Induction of murine NAD(P)H:quinone oxidoreductase by 2,3,7,8-tetrachlorodibenzo-p-dioxin requires the CNC (cap 'n' collar) basic leucine zipper transcription factor Nrf2 (nuclear factor erythroid 2-related factor 2): cross-interaction between AhR (aryl hydrocarbon receptor) and Nrf2 signal transduction.

Biophysical properties and metabolic regulation of a TASK-like potassium channel in rat carotid body type 1 cells.

Loss of pre-B and IgM(+) B cells in the bone marrow after exposure to a mixture of herbicides.

Effects of environmental estrogenic compounds on growth of a transplanted estrogen responsive pituitary tumor cell line in rats.

Developmental atrazine exposure suppresses immune function in male, but not female Sprague-Dawley rats.

Development, registration and commercialization of microbial pesticides for plant protection.

Changes in mitochondrial electron partitioning in response to herbicides inhibiting branched-chain amino acid biosynthesis in soybean.

Pubertal development in female Wistar rats following exposure to propazine and atrazine biotransformation by-products, diamino-S-chlorotriazine and hydroxyatrazine.

Assessing the impact of triazine herbicides on organophosphate insecticide toxicity to the earthworm *Eisenia fetida*.

Energization of *Comamonas testosteroni* ATCC 17454 for indicating toxic effects of chlorophenoxy herbicides.

Characterization of the stimulating effect of low-dose stressors in maize and bean seedlings.

Modeling and predicting immunological effects of chemical stressors: characterization of a quantitative biomarker for immunological changes caused by atrazine and ethanol.

The Metropolitan Atlanta Congenital Defects Program: 35 years of birth defects surveillance at the Centers for Disease Control and Prevention.

Use of biosensors to screen urine samples for potentially toxic chemicals.

Caspase-3 dependent proteolytic activation of protein kinase C delta mediates and regulates 1-methyl-4-phenylpyridinium (MPP+)-induced apoptotic cell death in dopaminergic cells: relevance to oxidative stress in dopaminergic degeneration.

Toxic nephropathy: environmental chemicals.

Toxicity of cadmium, endosulfan, and atrazine in adrenal steroidogenic cells of two amphibian species, *Xenopus laevis* and *Rana catesbeiana*.

Drosophila Cu,Zn superoxide dismutase gene confers resistance to paraquat in *Escherichia coli*.

Fatal overdose of the herbicide bentazone.

Effects of 2,4-D and its metabolite 2,4-dichlorophenol on antioxidant enzymes and level of glutathione in human erythrocytes.

Comparative metabolism of 2,4-dichlorophenoxyacetic acid (2,4-D) in rat and dog.

Food as a source of dioxin exposure in the residents of Bien Hoa City, Vietnam.

Age-related irreversible progressive nigrostriatal dopaminergic neurotoxicity in the paraquat and maneb model of the Parkinson's disease phenotype.

Protective roles of mitochondrial manganese-containing superoxide dismutase against various stresses in *Candida albicans*.

The herbicide metolachlor induces liver cytochrome P450s 2B1/2 and 3A1/2, but not thyroxine-uridine dinucleotide phosphate glucuronosyltransferase and associated thyroid gland activity.

Impact of Agent Orange exposure among Korean Vietnam veterans.

A toxicity view of the pesticide picloram when immobilized onto a silica gel surface.

The herbicide dicamba (2-methoxy-3,6-dichlorobenzoic acid) interacts with mitochondrial bioenergetic functions.

Immune alterations in mice exposed to the herbicide simazine.

Determination of the immunotoxic potential of pesticides on functional activity of sheep leukocytes in vitro.

Changes in the fatty acid composition and hydroxyproline content in rat lung in relation to collagen synthesis after paraquat administration.

Experimental hepatic uroporphyrinemia induced by the diphenyl-ether herbicide fomesafen in male DBA/2 mice.

A review of the genotoxicity of triallate.

Serum 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) levels and thyroid function in Air Force veterans of the Vietnam War.

Toxicokinetics of organic contaminants in *Hyalella azteca*.

Identification and quantitation of xenobiotics by ¹H NMR spectroscopy in poisoning cases.

Determination of the herbicide glyphosate and its metabolite in biological specimens by gas chromatography-mass spectrometry. A case of poisoning by roundup herbicide.

Cancer and developmental exposure to endocrine disruptors.

Skin tumor-promoting potential and systemic effects of pentachlorophenol and its major metabolite tetrachlorohydroquinone in CD-1 Mice.

Fatty acid elongation is important in the activity of thiocarbamate herbicides and in safening by dichlormid.

Mortality among triazine herbicide manufacturing workers.

Fatal acute poisoning by bentazon.

In vitro studies on the chemical reactivity of 2,4-dichlorophenoxyacetyl-S-acyl-CoA thioester.

Cinnamic compound metabolism in human skin and the role metabolism may play in determining relative sensitisation potency.

Sublethal energetic responses by *Pisidium amnicum* (Bivalvia) exposed to pentachlorophenol at two temperatures.

Oxidative stress as a possible mode of action for arsenic carcinogenesis.

Paraquat and menadione exposure of rainbow trout (*Oncorhynchus mykiss*)--studies of effects on the pentose-phosphate shunt and thiamine levels in liver and kidney.

Detection and quantitation of xenobiotics in biological fluids by ¹H NMR spectroscopy.

Overexpression of CYP2D6 attenuates the toxicity of MPP⁺ in actively dividing and differentiated PC12 cells.

[Comparative analysis of disorders in duodenal lymphoid tissue of mice treated with azathioprine and herbicide 2,4-dichlorophenoxyacetic acid and their correction by plant and animal origin remedies].

Pentachlorophenol poisoning.

The mitochondrial complex I inhibitor annonacin is toxic to mesencephalic dopaminergic neurons by impairment of energy metabolism.

Causes of phytotoxicity of metsulfuron-methyl bound residues in soil.

Quantitation of aberrant interlocus T-cell receptor rearrangements in mouse thymocytes and the effect of the herbicide 2,4-dichlorophenoxyacetic acid.

[Paraquat intoxication].

Comparative effects of herbicide dicamba and related compound on plant mitochondrial bioenergetics.

[The agrochemical arsenal versus the enemies of plants. General considerations].

Damage to the erythrocyte membrane caused by chlorophenoxyacetic herbicides.

The role of herbicides in the erosion of salt marshes in eastern England.

Ischemic insult exacerbates acrolein-induced conduction loss and axonal membrane disruption in guinea pig spinal cord white matter.

Formation of acrolein-derived 2'-deoxyadenosine adduct in an iron-induced carcinogenesis model.

Preferential megalin-mediated transcytosis of low-hormonogenic thyroglobulin: a control mechanism for thyroid hormone release.

Lack of modifying effects of atrazine and/or tamoxifen on thyroid carcinogenesis in rats pretreated with N-bis(2-hydroxypropyl)nitrosamine (DHPN).

Effects of dietary folate intake and folate binding protein-1 (Folbp1) on urinary speciation of sodium arsenate in mice.

[Effect of guizhi tang and its active components on the fever induced by EP3 agonist].

Alpha-tocopherol content and alpha-tocopherol transfer protein expression in leukocytes of children with acute leukemia.

Formation of advanced glycosylation end products and oxidative stress in young patients with type 1 diabetes.

Active arsenic species produced by GSH-dependent reduction of dimethylarsinic acid cause micronuclei formation in peripheral reticulocytes of mice.

Modulation of benzo[a]pyrene-induced p53 DNA activity by acrolein.

Persistence and prevention of aluminium- and paraquat-induced adaptive response to methyl mercuric chloride in plant cells in vivo.

Effects of dietary essential oil components on growth performance, digestive enzymes and lipid metabolism in female broiler chickens.

Paraquat induces long-lasting dopamine overflow through the excitotoxic pathway in the striatum of freely moving rats.

In vitro activity of dimethylarsinic acid against human leukemia and multiple myeloma cell lines.

Oxidative stress and altered antioxidant defenses in children with acute exacerbation of atopic dermatitis.

Acrolein produced from polyamines as one of the uraemic toxins.

Diabetes mellitus and 2,3,7,8-tetrachlorodibenzo-p-dioxin elimination in veterans of Operation Ranch Hand.

Increased urinary levels of pentosidine, pyrroline and acrolein adduct in type 2 diabetes.

Ectopic expression of catalase in *Drosophila* mitochondria increases stress resistance but not longevity.

Asymmetrical development of the monoamine systems in 2,4-dichlorophenoxyacetic acid treated rats.

Analytical method for the determination of atrazine and its dealkylated chlorotriazine metabolites in water using SPE sample preparation and GC-MSD analysis.

[Effects of different water, fertility, and light conditions on allelopathic traits of rice].

[Ultracytochemical localization of calcium and ATPase activity on the 2,4-D induced somatic embryogenesis of *Lycium barbarum* L].

Interactions of paraquat and triadimefon: behavioral and neurochemical effects.

Biological activity of pentachlorophenol on the digestive gland cells of the freshwater mussel *Unio tumidus*.

Infiltration and adsorption of dissolved atrazine and atrazine metabolites in buffalograss filter strips.

Quantitative identification of atrazine and its chlorinated metabolites in plasma.

Role of glutathione redox cycle and catalase in defense against oxidative stress induced by endosulfan in adrenocortical cells of rainbow trout (*Oncorhynchus mykiss*).

The effect of endocrine disrupting chemicals on thyroid hormone binding to Japanese quail transthyretin and thyroid hormone receptor.

Cyclohexanedione herbicides are inhibitors of rat heart acetyl-CoA carboxylase.

Current internal exposure to pesticides in children and adolescents in Germany: blood plasma levels of pentachlorophenol (PCP), lindane (gamma-HCH), and dichloro(diphenyl)ethylene (DDE), a biostable metabolite of dichloro(diphenyl)trichloroethane (DDT).

Impact of the herbicides 2,4-D and diuron on the metabolism of the coral *Porites cylindrica*.

Toxicokinetics, recovery, and metabolism of metamitron in goat.

Accumulation and metabolism of arsenic in mice after repeated oral administration of arsenate.

Stream transport of herbicides and metabolites in a tile-drained, agricultural watershed.

Urinary sulfur-containing metabolite produced by intestinal bacteria following oral administration of dimethylarsinic acid to rats.

Tissue-specific expression and localization of safener-induced glutathione S-transferase proteins in *Triticum tauschii*.

Induction of phenylalanine ammonia-lyase gene expression by paraquat and stress-related hormones in *Rehmannia glutinosa*.

Thermal and metabolic factors affecting bioaccumulation of triazine herbicides by rainbow trout (*Oncorhynchus mykiss*).

Comparative toxicity of ifosfamide metabolites and protective effect of mesna and amifostine in cultured renal tubule cells.

Mineralization of soil-aged isoproturon and isoproturon metabolites by *Sphingomonas* sp. strain SRS2.

Human prenatal and postnatal exposure to polybrominated diphenyl ethers, polychlorinated biphenyls, polychlorobiphenyls, and pentachlorophenol.

Synergistic antimicrobial activity of metabolites produced by a nonobligate bacterial predator.

Acetylation of histone H3 at lysine 9 by ethanol in rat hepatocytes.

Arabidopsis mutants in short- and medium-chain acyl-CoA oxidase activities accumulate acyl-CoAs and reveal that fatty acid beta-oxidation is essential for embryo development.

Induction of phase 2 enzymes by serum oxidized polyamines through activation of Nrf2: effect of the polyamine metabolite acrolein.

Sorption-desorption of two "aged" sulfonaminocarbonyltriazolinone herbicide metabolites in soil.

Variability in human metabolism of arsenic.

Rapid, noninvasive screening for perturbations of metabolism and plant growth using chlorophyll fluorescence imaging.

Induction of oxidative DNA damage by arsenite and its trivalent and pentavalent methylated metabolites in cultured human cells and isolated DNA.

Histamine-immunoreactive neurons of the tuberomammillary nucleus are innervated by alpha-melanocyte stimulating hormone-containing axons. Generation of a new histamine antiserum for ultrastructural studies.

Sorption and dialysis experiments to assess the binding of phenolic xenobiotics to dissolved organic matter in soil.

Working weeds. A German company develops a way to peek into plant metabolism.

Solid-phase extraction and sample stacking-micellar electrokinetic capillary chromatography for the determination of multiresidues of herbicides and metabolites.

Condensation nucleation light scattering detection with ion chromatography for direct determination of glyphosate and its metabolite in water.

High-frequency somatic embryo production and maturation into normal plants in cotton (*Gossypium hirsutum*) through metabolic stress.

[Extracellular protein metabolite of *Luteococcus japonicus* subsp. *casei* reactivates cells subjected to oxidative stress].

Malate metabolism and reactions of oxidoreduction in cold-hardened winter rye (*Secale cereale* L.) leaves.

Metabonomics classifies pathways affected by bioactive compounds. Artificial neural network classification of NMR spectra of plant extracts.

Altered Cu metabolism and differential transcription of Cu/ZnSOD genes in a Cu/ZnSOD-deficient mutant of maize: evidence for a Cu-responsive transcription factor.

Determination of herbicides and a metabolite in human urine by liquid chromatography-electrospray ionization mass spectrometry.

Induction of cellular glutathione and glutathione S-transferase by 3H-1,2-dithiole-3-thione in rat aortic smooth muscle A10 cells: protection against acrolein-induced toxicity.

Dose-dependent biotransformation of arsenite in rats--not S-adenosylmethionine depletion impairs arsenic methylation at high dose.

Aerobic soil metabolism of a new herbicide, LGC-42153.

Inhibition of succinic semialdehyde dehydrogenase activity by alkenal products of lipid peroxidation.

Hepatocyte metabolism of coenzyme Q1 (ubiquinone-5) to its sulfate conjugate decreases its antioxidant activity.

In vitro human phase I metabolism of xenobiotics I: pesticides and related compounds used in agriculture and public health, May 2003.

Mineralization, metabolism and formation of non-extractable residues of ¹⁴C-labelled organic contaminants during pilot-scale composting of municipal biowaste.

Cyclic, pseudocyclic and noncyclic photophosphorylation: new links in the chain.

Exposure to indoor pesticides during pregnancy in a multiethnic, urban cohort.

Induction of glutathione S-transferase placental form positive foci in liver and epithelial hyperplasia in urinary bladder, but no tumor development in male Fischer 344 rats treated with monomethylarsonic acid for 104 weeks.

Transient induction of cytochromes P450 1A1 and 1B1 in MCF-7 human breast cancer cells by indirubin.

Fish tolerance to organophosphate-induced oxidative stress is dependent on the glutathione metabolism and enhanced by N-acetylcysteine.

Cell-transforming activity of fourteen chemical agents used in dental practice in Syrian hamster embryo cells.

The efficacy of tyrosine kinase inhibitors on human pancreatic cancer cell lines.

Evidence for impaired assimilation of protein in chronic renal failure.

Insulin regulation in AhR-null mice: embryonic cardiac enlargement, neonatal macrosomia, and altered insulin regulation and response in pregnant and aging AhR-null females.

Estrogen regulates Ah responsiveness in MCF-7 breast cancer cells.

Effects of mitochondrial inhibitors and uncouplers on hypoxic vasoconstriction in rabbit lungs.

Dioxin/polychlorinated biphenyl body burden, diabetes and endometriosis: findings in a population-based study in Belgium.

Human health concerns with GM crops.

Pathophysiology of the optic neuropathy associated with Friedreich ataxia.

Measurement of pesticides and other toxicants in amniotic fluid as a potential biomarker of prenatal exposure: a validation study.

Cell proliferation arrest within intrathymic lymphocyte progenitor cells causes thymic atrophy mediated by the aryl hydrocarbon receptor.

Measurement of plasma hydroperoxide concentration by FOX-1 assay in conjunction with triphenylphosphine.

Actin glutathionylation increases in fibroblasts of patients with Friedreich's ataxia: a potential role in the pathogenesis of the disease.

T cell-specific disruption of arylhydrocarbon receptor nuclear translocator (Arnt) gene causes resistance to 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced thymic involution.

Cellular heparan sulfate participates in the metabolism of prions.

Cellular uptake and metabolism of DNA frayed wires.

Systemic effects and skin injury after experimental dermal exposure to monochloroacetic acid.

Protein-bound uremic retention solutes.

[Development of GC/MS library for analyzing pesticides and drugs].

Tribromophenol induces the differentiation of SH-SY5Y human neuroblastoma cells in vitro.

FLT3 expressing leukemias are selectively sensitive to inhibitors of the molecular chaperone heat shock protein 90 through destabilization of signal transduction-associated kinases.

Specific in vivo binding to the norepinephrine transporter demonstrated with the PET radioligand, (S,S)-[11C]MeNER.

Comparative kinetics of the uremic toxin p-cresol versus creatinine in rats with and without renal failure.

Fatty acid metabolism in neonatal chickens (*Gallus domesticus*) treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) or 3,3',4,4',5-pentachlorobiphenyl (PCB-126) in ovo.

Embryonic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in chickens: effects of dose and embryonic stage on hatchability and growth.

The effect of ingestion of ferrous sulfate on the absorption of oral methotrexate in patients with rheumatoid arthritis.

Semen quality in relation to biomarkers of pesticide exposure.

Contribution of the Ah receptor to the phenolic antioxidant-mediated expression of human and rat UDP-glucuronosyltransferase UGT1A6 in Caco-2 and rat hepatoma 5L cells.

Inhibition of energy metabolism down-regulates the Alzheimer related presenilin 2 gene.

Angiotensin II phosphorylation of extracellular signal-regulated kinases in rat anterior pituitary cells.

Use of an "acetaldehyde clamp" in the determination of low-KM aldehyde dehydrogenase activity in H4-II-E-C3 rat hepatoma cells.

The effect of retinyl palmitate added to iron-fortified maize porridge on erythrocyte incorporation of iron in African children with vitamin A deficiency.

Effects of several dioxin-like compounds on estrogen metabolism in the malignant MCF-7 and nontumorigenic MCF-10A human mammary epithelial cell lines.

Evaluation of the potential impact of pharmacokinetic differences on tissue dosimetry in offspring during pregnancy and lactation.

Protein tyrosine phosphatase 1B inhibition: opportunities and challenges.

Oxidative capacity in failing hearts.

S-adenosyl-L-methionine is able to reverse micronucleus formation induced by sodium arsenite and other cytoskeleton disrupting agents in cultured human cells.

Short- and long-term morbidity and mortality in the population exposed to dioxin after the "Seveso accident".

Effects of iron(II) salts and iron(III) complexes on trace element status in children with iron-deficiency anemia.

Carbon-11 labelling of 8[[3-[4-(2-[(11)C]methoxyphenyl)piperazin-1-yl]-2-hydroxypropyl]oxy]thiochroman, a presynaptic 5-HT(1A) receptor agonist, and its in vivo evaluation in anaesthetised rat and in awake cat.

Urinary excretion of the uraemic toxin p-cresol in the rat: contribution of glucuronidation to its metabolism.

Enhancement of carcinogen-induced malignant cell transformation by prostaglandin F(2 alpha).

Polyglutamine protein aggregation and toxicity are linked to the cellular stress response.

Male reproductive hormones and thyroid function in pesticide applicators in the Red River Valley of Minnesota.

Carcinogenesis and its modification by environmental endocrine disruptors: in vivo experimental and epidemiological findings.

Markers of genetic susceptibility in human environmental hygiene and toxicology: the role of selected CYP, NAT and GST genes.

Antiallergic activity of ginseng and its ginsenosides.

Intercellular signalling within vascular cells under high D-glucose involves free radical-triggered tyrosine kinase activation.

Celecoxib inhibits proliferation and induces apoptosis via prostaglandin E2 pathway in human cholangiocarcinoma cell lines.

Neurotoxicity of polycyclic aromatic hydrocarbons and simple chemical mixtures.

Protective effect of melatonin against mitochondrial injury induced by ischemia and reperfusion of rat liver.

Globose basal cells are required for reconstitution of olfactory epithelium after methyl bromide lesion.

Human health effects of sodium azide exposure: a literature review and analysis.

Health impacts of pesticide exposure in a cohort of outdoor workers.

The adrenal cortex in experimental congenital diaphragmatic hernia.

Bile from a patient with anomalous pancreaticobiliary ductal union promotes the proliferation of human cholangiocarcinoma cells via COX-2 pathway.

Rat thyroid hyperplasia induced by gestational and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Airway smooth muscle changes in the nitrofen-induced congenital diaphragmatic hernia rat model.

Methylated metabolites of arsenic trioxide are more potent than arsenic trioxide as apoptotic but not differentiation inducers in leukemia and lymphoma cells.

Effect of low dose mono-ortho 2,3',4,4',5 pentachlorobiphenyl on thyroid hormone status and EROD activity in rat offspring: consequences for risk assessment.

A comparative immunohistochemical study of spontaneous and chemically induced pheochromocytomas in B6C3F1 mice.

Evaluation of transgenic event Bt11 hybrid corn in broiler chickens.

Environmental estrogens alter early development in *Xenopus laevis*.

Tropical chronic pancreatitis: an update.

Edaravone protects against ischemia/reperfusion-induced oxidative damage to mitochondria in rat liver.

Early changes in metabolism of leukemic cell lines upon induction of apoptosis by cytotoxic drugs.

Determination of urinary hippuric acid and o-cresol levels as biological indicators of toluene exposure in shoe-workers and glue sniffers.

A comparative study on the gastroduodenal tolerance of different antianaemic preparations.

Involvement of oxidative stress in the toxicity of 4-monochlorophenol in Hep G2 cells in culture.

Dose-response analysis of short-term effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in three differentially susceptible rat lines.

Effect of sodium arsenite on spermatogenesis, plasma gonadotrophins and testosterone in rats.

Effects of single non-ortho, mono-ortho, and di-ortho chlorinated biphenyls on cell functions and proliferation of the human prostatic carcinoma cell line, LNCaP.

Zinc protoporphyrin/heme as an indicator of iron status in NICU patients.

Immunocapture and microplate-based activity measurement of mammalian pyruvate dehydrogenase complex.

¹²³I-Interleukin-2: biochemical characterization and in vivo use for imaging autoimmune diseases.

Urinary concentrating defect in hypothyroid rats: role of sodium, potassium, 2-chloride co-transporter, and aquaporins.

Basis for a proposed reference dose (RfD) for dioxin of 1-10 pg/kg-day: a weight of evidence evaluation of the human and animal studies.

Effects of uremic ultrafiltrate on the regulation of the parathyroid cell cycle by calcitriol.

Local energy depletion in the basal forebrain increases sleep.

Escherichia coli O157:H7 populations in sheep can be reduced by chlorate supplementation.

Arsenic species excretion after dimercaptopropanesulfonic acid (DMPS) treatment of an acute arsenic trioxide poisoning.

Flow cytometric measurement of reactive oxygen species production by normal and thalassaemic red blood cells.

Down-regulation of sonic hedgehog expression in pulmonary hypoplasia is associated with congenital diaphragmatic hernia.

Influence of 5-aminolevulinic acid and red light on collagen metabolism of human dermal fibroblasts.

Dual fortification of salt with iodine and microencapsulated iron: a randomized, double-blind, controlled trial in Moroccan schoolchildren.

Different effects of metabolic inhibitors and cyclosporin A on daunorubicin transport in leukemia cells from patients with AML.

Increase in cardiovascular pathology in female Sprague-Dawley rats following chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3,3',4,4',5-pentachlorobiphenyl.

PPARalpha agonist-induced rodent tumors: modes of action and human relevance.

A framework for human relevance analysis of information on carcinogenic modes of action.

Perinatal exposure to low doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin alters sex-dependent expression of hepatic CYP2C11.

Methylated trivalent arsenicals as candidate ultimate genotoxic forms of arsenic: induction of chromosomal mutations but not gene mutations.

High cell density-mediated pericellular hypoxia is a crucial factor inducing expression of the intrinsic hypoxia marker CA IX in vitro in HeLa cells.

Estrogens and organochlorine xenoestrogens and breast cancer risk.

Speciation of arsenic metabolite intermediates in human urine by ion-exchange chromatography and flow injection hydride generation atomic absorption spectrometry.

Effect of lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin on the susceptibility to Listeria infection.

Rat breast microsomal biotransformation of ethanol to acetaldehyde but not to free radicals: its potential role in the association between alcohol drinking and breast tumor promotion.

Transplacental carcinogenicity of inorganic arsenic in the drinking water: induction of hepatic, ovarian, pulmonary, and adrenal tumors in mice.

Manganese ethylene-bis-dithiocarbamate and selective dopaminergic neurodegeneration in rat: a link through mitochondrial dysfunction.

Proliferative activity of bile from congenital choledochal cyst patients.

Oxidative stress-mediated DHEA formation in Alzheimer's disease pathology.

Blockage of multidrug resistance-associated proteins potentiates the inhibitory effects of arsenic trioxide on CYP1A1 induction by polycyclic aromatic hydrocarbons.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) alters the endogenous metabolism of all-trans-retinoic acid in the rat.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) stimulates gonadotropin secretion in the immature female Sprague-Dawley rat through a pentobarbital- and estradiol-sensitive mechanism but does not alter gonadotropin-releasing hormone (GnRH) secretion by immortalized GnRH neurons in vitro.

Rescue of light responses in the Drosophila "null" phospholipase C mutant, norpAP24, by the diacylglycerol kinase mutant, rdgA, and by metabolic inhibition.

Resistance to 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity and abnormal liver development in mice carrying a mutation in the nuclear localization sequence of the aryl hydrocarbon receptor.

Damage to developing mouse skeletal muscle myotubes in culture: protective effect of heat shock proteins.

Expression of aryl hydrocarbon receptor repressor in normal human tissues and inducibility by polycyclic aromatic hydrocarbons in human tumor-derived cell lines.

Direct evidence for recycling of myeloperoxidase-catalyzed phenoxyl radicals of a vitamin E homologue, 2,2,5,7,8-pentamethyl-6-hydroxy chromane, by ascorbate/dihydrolipoate in living HL-60 cells.

A tetrazolium-based colorimetric assay for metabolic activity of stored blood platelets.

2,3,7,8-tetrachlorodibenzo-p-dioxin induces lecithin: retinol acyltransferase transcription in the rat kidney.

Oviposition response of the mosquito, *Culex quinquefasciatus* to the secondary metabolite(s) of the fungus, *Trichoderma viride*.

Mutagenic and antimutagenic potential of the medicinal plants *M. laevigata* and *C. xanthocarpa*.

Metabolism of arsenic by sheep chronically exposed to arsenosugars as a normal part of their diet. 1. Quantitative intake, uptake, and excretion.

Hepatocellular injury with hyperaminotransferasemia after cresol ingestion.

Competitive interactions of chlorinated phenol compounds with 3,3',5-triiodothyronine binding to transthyretin: detection of possible thyroid-disrupting chemicals in environmental waste water.

Relationships between respiration and susceptibility to azole antifungals in *Candida glabrata*.

Expression of aryl hydrocarbon receptor and aryl hydrocarbon receptor nuclear translocator messenger ribonucleic acids and proteins in rat and human testis.

Acutely administered melatonin restores hepatic mitochondrial physiology in old mice.

Functional role of AhR in the expression of toxic effects by TCDD.

The liver isoform of carnitine palmitoyltransferase 1 is not targeted to the endoplasmic reticulum.

Condensed aromatic peptide family of microbial metabolites, inhibitors of CD28-CD80 interactions.

Measurement of retinoids and beta-carotene 15,15'-dioxygenase activity in HR-1 hairless mouse skin with UV exposure.

Modulating carbonyl cytotoxicity in intact rat hepatocytes by inhibiting carbonyl metabolizing enzymes. II. Aromatic aldehydes.

Modulating carbonyl cytotoxicity in intact rat hepatocytes by inhibiting carbonyl-metabolizing enzymes. I. Aliphatic alkenals.

Evidence for the primary role for 4-aminopyridine-sensitive K(v) channels in beta(3)-adrenoceptor-mediated, cyclic AMP-independent relaxations of guinea-pig gastrointestinal smooth muscles.

High-performance liquid chromatographic analysis of the anticancer drug irinotecan (CPT-11) and its active metabolite SN-38 in human plasma.

Endocrine disrupting chemicals: interference of thyroid hormone binding to transthyretins and to thyroid hormone receptors.

α -Tocopherol Content and α -Tocopherol Transfer Protein Expression in Leukocytes of Children with Acute Leukemia.

Epidermal growth factor regulates Ca^{2+} uptake in primary cultured renal proximal tubule cells: involvement of cAMP, PKC and cPLA2.

Contaminant risks from biosolids land application: contemporary organic contaminant levels in digested sewage sludge from five treatment plants in Greater Vancouver, British Columbia.

Removal of endocrine disruptors by tertiary treatments and constructed wetlands in subtropical Australia.

The nationwide investigation of endocrine disruptors in sediment of harbours.

[Changes in plasma zinc and folic acid concentrations in pregnant adolescents submitted to different supplementation regimens].

The 2001 Veylien Henderson Award of the Society of Toxicology of Canada. Positive and negative transcriptional regulation of cytochromes P450 by polycyclic aromatic hydrocarbons.

Toxicokinetics and physiologically based toxicokinetics in toxicology and risk assessment.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on chorionic gonadotropin secretion by human trophoblasts.

Metabolic pathways of dioxin by CYP1A1: species difference between rat and human CYP1A subfamily in the metabolism of dioxins.

Thyroid hormone enhances the formation of synapses between cultured neurons of rat cerebral cortex.

Cobalt-resistance in wall-less mutant (fz; sg; os-1) of *Neurospora crassa*.

On the hormonal nature of the stimulatory effect of high incubation temperatures on germination of dormant sorghum (*S. bicolor*) caryopses.

Expression of an Arabidopsis phosphoglycerate mutase homologue is localized to apical meristems, regulated by hormones, and induced by sedentary plant-parasitic nematodes.

Comparison of accumulation and altered steroid secretion by placental tissue treated with TCDD and natural mixture of PCDDs-PCDFs.

Hydroxylated and methylsulfone-containing metabolites of polychlorinated biphenyls in the plasma and blubber of bowhead whales (*Balaena mysticetus*).

Implications of glucose transporter protein type 1 (GLUT1)-haplodeficiency in embryonic stem cells for their survival in response to hypoxic stress.

TCDD-induced expression of Ah receptor responsive genes in the pituitary and brain of cellular retinol-binding protein (CRBP-I) knockout mice.

Cell-specific expression of CYP2A5 in the mouse respiratory tract: effects of olfactory toxicants.

TA-270 [4-hydroxy-1-methyl-3-octyloxy-7-sinapinoylamino-2(1H)-quinolinone], an anti-asthmatic agent, inhibits leukotriene production induced by IgE receptor stimulation in RBL-2H3 cells.

Kinetics of monochloroacetic acid at subtoxic and toxic doses in rats after single oral and dermal administrations.

In vivo studies on the metabolism of the monoterpene pulegone in humans using the metabolism of ingestion-correlated amounts (MICA) approach: explanation for the toxicity differences between (S)-(-)- and (R)-(+)-pulegone.

Phospholipase A2, hydroxyl radicals, and lipid peroxidation in transient cerebral ischemia.

Cytochrome c oxidase inhibition in the rice weevil *Sitophilus oryzae* (L.) by formate, the toxic metabolite of volatile alkyl formates.

Synergism interaction between arachidonic acid by 5-hydroxytryptamine in human platelet aggregation is mediated through multiple signalling pathways.

Decreased enzyme activity of hepatic thioredoxin reductase and glutathione reductase in rabbits by prolonged exposure to inorganic arsenate.

KB130015, a new amiodarone derivative with multiple effects on cardiac ion channels.

Chlorinated hydrocarbon contaminants in blood of black and turkey vultures from Savannah River Site, South Carolina, USA.

Effect of dietary co-administration of sodium selenite on sodium arsenite-induced ovarian and uterine disorders in mature albino rats.

An inducible *Streptomyces* gene cluster involved in aromatic compound metabolism.

Ischemic preconditioning by caspase cleavage of poly(ADP-ribose) polymerase-1.

Generation of 2,3,7,8-TCDD-metabolizing enzyme by modifying rat CYP1A1 through site-directed mutagenesis.

4-aminobiphenyl-induced liver and urinary bladder DNA adduct formation in Cyp1a2(-/-) and Cyp1a2(+/+) mice.

Metabolism of fenitrothion and conjugation of 3-methyl-4-nitrophenol in tomato plant (*Lycopersicon esculentum*).

Toxicity and metabolism of subcytotoxic inorganic arsenic in human renal proximal tubule epithelial cells (HK-2).

Aberrant utilization of nitric oxide and regulation of soluble guanylate cyclase in rat diabetic retinopathy.

Genetic variation in genes associated with arsenic metabolism: glutathione S-transferase omega 1-1 and purine nucleoside phosphorylase polymorphisms in European and indigenous Americans.

Ca(2+)-induced Ca(2+) release in the pancreatic beta-cell: direct evidence of endoplasmic reticulum Ca(2+) release.

Cell selective cAMP induction of rat CYP1B1 in adrenal and testis cells. Identification of a novel cAMP-responsive far upstream enhancer and a second Ah receptor-dependent mechanism.

Uptake and metabolic fate of [14C]-2,4-dichlorophenol and [14C]-2,4-dichloroaniline in wheat (*Triticum aestivum*) and soybean (*Glycine max*).

Stir bar sorptive extraction and large volume injection gas chromatography to determine a group of endocrine disrupters in water samples.

Cardioselective sulfonylthiourea HMR 1098 blocks mitochondrial uncoupling induced by a KATP channel opener, P-1075, in beating rat hearts.

[Is it possible to use sex ratio at birth as indicator of the presence of endocrine disrupters in environmental pollution?].

Effects of cytochrome P-450 inducers on the perazine metabolism in a primary culture of human hepatocytes.

Triazines facilitate neurotransmitter release of synaptic terminals located in hearts of frog (*Rana ridibunda*) and honeybee (*Apis mellifera*) and in the ventral nerve cord of a beetle (*Tenebrio molitor*).

Developmental neurotoxicity of dioxin and its related compounds.

The missing biomarker link: relationships between effects on the cellular energy allocation biomarker of toxicant-stressed *Daphnia magna* and corresponding population characteristics.

Identification and functional characterization of a Na⁺-independent large neutral amino acid transporter, LAT1, in human and rabbit cornea.

Nuclear translocation and retention of growth hormone.

Use of plant cell cultures to study graminicide effects on lipid metabolism.

The metabolism of aluminum citrate and biosynthesis of oxalic acid in *Pseudomonas fluorescens*.

Activation of protein kinase C by phorbol esters in human macrophages reduces the metabolism of modified LDL by down-regulation of scavenger receptor activity.

24-well plate spectrophotometric assay for preliminary screening of metabolic activity.

Metabolism of lipid derived aldehyde, 4-hydroxynonenal in human lens epithelial cells and rat lens.

Effect of three nitrophenols on carbon metabolism in *Nostoc muscorum* and *Chlorella vulgaris*.

Determination of endocrine-disrupting compounds in water samples by on-line solid-phase extraction-programmed-temperature vaporisation-gas chromatography-mass spectrometry.

Quantitative structure toxicity relationships for phenols in isolated rat hepatocytes.

Formation of DNA adducts in HL-60 cells treated with the toluene metabolite p-cresol: a potential biomarker for toluene exposure.

Postnatal exposure of 2,2',3,3',4,6'-hexachlorobiphenyl and 2,2',3,4',5',6'-hexachlorobiphenyl on sperm function and hormone levels in adult rats.

[Arsenite-induced lipid peroxidation in *Saccharomyces cerevisiae*].

Metabolic analysis in drug design.

[Follow-up survey of dioxins in the blood of Yusho patients (in 2001)].

[Determination of 2,4-dinitrophenol, its basic metabolite and 4-oxide diphenyl in biological materials].

Isolation of a glucosyltransferase from *Arabidopsis thaliana* active in the metabolism of the persistent pollutant 3,4-dichloroaniline.

Leiomyosarcoma of urinary bladder following cyclophosphamide therapy: report of two cases.

Selenoprotein metabolism and function: evidence for more than one function for selenoprotein P.

Chemiluminescence response of beta-glucan stimulated leukocytes isolated from different tissues and peritoneal cavity of *Dicentrarchus labrax*.

The multidrug resistance-associated protein 1 transports methoxychlor and protects the seminiferous epithelium from injury.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on chorionic gonadotrophin activity in pregnant macaques.

Differential modulation of cytochrome P-450 1A and P-glycoprotein expression by aryl hydrocarbon receptor agonists and thyroid hormone in *Xenopus laevis* liver and intestine.

Toxicity and kinetic parameters of the aerobic biodegradation of the phenol and alkylphenols by a mixed culture.

Exposure to the metabolic inhibitor sodium azide induces stress protein expression and thermotolerance in the nematode *Caenorhabditis elegans*.

Effects of mitochondrial uncoupling on adipocyte intracellular Ca(2+) and lipid metabolism.

Contribution of human cytochrome p-450 isoforms to the metabolism of the simplest phenothiazine neuroleptic promazine.

Role of reactive oxygen species and antioxidants in plant disease resistance.

An artificial amino acid, 4-iodo-L-meta-tyrosine: biodistribution and excretion via kidney.

Whole-grain rye and wheat foods and markers of bowel health in overweight middle-aged men.

Role of the different mitogen-activated protein kinase subfamilies in the stimulation of dog and human thyroid epithelial cell proliferation by cyclic adenosine 5'-monophosphate and growth factors.

Inhibition of CYP 1A2-dependent MROD activity in rat liver microsomes: an explanation of the hepatic sequestration of a limited subset of halogenated aromatic hydrocarbons.

Endogenous glutamate contributes to the maintenance of glutathione level under oxidative stress in isolated nerve terminals.

RNA interference-mediated silencing of Sod2 in *Drosophila* leads to early adult-onset mortality and elevated endogenous oxidative stress.

Progression of alachlor-induced olfactory mucosal tumours.

Transformation of carrots with mutant acetolactate synthase for *Orobanche* (broomrape) control.

Exposure to the herbicide acetochlor alters thyroid hormone-dependent gene expression and metamorphosis in *Xenopus laevis*.

Physiological and cellular responses of the 2,4-D degrading bacterium, *Burkholderia cepacia* YK-2, to the phenoxyherbicides 2,4-D and 2,4,5-T.

Functional activation of peroxisome proliferator-activated receptor alpha (PPARalpha) by environmental chemicals in relation to their toxicities.

Influence of plant age and size on simazine toxicity and uptake.

Fractionation of protein adducts in rats and mice dosed with [¹⁴C]pentachlorophenol.

Perpest model, a case-based reasoning approach to predict ecological risks of pesticides.

Effects of early embryonal exposure to dexamethasone on malformations of neural-crest derivatives induced by nitrofen in rats.

Effects of vitamin A on malformations of neural-crest-controlled organs induced by nitrofen in rats.

On the mechanism of selectivity of the corn herbicide BAS 662H: a combination of the novel auxin transport inhibitor diflufenzopyr and the auxin herbicide dicamba.

In vitro myelotoxicity of propanil and 3,4-dichloroaniline on murine and human CFU-E/BFU-E progenitors.

Metabolic enzymes as biochemical markers of effect following exposure of fish to sodium pentachlorophenate (Na-PCP).

Antioxidant enzymes, free-radical damage, and response to paraquat in liver and kidney of long-living growth hormone receptor/binding protein gene-disrupted mice.

Impact of four pesticides on the growth and metabolic activities of two photosynthetic algae.

Paraquat-induced gene expression in rat lung tissues using a differential display reverse transcription-polymerase chain reaction.

Possible role of dimethylarsinous acid in dimethylarsinic acid-induced urothelial toxicity and regeneration in the rat.

Herbicide safeners: uses, limitations, metabolism, and mechanisms of action.

A survey of EPA/OPP and open literature on selected pesticide chemicals. III. Mutagenicity and carcinogenicity of benomyl and carbendazim.

Nuclear and nucleolar glutathione reductase, peroxidase, and transferase activities in livers of male and female Fischer-344 rats.

Toxicokinetics, recovery, and metabolism of triclopyr butotyl (ACTP) ester in goats.

A review of animal models for the study of arsenic carcinogenesis.

Detection of estrogenic activity in sediment-associated compounds using in vitro reporter gene assays.

Uptake, metabolism, and effects on detoxication enzymes of isoproturon in spawn and tadpoles of amphibians.

Oral (gavage) two-generation (one litter per generation) reproduction study of pentachlorophenol (penta) in rats.

Teratogenic effects of amitraz, 2,4-dimethylaniline, and paraquat on developing frog (*Xenopus*) embryos.

The effects of atrazine on the sexual maturation of female rats.

Paraquat-generated oxidative stress in rat liver induces heme oxygenase-1 and aminolevulinic acid synthase.

Pathways involved in mild gastrointestinal inflammation induced by a low level exposure to a food contaminant.

Paraquat detoxicative system in the mouse liver postmitochondrial fraction.

The effects of atrazine metabolites on puberty and thyroid function in the male Wistar rat.

Predictors of survival after acute paraquat poisoning.

Atrazine inhibition of testosterone production in rat males following peripubertal exposure.

Methylarsonic and dimethylarsinic acids toxicity and total arsenic accumulation in edible bush beans, *Phaseolus vulgaris*.

A major human arsenic metabolite, dimethylarsinic acid, requires reduced glutathione to induce apoptosis.

Cytochalasins Z1, Z2 and Z3, three 24-oxa[14]cytochalasans produced by *Pyrenophora semeniperda*.

Changes in mutagenicity of herbicide chlornitrofen during biodegradation.

Cytotoxic and endocrine-disrupting potential of atrazine, diazinon, endosulfan, and mancozeb in adrenocortical steroidogenic cells of rainbow trout exposed in vitro.

Analysis and toxicity of methomyl and ametryn after biodegradation.

Genotoxicological effects of some phenoxyherbicides and their metabolites on *Bacillus subtilis* M45 Rec- and H17 Rec+ strains.

Differential effects of olfactory toxicants on olfactory regeneration.

[Simultaneous determination of propanil, carbaryl and 3,4-dichloroaniline in human serum by HPLC with UV detector following solid phase extraction].

Absorption, metabolism and excretion of 4-chloro-2-methylphenoxyacetic acid (MCPA) in rat and dog.

Effect of alachlor on hepatic cytochrome P450 enzymes in rats.

Effects of pentachlorophenol and tetrachlorohydroquinone on mitogen-activated protein kinase pathways in Jurkat T cells.

In vivo genotoxicity evaluation of dimethylarsinic acid in MutaMouse.

The mutagenicity of amino-derivatives of diphenyl ether herbicides in new *Salmonella typhimurium* YG tester strains.

Radioprotectants: current status and new directions.

Comparative toxic and genotoxic effects of chloroacetanilides, formamidines and their degradation products on *Vibrio fischeri* and *Chironomus riparius*.

[Effect of diclofop on the activity of some drug-metabolizing enzymes in the liver of male Wistar rats].

[Herbicides and congenital malformations in Meta, Colombia].

Evaluation of the protective effect of oestradiol against toxicity induced by 6-hydroxydopamine and 1-methyl-4-phenylpyridinium ion (Mpp+) towards dopaminergic mesencephalic neurones in primary culture.

Endocrine active agents: implications of adverse and non-adverse changes.

A fatal human intoxication with the herbicide allyl alcohol (2-propen-1-ol).

Biotransformation of phenylurea herbicides by a soil bacterial strain, *Arthrobacter* sp. N2: structure, ecotoxicity and fate of diuron metabolite with soil fungi.

Regional assessment of atrazine exposure and incidence of breast and ovarian cancers in Kentucky.

Serum protein acrolein adducts: utility in detecting oxidant stress in hemodialysis patients and reversal using a vitamin E-bonded hemodialyzer.

Ethanol-stimulated behaviour in mice is modulated by brain catalase activity and H₂O₂ rate of production.

Characterization of nitric oxide consumption pathways by normal, chronic granulomatous disease and myeloperoxidase-deficient human neutrophils.

Monitoring of arsenic exposure with speciated urinary inorganic arsenic metabolites for ion implanter maintenance engineers.

Thyroid status regulates CART but not AgRP mRNA levels in the rat hypothalamus.

Evaluation of a 15-day screening assay using intact male rats for identifying antiandrogens.

Carcinogenicity of dimethylarsinic acid in male F344 rats and genetic alterations in induced urinary bladder tumors.

Two diarylurea electron transport inhibitors reduce *Staphylococcus aureus* hemolytic activity and protect cultured endothelial cells from lysis.

Promoting effects of monomethylarsonic acid, dimethylarsinic acid and trimethylarsine oxide on induction of rat liver preneoplastic glutathione S-transferase placental form positive foci: a possible reactive oxygen species mechanism.

Essential role of ferritin Pfr in *Helicobacter pylori* iron metabolism and gastric colonization.

Chemical ionization mass spectrometric determination of acrolein in human breast cancer cells.

Oxygen metabolites and hypoxic renal injury: effect of mitochondrial electron transport blockade.

Mucin apoprotein expression in COPD.

A review on usnic acid, an interesting natural compound.

In vivo copper-mediated free radical production: an ESR spin-trapping study.

Serum SP-D is a marker of lung injury in rats.

Modified guanines representing O(6)-alkylation by the cyclophosphamide metabolites acrolein and chloroacetaldehyde: synthesis, stability, and ab initio studies.

Analysis of DNA adducts in rats exposed to pentachlorophenol.

Inhibition of cell proliferation and AP-1 activity by acrolein in human A549 lung adenocarcinoma cells due to thiol imbalance and covalent modifications.

Protection against acetaminophen hepatotoxicity by clofibrate pretreatment: role of catalase induction.

Elimination of $\cdot O(2)(-)/H(2)O(2)$ by alpha-lipoic acid mediates the recovery of basal EDRF/NO availability and the reversal of superoxide dismutase-induced relaxation in diabetic rat aorta.

Screening for biologically active metabolites with endosymbiotic bacilli isolated from arthropods.

Arthrobacter aurescens TC1 metabolizes diverse s-triazine ring compounds.

Determination of isoxaflutole (balance) and its metabolites in water using solid phase extraction followed by high-performance liquid chromatography with ultraviolet or mass spectrometry.

A field study to assess the degradation and transport of diuron and its metabolites in a calcareous soil.

A comparative investigation of the metabolism of the herbicide glufosinate in cell cultures of transgenic glufosinate-resistant and non-transgenic oilseed rape (*Brassica napus*) and corn (*Zea mays*).

Intra-individual variation in the metabolism of inorganic arsenic.

Purification, substrate range, and metal center of AtzC: the N-isopropylammelide aminohydrolase involved in bacterial atrazine metabolism.

Systemic uptake and cutaneous disposition of pentachlorophenol in a sequential exposure scenario: effects of skin preexposure to benzo[a]pyrene.

Engineering herbicide metabolism in tobacco and Arabidopsis with CYP76B1, a cytochrome P450 enzyme from Jerusalem artichoke.

Comprehensive analysis of gene expression in *Nicotiana tabacum* leaves acclimated to oxidative stress.

Metabolic disturbances in fish exposed to sodium pentachlorophenate (NaPCP) and 3,3',4,4',5-pentachlorobiphenyl (PCB126), individually or combined.

Brain catalase inhibition blocks ethanol-related decrease of blood luteinizing hormone levels in mice.

Isolation of HAG1 and its regulation by plant hormones during in vitro floral organogenesis in *Hyacinthus orientalis* L.

Urinary arsenic speciation in subjects with or without restriction from seafood dietary intake.

Determination of mesotrione residues and metabolites in crops, soil, and water by liquid chromatography with fluorescence detection.

Measurement of 4-hydroxylation of ifosfamide in human liver microsomes using the estimation of free and protein-bound acrolein and codetermination of keto- and carboxyifosfamide.

Growth in coculture stimulates metabolism of the phenylurea herbicide isoproturon by *Sphingomonas* sp. strain SRS2.

[Simultaneous determination of N-methylcarbamate pesticides and their metabolites in agricultural products].

Determination of oxanilic and sulfonic acid metabolites of acetochlor in soils by liquid chromatography-electrospray ionisation mass spectrometry.

[Metabolism of rumen microbial populations formed on biosubstrates with different assimilation under the effect of pentachlorophenol].

Oxidative stress response of *Kluyveromyces marxianus* to hydrogen peroxide, paraquat and pressure.

Phosphate availability alters architecture and causes changes in hormone sensitivity in the *Arabidopsis* root system.

Assessment of the rhizosphere competency and pentachlorophenol-metabolizing activity of a pesticide-degrading strain of *Trichoderma harzianum* introduced into the root zone of corn seedlings.

The WUSCHEL gene promotes vegetative-to-embryonic transition in *Arabidopsis*.

Effects of furazolidone, PCB77, PCB126, Aroclor 1248, paraquat and p,p'-DDE on transketolase activity in embryonal chicken brain.

Confocal imaging of organic anion transport in intact rat choroid plexus.

Side-chain metabolism of propranolol: involvement of monoamine oxidase and mitochondrial aldehyde dehydrogenase in the metabolism of N-desisopropylpropranolol to naphthoxylactic acid in rat liver.

Systemic uptake of inhaled arsenic in rabbits.

Pentachlorophenol and hydroxylated polychlorinated biphenyl metabolites in umbilical cord plasma of neonates from coastal populations in Québec.

Soil metabolism of isoxaflutole in corn.

Determination of herbicides and metabolites by solid-phase extraction and liquid chromatography evaluation of pollution due to herbicides in surface and groundwaters.

Species variations in the biliary and urinary excretion of arsenate, arsenite and their metabolites.

Migration of dissolved heavy metal compounds and PCP in the presence of colloids through a heterogeneous calcareous gravel and a homogeneous quartz sand-pilot scale experiments.

Novel approach for the simultaneous analysis of glyphosate and its metabolites.

Determination of alachlor and its metabolites in rat plasma and urine by liquid chromatography-electrospray ionization mass spectrometry.

Identification of a S-hexahydro-1H-azepine-1-carbonyl adduct produced by molinate on rat hemoglobin beta(2) and beta(3) chains in vivo.

Metabolism of metolachlor by fungal cultures.

Preparative-scale synthesis of two metabolites isolated from soil treated with zoxium fungicide and kerb herbicide.

[Improvement of somatic embryogenesis process in sugarcane Venezuelan cultivars].

Soil persistence and metabolism of iodosulfuron in winter wheat crops.

Exploiting plant metabolism for the phytoremediation of persistent herbicides.

Determination of phenoxyacid herbicides and their phenolic metabolites in surface and drinking water.

Plasma pharmacokinetics and tissue distribution of a N-pyrrolo-[1,2-c]imidazolylphenyl sulfonamide in rats.

[Human neurotoxicity of ethylene-bis-dithiocarbamates (EBDC)].

No reduction of metabolic rate in food restricted *Caenorhabditis elegans*.

Comparative toxicity study of 3-aminophenol in newborn and young rats.

Mesenchymal nuclear transcription factors in nitrofen-induced hypoplastic lung.

Addition of microencapsulated iron to iodized salt improves the efficacy of iodine in goitrous, iron-deficient children: a randomized, double-blind, controlled trial.

Detection of proton release from cultured human myotubes to identify malignant hyperthermia susceptibility.

Cell-type specificity of ectonucleotidase expression and upregulation by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Phenomenon of pseudomutagenesis: experiments with modifiers of cell metabolism in human lymphocytes].

Sodium arsenite-induced stress-related gene expression in normal human epidermal, HaCaT, and HEL30 keratinocytes.

Lipid metabolism and neuropsychological follow-up study of workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Alcohol-induced increases in insulin-like growth factor binding protein-1 are partially mediated by TNF.

Arsenic induces peroxynitrite generation and cyclooxygenase-2 protein expression in aortic endothelial cells: possible role in atherosclerosis.

Bioavailability of caseinophosphopeptide-bound iron.

Expression of surfactant proteins and thyroid transcription factor 1 in an ovine model of congenital diaphragmatic hernia.

Differential toxicogenomic responses to 2,3,7,8-tetrachlorodibenzo-p-dioxin in malignant and nonmalignant human airway epithelial cells.

Antiandrogenic effects in vitro and in vivo of the fungicide prochloraz.

The redox protein thioredoxin-1 regulates the constitutive and inducible expression of the estrogen metabolizing cytochromes P450 1B1 and 1A1 in MCF-7 human breast cancer cells.

Effects of perinatal exposure to PCBs and dioxins on play behavior in Dutch children at school age.

Curcumin activates the aryl hydrocarbon receptor yet significantly inhibits (-)-benzo(a)pyrene-7R-trans-7,8-dihydrodiol bioactivation in oral squamous cell carcinoma cells and oral mucosa.

On the role of monoamine oxidase-A for the maintenance of the volitional consumption of ethanol in two different rat models.

Endocrine disruption by indole-3-carbinol and tamoxifen: blockage of ovulation.

Increased arylhydrocarbon receptor expression offers a potential therapeutic target for pancreatic cancer.

Therapeutic effects of glucose infusion on monochloroacetic acid exposure in rats.

2,3,7,8-tetrachlorodibenzo-p-dioxin causes alterations in lymphocyte development and thymic atrophy in hemopoietic chimeras generated from mice deficient in ARNT2.

Mortality in dioxin-exposed mice infected with influenza: mitochondrial toxicity (reye's-like syndrome) versus enhanced inflammation as the mode of action.

Linking dioxins to diabetes: epidemiology and biologic plausibility.

Thyroid transcription factor-1 expression during normal human lung development and in patients with congenital diaphragmatic hernia.

A study on behavioral, neurotoxicological, and immunotoxicological effects of subchronic arsenic treatment in rats.

Ethanol induces fatty acid synthesis pathways by activation of sterol regulatory element-binding protein (SREBP).

Promotion of altered hepatic foci by 2,3,7,8-tetrachlorodibenzo-p-dioxin and 17beta-estradiol in male Sprague-Dawley rats.

Radiation- and chemical-induced structural chromosome aberrations in human spermatozoa.

A constitutively active dioxin/aryl hydrocarbon receptor induces stomach tumors.

The silencing mediator of retinoic acid and thyroid hormone receptors can interact with the aryl hydrocarbon (Ah) receptor but fails to repress Ah receptor-dependent gene expression.

Endocrine dismodulation and cancer.

Tyrosinemia I, a model for human diseases mediated by 2-oxoacid-utilizing dioxygenases: hepatotoxin suppression by NTBC does not normalize hepatic collagen metabolism.

Is exposure to endocrine disrupting compounds during fetal/post-natal development affecting the reproductive potential of farm animals?

Induction of HSP72 by sodium arsenite fails to protect against cholecystokinin-octapeptide-induced acute pancreatitis in rats.

Supplemental zinc lowers measures of iron status in young women with low iron reserves.

Inhibition of carcinogen-activating enzymes by 16alpha-fluoro-5-androsten-17-one.

Role of ATP in the sensitivity to heat and the induction of apoptosis in mammalian cells.

Mechanisms of 2-butoxyethanol carcinogenicity: studies on Syrian Hamster Embryo (SHE) cell transformation.

Function and dysfunction of aPKC isoforms for glucose transport in insulin-sensitive and insulin-resistant states.

Angiopoietin-1 and VEGF in vascular development and angiogenesis in hypoplastic lungs.

Conditional expression of a constitutively active aryl hydrocarbon receptor in MCF-7 human breast cancer cells.

WISP-2 is a secreted protein and can be a marker of estrogen exposure in MCF-7 cells.

Cancer chemopreventive and antioxidant activities of pterostilbene, a naturally occurring analogue of resveratrol.

Severe 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) intoxication: kinetics and trials to enhance elimination in two patients.

Mechanism of action and development of selective aryl hydrocarbon receptor modulators for treatment of hormone-dependent cancers (Review).

2,3,7,8-tetrachlorodibenzo-p-dioxin interacts with endogenous estradiol to disrupt prostate gland morphogenesis in male rat fetuses.

[Dinitrophenol--a dangerous doping agent].

Use of Haber's Rule to estimate the risk of diabetes from background exposures to dioxin-like compounds.

Structure-activity relationships and dose responses of polychlorinated dibenzo-p-dioxins for short-term effects in 2,3,7,8-tetrachlorodibenzo-p-dioxin-resistant and -sensitive rat strains.

Decrease in 4-aminobiphenyl-induced methemoglobinemia in Cyp1a2(-/-) knockout mice.

Dinitrophenol pretreatment of rat ventricular myocytes protects against damage by metabolic inhibition and reperfusion.

Primary structure and pathological study of phospholipase A2-I from *Agkistrodon bilineatus* (common cantil) venom.

Relationship between acetaldehyde levels and cell survival in ethanol-metabolizing hepatoma cells.

Effects of subchronic exposure to a complex mixture of persistent contaminants in male rats: systemic, immune, and reproductive effects.

Persistent abnormalities in the rat mammary gland following gestational and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Tumor necrosis factor-alpha and interleukin-1beta mediate the production of nitric oxide involved in the pathogenesis of ifosfamide induced hemorrhagic cystitis in mice.

Exercise- and insulin-stimulated muscle glucose transport: distinct mechanisms of regulation.

Prediction of rodent nongenotoxic carcinogenesis: evaluation of biochemical and tissue changes in rodents following exposure to nine nongenotoxic NTP carcinogens.

Plasma concentrations of polychlorinated biphenyls and the risk of breast cancer: a congener-specific analysis.

The environmental toxin 2,3,7,8-tetrachlorodibenzo-p-dioxin induces cytochrome P450 activity in high passage PC 3 and DU 145 human prostate cancer cell lines.

Up-regulated expression of genes encoding Hrk and IL-3R beta subunit by TCDD in vivo and in vitro.

Effects of src-deficiency on the expression of in vivo toxicity of TCDD in a strain of c-src knockout mice procured through six generations of backcrossings to C57BL/6 mice.

Dioxin-induced adseverin expression in the mouse thymus is strictly regulated and dependent on the aryl hydrocarbon receptor.

[Immunoenzyme analysis of natural antibodies to endogenous bioregulators in patients with systemic lupus erythematosus].

On the rumors about the silent spring. Review of the scientific evidence linking occupational and environmental pesticide exposure to endocrine disruption health effects.

Metabolic control analysis in drug discovery and disease.

Non-ahr gene susceptibility Loci for porphyria and liver injury induced by the interaction of 'dioxin' with iron overload in mice.

Induction of CYP1A1 and CYP1B1 in T-47D human breast cancer cells by benzo[a]pyrene is diminished by arsenite.

Effects of currently used pesticides in assays for estrogenicity, androgenicity, and aromatase activity in vitro.

Obligatory requirement of sulfation for P-selectin binding to human salivary gland carcinoma Acc-M cells and breast carcinoma ZR-75-30 cells.

Association between chronic exposure to pesticides and recorded cases of human malignancy in Gaza Governorates (1990-1999).

NTP Technical Report on the Toxicology and Carcinogenesis Studies of Chloral Hydrate (Cas No. 302-17-0) in B6C3F1 mice (Gavage Studies).

Heat stress-induced loss of eukaryotic initiation factor 5A (eIF-5A) in a human pancreatic cancer cell line, MIA PaCa-2, analyzed by two-dimensional gel electrophoresis.

Thyroid status is a key regulator of both flux and efficiency of oxidative phosphorylation in rat hepatocytes.

Role of sarcolemmal K(ATP) channels in cardioprotection against ischemia/reperfusion injury in mice.

A correlative study on antimutagenic and chemopreventive activity of *Acacia auriculiformis* A. Cunn. and *Acacia nilotica* (L.) Willd. Ex Del.

Dynamic imaging of endoplasmic reticulum Ca²⁺ concentration in insulin-secreting MIN6 Cells using recombinant targeted cameleons: roles of sarco(endo)plasmic reticulum Ca²⁺-ATPase (SERCA)-2 and ryanodine receptors.

Maternal immune stimulation in mice decreases fetal malformations caused by teratogens.

Anti-platelet and anti-thrombotic effects of triacetylshikimic acid in rats.

Lack of promoting effect due to oral administration of dimethylarsinic acid on rat lung carcinogenesis initiated with N-bis(2-hydroxypropyl)nitrosamine.

How can chemical compounds alter human fertility?

Effects of 2-butoxyethanol on hepatic oxidative damage.

A dynamic role for the Ah receptor in cell signaling? Insights from a diverse group of Ah receptor interacting proteins.

Timing of exposure and mammary cancer risk.

Inhibitory effect of *Carthamus tinctorius* L. seed extracts on bone resorption mediated by tyrosine kinase, COX-2 (cyclooxygenase) and PG (prostaglandin) E2.

Hexachlorobenzene exposure and the proportion of male births in Turkey 1935-1990.

Phenol toxicity and conjugation in human colonic epithelial cells.

Expression of the uncoupling protein 1 from the α P2 gene promoter stimulates mitochondrial biogenesis in unilocular adipocytes in vivo.

Activation of the aromatic hydrocarbon receptor pathway is not sufficient for transcriptional repression of BRCA-1: requirements for metabolism of benzo[a]pyrene to 7r,8t-dihydroxy-9t,10-epoxy-7,8,9,10-tetrahydrobenzo[a]pyrene.

Dioxins and endometriosis: a plausible hypothesis.

Extracellular signal-regulated kinases and g protein-coupled receptors in megakaryocytic human erythroleukemia cells: selective activation, differential regulation, and dissociation from mitogenesis.

Selective transport and accumulation of alkanes by *Rhodococcus erythropolis* S+14He.

2,3,7,8-tetrachlorobenzo-p-dioxin inhibits proliferation of SK-N-SH human neuronal cells through decreased production of reactive oxygen species.

The effects of endocrine-disrupting chemicals on thyroid hormone binding to *Xenopus laevis* transthyretin and thyroid hormone receptor.

Constitutive and TCDD-induced expression of Ah receptor-responsive genes in the pituitary.

Aromatic hydrocarbon receptor expression and function in liver of hypophysectomized male rats.

Characterization and identification of cytochrome P450 metabolites of arachidonic acid released by human peritoneal macrophages obtained from the pouch of Douglas.

Metabolism and excretion of 2-nitro-p-cresol in rats.

Comparative study of the xenobiotic metabolising system in the digestive gland of the bivalve molluscs in different aquatic ecosystems and in aquaria experiments.

Reactivity of atropaldehyde, a felbamate metabolite in human liver tissue in vitro.

Subchronic toxicity of Baltic herring oil and its fractions in the rat I: Fractionation and levels of organohalogen pollutants.

[*Medusomyces* (tea fungus): scientific history, composition, physiology, and metabolism].

Immunoaffinity column as sample cleanup method for determination of the beta-adrenergic agonist ractopamine and its metabolites.

Stimulation of carotenoid metabolism in arbuscular mycorrhizal roots.

Investigation of the relation between self-reported food consumption and household chemical exposures with urinary levels of selected nonpersistent pesticides.

Cyclic mechanical stretch augments prostacyclin production in cultured human uterine myometrial cells from pregnant women: possible involvement of up-regulation of prostacyclin synthase expression.

Urinary 2,5-dichlorophenol as biological index for p-dichlorobenzene exposure in the general population.

Expression, cellular distribution and induction of cytochrome p4501A (CYP1A) in gilthead seabream, *Sparus aurata*, brain.

Effects of entacapone and tolcapone on mitochondrial membrane potential.

Gcn4 co-ordinates morphogenetic and metabolic responses to amino acid starvation in *Candida albicans*.

Physiological and cytological responses of the marine diatom *Skeletonema costatum* to 2,4-dichlorophenol.

Bioavailability of the isomer mixture of phytoene and phytofluene-rich alga *Dunaliella bardawil* in rat plasma and tissues.

Ketoprofen-induced intestinal permeability changes studied in side-by-side diffusion cells.

Hemorrhagic cystitis as an unexpected adverse reaction to temozolomide: case report.

Determination of arsenic metabolic complex excreted in human urine after administration of sodium 2,3-dimercapto-1-propane sulfonate.

Enhancement of allyl alcohol hepatotoxicity by endotoxin requires extrahepatic factors.

Down-regulation of cell surface insulin receptor and insulin receptor substrate-1 phosphorylation by inhibitor of 90-kDa heat-shock protein family: endoplasmic reticulum retention of monomeric insulin receptor precursor with calnexin in adrenal chromaffin cells.

[¹¹C]Mirtazapine for PET neuroimaging: radiosynthesis and initial evaluation in the living porcine brain.

Differential sensitivity of inward rectifier K⁺ channels to metabolic inhibitors.

Biodegradation and enzymatic responses in the marine diatom *Skeletonema costatum* upon exposure to 2,4-dichlorophenol.

Stereoselective hydroxylation of 4-methyl-2-cyclohexenone in rats: its relevance to R-(+)-pulegone-mediated hepatotoxicity.

Metabolism of polychlorinated dibenzo-p-dioxins (PCDDs) by human cytochrome P450-dependent monooxygenase systems.

Clinical toxicology: part II. Diagnosis and management of uncommon poisonings.

Analysis of paraquat, diquat and two diquat metabolites in biological materials by high-performance liquid chromatography.

Enhancement of metabolizing herbicides in young tubers of transgenic potato plants with the rat CYP1A1 gene.

The leading role of mitochondrial depolarization in the mechanism of glutamate-induced disruptions in Ca²⁺ homeostasis.

Tumor necrosis factor alpha (TNF-alpha)-induced prostaglandin E2 release is mediated by the activation of cyclooxygenase-2 (COX-2) transcription via NFkappaB in human gingival fibroblasts.

Estrous cycle-regulated expression of CYP1B1 mRNA in the rat ovary.

Biochemical evidence for transcytotic absorption of polyaspartamide from the rat lung: effects of temperature and metabolic inhibitors.

Nonylphenol polyethoxylate adjuvant mitigates the reproductive toxicity of fomesafen on the freshwater snail *Lymnaea stagnalis* in outdoor experimental ponds.

Resistance of isolated mammalian spinal cord white matter to oxygen-glucose deprivation.

Metabolite ratio of toluene-exposed rotogravure printing plant workers reflects individual mutagenic risk by sister chromatid exchanges.

Origins and consequences of mitochondrial decline in nucleated erythrocytes.

Induction of P-glycoprotein, glutathione-S-transferase and cytochrome P450 in rat liver by atrazine.

The effect of oxidative stress on ERalpha and ERbeta expression.

Development of a high throughput screening assay for mitochondrial membrane potential in living cells.

Signal pathways involved in the production of MMP-1 and MMP-3 in human gingival fibroblasts.

Severe 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) intoxication: insights into the measurement of hepatic cytochrome P450 1A2 induction.

Comparative responsiveness of hypothyroxinemia and hepatic enzyme induction in Long-Evans rats versus C57BL/6J mice exposed to TCDD-like and phenobarbital-like polychlorinated biphenyl congeners.

The slow axonal transport of the microtubule-associated protein tau and the transport rates of different isoforms and mutants in cultured neurons.

HPLC measurement of harderoporphyrin in the harderian glands of rodents as a biomarker for sub-lethal or chronic arsenic exposure.

IARC monographs, industry influence, and upgrading, downgrading, and under-grading chemicals: a personal point of view. International Agency for Research on Cancer.

Distribution and elimination of polychlorinated dibenzo-p-dioxins, dibenzofurans, biphenyls, and p,p'-DDE in tissues of bald eagles from the Upper Peninsula of Michigan.

Induction and inhibition of aromatase (CYP19) activity by various classes of pesticides in H295R human adrenocortical carcinoma cells.

The origin of calcium overload in rat cardiac myocytes following metabolic inhibition with 2,4-dinitrophenol.

Evidence for the involvement of CYP1A2 in the metabolism of bromodichloromethane in rat liver.

Impact of protein binding on the availability and cytotoxic potency of organochlorine pesticides and chlorophenols in vitro.

Effects of common-use pesticides on developmental and reproductive processes in *Daphnia*.

Generation of hydroxyl radicals mediated by streptozotocin in pancreatic islets of mice in vitro.

Effect of MPTP on Dopamine metabolism in Ames dwarf mice.

Enantioseparation of novel COX-2 anti-inflammatory drugs by capillary electrophoresis using single and dual cyclodextrin systems.

Sensory nerve-mediated nasal vasodilatory response to inspired ethyl acrylate.

Functional expression and localization of P-glycoprotein at the blood brain barrier.

Effects of inhaled methyl bromide gas on the metabolic system and kinetics of bromine ion in rats.

Sexually dimorphic nonreproductive behaviors as indicators of endocrine disruption.

Thyroid toxicity due to subchronic exposure to a complex mixture of 16 organochlorines, lead, and cadmium.

Stereoselective transport of histidine in rat lung microvascular endothelial cells.

beta-very low density lipoprotein enhances inducible nitric oxide synthase expression in cytokine-stimulated vascular smooth muscle cells.

Effects of benzo[a]pyrene exposure on a fish population resistant to the toxic effects of dioxin-like compounds.

Characterization of arsenic species in kidney of the clam *Tridacna derasa* by multidimensional liquid chromatography-ICPMS and electrospray time-of-flight tandem mass spectrometry.

The metabolic basis for 2,4-D resistance in two variant cell lines of carrot.

Alteration in ovarian gene expression in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin: reduction of cyclooxygenase-2 in the blockage of ovulation.

Expression of genes for alcohol and aldehyde metabolizing enzymes in mouse oocytes and preimplantation embryos.

Discrimination and taxonomy of geographically diverse strains of nitrile-metabolizing actinomycetes using chemometric and molecular sequencing techniques.

Assessment of chlorinated dibenzo-p-dioxin and dibenzofuran trends in sediment and crab hepatopancreas from pulp mill and harbor sites using multivariate- and index-based approaches.

Recognition and phagocytosis of apoptotic T cells by resident murine tissue macrophages require multiple signal transduction events.

Evidence for high activity of xylem parenchyma and ray cells in the interface of host stem and *Agrobacterium tumefaciens*-induced tumours of *Ricinus communis*.

Thyroid hormonal activity of the flame retardants tetrabromobisphenol A and tetrachlorobisphenol A.

Volatile metabolites from actinomycetes.

Oversulfated chondroitin/dermatan sulfates containing GlcAbeta1/IdoAalpha1-3GalNAc(4,6-O-disulfate) interact with L- and P-selectin and chemokines.

Induction of CYP1A1 and CYP1A2 expressions by prototypic and atypical inducers in the human lung.

Thyroxine reversibly inhibits the uncoupling action of protonophores on energy production in rat thymus lymphocytes.

StoPK-1, a serine/threonine protein kinase from the glycopeptide antibiotic producer *Streptomyces toyocaensis* NRRL 15009, affects oxidative stress response.

Charcoal affects early development and hormonal concentrations of somatic embryos of hybrid larch.

Thermodynamics of single peptide bond cleavage in bovine pancreatic trypsin inhibitor (BPTI).

Role of gas chromatography-mass spectrometry with negative ion chemical ionization in clinical and forensic toxicology, doping control, and biomonitoring.

Long-chain fatty acids increase basal metabolism and depolarize mitochondria in cardiac muscle cells.

Correlation between GABA release from rat islet beta-cells and their metabolic state.

Identification of 2,3,7,8-tetrachlorodibenzo-p-dioxin-responsive genes in mouse liver by serial analysis of gene expression.

Toluene metabolites as biological indicators of exposure.

Characterization of 2-amino-4,5-dichlorophenol (2A45CP) in vitro toxicity in renal cortical slices from male Fischer 344 rats.

Cytochemical investigation of gastric gland component cells with high-pressure freezing followed by freeze-substitution and hydrophilic resin embedding.

Aryl hydrocarbon receptor is required for prevention of blood clotting and for the development of vasculature and bone in the embryos of medaka fish, *Oryzias latipes*.

Synthesis of (1R,2S)-1-(3'-chloro-4'-methoxyphenyl)-1,2-propanediol (trametol) and (1R,2S)-1-(3',5'-dichloro-4'-methoxyphenyl)-1,2-propanediol, chlorinated fungal metabolites in the natural environment.

Dioxin exposure and porcine reproductive hormonal activity.

Arsenic accumulation and metabolism in rice (*Oryza sativa* L.).

A novel cell line, MDA-kb2, that stably expresses an androgen- and glucocorticoid-responsive reporter for the detection of hormone receptor agonists and antagonists.

Nitric oxide inactivation in brain by a novel O₂-dependent mechanism resulting in the formation of nitrate ions.

Barbiturase, a novel zinc-containing amidohydrolase involved in oxidative pyrimidine metabolism.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on oxidative enzymes in adipocytes and liver.

Immunohistochemical localization of thyroid stimulating hormone induced by a low oral dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats.

Ligand-regulated internalization, trafficking, and down-regulation of guanylyl cyclase/atrial natriuretic peptide receptor-A in human embryonic kidney 293 cells.

[Heat shock protein 27 in osteoblasts].

Analysis of plant hormones in tobacco flowers by micellar electrokinetic capillary chromatography coupled with on-line large volume sample stacking.

Polychlorinated dibenzo-p-dioxins, dibenzofurans, and dioxin-like polychlorinated biphenyls in livers of birds from Japan.

Unique property of some synthetic retinoids: activation of the aryl hydrocarbon receptor pathway.

Urocortin, but not urocortin II, protects cultured hippocampal neurons from oxidative and excitotoxic cell death via corticotropin-releasing hormone receptor type I.

Differences in genotoxicity of H₂O₂ and tetrachlorohydroquinone in human fibroblasts.

The toxicity and fate of phenolic pollutants in the contaminated soils associated with the oil-shale industry.

Implication of distinct proteins in cadmium uptake and transport by intestinal cells HT-29.

Effect of 2,4-dinitrophenol on the energy metabolism of cattle embryos produced by in vitro fertilization and culture.

Chemical speciation of arsenic in the livers of higher trophic marine animals.

Contamination and toxic effects of persistent endocrine disrupters in marine mammals and birds.

Ferritin induction protects cortical astrocytes from heme-mediated oxidative injury.

Induction of olfactory mucosal and liver metabolism of lidocaine by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

1,25(OH)₂-vitamin D₃ induces translocation of the vitamin D receptor (VDR) to the plasma membrane in skeletal muscle cells.

Acute sodium arsenite treatment induces Cyp2a5 but not Cyp1a1 in the C57Bl/6 mouse in a tissue (kidney) selective manner.

Preliminary evaluation of the cytotoxic and genotoxic potential of D-003: Mixture of very long chain fatty acids.

Tolerance and metabolism of phenol and chloroderivatives by hairy root cultures of *Daucus carota* L.

The Belgian PCB/dioxin incident: analysis of the food chain contamination and health risk evaluation.

Pharmacokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in Seveso adults and veterans of operation Ranch Hand.

Cell surface heparan sulfate proteoglycans: target and partners of the basic fibroblast growth factor in rat Sertoli cells.

Cytochrome P4501A induction and testosterone hydroxylation in cultured hepatocytes of four fish species.

Effects of trichloroacetic acid on the nitrogen metabolism of *Pinus sylvestris*--a ¹³C/¹⁵N tracer study.

Glucocorticoid-induced glucose release is abolished in trout hepatocytes with elevated hsp70 content.

PET imaging of dopamine transporters in the human brain using [(11)C]-beta-CPPIT, a cocaine derivative lacking the 2 beta-ester function.

The stimulation of tumor necrosis factor and inhibition of glucose transport and lipoprotein lipase in adipose cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Ethanol metabolism and transcription factor activation in pancreatic acinar cells in rats.

Dioxin increases reactive oxygen production in mouse liver mitochondria.

Unique Ca²⁺-activated ATPase in the nervous ganglia of *Phyllocaulis soleiformis* (Mollusca).

Identification of hydroxylated PCB metabolites and other phenolic halogenated pollutants in human blood plasma.

Detection of environmental endocrine-disruptor effects on gene expression in live *Rana catesbeiana* tadpoles using a tail fin biopsy technique.

Effects of atrazine on periphyton under grazing pressure.

Determination of glufosinate ammonium and its metabolite, 3-methylphosphinicopropionic acid, in human serum by gas chromatography-mass spectrometry following mixed-mode solid-phase extraction and t-BDMS derivatization.

Toxicity and effects of 2,6-di-tert-butyl-4-methylphenyl N-methylcarbamate (terbutol) on hepatic cytochrome P450 in F344 rats.

Evaluation of different algal species sensitivity to mercury and metolachlor by PAM-fluorometry.

Degradation in soil and water and ecotoxicity of rimsulfuron and its metabolites.

Effects of chloro-s-triazine herbicides and metabolites on aromatase activity in various human cell lines and on vitellogenin production in male carp hepatocytes.

Oral exposure of dimethylarsinic acid, a main metabolite of inorganic arsenics, in mice leads to an increase in 8-Oxo-2'-deoxyguanosine level, specifically in the target organs for arsenic carcinogenesis.

Amine metabolism: a novel path to coronary artery vasospasm.

Inhibition of oxygen consumption by pentachlorophenol and tetrachloroguaiacol in rainbow trout (*Oncorhynchus mykiss*).

Effect of isoproturon pretreatment on the biochemical toxicodynamics of anilofos in male rats.

Decreased plasma and cerebrospinal fluid glutamine concentrations in a patient with bialaphos poisoning.

Mineralization and co-metabolic degradation of phenoxyalkanoic acid herbicides by a pure bacterial culture isolated from an aquifer.

The variation on the mutagenicity of CNP during anaerobic biodegradation.

Genotoxic effect of 2,4-dichlorophenoxy acetic acid and its metabolite 2,4-dichlorophenol in mouse.

The development of a new method to estimate total daily dose of pesticides in professional turf applicators following multiple and varied exposures in occupational settings.

Use of a monoclonal antibody against Lafora bodies for the immunocytochemical study of ground-glass inclusions in hepatocytes due to cyanamide.

Metabolic complications of organophosphate and carbamate poisoning.

Toxicokinetics of atrazine in embryos of the zebrafish (*Danio rerio*).

Degradation products of a phenylurea herbicide, diuron: synthesis, ecotoxicity, and biotransformation.

Release of markedly increased quantities of prostaglandin D2 from the skin in vivo in humans after the application of cinnamic aldehyde.

Toxic effects of MPP(+) and MPTP in PC12 cells independent of reactive oxygen species formation.

Oxidative stress and liver toxicity in rats and human hepatoma cell line induced by pentachlorophenol and its major metabolite tetrachlorohydroquinone.

Designing herbicide formulation characteristics to maximize efficacy and minimize rice injury in paddy environments.

Effect of pendimethalin on growth and photosynthetic activity of *Protosiphon botryoides* in different nutrient states.

Chlorophyll a fluorescence and photosynthetic activity as tools for the evaluation of simazine toxicity to *Protosiphon botryoides* and *Anabaena variabilis*.

Evaluation of the toxicity of chemical compounds using digestive acini of the bivalve mollusc *Pecten maximus* L. maintained alive in vitro.

Disease associated with exposure to certain herbicide agents: type 2 diabetes. Final rule.

Determination of dichloroanilines in human urine by GC-MS, GC-MS-MS, and GC-ECD as markers of low-level pesticide exposure.

Biomarker correlations of urinary 2,4-D levels in foresters: genomic instability and endocrine disruption.

Toxic effects of the herbicide 2,4-dichlorophenoxyacetic acid on lymphoid organs of the rat.

Protective effects of 1 α ,25-(OH)₂D₃ against the neurotoxicity of glutamate and reactive oxygen species in mesencephalic culture.

Differential effects of trivalent and pentavalent arsenicals on cell proliferation and cytokine secretion in normal human epidermal keratinocytes.

Intracerebral administration of 2,4-dichlorophenoxyacetic acid induces behavioral and neurochemical alterations in the rat brain.

Toxicokinetics, recovery, and metabolism of napropamide in goats following a single high-dose oral administration.

Evaluation of the mutagenic potential of the principal DNA adduct of acrolein.

A concise review of the toxicity and carcinogenicity of dimethylarsinic acid.

Developmental toxicity studies in rats and rabbits on 2,4-dichlorophenoxyacetic acid and its forms.

Proliferation and differentiation of murine haemopoietic progenitor cells in stroma-free culture in the presence of metabolites of chlorinated pesticides.

Long-term fate of glyphosate associated with repeated rodeo applications to control smooth cordgrass (*Spartina alterniflora*) in Willapa Bay, Washington.

Pulse corticosteroids and cyclophosphamide in paraquat poisoning.

Selective protection by stably transfected human ALDH3A1 (but not human ALDH1A1) against toxicity of aliphatic aldehydes in V79 cells.

Genotoxic effects of methyl isothiocyanate.

Probiotic removal of herbicides with endocrine disrupting potential from aqueous matrices.

Induction and inactivation of a cytochrome P450 conferring herbicide resistance in wheat seedlings.

Cytotoxic and genotoxic effects of As, MMA, and DMA on leukocytes and stimulated human lymphocytes.

Effects of atrazine and nicosulfuron on freshwater microalgae.

Pentachlorophenol potentiates benzo[a]pyrene DNA adduct formation in adult but not infant B6C3F1 male mice.

Occupational exposure to pesticides and pancreatic cancer.

Pancreatitis induced by environmental toxins.

Strain comparisons of atrazine-induced pregnancy loss in the rat.

Urothelial cytotoxicity and regeneration induced by dimethylarsinic acid in rats.

Combined effects of pentachlorophenol and salinity stress on chemiluminescence activity in two species of abalone.

Arsenic-induced congenital malformations in genetically susceptible folate binding protein-2 knockout mice.

Substantia nigra neuromelanin: structure, synthesis, and molecular behaviour.

Cytogenetic effects of propyl gallate in CHO-K1 cells.

Altered gene level expression of thyroid hormone receptors alpha-1 and beta-1 in the lung of nitrofen-induced diaphragmatic hernia.

A cost of reproduction in *Drosophila melanogaster*: stress susceptibility.

Serum dioxin and peripheral neuropathy in veterans of Operation Ranch Hand.

Immunohistochemical detection of lipid peroxidation products, protein-bound acrolein and 4-hydroxynonenal protein adducts, in actinic elastosis of photodamaged skin.

Effect of tiagabine and topiramate on porphyrin metabolism in an in vivo model of porphyria.

Hydrogen peroxide removal and glutathione mixed disulfide formation during metabolic inhibition in mesencephalic cultures.

Expression of inducible nitric oxide synthase in primary culture of rat bladder smooth muscle cells by plasma from cyclophosphamide-treated rats.

Prepro-orexin mRNA levels in the rat hypothalamus, and orexin receptors mRNA levels in the rat hypothalamus and adrenal gland are not influenced by the thyroid status.

Effects of chlorpropham (CIPC) on the hemopoietic system of rats.

Influence of caffeine on allyl alcohol-induced hepatotoxicity in rats. I. In vivo study.

Glycerol metabolism in superoxide dismutase-deficient *Escherichia coli*.

Assessment of leaching potential of aldicarb and its metabolites using laboratory studies.

Evidence for a novel role of copper-zinc superoxide dismutase in zinc metabolism.

Symbiotic gene activation is interrupted by endocrine disrupting chemicals.

Biological monitoring of exposure of the general population to the organophosphorus pesticides chlorpyrifos and chlorpyrifos-methyl by determination of their specific metabolite 3,5,6-trichloro-2-pyridinol.

Biodegradation and transfer of ingested 2,4-D herbicide by a polyphagous saturniid caterpillar.

[Analysis of glyphosate and its metabolite, aminomethylphosphonic acid, in agricultural products by HPLC].

Metabolism of 2-(4-methylsulphonyl-2-nitrobenzoyl)-1,3-cyclohexanedione (mesotrione) in rat and mouse.

Animal species difference in the uptake of dimethylarsinous acid (DMA(III)) by red blood cells.

In vivo and in vitro binding of 2,4-dichlorophenoxyacetic acid to a rat liver mitochondrial protein.

Liquid chromatographic/mass spectrometric determination of desmedipham and phenmedipham and their metabolites in soil.

Metabolism of the phosphonate herbicide glyphosate by a non-nitrate-utilizing strain of *Penicillium chrysogenum*.

Isoprenoid biosynthesis. Metabolite profiling of peppermint oil gland secretory cells and application to herbicide target analysis.

Auxin herbicides induce H₂O₂ overproduction and tissue damage in cleavers (*Galium aparine* L.).

Sensory-nerve-mediated nasal vasodilatory response to inspired acetaldehyde and acetic acid vapors.

Resistance of a soybean cell line to oxyfluorfen by overproduction of mitochondrial protoporphyrinogen oxidase.

Biotransformation, excretion kinetics, and tissue distribution of an N-pyrrolo[1,2-c]imidazolylphenyl sulfonamide herbicide in rats.

Effects of S-ethyl hexahydro-1H-azepine-1-carbothioate (molinate) on di-n-butyl dichlorovinyl phosphate (DBDCVP) neuropathy.

Determination of the herbicide 4-chloro-2-methylphenoxyacetic acid and its main metabolite, 4-chloro-2-methylphenol in water and soil by liquid chromatography-electrospray tandem mass spectrometry.

High-performance liquid chromatography method for the quantification of non-radiolabelled cinnamic compounds in analytes derived from human skin absorption and metabolism experiments.

Sorption and metabolism of selected herbicides in river biofilm communities.

Isolation and characterisation of *Rhodococcus erythropolis* TA57 able to degrade the triazine amine product from hydrolysis of sulfonylurea pesticides in soils.

Determination of clethodim and its oxidation metabolites in crops by liquid chromatography with confirmation by LC/MS.

Anaerobic degradation of atrazine and metolachlor and metabolite formation in wetland soil and water microcosms.

Increased cysteine biosynthesis capacity of transgenic tobacco overexpressing an O-acetylserine(thiol) lyase modifies plant responses to oxidative stress.

Design of functionalized lipids and evidence for their binding to photosystem II core complex by oxygen evolution measurements, atomic force microscopy, and scanning near-field optical microscopy.

Impaired activity of the extraneuronal monoamine transporter system known as uptake-2 in Orct3/Slc22a3-deficient mice.

Formation and transport of the sulfonic acid metabolites of alachlor and metolachlor in soil.

Plant hormones in war and peace. Science, industry, and government in the development of herbicides in 1940s America.

Uniformly (14)C-ring-labeled 2,4-dichlorophenoxyacetic acid: a metabolism study in bluegill sunfish, *Lepomis macrochirus*.

The impact of two pesticides on olfactory-mediated endocrine function in mature male Atlantic salmon (*Salmo salar* L.) parr.

Repression of phenobarbital-dependent CYP2B1 mRNA induction by reactive oxygen species in primary rat hepatocyte cultures.

Solid-phase extraction with styrene-divinylbenzene sorbent for high-performance liquid or gas chromatographic determination of urinary chloro- and methylthiothiazines.

Glutathione depletion in rat hepatocytes: a mixture toxicity study with alpha, beta-unsaturated esters.

Oxidative stress and usnic acid content in *Parmelia caperata* and *Parmelia soledians* (Lichenes).

Microbial metabolites as eco-friendly agrochemicals for the next millennium.

Characterization of metabolic activation of pentachlorophenol to quinones and semiquinones in rodent liver.

Metabolism and distribution of [2,3-(14)C]acrolein in laying hens.

Metabolism and distribution of [2,3-(14)C]acrolein in lactating goats.

Role of the epithelium in opposing H₂O₂-induced modulation of acetylcholine-induced contractions in rabbit intrapulmonary bronchiole.

Accumulation of heavy metals in epidermal glands of the waterlily (*Nymphaeaceae*).

Oxidative stress inhibits the mitochondrial import of preproteins and leads to their degradation.

Unmasking the progesterone receptor in the preoptic area and hypothalamus of the ewe: no colocalization with gonadotropin-releasing neurons.

The transcriptional and DNA binding activity of peroxisome proliferator-activated receptor alpha is inhibited by ethanol metabolism. A novel mechanism for the development of ethanol-induced fatty liver.

Nontraditional microbial bioactive metabolites.

In vitro human phase I metabolism of xenobiotics I: pesticides and related chemicals used in agriculture and public health, September 2001.

Biodegradation of the phenylurea herbicide isoproturon and its metabolites in agricultural soils.

Investigation of atrazine metabolism in river sediment by high-performance liquid chromatography/mass spectrometry.

A novel arsenical in clam kidney identified by liquid chromatography/electrospray ionisation mass spectrometry.

Morphohistobiochemical characteristics of embryogenic and nonembryogenic callus cultures of sweet potato (*Ipomoea batatas* L.).

Metabolism of the herbicide glufosinate-ammonium in plant cell cultures of transgenic (rhizomania-resistant) and non-transgenic sugarbeet (*Beta vulgaris*), carrot (*Daucus carota*), purple foxglove (*Digitalis purpurea*) and thorn apple (*Datura stramonium*).

Mutagenicity of 2-alkylpropenals in *Salmonella typhimurium* strain TA 100: structural influences.

Ion chromatographic analysis of selected free amino acids and cations to investigate the change of nitrogen metabolism by herbicide stress in soybean (*glycine max*).

Detection of pesticides and pesticide metabolites using the cross reactivity of enzyme immunoassays.

Transport of [³H]MPP⁺ in an immortalized rat brain microvessel endothelial cell line (RBE 4).

Atrazine effects on testosterone levels and androgen-dependent reproductive organs in peripubertal male rats.

Metabolism of 2,4-dichlorophenoxyacetic acid in laying hens and lactating goats.

Acetaldehyde, a metabolite of ethanol, activates the hypothalamic-pituitary-adrenal axis in the rat.

Alteration of catecholamines in pheochromocytoma (PC12) cells in vitro by the metabolites of chlorotriazine herbicide.

[Effect of sideropenic anemia and its therapy on serum levels of leptin].

Cutaneous elimination of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Environmental contaminants as etiologic factors for diabetes.

Macrophage migration inhibitory factor as a redox-sensitive cytokine in cardiac myocytes.

Mitochondrial uncoupling as a target for drug development for the treatment of obesity.

Biochemical, neuropsychological, and neurological abnormalities following 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure.

Effects on levels of glutathione and some related enzymes in tissues after an acute arsenic exposure in rats and their relationship to dietary protein deficiency.

Protection by dietary compounds against mutation in a transgenic rodent.

The effects of catechol-O-methyltransferase inhibition on estrogen metabolite and oxidative DNA damage levels in estradiol-treated MCF-7 cells.

[A case of fatal acute sodium azide poisoning].

Occupational exposure to endocrine-disrupting pesticides and the potential for developing hormonal cancers.

Dioxin and diabetes mellitus: an analysis of the combined NIOSH and Ranch Hand data.

7,12-Dimethylbenz[a]anthracene inhibition of steroid production in MA-10 mouse Leydig tumor cells is not directly linked to induction of CYP1B1.

Persistent, low-dose 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure: effect on aryl hydrocarbon receptor expression in a dioxin-resistance model.

Regulated expression of GRP78 during vasopressin-induced hypertrophy of heart-derived myocytes.

Pharmacokinetics and pharmacodynamics of NTBC (2-(2-nitro-4-fluoromethylbenzoyl)-1,3-cyclohexanedione) and mesotrione, inhibitors of 4-hydroxyphenyl pyruvate dioxygenase (HPPD) following a single dose to healthy male volunteers.

Down-regulation of regulatory proteins for differentiation and proliferation in murine fetal hypoplastic lungs: altered mesenchymal-epithelial interactions.

Contribution of Mn-cofactored superoxide dismutase (SodA) to the virulence of *Streptococcus agalactiae*.

Use of a toxicokinetic model in the analysis of cancer mortality in relation to the estimated absorbed dose of dioxin (2,3,7,8-tetrachlorodibenzo-p-dioxin, TCDD).

[A case of chronic methyl bromide intoxication showing symmetrical lesions in the basal ganglia and brain stem on magnetic resonance imaging].

Modulatory effects of neonatal exposure to TCDD, or a mixture of PCBs, p,p'-DDT, and p,p'-DDE, on methylnitrosourea-induced mammary tumor development in the rat.

Role of metabolism in arsenic toxicity.

Selection of hybrids and edible citrus species with a high content in the diosmin functional compound. Modulating effect of plant growth regulators on contents.

Induction of hepatic 8-oxo-deoxyguanosine adducts by 2,3,7,8-tetrachlorodibenzo-p-dioxin in Sprague-Dawley rats is female-specific and estrogen-dependent.

Hepatic vitamin A depletion is a sensitive marker of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure in four rodent species.

In utero and lactational treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin impairs mammary gland differentiation but does not block the response to exogenous estrogen in the postpubertal female rat.

Prenatal testosterone and luteinizing hormone levels in male rats exposed during pregnancy to 2,3,7,8-tetrachlorodibenzo-p-dioxin and diethylstilbestrol.

Interaction of estrogen and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) with hepatic fatty acid synthesis and metabolism of male chickens (*Gallus domesticus*).

Cartilage and bone biological markers in the synovial fluid of osteoarthritic patients after hyaluronan injections in the knee.

The genetic basis of endometriosis.

Health effects of dioxin exposure: a 20-year mortality study.

Protection of the Cyp1a2(-/-) null mouse against uroporphyrin and hepatic injury following exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Polychlorinated biphenyl serum levels in pregnant subjects with diabetes.

Subchronic Exposure of [3H]- 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in female B6C3F1 mice: relationship of steady-state levels to disposition and metabolism.

Pinacidil prevents membrane depolarisation and intracellular Ca²⁺ loading in single cardiomyocytes exposed to severe metabolic stress.

3,4-Dichlorophenylhydroxylamine cytotoxicity in renal cortical slices from Fischer 344 rats.

Differential regulation of cytochrome P450 1A1 and 1B1 by a combination of dioxin and pesticides in the breast tumor cell line MCF-7.

Regulation of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced tumor promotion by 17 beta-estradiol in female Sprague-Dawley rats.

[The changes of PCBs and PCDFs as well as symptoms in Yusho patients for 30 years].

Neural crest-derived defects in experimental congenital diaphragmatic hernia.

Human health effects of dioxins: cancer, reproductive and endocrine system effects.

Impaired ovulation by 2,3,7,8 tetrachlorodibenzo-p-dioxin (TCDD) in immature rats treated with equine chorionic gonadotropin.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on weight gain and hepatic ethoxyresorufin-o-deethylase (EROD) induction vary with ovarian hormonal status in the immature gonadotropin-primed rat model.

Oral administration of dimethylarsinic acid, a main metabolite of inorganic arsenic, in mice promotes skin tumorigenesis initiated by dimethylbenz(a)anthracene with or without ultraviolet B as a promoter.

Fate of PCDF/PCB congeners and change of clinical symptoms in patients with Yusho PCB poisoning for 30 years.

An overview of TCDD half-life in mammals and its correlation to body weight.

Metabolism of equilenin in MCF-7 and MDA-MB-231 human breast cancer cells.

Recent advances in arsenic carcinogenesis: modes of action, animal model systems, and methylated arsenic metabolites.

2,3,7,8-Tetrachlorodibenzo-p-dioxin and diindolylmethanes differentially induce cytochrome P450 1A1, 1B1, and 19 in H295R human adrenocortical carcinoma cells.

Down-regulation of E-cadherin gene expression by collagen type I and type III in pancreatic cancer cell lines.

Uptake mechanism of valproic acid in human placental choriocarcinoma cell line (BeWo).

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on fetal mouse urinary tract epithelium in vitro.

Etiologic factors in soft tissue sarcomas.

[Chronic arsenicism].

Toxicity of PCB-126 in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P4501A induction in several organ systems.

Comparative biodistribution and metabolism of carbon-11-labeled N-[2-(dimethylamino)ethyl]acridine-4-carboxamide and DNA-intercalating analogues.

Susceptibility to fluconazole of *Candida* clinical isolates determined by FUN-1 staining with flow cytometry and epifluorescence microscopy.

Lung carcinogenesis: resveratrol modulates the expression of genes involved in the metabolism of PAH in human bronchial epithelial cells.

Subchronic sodium chlorate exposure in drinking water results in a concentration-dependent increase in rat thyroid follicular cell hyperplasia.

Maternal exposure to a low dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) suppressed the development of reproductive organs of male rats: dose-dependent increase of mRNA levels of 5 α -reductase type 2 in contrast to decrease of androgen receptor in the pubertal ventral prostate.

Acquired resistance to Ah receptor agonists in a population of Atlantic killifish (*Fundulus heteroclitus*) inhabiting a marine superfund site: in vivo and in vitro studies on the inducibility of xenobiotic metabolizing enzymes.

Aromatic hydrocarbon receptor (AhR). AhR nuclear translocator- and p53-mediated induction of the murine multidrug resistance *mdr1* gene by 3-methylcholanthrene and benzo(a)pyrene in hepatoma cells.

Effect of highly bioaccumulated polychlorinated biphenyl congeners on estrogen and androgen receptor activity.

Autism and Parkinson's disease.

Glucosyltransferase inactivation reduces dental caries.

High-performance liquid chromatography/fluorescence detection of S-methylglutathione formed by glutathione-S-transferase T1 in vitro.

5-Aminolaevulinic acid methyl ester transport on amino acid carriers in a human colon adenocarcinoma cell line.

Genetic events associated with arsenic-induced malignant transformation: applications of cDNA microarray technology.

Dopaminergic cell death induced by MPP(+), oxidant and specific neurotoxicants shares the common molecular mechanism.

2,3,7,8-tetrachlorodibenzo-p-dioxin decreases responsiveness of the hypothalamus to estradiol as a feedback inducer of preovulatory gonadotropin secretion in the immature gonadotropin-primed rat.

Antimitotic actions of a novel analog of the fungal metabolite palmarumycin CP1.

Synthesis, antimalarial activity, biomimetic iron(II) chemistry, and in vivo metabolism of novel, potent C-10-phenoxy derivatives of dihydroartemisinin.

Human cyclophilin 40 is a heat shock protein that exhibits altered intracellular localization following heat shock.

Thyroid hormones, acute iron overload and the pathogenesis of cloudy swelling.

Pesticides as a cause of occupational skin diseases in farmers.

Protein tyrosine kinase-dependent regulation of adenylate cyclase and phosphatidylinositol 3-kinase activates the expression of glial fibrillary acidic protein upon induction of differentiation in rat c6 glioma.

Sodium azide treatment decreases striatal and cortical concentrations of alpha-tocopherol in rats.

Analysis of collagenase-cleavage of type II collagen using a neoepitope ELISA.

Rapid direct determination of pesticides and metabolites in environmental water samples at sub-microg/l level by on-line solid-phase extraction-liquid chromatography-electrospray tandem mass spectrometry.

5-HT(7) receptor and beta(2)-adrenoceptor share in the inhibition of porcine uterine contractility in a muscle layer-dependent manner.

Benzo[a]pyrene-induced toxicity: paradoxical protection in Cyp1a1(-/-) knockout mice having increased hepatic BaP-DNA adduct levels.

Studies made to assess risk concerning a 'dioxin' contamination incident near Bolsover, Derbyshire, UK.

Phylogeny of natural cytotoxicity: cytotoxic activity of coelomocytes of the purple sea urchin, *Arbacia punctulata*.

Activation of p38 mitogen-activated protein kinases by endothelin and noradrenaline in small arteries, regulation by calcium influx and tyrosine kinases, and their role in contraction.

Pyruvate decarboxylase: a key enzyme for the oxidative metabolism of lactic acid by *Acetobacter pasteurianus*.

Evidence of P-glycoprotein mediated apical to basolateral transport of flunisolide in human broncho-tracheal epithelial cells (Calu-3).

Cyclophosphamide induces caspase 9-dependent apoptosis in 9L tumor cells.

Effects of dioxins and polychlorinated biphenyls (PCBs) on thyroid function in infants born in Japan--the second report from research on environmental health.

Role of iron in the interaction of red blood cells with methylglyoxal. Modification of L-arginine by methylglyoxal is catalyzed by iron redox cycling.

An in vivo ESR spin-trapping study: free radical generation in rats from formate intoxication--role of the Fenton reaction.

Enhanced systemic tissue distribution after dermal versus intravenous 3,3',4,4'-tetrachlorobiphenyl exposure: limited utility of radiolabel blood area under the curve and excretion data in dermal absorption calculations and tissue exposure assessment.

Acute exposure to organochlorine pesticides does not affect striatal dopamine in mice.

Current status of fertility control methods in India.

Co-metabolic degradation of chlorinated hydrocarbons by *Pseudomonas* sp. strain DCA1.

Differential effects of two lots of aroclor 1254 on enzyme induction, thyroid hormones, and oxidative stress.

Differential effects of two lots of aroclor 1254: congener-specific analysis and neurochemical end points.

Effects of indomethacin on energy metabolism in rat and human jejunal tissue in vitro.

Lipid peroxidation end products-responeded induction of a preneoplastic marker enzyme glutathione S-transferase P-form (GST-P) in rat liver on admistration via the portal vein.

Aryl hydrocarbon receptor-mediated activity of mutagenic polycyclic aromatic hydrocarbons determined using in vitro reporter gene assay.

Cytochrome CYP2E1 phenotyping and genotyping in the evaluation of health risks from exposure to polluted environments.

Toxicological relevance of the multidrug resistance protein 1, MRP1 (ABCC1) and related transporters.

Identification of biochemical pathways for the metabolism of oxidized low-density lipoprotein derived aldehyde-4-hydroxy trans-2-nonenal in vascular smooth muscle cells.

Phosphorylation-dependent nucleocytoplasmic shuttling of pancreatic duodenal homeobox-1.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on corticotrophin-releasing hormone, arginine vasopressin, and pro-opiomelanocortin mRNA levels in the hypothalamus of the cynomolgus monkey.

Reductions in systemic oxygen delivery induce a hypometabolic state in the turtle *Trachemys scripta*.

Distribution spaces for hyaluronan and albumin in rat tail tendons.

Kinetics of the protein-bound, lipophilic, uremic toxin p-cresol in healthy rats.

Characterization of three bioenergetically active respiratory terminal oxidases in the cyanobacterium *Synechocystis* sp. strain PCC 6803.

Role of substrates in the regulation of mitochondrial function in situ.

Identification of a new urinary metabolite of carbon disulfide using an improved method for the determination of 2-thioxothiazolidine-4-carboxylic acid.

Toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds.

Neuroendocrine and behavioral implications of endocrine disrupting chemicals in quail.

7-Ethoxyresorufin O-deethylase induction in rainbow trout gill epithelium cultured on permeable supports: asymmetrical distribution of substrate metabolites.

Identification of the major metabolites of prochloraz in rainbow trout by liquid chromatography and tandem mass spectrometry.

The chemistry, toxicology, and identification in rat and human urine of 4-hydroxy-5-phenyl-1,3-oxazaperhydroin-2-one: a reactive metabolite in felbamate bioactivation.

An ATP-sensitive K(+) conductance in dissociated neurones from adult rat intracardiac ganglia.

Glucose metabolism and pulsatile insulin release from isolated islets.

Sex ratio in offspring of those affected by dioxin and dioxin-like compounds: the Yusho, Seveso, and Yucheng incidents.

Dissociation of 5' AMP-activated protein kinase activation and glucose uptake stimulation by mitochondrial uncoupling and hyperosmolar stress: differential sensitivities to intracellular Ca²⁺ and protein kinase C inhibition.

TAT peptide on the surface of liposomes affords their efficient intracellular delivery even at low temperature and in the presence of metabolic inhibitors.

Involvement of cyclooxygenase-2 in the potentiation of allyl alcohol-induced liver injury by bacterial lipopolysaccharide.

Characteristics of transport of fluoresceinated methotrexate in rat small intestine.

Efficient in vitro plant regeneration from immature zygotic embryos of pearl millet [*Pennisetum glaucum* (L.) R. Br.] and *Sorghum bicolor* (L.) Moench.

Metabolism of [14C]1,2,7,8-tetrachlorodibenzo-p-dioxin in a ruminating Holstein calf.

Levels of certain metals, organochlorine pesticides and dioxins in cord blood, maternal blood, human milk and some commonly used nutrients in the surroundings of the Aral Sea (Karakalpakstan, Republic of Uzbekistan).

In vitro model using mouse hepatocytes for study of alcohol stress.

Effect of dioxin on ovarian function in the cynomolgus macaque (*M. fascicularis*).

Cholecystokinin activation of 70-kDa S6 kinase in exocrine pancreas.

Arsenic induces expression of the multidrug resistance-associated protein 2 (MRP2) gene in primary rat and human hepatocytes.

Toxicity characterisation of organic contaminants in stormwaters from an agricultural headwater stream in south east England.

Hypoxia-induced upregulation of eNOS gene expression is redox-sensitive: a comparison between hypoxia and inhibitors of cell metabolism.

A new technique for measuring the cell growth and metabolism of endothelial cells seeded on vascular prostheses.

Measurement of children's exposure to pesticides: analysis of urinary metabolite levels in a probability-based sample.

Intraocular pressure and vascular effects of sodium azide in bovine perfused eye.

Prediction of endocrine disruptors based on a new structure-activity relationship for sex and environmental hormones using chemical hardness concept.

Disposition of polychlorinated dibenzo-p-dioxins, dibenzofurans, and non-ortho polychlorinated biphenyls in pregnant long evans rats and the transfer to offspring.

Skin surface electric potential induced by ion-flux through epidermal cell layers.

Alterations in follicle development, steroidogenesis, and gonadotropin receptor binding in a model of ovulatory blockade.

Biliary excretion of temocapril in zone 1- and zone 3-injured rat.

Renal function, cytogenetic measurements, and sexual development in adolescents in relation to environmental pollutants: a feasibility study of biomarkers.

Strategies for neuroprotection against L-trans-2,4-pyrrolidine dicarboxylate-induced neuronal damage during energy impairment in vitro.

Serum hormone levels in humans with low serum concentrations of 2,3,7,8-TCDD.

Effects of environmental antiandrogens on reproductive development in experimental animals.

Polychlorinated biphenyls, polychlorinated dibenzo-p-dioxins, and polychlorinated dibenzofurans as endocrine disrupters--what we have learned from Yusho disease.

Cytotoxicity of reactive oxygen species and related agents toward undifferentiated and differentiated rat pheochromocytoma PC12 cells.

Levels of hexachlorobenzene and other organochlorine compounds in cord blood: exposure across placenta.

Effects of binary mixtures of six xenobiotics on hormone concentrations and morphometric endpoints of northern bobwhite quail (*Colinus virginianus*).

Induction of CYP1A by benzo[k]fluoranthene in human hepatocytes: CYP1A1 or CYP1A2?

Heparin-induced release of protein-bound solutes during hemodialysis is an in vitro artifact.

DNA damaging agents increase gadd153 (CHOP-10) messenger RNA levels in bovine preimplantation embryos cultured in vitro.

Delivery of genes encoding cardiac K(ATP) channel subunits in conjunction with pinacidil prevents membrane depolarization in cells exposed to chemical hypoxia-reoxygenation.

Cyclopentenone prostaglandins as potential inducers of intracellular oxidative stress.

Effect of arsenite on certain aspects of protein metabolism in fresh water teleost, *Tilapia mossambica* (Peters).

Metabolic inhibition of root water flow in red-osier dogwood (*Cornus stolonifera*) seedlings.

Plant hormone regulation on scopoletin metabolism from culture medium into tobacco cells.

Induction of direct adducts, apurinic/aprimidinic sites and oxidized bases in nuclear DNA of human HeLa S3 tumor cells by tetrachlorohydroquinone.

Oxidative damage and direct adducts in calf thymus DNA induced by the pentachlorophenol metabolites, tetrachlorohydroquinone and tetrachloro-1,4-benzoquinone.

ATP consumption by uncoupled mitochondria activates sarcolemmal K(ATP) channels in cardiac myocytes.

Astrocytes overexpressing Cu,Zn superoxide dismutase have increased resistance to oxidative injury.

Regulation of cytochrome P450 in a primary culture of rainbow trout hepatocytes.

Plasma levels of persistent organohalogenes and hormone levels in adult male humans.

Influence of glucose on glycerol metabolism by wild-type and mutant strains of *Clostridium butyricum* E5 grown in chemostat culture.

Proposal of *Sphingomonas wittichii* sp. nov. for strain RW1T, known as a dibenzo-p-dioxin metabolizer.

Establishment of orally-administered *Lactobacillus gasseri* SBT2055SR in the gastrointestinal tract of humans and its influence on intestinal microflora and metabolism.

Tissue distribution, excretion, and metabolism of 1,2,7,8-tetrachlorodibenzo-p-dioxin in the rat.

Repression of cytochrome P450 1A1 gene expression by oxidative stress: mechanisms and biological implications.

Substrate selectivity of a 3-nitrophenol-induced metabolic system in *Pseudomonas putida* 2NP8 transforming nitroaromatic compounds into ammonia under aerobic conditions.

Fungal metabolism of toluene: monitoring of fluorinated analogs by ¹⁹F nuclear magnetic resonance spectroscopy.

Age-related changes in energy production in fresh senescence-accelerated mouse brain slices as revealed by positron autoradiography.

Acyl-CoA-binding protein in the armadillo Harderian gland: its primary structure and possible role in lipid secretion.

The yeast glycerol 3-phosphatases Gpp1p and Gpp2p are required for glycerol biosynthesis and differentially involved in the cellular responses to osmotic, anaerobic, and oxidative stress.

Immunomodulation of ABA function affects early events in somatic embryo development.

PCB methyl sulphones in rat liver after exposure to PCB (Clophen A50): analysis and radiosynthesis of selected methylsulphonyl-PCBs.

Effects of cresols (o-, m-, and p-isomers) on the bioenergetic system in isolated rat liver mitochondria.

SoxR-dependent response to oxidative stress and virulence of *Erwinia chrysanthemi*: the key role of SufC, an orphan ABC ATPase.

Induction of 7-ethoxyresorufin-O-deethylase activity by planar chlorinated hydrocarbons and polycyclic aromatic hydrocarbons in cell lines from the rainbow trout pituitary.

Suppression of lipid peroxidation in adrenal microsomes following ACTH administration to guinea pigs.

Kinetics of monochloroacetic acid in adult male rats after intravenous injection of a subtoxic and a toxic dose.

In situ hybridization and immunohistochemical analysis of cytochrome P450 1B1 expression in human normal tissues.

Cytochrome P450 2E1 metabolically activates propargyl alcohol: propionaldehyde-induced hepatocyte cytotoxicity.

Metabolism of dibenzo-p-dioxin and chlorinated dibenzo-p-dioxin by a gram-positive bacterium, *Rhodococcus opacus* SAO101.

Cultured rat vascular smooth muscle cells are resistant to methylamine toxicity: no correlation to semicarbazide-sensitive amine oxidase.

Beneficial effect of nitric oxide synthase inhibitor on hepatotoxicity induced by allyl alcohol.

The glutathione metabolism of the beta-lactam producer filamentous fungus *Penicillium chrysogenum*.

Toxic effects of arsenic (III) on some hematopoietic and central nervous system variables in rats and guinea pigs.

Acclimative changes in root epidermal cell fate in response to Fe and P deficiency: a specific role for auxin?

In vitro cytochemical studies of the golgi apparatus of pancreatic acinar cells exposed to drugs that inhibit the transport of membranes and proteins.

Toxicity of pesticides to aquatic microorganisms: a review.

Semiquantitative analysis of types I and III collagen from tendons and ligaments in a rabbit model.

Carcinogen biomarkers for lung or oral cancer chemoprevention trials.

Measurement of plasma metabolites of (S)-5-[¹²³I]iodo-3-(2-azetidylmethoxy)pyridine (5-IA-85380), a nicotinic acetylcholine receptor imaging agent, in nonhuman primates.

Adenosine diphosphate ribose dilates bovine coronary small arteries through apyrase- and 5'-nucleotidase-mediated metabolism.

Metabolic fate of [¹⁴C]-ethanol into endothelial cell phospholipids including platelet-activating factor, sphingomyelin and phosphatidylethanol.

Metabolism of ochratoxin A: absence of formation of genotoxic derivatives by human and rat enzymes.

Effects of tyrosine kinase inhibitors on cell death induced by sodium fluoride and pertussis toxin in the pancreatic beta-cell line, RINm5F.

Health risks posed by use of Di-2-ethylhexyl phthalate (DEHP) in PVC medical devices: a critical review.

Effects of subchronic exposure to complex mixtures of dioxin-like and non-dioxin-like polyhalogenated aromatic compounds on thyroid hormone and vitamin A levels in female Sprague-Dawley rats.

Associations between laboratory parameters and outcome of paraquat poisoning.

Glycosuria in organophosphate and carbamate poisoning.

Acute and repeated vapor exposure toxicology of 3-(methylthio)propionaldehyde.

The effects of atrazine on female wistar rats: an evaluation of the protocol for assessing pubertal development and thyroid function.

The antioxidant ebselen prevents neurotoxicity and clinical symptoms in a primate model of Parkinson's disease.

Purification and characterization of diquat (1,1'-ethylene-2, 2'-dipyridylum)-metabolizing enzyme from paraquat-resistant rat liver cytosol.

Folic acid protects SWV/Fnn embryo fibroblasts against arsenic toxicity.

Evolution of alachlor-induced nasal neoplasms in the Long-Evans rat.

Role of prolactin in chloro-S-triazine rat mammary tumorigenesis.

Evaluation of the genotoxic and cytochrome P450 monooxygenase-inhibitory potential of Dicuran on prokaryotic and eukaryotic test systems.

Effect of atrazine on implantation and early pregnancy in 4 strains of rats.

Modeling and predicting selected immunological effects of a chemical stressor (3,4-dichloropropionanilide) using the area under the corticosterone concentration versus time curve.

The effect of atrazine on puberty in male wistar rats: an evaluation in the protocol for the assessment of pubertal development and thyroid function.

72-kDa stress protein (hsp72) induced by administration of dimethylarsinic acid to mice accumulates in alveolar flat cells of lung, a target organ for arsenic carcinogenesis.

Evaluation of dietary and environmental risk factors for hyperthyroidism in cats.

Hypothalamo-pituitary-adrenal axis activation by administration of cyanamide: a potent inhibitor of aldehyde dehydrogenase.

Cancer mortality in four northern wheat-producing states.

Modifications of the topical Japanese medaka (*Oryzias latipes*) embryo larval assay for assessing developmental toxicity of pentachlorophenol and p, p'-dichlorodiphenyltrichloroethane.

The molecular effects of acrolein.

Chronic toxicity and oncogenicity bioassay in rats with the chloro-s-triazine herbicide cyanazine.

A novel leg-shaking *Drosophila* mutant defective in a voltage-gated K(+) current and hypersensitive to reactive oxygen species.

Lung toxicity of paraquat in the rat.

Potentiated and preferential effects of combined paraquat and maneb on nigrostriatal dopamine systems: environmental risk factors for Parkinson's disease?

Acetochlor-induced rat nasal tumors: further studies on the mode of action and relevance to humans.

Comparative toxicity of trivalent and pentavalent inorganic and methylated arsenicals in rat and human cells.

Roundup inhibits steroidogenesis by disrupting steroidogenic acute regulatory (StAR) protein expression.

Differential modulation of catecholamines by chlorotriazine herbicides in pheochromocytoma (PC12) cells in vitro.

Effect of chlorinated hydrocarbons on expression of cytochrome P450 1A1, 1A2 and 1B1 and 2- and 4-hydroxylation of 17beta-estradiol in female Sprague-Dawley rats.

The selective toxicity of 1-methyl-4-phenylpyridinium to dopaminergic neurons: the role of mitochondrial complex I and reactive oxygen species revisited.

Immunodetection of hepatic peroxisomal PMP70 as an indicator of peroxisomal proliferation in the mummichog, *Fundulus heteroclitus*.

Subchronic toxicity of chlorpropham (CIPC) in ICR mice.

Correlating the severity of paraquat poisoning with specific hemodynamic and oxygen metabolism variables.

Promotion of skin carcinogenesis by dimethylarsinic acid in keratin (K6)/ODC transgenic mice.

Quantitative structure-activity analysis of the algae toxicity of nitroaromatic compounds.

The effect of exposure to a commercial 2,4-D herbicide formulation during gestation on urethan-induced lung adenoma formation in CD-1 mice.

Alterations on polyamine content and glutathione metabolism induced by different concentrations of paraquat in CHO-K1 cells.

Catalytic efficiencies of allelic variants of human glutathione S-transferase Pi in the glutathione conjugation of alpha, beta-unsaturated aldehydes.

Ethane sulfonate metabolite of alachlor: assessment of oncogenic potential based on metabolic and mechanistic considerations.

No significant paraquat-induced oxidative DNA damage in rats.

Safety evaluation and risk assessment of the herbicide Roundup and its active ingredient, glyphosate, for humans.

Effects of L-2-oxothiazolidine-4-carboxylate on the cytotoxic activity and toxicity of cyclophosphamide in mice bearing B16F10 melanoma liver metastases.

Acute metobromuron poisoning with severe associated methemoglobinemia. Identification of four metabolites in plasma and urine by LC-DAD, LC-ESI-MS, and LC-ESI-MS-MS.

Design and application of a biosensor for monitoring toxicity of compounds to eukaryotes.

A higher tier flow-through toxicity test with the green alga *Selenastrum capricornutum*.

A fatal case of chlorate poisoning: confirmation by ion chromatography of body fluids.

Protection by desferrioxamine and other hydroxamic acids against tetrachlorohydroquinone-induced cyto- and genotoxicity in human fibroblasts.

Sex differences in diquat-induced hepatic necrosis and DNA fragmentation in Fischer 344 rats.

Monomethylarsonous acid (MMA(III)) is more toxic than arsenite in Chang human hepatocytes.

1-Methyl-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline (salsolinol) is toxic to dopaminergic neuroblastoma SH-SY5Y cells via impairment of cellular energy metabolism.

Atrazine disrupts the hypothalamic control of pituitary-ovarian function.

Secobotrytriendiol and related sesquiterpenoids: new phytotoxic metabolites from *Botrytis cinerea*.

Uptake, toxicity, and effects on detoxication enzymes of atrazine and trifluoroacetate in embryos of zebrafish.

6-Hydroxydopamine toxicity towards human SH-SY5Y dopaminergic neuroblastoma cells: independent of mitochondrial energy metabolism.

A case of transient diabetes insipidus associated with poisoning by a herbicide containing glufosinate.

Mechanisms of toxicity, clinical features, and management of acute chlorophenoxy herbicide poisoning: a review.

Developmental toxicity studies in rats and rabbits with 3,5,6-trichloro-2-pyridinol, the major metabolite of chlorpyrifos.

Disorders of male rat reproductive tract under the influence of atrazine.

Micronucleus test of herbicide terbutol and its metabolites in cultured Chinese hamster lung cells and male CD-1 mice.

Human skin absorption and metabolism of the contact allergens, cinnamic aldehyde, and cinnamic alcohol.

Circulating thyroglobulin transcytosed by thyroid cells in complexed with secretory components of its endocytic receptor megalin.

Role of reactive oxygen intermediates in the decrease of hepatic cytochrome P450 activity by serum of humans and rabbits with an acute inflammatory reaction.

Preventive effects of dietary cabbage acylated anthocyanins on paraquat-induced oxidative stress in rats.

Results of dental amalgam removal and mercury detoxification using DMPS and neural therapy.

Cyclophosphamide-induced cystitis in freely-moving conscious rats: behavioral approach to a new model of visceral pain.

The role of orally administered dimethylarsinic acid, a main metabolite of inorganic arsenics, in the promotion and progression of UVB-induced skin tumorigenesis in hairless mice.

Time course of changes in endothelium-dependent and -independent relaxation of chronically diabetic aorta: role of reactive oxygen species.

Copper chaperone for superoxide dismutase is essential to activate mammalian Cu/Zn superoxide dismutase.

2-Chloro-s-triazine herbicides induce aromatase (CYP19) activity in H295R human adrenocortical carcinoma cells: a novel mechanism for estrogenicity?

Evidence for a role of chloroethylaziridine in the cytotoxicity of cyclophosphamide.

Metabolic effects of 1-methyl-4-phenylpyridinium (MPP(+)) in primary neuron cultures.

Comparative metabolism of chloroacetamide herbicides and selected metabolites in human and rat liver microsomes.

Technical advance: application of high-performance liquid chromatography with photodiode array detection to the metabolic profiling of plant isoprenoids.

2,4-Dichlorophenoxyacetic acid metabolism in transgenic tolerant cotton (*Gossypium hirsutum*).

Determination of glufosinate ammonium and its metabolite (AE F064619 and AE F061517) residues in water by gas chromatography with tandem mass spectrometry after ion exchange cleanup and derivatization.

Different cell death mechanisms and gene expression in human cells induced by pentachlorophenol and its major metabolite, tetrachlorohydroquinone.

Relationship of MTT reduction to stimulants of muscle metabolism.

Pattern recognition analysis of endogenous cell metabolites for high throughput mode of action identification: removing the postscreening dilemma associated with whole-organism high throughput screening.

Analytical method for the determination of atrazine and its dealkylated chlorotriazine metabolites in water using gas chromatography/mass selective detection.

The role of conjugation in hepatotoxicity of troglitazone in human and porcine hepatocyte cultures.

Determination of simazine, terbuthylazine, and their dealkylated chlorotriazine metabolites in soil using sonication microextraction and gas chromatography.

Aerobic metabolism of diclosulam on U.S. and South American soils.

Catalase activity in equine semen.

Metabolic pathways for cytotoxic end product formation from glutamate- and aspartate-containing peptides by *Porphyrromonas gingivalis*.

Characterization of S-triazine herbicide metabolism by a *Nocardioides* sp. isolated from agricultural soils.

House dust levels of selected insecticides and a herbicide measured by the EL and LWW samplers and comparisons to hand rinses and urine metabolites.

Metabolism-based resistance of a wild mustard (*Sinapis arvensis* L.) biotype to ethametsulfuron-methyl.

Metabolism and fate of [(14)C]ethametsulfuron-methyl in rutabaga (*Brassica napobrassica* Mill).

Degradation of atrazine, metolachlor, and pendimethalin in pesticide-contaminated soils: effects of aged residues on soil respiration and plant survival.

Improved rapid analytical method for the urinary determination of 3, 5,6 trichloro-2-pyridinol, a metabolite of chlorpyrifos.

Metabolism of fluroxypyr, fluroxypyr methyl ester, and the herbicide fluroxypyr methylheptyl ester. II: in rat skin homogenates.

Metabolism of fluroxypyr, fluroxypyr methyl ester, and the herbicide fluroxypyr methylheptyl ester. I: during percutaneous absorption through fresh rat and human skin in vitro.

Xenobiotic-mediated production of superoxide by primary cultures of rat cerebral endothelial cells, astrocytes, and neurones.

Electrically driven microseparation methods for pesticides and metabolites: III. Capillary electrochromatography with novel silica-based stationary phases having a surface-bound surfactant moiety.

Evolution of a metabolic pathway for degradation of a toxic xenobiotic: the patchwork approach.

Characterization of the transport of the organic cation [3H]MPP+ in human intestinal epithelial (Caco-2) cells.

Evidence for production of hydroxyl radicals by pentachlorophenol metabolites and hydrogen peroxide: A metal-independent organic Fenton reaction.

Glycerol metabolism in *Lactobacillus collinoides*: production of 3-hydroxypropionaldehyde, a precursor of acrolein.

Analysis of selected herbicide metabolites in surface and ground water of the United States.

Determination of chloroacetanilide herbicide metabolites in water using high-performance liquid chromatography-diode array detection and high-performance liquid chromatography/mass spectrometry.

Occurrence and load of selected herbicides and metabolites in the lower Mississippi River.

The carbon metabolism-controlled *Synechocystis* gap2 gene harbours a conserved enhancer element and a Gram-positive-like -16 promoter box retained in some chloroplast genes.

Spectroscopic study of the sorption of isoxaflutole and its diketonitrile metabolite in dissimilar soils.

Role of megalin (gp330) in transcytosis of thyroglobulin by thyroid cells. A novel function in the control of thyroid hormone release.

Cyanamide-induced activation of the hypothalamo-pituitary-adrenal axis.

Dose-dependent effects on tissue distribution and metabolism of dimethylarsinic acid in the mouse after intravenous administration.

Simultaneous quantification of acetanilide herbicides and their oxanilic and sulfonic acid metabolites in natural waters.

Conjugation of 1-naphthol in primary cell cultures of rat ovarian cells.

In vitro genotoxicity of terbutryn evaluated by the alkaline single-cell microgel-electrophoresis "comet" assay.

Catalase activity in human erythrocytes: effect of phenoxyherbicides and their metabolites.

A secreted peptide growth factor, phytosulfokine, acting as a stimulatory factor of carrot somatic embryo formation.

Stimulatory effect of trans-cinnamaldehyde on noradrenaline secretion in guinea-pig ileum myenteric nerve terminals.

Trans-4-aminoproline, a phytotoxic metabolite with herbicidal activity produced by *Ascochyta caulina*.

A theoretical study on the metabolic requirements resulting from alpha-ketoglutarate-dependent cleavage of phenoxyalkanoates.

Evaluation of the developmental toxicity of thalidomide using frog embryo teratogenesis assay-xenopus (FETAX): biotransformation and detoxification.

Bovine embryo culture in vitro: new developments and post-transfer consequences.

The mercapturic acid biotransformation pathway of hexachlorobenzene is not involved in the induction of splenomegaly, or skin and lung lesions in the Brown Norway rat.

[Endocrine disrupting chemicals and carcinogenesis--breast, testis and prostate cancer].

NRH:quinone oxidoreductase2 (NQO2).

Characterization of ATP-sensitive potassium channels functionally expressed in pituitary GH3 cells.

Spinotrapezius muscle microcirculatory function: effects of surgical exteriorization.

In vivo labeling of mitochondrial complex I (NADH:ubiquinone oxidoreductase) in rat brain using [(3)H]dihydrorotenone.

The effects of perinatal exposure to low doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin on immune organs in rats.

[Diagnosis of acute poisoning].

Pharmacological treatment of obesity. Past, present, and future.

Src homology 2 domain substitution modulates the kinase and transforming activities of the Fes protein-tyrosine kinase.

Punctate keratoderma-like lesions on the palms and soles in a patient with chloracne: a new clinical manifestation of dioxin intoxication?

SULT1A1 catalyzes 2-methoxyestradiol sulfonation in MCF-7 breast cancer cells.

Acceleration of phosphatidylcholine synthesis and breakdown by inhibitors of mitochondrial function in neuronal cells: a model of the membrane defect of Alzheimer's disease.

Effects of dioxin and estrogen on collagenase-3 in UMR 106-01 osteosarcoma cells.

New substituted 1-(2,3-dihydrobenzo[1,4]dioxin-2-ylmethyl)piperidin-4-yl derivatives with alpha(2)-adrenoceptor antagonist activity.

[Effect of sodium azide on mitochondrial membrane potential in SH-SY5Y human neuroblastoma cells].

Central versus peripheral mediation of naloxone's perfusion effects in endotoxic rats.

Differential effects of diethylstilbestrol and 2,3,7,8-tetrachlorodibenzo-p-dioxin on thymocyte differentiation, proliferation, and apoptosis in bcl-2 transgenic mouse fetal thymus organ culture.

Three truncated forms of serum albumin associated with pancreatic pseudocyst.

Characterization and sequence elucidation of a novel peptide with molt-inhibiting activity from the South African spiny lobster, *Jasus lalandii*.

Low concentrations of 17beta-estradiol protect single cardiac cells against metabolic stress-induced Ca²⁺ loading.

Determination of plasma concentrations of losartan in patients by HPLC using solid phase extraction and UV detection.

Identification of glycosomes and metabolic end products in pathogenic and nonpathogenic strains of *Cryptobia salmositica* (Kinetoplastida: Bodonidae).

Alterations of the rat mesentery vasculature in experimental diabetes.

Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) is associated with hyperinsulinemia and insulin resistance.

TCDD suppression of tissue transglutaminase stimulation by retinoids in malignant human keratinocytes.

Metabolic stress reversibly activates the *Drosophila* light-sensitive channels TRP and TRPL in vivo.

Redistribution of accumulated 2,3,7,8-tetrachlorodibenzo-p-dioxin during coxsackievirus B3 infection in the mouse.

Inhibitory effects of nitric oxide and nitrosative stress on dopamine-beta-hydroxylase.

Mechanisms of inhibitory aryl hydrocarbon receptor-estrogen receptor crosstalk in human breast cancer cells.

Endocytic recycling is required for the presentation of an exogenous peptide via MHC class II molecules.

Radial arm maze performance in rats following gestational and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

The effects of dioxin on reproduction and development.

The association between meconium and the production and reabsorption of lung liquid and lactate loss by in vitro lungs from fetal guinea pigs.

Assessment of mitochondrial energy coupling in vivo by ¹³C/³¹P NMR.

Down-regulation of thyroid transcription factor-1 gene expression in fetal lung hypoplasia is restored by glucocorticoids.

Mobilization of vitamin A stores in rats after administration of 2,3, 7,8-tetrachlorodibenzo-p-dioxin: a kinetic analysis.

S-adenosylmethionine and *Pneumocystis carinii*.

Astrocytes generate isoprostanes in response to trauma or oxygen radicals.

Uncoupling of intestinal mitochondrial oxidative phosphorylation and inhibition of cyclooxygenase are required for the development of NSAID-enteropathy in the rat.

Occupational exposures and pancreatic cancer: a meta-analysis.

Role of antioxidant systems in human androgen-independent prostate cancer cells.

Dioxins: WHO's tolerable daily intake (TDI) revisited.

Human health effects after exposure to 2,3,7,8-TCDD.

Non-carcinogenic effects of TCDD in animals.

Studies on the in vitro phototoxicity of the antidiabetes drug glipizide.

Metabolic control of sodium transport in streptozotocin-induced diabetic rat hearts.

Toxicity of chronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in diethylnitrosamine-initiated ovariectomized rats implanted with subcutaneous 17 beta-estradiol pellets.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin alters postnatal development of seminal vesicle epithelium.

Expression of dioxin-related transactivating factors and target genes in human eutopic endometrial and endometriotic tissues.

Second primary neoplasms following non-Hodgkin's lymphoma in New South Wales, Australia.

Comparison of oxidative stress response parameters in newborn mouse liver versus simian virus 40 (SV40)-transformed hepatocyte cell lines.

Effect of TCDD on maternal toxicity and chorionic gonadotropin--bioactivity in the immediate post-implantation period of macaque.

Iron supplementation improves endurance after training in iron-depleted, nonanemic women.

Iron supplementation in goitrous, iron-deficient children improves their response to oral iodized oil.

Induction and regulation of xenobiotic-metabolizing cytochrome P450s in the human A549 lung adenocarcinoma cell line.

Trypsin stimulates integrin alpha(5)beta(1)-dependent adhesion to fibronectin and proliferation of human gastric carcinoma cells through activation of proteinase-activated receptor-2.

Carrier-mediated transport of valproic acid in BeWo cells, a human trophoblast cell line.

Toxic action/toxicity.

Effects of TCDD on thyroid hormone homeostasis in the rat.

Examination of selected food additives and organochlorine food contaminants for androgenic activity in vitro.

Anemia: a cause of intolerance to thyroxine sodium.

Regional differences in hypoxic depolarization and swelling in hippocampal slices.

Serum leptin levels in patients with sideropenic and pernicious anemia: the influence of anemia treatment.

Pharmacokinetics of orally administered camptothecins.

Infusion of total dose iron versus oral iron supplementation in ambulatory peritoneal dialysis patients: a prospective, cross-over trial.

The contributions of various chloroquine salts to the biliary and urinary excretion of hepatic paracetamol conjugation metabolites in the rat.

Antenatal dexamethasone administration inhibits smooth-muscle-cell DNA synthesis in pulmonary-arterial media in nitrofen-induced congenital diaphragmatic hernia in rats.

Increased intracellular generation of reactive oxygen species in mononuclear leukocytes from patients with diabetes mellitus type 2.

Cytokine-inducing activity and antitumor effect of a liposome-incorporated interferon-gamma-inducing molecule derived from OK-432, a streptococcal preparation.

Tyrosine kinase inhibitors reduce bcl-2 expression and induce apoptosis in androgen-dependent cells.

Metabolic and K(ATP) channel-independent actions of keto acid initiators of insulin secretion.

Serum dioxin level in relation to diabetes mellitus among Air Force veterans with background levels of exposure.

Effect of the adrenal 11-beta-hydroxylase inhibitor metyrapone on human hepatic cytochrome P-450 expression: induction of cytochrome P-450 3A4.

Induction of cyclooxygenase expression and enhancement of malignant cell transformation by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effects of iron salts and haemosiderin from a thalassaemia patient on oxygen radical damage as measured in the comet assay.

Role of the aromatic hydrocarbon receptor and [Ah] gene battery in the oxidative stress response, cell cycle control, and apoptosis.

An Historical Review of Steps and Missteps in the Discovery of Anti-Obesity Drugs.

Characterization and immunohistochemical localization of nucleoside triphosphate diphosphohydrolase (NTPDase) in pig adrenal glands (presence of a non-sedimentable isoform).

Insulin increased cAMP phosphodiesterase activity antagonizing metabolic actions of glucagon in rat hepatocytes cultured with herbimycin A.

Efficient plant regeneration through somatic embryogenesis from callus cultures of *Oncidium* (Orchidaceae).

Metabolism of N-isopropylacetanilide in rat.

Impairment of mycophenolate mofetil absorption by iron ion.

Regulation of prostaglandin endoperoxide H synthase-2 induction by dioxin in rat hepatocytes: possible c-Src-mediated pathway.

2,3,7,8-tetrachlorodibenzo-p-dioxin inhibits luminal cell differentiation and androgen responsiveness of the ventral prostate without inhibiting prostatic 5 α -dihydrotestosterone formation or testicular androgen production in rat offspring.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the expression of cytochrome P450 1A1, the aryl hydrocarbon receptor, and the aryl hydrocarbon receptor nuclear translocator in rat brain and pituitary.

Lipid alterations in transient forebrain ischemia: possible new mechanisms of CDP-choline neuroprotection.

Distribution of mRNAs encoding the arylhydrocarbon receptor, arylhydrocarbon receptor nuclear translocator, and arylhydrocarbon receptor nuclear translocator-2 in the rat brain and brainstem.

Involvement of tyrosine kinase activity in 1 α ,25(OH) $_2$ -vitamin D $_3$ signal transduction in skeletal muscle cells.

Down-regulation of L-selectin expression in neutrophils by nonsteroidal anti-inflammatory drugs: role of intracellular ATP concentration.

Analytical method using gas chromatography and ion trap tandem mass spectrometry for the determination of S-triazines and their metabolites in the atmosphere.

Calpain-mediated proteolytic cleavage of troponin I induced by hypoxia or metabolic inhibition in cultured neonatal cardiomyocytes.

Uncoupling of ATP-sensitive potassium current from cell metabolism due to antisense oligonucleotides against sulfonylurea receptor in guinea-pig atrial myocytes.

Involvement of phosphoinositide 3-kinase and its association with pp60src in cholecystokinin-stimulated pancreatic acinar cells.

Quantification of selected pesticide metabolites in human urine using isotope dilution high-performance liquid chromatography/tandem mass spectrometry.

Human toxicokinetics of inhaled monochlorobenzene: latest experimental findings regarding re-evaluation of the biological tolerance value.

Arabidopsis dth9 mutation identifies a gene involved in regulating disease susceptibility without affecting salicylic acid-dependent responses.

Monomethylarsonic acid reductase and monomethylarsonous acid in hamster tissue.

Speciation of key arsenic metabolic intermediates in human urine.

PIP2 and ATP cooperatively prevent cytosolic Ca²⁺-induced modification of ATP-sensitive K⁺ channels in rat pancreatic beta-cells.

Estrogen modulation of prolactin gene expression requires an intact mitogen-activated protein kinase signal transduction pathway in cultured rat pituitary cells.

Chronic toxicity of arsenic in goats: clinicobiochemical changes, pathomorphology and tissue residues.

Investigations on the mutagenicity of 1,4-dichlorobenzene and its main metabolite 2,5-dichlorophenol in vivo and in vitro.

Adrenocorticotropin (ACTH) and corticosterone secretion by perfused pituitary and adrenal glands from rodents exposed to 2,3,7, 8-tetrachlorodibenzo-p-dioxin (TCDD).

A key role for the mitochondrial benzodiazepine receptor in cellular photosensitisation with delta-aminolaevulinic acid.

Differential effects of estrogen and progesterone on AT(1) receptor gene expression in vascular smooth muscle cells.

The carbon source influences the energetic efficiency of the respiratory chain of N₂-fixing *Acetobacter diazotrophicus*.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of different cytotoxins on cytochrome P450 isoforms expression and on glycogen content.

Effect of O₆-benzylguanine on alkylating agent-induced toxicity and mutagenicity. In Chinese hamster ovary cells expressing wild-type and mutant O₆-alkylguanine-DNA alkyltransferases.

Metabolism of lipid peroxidation product, 4-hydroxynonenal (HNE) in rat erythrocytes: role of aldose reductase.

Urinary biomarkers of atrazine exposure among farm pesticide applicators.

Bioenergetics and mitochondrial transmembrane potential during differentiation of cultured osteoblasts.

Effect of a dioxin-like PCB (CB 126) on the biotransformation and genotoxicity of benzo.

Toxicity of TCDD in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P450 1A induction in several organ systems.

Isolation of MFO inducers from tissues of white suckers caged in bleached kraft mill effluent.

Effects of arsenite on central monoamines and plasmatic levels of adrenocorticotrophic hormone (ACTH) in mice.

Mutagenicity of sodium azide and its metabolite azidoalanine in *Drosophila melanogaster*.

Portosystemic shunting and persistent fetal vascular structures in aryl hydrocarbon receptor-deficient mice.

Comparative effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on MCF-7, RL95-2, and LNCaP cells: role of target steroid hormones in cellular responsiveness to CYP1A1 induction.

Arsenic metabolism in seaweed-eating sheep from Northern Scotland.

Extraction of atrazine and its metabolites using supercritical fluids and enhanced-fluidity liquids.

Simultaneous analysis of delta9-THC and its major metabolites in urine, plasma, and meconium by GC-MS using an immunoaffinity extraction procedure.

Caloric restriction of rhesus monkeys lowers oxidative damage in skeletal muscle.

Decreased fatty acid synthesis due to mitochondrial uncoupling in adipose tissue.

Role of protein kinases in the prolactin-induced intracellular calcium rise in Chinese hamster ovary cells expressing the prolactin receptor.

Differential susceptibility of retinal ganglion cells to reactive oxygen species.

TNF-alpha-induced cyclooxygenase-2 expression in human lung epithelial cells: involvement of the phospholipase C-gamma 2, protein kinase C-alpha, tyrosine kinase, NF-kappa B-inducing kinase, and I-kappa B kinase 1/2 pathway.

Interleukin-6 negatively regulates the expression of pregnane X receptor and constitutively activated receptor in primary human hepatocytes.

Platelet-dependent modulation of polymorphonuclear leukocyte chemiluminescence.

Cytosolic [Ca(2+)] modulates basal GLUT1 activity and plays a permissive role in its activation by metabolic stress and insulin in rat epithelial cells.

Metabolic characterization of high- and low-yielding strains of *Penicillium chrysogenum*.

ATP-sensitive potassium channels in freshly dissociated adult rat striatal neurons: activation by metabolic inhibitors and the dopaminergic receptor agonist quinpirole.

TP receptor-mediated vasoconstriction in microperfused afferent arterioles: roles of O(2)(-) and NO.

Endocrine disruptive effects of polychlorinated aromatic hydrocarbons on intestinal cholecystokinin in rats.

Doxorubicin represses CARP gene transcription through the generation of oxidative stress in neonatal rat cardiac myocytes: possible role of serine/threonine kinase-dependent pathways.

Characterization of a second *tfd* gene cluster for chlorophenol and chlorocatechol metabolism on plasmid pJP4 in *Ralstonia eutropha* JMP134(pJP4).

Structure-activity relationships in the induction of DNA-protein cross-links by hematotoxic ring-opened benzene metabolites and related compounds in HL60 cells.

Effects of sodium azide on the secretion of soluble amyloid-beta precursor protein and the accumulation of beta-amyloid(1-40) in cultured chick neurons.

Mapping the bimolecular interface of the parathyroid hormone (PTH)-PTH1 receptor complex: spatial proximity between Lys(27) (of the hormone principal binding domain) and leu(261) (of the first extracellular loop) of the human PTH1 receptor.

Actions of epoxyeicosatrienoic acid on large-conductance Ca(2+)-activated K(+) channels in pituitary GH(3) cells.

Differential sensitivity to hydroxyl radicals of pre- and postjunctional neurovascular transmission in the isolated canine mesenteric vein.

Transformation of mono- and dichlorinated phenoxybenzoates by phenoxybenzoate-dioxygenase in *Pseudomonas pseudoalcaligenes* POB310 and a modified diarylether-metabolizing bacterium.

In vitro culture and embryo metabolism of cattle and sheep embryos - a decade of achievement.

Molecular characterization and developmental expression of the aryl hydrocarbon receptor from the chick embryo.

Cellular and biochemical mechanisms by which environmental oestrogens influence reproductive function.

Assessment of genotoxicity of dental antiseptics: ability of phenol, guaiacol, p-phenolsulfonic acid, sodium hypochlorite, p-chlorophenol, m-cresol or formaldehyde to induce unscheduled DNA synthesis in cultured Syrian hamster embryo cells.

Analysis of hydroxylated metabolites of PCBs (OH-PCBs) and other chlorinated phenolic compounds in whole blood from Canadian Inuit.

Excretion of hexachlorobenzene and metabolites in feces in a highly exposed human population.

Biliary and urinary excretion of inorganic arsenic: monomethylarsonous acid as a major biliary metabolite in rats.

Regulation of aspartate-derived amino-acid metabolism in *Zygosaccharomyces rouxii* compared to *Saccharomyces cerevisiae*.

Synergistic activation of NF-kappaB and inducible isoform of nitric oxide synthase induction by interferon-gamma and tumor necrosis factor-alpha in INS-1 cells.

Metabolic network analysis of *Penicillium chrysogenum* using (13)C-labeled glucose.

Occupational fatalities associated with 2,4-dichlorophenol (2,4-DCP) exposure, 1980-1998.

Comparative induction of CYP1A1 expression by pyridine and its metabolites.

Activation of NFkappaB is necessary for IL-1beta-induced cyclooxygenase-2 (COX-2) expression in human gingival fibroblasts.

Fast urinary screening for paracetamol using on-line microwave assisted hydrolysis and spectrophotometric detection.

Electrically driven microseparation methods for pesticides and metabolites: IV. Effects of the nature of fluorescent labels on the enantioseparation of pesticides and their degradation products by capillary zone electrophoresis with UV and laser-induced fluorescence detection.

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters melatonin metabolism in fish hepatocytes.

Thyroidal dysfunction and environmental chemicals--potential impact on brain development.

ATP-sensitive potassium channels in capillaries isolated from guinea-pig heart.

Hydroxylated metabolites of 2,4-dichlorophenol imply a fenton-type reaction in *Gloeophyllum striatum*.

Determination of endocrine disruptors in water after derivatization with N-methyl-N-(tert.-butyldimethyltrifluoroacetamide) using gas chromatography with mass spectrometric detection.

Gonadotropin-releasing hormone (GnRH) partially reverses the inhibitory effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on ovulation in the immature gonadotropin-treated rat.

Sorption and desorption of the diketone nitrile metabolite of isoxaflutole in soils.

Metabolic inactivation of five glycidyl ethers in lung and liver of humans, rats and mice in vitro.

Dermal penetration and metabolism of five glycidyl ethers in human, rat and mouse skin.

Toxic assessment of PCBs by the 2,3,7,8-tetrachlorodibenzo-p-dioxin equivalent in common cormorant (*Phalacrocorax carbo*) from Japan.

A novel function of thyrotropin as a potentiator of electrolyte secretion from the tracheal gland.

Orosomucoid has a cAMP-dependent effect on human endothelial cells and inhibits the action of histamine.

A novel 4 S [3H]beta-naphthoflavone-binding protein in liver cytosol of female Sprague-Dawley rats treated with aryl hydrocarbon receptor agonists.

Myeloperoxidase-catalyzed formation of PCDD/F from chlorophenols.

Endogenously expressed apolipoprotein E has different effects on cell lipid metabolism as compared to exogenous apolipoprotein E carried on triglyceride-rich particles.

Overexpression of wild-type and nuclear-targeted catalase modulates resistance to oxidative stress but does not alter spontaneous mutant frequencies at APRT.

Formation and release of residues of the ¹⁴C-labelled herbicide isoproturon and its metabolites bound in model polymers and in soil.

Induction of heat shock protein 70 by herbimycin A and cyclopentenone prostaglandins in smooth muscle cells.

Mechanism of enhancement by fucoidan and CNBr-fibrinogen digest of the activation of glu-plasminogen by tissue plasminogen activator.

Toxicokinetics.

Metabolic stress and altered glucose transport: activation of AMP-activated protein kinase as a unifying coupling mechanism.

Primary structure of CHH/MIH/GIH-like peptides in sinus gland extracts from *Penaeus vannamei*.

Studies on the mechanisms of arsenic-induced self tolerance developed in liver epithelial cells through continuous low-level arsenite exposure.

Hemopoietic progenitor cells are sensitive targets of 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57BL/6J mice.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the expression of follicle-stimulating hormone receptors during cell differentiation in cultured granulosa cells.

The synthesis, in vitro reactivity, and evidence for formation in humans of 5-phenyl-1,3-oxazinane-2,4-dione, a metabolite of felbamate.

Bioassays with *Vibrio fischeri* for the assessment of delayed toxicity.

Novel priming compounds of cystathionine metabolites on superoxide generation in human neutrophils.

Genetic polymorphism in the biotransformation of inorganic arsenic and its role in toxicity.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the expression of luteinizing hormone receptors during cell differentiation in cultured granulosa cells.

NTP Toxicology and Carcinogenesis Studies of Pyridine (CAS No. 110-86-1) in F344/N Rats, Wistar Rats, and B6C3F1 Mice (Drinking Water Studies).

Involvement of arachidonic acid in chemical stress-induced interleukin-6 synthesis in osteoblast-like cells: comparison with heat shock protein 27 induction.

Hormonal regulation of fruitlet abscission induced by carbohydrate shortage in citrus.

Intestinal transport of beta-thioglycosides by Na⁺/glucose cotransporter.

In-vivo and in-vitro evidence of a carrier-mediated efflux transport system for oestrone-3-sulphate across the blood-cerebrospinal fluid barrier.

Protective effect of L-phenylalanine on rat brain acetylcholinesterase inhibition induced by free radicals.

Active transport of the angiotensin-II antagonist losartan and its main metabolite EXP 3174 across MDCK-MDR1 and caco-2 cell monolayers.

ATP-stimulated c-fos and zif268 mRNA expression is inhibited by chemical hypoxia in a rat brain-derived type 2 astrocyte cell line, RBA-2.

Polyamines in the lung: polyamine uptake and polyamine-linked pathological or toxicological conditions.

Effects of polychlorinated dibenzofurans, biphenyls, and their mixture with dibenzo-p-dioxins on ovulation in the gonadotropin-primed immature rat: support for the toxic equivalency concept.

Determination of albendazole and its main metabolites in ovine plasma by liquid chromatography with dialysis as an integrated sample preparation technique.

Sodium monochloroacetate causes cytotoxic effects, an increased lactate and pyruvate level and induces ultra structural and cytoskeletal alterations in cultured kidney and liver epithelial cells.

Experimental exposure of rat skin to methyl bromide: a toxicokinetic and histopathological study.

Biliary excretion of bile acids and organic anions in zone 1- and zone 3-injured rats.

Parathyroid hormone stimulates extracellular signal-regulated kinase (ERK) activity through two independent signal transduction pathways: role of ERK in sodium-phosphate cotransport.

Pathways of neurosteroid biosynthesis in cell lines from human brain: regulation of dehydroepiandrosterone formation by oxidative stress and beta-amyloid peptide.

¹³C and ¹H NMR study of cellulose metabolism by *Fibrobacter succinogenes* S85.

The lipolytic stimulation of 3T3-L1 adipocytes promotes the translocation of hormone-sensitive lipase to the surfaces of lipid storage droplets.

Cyanide inhibition of chloride conductance across toad skin.

Parallel oscillations of intracellular calcium activity and mitochondrial membrane potential in mouse pancreatic B-cells.

Glutathione depletion in a liver microsomal assay as an in vitro biomarker for reactive metabolite formation.

Effect of arsenic trioxide on metallothionein and its conversion to different arsenic metabolites in hen liver.

Enhancement of transport of D-melphalan analogue by conjugation with L-glutamate across bovine brain microvessel endothelial cell monolayers.

[Fe²⁺-induced oxidative processes in the liver mitochondria of rats].

Nongenotoxic (epigenetic) carcinogens: pesticides as an example. A critical review.

Regulation of programmed cell death in maize endosperm by abscisic acid.

Effect of inhibitors and uncouplers of oxidative phosphorylation during compaction and blastulation of bovine embryos cultured in vitro.

Low dietary cyanogen exposure from frequent consumption of potentially toxic cassava in Malawi.

The aromatic hydrocarbon receptor, transcription, and endocrine aspects of dioxin action.

[Spreading of porcine kidney epithelial cells under normal conditions and under the effect of inhibitors of energy metabolism. II. Behavior of cellular organelles].

[Spreading of porcine kidney epithelial cells under normal condition and under the effect of inhibitors of energy metabolism. I. Dynamics of spreading].

[Chemical accident in Schönbach--an assessment of the risk to health and environment].

Stress-induced, tissue-specific enrichment of hsp70 mRNA accumulation in *Xenopus laevis* embryos.

Application of directly coupled HPLC-NMR-MS/MS to the identification of metabolites of 5-trifluoromethylpyridone (2-hydroxy-5-trifluoromethylpyridine) in hydroponically grown plants.

Contribution of NADH oxidase to aerobic metabolism of *Streptococcus pyogenes*.

Thyroid function and effects on reproduction in ewes exposed to the organochlorine pesticides lindane or pentachlorophenol (PCP) from conception.

Effects of the chlorotriazine herbicide, cyanazine, on GABA(A) receptors in cortical tissue from rat brain.

trans-Activation of PPARalpha and PPARgamma by structurally diverse environmental chemicals.

[The effect of the amine salt of 2,4-dichlorophenoxyacetic acid on the cluster- and colony-forming capacity of the bone marrow and on the mononuclear phagocyte system].

Regulation of antioxidant enzyme gene expression in response to oxidative stress and during differentiation of mouse skeletal muscle.

Effect of cyanamide on toxicity and glutathione depletion in rat hepatocyte cultures: differences between two dichloropropanol isomers.

The mammary tumor response in triazine-treated female rats: a threshold-mediated interaction with strain and species-specific reproductive senescence.

An assessment of fertility in male workers exposed to molinate.

Cigarette smoke induces direct DNA damage in the human B-lymphoid cell line Raji.

Porphyria and chemicals.

Toxicity of selected plant volatiles in microbial and mammalian short-term assays.

Effect of the in vivo catalase inhibition on aminonucleoside nephrosis.

Consideration of individual susceptibility in adverse pesticide effects.

An evaluation of the carcinogenic potential of the herbicide alachlor to man.

Liver preneoplastic changes in mice treated with the herbicide fomesafen.

A toxicokinetic analysis in a patient with acute glufosinate poisoning.

Pentachlorophenol exposure in women with gynecological and endocrine dysfunction.

Serum dioxin, insulin, fasting glucose, and sex hormone-binding globulin in veterans of Operation Ranch Hand.

An evaluation of the feasibility of using cytogenetic damage as a biomarker for alachlor exposure.

A comparison of the relative sensitivity of structural and functional cellular responses in the alga *Chlamydomonas eugametos* exposed to the herbicide paraquat.

Reproductive and endocrine function in rams exposed to the organochlorine pesticides lindane and pentachlorophenol from conception.

Genotoxic activity of the commercial herbicide containing bifenoxy in bovine peripheral lymphocytes.

Maternal and developmental toxicity of halogenated 4'-nitrodiphenyl ethers in mice.

Urinary excretion of biomarkers for radical-induced damage in rats treated with NDMA or diquat and the effects of calcium carbimide co-administration.

Reduced levels of catalase activity potentiate MPP⁺-induced toxicity: comparison between MN9D cells and CHO cells.

Endocrine and reproductive function in ewes exposed to the organochlorine pesticides lindane or pentachlorophenol.

Glutathione-dependent cytotoxicity of the chloroacetanilide herbicides alachlor, metolachlor, and propachlor in rat and human hepatoma-derived cultured cells.

Disposition of pesticides and toxicants in the human reproductive system in cases of acute poisoning.

Clinical course of a fatal ingestion of diquat.

Herbicides and adjuvants: an evolving view.

Endocrine, immune, and behavioral effects of aldicarb (carbamate), atrazine (triazine) and nitrate (fertilizer) mixtures at groundwater concentrations.

Administration of potentially antiandrogenic pesticides (procymidone, linuron, iprodione, chlozolinate, p,p'-DDE, and ketoconazole) and toxic substances (dibutyl- and diethylhexyl phthalate, PCB 169, and ethane dimethane sulphonate) during sexual differentiation produces diverse profiles of reproductive malformations in the male rat.

Acute poisoning with a herbicide containing imazapyr (Arsenal): a report of six cases.

Cytotoxic and porphyrinogenic effects of diphenyl ethers in cultured rat hepatocytes: chlornitrofen (CNP), CNP-amino, chlomethoxyfen and bifenoxy.

Dose-specific production of chlorinated quinone and semiquinone adducts in rodent livers following administration of pentachlorophenol.

Loss of heterozygosity in (LewisxF344)F1 rat urinary bladder tumors induced with N-butyl-N-(4-hydroxybutyl)nitrosamine followed by dimethylarsinic acid or sodium L-ascorbate.

Apicomplexan plastids as drug targets.

Increased activity of H₂O₂ in aorta isolated from chronically streptozotocin-diabetic rats: effects of antioxidant enzymes and enzymes inhibitors.

In vitro and in vivo comparison between the effects of treatment with adenosine triphosphate and treatment with buthionine sulfoximine on chemosensitization and tumour growth of B16 melanoma.

Evidence for site-specific bioactivation of alachlor in the olfactory mucosa of the Long-Evans rat.

Enhanced potential for oxidative stress in hyperinsulinemic rats: imbalance between hepatic peroxisomal hydrogen peroxide production and decomposition due to hyperinsulinemia.

Regulation of human airway mucins by acrolein and inflammatory mediators.

Ethanol co-exposure increases lethality of allyl alcohol in male Sprague-Dawley rats.

Hydrogen peroxide in the breath of rats: the effects of hypoxia and paraquat.

[Features of the inhibition of catalase activity by 3-amino-1,2,4-triazole in erythrocytes and liver of rats with streptozotocin diabetes].

Higher content of insulin-like growth factor-I in dystrophic mdx mouse: potential role in the spontaneous regeneration through an electrophysiological investigation of muscle function.

In vitro metabolism of simazine, atrazine and propazine by hepatic cytochrome P450 enzymes of rat, mouse and guinea pig, and oestrogenic activity of chlorotriazines and their main metabolites.

Differential role of ethanol and acetaldehyde in the induction of oxidative stress in HEP G2 cells: effect on transcription factors AP-1 and NF-kappaB.

Ethanol has differential effects on rat neuron and thymocyte reactive oxygen species levels and cell viability.

Hapten design in the development of competitive enzyme-linked immunosorbent assays for genotoxic metabolites of alachlor.

Metabolism of [(1)(4)C]prometryn in rats.

Lenacil degradation in the environment and its metabolism in the sugar beets.

Electrically driven microseparation methods for pesticides and metabolites. II: on-line and off-line preconcentration of urea herbicides in capillary electrochromatography.

Transendothelial permeability changes induced by free radicals in an in vitro model of the blood-brain barrier.

Knockout of cellular glutathione peroxidase gene renders mice susceptible to diquat-induced oxidative stress.

In vitro metabolism of alachlor by human liver microsomes and human cytochrome P450 isoforms.

Isotope dilution high-performance liquid chromatography/tandem mass spectrometry method for quantifying urinary metabolites of atrazine, malathion, and 2,4-dichlorophenoxyacetic acid.

HPLC-accelerator MS measurement of atrazine metabolites in human urine after dermal exposure.

Quantification of phenylurea herbicides and their free and humic acid-associated metabolites in natural waters.

[Effect of alcohol intoxication and aldehyde dehydrogenase inhibitors on lipid peroxidation in rat liver].

Glyphosate effects on phenolic metabolism of nodulated soybean (*Glycine max* L. merr.).

Comparison of human and rat metabolism of molinate in liver microsomes and slices.

Metabolism of 7-fluoro-6-(3,4,5,6-tetrahydrophthalimido)-4-(2-propynyl)-2H-1,4-benzoxazin-3(4H)-one (S-53482, flumioxazin) in the rat: II. Identification of reduced metabolites.

An ISFET-algal (*Chlamydomonas*) hybrid provides a system for eco-toxicological tests.

Enzymatic synthesis of 4-amino-3,5-diethylphenyl sulfate, a rodent metabolite of alachlor.

Biotransformation of pentachlorophenol, aniline and biphenyl in isolated rainbow trout (*Oncorhynchus mykiss*) hepatocytes: comparison with in vivo metabolism.

Evidence for oestrogen receptor alpha-immunoreactivity in gonadotrophin-releasing hormone-expressing neurones.

In vitro metabolism of chlorotriazines: characterization of simazine, atrazine, and propazine metabolism using liver microsomes from rats treated with various cytochrome P450 inducers.

Analysis of atrazine, terbutylazine and their N-dealkylated chloro and hydroxy metabolites by solid-phase extraction and gas chromatography-mass spectrometry and capillary electrophoresis-ultraviolet detection.

Signals controlling the expression of cytosolic ascorbate peroxidase during pathogen-induced programmed cell death in tobacco.

Lactobacillus sanfranciscensis CB1: manganese, oxygen, superoxide dismutase and metabolism.

Double-disk solid-phase extraction: simultaneous cleanup and trace enrichment of herbicides and metabolites from environmental samples.

Expression of a soybean cytochrome P450 monooxygenase cDNA in yeast and tobacco enhances the metabolism of phenylurea herbicides.

The effects of superoxide and the peripheral benzodiazepine receptor ligands on the mitochondrial processing of manganese-dependent superoxide dismutase.

Studies on the callus cultures of *Ginkgo biloba* and its metabolites-ginkgolides.

Metabolism of 7-fluoro-6-(3,4,5,6-tetrahydrophthalimido)-4-(2-propynyl)-2H-1,4-benzoxazin-3(4H)-one (S-53482) in rat. 1. Identification of a sulfonic acid type conjugate.

Environmental, medical, and family history risk factors for Parkinson's disease: a New England-based case control study.

The steroid hormone dehydroepiandrosterone inhibits CYP1A1 expression in vitro by a post-transcriptional mechanism.

[Dietary fiber inhibits the incidence of hepatic metastasis with the anti-oxidant activity and portal scavenging functions].

Reactive oxygen species in essential hypertension and non-insulin-dependent diabetes mellitus.

Thymocyte development in Ah-receptor-deficient mice is refractory to TCDD-inducible changes.

Taurine prevents high-glucose-induced human vascular endothelial cell apoptosis.

Inhibition of CYP1A1 enzyme activity in mouse hepatoma cell culture by soybean isoflavones.

[Biological actions of acetaldehyde].

Species differences in arsenic-mediated renal copper accumulation: a comparison between rats, mice and guinea pigs.

Interspecies differences in cancer susceptibility and toxicity.

Effect of prenatal exposure to TCDD on the promotion of endometriotic lesion growth by TCDD in adult female rats and mice.

Effects of PCB 126 on primary immune organ development in chicken embryos.

Role of Fas-Fas ligand interactions in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced immunotoxicity: increased resistance of thymocytes from Fas-deficient (lpr) and Fas ligand-defective (gld) mice to TCDD-induced toxicity.

Inhibition of antioxidants and hyperthermia enhance bleomycin-induced cytotoxicity and lipid peroxidation in Chinese hamster ovary cells.

Olestra increases faecal excretion of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) severely alters reproductive function of female hamster offspring.

Multiple antioxidants in the prevention and treatment of Parkinson's disease.

Inhibition of BRCA-1 expression by benzo[a]pyrene and its diol epoxide.

Modulation of cytochrome P4501A1 activity by ascorbigen in murine hepatoma cells.

[Occupational agents and endocrine function: an update of the experimental and human evidence].

Hypoxia induces renal tubular epithelial cell apoptosis in chronic renal disease.

Immunocytochemical identification of islet cells containing calcitonin gene-related peptide-like immunoreactivity in the plains rat pancreas (*Pseudomys australis*).

[Small handbook of dioxin et alias].

Characteristics of L-carnitine transport in cultured human hepatoma HLF cells.

Food toxins, ampa receptors, and motor neuron diseases.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on liver phosphoenolpyruvate carboxykinase (PEPCK) activity, glucose homeostasis and plasma amino acid concentrations in the most TCDD-susceptible and the most TCDD-resistant rat strains.

Secreted form of amyloid precursor protein enhances basal glucose and glutamate transport and protects against oxidative impairment of glucose and glutamate transport in synaptosomes by a cyclic GMP-mediated mechanism.

Role of estradiol receptor-alpha in differential expression of 2,3,7, 8-tetrachlorodibenzo-p-dioxin-inducible genes in the RL95-2 and KLE human endometrial cancer cell lines.

Multiple roles of ligand in transforming the dioxin receptor to an active basic helix-loop-helix/PAS transcription factor complex with the nuclear protein Arnt.

F-actin as a functional target for retro-retinoids: a potential role in anhydroretinol-triggered cell death.

Differential toxicities of TCDD in vivo among normal, c-src knockout, geldanamycin- and quercetin-treated mice.

Dietary restriction and 2-deoxyglucose administration improve behavioral outcome and reduce degeneration of dopaminergic neurons in models of Parkinson's disease.

Interactions of nuclear receptor coactivator/corepressor proteins with the aryl hydrocarbon receptor complex.

Contribution of the nucleoside transport system to doxorubicin transport in HL60 cells but not in mononuclear cells.

74As-arsenate metabolism in Flemish Giant rabbits with renal insufficiency.

PUVA (8-methoxy-psoralen plus ultraviolet A) induces the formation of 8-hydroxy-2'-deoxyguanosine and DNA fragmentation in calf thymus DNA and human epidermoid carcinoma cells.

p27(Kip1) induction and inhibition of proliferation by the intracellular Ah receptor in developing thymus and hepatoma cells.

The myeloperoxidase system of human phagocytes generates Nepsilon-(carboxymethyl)lysine on proteins: a mechanism for producing advanced glycation end products at sites of inflammation.

Lipoxin A4: a new class of ligand for the Ah receptor.

Analysis of urinary nitric oxide metabolites in healthy subjects.

Protoporphyrin IX fluorescence kinetics in C6 glioblastoma cells after delta-aminolevulinic acid incubation: effect of a protoporphyrinogen oxidase inhibitor.

Geographical differences of cancer incidence in Costa Rica in relation to environmental and occupational pesticide exposure.

Toxic equivalency factors of polychlorinated dibenzo-p-dioxins in an ovulation model: validation of the toxic equivalency concept for one aspect of endocrine disruption.

Detoxification of 1-chloro-2,4-dinitrobenzene in MCF7 breast cancer cells expressing glutathione S-transferase P1-1 and/or multidrug resistance protein 1.

Expression of CYP1A1 and CYP1B1 depends on cell-specific factors in human breast cancer cell lines: role of estrogen receptor status.

Serum dioxin and immunologic response in veterans of Operation Ranch Hand.

Biochemistry of hemlock (*Conium maculatum* L.) alkaloids and their acute and chronic toxicity in livestock. A review.

Cancer, heart disease, and diabetes in workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Toxicity of 3,3',4,4'-tetrachloroazoxybenzene in rats and mice.

Toxicity of 3,3',4,4'-tetrachloroazobenzene in rats and mice.

Evaluation of diabetes mellitus, serum glucose, and thyroid function among United States workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Low levels of p53 are associated with resistance to tetrachlorodibenzo-p-dioxin toxicity in DBA/2 mice.

The effects of low-flow ischemia on K⁺ fluxes in isolated rat hearts assessed by ⁸⁷Rb NMR.

TCDD-induced anorexia and wasting syndrome in rats: effects of diet-induced obesity and nutrition.

Mechanisms of hypoxic vasodilatation of isolated rat mesenteric arteries: a comparison with metabolic inhibition.

Energy metabolism inhibition impairs amyloid precursor protein secretion from Alzheimer's fibroblasts.

Cross-talk between 2,3,7,8-tetrachlorodibenzo-p-dioxin and testosterone signal transduction pathways in LNCaP prostate cancer cells.

Cytochrome P450 CYP1B1 determines susceptibility to 7, 12-dimethylbenz[a]anthracene-induced lymphomas.

Determination of chloral hydrate metabolites in human plasma by gas chromatography-mass spectrometry.

Cellular disposition of sulphamethoxazole and its metabolites: implications for hypersensitivity.

Relationships between environmental organochlorine contaminant residues, plasma corticosterone concentrations, and intermediary metabolic enzyme activities in Great Lakes herring gull embryos.

Endocrine biomarkers of early fetal loss in cynomolgus macaques (*Macaca fascicularis*) following exposure to dioxin.

A focused approach to anemia.

The genetics of endometriosis.

Isoform-specific induction of a human aldo-keto reductase by polycyclic aromatic hydrocarbons (PAHs), electrophiles, and oxidative stress: implications for the alternative pathway of PAH activation catalyzed by human dihydrodiol dehydrogenase.

Arsenic speciation in human organs following fatal arsenic trioxide poisoning--a case report.

Imprinting: perinatal exposures cause the development of diseases during the adult age.

Dioxin-induced perturbations in tryptophan homeostasis in laboratory animals.

Tryptanthrins and other tryptophan-derived agonists of the dioxin receptor.

Human cytochrome P4501A2.

Effect of varied fermentation periods on the diabetogenic potential of toasted cassava granules.

Lack of competition of substrates for P-glycoprotein in MCF-7 breast cancer cells overexpressing MDR1.

Lung hypoplasia caused by nitrofen is mediated by down-regulation of thyroid transcription factor TTF-1.

Influence of metabolic inhibitors on the intracellular accumulation and retention of adriamycin.

[Changes in lipid metabolism with the use of alcohol deterrent preparations].

A 63 kDa skeletal muscle protein associated with eye muscle inflammation in Graves' disease is identified as the calcium binding protein calsequestrin.

Dual actions of the metabolic inhibitor, sodium azide on K(ATP) channel currents in the rat CRI-G1 insulinoma cell line.

Amelioration of TCDD-induced teratogenesis in aryl hydrocarbon receptor (AhR)-null mice.

Diluted mainstream cigarette smoke condensates activate estrogen receptor and aryl hydrocarbon receptor-mediated gene transcription.

Trovafloxacin: an overview.

Cytotoxicity of cadmium and characteristics of its transport in cardiomyocytes.

Effect of sodium arsenite on plasma levels of gonadotrophins and ovarian steroidogenesis in mature albino rats: duration-dependent response.

The anti-estrogenicity of Ah receptor agonists in carp (*Cyprinus carpio*) hepatocytes.

Enzymatic reduction of arsenic compounds in mammalian systems: the rate-limiting enzyme of rabbit liver arsenic biotransformation is MMA(V) reductase.

Metabolism-based polycyclic aromatic acetylene inhibition of CYP1B1 in 10T1/2 cells potentiates aryl hydrocarbon receptor activity.

Bone marrow stromal cell cytochrome P4501B1 is required for pre-B cell apoptosis induced by 7,12-dimethylbenz[a]anthracene.

Methyl iodide toxicity in rat cerebellar granule cells in vitro: the role of glutathione.

The role of plasma semicarbazide-sensitive amine oxidase in allylamine and beta-aminopropionitrile cardiovascular toxicity: mechanisms of myocardial protection and aortic medial injury in rats.

Herbimycin A and geldanamycin inhibit okadaic acid-induced apoptosis and p38 activation in NRK-52E renal epithelial cells.

The role of polycyclic aromatic hydrocarbon metabolism in dimethylbenz[a]anthracene-induced pre-B lymphocyte apoptosis.

pH-dependent uptake of irinotecan and its active metabolite, SN-38, by intestinal cells.

In vitro plantlet regeneration from mature zygotic embryos of *Pinus wallichiana* A.B. Jacks.

NTP Toxicology and Carcinogenesis Studies of Triethanolamine (CAS No. 102-71-6) in F344 Rats and B6C3F1 Mice (Dermal Studies).

Effects of low oxygen concentrations and metabolic inhibitors on proteoglycan and protein synthesis rates in the intervertebral disc.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) blocks ovulation by a direct action on the ovary without alteration of ovarian steroidogenesis: lack of a direct effect on ovarian granulosa and thecal-interstitial cell steroidogenesis in vitro.

Myeloperoxidase-catalyzed redox-cycling of phenol promotes lipid peroxidation and thiol oxidation in HL-60 cells.

Arsenite uptake and metabolism by rat hepatocyte primary cultures in comparison with kidney- and hepatocyte-derived rat cell lines.

Amount and fate of egg protein escaping assimilation in the small intestine of humans.

Effects of environmental estrogens on tumor necrosis factor alpha-mediated apoptosis in MCF-7 cells.

Effect of sodium arsenite on heme metabolism in cultured chick embryo hepatocytes.

Identification and immunolocalization of two isoforms of ATP-diphosphohydrolase (ATPDase) in the pig immune system.

Chlorophenol and nitrophenol metabolism by *Sphingomonas* sp UG30.

[Significance of urinary concentrations of S-benzyl-N-acetylcysteine (S-BMA) in subjects exposed to toluene].

[Urinary excretion of arsenic and its metabolites in a population of adult males not occupationally exposed in the province of Bari].

Energetics of trout hepatocytes during A23187-induced disruption of Ca²⁺ homeostasis.

Methyl bromide decreases excitability without having immediate toxic effects in rat hippocampal CA1 neurons in vitro.

Effect of glutathione L-cystein and L-djenkolic acid in the synthesis and mutagenicity of azide metabolite in *Bacillus subtilis* ATCC 6633 strain.

Different change patterns of the isozymes of cytochrome P450 and glutathione S-transferases in chemically induced liver damage in rat.

Maintenance of GPIIb-IIIa avidity supporting "irreversible" fibrinogen binding is energy-dependent.

Block of human aorta Kir6.1 by the vascular KATP channel inhibitor U37883A.

Eosinophil apoptosis is mediated by stimulators of cellular oxidative metabolisms and inhibited by antioxidants: involvement of a thiol-sensitive redox regulation in eosinophil cell death.

Induction of endothelial monolayer permeability by phosphatidate.

Slow transport of unpolymerized tubulin and polymerized neurofilament in the squid giant axon.

Reference values and action levels of biological monitoring in occupational exposure.

A longitudinal investigation of selected pesticide metabolites in urine.

A type 5 acid phosphatase gene from *Arabidopsis thaliana* is induced by phosphate starvation and by some other types of phosphate mobilising/oxidative stress conditions.

Direct identification of two contact sites for parathyroid hormone (PTH) in the novel PTH-2 receptor using photoaffinity cross-linking.

Hexachlorobenzene, a dioxin-type compound, increases malic enzyme gene transcription through a mechanism involving the thyroid hormone response element.

Mechanism of intestinal absorption of an orally active beta-lactam prodrug: uptake and transport of carindacillin in Caco-2 cells.

Sperm metabolism of the teleost fishes *Chalcalburnus chalcoides* and *Oncorhynchus mykiss* and its relation to motility and viability.

Role of ATP-dependent K(+) channels in the electrical excitability of early embryonic stem cell-derived cardiomyocytes.

Sulfated tyrosines of thyroglobulin are involved in thyroid hormone synthesis.

High-performance liquid chromatographic-fluorescent method to determine chloroacetaldehyde, a neurotoxic metabolite of the anticancer drug ifosfamide, in plasma and in liver microsomal incubations.

The role of calcium stores in fatigue of isolated single muscle fibres from the cane toad.

Regulation of intracellular ATP concentration under conditions of reduced ATP consumption in pancreatic islets.

Evidence for the involvement of the fatty acid and peroxisomal beta-oxidation pathways in the inhibition by dehydroepiandrosterone (DHEA) and induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and benz(a)anthracene (BA) of cytochrome P4501B1 (CYP1B1) in mouse embryo fibroblasts (C3H10T1/2 cells).

Mechanisms of D-aspartate release under ischemic conditions in mouse hippocampal slices.

Estrogenic potencies of several environmental pollutants, as determined by vitellogenin induction in a carp hepatocyte assay.

The chemistry of the metabolites of cyclophosphamide.

Effects of dexamethasone, growth factors, and tracheal ligation on the development of nitrofen-exposed hypoplastic murine fetal lungs in organ culture.

Effects of TNF-alpha and IL-1beta on iron metabolism by A549 cells and influence on cytotoxicity.

Cortical NADH during pharmacological manipulations of the respiratory chain and spreading depression in vivo.

In vivo and in vitro evidence of blood-brain barrier transport of a novel cationic arginine-vasopressin fragment 4-9 analog.

Analyses of tissues of eight marine species from Atlantic and Pacific coasts for dioxin-like chlorobiphenyls (CBs) and total CBs.

A survey of EPA/OPP and open literature on selected pesticide chemicals. II. Mutagenicity and carcinogenicity of selected chloroacetanilides and related compounds.

Salivary histatin 5 induces non-lytic release of ATP from *Candida albicans* leading to cell death.

Identification of a novel cytosolic tocopherol-binding protein: structure, specificity, and tissue distribution.

Factors affecting organochlorine contaminant concentrations in milk and blood of northern fur seal (*Callorhinus ursinus*) dams and pups from St. George Island, Alaska.

Metabolism of arsenic in primary cultures of human and rat hepatocytes.

Hypoxic hypometabolism in the anesthetized turtle, *Trachemys scripta*.

Inductive and inhibitory effects of non-ortho-substituted polychlorinated biphenyls on estrogen metabolism and human cytochromes P450 1A1 and 1B1.

Characterization of cyclosporin A transport in cultured rabbit corneal epithelial cells: P-glycoprotein transport activity and binding to cyclophilin.

The existence of the 4S polycyclic aromatic hydrocarbon-protein binding in 14-day-old chick embryo liver.

Injection of encapsulated cells producing an ifosfamide-activating cytochrome P450 for targeted chemotherapy to pancreatic tumors.

Disruption of male sex hormones with regard to pesticides: pathophysiological and regulatory aspects.

Simultaneous determination of the urinary metabolites of toluene, xylene and styrene using high-performance capillary electrophoresis. Comparison with high-performance liquid chromatography.

Effects of pentachlorophenol and hydroxylated polychlorinated biphenyls on thyroid hormone conjugation in a rat and a human hepatoma cell line.

Cresol metabolism by the sulfate-reducing bacterium *Desulfotomaculum* sp. strain Groll.

Characterization of glycine transport in cultured Müller glial cells from the retina.

17 β -estradiol induces protein thiol/disulfide oxidoreductases and protects cultured bovine aortic endothelial cells from oxidative stress.

Embryo metabolism during the expansion of the bovine blastocyst.

Chondrocyte death is linked to development of a mitochondrial membrane permeability transition in the growth plate.

The effects of oxidative stress in in vitro cultured astroglial cells.

Factors influencing elevation of intracellular Ca²⁺ in the MCF-10A human mammary epithelial cell line by carcinogenic polycyclic aromatic hydrocarbons.

Gene delivery of Kir6.2/SUR2A in conjunction with pinacidil handles intracellular Ca²⁺ homeostasis under metabolic stress.

Active transport of fentanyl by the blood-brain barrier.

Structural analysis of angiotensin IV receptor (AT4) from selected bovine tissues.

Anaerobic formation and degradation of toxic aromatic compounds in agricultural and communal sewage deposits.

Cross-talk between the aryl hydrocarbon receptor and hypoxia inducible factor signaling pathways. Demonstration of competition and compensation.

Involvement of tyrosine kinases on cyclooxygenase expression and prostaglandin E₂ production in human gingival fibroblasts stimulated with interleukin-1 β and epidermal growth factor.

Inhibition of both Na/H and bicarbonate-dependent exchange is required to prevent recovery of intracellular pH in single cardiomyocytes exposed to metabolic stress.

Mitochondria present in excised patches from pancreatic B-cells may form microcompartments with ATP-dependent potassium channels.

Phenolic content in differentiated tissue cultures of untransformed and *Agrobacterium*-transformed roots of anise (*Pimpinella anisum* L.).

ECC-1 human endometrial cells as a model system to study dioxin disruption of steroid hormone function.

The relation between the action potential duration, the increase in resting tension, and ATP content during metabolic inhibition in guinea pig ventricular muscles.

[Effects of hepatoprotective agents containing phospholipids on cytochrome P-450-dependent antitoxic liver function during experimental toxic hepatitis].

Dose dependent changes in ⁷⁴As-arsenate metabolism of Flemish Giant rabbits.

Carbonyl stress in the pathogenesis of diabetic nephropathy.

Metabolism of polychlorinated dibenzo-p-dioxins and related dioxin-like compounds.

Immunohistochemical evidence for an increased oxidative stress and carbonyl modification of proteins in diabetic glomerular lesions.

Ethanol modulation of intestinal epithelial tight junction barrier.

Involvement of RhoA and its interaction with protein kinase C and Src in CCK-stimulated pancreatic acini.

Potential mechanisms of thyroid disruption in humans: interaction of organochlorine compounds with thyroid receptor, transthyretin, and thyroid-binding globulin.

Secretion of primary urine by glomeruli of the hagfish kidney.

Regulation of cytochrome P4501B1 (CYP1B1) in mouse embryo fibroblast (C3H10T1/2) cells by protein kinase C (PKC).

Inhibition of protoporphyrinogen oxidase expression in Arabidopsis causes a lesion-mimic phenotype that induces systemic acquired resistance.

Production of the sedative triterpene galphimine B in *Galphimia glauca* tissue culture.

Simple and sensitive analysis of nereistoxin and its metabolites in human serum using headspace solid-phase microextraction and gas chromatography-mass spectrometry.

Central nervous system effects of intranasally administered insulin during euglycemia in men.

Embryo-specific gene expression in microspore-derived embryos of *brassica napus*. An interaction between abscisic acid and jasmonic acid^{1,2}.

Glucose-receptive neurones in the rat ventromedial hypothalamus express KATP channels composed of Kir6.1 and SUR1 subunits.

Alterations of matrix- and cell-associated proteoglycans inhibit osteogenesis and growth response to fibroblast growth factor-2 in cultured rat mandibular condyle and calvaria.

Transport of rimsulfuron and its metabolites in soil columns.

Synergism of energy starvation and dextran-conjugated doxorubicin in the killing of multidrug-resistant KB carcinoma cells.

Cytochrome 1A1 induction by primaquine in human hepatocytes and HepG2 cells: absence of binding to the aryl hydrocarbon receptor.

Direct assay of nonopioid analgesics and their metabolites in human urine by capillary electrophoresis and capillary electrophoresis-mass spectrometry.

Glucose stimulates translocation of the homeodomain transcription factor PDX1 from the cytoplasm to the nucleus in pancreatic beta-cells.

Glucose and non-glucidic nutrients exert permissive effects on 2-keto acid regulation of pancreatic beta-cell function.

A Preliminary Comparison of LiverBeads[®] with a Conventional Rat Hepatocyte Culture Preparation: Some Aspects of Xenobiotic Metabolism and Related Toxicity.

Induction of cytochrome P450 1A and DNA damage in isolated rainbow trout (*Oncorhynchus mykiss*) hepatocytes by 2,3,7,8 tetrachlorodibenzo-p-dioxin.

[Genetic algorithms in 3D-QSAR: Predicting the toxicity of dibenzodioxins, dibenzofurans and biphenyls].

Mechanism of mitogenic effect of fluoride on fetal rat osteoblastic cells: evidence for Shc, Grb2 and P-CREB-dependent pathways.

Assessing the effect of reactive oxygen species on *Escherichia coli* using a metabolome approach.

Effect of inhibitors on the biotransformation of tamoxifen by female rat and mouse liver slices and homogenates.

Metabolism of polychlorinated dibenzo-p-dioxins by rat liver microsomes.

Neuroendocrine and reproductive effects of contemporary-use pesticides.

A comparison of 1H8- and 2H8-toluene toxicokinetics in men.

Radical ideas: genetic responses to oxidative stress.

Role of cholinergic receptors and cholinesterase activity in hemodynamic responses to cocaine in conscious rats.

Metabolic disposition of a monoterpene ketone, piperitenone, in rats: evidence for the formation of a known toxin, p-cresol.

Endocytosis and exocytosis events regulate vesicle traffic in endothelial cells.

Ah receptor and NF-kappaB interactions, a potential mechanism for dioxin toxicity.

Fluid shear stress stimulates big mitogen-activated protein kinase 1 (BMK1) activity in endothelial cells. Dependence on tyrosine kinases and intracellular calcium.

3-nitroadipate, a metabolic intermediate for mineralization of 2, 4-dinitrophenol by a new strain of a *Rhodococcus* species.

Promotion of NCI-Black-Reiter male rat bladder carcinogenesis by dimethylarsinic acid an organic arsenic compound.

Contribution of serum and cellular semicarbazide-sensitive amine oxidase to amine metabolism and cardiovascular toxicity.

[Computer analysis of microimages of adrenal glands during poisoning with organochlorine compounds].

Involvement of capsaicin-sensitive nerves in paraquat-induced mortality.

Chronic dietary toxicity study on 2,4-dichlorophenoxybutyric acid in the dog.

Effects of the herbicide atrazine on *Ambystoma tigrinum* metamorphosis: duration, larval growth, and hormonal response.

Application of anterior pituitary cell culture in toxicological research.

Effects of environmental synthetic chemicals on thyroid function.

The role of glutathione S-transferases as a defense against reactive electrophiles in the blood vessel wall.

Mutagenic interactions of model chemical mixtures.

Lack of genotoxicity of the herbicide atrazine in cultured human lymphocytes.

From toxicological problem to therapeutic use: the discovery of the mode of action of 2-(2-nitro-4-trifluoromethylbenzoyl)-1,3-cyclohexanedione (NTBC), its toxicology and development as a drug.

Monitoring impact of a pesticide treatment on bacterial soil communities by metabolic and genetic fingerprinting in addition to conventional testing procedures.

Lack of mammalian mutagenicity of the potent bacterial mutagen tris(2,3-dibromopropyl) phosphate and its metabolite 2-bromoacrolein.

The reproductive toxicity of molinate and metabolites to the male rat: effects on testosterone and sperm morphology.

Cellular glutathione peroxidase is the mediator of body selenium to protect against paraquat lethality in transgenic mice.

Metabolism and cytotoxicity of chlorpropham (CIPC) and its essential metabolites in isolated rat hepatocytes during a partial inhibition of sulphation and glucuronidation reactions: a comparative study.

Influence of phenoxyherbicides and their metabolites on the form of oxy- and deoxyhemoglobin of vertebrates.

Paraquat-induced renal injury studied by ¹H nuclear magnetic resonance spectroscopy of urine.

Effects of the pesticides carbofuran, chlorpyrifos, dimethoate, lindane, triallate, trifluralin, 2,4-D, and pentachlorophenol on the metabolic endocrine and reproductive endocrine system in ewes.

Reproductive effects in mink (*Mustela vison*) exposed to the pesticides Lindane, Carbofuran and Pentachlorophenol in a multigeneration study.

[Structural-functional changes in the thyroid gland after chronic exposure to the dioxin-containing herbicide 2,4-D].

Dermatotoxicity of agricultural chemicals in the dorsal skin of hairless dogs.

Molinate: rodent reproductive toxicity and its relevance to humans--a review.

Rubrobramide, a cytotoxic and phytotoxic metabolite from *Cladobotyrum rubrobrunnescens*.

Testicular toxicity of molinate in the rat: metabolic activation via sulfoxidation.

Inorganic and methylated arsenic compounds induce cell death in murine macrophages via different mechanisms.

Dimethylarsinic acid, a main metabolite of inorganic arsenics, has tumorigenicity and progression effects in the pulmonary tumors of A/J mice.

G-protein activation and expression in lung injury.

Aneuploidy induced by dimethylarsinic acid in mouse bone marrow cells.

2,4-Dichlorophenoxybutyric acid-resistant mutants of Arabidopsis have defects in glyoxysomal fatty acid beta-oxidation.

Cytoplasmic liver cell inclusions--a typical feature of porphyria cutanea tarda--are absent in porphyria-related hepatic neoplasias.

Antioxidant and detoxifying enzymes in the liver and kidney of pheasants after intoxication by herbicides MCPA and ANITEN I.

Extraperoxisomal targets of peroxisome proliferators: mitochondrial, microsomal, and cytosolic effects. Implications for health and disease.

Chlorinated hydrocarbons in women with repeated miscarriages.

Prolonged swimming, recovery and repeat swimming performance of mature sockeye salmon *Oncorhynchus nerka* exposed to moderate hypoxia and pentachlorophenol.

A morbidity study of former pentachlorophenol-production workers.

Mechanisms of inhibition of aldehyde dehydrogenase by nitroxyl, the active metabolite of the alcohol deterrent agent cyanamide.

Excretion kinetics of ifosfamide side-chain metabolites in children on continuous and short-term infusion.

Protein-bound acrolein: potential markers for oxidative stress.

Feeding fish oil to rats accelerates the metabolism of hexachlorobenzene.

Cytotoxic metabolites produced by a fungal strain from a *Sargassum* alga.

Exposure to dioxin and nonneoplastic mortality in the expanded IARC international cohort study of phenoxy herbicide and chlorophenol production workers and sprayers.

S-oxygenation of thiourea results in the formation of genotoxic products.

Application of an androgen receptor assay for the characterisation of the androgenic or antiandrogenic activity of various phenylurea herbicides and their derivatives.

Regionally specific changes in central brain monoamine levels by 2,4-dichlorophenoxyacetic acid in acute treated rats.

In vitro biotransformation of atrazine by rat liver microsomal cytochrome P450 enzymes.

Insect cytochromes P450: diversity, insecticide resistance and tolerance to plant toxins.

Sulcotrione soil metabolism in summer corn crops.

Monitoring of pesticide residues and their metabolites in surface and underground waters of Imathia (N. Greece) by means of solid-phase extraction disks and gas chromatography.

[Peroxisomes and peroxisome proliferators. Specific environmental poisons and therapeutic agents affecting lipid metabolism and hormone release].

Analytical performance of accelerator mass spectrometry and liquid scintillation counting for detection of ¹⁴C-labeled atrazine metabolites in human urine.

Inhibitory effect of pentachlorophenol on gap junctional intercellular communication in rat liver epithelial cells in vitro.

Coupled-column liquid chromatography applied to the trace-level determination of triazine herbicides and some of their metabolites in water samples.

Exposure to inorganic arsenic metabolites during early human development.

Reaffirmation that metabolism of polyamines by bovine plasma amine oxidase occurs strictly at the primary amino termini.

Cultured renal epithelial cells from birds and mice: enhanced resistance of avian cells to oxidative stress and DNA damage.

Dependence of aldehyde dehydrogenase-mediated oxazaphosphorine resistance on soluble thiols: importance of thiol interactions with the secondary metabolite acrolein.

Growth on urea can trigger death and peroxidation of the cyanobacterium *Synechococcus* sp. strain PCC 7002.

Metabolism and distribution of [2,3-¹⁴C]acrolein in Sprague-Dawley rats. II. Identification of urinary and fecal metabolites.

Genes for 2,4,5-trichlorophenoxyacetic acid metabolism in *Burkholderia cepacia* AC1100: characterization of the tftC and tftD genes and locations of the tft operons on multiple replicons.

Electronic spin resonance detection of superoxide and hydroxyl radicals during the reductive metabolism of drugs by rat brain preparations and isolated cerebral microvessels.

Determination of chlorpyrifos, chlorpyrifos oxon, and 3,5,6-trichloro-2-pyridinol in rat and human blood.

Dialkylquinonimines validated as in vivo metabolites of alachlor, acetochlor, and metolachlor herbicides in rats.

Simultaneous determination of chlorimuron-ethyl and its major metabolites in soil and water by reversed phase liquid chromatography.

DNA adduct formation by the pesticide alachlor and its metabolite 2-chloro-N-(2,6-diethylphenyl)acetamide (CDEPA).

Effect of arsenosugar ingestion on urinary arsenic speciation.

Induction of Arabidopsis tryptophan pathway enzymes and camalexin by amino acid starvation, oxidative stress, and an abiotic elicitor.

Gastric and intestinal ethanol toxicity in the rat. Effect on glutathione level and role of alcohol and acetaldehyde metabolisms.

Muscle cells from mdx mice have an increased susceptibility to oxidative stress.

Determination of hexazinone and its metabolites in groundwater by capillary electrophoresis.

Urinary arsenic species in Devon and Cornwall residents, UK. A pilot study.

Ethanol-induced changes of intracellular thiol compartmentation and protein redox status in the rat liver: effect of tauroursodeoxycholate.

AtzC is a new member of the amidohydrolase protein superfamily and is homologous to other atrazine-metabolizing enzymes.

Ah receptor agonists as endocrine disruptors: antiestrogenic activity and mechanisms.

Expression of mucin-associated sulfo-Lea carbohydrate epitopes on human colon carcinoma cells.

Body weight loss and changes in tryptophan homeostasis by chlorinated dibenzo-p-dioxin congeners in the most TCDD-susceptible and the most TCDD-resistant rat strain.

Role of heparan sulphate proteoglycans in the regulation of human lactoferrin binding and activity in the MDA-MB-231 breast cancer cell line.

Determination of the enzymes responsible for activation of the heterocyclic amine 2-amino-3-methylimidazo[4,5-f]quinoline in the human breast.

Interactive toxicity and stress protein expression by vinylidene chloride and monochloroacetate in precision-cut rat liver slices.

Concentrated cresol intoxication.

Enantiomers of flurbiprofen can distinguish key pathophysiological steps of NSAID enteropathy in the rat.

Mechanism of action of the nongenotoxic peroxisome proliferators: role of the peroxisome proliferator-activator receptor alpha.

Differential gene expression at gestational days 14 and 16 in normal and nitrogen-induced hypoplastic murine fetal lungs with coexistent diaphragmatic hernia.

Marked increases of aminotransferase levels after cresol ingestion.

Oncostatin M up-regulates tissue inhibitor of metalloproteinases-3 gene expression in articular chondrocytes via de novo transcription, protein synthesis, and tyrosine kinase- and mitogen-activated protein kinase-dependent mechanisms.

Production and purification of a recombinant human hsp60 epitope using the cellulose-binding domain in *Escherichia coli*.

Zoxazolamine-induced paralysis in two rat substrains: differences in hepatic drug metabolism.

Solid waste and pancreatic cancer: an ecologic study in Florida, USA.

Reptiles as models of contaminant-induced endocrine disruption.

Metabolic recovery of isolated adult rat cardiomyocytes after energy depletion: existence of an ATP threshold?

Pathways for eosinophil lipid body induction: differing signal transduction in cells from normal and hypereosinophilic subjects.

S 18126 ([2-[4-(2,3-dihydrobenzo[1,4]dioxin-6-yl)piperazin-1-yl methyl]indan-2-yl]), a potent, selective and competitive antagonist at dopamine D4 receptors: an in vitro and in vivo comparison with L 745,870 (3-(4-[4-chlorophenyl]piperazin-1-yl)methyl-1H-pyrrolo[2, 3b]pyridine) and raclopride.

Advanced glycation end products induce crosslinking of collagen in vitro.

[Dioxins: current knowledge about health effects].

Prenatal TCDD and predisposition to mammary cancer in the rat.

Stimulation of the stress-induced expression of stress proteins by curcumin in cultured cells and in rat tissues in vivo.

Nitric oxide inhibits stress-induced endothelial cell apoptosis.

12-O-tetradecanoylphorbol-13-acetate upregulates the Ah receptor and differentially alters CYP1B1 and CYP1A1 expression in MCF-7 breast cancer cells.

Genesis of the uraemic syndrome: role of uraemic toxins.

Activation of the Ah receptor by tryptophan and tryptophan metabolites.

Aryl hydrocarbon receptor-mediated antiestrogenicity in MCF-7 cells: modulation of hormone-induced cell cycle enzymes.

Glucosamine-induced insulin resistance in 3T3-L1 adipocytes is caused by depletion of intracellular ATP.

Cardiac teratogenicity of trichloroethylene metabolites.

Mode of carcinogenic action of pesticides inducing thyroid follicular cell tumors in rodents.

Effects of dietary exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in adult female mink (*Mustela vison*).

Urinary levels of inorganic and organic arsenic metabolites among residents in an arseniasis-hyperendemic area in Taiwan.

Effect of curcumin on the aryl hydrocarbon receptor and cytochrome P450 1A1 in MCF-7 human breast carcinoma cells.

Benzo[a]pyrene enhances the formation of 8-hydroxy-2'-deoxyguanosine by ultraviolet A radiation in calf thymus DNA and human epidermoid carcinoma cells.

Manganese uptake and release by cultured human hepato-carcinoma (Hep-G2) cells.

Effects on developmental landmarks and reproductive capability of 3,3',4,4'-tetrachlorobiphenyl and 3,3',4,4',5-pentachlorobiphenyl in offspring of rats exposed during pregnancy.

Use of model-based compartmental analysis to study effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on vitamin A kinetics in rats.

Overexpression of the anti-apoptotic oncogene, bcl-2, in the thymus does not prevent thymic atrophy induced by estradiol or 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Developmental and reproductive toxicity of inorganic arsenic: animal studies and human concerns.

Role of tyrosine phosphorylation in leptin activation of ATP-sensitive K⁺ channels in the rat insulinoma cell line CRI-G1.

Atherosclerotic risks from chemicals: part II. A RASH analysis of in vitro and in vivo bioassay data to evaluate 45 potentially hazardous compounds.

Urinary excretion of arsenic metabolites after long-term oral administration of various arsenic compounds to rats.

Effect of vitamin C on androgen independent prostate cancer cells (PC3 and Mat-Ly-Lu) in vitro: involvement of reactive oxygen species-effect on cell number, viability and DNA synthesis.

Effect of dichloroacetic acid and trichloroacetic acid on DNA methylation in liver and tumors of female B6C3F1 mice.

Effects of glucose deprivation, chemical hypoxia, and simulated ischemia on Na⁺ homeostasis in rat spinal cord astrocytes.

[Effect of GABA and piracetam on on ATPase activity in brain and liver mitochondria in experimental hypokinesia].

Respiratory and cardiovascular effects of the mu-opioid receptor agonist [Lys7]dermorphin in awake rats.

Dioxin and diabetes mellitus.

Elimination kinetics and toxicity of 2,3,7,8-tetrachlorothianthren, a thio analogue of 2,3,7,8-TCDD.

Thymic alterations induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin are strictly dependent on aryl hydrocarbon receptor activation in hemopoietic cells.

Interference between progesterone and dioxin signal transduction pathways. Different mechanisms are involved in repression by the progesterone receptor A and B isoforms.

The Seveso studies on early and long-term effects of dioxin exposure: a review.

Inhibition of vascular and epithelial differentiation in murine nitrofen-induced diaphragmatic hernia.

Induction of 16 α -/2-hydroxyestrone metabolite ratios in MCF-7 cells by pesticides, carcinogens, and antiestrogens does not predict mammary carcinogens.

Detection of P450c17-independent pathways for dehydroepiandrosterone (DHEA) biosynthesis in brain glial tumor cells.

Oxalate uptake in fetal rat myoblasts.

The genetics of endometriosis.

Role of altered arachidonic acid metabolism in 2,3,7, 8-tetrachlorodibenzo-p-dioxin-induced immune suppression in C57Bl/6 mice.

Microangiopathic hemolytic anemia as a complication of diabetes mellitus.

Hypoferremia, absent bone marrow macrophage iron, and microcytic anemia with minimal response to iron therapy: an acquired disorder of iron metabolism.

Differential display of genes in normal and hypoplastic fetal murine lungs.

Tyrosine kinase-dependent modulation of 3-hydroxy-3-methylglutaryl-CoA reductase in human breast adenocarcinoma SKBR-3 cells.

Overexpression and activation of the tyrosine kinase Src in human pancreatic carcinoma.

Effective utilization of erythropoietin with intravenous iron therapy.

Dioxin exposure and non-malignant health effects: a mortality study.

Neurotrophic factors decrease the release of creatine kinase and prostaglandin E2 from metabolically stressed muscle.

Acute intoxication with trichloroethene: clinical symptoms, toxicokinetics, metabolism, and development of biochemical parameters for renal damage.

Characterization of the effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in B6C3F1 and DBA/2 mice following single and repeated exposures.

Differential expression of CYP1A1 and CYP1B1 in human breast epithelial cells and breast tumor cells.

The 64-kilodalton eye muscle protein is the flavoprotein subunit of mitochondrial succinate dehydrogenase: the corresponding serum antibodies are good markers of an immune-mediated damage to the eye muscle in patients with Graves' hyperthyroidism.

Protein profiles and identification of high performance liquid chromatography isolated proteins of cancer cell lines using matrix-assisted laser desorption/ionization time-of-flight mass spectrometry.

Induction of cellular processes containing collagenase and retinoid by integrin-binding to interstitial collagen in hepatic stellate cell culture.

Chromosome aberrations in vitro related to cytotoxicity of nonmutagenic chemicals and metabolic poisons.

Three novel type I collagen mutations in osteogenesis imperfecta type IV probands are associated with discrepancies between electrophoretic migration of osteoblast and fibroblast collagen.

Effects of the nonsteroidal anti-inflammatory drug nimesulide on energy metabolism in livers from adjuvant-induced arthritic rats.

Porphyria and porphyrinology--the past fifteen years.

Interaction between iron metabolism and 2,3,7,8-tetrachlorodibenzo-p-dioxin in mice with variants of the Ahr gene: a hepatic oxidative mechanism.

Modulation of ovarian follicle maturation and effects on apoptotic cell death in Holtzman rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in utero and lactationally.

Alternative methods for mechanistic studies in toxicology. Screening of hepatotoxicity of pesticides using freshly isolated and primary cultured hepatocytes and non-liver-derived cells, SIRC cells.

Xenoendocrine disrupters: laboratory studies on male reproductive effects.

Regulation of System A amino acid transport in L6 rat skeletal muscle cells by insulin, chemical and hyperthermic stress.

Metabolic depletion inhibits the uptake of nontransferrin-bound iron by K562 cells.

Evidence for Ah receptor mediation of increased ACTH concentrations in primary cultures of rat anterior pituitary cells exposed to TCDD.

Dose-response relationships for disposition and hepatic sequestration of polyhalogenated dibenzo-p-dioxins, dibenzofurans, and biphenyls following subchronic treatment in mice.

Epidermal growth factor receptor as a mediator of developmental toxicity of dioxin in mouse embryonic teeth.

Delta opiate receptors account for the castration-induced unmasking of gonadotropin-releasing hormone binding sites in the rat pituitary.

Bone marrow stromal cells constitutively express high levels of cytochrome P4501B1 that metabolize 7,12-dimethylbenz[a]anthracene.

Abscisic acid-dependent and -independent expression of the carrot late-embryogenesis-abundant-class gene Dc3 in transgenic tobacco seedlings.

Rapid stimulation of glucose transport by mitochondrial uncoupling depends in part on cytosolic Ca²⁺ and cPKC.

Tyrosine kinase inhibitors suppress prostaglandin F₂α-induced phosphoinositide hydrolysis, Ca²⁺ elevation and contraction in iris sphincter smooth muscle.

Adult olfactory epithelium contains multipotent progenitors that give rise to neurons and non-neural cells.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazoxybenzene (CAS No. 21232-47-3) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazobenzene (CAS No. 14047-09-7) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

Effects of the agrochemicals butachlor, pretilachlor and isoprothiolane on rat liver xenobiotic-metabolizing enzymes.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induction of cytochrome P450-dependent arachidonic acid metabolism in mouse liver microsomes: evidence for species-specific differences in responses.

Effects of carbaryl and naphthalene on rat hepatic CYP1A1/2: potential binding to Ah receptor and 4S benzo(a)pyrene-binding protein.

The chemically inducible plant cytochrome P450 CYP76B1 actively metabolizes phenylureas and other xenobiotics.

Aryl hydrocarbon receptor regulation of cytochrome P4501B1 in rat mammary fibroblasts: evidence for transcriptional repression by glucocorticoids.

Cytochrome P450 1B1: a major P450 isoenzyme in human blood monocytes and macrophage subsets.

Aromatic and polycyclic hydrocarbons in air and their urinary metabolites in coke plant workers.

Invasion of aortic and heart endothelial cells by *Porphyromonas gingivalis*.

Level of HgCl₂-mediated phosphorylation of intracellular proteins determines death of thymic T-lymphocytes with or without DNA fragmentation.

Fibronectin stimulates transcription of the platelet-derived growth factor beta-receptor in cultured rat aortic smooth muscle cells.

Branched-chain amino acids are essential in the regulation of PHAS-I and p70 S6 kinase by pancreatic beta-cells. A possible role in protein translation and mitogenic signaling.

Structural and functional comparison of agents interfering with dihydroorotate, succinate and NADH oxidation of rat liver mitochondria.

Endothelium-dependent relaxation to hydrogen peroxide in canine basilar artery: a potential new cerebral dilator mechanism.

Biotransformation of 2-chloroaniline in the Fischer 344 rat: identification of urinary metabolites.

2,3,7,8-Tetrachlorodibenzo-p-dioxin in pregnant Long Evans rats: disposition to maternal and embryo/fetal tissues.

Metabolism and disposition of 1,4,7,8-tetrachlorodibenzo-p-dioxin in rats.

Analysis of gene expression in lung and thymus of TCDD treated C57BL/6 mice using differential display RT-PCR.

Postnatal exposure to chlorinated dioxins and related chemicals on thyroid hormone status in Japanese breast-fed infants.

Sulfation of thyroid hormones by liver of rainbow trout, *Oncorhynchus mykiss*.

Transgenic analysis of the cSOD-null phenotypic syndrome in *Drosophila*.

Evidence for impaired assimilation and increased colonic fermentation of protein, related to gastric acid suppression therapy.

Metabolism of ethanol by rat pancreatic acinar cells.

Decreased expression of gamma-glutamyltranspeptidase in the intestinal cell line Caco-2 by inducers of cytochrome P450 1A1.

Contaminants in eggs of colonial waterbirds and hepatic cytochrome P450 enzyme levels in pipped tern embryos, Washington State.

Influence of trophic status on the toxic effects of a herbicide: A microcosm study.

Morphological, physiological and metabolic comparisons between runner-like and sheet-like inbred lines of a colonial hydroid.

On the role of the peroxisome in the metabolism of drugs and xenobiotics.

Modulatory effects of melatonin on genotoxic response of reference mutagens in the Ames test and the comet assay.

Type I collagen influence on gene expression in UMR106-06 osteoblast-like cells is inhibited by genistein.

Biological monitoring of occupational exposure to arsenic by determining urinary content of inorganic arsenic and its methylated metabolites.

Regulation of adenylyl cyclase activity in human peripheral blood mononuclear cells: effects of protein kinase inhibitors and of a calcium ionophore.

Induction of UDP-glycosyltransferase family 1 genes in rat liver: different patterns of mRNA expression with two inducers, 3-methylcholanthrene and beta-naphthoflavone.

Cyclophosphamide cystitis as a model of visceral pain in rats: a c-fos and Krox-24 study at telencephalic levels, with a note on pituitary adenylate cyclase activating polypeptide (PACAP).

Nonresponsiveness to 2,3,7,8-tetrachlorodibenzo-p-dioxin of transforming growth factor beta1 and CYP 1A1 gene expression in rat liver fat-storing cells.

In vitro inhibition of thyroid hormone sulfation by hydroxylated metabolites of halogenated aromatic hydrocarbons.

Low-molecular-weight hormonal factors that affect head formation in *Hydra*.

Investigations of the pathways of toxicity of methyl iodide in the rat nasal cavity.

Cytochrome P450 catalyzed oxidation of monochlorobenzene, 1,2- and 1,4-dichlorobenzene in rat, mouse, and human liver microsomes.

Modulation of Hepatocyte Gene Expression by the Carcinogen Benzo[a]pyrene.

Validated determination of total arsenic species of toxicological interest (arsenite, arsenate and their metabolites) by atomic absorption spectrometry after separation from dietary arsenic by liquid extraction: toxicological applications.

Expression of CYP1B1 but not CYP1A1 by primary cultured human mammary stromal fibroblasts constitutively and in response to dioxin exposure: role of the Ah receptor.

In vitro 2,3,7,8-tetrachlorodibenzo-p-dioxin interference with the anterior pituitary hormone adrenocorticortropin.

Metabolic fate of S-(-)-pulegone in rat.

Stress-induced fractal rearrangement of the endothelial cell cytoskeleton causes apoptosis.

Hazard and risk assessment of chemical mixtures using the toxic equivalency factor approach.

Species- and sex-related differences in metabolism of trichloroethylene to yield chloral and trichloroethanol in mouse, rat, and human liver microsomes.

Functional aspects of skeletal muscle contractile apparatus and sarcoplasmic reticulum after fatigue.

Elucidation of the amino acid sequence of a crustacean hyperglycaemic hormone from the spiny lobster, *Jasus lalandii*.

Interactions between bioenergetics and mitochondrial biogenesis.

Oxidative phosphorylation in intact hepatocytes: quantitative characterization of the mechanisms of change in efficiency and cellular consequences.

Subchronic/chronic toxicity of a mixture of four chlorinated dibenzo-p-dioxins in rats. II. Biochemical effects.

Ultrastructural apoptotic lesions induced in rat thymocytes after borax ingestion.

Simultaneous estimation of tribenuron-methyl and its major metabolites by high-performance liquid chromatography.

Expression of cytosolic beta-glucosidase in guinea pig liver cells.

Handling of doxorubicin by the LLC-PK1 kidney epithelial cell line.

Sodium iron EDTA [NaFe(III)EDTA] as a food fortificant does not influence absorption and urinary excretion of manganese in healthy adults.

Src family tyrosine kinase regulates intracellular pH in cardiomyocytes.

Human in vivo and in vitro hydroquinone topical bioavailability, metabolism, and disposition.

The specific features of methionine biosynthesis and metabolism in plants.

Direct inhibition of the pancreatic beta-cell ATP-regulated potassium channel by alpha-ketoisocaproate.

Differential cytotoxicity of Ifosfamide and its metabolites in renal epithelial cell cultures.

The role of glutathione S-transferase- and cytochrome P450-dependent metabolism in the olfactory toxicity of methyl iodide in the rat.

Uptake of N,N-dimethyl-2-phenylethylene HCl into acini cells removed from rabbit lacrimal glands.

Fast and sensitive method for simultaneous measurement of cell proliferation rate and drug sensitivity in rat cerebral cortex.

Hydrogen peroxide activates mitogen-activated protein kinases and Na⁺-H⁺ exchange in neonatal rat cardiac myocytes.

Metabolism of 17-(allylamino)-17-demethoxygeldanamycin (NSC 330507) by murine and human hepatic preparations.

Characterization of CYP1B1 and CYP1A1 expression in human mammary epithelial cells: role of the aryl hydrocarbon receptor in polycyclic aromatic hydrocarbon metabolism.

Metabolism of inorganic arsenic in children with chronic high arsenic exposure in northern Argentina.

Inflammatory cytokines (IL-1 α , TNF- α) and LPS modulate the Ca²⁺ signaling pathway in osteoblasts.

Characterization of metabolites in the biotransformation of 2,4,6-trinitrotoluene with anaerobic sludge: role of triaminotoluene.

Arachidonic acid metabolism in the marine fish *Stenotomus chrysops* (Scup) and the effects of cytochrome P450 1A inducers.

Agonist-dependent phosphorylation of the parathyroid hormone/parathyroid hormone-related peptide receptor.

Highly toxic coplanar PCB126 reduces liver peroxisomal enzyme activities in rats.

Speciation of arsenic metabolites in the urine of occupational workers and experimental rats using an optimised hydride cold-trapping method.

Uptake of doxorubicin by cultured kidney epithelial cells LLC-PK1.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces hepatic cytochrome P450-dependent arachidonic acid epoxygenation in diverse avian orders: regioisomer selectivity and immunochemical comparison of the TCDD-induced P450s to CYP1A4 and 1A5.

p53 mutations in cyclophosphamide-associated bladder cancer.

Mechanism for benomyl action as a mitochondrial aldehyde dehydrogenase inhibitor in mice.

Interleukin 1 β and interleukin 6, but not tumor necrosis factor α , inhibit insulin-stimulated glycogen synthesis in rat hepatocytes.

Tyrosine phosphatase-dependent/tyrosine kinase-independent induction of nuclear factor-kappa B by tumor necrosis factor-alpha: effects on prostaglandin endoperoxide synthase-2 mRNA accumulation.

Profiles of Great Lakes critical pollutants: a sentinel analysis of human blood and urine. The Great Lakes Consortium.

Metabolism of the lipid peroxidation product, 4-hydroxy-trans-2-nonenal, in isolated perfused rat heart.

Characterization of glycerol uptake and glycerol kinase activity in rat hepatocytes cultured under different hormonal conditions.

Similarities in the metabolism of alloxan and dehydroascorbate in human erythrocytes.

Impact of dioxin-type induction of drug-metabolizing enzymes on the metabolism of endo- and xenobiotics.

Myelosuppressive activity of two herbicides, atrazine and dinoterb, on human haematopoietic progenitor cells: An in vitro assay to evaluate the effects of intermediate or long-term exposure.

Involvement of reactive oxygen species, protein kinase C, and tyrosine kinase in prostaglandin E2 production in Balb/c 3T3 mouse fibroblast cells by quinolone phototoxicity.

Use of precision-cut rat liver slices for studies of xenobiotic metabolism and toxicity: comparison of the Krumdieck and Brendel tissue slicers.

Female Sprague-Dawley rats exposed to a single oral dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin exhibit sustained depletion of aryl hydrocarbon receptor protein in liver, spleen, thymus, and lung.

Involvement of calcium and arachidonate metabolism in acetylated-low-density-lipoprotein-stimulated tumor-necrosis-factor-alpha production by rat peritoneal macrophages.

Cigarette smoke extract inhibits fibroblast-mediated collagen gel contraction.

2,3,7,8-Tetrachlorodibenzo-p-dioxin and diethylstilbestrol affect thymocytes at different stages of development in fetal thymus organ culture.

Low glucose enhances Na⁺/glucose transport in bovine brain artery endothelial cells.

Tumor necrosis factor-alpha regulates the gene expression of macrophage migration inhibitory factor through tyrosine kinase-dependent pathway in 3T3-L1 adipocytes.

Regulation of glucose transport and c-fos and egr-1 expression in cells with mutated or endogenous growth hormone receptors.

The hsp90-based chaperone system: involvement in signal transduction from a variety of hormone and growth factor receptors.

Isolation of a novel metabolizing system enriched in phase-II enzymes for short-term genotoxicity bioassays.

Insect juvenile hormone resistance gene homology with the bHLH-PAS family of transcriptional regulators.

Flow cytometric analyses in embryogenic and non-embryogenic callus lines of *Cyclamen persicum* Mill.: relation between ploidy level and competence for somatic embryogenesis.

Microbial photodegradation of aminoarenes. Metabolism of 2-amino-4-nitrophenol by *Rhodobacter capsulatus*.

Identification of a putative surfactant convertase in rat lung as a secreted serine carboxylesterase.

Mass spectrometric characterization and glycosylation profile of bovine pancreatic bile salt-activated lipase.

Alterations in human B cell calcium homeostasis by polycyclic aromatic hydrocarbons: possible associations with cytochrome P450 metabolism and increased protein tyrosine phosphorylation.

Sulfotransferase-mediated genotoxicity of propane 2-nitronate in cultured ovine seminal vesicle cells.

Regulation of sulfotransferase gene expression by glucocorticoid hormones and xenobiotics in primary rat hepatocyte culture.

Characterization of thyroid hormone sulfotransferases.

Dietary and tissue residue analysis and contaminant intake estimations in rats consuming diets composed of Great Lakes salmon: a multigeneration study.

Metabolic interaction between toluene, trichloroethylene and n-hexane in humans.

Accumulation of ascorbate by endocrine-regulated and glucose-sensitive transport of dehydroascorbic acid in luteinized rat ovarian cells.

Na⁺-dependent and phlorizin-inhibitable transport of glucose and cycasin in brain endothelial cells.

Metabolic Study of Isoproturon in Goats Following a Single Oral Administration: Toxicokinetics and Recovery.

Analytical Method for the Determination of Atrazine and Its Dealkylated Chlorotriazine Metabolites in Urine by Gas Chromatography/Mass Selective Detection.

Mixed effects of 2,6-dithiopurine against cyclophosphamide mediated bladder and lung toxicity in mice.

Vascular endothelial growth factor/vascular permeability factor enhances vascular permeability via nitric oxide and prostacyclin.

3,4 Dichloroaniline-haemoglobin adducts in humans: preliminary data on agricultural workers exposed to propanil.

Modulating effects of thyroid state on the induction of biotransformation enzymes by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Inhibition of corneal metabolism of deslorelin by EDTA and ZnCl₂.

Substrate-dependent cadmium toxicity affecting energy-linked K⁺/86Rb transport in *Staphylococcus aureus*.

Inhibition of 5,9-dimethyldibenzo[c,g]carbazole-DNA adduct formation in mouse liver by pretreatment with cytochrome P4501A inducers in vivo.

Use of c-Src and c-Fos knockout mice for the studies on the role of c-Src kinase signaling in the expression of toxicity of TCDD.

Multiplication of *Legionella pneumophila* in HeLa cells in the presence of cytoskeleton and metabolic inhibitors.

Modulation of 2,6-dinitrotoluene genotoxicity by alachlor treatment of Fischer 344 rats.

Effect of in vivo administered 2,3,7,8-tetrachlorodibenzo-p-dioxin on DNA-binding activities of nuclear transcription factors in liver of guinea pigs.

Classification of auxin plant hormones by interaction property similarity indices.

Effects of hypoxia and toxicant exposure on adenylate energy charge and cytosolic ADP concentrations in abalone.

Interaction of PCB congeners and 2,3,7,8-TCDD in the rat liver: an electron microscope study.

Drug metabolizing enzyme activities and superoxide formation in primary and immortalized rat brain endothelial cells.

Molecular determinants of hormone mimicry: halogenated aromatic hydrocarbon environmental agents.

Hormonal interactions in the effects of halogenated aromatic hydrocarbons on the developing brain.

Effects of pesticides and toxic substances on behavioral and morphological reproductive development: endocrine versus nonendocrine mechanisms.

Metabolic inhibition impairs ATP-sensitive K⁺ channel block by sulfonylurea in pancreatic beta-cells.

S-p-toluymercapturic acid in the urine of workers exposed to toluene: a new biomarker for toluene exposure.

Mitochondrial dysfunction in the senescence accelerated mouse (SAM).

[Morphologic and histochemical changes in the thyroid gland induced by single exposure to 2,4-DA].

Promotion of rat hepatocarcinogenesis by dimethylarsinic acid: association with elevated ornithine decarboxylase activity and formation of 8-hydroxydeoxyguanosine in the liver.

Metabolic methylation is a possible genotoxicity-enhancing process of inorganic arsenics.

[Chemical accident with isoprotrurone in an industrial plant in Frankfurt am Main 27 January 1996].

Effects of the herbicide molinate on mixotrophic growth, photosynthetic pigments, and protein content of *Anabaena sphaerica* under different light conditions.

Metabolism-dependent activation and toxicity of chemicals in nasal glands.

Herbicide-induced experimental variegate porphyria in mice: tissue porphyrinogen accumulation and response to porphyrogenic drugs.

Sensitivity of macrophyte-dominated freshwater microcosms to chronic levels of the herbicide linuron.
II. Community metabolism and invertebrates.

Toxicity of 2,4-dichlorophenoxyacetic acid to *Rhizobium* sp in pure culture.

The cytotoxic effect of paraquat to isolated renal proximal tubular segments from rabbits.

Peroxisome proliferators increase the formation of BPDE-DNA adducts in isolated rat hepatocytes.

Sex-dependent differences in the disposition of 2,4-dichlorophenoxyacetic acid in Sprague-Dawley rats, B6C3F1 mice, and Syrian hamsters.

Evidence that A8947 enhances pancreas growth via a trypsin inhibitor mechanism.

Acute and chronic toxicity of the herbicide Stam M-4 in field and laboratory exposures.

Growth response of freshwater algae to continuous flow of terbutryn.

Mitochondria-mediated cell injury. Symposium overview.

The immunomodulatory effects of the herbicide propanil on murine macrophage interleukin-6 and tumor necrosis factor- α production.

Cellular toxicity of 2,4,5-trichlorophenoxyacetic acid: formation of 2,4,5-trichlorophenoxyacetylcholine.

Possible carcinogenic potential of dimethylarsinic acid as assessed in rat in vivo models: a review.

In vivo studies on genotoxicity of pure and commercial linuron.

Alterations in steroidogenesis in alligators (*Alligator mississippiensis*) exposed naturally and experimentally to environmental contaminants.

Influence of benzo[a]phenothiazines on the element content of two tobacco tissue cultures differing in hormone requirement.

The inhibitory effect of selenium on induction of tetraploidy by dimethylarsinic acid in Chinese hamster cells.

The urinary excretion of arsenic metabolites after a single oral administration of dimethylarsinic acid to rats.

Serum dioxin and diabetes mellitus in veterans of Operation Ranch Hand.

Meta-analyses of prostate cancer and farming.

In vitro synergistic interaction of alligator and human estrogen receptors with combinations of environmental chemicals.

Cell-nuclear accumulation of 72-kDa stress protein induced by dimethylated arsenics.

Effects of dichlobenil on ultrastructural morphology and cell replication in the mouse olfactory mucosa.

Genotoxic evaluation of the herbicide paraquat in cultured human lymphocytes.

Inhibition of intracellular Ca²⁺ signalling, cytotoxicity and antitumor activity of the herbicide oryzalin and its analogues.

Heterologous expression of carbonyl reductase: demonstration of prostaglandin 9-ketoreductase activity and paraquat resistance.

Environmental fate of trifluralin.

[Toxicity of atrazine and its metabolite deethylatrazine in *Thamnocephalus platyurus* and *Dugesia gonocephala*].

[The effect of the dioxin-containing herbicide 2,4-D on the hormonal status of experimental animals].

Comparative ³²P-postlabeling analysis of exogenous and endogenous DNA adducts in mouse skin exposed to a wood-preserving waste extract, a complex mixture of polycyclic and polychlorinated chemicals.

Do reactive oxygen species underlie the mechanism of apoptosis in the tadpole tail?

Comparative pharmacokinetics of [¹⁴C]metosulam (N-[2,6-dichloro-3-methylphenyl]-5,7-dimethoxy-1,2,4-triazolo[1,5a]-pyrimidine-2-sulfonamide) in rats, mice and dogs.

Lipid peroxidation and histopathological changes in the digestive gland of a freshwater snail *Planorbis corneus* L. (Gastropoda, Pulmonata) exposed to chronic and sub-chronic concentrations of PCP.

Comparison of catalase in diploid and haploid *Rana rugosa* using heat and chemical inactivation techniques.

Metabolism of arsenic after acute occupational arsine intoxication.

Performance characteristics of combined haemodialysis/haemoperfusion system for removal of blood toxins.

Liver cell cytoplasmic inclusions in experimental porphyrias: their demonstration with the ferric ferricyanide reduction reaction.

Inhibition of the genotoxic effects of heterocyclic amines in human derived hepatoma cells by dietary bioantimutagens.

Influence of dietary selenium on the disposition of arsenate in the female B6C3F1 mouse.

Induction of glutathione depletion, p53 protein accumulation and cellular transformation by tetrachlorohydroquinone, a toxic metabolite of pentachlorophenol.

Atrial natriuretic peptide accounts for increased cGMP in hypoxia-induced hypertensive rat lungs.

Inhibition of sulfotransferase affecting in vivo genotoxicity and DNA adducts induced by safrole in rat liver.

Pentachlorophenol dermal absorption and disposition from soil in swine: effects of occlusion and skin microorganism inhibition.

Role of glutathione and catalase in H₂O₂ detoxification in LPS-activated hepatic endothelial and Kupffer cells.

Optimizing recoveries of two chlorotriazine herbicide metabolites and 11 pesticides from aqueous samples using solid-phase extraction and gas chromatography-mass spectrometry.

Identification of ionic chloroacetanilide-herbicide metabolites in surface water and groundwater by HPLC/MS using negative ion spray.

Butylated hydroxyanisole and its metabolite tert-butylhydroquinone differentially regulate mitogen-activated protein kinases. The role of oxidative stress in the activation of mitogen-activated protein kinases by phenolic antioxidants.

[Effect of activity of semicarbazide-sensitive aminooxidases and cellular glutathione on the cytotoxic effect of allylamine, acrolein, and formaldehyde in human cultured endothelial cells].

Carcinogens in spacecraft air.

Herbicide and estrogen effects on the metabolic activity of *Elliptio complanata* measured by calorimetry.

Identification of enzymes involved in the metabolism of atrazine, terbutylazine, ametryne, and terbutryne in human liver microsomes.

Characteristics of the prolactin stimulation of iodide uptake into mouse mammary gland explants.

Determination of the metabolites of the herbicide dimethyl tetrachloroterephthalate in drinking water by high-performance liquid chromatography with gas chromatography/mass spectrometry confirmation.

Dosimetry of chlorinated quinone metabolites of pentachlorophenol in the livers of rats and mice based upon measurement of protein adducts.

Nuclear magnetic resonance timecourse studies of glyphosate metabolism by microbial soil isolates.

Biliary elimination of oral 2,4-dichlorophenoxyacetic acid and its metabolites in male and female Sprague-Dawley rats, B6C3F1 mice, and Syrian hamsters.

Identification of a major human urinary metabolite of metolachlor by LC-MS/MS.

Contribution of cytochrome P450 3A pathway to bromocriptine metabolism and effects of ferrous iron and hypoxia-re-oxygenation on its elimination in the perfused rat liver.

[¹⁴C] acrolein accumulation and metabolism in leaf lettuce.

The hormone-responsive NADH oxidase of the plant plasma membrane has properties of a NADH:protein disulfide reductase.

Differential expression of CuZn- and Fe-superoxide dismutase genes of tobacco during development, oxidative stress, and hormonal treatments.

Effect of isoproteron on male reproductive system: clinical, histological and histoenzonological studies in rats.

Metabolism of metolachlor by the fungus *Cunninghamella elegans*.

Interaction of reactive and inert chemicals in the presence of oxidoreductases: reaction of the herbicide bentazon and its metabolites with humic monomers.

Somatic embryogenesis in cultured immature zygotic embryos and leaf protoplasts of *Arabidopsis thaliana* ecotypes.

The ovarian progesterone receptor in the spotted seatrout, *Cynoscion nebulosus*, demonstrates steroid specificity different from progesterone receptors in other vertebrates.

Changes of energy metabolism induced by 1-methyl-4-phenylpyridinium (MPP⁺)-related compounds in rat pheochromocytoma PC12 cells.

Sustained increase in intracellular free calcium and activation of cyclooxygenase-2 expression in mouse hepatoma cells treated with dioxin.

Entacapone, a novel catechol-O-methyltransferase inhibitor for Parkinson's disease, does not impair mitochondrial energy production.

Heat shock protein induction by certain chemical stressors is correlated with their cytotoxicity, lipophilicity and protein-denaturing capacity.

Induction and prevention of squamous transformation of bronchial epithelial cells by phenolic compounds.

Abrogation of IL-3 requirements and stimulation of hematopoietic cell proliferation in vitro and in vivo by carboxylic acids.

Studies on the relationship between estrogen receptor content, glutathione S-transferase pi expression, and induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin and drug resistance in human breast cancer cells.

Newborn infants diagnosed as neurologically abnormal with relation to PCB and dioxin exposure and their thyroid-hormone status.

Effect of advanced glycation end product-modified albumin on tissue factor expression by monocytes. Role of oxidant stress and protein tyrosine kinase activation.

Use of estrogen therapy in a patient with gastrointestinal bleeding secondary to arteriovenous malformations.

Pancreatic carcinomas deposit laminin-5, preferably adhere to laminin-5, and migrate on the newly deposited basement membrane.

Promotion of enzyme altered foci in female rat 2,3,3',4,4',5-hexachlorobiphenyl.

Alterations in the developing immune system of the F344 rat after perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: II. Effects on the pup and the adult.

Alterations in the developing immune system of the F344 rat after perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin I. [correction of II]. Effects on the fetus and the neonate.

Role of nitroreductases but not cytochromes P450 in the metabolic activation of 1-nitropyrene in the HepG2 human hepatoblastoma cell line.

The role of NAD(P)H:quinone oxidoreductase in quinone-mediated p21 induction in human colon carcinoma cells.

Aryl hydrocarbon receptor-dependent induction of cyp1a1 by bilirubin in mouse hepatoma hepa 1c1c7 cells.

Defective endogenous nitric oxide-mediated modulation of cellular respiration in canine skeletal muscle after the development of heart failure.

Gallium nitrate optic neuropathy.

[4-chloro-m-cresol-induced contractures of skeletal muscle specimen from patients at risk for malignant hyperthermia].

[Acute myeloblastic leukemia showing pronounced skin infiltration during administration of low-dose cytarabine and etoposide with granulocyte colony-stimulating factor].

Chemopreventive and growth inhibitory effects of selenium.

Thyroid hormones in the pathogenesis of lung hypoplasia and immaturity induced in fetal rats by prenatal exposure to nitrofen.

Catalase mediates acetaldehyde formation from ethanol in fetal and neonatal rat brain.

Effects of the protein tyrosine kinase inhibitor, herbimycin A, on prolactin gene expression in GH3 and 235-1 pituitary tumor cells.

Effects of antitumor agents on 3H-2-deoxyglucose uptake in tumor cells and their relationship with the main targets of the antitumor agents.

Effect of 2,4-dinitrophenol on the hypometabolic response to hypoxia of conscious adult rats.

Role of oxidant stress and iron delocalization in acidosis-induced intestinal epithelial hyperpermeability.

Activity and inducibility of drug-metabolizing enzymes in immortalized hepatocyte-like cells (mhPKT) derived from a L-PK/Tag1 transgenic mouse.

HDL causes mesangial cell mitogenesis through a tyrosine kinase-dependent receptor mechanism.

Thiamine uptake in human intestinal biopsy specimens, including observations from a patient with acute thiamine deficiency.

Tumor-specific expression of cytochrome P450 CYP1B1.

Iron-induced rat coronal suture fusion in vitro: the role of redox regulation.

Cytochrome P450 isozymes responsible for the metabolism of toluene and styrene in human liver microsomes.

A novel derivatization of phenol after extraction from human serum using perfluorooctanoyl chloride for gas chromatography-mass spectrometric confirmation and quantification.

DMPS-arsenic challenge test. I: Increased urinary excretion of monomethylarsonic acid in humans given dimercaptopropane sulfonate.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: effects on development of the male and female reproductive system of the mouse.

Tyrosine phosphorylation is required for ehrlichial internalization and replication in P388D1 cells.

Purification and partial sequencing of the XL-I form of xenobiotic-metabolizing medium chain fatty acid:CoA ligase from bovine liver mitochondria, and its homology with the essential hypertension protein.

Cytosolic Ca²⁺ and protein kinase Calpha couple cellular metabolism to membrane K⁺ permeability in a human biliary cell line.

Induction of cytochrome P450 1B1 and catechol estrogen metabolism in ACHN human renal adenocarcinoma cells.

[Randomized multi-center trial of the administration of erythropoietin in anemia of prematurity].

Opposite effects of 2,2',4,4',5,5'-hexachlorobiphenyl and 2,3,7,8-tetrachlorodibenzo-p-dioxin on the antibody response to sheep erythrocytes in mice.

Prenatal hormones alter antioxidant enzymes and lung histology in rats with congenital diaphragmatic hernia.

Effect of hepatic methyl donor status on urinary excretion and DNA damage in B6C3F1 mice treated with sodium arsenite.

Relative genotoxic potency of arsenic and its methylated metabolites.

Cytogenetic effects in human exposure to arsenic.

Carcinogenic polycyclic aromatic hydrocarbons increase intracellular Ca²⁺ and cell proliferation in primary human mammary epithelial cells.

Ferrous sulfate-induced increase in requirement for thyroxine in a patient with primary hypothyroidism.

PET imaging of brain tumor with [methyl-11C]choline.

Alterations to the pituitary-gonadal axis in the peripubertal female rat exposed in utero and through lactation to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Identification of a motif within the 5' regulatory region of pS2 which is responsible for AP-1 binding and TCDD-mediated suppression.

The multidrug-resistant human lung tumour cell line, DLKP-A10, expresses novel drug accumulation and sequestration systems.

Effects of iron salts in sucrose on dental caries and plaque in rats.

[Studies on mechanism of wasting syndrome in TCDD-intoxicated rats].

Role of cytochrome P450 enzyme induction in the metabolic activation of benzo[c]phenanthrene in human cell lines and mouse epidermis.

Altered intracellular distribution of daunorubicin in immature acute myeloid leukemia cells.

Mitochondrial dysfunction in neurodegeneration.

The aquatic vertebrate embryo as a sentinel for toxins: zebrafish embryo dechoriation and perivitelline space microinjection.

Co-metabolism of ethanol, ethanol-derived acetaldehyde, and 4-hydroxynonenal in isolated rat hepatocytes.

Cancer mortality among rice growers in Novara Province, northern Italy.

Characterization of methemoglobin formation induced by 3,5-dichloroaniline, 4-amino-2,6-dichlorophenol and 3,5-dichlorophenylhydroxylamine.

Cancer risk assessment using blood dioxin levels and daily dietary TEQ intake in general populations of industrial and non-industrial countries.

Free radicals and the ischemia-evoked extracellular accumulation of amino acids in rat cerebral cortex.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) affects keratin 1 and keratin 17 gene expression and differentially induces keratinization in hairless mouse skin.

Modulation of macrophage function for defence of the lung against *Pseudomonas aeruginosa*.

Nitrofen dose-dependent gestational day-specific murine lung hypoplasia and left-sided diaphragmatic hernia.

The role of oxygen free radicals in occupational and environmental lung diseases.

The clinical pharmacokinetics of levofloxacin.

Localization of hydrogen peroxide accumulation during the hypersensitive reaction of lettuce cells to *Pseudomonas syringae* pv *phaseolicola*.

Sulfated sialyl Lewis X, the putative L-selectin ligand, detected on endothelial cells of high endothelial venules by a distinct set of anti-sialyl Lewis X antibodies.

Selected other effects and TEFs.

Dioxins and the Ah receptor: probes to uncover processes in neuroendocrine development.

Impaired cellular immune response in rats exposed perinatally to Baltic Sea herring oil or 2,3,7,8-TCDD.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and congeners in infants. A toxicokinetic model of human lifetime body burden by TCDD with special emphasis on its uptake by nutrition.

Effect of subchronic 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on immune system and target gene responses in mice: calculation of benchmark doses for CYP1A1 and CYP1A2 related enzyme activities.

Enzymatic methylation of arsenic species and other new approaches to arsenic toxicity.

Contribution of ATP-sensitive potassium channels to hypoxic hyperpolarization in rat hippocampal CA1 neurons in vitro.

Organochlorine exposure and risk for breast cancer.

Altered profile of urinary arsenic metabolites in adults with chronic arsenicism. A pilot study.

Mechanism of thiazopyr-induced effects on thyroid hormone homeostasis in male Sprague-Dawley rats.

Early life stage toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in zebrafish (*Danio rerio*).

Protein kinase Cs and tyrosine kinases in permissive action of prostacyclin on cerebrovascular regulation in newborn pigs.

Dialkylquinoneimine metabolites of chloroacetanilide herbicides induce sister chromatid exchanges in cultured human lymphocytes.

Modification of hepatic drug-metabolizing enzymes in rats treated with alkyl sulfides.

Gas chromatographic determination of residues of thyreostatic drugs in bovine muscle tissue using combined resin mediated methylation and extraction.

Somatic embryogenesis and plant regeneration in *Lilium longiflorum* Thunb.

Age-related susceptibility to hepatotoxicants.

Two complementary bioassays for screening the estrogenic potency of xenobiotics: recombinant yeast for trout estrogen receptor and trout hepatocyte cultures.

A transgenic mouse model for the detection of cellular stress induced by toxic inorganic compounds.

Mechanisms for metabolism of ethanol to 1-hydroxyethyl radicals in rat liver microsomes.

4-Coumaroyl coenzyme A 3-hydroxylase activity from cell cultures of *Lithospermum erythrorhizon* and its relationship to polyphenol oxidase.

Long-term primary cultures of adult human hepatocytes.

Somatic embryogenesis and plant regeneration from stem explants of *Moricandia arvensis*.

Comparison of hexachlorocyclohexane-induced oxidative stress in the testis of immature and adult rats.

Induction of drug-metabolizing enzymes by dioxin.

Energy-dependent expression of platelet-von Willebrand factor on the surface of unstimulated and stimulated platelets.

4-Amino-2,6-dichlorophenol nephrotoxicity in the Fischer 344 rat: protection by ascorbic acid, AT-125, and aminooxyacetic acid.

Mechanical stretch induces vascular permeability factor in human mesangial cells: mechanisms of signal transduction.

Ah receptor regulation of CYP1B1 expression in primary mouse embryo-derived cells.

Preliminary assessment of PCB risks to human and ecological health in the lower Passaic River.

Aging and oxygen toxicity: Relation to changes in melatonin.

Synergy between cisplatin and an inhibitor of S-adenosylmethionine dependent transmethylation in human ovarian adenocarcinoma cells.

Cell- and tissue-specific metabolic activation of chemicals as determined by autoradiography: in vitro-in vivo correlations.

Percutaneous penetration of 2-phenoxyethanol through rat and human skin.

Loss of teratogenic response to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice lacking the Ah (dioxin) receptor.

The biosynthesis and metabolism of the aspartate derived amino acids in higher plants.

Bromine-76 and carbon-11 labelled NNC 13-8199, metabolically stable benzodiazepine receptor agonists as radioligands for positron emission tomography.

Volatile metabolites from some gram-negative bacteria.

Enhancement of plasminogen binding and fibrinolysis by chloropectin I.

p70 S6 kinase is activated by sodium arsenite in adult rat cardiomyocytes: roles for phosphatidylinositol 3-kinase and p38 MAP kinase.

The Low Biomass Yields of the Acetic Acid Bacterium *Acetobacter pasteurianus* Are Due to a Low Stoichiometry of Respiration-Coupled Proton Translocation.

The oncofetal J28 epitope involves fucosylated O-linked oligosaccharide structures of the fetoacinar pancreatic protein.

A new, simple, nonradioactive, nontoxic in vitro assay to monitor corneal endothelial cell viability.

Metabolism of 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) by human cytochrome P4501B1.

Inhibition of oxidative phosphorylation, vascular tone, and $[Ca^{2+}]_i$ in the perfused rat tail artery.

Oxidative phosphorylation in myocardial mitochondria 'in situ': a calorimetric study on permeabilized cardiac muscle preparations.

CYP1A induction by beta-naphthoflavone, Aroclor 1254, and 2,3,7,8-tetrachlorodibenzo-p-dioxin and its influence on aflatoxin B1 metabolism and DNA adduction in zebrafish.

Extrathyroidal effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on thyroid hormone turnover in male Sprague-Dawley rats.

Oleic acid reduces oxidant stress in cultured pulmonary artery endothelial cells.

Impairment of respiration and oxidative phosphorylation by redox cyclers 2-nitrosofluorene and menadione.

Effect of energy shortage and oxidative stress on amyloid precursor protein metabolism in COS cells.

Airborne arsenic and urinary excretion of arsenic metabolites during boiler cleaning operations in a Slovak coal-fired power plant.

Transport mechanisms of idarubicin, an anthracycline derivative, in human leukemia HL60 cells and mononuclear cells, and comparison with those of its analogs.

Immunochemical, ³²P-postlabeling, and GC/MS detection of 4-aminobiphenyl-DNA adducts in human peripheral lung in relation to metabolic activation pathways involving pulmonary N-oxidation, conjugation, and peroxidation.

Characterization of intracellular calcium responses produced by polycyclic aromatic hydrocarbons in surface marker-defined human peripheral blood mononuclear cells.

A physiologically based pharmacokinetic (PB-PK) model for 1,2-dichlorobenzene linked to two possible parameters of toxicity.

Role of 3,4-dichlorophenyl methyl sulfone, a metabolite of o-dichlorobenzene, in the changes in hepatic microsomal drug-metabolizing enzymes caused by o-dichlorobenzene administration in rats.

Effect of metabolic inhibitors on membrane potential and ion conductance of rat astrocytes.

