy, phylogeny, diversity, and bioprospecting of antiparasitic and herbicidal metabolites.

Glyphosate resistance in *Ambrosia trifida*: Part 1. Novel rapid cell death response to glyphosate.

Acute and chronic toxicity of diuron and carbofuran to the neotropical cladoceran *Ceriodaphnia silvestrii*.

CpMCA, a novel metacaspase gene from the harmful dinoflagellate *Cochlodinium polykrikoides* and its expression during cell death.

Potential risks of dietary exposure to chlorpyrifos and cypermethrin from their use in fruit/vegetable crops and beef cattle productions.

Silicon Decreases Dimethylarsinic Acid Concentration in Rice Grain and Mitigates Straighthead Disorder.

Genome-wide (ChIP-seq) identification of target genes regulated by BdbZIP10 during paraquat-induced oxidative stress.

No subchronic toxicity of multiple herbicide-resistant soybean FG72 in Sprague-Dawley rats by 90-days feeding study.

Effects of the herbicides linuron and S-metolachlor on Perez's frog embryos.

An assessment of the acute dietary exposure to glyphosate using deterministic and probabilistic methods.

Taurine Inhibits TRPV-Dependent Activity to Overcome Oxidative Stress in *Caenorhabditis elegans*.

Chronic low-dose pro-oxidant treatment stimulates transcriptional activity of telomeric retroelements and increases telomere length in *Drosophila*.

Target vs non-target analysis to determine pesticide residues in fruits from Saudi Arabia and influence in potential risk associated with exposure.

Is the tier-1 effect assessment for herbicides protective for aquatic algae and vascular plant communities?

Dantrolene is not the answer to 2,4-dinitrophenol poisoning: more heated debate.

The utility of saliva testing in the estimation of uremic toxin levels in serum.

EF-Tu From Non-typeable *Haemophilus influenzae* Is an Immunogenic Surface-Exposed Protein Targeted by Bactericidal Antibodies.

Key role of singlet oxygen and peroxynitrite in viral RNA damage during virucidal effect of plasma torch on feline calicivirus.

An optogenetic toolbox of LOV-based photosensitizers for light-driven killing of bacteria.

Uremia Impacts VE-Cadherin and ZO-1 Expression in Human Endothelial Cell-to-Cell Junctions.

Effect of Norepinephrine on Intracellular Ca²⁺ Levels in Malignant Hyperthermia-Susceptible B Cells: Pilot Study in the Search for a New Diagnostic Test for Malignant Hyperthermia.

A Prospective Randomised Controlled Trial of a Single Intravenous Infusion of Ferric Carboxymaltose vs Single Intravenous Iron Polymaltose or Daily Oral Ferrous Sulphate in the Treatment of Iron Deficiency Anaemia in Pregnancy.

Sperm epigenome as a marker of environmental exposure and lifestyle, at the origin of diseases inheritance.

Preliminary study of urinary arsenic concentration and arsenic methylation capacity effects on neurodevelopment in very low birth weight preterm children under 24 months of corrected age.

Anemia in Older Adults.

Iron Fortification of Spiced Vinegar in the Philippines.

Preoperative Epoetin- α with Intravenous or Oral Iron for Major Orthopedic Surgery: A Randomized Controlled Trial.

2,3,7,8-tetrachlorodibenzo-p-dioxin suppresses the growth of human liver cancer HepG2 cells in vitro: Involvement of cell signaling factors.

Mitochondrial uncoupling prodrug improves tissue sparing, cognitive outcome, and mitochondrial bioenergetics after traumatic brain injury in male mice.

Risk of Alzheimer's disease with metal concentrations in whole blood and urine: A case-control study using propensity score matching.

Neuroprotective effects of dietary borax in the brain tissue of rainbow trout (*Oncorhynchus mykiss*) exposed to copper-induced toxicity.

Comparing the Effects of Ferulic Acid and Sugarcane Aqueous Extract in In Vitro and In Vivo Neurotoxic Models.

Isolated hypospadias: The impact of prenatal exposure to pesticides, as determined by meconium analysis.

Sleep disorders among Yusho patients highly intoxicated with dioxin-related compounds: A 140-case series.

Hepatocyte-Specific Deletion of TIPARP, a Negative Regulator of the Aryl Hydrocarbon Receptor, Is Sufficient to Increase Sensitivity to Dioxin-Induced Wasting Syndrome.

Prevalence of elevated blood lead levels among pregnant women and sources of lead exposure in rural Bangladesh: A case control study.

Paternal developmental toxicant exposure is associated with epigenetic modulation of sperm and placental Pgr and Igf2 in a mouse model.

miR-145 via targeting ERCC2 is involved in arsenite-induced DNA damage in human hepatic cells.

Nitration of microtubules blocks axonal mitochondrial transport in a human pluripotent stem cell model of Parkinson's disease.

Generation, clearance, toxicity, and monitoring possibilities of unaccounted uremic toxins for improved dialysis prescriptions.

Biomarkers for detection, prognosis and therapeutic assessment of neurological disorders.

The Impact of Uremic Toxicity Induced Inflammatory Response on the Cardiovascular Burden in Chronic Kidney Disease.

Efficacy of Lactoferrin Oral Administration in the Treatment of Anemia and Anemia of Inflammation in Pregnant and Non-pregnant Women: An Interventional Study.

Sucrosomial($\text{A}^{\text{®}}$) Iron Supplementation in Mice: Effects on Blood Parameters, Hepcidin, and Inflammation.

Pharmacological induction of heat shock proteins ameliorates toxicity of mutant PKC δ^3 in spinocerebellar ataxia type 14.

Weanling Offspring of Dams Maintained on Serine-Deficient Diet Are Vulnerable to Oxidative Stress.

Aryl hydrocarbon receptor enhances the expression of miR-150-5p to suppress in prostate cancer progression by regulating MAP3K12.

Peak AAA fatty acid homolog contaminants present in the dietary supplement L-Tryptophan associated with the onset of eosinophilia-myalgia syndrome.

Para-cresol production by *Clostridium difficile* affects microbial diversity and membrane integrity of Gram-negative bacteria.

Exploring a Novel Screening Method for Patients with Oral Squamous Cell Carcinoma: A plasma Metabolomics Analysis.

Impacts of Indoxyl Sulfate and p-Cresol Sulfate on Chronic Kidney Disease and Mitigating Effects of AST-120.

Uremic Toxins Activates Na/K-ATPase Oxidant Amplification Loop Causing Phenotypic Changes in Adipocytes in In Vitro Models.

Angptl2 deficiency attenuates paraquat (PQ)-induced lung injury in mice by altering inflammation, oxidative stress and fibrosis through NF- κ B pathway.

Expression of extracellular polysaccharides and proteins by clinical isolates of *Pseudomonas aeruginosa* in response to environmental conditions.

Diagnostic meaning of blood p-cresol concentration in forensic autopsy cases.

Transchem project - Part II: Transgenerational effects of long-term exposure to pendimethalin at environmental concentrations on the early development and viral pathogen susceptibility of rainbow trout (*Oncorhynchus mykiss*).

Aryl hydrocarbon receptor, a tumor grade-associated marker of oral cancer, is directly downregulated by polydatin: A pilot study.

Predictive metabolomic signatures of end-stage renal disease: A multivariate analysis of population-based data.

Incident thyroid disease in female spouses of private pesticide applicators.

Effect of various calcium salts on non-heme iron bioavailability in fasted women of childbearing age.

Health Risk Assessment of Occupationally Pesticide-Exposed Population of Cancer Prone Area of Punjab.

Acute Maneb Exposure Significantly Alters Both Glycolysis and Mitochondrial Function in Neuroblastoma Cells.

Lung function and pulmonary artery blood flow following prenatal maternal retinoic acid and imatinib in the nitrofen model of congenital diaphragmatic hernia.

Acute poisoning in Shenyang, China: a retrospective and descriptive study from 2012 to 2016.

Efficacy and safety of ferric carboxymaltose versus ferrous sulfate for iron deficiency anemia during pregnancy: subgroup analysis of Korean women.

Cytochrome C oxidase Inhibition and Cold Plasma-derived Oxidants Synergize in Melanoma Cell Death Induction.

Pesticides and cardiotoxicity. Where do we stand?

Chemical Tools for Targeted Amplification of Reactive Oxygen Species in Neutrophils.

Ursodeoxycholic acid improves liver function via phenylalanine/tyrosine pathway and microbiome remodelling in patients with liver dysfunction.

[Clinical features and prognosis analysis of the elderly and youth patients with acute severe poisoning].

Quercetin modulates iron homeostasis and iNOS expression of splenic macrophages in a rat model of iron deficiency anemia.

Elevated Arsenic Exposure Is Associated with an Increased Risk of Chronic Hepatitis B Virus Infection: NHANES (2003-2014) in U.S. Adults.

Integrated transcriptomics and metabolomics reveal signatures of lipid metabolism dysregulation in HepaRG liver cells exposed to PCB 126.

Pea Ferritin Stability under Gastric pH Conditions Determines the Mechanism of Iron Uptake in Caco-2 Cells.

Ellagic acid mitigates sodium arsenite-induced renal and hepatic toxicity in male Wistar rats.

Immune response induced by major environmental pollutants through altering neutrophils in zebrafish larvae.

Clinical pharmacokinetics and safety profile of single agent arsenic trioxide by continuous slow-rate infusion in patients with newly diagnosed acute promyelocytic leukemia.

Associations of Arsenic Exposure With Telomere Length and Na⁺-ve T Cells in Childhood-A Birth Cohort Study.

The aryl hydrocarbon receptor is indispensable for dioxin-induced defects in sexually-dimorphic behaviors due to the reduction in fetal steroidogenesis of the pituitary-gonadal axis in rats.

LC-Q-TOF-MS based plasma metabolomic profile of subclinical pelvic inflammatory disease: A pilot study.

Adaptive changes in global gene expression profile of lung carcinoma A549 cells acutely exposed to distinct types of AhR ligands.

N(6)-methyladenosine mediates the cellular proliferation and apoptosis via microRNAs in arsenite-transformed cells.

RASopathic comedone-like or cystic lesions induced by vemurafenib: a model of skin lesions similar but not identical to those induced by dioxins MADISH.

The Association of Arsenic Exposure and Arsenic Metabolism With the Metabolic Syndrome and Its Individual Components: Prospective Evidence From the Strong Heart Family Study.

Protective Effect of Ellagic Acid Against Sodium Arsenite-Induced Cardio- and Hematotoxicity in Rats.

Loop diuretic down-titration in stable chronic heart failure is often achievable, especially when urinary chloride concentration is low.

Evaluation of metabolic reactivity in macrophages from mice with chronic sodium arsenite intake and experimental carcinogenesis.

Oxymatrine attenuates lipopolysaccharide-induced acute lung injury by activating the epithelial sodium channel and suppressing the JNK signaling pathway.

A splicing mutation in aryl hydrocarbon receptor associated with retinitis pigmentosa.

Probiotics in the treatment of chronic kidney disease: a systematic review.

Phenol and chlorinated phenols exhibit different apoptotic potential in human red blood cells (in vitro study).

ALDH2 Protects Against Ischemic Stroke in Rats by Facilitating 4-HNE Clearance and AQP4 Down-Regulation.

Residual Function Effectively Controls Plasma Concentrations of Secreted Solutes in Patients on Twice Weekly Hemodialysis.

Associations between persistent organic pollutants and metabolic syndrome in morbidly obese individuals.

Low arsenic concentrations impair memory in rat offspring exposed during pregnancy and lactation: Role of $\alpha 7$ nicotinic receptor, glutamate and oxidative stress.

Arsenic speciation in hair and nails of acute promyelocytic leukemia (APL) patients undergoing arsenic trioxide treatment.

Polymorphisms of Arsenic (+3 Oxidation State) Methyltransferase and Arsenic Methylation Capacity Affect the Risk of Bladder Cancer.

2,4 Dinitrophenol Attenuates Mitochondrial Dysfunction and Improves Neurobehavioral Outcomes Postanoxia in Neonatal Rats.

Arsenic induces cardiac rhythm dysfunction and acylcarnitines metabolism perturbation in rats.

Endoribonuclease YbeY Is Linked to Proper Cellular Morphology and Virulence in *Brucella abortus*.

Uremic Toxin Clearance and Cardiovascular Toxicities.

Increasing kynurenine brain levels reduces ethanol consumption in mice by inhibiting dopamine release in nucleus accumbens.

Of mice and men - environmental temperature, body temperature, and treatment of obesity.

2,3,7,8-Tetrachlorodibenzo-p-dioxin dose-dependently increases bone mass and decreases marrow adiposity in juvenile mice.

What can we do to optimize stem and progenitor cell therapy for heart failure?

Decreased activity of glutathione peroxidase with oral ferrous iron administration: A cause of oxidative stress.

Contributory Role of Gut Microbiota and Their Metabolites Toward Cardiovascular Complications in Chronic Kidney Disease.

Microbial volatiles as plant growth inducers.

Immediate tooth replantation: root canal filling for delayed initiation of endodontic treatment.

p-Cresyl sulfate decreases peripheral B cells in mice with adenine-induced renal dysfunction.

The impaired immune function and structural integrity by dietary iron deficiency or excess in gill of fish after infection with *Flavobacterium columnare*: Regulation of NF- κ B, TOR, JNK, p38MAPK, Nrf2 and MLCK signalling.

Environmental pollutant hexachlorobenzene induces hypertension in a rat model.

Gestational exposure to inorganic arsenic (iAs³⁺) alters glutamate disposition in the mouse hippocampus and ionotropic glutamate receptor expression leading to memory impairment.

Anti-oxidants correct disturbance of redox enzymes in the hearts of rat fetuses with congenital diaphragmatic hernia.

Can resveratrol attenuate testicular damage in neonatal and adult rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin during gestation?

Metabolic characterization of human aqueous humor in the cataract progression after pars plana vitrectomy.

Prenatal exposure to TCDD and atopic conditions in the Seveso second generation: a prospective cohort study.

Does bird metabolic rate influence mosquito feeding preference?

Probiotic/prebiotic correction for adverse effects of iron fortification on intestinal resistance to *Salmonella* infection in weaning mice.

iTRAQ-based quantitative proteomic analysis reveals important metabolic pathways for arsenic-induced liver fibrosis in rats.

[Effects of prenatal tetrandrine treatment on the expression of Kruppel-like factor 5 and Survivin in the lung of congenital diaphragmatic hernia rat model induced by nitrofen].

Vascular Hyperpermeability Response in Animals Systemically Exposed to Arsenic.

Disorder of gut amino acids metabolism during CKD progression is related with gut microbiota dysbiosis and metagenome change.

The association of adverse mental health effects with repeated exposure to disasters.

The perspective of primary health care pediatricians regarding childhood anemia and iron supplementation.

Being in control? A thematic content analysis of 14 in-depth interviews with 2,4-dinitrophenol users.

Differences in fecal microbial metabolites and microbiota of children with autism spectrum disorders.

PCB95 and PCB153 change dopamine levels and turn-over in PC12 cells.

Safety evaluation of DAS-44406-6 soybeans in Wistar rats.

Association of urinary concentrations of four chlorophenol pesticides with cardiometabolic risk factors and obesity in children and adolescents.

Risk perceptions of public health and food safety hazards in poultry husbandry by citizens, poultry farmers and poultry veterinarians.

Pesticide use in agriculture and Parkinson's disease in the AGRICAN cohort study.

Arsenic exposure induces glucose intolerance and alters global energy metabolism.

Role of microRNAs in senescence and its contribution to peripheral neuropathy in the arsenic exposed population of West Bengal, India.

Increased CaSR and TRPC6 pulmonary vascular expression in the nitrofen-induced model of congenital diaphragmatic hernia.

Aberrant expression of miR-451a contributes to 1,2-dichloroethane-induced hepatic glycerol gluconeogenesis disorder by inhibiting glycerol kinase expression in NIH Swiss mice.

Occupational pesticide exposure and subclinical hypothyroidism among male pesticide applicators.

Downregulated Elastin Microfibril Interfacer 1 Expression in the Pulmonary Vasculature of Experimental Congenital Diaphragmatic Hernia.

Decreased Expression of Integrin Subunits $\alpha 3$, $\alpha 6$, and $\alpha 8$ in the Branching Airway Mesenchyme of Nitrofen-Induced Hypoplastic Lungs.

Decreased Rac1 Cardiac Expression in Nitrofen-Induced Diaphragmatic Hernia.

Arsenic Induces Thioredoxin 1 and Apoptosis in Human Liver HHL-5 Cells.

The Role of Cytochromes P450 in Infection.

The effect of association between inefficient arsenic methylation capacity and demographic characteristics on the risk of skin lesions.

The Influence of Genetic Stability on *Aspergillus fumigatus* Virulence and Azole Resistance.

Circular RNA BARD1 (Hsa_circ_0001098) overexpression in breast cancer cells with TCDD treatment could promote cell apoptosis via miR-3942/BARD1 axis.

Latent forms of the carious lesion of human lower third molars.

Novel Protective Effects of *Cistanche Tubulosa* Extract Against Low-Luminance Blue Light-Induced Degenerative Retinopathy.

Efficacy of Probiotics Supplementation On Chronic Kidney Disease: a Systematic Review and Meta-Analysis.

Recent decreasing trends of exposure to PCDDs/PCDFs/dioxin-like PCBs in general populations, and associations with diabetes, metabolic syndrome, and gout/hyperuricemia.

Untargeted metabolomics approach (UPLC-Q-TOF-MS) explores the biomarkers of serum and urine in overweight/obese young men.

Pesticide use, allergic rhinitis, and asthma among US farm operators.

Novel insight into circular RNA HECTD1 in astrocyte activation via autophagy by targeting MIR142-TIPARP: implications for cerebral ischemic stroke.

[About a cresol intoxication].

[Importance of Two Birth Cohorts (n=20,926 and n=514): 15 Years' Experience of the Hokkaido Study on Environment and Children's Health: Malformation, Development and Allergy].

Neurotoxin-Induced Animal Models of Parkinson Disease: Pathogenic Mechanism and Assessment.

Hygienic assessment of the effects of pesticides application on adult population morbidity with thyroid gland diseases.

Thymoquinone is protective against 2,3,7,8-tetrachlorodibenzo-p-dioxin induced hepatotoxicity.

The protective action of tocopherol and acetylsalicylic acid on the behavior of rats treated with dioxins.

Dioxin induces expression of hsa-miR-146b-5p in human neuroblastoma cells.

Efficacy of Supplementation with Iron Sulfate Compared to Iron Bisglycinate Chelate in Preterm Infants.

[Amyloid-selective Photooxygenation toward Treatment for Amyloid Diseases].

STATs in Lung Development: Distinct Early and Late Expression, Growth Modulation and Signaling Dysregulation in Congenital Diaphragmatic Hernia.

Perturbations in Endothelial Dysfunction-Associated Pathways in the Nitrofen-Induced Congenital Diaphragmatic Hernia Model.

Evidence for estrogeno-mimetic effects of a mixture of low-dose pollutants in a model of ovariectomized mice.

Epigenetic Therapy: Novel Translational Implications for Arrest of Environmental Dioxin-Induced Disease in Females.

Neuroprotective effects of hydrogen sulfide on sodium azide-induced oxidative stress in PC12 cells.

Role of endogenous hydrogen sulfide in cardiac mitochondrial preservation during ischemia reperfusion injury.

Association of blood polychlorinated biphenyls and cholesterol levels among Canadian Inuit.

Morbidity in New Zealand pesticide producers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Microbiota-derived uremic retention solutes: perpetrators of altered nonrenal drug clearance in kidney disease.

Probiotic Supplementation in Chronic Kidney Disease: A Double-blind, Randomized, Placebo-controlled Trial.

Perinatal Exposure to the Cyanotoxin β -N-Methylamino-L-Alanine (BMAA) Results in Long-Lasting Behavioral Changes in Offspring-Potential Involvement of DNA Damage and Oxidative Stress.

Utility of fur as a biomarker for persistent organic pollutants in Australian fur seals (*Arctocephalus pusillus doriferus*).

Short androgen receptor poly-glutamine-promoted endometrial cancer is associated with benzo[a]pyrene-mediated aryl hydrocarbon receptor activation.

Screening the ToxCast phase II libraries for alterations in network function using cortical neurons grown on multi-well microelectrode array (mwMEA) plates.

Morphological characteristics and human papillomavirus genotype predict the treatment response in cutaneous warts.

Effects of Endocrine-Disrupting Chemicals and Epigenetic Modifications in Ovarian Cancer: A Review.

Iron deficiency anemia interfering the diagnosis of compound heterozygosity for Hb constant spring and Hb Paks β : The first case report.

Slow Ca²⁺ Efflux by Ca²⁺/H⁺ Exchange in Cardiac Mitochondria Is Modulated by Ca²⁺ Re-uptake via MCU, Extra-Mitochondrial pH, and H⁺ Pumping by F₀F₁-ATPase.

Elucidating Conserved Transcriptional Networks Underlying Pesticide Exposure and Parkinson's Disease: A Focus on Chemicals of Epidemiological Relevance.

Developmental Dioxin Exposure Alters the Methylome of Adult Male Zebrafish Gonads.

Parkinsonian Neurotoxins Impair the Pro-inflammatory Response of Glial Cells.

Acute toxicity and behavioural responses in *Clarias batrachus* (Linnaeus) exposed to herbicide pretilachlor.

Animal Models of Parkinson's Disease.

[Cases of treatment experience of acute atrazine poisoning].

Colorimetric Detection of Carcinogenic Alkylating Fumigants on Nylon-6 Nanofibrous Membrane. Part I: Investigation of 4-(p-Nitrobenzyl)pyridine as a "New" Sensing Agent with Ultrahigh Sensitivity.

Occurrence of emerging pollutants in estuaries of the Basque Country: Analysis of sources and distribution, and assessment of the environmental risk.

Release and toxicity of adipose tissue-stored TCDD: Direct evidence from a xenografted fat model.

CYP1A1 and 1B1-mediated metabolic pathways of dolutegravir, an HIV integrase inhibitor.

Differences in reproductive toxicity of TBBPA and TCBPA exposure in male *Rana nigromaculata*.

Perivascular adipose tissue protects against the vascular dysfunction induced by acute ethanol intake: Role of hydrogen peroxide.

Pesticide-Poisoned Patients: Can They Be Used as Potential Organ Donors?

Glutathione-S-transferase-theta genotypes and the risk of cyclophosphamide toxicity in dogs.

Near infrared laser irradiation induces NETosis via oxidative stress and autophagy.

Corrigendum #2 to "Effects of Chronic Exposure to Sodium Arsenite on Expressions of VEGF and VEGFR2 Proteins in the Epididymis of Rats".

[Could Huatuo Jiaji (EX-B 2) Acupoint Be Assigned to the Governor Vessel ?].

[Paraquat induced acute pulmonary injury: an update on mechanisms].

Persistent Organic Pollutant Burden, Experimental POP Exposure, and Tissue Properties Affect Metabolic Profiles of Blubber from Gray Seal Pups.

2,6-Dihydroxybenzaldehyde Analogues of the Iron Chelator Salicylaldehyde Isonicotinoyl Hydrazone: Increased Hydrolytic Stability and Cytoprotective Activity against Oxidative Stress.

Pesticide toxicity: a mechanistic approach.

Induction of intracellular ferritin expression in embryo-derived *Ixodes scapularis* cell line (ISE6).

A novel decarboxylating amidohydrolase involved in avoiding metabolic dead ends during cyanuric acid catabolism in *Pseudomonas* sp. strain ADP.

Dynamics study on the role of curcumin on TGF- β 1 expression and pathological changes in acute paraquat poisoned rats.

Metabolism and disposition of arsenic species from controlled dosing with sodium arsenite in adult female CD-1 mice. III. Toxicokinetic studies following oral and intravenous administration.

Brazil nut improves the oxidative metabolism of superoxide-hydrogen peroxide chemically-imbalanced human fibroblasts in a nutrigenomic manner.

Acute stimulatory effect of tumor necrosis factor on the basolateral 50 pS K channels in the thick ascending limb of the rat kidney.

Glutathione S-transferase P deficiency induces glucose intolerance via JNK-dependent enhancement of hepatic gluconeogenesis.

Characteristics of AccSTIP1 in *Apis cerana cerana* and its role during oxidative stress responses.

Integrative transcriptome and microRNome analysis identifies dysregulated pathways in human Sertoli cells exposed to TCDD.

Multiple pesticide analysis in hair samples of pregnant French women: Results from the ELFE national birth cohort.

Screening of bacterial endophytes as potential biocontrol agents against soybean diseases.

Narrow windrow burning canola (*Brassica napus* L.) residue for *Sclerotinia sclerotiorum* (Lib.) de Bary sclerotia destruction.

Toward Integrative Bacterial Monitoring of Metolachlor Toxicity in Groundwater.

Sodium arsenite exposure inhibits histone acetyltransferase p300 for attenuating H3K27ac at enhancers in mouse embryonic fibroblast cells.

Effects of Agronomic Management and Climate on Leaf Phenolic Profiles, Disease Severity, and Grain Yield in Organic and Conventional Wheat Production Systems.

Photophysical properties and photodynamic therapy activity of highly water-soluble Zn(II) phthalocyanines.

Diagnostic Usefulness of Serum Albumin as a Predictor of Diabetic Ketoacidosis.

The effects of an osmoregulator, carbohydrates and polyol on maturation and germination of 'Golden THB' papaya somatic embryos.

Screening of bacteria that antagonize the main pathogen fungi of apple replantation disorders from anaerobic fermented fluid of organic material and its inhibitory effect.

Utility of Serum miR-122, Liver Enzymes, and Hepatic Histopathology in Response to Hepatotoxicants in Sprague-Dawley Rats.

Sevoflurane inhibits cardiac function in pulmonary fibrosis mice through the TLR4 signaling pathway.

PCB 95 promotes dendritic growth in primary rat hippocampal neurons via mTOR-dependent mechanisms.

Reduced intestinal epithelial mitochondrial function enhances in vitro interleukin-8 production in response to commensal *Escherichia coli*.

The Chemical Compositions of *Angelica pubescens* Oil and Its Prevention of UV-B Radiation-Induced Cutaneous Photoaging.

Environmental phenols and parabens in adipose tissue from hospitalized adults in Southern Spain.

Pesticide monitoring and ecotoxicological risk assessment in surface water bodies and sediments of a tropical agro-ecosystem.

Effects of 4-chlorophenol wastewater treatment on sludge acute toxicity, microbial diversity and functional genes expression in an activated sludge process.

Lymphocyte-Specific Protein Tyrosine Kinase (LCK) is Involved in the Aryl Hydrocarbon Receptor-Mediated Impairment of Immunoglobulin Secretion in Human Primary B Cells.

Prolonged DADLE exposure epigenetically promotes Bcl-2 expression and elicits neuroprotection in primary rat cortical neurons via the PI3K/Akt/NF- κ B pathway.

Supplementation of Short-Chain Fatty Acid, Sodium Propionate, in Patients on Maintenance Hemodialysis: Beneficial Effects on Inflammatory Parameters and Gut-Derived Uremic Toxins, A Pilot Study (PLAN Study).

Ingestion of subthreshold doses of environmental toxins induces ascending Parkinsonism in the rat.

Pioglitazone Protects Mesenchymal Stem Cells against P-Cresol-Induced Mitochondrial Dysfunction via Up-Regulation of PINK-1.

Psychic euosmia and obsessive compulsive personality disorder.

sox9b is required in cardiomyocytes for cardiac morphogenesis and function.

Bushfire smoke is pro-inflammatory and suppresses macrophage phagocytic function.

RXFP1 Receptor Activation by Relaxin-2 Induces Vascular Relaxation in Mice via a $G\hat{\pm}(i2)$ -Protein/PI3K $\hat{\pm}/\hat{\pm}^3$ /Nitric Oxide-Coupled Pathway.

Correction: Efficacy of initial haemopurification strategy for acute paraquat poisoning in adults: study protocol for a randomised controlled trial (HeSAPP).

Pseudomelanosis intestini "from pylorus to jejunum:" A rare endoscopic finding in a patient with GI bleeding.

n-Propanol extract of boiled and fermented koro benguk (*Mucuna pruriens* seed) shows a neuroprotective effect in paraquat dichloride-induced Parkinson's disease rat model.

Inter-relationships among physical dimensions, distal-proximal rank orders, and basal GCaMP fluorescence levels in Ca(2+) imaging of functionally distinct synaptic boutons at *Drosophila* neuromuscular junctions.

Renal Energy Metabolism Following Acute Dichloroacetate and 2,4-Dinitrophenol Administration: Assessing the Cumulative Action with Hyperpolarized [1-(13)C]Pyruvate MRI.

Delayed death following paraquat poisoning: three case reports and a literature review.

A review of current studies on cellular and molecular mechanisms underlying pulmonary fibrosis induced by chemicals.

Low dose exposure to HBCD, CB-153 or TCDD induces histopathological and hormonal effects and changes in brain protein and gene expression in juvenile female BALB/c mice.

Degradation of triclosan by chlorine dioxide: Reaction mechanism, 2,4-dichlorophenol accumulation and toxicity evaluation.

Transcriptomic and methylomic analysis reveal the toxicological effect of 2,3,7,8-Tetrachlorodibenzodioxin on human embryonic stem cell.

Early-life stress induces motor coordination dysfunction in adult mice.

Distinct psychopathology of patients who attempted suicide with rodenticide in Taiwan: a comparative study with patients of suicide with paraquat.

The effect of two bromfenvinphos impurities: BDCEE and $\hat{\pm}^2$ -ketophosphonate on oxidative stress induction, acetylcholinesterase activity, and viability of human red blood cells.

Volatile Organic Compounds of Malignant Breast Cancer Wounds: Identification and Odors.

Microbiome-Metabolomics Analysis of the Impacts of Long-Term Dietary Advanced-Glycation-End-Product Consumption on C57BL/6 Mouse Fecal Microbiota and Metabolites.

Synaptic Mitochondria are More Susceptible to Traumatic Brain Injury-induced Oxidative Damage and Respiratory Dysfunction than Non-synaptic Mitochondria.

Author Correction: Multiomics reveal non-alcoholic fatty liver disease in rats following chronic exposure to an ultra-low dose of Roundup herbicide.

Protein phosphatase 2A stimulates activation of TFEB and TFE3 transcription factors in response to oxidative stress.

Waterborne and Dietborne Toxicity of Inorganic Arsenic to the Freshwater Zooplankton *Daphnia magna*.

Toxicity assessment of agrochemical Almix in *Heteropneustes fossilis* through histopathological alterations.

Epigenetic underpinnings of developmental immunotoxicity and autoimmune disease.

Gut microbiota influences Alzheimer's disease pathogenesis by regulating acetate in *Drosophila* model.

Seasonal variations of contamination and exoskeletal malformations in the white shrimps *Palaemon longirostris* in the Gironde estuary, France.

Ancestral TCDD Exposure Induces Multigenerational Histologic and Transcriptomic Alterations in Gonads of Male Zebrafish.

Sources of free radicals and oxidative stress in the oral cavity.

Effects of Prebiotic Fiber Xylooligosaccharide in Adenine-Induced Nephropathy in Mice.

Acetyl-L-Carnitine Attenuates Arsenic-Induced Oxidative Stress and Hippocampal Mitochondrial Dysfunction.

Metabolomics Discovers Early-Response Metabolic Biomarkers that Can Predict Chronic Reproductive Fitness in Individual *Daphnia magna*.

Food Chemicals Disrupt Human Gut Microbiota Activity And Impact Intestinal Homeostasis As Revealed By In Vitro Systems.

Modulation of the Oxidative Stress and Lipid Peroxidation by Endocannabinoids and Their Lipid Analogues.

Metabolomic analysis of serum from rats following long-term intake of Chinese sausage.

Aldehydes are the predominant forces inducing DNA damage and inhibiting DNA repair in tobacco smoke carcinogenesis.

Long noncoding RNA MANTIS relieved the protein-bound uremic toxin-induced injury on human umbilical vein endothelial cells in chronic kidney disease and end-stage renal disease.

Grapevine Trunk Diseases: A Review of Fifteen Years of Trials for Their Control with Chemicals and Biocontrol Agents.

Freeze-induced cyanide toxicity does not maintain the cyanogenesis polymorphism in white clover (*Trifolium repens*).

Cigarette smoke alters lung vascular permeability and endothelial barrier function (2017 Grover Conference Series).

Lung injury caused by paraquat poisoning results in increased interleukin-6 and decreased microRNA-146a levels.

Ellagic acid: A promising protective remedy against testicular toxicity induced by arsenic.

Safety evaluation of genetically modified DAS-40278-9 maize in a subchronic rodent feeding study.

Relative effective potencies of dioxin-like compounds in rodent and human lung cell models.

Toward an adverse outcome pathway for impaired growth: Mitochondrial dysfunction impairs growth in early life stages of the fathead minnow (*Pimephales promelas*).

Xanthohumol ameliorates 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced cellular toxicity in cultured MC3T3-E1 osteoblastic cells.

Arsenic methylation capacity in relation to nutrient intake and genetic polymorphisms in one-carbon metabolism.

Antioxidant properties and anti-mutagenic potential of Piper Cubeba fruit extract and molecular docking of certain bioactive compounds.

Lithium Treatment Aggregates the Adverse Effects on Erythrocytes Subjected to Arsenic Exposure.

Pharmacologic modeling of primary mitochondrial respiratory chain dysfunction in zebrafish.

Melatonin Rescues Mesenchymal Stem Cells from Senescence Induced by the Uremic Toxin p-Cresol via Inhibiting mTOR-Dependent Autophagy.

Exposure to Environmental Contaminants and Lung Function in Adolescents-Is There a Link?

Biogenic Synthesis of Novel Functionalized Selenium Nanoparticles by *Lactobacillus casei* ATCC 393 and Its Protective Effects on Intestinal Barrier Dysfunction Caused by Enterotoxigenic *Escherichia coli* K88.

Transcriptomic evidence for involvement of reactive oxygen species in *Rhizoctonia solani* AG1 IA sclerotia maturation.

Systemic Acrolein Elevations in Mice With Experimental Autoimmune Encephalomyelitis and Patients With Multiple Sclerosis.

Antimicrobial agent triclosan disrupts mitochondrial structure, revealed by super-resolution microscopy, and inhibits mast cell signaling via calcium modulation.

Elicitor-Based Biostimulant PSP1 Protects Soybean Against Late Season Diseases in Field Trials.

Impact of a proposed revision of the IESTI equation on the acute risk assessment conducted when setting maximum residue levels (MRLs) in the European Union (EU): A case study.

Plasma Oligomeric Beta Amyloid in Alzheimer's Disease with History of Agent Orange Exposure.

Validation and bioinformatics analysis of differentially expressed circRNAs involved in developing male *Xenopus laevis* chronically exposed to atrazine.

Fertility in male rats: Disentangling adverse effects of arsenic compounds.

Protein-bounded uremic toxin p-cresylsulfate induces vascular permeability alternations.

Toxicity evaluation of 4,4'-di-CDPS and 4,4'-di-CDE on green algae *Scenedesmus obliquus*: growth inhibition, change in pigment content, and oxidative stress.

A stress-enhanced model for discovery of disease-modifying gene: Ece1-suppresses the toxicity of α -synuclein A30P.

PCB126 Inhibits the Activation of AMPK-CREB Signal Transduction Required for Energy Sensing in Liver.

Continuous Infusion of Phenyelzine, Cyclosporine A, or Their Combination: Evaluation of Mitochondrial Bioenergetics, Oxidative Damage, and Cytoskeletal Degradation following Severe Controlled Cortical Impact Traumatic Brain Injury in Rats.

Ecotoxicological potential of the biocides terbutryn, octhilinone and methylisothiazolinone: Underestimated risk from biocidal pathways?

Species-specific bioaccumulation and correlated health risk of arsenic compounds in freshwater fish from a typical mine-impacted river.

Elevated Nrf-2 responses are insufficient to mitigate protein carbonylation in hepatospecific PTEN deletion mice.

Overview of air pollution and endocrine disorders.

Characterization and risk assessment of seasonal and weather dynamics in organic pollutant mixtures from discharge of a separate sewer system.

Convergent Loss of ABC Transporter Genes From *Clostridioides difficile* Genomes Is Associated With Impaired Tyrosine Uptake and p-Cresol Production.

Effects of biochar on the fate and toxicity of herbicide fenoxaprop-ethyl in soil.

Anterograde Amnesia after Acute Glufosinate Ammonium Intoxication.

Berberine protects the liver and kidney against functional disorders and histological damages induced by ferrous sulfate.

Electrochemical simulation of triclosan metabolism and toxicological evaluation.

Shielding effect of anethole against arsenic induced genotoxicity in cultured human peripheral blood lymphocytes and effect of GSTO1 polymorphism.

Reproductive success and contaminant associations in tree swallows (*Tachycineta bicolor*) used to assess a Beneficial Use Impairment in U.S. and Binational Great Lakes' Areas of Concern.

