Currently used pesticides and their mixtures affect the function of sex hormone receptors and aromatase enzyme activity.

Dose-response of diuron [3-(3,4-dichlorophenyl)-1,1-dimethylurea] in the urothelial mucosa of Wistar rats.

Effect of acrolein, a hazardous air pollutant in smoke, on human middle ear epithelial cells.

Inhibitory effects of rosiglitazone on paraquat-induced acute lung injury in rats.

Oxidative stress-induced mutagenesis in single-strand DNA occurs primarily at cytosines and is DNA polymerase zeta-dependent only for adenines and guanines.

Hazard-ranking of agricultural pesticides for chronic health effects in Yuma County, Arizona.

Effect of methylsulfonylmethane on paraquat-induced acute lung and liver injury in mice.

Levels of PCDDs, PCDFs, and dioxin-like PCBs in human milk among Hong Kong mothers.

Paraquat poisoning induces TNF- α -dependent iNOS/NO mediated hyporesponsiveness of the aorta to vasoconstrictors in rats.

Agent Orange exposure and prevalence of self-reported diseases in Korean Vietnam veterans.

Curcumin protects neuronal-like cells against acrolein by restoring Akt and redox signaling pathways.

Infant dietary exposure to dioxins and dioxin-like compounds in Greece.

Glyphosate induces human breast cancer cells growth via estrogen receptors.

The relationship between Agent Orange and prostate specific antigen: a comparison of a hotspot and a non-sprayed area in Vietnam.

Chemical compositions, phytotoxicity, and biological activities of Acorus calamus essential oils from Nepal.

Agent Orange as a risk factor for high-grade prostate cancer.

Effects of the herbicide atrazine in neotropical catfish (*Rhamdia quelen*).

Magnolol protects against oxidative stress-mediated neural cell damage by modulating mitochondrial dysfunction and PI3K/Akt signaling.

Exposure to herbicides in house dust and risk of childhood acute lymphoblastic leukemia.

MicroRNA-195 targets ADP-ribosylation factor-like protein 2 to induce apoptosis in human embryonic stem cell-derived neural progenitor cells.

PACAP deficiency sensitizes nigrostriatal dopaminergic neurons to paraquat-induced damage and modulates central and peripheral inflammatory activation in mice.

Propanil-induced histopathological changes in the liver and kidney of mice.

Specific pesticide-dependent increases in α -synuclein levels in human neuroblastoma (SH-SY5Y) and melanoma (SK-MEL-2) cell lines.

Assessing eco-toxicological effects of industrial 2,4-D acid iso-octylester herbicide on rat pancreas and liver.

Plurality of opinion, scientific discourse and pseudoscience: an in depth analysis of the SÃ©ralini et al. study claiming that Roundupâ„¸ Ready corn or the herbicide Roundupâ„¸ cause cancer in rats.

In vitro effects of aldehydes present in tobacco smoke on gene expression in human lung alveolar epithelial cells.

Transcriptome alterations following developmental atrazine exposure in zebrafish are associated with disruption of neuroendocrine and reproductive system function, cell cycle, and carcinogenesis.

Effects of trifluralin on the mouse ovary.

Differential toxicity and gene expression in Caco-2 cells exposed to arsenic species.

Effect of dietary treatment with dimethylarsinous acid (DMA(III)) on the urinary bladder epithelium of arsenic (+3 oxidation state) methyltransferase (As3mt) knockout and C57BL/6 wild type female mice.

In vitro toxicological characterisation of the S-containing arsenic metabolites thio-dimethylarsinic acid and dimethylarsinic glutathione.

Urologic cancer risks for veterans exposed to Agent Orange.

[Effect of thalidomide in a mouse model of paraquat-induced acute lung injury and the underlying mechanisms].

A metal mixture induces transformation upon antioxidant depletion in a hepatic cell line.

Protein profiling of paraquat-exposed rat lungs following treatment with Acai (*Euterpe oleracea* Mart.) berry extract.

Mutagenic/recombinogenic effects of four lipid peroxidation products in *Drosophila*.

We request a serious reconsideration of the recent paper by Seralini et al. alleging tumorigenesis in rats resulting from consumption of corn derived from crops improved through biotechnology (Seralini et al., 2012).

Atrazine and cancer: a review of the epidemiologic evidence.

Doxorubicin decreases paraquat accumulation and toxicity in Caco-2 cells.

Functional GPR37 trafficking protects against toxicity induced by 6-OHDA, MPP+ or rotenone in a catecholaminergic cell line.

Inactivation of GAPDH as one mechanism of acrolein toxicity.

Biochemical and molecular mechanisms of N-acetyl cysteine and silymarin-mediated protection against maneb- and paraquat-induced hepatotoxicity in rats.

[Glyphosate and its formulations--toxicity, occupational and environmental exposure].

Genotoxic potential of two herbicides and their active ingredients assessed with comet assay on a fish cell line, epithelioma papillosum cyprini (EPC).

Historical long-term exposure to pentachlorophenol causing risk of cancer--a community study.

[Cytotoxic influence of chlorophenols on the root meristem cells of onion batuna seeds (*Allium fistulosum* L.)].

Risk of total and aggressive prostate cancer and pesticide use in the Agricultural Health Study.

Effect of CpG methylation at different sequence context on acrolein- and BPDE-DNA binding and mutagenesis.

The antidote effect of quinone oxidoreductase 2 inhibitor against paraquat-induced toxicity in vitro and in vivo.

Differential regulation of the rainbow trout (*Oncorhynchus mykiss*) MT-A gene by nuclear factor interleukin-6 and activator protein-1.

Slow accumulation of mutations in Xpc-/- mice upon induction of oxidative stress.

Comparative study of the possible protective effects of cinnamic acid and cinnamaldehyde on cisplatin-induced nephrotoxicity in rats.

Acrolein stimulates the synthesis of IL-6 and C-reactive protein (CRP) in thrombosis model mice and cultured cells.

Metabolic shift in lung alveolar cell mitochondria following acrolein exposure.

Human health risk from arsenical pesticide contaminated soils: a long-term greenhouse study.

SLCO1B1 variants and urine arsenic metabolites in the Strong Heart Family Study.

Protective effects of cinnamic acid and cinnamic aldehyde on isoproterenol-induced acute myocardial ischemia in rats.

Acrolein exposure suppresses antigen-induced pulmonary inflammation.

Anti-inflammatory effect of thalidomide in paraquat-induced pulmonary injury in mice.

Cinnamomum cassia essential oil inhibits α -MSH-induced melanin production and oxidative stress in murine B16 melanoma cells.

2-Amino-[1,2,4]triazolo[1,5-a]pyridines as JAK2 inhibitors.

Extracts from black carrot tissue culture as potent anticancer agents.

Glyphosate and AMPA inhibit cancer cell growth through inhibiting intracellular glycine synthesis.

Wnt/ β -catenin signaling protects mouse liver against oxidative stress-induced apoptosis through the inhibition of forkhead transcription factor FoxO3.

Identification of aldo-keto reductases as NRF2-target marker genes in human cells.

Mutagenic activation reduces carcinogenic activity of ortho-aminoazotoluene for mouse liver.

9-cis retinoic acid is the ALDH1A1 product that stimulates melanogenesis.

Acrolein-conjugated low-density lipoprotein induces macrophage foam cell formation.

Early growth response protein 1 upregulation and nuclear translocation by 2'-benzoyloxycinnamaldehyde induces prostate cancer cell death.

Arsenic speciation in saliva of acute promyelocytic leukemia patients undergoing arsenic trioxide treatment.

2-Hydroxycinnamaldehyde inhibits the epithelial-mesenchymal transition in breast cancer cells.

Secondary and tertiary sulfonamides: a patent review (2008 - 2012).

The ultra-early protective effect of ulinastatin on rabbit acute lung injury induced by paraquat.

Combined treatment with bone marrow mesenchymal stem cells and methylprednisolone in paraquat-induced acute lung injury.

Cinnamaldehyde-induced apoptosis in human hepatoma PLC/PRF/5 cells involves the mitochondrial death pathway and is sensitive to inhibition by cyclosporin A and z-VAD-fmk.

Paraquat inhibits cell viability via enhanced oxidative stress and apoptosis in human neural progenitor cells.

Repair kinetics of acrolein- and (E)-4-hydroxy-2-nonenal-derived DNA adducts in human colon cell extracts.

A cigarette component acrolein induces accelerated senescence in human diploid fibroblast IMR-90 cells.

Stimulation of suicidal erythrocyte death by trans-cinnamaldehyde.

Acetaldehyde-induced cytotoxicity involves induction of spermine oxidase at the transcriptional level.

Sub-acute exposure to the herbicide atrazine suppresses cell immune functions in adolescent mice.

In vitro intestinal bioavailability of arsenosugar metabolites and presystemic metabolism of thio-dimethylarsinic acid in Caco-2 cells.

Protective effects of dietary arginine supplementation against oxidative stress in weaned piglets.

Synthesis and biological evaluation of novel neuroprotective agents for paraquat-induced apoptosis in human neuronal SH-SY5Y cells.

Inhibitors of hydroperoxide metabolism enhance ascorbate-induced cytotoxicity.

Acrolein and chloroacetaldehyde: an examination of the cell and cell-free biomarkers of toxicity.

Antioxidant action of ellagic acid ameliorates paraquat-induced A549 cytotoxicity.

Assays for the measurement of lipid peroxidation.

High-throughput LC-MS/MS based simultaneous determination of polyamines including N-acetylated forms in human saliva and the diagnostic approach to breast cancer patients.

Singlet oxygen mediated DNA damage induced phototoxicity by ketoprofen resulting in mitochondrial depolarization and lysosomal destabilization.

Circulating soluble CD27 and CD30 in workers exposed to 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD).

Thiamin diphosphate-dependent enzymes: from enzymology to metabolic regulation, drug design and disease models.

Dioxin and estrogen signaling in lung adenocarcinoma cells with different aryl hydrocarbon receptor/estrogen receptor $\hat{\pm}$ phenotypes.

The dioxin receptor has tumor suppressor activity in melanoma growth and metastasis.

Role of mitogen-activated protein kinase cascades in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced apoptosis in neuronal pheochromocytoma cells.

Oxidative DNA damage and in vivo mutagenicity caused by reactive oxygen species generated in the livers of p53-proficient or -deficient gpt delta mice treated with non-genotoxic hepatocarcinogens.

Photosensitization of singlet oxygen and in vivo photodynamic therapeutic effects mediated by PEGylated W(18)O(49) nanowires.

Goat anti-rabbit IgG conjugated fluorescent dye-doped silica nanoparticles for human breast carcinoma cell recognition.

[Protective effects of exogenous reduced glutathione on sodium arsenite-induced genotoxicity and oxidative stress].

In vitro-in vivo correlations for endocrine activity of a mixture of currently used pesticides.

Ets1 and heat shock factor 1 regulate transcription of the Transformer 2¹² gene in human colon cancer cells.

Comparisons of differential gene expression elicited by TCDD, PCB126, \hat{I}^2 NF, or ICZ in mouse hepatoma Hepa1c1c7 cells and C57BL/6 mouse liver.

Involvement of HIF-2 \hat{I}^2 -mediated inflammation in arsenite-induced transformation of human bronchial epithelial cells.

Multiple pesticide exposures and the risk of multiple myeloma in Canadian men.

Death receptor 6 (DR6) antagonist antibody is neuroprotective in the mouse SOD1G93A model of amyotrophic lateral sclerosis.

A population-based case-control study of urinary arsenic species and squamous cell carcinoma in New Hampshire, USA.

Cytologic and histologic findings of iron pill-induced injury of the lower respiratory tract.

The mitochondrial dysfunction plays an important role in urethane-induced lung carcinogenesis.

Neuroprotective effects of nicotinamide N-methyltransferase and its metabolite 1-methylnicotinamide.

Dual role of resveratrol in modulation of genotoxicity induced by sodium arsenite via oxidative stress and apoptosis.

Arsenic induced toxicity and histopathological changes in gill and liver tissue of freshwater fish, tilapia (*Oreochromis mossambicus*).

CYP19 expression is induced by 2,3,7,8-tetrachloro-dibenzo-para-dioxin in human glioma cells.

Addressing historic environmental exposures along the Alaska Highway.

Aromatic hydrocarbon receptor inhibits lysophosphatidic acid-induced vascular endothelial growth factor-A expression in PC-3 prostate cancer cells.

Malassezia yeasts produce a collection of exceptionally potent activators of the Ah (dioxin) receptor detected in diseased human skin.

Modulation of natural killer cell antitumor activity by the aryl hydrocarbon receptor.

The aryl hydrocarbon receptor and estrogen receptor alpha differentially modulate nuclear factor erythroid-2-related factor 2 transactivation in MCF-7 breast cancer cells.

Transgenic indica rice lines, expressing Brassica juncea Nonexpressor of pathogenesis-related genes 1 (BjNPR1), exhibit enhanced resistance to major pathogens.

Temperature increase exacerbates apoptotic neuronal death in chemically-induced ischemia.

TCDD induces the expression of insulin-like growth factor binding protein 4 in 5L rat hepatoma cells: a cautionary tale of the use of this cell line in studies on dioxin toxicity.

Smoke carcinogens cause bone loss through the aryl hydrocarbon receptor and induction of Cyp1 enzymes.

Monoisoamyl 2,3-dimercaptosuccinic acid attenuates arsenic induced toxicity: behavioral and neurochemical approach.

Proteomic analysis of arsenic-exposed zebrafish (*Danio rerio*) identifies altered expression in proteins involved in fibrosis and lipid uptake in a gender-specific manner.

Skeletal muscle ryanodine receptor mutations associated with malignant hyperthermia showed enhanced intensity and sensitivity to triggering drugs when expressed in human embryonic kidney cells.

Novel cell-based assay reveals associations of circulating serum AhR-ligands with metabolic syndrome and mitochondrial dysfunction.

Genotoxic and clastogenic effects of monohaloacetic acid drinking water disinfection by-products in primary human lymphocytes.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced inflammatory activation is mediated by intracellular free calcium in microglial cells.

Aberrant pulmonary lymphatic development in the nitrofen mouse model of congenital diaphragmatic hernia.

[Relationship between parental exposure to chemicals and risk of childhood acute leukemia].

The aryl hydrocarbon receptor and food allergy.

Effects of iron polymaltose complex, ferrous fumarate and ferrous sulfate treatments in anemic pregnant rats, their fetuses and placentas.

Selenium-binding protein 1: its physiological function, dependence on aryl hydrocarbon receptors, and role in wasting syndrome by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Monitoring of deiodinase deficiency based on transcriptomic responses in SH-SY5Y cells.

The human Ah receptor: hints from dioxin toxicities to deregulated target genes and physiological functions.

Expression and potential role of apolipoprotein D on the death-survival balance of human colorectal cancer cells under oxidative stress conditions.

EMT and CSC-like properties mediated by the IKK α /I κ B α /RelA signal pathway via the transcriptional regulator, Snail, are involved in the arsenite-induced neoplastic transformation of human keratinocytes.

Multidrug resistance protein 1 (ABCC1) confers resistance to arsenic compounds in human myeloid leukemic HL-60 cells.

Metabolism of arsenic and its toxicological relevance.

A phantom study on bladder and rectum dose measurements in brachytherapy of cervix cancer using FBX aqueous chemical dosimeter.

Epigenetics and pesticides.

Synergistic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and N-nitrosodiethylamine on cell malignant transformation.

Action of hexachlorobenzene on tumor growth and metastasis in different experimental models.

Biological and tumor-promoting effects of dioxin-like and non-dioxin-like polychlorinated biphenyls in mouse liver after single or combined treatment.

Association between exposure to dioxin-like polychlorinated biphenyls and miR-191 expression in human peripheral blood mononuclear cells.

The aryl hydrocarbon receptor: a novel target for immunomodulation in organ transplantation.

Pelargonidin activates the AhR and induces CYP1A1 in primary human hepatocytes and human cancer cell lines HepG2 and LS174T.

Gastrointestinal stromal tumors, somatic mutations and candidate genetic risk variants.

Aryl hydrocarbon receptor and lung cancer.

Dioxin receptor expression inhibits basal and transforming growth factor β -induced epithelial-to-mesenchymal transition.

Inhibition of constitutive aryl hydrocarbon receptor (AhR) signaling attenuates androgen independent signaling and growth in (C4-2) prostate cancer cells.

Health risk assessment of occupational exposure to hazardous volatile organic compounds in swine gestation, farrowing and nursery barns.

Impaired mitochondrial metabolism and mammary carcinogenesis.

Spontaneous renal tumors in two rats from a thirteen week rodent feeding study with grain from molecular stacked trait lepidopteran and coleopteran resistant (DP- $\sim\sim$ 4114-3) maize.

Evaluation of gene expression changes in human primary uroepithelial cells following 24-hr exposures to inorganic arsenic and its methylated metabolites.

Enhanced carcinogenicity by coexposure to arsenic and iron and a novel remediation system for the elements in well drinking water.

Aryl hydrocarbon receptor-mediated disruption of contact inhibition is associated with connexin43 downregulation and inhibition of gap junctional intercellular communication.

Residential proximity to industrial combustion facilities and risk of non-Hodgkin lymphoma: a case-control study.

Nuclear import and export signals control the subcellular localization of Nurr1 protein in response to oxidative stress.

Native fluorescence spectra of human cancerous and normal breast tissues analyzed with non-negative constraint methods.

Cyprodinil as an activator of aryl hydrocarbon receptor.

[Reduction in alcohol consumption: therapeutic goal in alcohol dependence treatment].

Characterization of residential pesticide use and chemical formulations through self-report and household inventory: the Northern California Childhood Leukemia study.

Potential carcinogenic effects of world trade center dust after intratracheal instillation to Sprague-Dawley rats: first observation.

Chemical genetics of acetyl-CoA carboxylases.

Dioxin suppresses benzo[a]pyrene-induced mutations and DNA adduct formation through cytochrome P450 1A1 induction and (±)-anti-benzo[a]pyrene-7,8-diol-9,10-epoxide inactivation in human hepatoma cells.

The effect of cigarette smoke and arsenic exposure on urothelial carcinoma risk is modified by glutathione S-transferase M1 gene null genotype.

CD44v6 expression in human skin keratinocytes as a possible mechanism for carcinogenesis associated with chronic arsenic exposure.

Chloroacetic acid induced neuronal cells death through oxidative stress-mediated p38-MAPK activation pathway regulated mitochondria-dependent apoptotic signals.

The role of aryl hydrocarbon receptor-regulated cytochrome P450 enzymes in glioma.

Correlations between BRCA1 defect and environmental factors in the risk of breast cancer.

A genetically encoded FRET lactate sensor and its use to detect the Warburg effect in single cancer cells.

Warburg and Crabtree effects in premalignant Barrett's esophagus cell lines with active mitochondria.

KML001 displays vascular disrupting properties and irinotecan combined antitumor activities in a murine tumor model.

Oculomotor deficits in aryl hydrocarbon receptor null mouse.

Human neuromelanin: an endogenous microglial activator for dopaminergic neuron death.

Decreased pulmonary c-Cbl expression and tyrosine phosphorylation in the nitrofen-induced rat model of congenital diaphragmatic hernia.

Amniotic fluid stem cells rescue both in vitro and in vivo growth, innervation, and motility in nitrofen-exposed hypoplastic rat lungs through paracrine effects.

Sequence capture and massively parallel sequencing to detect mutations associated with malignant hyperthermia.

Inhibition of neurite outgrowth and alteration of cytoskeletal gene expression by sodium arsenite.

Dioxins: diagnostic and prognostic challenges arising from complex mechanisms.

Protective effects of protocatechuic acid on TCDD-induced oxidative and histopathological damage in the heart tissue of rats.

Construction and characterization of peroxisome proliferator-activated receptor-gamma co-activator 1 alpha (PGC-1 α) over-expressing cell line derived from human hepatocyte carcinoma HepG2 cells).

Mitochondria-targeted antioxidants and metabolic modulators as pharmacological interventions to slow ageing.

Akt/Nrf2 activated upregulation of heme oxygenase-1 involves in the role of Rg1 against ferrous iron-induced neurotoxicity in SK-N-SH cells.

Sodium arsenite induced reactive oxygen species generation, nuclear factor (erythroid-2 related) factor 2 activation, heme oxygenase-1 expression, and glutathione elevation in Chang human hepatocytes.

Inhibition of hepatocyte nuclear factor 1 and 4 alpha (HNF1 α and HNF4 α) as a mechanism of arsenic carcinogenesis.

Induction of apoptotic death and retardation of neuronal differentiation of human neural stem cells by sodium arsenite treatment.

AhR-mediated changes in global gene expression in rat liver progenitor cells.

Evaluation of biomonitoring data from the CDC National Exposure Report in a risk assessment context: perspectives across chemicals.

Investigation of ifosfamide nephrotoxicity induced in a liver-kidney co-culture biochip.

2,3,7,8-Tetrachlorodibenzo-p-dioxin enhances CCl₄-induced hepatotoxicity in an aryl hydrocarbon receptor-dependent manner.

The accumulations of HIF-1 α and HIF-2 α by JNK and ERK are involved in biphasic effects induced by different levels of arsenite in human bronchial epithelial cells.

Cadmium(Cd)-induced oxidative stress down-regulates the gene expression of DNA mismatch recognition proteins MutS homolog 2 (MSH2) and MSH6 in zebrafish (*Danio rerio*) embryos.

Harmine and harmaline downregulate TCDD-induced Cyp1a1 in the livers and lungs of C57BL/6 mice.

Imaging imidazoline-I₂ binding sites in porcine brain using 11C-BU99008.

Androgen receptor CAG repeat length modifies the effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on receptor activity in human prostate cells.

Aldo-keto reductases mediate constitutive and inducible protection against aldehyde toxicity in human neuroblastoma SH-SY5Y cells.

Toxicity of polyamines and their metabolic products.

Mast cell-based electrochemical biosensor for quantification of the major shrimp allergen Pen a 1 (tropomyosin).

[Classical oxazaphosphorines--metabolism and therapeutic properties--new implications].

Identification of stable cytotoxic factors in the gas phase extract of cigarette smoke and pharmacological characterization of their cytotoxicity.

Glyphosate, pathways to modern diseases II: Celiac sprue and gluten intolerance.

Effect of selenomethionine supplementation in food on the excretion and toxicity of arsenic exposure in female mice.

Dose-dependent folic acid and memantine treatments promote synergistic or additive protection against Al^{2+} (25-35) peptide-induced apoptosis in SH-SY5Y cells mediated by mitochondria stress-associated death signals.

Effects of oral anorexiant sibutramine on the expression of cytochromes P450s in human hepatocytes and cancer cell lines.

Synthesis and cytotoxicity of novel 20-O-linked homocamptothecin ester derivatives as potent topoisomerase I inhibitors.

2,4-Dinitrophenol induces neural differentiation of murine embryonic stem cells.

Dioxin pollution disrupts reproduction in male Japanese field mice.

Sodium arsenite and arsenic trioxide differently affect the oxidative stress, genotoxicity and apoptosis in A549 cells: an implication for the paradoxical mechanism.

Effective synthesis of sulfate metabolites of chlorinated phenols.

Gastrointestinal stromal tumors: a case-only analysis of single nucleotide polymorphisms and somatic mutations.

Potential role of epigenetic mechanisms in the regulation of drug metabolism and transport.

Role of the nuclear xenobiotic receptors CAR and PXR in induction of cytochromes P450 by non-dioxinlike polychlorinated biphenyls in cultured rat hepatocytes.

The position of imidazopyridine and metabolic activation are pivotal factors in the antimutagenic activity of novel imidazo[1,2-a]pyridine derivatives.

Interaction of aldehydes derived from lipid peroxidation and membrane proteins.

The mortality and cancer experience of New Zealand Vietnam war veterans: a cohort study.

Dioxin-induced acute cardiac mitochondrial oxidative damage and increased activity of ATP-sensitive potassium channels in Wistar rats.

Effects of endocrine disrupting chemicals on in vitro global DNA methylation and adipocyte differentiation.

Emptying of Intracellular Calcium Pool and Oxidative Stress Imbalance Are Associated with the Glyphosate-Induced Proliferation in Human Skin Keratinocytes HaCaT Cells.

Emerging causes of iron deficiency anemia refractory to oral iron supplementation.

Transplantation of induced pluripotent stem cells without C-Myc attenuates retinal ischemia and reperfusion injury in rats.

Arsenic induces VL30 retrotransposition: the involvement of oxidative stress and heat-shock protein 70.

An integrated approach for prospectively investigating a mode-of-action for rodent liver effects.

Differential dependence on host cell glycosaminoglycans for infection of epithelial cells by high-risk HPV types.

Protective effect of *Juglans nigra* on sodium arsenite-induced toxicity in rats.

The potential applications of SOS-lux biosensors for rapid screening of mutagenic chemicals.

The importance of problem formulations in risk assessment: a case study involving dioxin-contaminated soil.

Oxidative DNA damage after acute exposure to arsenite and monomethylarsonous acid in biomethylation-deficient human cells.

Sepiapterin reductase mediates chemical redox cycling in lung epithelial cells.

Cyp1a reporter zebrafish reveals target tissues for dioxin.

Sulforaphane inhibits CYP1A1 activity and promotes genotoxicity induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in vitro.

Evaluation of chromosome aberrations induced by digoxin in Chinese hamster ovary cells.

Urinary Arsenic Concentrations and their Associated Factors in Korean Adults.

Oral administration of hesperidin, a citrus flavonone, in rats counteracts the oxidative stress, the inflammatory cytokine production, and the hepatotoxicity induced by the ingestion of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Use of a highly sensitive recombinant hepatoma cell method to determine dioxin concentrations in samples of fish and crab from a hotspot area.

Synthesis and cytotoxicity of oligomycin A derivatives modified in the side chain.

Oxidative stress and MAPK involved into ATF2 expression in immortalized human urothelial cells treated by arsenic.

The tumor suppressor Kruppel-like factor 6 is a novel aryl hydrocarbon receptor DNA binding partner.

Consumption of deep-fried foods and risk of prostate cancer.

Switchable skin window induced by optical clearing method for dermal blood flow imaging.

Comparison of nicotine and carcinogen exposure with water pipe and cigarette smoking.

AhR-mediated effects of dioxin on neuronal acetylcholinesterase expression in vitro.

Loss of Neil3, the major DNA glycosylase activity for removal of hydantoin in single stranded DNA, reduces cellular proliferation and sensitizes cells to genotoxic stress.

Toxicological profile of chlorophenols and their derivatives in the environment: the public health perspective.

Determination of urinary 6-mercaptopurine and three of its metabolites by HPLC-UV coupled with the iodine-azide reaction.

Effect propagation in a toxicokinetic/toxicodynamic model explains delayed effects on the growth of unicellular green algae *Scenedesmus vacuolatus*.

Relationships between PAHs and PCBs, and quantitative source apportionment of PAHs toxicity in sediments from Fenhe reservoir and watershed.

Beta-catenin signaling induces CYP1A1 expression by disrupting adherens junctions in Caco-2 human colon carcinoma cells.

Quenching of tryptophan fluorescence in the presence of 2,4-DNP, 2,6-DNP, 2,4-DNA and DNOC and their mechanism of toxicity.

Ecotoxicity and risk to human fish consumers of polychlorinated biphenyls in fish near the Hanford Site (USA).

Sodium arsenite exposure inhibits AKT and Stat3 activation, suppresses self-renewal and induces apoptotic death of embryonic stem cells.

Binding interaction between (-)-epigallocatechin gallate causes impaired spreading of cancer cells on fibrinogen.

Ameliorative Effects of Acacia Honey against Sodium Arsenite-Induced Oxidative Stress in Some Viscera of Male Wistar Albino Rats.

Treatment of mice with 2,3,7,8-Tetrachlorodibenzo-p-dioxin markedly increases the levels of a number of cytochrome P450 metabolites of omega-3 polyunsaturated fatty acids in the liver and lung.

From the tumor-inducing principle to plant biotechnology and its importance for society.

Human cell toxicogenomic analysis linking reactive oxygen species to the toxicity of monohaloacetic acid drinking water disinfection byproducts.

Polyamines and their metabolites as diagnostic markers of human diseases.

Cancer incidence in pulmonary vasculitis.

Regulation of NF- κ B-induced inflammatory signaling by lipid peroxidation-derived aldehydes.

Structure revision and cytotoxic activity of marinamide and its methyl ester, novel alkaloids produced by co-cultures of two marine-derived mangrove endophytic fungi.

Probabilistic health risk assessment of polycyclic aromatic hydrocarbons and polychlorinated biphenyls in urban soils from a tropical city of India.

A Systematic Review of Carcinogenic Outcomes and Potential Mechanisms from Exposure to 2,4-D and MCPA in the Environment.

Atrazine and nitrate in public drinking water supplies and non-hodgkin lymphoma in nebraska, USA.

Bioactivities of volatile components from Nepalese Artemisia species.

Dysregulated expression of secretogranin III is involved in neurotoxin-induced dopaminergic neuron apoptosis.

In vitro attenuation of acrolein-induced toxicity by phloretin, a phenolic compound from apple.

Diuron-induced rat bladder epithelial cytotoxicity.

Comparison of chemical-induced changes in proliferation and apoptosis in human and mouse neuroprogenitor cells.

Pesticide use, immunologic conditions, and risk of non-Hodgkin lymphoma in Canadian men in six provinces.

Acrolein cytotoxicity in hepatocytes involves endoplasmic reticulum stress, mitochondrial dysfunction and oxidative stress.

Long term toxicity of a Roundup herbicide and a Roundup-tolerant genetically modified maize.

Chaperone heat shock protein 90 mobilization and hydralazine cytoprotection against acrolein-induced carbonyl stress.

Changes in lymphocyte subsets in workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Recombinant adenovirus Ad-RUNrf2 reduces paraquat-induced A549 injury.

Antioxidant and antitumor activities of the polysaccharide from seed cake of Camellia oleifera Abel.

Effects of bioreactive acrolein from automotive exhaust gases on human cells in vitro.

Review of 2,4-dichlorophenoxyacetic acid (2,4-D) biomonitoring and epidemiology.

Activator protein-1 regulation of murine aldehyde dehydrogenase 1a1.

Mechanisms underlying the inhibitory effects of arsenic compounds on protein tyrosine phosphatase (PTP).

A supramolecular route towards core-shell polymeric microspheres in water via cucurbit[8]uril complexation.

[Experimental study on the therapeutic effect of C-phycoerythrin against pulmonary fibrosis induced by paraquat in rats].

[Optimal conditions of bone marrow mesenchymal stem cells on paraquat-induced acute lung injury in rats].

Antioxidant effect of silymarin on paraquat-induced human lung adenocarcinoma A549 cell line.

L-Theanine extends lifespan of adult Caenorhabditis elegans.

Influence of 50-nm polystyrene particles in inducing cytotoxicity in mice co-injected with carbon tetrachloride, cisplatin, or paraquat.

Pentachlorophenol decreases tumor-cell-binding capacity and cell-surface protein expression of human natural killer cells.

Epidemiologic studies of glyphosate and cancer: a review.

Interferon- γ plays a role in paraquat-induced neurodegeneration involving oxidative and proinflammatory pathways.

[Induction effects of pentachlorophenol on vitellogenin and p53 in Chinese rare minnow (*Gobiocypris rarus*)].

Methyl bromide exposure and cancer risk in the Agricultural Health Study.

Effects of herbicides and the chytrid fungus *Batrachochytrium dendrobatidis* on the health of post-metamorphic northern leopard frogs (*Lithobates pipiens*).

BLTK1 murine Leydig cells: a novel steroidogenic model for evaluating the effects of reproductive and developmental toxicants.

Cytotoxic and DNA-damaging properties of glyphosate and Roundup in human-derived buccal epithelial cells.

Overexpression of TFAM, NRF-1 and myr-AKT protects the MPP(+)-induced mitochondrial dysfunctions in neuronal cells.

[The effects of Nrf2 gene expression induced by RU486 at different doses on A549 cell damage induced by paraquat].

Glyphosate-induced stiffening of HaCaT keratinocytes, a Peak Force Tapping study on living cells.

Superoxide dismutase activity of *Helicobacter pylori* per se from 158 clinical isolates and the characteristics.

Renal, hepatic, pulmonary and adrenal tumors induced by prenatal inorganic arsenic followed by dimethylarsinic acid in adulthood in CD1 mice.

Effects of manganese and arsenic species on the level of energy related nucleotides in human cells.

Augmented glutathione synthesis decreases acrolein toxicity.

[Effects of pentachlorophenol on DNA damage and cytotoxicity of HeLa cells].

A comparison of two human cell lines and two rat gonadal cell primary cultures as in vitro screening tools for aromatase modulation.

Methylated arsenic species in plants originate from soil microorganisms.

Hypercholesterolemia and oxidative stress inhibit endothelial cell healing after arterial injury.

Plasma dioxin levels and cause-specific mortality in an occupational cohort of workers exposed to chlorophenoxy herbicides, chlorophenols and contaminants.

Isolation, structural elucidation, and neuroprotective effects of iridoids from *Valeriana jatamansi*.

Concordant signaling pathways produced by pesticide exposure in mice correspond to pathways identified in human Parkinson's disease.

Endoplasmic reticulum stress impairs insulin signaling through mitochondrial damage in SH-SY5Y cells.

Prevention of paraquat-induced apoptosis in human neuronal SH-SY5Y cells by lipocalin-type prostaglandin D synthase.

Standardized extracts of *Bacopa monniera* protect against MPP⁺ and paraquat-induced toxicity by modulating mitochondrial activities, proteasomal functions, and redox pathways.

The tobacco smoke component, acrolein, suppresses innate macrophage responses by direct alkylation of c-Jun N-terminal kinase.

2'-Benzoyloxycinnamaldehyde inhibits nitric oxide production in lipopolysaccharide-stimulated RAW 264.7 cells via regulation of AP-1 pathway.

Elevated neutrophil elastase and acrolein-protein adducts are associated with W256 regression.

Anticancer system created by acrolein and hydroxyl radical generated in enzymatic oxidation of spermine and other biochemical reactions.

Whole genome expression profile in neuroblastoma cells exposed to 1-methyl-4-phenylpyridine.

δ^9 -tetrahydrocannabinol (δ^9 -THC) exerts a direct neuroprotective effect in a human cell culture model of Parkinson's disease.

Antihyperglycemic and antihyperlipidemic action of cinnamaldehyde in C57BLKS/J db/db mice.

Potential use of nitrate reductase as a biomarker for the identification of active and dormant inhibitors of *Mycobacterium tuberculosis* in a THP1 infection model.

Resveratrol inhibits paraquat-induced oxidative stress and fibrogenic response by activating the nuclear factor erythroid 2-related factor 2 pathway.

Systematic review of pentachlorophenol occurrence in the environment and in humans in China: not a negligible health risk due to the re-emergence of schistosomiasis.

TRPA1 is functionally expressed in melanoma cells but is not critical for impaired proliferation caused by allyl isothiocyanate or cinnamaldehyde.

Protection of CDC25 phosphatases against oxidative stress in breast cancer cells: evaluation of the implication of the thioredoxin system.

Targeting acetyl-CoA carboxylases: small molecular inhibitors and their therapeutic potential.

2-methoxycinnamaldehyde from *Cinnamomum cassia* reduces rat myocardial ischemia and reperfusion injury in vivo due to HO-1 induction.

Differential effects of Bcl-2 and caspases on mitochondrial permeabilization during endogenous or exogenous reactive oxygen species-induced cell death: a comparative study of H₂O₂, paraquat, t-BHP, etoposide and TNF- α -induced cell death.

Effects of auxins on the production of steroidal alkaloids in rapidly proliferating tissue and cell cultures of *Solanum lyratum*.

Effect of carcinogenic acrolein on DNA repair and mutagenic susceptibility.

Molecular effects of activated BV-2 microglia by mitochondrial toxin 1-methyl-4-phenylpyridinium.

Induction of tumor cell death through targeting tubulin and evoking dysregulation of cell cycle regulatory proteins by multifunctional cinnamaldehydes.

2'-Benzoyloxycinnamaldehyde-mediated DJ-1 upregulation protects MCF-7 cells from mitochondrial damage.

Modulation of the metabolism of airborne pollutants by glucoraphanin-rich and sulforaphane-rich broccoli sprout beverages in Qidong, China.

Glutaredoxin 1 protects dopaminergic cells by increased protein glutathionylation in experimental Parkinson's disease.

Differentially expressed genes and pathways induced by organophosphates in human neuroblastoma cells.

PANC-1 cells proliferative response to ionizing radiation is related to GSK-3 β phosphorylation.

Influence of serum in hemodialysis patients on the expression of intestinal and hepatic transporters for the excretion of pravastatin.

Pesticide exposure in children.

PCDD/Fs, PBDD/Fs, and PBDEs in the air of an e-waste recycling area (Taizhou) in China: current levels, composition profiles, and potential cancer risks.

Silibinin ameliorates arsenic induced nephrotoxicity by abrogation of oxidative stress, inflammation and apoptosis in rats.

Characterization of ecto-ATPase activity in the surface of LLC-PK1 cells and its modulation by ischemic conditions.

High-resolution genome-wide mapping of AHR and ARNT binding sites by ChIP-Seq.

Ethanol enhances tumor angiogenesis in vitro induced by low-dose arsenic in colon cancer cells through hypoxia-inducible factor 1 alpha pathway.

Autophagy is a cell self-protective mechanism against arsenic-induced cell transformation.

Cancer and non-cancer health effects from food contaminant exposures for children and adults in California: a risk assessment.

Tryptophan catabolism in cancer: beyond IDO and tryptophan depletion.

Environmental arsenic exposure and DNA methylation of the tumor suppressor gene p16 and the DNA repair gene MLH1: effect of arsenic metabolism and genotype.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces apoptosis by disruption of intracellular calcium homeostasis in human neuronal cell line SHSY5Y.

The epigenetic effects of a high prenatal folate intake in male mouse fetuses exposed in utero to arsenic.

Enhanced apoptosis in retinal pigment epithelium under inflammatory stimuli and oxidative stress.

Aryl hydrocarbon receptor (AHR)-active pharmaceuticals are selective AHR modulators in MDA-MB-468 and BT474 breast cancer cells.

Environmental exposure to dioxin-like compounds and the mortality risk in the U.S. population.

Necrosis and apoptosis of renal tubular epithelial cells in rats exposed to 3-methyl-4-nitrophenol.

Telmisartan treatment attenuates arsenic-induced hepatotoxicity in mice.

Opposed arsenite-mediated regulation of p53-survivin is involved in neoplastic transformation, DNA damage, or apoptosis in human keratinocytes.

1-(sulfonyl)-5-(arylsulfonyl)indoline as activators of the tumor cell specific M2 isoform of pyruvate kinase.

Engineering of blended nanoparticle platform for delivery of mitochondria-acting therapeutics.

Biomarkers spectral subspace for cancer detection.

Global gene expression analysis in cord blood reveals gender-specific differences in response to carcinogenic exposure in utero.

Induction of anoikis by sodium arsenite in rat hepatoma FGC4 cells: comparison with cadmium chloride and implications for assessment of regulation of heat shock protein 70.

Sodium arsenite-induced abnormalities in expressions of Caveolin-1, eNOS, IKK β , and COX-2 in SV-40 immortalized human uroepithelial cells and in urothelial carcinomas.

Long-term toxicology and carcinogenicity of 2,4,6-trichlorophenol.

BRCA-1 promoter hypermethylation and silencing induced by the aromatic hydrocarbon receptor-ligand TCDD are prevented by resveratrol in MCF-7 cells.

A weight-of-evidence review of colorectal cancer in pesticide applicators: the agricultural health study and other epidemiologic studies.

Eccrine porocarcinoma with carcinomatous lymphangitis in a patient with history of arsenic exposure: a case report.

Poly (lactide-co-glycolide) encapsulated extract of *Phytolacca decandra* demonstrates better intervention against induced lung adenocarcinoma in mice and on A549 cells.

Development of brucine-loaded microsphere/thermally responsive hydrogel combination system for intra-articular administration.

Rat study sparks GM furore.

Baicalein induces G1 arrest in oral cancer cells by enhancing the degradation of cyclin D1 and activating AhR to decrease Rb phosphorylation.

Treatment of mild non-chemotherapy-induced iron deficiency anemia in cancer patients: comparison between oral ferrous bisglycinate chelate and ferrous sulfate.

Mortality study of chemical workers exposed to dioxins: follow-up 23 years after chemical plant closure.

Cancer incidence in a chlorochemical plant in Isère, France: an occupational cohort study, 1979-2002.

Cellular distribution of cell cycle-related molecules in the renal tubules of rats treated with renal carcinogens for 28 days: relationship between cell cycle aberration and carcinogenesis.

Effect of 6-O- α -maltosyl- β -cyclodextrin and its cholesterol inclusion complex on cellular cholesterol levels and ABCA1 and ABCG1 expression in mouse mastocytoma P-815 cells.

Urinary total arsenic and 8-hydroxydeoxyguanosine are associated with renal cell carcinoma in an area without obvious arsenic exposure.

In vitro and in vivo biological evaluation of new 4,5-disubstituted 1,2,3-triazoles as cis-constrained analogs of combretastatin A4.

A NUP98-HOXD13 leukemic fusion gene leads to impaired class switch recombination and antibody production.

Hepatic microRNA profiles offer predictive and mechanistic insights after exposure to genotoxic and epigenetic hepatocarcinogens.

Intracellular accumulation of bilirubin as a defense mechanism against increased oxidative stress.

Yusho: 43 years later.

Iron replacement therapy in the routine management of blood donors.

Progesterone receptor is involved in 2,3,7,8-tetrachlorodibenzo-p-dioxin-stimulated breast cancer cells proliferation.

Occupational cancer in Britain. Exposure assessment methodology.

Sodium arsenite down-regulates the expression of X-linked inhibitor of apoptosis protein via translational and post-translational mechanisms in hepatocellular carcinoma.

A review of the role of lymphoma markers and occupational and environmental exposures.

Maternal diet and dioxin-like activity, bulky DNA adducts and micronuclei in mother-newborns.

Combination of Rad001 (everolimus) and propachlor synergistically induces apoptosis through enhanced autophagy in prostate cancer cells.

Circulating microRNA-122 as a potential biomarker for liver injury.

Tumors and proliferative lesions in adult offspring after maternal exposure to methylarsonous acid during gestation in CD1 mice.

Evaluation of paclitaxel/carboplatin in a dose dense or weekly regimen in 66 patients with recurrent or primary metastatic cervical cancer.

Is the fear of dioxin cancer more harmful than dioxin?

FOXA1 is essential for aryl hydrocarbon receptor-dependent regulation of cyclin G2.

Protein alteration of HepG2.2.15 cells induced by iron overload.

Aryl hydrocarbon receptor-mediated induction of EBV reactivation as a risk factor for Sjögren's syndrome.

Inorganic arsenic and basal cell carcinoma in areas of Hungary, Romania, and Slovakia: a case-control study.

Src-mediated aryl hydrocarbon and epidermal growth factor receptor cross talk stimulates colon cancer cell proliferation.

Sodium arsenite \pm hyperthermia sensitizes p53-expressing human ovarian cancer cells to cisplatin by modulating platinum-DNA damage responses.

The aryl hydrocarbon receptor contributes to the proliferation of human medulloblastoma cells.

An arabinoxylan-rich fraction from wheat enhances caecal fermentation and protects colonocyte DNA against diet-induced damage in pigs.

β -catenin expression in areca quid chewing-associated oral squamous cell carcinomas and upregulated by arecoline in human oral epithelial cells.

Concomitant induction of heme oxygenase-1 attenuates the cytotoxicity of arsenic species from lumbricus extract in human liver HepG2 cells.

Cross-regulations among NRFs and KEAP1 and effects of their silencing on arsenic-induced antioxidant response and cytotoxicity in human keratinocytes.

2,3,7,8-tetrachlorodibenzo-p-dioxin induces transcriptional activity of the human polymorphic hs1,2 enhancer of the 3'IGH regulatory region.

Metformin reduces endogenous reactive oxygen species and associated DNA damage.

Inflammatory pathway genes belong to major targets of persistent organic pollutants in adipose cells.

Suppression of Klotho expression by protein-bound uremic toxins is associated with increased DNA methyltransferase expression and DNA hypermethylation.

Isolation and identification of C-19 fatty acids with anti-tumor activity from the spores of Ganoderma lucidum (reishi mushroom).

Endocrine-active chemicals in mammary cancer causation and prevention.

Neuroprotection of kaempferol by autophagy in models of rotenone-mediated acute toxicity: possible implications for Parkinson's disease.

Requirement of matrix metalloproteinase-1 for intestinal homeostasis in the adult *Drosophila* midgut.

Effects of prenatal exposure to sodium arsenite on motor and food-motivated behaviors from birth to adulthood in C57BL6/J mice.

Thrombocytosis and venous thromboembolism in cancer patients with chemotherapy induced anemia may be related to ESA induced iron restricted erythropoiesis and reversed by administration of IV iron.

Subacute arsenic exposure through drinking water reduces the pharmacodynamic effects of ketoprofen in male rats.

Influence of prenatal organohalogen levels on infant male sexual development: sex hormone levels, testes volume and penile length.

Inhibition of VCAM-1 expression in endothelial cells by CORM-3: the role of the ubiquitin-proteasome system, p38, and mitochondrial respiration.

Aldehyde dehydrogenases and cell proliferation.

The vimentin-tubulin binding site peptide (Vim-TBS.58-81) crosses the plasma membrane and enters the nuclei of human glioma cells.

Distinct urinary metabolic profile of human colorectal cancer.

Synergism between arsenite and proteasome inhibitor MG132 over cell death in myeloid leukaemic cells U937 and the induction of low levels of intracellular superoxide anion.

Aryl hydrocarbon receptor modulation of estrogen receptor β -mediated gene regulation by a multimeric chromatin complex involving the two receptors and the coregulator RIP140.

ErbB1/2 tyrosine kinase inhibitor mediates oxidative stress-induced apoptosis in inflammatory breast cancer cells.

Solid phase microextraction, mass spectrometry and metabolomic approaches for detection of potential urinary cancer biomarkers--a powerful strategy for breast cancer diagnosis.

Prostate cancer and toxicity from critical use exemptions of methyl bromide: environmental protection helps protect against human health risks.

Up-regulation of osteopontin expression by aryl hydrocarbon receptor via both ligand-dependent and ligand-independent pathways in lung cancer.

[Antiangiogenic and antitumor properties of cartilage].

Uremia suppresses immune signal-induced CYP27B1 expression in human monocytes.

Stability of the transthyretin molecule as a key factor in the interaction with a-beta peptide--relevance in Alzheimer's disease.

Prenatal exposure to TCDD triggers significant modulation of microRNA expression profile in the thymus that affects consequent gene expression.

Inhibition of mitochondria- and endoplasmic reticulum stress-mediated autophagy augments temozolomide-induced apoptosis in glioma cells.

Dioxin induces genomic instability in mouse embryonic fibroblasts.

Occupational pesticide exposures and cancer risk: a review.

Camel milk modulates the expression of aryl hydrocarbon receptor-regulated genes, Cyp1a1, Nqo1, and Gsta1, in murine hepatoma Hepa 1c1c7 cells.

MiR-206 regulates neural cells proliferation and apoptosis via Otx2.

Genome-wide association study identifies chromosome 10q24.32 variants associated with arsenic metabolism and toxicity phenotypes in Bangladesh.

Relevance of protein fermentation to gut health.

Aryl hydrocarbon receptor agonists induce microRNA-335 expression and inhibit lung metastasis of estrogen receptor negative breast cancer cells.

Akt activation is responsible for enhanced migratory and invasive behavior of arsenic-transformed human bronchial epithelial cells.

Reversible generation of metastable enols in the 1,4-addition of thioacetic acid to α,β -unsaturated carbonyl compounds.

$1,25$ dihydroxyvitamin D₃ enhances cellular defences against UV-induced oxidative and other forms of DNA damage in skin.

Arsenic exposure through drinking water is associated with longer telomeres in peripheral blood.

Environmentally persistent free radicals decrease cardiac function and increase pulmonary artery pressure.

Organochlorine pesticides induce epithelial to mesenchymal transition of human primary cultured hepatocytes.

Polychlorinated biphenyls (PCBs) in marine fishes from China: levels, distribution and risk assessment.

An involvement of neurokinin-1 receptor in Fc ϵ R¹-mediated RBL-2H3 mast cell activation.

Oxidative stress modulates KLF6Full and its splice variants.

Simultaneous analysis of 28 urinary VOC metabolites using ultra high performance liquid chromatography coupled with electrospray ionization tandem mass spectrometry (UPLC-ESI/MSMS).

The epidemiology of sarcoma.

Low dose and long term toxicity of sodium arsenite caused caspase dependent apoptosis based on morphology and biochemical character.

Small reactive carbonyl compounds as tissue lipid oxidation products; and the mechanisms of their formation thereby.

The androgenic anabolic steroid tetrahydrogestrinone produces dioxin-like effects via the aryl hydrocarbon receptor.

Effects of caffeine on metabolism and mitochondria biogenesis in rhabdomyosarcoma cells compared with 2,4-dinitrophenol.

Bladder urotoxicity pathophysiology induced by the oxazaphosphorine alkylating agents and its chemoprevention.

[Study of the mechanisms of cytotoxic effect of uranyl nitrate].

Antimutagenic properties of *Mangifera indica* L. stem bark extract and evaluation of its effects on hepatic CYP1A1.

Induction of DNA double-strand breaks by monochlorophenol isomers and ChKM in human gingival fibroblasts.

An improved synthesis of lysosomal activated mustard prodrug for tumor-specific activation and its cytotoxic evaluation.

TGF- β 1 signaling plays a dominant role in the crosstalk between TGF- β 1 and the aryl hydrocarbon receptor ligand in prostate epithelial cells.

Assessment of possible carcinogenicity of oxyfluorfen to humans using mode of action analysis of rodent liver effects.

ABC transporter function and regulation at the blood-spinal cord barrier.

Genotoxicity assessment in *Eisenia andrei* coelomocytes: a study of the induction of DNA damage and micronuclei in earthworms exposed to B[a]P- and TCDD-spiked soils.

Induction of Apoptosis in the Rat Bone Marrow Mesenchymal Stem Cells Following Sodium Arsenite Treatment with the Dose Lesser than that Used for Treatment of Malignant Patient.

Possible aryl hydrocarbon receptor-independent pathway of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced antiproliferative response in human breast cancer cells.

Identification of trace organic pollutants in drinking water and the associated human health risks in Jiangsu Province, China.

Conformationally restricted naphthalene derivatives type isocombretastatin A-4 and isoerianin analogues: synthesis, cytotoxicity and antitubulin activity.

Protective effect of *Enicostema axillare* on mutagenicity of *Salmonella typhimurium* by increasing free radical scavenging abilities.

Lymphoma cells with increased anti-oxidant defenses acquire chemoresistance.

Environmental nitration processes enhance the mutagenic potency of aromatic compounds.

Suppressive effects of Schizandra chinensis Baillon water extract on allergy-related cytokine generation and degranulation in IgE-antigen complex-stimulated RBL-2H3 cells.

Clinical outcome of veterans with acute coronary syndrome who had been exposed to agent orange.

Preliminary evaluation of the human relevance of respiratory tumors observed in rodents exposed to naphthalene.

Toxicological evaluation of paper mill sewage sediment treated by indigenous dibenzofuran-degrading *Pseudomonas* sp.

Urinary levels of volatile organic carcinogen and toxicant biomarkers in relation to lung cancer development in smokers.

Nrf2-dependent induction of proteasome and Pa28 $\hat{\pm}$ \hat{I}^2 regulator are required for adaptation to oxidative stress.

Environmental exposures and prostate cancer.

Changes in expression of drug-metabolizing enzymes by single-walled carbon nanotubes in human respiratory tract cells.

Sodium arsenite and cadmium chloride induction of proteasomal inhibition and HSP accumulation in *Xenopus laevis* A6 kidney epithelial cells.

Multidrug resistance protein (MRP) 4 attenuates benzo[a]pyrene-mediated DNA-adduct formation in human bronchoalveolar H358 cells.

Involvement of concentrative nucleoside transporter 1 in intestinal absorption of trifluorothymidine, a novel antitumor nucleoside, in rats.

Harmaline and harmalol inhibit the carcinogen-activating enzyme CYP1A1 via transcriptional and posttranslational mechanisms.

Disruption of endocrine function in in vitro H295R cell-based and in in vivo assay in zebrafish by 2,4-dichlorophenol.

Characterization of TCHQ-induced genotoxicity and mutagenesis using the pSP189 shuttle vector in mammalian cells.

Pollution level and human health risk assessment of some pesticides and polychlorinated biphenyls in Nantong of Southeast China.

Tumor necrosis factor $\hat{\pm}$ stimulates expression and secretion of urokinase plasminogen activator in human dental pulp cells.

Aberrant activation of ubiquitin D at G2 phase and apoptosis by carcinogens that evoke cell proliferation after 28-day administration in rats.

Persistent toxic substances: sources, fates and effects.

Role of the Arylhydrocarbon Receptor (AhR) in the Pathology of Asthma and COPD.

Distinct roles for aryl hydrocarbon receptor nuclear translocator and ah receptor in estrogen-mediated signaling in human cancer cell lines.

H₂O₂-induced secretion of tumor necrosis factor- α evokes apoptosis of cardiac myocytes through reactive oxygen species-dependent activation of p38 MAPK.

Identification of differentially expressed genes by 2,3,7,8-tetrachlorodibenzo-p-dioxin in human bronchial epithelial cells.

Identification of ketoconazole as an AhR-Nrf2 activator in cultured human keratinocytes: the basis of its anti-inflammatory effect.

Validation of a novel air toxic risk model with air monitoring.

Genotoxic analysis of four lipid-peroxidation products in the mouse lymphoma assay.

The enhancing effect of the antioxidant N-acetylcysteine on urinary bladder injury induced by dimethylarsinic acid.

Differential regional expression patterns of α -synuclein, TNF- α , and IL-1 β ; and variable status of dopaminergic neurotoxicity in mouse brain after Paraquat treatment.

Chronic oral exposure to the aldehyde pollutant acrolein induces dilated cardiomyopathy.

Epidemiologic studies of glyphosate and non-cancer health outcomes: a review.

Endogenous 4-hydroxy-2-nonenal in microalga *Chlorella kessleri* acts as a bioactive indicator of pollution with common herbicides and growth regulating factor of hormesis.

Assessment of female reproductive endpoints in Sprague-Dawley rats developmentally exposed to Diuron: potential ovary toxicity.

Atrazine and breast cancer: a framework assessment of the toxicological and epidemiological evidence.

Continuous hypoxia attenuates paraquat-induced cytotoxicity in the human A549 lung carcinoma cell line.

Hepatotoxicity of silica nanoparticles with a diameter of 100 nm.

Cancer incidence of 2,4-D production workers.

Acrolein - a pulmonary hazard.

Toxicology and risk assessment of acrolein in food.

The protective effect of C-phycocyanin on paraquat-induced acute lung injury in rats.

Kolaviron protects apoptotic cell death in PC12 cells exposed to atrazine.

Acrolein induced DNA damage, mutagenicity and effect on DNA repair.

Neuroprotective effect of Cu,Zn-superoxide dismutase fused to a TCTP-derived protein transduction domain.

Atrazine and cancer incidence among pesticide applicators in the agricultural health study (1994-2007).

TCDD and cancer: a critical review of epidemiologic studies.

Transcriptional profile of diuron-induced toxicity on the urinary bladder of male Wistar rats to inform mode of action.

Investigation into modification of mass transfer kinetics by acrolein in a renal biochip.

Mitochondria are the main target organelle for trivalent monomethylarsonous acid (MMA(III))-induced cytotoxicity.

Biflavanone-kolaviron protects human dopaminergic SH-SY5Y cells against atrazine induced toxic insult.

Involvement of N-6 adenine-specific DNA methyltransferase 1 (N6AMT1) in arsenic biomethylation and its role in arsenic-induced toxicity.

Role of growth factors in acute lung injury induced by paraquat in a rat model.

Histopathological changes in gill, liver and kidney of neotropical fish *Colossoma macropomum* exposed to paraquat at different temperatures.

Diuron exposure induces systemic and organ-specific toxicity following acute and sub-chronic exposure in male Wistar rats.

Acrolein, an I κ B α -independent downregulator of NF- κ B activity, causes the decrease in nitric oxide production in human malignant keratinocytes.

Modulation of steroidogenic gene expression and hormone synthesis in H295R cells exposed to PCP and TCP.

Should atrazine and related chlorotriazines be considered carcinogenic for human health risk assessment?

Protection of bone marrow mesenchymal stem cells from acute lung injury induced by paraquat poisoning.

Mortality of US pentachlorophenol production workers through 2005.

A review of epidemiologic studies of triazine herbicides and cancer.

Evaluation of carcinogenic potential of diuron in a rat mammary two-stage carcinogenesis model.

Superoxide dismutase protects cells from DNA damage induced by trivalent methylated arsenicals.

Effect of reactive oxygen and carbonyl species on crucial cellular antioxidant enzymes.

[Clinical study of dynamic change of inflammatory factors in serum of acute paraquat rats].

Chronic progressive nephropathy in male F344 rats in 90-day toxicity studies: its occurrence and association with renal tubule tumors in subsequent 2-year bioassays.

Erythema multiforme major due to occupational exposure to the herbicides alachlor and butachlor.

Still present after all these years: persistence plus potential toxicity raise questions about the use of atrazine.

Understanding the effects of atrazine on steroidogenesis in rat granulosa and H295R adrenal cortical carcinoma cells.

Prostate cancer risk and exposure to pesticides in British Columbia farmers.

Analysis of acrolein-derived 1,N2-propanodeoxyguanosine adducts in human leukocyte DNA from smokers and nonsmokers.

[Expression of nuclear factor kappaB and tumor necrosis factor $\hat{\pm}$ in lung tissue of paraquat poisoned rats].

Toxicity of neurons treated with herbicides and neuroprotection by mitochondria-targeted antioxidant SS31.

Edaravone, a novel antidote against lung injury and pulmonary fibrosis induced by paraquat?

ASK1 overexpression accelerates paraquat-induced autophagy via endoplasmic reticulum stress.

Pathological and genotoxic effects of atrazine in male Japanese quail (*Coturnix japonica*).

2-Methoxycinnamaldehyde inhibits tumor angiogenesis by suppressing Tie2 activation.

Dopamine and paraquat enhance $\hat{\pm}$ -synuclein-induced alterations in membrane conductance.

Effects of paraquat and capsaicin on the expression of genes related to inflammatory, immune responses and cell death in immortalized human HaCat keratinocytes.

Cinnamaldehyde enhances in vitro parameters of immunity and reduces in vivo infection against avian coccidiosis.

[Mechanism of cinnamic aldehyde-inducing apoptosis of chronic myeloid leukemic cells in vitro].

Expressions of lipid oxidation markers, N($\hat{\mu}$)-hexanoyl lysine and acrolein in cisplatin-induced nephrotoxicity in rats.

Protection against 1-methyl-4-phenylpyridinium ion (MPP⁺)-induced apoptosis by water extract of ginseng (*Panax ginseng* C.A. Meyer) in SH-SY5Y cells.

A pathway-based analysis of urinary arsenic metabolites and skin lesions.

Protandim attenuates intimal hyperplasia in human saphenous veins cultured ex vivo via a catalase-dependent pathway.

Unbalanced MMP/TIMP-1 expression during the development of experimental pulmonary fibrosis with acute paraquat poisoning.

Carnosine protects against the neurotoxic effects of a serotonin-derived melanoid.

Submicron polymer particles containing fluorescent semiconductor nanocrystals CdSe/ZnS for bioassays.

Brain infarction correlates more closely with acrolein than with reactive oxygen species.

[Metabolism inhibition stimulates, metabolism activation inhibits cancerogenic activity of ortho-aminoazotoluene in mouse liver].

Measuring the penetration of a skin sensitizer and its delivery vehicles simultaneously with confocal Raman spectroscopy.

Use of polyamine metabolites as markers for stroke and renal failure.

Differential antiproliferation effect of 2'-benzoyloxycinnamaldehyde in K-ras-transformed cells via downregulation of thiol antioxidants.

2'-Hydroxycinnamaldehyde targets low-density lipoprotein receptor-related protein-1 to inhibit lipopolysaccharide-induced microglial activation.

Acrolein sensitizes human renal cancer Caki cells to TRAIL-induced apoptosis via ROS-mediated up-regulation of death receptor-5 (DR5) and down-regulation of Bcl-2.

Urinary arsenic speciation profiles in mice subchronically exposed to low concentrations of sodium arsenate in drinking water.

Growth inhibitory activities of oxyprenylated and non-prenylated naturally occurring phenylpropanoids in cancer cell lines.

Murine hepatic aldehyde dehydrogenase 1a1 is a major contributor to oxidation of aldehydes formed by lipid peroxidation.

The chemotherapy metabolite acrolein upregulates thrombin generation and impairs the protein C anticoagulant pathway in animal-based and cell-based models.

Increased oxidative/nitrosative stress markers measured non-invasively in patients with high 2,3,7,8-tetrachloro-dibenzo-p-dioxin plasma level.

The polymorphisms of P53 codon 72 and MDM2 SNP309 and renal cell carcinoma risk in a low arsenic exposure area.

Effects of oleanolic acid on pulmonary morphofunctional and biochemical variables in experimental acute lung injury.

Correlation of seven biological factors (Hsp90a, p53, MDM2, Bcl-2, Bax, Cytochrome C, and Cleaved caspase3) with clinical outcomes of ALK+ anaplastic large-cell lymphoma.

Environmental- and injury-related epidemic-assistance investigations, 1946-2005.

Activation of the aryl hydrocarbon receptor by TCDD inhibits mammary tumor metastasis in a syngeneic mouse model of breast cancer.

Mutated p.4894 RyR1 function related to malignant hyperthermia and congenital neuromuscular disease with uniform type 1 fiber (CNMDU1).

Protective effects of N-acetylcysteine against arsenic-induced oxidative stress and reprotoxicity in male mice.

Regulation of apoptosis in human melanoma and neuroblastoma cells by statins, sodium arsenite and TRAIL: a role of combined treatment versus monotherapy.

Mitochondrial respiratory complex I dysfunction promotes tumorigenesis through ROS alteration and AKT activation.

Dioxin exposure and cancer risk in the Seveso Women's Health Study.

Molecular changes during arsenic-induced cell transformation.

MicroRNAs in inflammation and response to injuries induced by environmental pollution.

Biotransformation enzyme-dependent formation of micronucleus and multinuclei in cell line V79-hCYP2E1-hSULT1A1 by 2-nitropropane and N-nitrosodimethylamine.

A chemically induced vaccine strategy for prostate cancer.

Identification of aryl hydrocarbon receptor binding targets in mouse hepatic tissue treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Polymorphism of the aryl-hydrocarbon receptor gene in intron 10 of human cancers.

Increased hepatic Igf2 gene expression involves C/EBP β in TCDD-induced teratogenesis in rats.

Potential protective mechanisms of aryl hydrocarbon receptor (AHR) signaling in benign prostatic hyperplasia.

Arsenite induces cell transformation by reactive oxygen species, AKT, ERK1/2, and p70S6K1.

Quantification of PCDD/Fs and dioxin-like PCBs in small amounts of human serum using the sensitive H1L7.5c1 mouse hepatoma cell line: optimization and analysis of human serum samples from adolescents of the Flemish human biomonitoring program FLEHS II.

Gene expression changes in human prostate carcinoma cells exposed to genotoxic and nongenotoxic aryl hydrocarbon receptor ligands.

Up-regulation of cyclin D1 by JNK1/c-Jun is involved in tumorigenesis of human embryo lung fibroblast cells induced by a low concentration of arsenite.

An international validation study of a Bhas 42 cell transformation assay for the prediction of chemical carcinogenicity.

An endogenous tumour-promoting ligand of the human aryl hydrocarbon receptor.

Protective role of the methanolic extract of *Icacina trichantha* on sodium arsenite induced genotoxicity and hepatotoxicity.

Consumption patterns and risk assessment of crab consumers from the Newark Bay Complex, New Jersey, USA.

The possible roles of environmental factors and the aryl hydrocarbon receptor in the prevalence of thyroid diseases in Vietnam era veterans.

Arsenicals affect base excision repair by several mechanisms.

Third-generation Ah receptor-responsive luciferase reporter plasmids: amplification of dioxin-responsive elements dramatically increases CALUX bioassay sensitivity and responsiveness.

CD82 gene suppression in endometrial stromal cells leads to increase of the cell invasiveness in the endometriotic milieu.

The CALUX bio-assay: analytical comparison between mouse hepatoma cell lines with a low (H1L6.1c3) and high (H1L7.5c1) number of dioxin response elements.

Comparative toxicity of arsenic metabolites in human bladder cancer EJ-1 cells.

The p38 MAPK inhibitor SB203580 induces cytochrome P450 1A1 gene expression in murine and human hepatoma cell lines through ligand-dependent aryl hydrocarbon receptor activation.

Discovery and biological characterization of 1-(1H-indol-3-yl)-9H-pyrido[3,4-b]indole as an aryl hydrocarbon receptor activator generated by photoactivation of tryptophan by sunlight.

Biophoton emissions from cell cultures: biochemical evidence for the plasma membrane as the primary source.

Antiproliferative and anti-invasive effects of inorganic and organic arsenic compounds on human and murine melanoma cells in vitro.

A competitive co-cultivation assay for cancer drug specificity evaluation.

Aryl hydrocarbon receptor and aryl hydrocarbon nuclear translocator expression in human and rat placentas and transcription activity in human trophoblast cultures.

Protective effects of quercetin and chrysin against 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induced oxidative stress, body wasting and altered cytokine productions in rats.

The down-regulation of galectin-1 expression is a specific biomarker of arsenic toxicity.

Changes in iron-regulatory gene expression occur in human cell culture models of Parkinson's disease.

Identification of differentially expressed genes in the livers of chronically i-As-treated hamsters.

Interaction of aryl hydrocarbon receptor and NF- κ B subunit RelB in breast cancer is associated with interleukin-8 overexpression.

Proton MR spectroscopy of neural stem cells: does the proton-NMR peak at 1.28 ppm function as a biomarker for cell type or state?

Urinary trichlorophenol levels and increased risk of attention deficit hyperactivity disorder among US school-aged children.

Genetic polymorphisms in glutathione S-transferase (GST) superfamily and risk of arsenic-induced urothelial carcinoma in residents of southwestern Taiwan.

[Geographic epidemiology of soft tissue sarcomas, Trieste (1995 -2005)].

The response of HMGA1 to changes in oxygen availability is evolutionarily conserved.

Could *Malassezia* yeasts be implicated in skin carcinogenesis through the production of aryl-hydrocarbon receptor ligands?

Activation and up-regulation of translation initiation factor 4B contribute to arsenic-induced transformation.

Exposure to multiple pesticides and risk of non-Hodgkin lymphoma in men from six Canadian provinces.

Analysis of arsenic metabolites in HepG2 and AS3MT-transfected cells.

Effect of urinary total arsenic level and estimated glomerular filtration rate on the risk of renal cell carcinoma in a low arsenic exposure area.

Review of metastasizing (malignant) ameloblastoma (METAM): pattern of metastasis and treatment.

Prostate cancer and ambient pesticide exposure in agriculturally intensive areas in California.

In vitro and in vivo evaluation of chemically modified degradable starch microspheres for topical haemostasis.

Long-term effects on humoral immunity among workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Global DNA methylation in the mouse liver is affected by methyl deficiency and arsenic in a sex-dependent manner.

Characterization of estrogen quinone-derived protein adducts and their identification in human serum albumin derived from breast cancer patients and healthy controls.

[Protective effects of tetrandrine against congenital diaphragmatic hernia in rats].

[Non dietetic environmental risk factors in prostate cancer].

Uterine leiomyomata in a cohort of Great Lakes sport fish consumers.

Heat shock protein 47 expression in oral squamous cell carcinomas and upregulated by arecoline in human oral epithelial cells.

Role of the xenobiotic receptor in inflammatory bowel disease.

Plasma levels of polychlorinated biphenyls and risk of cutaneous malignant melanoma: a preliminary study.

A novel in vitro pancreatic carcinogenesis model.

Epidemiological approaches in the investigation of environmental causes of cancer: the case of dioxins and water disinfection by-products.

Uremic toxins inhibit transport by breast cancer resistance protein and multidrug resistance protein 4 at clinically relevant concentrations.

[Polychlorinated dibenzofurans and cancer].

Resveratrol interacts with estrogen receptor- β to inhibit cell replicative growth and enhance stress resistance by upregulating mitochondrial superoxide dismutase.

Activation of c-Src/HER1/STAT5b and HER1/ERK1/2 signaling pathways and cell migration by hexachlorobenzene in MDA-MB-231 human breast cancer cell line.

L-cysteine as a regulator for arsenic-mediated cancer-promoting and anti-cancer effects.

Molecular and functional characterization of aryl hydrocarbon receptor nuclear translocator 1 (ARNT1) and ARNT2 in chicken (*Gallus gallus*).

Environmental toxicants and the developing immune system: a missing link in the global battle against infectious disease?

Aryl hydrocarbon receptor activation during pregnancy, and in adult nulliparous mice, delays the subsequent development of DMBA-induced mammary tumors.

Arsenite-induced apoptosis is prevented by selenite in A375 cell line.

Residential pesticides and childhood leukemia: a systematic review and meta-analysis.

Analysis of human cultured myotubes responses mediated by ryanodine receptor 1.

Arsenic: toxicity, oxidative stress and human disease.

Exacerbated vulnerability to oxidative stress in astrocytic C6 glioma cells with stable overexpression of the glutamine transporter slc38a1.

Aryl hydrocarbon receptor activation by TCDD reduces inflammation associated with Crohn's disease.

Ah receptor antagonism inhibits constitutive and cytokine inducible IL6 production in head and neck tumor cell lines.

Protective effects of plasma alpha-tocopherols on the risk of inorganic arsenic-related urothelial carcinoma.

Synergism between 2,3,7,8-tetrachlorodibenzo-p-dioxin and 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone on lung tumor incidence in mice.

Oxidative stress and hepatic stellate cell activation are key events in arsenic induced liver fibrosis in mice.

Neuroprotective effects of KR-62980, a new PPAR γ agonist, against chemical ischemia-reperfusion in SK-N-SH cells.

Aryl hydrocarbon receptor ligand 2,3,7,8-tetrachlorodibenzo-p-dioxin enhances liver damage in bile duct-ligated mice.

Suppression of the proinflammatory response of metastatic melanoma cells increases TRAIL-induced apoptosis.

Inhibitory effects of ethacrynic acid analogues lacking the α,β -unsaturated carbonyl unit and para-acylated phenols on human cancer cells.

Increased risk of non-Hodgkin lymphoma and serum organochlorine concentrations among neighbors of a municipal solid waste incinerator.

Mutant SOD1 and mitochondrial damage alter expression and splicing of genes controlling neurogenesis in models of neurodegeneration.

Expression of the Wilm's tumor gene WT1 during diaphragmatic development in the nitrofen model for congenital diaphragmatic hernia.

Differential effects of indirubin and 2,3,7,8-tetrachlorodibenzo-p-dioxin on the aryl hydrocarbon receptor (AhR) signalling in liver progenitor cells.

Camel urine inhibits the cytochrome P450 1a1 gene expression through an AhR-dependent mechanism in Hepa 1c1c7 cell line.

Association between glycodelin and aryl hydrocarbon receptor in Iranian breast cancer patients: impact of environmental endocrine disrupting chemicals.

[Polymorphism of TNF gene and CPOX gene in chemical industry workers].

Metformin represses self-renewal of the human breast carcinoma stem cells via inhibition of estrogen receptor-mediated OCT4 expression.

2,4,6-Trichlorophenol.

2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Does uremia cause vascular dysfunction?

An evaluation of single nucleotide polymorphisms in the human aryl hydrocarbon receptor-interacting protein (AIP) gene.

[Classification as carcinogenic for 2,3,7,8-tetrachlorodibenzo-para-dioxin: an eventful journey].

Chronic exposure to arsenite induces S100A8 and S100A9 expression in rat RBL-2H3 mast cells.

Muscle weakness in Ryr114895T/WT knock-in mice as a result of reduced ryanodine receptor Ca²⁺ ion permeation and release from the sarcoplasmic reticulum.

Phase III, randomized study of the effects of parenteral iron, oral iron, or no iron supplementation on the erythropoietic response to darbepoetin alfa for patients with chemotherapy-associated anemia.

Gene polymorphisms of glutathione S-transferase omega 1 and 2, urinary arsenic methylation profile and urothelial carcinoma.

Carcinogenic effects of "whole-life" exposure to inorganic arsenic in CD1 mice.

Residential exposure to pesticides and childhood leukaemia: a systematic review and meta-analysis.

Synthesis and biological evaluation of some nitrogen containing steroidal heterocycles.

Selective ascorbate toxicity in malignant mesothelioma: a redox Trojan mechanism.

2,3,7,8-tetrachlorodibenzo-p-dioxin induced autophagy in a bovine kidney cell line.

Differential cytotoxic effects of sodium meta-arsenite on human cancer cells, dental papilla stem cells and somatic cells correlate with telomeric properties and gene expression.

The constitutively active Ah receptor (CA-AhR) mouse as a model for dioxin exposure - effects in reproductive organs.

Dietary ligands of the aryl hydrocarbon receptor induce anti-inflammatory and immunoregulatory effects on murine dendritic cells.

Licorice extract increases cyclophosphamide teratogenicity by upregulating the expression of cytochrome P-450 2B mRNA.

Molecular mechanisms of cold-induced CYP1A activation in rat liver microsomes.

Rat H9c2 cardiac myocytes are sensitive to arsenite due to a modest activation of transcription factor Nrf2.

Sodium arsenite dependent protein expression analysis on human embryonic carcinoma (NCCIT) cell line.

Quantitation of benzo[a]pyrene metabolic profiles in human bronchoalveolar (H358) cells by stable isotope dilution liquid chromatography-atmospheric pressure chemical ionization mass spectrometry.

Dose-dependent urinary phenotype of inorganic arsenic methylation in mice with a focus on trivalent methylated metabolites.

Artificial-turf playing fields: contents of metals, PAHs, PCBs, PCDDs and PCDFs, inhalation exposure to PAHs and related preliminary risk assessment.

Multivariate toxicity profiles and QSAR modeling of non-dioxin-like PCBs--an investigation of in vitro screening data from ultra-pure congeners.

Inhibition by resistant starch of red meat-induced promutagenic adducts in mouse colon.

Construction and characterization of hepatocyte nuclear factor HNF4alpha1 over-expressing cell line derived from human hepatoma HepG2 cells.

Transcriptional modulation of the NAD(P)H:quinone oxidoreductase 1 by mercury in human hepatoma HepG2 cells.

A novel application of the Margin of Exposure approach: segregation of tobacco smoke toxicants.

Non-additive hepatic gene expression elicited by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and 2,2',4,4',5,5'-hexachlorobiphenyl (PCB153) co-treatment in C57BL/6 mice.

In vitro modulation of intracellular receptor signaling and cytotoxicity induced by extracts of cyanobacteria, complex water blooms and their fractions.

Photoirradiation of dehydropyrrolizidine alkaloids--formation of reactive oxygen species and induction of lipid peroxidation.

Photoirradiation of polycyclic aromatic hydrocarbon diones by UVA light leading to lipid peroxidation.

Paclitaxel conjugation with the analog of the gonadotropin-releasing hormone as a targeting moiety.

The aryl hydrocarbon receptor interacts with ATP5¹, a subunit of the ATP synthase complex, and modulates mitochondrial function.

The interplay of the aryl hydrocarbon receptor and β -catenin alters both AhR-dependent transcription and Wnt/ β -catenin signaling in liver progenitors.

Vacuolar H⁺-ATPase c protects glial cell death induced by sodium nitroprusside under glutathione-depleted condition.

Detoxification of a carcinogenic paint preservative by *Blumea malcolmii* Hook cell cultures.

Herbal bioactivation, molecular targets and the toxicity relevance.

Effect of oral coadministration of artesunate with ferrous sulfate on rat liver mitochondrial membrane permeability transition.

A study of the relative importance of the peroxiredoxin-, catalase-, and glutathione-dependent systems in neural peroxide metabolism.

Sodium arsenite and hyperthermia modulate cisplatin-DNA damage responses and enhance platinum accumulation in murine metastatic ovarian cancer xenograft after hyperthermic intraperitoneal chemotherapy (HIPEC).

Lack of change in microRNA expression in adult mouse liver following treatment with benzo(a)pyrene despite robust mRNA transcriptional response.

Modulation of mast cell adhesion, proliferation, and cytokine secretion on electrospun bioresorbable vascular grafts.

Protective role of selenium against over-expression of cancer-related apoptotic genes induced by o-cresol in rats.

Artemisinin production in *Artemisia annua*: studies in planta and results of a novel delivery method for treating malaria and other neglected diseases.

Mercapturic acids as metabolites of alkylating substances in urine samples of German inhabitants.

Effect of sodium arsenite dose administered in the drinking water on the urinary bladder epithelium of female arsenic (+3 oxidation state) methyltransferase knockout mice.

An untargeted multi-technique metabolomics approach to studying intracellular metabolites of HepG2 cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Mechanisms of induction of cytosolic and microsomal glutathione transferase (GST) genes by xenobiotics and pro-inflammatory agents.

Effect of pertussis toxin and herbimycin A on proteinase-activated receptor 2-mediated cyclooxygenase 2 expression in *Helicobacter pylori*-infected gastric epithelial AGS cells.

Cigarette smoke increases susceptibility to tuberculosis--evidence from in vivo and in vitro models.

In vitro toxicity profiling of ultrapure non-dioxin-like polychlorinated biphenyl congeners and their relative toxic contribution to PCB mixtures in humans.

Aryl hydrocarbon receptor ligands of widely different toxic equivalency factors induce similar histone marks in target gene chromatin.

Dioxin exposure of human CD34+ hemopoietic cells induces gene expression modulation that recapitulates its in vivo clinical and biological effects.

Differences in TCDD-elicited gene expression profiles in human HepG2, mouse Hepa1c1c7 and rat H4IIE hepatoma cells.

c-Src is required for complex formation between the hepatitis C virus-encoded proteins NS5A and NS5B: a prerequisite for replication.

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters sebaceous gland cell differentiation in vitro.

Retention and maternal transfer of brominated dioxins in zebrafish (*Danio rerio*) and effects on reproduction, aryl hydrocarbon receptor-regulated genes, and ethoxyresorufin-O-deethylase (EROD) activity.

Dioxin toxicity, aryl hydrocarbon receptor signaling, and apoptosis-persistent pollutants affect programmed cell death.

Specific in vitro toxicity of crude and refined petroleum products: 3. Estrogenic responses in mammalian assays.

Bacterial cellulose as a potential vascular graft: Mechanical characterization and constitutive model development.

The ATP-binding cassette transporter ABCB6 is induced by arsenic and protects against arsenic cytotoxicity.

Cyclooxygenase-2 contributes to functional changes seen on experimental hemorrhagic cystitis induced by ifosfamide in rat urinary bladder.

Singlet oxygen mediated DNA degradation by copper nanoparticles: potential towards cytotoxic effect on cancer cells.

Coenzyme Q10 counteracts testicular injury induced by sodium arsenite in rats.

Proteomic mapping of bezafibrate-treated human hepatocytes in primary culture using two-dimensional liquid chromatography.

Chlorinated benzenes cause concomitantly oxidative stress and induction of apoptotic markers in lung epithelial cells (A549) at nonacute toxic concentrations.

Human CYP2S1 metabolizes cyclooxygenase- and lipoxygenase-derived eicosanoids.

Aryl hydrocarbon receptor-mediated up-regulation of ATP-driven xenobiotic efflux transporters at the blood-brain barrier.

Detection of thyroid hormone receptor disruptors by a novel stable in vitro reporter gene assay.

Neural precursor cell proliferation is disrupted through activation of the aryl hydrocarbon receptor by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Regulation of benzo[a]pyrene-mediated DNA- and glutathione-adduct formation by 2,3,7,8-tetrachlorodibenzo-p-dioxin in human lung cells.

Human cytochrome P450 1A1 is a novel target gene of liver X receptor $\hat{\pm}$.

NTP toxicity studies of toxicity studies of 2,4-decadienal (CAS No. 25152-84-5) administered by gavage to F344/N Rats and B6C3F1 mice.

Dioxin furan blood lipid and attic dust concentrations in populations living near four wood treatment facilities in the United States.

DNA damage induced by shikonin in the presence of Cu(II) ions: potential mechanism of its activity to apoptotic cell death.

Metabolic response to low-level toxicant exposure in a novel renal tubule epithelial cell system.

Broad-range antagonistic rhizobacteria *Pseudomonas fluorescens* and *Serratia plymuthica* suppress *Agrobacterium* crown gall tumours on tomato plants.

\hat{I}^2 -dicarbonyl enolates: a new class of neuroprotectants.

In vivo and in vitro mixed-function oxygenase activity and vitellogenin induction in fish and in fish and rat liver cells by stilbenes isolated from scotch pine (*Pinus sylvestris*).

Calcium/calmodulin-dependent protein kinase IV involvement in the pathophysiology of glucotoxicity in rat pancreatic \hat{I}^2 -cells.

Prior exposure to organophosphorus and organochlorine pesticides increases the allergic potential of environmental chemical allergens in a local lymph node assay.

Paraquat induces cyclooxygenase-2 (COX-2) implicated toxicity in human neuroblastoma SH-SY5Y cells.

Variable toxicological response to the loss of OXPHOS through 1-methyl-4-phenylpyridinium-induced mitochondrial damage and anoxia in diverse neural immortal cell lines.

Identification of differential hepatic proteins in rare minnow (*Gobiocypris rarus*) exposed to pentachlorophenol (PCP) by proteomic analysis.

Sensitivity of lamprey ammocoetes to six chemicals.

Assessing the cancer risk associated with arsenic-contaminated seafood.

Role of autophagy in protection afforded by hypoxic preconditioning against MPP⁺-induced neurotoxicity in SH-SY5Y cells.

Identification of PDL-1 as a novel biomarker of sensitizer exposure in dendritic-like cells.

Areas with high soil percolation by herbicides have higher incidence of low-grade non-Hodgkin lymphomas.

Dietary olive oil effect on antioxidant status and fatty acid profile in the erythrocyte of 2,4-D- exposed rats.

Evaluation of diuron (3-[3,4-dichlorophenyl]-1,1-dimethyl urea) in a two-stage mouse skin carcinogenesis assay.

Paraquat exposure induces nuclear translocation of glyceraldehyde-3-phosphate dehydrogenase (GAPDH) and the activation of the nitric oxide-GAPDH-Siah cell death cascade.

An interesting case of iron deficiency anemia.

Self-reported exposure to pesticides in residential settings and risk of breast cancer: a case-control study.

Desmoplastic small round-cell tumor: an adult with previous exposure to agent orange.

Simvastatin attenuates acrolein-induced mucin production in rats: involvement of the Ras/extracellular signal-regulated kinase pathway.

Assessment of chemical effects on aromatase activity using the H295R cell line.

Activation of apoptosis signal-regulating kinase 1 is a key factor in paraquat-induced cell death: modulation by the Nrf2/Trx axis.

Atrazine affects kidney and adrenal hormones (AHs) related genes expressions of rare minnow (*Gobiocypris rarus*).

Mortality patterns of Army Chemical Corps veterans who were occupationally exposed to herbicides in Vietnam.

Mitochondrial uncoupling protein-2 (UCP2) mediates leptin protection against MPP⁺ toxicity in neuronal cells.

[Thyroid disruption induced by pentachlorophenol].

[Analysis of cardiac toxicity caused by cyclophosphamide in the H9c2 cell line and isolated and perfused rat hearts].

Urethral carcinoma and hyperplasia in male and female B6C3F1 mice treated with 3,3',4,4'-tetrachloroazobenzene (TCAB).

Cigarette smoke total particulate matter increases mucous secreting cell numbers in vitro: a potential model of goblet cell hyperplasia.

Studies on glyphosate-induced carcinogenicity in mouse skin: a proteomic approach.

Acrolein induces apoptosis through the death receptor pathway in A549 lung cells: role of p53.

Intermediate filament carbonylation during acute acrolein toxicity in A549 lung cells: functional consequences, chaperone redistribution, and protection by bisulfite.

Water-Soluble alpha,beta-unsaturated aldehydes of cigarette smoke induce carbonylation of human serum albumin.

Toxicity of smoke extracts towards A549 lung cells: role of acrolein and suppression by carbonyl scavengers.

Mitotic crossing-over induced by two commercial herbicides in diploid strains of the fungus *Aspergillus nidulans*.

Protective effects of *Forsythia suspensa* extract against oxidative stress induced by diquat in rats.

Molecular regulations induced by acrolein in neuroblastoma SK-N-SH cells: relevance to Alzheimer's disease.

Ovarian folliculogenesis: detrimental effect of prenatal exposure to cyclophosphamide: a preliminary study.

Tacrolimus modulates dendritic cell activation in the sensitization phase of allergic contact dermatitis.

Cytotoxicity and regenerative proliferation as the mode of action for diuron-induced urothelial carcinogenesis in the rat.

NF-kappaB mediates MPP+-induced apoptotic cell death in neuroblastoma cells SH-EP1 through JNK and c-Jun/AP-1.

Cause-specific mortality of Dutch chlorophenoxy herbicide manufacturing workers.

Oxidatively generated DNA damage induced by 3-amino-5-mercapto-1,2,4-triazole, a metabolite of carcinogenic amitrole.

Acetaminophen, via its reactive metabolite N-acetyl-p-benzo-quinoneimine and transient receptor potential ankyrin-1 stimulation, causes neurogenic inflammation in the airways and other tissues in rodents.

Polymorphisms in one-carbon metabolism pathway genes, urinary arsenic profile, and urothelial carcinoma.

DJ-1 as a modulator of autophagy: an hypothesis.

Influence of cinnamaldehyde on viral myocarditis in mice.

Cytotoxic effect of trans-cinnamaldehyde on human leukemia K562 cells.

Arsenic trioxide and ascorbic acid demonstrate promising activity against primary human CLL cells in vitro.

Bicyclic triterpenoid Iripallidal induces apoptosis and inhibits Akt/mTOR pathway in glioma cells.

Selective stimulation by cinnamaldehyde of progesterone secretion in human adrenal cells.

Ocotea quixos Lam. essential oil: in vitro and in vivo investigation on its anti-inflammatory properties.

Aqueous cinnamon extract (ACE-c) from the bark of *Cinnamomum cassia* causes apoptosis in human cervical cancer cell line (SiHa) through loss of mitochondrial membrane potential.

The cinnamon-derived dietary factor cinnamic aldehyde activates the Nrf2-dependent antioxidant response in human epithelial colon cells.

Lipid peroxidation product acrolein as a predictive biomarker of prostate carcinoma relapse after radical surgery.

[Effect of hepatocarcinogenicity of estragole on the glucocorticoid-mediated induction of liver-specific enzymes and the activity of the transcription factors FOXA and HNF4 in the liver of mouse and rat].

Potential effects of the herbicide Diuron on mammary and urinary bladder two-stage carcinogenesis in a female Swiss mouse model.

Robinetinidol-(4 β - \rightarrow 8)-epigallocatechin 3-O-gallate, a galloyl dimer prorobinetinidin from *Acacia mearnsii* De Wild, effectively protects human neuroblastoma SH-SY5Y cells against acrolein-induced oxidative damage.

Modulation of hydrogen peroxide and acrolein-induced oxidative stress, mitochondrial dysfunctions and redox regulated pathways by the *Bacopa monniera* extract: potential implication in Alzheimer's disease.

Cinnamaldehydes inhibit thioredoxin reductase and induce Nrf2: potential candidates for cancer therapy and chemoprevention.

Identification of euglenophycin--a toxin found in certain euglenoids.

Effects of repeated seafood consumption on urinary excretion of arsenic species by volunteers.

Composition, antimicrobial activity and in vitro cytotoxicity of essential oil from *Cinnamomum zeylanicum* Blume (Lauraceae).

Renal oxygenation suppresses VHL loss-induced senescence that is caused by increased sensitivity to oxidative stress.

Selective induction of catalase-mediated autophagy by dihydrocapsaicin in lung cell lines.

Developmental arrest of *Caenorhabditis elegans* BRAP-2 mutant exposed to oxidative stress is dependent on BRC-1.

SIRT1 promotes proliferation and prevents senescence through targeting LKB1 in primary porcine aortic endothelial cells.

Regulatory effect of cinnamaldehyde on monocyte/macrophage-mediated inflammatory responses.

High-throughput gene expression analysis of intestinal intraepithelial lymphocytes after oral feeding of carvacrol, cinnamaldehyde, or *Capsicum oleoresin*.

Inhibition of aryl hydrocarbon receptor-dependent transcription by resveratrol or kaempferol is independent of estrogen receptor \pm expression in human breast cancer cells.

Thyroid follicular lesions induced by oral treatment for 2 years with 2,3,7,8-tetrachlorodibenzo-p-dioxin and dioxin-like compounds in female Harlan Sprague-Dawley rats.

A novel cell permeant peptide inhibitor of MAPKAP kinase II inhibits intimal hyperplasia in a human saphenous vein organ culture model.

Radiochemical synthesis, rodent biodistribution and tumor uptake, and dosimetry calculations of [^{14}C] methylated LY2181308.

[Inspect aging psoriasis patients minutely! Psoriasis or skin cancer?].

Functional analysis of six human aryl hydrocarbon receptor variants in human breast cancer and mouse hepatoma cell lines.

Dioxin toxicity in vivo results from an increase in the dioxin-independent transcriptional activity of the aryl hydrocarbon receptor.

Breast cancer stem-like cells are inhibited by a non-toxic aryl hydrocarbon receptor agonist.

Toxicology and carcinogenesis studies of 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (CAS No. 31508-00-6) in female harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 3,3',4,4'-tetrachloroazobenzene (TCAB) (CAS No. 14047-09-7) in Harlan Sprague-Dawley rats and B6C3F1 mice (gavage studies).

A cluster of inflammatory breast cancer (IBC) in an office setting: additional evidence of the importance of environmental factors in IBC etiology.

Body mass index, agricultural pesticide use, and cancer incidence in the Agricultural Health Study cohort.

Creation of a novel peptide with enhanced nuclear localization in prostate and pancreatic cancer cell lines.

Toxicogenomic analysis of exposure to TCDD, PCB126 and PCB153: identification of genomic biomarkers of exposure to AhR ligands.

hsa-miR-191 is a candidate oncogene target for hepatocellular carcinoma therapy.

The activated aryl hydrocarbon receptor synergizes mitogen-induced murine liver hyperplasia.

Arsenic-induced cell proliferation is associated with enhanced ROS generation, Erk signaling and CyclinA expression.

[Establishment of an erythroleukemia model in CB6F1 mice by transplant with haploidentical mouse leukemic cell line FBL-3].

Lymphocyte-based determination of susceptibility to malignant hyperthermia: a pilot study in swine.

Non-genomic action of TCDD to induce inflammatory responses in HepG2 human hepatoma cells and in liver of C57BL/6J mice.

Short course pre-operative ferrous sulphate supplementation--is it worthwhile in patients with colorectal cancer?

Facile synthesis of carbon-11-labeled cholesterol-based cationic lipids as new potential PET probes for imaging of gene delivery in cancer.

Food safety.

Anti-mutagenic and pro-apoptotic effects of apigenin on human chronic lymphocytic leukemia cells.

Manipulating tumor acidification as a cancer treatment strategy.

Resveratrol prevents epigenetic silencing of BRCA-1 by the aromatic hydrocarbon receptor in human breast cancer cells.

Flavin-containing monooxygenase-3: induction by 3-methylcholanthrene and complex regulation by xenobiotic chemicals in hepatoma cells and mouse liver.

Mechanistic insights into the events that lead to synergistic induction of interleukin 6 transcription upon activation of the aryl hydrocarbon receptor and inflammatory signaling.

Reactive oxygen species (ROS) reduce the expression of BRAK/CXCL14 in human head and neck squamous cell carcinoma cells.

Implication of TAp73 in the p53-independent pathway of Puma induction and Puma-dependent apoptosis in primary cortical neurons.

A review of pesticide exposure and cancer incidence in the Agricultural Health Study cohort.

Assisted ventilation modes reduce the expression of lung inflammatory and fibrogenic mediators in a model of mild acute lung injury.

Arsenic antagonizes the Hedgehog pathway by preventing ciliary accumulation and reducing stability of the Gli2 transcriptional effector.

[Chronic exposure to organochlorine compounds and health effects in adults: cancer, non-Hodgkin lymphoma. Review of literature].

Mammary carcinogen-protein binding potentials: novel and biologically relevant structure-activity relationship model descriptors.

2,3,7,8-Tetrachlorodibenzo-p-dioxin up-regulates stathmin 1 in the eye: suggestive evidence for the involvement of stathmin 1 in accelerated eye opening in mice induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The repressive effect of NF-kappaB on p53 by mot-2 is involved in human keratinocyte transformation induced by low levels of arsenite.

Functional properties of RYR1 mutations identified in Swedish patients with malignant hyperthermia and central core disease.

A pharmacokinetic and safety study of intravenous arsenic trioxide in adult cancer patients with renal impairment.

p52-Bcl3 complex promotes cyclin D1 expression in BEAS-2B cells in response to low concentration arsenite.

Epigallocatechin-3-gallate suppresses the expression of HSP70 and HSP90 and exhibits anti-tumor activity in vitro and in vivo.

Angiosarcoma: clinical and molecular insights.

Functional studies of RYR1 mutations in the skeletal muscle ryanodine receptor using human RYR1 complementary DNA.

2,3,7,8-tetrachlorodibenzo-p-dioxin counteracts the p53 response to a genotoxicant by upregulating expression of the metastasis marker agr2 in the hepatocarcinoma cell line HepG2.

2,3,7,8-tetrachlorodibenzo-p-dioxin impairs an insulin signaling pathway through the induction of tumor necrosis factor-alpha in adipocytes.

Deciphering diseases and biological targets for environmental chemicals using toxicogenomics networks.

Arsenic exposure in utero and nonepidermal proliferative response in adulthood in Tg.AC mice.

Cancer collusion? Dietary fat may modify dioxin-induced mammary cancer risk.

Maternal dioxin exposure combined with a diet high in fat increases mammary cancer incidence in mice.

Progesterone receptor membrane component 1 (Pgrmc1): a heme-1 domain protein that promotes tumorigenesis and is inhibited by a small molecule.

Disruption of CLOCK-BMAL1 transcriptional activity is responsible for aryl hydrocarbon receptor-mediated regulation of Period1 gene.

Kynurenic acid is a potent endogenous aryl hydrocarbon receptor ligand that synergistically induces interleukin-6 in the presence of inflammatory signaling.

N-aryltriazole ribonucleosides with potent antiproliferative activity against drug-resistant pancreatic cancer.

Differential regulation of the dioxin-induced Cyp1a1 and Cyp1b1 genes in mouse hepatoma and fibroblast cell lines.

Dietary administration of sodium arsenite to rats: relations between dose and urinary concentrations of methylated and thio-metabolites and effects on the rat urinary bladder epithelium.

Enhancement of TAT cell membrane penetration efficiency by dimethyl sulphoxide.

[Effects of rosiglitazone on the Hep-2 cell proliferation, cell cycle and COX-2 expression].

Cytotoxicity and utility of 1-indanone in the synthesis of some new heterocycles.

HBx targeting to mitochondria and ROS generation are necessary but insufficient for HBV-induced cyclooxygenase-2 expression.

A hospital-based case-control study of non-Hodgkin lymphoid neoplasms in Shanghai: analysis of environmental and occupational risk factors by subtypes of the WHO classification.

Activation of Hedgehog signaling by the environmental toxicant arsenic may contribute to the etiology of arsenic-induced tumors.

Ischemia induces regulator of G protein signaling 2 (RGS2) protein upregulation and enhances apoptosis in astrocytes.

Stabilization of transcription factor Nrf2 by tBHQ prevents oxidative stress-induced amyloid beta formation in NT2N neurons.

Speciation of arsenic trioxide penetrates into cerebrospinal fluid in patients with acute promyelocytic leukemia.

Chronic diseases and early exposure to airborne mixtures: Part III. Potential origin of pre-menopausal breast cancers.

Colon cancer chemopreventive activities of pomegranate ellagitannins and urolithins.

Suppression of p53 and p21CIP1/WAF1 reduces arsenite-induced aneuploidy.

beta-TrCP inhibition reduces prostate cancer cell growth via upregulation of the aryl hydrocarbon receptor.

Expression of CXCL10 in cultured cortical neurons.

Aryl hydrocarbon receptor regulates cell cycle progression in human breast cancer cells via a functional interaction with cyclin-dependent kinase 4.

Activation of the aryl hydrocarbon receptor pathway enhances cancer cell invasion by upregulating the MMP expression and is associated with poor prognosis in upper urinary tract urothelial cancer.

Toxic effects of lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on development of male reproductive system: involvement of antioxidants, oxidants, and p53 protein.

Re: False-positive results in cancer epidemiology: a plea for epistemological modesty.

Ischemia-activated microglia induces neuronal injury via activation of gp91phox NADPH oxidase.

[Neurodevelopmental disorders in response to hormonally active environmental pollutants].

Anti-mutagenic and anti-carcinogenic potential of the carotenoid meso-zeaxanthin.

No evidence of increased risk of soft tissue sarcomas in the neighborhood of a steel foundry in Verona.

Indian spice curcumin may be an effective strategy to combat the genotoxicity of arsenic in Swiss albino mice.

C-11 radiochemistry in cancer imaging applications.

Fluorescent silica nanoparticles for cancer imaging.

Function and expression of ATP-binding cassette transporters in cultured human Y79 retinoblastoma cells.

Aryl hydrocarbon receptor functions as a potent coactivator of E2F1-dependent transcription activity.

Abnormal regulation of chemokine TECK and its receptor CCR9 in the endometriotic milieu is involved in pathogenesis of endometriosis by way of enhancing invasiveness of endometrial stromal cells.

Molecular mechanisms of the physiological functions of the aryl hydrocarbon (dioxin) receptor, a multifunctional regulator that senses and responds to environmental stimuli.

Residential pesticides and childhood leukemia: a systematic review and meta-analysis.

Discrete time hazards models for occupational and environmental cohort analyses.

Receptor- and reactive intermediate-mediated mechanisms of teratogenesis.

RE: "Mortality rates among trichlorophenol workers with exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin".

Assessment of the cytotoxicity and genotoxicity of haloacetic acids using microplate-based cytotoxicity test and CHO/HGPRT gene mutation assay.

High-protein/high red meat and high-carbohydrate weight-loss diets do not differ in their effect on faecal water genotoxicity tested by use of the WIL2-NS cell line and with other biomarkers of bowel health.

Screening level assessment of risks due to dioxin emissions from burning oil from the BP Deepwater Horizon Gulf of Mexico spill.

Mercury modulates the CYP1A1 at transcriptional and posttranslational levels in human hepatoma HepG2 cells.

Evidence supporting a role for N-(3-formyl-3,4-dehydropiperidino)lysine accumulation in Müller glia dysfunction and death in diabetic retinopathy.

The malondialdehyde-derived fluorophore DHP-lysine is a potent sensitizer of UVA-induced photooxidative stress in human skin cells.

Dioxins and human toxicity.

Effects of the compounds MV8608 and MV8612 obtained from *Mandevilla velutina* in the model of hemorrhagic cystitis induced by cyclophosphamide in rats.

Detoxifying carcinogenic polyhalogenated quinones by hydroxamic acids via an unusual double Lossen rearrangement mechanism.

Multiphoton-absorption-induced-luminescence (MAIL) imaging of tumor-targeted gold nanoparticles.

Evaluation of a bioluminescent mouse model expressing aromatase PII-promoter-controlled luciferase as a tool for the study of endocrine disrupting chemicals.

Radioiodinated 4-iodo-L-meta-tyrosine, a system L selective artificial amino acid: molecular design and transport characterization in Chinese hamster ovary cells (CHO-K1 cells).

Alkylation of the tumor suppressor PTEN activates Akt and β -catenin signaling: a mechanism linking inflammation and oxidative stress with cancer.

Dietary intake of persistent organic pollutants and potential health risks via consumption of global aquatic products.

Evaluation of the genotoxicity of 10 selected dietary/environmental compounds with the in vitro micronucleus cytokinesis-block assay in an interlaboratory comparison.

Metabolic bioactivation of oestradiol-17beta (E2beta) in mouse colon epithelial cells bearing ApcMin mutation.

Transcriptional and posttranscriptional regulation of CYP1A1 by vanadium in human hepatoma HepG2 cells.

Transcription of the Epstein-Barr virus lytic cycle activator BZLF-1 during oxidative stress induction.

An efficient one-pot synthesis of heterocycle-fused 1,2,3-triazole derivatives as anti-cancer agents.

Inhibition of in vitro cytokine production by human peripheral blood mononuclear cells treated with xenobiotics: implications for the prediction of general toxicity and immunotoxicity.

Involvement of aryl hydrocarbon receptor in basal and 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced expression of target genes in primary human hepatocytes.

A system-level investigation into the cellular toxic response mechanism mediated by AhR signal transduction pathway.

Modulation of NAD(P)H:quinone oxidoreductase by vanadium in human hepatoma HepG2 cells.

AhR-agonistic, anti-androgenic, and anti-estrogenic potencies of 2-isopropylthioxanthone (ITX) as determined by in vitro bioassays and gene expression profiling.

Outcomes after radical prostatectomy among men who are candidates for active surveillance: results from the SEARCH database.

Regulation of the human CHOP gene promoter by the stress response transcription factor ATF5 via the AARE1 site in human hepatoma HepG2 cells.

Cytoprotective effects of silymarin on epithelial cells against arsenic-induced apoptosis in contrast with quercetin cytotoxicity.

Inhibition of connexin 43 gap junction channels by the endocrine disruptor ioxynil.

Aryl hydrocarbon receptor is a transcriptional activator of the human breast cancer resistance protein (BCRP/ABCG2).

Cell viability and PSA secretion assays in LNCaP cells: a tiered in vitro approach to screen chemicals with a prostate-mediated effect on male reproduction within the ReProTect project.

In vitro propagation of an endangered medicinal herb *Chlorophytum borivillianum* Sant. et Fernand. through somatic embryogenesis.

Transcriptional regulation of bone sialoprotein gene by *Porphyromonas gingivalis* lipopolysaccharide.

Association between As and Cu renal cortex accumulation and physiological and histological alterations after chronic arsenic intake.

Arsenic species, AS3MT amount, and AS3MT gene expression in different brain regions of mouse exposed to arsenite.

Cellular uptake, subcellular distribution and toxicity of arsenic compounds in methylating and non-methylating cells.

Low-dose synergistic immunosuppression of T-dependent antibody responses by polycyclic aromatic hydrocarbons and arsenic in C57BL/6J murine spleen cells.

Role for tyrosine kinases in contraction of rat penile small arteries.

Multiple protective functions of catalase against intercellular apoptosis-inducing ROS signaling of human tumor cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces apoptosis in neural growth factor (NGF)-differentiated pheochromocytoma PC12 cells.

1-(3',5'-dihydroxyphenoxy)-7-(2'',4'',6-trihydroxyphenoxy)-2,4,9-trihydroxydibenzo-1,4-dioxin inhibits adipocyte differentiation of 3T3-L1 fibroblasts.

Inhibition of poly (ADP-Ribose) polymerase-1 in telomerase deficient mouse embryonic fibroblasts increases arsenite-induced genome instability.

Estrogenic activity of coumestrol, DDT, and TCDD in human cervical cancer cells.

Elevated levels of volatile organic carcinogen and toxicant biomarkers in Chinese women who regularly cook at home.

Evaluation of a liver micronucleus assay in young rats (III): a study using nine hepatotoxicants by the Collaborative Study Group for the Micronucleus Test (CSGMT)/Japanese Environmental Mutagen Society (JEMS)-Mammalian Mutagenicity Study Group (MMS).

Hemorrhagic cystitis in a patient receiving docetaxel for prostate cancer.

Dioxin-like activity in the blood of Greenlandic Inuit and Danish women: a pilot study.

A remarkable new target gene for the dioxin receptor: The Vav3 proto-oncogene links AhR to adhesion and migration.

Induction of GST-P-positive proliferative lesions facilitating lipid peroxidation with possible involvement of transferrin receptor up-regulation and ceruloplasmin down-regulation from the early stage of liver tumor promotion in rats.

A critical role of SNF1A/dAMPKalpha (Drosophila AMP-activated protein kinase alpha) in muscle on longevity and stress resistance in *Drosophila melanogaster*.

Spatial variation in ambient air toxics concentrations and health risks between industrial-influenced, urban, and rural sites.

Effect of paraquat-induced oxidative stress on insulin regulation of insulin-like growth factor-binding protein-1 gene expression.

The selective beta1-adrenoceptor antagonist nebivolol is a potential oestrogen receptor agonist with neuroprotective abilities.

High frequency of fumigants and other toxic gases in imported freight containers--an underestimated occupational and community health risk.

Interaction between oxidative stress sensor Nrf2 and xenobiotic-activated aryl hydrocarbon receptor in the regulation of the human phase II detoxifying UDP-glucuronosyltransferase 1A10.

Effects of dioxin isomers on induction of AhRs and CYP1A1 in early developmental stage embryos of medaka (*Oryzias latipes*).

Heparan sulfation-dependent fibroblast growth factor signaling maintains embryonic stem cells primed for differentiation in a heterogeneous state.

Gender-linked haematopoietic and metabolic disturbances induced by a pesticide mixture administered at low dose to mice.

The effect of multigenerational diet containing genetically modified triticale on immune system in mice.

Comparison of carcinogen, carbon monoxide, and ultrafine particle emissions from narghile waterpipe and cigarette smoking: Sidestream smoke measurements and assessment of second-hand smoke emission factors.

Mutagenic activities of a chlorination by-product of butamifos, its structural isomer, and their related compounds.

Distinct regulation of insulin receptor substrate-1 and -2 by 90-kDa heat-shock protein in adrenal chromaffin cells.

Human cytochrome P450 2E1 and sulfotransferase 1A1 coexpressed in Chinese hamster V79 cells enhance spontaneous mutagenesis.

Intake and potential health risk of polycyclic aromatic hydrocarbons associated with seafood consumption in Korea from 2005 to 2007.

Paraquat activates the IRE1/ASK1/JNK cascade associated with apoptosis in human neuroblastoma SH-SY5Y cells.

Trivalent dimethylarsenic compound induces histone H3 phosphorylation and abnormal localization of Aurora B kinase in HepG2 cells.

Simultaneous quantification of 1,N2-propano-2'-deoxyguanosine adducts derived from acrolein and crotonaldehyde in human placenta and leukocytes by isotope dilution nanoflow LC nanospray ionization tandem mass spectrometry.

Arsenate and dimethylarsinic acid in drinking water did not affect DNA damage repair in urinary bladder transitional cells or micronuclei in bone marrow.

Case-control study on risk factors for leukaemia and brain tumours in children under 5 years in Germany.

Alteration of NRSF expression exacerbating 1-methyl-4-phenyl-pyridinium ion-induced cell death of SH-SY5Y cells.

Cruciferous nutraceutical 3H-1,2-dithiole-3-thione protects human primary astrocytes against neurocytotoxicity elicited by MPTP, MPP(+), 6-OHDA, HNE and acrolein.

The one stop shop: chemical causes and cures for cancer.

Comparative DNA microarray analysis of human monocyte derived dendritic cells and MUTZ-3 cells exposed to the moderate skin sensitizer cinnamaldehyde.

p38 MAPK and MMP-9 cooperatively regulate mucus overproduction in mice exposed to acrolein fog.

Role of NKX2-1 in N-bis(2-hydroxypropyl)-nitrosamine-induced thyroid adenoma in mice.

Impact of glyphosate on the development, fertility and demography of *Chrysoperla externa* (Neuroptera: Chrysopidae): ecological approach.

Pathogenic stimulation of intestinal stem cell response in *Drosophila*.

Arsenite and its metabolites, MMA(III) and DMA(III), modify CYP3A4, PXR and RXR alpha expression in the small intestine of CYP3A4 transgenic mice.

Inflammatory priming of the substantia nigra influences the impact of later paraquat exposure: Neuroimmune sensitization of neurodegeneration.

Glyphosate-based herbicides are toxic and endocrine disruptors in human cell lines.

Mortality rates among trichlorophenol workers with exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Changes of cytokine and nuclear factor-kappa B in acute paraquat poisoned rats].

Nitric oxide-mediated toxicity in paraquat-exposed SH-SY5Y cells: a protective role of 7-nitroindazole.

Evidence for toxicity differences between inorganic arsenite and thioarsenicals in human bladder cancer cells.

Agent Orange exposure, Vietnam war veterans, and the risk of prostate cancer.

Cancer incidence among paraquat exposed applicators in the agricultural health study: prospective cohort study.

Effects of co-administration of dietary sodium arsenite and an NADPH oxidase inhibitor on the rat bladder epithelium.

Influence of 70 nm silica particles in mice with cisplatin or paraquat-induced toxicity.

[Effects of ulinastatin to pro-inflammatory mediators in rats with acute paraquat intoxication].

Effects of an epidermal growth factor receptor inhibitor on arsenic associated toxicity in the rat bladder epithelium.

Potential mechanism for pentachlorophenol-induced carcinogenicity: a novel mechanism for metal-independent production of hydroxyl radicals.

Dimethylarsinic acid in drinking water changed the morphology of urinary bladder but not the expression of DNA repair genes of bladder transitional epithelium in F344 rats.

Occupational exposure to metribuzin and the incidence of cancer in the Agricultural Health Study.

[Dimethylarsinous acid-promoted skin tumorigenesis through the induction of oxidative stress in mice].

Evaluation of pathways involved in pentachlorophenol-induced apoptosis in rat neurons.

Acrolein-derived DNA adduct formation in human colon cancer cells: its role in apoptosis induction by docosahexaenoic acid.

Exposure to Agent Orange is a significant predictor of prostate-specific antigen (PSA)-based recurrence and a rapid PSA doubling time after radical prostatectomy.

Glutathione-S-transferase P protects against endothelial dysfunction induced by exposure to tobacco smoke.

Occupational exposure to pesticides and lymphoid neoplasms among men: results of a French case-control study.

The antioxidant glutathione in the fish cell lines EPC and BCF-2: response to model pro-oxidants as measured by three different fluorescent dyes.

Mutagenicity and sequence specificity of acrolein-DNA adducts.

[Expression of inflammatory factors in lung tissue of acute paraquat poisoned rats].

Heterocyclic aromatic amine pesticide use and human cancer risk: results from the U.S. Agricultural Health Study.

Genotoxicity of AMPA, the environmental metabolite of glyphosate, assessed by the Comet assay and cytogenetic tests.

Leaf anatomy and morphometry in three eucalypt clones treated with glyphosate.

Arsenite and its mono- and dimethylated trivalent metabolites enhance the formation of benzo[a]pyrene diol epoxide-DNA adducts in Xeroderma pigmentosum complementation group A cells.

Serum dioxin levels in former New Zealand sawmill workers twenty years after exposure to pentachlorophenol (PCP) ceased.

Acrolein toxicity: Comparison with reactive oxygen species.

Systematic review and meta-analysis of mortality in crop protection product manufacturing workers.

Upregulation of cellular glutathione by 3H-1,2-dithiole-3-thione as a possible treatment strategy for protecting against acrolein-induced neurocytotoxicity.

Involvement of ubiquitin proteasome system in protective mechanisms of Puerarin to MPP(+)-elicited apoptosis.

Growth arrest and DNA damage protein 45b (Gadd45b) protects retinal ganglion cells from injuries.

Prostate cancer control and survival in Vietnam veterans exposed to Agent Orange.

Effects of the endocrine disruptors atrazine and PCB 153 on the protein expression of MCF-7 human cells.

Modulation of intercellular ROS signaling of human tumor cells.

Increased sensitivity of glutathione S-transferase P-null mice to cyclophosphamide-induced urinary bladder toxicity.

Mortality rates among workers exposed to dioxins in the manufacture of pentachlorophenol.

4-Methoxycinnamaldehyde inhibited human respiratory syncytial virus in a human larynx carcinoma cell line.

The effects of N-acetyl cysteine, buthionine sulfoximine, diethyldithiocarbamate or 3-amino-1,2,4-triazole on antimycin A-treated Calu-6 lung cells in relation to cell growth, reactive oxygen species and glutathione.

Acrolein, a ubiquitous pollutant and lipid hydroperoxide product, inhibits antiviral activity of interferon-alpha: relevance to hepatitis C.

Rosiglitazone, a peroxisome proliferator-activated receptor-gamma agonist, attenuates acrolein-induced airway mucus hypersecretion in rats.

Comparison of rat olfactory mucosal responses to carcinogenic and non-carcinogenic chloracetanilides.