Aryl hydrocarbon receptor knockout mice (AHR^{-/-}) exhibit liver retinoid accumulation and reduced retinoic acid metabolism.

Analysis of some metabolites of organic solvents in urine by high-performance liquid chromatography with beta-cyclodextrin.

Specific attenuation of the pressure-induced contraction of rat cerebral artery by herbimycin A.

Cytotoxic effects of 2,6-di-tert-butyl-4-methylphenyl N-methylcarbamate (terbutol) herbicide on hepatocytes and mitochondria isolated from male rats.

Lead transport in IEC-6 intestinal epithelial cells.

A ¹³C NMR study of 2-(¹³C)-chloroacetaldehyde, a metabolite of ifosfamide and cyclophosphamide, in the isolated perfused rabbit heart model. Initial observations on its cardiotoxicity and cardiac metabolism.

Influence of dietary protein supplements on the formation of bacterial metabolites in the colon.

Differential effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin, bis(tri-n-butyltin) oxide and cyclosporine on thymus histophysiology.

Quantitative determination of urinary metabolites of o-dichlorobenzene using a gas chromatograph.

Synaptic physiology and mitochondrial function in crayfish tonic and phasic motor neurons.

Aniline and its metabolites generate free radicals in yeast.

Impairment of the chemical defence of the beetle, *Tenebrio molitor*, by metacestodes (cysticeroids) of the tapeworm, *Hymenolepis diminuta*.

Cytokine gene expression during ontogeny in murine thymus on activation of the aryl hydrocarbon receptor by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Internalization and down-regulation of the prostacyclin receptor in human platelets.

Aluminum citrate is transported from brain into blood via the monocarboxylic acid transporter located at the blood-brain barrier.

Expression and characterization of recombinant rat parathyroid hormone-related peptide (1-141) and an amino-terminally-truncated analogue (38-141).

Modulation of tyrosine kinase activity has multiple actions on insulin release from the pancreatic beta-cell: studies with lavendustin A.

Cytochrome P450 3A4 mediated metabolism of 2,4-dichlorophenol.

Resazurin reduction as a function of respiratory burst in bovine neutrophils.

The role of tyrosine phosphorylation in lipopolysaccharide- and zymosan-induced procoagulant activity and tissue factor expression in macrophages.

Mobilization of iron from neoplastic cells by some iron chelators is an energy-dependent process.

Opening of cardiac sarcolemmal KATP channels by dinitrophenol separate from metabolic inhibition.

Functional requirement of the hypoxia-responsive element in the activation of the inducible nitric oxide synthase promoter by the iron chelator desferrioxamine.

[Comparative study of the effect of paracetamol, phenacetin and amidopyrine on mitochondrial function in isolated rat hepatocytes].

Interleukin-2 increases intracellular glutathione levels and reverses the growth inhibiting effects of cyclophosphamide on B16 melanoma cells.

Bacterial endotoxin enhances the hepatotoxicity of allyl alcohol.

Restricted intestinal absorption of some beta-lactam antibiotics by an energy-dependent efflux system in rat intestine.

Two divergent catalase genes are differentially regulated during *Aspergillus nidulans* development and oxidative stress.

Rapid Ca²⁺ influx induced by the action of dibutylhydroquinone and glucagon in the perfused rat liver.

Direct mapping of an agonist-binding domain within the parathyroid hormone/parathyroid hormone-related protein receptor by photoaffinity crosslinking.

Cytochrome P450 isoenzyme activities in cultured rat and mouse liver slices.

The toxicity of substituted phenolic compounds to a detoxifying and an acetic acid bacterium.

Considerations on genetic and environmental factors that contribute to resistance or sensitivity of mammals including humans to toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and related compounds. Part 1: Genetic factors affecting the toxicity of TCDD.

The ability of a new hypoglycaemic agent, A-4166, compared to sulphonylureas, to increase cytosolic Ca²⁺ in pancreatic beta-cells under metabolic inhibition.

Metabolism of [des-Gly10, D-Trp6]LHRH ethylamide in the rabbit conjunctiva.

Determination of genotoxicity of the metabolites of the pesticides Guthion, Sencor, Lorox, Reglone, Daconil and Admire by ³²P-postlabeling.

Impairment of antigen-specific antibody production in transgenic mice expressing a dominant-negative form of gp130.

Environmental xenobiotics may disrupt normal endocrine function by interfering with the binding of physiological ligands to steroid receptors and binding proteins.

Effects of cyclophosphamide and ifosfamide on neuroblastoma cells before and after activation by microsomes.

Identification of NIH-shifted metabolites of 1,3,7,8-tetrachlorodibenzo-p-dioxin in the rat by NMR comparison with synthesized isomers.

Derivation of 2,3,7,8-TCDD toxic equivalent factors (TEFs) for selected dioxins, furans and PCBs with rainbow trout and rat liver cell lines and the influence of exposure time.

Time course for the modulation of hepatic cytochrome P450 after administration of ethylbenzene and its correlation with toluene metabolism.

Effect of the intravenous anesthetic 2,6-diisopropylphenol on respiration and energy production by rat brain synaptosomes.

The 26 kD protein recognized on rat cauda epididymal sperm by monoclonal antibody 4E9 has internal peptide sequence that is identical to the secreted form of epididymal protein E.

Neutrophil-mediated activation of mitoxantrone to metabolites which form adducts with DNA.

Energy metabolism during apoptosis. Bcl-2 promotes survival in hematopoietic cells induced to apoptose by growth factor withdrawal by stabilizing a form of metabolic arrest.

Antioxidant defenses of cultured colonic epithelial cells against reactive oxygen metabolites.

Halogenated aromatic hydrocarbon-mediated porphyrin accumulation and induction of cytochrome P4501A in chicken embryo hepatocytes.

Toluene metabolism by cDNA-expressed human hepatic cytochrome P450.

How knockout mouse lines will be used to study the role of drug-metabolizing enzymes and their receptors during reproduction and development, and in environmental toxicity, cancer, and oxidative stress.

Effect of activators and inhibitors of K⁺ channels on insulin secretion in the amphibian pancreas.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) increases release of luteinizing hormone and follicle-stimulating hormone from the pituitary of immature female rats in vivo and in vitro.

Metabolites of arsenic induced tetraploids and mitotic arrest in cultured cells.

Aldehyde reductase induction: a novel response to oxidative stress of smooth muscle cells.

The mitochondrial carnitine carrier protein: cDNA cloning, primary structure and comparison with other mitochondrial transport proteins.

Nonlinear intestinal absorption kinetics of cefuroxime axetil in rats.

Death following intentional methyl bromide poisoning: toxicological data and literature review.

Cryptic gonadotropin-releasing hormone receptors of rat pituitary cells in culture are unmasked by epidermal growth factor.

A benzo[a]pyrene-induced cell cycle checkpoint resulting in p53-independent G1 arrest in 3T3 fibroblasts.

Regulation by insulin of a unique neuronal Ca²⁺ pool and of neuropeptide secretion.

Investigation of two glycosylated forms of bile-salt-dependent lipase in human pancreatic juice.

A continuous spectrophotometric assay for monoamine oxidase and related enzymes in tissue homogenates.

Effects of arsenite pretreatment on the acute toxicity of parathion.

[Environmental pollutants with hormonal effects. Is estrogen theory a good model?].

Metabolic activation and DNA-adducts detection as biomarkers of chlorinated pesticide exposures.

Endocrine disrupters in the aquatic environment.

Congener specific accumulation and toxic assessment of polychlorinated biphenyls in common cormorants, *Phalacrocorax carbo*, from Lake Biwa, Japan.

Influences of altered phytohormone use on endogenous ABA and mRNA populations during white spruce (*Picea glauca*) somatic embryo culture.

Hormonal Regulation of Dormancy in Developing Sorghum Seeds.

Differential effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the expression of prostaglandin-H synthase isoenzymes in mouse tissues.

Immunotoxic effects of TCDD and toxic equivalency factors.

Review and update of the results of the NIOSH medical study of workers exposed to chemicals contaminated with 2,3,7,8-tetrachlorodibenzodioxin.

Urinary excretion of phenols as an indicator of occupational exposure in the coke-plant industry.

Neurochemical effects of polychlorinated biphenyls: an overview and identification of research needs.

Constitution of the metabolic type of streptomycetes during the first hours of cultivation.

DNA adduct formation in primary mouse embryo cells induced by 7H-dibenzo[c,g]carbazole and its organ-specific carcinogenic derivatives.

Metabolism of hexachlorobenzene in humans: association between serum levels and urinary metabolites in a highly exposed population.

Selected lesions of dioxin in laboratory rodents.

Urinary excretion of ifosfamide, 4-hydroxyifosfamide, 3- and 2-dechloroethylifosfamide, mesna, and dimesna in patients on fractionated intravenous ifosfamide and concomitant mesna therapy.

Regulation of inducible nitric oxide synthase expression in L6 rat skeletal muscle cells.

Enhancement of plasminogen binding to U937 cells and fibrin by complestatin.

Metabolic degradation, inducing potency, and metabolites of fluorinated and chlorinated-fluorinated dibenzodioxins and dibenzofurans.

Calcein is excreted from the intestinal mucosal cell membrane by the active transport system.

Toxicity of allyl alcohol in primary cultures of freshly isolated and cryopreserved hepatocytes maintained on hydrated collagen gels.

Occupational chronic exposure to organic solvents. XVI. Ambient and biological monitoring of workers exposed to toluene.

Genotoxic evaluation of the herbicide trifluralin on human lymphocytes exposed in vitro.

Citric acid cycle: a mainstream metabolic pathway influencing life span in *Drosophila melanogaster*?

Effects of 2,4-dichlorophenoxyacetic acid on Kentucky algae: simultaneous laboratory and field toxicity testings.

Promoting effects of dimethylarsinic acid on N-butyl-N-(4-hydroxybutyl)nitrosamine-induced urinary bladder carcinogenesis in rats.

Central nervous system myelin deficit in rats exposed to 2,4-dichlorophenoxyacetic acid throughout lactation.

Clinorotation affects morphology and ethylene production in soybean seedlings.

Subchronic, developmental, and genetic toxicology studies with the ethane sulfonate metabolite of alachlor.

Comparative subchronic studies on 2,4-dichlorophenoxyacetic acid, amine, and ester in rats.

Studies on the basis for the toxicity of acrolein mercapturates.

Cellular target of cyclophosphamide toxicity in the murine liver: role of glutathione and site of metabolic activation.

Cloning and expression in *Escherichia coli* and *Saccharomyces cerevisiae* of a novel tobacco cytochrome P-450-like cDNA.

An in vitro model for toxicological investigations of environmental neurotoxins in primary neuronal cell cultures.

Evaluation of the potential carcinogenicity and genetic toxicity to humans of the herbicide acetochlor.

Cancer incidence among alachlor manufacturing workers.

3,4-Dichloropropionanilide-induced atrophy of the thymus: mechanisms of toxicity and recovery.

Mode of action of thyroid tumor formation in the male Long-Evans rat administered high doses of alachlor.

Hierarchical cluster analysis of environmental pollutants through P450 induction in cultured hepatic cells.

Effect of atrazine on ovarian function in the rat.

No changes in behaviour, nigro-striatal system neurochemistry or neuronal cell death following toxic multiple oral paraquat administration to rats.

In vitro studies on the genotoxicity of 2,4-dichloro-6-nitrophenol ammonium (DCNPA) and its major metabolite.

Genotoxicity of the herbicides alachlor and maleic hydrazide in cultured human lymphocytes.

Experience with acute paraquat poisoning in Crete.

Exposure to dimethylarsinic acid, a main metabolite of inorganic arsenics, strongly promotes tumorigenesis initiated by 4-nitroquinoline 1-oxide in the lungs of mice.

Genetic modification of plants: significant issues and hurdles to success.

Histological studies of atrazine toxicity on the thyroid gland in rats.

Evidence of chemical stimulation of hepatic metabolism by an experimental acetanilide (FOE 5043) indirectly mediating reductions in circulating thyroid hormone levels in the male rat.

3-Aminobenzamide: effects on cytochrome P450-dependent metabolism of chemicals and on the toxicity of dichlobenil in the olfactory mucosa.

The detection of S-glutathionation of hepatic carbonic anhydrase III in rats treated with paraquat or diquat.

Detection of 1, N2-propanodeoxyguanosine adducts as potential endogenous DNA lesions in rodent and human tissues.

Retro-Diels-Alder reaction: possible involvement in the metabolic activation of 7-oxabicyclo[2.2.1]hepta-2(3),5(6)-diene-2,3-dicarboxylates and a phosphonate analog.

Pentachlorophenol enhances 9-hydroxybenzo [a] pyrene-induced hepatic DNA adduct formation in vivo and inhibits microsomal epoxide hydrolase and glutathione S-transferase activities in vitro: likely inhibition of epoxide detoxication by pentachlorophenol.

Endocrine modulation of reproduction.

Detection of two metabolites of diquat in urine and serum of poisoned patients after ingestion of a combined herbicide of paraquat and diquat.

Environmental fate of rice pesticides in California.

Herbicide: fatal ammonium thiocyanate and aminotriazole poisoning.

[Prognostication in chronic pesticide poisoning in agricultural workers: state of lipid metabolism].

The somatic white-ivory eye spot test does not detect the same spectrum of genotoxic events as the wing somatic mutation and recombination test in *Drosophila melanogaster*.

Characterization of 2,4-dichlorophenoxyacetic acid transport and its relationship with polyamines in *Azospirillum brasilense*.

Biotransformation of acrolein in rat: excretion of mercapturic acids after inhalation and intraperitoneal injection.

Increased expression of neuronal nitric oxide synthase in bladder afferent pathways following chronic bladder irritation.

The area postrema is involved in paraquat-induced conditioned aversion behavior and neuroendocrine activation of the hypothalamic-pituitary-adrenal axis.

The feeding value of soybeans fed to rats, chickens, catfish and dairy cattle is not altered by genetic incorporation of glyphosate tolerance.

Depression of liver microsomal glucose 6-phosphatase activity in carbon tetrachloride-poisoned rats. Potential synergistic effects of lipid peroxidation and of covalent binding of haloalkane-derived free radicals to cellular components in the process.

Kinetics of the reaction of a potential chemopreventive agent, 2,6-dithiopurine, and its major metabolite, 2,6-dithiouric acid, with multiple classes of electrophilic toxicants.

Purification of hydroxyquinol 1,2-dioxygenase and maleylacetate reductase: the lower pathway of 2,4,5-trichlorophenoxyacetic acid metabolism by *Burkholderia cepacia* AC1100.

Dechlorogeodin and its new dihydro derivatives, fungal metabolites with herbicidal activity.

Metabolism and distribution of [2,3-14C]acrolein in Sprague-Dawley rats.

Transfection of human cytochrome P-450 reductase cDNA and its effect on the sensitivity to toxins.

In vitro metabolism of atrazine, terbutylazine, ametryne, and terbutryne in rats, pigs, and humans.

A phosphonate monoester hydrolase from *Burkholderia caryophylli* PG2982 is useful as a conditional lethal gene in plants.

Nitrosyl cyanide, a putative metabolic oxidation product of the alcohol-deterrent agent cyanamide.

Serum dioxin, testosterone, and gonadotropins in veterans of Operation Ranch Hand.

Interruption of the *gpxA* gene increases the sensitivity of *Neisseria meningitidis* to paraquat.

Role of manganese superoxide dismutase in a mucoid isolate of *Pseudomonas aeruginosa*: adaptation to oxidative stress.

Identification of a major human urinary metabolite of alachlor by LC-MS/MS.

Metabolic activation of 2,6-dichlorobenzonitrile, an olfactory-specific toxicant, by rat, rabbit, and human cytochromes P450.

Assessment of the role of the glutathione and pentose phosphate pathways in the protection of primary cerebrocortical cultures from oxidative stress.

High-performance liquid chromatographic study of the aromatic nitrile metabolism in soil bacteria.

The effects of chronic sidestream cigarette smoke exposure on eicosanoid production by tracheal epithelium.

Metabolism of twelve herbicides by *Streptomyces*.

Characterization of chlorinated adducts of hemoglobin and albumin following administration of pentachlorophenol to rats.

Mono- and dimethylation of arsenic in rat liver cytosol in vitro.

A convenient method to discriminate between cytochrome P450 enzymes and flavin-containing monooxygenases in human liver microsomes.

Analysis of herbicide metabolism by monocot microsomal cytochrome P450.

Oxidative DNA lesions in V79 cells mediated by pentachlorophenol metabolites.

Glucose, glutathione, and cellular response to spermine oxidation products.

Decreased liver type I 5'-deiodinase and increased brown adipose tissue type II 5'-deiodinase activity in 2,3,7,8-tetrachlorobibenzo-p-dioxin (TCDD)-treated Long-Evans rats.

Heparan sulfate proteoglycans play a dual role in regulating fibroblast growth factor-2 mitogenic activity in human breast cancer cells.

[Toxicologic risk assessment and prevention: rational and irrational approaches].

Biphasic response of action potential duration to metabolic inhibition in rabbit and human ventricular myocytes: role of transient outward current and ATP-regulated potassium current.

Enforced expression of Bcl-XS induces differentiation and sensitizes chronic myelogenous leukemia-blast crisis K562 cells to 1-beta-D-arabinofuranosylcytosine-mediated differentiation and apoptosis.

Oxidative DNA damage induced by activation of polychlorinated biphenyls (PCBs): implications for PCB-induced oxidative stress in breast cancer.

Retinoic acid affects the expression rate of the differentiation-related genes aryl hydrocarbon receptor, ARNT and keratin 4 in proliferative keratinocytes only.

Possible role of arachidonic acid in stress-induced cytochrome P450IA1 activity.

Interactive effects between 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,2',4,4',5,5'-hexachlorobiphenyl in female B6C3F1 mice: tissue distribution and tissue-specific enzyme induction.

Induction of chromosomal aberrations in cultured human fibroblasts by inorganic and organic arsenic compounds and the different roles of glutathione in such induction.

Differences in inducibility of CYP1A1-mRNA by benzimidazole compounds between human and mouse cells: evidences of a human-specific signal transduction pathway for CYP1A1 induction.

Randomised study of cognitive effects of iron supplementation in non-anaemic iron-deficient adolescent girls.

Prostaglandin production via induction of cyclooxygenase-2 by human gingival fibroblasts stimulated with lipopolysaccharides.

Oxidative modification of low-density lipoprotein by the human hepatoma cell line HepG2.

Signs of enhanced neuromotor maturation in children due to perinatal load with background levels of dioxins. Follow-up until age 2 years and 7 months.

Undersulfation of glycosaminoglycans reduces the proliferation of a leukemia cell line in vitro.

Prenatal hormonal therapy improves pulmonary morphology in rats with congenital diaphragmatic hernia.

beta-Apo-8'-carotenal, but not beta-carotene, is a strong inducer of liver cytochromes P4501A1 and 1A2 in rat.

Photosensitization of uroporphyrin augments the ultraviolet A-induced synthesis of matrix metalloproteinases in human dermal fibroblasts.

Fulminant malignant hyperthermia associated with ketoacidotic diabetic coma.

Disturbed host defense in peritoneal cavity during CAPD: characterization of responsible factors in dwell fluid.

In ovo 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure in three avian species. 2. Effects on estrogen receptor and plasma sex steroid hormones during the perinatal period.

In ovo 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure in three avian species. 1. Effects on thyroid hormones and growth during the perinatal period.

Genetic analysis of oxygen defense mechanisms in *Drosophila melanogaster* and identification of a novel behavioural mutant with a Shaker phenotype.

Mechanisms of colon cancer binding to substratum and cells.

Ormaplatin resistance is associated with decreased accumulation of its platinum (II) analogue, dichloro(D,L-trans)1,2-diaminocyclohexaneplatinum (II).

An effect of K-ras gene mutation on epidermal growth factor receptor signal transduction in PANC-1 pancreatic carcinoma cells.

Complementation of Ah receptor deficiency in hepatoma cells: negative feedback regulation and cell cycle control by the Ah receptor.

Inhibition of HSP70 expression by calcium ionophore A23187 in human cells. An effect independent of the acquisition of DNA-binding activity by the heat shock transcription factor.

Transport mechanisms of anthracycline derivatives in human leukemia cell lines: uptake of pirarubicin, daunorubicin and doxorubicin by K562 and multidrug-resistant K562/ADM cells.

Diagnostic criteria for selenium toxicosis in aquatic birds: dietary exposure, tissue concentrations, and macroscopic effects.

In utero and lactational exposure of female Holtzman rats to 2,3,7,8-tetrachlorodibenzo-p-dioxin: modulation of the estrogen signal.

Cancer incidence and specific occupational exposures in the Swedish leather tanning industry: a cohort based case-control study.

Respiratory activity is essential for post-exponential-phase production of type 5 capsular polysaccharide by *Staphylococcus aureus*.

Nephrotoxicity of 4-amino-2-chlorophenol and 2-amino-4-chlorophenol in the Fischer 344 rat.

Comparative effects of the metabolic inhibitors 2,4-dinitrophenol and iodoacetate on mouse neuroblastoma cells in vitro.

Variable effects of tyrosine kinase inhibitors on avian osteoclastic activity and reduction of bone loss in ovariectomized rats.

Physical and functional association between GADD153 and CCAAT/enhancer-binding protein beta during cellular stress.

Intracellular glutathione level modulates the induction of apoptosis by delta 12-prostaglandin J2.

Studies on the mechanism of hepatotoxicity of 4-methylphenol (p-cresol): effects of deuterium labeling and ring substitution.

Decreased cerebral glucose utilization in rats during the ebb phase of thermal injury.

Uroporphyrin accumulation associated with cytochrome P4501A induction in fish hepatoma cells exposed to aryl hydrocarbon receptor agonists, including 2,3,7,8-tetrachlorodibenzo-p-dioxin and planar chlorobiphenyls.

Latent effects of pesticides and toxic substances on sexual differentiation of rodents.

Synergistic effect of 2,2',4,4',5,5'-hexachlorobiphenyl and 2,3,7,8-tetrachlorodibenzo-p-dioxin on hepatic porphyrin levels in the rat.

Dysfunction of polymorphonuclear leukocytes in uremia.

Promotion of endometriosis by 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats and mice: time-dose dependence and species comparison.

Protein-tyrosine kinases activate while protein-tyrosine phosphatases inhibit L-type calcium channel activity in pituitary GH3 cells.

Factors influencing the development of sigmoid colon cancer. Bacteriologic and biochemical studies.

Role of decomposition products in sodium methylthiocarbamate-induced immunotoxicity.

The involvement of cytochrome P4502E1 in 2-bromoethanol-induced hepatocyte cytotoxicity.

Synthesis of [11C-methyl]-alpha-aminoisobutyric acid (AIB).

Microcytic anemia with iron malabsorption: an inherited disorder of iron metabolism.

Enhanced arsenite-induced hepatic morphological and biochemical changes in phenobarbital-pretreated rats.

Implications for risk assessment of suggested nongenotoxic mechanisms of chemical carcinogenesis.

Prenatal hormonal therapy improves pulmonary compliance in the nitrofen-induced CDH rat model.

Glutathione transferase activity and formation of macromolecular adducts in two cases of acute methyl bromide poisoning.

Autonomic and behavioral thermoregulation in golden hamsters exposed perinatally to dioxin.

[The Anders Jahres Prize. Intracellular signal transmission via dioxin receptors].

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin, 12-O-tetradecanoylphorbol-13-acetate and 17 beta-estradiol on estrogen receptor regulation in MCF-7 human breast cancer cells.

[Involvement of sulfated proteoglycans in the control of proliferation of MCF-7 breast cancer cells].

Blood and air pollution: state of knowledge and research needs.

Energy-ubiquitin-dependent muscle proteolysis during sepsis in rats is regulated by glucocorticoids.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on humoral and cell-mediated immunity in Sprague-Dawley rats.

Increased oxidative DNA damage in livers of 2,3,7,8-tetrachlorodibenzo-p-dioxin treated intact but not ovariectomized rats.

Cytochrome P450 and its interactions with the heme biosynthetic pathway.

Inhibition of the accumulation of uremic toxins in the blood and their precursors in the feces after oral administration of Lebenin, a lactic acid bacteria preparation, to uremic patients undergoing hemodialysis.

Induction of chromosomal aberrations by 2,4-dichloro-6-aminophenol in cultured V79 cells.

Host resistance to rat cytomegalovirus (RCMV) and immune function in adult PVG rats fed herring from the contaminated Baltic Sea.

Effects of canthaxanthin, astaxanthin, lycopene and lutein on liver xenobiotic-metabolizing enzymes in the rat.

Curcumin induces apoptosis in immortalized NIH 3T3 and malignant cancer cell lines.

Effects of iron replenishment on iron, calcium, phosphorus and magnesium metabolism in iron-deficient rats.

Cancers of skin, bone, connective tissues, brain, eye, thyroid and other specified and unspecified sites in Inuit.

[Separation of methotrexate-polyglutamates by capillary electrophoresis and its application to the measurement of gamma-glutamyl hydrolase activity in human leukemia cells in culture].

Formation of 8-hydroxydeoxyguanosine in calf thymus DNA treated with tert-butylhydroquinone, a major metabolite of butylated hydroxyanisole.

Comparisons on chemically-induced mutagenicity among four bacterial strains, Salmonella typhimurium TA102 and TA2638, and Escherichia coli WP2/pKM101 and WP2 uvrA/pKM101: collaborative study I.

Nitro musk compounds genotoxic activity : Genotoxicity testing of nitro musks with the SOS-chromotest and the sister-chromatid exchange test.

Oxygen dependence of respiration in coupled and uncoupled endothelial cells.

Morbidity study of extruder personnel with potential exposure to brominated dioxins and furans. II. Results of clinical laboratory studies.

Effects of metabolic inhibitors and lectins on the menadione-dependent generation of H₂O₂ by rat thymocytes.

Changes in abundance of an abscisic acid-responsive, early cysteine-labeled metallothionein transcript during pollen embryogenesis in bread wheat (*Triticum aestivum*).

Basal metabolism of intraperitoneally injected carrier-free ⁷⁴As-labeled arsenate in rabbits.

Differences in cytochrome P450-mediated biotransformation of 1,2-dichlorobenzene by rat and man: implications for human risk assessment.

Synthesis and in vitro reactivity of 3-carbamoyl-2-phenylpropionaldehyde and 2-phenylpropenal: putative reactive metabolites of felbamate.

Regulation of gene expression of various phase I and phase II drug-metabolizing enzymes by tamoxifen in rat liver.

Stereoselective action of (R*,R*)-(+/-)-methyl-4-[2-[2-hydroxy-2-(3-chlorophenyl)ethylamino] propyl]-phenoxyacetic acid (BRL37344) on beta-adrenoceptors and metabolic chiral inversion.

Inducibility of cytochromes P-450 by dioxin in liver and extrahepatic tissues of the marmoset monkey (*Callithrix jacchus*).

Arginase, Arginine Decarboxylase, Ornithine Decarboxylase, and Polyamines in Tomato Ovaries (Changes in Unpollinated Ovaries and Parthenocarpic Fruits Induced by Auxin or Gibberellin).

[Bladder neoplasms and cyclophosphamide. Apropos of 3 cases and review of the literature].

Aldehyde dehydrogenase activity and acetate production by aerobic bacteria representing the normal flora of human large intestine.

TCDD endrin and lindane induced increases in lipid metabolites in maternal sera and amniotic fluids of pregnant C57BL/6J and DBA/2J mice.

Is the uptake of pefloxacin in human blood monocytes a simple diffusion process?

Peroxynitrite augments fMLP-stimulated chemiluminescence by neutrophils in human whole blood.

Identification and characterisation of a superoxide dismutase and catalase from *Mycobacterium ulcerans*.

Effects of tyrosine kinase inhibitors on tyrosine phosphorylations and the insulin-like effects in response to human growth hormone in isolated rat adipocytes.

Independent antioxidant action of vitamins E and C in cultured rat hepatocytes intoxicated with allyl alcohol.

Src kinase pathways in extracellular Ca²⁺-dependent pancreatic enzyme secretion.

Subchronic dispositional and toxicological effects of arsenate administered in drinking water to mice.

The Effects of Exogenous Auxins on Endogenous Indole-3-Acetic Acid Metabolism (The Implications for Carrot Somatic Embryogenesis).

Lymphocyte adhesive interactions with cultured parotid salivary gland epithelial cells from rats.

Activation of tinidazole, an antiprotozoal drug to a mutagen by mammalian liver S9.

Effect of metabolic inhibition on K⁺ channels in pyramidal cells of the hippocampal CA1 region in rat brain slices.

Anti-herpes simplex virus activity of n-docosanol correlates with intracellular metabolic conversion of the drug.

Depletion of glucose causes presynaptic inhibition of neuronal transmission in the rat dorsolateral septal nucleus.

Baculovirus-mediated expression and characterization of rat CYP2A3 and human CYP2a6: role in metabolic activation of nasal toxicants.

Metabolism of alcohol by human gastric cells: relation to first-pass metabolism.

Hormone induction of ascorbic acid transport in immature granulosa cells.

Aldehyde dismutase activity of human liver alcohol dehydrogenase.

Freeze-induced shrinkage of individual cells and cell-to-cell propagation of intracellular ice in cell chains from salivary glands.

Purification and partial characterization of an indomethacin hydrolyzing enzyme from pig liver.

Role of catalase in rat gastric mucosal ethanol metabolism in vitro.

Effects of photoreceptor metabolism on interstitial and glial cell pH in bee retina: evidence of a role for NH_4^+ .

Enumeration of human colonic bacteria producing phenolic and indolic compounds: effects of pH, carbohydrate availability and retention time on dissimilatory aromatic amino acid metabolism.

Aryl-hydrocarbon receptor-deficient mice are resistant to 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced toxicity.

Differential regulation of mouse Ah receptor gene expression in cell lines of different tissue origins.

Uptake of duck hepatitis B virus into hepatocytes occurs by endocytosis but does not require passage of the virus through an acidic intracellular compartment.

Non-, mono-, and di-o-chlorobiphenyl concentrations and their toxic equivalents to 2,3,7,8-tetrachlorodibenzo[p]dioxin in Aroclors(R) and digestive glands from American lobster (*Homarus americanus*) captured in Atlantic Canada.

Atypical cytochrome P450 induction profiles in glomerular mesangial cells at the mRNA and enzyme level. Evidence for CYP1A1 and CYP1B1 expression and their involvement in benzo[a]pyrene metabolism.

2,3,7,8-Tetrachlorodibenzo-p-dioxin affects retinol esterification in rat hepatic stellate cells and kidney.

Enhancement of intestinal transport of thyrotropin-releasing hormone via a carrier-mediated transport system by chemical modification with lauric acid.

Retro-retinoids in regulated cell growth and death.

Uncoupling effect of polyunsaturated fatty acid deficiency in isolated rat hepatocytes: effect on glycerol metabolism.

Metabolism of organochlorine pesticides: the role of human cytochrome P450 3A4.

Metabolic stress opens K⁺ channels in hepatoma cells through a Ca²⁺- and protein kinase alpha-dependent mechanism.

Dual effect of glyburide, an antagonist of KATP channels, on metabolic inhibition-induced Ca²⁺ loading in cardiomyocytes.

Effect of cystathionine and cystathionine metabolites on the phosphorylation of tyrosine residues in human neutrophils.

Pharmacological study of atypical beta-adrenoceptors in rat esophageal smooth muscle.

The reliability of the serum dioxin measurement in veterans of Operation Ranch Hand.

Protein kinase C activation inhibits stress-induced synthesis of heat shock protein 27 in osteoblast-like cells: function of arachidonic acid.

The effects of physical and chemical agents on the secretion and stability of a *Fusobacterium necrophorum* hemolysin.

Interaction with the aromatic hydrocarbon receptor, CYP1A induction, and mutagenicity of a series of diaminotoluenes: implications for their carcinogenicity.

Sodium and chloride ion-dependent transport of beta-alanine across the blood-brain barrier.

Toxicity of phenol and monochlorophenols to growth and metabolic activities of *Pseudomonas*.

Analysis of the globose basal cell compartment in rat olfactory epithelium using GBC-1, a new monoclonal antibody against globose basal cells.

Glutathione depletion in human erythrocytes and rat liver: a study on the interplay between bioactivation and inactivation functions of liver and blood.

Characterization of urinary metabolites from Sprague-Dawley rats and B6C3F1 mice exposed to [1,2,3,4-¹³C]butadiene.

The effect of the lipid peroxidation product 4-hydroxynonenal and of its metabolite 4-hydroxynonenic acid on respiration of rat kidney cortex mitochondria.

Transport pathway, maturation, and targetting of the vesicular stomatitis virus glycoprotein in skeletal muscle fibers.

Dependence on temperature of the effect of dinitrophenol on the release of transmitter quanta at neuromuscular junctions in the mouse diaphragm.

Toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in two substrains of male Long-Evans rats after intravenous injection.

Lipopolysaccharide inhibits in vitro luteinizing hormone-stimulated rat ovarian granulosa cell estradiol but not progesterone secretion.

The capability of rat colon tissue slices to metabolize the cooked-food carcinogen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine.

Oligosaccharide mapping reveals hormone-specific glycosylation patterns on equine gonadotropin alpha-subunit Asn56.

Induction of heme oxygenase-1 in LMH cells. Comparison of LMH cells to primary cultures of chick embryo liver cells.

Zonation of cytochrome P450 enzyme expression in rat liver. Isozyme-specific regulation by pituitary dependent hormones.

Protection by transfected rat or human class 3 aldehyde dehydrogenase against the cytotoxic effects of oxazaphosphorine alkylating agents in hamster V79 cell lines. Demonstration of aldophosphamide metabolism by the human cytosolic class 3 isozyme.

Mechanism of Safening Action of Dymuron and Its Two Monomethyl Analogues against Bensulfuron-methyl Injury to Rice (*Oryza sativa*).

Insecticide and Insecticide Metabolite Interactions with Cytochrome P450 Mediated Activities in Maize.

Estrogens attenuate and corticosterone exacerbates excitotoxicity, oxidative injury, and amyloid beta-peptide toxicity in hippocampal neurons.

Characterization of a sodium-dependent magnesium efflux from magnesium-loaded rat pancreatic acinar cells.

Acute ethanol administration induces oxidative changes in rat pancreatic tissue.

Comparison of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) disposition following pulmonary, oral, dermal, and parenteral exposures to rats.

The role of toxicology in the evaluation of new agrochemicals.

Movement of yeast cortical actin cytoskeleton visualized in vivo.

Functional interaction between K(ATP) channels and the Na(+)-K(+) pump in metabolically inhibited heart cells of the guinea-pig.

Modulation of Ca²⁺ channel activity by ATP metabolism and internal Mg²⁺ in guinea-pig basilar artery smooth muscle cells.

Nephrotoxic potential of 2-amino-5-chlorophenol and 4-amino-3-chlorophenol in Fischer 344 rats: comparisons with 2- and 4-chloroaniline and 2- and 4-aminophenol.

Mutagenic potential of binary and complex mixtures using different enzyme induction systems.

Amyloplast formation in cultured tobacco cells; effects of plant hormones on multiplication, size, and starch content.

PLD activation in Chinese hamster ovary (CHO) cells transfected with PGF₂ alpha receptor cDNA.

Mechanism of acetaminophen-induced hepatotoxicity: covalent binding versus oxidative stress.

Metabolites of chlorinated syringaldehydes in fish bile as biomarkers of exposure to bleached eucalypt pulp effluents.

Actions of selected hepatotoxicants on freshly isolated and cryopreserved rat hepatocytes.

Somatic embryogenesis and shoot regeneration from excised adventitious roots of the rootstock *Rosa hybrida* L. 'Moneyway'.

Mammalian plasma and tissue-bound semicarbazide-sensitive amine oxidases: biochemical, pharmacological and toxicological aspects.

Arsenic-copper interaction in the kidney of the rat: influence of arsenic metabolites.

Analytical findings in a suicide involving sodium azide.

Triphenyltin acetate toxicity: a biochemical and ultrastructural study on mouse thymocytes.

[Conformational changes of the platelet membrane glycoprotein IIb-IIIa complex stimulated by a monoclonal antibody to the N-terminal segment of glycoprotein IIIa].

Role of Cu/Zn-superoxide dismutase in xenobiotic activation. II. Biological effects resulting from the Cu/Zn-superoxide dismutase-accelerated oxidation of the benzene metabolite 1,4-hydroquinone.

Evaluation of serum lipid concentrations among U.S. workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Induction of CYP1A1 and ALDH-3 in lymphoid tissues from Fisher 344 rats exposed to 2,3,7,8-tetrachlorodibenzodioxin (TCDD).

Development of a caffeine breath test to measure cytochrome P450-1A activity in birds.

Carbohydrate induced modulation of cell membrane: II. Spin label study of fluidity changes in peripheral blood lymphocyte membrane.

Synergy between chronic corticosterone and sodium azide treatments in producing a spatial learning deficit and inhibiting cytochrome oxidase activity.

Studies on trans-cinnamaldehyde II: Mechanisms of cytotoxicity in rat isolated hepatocytes.

The MS-MS determination of the fragmentation pathways of some substituted 1,2,3-benzotriazin-4-ones with possible applications in metabolic studies.

Radiosynthesis of [123I]N-methyl-4-iododexetimide and [123I]N-methyl-4-iodolevetimide: in vitro and in vivo characterisation of binding to muscarinic receptors in the rat heart.

3,3',4,4'-tetrachloroazobenzene absorption, disposition, and metabolism in male Fischer 344 rats.

Hormonal regulation of S-adenosylmethionine synthase transcripts in pea ovaries.

Metabolic effects of inhibitors of two enzymes of the branched-chain amino acid pathway in *Salmonella typhimurium*.

The acid metabolite of ZD7114 is a partial agonist of lipolysis mediated by the rat beta 3-adrenoceptor.

Glutathionyl hydroquinone: a potent pro-oxidant and a possible toxic metabolite of benzene.

Investigation of liver binding of pentachlorophenol based upon measurement of protein adducts.

Haemoglobin adducts as biomarkers of exposure to the herbicides propanil and fluometuron.

Bald eagle mortality and chlorinated hydrocarbon contaminants in livers from British Columbia, Canada, 1989-1994.

Maintenance of the K⁺ activity gradient in insect muscle compared in diptera and lepidoptera: contributions of metabolic and exchanger mechanisms.

Metabolic inhibitors affect the conductance of low voltage-activated calcium channels in brain capillary endothelial cells.

Role of cell surface glycosaminoglycans of human T cells in human immunodeficiency virus type-1 (HIV-1) infection.

Anisoosmotic regulation of hepatic gene expression.

Metabolism of 1,2-dichloro-1-fluoroethane and 1-fluoro-1,2,2-trichloroethane: electronic factors govern the regioselectivity of cytochrome P450-dependent oxidation.

Changes in taurine as an indicator of hepatic dysfunction and biochemical perturbations. Studies in vivo and in vitro.

The effect of 2,4-dichlorophenol on lipid peroxidation in tissues of guinea pigs with different ascorbic acid intake.

Effect of verapamil on allyl alcohol hepatotoxicity.

Assessment of exposure to inorganic arsenic, a human carcinogen, due to the consumption of seafood.

Hemoglobin and DNA adduct formation in Fischer-344 rats exposed to 2,4- and 2,6-toluene diamine.

Dose-dependent kinetics and metabolism of 1,2-dichlorobenzene in rat: effect of pretreatment with phenobarbital.

Trout liver slices for metabolism and toxicity studies.

Intestinal brush border transport mechanism of 5-fluorouracil in rats.

Influence of medium components and metabolic inhibitors on glucose oxidase production by *Aspergillus niger* mycelium.

Expression of abundant mRNAs during somatic embryogenesis of white spruce [*Picea glauca* (Moench) Voss].

Potential role of the peroxidase-dependent metabolism of serotonin in lowering the polymorphonuclear leukocyte bactericidal function.

Oxidative phenotype polymorphism (P450 2D6) and metabolism of toluene.

Metabolism of [Des-Gly10,D-Trp6]LHRH ethylamide in rabbit nasal tissue.

Induction of apoptosis in NK cells by monocyte-derived reactive oxygen metabolites.

Habitual and genetic factors that affect urinary background levels of biomarkers for organic solvent exposure.

A mechanistic model of effects of dioxin on thyroid hormones in the rat.

Endogenous reactive oxygen metabolites mediate sublethal endothelial cell dysfunction during reoxygenation.

Effects of modulation of sulphation and glucuronidation on chlorpropham metabolism and cytotoxicity in isolated rat hepatocytes.

2,4-Dichlorophenoxyacetic acid influx is mediated by an active transport system in Chinese hamster ovary cells.

Thiols metabolism is altered by the herbicides paraquat, dinoseb and 2,4-D: a study in isolated hepatocytes.

Effect of glutathione depletion on metallothionein synthesis induced by paraquat in mice.

Modifications of neurofilament proteins by possible metabolites of allyl chloride in vitro.

Radical formation site of cerebral complex I and Parkinson's disease.

Inorganic pentavalent arsenic methylation by rats: effect of concentration and dichromate.

Changes in primary and secondary lymphoid organ T-cell subpopulations resulting from acute in vivo exposure to propanil.

The effects of diquat and ciprofibrate on mRNA expression and catalytic activities of hepatic xenobiotic metabolizing and antioxidant enzymes in rat liver.

The effect of p-chloroaniline on leucocytes of sheep peripheral blood under the migration-inhibition test conditions.

Lack of methylation of inorganic arsenic in the chimpanzee.

Toxic effects of carbofuran and glyphosate on semen characteristics in rabbits.

Induction of 8-hydroxy-2-deoxyguanosine and single-strand breaks in DNA of V79 cells by tetrachloro-p-hydroquinone.

The herbicide dicamba (2-methoxy-3,6-dichlorobenzoic acid) is a peroxisome proliferator in rats.

Acrolein mercapturates: synthesis, characterization, and assessment of their role in the bladder toxicity of cyclophosphamide.

Extrathyroidally mediated changes in circulating thyroid hormone concentrations in the male rat following administration of an experimental oxyacetamide (FOE 5043).

The metabolism and DNA binding of the cooked-food mutagen, 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) in precision-cut rat liver slices.

On the effects of paraquat on isolated mitochondria. Evidence that paraquat causes opening of the cyclosporin A-sensitive permeability transition pore synergistically with nitric oxide.

Deaths from pesticide poisoning in England and Wales 1990-1991.

Effect of s-triazine compounds on testosterone metabolism in the rat prostate.

Ifosfamide and mesna: effects on the Na/H exchanger activity in renal epithelial cells in culture (LLC-PK1).

The effects of subchronic chlorate exposure in Sprague-Dawley rats.

Mitochondrial bioenergetics is affected by the herbicide paraquat.

Olfactory toxicity of diethyldithiocarbamate (DDTC) and disulfiram and the protective effect of DDTC against the olfactory toxicity of dichlobenil.

Induction of hepatic drug-metabolizing enzymes by chlornitrofen (CNP) and CNP-amino in rats and mice.

Cancer induction by an organic arsenic compound, dimethylarsinic acid (cacodylic acid), in F344/DuCrj rats after pretreatment with five carcinogens.

Mutations in PMR1 suppress oxidative damage in yeast cells lacking superoxide dismutase.

Atrazine toxicity on transport properties of hemocyanin in the crab *Oziotelphusa senex senex*.

Dichlobenil in the fetal and neonatal mouse olfactory mucosa.

Mutagenicity and antimutagenicity testing of six chemicals associated with the pungent properties of specific spices as revealed by the Ames Salmonella/microsomal assay.

Rapid toxicity assessment using an in vivo enzyme test for *Brachionus plicatilis* (Rotifera).

Inhibition of rat liver low Km aldehyde dehydrogenase by thiocarbamate herbicides. Occupational implications.

[Retrospective study of the morbidity in a group occupationally exposed to chlorotriazine herbicides: preliminary results].

Wheat microsomal cytochrome P450 monooxygenases: characterization and importance in the metabolic detoxification and selectivity of wheat herbicides.

Fate and effects of acrolein.

Glyphosate herbicide poisoning: use of a routine aminoacid analyzer appears to be a rapid method for determining glyphosate and its metabolite in biological fluids.

DNA-strand breaks induced by dimethylarsinic acid, a metabolite of inorganic arsenics, are strongly enhanced by superoxide anion radicals.

The influence of glutathione and detoxifying enzymes on DNA damage induced by 2-alkenals in primary rat hepatocytes and human lymphoblastoid cells.

Atrazine treatment potentiates excretion of mutagenic urine in 2,6-dinitrotoluene-treated Fischer 344 rats.

Effects of repeated oral doses of Dikamin D (2,4-D-amine Na) on rats.

Changes in serotonin metabolism during treatment with the aldehyde dehydrogenase inhibitors disulfiram and cyanamide.

Pentachlorophenol accumulation in the freshwater mussels *Anodonta anatina* and *Pseudanodonta complanata*, and some physiological consequences of laboratory maintenance.

Dapsone-induced hemolytic anemia: role of glucose-6-phosphate dehydrogenase in the hemolytic response of rat erythrocytes to N-hydroxydapsone.

Comparative biochemical and stress analysis of genetically selected *Drosophila* strains with different longevities.

Benzoyl-coenzyme A reductase (dearomatizing), a key enzyme of anaerobic aromatic metabolism. ATP dependence of the reaction, purification and some properties of the enzyme from *Thaueria aromatica* strain K172.

A unique metabolism of inorganic arsenic in native Andean women.

The effect of protoporphyrinogen oxidase inhibitors on microsomal and mitochondrial cytochromes.

Metabolism of the herbicide chlortoluron by human cytochrome P450 3A4.

Differential induction of cytochrome P450-mediated triasulfuron metabolism by naphthalic anhydride and triasulfuron.

Gastric metabolism of ethanol in Syrian golden hamster.

Phagocytosis of fluorescent beads by rat thyroid follicular cells (FRTL-5): comparison with iodide trapping as an index of functional activity of thyrocytes in vitro.

Pseudomonas aeruginosa sodA and sodB mutants defective in manganese- and iron-cofactored superoxide dismutase activity demonstrate the importance of the iron-cofactored form in aerobic metabolism.

Evidence from ³²P-postlabeling and the use of pentachlorophenol for a novel metabolic activation pathway of diethylstilbestrol and its dimethyl ether in mouse liver: likely alpha-hydroxylation of ethyl group(s) followed by sulfate conjugation.

Time dependence of accumulation and binding of inorganic and organic arsenic species in rabbit erythrocytes.

Biological monitoring of commercial pesticide applicators for urine metabolites of the herbicide alachlor.

Further evidence that the blood/brain barrier impedes paraquat entry into the brain.

Identification of methylated metabolites of inorganic arsenic by thin-layer chromatography.

Characterization of the first enzyme in 2,4-dichlorophenoxyacetic acid metabolism.

Protective effects of prostaglandin E2 on the paraquat-induced constriction of the fetal ductus arteriosus in the rat.

Evidence for cross-pathway regulation of metabolic gene expression in plants.

Metabolism of 3,5-di-*t*-butyl-4-methylphenyl N-methylcarbamate, Terbutcarb, on isolated rat hepatocytes.

In vivo metabolism of pentachlorophenol and aniline in Arctic charr (*Salvelinus alpinus* L.) larvae.

Multiresidue method for the chromatographic determination of triazine herbicides and their metabolites in raw agricultural products.

Hydrogen peroxide degradation and glutathione peroxidase activity in cultures of thyroid cells.

Effects of 2,4-dichlorophenoxyacetic acid on polyamine transport and metabolism in *Azospirillum brasilense* Cd.

Synthesis and biological activity of derivatives of the herbicidal metabolite CL22T (phthoxazolin).

Effect of ethanol, propanol, butanol, and catalase enzyme blockers on beta-endorphin secretion from primary cultures of hypothalamic neurons: evidence for a mediatory role of acetaldehyde in ethanol stimulation of beta-endorphin release.

Sequence analysis of a gene cluster involved in metabolism of 2,4,5-trichlorophenoxyacetic acid by *Burkholderia cepacia* AC1100.

EmrE, an *Escherichia coli* 12-kDa multidrug transporter, exchanges toxic cations and H⁺ and is soluble in organic solvents.

Metabolic activation of the olfactory toxicant, dichlobenil, in rat olfactory microsomes: comparative studies with *p*-nitrophenol.

Development of a physiologically based pharmacokinetic model for 2,4-dichlorophenoxyacetic acid dosimetry in discrete areas of the rabbit brain.

Proteolysis in cultured liver epithelial cells during oxidative stress. Role of the multicatalytic proteinase complex, proteasome.

MPP⁺ selectively affects calcium homeostasis in mesencephalic cell cultures from embryonal C57/Bl6 mice.

Metabolism of herbicides by cytochrome P450 in corn.

Metabolic deactivation of the herbicide thiazopyr by animal liver esterases.

2,3,7,8-Tetrachlorodibenzo-*p*-dioxin-induced anorexia and wasting syndrome in rats: aggravation after ventromedial hypothalamic lesion.

Developmental effects of dioxins and related endocrine disrupting chemicals.

The role of the neurohormone melatonin as a buffer against macromolecular oxidative damage.

PPAR: a mediator of peroxisome proliferator action.

Isolation of leukocytes infiltrating the islets of Langerhans of diabetes-prone mice for flow cytometric analysis.

Organochlorine compounds and estrogen-related cancers in women.

Quantitative analysis of collagen and collagen subtypes I, III, and V in human pancreatic cancer, tumor-associated chronic pancreatitis, and alcoholic chronic pancreatitis.

Influence of iron-limited continuous culture on physiology and virulence of *Legionella pneumophila*.

Mycotrienins. A new class of potent inhibitors of osteoclastic bone resorption.

Influence of xenobiotics on rainbow trout liver estrogen receptor and vitellogenin gene expression.

[Comparative study on pharmacological effects of various species of *Pueraria*].

Oxidative processes in red blood cells from normal and diabetic individuals.

Photodegradation and in vitro phototoxicity of the antidiabetic drug chlorpropamide.

Immunoresponsiveness in endometriosis: implications of estrogenic toxicants.

Effects of pesticides on the ratio of 16 alpha/2-hydroxyestrone: a biologic marker of breast cancer risk.

Shedding of surface-bound antibody by adult *Dictyocaulus viviparus*.

Increased rate of adenosine triphosphate-dependent etoposide (VP-16) efflux in a murine leukemia cell line overexpressing the multidrug resistance-associated protein (MRP) gene.

Differential response of normal and HPV immortalized ectocervical epithelial cells to B[a]P.

Adaptation of Ehrlich ascites carcinoma cells to energy deprivation in vivo can be associated with heat shock protein accumulation.

Dietary exposure of mink to carp from Saginaw Bay, Michigan: 2. Hematology and liver pathology.

Bilateral idiopathic loss of peripheral vestibular function with normal hearing.

Pesticides--how research has succeeded and failed in informing policy: DDT and the link with breast cancer.

2,3,7,8-Tetrachlorodibenzo-p-dioxin sensitization of cultured human epidermal cells to carcinogenic heterocyclic amine toxicity.

Establishment of a recombinant hepatic cell line stably expressing alcohol dehydrogenase.

Inhibition of oxidative phosphorylation by palmitoyl-CoA in digitonin permeabilized fibroblasts: implications for long-chain fatty acid beta-oxidation disorders.

Distribution of microsomal epoxide hydrolase and glutathione S-transferase in the rat olfactory mucosa: relevance to distribution of lesions caused by systemically-administered olfactory toxicants.

Human hepatoma cell mutant defective in cell surface protein trafficking.

Inhibition of 4-hydroxyphenylpyruvate dioxygenase by 2-(2-nitro-4-trifluoromethylbenzoyl)-cyclohexane-1,3-dione and 2-(2-chloro-4-methanesulfonylbenzoyl)-cyclohexane-1,3-dione.

Radiosyntheses of labeled beta-pseudothymidine ([C-11]- and [H-3]methyl) and its biodistribution and metabolism in normal and tumored mice.

Hyperresponse in calcium-induced insulin release from electrically permeabilized pancreatic islets of diabetics GK rats and its defective augmentation by glucose.

Characterization of hormonogenic sites in an N-terminal, cyanogen bromide fragment of human thyroglobulin.

The mechanism of action of the two-layer cold storage method in canine pancreas preservation--protection of pancreatic microvascular endothelium.

The efficacy of erythropoietin in human immunodeficiency virus-infected end-stage renal disease patients treated by maintenance hemodialysis.

Mechanism of high K⁺ and TI⁺ uptake in cultured human glioma cells.

Alternative models for low dose-response analysis of biochemical and immunological endpoints for tetrachlorodibenzo-p-dioxin.

Functional aspects of developmental toxicity of polyhalogenated aromatic hydrocarbons in experimental animals and human infants.

Neonatal lethality associated with respiratory distress in mice lacking cytochrome P450 1A2.

Immune system impairment and hepatic fibrosis in mice lacking the dioxin-binding Ah receptor.

Subchronic dose-response study of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats.

Human macrophages acquire a hyporesponsive state of tumor necrosis factor alpha production in response to successive Mycobacterium avium serovar 4 stimulation.

Identity and pathogenesis of stomach tumors in Sprague-Dawley rats associated with the dietary administration of butachlor.

Induction of endometriosis in mice: a new model sensitive to estrogen.

Formation of 8-hydroxydeoxyguanosine in calf thymus DNA treated in vitro with phenylhydroquinone, the major metabolite of O-phenylphenol.

Enzyme induction by L-buthionine (S,R)-sulfoximine in cultured mouse hepatoma cells.

ACTH-(1-24) blocks the decompensatory phase of the haemodynamic response to acute hypovolaemia in conscious rabbits.

Activation of mesangial cells by the phosphatase inhibitor vanadate. Potential implications for diabetic nephropathy.

Correlation between toxicity and effects on intermediary metabolism in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated male C57BL/6J and DBA/2J mice.

Exposure to TCDD during development permanently alters reproductive function in male Long Evans rats and hamsters: reduced ejaculated and epididymal sperm numbers and sex accessory gland weights in offspring with normal androgenic status.

Acinar cell respiration in experimental acute pancreatitis.

Prenatal hormonal therapy improves pulmonary compliance in the nitrofen-induced CDH rat model.

[The influence of 2,4-dinitrophenol on the temperature effect of muscle contraction in experimental hyperthyroidism].

Identification of domains of poly(ADP-ribose) polymerase for protein binding and self-association.

Unaltered thyroid function in mice responding to a highly immunogenic thyrotropin receptor: implications for the establishment of a mouse model for Graves' disease.

The adverse effects of long-term cassava (*Manihot esculenta* Crantz) consumption.

[Medical and biological aspects of the dioxin problem].

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on tryptophan and glucose homeostasis in the most TCDD-susceptible and the most TCDD-resistant species, guinea pigs and hamsters.

Renal tumorigenicity of 1,1-dichloroethene in mice: the role of male-specific expression of cytochrome P450 2E1 in the renal bioactivation of 1,1-dichloroethene.

Survival after a severe iron poisoning treated with intermittent infusions of deferoxamine.

Induction of preneoplastic lesions by sodium arsenite in human fetal respiratory epithelia in organ culture.

Mechanisms of the formation and disposition of reactive metabolites that can cause acute liver injury.

Role of the lung in accumulation and metabolism of xenobiotic compounds--implications for chemically induced toxicity.

[The kinetics of rhodamine 123 efflux from cells with multiple drug resistance under the action of energy metabolism inhibitors].

The dioxin receptor and its nuclear translocator (Arnt) in the rat brain.

Plant regeneration of grapevine (*Vitis* sp.) protoplasts isolated from embryogenic tissue.

Regional brain effects of sodium azide treatment on cytochrome oxidase activity: a quantitative histochemical study.

A human health risk assessment of boron (boric acid and borax) in drinking water.

Human cytochromes P4501A1 and P4501A2: R-warfarin metabolism as a probe.

Receptor-mediated toxicity.

Interleukin-1 beta induces interstitial collagenase gene expression and protein secretion in renal mesangial cells.

Sequential activation of MAP kinase cascade by angiotensin II in opossum kidney cells.

Factors influencing the protein binding of YH-439 using an equilibrium dialysis technique. A new hepatoprotective agent.

Involvement of tyrosine kinases in the induction of cyclo-oxygenase-2 in human endothelial cells.

Lipopolysaccharide inhibits rat ovarian thecal-interstitial cell steroid secretion in vitro.

Cytochromes CYP1A1 and CYP1B1 in the rat mammary gland: cell-specific expression and regulation by polycyclic aromatic hydrocarbons and hormones.

An attempt to explain interindividual variability in 24-h urinary excretion of inorganic arsenic metabolites by C57 BL/6J mice.

Response of [Ah] battery genes to compounds that protect against menadione toxicity.

2,3,7,8-Tetrachlorodibenzo-p-dioxin blocks the physiological regulation of hepatic phosphoenolpyruvate carboxykinase activity in primary rat hepatocytes.

Dose-dependent suppression of toluene metabolism by isopropyl alcohol and methyl ethyl ketone after experimental exposure of rats.

Metabolism of phenols by *Ochromonas danica*.

Dog liver microsomal P450 enzyme-mediated toluene biotransformation.

Kinetics of plasma membrane and mitochondrial alterations in cells undergoing apoptosis.

Metabolism of 4-methylaminorex ("EU4EA") in the rat.

Perinatal exposure to polychlorinated biphenyls and dioxins through dietary intake.

Characterization of Na(+)-dependent phosphate uptake in cultured fetal rat cortical neurons.

11 beta-hydroxysteroid dehydrogenase is an exclusive 11 beta- reductase in primary cultures of rat hepatocytes: effect of physicochemical and hormonal manipulations.

Possible mechanisms for PhIP-DNA adduct formation in the mammary gland of female Sprague-Dawley rats.

Comparative assessment of metabolic enzyme levels in macrophage populations of the F344 rat.

Induction of hepatic CYP1A2 by the oral administration of caffeine to rats: lack of association with the Ah locus.

Diffusible cytotoxic metabolites contribute to the in vitro bystander effect associated with the cyclophosphamide/cytochrome P450 2B1 cancer gene therapy paradigm.

Factors influencing the protein binding of azosemide using an equilibrium dialysis technique.

Capacitative Ca²⁺ influx and a Ca²⁺-dependent nonselective cation pathway are discriminated by genistein in mouse pancreatic acinar cells.

Reproductive effects in birds exposed to pesticides and industrial chemicals.

[O-methyl-¹¹C]beta-CIT-FP, a potential radioligand for quantitation of the dopamine transporter: preparation, autoradiography, metabolite studies, and positron emission tomography examinations.

Toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) to the human thymus after implantation in SCID mice.

In utero and lactational exposure of the male rat to 2,3,7,8-tetrachlorodibenzo-p-dioxin: impaired prostate growth and development without inhibited androgen production.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces diverse retinoic acid metabolites in multiple tissues of the Sprague-Dawley rat.

Lymphocyte adhesive interactions with lacrimal gland acinar epithelial cells in primary culture.

The thymus atrophy inducing organotin compound DBTC stimulates TcR alpha beta-CD3 signalling in immature rat thymocytes.

Electrophile and antioxidant regulation of enzymes that detoxify carcinogens.

Uptake of terbutylazine and its medium polar metabolites into maize plants.

[Energy metabolism of lymphocytes during bone tissue regeneration].

Rat tail artery norepinephrine release: age and effect of mitochondrial blockade.

Cytoskeletal regulation of Caco-2 intestinal monolayer paracellular permeability.

Requirement for heparan sulphate proteoglycans to mediate basic fibroblast growth factor (FGF-2)-induced stimulation of Leydig cell steroidogenesis.

Bivascular liver perfusion in the anterograde and retrograde modes: zonation of the response to inhibitors of oxidative phosphorylation.

Dopamine-induced programmed cell death in mouse thymocytes.

Peroxisomal membrane protein PMP68 of mouse liver: cloning of a cDNA encompassing the nucleotide binding fold and epitope mapping of monoclonal antibodies to the expressed protein.

Identification of volatile metabolites from five fungal species cultivated on two media.

Xenobiotic metabolism in humans during early pregnancy: peroxidase-mediated oxidation and bioactivation of 2-aminofluorene.

Enhanced effectiveness of dimethyl-4,4'-dimethoxy-5,6,5',6'-dimethylene dioxybiphenyl-2,2'-dicarboxylate in combination with garlic oil against experimental hepatic injury in rats and mice.

Second messenger role of magnesium in pancreatic acinar cells of the rat.

Reproductive effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in female rats: ovulation, hormonal regulation, and possible mechanism(s).

Effects of gestational and lactational exposure to coplanar polychlorinated biphenyl (PCB) congeners or 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on thyroid hormone concentrations in weanling rats.

Cyclophosphamide: review of its mutagenicity for an assessment of potential germ cell risks.

Effect of stereochemistry on the oxidative metabolism of the cyclophosphamide metabolite aldophosphamide.

Levels of pollutants and their metabolites: exposures to organic substances.

Mechanism of uptake of technetium-tetrofosmin. II: Uptake into isolated adult rat heart mitochondria.

Isomer-specific analysis of polychlorinated biphenyls and 2,3,7,8-tetrachlorodibenzo-p-dioxin equivalents (TEQs) in red fox and human adipose tissue from central Italy.

Cytochromes P450 in cynomolgus monkeys mutagenically activate 2-amino-3-methylimidazo[4,5-f]quinoline (IQ) but not 2-amino-3,8-dimethylimidazo[4,5-f]quinoxaline (MeIQx).

Glutathione S-transferase 8-8 is localized in smooth muscle cells of rat aorta and is induced in an experimental model of atherosclerosis.

Temperature regulation and metabolism in rats exposed perinatally to dioxin: permanent change in regulated body temperature?

Xenoestrogens alter mammary gland differentiation and cell proliferation in the rat.

Intestinal absorption of azetirelin, a new thyrotropin-releasing hormone (TRH) analogue. II. In situ and in vitro absorption characteristics of azetirelin from the rat intestine.

Interindividual variability in the urinary excretion of inorganic arsenic metabolites by C57 BL/6J mice: possible involvement of a thiol/disulfide exchange mechanism.

An ATP-sensitive potassium conductance in rabbit arterial endothelial cells.

Rat CYP1B1: an adrenal cytochrome P450 that exhibits sex-dependent expression in livers and kidneys of TCDD-treated animals.

Growth inhibition and cell killing by N-methyl-N-nitrosourea: metabolic alterations that accompany poly(ADP-ribosyl)ation.

Relative potencies of induction of hepatic drug-metabolizing enzyme genes by individual PCB congeners.

Metabolism of halohydroquinones in *Rhodococcus chlorophenicus* PCP-1.

Kinetic characterization of a carrier-mediated transport system for L-tryptophan in human blood platelets.

Phosphorylation and inactivation of rat heart glycogen synthase by cAMP-dependent and cAMP-independent protein kinases.

Activation of ATP-dependent K⁺ channels by metabolic poisoning in adult mouse skeletal muscle: role of intracellular Mg²⁺ and pH.

Alterations in thyroid function in female Sprague-Dawley rats following chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Inhibition of viral replication by nitric oxide and its reversal by ferrous sulfate and tricarboxylic acid cycle metabolites.

Growth hormone signaling leading to CYP2C12 gene expression in rat hepatocytes involves phospholipase A2.

Subchronic effects of 2,3,7,8-TCDD or PCBs on thyroid hormone metabolism: use in risk assessment.

Inhibition of DNA synthesis in primary cultures of adult rat hepatocytes by benzo[a]pyrene and related aromatic hydrocarbons: role of Ah receptor-dependent events.

Identification of a rat adrenal cytochrome P450 active in polycyclic hydrocarbon metabolism as rat CYP1B1. Demonstration of a unique tissue-specific pattern of hormonal and aryl hydrocarbon receptor-linked regulation.

A metabolite of carcinogenic 2-acetylaminofluorene, 2-nitrosofluorene, induces redox cycling in mitochondria.

Hypoxia-mediated induction of acidic/basic fibroblast growth factor and platelet-derived growth factor in mononuclear phagocytes stimulates growth of hypoxic endothelial cells.

Potency of mixtures of polychlorinated biphenyls as inducers of dioxin receptor-regulated CYP1A activity in rat hepatocytes and H4IIE cells.

Metabolic inhibition and chloride transport in isolated toad skin.

Distribution, metabolism and excretion of pentachloroanisole in the beagle dog and miniature pig.

Drug metabolizing enzymes of mussels as bioindicators of chemical pollution.

Analysis of interactions between the corneal epithelium and liposomes: qualitative and quantitative fluorescence studies of a corneal epithelial cell line.

Biochemical effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and related compounds on the central nervous system.

Chronic UVB- and all-trans retinoic-acid-induced qualitative and quantitative changes in hairless mouse skin.

Comparative metabolism and toxicity of dichlorobenzenes in Sprague-Dawley, Fischer-344 and human liver slices.

Reaction of glutathione with the electrophilic metabolites of 1,1-dichloroethylene.

Identification of two 17-kDa rat parotid gland phosphoproteins, subjects for dephosphorylation upon beta-adrenergic stimulation, as destrin- and cofilin-like proteins.

The blood-brain barrier: In vitro methods and toxicological applications.

Evidence of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced tissue damage in fetal and placental tissues and changes in amniotic fluid lipid metabolites of pregnant CF1 mice.

Proportionate mortality study of Vietnam-era veterans of Michigan.

Phenotypic analysis of spleen, thymus, and peripheral blood cells in aged C57B1/6 mice following long-term exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Up-regulation of CYP2A5 expression by porphyrinogenic agents in mouse liver.

Effects of the herbicide chlorthiamid on the olfactory mucosa.

Close Correlation between Heat Shock Response and Cytotoxicity in *Neurospora crassa* Treated with Aliphatic Alcohols and Phenols.

Glutathione-s-transferase activity and metabolism of glutathione conjugates by rhizosphere bacteria.

Arginine Decarboxylase and Putrescine Oxidase in Ovaries of *Pisum sativum* L. (Changes during Ovary Senescence and Early Stages of Fruit Development).

Expression of xenobiotic-metabolizing enzymes in cultured rat tracheal epithelial cells.

Glibenclamide opens ATP-sensitive potassium channels in *Xenopus* oocyte follicular cells during metabolic stress.

Workshop on perinatal exposure to dioxin-like compounds. VI. Role of biomarkers.

Workshop on perinatal exposure to dioxin-like compounds. V. Immunologic effects.

Workshop on perinatal exposure to dioxin-like compounds. IV. Neurobehavioral effects.

Workshop on perinatal exposure to dioxin-like compounds. III. Endocrine effects.

Workshop on perinatal exposure to dioxin-like compounds. I. Summary.

[Morphologic characteristics of the thymus in pregnant and newborn mice exposed to sodium arsenite].

Mechanism for drug absorption from rat-liver surface membrane: effect of dose and transport inhibitors on the pharmacokinetics of phenol red.

Phosphopeptide mapping of cholecystokinin receptors on agonist-stimulated native pancreatic acinar cells.

Excitatory amino acid release from astrocytes during energy failure by reversal of sodium-dependent uptake.

cAMP-dependent protein kinase-mediated phosphorylation of cystic fibrosis transmembrane conductance regulator residue Ser-753 and its role in channel activation.

Differential toxicities of cyclophosphamide and its glutathione metabolites to A549 cells.

Dose-response relationships of tissue distribution and induction of CYP1A1 and CYP1A2 enzymatic activities following acute exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice.

Burn injury stimulates multiple proteolytic pathways in skeletal muscle, including the ubiquitin-energy-dependent pathway.

ESR evidence for the generation of reactive oxygen species from the copper-mediated oxidation of the benzene metabolite, hydroquinone: role in DNA damage.

Induction of P-450 in workers exposed to dioxin.

Effect of tea polyphenols on fecal flora and fecal metabolic products of pigs.

Interleukin-3 facilitates glucose transport in a myeloid cell line by regulating the affinity of the glucose transporter for glucose: involvement of protein phosphorylation in transporter activation.

The hepatocellular metabolism of 4-hydroxynonenal by alcohol dehydrogenase, aldehyde dehydrogenase, and glutathione S-transferase.

Substrate-specificity of mammalian tissue-bound semicarbazide-sensitive amine oxidase.

Stimulation of radial expansion in arabidopsis roots by inhibitors of actomyosin and vesicle secretion but not by various inhibitors of metabolism.

Modulation of cellular antioxidant defense activities by sodium arsenite in human fibroblasts.

Effects of benzo(a)pyrene and tetrachlorodibenzo(p)dioxin on fetal dolphin kidney cells: inhibition of proliferation and initiation of DNA damage.

Oxidative stress aspects of the cytotoxicity of carbamide peroxide: in vitro studies.

Allyl alcohol cytotoxicity in isolated rat hepatocytes: effects of azide, fasting, and fructose.

Fish oil enhances pentachlorobenzene metabolism and reduces its accumulation in rats.

Phenol and cresol metabolism in *Bacillus pumilus* isolated from contaminated groundwater.

Analysis of 4-hydroxycyclophosphamide in human blood.

Quinone methide formation from para isomers of methylphenol (cresol), ethylphenol, and isopropylphenol: relationship to toxicity.

Toxicology of methyl bromide.

Functional and metabolic evidence for two different vanilloid (VN1 and VN2) receptors in perfused rat hindlimb.

Identification of urinary metabolites of human subjects exposed to o-dichlorobenzene.

Cytoplasmic calcium level and membrane fluidity of platelets contacting poly(acrylamide-co-methacrylic acid) particles with different surface properties.

Mechanisms controlling nitric oxide synthesis in osteoblasts.

Metabolism of polychlorinated phenols by *Pseudomonas cepacia* AC1100: determination of the first two steps and specific inhibitory effect of methimazole.

Comparison of the toxicity of cinnamaldehyde when administered by microencapsulation in feed or by corn oil gavage.

Factors affecting mammary tumor incidence in chlorotriazine-treated female rats: hormonal properties, dosage, and animal strain.

Metabolism and genotoxicity of the halogenated alkyl compound tris(2,3-dibromopropyl)phosphate.

Comparative study of plant growth hormone (herbicide) toxicity in various biological subjects.

Inhibition of T3-receptor binding by Nitrofen.

Effect of sulfhydryl compounds and glutathione depletion on rat heart myocyte toxicity induced by 4-hydroperoxycyclophosphamide and acrolein in vitro.

Ifosfamide metabolite chloroacetaldehyde causes Fanconi syndrome in the perfused rat kidney.

Body size and the toxicokinetics of trifluralin in rainbow trout.

Effects of atrazine on reproductive performance in the rat.

Application of the kinetic of RNA synthesis on Hep 3B cells. Study of the medium-term cytotoxicity of atrazine.

Studies on trans-cinnamaldehyde. 1. The influence of dose size and sex on its disposition in the rat and mouse.

The Chlorella virus adenine methyltransferase gene promoter is a strong promoter in plants.

Chronic effects of atrazine on estrus and mammary tumor formation in female Sprague-Dawley and Fischer 344 rats.

Genotoxicity of 2-halosubstituted enals and 2-chloroacrylonitrile in the Ames test and the SOS-chromotest.

Role of active oxygen species in DNA damage by pentachlorophenol metabolites.

Effect of selenium deficiency and glutathione-modulating agents on diquat toxicity and lipid peroxidation in rats.

Effect of aldehyde dehydrogenase and alcohol dehydrogenase inhibitors and ethanol on blood and liver ketone bodies in the rat.

Induction of lung-specific DNA damage by metabolically methylated arsenics via the production of free radicals.

DNA damage induced in cultured human alveolar (L-132) cells by exposure to dimethylarsinic acid.

Superoxide dismutase (sod-1) null mutants of *Neurospora crassa*: oxidative stress sensitivity, spontaneous mutation rate and response to mutagens.

Studies on the mechanism of the carcinogenic activity of amitrole.

Identification and dynamics of paraquat in the bone marrow, thymus and spleen in rats using immunohistochemical techniques.

Diquat- and acetaminophen-induced alterations of biliary efflux of iron in rats.

Glufosinate ammonium--some aspects of its mode of action in mammals.

Bacterial degradation of the herbicide pendimethalin and activity evaluation of its metabolites.

Toxicity determination of plant growth hormones on aquatic alga--*Scenedesmus quadricauda*.

Potentiation of oxidant-induced toxicity in hamster lung slices by dimethylthiourea.

Acrolein genotoxicity in *Drosophila melanogaster*. III. Effects of metabolism modification.

Toxicological assessment of biotransformation products of pentachlorophenol: *Tetrahymena* population growth impairment.

Characterization of the capsaicin-sensitive component of cyclophosphamide-induced inflammation in the rat urinary bladder.

Canine exposure to herbicide-treated lawns and urinary excretion of 2,4-dichlorophenoxyacetic acid.

Effects of pentachlorophenol (PCP) on the pituitary and thyroidal hormone regulation in the rat.

Blocking of in vitro DNA replication by deoxycytidine adducts of the mutagen and clastogen 2-bromoacrolein.

Deaths from pesticide poisoning in England and Wales: 1945-1989.

Modulation of bile acids induced by paraquat in rabbits.

[Alteration of lipid peroxidation and the activity of peroxide metabolism enzymes in the liver, kidney and lung following the administration of paraquat in mice].

Metabolic alterations in hepatocytes promoted by the herbicides paraquat, dinoseb and 2,4-D.

[The enzymes of mono-oxygenase oxidation in the lymphocytes and liver of persons subjected to chlorophenoxy herbicide exposure].

Effect of Tordon 2,4-D 64/240 triethanolamine BR on the energy metabolism of rat liver mitochondria.

Direct detection of the intracellular formation of carboxyphosphamides using nuclear magnetic resonance spectroscopy.

[The role of biotransformation in assessing the toxicological risk from pesticides].

Environmental behavior of bentazon herbicide.

Paraquat poisoning. "State of the art".

Aldehyde dehydrogenase of mice inhibited by thiocarbamate herbicides.

Free radicals in the pathophysiology of pulmonary injury and disease.

Ethanol-induced reduction of the amount of stimulatory GTP-binding regulatory protein, Gs, in wild-type S49 murine lymphoma cells: effect of cycloheximide and puromycin.

Erythrocyte catalase inactivation (H₂O₂ production) by ascorbic acid and glucose in the presence of aminotriazole: role of transition metals and relevance to diabetes.

Possible antiestrogenic properties of chloro-s-triazines in rat uterus.

Short-term effects of chlorotriazines on estrus in female Sprague-Dawley and Fischer 344 rats.

Histochemical demonstration of hydrogen peroxide production by leukocytes in fixed-frozen tissue sections of inflammatory lesions.

A role for thyroid hormones in cold-induced elevation of blood pressure and cardiac hypertrophy.

The pentachlorophenol metabolite tetrachloro-p-hydroquinone induces the formation of 8-hydroxy-2-deoxyguanosine in liver DNA of male B6C3F1 mice.

Disposition and metabolism of radiolabelled pentachloroanisole in rats and rabbits.

Reduction of thyroxine uptake into cerebrospinal fluid and rat brain by hexachlorobenzene and pentachlorophenol.

Residues of glyphosate and its principle metabolite in certain cereals, oilseeds, and pulses grown in Canada, 1990-1992.

Metabolism of cycloate in radish leaf: metabolite identification by packed capillary flow fast atom bombardment tandem mass spectrometry.

Tamoxifen: evidence by ³²P-postlabeling and use of metabolic inhibitors for two distinct pathways leading to mouse hepatic DNA adduct formation and identification of 4-hydroxytamoxifen as a proximate metabolite.

Effect of in vivo desensitization to leukotriene B₄ on eosinophil infiltration in response to C₅a in guinea-pig skin.

Competitive inhibition of human liver microsomal cytochrome P450 3A-dependent steroid 6 beta-hydroxylation activity by cyclophosphamide and ifosfamide in vitro.

Ifosfamide induced depletion of glutathione in human peripheral blood lymphocytes and protection by mesna.

In vitro biotransformation of thiazopyr by rat liver microsomes: oxidative cleavage of a carboxylic methylester by monooxygenases.

Effect of the protoporphyrinogen oxidase-inhibiting herbicide fomesafen on liver uroporphyrin and heptacarboxylic porphyrin in two mouse strains.

The role of glucose in cellular defences against cytotoxicity of hydrogen peroxide in Chinese hamster ovary cells.

Reactive oxygen metabolite-induced toxicity to cultured bovine endothelial cells: status of cellular iron in mediating injury.

Metabolic chiral inversion of stiripentol in the rat. I. Mechanistic studies.

Role of iron and glutathione redox cycle in acetaminophen-induced cytotoxicity to cultured rat hepatocytes.

Evaluation of commercial immunoassays for the detection of alachlor in milk, eggs and liver.

Strong intensification of mouse hepatic tamoxifen DNA adduct formation by pretreatment with the sulfotransferase inhibitor and ubiquitous environmental pollutant pentachlorophenol.

Aldehyde reductase-catalyzed reduction of acrolein: implications in cyclophosphamide toxicity.

Metabolic fate of S,S,S-tributyl phosphorotrithioate (DEF) in the lactating goat.

Toxicity of ifosfamide, cyclophosphamide and their metabolites in renal tubular cells in culture.

The role of sulfation and/or acetylation in the metabolism of the cooked-food mutagen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine in *Salmonella typhimurium* and isolated rat hepatocytes.

Genotoxicity of the alkenylbenzenes alpha- and beta-asarone, myristicin and elimicin as determined by the UDS assay in cultured rat hepatocytes.

Effects of aldehyde dehydrogenase and glutathione on the degradation of (E)-4-hydroxy-2-nonenal and N-hexanal in rat liver.

Detoxication of base propanals and other alpha, beta-unsaturated aldehyde products of radical reactions and lipid peroxidation by human glutathione transferases.

Metabolism of cyclophosphamide by lipoxygenases.

Biologically active metabolites from fungi. 3. Sporothriolide, discosiolide, and 4-epi-ethisolide--new furofuranones from *Sporothrix* sp., *Discosia* sp., and *Pezizula livida*.

Indolo[3,2-b]carbazole: a dietary-derived factor that exhibits both antiestrogenic and estrogenic activity.

Inhibition of degranulation of polymorphonuclear leukocytes by angiogenin and its tryptic fragment.

Sepsis stimulates nonlysosomal, energy-dependent proteolysis and increases ubiquitin mRNA levels in rat skeletal muscle.

The effect of 1,2,3,4-tetrachlorodibenzo-p-dioxin on drug-metabolizing enzymes in the rat liver.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on estrogen metabolism in MCF-7 breast cancer cells: evidence for induction of a novel 17 beta-estradiol 4-hydroxylase.

Patterns of tyrosine phosphorylation differ in vascular hypertrophy and hyperplasia.

Effects of polychlorinated biphenyls (PCBs) and dioxins on growth and development.

Inhibition of mammalian protoporphyrinogen oxidase by acifluorfen.

Characterization of a triple opioid system in the human neuroblastoma NMB cell line.

Effect of arsenic exposure on alveolar macrophage function. I. Effect of soluble as(III) and as(V).

Mammalian toxicology of organophosphorus pesticides.

Alveolar epithelial composition and architecture of the late fetal pulmonary acinus: an immunocytochemical and morphometric study in a rat model of pulmonary hypoplasia and congenital diaphragmatic hernia.

Effects of dietary supplementation with lactosucrose (4G-beta-D-galactosylsucrose) on cecal flora, cecal metabolites, and performance in broiler chickens.

Lymphodepletion of the thymus cortex in rats after single oral intubation of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Mechanisms for cell damage in acute pancreatitis using isolated acinar cells].

The mechanism of dioxin toxicity: relationship to risk assessment.

Regulation of [Ah] gene battery enzymes and glutathione levels by 5,10-dihydroindeno[1,2-b]indole in mouse hepatoma cell lines.

Dose response and time course of alterations in tryptophan metabolism by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the most TCDD-susceptible and the most TCDD-resistant rat strain: relationship with TCDD lethality.

Hypothesis for mammary tumorigenesis in Sprague-Dawley rats exposed to certain triazine herbicides.

Etiological aspects of congenital diaphragmatic hernia: results of a case comparison study.

Studies of the oxidation of ethanol to acetaldehyde by oxyhemoglobin using fluorogenic high-performance liquid chromatography.

Selective closure of the vascular bed of an experimental glioma model during in situ saline perfusion.

A protective effect of glutathione-dextran macromolecular conjugates on acetaminophen-induced hepatotoxicity dependent on molecular size.

Comparative in vitro effects of sodium arsenite and sodium arsenate on neuroblastoma cells.

Time course of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced thymic atrophy in the Wistar rat.

Effect of 1,2,4-trichlorodibenzo-p-dioxin on drug-metabolizing enzymes in the rat liver.

Effect of beraprost sodium on changes in action potentials during hypoxia as compared with propranolol, diltiazem and glibenclamide in guinea-pig ventricular muscle.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the hepatic 7-ethoxyresorufin O-deethylase activity in four rodent species.

Alteration of intracellular Ca²⁺ transients in COS-7 cells transfected with the cDNA encoding skeletal-muscle ryanodine receptor carrying a mutation associated with malignant hyperthermia.

Partial demasculinization and feminization of sex behavior in male rats by in utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin is not associated with alterations in estrogen receptor binding or volumes of sexually differentiated brain nuclei.

Effects of in utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on responsiveness of the male rat reproductive system to testosterone stimulation in adulthood.

Toxic potency of 3,3',4,4',5-pentachlorobiphenyl relative to and in combination with 2,3,7,8-tetrachlorodibenzo-p-dioxin in a subchronic feeding study in the rat.

Synthesis and tissue biodistribution of [ω -¹¹C]palmitic acid. A novel PET imaging agent for cardiac fatty acid metabolism.

Activation of protein kinase C down-regulates leukotriene C₄ synthase activity and attenuates cysteinyl leukotriene production in an eosinophilic substrain of HL-60 cells.

Morbidity follow up study of BASF employees exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) after a 1953 chemical reactor incident.

Characterization of type II and type XI collagen synthesis by an immortalized rat chondrocyte cell line (IRC) having a low level of type II collagen mRNA expression.

Chloracne. Some recent issues.

Increased in vitro tumour necrosis factor- α production in iron deficiency anemia.

Effect of scavengers of active oxygen species on cell damage caused in CHO-K1 cells by phenylhydroquinone, an o-phenylphenol metabolite.

Toxic potency of 2,3,3',4,4',5-hexachlorobiphenyl relative to and in combination with 2,3,7,8-tetrachlorodibenzo-p-dioxin in a subchronic feeding study in the rat.

Postischemic inhibition of cerebral cortex pyruvate dehydrogenase.

Treatment of deeply infiltrating endometriosis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced thymic atrophy and lymphocyte stem cell alterations by mechanisms independent of the estrogen receptor.

A method for the high-level expression of a parathyroid hormone analog in *Escherichia coli*.

Dexamethasone, beta-estradiol, and 2,3,7,8-tetrachlorodibenzo-p-dioxin elicit thymic atrophy through different cellular targets.

Coxsackievirus B3 infection alters the uptake of 2,3,7,8-tetrachlorodibenzo-p-dioxin into various tissues of the mouse.

In vivo and in vitro 4-amino-2,6-dichlorophenol nephrotoxicity and hepatotoxicity in the Fischer 344 rat.

An increased percentage of long amyloid beta protein secreted by familial amyloid beta protein precursor (beta APP717) mutants.

Antiestrogenic effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on 17 beta-estradiol-induced pS2 expression.

2,3,7,8-TCDD and 2,3,7,8-TCDF in blue crabs and American lobsters from the Hudson-Raritan estuary and the New York Bight.

Reoxygenation-induced relaxation of coronary arteries. A novel endothelium-dependent mechanism.

Opening of large-conductance calcium-activated potassium channels by the substituted benzimidazolone NS004.

2,3,7,8-Tetrachlorodibenzo-p-dioxin versus 3-methylcholanthrene: comparative studies of Ah receptor binding, transformation, and induction of CYP1A1.

Characterization of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced brain serotonin metabolism in the rat.

Co-expression of human CYP1A1 and a human analog of cytochrome P450-EF in response to 2,3,7,8-tetrachloro-dibenzo-p-dioxin in the human mammary carcinoma-derived MCF-7 cells.

Functional consequences of iron supplementation in iron-deficient female cotton mill workers in Beijing, China.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-induced changes in glucose transporting activity in guinea pigs, mice, and rats in vivo and in vitro.

Induction of heat-shock protein synthesis and thermotolerance in EL-4 ascites tumor cells by transient ATP depletion after ischemic stress.

Evaluation of porphyria cutanea tarda in U.S. workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Clofazimine alters the energy metabolism and inhibits the growth rate of a human lung-cancer cell line in vitro and in vivo.

Inhibition of pro-cholecystokinin (CCK) sulfation by treatment with sodium chlorate alters its processing and decreases cellular content and secretion of CCK 8.

Testing the metabolic hypothesis of O₂ chemoreception in the cat carotid body in vitro.

Regulation of human dioxin receptor function by indolocarbazoles, receptor ligands of dietary origin.

Decreased clearance of uraemic and mildly carbamylated low-density lipoprotein.

TCDD-induced hypophagia is not explained by nausea.

alpha-Fucose-mediated binding and degradation of tissue-type plasminogen activator by HepG2 cells.

High passage T47D human breast cancer cells: altered endocrine and 2,3,7,8-tetrachlorodibenzo-p-dioxin responsiveness.

Modulating effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on skin carcinogenesis initiated by the weak inducer 7,12-dimethylbenz(a)anthracene.

Difference in energy metabolism between fresh and warm ischemic canine pancreases during preservation by the two-layer method.

The use of 5-hydroxytryptophol as an alcohol intake marker.

Transforming growth factor-beta 1 inhibits TCDD-induced cytochrome P450IA1 expression in human lung cancer A549 cells.

Polychlorinated biphenyls (PCBs): environmental impact, biochemical and toxic responses, and implications for risk assessment.

Age- and feeding-dependent production of carbonyl compounds in hypoxic heart. The role of carbonyls produced in connective tissue modification.

Porphyrin studies in TCDD-exposed workers.

Evidence for the role of the Ah receptor in response to dioxin.

Rat fibrosarcoma as a source of stable co-polymer of type I and type III collagens.

Thyroid hormones and regulation of cell reliability systems.

[A comparative study of the effectiveness of iron preparations in the treatment of iron deficiency anemias in pregnant women].

Alternate immune system targets for TCDD: lymphocyte stem cells and extrathymic T-cell development.

The intrathymic target cell for the thymotoxic action of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The hr locus and the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in newborn mice.

Relationship between acute toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and disturbance of intermediary metabolism in the Long-Evans rat.

Mechanisms of chemical injury of thyroid gland.

Tyrosine kinases regulate the cytoskeletal attachment of integrin alpha IIb beta 3 (platelet glycoprotein IIb/IIIa) and the cellular retraction of fibrin polymers.

Effects of vitamin C and PCB metabolites on the inhibition of aryl hydrocarbon hydroxylase and suppression of mutagenicity of benzo[a]pyrene.

NTP Toxicology and Carcinogenesis Studies of 4,4'-Thiobis(6- t -butyl- m -cresol) (CAS No. 96-69-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Altered impulse activity modifies synaptic physiology and mitochondria in crayfish phasic motor neurons.

Distribution of urinary hippuric acid concentrations by ALDH2 genotype.

Application of magnetic sector thermal ionization mass spectrometry to studies of erythrocyte iron incorporation in small children.

Effect of metabolic inhibitors on K⁺ transport across the lamprey (*Lampetra fluviatilis*) erythrocyte membrane.

Retroviral lineage studies of the rat olfactory epithelium.

Lipid peroxidation and chemiluminescence during naproxen metabolism in rat liver microsomes.

Endothelin-1 stimulates cytosolic phospholipase A2 activity and gene expression in rat glomerular mesangial cells.

Plant biochemistry of xenobiotics: isolation and characterization of a soybean O-glucosyltransferase of DDT metabolism.

Interactions of human blood plasma with hydrogen peroxide and hypochlorous acid.

Purification and characterization of a cytosolic thyroid-hormone-binding protein (CTBP) in *Xenopus* liver.

Induction in vitro of 72-kD heat shock protein in a continuous culture of rat thyroid cells, FRTL5.

Identification of hepatocytes as the major locus of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced CYP1-related P450s, TCDDA and TCDDAHH, in chick embryo liver.

Putative rat sperm lipid-binding protein: isolation and partial characterization.

Holoprotein formation of human chorionic gonadotropin: differential trace labeling with acetic anhydride.

Laboratory results for selected target organs in 138 individuals occupationally exposed to TCDD.

Characterisation of oxidative injury to an intestinal cell line (HT-29) by hydrogen peroxide.

Identification of a biochemical lesion, and characteristic response to lipopolysaccharide (LPS) of a cultured macrophage-like cell mutant with defective LPS-binding.

Identification of a meta-cleavage pathway for metabolism of phenoxyacetic acid and phenol in *Pseudomonas cepacia* AC1100.

Comparative mutagenicity of chemicals selected for test in the International Program on Chemical Safety's collaborative study on plant systems for the detection of environmental mutagens.

Cytoplasmic Acidification and Secondary Metabolite Production in Different Plant Cell Suspensions (A Comparative Study).

Synthesis of n.c.a. carbon-11 labelled clozapine and its major metabolite clozapine-N-oxide and comparison of their biodistribution in mice.

[Mutagenic activity of copper phenoxyacetate complexes].

Comparative metabolism and elimination of acetanilide compounds by rat.

Vapor phase exposure to acetaldehyde generated from ethanol inhibits bovine bronchial epithelial cell ciliary motility.

Model of bicarbonate secretion by resting frog stomach fundus mucosa. I. Transepithelial measurements.

Effects of induction and age-dependent enzyme expression on lung bioavailability, metabolism, and DNA binding of urban air particulate-absorbed benzo[a]pyrene, 2-nitrofluorene, and 3-amino-1,4-dimethyl-5H-pyridol-(4,3)-indole.

Erythrocyte antioxidant enzyme activity in CMF treated breast cancer patients.

Cloning of a cDNA encoding an ectoenzyme that degrades thyrotropin-releasing hormone.

Iron-induced fluorescence in the retina: dependence on vitamin A.

Intestinal uptake of uridine in suckling rats: mechanism and ontogeny.

Review of the safety assessment of polychlorinated biphenyls (PCBs) with particular reference to reproductive toxicity.

[The effect of metabolic inhibitors on resistance of mannose-specific contacts of Escherichia coli K12 and human neutrophils].

Evidence of two mechanisms of prostaglandin release in an in vitro model of muscle damage. Possible therapeutic implications.

Astrocytes implicated in the energizing of intermediate memory processes in neonate chicks.

Effect of AT-125 on the metabolism of propachlor and the glutathione conjugates of propachlor and bromobenzene in rat.

The low molecular weight protein which co-purifies with alpha-latrotoxin is structurally related to crustacean hyperglycemic hormones.

Effects of retinoic acid on the 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced differentiation of in vitro cultured human keratinocytes.

Mechanism of cholinergic stimulation of glucose oxidation in isolated gastric glands.

Crocidolite-induced reactive oxygen metabolites generation from human polymorphonuclear leukocytes.

Effect of glutathione depletion and inhibition of glucuronidation and sulfation on 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) metabolism, PhIP-DNA adduct formation and unscheduled DNA synthesis in primary rat hepatocytes.

Pathological findings in rabbits and sheep following the subacute administration of triphenyltin acetate.

Variations in concentrations of bacterial metabolites, enzyme activities, moisture, pH and bacterial composition between and within individuals in faeces of seven healthy adults.

Suspected paediatric pesticide poisoning in the UK. I--Home Accident Surveillance System 1982-1988.

Glutathione depletion induced in rat liver fractions by seven pesticides.

An inhibitory factor in rat thymus which interferes with binding of cytosol Ah receptor to xenobiotic responsive element.

[Energy-dependent Ca²⁺-transport in intracellular smooth muscle structures].

Dithio-bis-mercaptoethanesulphonate (DIMESNA) does not prevent cellular damage by metabolites of ifosfamide and cyclophosphamide in LLC-PK1 cells.

A volume-activated taurine channel in skate hepatocytes: membrane polarity and role of intracellular ATP.

Effects of calcium channel antagonists on the release of prostaglandin E₂ from metabolically stressed muscle.

Human growth hormone increases cytosolic free calcium in cultured human IM-9 lymphocytes: a novel mechanism of growth hormone transmembrane signalling.

The aromatic hydrocarbon receptor, dioxin action, and endocrine homeostasis.

Interactions between cellular respiration and thermoregulation in the paramecium.

Role of EDRFs in the control of arteriolar diameter during increased metabolism of striated muscle.

A pharmacodynamically responsive model of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) transfer between liver and fat at low and high doses.

Assessment of exposure to inorganic arsenic following ingestion of marine organisms by volunteers.

Glycolysis vs. respiration as ATP source for the shape of quiescent cardiomyocytes.

Blastocoel cavity formation by preimplantation rat embryos in the presence of cyanide and other inhibitors of oxidative phosphorylation.

Induction of tamoxifen-4-hydroxylation by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), beta-naphthoflavone (beta NF), and phenobarbital (PB) in avian liver: identification of P450 TCDDA as catalyst of 4-hydroxylation induced by TCDD and beta NF.

Interleukin-6 attenuates agonist-mediated calcium mobilization in murine osteoblastic cells.

Rapid desensitization of adrenaline- and neuropeptide Y-stimulated Ca²⁺ mobilization in HEL-cells.

Oxidative stress-induced apoptosis prevented by Trolox.

The influence of cryopreservation on parameters of energetic metabolism and motility of fowl spermatozoa.

Metabolic characteristics of alpha-toxin-permeabilized smooth muscle.

Acetaldehyde exposure causes growth inhibition in a Chinese hamster ovary cell line that expresses alcohol dehydrogenase.

Mouse cytochrome P-450EF, representative of a new 1B subfamily of cytochrome P-450s. Cloning, sequence determination, and tissue expression.

Inhibition of energy metabolism alters the processing of amyloid precursor protein and induces a potentially amyloidogenic derivative.

A Metabolic Control Analysis of the Glutamine Synthetase/Glutamate Synthase Cycle in Isolated Barley (*Hordeum vulgare* L.) Chloroplasts.

The Metabolites of the Herbicide L-Phosphinothricin (Glufosinate) (Identification, Stability, and Mobility in Transgenic, Herbicide-Resistant, and Untransformed Plants).

The anti-tumour activity of ifosfamide on heterotransplanted testicular cancer cell lines remains unaltered by the uroprotector mesna.

Mechanisms of impaired hepatic fatty acid metabolism in rats with long-term bile duct ligation.

Acid-sensitive mutants of *Salmonella typhimurium* identified through a dinitrophenol lethal screening strategy.

Measurement of hemoglobin and albumin adducts of tetrachlorobenzoquinone.

Comparative oxidation of 2-propyn-1-ol with other low molecular weight unsaturated and saturated primary alcohols by bovine liver catalase in vitro.

Hepatic uptake and metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,7,8-tetrachlorodibenzofuran.

Blockade of ovulation in the rat by the fungicide sodium N-methyldithiocarbamate: relationship between effects on the luteinizing hormone surge and alterations in hypothalamic catecholamines.

Structure-activity studies in *E. coli* strains on ochratoxin A (OTA) and its analogues implicate a genotoxic free radical and a cytotoxic thiol derivative as reactive metabolites.

Role of P-selectin and leukocyte activation in polymorphonuclear cell adhesion to surface adherent activated platelets under physiologic shear conditions (an injury vessel wall model).

Studies on the mechanism of intestinal passage of the food comutagen harman, in the rabbit.

Fungal metabolites. X. The effect of peptide antibiotics, trichosporin-Bs, on the respiratory activity of mitochondria.

Enzymatic reduction of xenobiotic alpha,beta-unsaturated ketones: formation of allyl alcohol metabolites from shogaol and dehydroparadol.

[Synthesis, function, and evolutionary origin of secondary metabolites produced by micro-organisms].

High oligomycin concentrations augment 6-keto-PGF1 alpha production in ventricular cardiomyocytes.

Astrocytic glycogenolysis energizes memory processes in neonate chicks.

The relationship between proteoglycan synthesis in Swarm chondrocytes and pathways of cellular energy and UDP-sugar metabolism.

Glucocorticoid receptors in ATP-depleted cells. Dephosphorylation, loss of hormone binding, HSP90 dissociation, and ATP-dependent cycling.

Cresol isomers: comparison of toxic potency in rat liver slices.

Consequences of 3-methylcholanthrene-type induction for the metabolism of 4-aminobiphenyl in isolated rat hepatocytes.

Effect of metabolic alterations on the accumulation of technetium-99m-labeled d,l-HMPAO in slices of rat cerebral cortex.

Constituents of euphorbiaceae 12. Comm. (1). Isolation and structure elucidation of four new cerebrosides from *Euphorbia biglandulosa* Desf.

Investigation of dirithromycin and erythromyclamine uptake by human neutrophils in vitro.

Polychlorinated biphenyls as hormonally active structural analogues.

Serum modulation of the effects of TCDD on the in vitro antibody response and on enzyme induction in primary hepatocytes.

Binding of native and [homoserine lactone-52]-52,53-seco-bovine basic pancreatic trypsin inhibitor (Kunitz inhibitor) to porcine pancreatic beta-kallikrein-B and bovine alpha-chymotrypsin: thermodynamic study.

Purification and characterization of bothrombin, a fibrinogen-clotting serine protease from the venom of *Bothrops jararaca*.

Purification and biochemical characterization of two major cytochrome P-450 isoforms induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in chick embryo liver.

Lipid peroxidation in the adrenal glands of male rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

2,3,7,8-Tetrachlorodibenzo-p-dioxin inhibits differentiation of normal diploid rat osteoblasts in vitro.

In vitro and in vivo transport of zidovudine (AZT) across the blood-brain barrier and the effect of transport inhibitors.

Comparison of the urinary metabolite profiles of hexachlorobenzene and pentachlorobenzene in the rat.

Metabolism of 4-chlorophenol by *Azotobacter* sp. GP1: structure of the meta cleavage product of 4-chlorocatechol.

The thymus does not mediate 2,3,7,8-tetrachlorodibenzo-p-dioxin-elicited alterations in bone marrow lymphocyte stem cells.

Total serum testosterone and gonadotropins in workers exposed to dioxin.

Concentrations of urinary metabolites in workers exposed to monochlorobenzene and variation in the concentration during a workshift.

Toxicity of bile acids on the electron transport chain of isolated rat liver mitochondria.

Dithiothreitol reversal of allyl alcohol cytotoxicity in isolated rat hepatocytes.

Hepatic Phosphoglucomutase Activity as a Marker of Oxidative Stress Induced by Pro-oxidative Drugs.

Plant regeneration from cultured immature inflorescences of coconut (*Cocos nucifera* L.): evidence for somatic embryogenesis.

NTP Toxicology and Carcinogenesis Studies of o-Benzyl-p-Chlorophenol (CAS No. 120-32-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Inhibition of metabolism abolishes transient outward current in rabbit atrial myocytes.

Mechanism of riboflavine uptake by Caco-2 human intestinal epithelial cells.

Cyclophosphamide-induced lung toxicity: mechanism of endothelial cell injury.

Lipid peroxidation and oxidative stress during acute allylamine-induced cardiovascular toxicity.

A physiologically based mathematical model of dermal absorption in man.

Obesity decreases hepatic glutathione concentrations and markedly potentiates allyl alcohol-induced periportal necrosis in the overfed rat.

Dose-dependent disposition of sodium arsenate in mice following acute oral exposure.

Self-mobilization and organization of the genes encoding the toluene metabolic pathway of *Pseudomonas mendocina* KR1.

Aryl hydrocarbon or dioxin receptor: biologic and toxic responses.

Metabolism of dichloromethane (methylene chloride) to formaldehyde in human erythrocytes: influence of polymorphism of glutathione transferase theta (GST T1-1).

Properties of mammalian tissue-bound semicarbazide-sensitive amine oxidase: possible clues to its physiological function?

Dioxin-enhanced expression of interleukin-1 beta in human epidermal keratinocytes: potential role in the modulation of immune and inflammatory responses.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-mediated gene expression in the immature rat thymus.

Metabolism of homocetogens.

Effect of a mixture of 15 commonly used pesticides on DNA levels of 8-hydroxy-2-deoxyguanosine and xenobiotic metabolizing enzymes in rat liver.

Lack of alachlor induced DNA damage as assayed in rodent liver by the alkaline elution test.

Isolation of cDNA of an auxin-regulated gene encoding a G protein beta subunit-like protein from tobacco BY-2 cells.

Effects of 2-[1-(ethoxyimino)propyl]-3-hydroxy-5-(2,4,6-trimethylphenyl) cyclohex-2-enone on hepatic haem biosynthesis: species differences in hepatic porphyria.

Human pentachlorophenol poisoning.

The interaction of 2,4-dichlorophenoxyacetic acid, ribosomes and polyamines in *Azospirillum brasilense*.

Aminoguanidine: a drug proposed for prophylaxis in diabetes inhibits catalase and generates hydrogen peroxide in vitro.

Neonatal exposure to paraquat or MPTP induces permanent changes in striatum dopamine and behavior in adult mice.

Groundwater pesticides: interactive effects of low concentrations of carbamates aldicarb and methomyl and the triazine metribuzin on thyroxine and somatotropin levels in white rats.

Distribution and elimination of the herbicide propanil in the channel catfish (*Ictalurus punctatus*).

Toxicokinetics and biotransformation of pentachlorophenol in the topsmelt (*Atherinops affinis*).

Induction of hepatic drug metabolizing enzymes and interaction with carbon tetrachloride in rats after a single oral exposure to atrazine.

Effects of 2,4-dichlorophenoxyacetic acid butyl ester on chick liver.

Differential induction of distinct glutathione-S-transferases of wheat by xenobiotics and by pathogen attack.

Interaction of structurally similar pesticides with organic anion transport by primary cultures of winter flounder renal proximal tubule.

Olfactory cytochrome P-450 immunoreactivity in mice is altered by dichlobenil but preserved by metyrapone.

Effect of in vitro exposure to acrolein on carbachol responses in rat trachealis muscle.

[The combination effects of quercetin with the herbicides atrazine, cyanazine and gesamprim in mutagenicity tests].

Effects of carbon tetrachloride, menadione, and paraquat on the urinary excretion of malondialdehyde, formaldehyde, acetaldehyde, and acetone in rats.

Immunohistochemical localization of paraquat in skin and eye of rat.

Pentachlorophenol carcinogenicity: extrapolation of risk from mice to humans.

Effects on thyroid hormone metabolism and depletion of lung vitamin A in rats by airborne particulate matter.

Haemotoxic effect of phenylurea herbicides in rats: role of haemoglobin-adduct formation in splenic toxicity.

Crosslink formation between DNA and nuclear proteins by in vivo and in vitro exposure of cells to dimethylarsinic acid.

Gene damage induced in human alveolar type II (L-132) cells by exposure to dimethylarsinic acid.

Toxicological assessment of biodegraded pentachlorophenol: Microtox and fish embryos.

Effect of diphenyl ether herbicides and oxadiazon on porphyrin biosynthesis in mouse liver, rat primary hepatocyte culture and HepG2 cells.

Atrazine in plasma and tissue following atrazine-aminotriazole-ethylene glycol-formaldehyde poisoning.

Kinetics of toxic doses of paraquat and the effects of hemoperfusion in the dog.

In vitro effects of N-nitrosoatrazine on chromosome breakage.

Application of microencapsulation for toxicology studies. III. Bioavailability of microencapsulated cinnamaldehyde.

High-dose chemotherapy-induced platelet defect: inhibition of platelet signal transduction pathways.

Metabolism of xenobiotics in the nasal olfactory mucosa: implications for local toxicity.

Reproductive risks from contaminants in drinking water.

Environmental fate and effects of dicamba: a Canadian perspective.

Morphological pattern of the hypothalamo-neurohypophyseal system in acute intoxication with 2,4-dichlorophenoxyacetic acid [2,4-D].

Production of transgenic mice expressing the Ki-ras oncogene under the control of a thyroglobulin promoter.

Hexachlorobenzene-induced hypothyroidism. Involvement of different mechanisms by parent compound and metabolite.

Zonal distribution of protein-acetaldehyde adducts in the liver of rats fed alcohol for long periods.

Paraquat-induced lung injury: prevention by vasoactive intestinal peptide and related peptide helodermin.

The analysis of ifosfamide and its metabolites (review).

Hyperbaric oxygen treatment for experimental cyclophosphamide-induced hemorrhagic cystitis.

The mechanisms by which mild respiratory chain inhibitors inhibit hepatic gluconeogenesis.

Investigation of a mechanism for Leydig cell tumorigenesis by linuron in rats.

Ethanol-induced inhibition of ventricular protein synthesis in vivo and the possible role of acetaldehyde.

Lung growth and maturation in the rat model of experimentally induced congenital diaphragmatic hernia.

Effect of indomethacin, aspirin, nordihydroguaiaretic acid, and piperonyl butoxide on cyclophosphamide-induced bladder damage.

Hydrogen peroxide production by monoamine oxidase during ischemia-reperfusion in the rat brain.

[The effect of bentazone, an herbicide produced in Czechoslovakia, on the invasiveness of intestinal nematodes in sheep].

Detection of paraquat-induced in vivo lipid peroxidation by gas chromatography/mass spectrometry and high-pressure liquid chromatography.

Effect of ifosfamide metabolites on sodium-dependent phosphate transport in a model of proximal tubular cells (LLC-PK1) in culture.

Microbial metabolism of fluazifop-butyl.

Toxicokinetics and metabolism of linuron in rabbit: in vivo and in vitro studies.

Metabolism of N-[4-chloro-2-fluoro-5-[(1-methyl-2-propynyl)oxy]phenyl]-3,4,5,6-tetrahydrophthalimide (S-23121) in the rat. II. Absorption, disposition, excretion and biotransformation.

A comparative study of effects of atrazine on xenobiotic metabolizing enzymes in fish and insect, and of the in vitro phase II atrazine metabolism in some fish, insects, mammals and one plant species.

Methoxyacetaldehyde, an intermediate metabolite of 2-methoxyethanol, is immunosuppressive in the rat.

Absorption and metabolism of 2-chloro-2,6-diethyl-N-(butoxymethyl)acetanilide (butachlor) in human skin in vitro.

Roles of different forms of cytochrome P450 in the activation of the promutagen 6-aminochrysene to genotoxic metabolites in human liver microsomes.

[N-demethylation and denitrosation activity of the rat liver, thymus lymphocytes and spleen after exposure to simazine and sodium nitrite].

Inhibition of rat hepatic mitochondrial aldehyde dehydrogenase isozymes by repeated cyanamide administration: pharmacokinetic-pharmacodynamic relationships.

Cyclophosphamide modulates rat hepatic cytochrome P450 2C11 and steroid 5 alpha-reductase activity and messenger RNA levels through the combined action of acrolein and phosphoramidate mustard.

Metabolism of the herbicide atrazine by *Rhodococcus* strains.

Metabolism of N-[4-chloro-2-fluoro-5-[(1-methyl-2-propynyl)oxy]phenyl]-3,4,5,6-tetrahydrophthalimide (S-23121) in the rat: I. Identification of a new, sulphonic acid type of conjugate.

Differential sensitivity of lipid metabolism in monocotyledons to grass-specific herbicides.

Tissue distribution and excretion of ¹⁴C-labelled cinnamic aldehyde following single and multiple oral administration in male Fischer 344 rats.

PGI₂ production and angiotensin converting enzyme activity in cultured porcine pulmonary artery endothelial cells treated with paraquat.

Ethanol metabolism in isolated hepatocytes. Effects of methylene blue, cyanamide and penicillamine on the redox state of the bound coenzyme and on the substrate exchange at alcohol dehydrogenase.

Human studies do not support the methylation threshold hypothesis for the toxicity of inorganic arsenic.

Metabolic activation of tris(2,3-dibromopropyl)phosphate to reactive intermediates. I. Covalent binding and reactive metabolite formation in vitro.

Degradation of dacthal and its metabolites in soil.

Electron spin resonance spin-trapping investigation into the effects of paraquat and desferrioxamine on hydroxyl radical generation during acute iron poisoning.

[In vitro studies of the metabolism of paraquat and diquat using rat liver homogenates--isolation and identification of the metabolites of paraquat and diquat].

Molecular mechanisms of dibromoalkane cytotoxicity in isolated rat hepatocytes.

In vitro percutaneous absorption and metabolism in man of 2-chloro-4-ethylamino-6-isopropylamine-s-triazine (atrazine).

Fate of fluzifop butyl in rat and human skin in vitro.

Determination of atrazine metabolites in human urine: development of a biomarker of exposure.

Metabolism of 2-chloro-4-methylphenoxyacetate by *Alcaligenes eutrophus* JMP 134.

Evidence for peroxidase-mediated metabolism of cyclophosphamide.

Evidence for predominantly paracellular transport of thyrotropin-releasing hormone across CACO-2 cell monolayers.

Characterization of amyloid fibril beta-peptide in familial Alzheimer's disease with APP717 mutations.

Kinetics and cellular localisation of putrescine uptake in human lung tissue.

The effect of 2,4-dinitrophenol on the metabolic rate of bobwhite quail.

Cancer in a young population in a dioxin-contaminated area.

In vitro phototoxicity of clofibrate. Photochemical and photohemolytic studies on its metabolite clofibric acid.

Effects of pre- and postnatal exposure to chlorinated dioxins and furans on human neonatal thyroid hormone concentrations.

2,4,6-Trichlorophenol (TCP) induces chromosome breakage and aneuploidy in vitro.

Medical hypothesis: xenoestrogens as preventable causes of breast cancer.

[Iron deficiency anemia is not always simple].

Chicken ovalbumin upstream promoter transcription factor (COUP-TF) binds to a peroxisome proliferator-responsive element and antagonizes peroxisome proliferator-mediated signaling.

Resistance to aflatoxin B1 is associated with the expression of a novel aldo-keto reductase which has catalytic activity towards a cytotoxic aldehyde-containing metabolite of the toxin.

Gastric vagus mediates immobilization-induced hypocalcemia in rats.

Inhibition of ret tyrosine kinase activity by herbimycin A.

Angiosarcoma, porphyria cutanea tarda, and probable chloracne in a worker exposed to waste oil contaminated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Thyroxine binding in a TTR Met 119 kindred.

Carcinoembryonic antigen mediates in vitro cell aggregation induced by interferon-gamma in a human colon cancer cell line: requirement for active metabolism and intact cytoskeleton.

Exposure to 2,3,7,8-tetrachlorodibenzo-para-dioxin leads to defective dentin formation and pulpal perforation in rat incisor tooth.

Inactivation of alpha 1-antitrypsin by aqueous coal solutions: possible relation to the emphysema of coal workers.

Transport of (2-chloroethyl)-3-sarcosinamide-1-nitrosourea in the human glioma cell line SK-MG-1 is mediated by an epinephrine-sensitive carrier system.

Correlation of in vitro and in vivo growth suppression of MCF-7 human breast cancer by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Metabolites of sodium selenite and methylated selenium compounds administered at cancer chemoprevention levels in the rat.

Role of the Ah receptor and the dioxin-inducible [Ah] gene battery in toxicity, cancer, and signal transduction.

Herbimycin A, a pp60c-src tyrosine kinase inhibitor, inhibits osteoclastic bone resorption in vitro and hypercalcemia in vivo.

NAD(P)H:quinone oxidoreductase1 (DT-diaphorase) expression in normal and tumor tissues.

Effects of substrate and inhibition of oxidative metabolism on contraction and myosin phosphorylation in ASM.

Renal and hepatic toxicity of monochloroacetanilides in the Fischer 344 rat.

Growth factors prevent mitochondrial dysfunction, loss of calcium homeostasis, and cell injury, but not ATP depletion in hippocampal neurons deprived of glucose.

Toxicological evaluation of mixtures of ten widely used pesticides.

Comparative potencies of Aroclors 1232, 1242, 1248, 1254, and 1260 in male Wistar rats--assessment of the toxic equivalency factor (TEF) approach for polychlorinated biphenyls (PCBs).

Aortic collagen alterations in human diabetes mellitus. Changes in basement membrane collagen content and in the susceptibility of total collagen to cyanogen bromide solubilisation.

Receptor mechanisms and dose-response models for the effects of dioxins.

Combined oestrogen-progestin treatment of vaginal haemorrhage following gonadotrophin-releasing hormone agonist therapy of uterine myomas.

Angiotensin converting enzyme inhibitor, captopril, inhibits cardiac hypertrophy without changing collagen types and concentration in spontaneously hypertensive rats.

The role of oxidative metabolism in hexachlorobenzene-induced porphyria and thyroid hormone homeostasis: a comparison with pentachlorobenzene in a 13-week feeding study.

Effect of a single lethal dose of TCDD on the levels of monoamines, their metabolites and tryptophan in discrete brain nuclei and peripheral tissues of Long-Evans rats.

Desensitization of beta-1 and beta-2, but not beta-3, adrenoceptor-mediated lipolytic responses of adipocytes after long-term norepinephrine infusion.

Enhanced phosphorylation of a 65 kDa protein is associated with rapid induction of stress proteins in 9L rat brain tumor cells.

Interaction of 2,3,7,8-tetrachlorodibenzo-p-dioxin, 12-O-tetradecanoylphorbol-13-acetate (TPA) and 17 beta-estradiol in MCF-7 human breast cancer cells.

Important aspects of the evidence for TCDD carcinogenicity in man.

Effects of restricted feeding on the absorption, metabolism, and accumulation of pentachlorobenzene in rats.

Mechanisms of adaptation of glucose transporters to changes in the oxidative chain of muscle and fat cells.

Effects of cycloheximide on the induction of CYP1A1 gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in three human breast cancer cell lines.

Effect of thyrotropin-releasing hormone on pentobarbitone-induced sleep in rats: continuous treatment with a sustained release injectable formulation.

Metabolism of iron from (3,5,5-trimethylhexanoyl)ferrocene in rats. A dietary model for severe iron overload.

Effect of external cation concentration and metabolic inhibitors on membrane potential of human glial cells.

Activation of tumoricidal properties in macrophages by lipopolysaccharide requires protein-tyrosine kinase activity.

In vitro cytotoxic and cell transforming activities exerted by the pesticides cyanazine, dithianon, diflubenzuron, procymidone, and vinclozolin on BALB/c 3T3 cells.

Effect of caloric restriction on the induction of hepatic cytochrome P-450 and Ah receptor binding in C57BL/6N and DBA/2J mice.

³¹P and ¹³C NMR spectroscopic study of wild type and multidrug resistant Ehrlich ascites tumor cells.

Mechanisms of carcinogenicity of methyl halides.

Prenatal risks deriving from environmental chemicals.

[Cytochromes P450: toxicologic importance of determination of levels].

Isolation and Characterization of a Novel Atrazine Metabolite Produced by the Fungus *Pleurotus pulmonarius*, 2-Chloro-4-Ethylamino-6-(1-Hydroxyisopropyl)Amino-1,3,5-Triazine.

Metabolic inhibition enhances Ca²⁺-activated K⁺ current in smooth muscle cells of rabbit portal vein.

Glucocorticoid receptor conversion to high affinity nuclear binding and transcription enhancement activity in Chinese hamster ovary cells subjected to heat and chemical stress.

Liver accumulation of 2,3,7,8-tetrachloro-[3H]dibenzofuran in mice: modulation by treatments with polychlorinated biphenyls.

2,3,7,8-tetrachlorodibenzo-p-dioxin increases cardiac myocyte intracellular calcium and progressively impairs ventricular contractile responses to isoproterenol and to calcium in chick embryo hearts.

Transport mechanism of 3-hydroxy-3-methylglutaryl coenzyme A reductase inhibitors at the blood-brain barrier.

The penetration of 2,3,7,8-tetrachlorodibenzo-p-dioxin into viable and non-viable porcine skin in vitro.

Glucuronidation of thyroid hormone in rat liver: effects of in vivo treatment with microsomal enzyme inducers and in vitro assay conditions.

Relationship of oxypurine release to contractile failure in dinitrophenol-treated rat skeletal muscle.

TCDD alters pituitary-adrenal function. II: Evidence for decreased bioactivity of ACTH.

TCDD alters pituitary-adrenal function. I: Adrenal responsiveness to exogenous ACTH.

Tissue distribution and toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats after intravenous injection.

Effect of dose, time, and pretreatment on the biliary excretion and tissue distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on protein kinase C and inositol phosphate metabolism in primary cultures of rat hepatocytes.

Cytochrome P4501A1 mediates the metabolism of 2,3,7,8-tetrachlorodibenzofuran in the rat and human.

Angiotensin II-mediated facilitation of sympathetic neurotransmission in the spontaneously hypertensive rat is not associated with neuronal uptake of the peptide.

Human xenobiotic metabolizing esterases in liver and blood.

Biochemical Basis of Resistance of Tobacco Callus Tissue Cultures to Hydroxyphenylethylamines.

Luminol-enhanced chemiluminescence induced in peripheral blood-derived human phagocytes: obligatory requirement of myeloperoxidase exocytosis by monocytes.

Scientific principles for evaluating the potential for adverse effects from chlorinated organic chemicals in the environment.

Ifosfamide. Patient care management.

In vitro cytotoxicity of mono-, di-, and trichloroacetate and its modulation by hepatic peroxisome proliferation.

Importance of venular flow in control of arteriolar diameter in hamster cremaster muscle.

Mouse endometrium stromal cells express a polycyclic aromatic hydrocarbon-inducible cytochrome P450 that closely resembles the novel P450 in mouse embryo fibroblasts (P450EF).

Multiple end point procedure to evaluate risk from pesticides.

Genetic toxicity of a mixture of fifteen pesticides commonly found in the Italian diet.

Restricted transport of cyclosporin A across the blood-brain barrier by a multidrug transporter, P-glycoprotein.

Modulation of sialic acid-binding proteins of rat uterus in response to changing hormonal milieu.

Methoxyresorufin and benzyloxyresorufin: substrates preferentially metabolized by cytochromes P4501A2 and 2B, respectively, in the rat and mouse.

Ascorbic acid accumulation and transport in human fibroblasts.

Identification of a putative tyrosine-O-sulphate (TyrS) receptor possibly functioning in the biosynthetic transport of tyrosine-sulphated proteins in Madin-Darby canine kidney cells.

Regulation of cytochrome P450 expression in a novel liver cell line from zebrafish (*Brachydanio rerio*).

Influence of medium components and metabolic inhibitors on citric acid production by *Penicillium simplicissimum*.

Metabolism of the plant toxins nitropropionic acid and nitropropanol by ruminal microorganisms.

Role of P-glycoprotein in renal tubular secretion of digoxin in the isolated perfused rat kidney.

Effects of oral administration of brassica secondary metabolites, allyl cyanide, allyl isothiocyanate and dimethyl disulphide, on the voluntary food intake and metabolism of sheep.

The complete amino acid sequence of a thrombin-like enzyme/gyroxin analogue from venom of the bushmaster snake (*Lachesis muta muta*).

[The effect of pro-oxidants on insulin secretion by the isolated rat pancreas].

Relatively immediate relaxant effects of cholera toxin on isolated rabbit blood vessels.

Maintenance of xenobiotic metabolism and toxicity in rat hepatocyte cultures after cell preservation at 4 degrees.

Modulatory effect of hyperthermia on hepatic microsomal cytochrome P450 in mice.

Ultrastructural localization and afferent sources of corticotropin-releasing factor in the rat rostral ventrolateral medulla: implications for central cardiovascular regulation.

Free radical induction in the brain and liver by products of toluene catabolism.

Determination of plasma levels of citalopram and its demethylated and deaminated metabolites by gas chromatography and gas chromatography-mass spectrometry.

Use of Fluorinated Compounds To Detect Aromatic Metabolites from m-Cresol in a Methanogenic Consortium: Evidence for a Demethylation Reaction.

The mutagenicity and interactions of 2- and 4-(acetylamino)fluorene with cytochrome P450 and the aromatic hydrocarbon receptor may explain the difference in their carcinogenic potency.

Gap junctions in ovarian follicles of *Drosophila melanogaster*: inhibition and promotion of dye-coupling between oocyte and follicle cells.

A physiologically based pharmacokinetic model for 2,3,7,8-tetrabromodibenzo-p-dioxin (TBDD) in the rat: tissue distribution and CYP1A induction.

Sulphonylurea drugs no longer inhibit ATP-sensitive K⁺ channels during metabolic stress in cardiac muscle.

Purification of a high molecular weight follicle-stimulating hormone receptor-binding inhibitor from human follicular fluid.

Effects of metabolic inhibition on cytoplasmic calcium and contraction in smooth muscle of rat portal vein.

Light microscopic catalase histochemistry in mussel digestive gland tissue.

Acrylamide as an inducer of metabolic activation system (S9) in rats.

Assignment of intrachain disulfide bonds in platelet-derived growth factor B-chain.

Relation between glucose-stimulated insulin secretion and intracellular calcium accumulation studied with a superfusion system of a glucose-responsive pancreatic beta-cell line MIN6.

2,3,7,8-Tetrachlorodibenzo-P-dioxin induced alterations in protein phosphorylation in guinea pig adipose tissue.

Human non-secretory ribonucleases. I. Purification, peptide mapping and lectin blotting analysis of the kidney, liver and spleen enzymes.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) alters pancreatic membrane tyrosine phosphorylation following acute treatment.

Effects of transgalactosylated disaccharides on the human intestinal microflora and their metabolism.

Characterization of glycoprotein II from bovine adrenal medullary chromaffin granules. Identification of components representing the secretory vesicle counterparts of the lysosomal-associated membrane glycoproteins (lamp-1 and lamp-2).

Effects of cytochalasin B on calcium transport by 1,25(OH)₂D₃- or PTH-treated chick embryonic yolk sac in vitro and in vivo.

Detection and characterization of a novel hepatic 8 S binding protein for benzo[a]pyrene distinct from the Ah receptor.

Spontaneous somatic embryogenesis and plant regeneration from root cultures of *Peucedanum palustre*.

A mechanistic model of effects of dioxin on gene expression in the rat liver.

Acceleration of the N alpha-deprotection rate by the addition of m-cresol to diluted methanesulfonic acid and its application to the Z(OMe)-based solid-phase syntheses of human pancreastatin-29 and magainin 1.

Studies on the metabolism of a monoterpene ketone, R-(+)-pulegone--a hepatotoxin in rat: isolation and characterization of new metabolites.

Evidence for involvement of the growth hormone receptor-associated tyrosine kinase in actions of growth hormone.

Interaction of the cyclophosphamide metabolite, acrolein, with lactate dehydrogenase-m homolog.

Metabolism of p-Cresol by the Fungus *Aspergillus fumigatus*.

NTP Toxicology and Carcinogenesis Studies of Pentachloroanisole (CAS No. 1825-21-4) in F344 Rats and B6C3F1 Mice (Feed Studies).

Characterization of L-thyroxine transport into hepatocytes isolated from juvenile rainbow trout (*Oncorhynchus mykiss*).

Maturation changes in dermal absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in Fischer 344 rats.

Enzymes of anaerobic metabolism of phenolic compounds. 4-Hydroxybenzoyl-CoA reductase (dehydroxylating) from a denitrifying *Pseudomonas* species.

Enzymes of anaerobic metabolism of phenolic compounds. 4-Hydroxybenzoate-CoA ligase from a denitrifying *Pseudomonas* species.

Uncoupling of rat liver mitochondrial oxidative phosphorylation by the fasciolicide triclabendazole and its sulfoxide and sulfone metabolites.

Modulation of the heat shock response by one-carbon metabolism in *Escherichia coli*.

Toxicology, structure-function relationship, and human and environmental health impacts of polychlorinated biphenyls: progress and problems.

Reduction of hepatic phosphoenolpyruvate carboxykinase (PEPCK) activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) is due to decreased mRNA levels.

Determination of p-chloronitrobenzene and its metabolites in urine by reversed-phase high-performance liquid chromatography.

Stereoselective determination of the active metabolites of a new anti-inflammatory agent (CS-670) in human and rat plasma using antibody-mediated extraction and high-performance liquid chromatography.

Demonstration of a novel type of ATP-diphosphohydrolase (EC 3.6.1.5) in the bovine lung.

Propachlor-S-cysteine: a major circulating metabolite in the calf, pig and rat after administration of propachlor.

In vitro metabolism of cyanohydroxybutene: formation of a glutathione-S-transferase catalyzed product.

Movement of fluorescein and its glucuronide across retinal pigment epithelium-choroid.

Uptake of glycyrrhizin by isolated rat hepatocytes.

A selection of biological indicators in occupational exposure to toluene and xylene.

Differential effects of metabolic inhibitors on cellular and mitochondrial uptake of organic cations in rat liver.

Purification and characterization of glutathione S-transferase of murine ovary and testis.

Enhanced glutathione S-transferase 7-7 expression in rat hepatic cytosol following treatment with pyrrole.

A top-down control analysis in isolated rat liver mitochondria: can the 3-hydroxy-3-methylglutaryl-CoA pathway be rate-controlling for ketogenesis?

Characterization of two major isoforms of juvenile hormone esterase from *Trichoplusia ni* (Lepidoptera).

Measurements of year-long exposure to tree nursery workers using multiple pesticides.

Hepatic metabolism of toluene after gastrointestinal uptake in humans.

Semicarbazide protection from in vivo oxidant injury of vascular tissue by allylamine.

Dystrophin in a membrane skeletal network: localization and comparison to other proteins.

Nature and role of xenobiotic metabolizing esterases in rat liver, lung, skin and blood.

In vitro toxicity screening using cultured rat skeletal muscle cells. I. Surfactants and mitochondrial poisons.

Embryonic abnormalities and organochlorine contamination in double-crested cormorants (*Phalacrocorax auritus*) and Caspian terns (*Hydroprogne caspia*) from the upper Great Lakes in 1988.

Investigations into the effects of various hepatotoxic compounds on urinary and liver taurine levels in rats.

The metabolism of 2,3,7,8-tetrabromodibenzodioxin in the rat.

Volatile metabolites in occupational exposure to organic sulfur compounds.

Mechanism of cytoplasmic calcium changes in platelets in contact with polystyrene and poly(acrylamide-co-methacrylic acid) surfaces.

Transient induction of cytochrome P450 1A1 mRNA by culture medium component in primary cultures of adult rat hepatocytes.

Effect of metabolic inhibitors and anaerobiosis on rat lens.

A temperature dependent action of fluoride on aqueous outflow facility of the calf eye.

Effects of acute sodium arsenite administration on the pulmonary chemical metabolizing enzymes, cytochrome P-450 monooxygenase, NAD(P)H:quinone acceptor oxidoreductase and glutathione S-transferase in guinea pig: comparison with effects in liver and kidney.

Linolenic acid transport in hamster intestinal cells is carrier-mediated.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on plasma and tissue beta-endorphin-like immunoreactivity in the most TCDD-susceptible and the most TCDD-resistant rat strain.

Biological monitoring of occupational pesticides exposure.

Reabsorption of lung liquid produced by 2,4-dinitrophenol in in vitro lungs from fetal guinea pigs.

Collision-induced dissociation of carboxylate anions from derivatized 5-lipoxygenase metabolites of arachidonic acid.

Deglycosylation and fragmentation of purified rat liver angiotensin II receptor: application to the mapping of hormone-binding domains.

Ultrastructure of the cortical epithelium of the rat thymus after in vivo exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

DNA cleavage by metabolites of butylated hydroxytoluene.

Comparative pharmacokinetics of ifosfamide, 4-hydroxyifosfamide, chloroacetaldehyde, and 2- and 3-dechloroethylifosfamide in patients on fractionated intravenous ifosfamide therapy.

Growth stimulation of primary rat hepatocytes by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Biotransformation of the antiviral agent 1,3,4-thiadiazol-2-ylcyanamide (LY217896) and characteristics of a mesoionic ribose metabolite.

[Role of H⁺ ATPases in plasma membranes of airway smooth muscle].

Biodegradation kinetics of a mixture containing a primary substrate (phenol) and an inhibitory co-metabolite (4-chlorophenol).

Nephrotoxicity of the 1:1 acrolein-glutathione adduct in the rat.

Marked interanimal differences in susceptibility of Sprague-Dawley rats to diquat-induced oxidative stress in the liver: correlation with hepatic uptake of diquat.

Changes in lipid peroxidation levels and lipid composition in the lungs, livers, kidneys and brains of mice treated with paraquat.

Nitrofen-induced diaphragmatic hernias in rats: pulmonary antioxidant enzyme activities.

Tissue-binding and toxicity of compounds structurally related to the herbicide dichlobenil in the mouse olfactory mucosa.

Chronic liver injury in phenoxy herbicide-exposed Vietnam veterans.

Selected pesticide residues and metabolites in urine from a survey of the U.S. general population.

The kidney in the fetal rat model of congenital diaphragmatic hernia induced by nitrofen.

Effect of ambient oxygen concentration upon the acute toxicity of chlorophenols and heavy metals to the groundwater copepod *Parastenocaris germanica* (Crustacea).

Toxicity assessment of atrazine, alachlor, and carbofuran and their respective environmental metabolites using Microtox.

Reproductive study of acrolein on two generations of rats.

DNA binding and mutagenicity of lindane and its metabolites.

NTP technical report on the toxicity studies of Glyphosate (CAS No. 1071-83-6) Administered In Dosed Feed To F344/N Rats And B6C3F1 Mice.

Acrolein initiates rat urinary bladder carcinogenesis.

Prevention of acrolein-induced bladder injury by pentosanpolysulfate.

Age-associated enhancement of diquat-induced lipid peroxidation and cytotoxicity in isolated rat hepatocytes.

Excretion of formaldehyde, malondialdehyde, acetaldehyde and acetone in the urine of rats in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin, paraquat, endrin and carbon tetrachloride.

Comparison of the immunotoxicity of propanil and its metabolite, 3,4-dichloroaniline, in C57Bl/6 mice.

Preferential increase of heterochromatin in venular endothelium of lung in mice after administration of dimethylarsinic acid, a major metabolite of inorganic arsenics.

2,4,5-trichlorophenoxyacetic acid influence on 2,6-dinitrotoluene-induced urine genotoxicity in Fischer 344 rats: effect on gastrointestinal microflora and enzyme activity.

Mechanisms of aldehyde-induced bronchial reactivity: role of airway epithelium.

Formation of thymidine adducts and cross-linking potential of 2-bromoacrolein, a reactive metabolite of tris(2,3-dibromopropyl)phosphate.

Distribution of paraquat into the brain after its systemic injection in rats.

DNA damage induced by alachlor after in vitro activation by rat hepatocytes.

Fatal paraquat poisoning: a light microscopic study in eight autopsy cases.

Assessment of pentachlorophenol exposure in humans using the clearance concept.

Stress resistance of *Drosophila* transgenic for bovine CuZn superoxide dismutase.

[Rainbow trout and zebrafish, two models for continuous toxicity tests: relative sensitivity, species and organ specificity in cytopathologic reaction of liver and intestines to atrazine].

[The action of defoliant on the energetics of rat liver mitochondria in vitro].

Regression mechanism of cyanamide-induced inclusion bodies in the rat: a useful experimental pattern to study the beta-glycogen metabolization of hepatocytes.

Efficacy of whole bowel irrigation using solutions with or without adsorbent in the removal of paraquat in dogs.

Platelet prevention of oxidant lung oedema is not mediated through scavenging of hydrogen peroxide.

Skin sensitization to cinnamic alcohol: the role of skin metabolism.

The effects of goitrogenesis, involution, and goitrogenic rechallenge on the clonogenic cell content of the rat thyroid.

Short-term hypothyroidism and vasopressin gene expression in the rat.

Induction of micronuclei in V79 Chinese hamster cells by tetrachlorohydroquinone, a metabolite of pentachlorophenol.

Pharmacologically active phenylpropanoids from *Senecio jacobina*.

The plateau phase rat goiter contains a sub-population of TSH-responsive follicular cells capable of proliferation following transplantation.

Endothelial dysfunction of resistance arteries of spontaneously hypertensive rats.

Induction of hepatic metallothionein by paraquat.

Metabolic response to treatment with cold, paraquat, or 3-amino-1,2,4-triazole in leaves of winter wheat.

The formation of stable acetaldehyde-hemoglobin adducts in a red blood cell model.

Quantitation of cinnamaldehyde and cinnamic acid in blood by HPLC.

Inhibition of sodium-dependent transport systems in LLC-PK1 cells by metabolites of ifosfamide.

Esterase activities during chick embryonic development and its relationship with the metabolism of 2,4-dichlorophenoxyacetic acid butyl ester.

Activation of 6-aminochrysene to genotoxic products by different forms of rat liver cytochrome P450 in an O-acetyltransferase-overexpressing *Salmonella typhimurium* strain (NM2009).

Utility of liquid chromatography/fast atom bombardment mass spectrometry and liquid chromatography/thermospray mass spectrometry for structure identification of metabolites of a fluorinated herbicide.

Inhibition of acetaminophen hepatotoxicity by acetaldehyde in the rat.

Evaluation of amitrole mutagenicity in *Salmonella typhimurium* using prostaglandin synthase activation.

Effect of glyphosate on plant cell metabolism. ³¹P and ¹³C NMR studies.

Ethanol metabolism in rat brain homogenates by a catalase-H₂O₂ system.

Hepatic triiodothyronine sulfation and its regulation by growth hormone and triiodothyronine in rats.

Degradation of pentachlorophenol by *Mycena avenacea* TA 8480--identification of initial dechlorinated metabolites.

Metabolism of alachlor by rat and monkey liver and nasal turbinate tissue.

Pharmacokinetics of fluzifop-butyl in human volunteers. II: Dermal dosing.

The S-thiolation of hepatocellular protein thiols during diquat metabolism.

Inhibition of sulfotransferase in primary cultures of human hepatocytes affecting metabolism and binding of 2-acetylaminofluorene.

Responses of vascular endothelial oxidant metabolism to lipopolysaccharide and tumor necrosis factor- α .

Metabolic profile of atrazine and N-nitrosoatrazine in rat urine.

Cyclophosphamide and its metabolite acrolein. Some studies on their porphyrinogenic action in 17 day old chick embryo.

Comparative metabolism of the cysteine and homocysteine conjugates of propachlor by in situ perfused kidneys of rats.

Quantitative bioassay using laser-monitored bacteria to assess toxicology and metabolism of bioactive Group IV compounds.

Phenobarbital and sulfonyleurea-inducible operons encoding herbicide metabolizing cytochromes P-450 in *Streptomyces griseolus*.

Paraquat-induced lung injury: prevention by N-tert-butyl-alpha-phenylnitronone, a free-radical spin-trapping agent.

Insight into the nature and site of oxygen-centered free radical generation by endothelial cell monolayers using a novel spin trapping technique.

Biotransformation of butachlor through mercapturic acid pathway in rat tissue homogenates.

Mechanisms of cellular resistance to hydrogen peroxide, hyperoxia, and 4-hydroxy-2-nonenal toxicity: the significance of increased catalase activity in H₂O₂-resistant fibroblasts.

Ferrous sulfate reduces thyroxine efficacy in patients with hypothyroidism.

Effects of different rates of drying cassava root on its toxicity to broiler chicks.

Case report: neuropathology of methyl bromide intoxication.

Methyl bromide intoxication and acute energy deprivation syndromes.

Effects of eating an uncooked vegetable diet for 1 week.

Localization of protein-acetaldehyde adducts on cell surface of hepatocytes by flow cytometry.

Glucose regulation of synaptic transmission in the dorsolateral septal nucleus of the rat.

Mitochondrial ATP-synthase deficiency in a child with 3-methylglutaconic aciduria.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin or 2,2',4,4',5,5'-hexachlorobiphenyl on vitamin K-dependent blood coagulation in female germfree WAG/Rij-rats.

Mucosal reactive oxygen metabolite production in duodenal ulcer disease.

Regulation of 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible expression of aldehyde dehydrogenase in hepatoma cells.

Mechanism of the increase in intracellular sodium during metabolic inhibition: direct evidence against mediation by voltage-dependent sodium channels.

Myalgia and elevated creatine kinase activity associated with subcutaneous injections of diluent.

Negative regulation of the murine cytosolic aldehyde dehydrogenase-3 (Aldh-3c) gene by functional CYP1A1 and CYP1A2 proteins.

Ingested arsenic, keratoses, and bladder cancer.

Amyotrophic lateral sclerosis: increased solubility of skin collagen.

Thyroid albumin originates from blood.

Hypoxia induces glucose transporter expression in endothelial cells.

Alterations in the cortical thymic epithelium of rats after in vivo exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): an (immuno)histological study.

Chemiluminescence assay of mucosal reactive oxygen metabolites in inflammatory bowel disease.

Specific inhibition of NGF receptor tyrosine kinase activity by K-252a.

Reduced activity of the electron transport chain in liver mitochondria isolated from rats with secondary biliary cirrhosis.

[Trace analysis for drugs and poisons in human tissues].

Influence of stepwise uncoupling and temporary anoxia on pancreatic enzyme secretion by isolated rat acini.

Energy-dependent accumulation of daunorubicin into subcellular compartments of human leukemia cells and cytoplasts.

Effects of acid-base status on acute hypoxic pulmonary vasoconstriction and gas exchange.

In utero and lactational exposure of male rats to 2,3,7,8-tetrachlorodibenzo-p-dioxin. 1. Effects on androgenic status.

In utero and lactational exposure of male rats to 2,3,7,8-tetrachlorodibenzo-p-dioxin. 3. Effects on spermatogenesis and reproductive capability.

In utero and lactational exposure of male rats to 2,3,7,8-tetrachlorodibenzo-p-dioxin. 2. Effects on sexual behavior and the regulation of luteinizing hormone secretion in adulthood.

Effects on retinal adhesive force in vivo of metabolically active agents in the subretinal space.

Mitochondrial ATP-synthase activity in cardiomyocytes after aerobic-anaerobic metabolic transition.

Partial amino acid sequence of a somatostatin receptor isolated from GH4C1 pituitary cells.

Mitochondrial dysfunction observed in situ in cardiomyocytes of rats in experimental diabetes.

Chemicals trophic for the thymus: risk for immunodeficiency and autoimmunity.

The effect of ethanol metabolism on ferritin uptake by freshly isolated rat hepatocytes: is acetaldehyde responsible for this alteration?

Inhibition of intestinal glucose absorption in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Identification of thyroiditogenic epitope on porcine thyroid peroxidase for C57BL/6 mice.

[Phenazon metabolism in children with liver diseases].

Heat shock alters the composition of heteromeric steroid receptor complexes and enhances receptor activity in vivo.

[Amounts of urinary metabolites of p-chloroaniline and their half lives in a patient with acute poisoning].

17 beta-estradiol hydroxylation catalyzed by human cytochrome P450 1A1: a comparison of the activities induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in MCF-7 cells with those from heterologous expression of the cDNA.

N-methyl-N'-nitro-N-nitrosoguanidine-induced light emission in Chinese hamster cell cultures: correlation with enhancement of chromosomal aberrations.

Tyrosine protein kinase is involved in anti-IgM-mediated signaling in BAL17 B lymphoma cells.

Soluble aggregates of the human PiZ alpha 1-antitrypsin variant are degraded within the endoplasmic reticulum by a mechanism sensitive to inhibitors of protein synthesis.

Transcriptional derepression of the murine Cyp1a-1 gene by mevinolin.

The mechanism of action of the two-layer (Euro-Collins' solution/perfluorochemical) cold storage method in canine pancreas preservation.

Metabolically dependent blood-brain barrier breakdown in chronic relapsing experimental allergic encephalomyelitis.

Tardyferon therapy in hyposiderosis of infancy and childhood.

Influence of ethanol on survival of acinar cells isolated from rat pancreas.

Placental transport of dioxins from mother to fetus. II. PCBs, dioxins and furans and vitamin K metabolism.

[Results of therapy of anemia in pregnancy].

Internal exposure to organic substances in a municipal waste incinerator.

Fatal systemic poisoning after skin exposure to monochloroacetic acid.

Genotoxicity of 2,4,6-trichlorophenol in V79 Chinese hamster cells.

Relationship between the cytolytic tenebrosin-C from *Actinia tenebrosa* and equinatoxin II from *Actinia equina*.

Amelioration of dermal lesions in streptozotocin-induced diabetic rats by aminoguanidine.

The hemolytic activity of deoxynivalenol and T-2 toxin.

Peroxisome proliferators: a model for receptor mediated carcinogenesis.

Reactive oxygen metabolites in toxic acute renal failure.

Energy-dependent processes involved in reduced drug accumulation in multidrug-resistant human lung cancer cell lines without P-glycoprotein expression.

Role of sex pheromone components in behavioral reproductive isolation between *Autographa gamma* (L.) and either *Trichoplusia ni* (Hübner) OR *Chrysodeixis chalcites* (Esp.) (Lepidoptera: Noctuidae: Plusiinae).

Identification of urinary metabolites of human subjects acutely poisoned by p-chloronitrobenzene.

Immunochemical identity of the 2,3,7,8-tetrachlorodibenzo-p-dioxin- and beta-naphthoflavone-induced cytochrome P-450 arachidonic acid epoxygenases in chick embryo liver: distinction from the omega-hydroxylase and the phenobarbital-induced epoxygenase.

Microbial transformation of deoxynivalenol (vomitoxin).

Hepatic Na(+)-dicarboxylate cotransport: identification, characterization, and acinar localization.

Effect of inorganic phosphate on hypoxanthine transport in isolated brain microvessels.

The molecular mechanism of peroxisome proliferator action: a model for species differences and mechanistic risk assessment.

The involvement of primary and secondary metabolism in the covalent binding of 1,2- and 1,4-dichlorobenzenes.

Murine strain differences in metabolism and bladder toxicity of cyclophosphamide.

Kinetic analysis of internalization, recycling and redistribution of atrial natriuretic factor-receptor complex in cultured vascular smooth-muscle cells. Ligand-dependent receptor down-regulation.

Somatic embryogenesis and plantlet regeneration from cell suspension cultures of *Fagus sylvatica* L.

(S)- and (R)-[11C]nicotine and the metabolite (R/S)-[11C]cotinine. Preparation, metabolite studies and in vivo distribution in the human brain using PET.

Aflatoxin toxicity in cultured human epidermal cells: stimulation by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Potentialiation by m-cresol on transepithelial sodium transport across frog skin induced by insulin.

Histochemical arguments for muscular non-shivering thermogenesis in muscovy ducklings.

Confirmation of low concentrations of urinary benzodiazepines, including alprazolam and triazolam, by GC/MS: an extractive alkylation procedure.

Genotoxicity of environmental agents in human mammary epithelial cells.

Effect of serum-free medium on cytochrome P450-dependent metabolism and toxicity in rat cultured hepatocytes.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes reduction of glucose transporting activities in the plasma membranes of adipose tissue and pancreas from the guinea pig.

In vitro metabolic inhibition of the human lymphocyte: influence on the expression of interleukin-2 receptors.

Use of multiple-cause mortality data in epidemiologic analyses: US rate and proportion files developed by the National Institute for Occupational Safety and Health and the National Cancer Institute.

Characteristics of L-citrulline transport across rat small intestine in vitro.

[The effect of chemical damage to the adrenal cortex on its ontogenetic development].

Beta-naphthoflavone induction of a cytochrome P-450 arachidonic acid epoxygenase in chick embryo liver distinct from the aryl hydrocarbon hydroxylase and from phenobarbital-induced arachidonate epoxygenase.

Allylamine toxicity in embryonic myocardial myocyte reaggregate cultures: The role of extracellular metabolism by benzylamine oxidase.

Independent regulation of prostaglandin production and the stress response in human fibroblasts.

Environmental monitoring in Lithuania. Environmental distress signals: gastrointestinal epithelial barrier after exposure to chemical agents.

Initial hydrogenation during catabolism of picric acid by *Rhodococcus erythropolis* HL 24-2.

Degradation of 2,4-dinitrophenol by two *Rhodococcus erythropolis* strains, HL 24-1 and HL 24-2.

Reduction in heat shock gene expression correlates with increased thermosensitivity in senescent human fibroblasts.

Beta-endorphin innervation of dopamine neurons in the rat hypothalamus: a light and electron microscopic double immunostaining study.

¹¹C-labelling of the analgesic tramadol and its major metabolites by selective O- and N-methylation.

Mechanism of citrinin-induced dysfunction of mitochondria. II. Effect on respiration, enzyme activities, and membrane potential of liver mitochondria.

Benzo[e]pyrene elicits changes in the biochemical activities and chromatographic behavior of murine hepatic cytochromes P-450 that are distinct from those induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Increased hydrogen peroxide concentration in human tumor cells due to a nitroxide free radical.

Metabolism of 2'-carboxyarabinitol in leaves.

[The characteristics of carbohydrate transport in the intestines of fresh-water fishes].

Glycerolphosphorylcholine (GPC) diesterase related alterations in the oxygen consumption profile of rat spermatozoa in differing functional states.

Bovine bone activin enhances bone morphogenetic protein-induced ectopic bone formation.

NTP technical report on the toxicity studies of para-Chloro-alpha,alpha,alpha Trifluorotoluene (CAS NO: 98-56-6) Administered in Corn Oil and alpha-Cyclodextrin to F344/N Rats and B6C3F1 Mice in 14-Day Comparative Gavage Studies.

Health status and needs of migrant farm workers in the United States: a literature review.

Regulation of Na⁺/Ca²⁺ exchange in the rat pancreatic B cell.

Metabolism of an imidazole fungicide (prochloraz) in the rat after oral administration.

Bioenergetics and cell communication; cell uncoupling seen as a protective mechanism in cardiac muscle.

Mitochondrial glutathione and methyl iodide-induced neurotoxicity in primary neural cell cultures.

Cytogenetic mechanisms in the selective toxicity of cyclophosphamide analogs and metabolites towards avian embryonic B lymphocytes in vivo.

The interaction of L-triiodothyronine and 2,3,7,8-tetrachlorodibenzo-p-dioxin on Ah-receptor-mediated hepatic Phase I and Phase II enzymes and iodothyronine 5'-deiodinase in thyroidectomized rats.

Molecular cloning of rat prostate transglutaminase complementary DNA. The major androgen-regulated protein DP1 of rat dorsal prostate and coagulating gland.

³¹P-NMR spectroscopy of perfused rat hepatocytes immobilized in agarose threads: application to chemical-induced hepatotoxicity.

Interactions of bacteria and microflagellates in sequencing batch reactors exhibiting enhanced mineralization of toxic organic chemicals.

Artificial liver.

Examining the function and regulation of hsp 70 in cells subjected to metabolic stress.

Relation between airborne arsenic trioxide and urinary excretion of inorganic arsenic and its methylated metabolites.

Sex-, age- and pregnancy-induced changes in the metabolism of toluene and trichloroethylene in rat liver in relation to the regulation of cytochrome P450IIE1 and P450IIC11 content.

Participation of rat liver cytochrome P450 2E1 in the activation of N-nitrosodimethylamine and N-nitrosodiethylamine to products genotoxic in an acetyltransferase-overexpressing *Salmonella typhimurium* strain (NM2009).

Stimulus-secretion coupling in beta-cells of transplantable human islets of Langerhans. Evidence for a critical role for Ca²⁺ entry.

Effects of metabolic inhibition by sodium azide on stimulus-secretion coupling in B cells of human islets of Langerhans.

Comparison of the effect of a mitochondrial uncoupler, 2,4-dinitrophenol and adrenaline on oxygen radical production in the isolated perfused rat liver.

Cyclophosphamide cystitis in rats: involvement of capsaicin-sensitive primary afferents.

The mechanism of action of the two-layer (Euro-Collins' solution/perfluorochemical) cold-storage method in canine pancreas preservation--the effect of 2,4 dinitrophenol on graft viability and adenosine triphosphate tissue concentration.

Influence of metabolic inhibitors on the degradation of tight junctions in HT29 cells.

Utilization of glutathione during 1,2-dihaloethane metabolism in rat hepatocytes.

Low concentrations of sodium azide specifically inhibit a thromboxane A₂ pathway in human platelets.

Carbamylation-induced alterations in low-density lipoprotein metabolism.

Sodium fluoride provokes gonadotrope desensitization to gonadotropin-releasing hormone (GnRH) and gonadotrope sensitization to A23187: evidence for multiple G proteins in GnRH action.

Interleukin-1 beta suppresses the induction of P4501A1 and P4501A2 mRNAs in isolated hepatocytes.

The complete amino acid sequence of growth hormone from sturgeon (*Acipenser guldenstadti*).

Bovine pancreatic deoxyribonuclease A. Isolation of cyanogen bromide peptides; complete covalent structure of the polypeptide chain.

Characterization of the thromboxane receptor mediating prostacyclin release from cultured endothelial cells.

Transgenic plants containing the phosphinothricin-N-acetyltransferase gene metabolize the herbicide L-phosphinothricin (glufosinate) differently from untransformed plants.

Zinc transport into endothelial cells is a facilitated process.

Cloning and expression of an Arabidopsis nitrilase which can convert indole-3-acetonitrile to the plant hormone, indole-3-acetic acid.

Differential effects of drugs upon hematopoiesis can be assessed in long-term bone marrow cultures established on nylon screens.

Influence of chromium on some physiological variables of *Anabaena doliolum*: interaction with metabolic inhibitors.

[Use of 2,4-dinitrophenol for immunosuppressive action on the recipient in implantation of fetal organs in mice].

Mutagenicity of the reaction products of dibenzo-p-dioxin with nitrogen oxides.

Absorptive-mediated endocytosis of an adrenocorticotrophic hormone (ACTH) analogue, ebitatide, into the blood-brain barrier: studies with monolayers of primary cultured bovine brain capillary endothelial cells.

Tricarboxylic acid cycle activity in perfused rat lungs after O₂ exposure.

Specific binding of polychlorinated biphenyls to rat liver cytosol protein.

Proline uptake by monolayers of human intestinal absorptive (Caco-2) cells in vitro.

NTP Toxicology and Carcinogenesis Studies of Methyl Bromide (CAS: 74-83-9) in B6C3F1 Mice (Inhalation Studies).

Flavin-containing monooxygenase-dependent stereoselective S-oxygenation and cytotoxicity of cysteine S-conjugates and mercapturates.

Metabolism and disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin in ring-necked pheasant hens, chicks, and eggs.

Liquid flow across the epithelium of the artificially perfused lung of fetal and postnatal sheep.

Inhibition of synthesis of rat parotid secretory proteoglycan in a gland slice system.

Metabolism of dibenzo-p-dioxin by *Sphingomonas* sp. strain RW1.

Serotonin and norepinephrine vasoconstriction in rat hindlimb have different oxygen requirements.

Taurine transport in skate hepatocytes. II. Volume activation, energy, and sulfhydryl dependence.

2,3,7,8-Tetrachlorodibenzo-p-dioxin and ethinylestradiol as co-mitogens in cultured rat hepatocytes.

[Thermal distribution in the agar phantom by a new intracavitary RF applicator for prostate gland].

The profile of rat liver enzyme induction produced by prochloraz and its major metabolites.

Metabolic fate of menthofuran in rats. Novel oxidative pathways.

Effects of chronic atropine administration on regional vasoactive intestinal polypeptide concentrations in rat brain.

Purification and localization of brain-type creatine kinase in sodium chloride transporting epithelia of the spiny dogfish, *Squalus acanthias*.

Carrier-mediated uptake of pravastatin by rat hepatocytes in primary culture.

Oxygen modulates contractile responses to potassium and prostaglandin F₂ alpha in human pial arteries.

Enhancement of glucose transport in response to inhibition of oxidative metabolism: pre- and posttranslational mechanisms.

A comparative study on the contribution of cytochrome P450 isozymes to metabolism of benzene, toluene and trichloroethylene in rat liver.

Purification and characterization of a mutant human platelet phospholipase A₂ expressed in *Escherichia coli*. Cleavage of a fusion protein with cyanogen bromide.

Effects of cyclophosphamide and acrolein in organoid cultures of mouse limb bud cells grown in the presence of adult rat hepatocytes.

In vitro neurotoxicity of methyl iodide.

NTP Toxicology and Carcinogenesis Studies of Monochloroacetic Acid (CAS No. 79-11-8) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Primary cultures of rat hepatocytes on microcarriers as a metabolising system in toxicity testing in cell cultures.

Characterization of bilirubin transport system by human peripheral blood mononuclear cells.

Uptake of organic anions by isolated rat hepatocytes. A classification in terms of ATP-dependency.

Effect of methyl bromide on regional brain glutathione, glutathione-S-transferases, monoamines, and amino acids in F344 rats.

NADH-dependent reductive stress and ferritin-bound iron in allyl alcohol-induced lipid peroxidation in vivo: the protective effect of vitamin E.

Activity of oxytocinergic neurons in the paraventricular nucleus mirrors the periodicity of the endogenous stimulatory rhythm regulating prolactin secretion.

A potassium current activated by lemakalim and metabolic inhibition in rabbit mesenteric artery.

Urinary excretion of o-cresol and hippuric acid after toluene exposure in rotogravure printing.

Tissue distribution of monochloroacetic acid and its binding to albumin in rats.

Effect of cosubstrates on the dechlorination of selected chlorophenolic compounds by *Rhodococcus erythropolis* 1CP.

[A stereoscopic analysis of centrosome structure in the cells of a tissue culture under the action of energy metabolism inhibitors. I. 2,4-Dinitrophenol, deoxyglucose, sodium azide and the calcium ionophore A23187].

Cellular sequence of tracheal repair in sheep after smoke inhalation injury.

Microbiological and biotechnological aspects of metabolism of carbamates and organophosphates.

Brain microdialysis study of the effects of hazardous chemicals on the central nervous system. 1. Changes in monoamine metabolites induced by cerebral methyl bromide administration measured by two-probe microdialysis (TPMD) method.

Comparative toxicity of four chlorinated dibenzo-p-dioxins (CDDs) and their mixture. Part II: Structure-activity relationships with inhibition of hepatic phosphoenolpyruvate carboxykinase, pyruvate carboxylase, and gamma-glutamyl transpeptidase activities.

Cytophotometric assay of cytochrome oxidase, lactate dehydrogenase and glucose-6-phosphate dehydrogenase activities in human peroxidized spermatozoa.

Comparative toxicity of four chlorinated dibenzo-p-dioxins (CDDs) and their mixture. Part III: Structure-activity relationship with increased plasma tryptophan levels, but no relationship to hepatic ethoxyresorufin o-deethylase activity.

Subcellular mechanism and site of action of ionic lanthanum at the motor nerve terminal.

Microbial secondary metabolism: a new theoretical frontier for academia, a new opportunity for industry.

[The role of bacterial metabolism in transformation of non-mutagenic compounds into mutagens. I. Participation of *Escherichia coli* nitroreductase in creation of mutagens from non-mutagenic new pesticides].

Putrescine uptake and metabolism in isolated rat pancreatic acini.

Production of polyclonal antibody to the bovine adrenal atrial natriuretic factor-R1 receptor.

Pentachlorophenol toxicokinetics after intravenous and oral administration to rat.

[Immunomorphological analysis of prolonged intoxication by low doses of herbicide simazine].

Lethality, hexobarbital narcosis and behavior in rats exposed to atrazine, bentazon or molinate.

The effect of structurally divergent herbicides on mouse liver xenobiotic-metabolizing enzymes (P-450-dependent mono-oxygenases, epoxide hydrolases and glutathione S-transferases) and carnitine acetyltransferase.

Hexachlorobenzene and its metabolites pentachlorophenol and tetrachlorohydroquinone: interaction with thyroxine binding sites of rat thyroid hormone carriers *ex vivo* and *in vitro*.

Conjugates of superoxide dismutase with the Fc fragment of immunoglobulin G.

Effects of MCPA and other phenoxyacid compounds on hepatic xenobiotic metabolism in rats.

Cancer mortality in workers exposed to chlorophenoxy herbicides and chlorophenols.

Cornexistin: a new fungal metabolite with herbicidal activity.

[Biochemical and histological changes after acute oral poisoning with the acetanilide herbicide acetochlor].

Toxicology and carcinogenesis studies of two grades of pentachlorophenol in B6C3F1 mice.

Developmental toxicity of bromoxynil in mice and rats.

Effects of ethyl 4-chloro-2-methylphenoxyacetate on hepatic peroxisomal enzymes in rats.

Liver high performance liquid chromatographic porphyrin profiles in experimental porphyria induced by peroxidizing herbicides.

[Arachidonic acid metabolism and angiotensin converting enzyme activity by cultured porcine pulmonary artery endothelial cells are affected with paraquat].

Reduction of paraquat and related bipyridylium compounds to free radical metabolites by rat hepatocytes.

Role of metabolites in propanil-induced hemolytic anemia.

Age- and sex-related effects on hepatic drug metabolism in rats chronically exposed to dietary atrazine.

Metabolic aspects of the toxicology of mixtures of parathion, toxaphene and/or 2,4-D in mice.

Relationships between ascorbic acid and alpha-tocopherol during diquat-induced redox cycling in isolated rat hepatocytes.

Genotoxicity of p-nitrocinnamaldehyde and related alpha, beta-unsaturated carbonyl compounds in two bacterial assays.

Acrolein genotoxicity in *Drosophila melanogaster*. I. Somatic and germinal mutagenesis under proficient repair conditions.

The effects of Tordon 202c exposure on urethan-induced lung adenoma formation in female CD-1 mice.

Developmental analysis of elongation factor-1 alpha expression in transgenic tobacco.

Gene mutation assay of acrolein in the CHO/HGPRT test system.

Cellular response to oxidative damage in lung induced by the administration of dimethylarsinic acid, a major metabolite of inorganic arsenics, in mice.

[Occupational asthma caused by scented gravel in cat litter boxes].

Effects of hexachlorobenzene and its metabolites pentachlorophenol and tetrachlorohydroquinone on serum thyroid hormone levels in rats.

Mortality and incidence of cancer at four factories making phenoxy herbicides.

Allylamine and acrolein toxicity in perfused rat hearts.

[The immunomorphological characteristics of a focal staphylococcal infection against a background of long-term exposure to low doses of simazine].

Effect of atrazine on some aspects of lipid metabolism in fresh water fish.

Effects of phenoxyacetic acid herbicides on chicken embryo liver drug metabolizing enzymes.

Inhibition of human and rabbit platelet aggregation by chlorophenoxyacid herbicides.

Taiwan National Poison Center survey of glyphosate--surfactant herbicide ingestions.

Bialaphos poisoning with apnea and metabolic acidosis.

Pentachlorophenol.

[Ultrastructural changes in the adenohipophysis-thyroid system in chronic poisoning by the herbicide linuron].

Inhibition of platelet aggregation and thromboxane A₂ production by chlorophenoxy acid herbicides.

[The effect of the acetanilide herbicide Acetochlor on the cardiovascular system of white rats].

Effects of acute 2,4-dichlorophenoxyacetic acid intoxication on some rat serum components and enzyme activities.

Marked augmentation of nocturnal melatonin secretion in amenorrhic athletes, but not in cycling athletes: unaltered by opioidergic or dopaminergic blockade.

Cyclophosphamide-associated carcinoma of urothelium: modalities for prevention.

Oxygen metabolite effects on creatine kinase and cardiac energetics after reperfusion.

Prolonged exposure to wood preservatives induces endocrine and immunologic disorders in women.

Uptake and metabolism of iodine is crucial for the development of thyroiditis in obese strain chickens.

Isolation and characterization of *Streptomyces griseolus* deletion mutants affected in cytochrome P-450-mediated herbicide metabolism.

Phosphoramidate mustard is responsible for the ovarian toxicity of cyclophosphamide.

Central monoamine oxidase and phenolsulfotransferase activities in spontaneously hypertensive rats.

Liver ferrochelatase from normal and hexachlorobenzene porphyric rats. Mechanism of drug action.

Formation of the 37KD liver protein-acetaldehyde adduct in vivo and in vitro.

Tissue peroxidase in the normal and neoplastic salivary gland.

Mutagenicity of 2-methylacrolein, 2-ethylacrolein and 2-propylacrolein in *Salmonella typhimurium* TA100. A comparative study.

Determination of glyphosate and its metabolite, (aminomethyl)phosphonic acid, in serum using capillary electrophoresis.

Residues of pentachlorophenol and other chlorinated contaminants in human tissues: analysis by electron capture gas chromatography and electron capture negative ion mass spectrometry.

Determination of a metabolite of the herbicide pyridate in drinking and groundwater using high-performance liquid chromatography with amperometric detection.

In vitro transformation of dithiopyr by rat liver enzymes: conversion of methylthioesters to acids by oxygenases.

Methyl viologen as a preferred electron acceptor in metabolic experiments.

Properties of a 4-ene-3-ketosteroid-5 alpha-reductase in cell extracts of the intestinal anaerobe, *Eubacterium* sp. strain 144.

Increase in metallothionein produced by chemicals that induce oxidative stress.

Metabolism of the thiocarbamate herbicide SUTAN in rats.

Residue analysis of glyphosate and its principal metabolite in certain cereals, oilseeds, and pulses by liquid chromatography and postcolumn fluorescence detection.

Decreased metabolic rate as an acrolein resistance mechanism in *Drosophila melanogaster*.

Metabolic control analysis and enzyme variation: nutritional manipulation of the flux from ethanol to lipids in *Drosophila*.

The effect of diflufenican on lipid metabolism in plants.

Enzyme mediated superoxide radical formation initiated by exogenous molecules in rat brain preparations.

Metabolism of glyphosate in Sprague-Dawley rats: tissue distribution, identification, and quantitation of glyphosate-derived materials following a single oral dose.

The isolation of alpha-methylene-beta-alanine, a herbicidal microbial metabolite.

The involvement of catalase in alcohol metabolism in *Drosophila melanogaster* larvae.

Effect of 3-amino-1,2,4-triazole on ethanol-induced narcosis, lethality and hypothermia in rats.

Application of ELISA techniques to metabolic disposition studies for 1,3-dinitrobenzene: comparison with HPLC and radiochemical methods.

Propachlor-S-glutathione metabolism by kidneys and ureters of calves.

Food Safety and Inspection Service initiatives for tissue residue reduction in meat and poultry.

Gastrointestinal absorption of paraquat in the isolated mucosa of the rat.

[Results of the toxicokinetics of bromoxynil in rats].

[Chemical and biochemical studies on reactivities, formations and toxicities of reactive oxygen species].

Age- and sex-related differences in activation of the carcinogen 7-hydroxymethyl-12-methylbenz[a]anthracene to an electrophilic sulfuric acid ester metabolite in rats. Possible involvement of hydroxysteroid sulfotransferase activity.

Urinary excretion of acetylcyanamide in rat and human after oral and dermal application of hydrogen cyanamide (H₂NCN).

Metabolic activation of the herbicide dichlobenil in the olfactory mucosa of mice and rats.

Effect of pentachlorophenol on the activation of 2,6-dinitrotoluene to genotoxic urinary metabolites in CD-1 mice: a comparison of GI enzyme activities and urine mutagenicity.

Modulations in nitrogen metabolism in the hepatic and neuronal tissues of fish, *Tilapia mossambica* exposed to atrazine.

Relationship between oxidative stress and hepatic phosphoglucomutase activity in rats.

Hydrogen peroxide effects on ionic and non-ionic permeability of the rabbit corneal endothelium.

Pharmacokinetics and metabolism of triclopyr in the crayfish (*Procambarus clarki*).

Characterization of topoisomerase I and II activities in nuclear extracts during callogenesis in immature embryos of *Zea mays*.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on 17 beta-estradiol-induced glucose metabolism in MCF-7 human breast cancer cells: 13C nuclear magnetic resonance spectroscopy studies.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes unbalanced growth in 5L rat hepatoma cells.

Induction of NAD(P)H:quinone reductase in human peripheral blood lymphocytes.

Decreased activities of ubiquinol:ferricytochrome c oxidoreductase (complex III) and ferrocycytochrome c:oxygen oxidoreductase (complex IV) in liver mitochondria from rats with hydroxycobalamin[c-lactam]-induced methylmalonic aciduria.

Hypoxia induces endothelial cell synthesis of membrane-associated proteins.

[Identification of urinary metabolites in a patient of acute poisoning by p-chloroaniline].

Aromatic hydrocarbon responsiveness-receptor agonists generated from indole-3-carbinol in vitro and in vivo: comparisons with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Neurotoxicity of polychlorinated biphenyls: structure-activity relationship of individual congeners.

Mechanism for enterohepatic injury caused by circulatory disturbance of hepatic vessels in the rat.

Hemolytic activity of ethylene glycol phenyl ether (EGPE) in rabbits.

Iron supplementation and running performance in female cross-country runners.

Induction of hepatic metallothionein by nonmetallic compounds associated with acute-phase response in inflammation.

Toxic and neoplastic responses in the nasal passages: future research needs.

Lipid peroxidation in rat AH-130 hepatoma cells enriched in vitro with arachidonic acid.

Influence of anoxia, reoxygenation, and uncoupling on survival, respiration, and trypsin-inhibiting capacity of isolated pancreatic acinar cells.

Chloracne caused by ingestion of olive oil contaminated with PCDDs and PCDFs.

Great Lakes embryo mortality, edema, and deformities syndrome (GLEMEDS) in colonial fish-eating birds: similarity to chick-edema disease.

Ninety day toxicity study of chloroacetic acids in rats.

Intracellular calcium concentrations during "chemical hypoxia" and excitotoxic neuronal injury.

Dexamethasone and 2,3,7,8-tetrachlorodibenzo-p-dioxin can induce thymic atrophy by different mechanisms in mice.

Mechanism of action of 2,3,7,8-tetrachlorodibenzo-p-dioxin on intermediary metabolism in the rat.

Cellular retention, toxicity and carcinogenic potential of seafood arsenic. I. Lack of cytotoxicity and transforming activity of arsenobetaine in the BALB/3T3 cell line.

Heat treatment induces an increase in intracellular cyclic AMP content in human epidermoid A-431 cells.

Evidence for the mechanism of action of the 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated decrease of nuclear estrogen receptor levels in wild-type and mutant mouse Hepa 1c1c7 cells.

Hemolytic activity in the periodontopathogen *Porphyromonas gingivalis*: kinetics of enzyme release and localization.

Induction of chromosomal aberrations with the restriction endonuclease AluI in Chinese hamster ovary cells: comparison of different treatment methods.

Glutathione depletion during experimental damage to rat skeletal muscle and its relevance to Duchenne muscular dystrophy.

2,3,7,8-Tetrachlorodibenzo-p-dioxin inhibits steroidogenesis in the rat testis by inhibiting the mobilization of cholesterol to cytochrome P450_{sc}.

Characterization of an inducible aryl hydrocarbon receptor-like protein in rat liver.

Extracorporeal techniques in the treatment of poisoned patients.

Effect of modulators of glutathione synthesis on the hepatotoxicity of 2-methylfuran.

Effects of ATP-sensitive K⁺ channel blockers on the action potential shortening in hypoxic and ischaemic myocardium.

Gender-related differences in iron absorption by preadolescent children.

Mechanisms of disruption of the articular cartilage surface in inflammation. Neutrophil elastase increases availability of collagen type II epitopes for binding with antibody on the surface of articular cartilage.

Metabolism of deuterium-labeled nonanoic acids in the riboflavin-deficient rat model of multiple acyl-CoA dehydrogenase deficiency.

Hypothyroidism and acquired von Willebrand disease.

The issues of transport multiplicity and energetics pertaining to methotrexate efflux in L1210 cells addressed by an analysis of cis and trans effects of inhibitors.

Promotion of mouse lung tumors by bioaccumulated polychlorinated aromatic hydrocarbons.

Cataract induction by 1,2-naphthoquinone. I. Studies on the redox properties of bovine lens proteins.

Association of the crosslinked IgE receptor with the membrane skeleton is independent of the known signaling mechanisms in rat basophilic leukemia cells.

Oxidation of propylthiouracil to reactive metabolites by activated neutrophils. Implications for agranulocytosis.

Ovarian hormones enhance 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated increases in cell proliferation and preneoplastic foci in a two-stage model for rat hepatocarcinogenesis.

Respective roles of free radicals and energy supply in hypoxic rat liver injury after reoxygenation.

Long-term carcinogenesis studies on 2,3,7,8-tetrachlorodibenzo-p-dioxin and hexachlorodibenzo-p-dioxins.

Reversibility of thymic atrophy induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and bis(tri-n-butyltin)oxide (TBTO).

The tissue distribution of 2,3,7,8-chlorine substituted dibenzo-p-dioxins in humans who died of cancer.

Vitamin A deficiency and the induction of cutaneous toxicity in murine skin by TCDD.

Roles of UDP-glucuronosyltransferases in chemical carcinogenesis.

An exploratory study of environmental and medical factors potentially related to childhood cancer.

Regulation of the truncation of luteinizing hormone receptors at the plasma membrane is different in rat and mouse Leydig cells.

Human exposure to 2,3,7,8-TCDD and risk of cancer.

Pyridine derivatives: structure-activity relationships causing parkinsonism-like symptoms.

Effects of salicylate on hepatocyte lactate metabolism.

Altered metabolic response of iron-deficient women during graded, maximal exercise.

Influence of aprotinin and promazine on survival of isolated pancreatic acinar cells.

Polycythemia in diabetic patients on CAPD.

On the mechanism of action of interferons: interaction with nonsteroidal anti-inflammatory agents, pentoxifylline (Trental) and cGMP inducers.

Reduced cortisol secretion in patients with iron deficiency.

Response of the antral mucosa of the rat stomach to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[The effect of finoptin on the metabolism and pharmacological action of cyclophosphane in vivo and in vitro].

Single-dose cyclophosphamide for the prevention of bladder tumor implantation in F344 rats: site of drug activity.

Sequence and immunological characterisation of ovine pancreatic lipase.

Metabolism and disposition of p-chloroaniline in rat, mouse, and monkey.

Characteristics of induction of peroxisomal fatty acid oxidation-related enzymes in rat liver by drugs. Relationships between structure and inducing activity.

2,3,7,8-Tetrachlorodibenzo-p-dioxin increases reliance on fats as a fuel source independently of diet: evidence that diminished carbohydrate supply contributes to dioxin lethality.

NTP technical report on the toxicity studies of Cresols (CAS Nos. 95-48-7, 108-39-4, 106-44-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Effect of rat liver cytosolic enzymes and cofactors on mutagenicity of 1-amino-8-nitropyrene.

Monoclonal antibody-directed characterization of cytochrome P450 isozymes responsible for toluene metabolism in rat liver.

Absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) after low dose dermal exposure.

Human liver alcohol dehydrogenases catalyze the oxidation of the intermediary alcohols of the shunt pathway of mevalonate metabolism.

Evaluation of metabolic endpoints of acute cytotoxicity in V79 fibroblasts.

Allylamine toxicity in embryonic myocardial myocyte reaggregate cultures.

Choice and standardization of test protocols in cytotoxicology: A multicentre approach.

Influence of cytoplasmic ATP reduction on catecholamine synthesis in cultured bovine adrenal chromaffin cells.

The induction of DNA strand breaks and formation of semiquinone radicals by metabolites of 2,4,5-trichlorophenol.

Alterations in the cross-links of skin collagen of rats treated with biosynthetic growth hormone.

Relative roles of metabolism and renal excretory mechanisms in xenobiotic elimination by fish.

Effect of natural ageing and antioxidant inhibition on liver antioxidant enzymes, glutathione system, peroxidation, and oxygen consumption in *Rana perezi*.

Identification of urinary metabolites in rats treated with p-chloronitrobenzene.

Kinetic studies on toluene metabolism in ethanol- and phenobarbital-induced rat liver microsomes in vitro.

Interactions of halogenated industrial chemicals with transthyretin and effects on thyroid hormone levels in vivo.

The mutagenicity of azido derivatives of monosaccharides and alcohols and of N-(3-azido-2-hydroxypropyl) derivatives of purines and pyrimidines in *Arabidopsis thaliana* and in *Salmonella typhimurium*.

[Experimental study on methyl bromide poisoning in mice. Acute inhalation study and the effect of glutathione as an antidote].

Ca²⁺-activated K⁺ channels in airway smooth muscle are inhibited by cytoplasmic adenosine triphosphate.

In situ intestinal absorption of 2-chloro-N-isopropylacetanilide (propachlor) and non-biliary excretion of metabolites into the intestinal tract of rats, pigs and chickens.

Nature of enhanced mitochondrial oxidative metabolism by a calf blood extract.

Glutathione diminishes the anti-tumour activity of 4-hydroperoxycyclophosphamide by stabilising its spontaneous breakdown to alkylating metabolites.

The effect of interleukin-1 on iron metabolism in rats.

Intracellular regulation of the production and release of human erythroid-directed lymphokines.

Simple determination of iodine in small specimens of thyroid tissue.

Quantitation of urinary chlorobenzene metabolites by HPLC: concentrations of 4-chlorocatechol and chlorophenols in urine and of chlorobenzene in biological specimens of subjects exposed to chlorobenzene.

Studies in tobacco carcinogenesis.

Drug interaction effects on antitumour drugs (VIII): prevention of ifosfamide-induced urotoxicity by disulfiram and its effect on antitumour activity and acute toxicity of alkylating agents in mice.

Effects of polychlorinated biphenyls with Ah receptor affinity on lymphoid development in the thymus and the bursa of Fabricius of chick embryos in ovo and in mouse thymus anlagen in vitro.

Metabolism of crystallin fragments in cell-free extracts of bovine lens: effects of ageing and oxygen free-radicals.

Characterization of the cytochrome P450 isozyme that metabolizes ochratoxin A, using metabolic inducers, inhibitors and antibodies.

Genotoxicity of ochratoxin A and structurally related compounds in *Escherichia coli* strains: studies on their mode of action.

Mutagen specificity for 71 lines resistant to barley powdery mildew race D1 and isolated in four highbred barley varieties.

The role of metabolism in chemical-induced pulmonary toxicity.

Free radicals promote "in vitro" a different intracellular decay of rabbit reticulocyte and erythrocyte glycolytic enzymes.

Identification and structural characterization of Lyt-1 glycoproteins from tunicate hemocytes and mouse thymocytes.

Effect of different hypolipemic agents on rat liver peroxisomal and mitochondrial functions and biogenesis.

Accumulation and release of adrenaline, and the modulation by adrenaline of noradrenaline release from rabbit blood vessels in vitro.

Charybdotoxin-sensitive K(Ca) channel is not involved in glucose-induced electrical activity in pancreatic beta-cells.

Metabolic activation of chlorpromazine by stimulated human polymorphonuclear leukocytes. Induction of covalent binding of chlorpromazine to nucleic acids and proteins.

Primary structure of the catalytic subunit of calf thymus DNA polymerase delta: sequence similarities with other DNA polymerases.

Studies on the interaction of ribonuclease inhibitor with pancreatic ribonuclease involving differential labeling of cysteinyl residues.

Plant regeneration from embryogenic suspension cultures of oil palm (*Elaeis guineensis* Jacq.).

Role of microtubuli in secretion of very-low-density lipoprotein in isolated rat hepatocytes: early effects of thiol reagents.

TCDD decreases rapidly and persistently serum melatonin concentration without morphologically affecting the pineal gland in TCDD-resistant Han/Wistar rats.

Characterization of the renal effects and renal elimination of sulotroban in the dog.

bcl-2 transgene inhibits T cell death and perturbs thymic self-censorship.

Comparison of the amino acid sequences of tissue-specific parvalbumins from chicken muscle and thymus and possible evolutionary significance.

Hexose uptake in primary cultures of bovine brain microvessel endothelial cells. I. Basic characteristics and effects of D-glucose and insulin.

Effects of exogenous auxins on expression of lipoxygenases in cultured soybean embryos.

Effect of N-(Phosphonomethyl)glycine on Carbon Assimilation and Metabolism during a Simulated Natural Day.

Mutagenic activity of 6-azido deoxyhexoses and azido alcohols in *Salmonella typhimurium* and its inhibition by a structure-similar carbon source in the medium.

Absorption and metabolic characteristics of p-aminobenzoic acid and its isomer, m-aminobenzoic acid, from the rat small intestine.

[Comparative study of the effectiveness of the classical and modified Cooper protocol for breast cancer chemotherapy].

The metabolism and excretion of prochloraz, an imidazole-based fungicide, in the rat.

The liver, kidney, and thyroid toxicity of chlorinated benzenes.

Effect of endocytic and metabolic inhibitors on the internalization and intracellular growth of *Brucella abortus* in Vero cells.

Perinatal thymocyte antigen expression and postnatal immune development altered by gestational exposure to tetrachlorodibenzo-p-dioxin (TCDD).

Long-term optimized embryogenic cultures in durum wheat (*Triticum durum* Desf.).

Stimulation by auxin of phospholipase A in membrane vesicles from an auxin-sensitive tissue is mediated by an auxin receptor.

Modulation of auxin-binding proteins in cell suspensions : I. Differential responses of carrot embryo cultures.

NTP Toxicology and Carcinogenesis Studies of Sodium Azide (CAS: 26628-22-8) in F344 Rats (Gavage Studies).

Development and validation of a fluoroimmunoassay for urinary normetanephrine.

A rapid microassay for measuring the luminol-dependent chemiluminescent response in canine whole blood.

Cis-inhibition and trans-stimulation of cationic amino acid transport in the perfused rat pancreas.

Transport of monocarboxylic acids at the blood-brain barrier: studies with monolayers of primary cultured bovine brain capillary endothelial cells.

Lung liquid production by in vitro lungs from fetal guinea pigs: studies with metabolic inhibitors.

Studies on the mechanism of the toxic action of sodium nitrite on intestinal absorption in rats.

Effect of Konjac mannan on intestinal microbial metabolism in mice bearing human flora and in conventional F344 rats.

Improved culture conditions for somatic embryogenesis from *Asparagus officinalis* L. using an aseptic ventilative filter.

Potassium-evoked responses from the retinal pigment epithelium of the toad *Bufo marinus*.

[Uptake of adrenaline by rat brain synaptosomes. Effects of several psychotropic drugs].

Inhibitory effects of substance P and carbachol on the saturable sodium-dependent uptake process of myo-inositol in rat parotid gland.

Induction of a 31,000-dalton stress protein by prostaglandins D₂ and J₂ in porcine aortic endothelial cells.

Human aldehyde dehydrogenase. Activity with aldehyde metabolites of monoamines, diamines, and polyamines.

The complete amino acid sequence of growth hormone of the bullfrog (*Rana catesbeiana*).

The antiproliferative effects of enzymatic deglycosylation and metabolic undersulfation of proteoglycans from the cell surface.

[Effect of antibiotics on fecal excretion of various products of microbial metabolism of aromatic amino acids].

Toxicity of 2,6-dichlorothiobenzamide (chlorthiamid) and 2,6-dichlorobenzamide in the olfactory nasal mucosa of mice.

Human chorionic gonadotropin treatment prevents depressed 17 alpha-hydroxylase/C17-20 lyase activities and serum testosterone concentrations in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

Biophysical aspects of the integrated combination of cytostatic drugs with radiotherapy. Part 1: In vitro investigations on the kinetics of activated isophosphamide metabolites and the determination of selective properties of DNA-interstrand and DNA-protein crosslinking mechanisms using ³¹P-NMR spectroscopy.

Evaluation of the relative contribution of exposure routes in a health risk assessment of dioxin emissions from a municipal waste incinerator.

Metabolism of ¹⁴C-dichloroethyne in rats.

Sulphation of the flavonoids quercetin and catechin by rat liver.

Effect of age on the gastrointestinal absorption of acyclovir in rats.

Retinoic acid receptor belongs to a subclass of nuclear receptors that do not form "docking" complexes with hsp90.

Effects of environmentally encountered epoxides on mouse liver epoxide-metabolizing enzymes.

Methylated sulfur compounds in microbial mats: in situ concentrations and metabolism by a colorless sulfur bacterium.

In vitro cytotoxicity studies with the fish hepatoma cell line, PLHC-1 (*Poeciliopsis lucida*).

Uptake of corticosterone into isolated rat liver cells: possible involvement of Na⁺/K⁺-ATPase.

Evidence for the formation of a known toxin, p-cresol, from menthofuran.

Role of eicosanoids, inositol phosphates and extracellular Ca²⁺ in cell-volume regulation of rat liver.

Mechanically induced length changes of isolated outer hair cells are metabolically dependent.

Oxygen uptake of isolated toad skin epithelium: micromasurement and effect of ionic acclimation.

Effects of chlordane on parameters of liver and muscle toxicity in man and experimental animals.

Sodium nitrite-stimulated metabolic activation of benzo[a]pyrene 7,8-dihydrodiol in human polymorphonuclear leukocytes.

Induction of mutation in V79 Chinese hamster cells by tetrachlorohydroquinone, a metabolite of pentachlorophenol.

The synergistic effect of chlorinated chemicals (trichlorosalicylanilid, 4-chloro-m-cresol, trichlorophenoxyacetic acid, trichloroethanol, trichloromethiazide, trichlorofon and trichloroacetaldehyde) and low concentrations of griseofulvin on porphyrin metabolism.

Expression of growth hormone-releasing factor analog Leu27GRF(1-44)OH in *Escherichia coli*: purification and characterization of the expressed protein.

Effect of a single dose of TCDD on the level of histamine in discrete nuclei in rat brain.

Morphological and histochemical effects of 2,3,7,8-tetrachlorodibenzo-p dioxin (TCDD) on marmoset (*Callithrix jacchus*) testes.

Microheterogeneity of rat submaxillary gland kallikrein k10, a member of the kallikrein family.

Effect of metabolic inhibitors on uptake of non-transferrin-bound iron by reticulocytes.

Transport of cyclosporin A in kidney epithelial cell line (LLC-PK1).

Metabolism and toxicity of methyl iodide in primary dissociated neural cell cultures.

Cytotoxicity of alkylating agents in isolated rat kidney proximal tubular and distal tubular cells.

Characterization and induction of xenobiotic metabolizing enzyme activities in a primary culture of rainbow trout hepatocytes.

The effect of energy status on phosphatidylinositol turnover in rat brain.

2,3,7,8 Tetrachlorodibenzodioxin in fish from the Pigeon River of eastern Tennessee, USA: its toxicity and mutagenicity as revealed by the Ames Salmonella assay.

The possible role of phospholipase A2 in hepatic microsomal lipid peroxidation induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats.

Tissue-specific and organ-specific expression of soybean auxin-responsive transcripts GH3 and SAURs.

Complete amino acid sequence of the FK506 and rapamycin binding protein, FKBP, isolated from calf thymus.

Metabolism of hydroquinone by human myeloperoxidase: mechanisms of stimulation by other phenolic compounds.

Characteristics of estrogen-induced peroxidase in mouse uterine luminal fluid.

Biochemical alterations in skeletal muscle induced by 2,4-dichlorophenoxyacetic butyl ester during chick embryonic development.

NADPH-dependent reaction of paraquat in mouse brain microsomes.

[Cytogenetic activity of the pesticides cyclophos and alvison, their components and metabolites].

Chronic effect of atrazine on hydromineral balance in the crab.

Acute toxicity of the natural algicide, cyanobacterin, to *Daphnia magna*.

Propanil-induced methemoglobinemia and hemoglobin binding in the rat.

Interactions between paraquat, endogenous lung amines' antioxidants and isolated mouse Clara cells.

[An immunological and morphological study of focal staphylococcal infection against a background of long-term exposure to the herbicide linuron].

The effect of pentachlorophenol and its metabolite tetrachlorohydroquinone on cell growth and the induction of DNA damage in Chinese hamster ovary cells.

HPLC analysis of diuron and metabolites in blood and urine.

[The immunomorphological characteristics of prolonged exposure to the herbicide linuron].

[Free amino acids of the liver and the characteristics of the amino acid metabolism in the liver and brain after cyanamide administration to rats].

Toxicokinetics of monochloroacetic acid: a whole-body autoradiography study.

[Free radicals in industrial medicine: their mechanisms of toxicity and biological relevance].

[Functional testing of the immunotoxicity of the phenoxyalkane acid mecoprop in rats and prevention of immunotoxic effects by adrenalectomy].

Overexpression of Cu-Zn superoxide dismutase in *Drosophila* does not affect life-span.

Inhibition of rat heart mitochondrial electron transport in vitro: implications for the cardiotoxic action of allylamine or its primary metabolite, acrolein.

The protective effect of sulfite on menadione- and diquat-induced cytotoxicity in isolated rat hepatocytes.

Degradation of the chlorinated phenoxyacetate herbicides 2,4-dichlorophenoxyacetic acid and 2,4,5-trichlorophenoxyacetic acid by pure and mixed bacterial cultures.

Irreversible binding and toxicity of the herbicide dichlobenil (2,6-dichlorobenzonitrile) in the olfactory mucosa of mice.

Xanthine oxidase is increased and contributes to paraquat-induced acute lung injury.

Metabolism of the arylamide herbicide propanil. I. Microsomal metabolism and in vitro methemoglobinemia.

Metabolism of the arylamide herbicide propanil. II. Effects of propanil and its derivatives on hepatic microsomal drug-metabolizing enzymes in the rat.

Involvement of prostaglandins in paraquat intoxication.

Initial accumulation of paraquat in the heart leading to acute death.

Effects of diuron and fluometuron metabolites on the growth and fiber quality of cotton (*Gossypium hirsutum*).

Application of the Microtox system to assess the toxicity of pesticides and their hydrolysis metabolites.

Electroencephalographical analysis of acute paraquat poisoning.

Paraquat pharmacokinetics using a subcutaneous toxic low dose in the rat.

Biomonitoring of arylamines: hemoglobin adducts of urea and carbamate pesticides.

Metabolism and bacterial mutagenicity of binary mixtures of benzo(a)pyrene and polychlorinated aromatic hydrocarbons.

[Distribution and elimination of C-14-2,4-dichlorophenoxyacetic acid (2,4 D) in rat tissues in acute poisoning].

Biological valuation of extra-corporeal techniques in acute poisoning.

Inhibition of lung damage caused by paraquat with lymphokines or cytokines.

Pharmacokinetics of 2,4,5-T in mice as a function of dose and gestational status.

The effects of lindane and linuron on calcium metabolism, bone morphometry and the kidney in rats.

Iron release and erythrocyte damage in allyl alcohol intoxication in mice.

Effect of beta-naphthoflavone and MCPA on liver and kidney drug-metabolizing enzymes from the carp, *Cyprinus carpio*.

Energetic metabolism and fatigability in experimental myotonia.

Xanthine oxidase-derived H₂O₂ contributes to reperfusion injury of ischemic skeletal muscle.

Methanol metabolism in acatalasemic mice.

Alterations of arachidonate metabolism in cardiovascular system by cigarette smoking.

NADPH- and NADH-dependent oxygen radical generation by rat liver nuclei in the presence of redox cycling agents and iron.

Simultaneous assay of pentachlorophenol and its metabolite, tetrachlorohydroquinone, by gas chromatography without derivatization.

Active immunization of beef heifers against luteinizing hormone: II. Evaluation of conjugation technique on antigenicity of LH.

Human phagocytic cells as oxygen metabolite scavengers.

Sulfation-dependent formation of N-acetylated and deacetylated DNA adducts of N-hydroxy-4-acetylamino-biphenyl in male rat liver in vivo and in isolated hepatocytes.

A novel metabolic form of the 32 kDa-D1 protein in the grana-localized reaction center of photosystem II.

Mechanisms of in vitro immunosuppression by hepatocyte-generated cyclophosphamide metabolites and 4-hydroperoxycyclophosphamide.

Molecular mechanisms of DNA damage initiated by alpha, beta-unsaturated carbonyl compounds as criteria for genotoxicity and mutagenicity.

Redox cycling of radical anion metabolites of toxic chemicals and drugs and the Marcus theory of electron transfer.

Comparison of uncoupling activities of chlorophenoxy herbicides in rat liver mitochondria.

Metabolic studies on pentachlorophenol (PCP) in rats.

Pharmacokinetics and metabolism of triclopyr 3,5,6-trichloro-2-pyridinyloxyacetic acid) in Fischer 344 rats.

Simplified cleanup and liquid chromatographic ultraviolet determination of linuron and three metabolites in potatoes.

Differences in endothelium-dependent cerebral dilation by bradykinin and acetylcholine.

Effects of sulfur-containing metabolites of hexachlorobenzene on the heme metabolic enzymes in rat liver.

Metabolism of the glutathione conjugate of propachlor by in situ perfused kidneys and livers of rats.

Effects of dose, age, inhibition of metabolism and elimination on the toxicokinetics of 2-butoxyethanol and its metabolites.

Gas chromatographic and spectral properties of pentafluorobenzyl derivatives of 2,4-dichlorophenoxyacetic acid and phenolic pesticides and metabolites.

Formation of the 37-kD protein-acetaldehyde adduct in primary cultured rat hepatocytes exposed to alcohol.

Inactivation of the genotoxic aldehyde acrolein by human glutathione transferases of classes alpha, mu, and pi.

Low external pH replaces 2,4-D in maintaining and multiplying 2,4-D-initiated embryogenic cells of carrot.

³²P-postlabeling analysis of binding of the cyclophosphamide metabolite, acrolein, to DNA.

Evaluation of genotoxic effects of the herbicide dicamba using in vivo and in vitro test systems.

Aminotriazole effects on lung and heart H₂O₂ detoxifying enzymes and TBA-RS at two pO₂.

Environmental actions of agrochemicals. 1. Side-effects of the herbicide 3-amino-1,2,4-triazole on a laboratory acarine/host-plant interaction (*Tetranychus urticae*/*Phaseolus vulgaris*) as revealed by electron microscopy.

Role of xanthine oxidase in ethanol-induced lipid peroxidation in rats.

Influence of aging on ethanol and acetaldehyde oxidation in female rat liver.

Metabolism of chlorpropham by adult rat hepatocytes co-cultured with a liver epithelial cell line.

Rhythmic responses to hormones and herbicides in plants.

Dose-related induction of rat hepatic drug-metabolizing enzymes by diuron and chlorotoluron, two substituted phenylurea herbicides.

A role for a new vascular enzyme in the metabolism of xenobiotic amines.

Accumulation and metabolism of 2,4,6-trichlorophenyl-4'-aminophenyl ether by carp.

Correlation between acute toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and total body fat content in mammals.

Reactive oxygen metabolites in endotoxin-induced acute renal failure in rats.

Hydrogen peroxide-induced alterations in prostaglandin secretion in the rat colon in vitro.

A critical review of the developmental toxicity and teratogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: recent advances toward understanding the mechanism.

Arachidonic acid metabolism by dioxin-induced cytochrome P-450: a new hypothesis on the role of P-450 in dioxin toxicity.

Heat induces intracellular acidification in human A-431 cells: role of Na(+)-H+ exchange and metabolism.

End-tidal CO₂, CO₂ production, and O₂ consumption as early indicators of approaching hyperthermia.

[Microbial secondary metabolites inhibiting oncogene actions].

Human HLA-DR beta gene hypervariable region homology in the biobreeding BB rat: selection of the diabetic-resistant subline as a rheumatoid arthritis research tool to characterize the immunopathologic response to human type II collagen.

Remarkable residual alterations in responses to feeding regulatory challenges in Han/Wistar rats after recovery from the acute toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Poppy tea drinking in East Anglia.

Inhibition of testicular steroidogenesis in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats: evidence that the key lesion occurs prior to or during pregnenolone formation.

Thermogenesis and thermoregulatory function of iron-deficient women without anemia.

Regulation of polyamine biosynthesis by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Differences in the modulation of P450IA1 and epoxide hydratase expression by benz[a]anthracene and 2,3,7,8-tetrachlorodibenzo-p-dioxin in mouse embryo versus mouse hepatoma-derived cell lines.

Regulation of integrin mobility and cytoskeletal association in normal and RSV-transformed chick embryo fibroblasts.

Potassium accumulation in the globally ischemic mammalian heart. A role for the ATP-sensitive potassium channel.

Human immunodeficiency virus I-induced expression of P-glycoprotein.

[Excretion of phenol and p-cresol in the urine in fasting obese individuals and in persons treated with total enteral nutrition].

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes an extensive alteration of 17 beta-estradiol metabolism in MCF-7 breast tumor cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-induced decrease in the fluidity of rat liver membranes.

Oxidative injury mediated by the hepatic cytochrome P-450 system in conjunction with cellular iron. Effects on the pathway of haem biosynthesis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin enhances responsiveness to post-ingestive satiety signals.

Xenobiotic-inducible expression of murine glutathione S-transferase Ya subunit gene is controlled by an electrophile-responsive element.

G protein gamma subunits contain a 20-carbon isoprenoid.

Effect of rhein on the glucose metabolism of Ehrlich ascites tumor cells.

Processing of the lipid-mobilizing peptide beta-lipotropin in rabbit adipose tissue.

Analysis of photoaffinity-labeled aryl hydrocarbon receptor heterogeneity by two-dimensional gel electrophoresis.

Intraabdominal sepsis: effects on polymorphonuclear leukocyte Fc receptor-mediated phagocytosis.

Stable expression of mouse Cyp1a1 and human CYP1A2 cDNAs transfected into mouse hepatoma cells lacking detectable P450 enzyme activity.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds on the occupied nuclear estrogen receptor in MCF-7 human breast cancer cells.

[Therapeutic effect of antioxidant dibunol in experimental alcoholic cardiomyopathy].

Mechanism of the toxicity of 2,3,7,8-TCDD.

Isoproterenol-induced maximal heart rate in normothermic and hyperthermic horses.

Identification of 2-(2'-octenyl) succinic acid in urine.

[Effect of monoamine neurotransmitters in the hypothalamus in a cortisol-induced rat model of yang-deficiency].

Induction of DNA damage by dimethylarsine, a metabolite of inorganic arsenics, is for the major part likely due to its peroxy radical.

Hormone-dependent phosphorylation of the glucocorticoid receptor occurs mainly in the amino-terminal transactivation domain.

Decreased survival rate of pancreatic acinar cells isolated from rats with acute pancreatitis.

Desferrioxamine-induced alterations in hepatic iron distribution, DNA damage and lipid peroxidation in control and 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

Relative teratogenicity of nitrofen analogs in mice: unchlorinated, monochlorinated, and dichlorinated-phenyl ethers.

Role of the Ah locus in suppression of cytotoxic T lymphocyte activity by halogenated aromatic hydrocarbons (PCBs and TCDD): structure-activity relationships and effects in C57Bl/6 mice congenic at the Ah locus.

A 42-kD tyrosine kinase substrate linked to chromaffin cell secretion exhibits an associated MAP kinase activity and is highly related to a 42-kD mitogen-stimulated protein in fibroblasts.

Synthesis of human splenin (hSP) and examination of its immunological effects on the impaired T- and B-lymphocytes in uremic patients.

Ethylene dichloride: the influence of disulfiram or ethanol on oncogenicity, metabolism, and DNA covalent binding in rats.

Tissue distribution, metabolism, and excretion of 14C-TCDD in a TCDD-susceptible and a TCDD-resistant rat strain.

Ibuprofen, a putative anti-cataract drug, protects the lens against cyanate and galactose.

Relative toxicity and tumor-promoting ability of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), 2,3,4,7,8-pentachlorodibenzofuran (PCDF), and 1,2,3,4,7,8-hexachlorodibenzofuran (HCDF) in hairless mice.

Airway opioid receptors mediate inhibition of cough and reflex bronchoconstriction in guinea pigs.

Characterization of the Ah receptor mediating aryl hydrocarbon hydroxylase induction in the human liver cell line Hep G2.

The role of pituitary beta-endorphin in mediating corticotropin-releasing factor-induced antinociception.

Altered collagen metabolism in osteogenesis imperfecta fibroblasts: a study on 33 patients with diverse forms.

Changes in the composition and metabolism of arterial collagens during the development of pulmonary hypertension in rabbits.

Heat shock and arsenite increase expression of the multidrug resistance (MDR1) gene in human renal carcinoma cells.

Urinary levels of proteins and metabolites in workers exposed to toluene. A cross-sectional study.

The effects of TCDD on receptors for epidermal growth factor, glucocorticoid, and estrogen in Ah-responsive and -nonresponsive congenic mice and the effects of TCDD on estradiol metabolism in a liver tumor promotion model in female rats.

The specific DNA binding activity of the dioxin receptor is modulated by the 90 kd heat shock protein.

Inhibition of lipoxygenase of rat dental pulp and human platelets by phenolic dental medicaments.

Marfan syndrome: absence of type I or III collagen structural defects in 25 patients.

Role of hypergastrinemia in the antiatropy effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on oxyntic gland mucosa of the rat stomach.

Cytotoxicity of lymphokine-activated killer cells against human neuroblastoma cells: modulation by neuroblast differentiation.

A new perspective of S-antigen from immunochemical analysis.

Absorption, distribution, excretion and metabolism of a single oral dose of [¹⁴C]tri-o-cresyl phosphate (TOCP) in the male rat.

A complex effect of arsenite on the formation of alpha-ketoglutarate in rat liver mitochondria.

Use of fetal mouse salivary glands in culture to detect embryotoxicity: evaluation of eight additional chemicals.

Effects of glutathione depletion on the acute nephrotoxic potential of arsenite and on arsenic metabolism in hamsters.

Mitochondrial respiratory inhibition by N-methylated beta-carboline derivatives structurally resembling N-methyl-4-phenylpyridine.

Influence of SK&F 95587 and BN 50730 on bronchoconstrictor responses in the cat.

Mechanism of L-alpha-methyldopa transport through a monolayer of polarized human intestinal epithelial cells (Caco-2).

Memory consolidation of weak training experiences by hormonal treatments.

Metabolism of exogenous substrates by coronary endothelial cells in culture.

The antigenic structure of the human glycoprotein hormone alpha-subunit: II. Cross-species comparisons.

Induction of drug-metabolizing enzymes by xenobiotics.

Cloning of the E. coli O-acetylserine sulfhydrylase gene: ability of the clone to produce a mutagenic product from azide and O-acetylserine.

The contribution of N-oxidation to the metabolism of the food-borne carcinogen 2-amino-3,8-dimethylimidazo[4,5-f]quinoxaline in rat hepatocytes.

[Effect of inflammatory mediators on respiration in rat liver mitochondria].

Metabolism and covalent binding of [¹⁴C]toluene by human and rat liver microsomal fractions and liver slices.

Abscisic acid and osmoticum prevent germination of developing alfalfa embryos, but only osmoticum maintains the synthesis of developmental proteins.

Prothymocyte activity is reduced by perinatal 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

Characterization of the interaction of parathyroid hormone with the mitochondrial ATPase.

Processing of thyrotropin-releasing hormone (TRH) prohormone in the rat olfactory bulb generates novel TRH-related peptides.

Mechanisms of cyclophosphamide action on hepatic P-450 expression.

Uptake of the cephalosporin, cephalexin, by a dipeptide transport carrier in the human intestinal cell line, Caco-2.

Changes in rat brain monoamines, monoamine metabolites and histamine after a single administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Consideration of both genotoxic and nongenotoxic mechanisms in predicting carcinogenic potential.

S-oxygenation of thiobencarb (Bolero) in hepatic preparations from striped bass (*Morone saxatilis*) and mammalian systems.

Interaction of Mesna (2-mercaptoethane sulfonate) with the mutagenicity of cyclophosphamide in vitro and in vivo.

[The effects of metabolic inhibitors on the excitability of the cells in embryonic epidermis of *Cynops orientalis*].

Energy dependence of cytosolic enzyme efflux from rat skeletal muscle.

Branched Chain Amino Acid Metabolism in the Biosynthesis of *Lycopodium pennellii* Glucose Esters.

delta-Aminolevulinic acid dehydratase in rat liver: studies on the effects of ethanol, acetaldehyde, and B6 vitamers.

2-Nitrofluorene metabolism in the rat lung. Pharmacokinetic and metabolic effects of beta-naphthoflavone treatment.

Synthesis and preliminary evaluation of carbon-11-meta-hydroxyephedrine: a false transmitter agent for heart neuronal imaging.

Energy dependence of sodium-calcium exchange in vascular smooth muscle cells.

Comparison of the intoxication pathways of tumor necrosis factor and diphtheria toxin.

Cellular responses to oxidative stress: the [Ah] gene battery as a paradigm.

Evidence for the absence of cysteine S-conjugate N-acetyltransferase activity in the metabolism of propachlor, naphthalene, and dichlobanil in calves.

Binding of aromatic amines to the rat hepatic Ah receptor in vitro and in vivo and to the 8S and 4S estrogen receptor of rat uterus and rat liver.

Altered regulation of pituitary gonadotropin-releasing hormone (GnRH) receptor number and pituitary responsiveness to GnRH in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated male rats.

[Ifosfamide-induced urinary bladder lesion and its inhibition by mesna].

Flow cytometric analysis of lymphocyte subpopulations in the spleen and thymus of mice exposed to an acute immunosuppressive dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Structure and partial amino acid sequence of calf thymus DNA topoisomerase II: comparison with other type II enzymes.

Contact site between inner and outer mitochondrial membrane: a dynamic microcompartment for creatine kinase activity.

Ferrous sulfate combined with ascorbic acid does not significantly reduce acetaldehyde accumulation in the blood of alcoholized rats treated with disulfiram or betalactam antibiotics.

Inorganic arsenic methylation by rat tissue slices.

Oxygen uptake and mean blood pressure as indicators of induced hyperthermia.

Age-related changes in dermal absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,4,7,8-pentachlorodibenzofuran.

Halothane impairs the bioenergetic functions of isolated rat liver mitochondria.

The role of cytochromes P-450 and flavin-containing monooxygenase in the metabolism of (S)-nicotine by rabbit lung.

Metabolism-based covalent bonding of the heme prosthetic group to its apoprotein during the reductive debromination of BrCCl₃ by myoglobin.

Complete amino acid sequence of tenebrosin-C, a cardiac stimulatory and haemolytic protein from the sea anemone *Actinia tenebrosa*.

2,3,7,8-tetrachlorodibenzo-p-dioxin increases the potency of androgens and estrogens as feedback inhibitors of luteinizing hormone secretion in male rats.

Sequence analysis, tissue distribution and regulation by cell depolarization, and second messengers of bovine secretogranin II (chromogranin C) mRNA.

Uptake and phytotoxicity of the herbicide metsulfuron methyl in corn root tissue in the presence of the safener 1,8-naphthalic anhydride.

Primary structure of bovine adrenal phenylethanolamine N-methyltransferase.

Involvement of cytochrome P-450c in alpha-naphthoflavone metabolism by rat liver microsomes.

³¹P NMR studies of ATP concentrations and Pi-ATP exchange in the rat kidney in vivo: effects of inhibiting and stimulating renal metabolism.

Intracellular accumulation of azithromycin by cultured human fibroblasts.

Influence of antibiotics on intestinal tract survival and translocation of environmental *Pseudomonas* species.

Characteristics of histamine release from rat mast cells induced by a bracken toxin, braxin A1.

Interrelation between nucleotide degradation and aldehyde formation in red blood cells. Influence of xanthine oxidase on metabolism: an application of nucleotide and aldehyde analyses by high-performance liquid chromatography.

[Spectroscopic properties of the partial beta-agonist doxaminol (BM 10.188) and its metabolites].

Metabolism of metolachlor by a microsomal fraction isolated from grain sorghum (*Sorghum bicolor*) shoots.

Choline uptake by cerebral capillary endothelial cells in culture.

Age-related DNA modifications (I-compounds): modulation by physiological and pathological processes.

[Arachidonic acid-induced aggregation of human peripheral blood neutrophils in the presence of interceptors of active forms of oxygen].

Metabolism of alachlor by rat and mouse liver and nasal turbinate tissues.

Isolation of viable intestinal epithelial cells and their use for in vitro toxicity studies.

Identification of the binding sites of benzyl penicilloyl, the allergenic metabolite of penicillin, on the serum albumin molecule.

Determination of [³H]-2,3,7,8-tetrachlorodibenzo-p-dioxin in human feces to ascertain its relative metabolism in man.

Selective affinity labeling of a 27-kDa integral membrane protein in rat liver and kidney with N-bromoacetyl derivatives of L-thyroxine and 3,5,3'-triiodo-L-thyronine.

Adrenal-dependent leucopenia after short-term exposure to various airborne irritants in rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin pretreatment of female mice altered tissue distribution but not hepatic metabolism of a subsequent dose.

Vectorial secretion of prostaglandins by polarized rodent uterine epithelial cells.

Subunit characterization and primary structure of bovine adrenal medullary dopamine beta-hydroxylase.

Uptake and metabolism of clomazone in tolerant-soybean and susceptible-cotton photomixotrophic cell suspension cultures.

NTP Toxicology and Carcinogenesis Studies of Iodinated Glycerol (Organidin(R).) (CAS No. 5634-39-9) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Thionamides and arsenite inhibit specific T3 binding to the hepatic nuclear receptor.

The induction of alkoxyresorufin metabolism: a potential indicator of environmental contamination.

Use of fragments of hirudin to investigate thrombin-hirudin interaction.

Impairment of prothymocyte activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

CO(2) Incorporation and 4-Hydroxy-2-Methylbenzoic Acid Formation during Anaerobic Metabolism of m-Cresol by a Methanogenic Consortium.

Glucocorticoid receptor binding to calf thymus DNA. 2. Role of a DNA-binding activity factor in receptor heterogeneity and a multistep mechanism of receptor activation.

Measurements of viability suitable for plant tissue cultures.

Glutathione conjugation and cytochrome P-450 metabolism of methyl chloride in vitro.

Reactive metabolite formation catalysed by cytochrome P-450j.

Specific teratogenic action of 2,4,5-trichlorophenoxyacetic acid on mouse and rat whole-embryo cultures.

Preservatives in insulin preparations impair leukocyte function. In vitro study.

Interaction of chlorinated phenols with thyroxine binding sites of human transthyretin, albumin and thyroid binding globulin.

Studies on the pharmacokinetics and mutagenic potential of rhodamine B.

Sodium-azide-evoked noradrenaline release from peripheral nerves of rabbit pulmonary artery.

A comparative investigation of the metabolism of methyl bromide and methyl iodide in human erythrocytes.

Effects of perfluoro-n-decanoic acid on the respiratory activity of isolated rat liver mitochondria.

Metabolic inhibitors reversibly alter the basal membrane potential of the gecko retinal pigment epithelium.

Effect of PO₂ and metabolic inhibitors on ionic fluxes across the isolated rabbit corneal endothelium.

Agrobacterium in plant disease, biological disease control and plant genetic engineering.

[Mutagen activity of barium chloride in Salmonella typhimurium].

Metabolism and pulmonary toxicity of cyclophosphamide.

The ostrich pituitary contains a major peptide homologous to mammalian chromogranin A(1-76).

DNA cleavage by phenylhydroquinone: the major metabolite of a fungicide o-phenylphenol.

Hepatotoxin-induced hypertaurinuria: a proton NMR study.

Possible roles of free radicals in alcoholic tissue damage.

The role of hydroxyl radicals in tetrachlorohydroquinone induced DNA strand break formation in PM2 DNA and human fibroblasts.

Transcriptional regulation of 3-methylcholanthrene-inducible P-450 gene responsible for metabolic activation of aromatic carcinogenes.

Differences in time course of hepatocyte and pancreocyte damage after incubation with trypsin, chymotrypsin and 2,4-dinitrophenol.

Disposition, elimination, and metabolism of tri-o-cresyl phosphate following daily oral administration in Fischer 344 male rats.

Metabolism of chloronitrobenzenes by isolated rat hepatocytes.

Genotoxicity assessment of atrazine and some major metabolites in the Ames test.

Inhibitory effect of paraquat on biotransformation of halothane in rabbit liver microsomes.

Cadmium-induced alterations of chlorpropham metabolism in isolated rat hepatocytes.

Diquat hepatotoxicity in the Fischer-344 rat: the role of covalent binding to tissue proteins and lipids.

Paraquat resistance associated with reduced NADPH reductase in an energy-dependent paraquat-accumulating cell line.

[The mutagenicity of organic microcontamination in the environment. III. The mutagenicity of selected herbicides and insecticides in the SOS chromotest].

Calcium carbimide in alcoholism treatment. Part 2: Medical findings of a short-term, placebo-controlled, double-blind clinical trial.

Mutagenicity of dimethylated metabolites of inorganic arsenics.

[Structural changes in the rat cerebral cortex induced by alcohol in combination with aldehyde dehydrogenase inhibitors].

Effects of phosphoramidate mustard and acrolein, cytotoxic metabolites of cyclophosphamide, on mouse limb development in vitro.

DNA strand breaks in mammalian tissues induced by methylarsenics.

Comparative toxicity of allylamine and acrolein in cultured myocytes and fibroblasts from neonatal rat heart.

[Cytogenetic activity of the butylcaptax defoliant transformation product].

[Pathomorphologic and hematologic studies of the immunotoxicity of the phenoxyalkane acid mecoprop in rats].

[Anabolic effects of sodium selenite, vitamin E and retabolil in experimental hypotrophy induced by a pesticide].

Null mutation of copper/zinc superoxide dismutase in *Drosophila* confers hypersensitivity to paraquat and reduced longevity.

The effects of 24% paraquat (1,1'-dimethyl-4,4'-bipyridylium dichloride) on hemodynamics, blood gases, plasma lactate and plasma catecholamines in dogs.

Rat urinary bladder epithelial lesions induced by acrolein.

Free radical effects on lung metabolism.

[Paraquat poisoning: clinical and anatomopathologic aspects in 3 cases].

Effect of paraquat administered intraperitoneally on the nonpolar lipids of rabbits.

[The effects of 1-methyl-4-phenylpyridine (MPP+) on O₂- generation by neutrophils].

[Practical experiences in animal experimental studies with 3(3)-BN-research plans].

The ratio of oxidized/reduced glutathione as an index of oxidative stress in various experimental models of shock syndrome.

Changes in the morphological status of some internal organs in animals exposed to the action of chemicals.

Effects of 2,4-dichlorophenoxyacetic acid (2,4-D) on biogenic amines and their acidic metabolites in brain and cerebrospinal fluid of rats.

The role of peroxisomal fatty acyl-CoA beta-oxidation in bile acid biosynthesis.

The relation between the oxidative biotransformation of hexachlorobenzene and its porphyrinogenic activity.

Effects of cholesterol feeding on the distribution, metabolism, and accumulation of pentachlorobenzene in rats.

Brain biogenic amine levels after methanol administration: possible mechanism of action on central monoaminergic neurons in discrete areas of brain in Wistar rat.

The coincidence of myocardial reperfusion injury and hydrogen peroxide production in the isolated rat heart.

Experimental pulmonary fibrosis induced by paraquat plus oxygen in rats: a morphologic and biochemical sequential study.

Negative correlation of cigarette smoking and dysmenorrhea: reduced prostaglandin synthesis due to beta-endorphin, nicotine, or acrolein antagonism.

Bronchial responsiveness and inflammation in guinea pigs exposed to acrolein.

Inhibition of brain dopa-decarboxylase by RO 4-4602 infused ICV blocks alcohol drinking induced in rats by cyanamide.

Stereoselective sulfation of R,S-4'-hydroxypropranolol by canine hepatic cytosol and partially purified phenolsulfotransferases.

The metabolism of sulfite in liver. Stimulation of sulfate conjugation and effects on paracetamol and allyl alcohol toxicity.

Allyl alcohol- and acrolein-induced toxicity in isolated rat hepatocytes.

The role of sulfation in the metabolic activation of N-hydroxy-4'-fluoro-4-acetylamino-biphenyl.

Metabolism of triiodothyronine in rat hepatocytes.

Growth effects, uptake and metabolism of trifluralin in tissue cultures.

Atrazine biodegradation in rats--a model for mammalian metabolism.

Testosterone metabolism in neuroendocrine organs in male rats under atrazine and deethylatrazine influence.

Inactivation of low-K_m rat liver mitochondrial aldehyde dehydrogenase by cyanamide in vitro. A catalase-mediated reaction.

[The reaction of the endocrine cells of the gastrointestinal tract in response to exposure to 3,6-dichloropicolinic acid].

Detection of free radicals as a consequence of dog tracheal epithelial cellular xenobiotic metabolism.

Liquid chromatographic method for quantitation of glyphosate and metabolite residues in organic and mineral soils, stream sediments, and hardwood foliage.

N-methylation as a toxication route for xenobiotics. II. In vivo formation of N,N'-dimethyl-4,4'-bipyridyl ion (paraquat) from 4,4'-bipyridyl in the guinea pig.

Methoxyflurane enhances allyl alcohol hepatotoxicity in rats. Possible involvement of increased acrolein formation.

Suicide inactivation of lactoperoxidase by 3-amino-1,2,4-triazole.

Drug-induced hydrogen peroxide production in isolated rat hepatocytes.

The accumulation of cystamine and its metabolism to taurine in rat lung slices.

Changes in the inducibility of a hepatic aldehyde dehydrogenase by various effectors.

Metabolism of pentachlorophenol by fish.

[The determination of the herbicide glyphosate and its chief metabolite aminomethylphosphonic acid (AMPA) in drinking water with the aid of HPLC].

Identification of diuron and four of its metabolites in human postmortem plasma and urine by LC/MS with a moving-belt interface.

Influence of hydrogen peroxide on adenine uptake by iris, ciliary epithelium and corneal endothelium.

Comparative effects of pair-feeding and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on various biochemical parameters in female rats.

Changes in the cross-linking of collagen from rat tail tendons due to diabetes.

The adrenocorticotrophic hormone (ACTH)-induced reversal of hemorrhagic shock.

2,3,7,8-tetrachlorodibenzo-p-dioxin-induced porphyria cutanea tarda among pediatric patients.

Epidermal damage induced by irritants in man: a light and electron microscopic study.

Acute toxicity of perfluorodecanoic acid in C57BL/6 mice differs from 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Biological monitoring of arsenic exposure of gallium arsenide- and inorganic arsenic-exposed workers by determination of inorganic arsenic and its metabolites in urine and hair.

Medical monitoring of dioxin clean-up workers.

Protein kinase-C-induced down-regulation of calcitonin receptors and calcitonin-activated adenylate cyclase in T47D and BEN cells.

Effects of the beta-isomer of hexachlorocyclohexane on estrogen-sensitive human mammary tumor cells.

Identification of T cell recognition sites in S-antigen: dissociation of proliferative and pathogenic sites.

Effect of tetrachlorodibenzo-p-dioxin (TCDD) on the glucuronidation of retinoic acid in the rat.

Cytosolic thyroid hormone-binding protein is a monomer of pyruvate kinase.

Albumin decreases hydrogen peroxide and reperfusion injury in isolated rat hearts.

Mitochondrial myopathies: morphological and biochemical studies in human muscle cultures.

Purification and characterization of recombinant human parathyroid hormone-related protein.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced porphyria in genetically inbred mice: partial antagonism and mechanistic studies.

Hexose transport in human myoblasts.

Hemodynamic effects of experimental iron poisoning.

Effect of galactose on interaction of N-(2-hydroxypropyl)methacrylamide copolymers with hepatoma cells in culture: preliminary application to an anticancer agent, daunomycin.

Regional hemodynamic responses to hypoxia and hypermetabolism in polycythemic dogs.

Neoplastic transformation of BALB/3T3 cells by metals and the quest for induction of a metastatic phenotype.

Tumor cell permeability to peplomycin.

Subunit structure of the erythropoietin receptor.

³¹P and ¹³C NMR studies of isolated perfused hematopoietic cells from leukemic mice.

Regulation of mouse CYP1A1 gene expression by dioxin: requirement of two cis-acting elements during induction.

Control of glycogen synthase and phosphorylase in hepatocytes from diabetic rats. Effects of glucagon, vasopressin, and vanadate.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) kills glucocorticoid-sensitive thymocytes in vivo.

Target tissue morphology and serum biochemistry following 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure in a TCDD-susceptible and a TCDD-resistant rat strain.

Chronic arsenicism with vitiligo, hyperthyroidism, and cancer.

Effects of trypsin, chymotrypsin, and uncoupling on survival of isolated acinar cells from rat pancreas.

A critical view of the mechanism(s) of toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin. Implications for human safety assessment.

A case-control study of multiple myeloma nested in the American Cancer Society prospective study.

The anti-inflammatory effects of phenolic dental medicaments as determined by mouse ear edema assay.

Mode of metabolism is altered in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treated rats.

Mast cell chymase. A potent secretagogue for airway gland serous cells.

Separation methods for the study of collagen and treatment of collagen disorders.

Purification and characterization of the 180-kDa membrane guanylate cyclase containing atrial natriuretic factor receptor from rat adrenal gland and its regulation by protein kinase C.

A survey of the concentration of 19-OH F1 alpha/F2 alpha prostaglandins in the semen of fertile, infertile and vasectomized men and their stability in both liquid semen and semen stains.

Reversible downregulation of thiazide diuretic receptors by acute renal ischemia.

Synthesis of [Glu34]human splenin (hSP) and examination of its immunological effect on the reduced B-lymphocytes of uremic patients.

Immunotoxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in a complex environmental mixture from the Love Canal.

Involvement of ventral medullary surface in respiratory responses induced by 2,4-dinitrophenol.

Carriage of *Staphylococcus aureus* and inflamed infusion sites with insulin-pump therapy.

Loss of a calcium requirement for protein synthesis in pituitary cells following thermal or chemical stress.

Serum-free culture of insulin-secreting clonal cells from a hamster insulinoma.

Lymphocyte stem cell alterations following perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effects of commercial chlorophenolate, 2,3,7,8-TCDD, and pure phenoxyacetic acids on hepatic peroxisome proliferation, xenobiotic metabolism and sister chromatid exchange in the rat.

Immuno-toxicology and -pharmacology.

Three models of free radical-induced cell injury.

Atrial natriuretic peptide and sodium azide dependent guanylate cyclase activities in placentas from normal and severely toxemic patients.

Differential effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on adipose tissue lipoprotein lipase activity in the guinea pig, rat, hamster, rabbit, and mink.

Immunopharmacological studies on *Picrorhiza kurroa* Royle-ex-Benth. Part IV: Cellular mechanisms of anti-inflammatory action.

The effect of oxidants on biomembranes and cellular metabolism.

Myoinositol inhibits proliferation of cultured Schwann cells: evidence for neurotoxicity of myoinositol.

Relation between cytochrome P450IA1 expression and estrogen receptor content of human breast cancer cells.

Cellular metabolism of arsenic studied in mammalian cells in vitro.

Effect of DNOC, Ferbam and Imidan exposure on mouse sperm morphology.

Dimethylated arsenics induce DNA strand breaks in lung via the production of active oxygen in mice.

Biphasic response for hepatic microsomal enzyme induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57BL/6J and DBA/2J mice.

Bacterial metabolism of 2,6-xyleneol.

Primary structure of a ribonuclease from bullfrog (*Rana catesbeiana*) liver.

Effect of dietary lipids and vitamin E on in vitro lipid peroxidation in rat liver and kidney homogenates.

Modification of leucine transport across bovine pigment epithelium by metabolic stress.

Involvement of reactive oxygen metabolites in the candidacidal activity of human neutrophils stimulated by muramyl dipeptide or tumor necrosis factor.

Marked alterations in retinoid homeostasis of Sprague-Dawley rats induced by a single i.p. dose of 10 micrograms/kg of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Selective mouse breeding for short ethanol sleep time has led to high levels of hepatic aromatic hydrocarbon (Ah) receptor.

A dense core vesicle protein is restricted to the cortex of granules in the exocrine atrial gland of *Aplysia californica*.

Metabolism of the glutathione-acrolein adduct, S-(2-aldehyde-ethyl)glutathione, by rat liver alcohol and aldehyde dehydrogenase.

Uncoupler resistance in *Escherichia coli*: the role of cellular respiration.

Plasma concentrations of pituitary hormones in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated male rats.

Decreased activation of carcinogens in the liver of carcinogen-resistant rats.

The metabolism of pentachlorobenzene by rat liver microsomes: the nature of the reactive intermediates formed.

Sulphotransferase-mediated activation of the carcinogen 5-hydroxymethyl-chrysene. Species and sex differences in tissue distribution of the enzyme activity and a possible participation of hydroxysteroid sulphotransferases.

Prolonged aerobic exercise: physiological studies in rat gastrocnemius with additional observations on the effects of acute mitochondrial blockade.

Effects of the new nitrosourea derivative, fotemustine, on the glutathione reductase activity in rat tissues in vivo and in isolated rat hepatocytes.

Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in rat liver: lack of sensitivity to alkaline phosphatase when compared with that of glucocorticoid receptor.

Methods of microphotometric assay of succinate dehydrogenase and cytochrome c oxidase activities for use on human skeletal muscle.

A rapid response to a plant hormone: auxin stimulates phospholipase A2 in vivo and in vitro.

[Urinary bioavailability of sodium-2-mercaptoethanesulfonate (Uromitexan) following intravenous, subcutaneous and continuous subcutaneous administration].

Thyroglobulin-mediated one- and two-electron oxidations of glutathione and ascorbate in thyroid peroxidase systems.

Milk fatty acid composition and plasma energy metabolite concentrations in lactating cows fed medium-chain triglycerides.

Characterization of 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated decreases in dexamethasone binding to rat hepatic cytosolic glucocorticoid receptor.

Differential metabolism of sodium azide in maize callus and germinating embryos.

4-(2-amino-1-methylimidazo[4,5-b]pyrid-6-yl)phenyl sulfate--a major metabolite of the food mutagen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) in the rat.

Effects of metabolic inhibitors and incubation temperature on the saturable uptake of propranolol by isolated rat lung tissue.

Collagen metabolism in ultraviolet irradiated hairless mouse skin and its correlation to histochemical observations.

Characterization of multiple forms of the Ah receptor: comparison of species and tissues.

'Perforated patch recording' allows long-term monitoring of metabolite-induced electrical activity and voltage-dependent Ca²⁺ currents in pancreatic islet B cells.

Transport of cefodizime, a novel third generation cephalosporin antibiotic, in isolated rat choroid plexus.

Sodium arsenite induced alterations in bilirubin excretion and heme metabolism.

Aplysia californica neurons R3-R14: primary structure of the myoactive histidine-rich basic peptide and peptide I.

Multifunctional receptor model for dioxin and related compound toxic action: possible thyroid hormone-responsive effector-linked site.

Metabolism of phenol and hydroquinone to reactive products by macrophage peroxidase or purified prostaglandin H synthase.

Differential control and calcium-dependence of production of endothelium-derived relaxing factor and prostacyclin by pig aortic endothelial cells.

Metabolic activation and nucleic acid binding of acetaminophen and related arylamine substrates by the respiratory burst of human granulocytes.

Effects of pulsed electromagnetic fields on rat skin metabolism.

The effect of hypoxia and of energy depletion on 1,4-dihydropyridine binding sites in rat cardiac membrane fragments.

Urinary arsenic concentrations and speciation in Cornwall residents.

NTP Toxicology and Carcinogenesis Studies of 2,4-Dichlorophenol (CAS No. 120-83-2) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Release of a volatile factor from solutions of oxazaphosphorines which damage normal and malignant cells.

Intestinal absorption of aluminum in rats: stimulation by citric acid and inhibition by dinitrophenol.

[Effect of antibiotics on intestinal microflora and production of metabolites].

Management of acute iron overdose.

Effects of low insulin levels on rat embryonic growth and development.

Determination of the GABAergic antidepressant drug fengabine and some of its metabolites in plasma by capillary gas chromatography with electron-capture detection.

Induction of somatic embryogenesis in leaf-derived callus of *Vicia narbonensis* L.

[Application of high-pressure liquid chromatography in the analysis of urinary metabolites of aromatic solvents].

[The effect of hepatotoxins on the activity of organelle-specific enzymes and metabolism of liver lipids].

The effect of chlorinated chemicals on porphyrin metabolism--the synergistic effect with chlorinated chemicals and low concentrations of griseofulvin.

[Comparative studies of the recombinogenic action of some pesticides on yeasts in the absence and presence of metabolic activation].

Expression and characterization of erythropoietin receptors on normal human bone marrow cells.

Environmental occurrence, abundance, and potential toxicity of polychlorinated biphenyl congeners: considerations for a congener-specific analysis.

The metabolism of ethanol-derived acetaldehyde by alcohol dehydrogenase (EC 1.1.1.1) and aldehyde dehydrogenase (EC 1.2.1.3) in *Drosophila melanogaster* larvae.

Deuterium isotope effects on toluene metabolism. Product release as a rate-limiting step in cytochrome P-450 catalysis.

Phosphotryptic peptide analysis of human progesterone receptor. New phosphorylated sites formed in nuclei after hormone treatment.

Iron stimulation of free radical-mediated porphyrinogen oxidation by hepatic and renal mitochondria.

The effect of a low pH saline perfusate upon the integrity of the energy-depleted rat blood-brain barrier.

Enrichment of dibenzofuran utilizing bacteria with high co-metabolic potential towards dibenzodioxin and other anellated aromatics.

Complete amino acid sequence of chicken liver acyl carrier protein derived from the fatty acid synthase.

Sequence simplification and the intra- and intermolecular self-recognition properties of vasopressin/neurophysin biosynthetic precursor.

N-hydroxy-N-arylacetamides. V. Differences in the mechanism of haemoglobin oxidation in vitro by N-hydroxy-4-chloroacetanilide and N-hydroxy-4-chloroaniline.

Dual mechanism involved in the hydrolysis of polyphosphoinositides in rat pancreatic islets.

Synergistic toxicity between arsenic and methylated selenium compounds.

Structural characterization and localization of corticotropin-releasing factor in testis.

In vivo and in vitro studies of the hepatotoxic effects of 4-chlorophenol in mice.

Secretion by *Trypanosoma cruzi* of a hemolysin active at low pH.

Amino acid sequence of locust neuroparsins.

Sorption and metabolism of metolachlor by a bacterial community.

NTP Toxicology and Carcinogenesis Studies of Two Pentachlorophenol Technical-Grade Mixtures (CAS No. 87-86-5) in B6C3F1 Mice (Feed Studies).

Energy metabolism of monocytic Ehrlichia.

Uptake of colchicine, a microtubular system disrupting agent, by isolated rat hepatocytes.

Analysis of the hyperpolarizing effect of catecholamines on canine cardiac Purkinje fibres.

Biliary excretion of acetaminophen-glutathione as an index of toxic activation of acetaminophen: effect of chemicals that alter acetaminophen hepatotoxicity.

[Histochemical study on the mucosubstances of the calculi of the main excretory duct of the human submandibular gland].

Non-mitochondrial calcium ion regulation in rat ventricular myocytes.

Rat aglycotransferrin and human monoglycotransferrin: production and metabolic properties.

Activation of the food-derived mutagen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine by rabbit and human liver microsomes and purified forms of cytochrome P-450.

Surface tension in the developing mammal: anisotropic tension generation in the dorsal skin of the perinatal rat.

The complete amino acid sequence of growth hormone of an elasmobranch, the blue shark (*Prionace glauca*).

The complete amino acid sequence of growth hormone from the sea turtle (*Chelonia mydas*).

Construction of a secretion vector production of peptide hormones in *Escherichia coli* (extracellular production of calcitonin as fused protein).

Rat lung glucose metabolism after 24 h of exposure to 100% oxygen.

Amino-terminal sequence analysis of rat heart and muscle glycogen synthase: homology to the rabbit enzyme and the implications for hormonal control.

Inhibitory effects of mitochondrial metabolic inhibitors on interferon action.

Cholinesterase inhibition by organophosphorus and carbamate pesticides in aggregate cultures of neural cells from the foetal rat brain: The effects of metabolic activation and pesticide mixtures.

Detection of reactive metabolites in vitro.

Comparative dermal absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin and three polychlorinated dibenzofurans.

Similarities of toluene and o-cresol neuroexcitation in rats.

[Centrosome behavior in the exposure of tissue culture cells to energy metabolism inhibitors].

Short-term effects of chlorophenols on the function and viability of primary cultured rat hepatocytes.

Fatty acids are not an important fuel for coronary microvascular endothelial cells.

Effects of immunosuppressive chemicals on lymphoid development in foetal thymus organ cultures.

[Features of ultrastructural changes of tumor cells in tissue culture under the effect of energy metabolism inhibitors].

[Method for simultaneous determination of six metabolites of toluene, xylene and ethylbenzene, and its application to exposure monitoring of workers in a printing factory with gravure machines].

Ostrich MSEL-neurophysin belongs to the class of two-domain "big" neurophysin as indicated by complete amino acid sequence of the neurophysin/copeptin.

Characteristics of the gastrointestinal absorption of morphine in rats.

Embryotoxicity of phenyl ketone analogs of cyclophosphamide.

Metabolism of transplacental carcinogens.

New perspectives in catalase-dependent ethanol metabolism.

Effect of quinidine on the hepatic uptake of digoxin in guinea pigs.

[Effect of amines on insulin-stimulated processes: the transport of sugars and synthesis of glycogen in frog sartorius muscles].

Influence of aging on chemically induced hepatotoxicity: role of age-related changes in metabolism.

Improved procedures for pineal gland fixation for electron microscopy.

Genotoxicity of azidoalanine in mammalian cells.

Steroid and xenobiotic effects on the adrenal cortex: mediation by oxidative and other mechanisms.

Human urinary prokallikrein--structural analysis on activation mechanism.

[Levels of metabolites of selected chemical compounds in the urine of workers in pitch coke plant].

Inducibility of liver cytosolic aldehyde dehydrogenase activity in various animal species.

Polybrominated naphthalene and diiodobenzene interactions with specific binding sites for 2,3,7,8-tetrachlorodibenzo-p-dioxin in rat liver cytosol.

Cationic polyelectrolytes: potent opsonic agents which activate the respiratory burst in leukocytes.

Metabolic activation of hydroquinone by macrophage peroxidase.

Dimethylthiourea prevents hydrogen peroxide and neutrophil mediated damage to lung endothelial cells in vitro and disappears in the process.

The in vitro metabolites of 2,4,6-trichlorophenol and their DNA strand breaking properties.

Sodium-azide-evoked noradrenaline and catecholamine release from peripheral sympathetic nerves and chromaffin cells.

H₂O₂ and cGMP may function as an O₂ sensor in the pulmonary artery.

Hormonal contraceptive increases plasma lipid peroxides in female rats. Relationship to platelet aggregation and lipid biosynthesis.

Membrane oxidative metabolism of human eosinophilic cell line EoL-1 in response to phorbol diester and formyl peptide: synergistic augmentation by interferon-gamma and tumor necrosis factor.

Effects of glutaraldehyde and metabolic inhibitors on the vibratory responses in the isolated cochlea.

Polychlorinated biphenyls (PCBs): mutagenicity and carcinogenicity.

Aspects of allyl alcohol toxicity.

Chlorinated phenols as metabolites of lindane. Evaluation of the degree of conjugation in rat urine.

Nucleic acid binding and mutagenicity of active metabolites of 2-amino-3,8-dimethylimidazo[4,5-f]quinoxaline.

Biodegradation of pentachlorophenol by the white rot fungus *Phanerochaete chrysosporium*.

Light and electron microscopic study of the liver in paraquat poisoning.

[No Parkinsonian syndrome following acute paraquat poisoning].

[The influence of long-term utilization of some herbicides on oral cavity tissues of white rats].

Influence of bipyridylum compounds on microsomal mixed-function oxidation activities.

Evaluation of propanil and its N-oxidized derivatives for genotoxicity in the *Salmonella typhimurium* reversion, Chinese hamster ovary/hypoxanthine guanine phosphoribosyl transferase, and rat hepatocyte/DNA repair assays.

Delayed sudden death after ingestion of MCPP and ioxynil: an unusual presentation of hormonal weedkiller intoxication.

Comparison of chemical biodegradation rates in BOD dilution and natural waters.

Allylamine-induced vascular toxicity in vitro: prevention by semicarbazide-sensitive amine oxidase inhibitors.

Inhibition of mouse hepatocyte intercellular communication by paraquat-generated oxygen free radicals.

Prolonged, intravenous paraquat infusion in the rat. II. Paraquat-induced alterations in lung polyamine metabolism.

Glucocorticoid toxicity in the hippocampus: in vitro demonstration.

[The mutagenicity of organic microcontaminants in the environment. I. The mutagenicity of selected herbicides and insecticides in the *Salmonella* microsome test (Ames test) with regard to the pathogenic potency of contaminated ground and drinking water].

Oxidant stress following renal ischemia: changes in the glutathione redox ratio.

On the mutagenic and recombinogenic activity of certain herbicides in *Salmonella typhimurium* and in *Aspergillus nidulans*.

Behavioural and electrocortical changes induced by paraquat after injection in specific areas of the brain of the rat.

Adverse effects of (15S)-15-methyl-prostaglandin E1 in normal and paraquat-exposed rats.

Limited dermal ossification: a case report.

Mechanisms of fetal alcohol effects: role of acetaldehyde.

Uptake and accumulation of pentachlorophenol and sodium pentachlorophenate by earthworms from water and soil.

Carcinogenicity and genotoxicity of the herbicide 2,4,5-trichlorophenoxyethanol (TCPE) contaminated with dioxin.

Failure of haemoperfusion and haemodialysis to prevent death in paraquat poisoning. A retrospective review of 42 patients.

Effects of methylprednisolone on acute lung paraquat toxicity in sheep.

Effects of Gramoxone-induced reactive oxygen radicals on eicosanoid synthesis of mouse lung.

Cloning, physical mapping and expression of chromosomal genes specifying degradation of the herbicide 2,4,5-T by *Pseudomonas cepacia* AC1100.

Agent-specific ras oncogene activation in rat thyroid tumours.

Autoradiography of [¹⁴C]paraquat or [¹⁴C]diquat in frogs and mice: accumulation in neuromelanin.

Increased oxygen radical-dependent inactivation of metabolic enzymes by liver microsomes after chronic ethanol consumption.

Role of acidosis in the changes of rat brain monoamines after methanol administration & effect of blocking methanol metabolism by 4-methyl pyrazole & 3-amino-1,2,4-triazole.

Respiratory chain inhibitors slow gluconeogenesis.

Effects of cyclophosphamide and a metabolite, acrolein, on *Naegleria fowleri* in vitro and in vivo.

Induction of an allergic reaction to alcohol metabolites by immunization.

Xanthine oxidase produces hydrogen peroxide which contributes to reperfusion injury of ischemic, isolated, perfused rat hearts.

The effect of iron overload on the mitochondrial porphyrin level in the hexachlorobenzene induced experimental porphyria.

[Effect of cyanamide on the level of endogenous ethanol in the liver of normal rats and in hypocorticism].

Enhancement of in vivo and in vitro murine immune responses by the cyclophosphamide metabolite acrolein.

Protective effect of alpha-human atrial natriuretic polypeptide (alpha-hANP) on chemical-induced pulmonary edema.

Metabolism of glyphosate in *Pseudomonas* sp. strain LBr.

Residues of dacthal and metabolites in field-treated Chinese cabbage.

Urinary atrazine metabolites as indicators for rat and human exposure to atrazine.

Prostaglandin D2 generation in mouse bone marrow-derived mast cells exposed to dexamethasone is associated with endogenous peroxidase activity.

Influence of readily metabolizable carbon on pentachlorophenol metabolism by a pentachlorophenol-degrading *Flavobacterium* sp.

Mitochondria as the primary site of acetaldehyde metabolism in beef and pig liver slices.

Effects of disulfiram, cyanamide and 1-aminocyclopropanol on the aldehyde dehydrogenase activity in human erythrocytes and leukocytes.

Oxidative cell injury in the killing of cultured hepatocytes by allyl alcohol.

Metabolism of profluralin in rats. 1. Identification of metabolites.

Role of thiols in the in-vitro methylation of inorganic arsenic by rat liver cytosol.

The fate of 4-cyanoacetanilide in rats and mice; mechanism of formation of a novel electrophilic metabolite.

In vivo role of the microsomal ethanol-oxidizing system in ethanol metabolism by deermice lacking alcohol dehydrogenase.

Separation and identification of trifluralin metabolites by open-tubular liquid chromatography/negative chemical ionization mass spectrometry.

Isolation of gene fusions (soi::lacZ) inducible by oxidative stress in *Escherichia coli*.

Metabolizing systems in cell culture cytotoxicity tests.

[Effect of different routes of administration of chlorine derivatives of phenoxy acids on microsomal oxidation in the liver].

"The influence of conformational factors on the metabolic conjugation of aryloxyacetates"--a comment.

Thermospray liquid chromatographic-mass spectrometric method for the analysis of metribuzin and its metabolites.

Depletion of hepatic glutathione by ethanol occurs independently of ethanol metabolism.

In vitro/in vivo effects of Mesna on the genotoxicity and toxicity of cyclophosphamide--a study aimed at clarifying the mechanism of Mesna's anticarcinogenic activity.

Mutagenicity and in vitro covalent DNA binding of 2-hydroxyamino-3-methylimidazo[4,5-f]quinoline.

Metabolism and excretion of orally and intraperitoneally administered methylarsonic acid in the hamster.

Assessment of the mutagenicity of fractions from s-triazine-treated Zea mays.