Suppression of the IgM Response by Aryl Hydrocarbon Receptor Activation in Human Primary B Cells Involves Impairment of Immunoglobulin Secretory Processes.

sEcad and EGF Levels Increased in Urine of Non-ferrous Metal Workers and Medium of Uroepithelial Cell Line Treated by Arsenic.

Lower tier toxicity risk assessment of agriculture pesticides detected on the Río Madre de Dios watershed, Costa Rica.

Palmitic acid induces neurotoxicity and gliotoxicity in SH-SY5Y human neuroblastoma and T98G human glioblastoma cells.

Dietary cyanogen exposure and early child neurodevelopment: An observational study from the Democratic Republic of Congo.

Environmental Toxin Screening Using Human-Derived 3D Bioengineered Liver and Cardiac Organoids.

Low Oxidative Stress-Mediated Proliferation Via JNK-FOXO3a-Catalase Signaling in Transplanted Adult Stem Cells Promotes Wound Tissue Regeneration.

Clostridium Bacteria and Autism Spectrum Conditions: A Systematic Review and Hypothetical Contribution of Environmental Glyphosate Levels.

A New Treatment Approach for Acute Paraquat Poisoning.

Linking mode of action of the model respiratory and photosynthesis uncoupler 3,5-dichlorophenol to adverse outcomes in *Lemna minor*.

Prenatal exposure to glycol ethers and sex steroid hormones at birth.

Potential impurities in drug substances: Compound-specific toxicology limits for 20 synthetic reagents and by-products, and a class-specific toxicology limit for alkyl bromides.

Cellular and Molecular Effects of Prolonged Low-Level Sodium Arsenite Exposure on Human Hepatic HepaRG Cells.

Neuromodulatory Burst Therapy for Agent Orange-Induced Peripheral Neuropathy: A Case Report.

Identification of novel Nrf2 activators from *Cinnamomum chartophyllum* H.W. Li and their potential application of preventing oxidative insults in human lung epithelial cells.

Protocol to assess the impact of tobacco-induced volatile organic compounds on cardiovascular risk in a cross-sectional cohort: Cardiovascular Injury due to Tobacco Use study.

Enzyme polymorphism, oxygen and injury: a lipidomic analysis of flight-induced oxidative damage in a succinate dehydrogenase d (Sdh-d)-polymorphic insect.

Transplantation of endothelial progenitor cells attenuated paraquat-induced acute lung injury via miR-141-3p-Notch-Nrf2 axis.

Identification of potential serum biomarkers of acute paraquat poisoning in humans using an iTRAQ quantitative proteomic.

Evaluation of allyl isothiocyanate as a soil fumigant against soil-borne diseases in commercial tomato (*Lycopersicon esculentum* Mill.) production in China.

ER-stress mobilization of death-associated protein kinase-1-dependent xenophagy counteracts mitochondria stress-induced epithelial barrier dysfunction.

AHR2 required for normal behavioral responses and proper development of the skeletal and reproductive systems in zebrafish.

Differential microRNA expression in the prefrontal cortex of mouse offspring induced by glyphosate exposure during pregnancy and lactation.

Hypoxia-inducible factor-1 α regulates epithelial-to-mesenchymal transition in paraquat-induced pulmonary fibrosis by activating lysyl oxidase.

Acetobacter indonesiensis Pneumonia after Lung Transplantation.

Effect of activated charcoal hemoperfusion on renal function in patients with paraquat poisoning.

Green synthesis of NiO nanoparticles using *Aegle marmelos* leaf extract for the evaluation of in-vitro cytotoxicity, antibacterial and photocatalytic properties.

Bisphenol A is an exogenous toxin that promotes mitochondrial injury and death in tubular cells.

The ecotoxicity of binary mixtures of Imazamox and ionized ammonia on freshwater copepods: Implications for environmental risk assessment in groundwater bodies.

Arsenic Induces Members of the mmu-miR-466-669 Cluster Which Reduces NeuroD1 Expression.

Phenotypic responses in *Caenorhabditis elegans* following chronic low-level exposures to inorganic and organic compounds.

Association of textile industry effluent with mutagenicity and its toxic health implications upon acute and sub-chronic exposure.

Phenyl sulfate, indoxyl sulfate and p-cresyl sulfate decrease glutathione level to render cells vulnerable to oxidative stress in renal tubular cells.

Catalase down-regulation in cancer cells exposed to arsenic trioxide is involved in their increased sensitivity to a pro-oxidant treatment.

Dysregulation of Intestinal Health by Environmental Pollutants: Involvement of the Estrogen Receptor and Aryl Hydrocarbon Receptor.

Screening of Pesticide and Biocide Patterns As Risk Drivers in Sediments of Major European River Mouths: Ubiquitous or River Basin-Specific Contamination?

Effects of sulfur-fumigation on the pharmacokinetics, metabolites and analgesic activity of Radix Paeoniae Alba.

The consequence of NAC on sodium arsenite-induced uterine oxidative stress.

Ectopic expression of S28A-mutated Histone H3 modulates longevity, stress resistance and cardiac function in *Drosophila*.

The rolB plant oncogene affects multiple signaling protein modules related to hormone signaling and plant defense.

Persistence behavior of metamifop and its metabolite in rice ecosystem.

Dioxin Exposure in the Manufacture of Pesticide Production as a Risk Factor for Death from Prostate Cancer: A Meta-analysis.

Correction to: Paraquat-Induced Movement Disorder in Relation to Oxidative Stress-Mediated Neurodegeneration in the Brain of *Drosophila melanogaster*.

Dysregulation of antioxidant responses in patients diagnosed with concomitant Primary Sclerosing Cholangitis/Inflammatory Bowel Disease.

Differential exposure and acute health impacts of inhaled solid-fuel emissions from rudimentary and advanced cookstoves in female CD-1 mice.

Complex mixtures of dissolved pesticides show potential aquatic toxicity in a synoptic study of Midwestern U.S. streams.

The Contribution of Superoxide Radical to Cadmium Toxicity in *E. coli*.

Aryl hydrocarbon receptor signaling modulates antiviral immune responses: ligand metabolism rather than chemical source is the stronger predictor of outcome.

Alternative use of *Bacillus subtilis* spores: protection against environmental oxidative stress in human normal keratinocytes.

Compensation for chronic oxidative stress in ALADIN null mice.

Point-of-care testing in the early diagnosis of acute pesticide intoxication: The example of paraquat.

The levels of peroxisomal catalase protein and activity modulate the onset of cell death in tobacco BY-2 cells via reactive oxygen species levels and autophagy.

[Effect of anthropo-technogenic load on medico-social aspects of primary morbidity and disability of population.].

Computational Analysis of Deposition and Translocation of Inhaled Nicotine and Acrolein in the Human Body with E-cigarette Puffing Topographies.

A Review on the Expression and Metabolic Features of Orphan Human Cytochrome P450 2S1 (CYP2S1).

Arsenite exposure potentiates apoptosis-inducing effects of tumor necrosis factor- α - through reactive oxygen species.

Dioxin-like compounds bioavailability and genotoxicity assessment in the Gulf of Follonica, Tuscany (Northern Tyrrhenian Sea).

Impacts of glyphosate-based herbicides on disease resistance and health of crops: a review.

Improving risk stratification among veterans diagnosed with prostate cancer: impact of the 17-gene prostate score assay.

Antifouling processes and toxicity effects of antifouling paints on marine environment. A review.

Metabolism and disposition of arsenic species from controlled oral dosing with sodium arsenite in adult female CD-1 mice. I. Pilot study to determine dosing, analytical measurements, and sampling strategies.

Combined toxicity of triclosan, 2,4-dichlorophenol and 2,4,6-trichlorophenol to zebrafish (*Danio rerio*).

Division Plane Orientation Defects Revealed by a Synthetic Double Mutant Phenotype.

Seasonal implications on toxicity biomarkers of *Loricariichthys anus* (Valenciennes, 1835) from a subtropical reservoir.

Histodifferentiation of oil palm somatic embryo development at low auxin concentration.

Intermittent Hypoxia and Unsaturated Aldehydes: Effects on Oral Epithelial Wound Healing.

Comparison of in vivo toxicity, antioxidant and immunomodulatory activities of coconut, niphah and pineapple juice vinegars.

Environmentally relevant concentrations of herbicides impact non-target species at multiple sublethal endpoints.

[The roles of TSP-1 and its receptor CD47 in pathogenesis of paraquat-induced pulmonary fibrosis in rats].

Early Metabolome Profiling and Prognostic Value in Paraquat-Poisoned Patients: Based on Ultraperformance Liquid Chromatography Coupled To Quadrupole Time-of-Flight Mass Spectrometry.

A case of herbicide-induced acute fibrinous and organizing pneumonia?

Imbalance of Th17/Treg in the Pathogenesis of Mice with Paraquat-induced Acute Lung Injury.

Cytogenetic damage in peripheral blood lymphocytes of children exposed to pesticides in agricultural areas of the department of Cordoba, Colombia.

Urine Methyl Hippuric Acid Levels in Acute Pesticide Poisoning: Estimation of Ingested Xylene Volume and Association with Clinical Outcome Parameters.

Effects of glyphosate-based herbicides on survival, development and growth of invasive snail (*Pomacea canaliculata*).

The aryloxyalkanoate dioxygenase-12 (AAD-12) protein is not acutely toxic in mice.

Propolis supplementation attenuates the negative effects of oxidative stress induced by paraquat injection on productive performance and immune function in turkey poults.

Oral Exposure to Paraquat Triggers Earlier Expression of Phosphorylated α -Synuclein in the Enteric Nervous System of A53T Mutant Human α -Synuclein Transgenic Mice.

Glyphosate and Roundup(®) alter morphology and behavior in zebrafish.

Effects of glyphosate-based herbicide on pintado da Amazônia: Hematology, histological aspects, metabolic parameters and genotoxic potential.

Tissue metabolic changes for effects of pirfenidone in rats of acute paraquat poisoning by GC-MS.

RNA sequencing indicates that atrazine induces multiple detoxification genes in *Daphnia magna* and this is a potential source of its mixture interactions with other chemicals.

Exposures to arsenite and methylarsonite produce insulin resistance and impair insulin-dependent glycogen metabolism in hepatocytes.

Acrolein Disrupts Tight Junction Proteins and Causes Endoplasmic Reticulum Stress-Mediated Epithelial Cell Death Leading to Intestinal Barrier Dysfunction and Permeability.

Alda-1 Protects Against Acrolein-Induced Acute Lung Injury and Endothelial Barrier Dysfunction.

Intracellular Ca^{2+} is an essential factor for cell damage induced by unsaturated carbonyl compounds.

A positive feedback loop promotes HIF-1 α stability through miR-210-mediated suppression of RUNX3 in paraquat-induced EMT.

The rise of glyphosate and new opportunities for biosentinel early-warning studies.

In vitro assessment of skin sensitization, photosensitization and phototoxicity potential of commercial glyphosate-containing formulations.

Effectiveness of heparin eye drops in paraquat-induced ocular injury.

Effect of resveratrol and tetracycline on the subacute paraquat toxicity in mice.

Acute toxicity of organic antifouling biocides to phytoplankton *Nitzschia pungens* and zooplankton *Artemia* larvae.

Mixture Toxicity of Bensulfuron-Methyl and Acetochlor to Red Swamp Crayfish (*Procambarus clarkii*): Behavioral, Morphological and Histological Effects.

Facts and Fallacies in the Debate on Glyphosate Toxicity.

Involvement of H₂O₂ in fluazifop-P-butyl-induced cell death in bristly starbur seedlings.

Recent advances in tenuazonic acid as a potential herbicide.

Interactions between salicylic acid and antioxidant enzymes tilting the balance of H₂O₂ from photorespiration in non-target crops under halosulfuron-methyl stress.

[Paraquat poisoning mechanism and its clinical treatment progress].

Behavioral impairments following repeated intranasal glyphosate-based herbicide administration in mice.

Phytoplankton growth and PSII efficiency sensitivity to a glyphosate-based herbicide (Factor 540®).

Induction of the PDH bypass and upregulation of the ALDH7B4 in plants treated with herbicides inhibiting amino acid biosynthesis.

Personal exposure and health risk assessment of carbonyls in family cars and public transports-a comparative study in Nanjing, China.

The dissipation and risk assessment of 2,4-D sodium, a preharvest anti-fruit-drop plant hormone in bayberries.

Paraquat exposure-induced Parkinson's disease-like symptoms and oxidative stress in *Drosophila melanogaster*: Neuroprotective effect of *Bougainvillea glabra* Choisy.

Exposure of frogs and tadpoles to chiral herbicide fenoxaprop-ethyl.

Paraquat-Induced Movement Disorder in Relation to Oxidative Stress-Mediated Neurodegeneration in the Brain of *Drosophila melanogaster*.

Auxin-like effects of the natural coumarin scopoletin on *Arabidopsis* cell structure and morphology.

Serine alleviates oxidative stress via supporting glutathione synthesis and methionine cycle in mice.

Effects of co-exposure to atrazine and ethanol on the oxidative damage of kidney and liver in Wistar rats.

Assessing neurodevelopmental effects of arsenolipids in pre-differentiated human neurons.

Epi/perineural and Schwann Cells as Well as Perineural Sheath Integrity are Affected Following 2,4-D Exposure.

Military service, deployments, and exposures in relation to amyotrophic lateral sclerosis survival.

Neonatal exposure to a glyphosate-based herbicide alters uterine decidualization in rats.

Occupational pesticide use and Parkinson's disease in the Parkinson Environment Gene (PEG) study.

Effects of sub-chronic exposure to terbuthylazine on DNA damage, oxidative stress and parent compound/metabolite levels in adult male rats.

Combined effects of temperature and clomazone (Gamit®) on oxidative stress responses and B-esterase activity of *Physalaemus nattereri* (Leiuperidae) and *Rhinella schneideri* (Bufonidae) tadpoles.

Effects of the herbicide glyphosate on non-target plant native species from Chaco forest (Argentina).

Integrated analysis of paraquat-induced microRNAs-mRNAs changes in human neural progenitor cells.

Genotoxicity of lipid oxidation compounds.

A study on the modulation of alpha-synuclein fibrillation by *Scutellaria pinnatifida* extracts and its neuroprotective properties.

Porous Se@SiO₂ nanospheres treated paraquat-induced acute lung injury by resisting oxidative stress.

[The effect of captopril and losartan on paraquat-induced pulmonary fibrosis and PIGF expression in the lungs of rats].

[Mono-carbonyl analogues of curcumin prevents paraquat-induced apoptosis in HK-2 cell line by inhibiting oxidative damage and inflammation].

Atrazine induced epigenetic transgenerational inheritance of disease, lean phenotype and sperm epimutation pathology biomarkers.

Wnt/ β -catenin signaling plays an essential role in β 7 nicotinic receptor-mediated neuroprotection of dopaminergic neurons in a mouse Parkinson's disease model.

Reproductive toxicity of Roundup herbicide exposure in male albino rat.

[Effects of small RNA interference targeting mammalian target of rapamycin on paraquat-induced pulmonary fibrosis in rats].

Primary hippocampal neuronal cell death induction after acute and repeated paraquat exposures mediated by AChE variants alteration and cholinergic and glutamatergic transmission disruption.

Simultaneous determination of bentazone and its metabolites in postmortem whole blood using liquid chromatography-tandem mass spectrometry.

The metabolic effects of diuron in the rat liver.

Copper-Based Aquatic Algaecide Adsorption and Accumulation Kinetics: Influence of Exposure Concentration and Duration for Controlling the Cyanobacterium *Lyngbya wollei*.

Insights into the differential toxicological and antioxidant effects of 4-phenylchalcogenil-7-chloroquinolines in *Caenorhabditis elegans*.

Assessment of the oxidative and neurotoxic effects of glyphosate pesticide on the larvae of *Rhamdia quelen* fish.

Cyclophosphamide and acrolein induced oxidative stress leading to deterioration of metaphase II mouse oocyte quality.

Gender-specific histopathological response in guppies *Poecilia reticulata* exposed to glyphosate or its metabolite aminomethylphosphonic acid.

Toxicity of two classes of arsenolipids and their water-soluble metabolites in human differentiated neurons.

Adult and child urinary 2,4-D in cities with and without cosmetic pesticide bylaws: a population-based cross-sectional pilot study.

Hypokalemia is a biochemical signal of poor prognosis for acute paraquat poisoning within 4 hours.

Exogenous Acrolein intensifies sensory hypersensitivity after spinal cord injury in rat.

Maternal linuron exposure alters testicular development in male offspring rats at the whole genome level.

Clinical screening of paraquat in plasma samples using capillary electrophoresis with contactless conductivity detection: Towards rapid diagnosis and therapeutic treatment of acute paraquat poisoning in Vietnam.

JWA antagonizes paraquat-induced neurotoxicity via activation of Nrf2.

Chronic effects of atrazine exposure and recovery in freshwater benthic diatoms from two communities with different pollution histories.

Toxicity evaluation of cypermethrin, glyphosate, and malathion, on two indigenous zooplanktonic species.

Efficacy of *Spirulina platensis* diet supplements on disease resistance and immune-related gene expression in *Cyprinus carpio* L. exposed to herbicide atrazine.

The toxic influence of paraquat on hippocampal neurogenesis in adult mice.

Respiratory Effects and Systemic Stress Response Following Acute Acrolein Inhalation in Rats.

Flavored e-cigarette liquids and cinnamaldehyde impair respiratory innate immune cell function.

Comparative toxic responses of male and female lizards (*Eremias argus*) exposed to (S)-metolachlor-contaminated soil.

Biomarkers of Chronic Acrolein Inhalation Exposure in Mice: Implications for Tobacco Product-Induced Toxicity.

JNK Inhibitor SP600125 Attenuates Paraquat-Induced Acute Lung Injury: an In Vivo and In Vitro Study.

In vivo cardiovascular toxicity induced by acetochlor in zebrafish larvae.

Paraquat induces extrinsic pathway of apoptosis in A549 cells by induction of DR5 and repression of anti-apoptotic proteins, DDX3 and GSK3 expression.

An approach to clarify the effect mechanism of glyphosate on body malformations during embryonic development of zebrafish (*Danio rerio*).

Diuron and diazinon alter the behavior of zebrafish embryos and larvae in the absence of acute toxicity.

Parental diuron-exposure alters offspring transcriptome and fitness in Pacific oyster *Crassostrea gigas*.

Occupational, dietary, and other risk factors for myelodysplastic syndromes in Western Greece.

Tanshinone I Induces Mitochondrial Protection through an Nrf2-Dependent Mechanism in Paraquat-Treated Human Neuroblastoma SH-SY5Y Cells.

Chronic Treatment with Paraquat Induces Brain Injury, Changes in Antioxidant Defenses System, and Modulates Behavioral Functions in Zebrafish.

Multitarget trehalose-carnosine conjugates inhibit $A\beta$ aggregation, tune copper(II) activity and decrease acrolein toxicity.

Paraquat Induces Peripheral Myelin Disruption and Locomotor Defects: Crosstalk with LXR and Wnt Pathways.

Developmental exposure to glyphosate-based herbicide and depressive-like behavior in adult offspring: Implication of glutamate excitotoxicity and oxidative stress.

Oxidative stress affects sperm performance and ejaculate redox status in subordinate house sparrows.

Effects of hemoperfusion and continuous renal replacement therapy on patient survival following paraquat poisoning.

Chronic exposure to a glyphosate-based herbicide makes toad larvae more toxic.

Crosstalk between Mitochondrial Fission and Oxidative Stress in Paraquat-Induced Apoptosis in Mouse Alveolar Type II Cells.

[Study of the effect of occupational exposure to glyphosate on hepatorenal function].

Agronomic performance of insect-protected and herbicide-tolerant MON 89034 – TC1507 – NK603 – DAS-40278-9 corn is equivalent to that of conventional corn.

The value of APACHE II in predicting mortality after paraquat poisoning in Chinese and Korean population: A systematic review and meta-analysis.

The health consequences of aerial spraying illicit crops: The case of Colombia.

Effects of maternal acrolein exposure during pregnancy on testicular testosterone production in fetal rats.

Metabolic profiling of goldfish (*Carassius auratus*) after long-term glyphosate-based herbicide exposure.

Experimental study of sucralfate intervention for paraquat poisoning in rats.

Assessment of bacterial biodegradation of herbicide atrazine using *Aliivibrio fischeri* cytotoxicity assay with prolonged contact time.

Influence of temperature on the antioxidant responses and lipid peroxidation of two species of tadpoles (*Rhinella schneideri* and *Physalaemus nattereri*) exposed to the herbicide sulfentrazone (Boral 500SC®).

Morphoanatomical and physiological changes in *Bauhinia variegata* L. as indicators of herbicide diuron action.

Improvement of cyanobacterial-killing biologically derived substances (BDSs) using an ecologically safe and cost-effective naphthoquinone derivative.

Acrolein Can Cause Cardiovascular Disease: A Review.

Ecotoxicological assessment of glyphosate-based herbicides: Effects on different organisms.

Glucose Metabolism and AMPK Signaling Regulate Dopaminergic Cell Death Induced by Gene (β -Synuclein)-Environment (Paraquat) Interactions.

Childhood pesticide poisoning in Zhejiang, China: a retrospective analysis from 2006 to 2015.

[Intervention of edaravone against renal injury induced by acute paraquat poisoning in rats].

Prolonged methylprednisolone therapy after the pulse treatment for patients with moderate-to-severe paraquat poisoning: A retrospective analysis.

Mechanisms of Gene-Environment Interactions in Parkinson's Disease.

Inhibition of c-Src protects paraquat induced microvascular endothelial injury by modulating caveolin-1 phosphorylation and caveolae mediated transcellular permeability.

Toll-like receptor 9 mediates paraquat-induced acute lung injury: an in vitro and in vivo study.

Serum S100 protein could predict altered consciousness in glyphosate or glufosinate poisoning patients.

Dimercaprol is an acrolein scavenger that mitigates acrolein-mediated PC-12 cells toxicity and reduces acrolein in rat following spinal cord injury.

Effects of Roundup formulations on biochemical biomarkers and male sperm quality of the livebearing *Jenynsia multidentata*.

Mfn2 protects dopaminergic neurons exposed to paraquat both in vitro and in vivo: Implications for idiopathic Parkinson's disease.

Evidence for direct effects of glyphosate on ovarian function: glyphosate influences steroidogenesis and proliferation of bovine granulosa but not theca cells in vitro.

Role of TRPA1 in acute cardiopulmonary toxicity of inhaled acrolein.

Exchange of polar lipids from adults to neonates in *Daphnia magna*: Perturbations in sphingomyelin allocation by dietary lipids and environmental toxicants.

Time-dependent haemoperfusion after acute paraquat poisoning.

[Changes of integrin-linked kinase expression on rats' pulmonary fibrosis induced by paraquat].

[The study of using salvianolate treat acute lung injury in rats induced by paraquat].

Paraquat and Parkinson's disease: a systematic review protocol according to the OHAT approach for hazard identification.

A novel zebrafish-based model of nociception.

Endocrine and physiological effects of linuron and S-metolachlor in zebrafish developing embryos.

Continuous venovenous hemofiltration in the management of paraquat poisoning: A meta-analysis of randomized controlled trials.

Molecular mechanisms of anti-oxidant and anti-aging effects induced by convallatoxin in *Caenorhabditis elegans*.

Isoxadifen safening mechanism in sweet corn genotypes with differential response to P450-metabolized herbicides.

Isolation and characterization of two glutathione S-transferases from freshwater bivalve *Anodonta woodiana*: Chronic effects of pentachlorophenol on gene expression profiles.

Minocycline protects, rescues and prevents knockdown transgenic parkin *Drosophila* against paraquat/iron toxicity: Implications for autosomic recessive juvenile parkinsonism.

Effects of three triazine metabolites and their mixture at environmentally relevant concentrations on early life stages of marbled crayfish (*Procambarus fallax f. virginalis*).

Dendritic cells' death induced by contact sensitizers is controlled by Nrf2 and depends on glutathione levels.

Sodium chlorate, a major water disinfection byproduct, alters brush border membrane enzymes, carbohydrate metabolism and impairs antioxidant system of Wistar rat intestine.

Effects of airborne toxicants on pulmonary function and mitochondrial DNA damage in rodent lungs.

Assessing genotoxicity of diuron on *Drosophila melanogaster* by the wing-spot test and the wing imaginal disk comet assay.

Effectiveness of the sequential organ failure assessment, acute physiology and chronic health evaluation II, and simplified acute physiology score II prognostic scoring systems in paraquat-poisoned patients in the intensive care unit.

Fluazifop- p-butyl, an aryloxyphenoxypropionate herbicide, diminishes renal and hepatic functions and triggers testicular oxidative stress in orally exposed rats.

Paraquat poisoning: Acute lung injury - a missed diagnosis.

[The study of using cordyceps-astragalus-salvia miltiorrhiza to treat acute lung injury induced by paraquat poisoning in rats].

Paraquat poisoning induced pulmonary epithelial mesenchymal transition through Notch1 pathway.

Sub-lethal effects of a glyphosate-based commercial formulation and adjuvants on juvenile oysters (*Crassostrea gigas*) exposed for 35 days.

Acrolein acts as a neurotoxin in the nigrostriatal dopaminergic system of rat: involvement of α -synuclein aggregation and programmed cell death.

Long-term trends in the intensity and relative toxicity of herbicide use.

Improving enzymatic activities and thermostability of a tri-functional enzyme with SOD, catalase and cell-permeable activities.

HMGB1-TLR4-IL23-IL17A axis promotes paraquat-induced acute lung injury by mediating neutrophil infiltration in mice.

Nephrotoxicity-induced proteinuria increases biomarker diagnostic thresholds in acute kidney injury.

A study of the age-related effects of lactational atrazine exposure.

Joint Toxicity of Arsenic, Copper and Glyphosate on Behavior, Reproduction and Heat Shock Protein Response in *Caenorhabditis elegans*.

Paraquat and maneb co-exposure induces noradrenergic locus coeruleus neurodegeneration through NADPH oxidase-mediated microglial activation.

Effects of melatonin in rats in the initial third stage of pregnancy exposed to sub-lethal doses of herbicides.

Treating Prey With Glyphosate Does Not Alter the Demographic Parameters and Predation of the *Harmonia axyridis* (Coleoptera: Coccinellidae).

Atrazine exposure elicits copy number alterations in the zebrafish genome.

Biological responses to phenylurea herbicides in fish and amphibians: New directions for characterizing mechanisms of toxicity.

Metastasis suppressor NM23 limits oxidative stress in mammals by preventing activation of stress-activated protein kinases/JNKs through its nucleoside diphosphate kinase activity.

Acrolein increases macrophage atherogenicity in association with gut microbiota remodeling in atherosclerotic mice: protective role for the polyphenol-rich pomegranate juice.

Exposures to the environmental toxicants pentachlorophenol (PCP) and dichlorodiphenyltrichloroethane (DDT) modify secretion of interleukin 1-beta (IL-1 β) from human immune cells.

Pesticides are Associated with Allergic and Non-Allergic Wheeze among Male Farmers.

Acrolein Inhalation Alters Myocardial Synchrony and Performance at and Below Exposure Concentrations that Cause Ventilatory Responses.

Complex interactive effects of water mold, herbicide, and the fungus *Batrachochytrium dendrobatidis* on Pacific treefrog *Hyla regilla* hosts.

MyD88 gene knockout attenuates paraquat-induced acute lung injury.

Ablation of Akt2 prevents paraquat-induced myocardial mitochondrial injury and contractile dysfunction: Role of Nrf2.

The chronic effects of terbutylazine-2-hydroxy on early life stages of marbled crayfish (*Procambarus fallax f. virginalis*).

Toxicity effects of an environmental realistic herbicide mixture on the seagrass *Zostera noltei*.

Effects of decreased dopamine transporter levels on nigrostriatal neurons and paraquat/maneb toxicity in mice.

Performance of a novel atrazine-induced cerebellar toxicity in quail (*Coturnix C. coturnix*): Activating PXR/CAR pathway responses and disrupting cytochrome P450 homeostasis.

Atrazine triggers hepatic oxidative stress and apoptosis in quails (*Coturnix C. coturnix*) via blocking Nrf2-mediated defense response.

Phycoerythrin averts intracellular ROS generation and physiological functional decline in eukaryotes under oxidative stress.

Ustiloxin G, a New Cyclopeptide Mycotoxin from Rice False Smut Balls.

Overlooking relevant confounders in the assessment of pesticides and human health: a reply to Mostafalou and Abdollahi.

Prepubertal subchronic exposure to soy milk and glyphosate leads to endocrine disruption.

Epigallocatechin-3-gallate alleviates paraquat-induced acute lung injury and inhibits upregulation of toll-like receptors.

A glyphosate-based herbicide induces histomorphological and protein expression changes in the liver of the female guppy *Poecilia reticulata*.

Effects of the herbicide surfactant MON 0818 on oviposition and viability of eggs of the ramshorn snail (*Planorbella pilsbryi*).

Toll-like receptor 4 ablation rescues against paraquat-triggered myocardial dysfunction: Role of ER stress and apoptosis.

Aquatic hazard assessment of MON 0818, a commercial mixture of alkylamine ethoxylates commonly used in glyphosate-containing herbicide formulations. Part 1: Species sensitivity distribution from laboratory acute exposures.

Aquatic hazard assessment of MON 0818, a commercial mixture of alkylamine ethoxylates commonly used in glyphosate-containing herbicide formulations. Part 2: Roles of sediment, temperature, and capacity for recovery following a pulsed exposure.

Neonatal exposure to a glyphosate based herbicide alters the development of the rat uterus.

Protective effects of activated signaling pathways by insulin on C6 glial cell model of MPP(+)-induced Parkinson's disease.

The protective effects of *Cichorium glandulosum* seed and cynarin against cyclophosphamide and its metabolite acrolein-induced hepatotoxicity in vivo and in vitro.

[Value of base excess in predicting the prognosis of patients with paraquat poisoning].

Toxicity of Plant Secondary Metabolites Modulating Detoxification Genes Expression for Natural Red Palm Weevil Pesticide Development.

Acrolein and Human Disease: Untangling the Knotty Exposure Scenarios Accompanying Several Diverse Disorders.

Reproductive toxicity of linuron following gestational exposure in rats and underlying mechanisms.

Acrolein scavengers, cysteamine and N-benzylhydroxylamine, reduces the mouse liver damage after acetaminophen overdose.

Multiomics reveal non-alcoholic fatty liver disease in rats following chronic exposure to an ultra-low dose of Roundup herbicide.

Effects of oxytetracycline on the performance and activity of biomixtures: Removal of herbicides and mineralization of chlorpyrifos.

Idh2 Deficiency Exacerbates Acrolein-Induced Lung Injury through Mitochondrial Redox Environment Deterioration.

Resveratrol and Montelukast Alleviate Paraquat-Induced Hepatic Injury in Mice: Modulation of Oxidative Stress, Inflammation, and Apoptosis.

Investigation Paraquat Poisoning in Southwest of Iran - from Sign to Mortality and Morbidity.

Protective action of Omega-3 on paraquat intoxication in *Drosophila melanogaster*.

Vasculitic Neuropathy Following Exposure to a Glyphosate-based Herbicide.

Liver X Receptor Agonist TO901317 Attenuates Paraquat-Induced Acute Lung Injury through Inhibition of NF- κ B and JNK/p38 MAPK Signal Pathways.

[Unexplored Chemical Reactions of Endogenous Acrolein: Detection, Toxicity, and Biological Roles].

Protective Effect of Ellagic Acid on Paraquat-induced Kidney Hazards in Rats.

Tualang Honey Protects the Rat Midbrain and Lung against Repeated Paraquat Exposure.

A longitudinal study of atrazine and 2,4-D exposure and oxidative stress markers among iowa corn farmers.

Biomarker analysis of American toad (*Anaxyrus americanus*) and grey tree frog (*Hyla versicolor*) tadpoles following exposure to atrazine.

Evaluation of 8-hydroxy-2-deoxyguanosine and NF κ B activation, oxidative stress response, acetylcholinesterase activity, and histopathological changes in rainbow trout brain exposed to linuron.

Effect of the herbicide atrazine and its metabolite DACT on bovine sperm quality.

Do estrogenic compounds in drinking water migrating from plastic pipe distribution system pose adverse effects to human? An analysis of scientific literature.

Comparing the acute sensitivity of growth and photosynthetic endpoints in three Lemna species exposed to four herbicides.

Curcumin attenuates paraquat-induced cell death in human neuroblastoma cells through modulating oxidative stress and autophagy.

Effects of a commonly used glyphosate-based herbicide formulation on early developmental stages of two anuran species.

Effects of oral administration of 2,4-dichlorophenoxyacetic acid (2,4-D) on reproductive parameters in male Wistar rats.

Effects of glyphosate acid and the glyphosate-commercial formulation (Roundup) on *Dimorphandra wilsonii* seed germination: Interference of seed respiratory metabolism.

An Effective Machine Learning Approach for Prognosis of Paraquat Poisoning Patients Using Blood Routine Indexes.

Short-term phytotoxicity in *Brassica napus* (L.) in response to pre-emergently applied metazachlor: A microcosm study.

Population and life-stage-specific effects of two herbicide formulations on the aquatic development of European common frogs (*Rana temporaria*).

Enantioselective Phytotoxicity and the Relative Mechanism of Current Chiral Herbicides.

Aldo-keto reductase 1B10 protects human colon cells from DNA damage induced by electrophilic carbonyl compounds.

Photocrosslinker technology: An antimicrobial efficacy of cinnamaldehyde cross-linked low-density polyethylene (Cin-C-LDPE) as a novel food wrapper.

Cinnamaldehyde induces fat cell-autonomous thermogenesis and metabolic reprogramming.

Soluble Vascular Adhesion Protein-1 Mediates Spermine Oxidation as Semicarbazide-Sensitive Amine Oxidase: Possible Role in Proliferative Diabetic Retinopathy.

A Nigro-Vagal Pathway Controls Gastric Motility and Is Affected in a Rat Model of Parkinsonism.

Novel tetrazole and cyanamide derivatives as inhibitors of cyclooxygenase-2 enzyme: design, synthesis, anti-inflammatory evaluation, ulcerogenic liability and docking study.

[Protective effect of thalidomide on ALI induced by paraquat poisoning in rats and its mechanism].

Effects of herbal extracts and compounds and pharmacological agents on pulmonary fibrosis in animal models: a review.

An investigation of the health effects caused by exposure to arsenic from drinking water and coal combustion: arsenic exposure and metabolism.

Inhibition of NLRP3 inflammasome: a new protective mechanism of cinnamaldehyde in endotoxin poisoning of mice.

Interleukin-17A Plays the Same Role on Mice Acute Lung Injury Respectively Induced by Lipopolysaccharide and Paraquat.

Pinocembrin Provides Mitochondrial Protection by the Activation of the Erk1/2-Nrf2 Signaling Pathway in SH-SY5Y Neuroblastoma Cells Exposed to Paraquat.

Supplementation of Spirulina (*Arthrospira platensis*) Improves Lifespan and Locomotor Activity in Paraquat-Sensitive DJ-1^{-/-} Flies, a Parkinson's Disease Model in *Drosophila melanogaster*.

Individual Amino Acid Supplementation Can Improve Energy Metabolism and Decrease ROS Production in Neuronal Cells Overexpressing Alpha-Synuclein.

Cinnamon reduces inflammatory response in intestinal fibroblasts in vitro and in colitis in vivo leading to decreased fibrosis.

Carbenoxolone inhibits TRPV4 channel-initiated oxidative urothelial injury and ameliorates cyclophosphamide-induced bladder dysfunction.

The protective effect of cinnamaldehyde on lipopolysaccharide induced acute lung injury in mice.

Targeted proteome analysis with isotope-coded protein labels for monitoring the influence of dietary phytochemicals on the expression of cytoprotective proteins in primary human colon cells.

Fusarium infection causes genotoxic disorders and antioxidant-based damages in *Orobancha* spp.

Cinnamaldehyde in diabetes: A review of pharmacology, pharmacokinetics and safety.

Clathrin-Dependent Uptake of Paraquat into SH-SY5Y Cells and Its Internalization into Different Subcellular Compartments.

Dietary cinnamaldehyde enhances acquisition of specific antibodies following helminth infection in pigs.

The relationships between arsenic methylation and both skin lesions and hypertension caused by chronic exposure to arsenic in drinking water.

Activation of MMP-9 activity by acrolein in saliva from patients with primary Sjögren's syndrome and its mechanism.

Contact sensitizers trigger human CD1-autoreactive T-cell responses.

Sodium chlorate induces DNA damage and DNA-protein cross-linking in rat intestine: A dose dependent study.

NLRP3 inflammasome activation regulated by NF- κ B and DAPK contributed to paraquat-induced acute kidney injury.

4-Hydroxyphenylpyruvate Dioxygenase and Its Inhibition in Plants and Animals: Small Molecules as Herbicides and Agents for the Treatment of Human Inherited Diseases.

Cromolyn Sodium Attenuates Paraquat-Induced Lung Injury by Modulation of Proinflammatory Cytokines.

Chloroquine attenuates paraquat-induced lung injury in mice by altering inflammation, oxidative stress and fibrosis.