Silencing DJ-1 reveals its contribution in paraquat-induced autophagy.

Effect of sildenafil on acrolein-induced airway inflammation and mucus production in rats.

Comparison of sensitivity to arsenic compounds between a Bhas 42 cell transformation assay and a BALB/c 3T3 cell transformation assay.

Mutations in the *C. elegans* succinate dehydrogenase iron-sulfur subunit promote superoxide generation and premature aging.

The cinnamon-derived Michael acceptor cinnamic aldehyde impairs melanoma cell proliferation, invasiveness, and tumor growth.

Okadaic acid protects human neuroblastoma SH-SY5Y cells from 1-methyl-4-phenylpyridinium ion-induced apoptosis.

2'-Benzoyloxycinnamaldehyde inhibits tumor growth in H-ras12V transgenic mice via downregulation of metallothionein.

Arsenic methylation capability, myeloperoxidase and sulfotransferase genetic polymorphisms, and the stage and grade of urothelial carcinoma.

Changes in urinary arsenic methylation profiles in a 15-year interval after cessation of arsenic ingestion in southwest Taiwan.

Transport and metabolism of the antitumour drug candidate 2'-benzoyloxycinnamaldehyde in Caco-2 cells.

Influence of cobalamin on arsenic metabolism in Bangladesh.

1-Cyano-2,3-epithiopropene is a novel plant-derived chemopreventive agent which induces cytoprotective genes that afford resistance against the genotoxic alpha,beta-unsaturated aldehyde acrolein.

Protective mechanism of quercetin and rutin using glutathione metabolism on HO-induced oxidative stress in HepG2 cells.

Spice active principles as the inhibitors of human platelet aggregation and thromboxane biosynthesis.

The role of p38b MAPK in age-related modulation of intestinal stem cell proliferation and differentiation in Drosophila.

Protective effect of montelukast on paraquat-induced lung toxicity in rats.

Plasma pharmacokinetics and metabolism of the antitumour drug candidate 2'-benzoyloxycinnamaldehyde in rats.

Prolonged recruitment manoeuvre improves lung function with less ultrastructural damage in experimental mild acute lung injury.

Transcriptional changes associated with reduced spontaneous liver tumor incidence in mice chronically exposed to high dose arsenic.

Requirement of arsenic biomethylation for oxidative DNA damage.

Arsenic methylation, oxidative stress and cancer--is there a link?

Non-dioxin-like-PCBs phosphorylate Mdm2 at Ser166 and attenuate the p53 response in HepG2 cells.

Antioxidant activity of mangostin in cell-free system and its effect on K562 leukemia cell line in photodynamic therapy.

Reproductive lesions in female Harlan Sprague-Dawley rats following two-year oral treatment with dioxin and dioxin-like compounds.

Hypoxia and the metabolic phenotype of prostate cancer cells.

Effects of pomegranate chemical constituents/intestinal microbial metabolites on CYP1B1 in 22Rv1 prostate cancer cells.

Inflammatory and chloracne-like skin lesions in B6C3F1 mice exposed to 3,3',4,4'-tetrachloroazobenzene for 2 years.

Amended safety assessment of sodium picramate and picramic acid.

Initial report of a family registry of multiple myeloma.

Polymorphisms in arsenic metabolism genes, urinary arsenic methylation profile and cancer.

The inhibition effect of 2,3,7,8-tetrachlorinated dibenzo-p-dioxin-induced aryl hydrocarbon receptor activation in human hepatoma cells with the treatment of cadmium chloride.

A systematic review and meta-analysis of childhood leukemia and parental occupational pesticide exposure.

Aryl hydrocarbon receptor-mediated induction of the cytosolic phospholipase A(2)alpha gene by 2,3,7,8-tetrachlorodibenzo-p-dioxin in mouse hepatoma Hepa-1c1c7 cells.

Cross-talk between transcription factors AhR and Nrf2: lessons for cancer chemoprevention from dioxin.

Cancer incidence among pesticide applicators exposed to butylate in the Agricultural Health Study (AHS).

Comparative hepatotoxicity and clastogenicity of sodium arsenite and three petroleum products in experimental Swiss Albino Mice: the modulatory effects of Aloe vera gel.

Nrf2 protects against As(III)-induced damage in mouse liver and bladder.

CD147 silencing inhibits lactate transport and reduces malignant potential of pancreatic cancer cells in in vivo and in vitro models.

Cancer incidence in the population exposed to dioxin after the "Seveso accident": twenty years of follow-up.

Dioxin receptor deficiency impairs angiogenesis by a mechanism involving VEGF-A depletion in the endothelium and transforming growth factor-beta overexpression in the stroma.

Mortality in workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin at a trichlorophenol plant in New Zealand.

Expression of chloride channels in trachea-occluded hyperplastic lungs and nitrofen-induced hypoplastic lungs in rats.

Rapid inhibition of ongoing DNA synthesis in human glioma tissue by genistein.

Mechanisms of non-genotoxic carcinogens and importance of a weight of evidence approach.

Inhibition of UV-C light-induced apoptosis in liver cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The aryl hydrocarbon receptor as a target for estrogen receptor-negative breast cancer chemotherapy.

Differential cytotoxic effects of arsenic compounds in human acute promyelocytic leukemia cells.

Impact of life stage and duration of exposure on arsenic-induced proliferative lesions and neoplasia in C3H mice.

Autologous melanoma vaccine induces antitumor and self-reactive immune responses that affect patient survival and depend on MHC class II expression on vaccine cells.

TCDD mediates inhibition of p53 and activation of ERalpha signaling in MCF-7 cells at moderate hypoxic conditions.

Arsenite enhances the benzo[a]pyrene diol epoxide (BPDE)-induced mutagenesis with no marked effect on repair of BPDE-DNA adducts in human lung cells.

Synthesis and preclinical evaluation of [(11)C]PAQ as a PET imaging tracer for VEGFR-2.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) inhibits neurite outgrowth in differentiating human SH-SY5Y neuroblastoma cells.

Aryl hydrocarbon receptor inhibition downregulates the TGF-beta/Smad pathway in human glioblastoma cells.

In vitro evaluation of ferrihydrite as an enterosorbent for arsenic from contaminated drinking water.

Characterization of MCF mammary epithelial cells overexpressing the Arylhydrocarbon receptor (AhR).

Induction of apoptosis by phloroglucinol derivative from Ecklonia Cava in MCF-7 human breast cancer cells.

Determination of boron distribution in rat's brain, kidney and liver.

Protection of bleomycin-induced fibrosis and inflammation by taurine.

Taurine protects rat testes against NaAsO(2)-induced oxidative stress and apoptosis via mitochondrial dependent and independent pathways.

Melatonin reduces acute lung injury in endotoxemic rats.

The anticancer activity of lytic peptides is inhibited by heparan sulfate on the surface of the tumor cells.

Metal interference on luciferase activity induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in bioassays of recombinant mouse hepatoma cells.

Effect of dioxins on regulation of tyrosine hydroxylase gene expression by aryl hydrocarbon receptor: a neurotoxicology study.

[Model establishment of liver fibrosis in oral arsenic solution exposed mice].

Phytochemical, antibacterial, antiproliferative, and antioxidant potentials and DNA damage-protecting activity of *Acacia salicina* extracts.

Residential exposure to polychlorinated biphenyls and organochlorine pesticides and risk of childhood leukemia.

Parental exposure to pesticides and childhood brain cancer: U.S. Atlantic coast childhood brain cancer study.

Estrogen receptor subtype- and promoter-specific modulation of aryl hydrocarbon receptor-dependent transcription.

Mortality in employees at a New Zealand agrochemical manufacturing site.

Arsenic activates EGFR pathway signaling in the lung.

Dexamethasone enhances basal and TNF-alpha-stimulated production of PAI-1 via the glucocorticoid receptor regardless of 11beta-hydroxysteroid dehydrogenase 2 status in human proximal renal tubular cells.

Influence of aryl hydrocarbon- (Ah) receptor and genotoxins on DNA repair gene expression and cell survival of mouse hepatoma cells.

Differentiation of human osteosarcoma cells by isolated phlorotannins is subtly linked to COX-2, iNOS, MMPs, and MAPK signaling: implication for chronic articular disease.

Src supports UDP-glucuronosyltransferase-2B7 detoxification of catechol estrogens associated with breast cancer.

Agricultural pesticide use and pancreatic cancer risk in the Agricultural Health Study Cohort.

Ethnicity and incidence of Hodgkin lymphoma in Canadian population.

Suppression of cytochrome P450 1A1 expression induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in mouse hepatoma hepa-1c1c7 cells treated with serum of (-)-epigallocatechin-3-gallate- and green tea extract-administered rats.

Prospective study of chemical exposures and amyotrophic lateral sclerosis.

Effects of omega-3 fatty acids on components of the transforming growth factor beta-1 pathway: implication for dietary modification and prevention in ovarian cancer.

Structure-effect relationship in the down-regulation of glutaminase in cultured human cells by phenylarsenic compounds.

Dimethylarsine likely acts as a mouse-pulmonary tumor initiator via the production of dimethylarsine radical and/or its peroxy radical.

Dimethylarsine likely acts as a mouse-pulmonary tumor initiator via the production of dimethylarsine radical and/or its peroxy radical.

Deleting Ku70 is milder than deleting Ku80 in p53-mutant mice and cells.

Aryl hydrocarbon receptor pathway activation enhances gastric cancer cell invasiveness likely through a c-Jun-dependent induction of matrix metalloproteinase-9.

Potential therapeutic significance of increased expression of aryl hydrocarbon receptor in human gastric cancer.

[An improved BALB/c 3T3 cell transformation assay and its application in the cocarcinogenesis study].

Estrogen and TCDD influence RLN2 gene activity in estrogen receptor-positive human breast cancer cells.

Effects of nickel, chromate, and arsenite on histone 3 lysine methylation.

CYP1B1, but not CYP1A1, is downregulated by promoter methylation in colorectal cancers.

Functional characterization of ryanodine receptor (RYR1) sequence variants using a metabolic assay in immortalized B-lymphocytes.

Sodium arsenite induces ROS generation, DNA oxidative damage, HO-1 and c-Myc proteins, NF-kappaB activation and cell proliferation in human breast cancer MCF-7 cells.

Carcinogenesis studies of cresols in rats and mice.

The soluble nickel component of residual oil fly ash alters pulmonary host defense in rats.

A biological hazard of our age: bracken fern [*Pteridium aquilinum* (L.) Kuhn]--a review.

Repression of activated aryl hydrocarbon receptor-induced transcriptional activation by 5alpha-dihydrotestosterone in human prostate cancer LNCaP and human breast cancer T47D cells.

Toxic and chemopreventive ligands preferentially activate distinct aryl hydrocarbon receptor pathways: implications for cancer prevention.

Characterization of the pattern of the nongenomic signaling pathway through which TCDD-induces early inflammatory responses in U937 human macrophages.

Inhibition of androgen receptor transcriptional activity as a novel mechanism of action of arsenic.

Tumor promoting and co-carcinogenic effects in medium-term rat hepatocarcinogenesis are not modified by co-administration of 12 pesticides in mixture at acceptable daily intake.

Regulation of gap junctional intercellular communication by TCDD in HMEC and MCF-7 breast cancer cells.

Selection of cytotoxicity markers for the screening of new chemical entities in a pharmaceutical context: a preliminary study using a multiplexing approach.

Development of a GIS-based indicator for environmental pesticide exposure and its application to a Belgian case-control study on bladder cancer.

Cytotoxicity and gene expression profiling of two hydroxylated polybrominated diphenyl ethers in human H295R adrenocortical carcinoma cells.

Activation of the aryl hydrocarbon receptor by TCDD inhibits senescence: a tumor promoting event?

A new cross-talk between the aryl hydrocarbon receptor and RelB, a member of the NF-kappaB family.

A novel strategy utilizing ultrasound for antigen delivery in dendritic cell-based cancer immunotherapy.

Bioactivation of the phytoestrogen diosmetin by CYP1 cytochromes P450.

Positron emission tomography (PET) imaging with [11C]-labeled erlotinib: a micro-PET study on mice with lung tumor xenografts.

Cytotoxicity and phytotoxicity of trichothecene macrolides from *Myrothecium gramminum*.

A stable and sensitive testing system for potential carcinogens based on DNA damage-induced gene expression in human HepG2 cell.

Identification of tumor promotion marker genes for predicting tumor promoting potential of chemicals in BALB/c 3T3 cells.

TCDD induces cell migration via NFATc1/ATX-signaling in MCF-7 cells.

2,3,7,8-TCDD neurotoxicity in neuroblastoma cells is caused by increased oxidative stress, intracellular calcium levels, and tau phosphorylation.

Functional analysis of ryanodine receptor type 1 p.R2508C mutation in exon 47.

Effects of arsenic on maternal and fetal health.

Clastogenic effects of inorganic arsenic salts on human chromosomes in vitro.

Menadione reduction by pharmacological doses of ascorbate induces an oxidative stress that kills breast cancer cells.

Oral carcinogenicity and toxicity of 2-amino-4-chlorophenol in rats.

Silencing of PINK1 expression affects mitochondrial DNA and oxidative phosphorylation in dopaminergic cells.

Thyroid lesions in the great cormorant (*Phalacrocorax carbo*) of Niigata, central Japan: a possible association with dioxin accumulation.

Arsenic induced apoptosis in malignant melanoma cells is enhanced by menadione through ROS generation, p38 signaling and p53 activation.

Targeting of aryl hydrocarbon receptor-mediated activation of cyclooxygenase-2 expression by the indole-3-carbinol metabolite 3,3'-diindolylmethane in breast cancer cells.

Speciation of arsenic trioxide metabolites in blood cells and plasma of a patient with acute promyelocytic leukemia.

Roles of coactivator proteins in dioxin induction of CYP1A1 and CYP1B1 in human breast cancer cells.

Mouse breast cancer model-dependent changes in metabolic syndrome-associated phenotypes caused by maternal dioxin exposure and dietary fat.

Assessment of human health risks posed by consumption of fish from the Lower Passaic River, New Jersey.

CYP1A1 and CYP3A4 modulation by dietary flavonoids in human intestinal Caco-2 cells.

Fetal arsenic exposure appears to facilitate endocrine disruption by postnatal diethylstilbestrol in neonatal mouse adrenal.

Biologically active tetranorditerpenoids from the fungus *Sclerotinia homoeocarpa* causal agent of dollar spot in turfgrass.

Heparan sulfate proteoglycans are required for cellular binding of the hepatitis E virus ORF2 capsid protein and for viral infection.

The pleiotropy of dioxin toxicity--xenobiotic misappropriation of the aryl hydrocarbon receptor's alternative physiological roles.

Estimates of cancer potency of 2,3,7,8-tetrachlorodibenzo(p)dioxin using linear and nonlinear dose-response modeling and toxicokinetics.

Modulation of arsenic trioxide-induced apoptosis by genistein and functionally related agents in U937 human leukaemia cells. Regulation by ROS and mitogen-activated protein kinases.

Oxidative stress responses of rats exposed to Roundup and its active ingredient glyphosate.

The inducibility of human cytochrome P450 1A by environmental-relevant xenobiotics in the human hepatoma derived cell line HepG2.

Pseudo-halide derivatives of titanocene: synthesis and cytotoxicity studies.

Hemangiomas, angiosarcomas, and vascular malformations represent the signaling abnormalities of pathogenic angiogenesis.

Transepithelial transport of macromolecular substances in IL-4 treated human intestinal T84 cell monolayers.

The role of P-glycoprotein in intestinal transport versus the BBB transport of tetraphenylphosphonium.

Beta-naphthoflavone causes an AhR-independent inhibition of invasion and intracellular multiplication of *Listeria monocytogenes* in murine hepatocytes.

A genome-wide screen in *Saccharomyces cerevisiae* reveals pathways affected by arsenic toxicity.

Histological lesions in mink jaws are a highly sensitive biomarker of effect after exposure to TCDD-like chemicals: field and literature-based confirmations.

Changes in iron-regulatory proteins in the aged rodent neural retina.

Synthesis, photophysical properties and sugar-dependent in vitro photocytotoxicity of pyrrolidine-fused chlorins bearing S-glycosides.

Acacia Senegal gum exudate offers protection against cyclophosphamide-induced urinary bladder cytotoxicity.

Inhibitory effects of guarana seed extract on passive cutaneous anaphylaxis and mast cell degranulation.

Cytotoxicity of spermine oxidation products to multidrug resistant melanoma M14 ADR2 cells: sensitization by the MDL 72527 lysosomotropic compound.

Characterization of the cancer chemopreventive NRF2-dependent gene battery in human keratinocytes: demonstration that the KEAP1-NRF2 pathway, and not the BACH1-NRF2 pathway, controls cytoprotection against electrophiles as well as redox-cycling compounds.

Gene expression analysis in zebrafish embryos: a potential approach to predict effect concentrations in the fish early life stage test.

Specific in vitro toxicity of crude and refined petroleum products. 1. Aryl hydrocarbon receptor-mediated responses.

Light-induced aggregation of type I soluble tumor necrosis factor receptor.

Preclinical activity of palifosfamide lysine (ZIO-201) in pediatric sarcomas including oxazaphosphorine-resistant osteosarcoma.

Endoplasmic reticulum stress-induced cell death in dopaminergic cells: effect of resveratrol.

Chronic low-level arsenic exposure causes gender-specific alterations in locomotor activity, dopaminergic systems, and thioredoxin expression in mice.

Exposure to monomethylarsonous acid (MMA(III)) leads to altered selenoprotein synthesis in a primary human lung cell model.

Dehydroascorbate protection against dioxin-induced toxicity in the beta-cell line INS-1E.

[Dietary intake of PHAHs and cancer risk evaluation for residents living in the e-waste disassembly sites].

Modulation of carcinogen metabolism by nitric oxide-aspirin 2 is associated with suppression of DNA damage and DNA adduct formation.

Interaction of fish aryl hydrocarbon receptor paralogs (AHR1 and AHR2) with the retinoblastoma protein.

Isocombretastatins a versus combretastatins a: the forgotten isoCA-4 isomer as a highly promising cytotoxic and antitubulin agent.

The role of aryl hydrocarbon receptor in regulation of enzymes involved in metabolic activation of polycyclic aromatic hydrocarbons in a model of rat liver progenitor cells.

Biotechnological and industrial significance of cyanobacterial secondary metabolites.

Arsenic induces telomerase expression and maintains telomere length in human cord blood cells.

2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) induces degradation of adherens junction proteins and inhibits beta-catenin-dependent transcription in liver epithelial cells.

The molecular mechanisms of diallyl disulfide and diallyl sulfide induced hepatocyte cytotoxicity.

Pediocin A modulates intestinal microflora metabolism in swine in vitro intestinal fermentations.

Solvothermal metal azide decomposition routes to nanocrystalline metastable nickel, iron, and manganese nitrides.

Disruption of the thyroid system by diethylstilbestrol and ioxynil in the sea bream (*Sparus aurata*).

Iodomethane human health risk characterization.

Characterization of the chronic risk and hazard of hazardous air pollutants in the United States using ambient monitoring data.

Intestinal permeability of antitumor alkaloids from the processed seeds of *Strychnos nux-vomica* in a Caco-2 cell model.

Non-carcinogenic carbon sorbents for respiratory protection.

Regulation of human bone sialoprotein gene transcription by platelet-derived growth factor-BB.

Role of aryl hydrocarbon receptor in modulation of the expression of the hypoxia marker carbonic anhydrase IX.

Correlation between hepatocarcinogenic effect of estragole and its influence on glucocorticoid induction of liver-specific enzymes and activities of FOXA and HNF4 transcription factors in mouse and rat liver.

Influence of inorganic and organic iron compounds on parameters of cell growth and survival in human colon cells.

Effects of smoking cessation on eight urinary tobacco carcinogen and toxicant biomarkers.

Involvement of Blimp-1 and AP-1 dysregulation in the 2,3,7,8-Tetrachlorodibenzo-p-dioxin-mediated suppression of the IgM response by B cells.

Activated toxicity of diesel particulate extract by ultraviolet a radiation in mammalian cells: role of singlet oxygen.

Genotoxic effect of 2,4,6-trichlorophenol on p53 gene in zebrafish liver.

Functional ryanodine receptors in the plasma membrane of RINm5F pancreatic beta-cells.

CYP1A1 induction and CYP3A4 inhibition by the fungicide imazalil in the human intestinal Caco-2 cells-comparison with other conazole pesticides.

Levels of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls in southern Mississippi catfish and estimation of potential health risks.

Disruption of period gene expression alters the inductive effects of dioxin on the AhR signaling pathway in the mouse liver.

New ifosfamide analogs designed for lower associated neurotoxicity and nephrotoxicity with modified alkylating kinetics leading to enhanced in vitro anticancer activity.

Paclitaxel-resistance conferred by altered expression of efflux and influx transporters for paclitaxel in the human hepatoma cell line, HepG2.

Beta-Ca₃N₂, a metastable nitride in the system Ca-N.

Searching for anthropogenic contaminants in human breast adipose tissues using gas chromatography-time-of-flight mass spectrometry.

Treatment of mice with the Ah receptor agonist and human carcinogen dioxin results in altered numbers and function of hematopoietic stem cells.

Activation of NF-kappaB p65/c-Rel dimer is associated with neuroprotection elicited by mGlu5 receptor agonists against MPP(+) toxicity in SK-N-SH cells.

Cytotoxic, genotoxic and cell-cycle disruptive effects of thio-dimethylarsinate in cultured human cells and the role of glutathione.

Formation of dimethylthioarsenicals in red blood cells.

Subchronic inhalation of mixtures of cigarette smoke constituents in Xpa^{-/-}p53^{+/-} knock-out mice: a comparison of intermittent with semi-continuous exposure to acetaldehyde, formaldehyde, and acrolein.

Genome-wide transcriptional responses to acrolein.

G-protein-coupled receptor 30 and estrogen receptor-alpha are involved in the proliferative effects induced by atrazine in ovarian cancer cells.

In vitro screening for aryl hydrocarbon receptor agonistic activity in 200 pesticides using a highly sensitive reporter cell line, DR-EcoScreen cells, and in vivo mouse liver cytochrome P450-1A induction by propanil, diuron and linuron.

Hepatoma tissue culture (HTC) cells as a model for investigating the effects of low concentrations of herbicide on cell structure and function.

1-Methyl-4-phenyl-pyridinium ion-induced oxidative stress, c-Jun phosphorylation and DNA fragmentation factor-45 cleavage in SK-N-SH cells are averted by selegiline.

Polyhydroxylated fullerene derivative C(60)(OH)(24) prevents mitochondrial dysfunction and oxidative damage in an MPP(+) -induced cellular model of Parkinson's disease.

A comparative 90-day toxicity study of allyl acetate, allyl alcohol and acrolein.

[Inhibition of (-)epigallocatechin gallate on dimethylarsinic acid promoting lung tumorigenesis through the induction of oxidative stress in mice].

S-ethyl-N,N-dipropylthiocarbamate exposure and cancer incidence among male pesticide applicators in the agricultural health study: a prospective cohort.

Study of the toxicity of diuron and its metabolites formed in aqueous medium during application of the electrochemical advanced oxidation process "electro-Fenton".

Agent Orange exposure, Vietnam War veterans, and the risk of prostate cancer.

Editorial comment on: Agent Orange exposure, Vietnam War veterans, and the risk of prostate cancer.

Pentachlorophenol decreases ATP levels in human natural killer cells.

Pesticide exposure as risk factor for non-Hodgkin lymphoma including histopathological subgroup analysis.

[Clinical study on treatment of acute paraquat poisoning].

Cilostazol inhibits oxidative stress-induced premature senescence via upregulation of Sirt1 in human endothelial cells.

Acrolein health effects.

Pentachlorophenol and cancer risk: focusing the lens on specific chlorophenols and contaminants.

Combined in utero and juvenile exposure of mice to arsenate and atrazine in drinking water modulates gene expression and clonogenicity of myeloid progenitors.

Mechanism of trifluralin-induced thyroid tumors in rats.

Discriminating the molecular basis of hepatotoxicity using the large-scale characteristic molecular signatures of toxicants by expression profiling analysis.

Cytotoxicity of combinations of arsenicals on rat urinary bladder urothelial cells in vitro.

Role of protein kinase Cdelta in paraquat-induced glial cell death.

The in vivo gene expression signature of oxidative stress.

Specific interactions of chloroacetanilide herbicides with human ABC transporter proteins.

Acrolein consumption exacerbates myocardial ischemic injury and blocks nitric oxide-induced PKCepsilon signaling and cardioprotection.

Cancer incidence among pesticide applicators exposed to trifluralin in the Agricultural Health Study.

Protein alkylation, transcriptional responses and cytochrome c release during acrolein toxicity in A549 cells: influence of nucleophilic culture media constituents.

Maneb potentiates paraquat neurotoxicity by inducing key Bcl-2 family members.

Reduced toxicological activity of cigarette smoke by the addition of ammonia magnesium phosphate to the paper of an electrically heated cigarette: subchronic inhalation toxicology.

Atrazine-induced changes in aromatase activity in estrogen sensitive target tissues.

[Meta-analysis of association between pentachlorophenol exposure and cancer risk].

Diabetes and cancer in veterans of Operation Ranch Hand after adjustment for calendar period, days of spraying, and time spent in Southeast Asia.

Genotoxic potential of glyphosate formulations: mode-of-action investigations.

Protective effect of prion protein via the N-terminal region in mediating a protective effect on paraquat-induced oxidative injury in neuronal cells.

Application of physiological computational fluid dynamics models to predict interspecies nasal dosimetry of inhaled acrolein.

Respiratory tract responses in male rats following subchronic acrolein inhalation.

Comparative cytotoxicity of alachlor, acetochlor, and metolachlor herbicides in isolated rat and cryopreserved human hepatocytes.

Identification of genes associated with paraquat-induced toxicity in SH-SY5Y cells by PCR array focused on apoptotic pathways.

Pesticides, soft-tissue sarcoma and non-Hodgkin lymphoma--historical aspects on the precautionary principle in cancer prevention.

Pesticides, soft tissue sarcoma and non-Hodgkin lymphoma.

Paraquat-induced apoptosis in human neuroblastoma SH-SY5Y cells: involvement of p53 and mitochondria.

Keap1/Nrf2 signaling regulates oxidative stress tolerance and lifespan in *Drosophila*.

Protective effect of Pycnogenol in human neuroblastoma SH-SY5Y cells following acrolein-induced cytotoxicity.

Photoreceptor oxidative damage in sympathetic ophthalmia.

Acrolein: unwanted side product or contribution to antiangiogenic properties of metronomic cyclophosphamide therapy?

Modulation of reactive oxygen species by antioxidants in chronic myeloid leukemia cells enhances imatinib sensitivity through survivin downregulation.

Dihydrocapsaicin (DHC), a saturated structural analog of capsaicin, induces autophagy in human cancer cells in a catalase-regulated manner.

Arsenic exposure, urinary arsenic speciation, and the incidence of urothelial carcinoma: a twelve-year follow-up study.

Growth inhibition of human colon cancer cells by plant compounds.

The biochemistry of heme biosynthesis.

Oxidative stress as a biomarker of respiratory disturbance in patients with severe motor and intellectual disabilities.

Evaluation of micronucleus frequencies in blood lymphocytes from smelting plant workers exposed to arsenic.

PPARalpha and PPARbeta are differentially affected by ethanol and the ethanol metabolite acetaldehyde in the MCF-7 breast cancer cell line.

A critical role of superoxide anion in selenite-induced mitophagic cell death.

Inhibition of acrolein-stimulated MUC5AC production by fucoidan in human bronchial epithelial cells.

Cinnamoyl-based Nrf2-activators targeting human skin cell photo-oxidative stress.

Cinnamaldehyde inhibits the tumor necrosis factor- α -induced expression of cell adhesion molecules in endothelial cells by suppressing NF- κ B activation: effects upon I κ B and Nrf2.

The role of oxidative stress in acrolein-induced DNA damage in HepG2 cells.

Identification of the major arsenic-binding protein in rat plasma as the ternary dimethylarsinous-hemoglobin-haptoglobin complex.

Induction of cancer chemopreventive enzymes by coffee is mediated by transcription factor Nrf2. Evidence that the coffee-specific diterpenes cafestol and kahweol confer protection against acrolein.

Cinnamaldehyde inhibits pro-inflammatory cytokines secretion from monocytes/macrophages through suppression of intracellular signaling.

Decoy receptor 3 expression in AsPC-1 human pancreatic adenocarcinoma cells via the phosphatidylinositol 3-kinase-, Akt-, and NF- κ B-dependent pathway.

Sodium azide induces necrotic cell death in rat squamous cell carcinoma SCC131.

Curcumin attenuates cytochrome P450 induction in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin by ROS-dependently degrading AhR and ARNT.

Dihydrolipoic acid inhibits tetrachlorohydroquinone-induced tumor promotion through prevention of oxidative damage.

Quercetin prevents necrotic cell death induced by co-exposure to benzo(a)pyrene and UVA radiation.

Aryl hydrocarbon receptor-interacting protein and pituitary adenomas: a population-based study on subjects exposed to dioxin after the Seveso, Italy, accident.

Enhancement of hypoxia-induced gene expression in fish liver by the aryl hydrocarbon receptor (AhR) ligand, benzo[a]pyrene (BaP).

Induction of cytoplasmic accumulation of p53: a mechanism for low levels of arsenic exposure to predispose cells for malignant transformation.

Heat shock protein 90 inhibitors suppress aryl hydrocarbon receptor-mediated activation of CYP1A1 and CYP1B1 transcription and DNA adduct formation.

Effect of dimethyl sulfides on the induction of apoptosis in human leukemia Jurkat cells and HL-60 cells.

Elevated expression of CYP1A1 and gamma-SYNUCLEIN in human ectopic (ovarian) endometriosis compared with eutopic endometrium.

Identification of Inonotus obliquus and analysis of antioxidation and antitumor activities of polysaccharides.

Omeprazole alleviates benzo[a]pyrene cytotoxicity by inhibition of CYP1A1 activity in human and mouse hepatoma cells.

Abnormal liver development and resistance to 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity in mice carrying a mutation in the DNA-binding domain of the aryl hydrocarbon receptor.

Decreased urinary beta-defensin-1 expression as a biomarker of response to arsenic.

KLF6 induces apoptosis in prostate cancer cells through up-regulation of ATF3.

Risk for non Hodgkin's lymphoma in the vicinity of French municipal solid waste incinerators.

Spatial variations in the incidence of breast cancer and potential risks associated with soil dioxin contamination in Midland, Saginaw, and Bay Counties, Michigan, USA.

Genotoxic potential of Polycyclic Aromatic Hydrocarbons-coated onto airborne Particulate Matter (PM 2.5) in human lung epithelial A549 cells.

Polymorphisms in cell cycle regulatory genes, urinary arsenic profile and urothelial carcinoma.

Combined administration of taurine and monoisoamyl DMSA protects arsenic induced oxidative injury in rats.

A margin-of-exposure approach to assessment of noncancer risks of dioxins based on human exposure and response data.

Blockade of the aryl hydrocarbon receptor pathway triggered by dioxin, polycyclic aromatic hydrocarbons and cigarette smoke by *Phellinus linteus*.

Delayed initiation of breast development in girls with higher prenatal dioxin exposure; a longitudinal cohort study.

Perinatal 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure sensitizes offspring to angiotensin II-induced hypertension.

Critical role of cyclooxygenase-2 activation in pathogenesis of hydronephrosis caused by lactational exposure of mice to dioxin.

Environmental exposures and adverse pregnancy outcomes: a review of the science.

Novel ryanodine receptor mutation that may cause malignant hyperthermia.

CYP1A induction potential and the concentration of priority pollutants in marine sediment samples--in vitro evaluation using the PLHC-1 fish hepatoma cell line.

A role for the aryl hydrocarbon receptor and the dioxin TCDD in rheumatoid arthritis.

Neuroprotection by *Spirulina platensis* protean extract and phycocyanin against iron-induced toxicity in SH-SY5Y neuroblastoma cells.

Liver is a target of arsenic carcinogenesis.

Accumulation of M1dG DNA adducts after chronic exposure to PCBs, but not from acute exposure to polychlorinated aromatic hydrocarbons.

Arsenite alters global histone H3 methylation.

Nonadditive effects of PAHs on Early Vertebrate Development: mechanisms and implications for risk assessment.

Synthesis and evaluation in vitro and in vivo of a ¹¹C-labeled cyclooxygenase-2 (COX-2) inhibitor.

Mitotic arrest-associated apoptosis induced by sodium arsenite in A375 melanoma cells is BUBR1-dependent.

Fibronectin promotes cell proliferation of human pre-B cell line via its interactions with VLA-4 and VLA-5.

Cross-talk between aryl hydrocarbon receptor and mitogen-activated protein kinase signaling pathway in liver cancer through c-raf transcriptional regulation.

Evaluation of tumour promoting potency of fish borne toxaphene residues, as compared to technical toxaphene and UV-irradiated toxaphene.

Sodium arsenite induces orphan nuclear receptor SHP gene expression via AMP-activated protein kinase to inhibit gluconeogenic enzyme gene expression.

Arsenite and cadmium, but not chromium, induce NAD(P)H:quinone oxidoreductase 1 through transcriptional mechanisms, in spite of post-transcriptional modifications.

Nitrophenols isolated from diesel exhaust particles promote the growth of MCF-7 breast adenocarcinoma cells.

KML001 cytotoxic activity is associated with its binding to telomeric sequences and telomere erosion in prostate cancer cells.

Increased levels of a unique post-translationally modified betaIVb-tubulin isotype in liver cancer.

Interplay between cellular methyl metabolism and adaptive efflux during oncogenic transformation from chronic arsenic exposure in human cells.

Resveratrol prevents estrogen-DNA adduct formation and neoplastic transformation in MCF-10F cells.

Arsenic trioxide and auranofin inhibit selenoprotein synthesis: implications for chemotherapy for acute promyelocytic leukaemia.

2,3,7,8-Tetrachlorodibenzo-p-dioxin modulates the induction of DNA strand breaks and poly(ADP-ribose) polymerase-1 activation by 17beta-estradiol in human breast carcinoma cells through alteration of CYP1A1 and CYP1B1 expression.

Occurrence of two different types of glutathione S-transferase placental form-positive hepatocytes after a single administration of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats.

Transgenerational effects from exposure to environmental toxic substances.

Concentrations of polychlorinated dibenzo-p-dioxins (PCDDs), polychlorinated dibenzofurans (PCDFs), and dioxin-like PCBs in adipose tissue of infertile men.

Cytochrome P450 2C11 5'-flanking region and promoter: regulation by aromatic hydrocarbons in vitro.

Inorganic arsenic exposure affects pain behavior and inflammatory response in rat.

Pollutant effects on genotoxic parameters and tumor-associated protein levels in adults: a cross sectional study.

Follow-up study of cancer incidence after chlorophenol exposure in a community in southern Finland.

Can folate intake reduce arsenic toxicity?

Multiple cutaneous precanceroses and carcinomas from combined iatrogenic/professional exposure to arsenic.

Enhanced detection of autoantibodies on protein microarrays using a modified protein digestion technique.

Basil extract inhibits the sulfotransferase mediated formation of DNA adducts of the procarcinogen 1'-hydroxyestragole by rat and human liver S9 homogenates and in HepG2 human hepatoma cells.

Ryanodine receptor expression correlates with tumor grade in breast cancer.

Exposure assessment of workers to airborne PCDD/Fs, PCBs and PAHs at an electric arc furnace steelmaking plant in the UK.

The influence of metallothionein on exposure to metals: an in vitro study on cellular models.

Sensitivity to sodium arsenite in human melanoma cells depends upon susceptibility to arsenite-induced mitotic arrest.

High potency of bioactivation of 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) in mouse colon epithelial cells with Apc(Min) mutation.

Constitutive regulation of CYP1B1 by the aryl hydrocarbon receptor (AhR) in pre-malignant and malignant mammary tissue.

Imaging breast cancer cells and tissues using peptide-labeled fluorescent silica nanoparticles.

Epidemiologic evidence of relationships between reproductive and child health outcomes and environmental chemical contaminants.

Experience of nitisinone for the pharmacological treatment of hereditary tyrosinaemia type 1.

Alteration of APE1/ref-1 expression in non-small cell lung cancer: the implications of impaired extracellular superoxide dismutase and catalase antioxidant systems.

GSK3 promotes arsenite-induced apoptosis via facilitation of mitochondria disruption.

The preparation and characterization of anti-VEGFR2 conjugated, paclitaxel-loaded PLLA or PLGA microspheres for the systemic targeting of human prostate tumors.

DNA-dependent protein kinase catalytic subunit modulates the stability of c-Myc oncoprotein.

Occupational exposure to pesticides and risk of adult brain tumors.

[Effect of dioxin on apoptosis of osteogenic sarcoma cells and regulation on gene expression of insulin-like growth factor binding protein 6].

Occupational risk factors for non-Hodgkin's lymphoma: a population-based case-control study in Northern Germany.

Mortality in a population exposed to dioxin after the Seveso, Italy, accident in 1976: 25 years of follow-up.

Microvascular free-tissue transfer for head and neck reconstruction in Jehovah's Witness patients.

Dose response evaluation of gene expression profiles in the skin of K6/ODC mice exposed to sodium arsenite.

Resveratrol sensitizes melanomas to TRAIL through modulation of antiapoptotic gene expression.

Risk factors for ovarian cancer: an overview with emphasis on hormonal factors.

Role of hormonal and other factors in human prostate cancer.

Cancer and TCDD: the mitochondrial connection.

High dietary fat exacerbates arsenic-induced liver fibrosis in mice.

Decreased epithelial barrier function evoked by exposure to metabolic stress and nonpathogenic E. coli is enhanced by TNF-alpha.

Dioxin-mediated up-regulation of aryl hydrocarbon receptor target genes is dependent on the calcium/calmodulin/CaMKIalpha pathway.

Regulation of aryl hydrocarbon receptor expression and function by glucocorticoids in mouse hepatoma cells.

Plasma folate level, urinary arsenic methylation profiles, and urothelial carcinoma susceptibility.

Short dysfunctional telomeres impair the repair of arsenite-induced oxidative damage in mouse cells.

Antagonistic and agonistic effects of indigoids on the transformation of an aryl hydrocarbon receptor.

Chemical contaminants, health indicators, and reproductive biomarker responses in fish from rivers in the Southeastern United States.

Enhancements of 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone (NNK) metabolism and carcinogenic risk via NNK/arsenic interaction.

A role for iron in Wnt signalling.

Health effects of early life exposure to arsenic.

Identification and biochemical characterization of a novel ryanodine receptor gene mutation associated with malignant hyperthermia.

Significance of prolyl hydroxylase 2 in the interference of aryl hydrocarbon receptor and hypoxia-inducible factor-1 alpha signaling.

Arsenite-induced thymus atrophy is mediated by cell cycle arrest: a characteristic downregulation of E2F-related genes revealed by a microarray approach.

Analysis of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced proteome changes in 5L rat hepatoma cells reveals novel targets of dioxin action including the mitochondrial apoptosis regulator VDAC2.

Differential expression of estrogen receptor alpha (ERalpha) protein in MCF-7 breast cancer cells chronically exposed to TCDD.

Modulation of TCDD-mediated induction of cytochrome P450 1A1 by mercury, lead, and copper in human HepG2 cell line.

Dioxin emissions from a municipal solid waste incinerator and risk of invasive breast cancer: a population-based case-control study with GIS-derived exposure.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin administration and high-fat diet on the body weight and hepatic estrogen metabolism in female C3H/HeN mice.

Dioxin-mediated tumor progression through activation of mitochondria-to-nucleus stress signaling.

[Outdoor work-related health hazards].

Residential exposures to pesticides and childhood leukaemia.

Integrated approach to immunotoxicity: electron transfer, reactive oxygen species, antioxidants, cell signaling, and receptors.

Relevant approach to assess performances of wastewater biosolids composting in terms of micropollutants removal.

Arsenic methylation capability, heme oxygenase-1 and NADPH quinone oxidoreductase-1 genetic polymorphisms and the stage and grade of urothelial carcinomas.

Oxidative damage induced genotoxic effects in human fibroblasts from Xeroderma Pigmentosum group A patients.

Humoral response against Mycobacterium bovis Hsp65 derived fragments in children and young people with various disorders.

Tissue levels of arsenicals and skin tumor response following administration of monomethylarsonous acid and arsenite to K6/ODC mice.

Insight into the selectivity of arsenic trioxide for acute promyelocytic leukemia cells by characterizing Saccharomyces cerevisiae deletion strains that are sensitive or resistant to the metalloid.

Feasibility studies of 4'-[methyl-(11)C]thiothymidine as a tumor proliferation imaging agent in mice.

Endocrine disruptors and estrogenic effects on male reproductive axis.

Neoplastic transformation of human small airway epithelial cells induced by arsenic.

Risk of leukaemia among pesticide manufacturing workers: a review and meta-analysis of cohort studies.

Effects of anoxia, aglycemia, and acidosis on cytosolic Mg²⁺, ATP, and pH in rat sensory neurons.

Urinary 8-hydroxydeoxyguanosine and urothelial carcinoma risk in low arsenic exposure area.

Chondroitin sulfate and heparan sulfate-containing proteoglycans are both partners and targets of basic fibroblast growth factor-mediated proliferation in human metastatic melanoma cell lines.

An evidence for regulatory cross-talk between aryl hydrocarbon receptor and glucocorticoid receptor in HepG2 cells.

C-reactive protein induces endothelial cell apoptosis and matrix metalloproteinase-9 production in human mononuclear cells: Implications for the destabilization of atherosclerotic plaque.

Allium compounds, dipropyl and dimethyl thiosulfinates as antiproliferative and differentiating agents of human acute myeloid leukemia cell lines.

[Identification of air toxics from indoor and outdoor measurements of volatile organic compounds in one elementary school in Beijing].

Effects of inorganic arsenic on the rat and mouse urinary bladder.

Release of volatile organic compounds (VOCs) from the lung cancer cell line CALU-1 in vitro.

Impaired activation of caspase cascade during cell death induced by newly synthesized singlet oxygen generator, 1-buthylnaphthalene-4-propionate endoperoxide.

Carcinogenic chromium(VI)-induced protein oxidation and lipid peroxidation: implications in DNA-protein crosslinking.

Potential effects of perfluorinated compounds in common cormorants from Lake Biwa, Japan: an implication from the hepatic gene expression profiles by microarray.

Reactive oxygen species from the uncoupling of human cytochrome P450 1B1 may contribute to the carcinogenicity of dioxin-like polychlorinated biphenyls.

Combining ligand-based pharmacophore modeling, quantitative structure-activity relationship analysis and in silico screening for the discovery of new potent hormone sensitive lipase inhibitors.

Dielectrophoretic field-flow fractionation system for detection of aquatic toxicants.

Protein expression in the livers and urinary bladders of hamsters exposed to sodium arsenite.

Cytokine-induced arginase activity in pulmonary endothelial cells is dependent on Src family tyrosine kinase activity.

Low concentration of arsenite exacerbates UVR-induced DNA strand breaks by inhibiting PARP-1 activity.

[Superoxide induces cellular growth and apoptosis of cultured human peripheral blood lymphocytes].

XRCC1 protects against the lethality of induced oxidative DNA damage in nondividing neural cells.

A technical mixture of 2,2',4,4'-tetrabromo diphenyl ether (BDE47) and brominated furans triggers aryl hydrocarbon receptor (AhR) mediated gene expression and toxicity.

Down-regulation of the carcinogen-metabolizing enzyme cytochrome P450 1a1 by vanadium.

Mutagenicity of N-nitrosodiethanolamine in a V79-derived cell line expressing two human biotransformation enzymes.

Acrylamide: a dietary carcinogen formed in vivo?

2,3,7,8-Tetrachlorodibenzo-p-dioxin-mediated impairment of B cell differentiation involves dysregulation of paired box 5 (Pax5) isoform, Pax5a.

Differences in gene expression and benzo[a]pyrene-induced DNA adduct formation in the liver of three strains of female mice with identical AhRb2 genotype treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin and/or benzo[a]pyrene.

Effects of boric acid and borax on titanium dioxide genotoxicity.

Genotoxic effects of PCB 52 and PCB 77 on cultured human peripheral lymphocytes.

Intrinsic AhR function underlies cross-talk of dioxins with sex hormone signalings.

Assessing the potential risk of oil-field produced waters using a battery of bioassays/biomarkers.

Technical uncertainty in the back-calculation of occupational exposure to dioxins.

Effect of dioxin exposure on aromatase expression in ovariectomized rats.

Non-dioxin-like polychlorinated biphenyls induce a release of arachidonic acid in liver epithelial cells: a partial role of cytosolic phospholipase A(2) and extracellular signal-regulated kinases 1/2 signalling.

Histopathological alterations of Nile tilapia, *Oreochromis niloticus* in acute and subchronic alachlor exposure.

Potent upregulation of glutathione and NAD(P)H:quinone oxidoreductase 1 by alpha-lipoic acid in human neuroblastoma SH-SY5Y cells: protection against neurotoxicant-elicited cytotoxicity.

TCDD deregulates contact inhibition in rat liver oval cells via Ah receptor, JunD and cyclin A.

Antioxidant activity of different extracts of Argentinian medicinal plants against arsenic-induced toxicity in renal cells.

Toxicogenomic analysis of gender, chemical, and dose effects in livers of TCDD- or aroclor 1254-exposed rats using a multifactor linear model.

Mdm2 as a sensitive and mechanistically informative marker for genotoxicity induced by benzo[a]pyrene and dibenzo[a,l]pyrene.

Isotype expression, post-translational modification and stage-dependent production of tubulins in erythrocytic *Plasmodium falciparum*.

Inhibition of carrier-mediated uptake of epirubicin reduces cytotoxicity in primary culture of rat hepatocytes.

Toxicity reference values for mink exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) equivalents (TEQs).

Tissue dosimetry, metabolism and excretion of pentavalent and trivalent dimethylated arsenic in mice after oral administration.

Comparative risk analysis of dioxins in fish and fine particles from heavy-duty vehicles.

Arsenic as an endocrine disruptor: arsenic disrupts retinoic acid receptor- and thyroid hormone receptor-mediated gene regulation and thyroid hormone-mediated amphibian tail metamorphosis.

In vitro and in vivo reduction of sodium arsenite induced toxicity by aqueous garlic extract.

Phytoestrogens and xenoestrogens: the contribution of diet and environment to endocrine disruption.

The effect of suspended particles coated by humic acid on the toxicity of pharmaceuticals, estrogens, and phenolic compounds.

Enhancing effect of chlorinated organic solvents on histamine release and inflammatory mediator production.

Estimation of atrazine in the stratum corneum and its toxic effects in skin following topical application to rabbits.

Mouse mammary tumor virus promoter-containing retroviral promoter conversion vectors for gene-directed enzyme prodrug therapy are functional in vitro and in vivo.

Mutagenic, antimutagenic, cytotoxic, and apoptotic activities of extracts from *Pituranthos tortuosus*.

Influence of TCDD and natural Ah receptor agonists on benzo[a]pyrene-DNA adduct formation in the Caco-2 human colon cell line.

Inhibition of estrogen-mediated uterine gene expression responses by dioxin.

Dioxin-like toxicity in the Saginaw River Watershed: polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls in sediments and floodplain soils from the Saginaw and Shiawassee Rivers and Saginaw Bay, Michigan, USA.

Comparative genotoxicity evaluation of imidazolinone herbicides in somatic cells of *Drosophila melanogaster*.

Role of the Met(287)Thr polymorphism in the AS3MT gene on the metabolic arsenic profile.

Letter to the editor re: Datta et al., 2006. Arsenic biogeochemistry and human health risk assessment in organo-arsenical pesticide-applied acidic and alkaline soils: an incubation study.

Diuron lacks promoting potential in a rat liver bioassay.

Environmental toxins and health--the health impact of pesticides.

Aldo-keto reductase family 1 B10 gene silencing results in growth inhibition of colorectal cancer cells: Implication for cancer intervention.

The bipyridyl herbicide paraquat induces proteasome dysfunction in human neuroblastoma SH-SY5Y cells.

Intermolecular protein cross-linking during acrolein toxicity: efficacy of carbonyl scavengers as inhibitors of heat shock protein-90 cross-linking in A549 cells.

Targeted disruption of the glutaredoxin 1 gene does not sensitize adult mice to tissue injury induced by ischemia/reperfusion and hyperoxia.

Retinoic acid-mediated differentiation protects against nitrofen-induced apoptosis.

Endocrine disrupting chemicals in pesticides and herbicide in Fars Province, Iran.

Alteration of estrogen-regulated gene expression in human cells induced by the agricultural and horticultural herbicide glyphosate.

Characterization of acrolein-glycerophosphoethanolamine lipid adducts using electrospray mass spectrometry.

Pathophysiological aspects of cyclophosphamide and ifosfamide induced hemorrhagic cystitis; implication of reactive oxygen and nitrogen species as well as PARP activation.

Toxicity of dimethylmonothioarsinic acid toward human epidermoid carcinoma A431 cells.

Role of MGMT in protecting against cyclophosphamide-induced toxicity in cells and animals.

Further evidence against a direct genotoxic mode of action for arsenic-induced cancer.

Arsenic-induced bladder cancer in an animal model.

2,4-Dichlorophenoxyacetic acid: effects on Syrian hamster embryo (SHE) cell transformation, c-Myc expression, DNA damage and apoptosis.

Industry influence and atrazine carcinogenicity.

Sodium salicylate prevents paraquat-induced apoptosis in the rat lung.

Time- and dose-dependent effects of roundup on human embryonic and placental cells.

Relationship between autophagy and apoptotic cell death in human neuroblastoma cells treated with paraquat: could autophagy be a "brake" in paraquat-induced apoptotic death?

Nucleobase-dependent reactivity of a quinone metabolite of pentachlorophenol.

3,4-dichloropropionaniline suppresses normal macrophage function.

Inhibition of paraquat-induced autophagy accelerates the apoptotic cell death in neuroblastoma SH-SY5Y cells.

Reduced 293T cell susceptibility to acrolein due to aldose reductase-like-1 protein expression.

Atrazine-induced aromatase expression is SF-1 dependent: implications for endocrine disruption in wildlife and reproductive cancers in humans.

Plasma cell gingivitis among herbal toothpaste users: a report of three cases.

Cytotoxicity of chloroacetanilide herbicide alachlor in HepG2 cells independent of CYP3A4 and CYP3A7.

P38 and ERK mitogen-activated protein kinases mediate acrolein-induced apoptosis in Chinese hamster ovary cells.

Agent Orange, prostate cancer irradiation and acute promyelocytic leukemia (APL): is there a link?

[Changes of serum cytokine caused by acute paraquat poisoning].

Atrazine and reproductive function: mode and mechanism of action studies.

Residential and biological exposure assessment of chemicals from a wood treatment plant.

[Dioxins and sarcomas in Veneto: the risk of confusing the citizens].

[Dioxins and sarcomas in Veneto: the context, the method and the peer review].

[Dioxins and sarcomas in Veneto: let us open a debate on the role of epidemiology].

Estimating risk from ambient concentrations of acrolein across the United States.

Risk of breast cancer for women living in rural areas from adult exposure to atrazine from well water in Wisconsin.

Rosiglitazone protects human neuroblastoma SH-SY5Y cells against MPP+ induced cytotoxicity via inhibition of mitochondrial dysfunction and ROS production.

Trivalent arsenicals induce lipid peroxidation, protein carbonylation, and oxidative DNA damage in human urothelial cells.

Follow-up testing of rodent carcinogens not positive in the standard genotoxicity testing battery: IWGT workgroup report.

Cancer incidence and mortality in a New Zealand community potentially exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin from 2,4,5-trichlorophenoxyacetic acid manufacture.

Epidemiology. Agent Orange's bitter harvest.

Luteolin protects rat PC12 and C6 cells against MPP+ induced toxicity via an ERK dependent Keap1-Nrf2-ARE pathway.

Mortality, length of life, and physical examination attendance in participants of the Air Force Health Study.

Impact of the specificity of the exposure metric on exposure-response relationships.

Divergent mechanisms of paraquat, MPP+, and rotenone toxicity: oxidation of thioredoxin and caspase-3 activation.

VIP is a transcriptional target of Nurr1 in dopaminergic cells.

Epidemiological and clinical investigations among employees in a former herbicide production process.

Amifostine and glutathione prevent ifosfamide- and acrolein-induced hemorrhagic cystitis.

Cells deficient in the FANC/BRCA pathway are hypersensitive to plasma levels of formaldehyde.

Pesticide exposure among farm workers.

The activity of 2'-benzoyloxycinnamaldehyde against drug-resistant cancer cell lines.

Research toward the development of a biologically based dose response assessment for inorganic arsenic carcinogenicity: a progress report.

Acrolein inhibits cytokine gene expression by alkylating cysteine and arginine residues in the NF-kappaB1 DNA binding domain.

Arsenic metabolism, genetic susceptibility, and risk of premalignant skin lesions in Bangladesh.

Carcinogenicity of dimethylarsinic acid in Ogg1-deficient mice.

Down-regulation of glutaminase C in human hepatocarcinoma cell by diphenylarsinic acid, a degradation product of chemical warfare agents.

Undersulfation of glycosaminoglycans induced by sodium chlorate treatment affects the progression of C6 rat glioma, in-vivo.

[Chemistry and toxicology of cigarette smoke in the lungs].

Antiplatelet and antithrombotic activities of essential oil from wild *Ocotea quixos* (Lam.) Kosterm. (Lauraceae) calices from Amazonian Ecuador.

Mitochondrial damage modulates alternative splicing in neuronal cells: implications for neurodegeneration.

Lack of mutagenicity of acrolein-induced DNA adducts in mouse and human cells.

Mechanism of the cytotoxicity of the diazoparaquinone antitumor antibiotic kinamycin F.

Characterization of diuron N-demethylation by mammalian hepatic microsomes and cDNA-expressed human cytochrome P450 enzymes.

Thio-dimethylarsinate is a common metabolite in urine samples from arsenic-exposed women in Bangladesh.

Tissue distribution and urinary excretion of dimethylated arsenic and its metabolites in dimethylarsinic acid- or arsenate-treated rats.

Induction of COX-2 by acrolein in rat lung epithelial cells.

Environmental Arsenic Exposure and Urinary 8-OHdG in Arizona and Sonora.

2-hydroxycinnamaldehyde inhibits SW620 colon cancer cell growth through AP-1 inactivation.

Detection and quantitation of acrolein-derived 1,N²-propanodeoxyguanosine adducts in human lung by liquid chromatography-electrospray ionization-tandem mass spectrometry.

Binding of dimethylarsinous acid to cys-13 α of rat hemoglobin is responsible for the retention of arsenic in rat blood.

Effect of fasting on the pattern of urinary arsenic excretion.

Organochlorines and risk of non-Hodgkin lymphoma.

Anti-inflammatory lipid mediator 15d-PGJ₂ inhibits translation through inactivation of eIF4A.

Glucocorticoid receptor functions in HeLa Cells are perturbed by 2,3,8,9-tetrachlorodibenzo-p-dioxin (TCDD).

Supplementation of ascorbic acid and alpha-tocopherol prevents arsenic-induced protein oxidation and DNA damage induced by arsenic in rats.

Pulmonary lesions in female Harlan Sprague-Dawley rats following two-year oral treatment with dioxin-like compounds.

Household exposure to pesticides and risk of childhood hematopoietic malignancies: The ESCALE study (SFCE).

Evaluation of electrospray ionization and atmospheric pressure chemical ionization for simultaneous detection of estrone and its metabolites using high-performance liquid chromatography/tandem mass spectrometry.

Arsenic promotes centrosome abnormalities and cell colony formation in p53 compromised human lung cells.

Gene-mutation induction by arsenic compounds in the mouse lymphoma assay.

Identification of interspecies concordance of mechanisms of arsenic-induced bladder cancer.

Folate deficiency enhances arsenic effects on expression of genes involved in epidermal differentiation in transgenic K6/ODC mouse skin.

Arsenic inhibits neurofilament transport and induces perikaryal accumulation of phosphorylated neurofilaments: roles of JNK and GSK-3 β .

Vanadium induces VL30 retrotransposition at an unusually high level: a possible carcinogenesis mechanism.

Pharmacokinetics of 3-[¹²⁵I]iodo-alpha-methyl-L-tyrosine, a tumor imaging agent, after probenecid loading in mice implanted with colon cancer DLD-1 cells.

Toxic effects of TCDD on osteogenesis through altering IGFBP-6 gene expression in osteoblasts.

Porphyria cutanea tarda as rare cutaneous manifestation of hepatic metastases treated with interferon.

Relative differences in aryl hydrocarbon receptor-mediated response for 18 polybrominated and mixed halogenated dibenzo-p-dioxins and -furans in cell lines from four different species.

Arsenic salt-induced DNA damage and expression of mutant p53 and COX-2 proteins in SV-40 immortalized human uroepithelial cells.

Pathogenesis of aryl hydrocarbon receptor-mediated development of lymphoma is associated with increased cyclooxygenase-2 expression.

Chronic disease and early exposure to air-borne mixtures. 2. Exposure assessment.

Relationship between aryl hydrocarbon receptor-affinity and the induction of EROD activity by 2,3,7,8-tetrachlorinated phenothiazine and derivatives.

Differential effects of quercetin and silymarin on arsenite-induced cytotoxicity in two human breast adenocarcinoma cell lines.

The effect of dietary glycine on the hepatic tumor promoting activity of polychlorinated biphenyls (PCBs) in rats.

Arsenic neurotoxicity--a review.

Differential effect of arecoline on the endogenous dioxin-responsive cytochrome P450 1A1 and on a stably transfected dioxin-responsive element-driven reporter in human hepatoma cells.

Mechanisms of action of the congenital diaphragmatic hernia-inducing teratogen nitrofen.

Regulatory factors involved in species-specific modulation of arylhydrocarbon receptor (AhR)-dependent gene expression in humans and mice.

Serum profiles of PCDDs and PCDFs, in individuals near the Escambia Wood Treating Company Superfund site in Pensacola, FL.

Lafora-like ground-glass inclusions in hepatocytes of pediatric patients: a report of two cases.

Comparison of the cytotoxicity of the nitroaromatic drug flutamide to its cyano analogue in the hepatocyte cell line TAMH: evidence for complex I inhibition and mitochondrial dysfunction using toxicogenomic screening.

Mechanism of internalization of an ICAM-1-derived peptide by human leukemic cell line HL-60: influence of physicochemical properties on targeted drug delivery.

Isolation and characterization of arsenite-resistant human epidermoid carcinoma KB cells.

Enhancement of allergic responses in vivo and in vitro by butylated hydroxytoluene.

Functional characterization of the promoter of human carbonyl reductase 1 (CBR1). Role of XRE elements in mediating the induction of CBR1 by ligands of the aryl hydrocarbon receptor.

p53 response to arsenic exposure in epithelial cells: protein kinase B/Akt involvement.

Comparison of fathead minnow ovary explant and H295R cell-based steroidogenesis assays for identifying endocrine-active chemicals.

Expression of STAT3 and Bcl-6 oncoprotein in sodium arsenite-treated SV-40 immortalized human uroepithelial cells.

Arsenic salts induced autophagic cell death and hypermethylation of DAPK promoter in SV-40 immortalized human uroepithelial cells.

Cobaltous chloride and hypoxia inhibit aryl hydrocarbon receptor-mediated responses in breast cancer cells.

Comparison of the effects of arsenic and cadmium on benzo(a)pyrene-induced micronuclei in mouse bone-marrow.

Goserelin acetate 10.8 mg plus iron versus iron monotherapy prior to surgery in premenopausal women with iron-deficiency anemia due to uterine leiomyomas: results from a Phase III, randomized, multicenter, double-blind, controlled trial.

Parental occupational exposure to pesticides and the risk of childhood leukemia in Costa Rica.

Interference of contaminated sediment extracts and environmental pollutants with retinoid signaling.

Ranking cancer risks of organic hazardous air pollutants in the United States.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces oxidative stress, DNA strand breaks, and poly(ADP-ribose) polymerase-1 activation in human breast carcinoma cell lines.

Development of a conditional bioluminescent transplant model for TPM3-ALK-induced tumorigenesis as a tool to validate ALK-dependent cancer targeted therapy.

Imatinib mesylate inhibits cell invasion of malignant peripheral nerve sheath tumor induced by platelet-derived growth factor-BB.

A proposed mechanism for the protective effect of dioxin against breast cancer.

Polychlorinated biphenyls modulated tumorigenesis in Sprague Dawley rats: correlation with mixed function oxidase activities and superoxide (O₂^{*}) formation potentials and implied mode of action.

Cyclin B1 proteolysis via p38 MAPK signaling participates in G2 checkpoint elicited by arsenite.

Workshop overview: arsenic research and risk assessment.

Transplacental arsenic carcinogenesis in mice.

The aryl hydrocarbon receptor, more than a xenobiotic-interacting protein.

Sarcoma risk and dioxin emissions from incinerators and industrial plants: a population-based case-control study (Italy).

Pesticide use and colorectal cancer risk in the Agricultural Health Study.

Pulmonary epithelial cell differentiation in the nitrofen-induced congenital diaphragmatic hernia.

Sodium selenite induces superoxide-mediated mitochondrial damage and subsequent autophagic cell death in malignant glioma cells.

A municipal solid waste incinerator as the single dominant point source of PCDD/Fs in an area of increased non-Hodgkin's lymphoma incidence.

Cytotoxicity in cultured mammalian cells is a function of the method used to estimate it.

Serum dioxin concentrations and risk of uterine leiomyoma in the Seveso Women's Health Study.

Genotoxicity induced by arsenic compounds in peripheral human lymphocytes analysed by cytokinesis-block micronucleus assay.

[Cancers and pesticides].

Elevation of 8-hydroxydeoxyguanosine and cell proliferation via generation of oxidative stress by organic arsenicals contributes to their carcinogenicity in the rat liver and bladder.

Differences in acute toxicity syndromes of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 1,2,3,4,7,8-hexachlorodibenzo-p-dioxin in rats.

[Recommendation of a highly sensitive method for measuring hemoglobin in hemolytic test].

Dihydroartemisinin exerts cytotoxic effects and inhibits hypoxia inducible factor-1 α activation in C6 glioma cells.

[Chloracne after exposure to dioxin].

Estrogen metabolism and formation of estrogen-DNA adducts in estradiol-treated MCF-10F cells. The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin induction and catechol-O-methyltransferase inhibition.

Sequential treatment by ionizing radiation and sodium arsenite dramatically accelerates TRAIL-mediated apoptosis of human melanoma cells.

Proteome and cytoskeleton responses in osteosarcoma cells with reduced OXPHOS activity.

Allium cepa chromosome aberration and micronucleus tests applied to study genotoxicity of extracts from pesticide-treated vegetables and grapes.

Effects of the plant flavonoids silymarin and quercetin on arsenite-induced oxidative stress in CHO-K1 cells.

Agricultural exposures and gastric cancer risk in Hispanic farm workers in California.

Aryl hydrocarbon receptor plays a significant role in mediating airborne particulate-induced carcinogenesis in mice.

Exposure in utero to 2,2',3,3',4,6'-hexachlorobiphenyl (PCB 132) impairs sperm function and alters testicular apoptosis-related gene expression in rat offspring.

Inhibition of NF- κ B does not induce c-Jun N-terminal kinase-mediated apoptosis in reperfusion injury.

Yeast NDI1 improves oxidative phosphorylation capacity and increases protection against oxidative stress and cell death in cells carrying a Leber's hereditary optic neuropathy mutation.

Pro-angiogenesis action of arsenic and its reversal by selenium-derived compounds.

Determinations of dioxinlike activity in selected mollusks from the coast of the Bohai Sea, China, using the H4IIE-luc bioassay.

Some clinico and histopathological changes in female goats experimentally exposed to dioxin.

Site-directed photoproteolysis of 8-oxoguanine DNA glycosylase 1 (OGG1) by specific porphyrin-protein probe conjugates: a strategy to improve the effectiveness of photodynamic therapy for cancer.

Carcinogenic food contaminants.

Possible application of human c-Ha-ras proto-oncogene transgenic rats in a medium-term bioassay model for carcinogens.

Prevention of aneuploidy by S-adenosyl-methionine in human cells treated with sodium arsenite.

On the translation of uncertainty from toxicokinetic to toxicodynamic models--the TCDD example.

Long-term effects of subcutaneously injected 2,3,7,8-tetrachlorodibenzo-p-dioxin on the liver of rhesus monkeys.

Effects of various pesticides on human 5alpha-reductase activity in prostate and LNCaP cells.

Role of heat shock protein 70 in hepatic ischemia-reperfusion injury in mice.

Prenatal TCDD exposure predisposes for mammary cancer in rats.

Synthesis and in vitro evaluation of targeted tetracycline derivatives: effects on inhibition of matrix metalloproteinases.

Hepatoprotective activity of liposomal flavonoid against arsenite-induced liver fibrosis.

Benzo[a]pyrene-7,8-dihydrodiol promotes checkpoint activation and G2/M arrest in human bronchoalveolar carcinoma H358 cells.

Identification of kaempferol as an inhibitor of cigarette smoke-induced activation of the aryl hydrocarbon receptor and cell transformation.

Pharmacokinetics of arsenic species in Japanese patients with relapsed or refractory acute promyelocytic leukemia treated with arsenic trioxide.

Hsp90 inhibitors suppress HCV replication in replicon cells and humanized liver mice.

Nucleotide metabolizing ecto-enzymes in Walker 256 tumor cells: molecular identification, kinetic characterization and biochemical properties.

[Effect of tetrandrine on endothelin expression in the lungs and clinical significance thereof: experiment with rat models with nitrofen-induced congenital diaphragmatic hernia].

[Arsenical poisoning: how and why to diagnose it].

Intravenous ferric gluconate significantly improves response to epoetin alfa versus oral iron or no iron in anemic patients with cancer receiving chemotherapy.

The role of chrysin and the Ah receptor in induction of the human UGT1A1 gene in vitro and in transgenic UGT1 mice.

Fetal onset of aberrant gene expression relevant to pulmonary carcinogenesis in lung adenocarcinoma development induced by in utero arsenic exposure.

The aryl hydrocarbon receptor inhibits prostate carcinogenesis in TRAMP mice.

P-selectin mediates metastatic progression through binding to sulfatides on tumor cells.

ATP depletion does not account for apoptosis induced by inhibition of mitochondrial electron transport chain in human dopaminergic cells.

Genetic polymorphisms in MTHFR 677 and 1298, GSTM1 and T1, and metabolism of arsenic.

Urinary arsenic profile affects the risk of urothelial carcinoma even at low arsenic exposure.

Microarray analysis of gene expression in peripheral blood mononuclear cells from dioxin-exposed human subjects.

Vesicle disruption, plasma membrane bleb formation, and acute cell death caused by illumination with blue light in acridine orange-loaded malignant melanoma cells.

In vitro mitigation of arsenic toxicity by tea polyphenols in human lymphocytes.

[Sea urchin embryo, DNA-damaged cell cycle checkpoint and the mechanisms initiating cancer development].

Reproductive disorders associated with pesticide exposure.

Cyclooxygenase-2 promoter activation by the aromatic hydrocarbon receptor in breast cancer mcf-7 cells: repressive effects of conjugated linoleic acid.

[¹¹C]Vinblastine syntheses and preliminary imaging in cancer patients.

Arsenic methylation, urinary arsenic metabolites and human diseases: current perspective.

Fatty acid biosynthesis as a drug target in apicomplexan parasites.

Requirement of aryl hydrocarbon receptor overexpression for CYP1B1 up-regulation and cell growth in human lung adenocarcinomas.

Role of dioxin response element and nuclear factor-kappaB motifs in 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated regulation of Fas and Fas ligand expression.

Endocrine-disrupting potential of bisphenol A, bisphenol A dimethacrylate, 4-n-nonylphenol, and 4-n-octylphenol in vitro: new data and a brief review.

A critical comparison of murine pathology and epidemiological data of TCDD, PCB126, and PeCDF.

The risk screening for indoor air pollution chemicals in Japan.

ATF4-dependent oxidative induction of the DNA repair enzyme Ape1 counteracts arsenite cytotoxicity and suppresses arsenite-mediated mutagenesis.

Constitutive mRNA expression of various glutathione S-transferase isoforms in different tissues of mice.

Thyroxine-metabolizing rat uridine diphosphate-glucuronosyltransferase 1A7 is regulated by thyroid hormone receptor.

Dioxin affects glucose transport via the arylhydrocarbon receptor signal cascade in pluripotent embryonic carcinoma cells.

Biochemical characterization of ecto-nucleotide pyrophosphatase/phosphodiesterase (E-NPP, E.C. 3.1.4.1) from rat heart left ventricle.

Nrf2 protects human bladder urothelial cells from arsenite and monomethylarsonous acid toxicity.

Hepatic transcriptional networks induced by exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Disruption of clock gene expression alters responses of the aryl hydrocarbon receptor signaling pathway in the mouse mammary gland.

Alpha,beta-unsaturated aldehydes in cigarette smoke release inflammatory mediators from human macrophages.

The nitric oxide prodrug, V-PYRRO/NO, mitigates arsenic-induced liver cell toxicity and apoptosis.

Genetic determinants of mitochondrial response to arsenic in yeast *Saccharomyces cerevisiae*.

Lipid peroxidation-induced DNA damage in cancer-prone inflammatory diseases: a review of published adduct types and levels in humans.

Induction of translationally controlled tumor protein (TCTP) by transcriptional and post-transcriptional mechanisms.

Oxidative stress and antioxidant defenses in goldfish liver in response to short-term exposure to arsenite.

Attic dust and human blood samples collected near a former wood treatment facility.

Evaluation of genotoxic and non-genotoxic effects of organic air pollution using in vitro bioassays.

Carcinogen-induced histone alteration in normal human mammary epithelial cells.

Genotoxicity of arsenic evaluated by *Allium-root* micronucleus assay.

Contaminants in fish: risk-benefit considerations.

Metabolism of benzo[a]pyrene in human bronchoalveolar H358 cells using liquid chromatography-mass spectrometry.

Tumor necrosis factor- α modulates effects of aryl hydrocarbon receptor ligands on cell proliferation and expression of cytochrome P450 enzymes in rat liver "stem-like" cells.

Arsenite induced oxidative damage in mouse liver is associated with increased cytokeratin 18 expression.

Horse heart myoglobin catalyzes the H₂O₂-dependent oxidative dehalogenation of chlorophenols to DNA-binding radicals and quinones.

Estimating dioxin-like polychlorinated biphenyl toxic equivalents from total polychlorinated biphenyl measurements in fish.

Metabolic activation of herbal and dietary constituents and its clinical and toxicological implications: an update.

Arecoline inhibits the 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced cytochrome P450 1A1 activation in human hepatoma cells.

Site-specific health risk assessment of dioxins and furans in an industrial region with numerous emission sources.

SCL-GFP transgenic zebrafish: in vivo imaging of blood and endothelial development and identification of the initial site of definitive hematopoiesis.

Effects of long-term alachlor exposure on hepatic antioxidant defense and detoxifying enzyme activities in crucian carp (*Carassius auratus*).

Health risk assessment for polychlorinated biphenyls, polychlorinated dibenzo-p-dioxins and dibenzofurans, and polychlorinated naphthalenes in seafood from Guangzhou and Zhoushan, China.

Molecular characterization of cytochrome P450 1A1, 1A2, and 1B1, and effects of polychlorinated dibenzo-p-dioxin, dibenzofuran, and biphenyl congeners on their hepatic expression in Baikal seal (*Pusa sibirica*).

Prenatal exposures to persistent organic pollutants as measured in cord blood and meconium from three localities of Zhejiang, China.

[Estimation of urinary diacetylspermine in Yusho patients].

Is the natural PCDD/PCDF mixture toxic for human placental JEG-3 cell line? The action of the toxicants on hormonal profile, CYP1A1 activity, DNA damage and cell apoptosis.

Differential regulation of thyroid hormone receptor-mediated function by endocrine disruptors.

HPLC-ICP-MS speciation analysis of arsenic in urine of Japanese subjects without occupational exposure.

4-Methoxyestradiol-induced oxidative injuries in human lung epithelial cells.

Transplacental exposure to inorganic arsenic at a hepatocarcinogenic dose induces fetal gene expression changes in mice indicative of aberrant estrogen signaling and disrupted steroid metabolism.

Assessment of human pregnane X receptor involvement in pesticide-mediated activation of CYP3A4 gene.

Role of O6-methylguanine-DNA methyltransferase in protecting from alkylating agent-induced toxicity and mutations in mice.

Effect of herbal medicine Juzentaihoto on hepatic and intestinal heat shock gene expression requires intestinal microflora in mouse.

Validation of a high-throughput in vitro alkaline elution/rat hepatocyte assay for DNA damage.

Effects of brominated flame retardants and brominated dioxins on steroidogenesis in H295R human adrenocortical carcinoma cell line.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) exposure of normal human dermal fibroblasts results in AhR-dependent and -independent changes in gene expression.

Risk assessment of dioxins and dioxin-like PCBs in food--comments by the German Federal Environmental Agency.

Health effects classification and its role in the derivation of minimal risk levels: immunological effects.

Intestinal transport and metabolism of acrylamide.

Mouse lung CYP1A1 catalyzes the metabolic activation of 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP).

Resveratrol protects dopaminergic neurons in midbrain slice culture from multiple insults.

Can radiation-induced apoptosis be modulated by inhibitors of energy metabolism?

Investigating the role of the aryl hydrocarbon receptor in benzene-initiated toxicity in vitro.

Control of the autophagy maturation step by the MAPK ERK and p38: lessons from environmental carcinogens.

Influence on mitochondria and cytotoxicity of different antibiotics administered in high concentrations on primary human osteoblasts and cell lines.

Human CYP1A1GFP expression in transgenic mice serves as a biomarker for environmental toxicant exposure.

TCDD-induced alterations in gene expression profiles of the developing mouse paw do not influence morphological differentiation of this potential target tissue.

Synthesis of 6-chloroisoquinoline-5,8-diones and pyrido[3,4-b]phenazine-5,12-diones and evaluation of their cytotoxicity and DNA topoisomerase II inhibitory activity.

Lack of the aryl hydrocarbon receptor leads to impaired activation of AKT/protein kinase B and enhanced sensitivity to apoptosis induced via the intrinsic pathway.

Aryl hydrocarbon receptor activation impairs extracellular matrix remodeling during zebra fish fin regeneration.

Accumulation of organic and inorganic contaminants in shellfish collected in estuarine waters near Pensacola, Florida: contamination profiles and risks to human consumers.

Toxicity of a trivalent organic arsenic compound, dimethylarsinous glutathione in a rat liver cell line (TRL 1215).

Aneuploidy-inducing capacity of two widely used pesticides.

Comparative cytotoxicity of alachlor on RTG-2 trout and SH-SY5Y human cells.

Smoking and lung cancer--a new role for an old toxicant?

Acrolein is a major cigarette-related lung cancer agent: Preferential binding at p53 mutational hotspots and inhibition of DNA repair.

Pentachlorophenol treatment in vivo elevates point mutation rate in zebrafish p53 gene.

Cancer incidence among pesticide applicators exposed to dicamba in the agricultural health study.

Investigation of cancer occurrences associated with an herbicide manufacturing facility.

Recombinogenic activity of 10 chemical compounds in male germ cells of *Drosophila melanogaster*.

Evaluation of the methoxytriazine herbicide prometon using a short-term fathead minnow reproduction test and a suite of in vitro bioassays.

Cancer incidence among pesticide applicators exposed to cyanazine in the agricultural health study.

Cancer and occupational exposure to pentachlorophenol and tetrachlorophenol (Canada).

A case-control study of myelodysplastic syndromes in Belgrade (Serbia Montenegro).

Effects of Diuron [3-(3,4-dichlorophenyl)-1,1-dimethylurea] on the urinary bladder of male Wistar rats.

NTP Technical Report on the comparative toxicity studies of allyl acetate (CAS No. 591-87-7), allyl alcohol (CAS No. 107-18-6) and acrolein (CAS No. 107-02-8) administered by gavage to F344/N rats and B6C3F1 mice.

European Union bans atrazine, while the United States negotiates continued use.

Indomethacin induces small intestinal damage and inhibits amitrole-associated thyroid carcinogenesis in rats initiated with N-bis(2-hydroxypropyl)nitrosamine.

Cancer incidence among pesticide applicators exposed to metolachlor in the Agricultural Health Study.

[Effect of baicalin on expression of heme oxygenase-1 in lung injury of rats associated with paraquat poisoning].

Proximity to crops and residential exposure to agricultural herbicides in Iowa.

Dimethylarsinic acid: results of chronic toxicity/oncogenicity studies in F344 rats and in B6C3F1 mice.

Assessing the human health risks from exposure of inorganic arsenic through oyster (*Crassostrea gigas*) consumption in Taiwan.

Paternal occupational exposure to pesticides or herbicides as risk factors for cancer in children and young adults: a case-control study from the North of England.

Pesticide assessment: Protecting public health on the home turf.

Story short on science.

Neuregulin 1-Beta cytoprotective role in AML 12 mouse hepatocytes exposed to pentachlorophenol.

Hodgkin lymphoma, multiple myeloma, soft tissue sarcomas, insect repellents, and phenoxyherbicides.

Distinct gene expression profiles in immortalized human urothelial cells exposed to inorganic arsenite and its methylated trivalent metabolites.

A crucial role of Nrf2 in in vivo defense against oxidative damage by an environmental pollutant, pentachlorophenol.

Prostate cancer in US Air Force veterans of the Vietnam war.

Methylated arsenicals: the implications of metabolism and carcinogenicity studies in rodents to human risk assessment.

Orphan nuclear receptor pregnane X receptor sensitizes oxidative stress responses in transgenic mice and cancerous cells.

A comparative study of the sub-chronic toxic effects of three organic arsenical compounds on the urothelium in F344 rats; gender-based differences in response.

Non-Hodgkin lymphoma and pesticide exposure: 25 years of research.

Decrease in NADPH-cytochrome P450 reductase activity of the human heart, Liver and lungs in the presence of alpha-lipoic acid.

Neuroglobin and cytoglobin overexpression protects human SH-SY5Y neuroblastoma cells against oxidative stress-induced cell death.

Contrasting genome-wide distribution of 8-hydroxyguanine and acrolein-modified adenine during oxidative stress-induced renal carcinogenesis.

Tissue distribution of lipid peroxidation product acrolein in human colon carcinogenesis.

[Therapeutic effect of somatostatin on acute respiratory distress syndrome in experimental rats].

Neuromelanin induces oxidative stress in mitochondria through release of iron: mechanism behind the inhibition of 26S proteasome.

6-Hydroxydopamine but not 1-methyl-4-phenylpyridinium abolishes alpha-synuclein anti-apoptotic phenotype by inhibiting its proteasomal degradation and by promoting its aggregation.

Gene expression of cytokines and growth factors in the lungs after paraquat administration in mice.

Delayed occurrence of H-ras12V-induced hepatocellular carcinoma with long-term treatment with cinnamaldehydes.

Studies on the goitrogenic mechanism of action of N,N,N',N'-tetramethylthiourea.

Follow-up of 180 alcoholic patients for up to 7 years after outpatient treatment: impact of alcohol deterrents on outcome.

Differential regulation of c-jun and CREB by acrolein and 4-hydroxynonenal.

Arsenic biogeochemistry and human health risk assessment in organo-arsenical pesticide-applied acidic and alkaline soils: an incubation study.

Metabolic profile in workers occupationally exposed to arsenic: role of GST polymorphisms.

Induction and expression of GST-Pi foci in the liver of Cyclophosphamide-administered rats.

Distribution of urinary selenium and arsenic among pregnant women exposed to arsenic in drinking water.

Sodium arsenite accelerates TRAIL-mediated apoptosis in melanoma cells through upregulation of TRAIL-R1/R2 surface levels and downregulation of cFLIP expression.

Anthropometric and metabolic factors and risk of benign prostatic hyperplasia: a prospective cohort study of Air Force veterans.

Pharmacologic and functional characterization of malignant hyperthermia in the R163C RyR1 knock-in mouse.

Cellular uptake of magnetic nanoparticle is mediated through energy-dependent endocytosis in A549 cells.

Binding and activation of the seven-transmembrane estrogen receptor GPR30 by environmental estrogens: a potential novel mechanism of endocrine disruption.

Acute activation of glucose uptake by glucose deprivation in L929 fibroblast cells.

Induction of cyclin D1 by submicromolar concentrations of arsenite in human epidermal keratinocytes.

Novel selective orally active CRTH2 antagonists for allergic inflammation developed from in silico derived hits.

MicroRNA responses to cellular stress.

Mitochondrial reactive oxygen species and nitric oxide-mediated cancer cell apoptosis in 2-butylamino-2-demethoxyhypocrellin B photodynamic treatment.

Modulation of aromatase activity and mRNA by various selected pesticides in the human choriocarcinoma JEG-3 cell line.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (Cas No. 31508-00-6) in female Harlan Sprague-Dawley rats (gavage studies).

[Current progress in animal models of arsenic carcinogenesis].

Thiazopyr and thyroid disruption: case study within the context of the 2006 IPCS Human Relevance Framework for analysis of a cancer mode of action.

Serum dioxin, testosterone, and subsequent risk of benign prostatic hyperplasia: a prospective cohort study of Air Force veterans.

Folate and arsenic metabolism: a double-blind, placebo-controlled folic acid-supplementation trial in Bangladesh.

Endocrine disrupters--potential modulators of the immune system and allergic response.

Correlated resistance to glucose deprivation and cytotoxic agents in fibroblast cell lines from long-lived pituitary dwarf mice.

Environmental arsenic exposure and sputum metalloproteinase concentrations.

Clusterin up-regulation following sub-lethal oxidative stress and lipid peroxidation in human neuroblastoma cells.

[Effect of adenovirus-mediated mutant exogenous P27kip1 gene expression on the chemosensitivities of cholangiocarcinoma cell line].

Mental health status of municipal solid waste incinerator workers compared with local government office workers.

Carcinogenicity of "non-dioxinlike" polychlorinated biphenyls.

Risk assessments of polychlorinated dibenzo- p-dioxins, polychlorinated dibenzofurans, and dioxin-like polychlorinated biphenyls in food.

Today's epidemics in children: possible relations to environmental pollution and suggested preventive measures.

Comparison of chronic toxicity and carcinogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in 2-year bioassays in female Sprague-Dawley rats.

Carcinogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in experimental models.

Aqueous extract of *Trigonella foenum-graecum* L. ameliorates additive urotoxicity of buthionine sulfoximine and cyclophosphamide in mice.

Exposure to non-arsenic pesticides is associated with lymphoma among farmers in Spain.

t(14;18) translocations in lymphocytes of healthy dioxin-exposed individuals from Seveso, Italy.

Bifunctional modulating effects of an indigo dimer (bisindigotin) to CYP1A1 induction in H4IIE cells.

Arsenic inhibits induction of cytochrome P450 1A1 by 2,3,7,8-tetrachlorodibenzo-p-dioxin in human hepatoma cells.

Oxidative stress by ascorbate/menadione association kills K562 human chronic myelogenous leukaemia cells and inhibits its tumour growth in nude mice.

Over-expression of AhR (aryl hydrocarbon receptor) induces neural differentiation of Neuro2a cells: neurotoxicology study.

Low-dose risk, hormesis, analogical and logical thinking.

Cancer and pesticides: an overview and some results of the Italian multicenter case-control study on hematolymphopietic malignancies.

Aryl hydrocarbon receptor agonists directly activate estrogen receptor alpha in MCF-7 breast cancer cells.

Novel functional association of serine palmitoyltransferase subunit 1-A peptide in sphingolipid metabolism with cytochrome P4501A1 transactivation and proliferative capacity of the human Glioma LN18 brain tumor cell line.

Preconception brief: occupational/environmental exposures.

PCB 153, a non-dioxin-like tumor promoter, selects for beta-catenin (Catnb)-mutated mouse liver tumors.

Quaternary benzo[c]phenanthridine alkaloids sanguinarine and chelerythrine do not affect transcriptional activity of aryl hydrocarbon receptor: analyses in rat hepatoma cell line H4IIE.luc.

Molecular mechanism of inhibitory aryl hydrocarbon receptor-estrogen receptor/Sp1 cross talk in breast cancer cells.

Inhibitory effect of caffeic acid phenethyl ester on the growth of SW480 colorectal tumor cells involves beta-catenin associated signaling pathway down-regulation.

Quantitative relationship of dioxin-responsive gene expression to dioxin response element in Hep3B and HepG2 human hepatocarcinoma cell lines.

Agricultural pesticide use and risk of t(14;18)-defined subtypes of non-Hodgkin lymphoma.

Ah receptor: dioxin-mediated toxic responses as hints to deregulated physiologic functions.

Down-regulation of wt1 expression in leukemia cell lines as part of apoptotic effect in arsenic treatment using two compounds.

TCDD exposure-response analysis and risk assessment.

Epigenetic inactivation of the dioxin-responsive cytochrome P4501A1 gene in human prostate cancer.

Decreased nitric oxide production in the rat brain after chronic arsenic exposure.

Mechanisms of 2-butoxyethanol-induced hemangiosarcomas.

Insulin-like growth factor-I increases bone sialoprotein (BSP) expression through fibroblast growth factor-2 response element and homeodomain protein-binding site in the proximal promoter of the BSP gene.

Estimated cancer risk of dioxins to humans using a bioassay and physiologically based pharmacokinetic model.

Effect of biochanin A on the aryl hydrocarbon receptor and cytochrome P450 1A1 in MCF-7 human breast carcinoma cells.

Dioxin exposure and benign prostatic hyperplasia.

Unique secondary chromosomal abnormalities are frequently found in the chronic phase of chronic myeloid leukemia in southern Vietnam.

A comparative study on the antimutagenicity of atorvastatin and lovastatin against directly acting mutagens.

HCV proteins increase expression of heme oxygenase-1 (HO-1) and decrease expression of Bach1 in human hepatoma cells.

Overexpression of survivin in primary ATL cells and sodium arsenite induces apoptosis by down-regulating survivin expression in ATL cell lines.

[Development of invasive urinary bladder carcinomas].

Characterization of ryanodine receptor-mediated calcium release in human B cells: relevance to diagnostic testing for malignant hyperthermia.

The aryl hydrocarbon receptor pathway and sexual differentiation of neuroendocrine functions.

A potential endogenous ligand for the aryl hydrocarbon receptor has potent agonist activity in vitro and in vivo.

Aryl hydrocarbon receptor-independent activation of estrogen receptor-dependent transcription by 3-methylcholanthrene.

Consumption advisories for salmon based on risk of cancer and noncancer health effects.

BRCA1 modulates xenobiotic stress-inducible gene expression by interacting with ARNT in human breast cancer cells.

Expression profiling of estrogen-responsive genes in breast cancer cells treated with alkylphenols, chlorinated phenols, parabens, or bis- and benzoylphenols for evaluation of estrogenic activity.

[Environmental pollution from dioxins and soft tissue sarcomas in the population of Venice and Mestre: an example of the use of current electronic information sources].

NTP technical report on the toxicology and carcinogenesis studies of 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (Gavage studies).

Relative cancer potencies of selected dioxin-like compounds on a body-burden basis: comparison to current toxic equivalency factors (TEFs).

Clinical pharmacokinetic study of arsenic trioxide in an acute promyelocytic leukemia (APL) patient: speciation of arsenic metabolites in serum and urine.

Review and meta-analysis of risk estimates for prostate cancer in pesticide manufacturing workers.

Dual treatment with COX-2 inhibitor and sodium arsenite leads to induction of surface Fas Ligand expression and Fas-Ligand-mediated apoptosis in human melanoma cells.

Recommended relative potency factors for 2,3,4,7,8-pentachlorodibenzofuran: the impact of different dose metrics.

Pendimethalin exposure and cancer incidence among pesticide applicators.

Chronic exposure to methylated arsenicals stimulates arsenic excretion pathways and induces arsenic tolerance in rat liver cells.

Synchrotron microradiography study on acute lung injury of mouse caused by PM(2.5) aerosols.

The dioxin receptor is silenced by promoter hypermethylation in human acute lymphoblastic leukemia through inhibition of Sp1 binding.

Microtubules are more stable and more highly acetylated in ethanol-treated hepatic cells.

Role of CYP3A4 in the regulation of the aryl hydrocarbon receptor by omeprazole sulphide.

Functional properties of ryanodine receptors carrying three amino acid substitutions identified in patients affected by multi-minicore disease and central core disease, expressed in immortalized lymphocytes.

In vivo-in vitro toxicogenomic comparison of TCDD-elicited gene expression in Hepa1c1c7 mouse hepatoma cells and C57BL/6 hepatic tissue.

Quantitation of toxic arsenic species and arsenobetaine in Pacific oysters using an off-line process with hydride generation-atomic absorption spectroscopy.

Loss of glial lazarrillo, a homolog of apolipoprotein D, reduces lifespan and stress resistance in *Drosophila*.

NTP technical report on the toxicology and carcinogenesis studies of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (CAS No. 1746-01-6) in female Harlan Sprague-Dawley rats (Gavage Studies).

Involvement of cytoskeleton in AhR-dependent CYP1A1 expression.

Quantitative analysis of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced proteome alterations in 5L rat hepatoma cells using isotope-coded protein labels.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induced cytochrome P450s alter the formation of reactive oxygen species in liver cells.

Uncertainties related to the assignment of a toxic equivalency factor for 1,2,3,4,6,7,8,9-octachlorodibenzo-p-dioxin.

Characterization of transferrin receptor-dependent GaC-Tf-FeN transport in human leukemic HL60 cells.

Identifying soil cleanup criteria for dioxins in urban residential soils: how have 20 years of research and risk assessment experience affected the analysis?

Silybin and dehydrosilybin inhibit cytochrome P450 1A1 catalytic activity: a study in human keratinocytes and human hepatoma cells.

Global gene expression associated with hepatocarcinogenesis in adult male mice induced by in utero arsenic exposure.

Bothrops moojeni myotoxin-II, a Lys49-phospholipase A2 homologue: an example of function versatility of snake venom proteins.

Synergism in immunotoxicological effects due to repeated combined administration of arsenic and lead in mice.

Depletion of securin increases arsenite-induced chromosome instability and apoptosis via a p53-independent pathway.

Time-course changes of mixture effects on AhR binding-dependent luciferase activity in a crude extract from a compost sample.

Time-dependent effects of sodium arsenite on DNA breakage and apoptosis observed in the comet assay.

TCDD as a biological response modifier for Mitomycin C: oxygen tension affects enzyme activation, reactive oxygen species and cell death.

The ligand status of the aromatic hydrocarbon receptor modulates transcriptional activation of BRCA-1 promoter by estrogen.

Lymphoid leukaemia in a saker falcon.

Biosynthesis of ¹⁴C-phytoene from tomato cell suspension cultures (*Lycopersicon esculentum*) for utilization in prostate cancer cell culture studies.

Control selection and pesticide exposure assessment via GIS in prostate cancer studies.

A Weight-of-evidence analysis of the cancer dose-response characteristics of 2,3,7,8-tetrachlorodibenzodioxin (TCDD).

Investigation of sanguinarine and chelerythrine effects on CYP1A1 expression and activity in human hepatoma cells.

The citrus flavonoid naringenin stimulates DNA repair in prostate cancer cells.

Occupational factors and risk of adult bone sarcomas: a multicentric case-control study in Europe.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces matrix metalloproteinase (MMP) expression and invasion in A2058 melanoma cells.

Arsenic induced apoptosis in rat liver following repeated 60 days exposure.

Antioxidant, antimutagenic, and antitumor effects of pine needles (*Pinus densiflora*).

NF-kappaB-associated MnSOD induction protects against beta-amyloid-induced neuronal apoptosis.

Chloroacetaldehyde as a sulfhydryl reagent: the role of critical thiol groups in ifosfamide nephropathy.

Chondroitin sulfate A chains enhance platelet derived growth factor-mediated signalling in fibrosarcoma cells.

Possible beneficial effects of melatonin supplementation on arsenic-induced oxidative stress in Wistar rats.

Polychlorinated biphenyls (PCBs): routes of exposure and effects on human health.

Molecular biology of the nasal airways: how do we assess cellular and molecular responses in the nose?

[The multifaceted effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in organisms, especially dentition changes].

NTP toxicology and carcinogenesis studies of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (CAS No. 57465-28-8) in female Harlan Sprague-Dawley rats (Gavage Studies).

CXCL12 is displayed by rheumatoid endothelial cells through its basic amino-terminal motif on heparan sulfate proteoglycans.

Regression analysis of pesticide use and breast cancer incidence in California Latinas.

Arsenic-induced cell death in liver and brain of experimental rats.

Treatment for simple plantar verrucae: monochloroacetic acid and 10% formaldehyde versus 10% formaldehyde alone.

Arsenic exposure in Hungary, Romania and Slovakia.

Effects of caffeine, halothane, and 4-chloro-m-cresol on skeletal muscle lactate and pyruvate in malignant hyperthermia-susceptible and normal swine as assessed by microdialysis.

Glycerol uptake in HCT-15 human colon cancer cell line by Na(+)-dependent carrier-mediated transport.

Activation of telomerase in BeWo cells by estrogen and 2,3,7,8-tetrachlorodibenzo-p-dioxin in cooperation with c-Myc.

Quantification of urinary allantoin by capillary zone electrophoresis during recombinant urate oxydase (rasburicase) therapy.

Potential of apoptosis by heat stress plus pesticide exposure in stress resistant human B-lymphoma cells and its attenuation through interaction with follicular dendritic cells: role for c-Jun N-terminal kinase signaling.

The aryl hydrocarbon receptor directly regulates expression of the potent mitogen epiregulin.

Induction of cytochrome P450-1A by the equine estrogen equilenin, a new endogenous aryl hydrocarbon receptor ligand.

Detection of equine herpesvirus type 1 using a real-time polymerase chain reaction.

The influence of inulin on the absorption of nitrogen and the production of metabolites of protein fermentation in the colon.

Hepatic gene downregulation following acute and subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Modeling inflammation-drug interactions in vitro: a rat Kupffer cell-hepatocyte coculture system.

ATM/ATR-related checkpoint signals mediate arsenite-induced G2/M arrest in primary aortic endothelial cells.

cis-Terpenones as an effective chemopreventive agent against aflatoxin B1-induced cytotoxicity and TCDD-induced P450 1A/B activity in HepG2 cells.

Serum dioxin-like activity is associated with reproductive parameters in young men from the general Flemish population.

Influx of macrophages into livers of rats treated with hepatotoxicants (thioacetamide, allyl alcohol, D-galactosamine) induces expression of HSP25.

Deletion and single nucleotide substitution at G:C in the kidney of gpt delta transgenic mice after ferric nitrilotriacetate treatment.

TNF-alpha, IFN-gamma, and IL-1beta modulate hyaluronan synthase expression in human skin fibroblasts: synergistic effect by concomitant treatment with FeSO4 plus ascorbate.

Cytotoxic effects of S-(dimethylarsino)-glutathione: a putative intermediate metabolite of inorganic arsenicals.

Duox2 exhibits potent heme peroxidase activity in human respiratory tract epithelium.

Identification and characterization of genes susceptible to transcriptional cross-talk between the hypoxia and dioxin signaling cascades.

Acetylcholinesterase inhibition and gill lesions in *Rasbora caverii*, an indigenous fish inhabiting rice field associated waterbodies in Sri Lanka.

Differential regulation of sinusoidal and canalicular hepatic drug transporter expression by xenobiotics activating drug-sensing receptors in primary human hepatocytes.

Evaluation of the sensitivity of three sublethal cytotoxicity assays in human HepG2 cell line using water contaminants.

Toxicology and carcinogenesis studies of a mixture of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (Cas No. 1746-01-6), 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4), and 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) in female Harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4) in female Harlan Sprague-Dawley rats (gavage studies).

Results of a long-term carcinogenicity bioassay on Sprague-Dawley rats exposed to sodium arsenite administered in drinking water.

The novel Src kinase inhibitor M475271 inhibits VEGF-induced vascular endothelial-cadherin and beta-catenin phosphorylation but increases their association.

Aldehydes release zinc from proteins. A pathway from oxidative stress/lipid peroxidation to cellular functions of zinc.

Roles of cellular activation and sulfated glycans in Haemophilus somnus adherence to bovine brain microvascular endothelial cells.

Regulation of the CYP1A1 gene by 2,3,7,8-tetrachlorodibenzo-p-dioxin but not by beta-naphthoflavone or 3-methylcholanthrene is altered in hepatitis C virus replicon-expressing cells.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (gavage studies).

Effects of hypoxia and limited diffusion in tumor cell microenvironment on bystander effect of P450 prodrug therapy.

Case report: Hydroquinone and/or glutaraldehyde induced acute myeloid leukaemia?

Arsenicals in maternal and fetal mouse tissues after gestational exposure to arsenite.

Gene expression profile by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the liver of wild-type (AhR+/+) and aryl hydrocarbon receptor-deficient (AhR-/-) mice.

Cortical microtubule arrays lose uniform alignment between cells and are oryzalin resistant in the Arabidopsis mutant, radially swollen 6.

Sustained aryl hydrocarbon receptor activity attenuates liver regeneration.

Kinetics of arsenic methylation by freshly isolated B6C3F1 mouse hepatocytes.

Differences in tumor-associated protein levels among middle-age Flemish women in association with area of residence and exposure to pollutants.

Exposure of mice to arsenic and/or benzo[a]pyrene does not increase the frequency of Aprt-deficient cells recovered from explanted skin of Aprt heterozygous mice.

Identification of new human pregnane X receptor ligands among pesticides using a stable reporter cell system.

Novel compound 2-methyl-2H-pyrazole-3-carboxylic acid (2-methyl-4-o-tolylazo-phenyl)-amide (CH-223191) prevents 2,3,7,8-TCDD-induced toxicity by antagonizing the aryl hydrocarbon receptor.

Geldanamycin, an inhibitor of Hsp90, potentiates cytochrome P450E1-mediated toxicity in HepG2 cells.

A novel integrin alpha5beta1 binding domain in module 4 of connective tissue growth factor (CCN2/CTGF) promotes adhesion and migration of activated pancreatic stellate cells.

Tissue specific induction of cytochrome P450 (CYP) 1A1 and 1B1 in rat liver and lung following in vitro (tissue slice) and in vivo exposure to benzo(a)pyrene.

Enhancing effects of simultaneous treatment with sodium nitrite on 2-amino-3-methylimidazo[4,5-f]quinoline-induced rat liver, colon and Zymbal's gland carcinogenesis after initiation with diethylnitrosamine and 1,2-dimethylhydrazine.

Hormesis: implications for cancer risk assessment.

Induction of oxidative stress responses by dioxin and other ligands of the aryl hydrocarbon receptor.

Dioxin cancer risk--example of hormesis?

Cytotoxicity and aryl hydrocarbon receptor-mediated activity of n-heterocyclic polycyclic aromatic hydrocarbons: structure-activity relationships.

Body burdens of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls and their relations to estrogen metabolism in pregnant women.

Cytochrome P450 expression and metabolic activation of cooked food mutagen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) in MCF10A breast epithelial cells.

Analytical methods for trace levels of reactive carbonyl compounds formed in lipid peroxidation systems.

Influence of phenol, p-cresol and indole on growth and survival of intestinal lactic acid bacteria.

Induction of DNA strand breaks, DNA-protein crosslinks and sister chromatid exchanges by arsenite in a human lung cell line.

Preferential inducibility of CYP1A1 and CYP1A2 by TCDD: differential regulation in primary human hepatocytes versus transformed human cells.

Human response to dioxin: aryl hydrocarbon receptor (AhR) molecular structure, function, and dose-response data for enzyme induction indicate an impaired human AhR.

The aryl hydrocarbon receptor activates the retinoic acid receptoralpha through SMRT antagonism.

Influence of orange juice in the levels and in the genotoxicity of iron and copper.

Human sulphotransferases are involved in the activation of aristolochic acids and are expressed in renal target tissue.

Effects of chronic exposure to sodium arsenite on hypothalamo-pituitary-testicular activities in adult rats: possible an estrogenic mode of action.

In vitro cytotoxicity of TCDD on SPC-A1 cells.

Synthetic smooth muscle cell phenotype is associated with increased nicotinamide adenine dinucleotide phosphate oxidase activity: effect on collagen secretion.

Constitutive activation of the aryl hydrocarbon receptor in T-lineage cells induces thymus involution independently of the Fas/Fas ligand signaling pathway.

Combination of in vitro bioassays encompassing different mechanisms to determine the endocrine-disrupting effects of river water.

Recent female mouse models displaying advanced reproductive aging.

Piceatannol upregulates endothelial heme oxygenase-1 expression via novel protein kinase C and tyrosine kinase pathways.

Synthesis, structure and assessment of the cytotoxic properties of 2,5-dimethylazaferrocenyl phosphonates.

Antiproliferative and antiangiogenic effects of 3-methylcholanthrene, an aryl-hydrocarbon receptor agonist, in human umbilical vascular endothelial cells.

Environmental toxicants and effects on female reproductive function.

Co-administration of zinc and n-acetylcysteine prevents arsenic-induced tissue oxidative stress in male rats.

Manganese enhances peroxynitrite and leukotriene E4 formation in bovine aortic endothelial cells exposed to arsenic.

[Exposure to dioxins in the environment and their health risk].

Environmental impact and human health risks of polychlorinated dibenzo-p-dioxins and dibenzofurans in the vicinity of a new hazardous waste incinerator: a case study.

Association between marijuana use and transitional cell carcinoma.

Competing roles of aldo-keto reductase 1A1 and cytochrome P4501B1 in benzo[a]pyrene-7,8-diol activation in human bronchoalveolar H358 cells: role of AKRs in P4501B1 induction.

Enterocyte cytoskeleton changes are crucial for enhanced translocation of nonpathogenic Escherichia coli across metabolically stressed gut epithelia.

Amine oxidases in apoptosis and cancer.

Specific induction of oxidative stress in terminal bronchiolar Clara cells during dimethylarsenic-induced lung tumor promoting process in mice.

Mutagenicity study of butachlor and its metabolites using Salmonella typhimurium.

The bipyridyl herbicide paraquat produces oxidative stress-mediated toxicity in human neuroblastoma SH-SY5Y cells: relevance to the dopaminergic pathogenesis.

Gene expression profiling of responses to dimethylarsinic acid in female F344 rat urothelium.

Triazine herbicides and epithelial ovarian cancer risk in central California.

Paraquat neurotoxicity is distinct from that of MPTP and rotenone.

Effects of 2,4-D and DCP on the DHT-induced androgenic action in human prostate cancer cells.

Ability of the Hershberger assay protocol to detect thyroid function modulators.

Acrolein in cigarette smoke inhibits T-cell responses.

The use of flow cytometric methods in acute and long-term in vitro testing.

[Cytotoxicity and genotoxicity of human cells exposed in vitro to glyphosate].

The role of trivalent dimethylated arsenic in dimethylarsinic acid-promoted skin and lung tumorigenesis in mice: tumor-promoting action through the induction of oxidative stress.

Insect repellents, phenoxyherbicide exposure, and non-Hodgkin's lymphoma.

Persistent inhibition of human natural killer cell function by ziram and pentachlorophenol.

Activity of NADPH-cytochrome P-450 reductase of the human heart, liver and lungs in the presence of (-)-epigallocatechin gallate, quercetin and resveratrol: an in vitro study.

Altered gene expression in human hepatoma HepG2 cells exposed to low-level 2,4-dichlorophenoxyacetic acid and potassium nitrate.

Differential effects of glyphosate and roundup on human placental cells and aromatase.

A toxicologic and dermatologic assessment of cinnamyl alcohol, cinnamaldehyde and cinnamic acid when used as fragrance ingredients.

Postservice mortality of Air Force veterans occupationally exposed to herbicides during the Vietnam War: 20-year follow-up results.

The role of microglia in paraquat-induced dopaminergic neurotoxicity.

Residential herbicide use and risk of non-Hodgkin lymphoma.

Oral exposure to atrazine modulates cell-mediated immune function and decreases host resistance to the B16F10 tumor model in female B6C3F1 mice.

A risk assessment of atrazine use in California: human health and ecological aspects.

Inorganic arsenic compounds and methylated metabolites induce morphological transformation in two-stage BALB/c 3T3 cell assay and inhibit metabolic cooperation in V79 cell assay.

Genotoxic effects of pentachlorophenol, lindane, transfluthrin, cyfluthrin, and natural pyrethrum on human mucosal cells of the inferior and middle nasal conchae.

Lack of combination hepatocarcinogenicity of harman, norharman and amitrole when given with NaNO₂ in the rat.

Induction of cytotoxicity, aldehydic DNA lesions, and poly(ADP-ribose) polymerase-1 activation by catechol derivatives of pentachlorophenol in calf thymus DNA and in human breast cancer cells.

Nitrofen induces a redox-dependent apoptosis associated with increased p38 activity in P19 teratocarcinoma cells.

Effects of co-administration of antioxidants and arsenicals on the rat urinary bladder epithelium.

Transformed roots of *Crepis capillaris*--a [corrected] sensitive system for the evaluation of the clastogenicity of abiotic agents.

Herbicides and nitrates in groundwater of Maryland and childhood cancers: a geographic information systems approach.

Rapid chromatographic methods for the identification and determination of chlorophenoxy herbicides.

Chemopreventive properties of trans-resveratrol against the cytotoxicity of chloroacetanilide herbicides in vitro.

Arsenic-induced micronuclei formation in mammalian cells and its counteraction by tea.

Cancer incidence among glyphosate-exposed pesticide applicators in the Agricultural Health Study.

Review of the genotoxicity of 4-chloro-2-methylphenoxyacetic acid.

Mortality in New Zealand workers exposed to phenoxy herbicides and dioxins.

Long-lived alphaMUPA transgenic mice show reduced SOD2 expression, enhanced apoptosis and reduced susceptibility to the carcinogen dimethylhydrazine.

Forced uptake of trivalent and pentavalent methylated and inorganic arsenic and its cyto-/genotoxicity in fibroblasts and hepatoma cells.

Doxorubicin increases intracellular hydrogen peroxide in PC3 prostate cancer cells.

Cinnamaldehyde-induced apoptosis in human PLC/PRF/5 cells through activation of the proapoptotic Bcl-2 family proteins and MAPK pathway.

TRPA1 and TRPM8 activation in humans: effects of cinnamaldehyde and menthol.

Influence of atrazine administration and reduction of calorie intake on prostate carcinogenesis in probasin/SV40 T antigen transgenic rats.

Expression of gastrointestinal glutathione peroxidase is inversely correlated to the presence of hepatitis C virus subgenomic RNA in human liver cells.

Urinary trivalent methylated arsenic species in a population chronically exposed to inorganic arsenic.

Plasma retinoid profile in bullfrogs, *Rana catesbeiana*, in relation to agricultural intensity of sub-watersheds in the Yamaska River drainage basin, QuÃ©bec, Canada.

Inhibition of NFkappaB activation and IL-8 expression in human bronchial epithelial cells by acrolein.

Possible enhancing effects of atrazine on growth of 7,12-dimethylbenz(a) anthracene-induced mammary tumors in ovariectomized Sprague-Dawley rats.

Re: "Cancer incidence among pesticide applicators exposed to alachlor in the agricultural health study".

Development of a method for quantification of acrolein-deoxyguanosine adducts in DNA using isotope dilution-capillary LC/MS/MS and its application to human brain tissue.

DNA damage in leukocytes of workers occupationally exposed to arsenic in copper smelters.

Tissue distribution and urinary excretion of inorganic arsenic and its methylated metabolites in mice following acute oral administration of arsenate.

Tissue distribution of arsenic species in rabbits after single and multiple parenteral administration of arsenic trioxide: tissue accumulation and the reversibility after washout are tissue-selective.

Influence of protein binding on acrolein turnover in vitro by oxazaphosphorines and liver microsomes.

Molecular events associated with arsenic-induced malignant transformation of human prostatic epithelial cells: aberrant genomic DNA methylation and K-ras oncogene activation.

Aryl hydrocarbon exposure induces expression of MMP-9 in human prostate cancer cell lines.

Arsenite delays progression through each cell cycle phase and induces apoptosis following G2/M arrest in U937 myeloid leukemia cells.

Suppressive effects of caraway (*Carum carvi*) extracts on 2, 3, 7, 8-tetrachloro-dibenzo-p-dioxin-dependent gene expression of cytochrome P450 1A1 in the rat H4IIE cells.

Enhanced response to caffeine and 4-chloro-m-cresol in malignant hyperthermia-susceptible muscle is related in part to chronically elevated resting $[Ca^{2+}]_i$.

Identification of aldehyde oxidase 1 and aldehyde oxidase homologue 1 as dioxin-inducible genes.

Cell death induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (2,3,7,8-TCDD) in AtT-20 pituitary cells.

Tyrosine kinase inhibitors attenuate Japanese encephalitis virus-induced neurotoxicity.

Mitochondrial $O_2^{\cdot-}$ and H_2O_2 mediate glucose deprivation-induced stress in human cancer cells.

[Not only eggs from free roaming chickens are contaminated. How dangerous is dioxin in foods?].

Endemic nephropathy: the case for chronic poisoning by aristolochia.

Effects of arsenic and UVB on normal human cultured keratinocytes: impact on apoptosis and implication on photocarcinogenesis.

Effects of arsenite on cell cycle progression in a human bladder cancer cell line.

Transcriptional activation of the membrane-bound progesterone receptor (mPR) by dioxin, in endocrine-responsive tissues.

Deregulation of cell proliferation by polycyclic aromatic hydrocarbons in human breast carcinoma MCF-7 cells reflects both genotoxic and nongenotoxic events.

Aminolevulinic acid: from its unique biological function to its star role in photodynamic therapy.

Pesticide use and breast cancer risk among farmers' wives in the agricultural health study.

Consideration of soil properties in assessment of human health risk from exposure to arsenic-enriched soils.

Agricultural exposures and non-Hodgkin's lymphoma.

Reduction of alachlor-induced olfactory mucosal neoplasms by the matrix metalloproteinase inhibitor Ro 28-2653.

Use of black tea in modulating clastogenic effects of arsenic in mice in vivo.

[Health risk related to municipal waste incineration].

Celecoxib inhibits proliferation and induces apoptosis via cyclooxygenase-2 pathway in human pancreatic carcinoma cells.

Comparison of farmers in the agricultural health study to the 1992 and the 1997 censuses of agriculture.

Effects of dioxin and nutrition on cellular proliferation and dioxin- and estrogen-linked genes in ovarian cancer cell lines.

The epidemiology of pesticide exposure and cancer: A review.

Amelioration of sodium arsenite-induced clastogenicity by tea extracts in Chinese hamster v79 cells.

Olfactory epithelial metaplasia and hyperplasia in female Harlan Sprague-Dawley rats following chronic treatment with polychlorinated biphenyls.

Classification of proliferative hepatocellular lesions in harlan sprague-dawley rats chronically exposed to dioxin-like compounds.

Quantitation of polychlorinated biphenyls in fish for human cancer risk assessment: a comparative case study.

Quantification of viability in organotypic multicellular spheroids of human malignant glioma using lactate dehydrogenase activity: a rapid and reliable automated assay.

Dose-additive carcinogenicity of a defined mixture of "dioxin-like compounds".

Role of aldehyde dehydrogenase isozymes in the defense of rat lens and human lens epithelial cells against oxidative stress.

Agricultural pesticide use and childhood cancer in California.

Gingival carcinogenicity in female Harlan Sprague-Dawley rats following two-year oral treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and dioxin-like compounds.

A beta-catenin-dependent pathway regulates expression of cytochrome P450 isoforms in mouse liver tumors.

Regulation of aryl hydrocarbon receptor signal transduction by protein tyrosine kinases.

Lack of CYP1A1 expression is involved in unresponsiveness of the human hepatoma cell line SK-HEP-1 to dioxin.

The epidemiology of non-Hodgkin lymphoma.

Toxicology and carcinogenesis studies of sodium chlorate (Cas No. 7775-09-9) in F344/N rats and B6C3F1 mice (drinking water studies).

[Risk factors for pediatric malignant bone tumors].

Persistent organochlorine chemicals in plasma and risk of non-Hodgkin's lymphoma.

Glycolytic glioma cells with active glycogen synthase are sensitive to PTEN and inhibitors of PI3K and gluconeogenesis.

Vitamin E and organoselenium prevent the cocarcinogenic activity of arsenite with solar UVR in mouse skin.

Sharks do get cancer: few surprises in cartilage research.

Agricultural pesticide use and risk of glioma in Nebraska, United States.

Parental occupational exposure to pesticides and childhood germ-cell tumors.

Occupational exposure to pesticides and risk of non-Hodgkin's lymphoma.

Regulatory mechanisms modulating the expression of cytochrome P450 1A1 gene by heavy metals.

Synthesis and biodistribution of (11)C-GW7845, a positron-emitting agonist for peroxisome proliferator-activated receptor- γ .