Acute effects of the aldehyde dehydrogenase inhibitors, disulfiram, pargyline and cyanamide, on circulating ketone body levels in the rat.

Auxin induces rapid changes in phosphatidylinositol metabolites.

Enzymic synthesis of indole-3-acetyl-1-O-beta-d-glucose. II. Metabolic characteristics of the enzyme.

Hormonal induction and antihormonal inhibition of tracheary element differentiation in Zinnia cell cultures.

Supercritical fluid extraction coupled with supercritical fluid chromatography for the separation of sulfonylurea herbicides and their metabolites from complex matrices.

Fate and metabolism of dichlorprop in cereals and field grass.

Effects of 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP), cyperquat (MPP+) and paraquat on isolated mitochondria from rat striatum, cortex and liver.

DNA adduct formation by alachlor metabolites.

Effect of chronic ethanol treatment under partial catalase inhibition on the activity of enzymes related to peroxide metabolism in rat liver and heart.

Elevated plasma corticosterone levels and histopathology of the adrenals and thymuses in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

Altered regulation of P-450IA1 expression in a multidrug-resistant MCF-7 human breast cancer cell line.

Toxicology and pathology of methyl bromide in F344 rats and B6C3F1 mice following repeated inhalation exposure.

Cutaneous manifestations of tetrachlorodibenzo-p-dioxin in children and adolescents. Follow-up 10 years after the Seveso, Italy, accident.

Steroid hormones and medications that alter cancer risks.

Corticosterone modulates acute toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in male Sprague-Dawley rats.

Screening of pharmacological agents given peripherally with respect to TCDD-induced wasting syndrome in Long-Evans rats.

Kappa/lambda immunoglobulin distribution in Graves' thyroid-stimulating antibodies. Simultaneous analysis of C lambda gene polymorphisms.

Human dioxin-inducible cytosolic NAD(P)H:menadione oxidoreductase. cDNA sequence and localization of gene to chromosome 16.

Biochemical and functional effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the heart of female rats.

Atypical myoglobinuria: an acute myopathy in grazing horses.

Mechanism of L-triiodothyronine (T3) uptake by glial C6 cells: regulation by butyrate.

Intermediary metabolism of 2,6-dichlorobenzonitrile (dichlobenil) in chickens and growth of chickens fed dichlobenil.

[Studies on serum ketone bodies in patients with hyperthyroidism].

Isolation and structural characterization of thymosin-beta 4 from a human medullary thyroid carcinoma.

Type I procollagen in the severe non-lethal form of osteogenesis imperfecta. Defective pro-alpha 1(I) chains in a patient with abnormal proteoglycan metabolism and mineral deposits in the dermis.

Synthetic peptides derived from IRBP induce EAU and EAP in Lewis rats.

Protein content and thyroid hormone release in vitro by differentiated thyroid cancer cells in the presence of estradiol, dehydroepiandrosterone, polypeptidic hormones and pesticides.

Degrading process of acute ischemic myocardial cells.

Multifactorial resistance to adriamycin: relationship of DNA repair, glutathione transferase activity, drug efflux, and P-glycoprotein in cloned cell lines of adriamycin-sensitive and -resistant P388 leukemia.

Reduction of adipose tissue lipoprotein lipase activity as a result of in vivo administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin to the guinea pig.

Evidence for two independent pathways of insulin-receptor internalization in hepatocytes and hepatoma cells.

Microbial amino acid metabolites and bladder cancer: no evidence of promoting activity in man.

[Diabetogenic tropical pancreatitis].

DNA binding properties of dioxin receptors in wild-type and mutant mouse hepatoma cells.

Toxicity and disposition of 2,3,4,7,8-pentachlorodibenzofuran (4PeCDF) in the rhesus monkey (*Macaca mulatta*).

Alteration of methyl dopa absorption, metabolism, and blood pressure control caused by ferrous sulfate and ferrous gluconate.

Chromosomal damage induced by maleic hydrazide in mammalian cells in vitro and in vivo.

The effect of age on the glucuronidation and toxicity of 4,4'-thiobis(6-t-butyl-m-cresol).

A crucial role of ongoing anaerobic glycolysis in attenuating acute ischemia-induced release of myocardial noradrenaline.

Goitrogens and thyroid follicular cell neoplasia: evidence for a threshold process.

Doxorubicin cellular pharmacokinetics and DNA breakage in a multi-drug resistant B16 melanoma cell line.

Species differences in 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity and biotransformation in fish.

Effect of catalase on endotoxin-induced acute lung injury in unanesthetized sheep.

2,4-Dinitrophenol, muscle biopsy, and McArdle's disease.

Acute effects of amiodarone on action potentials of isolated guinea-pig ventricular muscle exposed to simulated ischemic solution and metabolic inhibitors.

Abnormal methylation capacity in human liver cirrhosis.

Modulation of 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity in F344 rats by di(2-ethylhexyl)phthalate.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxicity in yellow perch (*Perca flavescens*).

Morphologic lesions and acute toxicity in rainbow trout (*Salmo gairdneri*) treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effect of some uremic toxins on oxygen consumption of rats in vivo and in vitro.

cis-Diamminedichloroplatinum(II) accumulation in sensitive and resistant human ovarian carcinoma cells.

Experimental studies on the mechanism of ethanol formation in corpses.

Tissue-specific alterations of de novo fatty acid synthesis in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treated rats.

Corticosterone decreases toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in hypophysectomized rats.

Some endocrine and morphological aspects of the acute toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Induction of cytochrome P-450IA1 gene expression in human breast tumour cell lines.

Anaphylactic shock: catecholamine actions in the responses to opioid antagonists.

Characterization of trimetrexate transport in human lymphoblastoid cells and development of impaired influx as a mechanism of resistance to lipophilic antifolates.

Transfer and expression of lithoautotrophy and denitrification in a host lacking these metabolic activities.

NTP Toxicology and Carcinogenesis Studies of C.I. Acid Orange 3 (CAS No. 6373-74-6) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Subchronic metabolic effects and toxicity of a simulated pulp mill effluent on juvenile lake trout, *Salmo trutta m. lacustris*.

Primary structure of a ribonuclease from bovine brain.

Metabolism of murine and human embryos: search for a growth indicator in vitro culture medium.

Mercury vapor uptake and hydrogen peroxide detoxification in human and mouse red blood cells.

Transferrin endocytosis and iron uptake in developing myogenic cells in culture: effects of microtubular and metabolic inhibitors, sulphhydryl reagents and lysosomotropic agents.

Uroporphyrin accumulation in cultured chick embryo hepatocytes: comparison of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3,4,3',4'-tetrachlorobiphenyl.

Antipeptide antibodies recognize c-erbA and a related protein in human A431 carcinoma cells.

Hydroperoxide metabolism of amphibia: tissue catalases of leopard frogs.

Agonist-induced substance P receptor down-regulation in rat central nervous system.

Coinduction of MDR-1 multidrug-resistance and cytochrome P-450 genes in rat liver by xenobiotics.

Effect of Hormone Treatment on Growth Bud Formation and Free Amine and Hydroxycinnamoyl Putrescine Levels in Leaf Explant of *Nicotiana tabacum* Cultivated in Vitro.

Rapid and transitory stimulation of 3-O-methylglucose transport by growth hormone.

Oxidation of N-butyl-N-(3-formylpropyl)nitrosamine to N-butyl-N-(3-carboxypropyl)nitrosamine in rat liver and inhibition by disulfiram.

Effects of TCDD and its congeners 3,3',4,4'-tetrachloroazoxybenzene and 3,3',4,4'-tetrachlorobiphenyl on lymphoid development in the thymus of avian embryos.

Effects of chlorobenzenes and their methyl sulfone metabolites on microsomal enzymes associated with drug metabolism in rat liver.

Metabolism of round spermatids: gossypol induces uncoupling of respiratory chain and oxidative phosphorylation.

Ifosfamide and mesna: marginally active in patients with advanced carcinoma of the pancreas.

Intracoronary infusion of prostaglandin I₂ attenuates arterial baroreflex control of heart rate in conscious dogs.

Choline accumulation in isolated rat hepatocytes.

Hormone-dependent phosphorylation of the avian progesterone receptor.

Metabolism and excretion of etoposide in isolated, perfused rat liver models.

Regeneration of tepals, stamens and ovules in explants from perianth of *Hyacinthus orientalis* L. importance of explant age and exogenous hormones.

Energy dependence of enzyme release from hypoxic isolated perfused rat heart tissue.

The metabolism of acetaldehyde and not acetaldehyde itself is responsible for in vivo ethanol-induced lipid peroxidation in rats.

Down-modulation of high-affinity receptors for erythropoietin on murine erythroblasts by interleukin 3.

The effect of molecular weight/lipophilicity on clearance of organic compounds from lungs.

Teratogenic effects of nitrofen on cellular and functional maturation of the rat lung.

Metabolites of [3-¹³C]1,2-dibromo-3-chloropropane in male rats studied by ¹³C and ¹H-¹³C correlated two-dimensional NMR spectroscopy.

Substrate preference of a cytosolic aldehyde dehydrogenase inducible in rat liver by treatment with 3-methylcholanthrene.

Catalase-dependent ethanol oxidation in perfused rat liver. Requirement for fatty-acid-stimulated H₂O₂ production by peroxisomes.

Regulatory mechanisms of monofunctional and bifunctional anticarcinogenic enzyme inducers in murine liver.

New aspects in the study of the mechanism of intestinal absorption of thiamine in rats.

[The role of rat liver microsomes in the metabolism of methylmethacrylate to formaldehyde].

Expression of the 31-kD stress protein in rat myoblasts and hepatocytes.

Evidence for immunoglobulin Fc receptor-mediated prostaglandin₂ and platelet-activating factor formation by cultured rat mesangial cells.

Effect of selective chemical modification and CNBr-cleavage at methionine₂₀ in catalytic activity and substrate binding properties of porcine pancreatic phospholipase A₂.

The beta-subunit of the bovine mitochondrial F₁ ATPase specifically binds the amino terminal domain of parathyroid hormone.

Mechanism of gamma-aminobutyric acid/benzodiazepine receptor turnover in neuronal cells: evidence for nonlysosomal degradation.

Comparison of in vivo and in vitro methods for assessing the effects of carbon tetrachloride on the hepatic drug-metabolizing enzyme system.

Specificity of rabbit cytochrome P-450 isozymes involved in the metabolic activation of the food derived mutagen 2-amino-3-methylimidazo[4,5-f] quinoline.

Uptake of choline by rat mammary-gland epithelial cells.

Analysis of the in vivo phosphorylation state of rabbit skeletal muscle glycogen synthase by fast-atom-bombardment mass spectrometry.

NTP Toxicology and Carcinogenesis Studies of Monuron (CAS No. 150-68-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Local interactions favor the native 8-residue disulfide loop in the oxidation of a fragment corresponding to the sequence Ser-50-Met-79 derived from bovine pancreatic ribonuclease A.

Hepatotoxicity of cyclophosphamide in man: pharmacokinetic analysis.

Primary structure of a non-secretory ribonuclease from bovine kidney.

Requirement of one functional RAS gene and inability of an oncogenic ras variant to mediate the glucose-induced cyclic AMP signal in the yeast *Saccharomyces cerevisiae*.

Metabolic processes involved in repair of *Escherichia coli* cells damaged by exposure to acid mine water.

A sulphate metabolizing centre in *Euglena* mitochondria.

Measurement of the metabolism of energy substrates in individual bovine blastocysts.

Kinetics of binding of cholecystokinin to pancreatic acini.

The production of toxic oxygen metabolites by hemocytes of different snail species.

Plasma gamma-hexachlorocyclohexane concentrations in forestry workers exposed to lindane.

Immunological characterization of thioltransferase from pig liver.

Hormonal regulation of ripening in the strawberry, a non-climacteric fruit.

Amino Acid Metabolism of *Lemna minor* L. : III. Responses to Aminooxyacetate.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes increases in expression of c-erb-A and levels of protein-tyrosine kinases in selected tissues of responsive mouse strains.

Partial characterization of specific cantharidin binding sites in mouse tissues.

Modulation of the in vitro candidacidal activity of human neutrophil defensins by target cell metabolism and divalent cations.

Lymphocyte activation and capping of hormone receptors.

Theophylline metabolism by human, rabbit and rat liver microsomes and by purified forms of cytochrome P450.

Primary structure of the activation peptide from bovine pancreatic procarboxypeptidase A.

Identification of hormone-interacting amino acid residues within the steroid-binding domain of the glucocorticoid receptor in relation to other steroid hormone receptors.

Methodology for assessing respiration and cellular incorporation of radiolabeled substrates by soil microbial communities.

Intracellular processing of growth hormone receptors by adipocytes in primary culture.

Metabolism of the 18O-methoxy substituent of 3-methoxybenzoic acid and other unlabeled methoxybenzoic acids by anaerobic bacteria.

The use of in vivo brain dialysis of dopamine, acetylcholine, amino acids and lactic acid in studies on the neurotoxin 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP).

Effects of the external ions and metabolic poisoning on the constriction of the squid giant axon after axotomy.

Free radicals and oxygen toxicity.

Thioacylating intermediates as metabolites of S-(1,2-dichlorovinyl)-L-cysteine and S-(1,2,2-trichlorovinyl)-L-cysteine formed by cysteine conjugate beta-lyase.

Suppression of splenic lymphocyte function by 7,12-dimethylbenz[a]anthracene (DMBA) in vitro.

Internalized insulin-receptor complexes are unidirectionally translocated to chloroquine-sensitive degradative sites. Dependence on metabolic energy.

A phospholipase A2 in the supernatant fraction of rat spleen. Its similarity to rat pancreatic phospholipase A2.

Characteristics of taurine transport system and its developmental pattern in mouse cerebral cortical neurons in primary culture.

Qualitative and quantitative differences in the induction and inhibition of hepatic benzo[a]pyrene metabolism in the rat and hamster.

Heat production of quiescent ventricular trabeculae isolated from guinea-pig heart.

Transport of digoxin into brain microvessels and choroid plexuses isolated from guinea pig.

Estimating the rate of externalization of gonadotrophin-releasing hormone receptors in ovine anterior pituitary cells in vitro.

Mitochondria mediate amplification of luteinizing hormone action by adenosine in luteal cells.

Effects of SH-modifying reagents on the rat hepatic Ah receptor: inhibition of ligand binding and transformation, and disruption of the ligand-receptor complex.

A kidney perfusion method for metabolism studies with chickens using propachlor as a model.

Purification and partial amino acid sequence of bovine adrenal phenylethanolamine N-methyltransferase: a comparison of nucleic acid and protein sequence data.

Localization of high benzaldehyde dehydrogenase activity in rat upper gastrointestinal tract mucosa: a quantitative histochemical study.

Glucose starvation is required for insulin stimulation of glucose uptake and metabolism in cultured microvascular endothelial cells.

[3H]-myo-inositol uptake in rat cortical slices. Identification of Na⁺-dependent and Na⁺-independent systems.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on murine skin.

Mechanism of inhibition of cyclo-oxygenase in human blood platelets by carbamate insecticides.

Effects of piperine on bioenergetic functions of isolated rat liver mitochondria.

Hydrogen peroxide metabolism in soybean embryonic axes at the onset of germination.

Different rates of metabolism of two chloroacetanilide herbicides in pioneer 3320 corn.

Influence of reduction of cytoplasmic ATP on catecholamine secretion from intact and digitonin-permeabilized adrenal chromaffin cells.

[Cardiac relaxation and distensibility in energy deficit].

Measurement and manipulation of cytoplasmic free calcium of ram and boar spermatozoa using quin 2.

Role of the 4-hydroxy intermediate in the in vitro embryotoxicity of cyclophosphamide and dechlorocyclophosphamide.

Extracellular lactic acid as an indicator of brain metabolism: continuous on-line measurement in conscious, freely moving rats with intrastriatal dialysis.

Mutagenic activity of promutagens in plants: indirect evidence of their activation.

Mutagenic activation of xenobiotics by plant enzymes.

Neural regulation of duodenal alkali secretion: effects of electrical field stimulation.

CO₂ production of the chick embryo during the first day of post-laying development.

Metabolic activation of the mutagen azide in biological systems.

Irreversible inhibition of the TXA₂/PGH₂ receptor of human platelets by a photoaffinity ligand.

Mutagenicity, comutagenicity, and antimutagenicity of erythrosine (FD and C red 3), a food dye, in the Ames/Salmonella assay.

Molecular complexes of thyroid hormone tyrosyl rings with aromatic donors. Possible relationship to receptor protein interactions.

Generation of twitch tension in frog atrial fibers by Na/Ca exchange.

Purification and characterization of two kinds of low molecular weight kininogens from rat (non-inflamed) plasma. One resistant and the second sensitive to rat glandular kallikreins.

Regulation of human basophil and lung mast cell function by cyclic adenosine monophosphate.

Hepatic toxicity of paraquat in primary cultures of rat hepatocytes.

Effect of glutamate on extracellular potassium activity in isolated retina of cyprinid fish.

Stimulation of Sanguinarine Production by Combined Fungal Elicitation and Hormonal Deprivation in Cell Suspension Cultures of *Papaver bracteatum*.

Relationship between exposure to toluene and excretion of urinary metabolites in Korean female solvent workers.

Effect of protein synthesis inhibitors and metabolic blockers on the production of placental proteins by the in vitro perfused human placenta.

Comparison of the action of epinephrine and a respiratory chain uncoupler, 2,4-dinitrophenol, on Ca²⁺-mobilization in isolated hepatocytes and perfused livers.

Immunohistochemical evidence for neural mediation of VIP activity in the dogfish rectal gland.

Accumulation of aluminum by rabbit renal cortex.

Mutual metabolic suppression between benzene and toluene in man.

Activity of thyroid hormone-inducible enzymes following treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Renal metabolic/excretory coupling.

Modulation of the mutagenic effects of 2-amino-3-methylimidazo[4,5-f]quinoline (IQ) and 2-amino-3,4-dimethylimidazo[4,5-f]quinoline (MeIQ) in bacteria with rat-liver 9000 x g supernatant or monolayers of rat hepatocytes as an activation system.

Metabolic inhibitors and intermediate filament organization in human fibroblasts.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes an increase in protein kinases associated with epidermal growth factor receptor in the hepatic plasma membrane.

1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP), its metabolite cyperquat (MPP⁺) and energy transduction in mitochondria from rat striatum and liver.

Effects of phenolic dental medicaments on prostaglandin synthesis by microsomes of bovine tooth pulp and rabbit kidney medulla.

Induction of cytosolic and microsomal epoxide hydrolases in mouse liver by peroxisome proliferators, with special emphasis on structural analogues of 2-ethylhexanoic acid.

Uptake, distribution, and metabolism of trivalent arsenic in the pregnant mouse.

Metabolic activation of alpha-naphthoflavone by 2,3,7,8-tetrachlorodibenzodioxin-induced rat liver microsomes.

Expression of the bovine hypothalamic hormone oxytocin precursor in *Escherichia coli*.

Comparison of the effects of carbon tetrachloride and of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the disposition of linoleic acid in rat liver in vitro.

Utilization of sulfometuron methyl, an acetolactate synthase inhibitor, in molecular biological and metabolic studies of plants and microbes.

Potassium permeability in pancreatic beta-cell. The effect of thiopental.

Spindle microtubule dynamics: modulation by metabolic inhibitors.

Development of hepatocytes in the pancreas of hamsters treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Evidence for in vitro regulation of IgE receptors on the human basophil membrane by their removal and reexpression: effects of Ca²⁺, Mg²⁺, some metabolic inhibitors and fetal calf serum.

Effect of monooxygenase inducers and inhibitors on the hepatic metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat and hamster.

Reduction of 5-nitroimidazoles, nitrofurazone, and 2,4-dinitrophenol to their free radical metabolites by *Tritrichomonas foetus* hydrogenosomes.

Magnetic resonance studies of intact human spermatozoa.

¹¹C-labelling of Ro 15-1788 in two different positions, and also ¹¹C-labelling of its main metabolite Ro 15-3890, for PET studies of benzodiazepine receptors.

[The characteristics of metabolism of organochlorine insecticides in warm-blooded animals after induction of the monooxygenase system of the liver].

Hepatotoxicity induced by the herbicide atrazine in the rat.

Mutagenicity of chloroaniline/lignin metabolites in the Salmonella/microsome assay.

Selective pancreatic toxicity of palmitoylpentachlorophenol.

Acute, pharmacokinetic, and subchronic toxicological studies of 2,4-dichlorophenoxyacetic acid.

Effects of 2,4,5-trichlorophenoxyacetic acid and quinolinic acid on 5-hydroxy-3-indoleacetic acid transport by the rabbit choroid plexus: pharmacology and electron microscopic cytochemistry.

Chronic carcinogenesis studies of acrolein and related compounds.

Metabolic mayhem caused by 2-ketoacid imbalances.

Goitre and wasting induced in hamsters by hexachlorobenzene.

Pesticide clastogenicity in Chinese hamster ovary cells.

Enhancement of the embryotoxicity of acrolein, but not phosphoramidate mustard, by glutathione depletion in rat embryos in vitro.

The effect of tridiphane (2-(3,5-dichlorophenyl)-2-(2,2,2-trichloroethyl)oxirane) on hepatic epoxide-metabolizing enzymes: indications of peroxisome proliferation.

Methyl mercury toxicity in plant cultures: modification of resistance and demethylation by light and/or 2,4-dichlorophenoxyacetic acid.

Changes in 2-aminoisobutyric acid and cycloleucine uptake produced by 2,4-dichlorophenoxyacetic acid in Chinese hamster ovary cells.

Cytogenetic toxicity of paraquat and streptonigrin in Fanconi's anemia.

The effect of pentachlorophenol and its metabolite tetrachlorohydroquinone on RNA, protein, and ribosome synthesis in *Saccharomyces* cells.

Indirect influence of s-triazines on rat gonadotropic mechanism at early postnatal period.

Bipyridylium herbicide toxicity: effects of paraquat and diquat on isolated rat hepatocytes.

Paraquat poisoning: clinical features and immediate general management.

The role of reactive metabolites in drug-induced teratogenesis.

The search for ideal antidote treatment in Gramoxone intoxication.

Critical role of iodination for T cell recognition of thyroglobulin in experimental murine thyroid autoimmunity.

Evidence that the flux control coefficient of the respiratory chain is high during gluconeogenesis from lactate in hepatocytes from starved rats. Implications for the hormonal control of gluconeogenesis and action of hypoglycaemic agents.

Cyanamide given ICV or systemically to the rat alters subsequent alcohol drinking.

Metabolic basis of ethylene glycol monobutyl ether (2-butoxyethanol) toxicity: role of alcohol and aldehyde dehydrogenases.

Allyl alcohol liver injury: suppression by ethanol and relation to transient glutathione depletion.

Initiation of hepatocarcinogenesis in infant male B6C3F1 mice by N-hydroxy-2-aminofluorene or N-hydroxy-2-acetylaminofluorene depends primarily on metabolism to N-sulfooxy-2-aminofluorene and formation of DNA-(deoxyguanosin-8-yl)-2-aminofluorene adducts.

[Evaluation of the cytogenetic effect of the herbicide trifluralin and of a number of its metabolites on mammalian somatic cells].

Acetylsalicylic acid inhibits non-immunologic contact urticaria.

Use of limited protocols to evaluate the genotoxicity of hazardous wastes in mammalian cell assays: comparison to *Salmonella*.

Elimination kinetics of ethanol and acetaldehyde in healthy men during the calcium carbimide-alcohol flush reaction.

In vivo metabolism of the cardiovascular toxin, allylamine.

Metabolism of tridiphane (2-(3,5-dichlorophenyl)-2(2,2,2-trichloroethyl)oxirane) by hepatic epoxide hydrolases and glutathione S-transferases in mouse.

Modification of intracellular glucose metabolism in human skin fibroblast preincubated with p-chlorophenoxyisobutyrate.

The effect of pretreatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin on the hepatic metabolism of 2,4,5-trichlorophenoxyacetate (2,4,5-T) and 2,4-dichlorophenoxyacetate (2,4,-D).

Determination of naptalam and its metabolite in foods, as 1-naphthylamine, using liquid chromatography with oxidative electrochemical detection.

Effects of pentachlorophenol and some of its known and possible metabolites on different species of bacteria.

Regulation of hepatic sulfotransferase catalyzing the activation of N-hydroxyarylamide and N-hydroxyarylamine by growth hormone.

The metabolism of phenol and substituted phenols in zebra fish.

Evidence for involvement of non-biliary excretion into the intestines in the formation of methylsulphonyl-containing metabolites of 2-chloro-N-isopropylacetanilide (propachlor) by swine and rats.

Infrared spectroscopic evidence for a conformational alteration of plant plasma membranes upon exposure to the growth hormone analog, 2,4-dichlorophenoxyacetic acid.

Evidence for the generation of transaminase inhibitor(s) during ethanol metabolism by rat liver homogenates: a potential mechanism for alcohol toxicity.

Stimulation of cyclophosphamide-induced pulmonary microsomal lipid peroxidation by oxygen.

Thyrotropin-releasing hormone (TRH): immunohistochemical distribution in tadpole and frog brain.

Metabolism of glyphosate in an *Arthrobacter* sp. GLP-1.

Role of acetaldehyde in the ethanol-induced impairment of hepatic glycoprotein secretion in the rat in vivo.

Respective roles of the microsomal ethanol oxidizing system and catalase in ethanol metabolism by deermice lacking alcohol dehydrogenase.

Macromolecular binding of the thyroid carcinogen 3-amino-1,2,4-triazole (amitrole) catalyzed by prostaglandin H synthase, lactoperoxidase and thyroid peroxidase.

In vitro effect of cinnamic aldehyde, a main component of Cinnamomi Cortex, on human platelet aggregation and arachidonic acid metabolism.

The oxidation of acrolein by rat liver aldehyde dehydrogenases. Relation to allyl alcohol hepatotoxicity.

Membrane-directed effects of the plant hormones abscisic acid, indole-3-acetic acid and 2,4-dichlorophenoxyacetic acid.

Induction of cytosolic and microsomal epoxide hydrolases and proliferation of peroxisomes and mitochondria in mouse liver after dietary exposure to p-chlorophenoxyacetic acid, 2,4-dichlorophenoxyacetic acid and 2,4,5-trichlorophenoxyacetic acid.

Uptake, efflux and metabolism of the polyamine putrescine in rabbit lung slices.

Solid-state NMR studies of regulation of N-(phosphonomethyl)glycine and glycine metabolism in *Pseudomonas* sp. strain PG2982.

Concentrations of the herbicides propyzamide, chlorpropham, and of their metabolites in soil and lettuce under field conditions.

Induction of genetic tandem duplications in Salmonella by polycyclic aromatic hydrocarbon and amine carcinogens.

Microorganisms capable of metabolizing the herbicide metolachlor.

Ethanol metabolism by rat heart homogenates.

Effects of a small dose of ethanol and calcium carbimide-induced acetaldehyde intoxication on human platelet aggregation, associated thromboxane formation and urinary excretion of 2,3-dinor-6-keto prostaglandin F1 alpha.

The role of acetaldehyde-metabolizing enzymes in the mediation of ethanol consumption: an investigation using a simulated drinking bout.

Rate determining factors of ethanol oxidation in hepatocytes from starved and fed rats: effect of acetaldehyde concentration on the rate of NADH oxidation catalyzed by alcohol dehydrogenase.

Ethanol metabolism in alcohol dehydrogenase deficient deermice is mediated by the microsomal ethanol oxidizing system, not by catalase.

Metabolism of cyanamide to cyanide and an inhibitor of aldehyde dehydrogenase (ALDH) by rat liver microsomes.

Nucleic acid content and residue determination in tissues of chicks born from 2,4-dichlorophenoxyacetic butyl ester treated eggs.

Biochemically damaged erythroblasts bind natural serum antibodies and activate complement.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment on mechanical function of the rat heart.

Immunosuppression following exposure to 7,12-dimethylbenz[a]anthracene (DMBA) in Ah-responsive and Ah-nonresponsive mice.

The effect of saccharin ingestion on the excretion of microbial amino acid metabolites in rat and man.

Suppression of estrogen-regulated extracellular tissue plasminogen activator activity of MCF-7 cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

In vivo and in vitro interactions of TCDD and other ligands of the Ah-receptor: effect on embryonic and fetal tissues.

The experimental and clinical pathology of diene conjugation.

Alterations in lipid-linked oligosaccharide metabolism in human melanoma cells concomitant with induction of stress proteins.

Effects of vitamin A and/or thyroidectomy on liver microsomal enzymes and their induction in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

Acidotic alterations in oxidative metabolism influencing rat renal slice ammoniogenesis.

ATP requirement for induced tight junction formation in HT 29 adenocarcinoma cells.

Significance of mirex-caused hypoglycemia and hyperlipidemia in rats.

Uptake of propranolol by microvessels isolated from bovine brain.

[Pharmacological analysis of the participation of ethanol-oxidizing enzyme systems in ethanol metabolism at different stages of experimental alcoholism].

Tumor accumulation of D-selenomethionine-75Se in tumor-bearing mice.

The impairment of retention induced by pentylentetrazol in mice may be mediated by a release of opioid peptides in the brain.

The kinetics of phosphoinositide hydrolysis in rat basophilic leukemia (RBL-2H3) cells varies with the type of IgE receptor cross-linking agent used.

alpha-Naphthoflavone metabolized by 2,3,7,8-tetrachlorodibenzo(p)dioxin-induced rat liver microsomes: a potent clastogen in Chinese hamster ovary cells.

Pleiotropic effect of the gene hairless on hepatotoxicity of 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin in mice.

Increased thromboplastic potential in diabetes: a multifactorial phenomenon.

Regional O₂ uptake during hypoxia and recovery in hypermetabolic dogs.

Cellular action of arginine vasopressin in the isolated renal tubules of hypothyroid rats.

Cellular uptake and metabolic reduction of pentavalent to trivalent arsenic as determinants of cytotoxicity and morphological transformation.

Spindle disturbances in mammalian cells. III. Toxicity, c-mitosis and aneuploidy with 22 different compounds. Specific and unspecific mechanisms.

Magnesium-dependent attachment and neurite outgrowth by PC12 cells on collagen and laminin substrata.

Deletion of lysine 13 alters the structure and function of parathyroid hormone.

Hydroxyl radical generation by microsomes after chronic ethanol consumption.

Glycolytic activity and enhancement of serotonin uptake by endothelial cells exposed to hypoxia/anoxia.

The effect of cephalosporin antibiotics on alcohol metabolism: a review.

Structure-activity studies of the hepatocarcinogenicities of alkenylbenzene derivatives related to estragole and safrole on administration to preweanling male C57BL/6J x C3H/HeJ F1 mice.

Effects of metabolic inhibitors on hormone release, cyclic AMP levels, and oxygen consumption in rat pituitary cells in culture.

The effect of arsenic on urethan-induced adenoma formation in Swiss mice.

The receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in the mouse hepatoma cell line Hepa 1c1c7. A comparison with the glucocorticoid receptor and the mouse and rat hepatic dioxin receptors.

Cytogenetic studies on 1,1-dichloroethylene and its two isomers in mammalian cells in vitro and in vivo.

Identification of a uveitogenic cyanogen bromide peptide of bovine retinal S-antigen and preparation of a uveitogenic, peptide-specific T cell line.

A nonendocytotic mechanism for the selective uptake of high density lipoprotein-associated cholesterol esters.

A serine proteinase inhibitor produced by an HTLV I virus-transformed human T lymphocyte line.

Acute pesticide poisoning in England and Wales.

Han/Wistar rats are exceptionally resistant to TCDD. I.

Analysis of mechanisms responsible for the bradycardic action of naloxone after haemorrhage in the conscious rabbit.

Effect of inhibitors of arachidonic acid metabolism on efflux of intracellular enzymes from skeletal muscle following experimental damage.

Hippuric acid and ortho-cresol as biological indicators of occupational exposure to toluene.

[Changes in brain energy metabolism in experimental cerebral hemorrhage].

Differential effects of acute changes in cell Ca^{2+} concentration on myofibrillar and non-myofibrillar protein breakdown in the rat extensor digitorum longus muscle in vitro. Assessment by production of tyrosine and N tau-methylhistidine.

Experimental and clinical studies on the reproductive toxicology of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Dynamic aspects of mineral metabolism in dry cows, puerperants and calves].

Effect of a sublethal dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin on interscapular brown adipose tissue of rats.

Porphyrinurias and occupational disease.

[Acute lung failure--a critical analysis].

Effects of ascorbate ions on intracellular fluorescein emission polarization spectra in cancer and normal proliferating cells.

Medical, life-style, and occupational risk factors for prostate cancer.

One-step processing of the amphibian vasotocin precursor: structure of a frog (*Rana esculenta*) "big" neurophysin.

Chemical Contaminants: Their Metabolism and their Residues.

Growth and Aflatoxin Production by *Aspergillus parasiticus* in a Medium Containing Plant Hormones, Herbicides or Insecticides.

Triazene metabolism. VI. 3-Azidomethyl-3-alkyl-1-aryltriazenes, a new class of anti-tumour triazene with potential pro-drug applications.

Comparative metabolism of nitroaromatic compounds in freshwater, brackish water and marine decapod crustaceans.

SOS-inducing activity of chemical carcinogens and mutagens in *Salmonella typhimurium* TA1535/pSK1002: examination with 151 chemicals.

Ah receptor: relevance of mechanistic studies to human risk assessment.

Cytochemical and ultracytochemical demonstration of cytochrome c oxidase in spermatozoa and dynamics of its changes accompanying ageing or induced by stress.

On the non-existence of a tryptic peptide with biological activity derived from mouse nerve growth factor.

Interactions of glucagon and glucagon analogs with isolated canine hepatocytes.

Metabolism and excretion of gallium arsenide and arsenic oxides by hamsters following intratracheal instillation.

Studies on the intestinal surface acid microclimate: developmental aspects.

Interaction of the mutagenic metabolite of sodium azide, synthesized in vitro, with DNA of barley embryos.

Excretion and metabolism of phenol, 4-nitrophenol and 2-methylphenol by the frogs *Rana temporaria* and *Xenopus laevis*.

[Substrate reduction and oxygen activation during microsomal metabolism of quinones].

4-Chloro-4'-biphenylol as an uncoupler and an inhibitor of mitochondrial oxidative phosphorylation.

Biochemical and immunological properties of different electrophoretic forms of juvenile hormone esterase from *Trichoplusia ni* (H₄bner).

Neural mechanisms mediating the hyperthermia elicited by prostaglandin E₂ injected into the preoptic-anterior hypothalamus.

Assimilate Unloading from Maize (*Zea mays* L.) Pedicel Tissues : II. Effects of Chemical Agents on Sugar, Amino Acid, and C-Assimilate Unloading.

Glyphosate effects on carbon assimilation, ribulose biphosphate carboxylase activity, and metabolite levels in sugar beet leaves.

Processing of growth hormone by rat adipocytes in primary culture: differentiation between release of intact hormone and degradative processing.

Inhibition of the activation of Hageman factor (factor XII) by peripheral blood cells.

Intestinal absorption of choline in rats.

Production and purification of human growth-hormone-releasing factor from continuous cultures of recombinant-plasmid-containing *Escherichia coli*.

Studies on the mechanism of acetaldehyde-mediated inhibition of rat liver transaminases.

Inhibition of nuclear binding of triiodothyronine by antimycin A in cultured human fibroblasts.

Evidence that 2,3,7,8-tetrachlorodibenzo-p-dioxin and thyroid hormones act through different mechanisms in human keratinocytes.

Identification of intramolecular crosslinks in bovine growth hormone after two-step modification with 1,5-difluoro-2,4-dinitrobenzene.

Purification and characterization of rabbit ocular mucin.

The production of pregnancy associated alpha glycoprotein (PAG) from human peripheral blood mononuclear cells.

Production of recombinant human pancreatic secretory trypsin inhibitor by *Escherichia coli*.

Relationship between the murine Ah phenotype and the hepatic uptake and metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Neutrophil-mediated cytotoxicity triggered by immune complexes: the role of reactive oxygen metabolites.

Calcium channel blockers induce preferential coronary vasodilation by an alpha 1-mechanism.

Methyl bromide alters catecholamine and metabolite concentrations in rat brain.

A transport system for coenzyme A in isolated rat heart mitochondria.

The molybdate-stabilized nonactivated glucocorticoid receptor contains a dimer of Mr 90,000 non-hormone-binding protein.

A novel vasoactive intestinal peptide (VIP) from elasmobranch intestine has full affinity for mammalian pancreatic VIP receptors.

The nucleotide sequence of a human cellular thyroid hormone binding protein present in endoplasmic reticulum.

Influence of proteinase inhibitors and substrates on 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-binding capacity of the rat hepatic Ah receptor.

Stimulation by ATP of proinsulin to insulin conversion in isolated rat pancreatic islet secretory granules. Association with the ATP-dependent proton pump.

The cellular uptake and cytotoxicity of chlorambucil-monoclonal antibody conjugates.

Histopathology of acute toxic responses in selected tissues from rats exposed by inhalation to methyl bromide.

Transport of benzylpenicillin by the rat choroid plexus in vitro.

Reversed short-circuit current across isolated skin of the toad *Bufo arenarum*.

Uptake and specific binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the olfactory mucosa of mice and rats.

Phosphate transport by reconstructed monolayers from cultured mouse kidney cells.

Alkaloid formation by habituated and tumorous cell suspension cultures of *Catharanthus roseus*.

Amino Acid Metabolism of *Lemna minor* L. : II. Responses to Chlorsulfuron.

In vitro antimutagenicity of curcumin against environmental mutagens.

Homeothermic fish and hemoglobin: primary structure of the hemoglobin from bluefin tuna (*Thunnus thynnus*, Scromboidei).

Influences of the early olfactory environment on the survival, behavior and pituitary-adrenal activity of caesarean delivered preterm rat pups.

3,3',4,4'-Tetrachlorobiphenyl in pregnant mice: embryotoxicity, teratogenicity, and toxic effects on the cultured embryonic thymus.

Oxygen metabolite-induced cytotoxicity to cultured rat gastric mucosal cells.

Liposome-mediated augmentation of catalase in alveolar type II cells protects against H₂O₂ injury.

Binding of vasoactive intestinal polypeptide to dispersed enterocytes results in rapid removal of the NH₂-terminal histidyl residue.

Oxidative metabolism in guinea pig ventricular myocytes protected from proteolytic enzyme activity.

Quantification of the maximum capacity for active sodium-potassium transport in rat skeletal muscle.

Changes in thyroid hormones and thyroxine glucuronidation in hamsters compared with rats following treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

An in vitro model for studying the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin to human thymus.

Structural studies on equine glycoprotein hormones. Amino acid sequence of equine lutropin beta-subunit.

Effect of allyl alcohol-induced sublethal hepatic damage upon doxorubicin metabolism and toxicity in the rabbit.

Enhancement of rat liver microsomal metabolism of azoxymethane to methylazoxymethanol by chronic ethanol administration: similarity to the microsomal metabolism of N-nitrosodimethylamine.

In Vitro Sugar Transport in *Zea mays* L. Kernels : II. Characteristics of Sugar Absorption and Metabolism by Isolated Developing Embryos.

In Vitro Sugar Transport in *Zea mays* L. Kernels : I. Characteristics of Sugar Absorption and Metabolism by Developing Maize Endosperm.

Effect of nutrients and metabolic inhibitors on the growth of spiroplasmas.

Human growth hormone. Immunochemical characterization of polypeptide fragments purified by reversed phase-high performance liquid chromatography.

Primary structure of eel (*Anguilla japonica*) growth hormone.

The purification and characterization of glutathione S-transferase from the hepatopancreas of the blue crab, *Callinectes sapidus*.

Kinetics of [¹¹C]N,N-dimethylphenylethylamine in mice and humans: potential for measurement of brain MAO-B activity.

Isolation and complete amino acid sequence of human thymopoietin and splenin.

Enzymatic amidation of recombinant (Leu27) growth hormone releasing hormone-Gly45.

Phenylethanolamine N-methyltransferase-containing neurons in the rostral ventrolateral medulla of the rat. I. Normal ultrastructure.

Identification of sex pheromone components from pheromone gland volatiles of the tomato looper, *Plusia chalcites* (Esp.).

Alteration of catecholamine metabolism in rat brain produced by inhalation exposure to methyl bromide.

Age-related failure of endocytosis may be the pathogenetic mechanism responsible for "cold" follicle formation in the aging mouse thyroid.

Involvement of ack-pta operon products in alpha-ketobutyrate metabolism by *Salmonella typhimurium*.

Effect of metabolic inhibitors on platelet attachment, spreading and aggregation on collagen-coated surfaces.

Modulation of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-mediated myelotoxicity by thyroid hormones.

N-hydroxy-N-arylamides. III: Mechanism of haemoglobin oxidation by N-hydroxy-4-chloroacetanilide in erythrocytes in vitro.

Species-dependent expression and induction of homologues of rabbit cytochrome P-450 isozyme 5 in liver and lung.

The complete amino acid sequence of rat submaxillary gland tonin does contain the aspartic acid at the active site: confirmation by protein sequence analysis.

Fengabine, a novel antidepressant GABAergic agent. II. Effect on cerebral noradrenergic, serotonergic and GABAergic transmission in the rat.

Toxic accumulation of alpha-ketobutyrate caused by inhibition of the branched-chain amino acid biosynthetic enzyme acetolactate synthase in *Salmonella typhimurium*.

Dexamethasone impairs growth and collagen synthesis in condylar cartilage in vitro.

Opioid modulation of thyrotropin releasing hormone induced prolactin secretion.

Complete amino acid sequence of the medium-chain S-acyl fatty acid synthetase thio ester hydrolase from rat mammary gland.

cDNA cloning and amino acid sequence of bovine brain 2',3'-cyclic-nucleotide 3'-phosphodiesterase.

Isolation and characterization of a polarized isolated hepatocyte preparation in the skate *Raja erinacea*.

Studies on the mechanism of action of diallyl sulfide, an inhibitor of the genotoxic effects of cyclophosphamide.

Changes in plasma proteins in rats treated for short periods with hepatotoxins or with agents which induce cytochrome P450 isoenzymes.

Structure-activity relationships of the azide metabolite, azidoalanine, in *S. typhimurium*.

Sulphotransferase-mediated covalent binding of the carcinogen 7,12-dihydroxymethylbenz[a]anthracene to calf thymus DNA and its inhibition by glutathione transferase.

Health-risk estimates for 2,3,7,8-tetrachloro-dibenzodioxin: an overview.

Regulation by cell metabolism and adenine nucleotides of a K channel in insulin-secreting B cells (RIN m5F).

Bioactivation of MPTP: reactive metabolites and possible biochemical sequelae.

ATP depletion causes a reversible redistribution and inactivation of a subpopulation of galactosyl receptors in isolated rat hepatocytes.

Amino acid sequence of the serine active-site region of the medium-chain S-acyl fatty acid synthetase thioester hydrolase from rat mammary gland.

Cytokinin Biochemistry in Relation to Leaf Senescence : II. The Metabolism of 6-Benzylaminopurine in Soybean Leaves and the Inhibition of Its Conjugation.

Mutagenicity of the C-nitroso analog of fenitrothion.

Circadian alterations in prolactin, corticosterone, and thyroid hormone levels and down-regulation of prolactin receptor activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Biosynthesis of four rat liver mitochondrial acyl-CoA dehydrogenases: in vitro synthesis, import into mitochondria, and processing of their precursors in a cell-free system and in cultured cells.

Bacterial carbon-phosphorus lyase: products, rates, and regulation of phosphonic and phosphinic acid metabolism.

Solubility, retention, and metabolism of intratracheally and orally administered inorganic arsenic compounds in the hamster.

Covalent binding to DNA and mutagenicity of 2,4-diaminotoluene metabolites produced by isolated hepatocytes and 9000 g supernatant from Fischer 344 rats.

Ultrastructure of the choroid plexus epithelium of pigeons treated with drugs: I. Effect of Thyradin, 2,4-dinitrophenol, and cycloheximide.

Comparative effects of metabolic inhibition on the action potential from three experimental models of cardiac cells.

Regulation of amino acid influx and efflux at the basolateral plasma membrane of the salivary gland epithelium: effects of parasympathetic nerve stimulation.

Combinations of mesna with cyclophosphamide or adriamycin in the treatment of mice with tumors.

Structure and function of the Ah receptor: sulfhydryl groups required for binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin to cytosolic receptor from rodent livers.

Hepatic indices of thyroid status in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Enhanced uptake of carnitine by perfused rat liver following starvation.

Glycogenolytic, noninsulin-like effects of vanadate on rat hepatocyte glycogen synthase and phosphorylase.

The Ca²⁺-dependent actions of the alpha-adrenergic agonist phenylephrine on hepatic glycogenolysis differ from those of vasopressin and angiotensin.

Highly toxic coplanar PCBs: occurrence, source, persistency and toxic implications to wildlife and humans.

Acute toxicity in the guinea pig and in vitro "dioxin-like" activity of the environmental contaminant 1,2,4,5,7,8-hexachloro (9H)xanthene.

Monoxygenase induction by various xenobiotics and its influence on rat liver microsomal metabolism of chrysene in comparison to benz[a]anthracene.

Pathobiological effects of aldehydes in cultured human bronchial cells.

Output of bacterial metabolites as a diagnostic means.

Influence of some uremic toxins on oxygen consumption of rats in vivo and in vitro.

Toluene metabolism during exposure to varying concentrations combined with exercise.

Alcohol-induced hepatotoxicity: a role for oxygen free radicals.

The supply of metabolic substrate from glia to photoreceptors in the retina of the honeybee drone.

[Effect of oxidative metabolism inhibitors on ADH-dependent transport of water in the bladder of *Rana temporaria*].

Composition of diet modifies toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in cold-adapted rats.

The study of mutagenic activity of carcinogens and other chemical agents with *Salmonella typhimurium* assays: testing of 126 compounds.

Effect of thyroidectomy on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced lipid peroxidation.

The secretory mechanism in adrenal chromaffin cells by nitrophenol compounds: possible involvement of the change in the surface potentials.

Dome formation in cell cultures of chick embryo retinal pigment epithelium and effects of ouabain and 2,4-dinitrophenol thereon.

The roles of haemolymphatic lipoproteins in the oogenesis of *Rhodnius prolixus*.

Na⁺-linked active transport of ascorbate into cultured bovine retinal pigment epithelial cells: heterologous inhibition by glucose.

Measurement of in vivo lipid peroxidation and toxicological significance.

Expression vector promoting the synthesis and export of the human growth-hormone-releasing factor in *Escherichia coli*.

Metabolism and distribution of [¹⁴C]glucose in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Uptake of L-threo-dihydroxyphenylserine into human brain synaptosomes.

7-ethoxycoumarin O-deethylation in perfused livers from ethanol-fed rats: evidence for an important role of mitochondrial reducing equivalents.

[Mitochondrial oxidative phosphorylation in the rat kidney during the perinatal period].

The effect of a metabolic inhibitor upon the properties of the cerebral vasculature during a whole-head saline perfusion of the rat.

Polychlorinated biphenyls and related compound interactions with specific binding sites for thyroxine in rat liver nuclear extracts.

Relationship of basic research in toxicology to environmental standard setting: the case of polybrominated biphenyls in Michigan.

Amino acid sequence of UP1, an hnRNP-derived single-stranded nucleic acid binding protein from calf thymus.

Altered regulation of adrenal steroidogenesis in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

The effects of monensin on inhibition of steroidogenesis and disruption of the Golgi complex in adrenal cells are both reversible!

ACTH regulation of cholesterol movement in isolated adrenal cells.

Non-enzymatic synthesis of the coenzymes, uridine diphosphate glucose and cytidine diphosphate choline, and other phosphorylated metabolic intermediates.

Mechanism of nitrofen teratogenesis.

Effects of long-term exposure to pentachlorophenol on the free amino acid pool and energy reserves of the freshwater amphipod *Gammarus pseudolimnaeus* Bousfield (Crustacea, Amphipoda).

Acute effect of paraquat on lung fluid balance and prostanoid production in awake sheep.

Paraquat and two endogenous analogues of the neurotoxic substance N-methyl-4-phenyl-1,2,3,6-tetrahydropyridine do not damage dopaminergic nigrostriatal neurons in the mouse.

Severe acute oxidant exposure: morphological damage and aerobic metabolism in the lung.

Effects of cerebro-protective agents on enzyme activities of rat primary glial cultures and rat cerebral cortex.

Effects of phenoxyacetic acids on the induction of chromosome aberrations in vitro and in vivo.

The role of pesticides in skin disease.

Comparative toxicity of MPTP, MPP+ and 3,3-dimethyl-MPDP+ to dopaminergic neurons of the rat substantia nigra.

Further studies of lipid peroxidation in human paraquat poisoning.

Morphological and biochemical correlates of chemical induced injury in the lung. A discussion.

Management of acute childhood poisonings caused by selected insecticides and herbicides.

Influence of lipid peroxidation on beta-adrenoceptors.

Sulfuric acid esters as major ultimate electrophilic and hepatocarcinogenic metabolites of 4-aminoazobenzene and its N-methyl derivatives in infant male C57BL/6J x C3H/HeJ F1 (B6C3F1) mice.

Kidney morphology and function in the young of rats malnourished and exposed to nitrofen during pregnancy.

Adjunctive therapy of phenytoin overdose--a case report using plasmaphoresis.

Structure-activity relationships of alpha, beta-unsaturated carbonylic compounds.

Effects of oxidative stress caused by hyperoxia and diquat. A study in isolated hepatocytes.

L-dopa reverses the effects of MPP+ toxicity.

Effect of tryptophan on 2,4-dichlorophenoxyacetic acid toxicity in the nitrogen-fixing-cyanobacterium *Nostoc linckia*.

Attenuation of cytogenetic damage by 2-mercaptoethanesulfonate in cultured human lymphocytes exposed to cyclophosphamide and its reactive metabolites.

Effects of cyanamide on body weight and brain monoamines and metabolites in rats.

Biological monitoring of agricultural workers exposed to pesticides: II. Monitoring of intact pesticides and their metabolites.

[Decomposition of H₂O₂ by human cataractous lenses].

Ultrastructural and histochemical observations in human and experimental alcoholic cardiomyopathy.

Histamine action in paraquat-induced lung injury.

The effect of dietary and chemically induced methylation deficiency on the metabolism of arsenate in the rabbit.

Porphyryns and pentachlorophenol in rat-liver mitochondria in hexachlorobenzene-induced porphyria.

Catalase-dependent ethanol metabolism in vivo in deermice lacking alcohol dehydrogenase.

Effects of thyroid status on brain catecholamine biosynthesis in adult rats: assessment by a steady-state method.

Studies on benzyl acetate. II. Use of specific metabolic inhibitors to define the pathway leading to the formation of benzylmercapturic acid in the rat.

Induction of cytochrome P-450-dependent sulfonylurea metabolism in *Streptomyces griseolus*.

The microsomal metabolism of pentachlorophenol and its covalent binding to protein and DNA.

Dermal exposure and urinary metabolite excretion in farmers repeatedly exposed to 2,4-D amine.

Further characterization of the distribution and metabolism of nitrofen in the pregnant rat.

The microsomal metabolism of hexachlorobenzene. Origin of the covalent binding to protein.

Comparative aspects of herbicide metabolism.

Metabolism of the cinnamon constituent o-methoxycinnamaldehyde in the rat.

Inhibition of CO₂ production from aminopyrine or methanol by cyanamide or crotonaldehyde and the role of mitochondrial aldehyde dehydrogenase in formaldehyde oxidation.

Action of some pesticides on T₄ to T₃ conversion in cultured kidney and liver cells in the presence or absence of cysteine.

Determination of residues of alachlor and its metabolite in corn, soybeans, and potatoes as heptafluorobutyryl-2,6-diethylaniline.

Metabolism of the "mixed" cytochrome P-450 inducer hexachlorobenzene by rat liver microsomes.

Kinetics of sulfation in the rat in vivo and in the perfused rat liver.

Role of catalase in metabolism of hydrogen peroxide by the perfused rat heart.

Energy-dependent uptake of N-methyl-4-phenylpyridinium, the neurotoxic metabolite of 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine, by mitochondria.

Effects of pentachlorophenol and some of its known and possible metabolites on fungi.

Comparative studies on the mechanisms of paraquat and 1-methyl-4-phenylpyridine (MPP⁺) cytotoxicity.

Paraquat uptake into freshly isolated rabbit lung epithelial cells and its reduction to the paraquat radical under anaerobic conditions.

Mutagenicity of chloroolefins in the Salmonella/mammalian microsome test. III. Metabolic activation of the allylic chloropropenes allyl chloride, 1,3-dichloropropene, 2,3-dichloro-1-propene, 1,2,3-trichloropropene, 1,1,2,3-tetrachloro-2-propene and hexachloropropene by S9 mix via two different metabolic pathways.

Combined light and electron microscope immunocytochemical localization of scattered peptidergic neurons in the central nervous system.

5-Hydroxyindoleacetic acid and 5-hydroxytryptophol levels in rat brain: effects of ethanol, pyrazole, cyanamide and disulfiram treatment.

[Gas chromatography determination of 2-ethylhex-2-en-1-al and its metabolites in grain].

Observations on the biochemical basis of ethanol metabolism by human macrophages.

Chromatographic purification and identification of polar metabolites of benazolin-ethyl from soybean.

Metabolism and disposition of ortho-benzyl-para-chlorophenol in male rats.

Excretion of metabolites of hexachlorobenzene in the rat and in man.

The metabolism of xenobiotics by certain extrahepatic organs and its relation to toxicity.

Increased spontaneous chemiluminescence from liver homogenates and isolated hepatocytes upon inhibition of O₂- and H₂O₂ utilization.

In vitro study of paraquat effects on malondialdehyde formation in thymus cells.

The influence of conformational factors on the metabolic conjugation of aryloxyacetates.

The potential role of redox cycling as a mechanism for chemical teratogenesis.

Toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in cold-adapted rats.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on IgA serum and bile levels in rats.

Kinetics of uptake and intracellular binding of Cyclosporine A in RAJI cells, in vitro.

Dinitrophenol in weight loss: the poison center and public health safety.

O₂ metabolites and neutrophil elastase synergistically cause edematous injury in isolated rat lungs.

Successful treatment of aplastic anemia associated with chronic thyroiditis and Sjögren's syndrome.

Clinical laboratory manifestations of exposure to dioxin in children. A six-year study of the effects of an environmental disaster near Seveso, Italy.

Two automated procedures for N-acetyl-beta-D-glucosaminidase determination evaluated for detection of drug-induced tubular nephrotoxicity.

Induction of 32- and 34-kDa stress proteins by sodium arsenite, heavy metals, and thiol-reactive agents.

Synthesis, biologic and toxic effects of the major 2,3,7,8-tetrachlorodibenzo-p-dioxin metabolites in the rat.

Biosynthesis of electron transfer flavoprotein in a cell-free system and in cultured human fibroblasts. Defect in the alpha subunit synthesis is a primary lesion in glutaric aciduria type II.

Hypercholesterolemia and the regulation of adrenal steroidogenesis in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

Effects of oxygen and glucose deprivation on vasoactivity in isolated bovine middle cerebral arteries.

Mechanism of phagocytosis by Schwann cells.

Endogenous ethanol--its metabolic, behavioral and biomedical significance.

Antibody responses in protein-energy restricted beef cows and their cold stressed progeny.

Toxicity and evidence for metabolic alterations in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated guinea pigs fed by total parenteral nutrition.

Effects of adenine and its isomer 4-aminopyrazolo-[3,4-d]-pyrimidine on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced mortality in rats.

Effects of thyroid hormones on the induction of cleft palate by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C57BL/6N mice.

Procarcinogen activation by rat and human mammary extracts.

Calmodulin antagonists inhibit dihydropyridine calcium channel activator (BAY-K-8644) induced cGMP synthesis in pituitary tumor cells.

Induction by phenobarbital in McA-RH7777 rat hepatoma cells of a polycyclic hydrocarbon inducible cytochrome P450.

Effect of combined treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and phototherapy on bilirubin metabolism in the jaundiced Gunn rat.

Immunosuppression without liver induction by subchronic exposure to 2,7-dichlorodibenzo-p-dioxin in adult female B6C3F1 mice.

Effect of ischemia-related metabolic factors on thallium exchange in cultured rat myocardial cells.

Alcohol and acetaldehyde in rat's milk following ethanol administration.

S-antigen-specific rat T cell lines recognize peptide fragments of S-antigen and mediate experimental autoimmune uveoretinitis and pinealitis.

Collagen in human aorta. Changes in the type III/I ratio and concentration of the reducible crosslink, dehydrohydroxylysinonorleucine in ascending aorta from healthy subjects of different age and patients with annulo-aortic ectasia.

Intermediary metabolism of the mature rat following 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment.

Uptake of 2,3,7,8-tetrachlorodibenzo-p-dioxin from plasma lipoproteins by cultured human fibroblasts.

Syntheses and effects of [Glu34]-thymopoietin II fragment 32-45 and its analogs on the impaired T-cell transformation in a patient with common variable immunodeficiency.

Comparative uptake, retention and cytotoxicity of daunorubicin by human myeloid cells.

Histopathology of interscapular brown adipose tissue, thyroid, and pancreas in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treated rats.

Insulin internalization into monocytes is decreased in patients with type II diabetes mellitus.

[Phases of muscular thermogenesis in experimental hyperthyroidism].

[Cytogenetic activity of metabolites of pesticides representing different classes of chemical compounds].

Further discussion concerning porphyria cutanea tarda and TCDD exposure.

The diagnosis of dioxin-associated illness.

[Guanylate cyclase activity of the rabbit myocardium in normal conditions and in allergic states].

BAY-K-8644-stimulated cyclic GMP synthesis in mouse pituitary tumor cells.

1-Methyl-4-phenylpyridine (MPP+) induces oxidative stress in the rodent.

Relationship of the wasting syndrome to lethality in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The relative induction of mixed-function oxidase specific activity to C-H and C-C1 bond strengths in polychlorinated derivatives of dibenzo-p-dioxin (PCDDs).

Energy dependent insulin binding, internalization and degradation in isolated cardiac myocytes from normal and diabetic rats.

A pilot epidemiologic study of possible health effects associated with 2,3,7,8-tetrachlorodibenzo-p-dioxin contaminations in Missouri.

CCl₄-induced toxicity in isolated hepatocytes: the importance of direct solvent injury.

Use of the oxidase electrode to determine tumor cell metabolism of peroxide.

A case of fatal sodium azide ingestion.

Increased type-III/type-I collagen ratios in diabetic human conjunctival biopsies.

Porphyrogenic effect of hexachlorobenzene and 2,3,7,8-tetrachlorodibenzo-para-dioxin: is an inhibitor involved in uroporphyrinogen decarboxylase inactivation?

Contribution of drug transport and reductases to daunorubicin resistance in human myelocytic cells.

Synthesis and structure-activity relationships of antibacterial phosphonopeptides incorporating (1-aminoethyl)phosphonic acid and (aminomethyl)phosphonic acid.

A review of porphyria and cancer and the missing link with human exposure to hexachlorobenzene.

The C57B1/6 nu/nu, lpr/lpr mouse. III. Autoimmunity status.

Relationship of alterations in energy metabolism to hypophagia in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The role of contaminants in hexachlorobenzene toxicity.

Effects on the fetal rat intestine of maternal malnutrition and exposure to nitrofen (2,4-dichlorophenyl-p-nitrophenyl ether).

Inhibition of the low-K_m mitochondrial aldehyde dehydrogenase by diethyl maleate and phorone in vivo and in vitro. Implications for formaldehyde metabolism.

Decreased rat adrenal 21-hydroxylase activity associated with decreased adrenal microsomal cytochrome P-450 after exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effects of induction of rat liver cytosolic aldehyde dehydrogenase on the oxidation of biogenic aldehydes.

Comparison of the three primary structures of deoxyribonuclease isolated from bovine, ovine, and porcine pancreas. Derivation of the amino acid sequence of ovine DNase and revision of the previously published amino acid sequence of bovine DNase.

Transport of thiamin across the blood-brain barrier of the rat in the absence of aerobic metabolism.

Effects of various inhibitors of oxidative phosphorylation on energy metabolism, macromolecular synthesis and cyclic AMP production in isolated rat thymocytes. A regulating role for the cellular energy state in macromolecular synthesis and cyclic AMP production.

Sabulodes caberata Guenée (Lepidoptera: Geometridae) : Components of its sex pheromone gland.

Somatic embryogenesis and subsequent plant regeneration from inflorescence callus of *Bambusa beecheyana* Munro var. *beecheyana*.

Mannose metabolism in corn and its impact on leaf metabolites, photosynthetic gas exchange, and chlorophyll fluorescence.

Possible ethnic difference in toluene metabolism: a comparative study among Chinese, Turkish and Japanese solvent workers.

Transport of cimetidine by the rat choroid plexus in vitro.

The mechanism by which cyclopiazonic acid potentiates accumulation of tetraphenylphosphonium in cultured renal epithelial cells.

Peroxidase, an alternate pathway to cytochrome P-450 for xenobiotic metabolism in skin: partial purification and properties of the enzyme from neonatal rat skin.

Amino acid sequence of the sex steroid binding protein of human blood plasma.

Hepatic regenerative enzyme activity after pericentral and periportal lobular toxic injury.

Mutagenicity of 4-nitrodiphenyl ether and its metabolites.

Activation of hepatocyte glycogen synthase by metabolic inhibitors.

Establishment of a parathyroid hormone-responsive phosphate transport system in vitro using cultured renal cells.

A fraction enriched in dendrodendritic synaptosomes isolated from rat olfactory bulb: morphology and transmitter release.

Characterization of a hormonogenic domain from human thyroglobulin.

Oxygen Isotope Exchange between Metabolites and Water during Biochemical Reactions Leading to Cellulose Synthesis.

25-Hydroxyvitamin D₃-23-hydroxylase, a renal enzyme in several animal species.

Examination of the differential hepatotoxicity of diallyl phthalate in rats and mice.

The metabolism of fungicides.

Reactive intermediates in pesticide metabolism: peracid oxidations as possible biomimetic models.

Metabolism of salicylate by isolated kidney and liver mitochondria.

Effects of individual terphenyls and polychlorinated terphenyls on rat hepatic microsomal cytochrome P-450-dependent monooxygenases: structure-activity relationships.

Binding of a metabolite of 3,4,3',4'-tetrachlorobiphenyl to transthyretin reduces serum vitamin A transport by inhibiting the formation of the protein complex carrying both retinol and thyroxin.

Metabolism and disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin in guinea pigs.

Characterization of the molecular forms of proenkephalin in bovine adrenal medulla and rat adrenal, brain, and spinal cord with a site-directed antiserum.

Chemical conversion of aspartyl peptides to isoaspartyl peptides. A method for generating new methyl-accepting substrates for the erythrocyte D-aspartyl/L-isoaspartyl protein methyltransferase.

Intestinal absorption of tetramethylammonium and its derivatives in rats.

Liquid chromatographic determination of fluridone aquatic herbicide and its metabolite in fish and crayfish.

Role of structure in diphenyl ether teratogenesis.

Metabolism and excretion of orally and intraperitoneally administered gallium arsenide in the hamster.

Mechanism of hepatotoxicity in periportal regions of the liver lobule due to allyl alcohol: studies on thiols and energy status.

Mechanisms of gentamicin transport in kidney epithelial cell line (LLC-PK1).

[The effect of induced hyperthermia on kidney function in dogs].

GABA-related activities of amino phosphonic acids on guinea-pig ileum longitudinal muscle.

In vivo ³¹P nuclear magnetic resonance studies of arsenite induced changes in hepatic phosphate levels.

Changes in hamster hepatic cytochrome P-450, ethoxycoumarin O-deethylase, and reduced NAD(P): menadione oxidoreductase following treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin. Partial dissociation of temporal and dose-response relationships from elicited toxicity.

Hepatic Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin. Partial stabilization by molybdate.

[Protective effect of malotilate (diisopropyl 1,3-dithiol-2-ylidenemalonate) on chemical-induced hepatotoxicity].

Primary structure of sperm whale luteinizing hormone.

Teratogenicity of bifenoxy and nitrofen in rodents.

Concentration and chemical status of arsenic in the blood of pregnant hamsters during critical embryogenesis. 1. Subchronic exposure to arsenate utilizing constant rate administration.

Metabolism of the herbicide bromoxynil by *Klebsiella pneumoniae* subsp. *ozaenae*.

Disulfide bond formation between nerve growth factor and the nerve growth factor receptor from embryonic sensory neurons.

Microcalorimetric investigation of metabolism in rat hepatocytes cultured on microplates and in cell suspensions.

In vivo and in vitro evaluations of spermatotoxicity induced by 2-ethoxyethanol treatment.

Facilitated glucose transport across the retinal pigment epithelium of the bullfrog (*Rana catesbeiana*).

Effects of thyroidectomy on the Ah receptor and enzyme inducibility by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat liver.

Ah receptor mediating induction of aryl hydrocarbon hydroxylase: detection in human lung by binding of 2,3,7,8-[³H]tetrachlorodibenzo-p-dioxin.

Uptake and release of kyotorphin in rat brain synaptosomes.

Properties of cAMP-induced transmembrane current in mollusc neurons.

Thyroid status and thermogenesis in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Thiopental inhibits K⁺ permeability of rat and mouse pancreatic beta-cells.

Relationship between Mefluidide Treatment and Abscisic Acid Metabolism in Chilled Corn Leaves.

Heat inactivation of starch synthase in wheat endosperm tissue.

Actin cytoskeleton of spread fibroblasts appears to assemble at the cell edges.

Genotoxicity of allyl compounds--a quick screening strategy based on structure-activity relationships and a battery of prescreening tests.

Effect of aminophylline on hindlimb blood flow autoregulation during increased metabolism in dogs.

Metabolic inhibitors block anaphase A in vivo.

Hepatocellular uptake of oleate is energy dependent, sodium linked, and inhibited by an antibody to a hepatocyte plasma membrane fatty acid binding protein.

The glutathione redox cycle as a defense system against hydrogen-peroxide-induced prostanoid formation and vasoconstriction in rabbit lungs.

Immobilization of pig liver microsomes. Stability of cytochrome P-450-dependent monooxygenase activities.

Isoflurane--a study of its adrenoceptor interaction in the isolated rat parotid gland.

Amino acid sequence and disulfide bridges of subunit III, a defective endopeptidase present in the bovine pancreatic 6 S procarboxypeptidase A complex.

Red blood cells contain a pathway for the degradation of oxidant-damaged hemoglobin that does not require ATP or ubiquitin.

Transport of N-acetyl-S-pentachloro-1,3-butadienylcysteine by rat renal cortex.

[Cytochrome P-448 induction in liver microsomes of mice of inbred strains after administration of xenobiotics of MC-type].

Effect of growth hormone on fatty acid oxidation: growth hormone increases the activity of 2,4-dienoyl-CoA reductase in mitochondria.

2,3,7,8-Tetrachlorodibenzo-p-dioxin metabolism and disposition in yellow perch.

Metabolism and disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rainbow trout.

Intestinal surface acid microclimate in vitro and in vivo in the rat.

Insulin stimulation of glucose metabolism in rat adipocytes: possible implication of protein kinase C.

Cellular uptake of 3,5,3'-triiodothyronine and thyroxine by red blood and thymus cells.

Pyruvate metabolism of perfused rat lungs after exposure to 100% oxygen.

Effects of 1,1,1-trichloroethane on the cGMP metabolism in mouse brain.

Prostaglandin release by the chick embryo heart is increased by 2,3,7,8-tetrachlorodibenzo-p-dioxin and by other cytochrome P-448 inducers.

Inhibition of ACTH action on cultured bovine adrenal cortical cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin through a redistribution of cholesterol.

The effect of substrate on the expression of activity catalyzed by cytochrome P-450: metabolism mediated by rabbit isozyme 6 in pulmonary microsomal and reconstituted monooxygenase systems.

Altered polyamine metabolism in Chinese hamster cells growing in a defined medium.

The in situ perfused spinal cord of the rat. Applicability of drugs and chemicals, sodium-lithium exchange, and calcium reduction to functional intact central nervous system tissue.

Regulation of rat and bovine adrenal metabolism of polycyclic aromatic hydrocarbons by adrenocorticotropin and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Functional hepatocellular heterogeneity determined by the hepatotoxins allyl alcohol and bromobenzene in immature and adult Fischer 344 rats.

Amino acid sequence of bovine brain derived class 1 heparin-binding growth factor.

Insulin antagonizes epinephrine activation of the membrane transport of fatty acids. Potential site for hormonal suppression of lipid mobilization.

Metabolism and bioconversion of chromene derivatives in *Ageratina adenophora* (Asteraceae).

Metabolites of xenobiotics in the bile of fish in waterways polluted by pulp mill effluents.

The role of formaldehyde in hydrazine-induced methylation of liver DNA guanine.

Chlorinated paraffins: formation of sulphur-containing metabolites of polychlorohexadecane in rats.

Screening for the ability of hexachlorobenzene metabolites to decrease rat liver porphyrinogen carboxylase.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on lipid peroxidation in microsomal systems in vitro.

Rubidium uptake by mouse pancreatic islets exposed to 6-hydroxydopamine, ninhydrin, or other generators of hydroxyl radicals.

The complete amino acid sequence of the cellular retinoic acid-binding protein from bovine retina.

Inhibitory action of hydralazine on catecholamine-synthesizing enzymes prepared from bovine adrenal medulla.

The effect of inhibitors of mitochondrial energy production on hepatic glutathione, UDP-glucuronic acid, and adenosine 3'-phosphate-5'-phosphosulfate concentrations.

Uncoupling effects of 2,4-dinitrophenol on electron transfer reactions and cell bioenergetics in rat brain in situ.

Antigen-stimulated metabolism of inositol phospholipids in the cloned murine mast-cell line MC9.

Quantitative determination of the pentose phosphate pathway in preimplantation mouse embryos.

Complete amino acid sequence and location of the five disulfide bridges in porcine pancreatic alpha-amylase.

Effect of fasting and acute ethanol administration on the energy state of in vivo liver as measured by ³¹P-NMR spectroscopy.

Uptake of benzylpenicillin, cefpiramide and cefazolin by freshly prepared rat hepatocytes. Evidence for a carrier-mediated transport system.

Evidence for the rapid internalization and recycling of lutropin receptors in rat testis Leydig cells.

Airborne arsenic and urinary excretion of metabolites of inorganic arsenic among smelter workers.

Metabolism of hexachlorobenzene (HCB) in the isolated perfused rat liver.

Structural characterization of adrenal chromogranin A and parathyroid secretory protein-I as homologs.

Studies on the metabolism of the neurotoxic tri-o-cresyl phosphate. Distribution, excretion, and metabolism in male cats after a single, dermal application.

Studies on the metabolism of the neurotoxic tri-o-cresyl phosphate. Synthesis and identification by infrared, proton nuclear magnetic resonance and mass spectrometry of five of its metabolites.

Halogenated hydrocarbon and hydroperoxide-induced peroxidation in rat tissue slices.

Biological reactive metabolites in human toxicity.

The importance of aspartate aminotransferase for platelet aggregation.

Relationship between ²⁰¹Tl uptake and oxidative metabolism in cultured myocardial cells.

Studies on the mechanism of gastrointestinal absorption of melphalan and chlorambucil.

Iron-induced peroxidative injury to isolated rat hepatic mitochondria.

Ability of several hexachlorobenzene metabolites to decrease rat-liver porphyrinogen carboxy-lyase and to produce porphyrin accumulation in chick-embryo liver.

Functional derangement of liver mitochondria from hexachlorobenzene-treated rats.

The reorganization of the Golgi complex in anoxic pancreatic acinar cells.

Ultrastructural localization of phenylethanolamine N-methyltransferase in sensory and motor nuclei of the vagus nerve.

Effects of estradiol and progesterone on immunoreactive forms of hypothalamic luteinizing hormone-releasing hormone.

[Mutagenic activity of carcinogens and other chemical agents in *Salmonella typhimurium* tests].

The bacterial mutagenicity of nitropolychlorinated dibenzo-p-dioxins.

Brown adipose tissue is a target tissue in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induced toxicity.

[Effects of three different metabolic inhibitors (2,4-dinitrophenol, iodoacetic acid, 2,4-fluorodinitrobenzene) on the contractility of the genioglossus and sartorius muscles].

Cause and prevention of mafosfamide-induced venous pain.

Glutathione peroxidase and reactive oxygen species in TCDD-induced lipid peroxidation.

The synthesis of the neuropeptide Met-enkephalin and two metabolic fragments labelled with ¹¹C in the methionine methyl group.

Cell-to-cell adhesion of dissociated embryonic brain cells; the effects of metabolic inhibitors and temperature.

The kinetics of calcium influx into rat liver slices.

The in vitro metabolism of Eulan WA New by liver homogenates from freshwater fish.

The effect of some hepatotoxins on the sulphoxidation of cimetidine in rat.

Respiratory adjustments of the unanaesthetized chicken, *Gallus domesticus*, to elevated metabolism elicited by 2,4-dinitrophenol or cold exposure.

Assessment of pentachlorophenol toxicity in newborn calves: clinicopathology and tissue residues.

Comparative behavioral, biochemical and pigmentary effects of MPTP, MPP+ and paraquat in *Rana pipiens*.

Chick brain hypomyelination produced by 2,4-dichlorophenoxyacetic butyl ester treatment.

Conformational analysis of environmental agents: use of X-ray crystallographic data to determine molecular reactivity.

Teratogenicity and embryoletality of acrolein and structurally related compounds in rats.

Response of the medullary thick ascending limb to hypothyroidism in the rat.

Effects of the cyclophosphamide metabolite acrolein in mammalian limb bud cultures.

[Food stimulation of the detoxifying system of the liver in preventing pesticide poisonings].

Systematically applied chemicals that damage lung tissue.

Formation, toxicity and inactivation of acrolein during biotransformation of cyclophosphamide as studied in freshly isolated cells from rat liver and kidney.

Acute and subchronic toxicity of 2,4-dichlorophenol in CD-1 mice.

Pentachlorophenol intoxication: report of a fatal case, with comments on the clinical course and pathologic anatomy.

The genotoxicity of 2-bromoacrolein and 2,3-dibromopropanal.

Increased rates of sister chromatid exchanges induced by the herbicide 2,4-D.

Effects of four aromatic organic pollutants on microbial glucose metabolism and thymidine incorporation in marine sediments.

The postnatal effects of prenatal exposure to low doses of nitrofen (2,4-dichlorophenyl-p-nitrophenyl ether) in Sprague-Dawley rats.

Enhanced peroxisomal beta-oxidation of fatty acids and glutathione metabolism in rats exposed to phenoxyacetic acids.

Hemoperfusion-hemodialysis ineffective for paraquat removal in life-threatening poisoning?

The use of graphic methods in working up multivariate data in toxicology.

DNA-damaging properties and cytotoxicity in human fibroblasts of tetrachlorohydroquinone, a pentachlorophenol metabolite.

Pathogenesis of acute and chronic lung injury induced by foreign compounds.

Mechanisms of tobacco smoke toxicity on pulmonary macrophage cells.

Investigation of adrenal steroids and 25-hydroxy-cholecalciferol in human gramoxone poisoning.

Occupational exposures associated with male reproductive dysfunction.

Potential of thyroxine 5-deiodination by aminotriazole.

Major role of hepatic sulfotransferase activity in the metabolic activation, DNA adduct formation, and carcinogenicity of 1'-hydroxy-2',3'-dehydroestragole in infant male C57BL/6J x C3H/HeJ F1 mice.

Effects of thyroid hormone on Na-K-adenosine triphosphatase activity along the rat nephron.

Induction of superoxide dismutase, chromosomal aberrations and sister-chromatid exchanges by paraquat in Chinese hamster fibroblasts.

The role of neutrophils in the development of cadmium chloride-induced emphysema in lathyrogen-fed hamsters.

Hydrogen peroxide has a role in the aggregation of human platelets.

Inhibition by 3-amino-1H-1,2,4-triazole of hepatic tumorigenesis induced by diethylstilbestrol alone or combined with N-nitrosobutylurea in WF rats.

The role of pentachlorophenol in causing mitochondrial derangement in hexachlorobenzene induced experimental porphyria.

A multi-dimensional examination of the positive reinforcing properties of acetaldehyde.

Patterns of pulmonary structural remodeling after experimental paraquat toxicity. The morphogenesis of intraalveolar fibrosis.

Protective effects of trifluralin on benzo(a)pyrene-induced tumors in A/J mice.

The pentose phosphate cycle is regulated by NADPH/NADP ratio in rat liver.

Metabolism of pentachlorophenol to tetrachlorohydroquinone by human liver homogenate.

Norflurazon--an inhibitor of essential fatty acid desaturation in isolated liver cells.

The effect of paraquat on the mutagenicity of benzo(a)pyrene.

3-Substituted 2-halopropenals: mutagenicity, detoxification and formation from 3-substituted 2,3-dihalopropanal promutagens.

The roles of the hepatocellular redox state and the hepatic acetaldehyde concentration in determining the ethanol elimination rate in fasted rats.

The metabolic fate of 2,4-dichlorophenoxyacetic acid-n-butyl ester in the Wistar rat.

Identification and quantification of metabolite conjugates of activated cyclophosphamide and ifosfamide with mesna in urine by ion-pair extraction and fast atom bombardment mass spectrometry.

Demonstration of H₂O₂ production in vivo during aminopyrine metabolism and phenobarbital induction.

Arsenic uptake, cytotoxicity and detoxification studied in mammalian cells in culture.

Incorporation of the 1-pro-R and 1-pro-S hydrogen atoms of ethanol in the reduction of acids in the liver of intact rats and in isolated hepatocytes.

[High performance liquid chromatography determination of dichlorprop and its metabolites].

Liquid chromatographic determination of the herbicide diuron and its metabolite 3,4-dichloroaniline in asparagus.

Study of inorganic arsenic methylation by rat liver in vitro: relevance for the interpretation of observations in man.

Solid-state NMR determination of glyphosate metabolism in a *Pseudomonas* sp.

Metabolic activation of 2-methylfuran by rat microsomal systems.

Induction of rat hepatic drug metabolizing enzymes by substituted urea herbicides.

Mechanism of allyl alcohol toxicity and protective effects of low-molecular-weight thiols studied with isolated rat hepatocytes.

[Effect of various herbicides on the parotid glands and oral mucosa of rats].

Metabolism and excretion of orally administered arsenic trioxide in the hamster.

In vitro evidence for an intracellular mechanism limiting the thyroid follicular cell growth response to thyrotropin.

Regulation of expression of the ADE3 gene for yeast C1-tetrahydrofolate synthase, a trifunctional enzyme involved in one-carbon metabolism.

Cyclophosphamide-induced depression of the antioxidant defense mechanisms of the lung.

Use of cyanamide to determine localization of acetaldehyde metabolism in rat liver.

Aldehyde dehydrogenase activity as the rate-limiting factor for acetaldehyde metabolism in rat liver.

Metabolic activation of 3-(2-chloroethoxy)-1,2-dichloropropene: a mutagen structurally related to diallate, triallate, and sulfallate.

The pulmonary uptake, accumulation, and metabolism of xenobiotics.

The effect of paraquat on the peroxide metabolism enzymes in erythrocytes of freshwater fish species.

Evaluation of immune function in mice exposed to Ordram.

Modulation of rat hepatic microsomal testosterone hydroxylases by 2,3,7,8-tetrachlorodibenzo-p-dioxin and related toxic isostereomers.

Surface functions during mitosis in rat basophilic leukemia cells.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and fasting on body weight and lipid parameters in rats.

Hepatotoxicity due to allyl alcohol in deermice depends on alcohol dehydrogenase.

Relationship between intact cell ATP levels and glucocorticoid receptor-binding capacity in the AtT-20 cell.

Efficient clearance of non-transferrin-bound iron by rat liver. Implications for hepatic iron loading in iron overload states.

Polychlorinated dibenzofurans (PCDFs): correlation between in vivo and in vitro structure-activity relationships.

Amino acid sequence of human tumor derived angiogenin.

[Blood chemiluminescence in the diagnosis of acute inflammatory diseases of the abdominal organs].

Circulatory responses to 2,4-dinitrophenol in dog limb during normoxia and hypoxia.

ATP depletion and loss of cell integrity in anoxic hepatocytes and silica-treated P388D1 macrophages.

Actions of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on human epidermal keratinocytes in culture.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and 2,3,7,8-tetrachlorodibenzofuran (TCDF) in pregnant C57BL/6N mice: distribution to the embryo and excretion.

Hydrogen peroxide from cellular metabolism of cystine. A requirement for lysis of murine tumor cells by verneolepin, a glutathione-depleting antineoplastic.

Detection and characterization of high affinity plasma membrane receptors for human interleukin 1.

Comparison of aryl hydrocarbon hydroxylase and acetanilide 4-hydroxylase induction by polycyclic aromatic compounds in human and mouse cell lines.

[Isolated exocrine pancreas cells--a model for the study of the pathogenesis of experimental acute pancreatitis].

Intestinal absorption studies with glycyl-proline, glycine and ethanol in rats infected with Eimeria nieschulzi.

Experimentally induced defects of mitochondrial metabolism in rat skeletal muscle. Biological effects of the mitochondrial uncoupling agent 2,4-dinitrophenol.

alpha-1-Antitrypsin metabolism in the protein-deficient weanling rat.

Androgenic deficiency in male rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Illness associated with contamination of drinking water supplies with phenol.

Chloracne, "the hallmark of dioxin intoxication".

Comparative hepatic response to bromobenzene and allyl alcohol in the vitamin D-replete and vitamin D-depleted rat.

Toxicity and fetotoxicity of TCDD, TCDF and PCB isomers in rhesus macaques (*Macaca mulatta*).

Toxicity of chlorinated aromatic compounds in animals and humans: in vitro approaches to toxic mechanisms and risk assessment.

[Metabolism of 1,2-dichloroethane in the human body in acute poisonings].

The urinary excretion of bacterial amino-acid metabolites by rats fed saccharin in the diet.

Relationship between 3H-histamine uptake and H₂-receptors in the human promyelocytic leukemia cell line HL-60.

Dose-related effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C57BL/6J and DBA/2J mice.

Control of cytochrome P1-450 gene expression by dioxin.

[Dependence of the nature of the action of metabolic inhibitors on ribosomal RNA synthesis in Ehrlich ascites carcinoma cells on cell integrity].

Metabolic energy pathways in *Theileria annulata* sporozoites and their significance in sporozoite-bovine lymphocyte interactions in vitro.

[Effect of neuroleptic, adreno- and cholinolytic agents on cerebral cortical function in edema].

Gas chromatographic profiling of phenolic acids in urine of patients with cirrhosis of the liver.

Effect of thyroidectomy and thyroxine on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immunotoxicity.

Mutations affecting the regulation of transcription of the cytochrome P1-450 gene in the mouse Hepa-1 cell line.

A study of the mutagenic effect of 3-methyl-4-nitrophenol on the somatic cells of the mouse.

Functional compartmentation of glycolytic versus oxidative metabolism in isolated rabbit heart.

Immunoradiometric assay to measure the in vitro penetration of sporozoites of malaria parasites into hepatoma cells.

Thyroid hormones modulate the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

[Determination of free serum phenol by gas-liquid chromatography in hemosorption].

The role of receptors in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) toxicity.

Lithium ions inhibit function of low- but not high-affinity muscarinic receptors of murine neuroblastoma cells (clone N1E-115).

Ability of several hexachlorobenzene metabolites to induce porphyrin accumulation in chick embryo liver "in ovo".

Gonadotropin releasing hormone activation is mediated by dimerization of occupied receptors.

Sympathetic neurons grown in culture generate ATP by glycolysis: correlation between ATP content and [3H]norepinephrine uptake and storage.

Mechanism of the stimulation of respiration by fatty acids in rat liver.

[³¹P-NMR and HPLC studies on the energy metabolism of perfused chondrocytes].

Mechanism of fluid secretion in isolated shark renal proximal tubules.

Effects of idebenone (CV-2619) and its metabolites on respiratory activity and lipid peroxidation in brain mitochondria from rats and dogs.

Inhibition of prostaglandin generation in the rabbit brain in-vivo by AD-1590, a non-steroidal anti-inflammatory agent with potent antipyretic activity.

Comparison of in vivo and in vitro methods for assessing the effects of phenobarbital on the hepatic drug-metabolizing enzyme system.

Comparison of in vivo and in vitro methods for assessing effects of allyl alcohol on the liver.

Fatty acid-dependent ethanol metabolism.

Disruption of phosphatidylserine translocation to the mitochondria in baby hamster kidney cells.

Inhibition of mitochondrial aldehyde dehydrogenase and acetaldehyde oxidation by the glutathione-depleting agents diethylmaleate and phorone.

Binding, internalization, and degradation of atrial natriuretic peptide in cultured vascular smooth muscle cells of rat.

Plasma levels and kinetic disposition of 2,4-dinitrophenol and its metabolites 2-amino-4-nitrophenol and 4-amino-2-nitrophenol in the mouse.

Cytokinin contents and specific characteristics of tissue strains from three sexual genotypes of *Mercurialis annua* : Evidence for sex-gene involvement at callus-tissue level.

Hormonal Regulation of the Lectin Biosynthesis in Callus Culture of the *Phaseolus vulgaris* Plant.

Glycoproteins on the surface of smooth muscle cells involved in their interaction with type V collagen.

Hepatic metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the rat and guinea pig.

Neurotoxicity and metabolism of methyl bromide in rats.

Gas-liquid chromatographic analysis of ethanol and acetaldehyde in blood with minimal artifactual acetaldehyde formation.

The cytochrome P-450 monooxygenase system of rabbit bladder mucosa: enzyme components and isozyme 5-dependent metabolism of 2-aminofluorene.

Mechanism of tachycardia caused by intracarotid PGE₂ in conscious ewes.

Role of membranes and energy-producing reactions in cellular processing of insulin in primary cultures of rat hepatocytes.

Central thyrotropin-releasing hormone elicits systemic hypoglycemia in mice.

Synthesis and processing of mitochondrial steroid hydroxylases. In vivo maturation of the precursor forms of cytochrome P-450_{sc}, cytochrome P-450(11)_β, and adrenodoxin.

NTP Toxicology and Carcinogenesis Studies of 1,2-Dichlorobenzene (o-Dichlorobenzene) (CAS No. 95-50-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Reasons for possible failure of inoculation to enhance biodegradation.

Isolation and characterization of a neurophysin from ostrich neurohypophyses.

Influence of high dietary iron as ferrous carbonate and ferrous sulfate on iron metabolism in young calves.

Effect of vapor concentration on the disposition of inhaled 2,3-dichloropropene in Fischer-344 rats.

Effect of thyroid hormones on liver microsomal enzyme induction in rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Acute polybrominated biphenyl toxicosis alters vitamin A homeostasis and enhances degradation of vitamin A.

Concanavalin A stimulates neuron-substratum adhesion and nerve fiber outgrowth in culture.

Analysis of the binding of a hemopoietic growth factor, P-cell-stimulating factor, to a cell surface receptor using quantitative absorption of bioactivity.

Primary structure of p19 species of avian sarcoma and leukemia viruses.

Calcium secretion in canine tracheal mucosa.

A light-enhanced metabolism of sulfite in cells of *Cucumis sativus* L. cotyledons.

beta-Ketoadipate pathway in *Trichosporon cutaneum* modified for methyl-substituted metabolites.

A novel giant secretion polypeptide in *Chironomus* salivary glands: implications for another Balbiani ring gene.

Leukotriene production in rat peritoneal leukocytes requires intact energy metabolism.

Influence of extracellular phosphate concentrations on the regulation of hepatic glucose output.

Uptake of glucose analogues into cultured cerebral microvessel endothelium.

Phosphate uptake by primary renal proximal tubule cell cultures grown in hormonally defined medium.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) as a potent and persistent thyroxine agonist: a mechanistic model for toxicity based on molecular reactivity.

Amino acid sequence of the UP1 calf thymus helix-destabilizing protein and its homology to an analogous protein from mouse myeloma.

Hormonal regulation of benzo[a]pyrene metabolism in human adrenocortical cell cultures.

Effects of ATP and cyclic AMP on the (Na⁺ + K⁺ + 2Cl⁻)-cotransport system in turkey erythrocytes.

The primary structure of two polypeptide chains from preparations of homeostatic thymus hormone (HTH alpha and HTH beta) entire-chain identities to two histones.

[Primary structure of 20S,22R-cholesterol-hydroxylating cytochrome P-450 from bovine adrenal cortex mitochondria. IV. Structure of peptides of thermolytic and limited tryptic hydrolysis of the fragment F1; peptides of cyanogen bromide hydrolysis of cytochrome P-450. Complete amino acid sequence].

Effect of heavy metals on cellular growth, metabolism and integrity of cultured Chinese hamster kidney cells.

Effect of furosemide on ion transport in the turtle bladder: evidence for direct inhibition of active acid-base transport.

Properties and biochemical characterization of NADH 5 alpha-reductase from rat liver microsomes.

Elevation of hepatic microsomal epoxide hydrolase activity by 2-acetylaminofluorene: role of metabolism.

Cytochrome P-450 monooxygenase system. Localization in smooth muscle of rabbit aorta.

N-sulfoxy-2-aminofluorene is the major ultimate electrophilic and carcinogenic metabolite of N-hydroxy-2-acetylaminofluorene in the livers of infant male C57BL/6J x C3H/HeJ F1 (B6C3F1) mice.

Inhibition by pesticides of prostaglandin formation in blood platelets.

Effect of triiodothyronine on alcohol dehydrogenase and aldehyde dehydrogenase activities in rat liver. Implications for the control of ethanol metabolism.

Metabolism of 2-acetylaminofluorene in isolated rabbit pulmonary cells. Evidence for the heterogeneous distribution of monooxygenase activity in lung tissue.

Inhibition of purified rat liver glutathione S-transferase isozymes by diuretic drugs.

Release of carnitine from the perfused rat liver.

Sublethal effects of simulated pulp mill effluents on the respiration and energy metabolism of rainbow trout (*Salmo gairdneri*).

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the uptake, distribution and excretion of a single oral dose of [11,12-³H]retinyl acetate and on the vitamin A status in the rat.

Fasciola hepatica: motility response to metabolic inhibitors in vitro.

The metabolic fate of pargyline in rat liver microsomes.

Metabolism of estradiol by true and pseudoperoxidases.

Comparative effects of sodium azide and aminophylline on the rat isolated uterus during muscle activation.

The primary structure of bovine cellular retinoic acid-binding protein.

Continued depression of hepatic uroporphyrinogen decarboxylase activity caused by hexachlorobenzene or 2,3,7,8-tetrachlorodibenzo-p-dioxin despite regeneration after partial hepatectomy.

Metabolic activation of mutagenic N-hydroxyarylamines by O-acetyltransferase in *Salmonella typhimurium* TA98.

Different effects of various beta-adrenoceptor antagonists on adenylate cyclase, guanylate cyclase and calmodulin-dependent phosphodiesterase in heart.

Maintenance of the integrity of the blood-brain barrier in the rat during an in situ saline-based perfusion.

Effect of anion-specific inhibitors on the utilization of sugar nucleotides for N-linked carbohydrate unit assembly by thyroid endoplasmic reticulum vesicles.

Conversion of 5-aminolaevulinate into haem by homogenates of human liver. Comparison with rat and chick-embryo liver homogenates.

Renal transport of gossypol in the rabbit.

Carcinogenicity of diallylnitrosamine following intragastric administration to Syrian hamsters.

Monooxygenase induction by various xenobiotics and its influence on the rat liver microsomal metabolite profile of benz[a]anthracene.

Identification of the major metabolite of 4,4'-thio-bis-(6-t-butyl-m-cresol).

The modulation by arylamines of the in vitro formation of superoxide anion radicals and hydrogen peroxide by rat liver microsomes.

Characterization of long-lasting histaminergic inhibition in a beating pacemaker neuron of *Onchidium*.

Disposition of [¹⁴C]methyl bromide in rats after inhalation.

Chemiluminescence by peripheral blood phagocytes from channel catfish: function of opsonin and temperature.

Absence of lipid peroxidation as determined by ethane exhalation in rats treated with 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin (TCDD).

Respiration and energy conservation in the filarial worm *Litomosoides carinii*.

In vivo and in vitro metabolism of 2,4-dinitrotoluene in strain A mice.

Nonspecific cytotoxic cells in fish (*Ictalurus punctatus*). V. Metabolic requirements of lysis.

Lipid peroxidation modifies the effect of phenolic anti-inflammatory drugs on prostaglandin biosynthesis.

Allyl isothiocyanate is mutagenic in *Salmonella typhimurium*.

Maintenance of prolactin (PRL) binding sites in rat liver cells in suspension culture: effect of PRL and of inhibitors of various cellular functions.

[Effect of metabolic inhibitors on formed novocaine and neutral red segregation zones in frog erythrocytes].

Characteristics of the nerve growth factor receptors and a nerve growth factor receptor--nerve growth factor covalent complex.

Calcium dependent modulation of histamine release from mast cells by sodium and potassium.

Selective depression of thymus-independent anti-DNP antibody responses induced by adult but not neonatal splenectomy.

Toxicity of 3,4,5,3',4',5'-hexabrominated biphenyl and 3,4,3',4'-tetrabrominated biphenyl.

Potentiated hepatotoxicity from concurrent administration of acetaminophen and allyl alcohol to rats.

Influence of phenobarbital and TCDD on the hepatic metabolism of TCDD in the dog.

Double-bond location in monounsaturated fatty acids by dimethyl disulfide derivatization and mass spectrometry: Application to analysis of fatty acids in pheromone glands of four lepidoptera.

Production of a Lectin in Tissue Cultures of *Dolichos biflorus*.

Roles of Ca^{2+} and Na^{+} on the modulation of antidiuretic hormone action on urea permeability in toad urinary bladder.

Molecular interactions of toxic chlorinated dibenzo-p-dioxins and dibenzofurans with thyroxine binding prealbumin.

Activation of Na^{+} -dependent transport at fertilization in the sea urchin: requirements of both an early event associated with exocytosis and a later event involving increased energy metabolism.

The amino acid sequence of pancreatic spasmolytic polypeptide.

Characteristics of the formation and membrane transport of 7-hydroxymethotrexate in freshly isolated rabbit hepatocytes.

Demonstration of arginyl-bradykinin moiety in rat HMW kininogen: direct evidence for liberation of bradykinin by rat glandular kallikreins.

Binding and function of mitochondrial glycerol kinase in comparison with those of mitochondrial hexokinase.

Induction of methotrexate release from rat hepatocytes in suspension by alpha-adrenergic agents: involvement of calcium and metabolic energy.

Characterization of parathyroid hormone fragments produced by cathepsin D.

Additional routes in the metabolism of phenacetin.

Variations among untreated rabbits in benzo(a)pyrene metabolism and its modulation by 7,8-benzoflavone.

Use of a new citrulline incorporation assay to investigate inhibition of intercellular communication by 1,1,1-trichloro-2,2-bis(p-chlorophenyl)ethane in human fibroblasts.

A hydroxylapatite microassay for receptor binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3-methylcholanthrene in various target tissues.

Mechanism of action of toxic halogenated aromatics.

Effect of sodium azide and sodium selenite on prostaglandin synthesis in rabbit kidney medulla slices.

Mitochondrial and extramitochondrial Ca²⁺ pools in the perfused rat liver. Mitochondria are not the origin of calcium mobilized by vasopressin.

Characterization of hog thyroid peroxidase.

[Secretin and pancreatic secretion in iron absorption].

Cytochemical localization of hydrogen peroxide generating sites in the rat thyroid gland.

Mutagen testing of agricultural chemicals with yeast.

[Metabolism and excretion of methylarsonic acid].

The validity of urinary metabolites as indicators of low exposures to toluene.

Pharmacological study on the effects of some ocular hypotensive drugs on aqueous humor formation in the arterially perfused enucleated rabbit eye.

Fetal thymus organ culture as an in vitro model for the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin and its congeners.

Formation of glutathione conjugates by reactive metabolites of vinylidene chloride in microsomes and isolated hepatocytes.

Aminopyrine breath test and zonal hepatic damage in rats.

Degradation of insulin by human fibroblasts: effects of inhibitors of pinocytosis and lysosomal activity.

Assessment of exposure to organophosphate insecticides during spraying in Haiti: monitoring of urinary metabolites and blood cholinesterase levels.

Metabolic fate and cardiovascular effects of arsenic in rats and rabbits chronically exposed to trivalent and pentavalent arsenic.

Allyl alcohol toxicity in isolated renal epithelial cells: protective effects of low molecular weight thiols.

Calcium accumulating ability of mitochondria from bovine coronary artery. Comparison with aortic mitochondria.

A metabolite of riboflavin binds to the 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) receptor.

Effects of metabolic inhibitors on evoked activity and the energy state of hippocampal slices superfused in vitro.

Carbohydrate, protein and glycoprotein metabolism by the guinea-pig liver in chronic metribuzin poisoning.

Regulation by calcium of hormone-insensitive adenylate cyclase and calmodulin-dependent guanylate cyclase in *Tetrahymena* plasma membrane.

Cyclophosphamide teratogenesis: a review.

Axoplasmic transport of substances in motoneuronal axons of the spinal cord in old age.

Incorporation of C¹⁴-thymidine and C¹⁴-uridine nucleosides into nucleic acid molecules in the liver of mice exposed to trivalent arsenic in drinking water.

Recent state of lindane metabolism. Part III.

Plasma glutathione disulfide as an index of oxidant stress in vivo: effects of carbon tetrachloride, dimethylnitrosamine, nitrofurantoin, metronidazole, doxorubicin and diquat.

The occurrence, metabolism and toxicity of cinnamic acid and related compounds.

Effect of pentachlorophenol on hepatic glycogen metabolism in rats.

Molecular requirements for the mutagenicity of malondialdehyde and related acroleins.

Distribution and toxicity of monosodium methanearsonate following oral administration of the herbicide to dairy sheep and goats.

Tissue slices in the study of lung metabolism and toxicology.

Testing of 2,4,5-T-amino acid conjugates for mutagenic activity in *Salmonella typhimurium* strains.

Evaluation of diallate and triallate herbicides for genotoxic effects in a battery of in vitro and short-term in vivo tests.

Effects of dietary methionine, methylmercury, and atrazine on ex-vivo synthesis of prostaglandin E₁ and thromboxane B₂.

The antispermatogenic effect and toxicity of 2, 4-dinitro-6-tert-butylphenyl methanesulfonate on Sprague-Dawley rat.

Pentose pathway of glucose metabolism in isolated granular pneumocytes. Metabolic regulation and stimulation by paraquat.

Use of plant cell cultures to study the metabolism of environmental chemicals.

Ascorbic acid potentiates the substrate-specific inhibition of mixed-function oxidation and the stimulation of NADPH oxidation caused by paraquat.

The acute effects of single and repeated injections of acrolein and other aldehydes.

The effect of the phenoxyacetic acid herbicides 2,4,5-trichlorophenoxyacetic acid and 2,4-dichlorophenoxyacetic acid as ascertained by direct experimentation.

Evaluation of the mutagenic potential of corn (*Zea mays* L.) grown in untreated and atrazine (AAtrex) treated soil in the field.

Interaction between bacterial metabolites and some pesticides. II. Change of phytotoxicity of the herbicide Roneet by the phenolic metabolites of *Arthrobacter* sp.

Interaction between bacterial metabolites and some pesticides. I. Interaction between the phenolic compounds produced by *Pseudomonas acidovorans* and the herbicide Venzar.

Hepatic macromolecular covalent binding of the hepatocarcinogen 2,6-dinitrotoluene and its 2,4-isomer in vivo: modulation by the sulfotransferase inhibitors pentachlorophenol and 2,6-dichloro-4-nitrophenol.

Lipid metabolism in rabbits exposed to paraquat aerosol.

Role of acrolein in cyclophosphamide teratogenicity in rat embryos in vitro.

Differential rates of loss of chromosomes aberrations in rat thyroids after X rays or neutrons.

Phosphatidylinositol turnover in isolated soybean membranes stimulated by the synthetic growth hormone 2,4-dichlorophenoxyacetic acid.

³²P-post-labelling analysis of DNA adducts formed in the livers of animals treated with safrole, estragole and other naturally-occurring alkenylbenzenes. I. Adult female CD-1 mice.

Transmembrane potential of liver mitochondria from hexachlorobenzene- and iron-treated rats.

On the role of peroxisomes in the metabolism of lipids--evidence from studies on mammalian tissues in vivo.

Extracorporeal removal of specific antibodies by hemoperfusion through the immunosorbent agarose-polyacrolein microsphere beads: removal of anti-bovine serum albumin in animals.

Modulation of genotoxic and cytotoxic effects of aromatic amines in monolayers of rat hepatocytes.

Metabolism and binding of cyclophosphamide and its metabolite acrolein to rat hepatic microsomal cytochrome P-450.

[In vitro conjugation of allyl alcohol and of its metabolites with reduced glutathione].

Organ and cellular distribution of inhaled metallic mercury in the rat and Marmoset monkey (*Callithrix jacchus*): influence of ethyl alcohol pretreatment.

The metabolic activation of cyanamide to an inhibitor of aldehyde dehydrogenase is catalyzed by catalase.

Effect of acetaldehyde and cyanamide on the metabolism of formaldehyde by hepatocytes, mitochondria, and soluble supernatant from rat liver.

[Biotransformation of monolinuron (N-(4-chlorophenyl)-N'-methyl-N'methoxyurea) in isolated perfused chicken liver].

Autoradiographic and biochemical studies of drug distribution in the liver. III. [¹⁴C]Aminotriazole.

Effect of glutathione levels, sulfate levels, and metabolic inhibitors on covalent binding of 2-amino-3-methylimidazo[4,5-f]quinoline and 2-acetylaminofluorene to cell macromolecules in primary monolayer cultures of adult rat hepatocytes.

Metabolism and excretion of orally administered dimethylarsinic acid in the hamster.

Metabolism and excretion of orally ingested trimethylarsenic in man.

The inhibition of ultraviolet radiation-induced DNA repair in human diploid fibroblasts by arabinofuranosyl nucleosides.

[Determination of the active substance of the preparation Roundup and its metabolite in environmental objects].

Disposition of some sulphur-containing hexachlorobenzene (HCB) metabolites: affinity of methylsulphonylpentachlorobenzene for the gray matter of brain, the lungs and the adrenal zona reticularis.

N-acetylcyanamide, the major urinary metabolite of cyanamide in rat, rabbit, dog, and man.

The effect of paraquat on the in vitro activity of cytosol, mitochondrial and microsomal enzyme systems.

Aliphatic halogenated hydrocarbons produce volatile Salmonella mutagens.

Gas chromatographic determination of ametryn and its metabolites in tropical root crops.

Metabolism of the carbamate herbicide, asulam, in the rat.

The metabolic fate of the herbicide nitralin in the rat.

On the role of catalase in the oxidation of tissue fatty acids.

A quantitative study of peroxidase activity in unfixed tissue sections of the guinea-pig thyroid gland.

Effect of di(2-ethylhexyl) phthalate on DNA repair and lipid peroxidation in rat hepatocytes and on metabolic cooperation in Chinese hamster V-79 cells.

Effects of paraquat on peroxide metabolism enzymes and lipid peroxidation in the rat.

Biliary excretion of glutathione and glutathione disulfide in the rat. Regulation and response to oxidative stress.

Perfused canine brain: metabolism and blood-brain transport during altered metabolic states.

Effects of a herbicide on the peroxide metabolism enzymes and lipid peroxidation in carp fish (*Hypophthalmichthys molitrix*).

Effects of paraquat administration on longevity, oxygen consumption, lipid peroxidation, superoxide dismutase, catalase, glutathione reductase, inorganic peroxides and glutathione in the adult housefly.

Induction of ornithine decarboxylase and augmentation of tyrosine aminotransferase activity by N-hydroxy-2-acetylaminofluorene and 2-acetylaminofluorene in rat liver. Influence of sex, retinylacetate, indomethacin, and pentachlorophenol.

Hexadecane increases the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): is brown adipose tissue the primary target in TCDD-induced wasting syndrome?

Body weight regulation in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Histologic changes produced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the skin of mice carrying mutations that affect the integument.

Central versus peripheral sites of antipyretic action of a non-steroidal anti-inflammatory agent, AD-1590, in rabbits.

Effects of zeolite a or clinoptilolite in diets of growing swine.

Role of acidosis in early contractile dysfunction during ischemia: evidence from pH_o measurements.

3'-Monoiodothyronine degradation in rat liver homogenate: enzyme characteristics and documentation of deiodination by high-pressure liquid chromatography.

Oxygen metabolism in phagocytes of leprotic patients: enhanced endogenous superoxide dismutase activity and hydroxyl radical generation by clofazimine.

Biochemical and genetic analysis of variant mouse hepatoma cells which overtranscribe the cytochrome P1-450 gene in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Pharmacologic and genetic studies on the modulatory effects of butylated hydroxytoluene on mouse lung adenoma formation.

Experimental skeletal muscle damage: the nature of the calcium-activated degenerative processes.

Enhancing effects of monocytes on modulation of a lymphocyte membrane antigen.

The influence of liver disease on the methylation of arsenite in humans.

Separation of wasting syndrome and lethality caused by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Entry of adenovirus 2 into HeLa cells.

Flow cytometric analysis of proflavine uptake into normal rat hepatocytes and cells arising during AAF-induced hepatocarcinogenesis.

Cutaneous signs of dioxin exposure.

Characterization of the enhanced paw edema response to carrageenan and dextran in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated rats.

The pharmacological profile of the thromboxane A₂ antagonist BM 13.177. A new anti-platelet and anti-thrombotic drug.

[Effect of hypoxia and hypoperfusion on the contractile function of the isolated heart working under various loads].

Hypothyroid pituitary cells in culture: an analysis of thyrotropin and prolactin responses to dopamine (DA) and DA receptor binding.

Pathogenic mechanisms in osteochondrodysplasias.

Digestible energy and efficiency of feed utilization in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Incomplete correlation of 2,3,7,8-tetrachlorodibenzo-p-dioxin hepatotoxicity with Ah phenotype in mice.

Soft tissue sarcomas in agriculture and forestry workers.

Modulation of azaserine-induced pancreatic foci by phenolic antioxidants in rats.

Effects of 2,4-dinitrophenol and other metabolic inhibitors on the thermograms of Ehrlich ascites carcinoma cells registered with a microcalorimeter.

[Inhibitory analysis of the functions of the oxidative metabolic systems of tumor cells in tissue culture].

Proline transport and metabolism in *Rickettsia prowazekii*.

Ruminal metabolism of plant toxins with emphasis on indolic compounds.

DMSA, DMPS, and DMPA--as arsenic antidotes.

Cutaneous signs of systemic toxicity due to dioxins and related chemicals.

Induction and decay of amino acid transport in the liver. Turnover of transport activity in isolated hepatocytes after stimulation by diabetes or glucagon.

Leads from the MMWR. Porphyria cutanea tarda and sarcoma in a worker exposed to 2,3,7,8-tetrachlorodibenzodioxin-Missouri.

Dioxin in soil: bioavailability after ingestion by rats and guinea pigs.

Porphyria cutanea tarda and sarcoma in a worker exposed to 2, 3, 7, 8-tetrachlorodibenzodioxin--Missouri.

Interactions between 7-hydroxymethotrexate and methotrexate at the cellular level in the Ehrlich ascites tumor in vitro.

Energy requirement for degradation of tumor-associated protein p53.

Poly-L-arginine and an N-formylated chemotactic peptide act synergistically with lectins and calcium ionophore to induce intense chemiluminescence and superoxide production in human blood leukocytes. Modulation by metabolic inhibitors, sugars, and polyelectrolytes.

Opposing effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and hydrocortisone on growth and differentiation of cultured malignant human keratinocytes.

The differential effects of dimethylnitrosamine and ethionine on mitochondrial and extramitochondrial dehydrogenases in single intact cells.

Neutrophil-mediated cellular cytotoxicity induced by zymosan-activated serum.

Effect of thyroidectomy and thyroxine on 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induced toxicity.

Importance of the route of administration for genetic differences in benzo[a]pyrene-induced in utero toxicity and teratogenicity.

Mortality of workers potentially exposed to organic and inorganic brominated chemicals, DBCP, TRIS, PBB, and DDT.

Structural and functional properties of rat liver mitochondria in hexachlorobenzene induced experimental porphyria.

Decarboxylation of uroporphyrinogen I and III in 2,3,7,8-tetrachlorodibenzo-p-dioxin induced porphyria in mice.

Hepatotoxicological evaluation of dantrolene sodium.

Development of chronic hepatic porphyria (porphyria cutanea tarda) with inherited uroporphyrinogen decarboxylase deficiency under exposure to dioxin.

Effects of metabolic deprivation on methotrexate transport in L1210 leukemia cells: further evidence for separate influx and efflux systems with different energetic requirements.

Dynamic nature of the association of large tumor antigen and p53 cellular protein with the surfaces of simian virus 40-transformed cells.

Agriculturally-related carcinogenic risk.

Prostanoids and cell injury.

Combined use of a water-insoluble chemical delivery system and a metabolic activation system in whole embryo culture.

Biochemical activity of intestinal microflora in adult coeliac disease.

Abnormal type I collagen metabolism by cultured fibroblasts in lethal perinatal osteogenesis imperfecta.

Occupational influences on male fertility and sexuality. I.

Molecular mechanism of cataractogenesis: III. Toxic metabolites of oxygen as initiators of lipid peroxidation and cataract.

[Experimental porphyria induced by chlorinated hydrocarbons. Studies of porphyrinogen carboxy-lyase in the experimental model of human cutaneous delayed porphyria].

Polychlorinated biphenyls (PCBs) and polybrominated biphenyls (PBBs): biochemistry, toxicology, and mechanism of action.

Lymphocyte bacterial rosette test: methodological details and effect of metabolic inhibitors and divalent cations.

Campylobacter jejuni and Campylobacter coli Production of a Cytotoxic Toxin Immunologically Similar to Cholera Toxin.

Developmental regulation of polyamine metabolism in growth and differentiation of carrot culture.

Release of adenosine, inosine and hypoxanthine from rabbit non-myelinated nerve fibres at rest and during activity.

Metabolic processing of 2-acetylaminofluorene by microsomes and six highly purified cytochrome P-450 forms from rabbit liver.

Triiodothyronine production by isolated rat hepatocytes: characterization and lack of glucoregulatory hormone effects.

Sequence comparison of rat liver phenylalanine hydroxylase and its cDNA clones.

The covalent protein structure of insecticyanin, a blue biliprotein from the hemolymph of the tobacco hornworm, *Manduca sexta* L.

Pea Xyloglucan and Cellulose : III. Metabolism during Lateral Expansion of Pea Epicotyl Cells.

Kinetics and mechanism of in vitro uptake of amino-beta-lactam antibiotics by rat small intestine and relation to the intact-peptide transport system.

Lead flux through the kidney and salivary glands of rats.

Effects of mitomycin C on metabolism in a rat liver preparation.

Localized surface antigens of guinea pig sperm migrate to new regions prior to fertilization.

Mapping of three carbohydrate attachment sites in embryonic and adult forms of the neural cell adhesion molecule.

Comparative formation of chlorophenol metabolites from hexachlorocyclohexane in mouse and rat in vivo and in vitro.

Interaction of prolactin (PRL) binding sites with PRL receptor antibodies in rat liver cells in suspension culture: effect of inhibitors of cellular functions.

Short-chain fatty acid fermentation products of plant fiber affect glucose metabolism of isolated rat hepatocytes.

Drug elimination function of rat small intestine: metabolism and intraluminal excretion.

Stimulation of carrot somatic embryogenesis by proline and serine.

Sensitive fluorimetric assay for human thyroid peroxidase using p-cresol as a substrate.

Cyclophosphamide resistance developed in a human melanoma cell line.

Difference in hepatic uptake kinetics of aspirin and salicylamide in rats.

Inhibition of the oxidation of acetaldehyde and formaldehyde by hepatocytes and mitochondria by crotonaldehyde.

Biochemical indices of cyclophosphamide-induced lung toxicity.

An in vitro approach to studying cutaneous metabolism and disposition of topically applied xenobiotics.

Thiocyanate inhibition of active chloride absorption in *Aplysia* intestine.

Frequency-pulsed electron capture gas-liquid chromatographic analysis of metabolites produced by *Clostridium difficile* in broth enriched with amino acids.

Development of markers for cholinergic neurones in re-aggregate cultures of foetal rat whole brain in serum-containing and serum-free media: effects of triiodothyronine (T₃).

Trypan blue uptake as a new method to investigate hepatotoxicity in periportal and pericentral regions of the liver lobule: studies with allyl alcohol in the perfused liver.

Uptake and metabolism of thyroid hormones by the rat foetus in early pregnancy.

Use of bacteria and yeasts to identify T lymphocytes in peripheral blood and lymphoid tissues of healthy guinea pigs and guinea pigs fed aflatoxin.

Effect of metabolic inhibitors on the ability of human T lymphocytes to form active T rosettes.

Role of calcium ions in insulin action on hexose transport in L6 muscle cells.

Peptide mapping of bovine pancreatic ribonuclease A by reverse-phase high-performance liquid chromatography. I. Application to the reduced and S-carboxymethylated protein.

[Protective effect of phenobarbital in dinitrophenol poisoning].

Carcinogen-binding proteins. High-affinity binding sites for benzo[a]pyrene in mouse liver distinct from the Ah receptor.

Oxygen uptake associated with Sendai-virus-stimulated chemiluminescence in rat thymocytes contains a significant non-mitochondrial component.

Altered blood levels of corticosteroids in the rat after exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Endogenous peroxidase in the nuclear envelope and endoplasmic reticulum of human monocytes in vitro: association with arachidonic acid metabolism.

Metabolic studies of mammalian cells by ³¹P-NMR using a continuous perfusion technique.

Metabolism of \pm -aminoisobutyric acid in mungbean hypocotyls in relation to metabolism of 1-aminocyclopropane-1-carboxylic acid.

Lectin-coated agarose beads in the investigation of sperm capacitation in the hamster.

Effects of increasing metabolism by 2,4-dinitrophenol on respiration and pulmonary gas exchange in the duck.

Effects of allyl alcohol and bromobenzene on trimethadione metabolism in the rat.

Overproduction of a gastrointestinal hormone, secretin, in *Escherichia coli* cells and its chemical characterization.

Activation of glycogen synthase by insulin in rat adipocytes. Evidence of hormonal stimulation of multisite dephosphorylation by glucose transport-dependent and -independent pathways.

Isolation and characterization of the two giant secretory proteins in salivary gland of *Chironomus tentans*.

The effect of methyltransferase inhibition on the metabolism of [⁷⁴As]arsenite in mice and rabbits.

The genotoxicity of aromatic amines in primary hepatocytes isolated from C57BL/6 and DBA/2 mice.

Relationships between the flux of lipid metabolism in vivo and the uncoupling of respiratory control.

Carbonic anhydrase in mouse salivary glands and saliva: a histochemical, immunohistochemical, and enzyme activity study.

Rapid and easy separation of the subunits of bovine and human glycoprotein hormones by use of high performance liquid chromatography.

Effects of leukotrienes and f-Met-Leu-Phe on oxidative metabolism of neutrophils and eosinophils.

Effects of H₂ receptor antagonists on the hepatotoxicity of various chemicals.

Biogenesis of the mitochondrial enzyme methylmalonyl-CoA mutase. Synthesis and processing of a precursor in a cell-free system and in cultured cells.

Hormonal effects on the phosphorylation of glycogen synthase in rat hepatocytes.

Oxidized forms of parathyroid hormone with biological activity. Separation and characterization of hormone forms oxidized at methionine 8 and methionine 18.

The alpha-subunit of mouse 7 S nerve growth factor is an inactive serine protease.

Effect of exogenous cytokinins on growth and somatic embryogenesis in anise cells (*Pimpinella anisum* L.).

Role of metabolic CO₂ production in the generation of elevated renal cortical PCO₂.

Processing of human growth hormone by rat hepatocytes in monolayer culture.

Transport and metabolism of 2-deoxy-D-glucose by *Rhodotorula glutinis*.

Spin-trapping of free radicals formed during in vitro and in vivo metabolism of 3-methylindole.

Use of poisons in determination of microbial manganese binding rates in seawater.

Energy metabolism in *Cotugnia digonopora* and the effect of anthelmintics.

Dual action of cycloheximide on memory formation in day-old chicks.

Teratogenicity of nitrofen (2,4-dichloro-4'-nitrodiphenyl ether) and its effects on thyroid function in the rat.

The support of steroid aromatization by mitochondrial metabolic activities of the human placenta.

NMR spectroscopic studies of intermediary metabolites of cyclophosphamide. A comprehensive kinetic analysis of the interconversion of cis- and trans-4-hydroxycyclophosphamide with aldophosphamide and

the concomitant partitioning of aldophosphamide between irreversible fragmentation and reversible conjugation pathways.

Characterization of uptake of steroid glucuronides into isolated male and female rat hepatocytes.

Characteristics of taurine transport in rat hepatocytes in primary culture.

Accumulation of thyrotropin releasing hormone by rat hypothalamic slices.

Studies on the metabolic fate of [14C]2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the mouse.

Gastrointestinal absorption and metabolism of capsaicin and dihydrocapsaicin in rats.

Biosynthesis and compartmentalization of rat-intestinal vitamin-D-dependent calcium-binding protein.

Proton magnetic resonance studies of the decomposition of 4-hydroxycyclophosphamide, a microsomal metabolite of cyclophosphamide.

Regulation of protein metabolism: Coupling of photosynthetic electron transport to in vivo degradation of the rapidly metabolized 32-kilodalton protein of the chloroplast membranes.

Use of ³¹P nuclear magnetic resonance spectroscopy and electron microscopy to study phosphorus metabolism of microorganisms from wastewaters.

Exocytosis and macrophage-mediated antibody-dependent cellular cytotoxicity: a cautionary note.

Oxalate and chloride absorption by the rabbit colon: sensitivity to metabolic and anion transport inhibitors.

Sensitivity of cAMP-stimulated salt secretion in shark rectal gland to "loop" diuretics.

Cellular distribution of thyroid myosin.

Isosafrole-induced cytochrome P2-450 in DBA/2N mouse liver. Characterization and genetic control of induction.

In vivo studies of pyridine nucleotide metabolism in *Escherichia coli* and *Saccharomyces cerevisiae* by carbon-13 NMR spectroscopy.

Rhodamine 123 inhibits bioenergetic function in isolated rat liver mitochondria.

Different susceptibility of mouse tissues to porphyrogenic effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Investigation on a selective non-prostanoid thromboxane antagonist, BM 13.177, in human platelets.

Metabolism of leukotriene D4 by porcine alveolar macrophages.

Oxygen metabolism in cloned macrophage cell lines: glucose dependence of superoxide production, metabolic and spectral analysis.

The primary sequence of human pancreatic colipase.

Ontogeny of the cytosolic receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in rat liver, lung, and thymus.

Mitochondrial oxidative phosphorylation: tissue oxygen sensor for regulation of coronary flow.

Significance of arsenic metabolic forms in urine. Part I: Chemical speciation.

Rates of allyl alcohol metabolism in periportal and pericentral regions of the liver lobule.

Hepato-renal cooperation in biotransformation, membrane transport, and elimination of cysteine S-conjugates of xenobiotics.

[The effect of salicylates and similar acting substances (diphenylhydantoin, dinitrophenol, etc.) on the hypophyseal-thyroid gland axis].

Effects of cell swelling on fluid flow across alveolar epithelium.

Experimental model for evaluating animal exposure to endogenous N-nitrosodi-n-butylamine by measuring its urinary metabolites N-butyl-N-(4-hydroxybutyl)-nitrosamine and N-butyl-N-(3-carboxypropyl)nitrosamine.

Effects of ovariectomy and estradiol administration on the adrenal macrophage system of the rat.

Bioconcentration and metabolism of picric acid (2,4,6-trinitrophenol) and picramic acid (2-amino-4,6-dinitrophenol) in rainbow trout *Salmo gairdneri*.

Effect of ethanol, cimetidine and propranolol on toluene metabolism in man.

Biochemical studies of the control of renal tubular phosphate reabsorption.

Metabolism of 2,4-dichlorophenol by isolated perfused rat liver.

The relation between effects of 2,4-dinitrophenol and adrenalin on muscle contraction induction and phosphorylase activation.

[Pharmacological sensitivity of the photopic c-wave in the electroretinogram of the chicken. I. Effects of sodium azide, adrenaline, and a barbiturate].

Panning separation for monoclonal antibody-specific T-cell subsets: effects of enzymes and metabolic inhibitors.

Role of kidney and liver in degradation of circulating submaxillary renin in mice.

Polyamine oxidase-mediated intraerythrocytic killing of *Plasmodium falciparum*: evidence against the role of reactive oxygen metabolites.

Electrophysiology of the single cardiac cell: a voltage clamp study of the mechanism of the shortening of the action potential by metabolic inhibition in guinea-pig ventricular myocytes.

[Rate of axoplasmic transport in the ventral roots of the spinal cord of the rat in old age and its relation to the level of energy metabolism].

The amino acid sequence of human pancreatic ribonuclease.

Uptake and release of [3H]-serotonin in photophores of the midshipman fish, *Porichthys notatus*.

The in vitro metabolism by homogenates of goldfish (*Carassius auratus*) liver of pentachloro-2-(chloromethyl sulphonamido) diphenyl ether, the major component and active ingredient of the mothproofing agent Eulan WA New.

Noninvasive assessment of microsomal enzyme activity in occupational medicine: present state of knowledge and future perspectives.

Pharmacologic modulation in vitro of human histamine-induced suppressor cell activity.

Nitrofen: a review and perspective.

Carcinogenicity and toxicity of 2,4-dichlorophenoxy-acetic acid.

Strong evidence from studies with brachymorphic mice and pentachlorophenol that 1'-sulfoxyafrole is the major ultimate electrophilic and carcinogenic metabolite of 1'-hydroxyafrole in mouse liver.

[Paraquat poisoning: clinical and experimental studies].

Effect of phenolic compounds on in vivo activity of transaminases in certain tissues of the fish, *Notopterus notopterus*.

The effects on rat pups when nitrofen (4-(2,4-dichlorophenoxy)nitrobenzene) was applied dermally to the dam during organogenesis.

Effects of phenoxyherbicides and glyphosate on the hepatic and intestinal biotransformation activities in the rat.

Selective action of prostaglandin F₂ alpha during paraquat-induced pulmonary edema in the perfused lung.

Modification of chemical toxicity by selenium deficiency.

Evaluation of amitrole (aminotriazole) for potential carcinogenicity in orally dosed rats, mice, and golden hamsters.

[Deliberate poisoning with paraquat, death in less than 24 hours].

Paraquat myocarditis and adrenal cortical necrosis.

Postnatal evaluation of morphological and functional effects of prenatal exposure to nitrofen in the Long-Evans rat.

[Experimental study on paraquat-induced pneumonitis--therapeutic effects of prednisolone and elastase].

Circadian rhythms of RNA, DNA and protein in the rat thyroid, adrenal and testis in chronic pesticide exposure. II. Effects of the herbicides Aminotriazole and Alachlor.

Diphenyl ether herbicides: mutagenic metabolites and photoproducts of nitrofen.

Toxicity, bioconcentration, and metabolism of the herbicide propanil (3',4'-dichloropropionanilide) in freshwater fish.

The effects of the herbicide 2,4-dichlorophenyl-p-nitrophenyl ether (NIT) on serum thyroid hormones in adult female mice.

Effects of paraquat on plasma glucose, cortisol, catecholamines, and insulin in the beagle.

Postnatal developmental alterations following prenatal exposure to the herbicide 2,4-dichlorophenyl-p-nitrophenyl ether: a dose response evaluation in the mouse.

[Pulmonary toxicity of free radicals of oxygen].

Kidney structure in hypothyroidism.

Correlation between brain tissue and cerebrospinal fluid concentrations of selected compounds in rats with intact and injured blood-brain barrier.

Vascular changes in early TSH-induced thyroid tumours in the rat.

Ether link cleavage is the major pathway of iodothyronine metabolism in the phagocytosing human leukocyte and also occurs in vivo in the rat.

[Effect of small amounts of 2,4-dichlorophenoxyacetic acid derivatives on thiamine and riboflavin metabolism in the animal body].

Sulfation and glucuronidation as competing pathways in the metabolism of hydroxamic acids: the role of N,O-sulfonation in chemical carcinogenesis of aromatic amines.

Effect of increasing carbon chain length on organic acid transport by the choroid plexus: a potential factor in Reye's syndrome.

Histochemical demonstration of enteropeptidase activity. New method with a synthetic substrate and its comparison with the trypsinogen procedure.

Plasma glutathione and glutathione disulfide in the rat: regulation and response to oxidative stress.

The major role of glutathione in the metabolism and excretion of N,N-dimethyl-4-aminoazobenzene in the rat.

Regulation of 2,4,5-trichlorophenoxyacetic acid and chlorophenol metabolism in *Pseudomonas cepacia* AC1100.

Metabolism of Halophenols by 2,4,5-trichlorophenoxyacetic acid-degrading *Pseudomonas cepacia*.

Intracellular interaction and metabolic fate of arsenite and arsenate in mice and rabbits.

Effect of 1.1.1 trifluoro-N-(2-methyl-4-phenyl sulfonyl) methane sulfonamide (Destun 50WP) on rat hepatic microsomal enzymes, aniline hydroxylase and amino-pyrene N-demethylase.

Formation of diiodotyrosine from thyroxine. Ether-link cleavage, an alternate pathway of thyroxine metabolism.

Cytochemical glucose-6-phosphatase activity in the cells of mouse pancreas and submandibular gland.

Acute toxicity of fluorinated ether anesthetics: role of 2,2,2-trifluoroethanol and other metabolites.

Metabolism of carbon monoxide by *Rhodospseudomonas gelatinosa*: cell growth and properties of the oxidation system.

Inhibition of hepatic aldehyde dehydrogenases in the rat by calcium carbimide (calcium cyanamide).

Arsenic uptake and metabolism by liver cells is dependent on arsenic oxidation state.

Activation of carboxylesterases in root cortical parenchymal cells of *Pisum sativum* during xylem induction in vitro.

Circadian rhythms of RNA, DNA and protein in the rat thyroid, adrenal and testis, in chronic pesticide exposure. IV. Effects of the herbicide 2,4-dichlorophenoxyacetic acid.

Simplified heptafluorobutyrylation of linuron and its metabolite 3,4-dichloroaniline.

Effect of paraquat on cytochrome P-450-dependent lipid peroxidation in bovine adrenal cortex mitochondria.

Saturable accumulation of the anionic herbicide, 2,4-dichlorophenoxyacetic acid (2,4-D), by rabbit choroid plexus: early developmental origin and interaction with salicylates.

Effects of intravenous acetaldehyde, acrolein, formaldehyde and propionaldehyde on arterial blood pressure following acute guanethidine treatment.

Effects of monocrotaline and monocrotaline pyrrole on 5-hydroxytryptamine and paraquat uptake by lung slices.

Whole body and liver distribution of inhaled mercury vapor in the mouse: influence of ethanol and aminotriazole pretreatment.

Paraquat inhibits mixed-function oxidation by rat lung.

A new pathway of acrolein metabolism in rats.

Metabolism of AC 206,784 herbicide [2-chloro-N-(2,3-dimethylphenyl)-N-(1-methylethyl)acetamide] in soybean plants.

Metabolism of [¹⁴C]paraldehyde in mice in vivo, generation and trapping of acetaldehyde.

The effect of ethanol on the absorption, accumulation and biotransformation of xenobiotics by the isolated perfused rabbit lung.

Metabolic activation of cyanamide to an inhibitor of aldehyde dehydrogenase in vitro.

Investigations into the production of acetate from ethanol by human blood and bone marrow cells in vitro.

A new era of exploitation of microbial metabolites.

Glutathione peroxidase blockage inhibits prostaglandin biosynthesis in rat platelets and aorta.

Dose-dependent pharmacokinetics: emphasis on phase I metabolism.

Acrolein: a fixative for immunocytochemical localization of peptides in the central nervous system.

[Highly sensitive detection in high performance liquid chromatography].

Biochemical modulation of angiogenesis in the chorioallantoic membrane of the chick embryo.

Effects of chronic ethanol feeding and acetaldehyde metabolism on calcium transport by rat liver mitochondria.

Energy-dependent reduced drug binding as a mechanism of Vinca alkaloid resistance in human leukemic lymphoblasts.

Decreased liver delta-aminolaevulinate dehydratase activity in porphyria cutanea tarda and in alcoholism.

The acute toxicity of perfluorooctanoic and perfluorodecanoic acids in male rats and effects on tissue fatty acids.

Localization of lipid-protein and protein-protein interactions within the murine retrovirus gag precursor by a novel peptide-mapping technique.

Hidden receptors for nerve growth factor in PC12 cells.

Effects of cytochrome P1-450 inducers on the cell-surface receptors for epidermal growth factor, phorbol 12,13-dibutyrate, or insulin of cultured mouse hepatoma cells.

Modulation of human granulocyte and monocyte chemiluminescence responses: evidence for distinct free radical generating systems.

[Brain death in secondary brain lesion].

Role of endorphins in endotoxin-induced hyperglycaemia in mice.

Effect of ATP level and its metabolic turnover in liver on the proteosynthesis postmortem.

The respiration-linked limiting step of tumor cell transition from the non-cycling to the cycling state: its inhibition by oxidizable substrates and its relationships to purine metabolism.

Protoporphyrinogen oxidase and ferrochelatase in porphyria variegata.

Effects of polychlorinated biphenyl compounds, 2,3,7,8-tetrachlorodibenzo-p-dioxin, phenobarbital and iron on hepatic uroporphyrinogen decarboxylase. Implications for the pathogenesis of porphyria.

Effects of cystic fibrosis serum and fibroblast culture medium on ion distribution in rat submandibular gland.

Modification of morphine antinociceptive response by blood glucose status: possible involvement of cellular energetics.

Lipid peroxidation and haemoglobin degradation in red blood cells exposed to t-butyl hydroperoxide. The relative roles of haem- and glutathione-dependent decomposition of t-butyl hydroperoxide and membrane lipid hydroperoxides in lipid peroxidation and haemolysis.

Hypothyroxinemia and hypothermia in rats in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin administration.

Specific gene mutations in L5178Y cells in culture.

Analysis of cyanogen bromide peptides of type I collagen from a patient with lethal osteogenesis imperfecta.

Effects of parathyroid hormone on skeletal muscle protein and amino acid metabolism in the rat.

Enhancement of carrageenan and dextran-induced edemas by 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds.

Study of isolated mitochondria incubated with labelled and non-labelled alloxan, with regard to intramitochondrial concentrations of reduced glutathione and inorganic phosphate.

Biochemical and genetic analysis of variant mouse hepatoma cells defective in the induction of benzo(a)pyrene-metabolizing enzyme activity.

The effect of acute inflammation on iron metabolism in rats.

[Protective effect of extracellular K⁺ in the myocardium in disorders of energy metabolism].

N-acetylcysteine: its bioavailability and interaction with ifosfamide metabolites.

Primary structures of three human pancreas peptides with growth hormone-releasing activity.

Investigations for genotoxic effects after exposure to crude 2,4,5-trichlorophenol.

Evaluation of an enzymic procedure for the measurement of acetaminophen.

ATP-dependence of ¹²⁵I-insulin binding by rat soleus muscle.

Characterization of the association of tritiated enkephalin with neuroblastoma cells under conditions optimal for receptor down regulation.

A high affinity, calmodulin-responsive (Ca²⁺ + Mg²⁺)-ATPase in isolated bone cells.

[The significance of serum ferritin determination for the evaluation of preventive iron treatment of anemia in premature infants].

Decline of blood and alveolar toluene concentration following two accidental human poisonings.

Purification and properties of human erythrocyte uroporphyrinogen decarboxylase: immunological demonstration of the enzyme defect in porphyria cutanea tarda.

Oxygen radicals and vascular damage.

[Heart function and the mechanisms of its regulation in modelling adaptation to hypoxia by 2,4-dinitrophenol administration].

Effects of age and diabetes mellitus on cyanogen bromide digestion of human dura mater collagen.

Morphometric, biochemical, and physiological assessment of perinatally induced renal dysfunction.

Calcium pools in saponin-permeabilized guinea pig hepatocytes.

Relative mutagenicity and teratogenicity of cyclophosphamide and two of its structural analogs.

Breakdown of polyphosphoinositides and not phosphatidylinositol accounts for muscarinic agonist-stimulated inositol phospholipid metabolism in rat parotid glands.

The T8 antigen is a multimeric complex of two distinct subunits on human thymocytes but consists of homomultimeric forms on peripheral blood T lymphocytes.

L-Arginine and L-Canavanine Metabolism in Jack Bean, *Canavalia ensiformis* (L.) DC. and Soybean, *Glycine max* (L.) Merr.

In vitro ¹⁴C-leucine incorporation into nonsynaptic and synaptic rat brain mitochondria isolated by Ficoll gradients.

Metabolism and renal handling of sodium arsenate in dogs.

High-performance liquid chromatographic analysis on radial compression column of the neurotoxic tri-*o*-cresyl phosphate and metabolites.

Induction of cytochrome P-450 dependent reactions in the rat ventral prostate by beta-naphthoflavone and 2,3,7,8-tetrachlorodibenzo-*p*-dioxin.

Identification and characterization of a plasma membrane phosphoprotein which is present in Chinese hamster lung cells resistant to adriamycin.

Preparation and biological reactivity of polyiodinated human growth hormone.

Nutrition-endocrine interactions: induction of reciprocal changes in the delta 4-5 alpha-reduction of testosterone and the cytochrome P-450-dependent oxidation of estradiol by dietary macronutrients in man.

The metabolism of the anti-inflammatory drug eterylate in rat, dog and man.

Evidence for an ATP-driven proton pump in rat thyroid phagolysosomes. Effects of protonophores and ionophores.

Effects of Thidiazuron on Cytokinin Autonomy and the Metabolism of N-(Delta-Isopentenyl)[8-C]Adenosine in Callus Tissues of *Phaseolus lunatus* L.

[Monochlorophenols as enzyme substrates for the preparatory metabolism of phenol in *Candida tropicalis* yeasts].

Identification of metabolites of hexazinone by mass spectrometry.

Periportal localization of lorazepam glucuronidation in the isolated perfused rat liver.

Effects of propylthiouracil on urinary metabolites of cyclophosphamide in rats.

Inhibition of insulin-stimulated xylose uptake in rat soleus muscle by cycloheximide.

The effects of lipolytic hormones on calcium uptake in endoplasmic reticulum of adipocytes.

Regulation of cyclic GMP levels in nerve tissue.

Hydrogen peroxide and hydroxyl radical mediation of activated leukocyte depression of cardiac sarcoplasmic reticulum. Participation of the cyclooxygenase pathway.

Isolation and characterization of the porcine hypothalamic growth hormone releasing factor.

Effect of sodium azide on catecholamine release from isolated adrenal gland and on guanylate cyclase.

ATP depletion promotes deactivation of insulin-stimulated sugar transport in rat soleus muscle.

Chlorobenzene-impaired lindane metabolism and the effect of pretreatment with chlorobenzene, lindane, or chlorobenzene plus lindane.

Membrane biogenesis in the sprouting neuron. I. Selective transfer of newly synthesized phospholipid into the growing neurite.

Hormonal control of glycogen synthase in rat hemidiaphragms. Effects of insulin and epinephrine on the distribution of phosphate between two cyanogen bromide fragments.

Effects of pentachloronitrobenzene and some of its known and possible metabolites on fungi.

Polychlorinated benzene and phenol congeners as inducers of rat hepatic drug-metabolizing enzymes in immature male Wistar rats.

Transport of citrinin by rat renal cortex.

A technique for the isolation of submucosal gland cells from cat trachea.

Uptake and retention of moulting hormones by the integument of crayfishes in vitro. II. Influence of metabolic inhibitors and sulphhydryl group inhibitors.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on [3H]thymidine incorporation into rat liver deoxyribonucleic acid.

Distribution, excretion, and metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57BL/6J, DBA/2J, and B6D2F1/J mice.

Ethane release during metabolism of aldehydes and monoamines in perfused rat liver.

Lipophilic ion exchangers for group separation of conjugated metabolites of xenobiotics.

Effects of pH on bone calcium and proton fluxes in vitro.

Somatomedin synthesis by a subclone of Buffalo rat liver cells: characterization and evidence for immediate secretion of de novo synthesized hormone.

Kinetics of N- and C-hydroxylations of 2-acetylaminofluorene in male Sprague-Dawley rat liver microsomes: implications for carcinogenesis.

Characteristics of cholic acid uptake in primary cultured hepatocytes.

Effect of 2,4-dinitrophenol on the oxidative metabolism of hexobarbital by cytochrome P-450 in perfused rat liver.

Effects of lipid peroxidation on adrenal microsomal monooxygenases.

Modification by temperature and external calcium of the increase in spontaneous transmitter release induced by a metabolic inhibitor at the neuromuscular junction.

Function of secretion of mandibular gland of male in territorial behavior of *Xylocopa sulcatipes* (Hymenoptera: Anthophoridae).

Germination of *Echinochloa crus-galli* (Barnyard Grass) Seeds under Anaerobic Conditions : Respiration and Response to Metabolic Inhibitors.

Chronobiologic fluctuation of cyclophosphamide induced urinary bladder damage in mice.

The metabolism of arsenite and arsenate by the rat.

Significance of energy metabolism pathways for stimulation of DNA synthesis by cell migration and serum.

Thyrotropin-induced thyroidal release of 5-hydroxytryptamine and accompanying ultrastructural changes in parafollicular cells.

The alteration of hepatic cytochrome P-450 subpopulations of phenobarbital-induced and uninduced rat by regioselective hepatotoxins.

Stimulation of microsomal lipid peroxidation by iron and cysteine. Characterization and the role of free radicals.

Phosphatidylinositol synthesis and phosphorylation are enhanced by light in rat retinas.

Metabolic inhibition and the cardiac ventricular action potential: voltage clamp analysis using single cells.

Ram rete testis fluid contains a protein (clusterin) which influences cell-cell interactions in vitro.

Metabolic factors regulating the generation of prostaglandins E1 and E2 by isolated rat uterus.

Mechanism by which metabolic inhibitors depolarize cultured cardiac cells.

Development of basal and induced aryl hydrocarbon (benzo[a]pyrene) hydroxylase activity in the chicken embryo in ovo.

Evidence for lipoxygenase activity in induction of histamine release from rat peritoneal mast cells by chelated iron.

Biochemical assay of inhibitors of metabolic cooperation.

Volatile compounds from the red deer (*Cervus elaphus*) Secretion from the tail gland.

Sulfur metabolism in the biosynthesis of monobactams.

Studies on the bioavailability of zinc in humans: intestinal interaction of tin and zinc.

Toxic activity of seventeen industrial solvents and halogenated compounds on human lymphocytes cultured in vitro.

Metabolism of some naturally occurring isothiocyanates in the rat.

[Effect of inhibitors of energy metabolism and protein synthesis on the process of neutral red segregation in frog erythrocytes].

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) effects on hepatic microsomal steroid metabolism and serum estradiol of pregnant rats.

Higher Chlorinated Dioxins Implicated in the Mortality of Young Pigs Kept on a Pentachlorophenol-treated Wooden Floor.

Metabolism of palmitate by anoxic and reoxygenated heart cell cultures.

Changes in free amino acid contents of rat brain induced by exposure to methyl bromide.

Lack of induction of single-strand breaks in mammalian cells by sodium azide and its proximal mutagen.

Arsenic distribution and neurochemical effects in peroral sodium arsenite exposure of rats.

Studies on the re-establishment of the intestinal microflora in germ-free rats with special reference to the metabolism of N-isopropyl-alpha-chloroacetanilide (propachlor).

Location of thyrotropin-releasing hormone-like immunoreactivity in rat pancreas.

Distribution of immunoreactive human growth hormone-like material and thyrotropin-releasing hormone in the rat central nervous system: evidence for their coexistence in the same neurons.

Further mutagenicity studies on pesticides in bacterial reversion assay systems.

Genotoxicity of N-acetylarylamines in the salmonella/hepatocyte system.

[Effect of heliomycin on the respiration and oxidative phosphorylation of the liver mitochondria of the rat].

Role of myeloperoxidase in the respiratory burst of human neutrophils.

Axonal transport of thiamine in frog sciatic nerves in vitro.

Localization of the two free thiol groups in the porcine pancreatic alpha-amylase I sequence.

Amitrole Absorption by Bean (*Phaseolus vulgaris* L. cv ;Red Kidney') Roots : Mechanism of Absorption.

Metabolism of mercapturic acid-pathway metabolites of 2-chloro-N-isopropylacetanilide (propachlor) by gastrointestinal bacteria.

Changes of extracellular potassium activity induced by electric current through brain tissue in the rat.

Failure of atractyloside to inhibit synaptosomal mitochondrial energy transduction.

Development of a blood-free *Campylobacter* medium: screening tests on basal media and supplements, and the ability of selected supplements to facilitate aerotolerance.

[Polarographic study of cell respiration in a tissue culture].

Hexose transport in microvascular endothelial cells cultured from bovine retina.

A possible role of intracellular and membrane thiols of rat pancreatic islets in calcium uptake and insulin release.

Hepatic microsomal metabolism of the dichloroethanes.

Inhibition of testosterone biosynthesis by ethanol. Relation to hepatic and testicular acetaldehyde, ketone bodies and cytosolic redox state in rats.

Simultaneous azo-coupling method for an estrogen sulfatase in human tissues.

Toxicity and biotransformation of acetaminophen in rat hepatocytes (I). Uptake and release.

Urine profile analysis by field desorption mass spectrometry, a technique for detecting metabolites of xenobiotics. Application to 3,5-dinitro-2-hydroxytoluene.

Studies on prolactin 48: isolation and properties of the hormone from horse pituitary glands.

Distribution and metabolism of the teratogen nitrofen (2,4-dichloro-4'-nitro diphenyl ether) in pregnant rats.

Isophosphoramidate mustard, a metabolite of ifosfamide with activity against murine tumours comparable to cyclophosphamide.

Urinary excretion of hippuric acid and o-cresol after laboratory exposure of humans to toluene.

Riboflavin metabolism in the single lens of rat.

Hippuric acid and o-cresol in the urine of workers exposed to toluene.

A new metabolically trapped agent by brain monoamine oxidase: N-methyl labeled (14C) N-methylphenylethylamine (14C-MPEA).

[Energy-dependent inhibition of mitochondrial NAD.H-oxidase and succinic oxidase by strong nitrous bases].

Accumulation and lethal effect of tritium (tritiated water) in *Rhodospseudomonas spheroides*. Under light-anaerobic and dark-aerobic conditions.

Taurine biosynthesis in frog retina: effects of light and dark adaptations.

Structure of mouse submaxillary gland renin.

Effect of lidocaine on hepatic prostanoid production in vitro following 2,4-dinitrophenol administration.

The pulmonary ethanol metabolizing system (PET).

Unequivocal demonstration that malondialdehyde is a mutagen.

The morphological transformation of Syrian hamster embryo cells by chemicals reportedly nonmutagenic to *Salmonella typhimurium*.

Mutagenicity and DNA damage induced by arylamines in the *Salmonella*/hepatocyte system.

Insulin depolarization of rat hepatocytes in primary monolayer culture.

Enzymatic toxicogenation of "activated" cyclophosphamide by 3'-5' exonucleases.

Toxicity of 3,3',4,4'- and 2,2',5,5'-tetrabromobiphenyl: correlation of activity with aryl hydrocarbon hydroxylase induction and lack of protection by antioxidants.

[Migration and adhesiveness of human and rabbit blood leukocytes under the influence of metabolic blocking agents and hirudin].

Production of H₂O₂ by bovine blood and milk polymorphonuclear leucocytes.

Occupational exposure to hexachlorocyclohexane. VI. Metabolism of gamma-hexachlorocyclohexane in man.

Evaluation of arsenic metabolites for prenatal effects in the hamster.

Mechanisms of superoxide radical-mediated toxicity.

Analysis of neutral steroid sulfates by glass capillary gas chromatography-mass spectrometry (GC-MS) from blood of a patient with paraquat poisoning.

Ascorbic acid and paraquat: oxygen depletion with concurrent oxygen activation.

Accumulation of radionuclide-labeled platelets and fibrinogen in paraquat-damaged rat lungs.

Effects of organochlorine compounds on lipid catabolism of foetal rat liver mitochondria and microsomes.

Studies on the in vitro interaction of mitomycin C, nitrofurantoin and paraquat with pulmonary microsomes. Stimulation of reactive oxygen-dependent lipid peroxidation.

Pentachlorophenol pancreatitis.

Effects of sodium pentachlorophenate on enzymes of energy metabolism in tissues of *Notopterus notopterus*.

Effects of anionic xenobiotics on rat kidney. I--Tissue and mitochondrial respiration.

Significance of plant metabolism in the mutagenicity and toxicity of pesticides.

[Hepatotoxicity of selected polychlorinated aromatic hydrocarbons].

Study of the effects of paraquat on the peroxide metabolism enzymes in guinea-pig.

Inhibition of energy-dependent transhydrogenase reaction by N-(phosphonomethyl) glycine in isolated rat liver mitochondria.

Young Scientists Award lecture 1981: The identification of an accumulation system for diamines and polyamines into the lung and its relevance to paraquat toxicity.

Urinary enzymes, nephrotoxicity and renal disease.

Sex differences in the metabolism of hexachlorobenzene by rats and the development of porphyria in females.

Mast cell hyperplasia during goitrogen-induced thyroid growth - a quantitative study.

2,4-D induced clastogenicity and elevated rates of sister chromatid exchanges in cultured human lymphocytes.

Circadian rhythm of mitotic activity in normal and hyperplastic rat thyroid.

Effect of 3-amino-1,2,4-triazole administration on the early CCl₄-induced ultrastructural alterations in rat liver.

Promoting effects of 3-amino-1,2,4-triazole on the development of thyroid tumors in rats treated with N-bis(2-hydroxypropyl)nitrosamine.

Metabolic interactions of aldehyde dehydrogenase with therapeutic and toxic agents.

Investigation of putative control mechanisms for thyroid growth.

Effects of aldehyde dehydrogenase inhibitors on enzymes involved in the metabolism of biogenic aldehydes in rat liver and brain.

Dose-effect relationship between ethyl alcohol pretreatment and retention and tissue distribution of mercury vapor in rats.

Acrolein/glutaraldehyde as a fixative for combined light and electron microscopic immunocytochemical detection of pituitary hormones in immersion-fixed tissue.

Desensitisation of rat thyroid to the growth-stimulating action of TSH during prolonged goitrogen administration. Persistence of refractoriness following withdrawal of stimulation.

The formation and metabolism of N-hydroxymethyl compounds--I. The oxidative N-demethylation of N-dimethyl derivatives of arylamines, aryltriazenes, arylformamidines and arylureas including the herbicide monuron.

Interaction of cyclophosphamide metabolites with membrane proteins: an in vitro study with rabbit liver microsomes and human red blood cells. Effect of thiols.

[Effect of methyl viologen on phospholipid metabolism in cultured human type 2 pneumocytes].

Influence of diuretics on urinary general base catalytic activity and cyclophosphamide-induced bladder toxicity.

Acrolein: a potent modulator of lung macrophage arachidonic acid metabolism.

Dissociation of growth and function in the rat thyroid during prolonged goitrogen administration.

Metabolic activation of cyanamide by liver mitochondria, a requirement for the inhibition of aldehyde dehydrogenase enzymes.

The effects of clofibrate and 3-amino-1,2,4-triazole on liver catalase and lipid metabolism in mice.

Comparison of the mutagenicity and teratogenicity of cyclophosphamide and its active metabolites, 4-hydroxycyclophosphamide, phosphoramidate mustard, and acrolein.

Advances in pesticide metabolite identification through the use of plant tissue cultures.

Inhibition of lipid peroxidation by paraquat: site of inhibition in the cytochrome P-450-dependent steroid hydroxylase system from bovine adrenal cortex mitochondria.

Goitrogen-induced thyroid growth in the rat: a quantitative morphometric study.

[Activity of various enzymes of carbohydrate metabolism after administration of metribuzin].

2-Haloacrylic acids as indicators of mutagenic 2-haloacrolein intermediates in mammalian metabolism of selected promutagens and carcinogens.

The formation of mixed disulphides in rat lung following paraquat administration. Correlation with changes in intermediary metabolism.

Increase in hepatic mixed disulphide and glutathione disulphide levels elicited by paraquat.

Disruption of phospholipid metabolism by paraquat in cultured pneumocytes.

Effect of drugs and hormones on rat liver dimethylaminoazobenzene reductase activity.

Allylamine cardiotoxicity--IV. Metabolism to acrolein by cardiovascular tissues.

Microbial degradation of thidiazuron and its photoproduct.

Active oxygen metabolites and their action in the hepatocyte. Studies on chemiluminescence responses and alkane production.

Influence of pyramin and venzar on some metabolic products of *Azotobacter chroococcum*.

Altered removal of vasoactive substances in the injured lung: detection of lung microvascular injury.

Effect of albumin, low temperature and metabolic inhibitors on transport of fatty acids into cultured human leukemic myeloid cells.

Bacteria and zymosan opsonized with histone, dextran sulfate, and polyanetholesulfonate trigger intense chemiluminescence in human blood leukocytes and platelets and in mouse macrophages: modulation by metabolic inhibitors in relation to leukocyte-bacteria interactions in inflammatory sites.

Sequence analysis of a growth hormone releasing factor from a human pancreatic islet tumor.

Characterization of a 40 residue peptide from a human pancreatic tumor with growth hormone releasing activity.

Immunoreactive uroporphyrinogen decarboxylase is unchanged in porphyria caused by TCDD and hexachlorobenzene.

Acute oral toxicity of TCDD-metabolites in male guinea pigs.

In vivo resistance towards anthracyclines, etoposide, and cis-diamminedichloroplatinum(II).

Effect of N,N'-diethyl-1,2-bis(2,6-dichloro-4-hydroxyphenyl)ethylenediamines on the 7,12-dimethylbenz[a]anthracene-induced mammary carcinoma of the rat.

Monocyte-mediated damage to *Rhizopus oryzae* hyphae in vitro.

Studies on the mechanism of enkephalin receptor down regulation.

Adrenocorticotropin-dependent particulate guanylate cyclase in rat adrenal and adrenocortical carcinoma: comparison of its properties with soluble guanylate cyclase and its relationship with ACTH-induced steroidogenesis.

Effect of long-term ethanol feeding on rat liver interstitial collagens.

Aluminum absorption in the rat everted gut sac.

Alterations in the heme biosynthetic pathway as an index of exposure to toxins.

Prolactin receptors in cultured rat mammary tumor cells. Unmasking of cell surface receptors by energy depletion.

Tetrachlorodibenzodioxin: a survey of subjects ten years after exposure.

Induction of porphyria in the rat by chronic versus acute exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Artificial hypothermia in acute poisoning by 1,2-dichloroethane and its probable metabolites].

Misonidazole-induced biochemical alterations of mammalian cells: effects on glycolysis.

Characterization of serotonin uptake in cultured pheochromocytoma cells. Comparison with norepinephrine uptake.

Characterization of serotonin uptake in cultured neuroblastoma cells. Difference between differentiated and nondifferentiated cells.

Mutagenic evaluation of carcinogens and non-carcinogens in the L5178Y/TK assay utilizing postmitochondrial fractions (S9) from normal rat liver.

Synthesis of pseudo cofactor analogues as potential inhibitors of the folate enzymes.

Prenatal exposure to the herbicide 2,4-dichlorophenyl-p-nitrophenyl ether destroys the rodent Harderian gland.

Nutritional iron and dopamine binding sites in the rat brain.

[Pathogenesis of hyperlipidemia and fatty liver of rabbits induced by methyl iodide. Increased synthesis and secretion of triglyceride in the liver].

Influence of triiodothyronine, amphetamine, and dinitrophenol (DNP) on the induced metabolic rate in uremic and acidotic rats.

[Coronary perfusion rate as a factor determining the degree of heart contractile function decrease in an energy formation disorder].

The binding of antibodies from *Plasmodium berghei*-infected rats to isoantigenic and parasite-specific antigenic sites on the surfaces of infected reticulocytes.

Experimental and clinical results in shock lung treatment with vitamin E.

The TCDD receptor in rat intestinal mucosa and its possible dietary ligands.

Acneogenic activity of 3-methylcholanthrene and benzo[a]pyrene, and a comparative study with 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rabbit and hairless mouse.

2,3,7,8-tetrachlorodibenzo-p-dioxin and related halogenated aromatic hydrocarbons: examination of the mechanism of toxicity.

The functional and ultrastructural changes of hepatic mitochondria in acute experimental pancreatitis in dogs treated with prostacyclin.

Met- and leu-enkephalin immuno- and bio-reactivity in human stomach and pancreas.

Fast atom bombardment mass spectra of mercapturic acid-pathway metabolites of propachlor (2-chloro-N-isopropylacetanilide).

Accumulation of peptide Tyr-D-Ala-Gly by choroid plexus during ventriculocisternal perfusion of rat brain.

Subchronic toxicity of chlorine dioxide and related compounds in drinking water in the nonhuman primate.

Free magnesium in sheep, ferret and frog striated muscle at rest measured with ion-selective micro-electrodes.

Mutagenic properties of allylic and alpha, beta-unsaturated compounds: consideration of alkylating mechanisms.

Amino acid transport and protein synthesis in energetically-stable calcium-tolerant isolated cardiac myocytes.

Intracellular inactivation, reactivation and dynamic status of prostate androgen receptors.

Porcine pancreatic lipase. The disulfide bridges and the sulfhydryl groups.

The origin of urinary aromatic compounds excreted by ruminants. 3. The metabolism of phenolic compounds to simple phenols.

Purification, characterization and regulation of five rat hepatic microsomal cytochrome P-450 isozymes.

[Effect of the carbon sources and metabolic inhibitors on endopolymethylgalacturonase secretion in *Aspergillus foetidus*].

Volatile alkanes produced by erythrocytes: an assay for in vitro studies on lipid peroxidation.

Low molecular weight pineal and cerebral fractions affecting insulin secretion in vitro.

Renal transport of 2'-deoxytubercidin in mice.

Effect of thyroidectomy on oxidative phosphorylation mechanisms in rat liver mitochondria.

Does the sarcoplasmic reticulum achieve chemiosmotic equilibrium in relaxed muscle?

Similar activities of nerve growth factor and its homologue proinsulin in intracellular hydrogen peroxide production and metabolism in adipocytes. Transmembrane signalling relative to insulin-mimicking cellular effects.

Characterization of multiple forms of porcine anterior pituitary proopiomelanocortin amino-terminal glycopeptide.

Evidence for compartmentalization of conjugates of 2,4-dichlorophenoxyacetic Acid in soybean callus tissue.

Primary structure of seiwhale pituitary somatotropin.

Metabolism of inhaled brominated hydrocarbons: validation of gas uptake results by determination of a stable metabolite.

Effects of salicylate and 2,4-dinitrophenol on respiration and metabolism.

[Characteristics of the system of corticosterone binding by hepatocyte plasma membranes].

Comparative evaluation of contraction and relaxation of isolated heart muscle with decreased calcium concentration in the perfusate, acidosis, and metabolic blockade.

Effects of dopamine-beta-hydroxylase inhibitors FLA-57 and FLA-63 on ethanol metabolism and aldehyde dehydrogenase activity in rats.

Effects of the cardiotoxic drug ARL-115 on the release of noradrenaline from the cat atrium, the binding of 3H-ouabain to plasma membranes and the movements of calcium in mitochondria.

Antioxidants, metabolic rate and aging in *Drosophila*.

Association of ⁴⁵calcium with rat mast cells stimulated by 48/80: effects of inactivation, calcium and metabolic inhibition.

Protective role of thiols in cyclophosphamide-induced urotoxicity and depression of hepatic drug metabolism.

Immunocytochemical and ultrastructural identification of mitotic cells in the pituitary gland of ovariectomized rats.

Metabolism of parathyroid hormone by Kupffer cells: analysis by reverse-phase high-performance liquid chromatography.

Effects of ATP and cell development on the metabolism of high molecular weight aggregates of abnormal proteins in rabbit reticulocytes and cell-free extracts.

Differential effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on nuclear RNA polymerase activity in the rat liver and thymus.

2-14C-1-Allyl-3,5-diethyl-6-chlorouracil I: Synthesis, absorption in human skin, excretion, distribution, and metabolism in rats and rabbits.

The role of vitamin E in cellular energy metabolism in cultured adrenocortical cells.

Synaptosomal calcium uptake systems: prostaglandins are probably not involved in the regulation of calcium fluxes into and within the nerve endings.

Amino acid sequence of mouse submaxillary gland renin.

Mutagenic, teratogenic and pharmacokinetic properties of cyclophosphamide and some of its deuterated derivatives.

Studies on kinetochore function in mitosis. II. The effects of metabolic inhibitors on mitosis and cytokinesis in the diatom *Hantzschia amphioxys*.

On the mechanism by which hormones induce the release of Ca^{2+} from mitochondria in the liver cell.

Entry of the toxic proteins abrin, modeccin, ricin, and diphtheria toxin into cells. II. Effect of pH, metabolic inhibitors, and ionophores and evidence for toxin penetration from endocytotic vesicles.

Structure of mouse submaxillary gland renin. Identification of two disulfide-linked polypeptide chains and the complete amino acid sequence of the light chain.

Effect of BASF 13-338, a Substituted Pyridazinone, on Lipid Metabolism in Leaf Tissue of Spinach, Pea, Linseed, and Wheat.

Metabolism of 2,4-dichlorophenoxyacetic Acid in 2,4-dichlorophenoxyacetic Acid-resistant soybean callus tissue.

Structure-activity relationships of a pigment-dispersing crustacean neurohormone.

Thyrotropin releasing hormone: centrally mediated effects on gastrointestinal motor activity.

Immunohistochemical localization of thyrotropin-releasing hormone in the rat hypothalamus and pituitary.

Role of the secretion vesicle in the transport of receptors: modulation of somatostatin binding to pancreatic islets.

A microbial metabolite of TCDD.

Metabolism of [(14)C]Flamprop-isopropyl in suspension cultures from *Medicago sativa* and *Phaseolus* sp.

Heterogeneity in the rate of benzo[a]pyrene metabolism in single cells: quantitation using flow cytometry.

Fate of 2,3,7,8-tetrachlorodibenzo-p-dioxin metabolites from dogs in rats.

Ketone-body utilization by homogenates of adult rat brain.

The 1,2-dichloroethylenes: their metabolism by hepatic cytochrome p-450 in vitro.

The effects of antibiotics in the weanling pig diet on growth and the excretion of volatile phenolic and aromatic bacterial metabolites.

Thermodynamic analysis of active sodium and potassium transport in the frog corneal epithelium.

Down-regulation of the hexose transport system: metabolic basis studied with a fibroblast mutant lacking phosphoglucose isomerase.

Multiple forms of phenolsulphotransferase in human tissues: selective inhibition by dichloronitrophenol.

Cytosolic and nuclear binding proteins for 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat thymus.

Inhibition of anterior pituitary cyclic AMP phosphodiesterase by colchicine and vinblastine.

Constituents of temporal gland secretion of the African elephant, *Loxodonta africana*.

[Effect of allyl alcohol on bile acid metabolism and cellular ultrastructure of the rat liver].

Distribution and metabolism of 2,4-dichlorophenol in rats.

Riboflavin transport by rabbit kidney slices: characterization and relation to cyclic organic acid transport.

Effect of microsomal cytochrome P-450 isozyme induction on the mutagenic activation of 2-aminoanthracene.

Collagen metabolism in rat incisor pre dentine in vivo: synthesis and maturation of type I, alpha 1 (I) trimer, and type V collagens.

Structure elucidation of mammalian TCDD-metabolites.

Collagens from the skin and cartilage of the larval salamander *Ambystoma tigrinum*.

Effects of sethoxydim on the metabolism of isolated leaf cells of soybean [*Glycine max* (L.) Merr].

Effect of 2,4-dichlorophenoxyacetic Acid on glucosylation of scopoletin to scopolin in tobacco tissue culture.

Metabolism of round spermatids from rats: lactate as the preferred substrate.

Suppression of natural killing in vitro by monocytes and polymorphonuclear leukocytes: requirement for reactive metabolites of oxygen.

Increases in choline levels in rat brain elicited by meclofenoxate.

Pesticide effects upon the circadian time structure in the thyroid, adrenal and testis in rats.

Identification of metabolites of 2, 3, 7, 8-tetrachlorodibenzo-P-dioxin (TCDD) formed on incubation with isolated rat hepatocytes.

Purification and characterization of two constitutive forms of rat liver microsomal cytochrome P-450.

[Variation of serum zinc after iron administration to dogs under pancreatic duct ligation (author's transl)].

Toxicokinetics of chloroethanol in the rat after single oral administration.

Relation between intestinal blood flow and oxygen uptake.

High-affinity binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin in cell nuclei from rat liver.

Genetic activity of diethylstilbestrol in *Saccharomyces cerevisiae*: enhancement of mutagenicity by oxidizing agents.

Activation of misonidazole by rat liver microsomes and purified NADPH-cytochrome c reductase.

A malic Acid permease in isolated vacuoles of a crassulacean Acid metabolism plant.

Carcinogenesis Bioassay of 2,3,7,8-Tetrachlorodibenzo-p-dioxin (CAS No. 1746-01-6) in Osborne-Mendel Rats and B6C3F1 Mice (Gavage Study).

Active transport of nicotine by the isolated choroid plexus in vitro.

Effects of extended peroral borate ingestion on rat liver and brain.

Preliminary studies of the metabolic activity of purified suspensions of *Mycobacterium leprae*.

Prolactin receptor turnover in explants of pseudopregnant rabbit mammary gland.

Effect of p-p'-DDE administered in vivo and in vitro on Ca^{2+} binding and Ca^{2+} - Mg^{2+} -ATPase activity in egg shell gland mucosa of ducks.

Nitrophenol compound induces Ca-dependent exocytotic secretion of catecholamines by a direct effect on the plasma membranes of the adrenal medullary cells.

Mitochondrial bioenergetics during the initiation of mercuric chloride-induced renal injury. I. Direct effects of in vitro mercuric chloride on renal mitochondrial function.

Influence of Temperature on Lactate Utilization by Round Spermatids from Rat Testes: (Temperature/lactate/spermatids/rat/oxidative phosphorylation).

Metabolic energy and cytoskeletal requirements for synthesis and secretion by acini from rat mammary gland-I. Ultrastructural and biochemical aspects of synthesis and release of milk proteins.

[Use of the exposure test and the gas concentration measurements in the breathing zones for the evaluation of the workers' exposure to carbon disulfide].

Histochemical localization of carbohydrates and lipids in the liver and kidney of mice poisoned with chlorophenols.

Interrelationships between gluconeogenesis and uricogenesis in chicken liver.

Bacterial metabolism under conditions representing pesticide disposal pits.

The Ah regulatory gene product. Survey of nineteen polycyclic aromatic compounds' and fifteen benzo[a]pyrene metabolites' capacity to bind to the cytosolic receptor.

Lactate metabolism and cytosolic NADH reducing equivalents in ovine adipocytes.

Metabolic energy and cytoskeletal requirements for synthesis and secretion by acini from rat mammary gland-II. Intracellular transport and secretion of protein and lactose.

Potassium transport by rabbit descending colon.

Sequestration requirements for the degradation of 125I-labeled beta nerve growth factor bound to embryonic sensory neurons.

[Catecholamine regulation of the liver and kidney ATPase activity in mice].

Histamine release from rat peritoneal mast cells exposed to ultraviolet light.

Metabolism and excretion of leptophos and its phenol in S and R larvae of the Egyptian cotton leafworm.

Reactivity of key metabolic sterols in standard colorimetric assays for cholesterol.

Microtubule stability and assembly in living cells: the influence of metabolic inhibitors, taxol and pH.

Stress response of juvenile sockeye salmon (*Oncorhynchus nerka*) to the butoxyethanol ester of 2,4-dichlorophenoxyacetic acid.

Effects of acute paraquat toxicity on circulating levels of arachidonic acid, PGF2 alpha and PGE2 in the beagle.

Toxicity of chlorinated phenoxy acids in combination with 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57BL/6 male mice.

Role of glutathione in the metabolism-dependent toxicity and chemotherapy of cyclophosphamide.

Acceleration of lipid peroxidation in human paraquat poisoning.

Paraquat toxicity and lipid peroxidation.

Investigations into the mechanism of paraquat toxicity utilizing a cell culture system.

Inhalation toxicity of acrylic acid.

Teratogenicity of cyclophosphamide metabolites: phosphoramidate mustard, acrolein, and 4-ketocyclophosphamide in rat embryos cultured in vitro.

Carcinogenicity of picloram.

Assessment of the teratogenic potential of acrolein and cyclophosphamide in a rat embryo culture system.

Repeated exposure to alpha-ethylacrolein vapour: subacute toxicity study in rats.

[Effect of the pesticide fundazol on induced sclerotic processes].

[Field study of workers with longterm exposure to calcium cyanamide (author's transl)].

[The effect of some hexachlorobenzene catabolites on the porphyrin metabolism of rats (author's transl)].

Factors affecting the efflux of paraquat from rat lung slices.

Subchronic administration of technical pentachlorophenol to lactating dairy cattle: performance, general health, and pathologic changes.

A comparative review of the pharmacological and toxicological properties of disulfiram and calcium carbimide.

Subtoxic effects of certain chemicals on food crops.

Glycoprotein metabolism in the guinea-pig gastric mucosa in chronic metribuzin poisoning.

Hemoperfusion in toxicology. Basic considerations of its effectiveness.

Mutagenic activity of diallate and triallate determined by a battery of in vitro mammalian and microbial tests.

Arsenic-induced axial skeletal (dysraphic) disorders.

Pulmonary fibrosis in experimental acute respiratory disease.

Effect of cyanamide on the metabolism of ethanol and acetaldehyde and on gluconeogenesis by isolated rat hepatocytes.

Atmospheric pressure ionization mass spectrometry: the routine determination of 2,4,5-trichlorophenoxyacetic acid and its metabolites.

Effect of goitrogen administration on the circadian rhythm of serum thyroid stimulating hormone in the rat.

Binding of [methyl-3H]paraquat to rat, rabbit, hamster, mouse and guinea pig lung proteins, in vitro.

Metabolites of diuron, linuron, and methazole formed by liver microsomal enzymes and spinach plants.

2,4,5-T effects on cardiac and serum lactic dehydrogenase (LDH) and creatine kinase (CK) isozymes. II. Neonatal enzyme activities and isozyme profiles.

2,4,5-T effects on cardiac and serum lactic dehydrogenase (LDH) and creatine kinase (CK) isozymes. I. Maternal enzyme activities and isozyme profiles.

Effect of thyroid status on beta-adrenoreceptors and muscarinic receptors in the rat lung.

Metabolism of 2,5-dichloro-4-hydroxyphenoxyacetic acid in plants.

Gas-liquid chromatographic determination of aniline metabolites of substituted urea and carbamate herbicides in aqueous solution.

The effect of paraquat on the incorporation of ¹⁴C-leucine and ¹⁴C-palmitate into lung proteins and lung lipids of rats and rabbits.

Ethane production by isolated perfused rat liver: a system to study metabolic effects related to lipid peroxidation.

Tissue retention of arsenic in rats fed with founder or cacodylic acid.

Methanol poisoning and formate oxidation in nitrous oxide-treated rats.

Ethanol metabolism in guinea pig: in vivo ethanol elimination, alcohol dehydrogenase distribution, and subcellular localization of acetaldehyde dehydrogenase in liver.

A rapid method for the selective analysis of total urinary metabolites of inorganic arsenic.

The rapidly metabolized 32,000-dalton polypeptide of the chloroplast is the "proteinaceous shield" regulating photosystem II electron transport and mediating diuron herbicide sensitivity.

Paraquat-induced alterations of phospholipids and GSSG-release in the isolated perfused rat liver, and the effect of SOD-active copper complexes.

Investigation on cyclophosphamide treatment during the preimplantation period. II. In vitro studies on the effects of cyclophosphamide and its metabolites 4-OH-cyclophosphamide, phosphoramidate mustard, and acrolein on blastulation of four-cell and eight-cell mouse embryos and on their subsequent development during implantation.

Arterial effects of palmitic, linoleic and acetoacetic acid.

Acute toxicity testing of some herbicides-, alkaloids-, and antibiotics-metabolizing soil bacteria in the rat.

Role of sulfation in the formation of DNA adducts from N-hydroxy-2-acetylaminofluorene in rat liver in vivo. Inhibition of N-acetylated aminofluorene adduct formation by pentachlorophenol.

Determination of hexazinone and metabolite residues using nitrogen-selective gas chromatography.

The effect of cyanamide on acetaldehyde oxidation by isolated rat liver mitochondria and on the inhibition of pyruvate oxidation by acetaldehyde.

Comparison of the urinary excretion of arsenic metabolites after a single oral dose of sodium arsenite, monomethylarsonate, or dimethylarsinate in man.

2,4-Dichloro-phenoxy-acetic acid interactions with the detoxification hepatic systems.

Herbicidal effect on some metabolic processes of *Azotobacter chroococcum*.

Relationship between clinical and electrophysiological findings and indicators of heavy exposure to 2,3,7,8-tetrachlorodibenzo-dioxin.

Therapeutic drug assays with gas-liquid chromatography and optical detection.

Influence of 2,4-dinitrophenol on the susceptibility of rats to hepatotoxic injury.

Biological evaluation of hemoperfusion in acute poisoning.

The role of iron in the toxicity of 2,3,7,8-tetrachlorodibenzo-(p)-dioxin (TCDD).

Influence of inducers of monooxygenases on cytotoxic efficiency of ellipticine on leukemia L1210 cells.

[Experimental studies on metabolism of iron overload in dogs with carbon tetrachloride induced chronic hepatic injury (author's transl)].

The metabolism of arsenic in humans acutely intoxicated by As₂O₃. Its significance for the duration of BAL therapy.

A comparison of purified poly(ADP-ribose) polymerases from Ehrlich ascites tumor cells, pig thymus, and HeLa S3 cells.

Insulin secretion by a transplantable rat islet cell tumour.

Primary structure of the major human pituitary pro-opiomelanocortin NH₂-terminal glycopeptide.
Evidence for an aldosterone-stimulating activity.

Analysis of lipids and dioxin in chloracne due to tetrachloro-2,3,7,8-p-dibenzodioxin.

A non-mitogenic analogue of epidermal growth factor enhances the phosphorylation of endogenous membrane proteins.

Acute and subchronic toxicity studies of rats exposed to vapors of methyl mercaptan and other reduced-sulfur compounds.

Effects of hypoxia and metabolic inhibitors on the electrical and mechanical activities of isolated guinea pig papillary muscles.

Adenylate cyclase and guanylate cyclase activity in normal and leukemic human lymphocytes.

Enhancement of antitumor activity of glutamine antagonists 6-diazo-5-oxo-L-norleucine and acivicin in cell culture by glutaminase-asparaginase.

Comparison of the metabolic and antihypertensive properties of tienilic acid and hydrochlorothiazide.

Inhibitors of oxidative ATP production cause transient vasoconstriction and block subsequent pressor responses in rat lungs.

[Chronoinotropic cardiac autoregulation following hypoperfusion and metabolic blockade].

Hexose transport in normal and SV40-transformed human endothelial cells in culture.

The accumulation of amino acids by mouse ascites-tumour cells. Dependence on but lack of equilibrium with the sodium-ion electrochemical gradient.

Lymphocytotoxins in infectious mononucleosis: a non-cytotoxic effect on lymphocytes at 37 degrees C and the influence of cell metabolism on their cytotoxicity in vitro.

Energy coupling mechanisms in host-grown *Mycobacterium lepraemurium*.

The development and prognosis of chronic intoxication by tetrachlorodibenzo-p-dioxin in men.

delta-Aminolaevulinic acid uptake, toxicity, and effect on [¹⁴C]gamma-aminobutyric acid uptake into neurons and glia in culture.

Role of cell-generated hydrogen peroxide in granulocyte-mediated killing of schistosomula of *Schistosoma mansoni* in vitro.

A comparison of the effects of temperature and metabolic inhibition on the contraction of smooth muscle.

[Effect of thyrocalcitonin on the contraction and relaxation of the isolated myocardium in metabolic blockade and acidosis].

Determination of terminal sugars in transferrin by radio-lectin immunoassay (RLIA)-a new microanalytical procedure.

The K⁺-sensitive hyperpolarization of rat skeletal muscle and metabolic inhibitors.

Biotransformation and porphyrinogenic action of hexachlorobenzene and its metabolites in a primary liver cell culture.

Monocyte-mediated serum-independent damage to hyphal and pseudohyphal forms of *Candida albicans* in vitro.

Porcine pancreatic lipase. Completion of the primary structure.

Alloxan-induced luminol luminescence as a tool for investigating mechanisms of radical-mediated diabetogenicity.

Hormonal Control of Mitotic Development in Tobacco Protoplasts: TWO-DIMENSIONAL DISTRIBUTION OF NEWLY-SYNTHEZED PROTEINS.

Control of the erythrocyte membrane shape: recovery from the effect of crenating agents.

5-Fluoro- and 5-chlorocyclophosphamide: synthesis, metabolism, and antitumor activity of the cis and trans isomers.

Biochemical and morphological changes induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat liver cell plasma membrane.

In vitro synthesis of a mutagenic azide metabolite by cell-free bacterial extracts.

Effects of CO₂, acetylcholine and caerulein in ⁴⁵Ca efflux from isolated mouse pancreatic fragments.

Aggregation of polymorphonuclear leucocytes (PMNs) by leukotriene B₄: effects of cyclooxygenase products and metabolic inhibitors.

Studies on the mechanism of denaturation of cytochrome P-450 by cyclophosphamide and its metabolites.

A study with model substrates of the structure of the sites phosphorylated by rat liver casein kinase TS.

Studies on the biliary excretion and metabolites of hexachlorobenzene in the rat.

Development of a toxicity test system using primary rat liver cells.

Triphenylmethylphosphonium uptake by pancreatic islet cells.

Developmental onset of mixed-function oxidase activity in preimplantation mouse embryos.

Hydrogen peroxide metabolism in human monocytes during differentiation in vitro.

Effect of yeast killer toxin on sensitive cells of *Saccharomyces cerevisiae*.

On the formation of amino acids deriving from spermidine and spermine.

In vitro metabolism of inorganic arsenic by the gastro-intestinal microflora of the rat.

Ether inhibition of ethanol metabolism in isolated rat liver parenchymal cells.

Arachidonic acid-induced chemiluminescence of human platelets: contribution of the prostaglandin and lipoxygenase pathways.

Influence of human beta-thromboglobulin on prostaglandin production by pig aortic endothelial cells in culture.

The amino acid sequence of the gamma-subunit of mouse submaxillary gland 7 S nerve growth factor.

Hydrogen peroxide contracts airway smooth muscle: a possible endogenous mechanism.

Iron absorption in the everted chicken intestine.

The effects of 1,10-phenanthroline on the binding of activated rat hepatic glucocorticoid-receptor complexes to deoxyribonucleic acid-cellulose.

In vivo drug metabolism and liver lobule heterogeneity in the rat.

Properties of the gastric proton pump in unstimulated permeable gastric glands.

Inhibition in vivo of the formation of adducts between metabolites of benzo(a)pyrene and DNA by aryl hydrocarbon hydroxylase inducers.

Effect of energy inhibitors on cell surface diphtheria toxin receptor numbers.

The onset of polymorphonuclear leucocyte membrane-stimulated metabolic activity.

Polyhalogenated biphenyls and phenobarbital: evaluation as inducers of drug metabolizing enzymes in the sheephead, *Archosargus probatocephalus*.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on hepatic and renal prostaglandin synthetase.

Effects of ionophore A23187 on calcium fluxes from cultured adrenal cells.

Sorting out of coaggregated brain cell types mediated by specific cell recognition factors in vitro. II. Kinetic and metabolic parameters.

Metabolism of 2,4-dichlorophenoxyacetic acid in cell suspension cultures of soybean (*Glycine max L.*) and wheat (*Triticum aestivum L.*): II. Evidence for incorporation into lignin.

Metabolism of 2,4-dichlorophenoxyacetic acid in cell suspension cultures of soybean (*Glycine max L.*) and wheat (*Triticum aestivum L.*): I. General results.

Enterohepatic circulation in formation of propachlor (2-chloro-N-isopropylacetanilide) metabolites in the rat.

Isolation and somatomedin activity of bovine growth hormone fragment 87-124.

Locus of N-ethylmaleimide action on sugar transport in nucleated erythrocytes.

Mechanism of retraction of the trailing edge during fibroblast movement.

Acetylcholine synthesis and CO₂ production from variously labeled glucose in rat brain slices and synaptosomes.

Induction of benzo[a]pyrene metabolism by 2,3,7,8-tetrachlorodibenzo-p-dioxin in primary cultures of adult rat hepatocytes.

Quantitative correlation between histamine and 35S release from isolated rat mast cells due to the beta-adrenergic blocking drug KÅ¶ 1124.

Citrus Tissue Culture : AUXINS IN RELATION TO ABSCISSION IN EXCISED PISTILS.

An organ culture method for glandular stomach of new born rat.

Effects of brief and intermediate exposures to sulfate submicron aerosols and sulfate injections and cardiopulmonary function of dogs and tracheal mucous velocity of sheep.

The effect of metal chelators and other metabolic inhibitors on the growth of Bifidobacterium bifidus var. Pennsylvanicus.

Acetyl coenzyme A and acetylcholine in slices of rat caudate nuclei incubated in the presence of metabolic inhibitors.

Modification of arginine residues in porcine pancreatic phospholipase A₂.

Characteristics of (+/-)-[14C]-oxprenolol and (+/-)-[14C]-propranolol incorporation by rat lung slices.

High-affinity uptake of spermine by slices of rat cerebral cortex.

A comparison of 2,4-dichlorophenoxyacetic Acid metabolism in cultured soybean cells and in embryogenic carrot cells.

Metabolism of 4-Chloronitrobenzene by the Yeast Rhodosporidium sp.

Lacrimal gland flow and potentials during dinitrophenol, ouabain, and ethacrynic acid perfusion.

The differential localization of various drug metabolizing systems within the rat liver lobule as determined by the hepatotoxins allyl alcohol, carbon tetrachloride and bromobenzene.

Potent induction of rat liver microsomal, drug-metabolizing enzymes by 2,3,3',4,4',5-hexabromobiphenyl, a component of fireMaster.

Changes in body temperature after administration of antipyretics, LSD, delta 9-THC, CNS depressants and stimulants, hormones, inorganic ions, gases, 2,4-DNP and miscellaneous agents.

Coupling between H⁺ transport and anaerobic glycolysis in turtle urinary bladder: effect of inhibitors of H⁺ ATPase.

Pathways of palmitate metabolism in the isolated rat lung.

Induction by glucose of an antimycin-insensitive, azide-sensitive respiration in the yeast Kluyveromyces lactis.

Arthrobacter P1, a fast growing versatile methylotroph with amine oxidase as a key enzyme in the metabolism of methylated amines.

Effect of hypophysectomy and castration on hepatic, pulmonary and intestinal aryl hydrocarbon hydroxylase activities in the rat.

Studies of the effects of agents which alter calcium metabolism on acetylcholine turnover in the rat diaphragm preparation.

[Tissue-specific regulation of rat liver mitochondrial oxidative phosphorylation by a soluble phase of cells from that organ].

Uptake of anticoagulants by isolated rat hepatocytes.

Effects of pyruvate and other metabolites on cyclic GMP levels in incubations of rat hepatocytes and kidney cortex.

Effect of several factors on the liver extract mediated mutagenicity of acrylonitrile and identification of four new in vitro metabolites.

Studies on mutagenic constituents of apple brandy and various alcoholic beverages collected in western France, a high incidence area for oesophageal cancer.

Complete amino acid sequence of bovine thymosin beta 4: a thymic hormone that induces terminal deoxynucleotidyl transferase activity in thymocyte populations.

Salicylic acid inhibition of the irreversible effect of acetylsalicylic acid on prostaglandin synthetase may be due to competition for the enzyme cationic binding site.

Amino acid sequence homologies between the high-mobility-group proteins, HMG-T from trout testis and HMG-1 and -2 from calf thymus: is the poly-aspartic-glutamic acid polypeptide within the main chain?

Energy-dependent activation and magnesium--dependent inactivation of hepatocyte hormone-sensitive phosphodiesterase.

Serotonin uptake by isolated adipose capillary endothelium.

Pigment epithelial cells in culture. Metabolic pathways required for phagocytosis.

Membrane deformability of metabolically depleted human red cells.

Metabolic studies on calcium transport in mammalian lens.

Effect of 2,4 dinitrophenol on the rate of hepatic prostaglandin production.

A new metabolite of propachlor isolated from germfree rat excreta.

Biotransformation and intracellular binding of arsenic in tissues of rabbits after intraperitoneal administration of ⁷⁴As labelled arsenite.

An energy-dependent, sodium-independent component of active p-aminohippurate transport in rabbit renal cortex.

Urinary excretion of inorganic arsenic and its metabolites after repeated ingestion of sodium metaarsenite by volunteers.

Hormone-cytoplasmic interactions controlling sperm nuclear decondensation and male pronuclear development in starfish oocytes.

The effect of intestinal microflora on the enterohepatic circulation of mercapturic acid pathway metabolites.

Ultrastructural demonstration of endogenous peroxidatic activity in mammalian arterial wall.

Buffer electrofocusing of thyroid proteins.

Role of energy metabolism in *Mycoplasma pneumoniae* attachment to glass surfaces.

Metabolism of benzo[a]pyrene in rat prostate glands following 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

Alteration of urinary levels of the carcinogen, N-hydroxy-2-naphthylamine, and its N-glucuronide in the rat by control of urinary pH, inhibition of metabolic sulfation, and changes in biliary excretion.

Metabolism of beta-hexachlorocyclohexane-14C in rats following low dosing in the daily diet.

Porcine pancreatic alpha-amylase I: Sequence between the 35th and 410th amino acid.

Simultaneous immobilization of cytochrome P-450 and glucuronyltransferase for synthesis of drug metabolites.

[Paraquat poisoning in a pregnant women (author's transl)].

Early and delayed biochemical effects of paraquat toxicity on rat lung.

Biochemical mechanisms in chemical-induced lung injury: roles of metabolic activation.

Toxicity and bioaccumulation of pentachlorophenol in broiler chickens.

The chronic toxicity of technical and analytical pentachlorophenol in cattle. I. Clinicopathology.

Accumulation of anionic pesticides by rabbit choroid plexus in vitro.

Effects of pentachlorophenol on rat liver changes induced by hexachlorobenzene, with special reference to porphyria, and alterations in mixed function oxygenases.

[Effect of the pesticide, fundazol, on the myocardium of rats with experimental atherosclerosis].

Cytogenetic toxicity of cyclophosphamide and its metabolites in vitro.

The embryotoxicity of the cyclophosphamide metabolite acrolein in rabbits, tested in vivo by i.v. injection and by the yolk-sac method.

Human health effects of selected pesticides, chloroaniline derivatives.

[Effects of acute or chronic poisoning with lindane or 2,4,5-trichlorophenoxyacetic acid on adrenal and urinary catecholamines of rats. Effect of a hypo- and hyperlipidic diet].

[Effects of toxic gases and phagocytic defense of the respiratory system. "In vitro" approach].

Prevention of isophosphamide-induced urothelial toxicity with 2-mercaptoethane sulphonate sodium (mesnum) in patients with advanced carcinoma.

The involvement of porphyrinogenic steroids in the development of experimental porphyria.

Oxygen effects of metabolism and paraquat uptake in rat lung slices.

Physico-chemical, mutagenic and carcinogenic properties of nitrosated urea herbicide metabolites.

Does acrolein contribute to the cytotoxicity of cyclophosphamide?

Studies on the disposition and metabolism of pentachloroanisole in female mice.

Metabolism of the herbicide buthidazole in corn seedlings and alfalfa plants.

Gas chromatographic determination of fluridone aquatic herbicide and its major metabolite in fish.

Metabolism of deethylatrazine, deisopropylatrazine, and hydroxyatrazine by the soluble fraction (105000 g) from goose liver homogenates.

Ethanol oxidation by rat brain in vivo.

The biotransformation of allyl alcohol and acrolein in rat liver and lung preparations.

Peanut uptake and metabolism of [¹⁴C]oxadiazon from soil.

Studies on the action of pesticides upon the endocrines using in vitro human thyroid cells culture and in vivo animal models. II. Herbicides-prometrin and terbutrin.

Metabolic fate of the herbicide dicamba in a lactating cow.

Effects of atrazine on circadian RNA, DNA and total protein rhythms in the thyroid and adrenal.

Incorporation of foreign compound metabolites into plant and soil constituents.

Mutagenic potency of haloacroleins and related compounds.

The effects of ozone and paraquat on PGF₂ alpha and PGE₂ levels in plasma and combined pleural effusion and lung lavage of rats.

A review of the coordinated research effort on the comparison of test systems for the detection of mutagenic effects, sponsored by the E.E.C.

The metabolic fate of a herbicidal methylmercapto-s-triazine (cyanatryn) in the rat.

Metabolism of ¹⁴C-labeled hexazinone in the rat.

Metabolic fate of the herbicide buthidazole in lactating cows and laying hens.

[Myotonic effects of 2,4-Dichlorophenoxyacetate (2,4-D) on the isolated frog skeletal muscle (author's transl)].

Comparison of the mutagenicities of malondialdehyde and the side products formed during its chemical synthesis.

Minimizing occupational exposure to pesticides: recent developments in methodology for monitoring pesticide metabolites in human urine.

Effect of chlorophenols on porphyrin metabolism in rats and chick embryo.

In vitro methods for the study of the effects of teratogens on preimplantation embryos.

Thidiazuron uptake, distribution and metabolism in bluegills and channel catfish.

Identification of two sulphur containing urinary metabolites of cinnamic aldehyde in the rat [proceedings].

Hexachlorobenzene (HCB) and some of its sulfur-containing metabolites: tissue retention and excretion routes in mice.

Mutagenicity of pesticides evaluated by means of gene-conversion in *Saccharomyces cerevisiae* and in *Aspergillus nidulans*.

Effect of a specific 5HT uptake inhibitor (citalopram) on drug accumulation by rat lung slices.

The effects of 2,4-dichlorophenoxyacetic acid on respiration, nitrogen and carbohydrate metabolism of *Aspergillus terreus* Thom.

A membrane glycoprotein from human neuroblastoma cells isolated with the use of a monoclonal antibody.

Mechanism of the linkage between the electrophoretic mobility and oxygen uptake of ascites tumor cells.

Differential alterations in host peripheral polymorphonuclear leukocyte chemiluminescence during the course of bacterial and viral infections.

Cultured hepatoma cells as a model system for studying insulin processing and biologic responsiveness.

The influence of hypoxia and metabolic inhibitors on the excitation process in atrioventricular node.

Effects of 2,4-dinitrophenol and other metabolic inhibitors on the bidirectional carrier fluxes, net transport, and intracellular binding of methotrexate in Ehrlich ascites tumor cells.

Metabolism of 3,3'-Diiodothyronine and 3'-monoiodothyronine, and effect of potassium cyanide and dinitrophenol and glucuronidation of thyroxine in cultured rat hepatoma cells.

Lymphocyte capping induced by polycationized ferritin.

Metabolic dependence of the electromyogram of the cat colon.

The effects of acute and subacute sodium arsenite administration on carbohydrate metabolism.

[Adriamycin-cardiomyopathy induced by an increment of (Ca^{2+}) (author's transl)].

Isolation, characterization and amino acid sequence studies of the cyanogen bromide fragments of the H-2Dd glycoprotein.

Relationship between membrane transport of methotrexate and endogenous cyclic adenosine 3':5'-monophosphate in the Ehrlich ascites tumor.

Energization of amino acid transport in energy-depleted Ehrlich cells and plasma membrane vesicles.

Antibodies specific for histone H2b fragments 1-58 and 63-125 in antisera to H2b and to the fragments: probes for histone evolution.

Processing of prolactin by human breast cancer cells in long term tissue culture.

Characterization of collagen synthesized by normal and chemically transformed rat liver epithelial cell lines.

Effects of metabolic inhibitors on the regulation of pancreatic glucagon release.

Increased total and high density lipoprotein cholesterol with apoprotein changes resembling streptozotocin diabetes in tetrachlorodibenzodioxin (TCDD) treated rats.

Induction of 2',3'-cyclic nucleotide 3'-phosphohydrolase and morphological alterations in C6 glioma cells by dexamethasone, (3-butoxy-4-methoxybenzyl)-2-imidazolinone and prostaglandin E1.

The impact of streptozotocin-induced diabetes mellitus on cyclic nucleotide regulation of skeletal muscle amino acid metabolism in the rat.

[Use of antagonistic metals to correct copper metabolism in patients with hepatocerebral dystrophy].

General health effects of prolonged exposure to 3,3',4,4'-tetrachloroazobenzene and 3,3',4,4'-tetrachloroazoxybenzene in rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin: segregation of toxicity with the Ah locus.

Role of the endocrine system in the action of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the thymus.

Biological evaluation of hemoperfusion in acute poisoning.

Congenital hypothalamic hamartoblastoma, hypopituitarism, imperforate anus and postaxial polydactyly--a new syndrome? Part I: clinical, causal, and pathogenetic considerations.

[Experimental study on elucidating pathogenesis of adriamycin induced cardiomyopathy (author's transl)].

Interactions between essential trace and ultratrace elements.

Effect of polychlorinated biphenyl, dibenzofuran and dibenzo-p-dioxin on the susceptibility of male mice to endotoxin.

Structural characterization of the phosphorylation sites of human erythrocyte spectrin.

Primary structure of diphtheria toxin fragment B: structural similarities with lipid-binding domains.

Effect of metabolic inhibitors on renal tubule cell volume.

Induction of aryl hydrocarbon hydroxylase activity in the rat prostate glands by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Catalysis of divergent pathways of 2-acetylaminofluorene metabolism by multiple forms of cytochrome P-450.

Properties of carnitine transport in rat kidney cortex slices.

Cytotoxicity and DNA cross-linking activity of 4-sulfidocyclophosphamides in mouse leukemia cells in vitro.

Comparison of p-p'-DDE and o-p'-DDE on eggshell thickness and Ca binding activity of shell gland in ducks.

Metabolic and cytoskeletal modulation of transferrin receptor mobility in mitogen-activated human lymphocytes.

Stimulus secretion coupling: role of cyclic GMP and calcium in the regulation of secretion from rat exocrine pancreas.

Thermal injury of *Yersinia enterocolitica*.

Metabolism of 2,4-Dichlorophenoxyacetic Acid (2,4-D) in Soybean Root Callus : EVIDENCE FOR THE CONVERSION OF 2,4-D AMINO ACID CONJUGATES TO FREE 2,4-D.

Solid-phase synthesis of human pancreatic polypeptide.

Tissue distribution, excretion, and metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the Golden Syrian hamster.

An approach to the structure of thyroglobulin. Hormone-forming sequences in porcine thyroglobulin.

Metabolism of propachlor by the germfree rat.

Control of hepatic arterial blood flow: independence from liver metabolic activity.

Digoxin-quinidine interaction: in vitro studies in rat tissue.

Effects of orchidectomy on the adrenal macrophage system.

Synthesis and secretion of hemolysin by *Escherichia coli*.

Changes in the oxidative metabolism during maturation of amphibian oocytes.

Effect of thyrotropin-releasing hormone (TRH) on local cerebral glucose utilization, by the autoradiographic 2-deoxy[14C]glucose method, in conscious and pentobarbitalized rats.

Organ culture of adult rat colonic mucosa on fibrin foam.

Amino acid sequence of a collagenolytic protease from the hepatopancreas of the fiddler crab, *Uca pugilator*.

The effects of calcium ions, ionophore A23187 and inhibition of energy metabolism on protein degradation in the rat diaphragm and epitrochlearis muscles in vitro.

Studies of the chick renal mitochondrial 25-hydroxyvitamin D-3 24-hydroxylase.

Soluble Sugars, Respiration, and Energy Charge during Aging of Excised Maize Root Tips.

Retinoids inhibit 2,3,7,8-tetrachlorodibenzo-p-dioxine-induced activity of benzo[a]pyrene metabolizing enzymes in human diploid fibroblasts.

The characterization of [3H] adenosine uptake into rat cerebral cortical synaptosomes.

Gas-chromatographic method for the halothane metabolites, trifluoroacetic acid and bromide, in biological fluids.

Genetic expression of aflatoxin B1 metabolism: effects of 3-methylcholanthrene and 2,3,7,8-tetrachlorodibenzo-p-dioxin on the metabolism of aflatoxins B1 and B2 by various inbred strains of mice.

Use of an uncoupling agent to distinguish between direct stimulation of metabolism and direct stimulation of transport: investigation of antidiuretic hormone and aldosterone.

Inhibition of lymphocyte growth by spermidine in medium containing fetal bovine serum.

Studies on the disulfide bonds in human pituitary follicle-stimulating hormone.

Phosphorus nuclear magnetic resonance of bovine platelets.

Active renal hexose transport. Structural requirements.

Renal excretion of urea in the salamander, *Ambystoma tigrinum*.

Adriamycin-induced alterations of the action potential in rat papillary muscle.

The control of pigment migration in isolated erythrocytes of *Holocentrus ascensionis* (Osbeck). I. Energy requirements.

Selective depression of 2,4-dinitrophenol depolarized canine Purkinje fibers by lidocaine.

Naphthalene metabolism by pseudomonads: purification and properties of 1,2-dihydroxynaphthalene oxygenase.

The generation of sulfation factor activity by proteolytic modification of growth hormone.

Screening for barley mutants with altered hormone sensitivity in their aleurone layers.

Metabolic studies on pentachloronitrobenzene (PCNB) in rats.

Metabolism of o-[methyl-14C]toluidine in the F344 rat.

Studies on peptides. LXXXVII. Synthesis of an octacosapeptide amide corresponding to the entire amino acid sequence of chicken vasoactive intestinal polypeptide (VIP).

Chlorinated phenols: occurrence, toxicity, metabolism, and environmental impact.

Phosphate accumulation by the isolated renal tubule and the effects of parathyroid hormone and cyclic adenosine monophosphate.

Calcium accumulation by chick intestinal mitochondria. Regulation by vitamin D-3 and 1,25-dihydroxyvitamin D-3.

Substrate supply and function of isolated venous smooth muscle under anoxia and metabolic inhibition.

Effects of metabolic inhibitors on the efflux of 5-hydroxytryptamine from pancreatic Beta-cells.

In vitro and in vivo evaluation of the movement of Kepone in the rat submaxillary gland.

Metabolism of three active analogues of the male antifertility agent alpha-chlorohydrin in the rat.

Non-hormonal activation of glycogenolysis in perfused rat livers.

Dynamics of O₂ consumption in rat pancreatic islets.

Effects of metabolic and transport inhibitors on sodium transport and CO₂ production of toad bladders: use of an uncoupling agent to distinguish between effects on transport and metabolism.

Stimulus-secretion coupling in rat pancreas: role of sodium, calcium and cyclic nucleotides studied by X-537A and BrX-537A.

Mechanisms of action potential propagation failure at sites of axon branching in the crayfish.

Uptake of gentamicin by separated, viable renal tubules from rabbits.

Characteristics of 5-hydroxytryptamine transport in pancreatic islets.

Effect of human gastric juice on the mutagenicity of chemicals.

Effect of ATPase inhibitors on the proton pump of respiratory-deficient yeast.

Analysis of the lytic step in the herpes simplex virus antibody-dependent cellular cytotoxicity system.

Whole-body retention, excretion and metabolism of [⁷⁴As]arsenic acid in the hamster.

Energy metabolism of the anaerobic protozoon *Giardia lamblia*.

Occurrence of two different endorphins in the salmon pituitary.

Metabolism of tritiated parathyroid hormone by a kidney cortex plasma membrane preparation.

Developmental Effects of Sandoz 6706 on Activities of Enzymes of Phenolic and General Metabolism in Barley Shoots Grown in the Dark or under Low or High Intensity Light.

Metabolism of Dibenzo-p-Dioxin and Chlorinated Dibenzo-p- Dioxins by a *Beijerinckia* Species.

[Structural characteristics and growth activity of sperm whale somatotropin and its fragments].

Effect of metabolic inhibitors on ⁴⁵Ca fluxes and ATP content of myelinated nerve.

[Peripheral regulation of the adrenergic mediator process in the smooth muscles of the rat small intestine].

Biosynthesis of interstitial types of collagen by albumin-producing rat liver parenchymal cell (hepatocyte) clones in culture.

Comparative metabolism of 2,4-dichlorophenoxyacetic Acid in cotyledon and leaf callus from two varieties of soybean.

Effects of Glyphosate on Metabolism of Phenolic Compounds: V. I-alpha-AMINOXY-beta-PHENYLPROPIONIC ACID AND GLYPHOSATE EFFECTS ON PHENYLALANINE AMMONIA-LYASE IN SOYBEAN SEEDLINGS.

Uptake, elimination, and metabolism of three phenols by fathead minnows.

Cold and metabolic inhibitor effects on cytoplasmic microtubules and the Golgi complex in cultured rat epiphyseal chondrocytes.

Metabolism of alpha- and beta-pinene, p-cymene and 1,8-cineole in the brushtail possum, *Trichosurus vulpecula*.

Solid-phase synthesis of porcine vasoactive intestinal peptide.

Interaction of cytopathogenic toxin from *Clostridium difficile* with cells in tissue culture.

The site of action of 2,4-dinitrophenol and salicylic acid upon the uncoupler-induced K⁺ efflux from non-metabolizing yeast.

The development of mesna for the inhibition of urotoxic side effects of cyclophosphamide, ifosfamide, and other oxazaphosphorine cytostatics.

Physiological conditions affecting the sensitivity of *Saccharomyces cerevisiae* to a *Pichia kluyveri* killer toxin and energy requirement for toxin action.

Relation between energy metabolism in mitochondria and conversion of 18 hydroxycorticosterone to aldosterone in adrenals.

Studies on cartilage formation. XXII. Investigations of certain oxidative metabolic processes in regenerating articular cartilage.

Movement of calcium ions and release of histamine from rat mast cells.

The toxicity and renal handling of paraquat in cynomolgus monkeys.

The effects of aminotriazole (ATZ) on the thyroid gland and the development of the White Leghorn chick.

Delayed neurotoxic, late acute and cholinergic effects of S,S,S-tributyl phosphorotrithioate (DEF): subchronic (90 days) administration in hens.

Biochemical and morphological correlation of oxidant-induced pulmonary injury: low dose exposure to paraquat, oxygen, and ozone.

[Biological value of Mironovskaya-808 winter wheat grown using the herbicide simazine].

Toxic substances and cell membrane function.

Reproduction hormones and the potential biocide substances.

Toxicity of 1,1'-alkyl-4,4'-bipyridylium salts in the rat.

[Disturbances in the processes of division and differentiation of the spermatopoietic epithelium in chronic Ramrod poisoning].

Acrolein, the causative factor of urotoxic side-effects of cyclophosphamide, ifosfamide, trofosfamide and sufosfamide.

[Histological changes of organs in sheep with chronic simazine poisoning].

Treatment of severe 2,4-D and mecoprop intoxication with alkaline diuresis.

Changes of metabolism during experimentally induced myotonia of rats. II. Alterations in creatine kinase and acid phosphatase activities: a possible mechanism in the development of muscle damage.

Changes of metabolism during experimentally induced myotonia of rats. I. Alterations in lactate and malate dehydrogenase isoenzyme activities.

Studies on the action of pesticides upon the endocrines using in vitro human thyroid cells culture and in vivo animal models. I. Herbicides--aminotriazole (amitrol) and atrazine.

Metabolism and selectivity of fluchloralin in soybean roots.

Mercapturic acid occurrence in fish bile. A terminal product of metabolism of the herbicide molinate.

Effects of atrazine on the toxicity, penetration and metabolism of carbofuran in the house fly.

A new in vitro method for testing plant metabolism in mutagenicity studies.

Determination of s-triazine herbicide residues in urine: studies of excretion and metabolism in swine as a model to human metabolism.

S-Chloroallyl thiocarbamate herbicides: mouse hepatic microsomal oxygenase and rat metabolism of cis- and trans-[¹⁴C = O]diallate.

Effects of s-triazine herbicides on hormone-receptor complex formation, 5 alpha-reductase and 3 alpha-hydroxysteroid dehydrogenase activity at the anterior pituitary level.

Propachlor detoxication in the small intestine: cysteine conjugation.

The metabolism and disposition of halogenated aromatics.

Metabolism and selectivity of diclofop-methyl in wild oat and wheat.

Metabolism of [¹⁴C]fosamine ammonium in the rat.

[Phytotoxic metabolites of soil penicillia].

[Fluorometric determination of "activated" cyclophosphamide and ifosfamide in blood (author's transl)].

Thiourea and cyanamide as inhibitors of thyroid peroxidase: the role of iodide.

The effect of oxygen and paraquat on the ¹⁴C-glucose oxidation of rabbit alveolar macrophages and lung slices.

On the mechanism of paraquat action on microsomal oxygen reduction and its relation to lipid peroxidation.

Multi-residue method for the determination of chlorinated phenol metabolites in urine.

Dissociation of microsomal oxygen reduction and lipid peroxidation with the electron acceptors, paraquat and menadione.

Metabolism of atrazine by the soluble fraction (105000g) from chicken liver homogenates.

Determinants of the renal handling of 2, 4-dichlorophenoxyacetic acid by winter flounder.

[Mesoramil metabolism in the body of warm-blooded animals].

The effect of paraquat on the aerobic metabolism of rabbit alveolar macrophages and lung fibroblasts.

[Preparation of a chloridazon metabolite by use of immobilized chloridazon-dihydrodiol dehydrogenase. Some properties of the immobilized enzyme].

Metabolism and distribution of 2,4,5-trichlorophenoxyacetic acid (2,4,5-T) in pregnant mice.

[Action of herbicide "Atrazine" on thymus and bursa in chickens].

Excretion balance, metabolic fate, and tissue residues of N-phenyl-N'-1,2,5,-thiadiazol-3-ylurea (photothidiazuron) in rats.

Metabolism of 2-chloro-N-isopropylacetanilide (propachlor) in the rat.

Metabolism of 2-chloro-N-isopropylacetanilide (propachlor) in the sheep and milk goat.

Effects of enantiomeric homogeneity on the in vitro metabolism and in vivo anticancer activity of (+)- and (-)-cyclophosphamide.

Induction in vitro of reversible immunosuppression and inhibition of B cell receptor regeneration by defined metabolites of cyclophosphamide.

Studies on the origin of the methylsulfonyl-containing metabolites from propachlor.

Renal transport and renal metabolism of 2, 4, 5-trichlorophenoxyacetate by the chicken.

Enhanced efflux of actinomycin D, vincristine, and vinblastine in adriamycin-resistant subline of P388 leukemia.

Role of peripheral tissue receptors in stimulation of ventilation by 2,4-dinitrophenol.

Correlation between metabolic reduction rates and electron affinity of nitroheterocycles.

Pyrolysis products from amino acids and protein: highest mutagenicity requires cytochrome P1-450.

[Existence of several non-specific recognition systems in macrophages].

The role of superoxide anion generation in antibody-dependent polymorphonuclear leukocyte-mediated cytotoxicity.

Expression of the major red cell sialoglycoprotein, glycophorin A, in the human leukemic cell line K562.

Defect in regulation of membrane transport of monosaccharides in dystrophic muscle.

Acute pulmonary injury in rats by nitrofurantoin and modification by vitamin E, dietary fat, and oxygen.

Mode of uptake and degradation of ¹²⁵I-labelled insulin by isolated hepatocytes and H4 hepatoma cells.

Assessment of environmental factors affecting male fertility.

Active efflux of daunorubicin and adriamycin in sensitive and resistant sublines of P388 leukemia.

High-affinity uptake of gamma-aminobutyric acid in cultured glial and neuronal cells.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on splenic lymphocyte transformation in mice after single and repeated exposures.

Laboratory studies on the immune effects of halogenated aromatics.

Long-term toxicologic studies of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in laboratory animals.

Developmental toxicology of the halogenated aromatics: effects on enzyme development.

Iron deficiency prevents liver toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Capping of surface immunoglobulin on 'hairy cells' is independent of energy production.

The protective action of inosine on isolated arteries in hypoxia.

Absence of microsomal lipid peroxidation in acatalasemic mice.

Self-poisoning by sodium chlorate--some unusual features.

[Study of acute and chronic effects of single doses of tetrachlorodibenzodioxin (TCDD) in Wistar rats].

Metabolism of toluene in man: gas-chromatographic determination of o-, m- and p-cresol in urine.

Chemical exposure and intestinal function.

Regulation of calcium transport in isolated periosteal cells, effects of hormones and metabolic inhibitors.

Gibberellic Acid Activates Chromatin-bound DNA-dependent RNA Polymerase in Wounded Potato Tuber Tissue.

Sucrose uptake by sugar beet tap root tissue.

Ontogeny of the rat hepatic receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin and its endocrine independence.

Effect of sodium azide on the ultrastructural preservation of tissues.

Evidence for the involvement of an energy-dependent process in gonadotropin-releasing hormone-stimulated luteinizing hormone release by rat anterior pituitary.

Possible role of cyclic GMP in stimulus-secretion coupling by salt gland of the duck.

Location of the antigenic determinants of bovine pancreatic ribonuclease.

Studies of the biological and immunological properties of parathyroid hormone, labeled selectively on the methionine residues by [3H]methyl exchange to high specific activity.

Analysis of the adhesion step in the herpes simplex virus antibody-dependent cellular cytotoxicity system.

Inhibitory effect of certain drugs on thyroid hormone binding by human liver cytosol.

Prostaglandins have limited actions on abnormalities of beating induced in cultured heart cells.

Effect of sodium chloride on the respiratory function of *Staphylococcus aureus*.

Evidence for new factors in the coordinate regulation of energy metabolism in *Escherichia coli*. Effects of hypoxia, chloramphenicol succinate, and 2,4-dinitrophenol on glucose utilization, glycogen synthesis, adenylate energy charge, and hexose phosphates during the first two periods of nitrogen starvation.

Urinary o-cresol in toluene exposure.

The isolation and partial sequence of peptides produced by cyanogen bromide cleavage of calf thymus non-histone chromosomal high-mobility-group protein 2. Sequence homology with non-histone chromosomal high-mobility-group protein 1.

Dispersal and reformation of acetylcholine receptor clusters of cultured rat myotubes treated with inhibitors of energy metabolism.

In vivo conversion of sodium azide to a stable mutagenic metabolite in *Salmonella typhimurium*.

Sodium dependence of the nerve growth factor--regulated hexose uptake in chick embryo ganglionic cells.

Superficial or membrane digestion of peptides in dinitrophenol-inhibited rat small intestine.

The amino acid sequence of mouse pancreatic ribonuclease. Extremely rapid evolutionary rates of the myomorph rodent ribonucleases.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the hepatic metabolism of testosterone in the rat.

Primary structure of human fibrinogen and fibrin. Structural studies on NH₂-terminal part of B beta chain.

Effect of chlorine substitution on the bacterial metabolism of various polychlorinated biphenyls.

Metabolic dependence of the offset of antidiuretic hormone-induced osmotic flow of water across the toad urinary bladder.

Characterization of a C₂₁ neutral steroid hormone transforming enzyme, 21-dehydroxylase, in crude cell extracts of *Eubacterium lentum*.

Isolation and separation of toad bladder epithelial cells.

The covalent structure of calf skin type III collagen. IV. The amino acid sequence of the cyanogen bromide peptide alpha 1(III)CB5 (positions 552--788).

Reversal of sodium-azide mutagenicity by liver preparations and by gastric juice.

Porcine pancreatic lipase. Sequence of the first 234 amino acids of the peptide chain.

L-Thyroxine effects upon ATPase activities of several subcellular fractions of liver of the rat and the guinea pig.

The formation of dihydrodiols by the chemical or enzymic oxidation of 7-hydroxymethyl-12-methylbenz[alpha]anthracene and the possible role of hydroxymethyl dihydrodiols in the metabolic activation of 7,12-dimethylbenz[alpha]anthracene.

Urinary acidification in turtle bladder is due to a reversible proton-translocating ATPase.

In vitro metabolism of 1,2-dihaloethanes to ethylene.

A pituitary endorphin with novel properties.

Effects of temperature, metabolic inhibitors and some other factors on fluid-phase and adsorptive pinocytosis by rat peritoneal macrophages.

Ultrastructural correlates of luminescence in *Porichthys* photophores. II. Effects of metabolic inhibitors.

Studies of the mechanisms of toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Activation of rat liver guanylate cyclase by proteolysis.

Local aggregation of hormone-receptor complexes is required for activation by epidermal growth factor.

Thyroid hormone stimulates synthesis of a cardiac myosin isozyme. Comparison of the two-dimensional electrophoretic patterns of the cyanogen bromide peptides of cardiac myosin heavy chains from euthyroid and thyrotoxic rabbits.

Uncoupling agents distinguish between the effects of metabolic inhibitors and transport inhibitors.

Nature of the phosphorylated 26 000 molecular weight protein extracted from dog thyroid with contractile proteins.

Postnatal amino acid uptake by the rat small intestine. Energetics of membrane transport systems for amino acids in the developing jejunum.

Metabolic activation/deactivation reactions during perinatal development.

Calcium and pancreatic beta-cell function. 5. Mobilisation of a glucose-stimulated pool of intracellular ⁴⁵Ca by metabolic inhibitors and the ionophore A-23187.

Metabolic similarities between fertilization and phagocytosis. Conservation of a peroxidatic mechanism.

Metabolic activation and deactivation of mutagens and carcinogens.

[Role of metabolic energy in the regulation of chlortetracycline transport in *Escherichia coli*].

Hormonal alterations in female rhesus monkeys fed a diet containing 2, 3,7,8-tetrachlorodibenzo-p-dioxin.

The influence of some metabolic inhibitors on phagocytic activity of mouse macrophages in vitro.

Studies on the effect of neonatal hypermetabolism on hypothalamo-pituitary-thyroid axis in adult rats.

Determination of iodide in metabolic studies of ¹²⁵I-labeled compounds.

Myeloperoxidase-mediated platelet release reaction.

Injury and recovery of *Escherichia coli* after sublethal acidification.

Studies on modification of tryptophan, methionine, tyrosine and arginine residues of human follicle-stimulating hormone and its subunits.

Distribution of the messenger RNA coding for the common precursor of corticotropin and beta-lipotropin within the bovine pituitary.

Inhibition of the circadian rhythm of CO₂ metabolism in *Bryophyllum* leaves by cycloheximide and dinitrophenol.

Bioassay of calcium cyanamide for possible carcinogenicity.

Bioassay of Nitrofen for Possible Carcinogenicity (CAS No. 1836-75-5).

Effects of 2,4-dinitrophenol amylobarbitone and certain other drugs on the rate of oxygen consumption and force of contraction of isolated curarized diaphragm muscle of the rat.

2,3,7,8-Tetrachlorodibenzo-p-dioxin: covalent binding of reactive metabolic intermediates principally to protein in vitro.

Uptake of 2-deoxy-D-glucose by cortical synaptosomes from the Long-Evans rat.

Phagocytosis and cellular metabolism (a study on mouse and human macrophages in culture).

The metabolic fate of N-isopropyl-N-phenyloxamic acid in the rat and the milk goat.

Hexose transport and phosphorylation by capillaries isolated from rat brain.

Changes in steroid hormone metabolism in rat liver microsomes following administration of 2,3,7,8-tetrachlorodibenzo-p-dioxine (TCDD).

Allyl alcohol-induced changes in the rat exocrine pancreas.

An ouabain-insensitive Na-ATPase of the arterial vascular muscle cell and its relation to ouabain-sensitive Na,K-ATPase.

Regulative influence of o-aminobenzoic acid on the biosynthesis of nourseothricin in cultures of *Streptomyces noursei* JA 3890b. IV. Bistability of metabolism and the mechanism of action of aminobenzoic acids.

Mammalian endogenous peroxidases as cellular markers and as biosynthetic endpoints of hormone-mediated activity: viewpoint from cytochemistry.

Effect of metabolic inhibitors on vasopressin-stimulated transport systems in the toad bladder.

Hormonally induced cell shape changes in cultured rat ovarian granulosa cells.

Recent state of lindane metabolism. Part II.

Cyclic AMP formation and release by cultured bone cells stimulated with prostaglandin E2.

Metabolism of phenol and resorcinol in *Trichosporon cutaneum*.

Paraquat poisoning: a review.

Changes of adenosine triphosphatase activity in the testes of albino rats under combined influence of low-frequency vibration and intoxication with the herbicide "Ramrod".

[Clinico-pathological study of acute paraquat poisoning (author's transl)].

Dietary subacute toxicity of ethylene thiourea in the laboratory rat.

The influence of paraquat on the in vitro oxygen consumption of rabbit lung.

Alterations of glucose metabolism during perfusion of rat lung with paraquat.

Fatal paraquat poisoning: tissue concentrations and implications for treatment.

Enhanced lung toxicity of paraquat in selenium-deficient rats.

[Pathomorphological studies in experimental simazine poisoning of sheep].

Reduced body clearance as the major mechanism of the potentiation by beta2-adrenergic agonists of paraquat lethality in rats.

[Hexachlorbenzene (HCB) induced porphyria in rats. Influence of HCB-metabolites on the biosynthesis of heme (author's transl)].

alpha-aminoisobutyrate transport into cells from R3230AC mammary adenocarcinoma. Evidence for sodium ion-dependent and -independent carrier-mediated entry and effects of diabetes.

Comparative effects of aminotriazole on normal and acatalasemic mice.

Carcinogenic and antitumor effects of aminotriazole on acatalasemic and normal catalase mice.

Characteristics of proline transport into R3230AC mammary tumor cells.

Reversal by theophylline of some changes characteristically accompanying hypothyroidism in rats.

The effect of paraquat on the respiration of lung cell fractions.

The effects of paraquat on prostaglandin synthesis of guinea pig lungs.

A comparative study on the effects of disulfiram, cyanamide and 1-aminocyclopropanol on the acetaldehyde metabolism in rats.

Metabolism of [ring-14C]ordram (molinate) in the rat. 2. Urinary metabolite identification.

Metabolism of [ring-14C]ordram (molinate) in the rat. I. Balance and tissue residue study.

Excretion and metabolism of 3,4,5-tribromo-N,N,alpha-trimethyl-1H-pyrazole-1-acetamide in the rat.

Denaturation of cytochrome P-450 by cyclophosphamide metabolites.

[Metabolism of buturon in the rat].

Developmental restrictions on hormone modulated gene transcription. I. Effects of auxin on template capacity and chromatin-bound RNA polymerase.

Developmental restrictions on hormone modulated gene transcription. II. Hormone induced interactions of RNA polymerase with chromatin.

Mass spectral characterization of the glucuronide conjugates of terbutryn (2-(t-butylamino)-4-(ethylamino)-6-(methylthio)-s-triazine) metabolites from rats and goat.

Metabolism of [14C] terbutryn (2-(t-butylamino)-4-(ethylamino)-6-(methylthio)-s-triazine) by rats and goat.

An example of the oxidative de-esterification of an isopropyl ester. Its role in the metabolism of the herbicide flumpropisopropyl.

[Vertebrate hormones influence on the reproduction of *Biomphalaria glabrata* and on *Schistosoma mansoni* infection (author's transl)].

Excretion balance, metabolic fate, and tissue residues following treatment of lactating goats and laying hens with thidiazuron cotton defoliant.

Effects of atratone on hormone-dependent reactions in hypothalamus, pituitary and prostate gland.

Excretion balance, metabolic fate, and tissue residues following treatment of rats with thidiazuron cotton defoliant.

Metabolism of 2,4-dichlorophenoxyacetic acid (2,4-D) in bluegills and water.

Gas chromatographic analysis of tebuthiuron and its metabolites in grass, sugarcane, and sugarcane by-products.

Metabolism of pentachlorophenol in vivo and in vitro.

[Role of pyruvate kinase in non-specific changes of carbon photosynthetic metabolism, caused by the photophosphorylation inhibition].

Hydrogen metabolism in the facultative anoxygenic cyanobacteria (blue-green algae) *Oscillatoria limnetica* and *Aphanothece halophytica*.

[Metabolism and excretion of ³²P-aminophon in lactating cattle].

Thiocarbamate herbicide metabolism: microsomal oxygenase metabolism of EPTC involving mono- and dioxygenation at the sulfur and hydroxylation at each alkyl carbon.

Mutagenicity of diallate, sulfallate, and triallate and relationship between structure and mutagenic effects of carbamates used widely in agriculture.

[Metabolism of ordram, a herbicide of the thiocarbamate group, by microorganisms].

The effects of pentachlorophenol (PCP) and 2,4-dinitrophenol (DNP) on the oxygen consumption of tissues from the blue crab, *Callinectes sapidus*, under different osmotic conditions.

Migration of human lymphocytes. II. Variation of lymphocyte distribution.

[Some peculiarities of ATPase in tumor mitochondria].

[Antipyretic activity of SL-573 (II) (author's transl)].

Studies on the mode of action of beclotiamine on *Eimeria tenella*.

Reversion of transformed glycolysis to normal by inhibition of protein synthesis in rat kidney cells infected with temperature-sensitive mutant of Rous sarcoma virus.

Uptake and metabolism of thyroid hormones by cultured monkey hepatocarcinoma cells. Effects of potassium cyanide and dinitrophenol.

[What does conservative therapy of "idiopathic" facial paresis accomplish?].

[Mechanism of the decrease in basal metabolism during adaptation to hypoxia].

Tumour-necrosis factor from the rabbit. I. Mode of action, specificity and physicochemical properties.

Alteration of sensitivity and time scale in invertebrate photoreceptors exposed to anoxia, dinitrophenol, and carbon dioxide.

Pancreatic carcinogenesis and naturally occurring pancreatic neoplasms of rats and mice in the NCI carcinogenesis testing program.

Subcellular metabolite concentrations. Dependence of mitochondrial and cytosolic ATP systems on the metabolic state of perfused rat liver.

Treatment of arterial hypertension with tienilic acid, a new diuretic with uricosuric properties.

Methylnitrosophenylurea--a highly carcinogenic compound.

The presence of an aldehyde dehydrogenase inhibitor in animal diets and its effects on the experimental results in alcohol studies.

Studies on 2,3,7,8-tetrachlorodibenzo-p-dioxin induced immune suppression and decreased resistance to infection: endotoxin hypersensitivity, serum zinc concentrations and effect of thymosin treatment.

Nonsecreting myeloma variants with heavy-chain carbohydrate deficiencies.

Stimulation of bilirubin catabolism in jaundiced Gunn rats by an induced of microsomal mixed-function monooxygenases.

Metabolic studies with TCDD (dioxin) treated rats.

Cytotoxic effects of maleic hydrazide.

[Effects of clinically used drugs on pituitary hormone secretion].

Pinocytosis in the rat visceral yolk sac. Effects of temperature, metabolic inhibitors and some other modifiers.

Quantitative and qualitative changes in the metabolism of benzo(a)pyrene in rat tissues after intragastric administration of TCDD.

Effect of prolonged anaerobiosis on ¹²⁵I-insulin binding to rat soleus muscle: permissive effect of ATP.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on lipid profiles in tissue of the Fischer rat.

Overview of potential mutagenic problems posed by some pesticides and their trace impurities.

Effect of polychlorinated biphenyls on drug metabolism in Japanese quail and its progeny.

Effect of acute and chronic Cd exposure on lindane metabolism.

The interaction of caerulein with the rat pancreas. 2. Specific binding of [³H]caerulein on dispersed acinar cells.

Isolation and partial sequence of the cyanogen bromide peptides from calf thymus non-histone chromosomal protein HMG 1.

Adriamycin and daunomycin generate reactive oxygen compounds in erythrocytes.

Functional differences of ouabain and ethacrynic acid on renal potassium metabolism in dogs.

Selective modification of the renal and the hepatic toxicities of chloroform by induction of drug-metabolizing enzyme systems in kidney and liver.

[Investigation of adenosinetriphosphatase activity of rat liver and thymus cell nuclei].

Interrelationship between chloride fluxes in pancreatic islets and insulin release.

A study of the mechanism of transport of delta9-tetrahydrocannabinol in the rat submaxillary gland in vitro.

Effect of metabolic inhibitors on phenylalanine influx in cerebral cortex slices from mature and immature rats.

Effect of trichlorophenols on xenobiotic metabolism in the rat.

Purine metabolism and differential inhibition of spore germination in *Phytophthora infestans*.

Properties of the calcium-extruding mechanism of liver cells.

Ca²⁺-stimulated phosphorylation of muscle glycogen synthase by phosphorylase b kinase.

Oxidative metabolism of isolated foetal and neonatal rabbit brown adipose tissue. II. Effect of 2,4-dinitrophenol [proceedings].

The role of acetaldehyde in mediating the deleterious effect of ethanol on pyridoxal 5'-phosphate metabolism.

Metabolism of 2,4-dichlorophenoxyacetic Acid in soybean root callus and differentiated soybean root cultures as a function of concentration and tissue age.

Functional distinction between two transport mechanisms in rabbit gall-bladder epithelium by use of ouabain, ethacrynic acid and metabolic inhibitors.

Responses of the D-glucuronic acid pathway in rat tissues to treatment with tetrachlorodibenzodioxin.

Effects of phospholipase A and triton x-100 on guanylate cyclase activity in mammary gland homogenates from mice.

An improved assay of 7-ethoxycoumarin O-deethylase activity: induction of hepatic enzyme activity in C57BL/6J and DBA/2J mice by phenobarbital, 3-methylcholanthrene and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The chemotherapy of rodent malaria, XXXI. The effect of some metabolic inhibitors upon chloroquine-induced pigment clumping (CIPC) in Plasmodium berghei.

Enhanced pesticide metabolism, a previously unreported effect of dietary fibre in mammals.

Separation and maturation of gonadotrophs from 2A8 clonal cells in vitro.

An energy requirement for the degradation of intravenously injected ¹²⁵I-labeled albumin in mouse liver and kidney slices.

Enhancement of nitro reduction in rat liver microsomes by haemin and haemoproteins.

Selective inhibition of pyruvate and lactate metabolism in bovine epididymal spermatozoa by dinitrophenol and alpha-cyano-3-hydroxycinnamate.

Calcium-dependent inhibition by prostaglandin E1 of spontaneous acetylcholine release from frog motor nerve.

[52-Homoserine]-basic pancreatic trypsin inhibitor. Preparation and properties of a protein analog.

Superoxide production by digitonin-stimulated guinea pig granulocytes. The effects of N-ethyl maleimide, divalent cations; and glycolytic and mitochondrial inhibitors on the activation of the superoxide generating system.

Alterations in spontaneous activity of the isolated frog spinal cord in Calcium-free environment.

Organ specific induction of drug metabolizing enzymes by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat.

Role of neurotransmitters, prostaglandins and glucose on precursor incorporation into the RNA of thyroid slices.

[Taurine transport in the heart].

Differences in metabolism of vinylidene chloride between mice and rats.

Renal tubular transport of saccharin.

Metabolism of tetrachlorophenols in the rat.

Potentialiation of toluene toxicity by hepatic enzyme inhibition in mice.

Molecular weights of the Thy-1 glycoproteins from rat thymus and brain in the presence and absence of deoxycholate.

Iodothyronine metabolism in rat liver homogenates.

Effect of Ca^{2+} , Mg^{2+} , NaN_3 , cholinergic agents, and gastrointestinal hormones on the guanylate cyclase from guinea pig gastric mucosa.

The primary structure of bovine pancreatic phospholipase A₂.

Bioassay of picloram for possible carcinogenicity.

Bioassay of nitrofen for possible carcinogenicity.

Bioassay of sulfallate for possible carcinogenicity (CAS No. 95-06-7).

Active transport of thiamine by freshly isolated rat hepatocytes.

Tests for cataglykin activity on a cyanogen bromide fragment of human growth hormone.

Induction of drug metabolizing enzymes in different rat tissues by TCDD.

The type 1 alveolar lining cells of the mammalian lung. II. In vitro identification via the cell surface and ultrastructure of isolated cells from adult rabbit lung.

Bioenergetic aspects of aerobic glucose metabolism of *Escherichia coli* K-12 under varying specific growth rates and glucose concentrations.

An immunological approach to the study of protein conformational heterogeneity: its application to growth hormone.

The in vitro metabolism of lindane by an enzyme preparation from chicken liver.

Adrenal abnormalities in paraquat poisoning: an indication for corticosteroid therapy?

Pulmonary reactions to drugs.

Effect of pretreatment with antiinflammatory agents on paraquat toxicity in the rat.

Chloracne from manufacture of a new herbicide.

[Severe accidental acrolein intoxication in the home (author's transl)].

Environmental agents altering lung biochemistry.

[Residue formation of herbicides and its food-hygienic toxicological significance. I. General, mechanism of action, toxicology and metabolism].

The radioimmunological measurement of thyroglobulin secretion in vitro under the influence of some herbicides.

Effects of pentachlorophenol on hepatic drug-metabolizing enzymes and porphyria related to contamination with chlorinated dibenzo-p-dioxins and dibenzofurans.

Residues of atrazine and its metabolites in an orchard soil and their uptake by oat plants.

Metabolism of 2,4-dichlorophenoxyacetic acid by wheat cell suspension cultures.

The mutagenicity of MCPA and its soil metabolites, chlorinated phenols, catechols and some widely used slimicides in Finland.

Repression of asexual embryogenesis in vitro by some plant growth regulators.

Relationship between 2,4,5-trichlorophenoxyacetate and the renal organic base transport system.

Studies on the uptake, metabolism, and disposition of pentachlorophenol and pentachloroanisole in rainbow trout.

Distribution, movement, persistence, and metabolism of N-nitrosoatrazine in soils and a model aquatic ecosystem.

Absorption, excretion, and metabolism of nitrofen by a sheep.

Uptake and metabolism of dimethylamine salt of 2,4-dichlorophenoxyacetic acid by fish.

Induction of hepatic microsomal enzymes by diuron, phenobenzuron, and metabolites in rats.

The pharmacokinetics and metabolism of pentachlorophenol in rats.

Electron capture gas chromatographic analysis of the amine metabolites of pesticides: derivatization of anilines.

Studies on a soluble thyroid iodotyrosine deiodinase: activation by NADPH and electron carriers.

Metabolism of 2,4-dichlorophenoxyacetic acid. 11. Herbicidal properties of amino acid conjugates.

Persistence and metabolism of oxadiazon in soils.

Metabolism of atrazine by *Spartina alterniflora*. 1. Chloroform-soluble metabolites.

Thyroid peroxidase of the pig, dog, rat, and mouse. Solubilization and identification of isozymes by isoelectric focusing.

Determination of residues of karbutilate and its major metabolites in water, soil, and grass by high-pressure liquid chromatography.

Metabolism and degradation of glyphosphate in soil and water.

Metabolism of insecticides and herbicides in higher plants.

Effects of pyrazole and 3-amino-1,2,4-triazole on the metabolism and toxicity of dimethylnitrosamine in the rat.

Metabolic fate of the N,N-dialkylcarbamoyl moiety of thiocarbamate herbicides in rats and corn.

Gas chromatographic determination of sencor and metabolites in crops and soil.

Determination of terbacil and metabolite residues using microcoulometric gas chromatography.

[Mechanism of metabolic and ionic germination of "Bacillus licheniformis" spores treated with hydrogen peroxide (author's transl)].

[Application of radioisotopes to studies of pesticide metabolism (authors' transl)].

Metabolism of pentachlorophenol by a soil microbe.

In vitro inhibition of catalase by 4-hydroxypyrazole, a metabolite of pyrazole.

Metabolism of synthetic organic pesticides by anaerobic microorganisms.

Mutagenicity and chromosomal aberrations as an analytical tool for in vitro detection of mammalian enzyme-mediated formation of reactive metabolites.

1,1-Dichloroethylene hepatotoxicity: proposed mechanism of action and distribution and binding of ¹⁴C radioactivity following inhalation exposure in rats.

The role of phosphate in the action of vitamin D on the intestine.

Impairment of thymus-dependent immune functions by exposure of the developing immune system to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Prostaglandin E2 production by renal inner medullary tissue slices: effect of metabolic inhibitors.

Renal energy metabolism and sodium reabsorption after 2,4-dinitrophenol administration.

Spectral and metabolic characteristics of mitochondrial fractions from rotenone-induced tumours.

Enhanced thyroxine metabolism and high uptake goiters in rats after a single dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

A reassessment of decreased amino acid accumulation by Ehrlich ascites tumor cells in the presence of metabolic inhibitors.

Accelerated degradation of acetylcholine receptor from cultured rat myotubes with myasthenia gravis sera and globulins.

[Dissociation of the ino- and chronotropic response of isolated rat heart to noradrenaline in the presence of oxygen deficit, exposure to cyanide and 2,4-dinitrophenol].

Factors involved in heavy metal poisoning.

Mechanism of uptake of nitrosoureas by L5178Y lymphoblasts in vitro.

Comparative enzyme induction and lindane metabolism in rats pre-treated with various organochlorine pesticides.

Gap junctions. Structural changes after uncoupling procedures.

Effector cell stimulation-inhibition of in vitro lymphoma cell DNA synthesis and correlation with in vivo antitumor response.

[RNA biosynthesis in the ascitic cells of Ehrlich's carcinoma and Zajdela's hepatoma under conditions of blocked oxidative phosphorylation].

Metabolic energy requirements during teleost melanophore adaptations.

Effects of sodium azide on platelet function.

Expression in *Escherichia coli* of a chemically synthesized gene for the hormone somatostatin.

The distribution of methionine-enkephalin and leucine-enkephalin in the brain and peripheral tissues.

Inhibitory action of a non-metabolizable fatty acid on the growth of *Escherichia coli*: role of metabolism and outer membrane integrity.

Bioproduction of rubratoxin in a glucose-mineral salts broth with nutritional supplements and metabolic inhibitors.

The inhibitory effect of papaverine on respiration-dependent contracture of guinea pig taenia coli in high-K medium. I. The relationship between contracture and respiration.

Mitochondria from human term placenta. III. The role of respiration and energy generation in progesterone biosynthesis.

Energy utilization in the uptake of catecholamines by synaptic vesicles and adrenal chromaffin granules.

[Hormonal regulation of the electrical properties of the cell membrane].

Mutagenic activity of major mammalian metabolites of cyclophosphamide toward several genes of *Escherichia coli*.

The influence of some metabolic inhibitors on in vitro phagocytizing macrophages. I. The behaviour of human macrophages.

Polarity of Production of Polyphenols and Development of Various Enzyme Activities in Cut-injured Sweet Potato Root Tissue.

Metabolic changes associated with gastric stimulation.

Hormone receptors: VI. On the nature of the binding of glucagon and insulin to human circulating mononuclear leukocytes.

The inhibition of histamine release from rat peritoneal mast cells by non-steroid anti-inflammatory drugs and its reversal by calcium.

Does diaminobenzidine demonstrate prostaglandin synthetase? A study on polyunsaturated fatty acid-induced DAB oxidation in sheep vesicular glands and rabbit kidney medulla.

Alterations in nicotinamide and adenine nucleotide systems during mixed-function oxidation of p-nitroanisole in perfused livers from normal and phenobarbital-treated rats.

Use of ethyl ethers, deuteriomethyl ethers and cyclic n-butylboronates of hydroxychlorobiphenyls in identification of metabolites of polychlorinated biphenyls.

Intestinal absorption of sugars and amino acids in the earthworm.

Energy metabolism and T-cell-mediated cytotoxicity. I. Synergism between inhibitors of respiration and glycolysis.

Glucose metabolism in *Acetobacter acetii*.

Quantitative Effects of 2,4-Dichlorophenoxyacetic Acid on Growth of Suspension-cultured *Acer pseudoplatanus* Cells: II. Influence of 2,4-D Metabolism and Intracellular pH on the Control of Cell Division by Intracellular 2,4-D Concentration.

Mutagenic effectiveness and efficiency of sodium azide versus ethyl methanesulfonate in maize: induction of somatic mutations at the *yg2* locus by treatment of seeds differing in metabolic state and cell population.

Nitric oxide activates guanylate cyclase and increases guanosine 3':5'-cyclic monophosphate levels in various tissue preparations.

In vitro measurement of rate of fluid secretion in rat isolated seminiferous tubules: effects of metabolic inhibitors and ions.

Disturbance of microsomal detoxication mechanisms in liver by chlorophenol pesticides.

Regulation of cardiac output during 2,4-dinitrophenol-induced tissue hypermetabolism in the dog.

Effects of temperature, metabolic and cytoskeletal inhibitors on the rate of BHK cell adhesion to polystyrene.

Role of tissue hypermetabolism in stimulation of ventilation by dinitrophenol.

Factors which influence blood platelet migration.

A comparative study of the effects of methyl iodide and cobalt chloride on the lipid metabolism in rabbits--with special reference to the content alteration of coenzyme A, carnitine and their derivatives in rabbit liver.

Specific casein phosphorylation by a casein kinase from lactating bovine mammary gland.

Inhibition of prostaglandin synthesis in mouse 3T3 fibroblasts and human platelets by substituted phenols.

Relation of membrane vesicles to volume and Na⁺ transport in smooth muscle: effect of metabolic and transport inhibition on fresh tissues.

Effect of dichlorvos (DDVP) on mouse liver glutathione levels and lack of potentiation by methyl iodide and TOTP.

[Calorigenic effect of catecholamines in dinitrophenol poisoning].

Role of liver cytosolic aldehyde dehydrogenase isozymes in control of blood acetaldehyde concentrations.

Noxious effects upon cochlear metabolism.

Stimulation of neutral amino acid transport by fructose in epithelial cells isolated from rat intestine.

Actions of insulin in fat cells. Effects of low temperature, uncouplers of oxidative phosphorylation, and respiratory inhibitors.

The influence of 3,4-dihydroxyphenylacetic acid on the accumulation of 5-hydroxyindoleacetic acid in the choroid plexus and kidney cortex slices of rats.

Formation of a steroidal allyl alcohol in the mammary glands of mice.

Hydrogen peroxide lowers ATP levels in platelets without altering adenylate energy charge and platelet function.

Metabolism of Oat Leaves during Senescence: V. Senescence in Light.

Factors affecting the distribution of chloride ions in rat renal outer medulla.

The effects of inhibitors of energy metabolism on the growth of one-cell rabbit ova to blastocysts in vitro.

The effect of aeration and metabolic inhibitors on resistance to amphotericin in starved cultures of *Candida albicans*.

Active transport of iodide in isolated porcine thyroid cells. Application to an in vitro bioassay of thyrotropin.

Reinvestigation of the primary structures of red deer and roe deer pancreatic ribonuclease and proline sites in mammalian ribonucleases.

Metabolic energy dependence of glucose, water and sodium absorption in the presence and absence of 'downhill' sodium gradients across isolated rat small intestine.

The effect of insulin on the transport of sodium and potassium in rat soleus muscle.

2,4,5-trichlorophenol, a new urinary metabolite of hexachlorobenzene.

The role of metabolic energy in the lethal action of basic proteins on *Candida albicans*.

Iron uptake by immature erythroid cells. Mechanism of dependence on metabolic energy.

Pleiotropic mutants of *Aspergillus nidulans* altered in carbon metabolism.

Ribosome metabolism in hormone-treated Jerusalem artichoke tuber slices in the absence and presence of 5-fluorouracil.

Influence of carbohydrates on quantitative aspects of growth and embryo formation in wild carrot suspension cultures.

Opioid peptides (endorphins) in pituitary and brain.

Studies on the partial synthesis of protein analogs by direct coupling to terminal homoserine lactone derivatives. Experiments with basic pancreatic trypsin inhibitor.

Identification of drugs, drug metabolites, and other compounds in urine by permethylation and gas-phase analysis.

Conidiogenesis and secondary metabolism in *Penicillium urticae*.

Afterdischarge on postganglionic sympathetic nerves following repetitive stimulation of the preganglionic nerve to the rat superior cervical ganglion in vitro.

Further compounds from the pedal gland of the bontebok (*Damaliscus dorcas dorcas*).

Recent state of lindane metabolism.

Effect of various reagents on the susceptibility of target cells to the cytotoxicity of guinea pig lymphotoxin (GLT).