Curcumin Rescues a PINK1 Knock Down SH-SY5Y Cellular Model of Parkinson's Disease from Mitochondrial Dysfunction and Cell Death.

Mild MPP(+) exposure-induced glucose starvation enhances autophagosome synthesis and impairs its degradation.

A screen for protective drugs against delayed hypoxic injury.

Computational study involving identification of endocrine disrupting potential of herbicides: Its implication in TDS and cancer progression in CRPC patients.

Phenelzine Protects Brain Mitochondrial Function In Vitro and In Vivo following Traumatic Brain Injury by Scavenging the Reactive Carbonyls 4-Hydroxynonenal and Acrolein Leading to Cortical Histological Neuroprotection.

In vitro antioxidant activities of resveratrol, cinnamaldehyde and their synergistic effect against cyadox-induced cytotoxicity in rabbit erythrocytes.

Janus-faced Acrolein prevents allergy but accelerates tumor growth by promoting immunoregulatory Foxp3+ cells: Mouse model for passive respiratory exposure.

Cinnamaldehyde induces apoptosis and reverses epithelial-mesenchymal transition through inhibition of Wnt/ β -catenin pathway in non-small cell lung cancer.

Oral supplementation of trans-cinnamaldehyde reduces uropathogenic Escherichia coli colonization in a mouse model.

Mucuna pruriens reduces inducible nitric oxide synthase expression in Parkinsonian mice model.

Diquat-induced cellular pyridine nucleotide redox changes and alteration of metabolic enzyme activities in colonic carcinoma cells.

Knockdown transgenic Lrrk Drosophila resists paraquat-induced locomotor impairment and neurodegeneration: A therapeutic strategy for Parkinson's disease.

Protecting cells by protecting their vulnerable lysosomes: Identification of a new mechanism for preserving lysosomal functional integrity upon oxidative stress.

(-)- α -Bisabolol reduces orofacial nociceptive behavior in rodents.

Local upregulation of transient receptor potential ankyrin 1 and transient receptor potential vanilloid 1 ion channels in rectosigmoid deep infiltrating endometriosis.

Glyphosate and Paraquat in Maternal and Fetal Serums in Thai Women.

Antifungal Activity of Ramulus cinnamomi Explored by ^1H -NMR Based Metabolomics Approach.

A CRISPR screen identifies a pathway required for paraquat-induced cell death.

Metabolomic analysis of oxidative stress: Superoxide dismutase mutation and paraquat induced stress in Drosophila melanogaster.

Phytotoxic activity against *Bromus tectorum* for secondary metabolites of a seed-pathogenic *Fusarium* strain belonging to the *F. tricinctum* species complex.

Chloroplast-associated metabolic functions influence the susceptibility of maize to *Ustilago maydis*.

Protective effect of cinnamaldehyde against glutamate-induced oxidative stress and apoptosis in PC12 cells.

[Curative effect of paraquat detoxification recipe combined with continuous hemoperfusion in the treatment of patients with APP and clinical value of Presepsin].

[Protective effect of 5-aminosalicylic acid on the kidney of paraquat poisoning rats by Nrf2-ARE signal pathway].

Different Routes for Conifer- and Sinapaldehyde and Higher Saccharification upon Deficiency in the Dehydrogenase CAD1.

Analysis of sugarcane herbicides in marine turtle nesting areas and assessment of risk using *in vitro* toxicity assays.

Combination of quercetin, cinnamaldehyde and hirudin protects rat dorsal root ganglion neurons against high glucose-induced injury through Nrf-2/HO-1 activation and NF- κ B inhibition.

Identification and Biological Evaluation of Secondary Metabolites from Marine Derived Fungi-*Aspergillus* sp. SCSLOW3, Cultivated in the Presence of Epigenetic Modifying Agents.

ROS Induces Anthocyanin Production Via Late Biosynthetic Genes and Anthocyanin Deficiency Confers the Hypersensitivity to ROS-Generating Stresses in *Arabidopsis*.

Biokinetic Analysis and Metabolic Fate of 2,4-D in 2,4-D-Resistant Soybean (*Glycine max*).

Oilseed rape NAC56 transcription factor modulates reactive oxygen species accumulation and hypersensitive response-like cell death.

A drastic superoxide-dependent oxidative stress is prerequisite for the down-regulation of IRP1: Insights from studies on SOD1-deficient mice and macrophages treated with paraquat.

ROS regulation of axonal mitochondrial transport is mediated by Ca²⁺ and JNK in *Drosophila*.

Risk factors associated with white spot syndrome virus outbreaks in marine shrimp farms in Rayong Province, Thailand.

Changes in the mitochondrial protein profile due to ROS eruption during ageing of elm (*Ulmus pumila* L.) seeds.

Morus alba leaf extract mediates neuroprotection against glyphosate-induced toxicity and biochemical alterations in the brain.

Autophagy deficient keratinocytes display increased DNA damage, senescence and aberrant lipid composition after oxidative stress *in vitro* and *in vivo*.

Urinary Concentrations of Insecticide and Herbicide Metabolites among Pregnant Women in Rural Ghana: A Pilot Study.

Cell cycle arrest and biochemical changes accompanying cell death in harmful dinoflagellates following exposure to bacterial algicide IRI-160AA.

siRNA-based Analysis of the Abrogation of the Protective Function of Membrane-associated Catalase of Tumor Cells.

Neurodevelopmental disorders and pesticide exposure: the northeastern Italian experience.

The Mitochondrial Lon Protease Is Required for Age-Specific and Sex-Specific Adaptation to Oxidative Stress.

Isoflavones Induce BEX2-Dependent Autophagy to Prevent ATR-Induced Neurotoxicity in SH-SY5Y Cells.

The Evaluation of Antioxidant and Anti-Inflammatory Effects of *Eucommia ulmoides* Flavones Using Diquat-Challenged Piglet Models.

Behavioral effects and neuroanatomical targets of acute atrazine exposure in the male Sprague-Dawley rat.

2-Methoxycinnamaldehyde inhibits the TNF- α -induced proliferation and migration of human aortic smooth muscle cells.

The Cystic Fibrosis Transmembrane Conductance Regulator Potentiator Ivacaftor Augments Mucociliary Clearance Abrogating Cystic Fibrosis Transmembrane Conductance Regulator Inhibition by Cigarette Smoke.

A serine/threonine phosphatase 1 of *Streptococcus suis* type 2 is an important virulence factor.

Impact of the Oral Adsorbent AST-120 on Organ-Specific Accumulation of Uremic Toxins: LC-MS/MS and MS Imaging Techniques.

Effects of Nrf2 deficiency on arsenic metabolism in mice.

Diverse pathways of epithelial mesenchymal transition related with cancer progression and metastasis and potential effects of endocrine disrupting chemicals on epithelial mesenchymal transition process.

Environmental estrogen-like endocrine disrupting chemicals and breast cancer.

[Comparative study of pain releasing effect of two approaches to acute pulpitis in the night emergency].

Tooth development disorders in infants of rat dams exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin and protective role of tocopherol and acetylsalicylic acid.

Chloracne in a Farming Family.

Association of 2,4-dichlorophenol urinary concentrations and olfactory dysfunction in a national sample of middle-aged and older U.S. adults.

p-cresol sulfate and indoxyl sulfate: some clouds are gathering in the uremic toxin sky.

Systematic Assessment of Research on Autism Spectrum Disorder (ASD) and Mercury Reveals Conflicts of Interest and the Need for Transparency in Autism Research.

Pathogenesis of deep endometriosis.

Expression of aryl hydrocarbon receptor, inflammatory cytokines, and incidence of rheumatoid arthritis in Vietnamese dioxin-exposed people.

Investigation on effect of basalin coated silver nanoparticles as antioxidant for alleviating peripheral neuropathy in mice treated with oxaliplatin.

Lactoferrin or ferrous salts for iron deficiency anemia in pregnancy: A meta-analysis of randomized trials.

Experimental oral iron administration: Histological investigations and expressions of iron handling proteins in rat retina with aging.

p-Cresyl glucuronide is a major metabolite of p-cresol in mouse: in contrast to p-cresyl sulphate, p-cresyl glucuronide fails to promote insulin resistance.

Persistent Endocrine-Disrupting Chemicals and Fatty Liver Disease.

The Effects of an Environmentally Relevant Level of Arsenic on the Gut Microbiome and Its Functional Metagenome.

Editor's Highlight: PCB126 Exposure Increases Risk for Peripheral Vascular Diseases in a Liver Injury Mouse Model.

Neuropsychological effects of occupational exposure to polychlorinated biphenyls.

Elucidation of protective efficacy of Pentahydroxy flavone isolated from *Madhuca indica* against arsenite-induced cardiomyopathy: Role of Nrf-2, PPAR- γ , c-fos and c-jun.

Genetic susceptibility to breast cancer risk associated with inorganic arsenic exposure.

Case-control study of chronic low-level exposure of inorganic arsenic species and non-melanoma skin cancer.

Maternal Resveratrol Treatment Reduces the Risk of Mammary Carcinogenesis in Female Offspring Prenatally Exposed to 2,3,7,8-Tetrachlorodibenzo-p-Dioxin.

Results of the HEMO Study suggest that p-cresol sulfate and indoxyl sulfate are not associated with cardiovascular outcomes.

Quillaja saponaria bark saponin protects Wistar rats against ferrous sulphate-induced oxidative and inflammatory liver damage.

Aqueous extract of *Securidaca longipendunculata* Oliv. and *Olex subscropioidea* inhibits key enzymes (acetylcholinesterase and butyrylcholinesterase) linked with Alzheimer's disease in vitro.

Mitochondrial Uncoupling Attenuates Age-Dependent Neurodegeneration in *C. elegans*.

Effects of Commonly Used Pesticides in China on the Mitochondria and Ubiquitin-Proteasome System in Parkinson's Disease.

Point-of-use fortification of foods with micronutrient powders containing iron in children of preschool and school-age.

Sodium chloride pica causing recurrent nephrolithiasis in a patient with iron deficiency anemia: a case report.

Changes in vasoactive pathways in congenital diaphragmatic hernia associated pulmonary hypertension explain unresponsiveness to pharmacotherapy.

Apoptosis signal-regulating kinase 1 inhibition attenuates cardiac hypertrophy and cardiorenal fibrosis induced by uremic toxins: Implications for cardiorenal syndrome.

Dietary nonheme iron is equally bioavailable from ferritin or ferrous sulfate in thalassemia intermedia.

Potential of antimicrobial photodynamic inactivation by inorganic salts.

Enoxacin with UVA Irradiation Induces Apoptosis in the AsPC1 Human Pancreatic Cancer Cell Line Through ROS Generation.

Iron absorption from oral iron supplements given on consecutive versus alternate days and as single morning doses versus twice-daily split dosing in iron-depleted women: two open-label, randomised controlled trials.

Gastrointestinal: Cause or effect: A case of microcytic anemia.

Enhancing miR-132 expression by aryl hydrocarbon receptor attenuates tumorigenesis associated with chronic colitis.

Obesogenic endocrine disruptors and obesity: myths and truths.

Aryl Hydrocarbon Receptor Ablation in Cardiomyocytes Protects Male Mice From Heart Dysfunction Induced by NKX2.5 Haploinsufficiency.

Antioxidant activity of oleuropein and semisynthetic acetyl-derivatives determined by measuring malondialdehyde in rat brain.

Sex-specific differences in effect of prenatal exposure to dioxin-like compounds on neurodevelopment in Japanese children: Sapporo cohort study.

Gonadal intersex in smallmouth bass *Micropterus dolomieu* from northern Indiana with correlations to molecular biomarkers and anthropogenic chemicals.

Iron Pharmacokinetics in Women with Iron Deficiency Anaemia Following A Single Oral Dose of a Novel Formulation of Tardyferon (Prolonged Release Ferrous Sulphate).

Linking arsenite- and cadmium-generated oxidative stress to microsatellite instability in vitro and in vivo.

Occupational exposure to pesticides are associated with fixed airflow obstruction in middle-age.

Microbiome perturbation by oral vancomycin reduces plasma concentration of two gut-derived uremic solutes, indoxyl sulfate and p-cresyl sulfate, in end-stage renal disease.

Review on arsenic-induced toxicity in male reproductive system and its amelioration.

Targeting energy metabolism of cancer cells: Combined administration of NCL-240 and 2-DG.

[Sensory axonal polyneuropathy due to 2,4-dinitrophenol].

The neurotoxicant PCB-95 by increasing the neuronal transcriptional repressor REST down-regulates caspase-8 and increases Ripk1, Ripk3 and MLKL expression determining necroptotic neuronal death.

Mitochondrial uncoupling in the melanocortin system differentially regulates NPY and POMC neurons to promote weight-loss.

Association Between Dioxin and Metabolic Syndrome by Age and Sex in an Endemic Area of Exposure in Taiwan.

Comparison of Different Iron Preparations in the Prophylaxis of Iron-deficiency Anemia.

Heme Biosynthetic Pathway is Functionally Linked to Adipogenesis via Mitochondrial Respiratory Activity.

Research on the effect of formononetin on photodynamic therapy in K562 cells.

Iron Supplementation in Twin Pregnancy - The Benefit of Doubling the Iron Dose in Iron Deficient Pregnant Women: A Randomized Controlled Trial.

Consumption of galacto-oligosaccharides increases iron absorption from a micronutrient powder containing ferrous fumarate and sodium iron EDTA: a stable-isotope study in Kenyan infants.

Do PCDD/PCDF standard solutions used in dioxin analysis pose a risk as potentially acutely toxic to lab personnel?

Environmental exposure to pesticides and the risk of Parkinson's disease in the Netherlands.

Mixture effects of 30 environmental contaminants on incident metabolic syndrome-A prospective study.

Effect of dioxin and 17 β -estradiol on the expression of cytochrome P450 1A1 gene via an estrogen receptor dependent pathway in cellular and xenografted models.

Inhibition of Cx43 mediates protective effects on hypoxic/reoxygenated human neuroblastoma cells.

The relationship between dioxins exposure and risk of prostate cancer with steroid hormone and age in Vietnamese men.

Live cell imaging of bacterial cells: Pyrenoylpyrrole-based fluorescence labeling.

Effects of Orally Ingested Arsenic on Respiratory Epithelial Permeability to Bacteria and Small Molecules in Mice.

Construction of environmental risk score beyond standard linear models using machine learning methods: application to metal mixtures, oxidative stress and cardiovascular disease in NHANES.

Sustained-release mitochondrial protonophore reverses nonalcoholic fatty liver disease in rats.

Anemia after continuous-flow left ventricular assist device implantation: characteristics and implications.

The human bitter taste receptor T2R38 is broadly tuned for bacterial compounds.

Overexpression of the Transcriptional Regulator WOR1 Increases Susceptibility to Bile Salts and Adhesion to the Mouse Gut Mucosa in *Candida albicans*.

Dietary Factors Modulate Iron Uptake in Caco-2 Cells from an Iron Ingot Used as a Home Fortificant to Prevent Iron Deficiency.

Dioxin Receptor Adjusts Liver Regeneration After Acute Toxic Injury and Protects Against Liver Carcinogenesis.

Recurrent anaemia in a patient with lymphocytic gastritis and vitamin B(12) deficiency.

Use of anthropogenic nitrogen fertilizers in agriculture is associated with per capita ethanol consumption.

Effect of a Short-Course Treatment with Synbiotics on Plasma p-Cresol Concentration in Kidney Transplant Recipients.

Cleaning and disinfection programs against *Campylobacter jejuni* for broiler chickens: productive performance, microbiological assessment and characterization.

Chronic exposure of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces an obesogenic effect in C57BL/6J mice fed a high fat diet.

The anti-migraine component of butterbur extracts, isopetasin, desensitizes peptidergic nociceptors by acting on TRPA1 cation channel.

Pediatric liver transplantation for fulminant hepatic failure secondary to intentional iron overdose.

Obstacles to reducing plasma levels of uremic solutes by hemodialysis.

Antimicrobial agents, triclosan, chloroxylenol, methylisothiazolinone and borax, used in cleaning had genotoxic and histopathologic effects on rainbow trout.

Filth Fly Activity Associated With Composted and Noncomposted Beef Cadavers and Laboratory Studies on Volatile Organic Compounds.

Neurocognitive disorders and chronic manganese exposure.

Oxoisoaporphine alkaloid derivative 8-1 reduces A β (1-42) secretion and toxicity in human cell and *Caenorhabditis elegans* models of Alzheimer's disease.

Changes in Serum Adiponectin in Mice Chronically Exposed to Inorganic Arsenic in Drinking Water.

Assessing the Impact of Lithium Chloride on the Expression of P-Glycoprotein at the Blood-Brain Barrier.

Visual light effects on mitochondria: The potential implications in relation to glaucoma.

Metabolic inhibition reduces cardiac L-type Ca²⁺ channel current due to acidification caused by ATP hydrolysis.

Relationships between serum-induced AhR bioactivity or mitochondrial inhibition and circulating polychlorinated biphenyls (PCBs).

Distribution, lipid-bilayer affinity and kinetics of the metabolic effects of dinoseb in the liver.

Polychlorinated dibenzo-p-dioxins and dibenzofurans levels in piglet liver with various diseases.

Increased Frequency of Rheumatoid Arthritis and Allergic Rhinitis among Pesticide Sprayers and Associations with Pesticide Use.

Near infra-red light attenuates corneal endothelial cell dysfunction in situ and in vitro.

Tert-butylhydroquinone protects PC12 cells against ferrous sulfate-induced oxidative and inflammatory injury via the Nrf2/ARE pathway.

An infant and mother with severe B(12) deficiency: vitamin B(12) status assessment should be determined in pregnant women with anaemia.

Exploring binding characteristics and the related competition of different protein-bound uremic toxins.

Fetal Cardiac Impairment in Nitrofen-Induced Congenital Diaphragmatic Hernia: Postmortem Microcomputed Tomography Imaging Study.

Iron Supplementation, Response in Iron-Deficiency Anemia: Analysis of Five Trials.

Multidirectional inhibition of cortico-hippocampal neurodegeneration by kolaviron treatment in rats.

Long term variation of serum levels of uremic toxins in patients treated by post-dilution high volume on-line hemodiafiltration in comparison to standard low-flux bicarbonate dialysis: results from the REDERT study.

A Simple Procedure for the Evaluation of Bone Vitality by Staining with a Tetrazolium Salt.

Benign and tumor parenchyma metabolomic profiles affect compensatory renal growth in renal cell carcinoma surgical patients.

Pesticide Use and Age-Related Macular Degeneration in the Agricultural Health Study.

Pesticide Exposure and Risk of Rheumatoid Arthritis among Licensed Male Pesticide Applicators in the Agricultural Health Study.

Pikuni-Blackfeet traditional medicine: Neuroprotective activities of medicinal plants used to treat Parkinson's disease-related symptoms.

Key Role for the Organic Anion Transporters, OAT1 and OAT3, in the in vivo Handling of Uremic Toxins and Solutes.

Iron bioavailability in iron-fortified cereal foods: The contribution of in vitro studies.

High Consumption of Iron Exacerbates Hyperlipidemia, Atherosclerosis, and Female Sterility in Zebrafish via Acceleration of Glycation and Degradation of Serum Lipoproteins.

Insights into the intracellular mechanisms of citronellal in *Candida albicans*: implications for reactive oxygen species-mediated necrosis, mitochondrial dysfunction, and DNA damage.

Correlation Between Nasal Epithelial Injury and In Vitro Cytotoxicity Using a Series of Small Molecule Protein Tyrosine Phosphatase 1B Inhibitors Investigated for Reversal of Leptin Resistance in Obesity.

KML001 and doxercalciferol induce synergistic antileukemic effect in acute lymphoid leukemia cells.

Role of the aryl hydrocarbon receptor in carcinogenesis and potential as an anti-cancer drug target.

[Refractory iron deficiency anaemia].

Thiamine and benfotiamine prevent stress-induced suppression of hippocampal neurogenesis in mice exposed to predation without affecting brain thiamine diphosphate levels.

Rho guanine nucleotide exchange factor (RGNEF) is a prosurvival factor under stress conditions.

Editor's Highlight: Base Excision Repair Variants and Pesticide Exposure Increase Parkinson's Disease Risk.

Polysulfonate suramin inhibits Zika virus infection.

Absence of the NOD2 protein renders epithelia more susceptible to barrier dysfunction due to mitochondrial dysfunction.

Outbreak of Occupational Dermatitis Associated With *Pyemotes ventricosus*.

Amyloid fibril systems reduce, stabilize and deliver bioavailable nanosized iron.

Effect of pistachio consumption on the modulation of urinary gut microbiota-related metabolites in prediabetic subjects.

Iron supplementation in singleton pregnancy: Is there a benefit to doubling the dose of elemental iron in iron-deficient pregnant women? a randomized controlled trial.

2,4 DNP improves motor function, preserves medium spiny neuronal identity, and reduces oxidative stress in a mouse model of Huntington's disease.

Forty to fifty-five-year-old women and iron deficiency: clinical considerations and quality of life.

Direct participation of DNA in the formation of singlet oxygen and base damage under UVA irradiation.

Ergothioneine products derived by superoxide oxidation in endothelial cells exposed to high-glucose.

Protective effect of hydroxytyrosol in arsenic-induced mitochondrial dysfunction in rat brain.

Indole-3-carbinol, a plant nutrient and AhR-Ligand precursor, supports oral tolerance against OVA and improves peanut allergy symptoms in mice.

Dioxin-induced increase in leukotriene B4 biosynthesis through the aryl hydrocarbon receptor and its relevance to hepatotoxicity owing to neutrophil infiltration.

Mitochondrion to endoplasmic reticulum apposition length in zebrafish embryo spinal progenitors is unchanged in response to perturbations associated with Alzheimer's disease.

Adsorption of aflatoxin B1, zearalenone and ochratoxin A by microorganisms isolated from Kefir grains.

Effect of Low-Dose Ferrous Sulfate vs Iron Polysaccharide Complex on Hemoglobin Concentration in Young Children With Nutritional Iron-Deficiency Anemia: A Randomized Clinical Trial.

The history of arsenical pesticides and health risks related to the use of Agent Blue.

Evaluation of processed borax as antidote for aconite poisoning.

The decreased growth performance and impaired immune function and structural integrity by dietary iron deficiency or excess are associated with TOR, NF- κ B, p38MAPK, Nrf2 and MLCK signaling in head kidney, spleen and skin of grass carp (*Ctenopharyngodon idella*).

Progesterone resistance in endometriosis: origins, consequences and interventions.

Down-regulation of N-deacetylase-N-sulfotransferase-1 signaling in the developing diaphragmatic vasculature of nitrofen-induced congenital diaphragmatic hernia.

Effects of Lithium and 2,4-Dichlorophenol on Zebrafish: Circadian Rhythm Disorder and Molecular Effects.

The Influence of α -Tocopherol on Serum Biochemical Markers During Experimentally Induced Pleuritis in Rats Exposed to Dioxin.

Vascular endothelial growth factor-D modulates oxidant-antioxidant balance of human vascular endothelial cells.

Oral Iron Treatment Response and Predictors in Anaemic Adolescents and Adults with IBD: A Prospective Controlled Open-Label Trial.

Ferric carboxymaltose vs. oral iron in the treatment of pregnant women with iron deficiency anemia: an international, open-label, randomized controlled trial (FER-ASAP).

NAD(+) loss, a new player in AhR biology: prevention of thymus atrophy and hepatosteatosis by NAD(+) repletion.

Neuroprotective effects of 2,4-dinitrophenol in an acute model of Parkinson's disease.

Oral administration of trace element magnesium significantly improving the cognition and locomotion in hepatic encephalopathy rats.

Antagonistic and Quantitative Assessment of Indigenous Lactic acid Bacteria in Different Varieties of Ogi against Gastrointestinal Pathogens.

TCF21 and the environmental sensor aryl-hydrocarbon receptor cooperate to activate a pro-inflammatory gene expression program in coronary artery smooth muscle cells.

Dioxins and related environmental contaminants increase TDP-43 levels.

Protective Effects of Curcumin against Sodium Arsenite-induced Ovarian Oxidative Injury in a Mouse Model.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces hepatic stellate cell (HSC) activation and liver fibrosis in C57BL6 mouse via activating Akt and NF- κ B signaling pathways.

Sodium azide suppresses LPS-induced expression MCP-1 through regulating κ B and STAT1 activities in macrophages.

Iron Supplements Modulate Colon Microbiota Composition and Potentiate the Protective Effects of Probiotics in Dextran Sodium Sulfate-induced Colitis.

Nuclear lamins and progerin are dispensable for antioxidant Nrf2 response to arsenic and cadmium.

Elastase and matrix metalloproteinase activities are associated with pulmonary vascular disease in the nitrofen rat model of congenital diaphragmatic hernia.

Follistatin-like 1 expression is decreased in the alveolar epithelium of hypoplastic rat lungs with nitrofen-induced congenital diaphragmatic hernia.

Limited reduction in uremic solute concentrations with increased dialysis frequency and time in the Frequent Hemodialysis Network Daily Trial.

The unusual presentation of a burn from methyl bromide exposure: A case report and review of the literature.

Suppressed erythropoietin expression in a nitrofen-induced congenital diaphragmatic hernia.

Study of 5 Volatile Organic Compounds in Exhaled Breath in Chronic Obstructive Pulmonary Disease.

DNP, mitochondrial uncoupling, and neuroprotection: A little dab'll do ya.

Fecal metagenomic profiles in subgroups of patients with myalgic encephalomyelitis/chronic fatigue syndrome.

Observation of nonanoic acid and aldehydes in exhaled breath of patients with lung cancer.

Ceftriaxone-Induced Hemolytic Anemia in a Jehovah's Witness.

[A group of occupational acute methyl bromide poisoning incident].

Adamantyl- and other polycyclic cage-based conjugates of desferrioxamine B (DFOB) for treating iron-mediated toxicity in cell models of Parkinson's disease.

Relation of polymorphism of arsenic metabolism genes to arsenic methylation capacity and developmental delay in preschool children in Taiwan.

Convergence of hepcidin deficiency, systemic iron overloading, heme accumulation, and REV-ERB α / β activation in aryl hydrocarbon receptor-elicited hepatotoxicity.

Sustained effectiveness of weekly iron-folic acid supplementation and regular deworming over 6 years in women in rural Vietnam.

Environmental pollutants, a possible etiology for premature ovarian insufficiency: a narrative review of animal and human data.

Prevalence and pattern of potential drug-drug interactions among chronic kidney disease patients in south-western Nigeria.

Free radicals impair the anti-oxidative stress activity of DJ-1 through the formation of SDS-resistant dimer.

Cost-effectiveness analysis of ultrasonography screening for nonalcoholic fatty liver disease in metabolic syndrome patients.

Endocrine disrupting compounds modulates adiponectin secretion, expression of its receptors and action on steroidogenesis in ovarian follicle.

Lower concentrations of receptor for advanced glycation end products and epiregulin in amniotic fluid correlate to chemically induced cleft palate in mice.

Antiproliferation effect of the uremic toxin para-cresol on endothelial progenitor cells is related to its antioxidant activity.

Evidence Favoring a Positive Feedback Loop for Physiologic Auto Upregulation of hnRNP-E1 during Prolonged Folate Deficiency in Human Placental Cells.

Persistent organic pollutants and diabetes among Inuit in the Canadian Arctic.

1,2-Dichloroethane impairs glucose and lipid homeostasis in the livers of NIH Swiss mice.

Arsenic exposure alters lung function and airway inflammation in children: A cohort study in rural Bangladesh.

Inhibition of Kupffer cell functions modulates arsenic intoxication in Wistar rats.

Low concentration of uncouplers of oxidative phosphorylation decreases the TNF-induced endothelial permeability and lethality in mice.

Evaluation of sodium arsenite exposure on reproductive competence in pregnant and postlactational dams and their offspring.

Intracellular ATP in balance of pro- and anti-inflammatory cytokines in adipose tissue with and without tissue expansion.

Protective effects of levamisole, acetylsalicylic acid, and α -tocopherol against dioxin toxicity measured as the expression of AhR and COX-2 in a chicken embryo model.

Immunomodulation of cell-penetrating tat-metallothionein for successful outcome of xenotransplanted pancreatic islet.

Iron Deficiency Anemia in Adolescents Who Present with Heavy Menstrual Bleeding.

Dioxin-like rather than non-dioxin-like PCBs promote the development of endometriosis through stimulation of endocrine-inflammation interactions.

Occupational Exposure to Pesticides and the Incidence of Lung Cancer in the Agricultural Health Study.

Comparison of intravenous ferrous sucrose and oral ferrous sulphate in treatment of postpartum iron deficiency anemia.

Dose-response characteristics of Clematis triterpenoid saponins and clematichinenoside AR in rheumatoid arthritis rats by liquid chromatography/mass spectrometry-based serum and urine metabolomics.

Strain differences in arsenic-induced oxidative lesion via arsenic biomethylation between C57BL/6J and 129X1/SvJ mice.

IL-27 triggers IL-10 production in Th17 cells via a c-Maf/ROR γ t/Blimp-1 signal to promote the progression of endometriosis.

Hyperglycemia enhances arsenic-induced platelet and megakaryocyte activation.

Are there any differences between first and second primary molar pulpectomy prognoses? A retrospective clinical study.

Pharmacologic Impact (aka "Breaking Bad") of Medications on Wound Healing and Wound Development: A Literature-based Overview.

Endocrine Disruptors and Obesity.

Residual renal function: a paradigm shift.

RNAi-Mediated Simultaneous Resistance Against Three RNA Viruses in Potato.

Fluoride and arsenic exposure affects spatial memory and activates the ERK/CREB signaling pathway in offspring rats.

Acute esophageal injury and strictures following corrosive ingestions in a 27year cohort.

Cilostazol inhibits uremic toxin-induced vascular smooth muscle cell dysfunction: role of Axl signaling.

Targeted mitochondrial uncoupling beyond UCP1 - The fine line between death and metabolic health.

Chronic Exposure to Low Doses of Dioxin Promotes Liver Fibrosis Development in the C57BL/6J Diet-Induced Obesity Mouse Model.

Exposure to the environmental endocrine disruptor TCDD and human reproductive dysfunction: Translating lessons from murine models.

Role of Glutathione Peroxidase 4 in Corneal Endothelial Cells.

Lower sulfurtransferase detoxification rates of cyanide in konzo-A tropical spastic paralysis linked to cassava cyanogenic poisoning.

Ameliorative effect of two Ayurvedic herbs on experimentally induced arsenic toxicity in calves.

Free and total p-cresol sulfate levels and infectious hospitalizations in hemodialysis patients in CHOICE and HEMO.

Oral antiplatelet agents for the management of acute coronary syndromes: A review for nurses and allied healthcare professionals.

Randomized clinical trial of preoperative oral versus intravenous iron in anaemic patients with colorectal cancer.

From the Cover: Embryonic Exposure to TCDD Impacts Osteogenesis of the Axial Skeleton in Japanese medaka, *Oryzias latipes*.

Arsenite in drinking water produces glucose intolerance in pregnant rats and their female offspring.

Effect of curcumin on kidney histopathological changes, lipid peroxidation and total antioxidant capacity of serum in sodium arsenite-treated mice.

2,3,7,8-tetrachlorodibenzo-p-dioxin and the viral infection.

Diagnostic guide enabling distinction between taphonomic stains and enamel hypomineralisation in an archaeological context.

Expression of T-box transcription factors 2, 4 and 5 is decreased in the branching airway mesenchyme of nitrofen-induced hypoplastic lungs.

Decreased Endoglin expression in the pulmonary vasculature of nitrofen-induced congenital diaphragmatic hernia rat model.

An iron-deficient diet during development induces oxidative stress in relation to age and gender in Wistar rats.

Pesticides: an update of human exposure and toxicity.

Decreased sensitivity of palmitoyl protein thioesterase 1-deficient neurons to chemical anoxia.

Epidemiology of endometriosis and its comorbidities.

Auxilin Underlies Progressive Locomotor Deficits and Dopaminergic Neuron Loss in a *Drosophila* Model of Parkinson's Disease.

p-Cresyl Sulfate.

Accelerated Bone Regeneration by Two-Photon Photoactivated Carbon Nitride Nanosheets.

Aryl hydrocarbon receptor/cytochrome P450^{1A1} pathway mediates breast cancer stem cells expansion through PTEN inhibition and β -Catenin and Akt activation.

[Uremic toxins and gut micro biome].

[Effect of low-dose exposure to sodium arsenite on proliferation of HBE and HaCaT cells].

Severe Self-Inflicted Acute Ocular Siderosis Caused by an Iron Tablet in the Conjunctival Fornix.

Protein-bound uremic toxins - biological effects and impact on morbidity in patients with chronic kidney disease.

[Ferrous sulfate in the treatment of iron deficiency anemia: The positions continue].

Probiotics for experimental obesity prevention: focus on strain dependence and viability of composition.

Generation of Loss-of-Function Mutants for Wheat Rust Disease Resistance Gene Cloning.

From Weed Killer to Wonder Drug.

Mitochondrial Uncoupler Prodrug of 2,4-Dinitrophenol, MP201, Prevents Neuronal Damage and Preserves Vision in Experimental Optic Neuritis.

Role of Organic Anion Transporters in the Uptake of Protein-Bound Uremic Toxins by Human Endothelial Cells and Monocyte Chemoattractant Protein-1 Expression.

The MPTP Story.

Pesticide exposures and respiratory health in general populations.

Toxico-vigilance - An inevitable prerequisite to keep a watch on toxins around you.

Activation of biologically relevant levels of reactive oxygen species by Au/g-C(3)N(4) hybrid nanozyme for bacteria killing and wound disinfection.

The dual clastogenic and anti-clastogenic properties of quercetin is dose dependent.

A Method for Diagnosing Alzheimer's Disease Based on Salivary Amyloid- β Protein 42 Levels.

Genome Editing with Engineered Nucleases in Economically Important Animals and Plants: State of the Art in the Research Pipeline.

Targeted Modification of Mitochondrial ROS Production Converts High Glucose-Induced Cytotoxicity to Cytoprotection: Effects on Anesthetic Preconditioning.

2,3,7,8 Tetrachlorodibenzo-p-dioxin-induced RNA abundance changes identify Ackr3, Col18a1, Cyb5a and Glud1 as candidate mediators of toxicity.

Dibenzo[def,p]chrysene transplacental carcinogenesis in wild-type, Cyp1b1 knockout, and CYP1B1 humanized mice.

Associations of arsenic metabolites, methylation capacity, and skin lesions caused by chronic exposure to high arsenic in tube well water.

Ignoring Adjuvant Toxicity Falsifies the Safety Profile of Commercial Pesticides.

Loss of the Arabidopsis Protein Kinases ANPs Affects Root Cell Wall Composition, and Triggers the Cell Wall Damage Syndrome.

Interaction patterns and toxicities of binary and ternary pesticide mixtures to *Daphnia magna* estimated by an accelerated failure time model.

Biomarkers identification by a combined clinical and metabonomics analysis in Henoch-Schonlein purpura nephritis children.

Ion Imbalance Is Involved in the Mechanisms of Liver Oxidative Damage in Rats Exposed to Glyphosate.

Occurrence of commonly used pesticides in personal air samples and their associated health risk among paddy farmers.

Receptor-interacting protein 140 as a co-repressor of Heat Shock Factor 1 regulates neuronal stress response.

Identification of differentially expressed genes response to TCDD in rat brain after long-term low-dose exposure.

Tissue breathing and topology of rats thymocytes surface under acute total β -irradiation.

Effects of water extracts of *Rehmannia glutinosa* on antioxidant system of Nrf2 in paraquat-induced insulin resistance diabetic rat model.

Elimination of Grapevine leafroll associated virus-3, Grapevine rupestris stem pitting associated virus and Grapevine virus A from a Tunisian Cultivar by Somatic Embryogenesis and Characterization of the Somaclones Using Ampelographic Descriptors.

Caffeine - rich infusion from *Cola nitida* (kola nut) inhibits major carbohydrate catabolic enzymes; abates redox imbalance; and modulates oxidative dysregulated metabolic pathways and metabolites in Fe(2+)-induced hepatic toxicity.

Differential cytotoxicity and intracellular calcium-signalling following activation of the calcium-permeable ion channels TRPV1 and TRPA1.

Hexachlorobenzene as a persistent organic pollutant: Toxicity and molecular mechanism of action.

Lung regeneration after toxic injury is improved in absence of dioxin receptor.

A fatal case of acute bupropion overdose despite cricothyroidotomy during cardiopulmonary resuscitation.

Morphological and morphometrical changes on adult Wistar rat testis caused by chronic sodium arsenite exposure.

Arsenite Induces Vascular Endothelial Cell Dysfunction by Activating IRE1 α /XBP1s/HIF1 α -Dependent ANGII Signaling.

[^{11}C]PF-3274167 as a PET radiotracer of oxytocin receptors: Radiosynthesis and evaluation in rat brain.

Continuation of non-essential medications in actively dying hospitalised patients.