Neuritogenesis and neuronal differentiation promoted by 2,4-dinitrophenol, a novel anti-amyloidogenic compound.

Severe cyanide toxicity from 'vitamin supplements'.

Carcinogenic risks of dioxin: mechanistic considerations.

Identification of BCRP as transporter of benzo[a]pyrene conjugates metabolically formed in Caco-2 cells and its induction by Ah-receptor agonists.

Adhesion and Rac1-dependent regulation of biglycan gene expression by transforming growth factor-beta. Evidence for oxidative signaling through NADPH oxidase.

Assay of the synthetic estrogen fosfestrol in pharmaceutical formulations using capillary electrophoresis.

Induction of the heat shock response in vivo inhibits NF-kappaB activity and protects murine liver from endotoxemia-induced injury.

Cumulative and bolus in vitro contracture testing with 4-chloro-3-ethylphenol in malignant hyperthermia positive and negative human skeletal muscles.

Cytochrome P450 1B1 is overexpressed and regulated by hypomethylation in prostate cancer.

Low level, long-term inorganic arsenite exposure causes generalized resistance to apoptosis in cultured human keratinocytes: potential role in skin co-carcinogenesis.

Biomarkers of exposure, effect, and susceptibility of arsenic-induced health hazards in Taiwan.

Immortalized mouse mammary fibroblasts lacking dioxin receptor have impaired tumorigenicity in a subcutaneous mouse xenograft model.

[Effect of salidroside on mitochondria injury induced by sodium azide].

Thioredoxin overexpression in HT-1080 cells induced cellular senescence and sensitization to gamma radiation.

Combined effects of protein kinase inhibitors and 5-fluorouracil on CEA expression in human colon cancer cells.

In utero and lactational 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure: effects on the prostate and its response to castration in senescent C57BL/6J mice.

Induction of p53 by urokinase in lung epithelial cells.

Effect of caffeic acid phenethyl ester on proliferation and apoptosis of colorectal cancer cells in vitro.

Loss of mitochondrial membrane potential and caspase activation enhance apoptosis in irradiated K562 cells treated with herbimycin A.

[Development of the method of magnetic neutron capture therapy of cancer].

Carbon-11 labeled sigma2 receptor ligands for imaging breast cancer.

Aryl hydrocarbon receptor-mediated transcription: ligand-dependent recruitment of estrogen receptor alpha to 2,3,7,8-tetrachlorodibenzo-p-dioxin-responsive promoters.

Development of a new hybrid gel phantom using carrageenan and gellan gum for visualizing three-dimensional temperature distribution during hyperthermia and radiofrequency ablation.

One agent, many diseases: exposure-response data and comparative risks of different outcomes following silica exposure.

Public health benefits of compliance with current E.U. emissions standards for municipal waste incinerators: a health risk assessment with the CalTox multimedia exposure model.

Human health risk assessment of organochlorines associated with fish consumption in a coastal city in China.

NF-kappaB and not the MAPK signaling pathway regulates GADD45beta expression during acute inflammation.

Adipose levels of dioxins and risk of breast cancer.

High susceptibility of human c-Ha-ras proto-oncogene transgenic rats to carcinogenesis: a cancer-prone animal model.

The heat shock protein 90 inhibitor, 17-allylamino-17-demethoxygeldanamycin, enhances osteoclast formation and potentiates bone metastasis of a human breast cancer cell line.

Induction and activation of the aryl hydrocarbon receptor by IL-4 in B cells.

Peroxiredoxin 6, a 1-Cys peroxiredoxin, functions in antioxidant defense and lung phospholipid metabolism.

Temporal and dose-dependent hepatic gene expression patterns in mice provide new insights into TCDD-Mediated hepatotoxicity.

Identification of the tryptophan photoproduct 6-formylindolo[3,2-b]carbazole, in cell culture medium, as a factor that controls the background aryl hydrocarbon receptor activity.

Transcriptional regulation of NF-E2 p45-related factor (NRF2) expression by the aryl hydrocarbon receptor-xenobiotic response element signaling pathway: direct cross-talk between phase I and II drug-metabolizing enzymes.

Ah receptor- and TCDD-mediated liver tumor promotion: clonal selection and expansion of cells evading growth arrest and apoptosis.

[Mortality for non-Hodgkin lymphoma and soft-tissue sarcoma in the surrounding area of an urban waste incinerator. Campi Bisenzio (Tuscany, Italy) 1981-2001].

Dioxin: a review of its environmental effects and its aryl hydrocarbon receptor biology.

Localization of cytochrome P450 CYP2S1 expression in human tissues by in situ hybridization and immunohistochemistry.

Gliomas and farm pesticide exposure in women: the Upper Midwest Health Study.

Chronic toxicity and carcinogenicity of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin displays a distinct dose/time toxicity threshold ($c \times t = k$) and a life-prolonging subthreshold effect.

The dioxin/aryl hydrocarbon receptor mediates downregulation of osteopontin gene expression in a mouse model of gastric tumorigenesis.

Effect of a chemical manufacturing plant on community cancer rates.

Increased heat shock protein 70 expression following toxicant-mediated cytotoxicity: a ubiquitous marker of toxicant exposure?

Uptake, cellular distribution and novel cellular binding proteins of immunostimulatory CpG oligodeoxynucleotides in glioblastoma cells.

Benzo[a]pyrene, but not 2,3,7,8-TCDD, induces G2/M cell cycle arrest, p21CIP1 and p53 phosphorylation in human choriocarcinoma JEG-3 cells: a distinct signaling pathway.

Did TCDD exposure or service in Southeast Asia increase the risk of cancer in air force Vietnam veterans who did not spray agent orange?

Regulation of extracellular signal-regulated protein kinase signaling in human osteosarcoma cells stimulated with nicotine.

[Possibility of targeting FLT3 kinase for the treatment of leukemia].

Gastric hamartomatous tumours in a transgenic mouse model expressing an activated dioxin/Ah receptor.

Insulinlike growth factor I gene expression is increased in the fetal lung after tracheal ligation.

Bisindigotin, a TCDD antagonist from the Chinese medicinal herb *Isatis indigotica*.

Squamous epithelial lesion of the mandibles and maxillae of wild mink (*Mustela vison*) naturally exposed to polychlorinated biphenyls.

Acidic fibroblast growth factor (FGF-1) and FGF receptor 1 signaling in human Y79 retinoblastoma.

Binding of estrogenic compounds to recombinant estrogen receptor-alpha: application to environmental analysis.

Suppressive effects of ethanolic extracts from propolis and its main botanical origin on dioxin toxicity.

Co-mutagenic activity of arsenic and benzo[a]pyrene in mouse skin.

Mitochondrial function in Leydig cell steroidogenesis.

The role of oxidative stress in the modulation of aryl hydrocarbon receptor-regulated genes by As³⁺, Cd²⁺, and Cr⁶⁺.

Gas- and particulate-phase specific tracer and toxic organic compounds in environmental tobacco smoke.

Sodium arsenite-induced inhibition of eukaryotic translation initiation factor 4E (eIF4E) results in cytotoxicity and cell death.

Function of nuclear sex hormone receptors in gene regulation.

Antimutagenicity and cytotoxicity of the constituents from the aerial parts of *Rumex acetosa*.

Intrinsic function of the aryl hydrocarbon (dioxin) receptor as a key factor in female reproduction.

2,3,7,8-TCDD equivalence and mutagenic activity associated with PM₁₀ from three urban locations in New Zealand.

Chemicals as tumor-inducing agents.

Mode of action: reduction of testosterone availability--molluscicide-induced inhibition of spermatogenesis.

[Political poisoning with dioxins--a weapon of chemical "disgracefulness"].

Antimutagenic and anti-oxidant activities of the non-steroidal anti-inflammatory drug celecoxib.

Comparison of the cytotoxicity of the MEIC reference chemicals measured in protein free and in complete culture medium.

Toxicological evaluation of glycerin as a cigarette ingredient.

Inhibition of IgE-dependent mouse triphasic cutaneous reaction by a boiling water fraction separated from mycelium of *Phellinus linteus*.

Current and emerging challenges in toxicopathology: carcinogenic threshold of phenobarbital and proof of arsenic carcinogenicity using rat medium-term bioassays for carcinogens.

Inter-individual susceptibility to environmental toxicants--a current assessment.

Differential effects of eicosapentaenoic and docosahexaenoic acids upon oxidant-stimulated release and uptake of arachidonic acid in human lymphoma U937 cells.

Three-dimensional quantitative structure activity relationship (3D-QSAR) analysis for in vitro toxicity of chlorophenols to HepG2 cells.

Human CD34-positive hematopoietic stem cells constitute targets for carcinogenic polycyclic aromatic hydrocarbons.

Altered retinoid metabolism in female Long-Evans and Han/Wistar rats following long-term 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-treatment.

Soluble branched (1,4)-beta-D-glucans from *Acetobacter* species enhance antitumor activities against MHC class I-negative and -positive malignant melanoma through augmented NK activity and cytotoxic T-cell response.

Plasma protein level changes in waste incineration workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

EGF receptor-dependent JNK activation is involved in arsenite-induced p21Cip1/Waf1 upregulation and endothelial apoptosis.

Possible repair action of Vitamin C on DNA damage induced by methyl methanesulfonate, cyclophosphamide, FeSO₄ and CuSO₄ in mouse blood cells in vivo.

Risk-based consumption advice for farmed Atlantic and wild Pacific salmon contaminated with dioxins and dioxin-like compounds.

Aspects of dioxin toxicity are mediated by interleukin 1-like cytokines.

Mechanisms of exocrine pancreatic toxicity induced by oral treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Harlan Sprague-Dawley Rats.

Small interference RNA-mediated gene silencing of human biliverdin reductase, but not that of heme oxygenase-1, attenuates arsenite-mediated induction of the oxygenase and increases apoptosis in 293A kidney cells.

Scope for regulation of cigarette smoke toxicity: the case for including charcoal filters.

Scope for regulation of cigarette smoke toxicity according to brand differences in published toxicant emissions.

Mitochondrial damage mediates genotoxicity of arsenic in mammalian cells.

Ascorbic acid and alpha-tocopherol as potent modulators of apoptosis on arsenic induced toxicity in rats.

Silencing of human c-myc oncogene expression by poly-DNP-RNA.

Genotoxicity evaluation of electromagnetic fields generated by 835-MHz mobile phone frequency band.

Dioxins and furans determination in postmortem blood by gas chromatography--high-resolution mass spectrometry.

Transient activation of Ras-dependent signalling at the early stages of Herbimycin A induced erythroid differentiation of human K562 cells.

Functional activity of a monocarboxylate transporter, MCT1, in the human retinal pigmented epithelium cell line, ARPE-19.

Inorganic arsenite alters macrophage generation from human peripheral blood monocytes.

Mechanism of TNF- α modulation of Caco-2 intestinal epithelial tight junction barrier: role of myosin light-chain kinase protein expression.

Human cytochrome p450 2s1: lack of activity in the metabolic activation of several cigarette smoke carcinogens and in the metabolism of nicotine.

Glutathione reductase inhibition and methylated arsenic distribution in Cd1 mice brain and liver.

Carcinogenic activity of cigarette smoke gas phase and its modulation by beta-carotene and N-acetylcysteine.

Neurotoxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin in cerebellar granule cells.

Phase I study of MetXia-P450 gene therapy and oral cyclophosphamide for patients with advanced breast cancer or melanoma.

V79-hCYP2E1-hSULT1A1, a cell line for the sensitive detection of genotoxic effects induced by carbohydrate pyrolysis products and other food-borne chemicals.

Exposure to pesticides increases levels of uPA and uPAR in pre-malignant human prostate cells.

A carbohydrate fraction, AIP1, from Artemisia iwayomogi down-regulates Fas gene expression and suppresses apoptotic death of the thymocytes induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Competing roles of cytochrome P450 1A1/1B1 and aldo-keto reductase 1A1 in the metabolic activation of (+/-)-7,8-dihydroxy-7,8-dihydro-benzo[a]pyrene in human bronchoalveolar cell extracts.

Attenuation of cyclosporine A toxicity by sublethal heat shock. Role of catalase.

Prostaglandin E1 transport into rat intestinal cryptic cell line IEC-6.

Chronic exposure to arsenic sensitizes CD3+ and CD56+ human cells to sodium arsenite-mediated apoptosis.

A mixture of ammonium perchlorate and sodium chlorate enhances alterations of the pituitary-thyroid axis caused by the individual chemicals in adult male F344 rats.

Effects of N-acetylcysteine, quercetin, and phytic acid on spontaneous hepatic and renal lesions in LEC rats.

Transport of thalidomide by the human intestinal caco-2 monolayers.

Cytotoxicity and mutagenicity study of waste and purified water samples from electroplating industries prepared by use of ferrous sulfate and wood fly ash.

[Dioxin, poisoning information or brainwashing? On Seveso's and Yushchenko's acne].

Identification of potential biomarkers of genotoxicity and carcinogenicity in L5178Y mouse lymphoma cells by cDNA microarray analysis.

Aryl hydrocarbon receptor-activating polychlorinated biphenyls and their hydroxylated metabolites induce cell proliferation in contact-inhibited rat liver epithelial cells.

Concentration-dependent TCDD elimination kinetics in humans: toxicokinetic modeling for moderately to highly exposed adults from Seveso, Italy, and Vienna, Austria, and impact on dose estimates for the NIOSH cohort.

Paraquat induces oxidative stress and neuronal cell death; neuroprotection by water-soluble Coenzyme Q10.

Herbicide critic dropped from pollution conference.

Pesticides and lung cancer risk in the agricultural health study cohort.

Use of a crop and job specific exposure matrix for estimating cumulative exposure to triazine herbicides among females in a case-control study in the Central Valley of California.

Toxicology and carcinogenesis studies of microencapsulated trans-cinnamaldehyde in rats and mice.

[Biological monitoring and risk assessment].

Immunomodulation of human natural killer cell cytotoxic function by organochlorine pesticides.

Cancer incidence among pesticide applicators exposed to atrazine in the Agricultural Health Study.

Effects of long-term exposure of the red swamp crawfish *Procambarus clarkii* to a mixture of two herbicides, 2,4-dichlorophenoxyacetic acid and monosodium methanearsonate, and associated human health risks.

Mitogenic and cytotoxic effects of pentachlorophenol to AML 12 mouse hepatocytes.

Pentachlorophenol-induced cytotoxic, mitogenic, and endocrine-disrupting activities in channel catfish, *Ictalurus punctatus*.

Toxicity of dipyriddy compounds and related compounds.

Insulin sensitivity following agent orange exposure in Vietnam veterans with high blood levels of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Chlorpropham-induced splenotoxicity and its recovery in rats.

Biokinetics and subchronic toxic effects of oral arsenite, arsenate, monomethylarsonic acid, and dimethylarsinic acid in v-Ha-ras transgenic (Tg.AC) mice.

The role of active arsenic species produced by metabolic reduction of dimethylarsinic acid in genotoxicity and tumorigenesis.

Role of glutathione in dimethylarsinic acid-induced apoptosis.

Microbial metabolite of dimethylarsinic acid is highly toxic and genotoxic.

Mortality and cancer incidence among alachlor manufacturing workers 1968-99.

Metallothionein (I/II) suppresses genotoxicity caused by dimethylarsinic acid.

An in vitro procedure for evaluation of early stage oxidative stress in an established fish cell line applied to investigation of PHAH and pesticide toxicity.

Detection of acrolein-lysine adducts in plasma low-density lipoprotein and in aorta of cyclophosphamide-administered rats.

Response of rat alveolar type II cells and human lung tumor cells towards oxidative stress induced by hydrogen peroxide and paraquat.

Mammalian toxicology overview and human risk assessment for sulfosulfuron.

Cancer mortality in a cohort of licensed herbicide applicators.

Altered AP-1 (activating protein-1) activity and c-jun activation in T cells exposed to the amide class herbicide 3,4-dichloropropionanilide (DCPA).

Herbicide exposure and the risk of transitional cell carcinoma of the urinary bladder in Scottish Terriers.

Glyphosate-based pesticides affect cell cycle regulation.

A nested case-control study of prostate cancer and atrazine exposure.

Association between Agent Orange and prostate cancer: a pilot case-control study.

The effect of estradiol on the oxidative damage and trace element level determined in the liver of rats treated with dimethylarsinic acid.

Catalase transgenic mice: characterization and sensitivity to oxidative stress.

NTP toxicology and carcinogenesis studies of trans-cinnamaldehyde (CAS No. 14371-10-9) in F344/N rats and B6C3F1 mice (feed studies).

Cancer in US Air Force veterans of the Vietnam War.

Evaluation of the genotoxicity of four herbicides in the wing spot test of *Drosophila melanogaster* using two different strains.

Physiologically based pharmacokinetic modeling of arsenic in the mouse.

alpha-Synuclein selectively increases manganese-induced viability loss in SK-N-MC neuroblastoma cells expressing the human dopamine transporter.

Amitrole.

Sulfallate.

Nitrofen (2,4-dichlorophenyl-p-nitrophenyl ether).

Multiple medical problems following agent orange exposure.

Assessing possible exposures of ground troops to Agent Orange during the Vietnam War: the use of contemporary military records.

Assessment of potential exposure to Agent Orange and its associated TCDD.

Poisoning due to chlorophenoxy herbicides.

The involvement of p53 in paraquat-induced apoptosis in human lung epithelial-like cells.

SCE analysis in G2 lymphocyte prematurely condensed chromosomes after exposure to atrazine: the non-dose-dependent increase in homologous recombinational events does not support its genotoxic mode of action.

[Status of the buccal mucosa in subjects occupationally exposed to chlorophenoxyherbicides].

The cytotoxic activity of lactoperoxidase: enhancement and inhibition by neuroactive compounds.

Lack of modifying effects of an estrogenic compound atrazine on 7,12-dimethylbenz(a)anthracene-induced ovarian carcinogenesis in rats.

High levels of catalase and glutathione peroxidase activity dampen H₂O₂ signaling in human alveolar macrophages.

Anti-estrogenic activity of fifty chemicals evaluated by in vitro assays.

Possible enhancing effects of atrazine and nonylphenol on 7,12-dimethylbenz[a]anthracene-induced mammary tumor development in human c-Ha-ras proto-oncogene transgenic rats.

Alpha-synuclein up-regulation and aggregation during MPP⁺-induced apoptosis in neuroblastoma cells: intermediacy of transferrin receptor iron and hydrogen peroxide.

Resistance of mitochondrial DNA-depleted cells against cell death: role of mitochondrial superoxide dismutase.

2'-benzyloxycinnamaldehyde induces apoptosis in human carcinoma via reactive oxygen species.

Cancer incidence among pesticide applicators exposed to alachlor in the Agricultural Health Study.

Acetaldehyde accumulation suppresses Kupffer cell release of TNF-Alpha and modifies acute hepatic inflammation in rats.

Arsenic speciation in urine from acute promyelocytic leukemia patients undergoing arsenic trioxide treatment.

Distinct roles of c-Abl and Atm in oxidative stress response are mediated by protein kinase C delta.

Monitoring of urinary acrolein concentration in patients receiving cyclophosphamide and ifosfamide.

Recruitment of thyroid hormone receptor/retinoblastoma-interacting protein 230 by the aryl hydrocarbon receptor nuclear translocator is required for the transcriptional response to both dioxin and hypoxia.

Immunostimulating properties of intragastrically administered Acetobacter-derived soluble branched (1,4)-beta-D-glucans decrease murine susceptibility to *Listeria monocytogenes*.

DRESSA: biosensing of dioxin and dioxin-like chemicals using secreted alkaline phosphatase.

Potent inhibition of recombinant human cytochrome p-450 1A1 by pentamethoxystilbene.

TCDD and PCBs inhibit breast cancer cell proliferation in vitro.

Effects of polybrominated diphenyl ethers on basal and TCDD-induced ethoxyresorufin activity and cytochrome P450-1A1 expression in MCF-7, HepG2, and H4IIE cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces suppressor of cytokine signaling 2 in murine B cells.

Lack of antagonism of 2,3,7,8-tetrachlorodibenzo-p-dioxin's (TCDDs) induction of cytochrome P4501A1 (CYP1A1) by the putative selective aryl hydrocarbon receptor modulator 6-alkyl-1,3,8-trichlorodibenzofuran (6-MCDF) in the mouse hepatoma cell line Hepa-1c1c7.

Cancer cluster investigations: use of a hybrid approach in a rural county.

2D LC/MS analysis of membrane proteins from breast cancer cell lines MCF7 and BT474.

Transforming growth factor-beta 1-induced apoptosis is blocked by beta 1-integrin-mediated mitogen-activated protein kinase activation in human hepatoma cells.

Mitochondria-derived oxidative stress induces a heat shock protein response.

Effects of TGF-beta, TNF-alpha, IL-beta and IL-6 alone or in combination, and tyrosine kinase inhibitor on cyclooxygenase expression, prostaglandin E2 production and bone resorption in mouse calvarial bone cells.

Oral and dermal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces cutaneous papillomas and squamous cell carcinomas in female hemizygous Tg.AC transgenic mice.

The induction of cell cycle regulatory and DNA repair proteins in cisplatin-induced acute renal failure.

A trivalent dimethylarsenic compound, dimethylarsine iodide, induces cellular transformation, aneuploidy, centrosome abnormality and multipolar spindle formation in Syrian hamster embryo cells.

Effect of ryanodine receptor mutations on interleukin-6 release and intracellular calcium homeostasis in human myotubes from malignant hyperthermia-susceptible individuals and patients affected by central core disease.

Heparanase uptake is mediated by cell membrane heparan sulfate proteoglycans.

Determination of dioxin and dioxin-like compounds in sediments from UK estuaries using a bio-analytical approach: chemical-activated luciferase expression (CALUX) assay.

Women and omega-3 Fatty acids.

The expression of P-glycoprotein in AML cells with FLT3 internal tandem duplications is associated with reduced apoptosis in response to FLT3 inhibitors.

Breast cancer incidence and its possible spatial association with pesticide application in two counties of England.

Modulation of aryl hydrocarbon receptor-regulated gene expression by arsenite, cadmium, and chromium.

Evaluation of mixture effects in a crude extract of compost using the CALUX bioassay and HPLC fractionation.

Microarray analysis of gene regulation in the Hepa1c1c7 cell line following exposure to the DNA methylation inhibitor 5-aza-2'-deoxycytidine and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Lack of effects of postnatal exposure to a mixture of aryl hydrocarbon-receptor agonists on the development of methylnitrosourea-induced mammary tumors in sprague-dawley rats.

Inhibition of the MEK-1/p42 MAP kinase reduces aryl hydrocarbon receptor-DNA interactions.

Protective activity of hesperidin and lipoic acid against sodium arsenite acute toxicity in mice.

Dioxin revisited: developments since the 1997 IARC classification of dioxin as a human carcinogen.

Agricultural pesticide use and adenocarcinomas of the stomach and oesophagus.

Role of estrogen receptor in regulation of polycyclic aromatic hydrocarbon metabolic activation in lung.

Differential effects of mercury, lead and copper on the constitutive and inducible expression of aryl hydrocarbon receptor (AHR)-regulated genes in cultured hepatoma Hepa 1c1c7 cells.

A novel efflux-recapture process underlies the mechanism of high-density lipoprotein cholesteryl ester-selective uptake mediated by the low-density lipoprotein receptor-related protein.

Chronic inorganic arsenic exposure induces hepatic global and individual gene hypomethylation: implications for arsenic hepatocarcinogenesis.

A HECT E3 ubiquitin-protein ligase with sequence similarity to E6AP does not target p53 for degradation in the softshell clam (*Mya arenaria*).

Local influence analysis when interfacing toxicokinetic and proportional hazard models.

Overexpression of collagenase 1 (MMP-1) is mediated by the ERK pathway in invasive melanoma cells: role of BRAF mutation and fibroblast growth factor signaling.

[Synthesis and antitumor activity of 20-O-linked camptothecin ester derivatives].

Suppression of CYP1A1 expression by naringenin in murine Hepa-1c1c7 cells.

Magnifying endoscopy with indigo carmine contrast for differential diagnosis of neoplastic and nonneoplastic colonic polyps.

The modulation of radiation-induced cell death by genistein in K562 cells: activation of thymidine kinase 1.

The accumulation and toxicity of methylated arsenicals in endothelial cells: important roles of thiol compounds.

Arsenic and urinary bladder cell proliferation.

Evidence that arsenite acts as a cocarcinogen in skin cancer.

Animal models for arsenic carcinogenesis: inorganic arsenic is a transplacental carcinogen in mice.

Understanding arsenic carcinogenicity by the use of animal models.

Lack of genotoxicity of formocresol, paramonochlorophenol, and calcium hydroxide on mammalian cells by comet assay.

Development of an oral cancer slope factor for Aroclor 1268.

The topical application of 2,3,7,8-tetrachlorodibenzo-p-dioxin lacks skin tumor-promoting potency but induces hepatic injury and tumor necrosis factor-alpha expression in ICR male mice.

Flow cytometric methods used as screening tests for basal toxicity of chemicals.

The Ah receptor inhibits estrogen-induced estrogen receptor beta in breast cancer cells.

A constitutively active dioxin/aryl hydrocarbon receptor promotes hepatocarcinogenesis in mice.

Aryl hydrocarbon receptor (AhR)-independent effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on softshell clam (*Mya arenaria*) reproductive tissue.

Aromatic hydrocarbon receptor status in the metabolism of xenobiotics under normal and pathophysiological conditions.

[Toxicological significance of metallothionein on environmental harmful factors: verification and suggestions from a metallothionein-I/II null mouse model study].

4-chloro-m-cresol cannot detect malignant hyperthermia equivocal cells in an alternative minimally invasive diagnostic test of malignant hyperthermia susceptibility.

Intravesical resiniferatoxin decreases spinal c-fos expression and increases bladder volume to reflex micturition in rats with chronic inflamed urinary bladders.

Functional characterization of malignant hyperthermia-associated RyR1 mutations in exon 44, using the human myotube model.

Waste wood recycling as animal bedding and development of bio-monitoring tool using the CALUX assay.

Antioxidant capacity of cultured mammalian cells estimated by ESR method.

2,3,7,8-Tetrachlorodibenzo-p-dioxin inhibits cell proliferation through arylhydrocarbon receptor-mediated G1 arrest in SK-N-SH human neuronal cells.

[Dioxin emissions and soft-tissue sarcoma: results of a population-based case-control study].

Endocrine disrupting pesticides: a leading cause of cancer among rural people in Pakistan.

Effects of cyclooxygenase-2 antisense vector on proliferation of human cholangiocarcinoma cells.

Branch retinal artery occlusion: a complication of iron-deficiency anemia in a young adult with a rectal carcinoid.

Use of GIS and exposure modeling as tools in a study of cancer incidence in a population exposed to airborne dioxin.

Exocrine pancreatic pathology in female Harlan Sprague-Dawley rats after chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and dioxin-like compounds.

Effects of zearalenone on mRNA expression and activity of cytochrome P450 1A1 and 1B1 in MCF-7 cells.

Independent actions on cyclin-dependent kinases and aryl hydrocarbon receptor mediate the antiproliferative effects of indirubins.

Consideration of cultural and lifestyle factors in defining susceptible populations for environmental disease.

Mechanisms underlying arsenic carcinogenesis: hypersensitivity of mice exposed to inorganic arsenic during gestation.

Cytotoxic effects of environmentally relevant chlorophenols on L929 cells and their mechanisms.

Risk of adverse reproductive outcomes associated with proximity to municipal solid waste incinerators with high dioxin emission levels in Japan.

NTP toxicology and carcinogenesis studies of triethanolamine (Cas No. 102-71-6) in B6C3F1 mice (dermal studies).

Characterization of bronchiolar metaplasia of the alveolar epithelium in female Sprague-Dawley rats exposed to 3,3',4,4',5-pentachlorobiphenyl (PCB126).

Using a customized DNA microarray for expression profiling of the estrogen-responsive genes to evaluate estrogen activity among natural estrogens and industrial chemicals.

Effect of sodium arsenite on peripheral lymphocytes in vitro: individual susceptibility among a population exposed to arsenic through the drinking water.

Differential regulation of calcium homeostasis in adenocarcinoma cell line A549 and its Taxol-resistant subclone.

Synergistic effect of cigarette smoke and saliva on lymphocytes--the mediatory role of volatile aldehydes and redox active iron and the possible implications for oral cancer.

Nitric oxide donor increases osteoprotegerin production and osteoclastogenesis inhibitory activity in bone marrow stromal cells from ovariectomized rats.

Sources and transformations of chlorophenols in the natural environment.

Interaction of the aryl hydrocarbon receptor ligand 6-methyl-1,3,8-trichlorodibenzofuran with estrogen receptor alpha.

Reduction of androgen receptor expression by benzo[alpha]pyrene and 7,8-dihydro-9,10-epoxy-7,8,9,10-tetrahydrobenzo[alpha]pyrene in human lung cells.

Role of mediator in transcriptional activation by the aryl hydrocarbon receptor.

Oxygen-regulated expression of the RNA-binding proteins RBM3 and CIRP by a HIF-1-independent mechanism.

Agricultural pesticide use, familial cancer, and risk of non-Hodgkin lymphoma.

Arsenic-induced enhancement of ultraviolet radiation carcinogenesis in mouse skin: a dose-response study.

How environmental hazards in childhood have been discovered: carcinogens, teratogens, neurotoxicants, and others.

Identification of aryl hydrocarbon receptor as a putative Wnt/beta-catenin pathway target gene in prostate cancer cells.

Role of lipid-mobilising factor (LMF) in protecting tumour cells from oxidative damage.

Association of liver hemangiosarcoma and secondary iron overload in B6C3F1 mice--the National Toxicology Program experience.

Cytochrome P-450 family 1 in rat embryo cell culture immortalized by Rausher leukemia virus.

Glioma cell antioxidant capacity relative to reactive oxygen species produced by dopamine.

Assessment of human health risk of dioxin in Korea.

Histological and lipid peroxidation changes after administration of 2-acetylaminofluorene in a rat liver injury model following selective periportal and pericentral damage.

Breast cancer and environmental risks: where is the link?

In vitro DNA damage by arsenic compounds in a human lymphoblastoid cell line (TK6) assessed by the alkaline Comet assay.

Soft-tissue sarcoma and dioxin: A case-control study.

Modulation of AhR-mediated CYP1A1 mRNA and EROD activities by 17beta-estradiol and dexamethasone in TCDD-induced H411E cells.

Arsenic-induced DNA hypomethylation affects chromosomal instability in mammalian cells.

Geldanamycin and herbimycin A induce apoptotic killing of B chronic lymphocytic leukemia cells and augment the cells' sensitivity to cytotoxic drugs.

Interaction between genetic polymorphism of cytochrome P450-1B1 and environmental pollutants in breast cancer risk.

[Is a presymptomatic malignant hyperthermia in-vitro diagnosis with 4-chloro-3-ethyl phenol possible? A study using porcine skeletal preparations].

Toxicogenomic analysis of aberrant gene expression in liver tumors and nontumorous livers of adult mice exposed in utero to inorganic arsenic.

Protein kinase C delta is activated in mouse ovarian surface epithelial cancer cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

A comparison of human H295R and rat R2C cell lines as in vitro screening tools for effects on aromatase.

Assessment system for dioxin absorption in the small intestine and prevention of its absorption by food factors.

Anthocyan does not suppress transformation of aryl hydrocarbon receptor induced by dioxin.

Activation of inflammatory mediators and potential role of ah-receptor ligands in foam cell formation.

Cost-benefit analysis as a tool for decision making in environmental projects. Application to a reduction of dioxin emissions in Tarragona Province, Spain.

Comparison of recombinant cell bioassays for the detection of Ah receptor agonists.

From phenoxyacetic acids to cellular telephones: is there historical evidence for the precautionary principle in cancer prevention?

Aryl hydrocarbon receptor-mediated inhibition of LNCaP prostate cancer cell growth and hormone-induced transactivation.

The H4IIE cell bioassay as an indicator of dioxin-like chemicals in wildlife and the environment.

The drug salicylamide is an antagonist of the aryl hydrocarbon receptor that inhibits signal transduction induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Metabolic activation of polycyclic aromatic hydrocarbons to carcinogens by cytochromes P450 1A1 and 1B1.

Follicular epithelial cell hypertrophy induced by chronic oral administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Harlan Sprague-Dawley rats.

Immunohistochemical detection of activated caspases in apoptotic hepatocytes in rat liver.

Induction of tumors of the liver, lung, ovary and adrenal in adult mice after brief maternal gestational exposure to inorganic arsenic: promotional effects of postnatal phorbol ester exposure on hepatic and pulmonary, but not dermal cancers.

EGR1 is a novel target for AhR agonists in human lung epithelial cells.

Subchronic exposure to TCDD, PeCDF, PCB126, and PCB153: effect on hepatic gene expression.

Down regulation of hepatic PPARalpha function by AhR ligand.

Strain-specific of alachlor on murine olfactory mucosal responses.

Effects of 1,3-butadiene, isoprene, and their photochemical degradation products on human lung cells.

Alpha-tocotrienol provides the most potent neuroprotection among vitamin E analogs on cultured striatal neurons.

BRCA1 induces antioxidant gene expression and resistance to oxidative stress.

In vitro cytotoxic and genotoxic effects of diphenylarsinic acid, a degradation product of chemical warfare agents.

Dioxin health risk to infants using simulated tissue concentrations.

The sphingomyelin/ceramide pathway is involved in ERK1/2 phosphorylation, cell proliferation, and uPAR overexpression induced by tissue-type plasminogen activator.

An evaluation of benchmark dose methodology for non-cancer continuous-data health effects in animals due to exposures to dioxin (TCDD).

Human health risks from arsenic in soils: does one model fit all?

Effect of endocrine disrupting chemicals on lipopolysaccharide-induced tumor necrosis factor-alpha and nitric oxide production by mouse macrophages.

Catalase binds Grb2 in tumor cells when stimulated with serum or ligands for integrin receptors.

Effects of superoxide dismutase and polyclonal tumor necrosis factor-alpha antibodies on chloroacetate-induced cellular death and superoxide anion production by J774.A1 macrophages.

Ectopic cyclin D1 expression blocks STI571-induced erythroid differentiation of K562 cells.

Transient increase in micronucleus frequency and DNA effects in the comet assay in two patients after intoxication with 2,3,7,8-tetrachlorodibenzo- p-dioxin.

Aryl hydrocarbon receptor-mediated induction of microsomal drug-metabolizing enzyme activity by indirubin and indigo.

Toxicity increases in ice containing monochlorophenols upon photolysis: environmental consequences.

Environmental distribution, analysis, and toxicity of organometal(loid) compounds.

A screening-level assessment of the health risks of chronic smoke exposure for wildland firefighters.

A notable antimutagenicity of two nonmutagenic novel oxadiazoles in Salmonella mutagenicity assay.

Sertoli cell junctional proteins as early targets for different classes of reproductive toxicants.

Use of genetically manipulated Salmonella typhimurium strains to evaluate the role of sulfotransferases and acetyltransferases in nitrofen mutagenicity.

Static magnetic fields-induced bone sialoprotein (BSP) expression is mediated through FGF2 response element and pituitary-specific transcription factor-1 motif.

Differential susceptibility of fish and rat liver cells to oxidative stress and cytotoxicity upon exposure to prooxidants.

Tumor promoters as inhibitors of apoptosis in rat hepatocytes.

Polycyclic aromatic hydrocarbons modulate cell proliferation in rat hepatic epithelial stem-like WB-F344 cells.

Characterization of a fasciclin I-like protein with cell attachment activity from sea urchin (*Strongylocentrotus intermedius*) ovaries.

Molecular switch circuits in toxicology: a dimmer switch for dioxin.

A novel effect of dioxin: exposure during pregnancy severely impairs mammary gland differentiation.

Effect of arsenic on benzo[a]pyrene DNA adduct levels in mouse skin and lung.

Compartmental inhibition of hepatic glutathione reductase activities by 1,3-bis(2-chloroethyl)-N-nitrosourea (BCNU) in Sprague-Dawley and Fischer-344 rats.

The effect of *Smallanthus sonchifolius* leaf extracts on rat hepatic metabolism.

Antimutagenicity of herbal detoxification formula Smoke Shield against environmental mutagens.

A comparative study on the effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin polychlorinated biphenyl126 and estrogen in human bronchial epithelial cells.

DNA adduct formation in precision-cut rat liver and lung slices exposed to benzo[a]pyrene.

Divergent roles of hepatitis B virus X-associated protein 2 (XAP2) in human versus mouse Ah receptor complexes.

Evaluation of toxic equivalency factors for induction of cytochromes P450 CYP1A1 and CYP1A2 enzyme activity by dioxin-like compounds.

Potent, selective and cell-mediated inhibition of human herpesvirus 6 at an early stage of viral replication by the non-nucleoside compound CMV423.

Complestatin prevents apoptotic cell death: inhibition of a mitochondrial caspase pathway through AKT/PKB activation.

Update on olfactory mucosal metabolic enzymes: age-related changes and N-acetyltransferase activities.

Xenoestrogen modulation of the immune system: effects of dichlorodiphenyltrichloroethane (DDT) and 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Inhalation of hazardous air pollutants from environmental tobacco smoke in US residences.

Different global gene expression profiles in benzo[a]pyrene- and dioxin-treated vascular smooth muscle cells of AHR-knockout and wild-type mice.

A practical guide to dose-response analyses and risk assessment in occupational epidemiology.

The olivacine derivative s 16020 (9-hydroxy-5,6-dimethyl-N-[2-(dimethylamino)ethyl]-6H-pyrido(4,3-B)-carbazole-1-carboxamide) induces CYP1A and its own metabolism in human hepatocytes in primary culture.

Enhancement of death-receptor induced caspase-8-activation in the death-inducing signalling complex by uncoupling of oxidative phosphorylation.

An assessment of the genotoxicity and human health risk of topical use of kojic acid [5-hydroxy-2-(hydroxymethyl)-4H-pyran-4-one].

Pyrazolo pyrimidine-type inhibitors of SRC family tyrosine kinases promote ovarian steroid-induced differentiation of human endometrial stromal cells in vitro.

Induction of murine NAD(P)H:quinone oxidoreductase by 2,3,7,8-tetrachlorodibenzo-p-dioxin requires the CNC (cap 'n' collar) basic leucine zipper transcription factor Nrf2 (nuclear factor erythroid 2-related factor 2): cross-interaction between AhR (aryl hydrocarbon receptor) and Nrf2 signal transduction.

Urokinase receptor mRNA stability involves tyrosine phosphorylation in lung epithelial cells.

Effects of environmental estrogenic compounds on growth of a transplanted estrogen responsive pituitary tumor cell line in rats.

A case of multiple skin cancers after occupational exposure to pesticides.

'Proximal-type' epithelioid sarcoma: is Agent Orange still at large?

Comparative effects of cadmium, copper, paraquat and benzo[a]pyrene on the actin cytoskeleton and production of reactive oxygen species (ROS) in mussel haemocytes.

Integrative assessment of multiple pesticides as risk factors for non-Hodgkin's lymphoma among men.

Chronic studies evaluating the carcinogenicity of monomethylarsonic acid in rats and mice.

Exposure to animals and selected risk factors among Canadian farm residents with Hodgkin's disease, multiple myeloma, or soft tissue sarcoma.

Biochemical and histopathological effects of glyphosate herbicide on Nile tilapia (*Oreochromis niloticus*).

The herbicide metolachlor induces liver cytochrome P450s 2B1/2 and 3A1/2, but not thyroxine-uridine dinucleotide phosphate glucuronosyltransferase and associated thyroid gland activity.

Agent Orange and cancer: an overview for clinicians.

Immunotoxicological effects of Agent Orange exposure to the Vietnam War Korean veterans.

An oxygen-bonded c8-deoxyguanosine nucleoside adduct of pentachlorophenol by peroxidase activation: evidence for ambident c8 reactivity by phenoxy radicals.

Immune alterations in mice exposed to the herbicide simazine.

Health effects on nearby residents of a wood treatment plant.

Prevention of dual promoting effects of pentachlorophenol, an environmental pollutant, on diethylnitrosamine-induced hepato- and cholangiocarcinogenesis in mice by green tea infusion.

Parental occupational exposure to pesticides and childhood brain cancer.

Agent Orange: management of patients exposed in Vietnam.

Effect of beta-cyclodextrin compounds on the solubilization of three selected pesticides and their toxicity with methyl parathion to *Rana tigrina* tadpoles.

Antitumor effect of the cinnamaldehyde derivative CB403 through the arrest of cell cycle progression in the G2/M phase.

MacLennan et al report on an elevated incidence of prostate cancer among workers in a triazine manufacturing plant.

Cancer and developmental exposure to endocrine disruptors.

Skin tumor-promoting potential and systemic effects of pentachlorophenol and its major metabolite tetrachlorohydroquinone in CD-1 Mice.

Mortality among triazine herbicide manufacturing workers.

Effect of the lipid peroxidation product acrolein on tau phosphorylation in neural cells.

The effects of acute pesticide exposure on neuroblastoma cells chronically exposed to diazinon.

A putative glutathione peroxidase of *Drosophila* encodes a thioredoxin peroxidase that provides resistance against oxidative stress but fails to complement a lack of catalase activity.

Cytotoxic effects of the herbicide 2,4-dichlorophenoxyacetic acid in HepG2 cells.

The 5-enolpyruvylshikimate-3-phosphate synthase of glyphosate-tolerant soybean expressed in *Escherichia coli* shows no severe allergenicity.

Carcinogenicity of dimethylarsinic acid in p53 heterozygous knockout and wild-type C57BL/6J mice.

Link found between Agent Orange and chronic lymphocytic leukaemia.

Lung function and airway inflammation in rats following exposure to combustion products of carbon-graphite/epoxy composite material: comparison to a rodent model of acute lung injury.

Oxidative stress as a possible mode of action for arsenic carcinogenesis.

Inhibition of cytokine production by the herbicide atrazine. Search for nuclear receptor targets.

[Glyphosate--a non-toxic pesticide?].

Pentachlorophenol poisoning.

Quantitation of aberrant interlocus T-cell receptor rearrangements in mouse thymocytes and the effect of the herbicide 2,4-dichlorophenoxyacetic acid.

Pentachlorophenol (but not phenobarbital) promotes intrahepatic biliary cysts induced by diethylnitrosamine to cholangio cystic neoplasms in B6C3F1 mice possibly due to oxidative stress.

Formation of acrolein-derived 2'-deoxyadenosine adduct in an iron-induced carcinogenesis model.

Lack of modifying effects of atrazine and/or tamoxifen on thyroid carcinogenesis in rats pretreated with N-bis(2-hydroxypropyl)nitrosamine (DHPN).

Acute and chronic effects of alcohol exposure on skeletal muscle c-myc, p53, and Bcl-2 mRNA expression.

An inhibitor of mitochondrial complex I, rotenone, inactivates proteasome by oxidative modification and induces aggregation of oxidized proteins in SH-SY5Y cells.

Effects of oxygen on the antioxidant responses of normal and transformed cells.

Alpha-tocopherol content and alpha-tocopherol transfer protein expression in leukocytes of children with acute leukemia.

Differential induction of Mn-containing superoxide dismutase by paraquat in peripheral lymphocytes of normal subjects and gastric cancer patients.

Resistance to tumor necrosis factor-alpha (TNF-alpha)-induced apoptosis in rat hepatoma cells expressing TNF-alpha is linked to low antioxidant enzyme expression.

Modulation of benzo[a]pyrene-induced p53 DNA activity by acrolein.

Oxidative stress and bioindicators of reproductive function in pulp and paper mill effluent exposed white sucker.

Immunomodulation of human natural killer cell cytotoxic function by triazine and carbamate pesticides.

Arsenic methylation and bladder cancer risk in Taiwan.

In vitro activity of dimethylarsinic acid against human leukemia and multiple myeloma cell lines.

Low levels of glutathione peroxidase 1 activity in selenium-deficient mouse liver affect c-Jun N-terminal kinase activation and p53 phosphorylation on Ser-15 in pro-oxidant-induced apoptosis.

CYP1a1, HSP70, P53, and c-fos expression in human liver carcinoma cells (HepG2) exposed to pentachlorophenol.

Antioxidant perturbations in the olfactory mucosa of alachlor-treated rats.

Accumulation and metabolism of arsenic in mice after repeated oral administration of arsenate.

Comparative toxicity of ifosfamide metabolites and protective effect of mesna and amifostine in cultured renal tubule cells.

Cinnamaldehyde induces apoptosis by ROS-mediated mitochondrial permeability transition in human promyelocytic leukemia HL-60 cells.

Variability in human metabolism of arsenic.

Induction of oxidative DNA damage by arsenite and its trivalent and pentavalent methylated metabolites in cultured human cells and isolated DNA.

Thioredoxin peroxidases can foster cytoprotection or cell death in response to different stressors: over- and under-expression of thioredoxin peroxidase in Drosophila cells.

Induction of glutathione S-transferase placental form positive foci in liver and epithelial hyperplasia in urinary bladder, but no tumor development in male Fischer 344 rats treated with monomethylarsonic acid for 104 weeks.

Transient induction of cytochromes P450 1A1 and 1B1 in MCF-7 human breast cancer cells by indirubin.

Dioxins released from incineration plants and mortality from major diseases: an analysis of statistical data by municipalities.

Cell-transforming activity of fourteen chemical agents used in dental practice in Syrian hamster embryo cells.

The efficacy of tyrosine kinase inhibitors on human pancreatic cancer cell lines.

Environmental exposure to polychlorinated biphenyls (PCBs) and breast cancer: a systematic review of the epidemiological evidence.

Non-Hodgkin's lymphoma, leukemia, and exposures in agriculture: results from the Italian multicenter case-control study.

Dioxin and cancer: a critical review.

Genetic predisposition to the cytotoxicity of arsenic: the role of DNA damage and ATM.

Insulin regulation in AhR-null mice: embryonic cardiac enlargement, neonatal macrosomia, and altered insulin regulation and response in pregnant and aging AhR-null females.

Estrogen regulates Ah responsiveness in MCF-7 breast cancer cells.

Effect of endodontic agents on cytotoxicity induction by sodium fluoride.

Is the decline of the increasing incidence of non-Hodgkin lymphoma in Sweden and other countries a result of cancer preventive measures?

Combined effects of tumor promoters and serum on proliferin mRNA induction: a biomarker sensitive to saccharin, 2,3,7,8-TCDD, and other compounds at minimal concentrations promoting C3H/10T1/2 cell transformation.

Induction of C-anaphase and diplochromosome through dysregulation of spindle assembly checkpoint by sodium arsenite in human fibroblasts.

Effect of pesticide exposure on HER-2/neu overexpression seen in patients with extensive stage small cell lung carcinoma.

Cellular uptake and metabolism of DNA frayed wires.

Calcium release from sarcoplasmic reticulum is facilitated in human myotubes derived from carriers of the ryanodine receptor type 1 mutations Ile2182Phe and Gly2375Ala.

Tribromophenol induces the differentiation of SH-SY5Y human neuroblastoma cells in vitro.

Mitochondrial oxidative stress causes chromosomal instability of mouse embryonic fibroblasts.

FLT3 expressing leukemias are selectively sensitive to inhibitors of the molecular chaperone heat shock protein 90 through destabilization of signal transduction-associated kinases.

Natural product origins of Hsp90 inhibitors.

[The chimerism and GVT effects on murine mini-transplantation model].

Link between agricultural pesticides and incidence of prostate cancer.

Significant issues raised by meta-analyses of cancer mortality and dioxin exposure.

Contribution of the Ah receptor to the phenolic antioxidant-mediated expression of human and rat UDP-glucuronosyltransferase UGT1A6 in Caco-2 and rat hepatoma 5L cells.

Inhibition of energy metabolism down-regulates the Alzheimer related presenilin 2 gene.

Risk of soft tissue sarcomas and residence in the neighbourhood of an incinerator of industrial wastes.

Cancer risk for chemical workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Angiotensin II phosphorylation of extracellular signal-regulated kinases in rat anterior pituitary cells.

Use of an "acetaldehyde clamp" in the determination of low-KM aldehyde dehydrogenase activity in H4-II-E-C3 rat hepatoma cells.

Uptake of 5-methyltetrahydrofolate into PC-3 human prostate cancer cells is carrier-mediated.

Effects of several dioxin-like compounds on estrogen metabolism in the malignant MCF-7 and nontumorigenic MCF-10A human mammary epithelial cell lines.

Re: analysis of dioxin cancer threshold.

Evaluation of the potential impact of pharmacokinetic differences on tissue dosimetry in offspring during pregnancy and lactation.

3'-methoxy-4'-nitroflavone, a reported aryl hydrocarbon receptor antagonist, enhances Cyp1a1 transcription by a dioxin responsive element-dependent mechanism.

The Ile2453Thr mutation in the ryanodine receptor gene 1 is associated with facilitated calcium release from sarcoplasmic reticulum by 4-chloro-m-cresol in human myotubes.

Inhibition of NF-kappaB essentially contributes to arsenic-induced apoptosis.

Dioxin: exposure-response analyses and risk assessment.

Short- and long-term morbidity and mortality in the population exposed to dioxin after the "Seveso accident".

Prenatal vitamin E improves lung and heart hypoplasia in experimental diaphragmatic [correction of diaphragmatic] hernia.

Multicentre evaluation of in vitro contracture testing with bolus administration of 4-chloro-m-cresol for diagnosis of malignant hyperthermia susceptibility.

Characteristics and application of established luciferase hepatoma cell line that responds to dioxin-like chemicals.

Dioxin emissions from a solid waste incinerator and risk of non-Hodgkin lymphoma.

No evidence of dioxin cancer threshold.

Increased expression of ICAM-1 and VCAM-1 in the lung of nitrofen-induced congenital diaphragmatic hernia in rats.

Reversal of Bcl-2-mediated resistance of the EW36 human B-cell lymphoma cell line to arsenite- and pesticide-induced apoptosis by PK11195, a ligand of the mitochondrial benzodiazepine receptor.

Enhancement of carcinogen-induced malignant cell transformation by prostaglandin F(2 alpha).

UVB light stimulates production of reactive oxygen species: unexpected role for catalase.

Carcinogenesis and its modification by environmental endocrine disruptors: in vivo experimental and epidemiological findings.

Applicability of the CALUX bioassay for screening of dioxin levels in human milk samples.

Markers of genetic susceptibility in human environmental hygiene and toxicology: the role of selected CYP, NAT and GST genes.

Antiallergic activity of ginseng and its ginsenosides.

Celecoxib inhibits proliferation and induces apoptosis via prostaglandin E2 pathway in human cholangiocarcinoma cell lines.

Association between arsenic exposure from a coal-burning power plant and urinary arsenic concentrations in Prievidza District, Slovakia.

Large-conductance K⁺ channel openers NS1619 and NS004 as inhibitors of mitochondrial function in glioma cells.

Aryl hydrocarbon receptor gene silencing with small inhibitory RNA differentially modulates Ah-responsiveness in MCF-7 and HepG2 cancer cells.

Neurotoxicity of polycyclic aromatic hydrocarbons and simple chemical mixtures.

Thermolysis of vic-dihydroxybacteriochlorins: effect of the nature of substrates in directing the formation of chlorin-chlorin dimers with fixed and flexible orientations and their preliminary in vitro photosensitizing efficacy.

New approach to vital analysis of functional activity in ABC transporters (markers for multidrug resistance) in solid tumors by the method of flow cytometry.

Heat shock protein (HSP72) and p38 MAPK involvement in sublethal hemorrhage (SLH)-induced tolerance.

Use of agricultural pesticides and prostate cancer risk in the Agricultural Health Study cohort.

Health impacts of pesticide exposure in a cohort of outdoor workers.

Meta-analysis of dioxin cancer dose response for three occupational cohorts.

Bile from a patient with anomalous pancreaticobiliary ductal union promotes the proliferation of human cholangiocarcinoma cells via COX-2 pathway.

Risk factors associated with lung cancer in Hong Kong.

Rat thyroid hyperplasia induced by gestational and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

ZnCl₂ induces Syrian hamster embryo (SHE) cell transformation.

Methylated metabolites of arsenic trioxide are more potent than arsenic trioxide as apoptotic but not differentiation inducers in leukemia and lymphoma cells.

Evidence for a role of protein tyrosine kinases in cell death induced by gp120 in CHP100 neuroblastoma cells.

A comparative immunohistochemical study of spontaneous and chemically induced pheochromocytomas in B6C3F1 mice.

Low concentrations of arsenic induce vascular endothelial growth factor and nitric oxide release and stimulate angiogenesis in vitro.

Invasion of interstitial matrix by a novel cell line from primary peritoneal carcinosarcoma, and by established ovarian carcinoma cell lines: role of cell-matrix adhesion molecules, proteinases, and E-cadherin expression.

The induction of heat shock protein-72 attenuates cisplatin-induced acute renal failure in rats.

Functional alterations in CD11b(+)Gr-1(+) cells in mice injected with allogeneic tumor cells and treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Tropical chronic pancreatitis: an update.

Early changes in metabolism of leukemic cell lines upon induction of apoptosis by cytotoxic drugs.

Induction of cytochrome P4501A and endocrine disrupting effects of school incinerator residues.

Involvement of oxidative stress in the toxicity of 4-monochlorophenol in Hep G2 cells in culture.

Prostate cancer risk in California farm workers.

Effects of single non-ortho, mono-ortho, and di-ortho chlorinated biphenyls on cell functions and proliferation of the human prostatic carcinoma cell line, LNCaP.

The aryl hydrocarbon receptor mediates degradation of estrogen receptor alpha through activation of proteasomes.

Troglitazone-induced intracellular oxidative stress in rat hepatoma cells: a flow cytometric assessment.

Increased expression of IgE-dependent histamine-releasing factor in endometriotic implants.

Up-regulation of cDK5/p35 by oxidative stress in human neuroblastoma IMR-32 cells.

Basis for a proposed reference dose (RfD) for dioxin of 1-10 pg/kg-day: a weight of evidence evaluation of the human and animal studies.

TCDD-dependent downregulation of gamma-catenin in rat liver epithelial cells (WB-F344).

Cross-linking of surface IgM in the Burkitt's lymphoma cell line ST486 provides protection against arsenite- and stress-induced apoptosis that is mediated by ERK and phosphoinositide 3-kinase signaling pathways.

Different effects of metabolic inhibitors and cyclosporin A on daunorubicin transport in leukemia cells from patients with AML.

The Cu,Zn superoxide dismutase in neuroblastoma SK-N-BE cells is exported by a microvesicles dependent pathway.

[Inhibition of ABC-transporter(s)' function in non-small cell lung cancer cells by platinum drugs].

Infertility and environmental pollutants.

Increase in cardiovascular pathology in female Sprague-Dawley rats following chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin and 3,3',4,4',5-pentachlorobiphenyl.

PPARalpha agonist-induced rodent tumors: modes of action and human relevance.

A framework for human relevance analysis of information on carcinogenic modes of action.

Methylated trivalent arsenicals as candidate ultimate genotoxic forms of arsenic: induction of chromosomal mutations but not gene mutations.

Modulation of the arsenic effects on cytotoxicity, viability, and cell cycle in porcine endothelial cells by selenium.

High cell density-mediated pericellular hypoxia is a crucial factor inducing expression of the intrinsic hypoxia marker CA IX in vitro in HeLa cells.

Estrogens and organochlorine xenoestrogens and breast cancer risk.

[Pesticide poisoning].

[Occupational epidemiology: from analysis of the apparent to investigation of the unknown].

Src tyrosine kinase but not activated Ras augments sensitivity to taxanes through apoptosis in human adenocarcinoma cells.

Effect of lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin on the susceptibility to Listeria infection.

Factors secreted by peritoneal macrophages are cytotoxic for transformed rat pleural mesothelium and mesothelioma cells.

Antiperoxidative, anti-inflammatory, and antimutagenic activities of ethanol extract of the mycelium of *Ganoderma lucidum* occurring in South India.

Rat breast microsomal biotransformation of ethanol to acetaldehyde but not to free radicals: its potential role in the association between alcohol drinking and breast tumor promotion.

Transplacental carcinogenicity of inorganic arsenic in the drinking water: induction of hepatic, ovarian, pulmonary, and adrenal tumors in mice.

Pharmacological induction of HSP27 attenuates intimal hyperplasia in vivo.

Proliferative activity of bile from congenital choledochal cyst patients.

Blockage of multidrug resistance-associated proteins potentiates the inhibitory effects of arsenic trioxide on CYP1A1 induction by polycyclic aromatic hydrocarbons.

Assessment of PCB congener analytical methods: do they meet risk assessment needs?

Expression of aryl hydrocarbon receptor repressor in normal human tissues and inducibility by polycyclic aromatic hydrocarbons in human tumor-derived cell lines.

Direct evidence for recycling of myeloperoxidase-catalyzed phenoxy radicals of a vitamin E homologue, 2,2,5,7,8-pentamethyl-6-hydroxy chromane, by ascorbate/dihydrolipoate in living HL-60 cells.

c-Src-dependent tyrosine phosphorylation of IKKbeta is involved in tumor necrosis factor-alpha-induced intercellular adhesion molecule-1 expression.

Evaluation of the mutagenic, antimutagenic and antiproliferative potential of *Croton lechleri* (Muell. Arg.) latex.

Subcellular localization of herpes simplex virus type 1 UL51 protein and role of palmitoylation in Golgi apparatus targeting.

Human exposure to dioxins through the diet in Catalonia, Spain: carcinogenic and non-carcinogenic risk.

Evidence for a role of p38 kinase in hypoxia-inducible factor 1-independent induction of vascular endothelial growth factor expression by sodium arsenite.

Functional role of AhR in the expression of toxic effects by TCDD.

High-performance liquid chromatographic analysis of the anticancer drug irinotecan (CPT-11) and its active metabolite SN-38 in human plasma.

Hepatic stem cells: existence and origin.

α -Tocopherol Content and α -Tocopherol Transfer Protein Expression in Leukocytes of Children with Acute Leukemia.

3-methylcholanthrene activates human immunodeficiency virus type 1 replication via aryl hydrocarbon receptor.

Toxicokinetics and physiologically based toxicokinetics in toxicology and risk assessment.

Effect of endosulfan and malathion on lipid peroxidation, nitrite and TNF- α release by rat peritoneal macrophages.

Health benefits and potential risks related to consumption of fish or fish oil.

Enhanced prediction of potential rodent carcinogenicity by utilizing comet assay and apoptotic assay in combination.

[Genotoxic effects of pesticide-treated vegetable extracts using the *Allium cepa* chromosome aberration and micronucleus tests].

Cell-specific expression of CYP2A5 in the mouse respiratory tract: effects of olfactory toxicants.

TA-270 [4-hydroxy-1-methyl-3-octyloxy-7-sinapinoylamino-2(1H)-quinolinone], an anti-asthmatic agent, inhibits leukotriene production induced by IgE receptor stimulation in RBL-2H3 cells.

TCDD-induced apoptosis in EL-4 cells deficient of the aryl hydrocarbon receptor and down-regulation of IGFBP-6 prevented the apoptotic cell death.

Characterization of a wound-inducible cytochrome P450 gene (CYP72A29) that is down-regulated during crown gall tumorigenesis in potato tuber.

Alteration of keratinocyte differentiation and senescence by the tumor promoter dioxin.

NTP toxicology and carcinogenesis Studies of 2,4-hexadienal (89% trans,trans isomer, CAS No. 142-83-6; 11% cis,trans isomer) (Gavage Studies).

[Development of the protein therapeutics using the super anti-cell death factor FNK].

Combined toxicity effects of MTBE and pesticides measured with *Vibrio fischeri* and *Daphnia magna* bioassays.

Selective enhancement of ifosfamide-induced toxicity in Chinese hamster ovary cells.

Mislocalization of membrane proteins associated with multidrug resistance in cisplatin-resistant cancer cell lines.

Preliminary biological assay on cerebroside mixture from *Euphorbia nicaeensis* All. Isolation and structure determination of five glucocerebrosides.

Glycolaldehyde induces apoptosis in a human breast cancer cell line.

Acute application of TNF stimulates apical 70-pS K⁺ channels in the thick ascending limb of rat kidney.

4-aminobiphenyl-induced liver and urinary bladder DNA adduct formation in Cyp1a2(-/-) and Cyp1a2(+/-) mice.

Toxicity and metabolism of subcytotoxic inorganic arsenic in human renal proximal tubule epithelial cells (HK-2).

Upregulation of cellular NF- κ B activity by alkylating carcinogens in human epidermal keratinocytes.

[Methodology in occupational and environmental epidemiology].

In vitro pharmacokinetic study of the novel anticancer agent E7070: red blood cell and plasma protein binding in human blood.

Activation and inhibition of cellular calcium and tyrosine kinase signaling pathways identify targets of the HBx protein involved in hepatitis B virus replication.

Corneal IL-8 expression following adenovirus infection is mediated by c-Src activation in human corneal fibroblasts.

Toxicological aspects of treatment to remove cyanobacterial toxins from drinking water determined using the heterozygous P53 transgenic mouse model.

Risk analysis under uncertainty, the precautionary principle, and the new EU chemicals strategy.

Leiomyosarcoma of urinary bladder following cyclophosphamide therapy: report of two cases.

Identification of galectin I and thioredoxin peroxidase II as two arsenic-binding proteins in Chinese hamster ovary cells.

Differential modulation of cytochrome P-450 1A and P-glycoprotein expression by aryl hydrocarbon receptor agonists and thyroid hormone in *Xenopus laevis* liver and intestine.

Workplace carcinogen and pesticide exposures in Costa Rica.

Effects of the environmental oestrogens bisphenol A, tetrachlorobisphenol A, tetrabromobisphenol A, 4-hydroxybiphenyl and 4,4'-dihydroxybiphenyl on oestrogen receptor binding, cell proliferation and regulation of oestrogen sensitive proteins in the human breast cancer cell line MCF-7.

Dioxin risks in perspective: past, present, and future.

An occupational reproductive research agenda for the third millennium.

Cyclical mechanical stretch enhances angiotensin-2 and Tie2 receptor expression in cultured human umbilical vein endothelial cells.

Anthracyclines induce accumulation of iron in ferritin in myocardial and neoplastic cells: inhibition of the ferritin iron mobilization pathway.

Role of the different mitogen-activated protein kinase subfamilies in the stimulation of dog and human thyroid epithelial cell proliferation by cyclic adenosine 5'-monophosphate and growth factors.

Progression of alachlor-induced olfactory mucosal tumours.

DNA damage induced by methylated trivalent arsenicals is mediated by reactive oxygen species.

Micronucleus frequency and proliferation in human lymphocytes after exposure to herbicide 2,4-dichlorophenoxyacetic acid in vitro and in vivo.

Tumorigenicity of chloral hydrate, trichloroacetic acid, trichloroethanol, malondialdehyde, 4-hydroxy-2-nonenal, crotonaldehyde, and acrolein in the B6C3F(1) neonatal mouse.

Functional activation of peroxisome proliferator-activated receptor alpha (PPARalpha) by environmental chemicals in relation to their toxicities.

Cancer incidence among triazine herbicide manufacturing workers.

Fractionation of protein adducts in rats and mice dosed with [14C]pentachlorophenol.

[Genotoxic effect of PCP and lindane on human epithelial tonsil cells].

The immunomodulatory effects of the herbicide simazine on murine macrophage functions in vitro.

Possible role of dimethylarsinous acid in dimethylarsinic acid-induced urothelial toxicity and regeneration in the rat.

A survey of EPA/OPP and open literature on selected pesticide chemicals. III. Mutagenicity and carcinogenicity of benomyl and carbendazim.

Effect of 2'-benzoyl-oxycinnamaldehyde on RPE cells in vitro and in an experimental proliferative vitreoretinopathy model.

Detection of cellular responses to toxicants by dielectrophoresis.

Plasmid DNA damage caused by methylated arsenicals, ascorbic acid and human liver ferritin.

A review of animal models for the study of arsenic carcinogenesis.

Review of 2,4-dichlorophenoxyacetic acid (2,4-D) epidemiology and toxicology.

Specific up-regulation of GADD153/CHOP in 1-methyl-4-phenyl-pyridinium-treated SH-SY5Y cells.

The effects of atrazine on the sexual maturation of female rats.

Pathways involved in mild gastrointestinal inflammation induced by a low level exposure to a food contaminant.

Exposure to pesticides as risk factor for non-Hodgkin's lymphoma and hairy cell leukemia: pooled analysis of two Swedish case-control studies.

A major human arsenic metabolite, dimethylarsinic acid, requires reduced glutathione to induce apoptosis.

Agent Orange no longer linked to childhood AML.

[Epidemiological studies on the etiology of biliary tract cancers].

Clastogenicity of pentachlorophenol, 2,4-D and butachlor evaluated by Allium root tip test.

Incidence of CTCL in Vietnam veterans.

Effect of alachlor on hepatic cytochrome P450 enzymes in rats.

Effect of diquat on the antioxidant system and cell growth in human neuroblastoma cells.

In vivo genotoxicity evaluation of dimethylarsinic acid in MutaMouse.

Sunscreens can increase dermal penetration of 2,4-dichlorophenoxyacetic acid.

Radioprotectants: current status and new directions.

[Participation of dexamethasone and E and C vitamins in the modulation of the hepatotoxic effect induced by fomesafen and 2,4-D amino herbicides, in rats].

Involvement of N-methyl-D-aspartate receptors in nociception in the cyclophosphamide-induced vesical pain model in the conscious rat.

A novel nucleolar biomarker in plant and animal cells for assessment of substance cytotoxicity.

[Effect of diclofop on the activity of some drug-metabolizing enzymes in the liver of male Wistar rats].

Changes in urinary bladder cytokine mRNA and protein after cyclophosphamide-induced cystitis.

Effects of nonylphenol, 1,1-dichloro-2,2-bis(p-chlorophenyl)ethylene (p,p'-DDE), and pentachlorophenol on the adult female guinea pig reproductive tract.

Regional assessment of atrazine exposure and incidence of breast and ovarian cancers in Kentucky.

Ascorbic acid induces redifferentiation and growth inhibition in human hepatoma cells by increasing endogenous hydrogen peroxide.

Rising leukemia rates in Thailand: the possible role of benzene and related compounds in cigarette smoke.

Evaluation of a 15-day screening assay using intact male rats for identifying antiandrogens.

Differential susceptibilities of serine/threonine phosphatases to oxidative and nitrosative stress.

Carcinogenicity of dimethylarsinic acid in male F344 rats and genetic alterations in induced urinary bladder tumors.

Promoting effects of monomethylarsonic acid, dimethylarsinic acid and trimethylarsine oxide on induction of rat liver preneoplastic glutathione S-transferase placental form positive foci: a possible reactive oxygen species mechanism.

Chemical ionization mass spectrometric determination of acrolein in human breast cancer cells.

Oxygen metabolites and hypoxic renal injury: effect of mitochondrial electron transport blockade.

Serum SP-D is a marker of lung injury in rats.

Modified guanines representing O(6)-alkylation by the cyclophosphamide metabolites acrolein and chloroacetaldehyde: synthesis, stability, and ab initio studies.

Analysis of DNA adducts in rats exposed to pentachlorophenol.

Inhibition of cell proliferation and AP-1 activity by acrolein in human A549 lung adenocarcinoma cells due to thiol imbalance and covalent modifications.

Neuroprotection by adenosine A2A receptor blockade in experimental models of Parkinson's disease.

A method for assaying the sensitivity of *Drosophila* replication checkpoint mutants to anti-cancer and DNA-damaging drugs.

Systemic uptake and cutaneous disposition of pentachlorophenol in a sequential exposure scenario: effects of skin preexposure to benzo[a]pyrene.

Thiolation of protein-bound carcinogenic aldehyde. An electrophilic acrolein-lysine adduct that covalently binds to thiols.

Organic meat products contaminated with carcinogenic herbicide.

Acrolein causes transcriptional induction of phase II genes by activation of Nrf2 in human lung type II epithelial (A549) cells.

Effects of DNA structure on oxopropenylation by the endogenous mutagens malondialdehyde and base propenal.

Systemic uptake of inhaled arsenic in rabbits.

Altered protein profile and possible hypoxia in the placenta of 2,3,7,8-tetrachlorodibenzo-p-dioxin-exposed rats.

Localization of tumor by chemiluminescence probe during photosensitization action.

Non-genotoxic carcinogens: early effects on gap junctions, cell proliferation and apoptosis in the rat.

Balancing risks in the management of contaminated first nations fisheries.

Toxicology and carcinogenesis study of chloral hydrate (ad libitum and dietary controlled) (CAS no. 302-17-0) in male B6C3F1 mice (gavage study).

Caspase-3 colorimetric assay.

Interactive effect of chemical substances and occupational electromagnetic field exposure on the risk of gliomas and meningiomas in Swedish men.

Using the dioxin receptor-CALUX in vitro bioassay to screen marine harbor sediments for compounds with a dioxin-like mode of action.

Expression of hsp 27, hsp 60, hsc 70, and hsp 70 stress response genes in cultured human urothelial cells (UROtsa) exposed to lethal and sublethal concentrations of sodium arsenite.

Community exposures to airborne agricultural pesticides in California: ranking of inhalation risks.

Immunologic effects of dioxin: new results from Seveso and comparison with other studies.

P-cresol, a uremic toxin, decreases endothelial cell response to inflammatory cytokines.

Formation of reactive oxygen species in rat hepatoma-derived Fa32 cells to predict human toxicity.

Associations of dichlorodiphenyltrichloroethane (DDT) 4.4 and dichlorodiphenyldichloroethylene (DDE) 4.4 blood levels with plasma IL-4.

Undersulfation of proteoglycans and proteins alter C6 glioma cells proliferation, adhesion and extracellular matrix organization.

Effects of sodium arsenite exposure on development and behavior in the rat.

Src/ERK but not phospholipase D is involved in keratinocyte growth factor-stimulated secretion of matrix metalloprotease-9 and urokinase-type plasminogen activator in SNU-16 human stomach cancer cell.

Detection of proton release from cultured human myotubes to identify malignant hyperthermia susceptibility.

Patients with malignant hyperthermia demonstrate an altered calcium control mechanism in B lymphocytes.

Cell-type specificity of ectonucleotidase expression and upregulation by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Cytoskeletal structure of myoblasts with the mitochondrial DNA 3243A-->G mutation and of osteosarcoma cells with respiratory chain deficiency.

Effects of o,p'-DDT on the 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible CYP1A1 expression in murine Hepa-1c1c7 cells.

Application of the luciferase cell culture bioassay for the detection of refined petroleum products.

[Phenomenon of pseudomutagenesis: experiments with modifiers of cell metabolism in human lymphocytes].

Sodium arsenite-induced stress-related gene expression in normal human epidermal, HaCaT, and HEL30 keratinocytes.

Arsenite cocarcinogenesis: an animal model derived from genetic toxicology studies.

Alcohol-induced increases in insulin-like growth factor binding protein-1 are partially mediated by TNF.

Differential toxicogenomic responses to 2,3,7,8-tetrachlorodibenzo-p-dioxin in malignant and nonmalignant human airway epithelial cells.

The redox protein thioredoxin-1 regulates the constitutive and inducible expression of the estrogen metabolizing cytochromes P450 1B1 and 1A1 in MCF-7 human breast cancer cells.

Application of the luciferase recombinant cell culture bioassay system for the analysis of polycyclic aromatic hydrocarbons.

Curcumin activates the aryl hydrocarbon receptor yet significantly inhibits (-)-benzo(a)pyrene-7R-trans-7,8-dihydrodiol bioactivation in oral squamous cell carcinoma cells and oral mucosa.

Increased arylhydrocarbon receptor expression offers a potential therapeutic target for pancreatic cancer.

Radiosensitization by overexpression of the nonphosphorylation form of I κ B- α in human glioma cells.

Screening of dioxin-like toxicity equivalents for various matrices with wildtype and recombinant rat hepatoma H4IIE cells.

Critical windows of exposure to household pesticides and risk of childhood leukemia.

Dioxin stimulates RANTES expression in an in-vitro model of endometriosis.

Beta 1-integrin protects hepatoma cells from chemotherapy induced apoptosis via a mitogen-activated protein kinase dependent pathway.

Ethanol induces fatty acid synthesis pathways by activation of sterol regulatory element-binding protein (SREBP).

The role of Akt and RAFK in beta1 integrin mediated survival of precursor B-acute lymphoblastic leukemia cells.

FLT3 in human hematologic malignancies.

Increased sensitivity to 4-chloro-m-cresol and caffeine in primary myotubes from malignant hyperthermia susceptible individuals carrying the ryanodine receptor 1 Thr2206Met (C6617T) mutation.

Promotion of altered hepatic foci by 2,3,7,8-tetrachlorodibenzo-p-dioxin and 17beta-estradiol in male Sprague-Dawley rats.

Selective apoptosis of tandemly duplicated FLT3-transformed leukemia cells by Hsp90 inhibitors.

Radiation- and chemical-induced structural chromosome aberrations in human spermatozoa.

A constitutively active dioxin/aryl hydrocarbon receptor induces stomach tumors.

Experimental study on photodynamic diagnosis of cancer mediated by chemiluminescence probe.

The silencing mediator of retinoic acid and thyroid hormone receptors can interact with the aryl hydrocarbon (Ah) receptor but fails to repress Ah receptor-dependent gene expression.

Estradiol enhances and estriol inhibits the expression of CYP1A1 induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in a mouse ovarian cancer cell line.

In vivo effects of Panax ginseng extracts on the cytochrome P450-dependent monooxygenase system in the liver of 2,3,7,8-tetrachlorodibenzo-p-dioxin-exposed guinea pig.

Stress protection by a fluorescent Hsp27 chimera that is independent of nuclear translocation or multimeric dissociation.

Endocrine dismodulation and cancer.

Serum dioxin concentrations and breast cancer risk in the Seveso Women's Health Study.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces plasminogen activator inhibitor-1 through an aryl hydrocarbon receptor-mediated pathway in mouse hepatoma cell lines.

Endothelial PAS domain protein 1 (EPAS1) induces adrenomedullin gene expression in cardiac myocytes: role of EPAS1 in an inflammatory response in cardiac myocytes.

Inhibition of carcinogen-activating enzymes by 16alpha-fluoro-5-androsten-17-one.

Role of ATP in the sensitivity to heat and the induction of apoptosis in mammalian cells.

Differential activation of the c-Jun N-terminal kinase pathway in arsenite-induced apoptosis and sensitization of chemically resistant compared to susceptible B-lymphoma cell lines.

Mechanisms of 2-butoxyethanol carcinogenicity: studies on Syrian Hamster Embryo (SHE) cell transformation.

Conditional expression of a constitutively active aryl hydrocarbon receptor in MCF-7 human breast cancer cells.

WISP-2 is a secreted protein and can be a marker of estrogen exposure in MCF-7 cells.

Flavopiridol inhibits vascular endothelial growth factor production induced by hypoxia or picolinic acid in human neuroblastoma.

Transformation by inorganic arsenic compounds of normal Syrian hamster embryo cells into a neoplastic state in which they become anchorage-independent and cause tumors in newborn hamsters.

Cancer chemopreventive and antioxidant activities of pterostilbene, a naturally occurring analogue of resveratrol.

Recruitment of dioxin receptor to active transcription sites.

Aryl hydrocarbon receptor-dependent inhibition of AP-1 activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin in activated B cells.

Analysis of the antiestrogenic activity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in human ovarian carcinoma BG-1 cells.

A single mutation in the E2 glycoprotein important for neurovirulence influences binding of sindbis virus to neuroblastoma cells.

Mechanism of action and development of selective aryl hydrocarbon receptor modulators for treatment of hormone-dependent cancers (Review).

Modes of activation of mitogen-activated protein kinases and their roles in cepharanthine-induced apoptosis in human leukemia cells.

Use of Haber's Rule to estimate the risk of diabetes from background exposures to dioxin-like compounds.

Decrease in 4-aminobiphenyl-induced methemoglobinemia in Cyp1a2(-/-) knockout mice.

E-selectin modulates the malignant properties of T84 colon carcinoma cells.

Involvement of multidrug resistance-associated protein 2 in in vivo cisplatin resistance of rat hepatoma AH66 cells.

Alpha-tocopherol protects cultured human cells from the acute lethal cytotoxicity of dioxin.

Renal cell carcinoma and occupational exposure to chemicals in Canada.

Relationship between acetaldehyde levels and cell survival in ethanol-metabolizing hepatoma cells.

Persistent abnormalities in the rat mammary gland following gestational and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Tumor necrosis factor-alpha and interleukin-1beta mediate the production of nitric oxide involved in the pathogenesis of ifosfamide induced hemorrhagic cystitis in mice.

Case-control study evaluating the homogeneity and heterogeneity of risk factors between sinonasal and nasopharyngeal cancers.

Restoration of p53 tumor suppressor pathway in human cervical carcinoma cells by sodium arsenite.

Physiologic levels of epidermal growth factor in saliva stimulate cell migration of an oral epithelial cell line, HO-1-N-1.

Hsp-90-associated oncoproteins: multiple targets of geldanamycin and its analogs.

Prediction of rodent nongenotoxic carcinogenesis: evaluation of biochemical and tissue changes in rodents following exposure to nine nongenotoxic NTP carcinogens.

Plasma concentrations of polychlorinated biphenyls and the risk of breast cancer: a congener-specific analysis.

The environmental toxin 2,3,7,8-tetrachlorodibenzo-p-dioxin induces cytochrome P450 activity in high passage PC 3 and DU 145 human prostate cancer cell lines.

Up-regulated expression of genes encoding Hrk and IL-3R beta subunit by TCDD in vivo and in vitro.

Improvement of chemically-activated luciferase gene expression bioassay for detection of dioxin-like chemicals.

The potential role of exposure to environmental toxicants in the pathophysiology of endometriosis.

On the rumors about the silent spring. Review of the scientific evidence linking occupational and environmental pesticide exposure to endocrine disruption health effects.

Effects of reactive oxygen species on lymphokine-activated killer cells in patients with bladder cancer.

Metabolic control analysis in drug discovery and disease.

Induction of CYP1A1 and CYP1B1 in T-47D human breast cancer cells by benzo[a]pyrene is diminished by arsenite.

Arsenic-induced Mre11 phosphorylation is cell cycle-dependent and defective in NBS cells.

Involvement of protein tyrosine phosphorylation and reduction of cellular sulfhydryl groups in cell death induced by 1'-acetoxychavicol acetate in Ehrlich ascites tumor cells.

Decrease in K-ras p21 and increase in Raf1 and activated Erk 1 and 2 in murine lung tumors initiated by N-nitrosodimethylamine and promoted by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effects of currently used pesticides in assays for estrogenicity, androgenicity, and aromatase activity in vitro.

Obligatory requirement of sulfation for P-selectin binding to human salivary gland carcinoma Acc-M cells and breast carcinoma ZR-75-30 cells.

Association between chronic exposure to pesticides and recorded cases of human malignancy in Gaza Governorates (1990-1999).

In vitro effects of 4-chloro-3-ethylphenol in skeletal muscle preparations from malignant hyperthermia susceptible and normal swine.

NTP Technical Report on the Toxicology and Carcinogenesis Studies of Chloral Hydrate (Cas No. 302-17-0) in B6C3F1 mice (Gavage Studies).

Src tyrosine kinase augments taxotere-induced apoptosis through enhanced expression and phosphorylation of Bcl-2.

Heat stress-induced loss of eukaryotic initiation factor 5A (eIF-5A) in a human pancreatic cancer cell line, MIA PaCa-2, analyzed by two-dimensional gel electrophoresis.

A correlative study on antimutagenic and chemopreventive activity of *Acacia auriculiformis* A. Cunn. and *Acacia nilotica* (L.) Willd. Ex Del.

Tumor necrosis factor alpha stimulates invasion of Src-activated intestinal cells.

Dynamic imaging of endoplasmic reticulum Ca²⁺ concentration in insulin-secreting MIN6 Cells using recombinant targeted cameleons: roles of sarco(endo)plasmic reticulum Ca²⁺-ATPase (SERCA)-2 and ryanodine receptors.

Development of a green fluorescent protein-based cell bioassay for the rapid and inexpensive detection and characterization of Ah receptor agonists.

Identification of a novel dioxin-inducible cytochrome P450.

Lack of promoting effect due to oral administration of dimethylarsinic acid on rat lung carcinogenesis initiated with N-bis(2-hydroxypropyl)nitrosamine.

Identification of novel Ah receptor agonists using a high-throughput green fluorescent protein-based recombinant cell bioassay.

Mechanism of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced decrease in anti-CD3-activated CD4(+) T cells: the roles of apoptosis, Fas, and TNF.

How can chemical compounds alter human fertility?

Effects of 2-butoxyethanol on hepatic oxidative damage.

A dynamic role for the Ah receptor in cell signaling? Insights from a diverse group of Ah receptor interacting proteins.

The combined use of the CALUX bioassay and the HRGC/HRMS method for the detection of novel dioxin sources and new dioxin-like compounds.

Dietary folate deficiency enhances induction of micronuclei by arsenic in mice.

Differentiation-dependent induction of CYP1A1 in cultured rat small intestinal epithelial cells, colonocytes, and human colon carcinoma cells: basement membrane-mediated apoptosis.

Timing of exposure and mammary cancer risk.

Activation of bone sialoprotein gene transcription by flavonoids is mediated through an inverted CCAAT box in ROS 17/2.8 cells.

Monoclonal antibodies recognizing epitopes of calretinins: dependence on Ca²⁺-binding status and differences in antigen accessibility in colon cancer cells.

Relative potencies of individual polycyclic aromatic hydrocarbons to induce dioxinlike and estrogenic responses in three cell lines.

Overexpression of bcl-2 protects hepatoma cell line HCC-9204 from ethanol-induced apoptosis.

The use of quantitative histological and molecular data for risk assessment and biologically based model development.

Model of inhibition of the NPM-ALK kinase activity by herbimycin A.

The J-shaped dioxin dose response curve.

Activation of the aromatic hydrocarbon receptor pathway is not sufficient for transcriptional repression of BRCA-1: requirements for metabolism of benzo[a]pyrene to 7r,8t-dihydroxy-9t,10-epoxy-7,8,9,10-tetrahydrobenzo[a]pyrene.

Ferrous ion autoxidation and its chelation in iron-loaded human liver HepG2 cells.

Extracellular signal-regulated kinases and g protein-coupled receptors in megakaryocytic human erythroleukemia cells: selective activation, differential regulation, and dissociation from mitogenesis.

Genomic analysis of alachlor-induced oncogenesis in rat olfactory mucosa.

Autocrine activation of the hepatocyte growth factor receptor/met tyrosine kinase induces tumor cell motility by regulating pseudopodial protrusion.

2,3,7,8-tetrachlorobenzo-p-dioxin inhibits proliferation of SK-N-SH human neuronal cells through decreased production of reactive oxygen species.

Constitutive and TCDD-induced expression of Ah receptor-responsive genes in the pituitary.

Induction of heat shock proteins (HSPs) by sodium arsenite in cultured astrocytes and reduction of hydrogen peroxide-induced cell death.

Upregulation of glutathione-related genes and enzyme activities in cultured human cells by sublethal concentrations of inorganic arsenic.

Subchronic toxicity of Baltic herring oil and its fractions in the rat I: Fractionation and levels of organohalogen pollutants.

Indolo[3,2-b]carbazole inhibits gap junctional intercellular communication in rat primary hepatocytes and acts as a potential tumor promoter.

Urinary 2,5-dichlorophenol as biological index for p-dichlorobenzene exposure in the general population.

Acute arsenite-induced 8-hydroxyguanine is associated with inhibition of repair activity in cultured human cells.

Hemorrhagic cystitis as an unexpected adverse reaction to temozolomide: case report.

Atypical mechanism of NF-kappaB activation during reoxygenation stress in microvascular endothelium: a role for tyrosine kinases.

Involvement of reactive oxygen species in arsenite-induced downregulation of phospholipid hydroperoxide glutathione peroxidase in human epidermoid carcinoma A431 cells.

Chronic arsenic-exposed human prostate epithelial cells exhibit stable arsenic tolerance: mechanistic implications of altered cellular glutathione and glutathione S-transferase.

Tumor necrosis factor alpha (TNF-alpha)-induced prostaglandin E2 release is mediated by the activation of cyclooxygenase-2 (COX-2) transcription via NFkappaB in human gingival fibroblasts.

Using stochastic risk assessment in setting information priorities for managing dioxin impact from a municipal waste incinerator.

Lipid peroxidation in aging brain and Alzheimer's disease.

2,3,7,8-Tetrachlorodibenzo-p-dioxin suppresses tumor necrosis factor-alpha and anti-CD40-induced activation of NF-kappaB/Rel in dendritic cells: p50 homodimer activation is not affected.

2,3,7,8-Tetrachlorodibenzo-p-dioxin is a possible activator of human cytomegalovirus replication in a human fibroblast cell line.

Both tissue inhibitors of metalloproteinases-1 (TIMP-1) and TIMP-2 activate Ras but through different pathways.

Induction of P-glycoprotein, glutathione-S-transferase and cytochrome P450 in rat liver by atrazine.

The effect of oxidative stress on ERalpha and ERbeta expression.

Development of a high throughput screening assay for mitochondrial membrane potential in living cells.

Signal pathways involved in the production of MMP-1 and MMP-3 in human gingival fibroblasts.

Urokinase induces its own expression in Beas2B lung epithelial cells.

Risk assessment of dioxin contamination in human food.

IARC monographs, industry influence, and upgrading, downgrading, and under-grading chemicals: a personal point of view. International Agency for Research on Cancer.

Activation of Wiskott-Aldrich syndrome protein and its association with other proteins by stromal cell-derived factor-1alpha is associated with cell migration in a T-lymphocyte line.

Induction and inhibition of aromatase (CYP19) activity by various classes of pesticides in H295R human adrenocortical carcinoma cells.

Gene-specific TCDD suppression of RARalpha- and RXR-mediated induction of tissue transglutaminase.

Evidence for the involvement of CYP1A2 in the metabolism of bromodichloromethane in rat liver.

Synthesis and cytotoxic activity of N-(2-diethylamino)ethylcarboxamide and other derivatives of 10H-quindoline.

Chronic acquired dyskeratotic papulosis of the face.

Effects of benzo[a]pyrene exposure on a fish population resistant to the toxic effects of dioxin-like compounds.

Changes in gene expression profiles of human fibroblasts in response to sodium arsenite treatment.

Evidence for high activity of xylem parenchyma and ray cells in the interface of host stem and *Agrobacterium tumefaciens*-induced tumours of *Ricinus communis*.

The influence of the solvents DMSO and ethanol on the genotoxicity of alpha,beta-unsaturated aldehydes in the SOS chromotest.

Transfer of dioxin risk between nine major municipal waste incinerators in Taiwan.

Identification of 2,3,7,8-tetrachlorodibenzo-p-dioxin-responsive genes in mouse liver by serial analysis of gene expression.

Monitoring for DNA damage of humans occupationally exposed to methyl bromide.

The production of macrophage inflammatory protein-2 induced by soluble intercellular adhesion molecule-1 in mouse astrocytes is mediated by src tyrosine kinases and p42/44 mitogen-activated protein kinase.

A novel cell line, MDA-kb2, that stably expresses an androgen- and glucocorticoid-responsive reporter for the detection of hormone receptor agonists and antagonists.

Chiral pharmacokinetics and inversion of enantiomers of a new quinoxaline topoisomerase IIbeta poison in the rat.

Population toxicokinetic analysis of 2,3,7,8-tetrachlorodibenzo-p-dioxin using Bayesian techniques.

Effect of the new matrix metalloproteinase inhibitor RO-28-2653 on mitochondrial function.

Derivation, characterization, and phenotypic variation of hepatic progenitor cell lines isolated from adult rats.

Unique property of some synthetic retinoids: activation of the aryl hydrocarbon receptor pathway.

Dioxin stimulates synthesis and secretion of IgE-dependent histamine-releasing factor.

Effects of heat shock protein 70 (Hsp70) on arsenite-induced genotoxicity.

TNF-alpha suppresses bone sialoprotein (BSP) expression in ROS17/2.8 cells.

Uptake of the antivasular agent 5,6-dimethylxanthenone-4-acetic acid (DMXAA) and activation of NF-kappaB in human tumor cell lines.

Arsenic induces oxidative stress and activates stress gene expressions in cultured lung epithelial cells.

Induction of genotoxic damage is not correlated with the ability to methylate arsenite in vitro in the leukocytes of four mammalian species.

Estimating the human health risks from polychlorinated dioxins and furans in stack gas emissions from combustion units: implications of USEPA's dioxin reassessment.

In vitro cytotoxicity testing with fluorescence-based assays in cultured human lung and dermal cells.

Myeloperoxidase-dependent caspase-3 activation and apoptosis in HL-60 cells: protection by the antioxidants ascorbate and (dihydro)lipoic acid.

Toxicity testing and chemical analyses of recycled fibre-based paper for food contact.

Airborne carbonyls from motor vehicle emissions in two highway tunnels.

Modulatory effect of phenolic fractions of Terminalia arjuna on the mutagenicity in Ames assay.

Effect of peroxisome proliferators on the methylation and protein level of the c-myc protooncogene in B6C3F1 mice liver.

Involvement of oxidative stress in NF-kappaB activation in endothelial cells treated by photodynamic therapy.

The stimulation of tumor necrosis factor and inhibition of glucose transport and lipoprotein lipase in adipose cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Cytokine-activated Jak-2 is involved in inducible nitric oxide synthase expression independent from NF-kappaB activation in vascular smooth muscle cells.

Inhibition of catalase activity with 3-amino-triazole enhances the cytotoxicity of the Alzheimer's amyloid-beta peptide.

DNA damage by cadmium and arsenic salts assessed by the single cell gel electrophoresis assay.

Evaluation of diet and dimethylarsinic acid on the urothelium of Syrian golden hamsters.

Environmental and occupational skin diseases in Taiwan.

Impact of chemical warfare with agent orange on women's reproductive lives in Vietnam: a pilot study.

Paraquat in developing countries.

Effects of chloro-s-triazine herbicides and metabolites on aromatase activity in various human cell lines and on vitellogenin production in male carp hepatocytes.

Oral exposure of dimethylarsinic acid, a main metabolite of inorganic arsenics, in mice leads to an increase in 8-Oxo-2'-deoxyguanosine level, specifically in the target organs for arsenic carcinogenesis.

Oxidized forms of peroxiredoxins and DJ-1 on two-dimensional gels increased in response to sublethal levels of paraquat.

[Genotoxic effect of the insecticides pentachlorophenol and lindane on human nasal mucosal epithelium].

Unique renal tubule changes induced in rats and mice by the peroxisome proliferators 2,4-dichlorophenoxyacetic acid (2,4-D) and WY-14643.

Agricultural exposure to carbamate pesticides and risk of non-Hodgkin lymphoma.

Prostate cancer detection in veterans with a history of Agent Orange exposure.

Decreased expression of the NADH:ubiquinone oxidoreductase (complex I) subunit 4 in 1-methyl-4-phenylpyridinium -treated human neuroblastoma SH-SY5Y cells.

Cytotoxic effect of three arsenic compounds in HeLa human tumor and bacterial cells.

Oxidative stress and liver toxicity in rats and human hepatoma cell line induced by pentachlorophenol and its major metabolite tetrachlorohydroquinone.

Possible involvement of O6-methylguanine formation and p53 dysfunction in mouse urinary bladder carcinogenesis.

Oxidative stress promotes the development of transformation: involvement of a potent mutagenic lipid peroxidation product, acrolein.

Effect of sulfosulfuron on the urine and urothelium of male rats.

Differential effects of trivalent and pentavalent arsenicals on cell proliferation and cytokine secretion in normal human epidermal keratinocytes.

Dimethylarsinic acid induces 8-hydroxy-2'-deoxyguanosine formation in the kidney of NCI-Black-Reiter rats.

A concise review of the toxicity and carcinogenicity of dimethylarsinic acid.

Carcinogenicity assays of wood dust and wood additives in rats exposed by long-term inhalation.

The role of nitric oxide in paraquat-induced cytotoxicity in the human A549 lung carcinoma cell line.

Genotoxic effects of methyl isothiocyanate.

Cytotoxic and genotoxic effects of As, MMA, and DMA on leukocytes and stimulated human lymphocytes.

Association of elevated blood levels of pentachlorophenol (PCP) with cellular and humoral immunodeficiencies.

Induction of apoptosis in human lymphocytes by the herbicide 2,4-dichlorophenoxyacetic acid.

Occupational exposure to pesticides and pancreatic cancer.

Urothelial cytotoxicity and regeneration induced by dimethylarsinic acid in rats.

Mortality in chemical workers potentially exposed to 2,4-dichlorophenoxyacetic acid (2,4-D) 1945-94: an update.

Dehydroepiandrosterone inhibits the death of immunostimulated rat C6 glioma cells deprived of glucose.

Arsenic-induced congenital malformations in genetically susceptible folate binding protein-2 knockout mice.

Response of MCF-7 human breast cancer cells to some binary mixtures of oestrogenic compounds in-vitro.

Heterozygosity for the mouse Apex gene results in phenotypes associated with oxidative stress.

Atrazine potentiation of arsenic trioxide-induced cytotoxicity and gene expression in human liver carcinoma cells (HepG2).

Differential role of superoxide and glutathione in S-nitrosoglutathione-mediated apoptosis: a rationale for mild forms of familial amyotrophic lateral sclerosis associated with less active Cu,Zn superoxide dismutase mutants.

Increased susceptibility of copper-deficient neuroblastoma cells to oxidative stress-mediated apoptosis.

Expression and prognostic significance of catalase in malignant mesothelioma.

Expression of inducible nitric oxide synthase in primary culture of rat bladder smooth muscle cells by plasma from cyclophosphamide-treated rats.

Effects of chlorpropham (CIPC) on the hemopoietic system of rats.

Down-regulation of catalase gene expression in the doxorubicin-resistant AML subline AML-2/DX100.

Biological effects of a nano red elemental selenium.

Inhibition of apoptosis by pentachlorophenol in v-myc-transfected rat liver epithelial cells: relation to down-regulation of gap junctional intercellular communication.

Caspase-3 activation induced by inhibition of mitochondrial complex I is facilitated by glycogen synthase kinase-3beta and attenuated by lithium.

Symbiotic gene activation is interrupted by endocrine disrupting chemicals.

P34(cdc2) kinase is associated with cortical microtubules from higher plant protoplasts.

Propanil inhibits tumor necrosis factor- α production by reducing nuclear levels of the transcription factor nuclear factor- κ B in the macrophage cell line ic-21.

Characterization of metabolic activation of pentachlorophenol to quinones and semiquinones in rodent liver.

Hyperoxia inhibits oxidant-induced apoptosis in lung epithelial cells.

The transcriptional and DNA binding activity of peroxisome proliferator-activated receptor α is inhibited by ethanol metabolism. A novel mechanism for the development of ethanol-induced fatty liver.

Nontraditional microbial bioactive metabolites.

Mutagenicity of 2-alkylpropenals in *Salmonella typhimurium* strain TA 100: structural influences.

Role of tyrosine phosphorylation in ligand-independent sequestration of CXCR4 in human primary monocytes-macrophages.

B-lymphocytes from malignant hyperthermia-susceptible patients have an increased sensitivity to skeletal muscle ryanodine receptor activators.

Stereospecific antitumor activity of radicicol oxime derivatives.

Characterization of dioxin-like activity of sediments from a Czech river basin.

Macrophage migration inhibitory factor as a redox-sensitive cytokine in cardiac myocytes.

Novel target genes of the Ah (dioxin) receptor: transcriptional induction of N-myristoyltransferase 2.

Mutations to Gly2370, Gly2373 or Gly2375 in malignant hyperthermia domain 2 decrease caffeine and cresol sensitivity of the rabbit skeletal-muscle Ca^{2+} -release channel (ryanodine receptor isoform 1).

Dioxin body burdens in operation ranch hand veterans: promotion blocking and cancer causation.

Effects on levels of glutathione and some related enzymes in tissues after an acute arsenic exposure in rats and their relationship to dietary protein deficiency.

Non-Hodgkin's lymphoma and specific pesticide exposures in men: cross-Canada study of pesticides and health.

Protection by dietary compounds against mutation in a transgenic rodent.

Agricultural risk factors for t(14;18) subtypes of non-Hodgkin's lymphoma.

Significant shortcomings of the U.S. Environmental Protection Agency's latest draft risk characterization for dioxin-like compounds.

Induction of cytochrome P450 1A1 gene expression by a vitamin K3 analog in mouse hepatoma Hepa-1c1c7 cells.

The effects of catechol-O-methyltransferase inhibition on estrogen metabolite and oxidative DNA damage levels in estradiol-treated MCF-7 cells.

Involvement of a post-transcriptional mechanism in the inhibition of CYP1A1 expression by resveratrol in breast cancer cells.

Mast cell regulation of inflammation and gene expression during antigen-induced bladder inflammation in mice.

[Epidemiology of soft tissue sarcomas in adults].

Expression of MRP1 and related transporters in human lung cells in culture.

Secretion of gelatinases and activation of gelatinase A (MMP-2) by human rheumatoid synovial fibroblasts.

Arsenic suppresses necrosis induced by selenite in human leukemia HL-60 cells.

Agricultural pesticide use in California: pesticide prioritization, use densities, and population distributions for a childhood cancer study.

Occupational exposure to endocrine-disrupting pesticides and the potential for developing hormonal cancers.

p73 is a growth-regulated protein in vascular smooth muscle cells and is present at high levels in human atherosclerotic plaque.

Butylhydroxytoluene (BHT) increases susceptibility of transgenic rasH2 mice to lung carcinogenesis.

Arsenite is a cocarcinogen with solar ultraviolet radiation for mouse skin: an animal model for arsenic carcinogenesis.

The risk of endometriosis and exposure to dioxins and polychlorinated biphenyls: a case-control study of infertile women.

Transport of methotrexate into PC-3 human prostate cancer cells.

Association of c-myc overexpression and hyperproliferation with arsenite-induced malignant transformation.

7,12-Dimethylbenz[a]anthracene inhibition of steroid production in MA-10 mouse Leydig tumor cells is not directly linked to induction of CYP1B1.

Risk assessment for 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) based on an epidemiologic study.

Inhibition of tyrosine kinase activity induces caspase-dependent apoptosis in anaplastic large cell lymphoma with NPM-ALK (p80) fusion protein.

Effects of calorie restriction on polymicrobial peritonitis induced by cecum ligation and puncture in young C57BL/6 mice.

Inducing effects of dioxin-like polychlorinated biphenyls on CYP1A in the human hepatoblastoma cell line HepG2, the rat hepatoma cell line H4IIE, and rat primary hepatocytes: comparison of relative potencies.

Accessibility and activity of the promoter for a dioxin-inducible ecto-ATPase gene.

FLT3 tyrosine kinase as a target molecule for selective antileukemia therapy.

[CD7(+)] acute myeloid leukemia (M0) associated with a mediastinal bulky mass lesion].

Pro-apoptotic interactions between XK469 and the peripheral benzodiazepine receptor.

Cost effectiveness of reducing dioxin emissions from municipal solid waste incinerators in Japan.

Absence of Crabtree effect in human melanoma cells adapted to growth at low pH: reversal by respiratory inhibitors.

Use of cDNA microarrays to analyze dioxin-induced changes in human liver gene expression.

Dioxin-inducible transactivation in a chromosomal setting. Analysis of the acidic domain of the Ah receptor.

Use of a toxicokinetic model in the analysis of cancer mortality in relation to the estimated absorbed dose of dioxin (2,3,7,8-tetrachlorodibenzo-p-dioxin, TCDD).

Modulatory effects of neonatal exposure to TCDD, or a mixture of PCBs, p,p'-DDT, and p,p'-DDE, on methylnitrosourea-induced mammary tumor development in the rat.

Induction of hepatic 8-oxo-deoxyguanosine adducts by 2,3,7,8-tetrachlorodibenzo-p-dioxin in Sprague-Dawley rats is female-specific and estrogen-dependent.

Melatonin attenuates estradiol-induced oxidative damage to DNA: relevance for cancer prevention.

Identification of rab7 as a melanosome-associated protein involved in the intracellular transport of tyrosinase-related protein 1.

Expression of glutathione-S-transferase isozyme in the SY5Y neuroblastoma cell line increases resistance to oxidative stress.

Hypoxia-inducible factor 1alpha and 1beta proteins share common signaling pathways in human prostate cancer cells.

The hepatitis B virus HBx protein induces adherens junction disruption in a src-dependent manner.

Indirect exposure assessment at the United States Environmental Protection Agency.

Exposure to the dioxin 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces squamous metaplasia in the endocervix of cynomolgus macaques.

Tyrosine kinase inhibitors in the treatment of chronic myeloid leukaemia: so far so good?

Invited commentary: how do the Seveso findings affect conclusions concerning TCDD as a human carcinogen?

Health effects of dioxin exposure: a 20-year mortality study.

Differential regulation of cytochrome P450 1A1 and 1B1 by a combination of dioxin and pesticides in the breast tumor cell line MCF-7.

Regulation of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced tumor promotion by 17 beta-estradiol in female Sprague-Dawley rats.

Human health effects of dioxins: cancer, reproductive and endocrine system effects.

Association between canine malignant lymphoma, living in industrial areas, and use of chemicals by dog owners.

Oral administration of dimethylarsinic acid, a main metabolite of inorganic arsenic, in mice promotes skin tumorigenesis initiated by dimethylbenz(a)anthracene with or without ultraviolet B as a promoter.

Estrogenic and dioxin-like potency in each step of a controlled landfill leachate treatment plant in Japan.

Dioxin exposure and public health in Chapaevsk, Russia.

Method for evaluation of immunotoxicity of dioxin compounds using human T-lymphoblastic cell line, L-MAT.

Metabolism of equilenin in MCF-7 and MDA-MB-231 human breast cancer cells.

How serious is dioxin's cancer risk?

Comparison of exhaust emissions from Swedish environmental classified diesel fuel (MK1) and European Program on Emissions, Fuels and Engine Technologies (EPEFE) reference fuel: a chemical and biological characterization, with viewpoints on cancer risk.

Absence of estrogen receptor-alpha expression in human ovarian clear cell adenocarcinoma compared with ovarian serous, endometrioid, and mucinous adenocarcinoma.

Nephrin redistribution on podocytes is a potential mechanism for proteinuria in patients with primary acquired nephrotic syndrome.

Recent advances in arsenic carcinogenesis: modes of action, animal model systems, and methylated arsenic metabolites.

Correlation of cardiotoxicity mediated by halogenated aromatic hydrocarbons to aryl hydrocarbon receptor activation.

2,3,7,8-Tetrachlorodibenzo-p-dioxin and diindolylmethanes differentially induce cytochrome P450 1A1, 1B1, and 19 in H295R human adrenocortical carcinoma cells.

Disruption of the genes for ClpXP protease in Salmonella enterica serovar Typhimurium results in persistent infection in mice, and development of persistence requires endogenous gamma interferon and tumor necrosis factor alpha.

UCS15A, a non-kinase inhibitor of Src signal transduction.

Down-regulation of E-cadherin gene expression by collagen type I and type III in pancreatic cancer cell lines.

Uptake mechanism of valproic acid in human placental choriocarcinoma cell line (BeWo).

Suppression of CYP1A1 expression by 4-nonylphenol in murine Hepa-1c1c7 cells.

Autologous blood transfusion in oral and maxillofacial surgery patients with the use of erythropoietin.

Etiologic factors in soft tissue sarcomas.

[Chronic arsenicism].

Toxicity of PCB-126 in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P4501A induction in several organ systems.

Comparative biodistribution and metabolism of carbon-11-labeled N-[2-(dimethylamino)ethyl]acridine-4-carboxamide and DNA-intercalating analogues.

Lung carcinogenesis: resveratrol modulates the expression of genes involved in the metabolism of PAH in human bronchial epithelial cells.

Testosterone-induced growth of S115 mouse mammary tumor cells is dependent on heparan sulfate.

Maximal aryl hydrocarbon receptor activity depends on an interaction with the retinoblastoma protein.

Quantitative relationship between arsenic exposure and AP-1 activity in mouse urinary bladder epithelium.

Molecular biology of the Ah receptor and its role in carcinogenesis.

Subchronic sodium chlorate exposure in drinking water results in a concentration-dependent increase in rat thyroid follicular cell hyperplasia.

The Belgian PCB and dioxin incident of January-June 1999: exposure data and potential impact on health.

Alternative activation of extracellular signal-regulated protein kinases in curcumin and arsenite-induced HSP70 gene expression in human colorectal carcinoma cells.

Androgen receptor antagonism by the organophosphate insecticide fenitrothion.

Identification of apoptotic cells by formamide-induced dna denaturation in condensed chromatin.

Differential expression of Hox A5 in human colon cancer cell differentiation: a quantitative study using real-time RT-PCR.

Identification by mass spectrometry of a new alpha-tubulin isotype expressed in human breast and lung carcinoma cell lines.

Aromatic hydrocarbon receptor (AhR). AhR nuclear translocator- and p53-mediated induction of the murine multidrug resistance *mdr1* gene by 3-methylcholanthrene and benzo(a)pyrene in hepatoma cells.

Up-regulation of urokinase-type plasminogen activator by insulin-like growth factor-I depends upon phosphatidylinositol-3 kinase and mitogen-activated protein kinase kinase.

Effect of highly bioaccumulated polychlorinated biphenyl congeners on estrogen and androgen receptor activity.

Transcriptional activation of cathepsin D gene expression by 17beta-estradiol: mechanism of aryl hydrocarbon receptor-mediated inhibition.

5-Aminolaevulinic acid methyl ester transport on amino acid carriers in a human colon adenocarcinoma cell line.

Genetic events associated with arsenic-induced malignant transformation: applications of cDNA microarray technology.

Dosimetry of low-energy protons and light ions.

Antimitotic actions of a novel analog of the fungal metabolite palmarumycin CP1.

Identification of estrogen-induced genes downregulated by AhR agonists in MCF-7 breast cancer cells using suppression subtractive hybridization.

Chemoprotection and interindividual differences in response to biological reactive intermediates.

Bcl-2 overexpression decreases BCNU sensitivity of a human glioblastoma line through enhancement of catalase activity.

Final report on the safety assessment of Juniperus communis Extract, Juniperus oxycedrus Extract, Juniperus oxycedrus Tar, Juniperus phoenicea extract, and Juniperus virginiana Extract.

Human cyclophilin 40 is a heat shock protein that exhibits altered intracellular localization following heat shock.

Protein kinase inhibitors can suppress stress-induced dissociation of Hsp27.

Pesticides as a cause of occupational skin diseases in farmers.

Protein tyrosine kinase-dependent regulation of adenylate cyclase and phosphatidylinositol 3-kinase activates the expression of glial fibrillary acidic protein upon induction of differentiation in rat c6 glioma.

History of the development of arsenic derivatives in cancer therapy.

Molecular basis of dioxin actions: evidence supporting chemoprotection.

Aryl hydrocarbon receptor signaling plays a significant role in mediating benzo[a]pyrene- and cigarette smoke condensate-induced cytogenetic damage in vivo.

Analysis of collagenase-cleavage of type II collagen using a neoepitope ELISA.

Benzo[a]pyrene-induced toxicity: paradoxical protection in Cyp1a1(-/-) knockout mice having increased hepatic BaP-DNA adduct levels.

Studies made to assess risk concerning a 'dioxin' contamination incident near Bolsover, Derbyshire, UK.

Cyclophosphamide induces caspase 9-dependent apoptosis in 9L tumor cells.

Histopathological alterations and induction of cytochrome P-450 1A in the liver and gills of the gilthead seabream (*Sparus aurata*) exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Lipid peroxidation end products-responded induction of a preneoplastic marker enzyme glutathione S-transferase P-form (GST-P) in rat liver on admistration via the portal vein.

Cytochrome CYP2E1 phenotyping and genotyping in the evaluation of health risks from exposure to polluted environments.

Toxicological relevance of the multidrug resistance protein 1, MRP1 (ABCC1) and related transporters.

Inhibition of apoptosis in rat hepatocytes treated with 'non-dioxin-like' polychlorinated biphenyls.

Phosphorylation-induced activation of tilapia nonspecific cytotoxic cells by serum cytokines.

Toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds.

Clustering of hepatotoxins based on mechanism of toxicity using gene expression profiles.

Fatal poisoning by butachlor and chlornitrofen ingested from a bottle marked as nitrofen.

Dissociation of 5' AMP-activated protein kinase activation and glucose uptake stimulation by mitochondrial uncoupling and hyperosmolar stress: differential sensitivities to intracellular Ca²⁺ and protein kinase C inhibition.

TAT peptide on the surface of liposomes affords their efficient intracellular delivery even at low temperature and in the presence of metabolic inhibitors.

Identification of UV photoproducts and hydrolysis products of butachlor by mass spectrometry.

Mode of action and tissue dosimetry in current and future risk assessments.

Mutagenicity of TCDD in Big Blue transgenic rats.

Cancer isoform of a tumor-associated cell surface NADH oxidase (tNOX) has properties of a prion.

Male reproductive effect of arsenic in mice.

Early indicators of response in biologically based risk assessment for nongenotoxic carcinogens.

Oxy5, a novel protein from Arabidopsis thaliana, protects mammalian cells from oxidative stress.

Sodium arsenite enhances AP-1 and NFkappaB DNA binding and induces stress protein expression in precision-cut rat lung slices.

Effects of environmental antiandrogens on reproductive development in experimental animals.

Induction of CYP1A by benzo[k]fluoranthene in human hepatocytes: CYP1A1 or CYP1A2?

Inhibition of liver methionine adenosyltransferase gene expression by 3-methylcolanthrene: protective effect of S-adenosylmethionine.

Cyclopentenone prostaglandins as potential inducers of intracellular oxidative stress.

Potential of arsenic-induced cytotoxicity by sulfur amino acid deprivation (SAAD) through activation of ERK1/2, p38 kinase and JNK1: the distinct role of JNK1 in SAAD-potentiated mercury toxicity.

Toxicology of metam sodium.

Induction of direct adducts, apurinic/apyrimidinic sites and oxidized bases in nuclear DNA of human HeLa S3 tumor cells by tetrachlorohydroquinone.

Oxidative damage and direct adducts in calf thymus DNA induced by the pentachlorophenol metabolites, tetrachlorohydroquinone and tetrachloro-1,4-benzoquinone.

Increased tumor necrosis factor- α production by peripheral blood leukocytes from TCDD-exposed rhesus monkeys.

Oncogenic Ras-induced proliferation requires autocrine fibroblast growth factor 2 signaling in skeletal muscle cells.

Aryl hydrocarbon receptor-deficient mice generate normal immune responses to model antigens and are resistant to TCDD-induced immune suppression.

[Involvement of regulating the phosphatidylinositol 3-kinase signaling pathway in the process of herbimycin A-induced erythroid cell differentiation in the K562 erythroleukemia cell line].

Heterogeneity and plasticity of hepatocyte lineage cells.

The role of time as a quantifiable variable of toxicity and the experimental conditions when Haber's $c \times t$ product can be observed: implications for therapeutics.

Induction of cytochrome P450 1A1 gene expression, oxidative stress, and genotoxicity by carbaryl and thiabendazole in transfected human HepG2 and lymphoblastoid cells.

Induction of oxyradicals by arsenic: implication for mechanism of genotoxicity.

Acyl-CoA-binding protein in the armadillo Harderian gland: its primary structure and possible role in lipid secretion.

In situ hybridization and immunohistochemical analysis of cytochrome P450 1B1 expression in human normal tissues.

Increase Intake of Water for Prevention of Cancer: an Enzymological Lesson?

Liver Cancer in Viet Nam: Risk Estimates of Viral Infections and Dioxin Exposure in the South and North Populations.

Nitroxide TEMPOL impairs mitochondrial function and induces apoptosis in HL60 cells.

Cepharanthine activates caspases and induces apoptosis in Jurkat and K562 human leukemia cell lines.

Development of quantitative structure-activity relationship (QSAR) models for predicting risk of exposure from carcinogens in animals.

Genotoxic effects of carbon black particles, diesel exhaust particles, and urban air particulates and their extracts on a human alveolar epithelial cell line (A549) and a human monocytic cell line (THP-1).

Carcinogen biomarkers for lung or oral cancer chemoprevention trials.

Metabolism of ochratoxin A: absence of formation of genotoxic derivatives by human and rat enzymes.

Clonal anergy induced in a CD8+ hapten-specific cytotoxic T-cell clone by an altered hapten-peptide ligand.

Inhalation toxicity studies of the alpha,beta-unsaturated ketones: 2-cyclohexene-1-one.

Health risks posed by use of Di-2-ethylhexyl phthalate (DEHP) in PVC medical devices: a critical review.

Evaluation of the in vitro genetic toxicity of 4-(2, 4-dichlorophenoxy)butyric acid.

Butachlor, a suspected carcinogen, alters growth and transformation characteristics of mouse liver cells.

Folic acid protects SWV/Fnn embryo fibroblasts against arsenic toxicity.