Extramitochondrial protein synthesis in calf brain synaptosomes.

Identification of glucuronide metabolites of benzomorphan narcotic analgesic drugs in bile from the isolated perfused rat liver by gas chromatography and mass spectrometry.

Tumorigenic effect of 3-amino-1H-1,2,4-triazole on rat thyroid.

Paraquat toxicity: proposed mechanism of action involving lipid peroxidation.

[Paraquat poisoning (author's transl)].

[Chloracne, porphyria cutanea tarda, and other poisonings due to the herbicides].

Letter: Paraquat poisoning.

[Chloroderivatives of phenoxyacetic acid as antagonists of thyroid hormones].

Paraquat revisited.

Interaction of paraquat with the pulmonary microsomal fatty acid desaturase system.

Poisoning by paraquat (with reference to R v Roberts & Kenyon).

Significance of metabolic patterns in teratogenic testing for food safety.

Metabolism of [1-(14)C] and [2-(14)C] leucine in cultured skin fibroblasts from patients with isovaleric acidemia. Characterization of metabolic defects.

Metabolism of atrazine by the chicken.

The use of deuterated analogs in qualitative and quantitative investigations of the metabolism of cyclophosphamide (NSC-26271).

Comparative pharmacologic study in vitro and in vivo with cyclophosphamide (NSC-26271), cyclophosphamide metabolites, and plain nitrogen mustard compounds.

Biologic activity of two derivatives and six possible metabolites of cyclophosphamide (NSC-26271).

Two stable Fenton oxidation products of cyclophosphamide (NSC-26271) as precursors of 4-hydroxycyclophosphamide (NSC-196562) under physiologic conditions.

Effects of selected herbicides and plant hormones on *Prototheca wickerhamii*.

[Intestinal elimination of uremic metabolites by the adsorbents].

Sequential histopathologic, hematologic, and blood chemistry changes induced in mice by a technical and a purified preparation of 2,4,5-trichlorophenoxyacetic acid.

Biochemical pathology of lung damage produced by chemicals.

Cellular metabolic control by chemical modification of cell membrane.

Degradation and metabolism of Drepamon in rice and barnyard grass.

Translocation and metabolic fate of monosodium methanearsonic acid in wheat (*Triticum aestivum* L).

Formation of mutagenic N-nitroso compounds from the pesticides prometryne, dodine and carbaryl in the presence of nitrite at pH 1.

Metabolism of 2,4-dichlorophenoxyacetic acid. 10. Identification of metabolites in rice root callus tissue cultures.

Metabolism of the herbicide methazole in lactating cows and laying hens.

Metabolism of 2,4-dichlorophenoxyacetic acid. IX. Gas-liquid chromatography of methyl esters of amino acid conjugates.

Residues of atrazine (2-chloro-4-ethylamino-6-isopropylamino-s-triazine) and its metabolites in chicken tissues.

Metabolism in human embryonic lung cell cultures of three phenylurea herbicides: chlorotoluron, fluometuron, and metobromuron.

Metabolism of a new herbicide, tebuthiuron (1-[5-(1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl]-1,3-dimethylurea), in mouse, rat, rabbit, dog, duck, and fish.

Localization of platelet prostaglandin production in the platelet dense tubular system.

Metabolism of 2,4-dichlorophenoxyacetic acid. 8. Gas-liquid chromatography of trimethylsilyl derivatives of amino acid conjugates.

Evaluation of redox state of isolated perfused rat lung.

[The metabolic interactions between *Paramecium bursaria* Ehrbg. and *Chlorella spec.* in the *Paramecium bursaria*-symbiosis. I. The nitrogen and the carbon metabolism (author's transl)].

A study of inhalation of pentachlorophenol by rats. IV. Distribution and excretion of inhaled pentachlorophenol.

Purification and partial characterization of nonspecific lipase from rat pancreas.

Studies on the toxicology of hexachlorobenzene. II. Identification and determination of metabolites.

A simple system to simultaneously measure volatilization and metabolism of pesticides from soils.

Interaction of pesticide chemicals. Effect of Eptam and its antidote on the uptake and metabolism of (14C)phorate in corn plants.

[The effect of antimycotic drugs on porphyrin metabolism].

Variety of 2,4-D metabolic pathways in plants; its significance in developing analytical methods for herbicides residues.

Effect of crotonaldehyde on the metabolism of *Candida utilis* during the production of single cell protein from ethanol.

[Effect of 6-hydroxydopamine on mouse adrenal modulla with simultaneous inhibition of catalase with aminotriazole].

Some aspects of the mode of action and metabolism of orthonil in plants.

The metabolism of lindane and its metabolites gamma-2,3,4,5,6-pentachlorocyclohexene, pentachlorobenzene, and pentachlorophenol in rats and the pathways of lindane metabolism.

High uptake in the erythrocytes and the spleen of the quaternary dipyridylum salt paraquat injected intravenously in hypotonic solutions.

Immunologic response and factors affecting its assessment.

Thyroid hormone action on mitochondria. IV. Redox states of intrinsic pyridine nucleotides in hypothyroidism, and influence of L-thyroxine.

[Estrogen receptor in human endometrium--energy requirement, stability and subunit structure--(author's transl)].

Effect of hypothyroidism on responsiveness to beta-adrenergic stimulation.

Effects of anoxia and metabolic inhibitors on reaction of the fast sodium system.

Cell-free synthesis of a large translation product of prolactin messenger RNA.

Characterization of amyloid fibril proteins from medullary carcinoma of the thyroid.

Luft's disease. Further biochemical and ultrastructural studies of skeletal muscle in the second case.

[Influence of uncoupling agents on the capacity of transaminase in kidney and pancreas].

Hematologic abnormalities following gastric resection.

Value of urinary simple phenol and indican determinations in the diagnosis of the stagnant loop syndrome.

Toxicity of methyl bromide and other gaseous insecticides to *Triatoma infestans*.

Antidiuretic peptide in mammalian choroid plexus.

Appearance of magnesium guanylate cyclase activity in rat liver with sodium azide activation.

Calcium metabolism and amylase release in rat parotid acinar cells.

Effects of metabolic inhibitors and ouabain on static afferent discharges from the isolated frog muscle spindle.

Perinatal development of conjugative enzyme systems.

Ca²⁺ -uptake into noradrenaline-storing granules of bovine splenic nerves.

Ammonium uptake and metabolism by nitrogen fixing bacteria. II. *Klebsiella pneumoniae*.

Study of the intestinal tyrosine metabolism using stable isotopes and gas chromatography-mass spectrometry.

[Primary structure of cyanogen bromide fragments of sei whale (*Balaenoptera borealis*) pituitary somatotropin].

Pentose cycle activity of the isolated perfused rat lung.

Barium accumulation in rat pancreatic B cells.

[Effect of various metabolic poisons on the nature of contraction of the straight muscle of the abdomen of frog].

A quantitative description of the extension and retraction of surface protrusions in spreading 3T3 mouse fibroblasts.

Ca⁺⁺ fluxes in isolated cells of rat pancreas. effect of secretagogues and different Ca⁺⁺ concentrations.

Hepatic and extrahepatic metabolism of ¹⁴C-styrene oxide.

15-Azasteroid blockage of cell permeability and mitochondrial respiration.

¹²⁵I-labeled human epidermal growth factor. Binding, internalization, and degradation in human fibroblasts.

Replacement of a chlorine with a methylsulfonyl group in the metabolism of propachlor (2-chloro-N-isopropylacetanilide).

Saturation kinetics of sodium efflux across isolated frog skin.

Protein synthesis in salivary glands of *Drosophila hydei* after experimental gene induction.

Chemical reactivity of metallic copper in a model system containing biological metabolites.

Use of preformed cell aggregates and layers to measure tissue-specific differences in intercellular adhesion.

[Absorption, distribution, excretion and metabolism of a basic ether compound (R97) with antispasmodic activity].

Homocysteine thiolactone metabolism in malignant cells.

The effect of catecholamines on the influx of calcium and the development of tension in denervated mouse diaphragm muscle.

Stimulation of rat lung metabolism with 2,4-dinitrophenol and phenazine methosulfate.

Exocytosis in secretory cells of rat lacrimal gland. Peroxidase release from lobules and isolated cells upon cholinergic stimulation.

The respiratory metabolism of *Mycobacterium lepraemurium*.

Stereospecific, high affinity binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin by hepatic cytosol. Evidence that the binding species is receptor for induction of aryl hydrocarbon hydroxylase.

Characteristics of acetaldehyde oxidation in rat liver mitochondria.

[Effect of thyroxine and 2,4-dinitrophenol on cardiac energetics].

Vitamin K₂ absorption by rat everted small intestinal sacs.

Distribution of a lanthanide (¹⁴⁷Pm) in vascular smooth muscle.

Compartmentalization and movement of calcium in the thyroid.

Comparison of uptake and binding of disodium cromoglycate and phenol red in rat lung.

Metabolic requirements for interactions between nuclear and cytoplasmic membranes in the repair of damaged *Amoeba* nuclei.

Active sodium uptake by the skin of foetal sheep and pigs.

Percutaneous penetration and metabolism of topical (¹⁴C)flutamide in men.

Detection of immunologically active zones in equine growth hormone.

Phosphorylation of cardiac myofibrillar proteins.

Studies on phosphate transport in *Escherichia coli*. II. Effects of metabolic inhibitors and divalent cations.

Bovine pancreatic lipase. II. Stability and effect of activators and inhibitors.

[Increase of brain serotonin and its metabolite in rats caused by meclofenoxate].

A study of the mechanism of transport of diphenylhydantoin in the rat submaxillary gland in vitro.

The dependence of specific nuclear binding of glucocorticoids by rat thymus cells on cellular ATP levels.

Studies on the metabolism of isopropamide (NSC-109724) in man.

The problem of oncotoxic specificity of cyclophosphamide (NSC-26271): Studies on reactions that control the alkylating and cytotoxic activity.

The end products of the metabolism of aromatic amino acids by *Clostridia*.

The metabolism of higher chlorinated benzene isomers.

Metabolism of resorcinolic compounds by bacteria: orcinol pathway in *Pseudomonas putida*.

Cytochemical localization of endogenous peroxidase activity in renal medullary collecting tubules and papillary mucosa of the rat.

[Raffinose metabolism in *Gluconobacter oxydans*].

Aspects of intestinal folate transport in the rat.

The mutagenicity of chloroethylene oxide, chloroacetaldehyde, 2-chloroethanol and chloroacetic acid, conceivable metabolites of vinyl chloride.

Synthesis of some 1, 8- and 2, 8-disubstituted derivatives of adenosine cyclic 3', 5'-phosphate and their interaction with some enzymes of cAMP metabolism.

Transport of organic cations and anions by choroid plexus.

[Dinitroorthocresol dissociation of oxidative phosphorylation in the rat liver perfused in situ].

Afferent neural pathway in the regulation of cardiopulmonary responses to tissue hypermetabolism.

The influence of adenine nucleotides and oxidizable substrates on triethyltin-mediated chloride uptake by rat liver mitochondria in potassium chloride media.

Effect of Benzyladenine, 2,4-Dichlorophenoxyacetic Acid, and d-Glucose on myo-Inositol Metabolism in *Acer pseudoplatanus* L. Cells Grown in Suspension Culture.

Methods to assess reproductive effects of environmental chemicals: studies of cadmium and boron administered orally.

Modification of in vivo lacrimal gland secretion by 2,4-dinitrophenol.

Active transport of phenol red by rat lung slices.

Uptake and efflux of succinic acid by uninduced mycelium of *Claviceps purpurea*.

Purification, characterization, and partial amino acid sequence of nerve growth factor from cobra venom.

Valinomycin inhibition of the inward slow current of cardiac muscle.

Pancreatic metabolic rate measured in vivo with heat-accumulation technique.

Glutamate metabolism in rat kidney mitochondria.

Second antibody chemically linked to cellulose for the separation of bound and free hormone: an improvement over soluble second antibody in gonadotrophin radioimmunoassay.

Metabolism of nitrophenols by bacteria isolated from parathion-amended flooded soil.

The significance of ¹²⁵I as a tracer for lymphocytes, liver cells and erythrocytes after iodination by the lactoperoxidase-H₂O₂ technique.

Calcium-activated ATPase activity in a plasma membrane-rich preparation of rat pancreas.

Differential histamine release by dextran and the ionophore A23187: the actions of inhibitors.

The effects of antipyretics on metabolism processes in rat liver mitochondria. Part I. The action of sodium salicylate, and pyrazolones on the reaction of respiratory chain.

[Metabolism of 3-amino-1,2,4-triazole in rats].

Pulmonary interstitial fibrosis from paraquat in the hamster.

Lipid peroxidation: a possible mechanism for paraquat toxicity.

Metabolism of 2,4-dichlorophenoxyacetic acid. VII. Comparison of metabolites from five species of plant tissue cultures.

Reversible vacuolar changes in the rat pancreatic acinar cells induced by tebuthiuron.

Irritancy of cyclophosphamide-derived aldehydes (acrolein, chloracetaldehyde) and their effect on lymphocyte distribution in vivo: protective effect of thiols and bisulphite ions¹.

Cytotoxic aspects of the interaction of ascorbic acid with alloxan and 6-hydroxydopamine.

Metabolism of formate in the rat.

Metabolism of (4-¹⁴C)estradiol by 7,12-dimethylbenz(a) anthracene-induced mammary tumor peroxidase.

Pulmonary effects of paraquat in the first day after injection.

Effect of chronic alcohol consumption on ethanol and acetaldehyde metabolism.

Sulphate uptake and metabolism in the chrysoomonad, *monochrysis lutheri*.

Metabolic fate of perfludone herbicide in a lactating cow.

Metabolic studies with dinitramine.

Propanil (3,4-dichloropropionanilide)-induced methemoglobin formation in relation to its metabolism in vitro.

Residues of chlorophenoxy acid herbicides and their phenolic metabolites in tissues of sheep and cattle.

Metabolism of 2-chloro-4-cyclopropylamino-6-isopropylamino-s-triazine (cyprazine) in the rat.

Metabolism of dichlobenil by microorganisms in the aquatic environment.

Analysis for herbicides and metabolites.

The effect of the herbicide 2,4,5 trichlorophenoxy acetic acid (245T) on the growth and metabolism of *Tetrahymena pyriformis*.

Metabolism of siduron in kentucky bluegrass (*Poa pratensis* L.).

Mechanism of in vivo carbon tetrachloride-induced liver microsomal cytochrome P-450 destruction.

Herbicide metabolism by glutathione conjugation in plants.

[Hydrogenase activity in *Thiocapsa roseopersicina* according to the D₂--H₂O metabolic reaction].

Gas-liquid chromatographic determination of sencor (metribuzin) and its major metabolites and photoproduct.

Oxygen and phosphate metabolism of bluegill liver mitochondria in the presence of some pesticides.

Localization and metabolites of aminotriazines and chlorophenoxyacetic acid in cucumber (*Cucumis sativus*, L.).

Degradation and metabolism of fluchloralin in soil.

The metabolism of Diquat in hens and residues in eggs and tissues.

Metabolic fates of herbicides in animals.

The role of hydrogen peroxide production and catalase in hepatic ethanol metabolism.

[Identification of metabolites and metabolism of hexachlorobenzene in a mold culture].

Increased susceptibility to bacterial infection as a sequela of exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Ionophore A-23187 induced histamine release from rat mast cells and rat basophil leukemia (RBL-1) cells.

Experimental mitochondrial myopathy produced by in vivo uncoupling of oxidative phosphorylation.

Anti-insulin serum coupled to Sepharose 4B as a tool for the investigation of insulin biosynthesis in the B-cells of obese hyperglycemic mice.

Tissue distribution, excretion and biological effects of [¹⁴C]tetrachlorodibenzo-p-dioxin in rats.

Reduced beta-adrenergic responsiveness in hypothyroid rats.

The effect of fatty acids and ketone bodies on the biosynthesis of insulin in isolated pancreatic islets of obese hyperglycemic mice.

A comparative study of inner membrane enzymes and transport systems in mitochondria from R3230AC mammary tumor and normal rat mammary gland.

Energy requirements for the uptake of L-leucine by *Saccharomyces cerevisiae*.

Basement membranes: structural and biosynthetic considerations.

Hepatic mitochondrial function in ketogenic states. Diabetes, starvation, and after growth hormone administration.

[Peroxidase activity of neutrophil granules in two cases of congenital myeloperoxidase deficiency].

Decreased 6-mercaptopurine retention by two resistant variants of mouse neuroblastoma with normal hypoxanthine-guanine-phospho-ribosyltransferase activities.

Chemical modulation of diphtheria toxin action on cultured mammalian cells.

A model of age-dependent tissue calcification based on 2,4-Dinitrophenol induced deposition of calcium in earcartilage.

Ethanol metabolism and liver oxidative capacity in cold acclimation.

Studies on choline permeation through the plasma membrane and its incorporation into phosphatidyl choline of Ehrlich-Lettrã©-ascites tumor cells in vitro.

Studies of the regulation of purine nucleotide catabolism.

Cardiac metabolism and electromechanics of human heart.

Dehydrogenase activity of liver parenchyma in mice exposed to arsenic in drinking water.

A further investigation into the energy dependence of angiotensin II-induced contractions of isolated smooth muscle preparations.

Rate-limiting steps in ethanol metabolism and approaches to changing these rates biochemically.

A new inhibitor of coupled oxidative phosphorylation, 5-hydroxynaphthalenedicarboxylic anhydride, a derivative of a carcinogenic polynuclear hydrocarbon.

A correlative study of the experimental cardiac dynamics and myocardial energy metabolism.

The biological fate in rats of vinyl chloride in relation to its oncogenicity.

Metabolism of phenol and cresols by *Bacillus stearothermophilus*.

The involvement of receptro sulphhydryl groups in the binding of steroids to the cytoplasmic glucocorticoid receptor from rat thymus.

Chromatographic methods for the analysis of hexachlorobenzene and possible metabolites in monkey fecal samples.

Microperoxisomes in retinal pigment epithelium.

Metabolic inhibition and adrenoceptor interconversion.

Patulin biosynthesis: the metabolism of m-hydroxybenzyl alcohol and m-hydroxybenzaldehyde by particulate preparations from *Penicillium patulum*.

Human pituitary growth hormone: a biologically active hendekakaihekaton peptide fragment corresponding to amino-acid residues 15-125 in the hormone molecule.

Significant pathways of hepatic ethanol metabolism.

The effect of 2, 4-dinitrophenol on the growth of *Bordetella pertussis* in chick tracheal organ culture.

Oxygen and cyclic nucleotides in human umbilical artery.

The disturbance of oxidative phosphorylation by N-acetoxy-N-acetyl-2-aminofluorene, a model ultimate carcinogen.

Respiratory effects of H⁺ and dinitrophenol injections into the brain stem subarachnoid space of fetal lambs.

Hepatic microsomal alcohol-oxidizing system. Affinity for methanol, ethanol, propanol, and butanol.

Some features of hydrogen (ion) secretion by the frog skin.

Hydroperoxide-metabolizing systems in rat liver.

Amino acid sequence of a presynaptic neurotoxin from the venom of *Notechis scutatus scutatus* (Australian tiger snake).

Mutagenesis of certain activated carcinogens in vitro associated with genetically mediated increases in monooxygenase activity and cytochrome P 1-450.

Effect of metabolic inhibitors on bone lipid synthesis from radioactive bases.

Guinea pig proinsulin. Primary structure of the C-peptide isolated from pancreas.

Immunochemical demonstration of increased accumulation of ornithine carboxylase in rat liver after partial hepatectomy and growth hormone induction.

Thromboxanes: a new group of biologically active compounds derived from prostaglandin endoperoxides.

The amino acid sequence of human chorionic gonadotropin. The alpha subunit and beta subunit.

Growth hormone covalently bound to sepharose or glass. Analysis of ligand release rates and characterization of soluble radiolabeled products.

Antibody-dependent cell-mediated cytotoxicity in humans. II. Energy requirement.

Bovine adrenal medullary chromogranin A: studies on the structure and further evidence for identity with dopamine-beta-hydroxylase subunit.

Leucine transport in *Escherichia coli*. The resolution of multiple transport systems and their coupling to metabolic energy.

Mitochondria and polarity in the egg of *Smittia spec.* (Diptera, Chironomidae): UV irradiation, respiration measurements, ATP determination and application of inhibitors.

Interactions of microtubule disorganizers, plant hormones, and red light in wheat coleoptile segment growth.

[Catecholamine content and electrolyte balance of the rabbit myocardium during poisoning with 2,4-dinitrophenol].

Effect of anaerobiosis, dinitrophenol and fluoride on the active intestinal transport of galactose in snail.

Reversible inactivation of pancreatic deoxyribonuclease A by sodium dodecyl sulfate. Removal of COOH-terminal residues from the denatured protein by carboxypeptidase A.

Metabolism of resorcinolic compounds by bacteria. Purification and properties of orcinol hydroxylase from *Pseudomonas putida* 01.

Xenon accumulation in the red blood cell. A process latered by suppressors of the membrane active transport function.

The methionine-containing subfraction of F1 histone from rat tissues.

Acetylcholine receptor turnover in membranes of developing muscle fibers.

Energy dependence of urinary bicarbonate secretion in turtle bladder.

Lymphocyte subpopulations. Human red blood cell rosettes.

Regulation of phospholipid metabolism in differentiating cells from rat brain cerebral hemispheres in culture. I. Uptake and phosphorylation of [U-14C]ethanolamine and the effect of various inhibitors.

Studies on the common active site of growth hormone. Revision of the amino acid sequence of an active fragment of bovine growth hormone.

Mitochondria from human term placenta. II. Characterization of respiratory pathways and coupling mechanisms.

Human, rat and mouse liver-mediated mutagenicity of vinyl chloride in *S. typhimurium* strains.

Studies on the biosynthesis of isocoumarins in carrot root tissues : induction by substances other than ethylene and effects of metabolic inhibitors.

Effects of chronic ethanol treatment and thyroxine administration on ethanol metabolism and liver oxidative capacity.

Induction and suppression of hepatic and extrahepatic microsomal foreign-compound-metabolizing enzyme systems by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Nucleotide metabolism in *Drosophila melanogaster* salivary glands during temperature and dinitrophenol-induced puffing.

Adenosine triphosphate dependent calcium uptake by subcellular fractions from bovine neurohypophyses.

Hormonal influences in the development of the hypermetabolic state of the liver produced by chronic administration of ethanol.

Haemoglobin G Norfolk: alpha 85 (F6) Asp leads to Asn.

The relationship between the transport of glucose and cations across cell membranes in isolated tissues. IX. The role of cellular calcium in the activation of the glucose transport system in rat soleus muscle.

Analysis of the diazinon metabolites G 27550 and GS 31144 by gas-liquid chromatography with nitrogen-specific detection after derivatization.

Microbodies and an anomalous "microcylinder" in the ultrastructure of plants with Crassulacean acid metabolism.

[Endogenous variations of productivity in *Scenedesmus acutus* and their relation to the nucleic acid metabolism].

Effects of magnesium ion and temperature on the phasic and tonic contractions of the potassium contracture in the pregnant rat myometrium.

Metabolism of terbacil in orange seedlings.

The influence of metabolic inhibitors upon the transmembrane slow inward current in the mammalian ventricular myocardium.

[Accumulation of p-aminohippuric acid and cyclopentiazide in renal cortex slices from rats of various ages and their dependence on the energy supply].

Technique for the identification of a biosynthetic precursor to parathyroid hormone.

Influence of chlorazine and thiopental on the accumulation of iodine-131 in the thyroid gland of white rats.

Cholesterol metabolism by *Mycobacterium*.

In vitro binding of L-triiodothyronine to receptors in rat liver nuclei. Kinetics of binding, extraction properties, and lack of requirement for cytosol proteins.

Urinary metabolites from gamma- and beta-BHC in the mouse: chlorophenol conjugates.

Biodegradation of alpha-hexachlorocyclohexane. V. Characterization of the major urinary metabolites.

Isolation and identification of propham (isopropyl carbanilate) metabolites from animal tissues and milk.

Absorption, translocation, and metabolism of metribuzin (BAY-94337) in sugarcane.

Metabolic transformations of disugran by rumen fluid of sheep maintained on dissimilar diets.

Metabolism of the herbicide pronamide in soil.

Dose-dependent sympathomimetic and cardioinhibitory effects of acrolein and formaldehyde in the anesthetized rat.

Glycol methacrylate embedding in enzyme histochemistry: application to arthropode tissue incubated for demonstration of unspecific esterase and succinic dehydrogenase activity.

Metabolism of 2,4-dichlorophenoxyacetic acid. VI. Biological properties of amino acid conjugates.

Ametryne metabolite in transpired-guttated water from sugarcane shoot.

Effects of N,N-diallyl-2,2-dichloroacetamide on ethyl N,N-di-n-propylthiocarbamate uptake and metabolism by corn seedlings.

Uptake and metabolism of dichlobenil by emerged aquatic plants.

Metabolism of the herbicide methazole (2-(3,4-dichlorophenyl)-4-methyl-1,2,4-oxadiazolidine-3,5-dione) in rats.

[Metabolism of 4-(2,4,5-trichlorophenoxy)-butyric acid in rats (author's transl)].

[Metabolism of 2,4,5-T and 2,4-D in rats and mice (author's transl)].

[Effect of linuron and chlortoluron in short-term chronic experiment on young rats on the hexobarbital metabolism and activity of some liver enzymes].

Carcinogenic effect of 100, 250 and 500 rad X-rays on the rat thyroid gland.

Dinitrophenol and bioenergetics: an historical perspective.

Initial studies with a line of radioresistant rat tumor cells.

The effects of hypothyroidism and 2,4-dinitrophenol on growth hormone synthesis.

Action of cytochalasin D on cells of established lines. I. Early events.

Removing substances from blood by affinity chromatography. I. Removing bilirubin and other albumin-bound substances from plasma and blood with albumin-conjugated agarose beads.

The amino-acid sequence of the amino-terminal 37 residues of human parathyroid hormone.

Suppression of cellular immunity in rats and mice by maternal treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The effect of tonicity and metabolic inhibitors on respiration and ripening of avocado fruit slices.

Evidence for active Phloem loading in the minor veins of sugar beet.

A beta-MSH in the pituitary gland of the spotted dogfish (*Scyliorhinus canicula*): isolation and structure.

Uroporphyrin formation induced by chlorinated hydrocarbons (lindane, polychlorinated biphenyls, tetrachlorodibenzo-p-dioxin). Requirements for endogenous iron, protein synthesis and drug-metabolizing activity.

[Metabolic shifts in workers manufacturing elementary bromine and its compounds (bromine salts and methyl bromide)].

Reaction of human chorionic somatomammotropin and human pituitary growth hormone with tetranitromethane at 0 degrees C.

Transport of rubidium and sodium in pancreatic islets.

Development and reversibility of pancreatic acinar cell changes in the rat produced by tebuthiuron (1-(5-tert-butyl-1,3,4-thiadiazol-2-yl)-1,3-dimethylurea).

Transport of taurine by normal human blood platelets.

Pseudomonas putida mutants defective in the metabolism of the products of meta fission of catechol and its methyl analogues.

The secretion of alkali metal ions by the perfused cat pancreas as influenced by the composition and osmolality of the external environment and by inhibitors of metabolism and Na⁺, K⁺-ATPase activity.

Bovine adrenal medullary dopamine-beta-hydroxylase: studies on the structure.

The Metabolism of Oat Leaves during Senescence: I. Respiration, Carbohydrate Metabolism, and the Action of Cytokinins.

Pre-parathyroid hormone: a direct translation product of parathyroid messenger RNA.

The search for the active core of pituitary growth hormone.

Metabolic and ionic requirements for the axoplasmic transport of dopamine beta-hydroxylase.

Control of membrane N^+ permeability in a hyperpolarizing photoreceptor: similar effect of light and metabolic inhibitors.

Activation of ethanol metabolism by 2,4-dinitrophenol in the isolated perfused rat liver.

Immunologic properties of Aalpha chain of human fibrinogen.

The reaction of cyanogen bromide with S-methylcysteine: fragmentation of the peptide 14-29 of bovine pancreatic ribonuclease A.

Studies on the disulfide bonds of glycoprotein hormones. Locations in the alpha chain based on partial reductions and formation of ^{14}C -labeled S-carboxymethyl derivatives.

Histone and casein kinases of lactating bovine mammary gland.

Characterization of cadmium uptake by plant tissue.

Histones of *Drosophila* embryos. Electrophoretic isolation and structural studies.

Photoaffinity labeling of peptide hormone binding sites.

Requirement for adenosine triphosphate for stimulation in vitro of ox growth-hormone release.

Perturbation of leukocyte metabolism by nonphagocytosable concanavalin A-coupled beads.

The accumulation of adenosine in rabbit intestinal muscle.

Uptake of nitrite by *Neurospora crassa*.

Nitrate transport system in *Neurospora crassa*.

Partial amino acid sequence of two new arginine-serine rich histones from male gonads of the sea urchin (*Parechinus angulosus*).

Chemical modification of lysine residues in ovine luteinizing hormone. Effect on biological activity.

Structure of the porcine vasoactive intestinal octacosapeptide. The amino-acid sequence. Use of kallikrein in its determination.

Regulation of hexose phosphate metabolism in *Acetobacter xylinum*.

Fluxes of a nonelectrolyte and compartmentation in cells of carrot root tissue.

[Effect of noradrenaline and 2,4-dinitrophenol on the energetics of muscle contraction].

Chemical studies of histone acetylation. Substrate specificity of a histone deacetylase from calf thymus nuclei.

Comparison of the primary structure of whale pancreatic ribonuclease with ribonuclease A.

Table 2A-8 – Titles of Pubmed Records Related to Musculoskeletal Adverse Events Following Herbicide Exposure

ARTHROPATH; *BURSITIS*; *CARPAL TUNNEL SYNDROME*; *CONNECTIVE TISSUE DISORDERS*; *FIBRODYSPLASIA*; *FIBROMYALGIA*; *FRACTURE*; *GOUT*; *LUPUS ERYTHEMATOSUS*;
--

MUSCLE; *MUSCULAR DYSTROPHY*; *MYASTHENIA*; *MYOSITIS*; *OSTEO*; *PAGET*; *PERTHES*; *RHABDOMYOLYSIS*; *RHEUMAT*; *ROTATOR CUFF*; *SCLEROSIS*; *SHOULDER*; *SJOGREN*; *SKELET*; *SPONDYL*; *SYNOVI*; *TENDON*; *TISSUE*; *WEAKNESS* (9907)

Integrated analysis of ceRNA-miRNA changes in paraquat-induced pulmonary epithelial-mesenchymal transition via high-throughput sequencing.

Adverse effects of 2,4-D dimethylammonium based-herbicide on Acetylcholinesterase expression in Nile tilapia (*Oreochromis niloticus*).

Biological-based techniques for real-time water-quality studies: Assessment of non-invasive (swimming consistency and respiration) and toxicity (antioxidants) biomarkers of zebrafish.

Prometryn exposure disrupts the intestinal health of *Eriocheir sinensis*: Physiological responses and underlying mechanism.

Mitochondrial reactive oxygen species initiate gasdermin D-mediated pyroptosis and contribute to paraquat-induced nephrotoxicity.

Association between urinary glyphosate levels and hand grip strength in a representative sample of US adults: NHANES 2013-2014.

Transcriptomic and behavioral analyses reveal unique target tissues and molecular pathways associated with embryonic exposure to low level glyphosate and metal mixtures in zebrafish.

Exposure to pentachlorophenol destructs the symbiotic relationship between zooxanthellae and host and induces pathema in coral *Porites lutea*.

Agent Orange Herbicidal Toxin-Initiation of Alzheimer-Type Neurodegeneration.

Biochemical and physiological alterations caused by Diuron and Triclosan in mussels (*Mytilus galloprovincialis*).

Analysis of abnormal expression of signaling pathways in PQ-induced acute lung injury in SD rats based on RNA-seq technology.

Long term integrated biomarker responses in freshwater African catfish *Clarias gariepinus* exposed to a new brand of herbicide fluzifop-p-butyl.

Cinnamaldehyde attenuates TNF- α induced skeletal muscle loss in C2C12 myotubes via regulation of protein synthesis, proteolysis, oxidative stress and inflammation.

Exposure to pesticides during pregnancy and the risk of neural tube defects: A systematic review.

An Updated Evaluation of Atrazine-Cancer Incidence Associations among Pesticide Applicators in the Agricultural Health Study Cohort.

Elucidating the mechanisms underlying astrocyte-microglia crosstalk in hippocampal neuroinflammation induced by acute diquat exposure.

Amphibian-derived peptide RL-RF10 ameliorates paraquat-induced pulmonary fibrosis injury.

Prevalence, spatial structure and evolution of resistance to acetolactate-synthase (ALS) inhibitors and 2,4-D in the major weed *Papaver rhoeas* (L.) assessed using a massive, country-wide sampling.

Trp-574-Leu mutation and metabolic resistance by cytochrome P450 gene conferred high resistance to ALS-inhibiting herbicides in *Descurainia sophia*.

ATR induces hepatic lipid metabolism disorder in rats by activating IRE1 \pm /XBP1 signaling pathway.

Mitochondrial DNA is a key driver in cigarette smoke extract-induced IL-6 expression.

Pyroxasulfone Metabolism in Resistant *Lolium rigidum*: Is It All Down to GST Activity?

Non-cytochrome P450 enzyme aldehyde oxidase is involved in the oxidative metabolic pathway of diquat and its detoxification effect.

Robust and bioaffinity-enhanced nanocarrier based immunochromatographic assay with simplified sample preparation for pentachlorophenol sodium in animal tissues.

Disturbed nutrient accumulation and cell wall metabolism in panicles are responsible for rice straighthead disease.

Phytotoxic fungal secondary metabolites as herbicides.

The aryl hydrocarbon receptor in β^2 -cells mediates the effects of TCDD on glucose homeostasis in mice.

Efficacy and safety of six new antiseizure medications for adjunctive treatment of focal epilepsy and epileptic syndrome: A systematic review and network meta-analysis.

Upregulated LncRNA-Meg3 modulates the proliferation and survival of MEPM cells via interacting with Smad signaling in TCDD-induced cleft palate.

Congenital diaphragmatic hernia: phosphodiesterase-5 and Arginase inhibitors prevent pulmonary vascular hypoplasia in rat lungs.

Conjugating uncoupler compounds with hydrophobic hydrocarbon chains to achieve adipose tissue selective drug accumulation.

Regulation of stress granule formation in human oligodendrocytes.

Enrichment and distribution of 3,6-dichlorocarbazole in red crucian carp (*Carassius auratus*) and its hepatotoxicity.

Microbial-influenced pesticide removal co-occurs with antibiotic resistance gene variation in soil-earthworm-maize system.

Investigation of the activity of a novel tropolone in osteosarcoma.

Luteolin Is a Potential Immunomodulating Natural Compound against Pulpal Inflammation.

A conformationally-locked p-hydroxybenzylidene imidazolinone derivative for detecting A β (42) aggregation.

Fungicides as a risk factor for the development of neurological diseases and disorders in humans: a systematic review.

Chemical analysis of wetland plants to evaluate the bioaccumulation and metabolism of hexachlorocyclohexane (HCH).

Chemicals in menstrual products: A systematic review.

Carbon nitride dots do not impair the growth, development, and telomere length of tadpoles.

Both acute glyphosate and the aminomethylphosphonic acid intoxication decreased the acetylcholinesterase activity in rat hippocampus, prefrontal cortex and gastrocnemius muscle.

Behavioral and biochemical consequences after chronic exposition to the herbicide atrazine in tadpoles.

Glyphosate exposure, muscular health and functional limitations in middle-aged and older adults.

Effect of forchlorfenuron and thidiazuron on kiwifruits' internal qualities, optical properties and their relationship during growth.

Identification of novel potential drugs for the treatment and prevention of osteoarthritis.

The exposure in ovo to glyphosate on the integrity of intestinal epithelial tight junctions of chicks.

Loss of flavin-containing monooxygenase 3 modulates dioxin-like polychlorinated biphenyl 126-induced oxidative stress and hepatotoxicity.

Early and transitory hypoactivity and olfactory alterations after chronic atrazine exposure in female Sprague-Dawley rats.

Cellulose biosynthesis inhibitor isoxaben causes nutrient-dependent and tissue-specific Arabidopsis phenotypes.

The BCKDK inhibitor BT2 is a chemical uncoupler that lowers mitochondrial ROS production and de novo lipogenesis.

Influence of triazines and lipopolysaccharide coexposure on inflammatory response and histopathological changes in the testis and liver of BalB/c mice.

Aldo-keto reductase 1B10 as a Carcinogenic but Not a Prognostic Factor in Colorectal Cancer.

Boron Compounds Mitigate 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Induced Toxicity in Human Peripheral Blood Mononuclear Cells.

Immunocytochemical Analysis of Crocin against Oxidative Stress in Trigeminal Sensory Neurons Innervating the Cornea.

Somatic embryogenesis from mature sorghum seeds: An underutilized genome editing recipient system.

Tissue Culture via Protocorm-like Bodies in an Orchids Hybrids Paphiopedilum SCBG Huihuang90.

Effects of Aminomethylphosphonic Acid on the Transcriptome and Metabolome of Red Swamp Crayfish, *Procambarus clarkii*.

Evaluation of *Salvia hispanica* as a Therapeutic Agent against Sodium Arsenic-Induced Testicular Toxicity in a Male Rats Model.

Differential Modulatory Effects of Methylmercury (MeHg) on Ahr-regulated Genes in Extrahepatic Tissues of C57BL/6 Mice.

Zingerone attenuates sciatic nerve damage caused by sodium arsenite by inhibiting NF- κ B, caspase-3, and ATF-6/CHOP pathways and activating the Akt2/FOXO1 pathway.

TRPA1 as a promising target in ischemia/reperfusion: A comprehensive review.

Exploring Metabolic and Gut Microbiome Responses to Paraquat Administration in Male Wistar Rats: Implications for Oxidative Stress.

Transcriptome analysis reveal the effect of freshwater sediments containing 2,3,7,8-tetrachlorodibenzo-p-dioxin on the *Macrobrachium rosenbergii* hepatopancreas, intestine, and muscle.

Distribution, Metabolism, and Excretion of Cenobamate in Adult, Fetal, Neonatal, and Lactating Rats.

The effects of proanthocyanidin on testicular toxicity in rats exposed to a glyphosate-based herbicide.

Serum metabolome and liver transcriptome reveal acrolein inhalation-induced sex-specific homeostatic dysfunction.

Modifying effects of 2,4-D and Glyphosate exposures on gut-liver-adipose tissue axis of diet-induced non-alcoholic fatty liver disease in mice.

Dietary curcumin supplementation alleviates diquat-induced oxidative stress in the liver of broilers.

Impact of Agent Orange Exposure on Non-muscle Invasive Bladder Cancer Outcomes.

Involvement of glyphosate in disruption of biotransformation P450 enzymes and hepatic lipid metabolism in chicken.

Sub-acute toxicity of the herbicide glufosinate-ammonium exposure in adult red swamp crayfish (*Procambarus clarkii*).

Mutagenicity, hepatotoxicity, and neurotoxicity of glyphosate and fipronil commercial formulations in Amazon turtles neonates (*Podocnemis expansa*).

Toxicity assessment and detoxification metabolism of sodium pentachlorophenol (PCP-Na) on marine economic species: a case study of *Moerella iridescens* and *Exopalaemon carinicauda*.

The effects of *Crocus sativus* extract on inhaled paraquat-induced lung inflammation, oxidative stress, pathological changes and tracheal responsiveness in rats.

Molecular mechanism of paraquat-induced ferroptosis leading to pulmonary fibrosis mediated by Keap1/Nrf2 signaling pathway.

Effects of glyphosate exposure on western diet-induced non-alcoholic fatty liver disease in mice.

Glyphosate-based herbicide (GBH) challenged thermoregulation in lizards (*Eremias argus*), compensatory warming could mitigate this effect.

Zinc Oxide Nanoparticles and Vitamin C Ameliorate Atrazine-Induced Hepatic Apoptosis in Rat via CYP450s/ROS Pathway and Immunomodulation.

Voluntary wheel-running improved pulmonary fibrosis by reducing epithelial mesenchymal transformation.

Adverse developmental impacts in progeny of zebrafish exposed to the agricultural herbicide atrazine during embryogenesis.

Dual-Hit: Glyphosate exposure at NOAEL level negatively impacts birth and glia-behavioural measures in heterozygous shank3 mutants.

FAM13A regulates cellular senescence marker p21 and mitochondrial reactive oxygen species production in airway epithelial cells.

Adverse effects of silver nanoparticles on aquatic plants and zooplankton: A review.

Chronic dietary exposure to a glyphosate-based herbicide in broiler hens has long-term impacts on the progeny metabolism.

Toxicological effects of ocular acrolein exposure to eyelids in rabbits in vivo.

Synergistic toxicity of 2,4-dichlorophenoxyacetic acid and arsenic alters biomarkers in rats.

A simulated heat wave-but not herbicide exposure-alters resource investment strategy in an insect.

Transient Receptor Potential Ankyrin 1 (TRPA1) Channel Mediates Acrolein Cytotoxicity in Human Lung Cancer Cells.

Cellular Exposure to Chloroacetanilide Herbicides Induces Distinct Protein Destabilization Profiles.

Spatiotemporal variations of 2,4-dichlorophenoxy acetic acid with the role of sugarcane industry and related human health risk assessments in the Shadegan International Wetland.

Co-exposure of iron oxide nanoparticles with glyphosate herbicides in *Poecilia reticulata*: Fish liver damages is reversible during iron accumulation and elimination period.

Chlorogenic acid protective effects on paraquat-induced pulmonary oxidative damage and fibrosis in rats.

Atrazine exposure can dysregulate the immune system and increase the susceptibility against pathogens in honeybees in a dose-dependent manner.

Intralipid and caffeic acid phenethyl ester reverse the neurotoxic effects of organophosphate poisoning in rats.

Exposure to Agent Orange and Risk of Bladder Cancer Among US Veterans.

[Experimental study on the toxicokinetics and gastrointestinal damage in rats poisoned with acute diquat poisoning at different exposure doses].

Evaluation of nano-curcumin against inhaled paraquat-induced lung injury in rats.

Glyphosate-induced liver and kidney dysfunction, oxidative stress, immunosuppression in Nile tilapia, but ginger showed a protection role.

Nitric oxide-mediated the therapeutic properties of induced pluripotent stem cell for paraquat-induced acute lung injury.

Therapeutic effect of gossypetin against paraquat-induced testicular damage in male rats: a histological and biochemical study.

A mixture of 13 pesticides, contaminants, and food additives below individual NOAELs produces histopathological and organ weight changes in rats.

Adhesion Molecules in Lung Inflammation from Repeated Glyphosate Exposures.

Role of NF- κ B/IL-1 β Pathway and Caspase 3 in Mediating the Hepatoprotective Effect of Rutin against Paraquat-Induced Liver Toxicity in Male Rats.

Therapeutic potential of amitriptyline for paraquat-induced pulmonary fibrosis: Involvement of caveolin-1-mediated anti-epithelial-mesenchymal transition and inhibition of apoptosis.

A novel mechanism of Dimethyl ester of Alpha-ketoglutarate in suppressing Paraquat-induced BEAS-2B cell injury by alleviating GSDME dependent pyroptosis.

A search for acrolein scavengers among food components.

Complex mixtures of pesticides and metabolites modulate the malignant phenotype of murine melanoma B16-F1 cells.

Tannin alleviates glyphosate exposure-induced apoptosis, necrosis and immune dysfunction in hepatic L8824 cell line by inhibiting ROS/PTEN/PI3K/AKT pathway.

The Tobacco Smoke Component, Acrolein, as a Major Culprit in Lung Diseases and Respiratory Cancers: Molecular Mechanisms of Acrolein Cytotoxic Activity.

Cyhalofop-butyl exposure induces the severe hepatotoxicity and immunotoxicity in zebrafish embryos.

Adult exposure of atrazine alone or in combination with carbohydrate diet hastens the onset/progression of type 2 diabetes in *Drosophila*.

Combined toxicity of Cd and 2,4-dichlorophenoxyacetic acid on the earthworm *Eisenia andrei* under biochar amendment.

Does atrazine induce changes in predator recognition, growth, morphology, and metamorphic traits of larval skipper frogs (*Euphyctis cyanophlyctis*)?

Single-cell transcriptome analysis reveals liver injury induced by glyphosate in mice.

Dimethyl fumarate attenuates paraquat-induced pulmonary oxidative stress, inflammation and fibrosis in mice.

The role of AccCDK20 and AccCDKN1 from *Apis cerana cerana* in development and response to pesticide and heavy metal toxicity.

Toxic effects of glyphosate on histopathology and intestinal microflora of juvenile *Litopenaeus vannamei*.

Global warming and glyphosate toxicity (I): Adult zebrafish modelling with behavioural, immunohistochemical and metabolomic approaches.

Mitigating effect of L-carnitine against atrazine-induced hepatotoxicity: histopathological and biochemical analyses in albino rats.

Chitosan nanocomposite as an effective carrier of potential herbicidal metabolites for noteworthy phytotoxic effect against major aquatic invasive weed water hyacinth (*Eichhornia crassipes*).

Human serum lipidomics analysis revealed glyphosate may lead to lipid metabolism disorders and health risks.

HIF-1 α promotes paraquat induced acute lung injury and implicates a role NF- κ B and Rac2 activity.

Exposure, but not timing of exposure, to a sulfonylurea herbicide alters larval development and behaviour in an amphibian species.

Disturbance of cellular calcium homeostasis plays a pivotal role in glyphosate-based herbicide-induced oxidative stress.

Mitochondrial dysfunction due to in vitro exposure to atrazine and its metabolite in striatum.

Synergistic toxicity of ethanol and 2,4-dichlorophenoxyacetic acid enhances oxidant status, DNA damage, inflammation, and apoptosis in rats.

[Protective effect of metformin on pulmonary fibrosis caused by paraquat through activating AMP-activated protein kinase pathway].

Metabolomics analyses of cancer tissue from patients with colorectal cancer.

Study on the therapeutic effect of glucocorticoids on acute kidney injury in rats exposed to diquat.

Acrolein produced by glioma cells under hypoxia inhibits neutrophil AKT activity and suppresses anti-tumoral activities.

Remarkable Recovery in a Patient with Lethal Dose Paraquat Poisoning: A Case Report.

Clinical and pathological characteristics of acute kidney injury caused by diquat poisoning.

Assessment of pulmonary fibrosis induced by paraquat using Al(18)F-NODA-FAPI-04 PET/CT.

Soluble thrombomodulin alleviates Diquat-induced acute kidney injury by inhibiting the HMGB1/ α 1/NF- κ B signalling pathway.

Glyphosate Causes Vascular Toxicity through Cellular Senescence and Lipid Accumulation.

Glyphosate potentiates insulin resistance in skeletal muscle through the modulation of IRS-1/PI3K/Akt mediated mechanisms: An in vivo and in silico analysis.

TRPA1 deficiency aggravates dilated cardiomyopathy by promoting S100A8 expression to induce M1 macrophage polarization in rats.

Trehalose prevents glyphosate-induced hepatic steatosis in roosters by activating the Nrf2 pathway and inhibiting NLRP3 inflammasome activation.

Legacy pollutants in fractured aquifers: Analytical approximations for back diffusion to predict atrazine concentrations under uncertainty.

[Effect of pirfenidone on paraquat-induced pulmonary fibrosis in rats].

[Effects of Nintedanib associated with Shenfu Injection on paraquat-induced lung injury in rats].

Organotin and organochlorine toxicants activate key translational regulatory proteins in human immune cells.

Dietary cinnamaldehyde improves muscle protein content by promoting muscle fiber growth via PTP1B/IGF1/PI3K/AKTs-TOR/FOXO3a signaling pathway in grass carp (*Ctenopharyngodon idella*).

Small-Molecule Cyanamide Pan-TEAD-YAP1 Covalent Antagonists.

Selenium-dependent glutathione peroxidase 1 regulates transcription of elongase 3 in murine tissues.

Roundup® disrupts tissue architecture, attenuates Na(+)/K(+)-ATPase expression, and induces protein oxidation/nitration, cellular apoptosis, and antioxidant enzyme expressions in the gills of goldfish, *Carassius auratus*.

The effects of glyphosate-based herbicide on the hypothalamic-pituitary thyroid axis are tissue-specific and dependent on age exposure.

Assessment of ACC and P450 Genes Expression in Wild Oat (*Avena ludoviciana*) in Different Tissues Under Herbicide Application.

Fitness assessment of *Mytilus galloprovincialis* Lamarck, 1819 after exposure to herbicide metabolite propachlor ESA.

Effects of plant growth regulators and sucrose on proliferation and quality of embryogenic tissue in *Picea pungens*.

Multiple Metabolic Enzymes Can Be Involved in Cross-Resistance to 4-Hydroxyphenylpyruvate-Dioxygenase-Inhibiting Herbicides in Wild Radish.

Tracking Targets of Dynamic Super-Enhancers in Vitro to Better Characterize Osteoclastogenesis and to Evaluate the Effect of Diuron on the Maturation of Human Bone Cells.

Metabolomic Responses of Lettuce (*Lactuca sativa*) to Allelopathic Benzoquinones from *Iris sanguinea* Seeds.

Dose-dependent inhibitory effects of glyphosate on invasive *Pomacea canaliculata* reproductive and developmental growth under oxidative deposition.

Cyhalofop-butyl and pyribenzoxim-induced oxidative stress and transcriptome changes in the muscle of crayfish (*Procambarus clarkii*).

Molecular Characteristics of Toxicity of Acrolein Produced from Spermine.

Endogenous auxin maintains embryonic cell identity and promotes somatic embryo development in *Arabidopsis*.

Chaenomeles sinensis polysaccharide and its carboxymethylated derivative alleviate dextran sulfate sodium-induced ulcerative colitis via suppression of inflammation and oxidative stress.

Inflammation and cardiometabolic diseases induced by persistent organic pollutants and nutritional interventions: Effects of multi-organ interactions.

Environmental Toxicant Exposure Paralyzes Human Placental Macrophage Responses to Microbial Threat.

Nephroprotective effect of diosmin against sodium arsenite-induced renal toxicity is mediated via attenuation of oxidative stress and inflammation in mice.

Arsenic induces metabolome remodeling in mature human adipocytes.

Metformin alleviates sodium arsenite-induced hepatotoxicity and glucose intolerance in mice by suppressing oxidative stress, inflammation, and apoptosis.

Untargeted metabolomics reveals dynamic changes in metabolic profiles of rat supraspinatus tendon at three different time points after diabetes induction.

Copper-Loaded Nanoheterojunction Enables Superb Orthotopic Osteosarcoma Therapy via Oxidative Stress and Cell Cuproptosis.

Incorporating Uremic Solute-mediated Inhibition of OAT1/3 Improves PBPK Prediction of Tenofovir Renal and Systemic Disposition in Patients with Severe Kidney Disease.

Maternal serum dioxin-like activity and gestational age at birth and indices of foetal growth: The Aarhus birth cohort.

Postictal hypoxia involves reactive oxygen species and is ameliorated by chronic mitochondrial uncoupling.

Effects of Remimazolam on Intracellular Calcium Dynamics in Myotubes Derived from Patients with Malignant Hyperthermia and Functional Analysis of Type 1 Ryanodine Receptor Gene Variants.

A Novel Quinazoline Derivative Prevents and Treats Arsenic-Induced Liver Injury by Regulating the Expression of RecQ Family Helicase.

A *Cryptosporidium parvum* vaccine candidate effect on immunohistochemical profiling of CD4(+), CD8(+), Caspase-3 and NF- κ B in mice.

Exposure to bromoxynil octanoate herbicide induces oxidative stress, inflammation, and apoptosis in testicular tissue via modulating NF- κ B pathway.

Human Preadipocytes Differentiated under Hypoxia following PCB126 Exposure during Proliferation: Effects on Differentiation, Glucose Uptake and Adipokine Profile.

2,3,7,8-tetrachlorodibenzo-p-dioxin induces multigenerational testicular toxicity and biosynthetic disorder of testosterone in BALB/C mice: Transcriptional, histopathological and hormonal determinants.

Development and comparative analysis of initiation ability in large-scale Heuchera propagation using tissue culture versus cuttings.

Persistent organic pollutants promote aggressiveness in prostate cancer.

Alternations in interleukin-1 β and nuclear factor kappa beta activity (NF- κ B) in rat liver due to the co-exposure of Cadmium and Arsenic: Protective role of curcumin.

Non-Cardiotoxic Tetradecanoic Acid-2,4-Dinitrophenol Ester Nanomicelles in Microneedles Exert Potent Anti-Obesity Effect by Regulating Adipocyte Browning and Lipogenesis.

Uremic Toxins Induce THP-1 Monocyte Endothelial Adhesion and Migration through Specific miRNA Expression.

Glycopolymer-based multifunctional antibacterial hydrogel dressings for accelerating cutaneous wound healing.

Dynamic photodamage of red blood cell induced by CisDiMPyP porphyrin.

Hepatoprotective and anti-hyperglycemic effects of ferulic acid in arsenic-exposed mice.

Aryl hydrocarbon receptor (AHR): Towards understanding intestinal microbial ligands including vitamin B12 and folic acid as natural antagonists.

Establishment and characterization of Yellow River carp (*Cyprinus carpio haematopterus*) muscle cell line and its application to fish virology and immunology.

Ultra-stretchable, tissue-adhesive, shape-adaptive, self-healing, on-demand removable hydrogel dressings with multiple functions for infected wound healing in regions of high mobility.

Temporary alteration of neuronal network communication is a protective response to redox imbalance that requires GPI-anchored prion protein.

Diosmin exerts hepatoprotective and antihyperglycemic effects against sodium arsenite-induced toxicity through the modulation of oxidative stress and inflammation in mice.

Nephroprotective Effects of Selenium Nanoparticles Against Sodium Arsenite-Induced Damages.

Changes in metabolic landscapes shape divergent but distinct mutational signatures and cytotoxic consequences of redox stress.

Concomitant inhibition of TLR-4 and SGLT2 by phloretin and empagliflozin prevents diabetes-associated ischemic acute kidney injury.

Carvacrol reduces abnormal and dead sperm counts by attenuating sodium arsenite-induced oxidative stress, inflammation, apoptosis, and autophagy in the testicular tissues of rats.

Biodegradable Hollow Nanoscavengers Restore Liver Functions to Reverse Insulin Resistance in Type 2 Diabetes.

The effects of sucrose and arsenic on muscular insulin signaling pathways differ between the gastrocnemius and quadriceps muscles.

Fetal lung hypoxia and energetic cell failure in the nitrofen-induced congenital diaphragmatic hernia rat model.

Zingerone reduces sodium arsenite-induced nephrotoxicity by regulating oxidative stress, inflammation, apoptosis and histopathological changes.

Exposure to nonanoic acid alters small intestinal neuroendocrine tumor phenotype.

NKG2D Ligand Expression Induced by Oxidative Stress Mitigates Cutaneous Ischemia-Reperfusion Injury.

Mechanistic insights on the possible protective role of polyphenols extracted from *Tamarix aphylla* aerial parts against sodium arsenite-induced hepatotoxicity in rats.

Supplementation with sesame oil suppresses genotoxicity, hepatotoxicity and enterotoxicity induced by sodium arsenite in rats.

Diagnostic biomarker panels of osteoarthritis: UPLC-QToF/MS-based serum metabolic profiling.

[Clinical case report of acute dinitrophenol poisoning with a fatal outcome of Udmurt Republic].

DPP4 Inhibitor Sitagliptin Reduces Inflammatory Responses and Mast Cell Activation in Allergic Rhinitis.

PD-L1 upregulation promotes drug-induced pulmonary fibrosis by inhibiting vimentin degradation.

Porcine deltacoronavirus uses heparan sulfate as an attachment receptor.

On-Demand Removable Self-Healing and pH-Responsive Europium-Releasing Adhesive Dressing Enables Inflammatory Microenvironment Modulation and Angiogenesis for Diabetic Wound Healing.

Multi-omics reveals diet-induced metabolic disorders and liver inflammation via microbiota-gut-liver axis.

Microbial strategies for degradation of microplastics generated from COVID-19 healthcare waste.

Gold@mesoporous polydopamine nanoparticles modified self-healing hydrogel for sport-injuring therapy.

Metabolic Communication by SGLT2 Inhibition.

Disentangling the Tissue-Specific Variations of Volatile Flavor Profiles of the *Lentinula edodes* Fruiting Body.

Antioxidant Vitamins Attenuate Glyphosate-Induced Development of Type-2 Diabetes Through the Activation of Glycogen Synthase Kinase-3 β and Forkhead Box Protein O-1 in the Liver of Adult Male Rats.

Genome-Wide Identification and Expression Analysis Reveals the B3 Superfamily Involved in Embryogenesis and Hormone Responses in *Dimocarpus longan* Lour.

Phenolic compounds in the freshwater environment in South Korea: Occurrence and tissue-specific distribution.

Acute Toxicity Assays with Adult Coral Fragments: A Method for Standardization.

Ginkgo Biloba Extract Can Antagonize Subchronic Arsenite Exposure-Induced Hepatocyte Senescence by Inhibiting Oxidative Damage and Inflammation in Rats.

Hormetic Effect Caused by Sublethal Doses of Glyphosate on *Toona ciliata* M. Roem.

Toxicological evaluation of TBBPA by common carp (*Cyprinus carpio*) about the in vivo/vitro disturbance of the AHR pathway.

Untargeted Metabolomics Analyses and Contaminant Chemistry of Dreissenid Mussels at the Maumee River Area of Concern in the Great Lakes.

Effects of terbuthylazine on myocardial oxidative stress and ferroptosis via Nrf2/HO-1 signaling pathway in broilers.

Functional characterization of four antenna-biased chemosensory proteins in *Dioryctria abietella* reveals a broadly tuned olfactory DabiCSP1 and its key residues in ligand-binding.

Plant-derived squalene supplementation improves growth performance and alleviates acute oxidative stress-induced growth retardation and intestinal damage in piglets.

Effects of glyphosate herbicide ingestion on kidney function in rats on a balanced diet.

Paraquat ingestion in an adult with cystic fibrosis (CF): Diagnostic and management dilemmas.

Uroprotective Potential of Campesterol in Cyclophosphamide Induced Interstitial Cystitis; Molecular Docking Studies.

Ultrasonic neural regulation over two-dimensional graphene analog biomaterials: Enhanced PC12 cell differentiation under diverse ultrasound excitation.

Heavy metal concentration according to shrimp species and organ specificity: Monitoring and human risk assessment.

Carnosine synthase deficiency aggravates neuroinflammation in multiple sclerosis.

Characterization of fifteen key genes involved in iron metabolism and their responses to dietary iron sources in yellow catfish *Pelteobagrus fulvidraco*.

A multifunctional hydrogel dressing with high tensile and adhesive strength for infected skin wound healing in joint regions.

Interpretable predictive models of genome-wide aryl hydrocarbon receptor-DNA binding reveal tissue-specific binding determinants.

Differential transcriptomic alterations in nasal versus lung tissue of acrolein-exposed rats.

Cross species extrapolation of the disruption of thyroid hormone synthesis by oxyfluorfen using in vitro data, physiologically based pharmacokinetic (PBPK), and thyroid hormone kinetics models.

New Insight of Scaffold Based on Hydroxyapatite (HAp)/Bacteria's Nanocellulose (BN) for Dental Tissue Engineering.

Micropropagation and Acclimatization of *Gymnocalycium* cv. Fancy (Cactaceae): Developmental Responses to Different Explant Types and Hormone Conditions.

A comparison of maceration methods for the preparation of infant skeletal remains for forensic anthropological analysis.

Metabolic Pathways for Removing Reactive Aldehydes are Diminished in Atrophic Muscle During Heart Failure.

Exposure to the aryl hydrocarbon receptor agonist dioxin disrupts formation of the muscle, nerves, and vasculature in the developing jaw.

Mixture effect assessment applying in vitro bioassays to in-tissue silicone extracts of traditional foods prepared from beluga whale blubber.

Suppressed Histone H3 Lysine 18 Acetylation Is Involved in Arsenic-Induced Liver Fibrosis in Rats by Triggering the Dedifferentiation of Liver Sinusoidal Endothelial Cells.

Effect of Hydralazine on Angiotensin II-Induced Abdominal Aortic Aneurysm in Apolipoprotein E-Deficient Mice.

Assessment of glyphosate and its metabolites' residue concentrations in cultured African Catfish offered for sale in selected markets in Ibadan, Oyo State, Nigeria.

Epidemiology and etiology of diffuse large B-cell lymphoma.

Mild Oxidative Stress Induced by Sodium Arsenite Reduces Lipocalin-2 Expression Levels in Cortical Glial Cells.

Biomechanical performance of talon cannulated compression device in pauwels type III fractures: a comparative study.

The neuroprotective effect of quercetin nanoparticles in the therapy of neuronal damage stimulated by acrolein.

Nilotinib alleviates paraquat-induced hepatic and pulmonary injury in rats via the Nrf2/Nf-kB axis.

Acrolein induces mitochondrial dysfunction and insulin resistance in muscle and adipose tissues in vitro and in vivo.

In vivo neuromodulation of animal behavior with organic semiconducting oligomers.

Transcriptome reveals the toxicity difference of dimethyl disulfide by contact and fumigation on *Meloidogyne incognita* through calcium channel-mediated oxidative phosphorylation.

Regulation of Hepatic Xenosensor Function by HNF4 α .

Investigation of the Persistence, Toxicological Effects, and Ecological Issues of S-Triazine Herbicides and Their Biodegradation Using Emerging Technologies: A Review.

Bioactive strawberry fruit (*Arbutus unedo* L.) extract remedies paraquat-induced neurotoxicity in the offspring prenatally exposed rats.

A review of food contaminant 2,3,7,8-tetrachlorodibenzo-p-dioxin and its toxicity associated with metabolic disorders.

Development and application of a mini-QuEChERS method for the determination of pesticide residues in anuran adipose tissues.

Acute paraquat poisoning complicated by acute kidney injury and lung fibrosis: a case report from Nepal.

Elucidating the spatial distribution of organic contaminants and their biotransformation products in amphipod tissue by MALDI- and DESI-MS-imaging.

Alterations of Bax/Bcl-2 ratio contribute to NaAsO₂ induced thyrotoxicity in human thyroid follicular epithelial cells and SD rats.

Adverse bioenergetic effects of N-acyl amino acids in human adipocytes overshadow beneficial mitochondrial uncoupling.

Correction to: Assessment of ACC and P450 Genes Expression in Wild Oat (*Avena ludoviciana*) in Different Tissues Under Herbicide Application.

3D-bioprintable endothelial cell-laden sacrificial ink for fabrication of microvessel networks.

Toxicokinetic modelling of the transfer of non-dioxin like polychlorinated biphenyls from feed into edible tissues of pigs.

Single and combined effects of polyethylene microplastics and acetochlor on accumulation and intestinal toxicity of zebrafish (*Danio rerio*).

A comprehensive review of chlorophenols: Fate, toxicology and its treatment.

Optimization of High-Efficiency Tissue Culture Regeneration Systems in Gray Poplar.

M(6)A transcriptome-wide map of circRNAs identified in the testis of normal and AZ-treated *Xenopus laevis*.

Uro-protective role of chrysin against cyclophosphamide-induced hemorrhagic cystitis in rats involving the turning-off NF- κ B/P38-MAPK, NO/PARP-1 and STAT-3 signaling cascades.

Increased anti-oxidative action compensates for collagen tissue degeneration in vitiligo dermis.

Metformin Overcomes the Consequences of NKX3.1 Loss to Suppress Prostate Cancer Progression.

Three-Way Cell-Based Screening of Antistress Compounds: Identification, Validation, and Relevance to Old-Age-Related Pathologies.

Impact of Intron and Retransformation on Transgene Expression in Leaf and Fruit Tissues of Field-Grown Pear Trees.

The BCKDK inhibitor BT2 is a chemical uncoupler that lowers mitochondrial ROS production and de novo lipogenesis.

Lycopene supplementation: effects on oxidative stress, sex hormones, gonads and thyroid tissue in tilapia *Oreochromis niloticus* during Harness(Â®) exposure.

Subchronic Arsenite Exposure Induced Atrophy and Erythropoietin Sensitivity Reduction in Skeletal Muscle Were Relevant to Declined Serum Melatonin Levels in Middle-Aged Rats.

Effects of Prometryn Exposure on Hepatopancreas Oxidative Stress and Intestinal Flora in *Eriocheir sinensis* (Crustacea: Decapoda).

A UOF based on a cyclotriphosphazene skeleton: fluorescence sensing of different substituted aldehydes and NACs.

Pesticides exposure in pregnant Argentinian women: Potential relations with the residence areas and the anthropometric neonate parameters.

[8] and [10]-Gingerol reduces urothelial damage in ifosfamide-induced hemorrhagic cystitis via JAK/STAT/FOXO signaling pathway via IL-10.

Prevention of DSS-induced colitis in mice with water kefir microbiota via anti-inflammatory and microbiota-balancing activity.

Development of Simultaneous Determination Method of Pesticide High Toxic Metabolite 3,4-Dichloroaniline and 3,5 Dichloroaniline in Chives Using HPLC-MS/MS.

Pesticide concentration in three selected fish species and human health risk in the Lake Tana sub-basin, Ethiopia.

Agent Orange Causes Metabolic Dysfunction and Molecular Pathology Reminiscent of Alzheimer's Disease.

Exploring breast tissue microbial composition and the association with breast cancer risk factors.

Anti-osteoporotic drugs affect the pathogenesis of gut microbiota and its metabolites: a clinical study.

PTEN Overexpression Alters Autophagy Levels and Slows Sodium Arsenite-Induced Hepatic Stellate Cell Fibrosis.

Joint effects of phenol, chlorophenol pesticide, phthalate, and polycyclic aromatic hydrocarbon on bone mineral density: comparison of four statistical models.

Occurrence, distribution, and risk assessment of halogenated organic pollutants (HOPs) in marine fish muscle: The case study of Vietnam.

RNA-binding proteins that are highly expressed and enriched in healthy cartilage but suppressed in osteoarthritis.

The exposure to volatile organic chemicals associates positively with rheumatoid arthritis: a cross-sectional study from the NHANES program.

Long-term exposure to arsenic in drinking water leads to myocardial damage by oxidative stress and reduction in NO.

Human amnion-derived mesenchymal stem cells attenuate acute lung injury in two different acute lung injury mice models.

Effects of metamifop on ammonia production and metabolism of *Monopterus albus*.

3-Pyrrolyl BODIPY Based Schiff Base Fluorophores: A Selective Chemodosimetric and Optical Sensor for Diethyl Chlorophosphate.

Metabolomics Differences of the Donor Livers Between In Situ and Ex Situ Conditions During Ischemia-free Liver Transplantation.

Exposure to oxyfluorfen-induced hematobiochemical alterations, oxidative stress, genotoxicity, and disruption of sex hormones in male African catfish and the potential to confront by *Chlorella vulgaris*.

The relationship between experimental 2,4-Dinitrophenol administration and neurological oxidative stress: in terms of dose, time and gender differences.

Induction of Axillary Bud Swelling of *Hevea brasiliensis* to Regenerate Plants through Somatic Embryogenesis and Analysis of Genetic Stability.

Differentiation Disorders of *Chara vulgaris* Spermatids following Treatment with Propyzamide.

Reproductive-Toxicity-Related Endpoints in *C. elegans* Are Consistent with Reduced Concern for Dimethylarsinic Acid Exposure Relative to Inorganic Arsenic.

Sodium arsenite-induced changes in the wood of esca-diseased grapevine at cytological and metabolomic levels.

Effect of 650 nm laser photobiomodulation therapy on the HT-7 (shenmen) acupoint in the *Mus musculus* model of Parkinson's disease.

Determination of Paraquat in *Arabidopsis* Tissues and Protoplasts by UHPLC-MS/MS.

Cell cycle dysregulation on prenatal and postnatal arsenic exposure in skin of Wistar rat neonates.

Transfer and toxicokinetic modeling of non-dioxin-like polychlorinated biphenyls (ndl-PCBs) into accidentally exposed dairy cattle and their calves - A case report.

Accumulation and metabolism of pyroxasulfone in tomato seedlings.

First insight into accumulation of characteristics and tissue distribution of PCBs, PBDEs, and other BFRs in the living Indonesian coelacanth (*Latimeria menadoensis*).

Contaminants of Emerging Concern (CECs) and Male Reproductive Health: Challenging the Future with a Double-Edged Sword.

Prenatal Environmental Stressors and DNA Methylation Levels in Placenta and Peripheral Tissues of Mothers and Neonates Evaluated by Applying Artificial Neural Networks.

Route of Arsenic Exposure Differentially Impacts the Expression of Genes Involved in Gut-Mucosa-Associated Immune Responses and Gastrointestinal Permeability.

Development of Boron-Containing PVA-Based Cryogels with Controllable Boron Releasing Rate and Altered Influence on Osteoblasts.

Endometriosis: Update of Pathophysiology, (Epi) Genetic and Environmental Involvement.

Association of bone mineral density with trichlorophenol: a population-based study.

Neuroprotective properties of borax against aluminum hydroxide-induced neurotoxicity: Possible role of Nrf-2/BDNF/AChE pathways in fish brain.

AhR-mediated lipid peroxidation contributes to TCDD-induced cardiac defects in zebrafish.

Fluorometric Protocol for Estimating Peroxiredoxin Activity in Biological Tissues.

Toxicity assessment of metribuzin and its amelioration through plant growth regulators in *Vigna radiata* (L.) R. Wilczek.

Risk of Environmental Chemicals on Bone Fractures Is Independent of Low Bone Mass in US Adults: Insights from 2017 to 2018 NHANES.

Effects of the Vitamin D3 on Alleviating the Oxidative Stress Induced by Diquat in Wenchang Chickens.

Monitoring of organophosphorus pesticide residues in plant and vegetable tissues by a novel silver nanocluster probe.

Case report: Successful outcome of a young patient with rhabdomyolysis and shock caused by diquat poisoning.

Dioxin transfer simulation from feed to animal tissues and risk assessment.

TCDD alters essential transcriptional regulators of osteogenic differentiation in multipotent mesenchymal stem cells.

Rhamnazin ameliorates 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin-evoked testicular toxicity by restoring biochemical, spermatogenic and histological profile in male albino rats.

Protective effects of zingerone against sodium arsenite-induced lung toxicity: A multi-biomarker approach.

Ameliorating effect of *Mucuna pruriens* seed extract on sodium arsenite-induced testicular toxicity and hepato-renal histopathology in rats.

Herbicide Use in the Era of Farm to Fork: Strengths, Weaknesses, and Future Implications.

Andrographolide-based potential anti-inflammatory transcription inhibitors against nuclear factor NF- κ B p50 subunit (NF- $\hat{\imath}$ B p50): an integrated molecular and quantum mechanical approach.

Bioactive diterpenoids and sesquiterpenoids with different skeletons from *Salvia digitaloides* Diels.

Scrutinizing the interaction between metribuzin with glutathione reductase 2 from *Arabidopsis thaliana*: insight into the molecular toxicity in agriculture.

High hazard pesticides (HHPs) in Near East and North Africa (NENA), constraints and recommendations to mitigate the risk of HHPs.

Nail Mineral Composition Changes Do Not Reflect Bone Mineral Changes Caused by Boron Supplementation.

Amyotrophic Lateral Sclerosis Pathoetiology and Pathophysiology: Roles of Astrocytes, Gut Microbiome, and Muscle Interactions via the Mitochondrial Melatonergic Pathway, with Disruption by Glyphosate-Based Herbicides.

Trehalose prevents glyphosate-induced testicular damage in roosters via its antioxidative properties.

Individual and combined toxicity of microplastics and diuron differs between freshwater and marine diatoms.

Epidemiology and renal injury following 2-methyl-4-chlorophenoxyacetic acid (MCPA) poisoning.

Glyphosate effects on the female reproductive systems: a systematic review.

Tannic acid through ROS/TNF- α /TNFR 1 antagonizes atrazine induced apoptosis, programmed necrosis and immune dysfunction of grass carp hepatocytes.

Feeding behavior of early life stages of the zebrafish *Danio rerio* is altered by exposure to glyphosate.

Spectroscopic contribution to glyphosate toxicity profile and the remedial effects of *Momordica charantia*.

YAP1 silencing attenuated lung injury/fibrosis but worsened diaphragmatic function by regulating oxidative stress and inflammation response in mice.

Study of paraquat-induced pulmonary fibrosis using biomimetic micro-lung chips.

Phlebotomy-induced iron deficiency attenuates the pulmonary toxicity of paraquat in mice.

Mechanism of 2,4-Dichlorophenoxyacetic acid-induced damage to rat testis via Fas/FasL pathway and the protective effect of *Lycium barbarum* polysaccharides.

Histopathological, immunohistochemical, and molecular investigation of atrazine toxic effect on some organs of adult male albino rats with a screening of *Acacia nilotica* as a protective trial.

Maternal exposure to glyphosate-based herbicide promotes changes in the muscle structure of C57BL/6 mice offspring.

Molecular linkages between chemodiversity and MCPA complexation behavior of dissolved organic matter in paddy soil: Effects of land conversion.

The exposure in ovo of embryos belonging to Amazonian turtle species *Podocnemis expansa* (Testudines) to commercial glyphosate and fipronil formulations impairs their growth and changes their skeletal development.

A dose-related positive effect of inhaled simvastatin-loaded PLGA nanoparticles on paraquat-induced pulmonary fibrosis in rats.

Chronic dietary exposure to a glyphosate-based herbicide results in total or partial reversibility of plasma oxidative stress, cecal microbiota abundance and short-chain fatty acid composition in broiler hens.

Biochemical and cellular responses of the freshwater mussel, *Hyriopsis bialata*, to the herbicide atrazine.

Co-exposure of iron oxide nanoparticles and glyphosate-based herbicide promote liver toxicity in guppy (*Poecilia reticulata*): A histochemical and ultrastructural approach.

Ginsenoside Rg1 suppresses paraquat-induced epithelial cell senescence by enhancing autophagy in an ATG12-dependent manner.

[Study on the Protective effect and mechanism of Nicotinamide Riboside on lung injury in paraquat intoxicated mice].

Melatonin ameliorates renal dysfunction in glyphosate- and hard water-treated mice.

Phenotypic analyses, protein localization, and bacteriostatic activity of *Drosophila melanogaster* transferrin-1.

Alfalfa's response to atrazine stress and its secreted atrazine metabolites.

Chronic dietary exposure to a glyphosate-based herbicide results in reversible increase early embryo mortality in chicken.

Glyphosate infiltrates the brain and increases pro-inflammatory cytokine TNF α : implications for neurodegenerative disorders.

Acrolein, an environmental toxicant and its applications to in vivo and in vitro atherosclerosis models: An update.

Neuro-hepatopathological changes in juvenile *Oreochromis niloticus* exposed to sublethal concentrations of commercial herbicides.

Ginkgolide C Alleviates Acute Lung Injury Caused by Paraquat Poisoning via Regulating the Nrf2 and NF- κ B Signaling Pathways.

A time-course study of microglial activation and dopaminergic neuron loss in the substantia nigra of mice with paraquat-induced Parkinson's disease.

An in vitro strategy using multiple human induced pluripotent stem cell-derived models to assess the toxicity of chemicals: A case study on paraquat.

Acetochlor Affects Bighead Carp (*Aristichthys Nobilis*) by Producing Oxidative Stress, Lowering Tissue Proteins, and Inducing Genotoxicity.

Lifelong Exposure to a Low-Dose of the Glyphosate-Based Herbicide RoundUp(®) Causes Intestinal Damage, Gut Dysbiosis, and Behavioral Changes in Mice.

Age-related tolerance to paraquat-induced parkinsonism in *Drosophila melanogaster*.

Ameliorative effect of selenium yeast supplementation on the physio-pathological impacts of chronic exposure to glyphosate and or malathion in *Oreochromis niloticus*.

Vesicle transport related protein Synaptotagmin-1 mediates paraquat transport to antagonize paraquat toxicity.

Clinicohematological, Mutagenic, and Oxidative Stress Induced by Pendimethalin in Freshwater Fish Bighead Carp (*Hypophthalmichthys nobilis*).

Molecular and Histological Effects of Glyphosate on Testicular Tissue of the Lizard *Podarcis siculus*.

[Dynamic changes of locus coeruleus damage in Parkinson's disease-like mice induced by paraquat].

Acrolein, an endogenous aldehyde induces synaptic dysfunction in vitro and in vivo: Involvement of RhoA/ROCK2 pathway.

Synthesis, Herbicidal Activity and Toxicity Evaluation of Secondary Ammonium Salts from Turpentine Oil for Sustainable Weed Control.

Ameliorative effect of N-acetylcysteine on the testicular tissue of adult male albino rats after glyphosate-based herbicide exposure.

Histopathological, Immunohistochemical, And Molecular Alterations In Brain Tissue And Submandibular Salivary Gland Of Atrazine-Induced Toxicity In Male Rats.

Protective role of green tea against paraquat toxicity in *Allium cepa* L.: physiological, cytogenetic, biochemical, and anatomical assessment.

Toxicity of commercial atrazine in *Rattus norvegicus* organs as a function of concentration: histopathological, ultrastructural and hematological evaluation.

Design of a naphthalimide-based probe for acrolein detection in foods and cells.

Impact of glyphosate-based herbicide on early embryonic development of the amphibian *Xenopus laevis*.

Quantification and toxicokinetics of paraquat in mouse plasma and lung tissues by internal standard surface-enhanced Raman spectroscopy.

Does roundup affect zinc functions in a bivalve mollusk in ex vivo exposure?

Low concentrations of glyphosate alone affect the pubertal male rat meiotic step: An in vitro study.

Propolis nanoparticles relieved the impacts of glyphosate-induced oxidative stress and immunosuppression in Nile tilapia.

A Novel Algicidal Bacterium, *Microbulbifer* sp. YX04, Triggered Oxidative Damage and Autophagic Cell Death in *Phaeocystis globosa*, Which Causes Harmful Algal Blooms.

5-aminosalicylic acid attenuates paraquat-induced lung fibroblast activation and pulmonary fibrosis of rats.

The influence of preconditioning with low dose of LPS on paraquat-induced neurotoxicity, microglia activation and expression of α -synuclein and synphilin-1 in the dopaminergic system.

Benchmark dose and the adverse effects of exposure to pendimethalin at low dose in female rats.

Attenuating effect of *Prosopis cineraria* against paraquat-induced toxicity in prepubertal mice, *Mus musculus*.

Bioconcentration and toxicological impacts of fipronil and 2,4-D commercial formulations (single and in mixture) in the tropical fish, *Danio rerio*.

Tenascin-C Participates Pulmonary Injury Induced by Paraquat Through Regulating TLR4 and TGF- β 2 Signaling Pathways.

The STING-IRF3 pathway contributes to paraquat-induced acute lung injury.

[Effects on extravascular lung water of lung protective ventilation strategy applied on piglets with acute respiratory distress syndrome induced by paraquat].

Ellagic acid ameliorates paraquat-induced liver injury associated with improved gut microbial profile.

Occurrence, spatio-temporal distribution, and human health risk assessment of pesticides in fish along the Ayuquila-Armería River, Mexico.

Evaluation of myenteric neurons in the colon of rats exposed to 2,4 dichlorophenoxyacetic acid herbicide.

Protective Effects of N-acetylcysteine Niosome Nanoparticles on Paraquat-induced Nephrotoxicity in Male Rats.

Silymarin protects the rats against paraquat-induced acute kidney injury via Nrf2.

Disruption of developmental programming with long-term consequences after exposure to a glyphosate-based herbicide in a rat model.

Tolerance of *Hymenaea courbaril* L. to glyphosate.

Evaluation of the efficiency of simvastatin loaded PLGA nanoparticles against acute paraquat-intoxicated rats.

Atrazine uptake, translocation, bioaccumulation and biodegradation in cattail (*Typha latifolia*) as a function of exposure time.

The potential risks of herbicide butachlor to immunotoxicity via induction of autophagy and apoptosis in the spleen.

The speciation of arsenic in the muscle tissue of inland and coastal freshwater fish from a remote boreal region.

Determination of genotoxic damages of picloram and dicamba with comet assay in *Allium cepa* rooted in tissue culture and distilled water.

Case series: Diquat poisoning with acute kidney failure, myocardial damage, and rhabdomyolysis.

Metolachlor Poisoning with Lactic Acidosis Improved by Thiamine Administration: A Case Report.

Acrolein plays a culprit role in the pathogenesis of diabetic nephropathy in vitro and in vivo.

Novel anti-arthritic mechanisms of trans-cinnamaldehyde against complete Freund's adjuvant-induced arthritis in mice: involvement of NF- κ B/TNF- α and IL-6/IL-23/IL-17 pathways in the immunoinflammatory responses.

Acute diquat poisoning causes rhabdomyolysis.

Prediction of mortality and morbidity following paraquat poisoning based on trend of liver and kidney injury.

pH-responsive cinnamaldehyde-TiO₂ nanotube coating: fabrication and functions in a simulated diabetes condition.

Cinnamaldehyde protects against ligature-induced periodontitis through the inhibition of microbial accumulation and inflammatory responses of host immune cells.

Genomic Analyses Identify Manganese Homeostasis as a Driver of Group B Streptococcal Vaginal Colonization.

Cinnamaldehyde Mitigates Atherosclerosis Induced by High-Fat Diet via Modulation of Hyperlipidemia, Oxidative Stress, and Inflammation.

Cinnamaldehyde decreases the invasion and u-PA expression of osteosarcoma by down-regulating the FAK signalling pathway.

Cigarette Smoke Containing Acrolein Contributes to Cisplatin Resistance in Human Bladder Cancers through the Regulation of HER2 Pathway or FGFR3 Pathway.

[Imaging features of 10 patients with toxic encephalopathy caused by diquat].

Effects of cinnamaldehyde on glucose-6-phosphate dehydrogenase activity, some biochemical and hematological parameters in diabetic rats.

Homicidal paraquat poisoning: Poisoned while drinking.

An Inhibitor of Nuclear Factor-Kappa B Pathway Attenuates the Release of TGF- β 1 and Inhibits the Fibrogenic Progress in a Model of Airway Remodeling Induced by Acrolein.

Efficacy of N-acetyl-L-cysteine against glyphosate induced oxidative stress and apoptosis in testicular germ cells preventing infertility.

Cinnamaldehyde treatment during adolescence improves white and brown adipose tissue metabolism in a male rat model of early obesity.

C. elegans as an in vivo model system for the phenotypic drug discovery for treating paraquat poisoning.

Cinnamic Aldehyde, the main monomer component of Cinnamon, exhibits anti-inflammatory property in OA synovial fibroblasts via TLR4/MyD88 pathway.

Effect of Cinnamaldehyde on *C. albicans* cell wall and (1,3)- β -D-glucans in vivo.

Combination of TRP channel dietary agonists induces energy expending and glucose utilizing phenotype in HFD-fed mice.

Somatic embryogenesis and β -glucuronidase transformation in chickpea (*Cicer arietinum* cv. Bivanich).

Interactive effects of high temperature and pesticide exposure on oxidative status, apoptosis, and renin expression in kidney of goldfish: Molecular and cellular mechanisms of widespread kidney damage and renin attenuation.

A reactive oxygen species-replenishing coordination polymer nanomedicine disrupts redox homeostasis and induces concurrent apoptosis-ferroptosis for combinational cancer therapy.

Peripheral tissular analysis of rapamycin's effect as a neuroprotective agent in vivo.

Self-Emulsifying Drug Delivery System Enhances Tissue Distribution of Cinnamaldehyde by Altering the Properties of the Mucus Layer.

NRF2 activation by 2-methoxycinnamaldehyde attenuates inflammatory responses in macrophages via enhancing autophagy flux.

Acute toxicity, bioaccumulation and elimination of prometryn in tilapia (*Oreochromis niloticus*).

Hexagonal liquid crystalline system containing cinnamaldehyde for enhancement of skin permeation of sinomenine hydrochloride.

Acid-Responsive Micelles Releasing Cinnamaldehyde Enhance RSL3-Induced Ferroptosis in Tumor Cells.

The effects of aerobic exercise training with octopamine supplementation on cardiomyocyte apoptosis induced by deep-frying oil: The role of caspase and procaspase 3.

Toxicity and tissue accumulation characteristics of the herbicide pendimethalin under silicon application in ginger (*Zingiber officinale* Roscoe).

Glyphosate and glufosinate-ammonium in aquaculture ponds and aquatic products: Occurrence and health risk assessment.

Analytical method for sequential determination of persistent herbicides and their metabolites in fish tissues by UPLC-MS/MS.

Contaminants of emerging concern (CECs) in *Zea mays*: Uptake, translocation and distribution tissue patterns over the time and its relation with physicochemical properties and plant transpiration rate.

Protective effect of the *Spirulina platensis* against toxicity induced by Diuron exposure in *Mytilus galloprovincialis*.

Probiotic Bifidobacteria Mitigate the Deleterious Effects of para-Cresol in a *Drosophila melanogaster* Toxicity Model.

TIPARP is involved in the regulation of intraocular pressure.

[Expression and Regulatory Mechanism of Autophagy-related Genes in Synovial Tissues of Patients with Rheumatoid Arthritis].

Impact of mixtures of persistent organic pollutants on breast cancer aggressiveness.

Hibiscus sabdariffa L. polyphenolic-rich extract promotes muscle glucose uptake and inhibits intestinal glucose absorption with concomitant amelioration of Fe(2+) -induced hepatic oxidative injury.

Functional analysis of RYR1 variants in patients with confirmed susceptibility to malignant hyperthermia.

Effects of neuron autophagy induced by arsenic and fluoride on spatial learning and memory in offspring rats.

Pesticide exposure and risk of cardiovascular disease: A systematic review.

Understanding In Vitro Pathways to Drug Discovery for TDP-43 Proteinopathies.

Lactobacillus reuteri tryptophan metabolism promotes host susceptibility to CNS autoimmunity.

[Protective effect of active vitamin D on liver fibrosis induced by sodium arsenite in SD rats].

Impact of the National Amyotrophic Lateral Sclerosis Registry: Analysis of Registry-funded Research.

Flurochloridone induced abnormal spermatogenesis by damaging testicular Sertoli cells in mice.

The AHR target gene scinderin activates the WNT pathway by facilitating the nuclear translocation of β -catenin.

Dual-dynamic-bond cross-linked injectable hydrogel of multifunction for intervertebral disc degeneration therapy.

Comparative plasma metabolomic analysis to identify biomarkers for lead-induced cognitive impairment.

LC-MS metabolomics of urine reveals distinct profiles for non-muscle-invasive and muscle-invasive bladder cancer.

Damaged DNA Is an Early Event of Neurodegeneration in Induced Pluripotent Stem Cell-Derived Motoneurons with UBQLN2(P497H) Mutation.

Arsenic induces bronchial epithelial carcinogenesis with mitochondrial dysfunction through AKAP95-mediated cell cycle alterations.

Transcriptome sequencing of 3,3',4,4',5-Pentachlorobiphenyl (PCB126)-treated human preadipocytes demonstrates progressive changes in pathways associated with inflammation and diabetes.

Assessment of the Proton Pump Inhibitor, Esomeprazole Magnesium Hydrate and Trihydrate, on Pathophysiological Markers of Preeclampsia in Preclinical Human Models of Disease.

Damage of uremic myocardium by p-cresyl sulfate and the ameliorative effect of Klotho by regulating SIRT6 ubiquitination.

Carboxymethylation of Desmodium styracifolium Polysaccharide and Its Repair Effect on Damaged HK-2 Cells.

Radiosynthesis and characterization of a carbon-11 PET tracer for receptor-interacting protein kinase 1.

Thermogenic T cells: a cell therapy for obesity?

Pesticide use and risk of systemic autoimmune diseases in the Agricultural Health Study.

Physiologically-based pharmacokinetic model for 2,4-dinitrophenol.

Mild Mitochondrial Uncoupling Decreases Experimental Atherosclerosis, A Proof of Concept.

Redox-dependent loss of flavin by mitochondria complex I is different in brain and heart.

Bacterial neurotoxic metabolites in multiple sclerosis cerebrospinal fluid and plasma.

Toxic Effects of Endocrine Disruptor Exposure on Collagen-Induced Arthritis.

Potential Protective Effect of Spirulina Platensis on Sodium Arsenite Induced Cardiotoxicity in Male Rats.

TCDD aggravates the formation of the atherosclerotic plaque in ApoE KO mice with a sexual dimorphic pattern.

Molecular characterization of the aryl hydrocarbon receptor 2 gene in black rockfish, *Sebastes schlegelii*, and its expression patterns upon exposure to benzo[a]pyrene, 2,3,7,8-tetrachlorodibenzo-p-dioxin, and 1^β-naphthoflavone.

Arsenic alters nitric oxide signaling similar to autism spectrum disorder and Alzheimer's disease-associated mutations.

Lentinan alleviates arsenic-induced hepatotoxicity in mice via downregulation of OX40/IL-17A and activation of Nrf2 signaling.

Monomeric C-Reactive Protein: Current Perspectives for Utilization and Inclusion as a Prognostic Indicator and Therapeutic Target.

Developmental toxicity studies on triclopyr acid, triclopyr butoxyethyl ester and triclopyr triethylamine salt in the rabbit.

Tryptophan Metabolites Regulate Neurotensin 1 Expression in Endothelial Cells.

Iron from nanostructured ferric phosphate: absorption and biodistribution in mice and bioavailability in iron deficient anemic women.

Histological and Immunohistochemical Studies to Determine the Mechanism of Cleft Palate Induction after Palatal Fusion in Mice Exposed to TCDD.

Integrated molecular biology and metabolomics approach to understand the mechanism underlying reduction of insulin resistance by corn silk decoction.

Acute Dyspnea and Hemoptysis in an 84-Year-Old Man With Multiple Comorbidities.

2, 3, 7, 8-Tetrachlorodibenzo-p-dioxin potential impacts on peripheral blood mononuclear cells of endometriosis women.

Development and Characterization of Curcumin-Silver Nanoparticles as a Promising Formulation to Test on Human Pterygium-Derived Keratinocytes.

Pretreatment optimization of tissue metabolomics in colorectal cancer.

Treatment with MDL 72527 Ameliorated Clinical Symptoms, Retinal Ganglion Cell Loss, Optic Nerve Inflammation, and Improved Visual Acuity in an Experimental Model of Multiple Sclerosis.

nHA-loaded gelatin/alginate hydrogel with combined physical and bioactive features for maxillofacial bone repair.

Strontium-Incorporated Carbon Nitride Nanosheets Modulate Intracellular Tension for Reinforced Bone Regeneration.

Comprehensive analysis of the carboxylesterase gene reveals that NtCXE22 regulates axillary bud growth through strigolactone metabolism in tobacco.

Early life organophosphate ester exposures and bone health at age 12 years: The Health Outcomes and Measures of the Environment (HOME) Study.

Environmentally relevant atrazine exposure leads to increases in DNA damage and changes in morphology in the hepatopancreas of crayfish (*Faxonius virilis*).

Availability and effects of n-TiO₂ and PCB77 in fish in vitro models of the intestinal barrier and liver under single- and/or co-exposure scenarios.

Effect of syringic acid on steroid and gonadotropic hormones, hematological indices, sperm characteristics and morphologies, and markers of tissue damage in methyl cellosolve-administered rats.

Responses of bitter melon saponins to oxidative stress and aging via the IIS pathway linked with sir-2.1 and hlh-30.

Synthesis, characterization, antioxidant potential, and cytotoxicity screening of new Cu(II) complexes with 4-(arylchalcogenyl)-1H-pyrazoles ligands.

Occurrence and risk assessment of endocrine-disrupting compounds in fish muscle: The case study of the Douro River estuary (North East Atlantic Ocean).

Toxic effects of pesticides on cellular and humoral immunity: an overview.

Oxidized sodium alginate crosslinked silk fibroin composite scaffold for skin tissue engineering.

DAF-16 is involved in colonic metabolites of ferulic acid-promoted longevity and stress resistance of *Caenorhabditis elegans*.

Cytotoxicity Mechanisms of Eight Major Herbicide Active Ingredients in Comparison to Their Commercial Formulations.

Post-Translational Modifications Evoked by Reactive Carbonyl Species in Ultraviolet-A-Exposed Skin: Implication in Fibroblast Senescence and Skin Photoaging.

Comparative Biochemical Profiling of Aluminum Chloride and Sodium Azide Induced Neuroinflammation and Cardiometabolic Disturbance.

Optical characteristics of the skin with dark circles using pump-probe imaging.

Effect of water diuresis with hydrogen saturation on the course of acute kidney damage during the separation of oxidation and phosphorylation.

AhR Mediated Activation of Pro-Inflammatory Response of RAW 264.7 Cells Modulate the Epithelial-Mesenchymal Transition.

Low-Dose Dioxin Reduced Glucose Uptake in C2C12 Myocytes: The Role of Mitochondrial Oxidative Stress and Insulin-Dependent Calcium Mobilization.

C-X-C-Chemokine-Receptor-Type-4 Inhibitor AMD3100 Attenuates Pulmonary Inflammation and Fibrosis in Silicotic Mice.

Ryanodine receptor-active non-dioxin-like polychlorinated biphenyls cause neurobehavioral deficits in larval zebrafish.

Protective efficacy of *Coriandrum sativum* seeds against arsenic induced toxicity in Swiss albino mice.

Somatic embryogenesis and plant regeneration from transverse thin cell layers of adult peach palm (*Bactris gasipaes*) lateral offshoots.

Facile fabrication of Bi-layered perfusable hydrogel tubes as biomimetic 3D arterial construct.

Occurrence and distribution of persistent organic pollutants in the liver and muscle of Atlantic blue sharks: Relevance and health risks.

Protection against Paraquat-Induced Oxidative Stress by *Curcuma longa* Extract-Loaded Polymeric Nanoparticles in Zebrafish Embryos.

Food-derived bioactive oligopeptide iron complexes ameliorate iron deficiency anemia and offspring development in pregnant rats.

Influence of Plant Growth Regulators on Glandular Trichome Density and Steviol Glycosides Accumulation in *Stevia rebaudiana*.

Borax relieved the acrylamide-induced hematotoxic, hepatotoxic, immunotoxic and genotoxic damages in rainbow trout by regulating apoptosis and Nrf2 signaling pathway.

The ability of callus tissues induced from three *Allium* plants to accumulate health-beneficial natural products, S-alk(en)ylcysteine sulfoxides.

Bisphenol A and 2,3,7,8-tetrachlorodibenzo-p-dioxin at non-cytotoxic doses alter the differentiation potential and cell function of rat adipose-stem cells.

The toxicological profile of polychlorinated naphthalenes (PCNs).

Plant hormone signals regulate trehalose accumulation against osmotic stress in watermelon cells.

Transcriptomic analysis of deceptively pollinated *Arum maculatum* (Araceae) reveals association between terpene synthase expression in floral trap chamber and species-specific pollinator attraction.

A pilot evaluation on the toxicokinetics and bioaccumulation of polychlorinated naphthalenes in laying hens.

Neurotoxicity Assessment of Four Different Pesticides Using In Vitro Enzymatic Inhibition Assays.

Oral administration of pentachlorophenol impairs antioxidant system, inhibits enzymes of brush border membrane, causes DNA damage and histological changes in rat intestine.

Interindividual variation contributes to differential PCB 126 induced gene expression in primary breast epithelial cells and tissues.

Supporting discovery and development of medical countermeasures for chemical injury to eye and skin.

Drosophila ecdysone receptor activity-based ex vivo assay to assess the endocrine disruption potential of environmental chemicals.

Beta-glucan effects on 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) toxicity in liver and brain.

Research on the Relationship between Exposure to Dioxins and Cancer Incidence in Vietnam.

Paraquat induced oxidative stress, DNA damage, and cytotoxicity in lymphocytes.

Cytomegalovirus-related Cystitis in a Patient with Membranous Glomerulonephritis Receiving Cyclophosphamide: A Case Study.

Improving knowledge on genotoxicity dynamics in somatic and germ cells of crayfish (*Procambarus clarkii*).

Borax exerts protective effect against ferrocene-induced neurotoxicity in *Oncorhynchus mykiss*.

Natural attenuation of sulfometuron-methyl in seawater: Kinetics, intermediates, toxicity change and ecological risk assessment.

Evaluation of dioxin induced transcriptomic responses in a 3D human liver microtissue model.

Effects of Vine Tea Extract on Meat Quality, Gut Microbiota and Metabolome of Wenchang Broiler.

Exposure to 3,3',4,4',5-Pentachlorobiphenyl (PCB126) Causes Widespread DNA Hypomethylation in Adult Zebrafish Testis.

Effects of Autophagy Modulators and Dioxin on the Expression of Epidermal Differentiation Proteins on Psoriasis-Like Keratinocytes in vitro and ex vivo.

Dietary High Dose of Iron Aggravates the Intestinal Injury but Promotes Intestinal Regeneration by Regulating Intestinal Stem Cells Activity in Adult Mice With Dextran Sodium Sulfate-Induced Colitis.

Oxidative Stress Protection by Canary Seed (*Phalaris canariensis* L.) Peptides in Caco-2 Cells and *Caenorhabditis elegans*.

Red propolis reduces inflammation in cyclophosphamide-induced hemorrhagic cystitis in rats.

Mitochondrial uncouplers induce proton leak by activating AAC and UCP1.

New insights into arsenic, lead, and iron neurotoxicity: Activation of MAPK signaling pathway and oxidative stress.

The toxicity of perfluorodecanoic acid is mainly manifested as a deflected immune function.

Use of in vitro metabolism and biokinetics assays to refine predicted in vivo and in vitro internal exposure to the cosmetic ingredient, phenoxyethanol, for use in risk assessment.

Evaluation of polycyclic aromatic hydrocarbons in silky sharks *Carcharhinus falciformis* collected from Western Indian Ocean and human health risk assessment.

Inhibition of aryl hydrocarbon receptor signaling promotes the terminal differentiation of human erythroblasts.

AM1241-Loaded Poly(ethylene glycol)-Dithiothreitol Hydrogel Repairs Cranial Bone Defects by Promoting Vascular Endothelial Growth Factor and COL-1 Expression.

Comparative Toxicotranscriptomics of Single Cell RNA-Seq and Conventional RNA-Seq in TCDD-Exposed Testicular Tissue.

Engineering Multifunctional Hydrogel With Osteogenic Capacity for Critical-Size Segmental Bone Defect Repair.

Distinct Epithelial Cell Profiles in Normal Versus Induced-Congenital Diaphragmatic Hernia Fetal Lungs.

Interference with connective tissue growth factor attenuated fibroblast-to-myofibroblast transition and pulmonary fibrosis.

Tea polyphenols alleviates acetochlor-induced apoptosis and necroptosis via ROS/MAPK/NF- κ B signaling in *Ctenopharyngodon idellus* kidney cells.

Prediction of tissue and urine concentrations of 2-phenoxyethanol and its metabolite 2-phenoxyacetic acid in rat and human after oral and dermal exposures via GastroPlus(TM) physiologically based pharmacokinetic modelling.

Rice straw biochar in combination with farmyard manure mitigates bromoxynil toxicity in wheat (*Triticum aestivum* L.).

Evaluation of the Acute Effects of Arsenic on Adults of the Neotropical Native Fish *Cnesterodon decemmaculatus* Using a Set of Biomarkers.

Enhanced bioremediation of RDX and Co-Contaminants perchlorate and nitrate using an anaerobic dehalogenating consortium in a fractured rock aquifer.

Elimination of Pendimethalin in Integrated Rice and *Procambarus clarkii* Breeding Models and Dietary Risk Assessments.

Optimized Transformation and Gene Editing of the B104 Public Maize Inbred by Improved Tissue Culture and Use of Morphogenic Regulators.

Pesticide Exposure and Risk of Rheumatoid Arthritis: A Systematic Review and Meta-Analysis.

Cytotoxic effects of Roundup Classic and its components on NE-4C and MC3T3-E1 cell lines determined by biochemical and flow cytometric assays.

A Mixture of Endocrine Disruptors and the Pesticide Roundup(®) Induce Oxidative Stress in Rabbit Liver When Administered under the Long-Term Low-Dose Regimen: Reinforcing the Notion of Real-Life Risk Simulation.

The bZIP Ap1 transcription factor is a negative regulator of virulence attributes of the anthropophilic dermatophyte *Trichophyton rubrum*.

Insights into the toxicokinetic, tissue distribution and maternal transfer of polychlorinated dibenzo-p-dioxins/dibenzofurans in laying hens fed with dioxin-associated dietary.

Multiple Plant Regeneration from Embryogenic Calli of *Paulownia tomentosa* (Thunb.) Steud.

Paraquat Induces Lung Injury via miR-199-Mediated SET in a Mouse Model.

Kidney and lung injury in rats following acute diquat exposure.

JAK2/STAT3 pathway regulates microglia polarization involved in hippocampal inflammatory damage due to acute paraquat exposure.

Intraperitoneal kisspeptin-10 administration ameliorates sodium arsenite-induced reproductive toxicity in adult male mice.

Sodium arsenite accelerates D-galactose-induced aging in the testis of the rat: Evidence for mitochondrial oxidative damage, NF- κ B, JNK, and apoptosis pathways.

Insight in Hypoxia-Mimetic Agents as Potential Tools for Mesenchymal Stem Cell Priming in Regenerative Medicine.

A Critical Review of Zebrafish Models of Parkinson's Disease.

NMR Spectroscopy Identifies Chemicals in Cigarette Smoke Condensate That Impair Skeletal Muscle Mitochondrial Function.

Novel Coconut Vinegar Attenuates Hepatic and Vascular Oxidative Stress in Rats Fed a High-Cholesterol Diet.

More than Meets the Eye: The Aryl Hydrocarbon Receptor is an Environmental Sensor, Physiological Regulator and a Therapeutic Target in Ocular Disease.

Lead acetate versus cadmium sulfate in the modulation of main physiological pathways controlling detrusor muscle contractility in rat.

Identification of the AccCDK1 gene in *Apis cerana cerana* and its relationship with the oxidative stress response.

Survey of polychlorinated dibenzo-p-dioxins, polychlorinated dibenzofurans and non-ortho-polychlorinated biphenyls in U.S. meat, poultry, and siluriform fish from 2018-2019: toxic equivalency levels, temporal trends, and implications.

Correction to: Quantification and toxicokinetics of paraquat in mouse plasma and lung tissues by internal standard surface enhanced Raman spectroscopy.

Gestational and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin primes cortical microglia to tissue injury.

Concentration of current-use pesticides in frogs from the Pampa region and correlation of a mixture toxicity index with biological effects.

Morphological and Molecular Description of a New Species *Haematoloechus dehradunensis* sp. nov. (Plagiiorchiidae: Haematoloechinae) from the Lungs of *Euphlyctis cyanophlyctis* (Anura, Dicroglossidae) from Dehradun, along with a Note on *H. singaporensis* Yuen, 1962, a New Record to India.

Assessment of Selected Morphological, Physical and Chemical Parameters of the Teeth of the Offspring of Female Rats Exposed to 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD), Taking into Account the Protective Role of Selected Antioxidants-Preliminary Study.

Extranodal Diffuse Large B-Cell Lymphoma of Bone and Soft Tissue Presenting With Marked Lymphedema and Hypercalcemia.

The fate of sodium chlorite in simulated gastric and intestinal fluids and residues of chlorate in broiler chickens after oral administration of sodium chlorite.

SOD1 mutations cause hypersensitivity to high-pressure-induced oxidative stress in *Saccharomyces cerevisiae*.

Health risks of sulfentrazone exposure during zebrafish embryo-larvae development at environmental concentration.

Effects of diluted Concord grape juice laced with sodium chloride and selected boron-containing compounds on attraction, consumption, crop muscle contractions, and mortality of adult *Drosophila suzukii* Matsumura (Diptera: Drosophilidae).

Geographical distribution of dioxins, cadmium, and mercury concentrations in reindeer liver, kidneys, and muscle in the Russian Far North.

Optical coherence tomography as an alternative tool for evaluating the effects of glyphosate on hybrid catfish (*Clarias gariepinus* × *Clarias macrocephalus*).

Why Do High-Risk Patients Develop or Not Develop Coronary Artery Disease? Metabolic Insights from the CAPIRE Study.

Role of Lung P450 Oxidoreductase in Paraquat-Induced Collagen Deposition in the Lung.

Glutathione protects against the meiotic defects of ovine oocytes induced by arsenic exposure via the inhibition of mitochondrial dysfunctions.

TCDD Inhibition of IgG1 Production in Experimental Autoimmune Encephalomyelitis (EAE) and In Vitro.

Dioxin-like Activity in Pregnant Women and Indices of Fetal Growth: The ACCEPT Birth Cohort.

Locust density shapes energy metabolism and oxidative stress resulting in divergence of flight traits.

A direct and simple immobilization route for immunosensors by CNBr activation for covalent attachment of anti-leptin: obesity diagnosis point of view.

Soybean isoflavones protect SH-SY5Y neurons from atrazine-induced toxicity by activating mitophagy through stimulation of the BEX2/BNIP3/NIX pathway.

Repeated Low-Dose Acrolein Triggers Irreversible Lamina Propria Edema in Urinary Bladder, Transient Voiding Behavior and Widening of Eyes to Mechanical Stimuli.

Toxicity effect of Diuron on gill tissue structure and the tissue residue of blood cockles (*Tegillarca granosa*).

Pesticides applied to crops and amyotrophic lateral sclerosis risk in the U.S.

Effects of 2,4-dichlorophenoxyacetic acid on the expression of NLRP3 inflammasome and autophagy-related proteins as well as the protective effect of *Lycium barbarum* polysaccharide in neonatal rats.

Bioaccumulation of current-use herbicides in fish from a global biodiversity hotspot: Lake St Lucia, South Africa.

A subchronic low-dose exposure of a glyphosate-based herbicide induces depressive and anxious-like behavior in mice: quercetin therapeutic approach.

Acute exposition to Roundup Transorb® induces systemic oxidative stress and alterations in the expression of newly sequenced genes in silverside fish (*Odontesthes humensis*).

Pleiotropic Outcomes of Glyphosate Exposure: From Organ Damage to Effects on Inflammation, Cancer, Reproduction and Development.

Vitamin D(3) Protects Mice from Diquat-Induced Oxidative Stress through the NF- κ B/Nrf2/HO-1 Signaling Pathway.

Atrazine intoxication in cattle, confirmed by gas chromatography-mass spectrometry.

Alterations in blood parameters, DNA damage, oxidative stress and antioxidant enzymes and immune-related genes expression in Nile tilapia (*Oreochromis niloticus*) exposed to glyphosate-based herbicide.

Conjugated linoleic acid protects brain mitochondrial function in acrolein induced male rats.

Bidirectional role of reactive oxygen species during inflammasome activation in acrolein-induced human EAhy926 cells pyroptosis.

Herbicide atrazine exposure induce oxidative stress, immune dysfunction and WSSV proliferation in red swamp crayfish *Procambarus clarkii*.

Exposure to the herbicide butachlor activates hepatic stress signals and disturbs lipid metabolism in mice.

Recovery trend to co-exposure of iron oxide nanoparticles (Fe_3O_4) and glyphosate in liver tissue of the fish *Poecilia reticulata*.

Ecotoxicological effects of commercial herbicides on the reproductive system of aquatic arthropod *Limnocois submontandoni* (Hemiptera: Naucoridae).

The Differences between the Effects of a Nanoformulation and a Conventional Form of Atrazine to Lettuce: Physiological Responses, Defense Mechanisms, and Nutrient Displacement.

Endophytic bacterium CIMAP-A7 mediated amelioration of atrazine induced phyto-toxicity in *Andrographis paniculata*.

Antioxidative Composites Based on Multienzyme Systems Encapsulated in Metal-Organic Frameworks.

Functional roles of polyamines and their metabolite acrolein in eukaryotic cells.

Pectin/chitosan/tripolyphosphate encapsulation protects the rat lung from fibrosis and apoptosis induced by paraquat inhalation.

Short exposure to glyphosate induces locomotor, craniofacial, and bone disorders in zebrafish (*Danio rerio*) embryos.

Exposure to 2,4-D herbicide induces hepatotoxicity in zebrafish larvae.

Long noncoding RNA HOTAIR functions as ceRNA to regulate MMP2 in paraquat induced lung epithelial-mesenchymal transition.

CD34+ derived macrophage and dendritic cells display differential responses to paraquat.

In vivo toxicological assessment of diquat dibromide: cytotoxic, genotoxic, and biochemical approach.

Effects of carboxylated multi-walled carbon nanotubes on bioconcentration of pentachlorophenol and hepatic damages in goldfish.

Survival on railway tracks of *Geranium robertianum*-a glyphosate-tolerant plant.

Effect of atrazine on accumulation of iron via the iron transport proteins in the midbrain of SD rats.

Influence of Herbicide Exposure and Ranavirus Infection on Growth and Survival of Juvenile Red-Eared Slider Turtles (*Trachemys scripta elegans*).

Exposure to Atrazine Induces Lung Inflammation through Nrf2-HO1 and Beclin 1/LC3 Pathways.

Low-Dose Acrolein, an Endogenous and Exogenous Toxic Molecule, Inhibits Glucose Transport via an Inhibition of Akt-Regulated GLUT4 Signaling in Skeletal Muscle Cells.

Meta-analysis and experimental validation identified atrazine as a toxicant in the male reproductive system.

Metazachlor effect on poplar - Pioneer plant species for riparian buffers.

Assessment of oxidative DNA damage, oxidative stress responses and histopathological alterations in gill and liver tissues of *Oncorhynchus mykiss* treated with linuron.

Development of scleral ossicles in *Podocnemis expansa* (Testudines: Podocnemididae) embryos exposed to atrazine.

Possible effects of agent orange and posttraumatic stress disorder on hyperglycemia in Korean veterans from the US-Vietnam war.

Acrolein contributes to human colorectal tumorigenesis through the activation of RAS-MAPK pathway.

Can the exposure system adopted influence the results of the atrazine toxicity in hepatic tissue of fish?

Evaluation and comparison of advanced oxidation processes for the degradation of 2,4-dichlorophenoxyacetic acid (2,4-D): a review.

Fluorfenidone attenuates paraquat-induced pulmonary fibrosis by regulating the PI3K/Akt/mTOR signaling pathway and autophagy.

Identification of lncRNA expression profiles and analysis of ceRNA in the hippocampus of perinatal glyphosate-exposed mice.

Effects of the emulsifiable herbicide Dicamba on amphibian tadpoles: an underestimated toxicity risk?

The hepatotoxicity of atrazine exposure in mice involves the intestinal microbiota.

The effects of carbon monoxide releasing molecules on paraquat-induced pulmonary interstitial inflammation and fibrosis.

Epigenetic Changes Associated With Exposure to Glyphosate-Based Herbicides in Mammals.

Analysis of Biomechanical Parameters of Muscle Soleus Contraction and Blood Biochemical Parameters in Rat with Chronic Glyphosate Intoxication and Therapeutic Use of C(60) Fullerene.

Lipoxin A4 protects against paraquat-induced acute lung injury by inhibiting the TLR4/MyD88-mediated activation of the NF- κ B and PI3K/AKT pathways.

Evaluation of the hepatoprotective effects of curcumin and nanocurcumin against paraquat-induced liver injury in rats: Modulation of oxidative stress and Nrf2 pathway.

Exposure Impacts of Environmentally Relevant Concentrations of a Glufosinate Ammonium Herbicide Formulation on Larval Development and Thyroid Histology of *Xenopus laevis*.

Fluorochloridone induces autophagy in TM4 Sertoli cells: involvement of ROS-mediated AKT-mTOR signaling pathway.

Integration of paraquat pharmacokinetic data across species using PBPK modelling.

Paraquat pharmacokinetics in primates and extrapolation to humans.

Carvacrol and PPAR γ agonist, pioglitazone, affects inhaled paraquat-induced lung injury in rats.

In vitro Interference of a Glyphosate Commercial Formulation with the Stimulation of Ovarian Maturation by Progesterone, in the Estuarine Crab *Neohelice granulata*.

Assessment of the impacts of glyphosate and its commercial formulation Roundup® on the respiratory tree of the sea cucumber *Holothuria forskali* using a multivariate biomarker approach.

The maize SUMO conjugating enzyme ZmSCE1b protects plants from paraquat toxicity.

2,4-Dichlorophenoxyacetic acid induced hepatic and renal toxicological perturbations in rat model: Attenuation by selenium supplementation.

Effects of glyphosate-based herbicide-contaminated diets on reproductive organ toxicity and hypothalamic-pituitary-ovarian axis hormones in weaned piglets.

Paraquat Inhalation, a Translationally Relevant Route of Exposure: Disposition to the Brain and Male-Specific Olfactory Impairment in Mice.

Chronic toxicity of technical atrazine to the fathead minnow (*Pimephales promelas*) during a full life-cycle exposure and an evaluation of the consistency of responses.

Hepatotoxic Effects of Atrazine on *Clarias gariepinus* (Burchell, 1822): Biochemical and Histopathological Studies.

Genotoxic and epigenetic effects of diuron in the Pacific oyster: in vitro evidence of interaction between DNA damage and DNA methylation.

Changes in microtubule stability in zebrafish (*Danio rerio*) embryos after glyphosate exposure.

LncRNA XIST sponges miR-199a-3p to modulate the Sp1/LRRK2 signal pathway to accelerate Parkinson's disease progression.

The agrochemical S-metolachlor disrupts molecular mediators and morphology of the swim bladder: Implications for locomotor activity in zebrafish (*Danio rerio*).

Common and particular biochemical responses of *Unio tumidus* to herbicide, pharmaceuticals and their combined exposure with heating.

Profiling and fingerprinting strategies to assess exposure of edible plants to herbicides.

Design, Synthesis, and SAR of Novel 1,3-Disubstituted Imidazolidine or Hexahydropyrimidine Derivatives as Herbicide Safeners.

Effect of Fertactyl(®) on the absorption and translocation of (14)C-glyphosate in young eucalyptus plants.

HSPB5 (Î±B-crystallin) confers protection against paraquat-induced oxidative stress at the organismal level in a tissue-dependent manner.

Effects of Trans-Cinnamaldehyde on Reperfused Ischemic Skeletal Muscle and the Relationship to Laminin.

Carnosine quenches the reactive carbonyl acrolein in the central nervous system and attenuates autoimmune neuroinflammation.

Digital image processing: a useful tool in the analysis of lung injuries caused by chronic inhalation of agricultural herbicides.

Evidence of acrolein in synovial fluid of dogs with osteoarthritis as a potential inflammatory biomarker.

Biofunctional chemistry and reactivity of biogenic acrolein for cancer diagnosis and therapy.

Identification of hub genes and key pathways of paraquat-induced human embryonic pulmonary fibrosis by bioinformatics analysis and in vitro studies.

Neuroprotective Effect of Cinnamaldehyde on Secondary Brain Injury After Traumatic Brain Injury in a Rat Model.

Screening the Q-markers of TCMs from RA rat plasma using UHPLC-QTOF/MS technique for the comprehensive evaluation of Wu-Wei-Wen-Tong Capsule.

Protective effect of lutein against acrolein-induced ototoxicity in rats.

Inhibition of Lipopolysaccharide-Induced Inflammatory and Oxidative Responses by Trans-cinnamaldehyde in C2C12 Myoblasts.

The Onset of Systemic Oxidative Stress Associated with the Accumulation of Lipid Peroxidation Product Acrolein in the Skin of Patients with Small-Vessel Vasculitis.

Esophagitis dissecans superficialis associated with acute transoral paraquat poisoning: Clinical study of 15 cases.

Effect of Fluorofenidone Against Paraquat-Induced Pulmonary Fibrosis Based on Metabolomics and Network Pharmacology.

Coniferaldehyde prevents articular cartilage destruction in a murine model via Nrf2/HO-1 pathway.

Polyamine biomarkers as indicators of human disease.

Association of Agricultural, Occupational, and Military Inhalants With Autoantibodies and Disease Features in US Veterans With Rheumatoid Arthritis.

Plasma acrolein level in rheumatoid arthritis increases independently of the disease characteristics.

Suppression of Th17 cell differentiation via sphingosine-1-phosphate receptor 2 by cinnamaldehyde can ameliorate ulcerative colitis.

Thal protects against paraquat-induced lung injury through a microRNA-141/HDAC6/Î²-tubulin-NF-Î² axis in rat and cell models.

Arenaria kansuensis attenuates pulmonary fibrosis in mice via the activation of Nrf2 pathway and the inhibition of NF-Î²B/TGF-Î²1/Smad2/3 pathway.

Urinary Levels of the Acrolein Conjugates of Carnosine Are Associated with Cardiovascular Disease Risk.

An Unusual Case of Paraquat-Induced Rhabdomyolysis and Hepatic Injury Presenting With Takotsubo Cardiomyopathy.

Gallic acid exerts anti-inflammatory, anti-oxidative stress, and nephroprotective effects against paraquat-induced renal injury in male rats.

Absorption, Distribution, Metabolism, and Excretion of a New Herbicide, Epyrifenacil, in Rats.

Transmission electron microscopic analysis of glyphosate induced cytotoxicity and its attenuation by N-acetyl-L-cysteine in caprine testicular germ cells in vitro.

E-cigarette vaping liquids and the flavoring chemical cinnamaldehyde perturb bone, cartilage and vascular development in zebrafish embryos.

Metabolic and residual characteristic of different arsenic species contained in laver during mouse digestion.

Study of muscle fibers of the extensor digitorum longus and soleus muscles of C57BL/6 females exposed to glyphosate during pregnancy and lactation.

Synthesis, optical properties, determination and imaging in living cells and bamboo of cinnamaldehyde derivatives.

Effects of sodium arsenite and dimethyl arsenic acid on Liaoning cashmere goat skin fibroblasts.

[The effect of diallyl sulfide on the lung tissue of rats poisoned by paraquat].

DNA methylation in the adipose tissue and whole blood of Agent Orange-exposed Operation Ranch Hand veterans: a pilot study.

An Intensified Acrolein Exposure Can Affect Memory and Cognition in Rat.

Trans-cinnamaldehyde protects C2C12 myoblasts from DNA damage, mitochondrial dysfunction and apoptosis caused by oxidative stress through inhibiting ROS production.

Comprehensive analyses of degradative enzymes associated with mesotrione-degraded process in rice for declining environmental risks.

The problem with implementing fish farms in agricultural regions: A trial in a pampean pond highlights potential risks to both human and fish health.

Arsenic-induced lung inflammation and fibrosis in a rat model: Contribution of the HMGB1/RAGE, PI3K/AKT, and TGF- β 1/SMAD pathways.

Chrysin attenuates sodium arsenite-induced nephrotoxicity in rats by suppressing oxidative stress and inflammation.

Low-dose PCB126 exposure disrupts cardiac metabolism and causes hypertrophy and fibrosis in mice.

Niclosamide affects intracellular TDP-43 distribution in motor neurons, activates mitophagy, and attenuates morphological changes under stress.

Probing Loop-Mediated Isothermal Amplification (LAMP) targeting two gene-fragments of rose rosette virus.

Aryl Hydrocarbon Receptor Repressor Is Hypomethylated in Psoriasis and Promotes Psoriasis-like Inflammation in HaCaT Cells.

Aryl hydrocarbon receptor (AHR) functions in infectious and sterile inflammation and NAD(+)-dependent metabolic adaptation.

Potential role of dietary chitosan nanoparticles against immunosuppression, inflammation, oxidative stress, and histopathological alterations induced by pendimethalin toxicity in Nile tilapia.

Untargeted serum metabolomics and potential biomarkers for Sjögren's syndrome.

DNA Damage and Expression Profile of Genes Associated with Nephrotoxicity Induced by Butralin and Ameliorating Effect of Arabic Gum in Female Rats.

These boots are made for burnin': Inferring the position of the corpse and the presence of leather footwears during cremation through isotope ($\delta^{13}C$, $\delta^{18}O$) and infrared (FTIR) analyses of experimentally burnt skeletal remains.

Effects of prebiotic oligofructose-enriched inulin on gut-derived uremic toxins and disease progression in rats with adenine-induced chronic kidney disease.

AMP deamination is sufficient to replicate an atrophy-like metabolic phenotype in skeletal muscle.

Iron distribution in different tissues of homozygous Mask (msk/msk) mice and the effects of oral iron treatments.

The protein-bound uremic toxin p-cresyl-sulfate promotes intracellular ROS production and lipid peroxidation in 3T3-L1 adipose cells.

Transcriptome-based analysis of blood samples reveals elevation of DNA damage response, neutrophil degranulation, cancer and neurodegenerative pathways in Plasmodium falciparum patients.

The Aryl hydrocarbon receptor mediates reproductive toxicity of polychlorinated biphenyl congener 126 in rats.

Citrullinated and homocitrullinated low-density lipoprotein in rheumatoid arthritis.

Association between occupational exposures and sarcoma incidence and mortality: systematic review and meta-analysis.

Circulating p-Cresyl Sulfate, Non-Hepatic Alkaline Phosphatase and Risk of Bone Fracture Events in Chronic Kidney Disease-Mineral Bone Disease.

Intravenous iron is non-inferior to oral iron regarding cell growth and iron metabolism in colorectal cancer associated with iron-deficiency anaemia.

Skeletal myopathy in CKD: a comparison of adenine-induced nephropathy and 5/6 nephrectomy models in mice.

A novel imidazolinone metformin-methylglyoxal metabolite promotes endothelial cell angiogenesis via the eNOS/HIF-1 α pathway.

Iron overload during the embryonic period develops hyperactive like behavior and dysregulation of biogenic amines in *Drosophila melanogaster*.

Role of inhibiting Chk1-p53 pathway in hepatotoxicity caused by chronic arsenic exposure from coal-burning.

Gallic acid ameliorates sodium arsenite-induced renal and hepatic toxicity in rats.

Unconjugated p-cresol activates macrophage macropinocytosis leading to increased LDL uptake.

[The Comparison of Iron Deficiency Anemia Rat Treated with Hydroxypropyl Chitosan Ferrous Ion Complex and Ferrous Sulfate].

Regulated hypothermia in response to endotoxin in birds.

[Aryl hydrocarbon receptor modulates airway inflammation in mice with cockroach allergen-induced asthma by regulating Th17/Treg differentiation].

TP53INP1 exerts neuroprotection under ageing and Parkinson's disease-related stress condition.

Multi-Nutrient Fortified Dairy-Based Drink Reduces Anaemia without Observed Adverse Effects on Gut Microbiota in Anaemic Malnourished Nigerian Toddlers: A Randomised Dose-Response Study.

Pathology of salivary gland dysfunction and restoration of function.

Associations among total p-cresylsulfate, indoxyl sulfate and hippuric acid levels with hemodialysis quality indicators in maintenance hemodialysis patients.

COPD-derived fibroblasts secrete higher levels of senescence-associated secretory phenotype proteins.

Coenzyme Q(10) protected against arsenite and enhanced the capacity of 2,3-dimercaptosuccinic acid to ameliorate arsenite-induced toxicity in mice.

2,4-Dinitrophenol overdose - Everything old is new again.

Occupation, occupational exposures and mammographic density in Spanish women.

Vitamin D improves pulmonary function in a rat model for congenital diaphragmatic hernia.

Thrombolome and Its Emerging Role in Chronic Kidney Diseases.

Iron Protein Succinylate in the Management of Iron Deficiency Anemia: A Comparative Study with Ferrous Sulphate at Low and High Therapeutic Doses.

Impact of congenital diaphragmatic hernia on diaphragm muscle function in neonatal rats.

Mitochondria exert age-divergent effects on recovery from spinal cord injury.

Assessment of fibrotic pathways induced by environmental chemicals using 3D-human liver microtissue model.

Cenobamate: Neuroprotective Potential of a New Antiepileptic Drug.

Attenuation of sodium arsenite-induced cardiotoxicity and neurotoxicity with the antioxidant, anti-inflammatory, and antiapoptotic effects of hesperidin.

The Role of Gut Bacterial Metabolites in Brain Development, Aging and Disease.

Mechanisms involved in the possible protective effect of chrysin against sodium arsenite-induced liver toxicity in rats.

Ameliorative role of bosentan, an endothelin receptor antagonist, against sodium arsenite-induced renal dysfunction in rats.

Inorganic arsenic-mediated upregulation of AS3MT promotes proliferation of nonsmall cell lung cancer cells by regulating cell cycle genes.

TCDD attenuates EAE through induction of FasL on B cells and inhibition of IgG production.

Novel tankyrase inhibitors suppress TDP-43 aggregate formation.

Profiling of human burned bones: oxidising versus reducing conditions.

Uraemic toxins impair skeletal muscle regeneration by inhibiting myoblast proliferation, reducing myogenic differentiation, and promoting muscular fibrosis.

The impact of dextran sodium sulphate and probiotic pre-treatment in a murine model of Parkinson's disease.

Amniotic fluid metabolic fingerprinting indicated metabolites which may play a role in the pathogenesis of foetal Down syndrome - a preliminary report.

Catalase deficiency induces reactive oxygen species mediated pexophagy and cell death in the liver during prolonged fasting.

P-cresol and Indoxyl Sulfate Impair Osteogenic Differentiation by Triggering Mesenchymal Stem Cell Senescence.

Epithelial cell-adhesion protein cadherin 26 is dysregulated in congenital diaphragmatic hernia and congenital pulmonary airway malformation.

Exposure to pollutants altered glucocorticoid signaling and clock gene expression in female mice. Evidence of tissue- and sex-specificity.

Co-exposure to nTiO₂ impairs arsenic metabolism and affects antioxidant capacity in the marine shrimp *Litopenaeus vannamei*.

Revising the Role of Cortical Cytoskeleton during Secretion: Actin and Myosin XI Function in Vesicle Tethering.

Somatic Embryo Yield and Quality From Norway Spruce Embryogenic Tissue Proliferated in Suspension Culture.

Transformation of Teosinte (*Zea mays ssp. parviglumis*) via Biolistic Bombardment of Seedling-Derived Callus Tissues.

The Promising Role of Chitosan-Poloxamer 188 Nanocrystals in Improving Diosmin Dissolution and Therapeutic Efficacy against Ferrous Sulfate-Induced Hepatic Injury in Rats.

The Improvement of the Adaptation Process of Tocopherol and Acetylsalicylic Acid in Offspring of Mothers Exposed to TCDD.

Suppression of apoptotic signaling in rat hepatocytes by non-dioxin-like polychlorinated biphenyls depends on the receptors CAR and PXR.

Endogenous regulation of the Akt pathway by the aryl hydrocarbon receptor (AhR) in lung fibroblasts.

The Effect of Daminozide, Dark/Light Schedule and Copper Sulphate in Tissue Culture of Triticum timopheevii.

Chronic Dietary Exposure of Roosters to a Glyphosate-Based Herbicide Increases Seminal Plasma Glyphosate and AMPA Concentrations, Alters Sperm Parameters, and Induces Metabolic Disorders in the Progeny.

Formation of Cytoplasmic Actin-Cofilin Rods is Triggered by Metabolic Stress and Changes in Cellular pH.

Developmental Toxicology of Metal Mixtures in Drosophila: Unique Properties of Potency and Interactions of Mercury Isoforms.

An electrochemical immunosensor for the detection of carcinoembryonic antigen based on Au/g-C(3)N(4) NSs-modified electrode and CuCo/CNC as signal tag.

A mixture of 15 phthalates and pesticides below individual chemical no observed adverse effect levels (NOAELs) produces reproductive tract malformations in the male rat.

Comparative Genotoxicity and Mutagenicity of Cigarette, Cigarillo, and Shisha Tobacco Products in Epithelial and Cardiac Cells.

Occurrence and risks of PCDD/Fs and PCBs in three raptors from North China.

Evaluation of Behavioral Changes and Tissue Damages in Common Carp (*Cyprinus carpio*) after Exposure to the Herbicide Glyphosate.

The correlation between the level of 3-hydroxypropyl mercapturic acid, CYP2B6 polymorphisms, and hematuria occurrences after cyclophosphamide administration and its bioanalytical methods: A systematic review.

Low-Dose Cyclophosphamide Induces Nerve Injury and Functional Overactivity in the Urinary Bladder of Rats.

An injectable anti-microbial and adhesive hydrogel for the effective noncompressible visceral hemostasis and wound repair.

Absence of prostacyclin greatly relieves cyclophosphamide-induced cystitis and bladder pain in mice.

Bone toxicity induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and the retinoid system: A causality analysis anchored in osteoblast gene expression and mouse data.

Electro-conductive carbon nanofibers containing ferrous sulfate for bone tissue engineering.

Impact of whole-body versus nose-only inhalation exposure systems on systemic, respiratory, and cardiovascular endpoints in a 2-month cigarette smoke exposure study in the ApoE(-/-) mouse model.

ABA signalling promotes cell totipotency in the shoot apex of germinating embryos.

A Novel Supplement Attenuates Oxidative Stress-Induced TDP-43-Related Pathogenesis in TDP-43-Expressed Cells.

Variables Affecting Shoot Growth and Plantlet Recovery in Tissue Cultures of Drug-Type Cannabis sativa L.

[Vigilance against a highly lethal insecticide chlorfenapyr poisoning (report of 4 cases and literature review)].

ROCK1 Mediates Retinal Glial Cell Migration Promoted by Acrolein.

GDNF requires HIF-1 α and RET activation for suppression of programmed cell death of enteric neurons by metabolic challenge.

Borate and boric acid supplementation of drinking water alters teeth and bone mineral density and composition differently in rabbits fed a high protein and energy diet.

Endocrine disrupting chemicals and bone.

A Common Insecticide Induced-Oxidative Stress in Wistar Rats: Significance for Humans and Implications for Nutritional Modulation of Insecticide Toxicity.

Effect of paraquat on cytotoxicity involved in oxidative stress and inflammatory reaction: A review of mechanisms and ecological implications.

Pelargonic acid vanillylamide and rosuvastatin protect against oxidized low-density lipoprotein-induced endothelial dysfunction by inhibiting the NF- κ B/NLRP3 pathway and improving cell-cell junctions.

Impact of broad-spectrum pesticides used in the agricultural and forestry sector on the pesticide profile in wild boar, roe deer and deer and risk assessment for venison consumers.

P2X7 Receptor Blockade Protects Against Acrolein-Induced Bladder Damage: A Potential New Therapeutic Approach for the Treatment of Bladder Inflammatory Diseases.

Effects of Acute Diquat Poisoning on Liver Mitochondrial Apoptosis and Autophagy in Ducks.

Formulation and Characterization of a New Injectable Bone Substitute Composed PVA/Borax/CaCO₃ and Demineralized Bone Matrix.

Accumulation, transformation and subcellular distribution of arsenite associated with five carbon nanomaterials in freshwater zebrafish specific-tissues.

Fine particulate matter air pollution and aortic perivascular adipose tissue: Oxidative stress, leptin, and vascular dysfunction.

Arc1 and the microbiota together modulate growth and metabolic traits in Drosophila.

Neurons expressing the aryl hydrocarbon receptor in the locus coeruleus and island of Calleja major are novel targets of dioxin in the mouse brain.

Can kissing cause paraquat poisoning: A case report and review of literature.

Cigarette Smoke Containing Acrolein Upregulates EGFR Signaling Contributing to Oral Tumorigenesis In Vitro and In Vivo.

Determination of Pendimethalin Dynamic Residual Distribution in Crucian Carp Tissues and Associated Risk Assessment.

A mechanism linking perinatal 2,3,7,8 tetrachlorodibenzo-p-dioxin exposure to lower urinary tract dysfunction in adulthood.

Cell wall damage attenuates root hair patterning and tissue morphogenesis mediated by the receptor kinase STRUBBELIG.

Predicting consequences of POP-induced disruption of blubber glucose uptake, mass gain rate and thyroid hormone levels for weaning mass in grey seal pups.

Advancing continuous subcutaneous insulin infusion in vivo: New insights into tissue challenges.

Protective and therapeutic effect of hydrogen sulfide on hemorrhagic cystitis and testis dysfunction induced with cyclophosphamide.

Impacts of Sodium Arsenite on Wood Microbiota of Esca-Diseased Grapevines.

Glyphosate-Based Herbicides Alter the Reproductive Morphology of *Rosa acicularis* (Prickly Rose).

Injectable hydrogels based on oxidized alginate-gelatin reinforced by carbon nitride quantum dots for tissue engineering.

Pharmacokinetics of 2-phenoxyethanol and its major metabolite, phenoxyacetic acid, after dermal and inhaled routes of exposure: application to development PBPK model in rats.

Changes induced by chronic exposure to high arsenic concentrations in the intestine and its microenvironment.

Recombinant Expression of Thrombolytic Agent Reteplase in Marine Microalga *Tetraselmis subcordiformis* (Chlorodendrales, Chlorophyta).

Distribution and toxicity of persistent organic pollutants and methoxylated polybrominated diphenylethers in different tissues of the green turtle *Chelonia mydas*.

Targeted 1,3-dipolar cycloaddition with acrolein for cancer prodrug activation.

Uremic Toxins in Organ Crosstalk.

Flexibility of equine bioenergetics and muscle plasticity in response to different types of training: An integrative approach, questioning existing paradigms.

In vivo comet assay in rabbit corneal epithelial cells following ocular instillation with genotoxic compounds.

Atrazine Promoted Epithelial Ovarian Cancer Cells Proliferation and Metastasis by Inducing Low Dose Reactive Oxygen Species (ROS).

Borax-loaded injectable alginate hydrogels promote muscle regeneration in vivo after an injury.

PCB and TCDD derived embryonic cardiac defects result from a novel AhR pathway.

Effects of different hormonal treatments on growth parameters and secondary metabolite production in organ culture of *Hyssopus officinalis* L.

Direct and Indirect Somatic Embryogenesis Induction in *Camellia oleifera* Abel.

Experimental acute arsenic toxicity in Balb/c mice: organic markers and splenic involvement.

Detoxification of Reactive Aldehydes by Alda-1 Treatment Ameliorates Experimental Autoimmune Encephalomyelitis in Mice.

Reproductive Toxicity of 3,4-dichloroaniline (3,4-DCA) on Javanese Medaka (*Oryzias javanicus*, Bleeker 1854).

Adenosine Receptor and Its Downstream Targets, Mod(mdg4) and Hsp70, Work as a Signaling Pathway Modulating Cytotoxic Damage in *Drosophila*.

Opposing Effects of TGF β 2 and BMP in the Pulmonary Vasculature in Congenital Diaphragmatic Hernia.

Immune and Nervous Systems Interaction in Endocrine Disruptors Toxicity: The Case of Atrazine.

Saul-Wilson Syndrome Missense Allele Does Not Show Obvious Golgi Defects in a *C. elegans* Model.

HGF-Modified Dental Pulp Stem Cells Mitigate the Inflammatory and Fibrotic Responses in Paraquat-Induced Acute Respiratory Distress Syndrome.

Sodium arsenite induces spatial learning and memory impairment associated with oxidative stress and activates the Nrf2/PPAR γ 3 pathway against oxidative injury in mice hippocampus.

Occupational use of agrochemicals results in inhibited cholinesterase activity and altered reproductive hormone levels in male farmers from Buea, Cameroon.

Oxidative testicular injury: effect of L-leucine on redox, cholinergic and purinergic dysfunctions, and dysregulated metabolic pathways.

Novel phenylpyrimidine derivatives containing a hydrazone moiety protect rice seedlings from injury by metolachlor.

Effect of uncouplers of oxidative phosphorylation on metabolism of propionate in liver explants from dairy cows.

Super flexible, fatigue resistant, self-healing PVA/xylan/borax hydrogel with dual-crosslinked network.

Bach1 plays an important role in angiogenesis through regulation of oxidative stress.

Enlisting a Traditional Chinese Medicine to tune the gelation kinetics of a bioactive tissue adhesive for fast hemostasis or minimally invasive therapy.

Hybrid gelatin/oxidized chondroitin sulfate hydrogels incorporating bioactive glass nanoparticles with enhanced mechanical properties, mineralization, and osteogenic differentiation.

Beyond the Tip of the Blade: An Investigation of Upper Extremity Machete Injuries in Honduras.

Antioxidant effects of *Embllica officinalis* and *Zingiber officinalis* on arsenic and lead induced toxicity on Albino rats.

Organic pollutants in marine samples from Tunisian coast: Occurrence and associated human health risks.

Single Amino Acid Exchange in ACTIN2 Confers Increased Tolerance to Oxidative Stress in *Arabidopsis* *der1-3* Mutant.

Isolation of 4-hydroxy 3-methyl 2-butenyl 4-diphosphate reductase (ApHDR) gene of methyl erythritol diphosphate (MEP) pathway, in silico analysis and differential tissue specific ApHDR expression in *Andrographis paniculata* (Burm. f) Nees.

Design of epidermal growth factor immobilization on 3D biocompatible scaffolds to promote tissue repair and regeneration.

Cyclophosphamide arrhythmogenicity testing using human-induced pluripotent stem cell-derived cardiomyocytes.

Downregulation of epithelial DUOX1 in chronic obstructive pulmonary disease.

2,4-Dichlorophenoxyacetic Acid Poisoning Mimicking as Organophosphorus Poisoning.

Secondary Somatic Embryogenesis in *Centaurium erythraea* Rafn.

A bone regeneration strategy via dual delivery of demineralized bone matrix powder and hypoxia-pretreated bone marrow stromal cells using an injectable self-healing hydrogel.

Arsenic-induced HER2 promotes proliferation, migration and angiogenesis of bladder epithelial cells via activation of multiple signaling pathways in vitro and in vivo.

Identification of molecular toxicity pathways across early life-stages of zebrafish exposed to PCB126 using a whole transcriptomics approach.

Oxidative Stress and Lipid Mediators Modulate Immune Cell Functions in Autoimmune Diseases.

Protective effect of melatonin against herbicides-induced hepatotoxicity in rats.

Production of Doubled Haploid Embryos from Cork Oak Anther Cultures by Antimitotic Agents and Temperature Stress.

High levels of dioxins and PCBs in meat, fat and livers of free ranging pigs, goats, sheep and cows from the island of Curaçao.

Military service and related risk factors for amyotrophic lateral sclerosis.

Roundup causes embryonic development failure and alters metabolic pathways and gut microbiota functionality in non-target species.

A 90-day subchronic toxicity study of transgenic cotton expressing Cry1Ac, Cry2A and CP4-EPSPS proteins in Sprague-Dawley rats.

Integrated ecotoxicological assessment of the complex interactions between chlorpyrifos and glyphosate on a non-target species *Cnesterodon decemmaculatus* (Jenyns, 1842).

Glyphosate-based herbicide formulations and reproductive toxicity in animals.

Are glyphosate and glyphosate-based herbicides endocrine disruptors that alter female fertility?

[Atrazine changes meiosis and reduces spermatogenesis in male mice].

Effects of tacrolimus on the TGF β 1/SMAD signaling pathway in paraquat-exposed rat alveolar type II epithelial cells.

Reduction by, ligand exchange among, and covalent binding to glutathione and cellular thiols link metabolism and disposition of dietary arsenic species with toxicity.

Urinary crystal formation and urothelial effects of pyroxasulfone administered to male rats.

Octreotide alleviates pancreatic damage caused by paraquat in rats by reducing inflammatory responses and oxidative stress.

Toxicological impacts of herbicide paraquat dichloride on histological profile (gills, liver, and kidney) of freshwater fish *Channa punctatus* (Bloch).

Herbicide Glyphosate: Toxicity and Microbial Degradation.

Paraquat induces pulmonary fibrosis through Wnt/ β -catenin signaling pathway and myofibroblast differentiation.

Chronic exposure of human glioblastoma tumors to low concentrations of a pesticide mixture induced multidrug resistance against chemotherapy agents.

Role of the Hippo signaling pathway in safflower yellow pigment treatment of paraquat-induced pulmonary fibrosis.

Brain alterations in GABA, glutamate and glutamine markers after chronic atrazine exposure in the male albino rat.

Determination of arsenicals in mouse tissues after simulated exposure to arsenic from rice for sixteen weeks and the effects on histopathological features.

Orthotopic foetal lung tissue direct injection into lung showed a preventive effect against paraquat-induced acute lung injury in mice.

AhR-activating pesticides increase the bovine ABCG2 efflux activity in MDCKII-bABCG2 cells.

Evaluation of buccal damage associated with acute inhalation exposure to 2,4-dichlorophenoxyacetic acid (2,4-D) in mice.

Link between increased cellular senescence and extracellular matrix changes in COPD.

The enantioselective enrichment, metabolism, and toxicity of fenoxaprop-ethyl and its metabolites in zebrafish.

[Study on the protective effect and mechanism of somatostatin on renal injury in paraquat intoxicated mice].

Control of the neuroprotective Lipocalin Apolipoprotein D expression by alternative promoter regions and differentially expressed mRNA 5' UTR variants.

Emerging contaminants in water used for maize irrigation: Economic and food safety losses associated with ciprofloxacin and glyphosate.

Increased basal antioxidant levels in RCAN1 - deficient mice lowers oxidative injury after acute paraquat insult.

Exploration of therapeutic role of montelukast and dexamethasone combination against paraquat induced inhalational toxicity.

Osteonecrosis of Femoral Head, An Overlooked Long-Term Complication after Paraquat Intoxication: A Retrospective Cohort Study.

Exposure to a Glyphosate-based Herbicide Alters the Expression of Key Regulators of Mammary Gland Development on Pre-pubertal Male Rats.

Exposure to inorganic arsenic and its methylated metabolites alters metabolomics profiles in INS-1 832/13 insulinoma cells and isolated pancreatic islets.

Zebrafish (*Danio rerio*) ability to activate ABC transporters after exposure to glyphosate and its formulation Roundup Transorb®.

Atrazine induces penis abnormalities including hypospadias in mice.

[Effect of bone marrow mesenchymal stem cells on paraquat-induced pulmonary fibrosis in rats].

[The expression of Nrf2 in the lung tissue of rats with acute diquat poisoning and the distribution of diquat in lungs].

Environmental Pollution, Oxidative Stress and Thioretinaco Ozonide: Effects of Glyphosate, Fluoride and Electromagnetic Fields on Mitochondrial Dysfunction in Carcinogenesis, Atherogenesis and Aging.

Acrolein contributes to urothelial carcinomas in patients with chronic kidney disease.

Sub-chronic exposure to Kalach 360 SL, Glyphosate-based Herbicide, induced bone rarefaction in female Wistar rats.

Effects of parental exposure to glyphosate-based herbicides on embryonic development and oxidative status: a long-term experiment in a bird model.

Distinct m(6)A methylome profiles in poly(A) RNA from *Xenopus laevis* testis and that treated with atrazine.

Roundup-induced biochemical and histopathological changes in the liver and kidney of rats: the ameliorative effects of *Linum usitatissimum* oil.

Acrolein-induced apoptosis of smooth muscle cells through NEAT1-Bmal1/Clock pathway and a protection from asparagus extract.

Toxicity of the aquatic herbicide, reward[®], on the fathead minnow with pulsed-exposure proteomic profile.

Glyphosate-based herbicide induces hyperplastic ducts in the mammary gland of aging Wistar rats.

Primary hippocampal estrogenic dysfunction induces synaptic proteins alteration and neuronal cell death after single and repeated paraquat exposure.

A source of exogenous oxidative stress improves oxidative status and favors pheomelanin synthesis in zebra finches.

Female Preference and Adverse Developmental Effects of Glyphosate-Based Herbicides on Ecologically Relevant Traits in Japanese Quails.

MiR-130a-5p/Foxa2 axis modulates fetal lung development in congenital diaphragmatic hernia by activating the Shh/Gli1 signaling pathway.

The protective impact of Trans-Cinnamaldehyde (TCA) against the IL-1b induced inflammation in in vitro osteoarthritis model by regulating PI3K/AKT pathways.

Testosterone antagonizes paraquat-induced cardiomyocyte senescence via the mIGF-1/SIRT1 signaling pathway.

Amelioration of paraquat-induced pulmonary fibrosis in mice by regulating miR-140-5p expression with the fibrogenic inhibitor Xuebijing.

Interference of an atrazine commercial formulation with the endocrine control of ovarian growth exerted by the eyestalks.

Oxidative stress, histopathological alterations and anti-oxidant capacity in different tissues of largemouth bass (*Micropterus salmoides*) exposed to a newly developed sodium carbonate peroxyhydrate granular algaecide formulated with hydrogen peroxide.

Assessment of the effects of atrazine, dichlorodiphenyltrichloroethane, and dimethoate on freshwater fish (*Oreochromis mossambicus*): a case study of the A2 farmlands in Chiredzi, in the southeastern part of Zimbabwe.

A Synthetic Snake-Venom-Based Tripeptide Protects PC12 Cells from the Neurotoxicity of Acrolein by Improving Axonal Plasticity and Bioenergetics.

Involvement of ADAM10 in acrolein-induced astrocytic inflammation.

Magnesium supplementation ameliorates toxic effects of 2,4-dichlorophenoxyacetic acid in rat model.

Ischemic stroke disrupts the endothelial glycocalyx through activation of proHPSE via acrolein exposure.

Protective Effects of Cinnamaldehyde against Mesenteric Ischemia-Reperfusion-Induced Lung and Liver Injuries in Rats.

Cinnamaldehyde Inhibits the Function of Osteosarcoma by Suppressing the Wnt/ β -Catenin and PI3K/Akt Signaling Pathways.

Analysis of Acrolein Exposure Induced Pulmonary Response in Seven Inbred Mouse Strains and Human Primary Bronchial Epithelial Cells Cultured at Air-Liquid Interface.

Structural change and degradation of cytoskeleton due to the acrolein conjugation with vimentin and actin during brain infarction.

Cinnamaldehyde Attenuates the Progression of Rheumatoid Arthritis through Down-Regulation of PI3K/AKT Signaling Pathway.

Investigation of resistant level to tribenuron-methyl, diversity and regional difference of the resistant mutations on acetolactate synthase (ALS) isozymes in *Descurainia sophia* L. from China.

Effects of Cinnamon (*Cinnamomum* spp.) in Dentistry: A Review.

Cinnamaldehyde protects against rat intestinal ischemia/reperfusion injuries by synergistic inhibition of NF- κ B and p53.

MiADMSA ameliorate arsenic induced urinary bladder carcinogenesis in vivo and in vitro.

[Therapeutic effect of cinnamaldehyde on ulcerative colitis in mice induced by dextran sulfate sodium with *Candida albicans* colonization and its effect on dectin-1/TLRs/NF- κ B signaling pathway].

Cinnamaldehyde suppresses NLRP3 derived IL-1 β via activating succinate/HIF-1 in rheumatoid arthritis rats.

Cinnamaldehyde protects against oxidative stress and inhibits the TNF α -induced inflammatory response in human umbilical vein endothelial cells.

Cinnamaldehyde Inhibits Inflammation of Human Synoviocyte Cells Through Regulation of Jak/Stat Pathway and Ameliorates Collagen-Induced Arthritis in Rats.

Mechanisms of *Lolium rigidum* multiple resistance to ALS- and ACCase-inhibiting herbicides and their impact on plant fitness.

Ingestion of organic acids and cinnamaldehyde improves tissue homeostasis of piglets exposed to enterotoxigenic *Escherichia coli* (ETEC).

Assessing acrolein for determination of the severity of brain stroke, dementia, renal failure, and Sjögren's syndrome.

Transmission Electron Microscopy and Morphometry of the CNS White Matter.

Antifungal and Antimicrobial Trichothecene Sesquiterpenes from the Marine Algicolous Fungus *Trichoderma brevicompactum* A-DL-9-2.

Coupling Transcriptomics and Behaviour to Unveil the Olfactory System of *Spodoptera exigua* Larvae.

Antioxidant defense system in lettuce tissues upon various As species exposure.

Somatic embryogenesis from leaf tissues of macaw palm [*Acrocomia aculeata* (Jacq.) Lodd. ex Mart.].

Auxinic herbicide conjugates with an α -amino acid function: Structural requirements for biological activity on motor cells.

Arsenic fractionation in sediments and speciation in muscles of fish, *Chrysichthys nigrodigitatus* from a contaminated tropical Lagoon, Nigeria.

Evaluation of joint toxicity of heavy metals and herbicide mixtures in soils to earthworms (*Eisenia fetida*).

Understanding the Functional Impact of VOC-Ozone Mixtures on the Chemistry of RNA in Epithelial Lung Cells.

Different Roles of Auxins in Somatic Embryogenesis Efficiency in Two *Picea* Species.

Transient receptor potential ankyrin-1 causes rapid bronchodilation via nonepithelial PGE(2).

Disruption of cytochrome P450 enzymes in the liver and small intestine in chicken embryos in ovo exposed to glyphosate.

Direct and indirect effects of plant diversity and phenoxy herbicide application on the development and reproduction of a polyphagous herbivore.

Influence of eco-friendly phytotoxic metabolites from *Lasiodiplodia pseudotheobromae* C1136 on physiological, biochemical, and ultrastructural changes on tested weeds.

Maternal and Fetal Blood Pharmacokinetics and Organ Distribution of Atrazine, Propazine, Simazine, and Their Metabolites in Pregnant Rats After Chronic Oral Administration.

Rapamycin attenuates the paraquat-induced pulmonary fibrosis through activating Nrf2 pathway.

Acid-sensitive oxidative stress inducing and photoabsorbing polysaccharide nanoparticles for combinational anticancer therapy.

Loss of CNDP causes a shorter lifespan and higher sensitivity to oxidative stress in *Drosophila melanogaster*.

Cinnamaldehyde Enhanced Functional Recovery after Sciatic Nerve Crush Injury in Rats.

AggreCount: an unbiased image analysis tool for identifying and quantifying cellular aggregates in a spatially defined manner.

Comparative efficacy of Nano and Bulk Monoisoamyl DMSA against arsenic-induced neurotoxicity in rats.

ALS-Linked Mutant SOD1 Associates with TIA-1 and Alters Stress Granule Dynamics.

The ubiquitination and acetylation of histones are associated with male reproductive disorders induced by chronic exposure to arsenite.

Aryl hydrocarbon receptor (AHR)-mediated inflammation and resolution: Non-genomic and genomic signaling.

Catechol protects against iron-mediated oxidative brain injury by restoring antioxidative metabolic pathways; and modulation of purinergic and cholinergic enzymes activities.

IL-12p40 and sRAGE in serum correlate with chemically induced cleft palate in mice.

Bone tissue morphology of rat offspring lactationally exposed to polychlorinated biphenyl 169 and 155.

The sunflower TLDC-containing protein HaOXR2 confers tolerance to oxidative stress and waterlogging when expressed in maize plants.

Matching Minute Ventilation in Hypermetabolic State of Dinitrophenol Poisoning.

Reply: Matching Minute Ventilation in the Hypermetabolic State of Dinitrophenol Poisoning.

Chronic stress induces formation of stress granules and pathological TDP-43 aggregates in human ALS fibroblasts and iPSC-motoneurons.

Nephroprotective effects of chlorogenic acid against sodium arsenite-induced oxidative stress, inflammation, and apoptosis.

Thymoquinone protection against 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin induced nephrotoxicity in rats.

Quercetin may repair the impaired oxidant-antioxidant balance in 1, 2, 3, 4-tetrachlorodibenzo-p-dioxin induced cardiac injury in male rats.

Inflammation response after the cessation of chronic arsenic exposure and post-treatment of natural astaxanthin in liver: potential role of cytokine-mediated cell-cell interactions.

A competence of embryo-derived tissues of tetraploid cultivated wheat species *Triticum dicoccum* and *Triticum timopheevii* for efficient and stable transgenesis mediated by particle inflow gun.

Boron improves cardiac contractility and fibrotic remodeling following myocardial infarction injury.

Dexamethasone-Loaded Thermosensitive Hydrogel Suppresses Inflammation and Pain in Collagen-Induced Arthritis Rats.

Serum concentrations of pesticides including organophosphates, pyrethroids and neonicotinoids in a population with osteoarthritis in Saudi Arabia.

Effects of intrauterine exposure to 2,3',4,4',5-pentachlorobiphenyl on the reproductive system and sperm epigenetic imprinting of male offspring.

In vitro propagation of three mosaic disease resistant cassava cultivars.

Effects of p-Cresol on Senescence, Survival, Inflammation, and Odontoblast Differentiation in Canine Dental Pulp Stem Cells.

Arsenic induces dose-dependent structural and ultrastructural pathological remodeling in the heart of Wistar rats.

p-Cresol Sulfate Caused Behavior Disorders and Neurodegeneration in Mice with Unilateral Nephrectomy Involving Oxidative Stress and Neuroinflammation.

A Parkinson's disease CircRNAs Resource reveals a link between circSLC8A1 and oxidative stress.

The Succession of Flies of Forensic Importance Is Influenced by Volatiles Organic Compounds Emitted During the First Hours of Decomposition of Chicken Remains.

Rapid and visual detection of novel astroviruses causing fatal gout in goslings using one-step reverse transcription loop-mediated isothermal amplification.

Association of Serum Indoxyl Sulfate Levels with Skeletal Muscle Mass and Strength in Chronic Hemodialysis Patients: A 2-year Longitudinal Analysis.

Extracellular vesicles influence the pulmonary arterial extracellular matrix in congenital diaphragmatic hernia.

Cancer incidence in the vicinity of a waste incineration plant in the Nice area between 2005 and 2014.

Rosa persica hydroalcoholic extract improves cadmium-hepatotoxicity by modulating oxidative damage and tumor necrosis factor- α status.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and Polychlorinated Biphenyl Coexposure Alters the Expression Profile of MicroRNAs in the Liver Associated with Atherosclerosis.

TCDD promotes liver fibrosis through disordering systemic and hepatic iron homeostasis.

Single-cell RNA-seq Analysis Reveals That Prenatal Arsenic Exposure Results in Long-term, Adverse Effects on Immune Gene Expression in Response to Influenza A Infection.

Impact of pesticide exposure on adipose tissue development and function.

Pdgfr β -Cre mediated knockout of the aryl hydrocarbon receptor protects mice from high-fat diet induced obesity and hepatic steatosis.

Melatonin Suppresses Renal Cortical Fibrosis by Inhibiting Cytoskeleton Reorganization and Mitochondrial Dysfunction through Regulation of miR-4516.

Scavenging Intracellular ROS Attenuates p-Cresyl Sulfate-Triggered Osteogenesis through MAPK Signaling Pathway and NF- κ B Activation in Human Arterial Smooth Muscle Cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) alters hepatic polyunsaturated fatty acid metabolism and eicosanoid biosynthesis in female Sprague-Dawley rats.

Uremic Toxins and Vascular Dysfunction.

Therapeutic Targeting of Aristolochic Acid Induced Uremic Toxin Retention, SMAD 2/3 and JNK/ERK Pathways in Tubulointerstitial Fibrosis: Nephroprotective Role of Propolis in Chronic Kidney Disease.

Associations between functional polychlorinated biphenyls in adipose tissues and prognostic biomarkers of breast cancer patients.

Carboxymethyl-kappa-carrageenan: A study of biocompatibility, antioxidant and antibacterial activities.

Therapeutic potential of aryl hydrocarbon receptor ligands derived from natural products in rheumatoid arthritis.

Human Induced Pluripotent Stem Cell-Derived 3D-Neurospheres are Suitable for Neurotoxicity Screening.

Sonodynamically-induced Anticancer Effects of Polyethylene Glycol-Modified Carbon Nano Tubes.

Transgenerational epigenetic and transcriptomic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure in rat.

Iron pill-induced duodenitis: A distinct pattern of duodenal mucosal injury in a patient with a duodenal mass.

Aryl hydrocarbon receptor nuclear translocators (ARNT1, ARNT2, and ARNT3) of white sturgeon (*Acipenser transmontanus*): Sequences, tissue-specific expressions, and response to 1²-naphthoflavone.

Low concentrations of sodium arsenite induce hepatotoxicity in prepubertal male rats.

A combination of monosodium glutamate and high-fat and high-fructose diets increases the risk of kidney injury, gut dysbiosis and host-microbial co-metabolism.

Metabolomic alternations of follicular fluid of obese women undergoing in-vitro fertilization treatment.

Lactobacillus salivarius BP121 prevents cisplatin-induced acute kidney injury by inhibition of uremic toxins such as indoxyl sulfate and p-cresol sulfate via alleviating dysbiosis.

Embelin impact on paraquat-induced lung injury through suppressing oxidative stress, inflammatory cascade, and MAPK/NF- κ B signaling pathway.

Cardioprotective role of metformin against sodium arsenite-induced oxidative stress, inflammation, and apoptosis.

Undernutrition combined with dietary mineral oil hastens depuration of stored dioxin and polychlorinated biphenyls in ewes. 2. Tissue distribution, mass balance and body burden.

Undernutrition combined with dietary mineral oil hastens depuration of stored dioxin and polychlorinated biphenyls in ewes. 1. Kinetics in blood, adipose tissue and faeces.

Role of Aryl Hydrocarbon Receptor Activation and Autophagy in Psoriasis-Related Inflammation.

Research into the intervention effect of folic acid on arsenic-induced heart abnormalities in fetal rats during the periconception period.

A Young Man with Accelerated Hyperthermia, Hypercapnia, and Profound Muscle Rigidity after Ingestion of a Weight Loss Agent.

Nucleation and kinetics of SOD1 aggregation in human cells for ALS1.

M2-like polarization of THP-1 monocyte-derived macrophages under chronic iron overload.

Nicotine exposure potentiates lung tumorigenesis by perturbing cellular surveillance.

Temporal and tissue-specific activation of aryl hydrocarbon receptor in discrete mouse models of kidney disease.

Dose addition in chemical mixtures inducing craniofacial malformations in zebrafish (*Danio rerio*) embryos.

PCB126 blocks the thermogenic beiging response of adipocytes.

Characterization of Glyceollins as Novel Aryl Hydrocarbon Receptor Ligands and Their Role in Cell Migration.

Chlorogenic acid prevents hepatotoxicity in arsenic-treated mice: role of oxidative stress and apoptosis.

Clinical and Lifestyle Factors and Risk of Amyotrophic Lateral Sclerosis: A Population-Based Case-Control Study.

Ginseng protein protects against mitochondrial dysfunction and neurodegeneration by inducing mitochondrial unfolded protein response in *Drosophila melanogaster* PINK1 model of Parkinson's disease.

Molecular and Cellular Mechanisms that Induce Arterial Calcification by Indoxyl Sulfate and P-Cresyl Sulfate.

Multiple distinct pathways lead to hyperubiquitylated insoluble TDP-43 protein independent of its translocation into stress granules.

[The use of retinoids to stimulate the regenerative process in trepanation cavity after "open" sanitizing surgery on the middle ear].

Denouement of Chemicals on Amyotrophic Lateral Sclerosis: Is Green Chemistry the Answer.

Quantitative Mass Spectrometric Assay of Whole and CNBr-Cleaved Amyloid- β Peptides in Human Brain.

Identification and Functional Analysis of RYR1 Variants in a Family with a Suspected Myopathy and Associated Malignant Hyperthermia.

Transfusion-Free Cranial Vault Remodeling: A Novel, Multifaceted Approach.

Physiologically based toxicokinetic models and in silico predicted partition coefficients to estimate tetrachlorodibenzo-p-dioxin transfer from feed into growing pigs.

Preliminary evaluation of fecal fatty acid concentrations in cats with chronic kidney disease and correlation with indoxyl sulfate and p-cresol sulfate.

Arsenic-induced immunomodulatory effects disorient the survival-death interface by stabilizing the Hsp90/Beclin1 interaction.

Ferric-Induced Pancreatic Injury Involves Exacerbation of Cholinergic and Proteolytic Activities, and Dysregulation of Metabolic Pathways: Protective Effect of Caffeic Acid.

Multi-residue analysis of 126 pesticides in chicken muscle by ultra-high-performance liquid chromatography coupled to quadrupole time-of-flight mass spectrometry.

Ferulic acid attenuates arsenic-induced cardiotoxicity in rats.

Quantitative seasonal variation of the faltarinol-type polyacetylene (3S)-16,17-didehydrofaltarinol and its spatial tissue distribution in *Tridax procumbens*.

TCDD inhibited the osteogenic differentiation of human fetal palatal mesenchymal cells through AhR and BMP-2/TGF- β ²/Smad signaling.

Skeletal toxicity resulting from exposure of growing male rats to coplanar PCB 126 is associated with disruption of calcium homeostasis and the GH-IGF-1 axis and direct effects on bone formation.

Comparing the Neuroprotective Effects of Caffeic Acid in Rat Cortical Slices and *Caenorhabditis elegans*: Involvement of Nrf2 and SKN-1 Signaling Pathways.

Naturally-derived diterpenoid sphaeropsidin C as an activator of Nrf2/ARE pathway and its potential capability of relieving intracellular oxidative stress in human lung epithelial cells.

In vitro effects of PNP and PNMC on apoptosis and proliferation in the hen ovarian stroma and prehierarchal follicles.

Involvement of metallothionein, homocysteine and B-vitamins in the attenuation of arsenic-induced uterine disorders in response to the oral application of hydro-ethanolic extract of *Moringa oleifera* seed: a preliminary study.

Responses of Intestinal Microbiota and Immunity to Increasing Dietary Levels of Iron Using a Piglet Model.

Chemistry inside a Porphyrin Skeleton: Platinacyclopentadiene from Tellurophene.

Oral mucosa changes associated with chronic oral and inhalation exposure to 2,4-dichlorophenoxyacetic acid (2,4-D) in Wistar rats.

The Effect of Radium-223 Therapy in Agent Orange-Related Prostate Carcinoma.

Telomeres as targets for the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and polychlorinated biphenyls (PCBs) in rats.

Effects of agricultural pesticides on the reproductive system of aquatic wildlife species, with crocodilians as sentinel species.

Impact of AHR Ligand TCDD on Human Embryonic Stem Cells and Early Differentiation.

Borax induces osteogenesis by stimulating NaBC1 transporter via activation of BMP pathway.

Fibrinolysis-resistant carbonylated fibrin detected in thrombi attached to the vascular wall of abdominal aortic aneurysms.

Advancements in Low-Chill Blueberry *Vaccinium corymbosum* L. Tissue Culture Practices.

Emerging contaminant 1,3,6,8-tetrabromocarbazole induces oxidative damage and apoptosis during the embryonic development of zebrafish (*Danio rerio*).

Spatial Outcomes of Soft Tissue Sarcoma in Southern West Virginia.

A Comprehensive Review on Source, Types, Effects, Nanotechnology, Detection, and Therapeutic Management of Reactive Carbonyl Species Associated with Various Chronic Diseases.

Urinary levels of the acrolein conjugates of carnosine are associated with inhaled toxicants.

Tissue- and Region-Specific Accumulation of Arsenic Species, Especially in the Brain of Mice, After Long-term Arsenite Exposure in Drinking Water.

Bioaccumulation of pesticide contaminants in tissue matrices of dogs suffering from malignant canine mammary tumors in Punjab, India.

Phytochemical Composition, Antioxidant Capacity, and Enzyme Inhibitory Activity in Callus, Somaclonal Variant, and Normal Green Shoot Tissues of *Catharanthus roseus* (L) G. Don.

The combination of multi-functional ingredients-loaded hydrogels and three-dimensional printed porous titanium alloys for infective bone defect treatment.

Behavioral Tests in Neurotoxin-Induced Animal Models of Parkinson's Disease.

Phytotoxicity, Morphological, and Metabolic Effects of the Sesquiterpenoid Nerolidol on *Arabidopsis thaliana* Seedling Roots.

A bioassay on tissue cholinesterase activity of *Rutilus kutum* (Kamensky, 1901) exposed to some common pesticides in Iran.

In vitro effects of selected endocrine disruptors (DEHP, PCB118, BPA) on narrow-clawed crayfish (*Astacus leptodactylus*) primary cells.

Collecting and Storing Hybridoma Tissue Culture Supernatants.

Method for detection of mtDNA damages for evaluating of pesticides toxicity for bumblebees (*Bombus terrestris* L.).

Functional analysis of newly identified RYR1 variants in patients susceptible to malignant hyperthermia.

TCDD-induced multi- and transgenerational changes in the methylome of male zebrafish gonads.

Separating the Empirical Wheat From the Pseudoscientific Chaff: A Critical Review of the Literature Surrounding Glyphosate, Dysbiosis and Wheat-Sensitivity.

Efficacy of Mushroom Metabolites (*Pleurotus ostreatus*) as A Natural Product for the Suppression of Broomrape Growth (*Orobancha crenata* Forsk) in Faba Bean Plants.

Correlation of polyamines, acrolein-conjugated lysine and polyamine metabolic enzyme levels with age in human liver.

Regulation of the Morphological and Physical Properties of a Soft Tissue Scaffold by Manipulating DD and DS of O-Carboxymethyl Chitin.

Dibenzoylthiamine Has Powerful Antioxidant and Anti-Inflammatory Properties in Cultured Cells and in Mouse Models of Stress and Neurodegeneration.

The in Vitro Antiplasmodial and Antiproliferative Activity of New Ferrocene-Based $\hat{\pm}$ -Aminocresols Targeting Hemozoin Inhibition and DNA Interaction.

Bicarbonate suppresses mitochondrial membrane depolarization induced by conventional uncouplers.

Formulation and Characterization of Alginate Dialdehyde, Gelatin, and Platelet-Rich Plasma-Based Bioink for Bioprinting Applications.

Production of ascorbic acid, total protein, callus and root in vitro of non-heading Chinese cabbage by tissue culture.

SVCT2-Dependent plasma and mitochondrial membrane transport of ascorbic acid in differentiating myoblasts.

Oxidative stress via the Maillard reaction is associated with the occurrence of internal browning in roots of sweetpotato (*Ipomoea batatas*).

Methods for simultaneous determination of legacy and insensitive munition (IM) constituents in aqueous, soil/sediment, and tissue matrices.

Over-gene expression in the apoptotic, oxidative damage and liver injure in female rats exposed to butralin.

Comprehensive two-dimensional gas chromatography thermodynamic modeling and selectivity evaluation for the separation of polychlorinated dibenzo-p-dioxins and dibenzofurans in fish tissue matrix.

The Morphoregulatory Role of Thidiazuron: Metabolomics-Guided Hypothesis Generation for Mechanisms of Activity.

Course of matrix metalloproteinase-1 and pulmonary oxygenation in acute respiratory distress syndrome caused by oral ingestion of large doses of oxadiazon/butachlor emulsion: a case report.

Induction of Callogenesis, Organogenesis, and Embryogenesis in Non-Meristematic Explants of Bleeding Heart and Evaluation of Chemical Diversity of Key Metabolites from Callus.

The Protective Effect of Xanthohumol on the Content of Selected Elements in the Bone Tissue for Exposed Japanese Quails to TCDD.

Development of support vector machine-based model and comparative analysis with artificial neural network for modeling the plant tissue culture procedures: effect of plant growth regulators on somatic embryogenesis of chrysanthemum, as a case study.

Net release and uptake of xenometabolites across intestinal, hepatic, muscle, and renal tissue beds in healthy conscious pigs.

Potentials and pitfalls of transient in vitro reporter bioassays: interference by vector geometry and cytotoxicity in recombinant zebrafish cell lines.

Biotransformation and oxidative stress responses in relation to tissue contaminant burden in *Clarias gariepinus* exposed to simulated leachate from a solid waste dumpsite in Calabar, Nigeria.

Kaempferol Protects Blood Vessels From Damage Induced by Oxidative Stress and Inflammation in Association With the Nrf2/HO-1 Signaling Pathway.

Severe chemical burns related to dermal exposure to herbicide containing glyphosate and glufosinate with surfactant in Korea.

Neuroprotection Against Parkinson's Disease Through the Activation of Akt/GSK3 β Signaling Pathway by Tovophyllin A.

Quantitative Proteomic Profiling of Mitochondrial Toxicants in a Human Cardiomyocyte Cell Line.

The regeneration of *Acer rubrum* L. "October Glory" through embryonic callus.

Tissue distribution, hormonal regulation, ontogeny, diurnal expression, and induction of mouse cystine transporters Slc3a1 and Slc7a9.

Dioxin-like and non-dioxin-like PCBs differentially regulate the hepatic proteome and modify diet-induced nonalcoholic fatty liver disease severity.

Review of Health Consequences of Electronic Cigarettes and the Outbreak of Electronic Cigarette, or Vaping, Product Use-Associated Lung Injury.

Effect of Oral Supplementation of Healthy Pregnant Sows with Sucrosomial Ferric Pyrophosphate on Maternal Iron Status and Hepatic Iron Stores in Newborn Piglets.

Regulation of Spermine Oxidase through Hypoxia-Inducible Factor-1 α Signaling in Retinal Glial Cells under Hypoxic Conditions.

Protective effects of taurine against muscle damage induced by diquat in 35-day weaned piglets.

The aryl hydrocarbon receptor mediates sex ratio distortion in the embryos sired by TCDD-exposed male mice.

Circulating oxidized LDL, increased in patients with acute myocardial infarction, is accompanied by heavily modified HDL.

Determination of adenosine phosphates in mouse myocardium tissue by HPLC with UV detection and using porous graphite carbon column.

Sytoplasmic isolation marks cell fate changes during somatic embryogenesis.

Evaluation of potential human health risk associated with consumption of edible products from livestock fed ration supplemented with Red Lake Diatomaceous Earth.

Skeletal Toxicity of Coplanar Polychlorinated Biphenyl Congener 126 in the Rat Is Aryl Hydrocarbon Receptor Dependent.

Chronic arsenic exposure impairs adaptive thermogenesis in male C57BL/6J mice.

Compositional profiles, persistency and toxicity of polychlorinated naphthalene (PCN) congeners in edible cod liver products from 1972 to 2017.

Exposure effects of iron oxide nanoparticles and iron salts in blackfish (*Capoeta fusca*): Acute toxicity, bioaccumulation, depuration, and tissue histopathology.

P-cresol Alters Brain Dopamine Metabolism and Exacerbates Autism-Like Behaviors in the BTBR Mouse.

Dioxin male rat reproductive toxicity mode of action and relative potency of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,7,8-tetrachlorodibenzofuran characterized by fetal pituitary and testis transcriptome profiling.

Effect of α -lipoic acid on spatial memory and structural integrity of developing hippocampal neurons in rats subjected to sodium arsenite exposure.

High-Sensitivity Detection of the Lung Cancer Biomarker CYFRA21-1 in Serum Samples Using a Carboxyl-MoS₂ Functional Film for SPR-Based Immunosensors.

Arsenic induces platelet shape change through altering focal adhesion kinase-mediated actin dynamics, contributing to increased platelet reactivity.

Cigarette smoke extract induces ferroptosis in vascular smooth muscle cells.

Deep eutectic solvents skeleton typed molecularly imprinted chitosan microsphere coated magnetic graphene oxide for solid-phase microextraction of chlorophenols from environmental water.

Uncovering pathophysiological changes in frontotemporal dementia using serum lipids.

Early Neurotoxic Effects of Inorganic Arsenic Modulate Cortical GSH Levels Associated With the Activation of the Nrf2 and NF κ B Pathways, Expression of Amino Acid Transporters and NMDA Receptors and the Production of Hydrogen Sulfide.

Current Perspectives on the Auxin-Mediated Genetic Network that Controls the Induction of Somatic Embryogenesis in Plants.

Plant tissue analysis as a tool for predicting fertiliser needs for low cyanogenic glucoside levels in cassava roots: An assessment of its possible use.

The Arabidopsis receptor kinase STRUBBELIG regulates the response to cellulose deficiency.

High frequency in vitro regeneration of adventitious shoots in daylilies (*Hemerocallis* sp) stem tissue using thidiazuron.

High resolution respirometry to assess function of mitochondria in native homogenates of human heart muscle.

In-Vivo Optical Monitoring of the Efficacy of Epidermal Growth Factor Receptor Targeted Photodynamic Therapy: The Effect of Fluence Rate.

Arsenic and smokeless tobacco exposure induces DNA damage and oxidative stress in reproductive organs of female Swiss albino mice.

Species and termination method effects on phosphorus loss from plant tissue.

Curcumin Attenuates Acrolein-induced COX-2 Expression and Prostaglandin Production in Human Umbilical Vein Endothelial Cells.

Protection against Mitochondrial Oxidative-Stress by Flesh-Extract of Edible Freshwater Snail *Bellamya bengalensis* Prevents Arsenic Induced DNA and Tissue Damage.

Metabolic switch in energy metabolism mediates the sublethal effects induced by glyphosate-based herbicide on tadpoles of a farmland frog *Microhyla fissipes*.

Adipocyte epigenetic alterations and potential therapeutic targets in transgenerationally inherited lean and obese phenotypes following ancestral exposures.

Sub-chronic exposure to Kalach 360 SL-induced damage in rats' liver and hematological system.

Diosmin ameliorative effects on oxidative stress and fibrosis in paraquat-induced lung injury in mice.

Single and joint effects of chronic exposure to chlorpyrifos and glyphosate based pesticides on structural biomarkers in *Cnesterodon decemmaculatus*.

Investigation of comet assays under conditions mimicking ocular instillation administration in a three-dimensional reconstructed human corneal epithelial model.

Dung Beetle Body Condition: A Tool for Disturbance Evaluation in Contaminated Pastures.

Genotoxic, cytotoxic, and cytopathological effects in rats exposed for 18 months to a mixture of 13 chemicals in doses below NOAEL levels.

Cardiotoxicity of forchlorfenuron (CPPU) in zebrafish (*Danio rerio*) and H9c2 cardiomyocytes.

Metformin Activates the Protective Effects of the AMPK Pathway in Acute Lung Injury Caused by Paraquat Poisoning.

Imbalances in the male reproductive function of the estuarine crab *Neohelice granulata*, caused by glyphosate.

Effects of egg exposure to atrazine and/or glyphosate on bone development in *Podocnemis unifilis* (Testudines, Podocnemididae).

Decrease in Butyrylcholinesterase Accompanied by Intermediate-like Syndrome after Massive Ingestion of a Glyphosate-surfactant.

Hepatoprotective effect of N-acetylcystein loaded niosomes on liver function in paraquat-induced acute poisoning.

Tolerance of native and invasive bivalves under herbicide and metal contamination: an ex vivo approach.

Hemotoxic effects of some herbicides on juvenile of Nile tilapia *Oreochromis niloticus*.

Strength of methods assessment for aquatic primary producer toxicity data: A critical review of atrazine studies from the peer-reviewed literature.

Identification of miRNA-7 as a regulator of brain-derived neurotrophic factor/ β -synuclein axis in atrazine-induced Parkinson's disease by peripheral blood and brain microRNA profiling.

Overlapping and unique toxic effects of three alternative antifouling biocides (Diuron, Irgarol 1051[®]), Sea-Nine 211[®]) on non-target marine fish.

Protective mechanism of 1-methylhydantoin against lung injury induced by paraquat poisoning.

Melatonin protects against Fenoxaprop-ethyl exposure-induced meiotic defects in mouse oocytes.

Roundup[®] confers cytotoxicity through DNA damage and Mitochondria-Associated apoptosis induction.

Maternal glyphosate-based herbicide exposure alters antioxidant-related genes in the brain and serum metabolites of male rat offspring.

Subacute acrolein exposure to rat larynx in vivo.

[Protective effects of oligomeric proanthocyanidins in mice exposed to paraquat].

Alleviation of atrazine toxicity to maize seedlings grown in soils with amendment of biochar derived from wheat under different temperatures.

Cardiotoxicity in African clawed frog (*Xenopus laevis*) sub-chronically exposed to environmentally relevant atrazine concentrations: Implications for species survival.

Effects of ecologically relevant concentrations of Boral[®] 500 SC, Glifosato[®] Biocarb, and a blend of both herbicides on markers of metabolism, stress, and nutritional condition factors in bullfrog tadpoles.

Inhibition of dendritic spine extension through acrolein conjugation with β -, γ -tubulin proteins.

Validating buccal swabbing as a minimal-invasive method to detect pesticide exposure in squamate reptiles.

Activation of the N-methyl-d-aspartate receptor is involved in glyphosate-induced renal proximal tubule cell apoptosis.

Reduning injection ameliorates paraquat-induced acute lung injury by regulating AMPK/MAPK/NF- κ B signaling.

Detoxification, Apoptosis, and Immune Transcriptomic Responses of the Gill Tissue of Bay Scallop Following Exposure to the Algicide Thiazolidinedione 49.

Mechanisms behind the atherothrombotic effects of acrolein, a review.

Parkinsonism Relating to Intoxication with Glyphosate.

Toxicological effects of anthropogenic activities in *Geophagus brasiliensis* from a coastal river of southern Brazil: A biomarker approach.

Inhibition of mesenchymal stromal cells' chemotactic effect to ameliorate paraquat-induced pulmonary fibrosis.

Metabolic response of bacteria to elevated concentrations of glyphosate-based herbicide.

Impacts of S-metolachlor and terbuthylazine in fatty acid and carbohydrate composition of the benthic clam *Scrobicularia plana*.

Inflammatory Effects of Subacute Exposure of Roundup in Rat Liver and Adipose Tissue.

[Doxycycline inhibits paraquat-induced pulmonary fibrosis via TGF- β 1/Smad pathway].

Rosiglitazone attenuates paraquat-induced lung fibrosis in rats in a PPAR gamma-dependent manner.

Toxicity of diuron in HepG2 cells and zebrafish embryos.

The effects of arsenic speciation on accumulation and toxicity of dietborne arsenic exposures to rainbow trout.

Developmental and epigenetic effects of Roundup and glyphosate exposure on Japanese medaka (*Oryzias latipes*).

Histopathological and ultrastructural indices for the assessment of glyphosate-based herbicide cytotoxicity in decapod crustacean hepatopancreas.

Paraquat Exposure Increases Oxidative Stress Within the Dorsal Striatum of Male Mice With a Genetic Deficiency in One-carbon Metabolism.

The Alexipharmic Mechanisms of Five Licorice Ingredients Involved in CYP450 and Nrf2 Pathways in Paraquat-Induced Mice Acute Lung Injury.

Melittin Exerts Beneficial Effects on Paraquat-Induced Lung Injuries In Mice by Modifying Oxidative Stress and Apoptosis.

TLR3 is involved in paraquat-induced acute renal injury.

The MEK/ERK/CREB signaling pathway is involved in atrazine induced hippocampal neurotoxicity in Sprague Dawley rats.

Mesenchymal Stem Cells Alleviate Acute Lung Injury and Inflammatory Responses Induced by Paraquat Poisoning.

Role of bone marrow mesenchymal stem cells in the development of PQ-induced pulmonary fibrosis.

Antioxidant and cytoprotective effects of N-acetylcysteine against subchronic oral glyphosate-based herbicide-induced oxidative stress in rats.

The effects of glyphosate-based herbicide formulations on *Lemna minor*, a non-target species.

Demonstrating the need for chemical exposure characterisation in a microplate test system: toxicity screening of sixteen pesticides on two marine microalgae.

Maternal residential exposure to specific agricultural pesticide active ingredients and birth defects in a 2003-2005 North Carolina birth cohort.

The Critical Role of X Chromosome-Linked Inhibitor of Apoptosis (XIAP) in Differential Synergism Induced by Pentachlorophenol and Copper-1,10-Phenanthroline Complex in Normal and Cancer Liver Cells.

The Impact of Agent Orange Exposure on Prostate Cancer Outcomes.

Ochrobactrum cytisi IPA7.2 promotes growth of potato microplants and is resistant to abiotic stress.

Enantiomeric impacts of two amide chiral herbicides on *Echinochloa crus-galli* physiology and gene transcription.

Herbicidal Ionic Liquids Containing the Acetylcholine Cation.

Setal-epidermal, muscular and enzymatic anomalies induced by certain agrochemicals in the earthworm *Eudrilus eugeniae* (Kinberg).

Toxicological impact of oxyfluorfen 24% herbicide on the reproductive system, antioxidant enzymes, and endocrine disruption of *Biomphalaria alexandrina* (Ehrenberg, 1831) snails.

Hepatotoxicity and reproductive disruption in male lizards (*Eremias argus*) exposed to glufosinate-ammonium contaminated soil.

Fenoxaprop-ethyl affects mouse oocyte quality and the underlying mechanisms.

Analysis of Acrolein-Derived 1, N(2)-Propanodeoxyguanosine Adducts in Human Lung DNA from Smokers and Nonsmokers.

Ligustrazin increases lung cell autophagy and ameliorates paraquat-induced pulmonary fibrosis by inhibiting PI3K/Akt/mTOR and hedgehog signalling via increasing miR-193a expression.

Aspirin-triggered resolvin D1 alleviates paraquat-induced acute lung injury in mice.

Effects of AT-RvD1 on paraquat-induced acute renal injury in mice.

Adverse effects of acrolein, a ubiquitous environmental toxicant, on muscle regeneration and mass.

Antioxidant activities of *Moringa oleifera* leaf extract against pendimethalin-induced oxidative stress and genotoxicity in Nile tilapia, *Oreochromis niloticus* (L.).

Protective and anti-inflammatory effects of hydroalcoholic leaf extract of *Origanum vulgare* on oxidative stress, TNF- α gene expression and liver histological changes in paraquat-induced hepatotoxicity in rats.

Environmental Control of Astrocyte Pathogenic Activities in CNS Inflammation.

Using mathematical modeling to infer the valence state of arsenicals in tissues: A PBPK model for dimethylarsinic acid (DMA(V)) and dimethylarsinous acid (DMA(III)) in mice.

Evaluation of the cytotoxic effects of glyphosate herbicides in human liver, lung, and nerve.

Dual drug-loaded cubic liquid crystal gels for transdermal delivery: inner structure and percutaneous mechanism evaluations.

Effect of Fenofibrate on the Expression of Inflammatory Mediators in a Diabetic Rat Model.

Evaluation of relaxant responses properties of cinnamon essential oil and its major component, cinnamaldehyde on human and rat corpus cavernosum.

Clock-Bmal1 mediates MMP9 induction in acrolein-promoted atherosclerosis associated with gut microbiota regulation.

Cinnamaldehyde attenuates atherosclerosis via targeting the $\text{I}\hat{\text{I}}^{\text{B}}/\text{NF-}\hat{\text{I}}^{\text{B}}$ signaling pathway in high fat diet-induced ApoE(-/-) mice.

The relationship between acrolein and oxidative stress in COPD: in systemic plasma and in local lung tissue.

Cinnamaldehyde Ameliorates High-Glucose-Induced Oxidative Stress and Cardiomyocyte Injury Through Transient Receptor Potential Ankyrin 1.

Acrolein-mediated alpha-synuclein pathology involvement in the early post-injury pathogenesis of mild blast-induced Parkinsonian neurodegeneration.

Anti-oxidant and anti-inflammatory effects of cinnamaldehyde and eugenol on mononuclear cells of rheumatoid arthritis patients.

Tetramethylrhodamine is an essential scaffold of azide probe in detecting cellular acrolein.

trans-Cinnamaldehyde mitigated intestinal inflammation induced by *Cronobacter sakazakii* in newborn mice.

Trans-Cinnamaldehyde Inhibits IL-1 $\hat{\text{I}}^2$ -Stimulated Inflammation in Chondrocytes by Suppressing NF- $\hat{\text{I}}^{\text{B}}$ and p38-JNK Pathways and Exerts Chondrocyte Protective Effects in a Rat Model of Osteoarthritis.

Combined treatment with 2'-hydroxycinnamaldehyde and temozolomide suppresses glioblastoma tumorspheres by decreasing stemness and invasiveness.

Activation of Nrf2 attenuates delayed gastric emptying in obesity induced diabetic (T2DM) female mice.

Cinnamaldehyde regulates H₂O₂-induced skeletal muscle atrophy by ameliorating the proteolytic and antioxidant defense systems.

Topical Application of Cinnamaldehyde Promotes Faster Healing of Skin Wounds Infected with *Pseudomonas aeruginosa*.

On the Use of Hair Analysis for Assessing Arsenic Intoxication.

Protective effects of febuxostat against paraquat-induced lung toxicity in rats: Impact on RAGE/PI3K/Akt pathway and downstream inflammatory cascades.

Acid-responsive nanoparticles as a novel oxidative stress-inducing anticancer therapeutic agent for colon cancer.

Cinnamaldehyde and eugenol attenuates collagen induced arthritis via reduction of free radicals and pro-inflammatory cytokines.

Suppression of miR-21 and miR-155 of macrophage by cinnamaldehyde ameliorates ulcerative colitis.

Cinnamaldehyde ameliorates STZ-induced rat diabetes through modulation of IRS1/PI3K/AKT2 pathway and AGEs/RAGE interaction.

Combined treatment with Cinnamaldehyde and \hat{I}^2 -TCP had an additive effect on bone formation and angiogenesis in critical size calvarial defect in ovariectomized rats.

Temporal and spatial changes of peroxiredoxin 2 levels in aortic media at very early stages of atherosclerotic lesion formation in apoE-knockout mice.

Assessment of hematological, hepato-renal, antioxidant, and hormonal responses of *Clarias gariepinus* exposed to sub-lethal concentrations of oxyfluorfen.

Auxin protects *Arabidopsis thaliana* cell suspension cultures from programmed cell death induced by the cellulose biosynthesis inhibitors thaxtomin A and isoxaben.

Short-chain lipid peroxidation products form covalent adducts with pyruvate kinase and inhibit its activity in vitro and in breast cancer cells.

The miR396-GRF Regulatory Module Controls the Embryogenic Response in *Arabidopsis* via an Auxin-Related Pathway.

Unsaturated Aldehyde Acrolein Promotes Retinal Glial Cell Migration.

Forkhead box O3 protects the heart against paraquat-induced aging-associated phenotypes by upregulating the expression of antioxidant enzymes.

Speciation transformation of arsenic in abalone viscera hydrolysate fraction: In vitro digestion and in vivo metabolism.

2,4-D causes oxidative stress induction and apoptosis in human dental pulp stem cells (hDPSCs).

Bioavailability and metabolism in a soil-crop system compared using DGT and conventional extraction techniques.

Metabolism and disposition of arsenic species from controlled dosing with dimethylarsinic acid (DMA(V)) in adult female CD-1 mice. V. Toxicokinetic studies following oral and intravenous administration.

Antifungal activity and Shore A hardness of a tissue conditioner incorporated with terpinen-4-ol and cinnamaldehyde.

Impairment of testicular function in electronic cigarette (e-cig, e-cigs) exposed rats under low-voltage and nicotine-free conditions.

Nepetalactone-rich essential oil mitigates phosphinothricin-induced ammonium toxicity in *Arabidopsis thaliana* (L.) Heynh.

Diquat Determines a Deregulation of lncRNA and mRNA Expression in the Liver of Postweaned Piglets.

Detection of glyphosate and its metabolites in food of animal origin based on ion-chromatography-high resolution mass spectrometry (IC-HRMS).

In situ colorimetric detection of glyphosate on plant tissues using cysteamine-modified gold nanoparticles.

Lignan and flavonoid support the prevention of cinnamon against oxidative stress related diseases.

Effects of Cinnamaldehyde on Smooth Muscle Preparations.

Multidrug resistance of the extended-spectrum beta-lactamase-producing *Klebsiella pneumoniae* isolated in Tizi-Ouzou (Algeria).

Serum Proteomic Profiling Analysis of Rats Chronically Exposed to Arsenic.

Aryl hydrocarbon receptor pathway: Role, regulation and intervention in atherosclerosis therapy (Review).

Disease modifying mitochondrial uncouplers, MP101, and a slow release ProDrug, MP201, in models of Multiple Sclerosis.

First steps in the development of a liquid biopsy in situ hybridization protocol to determine circular RNA biomarkers in rat biofluids.

Simultaneous quantification of estrogens and glucocorticoids in human adipose tissue by liquid-chromatography-tandem mass spectrometry.

2,3,7,8-Tetrachlorodibenzo-p-dioxin Induces Vascular Dysfunction That is Dependent on Perivascular Adipose and Cytochrome P4501A1 Expression.

Plasma Metabolic Profiling Analysis of Gout Party on Acute Gout Arthritis Rats Based on UHPLC-Q-TOF/MS Combined with Multivariate Statistical Analysis.

(11)C-Labeled Pictilisib (GDC-0941) as a Molecular Tracer Targeting Phosphatidylinositol 3-Kinase (PI3K) for Breast Cancer Imaging.

Subcutaneous Injection of Drugs: Literature Review of Factors Influencing Pain Sensation at the Injection Site.

Exosomal MALAT1 derived from hepatic cells is involved in the activation of hepatic stellate cells via miRNA-26b in fibrosis induced by arsenite.

Increase of core temperature affected the progression of kidney injury by repeated heat stress exposure.

Associations between persistent organic pollutants and risk of breast cancer metastasis.

Plasma levels of polychlorinated biphenyls (PCB) and the risk of soft tissue sarcoma.

The Colonization of Necrophagous Larvae Accelerates the Decomposition of Chicken Carcass and the Emission of Volatile Attractants for Blowflies (Diptera: Calliphoridae).

In Vitro and In Vivo Evaluations of Mesoporous Iron Particles for Iron Bioavailability.

Epigenetic Activation of BRCA1 by Genistein In Vivo and Triple Negative Breast Cancer Cells Linked to Antagonism toward Aryl Hydrocarbon Receptor.

Epidemic of Chronic Kidney Disease of Nontraditional Etiology in El Salvador: Integrated Health Sector Action and South-South Cooperation.

Occupational Health and Safety in the Palm Oil Industry: A Systematic Review.

Metal-induced nephrotoxicity to diabetic and non-diabetic Wistar rats.

Impaired intestinal barrier function in a mouse model of hyperuricemia.

NEAT1 is overexpressed in Parkinson's disease substantia nigra and confers drug-inducible neuroprotection from oxidative stress.

Borax Alleviates Copper-Induced Renal Injury via Inhibiting the DNA Damage and Apoptosis in Rainbow Trout.

[Down-regulation of miR-381-3p inhibits osteogenic differentiation of mouse embryonic palatal mesenchymal cells in 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin-induced cleft palate of fetal mice].

Assessment of the carcinogenic effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin using mouse embryonic stem cells to form teratoma in vivo.

Circular RNA TLK1 Aggravates Neuronal Injury and Neurological Deficits after Ischemic Stroke via miR-335-3p/TIPARP.

Tissue-Specific Peculiarities of Vibration-Induced Hypoxia in Rabbit Liver and Kidney.

Effects of 2,3',4,4'5-pentachlorobiphenyl exposure during pregnancy on epigenetic imprinting and maturation of offspring's oocytes in mice.

Gene expression and DNA methylation regulation of arsenic in mouse bladder tissues and in human urothelial cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin promotes injury-induced vascular neointima formation in mice.

Aryl Hydrocarbon Receptor Signaling Prevents Activation of Hepatic Stellate Cells and Liver Fibrogenesis in Mice.

Can contamination of the environment by dioxins cause craniofacial defects?

Dietary CCPS from bitter melon attenuates sodium arsenite induced female reproductive ailments cum infertility in wistar rats: anti-inflammatory and anti-apoptotic role.

An All-Organic Semiconductor C(3) N(4) /PDINH Heterostructure with Advanced Antibacterial Photocatalytic Therapy Activity.

The uremic toxin p-cresol promotes the invasion and migration on carcinoma cells via Ras and mTOR signaling.

Effects of Aryl Hydrocarbon Receptor Deficiency on PCB-77-Induced Impairment of Glucose Homeostasis during Weight Loss in Male and Female Obese Mice.

Antioxidant, immunomodulatory, oxidative stress inhibitory and iron supplementation effect of Astragalus membranaceus polysaccharide-iron (III) complex on iron-deficiency anemia mouse model.

ETIOSARC study : environmental aetiology of sarcomas from a French prospective multicentric population-based case-control study-study protocol.

Involvement of proinflammatory cytokines and metallothionein in the repairing of arsenic-mediated uterine tissue damage by curcumin.

[Effect of electroacupuncture at "Jiaji" (EX-B 2) points combined with nerve mobilization on motor function and mRNA and protein expression of RhoA in rabbits with sciatic nerve injury].

Extragenital cutaneous warts - clinical presentation, diagnosis and treatment.

Regeneration and evaluation of somaclones of sugarcane variety Co86032 for yellow leaf disease resistance and yield traits.

ITE, an endogenous aryl hydrocarbon receptor ligand, suppresses endometrial cancer cell proliferation and migration.

Role of dantrolene in dinitrophenol (DNP) overdose: A continuing question?

Arsenic and sulfur dioxide co-exposure induce renal injury via activation of the NF- κ B and caspase signaling pathway.

3-Methylcholanthrene Induces Chylous Ascites in TCDD-Inducible Poly-ADP-Ribose Polymerase (Tiparp) Knockout Mice.

[Expression of gamma-aminobutyric acid type A receptor beta3 subunit in murine cleft palate induced by 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin].

Chronic Interstitial Nephritis in Agricultural Communities (CINAC) in Sri Lanka.

Rescue of degenerating neurons and cells by stem cell released molecules: using a physiological renormalization strategy.

Pulmonary hypertension secondary to congenital diaphragmatic hernia: factors and pathways involved in pulmonary vascular remodeling.

Aromatic hydrocarbon receptor provides a link between smoking and rheumatoid arthritis in peripheral blood mononuclear cells.

RYR1 Sequence Variants in Myopathies: Expression and Functional Studies in Two Families.

p38 mitogen activated protein kinase mediates cardiac Na(+)/H(+) exchanger inhibition induced by Sildenafil.

Anti-MUC1 Aptamer as Carrier Tool of the Potential Radiosensitizer 1,10 Phenanthroline in MCF-7 Breast Cancer Cells.

Mangiferin alleviates arsenic induced oxidative lung injury via upregulation of the Nrf2-HO1 axis.

Role of thymoquinone and ebselen in the prevention of sodium arsenite-induced nephrotoxicity in female rats.

Arsenic induces fibrogenic changes in human kidney epithelial cells potentially through epigenetic alterations in DNA methylation.

PCB 126 induces monocyte/macrophage polarization and inflammation through AhR and NF- κ B pathways.

Nrf2 deficiency aggravates the increase in osteoclastogenesis and bone loss induced by inorganic arsenic.

A novel target for the promotion of dermal wound healing: Ryanodine receptors.

Iron Oversupplementation Causes Hippocampal Iron Overloading and Impairs Social Novelty Recognition in Nursing Piglets.

Bioluminescence imaging of Arc expression in mouse brain under acute and chronic exposure to pesticides.

Enhanced PAPSS2/VCAN sulfation axis is essential for Snail-mediated breast cancer cell migration and metastasis.

Sodium arsenite exposure impairs B cell proliferation and enhances vascular inflammation in Plasmodium berghei mouse model.

Mitochondrial Impairment in Oligodendroglial Cells Induces Cytokine Expression and Signaling.

Expression of Nitric Oxide Synthase Interacting Protein (NOSIP) is Decreased in the Pulmonary Vasculature of Nitrofen-Induced Congenital Diaphragmatic Hernia.

The protective effect exerted by dietary borax on toxicity metabolism in rainbow trout (*Oncorhynchus mykiss*) tissues.

Stars Are Not in Outer Space: Astrocytes Respond to Environmental Cues.

Sodium Arsenite Inhibits Lung Fibroblast Differentiation and Pulmonary Fibrosis.

Biochanin A prevents 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced adipocyte dysfunction in cultured 3T3-L1 cells.

Exposure to environmental concentrations of hexachlorobenzene induces alterations associated with endometriosis progression in a rat model.

Endoplasmic reticulum stress response is activated in pulmonary hypoplasia secondary to congenital diaphragmatic hernia, but is decreased by administration of amniotic fluid stem cells.

Metabolism and disposition of arsenic species from oral dosing with sodium arsenite in neonatal CD-1 mice. IV. Toxicokinetics following gavage administration and lactational transfer.

Circulating miR-421 Targeting Leucocytic Angiotensin Converting Enzyme 2 Is Elevated in Patients with Chronic Kidney Disease.

Moderate Renal Impairment and Toxic Metabolites Produced by the Intestinal Microbiome: Dietary Implications.

Ameliorative effects of crocin on paraquat-induced oxidative stress in testis of adult mice: An experimental study.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) Disrupts Control of Cell Proliferation and Apoptosis in a Human Model of Adult Liver Progenitors.

Catalpol protects against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced cytotoxicity in osteoblastic MC3T3-E1 cells.

Loss of Tiparp Results in Aberrant Layering of the Cerebral Cortex.

Coupling the Patern²-B^{1/2}chi (PB) Reaction With Mass Spectrometry to Study Unsaturated Fatty Acids in Mouse Model of Multiple Sclerosis.

Dietary Supplementation With Citrus Extract Altered the Intestinal Microbiota and Microbial Metabolite Profiles and Enhanced the Mucosal Immune Homeostasis in Yellow-Feathered Broilers.

Levels and risk assessment of residual phthalates, polycyclic aromatic hydrocarbons and semi-volatile chlorinated organic compounds in toilet tissue papers.

Activation of cannabinoid receptor type 2 reduces lung ischemia reperfusion injury through PI3K/Akt pathway.

Effect of in ovo glyphosate injection on embryonic development, serum biochemistry, antioxidant status and histopathological changes in newly hatched chicks.

The Customizable E-cigarette Resistance Influences Toxicological Outcomes: Lung Degeneration, Inflammation, and Oxidative Stress-Induced in a Rat Model.

Cholestatic liver disease results increased production of reactive aldehydes and an atypical periportal hepatic antioxidant response.

Botrysin D attenuates arsenic-induced oxidative stress in human lung epithelial cells via activating Nrf2/ARE signaling pathways.

TCDD-Inducible Poly-ADP-Ribose Polymerase (TIPARP), A Novel Therapeutic Target Of Breast Cancer.

In vitro application of sodium arsenite to mice testicular and epididymal organ cultures induces oxidative, biochemical, hormonal, and genotoxic stress.

Estrogen withdrawal and replacement differentially target liver and adipose tissues in female mice fed a high-fat high-sucrose diet: impact of a chronic exposure to a low-dose pollutant mixture(â~+).

Arsenic impairs GLUT1 trafficking through the inhibition of the calpain system in lymphocytes.

Probiotic Bacillus Attenuates Oxidative Stress- Induced Intestinal Injury via p38-Mediated Autophagy.

Neuroprotective effects of anthocyanins and its major component cyanidin-3-O-glucoside (C3G) in the central nervous system: An outlined review.

Obesity and cancer: A mechanistic overview of metabolic changes in obesity that impact genetic instability.

Different stability-indicating chromatographic methods for specific determination of paracetamol, dantrolene sodium, their toxic impurities and degradation products.

Gut microbial transformation of the dietary mutagen MeIQx may reduce exposure levels without altering intestinal transport.

Locust bean gum/gellan gum double-network hydrogels with superior self-healing and pH-driven shape-memory properties.

Bioconcentrations of herbicides used in sugarcane crops in tilapia (*Oreochromis niloticus*) and the risk for human consumption.

Screening of Amaryllidaceae alkaloids in bulbs and tissue cultures of *Narcissus papyraceus* and four varieties of *N. tazetta*.

Defining the Contribution of CYP1A1 and CYP1A2 to Drug Metabolism Using Humanized CYP1A1/1A2 and *Cyp1a1/Cyp1a2* Knockout Mice.

Exposure to environmental toxicants reduces global N6-methyladenosine RNA methylation and alters expression of RNA methylation modulator genes.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on acetylcholinesterase during myogenic differentiation of contractile rat primary skeletal muscle cells.

The remarkable three-dimensional network structure of bacterial cellulose for tissue engineering applications.

Effect of Dioxins in Milk on the 3D Cultured Primary Buffalo Hepatocyte Model System.

Application of Adaptive Neuro-Fuzzy Inference System-Non-dominated Sorting Genetic Algorithm-II (ANFIS-NSGAI) for Modeling and Optimizing Somatic Embryogenesis of *Chrysanthemum*.

Effects of Pinacidil and Calcium on Succinate-Energized Rat Heart Mitochondria in the Presence of Rotenone.

ADAM28 dramatically regulates the biological features of human gingival fibroblasts.

Controllable fluorescence via tuning the m-substituents of added aromatic molecules in a pyrene derivative-decorated porous skeleton.

The protective effects of bone mesenchymal stem cells on paraquat-induced acute lung injury via the *muc5b* and ERK/MAPK signaling pathways.

Study on the Metabolism of Six Systemic Insecticides in a Newly Established Cell Suspension Culture Derived from Tea (*Camellia Sinensis* L.) Leaves.

PAX3 Confers Functional Heterogeneity in Skeletal Muscle Stem Cell Responses to Environmental Stress.

Development of a carbon-11 PET radiotracer for imaging TRPC5 in the brain.

Review of a Case of Paraquat Poisoning in a Tertiary Care Rural-based ICU.

DISC1 promotes translation maintenance during sodium arsenite-induced oxidative stress.

Pollutants released from the pulp paper industry: Aquatic toxicity and their health hazards.

Toxicity of binary mixtures of pesticides to the marine microalgae *Tisochrysis lutea* and *Skeletonema marinoi*: Substance interactions and physiological impacts.

The Effect of UVB Irradiation and Oxidative Stress on the Skin Barrier-A New Method to Evaluate Sun Protection Factor Based on Electrical Impedance Spectroscopy.

Mitochondria and Nuclei Dual-Targeted Hollow Carbon Nanospheres for Cancer Chemophotodynamic Synergistic Therapy.

Attenuation of the effects of oxidative stress by the MAO-inhibiting antidepressant and carbonyl scavenger phenelzine.

High resolution approaches for the identification of amyloid fragments in brain.

Protective Effect of Hesperidin on Sodium Arsenite-Induced Nephrotoxicity and Hepatotoxicity in Rats.

Effects of Phenelzine Administration on Mitochondrial Function, Calcium Handling, and Cytoskeletal Degradation after Experimental Traumatic Brain Injury.

Synthesis and preclinical evaluation of the CRTH2 antagonist [(11)C]MK-7246 as a novel PET tracer and potential surrogate marker for pancreatic beta-cell mass.

Transcriptomic Impact of IMA-08401, a Novel AHR Agonist Resembling Laquinimod, on Rat Liver.

Indirect study of the effect of α -tocopherol and acetylsalicylic acid on the mineral composition of bone tissue in the offspring of female rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin: long-term observations.

Protective effects of resveratrol on biomarkers of oxidative stress, biochemical and histopathological changes induced by sub-chronic oral glyphosate-based herbicide in rats.

Ioxynil and diethylstilbestrol disrupt vascular and heart development in zebrafish.

Enhancement of corneal epithelium cell survival, proliferation and migration by red light: Relevance to corneal wound healing.

Cilostazol Attenuates Retinal Oxidative Stress and Inflammation in a Streptozotocin-Induced Diabetic Animal Model.

Association of Vitamin B(12), Lactate Dehydrogenase, and Regulation of NF- κ B in the Mitigation of Sodium Arsenite-Induced ROS Generation in Uterine Tissue by Commercially Available Probiotics.

Analysis of 52 pesticides in fresh fish muscle by QuEChERS extraction followed by LC-MS/MS determination.

Mimicking Dynamic Adhesiveness and Strain-Stiffening Behavior of Biological Tissues in Tough and Self-Healable Cellulose Nanocomposite Hydrogels.

The testing of an artificial modified bacterial cellulose auricle skeleton in an animal model.

The effects of hesperidin on sodium arsenite-induced different organ toxicity in rats on metabolic enzymes as antidiabetic and anticholinergics potentials: A biochemical approach.

Synthesis and evaluation of 4-(2-fluoro-4-[(11)C]methoxyphenyl)-5-((2-methylpyridin-4-yl)methoxy)picolinamide for PET imaging of the metabotropic glutamate receptor 2 in the rat brain.

High accumulation of tilianin in in-vitro cultures of *Agastache mexicana* and its potential vasorelaxant action.

Molecular mechanism involved in cyclophosphamide-induced cardiotoxicity: Old drug with a new vision.

Cascade Reaction in Human Live Tissue Allows Clinically Applicable Diagnosis of Breast Cancer Morphology.

Open-source food: Nutrition, toxicology, and availability of wild edible greens in the East Bay.

RiboTag translomic profiling of *Drosophila* oenocytes under aging and induced oxidative stress.

Ameliorative effect of gallic acid on sodium arsenite-induced spleno-, cardio- and hemato-toxicity in rats.

Bioactive Lipids in Cancer, Inflammation and Related Diseases : Acute and Chronic Mild Traumatic Brain Injury Differentially Changes Levels of Bioactive Lipids in the CNS Associated with Headache.

Association of East Asian Variant Aldehyde Dehydrogenase 2 Genotype (ALDH2*2*) with Coronary Spasm and Acute Myocardial Infarction.

Evaluation of in vitro genotoxic effects induced by in vitro anther culture conditions in sunflower.

Microscopic structure of albino rats' small intestine.

Organ distribution of endogenous p-cresol in hemodialysis patients.

High frequency somatic embryogenesis and plant regeneration of interspecific ginseng hybrid between *Panax ginseng* and *Panax quinquefolius*.

Hepatic and renal protective effects of quercetin in ferrous sulfate-induced toxicity.

An imazamox-based herbicide causes apoptotic changes in rat liver and pancreas.

Evidence for Aryl hydrocarbon Receptor-Mediated Inhibition of Osteoblast Differentiation in Human Mesenchymal Stem Cells.

[Exploration about the protection mechanism of 5-hydroxy-1-methylhydantoin on paraquat poisoning model].

Apigenin reverses lung injury and immunotoxicity in paraquat-treated mice.

Protective effects of SOD2 overexpression in human umbilical cord mesenchymal stem cells on lung injury induced by acute paraquat poisoning in rats.

Assessment of adverse outcome of Excel Mera 71 in *Anabas testudineus* by histological and ultrastructural alterations.

Evaluating Mode of Action of Acrolein Toxicity in an In Vitro Human Airway Tissue Model.

[The experimental study of diquat on the half-Lethal dose and pathological injury of related organs in wistar rats].

Pendimethalin-induced oxidative stress, DNA damage and activation of anti-inflammatory and apoptotic markers in male rats.

Atorvastatin attenuates paraquat poisoning-induced epithelial-mesenchymal transition via downregulating hypoxia-inducible factor-1 alpha.

Role of Cerium Oxide Nanoparticles in a Paraquat-Induced Model of Oxidative Stress: Emergence of Neuroprotective Results in the Brain.

Does cyclophosphamide still play a role in glomerular diseases?

Procyanidin B2 protects rats from paraquat-induced acute lung injury by inhibiting NLRP3 inflammasome activation.

Exposure Through Runoff and Ground Water Contamination Differentially Impact Behavior and Physiology of Crustaceans in Fluvial Systems.

Acrolein-induced autophagy-dependent apoptosis via activation of the lysosomal-mitochondrial pathway in EAhy926 cells.

Protein kinase C-dependent cell damage by unsaturated carbonyl compounds in vascular cells.

Epigallocatechin-3-Gallate Protects and Prevents Paraquat-Induced Oxidative Stress and Neurodegeneration in Knockdown dj-1-¹ Drosophila melanogaster.

Vitamin D treatment abrogates the inflammatory response in paraquat-induced lung fibrosis.

Tanshinone IIA attenuates paraquat-induced acute lung injury by modulating angiotensin-converting enzyme 2/angiotensin(1-7) in rats.

Acute toxicity and effects of Roundup Original[®] on pintado da Amazônia.

Ameliorative effect of resveratrol on testicular oxidative stress, spermatological parameters and DNA damage in glyphosate-based herbicide-exposed rats.

Reduced oxygen tension culturing conditionally alters toxicogenic response of differentiated H9c2 cardiomyoblasts to acrolein.

Pancreatic function and histoarchitecture in Wistar rats following chronic exposure to Bushfire[®]: the mitigating role of zinc.

Biochemical and histological effects of sub-chronic exposure to atrazine in crayfish Cherax destructor.

Glyphosate affects swine ovarian and adipose stromal cell functions.

[The effects of Xuebijing injection on apoptosis and expression of regulatory factors TNF- α , NF- κ B and Caspase-3 expression in the lung tissues of acute paraquat-induced rats].

Toxicity of some aquatic pollutants to fish.

Comparative Assessment on Mechanism Underlying Renal Toxicity of Commercial Formulation of Roundup Herbicide and Glyphosate Alone in Male Albino Rat.

Paraquat initially damages cochlear support cells leading to anoikis-like hair cell death.

Glyphosate affects the secretion of regulators of uterine contractions in cows while it does not directly impair the motoric function of myometrium in vitro.

Oxidative stress in triazine pesticide toxicity: a review of the main biomarker findings.

Oxidative stress, cholinesterase activity, and DNA damage in the liver, whole blood, and plasma of Wistar rats following a 28-day exposure to glyphosate.

Effects of environmentally relevant sub-chronic atrazine concentrations on African clawed frog (*Xenopus laevis*) survival, growth and male gonad development.

Effect of glyphosate-based herbicide on hematological and hemopoietic parameters in common carp (*Cyprinus carpio* L).

Identification of circular RNAs and their alterations involved in developing male *Xenopus laevis* chronically exposed to atrazine.

[The anti-inflammatory effect of hesperetin on lung damage induced by paraquat in rats].

[The effect of pulmonary injury in rats induced by paraquat].

Mitochondrial oxidative stress causes insulin resistance without disrupting oxidative phosphorylation.

Apple procyanidins promote mitochondrial biogenesis and proteoglycan biosynthesis in chondrocytes.

Atrazine affects craniofacial chondrogenesis and axial skeleton mineralization in zebrafish (*Danio rerio*).

Serum immune responses in common carp (*Cyprinus carpio* L.) to paraquat exposure: The traditional parameters and circulating microRNAs.

Toxicity implications for early life stage Japanese medaka (*Oryzias latipes*) exposed to oxyfluorfen.

Integrated biomarkers response confirm the antioxidant role of diphenyl diselenide against atrazine.

Taurine protects dopaminergic neurons in a mouse Parkinson's disease model through inhibition of microglial M1 polarization.

Melatonin preserves ovarian tissues of rats exposed to chronic TCDD: An electron microscopic approach to effects of TCDD on ovarian cells.

Effects of atrazine on vitellogenesis, steroid levels and lipid peroxidation, in female red swamp crayfish *Procambarus clarkii*.

Validation of expression stability of reference genes in response to herbicide stress in wild oat (*Avena ludoviciana*).

Deficiency of Atg6 impairs beneficial effect of metformin on intestinal stem cell aging in *Drosophila*.

Mesenchymal stem cell therapy for paraquat poisoning: A systematic review and meta-analysis of preclinical studies.

[Effect of sucralfate on cytokines in rat with paraquat poisoning].

Changes in intermediate metabolism and oxidative balance parameters in sexually matured three-barbeled catfishes exposed to herbicides from rice crops (Roundup(®), Primoleo(®) and Facet(®)).

Caloric restriction ameliorates acrolein-induced neurotoxicity in rats.

Modelling the effects of PSII inhibitor pulse exposure on two algae in co-culture.

From TBT to booster biocides: Levels and impacts of antifouling along coastal areas of Panama.

Effect of dietary supplementation with *Spirulina platensis* on Atrazine-induced oxidative stress-mediated hepatic damage and inflammation in the common carp (*Cyprinus carpio* L.).

Do host-associated gut microbiota mediate the effect of an herbicide on disease risk in frogs?

Methemoglobinemia Following Monolinuron Ingestion: A Case Report in a Child.

Oxidative stress and DNA damage in common carp (*Cyprinus carpio*) exposed to the herbicide mesotrione.

Pirfenidone protects against paraquat-induced lung injury and fibrosis in mice by modulation of inflammation, oxidative stress, and gene expression.

Acrolein toxicity at advanced age: present and future.

Analysis of earthworm sublethal toxic responses to atrazine exposure using (1) H nuclear magnetic resonance (NMR)-based metabolomics.

Preference of Aerosolized Pirfenidone to Oral Intake: An Experimental Model of Pulmonary Fibrosis by Paraquat.

Cellular Senescence Is Induced by the Environmental Neurotoxin Paraquat and Contributes to Neuropathology Linked to Parkinson's Disease.

[The impact of electronic cigarettes usage on the endothelial function and the progression of atherosclerosis].

[Clinical analysis of lower limb thrombosis caused by paraquat poisoning].

Effects on metabolic parameters in young rats born with low birth weight after exposure to a mixture of pesticides.

Acrolein-induced atherogenesis by stimulation of hepatic flavin containing monooxygenase 3 and a protection from hydroxytyrosol.

Effects of prolonged methylprednisolone treatment after pulse therapy for paraquat-intoxicated rats.

Phytrantriol-based lyotropic liquid crystal as a transdermal delivery system.

Protective Effects of a Rho Kinase Inhibitor on Paraquat-Induced Acute Lung Injuries in Rats.

Combined treatment with cinnamaldehyde and PTH enhances the therapeutic effect on glucocorticoid-induced osteoporosis through inhibiting osteoclastogenesis and promoting osteoblastogenesis.

Cinnamaldehyde exerts vasculoprotective effects in hypercholesterolemic rabbits.

Cinnamic aldehyde inhibits vascular smooth muscle cell proliferation and neointimal hyperplasia in Zucker Diabetic Fatty rats.

The KCa3.1 blocker TRAM-34 inhibits proliferation of fibroblasts in paraquat-induced pulmonary fibrosis.

Novel action of vinpocetine in the prevention of paraquat-induced parkinsonism in mice: involvement of oxidative stress and neuroinflammation.

Trans-cinnamic aldehyde inhibits *Aggregatibacter actinomycetemcomitans*-induced inflammation in THP-1-derived macrophages via autophagy activation.

Administration of cinnamaldehyde promotes osteogenesis in ovariectomized rats and differentiation of osteoblast *in vitro*.

Acrolein Contributes to the Neuropathic Pain and Neuron Damage after Ischemic-Reperfusion Spinal Cord Injury.

Necrostatin-1 Protects Against Paraquat-Induced Cardiac Contractile Dysfunction via RIP1-RIP3-MLKL-Dependent Necroptosis Pathway.

FGF21 attenuates pulmonary fibrogenesis through ameliorating oxidative stress *in vivo* and *in vitro*.

Submicron emulsion of cinnamaldehyde ameliorates bleomycin-induced idiopathic pulmonary fibrosis via inhibition of inflammation, oxidative stress and epithelial-mesenchymal transition.

Protective effect of ALDH2 against cyclophosphamide-induced acute hepatotoxicity via attenuating oxidative stress and reactive aldehydes.

Acrolein-mediated neuronal cell death and alpha-synuclein aggregation: Implications for Parkinson's disease.

Neutrophil extracellular traps in acrolein promoted hepatic ischemia reperfusion injury: Therapeutic potential of NOX2 and p38MAPK inhibitors.

Protective Effects of Chymostatin on Paraquat-Induced Acute Lung Injury in Mice.

Combination Therapy with Pirfenidone plus Prednisolone Ameliorates Paraquat-Induced Pulmonary Fibrosis.

Immunomodulatory and therapeutic role of *Cinnamomum verum* extracts in collagen-induced arthritic BALB/c mice.

Mutations in *Caenorhabditis elegans* neuroigin-like glit-1, the apoptosis pathway and the calcium chaperone crt-1 increase dopaminergic neurodegeneration after 6-OHDA treatment.

DJ-1 Suppresses Cytoplasmic TDP-43 Aggregation in Oxidative Stress-Induced Cell Injury.

Orofacial antinociceptive effect of *Mimosa tenuiflora* (Willd.) Poiret.

Acrolein: An Effective Biomarker for Tissue Damage Produced from Polyamines.

Acrolein induces NLRP3 inflammasome-mediated pyroptosis and suppresses migration via ROS-dependent autophagy in vascular endothelial cells.

Integrin targeting of glyphosate and its cell adhesion modulation effects on osteoblastic MC3T3-E1 cells revealed by label-free optical biosensing.

Exercise and \hat{I}^2 -alanine supplementation on carnosine-acrolein adduct in skeletal muscle.

Isolation and identification of a novel algicidal peptide from mackerel muscle hydrolysate.

Multidrug Resistance Protein 1 (MRP1/ABCC1)-Mediated Cellular Protection and Transport of Methylated Arsenic Metabolites Differs between Human Cell Lines.

Overexpression of PDX-II gene in potato (*Solanum tuberosum* L.) leads to the enhanced accumulation of vitamin B6 in tuber tissues and tolerance to abiotic stresses.

Chronic adriamycin treatment impairs CGRP-mediated functions of meningeal sensory nerves.

Mitochondrial ROS cause motor deficits induced by synaptic inactivity: Implications for synapse pruning.

Silicon Decreases Dimethylarsinic Acid Concentration in Rice Grain and Mitigates Straighthead Disorder.

Atrazine affects the morphophysiology, tissue homeostasis and aromatase expression in the efferent ductules of adult rats with mild alterations in the ventral prostate.

Dantrolene is not the answer to 2,4-dinitrophenol poisoning: more heated debate.

Key role of singlet oxygen and peroxyxynitrite in viral RNA damage during virucidal effect of plasma torch on feline calicivirus.

Intra-amniotic Sildenafil Treatment Modulates Vascular Smooth Muscle Cell Phenotype in the Nitrofen Model of Congenital Diaphragmatic Hernia.

Cleft palate formation after palatal fusion occurs due to the rupture of epithelial basement membranes.

Flavin homeostasis in the mouse retina during aging and degeneration.

Head skeleton malformations in zebrafish (*Danio rerio*) to assess adverse effects of mixtures of compounds.

Hexachloronaphthalene (HxCN) as a potential endocrine disruptor in female rats.

Increases in bioactive lipids accompany early metabolic changes associated with \hat{I}^2 -cell expansion in response to short-term high-fat diet.

Research on mechanism of PCS in damaging vascular endothelial cells and promoting formation of atherosclerosis via TLR4/TREM-1.

Dioxin-like PCB 126 increases intestinal inflammation and disrupts gut microbiota and metabolic homeostasis.

Contribution of uraemic toxins to the vascular fibrosis associated with chronic kidney disease.

Morphological evaluation of liposomal iron carriers.

Fetal lung transcriptome patterns in an ex vivo compression model of diaphragmatic hernia.

Ketogenic diet regulates the antioxidant catalase via the transcription factor PPAR α .

Upregulated EFNB2 and EPHB4 promotes lung development in a nitrofen-induced congenital diaphragmatic hernia rat model.

Cohort study of workers at a New Zealand agrochemical plant to assess the effect of dioxin exposure on mortality.

Eleven Weeks of Iron Supplementation Does Not Maintain Iron Status for an Entire Competitive Season in Elite Female Volleyball Players: A Follow-Up Study.

[Effects of sodium arsenite exposure on activation and extracellular matrix secretion of human hepatic stellate cells].

Effect of Norepinephrine on Intracellular Ca²⁺ Levels in Malignant Hyperthermia-Susceptible B Cells: Pilot Study in the Search for a New Diagnostic Test for Malignant Hyperthermia.

Anemia in Older Adults.

Mitochondrial uncoupling prodrug improves tissue sparing, cognitive outcome, and mitochondrial bioenergetics after traumatic brain injury in male mice.

Neuroprotective effects of dietary borax in the brain tissue of rainbow trout (*Oncorhynchus mykiss*) exposed to copper-induced toxicity.

Paternal developmental toxicant exposure is associated with epigenetic modulation of sperm and placental Pgr and Igf2 in a mouse model.

The role of molecular modelling strategies in validating the effects of chrysin on sodium arsenite-induced chromosomal and DNA damage.

The Impact of Uremic Toxicity Induced Inflammatory Response on the Cardiovascular Burden in Chronic Kidney Disease.

Impacts of Indoxyl Sulfate and p-Cresol Sulfate on Chronic Kidney Disease and Mitigating Effects of AST-120.

Angptl2 deficiency attenuates paraquat (PQ)-induced lung injury in mice by altering inflammation, oxidative stress and fibrosis through NF- κ B pathway.

Protective effect of simvastatin on arterial plaque instability induced by p-cresyl sulfate.

Diagnostic meaning of blood p-cresol concentration in forensic autopsy cases.

Sensitization of colorectal cancer cells to irinotecan by the Survivin inhibitor LLP3 depends on XAF1 proficiency in the context of mutated p53.

Ellagic acid mitigates sodium arsenite-induced renal and hepatic toxicity in male Wistar rats.

Selective synthesis of 7-O-substituted luteolin derivatives and their melanogenesis and proliferation inhibitory activity in B16 melanoma cells.

Comparative study of persistent organic pollutant (POP) (chlorinated pesticides, PCBs, and dioxins/furans) concentrations in cancer-affected human organs with those of healthy organs.

Mixed "Antiandrogenic" Chemicals at Low Individual Doses Produce Reproductive Tract Malformations in the Male Rat.

The Influence of Obesity on the Pharmacokinetics of Dioxin in Mice: An Assessment Using Classical and PBPK Modeling.

Of mice and men - environmental temperature, body temperature, and treatment of obesity.

2,3,7,8-Tetrachlorodibenzo-p-dioxin dose-dependently increases bone mass and decreases marrow adiposity in juvenile mice.

TLQP Peptides in Amyotrophic Lateral Sclerosis: Possible Blood Biomarkers with a Neuroprotective Role.

The Effect of Boric Acid and Borax on Oxidative Stress, Inflammation, ER Stress and Apoptosis in Cisplatin Toxication and Nephrotoxicity Developing as a Result of Toxication.

A delayed proinflammatory response of human preadipocytes to PCB126 is dependent on the aryl hydrocarbon receptor.

Possible Obesogenic Effects of Bisphenols Accumulation in the Human Brain.

[The establishment of the immortalized mouse brain microvascular pericytes model and its preliminary application in screening of cerebrovascular toxicants].

Stress Granule Assembly Disrupts Nucleocytoplasmic Transport.

Metabolism and disposition of arsenic species after repeated oral dosing with sodium arsenite in drinking water. II. Measurements in pregnant and fetal CD-1 mice.

Microglial activation and the nitric oxide/cGMP/PKG pathway underlie enhanced neuronal vulnerability to mitochondrial dysfunction in experimental multiple sclerosis.

Fucoidan Rescues p-Cresol-Induced Cellular Senescence in Mesenchymal Stem Cells via FAK-Akt-TWIST Axis.

Cholinesterase research outreach project (CROP): point of care cholinesterase measurement in an Australian agricultural community.

The possible neuroprotective effect of ellagic acid on sodium arsenate-induced neurotoxicity in rats.

Alterations in DNA methyltransferases and methyl-CpG binding domain proteins during cleft palate formation as induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in mice.

Genetic and functional analysis of the RYR1 mutation p.Thr84Met revealed a susceptibility to malignant hyperthermia.

Dioxin-like PCB 126 Increases Systemic Inflammation and Accelerates Atherosclerosis in Lean LDL Receptor-Deficient Mice.

In rats gestational iron deficiency does not change body fat or hepatic mitochondria in the aged offspring.

Diterpene ginkgolides meglumine injection protects against paraquat-induced lung injury and pulmonary fibrosis in rats.

Immediate tooth replantation: root canal filling for delayed initiation of endodontic treatment.

The AKT/BCL-2 Axis Mediates Survival of Uterine Leiomyoma in a Novel 3D Spheroid Model.

Environmental pollutant hexachlorobenzene induces hypertension in a rat model.

Arjunolic Acid Improves the Serum Level of Vitamin B(12) and Folate in the Process of the Attenuation of Arsenic Induced Uterine Oxidative Stress.

[Effects of prenatal tetrandrine treatment on the expression of Kruppel-like factor 5 and Survivin in the lung of congenital diaphragmatic hernia rat model induced by nitrofen].

±-Lipoic acid inhibits testicular and epididymal oxidative damage and improves fertility efficacy in arsenic-intoxicated rats.

Roles of cytosolic phospholipase A(2)± in reproductive and systemic toxicities in 2,3,7,8-tetrachlorodibenzo-p-dioxin-exposed mice.

Increased CaSR and TRPC6 pulmonary vascular expression in the nitrofen-induced model of congenital diaphragmatic hernia.

Aberrant expression of miR-451a contributes to 1,2-dichloroethane-induced hepatic glycerol gluconeogenesis disorder by inhibiting glycerol kinase expression in NIH Swiss mice.

Downregulated Elastin Microfibril Interfacer 1 Expression in the Pulmonary Vasculature of Experimental Congenital Diaphragmatic Hernia.

Decreased Expression of Integrin Subunits ±3, ±6, and ±8 in the Branching Airway Mesenchyme of Nitrofen-Induced Hypoplastic Lungs.

Decreased Rac1 Cardiac Expression in Nitrofen-Induced Diaphragmatic Hernia.

The Role of Cytochromes P450 in Infection.

Latent forms of the carious lesion of human lower third molars.

Recent decreasing trends of exposure to PCDDs/PCDFs/dioxin-like PCBs in general populations, and associations with diabetes, metabolic syndrome, and gout/hyperuricemia.

Novel insight into circular RNA HECTD1 in astrocyte activation via autophagy by targeting MIR142-TIPARP: implications for cerebral ischemic stroke.

Thymoquinone is protective against 2,3,7,8-tetrachlorodibenzo-p-dioxin induced hepatotoxicity.

Evidence for estrogeno-mimetic effects of a mixture of low-dose pollutants in a model of ovariectomized mice.

Perinatal Exposure to the Cyanotoxin β -N-Methylamino-L-Alanine (BMAA) Results in Long-Lasting Behavioral Changes in Offspring-Potential Involvement of DNA Damage and Oxidative Stress.

Slow Ca^{2+} Efflux by $\text{Ca}^{2+}/\text{H}^{+}$ Exchange in Cardiac Mitochondria Is Modulated by Ca^{2+} Re-uptake via MCU, Extra-Mitochondrial pH, and H^{+} Pumping by F₀F₁-ATPase.

Effects of Polychlorinated Pesticides and Their Metabolites on Phospholipid Organization in Model Microbial Membranes.

Release and toxicity of adipose tissue-stored TCDD: Direct evidence from a xenografted fat model.

A simple, one-step polychromatic staining method for epoxy-embedded semithin tissue sections.

Perivascular adipose tissue protects against the vascular dysfunction induced by acute ethanol intake: Role of hydrogen peroxide.

Pesticide-Poisoned Patients: Can They Be Used as Potential Organ Donors?

Pharmaceuticals, hormones, pesticides, and other bioactive contaminants in water, sediment, and tissue from Rocky Mountain National Park, 2012-2013.

Endogenous and exogenous biomarker analysis in terrestrial phase amphibians (*Lithobates sphenocphala*) following dermal exposure to pesticide mixtures.

Risk for animal and human health related to the presence of dioxins and dioxin-like PCBs in feed and food.

Persistent Organic Pollutant Burden, Experimental POP Exposure, and Tissue Properties Affect Metabolic Profiles of Blubber from Gray Seal Pups.

Thidiazuron-induced somatic embryogenesis and changes of antioxidant properties in tissue cultures of half-high blueberry plants.

2,6-Dihydroxybenzaldehyde Analogues of the Iron Chelator Salicylaldehyde Isonicotinoyl Hydrazone: Increased Hydrolytic Stability and Cytoprotective Activity against Oxidative Stress.

Tissue-specific bioaccumulation, depuration and metabolism of 4,4'-dichlorodiphenyl sulfide in the freshwater mussel *Anodonta woodiana*.

Pesticide toxicity: a mechanistic approach.

Expression analysis of two SOMATIC EMBRYOGENESIS RECEPTOR KINASE (SERK) genes during in vitro morphogenesis in Spanish cedar (*Cedrela odorata* L.).

Signaling Events Downstream of AHR Activation That Contribute to Toxic Responses: The Functional Role of an AHR-Dependent Long Noncoding RNA (slincR) Using the Zebrafish Model.

Dynamics study on the role of curcumin on TGF- β 1 expression and pathological changes in acute paraquat poisoned rats.

Metabolism and disposition of arsenic species from controlled dosing with sodium arsenite in adult female CD-1 mice. III. Toxicokinetic studies following oral and intravenous administration.

Thidiazuron-induced abnormalities in plant tissue cultures.

The effect of prenatal exposure on disposition of hexachloronaphthalene in female Wistar rats and fetal compartment.

Fatty acids, polychlorinated dibenzo-p-dioxins and dibenzofurans, and dioxin-like polychlorinated biphenyls in paired muscle and skin from fish from the Bohai coast, China: Benefits and risks associated with fish consumption.

Cell Penetration, Herbicidal Activity, and in-vivo-Toxicity of Oligo-Arginine Derivatives and of Novel Guanidinium-Rich Compounds Derived from the Biopolymer Cyanophycin.

Utility of Serum miR-122, Liver Enzymes, and Hepatic Histopathology in Response to Hepatotoxicants in Sprague-Dawley Rats.

Nrf2 Signaling in Sodium Azide-Treated Oligodendrocytes Restores Mitochondrial Functions.

Environmental phenols and parabens in adipose tissue from hospitalized adults in Southern Spain.

Fabrication of functionalized citrus pectin/silk fibroin scaffolds for skin tissue engineering.

Ingestion of subthreshold doses of environmental toxins induces ascending Parkinsonism in the rat.

sox9b is required in cardiomyocytes for cardiac morphogenesis and function.

RXFP1 Receptor Activation by Relaxin-2 Induces Vascular Relaxation in Mice via a G_{i2} -Protein/ $PI3K/Akt/Nitric\ Oxide$ -Coupled Pathway.

Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin increases the activation of aryl hydrocarbon receptor and is associated with the aggressiveness of osteosarcoma MG-63 osteoblast-like cells.

Protective Effect of Hydroxytyrosol Against Oxidative Stress Mediated by Arsenic-Induced Neurotoxicity in Rats.

Hapten-mediated recruitment of polyclonal antibodies to tumors engenders antitumor immunity.

Waterborne and Dietborne Toxicity of Inorganic Arsenic to the Freshwater Zooplankton *Daphnia magna*.

Modulating effect of selected pharmaceuticals on bone in female rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Toxicity assessment of agrochemical Almix in *Heteropneustes fossilis* through histopathological alterations.

The effect of crocin on testicular tissue and sperm parameters of mice offspring from mothers exposed to atrazine during pregnancy and lactation periods: An experimental study.

Data on recurrent somatic embryogenesis and in vitro micropropagation of *Cnidium officinale* Makino.

Seasonal variations of contamination and exoskeletal malformations in the white shrimps *Palaemon longirostris* in the Gironde estuary, France.

Comparison of Hepatic NRF2 and Aryl Hydrocarbon Receptor Binding in 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Treated Mice Demonstrates NRF2-Independent PKM2 Induction.

Modulation of the Oxidative Stress and Lipid Peroxidation by Endocannabinoids and Their Lipid Analogues.

Author Correction: Next generation histology methods for three-dimensional imaging of fresh and archival human brain tissues.

Aldehydes are the predominant forces inducing DNA damage and inhibiting DNA repair in tobacco smoke carcinogenesis.

Freeze-induced cyanide toxicity does not maintain the cyanogenesis polymorphism in white clover (*Trifolium repens*).

Cigarette smoke alters lung vascular permeability and endothelial barrier function (2017 Grover Conference Series).

Ellagic acid: A promising protective remedy against testicular toxicity induced by arsenic.

Relative effective potencies of dioxin-like compounds in rodent and human lung cell models.

Bioaccumulation of As, Hg, and Se in tunas *Thunnus albacares* and *Katsuwonus pelamis* from the Eastern Pacific: tissue distribution and As speciation.

Xanthohumol ameliorates 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced cellular toxicity in cultured MC3T3-E1 osteoblastic cells.

Phospholipase D \hat{I} assists to cortical microtubule recovery after salt stress.

Pharmacologic modeling of primary mitochondrial respiratory chain dysfunction in zebrafish.

Gain-of-function mutation of AtDICE1, encoding a putative endoplasmic reticulum-localized membrane protein, causes defects in anisotropic cell elongation by disturbing cell wall integrity in *Arabidopsis*.

Systemic Acrolein Elevations in Mice With Experimental Autoimmune Encephalomyelitis and Patients With Multiple Sclerosis.

Antimicrobial agent triclosan disrupts mitochondrial structure, revealed by super-resolution microscopy, and inhibits mast cell signaling via calcium modulation.

Complex toxicity as disruption of adipocyte or osteoblast differentiation in human mesenchymal stem cells under the mixed condition of TBBPA and TCDD.

Protein-bounded uremic toxin p-cresylsulfate induces vascular permeability alternations.

Continuous Infusion of Phenyline, Cyclosporine A, or Their Combination: Evaluation of Mitochondrial Bioenergetics, Oxidative Damage, and Cytoskeletal Degradation following Severe Controlled Cortical Impact Traumatic Brain Injury in Rats.

Species-specific bioaccumulation and correlated health risk of arsenic compounds in freshwater fish from a typical mine-impacted river.

Novel Conducting and Biodegradable Copolymers with Noncytotoxic Properties toward Embryonic Stem Cells.

27-Deoxyactein prevents 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced cellular damage in MC3T3-E1 osteoblastic cells.

Berberine protects the liver and kidney against functional disorders and histological damages induced by ferrous sulfate.

Mutagenicity and antimutagenicity of *Salacia crassifolia* (mart. Ex. Schult.) G. Don. evaluated by Ames test.

Low Oxidative Stress-Mediated Proliferation Via JNK-FOXO3a-Catalase Signaling in Transplanted Adult Stem Cells Promotes Wound Tissue Regeneration.

Biota monitoring under the Water Framework Directive: On tissue choice and fish species selection.

Dioxin-like contaminants are no longer a risk to the American eel (*Anguilla rostrata*) in Lake Ontario.

Integrated metabolic models for xenobiotic induced mitochondrial toxicity in skeletal muscle.

Identification of novel Nrf2 activators from *Cinnamomum chartophyllum* H.W. Li and their potential application of preventing oxidative insults in human lung epithelial cells.

Rapid activity-dependent modulation of the intrinsic excitability through up-regulation of KCNQ/Kv7 channel function in neonatal spinal motoneurons.

Enzyme polymorphism, oxygen and injury: a lipidomic analysis of flight-induced oxidative damage in a succinate dehydrogenase d (*Sdh*d)-polymorphic insect.

Identification of potential serum biomarkers of acute paraquat poisoning in humans using an iTRAQ quantitative proteomic.

Evaluation of allyl isothiocyanate as a soil fumigant against soil-borne diseases in commercial tomato (*Lycopersicon esculentum* Mill.) production in China.

Ion-Pairing with Spermine Targets Theophylline To the Lungs via the Polyamine Transport System.

AHR2 required for normal behavioral responses and proper development of the skeletal and reproductive systems in zebrafish.

Differential induction of polar and non-polar metabolism during wound-induced suberization in potato (*Solanum tuberosum* L.) tubers.

Mitochondrial F(1)-ATPase extends glycolysis and pH decline in an in vitro model.

Phenotypic responses in *Caenorhabditis elegans* following chronic low-level exposures to inorganic and organic compounds.

Environmentally friendly procedure based on VA-MSPD for the determination of booster biocides in fish tissue.

In Silico-Based Repositioning of Phosphinothricin as a Novel Technetium-99m Imaging Probe with Potential Anti-Cancer Activity.

The consequence of NAC on sodium arsenite-induced uterine oxidative stress.

Spectroscopic analyses and genotoxicity of dioxins in the aquatic environment of Alexandria.

Analysis of expression profile data identifies key genes and pathways in hepatocellular carcinoma.

Dysregulation of antioxidant responses in patients diagnosed with concomitant Primary Sclerosing Cholangitis/Inflammatory Bowel Disease.

Pesticide residues in muscles of some marine fish species and seaweeds of Iskenderun Bay (Northeastern Mediterranean), Turkey.

Age-Corrected Trends and Toxic Equivalence of PCDD/F and CP-PCBs in Lake Trout and Walleye from the Great Lakes: 2004-2014.

ATP Binding Cassette Sub-family Member 2 (ABCG2) and Xenobiotic Exposure During Early Mouse Embryonic Stem Cell Differentiation.

Aryl Hydrocarbon Receptor Antagonists Mitigate the Effects of Dioxin on Critical Cellular Functions in Differentiating Human Osteoblast-Like Cells.

Comprehensive genome-wide analysis of Glutathione S-transferase gene family in potato (*Solanum tuberosum* L.) and their expression profiling in various anatomical tissues and perturbation conditions.

High-efficiency production of bioactive oleosin-basic fibroblast growth factor in *A. thaliana* and evaluation of wound healing.

Potential Prognostic, Diagnostic and Therapeutic Markers for In-stent Reocclusion in Advanced Age Patients After Coronary Stenting.

A Review on the Expression and Metabolic Features of Orphan Human Cytochrome P450 2S1 (CYP2S1).

Cigarette Smoke Extract Disrupts Transcriptional Activities Mediated by Thyroid Hormones and Its Receptors.