2, 3, 7, 8-Tetrachlorodibenzo-p-dioxin promotes endothelial cell apoptosis through activation of EP3/p38MAPK/Bcl-2 pathway.

Lethal effects of selected novel pesticides on immature stages of *Trichogramma pretiosum* (Hymenoptera: Trichogrammatidae).

Time courses of post-injury mitochondrial oxidative damage and respiratory dysfunction and neuronal cytoskeletal degradation in a rat model of focal traumatic brain injury.

Hepatotoxicity and Drug/Chemical Interaction Toxicity of Nanoclay Particles in Mice.

Fertility enhancing activity and toxicity profile of aqueous extract of *Chasmanthera dependens* roots in male rats.

[* cases on acute poisoning of glufosinate].

Extensin-4 protects kidney from acute ischemia-reperfusion injury through upregulation of NRF2 signaling.

Aryl Hydrocarbon Receptor Activation Suppresses EBF1 and PAX5 and Impairs Human B Lymphopoiesis.

Toxic effects of polybrominated diphenyl ethers (BDE 47 and 99) and localization of BDE-99-induced cyp1a mRNA in zebrafish larvae.

In Silico Analysis of Putrefaction Pathways in Bacteria and Its Implication in Colorectal Cancer.

Co-expression of Arabidopsis NHX1 and bar Improves the Tolerance to Salinity, Oxidative Stress, and Herbicide in Transgenic Mungbean.

Suppression of Soilborne Diseases of Soybean With Cover Crops.

The protective effect of hydroalcoholic extract of Ginger (*Zingiber officinale* Rosc.) against iron-induced functional and histological damages in rat liver and kidney.

Doxycycline attenuates paraquat-induced pulmonary fibrosis by downregulating the TGF- β ² signaling pathway.

Role of catalytic iron and oxidative stress in nitrofen-induced congenital diaphragmatic hernia and its amelioration by Saireito (TJ-114).

Editor's Highlight: Ah Receptor Activation Potentiates Neutrophil Chemoattractant (C-X-C Motif) Ligand 5 Expression in Keratinocytes and Skin.

The Burden of Mental Illness Among Veterans: Use of VHA Health Care Services by Those With Service-connected Conditions.

Evaluation of the safety of a genetically modified DAS-444 β -6-6 soybean meal and hulls in a 90-day dietary toxicity study in rats.

Neuroprotective effects of hydrogen sulfide on sodium azide-induced autophagic cell death in PC12 cells.

Mdivi-1 attenuates sodium azide-induced apoptosis in H9c2 cardiac muscle cells.

Imbalanced immune responses involving inflammatory molecules and immune-related pathways in the lung of acute and subchronic arsenic-exposed mice.

Survey of polychlorinated dibenzo-p-dioxins, polychlorinated dibenzofurans and non-ortho-polychlorinated biphenyls in US meat and poultry, 2012-13: toxic equivalency levels, patterns, temporal trends and implications.

All-Trans Retinoic Acid Ameliorates Arsenic-Induced Oxidative Stress and Apoptosis in the Rat Uterus by Modulating MAPK Signaling Proteins.

Sodium arsenite-induced cardiovascular and renal dysfunction in rat via oxidative stress and protein kinase B (Akt/PKB) signaling pathway.

Assessment of prescribed medications and pattern of distribution for potential drug-drug interactions among chronic kidney disease patients attending the Nephrology Clinic of Lagos University Teaching Hospital in Sub-Saharan West Africa.

Paraquat and MPTP induce neurodegeneration and alteration in the expression profile of microRNAs: the role of transcription factor Nrf2.

In vitro screening of neuroprotective activity of Indian medicinal plant *Withania somnifera*.

Visible-Light Neural Stimulation on Graphitic-Carbon Nitride/Graphene Photocatalytic Fibers.

Electronic Cigarettes: Their Constituents and Potential Links to Asthma.

Effect of soluble CD14 subtype on the prognosis evaluation of acute paraquat poisoning patients.

The prophylactic effect of *Acetobacter syzygii* probiotic species against squamous cell carcinoma.

The effect of adding ferrous sulfate to methylphenidate on attention-deficit/hyperactivity disorder in children.

Rice 7-Hydroxymethyl Chlorophyll a Reductase Is Involved in the Promotion of Chlorophyll Degradation and Modulates Cell Death Signaling.

Exposure to Cooking Fumes and Acute Reversible Decrement in Lung Functional Capacity.

Novel Pathways of Ponatinib Disposition Catalyzed By CYP1A1 Involving Generation of Potentially Toxic Metabolites.

Phospholipase D $\hat{1}$ negatively regulates plant thermotolerance by destabilizing cortical microtubules in *Arabidopsis*.

Microbial metabolites are associated with a high adherence to a Mediterranean dietary pattern using a (1)H-NMR-based untargeted metabolomics approach.

2,3',4,4',5-Pentachlorobiphenyl impairs insulin-induced NO production partly through excessive ROS production in endothelial cells.

Evaluation of a vital staining protocol with 2,3,5-triphenyltetrazolium chloride for cancellous bone in a sheep model.

Protein-bound uremic toxins impaired mitochondrial dynamics and functions.

Biosensor Technology Reveals the Disruption of the Endothelial Barrier Function and the Subsequent Death of Blood Brain Barrier Endothelial Cells to Sodium Azide and Its Gaseous Products.

Acrolein induces mtDNA damages, mitochondrial fission and mitophagy in human lung cells.

Loss of liver-specific and sexually dimorphic gene expression by aryl hydrocarbon receptor activation in C57BL/6 mice.

Energy status regulates disease development and respiratory metabolism of *Lasiodiplodia theobromae* (Pat.) Griff. & Maubl.-infected longan fruit.

Benzene exposure is associated with cardiovascular disease risk.

Sodium Arsenite-Induced Learning and Memory Impairment Is Associated with Endoplasmic Reticulum Stress-Mediated Apoptosis in Rat Hippocampus.

Protective efficacy of various carbonyl compounds and their metabolites, and nutrients against acute toxicity of some cyanogens in rats: biochemical and physiological studies.

Acute toxicity of commercial atrazine in *Piaractus mesopotamicus*: Histopathological, ultrastructural, molecular, and genotoxic evaluation.

Inhibition of ALDH2 expression aggravates renal injury in a rat sepsis syndrome model.

Incidence and pathological study of *Explanatum explanatum* (Creplin, 1847) Fukui, 1929 in goats in Andhra Pradesh, India.

Protective effects of vitamin E on sodium arsenite-induced toxicity, testicular measurements and histopathological studies of testes in Teddy goat bucks.

Polychlorinated biphenyls disrupt hepatic epidermal growth factor receptor signaling.

CDC42 expression is altered by dioxin exposure and mediated by multilevel regulations via AhR in human neuroblastoma cells.

Impaired dendritic growth and positioning of cortical pyramidal neurons by activation of aryl hydrocarbon receptor signaling in the developing mouse.

Detection Methodologies for Pathogen and Toxins: A Review.

Effect of spermine-derived AGEs on oxidative stress and polyamine metabolism.

Emissions from Electronic Cigarettes: Assessing Vapers' Intake of Toxic Compounds, Secondhand Exposures, and the Associated Health Impacts.

Gerontoxanthone B from *Maclura cochinchinensis* var. *gerontogea* exhibits anti-inflammatory potential as an aryl hydrocarbon receptor agonist.

Organotins and new antifouling biocides in water and sediments from three Korean Special Management Sea Areas following ten years of tributyltin regulation: Contamination profiles and risk assessment.

Deficiency of long isoforms of Nfe2l1 sensitizes MIN6 pancreatic β cells to arsenite-induced cytotoxicity.

Behavioral and Immunohistochemical Study of the Effects of Subchronic and Chronic Exposure to Glyphosate in Mice.

Bone morphogenetic protein 7 alleviates paraquat-induced pulmonary fibrosis via TGF- β 1/Erk1/2 pathway.

Overexpression of p58ipk protects neuroblastoma against paraquat-induced toxicity.

Predictors of acute kidney injury after paraquat intoxication.

Patchouli oil ameliorates acute colitis: A targeted metabolite analysis of 2,4,6-trinitrobenzenesulfonic acid-induced rats.

Fructose-1,6-bisphosphate reverts iron-induced phenotype of hepatic stellate cells by chelating ferrous ions.

Targeted metabolomics analysis of aromatic amino acids and their gut microbiota-host cometabolites in rat serum and urine by liquid chromatography coupled with tandem mass spectrometry.

Oxidative stress in the algae *Chlamydomonas reinhardtii* exposed to biocides.

Host Resistance and Chemical Control for Management of Sclerotinia Stem Rot of Soybean in Ohio.

Hair analysis for the biomonitoring of pesticide exposure: comparison with blood and urine in a rat model.

Accumulation of Arsenic Speciation and In Vivo Toxicity Following Oral Administration of a Chinese Patent Medicine Xiao-Er-Zhi-Bao-Wan in Rats.

[Clinical analysis seven cases of acetochlor acute poisoning].

[A case report of acute severe paraquat poisoning clinical cure].

Herbicide injury induces DNA methylome alterations in *Arabidopsis*.

Deficiencies in mitochondrial dynamics sensitize *Caenorhabditis elegans* to arsenite and other mitochondrial toxicants by reducing mitochondrial adaptability.

Organic micropollutants (OMPs) oxidation by ozone: Effect of activated carbon on toxicity abatement.

Age and Chronicity of Administration Dramatically Influenced the Impact of Low Dose Paraquat Exposure on Behavior and Hypothalamic-Pituitary-Adrenal Activity.

The Association of Combined GSTM1 and CYP2C9 Genotype Status with the Occurrence of Hemorrhagic Cystitis in Pediatric Patients Receiving Myeloablative Conditioning Regimen Prior to Allogeneic Hematopoietic Stem Cell Transplantation.

Flavin-containing monooxygenases in aging and disease: Emerging roles for ancient enzymes.

Synergistic cellular effects including mitochondrial destabilization, autophagy and apoptosis following low-level exposure to a mixture of lipophilic persistent organic pollutants.

Protective effects of coenzyme Q10 and resveratrol on oxidative stress induced by various dioxins on transheterozygote larvae of *Drosophila melanogaster*.

Paraquat poisoning: Case report of a survivor.

Zinc and Copper Metabolism and Risk of Autism: a reply to Sayehmiri et al.

Further evidence for the association of CYP2D6*4 gene polymorphism with Parkinson's disease: a case control study.

Predictive values of urine paraquat concentration, dose of poison, arterial blood lactate and APACHE II score in the prognosis of patients with acute paraquat poisoning.

Imperatorin is Transported through Blood-Brain Barrier by Carrier-Mediated Transporters.

Mitochondrial activity and oxidative stress functions are influenced by the activation of AhR-induced CYP1A1 overexpression in cardiomyocytes.

Phenolic metabolism and molecular mass distribution of polysaccharides in cellulose-deficient maize cells.

Toxicological characterisation of two novel selective aryl hydrocarbon receptor modulators in Sprague-Dawley rats.

Dermal absorption of fumigant gases during HAZMAT incident exposure scenarios-Methyl bromide, sulfuryl fluoride, and chloropicrin.

Xenobiotic transporters and kidney injury.

A systematic review of the risks factors associated with the onset and natural progression of spina bifida.

Pharmacological manipulations of autophagy modulate paraquat-induced cytotoxicity in PC12 cells.

Effect of aspartic acid and glutamate on metabolism and acid stress resistance of *Acetobacter pasteurianus*.

Peroxyoxalate Chemiluminescent Reaction as a Tool for Elimination of Tumour Cells Under Oxidative Stress.

Pneumocystis Pneumonia Infection in a Survivor of Paraquat Intoxication.

Genistein Prevents BRCA1 CpG Methylation and Proliferation in Human Breast Cancer Cells with Activated Aromatic Hydrocarbon Receptor.

Time dependent transition of the levels of protein-conjugated acrolein (PC-Acro), IL-6 and CRP in plasma during stroke.

Single-cell time-lapse imaging of intracellular O_2 in response to metabolic inhibition and mitochondrial cytochrome-c release.

Histopathological changes in zebrafish embryos exposed to DLPCBs extract from Zhanjiang coastal sediment.

Toxic potential of organic constituents of submicron particulate matter (PM₁) in an urban road site (Barcelona).

Exposure to polycyclic aromatic hydrocarbons and volatile organic compounds among recently pregnant rural Guatemalan women cooking and heating with solid fuels.

Multiple AMPK activators inhibit l-carnitine uptake in C2C12 skeletal muscle myotubes.

Aryl hydrocarbon receptor upregulates IL-1 β expression in hCMEC/D3 human cerebral microvascular endothelial cells after TCDD exposure.

Expression of advanced glycation end-products and NF κ B in chick embryos exposed to dioxins and treated with acetylsalicylic acid and α -tocopherol.

Metabolic Investigations of the Molecular Mechanisms Associated with Parkinson's Disease.

[The clinical analytics of 5 patients with acute atrazine poisoning].

[The clinical analytics of 10 patients with acute glyphosate poisoning].

Oxidative injury caused by individual and combined exposure of neonicotinoid, organophosphate and herbicide in zebrafish.

Acute kidney injury from different poisonous substances.

Cerebellar Molecular and Cellular Characterization in Rat Models of Alzheimer's Disease: Neuroprotective Mechanisms of Garcinia Biflavonoid Complex.

Sodium meta-arsenite induced reactive oxygen species in human red blood cells: impaired antioxidant and membrane redox systems, haemoglobin oxidation, and morphological changes.

Somatic embryogenesis from bud and leaf explants of date palm (*Phoenix dactylifera* L.) cv. Najda.

Acute water quality criteria for polycyclic aromatic hydrocarbons, pesticides, plastic additives, and 4-Nonylphenol in seawater.

Metabolomics analysis of urine from rats administered with long-term, low-dose acrylamide by ultra-performance liquid chromatography-mass spectrometry.

Diet-induced obesity alters dural CGRP release and potentiates TRPA1-mediated trigeminovascular responses.

A multi-laboratory evaluation of microelectrode array-based measurements of neural network activity for acute neurotoxicity testing.

RyR2-Mediated Ca²⁺ Release and Mitochondrial ROS Generation Partake in the Synaptic Dysfunction Caused by Amyloid β Peptide Oligomers.

DNA damage by lipid peroxidation products: implications in cancer, inflammation and autoimmunity.

Protein-bound P-cresol inhibits human umbilical vein endothelial cell proliferation by inducing cell cycle arrest at G₀/G₁.

Human exposure and risk assessment to airborne pesticides in a rural French community.

Human exposure assessment of different arsenic species in household water sources in a high risk arsenic area.

Saving the injured: Rescue behavior in the termite-hunting ant *Megaponera analis*.

Mechanisms of Iron Uptake from Ferric Phosphate Nanoparticles in Human Intestinal Caco-2 Cells.

Comprehensive estimate of the theoretical maximum daily intake of pesticide residues for chronic dietary risk assessment in Argentina.

A rare case of epilepsy and acute pancreatitis induced by severe paraquat poisoning.

Spermatogenesis disruption by dioxins: Epigenetic reprogramming and windows of susceptibility.

Human and rodent aryl hydrocarbon receptor (AHR): from mediator of dioxin toxicity to physiologic AHR functions and therapeutic options.

Subchronic Arsenic Exposure Through Drinking Water Alters Lipid Profile and Electrolyte Status in Rats.

Environmentally Persistent Free Radicals Cause Apoptosis in HL-1 Cardiomyocytes.

Early-life chemical exposures and risk of metabolic syndrome.

Molecular pathways related to the longevity promotion and cognitive improvement of *Cistanche tubulosa* in *Drosophila*.

Carnosine Attenuates the Development of both Type 2 Diabetes and Diabetic Nephropathy in BTBR ob/ob Mice.

Suicide prevention through means restriction: Impact of the 2008-2011 pesticide restrictions on suicide in Sri Lanka.

Paraquat disrupts the anti-inflammatory action of cortisol in human macrophages in vitro: therapeutic implications for paraquat intoxications.

An experimental study of postmortem decomposition of methomyl in blood.

Toxic Epidermal Necrolysis and Acute Kidney Injury due to Glyphosate Ingestion.

Characterization of E-NTPDase (EC 3.6.1.5) activity in hepatic lymphocytes: A different activity profile from peripheral lymphocytes.

The toxic effects of chlorophenols and associated mechanisms in fish.

Aryl hydrocarbon receptor activation by 2,3,7,8-tetrachlorodibenzo-p-dioxin impairs human B lymphopoiesis.

Acute sensitivity of the vernal pool fairy shrimp, *Branchinecta lynchi* (Anostraca; Branchinectidae), and surrogate species to 10 chemicals.

SILAC-based quantitative proteomic analysis reveals widespread molecular alterations in human skin keratinocytes upon chronic arsenic exposure.

Development of Rapid and Economical Colorimetric Screening Method for p-Phenylenediamine in Variety of Biological Matrices and its Application to Eleven Fatal Cases of p-Phenylenediamine Poisoning.

Acute sensitivity of a broad range of freshwater mussels to chemicals with different modes of toxic action.

Biomarker Levels of Toxic Metals among Asian Populations in the United States: NHANES 2011-2012.

Molecular responses of genetically modified maize to abiotic stresses as determined through proteomic and metabolomic analyses.

Discernment scheme for paraquat poisoning: A five-year experience in Shiraz, Iran.

Pharmacodynamics of S-dimethylarsino-glutathione, a putative metabolic intermediate of inorganic arsenic, in mice.

Environmental Factors Impacting Bone-Relevant Chemokines.

Antioxidant effects of aqueous extract of Salep on Paraquat-induced rat liver injury.

Embryonic and Postnatal Expression of Aryl Hydrocarbon Receptor mRNA in Mouse Brain.

Lethal and sub-lethal effects of triclosan toxicity to the earthworm *Eisenia fetida* assessed through GC-MS metabolomics.

Quantitative Global Proteomics of Yeast PBP1 Deletion Mutants and Their Stress Responses Identifies Glucose Metabolism, Mitochondrial, and Stress Granule Changes.

Is chronic AhR activation by rapidly metabolized ligands safe for the treatment of immune-mediated diseases?

Golden Hours in Severe Paraquat Poisoning-The Role of Early Haemoperfusion Therapy.

Mumps caused by paraquat-induced poisoning: A case report.

Elevated Urinary Glyphosate and Clostridia Metabolites With Altered Dopamine Metabolism in Triplets With Autistic Spectrum Disorder or Suspected Seizure Disorder: A Case Study.

Development of a Facile and High-Throughput Bioluminescence Assay Using *Vibrio fischeri* to Determine the Chronic Toxicity of Contaminated Samples.

Non-dioxin-like organic toxicant PCB153 modulates sphingolipid metabolism in liver progenitor cells: its role in Cx43-formed gap junction impairment.

Epimedium Polysaccharide Alleviates Polyglutamine-Induced Neurotoxicity in *Caenorhabditis elegans* by Reducing Oxidative Stress.

[Two death cases of lung damage due to paraquat posion caused by skin contant].

Beta-Glucans Supplementation Associates with Reduction in P-Cresyl Sulfate Levels and Improved Endothelial Vascular Reactivity in Healthy Individuals.

Aryl hydrocarbon receptor (AhR)-dependent regulation of pulmonary miRNA by chronic cigarette smoke exposure.

Measuring Oxidative Stress in *Caenorhabditis elegans*: Paraquat and Juglone Sensitivity Assays.

Environmental Toxin Acrolein Alters Levels of Endogenous Lipids, Including TRP Agonists: A Potential Mechanism for Headache Driven by TRPA1 Activation.

Eryptosis - the Neglected Cause of Anemia in End Stage Renal Disease.

Effects of Chronic Exposure to Sodium Arsenite on Expressions of VEGF and VEGFR2 Proteins in the Epididymis of Rats.

Can a Biodegradable Implanted Bilayered Drug Delivery System Loaded with BMP-2/BMP-12 Take an Effective Role in the Biological Repair Process of Bone-Tendon Injuries? A Preliminary Report.

Sirtuin-2 Protects Neural Cells from Oxidative Stress and Is Elevated in Neurodegeneration.

Crosstalk between Aryl Hydrocarbon Receptor and Glucocorticoid Receptor in Human Retinal Pigment Epithelial Cells.

Benefits of Alcohol on Arsenic Toxicity in Rats.

The adjuvant use of calcium fructoborate and borax with etanercept in patients with rheumatoid arthritis: Pilot study.

Secondary Hemochromatosis due to Chronic Oral Iron Supplementation.

Intravenous injection of Xuebijing attenuates acute kidney injury in rats with paraquat intoxication.

Hepatoprotective and antioxidant effects of dietary Glycyrrhiza polysaccharide against TCDD-induced hepatic injury and RT-PCR quantification of AHR2, ARNT2, CYP1A mRNA in Jian Carp (*Cyprinus carpio* var. Jian).

Urinary 3-hydroxypropyl mercapturic acid (3-HPMA) concentrations in dogs with acute spinal cord injury due to intervertebral disc herniation.

Occupational exposure to pesticides, reproductive hormone levels and sperm quality in young Brazilian men.

Î±-Lipoic acid potentially targets AMP-activated protein kinase and energy production in the fetal brain to ameliorate dioxin-produced attenuation in fetal steroidogenesis.

Secondary metabolites of endophytic *Xylaria* species with potential applications in medicine and agriculture.

Correlation between brain damage, associated biomarkers, and medication in psychiatric inpatients: A cross-sectional study.

Interactive Influence of N6AMT1 and As3MT Genetic Variations on Arsenic Metabolism in the Population of Inner Mongolia, China.

From dioxin toxicity to putative physiologic functions of the human Ah receptor in homeostasis of stem/progenitor cells.

Effect of three safeners on sulfur assimilation and iron deficiency response in barley (*Hordeum vulgare*) plants.

Novel roles for AhR and ARNT in the regulation of alcohol dehydrogenases in human hepatic cells.

Influence of waterborne gallic and pelargonic acid exposures on biochemical and reproductive parameters in the zebrafish (*Danio rerio*).

Cytotoxicity study of benzo[a]pyrene on blood cells of Wistar rat in vitro.

[Dose-effect relationship between vitamin C and paraquat poisoning rats].

Histone deacetylase inhibitors mediate DNA damage repair in ameliorating hemorrhagic cystitis.

A novel mechanism underlies atrazine toxicity in quails (*Coturnix Coturnix coturnix*): triggering ionic disorder via disruption of ATPases.

The sublethal effects of (2,4-Dichlorophenoxy) acetic acid (2,4-D) on narrow-clawed crayfish (*Astacus leptodactylus* Eschscholtz, 1823).

Changing agricultural practices: potential consequences to aquatic organisms.

Curcumin inhibits paraquat induced lung inflammation and fibrosis by extracellular matrix modifications in mouse model.

Prenatal Paraquat exposure induces neurobehavioral and cognitive changes in mice offspring.

Establishment of an in vitro monolayer model of macular corneal dystrophy.

Effect of single and combination of three triazine metabolites at environmental concentrations on early life stages of common carp (*Cyprinus carpio* L.).

Individual and joint toxicity of the herbicide S-metolachlor and a metabolite, deethylatrazine on aquatic crustaceans: Difference between ecological groups.

Effect on the growth and development and induction of abnormalities by a glyphosate commercial formulation and its active ingredient during two developmental stages of the South-American Creole frog, *Leptodactylus latrans*.

Is the risk for soil arthropods covered by new data requirements under the EU PPP Regulation No. 1107/2009?

Carvedilol attenuates paraquat-induced lung injury by inhibition of proinflammatory cytokines, chemokine MCP-1, NF- κ B activation and oxidative stress mediators.

Continuous plasma perfusion of dual cartridges in series: rationale and early clinical experience.

Prognostic Factors in Emergency Department Patients with Glyphosate Surfactant Intoxication: Point-of-Care Lactate Testing.

Embryonic atrazine exposure alters zebrafish and human miRNAs associated with angiogenesis, cancer, and neurodevelopment.

Pyrrolidine dithiocarbamate attenuates paraquat-induced acute pulmonary poisoning in vivo via transforming growth factor β 1 and nuclear factor κ B pathway interaction.

Standardized *Bacopa monnieri* extract ameliorates acute paraquat-induced oxidative stress, and neurotoxicity in prepubertal mice brain.

Role of cytochrome c in α -synuclein radical formation: implications of α -synuclein in neuronal death in Maneb- and paraquat-induced model of Parkinson's disease.

[The effects of P-glycoprotein expression induced by ulinastatin on HK-2 cells damage induced by paraquat].

Medicinal herbs *Oenanthe javanica* (Blume) DC., *Casuarina equisetifolia* L. and *Sorghum bicolor* (L.) Moench protect human cells from MPP(+) damage via inducing FBXO7 expression.

Paraquat intoxication and associated pathological findings in three dogs in South Africa.

Effects of anti-androgens cyproterone acetate, linuron, vinclozolin, and p,p'-DDE on the reproductive organs of the copepod *Acartia tonsa*.

Prognostic value of hematological parameters in patients with paraquat poisoning.

Antioxidant and neuroprotective effects of *Dictyophora indusiata* polysaccharide in *Caenorhabditis elegans*.

[Anti-oxidantive effect of methylene blue on acute lung injury induced by paraquat in rat].

The transcription factor, Nuclear factor, erythroid 2 (Nfe2), is a regulator of the oxidative stress response during *Danio rerio* development.

Does age matter? Comparison of neurobehavioral effects of paraquat exposure on postnatal and adult C57BL/6 mice.

Influence of Three Citrus Herbicides on Potential Production of *Sorghum bicolor* 'Topper 76-6' as a Bioenergy Crop.

Identification of Homogentisate Dioxygenase as a Target for Vitamin E Biofortification in Oilseeds.

Distribution, quantification and toxicity of cinnamaldehyde in electronic cigarette refill fluids and aerosols.

Nephrotoxicity of Kalach 360 SL: biochemical and histopathological findings.

Methemoglobin measurements are underestimated by the Radical 7 co-oximeter: experience from a series of moderate to severe propanil poisonings.

Glufosinate aerogenic exposure induces glutamate and IL-1 receptor dependent lung inflammation.

Herbicides interfere with antigrazer defenses in *Scenedesmus obliquus*.

Mechanism of glyphosate control of *Phelipanche aegyptiaca*.

Rheumatoid Arthritis in Agricultural Health Study Spouses: Associations with Pesticides and Other Farm Exposures.

Glyphosate and aminomethylphosphonic acid chronic risk assessment for soil biota.

Toxic Epidemics: Agent Orange Sickness in Vietnam and the United States.

Inhibition of connective tissue growth factor attenuates paraquat-induced lung fibrosis in a human MRC-5 cell line.

Assessment of the Effects of MPTP and Paraquat on Dopaminergic Neurons and Microglia in the Substantia Nigra Pars Compacta of C57BL/6 Mice.

Developmental exposure to paraquat and maneb can impair cognition, learning and memory in Sprague-Dawley rats.

Salvianolic acid B protects against paraquat-induced pulmonary injury by mediating Nrf2/Nox4 redox balance and TGF- β 1/Smad3 signaling.

Effects of long-term endocrine disrupting compound exposure on *Macaca mulatta* embryonic stem cells.

Decrease in acrolein toxicity based on the decline of polyamine oxidases.

Behavioral responses of juvenile *Daphnia magna* after exposure to glyphosate and glyphosate-copper complexes.

Effects of dietary exposure to herbicide and of the nutritive quality of contaminated food on the reproductive output of *Daphnia magna*.

Glyphosate: environmental contamination, toxicity and potential risks to human health via food contamination.

Enhanced Ascorbate Regeneration Via Dehydroascorbate Reductase Confers Tolerance to Photo-Oxidative Stress in *Chlamydomonas reinhardtii*.

Fish Aversion and Attraction to Selected Agrichemicals.

Honey bee (*Apis mellifera*) drones survive oxidative stress due to increased tolerance instead of avoidance or repair of oxidative damage.

Influence of light, nutrients, and temperature on the toxicity of atrazine to the algal species *Raphidocelis subcapitata*: Implications for the risk assessment of herbicides.

Effects of terbuthylazine-desethyl, a terbuthylazine degradation product, on red swamp crayfish (*Procambarus clarkii*).

Organic honey supplementation reverses pesticide-induced genotoxicity by modulating DNA damage response.

Diindolylmethane and Lupeol Modulates Apoptosis and Cell Proliferation in N-Butyl-N-(4-Hydroxybutyl) Nitrosamine Initiated and Dimethylarsinic Acid Promoted rat Bladder Carcinogenesis.

Inhibition of Protein Ubiquitination by Paraquat and 1-Methyl-4-Phenylpyridinium Impairs Ubiquitin-Dependent Protein Degradation Pathways.

Glyphosate (Pesticides).

Acute Acrolein Exposure Induces Impairment of Vocal Fold Epithelial Barrier Function.

Inhibition of Excessive Oxidative Protein Folding Is Protective in MPP(+) Toxicity-Induced Parkinson's Disease Models.

Mechanism-specific injury biomarkers predict nephrotoxicity early following glyphosate surfactant herbicide (GPSH) poisoning.

Glyphosate induces cardiovascular toxicity in *Danio rerio*.

Embryonic Atrazine Exposure Elicits Alterations in Genes Associated with Neuroendocrine Function in Adult Male Zebrafish.

Evaluating long-term cellular effects of the arsenic species thio-DMA(V): qPCR-based gene expression as screening tool.

Gene expression profiles in testis of developing male *Xenopus laevis* damaged by chronic exposure of atrazine.

Genotoxic effect of a binary mixture of dicamba- and glyphosate-based commercial herbicide formulations on *Rhinella arenarum* (Hensel, 1867) (Anura, Bufonidae) late-stage larvae.

A *pqr2* mutant encodes a defective polyamine transporter and is negatively affected by ABA for paraquat resistance in *Arabidopsis thaliana*.

Inhibition of cathepsin B by caspase-3 inhibitors blocks programmed cell death in *Arabidopsis*.

The herbicide atrazine induces hyperactivity and compromises tadpole detection of predator chemical cues.

Evaluation of potential mechanisms of atrazine-induced reproductive impairment in fathead minnow (*Pimephales promelas*) and Japanese medaka (*Oryzias latipes*).

Effect of MDR1 gene polymorphisms on mortality in paraquat intoxicated patients.

Toll-like receptor 4 knockout alleviates paraquat-induced cardiomyocyte contractile dysfunction through an autophagy-dependent mechanism.

Atrazine activates multiple signaling pathways enhancing the rapid hCG-induced androgenesis in rat Leydig cells.

NMDA-Receptors Are Involved in Cu^{2+} /Paraquat-Induced Death of Cultured Cerebellar Granule Neurons.

Peace and Reconciliation.

Role of adipokinetic hormone and adenosine in the anti-stress response in *Drosophila melanogaster*.

Atrazine exposure affects longevity, development time and body size in *Drosophila melanogaster*.

Poly-ADP-ribose polymerase inhibition provides protection against lung injury in a rat paraquat toxicity model.

Assessment of oxidative stress responses and the cytotoxic and genotoxic potential of the herbicide tembotrione in HepG2 cells.

The Protective Role of Thiourea on *Leuciscus cephalus* Exposed to Sublethal Doses of Pendigan 330EC (Pendimethalin) Herbicide.

A bedside test for methaemoglobinemia improved antidote use in propanil poisoning.

Synergistic stress exacerbation in hippocampal neurons: Evidence favoring the dual-hit hypothesis of neurodegeneration.

Potential subchronic food safety of the stacked trait transgenic maize GH5112E-117C in Sprague-Dawley rats.

Determination of glyphosate and its metabolite in emergency room in Korea.

Atrazine induces endoplasmic reticulum stress-mediated apoptosis of T lymphocytes via the caspase-8-dependent pathway.

[Clinical effect of compound monoammonium glycyrrhizinate combined with dandelion in treatment of acute paraquat poisoning].

[Risk factors for pulmonary fibrosis in patients with paraquat poisoning].

[An analysis of the clinical and epidemiological characteristics of acute poisoning patients in a general hospital].

Identification of apoptosis and macrophage migration events in paraquat-induced oxidative stress using a zebrafish model.

Paraquat tongue.

Thymoquinone effectively alleviates lung fibrosis induced by paraquat herbicide through down-regulation of pro-fibrotic genes and inhibition of oxidative stress.

Oxidative stress responses in gills of goldfish, *Carassius auratus*, exposed to the metribuzin-containing herbicide Sencor.

Protective effect of *Berberis vulgaris* fruit extract against Paraquat-induced pulmonary fibrosis in rats.

Adiponectin ameliorates the apoptotic effects of paraquat on alveolar type II cells via improvements in mitochondrial function.

Prognosis and survival analysis of paraquat poisoned patients based on improved HPLC-UV method.

L-Phosphinothricin modulation of inwardly rectifying K(+) channels increased excitability in striatal medium-sized spiny neurons.

The combined influence of two agricultural contaminants on natural communities of phytoplankton and zooplankton.

Multiple effects of a commercial Roundup® formulation on the soil filamentous fungus *Aspergillus nidulans* at low doses: evidence of an unexpected impact on energetic metabolism.

Individual and combined toxic effects of herbicide atrazine and three insecticides on the earthworm, *Eisenia fetida*.

Nucleotide excision repair deficiency increases levels of acrolein-derived cyclic DNA adduct and sensitizes cells to apoptosis induced by docosahexaenoic acid and acrolein.

Reproductive and developmental toxicity of the herbicide Betanal[®] Expert and corresponding active ingredients to *Daphnia* spp.

Protection against MPP(+)-induced neurotoxicity in SH-SY5Y cells by tormentic acid via the activation of PI3-K/Akt/GSK3^β pathway.

Glyphosate-based herbicide exposure causes antioxidant defence responses in the fruit fly *Drosophila melanogaster*.

Evaluation of the effect of 2,4-dichlorophenol on oxidative parameters and viability of human blood mononuclear cells (in vitro).

Unilateral microinjection of acrolein into thoracic spinal cord produces acute and chronic injury and functional deficits.

In vitro neurotoxic hazard characterisation of dinitrophenolic herbicides.

Glyphosate and adverse pregnancy outcomes, a systematic review of observational studies.

HIGH PREVALENCE OF AGENT ORANGE EXPOSURE AMONG THYROID CANCER PATIENTS IN THE NATIONAL VA HEALTHCARE SYSTEM.

Agricultural Compounds in Water and Birth Defects.

Proposed Mode of Action for Acrolein Respiratory Toxicity Associated with Inhaled Tobacco Smoke.

Toxic and genotoxic effects of the 2,4-dichlorophenoxyacetic acid (2,4-D)-based herbicide on the Neotropical fish *Cnesterodon decemmaculatus*.

Joint acute toxicity of the herbicide butachlor and three insecticides to the terrestrial earthworm, *Eisenia fetida*.

Imazapyr+imazapic herbicide determines acute toxicity in silver catfish *Rhamdia quelen*.

Effects of diuron and carbofuran pesticides in their pure and commercial forms on *Paramecium caudatum*: The use of protozoan in ecotoxicology.

A subchronic feeding study of dicamba-tolerant soybean with the dmo gene in Sprague-Dawley rats.

Impacts of 2,4-dichlorophenoxyacetic acid aquatic herbicide formulations on reproduction and development of the fathead minnow (*Pimephales promelas*).

The role of ions, heavy metals, fluoride, and agrochemicals: critical evaluation of potential aetiological factors of chronic kidney disease of multifactorial origin (CKDmfo/CKDu) and recommendations for its eradication.

Antioxidant enzymes activity, lipid peroxidation, oxidative damage in the testis and epididymis, and steroidogenesis in rats after co-exposure to atrazine and ethanol.

Social stress increases the susceptibility to infection in the ant *Harpegnathos saltator*.

Characterization of seizures induced by acute exposure to an organophosphate herbicide, glufosinate-ammonium.

Exposure of *C. elegans* eggs to a glyphosate-containing herbicide leads to abnormal neuronal morphology.

Atrazine promotes RM1 prostate cancer cell proliferation by activating STAT3 signaling.

The metabolite 3,4,3',4'-tetrachloroazobenzene (TCAB) exerts a higher ecotoxicity than the parent compounds 3,4-dichloroaniline (3,4-DCA) and propanil.

Acute and short-term developmental toxicity of cyhalofop-butyl to zebrafish (*Danio rerio*).

Multifactorial theory applied to the neurotoxicity of paraquat and paraquat-induced mechanisms of developing Parkinson's disease.

Biological responses of wheat (*Triticum aestivum*) plants to the herbicide simetryne in soils.

Urm1: an essential regulator of JNK signaling and oxidative stress in *Drosophila melanogaster*.

Palmoplantar keratoses and Bowen's disease in a Vietnam veteran: Could Agent Blue be implicated?

Serial ammonia measurement in patients poisoned with glufosinate ammonium herbicide.

Paraquat Induces Cell Death Through Impairing Mitochondrial Membrane Permeability.

The chemopreventive potential of lycopene against atrazine-induced cardiotoxicity: modulation of ionic homeostasis.

Superoxide Dismutase (SOD)-mimetic M40403 Is Protective in Cell and Fly Models of Paraquat Toxicity: IMPLICATIONS FOR PARKINSON DISEASE.