Evolution of alachlor-induced nasal neoplasms in the Long-Evans rat.

Role of prolactin in chloro-S-triazine rat mammary tumorigenesis.

Arsenic species that cause release of iron from ferritin and generation of activated oxygen.

72-kDa stress protein (hsp72) induced by administration of dimethylarsinic acid to mice accumulates in alveolar flat cells of lung, a target organ for arsenic carcinogenesis.

Mortality and cancer incidence among Swedish lumberjacks exposed to phenoxy herbicides.

Development of California Public Health Goals (PHGs) for chemicals in drinking water.

Cancer mortality in four northern wheat-producing states.

The molecular effects of acrolein.

Effects of in utero exposure to linuron on androgen-dependent reproductive development in the male Crl:CD(SD)BR rat.

Prevention of the down-regulation of gap junctional intercellular communication by green tea in the liver of mice fed pentachlorophenol.

Chronic toxicity and oncogenicity bioassay in rats with the chloro-s-triazine herbicide cyanazine.

Acetochlor-induced rat nasal tumors: further studies on the mode of action and relevance to humans.

Comparative toxicity of trivalent and pentavalent inorganic and methylated arsenicals in rat and human cells.

Roundup inhibits steroidogenesis by disrupting steroidogenic acute regulatory (StAR) protein expression.

Effect of chlorinated hydrocarbons on expression of cytochrome P450 1A1, 1A2 and 1B1 and 2- and 4-hydroxylation of 17beta-estradiol in female Sprague-Dawley rats.

Induction of microsatellite mutations by oxidative agents in human lung cancer cell lines.

In vitro studies of cellular and molecular developmental toxicity of adjuvants, herbicides, and fungicides commonly used in Red River Valley, Minnesota.

In vivo cytokine production and resistance to infection after acute exposure to 3,4-dichloropropionaniline.

Immunodetection of hepatic peroxisomal PMP70 as an indicator of peroxisomal proliferation in the mummichog, *Fundulus heteroclitus*.

Propofol improves recovery from paraquat acute toxicity in vitro and in vivo.

Influence of Adriamycin and paraquat on antioxidant enzyme expression in primary rat hepatocytes.

Subchronic toxicity of chlorpropham (CIPC) in ICR mice.

Increased tumor necrosis factor- α sensitivity of MCF-7 cells transfected with NAD(P)H:quinone reductase.

Promotion of skin carcinogenesis by dimethylarsinic acid in keratin (K6)/ODC transgenic mice.

The effect of exposure to a commercial 2,4-D herbicide formulation during gestation on urethan-induced lung adenoma formation in CD-1 mice.

Catalytic efficiencies of allelic variants of human glutathione S-transferase Pi in the glutathione conjugation of α , β -unsaturated aldehydes.

[Pentachlorophenol poisoning. Report of 4 cases and review of the literature].

Occupation and prostate cancer risk in Sweden.

Ethane sulfonate metabolite of alachlor: assessment of oncogenic potential based on metabolic and mechanistic considerations.

Air toxics and health risks in California: the public health implications of outdoor concentrations.

Safety evaluation and risk assessment of the herbicide Roundup and its active ingredient, glyphosate, for humans.

Effects of L-2-oxothiazolidine-4-carboxylate on the cytotoxic activity and toxicity of cyclophosphamide in mice bearing B16F10 melanoma liver metastases.

[A cluster of doubts].

Stimulated pulmonary cell hyperplasia underlies resistance to α -naphthylthiourea.

1-Methyl-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline (salsolinol) is toxic to dopaminergic neuroblastoma SH-SY5Y cells via impairment of cellular energy metabolism.

Genetic variation of basal iron status, ferritin and iron regulatory protein in mice: potential for modulation of oxidative stress.

Paraquat-induced lipid peroxidation and injury in Ehrlich ascites tumor cells.

Use of the *Drosophila* wing spot test in the genotoxicity testing of different herbicides.

6-Hydroxydopamine toxicity towards human SH-SY5Y dopaminergic neuroblastoma cells: independent of mitochondrial energy metabolism.

Alar again: science, the media, and the public's right to know.

Mechanistic aspects of the induction of apoptosis by lauryl gallate in the murine B-cell lymphoma line Wehi 231.

Disrupted mitochondrial electron transport function increases expression of anti-apoptotic bcl-2 and bcl-X(L) proteins in SH-SY5Y neuroblastoma and in Parkinson disease cybrid cells through oxidative stress.

Circulating thyroglobulin transcytosed by thyroid cells in complexed with secretory components of its endocytic receptor megalin.

Activation of JNK, p38 and ERK mitogen-activated protein kinases by chromium(VI) is mediated through oxidative stress but does not affect cytotoxicity.

Cyclophosphamide-induced cystitis in freely-moving conscious rats: behavioral approach to a new model of visceral pain.

DMPS-arsenic challenge test. II. Modulation of arsenic species, including monomethylarsonous acid (MMA(III)), excreted in human urine.

The role of orally administered dimethylarsinic acid, a main metabolite of inorganic arsenics, in the promotion and progression of UVB-induced skin tumorigenesis in hairless mice.

Interaction among mitochondria, mitogen-activated protein kinases, and nuclear factor-kappaB in cellular models of Parkinson's disease.

2-Chloro-s-triazine herbicides induce aromatase (CYP19) activity in H295R human adrenocortical carcinoma cells: a novel mechanism for estrogenicity?

Reactive oxygen species-specific mechanisms of drug resistance in paraquat-resistant acute myelogenous leukemia sublines.

Evidence for a role of chloroethylaziridine in the cytotoxicity of cyclophosphamide.

Comparative metabolism of chloroacetamide herbicides and selected metabolites in human and rat liver microsomes.

Different cell death mechanisms and gene expression in human cells induced by pentachlorophenol and its major metabolite, tetrachlorohydroquinone.

Antiapoptotic and antigenotoxic effects of N-acetylcysteine in human cells of endothelial origin.

Deregulated manganese superoxide dismutase expression and resistance to oxidative injury in p53-deficient cells.

MPP(+) injection into rat substantia nigra causes secondary glial activation but not cell death in the ipsilateral striatum.

Catalases and thioredoxin peroxidase protect *Saccharomyces cerevisiae* against Ca(2+)-induced mitochondrial membrane permeabilization and cell death.

Structural organization of the human gastrointestinal glutathione peroxidase (GPX2) promoter and 3'-nontranscribed region: transcriptional response to exogenous redox agents.

Characterization of the transport of the organic cation [3H]MPP+ in human intestinal epithelial (Caco-2) cells.

Dose-dependent effects on tissue distribution and metabolism of dimethylarsinic acid in the mouse after intravenous administration.

Structure-activity relationship in potentially anti-tumor promoting benzalacetone derivatives, as assayed by the Epstein-Barr virus early antigen activation.

Evaluation of the developmental toxicity of thalidomide using frog embryo teratogenesis assay-xenopus (FETAX): biotransformation and detoxification.

TCDD elevates erbB2 expression and signaling in T47D cells by reversing serum potentiation of estrogen receptor activity, independent of estrogen levels and enhanced ER down-regulation.

The human cytochrome P450 1A1 mRNA is rapidly degraded in HepG2 cells.

Liver tumor-promoting activity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in TCDD-sensitive and TCDD-resistant rat strains.

Contribution of planar (0-1 ortho) and nonplanar (2-4 ortho) fractions of Aroclor 1260 to the induction of altered hepatic foci in female Sprague-Dawley rats.

Partial characterization of an abundant human skin melanosomal 66 kDa protein (MP 66) and investigation to purify a similar protein from B16 murine melanoma tumours.

[Endocrine disrupting chemicals and carcinogenesis--breast, testis and prostate cancer].

NRH:quinone oxidoreductase2 (NQO2).

Failure of Ah receptor to mediate induction of cytochromes P450 in the CYP1 family in the human hepatoma line SK-Hep-1.

Characterization of ATP-sensitive potassium channels functionally expressed in pituitary GH3 cells.

Joint effects of nine polychlorinated biphenyl (PCB) congeners on breast cancer risk.

3',4'-dimethoxyflavone as an aryl hydrocarbon receptor antagonist in human breast cancer cells.

2,2',4,6,6'-pentachlorobiphenyl induces apoptosis in human monocytic cells.

Toxicology. Panel backs EPA dioxin assessment.

Rac1 regulates stress-induced, redox-dependent heat shock factor activation.

Down-regulation of murine Cyp1a-1 in mouse hepatoma Hepa-1c1c7 cells by bisphenol A.

Induction of lung lesions in female rats following chronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Arsenic methylation capacity and skin cancer.

Src homology 2 domain substitution modulates the kinase and transforming activities of the Fes protein-tyrosine kinase.

Comparative studies on the effects of green tea extracts and individual tea catechins on human CYP1A gene expression.

SULT1A1 catalyzes 2-methoxyestradiol sulfonation in MCF-7 breast cancer cells.

Syndecan-1-dependent homotypic cell adhesion in HT58 lymphoma cells.

The application of reporter gene assays for the determination of the toxic potency of diffuse air pollution.

Effects of dioxin and estrogen on collagenase-3 in UMR 106-01 osteosarcoma cells.

The transcriptional signature of dioxin in human hepatoma HepG2 cells.

[Effect of sodium azide on mitochondrial membrane potential in SH-SY5Y human neuroblastoma cells].

Do people actually pursue risk elimination in environmental risk management?

Ovarian tumors in rats induced by chronic 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment.

Selective involvement of reactive oxygen intermediates in platelet-activating factor-mediated activation of NF-kappaB.

Taxol mediates serine phosphorylation of the 66-kDa Shc isoform.

Novel oxime derivatives of radicicol induce erythroid differentiation associated with preferential G(1) phase accumulation against chronic myelogenous leukemia cells through destabilization of Bcr-Abl with Hsp90 complex.

BCRP/MXR/ABCP expression in topotecan-resistant human breast carcinoma cells.

Soft tissue sarcomas in the general population living near a chemical plant in Northern Italy.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on initiation and promotion of GST-P-positive foci in rat liver: A quantitative analysis of experimental data using a stochastic model.

Application of capillary electrophoresis in clinical chemistry: the clinical value of urinary modified nucleosides.

The mitogenic signaling pathway for fibroblast growth factor-2 involves the tyrosine phosphorylation of cyclin D2 in MCF-7 human breast cancer cells.

Stretch-dependent modulation of contractility and growth in smooth muscle of rat portal vein.

Parental occupational exposures and risk of neuroblastoma: a case-control study (United States).

Disruption of dioxin-inducible phase I and phase II gene expression patterns by cadmium, chromium, and arsenic.

TCDD suppression of tissue transglutaminase stimulation by retinoids in malignant human keratinocytes.

Characterisation of multidrug-resistant Ehrlich ascites tumour cells selected in vivo for resistance to etoposide.

Crosstalk between estrogen receptor alpha and the aryl hydrocarbon receptor in breast cancer cells involves unidirectional activation of proteasomes.

Inhibition of Hsp90 function by ansamycins causes retinoblastoma gene product-dependent G1 arrest.

Inhibitory effects of nitric oxide and nitrosative stress on dopamine-beta-hydroxylase.

Mechanisms of inhibitory aryl hydrocarbon receptor-estrogen receptor crosstalk in human breast cancer cells.

Selecting high-priority hazardous chemicals for tri-national control: a maximum-utility method applied to Mexico.

Arsenic mediates cell proliferation and gene expression in the bladder epithelium: association with activating protein-1 transactivation.

Soft-tissue sarcoma and non-Hodgkin's lymphoma clusters around a municipal solid waste incinerator with high dioxin emission levels.

Quantitative analysis of tyrosinase transcripts in blood.

NT2 neurons, a classical model for Alzheimer's disease, are highly susceptible to oxidative stress.

Toxicology. Just how bad is dioxin?

The t(1;12)(q21;p13) translocation of human acute myeloblastic leukemia results in a TEL-ARNT fusion.

Childhood cancer in the offspring of male sawmill workers occupationally exposed to chlorophenolate fungicides.

Benzylidene lactam compound, KNK437, a novel inhibitor of acquisition of thermotolerance and heat shock protein induction in human colon carcinoma cells.

Iron supplementation affects the production of pro-inflammatory cytokines in IL-10 deficient mice.

Southeast Asia, promotability and dioxin's relationship to cancer incidence in operation ranch hand veterans.

Down-regulation of thyroid transcription factor-1 gene expression in fetal lung hypoplasia is restored by glucocorticoids.

Statistical analysis of skin tumor data from Tg.AC mouse bioassays.

Annexin I is a stress protein induced by heat, oxidative stress and a sulfhydryl-reactive agent.

Dioxin draft sparks controversy.

Evidence of functional ryanodine receptor involved in apoptosis of prostate cancer (LNCaP) cells.

Herbimycin A in the treatment of experimental proliferative vitreoretinopathy: toxicity and efficacy study.

Diflubenzuron, a benzoyl-urea insecticide, is a potent inhibitor of TCDD-induced CYP1A1 expression in HepG2 cells.

IL-2 signaling in human monocytes involves the phosphorylation and activation of p59hck.

Occupational exposures and pancreatic cancer: a meta-analysis.

Role of antioxidant systems in human androgen-independent prostate cancer cells.

Dioxins: WHO's tolerable daily intake (TDI) revisited.

Occupational exposure to chlorophenol and the risk of nasal and nasopharyngeal cancers among U.S. men aged 30 to 60.

Density-dependent growth of normal and nodular hepatocytes.

Transfer factors: identification of conserved sequences in transfer factor molecules.

Risk ranges for various endpoints following exposure to 2,3,7,8-TCDD.

Studies of cancer in humans.

Human health effects after exposure to 2,3,7,8-TCDD.

Animal studies addressing the carcinogenicity of TCDD (or related compounds) with an emphasis on tumour promotion.

Non-carcinogenic effects of TCDD in animals.

Caspase-3 protease activation during the process of genistein-induced apoptosis in TM4 testicular cells.

Isolation of a 41-kDa protein with cell adhesion activity for animal tumor cells from the mushroom *Hypsizygus marmoreus* by affinity chromatography with type IV collagen immobilized on agarose.

Estrogen and aryl hydrocarbon receptor expression and crosstalk in human Ishikawa endometrial cancer cells.

Preventable risk factors for nasal cancer.

Inhibition of UV irradiation-induced oxidative stress and apoptotic biochemical changes in human epidermal carcinoma A431 cells by genistein.

Paternal employment in agriculture and childhood kidney cancer.

Toxicity of chronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in diethylnitrosamine-initiated ovariectomized rats implanted with subcutaneous 17 beta-estradiol pellets.

Hepatocarcinogenesis in female Sprague-Dawley rats following discontinuous treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Expression of dioxin-related transactivating factors and target genes in human eutopic endometrial and endometriotic tissues.

Second primary neoplasms following non-Hodgkin's lymphoma in New South Wales, Australia.

Possible role of ROS as mediators of hypoxia-induced ion transport inhibition of alveolar epithelial cells.

P2Y₂ receptor-mediated proliferation of C(6) glioma cells via activation of Ras/Raf/MEK/MAPK pathway.

v-Src suppresses SHPS-1 expression via the Ras-MAP kinase pathway to promote the oncogenic growth of cells.

Ah receptor ligands and tumor promotion: survival of neoplastic cells.

Comparison of oxidative stress response parameters in newborn mouse liver versus simian virus 40 (SV40)-transformed hepatocyte cell lines.

Chemokine receptors CXCR-1/2 activate mitogen-activated protein kinase via the epidermal growth factor receptor in ovarian cancer cells.

Development and modification of a recombinant cell bioassay to directly detect halogenated and polycyclic aromatic hydrocarbons in serum.

[Epidemiology and geo-pathology of malignant lymphomas with special emphasis on Japanese lymphomas].

In vivo treatment of mutant FLT3-transformed murine leukemia with a tyrosine kinase inhibitor.

The impact of 4-chloro-m-cresol in heparin formulas on malignant hyperthermia: in vitro and in vivo.

Arsenic, dioxin, and the promotional step in cancer creation.

Induction and regulation of xenobiotic-metabolizing cytochrome P450s in the human A549 lung adenocarcinoma cell line.

Interleukin-1 β regulates CFTR expression in human intestinal T84 cells.

Trypsin stimulates integrin α (5) β (1)-dependent adhesion to fibronectin and proliferation of human gastric carcinoma cells through activation of proteinase-activated receptor-2.

Carrier-mediated transport of valproic acid in BeWo cells, a human trophoblast cell line.

Effects of histone deacetylase inhibitors on the Ah receptor gene promoter.

Toxic action/toxicity.

Differential expression of phosphatidylethanol-amine-binding protein in rat hepatoma cell lines: analyses of tumor necrosis factor- α -resistant cKDH-8/11 and -sensitive KDH-8/YK cells by two-dimensional gel electrophoresis.

Effects of TCDD on thyroid hormone homeostasis in the rat.

Serum alters the uptake and relative potencies of halogenated aromatic hydrocarbons in cell culture bioassays.

Examination of selected food additives and organochlorine food contaminants for androgenic activity in vitro.

Responses of transgenic mouse lines p53(+/-) and Tg.AC to agents tested in conventional carcinogenicity bioassays.

Selective increase in cellular A beta 42 is related to apoptosis but not necrosis.

Pharmacokinetics of orally administered camptothecins.

Hypothesis: chemical carcinogenesis mediated by a transiently active carcinogen receptor.

Linking environmental cancer with occupational epidemiology research: the role of the International Agency for Research on Cancer (IARC).

N-methoxyindole-3-carbinol is a more efficient inducer of cytochrome P-450 1A1 in cultured cells than indol-3-carbinol.

Prognostic significance of anemia and role of erythropoietin in radiation therapy.

Anti-tumor effect of N-beta-alanyl-5-S-glutathionyl-dihydroxyphenylalanine (5-S-GAD), a novel anti-bacterial substance from an insect.

Peritoneal macrophages from 17 alpha-ethinylestradiol-treated NMRI mice secrete transformation-specific low molecular weight proteins.

Non-Hodgkin's lymphoma and occupational exposure to chemicals in Canada. Canadian Cancer Registries Epidemiology Research Group.

Cytokine-inducing activity and antitumor effect of a liposome-incorporated interferon-gamma-inducing molecule derived from OK-432, a streptococcal preparation.

Pathogenesis of cleft palate in mouse embryos exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Tyrosine kinase inhibitors reduce bcl-2 expression and induce apoptosis in androgen-dependent cells.

Inhibition of I kappaB-alpha phosphorylation at serine and tyrosine acts independently on sensitization to DNA damaging agents in human glioma cells.

Metabolic and K(ATP) channel-independent actions of keto acid initiators of insulin secretion.

A multicenter study of 4-chloro-m-cresol for diagnosing malignant hyperthermia susceptibility.

Effect of the adrenal 11-beta-hydroxylase inhibitor metyrapone on human hepatic cytochrome P-450 expression: induction of cytochrome P-450 3A4.

Induction of cyclooxygenase expression and enhancement of malignant cell transformation by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effects of iron salts and haemosiderin from a thalassaemia patient on oxygen radical damage as measured in the comet assay.

Cytochrome P4501A induction and porphyrin accumulation in PLHC-1 fish cells exposed to sediment and oil shale extracts.

Regulation of prostaglandin endoperoxide H synthase-2 induction by dioxin in rat hepatocytes: possible c-Src-mediated pathway.

Changes in cytoskeletal organization in polyoma middle T antigen-transformed fibroblasts: involvement of protein phosphatase 2A and src tyrosine kinases.

Calpain-mediated proteolytic cleavage of troponin I induced by hypoxia or metabolic inhibition in cultured neonatal cardiomyocytes.

Monomethylarsonic acid reductase and monomethylarsonous acid in hamster tissue.

Glycosaminoglycan sulfation requirements for respiratory syncytial virus infection.

Investigations on the mutagenicity of 1,4-dichlorobenzene and its main metabolite 2,5-dichlorophenol in vivo and in vitro.

A key role for the mitochondrial benzodiazepine receptor in cellular photosensitisation with delta-aminolaevulinic acid.

Determination of the vaporization of solutions of mutagenic antineoplastic agents at 23 and 37 degrees C using a desiccator technique.

Sesamol exhibits antimutagenic activity against oxygen species mediated mutagenicity.

Effect of O6-benzylguanine on alkylating agent-induced toxicity and mutagenicity. In Chinese hamster ovary cells expressing wild-type and mutant O6-alkylguanine-DNA alkyltransferases.

Effect of a dioxin-like PCB (CB 126) on the biotransformation and genotoxicity of benzo.

Toxicity of TCDD in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P450 1A induction in several organ systems.

Comparative effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on MCF-7, RL95-2, and LNCaP cells: role of target steroid hormones in cellular responsiveness to CYP1A1 induction.

An assessment of air toxics in Minnesota.

Differential susceptibility of retinal ganglion cells to reactive oxygen species.

TNF-alpha-induced cyclooxygenase-2 expression in human lung epithelial cells: involvement of the phospholipase C-gamma 2, protein kinase C-alpha, tyrosine kinase, NF-kappa B-inducing kinase, and I-kappa B kinase 1/2 pathway.

The role of time in toxicology or Haber's c x t product.

The macromolecular associations of heat shock protein-27 in vascular smooth muscle.

Doxorubicin represses CARP gene transcription through the generation of oxidative stress in neonatal rat cardiac myocytes: possible role of serine/threonine kinase-dependent pathways.

Signal transduction mechanisms linking increased extracellular calcium to proliferation in ovarian surface epithelial cells.

In vivo singlet-oxygen generation in blood of chromium(VI)-treated mice: an electron spin resonance spin-trapping study.

Evaluation of cytotoxicity, dioxin-like activity and estrogenicity of complex environmental mixtures.

Interleukin 10 modulation of tumour necrosis factor receptors requires tyrosine kinases but not the PI 3-kinase/p70 S6 kinase pathway.

Pentoxifylline attenuates bacterial lipopolysaccharide-induced enhancement of allyl alcohol hepatotoxicity.

Synergistic activation of NF-kappaB and inducible isoform of nitric oxide synthase induction by interferon-gamma and tumor necrosis factor-alpha in INS-1 cells.

Overexpression of catalase in the mitochondrial or cytosolic compartment increases sensitivity of HepG2 cells to tumor necrosis factor-alpha-induced apoptosis.

Effects of VEGF on Ca(2+)-transient in cultured lymphatic endothelial cells and mechanical activity of isolated lymph vessels.

Pathological changes of hepatic artery and portal vein, after allyl-alcohol and carbon tetrachloride administration. An experimental study.

Tumour necrosis factor-alpha- and interleukin-1beta-stimulated cell proliferation through activation of mitogen-activated protein kinase in canine tracheal smooth muscle cells.

Nitric oxide enhances expression and shedding of tumor necrosis factor receptor I (p55) in endothelial cells.

Cloning and functional characterization of the bile acid-sensitive methotrexate carrier from rat liver cells.

The inhibition of ERK/MAPK not the activation of JNK/SAPK is primarily required to induce apoptosis in chronic myelogenous leukemic K562 cells.

Cytotoxicity and keratinocyte microsome-mediated mutagenic activation of carcinogens in cultured epidermal cells.

Anti-inflammatory effect of heat shock protein induction is related to stabilization of I kappa B alpha through preventing I kappa B kinase activation in respiratory epithelial cells.

Metabolic inactivation of five glycidyl ethers in lung and liver of humans, rats and mice in vitro.

Dermal penetration and metabolism of five glycidyl ethers in human, rat and mouse skin.

Ceramide-mediated stimulation of inducible nitric oxide synthase (iNOS) and tumor necrosis factor (TNF) accumulation in murine macrophages requires tyrosine kinase activity.

Altered cell cycle control at the G(2)/M phases in aryl hydrocarbon receptor-null embryo fibroblast.

Chelating agents for uranium(VI): 2. Efficacy and toxicity of tetradentate catecholate and hydroxypyridinonate ligands in mice.

Sodium arsenite-induced dysregulation of proteins involved in proliferative signaling.

Overexpression of wild-type and nuclear-targeted catalase modulates resistance to oxidative stress but does not alter spontaneous mutant frequencies at APRT.

Current risk assessment approaches in different countries.

Toxicokinetics.

Studies on the mechanisms of arsenic-induced self tolerance developed in liver epithelial cells through continuous low-level arsenite exposure.

Tyrosine phosphorylation of the p85 subunit of phosphatidylinositol 3-kinase correlates with high proliferation rates in sublines derived from the Jurkat leukemia.

Role of p53 tumor suppressor gene in the toxicity of TCDD, endrin, naphthalene, and chromium (VI) in liver and brain tissues of mice.

Toxicology of environmental chemicals in the flounder (*Platichthys flesus*) with emphasis on the immune system: field, semi-field (mesocosm) and laboratory studies.

Genetic polymorphism in the biotransformation of inorganic arsenic and its role in toxicity.

NTP Toxicology and Carcinogenesis Studies of Pyridine (CAS No. 110-86-1) in F344/N Rats, Wistar Rats, and B6C3F1 Mice (Drinking Water Studies).

Involvement of arachidonic acid in chemical stress-induced interleukin-6 synthesis in osteoblast-like cells: comparison with heat shock protein 27 induction.

Cytoskeletal alterations in lipopolysaccharide-induced bovine vascular endothelial cell injury and its prevention by sodium arsenite.

Differential induction of tumor necrosis factor alpha and manganese superoxide dismutase by endotoxin in human monocytes: role of protein tyrosine kinase, mitogen-activated protein kinase, and nuclear factor kappaB.

Pathways of neurosteroid biosynthesis in cell lines from human brain: regulation of dehydroepiandrosterone formation by oxidative stress and beta-amyloid peptide.

Aromatic hydrocarbon receptor interaction with the retinoblastoma protein potentiates repression of E2F-dependent transcription and cell cycle arrest.

Geldanamycin disrupts platelet-membrane structure, leading to membrane permeabilization and inhibition of platelet aggregation.

Herbimycin A induces G1 arrest through accumulation of p27(Kip1) in cyclin D1-overexpressing fibroblasts.

Effect of five dietary antimutagens on the genotoxicity of six mutagens in the microscreen prophage-induction assay.

Comparison of three in vitro assays at evaluation of IC50 of acetylsalicylic acid, ferrous sulfate, amitriptyline, methanol, isopropanol and ethylene glycol in human cancer cells HeLa.

Enhancement of transport of D-melphalan analogue by conjugation with L-glutamate across bovine brain microvessel endothelial cell monolayers.

Nongenotoxic (epigenetic) carcinogens: pesticides as an example. A critical review.

[Chemical accident in Schönbach--an assessment of the risk to health and environment].

Oxidative stress induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin: an application of oxidative stress markers to cancer risk assessment of dioxins.

Pressure-induced upregulation of preproendothelin-1 and endothelin B receptor expression in rabbit jugular vein in situ : implications for vein graft failure?

Estrogen enhances induction of cytochrome P-4501A1 by 2,3,7, 8-tetrachlorodibenzo-p-dioxin in liver of female Long-Evans rats.

Chronic dietary toxicity and oncogenicity evaluation of MCPA (4-chloro-2-methylphenoxyacetic acid) in rodents.

trans-Activation of PPARalpha and PPARgamma by structurally diverse environmental chemicals.

Estrous cycle patterns of Sprague-Dawley rats during acute and chronic atrazine administration.

Occupational factors for sarcoma subtypes.

Influence of environmental changes on degradation of chiral pollutants in soils.

Associations between stomach cancer incidence and drinking water contamination with atrazine and nitrate in Ontario (Canada) agroecosystems, 1987-1991.

The mammary tumor response in triazine-treated female rats: a threshold-mediated interaction with strain and species-specific reproductive senescence.

Urinary bladder carcinogenicity of dimethylarsinic acid in male F344 rats.

Cigarette smoke induces direct DNA damage in the human B-lymphoid cell line Raji.

Aberrant copper chemistry as a major mediator of oxidative stress in a human cellular model of amyotrophic lateral sclerosis.

A case-control study of non-Hodgkin lymphoma and exposure to pesticides.

Toxicity of selected plant volatiles in microbial and mammalian short-term assays.

Acute basagran poisoning mimicking neuroleptic malignant syndrome.

In vivo micronucleus assays on 2,4-dichlorophenoxyacetic acid and its derivatives.

Ames assays and unscheduled DNA synthesis assays on 2, 4-dichlorophenoxyacetic acid and its derivatives.

Degeneration and gliosis in rat retina and central nervous system following 3,3'-iminodipropionitrile exposure.

Glutathione antagonized cyclophosphamide- and acrolein-induced cytotoxicity of PC3 cells and immunosuppressive actions in mice.

A review of the epidemiology of soft tissue sarcoma.

An evaluation of the carcinogenic potential of the herbicide alachlor to man.

Re-analysis of 2,4-D use and the occurrence of canine malignant lymphoma.

Dimethylarsinic acid effects on DNA damage and oxidative stress related biochemical parameters in B6C3F1 mice.

Hepato-toxic effect of diuron in albino rats.

Liver preneoplastic changes in mice treated with the herbicide fomesafen.

Occupational risk factors for sarcoma subtypes.

An evaluation of the feasibility of using cytogenetic damage as a biomarker for alachlor exposure.

Dioxin exposure and human leukemias and lymphomas. Lessons from the Seveso accident and studies on industrial workers.

A case-control study of non-Hodgkin lymphoma and exposure to pesticides.

Toxicology and carcinogenesis studies of pentachlorophenol in rats.

Selected phenolic compounds in cultivated plants: ecologic functions, health implications, and modulation by pesticides.

[Endocrine disrupting chemicals and carcinogenicity].

A risk characterization for atrazine: oncogenicity profile.

Propanil affects transcriptional and posttranscriptional regulation of IL-2 expression in activated EL-4 cells.

Glutathione-dependent cytotoxicity of the chloroacetanilide herbicides alachlor, metolachlor, and propachlor in rat and human hepatoma-derived cultured cells.

Simazine.

Atrazine.

[Effect of 2,4-D ecotoxicants on spermatogenesis and fertility of albino rats].

Cytotoxic effect of paraquat on rat C6 glioma cells: evidence for the possibility of non-oxidative damage to the cells.

Dose-specific production of chlorinated quinone and semiquinone adducts in rodent livers following administration of pentachlorophenol.

Cytotoxicity of lindane and paraquat to human hepatoma cell lines.

Promoting activity of the herbicide dicamba (2-methoxy-3, 6-dichlorobenzoic acid) in two stage hepatocarcinogenesis.

The early phase of apoptosis in human neuroblastoma CHP100 cells is characterized by lipoygenase-dependent ultraweak light emission.

SODs are involved in the regulation of ICAM-1 expression in human melanoma and endothelial cells.

Effects of dietary dimethylarsinic acid on the urine and urothelium of rats.

Arsenic trioxide selectively induces acute promyelocytic leukemia cell apoptosis via a hydrogen peroxide-dependent pathway.

Loss of heterozygosity in (LewisxF344)F1 rat urinary bladder tumors induced with N-butyl-N-(4-hydroxybutyl)nitrosamine followed by dimethylarsinic acid or sodium L-ascorbate.

In vitro and in vivo comparison between the effects of treatment with adenosine triphosphate and treatment with buthionine sulfoximine on chemosensitization and tumour growth of B16 melanoma.

Evidence for site-specific bioactivation of alachlor in the olfactory mucosa of the Long-Evans rat.

Pentachlorophenol (PCP) produces liver oxidative stress and promotes but does not initiate hepatocarcinogenesis in B6C3F1 mice.

Decreased intracellular superoxide levels activate Sindbis virus-induced apoptosis.

Acrolein causes inhibitor kappaB-independent decreases in nuclear factor kappaB activation in human lung adenocarcinoma (A549) cells.

Generation of reactive oxygen species by human mesothelioma cells.

Regulation of human airway mucins by acrolein and inflammatory mediators.

³²P-postlabelling with high-performance liquid chromatography for analysis of abundant DNA adducts in human tissues.

Alpha, beta-unsaturated aldehydes mediate inducible expression of glutathione S-transferase in hepatoma cells through activation of the antioxidant response element (ARE).

Differential role of ethanol and acetaldehyde in the induction of oxidative stress in HEP G2 cells: effect on transcription factors AP-1 and NF-kappaB.

The p66shc adaptor protein controls oxidative stress response and life span in mammals.

Transendothelial permeability changes induced by free radicals in an in vitro model of the blood-brain barrier.

In vitro metabolism of alachlor by human liver microsomes and human cytochrome P450 isoforms.

Induction of the multispecific organic anion transporter (cMoat/mrp2) gene and biliary glutathione secretion by the herbicide 2,4,5-trichlorophenoxyacetic acid in the mouse liver.

Enzymatic synthesis of 4-amino-3,5-diethylphenyl sulfate, a rodent metabolite of alachlor.

Biotransformation of pentachlorophenol, aniline and biphenyl in isolated rainbow trout (*Oncorhynchus mykiss*) hepatocytes: comparison with in vivo metabolism.

Inhibition of human tumor growth by 2'-hydroxy- and 2'-benzoyloxycinnamaldehydes.

Enhancement of cytotoxicity of hydrogen peroxide by hyperthermia in chinese hamster ovary cells: role of antioxidant defenses.

Reactive oxygen species participate in *mdr1b* mRNA and P-glycoprotein overexpression in primary rat hepatocyte cultures.

Role of 1,N2-propanodeoxyguanosine adducts as endogenous DNA lesions in rodents and humans.

Acrolein cytotoxicity and glutathione depletion in n-3 fatty acid sensitive- and resistant human tumor cells.

Benzo[k]fluoranthene enhancement and suppression of 17beta-estradiol catabolism in MCF-7 breast cancer cells.

The steroid hormone dehydroepiandrosterone inhibits CYP1A1 expression in vitro by a post-transcriptional mechanism.

[Dietary fiber inhibits the incidence of hepatic metastasis with the anti-oxidant activity and portal scavenging functions].

Benzene and non-Hodgkin's lymphoma.

Oxidation of human catalase by singlet oxygen in myeloid leukemia cells.

Occupational exposures and risk of gastric cancer in a population-based case-control study.

Differential temperature dependency of chemical stressors in HSF1-mediated stress response in mammalian cells.

Inhibition of CYP1A1 enzyme activity in mouse hepatoma cell culture by soybean isoflavones.

Pathophysiological mechanisms of TNF during intoxication with natural or man-made toxins.

[Dioxin poisoning: fasting is risky].

Implication of mitochondria-derived reactive oxygen species, cytochrome C and caspase-3 in N-(4-hydroxyphenyl)retinamide-induced apoptosis in cervical carcinoma cells.

Risk of stomach cancer associated with 12 workplace hazards: analysis of death certificates from 24 states of the United States with the aid of job exposure matrices.

Interspecies differences in cancer susceptibility and toxicity.

Antimutagenic effects of centchroman--a contraceptive and a candidate drug for breast cancer in multiple mutational assays.

Antenatal dexamethasone suppresses tumor necrosis factor- α expression in hypoplastic lung in nitrofen-induced diaphragmatic hernia in rats.

Role of HSP90 in mediating cross-talk between the estrogen receptor and the Ah receptor signal transduction pathways.

Inhibition of antioxidants and hyperthermia enhance bleomycin-induced cytotoxicity and lipid peroxidation in Chinese hamster ovary cells.

Geldanamycin induces heat shock protein expression through activation of HSF1 in K562 erythroleukemic cells.

[The intracellular mechanism of NF- κ B activation involved in iNOS and chemokine induction in C6 glioma cells].

The significance of excursions above the ADI: duration in relation to pivotal studies.

In vivo cisplatin resistance depending upon canalicular multispecific organic anion transporter (cMOAT).

Meta-analysis of Hodgkin's disease among farmers.

Quantitative analysis of dose- and time-dependent promotion of four phenotypes of altered hepatic foci by 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats.

Inhibition of BRCA-1 expression by benzo[a]pyrene and its diol epoxide.

Cytotoxicity and aromatase (CYP19) activity modulation by organochlorines in human placental JEG-3 and JAR choriocarcinoma cells.

Modulation of cytochrome P4501A1 activity by ascorbigen in murine hepatoma cells.

Cyclic nucleotide phosphodiesterases (PDE) 3 and 4 in normal, malignant, and HTLV-I transformed human lymphocytes.

[Occupational agents and endocrine function: an update of the experimental and human evidence].

MHC-I-induced apoptosis in human B-lymphoma cells is dependent on protein tyrosine and serine/threonine kinases.

Mutation of beta-catenin is an early event in chemically induced mouse hepatocellular carcinogenesis.

[Small handbook of dioxin et alias].

Characteristics of L-carnitine transport in cultured human hepatoma HLF cells.

Low-dose oral iron absorption test in anaemic patients with and without iron deficiency determined by bone marrow iron content.

Altered bcl-2 family expression during non-genotoxic hepatocarcinogenesis in mice.

Arsenic-related Bowen's disease, palmar keratosis, and skin cancer.

Role of estradiol receptor- α in differential expression of 2,3,7, 8-tetrachlorodibenzo-p-dioxin-inducible genes in the RL95-2 and KLE human endometrial cancer cell lines.

A monoclonal antibody reactive with a 40-kDa molecule on fetal thymocytes and tumor cells blocks proliferation and stimulates aggregation and apoptosis.

Multiple roles of ligand in transforming the dioxin receptor to an active basic helix-loop-helix/PAS transcription factor complex with the nuclear protein Arnt.

F-actin as a functional target for retro-retinoids: a potential role in anhydroretinol-triggered cell death.

Regulation of matrix metalloproteinase-2 (MMP-2) by hepatocyte growth factor/scatter factor (HGF/SF) in human glioma cells: HGF/SF enhances MMP-2 expression and activation accompanying up-regulation of membrane type-1 MMP.

Interactions of nuclear receptor coactivator/corepressor proteins with the aryl hydrocarbon receptor complex.

p44/42 mitogen-activated protein kinase is involved in the expression of ornithine decarboxylase in leukaemia L1210 cells.

Contribution of the nucleoside transport system to doxorubicin transport in HL60 cells but not in mononuclear cells.

Signal transduction-mediated CYP1A1 induction by omeprazole in human HepG2 cells.

PUVA (8-methoxy-psoralen plus ultraviolet A) induces the formation of 8-hydroxy-2'-deoxyguanosine and DNA fragmentation in calf thymus DNA and human epidermoid carcinoma cells.

p27(Kip1) induction and inhibition of proliferation by the intracellular Ah receptor in developing thymus and hepatoma cells.

Role of Ras/ERK-dependent pathway in the erythroid differentiation of K562 cells.

Prevalence of antinuclear antibodies in a rural population.

Secretory phospholipase A2 induces phospholipase C γ -1 activation and Ca²⁺ mobilization in the human astrocytoma cell line 1321N1 by a mechanism independent of its catalytic activity.

Heparin/heparan sulfate interacting protein gene expression is up-regulated in human colorectal carcinoma and correlated with differentiation status and metastasis.

Lipoxin A4: a new class of ligand for the Ah receptor.

[Sodium arsenite selectively inducing apoptosis of G2 + M phase NB4 cells].

Protoporphyrin IX fluorescence kinetics in C6 glioblastoma cells after delta-aminolevulinic acid incubation: effect of a protoporphyrinogen oxidase inhibitor.

Geographical differences of cancer incidence in Costa Rica in relation to environmental and occupational pesticide exposure.

Detoxification of 1-chloro-2,4-dinitrobenzene in MCF7 breast cancer cells expressing glutathione S-transferase P1-1 and/or multidrug resistance protein 1.

BPD-MA-mediated photosensitization in vitro and in vivo: cellular adhesion and beta1 integrin expression in ovarian cancer cells.

4-chloro-m-cresol is a trigger of malignant hyperthermia in susceptible swine.

4-chloro-m-cresol triggers malignant hyperthermia in susceptible swine at doses greatly exceeding those found in drug preparations.

Expression of CYP1A1 and CYP1B1 depends on cell-specific factors in human breast cancer cell lines: role of estrogen receptor status.

Transient nuclear factor kappaB (NF-kappaB) activation stimulated by interleukin-1beta may be partly dependent on proteasome activity, but not phosphorylation and ubiquitination of the IkappaBalpha molecule, in C6 glioma cells. Regulation of NF-kappaB linked to chemokine production.

Cancer, heart disease, and diabetes in workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Antiproliferative and apoptosis-inducing effects of an antitumor glycoprotein from Streptococcus pyogenes.

Delayed acute toxicity of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin (HpCDD), after oral administration, obeys Haber's rule of inhalation toxicology.

Transcriptional up-regulation of matrix metalloproteinase-9 expression during spontaneous epithelial to neuroblast phenotype conversion by SK-N-SH neuroblastoma cells, involved in enhanced invasivity, depends upon GT-box and nuclear factor kappaB elements.

Involvement of tyrosine protein kinase in IFN-gamma-induced human endothelial cell apoptosis.

Toxicity of 3,3',4,4'-tetrachloroazoxybenzene in rats and mice.

Cytoplasmic elongation and rupture in megakaryoblastic leukemia cells via activation of adhesion and motility by staurosporine on fibronectin-bound substratum.

Suppressive effects of alpha-Hederin on 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated murine Cyp1a-1 expression in the mouse hepatoma Hepa-1c1c7 cells.

Estrogen and aryl hydrocarbon responsiveness of ECC-1 endometrial cancer cells.

Toxicity of 3,3',4,4'-tetrachloroazobenzene in rats and mice.

Low levels of p53 are associated with resistance to tetrachlorodibenzo-p-dioxin toxicity in DBA/2 mice.

Influence of phosphotyrosine kinase inhibitors on adhesive properties of highly and poorly metastatic HT-29 colon carcinoma cells to collagen.

Cancer incidence in a cohort of licensed pesticide applicators in Florida.

Occupational chlorophenol exposure and non-Hodgkin's lymphoma.

Heat-shock protein-73 protects against small intestinal warm ischemia-reperfusion injury in the rat.

Serum dioxin and cancer in veterans of Operation Ranch Hand.

Structural and mechanistic aspects of transcriptional induction of cytochrome P450 1A1 by benzimidazole derivatives in rat hepatoma H4IIE cells.

Induction of altered hepatic foci by a mixture of dioxin-like compounds with and without 2,2',4,4',5,5'-hexachlorobiphenyl in female Sprague-Dawley rats.

Flavone antagonists bind competitively with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) to the aryl hydrocarbon receptor but inhibit nuclear uptake and transformation.

Cross-talk between 2,3,7,8-tetrachlorodibenzo-p-dioxin and testosterone signal transduction pathways in LNCaP prostate cancer cells.

Effects of exposure protocols on induction of kinetochore-plus and -minus micronuclei by arsenite in diploid human fibroblasts.

Cytochrome P450 CYP1B1 determines susceptibility to 7,12-dimethylbenz[a]anthracene-induced lymphomas.

Development of a stably transfected estrogen receptor-mediated luciferase reporter gene assay in the human T47D breast cancer cell line.

[Oxidative injury and its defense system in vivo].

Novel phenotype associated with in vivo activated CTL precursors.

Tumor necrosis factor-alpha stimulates attachment of small cell lung carcinoma to endothelial cells.

Establishment of a double Philadelphia chromosome-positive acute lymphoblastic leukemia-derived cell line, TMD5: effects of cytokines and differentiation inducers on growth of the cells.

v-src induces cisplatin resistance by increasing the repair of cisplatin-DNA interstrand cross-links in human gallbladder adenocarcinoma cells.

Decrease in protein tyrosine phosphorylation is associated with F-actin reorganization by retinoic acid in human endometrial adenocarcinoma (RL95-2) cells.

Sodium arsenite enhances copper accumulation in human lung adenocarcinoma cells.

Effective treatment of murine leukemia with antisense poly-2'O-(2,4-dinitrophenyl)-oligoribonucleotides.

Effects of dioxins on human health: a review.

GR-891: a novel 5-fluorouracil acyclonucleoside prodrug for differentiation therapy in rhabdomyosarcoma cells.

Dioxin is a systemic promoter blocker, II.

Oral ferrous sulfate supplements increase the free radical-generating capacity of feces from healthy volunteers.

Isoform-specific induction of a human aldo-keto reductase by polycyclic aromatic hydrocarbons (PAHs), electrophiles, and oxidative stress: implications for the alternative pathway of PAH activation catalyzed by human dihydrodiol dehydrogenase.

Aryl hydrocarbon receptor regulation of ceramide-induced apoptosis in murine hepatoma 1c1c7 cells. A function independent of aryl hydrocarbon receptor nuclear translocator.

Imprinting: perinatal exposures cause the development of diseases during the adult age.

Tryptanthrins and other tryptophan-derived agonists of the dioxin receptor.

Differential response to benzo[A]pyrene in human lung adenocarcinoma cell lines: the absence of aryl hydrocarbon receptor activation.

Human cytochrome P4501A2.

Correlation between the activation of Neu tyrosine kinase and promotion of foci formation induced by selected organochlorine compounds in the MCF-7 model system.

Polychlorophenols and their sodium salts.

Methyl bromide.

Methyl iodide.

Lack of competition of substrates for P-glycoprotein in MCF-7 breast cancer cells overexpressing MDR1.

Some risk factors for non-Hodgkin's lymphoma.

Lung hypoplasia caused by nitrofen is mediated by down-regulation of thyroid transcription factor TTF-1.

Effect of arachidonic acid alone or with prooxidant on aldehyde dehydrogenases in hepatoma cells.

Mortality in a cohort of licensed pesticide applicators in Florida.

Influence of metabolic inhibitors on the intracellular accumulation and retention of adriamycin.

[A new method for the intravital assessment of the functional activity of the membrane transporters performing the efflux of antitumor preparations from the cells of solid tumor specimens].

Dual actions of the metabolic inhibitor, sodium azide on K(ATP) channel currents in the rat CRI-G1 insulinoma cell line.

Genotoxicity of iron compounds in Salmonella typhimurium and L5178Y mouse lymphoma cells.

Poly(ADP ribose) polymerase cleavage precedes neuronal death in the hippocampus and cerebellum following injury to the developing rat forebrain.

A malignant transformation of human cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin exhibits altered expressions of growth regulatory factors.

Diluted mainstream cigarette smoke condensates activate estrogen receptor and aryl hydrocarbon receptor-mediated gene transcription.

Hodgkin's disease, work, and the environment. A review.

On the role of c-Jun in the induction of PAI-1 gene expression by phorbol ester, serum, and IL-1alpha in HepG2 cells.

Ubiquitinated aldolase B accumulates during starvation-induced lysosomal proteolysis.

Biological monitoring of occupational exposure to inorganic arsenic.

Bone marrow stromal cell cytochrome P4501B1 is required for pre-B cell apoptosis induced by 7,12-dimethylbenz[a]anthracene.

Analysis of aryl hydrocarbon receptor-mediated signaling during physiological hypoxia reveals lack of competition for the aryl hydrocarbon nuclear translocator transcription factor.

Primary structure and unusual carbohydrate moiety of functional unit 2-c of keyhole limpet hemocyanin (KLH).

pH-dependent uptake of irinotecan and its active metabolite, SN-38, by intestinal cells.

NTP Toxicology and Carcinogenesis Studies of Triethanolamine (CAS No. 102-71-6) in F344 Rats and B6C3F1 Mice (Dermal Studies).

CCD imaging for optical tomography of gel radiation dosimeters.

Myeloperoxidase-catalyzed redox-cycling of phenol promotes lipid peroxidation and thiol oxidation in HL-60 cells.

Molecular cloning and characterization of a birch pollen minor allergen, Bet v 5, belonging to a family of isoflavone reductase-related proteins.

Effects of environmental estrogens on tumor necrosis factor alpha-mediated apoptosis in MCF-7 cells.

Resveratrol has antagonist activity on the aryl hydrocarbon receptor: implications for prevention of dioxin toxicity.

Photodynamic properties of meta-tetra(hydroxyphenyl)chlorin in human tumor cells.

Development of selective aryl hydrocarbon receptor modulators for treatment of breast cancer.

Adsorption of direct-acting and indirect-acting mutagens by various dietary fibers.

Induction of negative regulators of haematopoiesis in human bone marrow cells by HLA-DR cross-linking.

Anaphylaxis inhibitory factor in IgE-dependent mast cell stimulation.

Participation of different cell types in the restitutive response of the rat liver to periportal injury induced by allyl alcohol.

High-performance liquid chromatographic-fluorescent method to determine chloroacetaldehyde, a neurotoxic metabolite of the anticancer drug ifosfamide, in plasma and in liver microsomal incubations.

NIOSH study of chemical workers bolsters data on dioxin as cancer agent.

Evidence for the involvement of the fatty acid and peroxisomal beta-oxidation pathways in the inhibition by dehydroepiandrosterone (DHEA) and induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and benz(a)anthracene (BA) of cytochrome P4501B1 (CYP1B1) in mouse embryo fibroblasts (C3H10T1/2 cells).

The chemistry of the metabolites of cyclophosphamide.

Effects of TNF-alpha and IL-1beta on iron metabolism by A549 cells and influence on cytotoxicity.

A survey of EPA/OPP and open literature on selected pesticide chemicals. II. Mutagenicity and carcinogenicity of selected chloroacetanilides and related compounds.

Identification of a novel cytosolic tocopherol-binding protein: structure, specificity, and tissue distribution.

Wild-type and Ras-transformed fibroblasts display differential mitogenic responses to transient sodium arsenite exposure.

Inductive and inhibitory effects of non-ortho-substituted polychlorinated biphenyls on estrogen metabolism and human cytochromes P450 1A1 and 1B1.

Role of O6-alkylguanine-DNA alkyltransferase in protecting against cyclophosphamide-induced toxicity and mutagenicity.

Injection of encapsulated cells producing an ifosfamide-activating cytochrome P450 for targeted chemotherapy to pancreatic tumors.

Induction of arylhydrocarbon receptor expression in embryoblast cells of rabbit preimplantation blastocysts upon degeneration of Rauber's polar trophoblast.

Correcting for toxic inhibition in quantification of genotoxic response in the umuC test.

Cytosol-to-lysosome transport of free polymannose-type oligosaccharides. Kinetic and specificity studies using rat liver lysosomes.

Repression of dioxin signal transduction in fibroblasts. Identification Of a putative repressor associated with Arnt.

p120(ctn) acts as an inhibitory regulator of cadherin function in colon carcinoma cells.

Photo-oxidative killing of human colonic cancer cells using indocyanine green and infrared light.

Factors influencing elevation of intracellular Ca²⁺ in the MCF-10A human mammary epithelial cell line by carcinogenic polycyclic aromatic hydrocarbons.

Dietary intrinsic phytate protects colon from lipid peroxidation in pigs with a moderately high dietary iron intake.

Pasteurella haemolytica leukotoxin and endotoxin induced cytokine gene expression in bovine alveolar macrophages requires NF-kappaB activation and calcium elevation.

Uncouplers of oxidative phosphorylation can enhance a Fas death signal.

Water-soluble 2,3,7,8-tetrachlorodibenzo-p-dioxin complex with human alpha-fetoprotein: properties, toxicity in vivo and antitumor activity in vitro.

Aromatic hydrocarbon nuclear translocator as a common component for the hypoxia- and dioxin-induced gene expression.

Cross-talk between the aryl hydrocarbon receptor and hypoxia inducible factor signaling pathways. Demonstration of competition and compensation.

NTP Toxicology and Carcinogenesis Studies of Pentachlorophenol (CAS NO. 87-86-5) in F344/N Rats (Feed Studies).

ECC-1 human endometrial cells as a model system to study dioxin disruption of steroid hormone function.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-mediated membrane translocation of c-Src protein kinase in liver WB-F344 cells.

Subcellular localization of meta-tetra (hydroxyphenyl) chlorin in human tumor cells subjected to photodynamic treatment.

Ethanol modulation of intestinal epithelial tight junction barrier.

Interferon-gamma alone triggers the production of nitric oxide from serum-starved BNL CL.2, murine embryonic liver cells.

Modulation of excision repair cross complementation group 1 (ERCC-1) mRNA expression by pharmacological agents in human ovarian carcinoma cells.

Synergism of energy starvation and dextran-conjugated doxorubicin in the killing of multidrug-resistant KB carcinoma cells.

Characterization of the dose-response of CYP1B1, CYP1A1, and CYP1A2 in the liver of female Sprague-Dawley rats following chronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Induction of collagenase-3 (MMP-13) expression in human skin fibroblasts by three-dimensional collagen is mediated by p38 mitogen-activated protein kinase.

Quantitative differences in the active-site hydrophobicity of five human glutathione S-transferase isoenzymes: water-soluble carcinogen-selective properties of the neoplastic GSTP1-1 species.

Potential alterations in gene expression associated with carcinogen exposure in *Mya arenaria*.

[Genetic algorithms in 3D-QSAR: Predicting the toxicity of dibenzodioxins, dibenzofurans and biphenyls].

Uncertainty in risk characterization of weak carcinogens.

Uncertainty in estimating exposure using a toxicokinetic model. The example of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Possible involvement of a chloride-bicarbonate exchanger in apoptosis of endothelial cells and cardiomyocytes.

The lack of AHD4 induction by TCDD in corneal cells may involve tissue-specific regulatory proteins.

Experimental studies on the stem cell concept of liver regeneration. II.

Ah receptor and NF-kappaB interactions, a potential mechanism for dioxin toxicity.

Promotion of NCI-Black-Reiter male rat bladder carcinogenesis by dimethylarsinic acid an organic arsenic compound.

Primary hepatic angiosarcoma: report of a case involving environmental arsenic exposure.

Molecular approaches to evaluate pollutants.

DNA damaging effects of pesticides measured by the single cell gel electrophoresis assay (comet assay) and the chromosomal aberration test, in CHOK1 cells.

Chronic dietary toxicity study on 2,4-dichlorophenoxybutyric acid in the dog.

Chronic dietary toxicity/oncogenicity studies on 2,4-dichlorophenoxybutyric acid in rodents.

Incidence rates of lymphomas and environmental measurements of phenoxy herbicides: ecological analysis and case-control study.

Postservice mortality of US Air Force veterans occupationally exposed to herbicides in Vietnam: 15-year follow-up.

The nature of antioxidant defense mechanisms: a lesson from transgenic studies.

Occupational chlorophenol exposure and soft tissue sarcoma risk among men aged 30-60 years.

Urinary excretion and pharmacokinetics of acrolein and its parent drug cyclophosphamide in bone marrow transplant patients.

Lack of mammalian mutagenicity of the potent bacterial mutagen tris(2,3-dibromopropyl) phosphate and its metabolite 2-bromoacrolein.

Involvement of oxidative stress in paraquat-induced metallothionein synthesis under glutathione depletion.

Re: "Cancer mortality in workers exposed to phenoxy herbicides, chlorophenols, and dioxins. An expanded and updated international cohort study".

[Solid waste and its effect on health (review)].

[Hygienic significance of environmental accumulation of dioxin (review)].

Second follow-up of a Dutch cohort occupationally exposed to phenoxy herbicides, chlorophenols, and contaminants.

Synthesis and in vitro cytotoxicity of cinnamaldehydes to human solid tumor cells.

Rubrobramide, a cytotoxic and phytotoxic metabolite from *Cladobotyrum rubrobrunnescens*.

[Morphologic findings in liver tissue in mice after long-term administration of the herbicide fomesafan].

Blood lipid concentrations of dioxins and furans in a sample of BASF employees included in the IARC registry of workers exposed to phenoxy acid herbicides and/or chlorophenols.

Cancer incidence in Danish phenoxy herbicide workers, 1947-1993.

Exposure to Agent Orange and occurrence of soft-tissue sarcomas or non-Hodgkin lymphomas: an ongoing study in Vietnam.

Inorganic and methylated arsenic compounds induce cell death in murine macrophages via different mechanisms.

The clastogenic potential of triazine herbicide combinations found in potable water supplies.

Dimethylarsinic acid, a main metabolite of inorganic arsenics, has tumorigenicity and progression effects in the pulmonary tumors of A/J mice.

[An Italian multicenter case-control study on malignant neoplasms of the hematolymphopoietic system. Hypothesis and preliminary results on work-related risks. WILL (Working Group on Hematolymphopoietic Malignancies in Italy)].

Aneuploidy induced by dimethylarsinic acid in mouse bone marrow cells.

Augmentation of allergic reactions by several pesticides.

Agent Orange in war medicine: an aftermath myth.

Kaposi's sarcoma in dog with acquired immunodeficiency after phosphate poisoning.

Cytoplasmic liver cell inclusions--a typical feature of porphyria cutanea tarda--are absent in porphyria-related hepatic neoplasias.

Thermally oxidized dietary fat and colon carcinogenesis in rodents.

Extraperoxisomal targets of peroxisome proliferators: mitochondrial, microsomal, and cytosolic effects. Implications for health and disease.

Alpha,beta-unsaturated aldehydes increase glutathione S-transferase mRNA and protein: correlation with activation of the antioxidant response element.

Prognostic factors for mortality in nasopharyngeal cancer: accounting for time-dependence of relative risks.

Cytokine-mediated induction of ceramide production is redox-sensitive. Implications to proinflammatory cytokine-mediated apoptosis in demyelinating diseases.

Role of tumor necrosis factor-alpha in regulating fibrotic lung repair.

Excretion kinetics of ifosfamide side-chain metabolites in children on continuous and short-term infusion.

Cytotoxic metabolites produced by a fungal strain from a Sargassum alga.

Quantitative cancer risk assessment for dioxins using an occupational cohort.

Exposure to dioxin and nonneoplastic mortality in the expanded IARC international cohort study of phenoxy herbicide and chlorophenol production workers and sprayers.

S-oxygenation of thiourea results in the formation of genotoxic products.

[Peroxisomes and peroxisome proliferators. Specific environmental poisons and therapeutic agents affecting lipid metabolism and hormone release].

Inhibitory effect of pentachlorophenol on gap junctional intercellular communication in rat liver epithelial cells in vitro.

Dependence of aldehyde dehydrogenase-mediated oxazaphosphorine resistance on soluble thiols: importance of thiol interactions with the secondary metabolite acrolein.

Effect of 3-aminotriazole on anchorage independence and mutagenicity in cadmium- and lead-treated diploid human fibroblasts.

Effect of arsenosugar ingestion on urinary arsenic speciation.

Activation of hepatic NF-kappaB by the herbicide Dicamba (2-methoxy-3,6-dichlorobenzoic acid) in female and male rats.

Ah receptor agonists as endocrine disruptors: antiestrogenic activity and mechanisms.

Resveratrol inhibits transcription of CYP1A1 in vitro by preventing activation of the aryl hydrocarbon receptor.

Peptide modification or blocking of CD8, resulting in weak TCR signaling, can activate CTL for Fas- but not perforin-dependent cytotoxicity or cytokine production.

Experimental study of oxidative DNA damage.

Expression of mucin-associated sulfo-Lea carbohydrate epitopes on human colon carcinoma cells.

Mechanistic modeling of rodent liver tumor promotion at low levels of exposure: an example related to dose-response relationships for 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Association between diesel exposure at work and prostate cancer.

Role of heparan sulphate proteoglycans in the regulation of human lactoferrin binding and activity in the MDA-MB-231 breast cancer cell line.

Determination of the enzymes responsible for activation of the heterocyclic amine 2-amino-3-methylimidazo[4,5-f]quinoline in the human breast.

Environmental complex mixture toxicity assessment.

Suppressive effects of estradiol on 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated transcriptional activation of murine Cyp1a-1 in mouse hepatoma Hepa 1c1c7 cells.

Hepatocyte extracellular matrix modulates expression of growth factors and growth factor receptors in human colon cancer cells.

Mechanism of action of the nongenotoxic peroxisome proliferators: role of the peroxisome proliferator-activator receptor alpha.

Phosphine-induced oxidative stress in Hepa 1c1c7 cells.

Correlation analysis of pesticide use data and cancer incidence rates in California counties.

PKC and tyrosine kinase involvement in amyloid beta (25-35)-induced chemotaxis of microglia.

Induction of cytochrome P-450 1A1 by omeprazole in human HepG2 cells is protein tyrosine kinase-dependent and is not inhibited by alpha-naphthoflavone.

Zoxazolamine-induced paralysis in two rat substrains: differences in hepatic drug metabolism.

Carbaryl, a carbamate insecticide, is a ligand for the hepatic Ah (dioxin) receptor.

Solid waste and pancreatic cancer: an ecologic study in Florida, USA.

Molecular and functional aspects of the hairless (hr) gene in laboratory rodents and humans.

Validation and application of a rapid in vitro assay for assessing the estrogenic potency of halogenated phenolic chemicals.

Occupational risk factors for cancer of the gastric cardia. Analysis of death certificates from 24 US states.

Quantitation of CD38 expression using QuantiBRITE beads.

Lipopolysaccharide-induced desensitization of junB gene expression in a mouse macrophage-like cell line, P388D1.

Claims based on exposure to ionizing radiation (prostate cancer and any other cancer)--VA. Final rule.

Dose-response relationships in chemical carcinogenesis: superposition of different mechanisms of action, resulting in linear-nonlinear curves, practical thresholds, J-shapes.

Regulated Co-translational ubiquitination of apolipoprotein B100. A new paradigm for proteasomal degradation of a secretory protein.

ZAP-70 tyrosine kinase is required for LFA-1-dependent T cell migration.

Case-control study of occupational exposures and male breast cancer.

Isolation of a variant which has reduced Src activity from SH-SY5Y neuroblastoma cells.

[Dioxins: current knowledge about health effects].

Regulation of cytochrome P450 enzymes by aryl hydrocarbon receptor in human cells: CYP1A2 expression in the LS180 colon carcinoma cell line after treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin or 3-methylcholanthrene.

Interactive effects of three structurally different polychlorinated biphenyls in a rat liver tumor promotion bioassay.

Prenatal TCDD and predisposition to mammary cancer in the rat.

Stimulation of the stress-induced expression of stress proteins by curcumin in cultured cells and in rat tissues in vivo.

Establishment of a simple cleanup procedure and bioassay for determining 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity equivalents of environmental samples.

12-O-tetradecanoylphorbol-13-acetate upregulates the Ah receptor and differentially alters CYP1B1 and CYP1A1 expression in MCF-7 breast cancer cells.

Binding of the epoxide cryptophycin analog, LY355703 to albumin and its effect on in vitro antiproliferative activity.

Activation of the Ah receptor by tryptophan and tryptophan metabolites.

Aryl hydrocarbon receptor-mediated antiestrogenicity in MCF-7 cells: modulation of hormone-induced cell cycle enzymes.

Calcium-dependent nitric oxide production is involved in arsenite-induced micronuclei.

Agricultural use of DDT and risk of non-Hodgkin's lymphoma: pooled analysis of three case-control studies in the United States.

Meta-analyses of non-Hodgkin's lymphoma and farming.

Alterations in the growth factor signal transduction pathways and modulators of the cell cycle in endocervical cells from macaques exposed to TCDD.

Mode of carcinogenic action of pesticides inducing thyroid follicular cell tumors in rodents.

The Ah receptor is not involved in 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated apoptosis in human leukemic T cell lines.

P-selectin mediates adhesion of the human melanoma cell line NKI-4: identification of glycoprotein ligands.

Effect of curcumin on the aryl hydrocarbon receptor and cytochrome P450 1A1 in MCF-7 human breast carcinoma cells.

Benzo[a]pyrene enhances the formation of 8-hydroxy-2'-deoxyguanosine by ultraviolet A radiation in calf thymus DNA and human epidermoid carcinoma cells.

Cyclosporin A increases resting mitochondrial membrane potential in SY5Y cells and reverses the depressed mitochondrial membrane potential of Alzheimer's disease cybrids.

Activation of MMP-2 by human GCT23 giant cell tumour cells induced by osteopontin, bone sialoprotein and GRGDSP peptides is RGD and cell shape change dependent.

Manganese uptake and release by cultured human hepato-carcinoma (Hep-G2) cells.

Role of tyrosine phosphorylation in leptin activation of ATP-sensitive K⁺ channels in the rat insulinoma cell line CRI-G1.

Role for beta2-microglobulin in echovirus infection of rhabdomyosarcoma cells.

Atherosclerotic risks from chemicals: part II. A RASH analysis of in vitro and in vivo bioassay data to evaluate 45 potentially hazardous compounds.

Suppression of multidrug resistance via inhibition of heat shock factor by quercetin in MDR cells.

A novel response to dioxin. Induction of ecto-ATPase gene expression.

Functional and physical interactions between the estrogen receptor Sp1 and nuclear aryl hydrocarbon receptor complexes.

Effect of vitamin C on androgen independent prostate cancer cells (PC3 and Mat-Ly-Lu) in vitro: involvement of reactive oxygen species-effect on cell number, viability and DNA synthesis.

Alterations of signal transduction pathways involved in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced malignant transformation of human cells in culture.

Effect of dichloroacetic acid and trichloroacetic acid on DNA methylation in liver and tumors of female B6C3F1 mice.

Occupational exposures, animal exposure and smoking as risk factors for hairy cell leukaemia evaluated in a case-control study.

Suppression of decorin expression and partial induction of anchorage-independent growth by the v-src oncogene in human fibroblasts.

A novel dosage approach for evaluation of SMANCS [poly-(styrene-co-maleyl-half-n-butylate) - neocarzinostatin] in the treatment of primary hepatocellular carcinoma.

Tyrosine kinase inhibitors suppress N-type and T-type Ca²⁺ channel currents in NG108-15 cells.

Stressor-specific enhancement of hsp induction by low doses of stressors in conditions of self- and cross-sensitization.

Interferon-alpha and -gamma inhibit the growth and neoplastic potential of v-src-transformed human epithelial cells by reducing Src tyrosine kinase activity.

[Immunotoxicology in occupational and environmental medicine: prospectives, limitations, and research objectives].

Intracellular Signal-transducing elements involved in transendothelial migration of lymphoma cells.

Transgene expression kinetics after transfection with cationic phosphonolipids in hematopoietic non adherent cells.

Induction of cytokine-induced neutrophil chemoattractant in response to various stresses in rat C6 glioma cells.

Mechanism of sodium arsenite-mediated induction of heme oxygenase-1 in hepatoma cells. Role of mitogen-activated protein kinases.

Interference between progesterone and dioxin signal transduction pathways. Different mechanisms are involved in repression by the progesterone receptor A and B isoforms.

Effect of *Rehmannia glutinosa* on immediate type allergic reaction.

Dual action of CD30 antigen: anti-CD30 antibody induced apoptosis and interleukin-8 secretion in Ki-1 lymphoma cells.

Flow cytometric measurement of mitochondrial mass and function: a novel method for assessing chemoresistance.

Animal models of human response to dioxins.

An IARC evaluation of polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans as risk factors in human carcinogenesis.

Some aspects of the etiology of non-Hodgkin's lymphoma.

Estimation of the cumulated exposure to polychlorinated dibenzo-p-dioxins/furans and standardized mortality ratio analysis of cancer mortality by dose in an occupationally exposed cohort.

The Seveso studies on early and long-term effects of dioxin exposure: a review.

Activation of tissue-factor gene expression in breast carcinoma cells by stimulation of the RAF-ERK signaling pathway.

Endogenous antioxidant enzymes and glutathione S-transferase in protection of mesothelioma cells against hydrogen peroxide and epirubicin toxicity.

Protein kinase C activity is required for aryl hydrocarbon receptor pathway-mediated signal transduction.

Aryl hydrocarbon receptor-dependent suppression by 2,3,7, 8-tetrachlorodibenzo-p-dioxin of IgM secretion in activated B cells.

Induction of 16 α -/2-hydroxyestrone metabolite ratios in MCF-7 cells by pesticides, carcinogens, and antiestrogens does not predict mammary carcinogens.

Herbimycin A accelerates the induction of apoptosis following etoposide treatment or gamma-irradiation of bcr/abl-positive leukaemia cells.

Detection of P450c17-independent pathways for dehydroepiandrosterone (DHEA) biosynthesis in brain glial tumor cells.

Power and sample size for stratified prospective studies using the score method for testing relative risk.

Role of altered arachidonic acid metabolism in 2,3,7, 8-tetrachlorodibenzo-p-dioxin-induced immune suppression in C57Bl/6 mice.

Levels and membrane localization of the c-K-ras p21 protein in lungs of mice of different genetic strains and effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and Aroclor 1254.

Cellular stimulation via CD95 involves activation of phospho-inositide-3-kinase.

Tyrosine kinase-dependent modulation of 3-hydroxy-3-methylglutaryl-CoA reductase in human breast adenocarcinoma SKBR-3 cells.

Overexpression and activation of the tyrosine kinase Src in human pancreatic carcinoma.

Dioxin exposure and non-malignant health effects: a mortality study.

The dose-response model for dioxin.

Cancer chemopreventive and therapeutic activities of red ginseng.

Differential expression of CYP1A1 and CYP1B1 in human breast epithelial cells and breast tumor cells.

Differential induction of Cyp1a1, Cyp1b1, Ahd4, and Nmo1 in murine skin tumors and adjacent normal epidermis by ligands of the aryl hydrocarbon receptor.

Aryl hydrocarbon receptor-inducible or constitutive expression of human UDP glucuronosyltransferase UGT1A6.

Heregulin beta1 induces the down regulation and the ubiquitin-proteasome degradation pathway of p185HER2 oncoprotein.

Protein kinase C-dependent tyrosine phosphorylation of p130cas in differentiating neuroblastoma cells.

Role of protein tyrosine phosphorylation in etoposide-induced apoptosis and NF-kappa B activation.

Cross-resistance to methotrexate and metals in human cisplatin-resistant cell lines results from a pleiotropic defect in accumulation of these compounds associated with reduced plasma membrane binding proteins.

Induction of hydrogen peroxide production and Bax expression by caspase-3(-like) proteases in tyrosine kinase inhibitor-induced apoptosis in human small cell lung carcinoma cells.

Activation of beta1 integrin signaling stimulates tyrosine phosphorylation of p190RhoGAP and membrane-protrusive activities at invadopodia.

[Risk assessment of dioxins and the effect as the endocrine disrupters].

Protein profiles and identification of high performance liquid chromatography isolated proteins of cancer cell lines using matrix-assisted laser desorption/ionization time-of-flight mass spectrometry.

Induction of cellular processes containing collagenase and retinoid by integrin-binding to interstitial collagen in hepatic stellate cell culture.

Preparation of a conjugate of mitomycin C and anti-neural cell adhesion molecule monoclonal antibody for specific chemotherapy against biliary tract carcinoma.

2,3,7,8-Tetrachlorodibenzo-p-dioxin co-stimulates staphylococcal enterotoxin beta (SEB) cytokine production and phenotypic cell cycling in Long-Evans rats.

Chromosome aberrations in vitro related to cytotoxicity of nonmutagenic chemicals and metabolic poisons.

Environmental and occupational aspects on the etiology of non-Hodgkin's lymphoma.

Chemical warfare agents: estimating oral reference doses.

Role of glutathione in cisplatin resistance in osteosarcoma cell lines.

Porphyria and porphyrinology--the past fifteen years.

Endothelial cell intracellular Ca²⁺ concentration is increased upon breast tumor cell contact and mediates tumor cell transendothelial migration.

Effects of some persistent halogenated environmental contaminants on aromatase (CYP19) activity in the human choriocarcinoma cell line JEG-3.

Modulation of ovarian follicle maturation and effects on apoptotic cell death in Holtzman rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in utero and lactationally.

Possible role of nitric oxide in IgE-mediated allergic cutaneous reaction in mice.

Xenoendocrine disrupters: laboratory studies on male reproductive effects.

2,3,7,8-Tetrachlorodibenzo-p-dioxin suppresses apoptosis and leads to hyperphosphorylation of p53 in rat hepatocytes.

Presence of intestinal, liver and heart/adipocyte fatty-acid-binding protein types in the liver of a chimaera fish.

Reactive oxygen species activate focal adhesion kinase, paxillin and p130cas tyrosine phosphorylation in endothelial cells.

Current approaches toward chemical mixture studies at the National Institute of Environmental Health Sciences and the U.S. National Toxicology Program.

Bone marrow stromal cells constitutively express high levels of cytochrome P4501B1 that metabolize 7,12-dimethylbenz[a]anthracene.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazoxybenzene (CAS No. 21232-47-3) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazobenzene (CAS No. 14047-09-7) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

Cytochrome P450 1B1: a major P450 isoenzyme in human blood monocytes and macrophage subsets.

Down-regulation of cytochrome P450 1A1 gene promoter by oxidative stress. Critical contribution of nuclear factor 1.

Effect of glutathione depletion and metallothionein gene expression on arsenic-induced cytotoxicity and c-myc expression in vitro.

Effect of herbimycin A on tyrosine kinase receptors and platelet derived growth factor (PDGF)-induced signal transduction.

Lipopolysaccharide-induced NF-kappaB activation in human endothelial cells involves degradation of I-kappaBalpha but not I-kappaBbeta.

CD40-mediated signal transduction in human airway smooth muscle.

Up-regulation of tissue inhibitor of metalloproteinases-3 gene expression by TGF-beta in articular chondrocytes is mediated by serine/threonine and tyrosine kinases.

Modulatory effects of melatonin on genotoxic response of reference mutagens in the Ames test and the comet assay.

Type I collagen influence on gene expression in UMR106-06 osteoblast-like cells is inhibited by genistein.

Regulation of adenylyl cyclase activity in human peripheral blood mononuclear cells: effects of protein kinase inhibitors and of a calcium ionophore.

Zonal location of compensatory hepatocyte proliferation following chemically induced hepatotoxicity in rats and humans.

Induction of UDP-glycosyltransferase family 1 genes in rat liver: different patterns of mRNA expression with two inducers, 3-methylcholanthrene and beta-naphthoflavone.

Cyclophosphamide cystitis as a model of visceral pain in rats: a c-fos and Krox-24 study at telencephalic levels, with a note on pituitary adenylate cyclase activating polypeptide (PACAP).

Nonresponsiveness to 2,3,7,8-tetrachlorodibenzo-p-dioxin of transforming growth factor beta1 and CYP 1A1 gene expression in rat liver fat-storing cells.

Regulation of apoptosis in mouse hepatocytes and alteration of apoptosis by nongenotoxic carcinogens.

A direct interaction between the aryl hydrocarbon receptor and retinoblastoma protein. Linking dioxin signaling to the cell cycle.

Apoptosis, reproductive failure, and oxidative stress in Chinese hamster ovary cells with compromised genomic integrity.

Cytochrome P450 catalyzed oxidation of monochlorobenzene, 1,2- and 1,4-dichlorobenzene in rat, mouse, and human liver microsomes.

Modulation of Hepatocyte Gene Expression by the Carcinogen Benzo[a]pyrene.

AH receptor, ARNT, glucocorticoid receptor, EGF receptor, EGF, TGF alpha, TGF beta 1, TGF beta 2, and TGF beta 3 expression in human embryonic palate, and effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Expression of CYP1B1 but not CYP1A1 by primary cultured human mammary stromal fibroblasts constitutively and in response to dioxin exposure: role of the Ah receptor.

Differences in kinetics of induction and reversibility of TCDD-induced changes in cell proliferation and CYP1A1 expression in female Sprague-Dawley rat liver.

Detection of CYP1A1 protein in human liver and induction by TCDD in precision-cut liver slices incubated in dynamic organ culture.

Hepatic stellate cells (vitamin A-storing cells) change their cytoskeleton structure by extracellular matrix components through a signal transduction system.

p38 mitogen-activated protein kinase inhibition attenuates intercellular adhesion molecule-1 up-regulation on human pulmonary microvascular endothelial cells.

Species- and sex-related differences in metabolism of trichloroethylene to yield chloral and trichloroethanol in mouse, rat, and human liver microsomes.

Hepatocyte growth factor-induced expression of ornithine decarboxylase, c-met, and c-myc is differently affected by protein kinase inhibitors in human hepatoma cells HepG2.

Pp125FAK is required for stretch dependent morphological response of endothelial cells.

Aryl hydrocarbon receptor activation in genital tubercle, palate, and other embryonic tissues in 2,3,7, 8-tetrachlorodibenzo-p-dioxin-responsive lacZ mice.

The cellular stress response increases measles virus-induced cytopathic effect.

Thietanium ion formation from the food mutagen 2-chloro-4-(methylthio)butanoic acid.

Handling of doxorubicin by the LLC-PK1 kidney epithelial cell line.

Suppression of immunoglobulin E-mediated anaphylactic reaction by Hwanglyun-Haedok-Tang water extract.

Mycobacterium tuberculosis mannose-capped lipoarabinomannan can induce NF-kappaB-dependent activation of human immunodeficiency virus type 1 long terminal repeat in T cells.

Metabolism of 17-(allylamino)-17-demethoxygeldanamycin (NSC 330507) by murine and human hepatic preparations.

Characterization of CYP1B1 and CYP1A1 expression in human mammary epithelial cells: role of the aryl hydrocarbon receptor in polycyclic aromatic hydrocarbon metabolism.

Inflammatory cytokines (IL-1alpha, TNF-alpha) and LPS modulate the Ca²⁺ signaling pathway in osteoblasts.

Suppression of C/EBPalpha and induction of C/EBPbeta by 2,3,7,8-tetrachlorodibenzo-p-dioxin in mouse adipose tissue and liver.

Uptake of doxorubicin by cultured kidney epithelial cells LLC-PK1.

p53 mutations in cyclophosphamide-associated bladder cancer.

Interleukin 1beta and interleukin 6, but not tumor necrosis factor alpha, inhibit insulin-stimulated glycogen synthesis in rat hepatocytes.

Tyrosine phosphatase-dependent/tyrosine kinase-independent induction of nuclear factor-kappa B by tumor necrosis factor-alpha: effects on prostaglandin endoperoxide synthase-2 mRNA accumulation.

Cortactin-Src kinase signaling pathway is involved in N-syndecan-dependent neurite outgrowth.

Buprenorphine hydrochloride induces apoptosis in NG108-15 nerve cells.

Impact of dioxin-type induction of drug-metabolizing enzymes on the metabolism of endo- and xenobiotics.

Involvement of reactive oxygen species, protein kinase C, and tyrosine kinase in prostaglandin E2 production in Balb/c 3T3 mouse fibroblast cells by quinolone phototoxicity.

Female Sprague-Dawley rats exposed to a single oral dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin exhibit sustained depletion of aryl hydrocarbon receptor protein in liver, spleen, thymus, and lung.

Involvement of calcium and arachidonate metabolism in acetylated-low-density-lipoprotein-stimulated tumor-necrosis-factor-alpha production by rat peritoneal macrophages.

Tumor necrosis factor-alpha regulates the gene expression of macrophage migration inhibitory factor through tyrosine kinase-dependent pathway in 3T3-L1 adipocytes.

Isolation of a novel metabolizing system enriched in phase-II enzymes for short-term genotoxicity bioassays.

Biological characterization of human fibroblast-derived mitogenic factors for human melanocytes.

Peroxidation of membrane lipids and oxidative DNA damage by fumonisin B1 in isolated rat liver nuclei.

Sulfotransferase-mediated genotoxicity of propane 2-nitronate in cultured ovine seminal vesicle cells.

Aryl hydrocarbon receptor-associated genes in rat liver: regional coinduction of aldehyde dehydrogenase 3 and glutathione transferase Ya.

1,N2-propanodeoxyguanosine adducts: potential new biomarkers of smoking-induced DNA damage in human oral tissue.

Risk assessment of low-level chemical exposures from consumer products under the U.S. Consumer Product Safety Commission chronic hazard guidelines.

Interleukin 1 beta and tumour necrosis factor alpha inhibit acid secretion in cultured rabbit parietal cells by multiple pathways.

Comparison of liver progenitor cells in human atypical ductular reactions with those seen in experimental models of liver injury.

Mixed effects of 2,6-dithiopurine against cyclophosphamide mediated bladder and lung toxicity in mice.

Comparative toxicology of borates.

Inhibition of 5,9-dimethyldibenzo[c,g]carbazole-DNA adduct formation in mouse liver by pretreatment with cytochrome P4501A inducers in vivo.

Use of c-Src and c-Fos knockout mice for the studies on the role of c-Src kinase signaling in the expression of toxicity of TCDD.

Modulation of 2,6-dinitrotoluene genotoxicity by alachlor treatment of Fischer 344 rats.

p53 protein expression in peripheral lymphocytes from atrazine chronically intoxicated rats.

Promotion of rat hepatocarcinogenesis by dimethylarsinic acid: association with elevated ornithine decarboxylase activity and formation of 8-hydroxydeoxyguanosine in the liver.

Chemically reactive intermediates and pulmonary xenobiotic toxicity.

Hemotoxicity of chlorpropham (CIPC) in F344 rats.

A review of epidemiologic studies of triazine herbicides and cancer.

Triazine herbicide exposure and breast cancer incidence: an ecologic study of Kentucky counties.

Metabolism-dependent activation and toxicity of chemicals in nasal glands.

Relationships between cell density, glutathione and proliferation of A549 human lung adenocarcinoma cells treated with acrolein.

Peroxisome proliferators increase the formation of BPDE-DNA adducts in isolated rat hepatocytes.

Glutathione peroxidase and catalase modulate the genotoxicity of arsenite.

Re: "Exposure to polychlorinated dioxins and furans (PCDD/F) and mortality in a cohort of workers from a herbicide-producing plant in Hamburg, Federal, Republic of Germany".

An approach for modeling noncancer dose responses with an emphasis on uncertainty.

A case-control study of lung cancer among Vietnam veterans.

The immunomodulatory effects of the herbicide propanil on murine macrophage interleukin-6 and tumor necrosis factor-alpha production.

Cancer mortality in workers exposed to phenoxy herbicides, chlorophenols, and dioxins. An expanded and updated international cohort study.

Update of cancer surveillance of veterans in Massachusetts, USA.

Possible carcinogenic potential of dimethylarsinic acid as assessed in rat in vivo models: a review.

Inhibitory effect of 3,4-dichloro-propionaniline on cytokine production by macrophages is associated with LPS-mediated signal transduction.

Pesticides and cancer.

Influence of benzo[a]phenothiazines on the element content of two tobacco tissue cultures differing in hormone requirement.

The inhibitory effect of selenium on induction of tetraploidy by dimethylarsinic acid in Chinese hamster cells.

Meta-analyses of prostate cancer and farming.

Upper respiratory tract surface areas and volumes of laboratory animals and humans: considerations for dosimetry models.

DNA-protein cross-links produced by various chemicals in cultured human lymphoma cells.

Human and experimental toxicology.

Commentary on the publication: Evaluation of the potential carcinogenicity and genetic toxicity to humans of the herbicide acetochlor.

Striking the balance between the role of animal model and human data in hazard assessment.

In vitro cytotoxic effects of 4,4'-bipyridyl on normal human keratinocytes.

Enhanced cytotoxicity of alkyl viologens and N,N'-diamino analogs toward cultured murine leukemia L1210 cells under vortex-stirring with a high molecular weight polyacrylic acid.

Analyses of exposure to polychlorinated dibenzo-p-dioxins, furans, and hexachlorocyclohexane and different health outcomes in a cohort of former herbicide-producing workers in Hamburg, Germany.

Inhibition of intracellular Ca²⁺ signalling, cytotoxicity and antitumor activity of the herbicide oryzalin and its analogues.

[Case-control study of hemo-lymphopoietic neoplasms and exposure to pesticides in western Liguria].

Dimethylarsinic acid treatment alters six different rat biochemical parameters: relevance to arsenic carcinogenesis.

Comparative ³²P-postlabeling analysis of exogenous and endogenous DNA adducts in mouse skin exposed to a wood-preserving waste extract, a complex mixture of polycyclic and polychlorinated chemicals.

¹H NMR investigation of toxic effects of lindane and paraquat on Hep 3B and Hep G2 human hepatoma cell lines.

Inhibition of the genotoxic effects of heterocyclic amines in human derived hepatoma cells by dietary bioantimutagens.

Induction of glutathione depletion, p53 protein accumulation and cellular transformation by tetrachlorohydroquinone, a toxic metabolite of pentachlorophenol.

Regulation of human apolipoprotein A-I gene expression by gramoxone.

Transgenerational effects of maternal exposure to chemicals on the functional development of the brain in the offspring.

Inhibition of sulfotransferase affecting in vivo genotoxicity and DNA adducts induced by safrole in rat liver.

Antioxidant defense system in differentially hydrogen peroxide sensitive L5178Y sublines.

Butylated hydroxyanisole and its metabolite tert-butylhydroquinone differentially regulate mitogen-activated protein kinases. The role of oxidative stress in the activation of mitogen-activated protein kinases by phenolic antioxidants.

Carcinogens in spacecraft air.

Identification of enzymes involved in the metabolism of atrazine, terbuthylazine, ametryne, and terbutryne in human liver microsomes.

[Study of magnetic microspheres for purging cancer cells from bone marrow. II. Preparation of polystyrene magnetic microspheres.].

High-performance liquid chromatographic determination of acrolein as a marker for cyclophosphamide bioactivation in human liver microsomes.

Hydrogen peroxide (H₂O₂) increases the steady-state mRNA levels of collagenase/MMP-1 in human dermal fibroblasts.

A suppressive role of p125FAK protein tyrosine kinase in hydrogen peroxide-induced apoptosis of T98G cells.

Inhibition of telomerase activity by PKC inhibitors in human nasopharyngeal cancer cells in culture.

Mustard oil and garlic extract as inhibitors of sodium arsenite-induced chromosomal breaks in vivo.

Sustained increase in intracellular free calcium and activation of cyclooxygenase-2 expression in mouse hepatoma cells treated with dioxin.

Signal transduction-mediated activation of the aryl hydrocarbon receptor in rat hepatoma H4IIE cells.

Failure of monochloroacetic acid and trichloroacetic acid administered in the drinking water to produce liver cancer in male F344/N rats.

Entacapone, a novel catechol-O-methyltransferase inhibitor for Parkinson's disease, does not impair mitochondrial energy production.

Transforming growth factor-beta1 coregulates mRNA expression of aryl hydrocarbon receptor and cell-cycle-regulating genes in human cancer cell lines.

GDNF-induced neurite formation was stimulated by protein kinase inhibitors and suppressed by Ras inhibitors.

Heat shock protein induction by certain chemical stressors is correlated with their cytotoxicity, lipophilicity and protein-denaturing capacity.

Carcinogens stimulate intrachromosomal homologous recombination at an endogenous locus in human diploid fibroblasts.

Induction and prevention of squamous transformation of bronchial epithelial cells by phenolic compounds.

Abrogation of IL-3 requirements and stimulation of hematopoietic cell proliferation in vitro and in vivo by carboxylic acids.

Studies on the relationship between estrogen receptor content, glutathione S-transferase pi expression, and induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin and drug resistance in human breast cancer cells.

Induction of p53 protein expression by sodium arsenite.

Down-regulation of major histocompatibility complex Q1b gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Sodium arsenite disturbs mitosis and induces chromosome loss in human fibroblasts.

A collagen peptide motif activates tyrosine kinase-dependent calcium signalling pathways in human osteoblast-like cells.

Estrogenic tamoxifen derivatives: categorization of intrinsic estrogenicity in MCF-7 cells.

Thiol modulation inhibits the interleukin (IL)-1-mediated activation of an IL-1 receptor-associated protein kinase and NF-kappa B.

Activation induces apoptosis in Herpesvirus saimiri-transformed T cells independent of CD95 (Fas, APO-1).

Mortality study of pesticide applicators and other employees of a lawn care service company.

Household pesticides and risk of pediatric brain tumors.

Pancreatic carcinomas deposit laminin-5, preferably adhere to laminin-5, and migrate on the newly deposited basement membrane.

Promotion of enzyme altered foci in female rat 2,3,3',4,4',5-hexachlorobiphenyl.

Dioxin exposure and cancer risk: a 15-year mortality study after the "Seveso accident".

Evidence for protein dolichylation.

Mutational evidence for control of cell adhesion through integrin diffusion/clustering, independent of ligand binding.

Role of nitroreductases but not cytochromes P450 in the metabolic activation of 1-nitropyrene in the HepG2 human hepatoblastoma cell line.

The role of NAD(P)H:quinone oxidoreductase in quinone-mediated p21 induction in human colon carcinoma cells.

Possible involvement of rapamycin-sensitive pathway in Bcl-2 expression in human neuroblastoma SH-SY5Y cells.

Dissociation of LPA-induced cytoskeletal contraction from stress fiber formation by differential localization of RhoA.

Aryl hydrocarbon receptor-dependent induction of cyp1a1 by bilirubin in mouse hepatoma hepa 1c1c7 cells.

Increased efficacy of in vitro Photofrin photosensitization of human oral squamous cell carcinoma by iron and ascorbate.

Hepatic foci in rats after diethylnitrosamine initiation and 2,3,7,8-tetrachlorodibenzo-p-dioxin promotion: evaluation of a quantitative two-cell model and of CYP 1A1/1A2 as a dosimeter.

The epidemiology of soft tissue sarcoma.

Aryl hydrocarbon (Ah) nonresponsiveness in estrogen receptor-negative MDA-MB-231 cells is associated with expression of a variant arnt protein.

Gallium nitrate optic neuropathy.

Association of arsenic-induced malignant transformation with DNA hypomethylation and aberrant gene expression.

Study of the enzymatic transformation of fluorescently labeled oligosaccharides in human epidermoid cells using capillary electrophoresis with laser-induced fluorescence detection.

2,3,7,8-Tetrachlorodibenzo-p-dioxin increases mRNA levels for interleukin-1beta, urokinase plasminogen activator, and tumor necrosis factor-alpha in human uterine endometrial adenocarcinoma RL95-2 cells.

[4-chloro-m-cresol-induced contractures of skeletal muscle specimen from patients at risk for malignant hyperthermia].

Inhibition of pp60c-src protein kinase by herbimycin A in polyomavirus middle tumor antigen-transformed cells.

[Acute myeloblastic leukemia showing pronounced skin infiltration during administration of low-dose cytarabine and etoposide with granulocyte colony-stimulating factor].

Chemopreventive and growth inhibitory effects of selenium.

4-Chloro-m-cresol test--a possible supplementary test for diagnosis of malignant hyperthermia susceptibility.

Induction of apoptosis in megakaryocytic leukemia cell lines by MX2, a morpholino anthracycline.

Effects of the protein tyrosine kinase inhibitor, herbimycin A, on prolactin gene expression in GH3 and 235-1 pituitary tumor cells.

Differential effects on TNF alpha production by pharmacological agents with varying molecular sites of action.

Mechanism of photosensitization of glioblastoma and neuroblastoma cells by merocyanine 540: a lipid peroxidation study.

Dioxin is a promoter blocker, a promoter, and a net anticarcinogen.

Effects of antitumor agents on 3H-2-deoxyglucose uptake in tumor cells and their relationship with the main targets of the antitumor agents.

Serum beta-carotene level, arsenic methylation capability, and incidence of skin cancer.

Activity and inducibility of drug-metabolizing enzymes in immortalized hepatocyte-like cells (mhPKT) derived from a L-PK/Tag1 transgenic mouse.

Effect of vitamin C on prostate cancer cells in vitro: effect on cell number, viability, and DNA synthesis.

Carrier effects of dosing the H4IIE cells with 3,3',4,4'-tetrachlorobiphenyl (PCB77) in dimethyl sulfoxide or isooctane.

Mechanisms involved in Helicobacter pylori-induced interleukin-8 production by a gastric cancer cell line, MKN45.

Mitochondrial proliferation and paradoxical membrane depolarization during terminal differentiation and apoptosis in a human colon carcinoma cell line.

Tumor-specific expression of cytochrome P450 CYP1B1.

Modulation of cytochrome P450 by 5,5'-bis-trifluoromethyl-2,2'-dichlorobiphenyl, a unique environmental contaminant.

Non-Hodgkin's lymphoma in homosexual men in the San Francisco Bay Area: occupational, chemical, and environmental exposures.

Membrane-bound protein disulfide isomerase (PDI) is involved in regulation of surface expression of thiols and drug sensitivity of B-CLL cells.

Classification of malignant hyperthermia-equivocal patients by 4-chloro-M-cresol.

Brief communication: childhood leukemia in a residential small town near Barcelona.

Tyrosine phosphorylation is required for ehrlichial internalization and replication in P388D1 cells.

Antimitotic intervention with colchicine alters the outcome of o-DCB-induced hepatotoxicity in Fischer 344 rats.

Cytosolic Ca²⁺ and protein kinase Calpha couple cellular metabolism to membrane K⁺ permeability in a human biliary cell line.

Induction of cytochrome P450 1B1 and catechol estrogen metabolism in ACHN human renal adenocarcinoma cells.

Inhibition of poly(ADP-ribose) polymerase by arsenite.

Relative genotoxic potency of arsenic and its methylated metabolites.

Arsenic alters cytosine methylation patterns of the promoter of the tumor suppressor gene p53 in human lung cells: a model for a mechanism of carcinogenesis.

Spontaneous and induced sister chromatid exchanges and delayed cell proliferation in peripheral lymphocytes of Bowen's disease patients and matched controls of arseniasis-hyperendemic villages in Taiwan.

Cytogenetic effects in human exposure to arsenic.

Arsenic can mediate skin neoplasia by chronic stimulation of keratinocyte-derived growth factors.

Carcinogenic polycyclic aromatic hydrocarbons increase intracellular Ca²⁺ and cell proliferation in primary human mammary epithelial cells.

Downregulation of aryl hydrocarbon receptor function and cytochrome P450 1A1 induction by expression of Ha-ras oncogenes.

P-Cresol, a uremic compound, enhances the uptake of aluminum in hepatocytes.

PET imaging of brain tumor with [methyl-11C]choline.

Mortality among Army Chemical Corps Vietnam veterans.

Inhibition of protein tyrosine kinases or protein kinase C prevents nonspecific killer T lymphocyte-mediated tumoricidal activity.

Beta 2-integrin-mediated signal up-regulates counterreceptor ICAM-1 expression on human monocytic cell line THP-1 through tyrosine phosphorylation.

Identification of a motif within the 5' regulatory region of pS2 which is responsible for AP-1 binding and TCDD-mediated suppression.

The multidrug-resistant human lung tumour cell line, DLKP-A10, expresses novel drug accumulation and sequestration systems.

Mutational activation of pp60(c-src) leads to a tumorigenic phenotype in a preneoplastic Syrian hamster embryo cell line.

Regulation of dioxin receptor function by omeprazole.

Some peculiarities of hepatobiliary diseases in Vietnam.

Determination of 3D dose distribution from intracavitary brachytherapy of cervical cancer by MRI of irradiated ferrous sulphate gel.

Helicobacter pylori stimulates granulocyte-macrophage colony-stimulating factor (GM-CSF) production from cultured antral biopsies and a human gastric epithelial cell line.

CD40-triggered protein tyrosine phosphorylation on Vav and on phosphatidylinositol 3-kinase correlates with survival of the Ramos-Burkitt lymphoma B cell line.

Induction of human endothelial cell apoptosis requires both heat shock and oxidative stress responses.

Role of cytochrome P450 enzyme induction in the metabolic activation of benzo[c]phenanthrene in human cell lines and mouse epidermis.

Mechanism of inhibition of MDA-MB-468 breast cancer cell growth by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Cell adhesion molecules and insulin-like growth factor-1 in vascular disease.

Tyrosine kinase signaling pathways control the expression of retinoic acid receptor-alpha in SK-BR-3 breast cancer cells.

Murine Cyp1a-1 induction in mouse hepatoma Hepa-1C1C7 cells by myristicin.

Functional link between tyrosine phosphorylation and human serotonin transporter gene expression.

Detection of peroxisome proliferators using a reporter construct derived from the rat acyl-CoA oxidase promoter in the rat liver cell line H-4-II-E.

Sodium butyrate decreases histamine-stimulated calcium mobilization in C6 glioma cells.

Altered intracellular distribution of daunorubicin in immature acute myeloid leukemia cells.

The carboxyl-terminal region of factor IX is essential for its secretion.

A novel cytoplasmic protein that interacts with the Ah receptor, contains tetratricopeptide repeat motifs, and augments the transcriptional response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Mechanisms, proof, and unmet needs: the perspective of a cancer activist.

Environmental effects and aquatic organisms: investigations of molecular mechanisms of carcinogenesis.

Activation of mitogenic signaling by endothelin 1 in ovarian carcinoma cells.

Establishment of a novel human acute myeloblastic leukemia cell line (YNH-1) with t(16;21), t(1;16) and 12q13 translocations.

Cancer mortality among rice growers in Novara Province, northern Italy.

Involvement of altered B7 expression in dioxin immunotoxicity: B7 transfection restores the CTL but not the autoantibody response to the P815 mastocytoma.

Cancer risk assessment using blood dioxin levels and daily dietary TEQ intake in general populations of industrial and non-industrial countries.

Protein phosphatase in neuroblastoma cells: [3H]cantharidin binding site in relation to cytotoxicity.

AML1a but not AML1b inhibits erythroid differentiation induced by sodium butyrate and enhances the megakaryocytic differentiation of K562 leukemia cells.

Synthesis and antiproliferative and antiviral activity of carbohydrate-modified pyrrolo[2,3-d]pyridazin-7-one nucleosides.

Functional characterization of a distinct ryanodine receptor mutation in human malignant hyperthermia-susceptible muscle.

The vav proto-oncogene product (p95vav) interacts with the Tyk-2 protein tyrosine kinase.

Benzo(a)pyrene, but not 2,3,7,8-tetrachlorodibenzo-p-dioxin, alters cell proliferation and c-myc and growth factor expression in human placental choriocarcinoma JEG-3 cells.

Myogenin expression is necessary for commitment to differentiation and is closely related to src tyrosine kinase activity in quail myoblasts transformed with Rous sarcoma virus.

[Complete remission achieved by L-asparaginase, vincristine and prednisolone (LVP) therapy in secondary leukemia (M5a type) with an MLL gene rearrangement].

Expression of CYP1B1 in human adult and fetal tissues and differential inducibility of CYP1B1 and CYP1A1 by Ah receptor ligands in human placenta and cultured cells.

Human NAD(P)H:quinone oxidoreductase induction in human hepatoma cells after exposure to industrial acrylates, phenolics, and metals.

Oxygen- and dioxin-regulated gene expression in mouse hepatoma cells.

Inhibition of estrogen-induced activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the MCF-7 human breast cancer and other cell lines transfected with vitellogenin A2 gene promoter constructs.

Sulfated sialyl Lewis X, the putative L-selectin ligand, detected on endothelial cells of high endothelial venules by a distinct set of anti-sialyl Lewis X antibodies.

Effects of the tyrosine-kinase inhibitor geldanamycin on ligand-induced Her-2/neu activation, receptor expression and proliferation of Her-2-positive malignant cell lines.

Cytokines (IL-1beta and TNFalpha) in relation to biochemical and immunological effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in rats.

Serum dioxin levels in Seveso, Italy, population in 1976.

Interactions between 2,3,7,8-TCDD and PCBs as tumor promoters: limitations of TEFs.

Pesticide prioritization for a brain cancer case-control study.

Dioxins and the Ah receptor: probes to uncover processes in neuroendocrine development.

Dosimeter gel and MR imaging for verification of calculated dose distributions in clinical radiation therapy.

Regulation of the release of tumour necrosis factor (TNF)alpha and soluble TNF receptor by gamma irradiation and interferon gamma in Ewing's sarcoma/peripheral primitive neuroectodermal tumour cells.

Effect of subchronic 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure on immune system and target gene responses in mice: calculation of benchmark doses for CYP1A1 and CYP1A2 related enzyme activities.

Rheology of rat basophilic leukemia cells.

Detection of hyperdiploidy and breakage affecting the 1cen-1q12 region of cultured interphase human lymphocytes treated with various genotoxic agents.

Organochlorine exposure and risk for breast cancer.

Interactions of TCDD with signal transduction and neoplastic development in c-myc transgenic and TGF-alpha transgenic mice.

Digestive tract neoplasms among employees with past exposure to brominated dioxins.

Mortality and cancer incidence among sawmill workers exposed to chlorophenolate wood preservatives.

Low molecular weight proteins secreted by peritoneal macrophages obtained from 2,3,7,8-tetrabromodibenzo-p-dioxin-treated NMRI mice.

Mechanism of thiazopyr-induced effects on thyroid hormone homeostasis in male Sprague-Dawley rats.

A novel energy dependent mechanism reducing daunorubicin accumulation in acute myeloid leukemia.

Multiple myeloma: clusters, clues, and dioxins.

Oxidative and chemical stress mimic insulin by selectively inhibiting the expression of phosphoenolpyruvate carboxykinase in hepatoma cells.

Modification of hepatic drug-metabolizing enzymes in rats treated with alkyl sulfides.

Mineral trioxide aggregate stimulates a biological response in human osteoblasts.

Transcriptional regulation of inducible nitric oxide synthase in cultured neonatal rat cardiac myocytes.

Evidence that the multidrug resistance protein (MRP) functions as a co-transporter of glutathione and natural product toxins.

Comparison of hexachlorocyclohexane-induced oxidative stress in the testis of immature and adult rats.

Glypican-3 is a binding protein on the HepG2 cell surface for tissue factor pathway inhibitor.

Preliminary assessment of PCB risks to human and ecological health in the lower Passaic River.

Aging and oxygen toxicity: Relation to changes in melatonin.

Synergy between cisplatin and an inhibitor of S-adenosylmethionine dependent transmethylation in human ovarian adenocarcinoma cells.

Loss of teratogenic response to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice lacking the Ah (dioxin) receptor.

Enhancement of plasminogen binding and fibrinolysis by chloropectin I.

Purification and partial structural characterization of a fatty acid-binding protein from the liver of the South American armadillo *Chaetophractus villosus*.

Increased focal adhesion kinase- and urokinase-type plasminogen activator receptor-associated cell signaling in endothelial cells exposed to asbestos.

The oncofetal J28 epitope involves fucosylated O-linked oligosaccharide structures of the fetopancinar pancreatic protein.

Metabolism of 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) by human cytochrome P4501B1.

Tyrosine phosphorylation modulates current amplitude and kinetics of a neuronal voltage-gated potassium channel.

The role of Src kinase in the potentiation by ethanol of cytokine- and endotoxin-mediated nitric oxide synthase expression in rat hepatocytes.

Impairment of respiration and oxidative phosphorylation by redox cyclers 2-nitrosofluorene and menadione.

Gadolinium chloride reduces cytochrome P450: relevance to chemical-induced hepatotoxicity.

Involvement of the dorsal paratrigeminal nucleus in visceral pain-related phenomena.

Transport mechanisms of idarubicin, an anthracycline derivative, in human leukemia HL60 cells and mononuclear cells, and comparison with those of its analogs.

Immunochemical, 32P-postlabeling, and GC/MS detection of 4-aminobiphenyl-DNA adducts in human peripheral lung in relation to metabolic activation pathways involving pulmonary N-oxidation, conjugation, and peroxidation.

Down-regulation of gap junctional intercellular communication between osteoblastic MC3T3-E1 cells by basic fibroblast growth factor and a phorbol ester (12-O-tetradecanoylphorbol-13-acetate).

Induction in human osteoblastic cells (SaOS2) of the early response genes fos, jun, and myc by the amino terminal fragment (ATF) of urokinase.

Inhibition of protein kinase C prevents asbestos-induced c-fos and c-jun proto-oncogene expression in mesothelial cells.

A pharmacokinetic analysis of interspecies extrapolation in dioxin risk assessment.

Transcriptional regulation of N-acetylglucosaminyltransferase V by the src oncogene.

Cellular response to the redox active lipid peroxidation products: induction of glutathione S-transferase P by 4-hydroxy-2-nonenal.

Induction of estradiol 2-hydroxylase activity in MCF-7 human breast cancer cells by pesticides and carcinogens.

Inhibition of calcium accumulation by the sarcoplasmic reticulum: a putative mechanism for the cardiotoxicity of adriamycin.

Aniline and its metabolites generate free radicals in yeast.

Cytokine gene expression during ontogeny in murine thymus on activation of the aryl hydrocarbon receptor by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Regulation of expression of the human heme oxygenase-1 gene in transfected chick embryo liver cell cultures.

Integrin stimulation regulates polymorphonuclear leukocytes inflammatory cytokine expression.

Study of arsenic mutagenesis using the plasmid shuttle vector pZ189 propagated in DNA repair proficient human cells.

Cytochrome P450 3A4 mediated metabolism of 2,4-dichlorophenol.

Resazurin reduction as a function of respiratory burst in bovine neutrophils.

Mobilization of iron from neoplastic cells by some iron chelators is an energy-dependent process.

International body says dioxin is a human carcinogen.

Effects of TCDD on Ah receptor, ARNT, EGF, and TGF-alpha expression in embryonic mouse urinary tract.

Changes in barrier function of a model intestinal epithelium by intraepithelial lymphocytes require new protein synthesis by epithelial cells.

Characterization of the H4IIE rat hepatoma cell bioassay for evaluation of environmental samples containing polynuclear aromatic hydrocarbons (PAHs).

Interleukin-2 increases intracellular glutathione levels and reverses the growth inhibiting effects of cyclophosphamide on B16 melanoma cells.

Reassessment of the carcinogenicity of polychlorinated biphenyls (PCBs).

Can skin cancer in humans be prevented by alleviation of oxidative stress?

Role of tyrosine kinase enzymes in TNF-alpha and IL-1 induced expression of ICAM-1 and VCAM-1 on human umbilical vein endothelial cells.

Diaminonaphthalenes and related aminocompounds: mutagenicity, CYP1A induction and interaction with the Ah receptor.

The ability to alter the gap junction protein expression outside GST-P positive foci in liver of rats was associated to the tumour promotion potency of different polychlorinated biphenyls.

Scientists challenge EPA methods for assessing dioxin cancer risk.

Effects of cyclophosphamide and ifosfamide on neuroblastoma cells before and after activation by microsomes.

Murine hepatic p53, RB, and CDK inhibitory protein expression following acute 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure.

The relative susceptibility of animals and humans to the carcinogenic hazard posed by exposure to 2,3,7,8-TCDD: an analysis using standard and internal measures of dose.

Neutrophil-mediated activation of mitoxantrone to metabolites which form adducts with DNA.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on tumor necrosis factor (TNF) production by peritoneal cells.

How knockout mouse lines will be used to study the role of drug-metabolizing enzymes and their receptors during reproduction and development, and in environmental toxicity, cancer, and oxidative stress.

Effects of acute and chronic arsenic exposure of human-derived keratinocytes in an In Vitro human skin equivalent system: a novel model of human arsenicism.

Metabolites of arsenic induced tetraploids and mitotic arrest in cultured cells.

A benzo[a]pyrene-induced cell cycle checkpoint resulting in p53-independent G1 arrest in 3T3 fibroblasts.

Active efflux of the free acid form of the fluorescent dye 2',7'-bis(2-carboxyethyl)-5(6)-carboxyfluorescein in multidrug-resistance-protein-overexpressing murine and human leukemia cells.

[Environmental pollutants with hormonal effects. Is estrogen theory a good model?].

Metabolic activation and DNA-adducts detection as biomarkers of chlorinated pesticide exposures.

Tumor necrosis factor beta is a major source of antibody-activated effector cells in the killing of virally infected target cells.

[Modulation of respiratory activity of renal macrophages in sea bass (*Dicentrarchus labrax*) by chronic exposure to sublethal concentration of ammonia].

DNA adduct formation in primary mouse embryo cells induced by 7H-dibenzo[c,g]carbazole and its organ-specific carcinogenic derivatives.

Selected lesions of dioxin in laboratory rodents.

Urinary excretion of ifosfamide, 4-hydroxyifosfamide, 3- and 2-dechloroethylifosfamide, mesna, and dimesna in patients on fractionated intravenous ifosfamide and concomitant mesna therapy.

Promoting effects of dimethylarsinic acid on N-butyl-N-(4-hydroxybutyl)nitrosamine-induced urinary bladder carcinogenesis in rats.

In vivo percutaneous absorption of acetochlor in the rhesus monkey: dose-response and exposure risk assessment.

Chronic dietary toxicity/oncogenicity studies on 2,4-dichlorophenoxyacetic acid in rodents.

Mutagenicity of cobalt and reactive oxygen producers.

Differential effect of peroxisome proliferators on rat glutathione S-transferase isoenzymes.

Studies on the basis for the toxicity of acrolein mercapturates.

Agent orange and the risk of gestational trophoblastic disease in Vietnam.

Evaluation of the potential carcinogenicity and genetic toxicity to humans of the herbicide acetochlor.

Cancer incidence among alachlor manufacturing workers.

Mode of action of thyroid tumor formation in the male Long-Evans rat administered high doses of alachlor.

Hierarchical cluster analysis of environmental pollutants through P450 induction in cultured hepatic cells.

Co-recombinogenic and anti-mutagenic effects of diethylhexylphthalate, inactiveness of pentachlorophenol in the spot test with mice.

Evaluation of mortality and cancer incidence among alachlor manufacturing workers.

Effect of atrazine on ovarian function in the rat.

Cancer mortality in German male workers exposed to phenoxy herbicides and dioxins.

Oxidative DNA damage and cell proliferation in the livers of B6C3F1 mice exposed to pentachlorophenol in their diet.

Exposure to dimethylarsinic acid, a main metabolite of inorganic arsenics, strongly promotes tumorigenesis initiated by 4-nitroquinoline 1-oxide in the lungs of mice.

Mortality among workers at two triazine herbicide manufacturing plants.

Endogenous production of DNA adducts.

Detection of 1, N2-propanodeoxyguanosine adducts as potential endogenous DNA lesions in rodent and human tissues.

Genotoxic effects of pesticides.

The effect of a herbicide--sodium salt of 2,4-dichlorophenoxyacetic acid on guerin carcinoma.

DNA damage induced in mouse tissues by organic wood preserving waste extracts as assayed by 32P-postlabeling.

Endocrine modulation of reproduction.

Effect of trivalent and pentavalent arsenic in causing chromosome alterations in cultured Chinese hamster ovary (CHO) cells.

Inhibition of glutathione S-transferase activity in human melanoma cells by alpha,beta-unsaturated carbonyl derivatives. Effects of acrolein, cinnamaldehyde, citral, crotonaldehyde, curcumin, ethacrynic acid, and trans-2-hexenal.

Mortality in a cohort of pentachlorophenol manufacturing workers, 1940-1989.

Increased expression of neuronal nitric oxide synthase in bladder afferent pathways following chronic bladder irritation.

The w/w+ somatic mutation and recombination test (SMART) of *Drosophila melanogaster* for detecting reactive oxygen species: characterization of 6 strains.

Increased activity and sensitivity of mitochondrial respiratory enzymes to tumor necrosis factor alpha-mediated inhibition is associated with increased cytotoxicity in drug-resistant leukemic cell lines.

Cancer incidence in the rural community of Tecumseh, Michigan: a pattern of increased lymphopietic neoplasms.

Kinetics of the reaction of a potential chemopreventive agent, 2,6-dithiopurine, and its major metabolite, 2,6-dithiouric acid, with multiple classes of electrophilic toxicants.

Identification of a novel growth-promoting factor with a wide target cell spectrum from various tumor cells as catalase.

Transfection of human cytochrome P-450 reductase cDNA and its effect on the sensitivity to toxins.

Assessment of the role of the glutathione and pentose phosphate pathways in the protection of primary cerebrocortical cultures from oxidative stress.

The direct effect of hepatic peroxisome proliferators on rat Leydig cell function in vitro.

Failure of chloro-S-triazine-derived compounds to induce estrogen receptor-mediated responses in vivo and in vitro.

Oxidative DNA lesions in V79 cells mediated by pentachlorophenol metabolites.

ATP depletion affects the phosphorylation state, ligand binding, and nuclear transport of the 4 S polycyclic aromatic hydrocarbon-binding protein in rat hepatoma cells.

Heparan sulfate proteoglycans play a dual role in regulating fibroblast growth factor-2 mitogenic activity in human breast cancer cells.

[Toxicologic risk assessment and prevention: rational and irrational approaches].

Different pathways in irritant contact eczema? Early differences in the epidermal elemental content and expression of cytokines after application of 2 different irritants.

Effects of the stress response in septic rats and LPS-stimulated alveolar macrophages: evidence for TNF-alpha posttranslational regulation.

Enforced expression of Bcl-XS induces differentiation and sensitizes chronic myelogenous leukemia-blast crisis K562 cells to 1-beta-D-arabinofuranosylcytosine-mediated differentiation and apoptosis.

Oxidative DNA damage induced by activation of polychlorinated biphenyls (PCBs): implications for PCB-induced oxidative stress in breast cancer.

Tetrahydrobiopterin biosynthesis enhanced by lipopolysaccharide stimulation in murine neuroblastoma cell line N1E-115.

Functional CD40 ligand expressed by human blood dendritic cells is up-regulated by CD40 ligation.

Active transport of glutathione S-conjugate in human colon adenocarcinoma cells.

Possible role of arachidonic acid in stress-induced cytochrome P450IA1 activity.

The beneficial effect of taurine on the prevention of human endothelial cell death.

A lipid A analog inhibits LPS-induced cytokine expression and improves survival in endotoxemic mice.

Bioassay for determining 2,3,7,8-tetrachlorodibenzo-p-dioxin equivalents (TEs) in human hepatoma HepG2 cells.