Arsenite exposure potentiates apoptosis-inducing effects of tumor necrosis factor- α through reactive oxygen species.

Synthesis of Oleanolic Acid Analogues and Their Cytotoxic Effects on 3T3 Cell Line.

Dioxin Exposure Alters Molecular and Morphological Responses to Thyroid Hormone in *Xenopus laevis* Cultured Cells and Prometamorphic Tadpoles.

Metabolism and disposition of arsenic species from controlled oral dosing with sodium arsenite in adult female CD-1 mice. I. Pilot study to determine dosing, analytical measurements, and sampling strategies.

Seasonal implications on toxicity biomarkers of *Loricariichthys anus* (Valenciennes, 1835) from a subtropical reservoir.

Understanding the viscoelastic behavior of arterial elastin in glucose via relaxation time distribution spectrum.

Mimicking mechanical response of natural tissues. Strain hardening induced by transient reticulation in lactose-modified chitosan (chitlac).

Intermittent Hypoxia and Unsaturated Aldehydes: Effects on Oral Epithelial Wound Healing.

Protection by extra virgin olive oil against oxidative stress in vitro and in vivo. Chemical and biological studies on the health benefits due to a major component of the Mediterranean diet.

[The roles of TSP-1 and its receptor CD47 in pathogenesis of paraquat-induced pulmonary fibrosis in rats].

Stronger effects of Roundup than its active ingredient glyphosate in damselfly larvae.

Propolis supplementation attenuates the negative effects of oxidative stress induced by paraquat injection on productive performance and immune function in turkey poults.

Effects of glyphosate-based herbicide on pintado da AmazÃ´nia: Hematology, histological aspects, metabolic parameters and genotoxic potential.

Tissue metabolic changes for effects of pirfenidone in rats of acute paraquat poisoning by GC-MS.

Exposures to arsenite and methylarsonite produce insulin resistance and impair insulin-dependent glycogen metabolism in hepatocytes.

Alda-1 Protects Against Acrolein-Induced Acute Lung Injury and Endothelial Barrier Dysfunction.

Effect of resveratrol and tetracycline on the subacute paraquat toxicity in mice.

Mixture Toxicity of Bensulfuron-Methyl and Acetochlor to Red Swamp Crayfish (*Procambarus clarkii*): Behavioral, Morphological and Histological Effects.

Facts and Fallacies in the Debate on Glyphosate Toxicity.

Behavioral responses of honey bees (*Apis mellifera*) to natural and synthetic xenobiotics in food.

[Mechanism of action for oligomeric proanthocyanidins in paraquat-induced acute lung injury].

Exposure of frogs and tadpoles to chiral herbicide fenoxaprop-ethyl.

Auxin-like effects of the natural coumarin scopoletin on *Arabidopsis* cell structure and morphology.

Effects of co-exposure to atrazine and ethanol on the oxidative damage of kidney and liver in Wistar rats.

Epi/perineural and Schwann Cells as Well as Perineural Sheath Integrity are Affected Following 2,4-D Exposure.

Military service, deployments, and exposures in relation to amyotrophic lateral sclerosis survival.

Oxidative stress in the hybrid fish jundiara (*Leiarius marmoratus*—*Pseudoplatystoma reticulatum*) exposed to Roundup Original®).

Porous Se@SiO₂ nanospheres treated paraquat-induced acute lung injury by resisting oxidative stress.

[The effect of captopril and losartan on paraquat-induced pulmonary fibrosis and PIGF expression in the lungs of rats].

Wnt/ β -catenin signaling plays an essential role in $\alpha 7$ nicotinic receptor-mediated neuroprotection of dopaminergic neurons in a mouse Parkinson's disease model.

Reproductive toxicity of Roundup herbicide exposure in male albino rat.

[Effects of small RNA interference targeting mammalian target of rapamycin on paraquat-induced pulmonary fibrosis in rats].

Gender-specific histopathological response in guppies *Poecilia reticulata* exposed to glyphosate or its metabolite aminomethylphosphonic acid.

Rapamycin protects against paraquat-induced pulmonary fibrosis: Activation of Nrf2 signaling pathway.

Maternal linuron exposure alters testicular development in male offspring rats at the whole genome level.

Metabolic profiling of goldfish (*Carassius auratus*) after long-term glyphosate-based herbicide exposure.

Experimental study of sucalfate intervention for paraquat poisoning in rats.

Acrolein Can Cause Cardiovascular Disease: A Review.

[Intervention of edaravone against renal injury induced by acute paraquat poisoning in rats].

Toll-like receptor 9 mediates paraquat-induced acute lung injury: an in vitro and in vivo study.

Dimercaprol is an acrolein scavenger that mitigates acrolein-mediated PC-12 cells toxicity and reduces acrolein in rat following spinal cord injury.

Effects of Roundup formulations on biochemical biomarkers and male sperm quality of the livebearing *Jenynsia multidentata*.

IARC use of oxidative stress as key mode of action characteristic for facilitating cancer classification: Glyphosate case example illustrating a lack of robustness in interpretative implementation.

Mfn2 protects dopaminergic neurons exposed to paraquat both in vitro and in vivo: Implications for idiopathic Parkinson's disease.

[Changes of integrin-linked kinase expression on rats' pulmonary fibrosis induced by paraquat].

[The study of using salvianolate treat acute lung injury in rats induced by paraquat].

Potential mechanisms of development-dependent adverse effects of the herbicide paraquat in 3D rat brain cell cultures.

Isolation and characterization of two glutathione S-transferases from freshwater bivalve *Anodonta woodiana*: Chronic effects of pentachlorophenol on gene expression profiles.

Diuron causes sinking retardation and physiochemical alteration in marine diatoms *Thalassiosira pseudonana* and *Skeletonema marinoi-dohrnii* complex.

Sodium chlorate, a major water disinfection byproduct, alters brush border membrane enzymes, carbohydrate metabolism and impairs antioxidant system of Wistar rat intestine.

Fluazifop- p-butyl, an aryloxyphenoxypropionate herbicide, diminishes renal and hepatic functions and triggers testicular oxidative stress in orally exposed rats.

[The study of using cordyceps-astragalus-salvia miltiorrhiza to treat acute lung injury induced by paraquat poisoning in rats].

Effects of melatonin in rats in the initial third stage of pregnancy exposed to sub-lethal doses of herbicides.

Atrazine exposure elicits copy number alterations in the zebrafish genome.

Glyphosate Adversely Affects *Danio rerio* Males: Acetylcholinesterase Modulation and Oxidative Stress.

Acrolein increases macrophage atherogenicity in association with gut microbiota remodeling in atherosclerotic mice: protective role for the polyphenol-rich pomegranate juice.

Comparison of questionnaire data and analyzed dioxin concentrations as a measure of exposure in soft-tissue sarcoma studies.

MyD88 gene knockout attenuates paraquat-induced acute lung injury.

Oxidative damage of the male reproductive system induced by paraquat.

Perinatal exposure to glyphosate-based herbicide alters the thyrotrophic axis and causes thyroid hormone homeostasis imbalance in male rats.

Effects of atrazine on ovarian growth, in the estuarine crab *Neohelice granulata*.

Development and characterization of a human embryonic stem cell-derived 3D neural tissue model for neurotoxicity testing.

Acrolein and Human Disease: Untangling the Knotty Exposure Scenarios Accompanying Several Diverse Disorders.

Protective action of Omega-3 on paraquat intoxication in *Drosophila melanogaster*.

Vasculitic Neuropathy Following Exposure to a Glyphosate-based Herbicide.

Liver X Receptor Agonist TO901317 Attenuates Paraquat-Induced Acute Lung Injury through Inhibition of NF- κ B and JNK/p38 MAPK Signal Pathways.

Protective Effect of Ellagic Acid on Paraquat-induced Kidney Hazards in Rats.

The effect of glyphosate-based herbicide Roundup and its co-formulant, POEA, on the motoric activity of rat intestine - In vitro study.

A high-throughput, modified ALS activity assay for *Cyperus difformis* and *Schoenoplectus mucronatus* seedlings.

Evaluation of 8-hydroxy-2-deoxyguanosine and NFkB activation, oxidative stress response, acetylcholinesterase activity, and histopathological changes in rainbow trout brain exposed to linuron.

Effect of the herbicide atrazine and its metabolite DACT on bovine sperm quality.

Effects of oral administration of 2,4-dichlorophenoxyacetic acid (2,4-D) on reproductive parameters in male Wistar rats.

Prometryn and humic acid induce Cytochrome P450 1A expression in *Danio rerio* (zebrafish).

Short-term phytotoxicity in *Brassica napus* (L.) in response to pre-emergently applied metazachlor: A microcosm study.

Aldo-keto reductase 1B10 protects human colon cells from DNA damage induced by electrophilic carbonyl compounds.

Soluble Vascular Adhesion Protein-1 Mediates Spermine Oxidation as Semicarbazide-Sensitive Amine Oxidase: Possible Role in Proliferative Diabetic Retinopathy.

Novel tetrazole and cyanamide derivatives as inhibitors of cyclooxygenase-2 enzyme: design, synthesis, anti-inflammatory evaluation, ulcerogenic liability and docking study.

[Protective effect of thalidomide on ALI induced by paraquat poisoning in rats and its mechanism].

[Effects of curcumin on pulmonary fibrosis and functions of paraquat-challenged rats].

Coadministration of isomalto-oligosaccharides augments metabolic health benefits of cinnamaldehyde in high fat diet fed mice.

Inhibition of NLRP3 inflammasome: a new protective mechanism of cinnamaldehyde in endotoxin poisoning of mice.

Interleukin-17A Plays the Same Role on Mice Acute Lung Injury Respectively Induced by Lipopolysaccharide and Paraquat.

Combined Catalase and ADH Inhibition Ameliorates Ethanol-Induced Myocardial Dysfunction Despite Causing Oxidative Stress in Conscious Female Rats.

Cinnamon reduces inflammatory response in intestinal fibroblasts in vitro and in colitis in vivo leading to decreased fibrosis.

The protective effect of cinnamaldehyde on lipopolysaccharide induced acute lung injury in mice.

Targeted proteome analysis with isotope-coded protein labels for monitoring the influence of dietary phytochemicals on the expression of cytoprotective proteins in primary human colon cells.

Cinnamaldehyde in diabetes: A review of pharmacology, pharmacokinetics and safety.

Activation of MMP-9 activity by acrolein in saliva from patients with primary Sjögren's syndrome and its mechanism.

Cromolyn Sodium Attenuates Paraquat-Induced Lung Injury by Modulation of Proinflammatory Cytokines.

Chloroquine attenuates paraquat-induced lung injury in mice by altering inflammation, oxidative stress and fibrosis.

Cinnamaldehyde potentially attenuates gestational hyperglycemia in rats through modulation of PPAR β , proinflammatory cytokines and oxidative stress.

Phenelzine Protects Brain Mitochondrial Function In Vitro and In Vivo following Traumatic Brain Injury by Scavenging the Reactive Carbonyls 4-Hydroxynonenal and Acrolein Leading to Cortical Histological Neuroprotection.

[Cinnamaldehyde attenuates pressure overload-induced cardiac fibrosis via inhibition of endothelial mesenchymal transition].

Mucuna pruriens reduces inducible nitric oxide synthase expression in Parkinsonian mice model.

Cinnamaldehyde Ameliorates Diet-Induced Obesity in Mice by Inducing Browning of White Adipose Tissue.

Localization of Acrolein-Lysine Adduct in Fibrovascular Tissues of Proliferative Diabetic Retinopathy.

Bioaccumulation of pharmaceutically active compounds and endocrine disrupting chemicals in aquatic macrophytes: Results of hydroponic experiments with *Echinodorus horemanii* and *Eichhornia crassipes*.

Chloroplast-associated metabolic functions influence the susceptibility of maize to *Ustilago maydis*.

[Protective effect of 5-aminosalicylic acid on the kidney of paraquat poisoning rats by Nrf2-ARE signal pathway].

Estimating Pesticide Attenuation From Water Dating and the Ratio of Metabolite to Parent Compound.

Effects of pentachlorophenol on the quail (*Coturnix japonica*) liver detoxification pathway.

Metabolic parameters and oxidative balance in juvenile *Rhamdia quelen* exposed to rice paddy herbicides: Roundup ® , Primoleo ® , and Facet ® .

Preparation of a calcium carbonate-based bone substitute with cinnamaldehyde crosslinking agent with potential anti-inflammatory properties.

Autophagy deficient keratinocytes display increased DNA damage, senescence and aberrant lipid composition after oxidative stress in vitro and in vivo.

Effects of pharmaceuticals and personal care products (PPCPs) on multixenobiotic resistance (MXR) related efflux transporter activity in zebrafish (*Danio rerio*) embryos.

The Mitochondrial Lon Protease Is Required for Age-Specific and Sex-Specific Adaptation to Oxidative Stress.

Isoflavones Induce BEX2-Dependent Autophagy to Prevent ATR-Induced Neurotoxicity in SH-SY5Y Cells.

Indirect Somatic Embryogenesis of Date Palm Using Juvenile Leaf Explants and Low 2,4-D Concentration.

Behavioral effects and neuroanatomical targets of acute atrazine exposure in the male Sprague-Dawley rat.

2-Methoxycinnamaldehyde inhibits the TNF- α -induced proliferation and migration of human aortic smooth muscle cells.

Impact of the Oral Adsorbent AST-120 on Organ-Specific Accumulation of Uremic Toxins: LC-MS/MS and MS Imaging Techniques.

Tooth development disorders in infants of rat dams exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin and protective role of tocopherol and acetylsalicylic acid.

Expression of aryl hydrocarbon receptor, inflammatory cytokines, and incidence of rheumatoid arthritis in Vietnamese dioxin-exposed people.

2,3,7,8-Tetrachlorodibenzo-p-dioxin influences bovine herpesvirus 1 replication through upregulation of SIRT3 and cytoskeletal reorganization.

p-Cresyl glucuronide is a major metabolite of p-cresol in mouse: in contrast to p-cresyl sulphate, p-cresyl glucuronide fails to promote insulin resistance.

From the Cover: High Susceptibility of Lrig1 Sebaceous Stem Cells to TCDD in Mice.

Editor's Highlight: PCB126 Exposure Increases Risk for Peripheral Vascular Diseases in a Liver Injury Mouse Model.

Distribution of arsenic and oxidative stress in mice after rice ingestion.

Maternal Resveratrol Treatment Reduces the Risk of Mammary Carcinogenesis in Female Offspring Prenatally Exposure to 2,3,7,8-Tetrachlorodibenzo-p-Dioxin.

Apoptosis signal-regulating kinase 1 inhibition attenuates cardiac hypertrophy and cardiorenal fibrosis induced by uremic toxins: Implications for cardiorenal syndrome.

Obesogenic endocrine disruptors and obesity: myths and truths.

A dioxin-like compound induces hyperplasia and branching morphogenesis in mouse mammary gland, through alterations in TGF- β 1 and aryl hydrocarbon receptor signaling.

Review on arsenic-induced toxicity in male reproductive system and its amelioration.

[Sensory axonal polyneuropathy due to 2,4-dinitrophenol].

Mitochondrial uncoupling in the melanocortin system differentially regulates NPY and POMC neurons to promote weight-loss.

Heme Biosynthetic Pathway is Functionally Linked to Adipogenesis via Mitochondrial Respiratory Activity.

Skeletal and dental effects on rats following in utero/lactational exposure to the non-dioxin-like polychlorinated biphenyl PCB 180.

Adipose Tissue as a Site of Toxin Accumulation.

Dioxin Receptor Adjusts Liver Regeneration After Acute Toxic Injury and Protects Against Liver Carcinogenesis.

LncRNA H19 and Target Gene-mediated Cleft Palate Induced by TCDD.

A microfluidic platform for modeling metastatic cancer cell matrix invasion.

Chronic exposure of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces an obesogenic effect in C57BL/6J mice fed a high fat diet.

Filth Fly Activity Associated With Composted and Noncomposted Beef Cadavers and Laboratory Studies on Volatile Organic Compounds.

Metabolic inhibition reduces cardiac L-type Ca²⁺ channel current due to acidification caused by ATP hydrolysis.

Increased Frequency of Rheumatoid Arthritis and Allergic Rhinitis among Pesticide Sprayers and Associations with Pesticide Use.

The Complex Biology of the Aryl Hydrocarbon Receptor and Its Role in the Pituitary Gland.

Broad Spectrum Macromolecular Antimicrobials with Biofilm Disruption Capability and In Vivo Efficacy.

Multidirectional inhibition of cortico-hippocampal neurodegeneration by kolaviron treatment in rats.

A Simple Procedure for the Evaluation of Bone Vitality by Staining with a Tetrazolium Salt.

Benign and tumor parenchyma metabolomic profiles affect compensatory renal growth in renal cell carcinoma surgical patients.

Pesticide Exposure and Risk of Rheumatoid Arthritis among Licensed Male Pesticide Applicators in the Agricultural Health Study.

High Consumption of Iron Exacerbates Hyperlipidemia, Atherosclerosis, and Female Sterility in Zebrafish via Acceleration of Glycation and Degradation of Serum Lipoproteins.

Rho guanine nucleotide exchange factor (RGNEF) is a prosurvival factor under stress conditions.

Absence of the NOD2 protein renders epithelia more susceptible to barrier dysfunction due to mitochondrial dysfunction.

Protective effect of hydroxytyrosol in arsenic-induced mitochondrial dysfunction in rat brain.

Evaluation of processed borax as antidote for aconite poisoning.

Down-regulation of N-acetylase-N-sulfotransferase-1 signaling in the developing diaphragmatic vasculature of nitrofen-induced congenital diaphragmatic hernia.

Polychlorinated biphenyls exposure-induced insulin resistance is mediated by lipid droplet enlargement through Fsp27.

TCF21 and the environmental sensor aryl-hydrocarbon receptor cooperate to activate a pro-inflammatory gene expression program in coronary artery smooth muscle cells.

Dioxins and related environmental contaminants increase TDP-43 levels.

Protective Effects of Curcumin against Sodium Arsenite-induced Ovarian Oxidative Injury in a Mouse Model.

Preliminary research on DNA methylation changes during murine palatogenesis induced by TCDD.

Elastase and matrix metalloproteinase activities are associated with pulmonary vascular disease in the nitrofen rat model of congenital diaphragmatic hernia.

Downregulation of KCNQ5 expression in the rat pulmonary vasculature of nitrofen-induced congenital diaphragmatic hernia.

Lower concentrations of receptor for advanced glycation end products and epiregulin in amniotic fluid correlate to chemically induced cleft palate in mice.

Evidence Favoring a Positive Feedback Loop for Physiologic Auto Upregulation of hnRNP-E1 during Prolonged Folate Deficiency in Human Placental Cells.

Inhibition of Kupffer cell functions modulates arsenic intoxication in Wistar rats.

Intracellular ATP in balance of pro- and anti-inflammatory cytokines in adipose tissue with and without tissue expansion.

Protective effects of levamisole, acetylsalicylic acid, and α -tocopherol against dioxin toxicity measured as the expression of AhR and COX-2 in a chicken embryo model.

Dose-response characteristics of Clematis triterpenoid saponins and clematichinenside AR in rheumatoid arthritis rats by liquid chromatography/mass spectrometry-based serum and urine metabolomics.

[Pollution Characteristics of Chlorobenzenes in Organs of Fish from Typical Epidemic Areas of Schistosomiasis Prevalence].

Endocrine Disruptors and Obesity.

Fluoride and arsenic exposure affects spatial memory and activates the ERK/CREB signaling pathway in offspring rats.

Cilostazol inhibits uremic toxin-induced vascular smooth muscle cell dysfunction: role of Axl signaling.

Targeted mitochondrial uncoupling beyond UCP1 - The fine line between death and metabolic health.

From the Cover: Embryonic Exposure to TCDD Impacts Osteogenesis of the Axial Skeleton in Japanese medaka, *Oryzias latipes*.

Effect of curcumin on kidney histopathological changes, lipid peroxidation and total antioxidant capacity of serum in sodium arsenite-treated mice.

Expression of T-box transcription factors 2, 4 and 5 is decreased in the branching airway mesenchyme of nitrofen-induced hypoplastic lungs.

Pesticides: an update of human exposure and toxicity.

Imbalance of NFATc2 and KV1.5 Expression in Rat Pulmonary Vasculature of Nitrofen-Induced Congenital Diaphragmatic Hernia.

Fibrillin-1 Expression Is Decreased in the Diaphragmatic Muscle Connective Tissue of Nitrofen-Induced Congenital Diaphragmatic Hernia.

Accelerated Bone Regeneration by Two-Photon Photoactivated Carbon Nitride Nanosheets.

Aryl hydrocarbon receptor suppresses the osteogenesis of mesenchymal stem cells in collagen-induced arthritic mice through the inhibition of β -catenin.

Environmental stresses induce transgenerationally inheritable survival advantages via germline-to-soma communication in *Caenorhabditis elegans*.

[Uremic toxins and gut micro biome].

Protein-bound uremic toxins - biological effects and impact on morbidity in patients with chronic kidney disease.

Mitochondrial Uncoupler Prodrug of 2,4-Dinitrophenol, MP201, Prevents Neuronal Damage and Preserves Vision in Experimental Optic Neuritis.

Activation of biologically relevant levels of reactive oxygen species by Au/g-C(3)N(4) hybrid nanozyme for bacteria killing and wound disinfection.

Ion Imbalance Is Involved in the Mechanisms of Liver Oxidative Damage in Rats Exposed to Glyphosate.

SOCE Is Important for Maintaining Sarcoplasmic Calcium Content and Release in Skeletal Muscle Fibers.

Tissue breathing and topology of rats thymocytes surface under acute total β -irradiation.

Effects of water extracts of *Rehmannia glutinosa* on antioxidant system of Nrf2 in paraquat-induced insulin resistance diabetic rat model.

Caffeine - rich infusion from *Cola nitida* (kola nut) inhibits major carbohydrate catabolic enzymes; abates redox imbalance; and modulates oxidative dysregulated metabolic pathways and metabolites in Fe(2+)-induced hepatic toxicity.

Lung regeneration after toxic injury is improved in absence of dioxin receptor.

A fatal case of acute bentazone overdose despite cricothyroidotomy during cardiopulmonary resuscitation.

Morphological and morphometrical changes on adult Wistar rat testis caused by chronic sodium arsenite exposure.

Arsenite Induces Vascular Endothelial Cell Dysfunction by Activating IRE1 \pm /XBP1s/HIF1 \pm -Dependent ANGII Signaling.

[(11)C]PF-3274167 as a PET radiotracer of oxytocin receptors: Radiosynthesis and evaluation in rat brain.

Actein alleviates 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated cellular dysfunction in osteoblastic MC3T3-E1 cells.

2, 3, 7, 8-Tetrachlorodibenzo-p-dioxin promotes endothelial cell apoptosis through activation of EP3/p38MAPK/Bcl-2 pathway.

Time courses of post-injury mitochondrial oxidative damage and respiratory dysfunction and neuronal cytoskeletal degradation in a rat model of focal traumatic brain injury.

A microfluidic microinjector for toxicological and developmental studies in *Drosophila* embryos.

The protective effect of hydroalcoholic extract of Ginger (*Zingiber officinale* Rosc.) against iron-induced functional and histological damages in rat liver and kidney.

Mdivi \hat{e} 1 attenuates sodium azide \hat{e} induced apoptosis in H9c2 cardiac muscle cells.

Imbalanced immune responses involving inflammatory molecules and immune-related pathways in the lung of acute and subchronic arsenic-exposed mice.

All-Trans Retinoic Acid Ameliorates Arsenic-Induced Oxidative Stress and Apoptosis in the Rat Uterus by Modulating MAPK Signaling Proteins.

Sodium arsenite-induced cardiovascular and renal dysfunction in rat via oxidative stress and protein kinase B (Akt/PKB) signaling pathway.

Novel Pathways of Ponatinib Disposition Catalyzed By CYP1A1 Involving Generation of Potentially Toxic Metabolites.

The roles of metabolic thermogenesis in body fat regulation in striped hamsters fed high-fat diet at different temperatures.

2,3',4,4',5-Pentachlorobiphenyl impairs insulin-induced NO production partly through excessive ROS production in endothelial cells.

Evaluation of a vital staining protocol with 2,3,5-triphenyltetrazolium chloride for cancellous bone in a sheep model.

Acetolactate Synthase-Inhibiting Gametocide Amidosulfuron Causes Chloroplast Destruction, Tissue Autophagy, and Elevation of Ethylene Release in Rapeseed.

Development of suspect and non-target screening methods for detection of organic contaminants in highway runoff and fish tissue with high-resolution time-of-flight mass spectrometry.

Loss of liver-specific and sexually dimorphic gene expression by aryl hydrocarbon receptor activation in C57BL/6 mice.

Inhibition of ALDH2 expression aggravates renal injury in a rat sepsis syndrome model.

Electrozymographic evaluation of the attenuation of arsenic induced degradation of hepatic SOD, catalase in an in vitro assay system by pectic polysaccharides of *Momordica charantia* in combination with curcumin.

Incidence and pathological study of *Explanatum explanatum* (Creplin, 1847) Fukui, 1929 in goats in Andhra Pradesh, India.

Chemical Transformations of the Fungal Meroterpenoid Dhilirolide A Reveal Skeletal Degradation and Rearrangement Reactions with Biosynthetic Implications.

Tissue-specific distributions of inorganic arsenic and its methylated metabolites, especially in cerebral cortex, cerebellum and hippocampus of mice after a single oral administration of arsenite.

CDC42 expression is altered by dioxin exposure and mediated by multilevel regulations via AhR in human neuroblastoma cells.

Identification of tissue-specific transcriptional markers of caloric restriction in the mouse and their use to evaluate caloric restriction mimetics.

PEDOT:PSS organic electrochemical transistor arrays for extracellular electrophysiological sensing of cardiac cells.

Hepatoprotective Role of *Hydrangea macrophylla* against Sodium Arsenite-Induced Mitochondrial-Dependent Oxidative Stress via the Inhibition of MAPK/Caspase-3 Pathways.

Real-Time Amperometric Recording of Extracellular H_2O_2 in the Brain of Immunocompromised Mice: An In Vitro, Ex Vivo and In Vivo Characterisation Study.

Multiscale Modulation of Nanocrystalline Cellulose Hydrogel via Nanocarbon Hybridization for 3D Neuronal Bilayer Formation.

Ameliorative effect of vitamin E and selenium against oxidative stress induced by sodium azide in liver, kidney, testis and heart of male mice.

Toxicological characterisation of two novel selective aryl hydrocarbon receptor modulators in Sprague-Dawley rats.

Glucose-sensitive self-healing hydrogel as sacrificial materials to fabricate vascularized constructs.

Peroxyoxalate Chemiluminescent Reaction as a Tool for Elimination of Tumour Cells Under Oxidative Stress.

Immunolocation of Heme Oxygenases in the Walls of Cerebral Arteries of Various Diameters in Rats.

Squamous epithelium formation in the respiratory intestine of the bronze *Corydoras aeneus* (Callichthyidae Teleostei).

Single-cell time-lapse imaging of intracellular O_2 in response to metabolic inhibition and mitochondrial cytochrome-c release.

Histopathological changes in zebrafish embryos exposed to DLPCBs extract from Zhanjiang coastal sediment.

Novel keratin modified bacterial cellulose nanocomposite production and characterization for skin tissue engineering.

Mechanistic insight into the effects of Aryl Hydrocarbon Receptor activation on osteogenic differentiation.

Multiple AMPK activators inhibit l-carnitine uptake in C2C12 skeletal muscle myotubes.

Expression of advanced glycation end-products and NF κ B in chick embryos exposed to dioxins and treated with acetylsalicylic acid and α -tocopherol.

Oxidative injury caused by individual and combined exposure of neonicotinoid, organophosphate and herbicide in zebrafish.

Fumarate Copolymer-Chitosan Cross-Linked Scaffold Directed to Osteochondrogenic Tissue Engineering.

Improved tissue culture conditions for the emerging C(4) model *Panicum hallii*.

Preparation of Non-human Primate Brain Tissue for Pre-embedding Immunohistochemistry and Electron Microscopy.

Characterization of E-NTPDase (EC 3.6.1.5) activity in hepatic lymphocytes: A different activity profile from peripheral lymphocytes.

The toxic effects of chlorophenols and associated mechanisms in fish.

SILAC-based quantitative proteomic analysis reveals widespread molecular alterations in human skin keratinocytes upon chronic arsenic exposure.

Pharmacodynamics of S-dimethylarsino-glutathione, a putative metabolic intermediate of inorganic arsenic, in mice.

Environmental Factors Impacting Bone-Relevant Chemokines.

De novo transcriptome assembly analysis of weed *Apera spica-venti* from seven tissues and growth stages.

Quantitative Global Proteomics of Yeast PBP1 Deletion Mutants and Their Stress Responses Identifies Glucose Metabolism, Mitochondrial, and Stress Granule Changes.

Beyond the Aryl Hydrocarbon Receptor: Pathway Interactions in the Hepatotoxicity of 2,3,7,8-Tetrachlorodibenzo-p-dioxin and Related Compounds.

Preventing False Negatives for Histochemical Detection of Phenolics and Lignins in PEG-Embedded Plant Tissues.

Synthesis and evaluation of 1-(cyclopropylmethyl)-4-(4-[(11C)methoxyphenyl]-piperidin-1-yl)-2-oxo-1,2-dihydropyridine-3-carbonitrile ([11C]CMDC) for PET imaging of metabotropic glutamate receptor 2 in the rat brain.

Arsenic levels among pregnant women and newborns in Canada: Results from the Maternal-Infant Research on Environmental Chemicals (MIREC) cohort.

Cellular ROS imaging with hydro-Cy3 dye is strongly influenced by mitochondrial membrane potential.

Structural-functional adaptations of porcine CYP1A1 to metabolize polychlorinated dibenzo-p-dioxins.

Review of Advances in Uroprotective Agents for Cyclophosphamide- and Ifosfamide-induced Hemorrhagic Cystitis.

Surface modified cellulose scaffolds for tissue engineering.

Plant regeneration from embryogenic callus derived from shoot apices and production of transgenic plants by particle inflow gun in dwarf napier grass (*Pennisetum purpureum* Schumach.).

Environmental Toxin Acrolein Alters Levels of Endogenous Lipids, Including TRP Agonists: A Potential Mechanism for Headache Driven by TRPA1 Activation.

Direct Organogenesis and Indirect Somatic Embryogenesis by In Vitro Reversion of Mature Female Floral Buds to a Vegetative State.

Can a Biodegradable Implanted Bilayered Drug Delivery System Loaded with BMP-2/BMP-12 Take an Effective Role in the Biological Repair Process of Bone-Tendon Injuries? A Preliminary Report.

Sirtuin-2 Protects Neural Cells from Oxidative Stress and Is Elevated in Neurodegeneration.

Benefits of Alcohol on Arsenic Toxicity in Rats.

Feeble Antipyretic, Analgesic, and Anti-inflammatory Activities were Found with Regular Dose 4'-O- β -D-Glucosyl-5-O-Methylvisamminol, One of the Conventional Marker Compounds for Quality Evaluation of *Radix Saposhnikoviae*.

The adjuvant use of calcium fructoborate and borax with etanercept in patients with rheumatoid arthritis: Pilot study.

Secondary Hemochromatosis due to Chronic Oral Iron Supplementation.

Hepatoprotective and antioxidant effects of dietary Glycyrrhiza polysaccharide against TCDD-induced hepatic injury and RT-PCR quantification of AHR2, ARNT2, CYP1A mRNA in Jian Carp (*Cyprinus carpio* var. Jian).

[Dose-effect relationship between vitamin C and paraquat poisoning rats].

Histone deacetylase inhibitors mediate DNA damage repair in ameliorating hemorrhagic cystitis.

The sublethal effects of (2,4-Dichlorophenoxy) acetic acid (2,4-D) on narrow-clawed crayfish (*Astacus leptodactylus* Eschscholtz, 1823).

Wartime toxin exposure: recognising the silent killer.

Curcumin inhibits paraquat induced lung inflammation and fibrosis by extracellular matrix modifications in mouse model.

Carvedilol attenuates paraquat-induced lung injury by inhibition of proinflammatory cytokines, chemokine MCP-1, NF- κ B activation and oxidative stress mediators.

Pyrrolidine dithiocarbamate attenuates paraquat-induced acute pulmonary poisoning in vivo via transforming growth factor β 1 and nuclear factor κ B pathway interaction.

Exposure to the widely used herbicide atrazine results in deregulation of global tissue-specific RNA transcription in the third generation and is associated with a global decrease of histone trimethylation in mice.

[Anti-oxidantive effect of methylene blue on acute lung injury induced by paraquat in rat].

Antioxidative response in variegated *Pelargonium zonale* leaves and generation of extracellular H_2O_2 in (peri)vascular tissue induced by sunlight and paraquat.

Mechanism of glyphosate control of *Phelipanche aegyptiaca*.

Rheumatoid Arthritis in Agricultural Health Study Spouses: Associations with Pesticides and Other Farm Exposures.

Inhibition of connective tissue growth factor attenuates paraquat-induced lung fibrosis in a human MRC-5 cell line.

Fresh water fish, *Channa punctatus*, as a model for pendimethalin genotoxicity testing: A new approach toward aquatic environmental contaminants.

MAPK pathway mediates epithelial-mesenchymal transition induced by paraquat in alveolar epithelial cells.

Salvianolic acid B protects against paraquat-induced pulmonary injury by mediating Nrf2/Nox4 redox balance and TGF- β 1/Smad3 signaling.

The receptor for activated C kinase 1 (RACK1) functions in hematopoiesis through JNK activation in Chinese mitten crab *Eriocheir sinensis*.

Continued Studies on the Effects of Simazine on the Liver Histological Structure and Metamorphosis in the Developing *Xenopus laevis*.

Rapid and efficient *Agrobacterium*-mediated transformation of sorghum (*Sorghum bicolor*) employing standard binary vectors and bar gene as a selectable marker.

Roundup(®) in Zebrafish: Effects on Oxidative Status and Gene Expression.

Effects of terbuthylazine-desethyl, a terbuthylazine degradation product, on red swamp crayfish (*Procambarus clarkii*).

Diindolylmethane and Lupeol Modulates Apoptosis and Cell Proliferation in N-Butyl-N-(4-Hydroxybutyl) Nitrosamine Initiated and Dimethylarsinic Acid Promoted rat Bladder Carcinogenesis.

Acute Acrolein Exposure Induces Impairment of Vocal Fold Epithelial Barrier Function.

Embryonic Atrazine Exposure Elicits Alterations in Genes Associated with Neuroendocrine Function in Adult Male Zebrafish.

Effects of atrazine on growth and sex differentiation, in juveniles of the freshwater crayfish *Cherax quadricarinatus*.

The herbicide atrazine induces hyperactivity and compromises tadpole detection of predator chemical cues.

Poly-ADP-ribose polymerase inhibition provides protection against lung injury in a rat paraquat toxicity model.

Accumulation and detoxication responses of the gastropod *Lymnaea stagnalis* to single and combined exposures to natural (cyanobacteria) and anthropogenic (the herbicide RoundUp® Flash) stressors.

The Protective Role of Thiourea on *Leuciscus cephalus* Exposed to Sublethal Doses of Pendigan 330EC (Pendimethalin) Herbicide.

Lycopene ameliorates atrazine-induced oxidative damage in adrenal cortex of male rats by activation of the Nrf2/HO-1 pathway.

Synergistic stress exacerbation in hippocampal neurons: Evidence favoring the dual-hit hypothesis of neurodegeneration.

[The role of transforming growth factor- β (1)/connective tissue growth factor signaling pathway in paraquat-induced pulmonary fibrosis].

Thymoquinone effectively alleviates lung fibrosis induced by paraquat herbicide through down-regulation of pro-fibrotic genes and inhibition of oxidative stress.

Protective effect of *Berberis vulgaris* fruit extract against Paraquat-induced pulmonary fibrosis in rats.

The herbicide glyphosate is a weak inhibitor of acetylcholinesterase in rats.

Human exposure to acrolein: Time-dependence and individual variation in eye irritation.

Unilateral microinjection of acrolein into thoracic spinal cord produces acute and chronic injury and functional deficits.

Effects of pentachlorophenol on the detoxification system in white-rumped munia (*Lonchura striata*).

The functional role of the photosynthetic apparatus in the recovery of *Brassica napus* plants from pre-emergent metazachlor exposure.

Proposed Mode of Action for Acrolein Respiratory Toxicity Associated with Inhaled Tobacco Smoke.

Imazapyr+imazapic herbicide determines acute toxicity in silver catfish *Rhamdia quelen*.

Impacts of 2,4-dichlorophenoxyacetic acid aquatic herbicide formulations on reproduction and development of the fathead minnow (*Pimephales promelas*).

Effects of glyphosate on hepatic tissue evaluating melanomacrophages and erythrocytes responses in neotropical anuran *Leptodactylus latinasus*.

Acute paraquat exposure determines dose-dependent oxidative injury of multiple organs and metabolic dysfunction in rats: impact on exercise tolerance.

Activating Peroxisome Proliferator-Activated Receptors (PPARs): a New Sight for Chrysophanol to Treat Paraquat-Induced Lung Injury.

Effects of the exposure to atrazine on bone development of *Podocnemis expansa* (Testudines, Podocnemididae).

Exposure to different glyphosate formulations on the oxidative and histological status of *Rhamdia quelen*.

Atrazine exposure causes mitochondrial toxicity in liver and muscle cell lines.

Exposure to a glyphosate-based herbicide during pregnancy and lactation induces neurobehavioral alterations in rat offspring.

An embryonic atrazine exposure results in reproductive dysfunction in adult zebrafish and morphological alterations in their offspring.

Mechanism of Developmental Effects in Rats Caused by an N-Phenylimide Herbicide: Transient Fetal Anemia and Sequelae during Mid-to-Late Gestation.

Acute paraquat exposure impairs colonic motility by selectively attenuating nitrergic signalling in the mouse.

The role of L-type amino acid transporters in the uptake of glyphosate across mammalian epithelial tissues.

Reduced salinity increases susceptibility of zooxanthellate jellyfish to herbicide toxicity during a simulated rainfall event.

Acrolein-mediated conduction loss is partially restored by K^+ channel blockers.

Transcriptional profiles of glutathione-S-Transferase isoforms, Cyp, and AOE genes in atrazine-exposed zebrafish embryos.

Effects of diphenyl diselenide on growth, oxidative damage, and antioxidant response in silver catfish.

Radix puerariae extracts ameliorate paraquat-induced pulmonary fibrosis by attenuating follistatin-like 1 and nuclear factor erythroid 2p45-related factor-2 signalling pathways through downregulation of miRNA-21 expression.

Carbonyl Compounds in the Gas Phase of Cigarette Mainstream Smoke and Their Pharmacological Properties.

[The protective effect of bone marrow mesenchymal stem cells carrying antioxidant gene superoxide dismutase on paraquat lung injury in mice].

KLF2 and caveolin-1 as early indicators of acute lung injury induced by paraquat.

Effects of high doses of dexamethasone on hemodynamic and immunohistochemical characteristics of acute paraquat intoxication in rat kidneys.

Paraquat induce pulmonary epithelial-mesenchymal transition through transforming growth factor- β 1-dependent mechanism.

Effects of Neonicotinoids on Promoter-Specific Expression and Activity of Aromatase (CYP19) in Human Adrenocortical Carcinoma (H295R) and Primary Umbilical Vein Endothelial (HUVEC) Cells.

Metabolic changes in rat urine after acute paraquat poisoning and discriminated by support vector machine.

Toxicity of atrazine, glyphosate, and quinclorac in bullfrog tadpoles exposed to concentrations below legal limits.

Skin diseases associated with Agent Orange and other organochlorine exposures.

Comparative toxicity of Paraquat herbicide and some plant extracts in *Lymnaea natalensis* snails.

The effects of resveratrol against trifluralin toxicity in the urinary tract of rats.

A neoflavonoid dalsissoal isolated from heartwood of *Dalbergia sissoo* Roxb. has bone forming effects in mice model for osteoporosis.

Trans-Cinnamaldehyde, An Essential Oil in Cinnamon Powder, Ameliorates Cerebral Ischemia-Induced Brain Injury via Inhibition of Neuroinflammation Through Attenuation of iNOS, COX-2 Expression and NF κ -B Signaling Pathway.

Derivatization Strategy for the Comprehensive Characterization of Endogenous Fatty Aldehydes Using HPLC-Multiple Reaction Monitoring.

Roles of catalase and glutathione peroxidase in the tolerance of a pulmonate gastropod to anoxia and reoxygenation.

Integrated long non-coding RNA analyses identify novel regulators of epithelial-mesenchymal transition in the mouse model of pulmonary fibrosis.

Military service, deployments, and exposures in relation to amyotrophic lateral sclerosis etiology.

Aggravation of brain infarction through an increase in acrolein production and a decrease in glutathione with aging.

Oxidative Stress Triggers Body-Wide Skipping of Multiple Exons of the Spinal Muscular Atrophy Gene.

Superoxide-hydrogen peroxide imbalance interferes with colorectal cancer cells viability, proliferation and oxaliplatin response.

Impact of 3-Amino-1,2,4-Triazole (3-AT)-Derived Increase in Hydrogen Peroxide Levels on Inflammation and Metabolism in Human Differentiated Adipocytes.

Cinnamaldehyde supplementation prevents fasting-induced hyperphagia, lipid accumulation, and inflammation in high-fat diet-fed mice.

Structural and biochemical abnormalities in the absence of acute deficits in mild primary blast-induced head trauma.

A low toxicity synthetic cinnamaldehyde derivative ameliorates renal inflammation in mice by inhibiting NLRP3 inflammasome and its related signaling pathways.

Protective Effect of Astragaloside IV Against Paraquat-Induced Lung Injury in Mice by Suppressing Rho Signaling.

Novel Role of Endogenous Catalase in Macrophage Polarization in Adipose Tissue.

Recent Progress in Analytical Methods for Determination of Urinary 3-Hydroxypropylmercapturic Acid, a Major Metabolite of Acrolein.

[The effect of resveratrol on paraquat-induced acute lung injury in mice and its mechanism].

Effects of Food Components That Activate TRPA1 Receptors on Mucosal Ion Transport in the Mouse Intestine.

[Effect of heme oxygenase-1 transduced by cell penetrating peptide PEP-1 on renal injury in rats with acute paraquat poisoning].

Pharmaceutically active compounds and endocrine disrupting chemicals in water, sediments and mollusks in mangrove ecosystems from Singapore.

Engineering Enriched Microenvironments with Gradients of Platelet Lysate in Hydrogel Fibers.

Differential effects of superoxide and hydrogen peroxide on myogenic signaling, membrane potential, and contractions of mouse renal afferent arterioles.

Assessment of tick antioxidant responses to exogenous oxidative stressors and insight into the role of catalase in the reproductive fitness of the Gulf Coast tick, *Amblyomma maculatum*.

Whirling agitated single drop microextraction technique for the simultaneous analysis of Paraquat and Maneb in tissue samples of treated mice.

PBPK Model for Atrazine and Its Chlorotriazine Metabolites in Rat and Human.

[The expressions of intercellular adhesion molecule-1 in renal tissue of rats with paraquat poisoning and the effect of melatonin].

Effects of TRP channel agonist ingestion on metabolism and autonomic nervous system in a randomized clinical trial of healthy subjects.

Arsenic speciation and susceptibility to oxidative stress in the fanworm *Sabella spallanzanii* (Gmelin) (Annelida, Sabellidae) under naturally acidified conditions: An in situ transplant experiment in a Mediterranean CO₂ vent system.

Risk assessment of triazine herbicides in surface waters and bioaccumulation of Irgarol and M1 by submerged aquatic vegetation in Southeast Florida.

Hormonal and epigenetic regulation during embryogenic tissue habituation in *Cucurbita pepo* L.

Candesartan ameliorates arsenic-induced hypertensive vascular remodeling by regularizing angiotensin II and TGF-beta signaling in rats.

Hypothalamic L-Histidine Decarboxylase Is Up-Regulated During Chronic REM Sleep Deprivation of Rats.

The Role of Mitochondrial Aldehyde Dehydrogenase 2 (ALDH2) in Neuropathology and Neurodegeneration.

N-[(11)CH(3)]Dimethylaminoparthenolide (DMAPT) uptake into orthotopic 9LSF glioblastoma tumors in the rat.

Mortality risk among workers with exposure to dioxins.

Aryl Hydrocarbon Receptor Ligands in Cigarette Smoke Induce Production of Interleukin-22 to Promote Pancreatic Fibrosis in Models of Chronic Pancreatitis.

Expression of Prx1 and Tcf4 is decreased in the diaphragmatic muscle connective tissue of nitrofen-induced congenital diaphragmatic hernia.

Downregulation of Forkhead box F1 gene expression in the pulmonary vasculature of nitrofen-induced congenital diaphragmatic hernia.

Decreased Desmin expression in the developing diaphragm of the nitrofen-induced congenital diaphragmatic hernia rat model.

Collagen analysis of the ascending aortic dilatation associated with bicuspid aortic valve disease compared with tricuspid aortic valve.

Distribution of persistent organic pollutants in serum, omental, and parietal adipose tissue of French women with deep infiltrating endometriosis and circulating versus stored ratio as new marker of exposure.

Protective effects of quercetin against arsenic-induced testicular damage in rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) increases necroinflammation and hepatic stellate cell activation but does not exacerbate experimental liver fibrosis in mice.

Communities of endophytic microorganisms in different developmental stages from a local variety as well as transgenic and conventional isogenic hybrids of maize.

Lipocalin 2 as a new biomarker for fetal lung hypoplasia in congenital diaphragmatic hernia.

2,3,7,8-Tetrachlorodibenzo-p-dioxin Mediated Cleft palate by Mouse Embryonic Palate Mesenchymal Cells.

Organochlorine contaminants in the muscle, liver and brain of seabirds (Larus) from the coastal area of the Southern Baltic.

Electrophoretic stacking for sensitive determination of antibiotic ceftazidime in human blood and microdialysates from diabetic foot.

Co-delivery of doxorubicin and recombinant plasmid pHSP70-Plk1-shRNA by bacterial magnetosomes for osteosarcoma therapy.

Reduced stress granule formation and cell death in fibroblasts with the A382T mutation of TARDBP gene: evidence for loss of TDP-43 nuclear function.

Carbamylated Low-Density Lipoproteins Induce a Prothrombotic State Via LOX-1: Impact on Arterial Thrombus Formation In Vivo.

Mammary Gland Evaluation in Juvenile Toxicity Studies: Temporal Developmental Patterns in the Male and Female Harlan Sprague-Dawley Rat.

Atorvastatin attenuates p-cresyl sulfate-induced atherogenesis and plaque instability in ApoE knockout mice.

The effects of fat loss after bariatric surgery on inflammation, serum hepcidin, and iron absorption: a prospective 6-mo iron stable isotope study.

Participation of protein kinases in cytotoxic and proapoptotic effects of ethylene glycol ethers and their metabolites in SH-SY5Y cells.

Decreased expression of hepatocyte growth factor in the nitrofen model of congenital diaphragmatic hernia.

Arsenic and subclinical vascular damage in a sample of Italian young adults: a cross-sectional analysis.

Potential interactions among disease, pesticides, water quality and adjacent land cover in amphibian habitats in the United States.

Hypermetabolism in B-lymphocytes from malignant hyperthermia susceptible individuals.

Environmental Exposures and Parkinson's Disease.

[Global DNA methylation changes during palatal formation in fetal mice induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin].

p-Cresyl sulfate promotes the formation of atherosclerotic lesions and induces plaque instability by targeting vascular smooth muscle cells.

Endometrial expression and in vitro modulation of the iron transporter divalent metal transporter-1: implications for endometriosis.

Balneotherapy in rheumatoid arthritis-a systematic review.

Oxygen consumption deficit in Huntington disease mouse brain under metabolic stress.

Dioxin-like pollutants increase hepatic flavin containing monooxygenase (FMO3) expression to promote synthesis of the pro-atherogenic nutrient biomarker trimethylamine N-oxide from dietary precursors.

Inducing autotetraploids in cassava using oryzalin and colchicine and their in vitro morphophysiological effects.

Design, biological evaluation and 3D QSAR studies of novel dioxin-containing pyrazoline derivatives with thiourea skeleton as selective HER-2 inhibitors.

Inflammation, glucose, and vascular cell damage: the role of the pentose phosphate pathway.

In vitro effect of sodium arsenite on *Echinococcus granulosus* protoscoleces.

Enhanced cyclooxygenase-2 expression levels and metalloproteinase 2 and 9 activation by Hexachlorobenzene in human endometrial stromal cells.

Associations among chronic kidney disease, high total p-cresylsulfate and left ventricular systolic dysfunction.

Decreased expression of monocarboxylate transporter 1 and 4 in the branching airway epithelium of nitrofen-induced congenital diaphragmatic hernia.

Aryl hydrocarbon receptor knockout rats are insensitive to the pathological effects of repeated oral exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Digoxin reduces atherosclerosis in apolipoprotein E-deficient mice.

Immunomodulation By Subchronic Low Dose 2,3,7,8-Tetrachlorodibenzo-p-Dioxin in Experimental Autoimmune Encephalomyelitis in the Absence of Pertussis Toxin.

In Utero and Lactational TCDD Exposure Increases Susceptibility to Lower Urinary Tract Dysfunction in Adulthood.

Pur-alpha regulates cytoplasmic stress granule dynamics and ameliorates FUS toxicity.

Untargeted plasma and tissue metabolomics in rats with chronic kidney disease given AST-120.

Comparison of Different Matrices as Potential Quality Control Samples for Neurochemical Dementia Diagnostics.

Evaluation of Safety of Iron-Fortified Soybean Sprouts, a Potential Component of Functional Food, in Rat.

Lactational exposure of mice to low levels of non-dioxin-like polychlorinated biphenyls increases susceptibility to neuronal stress at a mature age.

Effects of in Utero Exposure to Arsenic during the Second Half of Gestation on Reproductive End Points and Metabolic Parameters in Female CD-1 Mice.

Oral nanoparticulate curcumin combating arsenic-induced oxidative damage in kidney and brain of rats.

The role of peroxiredoxin 4 in inflammatory response and aging.

The Role of Activin Receptor-Like Kinase 1 Signaling in the Pulmonary Vasculature of Experimental Diaphragmatic Hernia.

Mesenchymal expression of the FRAS1/FREM2 gene unit is decreased in the developing fetal diaphragm of nitrofen-induced congenital diaphragmatic hernia.

p-Cresyl sulfate is associated with carotid arteriosclerosis in hemodialysis patients and promotes atherogenesis in apoE^{-/-} mice.

Gene Expression of FRAS1-Related Extracellular Matrix 1 Is Decreased in Nitrofen-Induced Congenital Diaphragmatic Hernia.

Activation of ALDH2 with Low Concentration of Ethanol Attenuates Myocardial Ischemia/Reperfusion Injury in Diabetes Rat Model.

Melatonergic System in Parkinson's Disease: From Neuroprotection to the Management of Motor and Nonmotor Symptoms.

An Overview on the Role of α -Synuclein in Experimental Models of Parkinson's Disease from Pathogenesis to Therapeutics.

[Application of Metabolomics to Multiple Chemical Sensitivity Research].

Functional characterization of the RYR1 mutation p.Arg4737Trp associated with susceptibility to malignant hyperthermia.

The role of aryl hydrocarbon receptor (AhR) in the pathology of pleomorphic adenoma in parotid gland.

Molecular imaging of aurora kinase A (AURKA) expression: Synthesis and preclinical evaluation of radiolabeled alisertib (MLN8237).

Protective Effects of Combined Selenium and Punica granatum Treatment on Some Inflammatory and Oxidative Stress Markers in Arsenic-Induced Hepatotoxicity in Rats.

Specific Caleosin/Peroxygenase and Lipoxygenase Activities Are Tissue-Differentially Expressed in Date Palm (*Phoenix dactylifera* L.) Seedlings and Are Further Induced Following Exposure to the Toxin 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Riluzole But Not Melatonin Ameliorates Acute Motor Neuron Degeneration and Moderately Inhibits SOD1-Mediated Excitotoxicity Induced Disrupted Mitochondrial Ca(2+) Signaling in Amyotrophic Lateral Sclerosis.

Concentration and congener pattern of polychlorinated biphenyls in blubber and liver of Hubbs' beaked whale (*Mesoplodon carlhubbsi*), using a sulfoxide and an Ag-ION solid phase extraction cartridge as a simplified cleanup technique for biological samples.

Haptotactic Plasma Polymerized Surfaces for Rapid Tissue Regeneration and Wound Healing.

Effects of Liposomes Charge on Extending Sciatic Nerve Blockade of N-ethyl Bromide of Lidocaine in Rats.

Influence of LED light spectra on in vitro somatic embryogenesis and LC-MS analysis of chlorogenic acid and rutin in *Peucedanum japonicum* Thunb.: a medicinal herb.

Carbon-14 radiolabeling and tissue distribution evaluation of MMV390048.

Congener-specific levels and patterns of polychlorinated biphenyls in edible fish tissue from the central Red Sea coast of Saudi Arabia.

Does 2,4-dichlorophenoxyacetic acid (2,4-D) induce genotoxic effects in tissue cultured *Allium* roots?

Melatonin Application to *Pisum sativum* L. Seeds Positively Influences the Function of the Photosynthetic Apparatus in Growing Seedlings during Paraquat-Induced Oxidative Stress.

Protective Effects of Essential Oils as Natural Antioxidants against Hepatotoxicity Induced by Cyclophosphamide in Mice.

Assessment of oxidative stress and activities of antioxidant enzymes depicts the negative systemic effect of iron-containing fertilizers and plant phenolic compounds in the desert locust.

Soil organic matter content effects on dermal pesticide bioconcentration in American toads (*Bufo americanus*).

Study of the inhibition effect of thiazone on muscle optical clearing.

Mechanisms of Action Point Towards Combined PBDE/NDL-PCB Risk Assessment.

Histological and Transcriptomic Changes in Male Zebrafish Testes Due to Early Life Exposure to Low Level 2,3,7,8-Tetrachlorodibenzo-p-Dioxin.

Formyl peptide receptor modulators: a patent review and potential applications for inflammatory diseases (2012-2015).

Arsenic and arsenic species in shellfish and finfish from the western Arabian Gulf and consumer health risk assessment.

Odorants specifically modulate chemotaxis and tissue retention of CD4+ T cells via cyclic adenosine monophosphate induction.

Erratum to: Does 2,4-dichlorophenoxyacetic acid (2,4-D) induce genotoxic effects in tissue cultured *Allium* roots?

A simple standard technique for labyrinthectomy in the rat: A methodical communication with a detailed description of the surgical process.

Specific carotenoid pigments in the diet and a bit of oxidative stress in the recipe for producing red carotenoid-based signals.

Toxicogenomic applications of Chinese rare minnow (*Gobiocypris rarus*) in aquatic toxicology.

Microfluidic-based non-enzymatic glycation enhances cross-linking of human scleral tissue compared to conventional soaking.

Aryl hydrocarbon receptor-ligand axis mediates pulmonary fibroblast migration and differentiation through increased arachidonic acid metabolism.

Tyrosine Detoxification Is an Essential Trait in the Life History of Blood-Feeding Arthropods.

[Effect of chronic arsenic exposure on mouse brain tissue and serum metabolomics].

Perinatal Exposure to Glufosinate Ammonium Herbicide Impairs Neurogenesis and Neuroblast Migration through Cytoskeleton Destabilization.

The beneficial effects of Montelukast against 2,3,7,8-tetrachlorodibenzo- p -dioxin toxicity in female reproductive system in rats.

Identification of aryl hydrocarbon receptor signaling pathways altered in TCDD-treated red seabream embryos by transcriptome analysis.

Optical coherence tomography angiography offers comprehensive evaluation of skin optical clearing in vivo by quantifying optical properties and blood flow imaging simultaneously.

Metabolic Pathway Involved in 6-Chloro-2-Benzoxazolinone Degradation by *Pigmentiphaga* sp. Strain DL-8 and Identification of the Novel Metal-Dependent Hydrolase CbaA.

Multi-tissue metabolic responses of goldfish (*Carassius auratus*) exposed to glyphosate-based herbicide.

Toxic effects of glyphosate-based herbicide, Excel Mera 71 on gill, liver, and kidney of *Heteropneustes fossilis* under laboratory and field conditions.

Oleuropein ameliorates arsenic induced oxidative stress in mice.

Effect of retinyl acetate on transglutaminase 2 activity in carcinogen treated rat liver.

Mitigation of sensory and motor deficits by acrolein scavenger phenelzine in a rat model of spinal cord contusive injury.

Multivariate approach to gill pathology in European sea bass after experimental exposure to cadmium and terbuthylazine.

Conformation of ryanodine receptor-2 gates store-operated calcium entry in rat pulmonary arterial myocytes.

Transgenic Overexpression of Aryl Hydrocarbon Receptor Repressor (AhRR) and AhR-Mediated Induction of CYP1A1, Cytokines, and Acute Toxicity.

Biochemical, Transcriptional, and Bioinformatic Analysis of Lipid Droplets from Seeds of Date Palm (*Phoenix dactylifera* L.) and Their Use as Potent Sequestration Agents against the Toxic Pollutant, 2,3,7,8-Tetrachlorinated Dibenzo-p-Dioxin.

p-cresol but not p-cresyl sulfate stimulate MCP-1 production via NF- κ B p65 in human vascular smooth muscle cells.

Involvement of endogenous antioxidant systems in the protective activity of pituitary adenylate cyclase-activating polypeptide against hydrogen peroxide-induced oxidative damages in cultured rat astrocytes.

The effects of CYP1A inhibition on alkyl-phenanthrene metabolism and embryotoxicity in marine medaka (*Oryzias melastigma*).

A Microfabricated Platform for Generating Physiologically-Relevant Hepatocyte Zonation.

Defective excitation-contraction coupling is partially responsible for impaired contractility in hindlimb muscles of *Stac3* knockout mice.

Synthesis and Preclinical Evaluation of ¹¹C-UCB-J as a PET Tracer for Imaging the Synaptic Vesicle Glycoprotein 2A in the Brain.

Effect of Acetyl-L-Carnitine on Antioxidant Status, Lipid Peroxidation, and Oxidative Damage of Arsenic in Rat.

Aryl hydrocarbon receptor deletion in cerebellar granule neuron precursors impairs neurogenesis.

Aortic smooth muscle cell alterations in mice systemically exposed to arsenic.

Anti-inflammatory Montelukast prevents toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin: Oxidative stress, histological alterations in liver, and serum cytokine levels.

Use of a combined effect model approach for discriminating between ABCB1- and ABCC1-type efflux activities in native bivalve gill tissue.

Treatment of Resistant Cyclophosphamide Induced Haemorrhagic Cystitis: Review of Literature and Three Case Reports.

Polychlorinated biphenyl 126 exposure in L6 myotubes alters glucose metabolism: a pilot study.

Prenatal Exposure to Arsenic Impairs Behavioral Flexibility and Cortical Structure in Mice.

No evidence for oxidative stress in the cerebellar tissues or cells of juvenile male mice exposed via lactation to the 6 non-dioxin-like PCBs at levels below the regulatory safe limits for humans.

[COMPARATIVE STUDY OF Ca^{2+} EFFECT ON CALCIUM-DEPENDENT PROCESSES IN FROG CARDIAC MUSCLE AND IN MITOCHONDRIA OF RAT CARDIOMYOCYTES].

Functional optical coherence tomography of rat olfactory bulb with periodic odor stimulation.

Attenuation of hepatotoxicity and oxidative stress in diabetes STZ-induced type 1 by biotin in Swiss albino mice.

European sea bass gill pathology after exposure to cadmium and terbuthylazine: expert versus fractal analysis.

Arsenic and smokeless tobacco induce genotoxicity, sperm abnormality as well as oxidative stress in mice in vivo.

Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) increases human hepatic stellate cell activation.

Non-dioxin-like Polychlorinated Biphenyls (PCBs) and Chlordecone Release from Adipose Tissue to Blood in Response to Body Fat Mobilization in Ewe (*Ovis aries*).

Chemically Contaminated Eel Fed to Pregnant and Lactating Mouse Dams Causes Hyperactivity in Their Offspring.

Combined effects of n-TiO₂ and 2,3,7,8-TCDD in *Mytilus galloprovincialis* digestive gland: A transcriptomic and immunohistochemical study.

Mechanisms of thaxtomin A-induced root toxicity revealed by a thaxtomin A sensitive *Arabidopsis* mutant (*ucu2-2/gi-2*).

Multistress effects on goldfish (*Carassius auratus*) behavior and metabolism.

Kolaviron was protective against sodium azide (NaN₃) induced oxidative stress in the prefrontal cortex.

Astaxanthin Inhibits Expression of Retinal Oxidative Stress and Inflammatory Mediators in Streptozotocin-Induced Diabetic Rats.

Divergent Effects of Dioxin- or Non-Dioxin-Like Polychlorinated Biphenyls on the Apoptosis of Primary Cell Culture from the Mouse Pituitary Gland.

Arsenic induced hematological and biochemical responses in nutritionally important catfish *Clarias batrachus* (L.).

Evaluation of functioning of mitochondrial electron transport chain with NADH and FAD autofluorescence.

Concentration of polychlorinated biphenyl (PCB) congeners in the muscle of *Clarias gariepinus* and sediment from inland rivers of southwestern Nigeria and estimated potential human health consequences.

Effects of Antioxidant N-acetylcysteine Against Paraquat-Induced Oxidative Stress in Vital Tissues of Mice.

Arsenite accumulation in the mouse eye.

Plantlet Regeneration of Tartary Buckwheat (*Fagopyrum tataricum* Gaertn.) in Vitro Tissue Cultures.

Antioxidant Potential of *Spirulina platensis* Mitigates Oxidative Stress and Reprotoxicity Induced by Sodium Arsenite in Male Rats.

Severe Endobronchial Inflammation Induced by Aspiration of a Ferrous Sulfate Tablet.

The onset of lipid peroxidation in rheumatoid arthritis: consequences and monitoring.

Promoter isolation and characterization of GhAO-like1, a *Gossypium hirsutum* gene similar to multicopper oxidases that is highly expressed in reproductive organs.

Somatic Embryogenesis in Horse Chestnut (*Aesculus hippocastanum* L.).

Somatic Embryogenesis in Olive (*Olea europaea* L. subsp. *europaea* var. *sativa* and var. *sylvestris*).

Phenylephrine preconditioning in embryonic heart H9c2 cells is mediated by up-regulation of SUR2B/Kir6.2: A first evidence for functional role of SUR2B in sarcolemmal KATP channels and cardioprotection.

Xyloglucan Deficiency Disrupts Microtubule Stability and Cellulose Biosynthesis in Arabidopsis, Altering Cell Growth and Morphogenesis.

Ameliorative effect of quercetin against arsenic-induced sperm DNA damage and daily sperm production in adult male rats.

Thioredoxin-2 overexpression fails to rescue chronic high calorie diet induced hippocampal dysfunction.

Delivery of a protein transduction domain-mediated Prdx6 protein ameliorates oxidative stress-induced injury in human and mouse neuronal cells.

Methylation of inorganic arsenic by murine fetal tissue explants.

Maternally transferred dioxin-like compounds can affect the reproductive success of European eel.

The impact of combined administration of paraquat and maneb on motor and non-motor functions in the rat.

Analysis of Moms Across America report suggesting bioaccumulation of glyphosate in U.S. mother's breast milk: Implausibility based on inconsistency with available body of glyphosate animal toxicokinetic, human biomonitoring, and physico-chemical data.

Involvement of epithelial-to-mesenchymal transition and associated transforming growth factor- β /Smad signaling in paraquat-induced pulmonary fibrosis.

trans-Cinnamaldehyde stimulates mitochondrial biogenesis through PGC-1 α and PPAR γ leading to enhanced GLUT4 expression.

The effects of gestational and chronic atrazine exposure on motor behaviors and striatal dopamine in male Sprague-Dawley rats.

Discovery of a novel neuroprotectant, BHDPC, that protects against MPP $^{+}$ /MPTP-induced neuronal death in multiple experimental models.

Artificial sweetener neohesperidin dihydrochalcone showed antioxidative, anti-inflammatory and anti-apoptosis effects against paraquat-induced liver injury in mice.

Histopathological and ultramicroscopical changes in gill, liver and kidney of *Anabas testudineus* (Bloch) after chronic intoxication of almix (metsulfuron methyl 10.1%+chlorimuron ethyl 10.1%) herbicide.

Bioaccumulation and neurotoxicity of dithiopyridine herbicide in the brain of freshwater fish, *Cyprinus carpio*.

[A case of rhabdomyolysis, acute renal failure induced by paraquat poisoning].

[Effect of total flavonoids from *Astragalus complanatus* on paraquat poisoning-induced pulmonary fibrosis in rats and its mechanisms].

Blowfly Larval Tissues as a Secondary Detector for Determining Paraquat-Related Death in Rabbit Carcass.

Protective effects of caffeic acid phenethyl ester on dose-dependent intoxication of rats with paraquat.

Cigarette side-stream smoke lung and bladder carcinogenesis: inducing mutagenic acrolein-DNA adducts, inhibiting DNA repair and enhancing anchorage-independent-growth cell transformation.

Hyperbaric oxygen treatment ameliorates lung injury in paraquat intoxicated rats.

Molecular characterization of heat-shock protein 90 gene and its expression in *Gobiocypris rarus* juveniles exposed to pentachlorophenol.

Toxicity of diuron in human cancer cells.

Diquat causes caspase-independent cell death in SH-SY5Y cells by production of ROS independently of mitochondria.

Cardiotoxic Electrophysiological Effects of the Herbicide Roundup(®) in Rat and Rabbit Ventricular Myocardium In Vitro.

[Inhibitory effects of curcumin on inflammatory cytokines in rats with paraquat poisoning].

[Hemoperfusion alleviated paraquat-induced kidney inflammation injury of rabbit].

[The effect of signal transduction pathway of triggering receptor-1 expressed on myeloid cells in acute lung injury induced by paraquat in rats].

RETRACTED: Glyphosate herbicide induces genotoxic effect and physiological disturbances in *Bulinus truncatus* snails.

NLRP3 inflammasome activation by mitochondrial reactive oxygen species plays a key role in long-term cognitive impairment induced by paraquat exposure.

A collection of cytochrome P450 monooxygenase genes involved in modification and detoxification of herbicide atrazine in rice (*Oryza sativa*) plants.

Energy reserves mobilization in the yellow eel as herbicide exposure effect.

Influence of pesticide exposure on carbonic anhydrase II from sheep stomach.

Transcriptome profile analysis reflects rat liver and kidney damage following chronic ultra-low dose Roundup exposure.

Toxicity of environmental Gesagard to goldfish may be connected with induction of low intensity oxidative stress in concentration- and tissue-related manners.

Developmental toxicity assessment of the new turf herbicide, methiozolin ([5-(2,6-difluorobenzyl)oxymethyl-5-methyl-3,3(3-methylthiophen-2-yl)-1,2-isoxazoline]), in rabbits.

Fluorescence labeling of carbonylated lipids and proteins in cells using coumarin-hydrazide.

Proteomics analysis of *Xenopus laevis* gonad tissue following chronic exposure to atrazine.

The Effects of Simazine, a Chlorotriazine Herbicide, on the Expression of Genes in Developing Male *Xenopus laevis*.

Cinnamaldehyde in a Novel Intravenous Submicrometer Emulsion: Pharmacokinetics, Tissue Distribution, Antitumor Efficacy, and Toxicity.

Arsenic and Its Methylated Metabolites Inhibit the Differentiation of Neural Plate Border Specifier Cells.

A Novel Phenolic Compound, Chloroxynil, Improves Agrobacterium-Mediated Transient Transformation in *Lotus japonicus*.

Analyzing *Arabidopsis thaliana* root proteome provides insights into the molecular bases of enantioselective imazethapyr toxicity.

Developmental origins of neurotransmitter and transcriptome alterations in adult female zebrafish exposed to atrazine during embryogenesis.

Evaluation of early changes induced by diuron in the rat urinary bladder using different processing methods for scanning electron microscopy.

Proteomic and histopathological response in the gills of *Poecilia reticulata* exposed to glyphosate-based herbicide.

Connective tissue growth factor stimulates the proliferation, migration and differentiation of lung fibroblasts during paraquat-induced pulmonary fibrosis.

Effects of subchronic exposure to glyphosate in juvenile oysters (*Crassostrea gigas*): From molecular to individual levels.

Phenoxy herbicides, soft-tissue sarcoma and non-Hodgkin lymphoma: a systematic review of evidence from cohort and case-control studies.

Soft tissue sarcoma, non-Hodgkin's lymphoma and chronic lymphocytic leukaemia in workers exposed to phenoxy herbicides: extended follow-up of a UK cohort.

Adiponectin attenuates lung fibroblasts activation and pulmonary fibrosis induced by paraquat.

[The study of kidney injury in rats with acute paraquat poisoning].

[The expressions of P38 mitogen-activated protein kinases and JNK mitogen-activated protein kinases in the renal tissue of rats with acute paraquat poisoning and the therapeutical effects of melatonin].

[The effect of paraquat on voltage-dependent anion channel and caspase-3, 8, 9 in the mitochondria of rat lung].

[Effects of shRNA interference the expression of connective tissue growth factor mediated by lentivirus in lung fibrosis of paraquat poisoning rats].

[Effect of hydrogen-saline on lung injury and heme oxygenase-1 expression in the lung tissue of acute paraquat-intoxicated mice].

Multiparametric characterisation of neuronal network activity for in vitro agrochemical neurotoxicity assessment.

Integrated assessment of biomarker response in carp (*Cyprinus carpio*) and silver catfish (*Rhamdia quelen*) exposed to clomazone.

Losartan attenuates paraquat-induced pulmonary fibrosis in rats.

$\hat{\pm}$, \hat{r}^2 -Unsaturated aldehyde pollutant acrolein suppresses cardiomyocyte contractile function: Role of TRPV1 and oxidative stress.

Histopathological effects of atrazine on gills of Caspian kutum *Rutilus frisii* kutum fingerlings.

[Expression of heme oxygenase-1 in lung tissue of paraquat poisoned mice and its significance].

[Inhibition of pulmonary nuclear factor- κ B and tumor necrosis factor- α expression by diallyl sulfide in rats with paraquat poisoning].

[Effect of rhubarb as the main composition of sequential treatment in patients with acute paraquat poisoning: a prospective clinical research].

Subcellular energy balance of *Odontesthes bonariensis* exposed to a glyphosate-based herbicide.

Increased toll-like receptor 9 expression is associated with the severity of paraquat-induced lung injury in mice.

Commercial formulation containing 2,4-D affects biochemical parameters and morphological indices of silver catfish exposed for 90 days.

Physiological and oxidative stress biomarkers in the freshwater monosex Nile tilapia, *Oreochromis niloticus* L., exposed to pendimethalin-based herbicide.

Glyphosate, pathways to modern diseases III: Manganese, neurological diseases, and associated pathologies.

Paraquat induces epithelial-mesenchymal transition-like cellular response resulting in fibrogenesis and the prevention of apoptosis in human pulmonary epithelial cells.

ROS-triggered signaling pathways involved in the cytotoxicity and tumor promotion effects of pentachlorophenol and tetrachlorohydroquinone.

Evaluation of carcinogenic potential of the herbicide glyphosate, drawing on tumor incidence data from fourteen chronic/carcinogenicity rodent studies.

Assessment of pesticide residues and gene expression in common carp exposed to atrazine and chlorpyrifos: Health risk assessments.

Superparamagnetic iron oxide nanoparticles exacerbate the risks of reactive oxygen species-mediated external stresses.

Protective effects of caffeic acid phenethyl ester on the dose-dependent acute nephrotoxicity with paraquat in a rat model.

Influenza A infection attenuates relaxation responses of mouse tracheal smooth muscle evoked by acrolein.

Eugenol-inhibited root growth in *Avena fatua* involves ROS-mediated oxidative damage.

Molecular mechanisms of acrolein toxicity: relevance to human disease.

(¹H) NMR based metabolomics approach to study the toxic effects of herbicide butachlor on goldfish (*Carassius auratus*).

Effects of atrazine and chlorpyrifos on DNA methylation in the brain and gonad of the common carp.

Histopathological alterations in the kidney of Caspian kutum, *Rutilus frisii kutum*, larvae and fingerlings exposed to sublethal concentration of atrazine.

NLRP3 inflammasome activation is essential for paraquat-induced acute lung injury.

A cell type-specific view on the translation of mRNAs from ROS-responsive genes upon paraquat treatment of *Arabidopsis thaliana* leaves.

Hepatoprotective effect of *Matricaria chamomilla* L in paraquat induced rat liver injury.

Artesunate Attenuates Lung Injury in Paraquat-Intoxicated Rats via Downregulation of Inflammatory Cytokines.

Effects of Atrazine on the Development of Neural System of Zebrafish, *Danio rerio*.

[Observation on the best dose of methylprednisolone improving lung injury in swine with paraquat intoxication].

Evaluation of a multiple sclerosis cluster among nurses in an inpatient oncology ward.

DNaseI protects against Paraquat-induced acute lung injury and pulmonary fibrosis mediated by mitochondrial DNA.

Effects of rapamycin against paraquat-induced pulmonary fibrosis in mice.

The mechanism of rapamycin in the intervention of paraquat-induced acute lung injury in rats.

Effects of glyphosate on juvenile rainbow trout (*Oncorhynchus mykiss*): transcriptional and enzymatic analyses of antioxidant defence system, histopathological liver damage and swimming performance.

Time and dose effects of cigarette smoke and acrolein on protein carbonyl formation in HaCaT keratinocytes.

Oxidative stress and biochemical responses in the tissues of African catfish *Clarias gariepinus* juvenile following exposure to primextra herbicide.

Public health assessment of dioxin-contaminated fish at former US airbase, Bien Hoa, Vietnam.

Mifepristone-inducible recombinant adenovirus attenuates paraquat-induced lung injury in rats.

Oral Administration of 4-Hydroxy-3-Methoxycinnamaldehyde Attenuates Atopic Dermatitis by Inhibiting T Cell and Keratinocyte Activation.

[Expression of the pulmonary surfactant in rat with paraquat-induced acute lung injury].

Topically applied metal chelator reduces thermal injury progression in a rat model of brass comb burn.

Increase in acrolein-conjugated immunoglobulins in saliva from patients with primary Sjögren's syndrome.

Superoxide anion radical (O_2^-) degrades methylmercury to inorganic mercury in human astrocytoma cell line (CCF-STTG1).

Lung inflammation biomarkers and lung function in children chronically exposed to arsenic.

A human surrogate model of itch utilizing the TRPA1 agonist trans-cinnamaldehyde.

Absence of sodA Increases the Levels of Oxidation of Key Metabolic Determinants of *Borrelia burgdorferi*.

(99m)Tc-amitrole as a novel selective imaging probe for solid tumor: In silico and preclinical pharmacological study.

Long-lasting facilitation of respiratory rhythm by treatment with TRPA1 agonist, cinnamaldehyde.

Superoxide enhances Ca²⁺ entry through L-type channels in the renal afferent arteriole.

Role of aldehyde dehydrogenase in hypoxic vasodilator effects of nitrite in rats and humans.

Mechanical overloading causes mitochondrial superoxide and SOD2 imbalance in chondrocytes resulting in cartilage degeneration.

Rapamycin reverses paraquat-induced acute lung injury in a rat model through inhibition of NF- κ B activation.

[Therapeutic effects of gastric lavage with fuller earth combined with Qingyill catharsis in treatment of oral paraquat poisoning in rabbits].

[Preventive effects of 5-hydroxy-1-methylhydantoin on paraquat-induced nephrotoxicity in rat].

Coniferyl aldehyde reduces radiation damage through increased protein stability of heat shock transcriptional factor 1 by phosphorylation.

Antinociceptive effect of methanol extract of leaves of *Persicaria hydropiper* in mice.

[The catalase inhibitor aminotriazole alleviates acute alcoholic liver injury].

Cinnamaldehyde Contributes to Insulin Sensitivity by Activating PPAR α , PPAR δ , and RXR.

Oxidative Stress during the Progression of A β -Amyloid Pathology in the Neocortex of the Tg2576 Mouse Model of Alzheimer's Disease.

Natural antioxidant betanin protects rats from paraquat-induced acute lung injury interstitial pneumonia.

The antisenescence effect of trans-cinnamaldehyde on adipose-derived stem cells.

Dynamic differences in oxidative stress and the regulation of metabolism with age in visceral versus subcutaneous adipose.

Reduction of the Pentavalent Arsenical Dimethylarsinic Acid and the GSTO1 Substrate S-(4-Nitrophenacyl)glutathione by Rat Liver Cytosol: Analyzing the Role of GSTO1 in Arsenic Reduction.

Optimization of microwave-assisted extraction for six inorganic and organic arsenic species in chicken tissues using response surface methodology.

Differential tissue accumulation of 2,3,7,8-Tetrachlorinated dibenzo-p-dioxin in *Arabidopsis thaliana* affects plant chronology, lipid metabolism and seed yield.

[Changes of the Expression of Brain Derived Neurotrophic Factors in Rats Trachea Induced by Acrolein Exposure].

Oxidative and reductive metabolism of lipid-peroxidation derived carbonyls.

Induction of somatic embryogenesis in explants of shoot cultures established from adult *Eucalyptus globulus* and *E. saligna*—*E. maidenii* trees.

Acrolein impairs the cholesterol transport functions of high density lipoproteins.

The distribution in tissues and urine of arsenic metabolites after subchronic exposure to dimethylarsinic acid (DMAV) in rats.

Anti-inflammatory activity of cinnamon (*C. zeylanicum* and *C. cassia*) extracts - identification of E-cinnamaldehyde and o-methoxy cinnamaldehyde as the most potent bioactive compounds.

Photoluminescence and labelling for microcrack bone of N-salicylidene-3-amino-1,2,4-triazole.

Expression of cytochrome P450 CYP81A6 in rice: tissue specificity, protein subcellular localization, and response to herbicide application.

A micro-QuEChERS method coupled to GC-MS for the quantification of pesticides in specific maternal and fetal tissues.

Comparison on the fatty acid profiles of liver, subcutaneous fat and muscle from feedlot steers finished on diets supplemented with or without cinnamaldehyde or monensin.

Simultaneous determination of cinnamaldehyde and its metabolite in rat tissues by gas chromatography-mass spectrometry.

Anti-obesity and anti-hyperglycemic effects of cinnamaldehyde via altered ghrelin secretion and functional impact on food intake and gastric emptying.

Gingiva Equivalent Secretes Negligible Amounts of Key Chemokines Involved in Langerhans Cell Migration Compared to Skin Equivalent.

Effective attenuation of atrazine-induced histopathological changes in testicular tissue by antioxidant N-phenyl-4-aryl-polyhydroquinolines.

Pesticide concentrations in frog tissue and wetland habitats in a landscape dominated by agriculture.

A visible light induced photoelectrochemical aptasensor constructed by aligned ZnO@CdTe core shell nanocable arrays/carboxylated g-C₃N₄ for the detection of Proprotein convertase subtilisin/kexin type 6 gene.

Enhanced protective activity of nano formulated andrographolide against arsenic induced liver damage.

Ancestral TCDD exposure promotes epigenetic transgenerational inheritance of imprinted gene Igf2: Methylation status and DNMTs.

Assessment of global and gene-specific DNA methylation in rat liver and kidney in response to non-genotoxic carcinogen exposure.

Polyreactive antibodies in the circulation of patients with systemic lupus erythematosus.

Paraoxonase 1 and cytochrome P450 polymorphisms in susceptibility to acute organophosphorus poisoning in Egyptians.

Short-Term Changes in Body Composition and Response to Micronutrient Supplementation After Laparoscopic Sleeve Gastrectomy.

Para-cresyl sulfate acutely impairs vascular reactivity and induces vascular remodeling.

Disruption of Ah Receptor Signaling during Mouse Development Leads to Abnormal Cardiac Structure and Function in the Adult.

Interactive Effects of Indigestible Carbohydrates, Protein Type, and Protein Level on Biomarkers of Large Intestine Health in Rats.

In utero/lactational and adult exposures to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) show differential effects on craniofacial development and growth in rats.

Subcellular Localization of Matrin 3 Containing Mutations Associated with ALS and Distal Myopathy.

Mechanical properties of normal versus cancerous breast cells.

Correlation between dioxin and endometriosis: an epigenetic route to unravel the pathogenesis of the disease.

Monitoring Changes in the Redox State of Myoglobin in Cardiomyocytes by Raman Spectroscopy Enables the Protective Effect of NO Donors to Be Evaluated.

A constitutive active MAPK/ERK pathway due to BRAFV600E positively regulates AHR pathway in PTC.

Several Ryanodine Receptor Type 1 Gene Mutations of p.Arg2508 Are Potential Sources of Malignant Hyperthermia.

The adverse outcome pathway for rodent liver tumor promotion by sustained activation of the aryl hydrocarbon receptor.

Association between levels of persistent organic pollutants in adipose tissue and cryptorchidism in early childhood: a case-control study.

Ablation of XP-V gene causes adipose tissue senescence and metabolic abnormalities.

Persistent reduced oxygen requirement following blood transfusion during recovery from hemorrhagic shock.

Malignant hyperthermia: a review.

Activation of the aryl hydrocarbon receptor during development enhances the pulmonary CD4⁺ T-cell response to viral infection.

Environmental pesticides increase the risk of developing hypertrophic pyloric stenosis.

Arsenic causes aortic dysfunction and systemic hypertension in rats: Augmentation of angiotensin II signaling.

Anti-obesity and metabolic efficacy of the β^3 -adrenergic agonist, CL316243, in mice at thermoneutrality compared to 22°C.

The Transcriptional Effects of PCB118 and PCB153 on the Liver, Adipose Tissue, Muscle and Colon of Mice: Highlighting of Glut4 and Lipin1 as Main Target Genes for PCB Induced Metabolic Disorders.

Arsenic-induced dyslipidemia in male albino rats: comparison between trivalent and pentavalent inorganic arsenic in drinking water.

Disruptive environmental chemicals and cellular mechanisms that confer resistance to cell death.

Ferrous sulfate, but not iron polymaltose complex, aggravates local and systemic inflammation and oxidative stress in dextran sodium sulfate-induced colitis in rats.

Increased pulmonary vascular expression of receptor for advanced glycation end products (RAGE) in experimental congenital diaphragmatic hernia.

The drosophila T-box transcription factor midline functions within Insulin/Akt and c-Jun-N terminal kinase stress-reactive signaling pathways to regulate interommatial bristle formation and cell survival.

Increased levels of dioxin-like substances in adipose tissue in patients with deep infiltrating endometriosis.

Time- and spectrally resolved characteristics of flavin fluorescence in U87MG cancer cells in culture.

Metabolic outcome of female mice exposed to a mixture of low-dose pollutants in a diet-induced obesity model.

Mitochondrial vulnerability and increased susceptibility to nutrient-induced cytotoxicity in fibroblasts from Leigh syndrome French Canadian patients.

Non-dioxin-like polychlorinated biphenyls (PCB 101, PCB 153 and PCB 180) induce chondrocyte cell death through multiple pathways.

Prevention of pulmonary hypoplasia and pulmonary vascular remodeling by antenatal simvastatin treatment in nitrofen-induced congenital diaphragmatic hernia.

Development of a computational high-throughput tool for the quantitative examination of dose-dependent histological features.

Chronic cardiovascular disease-associated gene network analysis in human umbilical vein endothelial cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Gestational exposure to the AhR agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin induces BRCA-1 promoter hypermethylation and reduces BRCA-1 expression in mammary tissue of rat offspring: preventive effects of resveratrol.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced hypertension: the beneficial effects of melatonin.

Mitochondrial superoxide in osteocytes perturbs canalicular networks in the setting of age-related osteoporosis.

Controlled-release mitochondrial protonophore reverses diabetes and steatohepatitis in rats.

The cellular and molecular progression of mitochondrial dysfunction induced by 2,4-dinitrophenol in developing zebrafish embryos.

Is lymphocyte adenosine a diagnostic marker of clinical malignant hyperthermia? A pilot study.

Resveratrol abrogates the effects of hypoxia on cell proliferation, invasion and EMT in osteosarcoma cells through downregulation of the HIF-1 α protein.

Transcriptional profiling of rat hypothalamus response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Lysyl oxidase expression is decreased in the developing diaphragm and lungs of nitrofen-induced congenital diaphragmatic hernia.

Extrapyramidal system neurotoxicity: animal models.

Indoxyl sulfate, not P-cresyl sulfate, is associated with advanced glycation end products in patients on long-term hemodialysis.

Serum free indoxyl sulfate associated with in-stent restenosis after coronary artery stentings.

Borax partially prevents neurologic disability and oxidative stress in experimental spinal cord ischemia/reperfusion injury.

Decidual β -carotene-15,15'-oxygenase-1 and 2 (BCMO1,2) expression is increased in nitrofen model of congenital diaphragmatic hernia.

Disruption of copper-dependent signaling pathway in the nitrofen-induced congenital diaphragmatic hernia.

Effects of acute hypercapnia with and without acidosis on lung inflammation and apoptosis in experimental acute lung injury.

Light Inhibition of Shoot Regeneration Is Regulated by Endogenous Abscisic Acid Level in Calli Derived from Immature Barley Embryos.

Aryl hydrocarbon receptor antagonism and its role in rheumatoid arthritis.

Determination of residual arsenic compounds in chicken muscle by ultra-performance liquid chromatography coupled with ultraviolet detection after pre-column derivatization with toluene-3,4-dithiol.

Expression of bioactive recombinant human fibroblast growth factor 9 in oil bodies of *Arabidopsis thaliana*.

Determination of Heavy Metal Concentrations in Normal and Pathological Human Endometrial Biopsies and In Vitro Regulation of Gene Expression by Metals in the Ishikawa and Hec-1b Endometrial Cell Line.

Simultaneous determination of phenoxyethanol and its major metabolite, phenoxyacetic acid, in rat biological matrices by LC-MS/MS with polarity switching: Application to ADME studies.

Occurrence, bioaccumulation and risk assessment of dioxin-like PCBs along the Chenab river, Pakistan.

Evaluation of [(11)C]methyl-losartan and [(11)C]methyl-EXP3174 for PET imaging of renal AT1receptor in rats.

The role of thioredoxin reductase and glutathione reductase in plumbagin-induced, reactive oxygen species-mediated apoptosis in cancer cell lines.

Transcriptional profiling of rat white adipose tissue response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Absorption of PCB126 by upper airways impairs G protein-coupled receptor-mediated immune response.

Activation of NRF2 pathway in spleen, thymus as well as peripheral blood mononuclear cells by acute arsenic exposure in mice.

POPs in free-ranging pilot whales, sperm whales and fin whales from the Mediterranean Sea: Influence of biological and ecological factors.

Melatonin Ameliorates Arsenite-Induced Neurotoxicity: Involvement of Autophagy and Mitochondria.

High accumulation of arsenic in the esophagus of mice after exposure to arsenite.

Dioxin-like biological activity of organic extracts from sediments and fish livers sampled along the Israeli Mediterranean and Red Sea coasts.

Transcription factor p63 controls the reserve status but not the stemness of horizontal basal cells in the olfactory epithelium.

Hydroxyl metabolite of PCB 180 induces DNA damage signaling and enhances the DNA damaging effect of benzo[a]pyrene.

Expression of aryl hydrocarbon receptor 1 (AHR1), AHR1 nuclear translocator 1 (ARNT1) and CYP1 family monooxygenase mRNAs and their activity in chicken ovarian follicles following in vitro exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

ELECTROCHEMICAL POTENTIAL OF THE INNER MITOCHONDRIAL MEMBRANE AND Ca²⁺ HOMEOSTASIS OF MYOMETRIUM CELLS.

Exogenous plant hormones and cyclotide expression in *Viola uliginosa* (Violaceae).

Toxicokinetic Model Development for the Insensitive Munitions Component 2,4-Dinitroanisole.

Silymarin attenuates paraquat-induced lung injury via Nrf2-mediated pathway in vivo and in vitro.

Green tea (*Camellia sinensis*) alleviates arsenic-induced damages to DNA and intestinal tissues in rat and in situ intestinal loop by reinforcing antioxidant system.

Development and Validation of a Multiplexed Protein Quantitation Assay for the Determination of Three Recombinant Proteins in Soybean Tissues by Liquid Chromatography with Tandem Mass Spectrometry.

Body Mass Parameters, Lipid Profiles and Protein Contents of Zebrafish Embryos and Effects of 2,4-Dinitrophenol Exposure.

Male and female mice show significant differences in hepatic transcriptomic response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Application of liquid chromatography/electrospray ionization tandem mass spectrometry for the elucidation of hydroxyl radical oxidation of metsulfuron methyl and related sulfonylurea pesticide products: evidence for the triazine skeleton scission.

Genistein suppresses smooth muscle cell-derived foam cell formation through tyrosine kinase pathway.

Modification of Bacterial Cellulose with Organosilanes to Improve Attachment and Spreading of Human Fibroblasts.

Effect of heat stress-induced production of mitochondrial reactive oxygen species on NADPH oxidase and heme oxygenase-1 mRNA levels in avian muscle cells.

The mitochondrial uncoupler DNP triggers brain cell mTOR signaling network reprogramming and CREB pathway up-regulation.

Characterization and risk assessment of polychlorinated biphenyls in soils and rice tissues in a suburban paddy field of the Pearl River Delta, South China.

Inhibitory effects on osteoblast differentiation in vitro by the polychlorinated biphenyl mixture Aroclor 1254 are mainly associated with the dioxin-like constituents.

Protective effects of thalidomide on pulmonary injuries in a rat model of paraquat intoxication.

Endothelial disruptive proinflammatory effects of nicotine and e-cigarette vapor exposures.

Protective effect of telmisartan treatment against arsenic-induced testicular toxicity in rats.

Comet assay evaluation of six chemicals of known genotoxic potential in rats.

Effect of tocopherol and acetylsalicylic acid on the biochemical indices of blood in dioxin-exposed rats.

A bioassay to measure energy metabolism in mouse colonic crypts, organoids, and sorted stem cells.

Direct injection of tissue extracts in liquid chromatography/tandem mass spectrometry for the determination of pharmaceuticals and other contaminants of emerging concern in mollusks.

Dioxin disrupts cranial cartilage and dermal bone development in zebrafish larvae.

Comparative Risks of Aldehyde Constituents in Cigarette Smoke Using Transient Computational Fluid Dynamics/Physiologically Based Pharmacokinetic Models of the Rat and Human Respiratory Tracts.

A rapid in vivo zebrafish model to elucidate oxidative stress-mediated PCB126-induced apoptosis and developmental toxicity.

Pharmacokinetic and Genomic Effects of Arsenite in Drinking Water on Mouse Lung in a 30-Day Exposure.

Mitochondrial Morphology and Fundamental Parameters of the Mitochondrial Respiratory Chain Are Altered in *Caenorhabditis elegans* Strains Deficient in Mitochondrial Dynamics and Homeostasis Processes.

Dioxin Exposure Impairs BMP-2-Mediated Spinal Fusion in a Rat Arthrodesis Model.

In vitro somatic embryogenesis and plantlet regeneration from immature male inflorescence of adult dura and tenera palms of *Elaeis guineensis* (Jacq.).

Contribution of impaired myofibril and ryanodine receptor function to prolonged low-frequency force depression after in situ stimulation in rat skeletal muscle.

In vivo effects of metaldehyde on Pacific oyster, *Crassostrea gigas*: comparing hemocyte parameters in two oyster families.

Utility of cell viability assays for use with ex vivo vocal fold epithelial tissue.

17β-Estradiol Increases Lipid Accumulation in Mature Adipocytes and Enhances Adipocyte-Stimulated Endothelial Tube Formation.

Combination effects of AHR agonists and Wnt/β-catenin modulators in zebrafish embryos: Implications for physiological and toxicological AHR functions.

Role of ALADIN in human adrenocortical cells for oxidative stress response and steroidogenesis.

Expression of the aryl hydrocarbon receptor in growth plate cartilage and the impact of its local modulation on longitudinal bone growth.

Identification of distinct circulating exosomes in Parkinson's disease.

Regulation of CYP1A1 and Inflammatory Cytokine by NCOA7 Isoform 4 in Response to Dioxin Induced Airway Inflammation.

Synthesis and biological evaluation of [¹⁴C]AZ12504948; a novel tracer for imaging of glucokinase in pancreas and liver.

Suspected flunixin poisoning of a wild Eurasian Griffon Vulture from Spain.

Arsenic responsive microRNAs in vivo and their potential involvement in arsenic-induced oxidative stress.

Inflammation and pyroptosis mediate muscle expansion in an interleukin-1β (IL-1β)-dependent manner.

Effect of Glyphosate Application on Sudden Death Syndrome of Glyphosate-Resistant Soybean Under Field Conditions.

Potential of Different *Coleus blumei* Tissues for Rosmarinic Acid Production.

Effects of combined ferrous sulfate administration and exposure to static magnetic field on brain oxidative stress and emotional behavior.

[Gender-dependent expression of ERα in arsenic exposed mice offspring's lung tissue].

Ulinastatin suppresses endoplasmic reticulum stress and apoptosis in the hippocampus of rats with acute paraquat poisoning.

Contraction of gut smooth muscle cells assessed by fluorescence imaging.

Lipotubuloids in ovary epidermis of *Ornithogalum umbellatum* act as metabolons: suggestion of the name 'lipotubuloid metabolon'.

Accumulation of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls in livers of young sheep.

Lactational exposure to low levels of the six indicator non-dioxin-like polychlorinated biphenyls induces DNA damage and repression of neuronal activity, in juvenile male mice.

Protective effects of *Phyllanthus emblica* leaf extract on sodium arsenite-mediated adverse effects in mice.

Aryl hydrocarbon receptor 2 mediates the toxicity of Paclitaxel on the digestive system of zebrafish embryos.

Development and characterization of an endothelial cell line from the bulbus arteriosus of walleye, *Sander vitreus*.

Nitric oxide production and sequestration in the sinus gland of the green shore crab *Carcinus maenas*.

Characterization of a small constitutive promoter from *Arabidopsis* translationally controlled tumor protein (AtTCTP) gene for plant transformation.

Protein-bound uremic toxins induce tissue remodeling by targeting the EGF receptor.

Dinitrophenol modulates gene expression levels of angiogenic, cell survival and cardiomyogenic factors in bone marrow derived mesenchymal stem cells.

Chloroacetic acid triggers apoptosis in neuronal cells via a reactive oxygen species-induced endoplasmic reticulum stress signaling pathway.

Craniofacial form is altered by chronic adult exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in Han/Wistar and Long-Evans rats with different aryl hydrocarbon receptor (AhR) structures.

Naringin ameliorates sodium arsenite-induced renal and hepatic toxicity in rats: decisive role of KIM-1, Caspase-3, TGF- β^2 , and TNF- α .

Applications of Metabonomics in Pesticide Toxicology.

Preprophase band formation and cortical division zone establishment: RanGAP behaves differently from microtubules during their band formation.

Neuroglobin Plays a Protective Role in Arsenite-Induced Cytotoxicity by Inhibition of Cdc42 and Rac1GTPases in Rat Cerebellar Granule Neurons.

Modulation of aryl hydrocarbon receptor regulated genes by acute administration of trimethylarsine oxide in the lung, kidney and heart of C57BL/6 mice.

[The influence of iron ions on ATP-hydrolases activity of cell membranes of rat colon smooth muscle and kidney].

Influence of titanium dioxide nanoparticles on 2,3,7,8-tetrachlorodibenzo-p-dioxin bioconcentration and toxicity in the marine fish European sea bass (*Dicentrarchus labrax*).

Exposure to a continuous low dose of tetrachlorodibenzo-p-dioxin impairs the development of the tooth root in lactational rats and alters the function of apical papilla-derived stem cells.

Human fetal ventricular cardiomyocyte, RL-14 cell line, is a promising model to study drug metabolizing enzymes and their associated arachidonic acid metabolites.

Effect of vitamin E supplementation on arsenic induced alteration in blood biochemical profile, oxidant/antioxidant status, serum cortisol level and retention of arsenic and selenium in goats.

Chronic exposure to low-dose arsenic modulates lipogenic gene expression in mice.

Repositioning of 2,4-dichlorophenoxy acetic acid as a potential anti-inflammatory agent: in silico and pharmaceutical formulation study.

Exposure to mitochondrial genotoxins and dopaminergic neurodegeneration in *Caenorhabditis elegans*.

The role of p38 MAPK in acute paraquat-induced lung injury in rats.

Ozone therapy ameliorates paraquat-induced lung injury in rats.

Therapeutic effects and mechanism of salubrinal combined with ulinastatin on treating paraquat poisoning.

Paraquat increases connective tissue growth factor expression and impairs lung fibroblast proliferation and viscoelasticity.

Green leaf volatiles, fire and nonanoic acid activate MAPkinases in the model grass species *Lolium temulentum*.

Dose and temporal effects on gene expression profiles of urothelial cells from rats exposed to diuron.

[Progress on pathogenesis and treatment of paraquat-induced pulmonary fibrosis].

[Effect of thalidomide in a mouse model of paraquat-induced acute lung injury and the underlying mechanisms].

Carcinogenicity of metamifop, a novel herbicide, in Wistar rats following oral administration for 104 weeks.

Metabolic and behavior changes in surubim acutely exposed to a glyphosate-based herbicide.

Tissue sensitivity of the rat upper and lower extrapulmonary airways to the inhaled electrophilic air pollutants diacetyl and acrolein.

Pesticides exposure as etiological factors of Parkinson's disease and other neurodegenerative diseases-- a mechanistic approach.

Effects of atrazine and chlorpyrifos on DNA methylation in the liver, kidney and gill of the common carp (*Cyprinus carpio* L.).

Inhibition effect of glyphosate on the acute and subacute toxicity of cadmium to earthworm *Eisenia fetida*.

Oxidative stress response induced by atrazine in *Palaemonetes argentinus*: the protective effect of vitamin E.

Histopathological and biochemical changes in goldfish kidney due to exposure to the herbicide Sencor may be related to induction of oxidative stress.

The experimental autoimmune encephalomyelitis disease course is modulated by nicotine and other cigarette smoke components.

Pro- and anti-inflammatory cytokine expression in immune organs of the common carp exposed to atrazine and chlorpyrifos.

Biochemical effects of glyphosate based herbicide, Excel Mera 71 on enzyme activities of acetylcholinesterase (AChE), lipid peroxidation (LPO), catalase (CAT), glutathione-S-transferase (GST) and protein content on teleostean fishes.

2,4-Dichlorophenoxyacetic acid promotes S-nitrosylation and oxidation of actin affecting cytoskeleton and peroxisomal dynamics.

Effects of glyphosate-based herbicides on survival, development, growth and sex ratios of wood frogs (*Lithobates sylvaticus*) tadpoles. I: chronic laboratory exposures to VisionMax[®].

[Cloning of full-length cDNA of HMGR from *Gobiocypris rarus* and analysis of its expression profiles in male exposed to pentachlorophenol].

FTY720 attenuates paraquat-induced lung injury in mice.

Modulatory effects of curcumin on redox status, mitochondrial function, and caspase-3 expression during atrazine-induced toxicity.

Effects of the acute exposition to glyphosate-based herbicide on oxidative stress parameters and antioxidant responses in a hybrid Amazon fish surubim (*Pseudoplatystoma* sp).

From surface to intracellular non-invasive nanoscale study of living cells impairments.

Glyphosate affects the spontaneous motoric activity of intestine at very low doses - in vitro study.

Subchronic atrazine exposure changes defensive behaviour profile and disrupts brain acetylcholinesterase activity of zebrafish.

Acrolein- and 4-Aminobiphenyl-DNA adducts in human bladder mucosa and tumor tissue and their mutagenicity in human urothelial cells.

Regulation of expression and activity of multidrug resistance proteins MRP2 and MDR1 by estrogenic compounds in Caco-2 cells. Role in prevention of xenobiotic-induced cytotoxicity.

[Tumor necrosis factor- α induced protein 6 attenuates acute kidney injury following paraquat poisoning in rats].

[Reproduction of acute lung injury model induced by paraquat in piglet].

[The interventional effect of Xuebijing injection on expression of mitochondrial fusion protein 2 and the ultrastructure changes in lung tissues in rats with paraquat poisoning].

[Total flavonoids from *Astragalus complanatus* attenuates lung injury following paraquat poisoning in rats through inhibiting excessive endoplasmic reticulum stress and c-Jun N-terminal kinase pathway].

[Early acute liver injury in paraquat poisoning rats].

Atrazine and pregnancy outcomes: a systematic review of epidemiologic evidence.

Effects of glyphosate on growth rate, metabolic rate and energy reserves of early juvenile crayfish, *Cherax quadricarinatus* M.

Histopathological and estrogen effect of pentachlorophenol on the rare minnow (*Gobiocypris rarus*).

Fetotoxicity of 2,4-dichlorophenoxyacetic acid in rats and the protective role of vitamin E.

Effect of Nrf2 on rat ovarian tissues against atrazine-induced anti-oxidative response.

[Curcumin alleviated liver oxidative stress injury of rat induced by paraquat].

α -Tocopheryl succinate pre-treatment attenuates quinone toxicity in prostate cancer PC3 cells.

Dermal developmental toxicity of N-phenylimide herbicides in rats.

Methemoglobinemia associated with metaflumizone poisoning.

Herbicide clomazone effects on δ -aminolevulinic acid activity and metabolic parameters in *Cyprinus carpio*.

Effect of transforming growth factor- β 1 on acute lung injury caused by paraquat.

Effect of atrazine, glyphosate and quinclorac on biochemical parameters, lipid peroxidation and survival in bullfrog tadpoles (*Lithobates catesbeianus*).

Kidney biomarkers in MCPA-induced acute kidney injury in rats: reduced clearance enhances early biomarker performance.

Chronic exposure of mice to environmental endocrine-disrupting chemicals disturbs their energy metabolism.

Tissue-specific induction of oxidative stress in goldfish by 2,4-dichlorophenoxyacetic acid: mild in brain and moderate in liver and kidney.

[Protective effect of ghrelin against paraquat-induced acute lung injury in mice].

Dietary administration of paraquat for 13 weeks does not result in a loss of dopaminergic neurons in the substantia nigra of C57BL/6J mice.

Genes for iron-sulphur cluster assembly are targets of abiotic stress in rice, *Oryza sativa*.

Maternal periconceptional occupational exposure to pesticides and selected musculoskeletal birth defects.

Glyphosate, hard water and nephrotoxic metals: are they the culprits behind the epidemic of chronic kidney disease of unknown etiology in Sri Lanka?

Clinico-hematological and tissue changes induced by butachlor in male Japanese quail (*Coturnix japonica*).

Skeletonema marinoi (Bacillariophyceae) sensitivity to herbicides and effects of temperature increase on cellular responses to terbuthylazine exposure.

Persistent organic pollutants and diabetes: a review of the epidemiological evidence.

[Protective effect and mechanisms of pituitrin on acute paraquat-induced lung injury in rats].

The effect of subchronic metribuzin exposure to signal crayfish (*Pacifastacus leniusculus* Dana 1852).

Evaluation of metabolic enzymes in response to Excel Mera 71, a glyphosate-based herbicide, and recovery pattern in freshwater teleostean fishes.

CB2 receptor activation ameliorates the proinflammatory activity in acute lung injury induced by paraquat.

Effect of chronic exposure to prometryne on oxidative stress and antioxidant response in red swamp crayfish (*Procambarus clarkii*).

Development and application of a microwave-assisted extraction and LC/MS/MS methodology to the determination of antifouling booster biocides in sea mullets (*Mugil cephalus*) organisms.

Therapeutic effect of magnesium isoglycyrrhizinate in rats on lung injury induced by paraquat poisoning.

Clinical characteristics of patients after dicamba herbicide ingestion.

Toxic effects of penoxsulam herbicide in two fish species reared in southern Brazil.

3-(2-oxoethylidene)indolin-2-one derivatives activate Nrf2 and inhibit NF- κ B: potential candidates for chemoprevention.

Localized changes to glycogen synthase kinase-3 and collapsin response mediator protein-2 in the Huntington's disease affected brain.

Increased immunoglobulin production in silver catfish (*Rhamdia quelen*) exposed to agrichemicals.

Acrolein detection: potential theranostic utility in multiple sclerosis and spinal cord injury.

Neuroprotective role of hydralazine in rat spinal cord injury-attenuation of acrolein-mediated damage.

Cytotoxicity of PVPAC-treated bovine pericardium: a potential replacement for glutaraldehyde in biological heart valves.

Cinnamon extract improves insulin sensitivity in the brain and lowers liver fat in mouse models of obesity.

Absence of P-glycoprotein transport in the pharmacokinetics and toxicity of the herbicide paraquat.

Effect of lung fibrosis on glycogen content in different extrapulmonary tissues.

Cinnamaldehyde inhibits L-type calcium channels in mouse ventricular cardiomyocytes and vascular smooth muscle cells.

Hypericin biosynthesis in *Hypericum hookerianum* Wight and Arn: investigation on biochemical pathways using metabolite inhibitors and suppression subtractive hybridization.

Somatosensory and vasomotor manifestations of individual and combined stimulation of TRPM8 and TRPA1 using topical L-menthol and trans-cinnamaldehyde in healthy volunteers.

Metabolism of propylsulfuron: ¹⁴C excretion, ¹⁴C concentration in plasma and tissues, and amount of metabolites in rats.

[The effect of selective phosphatase inhibitors Salubrinal on autophagy and apoptosis in the lung tissue of rats with acute paraquat poisoning].

A derivatization and validation strategy for determining the spatial localization of endogenous amine metabolites in tissues using MALDI imaging mass spectrometry.

[Tissue cultivation of *Lonicera macranthoides* 'Yuleil'].

Effects of atrazine and chlorpyrifos on cytochrome P450 in common carp liver.

Cinnamaldehyde and cinnamaldehyde-containing micelles induce relaxation of isolated porcine coronary arteries: role of nitric oxide and calcium.

Recharging mitochondrial batteries in old eyes. Near infra-red increases ATP.

Acrolein relaxes mouse isolated tracheal smooth muscle via a TRPA1-dependent mechanism.

OxyR and SoxR modulate the inducible oxidative stress response and are implicated during different stages of infection for the bacterial phytopathogen *Pantoea stewartii* subsp. *stewartii*.

Comparison of speciated arsenic levels in the liver and brain of mice between arsenate and arsenite exposure at the early life.

Micropropagation of *Dalbergia sissoo* Roxb. through tissue culture technique.

Regulation of anthocyanin biosynthesis in *Arabidopsis thaliana* red pap1-D cells metabolically programmed by auxins.

Compositional analysis of grain and forage from MON 87427, an inducible male sterile and tissue selective glyphosate-tolerant maize product for hybrid seed production.

p-Cresol affects reactive oxygen species generation, cell cycle arrest, cytotoxicity and inflammation/atherosclerosis-related modulators production in endothelial cells and mononuclear cells.

Bioaccumulation of arsenic species in rays from the northern Adriatic Sea.

Effect of iron supplementation on the expression of hypoxia-inducible factor and antioxidant status in rats exposed to high-altitude hypoxia environment.

Increased pulmonary vascular expression of KrÄppel-like factor 5 and activated survivin in experimental congenital diaphragmatic hernia.

Genetic deletion of LXR± prevents arsenic-enhanced atherosclerosis, but not arsenic-altered plaque composition.

Dioxin induction of transgenerational inheritance of disease in zebrafish.

Global metabolomic profiling of acute myocarditis caused by Trypanosoma cruzi infection.

Mannitol-induced drought stress on calli of Trigonellafoenum-graecum L. Var. RMt-303.

The role of nitisinone in tyrosine pathway disorders.

The aryl hydrocarbon receptor suppresses osteoblast proliferation and differentiation through the activation of the ERK signaling pathway.

In silico identification of an aryl hydrocarbon receptor antagonist with biological activity in vitro and in vivo.

Uremic toxicity and sclerostin in chronic kidney disease patients.

Effect of mitochondrial metabolism-interfering agents on cancer cell mitochondrial function and radio/chemosensitivity.

Serum total p-cresylsulfate level is associated with abnormal QTc interval in stable angina patients with early stage of renal failure.

Low brain iron effects and reversibility on striatal dopamine dynamics.

[Rheumatology: Progress in Diagnosis and Treatments. Topics: III. Rheumatoid Arthritis and Allied Conditions; 2. Allied Conditions. 2) Polymyalgia rheumatica].

Mitochondrial uncoupling as a regulator of life-history trajectories in birds: an experimental study in the zebra finch.

Metabolites related to gut bacterial metabolism, peroxisome proliferator-activated receptor-alpha activation, and insulin sensitivity are associated with physical function in functionally-limited older adults.

Evidence for decreased lipofibroblast expression in hypoplastic rat lungs with congenital diaphragmatic hernia.

Nitric oxide as a target for the hypotensive and vasorelaxing effects induced by (Z)-ethyl 12-nitrooxy-octadec-9-enoate in rats.

Burn after feeding. An old uncoupler of oxidative phosphorylation is redesigned for the treatment of nonalcoholic fatty liver disease.

Human organic anion transporters function as a high-capacity transporter for p-cresyl sulfate, a uremic toxin.

Therapeutic potential of mesenchymal stem cell transplantation in a nitrofen-induced congenital diaphragmatic hernia rat model.

Functional characterisation of the R2452W ryanodine receptor variant associated with malignant hyperthermia susceptibility.

Myogenin gene expression is not altered in the developing diaphragm of nitrofen-induced congenital diaphragmatic hernia.

Radiosynthesis, photoisomerization, biodistribution, and metabolite analysis of ¹¹C-PBB3 as a clinically useful PET probe for imaging of tau pathology.

Enhancement of non-heme iron absorption by anchovy (*Engraulis japonicus*) muscle protein hydrolysate involves a nanoparticle-mediated mechanism.

Toxicological profile of ultrapure 2,2',3,4,4',5,5'-heptachlorobiphenyl (PCB 180) in adult rats.

Gestational and lactational exposure to the polychlorinated biphenyl mixture Aroclor 1254 modulates retinoid homeostasis in rat offspring.

HuR regulates alternative splicing of the *TRA2¹²* gene in human colon cancer cells under oxidative stress.

Effects of ferrofluid and phytoalexin spirobrassinin on thioflavin-T-based fluorescence in cerebrospinal fluid of the elderly and multiple sclerosis patients.

Long-term low-dose exposure of human urothelial cells to sodium arsenite activates lipocalin-2 via promoter hypomethylation.

Responsiveness of hepatic and cerebral cytochrome P450 in rat offspring prenatally and lactationally exposed to a reconstituted PCB mixture.

Androgen receptor signaling in hepatocellular carcinoma and pancreatic cancers.

Aryl hydrocarbon receptor catabolic activity in bone metabolism is osteoclast dependent in vivo.

The chemical uncoupler 2,4-dinitrophenol (DNP) protects against diet-induced obesity and improves energy homeostasis in mice at thermoneutrality.

Postnatal development of eupneic ventilation and metabolism in rats chronically exposed to moderate hyperoxia.

Mitochondrial dysfunction promotes and aggravates the inflammatory response in normal human synoviocytes.

Increase in reports of toxicity from fat burning supplement seen in UK.

MicroRNA profiling as tool for in vitro developmental neurotoxicity testing: the case of sodium valproate.

Upregulation of serotonin-receptor-2a and serotonin transporter expression in the pulmonary vasculature of nitrofen-induced congenital diaphragmatic hernia.

Effects of acute dietary iron overload in pigs (*Sus scrofa*) with induced type 2 diabetes mellitus.

The cytochrome c oxidase and its mitochondrial function in the whiteleg shrimp *Litopenaeus vannamei* during hypoxia.

Peroxiredoxin I protein, a potential biomarker of hydronephrosis in fetal mice exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Mammalian microtubule P-body dynamics are mediated by nesprin-1.

Metallothionein deficiency impacts copper accumulation and redistribution in leaves and seeds of *Arabidopsis*.

Interaction between arsenic exposure from drinking water and genetic susceptibility in carotid intima-media thickness in Bangladesh.

The thiocarbamate disulphide drug, disulfiram induces osteopenia in rats by inhibition of osteoblast function due to suppression of acetaldehyde dehydrogenase activity.

Durable field resistance to wheat yellow mosaic virus in transgenic wheat containing the antisense virus polymerase gene.

Ultrasound-guided interventional procedures around the shoulder.

Augmented atherogenesis in ApoE-null mice co-exposed to polychlorinated biphenyls and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Nanoencapsulation of DMSA monoester for better therapeutic efficacy of the chelating agent against arsenic toxicity.

Meat Science and Muscle Biology Symposium: Ecological and dietary impactors of foodborne pathogens and methods to reduce fecal shedding in cattle.

Alcohol-induced autophagy contributes to loss in skeletal muscle mass.

Using zebrafish as a model system for studying the transgenerational effects of dioxin.

The gut microbiome, kidney disease, and targeted interventions.

Enteric nervous system and esophageal-gastrointestinal motility in experimental congenital diaphragmatic hernia.

Synergistic interactions between PBDEs and PCBs in human neuroblastoma cells.

The aryl hydrocarbon receptor-activating effect of uremic toxins from tryptophan metabolism: a new concept to understand cardiovascular complications of chronic kidney disease.

Drug-induced injury in the gastrointestinal tract.

Comparison of intake and systemic relative effect potencies of dioxin-like compounds in female rats after a single oral dose.

Aryl hydrocarbon receptor downregulates MYCN expression and promotes cell differentiation of neuroblastoma.

Protein-bound uremic toxins: new culprits of cardiovascular events in chronic kidney disease patients.

Decreased apelin and apelin-receptor expression in the pulmonary vasculature of nitrofen-induced congenital diaphragmatic hernia.

The aryl hydrocarbon receptor mediates raloxifene-induced apoptosis in estrogen receptor-negative hepatoma and breast cancer cells.

ITE and TCDD differentially regulate the vascular remodeling of rat placenta via the activation of AhR.

CYP1B1: a unique gene with unique characteristics.

Histopathological evaluation of tumor necrosis and volume after cyanogenic chemotherapy.

Effect of dietary supplementation of (-)-epigallocatechin gallate on gut microbiota and biomarkers of colonic fermentation in rats.

Sildenafil stimulates and dexamethasone inhibits pulmonary vascular development in congenital diaphragmatic hernia rat lungs.

Is intralipid fat emulsion a promising therapeutic strategy on neurotoxicity induced by malathion in rats?

In utero and lactational exposure to a mixture of environmental contaminants detected in Canadian Arctic human populations alters retinoid levels in rat offspring with low margins of exposure.

Autophagy as an essential cellular antioxidant pathway in neurodegenerative disease.

Gene-environment interactions in male reproductive health: special reference to the aryl hydrocarbon receptor signaling pathway.

Ultrahigh resolution mass spectrometry-based metabolic characterization reveals cerebellum as a disturbed region in two animal models.

Mode of action and dose-response framework analysis for receptor-mediated toxicity: The aryl hydrocarbon receptor as a case study.

Animal models of Parkinson's disease: a gateway to therapeutics?

Aryl hydrocarbon receptor-dependent induction of liver fibrosis by dioxin.

A high-content screen identifies novel compounds that inhibit stress-induced TDP-43 cellular aggregation and associated cytotoxicity.

The toxic chemistry of methyl bromide.

TCDD disrupts posterior palatogenesis and causes cleft palate.

In vitro propagation and analysis of secondary metabolites in *Glossogyne tenuifolia* (Hsiang-Ju) - a medicinal plant native to Taiwan.

The preventive effect of atorvastatin on paraquat-induced pulmonary fibrosis in the rats.

Subchronic arsenic exposure through drinking water alters vascular redox homeostasis and affects physical health in rats.

Low level tumor necrosis factor- α protects cardiomyocytes against high level tumor necrosis factor- α : brief insight into a beneficial paradox.

Duodenal absorption and tissue utilization of dietary heme and nonheme iron differ in rats.

Identification of reference proteins for Western blot analyses in mouse model systems of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) toxicity.

Effects of atrazine on the oxidative damage of kidney in Wistar rats.

Quantitative analysis of volatile organic compounds released and consumed by rat L6 skeletal muscle cells in vitro.

Oxidative stress affects FET proteins localization and alternative pre-mRNA processing in cellular models of ALS.

Lipid peroxidation in Rheumatoid arthritis; consequences and monitoring.

A metabolomic analysis of the effect of quercetin on toxicity induced by chronic exposure to low-level dichlorvos in rat plasma.

^{11}C -ORM-13070, a novel PET ligand for brain β_1 -adrenoceptors: radiometabolism, plasma pharmacokinetics, whole-body distribution and radiation dosimetry in healthy men.

Potential role of catalase in mice with lipopolysaccharide/D-galactosamine-induced fulminant liver injury.

Polychlorinated biphenyls (PCB 101, PCB 153 and PCB 180) alter leptin signaling and lipid metabolism in differentiated 3T3-L1 adipocytes.

NADPH oxidase and the cardiovascular toxicity associated with smoking.

Transplanted human adipose tissue-derived stem cells engraft and induce regeneration in mice olfactory neuroepithelium in response to dichlobenil subadministration.

In vitro antioxidant capacity of tea of *Echinodorus grandiflorus*, "leather hat," in Wistar rat liver.

Can damselfly larvae (*Ischnura elegans*) be used as bioindicators of sublethal effects of environmental contamination?

Comparison of osteoblast and cardiomyocyte differentiation in the embryonic stem cell test for predicting embryotoxicity in vivo.

Magnas functions as a ROS regulator and provides cytoprotection against oxidative stress-mediated damages.

Polyamidoamine dendrimers as off-column binding agent and in-column pseudostationary phase for efficient and sensitive capillary electrophoretic analysis of fluoroquinolones in chicken muscles.

Blood biochemistry, thyroid hormones, and oxidant/antioxidant status of guinea pigs challenged with sodium arsenite or arsenic trioxide.

Histological and histometrical study of the protective role of α -tocopherol against sodium arsenite toxicity in rat ovaries.

Functionality of aryl hydrocarbon receptors (AhR1 and AhR2) of white sturgeon (*Acipenser transmontanus*) and implications for the risk assessment of dioxin-like compounds.

FGF21 as a Hepatokine, Adipokine, and Myokine in Metabolism and Diseases.

Ameliorative effect of *Matricaria chamomilla* L on paraquat: Induced oxidative damage in lung rats.

Microvascular circulation at cool, normal and warm temperatures in rat leg muscles examined by histochemistry using *Lycopersicon esculentum* lectin.

Carprofen-induced oxidative stress in mitochondria of the colonic mucosa of the dog.

Acetohydroxyacid synthase activity and transcripts profiling reveal tissue-specific regulation of *ahas* genes in sunflower.

An aberrant leukotriene A4 hydrolase-proline-glycine-proline pathway in the pathogenesis of chronic obstructive pulmonary disease.

A PET Tracer for Brain β -Adrenoceptors, (11)*C*-ORM-13070: Radiosynthesis and Preclinical Evaluation in Rats and Knockout Mice.

Fibroblast growth factor (Fgf) 21 is a novel target gene of the aryl hydrocarbon receptor (AhR).

Embryonic exposure to sodium arsenite perturbs vascular development in zebrafish.

Effects of uremic toxin p-cresol on proliferation, apoptosis, differentiation, and glucose uptake in 3T3-L1 cells.

Osteoactivin promotes osteoblast adhesion through HSPG and α 5 β 1 integrin.

Immunofluorescence detection and localization of B[a]P and TCDD in earthworm tissues.

Enantioselective metabolism of quizalofop-ethyl in rat.

Comparative oxidative stress, metallothionein induction and organ toxicity following chronic exposure to arsenic, lead and mercury in rats.

Tissue-Specific Metabolic Profile Study of *Moringa oleifera* L. Using Nuclear Magnetic Resonance Spectroscopy.

Improving the efficiency of isolated microspore culture in six-row spring barley: II-exploring novel growth regulators to maximize embryogenesis and reduce albinism.

Guanosine regulates adenosine levels in the kidney.

Protective effect of quercetin on atrazine-induced oxidative stress in the liver, kidney, brain, and heart of adult wistar rats.

Combined effects of pharmaceuticals, personal care products, biocides and organic contaminants on the growth of *Skeletonema pseudocostatum*.

Wild fish from the Bay of Quinte Area of Concern contain elevated tissue concentrations of PCBs and exhibit evidence of endocrine-related health effects.

TCDD induces dermal accumulation of keratinocyte-derived matrix metalloproteinase-10 in an organotypic model of human skin.

Microbiome-derived tryptophan metabolites and their aryl hydrocarbon receptor-dependent agonist and antagonist activities.

Study of osteogenic differentiation of human adipose-derived stem cells (HASCs) on bacterial cellulose.

Electromembrane Surrounded Solid Phase Microextraction Followed by Injection Port Derivatization and Gas Chromatography-Flame Ionization Detector Analysis for Determination of Acidic Herbicides in Plant Tissue.

Differential relative effect potencies of some dioxin-like compounds in human peripheral blood lymphocytes and murine splenic cells.

Acrolein as a novel therapeutic target for motor and sensory deficits in spinal cord injury.

Analysis of hepatic deiodinase 2 mRNA levels in natural fish lake populations exposed to different levels of putative thyroid disrupters.

Perinatal low-dose iron treatment influences susceptibility to diet-induced adipogenesis in early-aged male Wistar rats.

Modulation of gene-expression profiles associated with sodium arsenite-induced cardiotoxicity by p-coumaric acid, a common dietary polyphenol.

Persistent organic pollutant levels in semi-domesticated reindeer (*Rangifer tarandus tarandus* L.), feed, lichen, blood, milk, placenta, foetus and calf.

Selective pressurized liquid extraction technique capable of analyzing dioxins, furans, and PCBs in clams and crab tissue.

Cancer-promoting and Inhibiting Effects of Dietary Compounds: Role of the Aryl Hydrocarbon Receptor (AhR).

Plant extracts of the family Lauraceae: a potential resource for chemopreventive agents that activate the nuclear factor-erythroid 2-related factor 2/antioxidant response element pathway.

First evidence for toxic defense based on the multixenobiotic resistance (MXR) mechanism in *Daphnia magna*.

Alterations in the transcriptome of soybean in response to enhanced somatic embryogenesis promoted by orthologs of *Agamous-like15* and *Agamous-like18*.

Oxygen tension controls the expression of the monocarboxylate transporter MCT4 in cultured mouse cortical astrocytes via a hypoxia-inducible factor-1 α -mediated transcriptional regulation.

Label-retaining, quiescent globose basal cells are found in the olfactory epithelium.

2, 3, 7, 8-Tetrachlorodibenzo-P-dioxin (TCDD) induces premature senescence in human and rodent neuronal cells via ROS-dependent mechanisms.

Mitochondrial uncoupling reduces exercise capacity despite several skeletal muscle metabolic adaptations.

TCDD dysregulation of 13 AHR-target genes in rat liver.

Adverse effects in adulthood resulting from low-level dioxin exposure in juvenile zebrafish.

Chemoprevention against arsenic-induced mutagenic DNA breakage and apoptotic liver damage in rat via antioxidant and SOD1 upregulation by green tea (*Camellia sinensis*) which recovers broken DNA resulted from arsenic-H₂O₂ related in vitro oxidant stress.

Influence of dioxin intoxication on the human system and possibilities of limiting its negative effects on the environment and living organisms.

Effect of SP-A/B in lipoic acid on acute paraquat poisoning.

Viscous optical clearing agent for in vivo optical imaging.

[Clarification of molecular targets of dioxin toxicity].

Effect of reverse photoperiod on in vitro regeneration and piperine production in *Piper nigrum* L.

Uptake and metabolic effects of salicylic acid on the pulvinar motor cells of *Mimosa pudica* L.

Alpha-lipoic acid protects oxidative stress, changes in cholinergic system and tissue histopathology during co-exposure to arsenic-dichlorvos in rats.

Sequestration, tissue distribution and developmental transmission of cyanogenic glucosides in a specialist insect herbivore.

Acute toxicity of a commercial glyphosate formulation on European sea bass juveniles (*Dicentrarchus labrax* L.): gene expressions of heme oxygenase-1 (ho-1), acetylcholinesterase (AChE) and aromatases (cyp19a and cyp19b).

Difference in developmental toxicity among structurally similar N-phenylimide herbicides in rats and rabbits.

Effect of a glyphosate-based herbicide in *Cyprinus carpio*: assessment of acetylcholinesterase activity, hematological responses and serum biochemical parameters.

A collection of glycosyltransferases from rice (*Oryza sativa*) exposed to atrazine.

High level of dioxin-TEQ in tissue is associated with Agent Orange exposure but not with biochemical recurrence after radical prostatectomy.

Accumulation, histopathological effects and response of biochemical markers in the spleens and head kidneys of common carp exposed to atrazine and chlorpyrifos.

The effects of acetaldehyde and acrolein on muscle catabolism in C2 myotubes.

Aldehyde reductase regulates acrolein-induced cytotoxicity in human small airway epithelial cells.

Atrazine is primarily responsible for the toxicity of long-term exposure to a combination of atrazine and inorganic arsenic in the nigrostriatal system of the albino rat.

Specific proteomic response of *Unio pictorum* mussel to a mixture of glyphosate and microcystin-LR.

Alterations in fatty acids of polar lipids in *Salmo trutta* on long-term exposure to a glyphosate-based herbicide (Roundup).

Using bosentan to treat paraquat poisoning-induced acute lung injury in rats.

Renal biomarkers predict nephrotoxicity after paraquat.

Evaluation of hydroxyatrazine in the endocrine disruptor screening and testing program's male and female pubertal protocols.

Inhibitory effects of rosiglitazone on paraquat-induced acute lung injury in rats.

Proteomic analysis of rat cerebral cortex following subchronic acrolein toxicity.

Effect of methylsulfonylmethane on paraquat-induced acute lung and liver injury in mice.

Levels of PCDDs, PCDFs, and dioxin-like PCBs in human milk among Hong Kong mothers.

Tissue concentration of paraquat on day 32 after intoxication and failed bridge to transplantation by extracorporeal membrane oxygenation therapy.

Effect of fluzifop-p-butyl treatment on pigments and polyamines level within tissues of non-target maize plants.

Agent Orange exposure and prevalence of self-reported diseases in Korean Vietnam veterans.

Comparative study on effects of dietary with diphenyl diselenide on oxidative stress in carp (*Cyprinus carpio*) and silver catfish (*Rhamdia* sp.) exposed to herbicide clomazone.

Transient effects of 2,4-dichlorophenoxyacetic acid (2,4-D) exposure on some metabolic and free radical processes in goldfish white muscle.

Short-term atrazine exposure causes behavioral deficits and disrupts monoaminergic systems in male C57BL/6 mice.

Changes in *Lumbriculus variegatus* metabolites under hypoxic exposure to benzo(a)pyrene, chlorpyrifos and pentachlorophenol: consequences on biotransformation.

The role of *Arabidopsis thaliana* NAR1, a cytosolic iron-sulfur cluster assembly component, in gametophytic gene expression and oxidative stress responses in vegetative tissue.

Epidemiology. Paths from pesticides to Parkinson's.

Glutathione deficiency in Gclm null mice results in complex I inhibition and dopamine depletion following paraquat administration.

Paraquat-induced ultrastructural changes and DNA damage in the nervous system is mediated via oxidative-stress-induced cytotoxicity in *Drosophila melanogaster*.

Quercetin exacerbates the effects of subacute treatment of atrazine on reproductive tissue antioxidant defence system, lipid peroxidation and sperm quality in rats.

Differential expression of acetohydroxyacid synthase genes in sunflower plantlets and its response to imazapyr herbicide.

Effects of atrazine and chlorpyrifos on the production of nitric oxide and expression of inducible nitric oxide synthase in the brain of common carp (*Cyprinus carpio* L.).

Docosahexaenoic acid (DHA) ameliorates paraquat-induced pulmonary fibrosis in rats possibly through up-regulation of Smad 7 and SnoN.

Hematological and biochemical alterations in the fish *Prochilodus lineatus* caused by the herbicide clomazone.

Exposure to 2,4-dichlorophenoxyacetic acid alters glucose metabolism in immature rat Sertoli cells.

Propanil-induced histopathological changes in the liver and kidney of mice.

Spinal transient receptor potential ankyrin 1 channel induces mechanical hypersensitivity, increases cutaneous blood flow, and mediates the pronociceptive action of dynorphin A.

[The relationship of endoplasmic reticulum stress with paraquat induced lung fibrosis in rats].

Mucuna pruriens seed extract reduces oxidative stress in nigrostriatal tissue and improves neurobehavioral activity in paraquat-induced Parkinsonian mouse model.

Dietary supplementation with *Lactobacillus fermentum* I5007 improves the anti-oxidative activity of weanling piglets challenged with diquat.

Oxidative stress in carp exposed to quinclorac herbicide under rice field condition.

Effects of chemical and handling exposure on fatty acids, oxidative stress and morphological welfare indicators in gilt-head sea bream (*Sparus aurata*).

[Effect of glyphosate on the energy exchange in carp organs].

[Effects of pyrrolidine dithiocarbamate on expressions of α -smooth muscle actin, integrin β 5 and fibronectin in acute paraquat poisoned rats].

Effects of glyphosate on cholinesterase activity of the mussel *Perna perna* and the fish *Danio rerio* and *Jenynsia multidentata*: in vitro studies.

Transcriptome alterations following developmental atrazine exposure in zebrafish are associated with disruption of neuroendocrine and reproductive system function, cell cycle, and carcinogenesis.

Bioactivation of the nasal toxicant 2,6-dichlorobenzonitrile: an assessment of metabolic activity in human nasal mucosa and identification of indicators of exposure and potential toxicity.

[Effect of thalidomide in a mouse model of paraquat-induced acute lung injury and the underlying mechanisms].

Ratios of biliary glutathione disulfide (GSSG) to glutathione (GSH): a potential index to screen drug-induced hepatic oxidative stress in rats and mice.

Protein profiling of paraquat-exposed rat lungs following treatment with Acai (*Euterpe oleracea* Mart.) berry extract.

Mutagenic/recombinogenic effects of four lipid peroxidation products in *Drosophila*.

The SFPT feels compelled to point out weaknesses in the paper by SÃ©ralini et al. (2012).

Severe adverse effects related to dermal exposure to a glyphosate-surfactant herbicide.

Acrolein-induced inflammatory signaling in vascular smooth muscle cells requires activation of serum response factor (SRF) and NF- κ B.

Recovery ability of common carp (*Cyprinus carpio*) after a short-term exposure to terbuthylazine.

Vitamin E ameliorates the decremental effect of paraquat on cardiomyocyte contractility in rats.

Daily subacute paraquat exposure decreases muscle function and substantia nigra dopamine level.

[Hypoxia-inducible factor-1 α expression in renal tissue of rats with paraquat poisoning].

[Intervention of pyrrolidine dithiocarbamate on expressions of connective tissue growth factor, type I collagen, and type III collagen in acute paraquat poisoned rats].

Involvement of interleukin-6-regulated nitric oxide synthase in hemorrhagic cystitis and impaired bladder contractions in young rats induced by acrolein, a urinary metabolite of cyclophosphamide.

Effects of atrazine and chlorpyrifos on the mRNA levels of HSP70 and HSC70 in the liver, brain, kidney and gill of common carp (*Cyprinus carpio* L.).

The antidote effect of quinone oxidoreductase 2 inhibitor against paraquat-induced toxicity in vitro and in vivo.

Cigarette smoke induces systemic defects in cystic fibrosis transmembrane conductance regulator function.

Fluridone as a new anti-inflammatory drug.

Antifibrotic effect of atorvastatin on paraquat-induced pulmonary fibrosis: role of PPAR γ receptors.

Protective effects of cinnamic acid and cinnamic aldehyde on isoproterenol-induced acute myocardial ischemia in rats.

Acrolein exposure suppresses antigen-induced pulmonary inflammation.

New insights in the pathogenesis of multiple sclerosis--role of acrolein in neuronal and myelin damage.

Anti-inflammatory effect of thalidomide in paraquat-induced pulmonary injury in mice.

Role of aldose reductase in the metabolism and detoxification of carnosine-acrolein conjugates.

European corn borer (*Ostrinia nubilalis*) induced responses enhance susceptibility in maize.

Expression and significance of HIF-1 α in pulmonary fibrosis induced by paraquat.

Extracts from black carrot tissue culture as potent anticancer agents.

Arsenic exposure from drinking water, arsenic methylation capacity, and carotid intima-media thickness in Bangladesh.

Minocycline, levodopa and MnTMPyP induced changes in the mitochondrial proteome profile of MPTP and maneb and paraquat mice models of Parkinson's disease.

The dose of cyclophosphamide for treating paraquat-induced rat lung injury.

Wnt/ β -catenin signaling protects mouse liver against oxidative stress-induced apoptosis through the inhibition of forkhead transcription factor FoxO3.

Synthesis and biological evaluation of novel styryl benzimidazole derivatives as probes for imaging of neurofibrillary tangles in Alzheimer's disease.

Acrolein-conjugated low-density lipoprotein induces macrophage foam cell formation.

Central nervous system damage due to acute paraquat poisoning: an experimental study with rat model.

The ultra-early protective effect of ulinastatin on rabbit acute lung injury induced by paraquat.

Combined treatment with bone marrow mesenchymal stem cells and methylprednisolone in paraquat-induced acute lung injury.

Paraquat inhibits cell viability via enhanced oxidative stress and apoptosis in human neural progenitor cells.

Estimation of placental and lactational transfer and tissue distribution of atrazine and its main metabolites in rodent dams, fetuses, and neonates with physiologically based pharmacokinetic modeling.

Repair kinetics of acrolein- and (E)-4-hydroxy-2-nonenal-derived DNA adducts in human colon cell extracts.

In vivo absorption, distribution, excretion, and metabolism of a new herbicide, methiozolin, in rats following oral administration.

[Study on the optimum combinations of plant hormone in callus culture of *Thermopsis lanceolata*].

An efficient and rapid regeneration via multiple shoot induction from mature seed derived embryogenic and organogenic callus of Indian maize (*Zea mays* L.).

[Distribution of arsenic species and its DNA damage in subchronic arsenite-exposed mice].

Participation of nitric oxide pathway in the relaxation response induced by E-cinnamaldehyde oxime in superior mesenteric artery isolated from rats.

Post-translational control of nitrate reductase activity responding to light and photosynthesis evolved already in the early vascular plants.

Predicting pesticide attenuation in a fractured aquifer using lumped-parameter models.

Differential regulation of GLUT1 activity in human corneal limbal epithelial cells and fibroblasts.

The response of *Mucor plumbeus* to pentachlorophenol: a toxicoproteomics study.

Atrazine inhibits pulsatile gonadotropin-releasing hormone (GnRH) release without altering GnRH messenger RNA or protein levels in the female rat.

Effect of chronic exposure to prometryne on oxidative stress and antioxidant response in common carp (*Cyprinus carpio* L.).

Effects of cyanamide, an aldehyde dehydrogenase type 2 inhibitor, on glyceryl trinitrate- and isosorbide dinitrate-induced vasodilation in rabbit excised aorta and in anesthetized whole animal.

Fluorescent transgenic zebrafish Tg(nkx2.2a:mEGFP) provides a highly sensitive monitoring tool for neurotoxins.

Letter to the editor regarding "Quantification of paraquat, MPTP, and MPP+ in brain tissue using microwave-assisted solvent extraction (MASE) and high-performance liquid chromatography-mass spectrometry".

Arsenic augments the uptake of oxidized LDL by upregulating the expression of lectin-like oxidized LDL receptor in mouse aortic endothelial cells.

Singlet oxygen mediated DNA damage induced phototoxicity by ketoprofen resulting in mitochondrial depolarization and lysosomal destabilization.

Novel whole-tissue quantitative assay of nitric oxide levels in *Drosophila* neuroinflammatory response.

Induction of thymic stromal lymphopoietin production by nonanoic acid and exacerbation of allergic inflammation in mice.

Tl(+) induces both cationic and transition pore permeability in the inner membrane of rat heart mitochondria.

New insights to the role of aryl hydrocarbon receptor in bone phenotype and in dioxin-induced modulation of bone microarchitecture and material properties.

Reversal of hypertriglyceridemia, fatty liver disease, and insulin resistance by a liver-targeted mitochondrial uncoupler.

Spatiotemporal alterations in Sprouty-2 expression and tyrosine phosphorylation in nitrofen-induced pulmonary hypoplasia.

Kidney hypoxia, attributable to increased oxygen consumption, induces nephropathy independently of hyperglycemia and oxidative stress.

Expression of Sproutys and SPREDs is decreased during lung branching morphogenesis in nitrofen-induced pulmonary hypoplasia.

Aryl hydrocarbon receptor and experimental autoimmune arthritis.

Protein-bound uremic toxins are new targets to prevent insulin resistance and dysmetabolism in patients with chronic kidney disease.

Maintaining energy homeostasis is an essential component of Wld(S)-mediated axon protection.

Ets1 and heat shock factor 1 regulate transcription of the Transformer 2¹² gene in human colon cancer cells.

Association between blood levels of PCDDs/PCDFs/dioxin-like PCBs and history of allergic and other diseases in the Japanese population.

Death receptor 6 (DR6) antagonist antibody is neuroprotective in the mouse SOD1G93A model of amyotrophic lateral sclerosis.

MicroRNA-132 suppresses autoimmune encephalomyelitis by inducing cholinergic anti-inflammation: a new Ahr-based exploration.

Indolic uremic solutes increase tissue factor production in endothelial cells by the aryl hydrocarbon receptor pathway.

Expression of zinc-deficient human superoxide dismutase in Drosophila neurons produces a locomotor defect linked to mitochondrial dysfunction.

Cytologic and histologic findings of iron pill-induced injury of the lower respiratory tract.

Impairment of autophagy: from hereditary disorder to drug intoxication.

Persistent organic pollutants and hyperuricemia in the U.S. general population.

Early dioxin exposure causes toxic effects in adult zebrafish.

The effect of partial outlet obstruction on calpain and phospholipase-2 activities: analyzed by severity and duration.

Relative efficacies of insulin and poly (lactic-co-glycolic) acid encapsulated nano-insulin in modulating certain significant biomarkers in arsenic intoxicated L6 cells.

Arsenic induced toxicity and histopathological changes in gill and liver tissue of freshwater fish, tilapia (*Oreochromis mossambicus*).

Propolis alleviates 2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced histological changes, oxidative stress and DNA damage in rat liver.

Mitochondrial respiratory chain dysfunction modulates metalloproteases -1, -3 and -13 in human normal chondrocytes in culture.

Downregulated bone morphogenetic protein signaling in nitrofen-induced congenital diaphragmatic hernia.

Disruption of the bone morphogenetic protein receptor 2 pathway in nitrofen-induced congenital diaphragmatic hernia.

Proteomic analysis of primary cultured rat cortical neurons in chemical ischemia.

Beneficial effect of astaxanthin on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced liver injury in rats.

Relationship between the autoantibody and expression of β ²-adrenoceptor in lung and heart.

Smoke carcinogens cause bone loss through the aryl hydrocarbon receptor and induction of Cyp1 enzymes.

Hyperuricemia after exposure to polychlorinated dibenzo-p-dioxins and dibenzofurans near a highly contaminated area.

Evaluation of the association between persistent organic pollutants (POPs) and diabetes in epidemiological studies: a national toxicology program workshop review.

Antioxidant and micronutrient-rich milk formula reduces lead poisoning and related oxidative damage in lead-exposed mice.

Skeletal muscle ryanodine receptor mutations associated with malignant hyperthermia showed enhanced intensity and sensitivity to triggering drugs when expressed in human embryonic kidney cells.

Novel cell-based assay reveals associations of circulating serum AhR-ligands with metabolic syndrome and mitochondrial dysfunction.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced inflammatory activation is mediated by intracellular free calcium in microglial cells.

Aberrant pulmonary lymphatic development in the nitrofen mouse model of congenital diaphragmatic hernia.

The aryl hydrocarbon receptor and food allergy.

The roles of aryl hydrocarbon receptor in immune responses.

Cell death pattern of a varicose vein organ culture model.

The human Ah receptor: hints from dioxin toxicities to deregulated target genes and physiological functions.

Expression and potential role of apolipoprotein D on the death-survival balance of human colorectal cancer cells under oxidative stress conditions.

Metabolism of arsenic and its toxicological relevance.

Epigenetics and pesticides.

Nerve growth factor exhibits an antioxidant and an autocrine activity in mouse liver that is modulated by buthionine sulfoximine, arsenic, and acetaminophen.

Deletion or activation of the aryl hydrocarbon receptor alters adult hippocampal neurogenesis and contextual fear memory.

Sodium arsenite-induced cardiotoxicity in rats: protective role of p-coumaric acid, a common dietary polyphenol.

Gastrointestinal stromal tumors, somatic mutations and candidate genetic risk variants.

Ethylendioxy-PIP2 oxalate reduces ganglioside storage in juvenile Sandhoff disease mice.

p-Cresyl sulfate causes renal tubular cell damage by inducing oxidative stress by activation of NADPH oxidase.

Dioxin receptor expression inhibits basal and transforming growth factor β^2 -induced epithelial-to-mesenchymal transition.

Role of hepatic and pancreatic oxidative stress in arsenic induced diabetic condition in Wistar rats.

Amniotic lamellar body count and congenital diaphragmatic hernia in humans and in a rat model.

Native fluorescence spectra of human cancerous and normal breast tissues analyzed with non-negative constraint methods.

Pesticides, microglial NOX2, and Parkinson's disease.

Intrarenal metabolomic investigation of chronic kidney disease and its TGF- β^1 mechanism in induced-adenine rats using UPLC Q-TOF/HSMS/MS(E).

Arsenic increases Pi-mediated vascular calcification and induces premature senescence in vascular smooth muscle cells.

An update on uremic toxins.

Methane biogenesis during sodium azide-induced chemical hypoxia in rats.

CD44v6 expression in human skin keratinocytes as a possible mechanism for carcinogenesis associated with chronic arsenic exposure.

Trichosanthes dioica root alleviates arsenic induced myocardial toxicity in rats.

Dynamics of organohalogenated contaminants in human serum from obese individuals during one year of weight loss treatment.

The role of aryl hydrocarbon receptor-regulated cytochrome P450 enzymes in glioma.

[Molecular mechanisms for uremic toxin-induced oxidative tissue damage via a cardiovascular-renal connection].

Increased kidney metabolism as a pathway to kidney tissue hypoxia and damage: effects of triiodothyronine and dinitrophenol in normoglycemic rats.

Occurrence of disseminated intravascular coagulation in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced pneumonia in the rat.

A genetically encoded FRET lactate sensor and its use to detect the Warburg effect in single cancer cells.

Warburg and Crabtree effects in premalignant Barrett's esophagus cell lines with active mitochondria.

Effect of nitrofen in the final stages of development of the diaphragm muscle in rats.

KML001 displays vascular disrupting properties and irinotecan combined antitumor activities in a murine tumor model.

Oculomotor deficits in aryl hydrocarbon receptor null mouse.

p-Cresyl sulfate promotes insulin resistance associated with CKD.

Increased activation of NADPH oxidase 4 in the pulmonary vasculature in experimental diaphragmatic hernia.

Arsenic and arsenic species in cultured oyster (*Crassostrea gigas* and *C. corteziensis*) from coastal lagoons of the SE Gulf of California, Mexico.

Estimation of the enamel and dentin mineral content from the refractive index.

Sequence capture and massively parallel sequencing to detect mutations associated with malignant hyperthermia.

Inhibition of neurite outgrowth and alteration of cytoskeletal gene expression by sodium arsenite.

TCDD-elicited effects on liver, serum, and adipose lipid composition in C57BL/6 mice.

Delayed temporal increase of hepatic Hsp70 in ApoE knockout mice after prenatal arsenic exposure.

Timing and expression of the angiotensin-1-Tie-2 pathway in murine lung development and congenital diaphragmatic hernia.

Comparison of destructive periodontal disease in blue iris mink to PCB 126-induced mandibular and maxillary squamous epithelial proliferation in natural dark mink.

Protective effects of protocatechuic acid on TCDD-induced oxidative and histopathological damage in the heart tissue of rats.

Sodium arsenite induced reactive oxygen species generation, nuclear factor (erythroid-2 related) factor 2 activation, heme oxygenase-1 expression, and glutathione elevation in Chang human hepatocytes.

Inhibition of hepatocyte nuclear factor 1 and 4 alpha (HNF1 α and HNF4 α) as a mechanism of arsenic carcinogenesis.

Surface fluorescence studies of tissue mitochondrial redox state in isolated perfused rat lungs.

AhR-mediated changes in global gene expression in rat liver progenitor cells.

Toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the peripheral nervous system of developing red seabream (*Pagrus major*).

Molecular cloning, expression and oxidative stress response of a mitochondrial thioredoxin peroxidase gene (AccTpx-3) from *Apis cerana cerana*.

TCDD inhibits heart regeneration in adult zebrafish.

In vitro propagation and production of cardiogenic glycosides in shoot cultures of *Digitalis purpurea* L. by elicitation and precursor feeding.

Oxysterols modulate calcium signalling in the A7r5 aortic smooth muscle cell-line.

Expression of PiABP19, Picdc2 and PiSERK3 during induction of somatic embryogenesis in leaflets of *Prunus incisa* (Thunb.).

Investigation of ifosfamide nephrotoxicity induced in a liver-kidney co-culture biochip.

Chromatographic behaviour predicts the ability of potential nootropics to permeate the blood-brain barrier.

Harmine and harmaline downregulate TCDD-induced Cyp1a1 in the livers and lungs of C57BL/6 mice.

Imaging imidazole-12 binding sites in porcine brain using 11C-BU99008.

Aldo-keto reductases mediate constitutive and inducible protection against aldehyde toxicity in human neuroblastoma SH-SY5Y cells.

Impact of 2,3,7,8-tetrachlorodibenzo-p-dioxin on cutaneous wound healing.

The synthesis and biodistribution of [(11)C]metformin as a PET probe to study hepatobiliary transport mediated by the multi-drug and toxin extrusion transporter 1 (MATE1) in vivo.

[Classical oxazaphosphorines--metabolism and therapeutic properties--new implications].

Demonstration of ATP-dependent, transcellular transport of lipid across the lymphatic endothelium using an in vitro model of the lacteal.

Neuroglobin involvement in the course of arsenic toxicity in rat cerebellar granule neurons.

The osteogenic response of mesenchymal stem cells to an injectable PLGA bone regeneration system.

Structure-activity relationship of selected meta- and para-hydroxylated non-dioxin like polychlorinated biphenyls: from single RyR1 channels to muscle dysfunction.

Biomonitoring of non-dioxin-like polychlorinated biphenyls in transgenic *Arabidopsis* using the mammalian pregnane X receptor system: a role of pectin in pollutant uptake.

2,4-Dinitrophenol induces neural differentiation of murine embryonic stem cells.

Differential influences of various arsenic compounds on antioxidant defense system in liver and kidney of rats.

Disruption of aryl hydrocarbon receptor homeostatic levels during embryonic stem cell differentiation alters expression of homeobox transcription factors that control cardiomyogenesis.

Gastrointestinal stromal tumors: a case-only analysis of single nucleotide polymorphisms and somatic mutations.

Novel Fluorometric Tool to Assess Mitochondrial Redox State of Isolated Perfused Rat Lungs after Exposure to Hyperoxia.

Knockout of the aryl hydrocarbon receptor results in distinct hepatic and renal phenotypes in rats and mice.

Assessment of somatic embryogenesis potency in Indian soybean [*Glycine max* (L.) Merr.] cultivars.

p-Cresyl sulfate induces osteoblast dysfunction through activating JNK and p38 MAPK pathways.

Structure-activity relationship of non-coplanar polychlorinated biphenyls toward skeletal muscle ryanodine receptors in rainbow trout (*Oncorhynchus mykiss*).

Interaction of aldehydes derived from lipid peroxidation and membrane proteins.

NDL-PCBs in muscle of the European catfish (*Silurus glanis*): an alert from Italian rivers.

Acute toxicity of some synthetic cyanogens in rats: time-dependent cyanide generation and cytochrome oxidase inhibition in soft tissues after sub-lethal oral intoxication.

Evaluating effects of penicillin treatment on the metabolome of rats.

Radiosynthesis and evaluation of new α -adrenoceptor antagonists as PET radioligands for brain imaging.

Transplantation of induced pluripotent stem cells without C-Myc attenuates retinal ischemia and reperfusion injury in rats.

Cell to organ: physiological, immunotoxic and oxidative stress responses of *Lamellidens marginalis* to inorganic arsenite.

Relative effect potency estimates of dioxin-like activity for dioxins, furans, and dioxin-like PCBs in adults based on two thyroid outcomes.

Modulation of cytochrome P450 1 (Cyp1) by vanadium in hepatic tissue and isolated hepatocyte of C57BL/6 mice.

Tissue distribution of dioxin-like compounds: potential impacts on systemic relative potency estimates.

Skeletal muscle-specific T-tubule protein STAC3 mediates voltage-induced Ca²⁺ release and contractility.

Metformin increases mitochondrial energy formation in L6 muscle cell cultures.

Microbial-mammalian cometabolites dominate the age-associated urinary metabolic phenotype in Taiwanese and American populations.

Polychlorodibenzodioxin and -furan and dioxin-like polychlorobiphenyl distribution in tissues and dairy products of dairy buffaloes.

Dioxin-like compounds and bone quality in Cree women of Eastern James Bay (Canada): a cross-sectional study.

A potential gravity-sensing role of vascular smooth muscle cell glycocalyx in altered gravitational stimulation.

Differential regulation of Arabidopsis plastid gene expression and RNA editing in non-photosynthetic tissues.

Sex differences in the accumulation of chlorinated dioxins in the cormorant (*Phalacrocorax carbo*): implication of hepatic sequestration in the maternal transfer.

Sepiapterin reductase mediates chemical redox cycling in lung epithelial cells.

Persistent toxic burdens of halogenated phenolic compounds in humans and wildlife.

Cyp1a reporter zebrafish reveals target tissues for dioxin.

The role of p38 in mitochondrial respiration in male and female mice.

Oral administration of hesperidin, a citrus flavonone, in rats counteracts the oxidative stress, the inflammatory cytokine production, and the hepatotoxicity induced by the ingestion of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

The fixation effect of a silk fibroin-bacterial cellulose composite plate in segmental defects of the zygomatic arch: an experimental study.

Use of a highly sensitive recombinant hepatoma cell method to determine dioxin concentrations in samples of fish and crab from a hotspot area.

Dietary carnosine prevents early atherosclerotic lesion formation in apolipoprotein E-null mice.

Dietary exposure of juvenile female mice to polyhalogenated seafood contaminants (HBCD, BDE-47, PCB-153, TCDD): comparative assessment of effects in potential target tissues.

Altering HIF-1 α through 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure affects coronary vessel development.

Cold response of dedifferentiated barley cells at the gene expression, hormone composition, and freezing tolerance levels: studies on callus cultures.

High efficiency secondary somatic embryogenesis in *Hovenia dulcis* Thunb. through solid and liquid cultures.

Two-photon microscopy and fluorescence lifetime imaging of retinal pigment epithelial cells under oxidative stress.

Loss of Neil3, the major DNA glycosylase activity for removal of hydantoins in single stranded DNA, reduces cellular proliferation and sensitizes cells to genotoxic stress.

Influence of cyclic mechanical stretch and tissue constraints on cellular and collagen alignment in fibroblast-derived cell sheets.

Increased polyamines alter chromatin and stabilize autoantigens in autoimmune diseases.

Critical role of aldehydes in cigarette smoke-induced acute airway inflammation.

Early membrane events induced by salicylic acid in motor cells of the *Mimosa pudica* pulvinus.

Accumulation and half-lives of 13 pesticides in muscle tissue of freshwater fishes through food exposure.

Synthesis and bioevaluation of $[(18)\text{F}]4\text{-fluoro-}m\text{-hydroxyphenethylguanidine}$ ($[(18)\text{F}]4\text{F-MHPG}$): a novel radiotracer for quantitative PET studies of cardiac sympathetic innervation.

Advances in thin tissue Golgi-Cox impregnation: fast, reliable methods for multi-assay analyses in rodent and non-human primate brain.

Detection of pesticides and dioxins in tissue fats and rendering oils using laser-induced breakdown spectroscopy (LIBS).

High temperature injury and auxin biosynthesis in microsporogenesis.

Pulmonary GLP-1 receptor increases at birth and exogenous GLP-1 receptor agonists augmented surfactant-protein levels in litters from normal and nitrofen-treated pregnant rats.

Toxicokinetics of dioxins and other organochlorine compounds in Japanese people: association with hepatic CYP1A2 expression levels.

Cortical microtubule arrays are initiated from a nonrandom prepattern driven by atypical microtubule initiation.

Ecotoxicity and risk to human fish consumers of polychlorinated biphenyls in fish near the Hanford Site (USA).

Histopathological changes induced by paraquat on some tissues of gourami fish (*Trichogaster trichopterus*).

Ameliorative Effects of Acacia Honey against Sodium Arsenite-Induced Oxidative Stress in Some Viscera of Male Wistar Albino Rats.

Human adipose tissue derived stem cells promote liver regeneration in a rat model of toxic injury.

In vitro effects of TCDD, PCB126 and PCB153 on estrogen receptors, caspases and metalloproteinase-2 mRNA expression in the chicken shell gland.

Glutathione in multiple sclerosis.

A Systematic Review of Carcinogenic Outcomes and Potential Mechanisms from Exposure to 2,4-D and MCPA in the Environment.

A new experimental model of ATP-sensitive K^+ channel-independent insulinotropic action of glucose: a permissive role of cAMP for triggering of insulin release from rat pancreatic β -cells.

In vitro propagation of ash (*Fraxinus excelsior* L.) by somatic embryogenesis.

A novel murine model to deplete hepatic stellate cells uncovers their role in amplifying liver damage in mice.

Paraquat-induced pulmonary fibrosis starts at an early stage of inflammation in rats.

Dysregulated expression of secretogranin III is involved in neurotoxin-induced dopaminergic neuron apoptosis.

Cigarette smoke and its component acrolein augment IL-8/CXCL8 mRNA stability via p38 MAPK/MK2 signaling in human pulmonary cells.

Biochemical and histological evaluation of kidney damage after sub-acute exposure to 2,4-dichlorophenoxyacetic herbicide in rats: involvement of oxidative stress.

Chaperone heat shock protein 90 mobilization and hydralazine cytoprotection against acrolein-induced carbonyl stress.

Atrazine promotes biochemical changes and DNA damage in a Neotropical fish species.

Effects of bioreactive acrolein from automotive exhaust gases on human cells in vitro.

Activation of transcription factor MEF2D by bis(3)-cognitin protects dopaminergic neurons and ameliorates Parkinsonian motor defects.

Asymmetric patterns in the cranial skeleton of zebrafish (*Danio rerio*) exposed to sodium pentachlorophenate at different embryonic developmental stages.

Nrf2 protects against diquat-induced liver and lung injury.

[Experimental study on the therapeutic effect of C-phycoerythrin against pulmonary fibrosis induced by paraquat in rats].

Antioxidant effects of selenium on lung injury in paraquat intoxicated rats.

Pathological and toxicological findings in glyphosate-surfactant herbicide fatality: a case report.

Acute exposure of a glyphosate-based herbicide affects the gills and liver of the Neotropical fish, *Piaractus mesopotamicus*.

HRMAS NMR as a tool to study metabolic responses in heart clam *Ruditapes decussatus* exposed to Roundup®.

Investigating the impact of chronic atrazine exposure on sexual development in zebrafish.

The effects of diphenyl diselenide on oxidative stress biomarkers in *Cyprinus carpio* exposed to herbicide quinclorac (Facet®).

siRNA-mediated knock-down of NOX3: therapy for hearing loss?

Histopathological changes and antioxidant response in brain and kidney of common carp exposed to atrazine and chlorpyrifos.

Efficacy of vitamin C against liver and kidney damage induced by paraquat toxicity.

Early formation of GABAergic synapses governs the development of adult-born neurons in the olfactory bulb.

[Expression of the 4-hydroxynonenal in lung tissue in rats with paraquat poisoned and the effect of ulinastatin].

[Effects of ulinastatin on myocardial injury induced by acute paraquat poisoning].

Bark extract of *Bathysa cuspidata* attenuates extra-pulmonary acute lung injury induced by paraquat and reduces mortality in rats.

Characterization of endocrine-disrupting chemicals based on hormonal balance disruption in male and female adult rats.

[Associations of exposure to dioxins and polychlorinated biphenyls with diabetes: based on epidemiological findings].

Effects of in vivo chronic exposure to pendimethalin/Prowl 400[®] on sanitary status and the immune system in rainbow trout (*Oncorhynchus mykiss*).

[Paraquat poisoning. Case report and overview].

Resveratrol potentiates cytochrome P450 2 d22-mediated neuroprotection in maneb- and paraquat-induced parkinsonism in the mouse.

[The relationship between HIF-1 α expression and the early lung fibrosis in rats with acute paraquat poisoning].

Glyphosate-induced stiffening of HaCaT keratinocytes, a Peak Force Tapping study on living cells.

Early cytotoxic and genotoxic effects of atrazine on Wistar rat liver: a morphological, immunohistochemical, biochemical, and molecular study.

Toxic effects of pentachlorophenol, azinphos-methyl and chlorpyrifos on the development of *Paracentrotus lividus* embryos.

[Presentation of a case of Paraquat poisoning].

[The experimental study of therapeutical effects of KANGFUXINYE on upper gastrointestinal injury induced by paraquat in rats].

[Experimental anticoagulant therapy of acute lung injury induced by paraquat].

Effects of short-term sodium chlorate exposure on pigs.

Effect of chronic exposure to simazine on oxidative stress and antioxidant response in common carp (*Cyprinus carpio* L.).

Effects of atrazine and chlorpyrifos on activity and transcription of glutathione S-transferase in common carp (*Cyprinus carpio* L.).

Toxicity of pentachlorophenol to native aquatic species in the Yangtze River.

[Effects of hemoperfusion on oxidative stress, matrix metalloproteinases and their inhibitors in acute paraquat poisoning rabbits].

Hypercholesterolemia and oxidative stress inhibit endothelial cell healing after arterial injury.

Inhibition of TDP-43 accumulation by bis(thiosemicarbazonato)-copper complexes.

Acrolein induces endoplasmic reticulum stress and causes airspace enlargement.

Concordant signaling pathways produced by pesticide exposure in mice correspond to pathways identified in human Parkinson's disease.

Toxicity evaluation of glyphosate agrochemical components using Japanese medaka (*Oryzias latipes*) and DNA microarray gene expression analysis.

Paraquat, but not maneb, induces synucleinopathy and tauopathy in striata of mice through inhibition of proteasomal and autophagic pathways.

4-iodophenyl isothiocyanate: a neuroprotective compound.

Hypolipidemic and antioxidant activities of virgin olive oil and its fractions in 2,4-dichlorophenoxyacetic acid-treated rats.

Proteomic analysis of hepatic tissue in adult female zebrafish (*Danio rerio*) exposed to atrazine.

Tissue biochemical alterations of *Cyprinus carpio* exposed to commercial herbicide containing clomazone under rice-field conditions.

[Effect of subchronic realgar exposure on Glu and Gln in infant rat brain].

Transient receptor potential channels mediate the tussive response to prostaglandin E2 and bradykinin.

Antihyperglycemic and antihyperlipidemic action of cinnamaldehyde in C57BLKS/J db/db mice.

Aminotriazole attenuated carbon tetrachloride-induced oxidative liver injury in mice.

In vitro induction of tetraploid garlic with trifluralin.

[Effect of acrolein exposure on the percentage of CD4⁺CD25⁺ regulatory T cells and expression of transcription factor Foxp3 in asthmatic rats].

Monoclonal antibody against protein-bound glutathione: use of glutathione conjugate of acrolein-modified proteins as an immunogen.

TRPA1 is functionally expressed in melanoma cells but is not critical for impaired proliferation caused by allyl isothiocyanate or cinnamaldehyde.

Inverse correlation between stroke and urinary 3-hydroxypropyl mercapturic acid, an acrolein-glutathione metabolite.

Effect of cigarette smoking on cough reflex induced by TRPV1 and TRPA1 stimulations.

mIGF-1/JNK1/SirT1 signaling confers protection against oxidative stress in the heart.

2-methoxycinnamaldehyde from *Cinnamomum cassia* reduces rat myocardial ischemia and reperfusion injury in vivo due to HO-1 induction.

Ingestion of cinnamaldehyde, a TRPA1 agonist, reduces visceral fats in mice fed a high-fat and high-sucrose diet.

Methylglyoxal activates the human transient receptor potential ankyrin 1 channel.

[Effect on different concentrations of exogenous hormones on baicalin in *Scutellaria baicalensis* callus].

Plants as biofactories: glyphosate-induced production of shikimic acid and phenolic antioxidants in wounded carrot tissue.

Reactive carbonyl compounds (RCCs) cause aggregation and dysfunction of fibrinogen.

Comparative computational modeling of airflows and vapor dosimetry in the respiratory tracts of rat, monkey, and human.

Effects of auxins on the production of steroidal alkaloids in rapidly proliferating tissue and cell cultures of *Solanum lyratum*.

The combination of quantitative PCR and western blot detecting CP4-EPSPS component in Roundup Ready soy plant tissues and commercial soy-related foodstuffs.

Development of *Agrobacterium*-mediated transformation technology for mature seed-derived callus tissues of indica rice cultivar IR64.

A lung dosimetry model of vapor uptake and tissue disposition.

TRPA1 is functionally expressed primarily by IB4-binding, non-peptidergic mouse and rat sensory neurons.

Increased expression of SVCT2 in a new mouse model raises ascorbic acid in tissues and protects against paraquat-induced oxidative damage in lung.

Hydrogen peroxide enhances vasodilatation by increasing dimerization of cGMP-dependent protein kinase type II \pm .

Determination of tissue to blood partition coefficients for nonvolatile herbicides, insecticides, and fungicides using negligible depletion solid-phase microextraction (nd-SPME) and ultrafiltration.

Combinatorial genetic transformation of cereals and the creation of metabolic libraries for the carotenoid pathway.

Limited uptake, translocation and enhanced metabolic degradation contribute to glyphosate tolerance in *Mucuna pruriens* var. utilis plants.

Quinclorac resistance: a concerted hormonal and enzymatic effort in *Echinochloa phyllopogon*.

The cyclophosphamide metabolite, acrolein, induces cytoskeletal changes and oxidative stress in Sertoli cells.

Mitochondrial function is involved in regulation of cholesterol efflux to apolipoprotein (apo)A-I from murine RAW 264.7 macrophages.

Differentially expressed genes and pathways induced by organophosphates in human neuroblastoma cells.

Environmental toxicants as extrinsic epigenetic factors for parkinsonism: studies employing transgenic *C. elegans* model.

Silibinin ameliorates arsenic induced nephrotoxicity by abrogation of oxidative stress, inflammation and apoptosis in rats.

Activation of the aryl hydrocarbon receptor reduces the number of precursor and effector T cells, but preserves thymic CD4+CD25+Foxp3+ regulatory T cells.

Tryptophan catabolism in cancer: beyond IDO and tryptophan depletion.

Invited review: Efficacy, metabolism, and toxic responses to chlorate salts in food and laboratory animals.

Lack of an association human dioxin detoxification gene polymorphisms with endometriosis in Japanese women: results of a pilot study.

Ameliorating effects of quercetin and chrysin on 2,3,7,8-tetrachlorodibenzo- p-dioxin-induced nephrotoxicity in rats.

Telmisartan treatment attenuates arsenic-induced hepatotoxicity in mice.

NADPH oxidase 1 mediates α -synucleinopathy in Parkinson's disease.

Background exposure to persistent organic pollutants predicts stroke in the elderly.

Biomarkers spectral subspace for cancer detection.

[Chronic central nervous system effects of pesticides: state-of-the-art].

Prenatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin produces alterations in cortical neuron development and a long-term dysfunction of glutamate transmission in rat cerebral cortex.

Progesterone-dependent regulation of endometrial cannabinoid receptor type 1 (CB1-R) expression is disrupted in women with endometriosis and in isolated stromal cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Exposure to environmental toxins and the risk of sporadic motor neuron disease: an expanded Australian case-control study.

Development of brucine-loaded microsphere/thermally responsive hydrogel combination system for intra-articular administration.

Suicidal sodium azide intoxication: An analytical challenge based on a rare case.

Mild uncoupling of respiration and phosphorylation as a mechanism providing nephro- and neuroprotective effects of penetrating cations of the SkQ family.

Synergistic effects of tributyltin and 2,3,7,8-tetrachlorodibenzo-p-dioxin on differentiating osteoblasts and osteoclasts.

Ameliorative effect of docosahexaenoic acid on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced histological changes, oxidative stress, and DNA damage in rat liver.

Inactivation of the sodA gene of *Streptococcus suis* type 2 encoding superoxide dismutase leads to reduced virulence to mice.

Optimization of a histopathological biomarker for sphingomyelin accumulation in acid sphingomyelinase deficiency.

Intracellular accumulation of bilirubin as a defense mechanism against increased oxidative stress.

In vivo regulation of the heme oxygenase-1 gene in humanized transgenic mice.

Curcumin encapsulated in chitosan nanoparticles: a novel strategy for the treatment of arsenic toxicity.

Oxidative stress fuels *Trypanosoma cruzi* infection in mice.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces a proteomic pattern that defines cleft palate formation in mice.

Progesterone receptor is involved in 2,3,7,8-tetrachlorodibenzo-p-dioxin-stimulated breast cancer cells proliferation.

Pax3 gene expression is not altered during diaphragmatic development in nitrofen-induced congenital diaphragmatic hernia.

Pesticide exposure and amyotrophic lateral sclerosis.

Octanoate and nonanoate oxidation increases 50-80% over the first two days of life in piglet triceps brachii and gracilis muscle strips.

Sensitivity to dioxin decreases as zebrafish mature.

Comparative study of hypocholesterolemic and hypolipidemic effects of conjugated linolenic acid isomers against induced biochemical perturbations and aberration in erythrocyte membrane fluidity.

Adipose tissue and bone marrow-derived stem cells react similarly in an ischaemia-like microenvironment.

Quercetin prevents 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced testicular damage in rats.

Oxidation of low-density lipoprotein by iron at lysosomal pH: implications for atherosclerosis.

Aryl hydrocarbon receptor-mediated induction of EBV reactivation as a risk factor for Sjögren's syndrome.

Treatment with endotracheal therapeutics after sarin microinstillation inhalation exposure increases blood cholinesterase levels in guinea pigs.

An arabinoxylan-rich fraction from wheat enhances caecal fermentation and protects colonocyte DNA against diet-induced damage in pigs.

A novel method for the rapid determination of beta-amyloid toxicity on acute hippocampal slices using MTT and LDH assays.

[Plummer-Vinson syndrome: report of a case and review of literature].

A phytochemical approach to experimental metabolic syndrome-associated renal damage and oxidative stress.

β -catenin expression in areca quid chewing-associated oral squamous cell carcinomas and upregulated by arecoline in human oral epithelial cells.

Inflammatory pathway genes belong to major targets of persistent organic pollutants in adipose cells.

A unique library of myogenic cells from facioscapulohumeral muscular dystrophy subjects and unaffected relatives: family, disease and cell function.

Two different dosing regimens of human recombinant erythropoietin beta during preoperative autologous blood donation in patients having hip arthroplasty.

Fertile transgenic *Brachiaria ruziziensis* (ruzigrass) plants by particle bombardment of tetraploidized callus.

Requirement of matrix metalloproteinase-1 for intestinal homeostasis in the adult *Drosophila* midgut.

Induction of mitochondrial uncoupling enhances VEGF β , α , ϵ but reduces MCP-1 release in mature 3T3-L1 adipocytes: possible regulatory mechanism through endogenous ER stress and AMPK-related pathways.

Establishment of an in vitro regeneration system for genetic transformation of selected sugarcane genotypes.

[Metabonomic study on protective effect of ethanol extracts of *drynariae rhizoma* on osteoporosis in rats urine by using UPLC-MS/MS].

Sarcoplasmic reticulum Ca²⁺ permeation explored from the lumen side in mdx muscle fibers under voltage control.

Plant expression, lyophilisation and storage of HBV medium and large surface antigens for a prototype oral vaccine formulation.

Subacute arsenic exposure through drinking water reduces the pharmacodynamic effects of ketoprofen in male rats.

Uncoupling oxidative phosphorylation with 2,4-dinitrophenol promotes development of the adhesion phenotype.

Polychlorinated biphenyl congeners that increase the glucuronidation and biliary excretion of thyroxine are distinct from the congeners that enhance the serum disappearance of thyroxine.

Hepatoprotective role and antioxidant capacity of selenium on arsenic-induced liver injury in rats.

Defective pulmonary innervation and autonomic imbalance in congenital diaphragmatic hernia.

Iron depletion and repletion with ferrous sulfate or electrolytic iron modifies the composition and metabolic activity of the gut microbiota in rats.

Nitrofen interferes with trophoblastic expression of retinol-binding protein and transthyretin during lung morphogenesis in the nitrofen-induced congenital diaphragmatic hernia model.

Up-regulation of osteopontin expression by aryl hydrocarbon receptor via both ligand-dependent and ligand-independent pathways in lung cancer.

Glutathione-deficient mice are susceptible to TCDD-Induced hepatocellular toxicity but resistant to steatosis.

[Antiangiogenic and antitumor properties of cartilage].

Executive function deficits and social-behavioral abnormality in mice exposed to a low dose of dioxin in utero and via lactation.

Global DNA methylation not increased in chronic hemodialysis patients: a case-control study.

Quantitative proteomic analyses of cerebrospinal fluid using iTRAQ in a primate model of iron deficiency anemia.

A novel MYOC heterozygous mutation identified in a Chinese Uygur pedigree with primary open-angle glaucoma.

Coupled nitric oxide and autonomic receptor functional responses in the normal and inflamed urinary bladder of the rat.

Classic and new animal models of Parkinson's disease.

MiR-206 regulates neural cells proliferation and apoptosis via Otx2.

Uremic toxins induce kidney fibrosis by activating intrarenal renin-angiotensin-aldosterone system associated epithelial-to-mesenchymal transition.

Circulating levels of persistent organic pollutants (POPs) and carotid atherosclerosis in the elderly.

The pulmonary mesenchymal tissue layer is defective in an in vitro recombinant model of nitrofen-induced lung hypoplasia.

TCDD disrupts hypural skeletogenesis during medaka embryonic development.

The cutaneous lesions of dioxin exposure: lessons from the poisoning of Victor Yushchenko.

Retinoic acid rescues deficient airway innervation and peristalsis of hypoplastic rat lung explants.

Hepatoprotective role of vitamin B(12) and folic acid in arsenic intoxicated rats.

Effects of arsenic exposure during the pre- and postnatal development on the puberty of female offspring.

Contact and fumigant toxicities of 3-methylphenol isolated from *Ostericum koreanum* and its derivatives against house dust mites.

Preliminary morphological and biochemical changes in rat liver following postnatal exposure to sodium arsenite.

Permeation and metabolism of cocaine in the nasal mucosa.

Hydroxyapatite bioactivated bacterial cellulose promotes osteoblast growth and the formation of bone nodules.

ALS-linked SOD1 in glial cells enhances γ -N-Methylamino L-Alanine (BMAA)-induced toxicity in *Drosophila*.

The protective role of vitamin E on the testicular tissue in rats exposed to sodium arsenite during the prenatal stage till sex maturity: A stereological analysis.

[Changes in polarization of myometrial cells plasma and internal mitochondrial membranes under calixarenes action as inhibitors of plasma membrane Na⁺, K⁺-ATPase].

Organochlorine pesticides induce epithelial to mesenchymal transition of human primary cultured hepatocytes.

Polychlorinated biphenyls (PCBs) in marine fishes from China: levels, distribution and risk assessment.

Effects of iron glycine chelate on growth, tissue mineral concentrations, fecal mineral excretion, and liver antioxidant enzyme activities in broilers.

Distinct bioaccumulation profile of pesticides and dioxin-like compounds by mollusk bivalves reared in polluted and unpolluted tropical bays: consumption risk and seasonal effect.

The epidemiology of sarcoma.

Small reactive carbonyl compounds as tissue lipid oxidation products; and the mechanisms of their formation thereby.

VP2118 has major roles in *Vibrio parahaemolyticus* response to oxidative stress.

The osteogenesis of bacterial cellulose scaffold loaded with bone morphogenetic protein-2.

Regulation of uterine AHR battery gene expression by 17 β -Estradiol is predominantly mediated by estrogen receptor β .

Phosphorylation and ubiquitination of dynamin-related proteins (AtDRP3A/3B) synergically regulate mitochondrial proliferation during mitosis.

The contribution of thioredoxin-2 reductase and glutathione peroxidase to H₂O₂ detoxification of rat brain mitochondria.

Development of an ion chromatography-inductively coupled plasma-mass spectrometry method to determine inorganic arsenic in liver from chickens treated with roxarsone.

Effects of caffeine on metabolism and mitochondria biogenesis in rhabdomyosarcoma cells compared with 2,4-dinitrophenol.

Evaluation of biochemical, hematological and oxidative parameters in mice exposed to the herbicide glyphosate-Roundup(®).

Antioxidant attenuation of atrazine induced histopathological changes in testicular tissue of goat in vitro.

Protective Effect of Psidium guajava in Arsenic-induced Oxidative Stress and Cytological Damage in Rats.

Alpha-mangostin induces changes in glutathione levels associated with glutathione peroxidase activity in rat brain synaptosomes.

Impaired adaptability of in vivo mitochondrial energetics to acute oxidative insult in aged skeletal muscle.

Analysis of neuroglobin mRNA expression in rat brain due to arsenite-induced oxidative stress.

Arsenic exposure inhibits myogenesis and neurogenesis in P19 stem cells through repression of the β -catenin signaling pathway.

Plasma polymer coatings to aid retinal pigment epithelial growth for transplantation in the treatment of age related macular degeneration.

TGF- β 1 signaling plays a dominant role in the crosstalk between TGF- β 1 and the aryl hydrocarbon receptor ligand in prostate epithelial cells.

Embryotoxicity assessment of developmental neurotoxicants using a neuronal endpoint in the embryonic stem cell test.

Biochar reduces copper toxicity in *Chenopodium quinoa* Willd. In a sandy soil.

Effect of mercury on aryl hydrocarbon receptor-regulated genes in the extrahepatic tissues of C57BL/6 mice.

Somatic embryogenesis of a wild passion fruit species *Passiflora cincinnata* Masters: histocytological and histochemical evidences.

Tissue specificity of aryl hydrocarbon receptor (AhR) mediated responses and relative sensitivity of white sturgeon (*Acipenser transmontanus*) to an AhR agonist.

Enhanced optical clearing of skin in vivo and optical coherence tomography in-depth imaging.

Metabolism of the antibacterial triclocarban by human epidermal keratinocytes to yield protein adducts.

Changes in proteolytic enzymes mRNAs and proteins relevant for meat quality during myogenesis and hypoxia of primary bovine satellite cells.

Differential modulation of aryl hydrocarbon receptor regulated enzymes by arsenite in the kidney, lung, and heart of C57BL/6 mice.

Differentiation in boron distribution in adult male and female rats' normal brain: a BNCT approach.

Arsenic toxicity: a heart-breaking saga of a freshwater mollusc.

Enhanced pressurized liquid extraction technique capable of analyzing polychlorodibenzo-p-dioxins, polychlorodibenzofurans, and polychlorobiphenyls in fish tissue.

2,3,7,8-Tetrachlorodibenzo-p-dioxin activates the aryl hydrocarbon receptor and alters sex steroid hormone secretion without affecting growth of mouse antral follicles in vitro.

Oxidative damage in human gingival fibroblasts exposed to cigarette smoke.

Meta-analysis of data from human ex vivo placental perfusion studies on genotoxic and immunotoxic agents within the integrated European project NewGeneris.

Dietary- and tissue-based exposure of belted kingfisher to PCDFs and PCDDs in the Tittabawassee River floodplain, Midland, MI, USA.

Buffalo (*Bubalus bubalis*) epiphyseal proteins counteract arsenic-induced oxidative stress in brain, heart, and liver of female rats.

Herbicide metolachlor causes changes in reproductive endocrinology of male wistar rats.

Insight into the neuroproteomics effects of the food-contaminant non-dioxin like polychlorinated biphenyls.

Residual sarcoplasmic reticulum Ca²⁺ concentration after Ca²⁺ release in skeletal myofibers from young adult and old mice.

Comparative proteomic analysis of auxin-induced embryogenic and nonembryogenic tissues of the solanaceous tree *Cyphomandra betacea* (Tamarillo).

First Report of Blight Caused by *Sclerotium rolfsii* on the Invasive Exotic Weed, *Vincetoxicum rossicum* (Pale Swallow-Wort), in Western New York.

Acute inhalation study of allyl alcohol for derivation of acute exposure guideline levels.

7-Substituted-pyrrolo[3,2-d]pyrimidine-2,4-dione derivatives as antagonists of the transient receptor potential ankyrin 1 (TRPA1) channel: a promising approach for treating pain and inflammation.

Metabolic activation of sulfur mustard leads to oxygen free radical formation.

Large enhancement of skeletal muscle cell glucose uptake and suppression of hepatocyte glucose-6-phosphatase activity by weak uncouplers of oxidative phosphorylation.

Effects of dietary exposure of mink (*Mustela vison*) to 2,3,7,8-tetrachlorodibenzo-p-dioxin, 2,3,4,7,8-pentachlorodibenzofuran, and 2,3,7,8-tetrachlorodibenzofuran on reproduction and offspring viability and growth.

Arsenic exposure to killifish during embryogenesis alters muscle development.

Mast cells in the intestine and gills of the sea bream, *Sparus aurata*, exposed to a polychlorinated biphenyl, PCB 126.

Atrazine in sub-acute exposure results in sperm DNA disintegrity and nuclear immaturity in rats.

Prospective experimental studies on the renal protective effect of ulinastatin after paraquat poisoning.

Pollution level and human health risk assessment of some pesticides and polychlorinated biphenyls in Nantong of Southeast China.

Protective Effect of Silymarin against Acrolein-Induced Cardiotoxicity in Mice.

Tumor necrosis factor α stimulates expression and secretion of urokinase plasminogen activator in human dental pulp cells.

Transient receptor potential ankyrin 1 channel localized to non-neuronal airway cells promotes non-neurogenic inflammation.

Action of lipopolysaccharide on interstitial cells of cajal from mouse small intestine.

Bismuth protects against arsenite-induced inhibition of proteoglycan synthesis in cultured vascular endothelial cells.

Enzymatic degradation of endocrine-disrupting chemicals in aquatic plants and relations to biological Fenton reaction.

Lipid peroxidation in brain tissue following administration of low and high doses of arsenite and L-ascorbate in wistar strain rats.

Involvement of cholesterol membrane transporter Niemann-Pick C1-like 1 in the intestinal absorption of lutein.

Tissue concentrations of pesticides, PCBs and metals among ospreys, *Pandion haliaetus*, collected in France.

Synthesis and evaluation of PET probes for the imaging of I2 imidazoline receptors in peripheral tissues.

Antioxidant and inhibitory effect of red ginger (*Zingiber officinale* var. *Rubra*) and white ginger (*Zingiber officinale* Roscoe) on Fe(2+) induced lipid peroxidation in rat brain in vitro.

Comparison of the acute toxicities of novel algicides, thiazolidinedione derivatives TD49 and TD53, to various marine organisms.

Toxicological responses of *Cyprinus carpio* exposed to a commercial formulation containing glyphosate.

Thioredoxin 1 overexpression extends mainly the earlier part of life span in mice.

Differential regional expression patterns of α -synuclein, TNF- α , and IL-1 β ; and variable status of dopaminergic neurotoxicity in mouse brain after Paraquat treatment.

Alterations in jejunal morphology and serotonin-containing enteroendocrine cells in peripubertal male rats associated with subchronic atrazine exposure.

Epidemiologic studies of glyphosate and non-cancer health outcomes: a review.

Differential response of young and adult leaves to herbicide 2,4-dichlorophenoxyacetic acid in pea plants: role of reactive oxygen species.

Medical management of paraquat ingestion.

Acute exposure to glyphosate herbicide affects oxidative parameters in piava (*Leporinus obtusidens*).

Effects of glyphosate and polyoxyethylenamine on growth and energetic reserves in the freshwater crayfish *Cherax quadricarinatus* (Decapoda, Parastacidae).

Proteomic profiling of acrolein adducts in human lung epithelial cells.

[Effects of hemoperfusion on plasma concentration and histopathological changes in paraquat poisoning rabbits].

[Pulmonary platelet endothelial cell adhesion molecule-1 (PECAM-1) in rabbits after acute paraquat (PQ) poisoning].

Protective effect of *Ginkgo biloba* L. leaf extract against glyphosate toxicity in Swiss albino mice.

Cigarette smoke components induce matrix metalloproteinase-1 in aortic endothelial cells through inhibition of mTOR signaling.

Demasculinization and feminization of male gonads by atrazine: consistent effects across vertebrate classes.

Toxicological responses of *Cyprinus carpio* exposed to the herbicide penoxsulam in rice field conditions.

Protective effect of 4,4'-diaminodiphenylsulfone against paraquat-induced mouse lung injury.

Snails as indicators of pesticide drift, deposit, transfer and effects in the vineyard.

The protective effect of C-phycoyanin on paraquat-induced acute lung injury in rats.

Acrolein-mediated injury in nervous system trauma and diseases.

Acrolein-induced dyslipidemia and acute-phase response are independent of HMG-CoA reductase.

Protein modification by acrolein: relevance to pathological conditions and inhibition by aldehyde sequestering agents.

Acrolein induced DNA damage, mutagenicity and effect on DNA repair.

Comparison of nitrofen uptake via water and food and its distribution in tissue of common carp, *Cyprinus carpio* L.

TCDD and cancer: a critical review of epidemiologic studies.

Investigation into modification of mass transfer kinetics by acrolein in a renal biochip.

Effects of atrazine and chlorpyrifos on the mRNA levels of IL-1 and IFN- γ 2b in immune organs of common carp.

Gestational atrazine exposure: effects on male reproductive development and metabolite distribution in the dam, fetus, and neonate.

Waterborne exposure to clodinafop-propargyl disrupts the posterior and ventral development of zebrafish embryos.

Involvement of N-6 adenine-specific DNA methyltransferase 1 (N6AMT1) in arsenic biomethylation and its role in arsenic-induced toxicity.

Histopathological changes in gill, liver and kidney of neotropical fish *Colossoma macropomum* exposed to paraquat at different temperatures.

Genetic-based, differential susceptibility to paraquat neurotoxicity in mice.

Acrolein induces myelin damage in mammalian spinal cord.

Roundup effects on oxidative stress parameters and recovery pattern of *Rhamdia quelen*.

[Effect of ulinastatin on the expression of heat shock protein 70 and NF-kappaB in lung tissue in rats with paraquat poisoned].

Protection of bone marrow mesenchymal stem cells from acute lung injury induced by paraquat poisoning.

Tissue plasminogen activator and plasminogen activator inhibitor-1 levels in patients with acute paraquat intoxication.

Inhibition of myotube formation by paraquat in the myoblast cell line C2C12.

Mortality of US pentachlorophenol production workers through 2005.

A review of epidemiologic studies of triazine herbicides and cancer.

Therapeutic hypothermia attenuates acute lung injury in paraquat intoxication in rats.

Mutagenic and genotoxic assessment of atrazine-based herbicide to freshwater fish *Channa punctatus* (Bloch) using micronucleus test and single cell gel electrophoresis.

[Clinical study of dynamic change of inflammatory factors in serum of acute paraquat rats].

Effect of low dose exposure to the herbicide atrazine and its metabolite on cytochrome P450 aromatase and steroidogenic factor-1 mRNA levels in the brain of premetamorphic bullfrog tadpoles (*Rana catesbeiana*).

Liquid chromatographic-electrospray mass spectrometric determination of 1-methyl-4-phenylpyridine (MPP+) in discrete regions of murine brain.

Toxicological responses of *Cyprinus carpio* after exposure to a commercial herbicide containing imazethapyr and imazapic.

Commercial formulation containing quinclorac and metsulfuron-methyl herbicides inhibit acetylcholinesterase and induce biochemical alterations in tissues of *Leporinus obtusidens*.

Selenium provides protection to the liver but not the reproductive organs in an atrazine-model of experimental toxicity.

A physiologically based pharmacokinetic model for atrazine and its main metabolites in the adult male C57BL/6 mouse.

[The study of effects of pirfenidone on the pulmonary fibrosis induced by paraquat in mice].

The effects of Click 500 SC (terbuthylazine) on common carp *Cyprinus carpio* under (sub)chronic conditions.

Protective effect of ambroxol against paraquat-induced pulmonary fibrosis in rats.

Wld(S) reduces paraquat-induced cytotoxicity via SIRT1 in non-neuronal cells by attenuating the depletion of NAD.

[Expression of nuclear factor kappaB and tumor necrosis factor $\hat{\pm}$ in lung tissue of paraquat poisoned rats].

Edaravone, a novel antidote against lung injury and pulmonary fibrosis induced by paraquat?

Physiological effects of temperature and a herbicide mixture on the soft-shell clam *Mya arenaria* (Mollusca, Bivalvia).

Pathological and genotoxic effects of atrazine in male Japanese quail (*Coturnix japonica*).

Suicide victim of paraquat poisoning make suitable corneal donor.

Overexpression of the pepper antimicrobial protein CaAMP1 gene regulates the oxidative stress- and disease-related proteome in *Arabidopsis*.

Protein conjugated with aldehydes derived from lipid peroxidation as an independent parameter of the carbonyl stress in the kidney damage.

TRPV1 and TRPA1 stimulation induces MUC5B secretion in the human nasal airway in vivo.

Dopamine and paraquat enhance $\hat{\pm}$ -synuclein-induced alterations in membrane conductance.

Protein-conjugated acrolein as a biochemical marker of brain infarction.

Aldose reductase (AKR1B3) regulates the accumulation of advanced glycosylation end products (AGEs) and the expression of AGE receptor (RAGE).

TRPA1 receptor modulation attenuates bladder overactivity induced by spinal cord injury.

Isopentenyl pyrophosphate is a novel antinociceptive substance that inhibits TRPV3 and TRPA1 ion channels.

Low-dose oral immunization with lyophilized tissue of herbicide-resistant lettuce expressing hepatitis B surface antigen for prototype plant-derived vaccine tablet formulation.

Oral exposure to acrolein exacerbates atherosclerosis in apoE-null mice.

Trans-cinnamaldehyde decreases attachment and invasion of uropathogenic *Escherichia coli* in urinary tract epithelial cells by modulating virulence gene expression.

Unbalanced MMP/TIMP-1 expression during the development of experimental pulmonary fibrosis with acute paraquat poisoning.

Relationship between metabolic disorders and relative risk values of brain infarction estimated by protein-conjugated acrolein, IL-6 and CRP together with age.

Anti-acrolein treatment improves behavioral outcome and alleviates myelin damage in experimental autoimmune encephalomyelitis mouse.

Mitochondrial dysfunction in skin fibroblasts from a Parkinson's disease patient with an alpha-synuclein triplication.

Reduced coupling of oxidative phosphorylation in vivo precedes electron transport chain defects due to mild oxidative stress in mice.

Therapeutic effects of cinnamaldehyde and potentiation of its efficacy in combination with methylcellulose on murine oral candidiasis.

Effect of diquat-induced oxidative stress on iron metabolism in male Fischer-344 rats.

A temporary immersion system improves in vitro regeneration of peach palm through secondary somatic embryogenesis.

Catalase activity prevents exercise-induced up-regulation of vasoprotective proteins in venous tissue.

Uptake, translocation and metabolism of aminocyclopyrachlor in prickly lettuce, rush skeletonweed and yellow starthistle.

Rac-dependent doubling of HeLa cell area and impairment of cell migration and cell cycle by compounds from *Iris germanica*.

Sampling-rate calibration for rapid and nonlethal monitoring of organic contaminants in fish muscle by solid-phase microextraction.

Urinary arsenic speciation profiles in mice subchronically exposed to low concentrations of sodium arsenate in drinking water.

Reagent precoated targets for rapid in-tissue derivatization of the anti-tuberculosis drug isoniazid followed by MALDI imaging mass spectrometry.

Transient receptor potential ankyrin 1 is expressed by inhibitory motoneurons of the mouse intestine.

Stereoselective metabolism of the herbicide fluroxypyr methylheptyl ester in rabbits.

Cigarette smoke and $\hat{1}\pm,\hat{1}^2$ -unsaturated aldehydes elicit VEGF release through the p38 MAPK pathway in human airway smooth muscle cells and lung fibroblasts.

Murine hepatic aldehyde dehydrogenase 1a1 is a major contributor to oxidation of aldehydes formed by lipid peroxidation.

Initiation of somatic embryogenesis from immature zygotic embryos of oocarpa pine (*Pinus oocarpa* Schiede ex Schlechtendal).

Direct analysis of methylated trivalent arsenicals in mouse liver by hydride generation-cryotrapping-atomic absorption spectrometry.

Regeneration of *Jatropha curcas* through efficient somatic embryogenesis and suspension culture.

Human dental pulp fibroblasts express the "cold-sensing" transient receptor potential channels TRPA1 and TRPM8.

The chemotherapy metabolite acrolein upregulates thrombin generation and impairs the protein C anticoagulant pathway in animal-based and cell-based models.

Contact and fumigant toxicity of cinnamaldehyde and cinnamic acid and related compounds to *Dermatophagoides farinae* and *Dermatophagoides pteronyssinus* (Acari: Pyroglyphidae).

Metabolic sugar signal promotes *Arabidopsis* meristematic proliferation via G2.

Effects of oleanolic acid on pulmonary morphofunctional and biochemical variables in experimental acute lung injury.

Community-led initiative for control of anemia among children 6 to 35 months of age and unmarried adolescent girls in rural Wardha, India.

Apical extrusion of sodium hypochlorite using different root canal irrigation systems.

Mutated p.4894 RyR1 function related to malignant hyperthermia and congenital neuromuscular disease with uniform type 1 fiber (CNMDU1).

Protective effects of N-acetylcysteine against arsenic-induced oxidative stress and reprotoxicity in male mice.

Identification of aryl hydrocarbon receptor binding targets in mouse hepatic tissue treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Polymorphism of the aryl-hydrocarbon receptor gene in intron 10 of human cancers.

Air pollution in autoimmune rheumatic diseases: a review.

Potential protective mechanisms of aryl hydrocarbon receptor (AHR) signaling in benign prostatic hyperplasia.

Discovery of potent, selective, and orally bioavailable alkynylphenoxyacetic acid CRTH2 (DP2) receptor antagonists for the treatment of allergic inflammatory diseases.

Nrf2 protects against 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced oxidative injury and steatohepatitis.

Intraperitoneal N-acetylcysteine for acute iron intoxication in rats.

CD82 gene suppression in endometrial stromal cells leads to increase of the cell invasiveness in the endometriotic milieu.

Animal models of Parkinson's disease: a source of novel treatments and clues to the cause of the disease.

Molecular targets that link dioxin exposure to toxicity phenotypes.

Synthesis and evaluation of novel carbon-11 labeled oxopurine analogues for positron emission tomography imaging of translocator protein (18 kDa) in peripheral organs.

Immune interactions in endometriosis.

A competitive co-cultivation assay for cancer drug specificity evaluation.

Cyanogenic glucosides in the biological warfare between plants and insects: the Burnet moth-Birdsfoot trefoil model system.

Vitamin B12 protects against superoxide-induced cell injury in human aortic endothelial cells.

Determination of uremic solutes in biological fluids of chronic kidney disease patients by HPLC assay.

Polychlorinated biphenyls and organochlorine pesticides in plasma predict development of type 2 diabetes in the elderly: the prospective investigation of the vasculature in Uppsala Seniors (PIVUS) study.

Preconception omega-3 fatty acid supplementation of adult male mice with a history of developmental 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure prevents preterm birth in unexposed female partners.

Interaction of aryl hydrocarbon receptor and NF- κ B subunit RelB in breast cancer is associated with interleukin-8 overexpression.

Interactive effect of arsenic and fluoride on cardio-respiratory disorders in male rats: possible role of reactive oxygen species.

Distinct role of Hsp70 in Drosophila hemocytes during severe hypoxia.

[Geographic epidemiology of soft tissue sarcomas, Trieste (1995 -2005)].

Mitochondrial dysfunction and oxidative stress contribute to the pathogenesis of spinocerebellar ataxia type 12 (SCA12).

Metabolomic analysis of liver and skeletal muscle tissues in C57BL/6J and DBA/2J mice exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Activation of aryl hydrocarbon receptor induces vascular inflammation and promotes atherosclerosis in apolipoprotein E-/- mice.

Prenatal administration of retinoic acid upregulates connective tissue growth factor in the nitrofen CDH model.

The role of primary myogenic regulatory factors in the developing diaphragmatic muscle in the nitrofen-induced diaphragmatic hernia.

Vascular incompetence in dialysis patients--protein-bound uremic toxins and endothelial dysfunction.

Concomitant exposure to arsenic and organophosphates on tissue oxidative stress in rats.

Heat shock protein 47 expression in oral squamous cell carcinomas and upregulated by arecoline in human oral epithelial cells.

Inverse associations between long-term weight change and serum concentrations of persistent organic pollutants.

Therapeutic efficacy of silymarin and naringenin in reducing arsenic-induced hepatic damage in young rats.

Antioxidant effect of vegetable oils containing conjugated linolenic acid isomers against induced tissue lipid peroxidation and inflammation in rat model.

Visible/near-infrared spectroscopy detects autolytic changes during storage of Atlantic salmon (*Salmo salar* L.).

Mitochondrial uncoupling agents trigger ventricular fibrillation in isolated rat hearts.

Perspectives on the potential involvement of the AH receptor-dioxin axis in cardiovascular disease.

Molecular and functional characterization of aryl hydrocarbon receptor nuclear translocator 1 (ARNT1) and ARNT2 in chicken (*Gallus gallus*).

Aryl hydrocarbon receptor activation during pregnancy, and in adult nulliparous mice, delays the subsequent development of DMBA-induced mammary tumors.

Abnormal expression of MAPK, EGFR, CK17 and TGK in the skin lesions of chloracne patients exposed to dioxins.

Analysis of human cultured myotubes responses mediated by ryanodine receptor 1.

Arsenic: toxicity, oxidative stress and human disease.

Alterations of excitation-contraction coupling and excitation coupled Ca^{2+} entry in human myotubes carrying *CAV3* mutations linked to rippling muscle.

Aryl hydrocarbon receptor activation by TCDD reduces inflammation associated with Crohn's disease.

The nutritive value of grasspea (*Lathyrus sativus*) and allied species, their toxicity to animals and the role of malnutrition in neurotoxicity.

On the biomarkers and mechanisms of konzo, a distinct upper motor neuron disease associated with food (cassava) cyanogenic exposure.

Oxidative stress and hepatic stellate cell activation are key events in arsenic induced liver fibrosis in mice.

Prenatal TCDD causes persistent modulation of the postnatal immune response, and exacerbates inflammatory disease, in 36-week-old lupus-like autoimmune SNF1 mice.

Mutant SOD1 and mitochondrial damage alter expression and splicing of genes controlling neurogenesis in models of neurodegeneration.

Effect of insulin-like growth factors on lung development in a nitrofen-induced CDH rat model.

AhR2-mediated, CYP1A-independent cardiovascular toxicity in zebrafish (*Danio rerio*) embryos exposed to retene.

[Oryzalin-induced chromosome doubling of *Scutellaria barbata*].

Does uremia cause vascular dysfunction?

Sequence analysis of MYOC and CYP1B1 in a Chinese pedigree of primary open-angle glaucoma.

[Classification as carcinogenic for 2,3,7,8-tetrachlorodibenzo-para-dioxin: an eventful journey].

Chronic exposure to arsenite induces S100A8 and S100A9 expression in rat RBL-2H3 mast cells.

Muscle weakness in Ryr1I4895T/WT knock-in mice as a result of reduced ryanodine receptor Ca²⁺ ion permeation and release from the sarcoplasmic reticulum.

Hydrogel tissue construct-based high-content compound screening.

Inhibition of hexokinase leads to neuroprotection against excitotoxicity in organotypic hippocampal slice culture.

Carcinogenic effects of "whole-life" exposure to inorganic arsenic in CD1 mice.

Cardioprotection induced by Na(+)/K(+)-ATPase activation involves extracellular signal-regulated kinase 1/2 and phosphoinositide 3-kinase/Akt pathway.

Risk-managed production of bioactive recombinant proteins using a novel plant virus vector with a helper plant to complement viral systemic movement.

Functional Characterization of Hypertrehalosemic Hormone Receptor in Relation to Hemolymph Trehalose and to Oxidative Stress in the Cockroach *Blattella germanica*.

Actions of juglone on energy metabolism in the rat liver.

Differential cytotoxic effects of sodium meta-arsenite on human cancer cells, dental papilla stem cells and somatic cells correlate with telomeric properties and gene expression.

Analysis of thyroid hormones in serum of Baikal seals and humans by liquid chromatography-tandem mass spectrometry (LC-MS/MS) and immunoassay methods: application of the LC-MS/MS method to wildlife tissues.

The constitutively active Ah receptor (CA-AhR) mouse as a model for dioxin exposure - effects in reproductive organs.

Identification of major dioxin-like compounds and androgen receptor antagonist in acid-treated tissue extracts of high trophic-level animals.

TRPV1, TRPA1, and CB1 in the isolated vagus nerve--axonal chemosensitivity and control of neuropeptide release.

Licorice extract increases cyclophosphamide teratogenicity by upregulating the expression of cytochrome P-450 2B mRNA.

Isolation and functional characterization of a cotton ubiquitination-related promoter and 5'UTR that drives high levels of expression in root and flower tissues.

Visualization of mitochondrial respiratory function using cytochrome c oxidase/succinate dehydrogenase (COX/SDH) double-labeling histochemistry.

Stereoselective metabolism of fenoxaprop-ethyl and its chiral metabolite fenoxaprop in rabbits.

An Exo2 derivative affects ER and Golgi morphology and vacuolar sorting in a tissue-specific manner in arabidopsis.

Developmental effects related to angiogenesis and osteogenic differentiation in Salmon larvae continuously exposed to dioxin-like 3,3',4,4'-tetrachlorobiphenyl (congener 77).

Transient receptor potential A1 channels: insights into cough and airway inflammatory disease.

Can time-weighted average concentrations be used to assess the risks of metsulfuron-methyl to *Myriophyllum spicatum* under different time-variable exposure regimes?

Effects of dioxin exposure in *Eisenia andrei*: integration of biomarker data by an Expert System to rank the development of pollutant-induced stress syndrome in earthworms.

Attenuating effect of lycopene and ellagic acid on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced spermiotoxicity and testicular apoptosis.

Oxidative modifications of proteins by sodium arsenite in human umbilical vein endothelial cells.

A highly efficient rice green tissue protoplast system for transient gene expression and studying light/chloroplast-related processes.

Multiresidue method for the determination of 13 pesticides in three environmental matrices: water, sediments and fish muscle.

Reproduction of European eel jeopardised by high levels of dioxins and dioxin-like PCBs?

Severe cyclophosphamide-induced haemorrhagic cystitis treated with hyperbaric oxygen.

Development of a co-culture model for in vitro toxicological studies in Atlantic salmon.

Combined effect of fluoride and 2,3,7,8-tetrachlorodibenzo-p-dioxin on mouse dental hard tissue formation in vitro.

Protective role of *Moringa oleifera* (Sajina) seed on arsenic-induced hepatocellular degeneration in female albino rats.

Integration of genome-wide computation DRE search, AhR CHIP-chip and gene expression analyses of TCDD-elicited responses in the mouse liver.

Herbal bioactivation, molecular targets and the toxicity relevance.

Sodium arsenite and hyperthermia modulate cisplatin-DNA damage responses and enhance platinum accumulation in murine metastatic ovarian cancer xenograft after hyperthermic intraperitoneal chemotherapy (HIPEC).

Hepatic effects of a highly purified 2,2',3,4,4',5,5'-heptachlorbiphenyl (PCB 180) in male and female rats.

Modulation of mast cell adhesion, proliferation, and cytokine secretion on electrospun bioresorbable vascular grafts.

Protective role of selenium against over-expression of cancer-related apoptotic genes induced by o-cresol in rats.

Multiresidue method to quantify pesticides in fish muscle by QuEChERS-based extraction and LC-MS/MS.

Assessing the genotoxic potentials of arsenic in tilapia (*Oreochromis mossambicus*) using alkaline comet assay and micronucleus test.

The generation of olfactory epithelial neurospheres in vitro predicts engraftment capacity following transplantation in vivo.

Activation of the aryl hydrocarbon receptor during pregnancy in the mouse alters mammary development through direct effects on stromal and epithelial tissues.

[Comparative investigation by spectrofluorimetry and flow cytometry of plasma and inner mitochondrial membranes polarisation in smooth muscle cell using potential-sensitive probe DiOC6(3)].

Efficient sequential synthesis of PET Probes of the COX-2 inhibitor [¹¹C]celecoxib and its major metabolite [¹¹C]SC-62807 and in vivo PET evaluation.

Regulation by heat shock protein 27 of osteocalcin synthesis in osteoblasts.

Effect of dioxin exposure on several indices of blood redox status in lactating buffalo cows.

Tissue-specific and dose-related accumulation of arsenic in mouse offspring following maternal consumption of arsenic-contaminated water.

Fibroblast cytoskeletal remodeling contributes to connective tissue tension.

Dioxin exposure of human CD34+ hemopoietic cells induces gene expression modulation that recapitulates its in vivo clinical and biological effects.

Protective effect of pretreatment with cilostazol on cytotoxicity of cadmium and arsenite in cultured vascular endothelial cells.

Risk ranking of multiple-POPs in detritivorous fish from the Río de la Plata.

Concentrations and accumulation profiles of PCDDs, PCDFs and dioxin-like PCBs in adipose fat tissues of Korean women.

Dioxin toxicity, aryl hydrocarbon receptor signaling, and apoptosis-persistent pollutants affect programmed cell death.

Stability of tissue PO₂ in the face of altered perfusion: a phenomenon specific to the renal cortex and independent of resting renal oxygen consumption.

Bacterial cellulose as a potential vascular graft: Mechanical characterization and constitutive model development.

Actin filament-organized local cortical endoplasmic reticulum aggregations in developing stomatal complexes of grasses.

Cyclooxygenase-2 contributes to functional changes seen on experimental hemorrhagic cystitis induced by ifosfamide in rat urinary bladder.

Mild mitochondrial uncoupling and calorie restriction increase fasting eNOS, akt and mitochondrial biogenesis.

Coenzyme Q10 counteracts testicular injury induced by sodium arsenite in rats.

Realgar and realgar-containing Liu-Shen-Wan are less acutely toxic than arsenite and arsenate.

H₂O₂ is the transferrable factor mediating flow-induced dilation in human coronary arterioles.

Glycation of the muscle-specific enolase by reactive carbonyls: effect of temperature and the protection role of carnosine, pyridoxamine and phosphatidylserine.

Simultaneous determination of 13 phytohormones in oilseed rape tissues by liquid chromatography-electrospray tandem mass spectrometry and the evaluation of the matrix effect.

Correlation of dysfunction of nonmuscle myosin IIA with increased induction of Cyp1a1 in Hepa-1 cells.

Manganese uptake and distribution in the brain after methyl bromide-induced lesions in the olfactory epithelia.

Isotopomer enrichment assay for very short chain fatty acids and its metabolic applications.

Overexpression of SIGMEs leads to ascorbate accumulation with enhanced oxidative stress, cold, and salt tolerance in tomato.

Transcriptional response of hepatic largemouth bass (*Micropterus salmoides*) mRNA upon exposure to environmental contaminants.

Bioaccumulation of dioxin-like substances and selected brominated flame retardant congeners in the fat and livers of black pigs farmed within the Nebrodi Regional Park of Sicily.

C-reactive protein makes human endothelium stiff and tight.

Tissue residue concentrations of organohalogen and trace elements in adult Pacific salmon returning to the Fraser River, British Columbia, Canada.

Effects of metolachlor on transcription of thyroid system-related genes in juvenile and adult Japanese medaka (*Oryzias latipes*).

Increased antibiotic release from a bone cement containing bacterial cellulose.

Realgar- and cinnabar-containing an-gong-niu-huang wan (AGNH) is much less acutely toxic than sodium arsenite and mercuric chloride.

Imaging in detecting sites of pulmonary fibrosis induced by paraquat.

Polychlorinated dibenzo-p-dioxins and dibenzofurans in different tissues of the cormorants (*Phalacrocorax carbo*) from Dongting Lake, China.

Transcriptional response of zebrafish embryos exposed to neurotoxic compounds reveals a muscle activity dependent *hspb11* expression.

A dominant negative zebrafish *Ahr2* partially protects developing zebrafish from dioxin toxicity.

Somatic embryogenesis and massive shoot regeneration from immature embryo explants of *tef*.

Evaluation of Iron-induced Oxidative Stress and its Amelioration by Certain Herbs in Broilers.

Broad-range antagonistic rhizobacteria *Pseudomonas fluorescens* and *Serratia plymuthica* suppress *Agrobacterium* crown gall tumours on tomato plants.

Differential long-term effects of developmental exposure to polychlorinated biphenyls 52, 138 or 180 on motor activity and neurotransmission. Gender dependence and mechanisms involved.

Biosynthesis of the cyanogenic glucosides linamarin and lotaustralin in cassava: isolation, biochemical characterization, and expression pattern of CYP71E7, the oxime-metabolizing cytochrome P450 enzyme.

Levels and congener profiles of PCBs and PCDD/Fs in blue shark (*Prionace glauca*) liver from the South-Eastern Mediterranean Sea (Italy).

Chronic hyperglycemia reduces substrate oxidation and impairs metabolic switching of human myotubes.

Effects of prenatal exposure to a low dose atrazine metabolite mixture on pubertal timing and prostate development of male Long-Evans rats.

Studies on the synergistic effects of extremely low-frequency magnetic fields and the endocrine-disrupting compound atrazine on the thyroid gland.

Mechanisms of olfactory toxicity of the herbicide 2,6-dichlorobenzonitrile: essential roles of CYP2A5 and target-tissue metabolic activation.

[Effects of enalapril on IL-1 β , IL-6 expression in rat lung exposure to acrolein].

Exposure to acrolein by inhalation causes platelet activation.

[Role of connective tissue growth factor and α -smooth muscle actin in pulmonary fibrosis among acute paraquat poisoned rats].

Alterations in mRNA expression of acetylcholinesterase in brain and muscle of common carp exposed to atrazine and chlorpyrifos.

Effects of Roundup Transorb on fish: hematology, antioxidant defenses and acetylcholinesterase activity.

Characterization of the human HSC20, an unusual DnaJ type III protein, involved in iron-sulfur cluster biogenesis.

[Experimental therapy of penehyclidine hydrochloride on paraquat-induced acute lung injury].

Differences in sensitivity but not selectivity of xenoestrogen binding to alligator versus human estrogen receptor alpha.

Survival and iono-regulatory performance in Atlantic salmon smolts is not affected by atrazine exposure.

Hepatotoxicity induced by sub-acute exposure of rats to 2,4-Dichlorophenoxyacetic acid based herbicide "DÃ©ormone lourd".

Oxidative stress biomarkers in *Cyprinus carpio* exposed to commercial herbicide bispyribac-sodium.

Acute atrazine exposure disrupts matrix metalloproteinases and retinoid signaling during organ morphogenesis in *Xenopus laevis*.

Increased reactive oxygen species production in the brain after repeated low-dose pesticide paraquat exposure in rats. A comparison with peripheral tissues.

Morphological damages of a glyphosate-treated human keratinocyte cell line revealed by a micro- to nanoscale microscopic investigation.

Postmortem distribution of ametryn in the blood and organ tissues of an herbicide-poisoning victim.

Desmoplastic small round-cell tumor: an adult with previous exposure to agent orange.

Simvastatin attenuates acrolein-induced mucin production in rats: involvement of the Ras/extracellular signal-regulated kinase pathway.

Toxic effects and bioaccumulation of the herbicide isoproturon in *Tubifex tubifex* (Oligocheate, Tubificidae): a study of significance of autotomy and its utility as a biomarker.

Spontaneous mutation frequency is elevated in skin of harlequin (hq)/Big Blue mice.

Cumulative effects of in utero administration of mixtures of reproductive toxicants that disrupt common target tissues via diverse mechanisms of toxicity.

[Expression of angiotensin converting enzyme and angiotensin converting enzyme 2 gene in lung of paraquat poisoning rats and protection of sodium dimercaptopropane sulfonate].

Herbicide formulation with glyphosate affects growth, acetylcholinesterase activity, and metabolic and hematological parameters in piava (*Leporinus obtusidens*).

Effects of Roundup and glyphosate formulations on intracellular transport, microtubules and actin filaments in *Xenopus laevis melanophores*.

Paraquat increases connective tissue growth factor and collagen expression via angiotensin signaling pathway in human lung fibroblasts.

Inducibility of metallothionein biosynthesis in the whole soft tissue of zebra mussels *Dreissena polymorpha* exposed to cadmium, copper, and pentachlorophenol.

[Relationship between paraquat tissue content and organ injury in paraquat poisoning rats].

[Expression of NF-kappaB and its downstream products in human umbilical vascular endothelial cells treated with paraquat].

[Changes of proteomics in the lung of rats subjected to acrolein inhalation after enalapril administration].

[Changes of proteomics in the injured lung of adult rats subjected to acrolein inhalation].

Chymase mediates paraquat-induced collagen production in human lung fibroblasts.

Intermediate filament carbonylation during acute acrolein toxicity in A549 lung cells: functional consequences, chaperone redistribution, and protection by bisulfite.

Toxicity of smoke extracts towards A549 lung cells: role of acrolein and suppression by carbonyl scavengers.

Toxicokinetics and recovery studies of dicamba dimethyl amine salt in goats following single oral administration.

Neuronal elasticity as measured by atomic force microscopy.

Low concentrations of atrazine, glyphosate, 2,4-dichlorophenoxyacetic acid, and triadimefon exposures have diverse effects on *Xenopus laevis* organ morphogenesis.

[Clinical research on high-dosage ambroxol hydrochloride associated with ulinastatin in improvement of lung tissue injury of patients with paraquat poisoning].

Simultaneous effects of nicotine, acrolein, and acetaldehyde on osteogenic-induced bone marrow cells cultured on plasma-sprayed titanium implants.

Mutagenicity of acrolein and acrolein-induced DNA adducts.

Confirmed 2,4-dichlorophenoxyacetic acid toxicosis in a dog.

Roundup causes oxidative stress in liver and inhibits acetylcholinesterase in muscle and brain of the fish *Prochilodus lineatus*.

Acetaminophen, via its reactive metabolite N-acetyl-p-benzo-quinoneimine and transient receptor potential ankyrin-1 stimulation, causes neurogenic inflammation in the airways and other tissues in rodents.

Environmental damage to the retina and preconditioning: contrasting effects of light and hyperoxic stress.

Effect of zinc and paraquat co-exposure on neurodegeneration: Modulation of oxidative stress and expression of metallothioneins, toxicant responsive and transporter genes in rats.

Correlation between images of silent brain infarction, carotid atherosclerosis and white matter hyperintensity, and plasma levels of acrolein, IL-6 and CRP.

Effects of exogenous GSH and methionine on methylation of inorganic arsenic in mice exposed to arsenite through drinking water.

Insulinotropic effect of cinnamaldehyde on transcriptional regulation of pyruvate kinase, phosphoenolpyruvate carboxykinase, and GLUT4 translocation in experimental diabetic rats.

Modulation of the reaction of vascular smooth muscle cells to angiotensin II induced by catalase and aminotriazol during ischemia-reperfusion.

Cinnamaldehyde impairs high glucose-induced hypertrophy in renal interstitial fibroblasts.

Polychlorinated dibenzo-p-dioxins and dibenzofurans in blood and breast milk samples from residents of a schistosomiasis area with Na-PCP application in China.

Genetic transformation of mature embryos of bread (*T. aestivum*) and pasta (*T. durum*) wheat genotypes.

Intense correlation between protein-conjugated acrolein and primary Sjögren's syndrome.

Ozone activates airway nerves via the selective stimulation of TRPA1 ion channels.

Effects of rotenone and other mitochondrial complex I inhibitors on the brine shrimp *Artemia*.

Distribution and metabolism of four different dimethylated arsenicals in hamsters.

A plant-tissue-based biophotonic method for herbicide sensing.

Two-color fluorescence labeling in acrolein-fixed brain tissue.

Effects of estrogen on lung development in a rat model of diaphragmatic hernia.

A novel cell permeant peptide inhibitor of MAPKAP kinase II inhibits intimal hyperplasia in a human saphenous vein organ culture model.

Radiochemical synthesis, rodent biodistribution and tumor uptake, and dosimetry calculations of [¹⁴C] methylated LY2181308.

Toxicology and carcinogenesis studies of 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (CAS No. 31508-00-6) in female Harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 3,3',4,4'-tetrachloroazobenzene (TCAB) (CAS No. 14047-09-7) in Harlan Sprague-Dawley rats and B6C3F1 mice (gavage studies).

Recruitment maneuver in experimental acute lung injury: the role of alveolar collapse and edema.

A single prenatal exposure to the endocrine disruptor 2,3,7,8-tetrachlorodibenzo-p-dioxin alters developmental myelination and remyelination potential in the rat brain.

The high level of RANTES in the ectopic milieu recruits macrophages and induces their tolerance in progression of endometriosis.

Toxicogenomic analysis of exposure to TCDD, PCB126 and PCB153: identification of genomic biomarkers of exposure to AhR ligands.

The activated aryl hydrocarbon receptor synergizes mitogen-induced murine liver hyperplasia.

[The influence of fluoride on expression of OPGL and M-CSF genes and their proteins in rats with experimental fluorosis and the therapeutic effect of Danlan Xianpeng Liaofu caspule].

Connective tissue growth factor expression pattern in lung development.

Lymphocyte-based determination of susceptibility to malignant hyperthermia: a pilot study in swine.

Protective effects of crude garlic by reducing iron-mediated oxidative stress, proliferation and autophagy in rats.

Food safety.

Identification and investigation of mitochondria lacking cytochrome c oxidase activity in axons.

[Effect of ambroxol on lung development of rat models with nitrofen-induced congenital diaphragmatic hernia].

Heart tissue of harlequin (hq)/Big Blue mice has elevated reactive oxygen species without significant impact on the frequency and nature of point mutations in nuclear DNA.

HET-CAM test for determining the possible eye irritancy of pesticides.

Dithiocarbamates induce craniofacial abnormalities and downregulate sox9a during zebrafish development.

Non-dioxin-like polychlorinated biphenyls and risk of endometriosis.

Protective role of tannin-rich fraction of *Camellia sinensis* in tissue arsenic burden in Sprague Dawley rats.

'Fatal 2,4-dinitrophenol poisoning... coming to a hospital near you'.

Early onset of neurological symptoms in fragile X premutation carriers exposed to neurotoxins.

Serum levels of total p-cresylsulphate are associated with angiographic coronary atherosclerosis severity in stable angina patients with early stage of renal failure.

Arsenic antagonizes the Hedgehog pathway by preventing ciliary accumulation and reducing stability of the Gli2 transcriptional effector.

Iron deficiency induces changes in riboflavin secretion and the mitochondrial electron transport chain in hairy roots of *Hyoscyamus albus*.

Arsenic abrogates the estrogen-signaling pathway in the rat uterus.

Copper sulphate toxicity in a young male complicated by methemoglobinemia, rhabdomyolysis and renal failure.

2,3,7,8-Tetrachlorodibenzo-p-dioxin up-regulates stathmin 1 in the eye: suggestive evidence for the involvement of stathmin 1 in accelerated eye opening in mice induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Functional properties of RYR1 mutations identified in Swedish patients with malignant hyperthermia and central core disease.

Quantitative and statistical analysis of differences in sensitivity between Long-Evans and Han/Wistar rats following long-term exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Angiosarcoma: clinical and molecular insights.

Functional studies of RYR1 mutations in the skeletal muscle ryanodine receptor using human RYR1 complementary DNA.

Oxygen-dependence of metabolic rate in the muscles of craniates.

2,3,7,8-tetrachlorodibenzo-p-dioxin impairs an insulin signaling pathway through the induction of tumor necrosis factor-alpha in adipocytes.

Prenatal developmental toxicity of gavage or feeding doses of 2-sec-butyl-4,6-dinitrophenol in rats.

A stochastic whole-body physiologically based pharmacokinetic model to assess the impact of inter-individual variability on tissue dosimetry over the human lifespan.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces disruption of glands of the prostate and fibrosis in rhesus monkeys.

Maternal dioxin exposure combined with a diet high in fat increases mammary cancer incidence in mice.

Dioxin-like exposures and effects on estrogenic and androgenic exposures and micronuclei frequency in mother-newborn pairs.

New method for quantification of *Trypanosoma cruzi* in animal's tissue in the chronic phase of experimental Chagas' disease.

Arsenic-induced myocardial injury: protective role of *Corchorus olitorius* leaves.

2,4-Dinitrophenol blocks neurodegeneration and preserves sciatic nerve function after trauma.

Disruption of CLOCK-BMAL1 transcriptional activity is responsible for aryl hydrocarbon receptor-mediated regulation of Period1 gene.

OECD validation of phase-3 Hershberger assay using the stimulated weanling male rat in Korea.

The role of calcium in modulating the reactivity of the smooth muscle cells during ischemia/reperfusion. Part 2.

In vitro inhibition of low density lipoprotein carbamylation by vitamins, as an ameliorating atherosclerotic risk in uremic patients.

Is there a role for antioxidants in prevention of pulmonary hypoplasia in nitrofen-induced rat model of congenital diaphragmatic hernia?

Temporal and anatomical sensitivities to the aryl hydrocarbon receptor agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin leading to premature acyclicity with age in rats.

PCB153-elicited hepatic responses in the immature, ovariectomized C57BL/6 mice: comparative toxicogenomic effects of dioxin and non-dioxin-like ligands.

Activation of Hedgehog signaling by the environmental toxicant arsenic may contribute to the etiology of arsenic-induced tumors.

Motor neurone disease - a methyl bromide exposure cluster points to a causal mechanism.

Bronchopulmonary innervation defects in infants and rats with congenital diaphragmatic hernia.

Iron supplementation for anemia after hip fracture surgery: a randomized trial of 300 patients.

Interactions of airflow oscillation, tracheal inclination, and mucus elasticity significantly improve simulated cough clearance.

Arsenic transformations and biomarkers in meadow voles (*Microtus pennsylvanicus*) living on an abandoned gold mine site in Montague, Nova Scotia, Canada.

Increased levels of total P-Cresylsulphate and indoxyl sulphate are associated with coronary artery disease in patients with diabetic nephropathy.

Anti-mutagenic and anti-carcinogenic potential of the carotenoid meso-zeaxanthin.

No evidence of increased risk of soft tissue sarcomas in the neighborhood of a steel foundry in Verona.

Influence of serum and necrotic soft tissue on the antimicrobial effects of intracanal medicaments.

Indian spice curcumin may be an effective strategy to combat the genotoxicity of arsenic in Swiss albino mice.

Histopathological evaluation of root canal filling materials for primary teeth.

The involvement of hypophyseal-gonadal and hypophyseal-adrenal axes in arsenic-mediated ovarian and uterine toxicity: modulation by hCG.

Abnormal regulation of chemokine TECK and its receptor CCR9 in the endometriotic milieu is involved in pathogenesis of endometriosis by way of enhancing invasiveness of endometrial stromal cells.

Protective effects of the antioxidant 4b,5,9b,10-tetrahydroindeno[1,2-b]indole against TCDD toxicity in C57BL/6J mice.

Neuroprotective effect of s-methylisothiourea in transient focal cerebral ischemia in rat.

Laboratory scale evaluation of volatile organic compound emissions as indication of swine carcass degradation inside biosecure composting units.

Dioxins and human toxicity.

Recombinant self-assembling peptides as biomaterials for tissue engineering.

Association of the novel non-AT1, non-AT2 angiotensin binding site with neuronal cell death.

Tissue-engineered conduit using urine-derived stem cells seeded bacterial cellulose polymer in urinary reconstruction and diversion.

Evaluation of a bioluminescent mouse model expressing aromatase PII-promoter-controlled luciferase as a tool for the study of endocrine disrupting chemicals.

Injury and differentiation following inhibition of mitochondrial respiratory chain complex IV in rat oligodendrocytes.

Radioiodinated 4-iodo-L-meta-tyrosine, a system L selective artificial amino acid: molecular design and transport characterization in Chinese hamster ovary cells (CHO-K1 cells).

Tissue-based risk assessment of great blue heron (*Ardea herodias*) exposed to PCDD/DF in the Tittabawassee River floodplain, Michigan, USA.

Expression of pax6 and sox2 in adult olfactory epithelium.

Development of an acellular bioengineered matrix with a dominant vascular pedicle.

Characterization of the avian aryl hydrocarbon receptor 1 from blood using non-lethal sampling methods.

2,3,7,8-Tetrachlorodibenzo-p-dioxin impairs stable establishment of oral tolerance in mice.

Automated dose-response analysis and comparative toxicogenomic evaluation of the hepatic effects elicited by TCDD, TCDF, and PCB126 in C57BL/6 mice.

Transcriptomic profile indicative of immunotoxic exposure: in vitro studies in peripheral blood mononuclear cells.

Chronic exposure to low levels of inorganic arsenic causes alterations in locomotor activity and in the expression of dopaminergic and antioxidant systems in the albino rat.

Role of dietary GSH in the amelioration of sodium arsenite-induced ovarian and uterine disorders.

Acute toxicity of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) in male Sprague-Dawley rats: effects on hepatic oxidative stress, glutathione and metals status.

Quantitative measurement of Ca^{2+} in the sarcoplasmic reticulum lumen of mammalian skeletal muscle.

Intravenous lipid emulsion in clinical toxicology.

Gene-chemical interactions in the developing mammalian nervous system: Effects on proliferation, neurogenesis and differentiation.

Gene expression profile and cytotoxicity of human bronchial epithelial cells exposed to crotonaldehyde.

Inhibition of connexin 43 gap junction channels by the endocrine disruptor ioxynil.

A study of neurologic symptoms on exposure to organophosphate pesticides in the children of agricultural workers.

Distribution of 14C-2,3,7,8-tetrachlorodibenzo-p-dioxin to the brain and peripheral tissues of fetal rats and its comparison with adults.

Genomic indicators in the blood predict drug-induced liver injury.

Rice fruit development is associated with an increased IAA content in pollinated ovaries.

Expression of aryl hydrocarbon receptor in human placentas and fetal tissues.

Screening for (anti)androgenic properties using a standard operation protocol based on the human stably transfected androgen sensitive PALM cell line. First steps towards validation.

Preparation of mouse brain tissue for immunoelectron microscopy.

Effects of atrazine and chlorpyrifos on acetylcholinesterase and Carboxylesterase in brain and muscle of common carp.

Dioxin-like and perfluorinated compounds in pigs in an Indian open waste dumping site: toxicokinetics and effects on hepatic cytochrome P450 and blood plasma hormones.

Transcriptional regulation of bone sialoprotein gene by *Porphyromonas gingivalis* lipopolysaccharide.

Reduction of a large fish tissue analyte database: identifying and assessing data specific to a remediation site for risk assessment application.

Predicting PCDD/F and dioxin-like PCB contamination levels in bovine edible tissues from in vivo sampling.

Arsenite induces aquaglyceroporin 9 expression in murine livers.

Adverse effects of arsenic exposure on uterine function and structure in female rat.

Quantitative characterization of changes in bone geometry, mineral density and biomechanical properties in two rat strains with different Ah-receptor structures after long-term exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The clock genes period 1 and period 2 mediate diurnal rhythms in dioxin-induced Cyp1A1 expression in the mouse mammary gland and liver.

Nitrofen induces apoptosis independently of retinaldehyde dehydrogenase (RALDH) inhibition.

Role for tyrosine kinases in contraction of rat penile small arteries.

Determination of escin content in androgenic embryos and hairy root culture of *Aesculus hippocastanum*.

Thermal sensitivity of mitochondrial metabolism in two distinct mitotypes of *Drosophila simulans*: evaluation of mitochondrial plasticity.

Tissue-specific in vivo bioconcentration of pharmaceuticals in rainbow trout (*Oncorhynchus mykiss*) using space-resolved solid-phase microextraction.

Synergistic effect of ultrasound and thiazone-PEG 400 on human skin optical clearing in vivo.

Dioxin exposure disrupts the differentiation of mouse embryonic stem cells into cardiomyocytes.

Local maximum oxygen disappearance rate has limited utility as a measure of local renal tissue oxygen consumption.

Acetic acid bacterial lipids improve cognitive function in dementia model rats.

Uptake and transport of roxarsone and its metabolites in water spinach as affected by phosphate supply.

Effect of morphological heterogeneity of somatic embryos of *Melia azedarach* on conversion into plants.

A remarkable new target gene for the dioxin receptor: The Vav3 proto-oncogene links AhR to adhesion and migration.

Early-age changes in oxidative stress in brown trout, *Salmo trutta*.

Sarcoplasmic reticulum Ca²⁺ depletion in adult skeletal muscle fibres measured with the biosensor D1ER.

Xenobiotic-metabolizing cytochromes p450 in human white adipose tissue: expression and induction.

Intravital fluorescent microscopic evaluation of bacterial cellulose as scaffold for vascular grafts.

A critical role of SNF1A/dAMPKalpha (*Drosophila* AMP-activated protein kinase alpha) in muscle on longevity and stress resistance in *Drosophila melanogaster*.

The aryl hydrocarbon receptor has an important role in the regulation of hematopoiesis: implications for benzene-induced hematopoietic toxicity.

Fusion of the endoplasmic reticulum and mitochondrial outer membrane in rats brown adipose tissue: activation of thermogenesis by Ca²⁺.

[Comparative characteristic of lactate dehydrogenase properties from the white muscles and liver of goldfish (*Carassius auratus* L.)].

The speed of mitochondrial movement is regulated by the cytoskeleton and myosin in *Picea wilsonii* pollen tubes.

NTPDase family in zebrafish: Nucleotide hydrolysis, molecular identification and gene expression profiles in brain, liver and heart.

Blueberry fruit polyphenolics suppress oxidative stress-induced skeletal muscle cell damage in vitro.

HPTLC densitometric evaluation of tissue culture extracts of *Nothapodytes foetida* compared to conventional extracts for camptothecin content and antimicrobial activity.

The absorption characteristics of bifendate solid dispersion in rat intestinal tissue.

Interaction between oxidative stress sensor Nrf2 and xenobiotic-activated aryl hydrocarbon receptor in the regulation of the human phase II detoxifying UDP-glucuronosyltransferase 1A10.

C-fin: a cultured frog tadpole tail fin biopsy approach for detection of thyroid hormone-disrupting chemicals.

Expression of heat shock protein 70 in lung tissues of acute paraquat poisoned rats and intervention of ulinastatin.

Effects of growth hormone and insulin-like growth factor-I on the iron-induced lipid peroxidation in the rat liver and porcine thyroid homogenates.

[The effect of 2,4-dinitrophenol on the intensity of oxidative processes in the rat liver during prolonged experiment].

Biocompatibility and growth of human keratinocytes and fibroblasts on biosynthesized cellulose-chitosan film.

Chloroplast and reactive oxygen species involvement in apoptotic-like programmed cell death in *Arabidopsis* suspension cultures.

Protective effect of *Corchorus olitorius* leaves on sodium arsenite-induced toxicity in experimental rats.

Arsenic (+ 3 oxidation state) methyltransferase and the methylation of arsenicals in the invertebrate chordate *Ciona intestinalis*.

Mechanisms of corneal tissue cross-linking in response to treatment with topical riboflavin and long-wavelength ultraviolet radiation (UVA).

Exposure assessment at a PCDD/F contaminated site in Sweden--field measurements of exposure media and blood serum analysis.

Lipid oxidation and peroxidation in CNS health and disease: from molecular mechanisms to therapeutic opportunities.

Fast, quantitative in situ hybridization of rare mRNAs using ¹⁴C-standards and phosphorus imaging.

Assessment of nicotine inhalation exposure and urinary cotinine of tobacco processing workers.

The role of T cells in the regulation of acrolein-induced pulmonary inflammation and epithelial-cell pathology.

[Molecular mechanism of erythromycin in the improvement of paraquat-damaged vascular endothelial cell barrier function].

Toxicokinetics of glyphosate and its metabolite aminomethyl phosphonic acid in rats.

Subacute effect of 2,4-dichlorophenoxyacetic acid on rat liver tissue: histochemical and immunohistochemical study.

Effect of pesticides on cell survival in liver and brain rat tissues.

Behavioral response and kinetics of terrestrial atrazine exposure in American toads (*Bufo americanus*).

Postmortem analyses unveil the poor efficacy of decontamination, anti-inflammatory and immunosuppressive therapies in paraquat human intoxications.

Glycogen content is affected differently in acute pulmonary and extra-pulmonary lung injury.

Subchronic feeding study of grain from herbicide-tolerant maize DP-Å~9814Å~-6 in Sprague-Dawley rats.

Pathogenic stimulation of intestinal stem cell response in *Drosophila*.

Effects of exposure to acetochlor on the expression of thyroid hormone related genes in larval and adult rare minnow (*Gobiocypris rarus*).

Mortality rates among trichlorophenol workers with exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Oxidative stress of acute paraquat poisoned rats and sodium dimercaptopropene sulfonate intervention].

[Pathologic changes and expression of Heme oxygenase-1 in paraquat-induced renal injury].

[Changes of cytokine and nuclear factor-kappa B in acute paraquat poisoned rats].

[Change of oxidative stress and nuclear factor-kappa B in acute paraquat poisoned rats].

[Expression of thrombomodulin, endothelial protein C receptor in lung tissue of acute paraquat poisoned rats and intervention of sodium dimercaptopropene sulfonate].

Enantioselective phytotoxicity of the herbicide imazethapyr in rice.

Low toxic herbicide Roundup induces mild oxidative stress in goldfish tissues.

Proteomic profiling of rat lung epithelial cells induced by acrolein.

Fatal diquat intoxication.

Immunohistochemical and histopathological evaluation of 2,4-dichlorophenoxyacetic acid-induced changes in rat kidney cortex.

Determination of the phenoxyacid herbicides MCPA, mecoprop and 2,4-D in kidney tissue using liquid chromatography with electrospray tandem mass spectrometry.

Glutathione-S-transferase P protects against endothelial dysfunction induced by exposure to tobacco smoke.

OECD validation of phase 3 Hershberger assay in Korea using surgically castrated male rats with coded chemicals.

Effects of atrazine on DNA damage and antioxidative enzymes in *Vicia faba*.

Occupational exposure to pesticides and lymphoid neoplasms among men: results of a French case-control study.

The herbicide linuron reduces testosterone production from the fetal rat testis during both in utero and in vitro exposures.

Acrolein activates matrix metalloproteinases by increasing reactive oxygen species in macrophages.

Changes of thyroid hormone levels and related gene expression in Chinese rare minnow (*Gobiocypris rarus*) during 3-amino-1,2,4-triazole exposure and recovery.

Development of PBPK model of molinate and molinate sulfoxide in rats and humans.

[Effect of paraquat on lipid peroxidation monoamine neurotransmitter level in brain tissue of mice].

Human cord blood CD133+ stem cells transplanted to nod-scid mice provide conditions for regeneration of olfactory neuroepithelium after permanent damage induced by dichlobenil.

Western blot analysis for 4-hydroxy-2-nonenal (HNE)-modified proteins in paraquat-treated mice.

Responsiveness of the interrenal tissue of *Jundi* (Rhamdia quelen) to an in vivo ACTH test following acute exposure to sublethal concentrations of agrichemicals.

[Expression of inflammatory factors in lung tissue of acute paraquat poisoned rats].

Acute exposure of the aquatic macrophyte *Callitriche obtusangula* to the herbicide oxadiazon: the protective role of N-acetylcysteine.

Effects of propanil on the European eel *Anguilla anguilla* and post-exposure recovery using selected biomarkers as effect criteria.

Leaf anatomy and morphometry in three eucalypt clones treated with glyphosate.

Effect of a subchronic exposure to simazine on energetic metabolism of common carp (*Cyprinus carpio*).

An effective antidote for paraquat poisonings: the treatment with lysine acetylsalicylate.

Effects of subchronic simazine exposure on some biometric, biochemical, hematological and histopathological parameters of common carp (*Cyprinus carpio* L.).

Effects of subchronic exposure to Successor 600 (pethoxamid 600 g L⁻¹) on common carp *Cyprinus carpio*.

Risk assessment of genetically modified crops for nutrition and health.

TRPA1 agonists evoke coughing in guinea pig and human volunteers.

Inhibitory effects of Geijigajakyak-Tang on trinitrobenzene sulfonic acid-induced colitis.

Matrix metalloproteinase-14 mediates a phenotypic shift in the airways to increase mucin production.

Staphylococcal catalase regulates its virulence and induces arthritis in catalase deficient mice.

Quantification of Paraquat, MPTP, and MPP⁺ in brain tissue using microwave-assisted solvent extraction (MASE) and high-performance liquid chromatography-mass spectrometry.

Increased sensitivity of myoblasts to oxidative stress in amyotrophic lateral sclerosis peripheral tissues.

Survival motor neuron deficiency enhances progression in an amyotrophic lateral sclerosis mouse model.

Evaluation of diquat against an acute experimental infection of *Flavobacterium columnare* in channel catfish, *Ictalurus punctatus* (Rafinesque).

TRPV1-mediated itch in seasonal allergic rhinitis.

Effect of sildenafil on acrolein-induced airway inflammation and mucus production in rats.

Urinary arsenic methylation capability and carotid atherosclerosis risk in subjects living in arsenicosis-hyperendemic areas in southwestern Taiwan.

Supplementation with plant extracts (carvacrol, cinnamaldehyde and capsaicin): its effects on acid-base status and productive performance in growing/finishing bull calves.

Pharmacokinetics of trifluralin in blood and heart tissue of mice.

Chronic exposure to the herbicide, atrazine, causes mitochondrial dysfunction and insulin resistance.

Non-antibiotic selection systems for soybean somatic embryos: the lysine analog aminoethyl-cysteine as a selection agent.

Bioaccumulation and biotransformation of brominated and chlorinated contaminants and their metabolites in ringed seals (*Pusa hispida*) and polar bears (*Ursus maritimus*) from East Greenland.

Differential regulation of SERK, LEC1-like and pathogenesis-related genes during indirect secondary somatic embryogenesis in grapevine.

Metabolism of flufenpyr-ethyl in rats and mice.

Time course of arsenic species in the brain and liver of mice after oral administration of arsenate.

Metabolic effects of glyphosate change the capacity of maize culture to regenerate plants.

The role of p38b MAPK in age-related modulation of intestinal stem cell proliferation and differentiation in *Drosophila*.

Protective effect of montelukast on paraquat-induced lung toxicity in rats.

Disposition of the herbicide 2-chloro-4-(ethylamino)-6-(isopropylamino)-s-triazine (Atrazine) and its major metabolites in mice: a liquid chromatography/mass spectrometry analysis of urine, plasma, and tissue levels.

Oxidative stress promotes proliferation and dedifferentiation of retina glial cells in vitro.

Lymphatic and portal vein absorption of organochlorine compounds in rats.

Chapter 21 Paraquat-induced production of reactive oxygen species in brain mitochondria.

Phytotoxicity of constituents of glandular trichomes and the leaf surface of camphorweed, *Heterotheca subaxillaris*.

Optimization of *Agrobacterium*-mediated transformation conditions in mature embryos of elite wheat.

Prolonged recruitment manoeuvre improves lung function with less ultrastructural damage in experimental mild acute lung injury.

Effects of TCDD on spermatogenesis related factor-2 (SRF-2): gene expression in *Xenopus*.

Production of tetraploid plants of non apomictic citrus genotypes.

Arsenic exacerbates atherosclerotic lesion formation and inflammation in ApoE^{-/-} mice.

Monoisoamyl dimercaptosuccinic acid abrogates arsenic-induced developmental toxicity in human embryonic stem cell-derived embryoid bodies: comparison with in vivo studies.

Upregulation of Slit-2 and Slit-3 gene expressions in the nitrofen-induced hypoplastic lung.