Hyperamylasemia as an Early Predictor of Mortality in Patients with Acute Paraquat Poisoning.

Health Care for Certain Children of Vietnam Veterans and Certain Korea Veterans--Covered Birth Defects and Spina Bifida. Final rule.

Intravenous lipid emulsion in treatment of cardiocirculatory disturbances caused by glyphosate-surfactant herbicide poisoning.

Acute paraquat exposure determines dose-dependent oxidative injury of multiple organs and metabolic dysfunction in rats: impact on exercise tolerance.

Advances in the mechanism of paraquat-induced pulmonary injury.

Occupational Exposure to Pesticides With Occupational Sun Exposure Increases the Risk for Cutaneous Melanoma.

Paraquat Poisoning in Patients With HIV Infection: A Case Report and Literature Review.

Activating Peroxisome Proliferator-Activated Receptors (PPARs): a New Sight for Chrysophanol to Treat Paraquat-Induced Lung Injury.

Hepatic effects of the clomazone herbicide in both its free form and associated with chitosan-alginate nanoparticles in bullfrog tadpoles.

Protective Effects of Apigenin Against Paraquat-Induced Acute Lung Injury in Mice.

Lycopene protects against atrazine-induced hepatotoxicity through modifications of cytochrome P450 enzyme system in microsomes.

Magnitude and characteristics of acute paraquat- and diquat-related illnesses in the US: 1998-2013.

Atrazine and malathion shorten the maturation process of *Xenopus laevis* oocytes and have an adverse effect on early embryo development.

Impact of paraquat regulation on suicide in South Korea.

Exposure to different glyphosate formulations on the oxidative and histological status of *Rhombia quelen*.

External validation of the prognostic index in acute paraquat poisoning.

Unfractionated bone marrow cells attenuate paraquat-induced glomerular injury and acute renal failure by modulating the inflammatory response.

Atrazine exposure causes mitochondrial toxicity in liver and muscle cell lines.

Combined Effects of Pesticides and Trematode Infections on Hourglass Tree Frog *Polypedates cruciger*.

Environmental factors in the development of autism spectrum disorders.

Survival, Reproduction, Avoidance Behavior and Oxidative Stress Biomarkers in the Earthworm *Oecolasion cyaneum* Exposed to Glyphosate.

Dietary administration of diquat for 13 weeks does not result in a loss of dopaminergic neurons in the substantia nigra of C57BL/6J mice.

Exposure to a glyphosate-based herbicide during pregnancy and lactation induces neurobehavioral alterations in rat offspring.

Melatonin inhibits paraquat-induced cell death in bovine preimplantation embryos.

Acute and long-term ocular effects of acrolein vapor on the eyes and potential therapies.

Adverse Outcomes Associated with Cigarette Smoke Radicals Related to Damage to Protein-disulfide Isomerase.

Concerns over use of glyphosate-based herbicides and risks associated with exposures: a consensus statement.

To explore the characteristics of fatality in children poisoned by paraquat--with analysis of 146 cases.

Quantitative Evaluation of Changes in the Striatal Astrocyte Axons in Simulated Parkinsonism.

Mechanism of Developmental Effects in Rats Caused by an N-Phenylimide Herbicide: Transient Fetal Anemia and Sequelae during Mid-to-Late Gestation.

Acute paraquat exposure impairs colonic motility by selectively attenuating nitrergic signalling in the mouse.

Survival and Growth of Freshwater Pulmonate and Nonpulmonate Snails in 28-Day Exposures to Copper, Ammonia, and Pentachlorophenol.

Changes in the metabolome of rats after exposure to arginine and N-carbamylglutamate in combination with diquat, a compound that causes oxidative stress, assessed by ¹H NMR spectroscopy.

Constitutive active/androstane receptor, peroxisome proliferator-activated receptor α , and cytotoxicity are involved in oxadiazon-induced liver tumor development in mice.

Perturbations in polar lipids, starvation survival and reproduction following exposure to unsaturated fatty acids or environmental toxicants in *Daphnia magna*.

Acrolein-mediated conduction loss is partially restored by K^+ channel blockers.

Dioxins and cytogenetic status of villagers after 40 years of agent Orange application in Vietnam.

Acute Atrazine Exposure has Lasting Effects on Chemosensory Responses to Food Odors in Crayfish (*Orconectes virilis*).

Common and distinct mechanisms of induced pulmonary fibrosis by particulate and soluble chemical fibrogenic agents.

Using species sensitivity distribution approach to assess the risks of commonly detected agricultural pesticides to Australia's tropical freshwater ecosystems.

Transcriptional profiles of glutathione-S-Transferase isoforms, Cyp, and AOE genes in atrazine-exposed zebrafish embryos.

Toxicity of AMPA to the earthworm *Eisenia andrei* Bouché, 1972 in tropical artificial soil.

Chronic Exposure to Diquat Causes Reproductive Toxicity in Female Mice.

Radix puerariae extracts ameliorate paraquat-induced pulmonary fibrosis by attenuating follistatin-like 1 and nuclear factor erythroid 2p45-related factor-2 signalling pathways through downregulation of miRNA-21 expression.

The tobacco smoke component acrolein induces glucocorticoid resistant gene expression via inhibition of histone deacetylase.

Concurrent Hemoperfusion and Hemodialysis in Patients with Acute Pesticide Intoxication.

The characteristics of emergency department presentations related to acute herbicide or insecticide poisoning in South Korea between 2011 and 2014.

Carbonyl Compounds in the Gas Phase of Cigarette Mainstream Smoke and Their Pharmacological Properties.

Early Stage Blood Purification for Paraquat Poisoning: A Multicenter Retrospective Study.

Neurology in the Vietnam War.

Systematic review and meta-analysis of glyphosate exposure and risk of lymphohematopoietic cancers.

[The protective effect of bone marrow mesenchymal stem cells carrying antioxidant gene superoxide dismutase on paraquat lung injury in mice].

Bioactive Peptides from *Angelica sinensis* Protein Hydrolyzate Delay Senescence in *Caenorhabditis elegans* through Antioxidant Activities.

Anthocyanins Protect SK-N-SH Cells Against Acrolein-Induced Toxicity by Preserving the Cellular Redox State.

KLF2 and caveolin-1 as early indicators of acute lung injury induced by paraquat.

Effects of high doses of dexamethasone on hemodynamic and immunohistochemical characteristics of acute paraquat intoxication in rat kidneys.

Low-Dose *Aronia melanocarpa* Concentrate Attenuates Paraquat-Induced Neurotoxicity.

Diquat associated with copper sources for algae control: Efficacy and ecotoxicology.

Evidence of neuroprotective effects of saffron and crocin in a *Drosophila* model of parkinsonism.

A multicenter retrospective survey of poisoning after ingestion of herbicides containing glyphosate potassium salt or other glyphosate salts in Japan.

Neuronal development and axon growth are altered by glyphosate through a WNT non-canonical signaling pathway.

Paraquat induce pulmonary epithelial-mesenchymal transition through transforming growth factor- β 1-dependent mechanism.

A long-term assessment of pesticide mixture effects on aquatic invertebrate communities.

Lycopene protects against atrazine-induced hepatic ionic homeostasis disturbance by modulating ion-transporting ATPases.

Successful Extracorporeal Life Support in a Case of Severe Glyphosate-Surfactant Intoxication.

Effects of Neonicotinoids on Promoter-Specific Expression and Activity of Aromatase (CYP19) in Human Adrenocortical Carcinoma (H295R) and Primary Umbilical Vein Endothelial (HUVEC) Cells.

Metabolic changes in rat urine after acute paraquat poisoning and discriminated by support vector machine.

Suspected poisoning of domestic animals by pesticides.

Effects of the terbuthylazine metabolite terbuthylazine-desethyl on common carp embryos and larvae.

Tumor necrosis factor- α induced protein 6 attenuates acute lung injury following paraquat exposure.

Skin diseases associated with Agent Orange and other organochlorine exposures.

Effects of the herbicide dicamba on nontarget plants and pollinator visitation.

Pesticide use and risk of end-stage renal disease among licensed pesticide applicators in the Agricultural Health Study.

Chloroquine rescues A549 cells from paraquat-induced death.

Association between arsenic exposure and thyroid function: data from NHANES 2007-2010.

Amphibian (*Euphylyctis cyanophlyctis*) in vitro ovarian culture system to assess impact of aquatic agrochemical contaminants on female reproduction.

Metabolomic Analysis Provides Insights on Paraquat-Induced Parkinson-Like Symptoms in *Drosophila melanogaster*.

Comparative toxicity of Paraquat herbicide and some plant extracts in *Lymnaea natalensis* snails.

The effects of resveratrol against trifluralin toxicity in the urinary tract of rats.

Acrolein preferentially damages nucleolus eliciting ribosomal stress and apoptosis in human cancer cells.

Yap1 and Skn7 genetically interact with Rad51 in response to oxidative stress and DNA double-strand break in *Saccharomyces cerevisiae*.

Cinnamaldehyde ameliorates LPS-induced cardiac dysfunction via TLR4-NOX4 pathway: The regulation of autophagy and ROS production.

Cinnamaldehyde, Carvacrol and Organic Acids Affect Gene Expression of Selected Oxidative Stress and Inflammation Markers in IPEC-J2 Cells Exposed to *Salmonella typhimurium*.

Transient receptor potential ankyrin 1 agonists improve intestinal transit in a murine model of postoperative ileus.

Novel broad-spectrum and long-acting parenteral cephalosporins having an acyl cyanamide moiety at the C-3 terminal: Synthesis and structure-activity relationships.

Cx43 Mediates Resistance against MPP⁺-Induced Apoptosis in SH-SY5Y Neuroblastoma Cells via Modulating the Mitochondrial Apoptosis Pathway.

Uremic toxins: some thoughts on acrolein and spermine.

Trans-cinnamaldehyde improves memory impairment by blocking microglial activation through the destabilization of iNOS mRNA in mice challenged with lipopolysaccharide.

Role of phytochemicals in the management of metabolic syndrome.

TRPV1 dysfunction in cystinosis patients harboring the homozygous 57â€%kb deletion.

A neoflavonoid dalsissoal isolated from heartwood of *Dalbergia sissoo* Roxb. has bone forming effects in mice model for osteoporosis.

Evaluation of Commercial Agrochemicals as New Tools for Malaria Vector Control.

Trans-cinnamaldehyde protected PC12 cells against oxygen and glucose deprivation/reperfusion (OGD/R)-induced injury via anti-apoptosis and anti-oxidative stress.

Response to: Neurotoxicity of paraquat and paraquat-induced Parkinson's disease.

Neurotoxicity of paraquat and paraquat-induced mechanisms of developing Parkinson's disease.

Exploring the Transition of Human α -Synuclein from Native to the Fibrillar State: Insights into the Pathogenesis of Parkinson's Disease.

Cinnamaldehyde derivatives inhibit degranulation and inflammatory mediator production in rat basophilic leukemia cells.

Trans-Cinnamaldehyde, An Essential Oil in Cinnamon Powder, Ameliorates Cerebral Ischemia-Induced Brain Injury via Inhibition of Neuroinflammation Through Attenuation of iNOS, COX-2 Expression and NF- κ -B Signaling Pathway.

Selective inhibition of JAK2/STAT1 signaling and iNOS expression mediates the anti-inflammatory effects of coniferyl aldehyde.

Reversal of diabetes-induced behavioral and neurochemical deficits by cinnamaldehyde.

Derivatization Strategy for the Comprehensive Characterization of Endogenous Fatty Aldehydes Using HPLC-Multiple Reaction Monitoring.

Albumin Cys34 adducted by acrolein as a marker of oxidative stress in ischemia-reperfusion injury during hepatectomy.

Membrane lipid peroxidation in neurodegeneration: Role of thrombin and proteinase-activated receptor-1.

Simultaneous Determination and Quantitation of Paraquat, Diquat, Glufosinate and Glyphosate in Postmortem Blood and Urine by LC-MS-MS.

Acrolein metabolites, diabetes and insulin resistance.

Integrated long non-coding RNA analyses identify novel regulators of epithelial-mesenchymal transition in the mouse model of pulmonary fibrosis.

Cardiac-Specific Knockout of ETA Receptor Mitigates Paraquat-Induced Cardiac Contractile Dysfunction.

Formation and Implications of Alpha-Synuclein Radical in Maneb- and Paraquat-Induced Models of Parkinson's Disease.

Cinnamaldehyde and allopurinol reduce fructose-induced cardiac inflammation and fibrosis by attenuating CD36-mediated TLR4/6-IRAK4/1 signaling to suppress NLRP3 inflammasome activation.

A carnosine intervention study in overweight human volunteers: bioavailability and reactive carbonyl species sequestering effect.

Histidine biosynthesis plays a crucial role in metal homeostasis and virulence of *Aspergillus fumigatus*.

Cinnamaldehyde is an effective anti-inflammatory agent for treatment of allergic rhinitis in a rat model.

Cinnamaldehyde modulates LPS-induced systemic inflammatory response syndrome through TRPA1-dependent and independent mechanisms.

Oxidative Stress Triggers Body-Wide Skipping of Multiple Exons of the Spinal Muscular Atrophy Gene.

Inhibition of para-Hydroxyphenylpyruvate Dioxygenase by Analogues of the Herbicide Nitisinone As a Strategy to Decrease Homogentisic Acid Levels, the Causative Agent of Alkaptonuria.

SIRT1 exerts protective effects against paraquat-induced injury in mouse type II alveolar epithelial cells by deacetylating NRF2 in vitro.

HIF-1 α regulates EMT via the Snail and β -catenin pathways in paraquat poisoning-induced early pulmonary fibrosis.

Atrazine reduces the transmission of an amphibian trematode by altering snail and ostracod host-parasite interactions.

3-Aminotriazole protects from CoCl₂-induced ototoxicity by inhibiting the generation of reactive oxygen species and proinflammatory cytokines in mice.

Impact of 3-Amino-1,2,4-Triazole (3-AT)-Derived Increase in Hydrogen Peroxide Levels on Inflammation and Metabolism in Human Differentiated Adipocytes.

[The effect of antioxidants on in vivo and in vitro methemoglobin formation in erythrocytes of patients with Parkinson's disease].

Parkinson-Related LRRK2 Mutation R1628P Enables Cdk5 Phosphorylation of LRRK2 and Upregulates Its Kinase Activity.

Perfluorocarbon attenuates inflammatory cytokines, oxidative stress and histopathologic changes in paraquat-induced acute lung injury in rats.

Calcium carbonate hydrogel construct with cinnamaldehyde incorporated to control inflammation during surgical procedure.

Structural and biochemical abnormalities in the absence of acute deficits in mild primary blast-induced head trauma.

Diet-induced and mono-genetic obesity alter volatile organic compound signature in mice.

Resveratrol protects mice from paraquat-induced lung injury: The important role of SIRT1 and NRF2 antioxidant pathways.

A low toxicity synthetic cinnamaldehyde derivative ameliorates renal inflammation in mice by inhibiting NLRP3 inflammasome and its related signaling pathways.

Exceptions in patterns of arsenic compounds in urine of acute promyelocytic leukaemia patients treated with As₂O₃.

Protective Effect of Astragaloside IV Against Paraquat-Induced Lung Injury in Mice by Suppressing Rho Signaling.

Novel Role of Endogenous Catalase in Macrophage Polarization in Adipose Tissue.

Recent Progress in Analytical Methods for Determination of Urinary 3-Hydroxypropylmercapturic Acid, a Major Metabolite of Acrolein.

[The effect of resveratrol on paraquat-induced acute lung injury in mice and its mechanism].

Toxic acrolein production due to Ca²⁺ influx by the NMDA receptor during stroke.

Mutant characterization and in vivo conditional repression identify aromatic amino acid biosynthesis to be essential for *Aspergillus fumigatus* virulence.

Influence of Temperature on the Thyroidogenic Effects of Diuron and Its Metabolite 3,4-DCA in Tadpoles of the American Bullfrog (*Lithobates catesbeianus*).

Response to the Letter to the Editor: "Mitochondria isolated from the striatum of the brain exhibit a higher degree of oxidative phosphorylation coupling, which shows that they are not subject to energetic dysfunction upon acute paraquat administration".

Mitochondria isolated from the striatum brain of acute paraquat treated rats exhibit a higher degree of oxidative phosphorylation coupling, which shows that they are not subject to energetic dysfunction upon acute paraquat administration.

Polymorphic variants of MRP4/ABCC4 differentially modulate the transport of methylated arsenic metabolites and physiological organic anions.

Chyawanprash, a formulation of traditional Ayurvedic medicine, shows a protective effect on skin photoaging in hairless mice.

Acrolein and thiol-reactive electrophiles suppress allergen-induced innate airway epithelial responses by inhibition of DUOX1 and EGFR.

Sex differences in the reduction of arsenic methylation capacity as a function of urinary total and inorganic arsenic in Mexican children.

Effects of Food Components That Activate TRPA1 Receptors on Mucosal Ion Transport in the Mouse Intestine.

Impacts of Acute Exposure of Industrial Chemicals and of Fish (Tilapia Guineensis) Pesticides on The Survival of Fish (Tilapia Guineensis) and Earthworms and Earthworms.

RNA Interference Directed against the Transglutaminase Gene Triggers Dysbiosis of Gut Microbiota in Drosophila.

New perspectives for multi-level regulations of neuronal acetylcholinesterase by dioxins.

Differences in the clinical manifestations and short-term prognosis of acute cerebral infarction after exposure to Agent Orange.

Association of Aryl Hydrocarbon Receptor-Related Gene Variants with the Severity of Autism Spectrum Disorders.

Activation of Nrf2-ARE signaling mitigates cyclophosphamide-induced myelosuppression.

Melatonin Application to *Pisum sativum* L. Seeds Positively Influences the Function of the Photosynthetic Apparatus in Growing Seedlings during Paraquat-Induced Oxidative Stress.

Global metabolic changes induced by plant-derived pyrrolizidine alkaloids following a human poisoning outbreak and in a mouse model.

Protective Effects of Essential Oils as Natural Antioxidants against Hepatotoxicity Induced by Cyclophosphamide in Mice.

Relative effect potency estimates of dioxin-like activity for dioxins, furans, and dioxin-like PCBs in adults based on cytochrome P450 1A1 and 1B1 gene expression in blood.

Dietary micronutrient intake and its relationship with arsenic metabolism in Mexican women.

TRIB3 increases cell resistance to arsenite toxicity by limiting the expression of the glutathione-degrading enzyme CHAC1.

Dietary Omega-3 Polyunsaturated Fatty Acids Prevent Vascular Dysfunction and Attenuate Cytochrome P4501A1 Expression by 2,3,7,8-Tetrachlorodibenzo-P-Dioxin.

Salicylic acid mediates antioxidant defense system and ABA pathway related gene expression in *Oryza sativa* against quinclorac toxicity.

In situ embryo rescue for generation of wide intra- and interspecific hybrids of *Panicum virgatum* L.

Kt/Vurea and Nonurea Small Solute Levels in the Hemodialysis Study.

2,3,7,8-tetrachlorodibenzo-p-dioxin exposure influence the expression of glutamate transporter GLT-1 in C6 glioma cells via the Ca²⁺ /protein kinase C pathway.

Comparative risk assessment of tobacco smoke constituents using the margin of exposure approach: the neglected contribution of nicotine.

Dialysis catheter-related pulmonary embolism in a patient with paraquat intoxication.

1,5-Diazacyclooctanes, as Exclusive Oxidative Polyamine Metabolites, Inhibit Amyloid- β (1-40) Fibrillization.

Endophytic *Trichoderma gamsii* YIM PH30019: a promising biocontrol agent with hyperosmolar, mycoparasitism, and antagonistic activities of induced volatile organic compounds on root-rot pathogenic fungi of *Panax notoginseng*.

Histological and Transcriptomic Changes in Male Zebrafish Testes Due to Early Life Exposure to Low Level 2,3,7,8-Tetrachlorodibenzo-p-Dioxin.

Tumor necrosis factor receptor-associated protein 1 improves hypoxia-impaired energy production in cardiomyocytes through increasing activity of cytochrome c oxidase subunit II.

Developmental Toxicant Exposure Is Associated with Transgenerational Adenomyosis in a Murine Model.

Formyl peptide receptor modulators: a patent review and potential applications for inflammatory diseases (2012-2015).

Cigarette smoking behaviour and blood metabolomics.

[Recent advance of cytokines in the pathogenesis of lung injury induced by paraquat poisoning].

[Two cases of acute poisoning of paraquat with dursban and paraquat with bromadiolone].

[Effects of chronic exposure to monochloroacetic acid on the lung function and lymphocyte subsets in occupational exposed workers].

Integrating Monitoring and Genetic Methods To Infer Historical Risks of PCBs and DDE to Common and Roseate Terns Nesting Near the New Bedford Harbor Superfund Site (Massachusetts, USA).

Diminished Phosphorylation of CREB Is a Key Event in the Dysregulation of Gluconeogenesis and Glycogenolysis in PCB126 Hepatotoxicity.

Activating Transcription Factor 4 (ATF4)-ATF3-C/EBP Homologous Protein (CHOP) Cascade Shows an Essential Role in the ER Stress-Induced Sensitization of Tetrachlorobenzoquinone-Challenged PC12 Cells to ROS-Mediated Apoptosis via Death Receptor 5 (DR5) Signaling.

Cyclophilin D Is Involved in the Regulation of Autophagy and Affects the Lifespan of *P. anserina* in Response to Mitochondrial Oxidative Stress.

Vam3, a Compound Derived from *Vitis amurensis* Rupr., Attenuated Colitis-Related Tumorigenesis by Inhibiting NF- κ B Signaling Pathway.

Is Parkinson's Disease with History of Agent Orange Exposure Different from Idiopathic Parkinson's Disease?

A simple standard technique for labyrinthectomy in the rat: A methodical communication with a detailed description of the surgical process.

Acrolein, a New Villain in the Development of Alcoholic Liver Disease.

Acrolein Is a Pathogenic Mediator of Alcoholic Liver Disease and the Scavenger Hydralazine Is Protective in Mice.

Preparation and Bioavailability Analysis of Ferrous Bis Alanine Chelate as a New Micronutrient for Treatment of Iron Deficiency Anemia.

Diabetes Impairs the Aldehyde Detoxifying Capacity of the Retina.

Impact of co-exposure with butachlor and triadimefon on thyroid endocrine system in larval zebrafish.

Arsenite suppresses angiogenesis of vascular endothelial cells mediated by Platelet Derived Growth Factor Receptor-beta.

Risk Factors for Herpes Zoster Among Adults.

Signaling mechanisms underlying the glioprotective effects of resveratrol against mitochondrial dysfunction.

Data on AHR-dependent changes in the mitochondrial proteome in response to ,3,7,8-tetrachlorodibenzo-p-dioxin.

Molecular impacts of perfluorinated chemicals (PFASs) in the liver and testis of male largemouth bass (*Micropterus salmoides*) in Minnesota Lakes.

Plasma metabolomics study on toxicity biomarker in rats treated with *Euphorbia fischeriana* based on LC-MS.

Aryl hydrocarbon receptor-ligand axis mediates pulmonary fibroblast migration and differentiation through increased arachidonic acid metabolism.

Molecular Hydrogen Alleviates Cellular Senescence in Endothelial Cells.

Arsenic-induced mitochondrial oxidative damage is mediated by decreased PGC-1 β expression and its downstream targets in rat brain.

Tyrosine Detoxification Is an Essential Trait in the Life History of Blood-Feeding Arthropods.

[Effect of chronic arsenic exposure on mouse brain tissue and serum metabolomics].

Nrf2-dependent protection against acute sodium arsenite toxicity in zebrafish.

Perinatal Exposure to Glufosinate Ammonium Herbicide Impairs Neurogenesis and Neuroblast Migration through Cytoskeleton Destabilization.

Acute kidney injury in patients with paraquat intoxication; a case report and review of the literature.

Association between polymorphisms in arsenic metabolism genes and urinary arsenic methylation profiles in girls and boys chronically exposed to arsenic.

Identification of aryl hydrocarbon receptor signaling pathways altered in TCDD-treated red seabream embryos by transcriptome analysis.

Prophylactic neuroprotective efficiency of co-administration of *Ginkgo biloba* and *Trifolium pretense* against sodium arsenite-induced neurotoxicity and dementia in different regions of brain and spinal cord of rats.

Ablation of the mitochondrial complex IV assembly protein Surf1 leads to increased expression of the UPR(MT) and increased resistance to oxidative stress in primary cultures of fibroblasts.

Mitochondrial-targeted aryl hydrocarbon receptor and the impact of 2,3,7,8-tetrachlorodibenzo-p-dioxin on cellular respiration and the mitochondrial proteome.

Acute Copper and Ascorbic Acid Supplementation Inhibits Non-heme Iron Absorption in Humans.

Oxidative DNA damage enhances the carcinogenic potential of in vitro chronic arsenic exposures.

In vitro activation of dibromoacetonitrile to cyanide by myeloperoxidase.

Embryotoxicity of nitrophenols to the early life stages of zebrafish (*Danio rerio*).

Joint toxic effects of the type-2 alkene electrophiles.

Hepatic Aryl Hydrocarbon Receptor Attenuates Fibroblast Growth Factor 21 Expression.

Metabolic Pathway Involved in 6-Chloro-2-Benzoxazolinone Degradation by *Pigmentiphaga* sp. Strain DL-8 and Identification of the Novel Metal-Dependent Hydrolase CbaA.

The effect of natural organic matter on bioaccumulation and toxicity of chlorobenzenes to green algae.

Multi-tissue metabolic responses of goldfish (*Carassius auratus*) exposed to glyphosate-based herbicide.

Toxic effects of glyphosate-based herbicide, Excel Mera 71 on gill, liver, and kidney of *Heteropneustes fossilis* under laboratory and field conditions.

Alteration of human hepatic drug transporter activity and expression by cigarette smoke condensate.

[The effect and injury to the airways of different sputum aspiration pressure in a rat model of mucus hypersecretion].

Chemopreventive Agents Attenuate Rapid Inhibition of Gap Junctional Intercellular Communication Induced by Environmental Toxicants.

Chronic dietary exposure to pesticide residues and associated risk in the French ELFE cohort of pregnant women.

Monohaloacetic acid drinking water disinfection by-products inhibit follicle growth and steroidogenesis in mouse ovarian antral follicles in vitro.

Effect of retinyl acetate on transglutaminase 2 activity in carcinogen treated rat liver.

Organic micropollutants (OMPs) in natural waters: Oxidation by UV/H₂O₂ treatment and toxicity assessment.

Mitigation of sensory and motor deficits by acrolein scavenger phenelzine in a rat model of spinal cord contusive injury.

Multivariate approach to gill pathology in European sea bass after experimental exposure to cadmium and terbuthylazine.

Conformation of ryanodine receptor-2 gates store-operated calcium entry in rat pulmonary arterial myocytes.

Transgenic Overexpression of Aryl Hydrocarbon Receptor Repressor (AhRR) and AhR-Mediated Induction of CYP1A1, Cytokines, and Acute Toxicity.

Arsenic Exposure Induces Unscheduled Mitotic S Phase Entry Coupled with Cell Death in Mouse Cortical Astrocytes.

A double-blind, randomized, and active-controlled phase III study of Herbiron drink in the treatment of iron-deficiency anemia in premenopausal females in Taiwan.

Development of a mediated whole cell-based electrochemical biosensor for joint toxicity assessment of multi-pollutants using a mixed microbial consortium.

MicroRNA-21 activation of ERK signaling via PTEN is involved in arsenite-induced autophagy in human hepatic L-02 cells.

Protective effect of silymarin on viability, motility and mitochondrial membrane potential of ram sperm treated with sodium arsenite.

p-cresol but not p-cresyl sulfate stimulate MCP-1 production via NF- κ B p65 in human vascular smooth muscle cells.

Predicting the probability of survival in acute paraquat poisoning.

Is exposure to Agent Orange a risk factor for hepatocellular cancer?-A single-center retrospective study in the U.S. veteran population.

Storm-event-transport of urban-use pesticides to streams likely impairs invertebrate assemblages.

Acute cardiopulmonary toxicity of inhaled aldehydes: role of TRPA1.

Correlation between microbial diversity and toxicity of sludge treating synthetic wastewater containing 4-chlorophenol in sequencing batch reactors.

Local connected fractal dimension analysis in gill of fish experimentally exposed to toxicants.

Involvement of endogenous antioxidant systems in the protective activity of pituitary adenylate cyclase-activating polypeptide against hydrogen peroxide-induced oxidative damages in cultured rat astrocytes.

Chiral quizalofop-ethyl and its metabolite quizalofop-acid in soils: Enantioselective degradation, enzymes interaction and toxicity to *Eisenia foetida*.

Exposure to butachlor causes thyroid endocrine disruption and promotion of metamorphosis in *Xenopus laevis*.

Parkinson's Disease and Pesticides Exposure: New Findings From a Comprehensive Study in Nebraska, USA.

Ameliorative effects of docosahexaenoic acid on the toxicity induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in cultured rat hepatocytes.

[Progress on predictors of patients with acute paraquat poisoning].

Defective excitation-contraction coupling is partially responsible for impaired contractility in hindlimb muscles of *Stac3* knockout mice.

Acute toxicity of herbicide (glyphosate) in *Clarias gariepinus* juveniles.

[STRUCTURE OF THE SPLEEN AT CHRONIC INTOXICATION OF THE ORGANISM BY SODIUM TETRABORATE AND AFTER INTOXICATION].

Improvement of banana cv. Rasthali (Silk, AAB) against *Fusarium oxysporum* f.sp. *cubense* (VCG 0124/5) through induced mutagenesis: Determination of LD50 specific to mutagen, explants, toxins and in vitro and in vivo screening for *Fusarium* wilt resistance.

Latent Toxicity of Endothall to Anadromous Salmonids During Seawater Challenge.

Daphnia magna negatively affected by chronic exposure to purified Cry-toxins.

Studies of Hematopoietic Cell Differentiation with a Ratiometric and Reversible Sensor of Mitochondrial Reactive Oxygen Species.

Synthesis and Preclinical Evaluation of ¹¹C-UCB-J as a PET Tracer for Imaging the Synaptic Vesicle Glycoprotein 2A in the Brain.

Aryl hydrocarbon receptor deletion in cerebellar granule neuron precursors impairs neurogenesis.

Aortic smooth muscle cell alterations in mice systemically exposed to arsenic.

Anti-inflammatory Montelukast prevents toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin: Oxidative stress, histological alterations in liver, and serum cytokine levels.

A Rat Model of Alzheimer's Disease Based on Aβ₄₂ and Pro-oxidative Substances Exhibits Cognitive Deficit and Alterations in Glutamatergic and Cholinergic Neurotransmitter Systems.

Safety assessment of a standardized polyphenolic extract of clove buds: Subchronic toxicity and mutagenicity studies.

Highly Selective Fluorescence Determination of the Hematin Level in Human Erythrocytes with No Need for Separation from Bulk Hemoglobin.

Pesticide Mixture Toxicity in Surface Water Extracts in Snails (*Lymnaea stagnalis*) by an in Vitro Acetylcholinesterase Inhibition Assay and Metabolomics.

Rabbit syndrome after taking herbicide containing 2-(4-chloro-2-methylphenoxypropionic) acid.

Treatment of Resistant Cyclophosphamide Induced Haemorrhagic Cystitis: Review of Literature and Three Case Reports.

Polychlorinated biphenyl 126 exposure in L6 myotubes alters glucose metabolism: a pilot study.

Are bee diseases linked to pesticides? - A brief review.

Induced lipid peroxidation in ram sperm: semen profile, DNA fragmentation and antioxidant status.

Contaminant-induced oxidative stress in fish: a mechanistic approach.

Short Chemical Ischemia Triggers Phosphorylation of eIF2 α and Death of SH-SY5Y Cells but not Proteasome Stress and Heat Shock Protein Response in both SH-SY5Y and T98G Cells.

Prenatal Exposure to Arsenic Impairs Behavioral Flexibility and Cortical Structure in Mice.

The Study of Cellular and Molecular Physiological Characteristics of Sperm in Men Living in the Aral Sea Region.

Underestimation of the Maximal Capacity of the Mitochondrial Electron Transport System in Oligomycin-Treated Cells.

Extra virgin olive oil modulates brain docosahexaenoic acid level and oxidative damage caused by 2,4-Dichlorophenoxyacetic acid in rats.

Nanopharmaceutical Approach for Enhanced Anti-cancer Activity of Betulinic Acid in Lung-cancer Treatment via Activation of PARP: Interaction with DNA as a Target: -Anti-cancer Potential of Nano-betulinic Acid in Lung Cancer.

Acute Sodium Arsenite-Induced Hematological and Biochemical Changes in Wistar Rats: Protective Effects of Ethanol Extract of *Ageratum conyzoides*.

Attenuation of hepatotoxicity and oxidative stress in diabetes STZ-induced type 1 by biotin in Swiss albino mice.

Proton-Coupled Organic Cation Antiporter Contributes to the Hepatic Uptake of Matrine.

Lysines, Achilles' heel in alpha-synuclein conversion to a deadly neuronal endotoxin.

Inhibition of ATP synthesis by fenbufen and its conjugated metabolites in rat liver mitochondria.

European sea bass gill pathology after exposure to cadmium and terbuthylazine: expert versus fractal analysis.

How does cigarette smoking cause acute pancreatitis?

The olive leaf extract oleuropein exerts protective effects against oxidant-induced cell death, concurrently displaying pro-oxidant activity in human hepatocarcinoma cells.

2,3,7,8-TCDD-mediated toxicity in peripheral blood mononuclear cells is alleviated by the antioxidants present in *Gelidiella acerosa*: an in vitro study.

Developmental toxicity, oxidative stress, and related gene expression induced by dioxin-like PCB 126 in zebrafish (*Danio rerio*).

SIRT3 Mediates the Antioxidant Effect of Hydrogen Sulfide in Endothelial Cells.

Arsenic and smokeless tobacco induce genotoxicity, sperm abnormality as well as oxidative stress in mice in vivo.

Genetically Modified Foods: A Brief Overview of the Risk Assessment Process.

Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) increases human hepatic stellate cell activation.

The Inhibitory Effect of Natural Products on Protein Fibrillation May Be Caused by Degradation Products-
-A Study Using Aloin and Insulin.

Epigallocatechin-3-gallate induces oxidative phosphorylation by activating cytochrome c oxidase in human cultured neurons and astrocytes.

Dual ATPase and GTPase activity of the replication-associated protein (Rep) of beak and feather disease virus.

Paraquat Poisoning: A Case Report.

Novel human hepatic organoid model enables testing of drug-induced liver fibrosis in vitro.

Enhanced AOX accumulation and aquatic toxicity during 2,4,6-trichlorophenol degradation in a Co(II)/peroxymonosulfate/Cl⁻ system.

Ah Receptor Activation by Dioxin Disrupts Activin, BMP, and WNT Signals During the Early Differentiation of Mouse Embryonic Stem Cells and Inhibits Cardiomyocyte Functions.

Mechanisms of thaxtomin A-induced root toxicity revealed by a thaxtomin A sensitive Arabidopsis mutant (ucu2-2/gi-2).

Multistress effects on goldfish (*Carassius auratus*) behavior and metabolism.

Protective Effects of Zinc Against Acute Arsenic Toxicity by Regulating Antioxidant Defense System and Cumulative Metallothionein Expression.

Kolaviron was protective against sodium azide (NaN₃) induced oxidative stress in the prefrontal cortex.

Adolescent pesticide exposures reported to Texas poison centers.

Sodium azide ingestion and secondary contamination risk in healthcare workers.

Paraoxonase 1 activity in subchronic low-level inorganic arsenic exposure through drinking water.

Evaluation of serum markers of blood redox homeostasis and inflammation in PCB naturally contaminated heifers undergoing decontamination.

Evaluation and identification of dioxin exposure biomarkers in human urine by high-resolution metabolomics, multivariate analysis and in vitro synthesis.

The pretransplant systemic metabolic profile reflects a risk of acute graft versus host disease after allogeneic stem cell transplantation.

Aryl Hydrocarbon Receptor Activation by TCDD Modulates Expression of Extracellular Matrix Remodeling Genes during Experimental Liver Fibrosis.

Comparable Neuroprotective Effects of Pergolide and Pramipexole on Ferrous Sulfate-Induced Dopaminergic Cell Death in Cell Culture.

Acute Illness Associated with Exposure to a New Soil Fumigant Containing Dimethyl Disulfide-Hillsborough County, Florida, 2014.

Arsenite accumulation in the mouse eye.

Exposure Variation and Endocrine Disruption of the Male Reproductive System.

Evaluation Efficacy of Ferrous Sulfate Therapy on Headaches of 5-15 Years Old Iron Deficient Children with Migraine.

Synthesis, Cytotoxic Activity on Leukemia Cell Lines and Quantitative Structure-Activity Relationships (QSAR) Studies of Morita-Baylis-Hillman Adducts.

Silymarin protects plasma membrane and acrosome integrity in sperm treated with sodium arsenite.