Dioxin induces transcription of fos and jun genes by Ah receptor-dependent and -independent pathways.

Ah-receptor-dependent modulation of gene expression by aged and diluted sidestream cigarette smoke.

12-Lipoxygenase in A431 cells: genetic identity, modulation of expression, and intracellular localization.

Tyrosine phosphorylation is crucial for growth signaling by tissue inhibitors of metalloproteinases (TIMP-1 and TIMP-2).

Differences in inducibility of CYP1A1-mRNA by benzimidazole compounds between human and mouse cells: evidences of a human-specific signal transduction pathway for CYP1A1 induction.

Incidence rates of leukemias, lymphomas and myelomas in Italy: geographic distribution and NHL histotypes.

Increased concentrations of octachlorodibenzo-p-dioxin in cases with breast cancer--results from a case-control study.

Arsenic induces interleukin-8 expression in cultured keratinocytes.

Oxidative modification of low-density lipoprotein by the human hepatoma cell line HepG2.

Functional interference between hypoxia and dioxin signal transduction pathways: competition for recruitment of the Arnt transcription factor.

Activation of the Ras signaling pathway by the CD40 receptor.

Inhibitors of anchorage-independent growth affect the growth of transformed cells on poly(2-hydroxyethyl methacrylate)-coated surfaces.

A 100-kDa protein tyrosine phosphorylation is concurrent with beta 1 integrin-mediated morphological differentiation in neuroblastoma and small cell lung cancer cells.

Inhibition of TC-1 cytokine production, effector cytotoxic T lymphocyte development and alloantibody production by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Undersulfation of glycosaminoglycans reduces the proliferation of a leukemia cell line in vitro.

Cause specific mortality and cancer incidence among employees exposed to 2,3,7,8-TCDD after a 1953 reactor accident.

Chemical-activated luciferase gene expression (CALUX): a novel in vitro bioassay for Ah receptor active compounds in sediments and pore water.

Farming, pesticide use and hairy-cell leukemia.

Fulminant malignant hyperthermia associated with ketoacidotic diabetic coma.

Use of four-colour flow cytometry to evaluate conjugate formation between human peripheral blood mononuclear cells and tumour target cells.

Correlation between selected environmental exposures and karyotype in acute myelocytic leukemia.

Mimosine blocks cell cycle progression by chelating iron in asynchronous human breast cancer cells.

Identification of a cell-specific transcription activation domain within the human Ah receptor nuclear translocator.

Inhibition of prolactin receptor gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin in MCF-7 human breast cancer cells.

Monoclonal antibody to single-stranded DNA is a specific and sensitive cellular marker of apoptosis.

Mechanisms of colon cancer binding to substratum and cells.

Ormaplatin resistance is associated with decreased accumulation of its platinum (II) analogue, dichloro(D,L-trans)1,2-diaminocyclohexaneplatinum (II).

Cytokine-induced nitric oxide synthase gene transcription is blocked by the heat shock response in human liver cells.

An effect of K-ras gene mutation on epidermal growth factor receptor signal transduction in PANC-1 pancreatic carcinoma cells.

4-Chloro-m-cresol: a specific tool to distinguish between malignant hyperthermia-susceptible and normal muscle.

Complementation of Ah receptor deficiency in hepatoma cells: negative feedback regulation and cell cycle control by the Ah receptor.

Activation of mitogen activated protein kinase in dolichyl phosphate-induced apoptosis in U937 cells.

Squalene inhibits sodium arsenite-induced sister chromatid exchanges and micronuclei in Chinese hamster ovary-K1 cells.

Inhibition of HSP70 expression by calcium ionophore A23187 in human cells. An effect independent of the acquisition of DNA-binding activity by the heat shock transcription factor.

Implication of tyrosine kinases and protein kinase C in dimethyl sulfoxide-induced apoptosis.

Transport mechanisms of anthracycline derivatives in human leukemia cell lines: uptake of pirarubicin, daunorubicin and doxorubicin by K562 and multidrug-resistant K562/ADM cells.

Herbimycin A, a tyrosine kinase inhibitor, impairs hypercalcemia associated with a human squamous cancer producing interleukin-6 in nude mice.

Case control study of neuroblastoma in west-Germany after the Chernobyl accident.

Cancer incidence and specific occupational exposures in the Swedish leather tanning industry: a cohort based case-control study.

Comparative effects of the metabolic inhibitors 2,4-dinitrophenol and iodoacetate on mouse neuroblastoma cells in vitro.

Target cell-induced apoptosis of interleukin-2-activated human natural killer cells: roles of cell surface molecules and intracellular events.

Physical and functional association between GADD153 and CCAAT/enhancer-binding protein beta during cellular stress.

Intracellular glutathione level modulates the induction of apoptosis by delta 12-prostaglandin J2.

Chemical exposures, medical history, and risk of squamous and basal cell carcinoma of the skin.

Antioxidants inhibit the enhancement of malignant cell transformation induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on insulin-induced responses in MCF-7 human breast cancer cells.

CD28-dependent killing by human YT cells requires phosphatidylinositol 3-kinase activation.

Osteopontin activation of c-src in human melanoma cells requires the cytoplasmic domain of the integrin alpha v-subunit.

Uroporphyrin accumulation associated with cytochrome P4501A induction in fish hepatoma cells exposed to aryl hydrocarbon receptor agonists, including 2,3,7,8-tetrachlorodibenzo-p-dioxin and planar chlorobiphenyls.

Arsenic and chromium enhance transformation of bovine papillomavirus DNA-transfected C3H/10T1/2 cells.

Characterization of the molecular and structural properties of the transformed and nuclear aryl hydrocarbon (Ah) receptor complexes by proteolytic digestion.

Purification and characterization of a protein that permits early detection of lung cancer. Identification of heterogeneous nuclear ribonucleoprotein-A2/B1 as the antigen for monoclonal antibody 703D4.

Dioxin and cancer: the never-ending story.

Effect of herbimycin A on renal cancer cell growth.

Quantitative analysis of enzyme-altered liver foci in rats initiated with diethylnitrosamine and promoted with 2,3,7,8-tetrachlorodibenzo-p-dioxin or 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin.

Modeling the number and size of hepatic focal lesions following exposure to 2,3,7,8-TCDD.

The aromatic hydrocarbon receptor modulates the Hepa 1c1c7 cell cycle and differentiated state independently of dioxin.

Cytochromes P450 (CYP) in the *Poeciliopsis lucida* hepatocellular carcinoma cell line (PLHC-1): dose- and time-dependent glucocorticoid potentiation of CYP1A induction without induction of CYP3A.

Substituted flavones as aryl hydrocarbon (Ah) receptor agonists and antagonists.

Indole-3-carbinol and diindolylmethane as aryl hydrocarbon (Ah) receptor agonists and antagonists in T47D human breast cancer cells.

Detection of human papillomavirus type-16 DNA utilising microtitre-plate based amplification reactions and a solid-phase enzyme-immunoassay detection system.

Protein-tyrosine kinases activate while protein-tyrosine phosphatases inhibit L-type calcium channel activity in pituitary GH3 cells.

Exogenous catalase may potentiate oxidant-mediated lung injury in the female Sprague-Dawley rat.

Factors influencing the development of sigmoid colon cancer. Bacteriologic and biochemical studies.

DNA binding by the heterodimeric Ah receptor. Relationship to dioxin-induced CYP1A1 transcription in vivo.

Dietary garlic extract in modifying clastogenic effects of inorganic arsenic in mice: two-generation studies.

Circulating interleukin-2 receptors are a group of multimeric proteins with immunoreactivity for interleukin-2 receptor alpha, beta, and gamma chains.

Synthesis of [¹¹C-methyl]-alpha-aminoisobutyric acid (AIB).

Comparison of Ah receptor-mediated luciferase and ethoxyresorufin-O-deethylase induction in H4IIE cells: implications for their use as bioanalytical tools for the detection of polyhalogenated aromatic hydrocarbons.

Incidence and time trends for lymphomas, leukemias and myelomas: hypothesis generation. Working Group on the Epidemiology of Hematolymphopoietic Malignancies in Italy.

Genoprotection by UDP-glucuronosyltransferases in peroxidase-dependent, reactive oxygen species-mediated micronucleus initiation by the carcinogens 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone and benzo[a]pyrene.

Inhibition of Fc epsilon-RI-mediated activation of rat basophilic leukemia cells by *Clostridium difficile* toxin B (monoglucosyltransferase).

Isolation and characterization of variant benzo[a]pyrene-resistant T47D human breast-cancer cells.

Identification of dioxin-responsive genes in Hep G2 cells using differential mRNA display RT-PCR.

Different mechanisms are responsible for c-jun mRNA induction by cisplatin and ultraviolet light.

Target-induced death by apoptosis in human lymphokine-activated natural killer cells.

Interaction of a recombinant form of apolipoprotein[a] with human fibroblasts and with the human hepatoma cell line HepG2.

Implications for risk assessment of suggested nongenotoxic mechanisms of chemical carcinogenesis.

TCDD-inducible plasminogen activator inhibitor type 2 (PAI-2) in human hepatocytes, HepG2 and monocytic U937 cells.

The actions of 2,3,7,8-tetrachlorodibenzo-p-dioxin on transforming growth factor-beta2 promoter activity are localized to the TATA box binding region and controlled through a tyrosine kinase-dependent pathway.

Surface expression of CD63 antigen (AD1 antigen) in P815 mastocytoma cells by transfected IgE receptors.

Glutathione S-transferase-pi is secreted as a monomer into human plasma by platelets and tumor cells.

Role of tyrosine phosphorylation in radiation-induced cell cycle-arrest of leukemic B-cell precursors at the G2-M transition checkpoint.

Safety assessment based on irrelevant toxicologic data: an extraordinary case of bromomethane used as a fumigant.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin, 12-O-tetradecanoylphorbol-13-acetate and 17 beta-estradiol on estrogen receptor regulation in MCF-7 human breast cancer cells.

[Involvement of sulfated proteoglycans in the control of proliferation of MCF-7 breast cancer cells].

Blood and air pollution: state of knowledge and research needs.

Cell cycle defect in connection with oxygen and iron sensitivity in Fanconi anemia lymphoblastoid cells.

Effect of transient expression of the oestrogen receptor on constitutive and inducible CYP1A1 in Hs578T human breast cancer cells.

Effects of tyrosine kinase inhibitors on the proliferation of human breast cancer cell lines and proteins important in the ras signaling pathway.

Activation of type I protein kinase A during receptor-mediated human T lymphocyte activation.

Autocrine growth of small cell lung cancer mediated by coexpression of c-kit and stem cell factor.

Arsenite, but not cadmium, induces ornithine decarboxylase and heme oxygenase activity in rat liver: relevance to arsenic carcinogenesis.

Increased oxidative DNA damage in livers of 2,3,7,8-tetrachlorodibenzo-p-dioxin treated intact but not ovariectomized rats.

Occupational exposure and malignant lymphoma.

2,3,7,8-Tetrachlorodibenzo-p-dioxin mechanistic data and risk assessment: gene regulation, cytotoxicity, enhanced cell proliferation, and tumor promotion.

Genetic association between cytochrome P450IA1 gene and susceptibility to Parkinson's disease.

Curcumin induces apoptosis in immortalized NIH 3T3 and malignant cancer cell lines.

Cancers of skin, bone, connective tissues, brain, eye, thyroid and other specified and unspecified sites in Inuit.

Receptor-mediated carcinogenesis: the role of biological effect modeling for risk assessment of dioxin and tamoxifen.

Pesticide appliers with mixed pesticide exposure: G-banded analysis and possible relationship to non-Hodgkin's lymphoma.

[Separation of methotrexate-polyglutamates by capillary electrophoresis and its application to the measurement of gamma-glutamyl hydrolase activity in human leukemia cells in culture].

The Caco-2 cell culture system can be used as a model to study food iron availability.

Transport mechanism of anthracycline derivatives in human leukemia cell lines: uptake and efflux of pirarubicin in HL60 and pirarubicin-resistant HL60 cells.

Characterization of the M(r) 65,000 lymphokine-activated killer proteins phosphorylated after tumor target binding: evidence that pp65a and pp65b are phosphorylated forms of L-plastin.

Plant regeneration from somatic embryos of *Taxus brevifolia*.

Herbimycin A down-regulates messages of cyclin D1 and c-myc during erythroid differentiation of K562 cells.

Toxic equivalence factors, problems and limitations.

[Bladder neoplasms and cyclophosphamide. Apropos of 3 cases and review of the literature].

Tissue-specific 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible expression of human UDP-glucuronosyltransferase UGT1A6.

Arsenite induces apoptosis in Chinese hamster ovary cells by generation of reactive oxygen species.

Heat shock response inhibits cytokine-inducible nitric oxide synthase expression in rat hepatocytes.

Subchronic dispositional and toxicological effects of arsenate administered in drinking water to mice.

Higher concentrations of specific polychlorinated biphenyl congeners in adipose tissue from non-Hodgkin's lymphoma patients compared with controls without a malignant disease.

Mutagenic responses of L5178Y mouse cells at the tk and hprt loci.

Baculovirus-mediated expression and characterization of rat CYP2A3 and human CYP2a6: role in metabolic activation of nasal toxicants.

Dioxin activates human immunodeficiency virus-1 expression in chronically infected promonocytic U1 cells by enhancing NF-kappa B activity and production of tumor necrosis factor-alpha.

The primary structure of UK114 tumor antigen.

Freeze-induced shrinkage of individual cells and cell-to-cell propagation of intracellular ice in cell chains from salivary glands.

Bipyridyl dihydrochloride inhibits tumor necrosis factor-alpha secretion by human keratinocytes on ultraviolet irradiation.

Anti-inflammatory properties of human serum IgA: induction of IL-1 receptor antagonist and Fc alpha R (CD89)-mediated down-regulation of tumour necrosis factor-alpha (TNF-alpha) and IL-6 in human monocytes.

Differential regulation of mouse Ah receptor gene expression in cell lines of different tissue origins.

Differential effects of tyrosine kinase inhibitors on tumor necrosis factor and nitric oxide production by murine macrophages.

Effects of protein tyrosine kinase inhibitors on cytokine-induced adhesion molecule expression by human umbilical vein endothelial cells.

Application of a biologically-based RFD estimation method to tetrachlorodibenzo-p-dioxin (TCDD) mediated immune suppression and enzyme induction.

Metabolism of organochlorine pesticides: the role of human cytochrome P450 3A4.

Metabolic stress opens K⁺ channels in hepatoma cells through a Ca²⁺- and protein kinase alpha-dependent mechanism.

Tumor necrosis factor alpha-induced vascular leakage involves PECAM1 phosphorylation.

Engagement of tumor necrosis factor mRNA by an endotoxin-inducible cytoplasmic protein.

Rapid cytotoxicity of human B lymphocytes induced by VH4-34 (VH4.21) gene-encoded monoclonal antibodies.

Interleukin 4 or oncostatin M induces a prolonged increase in P-selectin mRNA and protein in human endothelial cells.

Interaction with the aromatic hydrocarbon receptor, CYP1A induction, and mutagenicity of a series of diaminotoluenes: implications for their carcinogenicity.

P-glycoprotein induction in rat liver epithelial cells in response to acute 3-methylcholanthrene treatment.

Characterization of urinary metabolites from Sprague-Dawley rats and B6C3F1 mice exposed to [1,2,3,4-¹³C]butadiene.

Role of tumor necrosis factor-alpha on mesangial cell MCP-1 expression and monocyte migration: mechanisms mediated by signal transduction.

Lipopolysaccharide inhibits in vitro luteinizing hormone-stimulated rat ovarian granulosa cell estradiol but not progesterone secretion.

Analysis of recombinant human tumour necrosis factor-alpha-induced CD4 expression on human eosinophils.

The capability of rat colon tissue slices to metabolize the cooked-food carcinogen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine.

Induction of heme oxygenase-1 in LMH cells. Comparison of LMH cells to primary cultures of chick embryo liver cells.

Protection by transfected rat or human class 3 aldehyde dehydrogenase against the cytotoxic effects of oxazaphosphorine alkylating agents in hamster V79 cell lines. Demonstration of aldophosphamide metabolism by the human cytosolic class 3 isozyme.

De novo expression of transfected human class 1 aldehyde dehydrogenase (ALDH) causes resistance to oxazaphosphorine anti-cancer alkylating agents in hamster V79 cell lines. Elevated class 1 ALDH activity is closely correlated with reduction in DNA interstrand cross-linking and lethality.

Lyn and Fgr protein-tyrosine kinases prevent apoptosis during retinoic acid-induced granulocytic differentiation of HL-60 cells.

Herbimycin A inhibits protein kinase C in vascular smooth muscle cells.

Cell kinetics of repair after allyl alcohol-induced liver necrosis in mice.

Dynamic production of tumour necrosis factor-alpha (TNF-alpha) messenger RNA, intracellular and extracellular TNF-alpha by murine macrophages and possible association with protein tyrosine phosphorylation of STAT1 alpha and ERK2 as an early signal.

Involvement of glutathione in induction of c-jun proto-oncogene by methylmethanesulfonate in NIH 3T3 cells.

Diallyl disulfide induces apoptosis of human colon tumor cells.

Influence of liver tumor promoters on apoptosis in rat hepatocytes induced by 2-acetylaminofluorene, ultraviolet light, or transforming growth factor beta 1.

[Agricultural antiparasitics evaluated for their potential cancerogenic, mutagenic and toxic reproductive effects].

TNF-alpha participates in an IgE-mediated cutaneous reaction in mast cell deficient, WBB6F1-W/Wv mice.

'Non-genotoxic' carcinogens evaluated using the white-ivory assay of *Drosophila melanogaster*.

4-Chloro-m-cresol, a potent and specific activator of the skeletal muscle ryanodine receptor.

Cell adhesion to substratum and activation of tyrosine kinases are essentially required for G1/S phase transition in BALB/c 3T3 fibroblasts.

Differential ability of 2,4-dinitrophenol to modulate etoposide cytotoxicity in mammalian tumor cell lines associated with inhibition of macromolecular synthesis.

Health risk assessment for inuit newborns exposed to dioxin-like compounds through breast feeding.

Quantitative risk assessment and the limitations of the linearized multistage model.

CYP2E1-mediated mechanism of anti-genotoxicity of the broccoli constituent sulforaphane.

Glutathionyl hydroquinone: a potent pro-oxidant and a possible toxic metabolite of benzene.

Assessment of exposure to inorganic arsenic, a human carcinogen, due to the consumption of seafood.

Hemoglobin and DNA adduct formation in Fischer-344 rats exposed to 2,4- and 2,6-toluene diamine.

Intestinal brush border transport mechanism of 5-fluorouracil in rats.

Potential role of the peroxidase-dependent metabolism of serotonin in lowering the polymorphonuclear leukocyte bactericidal function.

Involvement of tyrosine phosphorylation in endothelial adhesion molecule induction.

A mechanistic model of effects of dioxin on thyroid hormones in the rat.

Modifications of neurofilament proteins by possible metabolites of allyl chloride in vitro.

Species-dependent induction of peroxisome proliferation by haloxyfop, an aryloxyphenoxy herbicide.

Heterologous expression of selenium-dependent glutathione peroxidase affords cellular resistance to paraquat.

Pentachlorophenol-induced oxidative DNA damage in mouse liver and protective effect of antioxidants.

Epidemiologic research on Vietnam veterans. Difficulties and lessons learned.

Hodgkin's disease and Vietnam service.

On the association between canine malignant lymphoma and opportunity for exposure to 2,4-dichlorophenoxyacetic acid.

Photodamage and skin cancer among paraquat workers.

Soft tissue sarcoma and non-Hodgkin's lymphoma in workers exposed to phenoxy herbicides, chlorophenols, and dioxins: two nested case-control studies.

The purported link between agent orange and cancer.

Induction of 8-hydroxy-2-deoxyguanosine and single-strand breaks in DNA of V79 cells by tetrachloro-p-hydroquinone.

Developmental toxicity and structure-activity relationships of chlorophenols using human embryonic palatal mesenchymal cells.

Acrolein mercapturates: synthesis, characterization, and assessment of their role in the bladder toxicity of cyclophosphamide.

The metabolism and DNA binding of the cooked-food mutagen, 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) in precision-cut rat liver slices.

Olfactory toxicity of diethyldithiocarbamate (DDTC) and disulfiram and the protective effect of DDTC against the olfactory toxicity of dichlobenil.

Acute and long-term effects of nine chemicals on the Japanese medaka (*Oryzias latipes*).

Toward less misleading comparisons of uncertain risks: the example of aflatoxin and alar.

Rapid decreases in indigenous covalent DNA modifications (I-compounds) of male Fischer-344 rat liver DNA by diquat treatment.

Cancer induction by an organic arsenic compound, dimethylarsinic acid (cacodylic acid), in F344/DuCrj rats after pretreatment with five carcinogens.

Agent Orange down under.

Overinterpretation of small numbers in the Dow 2,4-D cohort study.

Acrolein.

[Herbicides and neoplasms of the hemolymphopoietic system].

Lack of carcinogenicity of daminozide, alone or in combination with its contaminant 1,1-dimethylhydrazine, in a medium-term bioassay.

Fate and effects of acrolein.

Atrazine treatment potentiates excretion of mutagenic urine in 2,6-dinitrotoluene-treated Fischer 344 rats.

Epidemiology of atrazine.

Toxicity of 3-methylindole, 1-nitronaphthalene and paraquat in precision-cut rat lung slices.

Exposure to polychlorinated dioxins and furans (PCDD/F) and mortality in a cohort of workers from a herbicide-producing plant in Hamburg, Federal Republic of Germany.

Generation of resistance to the diphenyl ether herbicide acifluorfen by MEL cells.

Antioxidative roles of metallothionein and manganese superoxide dismutase induced by tumor necrosis factor-alpha and interleukin-6.

Evidence from ³²P-postlabeling and the use of pentachlorophenol for a novel metabolic activation pathway of diethylstilbestrol and its dimethyl ether in mouse liver: likely alpha-hydroxylation of ethyl group(s) followed by sulfate conjugation.

Hepatic oxidative stress and related defenses during treatment of mice with acetylsalicylic acid and other peroxisome proliferators.

Nerve growth factor prevents apoptosis of rat peritoneal mast cells through the trk proto-oncogene receptor.

19-Allylaminoherbimycin A, an analog of herbimycin A that is stable against treatment with thiol compounds or granulocyte-macrophage colony-stimulating factor in human leukemia cells.

Species-specific antagonism of Ah receptor action by 2,2',5,5'-tetrachloro- and 2,2',3,3',4,4'-hexachlorobiphenyl.

Biologically bounded risk assessment for receptor-mediated nongenotoxic carcinogens.

Induction of the 72-kD heat shock protein in human skin melanoma and squamous cell carcinoma cell lines.

Biological activities of synthetic analogues of *Alternaria alternata* toxin (AAL-toxin) and fumonisin in plant and mammalian cell cultures.

The role of the neurohormone melatonin as a buffer against macromolecular oxidative damage.

PPAR: a mediator of peroxisome proliferator action.

Molecular mechanism of inhibition of estrogen-induced cathepsin D gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in MCF-7 cells.

Ornithine decarboxylase- and ras-induced cell transformations: reversal by protein tyrosine kinase inhibitors and role of pp130CAS.

Tyrosine kinase activity is essential for interleukin-1 beta--stimulated production of interleukin-6 in U373 human astrocytoma cells.

Human glutathione S-transferase M1 null genotype is associated with a high inducibility of cytochrome P450 1A1 gene transcription.

Studies into the effect of the tyrosine kinase inhibitor herbimycin A on NF-kappa B activation in T lymphocytes. Evidence for covalent modification of the p50 subunit.

Oral administration of dihydroartemisinin and ferrous sulfate retarded implanted fibrosarcoma growth in the rat.

Transcriptional activation of Alzheimer's beta-amyloid precursor protein gene by stress.

Effect of orthovanadate on commitment of avian myoblasts transformed with Rous sarcoma virus to myogenic differentiation.

Organochlorine compounds and estrogen-related cancers in women.

Quantitative analysis of collagen and collagen subtypes I, III, and V in human pancreatic cancer, tumor-associated chronic pancreatitis, and alcoholic chronic pancreatitis.

Persistence of TCDD-induced hepatic cell proliferation and growth of enzyme altered foci after chronic exposure followed by cessation of treatment in DEN initiated female rats.

Promotion of N-nitrosodiethylamine-initiated hepatocellular tumors and hepatoblastomas by 2,3,7,8-tetrachlorodibenzo-p-dioxin or Aroclor 1254 in C57BL/6, DBA/2, and B6D2F1 mice.

Interaction of calyculin and its cyanogen bromide fragments with annexin II and glyceraldehyde 3-phosphate dehydrogenase.

Preferential requirement for protein tyrosine phosphatase activity in the 12-O-tetradecanoylphorbol-13-acetate-induced differentiation of human colon cancer cells.

Influence of xenobiotics on rainbow trout liver estrogen receptor and vitellogenin gene expression.

Comparison of mouse and chick embryo liver and hepatoma cell lines as model systems used for enzymological estimation of toxicity potentials of organic pollutants.

Effects of pesticides on the ratio of 16 alpha/2-hydroxyestrone: a biologic marker of breast cancer risk.

Purification and identification of mouse lung microvessel endothelial cell-derived chemoattractant for lung-metastasizing murine RAW117 large-cell lymphoma cells: identification as mouse monocyte chemotactic protein 1.

Increased rate of adenosine triphosphate-dependent etoposide (VP-16) efflux in a murine leukemia cell line overexpressing the multidrug resistance-associated protein (MRP) gene.

Differential response of normal and HPV immortalized ectocervical epithelial cells to B[a]P.

Adaptation of Ehrlich ascites carcinoma cells to energy deprivation in vivo can be associated with heat shock protein accumulation.

Regulation of CYP1A1 by indolo[3,2-b]carbazole in murine hepatoma cells.

erbB-2 oncogene inhibition by geldanamycin derivatives: synthesis, mechanism of action, and structure-activity relationships.

Inhibition of the oncogene product p185erbB-2 in vitro and in vivo by geldanamycin and dihydrogeldanamycin derivatives.

Herbimycin A suppresses NF-kappa B activation and tyrosine phosphorylation of JAK2 and the subsequent induction of nitric oxide synthase in C6 glioma cells.

Pesticides--how research has succeeded and failed in informing policy: DDT and the link with breast cancer.

Inhibition of the growth of a human nasopharyngeal carcinoma cell line by bFGF is mediated via FGFR-1.

2,3,7,8-Tetrachlorodibenzo-p-dioxin sensitization of cultured human epidermal cells to carcinogenic heterocyclic amine toxicity.

Expression of cytokine mRNA in human melanoma tissues.

Ligand-dependent and -independent activation of the transcription factor gamma RF-1 in a cell-free system.

Comparisons of estimated human body burdens of dioxinlike chemicals and TCDD body burdens in experimentally exposed animals.

Negative selection in hepatic tumor promotion in relation to cancer risk assessment.

Incorporating cell proliferation kinetics into models for cancer risk assessment.

Biochemical mechanisms and cancer risk assessment models for dioxin.

Different response of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-sensitive genes in human breast cancer MCF-7 and MDA-MB 231 cells.

Establishment of a recombinant hepatic cell line stably expressing alcohol dehydrogenase.

Influx of daunorubicin in multidrug resistant Ehrlich ascites tumour cells: correlation to expression of P-glycoprotein and efflux. Influence of verapamil.

Distribution of microsomal epoxide hydrolase and glutathione S-transferase in the rat olfactory mucosa: relevance to distribution of lesions caused by systemically-administered olfactory toxicants.

Role of lipopolysaccharide and tumor necrosis factor-alpha in induction of hepatocyte necrosis.

In utero 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) alters reproductive morphology and function in female rat offspring.

H-ras oncogene mutation spectra in B6C3F1 and C57BL/6 mouse liver tumors provide evidence for TCDD promotion of spontaneous and vinyl carbamate-initiated liver cells.

Sensitization to x-rays by sodium arsenite or heat in normal cells and in cells with an induced tolerance for heat and arsenite.

Spin trapping endogenous radicals in MC-1010 cells: evidence for hydroxyl radical and carbon-centered ascorbyl radical adducts.

Large secretory structures at the cell surface imaged with scanning force microscopy.

Human hepatoma cell mutant defective in cell surface protein trafficking.

Integrin-mediated tyrosine phosphorylation and cytokine message induction in monocytic cells. A possible signaling role for the Syk tyrosine kinase.

Identification of a 120-kDa protein associated with aromatic hydrocarbon receptor nuclear translocator.

The Ah receptor recognizes DNA binding sites for the B cell transcription factor, BSAP: a possible mechanism for dioxin-mediated alteration of CD19 gene expression in human B lymphocytes.

Morphology of ras-transformed cells becomes apparently normal again with tyrosine kinase inhibitors without a decrease in the ras-GTP complex.

Dioxin induces localized, graded changes in chromatin structure: implications for Cyp1A1 gene transcription.

Radiosyntheses of labeled beta-pseudothymidine ([C-11]- and [H-3]methyl) and its biodistribution and metabolism in normal and tumored mice.

Herbimycin A inhibits phorbol ester-induced morphologic changes, adhesion, and megakaryocytic differentiation of the leukemia cell line, MEG-01.

Immunomodulatory effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin tested by the popliteal lymph node assay.

Promotion of N-nitrosodimethylamine-initiated mouse lung tumors following single or multiple low dose exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Inhibition of apoptosis during 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated tumour promotion in rat liver.

Aneugenic effect of sodium arsenite on human lymphocytes in vitro: an individual susceptibility effect detected.

Phorbol ester stimulated cathepsin L expression in U937 cells.

Adipose tissue concentrations of dioxins and dibenzofurans in patients with malignant lymphoproliferative diseases and in patients without a malignant disease.

Dioxin--an analysis of the major human studies: comparison with animal-based cancer risks.

Hypoxia-induced vascular endothelial growth factor expression in normal rat astrocyte cultures.

Mechanism of high K⁺ and TI⁺ uptake in cultured human glioma cells.

Alternative models for low dose-response analysis of biochemical and immunological endpoints for tetrachlorodibenzo-p-dioxin.

Effect of a negative regulatory element (NRE) on the human CYP1A1 gene expression in breast carcinoma MCF-7 and hepatoma HepG2 cells.

The role of protein kinase in human synovial fibroblast growth.

An inward rectifier K⁺ current modulates in neuroblastoma cells the tyrosine phosphorylation of the pp125FAK and associated proteins: role in neuritogenesis.

Neonatal lethality associated with respiratory distress in mice lacking cytochrome P450 1A2.

Spreading and focal contact formation of human melanoma cells in response to the stimulation of both melanoma-associated proteoglycan (NG2) and alpha 4 beta 1 integrin.

Immune system impairment and hepatic fibrosis in mice lacking the dioxin-binding Ah receptor.

Enhancement of the stress response by low concentrations of arsenite in arsenite-pretreated Reuber H35 hepatoma cells.

Hepatic microsomal ethoxyresorufin O-deethylase-inducing potency in ovo and cytosolic Ah receptor binding affinity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: comparison of four avian species.

Subchronic dose-response study of 2,3,7,8-tetrachlorodibenzo-p-dioxin in female Sprague-Dawley rats.

Human macrophages acquire a hyporesponsive state of tumor necrosis factor alpha production in response to successive Mycobacterium avium serovar 4 stimulation.

Apoptosis: the in vivo mechanism which mediates spontaneous AK-5 tumor regression.

Identity and pathogenesis of stomach tumors in Sprague-Dawley rats associated with the dietary administration of butachlor.

A study of the mechanism of butachlor-associated gastric neoplasms in Sprague-Dawley rats.

Direct tumorigenic conversion of human gallbladder carcinoma cells by v-src but not by activated c-H-ras oncogene.

[Epidemiological risk assessment for chemical substances].

Workers' response to risk notification.

Formation of 8-hydroxydeoxyguanosine in calf thymus DNA treated in vitro with phenylhydroquinone, the major metabolite of O-phenylphenol.

Presentation of cartilage proteoglycan to a T cell hybridoma derived from a mouse with proteoglycan-induced arthritis.

IS RTP Council comments regarding "a public health and regulatory perspective on risk of dioxin-like compounds". Submitted on behalf of IS RTP Council.

Environmental and dietary estrogens and human health: is there a problem?

Enzyme induction by L-buthionine (S,R)-sulfoximine in cultured mouse hepatoma cells.

Evidence for two functionally distinct forms of the human Ah receptor.

Synthesis, topoisomerase I inhibitory activity, and in vivo evaluation of 11-azacampthotecin analogs.

Variation in the expression and/or phosphorylation of the human low molecular weight stress protein during in vitro cell differentiation.

Scrapie prions selectively modify the stress response in neuroblastoma cells.

Suppression of cytochrome P450 (Cyp1a-1) induction in mouse hepatoma Hepa-1C1C7 cells by methoxsalen.

Liver tumour promoting activity of 3,4,5,3',4'-pentachlorobiphenyl and its interaction with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Possible involvement of the Ah receptor in the induction of cytochrome P-450IA1 under conditions of hydrodynamic shear in microcarrier-attached hepatoma cell lines.

Treatment of Philadelphia-chromosome-positive human leukemia in SCID mouse model with herbimycin A, bcr-abl tyrosine kinase activity inhibitor.

Cancer incidence and dioxin exposure.

Orientation of the heterodimeric aryl hydrocarbon (dioxin) receptor complex on its asymmetric DNA recognition sequence.

Dioxin contamination in Seveso: the social tragedy and the scientific challenge.

A cytokeratin 8-like protein with plasminogen-binding activity is present on the external surfaces of hepatocytes, HepG2 cells and breast carcinoma cell lines.

[Multiple palmoplantar keratoses, basalomas and porocarcinomas after arsenic therapy].

Resistance of melanoma cell lines to interferons correlates with reduction of IFN-induced tyrosine phosphorylation. Induction of the anti-viral state by IFN is prevented by tyrosine kinase inhibitors.

Identification of domains of poly(ADP-ribose) polymerase for protein binding and self-association.

Expression of de-N-acetyl-gangliosides in human melanoma cells is induced by genistein or nocodazole.

Onco-fetal/laminin-binding collagen from colon carcinoma: detection of new sequences.

Activation of casein kinase II in ML-1 human myeloblastic leukemia cells requires IGF-1 and transferrin.

Comparison of expression of aldehyde dehydrogenase 3 and CYP1A1 in dominant and recessive aryl hydrocarbon hydroxylase-deficient mutant mouse hepatoma cells.

A novel application of a competitive binding model in dioxin risk assessment.

Enrichment with arachidonic acid increases the sensitivity of hepatoma cells to the cytotoxic effects of oxidative stress.

2,3,7,8-Tetrachlorodibenzo-p-dioxin: molecular mechanism of carcinogenesis and its implication in human in vitro model.

Effect of epidermal growth factor on cadherin-mediated adhesion in a human oesophageal cancer cell line.

1-beta-D-arabinofuranosylcytosine activates tyrosine phosphorylation of p34cdc2 and its association with the Src-like p56/p53lyn kinase in human myeloid leukemia cells.

Role of protein kinase C activation in synthesis of complement components C2 and factor B in interferon-gamma-stimulated human fibroblasts, glioblastoma cell line A172 and monocytes.

Identification of 3'-methoxy-4'-nitroflavone as a pure aryl hydrocarbon (Ah) receptor antagonist and evidence for more than one form of the nuclear Ah receptor in MCF-7 human breast cancer cells.

The effects of acute exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin on glioma-specific cytotoxic T-cell activity in Fischer 344 rats.

Non-Hodgkin's lymphoma.

Renal tumorigenicity of 1,1-dichloroethene in mice: the role of male-specific expression of cytochrome P450 2E1 in the renal bioactivation of 1,1-dichloroethene.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on growth factor expression in the human breast cancer cell line MCF-7.

Sodium arsenite induces chromosome endoreduplication and inhibits protein phosphatase activity in human fibroblasts.

Induction of preneoplastic lesions by sodium arsenite in human fetal respiratory epithelia in organ culture.

Genotoxicity of two arsenic compounds in germ cells and somatic cells of *Drosophila melanogaster*.

Colonic protein fermentation and promotion of colon carcinogenesis by thermolyzed casein.

Characterization of sugar receptor expression by neoglycoproteins in oral and oropharyngeal squamous cell carcinomas.

[The kinetics of rhodamine 123 efflux from cells with multiple drug resistance under the action of energy metabolism inhibitors].

Modulation of gene expression and endocrine response pathways by 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds.

Human cytochromes P4501A1 and P4501A2: R-warfarin metabolism as a probe.

Receptor-mediated toxicity.

Interleukin-1 beta induces interstitial collagenase gene expression and protein secretion in renal mesangial cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin inhibits DNA synthesis in rat primary hepatocytes.

Receptor-mediated events and the evaluation of the Environmental Protection Agency (EPA) of dioxin risks.

Lipopolysaccharide inhibits rat ovarian thecal-interstitial cell steroid secretion in vitro.

Response of [Ah] battery genes to compounds that protect against menadione toxicity.

Inhibition of tumor necrosis factor activity fails to restore 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced suppression of the antibody response to sheep red blood cells.

Selective depletion of cyclin-dependent kinases is associated with Fas-mediated apoptosis in human leukemia T-cell lines.

Kinetics of plasma membrane and mitochondrial alterations in cells undergoing apoptosis.

Possible mechanisms for PhIP-DNA adduct formation in the mammary gland of female Sprague-Dawley rats.

Evaluation of the significance of polyamines and their oxidases in the aetiology of human cervical carcinoma.

Down-regulation of tumor necrosis factor receptors by blockade of mitochondrial respiration.

Tumor necrosis factor alpha increases tyrosine phosphorylation of a 23-kDa nuclear protein in U937 cells through ceramide signaling pathway.

Diffusible cytotoxic metabolites contribute to the in vitro bystander effect associated with the cyclophosphamide/cytochrome P450 2B1 cancer gene therapy paradigm.

The involvement of protein tyrosine kinase activity in a tumor necrosis factor resistance mechanism.

Differential proteolytic processing leads to multiple forms of the CA protein in avian sarcoma and leukemia viruses.

Inhibition of gap junctional intercellular communication by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in rat hepatocytes.

Interactions of polychlorinated dibenzo-p-dioxin, dibenzofuran, and biphenyl congeners for producing rainbow trout early life stage mortality.

Electrophile and antioxidant regulation of enzymes that detoxify carcinogens.

Increased cytotoxicity of 3-morpholinopyridone to HepG2 cells in the presence of superoxide dismutase. Role of hydrogen peroxide and iron.

Adipose-tissue concentrations of dioxins and dibenzofurans in potentially exposed patients with malignant-lymphoma or sarcoma.

Cytoskeletal regulation of Caco-2 intestinal monolayer paracellular permeability.

Enhanced phosphorylation of nuclear 21-kDa and 34-kDa proteins in hepatoma cell death induced by tumor-necrosis factor-alpha.

Identification of the major phosphorylation sites in human C5a anaphylatoxin receptor in vivo.

Xenobiotic metabolism in humans during early pregnancy: peroxidase-mediated oxidation and bioactivation of 2-aminofluorene.

Cyclophosphamide: review of its mutagenicity for an assessment of potential germ cell risks.

Modifying role of trace elements on the mutagenicity of benzo[a]pyrene.

Inhibitory effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on rat hepatocyte proliferation induced by 2/3 partial hepatectomy.

Effect of stereochemistry on the oxidative metabolism of the cyclophosphamide metabolite aldophosphamide.

Levels of pollutants and their metabolites: exposures to organic substances.

Inhibition of tumor necrosis factor alpha- and ceramide-induced internucleosomal DNA fragmentation by herbimycin A in U937 cells.

Toxicological potency of 2,3,7,8-tetrachlorodibenzo-p-dioxin relative to 100 other compounds: a relative potency analysis of in vitro and in vivo test data.

Cytochromes P450 in cynomolgus monkeys mutagenically activate 2-amino-3-methylimidazo[4,5-f]quinoline (IQ) but not 2-amino-3,8-dimethylimidazo[4,5-f]quinoxaline (MeIQx).

Inhibitors of protein tyrosine kinase suppress TNF-stimulated induction of endothelial cell adhesion molecules.

Mutagens from heated Chinese and U.S. cooking oils.

Rat CYP1B1: an adrenal cytochrome P450 that exhibits sex-dependent expression in livers and kidneys of TCDD-treated animals.

TCDD reduces rat hepatic epidermal growth factor receptor: comparison of binding, immunodetection, and autophosphorylation.

A novel type of cell death of lymphocytes induced by a monoclonal antibody without participation of complement.

Alterations in thyroid function in female Sprague-Dawley rats following chronic treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

A metabolite of carcinogenic 2-acetylaminofluorene, 2-nitrosofluorene, induces redox cycling in mitochondria.

Hypoxia-mediated induction of acidic/basic fibroblast growth factor and platelet-derived growth factor in mononuclear phagocytes stimulates growth of hypoxic endothelial cells.

Potency of mixtures of polychlorinated biphenyls as inducers of dioxin receptor-regulated CYP1A activity in rat hepatocytes and H4IIE cells.

Ethanol ingestion on allylamine-induced experimental subendocardial fibrosis.

Cytokine-induced E-selectin expression by human umbilical vein endothelial cells (HUVEC). A role for protein tyrosine kinases?

Metaanalysis of 4 Swedish case-control studies on exposure to pesticides as risk-factor for soft-tissue sarcoma including the relation to tumor-localization and histopathological type.

A human erythrocyte-derived growth-promoting factor with a wide target cell spectrum: identification as catalase.

Proportionate mortality study of Vietnam-era veterans of Michigan.

Dioxin activates HIV-1 gene expression by an oxidative stress pathway requiring a functional cytochrome P450 CYP1A1 enzyme.

Suppression of cytotoxic T lymphocyte activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin occurs in vivo, but not in vitro, and is independent of corticosterone elevation.

Transformation by v-erb-B - induction of apoptosis is abrogated in a myeloid cell-line.

Regulation of interleukin-8 production in a human colon epithelial cell line (HT-29).

Cytotoxic effects of several hopanoids on mouse leukemia L1210 and P388 cells.

Differential toxicities of cyclophosphamide and its glutathione metabolites to A549 cells.

CYP1 induction, binding to the hepatic aromatic hydrocarbon receptor and mutagenicity of a series of 11-alkoxy cyclopenta[a]phenanthren-17-ones: a structure activity relationship.

Synthesis, Structure of Nitrogen-Containing Phosphinogold(I) Ferrocenes. In vitro Activity against Bladder and Colon Carcinoma Cell Lines.

The influence of ascorbic acid on the hepatic cytochrome P-450, and glutathione in guinea-pigs exposed to 2,4-dichlorophenol.

Tumor necrosis factor-alpha production induced by viruses and by lipopolysaccharides in macrophages: similarities and differences.

Toxicology of methyl bromide.

Atypical apoptotic cell death induced in L929 targets by exposure to tumor necrosis factor.

Selective increase of rat lung cytochrome P450 1A1 dependent monooxygenase activity after acute sodium arsenite administration.

Production of tumor necrosis factor induced by synthetic low-toxicity lipid A analog, DT-5461a, is mediated by LPS receptor sites and tyrosine kinase-MAP kinase signaling pathway in murine macrophages.

Tyrosine kinase inhibitors potentiate the induction of low density lipoprotein receptor gene expression by hepatocyte growth factor.

"Farming and prostate cancer mortality".

Comparison of the toxicity of cinnamaldehyde when administered by microencapsulation in feed or by corn oil gavage.

Factors affecting mammary tumor incidence in chlorotriazine-treated female rats: hormonal properties, dosage, and animal strain.

Metabolism and genotoxicity of the halogenated alkyl compound tris(2,3-dibromopropyl)phosphate.

Molecular analysis of bivalve tumors: models for environmental/genetic interactions.

Ifosfamide metabolite chloroacetaldehyde causes Fanconi syndrome in the perfused rat kidney.

Primary and immortalized (BEAS 2B) human bronchial epithelial cells have significant antioxidative capacity in vitro.

Application of the kinetic of RNA synthesis on Hep 3B cells. Study of the medium-term cytotoxicity of atrazine.

Arsenic-related Bowen's disease and paraquat-related skin cancerous lesions show no detectable ras and p53 gene alterations.

Chronic effects of atrazine on estrus and mammary tumor formation in female Sprague-Dawley and Fischer 344 rats.

Role of active oxygen species in DNA damage by pentachlorophenol metabolites.

Assay of linuron and a pesticide mixture commonly found in the Italian diet, for promoting activity in rat liver carcinogenesis.

Paraquat induces irreversible actin cytoskeleton disruption in cultured human lung cells.

Mortality and cancer morbidity of Finnish chlorophenoxy herbicide applicators: an 18-year prospective follow-up.

Retrospective assessment of exposure through modeling in a study on cancer risks among workers exposed to phenoxy herbicides, chlorophenols and dioxins.

Oxidative mutagens induce intrachromosomal recombination in yeast.

Differential proliferative responses of Syrian hamster embryo fibroblasts to paraquat-generated superoxide radicals depending on tumor suppressor gene function.

Remodeling of the alveolar structure in the paraquat lung of humans: a morphometric study.

Studies on the mechanism of the carcinogenic activity of amitrole.

Diagnosis and treatment of soft tissue sarcomas in adults.

Defence capacity modulation of human hepatoma cell line Hep 3B by three pesticides.

Re: "Role of the herbicide atrazine in the development of non-Hodgkin's lymphoma" by S Hoar Zahm, DD Weisburger, KP Kantor, FF Holmes, A Blair. *Scand J Work Environ Health* 1993; 19:108-14.

Occupational risk factors for renal-cell carcinoma in Denmark.

Pathobiological effects of acetaldehyde in cultured human epithelial cells and fibroblasts.

Neurologic health outcomes and Agent Orange: Institute of Medicine report.

Exposure to phenoxyacetic acids, chlorophenols, or organic solvents in relation to histopathology, stage, and anatomical localization of non-Hodgkin's lymphoma.

Effect of ethanol on paraquat toxicity in F344 rats.

Canine exposure to herbicide-treated lawns and urinary excretion of 2,4-dichlorophenoxyacetic acid.

Non-Hodgkin's lymphoma and agricultural practices in the prairie provinces of Canada.

Risk of testicular cancer associated with surrogate measures of Agent Orange exposure among Vietnam veterans on the Agent Orange Registry.

Agent Orange and Seveso: no end in sight.

Direct detection of the intracellular formation of carboxyphosphamides using nuclear magnetic resonance spectroscopy.

Environmental behavior of bentazon herbicide.

Influence of the herbicide Linuron on growth rate and gap-junctional intercellular communication of cultured endothelial cells.

Free radicals in the pathophysiology of pulmonary injury and disease.

Ethanol-induced reduction of the amount of stimulatory GTP-binding regulatory protein, Gs, in wild-type S49 murine lymphoma cells: effect of cycloheximide and puromycin.

Role of hydrogen peroxide in hypoxia-induced erythropoietin production.

Short-term effects of chlorotriazines on estrus in female Sprague-Dawley and Fischer 344 rats.

Activation of the liver carcinogen 2-nitropropane by aryl sulfotransferase.

[Changes in the concentrations of chlornitrofen (CNP) and CNP-amino in river and faucet water in Niigata, Japan].

The pentachlorophenol metabolite tetrachloro-p-hydroquinone induces the formation of 8-hydroxy-2-deoxyguanosine in liver DNA of male B6C3F1 mice.

Characterization of polyamine transport in rat aortic smooth muscle cells.

Detection of exocyclic 1,N2-propanodeoxyguanosine adducts as common DNA lesions in rodents and humans.

Strong intensification of mouse hepatic tamoxifen DNA adduct formation by pretreatment with the sulfotransferase inhibitor and ubiquitous environmental pollutant pentachlorophenol.

Aldose reductase-catalyzed reduction of acrolein: implications in cyclophosphamide toxicity.

The role of sulfation and/or acetylation in the metabolism of the cooked-food mutagen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine in *Salmonella typhimurium* and isolated rat hepatocytes.

Genotoxicity of the alkenylbenzenes alpha- and beta-asarone, myristicin and elimicin as determined by the UDS assay in cultured rat hepatocytes.

Detoxication of base propenals and other alpha, beta-unsaturated aldehyde products of radical reactions and lipid peroxidation by human glutathione transferases.

Suspension-mediated induction of Hepa 1c1c7 Cyp1a-1 expression is dependent on the Ah receptor signal transduction pathway.

Hepatocyte growth factor/scatter factor induces tyrosine phosphorylation of focal adhesion kinase (p125FAK) and promotes migration and invasion by oral squamous cell carcinoma cells.

Characterization of a thioredoxin-related surface protein.

Indolo[3,2-b]carbazole: a dietary-derived factor that exhibits both antiestrogenic and estrogenic activity.

Inhibition of intercellular communication by 2,3,7,8-tetrachlorodibenzo-p-dioxin and dioxin-like PCBs in mouse hepatoma cells (Hepa1c1c7): involvement of the Ah receptor.

The importance of biological realism in dioxin risk assessment models.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on estrogen metabolism in MCF-7 breast cancer cells: evidence for induction of a novel 17 beta-estradiol 4-hydroxylase.

Patterns of tyrosine phosphorylation differ in vascular hypertrophy and hyperplasia.

Transformation by v-src causes transient induction followed by repression of mouse thrombospondin-1.

Characterization of a triple opioid system in the human neuroblastoma NMB cell line.

Concomitant increases in galectin-1 and its glycoconjugate ligands (carcinoembryonic antigen, lamp-1, and lamp-2) in cultured human colon carcinoma cells by sodium butyrate.

Growth of erythroid colonies in chronic myelogenous leukemia is independent of erythropoietin only in the presence of steel factor.

Transcriptional activation function of the mouse Ah receptor nuclear translocator.

Effect of arsenic exposure on alveolar macrophage function. I. Effect of soluble as(III) and as(V).

In vivo antitumor activity of herbimycin A, a tyrosine kinase inhibitor, targeted against BCR/ABL oncoprotein in mice bearing BCR/ABL-transfected cells.

Acycloguanosine and herbimycin A co-operatively inhibit proliferation and induce erythrodifferentiation of human myeloid leukemia K562 cells.

Mammalian toxicology of organophosphorus pesticides.

Identification of nondisulfided pro alpha 1 (IV) chain produced by cultured B16 melanoma cells.

Effect of aldonic acids on the uptake of ascorbic acid by 3T3 mouse fibroblasts and human T lymphoma cells.

Stressor-specific induction of heat shock proteins in rat hepatoma cells.

Polysaccharides in Fungi. XXXIV. A polysaccharide from the fruiting bodies of Amanita muscaria and the antitumor activity of its carboxymethylated product.

The mechanism of dioxin toxicity: relationship to risk assessment.

[Erythropoietin].

Integrin alpha v beta 3 differentially regulates adhesive and phagocytic functions of the fibronectin receptor alpha 5 beta 1.

The role of DNA damage in the resistance of human chronic myeloid leukemia cells to cyclophosphamide analogues.

TCDD carcinogenicity in humans.

Tyrosine kinase activation by Newcastle disease virus is required for TNF-alpha gene induction in astrocytes.

Mechanisms of resistance to ansamycin antibiotics in human breast cancer cell lines.

Regulation of [Ah] gene battery enzymes and glutathione levels by 5,10-dihydroindeno[1,2-b]indole in mouse hepatoma cell lines.

Hypothesis for mammary tumorigenesis in Sprague-Dawley rats exposed to certain triazine herbicides.

Can cohort studies detect any human cancer excess that may result from exposure to dioxin? Maybe.

Selective closure of the vascular bed of an experimental glioma model during in situ saline perfusion.

Established IL-2-dependent double-negative (CD4- CD8-) TCR alpha beta/CD3+ ATL cells: induction of CD4 expression.

Possible functional groups responsible for inhibition of in vivo angiogenesis by herbimycin A.

Evidence for involvement of tyrosine phosphorylation in taxol-induced apoptosis in a human ovarian tumor cell line.

Competitive inhibition by genistein and ATP dependence of daunorubicin transport in intact MRP overexpressing human small cell lung cancer cells.

Comparative in vitro effects of sodium arsenite and sodium arsenate on neuroblastoma cells.

Possible role of tyrosine kinase activity in interleukin 4-induced expression of germ-line C epsilon transcripts in a human Burkitt lymphoma B-cell line, DND39.

Role of tyrosine phosphorylation in matrix-induced neurite outgrowth in human neuroblastoma cells.

2-Phenylphenanthridinone and related compounds: aryl hydrocarbon receptor agonists and suicide inactivators of P4501A1.

Interactive regulation of Ah and glucocorticoid receptors in the synergistic induction of cleft palate by 2,3,7,8-tetrachlorodibenzo-p-dioxin and hydrocortisone.

Free radical formation by ansamycin benzoquinone in human breast tumor cells: implications for cytotoxicity and resistance.

Survey of health and use characterization of pesticide applicators in Minnesota.

Hypoxic stimulation of vascular endothelial growth factor expression in vitro and in vivo.

Mortality among workers of three thermoelectric power plants in northern Italy: a retrospective cohort study.

Detection of apoptosis in leukemic and breast cancer cells with monoclonal antibody to single-stranded DNA.

Inhibition of heat shock protein HSP90-pp60v-src heteroprotein complex formation by benzoquinone ansamycins: essential role for stress proteins in oncogenic transformation.

Modulation of nucleocytosolic [Ca²⁺] gradient in smooth muscle by protein phosphorylation.

Alteration of intracellular Ca²⁺ transients in COS-7 cells transfected with the cDNA encoding skeletal-muscle ryanodine receptor carrying a mutation associated with malignant hyperthermia.

Acute inflammatory response to sheep red blood cells in mice treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin: the role of proinflammatory cytokines, IL-1 and TNF.

Regulation of chemical stress-induced hsp70 gene expression in murine L929 cells.

Deaths from primary brain cancers, lymphatic and haematopoietic cancers in agricultural workers in the Republic of Ireland.

Study of the effector mechanism involved in the production of haemorrhagic necrosis of the small intestine in rat passive anaphylaxis.

Cancer incidence and mortality among Swedish leather tanners.

Inhibition of estrogen-induced progesterone receptor in MCF-7 human breast cancer cells by aryl hydrocarbon (Ah) receptor agonists.

Erythropoietin increases hemoglobin during radiation therapy for cervical cancer.

Inhibition of 7,12-dimethylbenzanthracene-induced rat mammary tumor growth by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Activation of protein kinase C down-regulates leukotriene C4 synthase activity and attenuates cysteinyl leukotriene production in an eosinophilic substrain of HL-60 cells.

Aberrant CYP1A1 induction: discrepancy of CYP1A1 mRNA and aryl hydrocarbon hydroxylase activity in mutant cells of mouse hepatoma line, Hepa-1.

Interaction of 2,3,7,8-tetrachlorodibenzo-p-dioxin and retinoic acid in MCF-7 human breast cancer cells.

Morbidity follow up study of BASF employees exposed to 2,3,7, 8-tetrachlorodibenzo-p-dioxin (TCDD) after a 1953 chemical reactor incident.

Accelerated degradation of 160 kDa epidermal growth factor (EGF) receptor precursor by the tyrosine kinase inhibitor herbimycin A in the endoplasmic reticulum of A431 human epidermoid carcinoma cells.

Conversion of epidermal growth factor (EGF) into a stimulatory ligand for A431-cell growth by herbimycin A by decreasing the level of expression of EGF receptor.

Characterization of type II and type XI collagen synthesis by an immortalized rat chondrocyte cell line (IRC) having a low level of type II collagen mRNA expression.

Fc epsilon RI-stimulated Ca(2+)-dependent secretion from rat basophilic leukemia (RBL-2H3) cells permeabilized with Staphylococcal alpha-toxin: Fc epsilon RI-operated signals are not mimicked by the actions of GTP gamma S.

Increased in vitro tumour necrosis factor-alpha production in iron deficiency anemia.

Effect of ethanol and sodium arsenite on HSP-72 formation and on survival in a murine endotoxin model.

Dioxin effects.

Tyrosine kinase inhibitor-induced differentiation of K-562 cells: alterations of cell cycle and cell surface phenotype.

Apoptosis and chemical carcinogenesis.

Effects of 2,3,7,8-tetrachloro- and 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin on the proliferation of preneoplastic liver cells in the rat.

A method for the high-level expression of a parathyroid hormone analog in Escherichia coli.

Carcinogenesis and initiation of cell cycling by charge-induced membrane clusters may be due to mitogen receptors and Na⁺/H⁺ antiports.

The function of heat-shock proteins in stress tolerance.

Dexamethasone, beta-estradiol, and 2,3,7,8-tetrachlorodibenzo-p-dioxin elicit thymic atrophy through different cellular targets.

CD40 signaling pathway: anti-CD40 monoclonal antibody induces rapid dephosphorylation and phosphorylation of tyrosine-phosphorylated proteins including protein tyrosine kinase Lyn, Fyn, and Syk and the appearance of a 28-kD tyrosine phosphorylated protein.

An increased percentage of long amyloid beta protein secreted by familial amyloid beta protein precursor (beta APP717) mutants.

Human NAD(P)H:quinone oxidoreductase2. Gene structure, activity, and tissue-specific expression.

Antiestrogenic effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on 17 beta-estradiol-induced pS2 expression.

Depletion of the erbB-2 gene product p185 by benzoquinoid ansamycins.

Restoration of aryl hydrocarbon (Ah) responsiveness in MDA-MB-231 human breast cancer cells by transient expression of the estrogen receptor.

Short and long term effects of cytoskeleton-disrupting drugs on cytochrome P450 Cyp1a-1 induction in murine hepatoma 1c1c7 cells: suppression by the microtubule inhibitor nocodazole.

[SMANCS/lipiodol].

ONO-4007, a new synthetic lipid A derivative, induces differentiation of rat myelomonocytic leukemia cells in vitro and in vivo.

Internalization and degradation of monoclonal antibody chCE7 by human neuroblastoma cells.

Action of dietary trypsin, pressed coffee oil, silymarin and iron salt on 1,2-dimethylhydrazine tumorigenesis by gavage.

Opening of large-conductance calcium-activated potassium channels by the substituted benzimidazolone NS004.

Leukemia mortality and farming in the prairie provinces of Canada.

Tumor-promoting effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and phenobarbital in initiated weanling Sprague-Dawley rats: a quantitative, phenotypic, and ras p21 protein study.

Photoaffinity labeling of the Ah receptor with 3-[3H]methylcholanthrene and formation of a 165-kDa complex between the ligand-binding subunit and a novel cytosolic protein.

2,3,7,8-Tetrachlorodibenzo-p-dioxin versus 3-methylcholanthrene: comparative studies of Ah receptor binding, transformation, and induction of CYP1A1.

Benzo[a]pyrene-resistant MCF-7 human breast cancer cells. A unique aryl hydrocarbon-nonresponsive clone.

Cell proliferation status, cytokine action and protein tyrosine phosphorylation modulate leukotriene biosynthesis in a basophil leukaemia and a mastocytoma cell line.

Leukemia and brain tumors in Norwegian railway workers, a nested case-control study.

Co-expression of human CYP1A1 and a human analog of cytochrome P450-EF in response to 2,3,7,8-tetrachloro-dibenzo-p-dioxin in the human mammary carcinoma-derived MCF-7 cells.

A cellular factor stimulates ligand-dependent release of hsp90 from the basic helix-loop-helix dioxin receptor.

Expression of heme oxygenase in arsenic-resistant human lung adenocarcinoma cells.

Induction of heat-shock protein synthesis and thermotolerance in EL-4 ascites tumor cells by transient ATP depletion after ischemic stress.

Suppression of TCDD-induced cytochrome P450 IA1 activity by staurosporine in mouse primary hepatocyte cultures and hepatoma cells.

Receptor-mediated binding of IgE-sensitized rat basophilic leukemia cells to antigen-coated substrates under hydrodynamic flow.

PCB and dioxin re-entry criteria for building surfaces and air.

Conformation dependence of integrin-type II collagen binding. Inability of collagen peptides to support alpha 2 beta 1 binding, and mediation of adhesion to denatured collagen by a novel alpha 5 beta 1-fibronectin bridge.

Y2 receptors for neuropeptide Y are coupled to three intracellular signal transduction pathways in a human neuroblastoma cell line.

Is dioxin a human carcinogen? (continued).

Potent activation of phospholipase D by phenylarsine oxide in rat basophilic leukemia (RBL-2H3) cells.

Clofazimine alters the energy metabolism and inhibits the growth rate of a human lung-cancer cell line in vitro and in vivo.

Effects of herbimycin A and ST638 on Fc epsilon receptor-mediated histamine release and Ca²⁺ signals in rat basophilic leukemia (RBL-2H3) cells.

The human CYP1A2 gene and induction by 3-methylcholanthrene. A region of DNA that supports AH-receptor binding and promoter-specific induction.

Inhibition of pro-cholecystokinin (CCK) sulfation by treatment with sodium chlorate alters its processing and decreases cellular content and secretion of CCK 8.

Effects of herbimycin A and its derivatives on growth and differentiation of Ph1-positive acute lymphoid leukemia cell lines.

Promotion of preneoplastic foci in rat liver with 2,3,7,8-tetrachlorodibenzo-p-dioxin, 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin and a defined mixture of 49 polychlorinated dibenzo-p-dioxins.

Characterization and modulation of drug transport kinetics in K562 c1.6 daunorubicin-resistant cell line.

Effect of herbimycin A, an inhibitor of tyrosine kinase, on protein tyrosine kinase activity and phosphotyrosyl proteins of Ph1-positive leukemia cells.

Regulation of human dioxin receptor function by indolocarbazoles, receptor ligands of dietary origin.

On the formation of neuromata in the primary olfactory projection.

Residue at position 331 in the IgG1 and IgG4 CH2 domains contributes to their differential ability to bind and activate complement.

Human interleukin-3 stimulates a phosphatidylcholine specific phospholipase C and protein kinase C translocation.

Heat shock glycoprotein GP50: product of the retinoic acid-inducible J6 gene.

Regulation of the BZLF1 promoter of Epstein-Barr virus by second messengers in anti-immunoglobulin-treated B cells.

alpha-Fucose-mediated binding and degradation of tissue-type plasminogen activator by HepG2 cells.

Gasoline, asbestos, and dioxin.

A toxic equivalency factor scale for polychlorinated dibenzofurans.

Ca(2+)-calmodulin-dependent phosphorylation of arginine in histone 3 by a nuclear kinase from mouse leukemia cells.

Isolation of a cDNA clone specifying rat chaperonin 10, a stress-inducible mitochondrial matrix protein synthesised without a cleavable presequence.

High passage T47D human breast cancer cells: altered endocrine and 2,3,7,8-tetrachlorodibenzo-p-dioxin responsiveness.

Reversal agent inhibition of the multidrug resistance pump in human leukemic lymphoblasts.

Modulating effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on skin carcinogenesis initiated by the weak inducer 7,12-dimethylbenz(a)anthracene.

2,3,7,8-Tetrachlorodibenzo-p-dioxin as growth modulator in mouse hepatocytes with high and low affinity Ah receptor.

Dose-response relationship in multistage carcinogenesis: promoters.

Multiple mechanisms are responsible for altered expression of gap junction genes during oncogenesis in rat liver.

Transforming growth factor-beta 1 inhibits TCDD-induced cytochrome P450IA1 expression in human lung cancer A549 cells.

Carcinogenicity of TCDD: experimental, mechanistic, and epidemiologic evidence.

Polychlorinated biphenyls (PCBs): environmental impact, biochemical and toxic responses, and implications for risk assessment.

Molecular basis of dioxin actions on rodent and human target tissues.

A model of effects of TCDD on expression of rat liver proteins.

Dose-response and risk assessment considerations for receptor-mediated effects: case study with a TCDD hepatic tumor promotion model.

Rat fibrosarcoma as a source of stable co-polymer of type I and type III collagens.

Thyroid hormones and regulation of cell reliability systems.

The rice culture filtrate of *Bacillus cereus* isolated from emetic-type food poisoning causes mitochondrial swelling in a HEp-2 cell.

Tumor necrosis factor involvement in the toxicity of TCDD: the role of endotoxin in the response.

Hodgkin's and non-Hodgkin's lymphomas.

Mechanisms of chemical injury of thyroid gland.

A targeting model of boron neutron-capture therapy to hepatoma cells in vivo with a boronated anti-(alpha-fetoprotein) monoclonal antibody.

Could the cytokeratin molecule be modulated during tumor transformation in hepatocellular carcinoma?

NTP Toxicology and Carcinogenesis Studies of 4,4'-Thiobis(6-*t*-butyl-*m*-cresol) (CAS No. 96-69-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Inhibition of protein tyrosine phosphorylation prevents T-cell-mediated cytotoxicity.

Congener-specific levels of dioxins and dibenzofurans in U.S. food and estimated daily dioxin toxic equivalent intake.

Influence of 2,3,7,8-tetrachlorodibenzo-*p*-dioxin (TCDD) on TNF- α levels in the skin of congenic haired and hairless mice.

Induction in vitro of 72-kD heat shock protein in a continuous culture of rat thyroid cells, FRTL5.

Expression of the multidrug resistance associated protein and P-glycoprotein in doxorubicin-selected human myeloid leukemia cells.

Genistein reduces tumor necrosis factor α -induced plasminogen activator inhibitor-1 transcription but not urokinase expression in human endothelial cells.

Phorbol ester tumor promoter regulation of natural antitumor antibody binding depends on protein kinase C and an intact microfilament system.

Characterisation of oxidative injury to an intestinal cell line (HT-29) by hydrogen peroxide.

Heat shock-induced cell death in murine microvascular endothelial cells depends on priming with tumor necrosis factor-alpha or interferon-gamma.

Identification of a biochemical lesion, and characteristic response to lipopolysaccharide (LPS) of a cultured macrophage-like cell mutant with defective LPS-binding.

Comparative mutagenicity of chemicals selected for test in the International Program on Chemical Safety's collaborative study on plant systems for the detection of environmental mutagens.

Kaempferol-induced nuclear DNA damage and lipid peroxidation.

Studies on intrachromosomal recombination in SP5/V79 Chinese hamster cells upon exposure to different agents related to carcinogenesis.

Pathways of heat shock protein 28 phosphorylation by TNF in human fibroblasts.

Effects of induction and age-dependent enzyme expression on lung bioavailability, metabolism, and DNA binding of urban air particulate-absorbed benzo[a]pyrene, 2-nitrofluorene, and 3-amino-1,4-dimethyl-5H-pyridol-(4,3)-indole.

Erythrocyte antioxidant enzyme activity in CMF treated breast cancer patients.

T cell receptor-induced Fas ligand expression in cytotoxic T lymphocyte clones is blocked by protein tyrosine kinase inhibitors and cyclosporin A.

Heat enhancement of cytotoxicity induced by oxidation products of spermine in Chinese hamster ovary cells.

Differential cytotoxic effects of arsenic on human and animal cells.

Crocidolite-induced reactive oxygen metabolites generation from human polymorphonuclear leukocytes.

Effect of glutathione depletion and inhibition of glucuronidation and sulfation on 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine (PhIP) metabolism, PhIP-DNA adduct formation and unscheduled DNA synthesis in primary rat hepatocytes.

Interaction of basic fibroblast growth factor (FGF-2) with nonresponsive HeLa cells.

Transcriptional suppression of the human T-cell leukemia virus type I long terminal repeat occurs by an unconventional interaction of a CREB factor with the R region.

A deficiency for nucleotide excision repair strongly potentiates the mutagenic effectiveness of methyl bromide in *Drosophila*.

Potential of bleomycin cytotoxicity in *Saccharomyces cerevisiae*.

Congener-specific data of polychlorinated biphenyl residues in human adipose tissue in Poland.

Mutagenicity and CYP1A induction by azobenzenes correlates with their carcinogenicity.

Ah receptor in embryonic mouse palate and effects of TCDD on receptor expression.

The anti-tumour activity of ifosfamide on heterotransplanted testicular cancer cell lines remains unaltered by the uroprotector mesna.

[Synthesis, function, and evolutionary origin of secondary metabolites produced by micro-organisms].

Leukemia inhibitory factor and nerve growth factor are retrogradely transported and processed by cultured rat sympathetic neurons.

The relationship between proteoglycan synthesis in Swarm chondrocytes and pathways of cellular energy and UDP-sugar metabolism.

Consequences of 3-methylcholanthrene-type induction for the metabolism of 4-aminobiphenyl in isolated rat hepatocytes.

Mitogen-activated protein kinases and ribosomal S6 protein kinases are involved in signaling pathways shared by interleukin-11, interleukin-6, leukemia inhibitory factor, and oncostatin M in mouse 3T3-L1 cells.

The effects of anti-TNF-alpha antibody and dexamethasone on TCDD-induced oxidative stress in mice.

Attenuation of human leukocyte adherence to endothelial cell monolayers by tyrosine kinase inhibitors.

Dietary and environmental estrogens and antiestrogens and their possible role in human disease.

NTP Toxicology and Carcinogenesis Studies of o-Benzyl-p-Chlorophenol (CAS No. 120-32-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Salmonella typhimurium strain TA100 differentiates several classes of carcinogens and mutagens by base substitution specificity.

Dioxin indictment. A growing body of research links the compound to cancer.

Aryl hydrocarbon or dioxin receptor: biologic and toxic responses.

Metabolism of dichloromethane (methylene chloride) to formaldehyde in human erythrocytes: influence of polymorphism of glutathione transferase theta (GST T1-1).

Mutation spectrum of a binary mixture of mutagens (methapyrilene and sodium azide) in strain TA1535 of Salmonella.

Organochlorine-cancer link eyed for phaseout.

The health effects of agrichemicals: herbicides and soft tissue sarcomas.

An update of mortality among chemical workers potentially exposed to the herbicide 2,4-dichlorophenoxyacetic acid and its derivatives.

[The place of pentachlorophenol in general medicinal practice].

Cancer incidence and mortality in women occupationally exposed to chlorophenoxy herbicides, chlorophenols, and dioxins.

Human pentachlorophenol poisoning.

Non-Hodgkin's lymphoma in the older person: a review.

Viral infections and chemical exposures as risk factors for hepatocellular carcinoma in Vietnam.

Seveso: disentangling the dioxin enigma?

Some occupational exposures as risk factors for malignant lymphomas.

The role of agricultural pesticide use in the development of non-Hodgkin's lymphoma in women.

Implications for the presence of transforming genes in gonadal tumors in two bivalve mollusk species.

[Do electromagnetic fields or chemicals cause cancer?].

[Some parameters of Guerin cancer growth after exposure to Pielik (sodium salt of 2,4-dichlorophenoxyacetate)].

Phenoxy herbicides, chlorophenols, soft-tissue sarcoma (STS) and malignant lymphoma.

Cancer in phenoxy herbicide manufacturing workers in Denmark, 1947-87--an update.

Pentachlorophenol carcinogenicity: extrapolation of risk from mice to humans.

Mutagenic and carcinogenic pesticides used in the agricultural environment of Gaza Strip.

A review of potential human carcinogenicity of the chlorophenoxy herbicides MCPA, MCPP, and 2,4-DP.

Effects on thyroid hormone metabolism and depletion of lung vitamin A in rats by airborne particulate matter.

Role of the herbicide atrazine in the development of non-Hodgkin's lymphoma.

Biomonitoring studies and susceptibility markers for acrolein congeners and allylic and benzyl compounds.

Oxidative stress in fish cells: in vitro studies.

Occupational exposure to phenoxy herbicides and chlorophenols and cancer mortality in The Netherlands.

Effect of diphenyl ether herbicides and oxadiazon on porphyrin biosynthesis in mouse liver, rat primary hepatocyte culture and HepG2 cells.

Renal lesions induced in F344/DuCrj rats by 4-weeks oral administration of dimethylarsinic acid.

High-dose chemotherapy-induced platelet defect: inhibition of platelet signal transduction pathways.

Patterns of pesticide use among farmers: implications for epidemiologic research.

The effect of paraquat on the radiosensitivity of melanoma cells: the role of superoxide dismutase & catalase.

[Cytokines and pulmonary fibroses].

Production of transgenic mice expressing the Ki-ras oncogene under the control of a thyroglobulin promoter.

Photobleaching of mono-L-aspartyl chlorin e6 (NPe6): a candidate sensitizer for the photodynamic therapy of tumors.

Investigation of a mechanism for Leydig cell tumorigenesis by linuron in rats.

Hydrogen peroxide as an inducer of elevated tyrosinase level in melanoma cells.

Acridine orange-mediated photodamage to cultured cells.

Effect of indomethacin, aspirin, nordihydroguaiaretic acid, and piperonyl butoxide on cyclophosphamide-induced bladder damage.

c-N-ras is activated infrequently in canine malignant lymphoma.

Identification and characterization of deoxyguanosine adducts of mutagenic beta-alkyl-substituted acrolein congeners.

Cyclophosphamide modulates rat hepatic cytochrome P450 2C11 and steroid 5 alpha-reductase activity and messenger RNA levels through the combined action of acrolein and phosphoramidate mustard.

Human studies do not support the methylation threshold hypothesis for the toxicity of inorganic arsenic.

Alteration of macrophage cytotoxicity through endogenous interferon and tumor necrosis factor alpha induction by propanil.

Evidence for predominantly paracellular transport of thyrotropin-releasing hormone across CACO-2 cell monolayers.

Imaging of activated natural killer cells in mice by positron emission tomography: preferential uptake in tumors.

Tyrphostin-induced inhibition of p210bcr-abl tyrosine kinase activity induces K562 to differentiate.

Dioxin exposure.

Kinetics and cellular localisation of putrescine uptake in human lung tissue.

Erythropoietin increases hemoglobin in cancer patients during radiation therapy.

New insight into oncoprotein-targeted antitumor effect: herbimycin A as an antagonist of protein tyrosine kinase against Ph1-positive leukemia cells.

Cancer in a young population in a dioxin-contaminated area.

Dose response for TCDD promotion of hepatocarcinogenesis in rats initiated with DEN: histologic, biochemical, and cell proliferation endpoints.

Selective induction of alpha 1 isoform of (Na⁺ + K⁺)-ATPase by insulin/insulin-like growth factor-I in cultured rat astrocytes.

70 kDa heat shock cognate protein is a transformation-associated antigen and a possible target for the host's anti-tumor immunity.

Adenocarcinoma production in rats administered 1,2-dimethylhydrazine and fed iron salt and guar gum diets.

Tumor cell heme uptake induces ferritin synthesis resulting in altered oxidant sensitivity: possible role in chemotherapy efficacy.

Expression of cathepsin B and aryl hydrocarbon hydroxylase activities, and of apolipoprotein B in human hepatoma cells maintained long-term in a serum-free medium.

Evidence for a redox-sensitive protein tyrosine kinase in nuclear factor kappa B activation and interleukin 2 production in EL4.NOB1 cells.

Ascorbigen and other indole-derived compounds from Brassica vegetables and their analogs as anticarcinogenic and immunomodulating agents.

Genistein exhibits preferential cytotoxicity to a leukemogenic variant but induces differentiation of a non-leukemogenic variant of the mouse monocytic leukemia Mm cell line.

Russuphelins B, C, D, E and F, new cytotoxic substances from the mushroom *Russula subnigrans* Hongo.

Comparing the results of a Monte Carlo analysis with EPA's reasonable maximum exposed individual (RMEI): a case study of a former wood treatment site.

Mechanism of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-mediated decrease of the nuclear estrogen receptor in MCF-7 human breast cancer cells.

Peculiarities of carcinogenesis under simultaneous oral administration of benzo(a)pyrene and o-cresol in mice.

Medical hypothesis: xenoestrogens as preventable causes of breast cancer.

Induction of chromatid breaks and tetraploidy in Chinese hamster ovary cells by treatment with sodium arsenite during the G2 phase.

Chicken ovalbumin upstream promoter transcription factor (COUP-TF) binds to a peroxisome proliferator-responsive element and antagonizes peroxisome proliferator-mediated signaling.

Role of p21 RAS in p210 bcr-abl transformation of murine myeloid cells.

TCDD-mediated changes in hepatic epidermal growth factor receptor may be a critical event in the hepatocarcinogenic action of TCDD.

Potential confounding of associations involving occupational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Cancer incidence in a population accidentally exposed to 2,3,7,8-tetrachlorodibenzo-para-dioxin.

Potentialiation of CYP1A1 gene expression in MCF-7 human breast cancer cells cotreated with 2,3,7,8-tetrachlorodibenzo-p-dioxin and 12-O-tetradecanoylphorbol-13-acetate.

Rat CYP1A1 negative regulatory element: biological activity and interaction with a protein from liver and hepatoma cells.

Resistance to aflatoxin B1 is associated with the expression of a novel aldo-keto reductase which has catalytic activity towards a cytotoxic aldehyde-containing metabolite of the toxin.

[Anticancer agents targeting oncogene products].

Phototoxicity of lumidoxycycline.

Inhibition of ret tyrosine kinase activity by herbimycin A.

Inhibition of uncoupled respiration in tumor cells. A possible role of mitochondrial Ca²⁺ efflux.

Enhancement by non-mutagenic pesticides of GST-P positive hepatic foci development initiated with diethylnitrosamine in the rat.

The characteristics, capacity and receptor regulation of inositol uptake in 1321N1 astrocytoma cells.

Dermatitis on construction sites.

[Protein tyrosine kinase inhibitor, herbimycin A].

Angiosarcoma, porphyria cutanea tarda, and probable chloracne in a worker exposed to waste oil contaminated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Carcinoembryonic antigen mediates in vitro cell aggregation induced by interferon-gamma in a human colon cancer cell line: requirement for active metabolism and intact cytoskeleton.

A new form of tumor and fetal collagen that binds laminin.

Plasma membrane-dependent activation of the 72-kDa type IV collagenase is prevented by complex formation with TIMP-2.

Method of identifying inhibitors of oncogenic transformation: selective inhibition of cell growth in serum-free medium.

Characterization of calyculin fragments obtained by CNBr-cleavage.

Transport of (2-chloroethyl)-3-sarcosinamide-1-nitrosourea in the human glioma cell line SK-MG-1 is mediated by an epinephrine-sensitive carrier system.

Correlation of in vitro and in vivo growth suppression of MCF-7 human breast cancer by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Metabolites of sodium selenite and methylated selenium compounds administered at cancer chemoprevention levels in the rat.

BCR/ABL oncoprotein-targeted antitumor activity of antisense oligodeoxynucleotides complementary to bcr/abl mRNA and herbimycin A, an antagonist of protein tyrosine kinase: inhibitory effects on in vitro growth of Ph1-positive leukemia cells and BCR/ABL oncoprotein-associated transformed cells.

The human estrogen receptor structural gene contains a DNA sequence that binds activated mouse and human Ah receptors: a possible mechanism of estrogen receptor regulation by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Role of the Ah receptor and the dioxin-inducible [Ah] gene battery in toxicity, cancer, and signal transduction.

The immunoglobulin-binding protein in vitro autophosphorylation site maps to a threonine within the ATP binding cleft but is not a detectable site of in vivo phosphorylation.

Herbimycin A, a pp60c-src tyrosine kinase inhibitor, inhibits osteoclastic bone resorption in vitro and hypercalcemia in vivo.

Human health effects of agrichemical use.

Mechanism of action of alpha-naphthoflavone as an Ah receptor antagonist in MCF-7 human breast cancer cells.

NAD(P)H:quinone oxidoreductase1 (DT-diaphorase) expression in normal and tumor tissues.

Inhibitory effects of alpha- and beta-carotene on croton oil-induced or enzymatic lipid peroxidation and hydroperoxide production in mouse skin epidermis.

Purification of an autocrine growth factor homologous with mouse epithelin precursor from a highly tumorigenic cell line.

Cloning and characterization of complementary DNA encoding the eukaryotic initiation factor 2-associated 67-kDa protein (p67).

Participation of tyrosine kinase in capping, internalization, and antigen presentation through membrane immunoglobulin in BAL17 B lymphoma cells.

Identification and purification of a novel serine proteinase inhibitor.

Dioxin hepatic carcinogenesis: biologically motivated modeling and risk assessment.

Mouse Hepa 1c1c7 hepatoma cells produce complement component C3; 2,3,7,8-tetrachlorodibenzo-p-dioxin fails to modulate this capacity.

Tumors produced in rats with a single dosage of 1,2-dimethylhydrazine.

Relationship between aryl hydrocarbon receptor binding, induction of aryl hydrocarbon hydroxylase and 7-ethoxyresorufin O-deethylase enzymes, and toxic activities of aromatic xenobiotics in animals. A new model.

Peroxisome proliferators: paradigms and prospects.

Polychlorinated biphenyls (PCBs), dibenzo-p-dioxins (PCDDs), and dibenzofurans (PCDFs) as antiestrogens in MCF-7 human breast cancer cells: quantitative structure-activity relationships.

Receptor mechanisms and dose-response models for the effects of dioxins.

Characterization of the aryl hydrocarbon receptor and aryl hydrocarbon responsiveness in human ovarian carcinoma cell lines.

Effect of processing cement to concrete on hexavalent chromium levels.

Combined oestrogen-progestin treatment of vaginal haemorrhage following gonadotrophin-releasing hormone agonist therapy of uterine myomas.

Gamma interferon cooperates with lipopolysaccharide to activate mouse splenic macrophages to an antihistoplasma state.

Environmental toxicology of polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans.

Ligand-dependent recruitment of the Arnt coregulator determines DNA recognition by the dioxin receptor.

DNA topoisomerases and the DNA lesion in human genetic instability syndromes.

Enhanced phosphorylation of a 65 kDa protein is associated with rapid induction of stress proteins in 9L rat brain tumor cells.

Misclassified sarcomas and confounded dioxin exposure.

A role for heparan sulfate in androgen-induced deoxyribonucleic acid synthesis of mouse mammary carcinoma (Shionogi carcinoma 115)-derived SC-3 cells.

Interaction of 2,3,7,8-tetrachlorodibenzo-p-dioxin, 12-O-tetradecanoylphorbol-13-acetate (TPA) and 17 beta-estradiol in MCF-7 human breast cancer cells.

Herbimycin A inhibits the association of p60v-src with the cytoskeletal structure and with phosphatidylinositol 3' kinase.

Important aspects of the evidence for TCDD carcinogenicity in man.

Quantitative immunoassays for type II collagen and its cyanogen bromide peptides.

Stoichiometric analysis of internalization, recycling, and redistribution of photoaffinity-labeled guanylate cyclase/atrial natriuretic factor receptors in cultured murine Leydig tumor cells.

Mouse interferon gamma pretreated hepatocytes conditioned media suppress cytochrome P-450 induction by TCDD in mouse hepatoma cells.

Farming and prostate cancer mortality.

Health risks of "dioxins": a review of environmental and toxicological considerations.

Role of tyrosine phosphorylation in radiation-induced activation of c-jun protooncogene in human lymphohematopoietic precursor cells.

Modeling receptor-mediated processes with dioxin: implications for pharmacokinetics and risk assessment.

Effects of cycloheximide on the induction of CYP1A1 gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in three human breast cancer cell lines.

Effect of external cation concentration and metabolic inhibitors on membrane potential of human glial cells.

Family pesticide use and childhood brain cancer.

Activation of tumoricidal properties in macrophages by lipopolysaccharide requires protein-tyrosine kinase activity.

The mortality experience of workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin in a trichlorophenol process accident.

Identification of soft tissue sarcoma deaths in cohorts exposed to dioxin and to chlorinated naphthalenes.

In vitro cytotoxic and cell transforming activities exerted by the pesticides cyanazine, dithianon, diflubenzuron, procymidone, and vinclozolin on BALB/c 3T3 cells.

Arsenite induced sensitization and self-tolerance of Reuber H35 hepatoma cells.

p60v-src causes tyrosine phosphorylation and inactivation of the N-cadherin-catenin cell adhesion system.

Malignant lymphomas and leukemias, and exposures in the wood industry: an industry-based case-referent study.

³¹P and ¹³C NMR spectroscopic study of wild type and multidrug resistant Ehrlich ascites tumor cells.

Human exposure to 2,3,7,8-TCDD and risk of cancer--a response.

Mechanisms of carcinogenicity of methyl halides.

[Cytochromes P450: toxicologic importance of determination of levels].

Protein tyrosine kinase activation is required for lipopolysaccharide induction of cytokines in human blood monocytes.

Glucocorticoid receptor conversion to high affinity nuclear binding and transcription enhancement activity in Chinese hamster ovary cells subjected to heat and chemical stress.

2,3,7,8-tetrachlorodibenzo-p-dioxin increases cardiac myocyte intracellular calcium and progressively impairs ventricular contractile responses to isoproterenol and to calcium in chick embryo hearts.

HLA class II molecule-mediated signal transduction mechanism responsible for the expression of interleukin-1 beta and tumor necrosis factor-alpha genes induced by a staphylococcal superantigen.

Approach to risk assessment of PCDDs and PCDFs in Canada.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on protein kinase C and inositol phosphate metabolism in primary cultures of rat hepatocytes.

Ifosfamide. Patient care management.

In vitro cytotoxicity of mono-, di-, and trichloroacetate and its modulation by hepatic peroxisome proliferation.

Mouse endometrium stromal cells express a polycyclic aromatic hydrocarbon-inducible cytochrome P450 that closely resembles the novel P450 in mouse embryo fibroblasts (P450EF).

Development of bioassays and approaches for the risk assessment of 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds.

Multiple end point procedure to evaluate risk from pesticides.

Measurement of chromosomal aberrations, sister chromatid exchange, hprt mutations, and DNA adducts in peripheral lymphocytes of human populations at increased risk for cancer.

Effects of polychlorinated dibenzofurans on compounds in hepatic DNA of female Sprague-Dawley rats: structure dependence and mechanistic considerations.

Regulation of cytochrome P450 expression in a novel liver cell line from zebrafish (*Brachydanio rerio*).

Hck tyrosine kinase activity modulates tumor necrosis factor production by murine macrophages.

Photodynamic effects of new silicon phthalocyanines: in vitro studies utilizing rat hepatic microsomes and human erythrocyte ghosts as model membrane sources.

Phospholipase C activation in the cytotoxic response of human natural killer cells requires protein-tyrosine kinase activity.

Potent intracellular oxidative stress exerted by the carcinogen 4-nitroquinoline-N-oxide.

Mutagenicity of chrysene, its methyl and benzo derivatives, and their interactions with cytochromes P-450 and the Ah-receptor; relevance to their carcinogenic potency.

The mutagenicity and interactions of 2- and 4-(acetylamino)fluorene with cytochrome P450 and the aromatic hydrocarbon receptor may explain the difference in their carcinogenic potency.

Carcinogenicity of TCDD in laboratory animals: implications for risk assessment.

Activation with superantigens induces programmed death in antigen-primed CD4+ class II+ major histocompatibility complex T lymphocytes via a CD11a/CD18-dependent mechanism.

Assessment of P-glycoprotein-dependent drug transport in isolated rat hepatocytes using rhodamine 123.

Interactions of flavonoids, trace metals, and oxygen: nuclear DNA damage and lipid peroxidation induced by myricetin.

Relation between glucose-stimulated insulin secretion and intracellular calcium accumulation studied with a superfusion system of a glucose-responsive pancreatic beta-cell line MIN6.

Arsenic-induced DNA-strand breaks associated with DNA-protein crosslinks in human fetal lung fibroblasts.

Gene expression and cell proliferation in rat liver after 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure.

[Toxicology of tobacco].

Frequency of micronuclei induced in cultured lymphocytes by highly toxic organochlorine congeners.

NTP Toxicology and Carcinogenesis Studies of Pentachloroanisole (CAS No. 1825-21-4) in F344 Rats and B6C3F1 Mice (Feed Studies).

Toxicology, structure-function relationship, and human and environmental health impacts of polychlorinated biphenyls: progress and problems.

Ah receptor binding properties of indole carbinols and induction of hepatic estradiol hydroxylation.

Occupational physicians and environmental medicine.

Dioxin toxicity. Agency for Toxic Substances and Disease Registry.

The herpes simplex virus type 1 US11 gene product is a phosphorylated protein found to be non-specifically associated with both ribosomal subunits.

Effects of arsenite treatment on NAD(P)H:quinone acceptor oxidoreductase activity in liver, lung, kidney, and heart of the rat. Comparison to induction by the polyaromatic hydrocarbon, beta-naphthoflavone.

Induction of the adaptive response of Escherichia coli to alkylation damage by the environmental mutagen, methyl chloride.

Nonresponsiveness of normal human fibroblasts to dioxin correlates with the presence of a constitutive xenobiotic response element-binding factor.

Enzyme, whole cell and invivo tumor-models to identify and assess inhibitors of pp60(c-SRC).

[The concept of environmental pollution for emission control in regulating carcinogenic air pollutants in outdoor air].

Effect of protein kinase inhibitors on IL-8/NAP-1 release from human umbilical vein endothelial cells.

Comparative pharmacokinetics of ifosfamide, 4-hydroxyifosfamide, chloroacetaldehyde, and 2- and 3-dechloroethylifosfamide in patients on fractionated intravenous ifosfamide therapy.

A comparison of the effects of aphidicolin and other inhibitors on topoisomerase II-directed cytotoxic drugs.

Growth stimulation of primary rat hepatocytes by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Biotransformation of the antiviral agent 1,3,4-thiadiazol-2-ylcyanamide (LY217896) and characteristics of a mesoionic ribose metabolite.

Predicting rodent carcinogenicity of halogenated hydrocarbons by in vivo biochemical parameters.

Herbicides and cancer.

Resistance of murine lung tumors to xenobiotic-induced cytotoxicity.

Occupational risk factors for acute leukaemia: a case-control study.

Toxicology and hazard potential of trifluralin.

Nephrotoxicity of the 1:1 acrolein-glutathione adduct in the rat.

Review of a study reporting an association between 2,4-dichlorophenoxyacetic acid and canine malignant lymphoma: report of an expert panel.

An evaluation of three pesticides: pirithione, supercypermethrin and metolachlor in transformation bioassays of BHK21 and hamster embryo cells.

Prevalence of glioblastoma multiforme subjects with prior herbicide exposure.

A novel pharmacological approach for paraquat poisoning in rat and A549 cell line using ambroxol, a lung surfactant synthesis inducer.

Soft tissue sarcoma, aplastic anaemia, and exposure to pesticides.

Reproductive study of acrolein on two generations of rats.

Disposition, bioavailability, and serum protein binding of pentachlorophenol in the B6C3F1 mouse.

NTP technical report on the toxicity studies of Glyphosate (CAS No. 1071-83-6) Administered In Dosed Feed To F344/N Rats And B6C3F1 Mice.

Acrolein initiates rat urinary bladder carcinogenesis.

Cancer mortality among licensed herbicide applicators.

Mitochondrial breakage induced by the herbicide paraquat in cultured human lung cells.

[Toxic and drug-induced lesions of the pulmonary parenchyma].

[Appearance of different panmyelopathies in the same patient].

Family pesticide use in the home, garden, orchard, and yard.

Two-year toxicity and carcinogenicity study of acrolein in rats.

Phenoxy herbicides and chlorophenols: a case control study on soft tissue sarcoma and malignant lymphoma.

Preferential increase of heterochromatin in venular endothelium of lung in mice after administration of dimethylarsinic acid, a major metabolite of inorganic arsenics.

Canine malignant lymphoma and 2,4-dichlorophenoxyacetic acid herbicides.

Role of lipid peroxidation and DNA damage in paraquat toxicity and the interaction of paraquat with ionizing radiation.

Alar: the aftermath.

Effects of ethyl 4-chloro-2-methylphenoxyacetate on bile composition in golden hamsters.

Mechanisms of aldehyde-induced bronchial reactivity: role of airway epithelium.

Cytogenetic effects of alachlor and/or atrazine in vivo and in vitro.

Formation of thymidine adducts and cross-linking potential of 2-bromoacrolein, a reactive metabolite of tris(2,3-dibromopropyl)phosphate.

Occupation and soft-tissue sarcoma in northeastern Italy.

Assessment of pentachlorophenol exposure in humans using the clearance concept.

Brain cancer and farming in western Canada.

Regression mechanism of cyanamide-induced inclusion bodies in the rat: a useful experimental pattern to study the beta-glycogen metabolism of hepatocytes.

The effect of a commercial 2,4-D formulation on chemical- and viral-induced tumor production in mice.

Spermine dialdehyde, a novel ex vivo purging agent for both allogeneic and autologous bone marrow transplantations.

Cyclophosphamide decreases O⁶-alkylguanine-DNA alkyltransferase activity in peripheral lymphocytes of patients undergoing bone marrow transplantation.

The effects of goitrogenesis, involution, and goitrogenic rechallenge on the clonogenic cell content of the rat thyroid.

Selective eosinophil leukocyte recruitment by transendothelial migration and not by leukocyte-endothelial cell adhesion.

The plateau phase rat goiter contains a sub-population of TSH-responsive follicular cells capable of proliferation following transplantation.

Enhancement of cytotoxic T lymphocyte growth from spleens of P815-tumor-bearing host mice with mafosfamide.

[Synthesis and antitumor activity of substituted benzaldehyde/cinnamaldehyde selenosemicarbazones].

Preservation of keratin expression in oral mucosa using a novel transport medium.

Occupational exposure to chromium, copper and arsenic during work with impregnated wood in joinery shops.

Activation of 6-aminochrysene to genotoxic products by different forms of rat liver cytochrome P450 in an O-acetyltransferase-overexpressing *Salmonella typhimurium* strain (NM2009).

Evaluation of amitrole mutagenicity in *Salmonella typhimurium* using prostaglandin synthase activation.

Responses of vascular endothelial oxidant metabolism to lipopolysaccharide and tumor necrosis factor- α .

Comparative metabolism of the cysteine and homocysteine conjugates of propachlor by in situ perfused kidneys of rats.

Quantitative bioassay using laser-monitored bacteria to assess toxicology and metabolism of bioactive Group IV compounds.

Genotoxic effects of sodium arsenite on human cells.

Decreased stress inducibility of the HSP68 protein in a rat hepatoma variant clone.

Cefaclor uptake by the proton-dependent dipeptide transport carrier of human intestinal Caco-2 cells and comparison to cephalixin uptake.

The neural cell adhesion molecule (NCAM) heparin binding domain binds to cell surface heparan sulfate proteoglycans.

Regulation of cytochrome P450IA1 gene expression in a human intestinal cell line, Caco-2.

Stable heparin-producing cell lines derived from the Furth murine mastocytoma.

[Dioxin pollution and the health risk: long-term studies following the Icmesa disaster].

Polynuclear aromatic hydrocarbon carcinogens as antiestrogens in MCF-7 human breast cancer cells: role of the Ah receptor.

Protein tyrosine phosphorylation as an indicator of 2,3,7,8-tetrachloro-p-dioxin exposure in vivo and in vitro.

Reduced intracellular drug accumulation in the absence of P-glycoprotein (mdr1) overexpression in mitoxantrone-resistant human MCF-7 breast cancer cells.

Quercetin, an inhibitor of heat shock protein synthesis, inhibits the acquisition of thermotolerance in a human colon carcinoma cell line.

Inhibition of acute TCDD toxicity by treatment with anti-tumor necrosis factor antibody or dexamethasone.

Regulation of 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible expression of aldehyde dehydrogenase in hepatoma cells.

Cytogenetic effects of sodium azide encapsulated in liposomes on heteroploid cell cultures.

Integrated approach for evaluating species and interindividual differences in responsiveness to dioxins and structural analogs.

Mechanism of action of aryl hydrocarbon receptor antagonists: inhibition of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced CYP1A1 gene expression.

Cell transforming and oncogenic activity of 2,3,7,8-tetrachloro--and 2,3,7,8 tetrabromodibenzo-p-dioxin.

Cytosolic and intranuclear calcium signals in rat basophilic leukemia cells as revealed by a confocal fluorescence microscope.

Non-Hodgkin's lymphoma and occupational exposure.

Pesticides and non-Hodgkin's lymphoma.

Immunosuppressive therapy and acquired immunological disorders.

Hematopoietic cytokines inhibit apoptosis induced by transforming growth factor beta 1 and cancer chemotherapy compounds in myeloid leukemic cells.

Control of growth and differentiation of Philadelphia chromosome-positive leukemia cells by tyrosine kinase inhibitors.

Iron deficiency and anemia of chronic disease. Clues to differentiating these conditions.

Proxy respondents and the validity of occupational and other exposure data. The Selected Cancers Cooperative Study Group.

Photosensitization by anticancer agents. 11. Mechanisms of photosensitization of human leukemic cells by diaminoanthraquinones: singlet oxygen and radical reactions.

Effect of herbimycin A, an antagonist of tyrosine kinase, on bcr/abl oncoprotein-associated cell proliferations: abrogative effect on the transformation of murine hematopoietic cells by transfection of a retroviral vector expressing oncoprotein P210bcr/abl and preferential inhibition on Ph1-positive leukemia cell growth.

Protein tyrosine phosphorylation induced via the IgG receptors Fc gamma R1 and Fc gamma R2 in the human monocytic cell line THP-1.

Inhibition of insulin-like growth factor-I responses in MCF-7 cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds.

Negative regulation of the murine cytosolic aldehyde dehydrogenase-3 (Aldh-3c) gene by functional CYP1A1 and CYP1A2 proteins.

Ingested arsenic, keratoses, and bladder cancer.

Induction of class 3 aldehyde dehydrogenase in the mouse hepatoma cell line Hepa-1 by various chemicals.

Cadherin-mediated cell-cell adhesion is perturbed by v-src tyrosine phosphorylation in metastatic fibroblasts.

In vitro oxygen consumption and motility of *Cryptobia salmositica*, *Cryptobia bullocki*, and *Cryptobia catostomi* (Sarcomastigophora: Kinetoplastida).

Collagen-induced arthritis in rats. Examination of the epitope specificities of circulating and cartilage-bound antibodies produced by outbred and inbred rats using cyanogen bromide-derived peptides purified from heterologous and homologous type II collagens.

A simple assay for determination of iron release from ferritin in neuroblastoma cells.

Comparative assessment of the cytotoxic effects of different xenobiotics in three hepatoma cell lines.

Characterization of the promotion of altered hepatic foci by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the female rat.

Herbimycin A, an inhibitor of tyrosine kinase, prolongs survival of mice inoculated with myeloid leukemia C1 cells with high expression of v-abl tyrosine kinase.

Development of acute thermotolerance in L929 cells: lack of HSP28 synthesis and phosphorylation.

Chemopreventive effects of green tea components on hepatic carcinogenesis.

Development of gel staining techniques for detecting the secretion of procathepsin D (52-kDa protein) in MCF-7 human breast cancer cells.

Type I keratinocyte transglutaminase: expression in human skin and psoriasis.

Growth inhibitory and antimutagenic activity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in T47D human breast cancer cells.

Specific inhibition of NGF receptor tyrosine kinase activity by K-252a.

Neoplastic transformation of immortalized human keratinocytes by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Dose-response relationships for chronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin in a rat tumor promotion model: quantification and immunolocalization of CYP1A1 and CYP1A2 in the liver.

Hepatotoxicity and carcinogenicity in female Sprague-Dawley rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): a pathology working group reevaluation.

Protein-linked isoprenoid lipids in dexamethasone-treated human lymphoid lines in culture.

[Differentiation therapy of hematologic malignancies: principles, current status and perspectives].

Influence of stepwise uncoupling and temporary anoxia on pancreatic enzyme secretion by isolated rat acini.

Mechanism of dioxin action: Ah receptor-mediated increase in promoter accessibility in vivo.

Energy-dependent accumulation of daunorubicin into subcellular compartments of human leukemia cells and cytoplasts.

Relationship of VP-16 to the classical multidrug resistance phenotype.

Posttranslational regulation of spermidine/spermine N1-acetyltransferase with stress.

Neutrophils contribute to TNF induced myocardial tolerance to ischaemia.

Cancer incidence following chlorophenol exposure in a community in southern Finland.

Pesticides and other agricultural risk factors for non-Hodgkin's lymphoma among men in Iowa and Minnesota.

The role of occupational exposure and immunodeficiency in B-cell malignancies. Working Group on the Epidemiology of Hematolymphopoietic Malignancies in Italy.

Mechanism of action of a repressor of dioxin-dependent induction of Cyp1a1 gene transcription.

Partial amino acid sequence of a somatostatin receptor isolated from GH4C1 pituitary cells.

Heat-shock responsive elements in the induction of the multidrug resistance gene (MDR1).

Risk factors for adult soft tissue sarcoma in northern Italy.

Cancer risk among Danish and Italian farmers.

Anti-estrogenic action of 2,3,7,8-tetrachlorodibenzo-p-dioxin: tissue-specific regulation of estrogen receptor in CD1 mice.

Growth inhibition by anchorage-deficiency is associated with increased level but reduced phosphorylation of mutant p53.

Characterization of the aryl hydrocarbon receptor in the human C-4II cervical squamous carcinoma cell line.

6-Methyl-1,3,8-trichlorodibenzofuran (MCDF) as an anti-estrogen in human and rodent cancer cell lines: evidence for the role of the Ah receptor.

Heat shock alters the composition of heteromeric steroid receptor complexes and enhances receptor activity in vivo.

Induction of differentiation of human leukemia cells with a structurally altered c-abl (bcr/abl) gene by herbimycin A, an inhibitor of tyrosine kinase activity.

Lysyl hydroxylation in collagens from hyperplastic callus and embryonic bones.

17 beta-estradiol hydroxylation catalyzed by human cytochrome P450 1A1: a comparison of the activities induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin in MCF-7 cells with those from heterologous expression of the cDNA.

T84 cells: anion selectivity demonstrates expression of Cl⁻ conductance affected in cystic fibrosis.

Identification, purification, and partial sequence analysis of autotaxin, a novel motility-stimulating protein.

Tyrosine protein kinase is involved in anti-IgM-mediated signaling in BAL17 B lymphoma cells.

Heme oxygenase: expression in human retina and modulation by stress agents in a human retinoblastoma cell model system.

Mortality of a young population after accidental exposure to 2,3,7,8-tetrachlorodibenzodioxin.

Chromosomal aberrations and sister-chromatid exchanges induced by N-nitroso-2-acetylaminofluorene and their modifications by arsenite and selenite in Chinese hamster ovary cells.

The health effects of dioxin on humans.

Dioxin risk assessment for human health: scientifically defensible or fantasy?

Potential antitumor agents. 64. Synthesis and antitumor evaluation of dibenzo[1,4]dioxin-1-carboxamides: a new class of weakly binding DNA-intercalating agents.

Serum 2,3,7,8-tetrachlorodibenzo-p-dioxin levels of New Zealand pesticide applicators and their implication for cancer hypotheses.

Soluble aggregates of the human PiZ alpha 1-antitrypsin variant are degraded within the endoplasmic reticulum by a mechanism sensitive to inhibitors of protein synthesis.

Ewing's bone sarcoma, paternal occupational exposure, and other factors.

Chemical cross-linking of the cytosolic and nuclear forms of the Ah receptor in hepatoma cell line 1c1c7.

Transcriptional derepression of the murine Cyp1a-1 gene by mevinolin.

Development of a quantitative in vitro transformation assay for kidney epithelial cells.

Animal cancer tests and cancer prevention.

Effects of herbimycin A derivatives on growth and differentiation of K562 human leukemic cells.

Old and new reflections on dioxin.

Reconciling old and new findings on dioxin.

Toxicity of monochloroacetic acid administered by gavage to F344 rats and B6C3F1 mice for up to 13 weeks.

Genotoxicity of 2,4,6-trichlorophenol in V79 Chinese hamster cells.

[Observations on chlorophenol-associated cancer risk in KÅrkÅI|Å].

Peroxisome proliferators: a model for receptor mediated carcinogenesis.

Mechanism of benzo[a]pyrene-induced Cyp1a-1 gene expression in mouse Hepa 1c1c7 cells: role of the nuclear 6 s and 4 s proteins.

Energy-dependent processes involved in reduced drug accumulation in multidrug-resistant human lung cancer cell lines without P-glycoprotein expression.

Secretion of thioredoxin by normal and neoplastic cells through a leaderless secretory pathway.

The molecular mechanism of peroxisome proliferator action: a model for species differences and mechanistic risk assessment.

Russuphelin A, a new cytotoxic substance from the mushroom *Russula subnigricans* Hongo.

Zymosan-triggered tyrosine phosphorylation in mouse bone-marrow-derived macrophages is enhanced by respiratory-burst priming agents.

Genotoxicity of environmental agents in human mammary epithelial cells.

Kinetic properties of the bovine corneal aldehyde dehydrogenase (BCP 54).

Use of multiple-cause mortality data in epidemiologic analyses: US rate and proportion files developed by the National Institute for Occupational Safety and Health and the National Cancer Institute.

Synergism among oxidants, proteinases, phospholipases, microbial hemolysins, cationic proteins, and cytokines.

Mechanism for the hepatotoxicity of the antiandrogen, nilutamide. Evidence suggesting that redox cycling of this nitroaromatic drug leads to oxidative stress in isolated hepatocytes.

The potentiation of 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity by tamoxifen in female CD1 mice.

Oncostatin M induces tyrosine phosphorylation in endothelial cells and activation of p62yes tyrosine kinase.

Benzo[e]pyrene elicits changes in the biochemical activities and chromatographic behavior of murine hepatic cytochromes P-450 that are distinct from those induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Increased hydrogen peroxide concentration in human tumor cells due to a nitroxide free radical.

Differentiation of quail myoblasts transformed with a temperature sensitive mutant of Rous sarcoma virus. I. Relationship between differentiation and tyrosine kinase of src gene product.

Health status and needs of migrant farm workers in the United States: a literature review.

The presence of genotoxic and bioactive components in indigo dyed fabrics--a possible health risk?

Molecular cloning of rat prostate transglutaminase complementary DNA. The major androgen-regulated protein DP1 of rat dorsal prostate and coagulating gland.

Recent developments on the hazards posed by 2,3,7,8-tetrachlorodibenzo-p-dioxin in soil: implications for setting risk-based cleanup levels at residential and industrial sites.

Participation of rat liver cytochrome P450 2E1 in the activation of N-nitrosodimethylamine and N-nitrosodiethylamine to products genotoxic in an acetyltransferase-overexpressing Salmonella typhimurium strain (NM2009).

Altered expression of a mouse epidermal cytoskeletal protein is a sensitive marker for proliferation induced by tumor promoters.

Cloning and heterologous expression of cDNA encoding class alpha rat glutathione transferase 8-8, an enzyme with high catalytic activity towards genotoxic alpha,beta-unsaturated carbonyl compounds.

Generation and functional characterization of ovine bone marrow-derived macrophages.

Dioxin induces expression of c-fos and c-jun proto-oncogenes and a large increase in transcription factor AP-1.

Influence of metabolic inhibitors on the degradation of tight junctions in HT29 cells.

[Synthesis of an artificial gene coding for thymosin alpha1 and its expression in Escherichia coli as a hybrid with human tumor necrosis factor].

Interleukin-1 beta suppresses the induction of P4501A1 and P4501A2 mRNAs in isolated hepatocytes.

Benzoquinonoid ansamycins possess selective tumoricidal activity unrelated to src kinase inhibition.

Photodynamic effects of chloroaluminum phthalocyanine tetrasulfonate are mediated by singlet oxygen: in vivo and in vitro studies utilizing hepatic microsomes as a model membrane source.

NTP Toxicology and Carcinogenesis Studies of Methyl Bromide (CAS: 74-83-9) in B6C3F1 Mice (Inhalation Studies).

2,3,7,8-Tetrachlorodibenzo-p-dioxin and ethinylestradiol as co-mitogens in cultured rat hepatocytes.

[Thermal distribution in the agar phantom by a new intracavitary RF applicator for prostate gland].

Characterization of the human myeloid cell nuclear differentiation antigen: relationship to interferon-inducible proteins.

NTP Toxicology and Carcinogenesis Studies of Monochloroacetic Acid (CAS No. 79-11-8) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Association of blebbing with assembly of cytoskeletal proteins in ATP-depleted EL-4 ascites tumour cells.

Cellular sequence of tracheal repair in sheep after smoke inhalation injury.

Posttreatment with sodium arsenite alters the mutational spectrum induced by ultraviolet light irradiation in Chinese hamster ovary cells.

Comparative toxicity of four chlorinated dibenzo-p-dioxins (CDDs) and their mixture. Part II: Structure-activity relationships with inhibition of hepatic phosphoenolpyruvate carboxykinase, pyruvate carboxylase, and gamma-glutamyl transpeptidase activities.

Analysis of DNA strand breaks induced in rodent liver in vivo, hepatocytes in primary culture, and a human cell line by chlorinated acetic acids and chlorinated acetaldehydes.

Reduced expression of manganese superoxide dismutase in cells resistant to cytolysis by tumor necrosis factor.

Microbial secondary metabolism: a new theoretical frontier for academia, a new opportunity for industry.

Weight of the evidence on the human carcinogenicity of 2,4-D.

Paraquat increases superoxide dismutase activity and radiation resistance in two mouse lymphoma L5178Y cell strains of different radiosensitivities.

Occupational exposure to chlorophenoxy herbicides and chlorophenols.

Alar's risks.

Cancer mortality in workers exposed to chlorophenoxy herbicides and chlorophenols.

Further evidence that pesticides or herbicides cause non-Hodgkin's lymphoma.

Toxicology and carcinogenesis studies of two grades of pentachlorophenol in B6C3F1 mice.

Case-control study of canine malignant lymphoma: positive association with dog owner's use of 2,4-dichlorophenoxyacetic acid herbicides.

Effects of ethyl 4-chloro-2-methylphenoxyacetate on hepatic peroxisomal enzymes in rats.

Free radical-induced carbonyl content in protein of estrogen-treated hamsters assayed by sodium boro[3H]hydride reduction.

Oncogenicity study of trifluralin in B6C3F1 mice.

Non-Hodgkin's lymphoma among Vietnam veterans.

Re: "2,4-D, 2,4,5-T, and 2,3,7,8-TCDD: an overview".

Genotoxicity studies on the preemergence herbicide trifluralin.

Non-Hodgkin's lymphoma in a cohort of Vietnam veterans.

The effects of Tordon 202c exposure on urethan-induced lung adenoma formation in female CD-1 mice.

Cytogenetic biomonitoring of an Italian population exposed to pesticides: chromosome aberration and sister-chromatid exchange analysis in peripheral blood lymphocytes.

Human health effects: what the data indicate.

A cohort mortality study of forestry workers exposed to phenoxy acid herbicides.

Incidence rates of lymphomas and soft-tissue sarcomas and environmental measurements of phenoxy herbicides.

Mortality and incidence of cancer at four factories making phenoxy herbicides.

Expression of bovine superoxide dismutase in *Drosophila melanogaster* augments resistance of oxidative stress.

Germinomas and teratoid siphon anomalies in softshell clams, *Mya arenaria*, environmentally exposed to herbicides.

Re: Letter to the editor on "Agent orange and its associated dioxins: assessment of a controversy".

Effects of 2,4,5-trichlorophenoxyacetic acid, pentachlorophenol, methylprednisolone, and Freund's adjuvant on 2-hydroxyethylnitrosourea carcinogenesis in MRC-Wistar rats.

Monuron.

Trifluralin.

Picloram.

Pentachlorophenol.

Cyclophosphamide-associated carcinoma of urothelium: modalities for prevention.

Cancer mortality among workers in chemical plant contaminated with dioxin.

Use and mechanism of action of AS101 in protecting bone marrow colony forming units-granulocyte-macrophage following purging with ASTA-Z 7557.

A new insight into the histogenesis of 'mesodermomas'--malignant mesotheliomas.

Inhibition of cellular thymidylate synthesis by cytotoxic propenal derivatives of pyrimidine bases and deoxynucleosides.

An overview of peroxisome proliferator-induced hepatocarcinogenesis.

Evidence for acrolein-modified DNA in peripheral blood leukocytes of cancer patients treated with cyclophosphamide.

Tumor necrosis factor-alpha increases Mn-SOD expression: protection against oxidant injury.

Hepatic peroxisome proliferators induce morphologic transformation of Syrian hamster embryo cells, but not peroxisomal beta oxidation.

Inverse correlation between resistance towards copper and towards the redox-cycling compound paraquat: a study in copper-tolerant hepatocytes in tissue culture.

Tissue peroxidase in the normal and neoplastic salivary gland.

Red cell regulation of tumor necrosis factor-induced human neutrophil cytostatic activity.

Detection of acrolein and crotonaldehyde DNA adducts in cultured human cells and canine peripheral blood lymphocytes by ³²P-postlabeling and nucleotide chromatography.

[Chemical and biochemical studies on reactivities, formations and toxicities of reactive oxygen species].

Age- and sex-related differences in activation of the carcinogen 7-hydroxymethyl-12-methylbenz[a]anthracene to an electrophilic sulfuric acid ester metabolite in rats. Possible involvement of hydroxysteroid sulfotransferase activity.

Regulation of intracellular acetyl-CoA carboxylase by ATP depletors mimics the action of the 5'-AMP-activated protein kinase.