Automated dose-response analysis of the relative hepatic gene expression potency of TCDF in C57BL/6 mice.

Iron overload alters iron-regulatory genes and proteins, down-regulates osteoblastic phenotype, and is associated with apoptosis in fetal rat calvaria cultures.

The inhibition effect of 2,3,7,8-tetrachlorinated dibenzo-p-dioxin-induced aryl hydrocarbon receptor activation in human hepatoma cells with the treatment of cadmium chloride.

Effects of chronic exposure to DDT and TCDD on disease activity in murine systemic lupus erythematosus.

Inter-tissue distribution and evaluation of potential toxicity of PCBs in Baltic cod (*Gadus morhua* L.).

Prophylactic role of taurine on arsenic mediated oxidative renal dysfunction via MAPKs/ NF-kappaB and mitochondria dependent pathways.

CD147 silencing inhibits lactate transport and reduces malignant potential of pancreatic cancer cells in vivo and in vitro models.

Deleterious versus neuroprotective effect of metabolic inhibition after traumatic spinal cord injury.

Cancer incidence in the population exposed to dioxin after the "Seveso accident": twenty years of follow-up.

Rapid inhibition of ongoing DNA synthesis in human glioma tissue by genistein.

Mechanisms of non-genotoxic carcinogens and importance of a weight of evidence approach.

Lysozyme, a mediator of sepsis that intrinsically generates hydrogen peroxide to cause cardiovascular dysfunction.

Inhibition of UV-C light-induced apoptosis in liver cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Differential effects of PINK1 nonsense and missense mutations on mitochondrial function and morphology.

Evaluation of the rodent Hershberger bioassay on intact juvenile males--testing of coded chemicals and supplementary biochemical investigations.

Effect of prenatal tetrandrine administration on transforming growth factor-beta1 level in the lung of nitrofen-induced congenital diaphragmatic hernia rat model.

TCDD mediates inhibition of p53 and activation of ERalpha signaling in MCF-7 cells at moderate hypoxic conditions.

Synthesis and preclinical evaluation of [(11)C]PAQ as a PET imaging tracer for VEGFR-2.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) inhibits neurite outgrowth in differentiating human SH-SY5Y neuroblastoma cells.

Endometriosis and organochlorinated environmental pollutants: a case-control study on Italian women of reproductive age.

Determination of boron distribution in rat's brain, kidney and liver.

Effects of dioxin on vascular endothelial growth factor (VEGF) production in the retina associated with choroidal neovascularization.

Disruption of iron homeostasis and lung disease.

Prone position prevents regional alveolar hyperinflation and mechanical stress and strain in mild experimental acute lung injury.

Decreased nitric oxide markers and morphological changes in the brain of arsenic-exposed rats.

Taurine protects rat testes against NaAsO₂-induced oxidative stress and apoptosis via mitochondrial dependent and independent pathways.

Melatonin reduces acute lung injury in endotoxemic rats.

[Model establishment of liver fibrosis in oral arsenic solution exposed mice].

Role of iron in the pathogenesis of cysteamine-induced duodenal ulceration in rats.

Maternal exposure to dioxin disrupts gonadotropin production in fetal rats and imprints defects in sexual behavior.

Neonatal exposure to low-dose 2,3,7,8-tetrachlorodibenzo-p-dioxin causes autoimmunity due to the disruption of T cell tolerance.

Differentiation of human osteosarcoma cells by isolated phlorotannins is subtly linked to COX-2, iNOS, MMPs, and MAPK signaling: implication for chronic articular disease.

Prospective study of chemical exposures and amyotrophic lateral sclerosis.

Mitochondrial changes within axons in multiple sclerosis.

Potential therapeutic significance of increased expression of aryl hydrocarbon receptor in human gastric cancer.

Epigenetics and environmental chemicals.

Uncouple my heart: the benefits of inefficiency.

CYP1B1, but not CYP1A1, is downregulated by promoter methylation in colorectal cancers.

The use of Fluoro-Jade in primary neuronal cell cultures.

Characterization of the pattern of the nongenomic signaling pathway through which TCDD-induces early inflammatory responses in U937 human macrophages.

Inhibition of androgen receptor transcriptional activity as a novel mechanism of action of arsenic.

Regulation of gap junctional intercellular communication by TCDD in HMEC and MCF-7 breast cancer cells.

Cytotoxicity and gene expression profiling of two hydroxylated polybrominated diphenyl ethers in human H295R adrenocortical carcinoma cells.

[A series of observation on the expression of TGF-beta1 in the lung of nitrofen-induced congenital diaphragmatic hernia rat model].

AHR signaling in prostate growth, morphogenesis, and disease.

Functionally modified gelatin microspheres impregnated collagen scaffold as novel wound dressing to attenuate the proteases and bacterial growth.

Positron emission tomography (PET) imaging with [11C]-labeled erlotinib: a micro-PET study on mice with lung tumor xenografts.

TCDD induces cell migration via NFATc1/ATX-signaling in MCF-7 cells.

Mass spectrometric and peptide chip epitope mapping of rheumatoid arthritis autoantigen RA33.

Functional analysis of ryanodine receptor type 1 p.R2508C mutation in exon 47.

Children's immunology, what can we learn from animal studies (3): Impaired mucosal immunity in the gut by 2,3,7,8-tetraclorodibenzo-p-dioxin (TCDD): a possible role for allergic sensitization.

Ferric carboxymaltose: a review of its use in iron-deficiency anaemia.

Molecular cloning and oxidative modification of human lens ALDH1A1: implication in impaired detoxification of lipid aldehydes.

Thyroid lesions in the great cormorant (*Phalacrocorax carbo*) of Niigata, central Japan: a possible association with dioxin accumulation.

Cumulative effects of in utero administration of mixtures of "antiandrogens" on male rat reproductive development.

Human protein S inhibits the uptake of AcLDL and expression of SR-A through Mer receptor tyrosine kinase in human macrophages.

Mouse breast cancer model-dependent changes in metabolic syndrome-associated phenotypes caused by maternal dioxin exposure and dietary fat.

Assessment of human health risks posed by consumption of fish from the Lower Passaic River, New Jersey.

Accumulation of polychlorinated biphenyls and organochlorine pesticide in pet cats and dogs: assessment of toxicological status.

Hepatic and vascular mRNA expression in adult zebrafish (*Danio rerio*) following exposure to benzo-a-pyrene and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Assessment of mitochondrial metabolic oxidative state in living cardiomyocytes with spectrally-resolved fluorescence lifetime spectroscopy of NAD(P)H].

Improved alliin yield in somatic embryos of *Allium sativum* L. (cv. Yamuna safed) as analyzed by HPTLC.

11C-GSK189254: a selective radioligand for in vivo central nervous system imaging of histamine H3 receptors by PET.

Changes of gentiopicroside synthesis during somatic embryogenesis in *Gentiana macrophylla*.

The effect of dose on 2,3,7,8-TCDD tissue distribution, metabolism and elimination in CYP1A2 (-/-) knockout and C57BL/6N parental strains of mice.

Multi-residue determination of phenolic and salicylanilide anthelmintics and related compounds in bovine kidney by liquid chromatography-tandem mass spectrometry.

Short form glutathione peroxidase 4 is the essential isoform required for survival and somatic mitochondrial functions.

Antioxidant defense system in rats simultaneously intoxicated with agrochemicals.

Oxidative stress responses of rats exposed to Roundup and its active ingredient glyphosate.

Dioxin-dependent and dioxin-independent gene batteries: comparison of liver and kidney in AHR-null mice.

Comparative analysis of AhR-mediated TCDD-elicited gene expression in human liver adult stem cells.

A genome-wide screen in *Saccharomyces cerevisiae* reveals pathways affected by arsenic toxicity.

Model estimates bioaccumulation of total PCBs, dioxin-furan TEQs, and total mercury in mink liver based on concentrations in Lake Ontario water.

Histological lesions in mink jaws are a highly sensitive biomarker of effect after exposure to TCDD-like chemicals: field and literature-based confirmations.

M-LDH physically associated with sarcolemmal K ATP channels mediates cytoprotection in heart embryonic H9C2 cells.

Structural basis for the inhibition of *Mycobacterium tuberculosis* glutamine synthetase by novel ATP-competitive inhibitors.

Co-exposure to arsenic and fluoride on oxidative stress, glutathione linked enzymes, biogenic amines and DNA damage in mouse brain.

Extension of *Drosophila* life span by RNAi of the mitochondrial respiratory chain.

Genotoxicity of sodium arsenite and DNA fragmentation in ovarian cells of rat.

Inhibition of extracellular matrix assembly induces the expression of osteogenic markers in skeletal muscle cells by a BMP-2 independent mechanism.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) poisoning in Victor Yushchenko: identification and measurement of TCDD metabolites.

Preventive effect of piperonyl butoxide on cyclophosphamide-induced teratogenesis in rats.

Risk assessment of PCDD/Fs levels in human tissues related to major food items based on chemical analyses and micro-EROD assay.

Reduced arsenic clearance and increased toxicity in aquaglyceroporin-9-null mice.

Simultaneous recording of intramembrane charge movement components and calcium release in wild-type and S100A1^{-/-} muscle fibres.

Oxidative stress, protein carbonylation and heat shock proteins in the black tiger shrimp, *Penaeus monodon*, following exposure to endosulfan and deltamethrin.

Acacia Senegal gum exudate offers protection against cyclophosphamide-induced urinary bladder cytotoxicity.

Temporally resolved GC-MS-based metabolic profiling of herbicide treated plants reveals that changes in polar primary metabolites alone can distinguish herbicides of differing mode of action.

Regeneration capacity of mature embryo-derived callus in barley (*Hordeum vulgare* L.).

A unique micromechanocalorimeter for simultaneous measurement of heat rate and force production of cardiac trabeculae carneaе.

Preclinical activity of palifosfamide lysine (ZIO-201) in pediatric sarcomas including oxazaphosphorine-resistant osteosarcoma.

[Effect of bromoxynil on membrane potential and respiratory control rate in isolated mitochondria from mice liver and intervention effect of NAC].

A forward genetic screen in *Drosophila* implicates insulin signaling in age-related locomotor impairment.

Hepatic P450 enzyme activity, tissue morphology and histology of mink (*Mustela vison*) exposed to polychlorinated dibenzofurans.

[Changes of mitochondria membrane potential of the uterine smooth muscle under Mg²⁺ and Ca²⁺ influence].

Leaf-associated bacteria from transgenic white poplar producing resveratrol-like compounds: isolation, molecular characterization, and evaluation of oxidative stress tolerance.

Organic cation transporters: physiology, toxicology and special focus on ethidium as a novel substrate.

Nonlinear intestinal absorption of (1→3)-beta-D-glucan caused by absorptive and secretory transporting system.

Factors affecting SOCE activation in mammalian skeletal muscle fibers.

Reactive oxygen species as cardiovascular mediators: lessons from endothelial-specific protein overexpression mouse models.

Caenorhabditis elegans LRK-1 and PINK-1 act antagonistically in stress response and neurite outgrowth.

Biological safety of LipoFullerene composed of squalane and fullerene-C60 upon mutagenesis, photocytotoxicity, and permeability into the human skin tissue.

Dioxins interfere with differentiation of osteoblasts and osteoclasts.

Drug metabolizing enzyme expression in rat choroid plexus: effects of in vivo xenobiotics treatment.

Formation of cholesterol ozonolysis products through an ozone-free mechanism mediated by the myeloperoxidase-H₂O₂-chloride system.

Turning a plant tissue into a living cell froth through isotropic growth.

CYP1A1 and CYP1A2 expression: comparing 'humanized' mouse lines and wild-type mice; comparing human and mouse hepatoma-derived cell lines.

Evaluation of possible modes of action for acute effects of methyl iodide in laboratory animals.

In vitro glutathione conjugation of methyl iodide in rat, rabbit, and human blood and tissues.

Evaluation of respiratory parameters in rats and rabbits exposed to methyl iodide.

Two-day inhalation toxicity study of methyl iodide in the rat.

Dioxin-induced up-regulation of the active form of vitamin D is the main cause for its inhibitory action on osteoblast activities, leading to developmental bone toxicity.

Studies supporting the development of a physiologically based pharmacokinetic (PBPK) model for methyl iodide: pharmacokinetics of sodium iodide (NaI) in pregnant rabbits.

Preliminary results of small arterial substitute performed with a new cylindrical biomaterial composed of bacterial cellulose.

Short-term exposure to dioxin impairs bone tissue in male rats.

Environmental contaminants in freshwater fish and their risk to piscivorous wildlife based on a national monitoring program.

Endothelium-dependent cerebral artery dilation mediated by TRPA1 and Ca²⁺-Activated K⁺ channels.

Regulation of human bone sialoprotein gene transcription by platelet-derived growth factor-BB.

Transgenic mouse lines expressing rat AH receptor variants--a new animal model for research on AH receptor function and dioxin toxicity mechanisms.

Peroxiredoxin 5 confers protection against oxidative stress and apoptosis and also promotes longevity in Drosophila.

Correlation between hepatocarcinogenic effect of estragole and its influence on glucocorticoid induction of liver-specific enzymes and activities of FOXA and HNF4 transcription factors in mouse and rat liver.

Mitochondrial bioenergetics of testicular cells from the domestic cat (*Felis catus*)-a model for endangered species.

Hepatoprotective and curative properties of Kombucha tea against carbon tetrachloride-induced toxicity.

Dioxin-sensitive proteins in differentiating osteoblasts: effects on bone formation in vitro.

In vivo and in vitro evaluation of an *Acetobacter xylinum* synthesized microbial cellulose membrane intended for guided tissue repair.

Characterization of a rat NADPH-dependent aldo-keto reductase (AKR1B13) induced by oxidative stress.

Studies on histopathological changes in the gill, liver and kidney of *Channa punctatus* (Bloch) exposed to Alachlor.

Experimental study of the tissue reaction caused by the presence of cellulose produced by *Acetobacter xylinum* in the nasal dorsum of rabbits.

The dioxin receptor regulates the constitutive expression of the *vav3* proto-oncogene and modulates cell shape and adhesion.

Parathyroid hormone regulation of the human bone sialoprotein gene transcription is mediated through two cAMP response elements.

Polychlorinated naphthalenes in human adipose tissue from New York, USA.

Knock-in mouse lines expressing either mitochondrial or microsomal CYP1A1: differing responses to dietary benzo[a]pyrene as proof of principle.

Influences of aging and cloning methods on the capacity for somatic embryogenesis of a mature *Hevea brasiliensis* genotype.

The natural xanthone alpha-mangostin reduces oxidative damage in rat brain tissue.

Levels of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls in southern Mississippi catfish and estimation of potential health risks.

Lung development in the Holtzman rat is adversely affected by gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Ultraviolet light and photosensitising agents activate TRPA1 via generation of oxidative stress.

Antifibrogenic effects of tamoxifen in a rat model of periportal hepatic fibrosis.

The role of polyamine metabolism in neuronal injury following cerebral ischemia.

MudPIT analysis: application to human heart tissue.

Green tea extract increases cyclophosphamide-induced teratogenesis by modulating the expression of cytochrome P-450 mRNA.

Searching for anthropogenic contaminants in human breast adipose tissues using gas chromatography-time-of-flight mass spectrometry.

Ameliorating effect of curcumin on sodium arsenite-induced oxidative damage and lipid peroxidation in different rat organs.

Polychlorinated dibenzo-p-dioxins/furans and polychlorinated biphenyls in human adipose tissue from Zhejiang Province, China.

Minitags for small molecules: detecting targets of reactive small molecules in living plant tissues using 'click chemistry'.

Altered stored calcium release in skeletal myotubes deficient of triadin and junctin.

Effects of the herbicide bentazon on growth and photosystem II maximum quantum yield of the marine diatom *Skeletonema costatum*.

Oxidative stress biomarkers and heart function in bullfrog tadpoles exposed to Roundup Original.

Formation of dimethylthioarsenicals in red blood cells.

The 2,4-D herbicide effects on acetylcholinesterase activity and metabolic parameters of piava freshwater fish (*Leporinus obtusidens*).

Examining the joint toxicity of chlorpyrifos and atrazine in the aquatic species: *Lepomis macrochirus*, *Pimephales promelas* and *Chironomus tentans*.

Predictability of copper, irgarol, and diuron combined effects on sea urchin *Paracentrotus lividus*.

Bioaccumulation, sublethal toxicity, and biotransformation of sediment-associated pentachlorophenol in *Lumbriculus variegatus* (*Oligochaeta*).

Pneumoproteins as markers of paraquat lung injury: a clinical case.

Genome-wide transcriptional responses to acrolein.

Effect of butachlor on antioxidant enzyme status and lipid peroxidation in fresh water African catfish, (*Clarias gariepinus*).

Trifluralin-induced disorganization of microtubular cytoskeleton alters the development of roots in *Hordeum vulgare* L.

Biochemical effects of clomazone herbicide on piava (*Leporinus obtusidens*).

Hepatoma tissue culture (HTC) cells as a model for investigating the effects of low concentrations of herbicide on cell structure and function.

A comparative 90-day toxicity study of allyl acetate, allyl alcohol and acrolein.

Level of contamination and impact of pesticides in cupped oyster, *Crassostrea gigas*, reared in a shellfish production area in Normandy (France).

Immunotoxicity in ascidians: antifouling compounds alternative to organotins - II. The case of Diuron and TCMS pyridine.

Rhabdomyolysis from an intramuscular injection of glyphosate-surfactant herbicide.

Agent Orange exposure, Vietnam War veterans, and the risk of prostate cancer.

[Influence of pyrrolidine dithiocarbamate (PDTC) on expression of transforming growth factor beta(1), matrix metalloproteinase-2 and tissue inhibitor-1 of metalloproteinase in rats with pulmonary damage induced by paraquat].

Spermatogenesis, epididymis morphology and plasma sex steroid secretion in the male lizard *Podarcis sicula* exposed to diuron.

Role of TRPM8 and TRPA1 for cold allodynia in patients with cold injury.

Establishing the use of melatonin as an adjuvant therapeutic against paraquat-induced lung toxicity in rats.

Rotenone-induced toxicity is mediated by Rho-GTPases in hippocampal neurons.

Discriminating the molecular basis of hepatotoxicity using the large-scale characteristic molecular signatures of toxicants by expression profiling analysis.

[Change of JNK and c-Jun in lung injury associated with paraquat poisoning of rats].

Hemoperfusion using dual pulsatile pump in paraquat poisoning.

Effect of a toxicant on phagocytosis pathways in the freshwater snail *Lymnaea stagnalis*.

Herbicide effects on freshwater benthic diatoms: induction of nucleus alterations and silica cell wall abnormalities.

Developmental exposure to pentachlorophenol affects the expression of thyroid hormone receptor beta1 and synapsin I in brain, resulting in thyroid function vulnerability in rats.

Effect of long-term exposure to simazine on brain and muscle acetylcholinesterase activity of common carp (*Cyprinus carpio*).

Carbonyl-scavenging drugs & protection against carbonyl stress-associated cell injury.

Acrolein induces inflammatory response underlying endothelial dysfunction: a risk factor for atherosclerosis.

Atrazine-induced changes in aromatase activity in estrogen sensitive target tissues.

Acute renal failure induced by bentazone: 2 case reports and a comprehensive review.

A fatal intoxication from ingestion of 2-methyl-4-chlorophenoxyacetic acid (MCPA).

Dose-dependent uptake, elimination, and toxicity of monosodium methanearsonate in adult zebra finches (*Taeniopygia guttata*).

Application of physiological computational fluid dynamics models to predict interspecies nasal dosimetry of inhaled acrolein.

Perturbation of organogenesis by the herbicide atrazine in the amphibian *Xenopus laevis*.

Bioremediation of atrazine-contaminated soil by forage grasses: transformation, uptake, and detoxification.

Collaboration between monitoring authorities, regulatory authorities and test facilities on GLP principles provides confidence in data quality with an emphasis on sound science. GLP: an example of a focused effort that paid off.

Atrazine interaction with estrogen expression systems.

Effects of atrazine on fish, amphibians, and aquatic reptiles: a critical review.

Protective effects of ethyl pyruvate treatment on paraquat-intoxicated rats.

Pesticides, soft-tissue sarcoma and non-Hodgkin lymphoma--historical aspects on the precautionary principle in cancer prevention.

Pesticides, soft tissue sarcoma and non-Hodgkin lymphoma.

[Cytogenetic and other cariological parameters of exfoliative buccal cells in Vietnamese children from areas where dioxin-containing herbicides were applied].

Acrolein: unwanted side product or contribution to antiangiogenic properties of metronomic cyclophosphamide therapy?

Anti-diabetic effects of cinnamaldehyde and berberine and their impacts on retinol-binding protein 4 expression in rats with type 2 diabetes mellitus.

Critical role of acrolein in secondary injury following ex vivo spinal cord trauma.

Essential oil from leaves of *Cinnamomum osmophloeum* acts as a xanthine oxidase inhibitor and reduces the serum uric acid levels in oxonate-induced mice.

Hypothyroidism is associated with increased myostatin expression in rats.

[Interventions of enalapril on airway inflammation in rat models induced by acrolein].

Cigarette smoke-induced neurogenic inflammation is mediated by alpha,beta-unsaturated aldehydes and the TRPA1 receptor in rodents.

Acrolein-activated matrix metalloproteinase 9 contributes to persistent mucin production.

Adipose tissue-specific PPARgamma deficiency increases resistance to oxidative stress.

Characterization of *Paracoccidioides brasiliensis* PbDfg5p, a cell-wall protein implicated in filamentous growth.

Antibacterial activities of plant essential oils against *Legionella pneumophila*.

Spatial distribution of cytosolic NADP(+)-isocitrate dehydrogenase in pine embryos and seedlings.

Tissue distribution and urinary excretion of inorganic arsenic and its methylated metabolites in C57BL6 mice following subchronic exposure to arsenate in drinking water.

Thyme and cinnamon extracts induce anion secretion in piglet small intestine via cholinergic pathways.

Quinlorac-induced cell death is accompanied by generation of reactive oxygen species in maize root tissue.

A physiologically based pharmacokinetic model for intravenous and ingested dimethylarsinic acid in mice.

Inhibition of aldehyde dehydrogenase type 2 attenuates vasodilatory action of nitroglycerin in human veins.

The effects of age on radiation resistance and oxidative stress in adult *Drosophila melanogaster*.

Carbon source-dependent variation of acquired mutagen resistance of *Moniliophthora perniciosa*: similarities in natural and artificial systems.

Improved resistance to oxidative stress by a loss-of-function mutation in the *Arabidopsis* UGT71C1 gene.

Genetic transformation via somatic embryogenesis to establish herbicide-resistant opium poppy.

Callogenic studies of *Achyranthes aspera* leaf explant at different hormonal combinations.

Imbalance between ROS production and elimination results in apoptosis induction in primary smooth chorion trophoblast cells prepared from human fetal membrane tissues.

Preventing cell death induced by carbonyl stress, oxidative stress or mitochondrial toxins with vitamin B anti-AGE agents.

Opposing effects of coupled and uncoupled NOS activity on the Na⁺-K⁺ pump in cardiac myocytes.

Distribution and function of the hydrogen sulfide-sensitive TRPA1 ion channel in rat urinary bladder.

Induction of cancer chemopreventive enzymes by coffee is mediated by transcription factor Nrf2. Evidence that the coffee-specific diterpenes cafestol and kahweol confer protection against acrolein.

Development of a human physiologically based pharmacokinetic (PBPK) model for inorganic arsenic and its mono- and di-methylated metabolites.

Development of a modified in vitro skin absorption method to study the epidermal/dermal disposition of a contact allergen in human skin.

Tissue-dependent distribution and bioaccumulation of polychlorinated dibenzo-p-dioxins and dibenzofurans in vegetation samples collected from Dongting Lake, China.

Abnormal development of tracheal innervation in rats with experimental diaphragmatic hernia.

Aryl hydrocarbon receptor-mediated down-regulation of *sox9b* causes jaw malformation in zebrafish embryos.

Effect of FeSO₄ treatment on glucose metabolism in diabetic rats.

Carbamylated low-density lipoprotein induces proliferation and increases adhesion molecule expression of human coronary artery smooth muscle cells.

Arsenic-induced neurotoxicity in relation to toxicokinetics: effects on sciatic nerve proteins.

Enhancement of hypoxia-induced gene expression in fish liver by the aryl hydrocarbon receptor (AhR) ligand, benzo[a]pyrene (BaP).

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) affects bone tissue in rhesus monkeys.

Induction of cytoplasmic accumulation of p53: a mechanism for low levels of arsenic exposure to predispose cells for malignant transformation.

Elevated expression of CYP1A1 and gamma-SYNUCLEIN in human ectopic (ovarian) endometriosis compared with eutopic endometrium.

Maternal and developmental toxicity study of sodium azide in rats.

Decreased urinary beta-defensin-1 expression as a biomarker of response to arsenic.

A comprehensive review of mercury provoked autism.

Parkinson disease: primacy of age as a risk factor for mitochondrial dysfunction.

[Anti-estrogenic effect of dioxin on rat skeleton development].

Novel ryanodine receptor mutation that may cause malignant hyperthermia.

A role for the aryl hydrocarbon receptor and the dioxin TCDD in rheumatoid arthritis.

Protective effects of GH and IGF-I against iron-induced lipid peroxidation in vivo.

Liver is a target of arsenic carcinogenesis.

Accumulation of M1dG DNA adducts after chronic exposure to PCBs, but not from acute exposure to polychlorinated aromatic hydrocarbons.

Synthesis and evaluation in vitro and in vivo of a ¹¹C-labeled cyclooxygenase-2 (COX-2) inhibitor.

TEQ(S) and body burden for PCDDs, PCDFs, and dioxin-like PCBs in human adipose tissue.

Unique spatial and cellular expression patterns of Hoxa5, Hoxb4, and Hoxb6 proteins in normal developing murine lung are modified in pulmonary hypoplasia.

Sodium arsenite induces orphan nuclear receptor SHP gene expression via AMP-activated protein kinase to inhibit gluconeogenic enzyme gene expression.

Beneficial impact of L-carnitine in liver: a study in a rat model of syndrome X.

Increased levels of a unique post-translationally modified betaIVb-tubulin isotype in liver cancer.

Occurrence of two different types of glutathione S-transferase placental form-positive hepatocytes after a single administration of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats.

Acute energy restriction triggers Wallerian degeneration in mouse.

Influences of perinatal dioxin load to visual motion and oddball stimuli examined with an EEG and MEG analysis.

Concentrations of polychlorinated dibenzo-p-dioxins (PCDDs), polychlorinated dibenzofurans (PCDFs), and dioxin-like PCBs in adipose tissue of infertile men.

Involvement of SREBPs in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced disruption of lipid metabolism in male guinea pig.

Inorganic arsenic exposure affects pain behavior and inflammatory response in rat.

Effect of hemolytic and iron-deficiency anemia on intestinal absorption and tissue accumulation of cadmium.

Follow-up study of cancer incidence after chlorophenol exposure in a community in southern Finland.

Polychlorinated biphenyl-77 induces adipocyte differentiation and proinflammatory adipokines and promotes obesity and atherosclerosis.

Constitutive regulation of CYP1B1 by the aryl hydrocarbon receptor (AhR) in pre-malignant and malignant mammary tissue.

Imaging breast cancer cells and tissues using peptide-labeled fluorescent silica nanoparticles.

High prevalence of celiac disease in Mexican Mestizo adults with type 1 diabetes mellitus.

Alteration of APE1/ref-1 expression in non-small cell lung cancer: the implications of impaired extracellular superoxide dismutase and catalase antioxidant systems.

[Effect of dioxin on apoptosis of osteogenic sarcoma cells and regulation on gene expression of insulin-like growth factor binding protein 6].

Expression of AhR, CYP1A1, GSTA1, c-fos and TGF-alpha in skin lesions from dioxin-exposed humans with chloracne.

Mortality in a population exposed to dioxin after the Seveso, Italy, accident in 1976: 25 years of follow-up.

Microvascular free-tissue transfer for head and neck reconstruction in Jehovah's Witness patients.

Dose response evaluation of gene expression profiles in the skin of K6/ODC mice exposed to sodium arsenite.

Relative potency based on hepatic enzyme induction predicts immunosuppressive effects of a mixture of PCDDs/PCDFs and PCBs.

High dietary fat exacerbates arsenic-induced liver fibrosis in mice.

Arsenic-induced oxidative myocardial injury: protective role of arjunolic acid.

Comparative toxicogenomic examination of the hepatic effects of PCB126 and TCDD in immature, ovariectomized C57BL/6 mice.

The aryl hydrocarbon receptor affects distinct tissue compartments during ontogeny of the immune system.

Aryl hydrocarbon receptor targets pathways extrinsic to bone marrow cells to enhance neutrophil recruitment during influenza virus infection.

Transduction of familial amyotrophic lateral sclerosis-related mutant PEP-1-SOD proteins into neuronal cells.

Chemical contaminants, health indicators, and reproductive biomarker responses in fish from rivers in the Southeastern United States.

Enhancements of 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone (NNK) metabolism and carcinogenic risk via NNK/arsenic interaction.

Identification and biochemical characterization of a novel ryanodine receptor gene mutation associated with malignant hyperthermia.

Reversal of arsenic-induced hepatic apoptosis with combined administration of DMSA and its analogues in guinea pigs: role of glutathione and linked enzymes.

Significance of prolyl hydroxylase 2 in the interference of aryl hydrocarbon receptor and hypoxia-inducible factor-1 alpha signaling.

In utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure: effects on fetal and adult cardiac gene expression and adult cardiac and renal morphology.

Acute induction of epileptiform discharges by pilocarpine in the in vitro isolated guinea-pig brain requires enhancement of blood-brain barrier permeability.

[Outdoor work-related health hazards].

Arsenic induced toxicity on testicular tissue of mice.

Tissue levels of arsenicals and skin tumor response following administration of monomethylarsonous acid and arsenite to K6/ODC mice.

Disruption of aryl hydrocarbon receptor (AhR) induces regression of the seminal vesicle in aged male mice.

Effects of 4-tert-Octylphenol on the incubation of eggs in Japanese brown frogs (*Rana japonica*).

Cytotoxicity, histopathological, microbiological and clinical aspects of an endodontic iodoform-based paste used in pediatric dentistry: a review.

The connection between C-reactive protein and atherosclerosis.

Insight into the selectivity of arsenic trioxide for acute promyelocytic leukemia cells by characterizing *Saccharomyces cerevisiae* deletion strains that are sensitive or resistant to the metalloid.

Feasibility studies of 4'-[methyl-(11)C]thiothymidine as a tumor proliferation imaging agent in mice.

Does impaired mitochondrial function affect insulin signaling and action in cultured human skeletal muscle cells?

An evidence for regulatory cross-talk between aryl hydrocarbon receptor and glucocorticoid receptor in HepG2 cells.

C-reactive protein induces endothelial cell apoptosis and matrix metalloproteinase-9 production in human mononuclear cells: Implications for the destabilization of atherosclerotic plaque.

[Regulation of dioxin on gene expression of insulin-like growth factor II in rat osteoblasts].

[Levels of PCDD/Fs, PCBs and PBDEs compounds in human placenta tissue].

Matrix metalloproteinase-2 and -9 are induced differently by metal nanoparticles in human monocytes: The role of oxidative stress and protein tyrosine kinase activation.

Genotoxic and antigenotoxic evaluation of extracts from *Arenosclera brasiliensis*, a Brazilian marine sponge.

WNT5A selectively inhibits mouse ventral prostate development.

Dioxin causes ventral prostate agenesis by disrupting dorsoventral patterning in developing mouse prostate.

[Gene cloning, sequence analysis and tissue expression of estrogen-related receptor alpha (Erralpha) in Japanese medaka and its transcriptional responses after differential EDCs exposure].

[A comparative analysis of contractile responses induced by acetylcholine and choline in twitch and tonic frog skeletal muscle fibres].

[Disturbances in the function of cardiomyocyte ryanodine receptors of spontaneously hypertensive rats revealed by 4-chloro-m-cresol].

Nitric oxide as a signaling factor to upregulate the death-specific protein in a marine diatom, *Skeletonema costatum*, during blockage of electron flow in photosynthesis.

Exposure to sodium metam during zebrafish somitogenesis results in early transcriptional indicators of the ensuing neuronal and muscular dysfunction.

Reactive oxygen species from the uncoupling of human cytochrome P450 1B1 may contribute to the carcinogenicity of dioxin-like polychlorinated biphenyls.

A human intervention study with foods containing natural Ah-receptor agonists does not significantly show AhR-mediated effects as measured in blood cells and urine.

Protein expression in the livers and urinary bladders of hamsters exposed to sodium arsenite.

Identification of collagen types in tissues using HPLC-MS/MS.

Arsenite but not arsenate inhibits general proteoglycan synthesis in cultured arterial smooth muscle cells.

Arsenic-induced decreases in the vascular matrix.

Dioxins in adipose tissue of women in Southern Spain.

Potent induction of total cellular and mitochondrial antioxidants and phase 2 enzymes by cruciferous sulforaphane in rat aortic smooth muscle cells: cytoprotection against oxidative and electrophilic stress.

New auxin analogs with growth-promoting effects in intact plants reveal a chemical strategy to improve hormone delivery.

Lack of TRPV1 inhibits cystitis-induced increased mechanical sensitivity in mice.

Synthesis and in vivo evaluation of novel PET radioligands for imaging the endothelin-A receptor.

Stable genetic transformation of castor (*Ricinus communis* L.) via particle gun-mediated gene transfer using embryo axes from mature seeds.

Type-2 alkenes mediate synaptotoxicity in neurodegenerative diseases.

Phospholipase A(2), reactive oxygen species, and lipid peroxidation in CNS pathologies.

Oxidative stress and modification of synaptic proteins in hippocampus after traumatic brain injury.

Genetic evidence that cellulose synthase activity influences microtubule cortical array organization.

Mild mitochondrial uncoupling in mice affects energy metabolism, redox balance and longevity.

Crosstalk between AHR and Wnt signaling through R-Spondin1 impairs tissue regeneration in zebrafish.

Metabolic engineering of novel ketocarotenoid production in carrot plants.

Tracheal inflammatory response to bacterial cellulose dressing after surgical scarification in rabbits.

Molecular characterization of TRPA1 channel activation by cysteine-reactive inflammatory mediators.

Comparative study of ezrin phosphorylation among different tissues: more is good; too much is bad.

Clathrin-dependent and independent endocytosis of glucose transporter 4 (GLUT4) in myoblasts: regulation by mitochondrial uncoupling.

Genes related to apoptosis predict necrosis of the liver as a phenotype observed in rats exposed to a compendium of hepatotoxicants.

Relaxations to beta-adrenoceptor subtype selective agonists in wild-type and NOS-3-KO mouse mesenteric arteries.

Comparative temporal toxicogenomic analysis of TCDD- and TCDF-mediated hepatic effects in immature female C57BL/6 mice.

Inflorescence proliferation for somatic embryogenesis induction and suspension-derived plant regeneration from banana (*Musa AAA*, cv. 'Dwarf Cavendish') male flowers.

ROS-independent preconditioning in neurons via activation of mitoK(ATP) channels by BMS-191095.

The *Caenorhabditis elegans* AMP-activated protein kinase AAK-2 is phosphorylated by LKB1 and is required for resistance to oxidative stress and for normal motility and foraging behavior.

Low-dose dioxins alter gene expression related to cholesterol biosynthesis, lipogenesis, and glucose metabolism through the aryl hydrocarbon receptor-mediated pathway in mouse liver.

Effect of dioxin exposure on aromatase expression in ovariectomized rats.

Quercetin administration during chelation therapy protects arsenic-induced oxidative stress in mice.

The effects of water quality and age on the acute toxicity of copper to the Florida apple snail, *Pomacea paludosa*.

Sarcoplasmic reticulum Ca²⁺ release declines in muscle fibers from aging mice.

Diverse mechanisms of anti-androgen action: impact on male rat reproductive tract development.

Vascular leakage induced by exposure to arsenic via increased production of NO, hydroxyl radical and peroxy nitrite.

Organochlorine residues in the blubber and liver of bottlenose dolphins (*Tursiops truncatus*) stranded in the Canary Islands, North Atlantic Ocean.

A mixture of seven antiandrogens induces reproductive malformations in rats.

Rem inhibits skeletal muscle EC coupling by reducing the number of functional L-type Ca²⁺ channels.

Toxicogenomic analysis of gender, chemical, and dose effects in livers of TCDD- or aroclor 1254-exposed rats using a multifactor linear model.

Polychlorinated biphenyls (PCBs) and hydroxy-PCBs in adipose tissue of women in Southeast Spain.

Isotype expression, post-translational modification and stage-dependent production of tubulins in erythrocytic *Plasmodium falciparum*.

Unsaturated lipid peroxidation-derived aldehydes activate autophagy in vascular smooth-muscle cells.

[Patterns of somatic embryo formation in Siberian larch: embryological aspects].

The concept of neurogenic inflammation.

Thioredoxin 2 haploinsufficiency in mice results in impaired mitochondrial function and increased oxidative stress.

Loss of phospholipid asymmetry and elevated brain apoptotic protein levels in subjects with amnesic mild cognitive impairment and Alzheimer disease.

Toxicity reference values for mink exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) equivalents (TEQs).

Sodium azide, a bacteriostatic preservative contained in commercially available laboratory reagents, influences the responses of human platelets via the cGMP/PKG/VASP pathway.

Distribution of PCDDs, PCDFs and dioxin-like PCBs in the blood, testis and adipose tissue of suckling beef calves.

AP1 binding site is another target of FGF2 regulation of bone sialoprotein gene transcription.

E-NTPDases and ecto-5'-nucleotidase expression profile in rat heart left ventricle and the extracellular nucleotide hydrolysis by their nerve terminal endings.

Cytochrome P4501A1 expression, polychlorinated biphenyls and hydroxylated metabolites, and adipocyte size of bottlenose dolphins from the Southeast United States.

Tissue dosimetry, metabolism and excretion of pentavalent and trivalent dimethylated arsenic in mice after oral administration.

Metabolism and disposition of [14C]5-amino-o-cresol in female F344 rats and B6C3F1 mice.

In vitro and in vivo reduction of sodium arsenite induced toxicity by aqueous garlic extract.

The environmental toxicant 2,3,7,8-tetrachlorodibenzo-p-dioxin disrupts morphogenesis of the rat pre-implantation embryo.

The effect of sub-acute and sub-chronic exposure of rats to the glyphosate-based herbicide Roundup.

Testicular toxicity and mechanisms of chlorotoluron compounds in the mouse.

Health of herring gulls (*Larus argentatus*) in relation to breeding location in the early 1990s. III. Effects on the bone tissue.

Hypothermic injury: the mitochondrial calcium, ATP and ROS love-hate triangle out of balance.

Optimization and validation of capillary electrophoretic method for the analysis of amphenicols in poultry tissues.

Heterogeneous gene expression and functional activity of ryanodine receptors in resistance and conduit pulmonary as well as mesenteric artery smooth muscle cells.

Protection of arsenic-induced testicular oxidative stress by arjunolic acid.

Risk assessment methodologies for exposure of great horned owls (*Bubo virginianus*) to PCBs on the Kalamazoo River, Michigan.

Tissue uptake, mortality, and sublethal effects of monomethylarsonic acid (MMA(V)) in nestling zebra finches (*Taeniopygia guttata*).

Effect of oversulfated chondroitin-6-sulfate or oversulfated fucoidan in the activation of glutamic plasminogen by tissue plasminogen activator: role of lysine and cyanogen bromide-fibrinogen.

Thiamin phosphates in egg yolk granules and plasma of regular and embryonated eggs of hens and in five- and seven-day-old embryos.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on testicular spermatogenesis-related panels and serum sex hormone levels in rats.

Tissue-specific induction of EROD activity and CYP1A protein in *Sparus aurata* exposed to B(a)P and TCDD.

Determination of toxicity of subacute treatment of some plant growth regulators on rats.

Mechanisms of acrolein-induced myocardial dysfunction: implications for environmental and endogenous aldehyde exposure.

Targeted disruption of the glutaredoxin 1 gene does not sensitize adult mice to tissue injury induced by ischemia/reperfusion and hyperoxia.

Acute effects of glyphosate herbicide on metabolic and enzymatic parameters of silver catfish (*Rhamdia quelen*).

Evaluation of the antiandrogenic effects of flutamide, DDE, and linuron in the weanling rat assay using organ weight, histopathological, and proteomic approaches.

Evaluation of neurodevelopmental effects on rats exposed prenatally to sulfentrazone.

Prolonged toxicokinetics and toxicodynamics of paraquat in mouse brain.

[Increased expression of placenta growth factor in lung tissue of paraquat-induced rat pulmonary fibrosis model].

[Effects of high dose ambroxol on lung injury induced by paraquat in rats].

[Changes of p38 MAPK and nuclear factor-kappa B in lung tissue of acute paraquat poisoned rats].

Fate of atrazine in a grassed phytoremediation system.

Identification of differentially expressed proteins in striatum of maneb- and paraquat-induced Parkinson's disease phenotype in mouse.

Combination of a pesticide exposure and a bacterial challenge: in vivo effects on immune response of Pacific oyster, *Crassostrea gigas* (Thunberg).

[Immunosuppressive treatment due to paraquat poisoning].

Trifluralin toxicity in a Chagas disease mouse model.

Stereoselective toxicokinetics and tissue distribution of ethofumesate in rabbits.

Biological responses of wheat (*Triticum aestivum*) plants to the herbicide chlorotoluron in soils.

Pesticide poisoning.

Time- and dose-dependent effects of roundup on human embryonic and placental cells.

Effects of four rice herbicides on some metabolic and toxicology parameters of teleost fish (*Leporinus obtusidens*).

Antifibrotic effect of captopril and enalapril on paraquat-induced lung fibrosis in rats.

Induction of tibial dyschondroplasia by carbamate and thiocarbamate pesticides.

Relationship between pulmonary surfactant protein and lipid peroxidation in lung injury due to paraquat intoxication in rats.

Cardiovascular effects of herbicides and formulated adjuvants on isolated rat aorta and heart.

No direct hepatotoxic potential following a multiple-low dose paraquat exposure in rat as related to its bioaccumulation.

The concept of "aldehyde load" in neurodegenerative mechanisms: cytotoxicity of the polyamine degradation products hydrogen peroxide, acrolein, 3-aminopropanal, 3-acetamidopropanal and 4-aminobutanal in a retinal ganglion cell line.

Effects of paraquat on anti-oxidant system in rats.

An unusual toxic cause of hemolytic-uremic syndrome.

Effect of clomazone herbicide on biochemical and histological aspects of silver catfish (*Rhamdia quelen*) and recovery pattern.

P38 and ERK mitogen-activated protein kinases mediate acrolein-induced apoptosis in Chinese hamster ovary cells.

Toxicity studies of butachlor to the freshwater fish *Channa punctata* (Bloch).

[Changes of serum cytokine caused by acute paraquat poisoning].

Safeners coordinately induce the expression of multiple proteins and MRP transcripts involved in herbicide metabolism and detoxification in *Triticum tauschii* seedling tissues.

Gestational exposure to nonylphenol causes precocious mammary gland development in female rat offspring.

Dopaminergic toxicity of the herbicide atrazine in rat striatal slices.

Cancer incidence and mortality in a New Zealand community potentially exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin from 2,4,5-trichlorophenoxyacetic acid manufacture.

Atrazine-induced reproductive tract alterations after transplacental and/or lactational exposure in male Long-Evans rats.

Developmental toxicity evaluation of triclopyr butoxyethyl ester and triclopyr triethylamine salt in the CD rat.

Lipid oxidation products and oxidized low-density lipoproteins impair platelet-derived growth factor receptor activity in smooth muscle cells: implication in atherosclerosis.

Oxidative stress mediates tau-induced neurodegeneration in *Drosophila*.

Reactive aldehyde modification of thioredoxin-1 activates early steps of inflammation and cell adhesion.

4-Hydroxynonenal, an endogenous aldehyde, causes pain and neurogenic inflammation through activation of the irritant receptor TRPA1.

Research toward the development of a biologically based dose response assessment for inorganic arsenic carcinogenicity: a progress report.

Sensitization of TRPA1 by PAR2 contributes to the sensation of inflammatory pain.

Acrolein induces cyclooxygenase-2 and prostaglandin production in human umbilical vein endothelial cells: roles of p38 MAP kinase.

Prostacyclin prevents pulmonary endothelial cell apoptosis induced by cigarette smoke.

Undersulfation of glycosaminoglycans induced by sodium chlorate treatment affects the progression of C6 rat glioma, in-vivo.

Noxious compounds activate TRPA1 ion channels through covalent modification of cysteines.

Antiplatelet and antithrombotic activities of essential oil from wild *Ocotea quixos* (Lam.) Kosterm. (Lauraceae) calices from Amazonian Ecuador.

Mitochondrial damage modulates alternative splicing in neuronal cells: implications for neurodegeneration.

Factors affecting efficient plant regeneration from wheat mature embryos.

Effects of different concentrations of 2,4-D and BAP on somatic embryogenesis induction in saffron (*Crocus sativus* L.).

Oral absorption and oxidative metabolism of atrazine in rats evaluated by physiological modeling approaches.

Somatic embryogenesis in peach palm using the thin cell layer technique: induction, morpho-histological aspects and AFLP analysis of somaclonal variation.

Tissue distribution and urinary excretion of dimethylated arsenic and its metabolites in dimethylarsinic acid- or arsenate-treated rats.

Auxin pulse treatment holds the potential to enhance efficiency and practicability of somatic embryogenesis in potato.

Induction of COX-2 by acrolein in rat lung epithelial cells.

Distribution of ¹⁴C-atrazine following an acute lactational exposure in the Wistar rat.

Improved HPLC-MS/MS method for determination of isoxaflutole (balance) and its metabolites in soils and forage plants.

Mitochondria are a major source of paraquat-induced reactive oxygen species production in the brain.

Is the titer of adipokinetic peptides in *Leptinotarsa decemlineata* fed on genetically modified potatoes increased by oxidative stress?

Detection and quantitation of acrolein-derived 1,N²-propanodeoxyguanosine adducts in human lung by liquid chromatography-electrospray ionization-tandem mass spectrometry.

Impact of the loss of AtMSH2 on double-strand break-induced recombination between highly diverged homeologous sequences in *Arabidopsis thaliana* germinal tissues.

Characterization of the uptake of organic anion transporter (OAT) 1 and OAT3 substrates by human kidney slices.

Activation of the death receptor pathway of apoptosis by the aldehyde acrolein.

Sequestration of a fluorinated analog of 2,4-dichlorophenol and metabolic products by *L. minor* as evidenced by ¹⁹F NMR.

2,4,5-Trichlorophenoxyacetic acid promotes somatic embryogenesis in the rose cultivar "Livin' Easy" (*Rosa* sp.).

Metabolic differences between two dimethylthioarsenicals in rats.

Thidiazuron-induced regeneration of *Echinacea purpurea* L.: micropropagation in solid and liquid culture systems.

Household exposure to pesticides and risk of childhood hematopoietic malignancies: The ESCALE study (SFCE).

Effects of 4-chloro-2,6-bis-(2-hydroxyl-benzyl)-phenol on healing of skin wounds and growth of bacteria.

Folate deficiency enhances arsenic effects on expression of genes involved in epidermal differentiation in transgenic K6/ODC mouse skin.

Effects of some boron compounds on peripheral human blood.

Pharmacokinetics of 3-[¹²⁵I]iodo-alpha-methyl-L-tyrosine, a tumor imaging agent, after probenecid loading in mice implanted with colon cancer DLD-1 cells.

Toxic effects of TCDD on osteogenesis through altering IGFBP-6 gene expression in osteoblasts.

The effect of dietary glycine on the hepatic tumor promoting activity of polychlorinated biphenyls (PCBs) in rats.

Genetic susceptibility to environmental toxicants in ALS.

[The etiology of congenital diaphragmatic hernia and esophageal atresia: the Hox genes].

Arsenic neurotoxicity--a review.

Effect of antenatal tetrandrine administration on endothelin-1 and epidermal growth factor levels in the lungs of rats with experimental diaphragmatic hernia.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin alters retinoid homeostasis in maternal and perinatal tissues of the Holtzman rat.

Studies on the cell treatment conditions to elicit lipolytic responses from 3T3-L1 adipocytes to TCDD, 2,3,7,8-tetrachlorodibenzo-p-dioxin.

2,3,7,8-TCDD exposure, endothelial dysfunction and impaired microvascular reactivity.

Embryonic essential myosin light chain regulates fetal lung development in rats.

Comparison of fathead minnow ovary explant and H295R cell-based steroidogenesis assays for identifying endocrine-active chemicals.

Combination of 17beta-estradiol with the environmental pollutant TCDD is involved in pathogenesis of endometriosis via up-regulating the chemokine I-309-CCR8.

Bisphenol-A and chlorinated derivatives in adipose tissue of women.

Association between serum concentrations of persistent organic pollutants and self-reported cardiovascular disease prevalence: results from the National Health and Nutrition Examination Survey, 1999-2002.

Artificial sweeteners and salts producing a metallic taste sensation activate TRPV1 receptors.

Imatinib mesylate inhibits cell invasion of malignant peripheral nerve sheath tumor induced by platelet-derived growth factor-BB.

Polychlorinated biphenyls modulated tumorigenesis in Sprague Dawley rats: correlation with mixed function oxidase activities and superoxide (O₂^{*}) formation potentials and implied mode of action.

Transplacental arsenic carcinogenesis in mice.

Sarcoma risk and dioxin emissions from incinerators and industrial plants: a population-based case-control study (Italy).

Insulin resistance and the mitochondrial link. Lessons from cultured human myotubes.

Serum dioxin concentrations and risk of uterine leiomyoma in the Seveso Women's Health Study.

Ferula gummosa Boiss. Embryogenic culture and karyological changes.

Oxidative stress kills human primary oligodendrocytes via neutral sphingomyelinase: implications for multiple sclerosis.

The menace of endocrine disruptors on thyroid hormone physiology and their impact on intrauterine development.

Positive associations of serum concentration of polychlorinated biphenyls or organochlorine pesticides with self-reported arthritis, especially rheumatoid type, in women.

Proteome and cytoskeleton responses in osteosarcoma cells with reduced OXPHOS activity.

Exposure in utero to 2,2',3,3',4,6'-hexachlorobiphenyl (PCB 132) impairs sperm function and alters testicular apoptosis-related gene expression in rat offspring.

Genetic modification of chondrocytes with insulin-like growth factor-1 enhances cartilage healing in an equine model.

Post-Injury Administration of Mitochondrial Uncouplers Increases Tissue Sparing and Improves Behavioral Outcome following Traumatic Brain Injury in Rodents.

Inhibition of NF- κ B does not induce c-Jun N-terminal kinase-mediated apoptosis in reperfusion injury.

Inhibiting glycosphingolipid synthesis improves glycemic control and insulin sensitivity in animal models of type 2 diabetes.

Effects of low-level arsenic exposure on the developmental toxicity of anilofos in rats.

A gene-environment study of the paraoxonase 1 gene and pesticides in amyotrophic lateral sclerosis.

Some clinico and histopathological changes in female goats experimentally exposed to dioxin.

Activation of protein kinase C and disruption of endothelial monolayer integrity by sodium arsenite-- Potential mechanism in the development of atherosclerosis.

Visual diagnosis: an adolescent who has fever, joint pain, a rash, and "blacking out" episodes.

Proteomic analysis of exfoliation deposits.

In utero arsenic exposure induces early onset of atherosclerosis in ApoE^{-/-} mice.

Prevention of aneuploidy by S-adenosyl-methionine in human cells treated with sodium arsenite.

Long-term effects of subcutaneously injected 2,3,7,8-tetrachlorodibenzo-p-dioxin on the liver of rhesus monkeys.

Effects of various pesticides on human 5 α -reductase activity in prostate and LNCaP cells.

Developmental exposure of mice to TCDD elicits a similar uterine phenotype in adult animals as observed in women with endometriosis.

Internal dose-effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in gonadotropin-primed weanling rat model.

Synthesis and in vitro evaluation of targeted tetracycline derivatives: effects on inhibition of matrix metalloproteinases.

Inhibition of CYP1A enzymes by alpha-naphthoflavone causes both synergism and antagonism of retene toxicity to rainbow trout (*Oncorhynchus mykiss*).

[Effect of tetrandrine on endothelin expression in the lungs and clinical significance thereof: experiment with rat models with nitrofen-induced congenital diaphragmatic hernia].

Reduced expression of aquaporin 5 water channel in nitrofen-induced hypoplastic lung with congenital diaphragmatic hernia rat model.

Placental transfer of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls in Taiwanese mothers in relation to menstrual cycle characteristics.

Uncoupling of oxidative phosphorylation enables *Candida albicans* to resist killing by phagocytes and persist in tissue.

Arsenic-induced toxicity and the protective role of ascorbic acid in mouse testis.

Periradicular repair after two-visit endodontic treatment using two different intracanal medications compared to single-visit endodontic treatment.

Influence of dietary fat and zinc supplementation on the iron utilization in growing rats.

Investigation on the genotoxic effects of long-term administration of sodium arsenite in bone marrow and testicular cells in vivo using the comet assay.

[¹¹C]Vinblastine syntheses and preliminary imaging in cancer patients.

Alcoholic myopathy and acetaldehyde.

Arsenic methylation, urinary arsenic metabolites and human diseases: current perspective.

Is any link between inflammation and coronary artery ectasia?

Involvement of substance P and neurogenic inflammation in arsenic-induced early vascular dysfunction.

The influence of exposure history on arsenic accumulation and toxicity in the killifish, *Fundulus heteroclitus*.

Phytanic acid impairs mitochondrial respiration through protonophoric action.

Constitutive mRNA expression of various glutathione S-transferase isoforms in different tissues of mice.

Osteoblast protects osteoclast devoid of sodium-dependent vitamin C transporters from oxidative cytotoxicity of ascorbic acid.

Mitochondrial swelling impairs the transport of organelles in cerebellar granule neurons.

[Inactivation of AMP-deaminase from white muscle of *Cyprinus carpio* in the systems with free radical oxidation].

Polychlorinated biphenyls 105 and 118 form thyroid hormone receptor agonists after cytochrome P4501A1 activation in rat pituitary GH3 cells.

Metabolic fate of [¹⁴C]-2,4-dichlorophenol in tobacco cell suspension cultures.

Disruption of clock gene expression alters responses of the aryl hydrocarbon receptor signaling pathway in the mouse mammary gland.

An adaptable internal dose model for risk assessment of dietary and soil dioxin exposures in young children.

Increased Ca²⁺ storage capacity of the skeletal muscle sarcoplasmic reticulum of transgenic mice over-expressing membrane bound calcium binding protein junctate.

Analysis of cell death inducing compounds.

The nitric oxide prodrug, V-PYRRO/NO, mitigates arsenic-induced liver cell toxicity and apoptosis.

Tissue iron distribution and urinary mineral excretion vary depending on the form of iron (FeSO₄ or NaFeEDTA) and the route of administration (oral or subcutaneous) in rats given high doses of iron.

Induction of somatic embryogenesis in saffron using thidiazuron (TDZ).

Lipid peroxidation-induced DNA damage in cancer-prone inflammatory diseases: a review of published adduct types and levels in humans.

Growth optimization of *Zataria multiflora* Boiss. tissue cultures and rosmarinic acid production improvement.

A noninvasive test of exposition to toxicants: quantitative analysis of cytochrome P4501A expression in fish scales.

Relationships between tissue levels of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), mRNAs, and toxicity in the developing male Wistar(Han) rat.

Drosophila DJ-1 mutants are sensitive to oxidative stress and show reduced lifespan and motor deficits.

Aryl hydrocarbon receptor splice variants in the dioxin-resistant rat: tissue expression and transactivational activity.

Importance of hepatic induction of constitutive androstane receptor and other transcription factors that regulate xenobiotic metabolism and transport.

Environmental toxicants may modulate osteoblast differentiation by a mechanism involving the aryl hydrocarbon receptor.

Expression of the small heat shock protein gene, hsp30, in *Rana catesbeiana* fibroblasts.

Identification of dioxin and dioxin-like polychlorobiphenyls in plant tissues and contaminated soils.

An angiotensin II type-I receptor blocker, olmesartan medoxomil, attenuates lipid peroxidation in renal injury induced by subtotal nephrectomy.

Isoproterenol hydrochloride augments collagen proliferation and ATPase activity in mice soleus and EDL muscles.

Src family tyrosine kinases mediate contraction of rat isolated tail arteries in response to a hyposmotic stimulus.

Arsenite induced oxidative damage in mouse liver is associated with increased cytokeratin 18 expression.

Catalase takes part in rat liver mitochondria oxidative stress defense.

Metabolic activation of herbal and dietary constituents and its clinical and toxicological implications: an update.

In vitro and in vivo characterization of [3H]CNS-5161--a use-dependent ligand for the N-methyl-D-aspartate receptor in rat brain.

Short-term hormone release from adult female rat hypothalamic and pituitary explants is not altered by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Gonadotropin-releasing hormone neurons express estrogen receptor-beta.

Conditional deletion of cytochrome P450 oxidoreductase in the liver and gastrointestinal tract: a new model for studying the functions of the P450 system.

Sodium arsenite affects Na⁺ transport in the isolated skin of the toad *Pleurodema thaul*.

A proteomics approach to identify the ubiquitinated proteins in mouse heart.

Nonintegrin laminin receptor precursor protein is expressed on olfactory stem and progenitor cells.

Bioanalytical characterisation of estrogen and arylhydrocarbon receptor agonists in transplanted blue mussels (*Mytilus edulis*): proof of concept.

The Environmental Specimen Bank for Human Tissues as part of the German Environmental Specimen Bank.

MRP2 and acquired tolerance to inorganic arsenic in the kidney of killifish (*Fundulus heteroclitus*).

An oxidative stress-specific bacterial cell array chip for toxicity analysis.

A novel promoter element containing multiple overlapping xenobiotic and hypoxia response elements mediates induction of cytochrome P450S1 by both dioxin and hypoxia.

[Mechanisms underlying enhanced vasodilator responses to various vasodilator agents following endothelium removal in rat mesenteric resistance arteries].

Molecular characterization and tissue distribution of aryl hydrocarbon receptor nuclear translocator isoforms, ARNT1 and ARNT2, and identification of novel splice variants in common cormorant (*Phalacrocorax carbo*).

Concentration and distribution of dioxins and related compounds in human tissues.

Tissue residues, metabolism, and excretion of radiolabeled sodium chlorate (Na[³⁶Cl]O₃) in rats.

The Slr2-type MAP kinase Bmp3 of *Botrytis cinerea* is required for normal saprotrophic growth, conidiation, plant surface sensing and host tissue colonization.

Cigarette smoking as a risk factor for atherosclerosis and renal disease: novel pathogenic insights.

In vitro effects of reactive oxygen metabolites, with and without flunixin meglumine, on equine colonic mucosa.

Mouse lung CYP1A1 catalyzes the metabolic activation of 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP).

Halogenated organic contaminants and mercury in northern fulmars (*Fulmarus glacialis*): levels, relationships to dietary descriptors and blood to liver comparison.

Plasma polymer coated surfaces for serum-free culture of limbal epithelium for ocular surface disease.

In vitro and in vivo characterization of alkyl hydroperoxide reductase mutant strains of *Helicobacter hepaticus*.

Smoke from traditional commercial, harm reduction and research brand cigarettes impairs oviductal functioning in hamsters (*Mesocricetus auratus*) in vitro.

Heparan sulfate proteoglycans (HSPGs) modulate BMP2 osteogenic bioactivity in C2C12 cells.

Expression and activity of arsenic methyltransferase Cyt19 in rat tissues.

Effect of natural phenol derivatives on skeletal type sarcoplasmic reticulum Ca²⁺-ATPase and ryanodine receptor.

Vitamin E supplementation protects oxidative stress during arsenic and fluoride antagonism in male mice.

The anti-apoptotic activity of albumin for endothelium is mediated by a partially cryptic protein domain and reduced by inhibitors of G-coupled protein and PI-3 kinase, but is independent of radical scavenging or bound lipid.

Use of model-based compartmental analysis to study vitamin A kinetics and metabolism.

Effects of combined administration of captopril and DMSA on arsenite induced oxidative stress and blood and tissue arsenic concentration in rats.

EU biotech crop regulations and environmental risk: a case of the emperor's new clothes?

Control of the autophagy maturation step by the MAPK ERK and p38: lessons from environmental carcinogens.

Influence on mitochondria and cytotoxicity of different antibiotics administered in high concentrations on primary human osteoblasts and cell lines.

TCDD-induced alterations in gene expression profiles of the developing mouse paw do not influence morphological differentiation of this potential target tissue.

Aryl hydrocarbon receptor activation impairs extracellular matrix remodeling during zebra fish fin regeneration.

Dynamic analysis of ABA accumulation in relation to the rate of ABA catabolism in maize tissues under water deficit.

Concentration of polychlorinated dibenzo-p-dioxins, polychlorinated dibenzofurans and dioxin-like PCBs in human adipose tissue from Turkish men.

In vivo functional analysis of polyglutamic acid domains in recombinant bone sialoprotein.

White adipose tissue: storage and effector site for environmental pollutants.

Unfertilized ovary: a novel explant for coconut (*Cocos nucifera* L.) somatic embryogenesis.

Accumulation of organic and inorganic contaminants in shellfish collected in estuarine waters near Pensacola, Florida: contamination profiles and risks to human consumers.

Photochemical nucleophile mapping: identification of Tyr311 within the catalytic domain of rabbit muscle glyceraldehyde-3-phosphate dehydrogenase.

Diquat induces renal proximal tubule injury in glutathione reductase-deficient mice.

Arsenic resistance in *Pteris vittata* L.: identification of a cytosolic triosephosphate isomerase based on cDNA expression cloning in *Escherichia coli*.

Molecular epidemiologic evidence for diabetogenic effects of dioxin exposure in U.S. Air force veterans of the Vietnam war.

P-glycoprotein induction: an antidotal pathway for paraquat-induced lung toxicity.

Single high dose dexamethasone treatment decreases the pathological score and increases the survival rate of paraquat-intoxicated rats.

DNA microarray analysis of pulmonary fibrosis three months after exposure to paraquat in rats.

Lack of effects of atrazine on estrogen-responsive organs and circulating hormone concentrations in sexually immature female Japanese quail (*Coturnix coturnix japonica*).

Effect of glyphosate herbicide on acetylcholinesterase activity and metabolic and hematological parameters in piava (*Leporinus obtusidens*).

Introduction of cAMP and establishment of neutral lipids alterations as pollution biomarkers using the mussel *Mytilus galloprovincialis*. Correlation with a battery of biomarkers.

Proteomic analysis of root meristems and the effects of acetohydroxyacid synthase-inhibiting herbicides in the root of *Medicago truncatula*.

Effects of clomazone herbicide on hematological and some parameters of protein and carbohydrate metabolism of silver catfish *Rhamdia quelen*.

Evaluation of the methoxytriazine herbicide prometon using a short-term fathead minnow reproduction test and a suite of in vitro bioassays.

Kinetics of paraquat in the isolated rat lung: Influence of sodium depletion.

Bacterial endophyte-enhanced phytoremediation of the organochlorine herbicide 2,4-dichlorophenoxyacetic acid.

Histological changes and micronucleus induction in the zebra mussel *Dreissena polymorpha* after paraquat exposure.

Teratological study of the herbicide 4-chloro-2-methylphenoxyacetic acid in rabbits.

Toxic effects of irgarol and diuron on sea urchin *Paracentrotus lividus* early development, fertilization, and offspring quality.

Protective effects of N-acetylcysteine treatment post acute paraquat intoxication in rats and in human lung epithelial cells.

[Influence of ambroxol on paraquat-induced lung tissue injury and change of pulmonary surfactant-associated protein A in the experimental rats].

[Effect of baicalin on expression of heme oxygenase-1 in lung injury of rats associated with paraquat poisoning].

H₂O₂ induces abnormal tail flexure in *Xenopus* embryos: similarities with Paraquat teratogenic effects.

Histopathological effects induced by paraquat during *Xenopus laevis* primary myogenesis.

Effects of herbicide chlorimuron-ethyl on physiological mechanisms in wheat (*Triticum aestivum*).

Pesticide assessment: Protecting public health on the home turf.

Analysis of reproductive toxicity and classification of glufosinate-ammonium.

Effects of paraquat on the freshwater fish *Channa punctata* (Bloch): non-enzymatic antioxidants as biomarkers of exposure.

Characterizing the ovotoxicity of cyclophosphamide metabolites on cultured mouse ovaries.

Atrazine concentrations, gonadal gross morphology and histology in ranid frogs collected in Michigan agricultural areas.

Hodgkin lymphoma, multiple myeloma, soft tissue sarcomas, insect repellents, and phenoxyherbicides.

Mortality from ischemic heart disease and diabetes mellitus (type 2) in four U.S. wheat-producing states: a hypothesis-generating study.

Orphan nuclear receptor pregnane X receptor sensitizes oxidative stress responses in transgenic mice and cancerous cells.

Effects of atrazine on sexual maturation in female Japanese quail induced by photostimulation or exogenous gonadotropin.

Organ-specific expression of glutathione S-transferases and the efficacy of herbicide safeners in *Arabidopsis*.

Neuroglobin and cytoglobin overexpression protects human SH-SY5Y neuroblastoma cells against oxidative stress-induced cell death.

Polyamines in renal failure.

Contrasting genome-wide distribution of 8-hydroxyguanine and acrolein-modified adenine during oxidative stress-induced renal carcinogenesis.

Effect of plasma homocysteine level and urinary monomethylarsonic acid on the risk of arsenic-associated carotid atherosclerosis.

Mutational analysis of DJ-1 in *Drosophila* implicates functional inactivation by oxidative damage and aging.

Increased levels of 4-hydroxynonenal and acrolein, neurotoxic markers of lipid peroxidation, in the brain in Mild Cognitive Impairment and early Alzheimer's disease.

Acute oxidative stress is associated with cell proliferation in the mouse liver.

Alcohol alters skeletal muscle heat shock protein gene expression in rats: these effects are moderated by sex, raised endogenous acetaldehyde, and starvation.

Oxidative stress in head trauma in aging.

Tissue distribution of lipid peroxidation product acrolein in human colon carcinogenesis.

Lisinopril ameliorates paraquat-induced lung fibrosis.

Hyperbaric oxygen preconditioning induces tolerance against spinal cord ischemia by upregulation of antioxidant enzymes in rabbits.

Treatment of experimental chronic chagas disease with trifluralin.

An oral adsorbent, AST-120, suppresses oxidative stress in uremic rats.

Effects of alpha tocopherol and probucol supplements on allergen-induced airway inflammation and hyperresponsiveness in a mouse model of allergic asthma.

Acrolein generation stimulates hypercontraction in isolated human blood vessels.

Potential application of urea-derived herbicides as cytokinins in plant tissue culture.

2-Benzoxazolinone (BOA) induced oxidative stress, lipid peroxidation and changes in some antioxidant enzyme activities in mung bean (*Phaseolus aureus*).

Estradiol and resveratrol stimulating effect on osteocalcin, but not osteonectin and collagen-1alpha gene expression in primary culture of rat calvarial osteoblast-like cells.

Expression of CP4 EPSPS in microspores and tapetum cells of cotton (*Gossypium hirsutum*) is critical for male reproductive development in response to late-stage glyphosate applications.

Acrolein-mediated mechanisms of neuronal death.

Paraquat-induced lipid peroxidation: effects of ovariectomy and estrogen receptor antagonist.

Contractile mechanisms coupled to TRPA1 receptor activation in rat urinary bladder.

MHC genes and oxidative stress in sticklebacks: an immuno-ecological approach.

Cytosolic and localized inhibition of phosphodiesterase by atrazine in swine tissue homogenates.

Tissue culture and transient transformation of Maretail (*Conyza canadensis* (L.) Cronquist).

Determination of atrazine and its metabolites in mouse urine and plasma by LC-MS analysis.

New insights on glyphosate mode of action in nodular metabolism: Role of shikimate accumulation.

Controls on atrazine leaching through a soil-unsaturated fractured limestone sequence at BrÃ©villes, France.

Enigma, a mitochondrial protein affecting lifespan and oxidative stress response in *Drosophila*.

Gene expression in rat lungs during early response to paraquat-induced oxidative stress.

Hypokalemia potentiates ouabain's effect on calcium cycling and cardiac growth.

Plasma organochlorine concentrations and bone ultrasound measurements: a cross-sectional study in peri- and postmenopausal Inuit women from Greenland.

Serum dioxin-like compounds and aromatase (CYP19) expression in endometriotic tissues.

Developmental toxicity of 4-ring polycyclic aromatic hydrocarbons in zebrafish is differentially dependent on AH receptor isoforms and hepatic cytochrome P4501A metabolism.

Mothball withdrawal encephalopathy: case report and review of paradichlorobenzene neurotoxicity.

Developmental dental toxicity of dioxin and related compounds--a review.

[Peripheral neuropathy induced by acute methyl bromide skin exposure: a case report].

Pharmacologic and functional characterization of malignant hyperthermia in the R163C RyR1 knock-in mouse.

Comparative toxicogenomic analysis of the hepatotoxic effects of TCDD in Sprague Dawley rats and C57BL/6 mice.

Perinatal exposure to PCB 153, but not PCB 126, alters bone tissue composition in female goat offspring.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (Cas No. 31508-00-6) in female Harlan Sprague-Dawley rats (gavage studies).

Cell cycle proteins in normal and chemically induced abnormal secondary palate development: a review.

Teratogen-induced, dietary and genetic models of congenital diaphragmatic hernia share a common mechanism of pathogenesis.

Airway smooth muscle dysfunction precedes teratogenic congenital diaphragmatic hernia and may contribute to hypoplastic lung morphogenesis.

Environmental arsenic exposure and sputum metalloproteinase concentrations.

Carcinogenicity of "non-dioxinlike" polychlorinated biphenyls.

Risk assessments of polychlorinated dibenzo-p-dioxins, polychlorinated dibenzofurans, and dioxin-like polychlorinated biphenyls in food.

Carcinogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in experimental models.

Peristalsis of airway smooth muscle is developmentally regulated and uncoupled from hypoplastic lung growth.

Over-expression of AhR (aryl hydrocarbon receptor) induces neural differentiation of Neuro2a cells: neurotoxicology study.

Cancer and pesticides: an overview and some results of the Italian multicenter case-control study on hematolymphopoietic malignancies.

The therapeutic effect of tissue cultured root of wild *Panax ginseng* C.A. Mayer on spermatogenic disorder.

Use of a physiologically based pharmacokinetic model for rats to study the influence of body fat mass and induction of CYP1A2 on the pharmacokinetics of TCDD.

Antimicrobial efficiency of some antiseptic products on endodontic microflora isolated from gangrenous pulp tissue.

Dioxin-induced chloracne--reconstructing the cellular and molecular mechanisms of a classic environmental disease.

Connexin 43 gene expression in mice with cardiopulmonary developmental defects.

Ah receptor: dioxin-mediated toxic responses as hints to deregulated physiologic functions.

Down-regulation of wt1 expression in leukemia cell lines as part of apoptotic effect in arsenic treatment using two compounds.

Molluscicidal effect of fenitrothion and anilofos on *Lymnaea natalensis* and *Biomphalaria alexandrina* snails and on the free larval stages of *Schistosoma mansoni*.

Epigenetic inactivation of the dioxin-responsive cytochrome P4501A1 gene in human prostate cancer.

Insulin-like growth factor-I increases bone sialoprotein (BSP) expression through fibroblast growth factor-2 response element and homeodomain protein-binding site in the proximal promoter of the BSP gene.

The constitutively active Ah receptor (CA-Ahr) mouse as a potential model for dioxin exposure--effects in vital organs.

Estimated cancer risk of dioxins to humans using a bioassay and physiologically based pharmacokinetic model.

For dioxin-induced birth defects, mouse or human CYP1A2 in maternal liver protects whereas mouse CYP1A1 and CYP1B1 are inconsequential.

Arsenic speciation transported through the placenta from mother mice to their newborn pups.

Proinflammatory changes in human umbilical cord vein endothelial cells can be induced neither by native nor by modified CRP.

A potential endogenous ligand for the aryl hydrocarbon receptor has potent agonist activity in vitro and in vivo.

The effect of perinatal TCDD exposure on caries susceptibility in rats.

Metabolic effects of dinoseb, diazinon and esfenvalerate in eyed eggs and alevins of Chinook salmon (*Oncorhynchus tshawytscha*) determined by ¹H NMR metabolomics.

[Environmental pollution from dioxins and soft tissue sarcomas in the population of Venice and Mestre: an example of the use of current electronic information sources].

NTP technical report on the toxicology and carcinogenesis studies of 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (Gavage studies).

Relative cancer potencies of selected dioxin-like compounds on a body-burden basis: comparison to current toxic equivalency factors (TEFs).

Synchrotron microradiography study on acute lung injury of mouse caused by PM(2.5) aerosols.

Assessment of effects in mink caused by consumption of carp collected from the Saginaw River, Michigan, USA.

Oxidation of myosin heavy chain and reduction in force production in hyperthyroid rat soleus.

Effect of *Centella asiatica* on arsenic induced oxidative stress and metal distribution in rats.

Enhanced expression of plasma glutathione peroxidase in the thymus of mice treated with TCDD and its implication for TCDD-induced thymic atrophy.

Oxidative damage of DJ-1 is linked to sporadic Parkinson and Alzheimer diseases.

Differential transcriptional regulation by mouse single-minded 2s.

Functional properties of ryanodine receptors carrying three amino acid substitutions identified in patients affected by multi-minicore disease and central core disease, expressed in immortalized lymphocytes.

In vivo-in vitro toxicogenomic comparison of TCDD-elicited gene expression in Hepa1c1c7 mouse hepatoma cells and C57BL/6 hepatic tissue.

Adverse health effects in humans exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

NTP technical report on the toxicology and carcinogenesis studies of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (CAS No. 1746-01-6) in female Harlan Sprague-Dawley rats (Gavage Studies).

Clinical and experimental applications of NIR-LED photobiomodulation.

The MAPKKK Mekk1 regulates the expression of Turandot stress genes in response to septic injury in *Drosophila*.

Involvement of cytoskeleton in AhR-dependent CYP1A1 expression.

Effects of combined 17beta-estradiol with TCDD on secretion of chemokine IL-8 and expression of its receptor CXCR1 in endometriotic focus-associated cells in co-culture.

NADPH oxidase in the renal medulla causes oxidative stress and contributes to salt-sensitive hypertension in Dahl S rats.

Therapeutic value of melatonin in an experimental model of liver injury and regeneration.

Uncertainties related to the assignment of a toxic equivalency factor for 1,2,3,4,6,7,8,9-octachlorodibenzo-p-dioxin.

The early embryo loss caused by 2,3,7,8-tetrachlorodibenzo-p-dioxin may be related to the accumulation of this compound in the uterus.

Boron ameliorates fulminant hepatic failure by counteracting the changes associated with the oxidative stress.

Elevation of circulating endothelial microparticles in patients with chronic renal failure.

Depletion of securin increases arsenite-induced chromosome instability and apoptosis via a p53-independent pathway.

Transactivation of fetal liver kinase-1/kinase-insert domain-containing receptor by lysophosphatidylcholine induces vascular endothelial cell proliferation.

An antioxidative and antiinflammatory agent for potential treatment of osteoarthritis from *Ecklonia cava*.

Pesticides and Parkinson's disease--is there a link?

Neuroprotective effects of stearic acid against toxicity of oxygen/glucose deprivation or glutamate on rat cortical or hippocampal slices.

Genetic differences in lethality of newborn mice treated in utero with coplanar versus non-coplanar hexabromobiphenyl.

The citrus flavonoid naringenin stimulates DNA repair in prostate cancer cells.

Occupational factors and risk of adult bone sarcomas: a multicentric case-control study in Europe.

Amyotrophic lateral sclerosis and exposure to environmental toxins: an Australian case-control study.

Possible beneficial effects of melatonin supplementation on arsenic-induced oxidative stress in Wistar rats.

Terminology of gonadal anomalies in fish and amphibians resulting from chemical exposures.

Divergent risk of multiple sclerosis in two anabaptist communities in America.

Comment on "Pediatric fatality following ingestion of Dinitrophenol: postmortem identification of a 'dietary supplement'".

Molecular biology of the nasal airways: how do we assess cellular and molecular responses in the nose?

Molecular mechanisms of 2,3,7,8-tetrachlorodibenzo-p-dioxin cardiovascular embryotoxicity.

Effects of 2,4-dinitrophenol on ischemia-induced blood-brain barrier disruption.

NTP toxicology and carcinogenesis studies of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (CAS No. 57465-28-8) in female Harlan Sprague-Dawley rats (Gavage Studies).

CXCL12 is displayed by rheumatoid endothelial cells through its basic amino-terminal motif on heparan sulfate proteoglycans.

Effects of caffeine, halothane, and 4-chloro-m-cresol on skeletal muscle lactate and pyruvate in malignant hyperthermia-susceptible and normal swine as assessed by microdialysis.

Hemodialysis reduces inhibitory effect of plasma ultrafiltrate on LDL oxidation and subsequent endothelial reactions.

Are tyrosine kinases involved in mediating contraction-stimulated muscle glucose transport?

Detection of equine herpesvirus type 1 using a real-time polymerase chain reaction.

TCDD decreases ATP levels and increases reactive oxygen production through changes in mitochondrial F(0)F(1)-ATP synthase and ubiquinone.

Association between the levels of biogenic amines and superoxide anion production in brain regions of rats after subchronic exposure to TCDD.

De novo expression of MECA-79 glycoprotein-determinant on developing B lymphocytes in gut-associated lymphoid tissues.

Dihydroxy-, hydroxyspirolactone-, and dihydroxyspirolactone-urochlorins induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the liver of mice.

Molecular interactions of arabinogalactan proteins with cortical microtubules and F-actin in Bright Yellow-2 tobacco cultured cells.

Establishment of a simple and efficient system for somatic embryo induction via ovule culture in *Arabidopsis thaliana*.

Determination of malachite green and leucomalachite green in edible goldfish muscle by liquid chromatography-ion trap mass spectrometry.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on leukocyte function-associated antigen-1 mediated splenocyte adhesion.

Exposure to 3,3',4,4',5-pentachlorobiphenyl during embryonic development has a minimal effect on the cytochrome P4501A response to 2,3,7,8-tetrachlorodibenzo-p-dioxin in cultured chicken embryo hepatocytes.

Alterations in calcium homeostasis reduce membrane excitability in amphibian skeletal muscle.

2,3,7,8-tetrachlorodibenzo-p-dioxin specifically reduces mRNA for the mineralization-related dentin sialophosphoprotein in cultured mouse embryonic molar teeth.

Residues of dioxins (PCDD/Fs) and PCBs in eggs, fat and livers of laying hens following consumption of contaminated feed.

Duox2 exhibits potent heme peroxidase activity in human respiratory tract epithelium.

Examination of the expression of the heat shock protein gene, hsp110, in *Xenopus laevis* cultured cells and embryos.

Developmental and hormonal regulation of direct shoot organogenesis and somatic embryogenesis in sugarcane (*Saccharum* spp. interspecific hybrids) leaf culture.

The 2005 World Health Organization reevaluation of human and Mammalian toxic equivalency factors for dioxins and dioxin-like compounds.

Dithiocarbamates have a common toxic effect on zebrafish body axis formation.

Exposure to PCB 77 induces tissue-dependent changes in iodothyronine deiodinase activity patterns in the embryonic chicken.

Toxicology and carcinogenesis studies of a mixture of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (Cas No. 1746-01-6), 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4), and 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) in female Harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4) in female Harlan Sprague-Dawley rats (gavage studies).

[Effects of agonists and antagonists of ryanodine receptors on potassium contractures in twitch and tonic frog skeletal muscle fibers].

Effect of sodium azide on the metabolic activity of cultured fetal cells.

Results of a long-term carcinogenicity bioassay on Sprague-Dawley rats exposed to sodium arsenite administered in drinking water.

The novel Src kinase inhibitor M475271 inhibits VEGF-induced vascular endothelial-cadherin and beta-catenin phosphorylation but increases their association.

Genome-wide screening of dioxin-responsive genes in fetal brain: bioinformatic and experimental approaches.

C-Reactive protein upregulates receptor for advanced glycation end products expression in human endothelial cells.

Effects of xenobiotics and steroids on renal and hepatic estrogen metabolism in lake trout.

Effects of sulfonylureas on mitochondrial ATP-sensitive K⁺ channels in cardiac myocytes: implications for sulfonylurea controversy.

Effects of individual and combined exposure to sodium arsenite and sodium fluoride on tissue oxidative stress, arsenic and fluoride levels in male mice.

Validation study on 660 pesticide residues in animal tissues by gel permeation chromatography cleanup/gas chromatography-mass spectrometry and liquid chromatography-tandem mass spectrometry.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (gavage studies).

Aryl hydrocarbon receptor activation produces heart-specific transcriptional and toxic responses in developing zebrafish.

Polychlorinated biphenyl concentrations, congener profiles, and ratios in the fat tissue, eggs, and plasma of snapping turtles (*Chelydra s. serpentina*) from the Ohio Basin of Lake Erie, USA.

Polychlorinated biphenyls and organochlorine pesticide levels in tissues of *Caretta caretta* from the Adriatic Sea.

Arsenicals in maternal and fetal mouse tissues after gestational exposure to arsenite.

Arsenite increases vasoconstrictor reactivity in rat blood vessels: role of endothelial nitric oxide function.

Cortical microtubule arrays lose uniform alignment between cells and are oryzalin resistant in the *Arabidopsis* mutant, radially swollen 6.

Hypoxic vasoconstriction of partial muscular intra-acinar pulmonary arteries in murine precision cut lung slices.

Ion chromatography-atmospheric pressure chemical ionization mass spectrometry for the determination of trace chlorophenols in clam tissues.

Kinetics of arsenic methylation by freshly isolated B6C3F1 mouse hepatocytes.

Knocking down type 2 but not type 1 caldesmon reduces calcium sequestration and release in C2C12 skeletal muscle myotubes.

Differences in tumor-associated protein levels among middle-age Flemish women in association with area of residence and exposure to pollutants.

Horse chestnut extract induces contraction force generation in fibroblasts through activation of Rho/Rho kinase.

Sodium azide in commercially available C-reactive protein preparations does not influence matrix metalloproteinase-2 synthesis and release in cultured human aortic vascular smooth muscle cells.

A novel integrin $\alpha 5\beta 1$ binding domain in module 4 of connective tissue growth factor (CCN2/CTGF) promotes adhesion and migration of activated pancreatic stellate cells.

Tissue specific induction of cytochrome P450 (CYP) 1A1 and 1B1 in rat liver and lung following in vitro (tissue slice) and in vivo exposure to benzo(a)pyrene.

Enhancing effects of simultaneous treatment with sodium nitrite on 2-amino-3-methylimidazo[4,5-f]quinoline-induced rat liver, colon and Zymbal's gland carcinogenesis after initiation with diethylnitrosamine and 1,2-dimethylhydrazine.

Systemic and myelotoxic effects of single administration of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats.

Dioxin cancer risk--example of hormesis?

Induction of connective tissue growth factor in retinal pigment epithelium cells by oxidative stress.

A toxicokinetic model for the carry-over of dioxins and PCBs from feed and soil to eggs.

Inhibitory effect of melatonin on diquat-induced lipid peroxidation in vivo as assessed by the measurement of F2-isoprostanes.

Suppressive effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on vascular remodeling that takes place in the normal labyrinth zone of rat placenta during late gestation.

Toxicokinetic study of dioxins and furans in laying chickens.

Protein carbonylation and heat shock response in *Ruditapes decussatus* following p,p'-dichlorodiphenyldichloroethylene (DDE) exposure: a proteomic approach reveals that DDE causes oxidative stress.

Effect of chlorpromazine on bone sialoprotein (BSP) gene transcription.

Analytical methods for trace levels of reactive carbonyl compounds formed in lipid peroxidation systems.

Regeneration of the liver in mice treated with a mixture of hepatotoxins in delayed periods after bone marrow transplantation.

Assessment by c-Fos immunostaining of changes in brain neural activity induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and leptin in rats.

Chitosan nanoparticles as a potential drug delivery system for the ocular surface: toxicity, uptake mechanism and in vivo tolerance.

Sodium azide dilates coronary arterioles via activation of inward rectifier K⁺ channels and Na⁺-K⁺-ATPase.

Somatic embryogenesis and plant regeneration from different wild diploid cotton (*Gossypium*) species.

Desensitization of platelet-derived growth factor receptor-beta by oxidized lipids in vascular cells and atherosclerotic lesions: prevention by aldehyde scavengers.

Synthesis of new chiral amines with a cyclic 1,2-diacetal skeleton derived from (2R, 3R)-(+)-tartaric acid.

Comparison of hepatic and extra hepatic induction of cytochrome P4501A by graded doses of aryl hydrocarbon receptor agonists in Atlantic tomcod from two populations.

Osteopontin: a rapid and sensitive response to dioxin exposure in the osteoblastic cell line UMR-106.

Beta-naphthoflavone represses dystrophin Dp71 expression in hepatic cells.

Determination of chloramphenicol residue in chicken tissues by immunoaffinity chromatography cleanup and gas chromatography with a microcell electron capture detector.

The aryl hydrocarbon receptor activates the retinoic acid receptoralpha through SMRT antagonism.

Acute depletion of reduced glutathione causes extensive carbonylation of rat brain proteins.

Sunlight generates multiple tryptophan photoproducts eliciting high efficacy CYP1A induction in chick hepatocytes and in vivo.

Human sulphotransferases are involved in the activation of aristolochic acids and are expressed in renal target tissue.

Abcisic acid and stress treatment are essential for the acquisition of embryogenic competence by carrot somatic cells.

Tree swallow (*Tachycineta bicolor*) exposure to polychlorinated biphenyls at the Kalamazoo River superfund site, Michigan, USA.

Synthetic smooth muscle cell phenotype is associated with increased nicotinamide adenine dinucleotide phosphate oxidase activity: effect on collagen secretion.

Functional changes in bladder tissue from type III collagen-deficient mice.

AhR-agonist-induced transcriptional changes of genes involved in thyroid function in primary porcine thyrocytes.

Low light and low ammonium are key factors for guayule leaf tissue shoot organogenesis and transformation.

Regulation of bone sialoprotein (BSP) gene transcription by lipopolysaccharide.

Effects of endocrine disrupters on the expression of growth hormone and prolactin mRNA in the rainbow trout pituitary.

The chlorinated AHR ligand 3,3',4,4',5-pentachlorobiphenyl (PCB126) promotes reactive oxygen species (ROS) production during embryonic development in the killifish (*Fundulus heteroclitus*).

Environmental toxicants and effects on female reproductive function.

Enhanced functional maturation of fetal porcine hepatocytes in three-dimensional poly-L-lactic acid scaffolds: a culture condition suitable for engineered liver tissues in large-scale animal studies.

Co-administration of zinc and n-acetylcysteine prevents arsenic-induced tissue oxidative stress in male rats.

[¹¹C]SMe-ADAM, an imaging agent for the brain serotonin transporter: synthesis, pharmacological characterization and microPET studies in rats.

Enterocyte cytoskeleton changes are crucial for enhanced translocation of nonpathogenic *Escherichia coli* across metabolically stressed gut epithelia.

The isolated anterior stomach of larval mosquitoes (*Aedes aegypti*): voltage-clamp measurements with a tubular epithelium.

CYP2A5-mediated activation and early ultrastructural changes in the olfactory mucosa: studies on 2,6-dichlorophenyl methylsulfone.

New evidences for old biomarkers: effects of several xenobiotics on EROD and AChE activities in Zebra mussel (*Dreissena polymorpha*).

A shared response model for clustered binary data in developmental toxicity studies.

Rice (*Oryza sativa*) response to drift rates of glyphosate.

Glyphosate inhibits rust diseases in glyphosate-resistant wheat and soybean.

The bipyridyl herbicide paraquat produces oxidative stress-mediated toxicity in human neuroblastoma SH-SY5Y cells: relevance to the dopaminergic pathogenesis.

Regulation of oxidative stress by the anti-aging hormone klotho.

Myeloperoxidase-generated oxidants modulate left ventricular remodeling but not infarct size after myocardial infarction.

Antioxidant and hepatoprotective effects of *Eucalyptus maculata*.

Evaluated fate and effects of atrazine and lambda-cyhalothrin in vegetated and unvegetated microcosms.

Effects of atrazine on metamorphosis, growth, laryngeal and gonadal development, aromatase activity, and sex steroid concentrations in *Xenopus laevis*.

[Effects of different doses of levodopa on paraquat-induced neurotoxicity: an experiment with mice].

Roles of *Drosophila* DJ-1 in survival of dopaminergic neurons and oxidative stress.

Drosophila DJ-1 mutants are selectively sensitive to environmental toxins associated with Parkinson's disease.

Mechanism of acrolein-induced vascular toxicity.

Effect of metals on herbicides-alpha-synuclein association: a possible factor in neurodegenerative disease studied by capillary electrophoresis.

Intentional self-poisoning with the chlorophenoxy herbicide 4-chloro-2-methylphenoxyacetic acid (MCPA).

Damage and threshold shift resulting from cochlear exposure to paraquat-generated superoxide.

The parkinsonism producing neurotoxin MPP⁺ affects microtubule dynamics by acting as a destabilising factor.

Toxicity testing of herbicide norflurazon on an aquatic bioindicator species--the planarian *Polycelis felina* (Daly.).

Effects of the herbicide isoproturon on metallothioneins, growth, and antioxidative defenses in the aquatic worm *Tubifex tubifex* (Oligochaeta, Tubificidae).

Effects of the herbicides clomazone, quinclorac, and metsulfuron methyl on acetylcholinesterase activity in the silver catfish (*Rhamdia quelen*) (Heptapteridae).

A toxicologic and dermatologic assessment of cinnamyl alcohol, cinnamaldehyde and cinnamic acid when used as fragrance ingredients.

Growth inhibition as indicator of stress because of atrazine following multiple toxicant exposure of the freshwater macrophyte, *Juncus effusus* L.

Thyroid function in nestling tree swallows and eastern bluebirds exposed to non-persistent pesticides and p, p'-DDE in apple orchards of southern Ontario, Canada.

Use of comet and micronucleus assays to measure genotoxicity in meadow voles (*Microtus pennsylvanicus*) living in golf course ecosystems exposed to pesticides.

Expression of vasoactive mediators during mechanical ventilation in nitrofen-induced diaphragmatic hernia in rats.

Vascular endothelial growth factor reduced and connective tissue growth factor induced by triamcinolone in ARPE19 cells under oxidative stress.

In vivo evaluation of three biomarkers in the mosquitofish (*Gambusia yucatana*) exposed to pesticides.

Toxicity and bioavailability of atrazine and molinate to the freshwater shrimp (*Paratya australiensis*) under laboratory and simulated field conditions.

Effects of co-administration of antioxidants and arsenicals on the rat urinary bladder epithelium.

Phytoremediation of atrazine by poplar trees: toxicity, uptake, and transformation.

The ecotoxicological effects of Photosystem II herbicides on corals.

Changes over time in the allelochemical content of ten cultivars of rye (*Secale cereale* L.).

Molecular characterization of a cDNA encoding copper/zinc superoxide dismutase from cultured cells of *Manihot esculenta*.

Effects of the herbicide diuron on the early life history stages of coral.

Arsenic-induced micronuclei formation in mammalian cells and its counteraction by tea.

Oral bioavailability of glyphosate: studies using two intestinal cell lines.

Transforming growth factor-beta1 upregulation is independent of angiotensin in paraquat-induced lung fibrosis.

Acrolein-induced cell death in PC12 cells: role of mitochondria-mediated oxidative stress.

Protein adduct species in muscle and liver of rats following acute ethanol administration.

Acrolein impairs ATP binding cassette transporter A1-dependent cholesterol export from cells through site-specific modification of apolipoprotein A-I.

Abeta-polyacrolein aggregates: novel mechanism of plastic formation in senile plaques.

Toxin-induced models of Parkinson's disease.

Acyclic cyanamide-based inhibitors of cathepsin K.

Analysis of derivatized biogenic aldehydes by LC tandem mass spectrometry.

Comparison of broiler performance when fed diets containing corn grain with insect-protected (corn rootworm and European corn borer) and herbicide-tolerant (glyphosate) traits, control corn, or commercial reference corn.

Influence of atrazine administration and reduction of calorie intake on prostate carcinogenesis in probasin/SV40 T antigen transgenic rats.

Very-long-chain fatty acids activate lysosomal hydrolases in neonatal human skin tissue.

Modeling and predicting stress-induced immunosuppression in mice using blood parameters.

The diphenylether herbicide lactofen induces cell death and expression of defense-related genes in soybean.

Effects of gpx4 haploid insufficiency on GPx4 activity, selenium concentration, and paraquat-induced protein oxidation in murine tissues.

Proteomic analysis of grapevine (*Vitis vinifera* L.) tissues subjected to herbicide stress.

Adaptive response of antioxidant enzymes to catalase inhibition by aminotriazole in goldfish liver and kidney.

Carbon source dependent somatic embryogenesis and plant regeneration in cotton, *Gossypium hirsutum* L. cv. SVPR2 through suspension cultures.

Multiple components of 2,4-dichlorophenoxyacetic acid uptake by rat choroid plexus.

Development of a method for quantification of acrolein-deoxyguanosine adducts in DNA using isotope dilution-capillary LC/MS/MS and its application to human brain tissue.

Effects of bisphenol-A (BPA), dibutylphthalate (DBP), benzophenone-2 (BP2), procymidone (Proc), and linurone (Lin) on fat tissue, a variety of hormones and metabolic parameters: a 3 months comparison with effects of estradiol (E2) in ovariectomized (ovx) rats.

Expression of a fungal cyanamide hydratase in transgenic soybean detoxifies cyanamide in tissue culture and in planta to provide cyanamide resistance.

Hydroxamic acid content and toxicity of rye at selected growth stages.

Complementary interactions between oxidative stress and auxins control plant growth responses at plant, organ, and cellular level.

Establishment of embryogenic cell suspension cultures of garlic (*Allium sativum* L.), plant regeneration and biochemical analyses.

Mature embryo axis-based high frequency somatic embryogenesis and plant regeneration from multiple cultivars of barley (*Hordeum vulgare* L.).

Novel genomic targets in oxidant-induced vascular injury.

Translation of in vitro inhibition by marine natural products of the C4 acid cycle enzyme pyruvate P(i) dikinase to in vivo C4 plant tissue death.

Acrolein induces Hsp72 via both PKCdelta/JNK and calcium signaling pathways in human umbilical vein endothelial cells.

Tissue distribution and urinary excretion of inorganic arsenic and its methylated metabolites in mice following acute oral administration of arsenate.

Induction of thioredoxin reductase as an adaptive response to acrolein in human umbilical vein endothelial cells.

Gibberellin inhibitors improve embryogenic tissue initiation in conifers.

Tissue distribution of arsenic species in rabbits after single and multiple parenteral administration of arsenic trioxide: tissue accumulation and the reversibility after washout are tissue-selective.

Tissue, species, and environmental differences in absolute quantities of murine mRNAs coding for alpha, mu, omega, pi, and theta glutathione S-transferases.

[Establishment of embryogenic cell suspension culture and plant regeneration of edible banana *Musa acuminata* cv. Mas (AA)].

Eucalyptus ESTs related to genes for oxidative stress.

Fracture-controlled nitrate and atrazine transport in four Iowa till units.

Evolution of endogenous hormone concentration in embryogenic cultures of carrot during early expression of somatic embryogenesis.

Molecular events associated with arsenic-induced malignant transformation of human prostatic epithelial cells: aberrant genomic DNA methylation and K-ras oncogene activation.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced change in intestinal function and pathology: evidence for the involvement of arylhydrocarbon receptor-mediated alteration of glucose transportation.

Heart malformation is an early response to TCDD in embryonic zebrafish.

Heat-stable enterotoxin of *Escherichia coli* stimulates a non-CFTR-mediated duodenal bicarbonate secretory pathway.

Enhanced response to caffeine and 4-chloro-m-cresol in malignant hyperthermia-susceptible muscle is related in part to chronically elevated resting $[Ca^{2+}]_i$.

A rapid and efficient transformation protocol for the grass *Brachypodium distachyon*.

Transduced Tat-SOD fusion protein protects against ischemic brain injury.

Mitochondrial O₂^{*}- and H₂O₂ mediate glucose deprivation-induced stress in human cancer cells.

Cloning and expression of type III collagen in normal and injured tendons of horses.

Effects of arsenic and UVB on normal human cultured keratinocytes: impact on apoptosis and implication on photocarcinogenesis.

Paradoxical effects of green tea (*Camellia sinensis*) and antioxidant vitamins in diabetic rats: improved retinopathy and renal mitochondrial defects but deterioration of collagen matrix glycooxidation and cross-linking.

Transcriptional activation of the membrane-bound progesterone receptor (mPR) by dioxin, in endocrine-responsive tissues.

Deregulation of cell proliferation by polycyclic aromatic hydrocarbons in human breast carcinoma MCF-7 cells reflects both genotoxic and nongenotoxic events.

Characterization of spontaneous and chemically induced cardiac lesions in rodent model systems: the national toxicology program experience.

Environmental cardiovascular disease.

[Orthorexia nervosa. A new eating behavior disorder?].

Quantitation of polychlorinated biphenyls in fish for human cancer risk assessment: a comparative case study.

Quantification of viability in organotypic multicellular spheroids of human malignant glioma using lactate dehydrogenase activity: a rapid and reliable automated assay.

Gingival carcinogenicity in female Harlan Sprague-Dawley rats following two-year oral treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and dioxin-like compounds.

A beta-catenin-dependent pathway regulates expression of cytochrome P450 isoforms in mouse liver tumors.

Positive end-expiratory pressure prevents lung mechanical stress caused by recruitment/derecruitment.

The epidemiology of non-Hodgkin lymphoma.

Toxicology and carcinogenesis studies of sodium chlorate (Cas No. 7775-09-9) in F344/N rats and B6C3F1 mice (drinking water studies).

[Risk factors for pediatric malignant bone tumors].

Effects of dietary zinc and iron supplementation on mineral excretion, body composition, and mineral status of nursery pigs.

Serum soluble transferrin receptor is a valuable diagnostic tool in iron deficiency of breath-holding spells.

Drosophila DJ-1 mutants show oxidative stress-sensitive locomotive dysfunction.

Sharks do get cancer: few surprises in cartilage research.

Tissue Doppler-derived indices predict exercise capacity in patients with apical hypertrophic cardiomyopathy.

Effects of ferrous sulphate and non-ionic iron-polymaltose complex on markers of oxidative tissue damage in patients with inflammatory bowel disease.

[Application of a 3D reconstruction model for the analysis of nitrofen induced intrathoracic malformations].

Synthesis and biodistribution of (11)C-GW7845, a positron-emitting agonist for peroxisome proliferator-activated receptor- γ .

Nonsteroidal anti-inflammatory drugs differentially affect the heat shock response in cultured spinal cord cells.

Histologic evaluation of periradicular tissues in dogs treated with calcium hydroxide in combination with HCT20 and camphorated P-chlorophenol.

Adhesion and Rac1-dependent regulation of biglycan gene expression by transforming growth factor- β . Evidence for oxidative signaling through NADPH oxidase.

Ultrastructural findings in feline corneal sequestra.

Cumulative and bolus in vitro contracture testing with 4-chloro-3-ethylphenol in malignant hyperthermia positive and negative human skeletal muscles.

The mitochondrial uncoupler 2,4-dinitrophenol attenuates tissue damage and improves mitochondrial homeostasis following transient focal cerebral ischemia.

Cytochrome P450 1B1 is overexpressed and regulated by hypomethylation in prostate cancer.

Increased mortality associated with TCDD exposure in mice infected with influenza A virus is not due to severity of lung injury or alterations in Clara cell protein content.

Repeated in utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure affects male gonads in offspring, leading to sex ratio changes in F2 progeny.

Bone resorption by aryl hydrocarbon receptor-expressing osteoclasts is not disturbed by TCDD in short-term cultures.

An assessment of PCBs and OC pesticides in eggs of double-crested (*Phalacrocorax auritus*) and Pelagic (*P. pelagicus*) cormorants from the west coast of Canada, 1970 to 2002.

Evaluation of pseudo-affective responses to noxious colorectal distension in rats by manometric recordings.

Effect of caffeic acid phenethyl ester on proliferation and apoptosis of colorectal cancer cells in vitro.

Reduced expression of progesterone receptor-B in the endometrium of women with endometriosis and in cocultures of endometrial cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Synthesis and in vivo evaluation of [11C]PJ34, a potential radiotracer for imaging the role of PARP-1 in necrosis.

Carbon-11 labeled sigma2 receptor ligands for imaging breast cancer.

Carbamylated low-density lipoprotein induces death of endothelial cells: a link to atherosclerosis in patients with kidney disease.

Direct effect of plasma permeability factors from patients with idiopathic FSGS on nephrin and podocin expression in human podocytes.

Development of a new hybrid gel phantom using carrageenan and gellan gum for visualizing three-dimensional temperature distribution during hyperthermia and radiofrequency ablation.

Human health risk assessment of organochlorines associated with fish consumption in a coastal city in China.

NF- κ B and not the MAPK signaling pathway regulates GADD45 β expression during acute inflammation.

Adipose levels of dioxins and risk of breast cancer.

Preliminary morphological and histochemical changes in rat spinal cord neurons following arsenic ingestion.

The heat shock protein 90 inhibitor, 17-allylamino-17-demethoxygeldanamycin, enhances osteoclast formation and potentiates bone metastasis of a human breast cancer cell line.

Peroxiredoxin 6, a 1-Cys peroxiredoxin, functions in antioxidant defense and lung phospholipid metabolism.

Common viral infection affects pentabrominated diphenyl ether (PBDE) distribution and metabolic and hormonal activities in mice.

Temporal and dose-dependent hepatic gene expression patterns in mice provide new insights into TCDD-Mediated hepatotoxicity.

Ah receptor- and TCDD-mediated liver tumor promotion: clonal selection and expansion of cells evading growth arrest and apoptosis.

[Mortality for non-Hodgkin lymphoma and soft-tissue sarcoma in the surrounding area of an urban waste incinerator. Campi Bisenzio (Tuscany, Italy) 1981-2001].

Identification of three mutations in the Cu,Zn-superoxide dismutase (Cu,Zn-SOD) gene with familial amyotrophic lateral sclerosis: transduction of human Cu,Zn-SOD into PC12 cells by HIV-1 TAT protein basic domain.

Localization of cytochrome P450 CYP2S1 expression in human tissues by in situ hybridization and immunohistochemistry.

The dioxin/aryl hydrocarbon receptor mediates downregulation of osteopontin gene expression in a mouse model of gastric tumorigenesis.

Kupffer cell ablation improves hepatic microcirculation after trauma and sepsis.

Recovery from iron deficiency in rats by the intake of recombinant yeast producing human H-ferritin.

Rubidium-87 magnetic resonance spectroscopy and imaging for analysis of mammalian K⁺ transport.

Heat shock protein 90 is required for increased DNA binding activity of activator protein-1, a heterodimer of Fos/JunD, in rheumatoid synovial cells under inflammatory stimuli.

Regulation of extracellular signal-regulated protein kinase signaling in human osteosarcoma cells stimulated with nicotine.

Effects of PCB 126 on primary immune organs and thymocyte apoptosis in chicken embryos.

Good bug, bad bug: in the case of enteric inflammatory disease does the epithelium decide?

Intracellular localization of Xenopus small heat shock protein, hsp30, in A6 kidney epithelial cells.

Gastric hamartomatous tumours in a transgenic mouse model expressing an activated dioxin/Ah receptor.

Is oxidative stress the mechanism of blue sac disease in retene-exposed trout larvae?

Amalgam exposure and neurological function.

Prospective protective role of melatonin against arsenic-induced metabolic toxicity in Wistar rats.

Co-mutagenic activity of arsenic and benzo[a]pyrene in mouse skin.

Predicting toxicity equivalents in fish tissue.

Mitochondria are fast Ca²⁺ sinks in rat extraocular muscles: a novel regulatory influence on contractile function and metabolism.

How does human stem cell therapy influence gene expression after liver injury? Microarray evaluation on a rat model.

Induction of cytochrome P450 1A5 mRNA, protein and enzymatic activities by dioxin-like compounds, and congener-specific metabolism and sequestration in the liver of wild jungle crow (*Corvus macrorhynchos*) from Tokyo, Japan.

An assessment of the toxicological significance of anthropogenic contaminants in Canadian arctic wildlife.

Maternal-fetal distribution and transfer of dioxins in pregnant women in Japan, and attempts to reduce maternal transfer with *Chlorella* (*Chlorella pyrenoidosa*) supplements.

AMP-activated protein kinase alpha2 activity is not essential for contraction- and hyperosmolarity-induced glucose transport in skeletal muscle.

Tissue-specific, inducible, and hormonal control of the human UDP-glucuronosyltransferase-1 (UGT1) locus.

Residue analysis for halofuginone in sturgeon muscle by immunoaffinity cleanup and liquid chromatography.

The blood-brain barrier transmigration of single domain antibody: mechanisms of transport and antigenic epitopes in human brain endothelial cells.

Effects of unoprostone and endothelin 1 on L-type channel currents in human trabecular meshwork cells.

SKS6, a multicopper oxidase-like gene, participates in cotyledon vascular patterning during *Arabidopsis thaliana* development.

Dose-dependent liver regeneration in chloroform, trichloroethylene and allyl alcohol ternary mixture hepatotoxicity in rats.

Endogenous vascular hydrogen peroxide regulates arteriolar tension in vivo.

Tissue dosimetry, metabolism and excretion of pentavalent and trivalent monomethylated arsenic in mice after oral administration.

First Report of *Sclerotinia minor* on *Sida spinosa* in North Carolina.

Distribution of PCDDs/PCDFs and Co-PCBs in human maternal blood, cord blood, placenta, milk, and adipose tissue: dioxins showing high toxic equivalency factor accumulate in the placenta.

Inorganic arsenite potentiates vasoconstriction through calcium sensitization in vascular smooth muscle.

Coplanar polychlorinated biphenyls activate the aryl hydrocarbon receptor in developing tissues of two TCDD-responsive lacZ mouse lines.

Accumulation, tissue distribution, and maternal transfer of dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin: impacts on reproductive success of zebrafish.

A polychromatic staining method for epoxy embedded tissue: a new combination of methylene blue and basic fuchsin for light microscopy.

Vitamins inhibit oxidant-induced apoptosis of corneal endothelial cells.

Amelogenin stimulates bone sialoprotein (BSP) expression through fibroblast growth factor 2 response element and transforming growth factor-beta1 activation element in the promoter of the BSP gene.

Linking a one-dimensional pesticide fate model to a three-dimensional groundwater model to simulate pollution risks of shallow and deep groundwater underlying fractured till.

Endothelin-1-induced contraction in veins is independent of hydrogen peroxide.

Age-associated decline in mitochondrial respiration and electron transport in *Drosophila melanogaster*.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) alters the mRNA expression of critical genes associated with cholesterol metabolism, bile acid biosynthesis, and bile transport in rat liver: a microarray study.

Physiological increases in uncoupling protein 3 augment fatty acid oxidation and decrease reactive oxygen species production without uncoupling respiration in muscle cells.

Tissue-dependent distribution and accumulation of chlorobenzenes by vegetables in urban area.

Polychlorinated biphenyls and organochlorine pesticides in human adipose tissue and breast milk collected in Hong Kong.

The dioxin-like PCB 77 but not the ortho-substituted PCB 153 interferes with chicken embryo thyroid hormone homeostasis and delays hatching.

The development of a physiologically-based pharmacokinetic model using the distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the tissues of the eastern oyster (*Crassostrea virginica*).

Proapoptotic, antimigratory, antiproliferative, and antiangiogenic effects of commercial C-reactive protein on various human endothelial cell types in vitro: implications of contaminating presence of sodium azide in commercial preparation.

Linear artificial molecular muscles.

Protein carbonyls: novel biomarkers of exposure to oxidative stress-inducing pesticides in freshwater fish *Channa punctata* (Bloch).

Human cordonal stem cell intraperitoneal injection can represent a rescue therapy after an acute hepatic damage in immunocompetent rats.

Improvement of mortality rate and decrease in histologic hepatic injury after human cord blood stem cell infusion in a murine model of hepatotoxicity.

Concentrations of persistent organochlorine contaminants in bowhead whale tissues and other biota from northern Alaska: implications for human exposure from a subsistence diet.

Mechanisms underlying the relaxation response induced by bradykinin in the epithelium-intact guinea-pig trachea in vitro.

EGF receptor-dependent JNK activation is involved in arsenite-induced p21Cip1/Waf1 upregulation and endothelial apoptosis.

Differential effects of maurocalcine on Ca²⁺ release events and depolarization-induced Ca²⁺ release in rat skeletal muscle.

Characterization of a rice class II metallothionein gene: tissue expression patterns and induction in response to abiotic factors.

Glutathione conjugates of 4-hydroxy-2(E)-nonenal as biomarkers of hepatic oxidative stress-induced lipid peroxidation in rats.

Effects of epidermal growth factor (EGF), transforming growth factor-alpha (TGFalpha), and 2,3,7,8-tetrachlorodibenzo-p-dioxin on fusion of embryonic palates in serum-free organ culture using wild-type, EGF knockout, and TGFalpha knockout mouse strains.

Possible involvement of abscisic acid in the induction of secondary somatic embryogenesis on seed-coat-derived carrot somatic embryos.

Role of adenosine A1 and A3 receptors in regulation of cardiomyocyte homeostasis after mitochondrial respiratory chain injury.

Tissue distribution, elimination, and metabolism of dietary sodium [³⁶Cl]chlorate in beef cattle.

Hepatic CYP1A induction by dioxin-like compounds, and congener-specific metabolism and sequestration in wild common cormorants from Lake Biwa, Japan.

Energy substrate requirements for survival of rat retinal cells in culture: the importance of glucose and monocarboxylates.

Oxidative stress mediates sodium arsenite-induced expression of heme oxygenase-1, monocyte chemoattractant protein-1, and interleukin-6 in vascular smooth muscle cells.

Adenosine 5'-monophosphate-activated protein kinase and p38 mitogen-activated protein kinase participate in the stimulation of glucose uptake by dinitrophenol in adult cardiomyocytes.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced impairment of glucose-stimulated insulin secretion in isolated rat pancreatic islets.

A methodology for deriving tissue residue benchmarks for aquatic biota: a case study for fish exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin and equivalents.

Interleukin-1 β attenuates beta-very low-density lipoprotein uptake and its receptor expression in vascular smooth muscle cells.

Type-3 ryanodine receptors mediate hypoxia-, but not neurotransmitter-induced calcium release and contraction in pulmonary artery smooth muscle cells.

Dioxin concentration in milk and tissues of cows and sheep related to feed and soil contamination.

Dioxin residues in the edible tissue of finishing pigs after dioxin feeding.

Platelets can neutralize hydrogen peroxide in an acute toxicity model with cells involved in granulation tissue formation.

Speciation of arsenic compounds in fish and oyster tissues by capillary electrophoresis-inductively coupled plasma-mass spectrometry.

Plant regeneration from callus cultures derived from mature zygotic embryos in white pine (*Pinus strobus* L.).

Effects of elastase on the mechanical and failure properties of engineered elastin-rich matrices.

C-reactive protein does not relax vascular smooth muscle: effects mediated by sodium azide in commercially available preparations.

The effects of gestational arsenic exposure and dietary selenium deficiency on selenium and selenoenzymes in maternal and fetal tissues in mice.

Development of a method for dioxin analysis of small serum samples with reduced risk of volatilization.

[In vitro regeneration and callogenesis in tissue culture of floral organs of the genus *Iris* (Iridaceae)].

Proteomic characterization of rat liver exposed to 2,3,7,8-tetrachlorobenzo-p-dioxin.

Inhibition of cyclooxygenase activity, platelet aggregation and thromboxane B₂ production by two environmental toxicants: m- and o-cresol.

Human cytochrome p450 2s1: lack of activity in the metabolic activation of several cigarette smoke carcinogens and in the metabolism of nicotine.

Glutathione reductase inhibition and methylated arsenic distribution in Cd1 mice brain and liver.

A novel spermatogenesis related factor-2 (SRF-2) gene expression affected by TCDD treatment.

Effects of TCDD and estradiol-17beta on the proliferation and Na⁺/glucose cotransporter in renal proximal tubule cells.

Bacterial cellulose as a potential scaffold for tissue engineering of cartilage.

A practical note on the use of cytotoxicity assays.

Protein oxidative damage in arsenic induced rat brain: influence of DL-alpha-lipoic acid.

A dioxin sensitive gene, mammalian WAPL, is implicated in spermatogenesis.

Maternal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin and the body burden in offspring of long-evans rats.

Effects of N-acetylcysteine, quercetin, and phytic acid on spontaneous hepatic and renal lesions in LEC rats.

Tissue repair: an important determinant of final outcome of toxicant-induced injury.

Local prevention of oxidative stress in the intestinal epithelium of the rat by adhesive liposomes of superoxide dismutase and tempamine.

In vitro and ex vivo intestinal tissue models to measure mucoadhesion of poly (methacrylate) and N-trimethylated chitosan polymers.

Differential effects of transforming growth factor-beta on the synthesis of connective tissue growth factor and vascular endothelial growth factor by peritoneal mesothelial cell.

Synthesis and characterization of EADAM: a selective radioligand for mapping the brain serotonin transporters by positron emission tomography.

Exposure and effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in tree swallows (*Tachycineta bicolor*) nesting along the Woonasquatucket River, Rhode Island, USA.

Hepatocyte-targeted nuclear imaging using ^{99m}Tc-galactosylated chitosan: conjugation, targeting, and biodistribution.

The transcriptional response to a peroxisome proliferator-activated receptor alpha agonist includes increased expression of proteome maintenance genes.

Cigarette suppresses the expression of P4Halpa and vascular collagen production.

G209A mutant alpha synuclein expression specifically enhances dopamine induced oxidative damage.

Effects of long-term exposure of the red swamp crawfish *Procambarus clarkii* to a mixture of two herbicides, 2,4-dichlorophenoxyacetic acid and monosodium methanearsonate, and associated human health risks.

Overexpression of metallothionein protects cultured motor neurons against oxidative stress, but not mutant Cu/Zn-superoxide dismutase toxicity.

Nutritional assessment and fate of DNA of soybean meal from roundup ready or conventional soybeans using rats.

[Effect of 2,4-D isooctylester on sperms in tail of epididymis and HSP70 expression of testis tissue in rats].

Chymase is activated in the pulmonary inflammation and fibrosis induced by paraquat in hamsters.

Effects of endocrine disrupting chemicals on the expression of CYP19 genes in zebrafish (*Danio rerio*) juveniles.

Comparative inter-species pharmacokinetics of phenoxyacetic acid herbicides and related organic acids. evidence that the dog is not a relevant species for evaluation of human health risk.

Establishment of an enhancer trap system with Ds and GUS for functional genomics in rice.

Comparison of anti-androgenic activity of flutamide, vinclozolin, procymidone, linuron, and p, p'-DDE in rodent 10-day Hershberger assay.

Detection of acrolein-lysine adducts in plasma low-density lipoprotein and in aorta of cyclophosphamide-administered rats.

Acrolein induces axolemmal disruption, oxidative stress, and mitochondrial impairment in spinal cord tissue.

Results of a 13 week safety assurance study with rats fed grain from glyphosate tolerant corn.

Pentachlorophenol (PCP) bioaccumulation and effect on heat production on salmon eggs at different stages of development.

Novel 3,3a,5,9b-tetrahydro-2H-furo[3,2-c][2] benzopyran derivatives: synthesis of chiral glycol benzyl ether herbicides.

Paraquat and sustainable agriculture.

Effects of atrazine on sex steroid dynamics, plasma vitellogenin concentration and gonad development in adult goldfish (*Carassius auratus*).

The effect of estradiol on the oxidative damage and trace element level determined in the liver of rats treated with dimethylarsinic acid.

Overexpression of the small mitochondrial Hsp22 extends *Drosophila* life span and increases resistance to oxidative stress.

Catalase transgenic mice: characterization and sensitivity to oxidative stress.

Exposure of cardiac fibroblasts to the herbicide nitrofen causes altered interactions with the extracellular matrix.

Oocyte maturation in *Xenopus laevis* is blocked by the hormonal herbicide, 2,4-dichlorophenoxy acetic acid.

Carbonyl stress and detoxification ability in the male genital tract and testis of rats.

Physiologically based pharmacokinetic modeling of arsenic in the mouse.

The effect of atrazine on Atlantic salmon (*Salmo salar*) smolts in fresh water and after sea water transfer.

alpha-Synuclein selectively increases manganese-induced viability loss in SK-N-MC neuroblastoma cells expressing the human dopamine transporter.

Multiple medical problems following agent orange exposure.

Poisoning due to chlorophenoxy herbicides.

Genotoxicity evaluation of pesticide formulations containing alachlor and atrazine in multiple mouse tissues (blood, kidney, liver, bone marrow, spleen) by comet assay.

Tissue-specific oxidative stress responses in fish exposed to 2,4-D and azinphosmethyl.

Anandamide-evoked activation of vanilloid receptor 1 contributes to the development of bladder hyperreflexia and nociceptive transmission to spinal dorsal horn neurons in cystitis.

A mixture of the "antiandrogens" linuron and butyl benzyl phthalate alters sexual differentiation of the male rat in a cumulative fashion.

Doxycycline-regulated over-expression of hsp22 has negative effects on stress resistance and life span in adult *Drosophila melanogaster*.

The effect of macromolecular crowding on protein aggregation and amyloid fibril formation.

Vanin-1^{-/-} mice exhibit a glutathione-mediated tissue resistance to oxidative stress.

Possible mechanism for medial smooth muscle cell injury in diabetic nephropathy: glycooxidation-mediated local complement activation.

Albumin-bound polyacrolein: implications for Alzheimer's disease.

A balanced technique for preparation of specimens from pathogenicity studies for scanning electron microscopy.

Multiple deficiencies in antioxidant enzymes in mice result in a compound increase in sensitivity to oxidative stress.

Activities of UDP-glucuronyltransferase, beta-glucuronidase and deiodinase types I and II in hyper- and hypothyroid rats.

Alpha-synuclein up-regulation and aggregation during MPP⁺-induced apoptosis in neuroblastoma cells: intermediacy of transferrin receptor iron and hydrogen peroxide.

Decreasing glutamate buffering capacity triggers oxidative stress and neuropil degeneration in the *Drosophila* brain.

Inducible superoxide dismutase 1 aggregation in transgenic amyotrophic lateral sclerosis mouse fibroblasts.

Transgenic mice overexpressing glutathione peroxidase 4 are protected against oxidative stress-induced apoptosis.

Metabolism of metamitron in goat following a single oral administration of a nontoxic dose level: a continued study.

Time course of respiratory mechanics and pulmonary structural remodelling in acute lung injury.

Hydrophobic metabolites of 2,4-dichlorophenoxyacetic acid (2,4-D) in cultured coconut tissue.

Evaluation of haemoglobin (erythrogen): for improved somatic embryogenesis and plant regeneration in cotton (*Gossypium hirsutum* L. cv. SVPR 2).

Changes in DNA methylation during somatic embryogenesis in *Cucurbita pepo* L.

Early differential gene expression of rat lung after exposure to paraquat.

Distinct roles of c-Abl and Atm in oxidative stress response are mediated by protein kinase C delta.

Internal recycling of respiratory CO₂ in pods of chickpea (*Cicer arietinum* L.): the role of pod wall, seed coat, and embryo.

Identification and functional assessment of the novel murine organic anion transporter Oat5 (Slc22a19) expressed in kidney.

Interaction of xenobiotics with estrogen receptors alpha and beta and a putative plasma sex hormone-binding globulin from channel catfish (*Ictalurus punctatus*).

[Induction of embryogenic calli from caryopses of common bermudagrass and ultrastructure of embryogenic cells as well as plant regeneration].

Proteasome mediates dopaminergic neuronal degeneration, and its inhibition causes alpha-synuclein inclusions.

[Cultivation of *Iris ensata* Thunb. callus tissue].

An endogenous metabolite of dopamine, 3,4-dihydroxyphenylethanol, acts as a unique cytoprotective agent against oxidative stress-induced injury.

Length of time in tissue culture can affect the selected glyphosate resistance mechanism.

Absorption, distribution, metabolism and excretion of 4-chloro-2-methylphenoxyacetic acid (MCPA) in rats.

Recruitment of thyroid hormone receptor/retinoblastoma-interacting protein 230 by the aryl hydrocarbon receptor nuclear translocator is required for the transcriptional response to both dioxin and hypoxia.

Determination of uric acid in human saliva by capillary electrophoresis with electrochemical detection: potential application in fast diagnosis of gout.

2,3,7,8-TCDD effects on visual structure and function in swim-up rainbow trout.

Impairment of small intestinal protein assimilation in patients with end-stage renal disease: extending the malnutrition-inflammation-atherosclerosis concept.

Biosynthesis of FVIII in megakaryocytic cells: improved production and biochemical characterization.

Effects of polybrominated diphenyl ethers on basal and TCDD-induced ethoxyresorufin activity and cytochrome P450-1A1 expression in MCF-7, HepG2, and H4IIE cells.

Arsenic exposure exacerbates atherosclerotic plaque formation and increases nitrotyrosine and leukotriene biosynthesis.

Review of clinical and toxicological features of acute pesticide poisonings in Crete (Greece) during the period 1991-2001.

Pathogenesis of collagen-induced arthritis: modulation of disease by arthritogenic T-cell epitope location.

Evaluation of relative potencies of PCB126 and PCB169 for the immunotoxicities in ovalbumin (OVA)-immunized mice.

Effects of TGF-beta, TNF-alpha, IL-beta and IL-6 alone or in combination, and tyrosine kinase inhibitor on cyclooxygenase expression, prostaglandin E2 production and bone resorption in mouse calvarial bone cells.

Oral and dermal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces cutaneous papillomas and squamous cell carcinomas in female hemizygous Tg.AC transgenic mice.

Effect of ryanodine receptor mutations on interleukin-6 release and intracellular calcium homeostasis in human myotubes from malignant hyperthermia-susceptible individuals and patients affected by central core disease.

Heparanase uptake is mediated by cell membrane heparan sulfate proteoglycans.

Classic toxin-induced animal models of Parkinson's disease: 6-OHDA and MPTP.

Women and omega-3 Fatty acids.

Chemical constituents of Morinda citrifolia fruits inhibit copper-induced low-density lipoprotein oxidation.

Pilot study to reduce dioxins in the human body.

Response of soluble transferrin receptor and iron-related parameters to iron supplementation in elite, iron-depleted, nonanemic female athletes.

Role of estrogen receptor in regulation of polycyclic aromatic hydrocarbon metabolic activation in lung.

A HECT E3 ubiquitin-protein ligase with sequence similarity to E6AP does not target p53 for degradation in the softshell clam (*Mya arenaria*).

Histomorphometric alteration and cell-type specific modulation of arylhydrocarbon receptor and estrogen receptor expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin and 17beta-estradiol in mouse experimental model of endometriosis.

The accumulation and toxicity of methylated arsenicals in endothelial cells: important roles of thiol compounds.

Arsenic and urinary bladder cell proliferation.

Animal models for arsenic carcinogenesis: inorganic arsenic is a transplacental carcinogen in mice.

Mechanism of hepatic insulin resistance in non-alcoholic fatty liver disease.

A maternal Ahr null genotype sensitizes embryos to chemical teratogenesis.

In utero effects of chemicals on reproductive tissues in females.

Dioxin alters the human low-density and very low-density lipoprotein structure with evidence for specific quenching of Trp-48 in apolipoprotein C-II.

[Bronchial impairment of main bronchus by aspiration of ferrous sulphate tablet].

Aryl hydrocarbon receptor (AhR)-independent effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on softshell clam (*Mya arenaria*) reproductive tissue.

[Toxicological significance of metallothionein on environmental harmful factors: verification and suggestions from a metallothionein-I/II null mouse model study].

4-chloro-m-cresol cannot detect malignant hyperthermia equivocal cells in an alternative minimally invasive diagnostic test of malignant hyperthermia susceptibility.

Neuromuscular electric stimulation enhances endothelial vascular control and hemodynamic function in paretic upper extremities of patients with stroke.

Associations between organochlorine contaminant concentrations and clinical health parameters in loggerhead sea turtles from North Carolina, USA.

The relationship of diaphragmatic defect, liver growth, and lung hypoplasia in nitrofen-induced congenital diaphragmatic hernia in the rat.

Human muscle sarcoplasmic reticulum function during submaximal exercise in normoxia and hypoxia.

P-cresol, a uremic retention solute, alters the endothelial barrier function in vitro.

Functional characterization of malignant hyperthermia-associated RyR1 mutations in exon 44, using the human myotube model.

Antioxidant capacity of cultured mammalian cells estimated by ESR method.

Expression of hypothalamic neuropeptides after acute TCDD treatment and distribution of Ah receptor repressor.

[Dioxin emissions and soft-tissue sarcoma: results of a population-based case-control study].

Branch retinal artery occlusion: a complication of iron-deficiency anemia in a young adult with a rectal carcinoid.

VEGF expression is downregulated in nitrofen-induced congenital diaphragmatic hernia.

Exocrine pancreatic pathology in female Harlan Sprague-Dawley rats after chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and dioxin-like compounds.

Environmental contaminant-mixture effects on CNS development, plasticity, and behavior.

Minocycline up-regulates Bcl-2 and protects against cell death in mitochondria.

Hypothermia and localized cold injuries.

Cyp1a1(-/-) male mice: protection against high-dose TCDD-induced lethality and wasting syndrome, and resistance to intrahepatocyte lipid accumulation and uroporphyrinuria.

Ischemia/reperfusion induces the recruitment of leukocytes from whole blood under flow conditions.

Drosophila parkin mutants have decreased mass and cell size and increased sensitivity to oxygen radical stress.

Nitric oxide donor increases osteoprotegerin production and osteoclastogenesis inhibitory activity in bone marrow stromal cells from ovariectomized rats.

Arsenic-induced enhancement of ultraviolet radiation carcinogenesis in mouse skin: a dose-response study.

Identification of aryl hydrocarbon receptor as a putative Wnt/beta-catenin pathway target gene in prostate cancer cells.

Treating obesity: pharmacology of energy expenditure.

Testosterone-stimulated weanlings as an alternative to castrated male rats in the Hershberger anti-androgen assay.

Persistent suppression of contact hypersensitivity, and altered T-cell parameters in F344 rats exposed perinatally to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Role of lipid-mobilising factor (LMF) in protecting tumour cells from oxidative damage.

Decreased expression of voltage-gated K⁺ channels in pulmonary artery smooth muscle cells in nitrofen-induced congenital diaphragmatic hernia in rats.

Assessment of human health risk of dioxin in Korea.

Histological and lipid peroxidation changes after administration of 2-acetylaminofluorene in a rat liver injury model following selective periportal and pericentral damage.

Tissue-specific effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the activity of 5'-deiodinases I and II in rats.

Soft-tissue sarcoma and dioxin: A case-control study.

[Study on a new antarthritic injection--O-carboxymethyl chitosan].

Sleep deprivation and cellular responses to oxidative stress.

[Is a presymptomatic malignant hyperthermia in-vitro diagnosis with 4-chloro-3-ethyl phenol possible? A study using porcine skeletal preparations].

The expression of DJ-1 (PARK7) in normal human CNS and idiopathic Parkinson's disease.

Sodium-azide versus ProClin 300: influence on the morphology of UHMWPE particles generated in laboratory tests.

Mitochondrial coupling in vivo in mouse skeletal muscle.

Protein kinase C delta is activated in mouse ovarian surface epithelial cancer cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

A comparison of human H295R and rat R2C cell lines as in vitro screening tools for effects on aromatase.

Liquid growth hormone: preservatives and buffers.

Activation of inflammatory mediators and potential role of ah-receptor ligands in foam cell formation.

Antibodies against the CB10 fragment of type II collagen in rheumatoid arthritis.

[Activity of the anthelmintic agent trichlorophen on the models of human helminthiasis].

Immunohistochemical detection of activated caspases in apoptotic hepatocytes in rat liver.

Effect of epidermal growth factor on pulmonary hypoplasia in experimental diaphragmatic hernia.

Nitrofen-induced congenital diaphragmatic hernia in rat embryo: what model?

Induction of tumors of the liver, lung, ovary and adrenal in adult mice after brief maternal gestational exposure to inorganic arsenic: promotional effects of postnatal phorbol ester exposure on hepatic and pulmonary, but not dermal cancers.

Mutational analysis of putative calcium binding motifs within the skeletal ryanodine receptor isoform, RyR1.

Comparison of risk assessment methodologies for exposure of mink to PCBs on the Kalamazoo River, Michigan.

A tracer study with systemically and locally administered dinitrophenylated osteopontin.

In vitro culture of Arabidopsis embryos within their ovules.

Human bronchial smooth muscle cell proliferation via thromboxane A2 receptor.

Bisquaternary caracurine V and iso-caracurine V salts as ligands for the muscle type of nicotinic acetylcholine receptors: SAR and QSAR studies.

A plant type 2 metallothionein (MT) from cork tissue responds to oxidative stress.

Liver regeneration: a critical toxicodynamic response in predictive toxicology.

Functional characterization of the carrier-mediated transport system for glycerol in everted sacs of the rat small intestine.

Hair analysis of histamine after fluorescence labeling by column-switching reversed-phase liquid chromatography with electrospray ionization mass spectrometry and application to human hair.

Contraction augments L-type Ca^{2+} currents in adherent guinea-pig cardiomyocytes.

Molecular cloning of the monodehydroascorbate reductase gene from *Brassica campestris* and analysis of its mRNA level in response to oxidative stress.

Health risk assessment of PCDD/F emissions from a hazardous and medical waste incinerator in Turkey.

Matrix metalloproteinase-1 and tissue inhibitor of metalloproteinase-1 production in human gingival fibroblasts: the role of protein kinase C.

C-reactive protein-induced in vitro vasorelaxation is an artefact caused by the presence of sodium azide in commercial preparations.

The use of potassium dichromate and ethyl alcohol as blood preservatives for analysis of organochlorine contaminants.

Developmental toxicity of the dithiocarbamate pesticide sodium metam in zebrafish.

Prolonged exercise to fatigue in humans impairs skeletal muscle Na^{+} - K^{+} -ATPase activity, sarcoplasmic reticulum Ca^{2+} release, and Ca^{2+} uptake.

Hydroxylated and methyl sulfone PCB metabolites in adipose and whole blood of polar bear (*Ursus maritimus*) from East Greenland.

Disruption of cell-cell contact maximally but transiently activates AhR-mediated transcription in 10T1/2 fibroblasts.

Dioxin health risk to infants using simulated tissue concentrations.

Air bags and the skin.

The sphingomyelin/ceramide pathway is involved in ERK1/2 phosphorylation, cell proliferation, and uPAR overexpression induced by tissue-type plasminogen activator.

Identification of the growth hormone-releasing peptide binding site in CD36: a photoaffinity cross-linking study.

Effects of beta-naphthoflavone, phenobarbital and dichlobenil on the drug-metabolizing system of liver and nasal mucosa of Italian water frogs.

Different effects of calcium channel blockers on matrix metalloproteinase-2 expression in cultured rat cardiac fibroblasts.

Exponential modeling, washout curve reconstruction, and estimation of half-life of toluene and its metabolites.

Levels and toxicokinetic behaviors of PCDD, PCDF, and coplanar PCB congeners in common cormorants from Lake Biwa, Japan.

Sequential activation of RhoA and FAK/paxillin leads to ATP release and actin reorganization in human endothelium.

Toxicokinetics of PCDD, PCDF, and coplanar PCB congeners in Baikal seals, *Pusa sibirica*: age-related accumulation, maternal transfer, and hepatic sequestration.

Transport of deslorelin, an LHRH agonist, is vectorial and exhibits regional variation in excised bovine nasal tissue.

A semidominant mutation in an Arabidopsis mitogen-activated protein kinase phosphatase-like gene compromises cortical microtubule organization.

Biochemical and molecular biological analysis of different responses to 2,3,7,8-tetrachlorodibenzo-p-dioxin in chick embryo heart and liver.

The human CYP1A1 gene is regulated in a developmental and tissue-specific fashion in transgenic mice.

Ecological risk assessment of persistent toxic substances for the clam *Tapes philipinarum* in the Lagoon of Venice, Italy.

Reduction of DNA fragmentation and hydroxyl radical production by hyaluronic acid and chondroitin-4-sulphate in iron plus ascorbate-induced oxidative stress in fibroblast cultures.

Effect of TCDD on corpus cavernosum histology and smooth muscle physiology.

Platelet-derived growth factor-induced arachidonic acid release for enhancement of prostaglandin E(2) synthesis in human gingival fibroblasts pretreated with interleukin-1beta.

[Indices of oxidative stress. 1. TBA-reactive substances and carbonylproteins].

[Effect of zenkor on the amount of glucose and activity of gluconeogenesis enzymes in carp's (*Cyprinus carpio* L.) tissues at different temperatures].

Evaluation of 5-(11)C-methyl-A-85380 as an imaging agent for PET investigations of brain nicotinic acetylcholine receptors.

Epidermal growth factor inhibits 14C-alpha-methyl-D-glucopyranoside uptake in renal proximal tubule cells: involvement of PLC/PKC, p44/42 MAPK, and cPLA2.

Versican V1 isoform induces neuronal differentiation and promotes neurite outgrowth.

Use of genetically manipulated *Salmonella typhimurium* strains to evaluate the role of sulfotransferases and acetyltransferases in nitrofen mutagenicity.

cDNA cloning and functional characterization of a novel splice variant of c-Cbl-associated protein from mouse skeletal muscle.

Static magnetic fields-induced bone sialoprotein (BSP) expression is mediated through FGF2 response element and pituitary-specific transcription factor-1 motif.

Glutathione-S-transferase A4-4 modulates oxidative stress in endothelium: possible role in human atherosclerosis.

Enzyme-linked immunosorbent assay for monitoring toxic dioxin congeners in milk based on a newly generated monoclonal anti-dioxin antibody.

Src and Cas are essentially but differentially involved in angiotensin II-stimulated migration of vascular smooth muscle cells via extracellular signal-regulated kinase 1/2 and c-Jun NH2-terminal kinase activation.

Modulation of intestinal P-glycoprotein function by cremophor EL and other surfactants by an in vitro diffusion chamber method using the isolated rat intestinal membranes.

Effects of chronic exposure of 2,4-dichlorophenol on the antioxidant system in liver of freshwater fish *Carassius auratus*.

A novel effect of dioxin: exposure during pregnancy severely impairs mammary gland differentiation.

Connective tissue growth factor (CCN2) induces adhesion of rat activated hepatic stellate cells by binding of its C-terminal domain to integrin $\alpha(v)\beta(3)$ and heparan sulfate proteoglycan.

Quantitative analysis of cresol and its metabolites in biological materials and distribution in rats after oral administration.

Nucleotidase activities in membrane preparations of nervous ganglia and digestive gland of the snail *Helix aspersa*.

Polycyclic aromatic hydrocarbon increases mRNA level for interleukin 1 beta in human fibroblast-like synoviocyte line via aryl hydrocarbon receptor.

Overexpression of latent transforming growth factor-beta binding protein 1 (LTBP-1) in dioxin receptor-null mouse embryo fibroblasts.

Spatial variation in hepatic levels and patterns of PCBs and PCDD/Fs among young-of-the-year and adult Atlantic tomcod (*Microgadus tomcod*) in the Hudson River estuary.

Impact of mitochondrial inhibition on excitability and cytosolic Ca^{2+} levels in brainstem motoneurons from mouse.

Risk factors for dopaminergic neuron loss in human alpha-synuclein transgenic mice.

2,3,7,8-tetrachlorodibenzo-p-dioxin reduces myocardial hypoxia and vascular endothelial growth factor expression during chick embryo development.

Physiological role of mGSTA4-4, a glutathione S-transferase metabolizing 4-hydroxynonenal: generation and analysis of mGsta4 null mouse.

The AHR-1 aryl hydrocarbon receptor and its co-factor the AHA-1 aryl hydrocarbon receptor nuclear translocator specify GABAergic neuron cell fate in *C. elegans*.

The calmodulin binding region of the skeletal ryanodine receptor acts as a self-modulatory domain.

DNA adduct formation in precision-cut rat liver and lung slices exposed to benzo[a]pyrene.

Genioglossal hypoglossal motoneurons contact substance P-like immunoreactive nerve terminals in the cat: a dual labeling electron microscopic study.

Potential of carbon tetrachloride hepatotoxicity and lethality in type 2 diabetic rats.

p38gamma MAPK regulation of glucose transporter expression and glucose uptake in L6 myotubes and mouse skeletal muscle.

Stable transformation of rice (*Oryza sativa* L.) via microprojectile bombardment of highly regenerative, green tissues derived from mature seed.

Ultraviolet A-induced production of matrix metalloproteinase-1 is mediated by macrophage migration inhibitory factor (MIF) in human dermal fibroblasts.

Histological analysis of acute toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in zebrafish.

Effects of dioxin on gene expression in female reproductive system in the rat.

[Possible role of ammonium as a paracrine regulator in the uterine tissue].

Gene expression profiles of mouse aorta and cultured vascular smooth muscle cells differ widely, yet show common responses to dioxin exposure.

Development and testing of a novel biosynthesized XCell for treating chronic wounds.

Toxicity, histopathological alterations and immunohistochemical CYP1A induction in the early life stages of the seabream, *Sparus aurata*, following waterborne exposure to B(a)P and TCDD.

A comparison of callus induction and plant regeneration from different embryo explants of triticale (*x Triticosecale wittmackii*).

Xenoestrogen modulation of the immune system: effects of dichlorodiphenyltrichloroethane (DDT) and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Different global gene expression profiles in benzo[a]pyrene- and dioxin-treated vascular smooth muscle cells of AHR-knockout and wild-type mice.

Vascular permeability alterations induced by arsenic.

Expression of genes in the TGF-beta signaling pathway is significantly deregulated in smooth muscle cells from aorta of aryl hydrocarbon receptor knockout mice.

Menstrual effluent induces epithelial-mesenchymal transitions in mesothelial cells.

Characteristics and a functional implication of Ca(2+)-activated K(+) current in mouse aortic endothelial cells.

Induction of murine NAD(P)H:quinone oxidoreductase by 2,3,7,8-tetrachlorodibenzo-p-dioxin requires the CNC (cap 'n' collar) basic leucine zipper transcription factor Nrf2 (nuclear factor erythroid 2-related factor 2): cross-interaction between AhR (aryl hydrocarbon receptor) and Nrf2 signal transduction.

Biophysical properties and metabolic regulation of a TASK-like potassium channel in rat carotid body type 1 cells.

Urokinase receptor mRNA stability involves tyrosine phosphorylation in lung epithelial cells.

'Proximal-type' epithelioid sarcoma: is Agent Orange still at large?

Changes in mitochondrial electron partitioning in response to herbicides inhibiting branched-chain amino acid biosynthesis in soybean.

Eel ATPase activity as biomarker of thiobencarb exposure.

Bioaccumulation and toxicity of sediment associated herbicides (ioxynil, pendimethalin, and bentazone) in *Lumbriculus variegatus* (Oligochaeta) and *Chironomus riparius* (Insecta).

Pubertal development in female Wistar rats following exposure to propazine and atrazine biotransformation by-products, diamino-S-chlorotriazine and hydroxyatrazine.

Developmental and subcellular effects of chronic exposure to sub-lethal concentrations of ammonia, PAH and PCP mixtures in brown trout (*Salmo trutta* f. *fario* L.) early life stages.

Assessing the impact of triazine herbicides on organophosphate insecticide toxicity to the earthworm *Eisenia fetida*.

Comparative effects of cadmium, copper, paraquat and benzo[a]pyrene on the actin cytoskeleton and production of reactive oxygen species (ROS) in mussel haemocytes.

Iron, zinc and copper levels in brain, serum and liver of neonates exposed to 2,4-dichlorophenoxyacetic acid.

The environment and Parkinson's disease: is the nigrostriatal system preferentially targeted by neurotoxins?

Exposure to animals and selected risk factors among Canadian farm residents with Hodgkin's disease, multiple myeloma, or soft tissue sarcoma.

Food as a source of dioxin exposure in the residents of Bien Hoa City, Vietnam.

Aquatic toxicity of glyphosate-based formulations: comparison between different organisms and the effects of environmental factors.

Birth malformations and other adverse perinatal outcomes in four U.S. Wheat-producing states.

Altered gene expression during rat Wolffian duct development in response to in utero exposure to the antiandrogen linuron.

[Ginkgo biloba extract protection in acute paraquat poisoning of rat lung tissue].

Consecutive administration of paraquat to rats induces enhanced cholesterol peroxidation and lung injury.

The teratogenic potential of the herbicide glyphosate-Roundup in Wistar rats.

Toxicokinetics, toxicity and lethal body residues of two chlorophenols in the oligochaete worm, *Lumbriculus variegatus*, in different sediments.

The restriction of all minerals in the diet enhancing paraquat toxicity is regarded primarily as the shortage of Mg.

Environmental fate and impacts of sulfometuron on watersheds in the southern United States.

Fatal acute poisoning by bentazon.

Response of larval *Xenopus laevis* to atrazine: assessment of growth, metamorphosis, and gonadal and laryngeal morphology.

Lung function and airway inflammation in rats following exposure to combustion products of carbon-graphite/epoxy composite material: comparison to a rodent model of acute lung injury.

Paraquat and menadione exposure of rainbow trout (*Oncorhynchus mykiss*)--studies of effects on the pentose-phosphate shunt and thiamine levels in liver and kidney.

Paraquat and iron exposure as possible synergistic environmental risk factors in Parkinson's disease.

[Comparative analysis of disorders in duodenal lymphoid tissue of mice treated with azathioprine and herbicide 2,4-dichlorophenoxyacetic acid and their correction by plant and animal origin remedies].

Focal transmural necrotic tracheitis in commercial meat turkeys.

Acute and chronic effects of alcohol exposure on skeletal muscle c-myc, p53, and Bcl-2 mRNA expression.

Alpha-tocopherol content and alpha-tocopherol transfer protein expression in leukocytes of children with acute leukemia.

Effects of dietary essential oil components on growth performance, digestive enzymes and lipid metabolism in female broiler chickens.

Oxidative stress and bioindicators of reproductive function in pulp and paper mill effluent exposed white sucker.

Paraquat induces long-lasting dopamine overflow through the excitotoxic pathway in the striatum of freely moving rats.

Arsenic methylation and bladder cancer risk in Taiwan.

Alpha-synuclein overexpression protects against paraquat-induced neurodegeneration.

Endothelium dysfunction in LDL receptor knockout mice: a role for H₂O₂.

Acrolein produced from polyamines as one of the uraemic toxins.

Comparison of broiler performance when fed diets containing grain from roundup ready (NK603), yieldgard x roundup ready (MON810 x NK603), non-transgenic control, or commercial corn.

The selenoprotein GPX4 is essential for mouse development and protects from radiation and oxidative damage insults.

Diabetes mellitus and 2,3,7,8-tetrachlorodibenzo-p-dioxin elimination in veterans of Operation Ranch Hand.

Chondroitin sulfate proteoglycans are required for lung growth and morphogenesis in vitro.

Antioxidant perturbations in the olfactory mucosa of alachlor-treated rats.

Cyclohexanedione herbicides are inhibitors of rat heart acetyl-CoA carboxylase.

Expression of senescence-enhanced genes in response to oxidative stress.

Toxicokinetics, recovery, and metabolism of metamitron in goat.

Accumulation and metabolism of arsenic in mice after repeated oral administration of arsenate.

Tissue-specific expression and localization of safener-induced glutathione S-transferase proteins in *Triticum tauschii*.

Structural requisites of 2-(p-chlorophenoxy)propionic acid analogues for activity on native rat skeletal muscle chloride conductance and on heterologously expressed CLC-1.

SKN-1 links *C. elegans* mesendodermal specification to a conserved oxidative stress response.

[Effect of aminotriazole on the activity of catalase and glucose-6-phosphate dehydrogenase in tissues of two frog species--*Rana ridibunda* and *Rana esculenta*].

Different sensitivity of Ca²⁺-ATPase and cholinesterase to pure and commercial pesticides in nervous ganglia of *Phyllocaulis soleiformis* (Mollusca).

Fatty acid profile in skeletal muscle of the rat in response to acute (2.5 hours) and prolonged (6 weeks) ethanol-dosage.

Fertile transgenic pearl millet [*Pennisetum glaucum* (L.) R. Br.] plants recovered through microprojectile bombardment and phosphinothricin selection of apical meristem-, inflorescence-, and immature embryo-derived embryogenic tissues.

Overexpression of oxidized protein hydrolase protects COS-7 cells from oxidative stress-induced inhibition of cell growth and survival.

Change in the concentration of vitamins C and E in rat tissues by paraquat administration.

Increased synaptosomal dopamine content and brain concentration of paraquat produced by selective dithiocarbamates.

Acute exposure to the nutritional toxin alcohol reduces brain protein synthesis in vivo.

Induction of cellular glutathione and glutathione S-transferase by 3H-1,2-dithiole-3-thione in rat aortic smooth muscle A10 cells: protection against acrolein-induced toxicity.

Dose-dependent biotransformation of arsenite in rats--not S-adenosylmethionine depletion impairs arsenic methylation at high dose.

FK506 attenuates 1-methyl-4-phenylpyridinium- and 3-nitropropionic acid-evoked inhibition of kynurenic acid synthesis in rat cortical slices.

Study of atrazine effects on Pacific oyster, *Crassostrea gigas*, haemocytes.

Effects of the new herbicide fentrazamide on the glucose utilization in neurons and erythrocytes in vitro.

Fish tolerance to organophosphate-induced oxidative stress is dependent on the glutathione metabolism and enhanced by N-acetylcysteine.

Downregulation of hippocampal NMDA receptor expression by prenatal exposure to dioxin.

[Antiostrogenic effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the gene expression of insulin-like growth factors family in osteoblast cells].

Dioxin and cancer: a critical review.

Opposing effects of low and high-dose clozapine on survival of transgenic amyotrophic lateral sclerosis mice.

Connective molecular pathways of experimental bladder inflammation.

Pathophysiology of the optic neuropathy associated with Friedreich ataxia.

Arsenic exposure accelerates atherogenesis in apolipoprotein E(-/-) mice.

Unbalanced collagenases/TIMP-1 expression and epithelial apoptosis in experimental lung fibrosis.

Oxygen regulation and limitation to cellular respiration in mouse skeletal muscle in vivo.

Actin glutathionylation increases in fibroblasts of patients with Friedreich's ataxia: a potential role in the pathogenesis of the disease.

Systemic effects and skin injury after experimental dermal exposure to monochloroacetic acid.

Protein-bound uremic retention solutes.

Calcium release from sarcoplasmic reticulum is facilitated in human myotubes derived from carriers of the ryanodine receptor type 1 mutations Ile2182Phe and Gly2375Ala.

New insights into Parkinson's disease.

Tyrosine kinases inhibitors block Fas-mediated deleterious effects in normoxic and hypoxic ventricular myocytes.

Specific in vivo binding to the norepinephrine transporter demonstrated with the PET radioligand, (S,S)-[11C]MeNER.

Ryanodine receptor mutations associated with stress-induced ventricular tachycardia mediate increased calcium release in stimulated cardiomyocytes.

Effect of corticosteroid on lung parenchyma remodeling at an early phase of acute lung injury.

Mechanisms of TCDD-induced abnormalities and embryo lethality in white leghorn chickens.

Oxidative stress in liver and brain of the hatchling chicken (*Gallus domesticus*) following in ovo injection with TCDD.

The effect of ingestion of ferrous sulfate on the absorption of oral methotrexate in patients with rheumatoid arthritis.

Contribution of the Ah receptor to the phenolic antioxidant-mediated expression of human and rat UDP-glucuronosyltransferase UGT1A6 in Caco-2 and rat hepatoma 5L cells.

Medication-induced oesophageal disorders.

Risk of soft tissue sarcomas and residence in the neighbourhood of an incinerator of industrial wastes.

Cancer risk for chemical workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Pretreatment with periodate-oxidized adenosine enhances developmental toxicity of inorganic arsenic in mice.

Integration, expression and inheritance of transgenes in hexaploid oat (*Avena sativa* L.).

Effects of several dioxin-like compounds on estrogen metabolism in the malignant MCF-7 and nontumorigenic MCF-10A human mammary epithelial cell lines.

Evaluation of the potential impact of pharmacokinetic differences on tissue dosimetry in offspring during pregnancy and lactation.

Changes in thermal stability and microunfolded pattern of collagen helix resulting from the loss of alpha2(I) chain in osteogenesis imperfecta murine.

The reliability of long-term storage of direct immunofluorescent staining slides at room temperature.

The Ile2453Thr mutation in the ryanodine receptor gene 1 is associated with facilitated calcium release from sarcoplasmic reticulum by 4-chloro-m-cresol in human myotubes.

S-adenosyl-L-methionine is able to reverse micronucleus formation induced by sodium arsenite and other cytoskeleton disrupting agents in cultured human cells.

Lipophilic organic compounds in lake sediment and American coot (*Fulica americana*) tissues, both affected and unaffected by avian vacuolar myelinopathy.

Evaluation of iron bioavailability from bonito dark muscle using anemic rats.

Mice with targeted mutation of peroxiredoxin 6 develop normally but are susceptible to oxidative stress.

Short- and long-term morbidity and mortality in the population exposed to dioxin after the "Seveso accident".

Multicentre evaluation of in vitro contracture testing with bolus administration of 4-chloro-m-cresol for diagnosis of malignant hyperthermia susceptibility.

Role of elastin in pathologic calcification of xenograft heart valves.

Carbon-11 labelling of 8[[3-[4-(2-[(11)C]methoxyphenyl)piperazin-1-yl]-2-hydroxypropyl]oxy]thiochroman, a presynaptic 5-HT(1A) receptor agonist, and its in vivo evaluation in anaesthetised rat and in awake cat.

A mixture of dioxins, furans, and non-ortho PCBs based upon consensus toxic equivalency factors produces dioxin-like reproductive effects.

Markers of genetic susceptibility in human environmental hygiene and toxicology: the role of selected CYP, NAT and GST genes.

Intercellular signalling within vascular cells under high D-glucose involves free radical-triggered tyrosine kinase activation.

Expression and activity of matrix metallo proteinases 2 and 9 and their inhibitors in rat lungs during the perinatal period and in diaphragmatic hernia.

New approach to vital analysis of functional activity in ABC transporters (markers for multidrug resistance) in solid tumors by the method of flow cytometry.

Facioscapulohumeral muscular dystrophy (FSHD) myoblasts demonstrate increased susceptibility to oxidative stress.

Airway smooth muscle changes in the nitrofen-induced congenital diaphragmatic hernia rat model.

Effect of low dose mono-ortho 2,3',4,4',5 pentachlorobiphenyl on thyroid hormone status and EROD activity in rat offspring: consequences for risk assessment.

Dioxin residues in the edible tissue of broiler chicken.

Matrix metalloproteinase-9 and tissue inhibitor of metalloproteinase-1: expression in the lung of fetal rats with nitrofen-induced diaphragmatic hernia.

Evidence of oxidative stress in familial amyloidotic polyneuropathy type 1.

Invasion of interstitial matrix by a novel cell line from primary peritoneal carcinosarcoma, and by established ovarian carcinoma cell lines: role of cell-matrix adhesion molecules, proteinases, and E-cadherin expression.

123I-Interleukin-2: biochemical characterization and in vivo use for imaging autoimmune diseases.

Up-regulation of cDK5/p35 by oxidative stress in human neuroblastoma IMR-32 cells.

TCDD-dependent downregulation of gamma-catenin in rat liver epithelial cells (WB-F344).

Neurokinin 1 receptors and neprilysin modulation of mouse bladder gene regulation.

Effects of uremic ultrafiltrate on the regulation of the parathyroid cell cycle by calcitriol.

Influence of 5-aminolevulinic acid and red light on collagen metabolism of human dermal fibroblasts.

The Cu,Zn superoxide dismutase in neuroblastoma SK-N-BE cells is exported by a microvesicles dependent pathway.

Embryological origins and development of the rat diaphragm.

Iron bioavailability and weight gains to iron-deficient rats fed a commonly consumed Tunisian meal 'bean seeds ragout' with or without beef and with green or black tea decoction.

Increase in cardiovascular pathology in female Sprague-Dawley rats following chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3,3',4,4',5-pentachlorobiphenyl.

PPARalpha agonist-induced rodent tumors: modes of action and human relevance.

A framework for human relevance analysis of information on carcinogenic modes of action.

Axial skeletal and Hox expression domain alterations induced by retinoic acid, valproic acid, and bromoxynil during murine development.

Estrogens and organochlorine xenoestrogens and breast cancer risk.

Neocortical neurons cultured from mice with expanded CAG repeats in the huntingtin gene: unaltered vulnerability to excitotoxins and other insults.

Studies on type I collagen in skin fibroblasts cultured from twins with lethal osteogenesis imperfecta.

Rat breast microsomal biotransformation of ethanol to acetaldehyde but not to free radicals: its potential role in the association between alcohol drinking and breast tumor promotion.

Transplacental carcinogenicity of inorganic arsenic in the drinking water: induction of hepatic, ovarian, pulmonary, and adrenal tumors in mice.

Crosslinking of fibrinogen and fibronectin by free radicals: a possible initial step in adhesion formation in osteoarthritis of the temporomandibular joint.

EGF and TGF-alpha expression influence the developmental toxicity of TCDD: dose response and AhR phenotype in EGF, TGF-alpha, and EGF + TGF-alpha knockout mice.

Ryanodine receptor antibodies in myasthenia gravis: epitope mapping and effect on calcium release in vitro.

Calpain mediates progressive plasma membrane permeability and proteolysis of cytoskeleton-associated paxillin, talin, and vinculin during renal cell death.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) alters the endogenous metabolism of all-trans-retinoic acid in the rat.

Protein tyrosine phosphatase activity regulates endothelial cell-cell interactions, the paracellular pathway, and capillary tube stability.

Damage to developing mouse skeletal muscle myotubes in culture: protective effect of heat shock proteins.

Expression of aryl hydrocarbon receptor repressor in normal human tissues and inducibility by polycyclic aromatic hydrocarbons in human tumor-derived cell lines.

Oxidative stress-induced cell death of human oral neutrophils.

The use of toxic equivalency factor distributions in probabilistic risk assessments for dioxins, furans, and PCBs.

2,3,7,8-tetrachlorodibenzo-p-dioxin induces lecithin: retinol acyltransferase transcription in the rat kidney.

Effects of dioxin (2,3,7,8-TCDD) and PCDDs/PCDFs congeners mixture on steroidogenesis in human placenta tissue culture.

Bradykinin B2 receptor-mediated proliferation via activation of the Ras/Raf/MEK/MAPK pathway in rat vascular smooth muscle cells.

Expression of aryl hydrocarbon receptor and aryl hydrocarbon receptor nuclear translocator messenger ribonucleic acids and proteins in rat and human testis.

Endothelial contraction and monolayer hyperpermeability are regulated by Src kinase.

Relaxation of arterial smooth muscle by water-soluble derivatives of coenzyme Q (ubiquinone).

[The regulatory effect of human bone morphogenetic protein 7 gene transfer on the proliferation and differentiation of rabbit bone marrow mesenchymal stem cells].

Hepatic EROD activity is not a useful biomarker of polychlorinated biphenyl exposure in the adult herring gull (*Larus argentatus*).

Dynamics of endocytosis and exocytosis of poly(D,L-lactide-co-glycolide) nanoparticles in vascular smooth muscle cells.

Evidence for the primary role for 4-aminopyridine-sensitive K(v) channels in beta(3)-adrenoceptor-mediated, cyclic AMP-independent relaxations of guinea-pig gastrointestinal smooth muscles.

Effects of magnesium on the production of extracellular matrix metalloproteinases in cultured rat vascular smooth muscle cells.

Hepatic stem cells: existence and origin.

Heat shock induces intestinal-type alkaline phosphatase in rat IEC-18 cells.

Aryl hydrocarbon receptor ligands repress T-cadherin expression in vascular smooth muscle cells.

α -Tocopherol Content and α -Tocopherol Transfer Protein Expression in Leukocytes of Children with Acute Leukemia.

Hepatic progenitor cell lines from allyl alcohol-treated adult rats are derived from gamma-irradiated mouse STO cells.

[Persistent organic micropollutants in Mediterranean organisms and risk associated].

Toxicokinetics and physiologically based toxicokinetics in toxicology and risk assessment.

Similarity between the major collagens of cuttlefish cranial cartilage and cornea.

Generation of aldehyde-derived protein modifications in ethanol-exposed heart.

Health benefits and potential risks related to consumption of fish or fish oil.

Effect of 2,4-dichlorophenol on DPPC/water liposomes studied by X-ray and freeze-fracture electron microscopy.

Neurodevelopmental defects in zebrafish (*Danio rerio*) at environmentally relevant dioxin (TCDD) concentrations.

Beta1 integrin/focal adhesion kinase-mediated signaling induces intercellular adhesion molecule 1 and receptor activator of nuclear factor kappaB ligand on osteoblasts and osteoclast maturation.

Reversible and irreversible emission of methanethiol and dimethyl disulfide from anaerobically stored broccoli.

On the hormonal nature of the stimulatory effect of high incubation temperatures on germination of dormant sorghum (*S. bicolor*) caryopses.

Expression of an Arabidopsis phosphoglycerate mutase homologue is localized to apical meristems, regulated by hormones, and induced by sedentary plant-parasitic nematodes.

Health risk of coplanar polychlorinated biphenyl congeners in edible fish from the Mediterranean Sea.

Comparison of accumulation and altered steroid secretion by placental tissue treated with TCDD and natural mixture of PCDDs-PCDFs.

Hydroxylated and methylsulfone-containing metabolites of polychlorinated biphenyls in the plasma and blubber of bowhead whales (*Balaena mysticetus*).

Oxygen availability during orthotopic liver transplantation.

Somatic embryogenesis and plant regeneration from immature zygotic embryos of *Cryptomeria japonica* D. Don.

Low density lipoprotein receptor-related protein (LRP) is a heparin-dependent adhesion receptor for connective tissue growth factor (CTGF) in rat activated hepatic stellate cells.

TCDD-induced expression of Ah receptor responsive genes in the pituitary and brain of cellular retinol-binding protein (CRBP-I) knockout mice.

Role of mitochondrial aldehyde dehydrogenase in nitrate tolerance.

Cell-specific expression of CYP2A5 in the mouse respiratory tract: effects of olfactory toxicants.

Kinetics of monochloroacetic acid at subtoxic and toxic doses in rats after single oral and dermal administrations.

The requirement of ammonium or other cations linked with p-cresol sulfate for cross-reactivity with a peptide of myelin basic protein.

NTP toxicology and carcinogenesis Studies of 2,4-hexadienal (89% trans,trans isomer, CAS No. 142-83-6; 11% cis,trans isomer) (Gavage Studies).

Protective effect of benidipine against sodium azide-induced cell death in cultured neonatal rat cardiac myocytes.

Toxicogenomic effects of marine brevetoxins in liver and brain of mouse.

Simulation of dioxin accumulation in human tissues and analysis of reproductive risk.

Effect of dietary co-administration of sodium selenite on sodium arsenite-induced ovarian and uterine disorders in mature albino rats.

Heparan sulfates expressed in the distal lung are required for Fgf10 binding to the epithelium and for airway branching.

Critical amino acid residues determine the binding affinity and the Ca²⁺ release efficacy of maurocalcine in skeletal muscle cells.

Genetic transformation of Indian bread (*T. aestivum*) and pasta (*T. durum*) wheat by particle bombardment of mature embryo-derived calli.

Bioaccumulation and toxic potencies of polychlorinated biphenyls and polycyclic aromatic hydrocarbons in tidal flat and coastal ecosystems of the Ariake Sea, Japan.

On the significance of the role of cellular stress response reactions in the toxic actions of dioxin.

Toxicity and metabolism of subcytotoxic inorganic arsenic in human renal proximal tubule epithelial cells (HK-2).

Aberrant utilization of nitric oxide and regulation of soluble guanylate cyclase in rat diabetic retinopathy.

Tissue repair plays pivotal role in final outcome of liver injury following chloroform and allyl alcohol binary mixture.

[Modelling of Mg²⁺, ATP-dependent mitochondrial Ca ions transport in smooth muscle cells using protonophore CCCP-sensitive fluorescent tetracycline].

FT-IR spectroscopic analysis of rainbow trout liver exposed to nonylphenol.

Triazines facilitate neurotransmitter release of synaptic terminals located in hearts of frog (*Rana ridibunda*) and honeybee (*Apis mellifera*) and in the ventral nerve cord of a beetle (*Tenebrio molitor*).

Initial signaling of the fibronectin receptor (α 5 β 1 integrin) in hepatic stellate cells is independent of tyrosine phosphorylation.

Soluble extracts from *Helicobacter pylori* induce dome formation in polarized intestinal epithelial monolayers in a laminin-dependent manner.

Use of plant cell cultures to study graminicide effects on lipid metabolism.

Health of tree swallow (*Tachycineta bicolor*) nestlings exposed to chlorinated hydrocarbons in the St Lawrence River basin. Part I. Renal and hepatic vitamin A concentrations.

Zebrafish as a novel experimental model for developmental toxicology.

Enhancement of neurite outgrowth-promoting activity by heparin derivatives in sodium chlorate-treated explant cultures of rat central neurons.

Determining whether transgenic and endogenous plant DNA and transgenic protein are detectable in muscle from swine fed Roundup Ready soybean meal.

Metabolism of lipid derived aldehyde, 4-hydroxynonenal in human lens epithelial cells and rat lens.

[Determination of 2,4-dinitrophenol, its basic metabolite and 4-oxide diphenyl in biological materials].

Hydroxylated PCBs and other chlorinated phenolic compounds in lake trout (*Salvelinus namaycush*) blood plasma from the Great Lakes region.

Selenoprotein metabolism and function: evidence for more than one function for selenoprotein P.

Chemiluminescence response of beta-glucan stimulated leukocytes isolated from different tissues and peritoneal cavity of *Dicentrarchus labrax*.

Occurrence of *Botrytis cinerea* and Subsequent Disease Expression at Different Positions on Leaves and Bunches of Grape.

Kinetic study of alkaline induced hydrolysis of the skeletal muscle relaxant chlorzoxazone using ratio spectra first derivative spectrophotometry.

The effect of fucoidan, heparin and cyanogen bromide-fibrinogen on the activation of human glutamic-plasminogen by tissue plasminogen activator.

An artificial amino acid, 4-iodo-L-meta-tyrosine: biodistribution and excretion via kidney.

Stress-induced somatic embryogenesis in vegetative tissues of *Arabidopsis thaliana*.

Inhibition of CYP 1A2-dependent MROD activity in rat liver microsomes: an explanation of the hepatic sequestration of a limited subset of halogenated aromatic hydrocarbons.

Influence of plant age and size on simazine toxicity and uptake.

Role of antioxidants in paraquat toxicity.

On the mechanism of selectivity of the corn herbicide BAS 662H: a combination of the novel auxin transport inhibitor diflufenzopyr and the auxin herbicide dicamba.

In vitro myelotoxicity of propanil and 3,4-dichloroaniline on murine and human CFU-E/BFU-E progenitors.

[Genotoxic effect of PCP and lindane on human epithelial tonsil cells].

Antioxidant enzymes, free-radical damage, and response to paraquat in liver and kidney of long-living growth hormone receptor/binding protein gene-disrupted mice.

Paraquat-induced gene expression in rat lung tissues using a differential display reverse transcription-polymerase chain reaction.

A survey of EPA/OPP and open literature on selected pesticide chemicals. III. Mutagenicity and carcinogenicity of benomyl and carbendazim.

Phytotoxicity and ultrastructural effects of gymnopusin from the orchid *Maxillaria densa* on duckweed (*Lemna paucicostata*) frond and root tissues.

Expression of mutant alpha-synucleins enhances dopamine transporter-mediated MPP⁺ toxicity in vitro.

Toxicokinetics, recovery, and metabolism of triclopyr butotyl (ACTP) ester in goats.

Uptake, metabolism, and effects on detoxication enzymes of isoproturon in spawn and tadpoles of amphibians.

Review of 2,4-dichlorophenoxyacetic acid (2,4-D) epidemiology and toxicology.

Environmental agents as cause of health disorders in children presented at an outpatient unit of environmental medicine.

Protective effect of aminoguanidine against paraquat-induced oxidative stress in the lung of mice.

Environmental risk factors and Parkinson's disease: selective degeneration of nigral dopaminergic neurons caused by the herbicide paraquat.

A study of the potential for a herbicide formulation containing 2,4-d and picloram to cause male-mediated developmental toxicity in rats.

Broadening our outlook on sources for corneal donation.

The volatile fraction of cigarette smoke induces alterations in the human gingival fibroblast cytoskeleton.

Increased sensitivity in dopamine D₂-like brain receptors from 2,4-dichlorophenoxyacetic acid (2,4-D)-exposed and amphetamine-challenged rats.

Hermaphroditic, demasculinized frogs after exposure to the herbicide atrazine at low ecologically relevant doses.

Effects of paraquat on essential antioxidant elements in osteogenic disorder Shionogi rat.

Role of catalase in the smooth muscle relaxant actions of sodium azide and cyanamide.

Effect of diquat on the antioxidant system and cell growth in human neuroblastoma cells.

Severe propanil [N-(3,4-dichlorophenyl) propanamide] pesticide self-poisoning.

Radioprotectants: current status and new directions.

In vitro effect of air pollutants on human bronchi.

[Herbicides and congenital malformations in Meta, Colombia].

A fatal human intoxication with the herbicide allyl alcohol (2-propen-1-ol).

Enantiomeric enrichment of chiral pesticides in the environment.

Serum protein acrolein adducts: utility in detecting oxidant stress in hemodialysis patients and reversal using a vitamin E-bonded hemodialyzer.

Thyroid status regulates CART but not AgRP mRNA levels in the rat hypothalamus.

The role of sodium cromolyn in treatment of paraquat-induced pulmonary fibrosis in rat.

Combined effect of chronic hypoxia and in vitro exposure to gas pollutants on airway reactivity.

Carcinogenicity of dimethylarsinic acid in male F344 rats and genetic alterations in induced urinary bladder tumors.

Chemical ionization mass spectrometric determination of acrolein in human breast cancer cells.

In vivo copper-mediated free radical production: an ESR spin-trapping study.

Soybean meal from roundup ready or conventional soybeans in diets for growing-finishing swine.

Acrolein modifies and inhibits cytosolic aspartate aminotransferase.

Analysis of DNA adducts in rats exposed to pentachlorophenol.

Inhibition of cell proliferation and AP-1 activity by acrolein in human A549 lung adenocarcinoma cells due to thiol imbalance and covalent modifications.

Elimination of $\cdot O_2(-)/H_2O_2$ by alpha-lipoic acid mediates the recovery of basal EDRF/NO availability and the reversal of superoxide dismutase-induced relaxation in diabetic rat aorta.

Aldehyde-sequestering drugs: tools for studying protein damage by lipid peroxidation products.

Regeneration from mature and immature embryos and transient gene expression via Agrobacterium-mediated transformation in emmer wheat (*Triticum dicoccum* Schuble).

Acrolein activates mitogen-activated protein kinase signal transduction pathways in rat vascular smooth muscle cells.

Ozone-induced ethylene production is dependent on salicylic acid, and both salicylic acid and ethylene act in concert to regulate ozone-induced cell death.

Systemic uptake and cutaneous disposition of pentachlorophenol in a sequential exposure scenario: effects of skin preexposure to benzo[a]pyrene.

Generation of protein adducts with malondialdehyde and acetaldehyde in muscles with predominantly type I or type II fibers in rats exposed to ethanol and the acetaldehyde dehydrogenase inhibitor cyanamide.

Comprehensive analysis of gene expression in *Nicotiana tabacum* leaves acclimated to oxidative stress.

Metabolic disturbances in fish exposed to sodium pentachlorophenate (NaPCP) and 3,3',4,4',5-pentachlorobiphenyl (PCB126), individually or combined.

Immuno-cytochemical localization of indole-3-acetic acid during induction of somatic embryogenesis in cultured sunflower embryos.

Isolation of HAG1 and its regulation by plant hormones during in vitro floral organogenesis in *Hyacinthus orientalis* L.

Molecular requisites for drug binding to muscle CLC-1 and renal CLC-K channel revealed by the use of phenoxy-alkyl derivatives of 2-(p-chlorophenoxy)propionic acid.

The WUSCHEL gene promotes vegetative-to-embryonic transition in *Arabidopsis*.

Transepithelial organic anion transport by shark choroid plexus.

Chemical marker for ALS-inhibitor herbicides: 2-aminobutyric acid proportional in sub-lethal applications.

Purification and characterization of cytosolic glycerol-3-phosphate dehydrogenase from skeletal muscle of jerboa (*Jaculus orientalis*).

Involvement of the *Arabidopsis* alpha-DOX1 fatty acid dioxygenase in protection against oxidative stress and cell death.

Cell enlargement of plant tissue explants oscillates with a temperature-compensated period of ca. 24 min.

Plasma pharmacokinetics and tissue distribution of a N-pyrrolo-[1,2-c]imidazolylphenyl sulfonamide in rats.

Possible range of dioxin concentration in human tissues: simulation with a physiologically based model.

Altered protein profile and possible hypoxia in the placenta of 2,3,7,8-tetrachlorodibenzo-p-dioxin-exposed rats.

Phosphorylated alpha-synuclein is ubiquitinated in alpha-synucleinopathy lesions.

Non-genotoxic carcinogens: early effects on gap junctions, cell proliferation and apoptosis in the rat.

[Genetics and environmental factors of Parkinson disease].

Effects of ascorbic acid and alpha-tocopherol on arsenic-induced oxidative stress.

Myoplasmic calcium regulation in myotubes from horses with recurrent exertional rhabdomyolysis.

Detection of proton release from cultured human myotubes to identify malignant hyperthermia susceptibility.

Patients with malignant hyperthermia demonstrate an altered calcium control mechanism in B lymphocytes.

Antenatal dexamethasone enhances endothelin-1 synthesis and gene expression in the heart in congenital diaphragmatic hernia in rats.

Cytoskeletal structure of myoblasts with the mitochondrial DNA 3243A-->G mutation and of osteosarcoma cells with respiratory chain deficiency.

Lipid metabolism and neuropsychological follow-up study of workers exposed to 2,3,7,8-tetrachlorodibenzo- p-dioxin.

Alcohol-induced increases in insulin-like growth factor binding protein-1 are partially mediated by TNF.

Arsenic induces peroxynitrite generation and cyclooxygenase-2 protein expression in aortic endothelial cells: possible role in atherosclerosis.

Bioavailability of caseinophosphopeptide-bound iron.

Differential toxicogenomic responses to 2,3,7,8-tetrachlorodibenzo-p-dioxin in malignant and nonmalignant human airway epithelial cells.

Antiandrogenic effects in vitro and in vivo of the fungicide prochloraz.

The redox protein thioredoxin-1 regulates the constitutive and inducible expression of the estrogen metabolizing cytochromes P450 1B1 and 1A1 in MCF-7 human breast cancer cells.

Fibrinogen induces chemotactic activity in endothelial cells.

On the role of monoamine oxidase-A for the maintenance of the volitional consumption of ethanol in two different rat models.

Effects of chronic dietary exposure to environmentally relevant concentrations to 2,3,7,8-tetrachlorodibenzo-p-dioxin on survival, growth, reproduction and biochemical responses of female rainbow trout (*Oncorhynchus mykiss*).

Increased arylhydrocarbon receptor expression offers a potential therapeutic target for pancreatic cancer.

Mortality in dioxin-exposed mice infected with influenza: mitochondrial toxicity (reye's-like syndrome) versus enhanced inflammation as the mode of action.

Thyroid transcription factor-1 expression during normal human lung development and in patients with congenital diaphragmatic hernia.

Effect of mechanical ventilation on the pulmonary expression and production of elastin in nitrofen-induced diaphragmatic hernia in rats.

Increased sensitivity to 4-chloro-m-cresol and caffeine in primary myotubes from malignant hyperthermia susceptible individuals carrying the ryanodine receptor 1 Thr2206Met (C6617T) mutation.

Oxidation-reduction (redox) controls fetal hypoplastic lung growth.

The silencing mediator of retinoic acid and thyroid hormone receptors can interact with the aryl hydrocarbon (Ah) receptor but fails to repress Ah receptor-dependent gene expression.

Entacapone does not induce conformational changes in liver mitochondria or skeletal muscle in vivo.

Is exposure to endocrine disrupting compounds during fetal/post-natal development affecting the reproductive potential of farm animals?

The stress response decreases NF-kappaB activation in liver of endotoxemic mice.

Effects of in utero exposure to the organophosphate insecticide fenitrothion on androgen-dependent reproductive development in the CrI:CD(SD)BR rat.

Function and dysfunction of aPKC isoforms for glucose transport in insulin-sensitive and insulin-resistant states.

Low doses of 2,3,7,8-tetrachlorodibenzo- p-dioxin increase transforming growth factor beta and cause myocardial fibrosis in marmosets (*Callithrix jacchus*).

Severe 2,3,7,8-tetrachlorodibenzo- p-dioxin (TCDD) intoxication: kinetics and trials to enhance elimination in two patients.

Effect of estrogen and 2,3,7,8-tetrachlorodibenzo-rho-dioxin (TCDD) on plasma fatty acids of immature male chickens (*Gallus domesticus*).

Mechanism of action and development of selective aryl hydrocarbon receptor modulators for treatment of hormone-dependent cancers (Review).

E-selectin modulates the malignant properties of T84 colon carcinoma cells.

Dinitrophenol pretreatment of rat ventricular myocytes protects against damage by metabolic inhibition and reperfusion.

Type II collagen deposition in cruciate ligament precedes osteoarthritis in the guinea pig knee.

Effect of caries disclosing agents on bond strengths of total-etch and self-etching primer dentin bonding systems to resin composite.

Increased vascular endothelial growth factor peptide and gene expression in hypoplastic lung in nitrofen induced congenital diaphragmatic hernia in rats.

Primary structure and pathological study of phospholipase A2-I from *Agkistrodon bilineatus* (common cantil) venom.

Short-term effects of forced eccentric contractions on collagen synthesis and degradation in rat skeletal muscle.

Effects of subchronic exposure to a complex mixture of persistent contaminants in male rats: systemic, immune, and reproductive effects.

Exercise- and insulin-stimulated muscle glucose transport: distinct mechanisms of regulation.

A proteasome inhibitor confers cardioprotection.

Syndrome of iron pill aspiration.

Prediction of rodent nongenotoxic carcinogenesis: evaluation of biochemical and tissue changes in rodents following exposure to nine nongenotoxic NTP carcinogens.

Marginal iron deficiency without anemia impairs aerobic adaptation among previously untrained women.

An autopsy case of poisoning by massive absorption of cresol a short time before death.

Effects of src-deficiency on the expression of in vivo toxicity of TCDD in a strain of c-src knockout mice procured through six generations of backcrossings to C57BL/6 mice.

Dioxin-induced adseverin expression in the mouse thymus is strictly regulated and dependent on the aryl hydrocarbon receptor.

[Immunoenzyme analysis of natural antibodies to endogenous bioregulators in patients with systemic lupus erythematosus].

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on trace elements, inflammation and viral clearance in the myocardium during coxsackievirus B3 infection in mice.

In vitro effects of 4-chloro-3-ethylphenol in skeletal muscle preparations from malignant hyperthermia susceptible and normal swine.

Dioxin in infants--an environmental hazard?

Tumor necrosis factor alpha stimulates invasion of Src-activated intestinal cells.

Suspected cresol poisoning in cattle presented for slaughter.

Lack of promoting effect due to oral administration of dimethylarsinic acid on rat lung carcinogenesis initiated with N-bis(2-hydroxypropyl)nitrosamine.

Oxidative stress reproduces placental abnormalities of preeclampsia.

Activation of bone sialoprotein gene transcription by flavonoids is mediated through an inverted CCAAT box in ROS 17/2.8 cells.

Inhibitory effect of *Carthamus tinctorius* L. seed extracts on bone resorption mediated by tyrosine kinase, COX-2 (cyclooxygenase) and PG (prostaglandin) E2.

Monoclonal antibodies recognizing epitopes of calretinins: dependence on Ca²⁺-binding status and differences in antigen accessibility in colon cancer cells.

Dioxins and endometriosis: a plausible hypothesis.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) disrupts early morphogenetic events that form the lower reproductive tract in female rat fetuses.

Interactions in developmental toxicology: effects of concurrent exposure to lead, organic mercury, and arsenic in pregnant mice.

Genomic analysis of alachlor-induced oncogenesis in rat olfactory mucosa.

Metabolism and excretion of 2-nitro-p-cresol in rats.

Adenoviral-mediated overexpression of catalase inhibits endothelial cell proliferation.

H₂O₂ activates ryanodine receptor but has little effect on recovery of releasable Ca²⁺ content after fatigue.

Determination of As(III), As(V), monomethylarsonic acid, dimethylarsinic acid and arsenobetaine by HPLC-ICP-MS: analysis of reference materials, fish tissues and urine.

Reactivity of atropaldehyde, a felbamate metabolite in human liver tissue in vitro.

Regulation of directional expansion by the cortical microtubule array in roots of *Lemna minor*.

Subchronic toxicity of Baltic herring oil and its fractions in the rat I: Fractionation and levels of organohalogen pollutants.

Immunoaffinity column as sample cleanup method for determination of the beta-adrenergic agonist ractopamine and its metabolites.

Extravascular collagen in the human epileptic brain: a potential substrate for aberrant cell migration in cases of temporal lobe epilepsy.

Cyclic mechanical stretch augments prostacyclin production in cultured human uterine myometrial cells from pregnant women: possible involvement of up-regulation of prostacyclin synthase expression.

Expression, cellular distribution and induction of cytochrome p4501A (CYP1A) in gilthead seabream, *Sparus aurata*, brain.

Enhancement of alpha-adrenoceptor-mediated responses in prostate of testosterone-treated rat.

Physiological and cytological responses of the marine diatom *Skeletonema costatum* to 2,4-dichlorophenol.

Bioavailability of the isomer mixture of phytoene and phytofluene-rich alga *Dunaliella bardawil* in rat plasma and tissues.

Spatial aspects of organochlorine contamination in northern fur seal tissues.

Ketoprofen-induced intestinal permeability changes studied in side-by-side diffusion cells.

Mutant alleles of *Arabidopsis* RADIALLY SWOLLEN 4 and 7 reduce growth anisotropy without altering the transverse orientation of cortical microtubules or cellulose microfibrils.

Atypical mechanism of NF-kappaB activation during reoxygenation stress in microvascular endothelium: a role for tyrosine kinases.

Biodegradation and enzymatic responses in the marine diatom *Skeletonema costatum* upon exposure to 2,4-dichlorophenol.

Evidence that amyloid beta-peptide-induced lipid peroxidation and its sequelae in Alzheimer's disease brain contribute to neuronal death.

Estrous cycle-regulated expression of CYP1B1 mRNA in the rat ovary.

Portal absorption of ¹⁴C after ingestion of spiked milk with ¹⁴C-phenanthrene, ¹⁴C-benzo[a]pyrene or ¹⁴C-TCDD in growing pigs.

Opening of ATP-sensitive potassium channels causes generation of free radicals in vascular smooth muscle cells.

Calmodulin binding to the 3614-3643 region of RyR1 is not essential for excitation-contraction coupling in skeletal myotubes.

3-Methylcholanthrene, which binds to the arylhydrocarbon receptor, inhibits proliferation and differentiation of osteoblasts in vitro and ossification in vivo.

Polyamines regulate beta-catenin tyrosine phosphorylation via Ca(2+) during intestinal epithelial cell migration.

Origins and consequences of mitochondrial decline in nucleated erythrocytes.

A gradient anion exchange chromatographic method for the speciation of arsenic in lobster tissue extracts.

Both tissue inhibitors of metalloproteinases-1 (TIMP-1) and TIMP-2 activate Ras but through different pathways.

The effect of oxidative stress on ERalpha and ERbeta expression.

Modeling digestive tract absorption and desorption of lipophilic organic contaminants in humans.

Tissue-specific expression of AHR2, ARNT2, and CYP1A in zebrafish embryos and larvae: effects of developmental stage and 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

Role of pp60(c-src) and p(44/42) MAPK in ANG II-induced contraction of rat tonic gastrointestinal smooth muscles.

Selective formation of certain advanced glycation end products in spinal cord astrocytes of humans and mice with superoxide dismutase-1 mutation.

[Changes in the level of short-chain volatile fatty acids and their aldehydes in oral air and fluid during inflammation of oral tissues].

Distribution and elimination of polychlorinated dibenzo-p-dioxins, dibenzofurans, biphenyls, and p,p'-DDE in tissues of bald eagles from the Upper Peninsula of Michigan.

Activation of Wiskott-Aldrich syndrome protein and its association with other proteins by stromal cell-derived factor-1alpha is associated with cell migration in a T-lymphocyte line.

The effect of ascorbic acid and ethanol on the level of thiobarbituric acid reactive substances (TBARS) in selected tissues of albino BALB/c mice.

Mitochondrial sequestration and Ca(2+)-dependent release of cytosolic Zn(2+) loads in cortical neurons.

Levels and tissue-dependent distribution of dioxin in Japanese domestic leafy vegetables--from the 1999 national investigation.

Effect of vehicle on brain uptake of [11C]toluene.

Gene-specific TCDD suppression of RARalpha- and RXR-mediated induction of tissue transglutaminase.

Induction of oxidative stress in the tissues of rats after chronic exposure to TCDD, 2,3,4,7,8-pentachlorodibenzofuran, and 3,3',4,4',5-pentachlorobiphenyl.

Comparative effects of TCDD, endrin, naphthalene and chromium (VI) on oxidative stress and tissue damage in the liver and brain tissues of mice.

Coupled high performance liquid chromatography-microwave digestion-hydride generation-atomic absorption spectrometry for inorganic and organic arsenic speciation in fish tissue.

Lipid peroxidation in neurodegeneration: new insights into Alzheimer's disease.

beta-very low density lipoprotein enhances inducible nitric oxide synthase expression in cytokine-stimulated vascular smooth muscle cells.

Microfilament-dependent movement of the beta3 integrin subunit within focal contacts of endothelial cells.

Effects of benzo[a]pyrene exposure on a fish population resistant to the toxic effects of dioxin-like compounds.

Benzo(a)pyrene, but not 2,3,7,8-tetrachlorodibenzo-p-dioxin, alters cell adhesion proteins in human uterine RL95-2 cells.

Alteration in ovarian gene expression in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin: reduction of cyclooxygenase-2 in the blockage of ovulation.

Tissue-specific, light-regulated and plastid-regulated expression of the single-copy nuclear gene encoding the chloroplast Rieske FeS protein of *Arabidopsis thaliana*.

Assessment of chlorinated dibenzo-p-dioxin and dibenzofuran trends in sediment and crab hepatopancreas from pulp mill and harbor sites using multivariate- and index-based approaches.

Retardation of organic contaminants in natural fractures in chalk.

Changes in gene expression profiles of human fibroblasts in response to sodium arsenite treatment.

Recognition and phagocytosis of apoptotic T cells by resident murine tissue macrophages require multiple signal transduction events.

Evidence for high activity of xylem parenchyma and ray cells in the interface of host stem and *Agrobacterium tumefaciens*-induced tumours of *Ricinus communis*.

Induction of CYP1A1 and CYP1A2 expressions by prototypic and atypical inducers in the human lung.

Charcoal affects early development and hormonal concentrations of somatic embryos of hybrid larch.

Hepatic microsomal cytochrome p450s and chlorinated hydrocarbons in largha and ribbon seals from Hokkaido, Japan: differential response of seal species to Ah receptor agonist exposure.

Merosin-integrin promotion of skeletal myofiber cell survival: Differentiation state-distinct involvement of p60Fyn tyrosine kinase and p38alpha stress-activated MAP kinase.

Role of gas chromatography-mass spectrometry with negative ion chemical ionization in clinical and forensic toxicology, doping control, and biomonitoring.

Long-chain fatty acids increase basal metabolism and depolarize mitochondria in cardiac muscle cells.

Role of the cytoskeleton in mediating effect of vasopressin and herbimycin A on secretory K channels in CCD.

Identification of 2,3,7,8-tetrachlorodibenzo-p-dioxin-responsive genes in mouse liver by serial analysis of gene expression.

Characterization of 2-amino-4,5-dichlorophenol (2A45CP) in vitro toxicity in renal cortical slices from male Fischer 344 rats.

Formation of methanethiol and dimethyl disulfide in crushed tissues of broccoli florets and their inhibition by freeze-thawing.

Macrophage migration inhibitory factor up-regulates matrix metalloproteinase-9 and -13 in rat osteoblasts. Relevance to intracellular signaling pathways.

Cytochemical investigation of gastric gland component cells with high-pressure freezing followed by freeze-substitution and hydrophilic resin embedding.

Aryl hydrocarbon receptor is required for prevention of blood clotting and for the development of vasculature and bone in the embryos of medaka fish, *Oryzias latipes*.

A mixture of polychlorinated dibenzo-p-dioxins (PCDDs), dibenzofurans (PCDFs), and non-ortho polychlorinated biphenyls (PCBs) changed the lipid content of pregnant Long Evans rats.

Arsenic accumulation and metabolism in rice (*Oryza sativa* L.).

Induction of oxidative stress in rat epididymal sperm after exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Thrombin-stimulated cell proliferation mediated through activation of Ras/Raf/MEK/MAPK pathway in canine cultured tracheal smooth muscle cells.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the antioxidant system in mitochondrial and microsomal fractions of rat testis.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on oxidative enzymes in adipocytes and liver.

Immunohistochemical localization of thyroid stimulating hormone induced by a low oral dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats.

Toxic potency of polychlorinated dibenzo-p-dioxins, polychlorinated dibenzofurans, and polychlorinated biphenyls in food samples from Catalonia (Spain).

Effect of the new matrix metalloproteinase inhibitor RO-28-2653 on mitochondrial function.

Determination of tissue-blood partition coefficients for a physiological model for humans, and estimation of dioxin concentration in tissues.

[Heat shock protein 27 in osteoblasts].

Analysis of plant hormones in tobacco flowers by micellar electrokinetic capillary chromatography coupled with on-line large volume sample stacking.

Polychlorinated dibenzo-p-dioxins, dibenzofurans, and dioxin-like polychlorinated biphenyls in livers of birds from Japan.

Unique property of some synthetic retinoids: activation of the aryl hydrocarbon receptor pathway.

ECM is required for skeletal muscle differentiation independently of muscle regulatory factor expression.

Multidrug-resistance *mdr1a/1b* double knockout mice are more sensitive than wild type mice to acute arsenic toxicity, with higher arsenic accumulation in tissues.

Chemical speciation of arsenic in the livers of higher trophic marine animals.

Contamination and toxic effects of persistent endocrine disrupters in marine mammals and birds.

TNF- α suppresses bone sialoprotein (BSP) expression in ROS17/2.8 cells.

Induction of olfactory mucosal and liver metabolism of lidocaine by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

1,25(OH) $_2$ -vitamin D $_3$ induces translocation of the vitamin D receptor (VDR) to the plasma membrane in skeletal muscle cells.

Functional properties of EGFP-tagged skeletal muscle calcium-release channel (ryanodine receptor) expressed in COS-7 cells: sensitivity to caffeine and 4-chloro-m-cresol.

Acute sodium arsenite treatment induces *Cyp2a5* but not *Cyp1a1* in the C57Bl/6 mouse in a tissue (kidney) selective manner.

TCDD-mediated oxidative stress in male rat pups following perinatal exposure.

Tolerance and metabolism of phenol and chloroderivatives by hairy root cultures of *Daucus carota* L.

Tissue concentrations and induction of a hepatic monooxygenase in male Wistar rats after repeated doses of defined polychlorinated dibenzo-p-dioxin and dibenzofuran (PCDDs and PCDFs) mixtures.

Studies on the accumulation and transformation of arsenic in freshwater organisms I. Accumulation, transformation and toxicity of arsenic compounds on the Japanese medaka, *Oryzias latipes*.

Effects of trichloroacetic acid on the nitrogen metabolism of *Pinus sylvestris*--a $^{13}\text{C}/^{15}\text{N}$ tracer study.

Proliferation and differentiation of ductular progenitor cells and littoral cells during the regeneration of the rat liver to CCl $_4$ /2-AAF injury.

PET imaging of dopamine transporters in the human brain using [(11)C]-beta-CPPIT, a cocaine derivative lacking the 2 beta-ester function.

Effect of acute and chronic alcohol treatment and their superimposition on lysosomal, cytoplasmic, and proteosomal protease activities in rat skeletal muscle in vivo.

The stimulation of tumor necrosis factor and inhibition of glucose transport and lipoprotein lipase in adipose cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Dioxin increases reactive oxygen production in mouse liver mitochondria.

Cytokine-activated Jak-2 is involved in inducible nitric oxide synthase expression independent from NF-kappaB activation in vascular smooth muscle cells.

Captopril inhibits the pulmonary toxicity of paraquat in rats.

Neutropenia induced by paraquat poisoning.

A study of the developmental toxicity potential of pentachlorophenol in the rat.

Developmental toxicity study of pentachlorophenol in the rabbit.

Changes in concentrations of type IV collagen and tissue inhibitor of metalloproteinase-1 in patients with paraquat poisoning.

Glutathione-dependent resistance of the European eel *Anguilla anguilla* to the herbicide molinate.

Synergistic cytotoxicity between pentachlorophenol and copper in a bacterial model.

Mechanisms of MPP(+) incorporation into cerebellar granule cells.

Oxidative stress causes abnormal accumulation of familial amyotrophic lateral sclerosis-related mutant SOD1 in transgenic *Caenorhabditis elegans*.

Lung tissue mechanics and extracellular matrix remodeling in acute lung injury.

Oral exposure of dimethylarsinic acid, a main metabolite of inorganic arsenics, in mice leads to an increase in 8-Oxo-2'-deoxyguanosine level, specifically in the target organs for arsenic carcinogenesis.

Amine metabolism: a novel path to coronary artery vasospasm.

Amyotrophic lateral sclerosis and occupational exposure to 2,4-dichlorophenoxyacetic acid.

Effect of isoproterenol pretreatment on the biochemical toxicodynamics of anilofos in male rats.

Gender difference in cytoprotection induced by estrogen on female and male bovine aortic endothelial cells.

Glutathione elevation and its protective role in acrolein-induced protein damage in synaptosomal membranes: relevance to brain lipid peroxidation in neurodegenerative disease.

[Genotoxic effect of the insecticides pentachlorophenol and lindane on human nasal mucosal epithelium].

Carrier-mediated processes in blood--brain barrier penetration and neural uptake of paraquat.

Use of a monoclonal antibody against Lafora bodies for the immunocytochemical study of ground-glass inclusions in hepatocytes due to cyanamide.

Oxidative stress and liver toxicity in rats and human hepatoma cell line induced by pentachlorophenol and its major metabolite tetrachlorohydroquinone.

Modulation of cell proliferation by heterotrimeric G protein in Arabidopsis.

Human gingival fibroblast cytoskeleton is a target for volatile smoke components.

Designing herbicide formulation characteristics to maximize efficacy and minimize rice injury in paddy environments.

Prenatal exposure to nitrofen induces Fryns phenotype in mice.

Dimethylarsinic acid induces 8-hydroxy-2'-deoxyguanosine formation in the kidney of NCI-Black-Reiter rats.

Toxico-kinetics, recovery, and metabolism of napropamide in goats following a single high-dose oral administration.

Herbicides and the microtubular apparatus of *Nicotiana tabacum* pollen tube: immunofluorescence and immunogold labelling studies.

A concise review of the toxicity and carcinogenicity of dimethylarsinic acid.

Carcinogenicity assays of wood dust and wood additives in rats exposed by long-term inhalation.

Effect of cigarette smoke extract on neonatal porcine vascular smooth muscle cells.

Effects of diquat, an aquatic herbicide, on the development of mallard embryos.

Differential sensitivities of plant and animal mitochondria to the herbicide paraquat.

Effects of 2,4-dichlorophenoxy acetic acid dimethyl amine salt on dental hard tissue formation in rats.

Temporal changes in TCDD levels in 1419 Air Force Vietnam-era veterans not occupationally exposed to herbicides.

Mortality in chemical workers potentially exposed to 2,4-dichlorophenoxyacetic acid (2,4-D) 1945-94: an update.

Pesticides directly accelerate the rate of alpha-synuclein fibril formation: a possible factor in Parkinson's disease.

Immunohistochemical detection of lipid peroxidation products, protein-bound acrolein and 4-hydroxynonenal protein adducts, in actinic elastosis of photodamaged skin.

Differential role of superoxide and glutathione in S-nitrosoglutathione-mediated apoptosis: a rationale for mild forms of familial amyotrophic lateral sclerosis associated with less active Cu,Zn superoxide dismutase mutants.

Expression and prognostic significance of catalase in malignant mesothelioma.

Expression of inducible nitric oxide synthase in primary culture of rat bladder smooth muscle cells by plasma from cyclophosphamide-treated rats.

Effects of chlorpropham (CIPC) on the hemopoietic system of rats.

Biological effects of a nano red elemental selenium.

Post-transcriptional control of catalase expression in garlic-treated rats.

NF kappa B and AP-1 mediate transcriptional responses to oxidative stress in skeletal muscle cells.

Carboxylic acids and skeletal muscle chloride channel conductance: effects on the biological activity induced by the introduction of an aryloxyalkyl group alpha to the carboxylic function of 4-chloro-phenoxyacetic acid.

Hydrogen peroxide detoxification in the midgut of the blood-sucking insect, *Rhodnius prolixus*.

Auxin herbicides induce H₂O₂ overproduction and tissue damage in cleavers (*Galium aparine* L.).

Biotransformation, excretion kinetics, and tissue distribution of an N-pyrrolo[1,2-c]imidazolylphenyl sulfonamide herbicide in rats.

Impaired activity of the extraneuronal monoamine transporter system known as uptake-2 in *Orct3/Slc22a3*-deficient mice.

Uniformly (14)C-ring-labeled 2,4-dichlorophenoxyacetic acid: a metabolism study in bluegill sunfish, *Lepomis macrochirus*.

Red blood cells inhibit activation-induced cell death and oxidative stress in human peripheral blood T lymphocytes.

The influence of oxidative stress on catalase and MnSOD gene transcription in astrocytes.

Auxin distribution and transport during embryonic pattern formation in wheat.

Acute effect of ethanol on 7-hydroperoxycholesterol in muscle and liver.

Microtubules and vimentin associated filaments (VIFs) in cultured human gingival fibroblasts (HGFs) after exposure to acrolein and acetaldehyde.

Metabolism and distribution of [2,3-(14)C]acrolein in laying hens.

Metabolism and distribution of [2,3-(14)C]acrolein in lactating goats.

Role of the epithelium in opposing H₂O₂-induced modulation of acetylcholine-induced contractions in rabbit intrapulmonary bronchiole.

Selected contribution: effect of the aldehyde acrolein on acetylcholine-induced membrane current in airway smooth muscle cells.

Unmasking the progesterone receptor in the preoptic area and hypothalamus of the ewe: no colocalization with gonadotropin-releasing neurons.

Differential antioxidant responses to norflurazon-induced oxidative stress in maize.

Morphohistobiochemical characteristics of embryogenic and nonembryogenic callus cultures of sweet potato (*Ipomoea batatas* L.).

Ion chromatographic analysis of selected free amino acids and cations to investigate the change of nitrogen metabolism by herbicide stress in soybean (*Glycine max*).

Metabolism of 2,4-dichlorophenoxyacetic acid in laying hens and lactating goats.

B-lymphocytes from malignant hyperthermia-susceptible patients have an increased sensitivity to skeletal muscle ryanodine receptor activators.

Congener-specific profile and toxicity assessment of PCBs in green turtles (*Chelonia mydas*) from the Hawaiian Islands.

Tissue inhibitor of metalloproteinases 1 and 2 directly stimulate the bone-resorbing activity of isolated mature osteoclasts.

Severity of oxidative stress generates different mechanisms of endothelial cell death.

Mutations to Gly2370, Gly2373 or Gly2375 in malignant hyperthermia domain 2 decrease caffeine and cresol sensitivity of the rabbit skeletal-muscle Ca²⁺-release channel (ryanodine receptor isoform 1).

Mitochondrial uncoupling as a target for drug development for the treatment of obesity.

Effects on levels of glutathione and some related enzymes in tissues after an acute arsenic exposure in rats and their relationship to dietary protein deficiency.

Protection by dietary compounds against mutation in a transgenic rodent.

Mast cell regulation of inflammation and gene expression during antigen-induced bladder inflammation in mice.

[Epidemiology of soft tissue sarcomas in adults].

Secretion of gelatinases and activation of gelatinase A (MMP-2) by human rheumatoid synovial fibroblasts.

p73 is a growth-regulated protein in vascular smooth muscle cells and is present at high levels in human atherosclerotic plaque.

T-cell-based immunity counteracts the potential toxicity of glutamate in the central nervous system.

Decreased mitogen activated protein kinase activities in congenital diaphragmatic hernia-associated pulmonary hypoplasia.

Association of c-myc overexpression and hyperproliferation with arsenite-induced malignant transformation.

7,12-Dimethylbenz[a]anthracene inhibition of steroid production in MA-10 mouse Leydig tumor cells is not directly linked to induction of CYP1B1.

Dioxins in adipose tissue of non-occupationally exposed persons in France: correlation with individual food exposure.

Genistein, a soybean isoflavone, inhibits inward rectifier K(+) channels in rat osteoclasts.

Biochemical and toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in immature male and female chickens.

Late confirmation of acute methyl bromide poisoning using S-methylcysteine adduct testing.

Absence of Crabtree effect in human melanoma cells adapted to growth at low pH: reversal by respiratory inhibitors.

Role of metabolism in arsenic toxicity.

Oral administration of collagen conjugated with cholera toxin induces tolerance to type II collagen and suppresses chondritis in an animal model of autoimmune ear disease.

In utero and lactational treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin impairs mammary gland differentiation but does not block the response to exogenous estrogen in the postpubertal female rat.

The hepatitis B virus HBx protein induces adherens junction disruption in a src-dependent manner.

Exposure to the dioxin 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces squamous metaplasia in the endocervix of cynomolgus macaques.

Anorectal atresia. An experimental model in the rat.

Cartilage and bone biological markers in the synovial fluid of osteoarthritic patients after hyaluronan injections in the knee.

Cardioprotective effect of propranolol from alcohol-induced heart muscle damage as assessed by plasma cardiac troponin-t.

Identification of new triarylethylene oxyalkanoic acid analogues as bone selective estrogen mimetics.

Health effects of dioxin exposure: a 20-year mortality study.

Dietary exposure to 3,3',4,4',5-pentachlorobiphenyl (PCB 126) or 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) does not induce proliferation of squamous epithelium or osteolysis in the jaws of weanling rats.

Chronic toxicity of dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin to mink.

Subchronic Exposure of [3H]- 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in female B6C3F1 mice: relationship of steady-state levels to disposition and metabolism.

Expression of multidrug resistance-associated protein 2 in small intestine from pregnant and postpartum rats.

Physiological modeling of a proposed mechanism of enzyme induction by TCDD.

3,4-Dichlorophenylhydroxylamine cytotoxicity in renal cortical slices from Fischer 344 rats.

Effects of chronic sodium azide on brain and muscle cytochrome oxidase activity: a potential model to investigate environmental contributions to neurodegenerative diseases.

Collagen-induced arthritis.

Interaction of estrogen and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in immature male chickens (*Gallus domesticus*).

Metabolism of equilenin in MCF-7 and MDA-MB-231 human breast cancer cells.

Nephrin redistribution on podocytes is a potential mechanism for proteinuria in patients with primary acquired nephrotic syndrome.

Structural immaturity of the heart in congenital diaphragmatic hernia in rats.

UCS15A, a non-kinase inhibitor of Src signal transduction.

Down-regulation of E-cadherin gene expression by collagen type I and type III in pancreatic cancer cell lines.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on fetal mouse urinary tract epithelium in vitro.

Autologous blood transfusion in oral and maxillofacial surgery patients with the use of erythropoietin.

Etiologic factors in soft tissue sarcomas.

Comparative biodistribution and metabolism of carbon-11-labeled N-[2-(dimethylamino)ethyl]acridine-4-carboxamide and DNA-intercalating analogues.

G76E substitution in type I collagen is the first nonlethal glutamic acid substitution in the alpha1(I) chain and alters folding of the N-terminal end of the helix.

Maximal aryl hydrocarbon receptor activity depends on an interaction with the retinoblastoma protein.

Quantitative relationship between arsenic exposure and AP-1 activity in mouse urinary bladder epithelium.

Dissociation of enzymatic and pharmacological properties of piratoxins-I and -III, two myotoxic phospholipases A2 from *Bothrops pirajai* snake venom.

Subchronic sodium chlorate exposure in drinking water results in a concentration-dependent increase in rat thyroid follicular cell hyperplasia.

Central retinal vein occlusion and nonarteritic ischemic optic neuropathy in 2 patients with mild iron deficiency anemia.

N-methyl-D-aspartate receptor-mediated mitochondrial Ca(2+) overload in acute excitotoxic motor neuron death: a mechanism distinct from chronic neurotoxicity after Ca(2+) influx.

Maternal exposure to a low dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) suppressed the development of reproductive organs of male rats: dose-dependent increase of mRNA levels of 5alpha-reductase type 2 in contrast to decrease of androgen receptor in the pubertal ventral prostate.

Acquired resistance to Ah receptor agonists in a population of Atlantic killifish (*Fundulus heteroclitus*) inhabiting a marine superfund site: in vivo and in vitro studies on the inducibility of xenobiotic metabolizing enzymes.

Androgen receptor antagonism by the organophosphate insecticide fenitrothion.

Identification of apoptotic cells by formamide-induced dna denaturation in condensed chromatin.

Differential expression of Hox A5 in human colon cancer cell differentiation: a quantitative study using real-time RT-PCR.

Squamous epithelial proliferation in the jaws of mink fed diets containing 3,3',4,4',5-pentachlorobiphenyl (PCB 126) or 2,3,7,8-tetrachlorodibenzo-P-dioxin (TCDD).

Effect of oral administration of excessive iron in adult ponies.

Ethanol activates NFkappaB DNA binding and p56lck protein tyrosine kinase in human osteoblast-like cells.

Uremic toxins and peritoneal dialysis.

Embryotoxicity and teratogenicity studies of an ayurvedic contraceptive--pippaliyadi vati.

Dioxin exposure is an environmental risk factor for ischemic heart disease.

Insecticidal activity of glufosinate through glutamine depletion in a caterpillar.

[Volatile compounds in air and oral saliva in healthy people, and in periodontitis and gingivitis patients].

Molecular basis of dioxin actions: evidence supporting chemoprotection.

Analysis of collagenase-cleavage of type II collagen using a neoepitope ELISA.

Apolipoproteins prevent glomerular albumin permeability induced in vitro by serum from patients with focal segmental glomerulosclerosis.

5-HT(7) receptor and beta(2)-adrenoceptor share in the inhibition of porcine uterine contractility in a muscle layer-dependent manner.

Benzo[a]pyrene-induced toxicity: paradoxical protection in Cyp1a1(-/-) knockout mice having increased hepatic BaP-DNA adduct levels.

Sarcoplasmic reticulum Ca(2+) content affects 4-CmC and caffeine contractures of rat skinned skeletal muscle fibers.

Longitudinal variation in muscle protein expression and contraction kinetics of largemouth bass axial muscle.

Activation of p38 mitogen-activated protein kinases by endothelin and noradrenaline in small arteries, regulation by calcium influx and tyrosine kinases, and their role in contraction.

Enhanced systemic tissue distribution after dermal versus intravenous 3,3',4,4'-tetrachlorobiphenyl exposure: limited utility of radiolabel blood area under the curve and excretion data in dermal absorption calculations and tissue exposure assessment.

Involvement of ADAM9 in multinucleated giant cell formation of blood monocytes.

Expression of human and mouse genes encoding polkappa: testis-specific developmental regulation and AhR-dependent inducible transcription.

2,3,7,8-Tetrachlorodibenzo-p-dioxin equivalents in tissue samples from three species in the Denver, Colorado, USA, metropolitan area.

Distinct pathways in the over-expression of matrix metalloproteinases in human fibroblasts by relaxation of mechanical tension.

Effects of indomethacin on energy metabolism in rat and human jejunal tissue in vitro.

Lipid peroxidation end products-responded induction of a preneoplastic marker enzyme glutathione S-transferase P-form (GST-P) in rat liver on administration via the portal vein.

Cytochrome CYP2E1 phenotyping and genotyping in the evaluation of health risks from exposure to polluted environments.

Toxicological relevance of the multidrug resistance protein 1, MRP1 (ABCC1) and related transporters.

Two signal transduction pathways involved in the catecholaminergic differentiation of avian neural crest-derived cells in vitro.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) inhibition of coronary development is preceded by a decrease in myocyte proliferation and an increase in cardiac apoptosis.

Melatonin suppresses homocysteine enhancement of serotonin-induced vasoconstriction in the human umbilical artery.

Identification of biochemical pathways for the metabolism of oxidized low-density lipoprotein derived aldehyde-4-hydroxy trans-2-nonenal in vascular smooth muscle cells.

Glial cell-derived neurotrophic factor (GDNF)-induced migration and signal transduction in corneal epithelial cells.

Reductions in systemic oxygen delivery induce a hypometabolic state in the turtle *Trachemys scripta*.

Distribution spaces for hyaluronan and albumin in rat tail tendons.

Polychlorinated dibenzo-p-dioxins, dibenzofurans, and polychlorinated biphenyls in human tissues, meat, fish, and wildlife samples from India.

Formation of spiroiminodihydantoin nucleoside by reaction of 8-oxo-7,8-dihydro-2'-deoxyguanosine with hypochlorous acid or a myeloperoxidase-H₂O₂-Cl(-) system.

Suppression of Ca²⁺ influx through L-type voltage-dependent calcium channels by hydroxyl radical in mouse cerebral cortical neurons.

Enhanced activation-induced cell death as a mechanism of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced immunotoxicity in peripheral T cells.

Induction of metallothionein in the livers of female Sprague-Dawley rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Ascorbate and low concentrations of FeSO₄ induce Ca²⁺-dependent pore in rat liver mitochondria.

Sorption of organic contaminants in a fractured chalk formation.

Fatal poisoning by butachlor and chlornitrofen ingested from a bottle marked as nitrofen.

Dissociation of 5' AMP-activated protein kinase activation and glucose uptake stimulation by mitochondrial uncoupling and hyperosmolar stress: differential sensitivities to intracellular Ca²⁺ and protein kinase C inhibition.

Mode of action and tissue dosimetry in current and future risk assessments.

Enhanced production and germination of somatic embryos by temporary starvation in tissue cultures of *Daucus carota*.

Metabolism of [14C]1,2,7,8-tetrachlorodibenzo-p-dioxin in a ruminating Holstein calf.

PCBs, TEQs and plasma retinol in grey heron (*Ardea cinerea*) hatchlings from two rookeries in Norway.

Glyoxal and methylglyoxal trigger distinct signals for map family kinases and caspase activation in human endothelial cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces apoptotic cell death and cytochrome P4501A expression in developing *Fundulus heteroclitus* embryos.

Cancer isoform of a tumor-associated cell surface NADH oxidase (tNOX) has properties of a prion.

Photoaffinity labeling of human IRBP with all-trans-retinoic acid.

Male reproductive effect of arsenic in mice.

Intraocular pressure and vascular effects of sodium azide in bovine perfused eye.

Early indicators of response in biologically based risk assessment for nongenotoxic carcinogens.

Disposition of polychlorinated dibenzo-p-dioxins, dibenzofurans, and non-ortho polychlorinated biphenyls in pregnant long evans rats and the transfer to offspring.

Contractile activity-induced transcriptional activation of cytochrome C involves Sp1 and is proportional to mitochondrial ATP synthesis in C2C12 muscle cells.

Requirement of chondroitin sulfate/dermatan sulfate recognition in midkine-dependent migration of macrophages.

Production of superoxide anion, lipid peroxidation and DNA damage in the hepatic and brain tissues of rats after subchronic exposure to mixtures of TCDD and its congeners.

The unusual cartilaginous tissues of jawless craniates, cephalochordates and invertebrates.

Effects of environmental antiandrogens on reproductive development in experimental animals.

Effects of binary mixtures of six xenobiotics on hormone concentrations and morphometric endpoints of northern bobwhite quail (*Colinus virginianus*).

Evaluation of an optical microbiological method for rapidly estimating populations of aerobic bacteria, coliforms, and *Escherichia coli* from ground pork.

Relative potencies of polychlorinated dibenzo-p-dioxin, dibenzofuran, and biphenyl congeners to induce cytochrome P4501A mRNA in a zebrafish liver cell line.

Involvement of Rho-kinase and tyrosine kinase in hypotonic stress-induced ATP release in bovine aortic endothelial cells.

The rinosomes of senescing plant tissue bud from the endoplasmic reticulum.

Delivery of genes encoding cardiac K(ATP) channel subunits in conjunction with pinacidil prevents membrane depolarization in cells exposed to chemical hypoxia-reoxygenation.

Effect of arsenite on certain aspects of protein metabolism in fresh water teleost, *Tilapia mossambica* (Peters).

Mechanisms of thrombin-induced MAPK activation associated with cell proliferation in human cultured tracheal smooth muscle cells.

Fibroblast growth factor receptor 2 (FGFR2) in brain neurons and retinal pigment epithelial cells act via stimulation of neuroendocrine L-type channels (Ca_v1.3).

Mitogenic effect of oxidized low-density lipoprotein on vascular smooth muscle cells mediated by activation of Ras/Raf/MEK/MAPK pathway.

Phenol derivatives accelerate inactivation kinetics in one inactivation-deficient mutant human skeletal muscle Na⁺ channel.

Oncogenic Ras-induced proliferation requires autocrine fibroblast growth factor 2 signaling in skeletal muscle cells.

Lipid peroxidation in porcine irises: dependence on pigmentation.

Assessment of polysomaty, embryo formation and regeneration in liquid media for various species of diploid annual *Medicago*.

Quantitative exposure assessment: application of physiologically-based pharmacokinetic (PBPK) modeling of low-dose, long-term exposures of organic acid toxicant in the brain.

Tissue distribution, excretion, and metabolism of 1,2,7,8-tetrachlorodibenzo-p-dioxin in the rat.

Long-term toxic impact of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the reproduction, sexual differentiation, and development of different life stages of *Gobiocypris rarus* and *Daphnia magna*.

Age-related changes in energy production in fresh senescence-accelerated mouse brain slices as revealed by positron autoradiography.

Intensely positively charged perineuronal nets in the adult rat brain as detected by staining with anionic iron colloid.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of different cytotoxins on cytochrome P450 mediated monooxygenase functions and on oxidative state.

Ergot alkaloid transport across ruminant gastric tissues.

Kinetics of monochloroacetic acid in adult male rats after intravenous injection of a subtoxic and a toxic dose.

In situ hybridization and immunohistochemical analysis of cytochrome P450 1B1 expression in human normal tissues.

Outside-in signaling pathway linked to CD146 engagement in human endothelial cells.

Cultured rat vascular smooth muscle cells are resistant to methylamine toxicity: no correlation to semicarbazide-sensitive amine oxidase.

Toxic effects of arsenic (III) on some hematopoietic and central nervous system variables in rats and guinea pigs.

Contrasting effects of midazolam on induction of heat shock protein 27 by vasopressin and heat in aortic smooth muscle cells.

In vitro cytochemical studies of the golgi apparatus of pancreatic acinar cells exposed to drugs that inhibit the transport of membranes and proteins.

Semiquantitative analysis of types I and III collagen from tendons and ligaments in a rabbit model.

Genotoxic effects of carbon black particles, diesel exhaust particles, and urban air particulates and their extracts on a human alveolar epithelial cell line (A549) and a human monocytic cell line (THP-1).

Measurement of plasma metabolites of (S)-5-[123I]iodo-3-(2-azetidylmethoxy)pyridine (5-IA-85380), a nicotinic acetylcholine receptor imaging agent, in nonhuman primates.

Adenosine diphosphate ribose dilates bovine coronary small arteries through apyrase- and 5'-nucleotidase-mediated metabolism.

Health risks posed by use of Di-2-ethylhexyl phthalate (DEHP) in PVC medical devices: a critical review.

The nigrostriatal dopaminergic system as a preferential target of repeated exposures to combined paraquat and maneb: implications for Parkinson's disease.

Evolution of alachlor-induced nasal neoplasms in the Long-Evans rat.

Effects of carbofuran, diuron, and nicosulfuron on acetylcholinesterase activity in goldfish (*Carassius auratus*).

Metalaxyl and simazine toxicity to and uptake by *Typha latifolia*.

Arsenic accumulation in three species of sea turtles.

Chronic ingestion of a potential food contaminant induces gastrointestinal inflammation in rats: role of nitric oxide and mast cells.

A novel leg-shaking *Drosophila* mutant defective in a voltage-gated K(+) current and hypersensitive to reactive oxygen species.

Acetochlor-induced rat nasal tumors: further studies on the mode of action and relevance to humans.

Comparative toxicity of trivalent and pentavalent inorganic and methylated arsenicals in rat and human cells.

Cellular and molecular mechanisms of action of linuron: an antiandrogenic herbicide that produces reproductive malformations in male rats.

Effect of chlorinated hydrocarbons on expression of cytochrome P450 1A1, 1A2 and 1B1 and 2- and 4-hydroxylation of 17beta-estradiol in female Sprague-Dawley rats.

Increase in production of ascorbate radical in tissues of rat treated with paraquat.

2,4-Dichlorophenoxyacetic acid disrupts the cytoskeleton and disorganizes the Golgi apparatus of cultured neurons.

Promotion of skin carcinogenesis by dimethylarsinic acid in keratin (K6)/ODC transgenic mice.

The effect of exposure to a commercial 2,4-D herbicide formulation during gestation on urethan-induced lung adenoma formation in CD-1 mice.

Cholinesterase activity and hematological parameters as biomarkers of sublethal molinate exposure in *Anguilla anguilla*.

Role of glutathione in Thiobencarb resistance in the European eel *Anguilla anguilla*.

Recent advances in understanding the pathogenesis of nitrofen-induced congenital diaphragmatic hernia.

Ethane sulfonate metabolite of alachlor: assessment of oncogenic potential based on metabolic and mechanistic considerations.

No significant paraquat-induced oxidative DNA damage in rats.

NMDA receptor activation: critical role in oxidant tissue injury.

Cellular mechanisms of acrolein-induced alteration in calcium signaling in airway smooth muscle.

Safety evaluation and risk assessment of the herbicide Roundup and its active ingredient, glyphosate, for humans.

Effects of L-2-oxothiazolidine-4-carboxylate on the cytotoxic activity and toxicity of cyclophosphamide in mice bearing B16F10 melanoma liver metastases.

Volatile components of cigarette smoke: effect of acrolein and acetaldehyde on human gingival fibroblasts in vitro.

Quantitative determination of paraquat in a fatal intoxication by HPLC-DAD following chemical reduction with sodium borohydride.

Detection of micronuclei in haemocytes of zebra mussel and great ramshorn snail exposed to pentachlorophenol.

Detection of 2,4-dichlorophenoxyacetic acid (2,4-D) residues in neonates breast-fed by 2,4-D exposed dams.

Secobotrytriendiol and related sesquiterpenoids: new phytotoxic metabolites from *Botrytis cinerea*.

A new diquat derivative appropriate for colourimetric measurements of biological materials in the presence of paraquat.

[Liver steatosis and disorders of mitochondrial oxidative phosphorylation after experimental administration of simazine].

The antihypertensive hydralazine is an efficient scavenger of acrolein.

A case of fatal diquat poisoning: toxicokinetic data and autopsy findings.

Mechanisms of toxicity, clinical features, and management of acute chlorophenoxy herbicide poisoning: a review.

Pulmonary protective effects of curcumin against paraquat toxicity.

Disorders of male rat reproductive tract under the influence of atrazine.

Hepatic disposition of neurotoxins and pesticides.

Effect of He-Ne laser treatment on the level of lipid peroxidation products in experimental cataract of rabbit eyes.

Nonoxidative protein glycation is implicated in familial amyotrophic lateral sclerosis with superoxide dismutase-1 mutation.

Results of dental amalgam removal and mercury detoxification using DMPS and neural therapy.

Cyclophosphamide-induced cystitis in freely-moving conscious rats: behavioral approach to a new model of visceral pain.

Dystrophin mutations predict cellular susceptibility to oxidative stress.

Copper chaperone for superoxide dismutase is essential to activate mammalian Cu/Zn superoxide dismutase.

Aluminium triggers genotoxic adaptation to methyl mercuric chloride and ethyl methane sulfonate, but not to maleic hydrazide in plant cells in vivo.

Antenatal dexamethasone enhances endothelin receptorB expression in hypoplastic lung in nitrofen-induced diaphragmatic hernia in rats.

Inhibition of cellular action of thrombin by N3-cyclopropyl-7-[[4-(1-methylethyl)phenyl]methyl]-7H-pyrrolo[3, 2-f]quinazoline-1,3-diamine (SCH 79797), a nonpeptide thrombin receptor antagonist.

Involvement of abscisic acid-dependent and -independent pathways in the upregulation of antioxidant enzyme activity during NaCl stress in cotton callus tissue.

Relationship of MTT reduction to stimulants of muscle metabolism.

Ultrastructural changes in human gingival fibroblasts in vitro after exposure to vapour phase smoke components.

7-Hydroperoxycholesterol as a marker of oxidative stress in rat kidney induced by paraquat.

Catalase activity in equine semen.

Deregulated manganese superoxide dismutase expression and resistance to oxidative injury in p53-deficient cells.

Metabolism of fluroxypyr, fluroxypyr methyl ester, and the herbicide fluroxypyr methylheptyl ester. II: in rat skin homogenates.

Large-scale T-DNA mutagenesis in Arabidopsis for functional genomic analysis.

Dose-dependent effects on tissue distribution and metabolism of dimethylarsinic acid in the mouse after intravenous administration.

Induction of direct somatic embryogenesis in garlic (*Allium sativum*).

NRH:quinone oxidoreductase2 (NQO2).

Failure of Ah receptor to mediate induction of cytochromes P450 in the CYP1 family in the human hepatoma line SK-Hep-1.

Prenatal dexamethasone rescues heart hypoplasia in fetal rats with congenital diaphragmatic hernia.

Joint effects of nine polychlorinated biphenyl (PCB) congeners on breast cancer risk.

2,3,7,8-tetrachlorodibenzo-p-dioxin increases serum and kidney retinoic acid levels and kidney retinol esterification in the rat.

Spinotrapezius muscle microcirculatory function: effects of surgical exteriorization.

In vivo labeling of mitochondrial complex I (NADH:ubiquinone oxidoreductase) in rat brain using [(3)H]dihydrorotenone.

Lung hypoplasia in the nitrofen model of congenital diaphragmatic hernia occurs early in development.

Association of the human papillomavirus type 11 E1(E4) protein with cornified cell envelopes derived from infected genital epithelium.

The effects of perinatal exposure to low doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin on immune organs in rats.

[Membrane disorder and free radical].

Chronic peritoneal inflammation by cyanate in rats.

Induction of lung lesions in female rats following chronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Src homology 2 domain substitution modulates the kinase and transforming activities of the Fes protein-tyrosine kinase.

Effects of dioxin and estrogen on collagenase-3 in UMR 106-01 osteosarcoma cells.

An alternative interpretation of nanobacteria-induced biomineralization.

Injection of iron compounds followed by induction of the stress response causes tissue injury and apoptosis.

Central versus peripheral mediation of naloxone's perfusion effects in endotoxic rats.

Pseudomonas pickettii: a common soil and groundwater aerobic bacteria with pathogenic and biodegradation properties.

Cloning and functional expression of rKCNQ2 K(+) channel from rat brain.

Soft tissue sarcomas in the general population living near a chemical plant in Northern Italy.

Comparison of HOCl traps with myeloperoxidase inhibitors in prevention of low density lipoprotein oxidation.

Stretch-dependent modulation of contractility and growth in smooth muscle of rat portal vein.

TCDD suppression of tissue transglutaminase stimulation by retinoids in malignant human keratinocytes.

Redistribution of accumulated 2,3,7,8-tetrachlorodibenzo-p-dioxin during coxsackievirus B3 infection in the mouse.

The association between meconium and the production and reabsorption of lung liquid and lactate loss by in vitro lungs from fetal guinea pigs.

Arsenic mediates cell proliferation and gene expression in the bladder epithelium: association with activating protein-1 transactivation.

Soft-tissue sarcoma and non-Hodgkin's lymphoma clusters around a municipal solid waste incinerator with high dioxin emission levels.

Induction of the stress response in vivo decreases nuclear factor-kappa B activity in jejunal mucosa of endotoxemic mice.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin induces developmental defects in the rat vagina.

Structural and functional characterization of BnSP-7, a Lys49 myotoxic phospholipase A(2) homologue from *Bothrops neuwiedi pauloensis* venom.

Assessment of mitochondrial energy coupling in vivo by ¹³C/³¹P NMR.

In vitro effects of growth factors on lung hypoplasia in a model of congenital diaphragmatic hernia.

Ligation of IgE receptors causes an anaphylactic response and neutrophil infiltration but does not induce eosinophilic inflammation in mice.

Iron supplementation affects the production of pro-inflammatory cytokines in IL-10 deficient mice.

Active movement of T cells away from a chemokine.

p-Cresol sulfate is the dominant component of urinary myelin basic protein like material.

Studies of cancer in humans.

Non-carcinogenic effects of TCDD in animals.

Lower alkaline phosphatase activity and occurrence of an abnormal hybrid intestinal/tissue non-specific isoform in Down's syndrome amniotic fluids.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin alters postnatal development of seminal vesicle epithelium.

Expression of dioxin-related transactivating factors and target genes in human eutopic endometrial and endometriotic tissues.

Second primary neoplasms following non-Hodgkin's lymphoma in New South Wales, Australia.

Proliferation of periodontal squamous epithelium in mink fed 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Protein tyrosine kinase inhibitors increase cytosolic calcium and inhibit actin organization as resorbing activity in rat osteoclasts.

Risk factors in the early diagnosis of ALS: North American epidemiological studies. ALS CARE Study Group.

[Clinical experience with the use of benzylalcohol and amyl-m-cresol (Strepsils) in stomatological diseases].

Development and modification of a recombinant cell bioassay to directly detect halogenated and polycyclic aromatic hydrocarbons in serum.

The impact of 4-chloro-m-cresol in heparin formulas on malignant hyperthermia: in vitro and in vivo.

Neurokinin-1 (NK-1) receptor is required in antigen-induced cystitis.

Arsenic, dioxin, and the promotional step in cancer creation.

Chronic mitochondrial inhibition induces selective motoneuron death in vitro: a new model for amyotrophic lateral sclerosis.

Is there a rationale for the use of creatine either as nutritional supplementation or drug administration in humans participating in a sport?

Trypsin stimulates integrin alpha(5)beta(1)-dependent adhesion to fibronectin and proliferation of human gastric carcinoma cells through activation of proteinase-activated receptor-2.

Effects of histone deacetylase inhibitors on the Ah receptor gene promoter.

Toxic action/toxicity.

Effects of TCDD on thyroid hormone homeostasis in the rat.

Mechanisms of parenchymal cell death in-vivo after microvascular hemorrhage.

Responses of transgenic mouse lines p53(+/-) and Tg.AC to agents tested in conventional carcinogenicity bioassays.

Macrophage migration inhibitory factor up-regulates expression of matrix metalloproteinases in synovial fibroblasts of rheumatoid arthritis.

Pharmacokinetics of orally administered camptothecins.

Central nervous system toxicity and early peripheral neuropathy following dermal exposure to methyl bromide.

Antenatal dexamethasone administration inhibits smooth-muscle-cell DNA synthesis in pulmonary-arterial media in nitrofen-induced congenital diaphragmatic hernia in rats.

The hypoplastic heart in congenital diaphragmatic hernia: reduced expression of basic fibroblast growth factor and platelet-derived growth factor.

A multicenter study of 4-chloro-m-cresol for diagnosing malignant hyperthermia susceptibility.

Effects of iron salts and haemosiderin from a thalassaemia patient on oxygen radical damage as measured in the comet assay.

Pharmacological profile of nitrenergic nerve-, nitric oxide-, nitrosoglutathione- and hydroxylamine-induced relaxations of the rat duodenum.

Pathways of dehydroepiandrosterone formation in rat brain glia.

[Hand injuries caused by self-made bombs. Observations and reconstructoin techniques. Report of 7 cases].

Changes in cytoskeletal organization in polyoma middle T antigen-transformed fibroblasts: involvement of protein phosphatase 2A and src tyrosine kinases.

Involvement of tyrosine kinase activity in 1 α ,25(OH) $_2$ -vitamin D $_3$ signal transduction in skeletal muscle cells.

Production of transgenic tall fescue and red fescue plants by particle bombardment of mature seed-derived highly regenerative tissues.

Reproductive success and chlorinated hydrocarbon contamination in tree swallows (*Tachycineta bicolor*) nesting along rivers receiving pulp and paper mill effluent discharges.

Evaluation of beta-galactosidase activity in tissue in the presence of blood.

Monomethylarsonic acid reductase and monomethylarsonous acid in hamster tissue.

PIP $_2$ and ATP cooperatively prevent cytosolic Ca $^{2+}$ -induced modification of ATP-sensitive K $^+$ channels in rat pancreatic beta-cells.

Advanced glycation endproduct-modified superoxide dismutase-1 (SOD1)-positive inclusions are common to familial amyotrophic lateral sclerosis patients with SOD1 gene mutations and transgenic mice expressing human SOD1 with a G85R mutation.

Chronic toxicity of arsenic in goats: clinicobiochemical changes, pathomorphology and tissue residues.

Adrenocorticotropin (ACTH) and corticosterone secretion by perfused pituitary and adrenal glands from rodents exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Differential effects of estrogen and progesterone on AT(1) receptor gene expression in vascular smooth muscle cells.

Air bag injury and the dermatologist.

The carbon source influences the energetic efficiency of the respiratory chain of N₂-fixing *Acetobacter diazotrophicus*.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of different cytotoxins on cytochrome P450 isoforms expression and on glycogen content.

Endotoxin (lipopolysaccharide)-induced nitric oxide production in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated Fischer rats: detection of nitrosyl hemoproteins by EPR spectroscopy.

Dose distribution measurements by MRI of a phantom containing lung tissue equivalent compartments made of ferrous sulphate gel.

Inhibition of dioxin effects on bone formation in vitro by a newly described aryl hydrocarbon receptor antagonist, resveratrol.

Anti-estrogenic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in mouse uterus: critical role of the aryl hydrocarbon receptor in stromal tissue.

Tissue disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in maternal and developing long-evans rats following subchronic exposure.

Developmental and tissue-specific expression of AHR1, AHR2, and ARNT2 in dioxin-sensitive and -resistant populations of the marine fish *Fundulus heteroclitus*.

Bioenergetics and mitochondrial transmembrane potential during differentiation of cultured osteoblasts.

Effect of a dioxin-like PCB (CB 126) on the biotransformation and genotoxicity of benzo.

Toxicity of TCDD in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P450 1A induction in several organ systems.

Isolation of MFO inducers from tissues of white suckers caged in bleached kraft mill effluent.

Effects of arsenite on central monoamines and plasmatic levels of adrenocorticotropin hormone (ACTH) in mice.

Simultaneous measurement of ERK, p38, and JNK MAP kinase cascades in vascular smooth muscle cells.

Arsenic metabolism in seaweed-eating sheep from Northern Scotland.

Experimental model of hepatic fibrosis following repeated periportal necrosis induced by allyl alcohol.

Caloric restriction of rhesus monkeys lowers oxidative damage in skeletal muscle.

Decreased fatty acid synthesis due to mitochondrial uncoupling in adipose tissue.

Arsenite-induced apoptosis in cortical neurons is mediated by c-Jun N-terminal protein kinase 3 and p38 mitogen-activated protein kinase.

Differential effects of 4-chloro-m-cresol and caffeine on skinned fibers from rat fast and slow skeletal muscles.

Development of clover yellow vein virus as an efficient, stable gene-expression system for legume species.

Dexamethasone enhances ras-reversion gene expression in cultured murine fetal lungs: role in development.

The macromolecular associations of heat shock protein-27 in vascular smooth muscle.

Doxorubicin represses CARP gene transcription through the generation of oxidative stress in neonatal rat cardiac myocytes: possible role of serine/threonine kinase-dependent pathways.

Molecular characterization and developmental expression of the aryl hydrocarbon receptor from the chick embryo.

Cellular and biochemical mechanisms by which environmental oestrogens influence reproductive function.

On the cardiac contractile, electrophysiological and biochemical effects of endothall, a protein phosphatase inhibitor.

Pathological lesions in lambs fed raw or processed cottonseed meal.

Comparative induction of CYP1A1 expression by pyridine and its metabolites.

Vanillin as an antioxidant in rat liver mitochondria: inhibition of protein oxidation and lipid peroxidation induced by photosensitization.

Enzyme cytochemical localization of sarcosine oxidase activity in the liver and kidney of several mammals.

Pathological changes of hepatic artery and portal vein, after allyl-alcohol and carbon tetrachloride administration. An experimental study.

Specific inhibition of stretch-induced increase in L-type calcium channel currents by herbimycin A in canine basilar arterial myocytes.

Tumour necrosis factor- α - and interleukin-1 β -stimulated cell proliferation through activation of mitogen-activated protein kinase in canine tracheal smooth muscle cells.

Thyroidal dysfunction and environmental chemicals--potential impact on brain development.

Purification, characterization, and localization of an ATP diphosphohydrolase in porcine kidney.

ATP-sensitive potassium channels in capillaries isolated from guinea-pig heart.

Cloning and functional characterization of the bile acid-sensitive methotrexate carrier from rat liver cells.

Green tea polyphenols and tannic acid act as potent inhibitors of phorbol ester-induced nitric oxide generation in rat hepatocytes independent of their antioxidant properties.

Anti-inflammatory effect of heat shock protein induction is related to stabilization of I kappa B alpha through preventing I kappa B kinase activation in respiratory epithelial cells.

Chemical changes in the photoreceptor outer segments due to iron induced oxidative stress: analysis by Fourier transform infrared (FT-IR) microspectroscopy.

Attenuation of pressure-induced myogenic contraction and tyrosine phosphorylation by fasudil, a cerebral vasodilator, in rat cerebral artery.

A novel function of thyrotropin as a potentiator of electrolyte secretion from the tracheal gland.

Screening-level ecological risk assessment of polychlorinated dibenzo-p-dioxins and dibenzofurans in sediments and aquatic biota from the Venice Lagoon, Italy.

Neuroeffector transmission to different layers of smooth muscle in the rat penile bulb.

The relative abilities of TCDD and its congeners to induce oxidative stress in the hepatic and brain tissues of rats after subchronic exposure.

Mechanisms of fibroblast growth factor 2 intracellular processing: a kinetic analysis of the role of heparan sulfate proteoglycans.

Induction of heat shock protein 70 by herbimycin A and cyclopentenone prostaglandins in smooth muscle cells.

Mechanism of enhancement by fucoidan and CNBr-fibrinogen digest of the activation of glu-plasminogen by tissue plasminogen activator.

Time course of arsenite-induced copper accumulation in rat kidney.

Current risk assessment approaches in different countries.

Toxicokinetics.

Rat cortical neuron cultures: an in vitro model for differentiating mechanisms of chemically induced neurotoxicity.

Metabolic stress and altered glucose transport: activation of AMP-activated protein kinase as a unifying coupling mechanism.

Dermal absorption and tissue disposition of 3,3',4,4'-tetrachlorobiphenyl (TCB) in an ex-vivo pig model: assessing the impact of dermal exposure variables.

Oxidative stress in female B6C3F1 mice following acute and subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

TCDD induces CYP1A4 and CYP1A5 in chick liver and kidney and only CYP1A4, an enzyme lacking arachidonic acid epoxygenase activity, in myocardium and vascular endothelium.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-induced changes in activities of nuclear protein kinases and phosphatases affecting DNA binding activity of c-Myc and AP-1 in the livers of guinea pigs.

Free malondialdehyde determination in rat brain tissue by capillary zone electrophoresis: evaluation of two protein removal procedures.

Role of p53 tumor suppressor gene in the toxicity of TCDD, endrin, naphthalene, and chromium (VI) in liver and brain tissues of mice.

NTP Toxicology and Carcinogenesis Studies of Pyridine (CAS No. 110-86-1) in F344/N Rats, Wistar Rats, and B6C3F1 Mice (Drinking Water Studies).

Involvement of arachidonic acid in chemical stress-induced interleukin-6 synthesis in osteoblast-like cells: comparison with heat shock protein 27 induction.

Tyrosine-kinase dependent TGF-beta and extracellular matrix expression by mechanical stretch in vascular smooth muscle cells.

Intestinal transport of beta-thioglycosides by Na⁺/glucose cotransporter.

In-vivo and in-vitro evidence of a carrier-mediated efflux transport system for oestrone-3-sulphate across the blood-cerebrospinal fluid barrier.

Sensitivity analysis of a physiological model for 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): assessing the impact of specific model parameters on sequestration in liver and fat in the rat.

Angiotensin II stimulates endothelial vascular cell adhesion molecule-1 via nuclear factor-kappaB activation induced by intracellular oxidative stress.

The role of protein-tyrosine phosphorylation and gelatinase production in the migration and proliferation of smooth muscle cells.

Cytoskeletal alterations in lipopolysaccharide-induced bovine vascular endothelial cell injury and its prevention by sodium arsenite.

Identification and characterization of a novel hepatic canalicular ATP diphosphohydrolase.

Cromakalim-induced membrane current in guinea-pig tracheal smooth muscle cells.

Determination of total cationic and total anionic arsenic species in oyster tissue using microwave-assisted extraction followed by HPLC-ICP-MS.

Cytodifferentiation and transformation of embryogenic callus lines derived from anther culture of wheat.

Sodium monochloroacetate causes cytotoxic effects, an increased lactate and pyruvate level and induces ultra structural and cytoskeletal alterations in cultured kidney and liver epithelial cells.

Acute administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in pregnant Long Evans rats: association of measured tissue concentrations with developmental effects.

Elevated perfusion pressure upregulates endothelin-1 and endothelin B receptor expression in the rabbit carotid artery.

Cellular stress inhibits vascular smooth muscle relaxation.

Pathways of neurosteroid biosynthesis in cell lines from human brain: regulation of dehydroepiandrosterone formation by oxidative stress and beta-amyloid peptide.

Aromatic hydrocarbon receptor interaction with the retinoblastoma protein potentiates repression of E2F-dependent transcription and cell cycle arrest.

Neurofilament-L is a protein phosphatase-1-binding protein associated with neuronal plasma membrane and post-synaptic density.

The lipolytic stimulation of 3T3-L1 adipocytes promotes the translocation of hormone-sensitive lipase to the surfaces of lipid storage droplets.

Effects of inhibitors for tyrosine kinase and non-selective cation channel on capacitative Ca^{2+} entry in rat ileal smooth muscle.

Enhancement of embryogenic culture initiation from tissues of mature sweetgum trees.

Effect of arsenic trioxide on metallothionein and its conversion to different arsenic metabolites in hen liver.

Heparin and in-vitro experimental lung hypoplasia.

Influence of cytoskeletal agents on the respiratory electron transport pathways in the cells of winter wheat leaves.

[Spreading of porcine kidney epithelial cells under normal conditions and under the effect of inhibitors of energy metabolism. II. Behavior of cellular organelles].

Stress-induced, tissue-specific enrichment of hsp70 mRNA accumulation in *Xenopus laevis* embryos.

Neurotrophic factors protect cortical synaptic terminals against amyloid and oxidative stress-induced impairment of glucose transport, glutamate transport and mitochondrial function.

Pressure-induced upregulation of preproendothelin-1 and endothelin B receptor expression in rabbit jugular vein in situ : implications for vein graft failure?