Toxicokinetics of paraquat in Korean patients with acute poisoning.

Severe Endobronchial Inflammation Induced by Aspiration of a Ferrous Sulfate Tablet.

The onset of lipid peroxidation in rheumatoid arthritis: consequences and monitoring.

Sensitivity of KATP channels to cellular metabolic disorders and the underlying structural basis.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the development and function of the blood-brain barrier.

Xyloglucan Deficiency Disrupts Microtubule Stability and Cellulose Biosynthesis in Arabidopsis, Altering Cell Growth and Morphogenesis.

A Study of 2,3,7,8-Tetrachlorodibenzo-p-dioxin Induced Liver Injury in Jian Carp (*Cyprinus carpio* var. Jian) Using Precision-Cut Liver Slices.

Thiodorexin-2 overexpression fails to rescue chronic high calorie diet induced hippocampal dysfunction.

Delivery of a protein transduction domain-mediated Prdx6 protein ameliorates oxidative stress-induced injury in human and mouse neuronal cells.

Tick-borne encephalitis--lipid peroxidation and its consequences.

Gene Expression Patterns Associated With Histopathology in Toxic Liver Fibrosis.

Somatic-cell mutation induced by short exposures to cigarette smoke in urate-null, oxidative stress-sensitive *Drosophila*.

Cytotoxic and apoptotic effects of boron compounds on leukemia cell line.

Effect of sodium arsenite on reproductive organs of female Wistar rats.

The impact of combined administration of paraquat and maneb on motor and non-motor functions in the rat.

Tribenuron-Methyl Induces Male Sterility through Anther-Specific Inhibition of Acetolactate Synthase Leading to Autophagic Cell Death.

[Three cases of an extreme hyperkalemia associated with glyphosate potassium herbicide poisoning].

Total ocular surface amniotic membrane transplantation for paraquat-induced ocular surface injury.

Interpreting biomonitoring data for 2,4-dichlorophenoxyacetic acid: Update to Biomonitoring Equivalents and population biomonitoring data.

Involvement of epithelial-to-mesenchymal transition and associated transforming growth factor- β /Smad signaling in paraquat-induced pulmonary fibrosis.

trans-Cinnamaldehyde stimulates mitochondrial biogenesis through PGC-1 α and PPAR α leading to enhanced GLUT4 expression.

Anthelmintic efficacy of cinnamaldehyde and cinnamic acid from cortex cinnamon essential oil against *Dactylogyrus intermedius*.

The effects of gestational and chronic atrazine exposure on motor behaviors and striatal dopamine in male Sprague-Dawley rats.

Discovery of a novel neuroprotectant, BHDPC, that protects against MPP+/MPTP-induced neuronal death in multiple experimental models.

Executive Summary to EDC-2: The Endocrine Society's Second Scientific Statement on Endocrine-Disrupting Chemicals.

Artificial sweetener neohesperidin dihydrochalcone showed antioxidative, anti-inflammatory and anti-apoptosis effects against paraquat-induced liver injury in mice.

Histopathological and ultramicroscopical changes in gill, liver and kidney of *Anabas testudineus* (Bloch) after chronic intoxication of almix (metsulfuron methyl 10.1%+chlorimuron ethyl 10.1%) herbicide.

A Potential Role for Acrolein in Neutrophil-Mediated Chronic Inflammation.

The toxicity of glyphosate alone and glyphosate-surfactant mixtures to western toad (*Anaxyrus boreas*) tadpoles.

Cancer incidence and metolachlor use in the Agricultural Health Study: An update.

Differential effects of bevacizumab, ranibizumab and aflibercept on cell viability, phagocytosis and mitochondrial bioenergetics of retinal pigment epithelial cell.

Bioaccumulation and neurotoxicity of dithiopyridine herbicide in the brain of freshwater fish, *Cyprinus carpio*.

Acute and additive toxicity of ten photosystem-II herbicides to seagrass.

Abnormal pancreatic enzymes and their prognostic role after acute paraquat poisoning.

Pollen-mediated gene flow from transgenic cotton under greenhouse conditions is dependent on different pollinators.

[Analysis of risk factors for prognosis of patients with acute paraquat intoxication].

[A case of rhabdomyolysis, acute renal failure induced by paraquat poisoning].

[A case of intravenous paraquat induced poisoning death].

[Effect of total flavonoids from *astragalus complanatus* on paraquat poisoning-induced pulmonary fibrosis in rats and its mechanisms].

[Effects of atrazine on function of murine peritoneal macrophages in vitro].

Synergism of herbicide toxicity by 5-aminolevulinic acid is related to physiological and ultra-structural disorders in crickweed (*Malachium aquaticum* L.).

Proteasome subunit and opioid receptor gene expression down-regulation induced by paraquat and maneb in human neuroblastoma SH-SY5Y cells.

Blowfly Larval Tissues as a Secondary Detector for Determining Paraquat-Related Death in Rabbit Carcass.

Bioaccumulation and Elimination of the Herbicide Clomazone in the Earthworms *Eisenia fetida*.

Continuous IV infusion of MESNA can prevent hemorrhagic cystitis in HSCT and retain MESNA concentration in urine.

Association of Agent Orange With Plasma Cell Disorder: Further Evidence.

Successful extracorporeal membrane oxygenation therapy as a bridge to sequential bilateral lung transplantation for a patient after severe paraquat poisoning.

Protective effects of Ndfip1 on MPP(+)-induced apoptosis in MES23.5 cells and its underlying mechanisms.

Neurotoxicity effects of atrazine-induced SH-SY5Y human dopaminergic neuroblastoma cells via microglial activation.

Acute Toxic Effects of the Herbicide Formulation Focus(®) Ultra on Embryos and Larvae of the Moroccan Painted Frog, *Discoglossus scovazzi*.

Sensitization of the trigeminovascular system following environmental irritant exposure.

Protective effects of caffeic acid phenethyl ester on dose-dependent intoxication of rats with paraquat.

Cigarette side-stream smoke lung and bladder carcinogenesis: inducing mutagenic acrolein-DNA adducts, inhibiting DNA repair and enhancing anchorage-independent-growth cell transformation.

Atrazine Triggers the Extrinsic Apoptosis Pathway in Lymphocytes of the Frog *Pelophylax nigromaculata* in Vivo.

Decreasing the toxicity of paraquat through the complexation with sodium salicylate: Stoichiometric analysis.

Hyperbaric oxygen treatment ameliorates lung injury in paraquat intoxicated rats.

Post-Vietnam Dioxin Exposure in Agent Orange-Contaminated C-123 Aircraft.

RIFM fragrance ingredient safety assessment, $\hat{\pm}$ -butylcinnamaldehyde, CAS Registry Number 7492-44-6.

Impairment of striatal mitochondrial function by acute paraquat poisoning.

The Effect of Exposure to Atrazine on Dopaminergic Development in Pubertal Male SD Rats.

Toxicological evaluation of ametryn effects in Wistar rats.

Potential toxic effects of glyphosate and its commercial formulations below regulatory limits.

Mechanisms of CDDO-imidazolid-mediated cytoprotection against acrolein-induced neurocytotoxicity in SH-SY5Y cells and primary human astrocytes.

Environmental pollutants parathion, paraquat and bisphenol A show distinct effects towards nuclear receptors-mediated induction of xenobiotics-metabolizing cytochromes P450 in human hepatocytes.

Diquat causes caspase-independent cell death in SH-SY5Y cells by production of ROS independently of mitochondria.

Cardiotoxic Electrophysiological Effects of the Herbicide Roundup® in Rat and Rabbit Ventricular Myocardium In Vitro.

Caspase-2 protects against oxidative stress in vivo.

Kidney damage biomarkers detect acute kidney injury but only functional markers predict mortality after paraquat ingestion.

[Digestive system injury caused by paraquat poisoning and treatment].

[Successful treatment of one case after acute paraquat intoxication complicated with pulmonary fibrosis, mediastinal emphysema and subcutaneous emphysema].

[Clinical significance of dynamic changes in serum inflammatory cell factors after acute paraquat poisoning].

[Inhibitory effects of curcumin on inflammatory cytokines in rats with paraquat poisoning].

[Hemoperfusion alleviated paraquat-induced kidney inflammation injury of rabbit].

[The effect of signal transduction pathway of triggering receptor-1 expressed on myeloid cells in acute lung injury induced by paraquat in rats].

Effects of sublethal doses of glyphosate on honeybee navigation.

NADPH oxidase mediated maneb- and paraquat-induced oxidative stress in rat polymorphs: Crosstalk with mitochondrial dysfunction.

NLRP3 inflammasome activation by mitochondrial reactive oxygen species plays a key role in long-term cognitive impairment induced by paraquat exposure.

Toxic and genotoxic effects of the imazethapyr-based herbicide formulation Pivot HÂ® on montevideo tree frog *Hypsiboas pulchellus* tadpoles (Anura, Hylidae).

Methylene blue attenuates acute liver injury induced by paraquat in rats.

Roundup® exposure promotes gills and liver impairments, DNA damage and inhibition of brain cholinergic activity in the Amazon teleost fish *Colossoma macropomum*.

Use of acetochlor and cancer incidence in the Agricultural Health Study.

L-F001, a multifunctional ROCK inhibitor prevents paraquat-induced cell death through attenuating ER stress and mitochondrial dysfunction in PC12 cells.

Transcriptome profile analysis reflects rat liver and kidney damage following chronic ultra-low dose Roundup exposure.

A quantitative approach to developing Parkinsonian monkeys (*Macaca fascicularis*) with intracerebroventricular 1-methyl-4-phenylpyridinium injections.

[A Case of Corneal Injury due to Herbicide Containing Paraquat: Effectiveness of 2% Rebamipide Eye Drops].

Acute effects of a prooxidant herbicide on the microalga *Chlamydomonas reinhardtii*: Screening cytotoxicity and genotoxicity endpoints.

Herbicide toxicity on river biofilms assessed by pulse amplitude modulated (PAM) fluorometry.

Lethal and sub-lethal chronic effects of the herbicide diuron on seagrass.

Protective role of bacillithiol in superoxide stress and Fe-S metabolism in *Bacillus subtilis*.

Fluorescence labeling of carbonylated lipids and proteins in cells using coumarin-hydrazide.

Assessing temporal and spatial variation in sensitivity of communities of periphyton sampled from agroecosystem to, and ability to recover from, atrazine exposure.

Acute and subchronic toxic effects of atrazine and chlorpyrifos on common carp (*Cyprinus carpio* L.): Immunotoxicity assessments.

Altered levels of endocrine biomarkers in juvenile barramundi (*Lates calcarifer*; Bloch) following exposure to commercial herbicide and surfactant formulations.

Proteomics analysis of *Xenopus laevis* gonad tissue following chronic exposure to atrazine.

Protective Effects of Arachidonic Acid Against Paraquat-Induced Pulmonary Injury.

Surfactant toxicity in a case of (4-chloro-2-methylphenoxy) acetic acid herbicide intoxication.

Spectrum of patients intentionally poisoned with an emulsified concentrate pendimethalin herbicide.

Acute eosinophilic pneumonia associated with glyphosate-surfactant exposure.

Simultaneous exposure to multiple heavy metals and glyphosate may contribute to Sri Lankan agricultural nephropathy.

Developmental origins of neurotransmitter and transcriptome alterations in adult female zebrafish exposed to atrazine during embryogenesis.

[A review of developments in paraquat neurotoxicity research].

[A case report of acute paraquat poisoning with high amylase and lipase level].

[The protective effect of ulinastatin on paraquat-induced injury in HK-2 cells and the underlying mechanisms].

Proteomic and histopathological response in the gills of *Poecilia reticulata* exposed to glyphosate-based herbicide.

Pneumomediastinum predicts early mortality in acute paraquat poisoning.

Agent Orange and long-term outcomes after radical prostatectomy.

The effects of the herbicide atrazine on freshwater snails.

Anti-androgenic activities of diuron and its metabolites in male Nile tilapia (*Oreochromis niloticus*).

Pronamide: Human relevance of liver-mediated rat leydig cell tumors.

Connective tissue growth factor stimulates the proliferation, migration and differentiation of lung fibroblasts during paraquat-induced pulmonary fibrosis.

Effects of subchronic exposure to glyphosate in juvenile oysters (*Crassostrea gigas*): From molecular to individual levels.

Presumption of Herbicide Exposure and Presumption of Disability During Service for Reservists Presumed Exposed to Herbicide. Interim final rule.

Molecular cytotoxicity mechanisms of allyl alcohol (acrolein) in budding yeast.

Atrazine Causes Autophagy- and Apoptosis-Related Neurodegenerative Effects in Dopaminergic Neurons in the Rat Nigrostriatal Dopaminergic System.

[Clinical significance of serum amylase and lipase in patients with acute paraquat poisoning].

Survival of a patient after self-injection of paraquat and surgical excision of the injection site.

Protective effects of melatonin-loaded lipid-core nanocapsules on paraquat-induced cytotoxicity and genotoxicity in a pulmonary cell line.

Glutathione S-transferase P protects against cyclophosphamide-induced cardiotoxicity in mice.

2-Methyl-4-chlorophenoxyacetic acid and bromoxynil herbicide death.

Phenoxy herbicides, soft-tissue sarcoma and non-Hodgkin lymphoma: a systematic review of evidence from cohort and case-control studies.

Alteration in the cytokine levels and histopathological damage in common carp induced by glyphosate.

Soft tissue sarcoma, non-Hodgkin's lymphoma and chronic lymphocytic leukaemia in workers exposed to phenoxy herbicides: extended follow-up of a UK cohort.

Aminomethylphosphonic acid has low chronic toxicity to *Daphnia magna* and *Pimephales promelas*.

Joint toxicity of chlorpyrifos, atrazine, and cadmium at lethal concentrations to the earthworm *Eisenia fetida*.

Leydig cell number and sperm production decrease induced by chronic ametryn exposure: a negative impact on animal reproductive health.

Modeling and optimization of photo-Fenton degradation of 2,4-D using ferrioxalate complex and response surface methodology (RSM).

Adiponectin attenuates lung fibroblasts activation and pulmonary fibrosis induced by paraquat.

[Xuebijing combined ulinastatin in treating acute paraquat poisoning].

[The study of kidney injury in rats with acute paraquat poisoning].

[The expressions of P38 mitogen-activated protein kinases and JNK mitogen-activated protein kinases in the renal tissue of rats with acute paraquat poisoning and the therapeutical effects of melatonin].

[The effect of paraquat on voltage-dependent anion channel and caspase-3, 8, 9 in the mitochondria of rat lung].

[Effect of hydrogen-saline on lung injury and heme oxygenase-1 expression in the lung tissue of acute paraquat-intoxicated mice].

Cinnamon spice and everything not nice: many features of intraoral allergy to cinnamic aldehyde.

Groundwater pesticide levels and the association with Parkinson disease.

Subacute and subchronic toxicity of Avalon(®) mixture (bentazone+dicamba) to rats.

Multiparametric characterisation of neuronal network activity for in vitro agrochemical neurotoxicity assessment.

Atrazine exposure affects the ability of crayfish (*Orconectes rusticus*) to localize a food odor source.

Toxicity of Cãspide 480SL® spray mixture formulation of glyphosate to aquatic organisms.

Losartan attenuates paraquat-induced pulmonary fibrosis in rats.

Dicamba affects sex steroid hormone level and mRNA expression of related genes in adult rare minnow (*Gobiocypris rarus*) at environmentally relevant concentrations.

Combined exposure to agriculture pesticides, paraquat and maneb, induces alterations in the N/OFQ-NOPr and PDYN/KOPr systems in rats: Relevance to sporadic Parkinson's disease.

±,²-Unsaturated aldehyde pollutant acrolein suppresses cardiomyocyte contractile function: Role of TRPV1 and oxidative stress.

Traditional chinese medicine Xuebijing treatment is associated with decreased mortality risk of patients with moderate paraquat poisoning.

The manganese-salen compound EUK-134 and N-acetyl cysteine rescue from zinc- and paraquat-induced toxicity in rat polymorphonuclear leukocytes.

Histopathological effects of atrazine on gills of Caspian kutum *Rutilus frisii kutum* fingerlings.

[Application of hemoperfusion in treatment of acute paraquat poisoning].

[Expression of heme oxygenase-1 in lung tissue of paraquat poisoned mice and its significance].

[Inhibition of pulmonary nuclear factor -ß and tumor necrosis factor -± expression by diallyl sulfide in rats with paraquat poisoning].

[The value of assessment of area of ground glass opacity in lungs cast by high-resolution computed tomography on the prognosis of patients with acute paraquat intoxication].

[Intensity of hemoperfusion in acute paraquat-poisoned patients and analysis of prognosis].

[Effect of rhubarb as the main composition of sequential treatment in patients with acute paraquat poisoning: a prospective clinical research].

[Progress in the diagnosis and treatment of acute paraquat poisoning].

[The treatment of acute paraquat poisoning: a long and hard way].

Diuron in water: functional toxicity and intracellular detoxification patterns of active concentrations assayed in tandem by a yeast-based probe.

The volume ratio of ground glass opacity in early lung CT predicts mortality in acute paraquat poisoning.

A critical review of the epidemiology of Agent Orange or 2,3,7,8-tetrachlorodibenzo-p-dioxin and lymphoid malignancies.

The synergistic toxicity of the multiple chemical mixtures: implications for risk assessment in the terrestrial environment.

Betanin attenuates oxidative stress and inflammatory reaction in kidney of paraquat-treated rat.

Subcellular energy balance of *Odontesthes bonariensis* exposed to a glyphosate-based herbicide.

Acute toxic effects of the herbicide formulation and the active ingredient used in cycloxydim-tolerant maize cultivation on embryos and larvae of the African clawed frog, *Xenopus laevis*.

Metabolic profiling of *Lolium perenne* shows functional integration of metabolic responses to diverse subtoxic conditions of chemical stress.

Acrolein-Induced Oxidative Stress and Cell Death Exhibiting Features of Apoptosis in the Yeast *Saccharomyces cerevisiae* Deficient in SOD1.

Bioavailability-based estimation of phytotoxicity of imazaquin in soil to sorghum.

Increased toll-like receptor 9 expression is associated with the severity of paraquat-induced lung injury in mice.

Glyphosate-based herbicides potentially affect cardiovascular system in mammals: review of the literature.

Physiological effects of temperature on turfgrass tolerance to amicarbazone.

Assessment of soybean injury from glyphosate using airborne multispectral remote sensing.

Physiological and oxidative stress biomarkers in the freshwater monosex Nile tilapia, *Oreochromis niloticus* L., exposed to pendimethalin-based herbicide.

Occupational exposure to pentachlorophenol causing lymphoma and hematopoietic malignancy for two generations.

Mechanisms underlying early rapid increases in creatinine in paraquat poisoning.

Polyphenol extract from *Phellinus igniarius* protects against acrolein toxicity in vitro and provides protection in a mouse stroke model.

Kernel compositions of glyphosate-tolerant and corn rootworm-protected MON 88017 sweet corn and insect-protected MON 89034 sweet corn are equivalent to that of conventional sweet corn (*Zea mays*).

Glyphosate, pathways to modern diseases III: Manganese, neurological diseases, and associated pathologies.

Paraquat induces epithelial-mesenchymal transition-like cellular response resulting in fibrogenesis and the prevention of apoptosis in human pulmonary epithelial cells.

The significance of serum uric acid level in humans with acute paraquat poisoning.

ROS-triggered signaling pathways involved in the cytotoxicity and tumor promotion effects of pentachlorophenol and tetrachlorohydroquinone.

UV and hydrogen peroxide treatment restores changes in innate immunity caused by exposure of fish to reuse water.

The herbicide linuron inhibits cholesterol biosynthesis and induces cellular stress responses in brown trout.

Neurobehavioral effects of concurrent exposure to cesium-137 and paraquat during neonatal development in mice.

Ternary toxicological interactions of insecticides, herbicides, and a heavy metal on the earthworm *Eisenia fetida*.

Acute toxicity and sublethal effects of the mixture glyphosate (Roundup Active) and Cosmo-Flux 411F to anuran embryos and tadpoles of four Colombian species.

[Clinical study on the treatment of acute paraquat poisoning with sequential whole gastric and bowel irrigation].

[Analysis of reports of cases of pesticide poisoning in Jiangsu Province, China, from 2006 to 2013].

Evaluation of carcinogenic potential of the herbicide glyphosate, drawing on tumor incidence data from fourteen chronic/carcinogenicity rodent studies.

Effects of noninvasive positive pressure ventilation on oxygenation status and prognosis in patients with acute paraquat-induced lung injury.

Modelling the effect of fluctuating herbicide concentrations on algae growth.

Atrazine and chlorpyrifos exposure induces liver autophagic response in common carp.

In vitro safety assessment of food ingredients in canine renal proximal tubule cells.

Degradation and dechlorination of pentachlorophenol by microwave-activated persulfate.

Superparamagnetic iron oxide nanoparticles exacerbate the risks of reactive oxygen species-mediated external stresses.

Protective effects of caffeic acid phenethyl ester on the dose-dependent acute nephrotoxicity with paraquat in a rat model.

Using a toxicity test with *Ruppia maritima* (Linnaeus) to assess the effects of Roundup.

PSTK is a novel gene associated with early lung injury in Paraquat Poisoning.

A miniature bioassay for testing the acute phytotoxicity of photosystem II herbicides on seagrass.

Effects of different tidal volume ventilation on paraquat-induced acute lung injury in piglets.

Atrazine induces apoptosis of SH-SY5Y human neuroblastoma cells via the regulation of Bax/Bcl-2 ratio and caspase-3-dependent pathway.

Effects of prometryne on early life stages of common carp (*Cyprinus carpio* L.).

APACHE score, Severity Index of Paraquat Poisoning, and serum lactic acid concentration in the prognosis of paraquat poisoning of Chinese Patients.

Molecular mechanisms of acrolein toxicity: relevance to human disease.

Selenium reduces bradykinesia and DNA damage in a rat model of Parkinson's disease.

(1)H NMR based metabolomics approach to study the toxic effects of herbicide butachlor on goldfish (*Carassius auratus*).

Histopathological alterations in the kidney of Caspian kutum, *Rutilus frisii* kutum, larvae and fingerlings exposed to sublethal concentration of atrazine.

Early haemoperfusion with continuous venovenous haemofiltration improves survival of acute paraquat-poisoned patients.

NLRP3 inflammasome activation is essential for paraquat-induced acute lung injury.

Severe cholestasis and hepatic dysfunction in a case of fatal paraquat poisoning.

Dimethylarsinic acid (DMA(V)) changed the expressions of proliferative related factors and secretion of inflammatory cytokines in rat bladder.

The relation between oxidative stress, inflammation, and neopterin in the paraquat-induced lung toxicity.

Hepatoprotective effect of *Matricaria chamomilla* L in paraquat induced rat liver injury.

Docosahexaenoic acid prevents paraquat-induced reactive oxygen species production in dopaminergic neurons via enhancement of glutathione homeostasis.

Multiple myeloma and glyphosate use: a re-analysis of US Agricultural Health Study (AHS) data.

Drinking well water and occupational exposure to Herbicides is associated with chronic kidney disease, in Padavi-Sripura, Sri Lanka.

Clostridium tertium bacteremia in a patient with glyphosate ingestion.

Artesunate Attenuates Lung Injury in Paraquat-Intoxicated Rats via Downregulation of Inflammatory Cytokines.

Acute effects of acrolein in human volunteers during controlled exposure.

Use of In Vivo and In Vitro Data to Derive a Chronic Reference Value for Crotonaldehyde Based on Relative Potency to Acrolein.

The Biomarkers of Exposure and Effect in Agriculture (BEEA) Study: Rationale, Design, Methods, and Participant Characteristics.

Paraquat Poisoning Followed by Toxic Epidermal Necrolysis: A Report of Two Cases and Published Work Review.

Characterization of the ecological interactions of Roundup Ready 2 Yield[®] soybean, MON 89788, for use in ecological risk assessment.

Serum Metabolomics in Rats after Acute Paraquat Poisoning.

Effects of Atrazine on the Development of Neural System of Zebrafish, *Danio rerio*.

Superantigen staphylococcal enterotoxin C1 mutant can reduce paraquat pulmonary fibrosis.

Parkinsonian toxin-induced oxidative stress inhibits basal autophagy in astrocytes via NQO2/quinone oxidoreductase 2: Implications for neuroprotection.

[The research progress of paraquat poisoning lung molecular mechanism].

[A case of acute paraquat poisoning lead to esophageal obstruction].

[Observation on the best dose of methylprednisolone improving lung injury in swine with paraquat intoxication].

Enhancement of the acrolein-induced production of reactive oxygen species and lung injury by GADD34.

DNaseI protects against Paraquat-induced acute lung injury and pulmonary fibrosis mediated by mitochondrial DNA.

Metabolic changes in paraquat poisoned patients and support vector machine model of discrimination.

Clearance rate and BP-ANN model in paraquat poisoned patients treated with hemoperfusion.

Acute Effects of 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) or Paraquat on Core Temperature in C57BL/6J Mice.

North American contact dermatitis group patch test results: 2011-2012.

Effects of rapamycin against paraquat-induced pulmonary fibrosis in mice.

The mechanism of rapamycin in the intervention of paraquat-induced acute lung injury in rats.

The herbicide glyphosate causes behavioral changes and alterations in dopaminergic markers in male Sprague-Dawley rat.

Sub-lethal effects of Roundup[®] on tadpole anti-predator responses.

Effects of glyphosate on juvenile rainbow trout (*Oncorhynchus mykiss*): transcriptional and enzymatic analyses of antioxidant defence system, histopathological liver damage and swimming performance.

Immunological and histopathological responses of the kidney of common carp (*Cyprinus carpio* L.) sublethally exposed to glyphosate.

Combined effects of repeated administration of Bretmont Wipeout (glyphosate) and Ultrazin (atrazine) on testosterone, oxidative stress and sperm quality of Wistar rats.

Acute and long-term ocular effects of acrolein vapor on the eyes and potential therapies.

Trace concentrations of imazethapyr (IM) affect floral organs development and reproduction in *Arabidopsis thaliana*: IM-induced inhibition of key genes regulating anther and pollen biosynthesis.

Transcription alteration of immunologic parameters and histopathological damage in common carp (*Cyprinus carpio* L.) caused by paraquat.

A dopamine receptor contributes to paraquat-induced neurotoxicity in *Drosophila*.

Mifepristone-inducible recombinant adenovirus attenuates paraquat-induced lung injury in rats.

[Expression of the pulmonary surfactant in rat with paraquat-induced acute lung injury].

EDC-2: The Endocrine Society's Second Scientific Statement on Endocrine-Disrupting Chemicals.

Topically applied metal chelator reduces thermal injury progression in a rat model of brass comb burn.

Acrolein contributes to TRPA1 up-regulation in peripheral and central sensory hypersensitivity following spinal cord injury.

Activity of several kinds of drugs against *Neospora caninum*.

Cinnamaldehyde attenuates pressure overload-induced cardiac hypertrophy.

Compensatory role of the Nrf2-ARE pathway against paraquat toxicity: Relevance of 26S proteasome activity.

Cinnamic aldehyde suppresses hypoxia-induced angiogenesis via inhibition of hypoxia-inducible factor-1 α expression during tumor progression.

Parkinson's disease and enhanced inflammatory response.

Increase in acrolein-conjugated immunoglobulins in saliva from patients with primary Sjögren's syndrome.

Evaluation of dementia by acrolein, amyloid- β^2 and creatinine.

Methylene blue, a potential therapeutic target for mitochondria dysfunction.

Cinnamaldehyde inhibits inflammation and brain damage in a mouse model of permanent cerebral ischaemia.

The Genetic Architecture of Arsenic Metabolism Efficiency: A SNP-Based Heritability Study of Bangladeshi Adults.

Methylated arsenic metabolites bind to PML protein but do not induce cellular differentiation and PML-RAR α protein degradation.

Superoxide anion radical (O₂⁻) degrades methylmercury to inorganic mercury in human astrocytoma cell line (CCF-STTG1).

Controlling *Aspergillus flavus* and *Aspergillus parasiticus* growth and aflatoxin production in poultry feed using carvacrol and trans-cinnamaldehyde.

Lung inflammation biomarkers and lung function in children chronically exposed to arsenic.

Absence of sodA increases the levels of oxidation of key metabolic determinants of *Borrelia burgdorferi*.

Superoxide enhances Ca²⁺ entry through L-type channels in the renal afferent arteriole.

Soluble Epoxide Hydrolase Deficiency or Inhibition Attenuates MPTP-Induced Parkinsonism.

Efficacy of fumigation with Trans-cinnamaldehyde and eugenol in reducing *Salmonella enterica* serovar Enteritidis on embryonated egg shells.

The association of urine arsenic with prevalent and incident chronic kidney disease: evidence from the Strong Heart Study.

Efficacy and safety of pulse immunosuppressive therapy with glucocorticoid and cyclophosphamide in patients with paraquat poisoning: A meta-analysis.

Role of aldehyde dehydrogenase in hypoxic vasodilator effects of nitrite in rats and humans.

Mechanical overloading causes mitochondrial superoxide and SOD2 imbalance in chondrocytes resulting in cartilage degeneration.

Coniferyl aldehyde attenuates radiation enteropathy by inhibiting cell death and promoting endothelial cell function.

Rapamycin reverses paraquat-induced acute lung injury in a rat model through inhibition of NF κ B activation.

Nrf2-dependent suppression of azoxymethane/dextran sulfate sodium-induced colon carcinogenesis by the cinnamon-derived dietary factor cinnamaldehyde.

Arsenic toxicity in rice with special reference to speciation in Indian grain and its implication on human health.

Aminotriazole alleviates acetaminophen poisoning via downregulating P450 2E1 and suppressing inflammation.

Continuous, low-dose oral exposure to sodium chlorate reduces fecal generic *Escherichia coli* in sheep feces without inducing clinical chlorate toxicosis.

[Therapeutic effects of gastric lavage with fuller earth combined with Qingyill catharsis in treatment of oral paraquat poisoning in rabbits].

[Preventive effects of 5-hydroxy-1-methylhydantoin on paraquat-induced nephrotoxicity in rat].

Elevated levels of mercapturic acids of acrolein and crotonaldehyde in the urine of Chinese women in Singapore who regularly cook at home.

Coniferyl aldehyde reduces radiation damage through increased protein stability of heat shock transcriptional factor 1 by phosphorylation.

Antinociceptive effect of methanol extract of leaves of *Persicaria hydropiper* in mice.

Cinnamic aldehyde treatment alleviates chronic unexpected stress-induced depressive-like behaviors via targeting cyclooxygenase-2 in mid-aged rats.

[The catalase inhibitor aminotriazole alleviates acute alcoholic liver injury].

Distinguishing mild cognitive impairment from Alzheimer's disease with acrolein metabolites and creatinine in urine.

Cinnamic acid exerts anti-diabetic activity by improving glucose tolerance in vivo and by stimulating insulin secretion in vitro.

[Effect of calcium cyanamid synthetic drug on *Schistosoma japonicum* egg morphology].

Protective glove use and hygiene habits modify the associations of specific pesticides with Parkinson's disease.

Protective effect of crocin on acrolein-induced tau phosphorylation in the rat brain.

Oxidative Stress during the Progression of β -Amyloid Pathology in the Neocortex of the Tg2576 Mouse Model of Alzheimer's Disease.

Molecular mechanisms of acrolein-mediated myelin destruction in CNS trauma and disease.

Natural antioxidant betanin protects rats from paraquat-induced acute lung injury interstitial pneumonia.

Anti-inflammatory effect of cinnamaldehyde in *Helicobacter pylori* induced gastric inflammation.

The antisenescence effect of trans-cinnamaldehyde on adipose-derived stem cells.

Dynamic differences in oxidative stress and the regulation of metabolism with age in visceral versus subcutaneous adipose.

Renal function is associated with indicators of arsenic methylation capacity in Bangladeshi adults.

Arabidopsis INCURVATA2 Regulates Salicylic Acid and Abscisic Acid Signaling, and Oxidative Stress Responses.

Donepezil Regulates 1-Methyl-4-phenylpyridinium-Induced Microglial Polarization in Parkinson's Disease.

Protection of HepG2 cells against acrolein toxicity by 2-cyano-3,12-dioxooleana-1,9-dien-28-imidazole via glutathione-mediated mechanism.

Monodehydroascorbate reductase mediates TNT toxicity in plants.

In Silico Approach To Identify Potential Thyroid Hormone Disruptors among Currently Known Dust Contaminants and Their Metabolites.

Laboratory Rodent Diets Contain Toxic Levels of Environmental Contaminants: Implications for Regulatory Tests.

[Changes of the Expression of Brain Derived Neurotrophic Factors in Rats Trachea Induced by Acrolein Exposure].

Proteomic responses to a methyl viologen-induced oxidative stress in the wild type and FerB mutant strains of *Paracoccus denitrificans*.

Absorption, translocation and metabolism of bispyribac-sodium on rice seedlings under cold stress.

Oxidative Stress in *Caenorhabditis elegans*: Protective Effects of Spartin.

Oxidative and reductive metabolism of lipid-peroxidation derived carbonyls.

Metabolism of agrochemicals and related environmental chemicals based on cytochrome P450s in mammals and plants.

Measuring oxidative stress resistance of *Caenorhabditis elegans* in 96-well microtiter plates.

Steady-state metabolism of ethanol in perfused rat livers treated with cyanamide: quantitative analysis of acetaldehyde effects on the metabolic flux rates.

Genotoxicity of 1-methylpyrene and 1-hydroxymethylpyrene in Chinese hamster V79-derived cells expressing both human CYP2E1 and SULT1A1.

Acrolein impairs the cholesterol transport functions of high density lipoproteins.

The distribution in tissues and urine of arsenic metabolites after subchronic exposure to dimethylarsinic acid (DMAV) in rats.

Proinflammatory effect of trivalent arsenical species in a co-culture of Caco-2 cells and peripheral blood mononuclear cells.

Germination induction of dormant *Avena fatua* caryopses by KAR(1) and GA(3) involving the control of reactive oxygen species (H_2O_2 and $O_2^{\cdot-}$) and enzymatic antioxidants (superoxide dismutase and catalase) both in the embryo and the aleurone layers.

Anti-inflammatory activity of cinnamon (*C. zeylanicum* and *C. cassia*) extracts - identification of E-cinnamaldehyde and o-methoxy cinnamaldehyde as the most potent bioactive compounds.

The transcriptional regulator BBX24 impairs DELLA activity to promote shade avoidance in *Arabidopsis thaliana*.

Activation of auxin signalling counteracts photorespiratory H_2O_2 -dependent cell death.

Accumulation of electrophilic aldehydes during postovulatory aging of mouse oocytes causes reduced fertility, oxidative stress, and apoptosis.

Influence of the level of arsenic (As) exposure and the presence of T860C polymorphism in human As urinary metabolic profile.

Unveiling the role of the pesticides paraquat and rotenone on α -synuclein fibrillation in vitro.

Urinary arsenic speciation profile in ethnic group of the Atacama desert (Chile) exposed to variable arsenic levels in drinking water.

Effective attenuation of atrazine-induced histopathological changes in testicular tissue by antioxidant N-phenyl-4-aryl-polyhydroquinolines.

Key role of salsolinol in ethanol actions on dopamine neuronal activity of the posterior ventral tegmental area.

Drugs That Bind to α -Synuclein: Neuroprotective or Neurotoxic?

Aryl Hydrocarbon Receptor Protects Lungs from Cockroach Allergen-Induced Inflammation by Modulating Mesenchymal Stem Cells.

Enhanced protective activity of nano formulated andrographolide against arsenic induced liver damage.

Progression of micronutrient alteration and hepatotoxicity following acute PCB126 exposure.

Identification of *Scenedosporium boydii* catalase A1 gene, a reactive oxygen species detoxification factor highly expressed in response to oxidative stress and phagocytic cells.

Ancestral TCDD exposure promotes epigenetic transgenerational inheritance of imprinted gene *Igf2*: Methylation status and DNMTs.

Continuous activation of Nrf2 and its target antioxidant enzymes leads to arsenite-induced malignant transformation of human bronchial epithelial cells.

Compound- and sex-specific effects on programming of energy and immune homeostasis in adult C57BL/6JxFVB mice after perinatal TCDD and PCB 153.

The aryl hydrocarbon receptor suppresses cigarette-smoke-induced oxidative stress in association with dioxin response element (DRE)-independent regulation of sulfiredoxin 1.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin Alters Lipid Metabolism and Depletes Immune Cell Populations in the Jejunum of C57BL/6 Mice.

Developmental Activation of the AHR Increases Effector CD4+ T Cells and Exacerbates Symptoms in Autoimmune Disease-Prone *Gnaq*^{+/-} Mice.

Paraoxonase 1 and cytochrome P450 polymorphisms in susceptibility to acute organophosphorus poisoning in Egyptians.

Short-Term Changes in Body Composition and Response to Micronutrient Supplementation After Laparoscopic Sleeve Gastrectomy.

Para-cresyl sulfate acutely impairs vascular reactivity and induces vascular remodeling.