IgE-induced tyrosine phosphorylation of phospholipase C-gamma 1 in rat basophilic leukemia cells.

Is dioxin carcinogenic?

Expression of HSP-28 and three HSP-70 genes during the development and decay of thermotolerance in leukemic and nonleukemic human tumors.

Relative liver tumour promoting activity and toxicity of some polychlorinated dibenzo-p-dioxin- and dibenzofuran-congeners in female Sprague-Dawley rats.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on 17 beta-estradiol-induced glucose metabolism in MCF-7 human breast cancer cells: ¹³C nuclear magnetic resonance spectroscopy studies.

Specific reduction of I-compound levels in DNA from spontaneous hepatomas of 22-24 month old male C3H mice.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes unbalanced growth in 5L rat hepatoma cells.

Induction of NAD(P)H:quinone reductase in human peripheral blood lymphocytes.

Tumor necrosis factor involvement in 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated endotoxin hypersensitivity in C57BL/6J mice congenic at the Ah locus.

[Increased risk of soft tissue sarcoma in persons exposed to dioxin].

Human NAD(P)H:quinone oxidoreductase (NQO1) gene structure and induction by dioxin.

Pathology reevaluation of the Kociba et al. (1978) bioassay of 2,3,7,8-TCDD: implications for risk assessment.

Protein kinase C regulates proliferation of mast cells and the expression of the mRNAs of fos and jun proto-oncogenes during activation by IgE-Ag or calcium ionophore A23187.

Human AH locus polymorphism and cancer: inducibility of CYP1A1 and other genes by combustion products and dioxin.

Arsenite as the probable active species in the human carcinogenicity of arsenic: mouse micronucleus assays on Na and K arsenite, orpiment, and Fowler's solution.

Effect of herbimycin A on growth and pp60c-src activity in human colon tumor cell lines.

Aromatic hydrocarbon responsiveness-receptor agonists generated from indole-3-carbinol in vitro and in vivo: comparisons with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Specific adhesion of carcinoembryonic antigen-bearing colorectal cancer cells to immobilized carcinoembryonic antigen.

DNA binding properties of the Ah receptor in wild-type and variant mouse hepatoma cells.

Superinduction of 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible expression of aldehyde dehydrogenase by the inhibition of protein synthesis.

Anti-IgM-mediated growth inhibition of a human B lymphoma cell line is independent of phosphatidylinositol turnover and protein kinase C activation and involves tyrosine phosphorylation.

Detection and characterization of the Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in the human colon adenocarcinoma cell line LS180.

Inhibitory effect of interleukin-4 on the in vitro growth of Ph1-positive acute lymphoblastic leukemia cells.

Inhibition of the specific DNA binding activity of the dioxin receptor by phosphatase treatment.

Toxic and neoplastic responses in the nasal passages: future research needs.

Homotypic aggregation of human cell lines by HLA class II-, class Ia- and HLA-G-specific monoclonal antibodies.

Lipid peroxidation in rat AH-130 hepatoma cells enriched in vitro with arachidonic acid.

Risk assessment of 2,3,7,8-TCDD using a biologically based cancer model: a reevaluation of the Kociba et al. bioassay using 1978 and 1990 histopathology criteria.

US government orders new look at dioxin.

Induction of hsp 72/73 by herbimycin A, an inhibitor of transformation by tyrosine kinase oncogenes.

The transient appearance of small blastoid cells in the marrow after bone marrow transplantation.

Downregulation of the Ah receptor in mouse hepatoma cells treated in culture with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Engagement of interleukin-7 receptor stimulates tyrosine phosphorylation, phosphoinositide turnover, and clonal proliferation of human T-lineage acute lymphoblastic leukemia cells.

Occupation and risk of Hodgkin's disease in north-east Italy.

Ah receptor mediating induction of cytochrome P450IA1 in a novel continuous human liver cell line (Mz-Hep-1). Detection by binding with [3H]2,3,7,8-tetrachlorodibenzo-p-dioxin and relationship to the activity of aryl hydrocarbon hydroxylase.

Cellular retention, toxicity and carcinogenic potential of seafood arsenic. I. Lack of cytotoxicity and transforming activity of arsenobetaine in the BALB/3T3 cell line.

Long-term effects of chemical disasters. Lessons and results from Seveso.

H4IIE rat hepatoma cell bioassay-derived 2,3,7,8-tetrachlorodibenzo-p-dioxin equivalents in colonial fish-eating waterbird eggs from the Great Lakes.

Dioxin and mortality from cancer.

Heat treatment induces an increase in intracellular cyclic AMP content in human epidermoid A-431 cells.

Evidence for the mechanism of action of the 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated decrease of nuclear estrogen receptor levels in wild-type and mutant mouse Hepa 1c1c7 cells.

Analysis of native forms and isoform compositions of the mouse 90-kDa heat shock protein, HSP90.

EPA moves to reassess the risk of dioxin.

Differences in 2,3,7,8-tetrachlorodibenzo-p-dioxin-inducible CYP1A1 expression in human breast carcinoma cell lines involve altered trans-acting factors.

Toxicity equivalents and EPA's risk assessment of 2,3,7,8-TCDD.

Natural carcinogens and dioxin.

An initiation-promotion assay in rat liver as a potential complement to the 2-year carcinogenesis bioassay.

Use of epidemiology data to assess the cancer risk of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

PDGF, CSF-1, and EGF induce tyrosine phosphorylation of p120, a pp60src transformation-associated substrate.

Isolation and characterization of cDNA clones for rat liver 10-formyltetrahydrofolate dehydrogenase.

The issues of transport multiplicity and energetics pertaining to methotrexate efflux in L1210 cells addressed by an analysis of cis and trans effects of inhibitors.

Promotion of mouse lung tumors by bioaccumulated polychlorinated aromatic hydrocarbons.

Association of the crosslinked IgE receptor with the membrane skeleton is independent of the known signaling mechanisms in rat basophilic leukemia cells.

Ovarian hormones enhance 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated increases in cell proliferation and preneoplastic foci in a two-stage model for rat hepatocarcinogenesis.

[Inhibitors for protein tyrosine kinases, erbstatin, genistein and herbimycin A, induce differentiation of human neural tumor cell lines].

Characterization of the cell-cycle-regulated protein calyculin from Ehrlich ascites tumor cells. Identification of two binding proteins obtained by Ca²⁺(+)-dependent affinity chromatography.

Modulation of 2,3,7,8-tetrachlorodibenzo-p-dioxin and phenobarbital-induced promotion of hepatocarcinogenesis in rats by the type of diet and vitamin A deficiency.

Secretion of a unique collagen by spontaneously transformed murine keratinocytes (PAM cells) in vitro.

Presence of the 4 S polycyclic hydrocarbon-binding protein in H4-II-E cells.

Toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in vitro: H4IIEC3-derived 5L hepatoma cells as a model system.

[New antineoplastic antibiotics, new analogs, modifiers of biological reactions and oncogene inhibitors].

Cancer mortality in workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Cytosolic free Ca²⁺ in daunorubicin and vincristine resistant Ehrlich ascites tumor cells. Drug accumulation is independent of intracellular Ca²⁺ changes.

Influence of extracellular pH on the accumulation and cytotoxicity of N-(4-methylphenylsulfonyl)-N'-(4-chlorophenyl)urea in human cell lines.

Long-term carcinogenesis studies on 2,3,7,8-tetrachlorodibenzo-p-dioxin and hexachlorodibenzo-p-dioxins.

A one-year carcinogenicity study with 2,6-dichlorobenzonitrile (Dichlobenil) in male Swiss mice: preliminary note.

The association between cancer mortality and dioxin exposure: a comment on the hazard of repetition of epidemiological misinterpretation.

Cellular pharmacokinetics of vinblastine and other vinca alkaloids in MO4 cells.

The tissue distribution of 2,3,7,8-chlorine substituted dibenzo-p-dioxins in humans who died of cancer.

Roles of UDP-glucuronosyltransferases in chemical carcinogenesis.

An exploratory study of environmental and medical factors potentially related to childhood cancer.

Regulation of the truncation of luteinizing hormone receptors at the plasma membrane is different in rat and mouse Leydig cells.

Blood levels of 2,3,7,8-tetrachlorodibenzo-p-dioxin in chemical workers after chloracne and in comparison groups.

Chronic inhalation toxicity and carcinogenicity study of methyl bromide in Wistar rats.

The epidemiology of populations exposed to dioxin.

Human exposure to 2,3,7,8-TCDD and risk of cancer.

On the mechanism of action of interferons: interaction with nonsteroidal anti-inflammatory agents, pentoxifylline (Trental) and cGMP inducers.

Use and selectivity of herbimycin A as inhibitor of protein-tyrosine kinases.

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces cytochrome P450IA1 enzyme activity by activating transcription of the corresponding gene.

Phosphorylation of lipocortin-1 by the epidermal growth factor receptor.

[Chlorophenol predisposition-associated cancer risk in K rk ].

[Association between cancer and exposure to chlorophenols in a county located in southern Finland].

Response of the antral mucosa of the rat stomach to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[The effect of finoptin on the metabolism and pharmacological action of cyclophosphane in vivo and in vitro].

Aldehydes: occurrence, carcinogenic potential, mechanism of action and risk assessment.

Heat shock proteins in cultured human keratinocytes and fibroblasts.

Single-dose cyclophosphamide for the prevention of bladder tumor implantation in F344 rats: site of drug activity.

High dioxin dose linked to cancer.

NTP technical report on the toxicity studies of Cresols (CAS Nos. 95-48-7, 108-39-4, 106-44-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Involvement of singlet oxygen in chloroaluminum phthalocyanine tetrasulfonate-mediated photoenhancement of lipid peroxidation in rat epidermal microsomes.

Chemoprotectants for cancer chemotherapy.

Amsacrine-induced lesions in DNA and their modulation by novobiocin and 2,4-dinitrophenol.

Cytotoxicity and chromosome aberrations in normal human oral keratinocytes induced by chemical carcinogens: Comparison of inter-individual variations.

Biologically based pharmacodynamic models: tools for toxicological research and risk assessment.

Hydrogen peroxide formation by cells treated with a tumor promoter.

Cell-type-specific recognition of allogeneic cells by alloreactive cytotoxic T cells: a consequence of peptide-dependent allorecognition.

Glutathione diminishes the anti-tumour activity of 4-hydroperoxycyclophosphamide by stabilising its spontaneous breakdown to alkylating metabolites.

Studies in tobacco carcinogenesis.

Drug interaction effects on antitumour drugs (VIII): prevention of ifosfamide-induced urotoxicity by disulfiram and its effect on antitumour activity and acute toxicity of alkylating agents in mice.

Toxic interactions in the rat nose: pollutants from soiled bedding and methyl bromide.

Characterization of the cytochrome P450 isozyme that metabolizes ochratoxin A, using metabolic inducers, inhibitors and antibodies.

The role of metabolism in chemical-induced pulmonary toxicity.

In vitro effects of L-ascorbic acid (vitamin C) on aryl hydrocarbon hydroxylase activity in hepatic microsomes of mice.

[Comparative study of the effectiveness of the classical and modified Cooper protocol for breast cancer chemotherapy].

The potential inhalation hazard posed by dioxin contaminated soil.

NTP Toxicology and Carcinogenesis Studies of Sodium Azide (CAS: 26628-22-8) in F344 Rats (Gavage Studies).

Induction by some protein kinase inhibitors of differentiation of a mouse megakaryoblastic cell line established by coinfection with Abelson murine leukemia virus and recombinant SV40 retrovirus.

Induction of a 31,000-dalton stress protein by prostaglandins D2 and J2 in porcine aortic endothelial cells.

Tyrosine phosphorylation provides an early and requisite signal for the activation of natural killer cell cytotoxic function.

Murine mdr-1, mdr-2, and mdr-3 gene expression: no coinduction with the Cyp1a-1 and Nmo-1 genes in liver by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The antiproliferative effects of enzymatic deglycosylation and metabolic undersulfation of proteoglycans from the cell surface.

Biophysical aspects of the integrated combination of cytostatic drugs with radiotherapy. Part 1: In vitro investigations on the kinetics of activated isophosphamide metabolites and the determination of selective properties of DNA-interstrand and DNA-protein crosslinking mechanisms using ³¹P-NMR spectroscopy.

Evaluation of the relative contribution of exposure routes in a health risk assessment of dioxin emissions from a municipal waste incinerator.

Metabolism of ¹⁴C-dichloroethyne in rats.

Cytosolic-nuclear tumor promoter-specific binding protein: association with the 90 kDa heat shock protein and translocation into nuclei by treatment with 12-O-tetradecanoylphorbol 13-acetate.

In vitro cytotoxicity studies with the fish hepatoma cell line, PLHC-1 (*Poeciliopsis lucida*).

Sodium nitrite-stimulated metabolic activation of benzo[a]pyrene 7,8-dihydrodiol in human polymorphonuclear leukocytes.

Induction of mutation in V79 Chinese hamster cells by tetrachlorohydroquinone, a metabolite of pentachlorophenol.

2,3,7,8-Tetrachlorodibenzo-p-dioxin stimulation of tyrosine phosphorylation in B lymphocytes: potential role in immunosuppression.

Re: "Triazine herbicides and ovarian epithelial neoplasms" by A Donna, P Crosignani, F Robutti, PG Betta, R Bocca, N Mariani, F Ferrario, R Fissi, F Berrino *Scand J Work Environ Health* 1989.

Peroxisome proliferation and modulation of rat liver carcinogenesis by 2,4-dichlorophenoxyacetic acid, 2,4,5-trichlorophenoxyacetic acid, perfluorooctanoic acid and nafenopin.

"A great poison". Dioxin helps elucidate the function of genes.

Genetic toxicity of six carcinogens and six non-carcinogens in the *Drosophila* wing spot test.

Italian multicentre case-control study of hematolymphopoietic malignancies.

[Exposure to agricultural chemicals and oncogenic risk].

A case-control study of non-Hodgkin's lymphoma and the herbicide 2,4-dichlorophenoxyacetic acid (2,4-D) in eastern Nebraska.

Soft tissue sarcoma and occupational exposures.

Agent Orange: veterans sue to force study.

Effects of pentachlorophenol and other chemical preservatives on the health of wood-treating workers in Hawaii.

[Free radicals in industrial medicine: their mechanisms of toxicity and biological relevance].

[The effect of chronic butyphos poisoning on protein and nucleic acid synthesis in various rat organs and activity of blood cholinesterase].

Military working dogs may be a sentinel for human cancer.

Chronic toxicity and oncogenicity of picloram in Fischer 344 rats.

Summary of safety evaluation toxicity studies of glufosinate ammonium.

In vitro studies of aldehyde effects related to human respiratory carcinogenesis.

Reappraisal of the findings on Agent Orange by the Australian Royal Commission.

Cancer risks. War is unhealthy, US finds.

Mortality study of Canadian male farm operators: non-Hodgkin's lymphoma mortality and agricultural practices in Saskatchewan.

Herbicides and non-Hodgkin's lymphoma: new evidence from a study of Saskatchewan farmers.

The importance of epithelial uptake systems in lung toxicity.

A novel lung slice system with compromised antioxidant defenses.

[Ethics, politics and interpretation of scientific evidence of health hazards caused by environmental and occupational exposure].

Chronic toxicity of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in mice.

Association between soft tissue sarcomas, malignant lymphomas, and phenoxy herbicides/chlorophenols: evidence from occupational cohort studies.

Pentachlorophenol-associated aplastic anemia, red cell aplasia, leukemia and other blood disorders.

Phenoxy acid herbicides and contaminants: description of the IARC International Register of Workers. IARC Working Group.

Herbicides and cancer: a review and discussion of methodologic issues.

Long-term carcinogenicity bioassay of the herbicide atrazine in F344 rats.

[Agent orange. Passion and reason].

Environmental epidemiology of non-Hodgkin's lymphoma in eastern Nebraska.

Methodologic issues in exposure assessment for case-control studies of cancer and herbicides.

A meta-analysis of exposure to phenoxy acid herbicides and chlorophenols in relation to risk of soft tissue sarcoma.

Role of catalase and oxidative stress in hepatic peroxisome proliferator-induced morphological transformation of Syrian hamster embryo cells.

Health status of Air Force veterans occupationally exposed to herbicides in Vietnam. II. Mortality.

Health status of Air Force veterans occupationally exposed to herbicides in Vietnam. I. Physical health.

Purification of anti-paraquat monoclonal antibodies by affinity chromatography on immobilised hapten.

Induction of superoxide dismutase in leukocytes by paraquat: correlation with age and possible predictor of longevity.

Possible role of acetaldehyde in ethanol-related rectal cocarcinogenesis in the rat.

Fibronectin-mediated Calmette-Guerin bacillus attachment to murine bladder mucosa. Requirement for the expression of an antitumor response.

gamma-Glutamyltranspeptidase-positive rat hepatocytes are protected from GSH depletion, oxidative stress and reversible alterations of collagen receptors.

Oxidative stress and tumour cell proliferation.

Formation of cyclic deoxyguanosine adducts in Chinese hamster ovary cells by acrolein and crotonaldehyde.

Sulfation-dependent formation of N-acetylated and deacetylated DNA adducts of N-hydroxy-4-acetylamino-biphenyl in male rat liver in vivo and in isolated hepatocytes.

Morphological transformation and catalase activity of Syrian hamster embryo cells treated with hepatic peroxisome proliferators, TPA and nickel sulphate.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on cell growth and the secretion of the estrogen-induced 34-, 52- and 160-kDa proteins in human breast cancer cells.

Nuclear Ah receptor from mouse hepatoma cells: effect of partial proteolysis on relative molecular mass and DNA-binding properties.

Inhibition of growth by 2,3,7,8-tetrachlorodibenzo-p-dioxin in 5L rat hepatoma cells is associated with the presence of Ah receptor.

Multiple DNA-binding factors interact with overlapping specificities at the aryl hydrocarbon response element of the cytochrome P450IA1 gene.

Antigen-induced cross-linking of the IgE receptor leads to an association with the detergent-insoluble membrane skeleton of rat basophilic leukemia (RBL-2H3) cells.

[Experimental study of combined effects of benzo(a)pyrene and ortho-cresol on the body].

The murine Cyp1a-1 gene negatively regulates its own transcription and that of other members of the aromatic hydrocarbon-responsive [Ah] gene battery.

Effects of herbimycin A and various SH-reagents on p60v-src kinase activity in vitro.

Potential misclassification in some studies claiming an association between chlorophenol exposure and various malignancies.

Expression of the chloramphenicol acetyltransferase (CAT) reporter gene by the murine Cyp1a-2 (cytochrome P3(450)) promoter in hepatoma cell cultures.

Role of transforming growth factor beta in the proliferative effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on human squamous carcinoma cells.

Heat induces intracellular acidification in human A-431 cells: role of Na(+)-H+ exchange and metabolism.

Dioxin-inducible, Ah receptor-dependent transcription in vitro.

Cytotoxic synergism between trimetrexate and etoposide. Evidence that trimetrexate potentiates etoposide-induced protein-associated DNA strand breaks in L1210 leukemia cells through alterations in intracellular ATP concentrations.

Inhibition of abl oncogene tyrosine kinase induces erythroid differentiation of human myelogenous leukemia K562 cells.

[Microbial secondary metabolites inhibiting oncogene actions].

Equivalent molecular mass of cytosolic and nuclear forms of Ah receptor from Hepa-1 cells determined by photoaffinity labeling with 2,3,7,8-[3H]tetrachlorodibenzo-p-dioxin.

Pesticide exposures and other agricultural risk factors for leukemia among men in Iowa and Minnesota.

Functional analysis of the transcriptional promoter for the CYP1A1 gene.

Confirmation by peptide sequence and co-expression on various cell types of the identity of CD44 and P85 glycoprotein.

Differences in the modulation of P450IA1 and epoxide hydratase expression by benz[a]anthracene and 2,3,7,8-tetrachlorodibenzo-p-dioxin in mouse embryo versus mouse hepatoma-derived cell lines.

Regulation of integrin mobility and cytoskeletal association in normal and RSV-transformed chick embryo fibroblasts.

Detection and characterization of [3H]2,3,7,8-tetrachlorodibenzo-p-dioxin binding to Ah receptor in a rainbow trout hepatoma cell line.

An inhibition ELISA for the quantification of collagens type I and type II in cyanogen bromide-digested tissues using fragment-directed antibodies.

Human immunodeficiency virus I-induced expression of P-glycoprotein.

Induction of cytochrome P450IA1 in rat hepatoma cell by polycyclic hydrocarbons and a dioxin.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes an extensive alteration of 17 beta-estradiol metabolism in MCF-7 breast tumor cells.

Oxidative injury mediated by the hepatic cytochrome P-450 system in conjunction with cellular iron. Effects on the pathway of haem biosynthesis.

Reversible focal neurologic deficits in severe iron deficiency anemia.

The mechanism of action of alpha-naphthoflavone as an inhibitor of 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced CYP1A1 gene expression.

Organization and disorganization of actin filaments in human epidermal keratinocytes: heat-shock treatment and recovery process.

Inhibition of high-density growth arrest in human squamous carcinoma cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

An approach towards understanding the genesis of sunlight-induced skin cancer.

Xenobiotic-inducible expression of murine glutathione S-transferase Ya subunit gene is controlled by an electrophile-responsive element.

G protein gamma subunits contain a 20-carbon isoprenoid.

Effect of rhein on the glucose metabolism of Ehrlich ascites tumor cells.

Analysis of photoaffinity-labeled aryl hydrocarbon receptor heterogeneity by two-dimensional gel electrophoresis.

Effects of FeSO₄ on B16 melanoma cells differentiation and proliferation.

Differential toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C57BL/6J mice congenic at the Ah Locus.

Stable expression of mouse Cyp1a1 and human CYP1A2 cDNAs transfected into mouse hepatoma cells lacking detectable P450 enzyme activity.

Altered calcium homeostasis in irreversibly injured P388D1 macrophages.

Excess of seminomas observed in Vietnam service U.S. military working dogs.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds on the occupied nuclear estrogen receptor in MCF-7 human breast cancer cells.

Occupation and the risk of bladder cancer.

Preferential over-expression of the class alpha rat Ya2 glutathione S-transferase subunit in livers bearing aflatoxin-induced pre-neoplastic nodules. Comparison of the primary structures of Ya1 and Ya2 with cloned class alpha glutathione S-transferase cDNA sequences.

Analysis of the sites in p56lck whose phosphorylation is induced by tetradecanoyl phorbol acetate.

Lack of I-compounds in DNA from a spectrum of Morris hepatomas.

Purification and characterization of a Mr approximately 66,000 lung-derived (paracrine) growth factor that preferentially stimulates the in vitro proliferation of lung-metastasizing tumor cells.

Partial characterization of mechanism of insulin accumulation in H35 hepatoma cell nuclei.

Novel ATP-binding heat-inducible protein of Mr = 37,000 that is sensitive to transformation in BALB/3T3 cells.

Transfer of proteins to membranes facilitates both cyanogen bromide cleavage and two-dimensional proteolytic mapping.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-inducible, Ah receptor-mediated bending of enhancer DNA.

Hormone-dependent phosphorylation of the glucocorticoid receptor occurs mainly in the amino-terminal transactivation domain.

Antitumor activity of T-2 toxin-conjugated monoclonal antibody to murine thymoma.

Studies on the cellular pharmacology of N-(4-methylphenylsulfonyl)-N'-(4-chlorophenyl)-urea.

Intradural granulocytic sarcoma presenting as a lumbar radiculopathy. Case report.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on I-compounds in hepatic DNA of Sprague-Dawley rats: sex-specific effects and structure-activity relationships.

Role of the Ah locus in suppression of cytotoxic T lymphocyte activity by halogenated aromatic hydrocarbons (PCBs and TCDD): structure-activity relationships and effects in C57Bl/6 mice congenic at the Ah locus.

Exposure to dioxins as a risk factor for soft tissue sarcoma: a population-based case-control study.

Modification of membrane permeability measured by Texas-Red during cell cycle progression and differentiation.

Risk factors for squamous cell carcinoma of the skin in Saskatchewan, Canada.

A 42-kD tyrosine kinase substrate linked to chromaffin cell secretion exhibits an associated MAP kinase activity and is highly related to a 42-kD mitogen-stimulated protein in fibroblasts.

Differences in adenosine triphosphate dependency of receptor-mediated endocytosis of alpha 2-macroglobulin and insulin correlate with separate routes of ligand-receptor complex internalization.

Protein chemical analysis of purified murine lamin B identifies two distinct polypeptides B1 and B2.

A latent Mr 94,000 gelatin-degrading metalloprotease induced during differentiation of HL-60 promyelocytic leukemia cells: a member of the collagenase family of enzymes.

Cytosolic-nuclear tumor promoter-specific binding protein (CN-TPBP) in human promyelocytic leukemia cells HL-60.

Activation of heme oxygenase and heat shock protein 70 genes by stress in human hepatoma cells.

Two-year oral chronic toxicity and carcinogenicity study in rats of diets fumigated with methyl bromide.

[Acute myelomonocytic leukemia with mastocytosis in bone marrow].

Histological examination of the temporal bone in medicolegal cases of asphyxia.

Ethylene dichloride: the influence of disulfiram or ethanol on oncogenicity, metabolism, and DNA covalent binding in rats.

Relative toxicity and tumor-promoting ability of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), 2,3,4,7,8-pentachlorodibenzofuran (PCDF), and 1,2,3,4,7,8-hexachlorodibenzofuran (HCDF) in hairless mice.

Evidence for mitochondrial localization of N-(4-methylphenylsulfonyl)-N'-(4-chlorophenyl)urea in human colon adenocarcinoma cells.

Characterization of the Ah receptor mediating aryl hydrocarbon hydroxylase induction in the human liver cell line Hep G2.

The effect of mitochondrial inhibitors on calcium homeostasis in tumor mast cells.

Cellular transport and accumulation of thiotepa.

Enhanced glycosyltransferase activity during thermotolerance development in mammalian cells.

Heat shock and arsenite increase expression of the multidrug resistance (MDR1) gene in human renal carcinoma cells.

Illness, injuries, and deaths from pesticide exposures in California 1949-1988.

A host-mediated in vivo/in vitro assay with peritoneal murine macrophages for the detection of carcinogenic chemicals.

Structural determinants of phenoxazine type compounds required to modulate the accumulation of vinblastine and vincristine in multidrug-resistant cell lines.

Effects of TCDD on embryonic ureteric epithelial EGF receptor expression and cell proliferation.

Effect of inhibitors of cytoplasmic structures and functions on rabies virus infection in vitro.

Mortality and morbidity among Army Chemical Corps Vietnam veterans: a preliminary report.

[The modifying effect of ortho-cresol on benzo(a)pyrene-induced carcinogenesis in mice].

Cancer in Iowa farmers: recent results.

Epidemiologic studies of cancer in agricultural workers.

Unit length as the denominator for quantitation of cell proliferation in nasal epithelia.

Dexamethasone-mediated potentiation of P450IA1 induction in H4IIEC3/T hepatoma cells is dependent on a time-consuming process and associated with induction of the Ah receptor.

The effects of TCDD on receptors for epidermal growth factor, glucocorticoid, and estrogen in Ah-responsive and -nonresponsive congenic mice and the effects of TCDD on estradiol metabolism in a liver tumor promotion model in female rats.

Comparative genetic mechanisms of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced tumors.

The specific DNA binding activity of the dioxin receptor is modulated by the 90 kd heat shock protein.

Uptake and release of calcium ions by heavy sarcoplasmic reticulum fraction of normal and malignant hyperthermia-susceptible human skeletal muscle.

Kinetics of internalization and cytotoxicity of transferrin-neocarzinostatin conjugate in human leukemia cell line, K562.

Thirty-four-year mortality follow-up of BASF employees exposed to 2,3,7,8-TCDD after the 1953 accident.

Monitoring carcinogen actions on DNA by ³²P-postlabeling.

Natural chemicals, synthetic chemicals, risk assessment, and cancer.

Comparative studies on the action of 7-N-[2-[[2-(gamma-L-glutamylamino)ethyl]dithio]ethyl]mitomycin C and of mitomycin C on cultured HL-60 cells and isolated phage and plasmid DNA.

Canadian Farm Operator Study: methodology.

Reversible alteration in the expression of the gap junctional protein connexin 32 during tumor promotion in rat liver and its role during cell proliferation.

Cytotoxicity of lymphokine-activated killer cells against human neuroblastoma cells: modulation by neuroblast differentiation.

Potential of bleomycin cytotoxicity by polyhydric alcohols.

Induction of ethoxyresorufin-O-deethylase and inhibition of glucocorticoid receptor binding in skin and liver of haired and hairless HRS/J mice by topically applied 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The association of selected cancers with service in the US military in Vietnam. III. Hodgkin's disease, nasal cancer, nasopharyngeal cancer, and primary liver cancer. The Selected Cancers Cooperative Study Group.

The association of selected cancers with service in the US military in Vietnam. II. Soft-tissue and other sarcomas. The Selected Cancers Cooperative Study Group.

The association of selected cancers with service in the US military in Vietnam. I. Non-Hodgkin's lymphoma. The Selected Cancers Cooperative Study Group.

Production of tumour-inhibitory lignans in callus cultures of *Podophyllum hexandrum*.

The contribution of N-oxidation to the metabolism of the food-borne carcinogen 2-amino-3,8-dimethylimidazo[4,5-f]quinoxaline in rat hepatocytes.

Nature's chemicals and synthetic chemicals: comparative toxicology.

Transport of a large neutral amino acid (phenylalanine) in a human intestinal epithelial cell line: Caco-2.

Mechanisms of cyclophosphamide action on hepatic P-450 expression.

Uptake of the cephalosporin, cephalexin, by a dipeptide transport carrier in the human intestinal cell line, Caco-2.

Self-catalyzed irreversible inactivation of rat hepatic aryl sulfotransferase IV by N-hydroxy-2-acetylaminofluorene.

A prospective toxicity evaluation (COMPACT) on 40 chemicals currently being tested by the National Toxicology Program.

Consideration of both genotoxic and nongenotoxic mechanisms in predicting carcinogenic potential.

Comparison of the intoxication pathways of tumor necrosis factor and diphtheria toxin.

Cellular responses to oxidative stress: the [Ah] gene battery as a paradigm.

Binding of aromatic amines to the rat hepatic Ah receptor in vitro and in vivo and to the 8S and 4S estrogen receptor of rat uterus and rat liver.

Competitive binding affinity of carcinogenic aromatic amines to the rat hepatic aromatic hydrocarbon (Ah) receptor in vitro and potency to induce monooxygenase activity in vivo.

[Ifosfamide-induced urinary bladder lesion and its inhibition by mesna].

Sequence analysis, tissue distribution and regulation by cell depolarization, and second messengers of bovine secretogranin II (chromogranin C) mRNA.

Lysine-329 of murine leukemia virus reverse transcriptase: possible involvement in the template-primer binding function.

Intracellular accumulation of azithromycin by cultured human fibroblasts.

ATP-sensitive K⁺ channels reveal the effects of intracellular chloride variations on cytoplasmic ATP concentrations and mitochondrial function.

Age-related DNA modifications (I-compounds): modulation by physiological and pathological processes.

A physiological pharmacokinetic description of the tissue distribution and enzyme-inducing properties of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat.

Isolation of viable intestinal epithelial cells and their use for in vitro toxicity studies.

NTP Toxicology and Carcinogenesis Studies of Iodinated Glycerol (Organidin(R)) (CAS No. 5634-39-9) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

[Organic-chemical air pollutants indoors--aspects of environmental toxicologic evaluation].

Kinetic studies of plasminogen activation by epithelial tissue plasminogen activator.

Glutathione conjugation and cytochrome P-450 metabolism of methyl chloride in vitro.

Induction of heat shock proteins as a measure of chemical cytotoxicity.

Dioxin levels in adipose tissues of hospitalized women living in the south of Vietnam in 1984-89 with a brief review of their clinical histories.

Oxidative stress induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Metabolism and pulmonary toxicity of cyclophosphamide.

Transcriptional regulation of 3-methylcholanthrene-inducible P-450 gene responsible for metabolic activation of aromatic carcinogenes.

Placental markers of human exposure to polychlorinated dibenzofurans and polychlorinated biphenyls: implications for risk assessment.

Carcinogenic activity associated with halogenated acetones and acroleins in the mouse skin assay.

Paraquat resistance associated with reduced NADPH reductase in an energy-dependent paraquat-accumulating cell line.

The boring story of Agent Orange already is outdated.

Carcinogenicity and teratogenicity vs. psychogenicity: psychological characteristics associated with self-reported Agent Orange exposure among Vietnam combat veterans who seek treatment for substance abuse.

Effects of phosphoramidate mustard and acrolein, cytotoxic metabolites of cyclophosphamide, on mouse limb development in vitro.

A morphologic study of Vietnam veterans.

Correction: comparisons of risks of environmental carcinogens.

Cancer risk in a cohort of licensed pesticide users.

Urological complications of cyclophosphamide.

Rat urinary bladder epithelial lesions induced by acrolein.

Phenoxy herbicides and non-Hodgkin's lymphoma in New Zealand: frequency and duration of herbicide use.

Triazine herbicides and ovarian epithelial neoplasms.

Inhibition of spontaneous growth and induced differentiation of murine erythroleukaemia cells by paraquat and atrazine.

The logic of a controversy: the case of Agent Orange in Australia.

Mechanistic studies: their role in the toxicological evaluation of pesticides.

2,4-D, 2,4,5-T, and 2,3,7,8-TCDD: an overview.

Phenoxy herbicides and cancer: insufficient epidemiologic evidence for a causal relationship.

Genotoxicity of selected herbicides.

Paraquat is not accumulated in B16 tumor cells by the polyamine transport system.

Phenoxyacetic acid herbicides and chlorophenols and the etiology of lymphoma and soft-tissue neoplasms.

Tumour initiatory activity of a herbicide diuron on mouse skin.

Modifying effect of cinnamaldehyde and cinnamaldehyde derivatives on cell inactivation and cellular uptake of cis-diamminedichloroplatinum(II) in human NHIK 3025 cells.

Alar in apples.

Structure-activity relationships for unsaturated dialdehydes. 3. Mutagenic, antimicrobial, cytotoxic, and phytotoxic activities of merulidial derivatives.

Resistance of paraquat and adriamycin in human breast tumor cells: role of free radical formation.

Mechanism of reversion of Rous sarcoma virus transformation by herbimycin A: reduction of total phosphotyrosine levels due to reduced kinase activity and increased turnover of p60v-src1.

2,4-D, 2,4,5-T, and 2,3,7,8-TCDD: an overview.

The role of sulfation in the metabolic activation of N-hydroxy-4'-fluoro-4-acetylamino-biphenyl.

Biological activity of 2,4,8-trichlorodibenzofuran: promotion of rat liver foci and induction of cytochrome P-450-dependent monooxygenases.

Antigenic modulation and internalization of monoclonal antibody to human colonic carcinoma cells detected by enzyme-linked immunosorbent assay.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-inducible aryl hydrocarbon receptor-mediated change in CYP1A1 chromatin structure occurs independently of transcription.

A highly potent antiangiogenic activity of retinoids.

Photoaffinity labeling of the nuclear Ah receptor from mouse Hepa 1c1c7 cells using 2,3,7,8-[3H]tetrachlorodibenzo-p-dioxin.

Species and strain sensitivity to the induction of peroxisome proliferation by chloroacetic acids.

Induction of endonucleolytic DNA cleavage in human acute myelogenous leukemia cells by etoposide, camptothecin, and other cytotoxic anticancer drugs: a cautionary note.

Protein kinase-C-induced down-regulation of calcitonin receptors and calcitonin-activated adenylate cyclase in T47D and BEN cells.

Characterization of mammalian type IX collagen fragments from limited pepsin digests of a transplantable swarm rat chondrosarcoma.

Effects of the beta-isomer of hexachlorocyclohexane on estrogen-sensitive human mammary tumor cells.

[Noncirrhotic liver fibrosis after chronic arsenic poisoning].

The potential role of DNA methylation in the response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Cellular transport and accumulation of thiotepa in murine, human, and avian cells.

Evaluation of the carcinogenic potential of pesticides. 1. Acifluorfen.

Cytosolic thyroid hormone-binding protein is a monomer of pyruvate kinase.

Interaction of mammalian cells with polymorphonuclear leukocytes: relative sensitivity to monolayer disruption and killing.

Stabilization of ornithine decarboxylase in erythroleukemia cells depleted of ATP.

Mechanism of transport and intracellular binding of porfiromycin in HCT 116 human colon carcinoma cells.

Purification and characterization of recombinant human parathyroid hormone-related protein.

Occupation and lymphoid neoplasms.

Transcriptional start site in the mouse Cyp1a1 (cytochrome P1450) gene.

Modifications of the effect of bleomycin in the somatic mutation and recombination test in *Drosophila melanogaster*.

Intracellular distribution and pharmacokinetics of daunorubicin in anthracycline-sensitive and -resistant HL-60 cells.

Structure-dependent induction of aryl hydrocarbon hydroxylase in human breast cancer cell lines and characterization of the Ah receptor.

Nigexine, a phospholipase A2 from cobra venom with cytotoxic properties not related to esterase activity. Purification, amino acid sequence, and biological properties.

Suppression of aryl hydrocarbon hydroxylase activity in human primary lung carcinoma x mouse hepatoma somatic cell hybrids.

Induction of cytochrome P450-dependent monooxygenase activities in rat hepatoma H-4-IIE cells in culture by 2,3,7,8-tetrachlorodibenzo-p-dioxin and related compounds: mechanistic studies using radiolabeled congeners.

Effect of galactose on interaction of N-(2-hydroxypropyl)methacrylamide copolymers with hepatoma cells in culture: preliminary application to an anticancer agent, daunomycin.

Induction of aryl hydrocarbon hydroxylase and demonstration of a specific nuclear receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in two human hepatoma cell lines.

Effect of sodium arsenite on the induction and turnover of ornithine decarboxylase activity in erythroleukemia cells.

Induction of in vitro differentiation of mouse embryonal carcinoma (F9) and erythroleukemia (MEL) cells by herbimycin A, an inhibitor of protein phosphorylation.

Mortality in an area contaminated by TCDD following an industrial incident.

Retinoid receptor antisense DNAs inhibit alkaline phosphatase induction and clonogenicity in malignant keratinocytes.

Neoplastic transformation of BALB/3T3 cells by metals and the quest for induction of a metastatic phenotype.

Mechanisms of arsenic-induced cell transformation.

Tumor cell permeability to peplomycin.

Subunit structure of the erythropoietin receptor.

Ten-year mortality study of the population involved in the Seveso incident in 1976.

³¹P and ¹³C NMR studies of isolated perfused hematopoietic cells from leukemic mice.

Regulation of mouse CYP1A1 gene expression by dioxin: requirement of two cis-acting elements during induction.

Effect of TCDD on the density of Langerhans cells in murine skin.

2,3,7,8-Tetrachlorodibenzo-p-dioxin enhancement of N-methyl-N'-nitro-N-nitrosoguanidine-induced transformation of rat tracheal epithelial cells in culture.

Affinity purification of active plasminogen activator inhibitor-1 (PAI-1) using immobilized anhydrourokinase. Demonstration of the binding, stabilization, and activation of PAI-1 by vitronectin.

Chronic arsenicism with vitiligo, hyperthyroidism, and cancer.

A critical view of the mechanism(s) of toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin. Implications for human safety assessment.

Induction of cytochrome P450IA1 in mouse hepatoma cells by several chemicals. Phenobarbital and TCDD induce the same form of cytochrome P450.

[The role of various pesticides in nitrosamine-induced carcinogenesis].

Tyrosine phosphorylation of the insulin receptor is not required for receptor internalization: studies in 2,4-dinitrophenol-treated cells.

2-(4'-chlorophenyl)benzothiazole is a potent inducer of cytochrome P450IA1 in a human and a mouse cell line. Anomalous correlation between protein and mRNA induction.

A case-control study of multiple myeloma nested in the American Cancer Society prospective study.

Inhibition of c-myc gene expression in murine lymphoblastoma cells by geldanamycin and herbimycin, antibiotics of benzoquinoid ansamycin group.

Detection of specific binding of [1,6-³H]2,3,7,8-tetrachlorodibenzo-p-dioxin ([³H]TCDD) in human leukocytes using electrofocusing in polyacrylamide gel.

Mast cell chymase. A potent secretagogue for airway gland serous cells.

Modulation of 3-methylcholanthrene toxicity in cultured neoplastic keratinocytes by glucocorticoids and retinoids is not accounted for by macromolecular adduct formation.

The human 32-kDa stress protein induced by exposure to arsenite and cadmium ions is heme oxygenase.

The effect of a chalcogenopyrylium dye with and without photolysis on mitochondrial function in normal and tumor cells.

Purification and characterization of the 180-kDa membrane guanylate cyclase containing atrial natriuretic factor receptor from rat adrenal gland and its regulation by protein kinase C.

Role of differential drug uptake, efflux, and binding of etoposide in sensitive and resistant human tumor cell lines: implications for the mechanisms of drug resistance.

Inducible (class 3) aldehyde dehydrogenase from rat hepatocellular carcinoma and 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated liver: distant relationship to the class 1 and 2 enzymes from mammalian liver cytosol/mitochondria.

Cancer incidence of workers in a Finnish sawmill.

Dynamics of epidermal growth factor receptor internalization studied by Nanovid light microscopy and electron microscopy in combination with immunogold labeling.

Update of mortality among chemical workers with potential exposure to the higher chlorinated dioxins.

The role of "negative" epidemiology data in the evaluation of risk.

Loss of a calcium requirement for protein synthesis in pituitary cells following thermal or chemical stress.

Induction of erythroid differentiation of K562 human leukemic cells by herbimycin A, an inhibitor of tyrosine kinase activity.

Serum-free culture of insulin-secreting clonal cells from a hamster insulinoma.

Effect of growth state, tumor promoters, and transformation upon intercellular communication between C3H/10T1/2 murine fibroblasts.

Regulation of cytochrome P1-450 gene expression in mouse hepatoma cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Development and validation of a cellular transplant model for leukemia in Fischer rats: a short-term assay for potential anti-leukemic chemicals.

Activation of transcription as a general mechanism of 2,3,7,8-tetrachlorodibenzo-p-dioxin action.

Identification of aneuploidy-inducing agents using cytokinesis-blocked human lymphocytes and an antikinetochores antibody.

Purification of human urine colony-stimulating factor by affinity chromatography.

The epidemiology of non-Hodgkin's lymphoma in the north-east of Italy: a hospital-based case-control study.

Monitoring of genetic instability in subjects with increased risk of cancer.

Minnesota Highway Maintenance Worker Study: cancer mortality.

Activation of cytochrome P450IA1 gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin in wild-type and high-activity variant mouse hepatoma cells.

[Synthesis and antimalarial as well as antitumor activities of 1-methyl-2,4-diamino-6-(N-methyl-substituted benzylamion) quinazolinium iodides].

2,4-D, 2,4,5-T, and 2,3,7,8-TCDD: an overview.

Use of rat liver altered focus models for testing chemicals that have completed two-year carcinogenicity studies.

Iodine-131 MIBG scintigraphy in small cell lung cancer.

Ligand-dependent interaction of the dioxin receptor with target DNA.

Synthesis of ¹¹C-labelled thymidine for tumor visualization using positron emission tomography.

Specific protein-DNA interactions at a xenobiotic-responsive element: copurification of dioxin receptor and DNA-binding activity.

Differential [³²P]-labeling of chemically induced stress proteins in S-phase mouse lymphoma cells.

Differential phosphate labeling of stress protein polypeptides in toxic dose response during S-phase of mouse lymphoma cells: a micro-electrophoretic study.

Relation between cytochrome P450IA1 expression and estrogen receptor content of human breast cancer cells.

The binary toxin produced by *Clostridium botulinum* enters cells by receptor-mediated endocytosis to exert its pharmacologic effects.

The neutrophil chemoattractant produced by the rat kidney epithelioid cell line NRK-52E is a protein related to the KC/gro protein.

Involvement of reactive oxygen metabolites in the candidacidal activity of human neutrophils stimulated by muramyl dipeptide or tumor necrosis factor.

Diaziquone-induced cytotoxicity in isolated rat hepatocytes.

Assessing risks and preventing disease from environmental chemicals.

Decreased activation of carcinogens in the liver of carcinogen-resistant rats.

Micro-scission of YAC tumor cells during antibody-dependent cellular cytotoxicity mediated by human neutrophils.

Purification and characterization of a platelet-derived growth factor and heavy metal-modulated nuclear protein.

Sulphotransferase-mediated activation of the carcinogen 5-hydroxymethyl-chrysene. Species and sex differences in tissue distribution of the enzyme activity and a possible participation of hydroxysteroid sulphotransferases.

Irreversible inhibition of v-src tyrosine kinase activity by herbimycin A and its abrogation by sulfhydryl compounds.

Biochemical mechanism of GSH depletion induced by 1,2-dibromoethane in isolated rat liver mitochondria. Evidence of a GSH conjugation process.

Effects of the new nitrosourea derivative, fotemustine, on the glutathione reductase activity in rat tissues in vivo and in isolated rat hepatocytes.

Herbimycin A suppresses the reduction of gap-junctional intercellular communication induced by tumor-promoting phorbol ester in 3T3-L1 cells.

[Urinary bioavailability of sodium-2-mercaptoethanesulfonate (Uromitexan) following intravenous, subcutaneous and continuous subcutaneous administration].

Carcinogens induce intrachromosomal recombination in yeast.

Homology between the cDNAs encoding phosphoprotein p19 and SCG10 reveals a novel mammalian gene family preferentially expressed in developing brain.

Plasmid-aided insertion of MMTV-LTR and ras DNAs to NIH 3T3 fibroblast cells makes them responsive to 2,3,7,8-TCDD causing overexpression of p21ras and down-regulation of EGF receptor.

Urinary arsenic concentrations and speciation in Cornwall residents.

NTP Toxicology and Carcinogenesis Studies of 2,4-Dichlorophenol (CAS No. 120-83-2) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Release of a volatile factor from solutions of oxazaphosphorines which damage normal and malignant cells.

Detection and characterization of a low affinity form of cytosolic Ah receptor in livers of mice nonresponsive to induction of cytochrome P1-450 by 3-methylcholanthrene.

Prevention of cytotoxicity and inhibition of intercellular communication by antioxidant catechins isolated from Chinese green tea.

Polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans: the risks to human health. A review.

Development and validation of the spiral Salmonella assay: an automated approach to bacterial mutagenicity testing.

Phosphotryptic peptide analysis of human progesterone receptor. New phosphorylated sites formed in nuclei after hormone treatment.

Preparation of biologically active platelet-derived growth factor type BB from a fusion protein expressed in *Escherichia coli*.

Induction of hepatic cytochrome P450 gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

³²P-postlabeling assay for carcinogen-DNA adducts and other dna modifications.

NTP Toxicology and Carcinogenesis Studies of Two Pentachlorophenol Technical-Grade Mixtures (CAS No. 87-86-5) in B6C3F1 Mice (Feed Studies).

Induction of ovalbumin-specific cytotoxic T cells by in vivo peptide immunization.

Effect of *Embllica officinalis* Gaertn. (Indian gooseberry) fruit extract on sodium azide and 4-nitro-o-phenylenediamine induced mutagenesis in *Salmonella typhimurium*.

Mutagenicity tests with a permeable mutant of yeast on carcinogens showing false-negative in *Salmonella* assay.

[Features of ultrastructural changes of tumor cells in tissue culture under the effect of energy metabolism inhibitors].

Embryotoxicity of phenyl ketone analogs of cyclophosphamide.

Metabolism of transplacental carcinogens.

The use of multiple endpoints to define the mechanism of action of reproductive toxicants and germ cell mutagens.

The in vitro metabolites of 2,4,6-trichlorophenol and their DNA strand breaking properties.

Membrane oxidative metabolism of human eosinophilic cell line EoL-1 in response to phorbol diester and formyl peptide: synergistic augmentation by interferon-gamma and tumor necrosis factor.

Polychlorinated biphenyls (PCBs): mutagenicity and carcinogenicity.

Nucleic acid binding and mutagenicity of active metabolites of 2-amino-3,8-dimethylimidazo[4,5-f]quinoxaline.

Health and reproductive outcomes among American Legionnaires in relation to combat and herbicide exposure in Vietnam.

Evaluation of the carcinogenic risk of the phenoxyherbicide MCPA to an urodele amphibian.

Inter-rater agreement in the assessment of occupational exposure to herbicides.

Inhibition of mouse hepatocyte intercellular communication by paraquat-generated oxygen free radicals.

[The mutagenicity of organic microcontaminants in the environment. I. The mutagenicity of selected herbicides and insecticides in the Salmonella microsome test (Ames test) with regard to the pathogenic potency of contaminated ground and drinking water].

Geographical variation in lymphoma incidence.

Pathobiological effects of acrolein in cultured human bronchial epithelial cells.

A legacy from Vietnam.

Alveolar cell carcinoma in a cook.

Induction of hepatic peroxisome proliferation in mice by lactofen, a diphenyl ether herbicide.

[Penta-chlorophenol (Xylophene) poisoning].

Synergistic cell inactivation of human NHIK 3025 cells by cinnamaldehyde in combination with cis-diamminedichloroplatinum(II).

Superoxide mediates the toxicity of paraquat for cultured mammalian cells.

Cause specific mortality among employees engaged in the manufacture, formulation, or packaging of 2,4-dichlorophenoxyacetic acid and related salts.

Genotoxicity of a variety of hydrazine derivatives in the hepatocyte primary culture/DNA repair test using rat and mouse hepatocytes.

Risk of malignant lymphoma in Swedish agricultural and forestry workers.

Carcinogenicity and genotoxicity of the herbicide 2,4,5-trichlorophenoxyethanol (TCPE) contaminated with dioxin.

Agent-specific ras oncogene activation in rat thyroid tumours.

The role of N-sulfation in the N-hydroxy-2-acetylaminofluorene-mediated outgrowth of diethylnitrosamine-initiated hepatocytes to gamma-glutamyltranspeptidase-positive foci in male rat liver.

Ultrastructural localization of platelet-derived growth factor and related factors in normal and transformed cells.

pH homeostasis in promyelocytic leukemic HL60 cells.

In vitro/in vivo effects of Mesna on the genotoxicity and toxicity of cyclophosphamide--a study aimed at clarifying the mechanism of Mesna's anticarcinogenic activity.

Mutagenicity and in vitro covalent DNA binding of 2-hydroxyamino-3-methylimidazo[4,5-f]quinoline.

DNA adduct formation by alachlor metabolites.

Enhancement of 2- and 16 alpha-estradiol hydroxylation in MCF-7 human breast cancer cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Altered regulation of P-450IA1 expression in a multidrug-resistant MCF-7 human breast cancer cell line.

Organ-specific effects of long term feeding of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 1,2,3,7,8-pentachlorodibenzo-p-dioxin on I-compounds in hepatic and renal DNA of female Sprague-Dawley rats.

Investigation of the effects of heat shock and agents which induce a heat shock response on the induction of differentiation of HL-60 cells.

The aromatic hydrocarbon receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin and variable levels of induced aryl hydrocarbon hydroxylase activity in clones of mouse hepatoma cells.

Physicochemical characterization of the nuclear form of Ah receptor from mouse hepatoma cells exposed in culture to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

The DNA recognition site for the dioxin-Ah receptor complex. Nucleotide sequence and functional analysis.

Altered production of the active oxygen species is involved in enhanced cytotoxic action of acylated derivatives of ascorbate to tumor cells.

Neuronal cell differentiation of human neuroblastoma cells by retinoic acid plus herbimycin A.

Increases in cytochrome P-450 mediated 17 beta-estradiol 2-hydroxylase activity in rat liver microsomes after both acute administration and subchronic administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin in a two-stage hepatocarcinogenesis model.

Interrelationship of number of glucose carriers and intracellular phosphoribosyl diphosphate level of Ehrlich ascites tumor cells in vitro.

Steroid hormones and medications that alter cancer risks.

A case-control study of brain gliomas and occupational exposure to chemical carcinogens: the risk to farmers.

Inhibition of postconfluent focus production in cultures of MCF-7 human breast cancer cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Induction of heme oxygenase in rat hepatoma cells by exposure to heavy metals and hyperthermia.

Soft tissue sarcoma risk in Swedish licensed pesticide applicators.

A host-dependent temperature-sensitive mutant of Rous sarcoma virus: evidence for host factors affecting transformation.

Suppression of keratinocyte differentiation in SSC-9 human squamous carcinoma cells by benzo[a]pyrene, 12-O-tetradecanoylphorbol-13-acetate and hydroxyurea.

Association of the Ah receptor with the 90-kDa heat shock protein.

Human dioxin-inducible cytosolic NAD(P)H:menadione oxidoreductase. cDNA sequence and localization of gene to chromosome 16.

Characterization and immunoassay of human tumor-associated galactosyltransferase isoenzyme II.

Carcinogenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the Syrian golden hamster.

[Mechanism of formation of malonic dialdehyde during liposome interaction with cells].

A proposed occupational exposure limit for 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Science policy choices and the estimation of cancer risk associated with exposure to TCDD.

(De)phosphorylation agents influence 5 alpha-reduction of testosterone in human prostate.

Differential gene expression in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD). Noncoordinate regulation of a TCDD-induced aldehyde dehydrogenase and cytochrome P-450c in the rat.

The association between soft tissue sarcomas and exposure to phenoxyacetic acids. A new case-referent study.

The acute toxicity of 2,3,4,7,8-pentachlorodibenzofuran (4PeCDF) in the male Fischer rat.

Mechanism of L-triiodothyronine (T3) uptake by glial C6 cells: regulation by butyrate.

A third genetic locus affecting the Ah (dioxin) receptor.

Effects of t-butyl-4-hydroxyanisole and other phenolic antioxidants on tumoral cells and Trypanosoma parasites.

Isolation and structural characterization of thymosin-beta 4 from a human medullary thyroid carcinoma.

Induction of gene amplification by arsenic.

Protein content and thyroid hormone release in vitro by differentiated thyroid cancer cells in the presence of estradiol, dehydroepiandrosterone, polypeptidic hormones and pesticides.

Multifactorial resistance to adriamycin: relationship of DNA repair, glutathione transferase activity, drug efflux, and P-glycoprotein in cloned cell lines of adriamycin-sensitive and -resistant P388 leukemia.

Increase of daunorubicin and vincristine accumulation in multidrug resistant human ovarian carcinoma cells by a monoclonal antibody reacting with P-glycoprotein.

Monoclonal antibodies to type IV collagenase recognize a protein with limited sequence homology to interstitial collagenase and stromelysin.

Differentiation of erythroid progenitor (CFU-E) cells from mouse fetal liver cells and murine erythroleukemia (TSA8) cells without proliferation.

2,3,7,8-Tetrachlorodibenzo-p-dioxin and polycyclic aromatic hydrocarbons suppress retinoid-induced tissue transglutaminase in SCC-4 cultured human squamous carcinoma cells.

Evidence for two independent pathways of insulin-receptor internalization in hepatocytes and hepatoma cells.

An immunotoxicological evaluation of 4,4'-thiobis-(6-t-butyl-m-cresol) in female B6C3F1 mice. 2. Humoral and cell-mediated immunity, macrophage function, and host resistance.

Microbial amino acid metabolites and bladder cancer: no evidence of promoting activity in man.

Characterization of the Ah receptor and aryl hydrocarbon hydroxylase induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin and benz(a)anthracene in the human A431 squamous cell carcinoma line.

Comparison of gene expression in preneoplastic and neoplastic rat liver to adult, fetal, regenerating, and tumor-promoted liver.

DNA binding properties of dioxin receptors in wild-type and mutant mouse hepatoma cells.

Potential antitumor agents. 54. Chromophore requirements for in vivo antitumor activity among the general class of linear tricyclic carboxamides.

Determination of intermediates, products and cleavage site in the reaction between plasminogen activator inhibitor type-2 and urokinases.

Reversal of transformed phenotypes by herbimycin A in src oncogene expressed rat fibroblasts.

The effect of age on the glucuronidation and toxicity of 4,4'-thiobis(6-t-butyl-m-cresol).

HIV infection and dioxin exposure: risk factors for Kaposi sarcoma and malignant lymphoma?

Landspreading dioxin-contaminated papermill sludge: a complex problem.

Goitrogens and thyroid follicular cell neoplasia: evidence for a threshold process.

Doxorubicin cellular pharmacokinetics and DNA breakage in a multi-drug resistant B16 melanoma cell line.

Glutathione S-transferase Ya subunit gene: identification of regulatory elements required for basal level and inducible expression.

Immunosuppressive effects of dioxin in the development of Kaposi's sarcoma and non-Hodgkin's lymphoma.

Evidence that 2,3,7,8-tetrachlorodibenzo-p-dioxin induces NADPH cytochrome c (P-450) reductase in rat hepatoma cells in culture.

Responses of the L5178Y tk+/tk- mouse lymphoma cell forward mutation assay: III. 72 coded chemicals.

[Is dioxin carcinogenic? A re-evaluation of the risk].

Mortality among California highway workers.

A death-certificate case-control study of non-Hodgkin's lymphoma and occupation in men in North Carolina.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxicity in yellow perch (*Perca flavescens*).

Morphologic lesions and acute toxicity in rainbow trout (*Salmo gairdneri*) treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Farming and exposure to chemicals in male lung cancer patients and their siblings.

cis-Diamminedichloroplatinum(II) accumulation in sensitive and resistant human ovarian carcinoma cells.

Photoaffinity analogues of methotrexate as folate antagonist binding probes.

[Multiple squamous cell cancer as a late effect following arsenic treatment of psoriasis].

Separation and characterization of the subunits of the laminin of EHS sarcoma.

Membrane IgM: interactions with the cortical cytoskeleton in the human lymphoblastoid cell line WiL2.

Forestomach carcinogens: pathology and relevance to man.

Characterization of two similar differential tumor markers based on phosphofructokinase activity arising from the influence of cancer patient serum.

The effects of drugs on the formation of *Theileria annulata* merozoites in vitro.

Dynamic behavior of the transferrin receptor followed in living epidermoid carcinoma (A431) cells with nanovid microscopy.

Observations on the intracellular accumulation of methotrexate and 5-methyltetrahydrofolate in uninduced, dimethylsulphoxide-induced and 1,25-dihydroxyvitamin D₃-induced HL60 cells, and blood-monocyte-derived human macrophages.

Potentially hazardous residues of non-ortho chlorine substituted coplanar PCBs in human adipose tissue.

Induction of cytochrome P-450IA1 gene expression in human breast tumour cell lines.

TCDD receptor ligands present in extracts of urban air particulate matter induce aryl hydrocarbon hydroxylase activity and cytochrome P-450c gene expression in rat hepatoma cells.

Characterization of trimetrexate transport in human lymphoblastoid cells and development of impaired influx as a mechanism of resistance to lipophilic antifolates.

NTP Toxicology and Carcinogenesis Studies of C.I. Acid Orange 3 (CAS No. 6373-74-6) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Antipeptide antibodies recognize c-erbA and a related protein in human A431 carcinoma cells.

Oxidation of N-butyl-N-(3-formylpropyl)nitrosamine to N-butyl-N-(3-carboxypropyl)nitrosamine in rat liver and inhibition by disulfiram.

Ifosfamide and mesna: marginally active in patients with advanced carcinoma of the pancreas.

Transplacental induction of cytochromes P-450IA1 and P-450IA2 by polycyclic aromatic carcinogens: TCDD-binding protein level as the rate-limiting step.

Metabolism and excretion of etoposide in isolated, perfused rat liver models.

Substrate preference of a cytosolic aldehyde dehydrogenase inducible in rat liver by treatment with 3-methylcholanthrene.

Isolation and characterization of a complementary DNA clone for a Mr 32,000 protein which is induced with tumor promoters in BALB/c 3T3 cells.

Regulatory mechanisms of monofunctional and bifunctional anticarcinogenic enzyme inducers in murine liver.

NTP Toxicology and Carcinogenesis Studies of Monuron (CAS No. 150-68-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Factors regulating activation and DNA alkylation by 4-(N-methyl-N-nitrosamino)-1-(3-pyridyl)-1-butanone and nitrosodimethylamine in rat lung and isolated lung cells, and the relationship to carcinogenicity.

Hepatotoxicity of cyclophosphamide in man: pharmacokinetic analysis.

Characteristics and mechanism of neutrophil-mediated cytostasis induced by tumor necrosis factor.

Effects of herbimycin derivatives on src oncogene function in relation to antitumor activity.

Induction of cytotoxic T lymphocytes by primary in vitro stimulation with peptides.

Differential role of reactive oxygen intermediates in photofrin-I- and photofrin-II-mediated photoenhancement of lipid peroxidation in epidermal microsomal membranes.

Induction of hepatic DNA single strand breaks in rats by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Binding characteristics of Ah receptors from rats and mice before and after separation from hepatic cytosols. 7-Hydroxyellipticine as a competitive antagonist of cytochrome P-450 induction.

Localization of high benzaldehyde dehydrogenase activity in rat upper gastrointestinal tract mucosa: a quantitative histochemical study.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on murine skin.

Role of the 4-hydroxy intermediate in the in vitro embryotoxicity of cyclophosphamide and dechlorocyclophosphamide.

Depression in gene expression for poly(ADP-ribose) synthetase during the interferon-gamma-induced activation process of murine macrophage tumor cells.

Effects of sodium azide on sea urchin embryos and gametes.

Cytocidal mechanism of TNF: effects of lysosomal enzyme and hydroxyl radical inhibitors on cytotoxicity.

Neoplastic transformation of Chinese hamster cells in vitro after treatment with flavoring agents.

The problems of environmental hazardous substances: an overview.

The evaluation of trends in soft tissue sarcoma according to diagnostic criteria and consumption of phenoxy herbicides.

Risk of malignant lymphoma in Swedish pesticide applicators.

Soft tissue sarcoma and military service in Vietnam: a case-control study.

Alachlor: health advisory.

Chronic carcinogenesis studies of acrolein and related compounds.

Vietnam veterans and soft tissue sarcoma.

Effect of biphenyl ether herbicides on the formation of mutagenic intermediates from procarcinogens by rainbow trout.

Temperature-dependence of cytotoxicity of several genotoxicants in Chinese hamster V79 cells: bleomycin, paraquat, and some N-alkyl-N-nitrosoureas.

Enhancement of the embryotoxicity of acrolein, but not phosphoramidate mustard, by glutathione depletion in rat embryos in vitro.

Herbicides and cancer.

Soft tissue sarcoma and non-Hodgkin's lymphoma in relation to phenoxyherbicide and chlorinated phenol exposure in western Washington.

Cohort mortality study of chemical workers with potential exposure to the higher chlorinated dioxins.

Occupational risk and the development of premalignant skin lesions among paraquat manufacturers.

Non-Hodgkin's lymphoma and farming: an expanded case-control study.

Agent Orange studies are incomplete.

Phenoxy herbicides and soft-tissue sarcomas in female rice weeders. A population-based case-referent study.

Background and design of a Danish cohort study of workers in phenoxy herbicide manufacture.

Responses of the L5178Y tk⁺/tk⁻ mouse lymphoma cell forward mutation assay to coded chemicals. I: Results for nine compounds.

Effect of aldehyde dehydrogenase inhibitors on the ex vivo sensitivity of human multipotent and committed hematopoietic progenitor cells and malignant blood cells to oxazaphosphorines.

Autoradiographic studies on in vivo covalent binding of N-hydroxy-2-acetylaminofluorene in rat liver containing gamma-glutamyltranspeptidase-positive foci. The effect of the sulfation-inhibitor pentachlorophenol.

Inhibition by pentachlorophenol of the initiating and promoting activities of 1'-hydroxysafrole for the formation of enzyme-altered foci and tumors in rat liver.

Initiation of hepatocarcinogenesis in infant male B6C3F1 mice by N-hydroxy-2-aminofluorene or N-hydroxy-2-acetylaminofluorene depends primarily on metabolism to N-sulfooxy-2-aminofluorene and formation of DNA-(deoxyguanosin-8-yl)-2-aminofluorene adducts.

Use of limited protocols to evaluate the genotoxicity of hazardous wastes in mammalian cell assays: comparison to Salmonella.

Toxic and carcinogenic agents in dry and moist snuff.

Further characterization of the ability of hepatocarcinogens to lower rat liver aryl sulfotransferase activity.

Effects of picloram on xenobiotic biotransformation in rat liver.

Macromolecular binding of the thyroid carcinogen 3-amino-1,2,4-triazole (amitrole) catalyzed by prostaglandin H synthase, lactoperoxidase and thyroid peroxidase.

Induction of genetic tandem duplications in Salmonella by polycyclic aromatic hydrocarbon and amine carcinogens.

Mechanisms of mitochondrial photosensitization by the cationic dye, N,N-bis(2-ethyl-1,3-dioxylene)kryptocyanine (EDKC): preferential inactivation of complex I in the electron transport chain.

A biochemical and kinetic analysis of the interleukin-1 receptor. Evidence for differences in molecular properties of IL-1 receptors.

Biochemically damaged erythroblasts bind natural serum antibodies and activate complement.

Suppression of estrogen-regulated extracellular tissue plasminogen activator activity of MCF-7 cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Mortality among flavour and fragrance chemical plant workers in the United States.

The experimental and clinical pathology of diene conjugation.

Isolation of a calcium-sensitive, 35,000-dalton microfilament- and liposome-binding protein from ascites tumor cell microvilli: identification as monomeric calpactin.

Pleiotropic drug resistance in hepatocytes induced by carcinogens administered to rats.

Alterations in lipid-linked oligosaccharide metabolism in human melanoma cells concomitant with induction of stress proteins.

Adolescent colorectal cancer and dioxin exposure.

ATP requirement for induced tight junction formation in HT 29 adenocarcinoma cells.

Promotion of C3H/10T1/2 morphological transformation by polychlorinated dibenzo-p-dioxin isomers.

Significance of mirex-caused hypoglycemia and hyperlipidemia in rats.

A method to quantitate the relative initiating and promoting potencies of hepatocarcinogenic agents in their dose-response relationships to altered hepatic foci.

Recognition of a purified Mr-40,000 organ-specific immunogen of human lung cancer by class II-restricted T-cells.

Stimulation of DNA synthesis in rat and mouse liver by various tumor promoters.

Tumor accumulation of D-selenomethionine-⁷⁵Se in tumor-bearing mice.

[Drugs inhibiting the function of oncogene products, especially protein tyrosine kinases].

Quantitative stereological evaluation of four histochemical markers of altered foci in multistage hepatocarcinogenesis in the rat.

Regulation of cytochrome P-450c in differentiated and dedifferentiated rat hepatoma cells: role of the Ah receptor.

Alterations in the expression of specific epidermal keratin markers in the hairless mouse by the topical application of the tumor promoters 2,3,7,8-tetrachlorodibenzo-p-dioxin and the phorbol ester 12-O-tetradecanoylphorbol-13-acetate.

The kinetics of phosphoinositide hydrolysis in rat basophilic leukemia (RBL-2H3) cells varies with the type of IgE receptor cross-linking agent used.

Differential endocytosis of fluorescein iso-thiocyanate-concanavalin A by normal and chronic myeloid leukemic granulocytes.

In situ protein-DNA interactions at a dioxin-responsive enhancer associated with the cytochrome P1-450 gene.

Photoaffinity analogues of methotrexate as folate antagonist binding probes. 1. Photoaffinity labeling of murine L1210 dihydrofolate reductase and amino acid sequence of the binding region.

Colony size, cell density and nature of the tumor promoter are critical variables in expression of a transformed phenotype (focus formation) in co-cultures of UV-TDTx and C3H10T1/2 cells.

Enhancement of fibronectin expression by herbimycin A.

TCDD-induced hyperplasia of the ureteral epithelium produces hydronephrosis in murine fetuses.

Cellular uptake and metabolic reduction of pentavalent to trivalent arsenic as determinants of cytotoxicity and morphological transformation.

Magnesium-dependent attachment and neurite outgrowth by PC12 cells on collagen and laminin substrata.

Subcellular localization of the 84,000 dalton heat-shock protein in mouse neuroblastoma cells: evidence for a cytoplasmic and nuclear location.

Uptake and binding of teniposide (VM26) in Krebs II ascites cells.

⁵¹Cr-uptake assay. A sensitive and reliable method to quantitate cell viability and cell death.

Structure-activity studies of the hepatocarcinogenicities of alkenylbenzene derivatives related to estragole and safrole on administration to preweanling male C57BL/6J x C3H/HeJ F1 mice.

Effects of metabolic inhibitors on hormone release, cyclic AMP levels, and oxygen consumption in rat pituitary cells in culture.

Phorbol ester-induced inhibition of cyclic GMP formation mediated by muscarinic receptors in murine neuroblastoma cells.

Plasminogen activator inhibitors from placenta and fibrosarcoma cells are antigenically different as evaluated with monoclonal and polyclonal antibodies.

Growth inhibitory effect of sodium azide in chemosensitivity assays.

Carcinogenic effects of infantile and long-term 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment in the mouse.

The effect of arsenic on urethan-induced adenoma formation in Swiss mice.

Stress-induced thermotolerance of the cytoskeleton of mouse neuroblastoma N2A cells and rat Reuber H35 hepatoma cells.

The receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in the mouse hepatoma cell line Hepa 1c1c7. A comparison with the glucocorticoid receptor and the mouse and rat hepatic dioxin receptors.

Cell cycle-specific effects of sodium arsenite and hyperthermic exposure on incorporation of radioactive leucine and phosphate by stress proteins from mouse lymphoma cell nuclei.

Quantitative cancer risk assessments for 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Clinical reports on plasma exchange in the Kidney Center, Tokai University School of Medicine.

A nonendocytotic mechanism for the selective uptake of high density lipoprotein-associated cholesterol esters.

A serine proteinase inhibitor produced by an HTLV I virus-transformed human T lymphocyte line.

Posttreatment with sodium arsenite is coclastogenic in log phase but not in stationary phase.

UVB-induced collagen changes in the skin of the hairless albino mouse.

Alterations of intercellular communication associated with the transformation of C3H/10T1/2 cells.

Internalisation and recycling of the granulocyte-macrophage colony-stimulating factor (GM-CSF) receptor on a murine myelomonocytic leukemia.

Sendai-viral HN and F glycoproteins as probes of plasma-membrane protein catabolism in HTC cells. Studies with fusogenic reconstituted Sendai-viral envelopes.

Use of a sensitive receptor binding assay to discriminate between full-length and truncated human recombinant tumor necrosis factor proteins.

Synthesis, cell growth inhibition, and antitumor screening of 2-(p-n-butylanilino)purines and their nucleoside analogues.

Health effects of pesticides: a review of epidemiologic research from the perspective of developing nations.

Potent effects of the monoclonal antibody-mitomycin C conjugate on human colon cancers.

Exposure to hair dyes and polychlorinated dibenzo-p-dioxins in AIDS patients with Kaposi sarcoma: an epidemiological investigation.

The mechanism and overcoming of resistance in ACNU-resistant sublines of C6 and 9L rat glioma.

Antineoplastic activity of azacarbazoles. II. Effect of alpha-carboline and its derivatives on transplantable animal neoplasms.

Development of resistance and characteristics of a human colon carcinoma subline resistant to mitoxantrone in vitro.

Keynote lecture. Etiologic insights from cancer mapping.

Pesticides and cancer risks in agriculture.

Overdose toxicity studies versus threshold: elements of biology must be incorporated into risk assessment.

Electrophoretic isolation and peptide mapping of collagen types from microsamples of tissue.

The role of necrosis in hepatocellular proliferation and liver tumors.

Effects of ascorbate ions on intracellular fluorescein emission polarization spectra in cancer and normal proliferating cells.

Medical, life-style, and occupational risk factors for prostate cancer.

Triazene metabolism. VI. 3-Azidomethyl-3-alkyl-1-aryltriazenes, a new class of anti-tumour triazene with potential pro-drug applications.

SOS-inducing activity of chemical carcinogens and mutagens in *Salmonella typhimurium* TA1535/pSK1002: examination with 151 chemicals.

Involvement of the prostatic steroid-binding protein in the transfer of ligand to the dioxin receptor.

The cellular uptake and cytotoxicity of chlorambucil-monoclonal antibody conjugates.

An improved method for the inhibition of endogenous peroxidase non-deleterious to lymphocyte surface markers. Application to immunoperoxidase studies on eosinophil-rich tissue preparations.

Alkaloid formation by habituated and tumorous cell suspension cultures of *Catharanthus roseus*.

In vitro antimutagenicity of curcumin against environmental mutagens.

Enhancement of rat liver microsomal metabolism of azoxymethane to methylazoxymethanol by chronic ethanol administration: similarity to the microsomal metabolism of N-nitrosodimethylamine.

Mutagenicity studies of different polycyclic aromatic hydrocarbons: the significance of enzymatic factors and molecular structure.

Consensus topography in the ATP binding site of the simian virus 40 and polyomavirus large tumor antigens.

The binding components for 2,3,7,8-tetrachlorodibenzo-p-dioxin and polycyclic aromatic hydrocarbons. Separation from the rat and mouse hepatic cytosol and characterization of a light density component.

Ultrastructural changes in the respiratory tract of rats following methyl isocyanate inhalation.

Studies on the mechanism of action of diallyl sulfide, an inhibitor of the genotoxic effects of cyclophosphamide.

A critical evaluation of the use of mutagenesis, carcinogenesis, and tumor promotion data in a cancer risk assessment of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Sulphotransferase-mediated covalent binding of the carcinogen 7,12-dihydroxymethylbenz[a]anthracene to calf thymus DNA and its inhibition by glutathione transferase.

Transcriptional control of human cytochrome P1-450 gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin in human tissue culture cell lines.

Covalent binding to DNA and mutagenicity of 2,4-diaminotoluene metabolites produced by isolated hepatocytes and 9000 g supernatant from Fischer 344 rats.

Combinations of mesna with cyclophosphamide or adriamycin in the treatment of mice with tumors.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on hepatic and uterine estrogen receptor levels in rats.

Inability of a human lung tumour cell line (A549) to detect chemically induced organ-specific toxicity to the lung.

Monoxygenase induction by various xenobiotics and its influence on rat liver microsomal metabolism of chrysene in comparison to benz[a]anthracene.

[Mutagenicity of aliphatic and aromatic nitro compounds. Industrial materials and related compounds].

Stable dicentric chromosomes induced by chemical mutagens in L5178Y mouse lymphoma cells.

Non-Hodgkin's lymphoma and exposure to phenoxyherbicides, chlorophenols, fencing work, and meat works employment: a case-control study.

Soft tissue sarcoma risk in Swedish agricultural and forestry workers.

Sulfuric acid esters as major ultimate electrophilic and hepatocarcinogenic metabolites of 4-aminoazobenzene and its N-methyl derivatives in infant male C57BL/6J x C3H/HeJ F1 (B6C3F1) mice.

Review of recent Vietnamese studies on the carcinogenic and teratogenic effects of phenoxy herbicide exposure.

Structure-activity relationships of alpha, beta-unsaturated carbonylic compounds.

Delayed health hazards of pesticide exposure.

Occupational exposures to chlorophenoxy herbicides.

Attenuation of cytogenetic damage by 2-mercaptoethanesulfonate in cultured human lymphocytes exposed to cyclophosphamide and its reactive metabolites.

Glutathione depletion as a determinant of sensitivity of human leukemia cells to cyclophosphamide.

Cytotoxicity, DNA cross-linking, and single strand breaks induced by activated cyclophosphamide and acrolein in human leukemia cells.

Metabolism of the "mixed" cytochrome P-450 inducer hexachlorobenzene by rat liver microsomes.

Suppression of synthesis of pro-alpha 1(I) and production of altered pro-alpha 2(I) procollagen subunits in 4-nitroquinoline-1-oxide-transformed fibroblasts.

Soft-tissue sarcomas, malignant lymphomas, and 2,3,7,8-TCDD exposure in Seveso.

Kinetics of uptake and intracellular binding of Cyclosporine A in RAJI cells, in vitro.

Murine plasmacytomas constitute a class of natural heat-shock variants in which the major inducible hsp-68 gene is not expressed.

N-terminal carbamylation of the hyaluronic acid-binding region and the link protein from the chondrosarcoma proteoglycan aggregate.

The structure and cytotoxic activity of herbimycin C.

Two automated procedures for N-acetyl-beta-D-glucosaminidase determination evaluated for detection of drug-induced tubular nephrotoxicity.

Hyperferremia in immunosuppressed patients with acute nonlymphocytic leukemia and the risk of infection.

A comparative study on selected chemical carcinogens for chromosome malsegregation, mitotic crossing-over and forward mutation induction in *Aspergillus nidulans*.

The cytosolic receptor binding affinities and AHH induction potencies of 29 polynuclear aromatic hydrocarbons.

Lack of direct effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on protein kinase C activity in EL4 cells.

Induction of 32- and 34-kDa stress proteins by sodium arsenite, heavy metals, and thiol-reactive agents.

Effects of BHA and related phenols on the forestomach of rats.

Regression of methyl bromide-induced forestomach lesions in the rat.

Polychlorinated dibenzo-p-dioxins: quantitative in vitro and in vivo structure-activity relationships.

[Studies on the mechanism of ACNU resistance in sublines of rat C6 glioma and 9L gliosarcoma in vitro].

Altered levels of laminin receptor mRNA in various human carcinoma cells that have different abilities to bind laminin.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) in the environment: human health risk estimation and its application to the Seveso case as an example.

Mitochondrial phototoxicity sensitized by doxycycline in cultured human carcinoma cells.

Tumor killing by human alveolar macrophages and blood monocytes. Decreased cytotoxicity of human alveolar macrophages.

Reversible inactivation of the Ah receptor associated with changes in intracellular ATP levels.

Intracellular location of the Ah receptor.

Protein and cDNA sequence of a glycine-rich, dimethylarginine-containing region located near the carboxyl-terminal end of nucleolin (C23 and 100 kDa).

Heat stress proteins and experimental cancer metastasis.

Effect of mouse skin tumor promoters upon [³H]uridine exchange and focus formation in cultures of C3H/10T1/2 mouse fibroblasts.

Chemically induced resistance to heat treatment and stress protein synthesis in cultured mammalian cells.

Cross-linking of IgE-receptor complexes at the cell surface: a fluorescence method for studying the binding of monovalent and bivalent haptens to IgE.

Methylation differences in the murine P1450 and P3450 genes in wild-type and mutant hepatoma cell culture.

Procarcinogen activation by rat and human mammary extracts.

Phenotypic change from transformed to normal induced by benzoquinonoid ansamycins accompanies inactivation of p60src in rat kidney cells infected with Rous sarcoma virus.

Calmodulin antagonists inhibit dihydropyridine calcium channel activator (BAY-K-8644) induced cGMP synthesis in pituitary tumor cells.

Induction by phenobarbital in McA-RH7777 rat hepatoma cells of a polycyclic hydrocarbon inducible cytochrome P450.

Control of gene expression by 2,3,7,8-tetrachlorodibenzo-p-dioxin. Multiple dioxin-responsive domains 5'-ward of the cytochrome P1-450 gene.

The staining of type V collagen obtained from FBJ virus-induced osteosarcoma with concanavalin A.

An anti-carbohydrate monoclonal antibody inhibits cell-substratum adhesion of F9 embryonal carcinoma cells.

Polychlorinated dibenzofurans as 2,3,7,8-TCDD antagonists: in vitro inhibition of monooxygenase enzyme induction.

Comparative evaluation of the effect of pharmacological agents on endocytosis and coendocytosis of IgE by rat basophilic leukaemia cells.

Control of cytochrome P1-450 gene expression: analysis of a dioxin-responsive enhancer system.

Modulation of IgM anti-lymphocyte antibody-reactive T cell surface antigens in systemic lupus erythematosus.

Phenotypic alterations in tumors that developed from threshold subcutaneous inocula. I. Reduced binding of natural antibodies and sensitivity to hypotonic lysis.

Monoclonal antibodies against ricin: effects on toxin function.

Comparative uptake, retention and cytotoxicity of daunorubicin by human myeloid cells.

Plasma membrane potential of murine erythroleukemia cells: approach to measurement and evidence for cell-density dependence.

Regulation of alkaline phosphatase activity in rat hepatoma cells. Effects of serum proteins, cycloheximide, actinomycin D, chloroquine, dinitrophenol and potassium cyanide.

Chemical modification of herbimycin A. Synthesis and in vivo antitumor activities of halogenated and other related derivatives of herbimycin A.

Interaction of monoclonal antibodies with the IgE-receptor on rat mast cells and rat basophilic leukemia (RBL) cells.

BAY-K-8644-stimulated cyclic GMP synthesis in mouse pituitary tumor cells.

Quantitative histochemistry of benzaldehyde dehydrogenase in hepatocellular carcinomas of vinyl chloride-treated rats.

Lung neoplasms in rodents after chronic administration of dimethyl hydrogen phosphite.

Use of the oxidase electrode to determine tumor cell metabolism of peroxide.

Different modes of action of sodium arsenite, 3-aminobenzamide, and caffeine on the enhancement of ethyl methanesulfonate clastogenicity.

Sodium arsenite potentiates the clastogenicity and mutagenicity of DNA crosslinking agents.

Isolation and purification of cyanogen bromide-derived peptides of type II collagen directly from tissue (Swarm chondrosarcoma).

Contribution of drug transport and reductases to daunorubicin resistance in human myelocytic cells.

Occupational exposures to chlorophenols.

P450 genes: evolution, regulation, and relationship to human cancer and pharmacogenetics.

A review of porphyria and cancer and the missing link with human exposure to hexachlorobenzene.

Enhanced repair of O6-methylguanine in liver DNA of rats pretreated with phenobarbital, 2,3,7,8-tetrachlorodibenzo-p-dioxin, ethionine, or N-alkyl-N-nitrosoureas.

Health risk analysis of human exposures to soil amended with sewage sludge contaminated with polychlorinated dibenzodioxins and dibenzofurans.

A critical examination of assumptions used in risk assessments of dioxin contaminated soil.

Synergistic modulation of lymphocyte mitogenesis by carcinogenic xenobiotics.

Immunoaffinity chromatography of carcinogen DNA adducts with polyclonal antibodies directed against benzo[a]pyrene diol-epoxide-DNA.

Ah receptor mediating induction of aryl hydrocarbon hydroxylase: detection in human lung by binding of 2,3,7,8-[3H]tetrachlorodibenzo-p-dioxin.

Hepatocellular uptake of oleate is energy dependent, sodium linked, and inhibited by an antibody to a hepatocyte plasma membrane fatty acid binding protein.

Increase in the synthesis of a Mr 32,000 protein in BALB/c 3T3 cells after treatment with tumor promoters, chemical carcinogens, metal salts, and heat shock.

A simplified method for determination of tritiated thymidine incorporation into cells from tissue in soft agar culture.

Insulin stimulation of glucose metabolism in rat adipocytes: possible implication of protein kinase C.

The role of formaldehyde in hydrazine-induced methylation of liver DNA guanine.

Studies of gene transcription and translation in regenerating rat liver.

Carcinogen-binding proteins in the rat ventral prostate: specific and nonspecific high-affinity binding sites for benzo(a)pyrene, 3-methylcholanthrene, and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Identification of a thrombin sequence with growth factor activity on macrophages.

Synergistic incorporation of daunorubicin in erythrocytes in the presence of polyene antibiotics. Role of the membrane potential.

Phosphorylation and inactivation of rat hepatocyte glycogen synthase by phorbol esters and mezerein.

Relevance of gas and particulate phases of tobacco smoke for lung cancer formation: an experimental study in Syrian golden hamsters.

Studies on the mechanism of gastrointestinal absorption of melphalan and chlorambucil.

Sodium azide is less suitable as a positive control of drug-induced lethality for in vitro clonogenic assays.

Effects of glucose and thiol depletion on chemically-induced peroxide production in mammalian cells.

Transplantation studies on induced and spontaneous nodules from B6C3F1 mouse liver.

Combined measurement and significance of lipid-bound sialic acid and carcinoembryonic antigen in detection of human cancer.

Potency of carcinogens derived from covalent DNA binding and stimulation of DNA synthesis in rat liver.

On the application of cultured neuroblastoma cells in chemical toxicity screening.

Health implications of 2,3,7,8-tetrachlorodibenzodioxin (TCDD) contamination of residential soil.

Plasma therapy of primary rat mammary carcinoma: antitumor activity of tumor-bearer plasma adsorbed against inactivated CNBr sepharose or protein A-sepharose.

Genetic mode of action of cocarcinogens and tumor promoters in yeast and mice.

Decreased induction of aryl hydrocarbon hydroxylase activity in hyperproliferative hairless mouse epidermis.

Incorporation of alpha-fetoprotein by the MCF-7 human breast cancer cell line.

Polychlorinated biphenyls (PCBs) and polybrominated biphenyls (PBBs): biochemistry, toxicology, and mechanism of action.

N-Hydroxy-N-arylamides. I. Toxicity of certain polycyclic and monocyclic N-hydroxy-N-arylamides in rats.

Metabolic processing of 2-acetylaminofluorene by microsomes and six highly purified cytochrome P-450 forms from rabbit liver.

Effects of mitomycin C on metabolism in a rat liver preparation.

Comparative formation of chlorophenol metabolites from hexachlorocyclohexane in mouse and rat in vivo and in vitro.

Rat liver aldehyde dehydrogenase. II. Isolation and characterization of four inducible isozymes.

Species-specific irreversible inhibition of *Neisseria gonorrhoeae* dihydrofolate reductase by a substituted 2,4-diamino-5-benzylpyrimidine.

Antigens encoded by the 3'-terminal region of human T-cell leukemia virus: evidence for a functional gene.

Cyclophosphamide resistance developed in a human melanoma cell line.

Ah receptor in primate liver: binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin and carcinogenic aromatic hydrocarbons.

Fine-structure analyses of lipid-protein and protein-protein interactions of gag protein p19 of the avian sarcoma and leukemia viruses by cyanogen bromide mapping.

Gas chromatographic determination of clopidol in chicken tissues.

A tumor promoter induces rapid and coordinated reorganization of actin and vinculin in cultured cells.

Carcinogen-binding proteins. High-affinity binding sites for benzo[a]pyrene in mouse liver distinct from the Ah receptor.

Serum gamma glutamyl transferase as a specific indicator of bile duct lesions in the rat liver.

Respiratory tract lesions induced by sensory irritants at the RD50 concentration.

Further characterization of tumor-promoter-mediated activation of protein kinase C.

The genotoxicity of aromatic amines in primary hepatocytes isolated from C57BL/6 and DBA/2 mice.

Sequence comparison of pepsin-resistant segments of basement-membrane collagen alpha 1(IV) chains from bovine lens capsule and mouse tumour.

Mutagenic activity of some clastogenic chemicals at the hypoxanthine guanine phosphoribosyl transferase locus of Chinese hamster ovary cells.

The use of sodium 2-mercaptoethane sulfonate to prevent cyclophosphamide cystitis.

NMR spectroscopic studies of intermediary metabolites of cyclophosphamide. A comprehensive kinetic analysis of the interconversion of cis- and trans-4-hydroxycyclophosphamide with aldophosphamide and

the concomitant partitioning of aldophosphamide between irreversible fragmentation and reversible conjugation pathways.

[Salmonella tester strain TA104 for the detection of mutagenic and carcinogenic chemicals in our environment].

Binding of benzo(a)pyrene and dibenz(a,h)anthracene to the Ah receptor in mouse and rat hepatic cytosols.

Kinetics of the activation of plasminogen by natural and recombinant tissue-type plasminogen activator.

Rhodamine 123 inhibits bioenergetic function in isolated rat liver mitochondria.

Observations on the effects of cyclophosphamide, phosphoramidate mustard and some activated oxazaphosphorines on murine L1210 leukemia.

Noninvasive assessment of microsomal enzyme activity in occupational medicine: present state of knowledge and future perspectives.

Nitrofen: a review and perspective.

Carcinogenicity and toxicity of 2,4-dichlorophenoxy-acetic acid.

Strong evidence from studies with brachymorphic mice and pentachlorophenol that 1'-sulfoxysafrole is the major ultimate electrophilic and carcinogenic metabolite of 1'-hydroxysafrole in mouse liver.

Medical and morbidity surveillance findings among employees potentially exposed to TCDD.

Evaluation of amitrole (aminotriazole) for potential carcinogenicity in orally dosed rats, mice, and golden hamsters.

RNA synthesis in 2,4,5-T-induced tumors in bean embryos.

Aplastic anemia and red cell aplasia due to pentachlorophenol.

Cytotoxicity of cinnamic aldehyde on leukemia L1210 cells.

Cancer epidemiology of pesticide manufacturers, formulators and users.

Nitrofen.

MCPA.

Fluometuron.

Diallate.

The role of respiratory protection on increased survival of *Treponema pallidum* (Nichols) when cocultivated with mammalian cells in vitro.

Abnormal response of ataxia-telangiectasia cells to agents that break the deoxyribose moiety of DNA via a targeted free radical mechanism.

Preparation and investigation of cross-linked copolymers containing antitumour agents.

Vascular changes in early TSH-induced thyroid tumours in the rat.

Studies in occupational epidemiology: the case for international collaboration.

Phase I clinical study of acetylcysteine's preventing ifosfamide-induced hematuria.

Sulfation and glucuronidation as competing pathways in the metabolism of hydroxamic acids: the role of N,O-sulfonation in chemical carcinogenesis of aromatic amines.

Perinatal hepatocarcinogenesis.

Effect of thiols on toxicity and carcinostatic activity of cyclophosphamide.

Dose-dependent pharmacokinetics: emphasis on phase I metabolism.

Competitive binding to the cytosolic 2,3,7,8-tetrachlorodibenzo-p-dioxin receptor. Effects of structure on the affinities of substituted halogenated biphenyls--a QSAR analysis.

Biochemical modulation of angiogenesis in the chorioallantoic membrane of the chick embryo.

Isolation and characterization of the cyanogen bromide peptides of the collagen 2 alpha chain from a transplantable rat chondrosarcoma.

Energy-dependent reduced drug binding as a mechanism of Vinca alkaloid resistance in human leukemic lymphoblasts.

Different levels of glycosylation contribute to the heterogeneity of alpha 1(II) collagen chains derived from a transplantable rat chondrosarcoma.

DNA-binding domain in adenovirus core protein VII.

Clastogenic and physiological response of chromosomes to nine pesticides in the *Vicia faba* in vivo root tip assay system.

Localization of lipid-protein and protein-protein interactions within the murine retrovirus gag precursor by a novel peptide-mapping technique.

Induction of 7-ethoxycoumarin o-deethylase activity in cultured human epithelial cells by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): evidence for TCDD receptor.

Induction of mRNA specific for cytochrome P1-450 in wild type and variant mouse hepatoma cells.

Effects of cytochrome P1-450 inducers on the cell-surface receptors for epidermal growth factor, phorbol 12,13-dibutyrate, or insulin of cultured mouse hepatoma cells.

[Relaxation of DNA-protein interactions in mouse lymphoblastic leukemic cells exposed to antineoplastic agents].

Health protection: Toxic agent and radiation control.

Epidemiological study of socioeconomic factors and clinical findings in Hodgkin's disease, and reanalysis of previous data regarding chemical exposure.

The respiration-linked limiting step of tumor cell transition from the non-cycling to the cycling state: its inhibition by oxidizable substrates and its relationships to purine metabolism.

Biochemical and biosynthetic studies of a crystallizable human gamma 1 heavy-chain disease protein.

Tumor initiating activity of 9- and 10-fluoro-7,12-dimethylbenz[a]-anthracene (DMBA) and the effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on tumor initiation by monofluoro derivatives of DMBA in SENCAR mice.

Membrane dynamics in human leukemia and lymphoma cells. pH dependency of diphenylhexatriene fluorescence polarization.

Selected cancer mortality and farm practices in Iowa.

Dioxin exposure and sarcoma.

Relationship between hyperthermia-induced heat-shock proteins and thermotolerance in Morris hepatoma cells.

The control of muscle contracture by the action of dantrolene on the sarcolemma.

Specific gene mutations in L5178Y cells in culture.

Differential proteolysis and evidence for a residue exchange in tissue plasminogen activator suggest possible association between two types of protein microheterogeneity.

Receptor-mediated endocytosis of transferrin in K562 cells.

The current use of studies on promoters and cocarcinogens in quantitative risk assessment.

The role of growth of normal and preneoplastic cell populations for tumor promotion in rat liver.

Immunoperoxidase techniques: the deleterious effect of sodium azide on the activity of peroxidase conjugates.

Characterization of NADPH-cytochrome P-450 reductase in a mouse hepatoma cell line.

Biochemical and genetic analysis of variant mouse hepatoma cells defective in the induction of benzo(a)pyrene-metabolizing enzyme activity.

N-acetylcysteine: its bioavailability and interaction with ifosfamide metabolites.

Primary structures of three human pancreas peptides with growth hormone-releasing activity.

Investigations for genotoxic effects after exposure to crude 2,4,5-trichlorophenol.

Characterization of the association of tritiated enkephalin with neuroblastoma cells under conditions optimal for receptor down regulation.

A high affinity, calmodulin-responsive ($\text{Ca}^{2+} + \text{Mg}^{2+}$)-ATPase in isolated bone cells.

Enhancement of the skin tumor-initiating activity of polycyclic aromatic hydrocarbons by methyl-substitution at non-benzo 'bay-region' positions.

[Effect of 2,4-dinitrophenol on the synthesis of ribosomal RNA in the cells of Ehrlich ascitic carcinoma under anaerobic conditions].

Tumorigenic effect of sodium arsenite in rat kidney.

The use of a peroxidase electrode to measure the effects of nitro compounds on intact cells.

Usefulness of abrin as a positive control for the human tumor clonogenic assay.

Exposure to polychlorinated dibenzo-p-dioxins and dibenzo-furans in the environment.

Different sensitivity of Zajdela hepatoma mitochondrial ATPase activity to uncouplers in digitonin-treated cells and isolated mitochondria.

Characterization of messenger RNA specific for carcinoembryonic antigen.

Physicochemical characterization of specific and nonspecific polyaromatic hydrocarbon binders in rat and mouse liver cytosol.

Effects of propylthiouracil on urinary metabolites of cyclophosphamide in rats.

Inhibitory effects of anthracenedione antineoplastic agents on hepatic and cardiac lipid peroxidation.

Kinetics of N- and C-hydroxylations of 2-acetylaminofluorene in male Sprague-Dawley rat liver microsomes: implications for carcinogenesis.

Ultimate forms of mutagenic and carcinogenic heterocyclic amines produced by pyrolysis.

Significance of energy metabolism pathways for stimulation of DNA synthesis by cell migration and serum.

Structure of glycosylated and unglycosylated gag and gag-pol precursor proteins of Moloney murine leukemia virus.

Development of basal and induced aryl hydrocarbon (benzo[a]pyrene) hydroxylase activity in the chicken embryo in ovo.

The nucleotide sequence of rat liver fatty acid binding protein mRNA.

Lack of induction of single-strand breaks in mammalian cells by sodium azide and its proximal mutagen.

Mutagenicity of cyanate, a decomposition product of MNU.

Further mutagenicity studies on pesticides in bacterial reversion assay systems.

Genotoxicity of N-acetylarylamines in the salmonella/hepatocyte system.

Effect of polycyclic aromatic compounds and phorbol esters on ornithine decarboxylase and aryl hydrocarbon hydroxylase activities in mouse liver.

Hepatic microsomal metabolism of the dichloroethanes.

Isophosphoramidate mustard, a metabolite of ifosfamide with activity against murine tumours comparable to cyclophosphamide.

Unequivocal demonstration that malondialdehyde is a mutagen.

The morphological transformation of Syrian hamster embryo cells by chemicals reportedly nonmutagenic to *Salmonella typhimurium*.

[Topics in medicine: phenoxy herbicides and sarcoma].

Pentachlorophenol, an assessment of the occupational hazard.

Herbicides, occupation, and cancer.

Phenoxy herbicides, trichlorophenols, and soft-tissue sarcomas.

Do phenoxy herbicides cause cancer in man?

Thoracic soft-tissue sarcoma in Vietnam veterans exposed to Agent Orange.

Phenoxy acid herbicides cause peroxisome proliferation in Chinese hamsters.

Mortality of 2,4-dichlorophenoxyacetic acid and 2,4,5-trichlorophenoxyacetic acid herbicide applicators in Finland: first report of an ongoing prospective cohort study.

Immunotoxicity of pentachlorophenol (PCP): increased susceptibility to tumor growth in adult mice fed technical PCP-contaminated diets.

Mast cell hyperplasia during goitrogen-induced thyroid growth - a quantitative study.

Polyacrolein microspheres as a new tool in cell biology.

Circadian rhythm of mitotic activity in normal and hyperplastic rat thyroid.

Correlation between the loss of the transformed phenotype and an increase in superoxide dismutase activity in a revertant subclone of sarcoma virus-infected mammalian cells.

Promoting effects of 3-amino-1,2,4-triazole on the development of thyroid tumors in rats treated with N-bis(2-hydroxypropyl)nitrosamine.

2-Haloacrylic acids as indicators of mutagenic 2-haloacrolein intermediates in mammalian metabolism of selected promutagens and carcinogens.

[Comparative study of three lysogenic systems for the testing of potential mutagens and carcinogens].

Heterogeneity of asparagine-linked oligosaccharides of five glycosylation sites on immunoglobulin M heavy chain from mineral oil plasmacytoma 104E.

Asbestos exposure and malignant lymphoma.

Effect of albumin, low temperature and metabolic inhibitors on transport of fatty acids into cultured human leukemic myeloid cells.

Mutagenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin and perfluoro-n-decanoic acid in L5178Y mouse-lymphoma cells.

Bacteria and zymosan opsonized with histone, dextran sulfate, and polyanetholesulfonate trigger intense chemiluminescence in human blood leukocytes and platelets and in mouse macrophages: modulation by metabolic inhibitors in relation to leukocyte-bacteria interactions in inflammatory sites.

Sequence analysis of a growth hormone releasing factor from a human pancreatic islet tumor.

Tumour promotion by TCDD in skin of HRS/J hairless mice.

Characterization of a 40 residue peptide from a human pancreatic tumor with growth hormone releasing activity.

Gliomas and occupational exposure to carcinogens: case-control study.

In vivo resistance towards anthracyclines, etoposide, and cis-diamminedichloroplatinum(II).

Effect of N,N'-diethyl-1,2-bis(2,6-dichloro-4-hydroxyphenyl)ethylenediamines on the 7,12-dimethylbenz[a]anthracene-induced mammary carcinoma of the rat.

Influence of Mycoplasma arginini infection on the induction of aryl hydrocarbon hydroxylase by TCDD in rat hepatoma cell cultures.

Studies on the mechanism of enkephalin receptor down regulation.

PCB isomers and congeners: induction of aryl hydrocarbon hydroxylase and ethoxyresorufin O-deethylase enzyme activities in rat hepatoma cells.

A stable propidium iodide staining procedure for flow cytometry.

Adrenocorticotropin-dependent particulate guanylate cyclase in rat adrenal and adrenocortical carcinoma: comparison of its properties with soluble guanylate cyclase and its relationship with ACTH-induced steroidogenesis.

Differential effects of 2,4-dinitrophenol and valinomycin (+ K⁺) on uncoupler-stimulated ATPase of human tumor mitochondria.

Prolactin receptors in cultured rat mammary tumor cells. Unmasking of cell surface receptors by energy depletion.

Soft-tissue sarcoma, malignant lymphoma, and exposure to phenoxyacids or chlorophenols.

Autocatabolism of surface macromolecules shed by human melanoma cells.

Nonhelical, fibronectin-binding basement-membrane collagen from endodermal cell culture.

Medicinal arsenic and internal malignancies.

Leukemia and farm practices in Iowa.

Uptake, efflux, and hydrolysis of aclacinomycin A in Friend leukemia cells.

Correlation between the rates of aerobic glycolysis and glucose transport, unrelated to neoplastic transformation, in a series of BALB 3T3-derived cell lines.

[Physicochemical and immunochemical properties of heavy chains of immunoglobulin G typical of malignant growth].

Tetrachlorodibenzodioxin: a survey of subjects ten years after exposure.

Interaction of phencyclidine with mouse neuroblastoma cells.

Misonidazole-induced biochemical alterations of mammalian cells: effects on glycolysis.

Characterization of serotonin uptake in cultured pheochromocytoma cells. Comparison with norepinephrine uptake.

Characterization of serotonin uptake in cultured neuroblastoma cells. Difference between differentiated and nondifferentiated cells.

Collagen polymorphism in the normal and diseased blood vessel wall. Investigation of collagens types I, III and V.

Comparative uptake of adriamycin and daunorubicin in sensitive and resistant friend leukemia cells measured by flow cytometry.

The influence of antigen density and a comparison of IgG and IgM antibodies in the anti-complementary modulation of lymphocytic surface immunoglobulin.

Mutagenic evaluation of carcinogens and non-carcinogens in the L5178Y/TK assay utilizing postmitochondrial fractions (S9) from normal rat liver.

Synthesis of pseudo cofactor analogues as potential inhibitors of the folate enzymes.

Stability of hexokinase II in vitro and in ascites tumor cells.

Monoclonal antibody to transferrin receptor blocks transferrin binding and inhibits human tumor cell growth in vitro.

Data on dioxin.

Cancer risks associated with agriculture: epidemiologic evidence.

Production and regulation of enkephalin-like peptides in neuroblastoma x glioma cells.

Isolation of human C-reactive protein and serum amyloid P component.

New considerations on hydrogen peroxide and related substances as food additives in view of carcinogenicity.

Enhancement of hyperthermia-induced cytotoxicity upon ATP deprivation.

Epidemiological study of nasal and nasopharyngeal cancer and their relation to phenoxy acid or chlorophenol exposure.

Molecular steps in the action and regulation of epidermal growth factor: a cellular mitogen.

2,3,7,8-tetrachlorodibenzo-p-dioxin and related halogenated aromatic hydrocarbons: examination of the mechanism of toxicity.

Mortality study of persons exposed to dioxin in a trichlorophenol-process accident that occurred in the BASF AG on November 17, 1953.

Toxicity of 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin (TCDD).

Isolation of gamma-glutamyl transpeptidase positive hepatocytes during the early stages of hepatocarcinogenesis in the rat.

Identification and characterization of a high-affinity saturable binding protein for the carcinogen benzo(a)pyrene.

Renal transport of 2'-deoxytubercidin in mice.

Mutagenic, teratogenic and pharmacokinetic properties of cyclophosphamide and some of its deuterated derivatives.

Heterogeneity in the rate of benzo[a]pyrene metabolism in single cells: quantitation using flow cytometry.

Suppression of natural killing in vitro by monocytes and polymorphonuclear leukocytes: requirement for reactive metabolites of oxygen.

Studies on the interaction of bleomycin A2 with rat lung microsomes. II. Involvement of adventitious iron and reactive oxygen in bleomycin-mediated DNA chain breakage.

Complete amino acid sequence of the group-specific antigen gene-encoded phosphorylated proteins of mouse leukemia viruses.

Genetic activity of diethylstilbestrol in *Saccharomyces cerevisiae*: enhancement of mutagenicity by oxidizing agents.

Carcinogenesis Bioassay of 2,3,7,8-Tetrachlorodibenzo-p-dioxin (CAS No. 1746-01-6) in Osborne-Mendel Rats and B6C3F1 Mice (Gavage Study).

Carcinogenesis Bioassay of 2,3,7,8-Tetrachlorodibenzo-p-dioxin (CAS No. 1746-01-6) in Swiss-Webster Mice (Dermal Study).

Comparative evaluation of different pairs of DNA repair-deficient and DNA repair-proficient bacterial tester strains for rapid detection of chemical mutagens and carcinogens.

Assessment of myelotoxicity caused by environmental chemicals.

Role of the bilayer in the shape of the isolated erythrocyte membrane.

The Ah regulatory gene product. Survey of nineteen polycyclic aromatic compounds' and fifteen benzo[a]pyrene metabolites' capacity to bind to the cytosolic receptor.

Transplacental effects of carcinogens and non-carcinogens on activities of pyruvate kinase and lactate dehydrogenase as well as isozymic pattern of LDH in mouse lung.

Effect of 4-dimethylaminomethyl-1-(3-hydroxyphenyl)-1-nonen-3-one hydrochloride and related compounds on respiration in rat liver mitochondria.

The isolation and characterization of a mouse myeloma protein with anti-dextran activity.

Microtubule stability and assembly in living cells: the influence of metabolic inhibitors, taxol and pH.

Non-Hodgkin's lymphoma of the skin and occupational exposure to herbicides.

Preliminary experimental contribution to the study of possible carcinogenic activity of two herbicides containing atrazine-simazine and trifluralin as active principles.

Role of glutathione in the metabolism-dependent toxicity and chemotherapy of cyclophosphamide.

[Early pattern of pulmonary fibrosis following administration of cytostatics and intoxication by paraquat (author's transl)].

Soft-tissue sarcomas, phenoxy herbicides, and chlorinated phenols.

Investigations into the mechanism of paraquat toxicity utilizing a cell culture system.

Inhalation toxicity of acrylic acid.

Soft-tissue sarcomas and exposure to chemical substances: a case-referent study.

Malignant lymphoma and exposure to chemicals, especially organic solvents, chlorophenols and phenoxy acids: a case-control study.

Carcinogenicity of picloram.

2,4,5-T, trichlorophenol, and soft tissue sarcoma.

Repeated exposure to alpha-ethylacrolein vapour: subacute toxicity study in rats.

In vitro transformation of hamster embryo cells by 3-(N-salicyloyl)amino-1,2,4-triazole.

[Pulmonary damage caused by cytostatics and paraquat (author's transl)].

Characterization of the inhibitory effects of the phytotoxic agent propachlor (alpha-chloro-N-isopropyl-acetanilide), on L1210 cell proliferation.

Effect of inhibitors of plant cell division on mammalian tumor cells in vitro.

Mutagenic activity of diallate and triallate determined by a battery of in vitro mammalian and microbial tests.

Activity of pyruvate kinase and lactic acid dehydrogenase in mouse lung after transplacental exposure to carcinogenic and non-carcinogenic chemicals.

Oxidation of phenylhydroxylamine in aqueous solution: a model for study of the carcinogenic effect of primary aromatic amines.

Investigation on cyclophosphamide treatment during the preimplantation period. II. In vitro studies on the effects of cyclophosphamide and its metabolites 4-OH-cyclophosphamide, phosphoramidate mustard, and acrolein on blastulation of four-cell and eight-cell mouse embryos and on their subsequent development during implantation.

Role of sulfation in the formation of DNA adducts from N-hydroxy-2-acetylaminofluorene in rat liver in vivo. Inhibition of N-acetylated aminofluorene adduct formation by pentachlorophenol.

Morphological transformation of C3H/10T1/2 CL8 cells by alkylating agents.

Quantitation of differences between spontaneous and induced liver tumors in mice with an automated image analyzer.

Enhanced suppressor cell activity as a mechanism of immunosuppression by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Improved monitoring system of neutron flux during boron-neutron capture therapy.

Influence of inducers of monooxygenases on cytotoxic efficiency of ellipticine on leukemia L1210 cells.

Synthesis of pro-collagen type II by a xenotransplanted human chondroblastic osteosarcoma.

Folate analogues altered in the C9-N10 bridge region. 18. Synthesis and antitumor evaluation of 11-oxahomoaminopterin and related compounds.

A comparison of purified poly(ADP-ribose) polymerases from Ehrlich ascites tumor cells, pig thymus, and HeLa S3 cells.

Insulin secretion by a transplantable rat islet cell tumour.

[Phenoxyacetic acid, chlorphenols and cancer].

Non-Hodgkin's lymphoma of the scalp in workers exposed to dioxins.

Primary structure of the major human pituitary pro-opiomelanocortin NH₂-terminal glycopeptide. Evidence for an aldosterone-stimulating activity.

Mechanism of natural resistance to vincristine in rat ascites hepatoma AH66.

A non-mitogenic analogue of epidermal growth factor enhances the phosphorylation of endogenous membrane proteins.

Soft tissue sarcomas and chlorinated phenols.

Inhibition of Ca²⁺ of oxidative phosphorylation in myeloid tumor mitochondria.

Enzymatic alterations in mouse hepatic nodules induced by a chlorinated hydrocarbon pesticide.

Characteristics of membrane transport of methotrexate by cultured human breast cancer cells.

Relation of soft-tissue sarcoma, malignant lymphoma and colon cancer to phenoxy acids, chlorophenols and other agents.

An IgM-secreting cell line derived from the mouse plasmacytoma 104E expresses a different VH gene.

A scanning electron microscopic study of the two-step effect of cytochalasin B on Ehrlich ascites tumor cells.

Entactin, a novel basal lamina-associated sulfated glycoprotein.

The role of respiration in tumor cell transition from the noncycling to the cycling state.

Translational products of Moloney murine sarcoma virus RNA: identification of proteins encoded by the murine sarcoma virus src gene.

Adenylate cyclase and guanylate cyclase activity in normal and leukemic human lymphocytes.

Tumor cell anti-oxidant defenses. Inhibition of the glutathione redox cycle enhances macrophage-mediated cytotoxicity.

Enhancement of antitumor activity of glutamine antagonists 6-diazo-5-oxo-L-norleucine and acivicin in cell culture by glutaminase-asparaginase.

Dioxin, chloracne, and soft tissue sarcoma.

Mast cell-mediated tumor-cell cytotoxicity. Role of the peroxidase system.

The accumulation of amino acids by mouse ascites-tumour cells. Dependence on but lack of equilibrium with the sodium-ion electrochemical gradient.

Evidence for a plasma membrane redox system on intact ascites tumor cells with different metastatic capacity.

Vitamin B12-dependent methyltetrahydrofolate: homocysteine methyltransferase activity in normal and leukemic human hematopoietic cells.

The development and prognosis of chronic intoxication by tetrachlordibenzo-p-dioxin in men.

Type IV collagen contains two distinct chains in separate molecules.

Effect of pH on fluorescence polarization of DMSO induced Friend leukemic cells.

Antigenic modulation of lymphocytic surface immunoglobulin yielding resistance to complement-mediated lysis. II. Relationship to redistribution of the antigen.

Arsenic-related hepatic angiosarcoma.

Shedding of tumor cell surface membranes.

5-Fluoro- and 5-chlorocyclophosphamide: synthesis, metabolism, and antitumor activity of the cis and trans isomers.

Studies on the mechanism of denaturation of cytochrome P-450 by cyclophosphamide and its metabolites.

Developmental onset of mixed-function oxidase activity in preimplantation mouse embryos.

Inhibition in vivo of the formation of adducts between metabolites of benzo(a)pyrene and DNA by aryl hydrocarbon hydroxylase inducers.

Alpha-fetoprotein on human peripheral blood lymphocytes does not block complement-dependent lymphocytotoxicity.

Carcinogenicity tests of certain environmental and industrial chemicals.

Enzyme histochemistry and immunohistochemistry on biopsy specimens of pathologic human bone marrow.

Studies of the kinetics of the isolated mitochondrial ATPase using dinitrophenol as a probe.

Studies on mutagenic constituents of apple brandy and various alcoholic beverages collected in western France, a high incidence area for oesophageal cancer.

Alteration of urinary levels of the carcinogen, N-hydroxy-2-naphthylamine, and its N-glucuronide in the rat by control of urinary pH, inhibition of metabolic sulfation, and changes in biliary excretion.

Carcinogenicity studies of selected herbicides.

[Bowen's disease with multiple lesions caused by chronic arsenic poisoning].

[Survey of the death causes in forest workers with and without exposure to phenoxyacid chemicals].

2,4,5-T and cancer.

Dioxin and 2,4,5-T: what are the risks?

Herbicide exposure and tumor mortality. An updated epidemiologic investigation on Swedish railroad workers.

Spermine oxidation products are selectively toxic to fibroblasts in cultures of normal human prostatic epithelium.

Dispute resolution conference on 2,4,5-T.

Action of intensive cigarette smoke inhalations on the rat lung. Role of particulate and gaseous cofactors.

PCP dioxins found to pose health risks.

A mortality analysis of employees engaged in the manufacture of 2,4,5-trichlorophenoxyacetic acid.

Mutagenicity evaluation of chemical pesticides.

Acute leukaemia after exposure to a weed killer, 2-methyl-4-chlorphenoxyacetic acid.

Prevention of isophosphamide-induced urothelial toxicity with 2-mercaptoethane sulphonate sodium (mesnum) in patients with advanced carcinoma.

Physico-chemical, mutagenic and carcinogenic properties of nitrosated urea herbicide metabolites.

Does acrolein contribute to the cytotoxicity of cyclophosphamide?

Optimal fixation conditions for the immunoperoxidase identification of human J chain from tissue sections.

Microtubules in cultured cells; indirect immunofluorescent staining with tubulin antibody.

Mutagenic potency of haloacroleins and related compounds.

Comparison of the mutagenicities of malondialdehyde and the side products formed during its chemical synthesis.

Cooperative programme of the European Economic Community on short-term assays for mutagenicity.