Effects of the chlorotriazine herbicide, cyanazine, on GABA(A) receptors in cortical tissue from rat brain.

trans-Activation of PPARalpha and PPARgamma by structurally diverse environmental chemicals.

Regulation of antioxidant enzyme gene expression in response to oxidative stress and during differentiation of mouse skeletal muscle.

Reduced toxicity of expression, in *Escherichia coli*, of antipollutant antibody fragments and their use as sensitive diagnostic molecules.

Aberrant copper chemistry as a major mediator of oxidative stress in a human cellular model of amyotrophic lateral sclerosis.

Acute basagran poisoning mimicking neuroleptic malignant syndrome.

Human isolated airway contraction: interaction between air pollutants and passive sensitization.

Selenium-dependent cellular glutathione peroxidase protects mice against a pro-oxidant-induced oxidation of NADPH, NADH, lipids, and protein.

Role of glutathione S-transferase 8-8 in allylamine resistance of vascular smooth muscle cells in vitro.

Lethal body residues for pentachlorophenol in zebra mussels (*Dreissena polymorpha*) under varying conditions of temperature and pH.

A review of the epidemiology of soft tissue sarcoma.

An evaluation of the carcinogenic potential of the herbicide alachlor to man.

Occupational risk factors for sarcoma subtypes.

Measurement of hydroxyl radical-generated methane sulfinic acid by high-performance liquid chromatography and electrochemical detection.

Paraquat myopathy: report on two suicide cases.

Selected phenolic compounds in cultivated plants: ecologic functions, health implications, and modulation by pesticides.

A risk characterization for atrazine: oncogenicity profile.

Content of 8-oxodG in chromosomal DNA of *Sparus aurata* fish as biomarker of oxidative stress and environmental pollution.

Endocrine and reproductive function in ewes exposed to the organochlorine pesticides lindane or pentachlorophenol.

Disposition of pesticides and toxicants in the human reproductive system in cases of acute poisoning.

Increased myofibroblast contractile sensitivity in paraquat pretreated rat lung tissue.

Embryonic toxicity of insecticide Sumithion 50 EC and herbicide Fusilade S in pheasants after individual or combined administration.

Pharmacological and molecular evidence for kinin B1 receptor expression in urinary bladder of cyclophosphamide-treated rats.

Current status of acrolein as a lipid peroxidation product.

Increased activity of H₂O₂ in aorta isolated from chronically streptozotocin-diabetic rats: effects of antioxidant enzymes and enzymes inhibitors.

Evidence for site-specific bioactivation of alachlor in the olfactory mucosa of the Long-Evans rat.

Oxidative stress as a mechanism of chronic cadmium-induced hepatotoxicity and renal toxicity and protection by antioxidants.

Protein-bound acrolein: a novel marker of oxidative stress in Alzheimer's disease.

³²P-postlabelling with high-performance liquid chromatography for analysis of abundant DNA adducts in human tissues.

Higher content of insulin-like growth factor-I in dystrophic mdx mouse: potential role in the spontaneous regeneration through an electrophysiological investigation of muscle function.

Mechanism of organic anion transport across the apical membrane of choroid plexus.

Effect of pentachlorophenol (PCP) on frog cornea epithelium.

Sensory nerve-mediated immediate nasal responses to inspired acrolein.

Peroxynitrite mediated damage and lowered superoxide tolerance in primary cortical glial cultures after induction of the inducible isoform of NOS.

Metabolism of [(1)(4)C]prometryn in rats.

Metabolism of 7-fluoro-6-(3,4,5,6-tetrahydrophthalimido)-4-(2-propynyl)-2H-1,4-benzoxazin-3(4H)-one (S-53482, flumioxazin) in the rat: II. Identification of reduced metabolites.

Enzymatic synthesis of 4-amino-3,5-diethylphenyl sulfate, a rodent metabolite of alachlor.

Evidence for extensive distribution of oestrogen receptor alpha-immunoreactivity in the cerebral cortex of adult rats.

Role of 1,N²-propanodeoxyguanosine adducts as endogenous DNA lesions in rodents and humans.

Expression of Ah receptor and dioxin-related genes in human uterine endometrium in women with or without endometriosis.

Thymocyte development in Ah-receptor-deficient mice is refractory to TCDD-inducible changes.

[Biological actions of acetaldehyde].

Species differences in arsenic-mediated renal copper accumulation: a comparison between rats, mice and guinea pigs.

Skeletal malformations associated with congenital diaphragmatic hernia: experimental and human studies.

Antenatal dexamethasone suppresses tumor necrosis factor-alpha expression in hypoplastic lung in nitrofen-induced diaphragmatic hernia in rats.

[A technic using MRI. A comparative study of 3 anesthetic technics of the inferior alveolar nerve].

The significance of excursions above the ADI: duration in relation to pivotal studies.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) severely alters reproductive function of female hamster offspring.

Erosive injury to the upper gastrointestinal tract in patients receiving iron medication: an underrecognized entity.

Complementation between HLA-DR4 (DRB1*0401) and specific H2-A molecule in transgenic mice leads to collagen-induced arthritis.

Teratogenic response to arsenite during neurulation: relative sensitivities of C57BL/6J and SWV/Fnn mice and impact of the splotch allele.

Hypoxia induces renal tubular epithelial cell apoptosis in chronic renal disease.

Anti-lactoferrin antibodies and other types of anti-neutrophil cytoplasmic antibodies (ANCA) in reactive arthritis and ankylosing spondylitis.

Ferrous sulfate toxicity: a review of autopsy findings.

Balloon angioplasty induces heat shock protein 70 in human blood vessels.

Mutation of beta-catenin is an early event in chemically induced mouse hepatocellular carcinogenesis.

Effects of CYP1A2 on disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin, 2,3,4,7,8-pentachlorodibenzofuran, and 2,2',4,4',5,5'-hexachlorobiphenyl in CYP1A2 knockout and parental (C57BL/6N and 129/Sv) strains of mice.

Effects of aging on resistance to *Trichinella spiralis* infection in rodents exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Immunocytochemical identification of islet cells containing calcitonin gene-related peptide-like immunoreactivity in the plains rat pancreas (*Pseudomys australis*).

Connective tissue responses to calcium hydroxide-based root canal medicaments.

[Small handbook of dioxin et alias].

Food toxins, ampa receptors, and motor neuron diseases.

Pheomelanin as a binding site for drugs and chemicals.

F-actin as a functional target for retro-retinoids: a potential role in anhydroretinol-triggered cell death.

Pharmacokinetics of TCDD in veterans of Operation Ranch Hand: 15-year follow-up.

Regulation of matrix metalloproteinase-2 (MMP-2) by hepatocyte growth factor/scatter factor (HGF/SF) in human glioma cells: HGF/SF enhances MMP-2 expression and activation accompanying up-regulation of membrane type-1 MMP.

Differential toxicities of TCDD in vivo among normal, c-src knockout, geldanamycin- and quercetin-treated mice.

74As-arsenate metabolism in Flemish Giant rabbits with renal insufficiency.

Increased risk of sensory neuropathy in workers with chloracne after exposure to 2,3,7,8-polychlorinated dioxins and furans.

Intracellular Ca²⁺ transients in mouse soleus muscle after hindlimb unloading and reloading.

The myeloperoxidase system of human phagocytes generates Nepsilon-(carboxymethyl)lysine on proteins: a mechanism for producing advanced glycation end products at sites of inflammation.

Heparin/heparan sulfate interacting protein gene expression is up-regulated in human colorectal carcinoma and correlated with differentiation status and metastasis.

Analysis of urinary nitric oxide metabolites in healthy subjects.

4-chloro-m-cresol is a trigger of malignant hyperthermia in susceptible swine.

4-chloro-m-cresol triggers malignant hyperthermia in susceptible swine at doses greatly exceeding those found in drug preparations.

Serum dioxin and immunologic response in veterans of Operation Ranch Hand.

Biochemistry of hemlock (*Conium maculatum* L.) alkaloids and their acute and chronic toxicity in livestock. A review.

Increased tropoelastin and procollagen expression in the lung of nitrofen-induced diaphragmatic hernia in rats.

Cytoplasmic elongation and rupture in megakaryoblastic leukemia cells via activation of adhesion and motility by staurosporine on fibronectin-bound substratum.

Nitecapone inhibits myeloperoxidase in vitro and enhances functional performance after 8 h of ischemia in experimental heart transplantation.

Cancer incidence in a cohort of licensed pesticide applicators in Florida.

Heat-shock protein-73 protects against small intestinal warm ischemia-reperfusion injury in the rat.

Mechanisms of hypoxic vasodilatation of isolated rat mesenteric arteries: a comparison with metabolic inhibition.

Cytochrome P450 CYP1B1 determines susceptibility to 7, 12-dimethylbenz[a]anthracene-induced lymphomas.

[Oxidative injury and its defense system in vivo].

Relationships between environmental organochlorine contaminant residues, plasma corticosterone concentrations, and intermediary metabolic enzyme activities in Great Lakes herring gull embryos.

Effects of dioxins on human health: a review.

Dioxin is a systemic promoter blocker, II.

Arsenic speciation in human organs following fatal arsenic trioxide poisoning--a case report.

Quantification of axonal damage in traumatic brain injury: affinity purification and characterization of cerebrospinal fluid tau proteins.

The potential role of environmental toxins in the pathophysiology of endometriosis.

Differential response to benzo[A]pyrene in human lung adenocarcinoma cell lines: the absence of aryl hydrocarbon receptor activation.

The tracheobronchial tree is abnormal in experimental congenital diaphragmatic hernia.

Pulmonary neuroendocrine cells in nitrofen-induced diaphragmatic hernia and the effect of prenatal glucocorticoids.

Mortality in a cohort of licensed pesticide applicators in Florida.

[A new method for the intravital assessment of the functional activity of the membrane transporters performing the efflux of antitumor preparations from the cells of solid tumor specimens].

[Changes in lipid metabolism with the use of alcohol deterrent preparations].

Iron-mediated cardiotoxicity develops independently of extracellular hydroxyl radicals in isolated rat hearts.

A 63 kDa skeletal muscle protein associated with eye muscle inflammation in Graves' disease is identified as the calcium binding protein calsequestrin.

Amelioration of TCDD-induced teratogenesis in aryl hydrocarbon receptor (AhR)-null mice.

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters cardiovascular and craniofacial development and function in sac fry of rainbow trout (*Oncorhynchus mykiss*).

Diluted mainstream cigarette smoke condensates activate estrogen receptor and aryl hydrocarbon receptor-mediated gene transcription.

Trovafloxacin: an overview.

Oxidative stress increases ubiquitin--protein conjugates in synaptosomes.

Lipopolysaccharides and cytokines downregulate the angiotensin II type 2 receptor in rat cardiac fibroblasts.

Tyrosine phosphorylation of caveolin-1 in the endothelium.

Effects of phenolic antioxidants and flavonoids on DNA synthesis in rat liver, spleen, and testis in vitro.

Genome plasticity during the acquisition of embryogenic competence.

Ecto-ATPase activity in the rat cardiac muscle: biochemical characteristics and histochemical localization.

Estrogen stimulates protein tyrosine phosphorylation and Src kinase activity in avian osteoclasts.

Activity-dependent neurotrophic factor peptide (ADNF9) protects neurons against oxidative stress-induced death.

Molecular cloning and characterization of a hemolymph clottable protein from tiger shrimp (*Penaeus monodon*).

Differential protooncogene expression in Sprague Dawley and Fischer 344 rats during 1,2-dichlorobenzene-induced hepatocellular regeneration.

Methyl iodide toxicity in rat cerebellar granule cells in vitro: the role of glutathione.

The role of plasma semicarbazide-sensitive amine oxidase in allylamine and beta-aminopropionitrile cardiovascular toxicity: mechanisms of myocardial protection and aortic medial injury in rats.

Herbimycin A and geldanamycin inhibit okadaic acid-induced apoptosis and p38 activation in NRK-52E renal epithelial cells.

2-Amino-5-chlorophenol toxicity in renal cortical slices from Fischer 344 rats: effect of antioxidants and sulfhydryl agents.

Transmembrane signalling mechanisms regulating expression of cationic amino acid transporters and inducible nitric oxide synthase in rat vascular smooth muscle cells.

Effects of low oxygen concentrations and metabolic inhibitors on proteoglycan and protein synthesis rates in the intervertebral disc.

Voltage-dependent block of normal and mutant muscle sodium channels by 4-Chloro-m-Cresol.

Depolarization of osteoclast plasma membrane potential by 17beta-estradiol.

Development of a capillary electrophoresis method for the characterization of collagens in cartilage tissue.

Myeloperoxidase-catalyzed redox-cycling of phenol promotes lipid peroxidation and thiol oxidation in HL-60 cells.

VEGF stimulates tyrosine phosphorylation of beta-catenin and small-pore endothelial barrier dysfunction.

Promotion of skeletal muscle differentiation by K252a with tyrosine phosphorylation of focal adhesion: a possible involvement of small GTPase Rho.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-mediated oxidative stress in CYP1A2 knockout (CYP1A2^{-/-}) mice.

Identification and immunolocalization of two isoforms of ATP-diphosphohydrolase (ATPDase) in the pig immune system.

ATP-induced opposite changes in the local environments around Cys(697) (SH2) and Cys(707) (SH1) of the myosin motor domain revealed by the prodan fluorescence.

Methyl bromide decreases excitability without having immediate toxic effects in rat hippocampal CA1 neurons in vitro.

Block of human aorta Kir6.1 by the vascular KATP channel inhibitor U37883A.

Slow transport of unpolymerized tubulin and polymerized neurofilament in the squid giant axon.

Development of selective aryl hydrocarbon receptor modulators for treatment of breast cancer.

Changes in mRNAs of inducible nitric oxide synthase and interleukin-1 beta in the liver, kidney and lung tissues of rats acutely exposed to paraquat.

Involvement of alpha5beta1 integrins in interleukin 8 production induced by oral viridans streptococcal protein I/II in cultured endothelial cells.

[Effect of low temperature on electron transport in plant mitochondria respiratory chain].

Oral phosphate binders: phosphate binding capacity of iron (III) hydroxide complexes containing saccharides and their effect on the urinary excretion of calcium and phosphate in rats.

Early effects of protein kinase modulators on DNA synthesis in rat cerebral cortex.

Effects of an environmental endocrine disruptor on fetal development, estrogen receptor(alpha) and epidermal growth factor receptor expression in the porcine male genital tract.

The role of calcium stores in fatigue of isolated single muscle fibres from the cane toad.

Characteristics of apyrase (EC 3.6.1.5) on cultured bovine endocardial endothelial cells.

LDL stimulates mitogen-activated protein kinase phosphatase-1 expression, independent of LDL receptors, in vascular smooth muscle cells.

Thrombin inhibits active sodium-potassium transport in porcine lens.

Transforming growth factor(beta)-mediated corneal myofibroblast differentiation requires actin and fibronectin assembly.

Sarcoplasmic reticulum Ca(2+) release by 4-chloro-m-cresol (4-CmC) in intact and chemically skinned ferret cardiac ventricular fibers.

Analyses of tissues of eight marine species from Atlantic and Pacific coasts for dioxin-like chlorobiphenyls (CBs) and total CBs.

A survey of EPA/OPP and open literature on selected pesticide chemicals. II. Mutagenicity and carcinogenicity of selected chloroacetanilides and related compounds.

Identification of a novel cytosolic tocopherol-binding protein: structure, specificity, and tissue distribution.

Transplantation of fetal liver tissue suspension into the spleens of adult syngenic rats: effects of various mitogens and cytotoxins on cytochrome P450 (P450) isoforms expression and on P450 mediated monooxygenase functions.

Hydrogen peroxide stimulates tyrosine phosphorylation of focal adhesion kinase in vascular endothelial cells.

Targeted delivery of oligodeoxynucleotides to parenchymal liver cells in vivo.

Characterization of glycine transport in cultured Müller glial cells from the retina.

Activation of Akt/protein kinase B after stimulation with angiotensin II in vascular smooth muscle cells.

Chondrocyte death is linked to development of a mitochondrial membrane permeability transition in the growth plate.

Characterization of the myosin light chain kinase from smooth muscle as an actin-binding protein that assembles actin filaments in vitro.

p120(ctn) acts as an inhibitory regulator of cadherin function in colon carcinoma cells.

Photo-oxidative killing of human colonic cancer cells using indocyanine green and infrared light.

Superficial buffer barrier and preferentially directed release of Ca²⁺ in canine airway smooth muscle.

Polychlorinated dibenzo-p-dioxins (PCDDs) and dibenzofurans (PCDFs) in muscle and eggs of salmonid fishes from the Great Lakes.

Gene delivery of Kir6.2/SUR2A in conjunction with pinacidil handles intracellular Ca²⁺ homeostasis under metabolic stress.

Structural analysis of angiotensin IV receptor (AT4) from selected bovine tissues.

Polychlorinated dibenzo-p-dioxins and related compounds: correlations of levels in human tissues and in blood.

Dioxin and dibenzofuran concentrations in adipose tissue of a general population from Tarragona, Spain.

Activation of pp60(src) is critical for stretch-induced orienting response in fibroblasts.

Water-soluble 2,3,7,8-tetrachlorodibenzo-p-dioxin complex with human alpha-fetoprotein: properties, toxicity in vivo and antitumor activity in vitro.

Molecular cloning of retinal oxidase/aldehyde oxidase cDNAs from rabbit and mouse livers and functional expression of recombinant mouse retinal oxidase cDNA in Escherichia coli.

NTP Toxicology and Carcinogenesis Studies of Pentachlorophenol (CAS NO. 87-86-5) in F344/N Rats (Feed Studies).

Phenolic content in differentiated tissue cultures of untransformed and Agrobacterium-transformed roots of anise (*Pimpinella anisum* L.).

ECC-1 human endometrial cells as a model system to study dioxin disruption of steroid hormone function.

The relation between the action potential duration, the increase in resting tension, and ATP content during metabolic inhibition in guinea pig ventricular muscles.

Four amino acid changes are associated with the Aldh3a1 locus polymorphism in mice which may be responsible for corneal sensitivity to ultraviolet light.

Dose dependent changes in 74As-arsenate metabolism of Flemish Giant rabbits.

Carbonyl stress in the pathogenesis of diabetic nephropathy.

Toxicant-inflicted injury and stimulated tissue repair are opposing toxicodynamic forces in predictive toxicology.

Immunohistochemical evidence for an increased oxidative stress and carbonyl modification of proteins in diabetic glomerular lesions.

Differential activation of phosphoinositide 3-kinase by endothelin and ceramide in colonic smooth muscle cells.

Role of tyrosine phosphorylation of phospholipase C gamma1 in the signaling pathway of HMG-CoA reductase inhibitor-induced cell death of L6 myoblasts.

[The application of artificial neural network in QSAR research of PCDD].

[Preliminary studies on tissue culture and agrobacterium-mediated transformation of *Brassica campestris* ssp. *chinensis*].

Measurement of sarcoplasmic reticulum Ca²⁺ content in intact amphibian skeletal muscle fibres with 4-chloro-m-cresol.

Two-dimensional electrophoresis of *Cereus peruvianus* (Cactaceae) callus tissue proteins.

Production of the sedative triterpene galphimine B in *Galphimia glauca* tissue culture.

ECM-stimulated actin bundle formation in embryonic corneal epithelia is tyrosine phosphorylation dependent.

Time- and concentration-dependent induction of CYP1A1 and CYP1A2 in precision-cut rat liver slices incubated in dynamic organ culture in the presence of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Glucose-receptive neurones in the rat ventromedial hypothalamus express KATP channels composed of Kir6.1 and SUR1 subunits.

Alterations of matrix- and cell-associated proteoglycans inhibit osteogenesis and growth response to fibroblast growth factor-2 in cultured rat mandibular condyle and calvaria.

Skeletal muscle type ryanodine receptor is involved in calcium signaling in human B lymphocytes.

Modification of excitation-contraction coupling by 4-chloro-m-cresol in voltage-clamped cut muscle fibres of the frog (*R. pipiens*).

Involvement of tyrosine phosphorylation in HMG-CoA reductase inhibitor-induced cell death in L6 myoblasts.

Isometric contraction induces the Ca²⁺-independent activation of the endothelial nitric oxide synthase.

Endothelin-1 gene suppression by shear stress: pharmacological evaluation of the role of tyrosine kinase, intracellular calcium, cytoskeleton, and mechanosensitive channels.

PCB congener patterns in rats consuming diets containing Great Lakes salmon: analysis of fish, diets, and adipose tissue.

NK1-receptor activation prevents hydrocarbon-induced lung injury in mice.

Induction of collagenase-3 (MMP-13) expression in human skin fibroblasts by three-dimensional collagen is mediated by p38 mitogen-activated protein kinase.

Potential alterations in gene expression associated with carcinogen exposure in *Mya arenaria*.

Heparinase treatment of bovine smooth muscle cells inhibits fibroblast growth factor-2 binding to fibroblast growth factor receptor but not FGF-2 mediated cellular proliferation.

Mechanism of mitogenic effect of fluoride on fetal rat osteoblastic cells: evidence for Shc, Grb2 and P-CREB-dependent pathways.

The lack of AHD4 induction by TCDD in corneal cells may involve tissue-specific regulatory proteins.

A comparison of 1H8- and 2H8-toluene toxicokinetics in men.

Orientation change of cardiocytes induced by cyclic stretch stimulation: time dependency and involvement of protein kinases.

RT-PCR quantification of AHR, ARNT, GR, and CYP1A1 mRNA in craniofacial tissues of embryonic mice exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin and hydrocortisone.

AhR, ARNT, and CYP1A1 mRNA quantitation in cultured human embryonic palates exposed to TCDD and comparison with mouse palate in vivo and in culture.

The lipid peroxidation product 4-hydroxynonenal impairs glutamate and glucose transport and choline acetyltransferase activity in NSC-19 motor neuron cells.

Contribution of serum and cellular semicarbazide-sensitive amine oxidase to amine metabolism and cardiovascular toxicity.

Molecular approaches to evaluate pollutants.

Mechanism of biochemical action of substituted 4-methylbenzopyran-2-ones. Part 3: A novel mechanism for the inhibition of biological membrane lipid peroxidation by dioxygenated 4-methylcoumarins mediated by the formation of a stable ADP-Fe-inhibitor mixed ligand complex.

The nature of antioxidant defense mechanisms: a lesson from transgenic studies.

Occupational chlorophenol exposure and soft tissue sarcoma risk among men aged 30-60 years.

Acute 2,4-D poisoning in tench (*Tinca tinca* L.): lesions in the hematopoietic portion of the kidney.

MPP+ toxicity and plasma membrane dopamine transporter: study using cell lines expressing the wild-type and mutant rat dopamine transporters.

The role of glutathione S-transferases as a defense against reactive electrophiles in the blood vessel wall.

Cellular glutathione peroxidase is the mediator of body selenium to protect against paraquat lethality in transgenic mice.

Chlorpropham [isopropyl N-(3-chlorophenyl) carbamate] disrupts microtubule organization, cell division, and early development of sea urchin embryos.

Malicious paraquat poisoning in Oklahoma dogs.

Reproductive effects in mink (*Mustela vison*) exposed to the pesticides Lindane, Carbofuran and Pentachlorophenol in a multigeneration study.

[Morphologic findings in liver tissue in mice after long-term administration of the herbicide fomesafan].

Cancer incidence in Danish phenoxy herbicide workers, 1947-1993.

Exposure to Agent Orange and occurrence of soft-tissue sarcomas or non-Hodgkin lymphomas: an ongoing study in Vietnam.

Acute 2,4-dichlorophenoxyacetic acid intoxication in broiler chicks.

Paraquat poisoning: an experimental model of dose-dependent acute lung injury due to surfactant dysfunction.

Genetic and environmental risk factors in Parkinson's disease.

[Inhibitory effect of green tea infusion of hepatotoxicity].

Kaposi's sarcoma in dog with acquired immunodeficiency after phosphate poisoning.

In vivo studies on genotoxicity of a soil fumigant, dazomet.

Cytoplasmic liver cell inclusions--a typical feature of porphyria cutanea tarda--are absent in porphyria-related hepatic neoplasias.

In vivo dual effects of vitamin C on paraquat-induced lung damage: dependence on released metals from the damaged tissue.

Extraperoxisomal targets of peroxisome proliferators: mitochondrial, microsomal, and cytosolic effects. Implications for health and disease.

Pulmonary arterioles from rats with congenital diaphragmatic hernias are hypoplastic but not hyperresponsive.

Cytokine-mediated induction of ceramide production is redox-sensitive. Implications to proinflammatory cytokine-mediated apoptosis in demyelinating diseases.

Role of tumor necrosis factor-alpha in regulating fibrotic lung repair.

Protein-bound acrolein: potential markers for oxidative stress.

Feeding fish oil to rats accelerates the metabolism of hexachlorobenzene.

Erythrocyte antioxidant systems protect cultured endothelial cells against oxidant damage.

Insect cytochromes P450: diversity, insecticide resistance and tolerance to plant toxins.

Expression of ornithine decarboxylase is transiently increased by pollination, 2,4-dichlorophenoxyacetic acid, and gibberellic acid in tomato ovaries.

Calcium signaling in airway smooth muscle cells is altered by in vitro exposure to the aldehyde acrolein.

Differential xenobiotic induction of CYP2A5 in mouse liver, kidney, lung, and olfactory mucosa.

Cultured renal epithelial cells from birds and mice: enhanced resistance of avian cells to oxidative stress and DNA damage.

Acrolein is a product of lipid peroxidation reaction. Formation of free acrolein and its conjugate with lysine residues in oxidized low density lipoproteins.

Metabolism and distribution of [2,3-¹⁴C]acrolein in Sprague-Dawley rats. II. Identification of urinary and fecal metabolites.

Immunoenzymatic determination of atrazine in rat tissue samples.

Immunocytochemical localization of Fos in perfused nonhuman primate brain tissue: fixation and antisera selection.

Dialkylquinonimines validated as in vivo metabolites of alachlor, acetochlor, and metolachlor herbicides in rats.

Muscle cells from mdx mice have an increased susceptibility to oxidative stress.

Influence of incubation time and rinsing buffer on the distribution of the tracer lanthanum in canine heart muscle.

Intrahippocampal injection of paraquat produces apoptotic cell death which is prevented by the lazaroide U74389G, in rats.

Ah receptor agonists as endocrine disruptors: antiestrogenic activity and mechanisms.

Expression of mucin-associated sulfo-Lea carbohydrate epitopes on human colon carcinoma cells.

Tyrosine kinase inhibitor effects on avian osteoclastic acid transport.

Health effects associated with sulfur dioxide and methyl bromide exposure among structural fumigation workers.

Expression of adhesion molecules by Ip(a): a potential novel mechanism for its atherogenicity.

Mechanism of action of the nongenotoxic peroxisome proliferators: role of the peroxisome proliferator-activator receptor alpha.

Effects of in utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on serum androgens and steroidogenic enzyme activities in the male rat reproductive tract.

Herbimycin-A attenuates ischaemia-reperfusion induced pulmonary neutrophil infiltration.

Tissue residues in male chickens fed a 50 ng/kg dietary concentration of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Oncostatin M up-regulates tissue inhibitor of metalloproteinases-3 gene expression in articular chondrocytes via de novo transcription, protein synthesis, and tyrosine kinase- and mitogen-activated protein kinase-dependent mechanisms.

Irregular patterns of transgene silencing in allohexaploid oat.

Zoxazolamine-induced paralysis in two rat substrains: differences in hepatic drug metabolism.

Role of endothelial carbon monoxide in attenuated vasoreactivity following chronic hypoxia.

Molecular analysis of collagens in bladder fibrosis.

Advanced glycation end products induce crosslinking of collagen in vitro.

Stimulation of the stress-induced expression of stress proteins by curcumin in cultured cells and in rat tissues in vivo.

Establishment of a simple cleanup procedure and bioassay for determining 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity equivalents of environmental samples.

Glucosamine-induced insulin resistance in 3T3-L1 adipocytes is caused by depletion of intracellular ATP.

Incorporation of structurally defective type II collagen into cartilage matrix in kniest chondrodysplasia.

Activation of MMP-2 by human GCT23 giant cell tumour cells induced by osteopontin, bone sialoprotein and GRGDSP peptides is RGD and cell shape change dependent.

Administration of antenatal glucocorticoids prevents pulmonary artery structural changes in nitrofen-induced congenital diaphragmatic hernia in rats.

Atherosclerotic risks from chemicals: part II. A RASH analysis of in vitro and in vivo bioassay data to evaluate 45 potentially hazardous compounds.

Suppression of decorin expression and partial induction of anchorage-independent growth by the v-src oncogene in human fibroblasts.

Reproductive toxicity and tissue concentrations of low doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin in male offspring rats exposed throughout pregnancy and lactation.

In utero and lactational exposure of the male rat to 2,3,7,8-tetrachlorodibenzo-p-dioxin impairs prostate development. 2. Effects on growth and cytodifferentiation.

Small dense low density lipoprotein has increased affinity for LDL receptor-independent cell surface binding sites: a potential mechanism for increased atherogenicity.

[Immunotoxicology in occupational and environmental medicine: prospectives, limitations, and research objectives].

Mechanisms of gender-specific TCDD-induced toxicity in guinea pig adipose tissue.

Atherogenic lipoproteins enhance mesangial cell expression of platelet-derived growth factor: role of protein tyrosine kinase and cyclic AMP-dependent protein kinase A.

Interruption of estradiol signal transduction by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) through disruption of the protein phosphorylation pathway in adipose tissues from immature and mature female rats.

An IARC evaluation of polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans as risk factors in human carcinogenesis.

The Seveso studies on early and long-term effects of dioxin exposure: a review.

Activation of tissue-factor gene expression in breast carcinoma cells by stimulation of the RAF-ERK signaling pathway.

Inhibition of vascular and epithelial differentiation in murine nitrofen-induced diaphragmatic hernia.

Arsenate toxicity in human erythrocytes: characterization of morphologic changes and determination of the mechanism of damage.

A computer-aided 3-D geometry of acute and chronic zonal necrosis: three-D tangent counting applied in an attempt to re-examine the structure of the human liver.

Collagen-induced arthritis in nonhuman primates: multiple epitopes of type II collagen can induce autoimmune-mediated arthritis in outbred cynomolgus monkeys.

Structurally abnormal type II collagen in a severe form of Kniest dysplasia caused by an exon 24 skipping mutation.

Differential display of genes in normal and hypoplastic fetal murine lungs.

Micropreparation of tissue collagenase fragments of type I collagen in the form of surfactant-peptide complexes and their identification by capillary electrophoresis and partial sequencing.

Overexpression and activation of the tyrosine kinase Src in human pancreatic carcinoma.

Dioxin exposure and non-malignant health effects: a mortality study.

Neurotrophic factors decrease the release of creatine kinase and prostaglandin E2 from metabolically stressed muscle.

Characterization of the effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in B6C3F1 and DBA/2 mice following single and repeated exposures.

Differential induction of Cyp1a1, Cyp1b1, Ahd4, and Nmo1 in murine skin tumors and adjacent normal epidermis by ligands of the aryl hydrocarbon receptor.

Surfactant protein A is decreased in a rat model of congenital diaphragmatic hernia.

The 64-kilodalton eye muscle protein is the flavoprotein subunit of mitochondrial succinate dehydrogenase: the corresponding serum antibodies are good markers of an immune-mediated damage to the eye muscle in patients with Graves' hyperthyroidism.

Aryl hydrocarbon receptor-inducible or constitutive expression of human UDP glucuronosyltransferase UGT1A6.

A useful method to evaluate bone resorption inhibitors, using osteoclast-like multinucleated cells.

Activation of beta1 integrin signaling stimulates tyrosine phosphorylation of p190RhoGAP and membrane-protrusive activities at invadopodia.

Induction of cellular processes containing collagenase and retinoid by integrin-binding to interstitial collagen in hepatic stellate cell culture.

An unusual exposure to methyl bromide leading to fatality.

Phosphoprotein analysis of sequential extracts of human dentin and the determination of the subsequent remineralization potential of these dentin matrices.

Measurement of reactive oxygen species by chemiluminescence in diet-induced atherosclerosis: protective roles of vitamin E and probucol on different radical species.

Tyro 3 receptor tyrosine kinase and its ligand, Gas6, stimulate the function of osteoclasts.

[Approaches to the combined therapy of helminthiases with leukiniferon and etiotropic preparations].

Three novel type I collagen mutations in osteogenesis imperfecta type IV probands are associated with discrepancies between electrophoretic migration of osteoblast and fibroblast collagen.

Role of glutathione in cisplatin resistance in osteosarcoma cell lines.

[Long-term ecological and genetic consequences of use of dioxin-containing environmental agents].

Effect of prenatal glucocorticoids on pulmonary vascular muscularisation in nitrofen-induced congenital diaphragmatic hernia.

Modulation of ovarian follicle maturation and effects on apoptotic cell death in Holtzman rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in utero and lactationally.

Tyrosine phosphorylation of syndecan-1 and -4 cytoplasmic domains in adherent B82 fibroblasts.

Regulation of System A amino acid transport in L6 rat skeletal muscle cells by insulin, chemical and hyperthermic stress.

Efficient callus induction and plant regeneration from mature embryo culture of winter wheat (*Triticum aestivum* L.) genotypes.

Dose-response relationships for disposition and hepatic sequestration of polyhalogenated dibenzo-p-dioxins, dibenzofurans, and biphenyls following subchronic treatment in mice.

Presence of intestinal, liver and heart/adipocyte fatty-acid-binding protein types in the liver of a chimaera fish.

Vitamin E protects the brain against oxidative injury stimulated by excessive aluminum intake.

Reactive oxygen species activate focal adhesion kinase, paxillin and p130cas tyrosine phosphorylation in endothelial cells.

Rho A regulates sustained smooth muscle contraction through cytoskeletal reorganization of HSP27.

Rapid stimulation of glucose transport by mitochondrial uncoupling depends in part on cytosolic Ca²⁺ and cPKC.

Mannitol at clinical concentrations activates multiple signaling pathways and induces apoptosis in endothelial cells.

Inhibition of hsp70-1 and hsp70-3 expression disrupts preimplantation embryogenesis and heightens embryo sensitivity to arsenic.

Transient and prolonged increase in endothelial permeability induced by histamine and thrombin: role of protein kinases, calcium, and RhoA.

Functional consequences of mutations of conserved, polar amino acids in transmembrane sequences of the Ca²⁺ release channel (ryanodine receptor) of rabbit skeletal muscle sarcoplasmic reticulum.

Induction and control of chromoplast-specific carotenoid genes by oxidative stress.

Tyrosine kinase inhibitors suppress prostaglandin F₂α-induced phosphoinositide hydrolysis, Ca²⁺ elevation and contraction in iris sphincter smooth muscle.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induction of cytochrome P450-dependent arachidonic acid metabolism in mouse liver microsomes: evidence for species-specific differences in responses.

Calreticulin expression in plant cells: developmental regulation, tissue specificity and intracellular distribution.

Invasion of aortic and heart endothelial cells by *Porphyromonas gingivalis*.

Fibronectin stimulates transcription of the platelet-derived growth factor beta-receptor in cultured rat aortic smooth muscle cells.

Evidence for a tyrosine kinase-dependent activation of the adenylyl Cyclase/PKA cascade downstream from the G-protein-linked endothelin ETA receptor in vascular smooth muscle.

Structural and functional comparison of agents interfering with dihydroorotate, succinate and NADH oxidation of rat liver mitochondria.

The counteradhesive protein SPARC regulates an endothelial paracellular pathway through protein tyrosine phosphorylation.

2,3,7,8-Tetrachlorodibenzo-p-dioxin in pregnant Long Evans rats: disposition to maternal and embryo/fetal tissues.

Effect of protein kinase inhibitors on primary antibody induction in tissue cultures.

Toxicokinetics of an environmentally relevant mixture of dioxin-like PHAHs with or without a non-dioxin-like PCB in a semi-chronic exposure study in female Sprague Dawley rats.

Analysis of gene expression in lung and thymus of TCDD treated C57BL/6 mice using differential display RT-PCR.

Partitioning of dioxins, dibenzofurans, and coplanar PCBS in blood, milk, adipose tissue, placenta and cord blood from five American women.

Redox regulation of signal transduction in vascular smooth muscle cells: thiol oxidizing agents induced phospholipase D.

Antiestrogenic effects of low doses of 2,3,7,8-TCDD in offspring of female rats exposed throughout pregnancy and lactation.

Transgenic analysis of the cSOD-null phenotypic syndrome in *Drosophila*.

Src kinase and PI 3-kinase as a transduction pathway in ceramide-induced contraction of colonic smooth muscle.

Tyrosine kinase inhibition produces specific alterations in axon guidance in the grasshopper embryo.

Glycosaminoglycans bind granulocyte-macrophage colony-stimulating factor and modulate its mitogenic activity and signaling in human osteoblastic cells.

Differential regulation of potassium currents by FGF-1 and FGF-2 in embryonic *Xenopus laevis* myocytes.

Heparan sulfate proteoglycans control intracellular processing of bFGF in vascular smooth muscle cells.

The catalytic subunit of the cAMP-dependent protein kinase of ovine sperm flagella has a unique amino-terminal sequence.

CD40-mediated signal transduction in human airway smooth muscle.

SPARC inhibits endothelial cell adhesion but not proliferation through a tyrosine phosphorylation-dependent pathway.

Up-regulation of tissue inhibitor of metalloproteinases-3 gene expression by TGF-beta in articular chondrocytes is mediated by serine/threonine and tyrosine kinases.

Genetic complexity, structure, and characterization of highly active bovine intestinal alkaline phosphatases.

Type I collagen influence on gene expression in UMR106-06 osteoblast-like cells is inhibited by genistein.

Mechanisms of ligand-induced aryl hydrocarbon receptor-mediated biochemical and toxic responses.

Quantitative analysis of liver peroxisomes in rats intoxicated with peroxisomicine-A1.

Cyclophosphamide cystitis as a model of visceral pain in rats: a c-fos and Krox-24 study at telencephalic levels, with a note on pituitary adenylate cyclase activating polypeptide (PACAP).

Hepatic and renal metallothionein induction following single oral administration of gallium arsenide in rats.

In vitro inhibition of thyroid hormone sulfation by hydroxylated metabolites of halogenated aromatic hydrocarbons.

Ceramide accumulation during oxidant renal tubular injury: mechanisms and potential consequences.

Lipid-containing semipermeable membrane devices (SPMDs) as concentrators of toxic chemicals in the lower Fraser River, Vancouver, British Columbia.

Regulation of BMP7 expression during kidney development.

Effects of ryanodine receptor agonist 4-chloro-m-cresol on myoplasmic free Ca²⁺ concentration and force of contraction in mouse skeletal muscle.

Release and analysis of polypeptides and glycopolypeptides from formalin-fixed, paraffin wax-embedded tissue.

Ah receptor, ARNT, glucocorticoid receptor, EGF receptor, EGF, TGF alpha, TGF beta 1, TGF beta 2, and TGF beta 3 expression in human embryonic palate, and effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Expression of CYP1B1 but not CYP1A1 by primary cultured human mammary stromal fibroblasts constitutively and in response to dioxin exposure: role of the Ah receptor.

Differences in kinetics of induction and reversibility of TCDD-induced changes in cell proliferation and CYP1A1 expression in female Sprague-Dawley rat liver.

Detection of CYP1A1 protein in human liver and induction by TCDD in precision-cut liver slices incubated in dynamic organ culture.

Hepatic stellate cells (vitamin A-storing cells) change their cytoskeleton structure by extracellular matrix components through a signal transduction system.

A pharmacodynamic analysis of TCDD-induced cytochrome P450 gene expression in multiple tissues: dose- and time-dependent effects.

Stress-induced fractal rearrangement of the endothelial cell cytoskeleton causes apoptosis.

Species- and sex-related differences in metabolism of trichloroethylene to yield chloral and trichloroethanol in mouse, rat, and human liver microsomes.

Functional aspects of skeletal muscle contractile apparatus and sarcoplasmic reticulum after fatigue.

p38 mitogen-activated protein kinase expression and activation in smooth muscle.

Elucidation of the amino acid sequence of a crustacean hyperglycaemic hormone from the spiny lobster, *Jasus lalandii*.

Pp125FAK is required for stretch dependent morphological response of endothelial cells.

Chemotaxis of chinese hamster ovary cells expressing the human neutrophil formyl peptide receptor: role of signal transduction molecules and alpha5beta1 integrin.

Interactions between bioenergetics and mitochondrial biogenesis.

Involvement of receptor-like protein tyrosine phosphatase zeta/RPTPbeta and its ligand pleiotrophin/heparin-binding growth-associated molecule (HB-GAM) in neuronal migration.

Neuron density and distribution of NADPH-diaphorase positive neurons in the human stomach.

Teratogen-induced cell death in postimplantation mouse embryos: differential tissue sensitivity and hallmarks of apoptosis.

Serum and urinary boron levels in rats after single administration of sodium tetraborate.

Aryl hydrocarbon receptor activation in genital tubercle, palate, and other embryonic tissues in 2,3,7,8-tetrachlorodibenzo-p-dioxin-responsive lacZ mice.

Effects of varied fatigue protocols on sarcoplasmic reticulum calcium uptake and release rates.

The cellular stress response increases measles virus-induced cytopathic effect.

Expression of cytosolic beta-glucosidase in guinea pig liver cells.

E-C coupling failure in mouse EDL muscle after in vivo eccentric contractions.

The effect of Ba²⁺ on the nitrergic mechanism in the isolated frog lung preparation.

Src family tyrosine kinase regulates intracellular pH in cardiomyocytes.

The role of glutathione S-transferase- and cytochrome P450-dependent metabolism in the olfactory toxicity of methyl iodide in the rat.

Treatment of rats during pubertal development with 2,3,7,8-tetrachlorodibenzo-p-dioxin alters both signaling kinase activities and epidermal growth factor receptor binding in the testis and the motility and acrosomal reaction of sperm.

Responsiveness of the adult male rat reproductive tract to 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure: Ah receptor and ARNT expression, CYP1A1 induction, and Ah receptor down-regulation.

Fast and sensitive method for simultaneous measurement of cell proliferation rate and drug sensitivity in rat cerebral cortex.

Hydrogen peroxide activates mitogen-activated protein kinases and Na⁺-H⁺ exchange in neonatal rat cardiac myocytes.

Characterization of CYP1B1 and CYP1A1 expression in human mammary epithelial cells: role of the aryl hydrocarbon receptor in polycyclic aromatic hydrocarbon metabolism.

Metabolism of inorganic arsenic in children with chronic high arsenic exposure in northern Argentina.

Inflammatory cytokines (IL-1 α , TNF- α) and LPS modulate the Ca²⁺ signaling pathway in osteoblasts.

Suppression of C/EBP α and induction of C/EBP β by 2,3,7,8-tetrachlorodibenzo-p-dioxin in mouse adipose tissue and liver.

Anti-immunoglobulin E antibody treatment blocks histamine release and tissue contraction in sensitized mice.

Injury of stromal fibroblasts induces phosphorylation of focal adhesion proteins.

Colony-stimulating factor-1 stimulates the fusion process in osteoclasts.

Profiles of Great Lakes critical pollutants: a sentinel analysis of human blood and urine. The Great Lakes Consortium.

Cortactin-Src kinase signaling pathway is involved in N-syndecan-dependent neurite outgrowth.

Buprenorphine hydrochloride induces apoptosis in NG108-15 nerve cells.

Impact of dioxin-type induction of drug-metabolizing enzymes on the metabolism of endo- and xenobiotics.

Determination of malondialdehyde in rat brain by capillary zone electrophoresis.

Regeneration of coconut (*Cocos nucifera* L.) from plumule explants through somatic embryogenesis.

Myelosuppressive activity of two herbicides, atrazine and dinoterb, on human haematopoietic progenitor cells: An in vitro assay to evaluate the effects of intermediate or long-term exposure.

Use of precision-cut rat liver slices for studies of xenobiotic metabolism and toxicity: comparison of the Krumdieck and Brendel tissue slicers.

A selective historical review of congener-specific human tissue measurements as sensitive and specific biomarkers of exposure to dioxins and related compounds.

Female Sprague-Dawley rats exposed to a single oral dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin exhibit sustained depletion of aryl hydrocarbon receptor protein in liver, spleen, thymus, and lung.

Cigarette smoke extract inhibits fibroblast-mediated collagen gel contraction.

Effects of hyperosmolality on Na, K-ATPase gene expression in vascular smooth muscle cells.

Analysis of matrix protein components of the dermis-like structure formed in a long-term culture of human fibroblasts: type VI collagen is a major component.

Reduced fertility in female mice lacking copper-zinc superoxide dismutase.

Mechanical strain increases protein tyrosine phosphorylation in airway smooth muscle cells.

Functional imaging of mitochondria in saponin-permeabilized mice muscle fibers.

Redox regulation of signal transduction in smooth muscle cells: distinct effects of PKC-down regulation and PKC inhibitors on oxidant induced MAP kinase.

Induction of oxidative stress in brain tissues of mice after subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Environmental occurrence and potential toxicity of planar, mono-, and di-ortho polychlorinated biphenyls in the biota.

Aryl hydrocarbon receptor-associated genes in rat liver: regional coinduction of aldehyde dehydrogenase 3 and glutathione transferase Ya.

1,N²-propanodeoxyguanosine adducts: potential new biomarkers of smoking-induced DNA damage in human oral tissue.

Dietary and tissue residue analysis and contaminant intake estimations in rats consuming diets composed of Great Lakes salmon: a multigeneration study.

Ets-1 is an early response gene activated by ET-1 and PDGF-BB in vascular smooth muscle cells.

Toxicity of linoleic acid hydroperoxide to *Saccharomyces cerevisiae*: involvement of a respiration-related process for maximal sensitivity and adaptive response.

Na⁺-dependent and phlorizin-inhibitable transport of glucose and cycasin in brain endothelial cells.

Hepatitis B virus X-associated protein 2 is a subunit of the unliganded aryl hydrocarbon receptor core complex and exhibits transcriptional enhancer activity.

Metabolic Study of Isoproturon in Goats Following a Single Oral Administration: Toxicokinetics and Recovery.

Inhibition of corneal metabolism of deslorelin by EDTA and ZnCl₂.

Expression of glycylation of tubulin during the differentiation of spermatozoa in mammals.

Use of c-Src and c-Fos knockout mice for the studies on the role of c-Src kinase signaling in the expression of toxicity of TCDD.

Multiplication of *Legionella pneumophila* in HeLa cells in the presence of cytoskeleton and metabolic inhibitors.

Effect of in vivo administered 2,3,7,8-tetrachlorodibenzo-p-dioxin on DNA-binding activities of nuclear transcription factors in liver of guinea pigs.

Age-related changes and location of type I, III and IV collagens during skeletal muscle development of double-muscle and normal bovine fetuses.

Levels of 2,3,7,8-tetrachlorodibenzo-p-dioxin in 1,302 unexposed Air Force Vietnam-era veterans.

Enzymatic methylation of arsenic compounds. V. Arsenite methyltransferase activity in tissues of mice.

Correlation of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced apoptotic cell death in the embryonic vasculature with embryotoxicity.

Development validation and problems with the toxic equivalency factor approach for risk assessment of dioxins and related compounds.

Determining sodium azide concentration in blood by ion chromatography.

Chemically reactive intermediates and pulmonary xenobiotic toxicity.

A review of epidemiologic studies of triazine herbicides and cancer.

Single-dose and chronic dietary neurotoxicity screening studies on 2,4-dichlorophenoxyacetic acid in rats.

Herbicide-induced experimental variegated porphyria in mice: tissue porphyrinogen accumulation and response to porphyrinogenic drugs.

Successful single-lung transplantation after paraquat intoxication.

Determination of 8-hydroxy-deoxyguanosine formation in rat organs: assessment of paraquat-evoked oxidative DNA damage.

Sex-dependent differences in the disposition of 2,4-dichlorophenoxyacetic acid in Sprague-Dawley rats, B6C3F1 mice, and Syrian hamsters.

Mitochondria-mediated cell injury. Symposium overview.

Quantitative distributions of different cholinesterases and inhibition of acetylcholinesterase by metidathion and paraquat in alimentary canal of common carp.

Cancer mortality in workers exposed to phenoxy herbicides, chlorophenols, and dioxins. An expanded and updated international cohort study.

Cellular toxicity of 2,4,5-trichlorophenoxyacetic acid: formation of 2,4,5-trichlorophenoxyacetylcholine.

Effects of oxygen pressure and medium volume on the toxicity of paraquat in rat and human type II pneumocytes.

Pesticides and cancer.

Influence of benzo[a]phenothiazines on the element content of two tobacco tissue cultures differing in hormone requirement.

Studies on the effect of peroxisomicine on catalase activity in albino mice.

Serum dioxin and diabetes mellitus in veterans of Operation Ranch Hand.

Detection of drugs and poisons in postmortem tissues--determination of paraquat in tissues of rabbits buried underground.

Comparative in vitro and in vivo protein kinase C activation by selected pesticides and transition metal salts.

Effects of dichlobenil on ultrastructural morphology and cell replication in the mouse olfactory mucosa.

G-protein(S), G alpha q/G alpha 11, in the olfactory neuroepithelium of the channel catfish (*Ictalurus punctatus*) is altered by the herbicide, dichlobenil.

Comparison of HPLC and CE for the analysis of dichlorprop in a case of intoxication.

Dimethylarsinic acid treatment alters six different rat biochemical parameters: relevance to arsenic carcinogenesis.

Comparative pharmacokinetics of [14C]metosulam (N-[2,6-dichloro-3-methylphenyl]-5,7-dimethoxy-1,2,4-triazolo[1,5a]-pyrimidine-2-sulfonamide) in rats, mice and dogs.

Differential induction of adaptive responses by paraquat and hydrogen peroxide against the genotoxicity of methyl mercuric chloride, maleic hydrazide and ethyl methane sulfonate in plant cells in vivo.

Influence of dietary selenium on the disposition of arsenate in the female B6C3F1 mouse.

Induction of glutathione depletion, p53 protein accumulation and cellular transformation by tetrachlorohydroquinone, a toxic metabolite of pentachlorophenol.

Atrial natriuretic peptide accounts for increased cGMP in hypoxia-induced hypertensive rat lungs.

Acceleration of hypertensive cerebral injury by the inhibition of xanthine-xanthine oxidase system in stroke-prone spontaneously hypertensive rats.

Human neutrophils employ the myeloperoxidase-hydrogen peroxide-chloride system to convert hydroxy-amino acids into glycolaldehyde, 2-hydroxypropanal, and acrolein. A mechanism for the generation of highly reactive alpha-hydroxy and alpha,beta-unsaturated aldehydes by phagocytes at sites of inflammation.

Unique expression of HRF20 (CD59) in human nervous tissue.

Pentachlorophenol dermal absorption and disposition from soil in swine: effects of occlusion and skin microorganism inhibition.

Double immunocytochemistry in pre-embedding electron microscopy for the detection of neurotensin and tyrosine hydroxylase in the guinea pig, using two primary antisera raised in the same species.

[Effect of activity of semicarbazide-sensitive aminooxidases and cellular glutathione on the cytotoxic effect of allylamine, acrolein, and formaldehyde in human cultured endothelial cells].

Herbicide and estrogen effects on the metabolic activity of *Elliptio complanata* measured by calorimetry.

Role of fibronectin and sulfated proteoglycans in endothelial cell migration on a cultured smooth muscle layer.

Characteristics of the prolactin stimulation of iodide uptake into mouse mammary gland explants.

Dosimetry of chlorinated quinone metabolites of pentachlorophenol in the livers of rats and mice based upon measurement of protein adducts.

Hydrogen peroxide-induced impairment of reactivity in rat isolated aorta: potentiation by 3-amino-1,2,4-triazole.

A leucine-rich repeat containing receptor-like kinase marks somatic plant cells competent to form embryos.

Molecularly imprinted solid phase extraction of atrazine from beef liver extracts.

Hydrogen peroxide (H₂O₂) increases the steady-state mRNA levels of collagenase/MMP-1 in human dermal fibroblasts.

GDNF-induced neurite formation was stimulated by protein kinase inhibitors and suppressed by Ras inhibitors.

Immunization with alum-collagen II complex suppresses the development of collagen-induced arthritis in rats by deviating the immune response.

A collagen peptide motif activates tyrosine kinase-dependent calcium signalling pathways in human osteoblast-like cells.

Changes in collagen phenotypes during progression and regression of cardiac hypertrophy.

Effect of advanced glycation end product-modified albumin on tissue factor expression by monocytes.
Role of oxidant stress and protein tyrosine kinase activation.

Promotion of enzyme altered foci in female rat 2,3,3',4,4',5-hexachlorobiphenyl.

Dioxin exposure and cancer risk: a 15-year mortality study after the "Seveso accident".

Mutational evidence for control of cell adhesion through integrin diffusion/clustering, independent of ligand binding.

Dissociation of LPA-induced cytoskeletal contraction from stress fiber formation by differential localization of RhoA.

Defective endogenous nitric oxide-mediated modulation of cellular respiration in canine skeletal muscle after the development of heart failure.

The epidemiology of soft tissue sarcoma.

Markers of masked iron deficiency and effectiveness of EPO therapy in chronic renal failure.

[4-chloro-m-cresol-induced contractures of skeletal muscle specimen from patients at risk for malignant hyperthermia].

Thyroid hormones in the pathogenesis of lung hypoplasia and immaturity induced in fetal rats by prenatal exposure to nitrofen.

4-Chloro-m-cresol test--a possible supplementary test for diagnosis of malignant hyperthermia susceptibility.

Catalase mediates acetaldehyde formation from ethanol in fetal and neonatal rat brain.

Mitochondrial toxins in models of neurodegenerative diseases. I: In vivo brain hydroxyl radical production during systemic MPTP treatment or following microdialysis infusion of methylpyridinium or azide ions.

HDL causes mesangial cell mitogenesis through a tyrosine kinase-dependent receptor mechanism.

Thiamine uptake in human intestinal biopsy specimens, including observations from a patient with acute thiamine deficiency.

Tumor-specific expression of cytochrome P450 CYP1B1.

T cell responses to human type II collagen in patients with rheumatoid arthritis and healthy controls.

Classification of malignant hyperthermia-equivocal patients by 4-chloro-M-cresol.

Brief communication: childhood leukemia in a residential small town near Barcelona.

Remodeling after myocardial infarction in humans is not associated with interstitial fibrosis of noninfarcted myocardium.

Antimitotic intervention with colchicine alters the outcome of o-DCB-induced hepatotoxicity in Fischer 344 rats.

Induction of cytochrome P450 1B1 and catechol estrogen metabolism in ACHN human renal adenocarcinoma cells.

PET imaging of brain tumor with [methyl-11C]choline.

Tyrosine phosphorylation in DNA damage and cell death in hypoxic injury to LLC-PK1 cells.

Altered in vivo toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C-SRC deficient mice.

Hyporesponsiveness of inflamed human gingival fibroblasts from patients with chronic periodontal diseases against cell surface components of *Porphyromonas gingivalis*.

Functional link between tyrosine phosphorylation and human serotonin transporter gene expression.

Altered intracellular distribution of daunorubicin in immature acute myeloid leukemia cells.

Expression of the aryl hydrocarbon receptor (AhR) and AhR nuclear translocator during chick cardiogenesis is consistent with 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced heart defects.

Cancer mortality among rice growers in Novara Province, northern Italy.

Tyrosine kinase dependent expression of TGF-beta induced by stretch in mesangial cells.

Pulmonary expression of vascular endothelial growth factor and myosin isoforms in rats with congenital diaphragmatic hernia.

Role of iron in ischemia-reperfusion oxidative injury of rat lungs.

Functional characterization of a distinct ryanodine receptor mutation in human malignant hyperthermia-susceptible muscle.

Myogenin expression is necessary for commitment to differentiation and is closely related to src tyrosine kinase activity in quail myoblasts transformed with Rous sarcoma virus.

The clinical pharmacokinetics of levofloxacin.

[Complete remission achieved by L-asparaginase, vincristine and prednisolone (LVP) therapy in secondary leukemia (M5a type) with an MLL gene rearrangement].

Expression of CYP1B1 in human adult and fetal tissues and differential inducibility of CYP1B1 and CYP1A1 by Ah receptor ligands in human placenta and cultured cells.

Selected other effects and TEFs.

Interactions between 2,3,7,8-TCDD and PCBs as tumor promoters: limitations of TEFs.

Pesticides poisonings in clinical and medicolegal aspect.

Dioxins and the Ah receptor: probes to uncover processes in neuroendocrine development.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and congeners in infants. A toxicokinetic model of human lifetime body burden by TCDD with special emphasis on its uptake by nutrition.

(G586V) substitutions in the alpha 1 and alpha 2 chains of collagen I: effect of alpha-chain stoichiometry on the phenotype of osteogenesis imperfecta?

Contribution of ATP-sensitive potassium channels to hypoxic hyperpolarization in rat hippocampal CA1 neurons in vitro.

Organochlorine exposure and risk for breast cancer.

Continuous exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin inhibits the growth of surgically induced endometriosis in the ovariectomized mouse treated with high dose estradiol.

Mortality and cancer incidence among sawmill workers exposed to chlorophenate wood preservatives.

Early life stage toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in zebrafish (*Danio rerio*).

Cytochrome P450 1A1 induction in rat lymphoid tissues following in vivo and in vitro exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin requires protein kinase C.

Modulation of TCDD-induced fetotoxicity and oxidative stress in embryonic and placental tissues of C57BL/6J mice by vitamin E succinate and ellagic acid.

Altered mechanical properties in aortic elastic tissue using glutaraldehyde/solvent solutions of various dielectric constant.

Gas chromatographic determination of residues of thyreostatic drugs in bovine muscle tissue using combined resin mediated methylation and extraction.

Mineral trioxide aggregate stimulates a biological response in human osteoblasts.

Is exposure to bacterial endotoxin a determinant of susceptibility to intoxication from xenobiotic agents?

Dose-response relationships for polyhalogenated dioxins and dibenzofurans following subchronic treatment in mice. I. CYP1A1 and CYP1A2 enzyme activity in liver, lung, and skin.

Inhibitory effects of genistein on ATP-sensitive K⁺ channels in rabbit portal vein smooth muscle.

Differential effect of hydrogen peroxide and superoxide anion on apoptosis and proliferation of vascular smooth muscle cells.

Differentiation and transforming growth factor-beta receptor down-regulation by collagen-alpha2beta1 integrin interaction is mediated by focal adhesion kinase and its downstream signals in murine osteoblastic cells.

Study of regulation of mitochondrial respiration in vivo. An analysis of influence of ADP diffusion and possible role of cytoskeleton.

Tissue factor pathway inhibitor in endothelial cells colocalizes with glycolipid microdomains/caveolae. Regulatory mechanism(s) of the anticoagulant properties of the endothelium.

Glypican-3 is a binding protein on the HepG2 cell surface for tissue factor pathway inhibitor.

Preliminary assessment of PCB risks to human and ecological health in the lower Passaic River.

Agrobacterium-mediated transformation of *Amaranthus hypochondriacus*: light- and tissue-specific expression of a pea chlorophyll a/b-binding protein promoter.

Transgenic orchardgrass (*Dactylis glomerata*) plants by direct embryogenesis from microprojectile bombarded leaf cells.

Cell- and tissue-specific metabolic activation of chemicals as determined by autoradiography: in vitro-in vivo correlations.

Percutaneous penetration of 2-phenoxyethanol through rat and human skin.

Deer antler does not represent a typical endochondral growth system: immunoidentification of collagen type X but little collagen type II in growing antler tissue.

Actions of 4-chloro-3-ethyl phenol on internal Ca²⁺ stores in vascular smooth muscle and endothelial cells.

There is temporal and spatial expression of alpha1 (IV), alpha2 (IV), alpha5 (IV), alpha6 (IV) collagen chains and beta1 integrins during the development of the basal lamina in an "in vitro" skin model.

Enhancement of plasminogen binding and fibrinolysis by chloropeptin I.

Cryopreservation of embryogenic tissue of a range of genotypes of sweet potato (*Ipomoea batatas* [L] Lam.) using an encapsulation protocol.

Purification and partial structural characterization of a fatty acid-binding protein from the liver of the South American armadillo *Chaetophractus villosus*.

Metabolism of 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) by human cytochrome P4501B1.

Serum transcriptionally regulates Na(+)-K(+)-ATPase gene expression in vascular smooth muscle cells.

Inhibition of oxidative phosphorylation, vascular tone, and [Ca²⁺]_i in the perfused rat tail artery.

Oxidative phosphorylation in myocardial mitochondria 'in situ': a calorimetric study on permeabilized cardiac muscle preparations.

Estimation of total collagen and types I and III collagen in canine rotator cuff tendons.

Active and passive compliance of the fetal bovine bladder.

Arsenic-induced changes in certain neurotransmitter levels and their recoveries following chelation in rat whole brain.

Association of muscle-specific kinase MuSK with the acetylcholine receptor in mammalian muscle.

Extension of long cellular processes of hepatic stellate cells cultured on extracellular type I collagen gel by microtubule assembly: observation utilizing time-lapse video-microscopy.

Immunochemical, ³²P-postlabeling, and GC/MS detection of 4-aminobiphenyl-DNA adducts in human peripheral lung in relation to metabolic activation pathways involving pulmonary N-oxidation, conjugation, and peroxidation.

Endothelial cell apoptosis is accelerated by inorganic iron and heat via an oxygen radical dependent mechanism.

Role of 3,4-dichlorophenyl methyl sulfone, a metabolite of o-dichlorobenzene, in the changes in hepatic microsomal drug-metabolizing enzymes caused by o-dichlorobenzene administration in rats.

Down-regulation of gap junctional intercellular communication between osteoblastic MC3T3-E1 cells by basic fibroblast growth factor and a phorbol ester (12-O-tetradecanoylphorbol-13-acetate).

Induction in human osteoblastic cells (SaOS2) of the early response genes fos, jun, and myc by the amino terminal fragment (ATF) of urokinase.

Bioaccumulation and lack of toxicity of octachlorodibenzofuran (OCDF) and octachlorodibenzo-p-dioxin (OCDD) to early-life stages of zebra fish (*Brachydanio rerio*).

Antiarrhythmic and electrophysiological effects of the novel KATP channel opener, rilmakalim, in rabbit cardiac cells.

A pharmacokinetic analysis of interspecies extrapolation in dioxin risk assessment.

Interaction of *Escherichia coli* heat-stable enterotoxin B with cultured human intestinal epithelial cells.

Role of CYP1A2 in hepatic sequestration of dioxin: studies using CYP1A2 knock-out mice.

Specific attenuation of the pressure-induced contraction of rat cerebral artery by herbimycin A.

Optimisation of somatic embryogenesis in fourteen cultivars of sweet potato [*Ipomoea batatas* (L.) Lam.].

Mitochondrial Respiration and Hemoglobin Gene Expression in Barley Aleurone Tissue.

Undersulfation of proteoglycan sulfate stimulates the expression of basic fibroblast growth factor and protein synthesis but suppresses replication of coronary smooth muscle cells.

Endotoxin induces endothelial barrier dysfunction through protein tyrosine phosphorylation.

Glucose transporter expression in L6 muscle cells: regulation through insulin- and stress-activated pathways.

bFGF induces BCK promoter-driven expression in muscle via increased binding of a nuclear protein.

Expression of liver functions following sub-lethal and non-lethal doses of allyl alcohol and acetaminophen in the rat.

Synaptic physiology and mitochondrial function in crayfish tonic and phasic motor neurons.

Induction of heat shock proteins by tyrosine kinase inhibitors in rat cardiomyocytes and myogenic cells confers protection against simulated ischemia.

Growth-related signaling in vascular smooth muscle cells is deregulated by TCDD during the G0/G1 transition.

Expression and characterization of recombinant rat parathyroid hormone-related peptide (1-141) and an amino-terminally-truncated analogue (38-141).

Angiotensin II stimulates mitogen-activated protein kinases and protein synthesis by a Ras-independent pathway in vascular smooth muscle cells.

First Report of Leaf Scald Disease and Ratoon Stunting Disease of Sugarcane in French Guyana.

Endothelial cells protect vascular smooth muscle cells from H₂O₂ attack.

Comparative biochemical analysis of sea urchin peristome and rat tail tendon collagen.

Influence of substituent of direct dye having bisphenylenebis(azo) skeletal structure on structure of nascent cellulose produced by *Acetobacter xylinum* [I]: different influence of direct red 28, blue 1 and 15 on nascent structure.

The involvement of reactive oxygen species and arachidonic acid in alpha 1-adrenoceptor-induced smooth muscle cell proliferation and migration.

The role of tyrosine phosphorylation in lipopolysaccharide- and zymosan-induced procoagulant activity and tissue factor expression in macrophages.

Separation of extracts from biological tissues into polycyclic aromatic hydrocarbon, polychlorinated biphenyl and polychlorinated dibenzo-p-dioxin/polychlorinated dibenzofuran fractions prior to analysis.

Synthesis of [9-¹⁴C]nonanoic acid via 2-thienyl(¹⁴CH₃)(cyano)cuprate and its oxidation by newborn piglet muscle strips.

High frequency production of embryos from liquid flask cultures of oilseed rape.

Angiotensin II activates the beta 1 isoform of phospholipase C in vascular smooth muscle cells.

Hrp12, a novel heat-responsive, tissue-specific, phosphorylated protein isolated from mouse liver.

Baseline studies in the Slave River, NWT, 1990-1994: Part II. Body burden contaminants in whole fish tissue and livers.

Oxidative stress mediates impairment of muscle function in transgenic mice with elevated level of wild-type Cu/Zn superoxide dismutase.

Variation in transformation frequencies among six common wheat cultivars through particle bombardment of scutellar tissues.

Multiplicity of antioxidant enzyme catalase in mouse liver cells.

Neuroprotective action of cycloheximide involves induction of bcl-2 and antioxidant pathways.

Intracellular calcium buffering declines in aging adrenergic nerves.

Synthesis and smooth muscle calcium channel effects of dialkyl 1,4-dihydro-2,6-dimethyl-4-aryl-3,5-pyridinedicarboxylates containing a nitron moiety in the 4-aryl substituent.

The relative susceptibility of animals and humans to the carcinogenic hazard posed by exposure to 2,3,7,8-TCDD: an analysis using standard and internal measures of dose.

Lipid extraction from blood and biological samples and concentrations of dioxin-like compounds.

AMP-deaminases from chicken and rabbit muscle: partial primary sequences of homologous 17-kDa CNBr fragments: autorecognition by rabbit anti-[chicken AMPD].

Increase of glycocalyx and altered lectin agglutination profiles of *Pasteurella haemolytica* A1 after incubation in bovine subcutaneous tissue chambers in vivo or in ruminant serum in vitro.

How knockout mouse lines will be used to study the role of drug-metabolizing enzymes and their receptors during reproduction and development, and in environmental toxicity, cancer, and oxidative stress.

Quantitation of collagen types I, III and V in tissue slices by capillary electrophoresis after cyanogen bromide solubilization.

Redox stress and hepatic DNA fragmentation induced by diquat in vivo are not accompanied by increased 8-hydroxydeoxyguanosine contents.

Identification of atrial-specific myosin heavy chain in cardiac muscle of adult chickens.

Effects of hypoxia on valve-closure time and bioaccumulation of 2,4,5-trichlorophenol by the freshwater clam *Sphaerium corneum* [L].

Aldose reductase induction: a novel response to oxidative stress of smooth muscle cells.

Death following intentional methyl bromide poisoning: toxicological data and literature review.

A continuous spectrophotometric assay for monoamine oxidase and related enzymes in tissue homogenates.

Polymerase chain reaction-based cloning of alkyl-dihydroxyacetonephosphate synthase complementary DNA from guinea pig liver.

Identification of the pH sensor for nucleotide binding in the uncoupling protein from brown adipose tissue.

Characterization of hepatic metallothionein expression in channel catfish (*Ictalurus punctatus*) by reverse transcriptase polymerase chain reaction.

Bioaccumulation profiles of polychlorinated biphenyls including coplanar congeners and possible toxicological implications in Baikal seal (*Phoca sibirica*).

Influences of altered phytohormone use on endogenous ABA and mRNA populations during white spruce (*Picea glauca*) somatic embryo culture.

Differential effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the expression of prostaglandin-H synthase isoenzymes in mouse tissues.

Topographic localization of calretinin, calbindin, VIP, substance P, CCK and metabotropic glutamate receptor immunoreactive neurons in the supramammillary and related areas of the rat.

DNA adduct formation in primary mouse embryo cells induced by 7H-dibenzo[c,g]carbazole and its organ-specific carcinogenic derivatives.

Reduced glutathione inhibits rabbit and rat skeletal muscle lactate dehydrogenase and prevents dinitrophenol induced extracellular acidification by an epithelial cell line.

[The use of the complexometric indicator glycine cresol red as a stain in neurohistology].

Effects of K⁺ channel inhibitors and antagonists on NS-004 evoked relaxations in guinea-pig isolated trachea.

Regulation of inducible nitric oxide synthase expression in L6 rat skeletal muscle cells.

Fluid flow induces enhancement of the Egr-1 mRNA level in osteoblast-like cells: involvement of tyrosine kinase and serum.

Suspected herbicide toxicosis in a dog.

Human bronchial smooth muscle responsiveness after in vitro exposure to oxidizing pollutants.

Action of the herbicide butachlor on cholinesterases in the freshwater snail *Pila globosa* (Swainson).

Acute, subchronic and chronic 2,4-dichlorophenoxyacetic acid (2,4-D) intoxication in rats.

Pesticide application and increased dioxin body burden in male and female agricultural workers in China.

No changes in behaviour, nigro-striatal system neurochemistry or neuronal cell death following toxic multiple oral paraquat administration to rats.

Cancer mortality in German male workers exposed to phenoxy herbicides and dioxins.

Pesticide applicators, biocides, and birth defects in rural Minnesota.

Experience with acute paraquat poisoning in Crete.

Vertebral deformity susceptibilities of marine fishes exposed to herbicide.

Construction of a physiologically based pharmacokinetic model for 2,4-dichlorophenoxyacetic acid dosimetry in the developing rabbit brain.

Detection of 1, N²-propanodeoxyguanosine adducts as potential endogenous DNA lesions in rodent and human tissues.

DNA damage induced in mouse tissues by organic wood preserving waste extracts as assayed by 32P-postlabeling.

Effects of paraquat on mitochondrial electron transport system and catecholamine contents in rat brain.

Paraquat causes S-phase arrest of rat liver and lung cells in vivo.

Effect of 3-aminotriazole on hyperthermia-mediated cardioprotection in rabbits.

The feeding value of soybeans fed to rats, chickens, catfish and dairy cattle is not altered by genetic incorporation of glyphosate tolerance.

Induction of micronuclei in haemocytes and gill cells of zebra mussels, *Dreissena polymorpha*, exposed to clastogens.

Metabolism and distribution of [2,3-¹⁴C]acrolein in Sprague-Dawley rats.

A phosphonate monoester hydrolase from *Burkholderia caryophylli* PG2982 is useful as a conditional lethal gene in plants.

Mechanism mediating basolateral transport of 2,4-dichlorophenoxyacetic acid in rat kidney.

Development of friable embryogenic callus and embryogenic suspension culture systems in cassava (*Manihot esculenta* Crantz).

Metabolic activation of 2,6-dichlorobenzonitrile, an olfactory-specific toxicant, by rat, rabbit, and human cytochromes P450.

Effect of pentachlorophenol on calcium accumulation in barnacle muscle cells.

Increases in tissue levels of ubiquinone in association with peroxisome proliferation.

Effect of oxidative insult on young and adult cardiac muscle cells in vitro.

Decreased liver type I 5'-deiodinase and increased brown adipose tissue type II 5'-deiodinase activity in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treated Long-Evans rats.

Mass spectrometric mapping of protein epitope structures of myocardial infarct markers myoglobin and troponin T.

Extraction and protein sequencing of immunoglobulin light chain from formalin-fixed cerebrovascular amyloid deposits.

Oxidative DNA damage induced by activation of polychlorinated biphenyls (PCBs): implications for PCB-induced oxidative stress in breast cancer.

Methyl iodide poisoning: report of two cases.

Variable clinical expression in a family with OI type IV due to deletion of three base pairs in COL1A1.

Developmental toxicity of Exell, a surfactant mixture, in rats and rabbits.

Interactive effects between 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,2',4,4',5,5'-hexachlorobiphenyl in female B6C3F1 mice: tissue distribution and tissue-specific enzyme induction.

Tyrosine phosphorylation is crucial for growth signaling by tissue inhibitors of metalloproteinases (TIMP-1 and TIMP-2).

150-kD oxygen-regulated protein is expressed in human atherosclerotic plaques and allows mononuclear phagocytes to withstand cellular stress on exposure to hypoxia and modified low density lipoprotein.

Increased concentrations of octachlorodibenzo-p-dioxin in cases with breast cancer--results from a case-control study.

Gaseous disinfection of *Cryptosporidium parvum* oocysts.

Functional interference between hypoxia and dioxin signal transduction pathways: competition for recruitment of the Arnt transcription factor.

Evaluating the antioxidant potential of new treatments for inflammatory bowel disease using a rat model of colitis.

Cause specific mortality and cancer incidence among employees exposed to 2,3,7,8-TCDD after a 1953 reactor accident.

Role of endothelium-derived nitric oxide in the modulation of canine myocardial mitochondrial respiration in vitro. Implications for the development of heart failure.

Photosensitization of uroporphyrin augments the ultraviolet A-induced synthesis of matrix metalloproteinases in human dermal fibroblasts.

Fulminant malignant hyperthermia associated with ketoacidotic diabetic coma.

Decreased pulmonary nitric oxide synthase activity in the rat model of congenital diaphragmatic hernia.

In ovo 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure in three avian species. 1. Effects on thyroid hormones and growth during the perinatal period.

Monoclonal antibody to single-stranded DNA is a specific and sensitive cellular marker of apoptosis.

Mechanisms of colon cancer binding to substratum and cells.

4-Chloro-m-cresol: a specific tool to distinguish between malignant hyperthermia-susceptible and normal muscle.

[The determination of toxic compounds with a dinitrophenol structure in the forensic chemical study of cadaveric material].

Diagnostic criteria for selenium toxicosis in aquatic birds: dietary exposure, tissue concentrations, and macroscopic effects.

In utero and lactational exposure of female Holtzman rats to 2,3,7,8-tetrachlorodibenzo-p-dioxin: modulation of the estrogen signal.

Cancer incidence and specific occupational exposures in the Swedish leather tanning industry: a cohort based case-control study.

Variable effects of tyrosine kinase inhibitors on avian osteoclastic activity and reduction of bone loss in ovariectomized rats.

Lung collagen cross-links in rats with experimentally induced pulmonary fibrosis.

Male sterility in transgenic tobacco plants induced by tapetum-specific deacetylation of the externally applied non-toxic compound N-acetyl-L-phosphinothricin.

Studies on the mechanism of hepatotoxicity of 4-methylphenol (p-cresol): effects of deuterium labeling and ring substitution.

Evaluation of toxicity and sex-related variation of PCB levels in Mediterranean striped dolphins affected by an epizootic.

Osteopontin activation of c-src in human melanoma cells requires the cytoplasmic domain of the integrin alpha v-subunit.

Promotion of endometriosis by 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats and mice: time-dose dependence and species comparison.

Cells in vivo and in vitro from osteopetrotic mice homozygous for c-src disruption show suppression of synthesis of osteopontin, a multifunctional extracellular matrix protein.

Detection of toluene in an adipoceratous body.

Synthesis of [11C-methyl]-alpha-aminoisobutyric acid (AIB).

Inhibition of Fc epsilon-RI-mediated activation of rat basophilic leukemia cells by Clostridium difficile toxin B (monoglucosyltransferase).

Supernumerary lumbar rib: manifestation of basic alteration in embryonic development of ribs.

Deletion of a Gly-Pro-Pro repeat in the pro alpha2(I) chain of procollagen I in a family with dominant osteogenesis imperfecta type IV.

Interaction of a recombinant form of apolipoprotein[a] with human fibroblasts and with the human hepatoma cell line HepG2.

Balloon angioplasty significantly increases collagen content but does not alter collagen subtype I/III ratios in the atherosclerotic rabbit iliac model.

The effect of intra-articular capsaicin on nerve fibres within the synovium of the rat knee joint.

Immunity to the G1 globular domain of the cartilage proteoglycan aggrecan can induce inflammatory erosive polyarthritis and spondylitis in BALB/c mice but immunity to G1 is inhibited by covalently bound keratan sulfate in vitro and in vivo.

Cell cycle defect in connection with oxygen and iron sensitivity in Fanconi anemia lymphoblastoid cells.

Altered contractility of rabbit penile corpus cavernosum smooth muscle by hypoxia.

Energy-ubiquitin-dependent muscle proteolysis during sepsis in rats is regulated by glucocorticoids.

Arsenite, but not cadmium, induces ornithine decarboxylase and heme oxygenase activity in rat liver: relevance to arsenic carcinogenesis.

Monoclonal antibody directed to a fibrinogen A alpha #529-539 epitope inhibits alpha-chain crosslinking by transglutaminases.

Effects of iron replenishment on iron, calcium, phosphorus and magnesium metabolism in iron-deficient rats.

Splice site mutation causing deletion of exon 21 sequences from the pro alpha 2(I) chain of type I collagen in a patient with severe dentinogenesis imperfecta but very mild osteogenesis imperfecta.

Cancers of skin, bone, connective tissues, brain, eye, thyroid and other specified and unspecified sites in Inuit.

Gly802Asp substitution in the pro alpha 2(I) collagen chain in a family with recurrent osteogenesis imperfecta due to paternal mosaicism.

Mutation in the carboxy-terminal propeptide of the Pro alpha 1(I) chain of type I collagen in a child with severe osteogenesis imperfecta (OI type III): possible implications for protein folding.

Comparative epitope mapping of antibodies to collagen in women with silicone breast implants, systemic lupus erythematosus and rheumatoid arthritis.

On the mechanism of the differential effects of NS004 and NS1608 in smooth muscle cells from guinea pig bladder.

Plant regeneration from somatic embryos of *Taxus brevifolia*.

Pharmacokinetic model of dioxin and furan levels in adipose tissue from sawmill work involving chlorophenolate fungicides.

Mitogen-activated protein kinase (ERK1/2) activation by shear stress and adhesion in endothelial cells. Essential role for a herbimycin-sensitive kinase.

Subcellular localization of TCDD differs between the liver, lungs, and kidneys after acute and subchronic exposure: species/dose comparisons and possible mechanism.

Basal metabolism of intraperitoneally injected carrier-free ⁷⁴As-labeled arsenate in rabbits.

Evidence that fibroblast growth factors 1 and 4 participate in regulation of cardiogenesis.

Stereoselective action of (R*,R*)-(+/-)-methyl-4-[2-[2-hydroxy-2-(3-chlorophenyl)ethylamino] propyl]-phenoxyacetic acid (BRL37344) on beta-adrenoceptors and metabolic chiral inversion.

Binding of tissue factor pathway inhibitor to cultured endothelial cells-influence of glycosaminoglycans.

Coagulation factors VII and X induce Ca²⁺ oscillations in Madin-Darby canine kidney cells only when proteolytically active.

Inducibility of cytochromes P-450 by dioxin in liver and extrahepatic tissues of the marmoset monkey (*Callithrix jacchus*).

Advancing age alters intracellular calcium buffering in rat adrenergic nerves.

TCDD endrin and lindane induced increases in lipid metabolites in maternal sera and amniotic fluids of pregnant C57BL/6J and DBA/2J mice.

SR Ca²⁺ pump heterogeneity in coronary artery: free radicals and IP₃-sensitive and -insensitive pools.

Rapid distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) to embryonic tissues in C57BL/6N mice and correlation with palatal uptake in vitro.

Inhibitory effect of tyrosine kinase inhibitors on antigen-induced tracheal contraction and histamine release in guinea pigs.

Tissue-specific 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible expression of human UDP-glucuronosyltransferase UGT1A6.

Subchronic dispositional and toxicological effects of arsenate administered in drinking water to mice.

Degradation of cross-linked fibrin by matrix metalloproteinase 3 (stromelysin 1): hydrolysis of the gamma Gly 404-Ala 405 peptide bond.

Higher concentrations of specific polychlorinated biphenyl congeners in adipose tissue from non-Hodgkin's lymphoma patients compared with controls without a malignant disease.

Lymphocyte adhesive interactions with cultured parotid salivary gland epithelial cells from rats.

Serum albumin is a specific inhibitor of apoptosis in human endothelial cells.

Human and rat airway smooth muscle responsiveness after ozone exposure in vitro.

Validation of precision-cut liver slices in dynamic organ culture as an in vitro model for studying CYP1A1 and CYP1A2 induction.

Additive interactions between pairs of polybrominated dibenzo-p-dioxin, dibenzofuran, and biphenyl congeners in a rainbow trout early life stage mortality bioassay.

Baculovirus-mediated expression and characterization of rat CYP2A3 and human CYP2a6: role in metabolic activation of nasal toxicants.

Freeze-induced shrinkage of individual cells and cell-to-cell propagation of intracellular ice in cell chains from salivary glands.

Plant regeneration in Kentucky bluegrass (*Poa pratensis* L.) via coleoptile tissue cultures.

TCDD, endrin and lindane induced oxidative stress in fetal and placental tissues of C57BL/6J and DBA/2J mice.

Gender differences in the mechanism of dioxin toxicity in rodents and in nonhuman primates.

Effects of photoreceptor metabolism on interstitial and glial cell pH in bee retina: evidence of a role for NH₄⁺.

Isolation and primary culture of rat cerebral microvascular endothelial cells for studying drug transport in vitro.

Differential regulation of mouse Ah receptor gene expression in cell lines of different tissue origins.

Epithelium-linked smooth muscle hyperresponsiveness in ferret tracheae exposed to acrolein.

2,3,7,8-Tetrachlorodibenzo-p-dioxin affects retinol esterification in rat hepatic stellate cells and kidney.

Cryopreservation of non-encapsulated embryogenic tissue of sweet potato (*Ipomoea batatas*).

Increased intracellular levels of calcitonin gene-related peptide-like immunoreactivity in pulmonary endocrine cells in an experimental model of congenital diaphragmatic hernia.

[Endothelin-stimulated proliferation of thoracic artery smooth muscle cells involves activation of mitogen-activated protein kinase].

Extracellular matrix is required for skeletal muscle differentiation but not myogenin expression.

Platelet-activating factor (PAF) induces the early tyrosine phosphorylation of focal adhesion kinase (p125FAK) in human endothelial cells.

Isolation and characterization of glutamine synthetase from the marine diatom *Skeletonema costatum*.

Efficient tissue repair underlies the resiliency of postnatally developing rats to chlordecone + CCl₄ hepatotoxicity.

Tumor necrosis factor alpha-induced vascular leakage involves PECAM1 phosphorylation.

Pharmacological study of atypical beta-adrenoceptors in rat esophageal smooth muscle.

[Two components of sodium-azide insensitive Mg²⁺,ATP-dependent Ca²⁺ transport in ureteral smooth muscle membrane structures].

Movement of carboxyfluorescein across retinal pigment epithelium-choroid.

Protein kinase C activation inhibits stress-induced synthesis of heat shock protein 27 in osteoblast-like cells: function of arachidonic acid.

Intestinal HT-29 cells with dysfunction of E-cadherin show increased pp60src activity and tyrosine phosphorylation of p120-catenin.

Transport pathway, maturation, and targetting of the vesicular stomatitis virus glycoprotein in skeletal muscle fibers.

Toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in two substrains of male Long-Evans rats after intravenous injection.

Fibroblast growth factor-2 stimulates embryonic cardiac mesenchymal cell proliferation.

The capability of rat colon tissue slices to metabolize the cooked-food carcinogen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine.

Interaction of a troponin I inhibitory peptide with both domains of troponin C.

Herbimycin A inhibits protein kinase C in vascular smooth muscle cells.

Acute ethanol administration induces oxidative changes in rat pancreatic tissue.

Relative potencies of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls derived from hepatic porphyrin accumulation in mice.

Comparison of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) disposition following pulmonary, oral, dermal, and parenteral exposures to rats.

The role of toxicology in the evaluation of new agrochemicals.

Movement of yeast cortical actin cytoskeleton visualized in vivo.

Expression and herbimycin A-sensitive localization of pp125FAK in retinal growth cones.

Differences in binding of epidermal growth factor to liver membranes of TCDD-resistant and TCDD-sensitive rats after a single dose of TCDD.

Modulation of Ca²⁺ channel activity by ATP metabolism and internal Mg²⁺ in guinea-pig basilar artery smooth muscle cells.

Cell kinetics of repair after allyl alcohol-induced liver necrosis in mice.

Mechanism of endothelial cell shape change and cytoskeletal remodeling in response to fluid shear stress.

Disposition characteristics of plasmid DNA in the single-pass rat liver perfusion system.

src-related tyrosine kinases regulate transcriptional activation of the interstitial collagenase gene, MMP-1, in interleukin-1-stimulated synovial fibroblasts.

Mechanical strain induces pp60src activation and translocation to cytoskeleton in fetal rat lung cells.

Acetylsalicylic acid enhances and synchronizes thidiazuron-induced somatic embryogenesis in geranium (*Pelargonium x hortorum* Bailey) tissue cultures.

Mammalian plasma and tissue-bound semicarbazide-sensitive amine oxidases: biochemical, pharmacological and toxicological aspects.

Analytical findings in a suicide involving sodium azide.

Osteoclast demise in the rat: physiological versus degenerative cell death.

Insulin receptor in *Aplysia* neurons: characterization, molecular cloning, and modulation of ion currents.

The aryl-hydrocarbon receptor, but not the aryl-hydrocarbon receptor nuclear translocator protein, is rapidly depleted in hepatic and nonhepatic culture cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Induction of CYP1A1 and ALDH-3 in lymphoid tissues from Fisher 344 rats exposed to 2,3,7,8-tetrachlorodibenzodioxin (TCDD).

Agrin-induced acetylcholine receptor clustering in mammalian muscle requires tyrosine phosphorylation.

Elimination of polychlorinated dibenzo-p-dioxins and dibenzofurans in occupationally exposed persons.

Affinity Labeling of the active site of rabbit muscle adenylosuccinate lyase by 2-[(4-bromo-2,3-dioxobutyl)thio] adenosine 5'-monophosphate.

Pharmacokinetics of TCDD in veterans of Operation Ranch Hand: 10-year follow-up.

Development of a caffeine breath test to measure cytochrome P450-1A activity in birds.

4-Chloro-m-cresol, a potent and specific activator of the skeletal muscle ryanodine receptor.

Rapid and repetitive plant regeneration in sweetpotato via somatic embryogenesis.

Concentrations of polychlorinated dibenzo-p-dioxins and dibenzofurans in human placental and fetal tissues from the U.S. and in placentas from Yu-Cheng exposed mothers.

Health risk assessment for inuit newborns exposed to dioxin-like compounds through breast feeding.

Radiosynthesis of [123I]N-methyl-4-iododexetimide and [123I]N-methyl-4-iodolevetimide: in vitro and in vivo characterisation of binding to muscarinic receptors in the rat heart.

Biochemical characterization of the effects of the benzodiazepine, midazolam, on mitochondrial electron transfer.

3,3',4,4'-tetrachloroazobenzene absorption, disposition, and metabolism in male Fischer 344 rats.

Hormonal regulation of S-adenosylmethionine synthase transcripts in pea ovaries.

Lysophosphatidic acid-induced neurite retraction in PC12 cells: control by phosphoinositide-Ca²⁺ signaling and Rho.

Synergistic action of NS-004 and internal Ca²⁺ concentration in modulating pulmonary artery K⁺ channels.

The acute and chronic effects of alcohol upon cardiac nucleotide status.

Maintenance of the K⁺ activity gradient in insect muscle compared in diptera and lepidoptera: contributions of metabolic and exchanger mechanisms.

Protective action of dehydroascorbic acid on the Ah receptor-dependent and receptor-independent induction of lipid peroxidation in adipose tissue of male guinea pig caused by TCDD administration.

Comparison of the toxicity of allyl alcohol, coumarin and menadione in precision-cut rat, guinea-pig, cynomolgus monkey and human liver slices.

Comparison of the expression of a plastidic chaperonin 60 in different plant tissues and under photosynthetic and non-photosynthetic conditions.

The effect of 2,4-dichlorophenol on lipid peroxidation in tissues of guinea pigs with different ascorbic acid intake.

Arsenic induces oxidant stress and NF-kappa B activation in cultured aortic endothelial cells.

Strain differences in tissue repair response to 1,2-dichlorobenzene.

Elucidating the mechanism of cortical microtubule reorientation in plant cells.

Dose-dependent kinetics and metabolism of 1,2-dichlorobenzene in rat: effect of pretreatment with phenobarbital.

Expression of hepatic pyruvate carboxylase mRNA in C57BL/6J Ah(b/b) and congenic Ah((d/d)) mice exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Aryl hydrocarbon receptor mRNA levels in different tissues of 2,3,7,8-Tetrachlorodibenzo-p-dioxin-responsive and nonresponsive mice.

Expression of abundant mRNAs during somatic embryogenesis of white spruce [*Picea glauca* (Moench) Voss].

Chick sensory neuronal growth cones distinguish fibronectin from laminin by making substratum contacts that resemble focal contacts.

Involvement of tyrosine phosphorylation in endothelial adhesion molecule induction.

Metabolism of [Des-Gly10,D-Trp6]LHRH ethylamide in rabbit nasal tissue.

A mechanistic model of effects of dioxin on thyroid hormones in the rat.

Tissue distribution after a single subcutaneous administration of 2,3,7,8-tetrabromodibenzo-p-dioxin in comparison with toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Wistar rats.

Effect of glutathione depletion on metallothionein synthesis induced by paraquat in mice.

Enhancement of paraquat toxicity by glutathione depletion in mice in vivo and in vitro.

Modifications of neurofilament proteins by possible metabolites of allyl chloride in vitro.

Acrolein-induced smooth muscle hyperresponsiveness and eicosanoid release in excised ferret tracheae.

Effects of acute 2,4-dichlorophenoxyacetic acid on cattle serum components and enzyme activities.

Enhancement of tissue lipoperoxidation in propanil-treated rats.

Toxicology of 2,4-dichlorophenoxyacetic acid (2,4-D) and its determination in serum and brain tissue using gas chromatography-electron-capture detection.

The role of free radicals in paraquat-induced corneal lesions.

Soft tissue sarcoma and non-Hodgkin's lymphoma in workers exposed to phenoxy herbicides, chlorophenols, and dioxins: two nested case-control studies.

The purported link between agent orange and cancer.

Developmental toxicity of the substituted phenylurea herbicide isoproturon in rats.

Toxicity of cotoran (fluometuron) in Desert sheep.

The metabolism and DNA binding of the cooked-food mutagen, 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) in precision-cut rat liver slices.

Paraquat--a superoxide generator--kills neurons in the rat spinal cord.

Determination of paraquat in biologic materials by a simplified solid phase extraction and spectrophotometry.

Serum biochemical and histopathological changes related to the hepatic function in pigs following atrazine treatment.

Agent Orange and the Vietnamese: the persistence of elevated dioxin levels in human tissues.

Rapid decreases in indigenous covalent DNA modifications (I-compounds) of male Fischer-344 rat liver DNA by diquat treatment.

Cancer induction by an organic arsenic compound, dimethylarsinic acid (cacodylic acid), in F344/DuCrj rats after pretreatment with five carcinogens.

The influence of glutathione and detoxifying enzymes on DNA damage induced by 2-alkenals in primary rat hepatocytes and human lymphoblastoid cells.

Acute-phase reactant proteins and antioxidants in rats intoxicated chronically with paraquat.

Toxicity of 3-methylindole, 1-nitronaphthalene and paraquat in precision-cut rat lung slices.

Exposure to polychlorinated dioxins and furans (PCDD/F) and mortality in a cohort of workers from a herbicide-producing plant in Hamburg, Federal Republic of Germany.

Pentachlorophenol accumulation in the freshwater mussels *Anodonta anatina* and *Pseudanodonta complanata*, and some physiological consequences of laboratory maintenance.

Cigarette smoke inhibits lung fibroblast proliferation and chemotaxis.

Mutations associated with amyotrophic lateral sclerosis convert superoxide dismutase from an antiapoptotic gene to a proapoptotic gene: studies in yeast and neural cells.

The acute effects of ethanol and acetaldehyde on the synthesis of mixed and contractile proteins of the jejunum.

[A microtitration variant of the latex agglutination reaction in the diagnosis of leprosy].

Antioxidative roles of metallothionein and manganese superoxide dismutase induced by tumor necrosis factor-alpha and interleukin-6.

Simple method for analysis of diquat in biological fluids and tissues by high-performance liquid chromatography.

Benzoyl-coenzyme A reductase (dearomatizing), a key enzyme of anaerobic aromatic metabolism. ATP dependence of the reaction, purification and some properties of the enzyme from *Thaueria aromatica* strain K172.

Tandem mass spectrometry of herbicide residues in lipid-rich tissue.

Gastric metabolism of ethanol in Syrian golden hamster.

Isolation and characterization of rat primary lung cells.

Effects of drinking pattern on the peak/trough blood concentrations in drinking water studies.

Protective effects of prostaglandin E2 on the paraquat-induced constriction of the fetal ductus arteriosus in the rat.

Oxidative stress in the plant tissue culture environment.

Metabolic activation of the olfactory toxicant, dichlobenil, in rat olfactory microsomes: comparative studies with p-nitrophenol.

The tyramine-labelled vesicular transporter for dopamine: a putative target of pesticides and neurotoxins.

Reorganization of microfilaments in protonemal tip cells of the moss *Ceratodon purpureus* during the phototropic response.

Diquat increases cysteine proteinase inhibitors greatly in rat plasma and tissues.

Metabolic deactivation of the herbicide thiazopyr by animal liver esterases.

Regulation of arylsulfate sulfotransferase from a human intestinal bacterium by nucleotides and magnesium ion.

Type 1 collagen synthesis by skin fibroblasts from 17 patients with osteogenesis imperfecta type III.

Nerve growth factor prevents apoptosis of rat peritoneal mast cells through the trk proto-oncogene receptor.

Biologically bounded risk assessment for receptor-mediated nongenotoxic carcinogens.

Flow sorting of the Y sex chromosome in the dioecious plant *Melandrium album*.

Expression of iNOS in cultured rat pulmonary artery smooth muscle cells is inhibited by the heat shock response.

Fibroblasts isolated after fibrotic lung injury induce apoptosis of alveolar epithelial cells in vitro.

Tissue-specific effects of 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) on the activity of phosphoenolpyruvate carboxykinase (PEPCK) in rats.

PPAR: a mediator of peroxisome proliferator action.

Ornithine decarboxylase- and ras-induced cell transformations: reversal by protein tyrosine kinase inhibitors and role of pp130CAS.

Isolation of leukocytes infiltrating the islets of Langerhans of diabetes-prone mice for flow cytometric analysis.

Collagen type in dysfunctional temporomandibular joint disks.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on anti-CD3-induced changes in T-cell subsets and cytokine production.

Effect of orthovanadate on commitment of avian myoblasts transformed with Rous sarcoma virus to myogenic differentiation.

[Fatal sodium azide poisoning in a hospital: a preventable accident].

Organochlorine compounds and estrogen-related cancers in women.

Quantitative analysis of collagen and collagen subtypes I, III, and V in human pancreatic cancer, tumor-associated chronic pancreatitis, and alcoholic chronic pancreatitis.

Immune response to *Schistosoma mansoni* phosphoglycerate kinase during natural and experimental infection: identification of a schistosome-specific B-cell epitope.

Anti-collagen antibodies in systemic sclerosis and in primary Raynaud's phenomenon.

Persistence of TCDD-induced hepatic cell proliferation and growth of enzyme altered foci after chronic exposure followed by cessation of treatment in DEN initiated female rats.

Substitutions of aspartic acid for glycine-220 and of arginine for glycine-664 in the triple helix of the pro alpha 1(I) chain of type I procollagen produce lethal osteogenesis imperfecta and disrupt the ability of collagen fibrils to incorporate crystalline hydroxyapatite.

Mycotrienins. A new class of potent inhibitors of osteoclastic bone resorption.

Altered glycine transport by cerebral tissue and decreased Na⁺ and Ca⁺⁺ pump activities during organophosphorus-ester-induced delayed neurotoxicity development period.

Adaptation of Ehrlich ascites carcinoma cells to energy deprivation in vivo can be associated with heat shock protein accumulation.

Dietary exposure of mink to carp from Saginaw Bay, Michigan: 2. Hematology and liver pathology.

De novo mutation in the mitochondrial ATP synthase subunit 6 gene (T8993G) with rapid segregation resulting in Leigh syndrome in the offspring.

Identification and characterization of a major tolerogenic T-cell epitope of type II collagen that suppresses arthritis in B10.RIII mice.

Expression of cytokine mRNA in human melanoma tissues.

Negative selection in hepatic tumor promotion in relation to cancer risk assessment.

Free radical formation in autopsy samples of Alzheimer and control cortex.

Physiological and histological recovery of the olfactory mucosa of the frog after a dichlobenil injection.

Distribution of microsomal epoxide hydrolase and glutathione S-transferase in the rat olfactory mucosa: relevance to distribution of lesions caused by systemically-administered olfactory toxicants.

In utero 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) alters reproductive morphology and function in female rat offspring.

Possible involvement of focal adhesion kinase, p125FAK, in osteoclastic bone resorption.

Organochlorine residues in human breast milk: analysis through a sentinel practice network.

Large secretory structures at the cell surface imaged with scanning force microscopy.

Human hepatoma cell mutant defective in cell surface protein trafficking.

Type I collagen biosynthesis by skin fibroblasts from patients with idiopathic juvenile osteoporosis.

Effect of antibodies to membrane skeletal proteins on the shape of erythrocytes and their ability to respond to shape-modulating agents. Important role of 4.1 protein in the determination/maintenance of the discoid shape of erythrocytes.

Radiosyntheses of labeled beta-pseudothymidine ([C-11]- and [H-3]methyl) and its biodistribution and metabolism in normal and tumored mice.

The mechanism of action of the two-layer cold storage method in canine pancreas preservation-- protection of pancreatic microvascular endothelium.

Inhibition of apoptosis during 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated tumour promotion in rat liver.

Adipose tissue concentrations of dioxins and dibenzofurans in patients with malignant lymphoproliferative diseases and in patients without a malignant disease.

Dioxin--an analysis of the major human studies: comparison with animal-based cancer risks.

Alternative models for low dose-response analysis of biochemical and immunological endpoints for tetrachlorodibenzo-p-dioxin.

The role of protein kinase in human synovial fibroblast growth.

Spreading and focal contact formation of human melanoma cells in response to the stimulation of both melanoma-associated proteoglycan (NG2) and alpha 4 beta 1 integrin.

Immune system impairment and hepatic fibrosis in mice lacking the dioxin-binding Ah receptor.

Subchronic dose-response study of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats.

Postischemic proximal tubular resistance to oxidant stress and Ca²⁺ ionophore-induced attack. Implications for reperfusion injury.

Influence of five methylsulphonyl PCB congeners on frequency of micronucleated cells in cultured human lymphocytes by cytokinesis block method.

Identity and pathogenesis of stomach tumors in Sprague-Dawley rats associated with the dietary administration of butachlor.

Induction of endometriosis in mice: a new model sensitive to estrogen.

Workers' response to risk notification.

Presentation of cartilage proteoglycan to a T cell hybridoma derived from a mouse with proteoglycan-induced arthritis.

Antibody reactivity to mycobacterial 65 kDa heat shock protein: relevance to autoimmunity.

Variation in the expression and/or phosphorylation of the human low molecular weight stress protein during in vitro cell differentiation.

Activation of mesangial cells by the phosphatase inhibitor vanadate. Potential implications for diabetic nephropathy.

Exposure to TCDD during development permanently alters reproductive function in male Long Evans rats and hamsters: reduced ejaculated and epididymal sperm numbers and sex accessory gland weights in offspring with normal androgenic status.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) distribution and cytochrome P4501A induction in young adult and senescent male mice.

Local and remote matrix responses to chondrocyte-laden collagen scaffold implantation in extensive articular cartilage defects.

[The influence of 2,4-dinitrophenol on the temperature effect of muscle contraction in experimental hyperthyroidism].

A novel application of a competitive binding model in dioxin risk assessment.

A radiographic, morphologic, biochemical and molecular analysis of a case of achondrogenesis type II resulting from substitution for a glycine residue (Gly691-->Arg) in the type II collagen trimer.

Host resistance to *Trichinella spiralis* infection in rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Embryonic cell death patterns associated with nitrofen-induced congenital diaphragmatic hernia.

Effect of epidermal growth factor on cadherin-mediated adhesion in a human oesophageal cancer cell line.

Role of the lung in accumulation and metabolism of xenobiotic compounds--implications for chemically induced toxicity.

Characterization of sugar receptor expression by neoglycoproteins in oral and oropharyngeal squamous cell carcinomas.

Differential effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the "adipose-type" and "brain-type" glucose transporters in mice.

Use of toxic equivalency factors for risk assessment for dioxins and related compounds.

Differential effects of the BKCa channel openers NS004 and NS1608 in porcine coronary arterial cells.

Nitric oxide. An important signaling mechanism between vascular endothelium and parenchymal cells in the regulation of oxygen consumption.

Lung retention and bioavailability of arsenic after single intratracheal administration of sodium arsenite, sodium arsenate, fly ash and copper smelter dust in the hamster.

Cryopreservation of embryogenic tissue of sweet potato (*Ipomoea batatas*): use of sucrose and dehydration for cryoprotection.

Plant regeneration of grapevine (*Vitis* sp.) protoplasts isolated from embryogenic tissue.

Differential alcohol dehydrogenase and malate dehydrogenase isozyme expression in long-term callus tissue cultures of *Cereus peruvianus* (Cactaceae).

Control of N-cadherin-mediated intercellular adhesion in migrating neural crest cells in vitro.

Receptor-mediated toxicity.

Interleukin-1 beta induces interstitial collagenase gene expression and protein secretion in renal mesangial cells.

An attempt to explain interindividual variability in 24-h urinary excretion of inorganic arsenic metabolites by C57 BL/6J mice.

Thrombin stimulates phosphorylation of insulin-like growth factor-1 receptor, insulin receptor substrate-1, and phospholipase C-gamma 1 in rat aortic smooth muscle cells.

N-acetylcysteine pretreatment attenuates paraquat-induced lung leak in rats.

Effects of the protein tyrosine phosphatase inhibitor phenylarsine oxide on excision-activated calcium channels in *Lymnaea* neurons.

Rainbow trout hepatic mixed-function oxygenase induction by polychlorinated dibenzo-p-dioxins (PCDDs) as a function of time and tissue concentration.

Comparative assessment of metabolic enzyme levels in macrophage populations of the F344 rat.

Biotransformation of all-trans-retinol and all-trans-retinal to all-trans-retinoic acid in rat conceptual homogenates.

Regulation by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) of the DNA binding activity of transcriptional factors via nuclear protein phosphorylation in guinea pig adipose tissue.

Reproductive effects in birds exposed to pesticides and industrial chemicals.

Evaluation of the biodistribution and in vivo biochemistry of ^{99m}Tc-cysteine and ⁹⁹/_{99m}Tc-cysteine complexes--a potential renal imaging agent.

[O-methyl-¹¹C]beta-CIT-FP, a potential radioligand for quantitation of the dopamine transporter: preparation, autoradiography, metabolite studies, and positron emission tomography examinations.

Toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) to the human thymus after implantation in SCID mice.

In utero and lactational exposure of the male rat to 2,3,7,8-tetrachlorodibenzo-p-dioxin: impaired prostate growth and development without inhibited androgen production.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces diverse retinoic acid metabolites in multiple tissues of the Sprague-Dawley rat.

Lymphocyte adhesive interactions with lacrimal gland acinar epithelial cells in primary culture.

Tyrosine kinase inhibitors inhibit multiple steps of the cell cycle of vascular smooth muscle cells.

Influence of salinity on copper and azide toxicity to larval topmelt *Atherinops affinis* (Ayres).

Involvement of a tyrosine kinase pathway in the growth-promoting effects of angiotensin II on aortic smooth muscle cells.

Mechanisms of nucleobase transport in rabbit choroid plexus. Evidence for a Na(+)-dependent nucleobase transporter with broad substrate selectivity.

The thymus atrophy inducing organotin compound DBTC stimulates TcR alpha beta-CD3 signalling in immature rat thymocytes.

Transcriptional regulation of the collagenase gene by basic fibroblast growth factor in osteoblastic MC3T3-E1 cells.

Adipose-tissue concentrations of dioxins and dibenzofurans in potentially exposed patients with malignant-lymphoma or sarcoma.

Neuropeptide YY1 receptors-mediated increase in intracellular Ca²⁺ concentration via phospholipase C-dependent pathway in porcine aortic smooth muscle cells.

Effects of monoisoamyl meso-2,3-dimercaptosuccinate on arsenite-induced maternal and developmental toxicity in mice.

[Energy metabolism of lymphocytes during bone tissue regeneration].

A comparison of the effects of SCA40, NS 004 and NS 1619 on large conductance Ca(2+)-activated K⁺ channels in bovine tracheal smooth muscle cells in culture.

Changes associated with tyrosine phosphorylation during short-term hypoxia in retinal microvascular endothelial cells in vitro.

Modulation of cardiac M2 muscarinic receptor binding by progesterone-related steroids.

Characterization of Ca²⁺/calmodulin-dependent protein kinase II from smooth muscle.

Cytoskeletal regulation of Caco-2 intestinal monolayer paracellular permeability.

Quantification of lipid peroxidation in tissue extracts based on Fe(III)xylene orange complex formation.

Extensive interactions between troponins C and I. Zero-length cross-linking of troponin I and acetylated troponin C.

Calcium dependent K-channels in guinea pig and human urinary bladder.

Xenobiotic metabolism in humans during early pregnancy: peroxidase-mediated oxidation and bioactivation of 2-aminofluorene.

Cyclophosphamide: review of its mutagenicity for an assessment of potential germ cell risks.

Toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats including placental and lactational transfer to fetuses and neonates.

Immunoquantification of type I, III, IV and V collagen in small samples of human lung parenchyma.

Integrin-dependent tyrosine phosphorylation in corneal fibroblasts.

Levels of pollutants and their metabolites: exposures to organic substances.

Somatic embryogenesis and plant regeneration in tissue cultures of radish (*Raphanus sativus* L.).

Mechanism of uptake of technetium-tetrofosmin. II: Uptake into isolated adult rat heart mitochondria.

Effects of P2-purinoceptor antagonists on ecto-nucleotidase activity of guinea-pig vas deferens cultured smooth muscle cells.

Isomer-specific analysis of polychlorinated biphenyls and 2,3,7,8-tetrachlorodibenzo-p-dioxin equivalents (TEQs) in red fox and human adipose tissue from central Italy.

Phosphatidylinositol 3-kinase and the actin network are not required for the stimulation of glucose transport caused by mitochondrial uncoupling: comparison with insulin action.

The effect of N-ethylmaleimide on the Na(+)-dependent nucleoside transporter (N3) in rabbit choroid plexus.

Glutathione S-transferase 8-8 is localized in smooth muscle cells of rat aorta and is induced in an experimental model of atherosclerosis.

Temperature regulation and metabolism in rats exposed perinatally to dioxin: permanent change in regulated body temperature?

A stereotypic, transplantable liver tissue-culture system.

Rat CYP1B1: an adrenal cytochrome P450 that exhibits sex-dependent expression in livers and kidneys of TCDD-treated animals.

Relative potencies of induction of hepatic drug-metabolizing enzyme genes by individual PCB congeners.

A novel type of cell death of lymphocytes induced by a monoclonal antibody without participation of complement.

Thrombin induces the preproendothelin-1 gene in endothelial cells by a protein tyrosine kinase-linked mechanism.

Phosphorylation and inactivation of rat heart glycogen synthase by cAMP-dependent and cAMP-independent protein kinases.

Activation of ATP-dependent K⁺ channels by metabolic poisoning in adult mouse skeletal muscle: role of intracellular Mg⁽²⁺⁾ and pH.

Immunocytochemical investigation of the in vivo endocytosis by renal tubular epithelial cells.

A peptide, ALTE, within the fimbrial subunit protein from *Porphyromonas gingivalis*, induces production of interleukin 6, gene expression and protein phosphorylation in human peripheral blood mononuclear cells.

Characterization of the Ah receptor from human placental tissue.

Inhibition of lecithin: cholesterol acyltransferase activity in human blood plasma by cigarette smoke extract and reactive aldehydes.

Identification of a rat adrenal cytochrome P450 active in polycyclic hydrocarbon metabolism as rat CYP1B1. Demonstration of a unique tissue-specific pattern of hormonal and aryl hydrocarbon receptor-linked regulation.

Hypoxia-mediated induction of acidic/basic fibroblast growth factor and platelet-derived growth factor in mononuclear phagocytes stimulates growth of hypoxic endothelial cells.

Potency of mixtures of polychlorinated biphenyls as inducers of dioxin receptor-regulated CYP1A activity in rat hepatocytes and H4IIE cells.

Distribution, metabolism and excretion of pentachloroanisole in the beagle dog and miniature pig.

Vascular smooth muscle cell heme oxygenases generate guanylyl cyclase-stimulatory carbon monoxide.

Chronic UVB- and all-trans retinoic-acid-induced qualitative and quantitative changes in hairless mouse skin.

Comparative metabolism and toxicity of dichlorobenzenes in Sprague-Dawley, Fischer-344 and human liver slices.

Identification of two 17-kDa rat parotid gland phosphoproteins, subjects for dephosphorylation upon beta-adrenergic stimulation, as destrin- and cofilin-like proteins.

Metaanalysis of 4 Swedish case-control studies on exposure to pesticides as risk-factor for soft-tissue sarcoma including the relation to tumor-localization and histopathological type.

Evidence of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced tissue damage in fetal and placental tissues and changes in amniotic fluid lipid metabolites of pregnant CF1 mice.

Effects of the herbicide chlorthiamid on the olfactory mucosa.

Indices of TCDD exposure and TCDD body burden in veterans of Operation Ranch Hand.

An in vitro method for determination of tissue partition coefficients of non-volatile chemicals such as 2,3,7,8-tetrachlorodibenzo-p-dioxin and estradiol.

Expression of xenobiotic-metabolizing enzymes in cultured rat tracheal epithelial cells.

Oxidation and reduction of cytochrome c by mitochondrial enzymes of *Setaria cervi*.

Workshop on perinatal exposure to dioxin-like compounds. V. Immunologic effects.

Mechanism for drug absorption from rat-liver surface membrane: effect of dose and transport inhibitors on the pharmacokinetics of phenol red.

Protein tyrosine kinase activation is required for LPS and PMA induction of tissue factor mRNA in human blood monocytes.

Dose-response relationships of tissue distribution and induction of CYP1A1 and CYP1A2 enzymatic activities following acute exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice.

Burn injury stimulates multiple proteolytic pathways in skeletal muscle, including the ubiquitin-energy-dependent pathway.

Arsenic increased lipid peroxidation in rat tissues by a mechanism independent of glutathione levels.

Fe(2+)-mediated binding of serotonin and dopamine to skeletal muscle actin: resemblance to serotonin binding proteins.

Regulation of cytochrome P4501A1 gene expression in vascular smooth muscle cells through aryl hydrocarbon receptor-mediated signal transduction requires a protein synthesis inhibitor.

Human chorionic gonadotropin protects Leydig cell function against 2,3,7,8-tetrachlorodibenzo-p-dioxin in adult rats: role of Leydig cell cytoplasmic volume.

Dynorphin-immunoreactive neurons in the rat nucleus accumbens: ultrastructure and synaptic input from terminals containing substance P and/or dynorphin.

Tumor necrosis factor-alpha production induced by viruses and by lipopolysaccharides in macrophages: similarities and differences.

Olfactory toxicity of methyl iodide in the rat.

Substrate-specificity of mammalian tissue-bound semicarbazide-sensitive amine oxidase.

NCAM polypeptides in heart development: association with Z discs of forms that contain the muscle-specific domain.

Fish oil enhances pentachlorobenzene metabolism and reduces its accumulation in rats.

Amino acid sequence of C-terminal 17 kDa CNBr-fragment of Akazara scallop troponin-I.

Carbamylation decreases the cytotoxicity but not the drug-carrier properties of polylysines.

Four generation reproductive toxicity study with 2,3,7,8-tetrachlorodibenzo-P-dioxin (TCDD) in rats. I. Toxicokinetic variations in dams and offspring.

Peroxidative xenobiotic oxidation by partially purified peroxidase and lipoxigenase from human fetal tissues at 10 weeks of gestation.

Mechanisms controlling nitric oxide synthesis in osteoblasts.

Iron(II) is a modulator of ryanodine-sensitive calcium channels of cardiac muscle sarcoplasmic reticulum.

Effect of sulfhydryl compounds and glutathione depletion on rat heart myocyte toxicity induced by 4-hydroperoxycyclophosphamide and acrolein in vitro.

Body size and the toxicokinetics of trifluralin in rainbow trout.

Sclerodermatous syndrome after occupational exposure to herbicides--response to systemic steroids.

Arsenic-related Bowen's disease and paraquat-related skin cancerous lesions show no detectable ras and p53 gene alterations.

Characterization of three yeast copper-zinc superoxide dismutase mutants analogous to those coded for in familial amyotrophic lateral sclerosis.

The Chlorella virus adenine methyltransferase gene promoter is a strong promoter in plants.

Jasmonate-inducible expression of a potato cathepsin D inhibitor-GUS gene fusion in tobacco cells.

The site of elevated vascular resistance in early paraquat lungs: a morphometric study of pulmonary arteries.

Acute 2,4-dichlorophenoxyacetic acid intoxication in cattle.

Effect of selenium deficiency and glutathione-modulating agents on diquat toxicity and lipid peroxidation in rats.

Nitric oxide as a mediator of oxidant lung injury due to paraquat.

Paraquat induces irreversible actin cytoskeleton disruption in cultured human lung cells.

Mortality and cancer morbidity of Finnish chlorophenoxy herbicide applicators: an 18-year prospective follow-up.

Atrazine toxicity on hydromineral balance of fish, *Tilapia mossambicus*.

Remodeling of the alveolar structure in the paraquat lung of humans: a morphometric study.

Studies on the neuromuscular blocking action of commercial paraquat in mouse phrenic nerve-diaphragm.

The use of human lung slices in toxicology.

Diagnosis and treatment of soft tissue sarcomas in adults.

Nitric oxide mediates oxidant tissue injury caused by paraquat and xanthine oxidase.

Regulation of antioxidant enzymes in lung after oxidant injury.

Glufosinate ammonium--some aspects of its mode of action in mammals.

Neurologic health outcomes and Agent Orange: Institute of Medicine report.

Potentiation of oxidant-induced toxicity in hamster lung slices by dimethylthiourea.

Assessment of lipid peroxidation associated with lung damage induced by oxidative stress. In vivo and in vitro studies.

Evidence for redox cycling of diquat in rat small intestine.

Fatal overdose of 2,4-dichlorophenoxyacetic acid (2,4-D).

Acute intramuscular injection of oils or the oleic acid component protects mice against paraquat lethality.

[Alteration of lipid peroxidation and the activity of peroxide metabolism enzymes in the liver, kidney and lung following the administration of paraquat in mice].

Polychlorinated biphenyl levels in the tissues of exposed and nonexposed humans.

Different distribution of paraquat and diquat in human poisoning cases after ingestion of a combined herbicide.

[The role of biotransformation in assessing the toxicological risk from pesticides].

Environmental behavior of bentazon herbicide.

Comparison of dibenzodioxin levels in blood and milk in agricultural workers and others following pentachlorophenol exposure in China.

Antioxidant status in skeletal muscle and plasma of rats treated with ethanol.

Histochemical demonstration of hydrogen peroxide production by leukocytes in fixed-frozen tissue sections of inflammatory lesions.

In vivo hydrogen peroxide production in rat remnant kidney.

Human bronchial smooth muscle responsiveness after in vitro exposure to acrolein.

Pharmacokinetic modeling of 2,4-dichlorophenoxyacetic acid (2,4-D) in rat and in rabbit brain following single dose administration.

Disposition and metabolism of radiolabelled pentachloroanisole in rats and rabbits.

Reduction of thyroxine uptake into cerebrospinal fluid and rat brain by hexachlorobenzene and pentachlorophenol.

Characterization of polyamine transport in rat aortic smooth muscle cells.

Putrescine and paraquat uptake in human lung slices and isolated type II pneumocytes.

The predictive accuracy of in vitro measurements for the dermal absorption of a lipophilic penetrant (fluazifop-butyl) through rat and human skin.

Correlation between dioxin levels in adipose tissue and estimated exposure to Agent Orange in south Vietnamese residents.

Effects of ethanol on pharmacokinetics and intestinal absorption of paraquat in animals.

Aldose reductase-catalyzed reduction of acrolein: implications in cyclophosphamide toxicity.

Metabolic fate of S,S,S-tributyl phosphorotrithioate (DEF) in the lactating goat.

Immunogold electron microscopic localization of timothy grass (*Phleum pratense*) pollen major allergens Phl p I and Phl p V after anhydrous fixation in acrolein vapor.

Fertile transgenic wheat from microprojectile bombardment of scutellar tissue.

Hepatocyte growth factor/scatter factor induces tyrosine phosphorylation of focal adhesion kinase (p125FAK) and promotes migration and invasion by oral squamous cell carcinoma cells.

Sepsis stimulates nonlysosomal, energy-dependent proteolysis and increases ubiquitin mRNA levels in rat skeletal muscle.

Expression, in cartilage, of a 7-amino-acid deletion in type II collagen from two unrelated individuals with Kniest dysplasia.

Short-term toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in laboratory animals: effects, mechanisms, and animal models.

Antibodies to collagen: comparative epitope mapping in women with silicone breast implants, systemic lupus erythematosus and rheumatoid arthritis.

Patterns of tyrosine phosphorylation differ in vascular hypertrophy and hyperplasia.

Inhibition of mammalian protoporphyrinogen oxidase by acifluorfen.

Alveolar epithelial composition and architecture of the late fetal pulmonary acinus: an immunocytochemical and morphometric study in a rat model of pulmonary hypoplasia and congenital diaphragmatic hernia.

The mechanism of dioxin toxicity: relationship to risk assessment.

Menière's disease: role of antibodies against basement membrane antigens.

Extracellular matrix remodeling after balloon angioplasty injury in a rabbit model of restenosis.

Can cohort studies detect any human cancer excess that may result from exposure to dioxin? Maybe.

Reaction of inflamed periapical tissue to intracanal medicaments and root canal sealers.

A case of germinal center formation by CD45RO T and CD20 B lymphocytes in rheumatoid arthritic subchondral bone: proposal for a two-compartment model of immune-mediated disease with implications for immunotherapeutic strategies.

Interactive regulation of Ah and glucocorticoid receptors in the synergistic induction of cleft palate by 2,3,7,8-tetrachlorodibenzo-p-dioxin and hydrocortisone.

Hypoxia induces the synthesis of tropomyosin in cultured porcine pulmonary artery endothelial cells.

Hypoxic stimulation of vascular endothelial growth factor expression in vitro and in vivo.

Analgesic effects of callus culture extracts from selected species of *Phyllanthus* in mice.

Effect of beraprost sodium on changes in action potentials during hypoxia as compared with propranolol, diltiazem and glibenclamide in guinea-pig ventricular muscle.

Coordinate changes in C protein and myosin expression during skeletal muscle hypertrophy.

Modulation of nucleocytosolic $[Ca^{2+}]$ gradient in smooth muscle by protein phosphorylation.

Alteration of intracellular Ca²⁺ transients in COS-7 cells transfected with the cDNA encoding skeletal-muscle ryanodine receptor carrying a mutation associated with malignant hyperthermia.

Toxic potency of 3,3',4,4',5-pentachlorobiphenyl relative to and in combination with 2,3,7,8-tetrachlorodibenzo-p-dioxin in a subchronic feeding study in the rat.

Cancer incidence and mortality among Swedish leather tanners.

Synthesis and tissue biodistribution of [ω -¹¹C]palmitic acid. A novel PET imaging agent for cardiac fatty acid metabolism.

Chloracne. Some recent issues.

Postischemic inhibition of cerebral cortex pyruvate dehydrogenase.

Tendon degeneration and chronic shoulder pain: changes in the collagen composition of the human rotator cuff tendons in rotator cuff tendinitis.

Apoptosis and chemical carcinogenesis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced thymic atrophy and lymphocyte stem cell alterations by mechanisms independent of the estrogen receptor.

A method for the high-level expression of a parathyroid hormone analog in *Escherichia coli*.

Coxsackievirus B3 infection alters the uptake of 2,3,7,8-tetrachlorodibenzo-p-dioxin into various tissues of the mouse.

Substitution of an aspartic acid for glycine 700 in the alpha 2(I) chain of type I collagen in a recurrent lethal type II osteogenesis imperfecta dramatically affects the mineralization of bone.

Human NAD(P)H:quinone oxidoreductase2. Gene structure, activity, and tissue-specific expression.

Possible risk of endometriosis for Seveso, Italy, residents: an assessment of exposure to dioxin.

Short and long term effects of cytoskeleton-disrupting drugs on cytochrome P450 Cyp1a-1 induction in murine hepatoma 1c1c7 cells: suppression by the microtubule inhibitor nocodazole.

2,3,7,8-TCDD and 2,3,7,8-TCDF in blue crabs and American lobsters from the Hudson-Raritan estuary and the New York Bight.

Reoxygenation-induced relaxation of coronary arteries. A novel endothelium-dependent mechanism.

Factors that influence the formation and stability of hydrated ferrous sulfate in coal dusts. Possible relation to the emphysema of coal miners.

Post mortem diagnosis of *Mycobacterium bovis* infection in cattle.

[The mechanism of articular cartilage degeneration in osteoarthritis].

Substitution of cysteine for glycine-946 in the alpha 1(I) chain of type I procollagen causes lethal osteogenesis imperfecta.

Identification of antibody epitopes in the CB-11 peptide of bovine type II collagen recognized by sera from arthritis-susceptible and -resistant rhesus monkeys.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-induced changes in glucose transporting activity in guinea pigs, mice, and rats in vivo and in vitro.

Evidence that c-src is involved in the process of osteoclastic bone resorption.

2,3,7,8-Tetrachlorodibenzo-p-dioxin reduces the number, size, and organelle content of Leydig cells in adult rat testes.

Assessment of host resistance to *Trichinella spiralis* in mice following preinfection exposure to 2,3,7,8-TCDD.

Increased native chemiluminescence in granulocytes isolated from synovial fluid and peripheral blood of patients with rheumatoid arthritis.

Testing the metabolic hypothesis of O₂ chemoreception in the cat carotid body in vitro.

Heat shock glycoprotein GP50: product of the retinoic acid-inducible J6 gene.

Decreased clearance of uraemic and mildly carbamylated low-density lipoprotein.

Developmental toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the most TCDD-resistant and -susceptible rat strains.

alpha-Fucose-mediated binding and degradation of tissue-type plasminogen activator by HepG2 cells.

Difference in energy metabolism between fresh and warm ischemic canine pancreases during preservation by the two-layer method.

Effects of alpha-tocopherol on lipid peroxidation and mitochondrial reduction of tetraphenyl tetrazolium in the rat brain.

Multiple mechanisms are responsible for altered expression of gap junction genes during oncogenesis in rat liver.

Polychlorinated biphenyls (PCBs): environmental impact, biochemical and toxic responses, and implications for risk assessment.

Age- and feeding-dependent production of carbonyl compounds in hypoxic heart. The role of carbonyls produced in connective tissue modification.

Porphyrin studies in TCDD-exposed workers.

Liver iron quantification: studies in aqueous iron solutions, iron overloaded rats, and patients with hereditary hemochromatosis.

Histochemical demonstration of free radicals (H₂O₂) in ischemic brain edema and protective effects of human recombinant superoxide dismutase on ischemic neuronal damage.

Molecular basis of dioxin actions on rodent and human target tissues.

Thyroid hormones and regulation of cell reliability systems.

Hodgkin's and non-Hodgkin's lymphomas.

A targeting model of boron neutron-capture therapy to hepatoma cells in vivo with a boronated anti-(alpha-fetoprotein) monoclonal antibody.

Could the cytokeratin molecule be modulated during tumor transformation in hepatocellular carcinoma?

Tyrosine kinases regulate the cytoskeletal attachment of integrin alpha IIb beta 3 (platelet glycoprotein IIb/IIIa) and the cellular retraction of fibrin polymers.

Differential effect of cell-associated heparan sulfates on the binding of keratinocyte growth factor (KGF) and acidic fibroblast growth factor to the KGF receptor.

Sequential activation of Raf-1 kinase, mitogen-activated protein (MAP) kinase kinase, MAP kinase, and S6 kinase by hyperosmolality in renal cells.

In vitro dermal absorption of pesticides: V. In vivo and in vitro comparison of the herbicide 2,4-dichlorophenoxyacetic acid in rat, guinea pig, pig, human and tissue-cultured skin.

NTP Toxicology and Carcinogenesis Studies of 4,4'-Thiobis(6-*t*-butyl-*m*-cresol) (CAS No. 96-69-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Tyrosine kinase inhibition prevents deformation-stimulated vascular smooth muscle growth.

Ah receptor in different tissues of C57BL/6J and DBA/2J mice: use of competitive polymerase chain reaction to measure Ah-receptor mRNA expression.

Endothelin-1 stimulates cytosolic phospholipase A2 activity and gene expression in rat glomerular mesangial cells.

Purification and characterization of a cytosolic thyroid-hormone-binding protein (CTBP) in *Xenopus* liver.

Induction in vitro of 72-kD heat shock protein in a continuous culture of rat thyroid cells, FRTL5.

Genistein reduces tumor necrosis factor alpha-induced plasminogen activator inhibitor-1 transcription but not urokinase expression in human endothelial cells.

Aescin formation in calli and embryoids from cotyledon and stem explants of *Aesculus hippocastanum* L.

Phorbol ester tumor promoter regulation of natural antitumor antibody binding depends on protein kinase C and an intact microfilament system.

Putative rat sperm lipid-binding protein: isolation and partial characterization.

Olfactory mucosal lesions in F344 rats following inhalation exposure to pyridine at threshold limit value concentrations.

Effect on tissue vitamin A levels in the rat following subchronic exposure to four individual PCB congeners (IUPAC 77, 118, 126, and 153).

Accumulation and persistence of individual polychlorinated biphenyl congeners in liver, blood, and adipose tissue of rats following dietary exposure to Aroclor 1254.

Use of a selective inhibitor of liver carnitine palmitoyltransferase I (CPT I) allows quantification of its contribution to total CPT I activity in rat heart. Evidence that the dominant cardiac CPT I isoform is identical to the skeletal muscle enzyme.

Role of ATP and sodium in polyamine transport in bovine pulmonary artery smooth cells.

Comparative mutagenicity of chemicals selected for test in the International Program on Chemical Safety's collaborative study on plant systems for the detection of environmental mutagens.

Synthesis of n.c.a. carbon-11 labelled clozapine and its major metabolite clozapine-N-oxide and comparison of their biodistribution in mice.

Immunohistochemical and biochemical indicators of muscle damage in vitro: the stability of control muscle and the effects of dinitrophenol and calcium ionophore.

Modulation of three types of K⁺ currents in canine coronary artery smooth muscle cells by NS-004, or 1-(2'-hydroxy-5'-chlorophenyl)-5-trifluoromethyl-2(3H) benzimidazolone.

Effects of induction and age-dependent enzyme expression on lung bioavailability, metabolism, and DNA binding of urban air particulate-absorbed benzo[a]pyrene, 2-nitrofluorene, and 3-amino-1,4-dimethyl-5H-pyridol-(4,3)-indole.

Cloning of a cDNA encoding an ectoenzyme that degrades thyrotropin-releasing hormone.

Intestinal uptake of uridine in suckling rats: mechanism and ontogeny.

Evidence of two mechanisms of prostaglandin release in an in vitro model of muscle damage. Possible therapeutic implications.

Tissue specific expression of the rat Ah-receptor and ARNT mRNAs.

The low molecular weight protein which co-purifies with alpha-latrotoxin is structurally related to crustacean hyperglycemic hormones.

Concentrations and 2,3,7,8-tetrachlorodibenzo-p-dioxin toxic equivalents of non-ortho coplanar PCBs in adipose fat of Poles.

Effect of glutathione depletion and inhibition of glucuronidation and sulfation on 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) metabolism, PhIP-DNA adduct formation and unscheduled DNA synthesis in primary rat hepatocytes.

Role of neutrophils and nitric oxide in lung alveolar injury from smoke inhalation.

Antibody-induced changes on rabbit sperm surface inhibit gamete interaction.

Early bone matrix formation during distraction. A biochemical study in sheep.

Nuclear-organelle interactions: the immutans variegation mutant of Arabidopsis is plastid autonomous and impaired in carotenoid biosynthesis.

An inhibitory factor in rat thymus which interferes with binding of cytosol Ah receptor to xenobiotic responsive element.

[Energy-dependent Ca²⁺-transport in intracellular smooth muscle structures].

Localization of peroxidase activity in tegumental, muscle, and parenchymal cells of the lung fluke *Paragonimus miyazakii* (Digenea: Troglotrematidae).

Identification of regions of bovine factor VII essential for binding to tissue factor.

Effects of calcium channel antagonists on the release of prostaglandin E₂ from metabolically stressed muscle.

Demonstration of an ectoATP-diphosphohydrolase (E.C.3.6.1.5.) in non-vascular smooth muscles of the bovine trachea.

Role of EDRFs in the control of arteriolar diameter during increased metabolism of striated muscle.

A pharmacodynamically responsive model of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) transfer between liver and fat at low and high doses.

Xenobiotic oxidation during early pregnancy in man: peroxidase catalysed chemical oxidation in conceptual tissues.

Specificity of antibodies to type II collagen in early rheumatoid arthritis.

Congener-specific data of polychlorinated biphenyl residues in human adipose tissue in Poland.

Interleukin-6 attenuates agonist-mediated calcium mobilization in murine osteoblastic cells.

Two collagen-binding proteins, osteonectin and HSP47, are coordinately induced in transformed keratinocytes by heat and other stresses.

Metabolic characteristics of alpha-toxin-permeabilized smooth muscle.

Biphasic modulation of protein kinase C (PKC) activity by polychlorinated dibenzo-p-dioxins (PCDDs) in serum-deprived rat aortic smooth muscle cells.

Neurite outgrowth stimulated by the tyrosine kinase inhibitor herbimycin A requires activation of tyrosine kinases and protein kinase C.

Mouse cytochrome P-450EF, representative of a new 1B subfamily of cytochrome P-450s. Cloning, sequence determination, and tissue expression.

Cyclosporine enhances the synthesis of selected extracellular matrix proteins by renal cells "in culture". Different cell responses and phenotype characterization.

Ah receptor in embryonic mouse palate and effects of TCDD on receptor expression.

Stimulation of collagen alpha 1(I) gene expression is associated with lipid peroxidation in hepatocellular injury: a link to tissue fibrosis?

Stabilization of pericardial tissue by dye-mediated photooxidation.

Primary structure of chicken cardiac myosin S-1 heavy chain.

Comparison of the ATPase activities of bovine heart and liver mitochondrial ATP synthases with different tissue-specific gamma subunit isoforms.

Tissue-specific constitutive and inducible expression of rat phenol UDP-glucuronosyltransferase.

Studies on the mechanism of intestinal passage of the food comutagen harman, in the rabbit.

An Arg-Gly-Asp peptide stimulates Ca²⁺ efflux from osteoclast precursors through a novel mechanism.

Congener-specific data on polychlorinated biphenyls in tissues of common porpoise from Puck Bay, Baltic Sea.

Determinants of TCDD half-life in veterans of operation ranch hand.

Cytoskeleton-dependent transport of cytoplasmic particles in previtellogenic to mid-vitellogenic ovarian follicles of *Drosophila*: time-lapse analysis using video-enhanced contrast microscopy.

Effects of oxidative stress on expression of extracellular superoxide dismutase, CuZn-superoxide dismutase and Mn-superoxide dismutase in human dermal fibroblasts.

Dioxins and dibenzofurans in adipose tissue of the general US population and selected subpopulations.

Cresol isomers: comparison of toxic potency in rat liver slices.

Effect of metabolic alterations on the accumulation of technetium-99m-labeled d,l-HMPAO in slices of rat cerebral cortex.

Polychlorinated biphenyls as hormonally active structural analogues.

Identity of the core proteins of the large chondroitin sulphate proteoglycans synthesized by skeletal muscle and prechondrogenic mesenchyme.

Structural relation between HDL-binding proteins in porcine liver.

2,3,7,8-Tetrachlorodibenzo-p-dioxin inhibits differentiation of normal diploid rat osteoblasts in vitro.

Study of tissue-type plasminogen activator binding sites on fibrin using distinct fragments of fibrinogen.

Glucose-6-phosphate dehydrogenase is enriched in oligodendrocytes of the rat spinal cord. Enzyme histochemical and immunocytochemical studies.

Photochemical cross-linking between native rabbit skeletal troponin C and benzoylbenzoyl-troponin I inhibitory peptide, residues 104-115.

Synthesis and expression of a gene coding for *Erythrina* trypsin inhibitor (ETI).

Plant regeneration from cultured immature inflorescences of coconut (*Cocos nucifera* L.): evidence for somatic embryogenesis.

NTP Toxicology and Carcinogenesis Studies of o-Benzyl-p-Chlorophenol (CAS No. 120-32-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Evidence for Chilling-Induced Oxidative Stress in Maize Seedlings and a Regulatory Role for Hydrogen Peroxide.

The Ah receptor: mediator of the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and related compounds.

Dose-response relationships in mice following subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: CYP1A1, CYP1A2, estrogen receptor, and protein tyrosine phosphorylation.

A physiologically based mathematical model of dermal absorption in man.

Levels of non-ortho-substituted (coplanar), mono- and di-ortho-substituted polychlorinated biphenyls, dibenzo-p-dioxins, and dibenzofurans in human serum and adipose tissue.

Chlorinated dioxins and dibenzofurans in human tissue from general populations: a selective review.

Chlorinated and brominated dioxins and dibenzofurans in human tissue following exposure.

A novel phosphoglucomutase-related protein is concentrated in adherens junctions of muscle and nonmuscle cells.

X-ray microanalysis of renal proximal tubules in cadmium-treated rats.

Quantitative analysis of cyanogen bromide-cleaved peptides for the assessment of type I: type II collagen ratios in equine articular repair tissue.

Cross-validation of cyanogen bromide-peptide ratios to measure the proportion of type II collagen in pepsin digests of equine articular cartilage, meniscus, and cartilage repair tissue.

Dose-dependent disposition of sodium arsenate in mice following acute oral exposure.

Aryl hydrocarbon or dioxin receptor: biologic and toxic responses.

Properties of mammalian tissue-bound semicarbazide-sensitive amine oxidase: possible clues to its physiological function?

Effects of acidic pH on the formation of vinblastine-induced paracrystals in Chinese hamster ovary cells.

The health effects of agrichemicals: herbicides and soft tissue sarcomas.

Transport of 2,4,5-trichlorophenoxyacetic acid across the blood-cerebrospinal fluid barrier of the rabbit.

Human pentachlorophenol poisoning.

Distribution and elimination of the herbicide propanil in the channel catfish (*Ictalurus punctatus*).

Paraquat causes chronic ocular surface toxicity.

Histometric changes in connective fibers of the lung following paraquat administration in rats.

Change of polyamine level in various tissues of male rats intoxicated with paraquat.

Simultaneous determination of paraquat and diquat in human tissues by high-performance liquid chromatography.

Effect of in vitro exposure to acrolein on carbachol responses in rat trachealis muscle.

Immunohistochemical localization of paraquat in skin and eye of rat.

Parkinson's disease: a test of the multifactorial etiologic hypothesis.

Phenoxy herbicides, chlorophenols, soft-tissue sarcoma (STS) and malignant lymphoma.

Actin filaments disassembly: a novel step in the genesis of paraquat toxicity?

Cancer in phenoxy herbicide manufacturing workers in Denmark, 1947-87--an update.

Cytotoxic effect of atrazine on murine B-lymphocytes in vitro.

Mutagenic and carcinogenic pesticides used in the agricultural environment of Gaza Strip.

Acrolein increases airway sensitivity to substance P and decreases NEP activity in guinea pigs.

Acute and subacute toxicity of atrazine to carp (*Cyprinus carpio* L.).

Fetotoxic and teratogenic potential of substituted phenylurea herbicide, isoproturon, in rats.

Occupational exposure to phenoxy herbicides and chlorophenols and cancer mortality in The Netherlands.

Atrazine in plasma and tissue following atrazine-aminotriazole-ethylene glycol-formaldehyde poisoning.

Kinetics of toxic doses of paraquat and the effects of hemoperfusion in the dog.

Ascorbate radical levels in human sera and rat plasma intoxicated with paraquat and diquat.

Immunohistochemical localization and dynamics of paraquat in the stomach and esophagus of rats.

Alterations of peroxisomal function in ischemia-reperfusion injury of rat kidney.

The mechanisms by which mild respiratory chain inhibitors inhibit hepatic gluconeogenesis.

Ethanol-induced inhibition of ventricular protein synthesis in vivo and the possible role of acetaldehyde.

Lung growth and maturation in the rat model of experimentally induced congenital diaphragmatic hernia.

Effect of indomethacin, aspirin, nordihydroguareitic acid, and piperonyl butoxide on cyclophosphamide-induced bladder damage.

Influence of pentachlorophenol on light emission from single barnacle muscle fibers preloaded with aequorin.

Toxicokinetics and metabolism of linuron in rabbit: in vivo and in vitro studies.

Metabolism of N-[4-chloro-2-fluoro-5-[(1-methyl-2-propynyl)oxy]phenyl]-3,4,5,6-tetrahydrophthalimide (S-23121) in the rat. II. Absorption, disposition, excretion and biotransformation.

Studies on the inhibition of collagen synthesis in fibroblasts treated with paraquat.

A comparative study of effects of atrazine on xenobiotic metabolizing enzymes in fish and insect, and of the in vitro phase II atrazine metabolism in some fish, insects, mammals and one plant species.

Absorption and metabolism of 2-chloro-2,6-diethyl-N-(butoxymethyl)acetanilide (butachlor) in human skin in vitro.

Pentachlorophenol (PCP) inhibits ion transport in the isolated toad cornea.

Tissue distribution and excretion of ¹⁴C-labelled cinnamic aldehyde following single and multiple oral administration in male Fischer 344 rats.

[Studies on quantitative analysis of paraquat in whole blood--the evaluation of pre-treatments and analytical methods].

Characterization of amyloid fibril beta-peptide in familial Alzheimer's disease with APP717 mutations.

Imaging of activated natural killer cells in mice by positron emission tomography: preferential uptake in tumors.

Tendon hypertrophy is associated with increased hydroxylation of nonhelical lysine residues at two specific cross-linking sites in type I collagen.

Protection of the rat jejunal mucosa against oxidative injury by cationized superoxide dismutase.

Kinetics and cellular localisation of putrescine uptake in human lung tissue.

Ultrastructural features of alveolar epithelial cells in the late fetal pulmonary acinus: a comparison between normal and hypoplastic lungs using a rat model of pulmonary hypoplasia and congenital diaphragmatic hernia.

The long term durability of bond strengths to dentin.

Two additional cases of osteogenesis imperfecta with substitutions for glycine in the alpha 2(I) collagen chain. A regional model relating mutation location with phenotype.

Subchronic toxicity of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats.

Experimental Parkinson's disease in monkeys. Effect of ergot alkaloid derivative on lipid peroxidation in different brain areas.

Cancer incidence in a population accidentally exposed to 2,3,7,8-tetrachlorodibenzo-para-dioxin.

Resistance to aflatoxin B1 is associated with the expression of a novel aldo-keto reductase which has catalytic activity towards a cytotoxic aldehyde-containing metabolite of the toxin.

The cardioprotective, vasorelaxant and electrophysiological profile of the large conductance calcium-activated potassium channel opener NS-004.

Collagen studies in newborn rat kidneys with incomplete ureteric obstruction.

Thromboxane A2 stimulates vascular smooth muscle hypertrophy by up-regulating the synthesis and release of endogenous basic fibroblast growth factor.

Isomer-specific analysis and toxic evaluation of polychlorinated biphenyls in striped dolphins affected by an epizootic in the western Mediterranean sea.

Collagen characterization in volume-overload- and pressure-overload-induced cardiac hypertrophy in minipigs.

Biochemical characterization and quantitation of the collagenous components of urethral stricture tissue.

Angiosarcoma, porphyria cutanea tarda, and probable chloracne in a worker exposed to waste oil contaminated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Carcinoembryonic antigen mediates in vitro cell aggregation induced by interferon-gamma in a human colon cancer cell line: requirement for active metabolism and intact cytoskeleton.

A new form of tumor and fetal collagen that binds laminin.

Characterization of an arginine 789 to cysteine substitution in alpha 1 (II) collagen chains of a patient with spondyloepiphyseal dysplasia.

Exposure to 2,3,7,8-tetrachlorodibenzo-para-dioxin leads to defective dentin formation and pulpal perforation in rat incisor tooth.

Plasma membrane-dependent activation of the 72-kDa type IV collagenase is prevented by complex formation with TIMP-2.

Iron status and growth of rats fed different dietary iron sources.

Metabolites of sodium selenite and methylated selenium compounds administered at cancer chemoprevention levels in the rat.

Herbimycin A, a pp60c-src tyrosine kinase inhibitor, inhibits osteoclastic bone resorption in vitro and hypercalcemia in vivo.

NAD(P)H:quinone oxidoreductase1 (DT-diaphorase) expression in normal and tumor tissues.

Effects of substrate and inhibition of oxidative metabolism on contraction and myosin phosphorylation in ASM.

Environmental antecedents of young-onset Parkinson's disease.

SSCP detection of a Gly565Val substitution in the pro alpha 1(I) collagen chain resulting in osteogenesis imperfecta type II.

Renal and hepatic toxicity of monochloroacetanilides in the Fischer 344 rat.

Identification and purification of a novel serine proteinase inhibitor.

Dioxin hepatic carcinogenesis: biologically motivated modeling and risk assessment.

Aortic collagen alterations in human diabetes mellitus. Changes in basement membrane collagen content and in the susceptibility of total collagen to cyanogen bromide solubilisation.

Environmental toxicology of polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans.

Effect of a single lethal dose of TCDD on the levels of monoamines, their metabolites and tryptophan in discrete brain nuclei and peripheral tissues of Long-Evans rats.

Desensitization of beta-1 and beta-2, but not beta-3, adrenoceptor-mediated lipolytic responses of adipocytes after long-term norepinephrine infusion.

The effect of NG-nitro-L-arginine methyl ester upon basal blood flow and endothelium-dependent vasodilatation in the dog hindlimb.

Misclassified sarcomas and confounded dioxin exposure.

Electrophysiologic evidence for a toxic polyneuropathy in rats after exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Herbimycin A inhibits the association of p60v-src with the cytoskeletal structure and with phosphatidylinositol 3' kinase.

Important aspects of the evidence for TCDD carcinogenicity in man.

Structural alterations in the peptide backbone of beta-amyloid core protein may account for its deposition and stability in Alzheimer's disease.

Serine for glycine substitutions in type I collagen in two cases of type IV osteogenesis imperfecta (OI). Additional evidence for a regional model of OI pathophysiology.

Effects of restricted feeding on the absorption, metabolism, and accumulation of pentachlorobenzene in rats.

The effect of ischaemia on xanthine oxidase activity in rat intestine and liver.

Mechanisms of adaptation of glucose transporters to changes in the oxidative chain of muscle and fat cells.

Additional endpoints and overview of a mouse skeletal variant assay for detecting exposure to teratogens.

Modeling receptor-mediated processes with dioxin: implications for pharmacokinetics and risk assessment.

Osteogenesis imperfecta and type-I collagen mutations. A lethal variant caused by a Gly910-->Ala substitution in the alpha 1 (I) chain.

Metabolism of iron from (3,5,5-trimethylhexanoyl)ferrocene in rats. A dietary model for severe iron overload.

Coplanar polychlorinated biphenyl congener levels and patterns and the identification of separate populations of harbor seals (*Phoca vitulina*) in Denmark.

The mortality experience of workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin in a trichlorophenol process accident.

Identification of soft tissue sarcoma deaths in cohorts exposed to dioxin and to chlorinated naphthalenes.

p60v-src causes tyrosine phosphorylation and inactivation of the N-cadherin-catenin cell adhesion system.

An intronic deletion leading to skipping of exon 21 of COL1A2 in a boy with mild osteogenesis imperfecta.

Lactoferrin co-purifies with myeloperoxidase and is recognised by anti-neutrophil cytoplasm antibodies.

Mechanisms of carcinogenicity of methyl halides.

A de novo G+1-->A mutation at the alpha 2(I) exon 16 splice donor site causes skipping of exon 16 in the cDNA of one allele of an OI type IV proband.

Identification of genes up-regulated in dedifferentiating *Nicotiana glauca* pith tissue, using an improved method for constructing a subtractive cDNA library.

Metabolic inhibition enhances Ca(2+)-activated K+ current in smooth muscle cells of rabbit portal vein.

Liver accumulation of 2,3,7,8-tetrachloro-[3H]dibenzofuran in mice: modulation by treatments with polychlorinated biphenyls.

2,3,7,8-tetrachlorodibenzo-p-dioxin increases cardiac myocyte intracellular calcium and progressively impairs ventricular contractile responses to isoproterenol and to calcium in chick embryo hearts.

Characteristics of a 28-kDa collagenous protein extracted with guanidine from EDTA-demineralized rabbit alveolar bone.

Relationship of oxypurine release to contractile failure in dinitrophenol-treated rat skeletal muscle.

Tissue distribution and toxicokinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats after intravenous injection.

Effect of dose, time, and pretreatment on the biliary excretion and tissue distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat.

Chicken smooth muscle myosin light chain kinase is acetylated on its NH₂-terminal methionine.

Induction of neutrophil homotypic adhesion via sialophorin (CD43), a surface sialoglycoprotein restricted to haemopoietic cells.

Angiotensin II-mediated facilitation of sympathetic neurotransmission in the spontaneously hypertensive rat is not associated with neuronal uptake of the peptide.

Human xenobiotic metabolizing esterases in liver and blood.

Singlet oxygen induces collagenase expression in human skin fibroblasts.

Biochemical Basis of Resistance of Tobacco Callus Tissue Cultures to Hydroxyphenylethylamines.

Rapid screening of fish tissue for polychlorinated dibenzo-p-dioxins and dibenzofurans.

Importance of venular flow in control of arteriolar diameter in hamster cremaster muscle.

Glycine decarboxylase complex from higher plants. Molecular cloning, tissue distribution and mass spectrometry analyses of the T protein.

Purification and characterization of catalase from goat (*Capra capra*) lung.

Introduction of lysine and clot binding properties in the kringle one domain of tissue-type plasminogen activator.

Methoxyresorufin and benzyloxyresorufin: substrates preferentially metabolized by cytochromes P4501A2 and 2B, respectively, in the rat and mouse.

Comparative cytotoxic responses of cultured avian and rodent aortic smooth muscle cells to allylamine.

Distribution patterns of polychlorinated biphenyl congeners in harbor seal (*Phoca vitulina*) tissues: statistical analysis.

Histopathologic approaches to chemical toxicity using primary cultures of dissociated neural cells grown in chamber slides.

Responses of smooth muscle cells to platelet-derived growth factor are inhibited by herbimycin-A tyrosine kinase inhibitor.

Stimulation of lipid peroxidation or 4-hydroxynonenal treatment increases procollagen alpha 1 (I) gene expression in human liver fat-storing cells.

Oxygen influences benzyladenine and 2,4-dichlorophenoxyacetic acid levels in cultured embryogenic tissue of Norway spruce.

Photodynamic effects of new silicon phthalocyanines: in vitro studies utilizing rat hepatic microsomes and human erythrocyte ghosts as model membrane sources.

Simultaneous induction of sod, glutathione reductase, GSH, and ascorbate in liver and kidney correlates with survival during aging.

Subunit structures of purified beef mitochondrial cytochrome bc₁ complex from liver and heart.

Relatively immediate relaxant effects of cholera toxin on isolated rabbit blood vessels.

The relevance of fat content in toxicity of lipophilic chemicals to terrestrial animals with special reference to dieldrin and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Maintenance of xenobiotic metabolism and toxicity in rat hepatocyte cultures after cell preservation at 4 degrees.

Oxidative tyrosylation of high density lipoprotein by peroxidase enhances cholesterol removal from cultured fibroblasts and macrophage foam cells.

Ultrastructural localization and afferent sources of corticotropin-releasing factor in the rat rostral ventrolateral medulla: implications for central cardiovascular regulation.

Modification by hydroxyl radicals of functional reactivity in rabbit lingual artery.

Uncoupling of mitochondrial oxidative phosphorylation abolishes the stimulatory action of insulin on the binding of glycolytic enzymes to muscle cytoskeleton.

Toxic potential of non-ortho and mono-ortho coplanar polychlorinated biphenyls in Aroclors, seals, and humans.

A physiologically based pharmacokinetic model for 2,3,7,8-tetrabromodibenzo-p-dioxin (TBDD) in the rat: tissue distribution and CYP1A induction.

Sulphonylurea drugs no longer inhibit ATP-sensitive K⁺ channels during metabolic stress in cardiac muscle.

Primary structure of subfragment-2 from adult chicken cardiac ventricular muscle myosin.

Effects of metabolic inhibition on cytoplasmic calcium and contraction in smooth muscle of rat portal vein.

Light microscopic catalase histochemistry in mussel digestive gland tissue.

2,3,7,8-Tetrachlorodibenzo-P-dioxin induced alterations in protein phosphorylation in guinea pig adipose tissue.

Tyrosyl radical generated by myeloperoxidase catalyzes the oxidative cross-linking of proteins.

Human non-secretory ribonucleases. I. Purification, peptide mapping and lectin blotting analysis of the kidney, liver and spleen enzymes.

Effects of cytochalasin B on calcium transport by 1,25(OH)₂D₃- or PTH-treated chick embryonic yolk sac in vitro and in vivo.

Gene expression and cell proliferation in rat liver after 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

[Toxicology of tobacco].

Effect of macromolecules on the structure of the mitochondrial inter-membrane space and the regulation of hexokinase.

A mechanistic model of effects of dioxin on gene expression in the rat liver.

ATP-sensitive potassium channels in smooth muscle cells from guinea pig urinary bladder.

Purification and characterization of salicylhydroxamic acid reductase from rat liver.

Iron-initiated tissue oxidation: lipid peroxidation, vitamin E destruction and protein thiol oxidation. Inhibition by a novel antioxidant, U-78517F.

Interaction of the cyclophosphamide metabolite, acrolein, with lactate dehydrogenase-m homolog.

Maturation changes in dermal absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in Fischer 344 rats.

Toxicology, structure-function relationship, and human and environmental health impacts of polychlorinated biphenyls: progress and problems.

Ultrastructure of early chick embryo tissues after high pressure freezing and freeze substitution.

Stimulatory effect of the CYP1A1 inducer 2,3,7,8-tetrachlorodibenzo-p-dioxin on the reproduction of HIV-1 in human lymphoid cell culture.

Inhibitors of mitochondrial carnitine palmitoyltransferase I limit the action of proteases on the enzyme. Isolation and partial amino acid analysis of a truncated form of the rat liver isozyme.

Amino-acid sequence of the cooperative dimeric myoglobin from the radular muscles of the marine gastropod *Nassa mutabilis*.

[Use of arylsulfenylchlorides for cleaving fibrinogen at methionine residues].

Movement of fluorescein and its glucuronide across retinal pigment epithelium-choroid.

Dioxin toxicity. Agency for Toxic Substances and Disease Registry.

Dityrosine, a specific marker of oxidation, is synthesized by the myeloperoxidase-hydrogen peroxide system of human neutrophils and macrophages.

Nonresponsiveness of normal human fibroblasts to dioxin correlates with the presence of a constitutive xenobiotic response element-binding factor.

Purification and characterization of glutathione S-transferase of murine ovary and testis.

Enhanced glutathione S-transferase 7-7 expression in rat hepatic cytosol following treatment with pyrrole.

Image processing: a non-destructive method for measuring growth in cell and tissue culture.

Evaluation of collagen cross-linking techniques for the stabilization of tissue matrices.

Semicarbazide protection from in vivo oxidant injury of vascular tissue by allylamine.

Dystrophin in a membrane skeletal network: localization and comparison to other proteins.

Phosphorylation of serine 2843 in ryanodine receptor-calcium release channel of skeletal muscle by cAMP-, cGMP- and CaM-dependent protein kinase.

Nature and role of xenobiotic metabolizing esterases in rat liver, lung, skin and blood.

In vitro toxicity screening using cultured rat skeletal muscle cells. I. Surfactants and mitochondrial poisons.

The relative contribution of individual polychlorinated biphenyls (PCBs), polychlorinated dibenzo-p-dioxins (PCDDs) and polychlorinated dibenzo-p-furans (PCDFs) to toxic equivalent values derived for bulked human adipose tissue samples from Wales, United Kingdom.

nir1, a conditional-lethal mutation in barley causing a defect in nitrite reduction.

A temperature dependent action of fluoride on aqueous outflow facility of the calf eye.

Effects of acute sodium arsenite administration on the pulmonary chemical metabolizing enzymes, cytochrome P-450 monooxygenase, NAD(P)H:quinone acceptor oxidoreductase and glutathione S-transferase in guinea pig: comparison with effects in liver and kidney.

Modulation of protooncogene expression in rat aortic smooth muscle cells by benzo[a]pyrene.

Intestinal solubility and absorption of ferrous iron in growing rats are affected by different dietary pectins.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on plasma and tissue beta-endorphin-like immunoreactivity in the most TCDD-susceptible and the most TCDD-resistant rat strain.

The post-translational chemistry and molecular packing of mineralizing tendon collagens.

Tendon collagens: extracellular matrix composition in shear stress and tensile components of flexor tendons.

Culture medium composition affects the relative toxicities of chlorobenzenes in rat liver slices and the isolated perfused liver.

Molecular interactions between tissue-type plasminogen activator and plasminogen.

Developmental analysis of primary and secondary somatic embryogenesis in soybean tissue culture.

[Role of H⁺ ATPases in plasma membranes of airway smooth muscle].

In vitro induction of reactive oxygen species by 2,3,7,8-tetrachlorodibenzo-p-dioxin, endrin, and lindane in rat peritoneal macrophages, and hepatic mitochondria and microsomes.

Herbicides and cancer.

Resistance of murine lung tumors to xenobiotic-induced cytotoxicity.

Mechanism and prediction of nonspecific toxicity to fish using bioconcentration characteristics.

Simazine toxicosis in sheep.

Tissue-binding and toxicity of compounds structurally related to the herbicide dichlobenil in the mouse olfactory mucosa.

Selected pesticide residues and metabolites in urine from a survey of the U.S. general population.

Inhibition of lipid peroxidation and cholesterol levels in mice by curcumin.

Pulmonary hemodynamics and lung function during chronic paraquat poisoning in sheep. Possible role of reactive oxygen species.

Soft tissue sarcoma, aplastic anaemia, and exposure to pesticides.

Reproductive study of acrolein on two generations of rats.

Dioxin intoxication from chronic exposure of horses to pentachlorophenol-contaminated wood shavings.

NTP technical report on the toxicity studies of Glyphosate (CAS No. 1071-83-6) Administered In Dosed Feed To F344/N Rats And B6C3F1 Mice.

[Toxic and drug-induced lesions of the pulmonary parenchyma].

Effects of glutathione-modulating agents on the covalent binding and toxicity of dichlobenil in the mouse olfactory mucosa.

[The tolerance and residue accumulation of sodium-2,2-dichloropropionate (Dalapon) administered over 90 days to dairy cows].

Two-year toxicity and carcinogenicity study of acrolein in rats.

Phenoxy herbicides and chlorophenols: a case control study on soft tissue sarcoma and malignant lymphoma.

Lung protection against paraquat is calcium dependent.

The effect of pesticides on carp (*Cyprinus carpio* L). Acetylcholinesterase and its biochemical characterization.

Effect of preinduction of metallothionein on paraquat toxicity in mice.

Effect of L-cystine on toxicity of paraquat in mice.

Occupation and soft-tissue sarcoma in northeastern Italy.

Fatal paraquat poisoning: a light microscopic study in eight autopsy cases.

Renal cadmium deposition and injury as a result of accumulation of cadmium-metallothionein (CdMT) by the proximal convoluted tubules--A light microscopic autoradiography study with ¹⁰⁹CdMT.

Selective eosinophil leukocyte recruitment by transendothelial migration and not by leukocyte-endothelial cell adhesion.

Pharmacologically active phenylpropanoids from *Senra incana*.

The plateau phase rat goiter contains a sub-population of TSH-responsive follicular cells capable of proliferation following transplantation.

Preservation of keratin expression in oral mucosa using a novel transport medium.

Antioxidant and anticataractogenic effects of topical captopril in diquat-induced cataract in rabbits.

Chloride channels of skeletal muscle from developing, adult and aged rats are differently affected by enantiomers of 2-(p-chlorophenoxy) propionic acid.

The isolation and partial characterization of catalase and a peroxidase active fraction from human white adipose tissue.

Metabolism of alachlor by rat and monkey liver and nasal turbinate tissue.

Inhibition of sulfotransferase in primary cultures of human hepatocytes affecting metabolism and binding of 2-acetylaminofluorene.

Responses of vascular endothelial oxidant metabolism to lipopolysaccharide and tumor necrosis factor- α .

The acute effects of ethanol and acetaldehyde on rates of protein synthesis in type I and type II fibre-rich skeletal muscles of the rat.

Paraquat-induced lung injury: prevention by N-tert-butyl-alpha-phenylnitron, a free-radical spin-trapping agent.

1-Methyl-tetrahydro-beta-carboline-3-carboxylic acid is present in the rat brain and is not increased after acute ethanol injection with cyanamide treatment.

Biotransformation of butachlor through mercapturic acid pathway in rat tissue homogenates.

The influence of buffers during fixation on the appearance of smooth endoplasmic reticulum and glycogen in hepatocytes of normal and glycogen-depleted rats.

Opposite effects of enantiomers of clofibrilic acid derivative on rat skeletal muscle chloride conductance: antagonism studies and theoretical modeling of two different receptor site interactions.

The pyrimido-pyrimidine derivative RA-642 protects from brain injury in a combined model of permanent focal ischemia and global ischemia reperfusion.

Methyl bromide intoxication and acute energy deprivation syndromes.

Influence of irrigation and intracanal dressing on the healing process of dogs' teeth with apical periodontitis.

Mitochondrial ATP-synthase deficiency in a child with 3-methylglutaconic aciduria.

An amino acid substitution (Gly853-->Glu) in the collagen alpha 1(II) chain produces hypochondrogenesis.

Inhibition of acute TCDD toxicity by treatment with anti-tumor necrosis factor antibody or dexamethasone.

[The retention of alkyldinitrophenol compounds in cadaveric material].

Enzymatic production of acetaldehyde from ethanol in rat brain tissue.

Cytochemical detection of superoxide in cerebral inflammation and ischemia in vivo.

[Pulmonary surfactant in experimental congenital diaphragmatic hernia].

Amyotrophic lateral sclerosis: increased solubility of skin collagen.

Endoscopic treatment of vesicoureteral reflux with a self-detachable balloon system.

Bioavailability to rats and toxicity of bound residues in bean seeds fumigated with ^{14}C -methyl bromide.

Hypoxia induces glucose transporter expression in endothelial cells.

A dominant mutation in the COL1A1 gene that substitutes glycine for valine causes recurrent lethal osteogenesis imperfecta.

Expression of mutant alpha (I)-procollagen in osteoblast and fibroblast cultures from a proband with osteogenesis imperfecta type IV.

Persistent brominated and chlorinated dioxin blood levels in a chemist. 35 years after dioxin exposure.

Chronic sodium azide treatment impairs learning of the Morris water maze task.

Type I keratinocyte transglutaminase: expression in human skin and psoriasis.

Anti-Ro autoantibody with cross-reactive binding to the heavy chain of immunoglobulin G.

Dose-response relationships for chronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in a rat tumor promotion model: quantification and immunolocalization of CYP1A1 and CYP1A2 in the liver.

Detection and characterisation of an overmodified type III collagen by analysis of non-cutaneous connective tissues in a patient with Ehlers-Danlos syndrome IV.

Research note: effect of 2,4-dinitrophenol on growth and body composition of broilers.

Localization of the reflex pathway responsible for the vasodepressor reaction induced by inferior vena caval occlusion and isoproterenol.

Extraembryonic tissue changes induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,4,7,8-pentachlorodibenzofuran with a note on direction of maternal blood flow in the labyrinth of C57BL/6N mice.

[Trace analysis for drugs and poisons in human tissues].

Modulation of type II collagen-induced arthritis in DBA/1 mice by intravenous application of a peptide from the C1q-A chain.

A single base mutation in the gene for type III collagen (COL3A1) converts glycine 847 to glutamic acid in a family with Ehlers-Danlos syndrome type IV. An unaffected family member is mosaic for the mutation.

Neutrophils contribute to TNF induced myocardial tolerance to ischaemia.

Cancer incidence following chlorophenol exposure in a community in southern Finland.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on blood and spleen natural killer (NK) cell activity in the mouse.

Mitochondrial dysfunction observed in situ in cardiomyocytes of rats in experimental diabetes.

Risk factors for adult soft tissue sarcoma in northern Italy.

Sodium monochloroacetate poisoning of greenfinches.

Anti-estrogenic action of 2,3,7,8-tetrachlorodibenzo-p-dioxin: tissue-specific regulation of estrogen receptor in CD1 mice.

Inhibition of intestinal glucose absorption in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Growth inhibition by anchorage-deficiency is associated with increased level but reduced phosphorylation of mutant p53.

Neutrophil accumulation in ischemic reperfused rat liver: evidence for a role for superoxide free radicals.

Effect of acidosis and anoxia on iron delocalization from brain homogenates.

Lysyl hydroxylation in collagens from hyperplastic callus and embryonic bones.

Altered ratio of collagen chains in bone of a patient with non-lethal osteogenesis imperfecta.

An osteopenic nonfracture syndrome with features of mild osteogenesis imperfecta associated with the substitution of a cysteine for glycine at triple helix position 43 in the pro alpha 1(I) chain of type I collagen.

Heme oxygenase: expression in human retina and modulation by stress agents in a human retinoblastoma cell model system.

Serum 2,3,7,8-tetrachlorodibenzo-p-dioxin levels of New Zealand pesticide applicators and their implication for cancer hypotheses.

The mechanism of action of the two-layer (Euro-Collins' solution/perfluorochemical) cold storage method in canine pancreas preservation.

A new threat to public health: organochlorines and food.

Toxicity of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats after single oral administration.

Old and new reflections on dioxin.

Reconciling old and new findings on dioxin.

Placental transport of dioxins from mother to fetus. II. PCBs, dioxins and furans and vitamin K metabolism.

Fatal systemic poisoning after skin exposure to monochloroacetic acid.

Epitope specificity of antibodies to type II collagen in rheumatoid arthritis and systemic lupus erythematosus.

Clinical and cytologic aspects of ocular late-phase reaction in the guinea pig.

Amelioration of dermal lesions in streptozotocin-induced diabetic rats by aminoguanidine.

Reactive oxygen metabolites in toxic acute renal failure.

Purification and determination of the binding site of lactate dehydrogenase from chicken breast muscle on immobilized ferric ions.

Hepatic Na(+)-dicarboxylate cotransport: identification, characterization, and acinar localization.

Primary structure and cellular localization of chicken brain myosin-V (p190), an unconventional myosin with calmodulin light chains.

Vascular smooth muscle cell detachment from elastin and migration through elastic laminae is promoted by chondroitin sulfate-induced "shedding" of the 67-kDa cell surface elastin binding protein.

Kinetic analysis of internalization, recycling and redistribution of atrial natriuretic factor-receptor complex in cultured vascular smooth-muscle cells. Ligand-dependent receptor down-regulation.

Phosphorylation of smooth muscle caldesmon by mitogen-activated protein (MAP) kinase and expression of MAP kinase in differentiated smooth muscle cells.

Turnover of 1-aminocyclopropane-1-carboxylic Acid synthase protein in wounded tomato fruit tissue.

Effect of increased tissue oxygen uptake on autoregulation in postnatal intestine.

Histochemical arguments for muscular non-shivering thermogenesis in muscovy ducklings.

Genotoxicity of environmental agents in human mammary epithelial cells.

Evaluation of iron binding and peroxide-mediated toxicity in rat hepatocytes.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes reduction of glucose transporting activities in the plasma membranes of adipose tissue and pancreas from the guinea pig.

Amino acid sequence of the 20-kDa regulatory light chain of porcine aorta media smooth muscle myosin.

Characteristics of L-citrulline transport across rat small intestine in vitro.

Synergism among oxidants, proteinases, phospholipases, microbial hemolysins, cationic proteins, and cytokines.

Amino-acid sequence of the short subfragment-2 in adult chicken cardiac muscle myosin.

Mechanism for the hepatotoxicity of the antiandrogen, nilutamide. Evidence suggesting that redox cycling of this nitroaromatic drug leads to oxidative stress in isolated hepatocytes.

Brain and egg tubulins from antarctic fishes are functionally and structurally distinct.

Ferritin: a cytoprotective antioxidant strategem of endothelium.

Bovine brain 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase. Evidence for a neural-specific isozyme.

The potentiation of 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity by tamoxifen in female CD1 mice.

Dermal absorption of chemicals: effect of application of chemicals as a solid, aqueous paste, suspension, or in volatile vehicle.

Absence of mitochondrial beta-adrenoceptors in guinea pig myocardium: evidence for tissue disparity.

Localization of peroxidase activity in the retina and the retinal pigment epithelium of the Syrian golden hamster (*Mesocricetus auratus*).

cDNA sequence of a sunflower oleosin and transcript tissue specificity.

Studies of collagen in bone and dentin matrix of a Columbian mammoth (late Pleistocene) of central Utah.

Purification and characterization of adenosine diphosphatase from human umbilical vessels.

[Purification and properties of NAG A from human kidney].

Differentiation of quail myoblasts transformed with a temperature sensitive mutant of Rous sarcoma virus. I. Relationship between differentiation and tyrosine kinase of src gene product.

Bovine bone activin enhances bone morphogenetic protein-induced ectopic bone formation.

Autophosphorylation of skeletal muscle myosin light chain kinase.

NTP technical report on the toxicity studies of para-Chloro-alpha,alpha,alpha Trifluorotoluene (CAS NO: 98-56-6) Administered in Corn Oil and alpha-Cyclodextrin to F344/N Rats and B6C3F1 Mice in 14-Day Comparative Gavage Studies.

Biochemical comparison of fast- and slow-contracting squid muscle.

Bioenergetics and cell communication; cell uncoupling seen as a protective mechanism in cardiac muscle.

Arsenic concentrations in tissues and body fluids of dogs on chronic low-level dietary sodium arsenite.

Mitochondrial glutathione and methyl iodide-induced neurotoxicity in primary neural cell cultures.

Factors affecting the toxicity of dioxin-like toxicants: a molecular approach to risk assessment of dioxins.

Molecular cloning of rat prostate transglutaminase complementary DNA. The major androgen-regulated protein DP1 of rat dorsal prostate and coagulating gland.

Thermoregulatory, carboxyatractylate-sensitive uncoupling in heart and skeletal muscle mitochondria of the ground squirrel correlates with the level of free fatty acids.

Deamidation of human erythrocyte protein 4.1: possible role in aging.

Distribution of cytochrome P450 1A1 and NADPH-cytochrome P450 reductase in lungs of rabbits treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin: ultrastructural immunolocalization and in situ hybridization.

Altered expression of a mouse epidermal cytoskeletal protein is a sensitive marker for proliferation induced by tumor promoters.

Mammalian thymidine kinase 2. Direct photoaffinity labeling with [32P]dTTP of the enzyme from spleen, liver, heart and brain.

A monoclonal antibody that recognizes different conformational states of skeletal muscle troponin C and other calcium binding proteins.

Characterization of mineral-binding 40-kDa glycoprotein extracted from young adult rabbit alveolar bone.

Comparison of the effect of a mitochondrial uncoupler, 2,4-dinitrophenol and adrenaline on oxygen radical production in the isolated perfused rat liver.

Cyclophosphamide cystitis in rats: involvement of capsaicin-sensitive primary afferents.

A cardiac troponin T epitope conserved across phyla.

Sodium-dependent nucleoside transport in choroid plexus from rabbit. Evidence for a single transporter for purine and pyrimidine nucleosides.

Mechanisms of extracellular reactive oxygen species injury to the pulmonary microvasculature.

The mechanism of action of the two-layer (Euro-Collins' solution/perfluorochemical) cold-storage method in canine pancreas preservation--the effect of 2,4 dinitrophenol on graft viability and adenosine triphosphate tissue concentration.

Studies on curare-like action of 2,2',2''-tripridine in the mouse phrenic nerve-diaphragm.

Distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in splenic tissue of C57BL/6J mice.

Perinatal changes in the coupling of beta 1- and beta 3 adrenergic receptors to brown fat adenylyl cyclase.

Carbamylation-induced alterations in low-density lipoprotein metabolism.

Interleukin-1 beta suppresses the induction of P4501A1 and P4501A2 mRNAs in isolated hepatocytes.

Supercritical carbon dioxide extraction of 2,4-dichlorophenol from food crop tissues.

Comparison of fibrin-mediated stimulation of plasminogen activation by tissue-type plasminogen activator (t-PA) and fibrin-dependent enhancement of amidolytic activity of t-PA.

Localization in the fibrinogen gamma-chain of a new site that is involved in the acceleration of the tissue-type plasminogen activator-catalysed activation of plasminogen.

[Use of 2,4-dinitrophenol for immunosuppressive action on the recipient in implantation of fetal organs in mice].

Physiological properties of liver, gonads and muscle during maturation of female Atlantic salmon, *Salmo salar*. Comparison between a control and xenobiotics containing fish feed.

Tricarboxylic acid cycle activity in perfused rat lungs after O₂ exposure.

Inhibition of tyrosine phosphorylation prevents thrombin-induced mitogenesis, but not intracellular free calcium release, in vascular smooth muscle cells.

Tissue culture of endod (*Phytolacca dodecandra* L'Herit): growth and production of ribosome-inactivating proteins.

Metabolism and disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin in ring-necked pheasant hens, chicks, and eggs.

Serotonin and norepinephrine vasoconstriction in rat hindlimb have different oxygen requirements.

[Thermal distribution in the agar phantom by a new intracavitary RF applicator for prostate gland].

Purification and localization of brain-type creatine kinase in sodium chloride transporting epithelia of the spiny dogfish, *Squalus acanthias*.

Interaction between the heavy and the regulatory light chains in smooth muscle myosin subfragment 1.

Differential Expression of Histone H3 Gene Variants during Cell Cycle and Somatic Embryogenesis in Alfalfa.

Oxygen modulates contractile responses to potassium and prostaglandin F2 alpha in human pial arteries.

Preparation and biodistribution in mice of [11C]carfentanil: a radiopharmaceutical for studying brain mu-opioid receptors by positron emission tomography.

Iron supplementation after femoral head replacement for patients with normal iron stores.

Photoaffinity labeling of the nucleotide-binding site of the uncoupling protein from hamster brown adipose tissue.

High frequency somatic embryogenesis and plant regeneration in tissue cultures of *Codonopsis lanceolata*.

An automated in vitro dermal absorption procedure: II. Comparative in vivo and in vitro dermal absorption of the herbicide fenoxaprop-ethyl (HOE 33171) in rats.

Effects of cyclophosphamide and acrolein in organoid cultures of mouse limb bud cells grown in the presence of adult rat hepatocytes.

Growth stimulation by catecholamines in plant tissue/organ cultures.

Culture of cells from zebrafish (*Brachydanio rerio*) embryo and adult tissues.

Association of blebbing with assembly of cytoskeletal proteins in ATP-depleted EL-4 ascites tumour cells.

A potassium current activated by lemakalim and metabolic inhibition in rabbit mesenteric artery.

Tissue distribution of monochloroacetic acid and its binding to albumin in rats.

Vascular cells under peroxide induced oxidative stress: a balance study on in vitro peroxide handling by vascular endothelial and smooth muscle cells.

[A stereoscopic analysis of centrosome structure in the cells of a tissue culture under the action of energy metabolism inhibitors. I. 2,4-Dinitrophenol, deoxyglucose, sodium azide and the calcium ionophore A23187].

Heterogeneity of rat hepatic Ah receptor: identification of two receptor forms which differ in their biochemical properties.

Analysis of DNA strand breaks induced in rodent liver in vivo, hepatocytes in primary culture, and a human cell line by chlorinated acetic acids and chlorinated acetaldehydes.

Subcellular mechanism and site of action of ionic lanthanum at the motor nerve terminal.

Production of polyclonal antibody to the bovine adrenal atrial natriuretic factor-R1 receptor.

Weight of the evidence on the human carcinogenicity of 2,4-D.

[Immunomorphological analysis of prolonged intoxication by low doses of herbicide simazine].

Functional analysis of cis-elements, auxin response and early developmental profiles of the mannopine synthase bidirectional promoter.

Conjugates of superoxide dismutase with the Fc fragment of immunoglobulin G.

Marijuana and tobacco smoke gas-phase cytotoxins.

Cancer mortality in workers exposed to chlorophenoxy herbicides and chlorophenols.

[Biochemical and histological changes after acute oral poisoning with the acetanilide herbicide acetochlor].

Protection of rats against the effects of alpha-naphthylthiourea (ANTU) by elevation of non-protein sulphhydryl levels.

Free radical-induced carbonyl content in protein of estrogen-treated hamsters assayed by sodium borohydride reduction.

Comparison of one-electron reduction activity against the bipyridylum herbicides, paraquat and diquat, in microsomal and mitochondrial fractions of liver, lung and kidney (in vitro).

Immunological consequences of exposure to pentachlorophenol.

The role of xanthine oxidase in paraquat intoxication.

2,4-Dichlorophenoxyacetic acid causes chromatin and chromosome abnormalities in plant cells and mutation in cultured mammalian cells.

Developmental analysis of elongation factor-1 alpha expression in transgenic tobacco.

[Changes in the laboratory rat during development after parenteral administration of the herbicide Zeazin S-40. II. Morphologic findings].

Morphological effects of acute and chronic atrazine exposure in rainbow trout (*Oncorhynchus mykiss*).

Human health effects: what the data indicate.

A cohort mortality study of forestry workers exposed to phenoxy acid herbicides.

Pentachlorophenol concentrations in human cerebrospinal fluid.

Sublethal effects of pentachlorophenol in the abalone (*Haliotis rufescens*) as measured by in vivo ³¹P NMR spectroscopy.

Incidence rates of lymphomas and soft-tissue sarcomas and environmental measurements of phenoxy herbicides.

Mortality and incidence of cancer at four factories making phenoxy herbicides.

A fatal case of parenteral paraquat poisoning.

Protective effect of taurine against acute paraquat intoxication in rats.

Effect of atrazine on some aspects of lipid metabolism in fresh water fish.

Inhibition of human and rabbit platelet aggregation by chlorophenoxyacid herbicides.

Immunohistochemical localization of paraquat in lung and brain.

Effects of 2,4,5-trichlorophenoxyacetic acid, pentachlorophenol, methylprednisolone, and Freund's adjuvant on 2-hydroxyethylnitrosourea carcinogenesis in MRC-Wistar rats.

Evaluation of organ injuries in Paraquat intoxication.

[The effect of the acetanilide herbicide Acetochlor on the cardiovascular system of white rats].

Effects of acute 2,4-dichlorophenoxyacetic acid intoxication on some rat serum components and enzyme activities.

Oxy radicals in the eye tissues of rabbits after diquat in vivo.

Free radical enhancer xenobiotic is an inducer of cataract in rabbit.

Oxygen metabolite effects on creatine kinase and cardiac energetics after reperfusion.

[The characteristics of glutathione reductase distribution and activity in the liver of adult rats subjected to paraquat action in the embryonic period].

Free radical production and ischemic brain damage: influence of postischemic oxygen tension.

Central monoamine oxidase and phenolsulfotransferase activities in spontaneously hypertensive rats.

Cytochemical studies of hydrogen peroxide generation in postischemic hepatocytes.

Inverse correlation between resistance towards copper and towards the redox-cycling compound paraquat: a study in copper-tolerant hepatocytes in tissue culture.

Dose-dependent increases in metallothionein synthesis in the lung and liver of paraquat-treated rats.

Tissue peroxidase in the normal and neoplastic salivary gland.

Residues of pentachlorophenol and other chlorinated contaminants in human tissues: analysis by electron capture gas chromatography and electron capture negative ion mass spectrometry.

Enzyme mediated superoxide radical formation initiated by exogenous molecules in rat brain preparations.

Dose- and time-dependent effect of an acute 3-amino-1,2,4-triazole injection on rat brain catalase activity.

Metabolism of glyphosate in Sprague-Dawley rats: tissue distribution, identification, and quantitation of glyphosate-derived materials following a single oral dose.

Glyphosate skin binding, absorption, residual tissue distribution, and skin decontamination.

An investigation of the sensitivity of the ouabain-insensitive sodium efflux in single barnacle muscle fibers to pentachlorophenol.

Ethanol-induced reductions in skeletal muscle protein synthesis: use of the inhibitors of alcohol and aldehyde dehydrogenase.

Studies on ethanol-brain catalase interaction: evidence for central ethanol oxidation.

Food Safety and Inspection Service initiatives for tissue residue reduction in meat and poultry.

Gastrointestinal absorption of paraquat in the isolated mucosa of the rat.

Electron-microscopic cytochemical localization of diamine and polyamine oxidases in pea and maize tissues.

[Results of the toxicokinetics of bromoxynil in rats].

Release of intact endothelium-derived relaxing factor depends on endothelial superoxide dismutase activity.

Metabolic activation of the herbicide dichlobenil in the olfactory mucosa of mice and rats.

Modulations in nitrogen metabolism in the hepatic and neuronal tissues of fish, *Tilapia mossambica* exposed to atrazine.

Hydrogen peroxide effects on ionic and non-ionic permeability of the rabbit corneal endothelium.

Pharmacokinetics and metabolism of triclopyr in the crayfish (*Procambarus clarki*).

Regulation of intracellular acetyl-CoA carboxylase by ATP depletors mimics the action of the 5'-AMP-activated protein kinase.

Relative liver tumour promoting activity and toxicity of some polychlorinated dibenzo-p-dioxin- and dibenzofuran-congeners in female Sprague-Dawley rats.

Specific reduction of I-compound levels in DNA from spontaneous hepatomas of 22-24 month old male C3H mice.

Myocardial calcium cycling defect in furazolidone cardiomyopathy.

Induction of NAD(P)H:quinone reductase in human peripheral blood lymphocytes.

[Increased risk of soft tissue sarcoma in persons exposed to dioxin].

The degradation of type II collagen in rheumatoid arthritis: an immunoelectron microscopic study.

Detection and characterization of the Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in the human colon adenocarcinoma cell line LS180.

Homotypic aggregation of human cell lines by HLA class II-, class Ia- and HLA-G-specific monoclonal antibodies.

A continuously rotating passive agglutination method using rapidly precipitable latex particles and its application.

Scanning electron microscopic observations on muscle cells of experimental mitochondrial myopathy produced by 2, 4-dinitrophenol.

In-vivo epidermal nuclear reactions: a selective process.

Symptoms among workers with long-term exposure to methyl bromide. An epidemiological study.

Glutathione depletion during experimental damage to rat skeletal muscle and its relevance to Duchenne muscular dystrophy.

Characterization of an inducible aryl hydrocarbon receptor-like protein in rat liver.

Disposition and excretion of intravenous 2,3,7,8-tetrabromodibenzo-p-dioxin (TBDD) in rats.

Effect of modulators of glutathione synthesis on the hepatotoxicity of 2-methylfuran.

[Coplanar PCBs, PCDFs and PCDDs in the subcutaneous adipose tissue of Yusho patients and normal controls].

Effects of ATP-sensitive K⁺ channel blockers on the action potential shortening in hypoxic and ischaemic myocardium.

Iron dextran-induced muscle pain.

Pharmacokinetics of quinolones: newer aspects.

Use of epidemiology data to assess the cancer risk of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Washed human platelets prevent ischemia-reperfusion edema in isolated rabbit lungs.

Dioxin contamination and growth and development in great blue heron embryos.

Evaluation of the persistence of hydronephrosis induced in mice following in utero and/or lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Promotion of mouse lung tumors by bioaccumulated polychlorinated aromatic hydrocarbons.

Oxidation of articular cartilage glyceraldehyde-3-phosphate dehydrogenase (G3PDH) occurs in vivo during carrageenin-induced arthritis.

Association of the crosslinked IgE receptor with the membrane skeleton is independent of the known signaling mechanisms in rat basophilic leukemia cells.

Ovarian hormones enhance 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated increases in cell proliferation and preneoplastic foci in a two-stage model for rat hepatocarcinogenesis.

[Inhibitors for protein tyrosine kinases, erbstatin, genistein and herbimycin A, induce differentiation of human neural tumor cell lines].

Histological study of therapy for infected nonvital permanent teeth with incompletely formed apices.

Cancer mortality in workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Respective roles of free radicals and energy supply in hypoxic rat liver injury after reoxygenation.

Long-term carcinogenesis studies on 2,3,7,8-tetrachlorodibenzo-p-dioxin and hexachlorodibenzo-p-dioxins.

The tissue distribution of 2,3,7,8-chlorine substituted dibenzo-p-dioxins in humans who died of cancer.

Mechanisms of cell death.

Roles of UDP-glucuronosyltransferases in chemical carcinogenesis.

Phenotypic variability and abnormal type I collagen unstable at body temperature in a family with mild dominant osteogenesis imperfecta.

[Role of collagen conformation in type II anticollagen immunity in rheumatoid polyarthritis].

An exploratory study of environmental and medical factors potentially related to childhood cancer.

Diethyldithiocarbamate, copper and neurological disorders.

Effects of divalent cations on the time course of post-tetanic decay of miniature endplate potential frequency in frogs.

Human exposure to 2,3,7,8-TCDD and risk of cancer.

[Parkinson's disease and environmental factors].

Identification of antibody epitopes within the CB-11 peptide of type II collagen. II. Computer modelling studies of peptides and the interpretation of epitope scanning results.

Identification of antibody epitopes within the CB-11 peptide of type II collagen. I: Detection of antibody binding sites by epitope scanning.

Diversity of the immune response to bovine type II and XI collagens in rats.

Heat shock proteins in human and mouse embryonic cells after exposure to heat shock or teratogenic agents.

On the mechanism of action of interferons: interaction with nonsteroidal anti-inflammatory agents, pentoxifylline (Trental) and cGMP inducers.

[Association between cancer and exposure to chlorophenols in a county located in southern Finland].

Response of the antral mucosa of the rat stomach to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Relationship between the concanavalin A-agglutinability and deformability of human erythrocytes.

Somatic embryogenesis and plant regeneration of squash Cucurbita pepo L cv. YC 60.

Single-dose cyclophosphamide for the prevention of bladder tumor implantation in F344 rats: site of drug activity.

Dioxins and dibenzofurans in adipose tissue of US Vietnam veterans and controls.

Conversion of retinol to retinal by rat liver microsomes.

The nature of the proteins lost from isolated rat skeletal muscle during experimental damage.

The major proteoglycan of adult rabbit skeletal muscle. Relationship to small proteoglycans of other tissues.

NTP technical report on the toxicity studies of Cresols (CAS Nos. 95-48-7, 108-39-4, 106-44-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Evidence for regulatory control of iron uptake from ferric maltol across the small intestine of the rat.

Biochemical study of repair of induced osteochondral defects of the distal portion of the radial carpal bone in horses by use of periosteal autografts.

Absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) after low dose dermal exposure.

Detection and characterization of Ah receptor in tissue and cells from human tonsils.

Biochemical characterization of the native tissue form of type X collagen from embryonic chick sternal cartilage and identification of a chymotrypsin-sensitive site within its triple-helical domain.

Variation in the expression of Mu-class glutathione S-transferase isoenzymes from human skeletal muscle. Evidence for the existence of heterodimers.

Isolation and characterization of cDNA clones to mouse macrophage and human endothelial cell tissue transglutaminases.

Cytotoxicity and chromosome aberrations in normal human oral keratinocytes induced by chemical carcinogens: Comparison of inter-individual variations.

Allylamine toxicity in embryonic myocardial myocyte reaggregate cultures.

Toxicity and tissue distribution of pentachlorophenol and permethrin in pipistrelle bats experimentally exposed to treated timber.

Biologically based pharmacodynamic models: tools for toxicological research and risk assessment.

Identification of collagens in the human testis.

Effect of natural ageing and antioxidant inhibition on liver antioxidant enzymes, glutathione system, peroxidation, and oxygen consumption in *Rana perezi*.

Ca²⁺-activated K⁺ channels in airway smooth muscle are inhibited by cytoplasmic adenosine triphosphate.

Cell-type-specific recognition of allogeneic cells by alloreactive cytotoxic T cells: a consequence of peptide-dependent allorecognition.

Intracellular regulation of the production and release of human erythroid-directed lymphokines.

Effect of experimental ocular hypertension on macrovacuolation in Schlemm's canal endothelial cells of monkey eyes.

Simple determination of iodine in small specimens of thyroid tissue.

Increased copper concentrations in rat tissues after acute intoxication with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Penetration, distribution and kinetics of 2,3,7,8-tetrachlorodibenzo-p-dioxin in human skin in vitro.

Ten- and ninety-day toxicity studies of 1,2-dichlorobenzene administered by oral gavage to Sprague-Dawley rats.

Characterization of fusion from without induced by herpes simplex virus.

The role of metabolism in chemical-induced pulmonary toxicity.

Effects of oxidants on protein breakdown in skeletal muscle.

Accumulation and release of adrenaline, and the modulation by adrenaline of noradrenaline release from rabbit blood vessels in vitro.

A comparative study of the effects of phebrol on the respiratory chains of rat liver, *Biomphalaria glabrata* and *Oncomelania nosophora*.

Comparison of the amino acid sequences of tissue-specific parvalbumins from chicken muscle and thymus and possible evolutionary significance.

Hexose uptake in primary cultures of bovine brain microvessel endothelial cells. I. Basic characteristics and effects of D-glucose and insulin.

Effects of exogenous auxins on expression of lipoxygenases in cultured soybean embryos.

Inducible bilirubin-degrading system of rat liver microsomes: role of cytochrome P450IA1.

Absorption and metabolic characteristics of p-aminobenzoic acid and its isomer, m-aminobenzoic acid, from the rat small intestine.

[Comparative study of the effectiveness of the classical and modified Cooper protocol for breast cancer chemotherapy].

The metabolism and excretion of prochloraz, an imidazole-based fungicide, in the rat.

Differentiation by hydroquinone of relaxations induced by exogenous and endogenous nitrates in non-vascular smooth muscle: role of superoxide anions.

Ah receptor in mice genetically "nonresponsive" for cytochrome P450IA1 induction: cytosolic Ah receptor, transformation to the nuclear binding state, and induction of aryl hydrocarbon hydroxylase by halogenated and nonhalogenated aromatic hydrocarbons in embryonic tissues and cells.

The cortical actomyosin system of cytochalasin D-treated lymphoblasts.

Homogeneous distribution of phosphofructokinase in the rat liver acinus: a quantitative histochemical study.

Active transport of ascorbic acid across the retinal pigment epithelium of the bullfrog.

Proteolytic cleavage sites in smooth muscle myosin-light-chain kinase and their relation to structural and regulatory domains.

GABA-labeled terminals form proportionally more synapses with dopaminergic neurons containing low densities of tyrosine hydroxylase-immunoreactivity in rat ventral tegmental area.

Stimulation by auxin of phospholipase A in membrane vesicles from an auxin-sensitive tissue is mediated by an auxin receptor.

In-vitro hepatotoxicity of three dichlorobenzene isomers in human liver slices.

Studies on the mechanism of the toxic action of sodium nitrite on intestinal absorption in rats.

Occurrence of an Inhibitor of Tissue-Type Plasminogen Activator in Seeds and in Vitro Cultures of *Erythrina caffra* Thunb.

Mitochondrial 3-2trans-Enoyl-CoA isomerase. Purification, cloning, expression, and mitochondrial import of the key enzyme of unsaturated fatty acid beta-oxidation.

Cardiotonic action of plumbagin on guinea-pig papillary muscle.

meso-2,3-Dimercaptosuccinic acid and prevention of arsenite embryotoxicity and teratogenicity in the mouse.

Evidence for arsenic as the immunosuppressive component of gallium arsenide.

In vitro identification of a soluble protein:geranylgeranyl transferase from rat tissues.

Cross-linking of residue 57 in the regulatory domain of a mutant rabbit skeletal muscle troponin C to the inhibitory region of troponin I.

The primary structure of skeletal muscle myosin heavy chain: IV. Sequence of the rod, and the complete 1,938-residue sequence of the heavy chain.

The primary structure of skeletal muscle myosin heavy chain: I. Sequence of the amino-terminal 23 kDa fragment.

Diverse forms of stress result in changes in cellular levels of osteonectin/SPARC without altering mRNA levels in osteoligament cells.

Quantitation of type I, III, and V collagens in human tissue samples by high-performance liquid chromatography of selected cyanogen bromide peptides.

The pyrimido-pyrimidine derivative RA-642: a potent inhibitor of ferrous-induced lipid peroxidation in cell membranes.

Alterations of hepatic acetyl-CoA carboxylase by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Requirement of heparan sulfate for bFGF-mediated fibroblast growth and myoblast differentiation.

Formation of large, membrane skeleton-free erythrocyte vesicles as a function of the intracellular pH and temperature.

Pentachlorophenol Residues in Porcine Tissue Following Preslaughter Exposure to Treated Wood Shavings.

The sequence A alpha-(154-159) of fibrinogen is capable of accelerating the t-PA catalysed activation of plasminogen.

Interaction between dietary vitamin A and single oral doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the TCDD-induced toxicity and on the vitamin A status in the rat.

Effects of chlordane on parameters of liver and muscle toxicity in man and experimental animals.

Dual-column high-performance liquid chromatographic cleanup procedure for the determination of polychlorinated dibenzo-p-dioxins and dibenzofurans in fish tissue.

Microheterogeneity of rat submaxillary gland kallikrein k10, a member of the kallikrein family.

Purification and immunohistochemical detection of an embryogenic cell protein in carrot.

2,3,7,8 Tetrachlorodibenzodioxin in fish from the Pigeon River of eastern Tennessee, USA: its toxicity and mutagenicity as revealed by the Ames Salmonella assay.

Tissue-specific and organ-specific expression of soybean auxin-responsive transcripts GH3 and SAURs.

IgG response is impaired in H2-c-fos transgenic mice.

Characteristics of estrogen-induced peroxidase in mouse uterine luminal fluid.

Biochemical alterations in skeletal muscle induced by 2,4-dichlorophenoxyacetic butyl ester during chick embryonic development.

Ca²⁺ homeostasis alterations induced by 2,4-dichlorophenoxyacetic butyl ester and 2,4-dichlorophenoxyacetic acid on avian skeletal muscle.

[Experimental study of cardiotoxic effect of the pesticide sulfocarbathione].

Acute and sub-acute paraquat poisoning in a pack of foxhounds.

Chronic effect of atrazine on hydromineral balance in the crab.

[Exposure to agricultural chemicals and oncogenic risk].

[An immunological and morphological study of focal staphylococcal infection against a background of long-term exposure to the herbicide linuron].

Soft tissue sarcoma and occupational exposures.

Efficacy of single or repeated hemoperfusion in a canine model of paraquat poisoning.

Sublethal and acute toxicity of the ethylene glycol butyl ether ester formulation of triclopyr to juvenile coho salmon (*Oncorhynchus kisutch*).

Paraquat poisoning. An overview of the current status.

Toxicokinetics of monochloroacetic acid: a whole-body autoradiography study.

[Free radicals in industrial medicine: their mechanisms of toxicity and biological relevance].

[The effect of chronic butyphos poisoning on protein and nucleic acid synthesis in various rat organs and activity of blood cholinesterase].

Chronic toxicity and oncogenicity of picloram in Fischer 344 rats.

Irreversible binding and toxicity of the herbicide dichlobenil (2,6-dichlorobenzonitrile) in the olfactory mucosa of mice.

Release of tissue paraquat into formalin solution during fixation.

The importance of epithelial uptake systems in lung toxicity.

A novel lung slice system with compromised antioxidant defenses.

Acrolein depletes the neuropeptides CGRP and substance P in sensory nerves in rat respiratory tract.

The effects of pesticides on some biochemical parameters of carp (*Cyprinus carpio* L.).

Initial accumulation of paraquat in the heart leading to acute death.

Potential of the cell specific toxicity of paraquat by 1,3-bis(2-chloroethyl)-1-nitrosourea (BCNU). Implications for the heterogeneous distribution of glutathione (GSH) in rat lung.

Association between soft tissue sarcomas, malignant lymphomas, and phenoxy herbicides/chlorophenols: evidence from occupational cohort studies.

Aplastic anaemia associated with organochlorine pesticide: case reports and review of evidence.

Toxicokinetics of paraquat in humans.

Paraquat pharmacokinetics using a subcutaneous toxic low dose in the rat.

Distribution of three common chlorophenoxyacetic acid herbicides into the rat brain.

[Distribution and elimination of C-14-2,4-dichlorophenoxyacetic acid (2,4 D) in rat tissues in acute poisoning].

[Structural changes in the lung in the late stage of fatal paraquat poisoning].

Determination of diquat in biological materials by electron spin resonance spectroscopy.

A meta-analysis of exposure to phenoxy acid herbicides and chlorophenols in relation to risk of soft tissue sarcoma.

[Biochemical changes in the brain tissue of white rats exposed to the herbicide acetochlor under acute and subacute oral experimental conditions].

Behavioral changes in rats fed a diet containing 2,4-dichlorophenoxyacetic butyl ester.

Oxygen radicals in lung pathology.

Regional H₂O₂ concentration in rat brain after hyperoxic convulsions.

Induction of superoxide dismutase in leukocytes by paraquat: correlation with age and possible predictor of longevity.

Acquisition and decay of heat-shock-enhanced postischemic ventricular recovery.

Energetic metabolism and fatigability in experimental myotonia.

Xanthine oxidase-derived H₂O₂ contributes to reperfusion injury of ischemic skeletal muscle.

Glutathione disulfide as index of oxidant stress in rat liver during hypoxia.

The determination of myeloperoxidase activity in liver.

Alterations of arachidonate metabolism in cardiovascular system by cigarette smoking.

Determination of pentachlorophenol in animal tissues: a Canadian perspective.

Human phagocytic cells as oxygen metabolite scavengers.

[The effect of ethanol and the catalase inhibitor 3-amino-1,2,4-triazole on lipid peroxidation in rat liver homogenate and subcellular fractions].

Pharmacokinetics and metabolism of triclopyr 3,5,6-trichloro-2-pyridinyloxyacetic acid) in Fischer 344 rats.

Effects of sulfur-containing metabolites of hexachlorobenzene on the heme metabolic enzymes in rat liver.

Metabolism of the glutathione conjugate of propachlor by in situ perfused kidneys and livers of rats.

[Negativation of tissue paraquat levels under continuous arteriovenous hemodialysis after accidental poisoning].

Assay of the human leukocyte enzymes myeloperoxidase and eosinophil peroxidase.

[Analysis of musk rheumatic oil by GC/FTIR].

Aminotriazole effects on lung and heart H₂O₂ detoxifying enzymes and TBA-RS at two pO₂.

Environmental actions of agrochemicals. 1. Side-effects of the herbicide 3-amino-1,2,4-triazole on a laboratory acarine/host-plant interaction (*Tetranychus urticae*/*Phaseolus vulgaris*) as revealed by electron microscopy.

Enantiomeric effects on excitation-contraction coupling in frog skeletal muscle by a chiral phenoxy carboxylic acid.

A role for a new vascular enzyme in the metabolism of xenobiotic amines.

The effects of pentachlorophenol (PCP) at the toad neuromuscular junction.

Accumulation and metabolism of 2,4,6-trichlorophenyl-4'-aminophenyl ether by carp.

Electron dense artefactual deposits in tissue sections: the role of ethanol, uranyl acetate and phosphate buffer.

Correlation between acute toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and total body fat content in mammals.

Antigen-induced cross-linking of the IgE receptor leads to an association with the detergent-insoluble membrane skeleton of rat basophilic leukemia (RBL-2H3) cells.

Reactive oxygen metabolites in endotoxin-induced acute renal failure in rats.

A critical review of the developmental toxicity and teratogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: recent advances toward understanding the mechanism.

Human body burden of polychlorinated dibenzofurans associated with toxicity based on the yusho and yucheng incidents.

Human HLA-DR beta gene hypervariable region homology in the biobreeding BB rat: selection of the diabetic-resistant subline as a rheumatoid arthritis research tool to characterize the immunopathologic response to human type II collagen.

Substitution of arginine for glycine at position 847 in the triple-helical domain of the alpha 1 (I) chain of type I collagen produces lethal osteogenesis imperfecta. Molecules that contain one or two abnormal chains differ in stability and secretion.

Regulation of polyamine biosynthesis by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Regulation of integrin mobility and cytoskeletal association in normal and RSV-transformed chick embryo fibroblasts.

Detection and characterization of [³H]2,3,7,8-tetrachlorodibenzo-p-dioxin binding to Ah receptor in a rainbow trout hepatoma cell line.

Potassium accumulation in the globally ischemic mammalian heart. A role for the ATP-sensitive potassium channel.

Enhanced deposition of predominantly type I collagen in myocardial disease.

An inhibition ELISA for the quantification of collagens type I and type II in cyanogen bromide-digested tissues using fragment-directed antibodies.

Specificity of antibodies to type II collagen in rheumatoid arthritis.

Immunoglobulin heavy-chain-associated amyloidosis.

Epitopes of Escherichia coli alpha-hemolysin: identification of monoclonal antibodies that prevent hemolysis.

Organization and disorganization of actin filaments in human epidermal keratinocytes: heat-shock treatment and recovery process.

Oxygen extraction in lamb skeletal muscle.

Diversity of antibodies to type II collagen in patients with rheumatoid arthritis: detection by binding to alpha-chains and to cyanogen bromide peptides.

Another mechanism for the defect in type III collagen accumulation in Ehlers-Danlos syndrome type IV: increased intracellular degradation of the procollagen.

Influence of the Ah locus on the humoral immunotoxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: evidence for Ah-receptor-dependent and Ah-receptor-independent mechanisms of immunosuppression.

Xenobiotic-inducible expression of murine glutathione S-transferase Ya subunit gene is controlled by an electrophile-responsive element.

Ontogeny of mitochondrial calcium transport in spontaneously hypertensive (SHR) and WKY rats.

Detection of point mutations in type I collagen by RNase digestion of RNA/RNA hybrids.

Processing of the lipid-mobilizing peptide beta-lipotropin in rabbit adipose tissue.

Effect of a new herbo-mineral hypolipidemic agent on plasma lipoprotein pattern in rat atherosclerosis.

Alteration of collagen composition and cross-linking in keloid tissues.

Lack of I-compounds in DNA from a spectrum of Morris hepatomas.

Purification and characterization of a Mr approximately 66,000 lung-derived (paracrine) growth factor that preferentially stimulates the in vitro proliferation of lung-metastasizing tumor cells.

Partial characterization of mechanism of insulin accumulation in H35 hepatoma cell nuclei.

Immunogenicity of collagenous implants.

Exposure to dioxins as a risk factor for soft tissue sarcoma: a population-based case-control study.

Radiological "metamorphosis" in a patient with severe congenital osteogenesis imperfecta.

An intron mutation in the human alpha 1(I) collagen gene alters the efficiency of pre-mRNA splicing and is associated with osteogenesis imperfecta type II.

Ethylene dichloride: the influence of disulfiram or ethanol on oncogenicity, metabolism, and DNA covalent binding in rats.

Tissue distribution, metabolism, and excretion of 14C-TCDD in a TCDD-susceptible and a TCDD-resistant rat strain.

Characterization of the Ah receptor mediating aryl hydrocarbon hydroxylase induction in the human liver cell line Hep G2.

Altered collagen metabolism in osteogenesis imperfecta fibroblasts: a study on 33 patients with diverse forms.

Cellular transport and accumulation of thiotepa.

Antibodies to type II collagen in SLE: a role in the pathogenesis of deforming arthritis?

Changes in the composition and metabolism of arterial collagens during the development of pulmonary hypertension in rabbits.

The antioxidative properties of carnosine and other drugs.

Epidemiologic studies of cancer in agricultural workers.

Uptake and release of calcium ions by heavy sarcoplasmic reticulum fraction of normal and malignant hyperthermia-susceptible human skeletal muscle.

Monitoring carcinogen actions on DNA by ³²P-postlabeling.

Collagen species in various sized human arteries and their changes with intimal proliferation.

Differential enzyme induction of mouse liver and lung following a single low or high dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Absorption, distribution, excretion and metabolism of a single oral dose of [¹⁴C]tri-o-cresyl phosphate (TOCP) in the male rat.

Induction of ethoxyresorufin-O-deethylase and inhibition of glucocorticoid receptor binding in skin and liver of haired and hairless HRS/J mice by topically applied 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Lung injury in Fischer but not Sprague-Dawley rats after short-term hyperoxia.

Effects of glutathione depletion on the acute nephrotoxic potential of arsenite and on arsenic metabolism in hamsters.

The association of selected cancers with service in the US military in Vietnam. II. Soft-tissue and other sarcomas. The Selected Cancers Cooperative Study Group.

Influence of SK&F 95587 and BN 50730 on bronchoconstrictor responses in the cat.

Effects of the food mutagens MeIQx and PhIP on the expression of cytochrome P450IA proteins in various tissues of male and female rats.

Cloning of the H,K-ATPase beta subunit. Tissue-specific expression, chromosomal assignment, and relationship to Na,K-ATPase beta subunits.

Amino acid sequence and characterization of a heparin-binding neurite-promoting factor (p18) from bovine brain.

Lys-65 and Glu-168 are the residues for carbodiimide-catalyzed cross-linking between the two heads of rigor smooth muscle heavy meromyosin.

Production of tumour-inhibitory lignans in callus cultures of *Podophyllum hexandrum*.

Rapid induction of acetylcholine receptor aggregates by a neural factor and extracellular Ca²⁺.

Comparison of the effects of fibrinogen and fibrin products and isolated peptide chains on the fibrin-mediated stimulation of plasminogen activation by tissue-type plasminogen activator, and on the fibrin-dependent enhancement of the amidolytic activity of one-chain tissue-type plasminogen activator.

Abscisic Acid Regulation of DC8, A Carrot Embryonic Gene.

Prothymocyte activity is reduced by perinatal 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

Lightly chlorinated ortho-substituted PCB congeners decrease dopamine in nonhuman primate brain and in tissue culture.

Processing of thyrotropin-releasing hormone (TRH) prohormone in the rat olfactory bulb generates novel TRH-related peptides.

2,3,7,8-Tetrachlorodibenzo-p-dioxin inhibition of 17 beta-estradiol-induced increases in rat uterine epidermal growth factor receptor binding activity and gene expression.

Sensory neurotoxicology: use of the olfactory system in the assessment of toxicity.

Collagen synthesis and mineralization in the early phase of distraction bone healing.

Lysis of fibrillar collagen by neutrophils in synovial fluid. A role for surface-bound immunoglobulins.

Recent progress in the use of the technique of non-radioactive in situ hybridization histochemistry: new tools for molecular neurobiology.

Energy dependence of cytosolic enzyme efflux from rat skeletal muscle.

Effect of fibrin-like stimulators on the activation of plasminogen by tissue-type plasminogen activator (t-PA)--studies with active site mutagenized plasminogen and plasmin resistant t-PA.

Guanylate cyclase in olfactory cilia from rat and pig.

Synthesis and preliminary evaluation of carbon-11-meta-hydroxyephedrine: a false transmitter agent for heart neuronal imaging.

Energy dependence of sodium-calcium exchange in vascular smooth muscle cells.

Tissue uptake of lithium in guinea-pig isolated intestinal mucosa after chronic lithium ingestion.

Priming the system that causes the release of cytosolic proteins in the perfused rat heart.

The primary structure of rabbit muscle enolase.

Evidence for the absence of cysteine S-conjugate N-acetyltransferase activity in the metabolism of propachlor, naphthalene, and dichlobanil in calves.

How toxic is 2,3,7,8-tetrachlorodibenzodioxin to humans?

Norepinephrine and BRL 37344 stimulate adenylate cyclase by different receptors in rat brown adipose tissue.

Contact site between inner and outer mitochondrial membrane: a dynamic microcompartment for creatine kinase activity.

High frequency embryoid and plantlet formation from tissue cultures of the Finger millet-*Eleusine coracana* (L.) Gaertn.

Regeneration of *Lycium barbarum* L. plants from leaf tissue, callus culture and callus protoplasts.

Factors Influencing the Tissue Culture and the *Agrobacterium tumefaciens*-Mediated Transformation of Hybrid Aspen and Poplar Clones.

Inorganic arsenic methylation by rat tissue slices.

Age-related changes in dermal absorption of 2,3,7, 8-tetrachlorodibenzo-p-dioxin and 2,3,4,7,8-pentachlorodibenzofuran.

The phosphocreatine shuttle of sea urchin sperm: flagellar creatine kinase resulted from a gene triplication.

A highly specific and quantitative method for determining type III/I collagen ratios in tissues.

The role of cytochromes P-450 and flavin-containing monooxygenase in the metabolism of (S)-nicotine by rabbit lung.

Glutathione enhancement in various mouse organs and protection by glutathione isopropyl ester against liver injury.

Sequence analysis, tissue distribution and regulation by cell depolarization, and second messengers of bovine secretogranin II (chromogranin C) mRNA.

Uptake and phytotoxicity of the herbicide metsulfuron methyl in corn root tissue in the presence of the safener 1,8-naphthalic anhydride.

Intracellular accumulation of azithromycin by cultured human fibroblasts.

Interrelation between nucleotide degradation and aldehyde formation in red blood cells. Influence of xanthine oxidase on metabolism: an application of nucleotide and aldehyde analyses by high-performance liquid chromatography.

Multiple isoelectric variants of copper, zinc-superoxide dismutase from rat liver.

Fluorescence immunolocalization of bound atrazine residues in plant tissue.

Collagen biosynthesis in rabbit intraarticular patellar tendon transplants.

Age-related DNA modifications (I-compounds): modulation by physiological and pathological processes.

A physiological pharmacokinetic description of the tissue distribution and enzyme-inducing properties of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat.

Metabolism of alachlor by rat and mouse liver and nasal turbinate tissues.

Concentration of membrane antigens by forward transport and trapping in neuronal growth cones.

Biochemical and functional characterization of human tissue-type plasminogen activator variants obtained by deletion and/or duplication of structural/functional domains.

Selection and characterization of sethoxydim- tolerant maize tissue cultures.

Acetobacter cellulose pellicle as a temporary skin substitute.

Bundling and cross-linking of intermediate filaments of the nervous system.

2,3,7,8-Tetrachlorodibenzo-p-dioxin pretreatment of female mice altered tissue distribution but not hepatic metabolism of a subsequent dose.

L-NG-monomethyl arginine and L-NG-nitro arginine inhibit non-adrenergic, non-cholinergic relaxation of the mouse anococcygeus muscle.

Lipoamidase (lipoyl-X hydrolase) from pig brain.

Oxidant-induced haemoprotein degradation in rat tissue slices: effect of bromotrichloromethane, antioxidants and chelators.

Effect of polymorphonuclear leukocyte-derived oxygen free radicals and hypochlorous acid on cardiac function and some biochemical parameters.

Kinetic studies of plasminogen activation by epithelial tissue plasminogen activator.

Effects of TCDD on vitamin A status and liver microsomal enzyme activities in a TCDD-susceptible and a TCDD-resistant rat strain.

Impairment of prothymocyte activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Cross-linking of smooth muscle caldesmon to the NH₂-terminal region of skeletal F-actin.

Relative distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in human hepatic and adipose tissues.

Use of the acyl azide method for cross-linking collagen-rich tissues such as pericardium.

Molecular cloning of human protein 4.2: a major component of the erythrocyte membrane.

³¹P NMR measurement of mitochondrial uncoupling in isolated rat hearts.

Isolation and amino acid sequence of a novel 6.8-kDa mitochondrial proteolipid from beef heart. Use of FAB-MS for molecular mass determination.

Isolation to homogeneity and partial characterization of a histo-blood group A defined Fuc alpha 1----2Gal alpha 1----3-N-acetylgalactosaminyltransferase from human lung tissue.

Purification to apparent homogeneity and partial amino acid sequence of rat liver O⁶-alkylguanine-DNA-alkyltransferase.

Characterization of zero-length cross-links between rabbit skeletal muscle troponin C and troponin I: evidence for direct interaction between the inhibitory region of troponin I and the NH₂-terminal, regulatory domain of troponin C.

Patterns of expression of the JIM4 arabinogalactan-protein epitope in cell cultures and during somatic embryogenesis in *Daucus carota* L.

Measurements of viability suitable for plant tissue cultures.

Glutathione conjugation and cytochrome P-450 metabolism of methyl chloride in vitro.

Physiologic neutralization mechanisms and the response of the corneal endothelium to hydrogen peroxide.

Ascorbate- and hemoglobin-dependent brain chemiluminescence.

Sodium-azide-evoked noradrenaline release from peripheral nerves of rabbit pulmonary artery.

Dioxin levels in adipose tissues of hospitalized women living in the south of Vietnam in 1984-89 with a brief review of their clinical histories.

Metabolic inhibitors reversibly alter the basal membrane potential of the gecko retinal pigment epithelium.

Agrobacterium in plant disease, biological disease control and plant genetic engineering.

High molecular weight forms of deferoxamine: novel therapeutic agents for treatment of iron-mediated tissue injury.

Oxidative stress induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

The ostrich pituitary contains a major peptide homologous to mammalian chromogranin A(1-76).

Possible roles of free radicals in alcoholic tissue damage.

Persistence of various polychlorinated dibenzo-p-dioxins and dibenzofurans (PCDDs and PCDFs) in hepatic and adipose tissue of marmoset monkeys.

Placental markers of human exposure to polychlorinated dibenzofurans and polychlorinated biphenyls: implications for risk assessment.

On the molecular interactions between fibrin, tissue-type plasminogen activator and plasminogen.

Differences in time course of hepatocyte and pancreatic damage after incubation with trypsin, chymotrypsin and 2,4-dinitrophenol.

Disposition, elimination, and metabolism of tri-o-cresyl phosphate following daily oral administration in Fischer 344 male rats.

Early appearance of tyrosine hydroxylase immunoreactive cells in the mesencephalon of mouse embryos.

Pre-natal (segment II) toxicity study of cinnamic aldehyde in the Sprague-Dawley rat.

Diquat hepatotoxicity in the Fischer-344 rat: the role of covalent binding to tissue proteins and lipids.

Effects of a diphenyl ether herbicide (CNP emulsion) on mouse fetuses.

HPLC measurement of chlorophenoxy herbicides, bromoxynil, and ioxynil, in biological specimens to aid diagnosis of acute poisoning.

DNA strand breaks in mammalian tissues induced by methylarsenics.

Effects of preconceptional and gestational exposure to Tordon 202c on fetal growth and development in CD-1 mice.

Cancer risk in a cohort of licensed pesticide users.

Penetration studies and residue determinations of 2,4-dichlorophenoxyacetic acid butyl ester in fertile hen eggs and chicks hatched from treated eggs.

[Cytogenetic activity of the butylcaptax defoliant transformation product].

Development and application of immunoassay for paraquat: radioimmunoassay.

Production and toxicological application of anti-paraquat antibodies.

The effects of 24% paraquat (1,1'-dimethyl-4,4'-bipyridylium dichloride) on hemodynamics, blood gases, plasma lactate and plasma catecholamines in dogs.

Immunotherapy for the treatment of acute paraquat poisoning.

Effects of paternal subacute exposure to Tordon 202c on fetal growth and development in CD-1 mice.

Teratological evaluation of the phenoxyacid herbicide MCPA in the regenerating forelimb of the adult newt.

[Characteristics of the development of cataract models against a background of poisoning].

The ratio of oxidized/reduced glutathione as an index of oxidative stress in various experimental models of shock syndrome.

Phenoxy herbicides and cancer: insufficient epidemiologic evidence for a causal relationship.

[Lung changes in rats under the action of paraquat and the importance of antioxidants].

Determination of paraquat in raw and formalin-fixed tissues by electron spin resonance (ESR) spectroscopy.

An immunohistochemical study of the fibrosing process in paraquat lung injury.

Phenoxyacetic acid herbicides and chlorophenols and the etiology of lymphoma and soft-tissue neoplasms.

Enhanced in vivo H₂O₂ generation by rat kidney in glycerol-induced renal failure.

An evaluation of purified reconstituted type 1 collagen fibers.

Effects of cholesterol feeding on the distribution, metabolism, and accumulation of pentachlorobenzene in rats.

Effect of diltiazem on 2,4-D-induced myotonia in rats.

Mitochondria and xanthine oxidase both generate reactive oxygen species in isolated perfused rat liver after hypoxic injury.

Evolution of metaplastic squamous cells of alveolar walls in pulmonary fibrosis produced by paraquat. An ultrastructural and immunohistochemical study.

Stereoselective sulfation of R,S-4'-hydroxypropranolol by canine hepatic cytosol and partially purified phenolsulfotransferases.

Possible catabolism of paraquat in mouse brain microsomes.

Growth effects, uptake and metabolism of trifluralin in tissue cultures.

Renal handling of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in rats.

Detection of free radicals as a consequence of dog tracheal epithelial cellular xenobiotic metabolism.

The accumulation of cystamine and its metabolism to taurine in rat lung slices.

Metallothionein-I accumulation in the rat lung following a single paraquat administration.

Disposition of 2,4-dichlorophenoxyacetic acid dimethylamine by Fischer 344 rats dosed orally and dermally.

Metabolism of pentachlorophenol by fish.

Catalase is needed to avoid tissue peroxidation in *Rana perezi* in normoxia.

Influence of hydrogen peroxide on adenine uptake by iris, ciliary epithelium and corneal endothelium.

Spermidine uptake by type II pulmonary epithelial cells in primary culture.

Changes in the cross-linking of collagen from rat tail tendons due to diabetes.

Pattern of humoral reactivity to type II collagen in rheumatoid arthritis.

Teratogenic assessment of 2,4-dichlorophenol in Fischer 344 rats.

Effects of hypoxia, elevated K⁺ and acidosis on the potency of verapamil, diltiazem and nifedipine in the guinea-pig isolated papillary muscle.

Cellular transport and accumulation of thiotepa in murine, human, and avian cells.

Mitochondrial myopathies: morphological and biochemical studies in human muscle cultures.

Purification and characterization of recombinant human parathyroid hormone-related protein.

Prediction and evaluation of the effect of iron treatment in anaemic RA patients.

Species differences in estrogen receptors and in the response to 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

Cottonseed meal (gossypol) toxicosis in a swine herd.

Transcriptional start site in the mouse Cyp1a1 (cytochrome P1450) gene.

[Problems in the root canal treatment of premature teeth with open apex].

Estimation of the body burden of arsenic in a child fatally poisoned by arsenite weedkiller.

Hexose transport in human myoblasts.

Human skin and post-burn scar hyaluronan: demonstration of the association with collagen and other proteins.

Regional hemodynamic responses to hypoxia and hypermetabolism in polycythemic dogs.

Type II collagen defects in the chondrodysplasias. I. Spondyloepiphyseal dysplasias.

Mortality in an area contaminated by TCDD following an industrial incident.

The effects of prelatent/latent iron deficiency on physical work capacity.

Ten-year mortality study of the population involved in the Seveso incident in 1976.

Target tissue morphology and serum biochemistry following 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure in a TCDD-susceptible and a TCDD-resistant rat strain.

Retinoic acid and 2,3,7,8-tetrachlorodibenzo-p-dioxin selectively enhance teratogenesis in C57BL/6N mice.

Characterization of MB creatine kinase isoform conversion in vitro and in vivo in dogs.

Structural characterization of kappa II Inc, a new amyloid immunoglobulin.

Developmental toxicity of perfluorodecanoic acid in C57BL/6N mice.

A lethal variant of osteogenesis imperfecta has a single base mutation that substitutes cysteine for glycine 904 of the alpha 1(I) chain of type I procollagen. The asymptomatic mother has an unidentified mutation producing an overmodified and unstable type I procollagen.

Basal lipid peroxidation in substantia nigra is increased in Parkinson's disease.

Update of mortality among chemical workers with potential exposure to the higher chlorinated dioxins.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on lipid synthesis and lipogenic enzymes in the rat.

Effect of growth state, tumor promoters, and transformation upon intercellular communication between C3H/10T1/2 murine fibroblasts.

[The specific effects of new phenoxyacetic acid derivatives at the cellular membrane level].

Levels of polychlorinated dibenzo-p-dioxins and dibenzofurans in workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Ehlers-Danlos syndrome type IV (EDS IV) as model of a defective biopolymer composite material.

Learning in monkeys exposed perinatally to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Dioxins and furans in the mother and possible effects on the fetus and newborn breast-fed baby.

Differential effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on adipose tissue lipoprotein lipase activity in the guinea pig, rat, hamster, rabbit, and mink.

The effect of oxidants on biomembranes and cellular metabolism.

Differential [32P]-labeling of chemically induced stress proteins in S-phase mouse lymphoma cells.

Multiple mutations in the variable region of the kappa light chains of three monoclonal human IgM with anti-myelin-associated glycoprotein activity.

The reactivity of sulfhydryl groups of bovine cardiac troponin C.

Achilles tendon replacement by a collagen fiber prosthesis: morphological evaluation of neotendon formation.

[Effects of FeSO₄ on electrical and mechanical activity of guinea pig papillary muscles].

[The induction of the beta state of the comuton regulation of mitochondrial oxidative phosphorylation by 2,4-DNP and malonate].

Effect of dietary lipids and vitamin E on in vitro lipid peroxidation in rat liver and kidney homogenates.

Amino acid sequences of the two major isoforms of troponin C from crayfish.

Marked alterations in retinoid homeostasis of Sprague-Dawley rats induced by a single i.p. dose of 10 micrograms/kg of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The interactions of desferrioxamine and hydroxypyridone compounds with haemoglobin and erythrocytes.

Triphasic inotropic response of guinea-pig papillary muscle to murrayquinone-A isolated from Rutaceae.

Purification of recombinant human tissue factor.

Sulphotransferase-mediated activation of the carcinogen 5-hydroxymethyl-chrysene. Species and sex differences in tissue distribution of the enzyme activity and a possible participation of hydroxysteroid sulphotransferases.

Molecular cloning of cDNA for proteasomes (multicatalytic proteinase complexes) from rat liver: primary structure of the largest component (C2).

Regulation of Embryo Dormancy by Manipulation of Abscisic Acid in Kernels and Associated Cob Tissue of Zea mays L. Cultured in Vitro.

Prolonged aerobic exercise: physiological studies in rat gastrocnemius with additional observations on the effects of acute mitochondrial blockade.

Effects of the new nitrosourea derivative, fotemustine, on the glutathione reductase activity in rat tissues in vivo and in isolated rat hepatocytes.

Immunocytochemical localization of intracellular acidic compartments: rat proximal nephron.

Complete amino-acid sequence of subfragment-2 in adult chicken skeletal muscle myosin.

Radioiodinated phenoxyacetic acid derivatives as potential brain imaging agents. II. Structure-biodistribution relationship.

Relationship between coronary flow and high energy phosphates in the isolated perfused rat heart, with special reference to the effects of anoxia, iodoacetic acid, and 2,4-dinitrophenol.

Methods of microphotometric assay of succinate dehydrogenase and cytochrome c oxidase activities for use on human skeletal muscle.

Lethal hydroxyl radical production in paraquat-treated plants.

Villus contraction aids repair of intestinal epithelium after injury.

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters embryonic palatal medial epithelial cell differentiation in vitro.

Differential metabolism of sodium azide in maize callus and germinating embryos.

Intestinal-like alkaline phosphatase expressed in normal human adult kidney.

Immunoidentification of type XII collagen in embryonic tissues.

Effects of metabolic inhibitors and incubation temperature on the saturable uptake of propranolol by isolated rat lung tissue.

Sodium salicylate facilitates calcium-dependent release of transmitter at mouse neuromuscular junctions.

Structure-function relationships in cardiac troponin T.

Presence of multiple species of polypeptides immunologically related to transcription factor TFIIIA in adult *Xenopus* tissues.

Characterization of multiple forms of the Ah receptor: comparison of species and tissues.

Caldesmon150, caldesmon77 and skeletal muscle troponin T share a common antigenic determinant.

[Antigenic activity of the N-terminal peptide of porcine muscle lactate dehydrogenase, obtained upon cyanogen bromide cleavage].

The presence of chlorophenols and their conjugates in Finnish human adipose and liver tissues.

Homology between the cDNAs encoding phosphoprotein p19 and SCG10 reveals a novel mammalian gene family preferentially expressed in developing brain.

Transport of cefodizime, a novel third generation cephalosporin antibiotic, in isolated rat choroid plexus.

Aplysia californica neurons R3-R14: primary structure of the myoactive histidine-rich basic peptide and peptide I.

Stimulation of in vivo hepatic uptake and in vitro hepatic binding of [125I]2-iodo-3,7,8-trichlorodibenzo-p-dioxin by the administration of agonist for the Ah receptor.

[125I]2-iodo-3,7,8-trichlorodibenzo-p-dioxin-binding species in mouse liver induced by agonists for the Ah receptor: characterization and identification.

Effects of 2,4-dinitrophenol and anoxia on the inorganic-pyrophosphate content of the spadix of *Arum maculatum* and the root apices of *Pisum sativum*.

Amino-acid sequence of the short subfragment-2 in adult chicken skeletal muscle myosin.

Release of a volatile factor from solutions of oxazaphosphorines which damage normal and malignant cells.

Effects of DIDS on the chick retinal pigment epithelium. II. Mechanism of the light peak and other responses originating at the basal membrane.

Detection and characterization of a low affinity form of cytosolic Ah receptor in livers of mice nonresponsive to induction of cytochrome P1-450 by 3-methylcholanthrene.

Modification of essential carboxyl group in rabbit muscle phosphorylase by water-soluble carbodiimide.

Functional characterization of monoclonal antibodies directed against fibrin binding domains of tissue-type plasminogen activator.

[The effect of hepatotoxins on the activity of organelle-specific enzymes and metabolism of liver lipids].

Amino acid sequence of horseshoe crab, *Tachypleus tridentatus*, striated muscle troponin C.

[Tissue distribution, inductive effect on liver enzymes and acute toxicity of 2,3,4,7,8-pentachlorodibenzofuran in Golden Syrian hamsters].

Polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans: the risks to human health. A review.

Acetazolamide inhibits acidification by the turtle bladder independent of cell pH.

Environmental occurrence, abundance, and potential toxicity of polychlorinated biphenyl congeners: considerations for a congener-specific analysis.

[Polychlorinated dibenzo-p-dioxins in the subcutaneous adipose tissue of yusho patients].

Iron stimulation of free radical-mediated porphyrinogen oxidation by hepatic and renal mitochondria.

The effect of a low pH saline perfusate upon the integrity of the energy-depleted rat blood-brain barrier.

Uptake of CD-349 and nitrendipine into bovine intrapulmonary artery and vein.

The distribution of [¹⁴C]-2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and its effect on the vitamin A content in parenchymal and stellate cells of rat liver.

Induction of hepatic cytochrome P450 gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Temperature-sensitive steps in the secretory pathway for von Willebrand factor in endothelial cells.

³²P-postlabeling assay for carcinogen-DNA adducts and other dna modifications.

Structural characterization and localization of corticotropin-releasing factor in testis.

The protein components of the 12-nanometer microfibrils of elastic and nonelastic tissues.

Somatic embryogenesis and plant regeneration in diploid *Allium fistulosum* × *A. cepa* F1 hybrid onions.

Adventitious shoot regeneration from leaf tissue of three pear (*Pyrus* sp.) cultivars in vitro.

Effect of 1-Aminocyclopropane-1-carboxylic acid and aminoethoxyvinylglycine on ethylene emanation and somatic embryogenesis from orchardgrass leaf cultures.

Somatic embryogenesis and plant regeneration in inflorescence and seed derived callus cultures of *Poa pratensis* L. (Kentucky bluegrass).

Inhibitors of protein phosphatase-1. Inhibitor-1 of bovine adipose tissue and a dopamine- and cAMP-regulated phosphoprotein of bovine brain are identical.

Influence of 2,3-dimercaptopropane-1-sulfonate and dimercaptosuccinic acid on the mobilization of mercury from tissues of rats pretreated with mercuric chloride, phenylmercury acetate or mercury vapors.

Nucleotide regulatory sites on skeletal myosin.

[Histochemical study on the mucosubstances of the calculi of the main excretory duct of the human submandibular gland].

Non-mitochondrial calcium ion regulation in rat ventricular myocytes.

Profile of sequential determinants in tissue polypeptide antigen BrCN:B fragment.

Somatic embryogenesis and plant regeneration from cell suspension and tissue cultures of mature himalayan poplar (*Populus ciliata*).

Surface tension in the developing mammal: anisotropic tension generation in the dorsal skin of the perinatal rat.

Interconversion of *Drosophila* nuclear lamin isoforms during oogenesis, early embryogenesis, and upon entry of cultured cells into mitosis.

Amino-terminal sequence analysis of rat heart and muscle glycogen synthase: homology to the rabbit enzyme and the implications for hormonal control.

Effect of calmodulin on sarcoplasmic reticular Ca^{2+} -transport in the aging heart.

[An evaluation of the radiation similarity between soft biological tissue and a modified ferrosulfate dosimeter].

Comparative dermal absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin and three polychlorinated dibenzofurans.

Selective induction of heme oxygenase-1 isozyme in rat testis by human chorionic gonadotropin.

Similarities of toluene and o-cresol neuroexcitation in rats.

[Centrosome behavior in the exposure of tissue culture cells to energy metabolism inhibitors].

Evaluation of the pyroantimonate method for detecting intracellular calcium localization in smooth muscle fibers by the X-ray microanalysis of cryosections.

Effects of immunosuppressive chemicals on lymphoid development in foetal thymus organ cultures.

[Features of ultrastructural changes of tumor cells in tissue culture under the effect of energy metabolism inhibitors].

Metabolism of transplacental carcinogens.

Effect of quinidine on the hepatic uptake of digoxin in guinea pigs.

[Effect of amines on insulin-stimulated processes: the transport of sugars and synthesis of glycogen in frog sartorius muscles].

Influence of aging on chemically induced hepatotoxicity: role of age-related changes in metabolism.

Improved procedures for pineal gland fixation for electron microscopy.

[The microsurgical treatment of penetrating wounds of the cornea with the use of collagenous materials].

Human urinary prokallikrein--structural analysis on activation mechanism.

Cationic polyelectrolytes: potent opsonic agents which activate the respiratory burst in leukocytes.

Adhering lung macrophages produce superoxide demonstrated with desferal-Mn(IV).

Sodium-azide-evoked noradrenaline and catecholamine release from peripheral sympathetic nerves and chromaffin cells.

H₂O₂ and cGMP may function as an O₂ sensor in the pulmonary artery.

Effect of cellular function inhibitors on the infection of Frp/3 cells by hepatitis A virus.

Synthesis and regional mouse brain distribution of [¹¹C]nisoxetine, a norepinephrine uptake inhibitor.

Health and reproductive outcomes among American Legionnaires in relation to combat and herbicide exposure in Vietnam.

Reproductive behaviour and consistent patterns of abnormality in offspring of Vietnam veterans.

[The influence of long-term utilization of some herbicides on oral cavity tissues of white rats].

Liposuction for fat biopsy.

Functional teratogens of the rat kidney. I. Colchicine, dinoseb, and methyl salicylate.

Inter-rater agreement in the assessment of occupational exposure to herbicides.

Determination of paraquat from formalin-fixed tissue.

Current perspectives on clinical and experimental single lung transplantation.

Allylamine-induced vascular toxicity in vitro: prevention by semicarbazide-sensitive amine oxidase inhibitors.

Acclimatization of roach, *Rutilus rutilus* (L.), to toxic components of kraft pulp mill effluents.

Acute MCPD intoxication: report of two cases.

Changes in elastic-related fibers in the human paraquat lung.

An enzyme-linked immunosorbent assay for plasma-paraquat levels of poisoned patients.

[Penta-chlorophenol (Xylophene) poisoning].

Lipid peroxidation and tissue injury by ferric citrate in paraquat-intoxicated mice.

2,4-Dichlorophenoxyacetic acid intoxication increases its accumulation within the brain.

Effects of prenatal exposure to 2,4-D/2,4,5-T mixture on postnatal changes in rat brain glutamate, GABA, protein, and nucleic acid levels.

Toxicity and distribution of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in developing chick embryos.

Pulmonary elastic fiber degradation in paraquat toxicity. An electron microscopic immunohistochemical study.

Uptake and accumulation of pentachlorophenol and sodium pentachlorophenate by earthworms from water and soil.

Effects of methylprednisolone on acute lung paraquat toxicity in sheep.

Toxicity of 2-hydrazinoethanol in turkey poults.

Host defence mechanisms in the bladder. II. Disruption of the layer of mucus.

Autoradiography of [¹⁴C]paraquat or [¹⁴C]diquat in frogs and mice: accumulation in neuromelanin.

Intramuscular pH and endurance are abnormal in skeletal muscles from rats with experimental myotonia.

Reactive oxygen species during ischemia-reflow injury in isolated perfused rat liver.

Protective effect of alpha-human atrial natriuretic polypeptide (alpha-hANP) on chemical-induced pulmonary edema.

Pulmonary indoleamine 2,3-dioxygenase activity and its significance in the response of rats, mice, and rabbits to oxidative stress.

Mitochondria as the primary site of acetaldehyde metabolism in beef and pig liver slices.

Validation study of gas chromatographic determination of pentachlorophenol in animal liver.

Toxicokinetics and bioavailability of paraquat in rats following different routes of administration.

The accumulation and localisation of putrescine, spermidine, spermine and paraquat in the rat lung. In vitro and in vivo studies.

Thermospray liquid chromatographic-mass spectrometric method for the analysis of metribuzin and its metabolites.

Dioxins and dibenzofurans in blood and adipose tissue of Agent Orange-exposed Vietnam veterans and matched controls.

Metabolism and excretion of orally and intraperitoneally administered methylarsonic acid in the hamster.

The development of a C1q anti-C1q immunoabsorbent for removal of immune complexes from plasma.

Stimulation of interleukin-1 alpha and interleukin-1 beta release from human monocytes by cyanogen bromide peptides of type II collagen.

Type II achondrogenesis-hypochondrogenesis: identification of abnormal type II collagen.

Organ-specific effects of long term feeding of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 1,2,3,7,8-pentachlorodibenzo-p-dioxin on I-compounds in hepatic and renal DNA of female Sprague-Dawley rats.

Toxicology and pathology of methyl bromide in F344 rats and B6C3F1 mice following repeated inhalation exposure.

Substitution of cysteine for glycine within the carboxyl-terminal telopeptide of the alpha 1 chain of type I collagen produces mild osteogenesis imperfecta.

Soft tissue sarcoma risk in Swedish licensed pesticide applicators.

Comparative acute systemic toxicity of sodium arsenite and dichloro(2-chlorovinyl)arsine in rabbits.

Molecular diversity in the abdominal aortic aneurysm phenotype.

Characterization of nicked myotoxin a and its effect on the sarcoplasmic reticulum calcium pump.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on de novo fatty acid and cholesterol synthesis in the rat.

Effect of D,L-alpha-difluoromethyl ornithine on cleft palate induced by the TCDD congener, 3,3',4,4'-tetrachloroazoxybenzene, in the fetuses of mice.

Atypical myoglobinuria: an acute myopathy in grazing horses.

A proposed occupational exposure limit for 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Differential gene expression in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD). Noncoordinate regulation of a TCDD-induced aldehyde dehydrogenase and cytochrome P-450c in the rat.

The association between soft tissue sarcomas and exposure to phenoxyacetic acids. A new case-referent study.

Intermediary metabolism of 2,6-dichlorobenzonitrile (dichlobenil) in chickens and growth of chickens fed dichlobenil.

Demonstration and characterization of a transient arthritis in rats following sensitization of synovial mast cells with antigen-specific IgE and parenteral challenge with specific antigen.

Type X collagen alterations in rachitic chick epiphyseal growth cartilage.

Type I procollagen in the severe non-lethal form of osteogenesis imperfecta. Defective pro-alpha 1(I) chains in a patient with abnormal proteoglycan metabolism and mineral deposits in the dermis.

Degrading process of acute ischemic myocardial cells.

Developmental toxicity evaluation of Bendectin in CD rats.

Reduction of adipose tissue lipoprotein lipase activity as a result of in vivo administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin to the guinea pig.

2,3,7,8-Tetrachlorodibenzo-p-dioxin and polycyclic aromatic hydrocarbons suppress retinoid-induced tissue transglutaminase in SCC-4 cultured human squamous carcinoma cells.

Characterization of the Ah receptor and aryl hydrocarbon hydroxylase induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin and benz(a)anthracene in the human A431 squamous cell carcinoma line.

Monochloroacetic acid and 60% salicylic acid as a treatment for simple plantar warts: effectiveness and mode of action.

Toxicity and disposition of 2,3,4,7,8-pentachlorodibenzofuran (4PeCDF) in the rhesus monkey (*Macaca mulatta*).

HIV infection and dioxin exposure: risk factors for Kaposi sarcoma and malignant lymphoma?

Effect of uncouplers of oxidative phosphorylation on transmitter release in dystrophic mice.

Heart as a target organ in 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity: decreased beta-adrenergic responsiveness and evidence of increased intracellular calcium.

Variants of human tissue-type plasminogen activator. Fibrin binding, fibrinolytic, and fibrinogenolytic characterization of genetic variants lacking the fibronectin finger-like and/or the epidermal growth factor domains.

2,4-Dinitrophenol, muscle biopsy, and McArdle's disease.

Acute effects of amiodarone on action potentials of isolated guinea-pig ventricular muscle exposed to simulated ischemic solution and metabolic inhibitors.

[Hypotensive activity of dinitrosyl complexes of iron and proteins in anesthetized animals].

Morphologic lesions and acute toxicity in rainbow trout (*Salmo gairdneri*) treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

In vitro (organ culture) studies of the toxicity of specific A-gliadin peptides in celiac disease.

Synthesis of ¹¹C-methylated inulin as a radiopharmaceutical for imaging brain edema and pulmonary edema.

Abnormal type II collagen in the spondyloepiphyseal dysplasias.

Rabbit serum hypertriglyceridemia after administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Tissue-specific alterations of de novo fatty acid synthesis in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treated rats.

Membrane IgM: interactions with the cortical cytoskeleton in the human lymphoblastoid cell line WiL2.

Partial amino acid sequence analysis and variable subgroup determination (VH and VL) of a monoclonal rheumatoid factor derived from a rheumatoid arthritis patient.

Regulation of glucose uptake in rat slow and fast skeletal muscles.

Potentially hazardous residues of non-ortho chlorine substituted coplanar PCBs in human adipose tissue.

Quantitative evaluation of collagen fractions separated by acrylamide gel electrophoresis: its application for collagen typing in normal and pathological tissues.

Protoplast isolation and callus production from leaves of tissue-cultured *Vitis* spp.

Characterization of type I collagen from the skin of blue grenadier (*Macrurus novaezelandiae*).

Transferrin endocytosis and iron uptake in developing myogenic cells in culture: effects of microtubular and metabolic inhibitors, sulphhydryl reagents and lysosomotropic agents.

Hydroperoxide metabolism of amphibia: tissue catalases of leopard frogs.

Cloning and sequencing of pro-alpha 1 (XI) collagen cDNA demonstrates that type XI belongs to the fibrillar class of collagens and reveals that the expression of the gene is not restricted to cartilagenous tissue.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-induced alterations in lipid peroxidation, enzymes, and divalent cations in rat testis.