Lethal and behavioral effects of selected novel pesticides on adults of *Trichogramma pretiosum* (Hymenoptera: Trichogrammatidae).

Iron bioavailability from commercially available iron supplements.

Effects of co-exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin and polychlorinated biphenyls on nonalcoholic fatty liver disease in mice.

Disruption of Ah Receptor Signaling during Mouse Development Leads to Abnormal Cardiac Structure and Function in the Adult.

Green tea inhibited the elimination of nephro-cardiovascular toxins and deteriorated the renal function in rats with renal failure.

Subcellular Localization of Matrin 3 Containing Mutations Associated with ALS and Distal Myopathy.

Stress Granules Modulate SYK to Cause Microglial Cell Dysfunction in Alzheimer's Disease.

Modeling the Dynamic AMD-Associated Chronic Oxidative Stress Changes in Human ESC and iPSC-Derived RPE Cells.

Pesticide exposure and end-stage renal disease risk among wives of pesticide applicators in the Agricultural Health Study.

Development of a physiologically-based pharmacokinetic model of 2-phenoxyethanol and its metabolite phenoxyacetic acid in rats and humans to address toxicokinetic uncertainty in risk assessment.

Immunohistochemical analysis of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) toxicity on the developmental dentate gyrus and hippocampal fimbria in fetal mice.

Aryl hydrocarbon receptor agonists upregulate VEGF secretion from bronchial epithelial cells.

Evaluating microRNA profiles reveals discriminative responses following genotoxic or non-genotoxic carcinogen exposure in primary mouse hepatocytes.

Correlation between dioxin and endometriosis: an epigenetic route to unravel the pathogenesis of the disease.

Reversible Splenic Lesion Syndrome (RESLES) Following Glufosinate Ammonium Poisoning.

Instrumental and sensory analyses of quality attributes of grafted specialty melons.

Cutaneous drug toxicity from 2,4-dinitrophenol (DNP): Case report and histological description.

Monitoring Changes in the Redox State of Myoglobin in Cardiomyocytes by Raman Spectroscopy Enables the Protective Effect of NO Donors to Be Evaluated.

Ethanol enhances arsenic-induced cyclooxygenase-2 expression via both NFAT and NF- κ B signalings in colorectal cancer cells.

Central nervous system-specific knockout of Brg1 causes growth retardation and neuronal degeneration.

Association between Dioxin and Diabetes Mellitus in an Endemic Area of Exposure in Taiwan: A Population-Based Study.

17-Allylamino-17-demethoxygeldanamycin and Herbimycin A Induce Cell Death by Modulating β -Catenin and PI3K/AKT Signaling in FRO Anaplastic Thyroid Carcinoma Cells.

Several Ryanodine Receptor Type 1 Gene Mutations of p.Arg2508 Are Potential Sources of Malignant Hyperthermia.

Residential Exposure to Pesticide During Childhood and Childhood Cancers: A Meta-Analysis.

Iron Absorption from an Intrinsically Labeled Lentil Meal Is Low but Upregulated in Women with Poor Iron Status.

Proximal tubular efflux transporters involved in renal excretion of p-cresyl sulfate and p-cresyl glucuronide: Implications for chronic kidney disease pathophysiology.

Modulation of Glycosaminoglycans Affects PrPSc Metabolism but Does Not Block PrPSc Uptake.

A randomized trial of intravenous and oral iron in chronic kidney disease.

Small molecule inhibitors of PSD95-nNOS protein-protein interactions as novel analgesics.

Maternal occupational pesticide exposure and risk of congenital heart defects in the National Birth Defects Prevention Study.

Current skin symptoms of Yusho patients exposed to high levels of 2,3,4,7,8-pentachlorinated dibenzofuran and polychlorinated biphenyls in 1968.

Vitamin B12 and folate levels increase during treatment of iron deficiency anaemia in young adult woman.

Activation of the Prostaglandin E2 receptor EP2 prevents house dust mite-induced airway hyperresponsiveness and inflammation by restraining mast cells' activity.

Regulation of p53-targeting microRNAs by polycyclic aromatic hydrocarbons: Implications in the etiology of multiple myeloma.

Exploring Protein Binding of Uremic Toxins in Patients with Different Stages of Chronic Kidney Disease and during Hemodialysis.

Association between levels of persistent organic pollutants in adipose tissue and cryptorchidism in early childhood: a case-control study.

Continuous Reduction of Protein-Bound Uraemic Toxins with Improved Oxidative Stress by Using the Oral Charcoal Adsorbent AST-120 in Haemodialysis Patients.

Human bronchial epithelial BEAS-2B cells, an appropriate in vitro model to study heavy metals induced carcinogenesis.

A Curcumin Derivative That Inhibits Vinyl Carbamate-Induced Lung Carcinogenesis via Activation of the Nrf2 Protective Response.

KML001 Induces Apoptosis and Autophagic Cell Death in Prostate Cancer Cells via Oxidative Stress Pathway.

Protective effects of melatonin against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced cardiac injury in rats.

Increasing frequency of severe clinical toxicity after use of 2,4-dinitrophenol in the UK: a report from the National Poisons Information Service.

Effects of nanoparticle-encapsulated curcumin on arsenic-induced liver toxicity in rats.

Metabolic outcome of female mice exposed to a mixture of low-dose pollutants in a diet-induced obesity model.

Synergistic deleterious effect of chronic stress and sodium azide in the mouse hippocampus.

Overexpression of a GmCnx1 gene enhanced activity of nitrate reductase and aldehyde oxidase, and boosted mosaic virus resistance in soybean.

Sodium meta-arsenite prevents the development of autoimmune diabetes in NOD mice.

3-(Benzo[d][1,3]dioxol-5-ylamino)-N-(4-fluorophenyl)thiophene-2-carboxamide overcomes cancer chemoresistance via inhibition of angiogenesis and P-glycoprotein efflux pump activity.

Effects of uremic solutes on reactive oxygen species in vitro model systems as a possibility of support the renal function management.

Pax3 and Pax7 play essential safeguard functions against environmental stress-induced birth defects.

Modulation of colon cancer by nutmeg.

Optimizing early child development for young children with non-anemic iron deficiency in the primary care practice setting (OptEC): study protocol for a randomized controlled trial.

Mitochondrial vulnerability and increased susceptibility to nutrient-induced cytotoxicity in fibroblasts from leigh syndrome French canadian patients.

p-Cresol mediates autophagic cell death in renal proximal tubular cells.

Non-dioxin-like polychlorinated biphenyls (PCB 101, PCB 153 and PCB 180) induce chondrocyte cell death through multiple pathways.

Prevention of pulmonary hypoplasia and pulmonary vascular remodeling by antenatal simvastatin treatment in nitrofen-induced congenital diaphragmatic hernia.

Differential gene expression patterns in developing sexually dimorphic rat brain regions exposed to antiandrogenic, estrogenic, or complex endocrine disruptor mixtures: glutamatergic synapses as target.

The role of TMPRSS6 polymorphisms in iron deficiency anemia partially responsive to oral iron treatment.

Alleviative effect of quercetin on rat testis against arsenic: a histological and biochemical study.

Cytogenotoxicity assessment of monocrotophos and butachlor at single and combined chronic exposures in the fish *Catla catla* (Hamilton).

Chronic cardiovascular disease-associated gene network analysis in human umbilical vein endothelial cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Estrogenic endocrine-disrupting chemicals modulate the production of inflammatory mediators and cell viability of lipopolysaccharide-stimulated macrophages.

Adherence in a pragmatic randomized controlled trial on prophylactic iron supplementation during pregnancy in Maputo, Mozambique.

Gestational exposure to the AhR agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin induces BRCA-1 promoter hypermethylation and reduces BRCA-1 expression in mammary tissue of rat offspring: preventive effects of resveratrol.

Inorganic Arsenic-induced cellular transformation is coupled with genome wide changes in chromatin structure, transcriptome and splicing patterns.

Role of autophagy in arsenite-induced neurotoxicity: the involvement of α -synuclein.

Mitochondrial superoxide in osteocytes perturbs canalicular networks in the setting of age-related osteoporosis.

Controlled-release mitochondrial protonophore reverses diabetes and steatohepatitis in rats.

The cellular and molecular progression of mitochondrial dysfunction induced by 2,4-dinitrophenol in developing zebrafish embryos.

In Ivorian school-age children, infection with hookworm does not reduce dietary iron absorption or systemic iron utilization, whereas afebrile *Plasmodium falciparum* infection reduces iron absorption by half.

Serum metabolomics reveals that arsenic exposure disrupted lipid and amino acid metabolism in rats: a step forward in understanding chronic arsenic toxicity.

Cerenkov-specific contrast agents for detection of pH in vivo.

TCDD-induced activation of aryl hydrocarbon receptor regulates the skin stem cell population.

Developmental exposure to 2,3,7,8 tetrachlorodibenzo-p-dioxin attenuates later-life Notch1-mediated T cell development and leukemogenesis.

Effect of NaFeEDTA-fortified soy sauce on zinc absorption in children.

Internal exposure to organochlorine pollutants and cadmium and self-reported health status: a prospective study.

Uremic toxins, oxidative stress, and renal fibrosis: an intertwined complex.

Is lymphocyte adenosine a diagnostic marker of clinical malignant hyperthermia? A pilot study.

Ferrous sulfate supplementation causes significant gastrointestinal side-effects in adults: a systematic review and meta-analysis.

Behavioral characterization of mouse models of neuroferritinopathy.

Identification of modulators of the nuclear receptor peroxisome proliferator-activated receptor α (PPAR α) in a mouse liver gene expression compendium.

Transcriptional profiling of rat hypothalamus response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Systematic review and meta-analysis: what is the evidence for oral iron supplementation in treating anaemia in elderly people?

Health related quality of life and polychlorinated biphenyls and dibenzofurans exposure: 30 years follow-up of Yucheng cohort.

Cardiac toxicity by sublethal 2,3,7,8-tetrachlorodibenzo-p-dioxin correlates with its anti-proliferation effect on cardiomyocytes in zebrafish embryos.

Effect of uraemia on endothelial cell damage is mediated by the integrin linked kinase pathway.

Novel heat shock protein 90 inhibitor NVP-AUY922 synergizes with the histone deacetylase inhibitor PXD101 in induction of death of anaplastic thyroid carcinoma cells.

The effect of folic acid supplementation with ferrous sulfate on the linear and ponderal growth of children aged 6-24 months: a randomized controlled trial.

Lysyl oxidase expression is decreased in the developing diaphragm and lungs of nitrofen-induced congenital diaphragmatic hernia.

A user-friendly and scalable process to prepare a ready-to-use inactivated vaccine: the example of heartwater in ruminants under tropical conditions.

Aryl hydrocarbon receptor SNP -130 C/T associates with dioxins susceptibility through regulating its receptor activity and downstream effectors including interleukin 24.

Metabolic disturbances of the vitamin A pathway in human diaphragmatic hernia.

Urinary amino acid alterations in 3-year-old children with neurodevelopmental effects due to perinatal dioxin exposure in Vietnam: a nested case-control study for neurobiomarker discovery.

Shed syndecan-1 translocates to the nucleus of cells delivering growth factors and inhibiting histone acetylation: a novel mechanism of tumor-host cross-talk.

Solid lipid nanoparticles loaded with iron to overcome barriers for treatment of iron deficiency anemia.

Clinical and analytical problems of sodium azide poisonings as exemplified by a case of fatal suicidal poisoning.

Ferric maltol (ST10): a novel oral iron supplement for the treatment of iron deficiency anemia in inflammatory bowel disease.

Extrapyramidal system neurotoxicity: animal models.

[MODELING IN VITRO PATHWAYS OF ACTIVATION OF LIPID PEROXIDATION AND PROTEIN IN CHRONIC KIDNEY DISEASE].

Dioxin-Produced Alteration in the Profiles of Fecal and Urinary Metabolomes: A Change in Bile Acids and Its Relevance to Toxicity.

Environment and Endometriosis: a toxic relationship.

Novel 3'-Processing Integrase Activity Assay by Real-Time PCR for Screening and Identification of HIV-1 Integrase Inhibitors.

In Vitro Protective Potentials of *Annona muricata* Leaf Extracts Against Sodium Arsenite-induced Toxicity.

Impact of Indoxyl Sulfate, a Uremic Toxin, on Non-Culprit Coronary Plaque Composition Assessed on Integrated Backscatter Intravascular Ultrasound.

Indoxyl sulfate, not P-cresyl sulfate, is associated with advanced glycation end products in patients on long-term hemodialysis.

Dietary factors in the etiology of Parkinson's disease.

Transgenic sugarcane resistant to Sorghum mosaic virus based on coat protein gene silencing by RNA interference.

Serum free indoxyl sulfate associated with in-stent restenosis after coronary artery stentings.

The influence of low level pre- and perinatal exposure to PCDD/Fs, PCBs, and lead on attention performance and attention-related behavior among German school-aged children: results from the Duisburg Birth Cohort Study.

Borax partially prevents neurologic disability and oxidative stress in experimental spinal cord ischemia/reperfusion injury.

Ferric carboxymaltose: a review of its use in iron deficiency.

Release of uremic retention solutes from protein binding by hypertonic predilution hemodiafiltration.

Enhancement of cytotoxic effect on human head and neck cancer cells by combination of photodynamic therapy and sulforaphane.

Decidual β -carotene-15,15'-oxygenase-1 and 2 (BCMO1,2) expression is increased in nitrofen model of congenital diaphragmatic hernia.

Disruption of copper-dependent signaling pathway in the nitrofen-induced congenital diaphragmatic hernia.

Exposure to As-, Cd-, and Pb-mixture induces $A\beta$, amyloidogenic APP processing and cognitive impairments via oxidative stress-dependent neuroinflammation in young rats.

Effects of acute hypercapnia with and without acidosis on lung inflammation and apoptosis in experimental acute lung injury.

Alterations of platelet functions in children and adolescents with iron-deficiency anemia and response to therapy.

Microbial Metabolism Shifts Towards an Adverse Profile with Supplementary Iron in the TIM-2 In vitro Model of the Human Colon.

Growth Period Effects on the Protective Properties of Aloe vera Against t-BHP-Induced Oxidative Stress in Chang Cells.

Roles of oxidative stress and the ERK1/2, PTEN and p70S6K signaling pathways in arsenite-induced autophagy.

World Health Organization estimates of the global and regional disease burden of four foodborne chemical toxins, 2010: a data synthesis.

Nostoc sp. extract induces oxidative stress-mediated root cell destruction in *Mimosa pigra* L.

Aryl hydrocarbon receptor antagonism and its role in rheumatoid arthritis.

Effect of in utero exposure to endocrine disruptors on fetal steroidogenesis governed by the pituitary-gonad axis: a study in rats using different ways of administration.

Spray Toxicity and Risk Potential of 42 Commonly Used Formulations of Row Crop Pesticides to Adult Honey Bees (Hymenoptera: Apidae).

Combining a PagP fusion protein system with nickel ion-catalyzed cleavage to produce intrinsically disordered proteins in *E. coli*.

Liquid chromatography with tandem mass spectrometry for the determination of flufenoxuron in blood using automatic solid phase extraction and its application to a fatal case of flufenoxuron poisoning.

EPHECT III: Health risk assessment of exposure to household consumer products.

Effects of iron-glycine chelate on growth, carcass characteristic, liver mineral concentrations and haematological and biochemical blood parameters in broilers.

Determination of Heavy Metal Concentrations in Normal and Pathological Human Endometrial Biopsies and In Vitro Regulation of Gene Expression by Metals in the Ishikawa and Hec-1b Endometrial Cell Line.

A fetal whole ovarian culture model for the evaluation of CrVI-induced developmental toxicity during germ cell nest breakdown.

Paraquat and psychological stressor interactions as pertains to Parkinsonian co-morbidity.

Monomethylarsonous Acid (MMAIII) Has an Adverse Effect on the Innate Immune Response of Human Bronchial Epithelial Cells to *Pseudomonas aeruginosa*.

Seahorse Xfe 24 Extracellular Flux Analyzer-Based Analysis of Cellular Respiration in *Caenorhabditis elegans*.

An examination of fitness costs of glyphosate resistance in the common morning glory, *Ipomoea purpurea*.

Developmental origin of abnormal dendritic growth in the mouse brain induced by in utero disruption of aryl hydrocarbon receptor signaling.

Red palm oil-supplemented and biofortified cassava gari increase the carotenoid and retinyl palmitate concentrations of triacylglycerol-rich plasma in women.

Resveratrol via sirtuin-1 downregulates RE1-silencing transcription factor (REST) expression preventing PCB-95-induced neuronal cell death.

Evaluation of [(11)C]methyl-losartan and [(11)C]methyl-EXP3174 for PET imaging of renal AT1receptor in rats.

Differential embryotoxicity of the organic pollutants in rural and urban air particles.

Suicidal Fatality from Azide Ingestion.

Transplanted Lichen *Pseudovernia furfuracea* as a Multi-Tracer Monitoring Tool Near a Solid Waste Incinerator in Italy: Assessment of Airborne Incinerator-Related Pollutants.

The fish embryo test (FET): origin, applications, and future.

Do hormone-modulating chemicals impact on reproduction and development of wild amphibians?

Increased susceptibility of H-Ras(G12V)-transformed human urothelial cells to the genotoxic effects of sodium arsenite.

Treatment Following Intoxication With Lethal Dose of Paraquat: A Case Report and Review of Literature.

Effect of acute paraquat poisoning on CYP450 isoforms activity in rats by cocktail method.

Synthesis of a PET tau tracer [^{11}C]PBB3 for imaging of Alzheimer's disease.

Transcriptional profiling of rat white adipose tissue response to 2,3,7,8-tetrachlorodibenzo-*p*-dioxin.

Absorption of PCB126 by upper airways impairs G protein-coupled receptor-mediated immune response.

Screening a mouse liver gene expression compendium identifies modulators of the aryl hydrocarbon receptor (AhR).

Pathogenicity Stimulation of *Sclerotinia sclerotiorum* by Subtoxic Doses of Carbendazim.

Activation of NRF2 pathway in spleen, thymus as well as peripheral blood mononuclear cells by acute arsenic exposure in mice.

Cordyceps sinensis oral liquid prolongs the lifespan of the fruit fly, *Drosophila melanogaster*, by inhibiting oxidative stress.

Erratum to: Diquat causes caspase-independent cell death in SH-SY5Y cells by production of ROS independently of mitochondria.

2,3,7,8-tetrachlorodibenzo-*p*-dioxin decrease expression of aryl hydrocarbon receptor in peripheral lymphocyte of β^0 -thalassemia major patients.

Tumor necrosis factor- α inhibits effects of aryl hydrocarbon receptor ligands on cell death in human lymphocytes.

Removal of multi-substituted nitroaromatic pollutants by zero valent iron: a comparison of performance, kinetics, toxicity and mechanisms.

Transcription factor p63 controls the reserve status but not the stemness of horizontal basal cells in the olfactory epithelium.

[Fatal course following poisoning with an illegal weight-reducing agent].

The geographic mosaic of herbicide resistance evolution in the common morning glory, *Ipomoea purpurea*: Evidence for resistance hotspots and low genetic differentiation across the landscape.

Biotin amelioration of nephrotoxicity in streptozotocin-induced diabetic mice.

A computational method for the identification of new candidate carcinogenic and non-carcinogenic chemicals.

Silymarin attenuates paraquat-induced lung injury via Nrf2-mediated pathway in *in vivo* and *in vitro*.

Polychlorinated Biphenyls (PCB 101, 153, and 180) Impair Murine Macrophage Responsiveness to Lipopolysaccharide: Involvement of NF- κ B Pathway.

Interleukin-1 β protects astrocytes against oxidant-induced injury via an NF- κ B-dependent upregulation of glutathione synthesis.

Biochemical and Molecular Alterations Following Arsenic-Induced Oxidative Stress and Mitochondrial Dysfunction in Rat Brain.

Green tea (*Camellia sinensis*) alleviates arsenic-induced damages to DNA and intestinal tissues in rat and in situ intestinal loop by reinforcing antioxidant system.

TCDD and corticosterone on testicular steroidogenesis and antioxidant system of epididymal sperm in rats.

Body Mass Parameters, Lipid Profiles and Protein Contents of Zebrafish Embryos and Effects of 2,4-Dinitrophenol Exposure.

Male and female mice show significant differences in hepatic transcriptomic response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Impact of Xuebijing and ulinastatin as assistance for hemoperfusion in treating acute paraquat poisoning.

Fluorescent magnetic bead-based mast cell biosensor for electrochemical detection of allergens in foodstuffs.

Genetic Deficiency of Glutathione S-Transferase P Increases Myocardial Sensitivity to Ischemia-Reperfusion Injury.

Substrate and stereocontrolled iodocycloetherification of highly functionalized enantiomerically pure allylic alcohols: application to synthesis of cytotoxic 2-epi jaspine B and its biological evaluation.

Glyphosate, neurological diseases - and the scientific method.

Reproduction of the Medicinal Plant *Pelargonium sidoides* via Somatic Embryogenesis.

Effect of heat stress-induced production of mitochondrial reactive oxygen species on NADPH oxidase and heme oxygenase-1 mRNA levels in avian muscle cells.

The mitochondrial uncoupler DNP triggers brain cell mTOR signaling network reprogramming and CREB pathway up-regulation.

Acute toxicity of selected organic pollutants to saltwater (mysid *Siriella armata*) and freshwater (cladoceran *Daphnia magna*) ecotoxicological models.

The effects of drugs with immunosuppressive or immunomodulatory activities on xenobiotics-metabolizing enzymes expression in primary human hepatocytes.

Correlation of Serum Thyroid Hormones Autoantibodies with Self-Reported Exposure to Thyroid Disruptors in a Group of Nonsegmental Vitiligo Patients.

Response to: Letter to the Editor: Blood levels of PCDDs, PCDFs, and coplanar PCBs in Yusho mothers and their descendants: Association with fetal Yusho disease.

Comparison of toxicity values across zebrafish early life stages and mammalian studies: Implications for chemical testing.

Genotoxic effects of boric acid and borax in zebrafish, *Danio rerio* using alkaline comet assay.

Protective effects of thalidomide on pulmonary injuries in a rat model of paraquat intoxication.

Severe Illness from Methyl Bromide Exposure at a Condominium Resort--U.S. Virgin Islands, March 2015.

[Endocrine disrupting chemicals exposure and other parental factors in hypospadias and cryptorchidism etiology].

Diagnostic and therapeutic approach for acute paraquat intoxication.

Carcinogenicity of metamifop, a novel herbicide, in Wistar rats following oral administration for 104 weeks.

Metabolic and behavior changes in surubim acutely exposed to a glyphosate-based herbicide.

Tissue sensitivity of the rat upper and lower extrapulmonary airways to the inhaled electrophilic air pollutants diacetyl and acrolein.

Soil surface colonization by phototrophic indigenous organisms, in two contrasted soils treated by formulated maize herbicide mixtures.

Induced pluripotent stem cells without c-Myc ameliorate retinal oxidative damage via paracrine effects and reduced oxidative stress in rats.

Metallothioneins attenuate paraquat-induced acute lung injury in mice through the mechanisms of anti-oxidation and anti-apoptosis.

Progression of DNA damage induced by a glyphosate-based herbicide in fish (*Anguilla anguilla*) upon exposure and post-exposure periods--insights into the mechanisms of genotoxicity and DNA repair.

Occupational exposure to pesticides and endotoxin and Parkinson disease in the Netherlands.

AMP-activated protein kinase deficiency rescues paraquat-induced cardiac contractile dysfunction through an autophagy-dependent mechanism.

Toxic effects of paraquat on cytokine expression in common carp, *Cyprinus carpio* L.

Negative effects of low dose atrazine exposure on the development of effective immunity to FV3 in *Xenopus laevis*.

Guarana (*Paullinia cupana* Mart.) prevents β -amyloid aggregation, generation of advanced glycation-end products (AGEs), and acrolein-induced cytotoxicity on human neuronal-like cells.

Pesticide exposure as a risk factor for myelodysplastic syndromes: a meta-analysis based on 1,942 cases and 5,359 controls.

Immediate and delayed effects of subchronic Paraquat exposure during an early differentiation stage in 3D-rat brain cell cultures.

Pesticides exposure as etiological factors of Parkinson's disease and other neurodegenerative diseases--a mechanistic approach.

Exchange transfusion can be life-saving in severe propanil poisoning: a case report.

Evaluation of the genotoxicity of a herbicide formulation containing 3,6-dichloro-2-methoxybenzoic acid (dicamba) in circulating blood cells of the tropical fish *Cnesterodon decemmaculatus*.

A critical review of the epidemiology of Agent Orange/TCDD and prostate cancer.

Effects of field-realistic doses of glyphosate on honeybee appetitive behaviour.

Effects of atrazine and chlorpyrifos on DNA methylation in the liver, kidney and gill of the common carp (*Cyprinus carpio* L.).

QTc prolongation as a useful prognostic factor in acute paraquat poisoning.

Agrichemicals chronically inhibit the cortisol response to stress in fish.

Synergy between glyphosate- and cypermethrin-based pesticides during acute exposures in tadpoles of the common South American toad *Rhinella arenarum*.

Inhibition effect of glyphosate on the acute and subacute toxicity of cadmium to earthworm *Eisenia fetida*.

Histopathological and biochemical changes in goldfish kidney due to exposure to the herbicide Sencor may be related to induction of oxidative stress.

Liposomal inhibition of acrolein-induced injury in rat cultured urothelial cells.

An unusual case of non-fatal poisoning due to herbicide 4-chloro-2-methyl phenoxyacetic acid (MCPA).

Mutation in *Drosophila methuselah* resists paraquat induced Parkinson-like phenotypes.

Prediction of paraquat exposure and toxicity in clinically ill poisoned patients: a model based approach.

Effects of bentazone on lipid peroxidation and antioxidant systems in human erythrocytes in vitro.

The experimental autoimmune encephalomyelitis disease course is modulated by nicotine and other cigarette smoke components.

Alterations in energy/redox metabolism induced by mitochondrial and environmental toxins: a specific role for glucose-6-phosphate-dehydrogenase and the pentose phosphate pathway in paraquat toxicity.

A comparison of temporal trends in United States autism prevalence to trends in suspected environmental factors.

Acrolein induced both pulmonary inflammation and the death of lung epithelial cells.

Pro- and anti-inflammatory cytokine expression in immune organs of the common carp exposed to atrazine and chlorpyrifos.

Synergistic effects on dopamine cell death in a *Drosophila* model of chronic toxin exposure.

Erythema multiforme-like eruption following acute allergic contact dermatitis after exposure to the emulsified herbicide acetochlor.

The effect of cypermethrin, chlorpyrifos, and glyphosate active ingredients and formulations on *Daphnia magna* (Straus).

Alteration of plant physiology by glyphosate and its by-product aminomethylphosphonic acid: an overview.

Effects of the surfactant polyoxyethylene amine (POEA) on genotoxic, biochemical and physiological parameters of the freshwater teleost *Prochilodus lineatus*.

2,4-Dichlorophenoxyacetic acid promotes S-nitrosylation and oxidation of actin affecting cytoskeleton and peroxisomal dynamics.

Antioxidant and neurotoxicity markers in the model organism *Enchytraeus albidus* (Oligochaeta): mechanisms of response to atrazine, dimethoate and carbendazim.

Effects of glyphosate-based herbicides on survival, development, growth and sex ratios of wood frog (*Lithobates sylvaticus*) tadpoles. II: agriculturally relevant exposures to Roundup WeatherMax[®] and Vision[®] under laboratory conditions.

Effects of glyphosate-based herbicides on survival, development, growth and sex ratios of wood frogs (*Lithobates sylvaticus*) tadpoles. I: chronic laboratory exposures to VisionMax[®].

Earthworm tolerance to residual agricultural pesticide contamination: field and experimental assessment of detoxification capabilities.

Acrolein-exposed normal human lung fibroblasts in vitro: cellular senescence, enhanced telomere erosion, and degradation of Werner's syndrome protein.

Comparison between kidney and continuous plasma perfusion for paraquat elimination.

RBE4 cells are highly resistant to paraquat-induced cytotoxicity: studies on uptake and efflux mechanisms.

Effect of glyphosate-based herbicide on early life stages of Java medaka (*Oryzias javanicus*): a potential tropical test fish.

Glucocorticoid with cyclophosphamide for paraquat-induced lung fibrosis.

The LYR factors SDHAF1 and SDHAF3 mediate maturation of the iron-sulfur subunit of succinate dehydrogenase.

Hydrogen peroxide responsive miR153 targets Nrf2/ARE cytoprotection in paraquat induced dopaminergic neurotoxicity.

Toxicity endpoint selections for a simazine risk assessment.

Agent Orange exposure and disease prevalence in Korean Vietnam veterans: the Korean veterans health study.

FTY720 attenuates paraquat-induced lung injury in mice.

Novel molecular events associated with altered steroidogenesis induced by exposure to atrazine in the intact and castrate male rat.

Effects of the acute exposition to glyphosate-based herbicide on oxidative stress parameters and antioxidant responses in a hybrid Amazon fish surubim (*Pseudoplatystoma* sp).

Acrolein decreases endothelial cell migration and insulin sensitivity through induction of let-7a.

Betanin attenuates paraquat-induced liver toxicity through a mitochondrial pathway.

The effects of sublethal levels of 2,4-dichlorophenoxyacetic acid herbicide (2,4-D) on feeding behaviors of the crayfish *O. rusticus*.

Response of the green alga *Oophila* sp., a salamander endosymbiont, to a PSII-inhibitor under laboratory conditions.

CYP2E1-mediated oxidative stress regulates HO-1 and GST expression in maneb- and paraquat-treated rat polymorphonuclear leukocytes.

Comparative evaluation in vitro of the herbicide flurochloridone by cytokinesis-block micronucleus cytome and comet assays.

From surface to intracellular non-invasive nanoscale study of living cells impairments.

[Toxicity of three chlorophenols to protozoa *Tetrahymena thermophila*].

Esophageal perforation and death following glyphosate poisoning.

Glyphosate affects the spontaneous motoric activity of intestine at very low doses - in vitro study.

Response.

Letter to the editor. Re: The perplexing paradox of paraquat: the case for host-based susceptibility and postulated neurodegenerative effects.

An acute exposure to glyphosate-based herbicide alters aromatase levels in testis and sperm nuclear quality.

Subchronic atrazine exposure changes defensive behaviour profile and disrupts brain acetylcholinesterase activity of zebrafish.

Effects of atrazine on endocrinology and physiology in juvenile barramundi, *Lates calcarifer* (Bloch).

Changes in phosphatidylinositol 3-kinase 55 kDa γ expression and subcellular localization may be caspase 6 dependent in paraquat-induced SH-SY5Y apoptosis.

Clinical characteristics of paraquat poisoning in 22 Chinese children.

Unilateral hippocampal infarction associated with an attempted suicide: a case report.

Regulation of expression and activity of multidrug resistance proteins MRP2 and MDR1 by estrogenic compounds in Caco-2 cells. Role in prevention of xenobiotic-induced cytotoxicity.

Mechanisms underlying the neurotoxicity induced by glyphosate-based herbicide in immature rat hippocampus: involvement of glutamate excitotoxicity.

Heat shock protein-70 (Hsp-70) suppresses paraquat-induced neurodegeneration by inhibiting JNK and caspase-3 activation in *Drosophila* model of Parkinson's disease.

Hemolytic uremic syndrome associated with paraquat intoxication.

[Tumor necrosis factor- α induced protein 6 attenuates acute kidney injury following paraquat poisoning in rats].

[The efficacy of traditional Chinese medicine in animal model of lung injury induced by paraquat: a meta-analysis].

[Reproduction of acute lung injury model induced by paraquat in piglet].

[The interventional effect of Xuebijing injection on expression of mitochondrial fusion protein 2 and the ultrastructure changes in lung tissues in rats with paraquat poisoning].

[Total flavonoids from *Astragalus complanatus* attenuates lung injury following paraquat poisoning in rats through inhibiting excessive endoplasmic reticulum stress and c-Jun N-terminal kinase pathway].

[An analysis of relevant factors of early death in acute paraquat poisoning].

[Early acute liver injury in paraquat poisoning rats].

[Relationship between endothelial damage and p120-catenin in paraquat intoxication and the protective effect of mangiferin].

Atrazine and pregnancy outcomes: a systematic review of epidemiologic evidence.

The impact of Agent Orange on characteristics of coronary artery lesion and repeat revascularization.

Endogenous dopamine is involved in the herbicide paraquat-induced dopaminergic cell death.

National toxicovigilance for pesticide exposures resulting in health care contact - An example from the UK's National Poisons Information Service.

Methylene blue protects against paraquat-induced acute lung injury in rats.

New insights into antioxidant strategies against paraquat toxicity.

Effects of glyphosate on growth rate, metabolic rate and energy reserves of early juvenile crayfish, *Cherax quadricarinatus* M.

The difference between temperate and tropical saltwater species' acute sensitivity to chemicals is relatively small.

Histopathological and estrogen effect of pentachlorophenol on the rare minnow (*Gobiocypris rarus*).

Genotoxic effects of glyphosate or paraquat on earthworm coelomocytes.

Protective effects of exogenous γ -hydroxybutyrate on paraquat toxicity in rat kidney.

Allopurinol reduces levels of urate and dopamine but not dopaminergic neurons in a dual pesticide model of Parkinson's disease.

Acrolein and asthma attack prevalence in a representative sample of the United States adult population 2000-2009.

Airborne acrolein induces keratin-8 (Ser-73) hyperphosphorylation and intermediate filament ubiquitination in bronchiolar lung cell monolayers.

[Prognosis value of urine paraquat semi-quantitative in the patients with acute paraquat poisoning].

[Curcumin alleviated liver oxidative stress injury of rat induced by paraquat].

The effect of glyphosate, its metabolites and impurities on erythrocyte acetylcholinesterase activity.

Validity of geographically modeled environmental exposure estimates.

Impact of glyphosate and glyphosate-based herbicides on the freshwater environment.

The perplexing paradox of paraquat: the case for host-based susceptibility and postulated neurodegenerative effects.

Acute toxicity of multi-walled carbon nanotubes, sodium pentachlorophenate, and their complex on earthworm *Eisenia fetida*.

Naringenin exerts cytoprotective effect against paraquat-induced toxicity in human bronchial epithelial BEAS-2B cells through NRF2 activation.

Diuron-induced rat urinary bladder carcinogenesis: mode of action and human relevance evaluations using the International Programme on Chemical Safety framework.

Exacerbation of symptoms in agricultural pesticide applicators with asthma.

Non-Hodgkin lymphoma and occupational exposure to agricultural pesticide chemical groups and active ingredients: a systematic review and meta-analysis.

Mesoamerica's mystery killer.

Î±-Tocopheryl succinate pre-treatment attenuates quinone toxicity in prostate cancer PC3 cells.

Toxic effects of atrazine on reproductive system of male rats.

Dermal developmental toxicity of N-phenylimide herbicides in rats.

[The prognostic value of the Acute Kidney Injury Network criteria in patients with acute paraquat poisoning].

Agent Orange and heart disease: is there a connection?

Long-term exposure to paraquat alters behavioral parameters and dopamine levels in adult zebrafish (*Danio rerio*).

Effect of superoxide dismutase-entrapped liposomes and protein transduction domain-superoxide dismutase on human umbilical vein endothelial cells.

Effect of transforming growth factor-Î²1 on acute lung injury caused by paraquat.

Lithium prevents acrolein-induced neurotoxicity in HT22 mouse hippocampal cells.

Environmental neurotoxic challenge of conditional alpha-synuclein transgenic mice predicts a dopaminergic olfactory-striatal interplay in early PD.

Potential microbial toxicity and non-target impact of different concentrations of glyphosate-containing herbicide (GCH) in a model Pervious Paving System.

Molecular mechanisms of paraquat-induced acute lung injury: a current review.

A high constitutive catalase activity confers resistance to methyl viologen-promoted oxidative stress in a mutant of the cyanobacterium *Nostoc punctiforme* ATCC 29133.

Chlorpropham and phenisopham: phototransformation and ecotoxicity of carbamates in the aquatic environment.

Toxicological properties of the thiolated inorganic arsenic and arsenosugar metabolite thio-dimethylarsinic acid in human bladder cells.

Kidney biomarkers in MCPA-induced acute kidney injury in rats: reduced clearance enhances early biomarker performance.

Chronic exposure of mice to environmental endocrine-disrupting chemicals disturbs their energy metabolism.

Systems biology approach for evaluating the biological impact of environmental toxicants in vitro.

Cytotoxicity and genotoxicity caused by yttrium oxide nanoparticles in HEK293 cells.

A novel function of sanshools: the alleviation of injury from metolachlor in rice seedlings.

Influence of paraquat on *Chrysomya megacephala* (Fabricius) (Diptera: Calliphoridae) infesting minced-beef substrates in Kelantan, Malaysia.

[Standardized nursing effect of oral damage in acute paraquat poisoning].

[Protective effect of ghrelin against paraquat-induced acute lung injury in mice].