A membrane glycoprotein from human neuroblastoma cells isolated with the use of a monoclonal antibody.

Temperature-dependent cytosol-to-nucleus translocation of the Ah receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin in continuous cell culture lines.

Mechanism of the linkage between the electrophoretic mobility and oxygen uptake of ascites tumor cells.

Comparative induction of aryl hydrocarbon hydroxylase activity in vitro by analogues of dibenzo-p-dioxin.

Cultured hepatoma cells as a model system for studying insulin processing and biologic responsiveness.

Histopathologic differences between liver tumors in untreated (C57BL/6 X C3H)F1 (B6C3F1) mice and Nitrofen-fed mice.

Measurement of 5-fluoro-2'-deoxyuridine serum levels by gas chromatography chemical ionization mass spectrometry.

A general characteristic of tumor mitochondria: leakage of endogenous Mg²⁺ on incubation with uncoupler and resultant reduction of uncoupler-stimulated ATPase activity.

Histone 2B can be modified by the attachment of ubiquitin.

Effects of 2,4-dinitrophenol and other metabolic inhibitors on the bidirectional carrier fluxes, net transport, and intracellular binding of methotrexate in Ehrlich ascites tumor cells.

Carcinogenicity of pronamide.

Metabolism of 3,3'-Diiodothyronine and 3'-monoiodothyronine, and effect of potassium cyanide and dinitrophenol and glucuronidation of thyroxine in cultured rat hepatoma cells.

Effects of combined glutamine and serum deprivation on glucose control of hexose transport in mammalian fibroblast cultures.

Lymphocyte capping induced by polycationized ferritin.

T lymphocyte-mediated suppression of myeloma function in vitro. III. Regulation of antibody production in hybrid myeloma cells by T lymphocytes.

Regulation of muscarinic receptor-mediated cyclic GMP synthesis by cultured mouse neuroblastoma cells.

Quantitative evaluation of the promotion by 2,3,7,8-tetrachlorodibenzo-p-dioxin of hepatocarcinogenesis from diethylnitrosamine.

Folate analogues altered in the C9-N10 bridge region. 16. Synthesis and antifolate activity of 11-thiohomoaminopterin.

Mortality experience of employees exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Isolation, characterization and amino acid sequence studies of the cyanogen bromide fragments of the H-2Dd glycoprotein.

Effect of iron therapy on serum ferritin levels in iron-deficiency anemia.

Role of oxygen-dependent mechanisms in antibody-induced lysis of tumor cells by activated macrophages.

Relationship between membrane transport of methotrexate and endogenous cyclic adenosine 3':5'-monophosphate in the Ehrlich ascites tumor.

Discontinuities in the triple helical sequence Gly-X-Y of basement membrane (type IV) collagen.

Energization of amino acid transport in energy-depleted Ehrlich cells and plasma membrane vesicles.

Antibodies specific for histone H2b fragments 1-58 and 63-125 in antisera to H2b and to the fragments: probes for histone evolution.

Processing of prolactin by human breast cancer cells in long term tissue culture.

Time-dependent inhibition by 2,3,7,8-tetrachlorodibenzo-p-dioxin of skin tumorigenesis with polycyclic hydrocarbons.

Characterization of collagen synthesized by normal and chemically transformed rat liver epithelial cell lines.

Antileukemic activity of 2-bis(2-methylthio)vinyl-1-methylquinolinium iodides.

Primary structure of chicken liver dihydrofolate reductase.

[Malignant lymphoma and exposure to chemical substances, in particular organic solvents, chlorophenol and phenoxyacetates].

Actual new cancer-causing hydrazines, hydrazides, and hydrazones.

Consideration of the possible carcinogenicity of some pesticides.

General health effects of prolonged exposure to 3,3',4,4'-tetrachloroazobenzene and 3,3',4,4'-tetrachloroazoxybenzene in rats.

No excess in cancer deaths found in largest group ever studied for long-term effects of dioxin exposure..

Esophagitis caused by oral medication.

Congenital hypothalamic hamartoblastoma, hypopituitarism, imperforate anus and postaxial polydactyly--a new syndrome? Part I: clinical, causal, and pathogenetic considerations.

Examination of bone marrow, immunologic parameters and host susceptibility following pre- and postnatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

The mortality experience of workers exposed to tetrachlorodibenzodioxin in a trichlorophenol process accident.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on macrophage and natural killer cell-mediated cytotoxicity in mice.

Phorbol myristate acetate-induced neutrophil autotoxicity. A comparison with H₂O₂ toxicity.

Catalysis of divergent pathways of 2-acetylaminofluorene metabolism by multiple forms of cytochrome P-450.

Cytotoxicity and DNA cross-linking activity of 4-sulfidocyclophosphamides in mouse leukemia cells in vitro.

Retinoids inhibit 2,3,7,8-tetrachlorodibenzo-p-dioxine-induced activity of benzo[a]pyrene metabolizing enzymes in human diploid fibroblasts.

Isolation and characterization of cyanogen bromide fragments of the A and B chains of the antitumor toxin ricin D.

Bioassay of Fluometuron for Possible Carcinogenicity (CAS No. 2164-17-2).

Bioassay of a Mixture of 1,2,3,6,7,8-Hexachlorodibenzo-p-dioxin and 1,2,3,7,8,9-Hexachlorodibenzo-p-dioxin (Gavage) for Possible Carcinogenicity (CAS No. 57653-85-7; CAS No. 19408-74-3).

Bioassay of a Mixture of 1,2,3,6,7,8-Hexachlorodibenzo-p-dioxin and 1,2,3,7,8,9-Hexachlorodibenzo-p-dioxin (Dermal Study) for Possible Carcinogenicity (CAS No. 57653-85-7; CAS No. 19408-74-3).

Bioassay of Phenol for Possible Carcinogenicity (CAS No.108-95-2).

Effect of carcinogenic and non-carcinogenic chemicals on the activities of four glycolytic enzymes in mouse lung.

Mutagenic activation of N-2-fluorenylacetamide and N-hydroxy-N-2-fluorenylacetamide in subcellular fractions from X/Gf mice.

Effect of human gastric juice on the mutagenicity of chemicals.

Chemical studies of tissue polypeptide antigen (TPA). II. Partial amino acid sequences of cyanogen bromide fragments of TPA subunit B1.

Interaction of cytopathogenic toxin from *Clostridium difficile* with cells in tissue culture.

Mutagenic and carcinogenic effects of pesticides.

The development of mesna for the inhibition of urotoxic side effects of cyclophosphamide, ifosfamide, and other oxazaphosphorine cytostatics.

Absence of arsenite mutagenicity in *E. coli* and Chinese hamster cells.

Mutagenicity of vinyl compounds in *Salmonella typhimurium*.

Cyclophosphamide cystitis. Studies aimed at its minimization.

Occupational exposures to pesticides containing organoarsenicals in California.

The effects of aminotriazole (ATZ) on the thyroid gland and the development of the White Leghorn chick.

Chronic lung disease. Pulmonary fibrosis.

Effects of paraquat aerosol on mouse lung.

Cyclophosphamide cystitis--identification of acrolein as the causative agent.

Results of a two-year chronic toxicity and oncogenic study of rats ingesting diets containing 2,4,5-trichlorophenoxyacetic acid (2,4,5-T).

Case-control study: soft-tissue sarcomas and exposure to phenoxyacetic acids or chlorophenols.

Viets and vets fear herbicide health effects.

Carcinogenicity testing of herbicide 2,4,5-trichlorophenoxyethanol containing dioxin and of pure dioxin in Swiss mice.

[Changes of biochemical processes of the lungs caused by air pollutants (author's transl)].

Role of pesticides in hepatocarcinogenesis.

Toxicity of the herbicides 2,4-D, DEF, propanil and trifluralin to the Dungeness crab, Cancer magister.

The genotoxic effects of 2,4,5-T.

Research related to the herbicide buvinol, especially for possible carcinogenicity.

Review of the toxicology of paraquat (1,1'-dimethyl-4,4'-bipyridinium chloride).

Effects of pesticides on the reticuloendothelial system.

Paraquat-induced DNA damage in mammalian cells.

Differentiation of cultured neuroblastoma cells by urea derivatives.

Cyclophosphamide cystitis and bladder cancer. A hypothesis.

Some effects of atrazine on Ehrlich ascites tumor cells in vitro and in vivo.

IARC monographs on the evaluation of the carcinogenic risk of chemicals to humans: some monomers, plastics and synthetic elastomers, and acrolein.

Effects of enantiomeric homogeneity on the in vitro metabolism and in vivo anticancer activity of (+)- and (-)-cyclophosphamide.

Genetic mechanism accounting for precise immunoglobulin domain deletion in a variant of MPC 11 myeloma cells.

Enhanced efflux of actinomycin D, vincristine, and vinblastine in adriamycin-resistant subline of P388 leukemia.

Immunochemical characterization of the basement membrane glycoprotein laminin.

Cellular accumulation and disposition of aclacinomycin A.

Correlation between metabolic reduction rates and electron affinity of nitroheterocycles.

Pyrolysis products from amino acids and protein: highest mutagenicity requires cytochrome P1-450.

[Case- control study of malignant mesenchymal soft tissue tumors and exposure to chemical substances].

[Existence of several non-specific recognition systems in macrophages].

[Alterations in the survival of x-irradiated cells by 2,4-dinitrophenol depending on ATP deprivation].

Evidence for a large internal pressure in biological membranes.

2,4,5- and 2,4,6-trichlorophenols.

Augmentation of antitumor cytotoxicity of MOPC-315 tumor bearer spleen cells by depletion of dinitrophenol-adherent cells prior to in vitro immunization.

Anticarcinogenic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on benzo(a)pyrene and 7,12-dimethylbenz(a)anthracene tumor initiation and its relationship to DNA binding.

Control of in vitro cytotoxicity of positively charged liposomes.

Insecticide/herbicide exposure, aplastic anaemia, and pseudotumor cerebri.

Expression of the major red cell sialoglycoprotein, glyophorin A, in the human leukemic cell line K562.

Cellular pharmacology of 7(R)-O-methylnogarol: a new anticancer agent.

Induction of enzyme activity in cell culture: a rapid screen for detection of planar polychlorinated organic compounds.

Mode of uptake and degradation of 125I-labelled insulin by isolated hepatocytes and H4 hepatoma cells.

Active efflux of daunorubicin and adriamycin in sensitive and resistant sublines of P388 leukemia.

High-affinity uptake of gamma-aminobutyric acid in cultured glial and neuronal cells.

Long-term toxicologic studies of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in laboratory animals.

Nature of collagen in dermatofibrosarcoma protuberans.

Purification and characterization of a major component from the cytoplasmic matrix of cultured murine L cells.

Biomolecules bearing the S- or SeAsMe₂ function: amino acid and steroid derivatives.

Isolation and immunochemical characterization of antibodies from the sera of cancer patients which are reactive against human melanoma cell membranes by affinity chromatography.

Capping of surface immunoglobulin on 'hairy cells' is independent of energy production.

Functional studies of hairy cell leukemia (leukemic reticuloendotheliosis).

2,3,7,8-Tetrachlorodibenzo-P-dioxin: potent anticarcinogenic activity in CD-1 mice.

Comparison of rat liver and Walker 256 carcinosarcoma tRNAs.

Molecular properties of T-lymphoma immunoglobulin. III. Peptide composition of the light chain.

Molecular properties of T-lymphoma immunoglobulin. II. Peptide composition of the heavy chain.

The amino acid sequence of dihydrofolate reductase from the mouse lymphoma L1210.

Malignant lymphoma of histiocytic type and exposure to phenoxyacetic acids or chlorophenols.

Abnormal protein synthesis in malignant melanoma cells.

[The difference of drug sensitivity of tumor cells on N-ethyloxycarbonylaminomethyl-L-isoleucine (A-145 (author's transl))].

[Effect of cycloheximide, 2,4-dinitrophenol and papaverine on ribosomal RNA synthesis in Ehrlich ascitic carcinoma cells].

Synthesis of daunorubicin analogues with novel 9-acyl substituents.

Alterations in the survival of X-irradiated cells by 2,4-dinitrophenol depending on ATP deprivation.

Potential of guanosine 3':5'-monophosphate accumulation in C-6 glial tumor cells.

Detection of early lymphocyte activation by the fluorescent cell membrane probe N-phenyl-1-naphthylamine.

Effects of pretreatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin on the capacity of hepatic and extrahepatic mouse tissues to convert procarcinogens to mutagens for Salmonella typhimurium auxotrophs.

An estimate of the maximum in vivo covalent binding of 2,3,7,8-tetrachlorodibenzo-p-dioxin to rat liver protein, ribosomal RNA, and DNA.

Is sodium azide preservative a carcinogen?

Reversal of sodium-azide mutagenicity by liver preparations and by gastric juice.

Ozonation of mutagenic and carcinogenic alkylating agents, pesticides, aflatoxin B1, and benzidine in water.

Affinity cytotoxicity with an alcohol dehydrogenase-antibody conjugate and allyl alcohol.

Metabolic activation/deactivation reactions during perinatal development.

Metabolic activation and deactivation of mutagens and carcinogens.

Detection of carcinogen-induced stimulation of cytochrome P-448-associated enzymes by ¹⁴CO₂ breath analysis studies using dimethylaminoazobenzene.

Uptake of potassium ions by normal and crown-gall-tumor cells of Vinca rosea grown in tissue culture.

Bioassay of calcium cyanamide for possible carcinogenicity.

Bioassay of dibenzo-p-dioxin for possible carcinogenicity.

Bioassay of 2,7-dichlorodibenzo-p-dioxin (DCDD) for possible carcinogenicity.

Bioassay of Nitrofen for Possible Carcinogenicity (CAS No. 1836-75-5).

Mammalian endogenous peroxidases as cellular markers and as biosynthetic endpoints of hormone-mediated activity: viewpoint from cytochemistry.

Comparative toxicology of chlorinated compounds on mammalian species.

[Are we hunting the wrong villain in the cigarette?].

Familial and sporadic Hodgkin's disease associated with occupational wood exposure.

Dietary subacute toxicity of ethylene thiourea in the laboratory rat.

Paraquat lung injury in rabbits.

Co-existence of morbus Hodgkin and aplastic anaemia.

Pulmonary histological appearances in fatal paraquat poisoning.

Carcinogenic bioassay of the herbicide, 2,4,5-trichlorophenoxyethanol (TCPE) with different 2,3,7,8-tetrachlorodibenzo-p-dioxin (dioxin) content in Swiss mice.

Paraquat ingestion and pulmonary injury.

The genetic toxicology of phenoxy acids other than 2,4,5-T.

alpha-aminoisobutyrate transport into cells from R3230AC mammary adenocarcinoma. Evidence for sodium ion-dependent and -independent carrier-mediated entry and effects of diabetes.

Effect of butylated hydroxytoluene and paraquat on urethan tumorigenesis in mouse lung.

Toward less hazardous cigarettes. Current advances.

Comparative effects of aminotriazole on normal and acatalasemic mice.

Carcinogenic and antitumor effects of aminotriazole on acatalasemic and normal catalase mice.

Characteristics of proline transport into R3230AC mammary tumor cells.

An assessment of human exposure to N-nitroso compounds.

Mode of mutagenic action of methylnitrosocyanamide, a potent carcinogen.

Herbicidal phenylalkylureas as possible mutagens I. Mutagenicity tests with some urea herbicides.

Migration of human lymphocytes. II. Variation of lymphocyte distribution.

RNA hybridization to DNA coupled with cyanogen-bromide-activated sephadex. The purification of polyoma messenger RNA.

[Some peculiarities of ATPase in tumor mitochondria].

The hyperpolarizing and depolarizing effects of 2,4-dinitrophenol on Ehrlich cells.

Reversion of transformed glycolysis to normal by inhibition of protein synthesis in rat kidney cells infected with temperature-sensitive mutant of Rous sarcoma virus.

The membrane potential of mouse ascites-tumour cells studied with the fluorescent probe 3,3'-dipropylxadicarbocyanine. Amplitude of the depolarization caused by amino acids.

Uptake and metabolism of thyroid hormones by cultured monkey hepatocarcinoma cells. Effects of potassium cyanide and dinitrophenol.

[Use of *Bacillus megaterium* H. in studying the antitumor properties of new ethyleneimine derivatives of N-dichlorophosphonyliminotri-chloroacetic acid trichlorophosphopolyalkane halides and chloroanhydrides].

2,3,7,8-tetrachlorodibenzo-p-dioxin as cocarcinogen causing 3-methylcholanthrene-initiated subcutaneous tumors in mice genetically "nonresponsive" at Ah locus.

Tumour-necrosis factor from the rabbit. I. Mode of action, specificity and physicochemical properties.

Pancreatic carcinogenesis and naturally occurring pancreatic neoplasms of rats and mice in the NCI carcinogenesis testing program.

Relation of cell type and cell density in tissue culture to the isoaccepting spectra of the nucleoside Q containing tRNAs: tRNA^{Tyr}, tRNA^{His}, tRNA^{Asn} and tRNA^{Asp}.

Methylnitrosophenylurea--a highly carcinogenic compound.

Nasopharyngeal carcinoma associated with long-term arsenic ingestion.

Structural comparison of deoxycytidine kinases purified from cells sensitive (P815) or resistant (P815/ara-C) to 1-beta-D-arabinofuranosylcytosine.

Lack of tumor-promoting ability of certain environmental chemicals in a two-stage mouse skin tumorigenesis assay.

Rat liver aldehyde dehydrogenase--immunochemical identity of 2,3,7,8-tetrachlorodibenzo-p-dioxin inducible normal liver and 2-acetylaminofluorene inducible hepatoma isozymes.

Cytotoxic effects of maleic hydrazide.

Overview of potential mutagenic problems posed by some pesticides and their trace impurities.

Results of a two-year chronic toxicity and oncogenicity study of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rats.

Chemical determination of the m1 Moloney sarcoma virus pP60gag gene order: evidence for unique peptides in the carboxy terminus of the polyprotein.

Cancerostatics. III. Synthesis and some chemical transformations of 3-cyano-5(pyridyl-4.)pyrid-2-one.

Testing of known carcinogens and noncarcinogens for their ability to induce unscheduled DNA synthesis in HeLa cells.

Differences in metabolism of vinylidene chloride between mice and rats.

Bioassay of picloram for possible carcinogenicity.

Bioassay of nitrofen for possible carcinogenicity.

Bioassay of trifluralin for possible carcinogenicity.

Bioassay of sulfallate for possible carcinogenicity (CAS No. 95-06-7).

[Occupational liver lesions].

[Malignant mesenchymal tumors and exposure to phenoxy acids -- a clinical observation].

Some fumigants, the herbicides 2,4-D and 2,4,5-T, chlorinated dibenzodioxins and miscellaneous industrial chemicals.

Dialysis and hemoperfusion of poisons and drugs--update.

Effects of exposure to acrolein vapor in hamsters simultaneously treated with benzo[a]pyrene or diethylnitrosamine.

1,1-Dichloroethylene hepatotoxicity: proposed mechanism of action and distribution and binding of ¹⁴C radioactivity following inhalation exposure in rats.

Tumor-initiating ability of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and Arochlor 1254 in the two-stage system of mouse skin carcinogenesis.

Induction of tumors in mice with the herbicide succinic acid 2,2-dimethylhydrazide.

Expression of protein HC on the plasma membrane of different human cell types.

Differentiation of malignant neuroblastoma cells: evidence for a mitochondrial role.

Spectral and metabolic characteristics of mitochondrial fractions from rotenone-induced tumours.

[Preliminary data on the action of sulfonamido-phenoxyacetic acid on the synthesis of nucleic acids and proteins in the brain and liver of normal and cancerous rats].

Chromatographic behavior of several mammalian tRNAs on acylated dihydroxyl-borate cellulose and Aminex A-28.

Identification of collagen alpha1(I) trimer and normal type I collagen in a polyoma virus-induced mouse tumor.

[Some additional facts about thymus (author's transl)].

A reassessment of decreased amino acid accumulation by Ehrlich ascites tumor cells in the presence of metabolic inhibitors.

Mechanism of uptake of nitrosoureas by L5178Y lymphoblasts in vitro.

Unexpected additional mode of energization of amino-acid transport into Ehrlich cells.

Purification of human ovarian tumor-associated antigen and demonstration of circulating tumor antigen in patients with advanced ovarian malignancy.

Primary structures of cardiotoxin analogues II and IV from the venom of *Naja naja atra*.

The amino acid sequence of dihydrofolate reductase from L1210 cells.

Procollagen and collagen produced by a teratocarcinoma-derived cell line, TSD4: evidence for a new molecular form of collagen.

Effector cell stimulation-inhibition of in vitro lymphoma cell DNA synthesis and correlation with in vivo antitumor response.

The occurrence of collagen type II in bronchogenic carcinoma.

[RNA biosynthesis in the ascitic cells of Ehrlich's carcinoma and Zajdela's hepatoma under conditions of blocked oxidative phosphorylation].

Oxygen-dependent chemical tumorigenesis in a *Nicotiana* hybrid: inhibition by ascorbic acid and dinitrophenol.

[Food additives and their possible genetic toxicity; microbiological determination].

Disturbance of microsomal detoxication mechanisms in liver by chlorophenol pesticides.

Bioassay of chloramben for possible carcinogenicity.

Tumorigenic agents in unburned processed tobacco: N-nitrosodiethanolamine and 1,1-dimethylhydrazine.

Tumorigenic effect of 3-amino-1H-1,2,4-triazole on rat thyroid.

Facts and nonfacts.

[Chloracne, porphyria cutanea tarda, and other poisonings due to the herbicides].

Bioassay of 2, 4, 5-trichlorophenoxyacetic acid for carcinogenicity in mice.

Some experiences relating to food safety.

Some carbamates, thiocarbamates and carbazides.

Therapeutic effects of cysteine adducts of alpha, beta-unsaturated aldehydes on Ehrlich ascites tumor of mice.

Anti-tumorigenic effect of maleic hydrazide on mouse skin.

The use of deuterated analogs in qualitative and quantitative investigations of the metabolism of cyclophosphamide (NSC-26271).

Comparative pharmacologic study in vitro and in vivo with cyclophosphamide (NSC-26271), cyclophosphamide metabolites, and plain nitrogen mustard compounds.

Biologic activity of two derivatives and six possible metabolites of cyclophosphamide (NSC-26271).

Two stable Fenton oxidation products of cyclophosphamide (NSC-26271) as precursors of 4-hydroxycyclophosphamide (NSC-196562) under physiologic conditions.

Biochemical pathology of lung damage produced by chemicals.

Cellular metabolic control by chemical modification of cell membrane.

Formation of mutagenic N-nitroso compounds from the pesticides prometryne, dodine and carbaryl in the presence of nitrite at pH 1.

[Potential tumor inhibitors by alkylation of 3-amino-s-triazole (author's transl)].

The production of urinary phenols by gut bacteria and their possible role in the causation of large bowel cancer.

Human lymphocyte motility: normal characteristics and anomalous behavior of chronic lymphocytic leukemia cells.

Sheep erythrocytes binding ability on a mouse renal adenocarcinoma cell line and its hybrid with human lymphocytes.

Localization of the cell attachment region in types I and II collagens.

Boric Acid and Borax Protect Human Lymphocytes from Oxidative Stress and Genotoxicity Induced by 3-Monochloropropane-1,2-diol.

Cardiac Radiofrequency Ablation Exacerbates Myocardial Injury through Pro-Inflammatory Response and Pro-Oxidative Stress in Elderly Patients with Persistent Atrial Fibrillation.

TRPA1 as a promising target in ischemia/reperfusion: A comprehensive review.

Organophosphate Toxicity.

[Favorable evolution of severe paraquat poisoning. Treatment with gastric lavage, activated charcoal, cyclophosphamide + corticoids, and conventional daily hemodialysis: case study at the Franck Joly Hospital Center in French Guiana].

Supplementation with grape seed extract, onion peel extract, or rosemary extract in the diet alleviates growth inhibition, liver damage, and oxidative stress induced by diquat in Lohmann chicks.

Unraveling the combined deleterious effects of ochratoxin A and atrazine upon broiler's health: Toxicopathological, serum biochemical and immunological perspectives.

Dietary curcumin supplementation alleviates diquat-induced oxidative stress in the liver of broilers.

Sub-acute toxicity of the herbicide glufosinate-ammonium exposure in adult red swamp crayfish (*Procambarus clarkii*).

Effect of perinatal exposure to glyphosate and its mixture with 2,4-D and dicamba on rat dam kidney and thyroid function and offspring's health.

Mutagenicity, hepatotoxicity, and neurotoxicity of glyphosate and fipronil commercial formulations in Amazon turtles neonates (*Podocnemis expansa*).

The mechanism of acrolein exposure inhibited the release of neutrophil extracellular traps: By reducing respiratory burst and Raf/MEK/ERK pathway and promote cell apoptosis.

Hotspots of soil pollution: Possible glyphosate and aminomethylphosphonic acid risks on terrestrial ecosystems and human health.

Chronic dietary exposure to a glyphosate-based herbicide in broiler hens has long-term impacts on the progeny metabolism.

A comparative review and computational assessment of acetochlor toxicity in fish: A novel endocrine disruptor?

Response to oxidative stress of AML12 hepatocyte cells with knockout of methionine sulfoxide reductases.

Synergistic toxicity of 2,4-dichlorophenoxyacetic acid and arsenic alters biomarkers in rats.

Association between Glyphosate Exposure and Erythrograms in a Representative Sample of US Adults: NHANES 2013-2014.

Haematological and biochemical toxicity in freshwater fish *Clarias gariepinus* and *Oreochromis niloticus* following pulse exposure to atrazine, mancozeb, chlorpyrifos, lambda-cyhalothrin, and their combination.

Effects of Atrazine exposure on human bone marrow-derived mesenchymal stromal cells assessed by combinatorial assay matrix.

Acrolein produced during acute kidney injury promotes tubular cell death.

[Investigation on health status of workers exposed to glyphosate].

Variations in the Behaviour, Survival, Haematology, and Biochemistry of *Ctenopharyngodon idella* (Grass Carp) After Exposure to Commercial Grade Atrazine.

Urinary glyphosate and AMPA levels in a cross-sectional study of postmenopausal women: Associations with organic eating behavior and dietary intake.

The role of acrolein for E-cigarette vapour condensate mediated activation of NADPH oxidase in cultured endothelial cells and macrophages.

Immunotoxicity of relevant mixtures of pesticides and metabolites on THP-1 cells.

Elucidating the effects of acute and chronic exposure to 2,4-Dichlorophenoxyacetic acid on fathead minnow (*Pimephales promelas*) innate immunity.

Effects of glyphosate, 2,4-D, chlorantraniliprole, and imidacloprid formulations, separately and in mixtures in *Caiman latirostris* hatchlings.

Cannabidiol Protects Dopaminergic-like Neurons against Paraquat- and Maneb-Induced Cell Death through Safeguarding DJ-1/CY5(106) and Caspase 3 Independently of Cannabinoid Receptors: Relevance in Parkinson's Disease.

[Experimental study on the toxicokinetics and gastrointestinal damage in rats poisoned with acute diquat poisoning at different exposure doses].

Glyphosate-induced liver and kidney dysfunction, oxidative stress, immunosuppression in Nile tilapia, but ginger showed a protection role.

Paraquat-induced systemic inflammation and oxidative stress in rats improved by *Curcuma longa* ethanolic extract, curcumin and a PPAR agonist.

Exposure to phenoxyacetic acids and glyphosate as risk factors for non-Hodgkin lymphoma- pooled analysis of three Swedish case-control studies including the sub-type hairy cell leukemia.

Predicting structural features of selected flavonoids responsible for neuroprotection in a *Drosophila* model of Parkinson's disease.

TDP-43 is a potential marker of dopaminergic neuronal damage caused by atrazine exposure.

Atrazine contaminated sites and bullfrog tadpoles: evasive trends and biochemical consequences.

Role of NF- κ B/IL-1 β Pathway and Caspase 3 in Mediating the Hepatoprotective Effect of Rutin against Paraquat-Induced Liver Toxicity in Male Rats.

Sulforaphane suppresses paraquat-induced oxidative damage in bovine in vitro-matured oocytes through Nrf2 transduction pathway.

Therapeutic potential of amitriptyline for paraquat-induced pulmonary fibrosis: Involvement of caveolin-1-mediated anti-epithelial-mesenchymal transition and inhibition of apoptosis.

Exposure to the herbicide fluridone induces cardiovascular toxicity in early developmental stages of zebrafish.

Parasite and Pesticide Impacts on the Bumblebee (*Bombus terrestris*) Haemolymph Proteome.

Glyphosate based-herbicide disrupts energy metabolism and activates inflammatory response through oxidative stress in mice liver.

Pterostilbene Confers Protection against Diquat-Induced Intestinal Damage with Potential Regulation of Redox Status and Ferroptosis in Broiler Chickens.

Global warming and glyphosate toxicity (II): Offspring zebrafish modelling with behavioral, morphological and immunohistochemical approaches.

Ecotoxicological relevance of glyphosate and flazasulfuron to soil habitat and retention functions - Single vs combined exposures.

Treatment with paraquat affects the expression of ferroptosis-related genes.

Maternal exposure to glyphosate-based herbicide causes changes in the vascular function of offspring adult rats.

How the exposure to environmentally relevant pesticide formulations affects the expression of stress response genes and its relation to oxidative damage and genotoxicity in *Caiman latirostris*.

Synergistic toxicity of ethanol and 2,4-dichlorophenoxyacetic acid enhances oxidant status, DNA damage, inflammation, and apoptosis in rats.

A mass event of paraquat poisoning via inhalation.

Integrated untargeted and targeted proteomics to unveil plasma prognostic markers for patients with acute paraquat poisoning: A pilot study.

Subchronic feeding study of glyphosate-tolerant maize GG2 with the *gr79-epsps* and *gat* genes in Wistar Han RCC rats.

Effect of glyphosate-based herbicide roundup on hemato-biochemistry of *Labeo rohita* (Hamilton, 1822) and susceptibility to *Aeromonas hydrophila* infection.

Study on the therapeutic effect of glucocorticoids on acute kidney injury in rats exposed to diquat.

Clinical and pathological characteristics of acute kidney injury caused by diquat poisoning.

Sympathetic and angiotensinergic activity in spontaneously hypertensive rats treated with 3-amino-1,2,4-triazole.

Liquid Chromatography-Mass Spectrometry Screening of Cyclophosphamide DNA Damage In Vitro and in Patients Undergoing Chemotherapy Treatment.

Soluble thrombomodulin alleviates Diquat-induced acute kidney injury by inhibiting the HMGB1/IL-1 β /NF- κ B signalling pathway.

Triazine herbicides exposure, natural immunoglobulin M antibodies, and fasting plasma glucose changes: Association and mediation analyses in general Chinese urban adults.

[Predictive value of serum lactate dehydrogenase on prognosis of patients with paraquat poisoning].

Glyphosate Causes Vascular Toxicity through Cellular Senescence and Lipid Accumulation.

Acrolein adducts and responding autoantibodies correlate with metabolic disturbance in Alzheimer's disease.

Predicting the relationship between pesticide genotoxicity and breast cancer risk in South Indian women in in vitro and in vivo experiments.

TRPA1 deficiency aggravates dilated cardiomyopathy by promoting S100A8 expression to induce M1 macrophage polarization in rats.

Trehalose prevents glyphosate-induced hepatic steatosis in roosters by activating the Nrf2 pathway and inhibiting NLRP3 inflammasome activation.

Acrolein Exposure Impaired Glucose Homeostasis and Increased Risk of Type 2 Diabetes: An Urban Adult Population-Based Cohort Study with Repeated Measures.

Hypoxia inducible factor-1 \pm (HIF-1 \pm) as an early predictor of acute hydrogen cyanamide (Dormex) poisoning.

Hydralazine plays an immunomodulation role of pro-regeneration in a mouse model of spinal cord injury.

Exposure to Volatile Organic Compounds Is Associated with Hypertension in Black Adults: The Jackson Heart Study.

Inactivation of microglia dampens blood-brain barrier permeability and loss of dopaminergic neurons in paraquat-lesioned mice.

Sensitization of GSH synthesis by curcumin curtails acrolein-induced alveolar epithelial apoptosis via Keap1 cysteine conjugation: A randomized controlled trial and experimental animal model of pneumonitis.

Prenatal exposure to pesticides and domain-specific neurodevelopment at age 12 and 18 months in Nanjing, China.

Snake venom nerve growth factor-inspired designing of novel peptide therapeutics for the prevention of paraquat-induced apoptosis, neurodegeneration, and alteration of metabolic pathway genes in the rat pheochromocytoma PC-12 cell.

[Effect of pirfenidone on paraquat-induced pulmonary fibrosis in rats].

[Effects of Nintedanib associated with Shenfu Injection on paraquat-induced lung injury in rats].

Glyphosate in house dust and risk of childhood acute lymphoblastic leukemia in California.

Sodium arsenite and dimethylarsenic acid induces apoptosis in OC3 oral cavity cancer cells.

Organotin and organochlorine toxicants activate key translational regulatory proteins in human immune cells.

Dose ingested, vomiting, and outcome in patients ingesting a standard paraquat 20SL formulation.

Ethalfuralin induces developmental toxicity in zebrafish via oxidative stress and inflammation.

DNA Chimeras as Electrochemical Biosensors for Host-Guest Measurements in Blood.

Polyamine-Derived Aminoaldehydes and Acrolein: Cytotoxicity, Reactivity and Analysis of the Induced Protein Modifications.

[A Meta-analysis of the predictive value of peripheral blood neutrophil to lymphocyte ratio in mortality of patients with acute paraquat poisoning].

Integrating environmental carry capacity based on pesticide risk assessment in soil management: A case study for China.

Teratogenic effects of the dicamba herbicide in Zebrafish (*Danio rerio*) embryos.

Fitness assessment of *Mytilus galloprovincialis* Lamarck, 1819 after exposure to herbicide metabolite propachlor ESA.

Defining the toxicological profile of 4-hydroxyphenylpyruvate dioxygenase-directed herbicides to *Aedes aegypti* and *Amblyomma americanum*.

[Effects of specimen preservation and transportation on blood paraquat concentration in rats].

Influences of glyphosate residues and different concentrate feed proportions in dairy cow rations during early gestation on performance, blood parameters, functional properties and DNA damage of blood cells in cows and their offspring.

Paraquat is toxic to the soil-dwelling arthropod, *Folsomia candida* (Collembola: Isotomidae), and has potential effects on its *Wolbachia* endosymbiont.

Polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans in blood samples from historically herbicide-sprayed areas and rural and industrialized unsprayed areas in Vietnam.

Dietary glutathione supplementation attenuates oxidative stress and improves intestinal barrier in diquat-treated weaned piglets.

HPLC-MS/MS determination and the postmortem distribution or postmortem redistribution of paraquat and its metabolites in four fatal intoxication cases.

Urine glyphosate exposure and serum sex hormone disruption within the 2013-2014 National Health and Nutrition Examination survey (NHANES).

Assessment of exposure to pesticide mixtures in five European countries by a harmonized urinary suspect screening approach.

Assessment of Genetic Damage Induced via Glyphosate and Three Commercial Formulations with Adjuvants in Human Blood Cells.

Serum creatinine in predicting mortality after paraquat poisoning: A systematic review and meta-analysis.

Closed Bipolar Electrode-Enabled Electrochromic Sensing of Multiple Metabolites in Whole Blood.

The effect and mechanism of Fushen Granule on gut microbiome in the prevention and treatment of chronic renal failure.

Effect of acupuncture at neck-Jiaji (EX-B 2) and tuina on the cognitive function in the patients with subjective cognitive decline.

Nephroprotective effect of diosmin against sodium arsenite-induced renal toxicity is mediated via attenuation of oxidative stress and inflammation in mice.

Apply Anticoagulants after Discharge not Benefit to the Incidence of Symptomatic Thrombus in High-Altitude Areas: A Retrospective Study.

Safety and efficacy of once-daily HU6 versus placebo in people with non-alcoholic fatty liver disease and high BMI: a randomised, double-blind, placebo-controlled, phase 2a trial.

Pesticides as a potential independent childhood leukemia risk factor and as a potential confounder for electromagnetic fields exposure.

Characterization of Oyster Protein Hydrolysate-Iron Complexes and their In Vivo Protective Effects against Iron Deficiency-Induced Symptoms in Mice.

High-Soluble-Fiber Diet Attenuates Hypoxia-Induced Vascular Remodeling and the Development of Hypoxic Pulmonary Hypertension.

Phloretin as an add-on therapy to losartan attenuates diabetes-induced AKI in rats: A potential therapeutic approach targeting TLR4-induced inflammation.

The Use of Multiple Biomarkers to Assess the Health of Anuran Amphibians in the Brazilian Cerrado Savanna: An Ecotoxicological Approach.

Maternal serum dioxin-like activity and gestational age at birth and indices of foetal growth: The Aarhus birth cohort.

Knockdown of IL4I1 Improved High Glucose-evoked Insulin Resistance in HepG2 Cells by Alleviating Inflammation and Lipotoxicity Through AHR Activation.

A 90-day feeding study of genetically modified maize LP007-1 in wistar han RCC rats.

2,3,7,8-tetrachlorodibenzo-p-dioxin induces multigenerational testicular toxicity and biosynthetic disorder of testosterone in BALB/C mice: Transcriptional, histopathological and hormonal determinants.

Assessing farmer's exposure to pesticides and the risk for non-communicable diseases: A biomonitoring study.

Iron Preparations in the Management of Iron Deficiency Anemia in Infants and Children: A Systematic Review and Meta-Analysis.

Synthesis and Preclinical Evaluation of [Methylpiperazine-(11)C]brigatinib as a PET Tracer Targeting Both Mutated Epidermal Growth Factor Receptor and Anaplastic Lymphoma Kinase.

Lung proliferation is dependent on the duration not the timepoint of tracheal occlusion in nitrofen rats with diaphragmatic hernia.

Iron deficiency in young basketball players: Is a 100 µg/L ferritin cut-off appropriate for iron supplementation?: Results of a randomized placebo-controlled study.

Neonatal outcomes from a randomized controlled trial of maternal treatment of iron deficiency anemia with intravenous ferumoxytol vs oral ferrous sulfate.

Intravenous infusions of ferumoxytol compared to oral ferrous sulfate for the treatment of anemia in pregnancy: a randomized controlled trial.

Antibiotics augment the impact of iron deficiency on metabolism in a piglet model.

In vitro phenotypic evidence for the utilization of iron from different sources and siderophores production in the fish pathogen *Tenacibaculum dicentrarchi*.

A phenome-wide association study (PheWAS) to identify the health impacts of 4-cresol sulfate in the Nagahama Study.

Dynamic photodamage of red blood cell induced by CisDiMPyP porphyrin.

Arsenic trioxide (ATO) up-regulates cytochrome P450 1A (CYP1A) enzymes in murine hepatoma Hepa-1c1c7 cell line.

Hepatoprotective and anti-hyperglycemic effects of ferulic acid in arsenic-exposed mice.

Correlation of heavy metals' exposure with the prevalence of coronary heart disease among US adults: findings of the US NHANES from 2003 to 2018.

Is a Lower Dose of More Bioavailable Iron (18-mg Ferrous Bisglycinate) Noninferior to 60-mg Ferrous Sulfate in Increasing Ferritin Concentrations While Reducing Gut Inflammation and Enteropathogen Detection in Cambodian Women? A Randomized Controlled Noninferiority Trial.

Proteomic Profiling of Hypoplastic Lungs Suggests an Underlying Inflammatory Response in the Pathogenesis of Abnormal Lung Development in Congenital Diaphragmatic Hernia.

Effects of food-derived oligopeptide iron chelates on liver injury and gut microbiota homeostasis in iron-deficiency anemia female rats: a pilot study.

Torsemide increases arsenic concentrations by inhibition of multidrug resistance protein 4 in arsenic trioxide treated acute promyelocytic leukemia patients.

Association between polychlorinated biphenyls exposure and incident type 2 diabetes mellitus: A nested case-control study.

Diosmin exerts hepatoprotective and antihyperglycemic effects against sodium arsenite-induced toxicity through the modulation of oxidative stress and inflammation in mice.

Transcriptional, hormonal and histological alterations in the ovaries of BALB/c mice exposed to TCDD in connection with multigenerational female infertility.

Possible Effects of Uremic Toxins p-Cresol, Indoxyl Sulfate, p-Cresyl Sulfate on the Development and Progression of Colon Cancer in Patients with Chronic Renal Failure.

Concomitant inhibition of TLR-4 and SGLT2 by phloretin and empagliflozin prevents diabetes-associated ischemic acute kidney injury.

An active new formulation of iron carried by aspartyl casein for iron-deficiency anemia: results of the ACCESS trial.

Environmentally Mediated Health Disparities.

Impaired pancreatic beta-cell function after a single dose of oral iron: A before-and-after (pre-post) study.

The effect of *Alnus incana* (L.) Moench extracts in ameliorating iron overload-induced hepatotoxicity in male albino rats.

Serum Levels of Indoxyl Sulfate and P-cresol in Type II Diabetic Patients With and Without Nephropathy.

Polyhalogenated carbazoles induce hepatic metabolic disorders in mice via alteration in gut microbiota.

Individual, Independent, and Joint Associations of Toxic Metals and Manganese on Hypertensive Disorders of Pregnancy: Results from the MIREC Canadian Pregnancy Cohort.

The vitamin B(12) analog cobinamide ameliorates azide toxicity in cells, *Drosophila melanogaster*, and mice.

Efficacy of ferric carboxymaltose for treatment of iron deficiency anemia diagnosed in the third trimester of pregnancy: A case-control study.

Detection of drug safety signal of drug-induced neutropenia and agranulocytosis in all-aged patients using electronic medical records.

Electrochemical and Optical Sensors for the Detection of Chemical Carcinogens Causing Leukemia.

Impact of Plastic-Related Compounds on P-Glycoprotein and Breast Cancer Resistance Protein In Vitro.

Intravenous ferric carboxymaltose versus oral ferrous sulfate replacement in elderly patients after acute non-variceal gastrointestinal bleeding (FIERCE): protocol of a multicentre, open-label, randomised controlled trial.

Acetaldehyde dehydrogenase 2 activation attenuates sepsis-induced brain injury through NLRP3 inflammasome regulation.

Chitosan-based carbon nitride-polydopamine-silver composite dressing with antibacterial properties for wound healing.

A Paternal Fish Oil Diet Preconception Reduces Lung Inflammation in a Toxicant-Driven Murine Model of New Bronchopulmonary Dysplasia.

Assessment of uremic toxins in advanced chronic kidney disease patients on maintenance hemodialysis by LC-ESI-MS/MS.

Neighborhood Deprivation, Indoor Chemical Concentrations, and Spatial Risk for Childhood Leukemia.

Vitamin E protective effects on genomic and cellular damage caused by paediatric preventive supplementation for anaemia: an experimental model.

Acute Pesticide Poisoning in Tobacco Farming, According to Different Criteria.

NKG2D Ligand Expression Induced by Oxidative Stress Mitigates Cutaneous Ischemia-Reperfusion Injury.

Alternate day versus daily oral iron for treatment of iron deficiency anemia: a randomized controlled trial.

Iron pill-induced gastritis: an unrecognized side effect of iron-deficiency anemia.

Supplementation with sesame oil suppresses genotoxicity, hepatotoxicity and enterotoxicity induced by sodium arsenite in rats.

Cytotoxic Effects of Darinaparsin, a Novel Organic Arsenical, against Human Leukemia Cells.

Prion Protein Overexpression in Adipose-Derived Mesenchymal Stem Cells (ADMSCs) Effectively Protected Rodent Kidney Against Ischemia-Reperfusion Injury Via Enhancing ATP/Mitochondrial Biogenesis-Role of ADMSC Rejuvenation and Proliferation.

[Clinical case report of acute dinitrophenol poisoning with a fatal outcome of Udmurt Republic].

Upregulated TSP1 and CD47 expression in the lung in nitrofen-induced congenital diaphragmatic hernia.

The environmental pollutant, polychlorinated biphenyl 126, alters liver function in a rodent model of alcohol-associated liver disease.

In vitro and in vivo assessments of the genotoxic potential of 3-chloroallyl alcohol.

Multi-omics reveals diet-induced metabolic disorders and liver inflammation via microbiota-gut-liver axis.

Betaine protects against sodium arsenite-induced diabetes and hepatotoxicity in mice.

The Mechanisms Underlying the Pharmacological Effects of GuiPi Decoction on Major Depressive Disorder based on Network Pharmacology and Molecular Docking.

Systematic Review: Association of Pesticide Exposure and Child Wheeze and Asthma.

Iron supplementation given to nonanemic infants: neurocognitive functioning at 16 years.

Exosomes released by environmental pollutant-stimulated Keratinocytes/PBMCs can trigger psoriatic inflammation in recipient cells via the AhR signaling pathway.

Biotechnological Key Genes of the *Rhodococcus erythropolis* MGMM8 Genome: Genes for Bioremediation, Antibiotics, Plant Protection, and Growth Stimulation.

Antioxidant Vitamins Attenuate Glyphosate-Induced Development of Type-2 Diabetes Through the Activation of Glycogen Synthase Kinase-3 β and Forkhead Box Protein O-1 in the Liver of Adult Male Rats.

Cytotoxicity of 19 Pesticides in Rainbow Trout Gill, Liver, and Intestinal Cell Lines.

Phenolic compounds in the freshwater environment in South Korea: Occurrence and tissue-specific distribution.

Endoscopic Diagnosis of Hookworm Disease in a Patient with Severe Iron Deficiency Anemia: A Case Report.

Delta Storage Pool Deficiency: A Pediatric Case Report and Review of the Literature.

Management of Acute Ferrous Sulfate Poisoning Using Activated Charcoal Monotherapy: A Case Report.

Association between Environmental Exposure to Multiclass Organic Pollutants and Sex Steroid Hormone Levels in Women of Reproductive Age.

Oxidative Stress and Cytotoxicity Induced by Co-Formulants of Glyphosate-Based Herbicides in Human Mononuclear White Blood Cells.

Use of antianemics in prenatal care: A population cohort from a capital city in the North region of Brazil.

Acute oral poisoning due to pretilachlor herbicide - a rare case report from Nepal.

Plant-derived squalene supplementation improves growth performance and alleviates acute oxidative stress-induced growth retardation and intestinal damage in piglets.

Uroprotective Potential of Campesterol in Cyclophosphamide Induced Interstitial Cystitis; Molecular Docking Studies.

Impact of endocrine disruptors on peripheral blood mononuclear cells in vitro: role of gender.

Haemorrhagic cystitis: a review of management strategies and emerging treatments.

Effect of replacing inorganic iron with iron-rich microbial preparations on growth performance, serum parameters and iron metabolism of weaned piglets.

Application of an Antioxidant Response Element-Nuclear Factor Erythroid 2 Luciferase Assay for Assessing the Skin Sensitization Potential of Agrochemicals.

Evaluation of arsenic metabolism and tight junction injury after exposure to arsenite and monomethylarsonous acid using a rat in vitro blood-Brain barrier model.

Caffeic acid recarbonization: A green chemistry, sustainable carbon nano material platform to intervene in neurodegeneration induced by emerging contaminants.

Microbe-derived uremic solutes enhance thrombosis potential in the host.

Mild Oxidative Stress Induced by Sodium Arsenite Reduces Lipocalin-2 Expression Levels in Cortical Glial Cells.

3-Methylglutaryl carnitine: A biomarker of mitochondrial dysfunction.

Alcohol degradation, learning, and memory-enhancing effect of *Acetobacter pasteurianus* BP2201 in *Caenorhabditis elegans* model.

Nilotinib alleviates paraquat-induced hepatic and pulmonary injury in rats via the Nrf2/Nf- κ B axis.

Gut Microbiota and Its Role in the Brain-Gut-Kidney Axis in Hypertension.

B, P, and S heteroatom doped, bio- and hemo-compatible 2D graphitic-carbon nitride (g-C(3)N(4)) with antioxidant, light-induced antibacterial, and bioimaging endeavors.

Developmental and cardiovascular toxicities of acetochlor and its chiral isomers in zebrafish embryos through oxidative stress.

Changes in Whole Blood Polyamine Levels and Their Background in Age-Related Diseases and Healthy Longevity.

Regulation of Hepatic Xenosensor Function by HNF4 α .

Fibroblast Growth Factor 21 in Gestational Diabetes Mellitus and Type 2 Diabetes Mellitus.

Bioactive strawberry fruit (*Arbutus unedo* L.) extract remedies paraquat-induced neurotoxicity in the offspring prenatally exposed rats.

Biological Characterization of *Cleome felina* L.f. Extracts for Phytochemical, Antimicrobial, and Hepatoprotective Activities in Wistar Albino Rats.

Toxicity assessment and DNA repair kinetics in HEK293 cells exposed to environmentally relevant concentrations of Glyphosate (Roundup[®] Control Max).

Impact of dioxin exposure on brain morphometry and social anxiety in men living in the most dioxin-contaminated area in Vietnam.

Role of NRF2 and reactive aldehydes in acute cellular rejection in liver transplant recipients.

Interactions of arsenic exposure, arsenic metabolism with red blood cell folate on the risk of hypertension: NHANES 2007-2016.

Evaluation of Lac and NGAL on the Condition and Prognosis of Patients with Diquat Poisoning.

Ferroptosis contributes to cyclophosphamide-induced hemorrhagic cystitis.

Effects of temperature-humidity index on blood metabolites of German dairy cows and their female calves.

Biliverdin as a disease-modifying agent: An integrated viewpoint.

Terbutryn causes developmental toxicity in zebrafish (*Danio rerio*) via apoptosis and major organ malformation in the early stages of embryogenesis.

An eco-friendly system for stabilization of retinol: A step towards attending performance with improved environmental respect.

Effect of Intestinal Flora on Hyperuricemia-Induced Chronic Kidney Injury in Type 2 Diabetic Patients and the Therapeutic Mechanism of New Anti-Diabetic Prescription Medications.

Effects of early repeated hemoperfusion combined with hemodialysis on the prognosis of patients with paraquat poisoning.

Oral iron supplementation ameliorated alterations in iron uptake and utilization in copper-toxic female Wistar rats.

Association between urinary glyphosate levels and serum neurofilament light chain in a representative sample of US adults: NHANES 2013-2014.

Protective potential effects of hydroalcoholic extract of *Teucrium polium* L. (Lamiaceae) against paraquat-induced lung fibrosis: An experimental study in rats.

Pubertal progression in relation to peripubertal exposure to organochlorine chemicals in a cohort of Russian boys.

Uro-protective role of chrysin against cyclophosphamide-induced hemorrhagic cystitis in rats involving the turning-off NF- κ B/P38-MAPK, NO/PARP-1 and STAT-3 signaling cascades.

Pre-treatment with Dazomet enhances the biocontrol efficacy of *Purpureocillium lilacinum* to *Meloidogyne incognita*.

Subchronic Arsenite Exposure Induced Atrophy and Erythropoietin Sensitivity Reduction in Skeletal Muscle Were Relevant to Declined Serum Melatonin Levels in Middle-Aged Rats.

A UOF based on a cyclotriphosphazene skeleton: fluorescence sensing of different substituted aldehydes and NACs.

[8] and [10]-Gingerol reduces urothelial damage in ifosfamide-induced hemorrhagic cystitis via JAK/STAT/FOXO signaling pathway via IL-10.

Prevention of DSS-induced colitis in mice with water kefir microbiota via anti-inflammatory and microbiota-balancing activity.

Environmental cadmium exposure alters the internal microbiota and metabolome of Sprague-Dawley rats.

Intra-amniotic sildenafil treatment improves lung blood flow and pulmonary hypertension in congenital diaphragmatic hernia rats.

Atrazine residue in waters of Ijebu-North local government, Nigeria: implications on human health, hematological, and biochemical parameters.

Internet-Purchased Sodium Azide Used in a Fatal Suicide Attempt: A Case Report and Review of the Literature.

Therapeutic effects of avocado (*Persea americana* Mill.) seed powder against reproductive toxicity induced by Mancozeb (herbicide) in female rabbits.

Iron-rich *Candida utilis* improves intestinal health in weanling piglets.

Safety monitoring of oral iron supplements in pregnant women with anemia: a multi-center observational clinical study.

The Effect of Oral Iron Supplementation on Gut Microbial Composition: a Secondary Analysis of a Double-Blind, Randomized Controlled Trial among Cambodian Women of Reproductive Age.

Sucrosomial(®) Iron: An Updated Review of Its Clinical Efficacy for the Treatment of Iron Deficiency.

Resveratrol inhibits AhR/Notch axis and reverses Th17/Treg imbalance in purpura by activating Foxp3.

Effects of metamifop on ammonia production and metabolism of *Monopterus albus*.

Minocycline as a Neuroprotective Agent in Arsenic-Induced Neurotoxicity in PC12 Cells.

Dietary rumen-protected choline supplementation regulates blood biochemical profiles and urinary metabolome and improves growth performance of growing lambs.

Mobitz type I as manifestation of acute lithium cardiotoxicity.

Pentachlorophenol-induced hemotoxicity diminishes antioxidant potential and oxidizes proteins, thiols, and lipids in rat blood: An in vivo study.

Effects of perinatal stress on the metabolites and lipids in plasma of dairy goats.

Effects of intranasal dantrolene nanoparticles on brain concentration and behavior in PS19 tau transgenic mice.

Stevioside Improves Antioxidant Capacity and Intestinal Barrier Function while Attenuating Inflammation and Apoptosis by Regulating the NF- κ B/MAPK Pathways in Diquat-Induced Oxidative Stress of IPEC-J2 Cells.

Metabolomics Differences of the Donor Livers Between In Situ and Ex Situ Conditions During Ischemia-free Liver Transplantation.

Exposure to oxyfluorfen-induced hematobiochemical alterations, oxidative stress, genotoxicity, and disruption of sex hormones in male African catfish and the potential to confront by *Chlorella vulgaris*.

Influences of Glyphosate Contaminations and Concentrate Feed on Performance, Blood Parameters, Blood Cell Functionality and DNA Damage Properties in Fattening Bulls.

Enhancing Immune Protection in Hemodialysis Patients: Role of the Polymethyl Methacrylate Membrane.

Transfer and toxicokinetic modeling of non-dioxin-like polychlorinated biphenyls (ndl-PCBs) into accidentally exposed dairy cattle and their calves - A case report.

Excretion kinetics of 1,3-dichlorobenzene and its urinary metabolites after controlled airborne exposure in human volunteers.

Small molecule agonist of mitochondrial fusion repairs mitochondrial dysfunction.

Endometriosis: Update of Pathophysiology, (Epi) Genetic and Environmental Involvement.

Association of bone mineral density with trichlorophenol: a population-based study.

Serum Level of Protein-Bound Uraemic Toxins in Haemodialysis Patients with Chronic Kidney Disease-Associated Pruritus: Myths and Facts.

Neuroprotective properties of borax against aluminum hydroxide-induced neurotoxicity: Possible role of Nrf-2/BDNF/AChE pathways in fish brain.

Ceruloplasmin Interferes with the Assessment of Blood Lipid Hydroperoxide Content in Small Ruminants.

Protective effects of *Acetobacter ghanensis* against gliadin toxicity in intestinal epithelial cells with immunoregulatory and gluten-digestive properties.

Effects of p-cresol, a uremic toxin, on cancer cells.

The quest for metabolic biomarkers of agrochemicals exposure via in vitro studies and suspect screening.

Microbial Virulence Factors, Antimicrobial Resistance Genes, Metabolites, and Synthetic Chemicals in Cabins of Commercial Aircraft.

Effects of the Vitamin D3 on Alleviating the Oxidative Stress Induced by Diquat in Wenchang Chickens.

Randomized Controlled Trial Comparing Ferrous Sulfate and Iron Sucrose in Iron Deficiency Anemia in Pregnancy.

Melatonin Ameliorates Diquat-Induced Testicular Toxicity via Reducing Oxidative Stress, Inhibiting Apoptosis, and Maintaining the Integrity of Blood-Testis Barrier in Mice.

Absorption and Transport Mechanism of Red Meat-Derived N-glycolylneuraminic Acid and Its Damage to Intestinal Barrier Function through the NF- κ B Signaling Pathway.

Overview of Adductomics in Toxicology.

Characterizing the lethal and sub-lethal effects of genetically modified soybean expressing Cry1A.105, Cry2Ab2, and Cry1Ac insecticidal proteins against *Spodoptera* species (Lepidoptera: Noctuidae) in Brazil.

Selectively mixed matrix hemodialysis membrane for adequate clearance of p-cresol by the incorporation of imprinted zeolite.

Negligible Toxicokinetic Differences of Glyphosate by Different Vehicles in Rats.

Analytical development for the assessment of pesticide contaminations in blood and plasma of wild birds: The case of grey partridges (*Perdix perdix*).

A host-gut microbial amino acid co-metabolite, p-cresol glucuronide, promotes blood-brain barrier integrity in vivo.

Andrographolide alleviates paraquat-induced acute lung injury by activating the Nrf2/HO-1 pathway.

Trehalose prevents glyphosate-induced testicular damage in roosters via its antioxidative properties.

Individual and combined toxicity of microplastics and diuron differs between freshwater and marine diatoms.

Probiotics ameliorate growth retardation of glyphosate by regulating intestinal microbiota and metabolites in crucian carp (*Carassius auratus*).

Alterations in the Expression of Antioxidant Enzyme Genes in Response to Pesticide Exposure During Embryonic Development in the Native Reptile Species *Caiman latirostris*.

[Effects and significance of continuous hemoperfusion on patients with diquat poisoning].

Protective effect of biogenic selenium nanoparticles against diquat-induced acute toxicity via regulation of gut microbiota and its metabolites.

Glyphosate differentially affects the allergic immune response across generations in mice.

Herbicide-induced methaemoglobinaemia and the role of methylene blue in its management.

Investigation of the toxicity of a glyphosate-based herbicide in a human liver cell line: Assessing the involvement of Nrf2 pathway and protective effects of vitamin E and α -lipoic acid.

Perinatal exposure to a glyphosate pesticide formulation induces offspring liver damage.

Histopathological, immunohistochemical, and molecular investigation of atrazine toxic effect on some organs of adult male albino rats with a screening of *Acacia nilotica* as a protective trial.

Identification of differentially expressed genes and pathways in diquat and paraquat poisoning using bioinformatics analysis.

Immunotoxicity of pentachlorophenol to a marine bivalve species and potential toxification mechanisms underpinning.

Pathophysiological Changes in Rhesus Monkeys with Paraquat-Induced Pulmonary Fibrosis.

The toxicokinetics of acute paraquat poisoning in specific patients: a case series.

[Study on the Protective effect and mechanism of Nicotinamide Riboside on lung injury in paraquat intoxicated mice].

Time-resolved proteome and transcriptome of paraquat-induced pulmonary fibrosis.

Phenotypic analyses, protein localization, and bacteriostatic activity of *Drosophila melanogaster* transferrin-1.

Chronic dietary exposure to a glyphosate-based herbicide results in reversible increase early embryo mortality in chicken.

Herbicide Roundup shows toxic effects in nontarget organism *Drosophila*.

Glyphosate infiltrates the brain and increases pro-inflammatory cytokine TNF α : implications for neurodegenerative disorders.

Acer pseudoplatanus: A Potential Risk of Poisoning for Several Herbivore Species.

Mass Spectrometry-Based Peptide Profiling of Haemolymph from *Pterostichus melas* Exposed to Pendimethalin Herbicide.

Effects of exposure to glyphosate on oxidative stress, inflammation, and lung function in maize farmers, Northern Thailand.

Acrolein, an environmental toxicant and its applications to in vivo and in vitro atherosclerosis models: An update.

Agent Orange and dioxin-induced myeloid leukemia: a weaponized vehicle of leukemogenesis.

Pesticides Inhibit Retinoic Acid Catabolism in PLHC-1 and ZFL Fish Hepatic Cell Lines.

Ginkgolide C Alleviates Acute Lung Injury Caused by Paraquat Poisoning via Regulating the Nrf2 and NF- κ B Signaling Pathways.

An in vitro strategy using multiple human induced pluripotent stem cell-derived models to assess the toxicity of chemicals: A case study on paraquat.

Acetochlor Affects Bighead Carp (*Aristichthys nobilis*) by Producing Oxidative Stress, Lowering Tissue Proteins, and Inducing Genotoxicity.

Ameliorative effect of selenium yeast^Â supplementation on the physio-pathological impacts of chronic exposure to glyphosate and or malathion in *Oreochromis niloticus*.

3,4-Dihydroxybenzaldehyde attenuates pentachlorophenol-induced cytotoxicity, DNA damage and collapse of mitochondrial membrane potential in isolated human blood cells.

Protective effect of *Thymus munbyanus* aqueous extract against 2,4-dichlorophenoxyacetic acid-induced nephrotoxicity in Wistar rats.

Clinicohematological, Mutagenic, and Oxidative Stress Induced by Pendimethalin in Freshwater Fish Bighead Carp (*Hypophthalmichthys nobilis*).

Histopathological, Immunohistochemical, And Molecular Alterations In Brain Tissue And Submandibular Salivary Gland Of Atrazine-Induced Toxicity In Male Rats.

Pentachlorophenol has significant adverse effects on hematopoietic and immune system development in zebrafish (*Danio rerio*).

Long-term exposure to polyethylene microplastics and glyphosate interferes with the behavior, intestinal microbial homeostasis, and metabolites of the common carp (*Cyprinus carpio* L.).

Aqueous *Thunbergia laurifolia* leaf extract alleviates paraquat-induced lung injury in rats by inhibiting oxidative stress and inflammation.

Paraquat toxicity in different cell types of Swiss albino mice.

[Preliminary study on time-dependent changes of intestinal tract and brain-gut axis in mice model of Parkinson's disease induced by paraquat].

Toxicity of commercial atrazine in *Rattus norvegicus* organs as a function of concentration: histopathological, ultrastructural and hematological evaluation.

Direct Effects of Glyphosate on In Vitro T Helper Cell Differentiation and Cytokine Production.

Resveratrol exhibits neuroprotection against paraquat-induced PC12 cells via heme oxygenase 1 upregulation by decreasing MiR-136-5p expression.

Decarboxylases as hypothetical targets for actions of organophosphates: Molecular modeling for prediction of hidden and unexpected health threats.

Quantification and toxicokinetics of paraquat in mouse plasma and lung tissues by internal standard surface-enhanced Raman spectroscopy.

Apiaceous vegetables protect against acrolein-induced pulmonary injuries through modulating hepatic detoxification and inflammation in C57BL/6 male mice.

Low concentrations of glyphosate alone affect the pubertal male rat meiotic step: An in vitro study.

Propolis nanoparticles relieved the impacts of glyphosate-induced oxidative stress and immunosuppression in Nile tilapia.

A Novel Algicidal Bacterium, *Microbulbifer* sp. YX04, Triggered Oxidative Damage and Autophagic Cell Death in *Phaeocystis globosa*, Which Causes Harmful Algal Blooms.

Environmental relevant herbicide prometryn induces developmental toxicity in the early life stages of marine medaka (*Oryzias melastigma*) and its potential mechanism.

Benchmark dose and the adverse effects of exposure to pendimethalin at low dose in female rats.

The protective role of lycopene against toxic effects induced by the herbicide Harness[®] and its active ingredient acetochlor on the African catfish *Clarias gariepinus* (Burchell, 1822).

[Effects on extravascular lung water of lung protective ventilation strategy applied on piglets with acute respiratory distress syndrome induced by paraquat].

Ecotoxicological effects of conventional herbicides and a natural herbicide on freshwater fish (*Danio rerio*).

Protective Effects of N-acetylcysteine Niosome Nanoparticles on Paraquat-induced Nephrotoxicity in Male Rats.

Evaluation of the efficiency of simvastatin loaded PLGA nanoparticles against acute paraquat-intoxicated rats.

Characterization and Quantification of Acrolein-Induced Modifications in Hemoglobin by Mass Spectrometry—Effect of Cigarette Smoking.

Oxidative stress, lipid peroxidation and premature placental senescence in preeclampsia.

[Glyphosate detection in the duodenal fluid of horses with gastric ulcer syndrome].

Case series: Diquat poisoning with acute kidney failure, myocardial damage, and rhabdomyolysis.

Comparative Assessment of the Inhibitory Potential of the Herbicide Glyphosate and Its Structural Analogs on RGD-Specific Integrins Using Enzyme-Linked Immunosorbent Assays.

The Therapeutic Roles of Cinnamaldehyde against Cardiovascular Diseases.

A Composition of Phytonutrients for Glycemic and Weight Management.

pH-responsive cinnamaldehyde-TiO₂ nanotube coating: fabrication and functions in a simulated diabetes condition.

Effects of replacing fish meal with cottonseed protein concentrate on the growth, immune responses, digestive ability and intestinal microbial flora in *Litopenaeus vannamei*.

Total arsenic, dimethylarsinic acid, lead, cadmium, total mercury, methylmercury and hypertension among Asian populations in the United States: NHANES 2011-2018.

lncRNA BIRF Promotes Brain Ischemic Tolerance Induced By Cerebral Ischemic Preconditioning Through Upregulating GLT-1 via Sponging miR-330-5p.

Gentamicin Augments the Quorum Quenching Potential of Cinnamaldehyde In Vitro and Protects *Caenorhabditis elegans* From *Pseudomonas aeruginosa* Infection.

Targeted delivery of acrolein scavenger hydralazine in spinal cord injury using folate-linker-drug conjugation.

Effects of cinnamaldehyde on glucose-6-phosphate dehydrogenase activity, some biochemical and hematological parameters in diabetic rats.

Homicidal paraquat poisoning: Poisoned while drinking.

Theranostic Copolymers Neutralize Reactive Oxygen Species and Lipid Peroxidation Products for the Combined Treatment of Traumatic Brain Injury.

Wnt-induced secreted proteins-1 play an important role in paraquat-induced pulmonary fibrosis.

The acute paraquat poisoning mortality (APPM) score to predict the risk of death in paraquat-poisoned patients.

Mechanisms of cinnamic aldehyde against myocardial ischemia/hypoxia injury in vivo and in vitro: Involvement of regulating PI3K/AKT signaling pathway.

Histopathological Findings in a Fatal Case of Paraquat Poisoning.

Comparison of Biochemical Parameters between Mouse Model and Human after Paraquat Poisoning.

Acrolein, an endogenous aldehyde induces Alzheimer's disease-like pathologies in mice: A new sporadic AD animal model.

Urinary acrolein metabolites, systemic inflammation, and blood lipids: Results from the National Health and Nutrition Examination Survey.

Effects of glyphosate exposure on the miRNA expression profile and construction of the miRNA-mRNA regulatory network in mouse bone marrow cells.

Cinnamaldehyde attenuates kidney senescence and injury through PI3K/Akt pathway-mediated autophagy via downregulating miR-155.

Glyphosate and its breakdown product AMPA elicit cytoprotective responses in haemocytes of the Mediterranean mussel (*Mytilus galloprovincialis*).

Concentrations of blood and urinary arsenic species and their characteristics in general Korean population.

Interactive effects of high temperature and pesticide exposure on oxidative status, apoptosis, and renin expression in kidney of goldfish: Molecular and cellular mechanisms of widespread kidney damage and renin attenuation.

Compounds to mitigate cyanobacterial blooms affect growth and toxicity of *Microcystis aeruginosa*.

Stimulation of de novo glutathione synthesis by nitrofurantoin for enhanced resilience of hepatocytes.

Acute toxicity, bioaccumulation and elimination of prometryn in tilapia (*Oreochromis niloticus*).

Determination of Glyphosate and AMPA in Blood Can Predict the Severity of Acute Glyphosate Herbicide Poisoning.

P450s mediated enhanced herbicide metabolism involved in the thifensulfuron-methyl resistance in *Ipomoea purpurea* L.

Association of Glyphosate Exposure with Blood DNA Methylation in a Cross-Sectional Study of Postmenopausal Women.

Comparison of modes of action between fish, cell and mitochondrial toxicity based on toxicity correlation, excess toxicity and QSAR for class-based compounds.

Engineered resistance and risk assessment associated with insecticidal and weeds resistant transgenic cotton using wister rat model.

Glyphosate damages blood-testis barrier via NOX1-triggered oxidative stress in rats: Long-term exposure as a potential risk for male reproductive health.

The effect of tracheal occlusion in congenital diaphragmatic hernia in the nitrofen rat lung explant model.

Probiotic Bifidobacteria Mitigate the Deleterious Effects of para-Cresol in a *Drosophila melanogaster* Toxicity Model.

A Novel Ex Vivo Drug Assay for Assessing the Transmission-Blocking Activity of Compounds on Field-Isolated *Plasmodium falciparum* Gametocytes.

Pro-Inflammatory Interactions of Dolutegravir with Human Neutrophils in an In Vitro Study.

TIPARP is involved in the regulation of intraocular pressure.

Iron deficiency anemia in infants in Sousa (PB), Brazil: an association with nutritional status.

The significance of thymoquinone administration on liver toxicity of diazinon and cholinesterase activity; a recommendation for prophylaxis among individuals at risk.

Nano-formulations in treatment of iron deficiency anaemia: An overview.

Protocol for a multicenter, double-blinded placebo-controlled randomized controlled trial comparing intravenous ferric derisomaltose to oral ferrous sulfate for the treatment of iron deficiency anemia in pregnancy: The IVIDA2 trial.

Promising hepatoprotective effects of lycopene in different liver diseases.

Efficacy and Mechanism of Buxue Yimu Pills on Gynecological Anemia: A Combination of Clinical and Network Pharmacology Study.

Pesticide exposure and risk of cardiovascular disease: A systematic review.

Oral Ferrous Sulphate Improves Functional Capacity on Heart Failure Patients with Iron Deficiency Anemia.

Potential for TCDD to induce regulatory functions in B cells as part of the mechanism for T cell suppression in EAE.

Association of ambient fine particulate matter exposure with gestational diabetes mellitus and blood glucose levels during pregnancy.

Occupational exposure to pesticides in mothers and fathers and risk of cancer in the offspring: A register-based case-control study from Sweden (1960-2015).

Protective Effect of Lactobacillus sporogenes against Arsenic-Induced Hematological Alterations in Male Albino Wistar Rats.

Analysis of environmental chemical mixtures and nonalcoholic fatty liver disease: NHANES 1999-2014.

Tolerability of Oral Supplementation with Microencapsulated Ferric Saccharate Compared to Ferrous Sulphate in Healthy Premenopausal Woman: A Crossover, Randomized, Double-Blind Clinical Trial.

Carbamylation of Î²2-glycoprotein I generates new autoantigens for antiphospholipid syndrome: a new tool for diagnosis of 'seronegative' patients.

Severe methyl bromide poisoning causing early acute renal failure and anuria: a case report.

Histopathological and immunohistochemical evaluation for detecting changes in blood hormone levels caused by endocrine disruptors in a 28-day repeated-dose study in rats.

Trace Element Interactions, Inflammatory Signaling, and Male Sex Implicated in Reduced Growth Following Excess Oral Iron Supplementation in Pre-Weanling Rats.

Synbiotics, prebiotics and probiotics for solid organ transplant recipients.

Correlation of inflammatory biomarkers with the diversity of Bacteroidaceae, Bifidobacteriaceae, Prevotellaceae and Lactobacillaceae families in the intestinal microbiota of patients with end stage renal disease.

Lactoferrin for iron-deficiency anemia in children with inflammatory bowel disease: a clinical trial.

Contact allergy to the Dexcom G6 glucose monitoring system-Role of 2,2'-methylenebis(6-tert-butyl-4-methylphenol) monoacrylate in the new adhesive.

Fortification of foods with nano-iron: its uptake and potential toxicity: current evidence, controversies, and research gaps.

The Association between Blood Concentrations of PCDD/DFs, DL-PCBs and the Risk of Type 2 Diabetes Mellitus and Thyroid Cancer in South Korea.

Characterization of Developmental Neurobehavioral Toxicity in a Zebrafish MPTP-Induced Model: A Novel Mechanism Involving Anemia.

[The Role of Emergency Departments in Cross-Contamination: The Case of VRE].

Association of prenatal exposure to dioxin-like compounds, polychlorinated biphenyl, and methylmercury with event-related brain potentials in school-aged children: The Hokkaido study.

Xanthogranulomatous pyelonephritis in a pediatric patient.

Preparation of aloe polysaccharide/honey/PVA composite hydrogel: Antibacterial activity and promoting wound healing.

HIF-1 α /VEGF pathway mediates 1,3,6,8-tetrabromo-9 β -H-carbazole-induced angiogenesis: a potential vascular toxicity of an emerging contaminant.

The associations of prenatal exposure to dioxins and polychlorinated biphenyls with neurodevelopment at 6 $\frac{1}{2}$ Months of age: Multi-pollutant approaches.

Feeding cats with chronic kidney disease food supplemented with betaine and prebiotics increases total body mass and reduces uremic toxins.

Comparison of Ferric Sodium EDTA in Combination with Vitamin C, Folic Acid, Copper Gluconate, Zinc Gluconate, and Selenomethionine as Therapeutic Option for Chronic Kidney Disease Patients with Improvement in Inflammatory Status.

[Mechanism and material basis of Sparganii Rhizoma and vinegar-processed Sparganii Rhizoma in treatment of hyperlipidemia based on network pharmacology].

Redox-dependent loss of flavin by mitochondria complex I is different in brain and heart.

Application of FeOOH Nano-Ellipsoids as a Novel Nano-Based Iron Supplement: an In Vivo Study.

Flumioxazin, a PPO inhibitor: A weight-of-evidence consideration of its mode of action as a developmental toxicant in the rat and its relevance to humans.

Phenoxyaromatic Acid Analogues as Novel Radiotherapy Sensitizers: Design, Synthesis and Biological Evaluation.

t(14;18) Translocations in Dioxin-Exposed Workers.

Flavoring agent dihydrocoumarin alleviates IgE-mediated mast cell activation and allergic inflammation.

A Novel Ferritin-Core Analog Is a Safe and Effective Alternative to Oral Ferrous Iron for Treating Iron Deficiency during Pregnancy in Mice.

Phage therapy for refractory periapical periodontitis caused by *Enterococcus faecalis* in vitro and in vivo.

Cancer and occupational exposure to pesticides: a bibliometric study of the past 10 years.

Applying reflective multicriteria decision analysis to understand the value of therapeutic alternatives in the management of gestational and peripartum anaemia in Spain.

Iron from nanostructured ferric phosphate: absorption and biodistribution in mice and bioavailability in iron deficient anemic women.

Integrated molecular biology and metabolomics approach to understand the mechanism underlying reduction of insulin resistance by corn silk decoction.

Bis-Amiridines as Acetylcholinesterase and Butyrylcholinesterase Inhibitors: N-Functionalization Determines the Multitarget Anti-Alzheimer's Activity Profile.

Acute Dyspnea and Hemoptysis in an 84-Year-Old Man With Multiple Comorbidities.

Arsenic compounds induce apoptosis by activating the MAPK and caspase pathways in FaDu oral squamous carcinoma cells.

2, 3, 7, 8-Tetrachlorodibenzo-p-dioxin potential impacts on peripheral blood mononuclear cells of endometriosis women.

Supplementation with Sucrosomial® iron leads to favourable changes in the intestinal microbiome when compared to ferrous sulfate in mice.

Oral iron supplementation in patients with chronic kidney disease: Can it be harmful to the gut microbiota?

p-Cresyl Sulfate Predicts Ischemic Stroke among Patients on Hemodialysis: A Prospective Cohort Study.

Comparative Effects between Oral Lactoferrin and Ferrous Sulfate Supplementation on Iron-Deficiency Anemia: A Comprehensive Review and Meta-Analysis of Clinical Trials.

A randomized double-blind cross-over trial to study the effects of resistant starch prebiotic in chronic kidney disease (ReSPECKD).

Measurement of Urinary Triclocarban and 2,4-Dichlorophenol Concentration and Their Relationship with Obesity and Predictors of Cardiovascular Diseases among Children and Adolescents in Kerman, Iran.

An evidence-based definition of anemia for singleton, uncomplicated pregnancies.

Impact of Uremic Toxins on Endothelial Dysfunction in Chronic Kidney Disease: A Systematic Review.

Evaluation of the prescription pattern of ferrous sulfate as a therapy for preventing iron deficiency anemia in infants.

Potential therapies for sodium azide intoxication; a case report and review of the literature.

Minocycline improves the functional recovery after traumatic brain injury via inhibition of aquaporin-4.

Biotic Supplements in Patients With Chronic Kidney Disease: Meta-Analysis of Randomized Controlled Trials.

Rare fatal poisoning through dermal exposure to paraquat.

nHA-loaded gelatin/alginate hydrogel with combined physical and bioactive features for maxillofacial bone repair.

Fossil-fuel and combustion-related air pollution and hypertension in the Sister Study.

Amide-functionalized 1,2,4-Triazol-5-amines as Covalent Inhibitors of Blood Coagulation Factor XIIa and Thrombin.

Leukemic stem cells and advances in hematopoietic stem cell transplantation for acute myeloid leukemia: a narrative review of clinical trials.

Ethnicity Associated Microbial and Metabonomic Profiling in Newly Diagnosed Ulcerative Colitis.

Effects of various Fe compounds on the bioavailability of Pb contained in orally ingested soils in mice: Mechanistic insights and health implications.

A pilot study of oral iron therapy in erythropoietic protoporphyria and X-linked protoporphyria.

Disparities in chemical exposures among pregnant women and neonates by socioeconomic and demographic characteristics: A nontargeted approach.

Comparison of the effect of ferrous sulfate and ferrous gluconate on prophylaxis of iron deficiency in toddlers 6-24 months old: A randomized clinical trial.

Acetobacter tropicalis bacteraemia in an immunocompromised patient: case report.

Reliable determination of the main metabolites of 2-phenoxyethanol in human blood and urine using LC-MS/MS analysis.

Comparative Biochemical Profiling of Aluminum Chloride and Sodium Azide Induced Neuroinflammation and Cardiometabolic Disturbance.

Effect of water diuresis with hydrogen saturation on the course of acute kidney damage during the separation of oxidation and phosphorylation.

Integrated biomarker approach strongly explaining in vivo sub-lethal acute toxicity of butachlor on Labeo rohita.

Sodium acetate/sodium butyrate alleviates lipopolysaccharide-induced diarrhea in mice via regulating the gut microbiota, inflammatory cytokines, antioxidant levels, and NLRP3/Caspase-1 signaling.

Plastid methylerythritol phosphate pathway participates in the hypersensitive response-related cell death in Nicotiana benthamiana.

Associations between Maternal Polychlorinated Dibenzo-p-dioxin and Dibenzofuran Serum Concentrations and Pulse Pressure in Early Pregnancy: A Cross-Sectional Study.

The Role of Acrolein in Neurodegenerative Diseases and Its Protective Strategy.

C-X-C-Chemokine-Receptor-Type-4 Inhibitor AMD3100 Attenuates Pulmonary Inflammation and Fibrosis in Silicotic Mice.

Acidifiers Attenuate Diquat-Induced Oxidative Stress and Inflammatory Responses by Regulating NF- κ B/MAPK/COX-2 Pathways in IPEC-J2 Cells.

Protective efficacy of Coriandrum sativum seeds against arsenic induced toxicity in Swiss albino mice.

Idiopathic unilateral third nerve palsy with pupillary sparing in 10-year-old child -a case report.

Development, validation, and clinical application of a rapid UPLC-MS/MS method for detection of colchicine in human whole blood and urine.

Facile fabrication of Bi-layered perfusable hydrogel tubes as biomimetic 3D arterial construct.

An online atlas of human plasma metabolite signatures of gut microbiome composition.

Periplaneta americana Extract Pretreatment Alleviates Oxidative Stress and Inflammation and Increases the Abundance of Gut Akkermansia muciniphila in Diquat-Induced Mice.

In Vitro Induction of Eryptosis by Uremic Toxins and Inflammation Mediators in Healthy Red Blood Cells.

Food-derived bioactive oligopeptide iron complexes ameliorate iron deficiency anemia and offspring development in pregnant rats.

Down-regulation of hepatic cytochromes P450 1A1 and 1A2 by arsenic trioxide (ATO) in vivo and in vitro: A role of heme oxygenase 1.

Borax relieved the acrylamide-induced hematotoxic, hepatotoxic, immunotoxic and genotoxic damages in rainbow trout by regulating apoptosis and Nrf2 signaling pathway.

Iron nanoparticles as a promising compound for food fortification in iron deficiency anemia: a review.

Morphology and cytochemical patterns of peripheral blood cells of tiger frog (Rana rugulosa).

Health risk assessment of polychlorinated biphenyls (PCBs) in baby clothes. A preliminary study.

Dietary inclusion of anthocyanin-rich black cane silage treated with ferrous sulfate heptahydrate reduces oxidative stress and promotes tender meat production in goats.

Spatial variation of rodenticides and emerging contaminants in blood of raptor nestlings from Germany.

Efficacy of Oral Versus Injectable Iron in Patients With Chronic Kidney Disease: A Two-Year Cross-Sectional Study Conducted at a Rural Teaching Hospital.

Boron Compounds Exhibit Protective Effects against Aluminum-Induced Neurotoxicity and Genotoxicity: In Vitro and In Vivo Study.

Two Foreign Antimicrobial Peptides Expressed in the Chloroplast of Porphyridium purpureum Possessed Antibacterial Properties.

Biological Assessment of Potential Exposure to Occupational Substances in Current Semiconductor Workers with at Least 5 Years of Employment.

Diverse Effects of Amino Acids on Monascus Pigments Biosynthesis in *Monascus purpureus*.

Field mixtures of currently used pesticides in agricultural soil pose a risk to soil invertebrates.

Dietary *Bacillus licheniformis* improves the effect of *Astragalus membranaceus* extract on blood glucose by regulating antioxidation activity and intestinal microbiota in InR[E19]/TM2 *Drosophila melanogaster*.

The Effects of Resistant Starch Consumption in Adult Patients With Chronic Kidney Disease: A Systematic Review.

AQP9 (Aquaporin 9) Determines Arsenic Uptake and Tolerance in Human Hepatocellular Carcinoma Cells In Vitro.

Paraquat induced oxidative stress, DNA damage, and cytotoxicity in lymphocytes.

Integrated Multilayer Omics Reveals the Genomic, Proteomic, and Metabolic Influences of Histidyl Dipeptides on the Heart.

Cytomegalovirus-related Cystitis in a Patient with Membranous Glomerulonephritis Receiving Cyclophosphamide: A Case Study.

Comparative effects of *Curcuma longa* and curcumin on paraquat-induced systemic and lung oxidative stress and inflammation in rats.

Borax exerts protective effect against ferrocene-induced neurotoxicity in *Oncorhynchus mykiss*.

Dietary supplementation with biogenic selenium nanoparticles alleviate oxidative stress-induced intestinal barrier dysfunction.

Associations of Smokeless Tobacco Use With Cardiovascular Disease Risk: Insights From the Population Assessment of Tobacco and Health Study.

Histopathological Alterations in the Livers of Chronic Hepatitis Patients Exposed to Agent Orange/Dioxin in Vietnam.

Genotoxic, biochemical and histological biomarkers of subacute concentrations of paraquat and glyphosate in Nile Tilapia.

Red propolis reduces inflammation in cyclophosphamide-induced hemorrhagic cystitis in rats.

Effects of 1,3,7-tribromodibenzo-p-dioxin, a natural dioxin on chicken embryos: Comparison with effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Onion Vinegar Quality Evaluation and its Alleviate Oxidative Stress Mechanism in *Caenorhabditis elegans* Via SKN-1.

A glyphosate-based herbicide disrupted hematopoiesis and induced organ toxicities, ameliorated by vitamin B(12) in a mouse model.

The role of genetically engineered soybean and *Amaranthus* weeds on biological and reproductive parameters of *Spodoptera cosmioides* (Lepidoptera: Noctuidae).

New insights into arsenic, lead, and iron neurotoxicity: Activation of MAPK signaling pathway and oxidative stress.

Use of in vitro metabolism and biokinetics assays to refine predicted in vivo and in vitro internal exposure to the cosmetic ingredient, phenoxyethanol, for use in risk assessment.

Protective Effects of Resveratrol and Apigenin Dietary Supplementation on Serum Antioxidative Parameters and mRNAs Expression in the Small Intestines of Diquat-Challenged Pullets.

The Anti-CGRP Antibody Fremanezumab Lowers CGRP Release from Rat Dura Mater and Meningeal Blood Flow.

Risk factors and optimal predictive scoring system of mortality for children with acute paraquat poisoning.

Inhibition of aryl hydrocarbon receptor signaling promotes the terminal differentiation of human erythroblasts.

Antigenotoxic Effect of Ascorbic Acid and Resveratrol in Erythrocytes of *Ambystoma mexicanum*, *Oreochromis niloticus* and Human Lymphocytes Exposed to Glyphosate.

Engineering Multifunctional Hydrogel With Osteogenic Capacity for Critical-Size Segmental Bone Defect Repair.

Clinical characteristics, treatment and outcomes of acute propanil poisoning in a 7-year retrospective cohort study.

Daily versus every other day oral iron supplementation in patients with iron deficiency anemia (DEODO): study protocol for a phase 3 multicentered, pragmatic, open-label, pilot randomized controlled trial.

Corrigendum to "Reaction dynamics and residue identification of haemoglobin modification by acrolein, a lipid-peroxidation by-product" [Biochimica et Biophysica Acta (BBA) - General Subjects Volume 1865, Issue 12, December 2021, 130013].

Evaluation of the Acute Effects of Arsenic on Adults of the Neotropical Native Fish *Cnesterodon decemmaculatus* Using a Set of Biomarkers.

SALDI Substrate-Based FeNi Magnetic Alloy Nanoparticles for Forensic Analysis of Poisons in Human Serum.

Kumemycinones A-G, Cytotoxic Angucyclinones from a Deep Sea-Derived Actinomycete of the Genus *Actinomadura*.

The Potential Role of Mitochondrial Acetaldehyde Dehydrogenase 2 in Urological Cancers From the Perspective of Ferroptosis and Cellular Senescence.

Comparative Efficacy of *Chondrosterum purpureum* and Chemical Herbicides for Control of Resprouts in Tanoak and Bay Laurel.

Identification of emerging organic pollutants from solid waste incinerations by FT-ICR-MS and GC/Q-TOF-MS and their potential toxicities.

A Mixture of Endocrine Disruptors and the Pesticide Roundup(®) Induce Oxidative Stress in Rabbit Liver When Administered under the Long-Term Low-Dose Regimen: Reinforcing the Notion of Real-Life Risk Simulation.

Insights into the toxicokinetic, tissue distribution and maternal transfer of polychlorinated dibenzo-p-dioxins/dibenzofurans in laying hens fed with dioxin-associated dietary.

Citrullus colocynthis Seed Ameliorates Layer Performance and Immune Response under Acute Oxidative Stress Induced by Paraquat Injection.

Paraquat Induces Lung Injury via miR-199-Mediated SET in a Mouse Model.

Thunbergia laurifolia aqueous leaf extract ameliorates paraquat-induced kidney injury by regulating NADPH oxidase in rats.

Kidney and lung injury in rats following acute diquat exposure.

The hormetic response of heart rate of fish embryos to contaminants - Implications for research and policy.

Development and first evaluation of an attractant impregnated adhesive tape against blood-sucking flies.

Dimethyl sulfoxide stimulates the AhR-Jdp2 axis to control ROS accumulation in mouse embryonic fibroblasts.

Diquat Poisoning: Care Management and Medico-Legal Implications.

Insight in Hypoxia-Mimetic Agents as Potential Tools for Mesenchymal Stem Cell Priming in Regenerative Medicine.

Effects of sequential blood purification on the organ function and lethality in patients with paraquat-induced multiple organ dysfunction syndrome.

Novel Coconut Vinegar Attenuates Hepatic and Vascular Oxidative Stress in Rats Fed a High-Cholesterol Diet.

Paraquat modulates immunological function in bone marrow-derived macrophages.

Lead acetate versus cadmium sulfate in the modulation of main physiological pathways controlling detrusor muscle contractility in rat.

Significant Correlations between p-Cresol Sulfate and Mycophenolic Acid Plasma Concentrations in Adult Kidney Transplant Recipients.

Morphological and Molecular Description of a New Species *Haematoloechus dehradunensis* sp. nov. (Plagiorchiidae: Haematoloechinae) from the Lungs of *Euphlyctis cyanophlyctis* (Anura, Dicroglossidae) from Dehradun, along with a Note on *H. singaporensis* Yuen, 1962, a New Record to India.

Plant-Derived Molecule 4-Methylumbelliferone Suppresses Fc γ RI-Mediated Mast Cell Activation and Allergic Inflammation.

The Toxic Influence of Excess Free Iron on Red Blood Cells in the Biophysical Experiment: An In Vitro Study.

Glyphosate induces immune dysregulation in honey bees.

α -Tocopherol Prevents Sperm Apoptosis and Necrosis in Rats Exposed to 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Chlorogenic Acid Attenuates Oxidative Stress-Induced Intestinal Mucosa Disruption in Weaned Pigs.

Assessment of Five Pesticides as Endocrine-Disrupting Chemicals: Effects on Estrogen Receptors and Aromatase.

α -Tocopherol restores semen quality in rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Geospatial Distribution of Age-Adjusted Incidence of the Three Major Types of Pediatric Cancers and Waterborne Agrichemicals in Nebraska.

Correlations of gestational hemoglobin level, placental trace elements content, and reproductive performances in pregnant sows.

Identifying potential thyroid hormone disrupting effects among diphenyl ether structure pesticides and their metabolites in silico.

Why Do High-Risk Patients Develop or Not Develop Coronary Artery Disease? Metabolic Insights from the CAPIRE Study.

Rare co-inherited alpha-thalassemia minor and beta-thalassemia minor with heterozygous H63D mutation mistaken as iron deficiency anemia: a case report.

Alkaline Diuresis as Treatment for 2,4-D Dimethylamine Herbicide Intoxication.

Dual recognition strategy for selective fluorescent detection of dopamine and antioxidants based on graphite carbon nitride in human blood serum.

TCDD Inhibition of IgG1 Production in Experimental Autoimmune Encephalomyelitis (EAE) and In Vitro.

Naltrexone Transport by a Proton-Coupled Organic Cation Antiporter in hCMEC/D3 Cells, an in Vitro Human Blood-Brain Barrier Model.

Serial blood concentration of polyethoxylated tallow amine and clinical presentations in acute herbicide poisoning.

Lack of human relevance for rat developmental toxicity of flumioxazin is revealed by comparative heme synthesis assay using embryonic erythroid cells derived from human and rat pluripotent stem cells.

Cytoprotective effect of taurine against sodium chlorate-induced oxidative damage in human red blood cells: an ex vivo study.

Monitoring of pesticides in surface water, pesticides removal efficiency in drinking water treatment plant and potential health risk to consumers using Monte Carlo simulation in Behbahan City, Iran.

Multigeneration toxicity of Geunsami® (a glyphosate-based herbicide) to *Allonychiurus kimi* (Lee) (*Collembola*) from sub-individual to population levels.

Repeated Low-Dose Acrolein Triggers Irreversible Lamina Propria Edema in Urinary Bladder, Transient Voiding Behavior and Widening of Eyes to Mechanical Stimuli.

Toxicity effect of Diuron on gill tissue structure and the tissue residue of blood cockles (*Tegillarca granosa*).

Elevated pulmonary levels of Axin2 in mice exposed to herbicide 2,4-D with or without endotoxin.

Acute exposition to Roundup Transorb® induces systemic oxidative stress and alterations in the expression of newly sequenced genes in silverside fish (*Odontesthes humensis*).

Pleiotropic Outcomes of Glyphosate Exposure: From Organ Damage to Effects on Inflammation, Cancer, Reproduction and Development.

Atrazine Inhalation Worsen Pulmonary Fibrosis Regulating the Nuclear Factor-Erythroid 2-Related Factor (Nrf2) Pathways Inducing Brain Comorbidities.

Evaluation of the genotoxic, mutagenic, and histopathological hepatic effects of polyoxyethylene amine (POEA) and glyphosate on *Dendropsophus minutus* tadpoles.

Alterations in blood parameters, DNA damage, oxidative stress and antioxidant enzymes and immune-related genes expression in Nile tilapia (*Oreochromis niloticus*) exposed to glyphosate-based herbicide.

Subchronic exposure to a glyphosate-based herbicide causes dysplasia in the digestive tract of Wistar rats.

Variable inbreeding depression may explain associations between the mating system and herbicide resistance in the common morning glory.

Glyphosate-Eating Fungi: Study on Fungal Saprotrophic Strains' Ability to Tolerate and Utilise Glyphosate as a Nutritional Source and on the Ability of *Purpureocillium lilacinum* to Degrade It.

Sex-dependent acrolein sensitivity in mice is associated with differential lung cell, protein, and transcript changes.

Negative impacts of microcystin-LR and glyphosate on zebrafish intestine: Linked with gut microbiota and microRNAs?

A Glyphosate-Based Formulation but Not Glyphosate Alone Alters Human Placental Integrity.

Paraquat-induced cholesterol biosynthesis proteins dysregulation in human brain microvascular endothelial cells.

Epigenome-Wide DNA Methylation and Pesticide Use in the Agricultural Lung Health Study.

Prolonged exposure to the herbicide atrazine suppresses immune cell functions by inducing spleen cell apoptosis in rats.

Systemic inflammation and oxidative stress induced by inhaled paraquat in rat improved by carvacrol, possible role of PPAR α receptors.

Glyphosate and Polyoxyethyleneamine Ingestion Leading to Renal, Hepatic, and Pulmonary Failure.

The effect of Zataria multiflora hydroalcoholic extract on memory and lung changes induced by rats that inhaled paraquat.

Immunological and metabolic effects of acute sublethal exposure to glyphosate or glyphosate-based herbicides on juvenile rainbow trout, *Oncorhynchus mykiss*.

Immediate and late systemic and lung effects of inhaled paraquat in rats.

Kaempferol attenuates diquat-induced oxidative damage and apoptosis in intestinal porcine epithelial cells.

Ameliorative effect of N-acetylcysteine against glyphosate-induced hepatotoxicity in adult male albino rats: histopathological, biochemical, and molecular studies.

Phytotoxicity of *Schiekia timida* Seed Extracts, a Mixture of Phenylphenalenones.

Exposure to Atrazine Induces Lung Inflammation through Nrf2-HO1 and Beclin 1/LC3 Pathways.

Low-Dose Acrolein, an Endogenous and Exogenous Toxic Molecule, Inhibits Glucose Transport via an Inhibition of Akt-Regulated GLUT4 Signaling in Skeletal Muscle Cells.

Morphological, behavioral and genotoxic effects of glyphosate and 2,4-D mixture in tadpoles of two native species of South American amphibians.

Toxic effects of atrazine on immune function in BALB/c mice.

Glucocorticoid with cyclophosphamide for oral paraquat poisoning.

Possible effects of agent orange and posttraumatic stress disorder on hyperglycemia in Korean veterans from the US-Vietnam war.

Exposure to glyphosate and risk of non-Hodgkin lymphoma: an updated meta-analysis.

Prognostic value of liver and kidney function parameters and their correlation with the ratio of urine-to-plasma paraquat in patients with paraquat poisoning.

Temperature and Aging Affect Glyphosate Toxicity and Fatty Acid Composition in *Allonychiurus kimi* (Lee) (Collembola).

Micronucleus Formation Induced by Glyphosate and Glyphosate-Based Herbicides in Human Peripheral White Blood Cells.

Analysis of Biomechanical Parameters of Muscle Soleus Contraction and Blood Biochemical Parameters in Rat with Chronic Glyphosate Intoxication and Therapeutic Use of C(60) Fullerene.

Zataria multiflora and Pioglitazone Affect Systemic Inflammation and Oxidative Stress Induced by Inhaled Paraquat in Rats.

Pendimethalin-based herbicide impairs cellular immune response and haemocyte morphology in a beneficial ground beetle.

Growth performance and reproductive function impairment of glyphosate-based herbicide in male guinea pig (*Cavia porcellus*).

Evaluation of the hepatoprotective effects of curcumin and nanocurcumin against paraquat-induced liver injury in rats: Modulation of oxidative stress and Nrf2 pathway.

Chronic ciprofloxacin and atrazine co-exposure aggravates locomotor and exploratory deficits in non-target detritivore speckled cockroach (*Nauphoeta cinerea*).

The Toxic Effects of Glyphosate, Chlorpyrifos, Abamectin, and 2,4-D on Animal Models: A Systematic Review of Brazilian Studies.

HFE H63D Limits Nigral Vulnerability to Paraquat in Agricultural Workers.

Integration of paraquat pharmacokinetic data across species using PBPK modelling.

Paraquat pharmacokinetics in primates and extrapolation to humans.

Mutagenicity and genotoxicity in juvenile African catfish, *Clarias gariepinus* exposed to formulations of glyphosate and paraquat.

Hemodynamic and electromechanical effects of paraquat in rat heart.

A case of fatal intoxication by ingestion of an herbicide formulation containing fluroxypyr-meptyl and triclopyr.

Dietary squalene supplementation alleviates diquat-induced oxidative stress and liver damage of broiler chickens.

Effects of a mixture of glyphosate, 17 β -ethynylestradiol and amyl salicylate on cellular and biochemical parameters of the mussel *Mytilus galloprovincialis*.

Simultaneous determination of paraquat and diquat in human plasma by HPLC-DAD: Its application in acute poisoning patients induced by these two herbicides.

Evaluation of the potential teratogenic and toxic effect of the herbicide 2,4-D (DMA[®] 806) in bullfrog embryos and tadpoles (*Lithobates catesbeianus*).

Differential effects of arsenic species on Nrf2 and Bach1 nuclear localization in cultured hepatocytes.

Effects of glyphosate residues and different concentrate feed proportions in dairy cow rations on hepatic gene expression, liver histology and biochemical blood parameters.

Development and Validation of a Radiomics Nomogram for Prognosis Prediction of Patients with Acute Paraquat Poisoning: A Retrospective Cohort Study.

Hepatotoxic Effects of Atrazine on *Clarias gariepinus* (Burchell, 1822): Biochemical and Histopathological Studies.

Protective effects of black seed (*Nigella sativa*) diet supplementation in common carp (*Cyprinus carpio*) against immune depression, oxidative stress and metabolism dysfunction induced by glyphosate.

Evaluation of dietary dose administration as an alternative to oral gavage in the rodent uterotrophic and Hershberger assays.

The use of combined high-fructose diet and glyphosate to model rats type 2 diabetes symptomatology.

Association between liberal oxygen therapy and mortality in patients with paraquat poisoning: A multi-center retrospective cohort study.

The effect of chronic exposure to chloridazon and its degradation product chloridazon-desphenyl on signal crayfish *Pacifastacus leniusculus*.

The agrochemical S-metolachlor disrupts molecular mediators and morphology of the swim bladder: Implications for locomotor activity in zebrafish (*Danio rerio*).

Assessing single effects of sugarcane pesticides fipronil and 2,4-D on plants and soil organisms.

Melatonin alleviates the deterioration of oocytes and hormonal disorders from mice subjected to glyphosate.

A novel simple risk model to predict the prognosis of patients with paraquat poisoning.

Indaziflam: Control Effectiveness in Monocotyledonous and Eudicotyledonous Weeds as a Function of Herbicide Dose and Soil Texture.

Use of Shotgun Metagenomics and Metabolomics to Evaluate the Impact of Glyphosate or Roundup MON 52276 on the Gut Microbiota and Serum Metabolome of Sprague-Dawley Rats.

Impact of chronic exposure of rainbow trout, *Oncorhynchus mykiss*, to low doses of glyphosate or glyphosate-based herbicides.

Different effects of an N-phenylimide herbicide on heme biosynthesis between human and rat erythroid cells.

Co-exposure of iron oxide nanoparticles and glyphosate-based herbicide induces DNA damage and mutagenic effects in the guppy (*Poecilia reticulata*).

Genotoxic effects of glyphosate on *Physalaemus* tadpoles.

Effects of chronic glyphosate exposure on antioxidative status, metabolism and immune response in tilapia (GIFT, *Oreochromis niloticus*).

Resveratrol: Isolation, and Its Nanostructured Lipid Carriers, Inhibits Cell Proliferation, Induces Cell Apoptosis in Certain Human Cell Lines Carcinoma and Exerts Protective Effect Against Paraquat-Induced Hepatotoxicity.

Effects of Trans-Cinnamaldehyde on Reperfused Ischemic Skeletal Muscle and the Relationship to Laminin.

Study on the Efficacy and Safety of Ambroxol Combined with Methylprednisolone in Patients with Acute Lung Injury.

pH-triggered small molecule nano-prodrugs emulsified from tryptamine-cinnamaldehyde twin drug for targeted synergistic glioma therapy.

Resveratrol protects intestinal integrity, alleviates intestinal inflammation and oxidative stress by modulating AhR/Nrf2 pathways in weaned piglets challenged with diquat.

Monomethylated arsenic was the Major methylated arsenic in Red blood cells of acute promyelocytic leukemia patients treated with arsenic trioxide.

[Clinical research of the differences between hematocrit and serum albumin for evaluating the severity of acute paraquat poisoning].

Acrolein Induces Systemic Coagulopathy via Autophagy-dependent Secretion of von Willebrand Factor in Mice after Traumatic Brain Injury.

Evaluation of Multiple Organ Dysfunction Score (MODS) and the Sequential Organ Failure Assessment (SOFA) score as in-hospital outcome predictors among cases of hydrogen cyanamide exposure: a cross-sectional study.

Cinnamaldehyde Improves Metabolic Functions in Streptozotocin-Induced Diabetic Mice by Regulating Gut Microbiota.

[Four cases of acute diquat poisoning with prominent epileptoid seizure and literature review].

Pilot study on the urinary excretion of the glyphosate metabolite aminomethylphosphonic acid and breast cancer risk: The Multiethnic Cohort study.

Glyphosate inhibits melanization and increases susceptibility to infection in insects.

Mechanistic role of antioxidants in rescuing delayed gastric emptying in high fat diet induced diabetic female mice.

The Onset of Systemic Oxidative Stress Associated with the Accumulation of Lipid Peroxidation Product Acrolein in the Skin of Patients with Small-Vessel Vasculitis.

Esophagitis dissecans superficialis associated with acute transoral paraquat poisoning: Clinical study of 15 cases.

[Progress in the study of pulmonary fibrosis signaling pathways caused by paraquat poisoning].

Coniferaldehyde prevents articular cartilage destruction in a murine model via Nrf2/HO-1 pathway.

Cinnamaldehyde mitigates placental vascular dysfunction of gestational diabetes and protects from the associated fetal hypoxia by modulating placental angiogenesis, metabolic activity and oxidative stress.

[Analysis of the level of T lymphocyte subsets and the relationship with the prognosis of pulmonary fibrosis in patients with paraquat poisoning].

Pediococcus pentosaceus ZJUA4-4 relieves oxidative stress and restores the gut microbiota in diquat-induced intestinal injury.

Urinary Levels of the Acrolein Conjugates of Carnosine Are Associated with Cardiovascular Disease Risk.

An Unusual Case of Paraquat-Induced Rhabdomyolysis and Hepatic Injury Presenting With Takotsubo Cardiomyopathy.

Effect of different doses of 2,4-dichlorophenoxyacetic acid (2,4-D) on cardiac parameters in male Wistar rats.

Microscale Parallel Synthesis of Acylated Aminotriazoles Enabling the Development of Factor XIIa and Thrombin Inhibitors.

Reaction dynamics and residue identification of haemoglobin modification by acrolein, a lipid-peroxidation by-product.

E-cigarette vaping liquids and the flavoring chemical cinnamaldehyde perturb bone, cartilage and vascular development in zebrafish embryos.

Determination of twenty herbicides in blood by ultrahigh pressure liquid chromatography-tandem mass spectrometry.

[Analysis of clinical characteristics and prognostic factors in 40 cases of acute glyphosate poisoning].

Acrolein but not its metabolite, 3-Hydroxypropylmercapturic acid (3HPMA), activates vascular transient receptor potential Ankyrin-1 (TRPA1): Physiological to toxicological implications.

The Herbicide Atrazine Potentiates Angiotensin II-Induced Aldosterone Synthesis and Release From Adrenal Cells.

Exposure to volatile organic compounds - acrolein, 1,3-butadiene, and crotonaldehyde - is associated with vascular dysfunction.

Regulation of secondary metabolite biosynthesis in *Monascus purpureus* via cofactor metabolic engineering strategies.

DNA methylation in the adipose tissue and whole blood of Agent Orange-exposed Operation Ranch Hand veterans: a pilot study.

Arsenic Exposure, Arsenic Metabolism, and Glycemia: Results from a Clinical Population in New York City.

Glyphosate and AMPA Induce Alterations in Expression of Genes Involved in Chromatin Architecture in Human Peripheral Blood Mononuclear Cells (In Vitro).

Low Doses of Glyphosate/Roundup Alter Blood-Testis Barrier Integrity in Juvenile Rats.

Subchronic toxicity study in rats evaluating herbicide-tolerant soybean DAS-68416-4.

Effect of supercritical incorporation of cinnamaldehyde on physical-chemical properties, disintegration and toxicity studies of PLA/lignin nanocomposites.

The problem with implementing fish farms in agricultural regions: A trial in a pampean pond highlights potential risks to both human and fish health.

Associations between blood arsenic and urinary arsenic species concentrations as an exposure characterization tool.

Preparation of S-iron-enriched yeast using siderophores and its effect on iron deficiency anemia in rats.

Chrysin attenuates sodium arsenite-induced nephrotoxicity in rats by suppressing oxidative stress and inflammation.

Bikini textile contact dermatitis: A Sherlockian approach revealing 2,4-dichlorophenol as a potential textile contact allergen.

Platelet autophagic machinery involved in thrombosis through a novel linkage of AMPK-MTOR to sphingolipid metabolism.

Evaluating Glycemic Control During Basalin or Lantus Administration in Adults With Controlled Type 2 Diabetes Mellitus Using Continuous Glucose Monitoring.

Metabolomic Profiling of Poor Ovarian Response Identifies Potential Predictive Biomarkers.

The Binding of Aripiprazole to Plasma Proteins in Chronic Renal Failure Patients.

A randomized controlled trial comparing the efficacy, tolerability, and cost of oral iron preparations in iron-deficiency anemia in pregnancy.

Effects of prebiotic oligofructose-enriched inulin on gut-derived uremic toxins and disease progression in rats with adenine-induced chronic kidney disease.

Oral Iron Absorption Test: A Simple Test with Relevance in the Clinical Setting.

Iron distribution in different tissues of homozygous Mask (msk/msk) mice and the effects of oral iron treatments.

Dinitrophenol-mediated modulation of an anti-PD-L1 VHH for Fc-dependent effector functions and prolonged serum half-life.

Lipid metabolism disorders associated with dioxin exposure in a cohort of Chinese male workers revealed by a comprehensive lipidomics study.

Characteristics of arsenic species in cerebrospinal fluid (CSF) of acute promyelocytic leukaemia (APL) patients treated with arsenic trioxide plus mannitol.

Serum levels of polychlorinated biphenyls and stroke risk among Chinese: a hospital-based case-control study.

Transcriptome-based analysis of blood samples reveals elevation of DNA damage response, neutrophil degranulation, cancer and neurodegenerative pathways in Plasmodium falciparum patients.

Solar processes and ozonation for fresh-cut wastewater reclamation and reuse: Assessment of chemical, microbiological and chlorosis risks of raw-eaten crops.

Exposure to pesticides and childhood leukemia risk: A systematic review and meta-analysis.

Comparative Evaluation of Sucrosomial Iron and Iron Oxide Nanoparticles as Oral Supplements in Iron Deficiency Anemia in Piglets.

Evaluation of arsenic species in leukocytes and granulocytes of acute promyelocytic leukemia patients treated with arsenic trioxide.

Effect of renal impairment on arsenic accumulation, methylation capacity, and safety in acute promyelocytic leukemia (APL) patients treated with arsenic trioxide.

Oral high-dose sucrosomial iron vs intravenous iron in sideropenic anemia patients intolerant/refractory to iron sulfate: a multicentric randomized study.

A case of iron deficiency anemia with extremely hyperferritinemia responds well to oral iron: the first identified hereditary hyperferritinemia cataract syndrome in China.

Fenofibrate, a peroxisome proliferator-activated receptor-alpha agonist, blocks steatosis and alters the inflammatory response in a mouse model of inflammation-dioxin interaction.

Dietary Selenium Deficiency Partially Mimics the Metabolic Effects of Arsenic.

Evaluation of Salivary Indoxyl Sulfate with Proteinuria for Predicting Graft Deterioration in Kidney Transplant Recipients.

Baseline Hemoglobin, Hepcidin, Ferritin, and Total Body Iron Stores are Equally Strong Diagnostic Predictors of a Hemoglobin Response to 12 Weeks of Daily Iron Supplementation in Cambodian Women.

In Vitro and Clinical Pharmacokinetic Studies of the Effects of Iron-containing Agents on Vadadustat, an Oral Hypoxia-inducible Factor-Prolyl Hydroxylase Inhibitor.

Overexpression of miR-19a and miR-20a in iPS-MSCs preserves renal function of chronic kidney disease with acute ischaemia-reperfusion injury in rat.

Direct and specific analysis of nitrite and nitrate in biological and non-biological samples by capillary ion analysis for the rapid identification of fatal intoxications with sodium nitrite.

Glutathione: An Old and Small Molecule with Great Functions and New Applications in the Brain and in Alzheimer's Disease.

Staphylococcus aureus Peptide Methionine Sulfoxide Reductases Protect from Human Whole-Blood Killing.

Oxidative stress inducers potentiate 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated pre-cardiac edema in larval zebrafish.

Comparison of efficacy & safety of iron polymaltose complex & ferrous ascorbate with ferrous sulphate in pregnant women with iron-deficiency anaemia.

A successful protocol for desensitization to iron salts.

Intravenous iron is non-inferior to oral iron regarding cell growth and iron metabolism in colorectal cancer associated with iron-deficiency anaemia.

Iron preparations for women of reproductive age with iron deficiency anaemia in pregnancy (FRIDA): a systematic review and network meta-analysis.

A novel imidazolinone metformin-methylglyoxal metabolite promotes endothelial cell angiogenesis via the eNOS/HIF-1 α pathway.

Novel edible toys as iron carrier to prevent iron deficiency of postweaned pigs.

Effect of Fortification with Multiple Micronutrient Powder on the Prevention and Treatment of Iron Deficiency and Anaemia in Brazilian Children: A Randomized Clinical Trial.

[The Comparison of Iron Deficiency Anemia Rat Treated with Hydroxypropyl Chitosan Ferrous Ion Complex and Ferrous Sulfate].

Detrimental effects of 6 months exposure to very low doses of a mixture of six pesticides associated with chronic vitamin deficiency on rats.

Prolonged Low-Dose Dioxin Exposure Impairs Metabolic Adaptability to High-Fat Diet Feeding in Female but Not Male Mice.

Randomized Trial of Oral Iron and Diet Advice versus Diet Advice Alone in Young Children with Nonanemic Iron Deficiency.

Inulin supplementation ameliorates hyperuricemia and modulates gut microbiota in Uox-knockout mice.

[Risk factors associated with acute kidney injury caused by pesticide poisoning].

Developmental and lifelong dioxin exposure induces measurable changes in cardiac structure and function in adulthood.

Multi-Nutrient Fortified Dairy-Based Drink Reduces Anaemia without Observed Adverse Effects on Gut Microbiota in Anaemic Malnourished Nigerian Toddlers: A Randomised Dose-Response Study.

Associations among total p-cresylsulfate, indoxyl sulfate and hippuric acid levels with hemodialysis quality indicators in maintenance hemodialysis patients.

Non-targeted metabolomics analyses by mass spectrometry to explore metabolic stress after six training weeks in high level swimmers.

Rapamycin Alleviates 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Induced Aggravated Dermatitis in Mice with Imiquimod-Induced Psoriasis-Like Dermatitis by Inducing Autophagy.

Coenzyme Q(10) protected against arsenite and enhanced the capacity of 2,3-dimercaptosuccinic acid to ameliorate arsenite-induced toxicity in mice.

Ferric carboxymaltose vs. ferrous sulfate for the treatment of anemia in advanced chronic kidney disease: an observational retrospective study and cost analysis.

Ephedra Herb, Mao, Inhibits Antigen-Induced Mast Cell Degranulation by Induction of the Affinity Receptor for IgE Internalization.

2,4-Dinitrophenol overdose - Everything old is new again.

Pre- and post-diagnostic blood profiles of chlorinated persistent organic pollutants and metabolic markers in type 2 diabetes mellitus cases and controls; a pilot study.

Occupation, occupational exposures and mammographic density in Spanish women.

Inorganic arsenic induces sex-dependent pathological hypertrophy in the heart.

"That's Not His Regular Formula": A Case of Organophosphate Poisoning in an Infant.

Vitamin D improves pulmonary function in a rat model for congenital diaphragmatic hernia.