Micromethods in single muscle fibers. 1. Determination of catalase and superoxide dismutase.

Rapid and transitory stimulation of 3-O-methylglucose transport by growth hormone.

Central respiratory inhibition by angiotensin II in anesthetized cats.

Vacuolation of muscle fibers near sarcolemmal breaks represents T-tubule dilatation secondary to enhanced sodium pump activity.

Modulation of glycogen synthase kinase activity of skeletal and smooth muscle casein kinase I by spermine.

Improved high-performance liquid chromatographic determination of thiamine and its phosphate esters in animal tissues.

Plant regeneration from somatic embryogenic suspension cultures of cotton (*Gossypium hirsutum* L.).

Energy dependence of enzyme release from hypoxic isolated perfused rat heart tissue.

Kinetic analysis of covalent hybrid plasminogen activators: effect of CNBr-degraded fibrinogen on kinetic parameters of Glu1-plasminogen activation.

Purification and characterization of the Mg^{2+} -ATPase from rabbit skeletal muscle transverse tubule.

Improved somatic embryogenesis in wheat by partial simulation of the in-ovulo oxygen, growth-regulator and desiccation environments.

Distinction between two molecular species of type V collagen from human post-burn granulation tissues.

Effect of 2,4-dinitrophenol on transport of cefmetazole and diclofenac from thigh muscle tissue and from intestinal connective tissue into blood circulation in rats.

Studies on the neuropsychopharmacological profile of fengabine (SL 79229) in mice.

Renal handling of amino acid ^{99m}technetium chelates.

Expression of the 31-kD stress protein in rat myoblasts and hepatocytes.

Specificity of rabbit cytochrome P-450 isozymes involved in the metabolic activation of the food derived mutagen 2-amino-3-methylimidazo[4,5-f] quinoline.

Analysis of the in vivo phosphorylation state of rabbit skeletal muscle glycogen synthase by fast-atom-bombardment mass spectrometry.

NTP Toxicology and Carcinogenesis Studies of Monuron (CAS No. 150-68-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Are lysosomal enzymes involved in rapid damage in vertebrate muscle cells? A study of the separate pathways leading to cellular damage.

Autoradiographic studies of the renal clearance of circulating type I collagen fragments in the rat.

Protective effect of salicylate against 2,4-dinitrophenol-induced protein thiol loss in the small intestine of rats.

Immunological characterization of thioltransferase from pig liver.

Inhibitory effect of salicylate on 2,4-dinitrophenol and diethyl maleate in isolated rat intestinal epithelial cells.

Apical proliferation of embryogenic tissue of soybean [*Glycine max* (L.) Merrill].

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes increases in expression of c-erb-A and levels of protein-tyrosine kinases in selected tissues of responsive mouse strains.

Partial characterization of specific cantharidin binding sites in mouse tissues.

Catalase-positive microperoxisomes in rat soleus and extensor digitorum longus muscle fiber types.

Lymphocyte activation and capping of hormone receptors.

[Inhibition of the activity of membrane-bound Ca²⁺-ATPase in the sarcoplasmic reticulum fragments of rabbit skeletal muscles by the alkaloid sanguinarine].

Characterization of rat heart plasma membrane Ca²⁺/Mg²⁺ ATPase.

Plasminogen activation by tissue plasminogen activator in the presence of stimulating CNBr fragment FCB-2 of fibrinogen is a two-phase reaction. Kinetic analysis of the initial phase of slow plasmin formation.

The influence of fibrin(ogen) fragments on the kinetic parameters of the tissue-type plasminogen-activator-mediated activation of different forms of plasminogen.

Photophysiology and phytochrome content of long-hypocotyl mutant and wild-type cucumber seedlings.

[The potential atherogenic risk of the pesticide acetochlor].

Intracellular processing of growth hormone receptors by adipocytes in primary culture.

Identification of small collagenous proteins with properties of procollagen alpha 1 (I) pN-propeptide in fetal porcine calvarial bone.

Effects of the external ions and metabolic poisoning on the constriction of the squid giant axon after axotomy.

Differential role of reactive oxygen intermediates in photofrin-I- and photofrin-II-mediated photoenhancement of lipid peroxidation in epidermal microsomal membranes.

Internalized insulin-receptor complexes are unidirectionally translocated to chloroquine-sensitive degradative sites. Dependence on metabolic energy.

Amino acid sequence of bovine cardiac troponin I.

Distinction between major chloroquine-inhibitable and adrenergic-responsive pathways of protein degradation and their relation to tissue ATP content in the Langendorff isolated perfused rat heart.

Heat production of quiescent ventricular trabeculae isolated from guinea-pig heart.

Transport of digoxin into brain microvessels and choroid plexuses isolated from guinea pig.

Induction of hepatic DNA single strand breaks in rats by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Elevation of acetylpolyamine levels in mouse tissues, serum and urine after treatment with radical-producing drugs and lipopolysaccharide.

Correlation between serum and adipose tissue levels of 2,3,7,8-tetrachlorodibenzo-p-dioxin in 50 persons from Missouri.

Localization of high benzaldehyde dehydrogenase activity in rat upper gastrointestinal tract mucosa: a quantitative histochemical study.

Binding of tissue-type plasminogen activator to fibrinogen fragments.

[³H]-myo-inositol uptake in rat cortical slices. Identification of Na⁺-dependent and Na⁺-independent systems.

Comparison of Starch and ADP-Glucose Pyrophosphorylase Levels in Nonembryogenic Cells and Developing Embryos from Induced Carrot Cultures.

Protein co-isolated with human tissue factor impairs recovery of activity.

Application of linear integration in the morphometric study of mild and severe pulmonary alveolar injury.

Biochemical characterization of different molecular forms of the neural cell adhesion molecule L1.

Neural regulation of duodenal alkali secretion: effects of electrical field stimulation.

Purification and characterization of two kinds of low molecular weight kininogens from rat (non-inflamed) plasma. One resistant and the second sensitive to rat glandular kallikreins.

Stimulation of Sanguinarine Production by Combined Fungal Elicitation and Hormonal Deprivation in Cell Suspension Cultures of *Papaver bracteatum*.

Comparison of effects of paraquat and methidation on enzyme activity and tissue necrosis of carp, following exposure to the pesticides singly or in combination.

Effect of protein synthesis inhibitors and metabolic blockers on the production of placental proteins by the in vitro perfused human placenta.

The influence of non-enzymatic glycosylation and formation of fluorescent reaction products on the mechanical properties of rat tail tendons.

Comparison of the action of epinephrine and a respiratory chain uncoupler, 2,4-dinitrophenol, on Ca^{2+} -mobilization in isolated hepatocytes and perfused livers.

Immunohistochemical evidence for neural mediation of VIP activity in the dogfish rectal gland.

Accumulation of aluminum by rabbit renal cortex.

Calcium diffusion through perineurium of frog sciatic nerve.

Microfilament modification by dihydrocytochalasin B causes retinoic acid-modulated chondrocytes to reexpress the differentiated collagen phenotype without a change in shape.

Inhibitors of N-nitroso compounds-induced mutagenicity.

Metabolic inhibitors and intermediate filament organization in human fibroblasts.

Ultrastructural localization of osteocalcin in rat tooth germs by immunogold staining.

1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP), its metabolite cyperquat (MPP+) and energy transduction in mitochondria from rat striatum and liver.

Pharmacokinetics and biological activity of 2,3,7,8-tetrachlorodibenzo-p-dioxin. 1. Dose-dependent tissue distribution and induction of hepatic ethoxyresorufin O-deethylase in rats following a single injection.

Antigenic contraction of guinea pig tracheal preparations passively sensitized with monoclonal IgE: pharmacological modulation.

Uptake, distribution, and metabolism of trivalent arsenic in the pregnant mouse.

[Inhibition of mitochondrial respiration by mepivacaine].

Vulnerability of myelin development of the chick to the herbicide 2,4-Dichlorophenoxyacetic butyl ester.

[Effect of ethanol and the catalase inhibitor aminotriazole on the activity of antioxidative enzymes in the rat liver and heart].

The evaluation of trends in soft tissue sarcoma according to diagnostic criteria and consumption of phenoxy herbicides.

Selective pancreatic toxicity of palmitoylpentachlorophenol.

Paraquat-induced cytoskeletal injury in cultured cells.

Acute sensitivity of BHT-induced alveolar toxicity to a diquat challenge in murine lungs.

Soft tissue sarcoma and military service in Vietnam: a case-control study.

Vietnam veterans and soft tissue sarcoma.

Bromacil and diuron herbicides: toxicity, uptake, and elimination in freshwater fish.

Dissociation of hypolipidemic and antiplatelet actions from adverse myotonic effects of clofibrac acid related enantiomers.

Goitre and wasting induced in hamsters by hexachlorobenzene.

Paraquat (gramoxone) poisoning in south-west Hungary, 1977-1984. Toxicological and histopathological aspects of group intoxication cases.

Neuromuscular effects of acute 2,4-dichlorophenoxyacetic acid (2,4-D) exposure in dogs.

Soft tissue sarcoma and non-Hodgkin's lymphoma in relation to phenoxyherbicide and chlorinated phenol exposure in western Washington.

Cohort mortality study of chemical workers with potential exposure to the higher chlorinated dioxins.

Specific polyclonal and monoclonal antibody prevents paraquat accumulation into rat lung slices.

Primary cultures of rat aortic endothelial and smooth muscle cells: I. An in vitro model to study xenobiotic-induced vascular cytotoxicity.

Phenoxy herbicides and soft-tissue sarcomas in female rice weeders. A population-based case-referent study.

Teratogenic potential of purified pentachlorophenol and pentachloroanisole in subchronically exposed Sprague-Dawley rats.

Haemodialysis for paraquat poisoning.

Paraquat poisoning: the rationale for current treatment regimes.

Cytoskeletal perturbation induced by herbicides, 2,4-dichlorophenoxyacetic acid (2,4-D) and 2,4,5-trichlorophenoxyacetic acid (2,4,5-T).

Unilateral paraquat-induced lung fibrosis: evolution of changes in lung fibronectin and collagen after graded degrees of lung injury.

[Toxic environmental factors in sudden infant death (SIDS)].

Background and design of a Danish cohort study of workers in phenoxy herbicide manufacture.

Elimination of paraquat.

Pharmacological treatments of paraquat poisoning.

Mechanism of paraquat toxicity in lung and its relevance to treatment.

Trypanosoma brucei: polyamine oxidase mediated trypanolytic activity in the serum of naturally resistant cattle.

Evidence that the flux control coefficient of the respiratory chain is high during gluconeogenesis from lactate in hepatocytes from starved rats. Implications for the hormonal control of gluconeogenesis and action of hypoglycaemic agents.

Autoradiographic studies on in vivo covalent binding of N-hydroxy-2-acetylaminofluorene in rat liver containing gamma-glutamyltranspeptidase-positive foci. The effect of the sulfation-inhibitor pentachlorophenol.

3-amino-triazole effects on the eye of young and adult rabbits in the presence and absence of hydrogen peroxide.

Putrescine and 5-hydroxytryptamine accumulation in rat lung slices: cellular localization and responses to cell-specific lung injury.

Evidence for involvement of non-biliary excretion into the intestines in the formation of methylsulphonyl-containing metabolites of 2-chloro-N-isopropylacetanilide (propachlor) by swine and rats.

Thyrotropin-releasing hormone (TRH): immunohistochemical distribution in tadpole and frog brain.

Determination of paraquat in tissue using ion-pair chromatography in conjunction with spectrophotometry.

Uptake, efflux and metabolism of the polyamine putrescine in rabbit lung slices.

Evidence that herbicides relaxing smooth and oblique-striated muscles affect the muscle cell membrane.

Effects of paraquat on mitochondria of rat skeletal muscle.

Nucleic acid content and residue determination in tissues of chicks born from 2,4-dichlorophenoxyacetic butyl ester treated eggs.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on thermogenesis in brown adipose tissue of rats.

Dietary iron and broiler performance.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment on mechanical function of the rat heart.

Suppression of estrogen-regulated extracellular tissue plasminogen activator activity of MCF-7 cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

In vivo and in vitro interactions of TCDD and other ligands of the Ah-receptor: effect on embryonic and fetal tissues.

Effect of excess iron in milk replacer on calf performance.

Mortality among flavour and fragrance chemical plant workers in the United States.

Biosynthesis and degradation of collagen in X-irradiated mouse lung.

Teratogenic effects of polychlorinated dibenzofurans in combination in C57BL/6N mice.

The experimental and clinical pathology of diene conjugation.

A point mutation in a type I procollagen gene converts glycine 748 of the alpha 1 chain to cysteine and destabilizes the triple helix in a lethal variant of osteogenesis imperfecta.

ATP requirement for induced tight junction formation in HT 29 adenocarcinoma cells.

An attempt at objectivity of post mortem diagnostic of brain oedema.

Teratogenicity of three polychlorinated dibenzofurans in C57BL/6N mice.

Achondrogenesis type II, abnormalities of extracellular matrix.

Quantitative stereological evaluation of four histochemical markers of altered foci in multistage hepatocarcinogenesis in the rat.

Effects of hypoxia, 2,4-dinitrophenol and ouabain on twitch potentiation elicited following conditioning pulses in the mouse phrenic nerve-diaphragm preparation.

Inactivation of *Bacillus piliformis* spores by heat and certain chemical disinfectants.

Regional O₂ uptake during hypoxia and recovery in hypermetabolic dogs.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on guinea pig heart muscle.

Lethal perinatal osteogenesis imperfecta due to the substitution of arginine for glycine at residue 391 of the alpha 1(I) chain of type I collagen.

A structural mutation of the collagen alpha 1(I)CB7 peptide in lethal perinatal osteogenesis imperfecta.

[Relation between glutamate and adenine nucleotide levels of heart mitochondria during hypoxia].

Immunochemical characterization of fibrinogen, fibrin I, and fibrin II in human thrombi and atherosclerotic lesions.

Catalase in cultured skin fibroblasts from patients with the cerebro-hepato-renal (Zellweger) syndrome: normal maturation in peroxisome-deficient cells.

Stress-induced thermotolerance of the cytoskeleton of mouse neuroblastoma N2A cells and rat Reuber H35 hepatoma cells.

Skeletal muscle glucocorticoid receptor and glutamine synthetase activity in the wasting syndrome in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Clinical reports on plasma exchange in the Kidney Center, Tokai University School of Medicine.

Orientation staining for the demonstration of *Mycobacterium leprae* in semithin sections.

Identification and subcellular distribution of cornified envelope precursor proteins in the transformed human keratinocyte line SV-K14.

Han/Wistar rats are exceptionally resistant to TCDD. I.

Embryotoxicity and fetotoxicity of orally administered tridiphane in mice and rats.

Hepatic encephalopathy. Application of visual evoked responses to test hypotheses of its pathogenesis in rats.

Effect of inhibitors of arachidonic acid metabolism on efflux of intracellular enzymes from skeletal muscle following experimental damage.

Health effects of pesticides: a review of epidemiologic research from the perspective of developing nations.

Collagen species in human aorta: with special reference to basement membrane-associated collagens in the intima and media and their alteration with atherosclerosis.

Differential effects of acute changes in cell Ca^{2+} concentration on myofibrillar and non-myofibrillar protein breakdown in the rat extensor digitorum longus muscle in vitro. Assessment by production of tyrosine and N tau-methylhistidine.

Assessment of the systemic distribution and toxicity of formaldehyde following pulpotomy treatment: Part two.

No evidence for reactive oxygen damage in ischemia-reflow injury.

Effect of a sublethal dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin on interscapular brown adipose tissue of rats.

Pesticides and cancer risks in agriculture.

Electrophoretic isolation and peptide mapping of collagen types from microsamples of tissue.

Carbonic anhydrase III inhibition in normocapnic and hypercapnic contracting mouse soleus.

Dystonia and tremor following exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Phototoxic potential of afloqualone, a quinazolinone derivative, as determined by photosensitized inactivation of bacteriophage.

Medical, life-style, and occupational risk factors for prostate cancer.

Isolation and structural characterization of porcine coupling factor 6 from intestinal tissues.

Determination of chloramphenicol in swine muscle tissue using a monoclonal antibody-mediated clean-up procedure.

Somatic embryogenesis and bud formation from immature embryos of buckwheat (*Fagopyrum esculentum* Moench.).

Reactivation of inhibited bone acid phosphatase and its significance in bone histomorphometry.

Effects of arsenic on cholinergic parameters in brain in vitro.

Alteration of intestinal tight junction structure and permeability by cytoskeletal contraction.

Organic cation secretion in flounder renal tissue.

An increase in cerebral benzodiazepine receptors induced by a subacute administration of ammonia, mercaptans and short-chain fatty acids in rats.

Fragmentation of rabbit skeletal muscle calsequestrin: spectral and ion binding properties of the carboxyl-terminal region.

Role of cyclic AMP- and cyclic GMP-phosphodiesterases in the control of cyclic nucleotide levels and smooth muscle tone in rat isolated aorta. A study with selective inhibitors.

Cross-linking of rabbit skeletal muscle troponin with the photoactive reagent 4-maleimidobenzophenone: identification of residues in troponin I that are close to cysteine-98 of troponin C.

Metabolism and excretion of gallium arsenide and arsenic oxides by hamsters following intratracheal instillation.

Rods in the terminal cisternae of skeletal muscle.

Role of fibronectin on the clearance and tissue uptake of antigen and immune complexes in rats.

The primary structure of chicken muscle acylphosphatase isozyme Ch2.

The primary structure of chicken muscle acylphosphatase isozyme Ch1.

Characterization of GSK-M, a glycogen synthase kinase from rat skeletal muscle.

The interaction of streptokinase-plasminogen activator complex, tissue-type plasminogen activator, urokinase and their acylated derivatives with fibrin and cyanogen bromide digest of fibrinogen. Relationship to fibrinolytic potency in vitro.

The Mr 24,000 phosphoprotein from developing bone is the NH₂-terminal propeptide of the alpha 1 chain of type I collagen.

Physiological assay of liposome-mediated transport of a drug across *Xenopus* intestine: cell-liposome interaction.

Assimilate Unloading from Maize (*Zea mays* L.) Pedicel Tissues : II. Effects of Chemical Agents on Sugar, Amino Acid, and C-Assimilate Unloading.

Rat hepatic mitochondria are more sensitive to allyl alcohol than are those of mice.

Processing of growth hormone by rat adipocytes in primary culture: differentiation between release of intact hormone and degradative processing.

Intestinal absorption of choline in rats.

Inhalation of methyl bromide gas induces mitotic recombination in somatic cells of *Drosophila melanogaster*.

Uptake and accumulation of the herbicides chlorsulfuron and clopyralid in excised pea root tissue.

[Effect of highly dispersed iron powder and iron salt on the endogenous level of iron and zinc in animal organs and tissues].

The production of pregnancy associated alpha glycoprotein (PAG) from human peripheral blood mononuclear cells.

Neutrophil-mediated cytotoxicity triggered by immune complexes: the role of reactive oxygen metabolites.

Methyl bromide alters catecholamine and metabolite concentrations in rat brain.

Calcium and contractions of isolated smooth muscle cells from rat myometrium.

Regulation of fructose 2,6-bisphosphate levels in *Neurospora crassa*.

Histopathology of acute toxic responses in selected tissues from rats exposed by inhalation to methyl bromide.

Transport of benzylpenicillin by the rat choroid plexus in vitro.

Substrates for the cell surface protein kinase in blood: a calf serum protein and its precursor in plasma.

An improved method for the inhibition of endogenous peroxidase non-deleterious to lymphocyte surface markers. Application to immunoperoxidase studies on eosinophil-rich tissue preparations.

Uptake and specific binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the olfactory mucosa of mice and rats.

Type X collagen synthesis during endochondral ossification in fracture repair.

Determination of sodium monofluoroacetate (compound 1080) in tissues and baits as its benzyl ester by reaction-capillary gas chromatography.

Homeothermic fish and hemoglobin: primary structure of the hemoglobin from bluefin tuna (*Thunnus thynnus*, *Scromboidei*).

Comparison of the acute toxicity of endothal and cantharidic acid on mouse liver in vivo.

Oxidative metabolism in guinea pig ventricular myocytes protected from proteolytic enzyme activity.

Quantification of the maximum capacity for active sodium-potassium transport in rat skeletal muscle.

Photoaffinity labeling of rabbit muscle fructose-1,6-bisphosphate aldolase with 8-azido-1,N6-ethenoadenosine 5'-triphosphate.

Amino acid sequence of guinea pig prostate kallikrein.

Transferrin receptors and transferrin iron uptake by cultured human blood monocytes.

Kinetics of [¹¹C]N,N-dimethylphenylethylamine in mice and humans: potential for measurement of brain MAO-B activity.

Isolation and complete amino acid sequence of human thymopoietin and splenin.

The influence of aging on intestinal absorption of TCDD in rats.

Smooth muscle caldesmon is an extended flexible monomeric protein in solution that can readily undergo reversible intra- and intermolecular sulfhydryl cross-linking. A mechanism for caldesmon's F-actin bundling activity.

Dephosphorylation of cardiac myofibril C-protein by protein phosphatase 1 and protein phosphatase 2A.

[Stimulation by quinones of cyanide-resistant respiration in rat liver and heart mitochondria].

Age-related failure of endocytosis may be the pathogenetic mechanism responsible for "cold" follicle formation in the aging mouse thyroid.

Sequence analysis of a cDNA clone encoding the liver cell adhesion molecule, L-CAM.

New modified activated partial thromboplastin time and prothrombin time methods using a synthetic chromogenic substrate in combination with diazotization.

Regeneration of soybean (*Glycine max* L. Merr.) from cultured primary leaf tissue.

Dexamethasone impairs growth and collagen synthesis in condylar cartilage in vitro.

Troponin-T and glyceraldehyde-3-phosphate dehydrogenase share a common antigenic determinant.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced lipid peroxidation in hepatic and extrahepatic tissues of male and female rats.

Spontaneous quantal and subquantal transmitter release at the Torpedo nerve-electroplaque junction.

Bioactivation of MPTP: reactive metabolites and possible biochemical sequelae.

Transcriptional control of human cytochrome P1-450 gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin in human tissue culture cell lines.

Amino acid sequence of the serine active-site region of the medium-chain S-acyl fatty acid synthetase thioester hydrolase from rat mammary gland.

Solubility, retention, and metabolism of intratracheally and orally administered inorganic arsenic compounds in the hamster.

Different mechanisms mediate structural changes and intracellular enzyme efflux following damage to skeletal muscle.

Characterization of Ca²⁺ uptake in plasma membrane vesicles isolated from guinea pig ileum smooth muscle.

The extent of amino-terminal heterogeneity in rabbit fast skeletal muscle troponin T.

Enhanced uptake of carnitine by perfused rat liver following starvation.

Glycogenolytic, noninsulin-like effects of vanadate on rat hepatocyte glycogen synthase and phosphorylase.

Highly toxic coplanar PCBs: occurrence, source, persistency and toxic implications to wildlife and humans.

The toxicological significance of 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds in human adipose tissue.

Distribution of myosin and relationship to actin organization in cortical and subcortical areas of antibody-labelled, quick-frozen, deep-etched fibroblast cytoskeletons.

The supply of metabolic substrate from glia to photoreceptors in the retina of the honeybee drone.

Differential expression of cytochrome P-450 1 and related forms in rabbit liver and kidney.

Immobilization of pig muscle enolase. Studies on the activity of subunits.

Exochelin-mediated iron acquisition by the leprosy bacillus, *Mycobacterium leprae*.

Metabolism and distribution of [¹⁴C]glucose in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Structure of co-crystals of tropomyosin and troponin.

Role of protein kinase C in the regulation of rat liver glycogen synthase.

[Action of a dental anesthetic on cell respiration].

Regulatory sites of cationic nature on skeletal myosin.

Physiological, anatomic and behavioural changes in the respiratory system of *Salmo gairdneri* Rich. On acute and chronic exposure to chlorothalonil.

Mechanism of nitrofen teratogenesis.

Soft tissue sarcomas and military service in Vietnam: a case comparison group analysis of hospital patients.

Tissue levels of atrazine in a case of bovine poisoning.

Mortality of workers exposed to 2 methyl-4 chlorophenoxyacetic acid.

Agricultural herbicide use and risk of lymphoma and soft-tissue sarcoma.

Herbicide exposure and cancer.

Pharmacokinetic profile of paraquat following intravenous administration to the rabbit.

The corrected collagen content in paraquat lungs.

Health effects of phenoxy herbicides. A review.

Storm in a cup of 2,4,5-T.

The impact of inhaled acrolein on hypertension-sensitive and resistant rats.

Neurotoxicologic examination of rats dermally exposed to 2,4-D amine for three weeks.

Further studies of lipid peroxidation in human paraquat poisoning.

Multicenter evaluation of ultrafiltration, dialysis, and thermal coagulation as sample pretreatment methods for the colorimetric determination of paraquat in blood and tissues.

Morphological and biochemical correlates of chemical induced injury in the lung. A discussion.

Current status of plasmapheresis in toxicology.

Changes in lung tissue and lavage fibronectin after paraquat injury in rats.

Pseudomembranous colitis in a patient of paraquat intoxication.

Soft tissue sarcoma risk in Swedish agricultural and forestry workers.

Chronic progredient diffuse alveolar damage probably related to exposure to herbicides.

The toxic effect of diquat on the rat lung after intratracheal administration.

Application of chlorophyll fluorescence in ecophysiology.

[Lung damage caused by paraquat. 1. Histologic, histochemical and pathophysiologic findings in rat lungs following acute paraquat poisoning].

Effects of ascorbic acid in vivo on the fatty acid composition of the tissues of mice treated with Gramoxone.

LDH enzymes as a tool on monitoring tissue necrosis in fishes caused by pesticides.

Elimination of paraquat.

Effects on the fetus of maternal nitrofen exposure in the protein-deprived rat.

[Characteristics of an experimental model of alcoholic cardiomyopathy by diagnostic enzyme tests].

The influence of skeletal muscle reinnervation on experimentally induced myotonia.

The effect of dietary and chemically induced methylation deficiency on the metabolism of arsenate in the rabbit.

Enhanced withdrawal from chickens of hexachlorobenzene (HCB) and pentachlorophenol (PCP) by colestipol, mineral oil, and/or restricted feeding.

[Oxidative processes in the lung tissue in respiratory failure].

Lack of neuropathologic consequences of repeated dermal exposure to 2,4-dichlorophenoxyacetic acid in rats.

Further characterization of the distribution and metabolism of nitrofen in the pregnant rat.

Differential inhibition of rat tissue catalase by cyanamide.

Altered lung function and structure in the rat after subchronic exposure to acrolein.

Combined light and electron microscope immunocytochemical localization of scattered peptidergic neurons in the central nervous system.

Metabolism and disposition of ortho-benzyl-para-chlorophenol in male rats.

Excretion of metabolites of hexachlorobenzene in the rat and in man.

Soft-tissue sarcomas, malignant lymphomas, and 2,3,7,8-TCDD exposure in Seveso.

Collagen defects in lethal perinatal osteogenesis imperfecta.

Successful treatment of aplastic anemia associated with chronic thyroiditis and Sjögren's syndrome.

[Comparative histology of dog teeth overfilled with 3 materials].

Effect of chloroacetic acids on the kidneys.

The effects of Love Canal soil extracts on maternal health and fetal development in rats.

Characterization of a transthyretin (prealbumin) variant associated with familial amyloidotic polyneuropathy type II (Indiana/Swiss).

Altered levels of laminin receptor mRNA in various human carcinoma cells that have different abilities to bind laminin.

Effects of oxygen and glucose deprivation on vasoactivity in isolated bovine middle cerebral arteries.

Mechanism of phagocytosis by Schwann cells.

The molecular defect in an autosomal dominant form of osteogenesis imperfecta. Synthesis of type I procollagen containing cysteine in the triple-helical domain of pro-alpha 1(I) chains.

Clinical variability of osteogenesis imperfecta reflecting molecular heterogeneity: cysteine substitutions in the alpha 1(I) collagen chain producing lethal and mild forms.

Maternal care by rhesus monkeys of infant monkeys exposed to either lead or 2,3,7,8-tetrachlorodibenzo-P-dioxin.

Endogenous ethanol--its metabolic, behavioral and biomedical significance.

Toxicity and evidence for metabolic alterations in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated guinea pigs fed by total parenteral nutrition.

Procarcinogen activation by rat and human mammary extracts.

The effects of nonadecafluoro-n-decanoic acid on serum retinol and hepatic retinyl palmitate hydrolase activity in male Sprague-Dawley rats.

Collagen types in various layers of the human aorta and their changes with the atherosclerotic process.

Trypanosoma cruzi: isolate dependence in the induction of lytic antibodies in the mouse and rabbit.

Phenotypic change from transformed to normal induced by benzoquinonoid ansamycins accompanies inactivation of p60src in rat kidney cells infected with Rous sarcoma virus.

Calmodulin antagonists inhibit dihydropyridine calcium channel activator (BAY-K-8644) induced cGMP synthesis in pituitary tumor cells.

The staining of type V collagen obtained from FBJ virus-induced osteosarcoma with concanavalin A.

Transfer of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) via placenta and milk, and postnatal toxicity in the mouse.

Effect of combined treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and phototherapy on bilirubin metabolism in the jaundiced Gunn rat.

A monoclonal antibody preventing binding of tissue-type plasminogen activator to fibrin: useful to monitor fibrinogen breakdown during t-PA infusion.

Control of cytochrome P1-450 gene expression: analysis of a dioxin-responsive enhancer system.

Modulation of IgM anti-lymphocyte antibody-reactive T cell surface antigens in systemic lupus erythematosus.

Alcohol and acetaldehyde in rat's milk following ethanol administration.

S-antigen-specific rat T cell lines recognize peptide fragments of S-antigen and mediate experimental autoimmune uveoretinitis and pinealitis.

Intermediary metabolism of the mature rat following 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment.

Increased binding of D-penicillamine to monocytes in rheumatoid arthritis.

Anisakis simplex: uncoupling of oxidative phosphorylation in the muscle mitochondria of infected fish.

Histopathology of interscapular brown adipose tissue, thyroid, and pancreas in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treated rats.

[Phases of muscular thermogenesis in experimental hyperthyroidism].

The diagnosis of dioxin-associated illness.

[Guanylate cyclase activity of the rabbit myocardium in normal conditions and in allergic states].

Synergistic interaction of 2,3,7,8-tetrachlorodibenzo-p-dioxin and hydrocortisone in the induction of cleft palate in mice.

Evaluation of the reproductive toxicology of 2,4,6-trichlorophenol in male and female rats.

Quantitative histochemistry of benzaldehyde dehydrogenase in hepatocellular carcinomas of vinyl chloride-treated rats.

Changes in the physical and chemical properties of skin collagen from broiler chickens exhibiting oily bird syndrome.

Subacute inhalation experiment for methyl bromide in rats.

Isolation and purification of cyanogen bromide-derived peptides of type II collagen directly from tissue (Swarm chondrosarcoma).

Increased type-III/type-I collagen ratios in diabetic human conjunctival biopsies.

Analysis of the intermediate and basement membrane collagens in fibrous atherosclerotic lesions of human aorta.

Interstitial collagens in fibrous atherosclerotic lesions of human aorta.

The C57B1/6 nu/nu, lpr/lpr mouse. III. Autoimmunity status.

Conserved structural domains among species and tissues-specific differences in the mitochondrial phosphate-transport protein and the ADP/ATP carrier.

Mannose metabolism in corn and its impact on leaf metabolites, photosynthetic gas exchange, and chlorophyll fluorescence.

Influence of aerobic energy deficit, ouabain and harmaline on the phenylalanine and galactose active transport by snail intestine.

Fine anionic iron colloid and its use in light and electron microscopic detection of cationic sites in the rat kidney.

2,3,7,8-Tetrachlorodibenzo-p-dioxin levels in adipose tissue of exposed and control persons in Missouri. An interim report.

Chemical and biological characterization of low-molecular-weight human skeletal growth factor.

The effects of pyridinium salts, structurally related compounds of 1-methyl-4-phenylpyridinium ion (MPP+), on tyrosine hydroxylation in rat striatal tissue slices.

Hepatic regenerative enzyme activity after pericentral and periportal lobular toxic injury.

The mechanisms by which haemoglobin inhibits the relaxation of rabbit aorta induced by nitrovasodilators, nitric oxide, or bovine retractor penis inhibitory factor.

Phosphorylation of rabbit skeletal muscle glycogen synthase by casein kinase 1: evidence of phosphorylation sites specific for casein kinase 1.

Oxygen Isotope Exchange between Metabolites and Water during Biochemical Reactions Leading to Cellulose Synthesis.

25-Hydroxyvitamin D3-23-hydroxylase, a renal enzyme in several animal species.

Examination of the differential hepatotoxicity of diallyl phthalate in rats and mice.

The dynamic state of heat shock proteins in chicken embryo fibroblasts.

High affinity binding sites for 1-methyl-4-phenyl-pyridinium ion (MPP+) are present in mouse brain.

Metabolism and disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin in guinea pigs.

Characterization of the molecular forms of proenkephalin in bovine adrenal medulla and rat adrenal, brain, and spinal cord with a site-directed antiserum.

Intestinal absorption of tetramethylammonium and its derivatives in rats.

Liquid chromatographic determination of fluridone aquatic herbicide and its metabolite in fish and crayfish.

Metabolism and excretion of orally and intraperitoneally administered gallium arsenide in the hamster.

GABA-related activities of amino phosphonic acids on guinea-pig ileum longitudinal muscle.

Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin: ontogeny in chick embryo liver.

Antigenic structure of adenylate kinase from porcine skeletal muscle. IV. Two antigenic determinants on carboxyl-terminal peptide 126-194.

Identification of a disulfide-bonded 70 Kd type X procollagen in embryonic chick sternum cartilage.

Continuous measurement of net potassium movements in rat brain cortex suspensions. Effects of glutamate, veratridine, creatine and other substances.

Microcalorimetric investigation of metabolism in rat hepatocytes cultured on microplates and in cell suspensions.

Amino acid sequence of rabbit ventricular myosin light chain-2: identity with the slow skeletal muscle isoform.

Characterization of trimethylamine-N-oxide (TMAO) demethylase activity from fish muscle microsomes.

Facilitated glucose transport across the retinal pigment epithelium of the bullfrog (*Rana catesbeiana*).

Ah receptor mediating induction of aryl hydrocarbon hydroxylase: detection in human lung by binding of 2,3,7,8-[³H]tetrachlorodibenzo-p-dioxin.

Heat inactivation of starch synthase in wheat endosperm tissue.

Actin cytoskeleton of spread fibroblasts appears to assemble at the cell edges.

Supplemental quality assurance criteria for high-resolution gas chromatography/high-resolution mass spectrometric determination of 2,3,7,8-tetrachlorodibenzo-p-dioxin in biological tissue.

Hepatocellular uptake of oleate is energy dependent, sodium linked, and inhibited by an antibody to a hepatocyte plasma membrane fatty acid binding protein.

Autoradiographic detection of [¹²⁵I]-secondary antiserum: a sensitive light and electron microscopic labeling method compatible with peroxidase immunocytochemistry for dual localization of neuronal antigens.

The complete amino acid sequence of chicken skeletal-muscle enolase.

Separation of cardiac plasmalemma into cell surface and T-tubular components. Distribution of saxitoxin- and nitrendipine-binding sites.

Characteristic symptoms of photosynthesis inhibition by herbicides are expressed in photomixotrophic tissue cultures of *Nicotiana*.

Tissue-specific expression of the mouse dioxin-inducible P(1)450 and P(3)450 genes: differential transcriptional activation and mRNA stability in liver and extrahepatic tissues.

A simplified method for determination of tritiated thymidine incorporation into cells from tissue in soft agar culture.

2,3,7,8-Tetrachlorodibenzo-p-dioxin metabolism and disposition in yellow perch.

Metabolism and disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rainbow trout.

Insulin stimulation of glucose metabolism in rat adipocytes: possible implication of protein kinase C.

Cellular uptake of 3,5,3'-triiodothyronine and thyroxine by red blood and thymus cells.

Concentration-related changes in blood and tissue parameters of hepatotoxicity and their interdependence in rats exposed to bromobenzene and 1,2-dichlorobenzene.

Effects of 1,1,1-trichloroethane on the cGMP metabolism in mouse brain.

The modification of platelet-induced coronary vasoconstriction by a thromboxane receptor antagonist.

The tissue form of type VII collagen is an antiparallel dimer.

A calmodulin and alpha-subunit binding domain in human erythrocyte spectrin.

Influence of skin source, penetration cell fluid, and partition coefficient on in vitro skin penetration.

Further characterization of [3H]gamma-aminobutyric acid release from isolated neuronal growth cones: role of intracellular Ca²⁺ stores.

Automated apparatus for the extraction and enrichment of 2,3,7,8-tetrachlorodibenzo-p-dioxin in human adipose tissue.

High-resolution gas chromatographic/high-resolution mass spectrometric analysis of human adipose tissue for 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The in situ perfused spinal cord of the rat. Applicability of drugs and chemicals, sodium-lithium exchange, and calcium reduction to functional intact central nervous system tissue.

Insulin antagonizes epinephrine activation of the membrane transport of fatty acids. Potential site for hormonal suppression of lipid mobilization.

Isolation and functional characterization of the heavy and light chains of human tissue-type plasminogen activator.

Type VI collagen is a major component of the human cornea.

Reciprocal Antagonism between the Herbicides, Diclofop-Methyl and 2,4-D, in Corn and Soybean Tissue Culture.

Adenosine triphosphate content of *Mycobacterium leprae* isolated from armadillo tissue by Percoll buoyant density centrifugation.

Ca²⁺ compartments in saponin-skinned cultured vascular smooth muscle cells.

Chemotactic activity of collagen-like polypeptides for human peripheral blood neutrophils.

A modified method of fine-granular cationic iron colloid preparation: its use in light and electron microscopic detection of anionic sites in the rat kidney glomerulus and certain other tissues.

The complete amino acid sequence of the cellular retinoic acid-binding protein from bovine retina.

Fixation, fine structure, and immunostaining for neuropeptides: perfusion versus immersion of the neuroendocrine hypothalamus.

Uncoupling effects of 2,4-dinitrophenol on electron transfer reactions and cell bioenergetics in rat brain in situ.

The protein phosphatases involved in cellular regulation. Primary structure of inhibitor-2 from rabbit skeletal muscle.

DARPP-32, a dopamine- and cyclic AMP-regulated neuronal phosphoprotein. Primary structure and homology with protein phosphatase inhibitor-1.

Clonal propagation of *Leptospermum* spp. by tissue culture.

Regulation of Cytokinin Oxidase Activity in Callus Tissues of *Phaseolus vulgaris* L. cv Great Northern.

The thermoelastic effect in rigor muscle of the frog.

Effect of fasting and acute ethanol administration on the energy state of in vivo liver as measured by ³¹P-NMR spectroscopy.

Comparative calcium binding and conformational studies of turkey and rabbit skeletal troponin C.

Quantitative analysis of type X-collagen biosynthesis by embryonic-chick sternal cartilage.

Tissue culture and plant regeneration from immature embryo explants of Barley, *Hordeum vulgare*.

Structural characterization of adrenal chromogranin A and parathyroid secretory protein-I as homologs.

Studies on the metabolism of the neurotoxic tri-*o*-cresyl phosphate. Distribution, excretion, and metabolism in male cats after a single, dermal application.

Effects of minute doses of ethylenebisdithiocarbamate disodium salt (nabam) and its degradative products on connective tissue envelopes of the notochord in *Xenopus*: an ultrastructural study.

Quantitative gap junction alterations in mammalian heart cells quickly frozen or chemically fixed after electrical uncoupling.

Effect of ATP inhibitors on the translocation of luminal membrane between cytoplasm and cell surface of transitional epithelial cells during the expansion-contraction cycle of the rat urinary bladder.

Halogenated hydrocarbon and hydroperoxide-induced peroxidation in rat tissue slices.

Enzyme release from the perfused rat heart. The functions of the cytoskeleton under cell-pathological conditions.

Intracellular site of "Ca reversal": inhibition of uterine smooth muscle contraction in Ca-free medium by a minute amount of Ca ion released from mitochondria by drugs.

Brown adipose tissue is a target tissue in 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induced toxicity.

[Effects of three different metabolic inhibitors (2,4-dinitrophenol, iodoacetic acid, 2,4-fluorodinitrobenzene) on the contractility of the geniohyoid and sartorius muscles].

Phosphorylation of rabbit muscle glycogen synthase by casein/glycogen synthase kinase-1 (CK-1). Stoichiometry and distribution of the phosphorylation sites on the glycogen synthase subunit.

Antigen-specific adherence of antibody-producing hybridoma cells: application to neural and nonneural antigens.

Effects of 2,4-dichlorophenoxyacetic acid (2,4-D) on the contractile properties of reinnervated rat skeletal muscle.

Assessment of pentachlorophenol toxicity in newborn calves: clinicopathology and tissue residues.

Chick brain hypomyelination produced by 2,4-dichlorophenoxyacetic butyl ester treatment.

A follow-up study of cancer incidence among workers in manufacture of phenoxy herbicides in Denmark.

Response of the medullary thick ascending limb to hypothyroidism in the rat.

Effects of the cyclophosphamide metabolite acrolein in mammalian limb bud cultures.

[Pentachlorophenol: current knowledge].

Systematically applied chemicals that damage lung tissue.

[An autopsy case of paraquat poisoning--correlation of paraquat toxicity with tissue concentration].

Sequential bilateral lung transplantation for paraquat poisoning. A case report. The Toronto Lung Transplant group.

Lipid peroxidation in human paraquat poisoning.

Changes in rat lung structure and composition as a result of subchronic exposure to acrolein.

Hemoperfusion-hemodialysis ineffective for paraquat removal in life-threatening poisoning?

Investigation of fatal bipyridyl poisonings.

In vivo redox changes in some organs in response to Gramoxone.

Effects of Gramoxone and cooling on the antioxidant enzymes of frog (*Rana esculenta*).

Overshoot of oxygen pressure in post-hypoxic brain tissue: a re-evaluation.

Arsenic speciation in urine from humans intoxicated by inorganic arsenic compounds.

Patterns of pulmonary structural remodeling after experimental paraquat toxicity. The morphogenesis of intraalveolar fibrosis.

Protective effects of trifluralin on benzo(a)pyrene-induced tumors in A/J mice.

Organization of the cytoskeleton in resting, discoid platelets: preservation of actin filaments by a modified fixation that prevents osmium damage.

[Effect of hydrogen peroxide on the rat uterine muscle].

Cell and tissue fixation, 1972-1982.

2,4-Dichlorophenoxyacetic acid (2,4-D) reduces acetylcholinesterase activity in rat muscle.

Metabolism and excretion of orally administered arsenic trioxide in the hamster.

Methodology for the determination of dinitroaniline herbicides in tissue and excreta.

The effects of pentachlorophenol, phenol and other pollutants on the liver of carp (*Cyprinus carpio* L.).

Membrane and cytoskeletal changes associated with IgE-mediated serotonin release from rat basophilic leukemia cells.

Electrophysiological observations on diaphragm muscle from normal and dystrophic hamsters.

The primary structure of human tissue amyloid P component from a patient with primary idiopathic amyloidosis.

Commentary on 2,3,7,8-tetrachlorodibenzo-para-dioxin (TCDD).

Is 2,3,7,8-TCDD (dioxin) a carcinogen for humans?

Antibody-induced redistribution of Heymann antigen on the surface of cultured glomerular visceral epithelial cells: possible role in the pathogenesis of Heymann glomerulonephritis.

Mitochondrial cytochemistry in experimental myopathies.

Cartilage collagen analysis in the chondrodystrophies.

Circulatory responses to 2,4-dinitrophenol in dog limb during normoxia and hypoxia.

Myosin heavy chain in avian muscular dystrophy corresponds to the neonatal isozyme.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and 2,3,7,8-tetrachlorodibenzofuran (TCDF) in pregnant C57BL/6N mice: distribution to the embryo and excretion.

Hypophagia-induced weight loss in mice, rats, and guinea pigs treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Intestinal absorption studies with glycyl-proline, glycine and ethanol in rats infected with *Eimeria nieschulzi*.

Experimentally induced defects of mitochondrial metabolism in rat skeletal muscle. Biological effects of the mitochondrial uncoupling agent 2,4-dinitrophenol.

Structure of myosin heavy chain in avian muscular dystrophy.

Ascorbic acid-Fe²⁺ treatment mimics effect of vitamin E deficiency on sarcoplasmic Ca-ATPase of rabbit muscle.

Collagen types in fibrosarcoma: absence of type III collagen in reticulin.

[Metabolism of 1,2-dichloroethane in the human body in acute poisonings].

Identification and characterization of amyloid protein AA in spontaneous canine amyloidosis.

Acetaldehyde and alcohol levels in pregnant rats and their fetuses.

Gas chromatographic profiling of phenolic acids in urine of patients with cirrhosis of the liver.

Synthesis of an altered type III procollagen in a patient with type IV Ehlers-Danlos syndrome. A structural change in the alpha 1(III) chain which makes the protein more susceptible to proteinases.

Altered triple helical structure of type I procollagen in lethal perinatal osteogenesis imperfecta.

Inducing potency of aryl hydrocarbon hydroxylase activity in human lymphoblastoid cells and mice by polychlorinated dibenzofuran congeners.

Characterization of the tissue form of type V collagen from chick bone.

Commentary on 2,3,7,8-tetrachlorodibenzo-para-dioxin (TCDD). Scientific Review Committee of the American Academy of Clinical Toxicology.

Mitochondrial myopathy with diffuse activation and focal deficiency of mitochondrial ATPase and carnitine deficiency.

[Silver impregnation of bone tissue].

Somatic embryogenesis and plantlet regeneration in the soybean *Glycine max*.

Binding, internalization, and degradation of atrial natriuretic peptide in cultured vascular smooth muscle cells of rat.

Contribution of electrogenic sodium-potassium ATPase to resting membrane potential of cultured rat skeletal myotubes.

Cytokinin contents and specific characteristics of tissue strains from three sexual genotypes of *Mercurialis annua* : Evidence for sex-gene involvement at callus-tissue level.

Hormonal Regulation of the Lectin Biosynthesis in Callus Culture of the *Phaseolus vulgaris* Plant.

Glycoproteins on the surface of smooth muscle cells involved in their interaction with type V collagen.

Methods for the quantitative determination of multiple, specific polychlorinated dibenzo-p-dioxin and dibenzofuran isomers in human adipose tissue in the parts-per-trillion range. An interlaboratory study.

Neurotoxicity and metabolism of methyl bromide in rats.

Developmental and tissue-specific differential regulation of the mouse dioxin-inducible P1-450 and P3-450 genes.

Amino acid sequence of an active fragment of rabbit skeletal muscle myosin light chain kinase.

NTP Toxicology and Carcinogenesis Studies of 1,2-Dichlorobenzene (o-Dichlorobenzene) (CAS No. 95-50-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Influence of high dietary iron as ferrous carbonate and ferrous sulfate on iron metabolism in young calves.

Effect of vapor concentration on the disposition of inhaled 2,3-dichloropropene in Fischer-344 rats.

Acute myelotoxic responses in mice exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Calcium secretion in canine tracheal mucosa.

Multiple forms of endothelial cell growth factor. Rapid isolation and biological and chemical characterization.

CL glycoprotein is the tissue form of type VI collagen.

Effect of dinitrophenol and anoxia on isometric tension in rabbit colon smooth muscle.

Collagen types in neocartilage tissue resulting from rib perichondrial graft in an articular defect--a rapid semi-quantitative methodology.

Influence of extracellular phosphate concentrations on the regulation of hepatic glucose output.

¹¹C-labeled 4-isopropylantipyrine: preparation and biological evaluation as a blood flow tracer in positron emission tomography (PET).

The uncoupling protein from brown fat mitochondria is related to the mitochondrial ADP/ATP carrier. Analysis of sequence homologies and of folding of the protein in the membrane.

Multisite phosphorylation of glycogen synthase from rabbit skeletal muscle. Identification of the sites phosphorylated by casein kinase-I.

The production of callus capable of plant regeneration from immature embryos of numerous Zea mays genotypes.

Structural characterization of the calcium binding protein s100 from adipose tissue.

Effect of furosemide on ion transport in the turtle bladder: evidence for direct inhibition of active acid-base transport.

Effects of guanethidine on electron transport and proton movements in rat heart, brain and liver mitochondria.

Microsomal calcium-accumulating ability of bovine coronary artery and aorta.

Immunocytochemical detection of acetylcholine in the rat central nervous system.

Properties and biochemical characterization of NADH 5 alpha-reductase from rat liver microsomes.

Cytochrome P-450 monooxygenase system. Localization in smooth muscle of rabbit aorta.

Metabolism of 2-acetylaminofluorene in isolated rabbit pulmonary cells. Evidence for the heterogeneous distribution of monooxygenase activity in lung tissue.

Amino acid sequence of chicken gizzard beta-tropomyosin. Comparison of the chicken gizzard, rabbit skeletal, and equine platelet tropomyosins.

General method for the separation of cyanogen bromide digests of proteins by high-performance liquid chromatography. Rabbit skeletal troponin I.

Species specificity in the acceleration of tissue-type plasminogen activator-mediated activation of plasminogens, by fibrinogen cyanogen bromide fragments.

Inhibition of purified rat liver glutathione S-transferase isozymes by diuretic drugs.

Release of carnitine from the perfused rat liver.

Anti-acetylcholine antibodies and first immunocytochemical application in insect brain.

Sublethal effects of simulated pulp mill effluents on the respiration and energy metabolism of rainbow trout (*Salmo gairdneri*).

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the uptake, distribution and excretion of a single oral dose of [11,12-³H]retinyl acetate and on the vitamin A status in the rat.

Fasciola hepatica: motility response to metabolic inhibitors in vitro.

Calcium mobilization in enzymically isolated single intact and skinned muscle cells of the porcine coronary artery.

Comparative effects of sodium azide and aminophylline on the rat isolated uterus during muscle activation.

The primary structure of bovine cellular retinoic acid-binding protein.

Plant regeneration from tissue cultures initiated from immature inflorescences of a grass, *Echinochloa colonum* (L.) Link.

Renal transport of gossypol in the rabbit.

Cyanide and sulfide interact with nitrogenous compounds to influence the relaxation of various smooth muscles.

Disposition of [14C]methyl bromide in rats after inhalation.

Effects of dinitrophenol on phosphorylase a activity, adenine nucleotide levels and tension in rabbit colon smooth muscle.

Regulation of aromatic oxidation of estradiol-17 beta in maternal hepatic, fetal hepatic and placental tissues: comparative effects of a series of inducing agents.

Standardization of house dust mite extracts. Liberation of allergenic and antigenic components in relation to extraction conditions.

Respiration and energy conservation in the filarial worm *Litomosoides carinii*.

A comparison of physiological changes in carp, *Cyprinus carpio*, induced by several pollutants at sublethal concentrations. I. The dependency on exposure time.

Nonspecific cytotoxic cells in fish (*Ictalurus punctatus*). V. Metabolic requirements of lysis.

Lipid peroxidation modifies the effect of phenolic anti-inflammatory drugs on prostaglandin biosynthesis.

Toxicity of 3,4,5,3',4',5'-hexabrominated biphenyl and 3,4,3',4'-tetrabrominated biphenyl.

Evidence for a role of the amino-terminal region in the biological activity of the classical anaphylatoxin, porcine C5a des-Arg-74.

Production of a Lectin in Tissue Cultures of *Dolichos biflorus*.

Coupling of cytoskeleton functions for fibroblast locomotion.

Distribution of cysteine conjugate beta-lyase in gastrointestinal bacteria and in the environment.

The interaction of rabbit skeletal muscle troponin-T fragments with troponin-I.

Vasodilator properties of a family of bioactive atrial peptides in isolated perfused rat kidneys.

Atriopeptin-immunoreactive neurons in the brain: presence in cardiovascular regulatory areas.

The amino acid sequence of pancreatic spasmolytic polypeptide.

Heme-copper relationship of cytochrome oxidase in rat brain in situ.

Effects of oxygen radicals on cerebral arterioles.

A hydroxylapatite microassay for receptor binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3-methylcholanthrene in various target tissues.

Mechanism of action of toxic halogenated aromatics.

Effect of various agents and conditions on palmitate oxidation by homogenates of rat liver and rat and human skeletal muscle.

Sex-influenced CPIB-induction of peroxisomes in rat liver and kidney tissues.

Determination of acute toxic effects in mice following exposure to methyl bromide.

GABA-modulin: a synaptosomal basic protein that differs from small myelin basic protein of rat brain.

Metabolic fate and cardiovascular effects of arsenic in rats and rabbits chronically exposed to trivalent and pentavalent arsenic.

Mechanism of crosslinking of proteins by glutaraldehyde III. Reaction with collagen in tissues.

On the brain endocoid for benzodiazepine recognition sites.

Calcium accumulating ability of mitochondria from bovine coronary artery. Comparison with aortic mitochondria.

A metabolite of riboflavin binds to the 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) receptor.

Effects of metabolic inhibitors on evoked activity and the energy state of hippocampal slices superfused in vitro.

Rat skeletal muscle glycogen synthase: phosphorylation of the purified enzyme by cAMP-dependent and -independent protein kinases.

Cyclophosphamide teratogenesis: a review.

Characterization of Ca²⁺ transport and enzyme activity in microsomes isolated from guinea-pig stomach smooth muscle.

Axoplasmic transport of substances in motoneuronal axons of the spinal cord in old age.

Determination and measurement of human exposure to the dibenzo-p-dioxins.

The epidemiology and toxicology of TCDD.

Soft tissue sarcoma and exposure to phenoxyherbicides and chlorophenols in New Zealand.

Sarcomas of soft tissues after Vietnam service.

Ascorbic acid nutritional status does not affect the biochemical response to paraquat.

Toxicologic studies in a fatal overdose of 2,4-D, mecoprop, and dicamba.

Paraquat poisoning.

Experimental paraquat poisoning--histological, electron microscopic and autoradiographic changes in the lung.

Effect of dimethylthiourea on paraquat toxicity in rats.

Distribution and toxicity of monosodium methanearsonate following oral administration of the herbicide to dairy sheep and goats.

Tissue slices in the study of lung metabolism and toxicology.

Selected responses of hypertension-sensitive and resistant rats to inhaled acrolein.

Collagen stimulating factors from lung in experimental paraquat poisoning demonstrated in vitro and in vivo.

Structural hepatic changes associated with cyanamide treatment: cholangiolar proliferation, fibrosis and cirrhosis.

Persistence of some polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans of pentachlorophenol in human adipose tissue.

[Polychlorinated dibenzofurans (PCDF): environmental and toxicological aspects].

Uptake, distribution and elimination of monosodium methanearsonate following long term oral administration of the herbicide to sheep and goats.

Lipid metabolism in rabbits exposed to paraquat aerosol.

Release of amino-terminal procollagen peptides in paraquat-induced acute pulmonary fibrosis.

[Changes in the lung tissue of newborn rats after paraquat as a model of respiratory distress].

Properties of the lysosomes from liver and gill of rainbow trout, *Salmo gairdnerii* R.: effect of starvation, salinity and 2,4,5-T.

On the role of peroxisomes in the metabolism of lipids--evidence from studies on mammalian tissues in vivo.

Extracorporeal removal of specific antibodies by hemoperfusion through the immunosorbent agarose-polyacrolein microsphere beads: removal of anti-bovine serum albumin in animals.

Detection and occurrence of pentachlorophenol residues in chicken liver and fat.

Identification and extraction of proteins that compose the triad junction of skeletal muscle.

Organ and cellular distribution of inhaled metallic mercury in the rat and Marmoset monkey (*Callithrix jacchus*): influence of ethyl alcohol pretreatment.

Autoradiographic and biochemical studies of drug distribution in the liver. III. [¹⁴C]Aminotriazole.

Glutaraldehyde fixatives for preserving the chick's inner ear.

The membrane capacity of mammalian skeletal muscle fibres.

Tissue distribution and retention of ⁷⁴As-dimethylarsinic acid in mice and rats.

Disposition of some sulphur-containing hexachlorobenzene (HCB) metabolites: affinity of methylsulphonylpentachlorobenzene for the gray matter of brain, the lungs and the adrenal zona reticularis.

On the role of catalase in the oxidation of tissue fatty acids.

A quantitative study of peroxidase activity in unfixed tissue sections of the guinea-pig thyroid gland.

Determination of the herbicides paraquat and diquat in blood and urine by gas chromatography.

Biochemical characteristics of rat superoxide dismutase and the effect caused by paraquat injection on the enzyme activity in various tissues.

Chlorinated compounds in tissues of chickens raised on pentachlorophenol-contaminated litter.

Paraquat effect on the bioelectric parameters of the rabbit small intestine and its in vitro penetration.

Effects of a herbicide on the peroxide metabolism enzymes and lipid peroxidation in carp fish (*Hypophthalmichthys molitrix*).

Hexadecane increases the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): is brown adipose tissue the primary target in TCDD-induced wasting syndrome?

Delayed neurotoxicity produced by an organophosphorus compound (Sumithion). A case report.

Body weight regulation in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

A heterozygous defect for structurally altered pro-alpha 2 chain of type I procollagen in a mild variant of osteogenesis imperfecta. The altered structure decreases the thermal stability of procollagen and makes it resistant to procollagen N-proteinase.

3'-Monoiodothyronine degradation in rat liver homogenate: enzyme characteristics and documentation of deiodination by high-pressure liquid chromatography.

An evaluation of reports of dioxin exposure and soft tissue sarcoma pathology among chemical workers in the United States.

Experimental skeletal muscle damage: the nature of the calcium-activated degenerative processes.

The effectiveness of chemical carcinogens to induce atherosclerosis in the white Carneau pigeon.

Cysteine in the triple-helical domain of one allelic product of the alpha 1(I) gene of type I collagen produces a lethal form of osteogenesis imperfecta.

Entry of adenovirus 2 into HeLa cells.

Quantitation of types I and III collagens in human tissue samples and cell culture by cyanogen bromide peptide analysis.

The pharmacological profile of the thromboxane A2 antagonist BM 13.177. A new anti-platelet and anti-thrombotic drug.

Increased plasma and aortic triglycerides in rabbits after acute administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

TCDD (2,3,7,8-tetrachlorodibenzo-p-dioxin) reduces lipoprotein lipase activity in the adipose tissue of the guinea pig.

Tissue plasminogen activator: peptide analyses confirm an indirectly derived amino acid sequence, identify the active site serine residue, establish glycosylation sites, and localize variant differences.

Amyloid fibril protein in familial amyloidotic polyneuropathy, Portuguese type. Definition of molecular abnormality in transthyretin (prealbumin).

Autoradiographic and biochemical studies of drug distribution in the liver. I. [¹⁴C]Dehydrocorydaline.

Pathogenic mechanisms in osteochondrodysplasias.

Digestible energy and efficiency of feed utilization in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Relation between glutathione and cytoplasmic protein sulfhydryl groups in the rat: a rapid procedure for analytical determination].

Soft tissue sarcomas in agriculture and forestry workers.

Modulation of azaserine-induced pancreatic foci by phenolic antioxidants in rats.

Analysis of collagen from normal and abnormal human bone.

Sodium glycolate absorption in rat intestine.

Connective tissue antigens stimulate collagenase production in arthritic diseases.

Evidence for a role of hydroxyl radical in immune-complex-induced vasculitis.

Teratogenicity of TCDD and the congener 3,3',4,4'-tetrachloroazoxybenzene in sensitive and nonsensitive mouse strains after reciprocal blastocyst transfer.

[Inhibitory analysis of the functions of the oxidative metabolic systems of tumor cells in tissue culture].

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces hyperplasia in confluent cultures of human keratinocytes.

Ruminal metabolism of plant toxins with emphasis on indolic compounds.

DMSA, DMPS, and DMPA--as arsenic antidotes.

Induction and decay of amino acid transport in the liver. Turnover of transport activity in isolated hepatocytes after stimulation by diabetes or glucagon.

Leads from the MMWR. Porphyria cutanea tarda and sarcoma in a worker exposed to 2,3,7,8-tetrachlorodibenzodioxin-Missouri.

Teratological studies on the TCDD congener 3,3',4,4'-tetrachloroazoxybenzene in sensitive and nonsensitive mouse strains: evidence for direct effect on embryonic tissues.

Identification of an anti-monocyte monoclonal antibody that is specific for membrane complement receptor type one (CR1).

Neutrophil-mediated cellular cytotoxicity induced by zymosan-activated serum.

Interactions of thrombospondin with extracellular matrix proteins: selective binding to type V collagen.

Importance of the route of administration for genetic differences in benzo[a]pyrene-induced in utero toxicity and teratogenicity.

Experimental study on embryogenesis of congenital diaphragmatic hernia.

A comparison of organochlorine residues in human adipose tissue autopsy samples from two Ontario municipalities.

[Effect of camphorated paramonochlorophenol and its aqueous concentrations in polyvinyl sponges implanted in the connective tissue of rats (biological and histological study)].

Iron pharmacokinetics after administration of ferric-hydroxide-polymaltose complex in rats.

Teratogenicity of 2,3,7,8-tetrachlorodibenzofuran in the mouse.

Neurobehavioral assessment of chronic low-level methyl bromide exposure in the rabbit.

Improved red cell survival in patients with chronic subclinical haemolysis due to artificial heart valve.
Observations after in vitro treatment of the cells with potassium cyanate.

Abnormal type I collagen metabolism by cultured fibroblasts in lethal perinatal osteogenesis imperfecta.

Health implications of 2,3,7,8-tetrachlorodibenzodioxin (TCDD) contamination of residential soil.

The importance of minor collagenous chains in the articular cartilage.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced cleft palate in the mouse: evidence for alterations in palatal shelf fusion.

Family studies of the genetic abnormality in transthyretin (prealbumin) in Portuguese patients with familial amyloidotic polyneuropathy.

Polychlorinated biphenyls (PCBs) and polybrominated biphenyls (PBBs): biochemistry, toxicology, and mechanism of action.

Triiodothyronine production by isolated rat hepatocytes: characterization and lack of glucoregulatory hormone effects.

Cathepsins J and K: high molecular weight cysteine proteinases from human tissues.

Influence of cyanogen-bromide-digested fibrinogen on the kinetics of plasminogen activation by urokinase.

Pea Xyloglucan and Cellulose : III. Metabolism during Lateral Expansion of Pea Epicotyl Cells.

Lead flux through the kidney and salivary glands of rats.

Hybrid character of a large neurofilament protein (NF-M): intermediate filament type sequence followed by a long and acidic carboxy-terminal extension.

A brain octadecaneuropeptide generated by tryptic digestion of DBI (diazepam binding inhibitor) functions as a proconflict ligand of benzodiazepine recognition sites.

A Mg²⁺-independent high-affinity Ca²⁺-stimulated adenosine triphosphatase in the plasma membrane of rat stomach smooth muscle. Subcellular distribution and inhibition by Mg²⁺.

Cell-specific domains of glial- and muscle-type intermediate filament proteins. Immunoaffinity chromatography and immunoblotting study of GFA protein and desmin.

Oxalate accumulation in rat renal cortical slices.

Characteristics of skeletal muscle ecto-ATPase in situ.

Altered levels of a 5 S gene-specific transcription factor (TFIIIA) during oogenesis and embryonic development of *Xenopus laevis*.

Multiple phosphorylation of rat-liver glycogen synthase by protein kinases.

Glycogen synthase in rat adipocytes and skeletal muscle is phosphorylated on both serine and threonine.

N-(2,3-dimercaptopropyl)phthalamidic acid: protection, in vivo and in vitro, against arsenic intoxication.

An in vitro approach to studying cutaneous metabolism and disposition of topically applied xenobiotics.

Crosslinking of troponin complex with 1,3-difluoro-4,6-dinitrobenzene. Identification of the crosslink formed between troponin C and troponin I in the absence of Ca²⁺.

The amino acid sequence of GTP:AMP phosphotransferase from beef-heart mitochondria. Extensive homology with cytosolic adenylate kinase.

Respiration during Postharvest Development of Soursop Fruit, *Annona muricata* L.

Gas chromatographic determination of clopidol in chicken tissues.

Development of markers for cholinergic neurones in re-aggregate cultures of foetal rat whole brain in serum-containing and serum-free media: effects of triiodothyronine (T₃).

Uptake and metabolism of thyroid hormones by the rat foetus in early pregnancy.

Use of bacteria and yeasts to identify T lymphocytes in peripheral blood and lymphoid tissues of healthy guinea pigs and guinea pigs fed aflatoxin.

Role of calcium ions in insulin action on hexose transport in L6 muscle cells.

A tumor promoter induces rapid and coordinated reorganization of actin and vinculin in cultured cells.

Selective retrograde axonal transport of free glycine in identified neurons of *Aplysia*.

Membrane protein carboxyl methylation does not appear to be involved in the response of erythrocytes to cytoskeletal stress.

Heterogeneity of contractile proteins. Purification and characterization of two species of troponin T from rabbit fast skeletal muscle.

Processing of procollagen types III and I in cultured bovine smooth muscle cells.

A new procedure to analyze free fatty acids. Application to 20-mg brain tissue samples.

Metabolism of β -aminoisobutyric acid in mungbean hypocotyls in relation to metabolism of 1-aminocyclopropane-1-carboxylic acid.

Respiratory tract lesions induced by sensory irritants at the RD50 concentration.

Amino acid sequence of the beta chain of sarcoplasmic calcium binding protein (SCP) obtained from shrimp tail muscle.

Generation of an unusual depolarizing response in rabbit primary afferent neurones in the absence of divalent cations.

Isolation, purification and partial sequence of a neuropeptide (diazepam-binding inhibitor) precursor of an anxiogenic putative ligand for benzodiazepine recognition site.

Activation of glycogen synthase by insulin in rat adipocytes. Evidence of hormonal stimulation of multisite dephosphorylation by glucose transport-dependent and -independent pathways.

Somatic embryogenesis in *Echinochloa crusgalli*.

2,4-Dinitrophenol (DNP)-induced injury in calcium-free hearts.

The effect of methyltransferase inhibition on the metabolism of [⁷⁴As]arsenite in mice and rabbits.

Relationships between the flux of lipid metabolism in vivo and the uncoupling of respiratory control.

Effects of cyclic AMP on fluid absorption and ion transport across frog retinal pigment epithelium.

Measurements in the open-circuit state.

Studies on adenosine triphosphate transphosphorylases. Amino acid sequence of rabbit muscle ATP-AMP transphosphorylase.

Receptor and non receptor-mediated activation of blood platelets. Effect on membrane-cytoskeleton interaction.

Microquantitation of insoluble tissue collagen (types I and III) by radiodilution assay.

Determination of thiamine and thiamine phosphates in excitable tissues as thiochrome derivatives by reversed-phase high-performance liquid chromatography on octadecyl silica.

The alpha-subunit of mouse 7 S nerve growth factor is an inactive serine protease.

Ion transport by rabbit descending colon: mechanisms of transepithelial potassium transport.

Cooling-induced contraction in ileal longitudinal smooth muscle of guinea-pig.

Accumulation of thyrotropin releasing hormone by rat hypothalamic slices.

An improved fixation technique for ultrastructural preservation of embryonic lenses.

Colorimetric assay for monoamine oxidase in tissues using peroxidase and 2,2'-azinodi(3-ethylbenzthiazoline-6-sulfonic acid) as chromogen.

Increased epidermal transglutaminase activity following 2,3,7,8-tetrachlorodibenzo-p-dioxin: in vivo and in vitro studies with mouse skin.

Gastrointestinal absorption and metabolism of capsaicin and dihydrocapsaicin in rats.

Effects of ATP depletion and protein synthesis inhibition on muscle plasma membrane orthogonal arrays.

Cellular distribution of thyroid myosin.

Kinetics of the activation of plasminogen by natural and recombinant tissue-type plasminogen activator.

Inactivation of pig muscle 3-phosphoglycerate kinase by thiol modification depends on reagent size.

Elevated binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3-methylcholanthrene to the Ah receptor in hepatic cytosols from phenobarbital-treated rats and mice.

Different susceptibility of mouse tissues to porphyrogenic effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Depression of contractility in isolated rabbit myocardium following exposure to iron: role of free radicals.

2,3,7,8-Tetrachlorodibenzo-p-dioxin levels in adipose tissue of Vietnam veterans.

Ontogeny of the cytosolic receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in rat liver, lung, and thymus.

Correlation between the redox state of NAD(P)H and total flow in the perfused rat liver.

Mitochondrial oxidative phosphorylation: tissue oxygen sensor for regulation of coronary flow.

A goniometrical study of mitochondrial cristae in rat heart muscle and ependyma of the choroid plexus after application 2,4-DNP in vivo.

Differential induction of two 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible forms of cytochrome P-450 in extrahepatic versus hepatic tissues.

Influence of anoxia and dinitrophenol on Ca²⁺ efflux and phosphorylase a activity in rabbit colon smooth muscle.

Chlorinated compounds and phenols in tissue, fat, and blood from rats fed industrial waste site soil extract: methods and analysis.

Human skeletal-muscle aldolase: N-terminal sequence analysis of CNBr- and o-iodosobenzoic acid-cleavage fragments.

Excretion and distribution of two occupational toxicants, tetrachloroazobenzene and tetrachloroazoxybenzene in the rat.

Effects of cell swelling on fluid flow across alveolar epithelium.

Immunosuppression by D-penicillamine in vitro. Inhibition of human T lymphocyte proliferation by copper- or ceruloplasmin-dependent generation of hydrogen peroxide and protection by monocytes.

Enhancement of Newcastle disease virus-induced fusion of mouse L cells by sodium vanadate.

Bioconcentration and metabolism of picric acid (2,4,6-trinitrophenol) and picramic acid (2-amino-4,6-dinitrophenol) in rainbow trout *Salmo gairdneri*.

The relation between effects of 2,4-dinitrophenol and adrenalin on muscle contraction induction and phosphorylase activation.

Novel purification of carbonic anhydrase III from human, rat and baboon muscle.

Role of kidney and liver in degradation of circulating submaxillary renin in mice.

The stability of solubilized mammalian muscle acetylcholine receptors during purification by monoclonal immunoabsorption.

The isolation and some properties of dairy cow liver mitochondria.

The in vitro metabolism by homogenates of goldfish (*Carassius auratus*) liver of pentachloro-2-(chloromethyl sulphonamido) diphenyl ether, the major component and active ingredient of the mothproofing agent Eulan WA New.

[Properties allowing the attribution to gamma-hydroxybutyrate the quality of neurotransmitter in the central nervous system].

Release of a common source of intracellular Ca²⁺ by alpha-adrenergic agonists and dinitrophenol in rat liver slices.

Active pyrimidine absorption by chicken colon.

Pharmacologic modulation in vitro of human histamine-induced suppressor cell activity.

Fatality due to paraquat intoxication: confirmation by postmortem tissue analysis.

Effect of phenolic compounds on in vivo activity of transaminases in certain tissues of the fish, *Notopterus notopterus*.

Hypolipidemia and peroxisome proliferation induced by phenoxyacetic acid herbicides in rats.

Maternal exposure to environmental chemicals and the aetiology of teratogenesis.

Hemoperfusion in a child who ingested diquat and died from pontine infarction and hemorrhage.

Effects of phenolic compounds on 5-nucleotidase activity in some tissues of *Notopterus notopterus* (Pallas): a biochemical study.

Neurobehavioral assessment of 2,4-dichlorophenoxyacetic acid (2,4-D) in rats.

[Electromyographic characteristics of acute poisonings with chlorine derivatives of phenoxy acids].

[Acute paraquat poisoning: prognostic and therapeutic significance of blood assay].

Toxicologic studies in a fatal overdose of 2,4-D, MCPP, and chlorpyrifos.

[Comparative studies on the embryotoxicity of 2-methyl-4-chlorophenoxyacetic acid, mecoprop and dichlorprop in NMRI mice].

[Toxic and teratogenic effects of the ammonium salt of fosamine on the development of quail and chick embryos].

Changes induced by Gramoxon in tissue phospholipids and phospholipid fatty acids in mouse and guinea-pig.

The role of respiratory protection on increased survival of *Treponema pallidum* (Nichols) when cocultivated with mammalian cells in vitro.

Kidney structure in hypothyroidism.

Correlation between brain tissue and cerebrospinal fluid concentrations of selected compounds in rats with intact and injured blood-brain barrier.

[Effect of small amounts of 2,4-dichlorophenoxyacetic acid derivatives on thiamine and riboflavin metabolism in the animal body].

[Modification of 2,4-dichlorophenoxyacetate-induced myotonia of cold blood muscles by variations in external Ca^{++} and K^+ concentrations].

Plasma glutathione and glutathione disulfide in the rat: regulation and response to oxidative stress.

Intracellular interaction and metabolic fate of arsenite and arsenate in mice and rabbits.

Gas-liquid chromatographic determination of salsolinol in the striatum of rat brain during the calcium carbimide--ethanol interaction.

Gas-liquid chromatographic determination of S,S,S-tributyl phosphorotrithioate (DEF) in water and fish tissue.

Effects of monocrotaline and monocrotaline pyrrole on 5-hydroxytryptamine and paraquat uptake by lung slices.

Whole body and liver distribution of inhaled mercury vapor in the mouse: influence of ethanol and aminotriazole pretreatment.

Relationship between catalase activity and uptake of elemental mercury by rat brain.

Paraquat concentration and renal function in mice fed purified and cereal-based diets.

[Effect of Faustan (diazepam) on the normal and myotonically reacting frog skeletal muscle].

A new era of exploitation of microbial metabolites.

Dose-dependent pharmacokinetics: emphasis on phase I metabolism.

The molecular defect in a nonlethal variant of osteogenesis imperfecta. Synthesis of pro-alpha 2(I) chains which are not incorporated into trimers of type I procollagen.

Lymphocyte transformation to connective tissue antigens in adult and juvenile rheumatoid arthritis, osteoarthritis, ankylosing spondylitis, systemic lupus erythematosus, and a nonarthritic control population.

The acute toxicity of perfluorooctanoic and perfluorodecanoic acids in male rats and effects on tissue fatty acids.

Induction of 7-ethoxycoumarin o-deethylase activity in cultured human epithelial cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): evidence for TCDD receptor.

Effect of ATP level and its metabolic turnover in liver on the proteosynthesis postmortem.

Residues of polychlorinated phenols and anisoles in broilers raised on contaminated woodshaving litter.

The covalent structure of amyloid-related serum protein SAA from two patients with inflammatory disease.

Effects of cystic fibrosis serum and fibroblast culture medium on ion distribution in rat submandibular gland.

Synthesis of a shortened pro-alpha 2(I) chain and decreased synthesis of pro-alpha 2(I) chains in a proband with osteogenesis imperfecta.

Dioxin exposure and sarcoma.

Hypothyroxinemia and hypothermia in rats in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin administration.

The control of muscle contracture by the action of dantrolene on the sarcolemma.

Embryotoxic effects of 2,3,7,8 tetrachlorodibenzo-p-dioxin administered to female rats before mating.

Analysis of cyanogen bromide peptides of type I collagen from a patient with lethal osteogenesis imperfecta.

Effects of parathyroid hormone on skeletal muscle protein and amino acid metabolism in the rat.

Differential proteolysis and evidence for a residue exchange in tissue plasminogen activator suggest possible association between two types of protein microheterogeneity.

Type I collagen content is increased in lungs of patients with adult respiratory distress syndrome.

Activation of phosphorylase by anoxia and dinitrophenol in rabbit colon smooth muscle: relation to release of calcium from mitochondria.

Influence of anoxia and dinitrophenol on the phosphorylase a activity and the cyclic nucleotide content of smooth muscle.

Quantitation of type I to type III collagen ratios in small samples of human tendon, blood vessels, and atherosclerotic plaque.

Encephalopathic effect of phenol in rats.

The release of surfactant in rat lung by brief periods of hyperventilation.

Abnormal alpha 2-chain in type I collagen from a patient with a form of osteogenesis imperfecta.

ATP-dependence of ¹²⁵I-insulin binding by rat soleus muscle.

A high affinity, calmodulin-responsive (Ca²⁺ + Mg²⁺)-ATPase in isolated bone cells.

A comparative cytogenetic study on cases of induced abortions in TCDD-exposed and nonexposed women.

Localization of intrarenal cross-linked fibrin in children with various renal diseases.

Oxygen radicals and vascular damage.

Presence of an abnormal transthyretin (prealbumin) in Portuguese patients with familial amyloidotic polyneuropathy.

Characterization and localization of collagens synthesized by cultured muscle cells stimulated with collagen-inducing factor from embryonic brain extracts.

In vitro ¹⁴C-leucine incorporation into nonsynaptic and synaptic rat brain mitochondria isolated by Ficoll gradients.

High-performance liquid chromatographic analysis on radial compression column of the neurotoxic tri-*o*-cresyl phosphate and metabolites.

The toxic effect of some industrial chemicals on rabbit ileum in vitro compared with eye irritancy in vivo.

Preparation and biological reactivity of polyiodinated human growth hormone.

The primary structure of turkey muscle acylphosphatase.

The metabolism of the anti-inflammatory drug eterylate in rat, dog and man.

Effects of Thidiazuron on Cytokinin Autonomy and the Metabolism of N-(Delta-Isopentenyl)[8-C]Adenosine in Callus Tissues of *Phaseolus lunatus* L.

Ascorbate-induced lipid peroxidation and inhibition of [³H]spiroperidol binding in neostriatal membrane preparations.

Inhibition of insulin-stimulated xylose uptake in rat soleus muscle by cycloheximide.

The effects of lipolytic hormones on calcium uptake in endoplasmic reticulum of adipocytes.

Regulation of cyclic GMP levels in nerve tissue.

Interaction of the opiate antagonist, naltrexone methyl bromide, with the acetylcholine receptor system of the motor end-plate.

Identification of a site in fibrin(ogen) which is involved in the acceleration of plasminogen activation by tissue-type plasminogen activator.

ATP depletion promotes deactivation of insulin-stimulated sugar transport in rat soleus muscle.

Differences in effects of fibrin(ogen) fragments on the activation of 1-glu-plasminogen and 442-val-plasminogen by tissue-type plasminogen activator.

Chlorobenzene-impaired lindane metabolism and the effect of pretreatment with chlorobenzene, lindane, or chlorobenzene plus lindane.

Stimulatory and inhibitory effects of hydrogen peroxide, diamide and vitamin K-5 on sugar transport in rat soleus muscle.

Hormonal control of glycogen synthase in rat hemidiaphragms. Effects of insulin and epinephrine on the distribution of phosphate between two cyanogen bromide fragments.

Ca²⁺, calmodulin-dependent phosphorylation of glycogen synthase by a brain protein kinase.

Clonal Multiplication of *Pinellia ternata* by Tissue Culture.

A technique for the isolation of submucosal gland cells from cat trachea.

Heterogeneity in the collagens extracted from human embryonic calvaria.

Transport of methotrexate in cortical slices of monkey kidney: effect of organic anions and vincristine.

The restorative action of coenzyme Q10 in 2,4-dinitrophenol-depressed electrical and contractile activities of guinea-pig heart.

Artifacts in the definition of toxicity by cyanides and cyanogens.

Distribution, excretion, and metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57BL/6J, DBA/2J, and B6D2F1/J mice.

Analysis and kinetics of 2,4-dinitrophenol in tissues by capillary gas chromatography--mass spectrometry.

The complete amino acid sequence of rabbit muscle phosphoglucomutase.

Plant regeneration in vitro from leaf tissues derived from cultured immature embryos of *Zea mays* L.

Capping of cholera toxin-ganglioside GM1 complexes on mouse lymphocytes is accompanied by co-capping of alpha-actinin.

Antigenic structure of adenylate kinase from porcine skeletal muscle--II. Immunochemical cross-reactivity of fragments from adenylate kinase.

Oxygen and redox-active drugs: shared toxicity sites.

Phosphorylation of K-casein by glycogen synthase kinase-3 from rabbit skeletal muscle.

Metabolic factors regulating the generation of prostaglandins E1 and E2 by isolated rat uterus.

Lack of correlation between cyclic GMP elevation and relaxation of nonvascular smooth muscle by nitroglycerin, nitroprusside, hydroxylamine and sodium azide.

Calcium transport and phosphorylated intermediate of $(Ca^{2+} + Mg^{2+})$ -ATPase in plasma membranes of rat liver.

Effects of phencyclidine on cardiac action potential: pH dependence and structure-activity relationships.

Long-duration, high-frequency plant regeneration from cereal tissue cultures.

Regulation of Cell Shape in *Euglena gracilis*: I. Involvement of the Biological Clock, Respiration, Photosynthesis, and Cytoskeleton.

Further biochemical characterization of the polypeptide h3 recently isolated from human brain material, and its identification in human liver.

Generation of IgG aggregates by the myeloperoxidase-hydrogen peroxide system.

Localization of a trifluoperazine binding site on troponin C.

Lipid peroxidation as a possible cause of TCDD toxicity.

Liver morphology in guinea pigs administered either pyrolysis products of a polychlorinated biphenyl transformer fluid or 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The nucleotide sequence of rat liver fatty acid binding protein mRNA.

Higher Chlorinated Dioxins Implicated in the Mortality of Young Pigs Kept on a Pentachlorophenol-treated Wooden Floor.

Metabolism of palmitate by anoxic and reoxygenated heart cell cultures.

Arsenic distribution and neurochemical effects in peroral sodium arsenite exposure of rats.

Location of thyrotropin-releasing hormone-like immunoreactivity in rat pancreas.

Distribution of immunoreactive human growth hormone-like material and thyrotropin-releasing hormone in the rat central nervous system: evidence for their coexistence in the same neurons.

Axonal transport of thiamine in frog sciatic nerves in vitro.

Plasminogen activation by tissue activator is accelerated in the presence of fibrin(ogen) cyanogen bromide fragment FCB-2.

Amitrole Absorption by Bean (*Phaseolus vulgaris* L. cv ;Red Kidney') Roots : Mechanism of Absorption.

Changes of extracellular potassium activity induced by electric current through brain tissue in the rat.

Age-related changes in the composition of proteins in the trabecular meshwork of the human eye.

Failure of atractyloside to inhibit synaptosomal mitochondrial energy transduction.

Attachment and extracellular matrix differences between tendon and synovial fibroblastic cells.

[Polarographic study of cell respiration in a tissue culture].

Analytical subcellular fractionation of normal human skeletal muscle by sucrose density gradient centrifugation.

Effect of several uncouplers of cell-to-cell communication on gap junction morphology in mammalian heart.

Simultaneous azo-coupling method for an estrogen sulfatase in human tissues.

Phagocytosis of mast cell granules by cultured fibroblasts.

Distribution and metabolism of the teratogen nitrofen (2,4-dichloro-4'-nitro diphenyl ether) in pregnant rats.

A new metabolically trapped agent by brain monoamine oxidase: N-methyl labeled (14C) N-methylphenylethylamine (14C-MPEA).

Cell water content in carp kidney tissue slices as influenced by various osmotic agents.

Effect of lidocaine on hepatic prostanoid production in vitro following 2,4-dinitrophenol administration.

Unequivocal demonstration that malondialdehyde is a mutagen.

A kinetic study of the oxidation by molecular oxygen of the cytochrome chain of intact yeast cells, *Acetobacter suboxydans* cells, and of particulate suspensions of heart muscle.

Enzymatic toxicogenation of "activated" cyclophosphamide by 3'-5' exonucleases.

Different effects of types A and B botulinum toxin on transmitter release at the rat neuromuscular junction.

The effect of DDT and related insecticides on the mitochondrial ATPase of houseflies.

[Experimental chronic paraquat poisoning. Functional and histopathological pulmonary changes].

Successful treatment of paraquat poisoning: activated charcoal per os and "continuous hemoperfusion".

[Enzyme activity of the blood and tissues of individual organs in long-term exposure to dieldrin].

Combined paraquat and acetaminophen toxicity.

Phenoxy herbicides, trichlorophenols, and soft-tissue sarcomas.

Do phenoxy herbicides cause cancer in man?

Thoracic soft-tissue sarcoma in Vietnam veterans exposed to Agent Orange.

Mortality of 2,4-dichlorophenoxyacetic acid and 2,4,5-trichlorophenoxyacetic acid herbicide applicators in Finland: first report of an ongoing prospective cohort study.

Effects of sodium pentachlorophenate on enzymes of energy metabolism in tissues of *Notopterus notopterus*.

Increase in the penetration of tracer compounds into the rat brain during 2-methyl-4-chlorophenoxyacetic acid (MCPA) intoxication.

Effects of anionic xenobiotics on rat kidney. I--Tissue and mitochondrial respiration.

Neurotoxicological investigation of the new Hungarian pesticide Toxurazine.

Study of the effects of paraquat on the peroxide metabolism enzymes in guinea-pig.

Thin layer chromatography as a routine appropriate techniques for the determination of bipyridylium herbicides in post mortem human tissues.

Mast cell hyperplasia during goitrogen-induced thyroid growth - a quantitative study.

[Etiological aspects on fibrosis--tissue damage and repair of pulmonary tissue (author's transl)].

Metabolic interactions of aldehyde dehydrogenase with therapeutic and toxic agents.

Dose-effect relationship between ethyl alcohol pretreatment and retention and tissue distribution of mercury vapor in rats.

Acrolein/glutaraldehyde as a fixative for combined light and electron microscopic immunocytochemical detection of pituitary hormones in immersion-fixed tissue.

The effect of paraquat on the incorporation of radiolabelled proline into acid-extractable lung proteins and collagens.

Biotransformation of the cardiovascular toxin, allylamine, by rat and human cardiovascular tissue.

Serological approaches for the characterization of catalase in tissue-derived mycobacteria.

The accumulation of diamines and polyamines into rat lung slices.

A simple method for the estimation of paraquat in tissue.

Advances in pesticide metabolite identification through the use of plant tissue cultures.

Identification of a constituent of the junctional feet linking terminal cisternae to transverse tubules in skeletal muscle.

Steam distillation and gas-liquid chromatographic determination of triallate and diallate in milk and plant tissue.

Allylamine cardiotoxicity--IV. Metabolism to acrolein by cardiovascular tissues.

Polyamines modify paraquat-induced changes in pulmonary superoxide dismutase and lipid peroxidation.

Active oxygen metabolites and their action in the hepatocyte. Studies on chemiluminescence responses and alkane production.

Effect of chloride withdrawal on the geometry of the T-tubules in amphibian and mammalian muscle.

"Embryonic" collagen (type I trimer) alpha 1-chains are genetically distinct from type I collagens alpha 1-chains.

In vitro penetration and absorption of chemicals into the ovine hoof.

[Structural differences of C-terminal fragment of the alpha-subunits of rabbit muscle aldolase in normal animals and in experimental atherosclerosis].

A stable propidium iodide staining procedure for flow cytometry.

Morphogenesis of the mitochondrial alterations in muscle diseases.

Analysis of the type of collagen present in osteoarthritic human cartilage.

TCDD embryotoxicity in the mouse may be enhanced by beta-naphthoflavone, another ligand of the Ah-receptor.

Synthesis of some potential antihypertensive phthalaziny- and quinoxalinyguanidines.

Soft-tissue sarcoma, malignant lymphoma, and exposure to phenoxyacids or chlorophenols.

Nonhelical, fibronectin-binding basement-membrane collagen from endodermal cell culture.

Human skin collagenase in recessive dystrophic epidermolysis bullosa. Purification of a mutant enzyme from fibroblast cultures.

Severe peripheral neuropathy after exposure to monosodium methyl arsonate.

Structural and enzymatic comparison of human cardiac muscle myosins isolated from infants, adults, and patients with hypertrophic cardiomyopathy.

Iron and rheumatoid disease.

Collagen polymorphism in the normal and diseased blood vessel wall. Investigation of collagens types I, III and V.

Immunity to homologous type III collagen after partial meniscectomy and sham surgery in rabbits.

Mechanism of tissue Ca^{2+} gain during reoxygenation after hypoxia in rabbit myocardium.

Monoclonal antibody to transferrin receptor blocks transferrin binding and inhibits human tumor cell growth in vitro.

Data on dioxin.

Serum ferritin in haemodialysis.

Ascorbic acid and iron levels in plasma and liver of vitamin C deficient guinea pigs after iron overload and desferrioxamine administration.

Cancer risks associated with agriculture: epidemiologic evidence.

Studies in neuronal ceroid lipofuscinosis: enzymes of liver and brain tissues involved in the defense against oxidative damage.

Persistent tissue levels of TCDD in the mouse and their reduction as related to prevention of toxicity.

Epidemiological study of nasal and nasopharyngeal cancer and their relation to phenoxy acid or chlorophenol exposure.

Free radicals and activated oxygen.

Acnegenic activity of 3-methylcholanthrene and benzo[a]pyrene, and a comparative study with 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rabbit and hairless mouse.

2,3,7,8-tetrachlorodibenzo-p-dioxin and related halogenated aromatic hydrocarbons: examination of the mechanism of toxicity.

Structural properties of Type I collagen isolated from chickens with scoliosis.

Met- and leu-enkephalin immuno- and bio-reactivity in human stomach and pancreas.

A simple, sensitive spectrophotometric assay for extrinsic (tissue-type) plasminogen activator applicable to measurements in plasma.

Persistence of TCDD in monkey adipose tissue.

Free magnesium in sheep, ferret and frog striated muscle at rest measured with ion-selective micro-electrodes.

Inhibition of insulin-stimulated xylose uptake in denervated rat soleus muscle: a post-receptor effect.

Amino acid transport and protein synthesis in energetically-stable calcium-tolerant isolated cardiac myocytes.

Low molecular weight pineal and cerebral fractions affecting insulin secretion in vitro.

Renal transport of 2'-deoxytubercidin in mice.

Does the sarcoplasmic reticulum achieve chemiosmotic equilibrium in relaxed muscle?

Similar activities of nerve growth factor and its homologue proinsulin in intracellular hydrogen peroxide production and metabolism in adipocytes. Transmembrane signalling relative to insulin-mimicking cellular effects.

Photochemical cross-linking between rabbit skeletal troponin subunits. Troponin I-troponin T interactions.

Clonal propagation of Callistemon by tissue culture techniques.

Evidence for compartmentalization of conjugates of 2,4-dichlorophenoxyacetic Acid in soybean callus tissue.

Primary structure of parvalbumin from rat skeletal muscle.

Comparative evaluation of contraction and relaxation of isolated heart muscle with decreased calcium concentration in the perfusate, acidosis, and metabolic blockade.

In vitro cellular respiration at elevated temperatures in developing rat cerebral cortex.

2-¹⁴C-1-Allyl-3,5-diethyl-6-chlorouracil I: Synthesis, absorption in human skin, excretion, distribution, and metabolism in rats and rabbits.

Complete primary structure of protein phosphatase inhibitor-1 from rabbit skeletal muscle.

Physicochemical characteristics of homogeneous bovine lung angiotensin I-converting enzyme. Comparison with human serum enzyme.

Structural and immunological characterization of type IV collagen isolated from chicken tissues.

Multiple effects of sulphhydryl reagents on sugar transport by rat soleus muscle.

The examination and quantitation of tissue cytosolic receptors for 2,3,7,8-tetrachlorodibenzo-p-dioxin using hydroxylapatite.

Effect of BASF 13-338, a Substituted Pyridazinone, on Lipid Metabolism in Leaf Tissue of Spinach, Pea, Linseed, and Wheat.

Metabolism of 2,4-dichlorophenoxyacetic Acid in 2,4-dichlorophenoxyacetic Acid-resistant soybean callus tissue.

Effect of Na⁺ and ATP on peritubular Ca transport by the marine teleost renal tubule.

Maturation of potassium-stimulated respiration in rat cerebral cortical slices.

[Reaction of rat subcutaneous connective tissue to camphorated parachlorophenol and aqueous 2% parachlorophenol].

Immunohistochemical localization of thyrotropin-releasing hormone in the rat hypothalamus and pituitary.

Rabbit muscle phosphorylase derivatives with oligosaccharides covalently bound to the glycogen storage site.

Somatic embryogenesis in *Zea mays* L.

Cultivation of *Bacteroides fragilis* in tissue culture.

Multiple forms of phenolsulphotransferase in human tissues: selective inhibition by dichloronitrophenol.

Distribution and metabolism of 2,4-dichlorophenol in rats.

Multisite phosphorylation of glycogen synthase from rabbit skeletal muscle. Organisation of the seven sites in the polypeptide chain.

Foot-and-mouth disease virus: immunogenicity and structure of fragments derived from capsid protein VP and of virus containing cleaved VP.

Antigenic structure of adenylate kinase from porcine skeletal muscle. I. Three immunochemically active peptides obtained by cleavage with cyanogen bromide.

Collagen metabolism in rat incisor pre dentine in vivo: synthesis and maturation of type I, alpha 1 (I) trimer, and type V collagens.

Purification and some properties of carboxylesterase of rat adipose tissue.

Formation of a polymethylene bis(disulfide) intersubunit cross-link between cysteine-281 residues in rabbit muscle glyceraldehyde-3-phosphate dehydrogenase using octamethylene bis(methane[³⁵S]thiosulfonate).

Collagens from the skin and cartilage of the larval salamander *Ambystoma tigrinum*.

Effect of 2,4-dichlorophenoxyacetic Acid on glucosylation of scopoletin to scopolin in tobacco tissue culture.

Proton-magnetic-resonance studies on the interaction of rabbit skeletal-muscle troponin I with troponin C and actin.

Determinants of biliary secretion in isolated perfused skate liver.

Amino-acid sequence of an alpha-parvalbumin, pI = 4.88, from frog skeletal muscle.

Purification of cardiac sarcolemmal vesicles: high sodium pump content and ATP-dependent, calmodulin-activated calcium uptake.

Primary structure of the regulatory subunit of type II cAMP-dependent protein kinase from bovine cardiac muscle.

Isolation and amino acid sequence of a monomeric hemoglobin in heart muscle of the bullfrog, *Rana catesbeiana*.

Estimation of types I and III collagens in whole tissue by quantitation of CNBr peptides on SDS-polyacrylamide gels.

Proximity of sulfhydryl groups to the sites of interaction between components of the troponin complex from rabbit skeletal muscle.

Studies on the Production of Digitalis Cardenolides by Plant Tissue Culture: II. EFFECT OF LIGHT AND PLANT GROWTH SUBSTANCES ON DIGITOXIN FORMATION BY UNDIFFERENTIATED CELLS AND SHOOT-FORMING CULTURES OF DIGITALIS PURPUREA L. GROWN IN LIQUID MEDIA.

Toxicokinetics of chloroethanol in the rat after single oral administration.

Regulation of cardiac glycogen synthase by phosphorylation: catalysis of inactivation by cAMP-dependent and cAMP-independent protein kinases and comparison with the phosphorylation of the skeletal muscle enzyme.

Cytosolic and nuclear binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin to the Ah receptor in extra-hepatic tissues of rats and mice.

Increased specificity in human cardiac-myosin radioimmunoassay utilizing two monoclonal antibodies in a double sandwich assay.

High-affinity binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin in cell nuclei from rat liver.

Genetic activity of diethylstilbestrol in *Saccharomyces cerevisiae*: enhancement of mutagenicity by oxidizing agents.

Activation of misonidazole by rat liver microsomes and purified NADPH-cytochrome c reductase.

Preliminary studies of the metabolic activity of purified suspensions of *Mycobacterium leprae*.

Metabolic energy and cytoskeletal requirements for synthesis and secretion by acini from rat mammary gland-I. Ultrastructural and biochemical aspects of synthesis and release of milk proteins.

Lactate metabolism and cytosolic NADH reducing equivalents in ovine adipocytes.

Metabolic energy and cytoskeletal requirements for synthesis and secretion by acini from rat mammary gland-II. Intracellular transport and secretion of protein and lactose.

Potassium transport by rabbit descending colon.

The toxicokinetics of 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin in mammalian systems.

Transplacental effects of carcinogens and non-carcinogens on activities of pyruvate kinase and lactate dehydrogenase as well as isozymic pattern of LDH in mouse lung.

Image analysis of electron micrographs of ATPase (Coupling Factor TF1) from thermophilic bacteria and luminal epithelium of mouse urinary bladder.

Reactivity of key metabolic sterols in standard colorimetric assays for cholesterol.

[The influence of several membrane stabilizing drugs on the induced hereditary myotonia--a methodic way to test the effectiveness of drugs on myotonia (author's transl)].

Development and viability of offspring of male mice treated with chlorinated phenoxy acids and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Subchronic administration of technical pentachlorophenol to lactating dairy cattle: immunotoxicologic evaluation.

Effect of phenolic compounds on in vivo activity of glucose-6-phosphatase in certain tissues of *Notopterus notopterus*.

Paraquat poisoning: toxicologic and pathologic findings in three fatal cases.

Soft-tissue sarcomas, phenoxy herbicides, and chlorinated phenols.

Brain level and synthesis of acetylcholine during exposure to vibration and organic-phosphorus and phenol-derived pesticides.

Diquat intoxication: report of two cases and review of the literature.

Soft-tissue sarcomas and exposure to chemical substances: a case-referent study.

Kinetics of paraquat elimination in the dog.

2,4,5-T, trichlorophenol, and soft tissue sarcoma.

[Effect of the pesticide fundazol on induced sclerotic processes].

[Assessment of the potential risk for progeny in work with endodan (experimental studies)].

The teratogenic potential of cacodylic acid in the rat and mouse.

The heart and diaphragm: target organs in the neonatal death induced by nitrofen (2,4-dichlorophenyl-p-nitrophenyl ether).

Hemoperfusion in toxicology. Basic considerations of its effectiveness.

Histological considerations of direct pulp capping agents.

Arsenic-induced axial skeletal (dysraphic) disorders.

Ionic conductance and experimentally induced myotonia.

Oxidant injury of lung parenchymal cells.

Macro-analytical methods used to analyze tissues of the Hawaiian monk seal, *Monachus schauinslandi*, for organochlorine pesticides, polychlorobiphenyls, and pentachlorophenol.

Pharmacokinetics of 2,4,5-T PGBE ester applied dermally to rats.

2,4,5-T effects on cardiac and serum lactic dehydrogenase (LDH) and creatine kinase (CK) isozymes. I. Maternal enzyme activities and isozyme profiles.

Determination of norflurazon and desmethylnorflurazon in plant tissue by high-pressure liquid chromatography.

Tissue retention of arsenic in rats fed with founder or cacodylic acid.

Assessment of adult skeletons to detect prenatal exposure to 2,4,5-T or Trifluralin in mice.

Arterial effects of palmitic, linoleic and acetoacetic acid.

[Pentachlorophenol concentrations in tissues and body fluids of normal persons (author's transl)].

Effects of paraquat in vivo on fatty acids of mouse and guinea pig tissues.

2-4-Dichloro-phenoxy-acetic acid interactions with the detoxification hepatic systems.

Growth of *Bacteroides fragilis* in rabbit tracheal organ culture: anaerobiosis and tissue respiration.

The killing of newborn larvae of *Trichinella spiralis* by eosinophil peroxidase in vitro.

Synthesis of pro-collagen type II by a xenotransplanted human chondroblastic osteosarcoma.

Specific hypo-responsive granulomatous tissue reactions in *Brugia pahangi*-infected jirds.

Insulin secretion by a transplantable rat islet cell tumour.

Identification of abnormally [³²P]-phosphorylated cyanogen bromide cleavage product of erythrocyte membrane spectrin in Duchenne muscular dystrophy.

Reduced secretion of structurally abnormal type I procollagen in a form of osteogenesis imperfecta.

Soft tissue sarcomas and chlorinated phenols.

Acute and subchronic toxicity studies of rats exposed to vapors of methyl mercaptan and other reduced-sulfur compounds.

Basal processes on duodenal epithelial cells of man, mouse and rat.

Characterization of the hyperlipidemia in guinea pigs induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Immunoperoxidase staining in the recognition of *Aspergillus* infections.

Relation of soft-tissue sarcoma, malignant lymphoma and colon cancer to phenoxy acids, chlorophenols and other agents.

Acute and short-term toxicity of 2,3,4,6-tetrachlorophenol in rats.

Experimental siderosis of articular chondrocytes cultured in vitro.

Antibody formation to dog pulp tissue altered by camphor paramonochlorophenol via the root canal.

Entactin, a novel basal lamina-associated sulfated glycoprotein.

Effects of hypoxia and metabolic inhibitors on the electrical and mechanical activities of isolated guinea pig papillary muscles.

Investigation of type I and type III collagens of the lung in progressive systemic sclerosis.

Partial amino acid sequence homology between an hereditary amyloid protein and human plasma prealbumin.

Dioxin, chloracne, and soft tissue sarcoma.

Production of Heinz body anaemia in the domestic fowl after ingestion of dimethyl disulphide: a haematological and ultrastructural study.

Hexose transport in normal and SV40-transformed human endothelial cells in culture.

The development and prognosis of chronic intoxication by tetrachlorodibenzo-p-dioxin in men.

delta-Aminolaevulinic acid uptake, toxicity, and effect on [¹⁴C]gamma-aminobutyric acid uptake into neurons and glia in culture.

Serum SH reactivity: a simple assessment of D-penicillamine absorption?

A comparison of the effects of temperature and metabolic inhibition on the contraction of smooth muscle.

[Effect of thyrocalcitonin on the contraction and relaxation of the isolated myocardium in metabolic blockade and acidosis].

Transfer of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) to the mouse embryo and fetus.

The K⁺-sensitive hyperpolarization of rat skeletal muscle and metabolic inhibitors.

[Clinico-pathological studies on the influence of mono-chlorophenol to the exposed human vital pulp tissues, with reference to compare its three isomers (author's transl)].

Octopus skin collagen. Isolation and characterization of collagen comprising two distinct alpha chains.

On the oxygen consumption of intact vessel wall segments and intima-media preparations of the rabbit carotid artery.

Comparative studies on the inhibitory region of selected species of troponin-I. The use of synthetic peptide analogs to probe structure-function relationships.

Isolation and characterization of subcellular membranes from canine stomach smooth muscle.

The aldolase-binding site of the human erythrocyte membrane is at the NH₂ terminus of band 3.

In Vivo Nitrite Reduction in Leaf Tissue of *Phaseolus vulgaris* L.

Basement membrane collagen from bovine lung: its chain associations as observed by two-dimensional electrophoresis.

Amino acid sequence of calmodulin from scallop (*Patinopecten*) adductor muscle.

Residues of the plant growth regulator mefluidide [N-[2,4]dimethyl-5-[[[(trifluoromethyl)sulfonyl]amino]phenyl]acetamide] in the milk and tissues of lactating dairy cows: a 28-day feeding study.

[Effect of protein synthesis inhibitors on D-xylose transport in frog muscle tissue].

Hydrogen peroxide metabolism in human monocytes during differentiation in vitro.

T cell clones reactive with sperm whale myoglobin. Isolation of clones with specificity for individual determinants on myoglobin.

Primary structure of 3-phosphoglycerate kinase from horse muscle. II. Amino acid sequence of cyanogen bromide peptides CB1-CB4 and CB6-CB14, sequence of methionine-containing regions, and complete sequence of the enzyme.

Primary structure of 3-phosphoglycerate kinase from horse muscle. I. Purification of cyanogen bromide peptides and amino acid sequence of peptide CB5 (104 residues).

Transmural electrical stimulation-induced relaxation of the guinea-pig gall bladder.

Influence of human beta-thromboglobulin on prostaglandin production by pig aortic endothelial cells in culture.

Decreased insulin sensitivity due to a postreceptor defect as a consequence of ATP-deficiency in fat cells.

E-C coupling during poisoning with 2,4-dinitrophenol and recovery in papillary muscle of guinea-pig: 2. Effect on the cardiac electrical activity.

E-C coupling during poisoning with 2,4-dinitrophenol and recovery in papillary muscle of guinea-pig: 1. Effect on the cardiac mechanical activity.

Characterization of a rabbit skeletal muscle protein kinase (PC0.7) able to phosphorylate glycogen synthase and phosphovitin.

Oxidation of branched-chain amino acids in skeletal muscle and liver of rat. Effects of octanoate and energy state.

Somatic embryogenesis and plant regeneration from leaf tissues of *Panicum maximum* Jacq.

Somatic embryogenesis and plant regeneration from leaf tissues and anthers of *Pennisetum purpureum* Schum.

Hydrogen peroxide contracts airway smooth muscle: a possible endogenous mechanism.

Inhibition in vivo of the formation of adducts between metabolites of benzo(a)pyrene and DNA by aryl hydrocarbon hydroxylase inducers.

Distribution and different activation of adenylate cyclase by NaF and of guanylate cyclase by NaN₃ in neuronal and glial cells separated from rat cerebral cortex.

Determination of the mothproofing agent Eulan WA (New) in fish tissue using gas - liquid chromatography following extractive methylation.

Sorting out of coaggregated brain cell types mediated by specific cell recognition factors in vitro. II. Kinetic and metabolic parameters.

In vivo phytochrome difference spectrum from dark grown gametophytes of *Anemia phyllitidis* L. Sw. Treated with norflurazon.

Mechanism of retraction of the trailing edge during fibroblast movement.

The cytoskeleton of primary astrocytes in culture contains actin, glial fibrillary acidic protein, and the fibroblast-type filament protein, vimentin.

Intoxication of cultured human lung fibroblasts with *Clostridium difficile* toxin.

Citrus Tissue Culture : AUXINS IN RELATION TO ABSCISSION IN EXCISED PISTILS.

Embryonic proteins in somatic embryos of carrot.

Freeze-fracture analysis of the effects of age and 2,4-dinitrophenol on the morphology of flight muscle mitochondria of *Musca domestica* L.

Enzyme histochemistry and immunohistochemistry on biopsy specimens of pathologic human bone marrow.

A simplified method for quantitation of the relative amounts of type I and type III collagen in small tissue samples.

Characteristics of (+/-)-[14C]-oxprenolol and (+/-)-[14C]-propranolol incorporation by rat lung slices.

Bovine renal cortex type I collagen: high contents of 3- and 4-hydroxyprolines.

The amino-acid sequence of the alpha subunit in bovine brain S-100a protein.

High-affinity uptake of spermine by slices of rat cerebral cortex.

Mobilization of a common source of smooth muscle Ca²⁺ by norepinephrine and methylxanthines.

Determination of 2,3,7,8-tetrachlorodibenzo-p-dioxin in goat milk and tissues by glass capillary gas chromatography and medium resolution mass fragmentography.

Structural relation of two S-100 proteins in bovine brain; subunit composition of S-100a protein.

[Clinico-pathological studies on the influence of camphorated paramonochlorophenol penicillin compounds to the exposed human vital pulp tissues (author's transl)].

The use of 2-dimensional CNBr peptide maps for the analysis of crosslinked peptides in bone collagen.

Effect of diesel particulate exposure on adenylate and guanylate cyclase of rat and guinea pig liver and lung.

Synthetic studies on the inhibitory region of rabbit skeletal troponin I. Relationship of amino acid sequence to biological activity.

Maturation of renal tubular transport of digoxin.

Effect of hypophysectomy and castration on hepatic, pulmonary and intestinal aryl hydrocarbon hydroxylase activities in the rat.

Studies of the effects of agents which alter calcium metabolism on acetylcholine turnover in the rat diaphragm preparation.

[Tissue-specific regulation of rat liver mitochondrial oxidative phosphorylation by a soluble phase of cells from that organ].

Studies on the structure of aldolase A from chicken muscle.

The uptake of carnitine by slices of rat cerebral cortex.

Complete amino acid sequence of the catalytic subunit of bovine cardiac muscle cyclic AMP-dependent protein kinase.

Primary structure of lobster-muscle arginine kinase. Amino and carboxyl-terminal structure of the enzyme and complete alignment of the cyanogen-bromide peptides.

High-affinity [3H]choline accumulation in cultured human skin fibroblasts.

Fragments of rabbit striated muscle alpha-tropomyosin. II. Binding to troponin-T.

Serotonin uptake by isolated adipose capillary endothelium.

Effect of glucose and hyperosmolality on the electrical characteristics of dog colon mucosa in vivo.

Effect of 2,4 dinitrophenol on the rate of hepatic prostaglandin production.

Isolation and identification of the cyanogen bromide peptides of D-glyceraldehyde-3-phosphate dehydrogenase from human muscle.

Induction of mixed-function oxidase by chronic treatment with 2,3,7,8-tetrachloro-dibenzo-p-dioxin in female rats.

Biotransformation and intracellular binding of arsenic in tissues of rabbits after intraperitoneal administration of ⁷⁴As labelled arsenite.

An energy-dependent, sodium-independent component of active p-aminohippurate transport in rabbit renal cortex.

The amino acid sequence of the delta subunit (calmodulin) of rabbit skeletal muscle phosphorylase kinase.

Protease-insensitive sea urchin embryo cell adhesions become protease sensitive in the presence of azide or cytochalasin B.

[The adhesion of blood platelets to collagen: molecular features of collagen (author's transl)].

Reactions of guinea pig subcutaneous connective tissue to direct or long distance exposure to parachlorophenol- or formalin-containing endodontic drugs.

Ultrastructural demonstration of endogenous peroxidatic activity in mammalian arterial wall.

A histopathological study of the liver in paraquat poisoning--an analysis of fourteen autopsy cases with emphasis on bile duct injury.

Tissue and cellular disposition of paraquat in mice.

The chronic toxicity of technical and analytical pentachlorophenol in cattle. II. Chemical analyses of tissues.

[Biochemical and morphological changes in white rat lung and liver tissues in experimental paraquat poisoning].

A study of fetal growth retardation in teratological tests: an examination of the relationship between body weight and ossification of coccygeal vertebrae in mouse and rat fetuses.

Toxicity and bioaccumulation of pentachlorophenol in broiler chickens.

Ultrastructural morphometric investigations on rat liver of young and adult rats after treatment with technical pentachlorophenol (PCP).

Suicidal poisoning by MCPA and parathion.

Accumulation of anionic pesticides by rabbit choroid plexus in vitro.

Clinical findings in workers exposed to pentachlorophenol.

[Effect of the pesticide, fundazol, on the myocardium of rats with experimental atherosclerosis].

[Assessment of the chronic toxic action of the herbicide, balagrin, in continuous and intermittent exposure regimens].

Experimental myotonia.

Neuronal influences on the sensitivity of skeletal muscle to experimental myotonia.

Oxygen effects of metabolism and paraquat uptake in rat lung slices.

Optimal fixation conditions for the immunoperoxidase identification of human J chain from tissue sections.

Studies on the disposition and metabolism of pentachloroanisole in female mice.

Gas chromatographic determination of fluridone aquatic herbicide and its major metabolite in fish.

[The effect of the herbicide Dinoseb-acetate (Aretit) on transaminase (GOT, GPT) activity in the blood serum and muscles of the Japanese quail (*Coturnix coturnix japonica*)].

Ethanol oxidation by rat brain in vivo.

20,25-Diazacholesterol, clofibric acid and 2,4-dichlorophenoxyacetic acid--all inducers of myotonia--perturb the post-lanosterol sector of sterol biosynthesis in cultured chick embryo fibroblasts.

Peanut uptake and metabolism of [¹⁴C]oxadiazon from soil.

Metabolic fate of the herbicide dicamba in a lactating cow.

Effects of atrazine on circadian RNA, DNA and total protein rhythms in the thyroid and adrenal.

Incorporation of foreign compound metabolites into plant and soil constituents.

The influence of paraquat on the in vivo incorporation of lecithin precursors in lung tissue and 'alveolar' lecithin.

Metabolism of ¹⁴C-labeled hexazinone in the rat.

Metabolic fate of the herbicide buthidazole in lactating cows and laying hens.

[Myotonic effects of 2,4-Dichlorophenoxyacetate (2,4-D) on the isolated frog skeletal muscle (author's transl)].

[The influence of 2,4-dichlorophenoxyacetate (2,4-D) on the membrane potential, membrane resistance and electromyogram of the frog skeletal muscle before and after stimulation (author's transl)].

Use of acrolein vapors for the anhydrous preparation of bone tissue for electron microscopy.

Thidiazuron uptake, distribution and metabolism in bluegills and channel catfish.

Hexachlorobenzene (HCB) and some of its sulfur-containing metabolites: tissue retention and excretion routes in mice.

Preliminary results of using camphorated monoparachlorophenol (CMPC) on vital pulp tissue.

Lymphocyte capping induced by polycationized ferritin.

Quantitative evaluation of the promotion by 2,3,7,8-tetrachlorodibenzo-p-dioxin of hepatocarcinogenesis from diethylnitrosamine.

Metabolic dependence of the electromyogram of the cat colon.

Toxicology of selenium: a review.

Processing of prolactin by human breast cancer cells in long term tissue culture.

Postnatal morphology and functional capacity of the kidney following prenatal treatment with dinoseb in rats.

Covalent structure of collagen: amino acid sequence of alpha 1 (III)-CB5 from type III collagen of human liver.

Some factors affecting spontaneous transmitter release in dystrophic mice.

The impact of streptozotocin-induced diabetes mellitus on cyclic nucleotide regulation of skeletal muscle amino acid metabolism in the rat.

Myotonia as a side effect of diuretic action.

Actual new cancer-causing hydrazines, hydrazides, and hydrazones.

Synovial origins of Rice bodies in joint fluid.

Gingival matrix collagen in chronic periodontitis.

Effect of polychlorinated biphenyl, dibenzofuran and dibenzo-p-dioxin on the susceptibility of male mice to endotoxin.

The histochemical characterization of the coupling state of skeletal muscle mitochondria.

Relationship between ATP Level and Activity of Fusicoccin-stimulated H/K-Exchange System in Plant Tissues.

Combined capillary gas chromatography/atmospheric pressure negative chemical ionization/mass spectrometry for the determination of 2,3,7,8-tetrachlorodibenzo-p-dioxin in tissue.

In vitro binding of ¹⁴C-labeled acidic compounds to serum albumin and their tissue distribution in the rat.

Properties of carnitine transport in rat kidney cortex slices.

The relationship between the transport of glucose and cations across cell membranes in isolated tissues. X. Effect of glucose transport stimuli on the efflux of isotopically labelled calcium and 3-O-methylglucose from soleus muscles and epididymal fat pads of the rat.

Differential induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin of multiple forms of rabbit microsomal cytochrome P-450: evidence for tissue specificity.

The renal cortical lymphatic system in dogs with unimpeded lymph and urine flow.

Cytotoxicity of methyl bromide: effect of methyl bromide on cultured mammalian cells.

Metabolic and cytoskeletal modulation of transferrin receptor mobility in mitogen-activated human lymphocytes.

Structural basis for the difference of the regulatory properties between potato and rabbit muscle phosphorylases. The NH₂-terminal sequence of the potato enzyme.

Metabolism of 2,4-Dichlorophenoxyacetic Acid (2,4-D) in Soybean Root Callus : EVIDENCE FOR THE CONVERSION OF 2,4-D AMINO ACID CONJUGATES TO FREE 2,4-D.

Tissue distribution, excretion, and metabolism of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the Golden Syrian hamster.

Digoxin-quinidine interaction: in vitro studies in rat tissue.

Organ culture of adult rat colonic mucosa on fibrin foam.

The effects of calcium ions, ionophore A23187 and inhibition of energy metabolism on protein degradation in the rat diaphragm and epitrochlearis muscles in vitro.

Soluble Sugars, Respiration, and Energy Charge during Aging of Excised Maize Root Tips.

Collagen biosynthesis by human skin fibroblasts. II. Isolation and further characterization of type I and type III procollagens synthesized in culture.

Purification and structural comparison of pulmonary and hepatic cytochrome P-450 from rabbits.

Active renal hexose transport. Structural requirements.

Adriamycin-induced alterations of the action potential in rat papillary muscle.

Selective depression of 2,4-dinitrophenol depolarized canine Purkinje fibers by lidocaine.

Effects of nonspecific smooth muscle relaxants on tissue concentrations of high energy phosphates and mechanical activity of normal polarized and depolarized intestinal smooth muscles from guinea pig.

The amino acid sequence of rabbit cardiac tropomyosin.

The complete amino acid sequence of horse muscle acylphosphatase.

Complete amino acid sequence of mitochondrial aspartate aminotransferase from pig heart muscle. Peptide ordering procedures and the complete sequence.

Complete amino acid sequence of mitochondrial aspartate aminotransferase from pig heart muscle. Cyanogen bromide peptides.

Maturation of collagenous tissue. Temporal sequence of formation of peptidyl lysine-derived cross-linking aldehydes and cross-links in collagen.

Metabolism of o-[methyl-¹⁴C]toluidine in the F344 rat.

Comparison of aryl hydrocarbon hydroxylase and epoxide hydratase. Induction in primary fetal rat liver cell culture.

Calcium accumulation by chick intestinal mitochondria. Regulation by vitamin D-3 and 1,25-dihydroxyvitamin D-3.

Substrate supply and function of isolated venous smooth muscle under anoxia and metabolic inhibition.

Characterization of Na-K-ATPase in dog tracheal epithelium: enzymatic and ion transport measurements.

The primary structure of the calcium ion-transporting adenosine triphosphatase protein of rabbit skeletal sarcoplasmic reticulum. Peptides derived from digestion with cyanogen bromide, and the sequences of three long extramembranous segments.

Praziquantel, potassium and 2,4-dinitrophenol: analysis of their action on the musculature of *Schistosoma mansoni*.

Desensitization of the acetylcholine receptor of denervated rat soleus muscle and the effect of calcium.

Stimulus-secretion coupling in rat pancreas: role of sodium, calcium and cyclic nucleotides studied by X-537A and BrX-537A.

An established routine method for differential staining of epoxy-embedded tissue sections.

Solubilization and partial purification of the Ca²⁺/Na⁺ antiporter from the plasma membrane of bovine heart.

Polyamines and nucleic acids during the first cell cycle of *Helianthus tuberosus* tissue after the dormancy break.

Vein Loading in Seedlings of *Phaseolus vulgaris* Exposed to Excess Cobalt, Nickel, and Zinc.

Mechanisms of action potential propagation failure at sites of axon branching in the crayfish.

Concentration of myo-inositol in skeletal muscle of the rat occurs without active transport.

Analysis of the lytic step in the herpes simplex virus antibody-dependent cellular cytotoxicity system.

Whole-body retention, excretion and metabolism of [⁷⁴As]arsenic acid in the hamster.

Synthesis of types I, III and AB2 collagen by chick tendon fibroblasts in vitro.

The complete amino acid sequence of the Ca²⁺-dependent modulator protein (calmodulin) of bovine brain.

Determination of polyhalogenated phenotic compounds in drinking water, human blood serum and adipose tissue.

In vitro synthesis of tissue-specific type II collagen by healing cartilage. I. Short-term repair of cartilage by mature rabbits.

[Peripheral regulation of the adrenergic mediator process in the smooth muscles of the rat small intestine].

Isolation of a unique collagenous fraction from limited pepsin digests of human placental tissue. Characterization of one of the constituent polypeptide chains.

Biosynthesis of interstitial types of collagen by albumin-producing rat liver parenchymal cell (hepatocyte) clones in culture.

Comparative metabolism of 2,4-dichlorophenoxyacetic Acid in cotyledon and leaf callus from two varieties of soybean.

Uptake, elimination, and metabolism of three phenols by fathead minnows.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxic effects and tissue levels in animals from the contaminated area of Seveso, Italy.

Chemical studies of tissue polypeptide antigen (TPA). II. Partial amino acid sequences of cyanogen bromide fragments of TPA subunit B1.

Fingerprint analyses of plant and animal tissues with respect to the occurrence of foreign compounds.

Effects of phenol and dinitrophenol on acid and alkaline phosphatases in tissues of a fish (*Notopterus notopterus*).

An improved method for isolation of Ca²⁺ binding cyanogen bromide peptides from rabbit skeletal muscle troponin C.

Ultrastructure of hepatic and heart muscle mitochondria after 2,4-dinitrophenol treatment in vivo.

Effects of nonspecific smooth muscle relaxants on glycogen phosphorylase activity in depolarized taenia caecum of guinea pig.

Interaction of cytopathogenic toxin from *Clostridium difficile* with cells in tissue culture.

2,4-dinitrophenol, lysosomal breakdown and rapid myofilament degradation in vertebrate skeletal muscle.

The effect of immobilization on the types of collagen synthesized in periarticular connective tissue.

Histochemical technique for the demonstration of phosphofructokinase activity in heart and skeletal muscles.

Studies on cartilage formation. XXII. Investigations of certain oxidative metabolic processes in regenerating articular cartilage.

Distribution of 2-methyl-4-chlorophenoxyacetic acid and 2,4-dichlorophenoxyacetic acid in male rats: evidence for the involvement of the central nervous system in their toxicity.

Delayed neurotoxic, late acute and cholinergic effects of S,S,S-tributyl phosphorotrithioate (DEF): subchronic (90 days) administration in hens.

The effect of chlorpromazine on the uptake and efflux of paraquat in rat lung slices.

Two survivors of severe paraquat intoxication by "continuous hemoperfusion".

Case-control study: soft-tissue sarcomas and exposure to phenoxyacetic acids or chlorophenols.

Vehicle alteration of paraquat lethality in mice.

The rapid screening of body tissues for pentachlorophenol (PCP) with special reference to a poisoning fatality.

Paraquat poisoning: an analytical toxicologic study of three cases.

Prenatal effects of 2,4,5-T, 2,4,5-trichlorophenol, and phenoxyacetic acid in mice.

[Histoenzymatic reactions in the cells of the reticuloendothelial system of the liver and spleen and hepatocytes in acute Morfamquat dichloride poisoning].

The influence of hyperoxia on the acute toxicity of paraquat and diquat.

[Disturbances in the processes of division and differentiation of the spermatopietic epithelium in chronic Ramrod poisoning].

Review of the toxicology of paraquat (1,1'-dimethyl-4,4'-bipyridinium chloride).

Treatment of severe 2,4-D and mecoprop intoxication with alkaline diuresis.

Changes of metabolism during experimentally induced myotonia of rats. II. Alterations in creatine kinase and acid phosphatase activities: a possible mechanism in the development of muscle damage.

Changes of metabolism during experimentally induced myotonia of rats. I. Alterations in lactate and malate dehydrogenase isoenzyme activities.

[Hereditary and experimental myotonia: a comparative study (author's transl)].

Experimental myotonia induced in denervated muscles by 2,4-D.

Tissue distribution of paraquat and diquat after oral administration in rats.

Induction by manganese, ethanol, phenobarbital, and herbicides of microsomal cytochrome P-450 in higher plant tissues.

Specific granules of the rat atrial muscle cell.

S-Chloroallyl thiocarbamate herbicides: mouse hepatic microsomal oxygenase and rat metabolism of cis- and trans-[¹⁴C = O]diallate.

Serum protein and renal tissue binding of 2,4,5-trichlorophenoxyacetic acid.

Pentachlorophenol residues in human adipose tissue.

The metabolism and disposition of halogenated aromatics.

Evidence for serum binding of oxidized spermine and its potent G1-phase inhibition of cell proliferation.

Metabolism of [¹⁴C]fosamine ammonium in the rat.

Influence of 2,4 dichlorophenoxyacetate and of dantrolene sodium on the target phenomenon in tenotomized rat gastrocnemius muscle.

Determinants of the renal handling of 2, 4-dichlorophenoxyacetic acid by winter flounder.

[Mesoranil metabolism in the body of warm-blooded animals].

Metabolism and distribution of 2,4,5-trichlorophenoxyacetic acid (2,4,5-T) in pregnant mice.

Excretion balance, metabolic fate, and tissue residues of N-phenyl-N'-1,2,5,-thiadiazol-3-ylurea (photothiadiazuron) in rats.

EC-GLC determination of the herbicidal monohalogenated phenoxyalkyl acid mecoprop in tissues, urine and plasma after derivatization with pentafluorobenzylbromide.

Neurochemical effects of peroral administration of technical pentachlorophenol.

Metabolism of 2-chloro-N-isopropylacetanilide (propachlor) in the sheep and milk goat.

[Microsurgical plastic reconstruction of the explosion-damaged hand].

Immunochemical characterization of the basement membrane glycoprotein laminin.

Role of peripheral tissue receptors in stimulation of ventilation by 2,4-dinitrophenol.

[Case- control study of malignant mesenchymal soft tissue tumors and exposure to chemical substances].

Defect in regulation of membrane transport of monosaccharides in dystrophic muscle.

Unique characteristics of superoxide production by human eosinophils in eosinophilic states.

Immunoperoxidase staining for detection of Colorado tick fever virus, and a study of congenital infection in the mouse.

Mode of uptake and degradation of 125I-labelled insulin by isolated hepatocytes and H4 hepatoma cells.

The solvent action of sodium hypochlorite on fixed and unfixed necrotic tissue.

Nature of collagen in dermatofibrosarcoma protuberans.

Isolation and immunochemical characterization of antibodies from the sera of cancer patients which are reactive against human melanoma cell membranes by affinity chromatography.

The protective action of inosine on isolated arteries in hypoxia.

Functional studies of hairy cell leukemia (leukemic reticuloendotheliosis).

Comparison of rat liver and Walker 256 carcinosarcoma tRNAs.

Malignant lymphoma of histiocytic type and exposure to phenoxyacetic acids or chlorophenols.

Abnormal protein synthesis in malignant melanoma cells.

The biostructural theory and the criticism of contemporary molecularism.

Estimation of the TCDD toxic potential in the light of the Seveso accident.

Bovine type I collagen: A study of cross-linking in various mature tissues.

Biochemical selection of immature, haploid embryos of *Zea mays* L.

Gibberellic Acid Activates Chromatin-bound DNA-dependent RNA Polymerase in Wounded Potato Tuber Tissue.

Sucrose uptake by sugar beet tap root tissue.

2,3,7,8-Tetrachlorodibenzo-p-dioxin tissue distribution, excretion, and effects on clinical chemical parameters in guinea pigs.

Effect of sodium azide on the ultrastructural preservation of tissues.

Possible role of cyclic GMP in stimulus-secretion coupling by salt gland of the duck.

Analysis of the adhesion step in the herpes simplex virus antibody-dependent cellular cytotoxicity system.

Effects of pretreatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin on the capacity of hepatic and extrahepatic mouse tissues to convert procarcinogens to mutagens for *Salmonella typhimurium* auxotrophs.

Dispersal and reformation of acetylcholine receptor clusters of cultured rat myotubes treated with inhibitors of energy metabolism.

Cross-linking of fibronectin to collagen by blood coagulation Factor XIIIa.

Studies on peptides. LXXXI. Application of a new arginine derivative, NG-mesitylene-2-sulfonylarginine, to the synthesis of substance P and neurotensin.

Tissue distribution of the receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat.

The transport of para-aminohippuric acid by the ciliary body and by the iris of the primate eye.

Sequence of two phosphorylated sites in the catalytic subunit of bovine cardiac muscle adenosine 3':5'-monophosphate-dependent protein kinase.

Isolation and separation of toad bladder epithelial cells.

Isolation and characterization of basement membrane collagen from human placental tissue. Evidence for the presence of two genetically distinct collagen chains.

Toxicity of 4-chloro-o-cresol to fish. Light microscopy and chemical analysis of the tissue.

Cell-mediated immune response to dog pulpal tissue altered by camphor paramonochlorophenol.

An improved silver stain for developing nervous tissue.

In vitro metabolism of 1,2-dihaloethanes to ethylene.

Astroglial and axonal proteins in isolated brain filaments. I. Isolation of the glial fibrillary acidic protein and of an immunologically active cyanogen bromide peptide from brain filament preparations of bovine white matter.

Effects of temperature, metabolic inhibitors and some other factors on fluid-phase and adsorptive pinocytosis by rat peritoneal macrophages.

On the distribution of [met⁵]- and [leu⁵]-enkephalins in the brain of the rat, guinea-pig and calf.

Actin from embryonic chick brain. Isolation in high yield and comparison of biochemical properties with chicken muscle actin.

Synthesis and biological activity of an icosapeptide analog of the actomyosin ATPase inhibitory region of troponin I.

On the pathogenesis of mitochondrial myopathies. An experimental study.

Effect of glyphosate on auxin transport in corn and cotton tissues.

Thyroid hormone stimulates synthesis of a cardiac myosin isozyme. Comparison of the two-dimensional electrophoretic patterns of the cyanogen bromide peptides of cardiac myosin heavy chains from euthyroid and thyrotoxic rabbits.

Isolation of kidney brush border gamma-glutamyl transpeptidase from urine by specific antibody gel chromatography.

Postnatal amino acid uptake by the rat small intestine. Energetics of membrane transport systems for amino acids in the developing jejunum.

Toxicity of 4-chloro-O-cresol to rat: I. Light microscopy and chemical observations.

Metabolic activation and deactivation of mutagens and carcinogens.

[Tissue reaction to chlorphenol camphor with and without prednisolone, lidocid and melted thymol].

Ultrastructural localization of D-amino acid oxidase in microperoxisomes of the rat nervous system.

Isolation and tissue localization of type AB2 collagen from normal lung parenchyma.

Uptake of potassium ions by normal and crown-gall-tumor cells of *Vinca rosea* grown in tissue culture.

Changes in crosslinking during aging in bovine tendon collagen.

Effects of 2,4-dinitrophenol, amylbarbitone and certain other drugs on the rate of oxygen consumption and force of contraction of isolated curarized diaphragm muscle of the rat.

Inhibition of blood coagulation factor XIIIa-mediated cross-linking between fibronectin and collagen by polyamines.

The metabolic fate of N-isopropyl-N-phenylloxamic acid in the rat and the milk goat.

An ouabain-insensitive Na-ATPase of the arterial vascular muscle cell and its relation to ouabain-sensitive Na,K-ATPase.

Mammalian endogenous peroxidases as cellular markers and as biosynthetic endpoints of hormone-mediated activity: viewpoint from cytochemistry.

Effect of metabolic inhibitors on vasopressin-stimulated transport systems in the toad bladder.

Hormonally induced cell shape changes in cultured rat ovarian granulosa cells.

Correlation of biochemical and morphologic manifestations of acute pulmonary fibrosis in rats administered paraquat.

Superoxide dismutase of the eye: relative functions of superoxide dismutase and catalase in protecting the ocular lens from oxidative damage.

Paraquat lung injury in rabbits.

The influence of paraquat on the in vitro oxygen consumption of rabbit lung.

The localization of calcium by X-ray microanalysis in myopathic muscle fibers.

The pathology and biochemistry of paraquat.

[Relationship of the pesticide content to the biochemical changes in the tissues and blood in Ro-Neet poisoning].

The toxicity of MCPA to fish. Light and electron microscopy and the chemical analysis of the tissue.

Fatal paraquat poisoning: tissue concentrations and implications for treatment.

Pulmonary histological appearances in fatal paraquat poisoning.

[2,4-D poisoning].

[Muscle flaccidity as a leading and warning symptom in drug therapy and poisonings].

Reduced body clearance as the major mechanism of the potentiation by beta2-adrenergic agonists of paraquat lethality in rats.

Enzymic digestion of liver tissue to release barbiturates, salicylic acid and other acidic compounds in cases of human poisoning.

Myosin changes in experimental 2,4-dichlorophenoxyacetate myopathy.

Subacute skeletal myopathy induced by 2,4-dichlorophenoxyacetate in rats and guinea pigs.

A carbamate herbicide causes microtubule and microfilament disruption and nuclear fragmentation in fibroblasts.

Metabolism of [ring-¹⁴C]ordram (molinate) in the rat. I. Balance and tissue residue study.

Excretion and metabolism of 3,4,5-tribromo-N,N,alpha-trimethyl-1H-pyrazole-1-acetamide in the rat.

Developmental restrictions on hormone modulated gene transcription. II. Hormone induced interactions of RNA polymerase with chromatin.

Metabolism of [¹⁴C] terbutryn (2-(t-butylamino)-4-(ethylamino)-6-(methylthio-s-triazine) by rats and goat.

Excretion balance, metabolic fate, and tissue residues following treatment of lactating goats and laying hens with thidiazuron cotton defoliant.

Effect of SITS on organic anion transport in the rabbit kidney cortical slice.

Excretion balance, metabolic fate, and tissue residues following treatment of rats with thidiazuron cotton defoliant.

Electron-capture gas chromatographic determination of 2-sec-butyl-4,6-dinitrophenol (DNBP) residues in feed, tissue, and excreta.

Identification of oleoresin in epoxy-embedded slash pine tissue.

DNA, RNA and protein content of tissue during growth and embryogenesis in wild-carrot suspension cultures.

Effect of some pesticides on the rhythmic adductor muscle activity of fresh-water mussel larvae.

On the relative rates of synthesis and degradation of catalase in vertebrate tissues.

The effects of pentachlorophenol (PCP) and 2,4-dinitrophenol (DNP) on the oxygen consumption of tissues from the blue crab, *Callinectes sapidus*, under different osmotic conditions.

Type-I trimer and type-I collagen in neutral-salt-soluble lathyrin-rat dentine.

Reincarnation in cultured muscle of mitochondrial abnormalities. Two patients with epilepsy and lactic acidosis.

Biochemical changes in the rat brain associated with dinitrophenol-induced brain edema.

[Some peculiarities of ATPase in tumor mitochondria].

[Pathological and embryological studies on abortion cases related to the Seveso accident].

Reversion of transformed glycolysis to normal by inhibition of protein synthesis in rat kidney cells infected with temperature-sensitive mutant of Rous sarcoma virus.

2,3,7,8-tetrachlorodibenzo-p-dioxin as cocarcinogen causing 3-methylcholanthrene-initiated subcutaneous tumors in mice genetically "nonresponsive" at Ah locus.

Isolation and characterization of glial filaments from human brain.

Collagens synthesized in vitro by diploid fibroblasts obtained from chronically inflamed human connective tissue.

Relation of cell type and cell density in tissue culture to the isoaccepting spectra of the nucleoside Q containing tRNAs: tRNATyr, tRNAHis, tRNAAsn and tRNAAsp.

Subcellular metabolite concentrations. Dependence of mitochondrial and cytosolic ATP systems on the metabolic state of perfused rat liver.

The distribution of antigen in flare up reaction in contact sensitivity to DNCB.

Collagen polymorphism in pathologic human scars.

Sequence of the carboxyl-terminal 492 residues of rabbit muscle glycogen phosphorylase including the pyridoxal 5'-phosphate binding site.

Sequence of the amino-terminal 349 residues of rabbit muscle glycogen phosphorylase including the sites of covalent and allosteric control.

Citrus tissue culture: stimulation of fruit explant cultures with orange juice.

Quantitative and qualitative changes in the metabolism of benzo(a)pyrene in rat tissues after intragastric administration of TCDD.

Cyanogen-bromide fragments of rabbit skeletal muscle alpha-tropomyosin.

Effect of prolonged anaerobiosis on 125I-insulin binding to rat soleus muscle: permissive effect of ATP.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the renal tubular secretion of phenolsulfonphthalein.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on lipid profiles in tissue of the Fischer rat.

Immobilized flounder muscle glyceraldehyde 3-phosphate dehydrogenase.

Purification, characterization, and amino acid sequence of rat anaphylatoxin (C3a).

The amino-acid sequence of troponin C from frog skeletal muscle.

Regulation of ribosomal RNA accumulation by auxin in artichoke tissue.

A study of the mechanism of transport of delta9-tetrahydrocannabinol in the rat submaxillary gland in vitro.

Calcium-induced conformational changes in a cyanogen bromide fragment of troponin C that contains one of the binding sites.

Characterization of pepsin-solubilized bovine heart-valve collagen.

Bovine tendons. Aging and collagen cross-linking.

The organization of tissues of the eye by different collagen types.

The sarcoplasmic reticulum and T-system of rat extensor digitorum longus muscles exposed to hypertonic solutions.

[Increase in heat production by muscle contraction caused by 2,4-dinitrophenol].

Properties of the calcium-extruding mechanism of liver cells.

Studies of the chemo-mechanical conversion in artificially produced streamings. I. Reconstruction of a chemo-mechanical system from acto-HMM of rabbit skeletal muscle.

Characterization of a region of the primary sequence of troponin C involved in calcium ion-dependent interaction with troponin I.

Ca²⁺-stimulated phosphorylation of muscle glycogen synthase by phosphorylase b kinase.

Oxidative metabolism of isolated foetal and neonatal rabbit brown adipose tissue. II. Effect of 2,4-dinitrophenol [proceedings].

Metabolism of 2,4-dichlorophenoxyacetic Acid in soybean root callus and differentiated soybean root cultures as a function of concentration and tissue age.

Responses of the D-glucuronic acid pathway in rat tissues to treatment with tetrachlorodibenzodioxin.

Distribution of clozapine in the rat: localization in lung.

Calcium buffering in presynaptic nerve terminals. I. Evidence for involvement of a nonmitochondrial ATP-dependent sequestration mechanism.

Effects of phospholipase A and triton x-100 on guanylate cyclase activity in mammary gland homogenates from mice.

Respiration of mammalian cells at low concentrations of oxygen: I. Effect of hypoxic-cell radiosensitizing drugs.

Bone accumulation of the Tc-99m complex of carbamyl phosphate and its analogs.

Calcium-dependent inhibition by prostaglandin E1 of spontaneous acetylcholine release from frog motor nerve.

Preservation of rat liver tissue by endodontic therapeutic agents.

[Inhibition of the process of sugar transport stimulation in the frog sartorius muscles by amines and amides].

Some properties of Ca-binding microsomal subfractions isolated from rabbit colon muscle.

The amino acid sequence of rabbit skeletal alpha-tropomyosin. The NH₂-terminal half and complete sequence.

Amino acid sequence of rabbit skeletal muscle alpha-tropomyosin. The COOH-terminal half (residues 142 to 284).

Iodothyronine metabolism in rat liver homogenates.

[Effect of 2,4-dinitrophenol on transmembrane potential difference in frog tissues].

Inhibition of rabbit muscle creatine kinase by iodomethane [proceedings].

Tests for cataglykin activity on a cyanogen bromide fragment of human growth hormone.

Induction of drug metabolizing enzymes in different rat tissues by TCDD.

[Rapid method of combined staining of myelinated fibers and brain cells].

Human poisoning with pentachlorophenol and its treatment.

Acute and subchronic toxicity of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in male rat. I. Light microscopy and tissue concentrations of MCPA.

Human urinary excretion of the herbicide 2-methyl-4-chlorophenoxyacetic acid.

[Hemoperfusion with coated activated charcoal for treating acute poisoning by remedies, plant protectants, and fungi (author's transl)].

[Pulmonary injury of mice produced by chronically peroral treatment with different substances (author's transl)].

Environmental agents altering lung biochemistry.

The effect of two pesticides, Miedzian 50 and Gesagard 50, on the development of tadpoles of *Rana temporaria*.

Toxicological studies on hydrocarbons--lomex.

The possible cellular mechanism of 2,4-dichlorophenoxyacetate-induced myopathy.

The radioimmunological measurement of thyroglobulin secretion in vitro under the influence of some herbicides.

The effect of denervation on subsequent in vitro induction of myotonia.

Cyclic AMP-dependent control of the rat hepatic glutathione disulfide-sulfhydryl ratio.

The influence of nerve stump length on (2,4-dichlorophenoxy)acetic acid-induced myotonia.

Neural influence on experimental myotonia.

The pharmacology of experimental myopathies.

Repression of asexual embryogenesis in vitro by some plant growth regulators.

Studies on the uptake, metabolism, and disposition of pentachlorophenol and pentachloroanisole in rainbow trout.

Interaction of azidonitrophenylaminobutyryl--ADP, a photoaffinity ADP analog, with mitochondrial adenosine triphosphatase. Identification of the labeled subunits.

Catharanthus roseus tissue culture: the effects of medium modifications on growth and alkaloid production.

Regulation of hydrogen peroxide in eye humors. Effect of 3-amino-1H-1,2,4-triazole on catalase and glutathione peroxidase of rabbit eye.

Determination of terbacil and metabolite residues using microcoulometric gas chromatography.

Association between renal function tests and pentachlorophenol exposure.

The effect of some pesticides on the rhythmic activity of adductor muscle of fresh-water mussel larvae.

Effects of pretreatment with sucrose-containing cacodylate buffer on alkaline phosphatase activity in rat tissue sections.

Tissue uptake of paraquat and diquat.

1,1-Dichloroethylene hepatotoxicity: proposed mechanism of action and distribution and binding of ¹⁴C radioactivity following inhalation exposure in rats.

Neurochemical effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in Wistar and Gunn rats.

Release of platelet constituents by monosodium urate crystals.

Human dander in house dust allergy.

Therapeutic trials in muscular dystrophy: II. Ethylene and its derivatives.

Prostaglandin E₂ production by renal inner medullary tissue slices: effect of metabolic inhibitors.

Induction of tumors in mice with the herbicide succinic acid 2,2-dimethylhydrazide.

[Suppression of the anaphylactic response of isolated smooth muscle organs by potassium arsenite].

Bromide intoxication of horses, goats, and cattle.

Effects in the mouse and rat of prenatal exposure to arsenic.

Studies on the nature of EA binding by lymphocytes from rheumatoid arthritis patients.

[Preliminary data on the action of sulfonamido-phenoxyacetic acid on the synthesis of nucleic acids and proteins in the brain and liver of normal and cancerous rats].

Chromatographic behavior of several mammalian tRNAs on acylated dihydroxyl-borate cellulose and Aminex A-28.

Effects on interferon of heavy metal excess and zinc deficiency.

Accelerated degradation of acetylcholine receptor from cultured rat myotubes with myasthenia gravis sera and globulins.

[Copper and nervous system. An experimental study (author's transl)].

The value of enzyme histochemical techniques in the classification of fibre types of human skeletal muscle. 2. The histochemical demonstration of myosin adenosine triphosphatase in skeletal muscles from adult patients with or with no diseases of the neuromuscular system. A comparison between results obtained by calcium salt and lead salt techniques.

Factors involved in heavy metal poisoning.

Purification of human ovarian tumor-associated antigen and demonstration of circulating tumor antigen in patients with advanced ovarian malignancy.

Gap junctions. Structural changes after uncoupling procedures.

Epidemiology and pathology of a tetrachlorodibenzodioxin poisoning episode.

Effect of anoxia, 2,4-dinitrophenol and salicylate on xylose transport by isolated rat soleus muscle.

Collagenase and collagenase inhibitors in osteoarthritic and normal cartilage.

The occurrence of collagen type II in bronchogenic carcinoma.

Preventive effect of selenium, methionine and antioxidants against encephalomalacia of chicks induced by dilauryl succinate.

Changes in integrated vagal afferent activity induced by model lung diseases in rats.

Partial amino acid sequence of brain actin and its homology with muscle actin.

Cyanogen bromide peptide from bovine cardiac myosin containing two essential thiols. Evidence for sequence homology with skeletal myosin in the region of the active site.

The distribution of methionine-enkephalin and leucine-enkephalin in the brain and peripheral tissues.

Bioproduction of rubratoxin in a glucose-mineral salts broth with nutritional supplements and metabolic inhibitors.

The inhibitory effect of papaverine on respiration-dependent contracture of guinea pig taenia coli in high-K medium. I. The relationship between contracture and respiration.

The collagen of heart valve.

Carnitine movement across muscle cell membranes. Studies in isolated rat muscle.

[Hormonal regulation of the electrical properties of the cell membrane].

[Effect of maintaining the grassfrog sartorius muscle in a 0.002 M solution of alpha-dinitrophenol on its sensitivity to a 0.004 M solution of that substance].

Complete amino acid sequence of rabbit muscle glycogen phosphorylase.

Localization of creatine kinase isoenzymes in myofibrils. I. Chicken skeletal muscle.

Polarity of Production of Polyphenols and Development of Various Enzyme Activities in Cut-injured Sweet Potato Root Tissue.

Metabolic changes associated with gastric stimulation.

The capillary and sarcolemmal barriers in the heart. An exploration of labeled water permeability.

The amino acid sequence of rabbit slow-muscle troponin I.

The binding site of skeletal alpha-tropomyosin on troponin-T.

Determination of the amino acid sequence of troponin C from rabbit skeletal muscle.

Does diaminobenzidine demonstrate prostaglandin synthetase? A study on polyunsaturated fatty acid-induced DAB oxidation in sheep vesicular glands and rabbit kidney medulla.

Intestinal absorption of sugars and amino acids in the earthworm.

Competitive and uncompetitive effects of 2,4-dinitrophenol on ATPase activities of rabbit skeletal actomyosin and myosin.

Transplacental induction of mixed-function oxygenases in extra-hepatic tissues by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

In vitro uptake of gentamicin by rat renal cortical tissue.

Effects of sodium nitroprusside, nitroglycerin, and sodium azide on levels of cyclic nucleotides and mechanical activity of various tissues.

Nitric oxide activates guanylate cyclase and increases guanosine 3':5'-cyclic monophosphate levels in various tissue preparations.

Synthesis of types I and III procollagen and collagen by monkey aortic smooth muscle cells in vitro.

Effect of anoxia and ATP depletion on the membrane potential and permeability of dog liver.

Regulation of cardiac output during 2,4-dinitrophenol-induced tissue hypermetabolism in the dog.

Effects of temperature, metabolic and cytoskeletal inhibitors on the rate of BHK cell adhesion to polystyrene.

The complete amino acid sequence of mitochondrial aspartate aminotransferase from pig heart.

Role of tissue hypermetabolism in stimulation of ventilation by dinitrophenol.

Appearance of new acetylcholine receptors on the baby chick biventer cervicis and denervated rat diaphragm muscles after blockade with alpha-bungarotoxin.

Relation of membrane vesicles to volume and Na⁺ transport in smooth muscle: effect of metabolic and transport inhibition on fresh tissues.

SDS-polyacrylamide gel electrophoretic determination of type I and type III collagen in small skin samples.

Actions of insulin in fat cells. Effects of low temperature, uncouplers of oxidative phosphorylation, and respiratory inhibitors.

Correlation between Phenylalanine Ammonia Lyase Activity and Phenolic Biosynthesis in p-Fluorophenylalanine-sensitive and -resistant Tobacco and Carrot Tissue Cultures.

The subunit structure of bovine brain 14-3-2.

Amino acid sequence of dogfish muscle lactate dehydrogenase.

Accumulation of taurine by cultured retinal pigment epithelium of the rat.

Bicarbonate stimulation of mitochondrial ATPase. Effect of physical training.

Primary structure of rabbit skeletal muscle troponin-T. Sequence determination of four cyanogen bromide fragments, CB4, CB6, and CB7.

Primary structure of rabbit skeletal muscle troponin-T. Purification of cyanogen bromide fragments and the amino acid sequence of fragment CB2.

Primary structure of rabbit skeletal muscle troponin-T. Sequence determination of the NH₂-terminal fragment CB3 and the complete sequence of troponin-T.

The effect of insulin on the transport of sodium and potassium in rat soleus muscle.

Biosynthesis of type I and III collagens by cultured smooth muscle cells from human aorta.

Stimulation of guanylate cyclase by sodium nitroprusside, nitroglycerin and nitric oxide in various tissue preparations and comparison to the effects of sodium azide and hydroxylamine.

Isolation of type III collagen from human adult parenchymal lung tissue.

Influence of carbohydrates on quantitative aspects of growth and embryo formation in wild carrot suspension cultures.

Synthesis of two collagen types by embryonic chick corneal epithelium in vitro.

A region of the troponin C molecule involved in interaction with troponin I [proceedings].

Normal newborn and adult human lung collagen--analysis of types.

Extramitochondrial protein synthesis in calf brain synaptosomes.

Studies on the mechanism of renal transport depression caused by pretreatment with 2,4,5-trichlorophenoxyacetate.

Hypoxic protection in paraquat poisoning.

Paraquat poisoning: new aspects of therapy.

Tumorigenic effect of 3-amino-1H-1,2,4-triazole on rat thyroid.

[Chloracne, porphyria cutanea tarda, and other poisonings due to the herbicides].

The increasing use of paraquat as a suicidal agent.

Paraquat accumulation: tissue and species specificity.

[Myotonia].

On the turnover and proteolysis of catalase in tissues of the guinea pig and acatalasemic mice.

Biologic activity of two derivatives and six possible metabolites of cyclophosphamide (NSC-26271).

Sequential histopathologic, hematologic, and blood chemistry changes induced in mice by a technical and a purified preparation of 2,4,5-trichlorophenoxyacetic acid.

Biochemical pathology of lung damage produced by chemicals.

Oxygen delivery in perfused rat kidney: NADH fluorescence and renal functional state.

Metabolism of 2,4-dichlorophenoxyacetic acid. 10. Identification of metabolites in rice root callus tissue cultures.

Distribution and cytogenetic test of 2,4-D and 2,4,5-T phenoxyacetic acids in mouse blood tissues.

Residues of atrazine (2-chloro-4-ethylamino-6-isopropylamino-s-triazine) and its metabolites in chicken tissues.

[Model experiments in pheasants with 1 insecticide (Lindane), 1 herbicide (Terbutryn), 1 mineral fertilizer (calcium ammonium salpeter) and 1 fungicide (HEC). V. Sensitivity of various serum enzymes for detection of organ damage following pesticide load. Residues in liver, adipose- and muscular tissue].

Evaluation of redox state of isolated perfused rat lung.

Studies on the toxicology of hexachlorobenzene. II. Identification and determination of metabolites.

In vitro uptake of organic ions by renal cortical tissue of rats treated acutely with 2,4,5-trichlorophenoxyacetic acid.

A study of the inhalation of pentachlorophenol by rats. Part I. A method for the determination of pentachlorophenol in rat plasma, urine and tissue and in aerosol samples.

Tissue localization of some teratogens at early and late gestation related to fetal effects.

Some aspects of the mode of action and metabolism of orthonil in plants.

High uptake in the erythrocytes and the spleen of the quaternary dipyridylum salt paraquat injected intravenously in hypotonic solutions.

Calcium transport during skeletogenesis in hermatypic corals.

Binding of organic compounds to rat liver and lung.

Human lymphocyte motility: normal characteristics and anomalous behavior of chronic lymphocytic leukemia cells.

An ultramicroscopic study on rigor mortis.

The effects of iron deficiency on the respiratory function and cytochrome content of rat heart mitochondria.

Preparation of intact monomeric collagen from rat tail tendon and skin and the structure of the nonhelical ends in solution.

Biochemical characterization of collagens synthesized by fibroblasts derived from normal and diseased human gingiva.

Neuromuscular disorder associated with a defect in mitochondrial energy supply.

[Study by gel electrophoresis, of alpha chains and of CNBr peptides of collagen from epiphyseal cartilage in chondrodysplasia].

Collagen polymorphism in idiopathic chronic pulmonary fibrosis.

Effects of anoxia and metabolic inhibitors on reaction of the fast sodium system.

[The dynamics of changes in oxygen tension, circulatory rats, muscular and rectal temperatures in dinitrophenol hyperthermia].

[Pharmacological studies on basic ethers (R111 and R97) with antispasmodic activity].

Characterization of amyloid fibril proteins from medullary carcinoma of the thyroid.

Luft's disease. Further biochemical and ultrastructural studies of skeletal muscle in the second case.

[Influence of uncoupling agents on the capacity of transaminase in kidney and pancreas].

Elastin structure in health and disease.

Properties of Fcγ receptors in normal and malignant human tissues.

Appearance of magnesium guanylate cyclase activity in rat liver with sodium azide activation.

Effects of metabolic inhibitors and ouabain on static afferent discharges from the isolated frog muscle spindle.

Synthesis of type II collagen in vitro by embryonic chick neural retina tissue.

Tissue factor in cultured cells: metabolic control.

The amino acid sequence of rabbit cardiac troponin I.

Perinatal development of conjugative enzyme systems.

Ca²⁺ -uptake into noradrenaline-storing granules of bovine splenic nerves.

Characterization of procollagen synthesized by matrix-free cells isolated from chick embryo tendons.

Toxicity of 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin in larval and adult forms of *Rana catesbeiana*.

Pentose cycle activity of the isolated perfused rat lung.

The amino acid sequence of troponin C from chicken skeletal muscle.

[Effect of various metabolic poisons on the nature of contraction of the straight muscle of the abdomen of frog].

Adenosine triphosphate - dependent calcium binding and accumulation by guinea pig cardiac sarcolemma.

Nuclear stains with soluble metachrome metal mordant dye lakes. The effect of chemical endgroup blocking reactions and the artificial introduction of acid groups into tissues.

CYTOTOXIC EFFECTS OF THE HERBICIDE 3-AMINO-1,2,4-TRIAZOLE ON DAPHNIA PULEX (CRUSTACEA:CLADOCERA).

Hepatic and extrahepatic metabolism of ¹⁴C-styrene oxide.

The relation between Z--disk lattice spacing and sarcomere length in sartorius muscle fibres from *Hyla cerulea*.

Isolation of a crosslinked cyanogen-bromide peptide from insoluble rabbit collagen. Tissue differences in hydroxylation and glycosylation of the crosslink.

Isolation and initial characterization of glial fibrillary acidic protein from chicken, turtle, frog and fish central nervous systems.

Isolation of calcium pump system and purification of calcium ion-dependent ATPase from heart muscle.

Use of preformed cell aggregates and layers to measure tissue-specific differences in intercellular adhesion.

[Absorption, distribution, excretion and metabolism of a basic ether compound (R97) with antispasmodic activity].

[Changes in the primary structure of rabbit muscle aldolase under the influence of valine against a background of prolonged fasting].

The effect of catecholamines on the influx of calcium and the development of tension in denervated mouse diaphragm muscle.

Stimulation of rat lung metabolism with 2,4-dinitrophenol and phenazine methosulfate.

Mechanism and site of small intestinal uptake of vitamin D₃ in pharmacological concentrations.

Properties of the guanylate cyclase-guanosine 3':5'-monophosphate system of rat renal cortex. Activation of guanylate cyclase and calcium-independent modulation of tissue guanosine 3':5'-monophosphate by sodium azide.

[Effect of thyroxine and 2,4-dinitrophenol on cardiac energetics].

A morphometric and biochemical investigation of the vesiculation of kidney microvilli.

Distribution of a lanthanide (¹⁴⁷Pm) in vascular smooth muscle.

Compartmentalization and movement of calcium in the thyroid.

Comparison of uptake and binding of disodium cromoglycate and phenol red in rat lung.

Collagen-and collagen peptide-induced chemotaxis of human blood monocytes.

Amino-acid sequence of tropomyosin-binding component of rabbit skeletal muscle troponin.

Reaction of rat molar pulp tissue to Formocresol, formaldehyde, and cresol.

Characterization of cardiac sarcoplasmic reticulum ATP-ADP phosphate exchange and phosphorylation of the calcium transport adenosine triphosphatase.

Regulatory characteristics of amino acid transport in newborn rat renal cortex cells.

Potassium induced potential changes in rat diaphragm muscle.

Determination of the complete amino acid sequence of bovine cardiac troponin C.

Cytochemical localization of endogenous peroxidase activity in renal medullary collecting tubules and papillary mucosa of the rat.

Aspects of intestinal folate transport in the rat.

Renal handling of phenol red. II. The mechanism of substituted phenolsulphophthalein (PSP) dye transport in rabbit kidney tubules in vitro.

Transport of organic cations and anions by choroid plexus.

[Dinitroorthocresol dissociation of oxidative phosphorylation in the rat liver perfused in situ].

Afferent neural pathway in the regulation of cardiopulmonary responses to tissue hypermetabolism.

Active transport of phenol red by rat lung slices.

A complex of cardiac cytochrome c1 and cytochrome c.

Human heart and platelet actins are products of different genes.

Valinomycin inhibition of the inward slow current of cardiac muscle.

The cyanogen bromide peptides of bovine soluble and insoluble collagens. II. Tissue specific cross-linked peptides of insoluble skin and dentin collagen.

[Paraquat : embryonic mortality and effects on pulmonary apparatus of chick and quail embryos].

Dinitramine: residues in and toxicity to freshwater fish.

Metabolism of 2,4-dichlorophenoxyacetic acid. VII. Comparison of metabolites from five species of plant tissue cultures.

Effect of asulam in wildlife specie residues and toxicity in bobwhite quail after prolonged exposure.

The dynamics of diquat in a model eco-system.

Aplastic anaemia after exposure to a weed killer, 2-methyl-4-chlorphenoxyacetic acid.

Metabolism of (4-¹⁴C)estradiol by 7,12-dimethylbenz(a) anthracene-induced mammary tumor peroxidase.

Pulmonary effects of paraquat in the first day after injection.

Effect of injection of nuclear fraction from Rhodamine sarcoma on turnover of liver catalase.

Experimental myopathies and muscular dystrophy. Studies in the formal pathogenesis of the myopathy of 2,4-dichlorophenoxyacetate.

Electron paramagnetic resonance spectra of catalase in mammalian tissues.

Fixation of foetal pig liver for electron microscopy. I. The effect of various aldehyds and of delayed fixation.

Blockade by metal complexing agents and by catalase of the effects of arachidonic acid on platelets: relevance to the study of anti-inflammatory mechanisms.

Fine structural and cytochemical identification of microperoxisomes in developing human erythrocytic cells.

Residues of chlorophenoxy acid herbicides and their phenolic metabolites in tissues of sheep and cattle.

The influence of non-cytotoxic concentrations of the herbicide 2,4-dichlorophenoxyacetic acid on the DNA synthesis in cultured vertebrate cells.

The metabolism of Diquat in hens and residues in eggs and tissues.

Isolation and characterization of CNBr peptides of human (alpha 1 (III))3 collagen and tissue distribution of (alpha 1 (I))2 alpha 2 and (alpha 1 (III))3 collagens.

Energy-dependent calcium uptake activity of microsomes from the aorta of normal and hypertensive rats.

Tritiated methylmercury in the brain of squirrel monkeys.

Experimental mitochondrial myopathy produced by in vivo uncoupling of oxidative phosphorylation.

Tissue distribution, excretion and biological effects of [14C]tetrachlorodibenzo-p-dioxin in rats.

Effects in mice of high and low environmental temperature on the maternal and fetal toxicity of 2-sec-butyl-4,6-dinitrophenol (dinoseb) and on disposition of [14C]-dinoseb(12).

Antibody-induced redistribution of CEA on the cell surface: utilization in separation of CEA and isoantigen A.

Isothiocyanates. A new class of uncouplers.

A chemosterilized antigen-extracted autodigested alloimplant for bone banks.

Patients with Ehlers-Danlos syndrome type IV lack type III collagen.

A model of age-dependent tissue calcification based on 2,4-Dinitrophenol induced deposition of calcium in earcartilage.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on mammalian cells in tissue cultures.

Comparison of the cyanogen bromide peptides of insoluble guinea-pig skin and scar collagen.

Impairment of mitochondrial function following reperfusion of acutely ischemic myocardium.

Cardiac metabolism and electromechanics of human heart.

Antigenic activity, in humans, of purified low molecular weight fractions of timothy pollen.

A further investigation into the energy dependence of angiotensin II-induced contractions of isolated smooth muscle preparations.

Oxidative phosphorylation in the skeletal muscles of rabbits during dinitrophenol hyperthermia.

[Utilization of luminescent monospecific sera against human immunoglobulins G, A and M for diagnostic purposes].

Type III collagen: A major constituent of rheumatoid and normal human synovial membrane.

Role of mitochondrial calcium transport in failing heart.

A correlative study of the experimental cardiac dynamics and myocardial energy metabolism.

Cyanogen bromide fragments of the cardiac I light chain from bovine myosin: evidence for sequence homology with rabbit skeletal myosin alkali light chains.

The involvement of receptor sulphhydryl groups in the binding of steroids to the cytoplasmic glucocorticoid receptor from rat thymus.

Loss of alpha-bungarotoxin from junctional and extrajunctional acetylcholine receptors in rat diaphragm muscle in vivo and in organ culture.

Metabolic inhibition and adrenoceptor interconversion.

Activation of guanylate cyclase from rat liver and other tissues by sodium azide.

Mechanism of sulfate transport inhibition by cycloheximide in plant tissues.

The primary structure of troponin T and the interaction with tropomyosin.

Characteristics of sodium and potassium transport in the lung.

The regulation of respiration of guinea pig taenia coli in high-K medium: the role of nicotinamide-adenine dinucleotide, adenosine diphosphate and Ca^{++} .

Oxygen and cyclic nucleotides in human umbilical artery.

Chick muscle in tissue culture: the ubiquity of viral infection.

Non-dependence on native structure of pig liver pyruvate kinase when used as a substrate for cyclic 3',5'-AMP-stimulated protein kinase.

The amino acid sequence of myoglobin from skeletal muscles of red deer (*Cervus elaphus*).

Proceedings: Some effects of 2,4-dinitrophenol (2,4-DNP) on the electrical properties of the frog skeletal muscle membrane.

The primary structure of actin from rabbit skeletal muscle. Completion and analysis of the amino acid sequence.

The primary structure of actin from rabbit skeletal muscle. Five cyanogen bromide peptides, including the NH₂ and COOH termini.

Structural studies on rabbit skeletal muscle actin. Ordering of the peptides produced by cleavage with cyanogen bromide.

The primary structure of actin from rabbit skeletal muscle. Three cyanogen bromide peptides that are insoluble at neutral pH.

Age-related changes in aldehyde location on rat tail tendon collagen.

The amino acid sequence of troponin I from rabbit skeletal muscle.

Purification and analysis of the cyanogen bromide peptides of troponin T from rabbit skeletal muscle.

Stepwise reduction of cytochromes b-562, b-566 and b-558 in rat liver mitochondria.

The transport of gentamicin in the choroid plexus and cerebrospinal fluid.

Mitochondrial ATP-Pi exchange complex and the site of uncoupling of oxidative phosphorylation.

Structural studies on fructose- 1,6-bisphosphatases from rabbit liver, kidney, and muscle.

Bovine adrenal medullary chromogranin A: studies on the structure and further evidence for identity with dopamine-beta-hydroxylase subunit.

[Catecholamine content and electrolyte balance of the rabbit myocardium during poisoning with 2,4-dinitrophenol].

Effect of anaerobiosis, dinitrophenol and fluoride on the active intestinal transport of galactose in snail.

Mechanism and site of small intestinal absorption of alpha-tocopherol in the rat.

[A change in the phases of the receptor potential of isolated frog muscle spindles under the influence of dinitrophenol].

Metabolism of resorcinolic compounds by bacteria. Purification and properties of orcinol hydroxylase from *Pseudomonas putida* 01.

Tissue distribution and excretion of octachlorodibenzo-rho-dioxin in the rat.

The methionine-containing subfraction of F1 histone from rat tissues.

Clinico-pathological observations on paramonochlorophenol compounds in endodontics. Part 2. Result of application to the wound after vital pulpectomy.

Acetylcholine receptor turnover in membranes of developing muscle fibers.

Amino acid sequence of 37 residues surrounding Nxi-pyridoxyllysine in mitochondrial aspartate aminotransferase.

Amino-acid sequence of parvalbumin from rabbit skeletal muscle.

Ion transport across the excised bullfrog lung.

Glial fibrillary acidic protein from normal and gliosed human brain. Demonstration of multiple related polypeptides.

Regulation of pyruvate dehydrogenase in isolated rat liver mitochondria. Effects of octanoate, oxidation-reduction state, and adenosine triphosphate to adenosine diphosphate ratio.

Human, rat and mouse liver-mediated mutagenicity of vinyl chloride in *S. typhimurium* strains.

[Primary structure of cytoplasmic aspartate aminotransferase from pig heart muscle. Amino acid sequence of peptides from cyanogen bromide hydrolysate].

Studies on the biosynthesis of isocoumarins in carrot root tissues : induction by substances other than ethylene and effects of metabolic inhibitors.

Induction and suppression of hepatic and extrahepatic microsomal foreign-compound-metabolizing enzyme systems by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Demonstration of a unique antigenic specificity for the collagen alpha1 (II) chain from cartilaginous tissue.

The amino acid sequence of rabbit muscle triose phosphate isomerase.

Brain concentration of propranolol in relation to hypotensive effect in the rabbit with observations on brain propranolol levels in man.

The relationship between the transport of glucose and cations across cell membranes in isolated tissues. IX. The role of cellular calcium in the activation of the glucose transport system in rat soleus muscle.

Microbodies and an anomalous "microcylinder" in the ultrastructure of plants with Crassulacean acid metabolism.

Effects of magnesium ion and temperature on the phasic and tonic contractions of the potassium contracture in the pregnant rat myometrium.

The effect of beta-bromopyruvic acid on fructose-1, 6-diphosphate aldolase from rabbit muscle.

Phosphoprotein formation and ADP-ATP exchange of cardiac sarcoplasmic reticulum.

The influence of metabolic inhibitors upon the transmembrane slow inward current in the mammalian ventricular myocardium.

Electrolyte- and fluid-spaces of rat brain in situ after infusion with dinitrophenol.

Studies on the structure of rabbit muscle aldolase. Determination of the primary structure of the COOH-terminal BrCN peptide; the complete sequence of the subunit polypeptide chain.

Studies on the structure of rabbit muscle aldolase. Ordering of the tryptic peptides; sequence of 164 amino acid residues in the NH₂-terminal BrCN peptide.

Studies on the structure of rabbit muscle aldolase. Isolation and sequence analysis of the tryptic peptides derived from the NH₂-terminal BrCN peptide.

Studies on the structure of rabbit muscle aldolase. Amino acid sequence of cysteine-containing peptides.

Paraquat lung: a reappraisal.

[Alveolitis and pulmonary fibrosis--an attempt at a synopsis].

Studies on the mechanism of the lung toxicity of paraquat: comparison of tissue distribution and some biochemical parameters in rats and rabbits.

[Dynamics of changes in the immune structure of the lymphatic follicles of the spleen in pesticide poisoning].

Studies on the effects of paraquat and diquat on cells in culture. Viability of macrophages and fibroblasts incubated with paraquat and diquat.

[Problem of studying the pathogenic effect of environmental chemical substances on the body].

Effects of phenoxyacetic acids on rat liver tissues.

Effects of acetaldehyde, propionaldehyde, formaldehyde and acrolein on contractility, ¹⁴C-norepinephrine and ⁴⁵calcium binding in isolated smooth muscle.

Isolation and identification of propham (isopropyl carbanilate) metabolites from animal tissues and milk.

[Intensity of the transamination from aspartate to alpha-ketoglutarate in rat tissues under the influence of 2-methyl-4-chlorophenoxy-gamma-butyric acid].

Glycol methacrylate embedding in enzyme histochemistry: application to arthropod tissue incubated for demonstration of unspecific esterase and succinic dehydrogenase activity.

Characterization and localization of mitochondrial uncoupler binding sites with an uncoupler capable of photoaffinity labeling.

Metabolism of the herbicide methazole (2-(3,4-dichlorophenyl)-4-methyl-1,2,4-oxadiazolidine-3,5-dione) in rats.

Polyester wax processing of tissues: some new techniques and detailed procedures.

Freeze-fracture studies of photosynthetically deficient "supergranal" chloroplasts in tissue cultures containing virus-like particles.

The preparation and purification of HL-A monospecific antigens using platelets and various lymphoid sources.

[Oxidative phosphorylation in the skeletal muscles of rabbits in the dynamics of dinitrophenol hyperthermia].

The use of immunoadsorbent columns for the isolation of antibodies specific for antigens associated with human bronchogenic carcinoma.

The complete amino-acid sequence of non-immunoglobulin amyloid fibril protein AS in rheumatoid arthritis.

Proteins of the periodontium. Biochemical studies on the collagen and noncollagenous proteins of human gingivae.

Evidence for a common synthetic origin for secretory and serum IgA.

The incidence and antigenic specificity of antibodies against denatured human collagen in rheumatoid arthritis.

The effect of tonicity and metabolic inhibitors on respiration and ripening of avocado fruit slices.

Evidence for active Phloem loading in the minor veins of sugar beet.

The subunit structure of human muscle and human erythrocyte pyruvate kinase isozymes.

Homology of the primary structures of cytoplasmic and mitochondrial aspartate aminotransferases from pig heart.

Allergens of mammalian origin. III. Properties of a major feline allergen.

Phosphate absorption rates and adenosine 5'-triphosphate concentrations in corn root tissue.

Effect of 2,4-Dinitrophenol on Auxin-induced Ethylene Production and Auxin Conjugation by Mung Bean Tissue.

Characterization of cadmium uptake by plant tissue.

Simultaneous analysis of 2,3,4,6-tetrachloroanisole, pentachloroanisole and the corresponding chlorophenols in biological tissue.

The phosphorylation sites of troponin I from white skeletal muscle of the rabbit.

The amino acid sequences of the phosphorylated sites in troponin-I from rabbit skeletal muscle.

Regulation of organogenesis in small explants of superficial tissue of *Nicotiana tabacum* L.

On facilitation of transmitter release at the toad neuromuscular junction.

The amino-acid sequence of the alkali light chains of rabbit skeletal-muscle myosin.

Homology of myosin light chains, troponin-C and parvalbumins deduced from comparison of their amino acid sequences.

Primary structure of lobster-muscle arginine kinase. Isolation and characterization of the fragments produced by cyanogen-bromide cleavage.

Isolation and purification of the cyanogen bromide fragments from troponin I.

Characterization of cardiac muscle collagen. Molecular heterogeneity.

The accumulation of adenosine in rabbit intestinal muscle.

A new method of preparation of troponin I (inhibitory protein) using affinity chromatography. Evidence for three different forms of troponin I in striated muscle.

The amino-acid sequence of sarcine adenylate kinase from skeletal muscle.

Residual bromide in tissues of rats fed methyl bromide fumigated diets.

Fluxes of a nonelectrolyte and compartmentation in cells of carrot root tissue.

The Biosynthesis of delta-Aminolevulinic Acid in Higher Plants: I. Accumulation of delta-Aminolevulinic Acid in Greening Plant Tissues.

[Effect of noradrenaline and 2,4-dinitrophenol on the energetics of muscle contraction].

The distribution of delta, delta'-dihydroxylysine in bovine tendon and dentin.

[Effect of dinitrophenol on the spontaneous impulse activity of frog isolated muscle spindle].

Table 2A-9 – Titles of Pubmed Records Related to Eye Adverse Events Following Herbicide Exposure

BLINDNESS; *CHOROID*; *CORNEA*; *EPITHELIOPATHY*; * EYE *; *MACULA*; *MYDRIASIS*; *MYOPIA*; *OCULAR*; *OCULO*; *OPHTHAL*; *OPTIC*; *PHOTOP*; *PTOSIS*; *RETIN*; *SCLERITIS*; *UVEITIS*; *VISUAL ACUITY*; *WHITE DOT SYNDROME*; EYE (4379)

Adverse effects of 2,4-D dimethylammonium based-herbicide on Acetylcholinesterase expression in Nile tilapia (*Oreochromis niloticus*).

Effects of atrazine and curcumin exposure on TCMK-1 cells: Oxidative damage, pyroptosis and cell cycle arrest.

Biological-based techniques for real-time water-quality studies: Assessment of non-invasive (swimming consistency and respiration) and toxicity (antioxidants) biomarkers of zebrafish.

Prometryn exposure disrupts the intestinal health of *Eriocheir sinensis*: Physiological responses and underlying mechanism.

Impact of exposure to glyphosate-based herbicide on morphological and physiological parameters in embryonic and larval development of zebrafish.

Mitochondrial reactive oxygen species initiate gasdermin D-mediated pyroptosis and contribute to paraquat-induced nephrotoxicity.

Regulation of NCOA4-mediated iron recycling ameliorates paraquat-induced lung injury by inhibiting ferroptosis.

Melatonin inhibits atrazine-induced mitochondrial impairment in cerebellum of mice: Modulation of cGAS-STING-NLRP3 axis-dependent cell pyroptosis.

MicroRNA-217-5p triggers dopaminergic neuronal degeneration via autophagy activation under Atrazine exposure.

Ferulic acid grafted into β -cyclodextrin nanosponges ameliorates Paraquat-induced human MRC-5 fibroblast injury.

Paraquat and Parkinson's Disease: The Molecular Crosstalk of Upstream Signal Transduction Pathways Leading to Apoptosis.

Atrazine exposure promotes cardiomyocyte pyroptosis to exacerbate cardiotoxicity by activating NF- κ B pathway.

A trinuclear Zn (II) schiff base dicyanamide complex attenuates bacterial biofilm formation by ROS generation and membrane damage and exhibits anticancer activity.

Synthesis, Characterization, Antioxidant, and Anticancer Activity against Colon Cancer Cells of Some Cinnamaldehyde-Based Chalcone Derivatives.

Curcumin alleviates atrazine-induced cardiotoxicity by inhibiting endoplasmic reticulum stress-mediated apoptosis in mice through ATF6/Chop/Bcl-2 signaling pathway.

Autophagy mediated FTH1 degradation activates gasdermin E dependent pyroptosis contributing to diquat induced kidney injury.

Flow cytometric assessments of metabolic activity in bacterial assemblages provide insight into ecosystem condition along the Buffalo National River, Arkansas.

Cinnamaldehyde protects cardiomyocytes from oxygen-glucose deprivation/reoxygenation-induced lipid peroxidation and DNA damage via activating the Nrf2 pathway.

Grape seed-derived procyanidin inhibits glyphosate-induced hepatocyte ferroptosis via enhancing crosstalk between Nrf2 and FGF12.

Forensic significance of Roundup Full[®] II effect on the development of *Dermestes maculatus* (Coleoptera: Dermestidae) and *Lucilia sericata* (Diptera: Calliphoridae).

Proteomic insight towards key modulating proteins regulated by the aryl hydrocarbon receptor involved in ovarian carcinogenesis and chemoresistance.

A regulatory module comprising G3BP1-FBXL5-IRP2 axis determines sodium arsenite-induced ferroptosis.

Upregulated LncRNA-Meg3 modulates the proliferation and survival of MEPM cells via interacting with Smad signaling in TCDD-induced cleft palate.

Baicalin and lung diseases.

Investigation of the activity of a novel tropolone in osteosarcoma.

m-Cresol, a pesticide intermediate, induces hepatotoxicity and behavioral abnormalities in zebrafish larvae through oxidative stress, apoptosis.

Synthetic GPR40/FFAR1 agonists: An exhaustive survey on the most recent chemical classes and their structure-activity relationships.

Glufosinate-ammonium causes liver injury in zebrafish by blocking the Nrf2 pathway.

Meptyldinocap induces implantation failure by forcing cell cycle arrest, mitochondrial dysfunction, and endoplasmic reticulum stress in porcine trophectoderm and endometrial luminal epithelial cells.

Effect of forchlorfenuron and thidiazuron on kiwifruits' internal qualities, optical properties and their relationship during growth.

Combined toxic effects of polystyrene microplastics and 3,6-dibromocarbazole on zebrafish (*Danio rerio*) embryos.

Gut microbiota disorders aggravate terbuthylazine-induced mitochondrial quality control disturbance and PANoptosis in chicken hepatocyte through gut-liver axis.

Synergistic effect of spermidine and ciprofloxacin against Alzheimer's disease in male rat via ferroptosis modulation.

Co-exposure to pentachlorophenol (PCP) and cadmium (Cd) triggers apoptosis-like cell death in *Escherichia coli*.

Stereoselective toxicity of acetochlor chiral isomers on the nervous system of zebrafish larvae.

Roles of oxidative stress/JNK/ERK signals in paraquat-triggered hepatic apoptosis.

Similar toxicity potential of glyphosate and glyphosate-based herbicide on cerebellar development after maternal exposure in rats.

Immunocytochemical Analysis of Crocin against Oxidative Stress in Trigeminal Sensory Neurons Innervating the Cornea.

Fluorochloridone induces mitochondrial dysfunction and apoptosis in primary goat Sertoli cells.

Salvianolic acid A attenuates arsenic-induced ferroptosis and kidney injury via HIF-2 β /DUOX1/GPX4 and iron homeostasis.

Effect of Picloram and Desiccation on the Somatic Embryogenesis of *Lycium barbarum* L.

Zingerone attenuates sciatic nerve damage caused by sodium arsenite by inhibiting NF- κ B, caspase-3, and ATF-6/CHOP pathways and activating the Akt2/FOXO1 pathway.

Impact of Nicosulfuron on Sperm Quality: Insights into Testicular Cell Apoptosis and NF- κ B Signaling Pathway in Mice Testes.

Impaired Detoxification of Trans, Trans-2,4-Decadienal, an Oxidation Product from Omega-6 Fatty Acids, Alters Insulin Signaling, Gluconeogenesis and Promotes Microvascular Disease.

Ni/Co/Carbon nitride derived from ZIF-67 (MOF) nanocomposite: Enhanced light-driven photocatalytic degradation of methylparaben, mechanism & toxicity.

Persistent Neutrophil Infiltration and Unique Ocular Surface Microbiome Typify Dupilumab-Associated Conjunctivitis in Patients with Atopic Dermatitis.

Effect of WISP1 on paraquat-induced EMT.

Abnormalities of serum lipid metabolism in patients with acute paraquat poisoning caused by ferroptosis.

Molecular mechanism of paraquat-induced ferroptosis leading to pulmonary fibrosis mediated by Keap1/Nrf2 signaling pathway.

The mechanism of acrolein exposure inhibited the release of neutrophil extracellular traps: By reducing respiratory burst and Raf/MEK/ERK pathway and promote cell apoptosis.

Toxic effects of benfluralin on zebrafish embryogenesis via the accumulation of reactive oxygen species and apoptosis.

Zinc Oxide Nanoparticles and Vitamin C Ameliorate Atrazine-Induced Hepatic Apoptosis in Rat via CYP450s/ROS Pathway and Immunomodulation.

Astaxanthin ameliorates dopaminergic neuron damage in paraquat-induced SH-SY5Y cells and mouse models of Parkinson's disease.

Paraquat-induced ferroptosis suppression via NRF2 expression regulation.

Microglia-derived exosomal circZNF1 alleviates paraquat-induced neuronal cell damage via miR-17-5p.

Responses to herbicides of Arctic and temperate microalgae grown under different light intensities.

Acrolein Induces Retinal Abnormalities of Alzheimer's Disease in Mice.

Toxicological effects of ocular acrolein exposure to eyelids in rabbits in vivo.

Single and Combined Effects of Chlorpyrifos and Glyphosate on the Brain of Common Carp: Based on Biochemical and Molecular Perspective.

Subacute exposure to Roundup® changes steroidogenesis and gene expression of the glutathione-glutaredoxin system in rat ovaries: Implications for ovarian toxicity of this glyphosate-based herbicide.

Synergistic toxicity of 2,4-dichlorophenoxyacetic acid and arsenic alters biomarkers in rats.

Upregulation of mitochondrial calcium uniporter contributes to paraquat-induced neuropathology linked to Parkinson's disease via imbalanced OPA1 processing.

The role of acrolein for E-cigarette vapour condensate mediated activation of NADPH oxidase in cultured endothelial cells and macrophages.

Tolerance of microorganisms to residual herbicides found in eucalyptus plantations.

Cannabidiol Protects Dopaminergic-like Neurons against Paraquat- and Maneb-Induced Cell Death through Safeguarding DJ-1/CYS(106) and Caspase 3 Independently of Cannabinoid Receptors: Relevance in Parkinson's Disease.

[Experimental study on the toxicokinetics and gastrointestinal damage in rats poisoned with acute diquat poisoning at different exposure doses].

A 90-day rodent feeding study with grain for genetically modified maize L4 conferring insect resistance and glyphosate tolerance.

Therapeutic potential of amitriptyline for paraquat-induced pulmonary fibrosis: Involvement of caveolin-1-mediated anti-epithelial-mesenchymal transition and inhibition of apoptosis.

Lycopene ameliorates atrazine-induced spatial learning and memory impairments by inhibiting ferroptosis in the hippocampus of mice.

A novel mechanism of Dimethyl ester of Alpha-ketoglutarate in suppressing Paraquat-induced BEAS-2B cell injury by alleviating GSDME dependent pyroptosis.

Tannin alleviates glyphosate exposure-induced apoptosis, necrosis and immune dysfunction in hepatic L8824 cell line by inhibiting ROS/PTEN/PI3K/AKT pathway.

Exposure to the herbicide fluridone induces cardiovascular toxicity in early developmental stages of zebrafish.

Perinatal exposure to high concentration glyphosate-based herbicides induces intestinal apoptosis by activating endoplasmic reticulum stress in offspring.

Photodegradation of the Novel Herbicide Pyraquinat in Aqueous Solution: Kinetics, Photoproducts, Mechanisms, and Toxicity Assessment.

Cyhalofop-butyl exposure induces the severe hepatotoxicity and immunotoxicity in zebrafish embryos.

Toxicity of herbicide glyphosate to planarian *Dugesia japonica* and its potential molecular mechanisms.

Maternal exposure to a glyphosate-based herbicide impairs placental development through endoplasmic reticulum stress in mice.

Tripterygium wilfordii Hook.f. ameliorates paraquat-induced lung injury by reducing oxidative stress and ferroptosis via Nrf2/HO-1 pathway.

Glyphosate-triggered hepatocyte ferroptosis via suppressing Nrf2/GSH/GPX4 axis exacerbates hepatotoxicity.

Atrazine modifies markers of melanocyte maturation and apoptosis in primary skin cultures.

Chitooligosaccharides Derivatives Protect ARPE-19 Cells against Acrolein-Induced Oxidative Injury.

Water quality criteria derivation and tiered ecological risk evaluation of antifouling biocides in marine environment.

Mitigating effect of L-carnitine against atrazine-induced hepatotoxicity: histopathological and biochemical analyses in albino rats.

Pterostilbene Confers Protection against Diquat-Induced Intestinal Damage with Potential Regulation of Redox Status and Ferroptosis in Broiler Chickens.

Global warming and glyphosate toxicity (II): Offspring zebrafish modelling with behavioral, morphological and immunohistochemical approaches.

Treatment with paraquat affects the expression of ferroptosis-related genes.

Paraquat induces different programmed cell death patterns in *Microcystis aeruginosa* and *Chlorella luteoviridis*.

Comparison of the effect of glyphosate and glyphosate-based herbicide on hippocampal neurogenesis after developmental exposure in rats.

Cryptotanshinone protects against oxidative stress in the paraquat-induced Parkinson's disease model.

Synergistic toxicity of ethanol and 2,4-dichlorophenoxyacetic acid enhances oxidant status, DNA damage, inflammation, and apoptosis in rats.

Suppressor of cytokine signaling 3-derived peptide as a therapeutic for inflammatory and oxidative stress-induced damage to the retina.

A mass event of paraquat poisoning via inhalation.

Subchronic feeding study of glyphosate-tolerant maize GG2 with the *gr79-epsps* and *gat* genes in Wistar Han RCC rats.

Evaluating the Anti-Melanoma Effects and Toxicity of Cinnamaldehyde Analogues.

Activatable Semiconducting Polymer Nanoinducers Amplify Oxidative Damage via Sono-Ferroptosis for Synergistic Therapy of Bone Metastasis.

Exposure to environmental concentrations of glyphosate induces cardiotoxicity through cellular senescence and reduced cell proliferation capacity.

Soluble thrombomodulin alleviates Diquat-induced acute kidney injury by inhibiting the HMGB1/ $\text{I}\beta\text{1}$ /NF- κB signalling pathway.

TRPA1 deficiency aggravates dilated cardiomyopathy by promoting S100A8 expression to induce M1 macrophage polarization in rats.

Sensitization of GSH synthesis by curcumin curtails acrolein-induced alveolar epithelial apoptosis via Keap1 cysteine conjugation: A randomized controlled trial and experimental animal model of pneumonitis.

Snake venom nerve growth factor-inspired designing of novel peptide therapeutics for the prevention of paraquat-induced apoptosis, neurodegeneration, and alteration of metabolic pathway genes in the rat pheochromocytoma PC-12 cell.

Sodium arsenite and dimethylarsenic acid induces apoptosis in OC3 oral cavity cancer cells.

Ethalfuralin induces developmental toxicity in zebrafish via oxidative stress and inflammation.

Polyamine-Derived Aminoaldehydes and Acrolein: Cytotoxicity, Reactivity and Analysis of the Induced Protein Modifications.

Roundup® disrupts tissue architecture, attenuates $\text{Na}^{+}/\text{K}^{+}$ -ATPase expression, and induces protein oxidation/nitration, cellular apoptosis, and antioxidant enzyme expressions in the gills of goldfish, *Carassius auratus*.

Teratogenic effects of the dicamba herbicide in Zebrafish (*Danio rerio*) embryos.

Disruption of oogenesis and molting by methoprene and glyphosate in *Gammarus fossarum*: involvement of retinoic acid?

Application of Highly Sensitive Immunosensor Based on Optical Waveguide Light-Mode Spectroscopy (OWLS) Technique for the Detection of the Herbicide Active Ingredient Glyphosate.

Glyphosate without Co-formulants affects embryonic development of the south african clawed frog *Xenopus laevis*.

Universal and rapid detection of atrazine and bisphenol A using a reusable optical fiber chemiluminescent biosensor.

Molecular and behavioral toxicity assessment of tiafenacil, a novel PPO-inhibiting herbicide, in zebrafish embryos/larvae.

The retinoid metabolism of *Gammarus fossarum* is disrupted by exogenous all-trans retinoic acid, citral, and methoprene but not by the technical formulation of glyphosate.

Catalytic electrodes' characterization study serving polluted water treatment: environmental healthcare and ecological risk assessment.

m(6)A methylation-mediated PGC-1 β contributes to ferroptosis via regulating GSTK1 in arsenic-induced hepatic insulin resistance.

Kynurenine attenuates mitochondrial depolarization and neuronal cell death induced by rotenone exposure independently of AhR-mediated parkin induction in SH-SY5Y differentiated cells.

Oxidative stress contributes to flumioxazin-induced cardiotoxicity in zebrafish embryos.

Metformin alleviates sodium arsenite-induced hepatotoxicity and glucose intolerance in mice by suppressing oxidative stress, inflammation, and apoptosis.

Copper-Loaded Nanoheterojunction Enables Superb Orthotopic Osteosarcoma Therapy via Oxidative Stress and Cell Cuproptosis.

Phloretin as an add-on therapy to losartan attenuates diabetes-induced AKI in rats: A potential therapeutic approach targeting TLR4-induced inflammation.

A Novel Quinazoline Derivative Prevents and Treats Arsenic-Induced Liver Injury by Regulating the Expression of RecQ Family Helicase.

A *Cryptosporidium parvum* vaccine candidate effect on immunohistochemical profiling of CD4(+), CD8(+), Caspase-3 and NF- κ B in mice.

Comparing the enantioselective toxicity on cell cycle and apoptosis of DL-glufosinate and L-glufosinate to SH-SY5Y cells.

A 90-day feeding study of genetically modified maize LP007-1 in wistar han RCC rats.

Exposure to bromoxynil octanoate herbicide induces oxidative stress, inflammation, and apoptosis in testicular tissue via modulating NF- κ B pathway.

Antimicrobial effect of oral care gel containing hinokitiol and 4-isopropyl-3-methylphenol against intraoral pathogenic microorganisms.

A phenome-wide association study (PheWAS) to identify the health impacts of 4-cresol sulfate in the Nagahama Study.

The health risk of acetochlor metabolite CMEPA is associated with lipid accumulation induced liver injury.

Molinate induces organ defects by promoting apoptosis, inflammation, and endoplasmic reticulum stress during the developmental stage of zebrafish.

Establishment and characterization of Yellow River carp (*Cyprinus carpio haematopterus*) muscle cell line and its application to fish virology and immunology.

Untargeted Multiomics Approach Coupling Lipidomics and Metabolomics Profiling Reveals New Insights in Diabetic Retinopathy.

Label-free drug interaction screening via Raman microscopy.

Borax regulates iron chaperone- and autophagy-mediated ferroptosis pathway in glioblastoma cells.

Toxicity effects of disinfection byproduct chloroacetic acid to *Microcystis aeruginosa*: Cytotoxicity and mechanisms.

Cystine/Glutamate Xc(-) Antiporter Induction Compensates for Transsulfuration Pathway Repression by 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) to Ensure Cysteine for Hepatic Glutathione Biosynthesis.

Nephroprotective Effects of Selenium Nanoparticles Against Sodium Arsenite-Induced Damages.

Biological Hyperthermia-Inducing Nanoparticles for Specific Remodeling of the Extracellular Matrix Microenvironment Enhance Pro-Apoptotic Therapy in Fibrosis.

Concomitant inhibition of TLR-4 and SGLT2 by phloretin and empagliflozin prevents diabetes-associated ischemic acute kidney injury.

Carvacrol reduces abnormal and dead sperm counts by attenuating sodium arsenite-induced oxidative stress, inflammation, apoptosis, and autophagy in the testicular tissues of rats.

Impaired pancreatic beta-cell function after a single dose of oral iron: A before-and-after (pre-post) study.

Stress Granules Inhibit Coxsackievirus B3-Mediated Cell Death via Reduction of Mitochondrial Reactive Oxygen Species and Viral Extracellular Release.

Steatosis and Metabolic Disorders Associated with Synergistic Activation of the CAR/RXR Heterodimer by Pesticides.

Thioredoxin A of *Streptococcus suis* Serotype 2 Contributes to Virulence by Inhibiting the Expression of Pentraxin 3 to Promote Survival Within Macrophages.

The vitamin B(12) analog cobinamide ameliorates azide toxicity in cells, *Drosophila melanogaster*, and mice.

Zingerone reduces sodium arsenite-induced nephrotoxicity by regulating oxidative stress, inflammation, apoptosis and histopathological changes.

Malathion alters the transcription of target genes of the tumour suppressor tp53 and cancerous processes in *Colossoma macropomum*: Mechanisms of DNA damage response, oxidative stress and apoptosis.

Direct ferrous sulfate exposure facilitates the VBNC state formation rather than ferroptosis in *Listeria monocytogenes*.

Disruption of mitochondrial function augments the radiosensitivity of prostate cancer cell lines.

Electrochemical and Optical Sensors for the Detection of Chemical Carcinogens Causing Leukemia.

Acetaldehyde dehydrogenase 2 activation attenuates sepsis-induced brain injury through NLRP3 inflammasome regulation.

Targeting BRD4 and PI3K signaling pathways for the treatment of medulloblastoma.

Arsenic compounds activate MAPK and inhibit Akt pathways to induce apoptosis in MA-10 mouse Leydig tumor cells.

Cytotoxic Effects of Darinaparsin, a Novel Organic Arsenical, against Human Leukemia Cells.

Endocrine disruptors and endometriosis.

Buspirone Enhances Cell Survival and Preserves Structural Integrity during Oxidative Injury to the Retinal Pigment Epithelium.

Spectroscopic and optical properties of 1,2,4-triazolo[4,3-a]pyridin-3(2H)-one as a component of herbicides.

Effects of terbutylazine on myocardial oxidative stress and ferroptosis via Nrf2/HO-1 signaling pathway in broilers.

Plant-derived squalene supplementation improves growth performance and alleviates acute oxidative stress-induced growth retardation and intestinal damage in piglets.

Development of a simplified human embryonic stem cell-based retinal pre-organoid model for toxicity evaluations of common pollutants.

Interpretable predictive models of genome-wide aryl hydrocarbon receptor-DNA binding reveal tissue-specific binding determinants.

Influences of continuous and pulse atrazine exposure on intestinal flora and metabolites of *Pelophylax nigromaculatus* tadpoles.

Impacts of perinatal dioxin exposure on gaze behavior in 2-year-old children in the largest dioxin-contaminated area in Vietnam.

Exposure to the aryl hydrocarbon receptor agonist dioxin disrupts formation of the muscle, nerves, and vasculature in the developing jaw.

The synergy of microplastics with the heavy metal zinc has resulted in reducing the toxic effects of zinc on lentil (*Lens culinaris*) seed germination and seedling growth.

Proteomic characterization of a lutein-hyperaccumulating *Chlamydomonas reinhardtii* mutant reveals photoprotection-related factors as targets for increasing cellular carotenoid content.

Effect of Hydralazine on Angiotensin II-Induced Abdominal Aortic Aneurysm in Apolipoprotein E-Deficient Mice.

Mild Oxidative Stress Induced by Sodium Arsenite Reduces Lipocalin-2 Expression Levels in Cortical Glial Cells.

Bifenox compromises porcine trophectoderm and luminal epithelial cells in early pregnancy by arresting cell cycle progression and impairing mitochondrial and calcium homeostasis.

Bifenox induces programmed cell death in bovine mammary epithelial cells by impairing calcium homeostasis, triggering ER stress, and altering the signaling cascades of PI3K/AKT and MAPK.

Dimethenamid promotes oxidative stress and apoptosis leading to cardiovascular, hepatic, and pancreatic toxicities in zebrafish embryo.

Nilotinib alleviates paraquat-induced hepatic and pulmonary injury in rats via the Nrf2/Nf-kB axis.

Developmental toxicity of flufenacet including vascular, liver, and pancreas defects is mediated by apoptosis and alters the Mapk and PI3K/Akt signal transduction in zebrafish.

DOM optical parameters as a tool to understand degradation of phenolic contaminants of emerging concern.

Analysis of Human microRNA Expression Profiling During Diquat-Induced Renal Proximal Tubular Epithelial Cell Injury.

Developmental and cardiovascular toxicities of acetochlor and its chiral isomers in zebrafish embryos through oxidative stress.

Atrazine: cytotoxicity, oxidative stress, apoptosis, testicular effects and chemopreventive Interventions.

Untargeted Metabolomic Analyses of Body Fluids to Differentiate TBI DOC and NTBI DOC.

Parkinson's disease updates: Addressing the pathophysiology, risk factors, genetics, diagnosis, along with the medical and surgical treatment.

Ferroptosis contributes to cyclophosphamide-induced hemorrhagic cystitis.

Alterations of Bax/Bcl-2 ratio contribute to NaAsO₂ induced thyrotoxicity in human thyroid follicular epithelial cells and SD rats.

Dynamic relationship between the aryl hydrocarbon receptor and long noncoding RNA balances cellular and toxicological responses.

Terbutryn causes developmental toxicity in zebrafish (*Danio rerio*) via apoptosis and major organ malformation in the early stages of embryogenesis.

An eco-friendly system for stabilization of retinol: A step towards attending performance with improved environmental respect.

Evaluation of the effect of photoplethysmograms on workers' exposure to methyl bromide using second derivative.

Co-administration of L-Ascorbic Acid and α -Tocopherol Alleviates Arsenic-Induced Immunotoxicities in the Thymus and Spleen by Dwindling Oxidative Stress-Induced Inflammation.

Fluchloralin induces developmental toxicity in heart, liver, and nervous system during early zebrafish embryogenesis.

Three-Way Cell-Based Screening of Antistress Compounds: Identification, Validation, and Relevance to Old-Age-Related Pathologies.

Assessing Fermentation Broth Quality of Pineapple Vinegar Production with a Near-Infrared Fiber-Optic Probe Coupled with Stability Competitive Adaptive Reweighted Sampling.

Air Pollutant Patterns and Human Health Risk following the East Palestine, Ohio, Train Derailment.

Roles of DNA Target in Cancer Cell-Selective Cytotoxicity by Dicopper Complexes with DNA Target/Ligand Conjugates.

Pesticides exposure in pregnant Argentinian women: Potential relations with the residence areas and the anthropometric neonate parameters.

Synthesis, X-ray Structures, and Optical and Magnetic Properties of Cu(II) Octafluoro-octakis(perfluoro(isopropyl)phthalocyanine): The Effects of Electron Addition and Fluorine Accretion.

Protective effect of vitamin C against tetrachlorobenzoquinone-induced 5-hydroxymethylation-dependent apoptosis in HepG2 cells mainly via the mitochondrial apoptosis pathway.

Conservation linkages of endangered medicinal plant and exploration of phytochemicals, pharmaceutical screening and in silico validation against diabetics using in vivo wild and in vitro regenerated plant *Boucerosia diffusa* Wight.

Mechanistic investigation of the differential synergistic neurotoxicity between pesticide metam sodium and copper or zinc.

Effects of prometryn on oxidative stress, immune response and apoptosis in the hepatopancreas of *Eriocheir sinensis* (Crustacea: Decapoda).

Herbicide propisochlor exposure induces intestinal barrier impairment, microbiota dysbiosis and gut pyroptosis.

Long-term exposure to arsenic in drinking water leads to myocardial damage by oxidative stress and reduction in NO.

frpr-18, a neuropeptide receptor, regulates organismal lifespan and stress tolerance in *C. elegans*.

Novel 2-alkythio-4-chloro-N-[imino(heteroaryl)methyl]benzenesulfonamide Derivatives: Synthesis, Molecular Structure, Anticancer Activity and Metabolic Stability.

Dissecting the effects of paraquat-induced pulmonary injury in rats using UPLC-Q-TOF-MS/MS-based metabolomics.

Bensulide exposure causes cell division cycle arrest and apoptosis in porcine trophectoderm and uterine luminal epithelial cells.

Minocycline as a Neuroprotective Agent in Arsenic-Induced Neurotoxicity in PC12 Cells.

Arsenite-induced cytotoxicity is regulated by poly-ADP ribose polymerase 1 activation and parthanatos in p53-deficient H1299 cells: The roles of autophagy and p53.

Stevioside Improves Antioxidant Capacity and Intestinal Barrier Function while Attenuating Inflammation and Apoptosis by Regulating the NF- κ B/MAPK Pathways in Diquat-Induced Oxidative Stress of IPEC-J2 Cells.

Aggregation, Cytotoxicity and DNA Binding in a Series of Calix[4]arene Amphiphile Containing Aminotriazole Groups.

3-Pyrrolyl BODIPY Based Schiff Base Fluorophores: A Selective Chemodosimetric and Optical Sensor for Diethyl Chlorophosphate.

LV(V)O-Ethyl Maltol-Based Metallodrugs (L(2-) = Tridentate ONO Ligands): Hydrophobicity, Hydrolytic Stability, and Cytotoxicity via ROS-Mediated Apoptosis.

The effect of TiO₂(2)NPs on cloransulam-methyl toxicity to earthworm (*Eisenia fetida*).

Reproductive-Toxicity-Related Endpoints in *C. elegans* Are Consistent with Reduced Concern for Dimethylarsinic Acid Exposure Relative to Inorganic Arsenic.

Picolinafen exposure induces ROS accumulation and calcium depletion, leading to apoptosis in porcine embryonic trophectoderm and uterine luminal epithelial cells during the peri-implantation period.

Sodium arsenite-induced cytotoxicity is regulated by BNIP3L/Nix-mediated endoplasmic reticulum stress responses and CCPG1-mediated endoplasmic reticulum-phagy.

Oryzalin impairs maternal-fetal interaction during early pregnancy via ROS-mediated P38 MAPK/AKT and OXPHOS downregulation.

Small molecule agonist of mitochondrial fusion repairs mitochondrial dysfunction.

Recent Advances in Nanoparticle-Based Optical Sensors for Detection of Pesticide Residues in Soil.

Neuroprotective properties of borax against aluminum hydroxide-induced neurotoxicity: Possible role of Nrf-2/BDNF/AChE pathways in fish brain.

Endocrine disrupting activity in sewage sludge: Screening method, microbial succession and cost-effective strategy for detoxification.

Molecular and Biochemical Evidence of the Toxic Effects of Terbutylazine and Malathion in Zebrafish.

Biosynthesis and characterization of nanoparticles, its advantages, various aspects and risk assessment to maintain the sustainable agriculture: Emerging technology in modern era science.

SIRT1/PGC-1 \pm is involved in arsenic-induced male reproductive damage through mitochondrial dysfunction, which is blocked by the antioxidative effect of zinc.

Comparison of the chronic and multigenerational toxicity of racemic glufosinate and l-glufosinate to *Caenorhabditis elegans* at environmental concentrations.

Effects of p-cresol, a uremic toxin, on cancer cells.

Evaluation of covalent coupling strategies for immobilizing ligands on silica colloidal crystal films by optical interferometry.

Synthesis and herbicidal activity of optically active cinmethylin, its enantiomer, and C3-substituted cinmethylin analogs.

Development toxicity and cytotoxicity of pyroxsulam on embryos and adults of zebrafish (*Danio rerio*).

Melatonin Ameliorates Diquat-Induced Testicular Toxicity via Reducing Oxidative Stress, Inhibiting Apoptosis, and Maintaining the Integrity of Blood-Testis Barrier in Mice.

Concurrent bioimaging of microalgal photophysiology and oxidative stress.

Enhanced Glycolysis Confers Resistance Against Photon but Not Carbon Ion Irradiation in Human Glioma Cell Lines.

Analytical development for the assessment of pesticide contaminations in blood and plasma of wild birds: The case of grey partridges (*Perdix perdix*).

Protective effects of zingerone against sodium arsenite-induced lung toxicity: A multi-biomarker approach.

Gestational arsenic exposure induces anxiety-like behaviors in F1 female mice by dysregulation of neurological and immunological markers.

Andrographolide alleviates paraquat-induced acute lung injury by activating the Nrf2/HO-1 pathway.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces multigenerational alterations in the expression of microRNA in the thymus through epigenetic modifications.

A Novel Amphotericin B Hydrogel Composed of Poly(Vinyl Alcohol)/Borate Complex for Ophthalmic Formulation.

Effects of haloxyfop-p-methyl on the developmental toxicity, neurotoxicity, and immunotoxicity in zebrafish.

Glutathione Protects against Paraquat-Induced Oxidative Stress by Regulating Intestinal Barrier, Antioxidant Capacity, and CAR Signaling Pathway in Weaned Piglets.

Characterization of glyphosate-induced cardiovascular toxicity and apoptosis in zebrafish.

Signaling pathways involved in paraquat-induced pulmonary toxicity: Molecular mechanisms and potential therapeutic drugs.

Atrazine exposure induces necroptosis through the P450/ROS pathway and causes inflammation in the gill of common carp (*Cyprinus carpio*L.).

Tannic acid through ROS/TNF- α /TNFR 1 antagonizes atrazine induced apoptosis, programmed necrosis and immune dysfunction of grass carp hepatocytes.

2,4-Dichlorophenoxyacetic acid (2,4-D) affects DNA integrity and retina structure in zebrafish larvae.

Pendimethalin exposure induces bovine mammary epithelial cell death through excessive ROS production and alterations in the PI3K and MAPK signaling pathways.

Investigation of the toxicity of a glyphosate-based herbicide in a human liver cell line: Assessing the involvement of Nrf2 pathway and protective effects of vitamin E and α -lipoic acid.

Mechanism of 2,4-Dichlorophenoxyacetic acid-induced damage to rat testis via Fas/FasL pathway and the protective effect of *Lycium barbarum* polysaccharides.

Paraquat induces apoptosis, programmed necrosis, and immune dysfunction in CIK cells via the PTEN/PI3K/AKT axis.

Histopathological, immunohistochemical, and molecular investigation of atrazine toxic effect on some organs of adult male albino rats with a screening of *Acacia nilotica* as a protective trial.

Glyphosate, AMPA and glyphosate-based herbicide exposure leads to GFAP, PCNA and caspase-3 increased immunoreactive area on male offspring rat hypothalamus.

Lycopene Ameliorate Atrazine-Induced Oxidative Damage in the B Cell Zone via Targeting the miR-27a-3p/Foxo1 Axis.

Cyclooxygenase-2 activates the free radical-mediated apoptosis of polymorphonuclear leukocytes in the maneb- and paraquat-intoxicated rats.

Apigenin and apigenin-7, 4'-O-dioctanoate protect against acrolein-aggravated inflammation via inhibiting the activation of NLRP3 inflammasome and HMGB1/MYD88/NF- κ B signaling pathway in Human umbilical vein endothelial cells (HUVEC).

Glyphosate decreases bovine oocyte quality by inducing oxidative stress and apoptosis.

Degradation of commercial glyphosate-based herbicide via advanced oxidative processes in aqueous media and phytotoxicity evaluation using maize seeds.

Potential of paraquat toxicity by inhibition of the antioxidant defenses and protective effect of the natural antioxidant, 4-hydroxyisophthalic acid in *Drosophila melanogaster*.

Mitoquinone mitigates paraquat-induced A549 lung epithelial cell injury by promoting MFN1/MFN2-mediated mitochondrial fusion.

Ginsenoside Rg1 suppresses paraquat-induced epithelial cell senescence by enhancing autophagy in an ATG12-dependent manner.

Verbascoside inhibits paraquat-induced pulmonary toxicity via modulating oxidative stress, inflammation, apoptosis and DNA damage in A549 cell.

IL-6/STAT3/Foxo1 axis as a target of lycopene ameliorates the atrazine-induced thymic mitophagy and pyroptosis cross-talk.

[Study on the Protective effect and mechanism of Nicotinamide Riboside on lung injury in paraquat intoxicated mice].

Melatonin ameliorates renal dysfunction in glyphosate- and hard water-treated mice.

Effects of Curcumin on Mitochondrial Function, Endoplasmic Reticulum Stress, and Mitochondria-Associated Endoplasmic Reticulum Membranes in the Jejunum of Oxidative Stress Piglets.

Molecular Physicochemical Properties of Selected Pesticides as Predictive Factors for Oxidative Stress and Apoptosis-Dependent Cell Death in Caco-2 and HepG2 Cells.

Glyphosate-based herbicide causes spermatogenesis disorder and spermatozoa damage of the Chinese mitten crab (*Eriocheir sinensis*) by affecting testes characteristic enzymes, antioxidant capacities and inducing apoptosis.

Pterocarpus mildbraedii leaf extract ebbs propanil-induced oxidative and apoptotic damage in the liver of rats.

Pesticides Inhibit Retinoic Acid Catabolism in PLHC-1 and ZFL Fish Hepatic Cell Lines.

In vitro and in vivo cytotoxicity assessment of glyphosate and imazethapyr-based herbicides and their association.

Isorhapontigenin Modulates SOX9/TOLLIP Expression to Attenuate Cell Apoptosis and Oxidative Stress in Paraquat-Induced Acute Kidney Injury.

Ginkgolide C Alleviates Acute Lung Injury Caused by Paraquat Poisoning via Regulating the Nrf2 and NF- κ B Signaling Pathways.

Ameliorative potential of vitamin C and E against Roundup-glyphosate induced genotoxicity triggering apoptosis in caprine granulosa cells.

Cellular and Molecular Events Leading to Paraquat-Induced Apoptosis: Mechanistic Insights into Parkinson's Disease Pathophysiology.

Genome-wide identification, expression and functional analysis of the core cell cycle gene family during the early somatic embryogenesis of *Dimocarpus longan* Lour.

Developmental toxicity of glyphosate on embryo-larval zebrafish (*Danio rerio*).

A review of molecular mechanisms linked to potential renal injury agents in tropical rural farming communities.

miRNAs: A potentially valuable tool in pesticide toxicology assessment-current experimental and epidemiological data review.

2,4-dichlorophenoxyacetic acid induces ROS activation in NLRP3 inflammatory body-induced autophagy disorder in microglia and the protective effect of Lycium barbarum polysaccharide.

Vesicle transport related protein Synaptotagmin-1 mediates paraquat transport to antagonize paraquat toxicity.

Specialized Metabolites from the Allelopathic Plant *Retama raetam* as Potential Biopesticides.

Clinicohematological, Mutagenic, and Oxidative Stress Induced by Pendimethalin in Freshwater Fish Bighead Carp (*Hypophthalmichthys nobilis*).

Toxic Effects of Glyphosate on the Nervous System: A Systematic Review.

[Dynamic changes of locus coeruleus damage in Parkinson's disease-like mice induced by paraquat].

Atrazine exposure and recovery alter the intestinal structure, bacterial composition and intestinal metabolites of male *Pelophylax nigromaculatus*.

Comparison of the Toxicological Effects of Pesticides in Non-Tumorigenic MCF-12A and Tumorigenic MCF-7 Human Breast Cells.

Ameliorative effect of N-acetylcysteine on the testicular tissue of adult male albino rats after glyphosate-based herbicide exposure.

Mechanisms of acrolein induces toxicity in human umbilical vein endothelial cells: Oxidative stress, DNA damage response, and apoptosis.

Lycopene ameliorates atrazine-induced pyroptosis in spleen by suppressing the Ox-mtDNA/Nlrp3 inflammasome pathway.

Protective effect of dexamethasone against paraquat-triggered toxicity in A549 cells through inhibiting inflammation, apoptosis and TGF- β 1/Smad3 pathway.

Resveratrol exhibits neuroprotection against paraquat-induced PC12 cells via heme oxygenase 1 upregulation by decreasing MiR-136-5p expression.

Phenolic-rich extract of avocado *Persea americana* (var. Colinred) peel blunts paraquat/maneb-induced apoptosis through blocking phosphorylation of LRRK2 kinase in human nerve-like cells.

Acute exposure to paraquat affects the phenotypic differentiation of substantia nigra microglia in rats.

A Novel Algicidal Bacterium, *Microbulbifer* sp. YX04, Triggered Oxidative Damage and Autophagic Cell Death in *Phaeocystis globosa*, Which Causes Harmful Algal Blooms.

Exploring the molecular mechanisms of the inhibition of acrolein-induced BEAS-2B cytotoxicity by luteolin using network pharmacology and cell biology technology.

Paraquat exposure impairs porcine oocyte meiotic maturation.

Benchmark dose and the adverse effects of exposure to pendimethalin at low dose in female rats.

Toxicity mechanism of acrolein on DNA damage and apoptosis in BEAS-2B cells: Insights from cell biology and molecular docking analyses.

Resveratrol protected acrolein-induced ferroptosis and insulin secretion dysfunction via ER-stress-related PERK pathway in MIN6 cells.

Silymarin protects the rats against paraquat-induced acute kidney injury via Nrf2.

The potential risks of herbicide butachlor to immunotoxicity via induction of autophagy and apoptosis in the spleen.

Prediction of optical coherence tomography-detected calcified nodules using coronary computed tomography angiography.

Cinnamaldehyde causes developmental neurotoxicity in zebrafish via the oxidative stress pathway that is rescued by astaxanthin.

The Therapeutic Roles of Cinnamaldehyde against Cardiovascular Diseases.

Acrolein plays a culprit role in the pathogenesis of diabetic nephropathy in vitro and in vivo.

Protective Effects of Cinnamaldehyde on the Oxidative Stress, Inflammatory Response, and Apoptosis in the Hepatocytes of Salmonella Gallinarum-Challenged Young Chicks.

The Antitumor Effect of Cinnamaldehyde Derivative CB-PIC in Hepatocellular Carcinoma Cells via Inhibition of Pyruvate and STAT3 Signaling.

Efficacy of N-acetyl-L-cysteine against glyphosate induced oxidative stress and apoptosis in testicular germ cells preventing infertility.

[Clinical features of 86 cases of acute diquat poisoning].

Mechanisms of cinnamic aldehyde against myocardial ischemia/hypoxia injury in vivo and in vitro: Involvement of regulating PI3K/AKT signaling pathway.

MyD88 deficiency ameliorates weight loss caused by intestinal oxidative injury in an autophagy-dependent mechanism.

Cinnamaldehyde Downregulation of Sept9 Inhibits Glioma Progression through Suppressing Hif-1 α via the Pi3k/Akt Signaling Pathway.

Anticancer Effects of Cinnamaldehyde Through Inhibition of ErbB2/HSF1/LDHA Pathway in 5637 Cell Line of Bladder Cancer.

Interactive effects of high temperature and pesticide exposure on oxidative status, apoptosis, and renin expression in kidney of goldfish: Molecular and cellular mechanisms of widespread kidney damage and renin attenuation.

Using Computational Drug-Gene Analysis to Identify Novel Therapeutic Candidates for Retinal Neuroprotection.

Fluroxypyr-1-methylheptyl ester induced ROS production and mitochondrial apoptosis through the MAPK signaling cascade in porcine trophectoderm and uterine luminal epithelial cells.

A reactive oxygen species-replenishing coordination polymer nanomedicine disrupts redox homeostasis and induces concurrent apoptosis-ferroptosis for combinational cancer therapy.

The shikimate pathway regulates programmed cell death.

[Effects of arsenic and its main metabolites on A549 cell apoptosis and the expression of pro-apoptotic genes Bad and Bik].

ROS-mediated PPAR/RXR inhibition contributes to acetochlor-induced apoptosis and autophagy in *Ctenopharyngodon idella* hepatic cells.

Thymol and trans-cinnamaldehyde induce apoptosis through a metacaspase-dependent mitochondrial pathway in food-spoilage yeast *Zygosaccharomyces rouxii*.

Ablation of FUNDC1-dependent mitophagy renders myocardium resistant to paraquat-induced ferroptosis and contractile dysfunction.

Ethalfuralin impairs implantation by aggravation of mitochondrial viability and function during early pregnancy.

Dinitramine induces implantation failure by cell cycle arrest and mitochondrial dysfunction in porcine trophectoderm and luminal epithelial cells.

Methyl Viologens of Bis-(4'-Pyridylethynyl)Arenes - Structures, Photophysical and Electrochemical Studies, and their Potential Application in Biology.

Combined effects of S-metolachlor and benoxacor on embryo development in zebrafish (*Danio rerio*).

Acid-Responsive Micelles Releasing Cinnamaldehyde Enhance RSL3-Induced Ferroptosis in Tumor Cells.

The effects of aerobic exercise training with octopamine supplementation on cardiomyocyte apoptosis induced by deep-frying oil: The role of caspase and procaspase 3.

Metabolic Investigation on the Interaction Mechanism between Dietary Dihydrochalcone Intake and Lipid Peroxidation Product Acrolein Reduction.

Metabolomics insight into the influence of environmental factors in responses of freshwater biofilms to the model herbicide diuron.

Comparison of modes of action between fish, cell and mitochondrial toxicity based on toxicity correlation, excess toxicity and QSAR for class-based compounds.

Design, Synthesis and Antiproliferative Evaluation of Bis-Indole Derivatives with a Phenyl Linker: Focus on Autophagy.

TIPARP is involved in the regulation of intraocular pressure.

[Expression and Regulatory Mechanism of Autophagy-related Genes in Synovial Tissues of Patients with Rheumatoid Arthritis].

The oxidative stress, mitochondrial pathway apoptosis, and the antagonistic effects of chrysophanol in SH-SY5Y cells via DTPP-induced photodynamic therapy.

Boron attenuated diethylnitrosamine induced hepatocellular carcinoma in C3H/HeN mice via alteration of oxidative stress and apoptotic pathway.

Flurochloridone induced abnormal spermatogenesis by damaging testicular Sertoli cells in mice.

Ferrous sulfate-loaded hydrogel cures Staphylococcus aureus infection via facilitating a ferroptosis-like bacterial cell death in a mouse keratitis model.

Thiobencarb induces phenotypic abnormalities, apoptosis, and cardiovascular toxicity in zebrafish embryos through oxidative stress and inflammation.

2,4-Dinitrophenol as an Uncoupler Augments the Anthracyclines Toxicity against Prostate Cancer Cells.

Preparation and inhibitory effect of salicin dimethyl ether in Laryngeal cancer cells through the apoptosis activation.

Physicochemical and microbiological stability of insulin eye drops in an artificial tear vehicle used in the treatment of refractory neurotrophic keratopathy.

Transcriptomics analysis of human iPSC-derived dopaminergic neurons reveals a novel model for sporadic Parkinson's disease.

Damaged DNA Is an Early Event of Neurodegeneration in Induced Pluripotent Stem Cell-Derived Motoneurons with UBQLN2(P497H) Mutation.

The SH-SY5Y human neuroblastoma cell line, a relevant in vitro cell model for investigating neurotoxicology in human: Focus on organic pollutants.

The effect of iron sulfate nanoparticles and their fortified bread on Wistar rats and human cell lines.

M1-linked ubiquitination facilitates NF- κ B activation and survival during sterile inflammation.

Damage of uremic myocardium by p-cresyl sulfate and the ameliorative effect of Klotho by regulating SIRT6 ubiquitination.

Carboxymethylation of Desmodium styracifolium Polysaccharide and Its Repair Effect on Damaged HK-2 Cells.

Prenatal ambient pesticide exposure and childhood retinoblastoma.

Highly water-dispersible PCN nanosheets as light-controlled lysosome self-promoting escape type non-cationic gene carriers for tumor therapy.

Characterization of Developmental Neurobehavioral Toxicity in a Zebrafish MPTP-Induced Model: A Novel Mechanism Involving Anemia.

Flurochloridone induces responses of free radical reactions and energy metabolism disorders to BRL-3A cell.

Radiosynthesis and characterization of a carbon-11 PET tracer for receptor-interacting protein kinase 1.

Eyelid malignancies in young individuals: clinical peculiarities.

Gut-derived bacterial toxins impair memory CD4+ T cell mitochondrial function in HIV-1 infection.

Casein kinase I inhibitor D4476 influences autophagy and apoptosis in chloroquine-induced adult retinal pigment epithelial-19Å cells.

Lactic acid bacteria feeding reversed the malformed eye structures and ameliorated gut microbiota profiles of *Drosophila melanogaster* Alzheimer's disease model.

Arsenic alters nitric oxide signaling similar to autism spectrum disorder and Alzheimer's disease-associated mutations.

Nontoxic Metal-Free Visible Light-Responsive Carbon Nitride Quantum Dots Cause Oxidative Stress and Cancer-Specific Membrane Damage.

Oxidative stress-induced alterations in retinal glucose metabolism in Retinitis Pigmentosa.

Iron contributes to photoreceptor degeneration and Müller glia proliferation in the zebrafish light-treated retina.

Tryptophan Metabolites Regulate Neuropentraxin 1 Expression in Endothelial Cells.

Histological and Immunohistochemical Studies to Determine the Mechanism of Cleft Palate Induction after Palatal Fusion in Mice Exposed to TCDD.

Cold Atmospheric Plasma Apoptotic and Oxidative Effects on MCF7 and HCC1806 Human Breast Cancer Cells.

Arsenic compounds induce apoptosis by activating the MAPK and caspase pathways in FaDu oral squamous carcinoma cells.

Ubiquitinated gasdermin D mediates arsenic-induced pyroptosis and hepatic insulin resistance in rat liver.

Impact of Uremic Toxins on Endothelial Dysfunction in Chronic Kidney Disease: A Systematic Review.

Development and Characterization of Curcumin-Silver Nanoparticles as a Promising Formulation to Test on Human Pterygium-Derived Keratinocytes.

False-negative chemicals in ESR-based photosafety test (ESR-PT) and their significance for photosafety evaluations: examples of bithionol, fenticlor and cilnidipine.

Minocycline improves the functional recovery after traumatic brain injury via inhibition of aquaporin-4.

Sodium arsenite-mediated upregulation of circDHX34 promotes apoptosis in hormone-independent breast cancer cells by regulating apoptotic genes.

The impact of left truncation of exposure in environmental case-control studies: evidence from breast cancer risk associated with airborne dioxin.

Acrolein-inducing ferroptosis contributes to impaired peripheral neurogenesis in zebrafish.

Treatment with MDL 72527 Ameliorated Clinical Symptoms, Retinal Ganglion Cell Loss, Optic Nerve Inflammation, and Improved Visual Acuity in an Experimental Model of Multiple Sclerosis.

Toxic effects of pesticides on cellular and humoral immunity: an overview.

Proper modulation of AHR signaling is necessary for establishing neural connectivity and oligodendrocyte precursor cell development in the embryonic zebrafish brain.

Glycine Alleviated Intestinal Injury by Inhibiting Ferroptosis in Piglets Challenged with Diquat.

Optical characteristics of the skin with dark circles using pump-probe imaging.

Aclonifen could induce implantation failure during early embryonic development through apoptosis of porcine trophoblast and uterine luminal epithelial cells.

Ethoxyquin is a Competent Radical-Trapping Antioxidant for Preventing Ferroptosis in Doxorubicin Cardiotoxicity.

Acidifiers Attenuate Diquat-Induced Oxidative Stress and Inflammatory Responses by Regulating NF- κ B/MAPK/COX-2 Pathways in IPEC-J2 Cells.

Effects of Iron on oxidative stress of *Cecropia hololeuca* and *Carica papaya* plants.

Idiopathic unilateral third nerve palsy with pupillary sparing in 10-year-old child -a case report.

Pendimethalin induces apoptotic cell death through activating ER stress-mediated mitochondrial dysfunction in human umbilical vein endothelial cells.

Isoforms of the transcriptional cofactor SIN3 differentially regulate genes necessary for energy metabolism and cell survival.

The efficacy of hemodialysis on paraquat poisoning mortality: A systematic review and meta-analysis.

In Vitro Induction of Eryptosis by Uremic Toxins and Inflammation Mediators in Healthy Red Blood Cells.

Finding Fluorine: Photoproduct Formation during the Photolysis of Fluorinated Pesticides.

Borax relieved the acrylamide-induced hematotoxic, hepatotoxic, immunotoxic and genotoxic damages in rainbow trout by regulating apoptosis and Nrf2 signaling pathway.

Bisphenol A and 2,3,7,8-tetrachlorodibenzo-p-dioxin at non-cytotoxic doses alter the differentiation potential and cell function of rat adipose-stem cells.

Cytotoxic and Apoptotic Effects of the Combination of Borax (Sodium Tetraborate) and 5-Fluorouracil on DLD-1 Human Colorectal Adenocarcinoma Cell Line.

Transcriptomic analysis of deceptively pollinated *Arum maculatum* (Araceae) reveals association between terpene synthase expression in floral trap chamber and species-specific pollinator attraction.

DFT, hirshfeld and molecular docking studies of a hybrid compound - 2,4-Diamino-6-methyl-1,3,5-triazin-1-ium hydrogen oxalate as a promising anti-breast cancer agent.

Gamma-Ray-Induced Structural Transformation of QDs towards the Improvement of Their Optical Properties, Monitoring of Selected Toxic Compounds, and Photo-Induced Effects on Bacterial Strains.

Supporting discovery and development of medical countermeasures for chemical injury to eye and skin.

Tetrachlorobisphenol A mediates reproductive toxicity in *Caenorhabditis elegans* via DNA damage-induced apoptosis.

Insights into the day-night sources and optical properties of coastal organic aerosols in southern China.

Insight into 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced disruption of zebrafish spermatogenesis via single cell RNA-seq.

[Rat serum containing oxymatrine inhibits the proliferation of LX2 human hepatic stellate cells induced by sodium arsenite via blocking PI3K/AKT pathway].

Borax exerts protective effect against ferrocene-induced neurotoxicity in *Oncorhynchus mykiss*.

Melatonin Prevents NaAsO₂-Induced Developmental Cardiotoxicity in Zebrafish through Regulating Oxidative Stress and Apoptosis.

Development and Automation of a Bacterial Biosensor to the Targeting of the Pollutants Toxic Effects by Portable Raman Spectrometer.

Effect of cyanocobalamin (vitamin B12) on paraquat-induced brain injury in mice.

Comparing ultrafast excited state quenching of flavin 1,N(6)-ethenoadenine dinucleotide and flavin adenine dinucleotide by optical spectroscopy and DFT calculations.

Glycine alleviated diquat-induced hepatic injury via inhibiting ferroptosis in weaned piglets.

Polyphenols Sourced from *Ilex latifolia* Thunb. Relieve Intestinal Injury via Modulating Ferroptosis in Weanling Piglets under Oxidative Stress.

Novel Imidazole Phenoxyacetic Acids as Inhibitors of USP30 for Neuroprotection Implication via the Ubiquitin-Rho-110 Fluorometric Assay: Design, Synthesis, and In Silico and Biochemical Assays.

Tea polyphenols alleviates acetochlor-induced apoptosis and necroptosis via ROS/MAPK/NF- κ B signaling in *Ctenopharyngodon idellus* kidney cells.

Evaluation of the Acute Effects of Arsenic on Adults of the Neotropical Native Fish *Cnesterodon decemmaculatus* Using a Set of Biomarkers.

Cytotoxic effects of Roundup Classic and its components on NE-4C and MC3T3-E1 cell lines determined by biochemical and flow cytometric assays.

[A case of occupational allyl alcohol inhalation poisoning].

The Potential Role of Mitochondrial Acetaldehyde Dehydrogenase 2 in Urological Cancers From the Perspective of Ferroptosis and Cellular Senescence.

Atrazine and Diuron Effects on Survival, Embryo Development, and Behavior in Larvae and Adult Zebrafish.

Dimethyl sulfoxide stimulates the AhR-Jdp2 axis to control ROS accumulation in mouse embryonic fibroblasts.

Diquat Poisoning: Care Management and Medico-Legal Implications.

Sodium arsenite accelerates D-galactose-induced aging in the testis of the rat: Evidence for mitochondrial oxidative damage, NF- κ B, JNK, and apoptosis pathways.

Enhancement of cancer-cell-selective cytotoxicity by a dicopper complex with a phenanthrene amide-tether ligand conjugate via mitochondrial apoptosis.

Mechanical characterization and optical microscopy of homemade slime and the effect of some common household products.

Paraquat modulates immunological function in bone marrow-derived macrophages.

More than Meets the Eye: The Aryl Hydrocarbon Receptor is an Environmental Sensor, Physiological Regulator and a Therapeutic Target in Ocular Disease.

Laser-induced choroidal neovascularization detected on optical coherence tomography angiography in patients with diabetic retinopathy.

Aquatic photolysis of 2,4-dichloro-6-nitrophenol-the toxic nitrated byproduct of 2,4-dichlorophenol.

Role of ACSL4 in the chemical-induced cell death in human proximal tubule epithelial HK-2 cells.

α -Tocopherol Prevents Sperm Apoptosis and Necrosis in Rats Exposed to 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Hybridized 4-Trifluoromethyl-(1,2,3-triazol-1-yl)quinoline System: Synthesis, Photophysics, Selective DNA/HSA Bio-interactions and Molecular Docking.

Pharmacological Inhibition of Spermine Oxidase Suppresses Excitotoxicity Induced Neuroinflammation in Mouse Retina.

Aclonifen induces bovine mammary gland epithelial cell death by disrupting calcium homeostasis and inducing ROS production.

Altered transsulfuration pathway enzymes and redox homeostasis in inherited retinal degenerative diseases.

Optical coherence tomography as an alternative tool for evaluating the effects of glyphosate on hybrid catfish (*Clarias gariepinus* \times *Clarias macrocephalus*).

Calycosin Alleviates Paraquat-Induced Neurodegeneration by Improving Mitochondrial Functions and Regulating Autophagy in a *Drosophila* Model of Parkinson's Disease.

Glutathione protects against the meiotic defects of ovine oocytes induced by arsenic exposure via the inhibition of mitochondrial dysfunctions.

Simazine perturbs the maturational competency of mouse oocyte through inducing oxidative stress and DNA damage.

Arsenite-induced cytotoxicity is regulated by p38-SQSTM1/p62 and JNK-BNIP3L/Nix signaling in lung cancer cells.

Arctigenin attenuates paraquat-induced human lung epithelial A549 cell injury by suppressing ROS/p38 mitogen-activated protein kinases-mediated apoptosis.

Fluroxypyr-1-methylheptyl ester causes apoptosis of bovine mammary gland epithelial cells by regulating PI3K and MAPK signaling pathways and endoplasmic reticulum stress.

Identification of known and novel nonpolar endocrine disruptors in human amniotic fluid.

Germ cell apoptosis is critical to maintain *Caenorhabditis elegans* offspring viability in stressful environments.

Chaperon-mediated autophagy can regulate diquat-induced apoptosis by inhibiting α -synuclein accumulation cooperatively with macroautophagy.

LncRNA MIAT Inhibits MPP(+)-Induced Neuronal Damage Through Regulating the miR-132/SIRT1 Axis in PC12 Cells.

Long Noncoding RNA NEAT1 Knockdown Ameliorates 1-Methyl-4-Phenylpyridine-Induced Cell Injury Through MicroRNA-519a-3p/SP1 Axis in Parkinson Disease.

Berberine Attenuates MPP(+)-Induced Neuronal Injury by Regulating LINC00943/miR-142-5p/KPNA4/NF- κ B Pathway in SK-N-SH Cells.

Contact allergy to fragrance mix I and its components in individuals with photocontact allergy to ketoprofen.

Acute exposition to Roundup Transorb[®] induces systemic oxidative stress and alterations in the expression of newly sequenced genes in silverside fish (*Odontesthes humensis*).

Inflammatory, Oxidative Stress, and Apoptosis Effects in Zebrafish Larvae after Rapid Exposure to a Commercial Glyphosate Formulation.

Thioredoxin-1 mediates neuroprotection of Schisanhenol against MPP(+)-induced apoptosis via suppression of ASK1-P38-NF- κ B pathway in SH-SY5Y cells.

Bacopaside-I Alleviates the Detrimental Effects of Acute Paraquat Intoxication in the Adult Zebrafish Brain.

The effect of atrazine on intestinal histology, microbial community and short chain fatty acids in *Pelophylax nigromaculatus* tadpoles.

Bidirectional role of reactive oxygen species during inflammasome activation in acrolein-induced human EAhy926 cells pyroptosis.

Exposure to the herbicide butachlor activates hepatic stress signals and disturbs lipid metabolism in mice.

One-Pot Synthesis of TiO₂-rGO Photocatalysts for the Degradation of Groundwater Pollutants.

Pectin/chitosan/tripolyphosphate encapsulation protects the rat lung from fibrosis and apoptosis induced by paraquat inhalation.

Global transcriptome profiling reveals antagonizing response of head kidney of juvenile common carp exposed to glyphosate.

Co-formulants and adjuvants affect the acute aquatic and terrestrial toxicity of a cycloxydim herbicide formulation to European common frogs (*Rana temporaria*).

Impact of feed glyphosate residues on broiler breeder egg production and egg hatchability.

Paraquat-induced cholesterol biosynthesis proteins dysregulation in human brain microvascular endothelial cells.

Prolonged exposure to the herbicide atrazine suppresses immune cell functions by inducing spleen cell apoptosis in rats.

Effects of sulfometuron-methyl on zebrafish at early developmental stages.

Protective Activity of Aspirin Eugenol Ester on Paraquat-Induced Cell Damage in SH-SY5Y Cells.

Kaempferol attenuates diquat-induced oxidative damage and apoptosis in intestinal porcine epithelial cells.

Evaluation of atrazine neurodevelopment toxicity in vitro-application of hESC-based neural differentiation model.

Effect of atrazine on accumulation of iron via the iron transport proteins in the midbrain of SD rats.

Effects of the herbicide Irgarol 1051 on the transcriptome of hermatypic coral *Acropora tenuis* and its symbiotic dinoflagellates.

Atrazine Inhalation Causes Neuroinflammation, Apoptosis and Accelerating Brain Aging.

Overexpression of TOLLIP Protects against Acute Kidney Injury after Paraquat Intoxication through Inhibiting NLRP3 Inflammasome Activation Modulated by Toll-Like Receptor 2/4 Signaling.

New Target in an Old Enemy: Herbicide (R)-Dichlorprop Induces Ferroptosis-like Death in Plants.

Exposure to Atrazine Induces Lung Inflammation through Nrf2-HO1 and Beclin 1/LC3 Pathways.

Exposure to sublethal concentrations of the glyphosate-based herbicide Faena[®] increases sensitivity in the progeny of the American cladoceran *Daphnia exilis* (Herrick, 1895).

Meta-analysis and experimental validation identified atrazine as a toxicant in the male reproductive system.

Neuroprotective effect of selumetinib on acrolein-induced neurotoxicity.

Genotoxicity of chloroacetamide herbicides and their metabolites *in vitro* and *in vivo*.

Isorhynchophylline ameliorates paraquat-induced acute kidney injury by attenuating oxidative stress and mitochondrial damage via regulating toll-interacting expression.

Atrazine-induced cell-mediated immunotoxicity in rabbits and the ameliorating role of glycyrrhizic acid.

The hepatotoxicity of atrazine exposure in mice involves the intestinal microbiota.

Atrazine impairs testicular function in BalB/c mice by affecting Leydig cells.

Carryover effect of atrazine and its metabolite from treated bovine spermatozoa to the embryo's transcriptome.

An Experimental Approach to Study the Effects of Realistic Environmental Mixture of Linuron and Propamocarb on Zebrafish Synaptogenesis.

Aspirin eugenol ester ameliorates paraquat-induced oxidative damage through ROS/p38-MAPK-mediated mitochondrial apoptosis pathway.

Mutagenicity and genotoxicity in juvenile African catfish, *Clarias gariepinus* exposed to formulations of glyphosate and paraquat.

Melatonin rescues the reproductive toxicity of low-dose glyphosate-based herbicide during mouse oocyte maturation via the GPER signaling pathway.

Glutathione is a potential therapeutic target for acrolein toxicity in the cornea.

Paraquat-activated BV-2 microglia induces neuroinflammatory responses in the neuron model through NF- κ B signaling pathway.

Modulation of BAG3 expression in human normal urothelial cells by Diuron.

Protection by rhynchophylline against MPTP/MPP(+)-induced neurotoxicity via regulating PI3K/Akt pathway.

Low-Cost Chlorophyll Fluorescence Imaging for Stress Detection.

Investigation of *in vivo* unscheduled DNA synthesis in rabbit corneas following instillation of genotoxic agents.

The herbicide dinitramine affects the proliferation of murine testicular cells via endoplasmic reticulum stress-induced calcium dysregulation.

Huang Lian Jie Du Tang attenuates paraquat-induced mitophagy in human SH-SY5Y cells: A traditional decoction with a novel therapeutic potential in treating Parkinson's disease.

LncRNA XIST sponges miR-199a-3p to modulate the Sp1/LRRK2 signal pathway to accelerate Parkinson's disease progression.

Paraquat exposure over generation affects lifespan and reproduction through mitochondrial disruption in *C. elegans*.

Melatonin alleviates the deterioration of oocytes and hormonal disorders from mice subjected to glyphosate.

Neurotoxicity associated with chronic exposure to dichlorophenoxyacetic acid (2,4-D) - a simulation of environmental exposure in adult rats.

The herbicide paraquat-induced molecular mechanisms in the development of acute lung injury and lung fibrosis.

Picolinafen exerts developmental toxicity via the suppression of oxidative stress and angiogenesis in zebrafish embryos.

Assessing the toxicity of three "inert" herbicide safeners toward *Danio rerio*: Effects on embryos development.

HSPB5 (β -crystallin) confers protection against paraquat-induced oxidative stress at the organismal level in a tissue-dependent manner.

Inorganic arsenic influences cell apoptosis by regulating the expression of MEG3 gene.

Resveratrol: Isolation, and Its Nanostructured Lipid Carriers, Inhibits Cell Proliferation, Induces Cell Apoptosis in Certain Human Cell Lines Carcinoma and Exerts Protective Effect Against Paraquat-Induced Hepatotoxicity.

MSBA-S - A pentacyclic sulfamate as a new option for radiotherapy of human breast cancer cells.

Biofunctional chemistry and reactivity of biogenic acrolein for cancer diagnosis and therapy.

Coniferyl aldehyde alleviates LPS-induced WI-38 cell apoptosis and inflammation injury via JAK2-STAT1 pathway in acute pneumonia.

Reduced Acrolein Detoxification in *akr1a1a* Zebrafish Mutants Causes Impaired Insulin Receptor Signaling and Microvascular Alterations.

Celecoxib promotes survival and upregulates the expression of neuroprotective marker genes in two different in vitro models of Parkinson's disease.

ERK Phosphorylation Regulates the Aml1/Runx1 Splice Variants and the TRP Channels Expression during the Differentiation of Glioma Stem Cell Lines.

Small molecules baicalein and cinnamaldehyde are potentiators of measles virus-induced breast cancer oncolysis.

Ferritinophagy-Mediated Ferroptosis Involved in Paraquat-Induced Neurotoxicity of Dopaminergic Neurons: Implication for Neurotoxicity in PD.

Cinnamaldehyde and hesperetin attenuate TNBS-induced ulcerative colitis in rats through modulation of the JAK2/STAT3/SOCS3 pathway.

Neuroprotective effects of pomegranate (*Punica granatum* L.) juice and seed extract in paraquat-induced mouse model of Parkinson's disease.

Protective Effects of Cinnamaldehyde on the Inflammatory Response, Oxidative Stress, and Apoptosis in Liver of *Salmonella typhimurium*-Challenged Mice.

Coniferaldehyde prevents articular cartilage destruction in a murine model via Nrf2/HO-1 pathway.

Polyamine biomarkers as indicators of human disease.

Thal protects against paraquat-induced lung injury through a microRNA-141/HDAC6/IL-1 β -NF- κ B axis in rat and cell models.

Effects of low-concentration glyphosate and aminomethyl phosphonic acid on zebrafish embryo development.

An indicator displacement assay-based optical chemosensor for heparin with a dual-readout and a reversible molecular logic gate operation based on the pyranine/methyl viologen.

Transmission electron microscopic analysis of glyphosate induced cytotoxicity and its attenuation by N-acetyl-L-cysteine in caprine testicular germ cells in vitro.

Identification of adducts formed between acrolein and alanine or serine in fried potato crisps and the cytotoxicity-lowering effect of acrolein in three cell lines.