Exposure of mice to atrazine and its metabolite diaminochlorotriazine elicits oxidative stress and endocrine disruption.

Allergic dermatitis from cyanamide for chronic alcoholism detoxification.

Inflammatory and cytotoxic effects of acrolein, nicotine, acetylaldehyde and cigarette smoke extract on human nasal epithelial cells.

Identification of toxicants in cinnamon-flavored electronic cigarette refill fluids.

Consequences of developmental exposure to concentrated ambient ultrafine particle air pollution combined with the adult paraquat and maneb model of the Parkinson's disease phenotype in male mice.

Immunological effects of paraquat on common carp, *Cyprinus carpio* L.

Assessment of DNA damage, cytotoxicity, and apoptosis in human hepatoma (HepG2) cells after flurochloridone herbicide exposure.

Dietary administration of paraquat for 13 weeks does not result in a loss of dopaminergic neurons in the substantia nigra of C57BL/6J mice.

Heart rate-corrected QT interval predicts mortality in glyphosate-surfactant herbicide-poisoned patients.

The effects of 24-h exposure to carbaryl or atrazine on the locomotor performance and overwinter growth and survival of juvenile spotted salamanders (*Ambystoma maculatum*).

Herbicides induce change in metabolic and genetic diversity of bacterial community from a cold oligotrophic lake.

A single exposure to acrolein desensitizes baroreflex responsiveness and increases cardiac arrhythmias in normotensive and hypertensive rats.

Maternal periconceptional occupational exposure to pesticides and selected musculoskeletal birth defects.

Degeneration modulates retinal response to transient exogenous oxidative injury.

Glyphosate, hard water and nephrotoxic metals: are they the culprits behind the epidemic of chronic kidney disease of unknown etiology in Sri Lanka?

Use of a glyphosate-based herbicide-induced nephrotoxicity model to investigate a panel of kidney injury biomarkers.

N-acetyl cysteine prevents synergistic, severe toxicity from two hits of oxidative stress.

Clinico-hematological and tissue changes induced by butachlor in male Japanese quail (*Coturnix japonica*).

Evaluation of exhaled nitric oxide in acute paraquat poisoning: a pilot study.

Cellular impact of combinations of endosulfan, atrazine, and chlorpyrifos on human primary hepatocytes and HepaRG cells after short and chronic exposures.

Effects of repeated applications of chlorimuron-ethyl on the soil microbial biomass, activity and microbial community in the greenhouse.

Flurochloridone-based herbicides induced genotoxicity effects on *Rhinella arenarum* tadpoles (Anura: Bufonidae).

Longevity effect of IGF-1R(+/-) mutation depends on genetic background-specific receptor activation.

[Protective effect and mechanisms of pituitrin on acute paraquat-induced lung injury in rats].

Addition of immunosuppressive treatment to hemoperfusion is associated with improved survival after paraquat poisoning: a nationwide study.

Fluorescence detecting of paraquat using host-guest chemistry with cucurbit[8]uril.

Rotenone and paraquat perturb dopamine metabolism: A computational analysis of pesticide toxicity.

Trivalent arsenic species induce changes in expression and levels of proinflammatory cytokines in intestinal epithelial cells.

Acrolein, a highly toxic aldehyde generated under oxidative stress in vivo, aggravates the mouse liver damage after acetaminophen overdose.

Effect of prometryne on early life stages of marbled crayfish (*Procambarus fallax f. virginalis*).

The effect of subchronic metribuzin exposure to signal crayfish (*Pacifastacus leniusculus* Dana 1852).

Effects of the exposure of fish to triazine herbicides.

Cytoprotective effect of kaempferol on paraquat-exposed BEAS-2B cells via modulating expression of MUC5AC.

CB2 receptor activation ameliorates the proinflammatory activity in acute lung injury induced by paraquat.

[Oxidative stress and antioxidant therapy with alpha-lipoic acid inclusion in acute poisoning by herbicide based on 2,4-dichlorophenoxyacetic acid].

Evaluation of biochemical, haematological, and histopathological responses and recovery ability of common carp (*Cyprinus carpio* L.) after acute exposure to atrazine herbicide.

Effect of chronic exposure to prometryne on oxidative stress and antioxidant response in red swamp crayfish (*Procambarus clarkii*).

Major pesticides are more toxic to human cells than their declared active principles.

Changes in ultrastructure and expression of steroidogenic factor-1 in ovaries of zebrafish *Danio rerio* exposed to glyphosate.

Therapeutic effect of magnesium isoglycyrrhizinate in rats on lung injury induced by paraquat poisoning.

[Curcumin reduces paraquat-induced oxidative injury in A549 cells by activation of the Nrf2-ARE pathway].

Hemodialysis clearance of glyphosate following a life-threatening ingestion of glyphosate-surfactant herbicide.

Hematological and histopathological changes in silver catfish *Rhamdia quelen* (Siluriformes) exposed to clomazone herbicide in the Madre River, Santa Catarina State, Southern Brazil.

Clinical characteristics of patients after dicamba herbicide ingestion.

Effects of acute exposures to mecoprop, mecoprop-p and their biodegradation product (2-MCP) on the larval stages of the Pacific oyster, *Crassostrea gigas*.

Essential roles of iron superoxide dismutase in photoautotrophic growth of *Synechocystis* sp. PCC 6803 and heterogeneous expression of marine *Synechococcus* sp. CC9311 copper/zinc superoxide dismutase within its sodB knockdown mutant.

Development of acute and chronic sediment bioassays with the harpacticoid copepod *Quinquelaophonte* sp.

Chronic exposure to pentachlorophenol alters thyroid hormones and thyroid hormone pathway mRNAs in zebrafish.

Elevated water temperature reduces the acute toxicity of the widely used herbicide diuron to a green alga, *Pseudokirchneriella subcapitata*.

Effects of multigenerational exposures of *D. magna* to environmentally relevant concentrations of pentachlorophenol.

Consensus diagnoses and mode of action for the formation of gastric tumors in rats treated with the chloroacetanilide herbicides alachlor and butachlor.

The impact of Agent Orange exposure on presentation and prognosis of patients with chronic lymphocytic leukemia.

Selenoprotein H suppresses cellular senescence through genome maintenance and redox regulation.

Herbicide paraquat induces sex-specific variation of neuroinflammation and neurodegeneration in *Drosophila melanogaster*.

Catalase inhibition in diabetic rats potentiates DNA damage and apoptotic cell death setting the stage for cardiomyopathy.

Curcumin's neuroprotective efficacy in *Drosophila* model of idiopathic Parkinson's disease is phase specific: implication of its therapeutic effectiveness.

Agent Orange exposure and risk of death in Korean Vietnam veterans: Korean Veterans Health Study.

Protective effects of intranasal curcumin on paraquat induced acute lung injury (ALI) in mice.

MDR1 transporter protects against paraquat-induced toxicity in human and mouse proximal tubule cells.

Metabolism of arsenic trioxide in acute promyelocytic leukemia cells.

Atorvastatin attenuates the paraquat-induced pulmonary inflammation via PPAR γ receptors: a new indication for atorvastatin.

The blockade of transient receptor potential ankirin 1 (TRPA1) signalling mediates antidepressant- and anxiolytic-like actions in mice.

Statil suppresses cancer cell growth and proliferation by the inhibition of tumor marker AKR1B10.

Pharmacological inhibition of CXCR2 chemokine receptors modulates paraquat-induced intoxication in rats.

Acrolein exposure is associated with increased cardiovascular disease risk.

Imbalance of caveolin-1 and eNOS expression in the pulmonary vasculature of experimental diaphragmatic hernia.

Interaction of plasma glutathione redox and folate deficiency on arsenic methylation capacity in Bangladeshi adults.

Localized changes to glycogen synthase kinase-3 and collapsin response mediator protein-2 in the Huntington's disease affected brain.

Differences of urinary arsenic metabolites and methylation capacity between individuals with and without skin lesions in Inner Mongolia, Northern China.

Genetic characterization of the acetohydroxyacid synthase (AHAS) gene responsible for resistance to imidazolinone in chickpea (*Cicer arietinum* L.).

Gallic acid functions as a TRPA1 antagonist with relevant antinociceptive and antiedematogenic effects in mice.

Arsenic methylation capacity and developmental delay in preschool children in Taiwan.

Increased immunoglobulin production in silver catfish (*Rhamdia quelen*) exposed to agrichemicals.

Acrolein detection: potential theranostic utility in multiple sclerosis and spinal cord injury.

Research on tumorigenicity of cinnamaldehyde in melanoma cell lines and its mechanism.

Liposome-encapsulated cinnamaldehyde enhances zebrafish (*Danio rerio*) immunity and survival when challenged with *Vibrio vulnificus* and *Streptococcus agalactiae*.

Transplastomic *Nicotiana benthamiana* plants expressing multiple defence genes encoding protease inhibitors and chitinase display broad-spectrum resistance against insects, pathogens and abiotic stresses.

Neuroprotective role of hydralazine in rat spinal cord injury-attenuation of acrolein-mediated damage.

wALADin benzimidazoles differentially modulate the function of porphobilinogen synthase orthologs.

Distinction between mild cognitive impairment and Alzheimer's disease by CSF amyloid β^{240} and β^{242} , and protein-conjugated acrolein.

Polyphenols bearing cinnamaldehyde scaffold showing cell growth inhibitory effects on the cisplatin-resistant A2780/Cis ovarian cancer cells.

The impact of a specific blend of essential oil components and sodium butyrate in feed on growth performance and *Salmonella* counts in experimentally challenged broilers.

Advanced glycation end products of beta2-microglobulin in uremic patients as determined by high resolution mass spectrometry.

Mechanical stretch exacerbates the cell death in SH-SY5Y cells exposed to paraquat: mitochondrial dysfunction and oxidative stress.

Acrolein involvement in sensory and behavioral hypersensitivity following spinal cord injury in the rat.

The pentachlorophenol metabolite tetrachlorohydroquinone induces massive ROS and prolonged p-ERK expression in splenocytes, leading to inhibition of apoptosis and necrotic cell death.

Antinociceptive and anti-inflammatory activities of extract and two isolated flavonoids of *Carthamus tinctorius* L.

Absence of P-glycoprotein transport in the pharmacokinetics and toxicity of the herbicide paraquat.

Effect of lung fibrosis on glycogen content in different extrapulmonary tissues.

Orally delivered water soluble Coenzyme Q10 (Ubisol-Q10) blocks on-going neurodegeneration in rats exposed to paraquat: potential for therapeutic application in Parkinson's disease.

Parkinson's disease, lights and melanocytes: looking beyond the retina.

[Oral health care by utilizing food function].

Synthesis, characterization, and preclinical evaluation of new thiazolidin-4-ones substituted with p-chlorophenoxy acetic acid and clofibrac acid against insulin resistance and metabolic disorder.

TRPA1: a transducer and amplifier of pain and inflammation.

Dual pH-sensitive oxidative stress generating micellar nanoparticles as a novel anticancer therapeutic agent.

Optimization of culturing conditions for toxicity testing with the alga *Oophila* sp. (Chlorophyceae), an amphibian endosymbiont.

Melatonin Reverses Fas, E2F-1 and Endoplasmic Reticulum Stress Mediated Apoptosis and Dysregulation of Autophagy Induced by the Herbicide Atrazine in Murine Splenocytes.

Centrally formed acetaldehyde mediates ethanol-induced brain PKA activation.

[The effect of selective phosphatase inhibitors Salubrinal on autophagy and apoptosis in the lung tissue of rats with acute paraquat poisoning].

Ectopic expression of the human MutT-type Nudix hydrolase, hMTH1, confers enhanced tolerance to oxidative stress in arabidopsis.

Nar1 deficiency results in shortened lifespan and sensitivity to paraquat that is rescued by increased expression of mitochondrial superoxide dismutase.

Cinnamaldehyde and cinnamaldehyde-containing micelles induce relaxation of isolated porcine coronary arteries: role of nitric oxide and calcium.

OxyR and SoxR modulate the inducible oxidative stress response and are implicated during different stages of infection for the bacterial phytopathogen *Pantoea stewartii* subsp. *stewartii*.

Acrolein activates cell survival and apoptotic death responses involving the endoplasmic reticulum in A549 lung cells.

Alkaline pH activates the transport activity of GLUT1 in L929 fibroblast cells.

Carvacrol and trans-cinnamaldehyde reduce *Clostridium difficile* toxin production and cytotoxicity in vitro.

Acrolein modification impairs key functional features of rat apolipoprotein E: identification of modified sites by mass spectrometry.

Disposition of atrazine metabolites following uptake and degradation of atrazine in switchgrass.

The knockdown of chloroplastic ascorbate peroxidases reveals its regulatory role in the photosynthesis and protection under photo-oxidative stress in rice.

Effects of in vivo chronic exposure to pendimethalin on EROD activity and antioxidant defenses in rainbow trout (*Oncorhynchus mykiss*).

p-Cresol affects reactive oxygen species generation, cell cycle arrest, cytotoxicity and inflammation/atherosclerosis-related modulators production in endothelial cells and mononuclear cells.

Herbimycin A inhibits cell growth with reversal of epithelial-mesenchymal transition in anaplastic thyroid carcinoma cells.

[Tetrachlorodibenzo-p-dioxin-induced cleft palate because of partial loss of cell polarity to interfere with apoptosis during early developmental stage].

Aryl hydrocarbon receptor ligands in cancer: friend and foe.

Neurological and neurophysiological examinations of workers exposed to arsenic levels exceeding hygiene standards.

Prenatal administration of neuropeptide bombesin promotes lung development in a rat model of nitrofen-induced congenital diaphragmatic hernia.

Dietary early-life exposure to contaminated eels does not impair spatial cognitive performances in adult offspring mice as assessed in the Y-maze and the Morris water maze.

Small-molecule inhibitors at the PSD-95/nNOS interface attenuate MPP⁺-induced neuronal injury through Sirt3 mediated inhibition of mitochondrial dysfunction.

Withania somnifera alleviates parkinsonian phenotypes by inhibiting apoptotic pathways in dopaminergic neurons.

Effect of iron supplementation on the expression of hypoxia-inducible factor and antioxidant status in rats exposed to high-altitude hypoxia environment.

A nanoparticulate ferritin-core mimetic is well taken up by HuTu 80 duodenal cells and its absorption in mice is regulated by body iron.

Prenatal administration of all-trans retinoic acid upregulates leptin signaling in hypoplastic rat lungs with experimental congenital diaphragmatic hernia.

Increased pulmonary vascular expression of Krüppel-like factor 5 and activated survivin in experimental congenital diaphragmatic hernia.

An efficient in vitro process for cyclic clonal production of shoots from adult tree of *Cassia alata* L. and evaluation of genetic stability using DNA-based markers.

Cognitive impairment associated with low ferritin responsive to iron supplementation.

Genetic deletion of LXR β prevents arsenic-enhanced atherosclerosis, but not arsenic-altered plaque composition.

Silencing KRAS overexpression in arsenic-transformed prostate epithelial and stem cells partially mitigates malignant phenotype.

In vivo kinetics of the uremic toxin p-cresyl sulfate in mice with variable renal function.

Sodium arsenite induces apoptosis and Epstein-Barr virus reactivation in lymphoblastoid cells.

Potential roles of noncoding RNAs in environmental epigenetic transgenerational inheritance.

Dioxin induction of transgenerational inheritance of disease in zebrafish.

Net survival after exposure to polychlorinated biphenyls and dioxins: the Yusho study.

Potential involvement of chemicals in liver cancer progression: an alternative toxicological approach combining biomarkers and innovative technologies.

Antagonism of ionotropic glutamate receptors attenuates chemical ischemia-induced injury in rat primary cultured myenteric ganglia.

The N-terminal region of p27 inhibits HIF-1 \pm protein translation in ribosomal protein S6-dependent manner by regulating PHLPP-Ras-ERK-p90RSK axis.

Global metabolomic profiling of acute myocarditis caused by *Trypanosoma cruzi* infection.

[A case of multiple organ damage induced by chronic cresol intoxication: a case report].

Antenatal use of bosentan and/or sildenafil attenuates pulmonary features in rats with congenital diaphragmatic hernia.

Prenatal sodium arsenite affects early development of serotonergic neurons in the fetal rat brain.

The role of nitisinone in tyrosine pathway disorders.

Atorvastatin ameliorates arsenic-induced hypertension and enhancement of vascular redox signaling in rats.

Dynamic changes in metabolic profiles of rats subchronically exposed to mequindox.

Arabidopsis ENHANCED DISEASE SUSCEPTIBILITY1 promotes systemic acquired resistance via azelaic acid and its precursor 9-oxo nonanoic acid.

Arsenic exposure disrupts the normal function of the FA/BRCA repair pathway.

Uremic toxicity and sclerostin in chronic kidney disease patients.

Effects of developmental activation of the AhR on CD4⁺ T-cell responses to influenza virus infection in adult mice.

Analysis of dopaminergic neuronal dysfunction in genetic and toxin-induced models of Parkinson's disease in *Drosophila*.

Serum total p-cresylsulfate level is associated with abnormal QTc interval in stable angina patients with early stage of renal failure.

Low brain iron effects and reversibility on striatal dopamine dynamics.

Dioxin-induced fetal growth retardation: the role of a preceding attenuation in the circulating level of glucocorticoid.

2,3,7,8-Tetrachlorodibenzo-p-dioxin in breast milk increases autistic traits of 3-year-old children in Vietnam.

Fructo-oligosaccharides and iron bioavailability in anaemic rats: the effects on iron species distribution, ferroportin-1 expression, crypt bifurcation and crypt cell proliferation in the caecum.

[Iron deficiency. Effective: oral substitution].

AhR signalling and dioxin toxicity.

[Rheumatology: Progress in Diagnosis and Treatments. Topics: III. Rheumatoid Arthritis and Allied Conditions; 2. Allied Conditions. 2) Polymyalgia rheumatica].

The novel regulations of MEF2A, CAMKK2, CALM3, and TNNI3 in ventricular hypertrophy induced by arsenic exposure in rats.

Microcytic anemia.

The comparison of antimutagenicity and anticancer activities of *Echinophora platyloba* DC on acute promyelocytic leukemia cancer cells.

Epimorphin expression in a rat model of pulmonary hypoplasia associated with congenital diaphragmatic hernia.

Malondialdehyde, antioxidant enzymes, and renal tubular functions in children with iron deficiency or iron-deficiency anemia.

An integrative risk assessment approach for persistent chemicals: a case study on dioxins, furans and dioxin-like PCBs in France.

Evidence for decreased lipofibroblast expression in hypoplastic rat lungs with congenital diaphragmatic hernia.

Nitrofen increases total retinol levels in placenta during lung morphogenesis in the nitrofen model of congenital diaphragmatic hernia.

Burn after feeding. An old uncoupler of oxidative phosphorylation is redesigned for the treatment of nonalcoholic fatty liver disease.

Effects of in utero exposure of C57BL/6J mice to 2,3,7,8-tetrachlorodibenzo-p-dioxin on epidermal permeability barrier development and function.

Safety and efficacy of lactoferrin versus ferrous sulphate in curing iron deficiency and iron deficiency anaemia in hereditary thrombophilia pregnant women: an interventional study.

Human organic anion transporters function as a high-capacity transporter for p-cresyl sulfate, a uremic toxin.

Defining molecular sensors to assess long-term effects of pesticides on carcinogenesis.

Medication exposure during pregnancy: a pilot pharmacovigilance system using health and demographic surveillance platform.

Therapeutic potential of mesenchymal stem cell transplantation in a nitrofen-induced congenital diaphragmatic hernia rat model.

Functional characterisation of the R2452W ryanodine receptor variant associated with malignant hyperthermia susceptibility.

Myogenin gene expression is not altered in the developing diaphragm of nitrofen-induced congenital diaphragmatic hernia.

Cardiac myocyte-specific AHR activation phenocopies TCDD-induced toxicity in zebrafish.

Targeting mitochondria-derived reactive oxygen species to reduce epithelial barrier dysfunction and colitis.

Urinary p-cresol is elevated in young French children with autism spectrum disorder: a replication study.

Radiosynthesis, photoisomerization, biodistribution, and metabolite analysis of ¹¹C-PBB3 as a clinically useful PET probe for imaging of tau pathology.

Inhibition of human drug-metabolising cytochrome P450 and UDP-glucuronosyltransferase enzyme activities in vitro by uremic toxins.

Mitochondrial reactive oxygen species production and respiratory complex activity in rats with pressure overload-induced heart failure.

Effect of short-term synbiotic treatment on plasma p-cresol levels in patients with chronic renal failure: a randomized clinical trial.

Diet pills and the cataract outbreak of 1935: reflections on the evolution of consumer protection legislation.

Pesticide exposure and depression among male private pesticide applicators in the agricultural health study.

Uraemic toxins and cardiovascular disease across the chronic kidney disease spectrum: an observational study.

Involvement of COX2-thromboxane pathway in TCDD-induced precardiac edema in developing zebrafish.

The uremic toxicity of indoxyl sulfate and p-cresyl sulfate: a systematic review.

Uremic toxin p-cresol induces Akt-pathway-selective insulin resistance in bone marrow-derived mesenchymal stem cells.

Pesticide use and incident diabetes among wives of farmers in the Agricultural Health Study.

TCDD-induced chick cardiotoxicity is abolished by a selective cyclooxygenase-2 (COX-2) inhibitor NS398.

Neurodevelopmental retardation, as assessed clinically and with magnetoencephalography and electroencephalography, associated with perinatal dioxin exposure.

Ultrasound-guided proximal paravertebral anaesthesia in cattle.

Indoxyl sulfate and p-cresyl sulfate in chronic kidney disease. Could these toxins modulate the antioxidant Nrf2-Keap1 pathway?

Microvascular dysfunction with increased vascular leakage response in mice systemically exposed to arsenic.

Effects of iron supplementation on dominant bacterial groups in the gut, faecal SCFA and gut inflammation: a randomised, placebo-controlled intervention trial in South African children.

Toxicological profile of ultrapure 2,2',3,4,4',5,5'-heptachlorobiphenyl (PCB 180) in adult rats.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on hormones of energy balance in a TCDD-sensitive and a TCDD-resistant rat strain.

High-content screening in zebrafish embryos identifies butafenacil as a potent inducer of anemia.

The importance of heart murmur in the neonatal period and justification of echocardiographic review.

The involvement of the Mid1/Cch1/Yvc1 calcium channels in *Aspergillus fumigatus* virulence.

Farm residence and lymphohematopoietic cancers in the Iowa Women's Health Study.

Statin-induced inhibition of breast cancer proliferation and invasion involves attenuation of iron transport: intermediacy of nitric oxide and antioxidant defence mechanisms.

Clinical and etiological heterogeneity in patients with tracheo-esophageal malformations and associated anomalies.

Birth defects and congenital health risks in children conceived through assisted reproduction technology (ART): a meeting report.

Sodium arsenite induces ROS-dependent autophagic cell death in pancreatic \hat{I}^2 -cells.

Effects of ferrofluid and phytoalexin spirobrassinin on thioflavin-T-based fluorescence in cerebrospinal fluid of the elderly and multiple sclerosis patients.

Zinc supplementation sustained normative neurodevelopment in a randomized, controlled trial of Peruvian infants aged 6-18 months.

Ferroportin mediates the intestinal absorption of iron from a nanoparticulate ferritin core mimetic in mice.

Activation of the aryl hydrocarbon receptor affects activation and function of human monocyte-derived dendritic cells.

Long-term low-dose exposure of human urothelial cells to sodium arsenite activates lipocalin-2 via promoter hypomethylation.

Pesticide methoxychlor promotes the epigenetic transgenerational inheritance of adult-onset disease through the female germline.

The association of uremic toxins and inflammation in hemodialysis patients.

Aryl hydrocarbon receptor catabolic activity in bone metabolism is osteoclast dependent in vivo.

Concerning RNA-guided gene drives for the alteration of wild populations.

Effect of supplementation with ferrous sulfate or iron bis-glycinate chelate on ferritin concentration in Mexican schoolchildren: a randomized controlled trial.

The chemical uncoupler 2,4-dinitrophenol (DNP) protects against diet-induced obesity and improves energy homeostasis in mice at thermoneutrality.

The aryl hydrocarbon receptor ligand omeprazole inhibits breast cancer cell invasion and metastasis.

Interplay between Dioxin-mediated signaling and circadian clock: a possible determinant in metabolic homeostasis.

Reducing iron deficiency anemia in Bolivian school children: calcium and iron combined versus iron supplementation alone.

Activation of neuronal nitric oxide synthase (nNOS) signaling pathway in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced neurotoxicity.

Role of the autonomic nervous system and baroreflex in stress-evoked cardiovascular responses in rats.

Joint effects of urinary arsenic methylation capacity with potential modifiers on arsenicosis: a cross-sectional study from an endemic arsenism area in Huhhot Basin, northern China.

Marginally excessive iron loading transiently blocks mucosal iron uptake in iron-deficient rats.

Dioxins, furans and dioxin-like PCBs in human blood: causes or consequences of diabetic nephropathy?

Gold nanoshells-mediated bimodal photodynamic and photothermal cancer treatment using ultra-low doses of near infra-red light.

Liver tumor promotion by 2,3,7,8-tetrachlorodibenzo-p-dioxin is dependent on the aryl hydrocarbon receptor and TNF/IL-1 receptors.

Thrombin-facilitated efflux of D-[3H]-aspartate from cultured astrocytes and neurons under hyponatremia and chemical ischemia.

Postnatal development of eupneic ventilation and metabolism in rats chronically exposed to moderate hyperoxia.

An audit to review the characteristics and management of placenta praevia at Aberdeen Maternity Hospital, 2009-2011.

Obstetric and neonatal outcomes of maternal vitamin D supplementation: results of an open-label, randomized controlled trial of antenatal vitamin D supplementation in Pakistani women.

Protective effect of ellagic acid against TCDD-induced renal oxidative stress: modulation of CYP1A1 activity and antioxidant defense mechanisms.

Uremic toxins impair human bone marrow-derived mesenchymal stem cells functionality in vitro.

Yusho patients show increased serum IL-17, IL-23, IL-1 β , and TNF α levels more than 40 years after accidental polychlorinated biphenyl poisoning.

Production of the anti-inflammatory compound 6-O-palmitoyl-3-O- β -D-glucopyranosylcampesterol by Callus cultures of *Lopezia racemosa* Cav. (Onagraceae).

A study of the effects of latent iron deficiency on measures of cognition: a pilot randomised controlled trial of iron supplementation in young women.

Hepatoprotective and anticlastogenic effects of ethanol extract of *Irvingia gabonensis* (IG) leaves in sodium arsenite-induced toxicity in male Wistar rats.

The mitochondrial deubiquitinase USP30 opposes parkin-mediated mitophagy.

Contributions of *Fusarium virguliforme* and *Heterodera glycines* to the disease complex of sudden death syndrome of soybean.

Cardiovascular disease relates to intestinal uptake of p-cresol in patients with chronic kidney disease.

A rapid, simple questionnaire to assess gastrointestinal symptoms after oral ferrous sulphate supplementation.

MicroRNA profiling as tool for in vitro developmental neurotoxicity testing: the case of sodium valproate.

[Analgesic effect of DICLORAL on radiation-induced oral mucositis].

Compensation for occupational neurological and mental disorders.

Pd0-mediated rapid cross-coupling reactions, the rapid C-[11C]methylations, revolutionarily advancing the syntheses of short-lived PET molecular probes.

Upregulation of serotonin-receptor-2a and serotonin transporter expression in the pulmonary vasculature of nitrofen-induced congenital diaphragmatic hernia.

Increased uptake of dietary retinoids at the maternal-fetal barrier in the nitrofen model of congenital diaphragmatic hernia.

Amniotic fluid derived mesenchymal stromal cells augment fetal lung growth in a nitrofen explant model.

Relationship between urine dichlorophenol levels and asthma morbidity.

Effects of acute dietary iron overload in pigs (*Sus scrofa*) with induced type 2 diabetes mellitus.

2,3,7,8-Tetrachlorodibenzo-p-dioxin promotes astrocyte activation and the secretion of tumor necrosis factor- α via PKC/SSeCKS-dependent mechanisms.

Wear testing of crosslinked polyethylene: wear rate variability and microbial contamination.

The metabolically healthy but obese phenotype is associated with lower plasma levels of persistent organic pollutants as compared to the metabolically abnormal obese phenotype.

An adsorbent monolith device to augment the removal of uraemic toxins during haemodialysis.

Determinants of cognitive performance in children relying on cyanogenic cassava as staple food.

Aryl hydrocarbon receptor (AhR) agonists increase airway epithelial matrix metalloproteinase activity.

Peroxiredoxin I protein, a potential biomarker of hydronephrosis in fetal mice exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Elevated protein carbonyl and HIF-1 α levels in eyes with proliferative diabetic retinopathy.

Mammalian microtubule P-body dynamics are mediated by nesprin-1.

Heritability and clinical determinants of serum indoxyl sulfate and p-cresyl sulfate, candidate biomarkers of the human microbiome enterotype.

Association of dioxin and other persistent organic pollutants (POPs) with diabetes: epidemiological evidence and new mechanisms of beta cell dysfunction.

Standardization of pulmonary ventilation technique using volume-controlled ventilators in rats with congenital diaphragmatic hernia.

Tetrachlorobenzoquinone induces acute liver injury, up-regulates HO-1 and NQO1 expression in mice model: the protective role of chlorogenic acid.

Protein-bound uremic toxins, inflammation and oxidative stress: a cross-sectional study in stage 3-4 chronic kidney disease.

Metallothionein deficiency impacts copper accumulation and redistribution in leaves and seeds of Arabidopsis.

Interaction between arsenic exposure from drinking water and genetic susceptibility in carotid intima-media thickness in Bangladesh.

Cisplatin plus sodium arsenite and hyperthermia induces pseudo-G1 associated apoptotic cell death in ovarian cancer cells.

Synthesis and biological evaluation of 10-(11) C-dihydratetrabenazine as a vesicular monoamine transporter 2 radioligand.

The thiocarbamate disulphide drug, disulfiram induces osteopenia in rats by inhibition of osteoblast function due to suppression of acetaldehyde dehydrogenase activity.

Durable field resistance to wheat yellow mosaic virus in transgenic wheat containing the antisense virus polymerase gene.

Iron supplementation does not worsen respiratory health or alter the sputum microbiome in cystic fibrosis.

Ultrasound-guided interventional procedures around the shoulder.

Ulceration of the oral mucosa following direct contact with ferrous sulfate in elderly patients: a case report and a review of the French National Pharmacovigilance Database.

Evidence that p-cresol and IL-6 are adsorbed by the HFR cartridge: towards a new strategy to decrease systemic inflammation in dialyzed patients?

The TrkAIII oncoprotein inhibits mitochondrial free radical ROS-induced death of SH-SY5Y neuroblastoma cells by augmenting SOD2 expression and activity at the mitochondria, within the context of a tumour stem cell-like phenotype.

Accommodating measurements below a limit of detection: a novel application of Cox regression.

Augmented atherogenesis in ApoE-null mice co-exposed to polychlorinated biphenyls and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Comparison of two doses of elemental iron in the treatment of latent iron deficiency: efficacy, side effects and blinding capabilities.

Nanoencapsulation of DMSA monoester for better therapeutic efficacy of the chelating agent against arsenic toxicity.

Fruit and vegetable intake, as reflected by serum carotenoid concentrations, predicts reduced probability of polychlorinated biphenyl-associated risk for type 2 diabetes: National Health and Nutrition Examination Survey 2003-2004.

Meat Science and Muscle Biology Symposium: Ecological and dietary impactors of foodborne pathogens and methods to reduce fecal shedding in cattle.

Increased expression of the aryl hydrocarbon receptor in patients with chronic inflammatory skin diseases.

Activation of Nrf2 in keratinocytes causes chloracne (MADISH)-like skin disease in mice.

Alcohol-induced autophagy contributes to loss in skeletal muscle mass.

Downregulation of p300 gene expression in airway mesenchyme of nitrofen-induced hypoplastic lungs.

Using zebrafish as a model system for studying the transgenerational effects of dioxin.

Homoisoflavanone prevents mast cell activation and allergic responses by inhibition of Syk signaling pathway.

Aberrant microRNA expression likely controls RAS oncogene activation during malignant transformation of human prostate epithelial and stem cells by arsenic.

Alcohol oxidizing enzymes and ethanol-induced cytotoxicity in rat pancreatic acinar AR42J cells.

The gut microbiome, kidney disease, and targeted interventions.

The FIND-CKD study--a randomized controlled trial of intravenous iron versus oral iron in non-dialysis chronic kidney disease patients: background and rationale.

Enteric nervous system and esophageal-gastrointestinal motility in experimental congenital diaphragmatic hernia.

Synergistic interactions between PBDEs and PCBs in human neuroblastoma cells.

Uremic toxin development in living kidney donors: a longitudinal study.

Transgenic pearl millet male fertility restorer line (ICMP451) and hybrid (ICMH451) expressing *Brassica juncea* Nonexpressor of pathogenesis related genes 1 (BjNPR1) exhibit resistance to downy mildew disease.

The aryl hydrocarbon receptor-activating effect of uremic toxins from tryptophan metabolism: a new concept to understand cardiovascular complications of chronic kidney disease.

Metabonomic analysis of quercetin against the toxicity of chronic exposure to low-level dichlorvos in rats via ultra-performance liquid chromatography-mass spectrometry.

Persistent environmental pollutants and couple fecundity: an overview.

Drug-induced injury in the gastrointestinal tract.

Effectiveness of wetting method for control of konzo and reduction of cyanide poisoning by removal of cyanogens from cassava flour.

Protein-bound molecules: a large family with a bad character.

Hepatoprotective activity of *Tephrosia purpurea* against arsenic induced toxicity in rats.

Poisoning injuries associated with water and wastewater treatment facilities.

Impact of long-term exposure to sodium arsenite on cytogenetic radiation damage.

Physicochemical factors affecting the growth of *Burkholderia pseudomallei* in soil microcosm.

Community air monitoring for pesticides. Part 3: using health-based screening levels to evaluate results collected for a year.

Disruption of paired-associate learning in rat offspring perinatally exposed to dioxins.

Prominent accumulation in hemodialysis patients of solutes normally cleared by tubular secretion.

Effects of incapacitant spray deployed in the restraint and arrest of detainees in the Metropolitan Police Service area, London, UK: a prospective study.

A new alternative method for testing skin irritation using a human skin model: a pilot study.

Effect of uremic serum and uremic toxins on drug metabolism in human microsomes.

Ferrous bisglycinate 25 mg iron is as effective as ferrous sulfate 50 mg iron in the prophylaxis of iron deficiency and anemia during pregnancy in a randomized trial.

Silibinin potentially attenuates arsenic-induced oxidative stress mediated cardiotoxicity and dyslipidemia in rats.

S cones: Evolution, retinal distribution, development, and spectral sensitivity.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin modulates dysregulation of the lipid metabolism in mouse offspring fed a high-calorie diet.

Aryl hydrocarbon receptor downregulates MYCN expression and promotes cell differentiation of neuroblastoma.

Protein-bound uremic toxins: new culprits of cardiovascular events in chronic kidney disease patients.

Benzimidazoisoquinolines: a new class of rapidly metabolized aryl hydrocarbon receptor (AhR) ligands that induce AhR-dependent Tregs and prevent murine graft-versus-host disease.

Predominant role of cytosolic phospholipase A2 α in dioxin-induced neonatal hydronephrosis in mice.

The NRF2-KEAP1 pathway is an early responsive gene network in arsenic exposed lymphoblastoid cells.

VEGF receptor expression decreases during lung development in congenital diaphragmatic hernia induced by nitrofen.

Disruption of THY-1 signaling in alveolar lipofibroblasts in experimentally induced congenital diaphragmatic hernia.

Decreased apelin and apelin-receptor expression in the pulmonary vasculature of nitrofen-induced congenital diaphragmatic hernia.

Functional characterization of 2 known ryanodine receptor mutations causing malignant hyperthermia.

Prenatal administration of retinoic acid increases the trophoblastic insulin-like growth factor 2 protein expression in the nitrofen model of congenital diaphragmatic hernia.

Micronuclei in cord blood lymphocytes and associations with biomarkers of exposure to carcinogens and hormonally active factors, gene polymorphisms, and gene expression: the NewGeneris cohort.

Exploration of novel predictive markers in rat plasma of the early stages of chronic renal failure.

Elevated blood pressure in offspring of rats exposed to diverse chemicals during pregnancy.

Methylarsonous acid causes oxidative DNA damage in cells independent of the ability to biomethylate inorganic arsenic.

Responsiveness to parenteral iron therapy in children with oral iron-refractory iron-deficiency anemia.

Fetal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin transactivates aryl hydrocarbon receptor-responsive element III in the tyrosine hydroxylase immunoreactive neurons of the mouse midbrain.

Accidental exposure to polychlorinated biphenyls (PCB) in waste cargo after heavy seas. Global waste transport as a source of PCB exposure.

ITE and TCDD differentially regulate the vascular remodeling of rat placenta via the activation of AhR.