Influences of Selenium-Enriched Yeast on Growth Performance, Immune Function, and Antioxidant Capacity in Weaned Pigs Exposure to Oxidative Stress.

Bayesian Group Index Regression for Modeling Chemical Mixtures and Cancer Risk.

Thrombolome and Its Emerging Role in Chronic Kidney Diseases.

Iron Protein Succinylate in the Management of Iron Deficiency Anemia: A Comparative Study with Ferrous Sulphate at Low and High Therapeutic Doses.

Insulin, Not the Preservative m-cresol, Instigates Loss of Infusion Site Patency Over Extended Durations of CSII in Diabetic Swine.

Cenobamate: A New Adjunctive Agent for Drug-Resistant Focal Onset Epilepsy.

Neurobehavioural and cognitive effects of prenatal exposure to organochlorine compounds in three year old children.

The Role of Gut Bacterial Metabolites in Brain Development, Aging and Disease.

Sustained high expression of NRF2 and its target genes induces dysregulation of cellular proliferation and apoptosis is associated with arsenite-induced malignant transformation of human bronchial epithelial cells.

Key Considerations for Policymakers-Iodized Salt as a Vehicle for Iron Fortification: Current Evidence, Challenges, and Knowledge Gaps.

Comparison between oral ferrous sulfate and intravenous ferric carboxymaltose in children with restless sleep disorder.

Proportionate mortality study of unionized maintenance of way railroad workers.

A Positive Relationship between Exposure to Heavy Metals and Development of Chronic Diseases: A Case Study from Chile.

Arsenite suppresses IL-2-dependent tumoricidal activities of natural killer cells.

Novel porous chitosan/N-halamine structure with efficient antibacterial and hemostatic properties.

Efficacy and safety of intravenous ferric carboxymaltose compared with oral iron for the treatment of iron deficiency anaemia in women after childbirth in Tanzania: a parallel-group, open-label, randomised controlled phase 3 trial.

Platinum and zinc oxide modified carbon nitride electrode as non-enzymatic highly selective and reusable electrochemical diabetic sensor in human blood.

Pbx1, Meis1, and Runx1 Expression Is Decreased in the Diaphragmatic and Pulmonary Mesenchyme of Rats with Nitrofen-Induced Congenital Diaphragmatic Hernia.

TCDD attenuates EAE through induction of FasL on B cells and inhibition of IgG production.

A Selective Medium for Isolation and Detection of *Candida auris*, an Emerging Pathogen.

Adverse effects of iron deficiency anemia on pregnancy outcome and offspring development and intervention of three iron supplements.

Aryl Hydrocarbon Receptor and Dioxin-Related Health Hazards-Lessons from Yusho.

Assessment of Grouped Weighted Quantile Sum Regression for Modeling Chemical Mixtures and Cancer Risk.

Cardiovascular risk factors associated with coronary ectasia and acute myocardial infarction.

Exposure of Environmental Contaminants and Development of Neurological Disorders.

Reno-Hepatoprotective and Antidiabetic Properties of Methanol Leaf Extract of *Laportea aestuans* in Wistar Rats.

Transamniotic Stem Cell Therapy for Experimental Congenital Diaphragmatic Hernia: Structural, Transcriptional, and Cell Kinetics Analyses in the Nitrofen Model.

Carbon nitride-based nanocaptor: An intelligent nanosystem with metal ions chelating effect for enhanced magnetic targeting phototherapy of Alzheimer's disease.

A protocol of situation-dependent transfusion, erythropoietin and tranexamic acid reduces transfusion in fronto-orbital advancement for metopic and coronal craniosynostosis.

Alterations in Regional Brain Regional Volume Associated with Dioxin Exposure in Men Living in the Most Dioxin-Contaminated Area in Vietnam: Magnetic Resonance Imaging (MRI) Analysis Using Voxel-Based Morphometry (VBM).

Protracted Impairment of Maternal Metabolic Health in Mouse Dams Following Pregnancy Exposure to a Mixture of Low Dose Endocrine-Disrupting Chemicals, a Pilot Study.

Proteomics and metabolic phenotyping define principal roles for the aryl hydrocarbon receptor in mouse liver.

The Improvement of the Adaptation Process of Tocopherol and Acetylsalicylic Acid in Offspring of Mothers Exposed to TCDD.

Effects of Iron Supplementation on Attention Deficit Hyperactivity Disorder in Children Treated with Methylphenidate.

Chronic Dietary Exposure of Roosters to a Glyphosate-Based Herbicide Increases Seminal Plasma Glyphosate and AMPA Concentrations, Alters Sperm Parameters, and Induces Metabolic Disorders in the Progeny.

Pulmonary histopathology in fatal paraquat poisoning.

Comparative hepatotoxicity of a herbicide, epyrifenacil, in humans and rodents by comparing the dynamics and kinetics of its causal metabolite.

Inhibitory effect of pirfenidone on pulmonary fibrosis in patients with acute paraquat poisoning.

Could Mesna and Celery Seed Cotherapy Modulate Oxidative Stress and Inflammation of the Urinary Bladder Induced by Ifosfamide in Rabbits?

Animal Toxicology Studies on the Male Reproductive Effects of 2,3,7,8-Tetrachlorodibenzo-p-Dioxin: Data Analysis and Health Effects Evaluation.

Impact of heat on biological concentrations of toluene and acetone resulting from exposure by inhalation: A pilot study.

Wild garlic extract reduces lipid peroxidation in terbuthylazine-treated human erythrocytes.

The Role of Bacterial-Derived Aromatic Amino Acids Metabolites Relevant in Autism Spectrum Disorders: A Comprehensive Review.

Provision of folic acid for reducing arsenic toxicity in arsenic-exposed children and adults.

Cytokine changes in fatal cases of paraquat poisoning.

An injectable anti-microbial and adhesive hydrogel for the effective noncompressible visceral hemostasis and wound repair.

Absence of prostacyclin greatly relieves cyclophosphamide-induced cystitis and bladder pain in mice.

PCB cause global DNA hypomethylation of human peripheral blood monocytes in vitro.

Impact of whole-body versus nose-only inhalation exposure systems on systemic, respiratory, and cardiovascular endpoints in a 2-month cigarette smoke exposure study in the ApoE(-/-) mouse model.

Dilated Cardiomyopathy Associated with Paraquat Herbicide Poisoning.

The AST-120 Recovers Uremic Toxin-Induced Cognitive Deficit via NLRP3 Inflammasome Pathway in Astrocytes and Microglia.

The use of biomarkers associated with leaky gut as a diagnostic tool for early intervention in autism spectrum disorder: a systematic review.

Sugarcane Workweek Study: Risk Factors for Daily Changes in Creatinine.

GDNF requires HIF-1 α and RET activation for suppression of programmed cell death of enteric neurons by metabolic challenge.

Clothianidin alters leukocyte profiles and elevates measures of oxidative stress in tadpoles of the amphibian, *Rana pipiens*.

Endocrine disrupting chemicals and bone.

Perinatal Resveratrol Therapy to Dioxin-Exposed Dams Prevents the Programming of Hypertension in Adult Rat Offspring.

Impact of broad-spectrum pesticides used in the agricultural and forestry sector on the pesticide profile in wild boar, roe deer and deer and risk assessment for venison consumers.

Growth, secondary metabolite production, and in vitro antiplasmodial activity of *Sonchus arvensis* L. callus under dolomite [CaMg(CO₃)₂] treatment.

Impact of Estrogen Withdrawal and Replacement in Female Mice along the Intestinal Tract. Comparison of E2 Replacement with the Effect of a Mixture of Low Dose Pollutants.

Mechanistic Investigation of Xuebijing for Treatment of Paraquat-Induced Pulmonary Fibrosis by Metabolomics and Network Pharmacology.

Fine particulate matter air pollution and aortic perivascular adipose tissue: Oxidative stress, leptin, and vascular dysfunction.

PCB plasma level in different occupational groups in Iran.

The impact of vaping on ocular health: a literature review.

Effects of Coated Cysteamine on Oxidative Stress and Inflammation in Weaned Pigs.

Independent and combined associations of urinary heavy metals exposure and serum sex hormones among adults in NHANES 2013-2016.

Acute Administration of Bioavailable Curcumin Alongside Ferrous Sulphate Supplements Does Not Impair Iron Absorption in Healthy Adults in a Randomised Trial.

Determination of Pendimethalin Dynamic Residual Distribution in Crucian Carp Tissues and Associated Risk Assessment.

Bivalve haemocyte adhesion, aggregation and phagocytosis: A tool to reckon arsenic induced threats to freshwater ecosystem.

Hair versus urine for the biomonitoring of pesticide exposure: Results from a pilot cohort study on pregnant women.

Protective and therapeutic effect of hydrogen sulfide on hemorrhagic cystitis and testis dysfunction induced with cyclophosphamide.

Determination of Azide Ions in Blood by Pentafluorobenzyl Derivation Followed by GC-MS.

Case fatality of agricultural pesticides after self-poisoning in Sri Lanka: a prospective cohort study.

Autonomic and cholinergic mechanisms mediating cardiovascular and temperature effects of donepezil in conscious mice.

Pharmacokinetics of 2-phenoxyethanol and its major metabolite, phenoxyacetic acid, after dermal and inhaled routes of exposure: application to development PBPK model in rats.

LncRNA XIST Promoted OGD-Induced Neuronal Injury Through Modulating/miR-455-3p/TIPARP Axis.

Daily Oral Supplementation with 60 mg of Elemental Iron for 12 Weeks Alters Blood Mitochondrial DNA Content, but Not Leukocyte Telomere Length in Cambodian Women.

Recombinant Expression of Thrombolytic Agent Reteplase in Marine Microalga *Tetraselmis subcordiformis* (Chlorodendrales, Chlorophyta).

Evaluation of pentoxifylline and ferrous sulfate for treatment of lower limb venous ulcers.

Role of Fucoidan on the Growth Behavior and Blood Metabolites and Toxic Effects of Atrazine in Nile Tilapia *Oreochromis niloticus* (Linnaeus, 1758).

Removal of the fishy malodor from *Bangia fusco-purpurea* via fermentation of *Saccharomyces cerevisiae*, *Acetobacter pasteurianus*, and *Lactobacillus plantarum*.

Hematological and cytochemical characteristics of peripheral blood cells in the argus snakehead (*Ophiocephalus argus* Cantor).

Complex Coronary Instant Chronic Total Occlusion Lesions: Oxidative Stress, Inflammation, and Coronary Stent Lengths.

Ethanol extract of *Vitellaria paradoxa* (Gaertn, F) leaves protects against sodium arsenite - induced toxicity in male wistar rats.

Toxicokinetic analysis of commonly used pesticides using data on acute poisoning cases from Hyderabad, South India.

Acute liver injury associated with Oxyfluorfen toxicity.

Experimental acute arsenic toxicity in Balb/c mice: organic markers and splenic involvement.

HGF-Modified Dental Pulp Stem Cells Mitigate the Inflammatory and Fibrotic Responses in Paraquat-Induced Acute Respiratory Distress Syndrome.

Sodium arsenite induces spatial learning and memory impairment associated with oxidative stress and activates the Nrf2/PPAR γ pathway against oxidative injury in mice hippocampus.

Adverse effects of atrazine on blood parameters, biochemical profile and genotoxicity of snow trout (*Schizothorax plagiostomus*).

Bach1 plays an important role in angiogenesis through regulation of oxidative stress.

Estimating plasma half-lives of dioxin like and non-dioxin like polychlorinated biphenyls after occupational exposure in the German HELPCB cohort.

Serum dioxin concentrations in military workers at three dioxin-contaminated airbases in Vietnam.

Enlisting a Traditional Chinese Medicine to tune the gelation kinetics of a bioactive tissue adhesive for fast hemostasis or minimally invasive therapy.

Hybrid gelatin/oxidized chondroitin sulfate hydrogels incorporating bioactive glass nanoparticles with enhanced mechanical properties, mineralization, and osteogenic differentiation.

Environmental Toxins Found Historically in the Polycythemia Vera Cluster Area and their Potential for Inducing DNA Damage.

Analysis of the Soil Fumigant, Dimethyl Disulfide, in Swine Blood by Dynamic Headspace Gas Chromatography-Mass Spectroscopy.

Importance of monitoring arsenic methylation metabolism in acute promyelocytic leukemia patients receiving the treatment of arsenic trioxide.

Isolation of 4-hydroxy 3-methyl 2-butenyl 4-diphosphate reductase (ApHDR) gene of methyl erythritol diphosphate (MEP) pathway, in silico analysis and differential tissue specific ApHDR expression in *Andrographis paniculata* (Burm. f) Nees.

Benfuresate induces developmental toxicity in zebrafish larvae by generating apoptosis and pathological modifications.

Isolation and characterization of arsenic-binding siderophores from *Rhodococcus erythropolis* S43: role of heterobactin B and other heterobactin variants.

Tetrachlorobenzoquinone exposure triggers ferroptosis contributing to its neurotoxicity.

Quercetin Alleviates Oxidative Damage by Activating Nuclear Factor Erythroid 2-Related Factor 2 Signaling in Porcine Enterocytes.

Secondary Somatic Embryogenesis in *Centaurium erythraea* Rafn.

A bone regeneration strategy via dual delivery of demineralized bone matrix powder and hypoxia-pretreated bone marrow stromal cells using an injectable self-healing hydrogel.

Acute Changes in Thyroid Hormone Levels among Thai Pesticide Sprayers.

Protective effect of melatonin against herbicides-induced hepatotoxicity in rats.

Chlorogenic acid abates male reproductive dysfunction in arsenic-exposed mice via attenuation of testicular oxido-inflammatory stress and apoptotic responses.

Prioritization of Pesticides for Assessment of Risk to Aquatic Ecosystems in Canada and Identification of Knowledge Gaps.

Endocrine disrupting chemicals and reproductive disorders in women, men, and animal models.

Liquid Biopsies in a Veteran Patient Population With Advanced Prostate and Lung Non-Small Cell Carcinomas: A New Paradigm and Unique Challenge in Personalized Medicine.

Renal tubular injury induced by glyphosate combined with hard water: the role of cytosolic phospholipase A2.

Neurophysiological and behavioral responses of blacklegged ticks to host odors.

Associations of PCBs, dioxins and furans with follicle-stimulating hormone and luteinizing hormone in postmenopausal women: National Health and Nutrition Examination Survey 1999-2002.

Green sonochemical synthesis and fabrication of cubic MnFe(2)O(4) electrocatalyst decorated carbon nitride nanohybrid for neurotransmitter detection in serum samples.

Identify the Early Predictor of Mortality in Patients with Acute Paraquat Poisoning.

Impact of Diuron contamination on blood cockles (*Tegillarca granosa* Linnaeus, 1758).

A 90-day subchronic toxicity study of transgenic cotton expressing Cry1Ac, Cry2A and CP4-EPSPS proteins in Sprague-Dawley rats.

The impact and toxicity of glyphosate and glyphosate-based herbicides on health and immunity.

Integrated ecotoxicological assessment of the complex interactions between chlorpyrifos and glyphosate on a non-target species *Cnesterodon decemmaculatus* (Jenyns, 1842).

Ion transport mechanisms for smoke inhalation-injured airway epithelial barrier.

Mucosal-associated invariant T-Cell (MAIT) activation is altered by chlorpyrifos- and glyphosate-treated commensal gut bacteria.

DP-2216-6 maize does not adversely affect rats in a 90-day feeding study.

Chronic exposure of human glioblastoma tumors to low concentrations of a pesticide mixture induced multidrug resistance against chemotherapy agents.

The PARK2 Mutation Associated with Parkinson's Disease Enhances the Vulnerability of Peripheral Blood Lymphocytes to Paraquat.

Hematological and immunological responses in the African catfish *Clarias fariatus* exposed to sublethal concentrations of herbicide Ronstar®.

Larval pesticide exposure impacts monarch butterfly performance.

Depletion of NK cells attenuates paraquat-induced acute lung injury by manipulating macrophage polarization.

Determination of arsenicals in mouse tissues after simulated exposure to arsenic from rice for sixteen weeks and the effects on histopathological features.

Paraquat increases Interleukin-1 β in hippocampal dentate gyrus to impair hippocampal neurogenesis in adult mice.

Glyphosate-induced Delayed Pyloric Obstruction, Ulcer and Scar Changes.

Effect of zinc supplementation on chronic hepatorenal toxicity following oral exposure to glyphosate-based herbicide (Bushfire®) in rats.

Pesticides used in Europe and autism spectrum disorder risk: can novel exposure hypotheses be formulated beyond organophosphates, organochlorines, pyrethroids and carbamates? - A systematic review.

The selected epigenetic effects of aminomethylphosphonic acid, a primary metabolite of glyphosate on human peripheral blood mononuclear cells (in vitro).

Evaluation of oxidative stress responses and primary DNA damage in blood and brain of rats exposed to low levels of tembotrione.

Effects of glyphosate, cypermethrin, and chlorpyrifos on hematological parameters of the tegu lizard (*Salvator merianae*) in different embryo stages.

[Treatment of "hydration therapy" for acute paraquat poisoning].

Embryotoxicity of atrazine and its degradation products to early life stages of zebrafish (*Danio rerio*).

[Study on the protective effect and mechanism of somatostatin on renal injury in paraquat intoxicated mice].

Investigation of simple, objective, and effective indicators for predicting acute paraquat poisoning outcomes.

[Predictive value of early indicators changes in blood test on the prognosis of patients with acute paraquat poisoning].

Osteonecrosis of Femoral Head, An Overlooked Long-Term Complication after Paraquat Intoxication: A Retrospective Cohort Study.

Pterostilbene as a protective antioxidant attenuates diquat-induced liver injury and oxidative stress in 21-day-old broiler chickens.

Cytogenotoxic effect of propanil using the *Lens culinaris* Med and *Allium cepa* L test.

Sub-acute toxicological and behavioural effects of two candidate therapeutics, cinnamaldehyde and eugenol, for treatment of ESBL producing-quinolone resistant pathogenic Enterobacteriaceae.

Maternal glyphosate exposure causes autism-like behaviors in offspring through increased expression of soluble epoxide hydrolase.

[Effect of bone marrow mesenchymal stem cells on paraquat-induced pulmonary fibrosis in rats].

[The expression of Nrf2 in the lung tissue of rats with acute diquat poisoning and the distribution of diquat in lungs].

Environmental Pollution, Oxidative Stress and Thioretinaco Ozonide: Effects of Glyphosate, Fluoride and Electromagnetic Fields on Mitochondrial Dysfunction in Carcinogenesis, Atherogenesis and Aging.

Comparison of the effects of resveratrol and its derivative pterostilbene on hepatic oxidative stress and mitochondrial dysfunction in piglets challenged with diquat.

Genotoxicity and oxidative stress in *Caiman latirostris* hatchlings exposed to pesticide formulations and their mixtures during incubation period.

Functionality and DNA-damage properties of blood cells in lactating cows exposed to glyphosate contaminated feed at different feed energy levels.

Female Guinea Pig Model for Cough Studies and Its Response to Most Common Tussive Substances.

Sestrin2 as Serum Protein Marker and Potential Therapeutic Target for Parkinson's Disease.

Glyphosate affects methylation in the promoter regions of selected tumor suppressors as well as expression of major cell cycle and apoptosis drivers in PBMCs (in vitro study).

Exposure to glyphosate and risk of non-Hodgkin lymphoma and multiple myeloma: an updated meta-analysis.

[The assessment value of urinary NGAL combined with blood NLR in the early prognosis of patients with acute paraquat poisoning].

Glyphosate-based herbicide impairs energy metabolism and increases autophagy in C6 astrogloma cell line.

Human amniotic mesenchymal stem cells alleviate paraquat-induced pulmonary fibrosis in rats by inhibiting the inflammatory response.

Assessment of anilofos-induced mutagenicity in bone marrow and germ cells of Swiss albino mice.

Genotoxicity of mixtures of glyphosate with 2,4-dichlorophenoxyacetic acid chemical forms towards *Cnesterodon decemmaculatus* (Pisces, Poeciliidae).

Effects of a mixture of low doses of atrazine and benzo[a]pyrene on the rat seminiferous epithelium either during or after the establishment of the blood-testis barrier in the rat seminiferous tubule culture model.

Effects of acrolein in comparison to its prodrug cyclophosphamide on human primary endothelial cells in vitro.

In vitro effects of glyphosate and Roundup on Sertoli cell physiology.

Evaluation of genotoxicity after acute and chronic exposure to 2,4-dichlorophenoxyacetic acid herbicide (2,4-D) in rodents using machine learning algorithms.

Continuous hemoperfusion relieves pulmonary fibrosis in patients with acute mild and moderate paraquat poisoning.

An imazethapyr-based herbicide formulation induces genotoxic, biochemical, and individual organizational effects in *Leptodactylus latinasus* tadpoles (Anura: Leptodactylidae).

Involvement of ADAM10 in acrolein-induced astrocytic inflammation.

Evaluation of apoptotic potential of glyphosate metabolites and impurities in human peripheral blood mononuclear cells (in vitro study).

Magnesium supplementation ameliorates toxic effects of 2,4-dichlorophenoxyacetic acid in rat model.

Ischemic stroke disrupts the endothelial glycocalyx through activation of proHPSE via acrolein exposure.

Protective Effects of Cinnamaldehyde against Mesenteric Ischemia-Reperfusion-Induced Lung and Liver Injuries in Rats.

Anti-Allergic Potential of Cinnamaldehyde via the Inhibitory Effect of Histidine Decarboxylase (HDC) Producing *Klebsiella pneumoniae*.

Anti-hypertensive effect of hydrogen peroxide acting centrally.

Structural change and degradation of cytoskeleton due to the acrolein conjugation with vimentin and actin during brain infarction.

Acrolein Aggravates Secondary Brain Injury After Intracerebral Hemorrhage Through Drp1-Mediated Mitochondrial Oxidative Damage in Mice.

Coniferyl Aldehyde Inhibits the Inflammatory Effects of Leptomeningeal Cells by Suppressing the JAK2 Signaling.

Cinnamaldehyde protects against rat intestinal ischemia/reperfusion injuries by synergistic inhibition of NF- κ B and p53.

Dicamba use and cancer incidence in the agricultural health study: an updated analysis.

Quantification of 3-Hydroxypropyl Mercapturic Acid in the Urine of Patients with Breast Cancer to Monitor Cyclophosphamide Toxicity.

Cinnamaldehyde Ameliorates Vascular Dysfunction in Diabetic Mice by Activating Nrf2.

Cinnamaldehyde protects against oxidative stress and inhibits the TNF α -induced inflammatory response in human umbilical vein endothelial cells.

Cardiospecific Overexpression of ATPGD1 (Carnosine Synthase) Increases Histidine Dipeptide Levels and Prevents Myocardial Ischemia Reperfusion Injury.

Biogenic selenium nanoparticles synthesized by *Lactobacillus casei* ATCC 393 alleviate diquat-induced intestinal barrier dysfunction in C57BL/6 mice through their antioxidant activity.

Protective effects of Alda-1, an ALDH2 activator, on alcohol-derived DNA damage in the esophagus of human ALDH2*2 (Glu504Lys) knock-in mice.

The polypharmacy reduction potential of cinnamic acids and some related compounds in pre- and post-onset management of type 2 diabetes mellitus.

Stephalagine, an aporphine alkaloid from *Annona crassiflora* fruit peel, induces antinociceptive effects by TRPA1 and TRPV1 channels modulation in mice.

Weak acidic stable carbazate modified cellulose membranes target for scavenging carbonylated proteins in hemodialysis.

Myelodysplastic syndromes (MDS) occurring in Agent Orange exposed individuals carry a mutational spectrum similar to that of de novo MDS.

trans-Cinnamaldehyde Prevents Oxidative Stress-Induced Apoptosis in V79-4 Chinese Hamster Lung Fibroblasts through the Nrf2-Mediated HO-1 Activation.

Relationship between the amount and composition of epicuticular wax and tolerance of Ipomoea biotypes to glyphosate.

Aldehyde Dehydrogenase Inhibition Ameliorates Cardiac Dysfunction and Exacerbates Hypotension Caused by Alcohol in Female Rats.

Three rare pathogenic mtDNA substitutions in LHON patients with low heteroplasmy.

Acrolein is involved in ischemic stroke-induced neurotoxicity through spermidine/spermine-N1-acetyltransferase activation.

Docking Prediction, Antifungal Activity, Anti-Biofilm Effects on Candida spp., and Toxicity against Human Cells of Cinnamaldehyde.

[NEURO-HUMORAL DISORDERS OF THE ADAPTATION SYSTEM UNDER THE ACTION OF CERTAIN CLASSES OF PESTICIDES].

Mutagenic, genotoxic and morphotoxic potential of different pesticides in the erythrocytes of Podocnemis expansa neonates.

Cinnamaldehyde changes the dynamic balance of glucose metabolism by targeting ENO1.

Review of the pharmacokinetics and metabolism of triclopyr herbicide in mammals: Impact on safety assessments.

Meta-analysis of the efficacy of Xuebijing combined with hemoperfusion in treating paraquat poisoning.

Effects of quercetin loaded nanostructured lipid carriers on the paraquat-induced toxicity in human lymphocytes.

Blood biomarkers of herbicide, insecticide, and fungicide toxicity to fish-a review.

Supramolecular Hunter Stationed on Red Blood Cells for Detoxification Based on Specific Molecular Recognition.

Carboxylesterase, a de-esterification enzyme, catalyzes the degradation of chlorimuron-ethyl in Rhodococcus erythropolis D310-1.

Protective effect of catechin on pentachlorophenol-induced cytotoxicity and genotoxicity in isolated human blood cells.

Micelle-dominated distribution strategy for non-matrix matched calibration without an internal standard: "Extract-and-shoot" approach for analyzing hydrophilic targets in blood and cell samples.

Parallel and nonparallel genomic responses contribute to herbicide resistance in Ipomoea purpurea, a common agricultural weed.

Maternal and Fetal Blood Pharmacokinetics and Organ Distribution of Atrazine, Propazine, Simazine, and Their Metabolites in Pregnant Rats After Chronic Oral Administration.

Benzene homologues contaminants in a former herbicide factory site: distribution, attenuation, risk, and remediation implication.

Comparison between Iberet Folic(®) and Zincofer(®) in treatment of iron deficiency anaemia in pregnancy.

Comparative efficacy of Nano and Bulk Monoisoamyl DMSA against arsenic-induced neurotoxicity in rats.

Catechol protects against iron-mediated oxidative brain injury by restoring antioxidative metabolic pathways; and modulation of purinergic and cholinergic enzymes activities.

Cenobamate for the treatment of focal epilepsies.

Ferritin readings in young adult, female university student recreational runners.

IL-12p40 and sRAGE in serum correlate with chemically induced cleft palate in mice.

Increased photoinactivation stress tolerance of *Streptococcus agalactiae* upon consecutive sublethal phototreatments.

New Methods Used in Pharmacokinetics and Therapeutic Monitoring of the First and Newer Generations of Antiepileptic Drugs (AEDs).

Evaluation of the effectiveness of valproic acid for treating cyanotic breath holding spells: A Pilot prospective study.

Weight of Evidence and Human Relevance Evaluation of the Benfluralin Mode of Action in Rats (Part II): Thyroid carcinogenesis.

Metabolic and Hematological Responses to Endotoxin-Induced Inflammation in Chicks Experiencing Embryonic 2,3,7,8-Tetrachlorodibenzodioxin Exposure.

Mucoadhesive microspheres of ferrous sulphate - A novel approach for oral iron delivery in treating anemia.

Thymoquinone protection against 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin induced nephrotoxicity in rats.

Serum indoxyl sulfate concentrations associate with progression of chronic kidney disease in children.

Inflammation response after the cessation of chronic arsenic exposure and post-treatment of natural astaxanthin in liver: potential role of cytokine-mediated cell-cell interactions.

Boron improves cardiac contractility and fibrotic remodeling following myocardial infarction injury.

Residential proximity to agriculture and risk of childhood leukemia and central nervous system tumors in the Danish national birth cohort.

Evaluation of ameliorative effect of two selected plant drugs on experimentally induced arsenic toxicity in sheep.

Serum concentrations of pesticides including organophosphates, pyrethroids and neonicotinoids in a population with osteoarthritis in Saudi Arabia.

Nanosized drug-eluting bead for transcatheter arterial chemoembolization (ND-TACE).

Effect of Ferric Citrate versus Ferrous Sulfate on Iron and Phosphate Parameters in Patients with Iron Deficiency and CKD: A Randomized Trial.

Treatment of maternal anemia by using oral iron drugs combined with diet therapy.

Acute Consumption of Prebiotic Galacto-Oligosaccharides Increases Iron Absorption from Ferrous Fumarate, but not from Ferrous Sulfate and Ferric Pyrophosphate: Stable Iron Isotope Studies in Iron-Depleted Young Women.

Cancer incidence in the vicinity of a waste incineration plant in the Nice area between 2005 and 2014.

Indoor poisoning of companion animals by chemicals.

Blood vessels are primary targets for 2,3,7,8-tetrachlorodibenzo-p-dioxin in pre-cardiac edema formation in larval zebrafish.

Influence of Resveratrol on the Cardiovascular Health Effects of Chronic Kidney Disease.

Effects of 2,3,7,8-Tetrachlorodibenzo-p-dioxin on T Cell Differentiation in Primary Biliary Cholangitis.

Pycnogenol(®) Supplementation Attenuates Memory Deficits and Protects Hippocampal CA1 Pyramidal Neurons via Antioxidative Role in a Gerbil Model of Transient Forebrain Ischemia.

Is untargeted iron supplementation harmful when iron deficiency is not the major cause of anaemia? Study protocol for a double-blind, randomised controlled trial among non-pregnant Cambodian women.

Targeting on Gut Microbiota-Derived Metabolite Trimethylamine to Protect Adult Male Rat Offspring against Hypertension Programmed by Combined Maternal High-Fructose Intake and Dioxin Exposure.

Pdgfr β -Cre mediated knockout of the aryl hydrocarbon receptor protects mice from high-fat diet induced obesity and hepatic steatosis.

Characterization of a multicenter pediatric-hydrocephalus shunt biobank.

Occupational Exposure to Pesticides and Chronic Lymphocytic Leukaemia in the MCC-Spain Study.

Efficacy of a High-Iron Dietary Intervention in Women with Celiac Disease and Iron Deficiency without Anemia: A Clinical Trial.

AHR is a tunable knob that controls HTLV-1 latency-reactivation switching.

Wheat flour fortification with iron for reducing anaemia and improving iron status in populations.

Vitamin B12 and folic acid alleviate symptoms of nutritional deficiency by antagonizing aryl hydrocarbon receptor.

2,6-Diisobornyl-4-Methylphenol Reduces Postischemic Myocardium Remodeling in Delayed Period after Ischemia/Reperfusion in Rats.

Effects of feeding increasing levels of iron from iron sulfate or iron carbonate on nursery pig growth performance and hematological criteria.

High Prevalence of Iron Deficiency Despite Standardized High-Dose Iron Supplementation During Recombinant Erythropoietin Therapy in Extremely Low Gestational Age Newborns.

Dioxin exposure and breast cancer risk in a prospective cohort study.

Ferrous sulfate oral solution in young children with iron deficiency anemia: An open-label trial of efficacy, safety, and acceptability.

Cross-crop resistance of *Spodoptera frugiperda* selected on Bt maize to genetically-modified soybean expressing Cry1Ac and Cry1F proteins in Brazil.

Uremic Toxins and Vascular Dysfunction.

Cenobamate (YKP3089) as adjunctive treatment for uncontrolled focal seizures in a large, phase 3, multicenter, open-label safety study.

Gut microbiota generation of protein-bound uremic toxins and related metabolites is not altered at different stages of chronic kidney disease.

Carboxymethyl-kappa-carrageenan: A study of biocompatibility, antioxidant and antibacterial activities.

Small molecule proteomics quantifies differences between normal and fibrotic pulmonary extracellular matrices.

Eckol from *Ecklonia cava* Suppresses Immunoglobulin E-mediated Mast Cell Activation and Passive Cutaneous Anaphylaxis in Mice.

A Prospective, Randomized, Interventional Study of Oral Iron Supplementation Comparing Daily Dose with Alternate Day Regimen Using Hepcidin as a Biomarker in Iron Deficiency Anemia.

Iron pill-induced duodenitis: A distinct pattern of duodenal mucosal injury in a patient with a duodenal mass.

Identification of environmental chemicals targeting miscarriage genes and pathways using the comparative toxicogenomics database.

A murine model of *Staphylococcus aureus* infected chronic diabetic wound: A new tool to develop alternative therapeutics.

Death of an apprentice bodybuilder following 2,4-dinitrophenol and clenbuterol intake.

Prenatal pesticide exposure and childhood leukemia - A California statewide case-control study.

Delayed iron improves iron status without altering malaria risk in severe malarial anemia.

Role of Metallothionein-1 and Metallothionein-2 in the Neuroprotective Mechanism of Sevoflurane Preconditioning in Mice.

Low concentrations of sodium arsenite induce hepatotoxicity in prepubertal male rats.

Iron absorption from supplements is greater with alternate day than with consecutive day dosing in iron-deficient anemic women.

Pediatric glioblastoma target-specific efficient delivery of gemcitabine across the blood-brain barrier via carbon nitride dots.

pH-Dependent Grafting of Cancer Cells with Antigenic Epitopes Promotes Selective Antibody-Mediated Cytotoxicity.

Aptamer-based photoelectrochemical assay for the determination of MCF-7.

Fractional iron absorption from enteric-coated ferrous sulphate tablet.

Prenatal dioxin exposure and thyroid hormone levels in the Seveso second generation study.

Lactobacillus salivarius BP121 prevents cisplatin-induced acute kidney injury by inhibition of uremic toxins such as indoxyl sulfate and p-cresol sulfate via alleviating dysbiosis.

Polymorphisms in arsenic (+3 oxidation state) methyltransferase (AS3MT) predict the occurrence of hyperleukocytosis and arsenic metabolism in APL patients treated with As₂O₃.

Diet aid or aid to die: an update on 2,4-dinitrophenol (2,4-DNP) use as a weight-loss product.

Undernutrition combined with dietary mineral oil hastens depuration of stored dioxin and polychlorinated biphenyls in ewes. 2. Tissue distribution, mass balance and body burden.

Undernutrition combined with dietary mineral oil hastens depuration of stored dioxin and polychlorinated biphenyls in ewes. 1. Kinetics in blood, adipose tissue and faeces.

A Case of a 15-Month-Old With Periorbital Edema and Severe Anemia.

Enhanced antitumor potential induced by chloroacetate-loaded benzophenones acting as fused tubulin-pyruvate dehydrogenase kinase 1 (PDHK1) ligands.

M2-like polarization of THP-1 monocyte-derived macrophages under chronic iron overload.

Nicotine exposure potentiates lung tumorigenesis by perturbing cellular surveillance.

Monitoring oral iron therapy in children with iron deficiency anemia: an observational, prospective, multicenter study of AIEOP patients (Associazione Italiana Emato-Oncologia Pediatrica).

Temporal and tissue-specific activation of aryl hydrocarbon receptor in discrete mouse models of kidney disease.

The Natural Metabolite 4-Cresol Improves Glucose Homeostasis and Enhances β^2 -Cell Function.

A Comparison of Potential Azide Antidotes in a Mouse Model.

Antioxidative and antiapoptosis: Neuroprotective effects of dauricine in Alzheimer's disease models.

Parental occupational exposure to pesticides, animals and organic dust and risk of childhood leukemia and central nervous system tumors: Findings from the International Childhood Cancer Cohort Consortium (I4C).

Improving the clearance of protein-bound uremic toxins using cationic liposomes as an adsorbent in dialysate.

Chlorogenic acid prevents hepatotoxicity in arsenic-treated mice: role of oxidative stress and apoptosis.

Higher cerebrospinal fluid to plasma ratio of p-cresol sulfate and indoxyl sulfate in patients with Parkinson's disease.

Novel 5-(1-aryl-1H-pyrazol-3-yl)-1H-tetrazoles as glycogen phosphorylase inhibitors: An in vivo antihyperglycemic activity study.

Effectiveness of outpatient treatment with intravenous iron in selected primary Care patients.

Anemia management in non-menopausal women in a primary care setting: a prospective evaluation of clinical practice.

Molecular and Cellular Mechanisms that Induce Arterial Calcification by Indoxyl Sulfate and P-Cresyl Sulfate.

Recommendation and use of ferrous sulphate in 12- and 24-month-old children: evaluation in the 2015 Pelotas Birth Cohort.

Resveratrol Regulates Nrf2-Mediated Expression of Antioxidant and Xenobiotic Metabolizing Enzymes in Pesticides-Induced Parkinsonism.

Transfusion-Free Cranial Vault Remodeling: A Novel, Multifaceted Approach.

Prenatal dioxin exposure and glucose metabolism in the Seveso Second Generation study.

Preliminary evaluation of fecal fatty acid concentrations in cats with chronic kidney disease and correlation with indoxyl sulfate and p-cresol sulfate.

The Dark Side of Iron.

A comparative study to evaluate oral iron and intravenous iron sucrose for treatment of anemia in pregnancy in a poor socioeconomic region of Northeast India.

The ability of arsenic metabolism affected the expression of lncRNA PANDAR, DNA damage, or DNA methylation in peripheral blood lymphocytes of laborers.

Arsenic-related oxidative stress in experimentally-dosed wild great tit nestlings.

Is the skin an important exposure route for workers during cyanogen fumigation?

Cyclophosphamide-induced cystitis results in NLRP3-mediated inflammation in the hippocampus and symptoms of depression in rats.

Skeletal toxicity resulting from exposure of growing male rats to coplanar PCB 126 is associated with disruption of calcium homeostasis and the GH-IGF-1 axis and direct effects on bone formation.

Comparing the Neuroprotective Effects of Caffeic Acid in Rat Cortical Slices and *Caenorhabditis elegans*: Involvement of Nrf2 and SKN-1 Signaling Pathways.

Soil contact bioassay for rapid determination of acute toxicity with *Eisenia foetida*.

Naturally-derived diterpenoid sphaeropsidin C as an activator of Nrf2/ARE pathway and its potential capability of relieving intracellular oxidative stress in human lung epithelial cells.

A systematic review on hepatoprotective activity of quercetin against various drugs and toxic agents: Evidence from preclinical studies.

Analysis of 2,4-Dinitrophenol in Postmortem Blood and Urine by Gas Chromatography-Mass Spectrometry: Method Development and Validation and Report of Three Fatalities in the United States.

Hepato-Genoprotective Activities of Methanol Extract of The Stem Bark of *Adansonia Digitata* LINN. In Wistar Rats Challenged with Sodium Arsenite.

Attenuation of potassium dichromate and sodium arsenite toxicities by methanol extract of *Rauvolfia vomitoria* in mice.

[The role of noninvasive hemodynamic monitoring in the evaluation of acute and severe pesticide poisoning].

The Protective Effect of Aspirin Eugenol Ester on Paraquat-Induced Acute Liver Injury Rats.

Arctigenin Suppressed Epithelial-Mesenchymal Transition Through Wnt3a/ β -Catenin Pathway in PQ-Induced Pulmonary Fibrosis.

Holly (*Ilex latifolia* Thunb.) Polyphenols Extracts Alleviate Hepatic Damage by Regulating Ferroptosis Following Diquat Challenge in a Piglet Model.

Anisotropic Optical Shock Waves in Isotropic Media with Giant Nonlocal Nonlinearity.

Endocrine-Disrupting Air Pollutants and Their Effects on the Hypothalamus-Pituitary-Gonadal Axis.

Mucuna pruriens in Parkinson's and in some other diseases: recent advancement and future prospective.

Heat-not-burn tobacco products: an emerging threat to cardiovascular health.

Development of an in vitro approach to point-of-contact inhalation toxicity testing of volatile compounds, using organotypic culture and air-liquid interface exposure.

Review of the environmental prenatal exposome and its relationship to maternal and fetal health.

Fibrinolysis-resistant carbonylated fibrin detected in thrombi attached to the vascular wall of abdominal aortic aneurysms.

Risk Assessment of Pesticide Mixtures in Australian Rivers Discharging to the Great Barrier Reef.

Supramolecular hosts as in vivo sequestration agents for pharmaceuticals and toxins.

A Comprehensive Review on Source, Types, Effects, Nanotechnology, Detection, and Therapeutic Management of Reactive Carbonyl Species Associated with Various Chronic Diseases.

Analysis of urinary VOCs using mass spectrometric methods to diagnose cancer: A review.

PCDD/Fs in paired hair and serum of workers from a municipal solid waste incinerator plant in South China: Concentrations, correlations, and source identification.

Multi-sites polycyclodextrin adsorbents for removal of protein-bound uremic toxins combining with hemodialysis.

Outcome of Canine Multicentric Lymphoma after Single or Divided Treatment with Cyclophosphamide in Multidrug Chemotherapy.

Environmental neurotoxic pollutants: review.

Photo-polymerizable ferrous sulfate liposomes as vehicles for iron fortification of food.

Characterization of a novel O-acetyl sialic acid specific lectin from the hemolymph of the marine crab, *Atergatis integerrimus* (Lamarck, 1818).

InÂ vitro profiling of the potential endocrine disrupting activities affecting steroid and aryl hydrocarbon receptors of compounds and mixtures prevalent in human drinking water resources.

Simultaneous determination of polar pesticides in human blood serum by liquid chromatography coupled to triple quadrupole mass spectrometer.

The combination of multi-functional ingredients-loaded hydrogels and three-dimensional printed porous titanium alloys for infective bone defect treatment.

Longitudinal Study of Thyroid Hormones between Conventional and Organic Farmers in Thailand.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin Regulates the Expression of Aryl Hydrocarbon Receptor-Related Factors and Cytokines in Peripheral Blood Mononuclear Cells and CD4+ T cells from Patients with Atopic Dermatitis and Psoriasis.

[Biocontrol potential of *Talaromyces purpurogenus* and its regulation on soil microbial community].

Three-Generation Reproductive Toxicity of Genetically Modified Maize with Cry1Ab and epsps Genes in Rats.

Functional validation of DvABCB1 as a receptor of Cry3 toxins in western corn rootworm, *Diabrotica virgifera virgifera*.

Formulation and Characterization of Alginate Dialdehyde, Gelatin, and Platelet-Rich Plasma-Based Bioink for Bioprinting Applications.

Sublethal concentrations of dichlorvos and paraquat induce genotoxic and histological effects in the *Clarias gariepinus*.

Saliva as a non-invasive tool for monitoring oxidative stress in swimmers athletes performing a VO₂max cycle ergometer test.

Induction of Callogenesis, Organogenesis, and Embryogenesis in Non-Meristematic Explants of Bleeding Heart and Evaluation of Chemical Diversity of Key Metabolites from Callus.

Varying Protein Levels Influence Metabolomics and the Gut Microbiome in Healthy Adult Dogs.

Protective effect of *Mucuna pruriens* against arsenic-induced liver and kidney dysfunction and neurobehavioral alterations in rats.

Visual system: An understudied target of aquatic toxicology.

Mass Balance, Metabolism, and Excretion of Cenobamate, a New Antiepileptic Drug, After a Single Oral Administration in Healthy Male Subjects.

High Regioselectivity Production of 5-Cyanovaleramide from Adiponitrile by a Novel Nitrile Hydratase Derived from *Rhodococcus erythropolis* CCM2595.

Kaempferol Protects Blood Vessels From Damage Induced by Oxidative Stress and Inflammation in Association With the Nrf2/HO-1 Signaling Pathway.

Peptide Methionine Sulfoxide Reductase from *Haemophilus influenzae* Is Required for Protection against HOCl and Affects the Host Response to Infection.

Cardiac amyloidosis possibly secondary to Agent Orange exposure.

Short-term e-cigarette vapour exposure causes vascular oxidative stress and dysfunction: evidence for a close connection to brain damage and a key role of the phagocytic NADPH oxidase (NOX-2).

Uroprotective mechanisms of natural products against cyclophosphamide-induced urinary bladder toxicity: A comprehensive review.

Functional modulation of sarcolemmal K(ATP) channels by atrial natriuretic peptide-elicited intracellular signaling in adult rabbit ventricular cardiomyocytes.

The association between dioxins and steroid hormones in general adult males: a cross-sectional study in an e-waste region of China.

Redox toxicology of environmental chemicals causing oxidative stress.

Causes and possibilities to circumvent cyclophosphamide toxicity.

Routine haematinics and multivitamins: Adherence and its association with haemoglobin level among pregnant women in an urban lower-middle-income country, Ghana.

Gut microbiota and blood metabolomics in weaning multiparous sows: Associations with oestrous.

Skin burns from monochloroacetic acid leak in a chemical plant: a case report.

Effect of Oral Supplementation of Healthy Pregnant Sows with Sucrosomial Ferric Pyrophosphate on Maternal Iron Status and Hepatic Iron Stores in Newborn Piglets.

Platelet-Rich Fibrin Can Neutralize Hydrogen Peroxide-Induced Cell Death in Gingival Fibroblasts.

Longitudinal Study of Metabolic Biomarkers among Conventional and Organic Farmers in Thailand.

Taurine Alleviates Intestinal Injury by Mediating Tight Junction Barriers in Diquat-Challenged Piglet Models.

The Role of Vitamin D Receptor Gene Polymorphisms in Colorectal Cancer Risk.

Iron Overload in Gastric Mucosa: Underdiagnosed Condition Rarely Documented in Clinical and Pathology Reports.

Non-Targeted Metabolomic Profiling of Coronary Heart Disease Patients With Taohong Siwu Decoction Treatment.

Genotoxicant exposure, activation of the aryl hydrocarbon receptor, and lipid peroxidation in cultured human alveolar type II A549 cells.

Exposure assessment of toxic metals and organochlorine pesticides among employees of a natural history museum.

Skeletal Toxicity of Coplanar Polychlorinated Biphenyl Congener 126 in the Rat Is Aryl Hydrocarbon Receptor Dependent.

Sodium arsenite toxicity on hematology indices and reproductive parameters in Teddy goat bucks and their amelioration with vitamin C.

Pro-inflammatory cytokines, oxidative stress and diffuse coronary reocclusions in elderly patients after coronary stenting.

Exposure effects of iron oxide nanoparticles and iron salts in blackfish (*Capoeta fusca*): Acute toxicity, bioaccumulation, depuration, and tissue histopathology.

Kaempferol modulates TCDD- and t-BHQ-induced drug-metabolizing enzymes and luteolin enhances this effect.

Assessing the impact of arsenic metabolism efficiency on DNA methylation using Mendelian randomization.

A hepcidin-based approach for iron therapy in hemodialysis patients: A pilot study.

High-Sensitivity Detection of the Lung Cancer Biomarker CYFRA21-1 in Serum Samples Using a Carboxyl-MoS₂ Functional Film for SPR-Based Immunosensors.

Selenium-Enriched Yeast Alleviates Oxidative Stress-Induced Intestinal Mucosa Disruption in Weaned Pigs.

Arsenic induces platelet shape change through altering focal adhesion kinase-mediated actin dynamics, contributing to increased platelet reactivity.

Chronic methyl bromide toxicity is ameliorated by haemodialysis.

Clinical significance of serum levels of microRNA-27a and its correlation with interleukin-10 in patients with multiple organ dysfunction syndrome caused by acute paraquat poisoning.

Establishment of an in vitro regeneration system and genetic transformation of the Tunisian 'Maltese half-blood' (*Citrus sinensis*): an agro-economically important variety.

Uncovering pathophysiological changes in frontotemporal dementia using serum lipids.

Early Neurotoxic Effects of Inorganic Arsenic Modulate Cortical GSH Levels Associated With the Activation of the Nrf2 and NF κ B Pathways, Expression of Amino Acid Transporters and NMDA Receptors and the Production of Hydrogen Sulfide.

Effect of cAMP Receptor Protein Gene on Growth Characteristics and Stress Resistance of *Haemophilus parasuis* Serovar 5.

Gallic acid and MiADMSA reversed arsenic induced oxidative/nitrosative damage in rat red blood cells.

Diabetes and Toxicant Exposure.

Iron Deficiency in Menstruating Adult Women: Much More than Anemia.

Evaluation of the Effects of Agro Pesticides Use on Liver and Kidney Function in Farmers from Buea, Cameroon.

Pharmacokinetics and Toxicokinetics Roles of Membrane Transporters at Kidney Level.

Intra-Amniotic Sildenafil Treatment Promotes Lung Growth and Attenuates Vascular Remodeling in an Experimental Model of Congenital Diaphragmatic Hernia.

Effects of sublethal and realistic concentrations of the commercial herbicide atrazine in Pacu (*Piaractus mesopotamicus*): Long-term exposure and recovery assays.

Acute obstructive fibrinous laryngotracheobronchitis induced by severe glyphosate surfactant intoxication: A case report.

Sub-chronic exposure to Kalach 360 SL-induced damage in rats' liver and hematological system.

Comparative cyto- and genotoxicity assessment of glyphosate and glyphosate-based herbicides in human peripheral white blood cells.

Glycyrrhizic acid modulates the atrazine-induced apoptosis in rabbit spleen.

Physiologically Based Pharmacokinetic Modeling of Salivary Concentrations for Noninvasive Biomonitoring of 2,4-Dichlorophenoxyacetic Acid (2,4-D).

Clethodim exposure induced development toxicity and behaviour alteration in early stages of zebrafish life.

Accidental paraquat induced hypersalivation: a case report.

Effects of environmental chemicals on the proliferation and differentiation of neural stem cells.

Single and joint effects of chronic exposure to chlorpyrifos and glyphosate based pesticides on structural biomarkers in *Cnesterodon decemmaculatus*.

The organochlorine pesticides pentachlorophenol and dichlorodiphenyltrichloroethane increase secretion and production of interleukin 6 by human immune cells.

A glyphosate-based herbicide induces sub-lethal effects in early life stages and liver cell line of rainbow trout, *Oncorhynchus mykiss*.

Genotoxic, cytotoxic, and cytopathological effects in rats exposed for 18 months to a mixture of 13 chemicals in doses below NOAEL levels.

Cardiotoxicity of forchlorfenuron (CPPU) in zebrafish (*Danio rerio*) and H9c2 cardiomyocytes.

Identification of signal pathways for immunotoxicity in the spleen of common carp exposed to chlorpyrifos.

Ecotoxicological hazard of a mixture of glyphosate and aminomethylphosphonic acid to the mussel *Mytilus galloprovincialis* (Lamarck 1819).

Hemotoxic effects of some herbicides on juvenile of Nile tilapia *Oreochromis niloticus*.

Identification of miRNA-7 as a regulator of brain-derived neurotrophic factor/ α -synuclein axis in atrazine-induced Parkinson's disease by peripheral blood and brain microRNA profiling.

Genotoxicity induced by widely used pesticide binary mixtures on *Caiman latirostris* (broad-snouted caiman).

Clinical features and risk factors of acute kidney injury in children with acute paraquat intoxication.

Spirometric Pulmonary Restriction in Herbicide-Exposed U.S. Vietnam War Veterans.

[Protective effects of oligomeric proanthocyanidins in mice exposed to paraquat].

Conserved roles of glucose in suppressing reactive oxygen species-induced cell death and animal survival.

[Experience of continuous fluid therapy in successfully rescuing a patient with acute severe paraquat poisoning].

[Early white blood cell count in predicting mortality after acute paraquat poisoning: a Meta-analysis].

Cardiotoxicity in African clawed frog (*Xenopus laevis*) sub-chronically exposed to environmentally relevant atrazine concentrations: Implications for species survival.

Effects of ecologically relevant concentrations of Boral[®] 500 SC, Glifosato[®] Biocarb, and a blend of both herbicides on markers of metabolism, stress, and nutritional condition factors in bullfrog tadpoles.

Validating buccal swabbing as a minimal-invasive method to detect pesticide exposure in squamate reptiles.

Acute exposure to chlorpyrifos and glyphosate induces changes in hemolymph biochemical parameters in the crayfish, *Astacus leptodactylus* (Eschscholtz, 1823).

Serial measurement of glyphosate blood concentration in a glyphosate potassium herbicide-intoxicated patient: A case report.

Gene expression, genotoxicity, and physiological responses in an Amazonian fish, *Colossoma macropomum* (CUVIER 1818), exposed to Roundup[®] and subsequent acute hypoxia.

Exposures to the environmental contaminants pentachlorophenol and dichlorodiphenyltrichloroethane increase production of the proinflammatory cytokine, interleukin-1 β , in human immune cells.

Clinical outcome of paraquat poisoning during pregnancy.

Detoxification, Apoptosis, and Immune Transcriptomic Responses of the Gill Tissue of Bay Scallop Following Exposure to the Algicide Thiazolidinedione 49.

Glyphosate induces benign monoclonal gammopathy and promotes multiple myeloma progression in mice.

Surgical treatment of pyloric stenosis caused by glyphosate poisoning: A case report.

Evaluating sub-lethal stress from Roundup(®) exposure in *Artemia franciscana* using (1)H NMR and GC-MS.

Mechanisms behind the atherothrombotic effects of acrolein, a review.

The significance of serum HMGB1 level in humans with acute paraquat poisoning.

Platelet-lymphocyte ratio is not a prognostic predictor for acute paraquat-intoxicated patients: A retrospective analysis.

Comparative studies on endogenic stress hormones, antioxidant, biochemical and hematological status of metabolic disturbance in albino rat exposed to roundup herbicide and its active ingredient glyphosate.

Histopathological and ultrastructural indices for the assessment of glyphosate-based herbicide cytotoxicity in decapod crustacean hepatopancreas.

Prenatal exposure to the herbicide 2,4-D is associated with deficits in auditory processing during infancy.

Can atrazine loaded nanocapsules reduce the toxic effects of this herbicide on the fish *Prochilodus lineatus*? A multibiomarker approach.

Pulmonary Tumor Thrombotic Microangiopathy Mimicking Inhalation Lung Injury.

Homicidal Paraquat Poisoning.

The Alexipharmic Mechanisms of Five Licorice Ingredients Involved in CYP450 and Nrf2 Pathways in Paraquat-Induced Mice Acute Lung Injury.

TLR3 is involved in paraquat-induced acute renal injury.

Metabolomics Analysis in Acute Paraquat Poisoning Patients Based on UPLC-Q-TOF-MS and Machine Learning Approach.

Glyphosate affects haemocyte parameters in the clam *Ruditapes philippinarum*.

DNA damage exerted by mixtures of commercial formulations of glyphosate and imazethapyr herbicides in *Rhinella arenarum* (Anura, Bufonidae) tadpoles.

Role of bone marrow mesenchymal stem cells in the development of PQ-induced pulmonary fibrosis.

Antioxidant and cytoprotective effects of N-acetylcysteine against subchronic oral glyphosate-based herbicide-induced oxidative stress in rats.

Paraquat affects the differentiation of neural stem cells and impairs the function of vascular endothelial cells: a study of molecular mechanism.

Effects of glyphosate and aminomethylphosphonic acid on an isogenic model of the human blood-brain barrier.

The GMO90+ Project: Absence of Evidence for Biologically Meaningful Effects of Genetically Modified Maize-based Diets on Wistar Rats After 6-Months Feeding Comparative Trial.

Use of qSOFA Score in Predicting the Outcomes of Patients With Glyphosate Surfactant Herbicide Poisoning Immediately Upon Arrival at the Emergency Department.

"Pink Sign": The Importance of Short-Term Occlusive Testing in Suspected Cases of Contact Urticaria.

Learning and memory impairments associated to acetylcholinesterase inhibition and oxidative stress following glyphosate based-herbicide exposure in mice.

Effects of dietary antioxidants and environmental stressors on immune function and condition in *Lithobates (Rana) sylvaticus*.

Effects of cypermethrin (pyrethroid), glyphosate and chlorpyrifos (organophosphorus) on the endocrine and immune system of *Salvator merianae* (Argentine tegu).

[Study on the effect of occupational exposure to glyphosate on blood routine].

Alleviation of paraquat-induced oxidative lung injury by betaine via regulation of sulfur-containing amino acid metabolism despite the lack of betaine-homocysteine methyltransferase (BHMT) in the lung.

Ligustrazin increases lung cell autophagy and ameliorates paraquat-induced pulmonary fibrosis by inhibiting PI3K/Akt/mTOR and hedgehog signalling via increasing miR-193a expression.

Dietary Tributyrin Attenuates Intestinal Inflammation, Enhances Mitochondrial Function, and Induces Mitophagy in Piglets Challenged with Diquat.

[Clinical effect of haemoperfusion combined with continuous veno-veno haemofiltration in treatment of paraquat poisoning: a Meta-analysis].

Visible photodegradation of ibuprofen and 2,4-D in simulated waste water using sustainable metal free-hybrids based on carbon nitride and biochar.

Aspirin-triggered resolvin D1 alleviates paraquat-induced acute lung injury in mice.

Effects of AT-RvD1 on paraquat-induced acute renal injury in mice.

Adverse effects of acrolein, a ubiquitous environmental toxicant, on muscle regeneration and mass.

Increased 90-Day Mortality in Spontaneously Breathing Patients With Paraquat Poisoning: In Addition to Disease Severity, Lung Strain May Play a Role.

Sodium tanshinone IIA sulfate protects myocardium against paraquat-induced toxicity through activating the Nrf2 signaling pathway in rats.

Antioxidant activities of *Moringa oleifera* leaf extract against pendimethalin-induced oxidative stress and genotoxicity in Nile tilapia, *Oreochromis niloticus* (L.).

Protective and anti-inflammatory effects of hydroalcoholic leaf extract of *Origanum vulgare* on oxidative stress, TNF- α gene expression and liver histological changes in paraquat-induced hepatotoxicity in rats.

Resveratrol improves intestinal barrier function, alleviates mitochondrial dysfunction and induces mitophagy in diquat challenged piglets(1).

Hemodynamic changes after infusion of intravenous lipid emulsion to treat refractory hypotension caused by glyphosate-surfactant herbicide poisoning: A case report.

Exposure to herbicide linuron results in alterations in hematological profile and stress biomarkers of common carp (*Cyprinus carpio*).

Biomarkers at different levels of organisation after atrazine formulation (SIPTRAN 500SC(®)) exposure in *Rhinella schneideri* (Anura: Bufonidae) Neotropical tadpoles.

Atrazine exposure triggers common carp neutrophil apoptosis via the CYP450s/ROS pathway.

Effect of trans-Cinnamaldehyde on Methicillin-Resistant *Staphylococcus aureus* Biofilm Formation: Metabolic Activity Assessment and Analysis of the Biofilm-Associated Genes Expression.

H₂O₂-activated oxidative stress amplifier capable of GSH scavenging for enhancing tumor photodynamic therapy.

Loss of methionine sulfoxide reductases increases resistance to oxidative stress.

In vitro activity of carvacrol, cinnamaldehyde and thymol combined with antifungals against *Malassezia pachydermatis*.

The effects of Cinnamaldehyde on early brain injury and cerebral vasospasm following experimental subarachnoid hemorrhage in rabbits.

Side Effects of Coronary Stenting such as Severe Coronary Stenosis and Multiple Coronary Chronic Total Occlusions in Elderly Patients via Induced Proinflammatory and Prooxidative Stress.

Catalase blockade reduces the pressor response to central cholinergic activation.

Effect of Fenofibrate on the Expression of Inflammatory Mediators in a Diabetic Rat Model.

Speciation analysis of arsenic in urine samples from APL patients treated with single agent As₂O₃ by HPLC-HG-AFS.

Anti-oxidant and anti-inflammatory effects of cinnamaldehyde and eugenol on mononuclear cells of rheumatoid arthritis patients.

Mendelian randomization of inorganic arsenic metabolism as a risk factor for hypertension- and diabetes-related traits among adults in the Hispanic Community Health Study/Study of Latinos (HCHS/SOL) cohort.

Radix Tetrastigma flavonoid ameliorates inflammation and prolongs the lifespan of *Caenorhabditis elegans* through JNK, p38 and Nrf2 pathways.

Activation of Nrf2 attenuates delayed gastric emptying in obesity induced diabetic (T2DM) female mice.

Topical Application of Cinnamaldehyde Promotes Faster Healing of Skin Wounds Infected with *Pseudomonas aeruginosa*.

Time course of arsenic species in red blood cells of acute promyelocytic leukemia (APL) patients treated with single agent arsenic trioxide.

On the Use of Hair Analysis for Assessing Arsenic Intoxication.

Inhibition of the Nrf2/HO-1 Axis Suppresses the Mitochondria-Related Protection Promoted by Gastrodin in Human Neuroblastoma Cells Exposed to Paraquat.

Cinnamaldehyde ameliorates STZ-induced rat diabetes through modulation of IRS1/PI3K/AKT2 pathway and AGEs/RAGE interaction.

Urinary acrolein metabolite levels in severe acute alcoholic hepatitis patients.

Assessment of hematological, hepato-renal, antioxidant, and hormonal responses of *Clarias gariepinus* exposed to sub-lethal concentrations of oxyfluorfen.

Efficient atrazine degradation catalyzed by manganese porphyrins: Determination of atrazine degradation products and their toxicity evaluation by human blood cells test models.

Effects of flavoring compounds used in electronic cigarette refill liquids on endothelial and vascular function.

Metabolism and disposition of arsenic species from controlled dosing with dimethylarsinic acid (DMA(V)) in adult female CD-1 mice. V. Toxicokinetic studies following oral and intravenous administration.

Cinnamaldehyde protects from methylglyoxal-induced vascular damage: Effect on nitric oxide and advanced glycation end products.

Cinnamaldehyde application decreases tail temperature in ovariectomized rats with and without estradiol administration.

Impairment of testicular function in electronic cigarette (e-cig, e-cigs) exposed rats under low-voltage and nicotine-free conditions.

Possible involvement of transcriptional activation of nuclear factor erythroid 2-related factor 2 (Nrf2) in the protective effect of caffeic acid on paraquat-induced oxidative damage in *Drosophila melanogaster*.

Pentachlorophenol-induced cytotoxicity in human erythrocytes: enhanced generation of ROS and RNS, lowered antioxidant power, inhibition of glucose metabolism, and morphological changes.

Stable nuclear transformation of rhodophyte species *Porphyridium purpureum*: advanced molecular tools and an optimized method.

The Role of Acrolein and NADPH Oxidase in the Granulocyte-Mediated Growth-Inhibition of Tumor Cells.

Carnosine protects cardiac myocytes against lipid peroxidation products.

Multidrug resistance of the extended-spectrum beta-lactamase-producing *Klebsiella pneumoniae* isolated in Tizi-Ouzou (Algeria).

Serum P-Cresyl Sulfate Is a Predictor of Central Arterial Stiffness in Patients on Maintenance Hemodialysis.

Siderophore (from *Synechococcus* sp. PCC 7002)-Chelated Iron Promotes Iron Uptake in Caco-2 Cells and Ameliorates Iron Deficiency in Rats.

[Brain abscess revealing trilog of Fallot in a child: about a case at the University Teaching Hospital of Parakou, Benin].

Hypertension in Relation to Dioxins and Polychlorinated Biphenyls from the Anniston Community Health Survey Follow-Up.

Ischemic gastritis due to oral iron.

2,3,7,8-Tetrachlorodibenzo-p-dioxin Induces Vascular Dysfunction That is Dependent on Perivascular Adipose and Cytochrome P4501A1 Expression.

Carbon Nanotube/Conducting Polymer Hybrid Nanofibers as Novel Organic Bioelectronic Interfaces for Efficient Removal of Protein-Bound Uremic Toxins.

Plasma Metabolic Profiling Analysis of Gout Party on Acute Gout Arthritis Rats Based on UHPLC-Q-TOF/MS Combined with Multivariate Statistical Analysis.

Metabolomics for improved treatment monitoring of phenylketonuria: urinary biomarkers for non-invasive assessment of dietary adherence and nutritional deficiencies.

Extracorporeal treatment in children with acute severe poisoning.

Nephrotoxic metals of cadmium, lead, mercury and arsenic and the odds of kidney stones in adults: An exposure-response analysis of NHANES 2007-2016.

In utero dioxin exposure and cardiometabolic risk in the Seveso Second Generation Study.

Administration of ferrous sulfate drops has significant effects on the gut microbiota of iron-sufficient infants: a randomised controlled study.

In Vitro and In Vivo Evaluations of Mesoporous Iron Particles for Iron Bioavailability.

[Clinical observation on the inflammatory indexes in septic gastrointestinal dysfunction treated with acupuncture at Jiaji (EX-B 2)].

Creatine is Neuroprotective to Retinal Neurons In Vitro But Not In Vivo.

Metal-induced nephrotoxicity to diabetic and non-diabetic Wistar rats.

Magnetic nanoparticles-loaded liposomes as a novel treatment agent for iron deficiency anemia: In vivo study.

Impaired intestinal barrier function in a mouse model of hyperuricemia.

Evaluation of neuroprotective activity of digoxin and semisynthetic derivatives against partial chemical ischemia.

Pesticide use and risk of non-Hodgkin lymphoid malignancies in agricultural cohorts from France, Norway and the USA: a pooled analysis from the AGRICOH consortium.

Comparison of ferrous sulfate, polymaltose complex and iron-zinc in iron deficiency anemia.

Mass spectrometry-based urinary metabolomics for the investigation on the mechanism of action of *Eleutherococcus senticosus* (Rupr. & Maxim.) Maxim. leaves against ischemic stroke in rats.

Circular RNA TLK1 Aggravates Neuronal Injury and Neurological Deficits after Ischemic Stroke via miR-335-3p/TIPARP.

Development and validation of a UHPLC-MS/MS method for measurement of a gut-derived uremic toxin panel in human serum: An application in patients with kidney disease.

Efficient Innate Immune Killing of Cancer Cells Triggered by Cell-Surface Anchoring of Multivalent Antibody-Recruiting Polymers.

An assessment for diagnostic and therapeutic modalities for management of pediatric Iron deficiency Anemia in Saudi Arabia: a cross-sectional study.

Asymptomatic *Helicobacter Pylori* Infection in Preschool Children and Young Women Does Not Predict Iron Bioavailability from Iron-Fortified Foods.

Food as medicine: Selenium enriched lentils offer relief against chronic arsenic poisoning in Bangladesh.

NO/cGMP/PKG activation protects *Drosophila* cells subjected to hypoxic stress.

CDK4/6 inhibitor palbociclib suppresses IgE-mediated mast cell activation.

Daily versus twice daily dose of ferrous sulphate supplementation in pregnant women: A randomized clinical trial.

Evaluating the efficacy of a ferrous-ion-chelating peptide from Alaska pollock frame for the improvement of iron nutritional status in rats.

A case of fatal 2,4-dinitrophenol (2,4-DNP) intoxication with delayed onset methaemoglobinaemia.

The potential therapeutic benefit of resveratrol on Th17/Treg imbalance in immune thrombocytopenic purpura.

A comprehensive review on hepatoprotective and nephroprotective activities of chrysin against various drugs and toxic agents.

Oxidative Stress and Genomic Damage Induced In Vitro in Human Peripheral Blood by Two Preventive Treatments of Iron Deficiency Anemia.

Iron bioavailability of four iron sources used to fortify infant cereals, using anemic weaning pigs as a model.

Photoinactivation of *Neisseria gonorrhoeae*: A Paradigm-Changing Approach for Combating Antibiotic-Resistant Gonococcal Infection.

A Bifunctional Adsorber Particle for the Removal of Hydrophobic Uremic Toxins from Whole Blood of Renal Failure Patients.

Relative Effect Potency Estimates for Dioxin-Like Compounds in Pregnant Women with Gestational Diabetes Mellitus and Blood Glucose Outcomes Based on a Nested Case-control Study.

Selective Transport of Protein-Bound Uremic Toxins in Erythrocytes.

Stress granules are formed in renal proximal tubular cells during metabolic stress and ischemic injury for cell survival.

Chlorinated persistent organic pollutants and type 2 diabetes - A population-based study with pre- and post- diagnostic plasma samples.

Improving rates of ferrous sulfate prescription for suspected iron deficiency anaemia in infants.

Antioxidant, immunomodulatory, oxidative stress inhibitory and iron supplementation effect of *Astragalus membranaceus* polysaccharide-iron (III) complex on iron-deficiency anemia mouse model.

Cardioprotective properties of opioid receptor agonists in rats with stress-induced cardiac injury.

Involvement of proinflammatory cytokines and metallothionein in the repairing of arsenic-mediated uterine tissue damage by curcumin.

Limitations of pesticide genotoxicity testing using the bacterial in vitro method.

Preventing complications by persistence with iron replacement therapy: a comprehensive literature review.

Wound healing potential of oil extracted from *Parrotiopsis jacquemontiana* (Decne) Rehder.

Comparative liver function assessment of natural and available drug (Ferrous sulfate) for iron-deficiency anemia in rat model.

Consumption of Galacto-Oligosaccharides Increases Iron Absorption from Ferrous Fumarate: A Stable Iron Isotope Study in Iron-Depleted Young Women.

Inorganic arsenic exposure induces sex-disparate effects and exacerbates ischemia-reperfusion injury in the female heart.

Aromatic hydrocarbon receptor provides a link between smoking and rheumatoid arthritis in peripheral blood mononuclear cells.

Intracellular Fe(2+) accumulation in endothelial cells and pericytes induces blood-brain barrier dysfunction in secondary brain injury after brain hemorrhage.

Development of the LC-MS/MS method for determining the p-cresol level in plasma.

p38 mitogen activated protein kinase mediates cardiac Na(+)/H(+) exchanger inhibition induced by Sildenafil.

Use of a Probiotic to Enhance Iron Absorption in a Randomized Trial of Pediatric Patients Presenting with Iron Deficiency.

Effect of continuous venovenous haemodialysis on outcome and pharmacokinetics of arsenic species in a patient with acute promyelocytic leukaemia and acute kidney injury.

Polychlorinated biphenyls influence on autism spectrum disorder risk in the MARBLES cohort.

3-Methyl-4-nitrophenol triggers nasal allergy by modulating dendritic cell properties.

PCB 126 induces monocyte/macrophage polarization and inflammation through AhR and NF- κ B pathways.

Nrf2 deficiency aggravates the increase in osteoclastogenesis and bone loss induced by inorganic arsenic.

Removal of Protein-Bound Uremic Toxins during Hemodialysis Using a Binding Competitor.

A novel target for the promotion of dermal wound healing: Ryanodine receptors.

Perinatal polychlorinated biphenyls and polychlorinated dibenzofurans exposure are associated with DNA methylation changes lasting to early adulthood: Findings from Yucheng second generation.

Prenatal exposure to persistent organic pollutants in Northern Tanzania and their distribution between breast milk, maternal blood, placenta and cord blood.

Prenatal Iron Deficiency and Replete Iron Status Are Associated with Adverse Birth Outcomes, but Associations Differ in Ghana and Malawi.

Novel Aminomethyl Derivatives of 4-Methyl-2-prenylphenol: Synthesis and Antioxidant Properties.

Associations between endocrine disrupting chemicals and equine metabolic syndrome phenotypes.

The aquaporin-4 inhibitor AER-271 blocks acute cerebral edema and improves early outcome in a pediatric model of asphyxial cardiac arrest.

hsa-miR-500a-3P alleviates kidney injury by targeting MLKL-mediated necroptosis in renal epithelial cells.

Zirconium-Based Metal-Organic Frameworks for the Removal of Protein-Bound Uremic Toxin from Human Serum Albumin.

[Effect of emodin on gut microbiota of rats with acute kidney failure].

Aryl hydrocarbon receptor pathway participates in myocardial ischemia reperfusion injury by regulating mitochondrial apoptosis.

KML001, an arsenic compound, as salvage chemotherapy in refractory biliary tract cancers: A prospective study.

Sodium arsenite exposure impairs B cell proliferation and enhances vascular inflammation in *Plasmodium berghei* mouse model.

Stabilization of cell-cell junctions by active vitamin D ameliorates uraemia-induced loss of human endothelial barrier function.

Thermographic evaluation of experimental pleurisy induced by carrageenan and modified by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Protein-Bound Solute Clearance During Hemodialysis.

Iron Deficiency in Heart Failure: An Overview.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) induces peripheral blood abnormalities and plasma cell neoplasms resembling multiple myeloma in mice.

Metabolism and disposition of arsenic species from oral dosing with sodium arsenite in neonatal CD-1 mice. IV. Toxicokinetics following gavage administration and lactational transfer.

Circulating miR-421 Targeting Leucocytic Angiotensin Converting Enzyme 2 Is Elevated in Patients with Chronic Kidney Disease.

Hearing screening and cholinesterase activity among rural workers exposed to pesticides.

[Determination of arsenic species compound in blood by high performance liquid chromatographyatomic fluorescence spectrometry].

Assessment of Acute Serum Iron, Non-Transferrin-Bound Iron, and Gastrointestinal Symptoms with 3-Week Consumption of Iron-Enriched *Aspergillus oryzae* Compared with Ferrous Sulfate.

Secondary metabolites that could contribute to the monodominance of *Erythrina fusca* in the Brazilian Pantanal.

Toxicity of Agrochemicals Among Larval Painted Lady Butterflies (*Vanessa cardui*).

Hydrogel based aptasensor for thrombin sensing by Resonance Rayleigh Scattering.

Activation of cannabinoid receptor type 2 reduces lung ischemia reperfusion injury through PI3K/Akt pathway.

Metabolism and disposition of arsenic species from controlled dosing with sodium arsenite in adult and neonatal rhesus monkeys. VI. Toxicokinetic studies following oral administration.

The Effect of an Iron Supplement on Lycopene Metabolism and Absorption During Digestion in Healthy Humans.

The Customizable E-cigarette Resistance Influences Toxicological Outcomes: Lung Degeneration, Inflammation, and Oxidative Stress-Induced in a Rat Model.

Acetaldehyde Induces an Endothelium-Dependent Relaxation of Superior Mesenteric Artery: Potential Role in Postprandial Hyperemia.

Botrysin D attenuates arsenic-induced oxidative stress in human lung epithelial cells via activating Nrf2/ARE signaling pathways.

Clinical Features, Treatment, Prognosis, and Mortality in Paraquat Poisonings: A Hospital-Based Study in Iran.

Tannic acid modulates intestinal barrier functions associated with intestinal morphology, antioxidative activity, and intestinal tight junction in a diquat-induced mouse model.

Effectiveness of Iron Therapy on Breath Holding Spells in the Children.

Estrogen withdrawal and replacement differentially target liver and adipose tissues in female mice fed a high-fat high-sucrose diet: impact of a chronic exposure to a low-dose pollutant mixture(âˆ†).

Bt Proteins Exacerbate Negative Growth Effects in Juvenile Rusty (F. rusticus) Crayfish Fed Corn Diet.

Blood pharmacokinetic of 17 common pesticides in mixture following a single oral exposure in rats: implications for human biomonitoring and exposure assessment.

Nrf2-regulated miR-380-3p Blocks the Translation of Sp3 Protein and Its Mediation of Paraquat-Induced Toxicity in Mouse Neuroblastoma N2a Cells.

Preparation and characterization of imprinted zeolite-Y for p-cresol removal in haemodialysis.

Neuroprotective effects of anthocyanins and its major component cyanidin-3-O-glucoside (C3G) in the central nervous system: An outlined review.

Zinc treatment modulates hematological and morphological changes in rat erythrocytes following arsenic exposure.

Recovery after surgery: do not forget to check iron status before.

Severe ARDS Complicating an Acute Intentional Cresol Poisoning.

[Assessment of prenatal care for indigenous women in Brazil: findings from the First National Survey of Indigenous People's Health and Nutrition].

Morphology and cytochemical patterns of peripheral blood cells in domestic pigeon (Columba livia).

Risk assessment of low arsenic exposure using biomarkers of oxidative and genotoxic stress in a piscine model.

Effects of Pinacidil and Calcium on Succinate-Energized Rat Heart Mitochondria in the Presence of Rotenone.

Effects of hot melt extrusion processed nano-iron on growth performance, blood composition, and iron bioavailability in weanling pigs.

Down-regulation of the inflammatory response after short-term exposure to low levels of chemical vapours.

Polychlorinated Dibenzo-p-Dioxins, Polychlorinated Dibenzofurans, and Dioxin-Like Polychlorinated Biphenyls in Umbilical Cord Serum from Pregnant Women Living Near a Chemical Plant in Tianjin, China.

Hermetia illucens larvae as a potential dietary protein source altered the microbiota and modulated mucosal immune status in the colon of finishing pigs.

Study on the Metabolism of Six Systemic Insecticides in a Newly Established Cell Suspension Culture Derived from Tea (*Camellia Sinensis* L.) Leaves.

Altered Gene Expression in Dioxin-Like and Non-Dioxin-Like PCB Exposed Peripheral Blood Mononuclear Cells.

Development of a carbon-11 PET radiotracer for imaging TRPC5 in the brain.

The Chemical Forms of Iron in Commercial Prenatal Supplements Are Not Always the Same as Those Tested in Clinical Trials.

Effect of dioxin-related compounds on oral pigmentation in patients affected by the Yusho incident.

Acceleration effect of the forensic luminol reaction induced by visible light irradiation of whole human blood aqueous solutions.

Very Low Protein Diet for Patients with Chronic Kidney Disease: Recent Insights.

Mitochondria and Nuclei Dual-Targeted Hollow Carbon Nanospheres for Cancer Chemophotodynamic Synergistic Therapy.

Identification of acrolein metabolites in human buccal cells, blood, and urine after consumption of commercial fried food.

Effects of curcumin on artery blood gas index of rats with pulmonary fibrosis caused by paraquat poisoning and the expression of Smad 4, Smurf 2, interleukin-4 and interferon- γ .

Attenuation of the effects of oxidative stress by the MAO-inhibiting antidepressant and carbonyl scavenger phenelzine.

Simultaneous photoreduction and Raman spectroscopy of red blood cells to investigate the effects of organophosphate exposure.

The Health Risks of Electronic Cigarette Use to Bystanders.

Transient methemoglobinemia suspected secondary to ingestion of Brassica species in a dog.

[The study of exposure levels of dioxin-like compounds in cord blood of newborns in an e-waste dismantling area in Guangdong Province].

Data on the sub-chronic toxicity in rats after 30 days of oral realgar administration and the accumulation and distribution of arsenic species.

Synthesis and preclinical evaluation of the CRTH2 antagonist [(11C)MK-7246 as a novel PET tracer and potential surrogate marker for pancreatic beta-cell mass.

Organic diet intervention significantly reduces urinary pesticide levels in U.S. children and adults.

TRPA1 channel contributes to myocardial ischemia-reperfusion injury.

Enzyme kinetics of dUTPase from the planarian *Dugesia ryukyuensis*.

Depressive Symptoms After PCB Exposure: Hypotheses for Underlying Pathomechanisms via the Thyroid and Dopamine System.

Excessive Reactive Iron Impairs Hematopoiesis by Affecting Both Immature Hematopoietic Cells and Stromal Cells.

Characterizing the microbial diversity and major metabolites of Sichuan bran vinegar augmented by *Monascus purpureus*.

Protective effects of resveratrol on biomarkers of oxidative stress, biochemical and histopathological changes induced by sub-chronic oral glyphosate-based herbicide in rats.

An isopentenyl-substituted flavonoid norartocarpin activates Nrf2 signalling pathway and prevents oxidative insults in human lung epithelial cells.

Ioxynil and diethylstilbestrol disrupt vascular and heart development in zebrafish.

ER stress differentially affects pro-inflammatory changes induced by mitochondrial dysfunction in the human monocytic leukemia cell line, THP-1.

Enhancement of corneal epithelium cell survival, proliferation and migration by red light: Relevance to corneal wound healing.

Cilostazol Attenuates Retinal Oxidative Stress and Inflammation in a Streptozotocin-Induced Diabetic Animal Model.

Effectiveness of AOS-iron on iron deficiency anemia in rats.

IPSE, a urogenital parasite-derived immunomodulatory protein, ameliorates ifosfamide-induced hemorrhagic cystitis through downregulation of pro-inflammatory pathways.

The Effect of Daily Iron Supplementation with 60 mg Ferrous Sulfate for 12 Weeks on Non-Transferrin Bound Iron Concentrations in Women with a High Prevalence of Hemoglobinopathies.

Nrf2 overexpression protects against paraquat-induced A549 cell injury primarily by upregulating P-glycoprotein and reducing intracellular paraquat accumulation.

Organochlorine pesticides and polychlorinated biphenyls (PCBs) in early adulthood and blood lipids over a 23-year follow-up.

Molecular mechanism involved in cyclophosphamide-induced cardiotoxicity: Old drug with a new vision.

Developmental Regulation of Nuclear Factor Erythroid-2 Related Factors (nrfs) by AHR1b in Zebrafish (*Danio rerio*).

Newer pharmacological approaches for antioxidant neuroprotection in traumatic brain injury.

Phenazine and 1-Undecene Producing *Pseudomonas chlororaphis* subsp. *aurantiaca* Strain KNU17Pc1 for Growth Promotion and Disease Suppression in Korean Maize Cultivars.

Ameliorative effect of gallic acid on sodium arsenite-induced spleno-, cardio- and hemato-toxicity in rats.

Dioxins levels in human blood after implementation of measures against dioxin exposure in Japan.

Lung injury from inhaling butane hash oil mimics pneumonia.

Association of East Asian Variant Aldehyde Dehydrogenase 2 Genotype (ALDH2*2*) with Coronary Spasm and Acute Myocardial Infarction.

Prevalence and Antimicrobial Properties of Lactic Acid Bacteria in Nigerian Women During the Menstrual Cycle.

Organ distribution of endogenous p-cresol in hemodialysis patients.

Hepatic and renal protective effects of quercetin in ferrous sulfate-induced toxicity.

An imazamox-based herbicide causes apoptotic changes in rat liver and pancreas.

Effect of sub-chronic ferrous sulfate treatment on motor skills, hematological and biochemical parameters in rats.

[Exploration about the protection mechanism of 5-hydroxy-1-methylhydantoin on paraquat poisoning model].

Effects of aminomethylphosphonic acid, the main breakdown product of glyphosate, on cellular and biochemical parameters of the mussel *Mytilus galloprovincialis*.

Lycopene Triggers Nrf2-AMPK Cross Talk to Alleviate Atrazine-Induced Nephrotoxicity in Mice.

Atorvastatin attenuates paraquat poisoning-induced epithelial-mesenchymal transition via downregulating hypoxia-inducible factor-1 alpha.

Evaluation of Dermal Exposure to the Herbicide Alachlor Among Vegetable Farmers in Thailand.

First evidence of association between past environmental exposure to dioxin and DNA methylation of CYP1A1 and IGF2 genes in present day Vietnamese population.

Effects of whey protein and conjugated linoleic acid on acrolein-induced cardiac oxidative stress, mitochondrial dysfunction and dyslipidemia in rats.

Assessment of the oxidative and genotoxic effects of the glyphosate-based herbicide roundup on the freshwater shrimp, *Macrobrachium nipponensis*.

Increased plasma prothrombin time is associated with poor prognosis in patients with paraquat poisoning.

Does cyclophosphamide still play a role in glomerular diseases?

The mechanism of DNA damage induced by Roundup 360 PLUS, glyphosate and AMPA in human peripheral blood mononuclear cells - genotoxic risk assessment.

2,4-D poisoning: a review with illustration of two cases.

Oxidative damage and antioxidant defense in *Caiman latirostris* (Broad-snouted caiman) exposed in ovo to pesticide formulations.

Protein kinase C-dependent cell damage by unsaturated carbonyl compounds in vascular cells.

[The Role of TSP-1-CD47 in ROS-mediated Pulmonary Fibrosis Induced by Paraquat].

Atrazine Exposure Influences Immunity in the Blue Dasher Dragonfly, *Pachydiplax longipennis* (Odonata: Libellulidae).

Atrazine promotes immunomodulation by melanomacrophage centre alterations in spleen and vascular disorders in gills from *Oreochromis niloticus*.

Diabetes, Cardiovascular Disorders and 2,3,7,8-Tetrachlorodibenzo-p-Dioxin Body Burden in Czech Patients 50 Years After the Intoxication.

Alachlor Use and Cancer Incidence in the Agricultural Health Study: An Updated Analysis.

Development of an oxidative stress in vitro assay in zebrafish (*Danio rerio*) cell lines.

Cytogenetic damage in peripheral blood cultures of *Chaetophractus villosus* exposed in vivo to a glyphosate formulation (Roundup).

Pancreatic function and histoarchitecture in Wistar rats following chronic exposure to Bushfire[®]: the mitigating role of zinc.

Screening effects of metsulfuron-methyl to collembolans and earthworms: the role of adjuvant addition on ecotoxicity.

Biochemical and histological effects of sub-chronic exposure to atrazine in crayfish *Cherax destructor*.

Characterization and safety evaluation of HPPD W336, a modified 4-hydroxyphenylpyruvate dioxygenase protein, and the impact of its expression on plant metabolism in herbicide-tolerant MST-FG⁷²⁻² soybean.

Postnatal exposure to a glyphosate-based herbicide modifies mammary gland growth and development in Wistar male rats.

Toxicity of some aquatic pollutants to fish.

A survival case of intravenous paraquat intoxication: A case report.

Effects of the chloro-s-triazine herbicide terbuthylazine on DNA integrity in human and mouse cells.

Diagnostic value of complete blood count in paraquat and organophosphorus poisoning patients.

Pre-protective effects of dietary chitosan supplementation against oxidative stress induced by diquat in weaned piglets.

Efficacy of initial haemopurification strategy for acute paraquat poisoning in adults: study protocol for a randomised controlled trial (HeSAPP).

Metabolome disruption of pregnant rats and their offspring resulting from repeated exposure to a pesticide mixture representative of environmental contamination in Brittany.

Oxidative stress, cholinesterase activity, and DNA damage in the liver, whole blood, and plasma of Wistar rats following a 28-day exposure to glyphosate.

Effect of glyphosate-based herbicide on hematological and hemopoietic parameters in common carp (*Cyprinus carpio* L).

The impact of Agent Orange exposure on prognosis and management in patients with chronic lymphocytic leukemia: a National Veteran Affairs Tumor Registry Study.

Paraquat induced acute kidney injury and lung fibrosis: a case report from Bangladesh.

Mutagenic assessment of *Lithobates catesbeianus* tadpoles exposed to the 2,4-D herbicide in a simulated realistic scenario.

Six months exposure to a real life mixture of 13 chemicals' below individual NOAELs induced non monotonic sex-dependent biochemical and redox status changes in rats.

Do recommended doses of glyphosate-based herbicides affect soil invertebrates? Field and laboratory screening tests to risk assessment.

Treatment of Paraquat-Induced Lung Injury With an Anti-C5a Antibody: Potential Clinical Application.

2-Methyl-4-chlorophenoxyacetic acid (MCPA) and bromoxynil herbicide ingestion.

Persistence of auxinic herbicides applied on pasture and toxicity for succeeding crops.

Effects of atrazine on vitellogenesis, steroid levels and lipid peroxidation, in female red swamp crayfish *Procambarus clarkii*.

Naringenin Exerts Anti-inflammatory Effects in Paraquat-Treated SH-SY5Y Cells Through a Mechanism Associated with the Nrf2/HO-1 Axis.

Acrolein-induced oxidative stress and genotoxicity in rats: protective effects of whey protein and conjugated linoleic acid.

Mesenchymal stem cell therapy for paraquat poisoning: A systematic review and meta-analysis of preclinical studies.

Effects of surface charge and palladium on hepatic and kidney injury induced by polystyrene nanoparticles co-administered to mice with paraquat and cisplatin.

[Effect of sucralfate on cytokines in rat with paraquat poisoning].

Lipopolysaccharide-Induced Striatal Nitrosative Stress and Impaired Social Recognition Memory Are Not Magnified by Paraquat Coexposure.

Effects of glyphosate on early life stages: comparison between *Cyprinus carpio* and *Danio rerio*.

Paraquat treatment modulates integrin associated protein (CD47) and basigin (CD147) expression and mitochondrial potential on erythroid cells in mice.

Induction of chronic migraine phenotypes in a rat model after environmental irritant exposure.

From TBT to booster biocides: Levels and impacts of antifouling along coastal areas of Panama.

Hepatotoxicity of paraquat on common carp (*Cyprinus carpio* L.).

Potential biomarkers for monitoring the toxicity of long-term exposure to atrazine in rat by metabonomic analysis.

Methemoglobinemia Following Monolinuron Ingestion: A Case Report in a Child.

Ratio of Injured Lung Volume Fraction in Prognosis Evaluation of Acute PQ Poisoning.

Evidence the U.S. autism epidemic initiated by acetaminophen (Tylenol) is aggravated by oral antibiotic amoxicillin/clavulanate (Augmentin) and now exponentially by herbicide glyphosate (Roundup).

Ecotoxicological risk assessment for the herbicide glyphosate to non-target aquatic species: A case study with the mussel *Mytilus galloprovincialis*.

Are the damaging effects induced by the imazethapyr formulation Pivot(®) H in *Boana pulchella* (Anura) reversible upon ceasing exposure?

Neurological and Neurophysiological Findings in Workers with Chronic 2,3,7,8-Tetrachlorodibenzo-p-Dioxin Intoxication 50 Years After Exposure.

[Clinical analysis of lower limb thrombosis caused by paraquat poisoning].

Transcription factor NFE2L2/NRF2 modulates chaperone-mediated autophagy through the regulation of LAMP2A.

Treatment Outcome of Combined Continuous Venovenous Hemofiltration and Hemoperfusion in Acute Paraquat Poisoning: A Prospective Controlled Trial.

Lethal Bentazone Intoxication - A Report of Two Cases.

Carnosic Acid Induces Anti-Inflammatory Effects in Paraquat-Treated SH-SY5Y Cells Through a Mechanism Involving a Crosstalk Between the Nrf2/HO-1 Axis and NF- κ B.

Trans-cinnamaldehyde Modulates Hippocampal Nrf2 Factor and Inhibits Amyloid Beta Aggregation in LPS-Induced Neuroinflammation Mouse Model.

Effects of phytochemical feed additive based on thymol, carvacrol and cinnamic aldehyde on body weight, blood parameters and environmental bacteria in broiler chickens.

Stereoisomeric guaiacylglycerol- β -coniferyl aldehyde ether induces distinctive apoptosis by downregulation of MEK/ERK pathway in hepatocellular carcinoma cells.

Cinnamic aldehyde inhibits vascular smooth muscle cell proliferation and neointimal hyperplasia in Zucker Diabetic Fatty rats.

Acrolein Contributes to the Neuropathic Pain and Neuron Damage after Ischemic-Reperfusion Spinal Cord Injury.

Protective Effects of Brain Infarction by N-Acetylcysteine Derivatives.

Chattonella subsalsa (Raphidophyceae) growth and hemolytic activity in response to agriculturally-derived estuarine contaminants.

Glyphosate Use and Cancer Incidence in the Agricultural Health Study.

Protective effect of ALDH2 against cyclophosphamide-induced acute hepatotoxicity via attenuating oxidative stress and reactive aldehydes.

Neutrophil extracellular traps in acrolein promoted hepatic ischemia reperfusion injury: Therapeutic potential of NOX2 and p38MAPK inhibitors.

Protective Effects of Chymostatin on Paraquat-Induced Acute Lung Injury in Mice.

Immunomodulatory and therapeutic role of *Cinnamomum verum* extracts in collagen-induced arthritic BALB/c mice.

Molecular characterization and efficacy evaluation of a transgenic corn event for insect resistance and glyphosate tolerance.

Acrolein: An Effective Biomarker for Tissue Damage Produced from Polyamines.

[The regulation of tight junction protein via PKC ϵ /1 β for abnormal permeability of brain microvascular endothelial cells exposed to paraquat].

A novel approach for determination of paraquat based on dried blood spot (DBS) extraction and UHPLC-HRMS analysis.

Global transcriptomic analysis of *Rhodococcus erythropolis* D310-1 in responding to chlorimuron-ethyl.

Analysis of Common Herbicides in Blood by UPLC-HRMS.

Chronic adriamycin treatment impairs CGRP-mediated functions of meningeal sensory nerves.

Diquat-induced oxidative stress increases intestinal permeability, impairs mitochondrial function, and triggers mitophagy in piglets.

Effect on transcriptome and metabolome of stacked transgenic maize containing insecticidal cry and glyphosate tolerance epsps genes.

Detoxification Mechanism of α,β -Unsaturated Carbonyl Compounds in Cigarette Smoke Observed in Sheep Erythrocytes.

EF-Tu From Non-typeable *Haemophilus influenzae* Is an Immunogenic Surface-Exposed Protein Targeted by Bactericidal Antibodies.

Cleft palate formation after palatal fusion occurs due to the rupture of epithelial basement membranes.

Associations of cumulative exposure to heavy metal mixtures with obesity and its comorbidities among U.S. adults in NHANES 2003-2014.

Profile of three boron-containing compounds on the body weight, metabolism and inflammatory markers of diabetic rats.

Increases in bioactive lipids accompany early metabolic changes associated with β^2 -cell expansion in response to short-term high-fat diet.

Design of a Biocompatible and Ratiometric Fluorescent probe for the Capture, Detection, Release, and Reculture of Rare Number CTCs.

Contributing factors to iron deficiency anemia in women in Jordan: A single-center cross-sectional study.

Contribution of uraemic toxins to the vascular fibrosis associated with chronic kidney disease.

Morphological evaluation of liposomal iron carriers.

Ketogenic diet regulates the antioxidant catalase via the transcription factor PPAR β .

Eleven Weeks of Iron Supplementation Does Not Maintain Iron Status for an Entire Competitive Season in Elite Female Volleyball Players: A Follow-Up Study.

Uremia Impacts VE-Cadherin and ZO-1 Expression in Human Endothelial Cell-to-Cell Junctions.

A Prospective Randomised Controlled Trial of a Single Intravenous Infusion of Ferric Carboxymaltose vs Single Intravenous Iron Polymaltose or Daily Oral Ferrous Sulphate in the Treatment of Iron Deficiency Anaemia in Pregnancy.

Anemia in Older Adults.

Transport of ACE Inhibitory Peptides Ile-Gln-Pro and Val-Glu-Pro Derived from *Spirulina platensis* Across Caco-2 Monolayers.

Iron Fortification of Spiced Vinegar in the Philippines.

Preoperative Epoetin- α with Intravenous or Oral Iron for Major Orthopedic Surgery: A Randomized Controlled Trial.

Risk of Alzheimer's disease with metal concentrations in whole blood and urine: A case-control study using propensity score matching.

Sleep disorders among Yusho patients highly intoxicated with dioxin-related compounds: A 140-case series.

Plasma metabolite profiles in children with current asthma.

Prevalence of elevated blood lead levels among pregnant women and sources of lead exposure in rural Bangladesh: A case control study.

Generation, clearance, toxicity, and monitoring possibilities of unaccounted uremic toxins for improved dialysis prescriptions.

The role of molecular modelling strategies in validating the effects of chrysin on sodium arsenite-induced chromosomal and DNA damage.

Efficacy of Lactoferrin Oral Administration in the Treatment of Anemia and Anemia of Inflammation in Pregnant and Non-pregnant Women: An Interventional Study.

Sucrosomial(®) Iron Supplementation in Mice: Effects on Blood Parameters, Hepcidin, and Inflammation.

Peak AAA fatty acid homolog contaminants present in the dietary supplement L-Tryptophan associated with the onset of eosinophilia-myalgia syndrome.

Exploring a Novel Screening Method for Patients with Oral Squamous Cell Carcinoma: A plasma Metabolomics Analysis.

[Validity of patient-reported anemia and therapeutic use of iron supplements during pregnancy: 2015 Pelotas (Brazil) birth cohort].

Diagnostic meaning of blood p-cresol concentration in forensic autopsy cases.

Transchem project - Part II: Transgenerational effects of long-term exposure to pendimethalin at environmental concentrations on the early development and viral pathogen susceptibility of rainbow trout (*Oncorhynchus mykiss*).

Effect of various calcium salts on non-heme iron bioavailability in fasted women of childbearing age.

Health Risk Assessment of Occupationally Pesticide-Exposed Population of Cancer Prone Area of Punjab.

Lung function and pulmonary artery blood flow following prenatal maternal retinoic acid and imatinib in the nitrofen model of congenital diaphragmatic hernia.

Efficacy and safety of ferric carboxymaltose versus ferrous sulfate for iron deficiency anemia during pregnancy: subgroup analysis of Korean women.

Pesticides and cardiotoxicity. Where do we stand?

Ursodeoxycholic acid improves liver function via phenylalanine/tyrosine pathway and microbiome remodelling in patients with liver dysfunction.

Quercetin modulates iron homeostasis and iNOS expression of splenic macrophages in a rat model of iron deficiency anemia.

Pea Ferritin Stability under Gastric pH Conditions Determines the Mechanism of Iron Uptake in Caco-2 Cells.

Ellagic acid mitigates sodium arsenite-induced renal and hepatic toxicity in male Wistar rats.

Clinical pharmacokinetics and safety profile of single agent arsenic trioxide by continuous slow-rate infusion in patients with newly diagnosed acute promyelocytic leukemia.

Associations of Arsenic Exposure With Telomere Length and Na⁺-ve T Cells in Childhood-A Birth Cohort Study.

Intravenous Iron Does Not Augment the Hemoglobin Mass Response to Simulated Hypoxia.

Protective Effect of Ellagic Acid Against Sodium Arsenite-Induced Cardio- and Hematotoxicity in Rats.

Probiotics in the treatment of chronic kidney disease: a systematic review.

Phenol and chlorinated phenols exhibit different apoptotic potential in human red blood cells (in vitro study).

ALDH2 Protects Against Ischemic Stroke in Rats by Facilitating 4-HNE Clearance and AQP4 Down-Regulation.

Associations between persistent organic pollutants and metabolic syndrome in morbidly obese individuals.

Arsenic speciation in hair and nails of acute promyelocytic leukemia (APL) patients undergoing arsenic trioxide treatment.

The Influence of Obesity on the Pharmacokinetics of Dioxin in Mice: An Assessment Using Classical and PBPK Modeling.

Toluene and methylethylketone: effect of combined exposure on their metabolism in rat.

Persistent Organochlorine Pollutants in Plasma, Blood Pressure, and Hypertension in a Longitudinal Study.

2,3,7,8-Tetrachlorodibenzo-p-dioxin dose-dependently increases bone mass and decreases marrow adiposity in juvenile mice.

TLQP Peptides in Amyotrophic Lateral Sclerosis: Possible Blood Biomarkers with a Neuroprotective Role.

Non-dioxin-like polychlorinated biphenyls in early pregnancy and risk of gestational diabetes mellitus.

The Effect of Boric Acid and Borax on Oxidative Stress, Inflammation, ER Stress and Apoptosis in Cisplatin Toxication and Nephrotoxicity Developing as a Result of Toxication.

Possible Obesogenic Effects of Bisphenols Accumulation in the Human Brain.

Genetic or pharmacological superoxide-hydrogen peroxide imbalances modulate the in vitro effects of lithium on glycogen synthase kinase-3 β .

Metabolic profiles in community-acquired pneumonia: developing assessment tools for disease severity.

Mining a KrÄ¶hnke Pyridine Library for Anti-Arenavirus Activity.

Towards Resolving the Pro- and Anti-Tumor Effects of the Aryl Hydrocarbon Receptor.

Protective Effect of Azadirachta indica and Vitamin E Against Arsenic Acid-Induced Genotoxicity and Apoptosis in Rats.

The effect of ellagic acid on photodynamic therapy in leukemia cells.

Impact of Double-Fortified Salt with Iron and Iodine on Hemoglobin, Anemia, and Iron Deficiency Anemia: A Systematic Review and Meta-Analysis.

Metabolism and disposition of arsenic species after repeated oral dosing with sodium arsenite in drinking water. II. Measurements in pregnant and fetal CD-1 mice.

Persistent organic pollutants and risk of type 2 diabetes: A prospective investigation among middle-aged women in Nurses' Health Study II.

Modulation of intestinal microbiota, control of nitrogen products and inflammation by pre/probiotics in chronic kidney disease: a systematic review.

Cholinesterase research outreach project (CROP): point of care cholinesterase measurement in an Australian agricultural community.

Food and nutrition insecurity indicators associated with iron deficiency anemia in Brazilian children: a systematic review.

Dioxin-like PCB 126 Increases Systemic Inflammation and Accelerates Atherosclerosis in Lean LDL Receptor-Deficient Mice.

Role of Peroxiredoxin 2 in the Protection Against Ferrous Sulfate-Induced Oxidative and Inflammatory Injury in PC12 Cells.

In rats gestational iron deficiency does not change body fat or hepatic mitochondria in the aged offspring.

Phase III randomized trial comparing intravenous to oral iron in patients with cancer-related iron deficiency anemia not on erythropoiesis stimulating agents.

Carnosine attenuates cyclophosphamide-induced bone marrow suppression by reducing oxidative DNA damage.

Safety evaluation of an oat grain alkaloid gramine by genotoxicity assays.

Effects of low-level prenatal exposure to dioxins on cognitive development in Japanese children at 42 months.

Host biotin is required for liver stage development in malaria parasites.

Sucrosomial Iron Supplementation in Anemic Patients with Celiac Disease Not Tolerating Oral Ferrous Sulfate: A Prospective Study.

[Adherence to iron supplementation in pregnant women].

Decreased activity of glutathione peroxidase with oral ferrous iron administration: A cause of oxidative stress.

p-Cresyl sulfate decreases peripheral B cells in mice with adenine-induced renal dysfunction.

The impaired immune function and structural integrity by dietary iron deficiency or excess in gill of fish after infection with *Flavobacterium columnare*: Regulation of NF- κ B, TOR, JNK, p38MAPK, Nrf2 and MLCK signalling.

Environmental pollutant hexachlorobenzene induces hypertension in a rat model.

The perspective of primary health care pediatricians regarding childhood anemia and iron supplementation.

Differences in fecal microbial metabolites and microbiota of children with autism spectrum disorders.

Association of urinary concentrations of four chlorophenol pesticides with cardiometabolic risk factors and obesity in children and adolescents.

Arsenic exposure induces glucose intolerance and alters global energy metabolism.

A comparison of clinical efficacy and economic value in Basalin- and Lantus-treated patients with type 2 diabetes using continuous glucose monitoring system.

Efficacy of Probiotics Supplementation On Chronic Kidney Disease: a Systematic Review and Meta-Analysis.

Recent decreasing trends of exposure to PCDDs/PCDFs/dioxin-like PCBs in general populations, and associations with diabetes, metabolic syndrome, and gout/hyperuricemia.

Novel insight into circular RNA HECTD1 in astrocyte activation via autophagy by targeting MIR142-TIPARP: implications for cerebral ischemic stroke.

[About a cresol intoxication].

Efficacy of Supplementation with Iron Sulfate Compared to Iron Bisglycinate Chelate in Preterm Infants.

Arsenic Exposure in Relation to Ischemic Stroke: The Reasons for Geographic and Racial Differences in Stroke Study.

Evidence for estrogeno-mimetic effects of a mixture of low-dose pollutants in a model of ovariectomized mice.

Role of endogenous hydrogen sulfide in cardiac mitochondrial preservation during ischemia reperfusion injury.

Association of blood polychlorinated biphenyls and cholesterol levels among Canadian Inuit.

Morbidity in New Zealand pesticide producers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Probiotic Supplementation in Chronic Kidney Disease: A Double-blind, Randomized, Placebo-controlled Trial.

Prenatal exposure to dioxin-like compounds is associated with decreased cord blood IgE and increased risk of wheezing in children aged up to 7years: The Hokkaido study.

Morphological characteristics and human papillomavirus genotype predict the treatment response in cutaneous warts.

Iron deficiency anemia interfering the diagnosis of compound heterozygosity for Hb constant spring and Hb Paks^Å: The first case report.

Cytochemical patterns of the peripheral blood cells in Chinese alligator (*Alligator sinensis*).

Production of bioactive cyclotides in somatic embryos of *Viola odorata*.

Differences in reproductive toxicity of TBBPA and TCBPA exposure in male *Rana nigromaculata*.

Glutathione-S-transferase-theta genotypes and the risk of cyclophosphamide toxicity in dogs.

Pharmaceuticals, hormones, pesticides, and other bioactive contaminants in water, sediment, and tissue from Rocky Mountain National Park, 2012-2013.

Near infrared laser irradiation induces NETosis via oxidative stress and autophagy.

Risk for animal and human health related to the presence of dioxins and dioxin-like PCBs in feed and food.

Paraquat-Mediated Oxidative Stress in *Anopheles gambiae* Mosquitoes Is Regulated by An Endoplasmic Reticulum (ER) Stress Response.

Induction of intracellular ferritin expression in embryo-derived *Ixodes scapularis* cell line (ISE6).

Serum organochlorine pesticides residues and risk of cancer: A case-control study.

Signaling Events Downstream of AHR Activation That Contribute to Toxic Responses: The Functional Role of an AHR-Dependent Long Noncoding RNA (slincR) Using the Zebrafish Model.

Dynamics study on the role of curcumin on TGF- β 1 expression and pathological changes in acute paraquat poisoned rats.

Metabolism and disposition of arsenic species from controlled dosing with sodium arsenite in adult female CD-1 mice. III. Toxicokinetic studies following oral and intravenous administration.

Glutathione S-transferase P deficiency induces glucose intolerance via JNK-dependent enhancement of hepatic gluconeogenesis.

Exposure to bisphenol A, chlorophenols, benzophenones, and parabens in relation to reproductive hormones in healthy women: A chemical mixture approach.

The effect of prenatal exposure on disposition of hexachloronaphthalene in female Wistar rats and fetal compartment.

Moderate levels of glyphosate and its formulations vary in their cytotoxicity and genotoxicity in a whole blood model and in human cell lines with different estrogen receptor status.

Behavioral response and dynamics of *Eisenia fetida* hemocytes exposed to environmentally relevant concentration of sulfentrazone.

Nrf2 Signaling in Sodium Azide-Treated Oligodendrocytes Restores Mitochondrial Functions.

In vitro detection of allergen sensitized basophils by HSA-DNP antigen-anchored liquid crystal microdroplets.

Screening hundreds of emerging organic pollutants (EOPs) in surface water from the Yangtze River Delta (YRD): Occurrence, distribution, ecological risk.

Prolonged DADLE exposure epigenetically promotes Bcl-2 expression and elicits neuroprotection in primary rat cortical neurons via the PI3K/Akt/NF- κ B pathway.

Supplementation of Short-Chain Fatty Acid, Sodium Propionate, in Patients on Maintenance Hemodialysis: Beneficial Effects on Inflammatory Parameters and Gut-Derived Uremic Toxins, A Pilot Study (PLAN Study).

Psychic euosmia and obsessive compulsive personality disorder.

Bushfire smoke is pro-inflammatory and suppresses macrophage phagocytic function.

Correction: Efficacy of initial haemopurification strategy for acute paraquat poisoning in adults: study protocol for a randomised controlled trial (HeSAPP).

Pseudomelanosis intestini "from pylorus to jejunum:" A rare endoscopic finding in a patient with GI bleeding.

Roles of dietary supplementation with arginine or N-carbamylglutamate in modulating the inflammation, antioxidant property, and mRNA expression of antioxidant-relative signaling molecules in the spleen of rats under oxidative stress.

Arsenic-containing hydrocarbons disrupt a model in vitro blood-cerebrospinal fluid barrier.

The Aryl Hydrocarbon Receptor and the Nervous System.

The effect of two bromfenvinphos impurities: BDCEE and \hat{I}^2 -ketophosphonate on oxidative stress induction, acetylcholinesterase activity, and viability of human red blood cells.

Comparison of the Metabolic Behaviors of Six Systemic Insecticides in a Newly Established Cell Suspension Culture Derived from Tea (*Camellia sinensis* L.) Leaves.

Data on recurrent somatic embryogenesis and in vitro micropropagation of *Cnidium officinale* Makino.

Sex-related differences in the associations between maternal dioxin-like compounds and reproductive and steroid hormones in cord blood: The Hokkaido study.

Comparison of Hepatic NRF2 and Aryl Hydrocarbon Receptor Binding in 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Treated Mice Demonstrates NRF2-Independent PKM2 Induction.

Effects of Prebiotic Fiber Xylooligosaccharide in Adenine-Induced Nephropathy in Mice.

Serum metabolome profiling revealed potential biomarkers for milk protein yield in dairy cows.

Aryl Hydrocarbon Receptor Regulates Apoptosis and Inflammation in a Murine Model of Experimental Autoimmune Uveitis.

Homogeneous Entropy Catalytic-Driven DNA Hydrogel as Strong Signal Blocker for Highly Sensitive Electrochemical Detection of Platelet-Derived Growth Factor.

Lung injury caused by paraquat poisoning results in increased interleukin-6 and decreased microRNA-146a levels.

The impact of short-chain fatty acids on GLP-1 and PYY secretion from the isolated perfused rat colon.

Arsenic methylation capacity in relation to nutrient intake and genetic polymorphisms in one-carbon metabolism.

Association of dioxin exposure and reproductive hormone levels in men living near the Bien Hoa airbase, Vietnam.

Lithium Treatment Aggregates the Adverse Effects on Erythrocytes Subjected to Arsenic Exposure.

Pharmacologic modeling of primary mitochondrial respiratory chain dysfunction in zebrafish.

Biogenic Synthesis of Novel Functionalized Selenium Nanoparticles by *Lactobacillus casei* ATCC 393 and Its Protective Effects on Intestinal Barrier Dysfunction Caused by Enterotoxigenic *Escherichia coli* K88.

Toxicology and carcinogenesis studies of p-chloro- $\hat{\pm}$, $\hat{\pm}$, $\hat{\pm}$ -trifluorotoluene in Sprague Dawley (Hsd:Sprague Dawley SD) rats and B6C3F1/N mice (inhalation studies).

Kinetic and stoichiometric constraints determine the pathway of H₂O₂ consumption by red blood cells.

Explaining the accelerated degradation of ciprofloxacin, sulfamethazine, and erythromycin in different soil exposure scenarios by their aqueous extractability.

Hyperbaric oxygen as a treatment modality in cyclophosphamide-induced hemorrhagic cystitis.

Accumulation properties of polychlorinated biphenyl congeners in Yusho patients and prediction of their cytochrome P450-dependent metabolism by in silico analysis.

Elevated Nrf-2 responses are insufficient to mitigate protein carbonylation in hepatospecific PTEN deletion mice.

Fragmentation patterns involving ammonium adduct fragment ions: A comparison of the determination of metaldehyde in human blood by HPLC-QqQ-MS/MS and UHPLC-Q-TOF-MS.

Berberine protects the liver and kidney against functional disorders and histological damages induced by ferrous sulfate.

Shielding effect of anethole against arsenic induced genotoxicity in cultured human peripheral blood lymphocytes and effect of GSTO1 polymorphism.

Human biomonitoring reference values for some non-persistent chemicals in blood and urine derived from the Canadian Health Measures Survey 2009-2013.

A Review of Environmental Occurrence, Fate, Exposure, and Toxicity of Benzothiazoles.

Background biomonitoring of residue levels of 137 pesticides in the blood plasma of the general population in Beijing.

Erythritol, at insecticidal doses, has harmful effects on two common agricultural crop plants.

Improved safety margin for embryotoxicity in rats for the new endoperoxide artefenomel (OZ439) as compared to artesunate.

Low Oxidative Stress-Mediated Proliferation Via JNK-FOXO3a-Catalase Signaling in Transplanted Adult Stem Cells Promotes Wound Tissue Regeneration.

Prenatal exposure to glycol ethers and sex steroid hormones at birth.

Neurocognitive and physical functioning in the Seveso Women's Health Study.

Arsenic Attenuates Heparin-Binding EGF-Like Growth Factor/EGFR Signaling That Promotes Matrix Metalloprotease 9-Dependent Astrocyte Damage in the Developing Rat Brain.

Identification of novel Nrf2 activators from *Cinnamomum chartophyllum* H.W. Li and their potential application of preventing oxidative insults in human lung epithelial cells.

Enzyme polymorphism, oxygen and injury: a lipidomic analysis of flight-induced oxidative damage in a succinate dehydrogenase d (Sdhd)-polymorphic insect.

Transplantation of endothelial progenitor cells attenuated paraquat-induced acute lung injury via miR-141-3p-Notch-Nrf2 axis.

Genetic and Environmental Effects on Gene Expression Signatures of Blood Pressure: A Transcriptome-Wide Twin Study.

The maturation state of the auditory nerve and brainstem in rats exposed to lead acetate and supplemented with ferrous sulfate.

Prenatal dioxin exposure estimated from dioxins in breast milk and sex hormone levels in umbilical cord blood in Vietnamese newborn infants.

Association of prenatal exposure to PCDD/Fs and PCBs with maternal and infant thyroid hormones: The Hokkaido Study on Environment and Children's Health.

Sensitive and rapid determination of glyphosate, glufosinate, bialaphos and metabolites by UPLC-MS/MS using a modified Quick Polar Pesticides Extraction method.

Pendimethalin induces oxidative stress, DNA damage, and mitochondrial dysfunction to trigger apoptosis in human lymphocytes and rat bone-marrow cells.

Effects of arsenolipids on in vitro blood-brain barrier model.

Potential Prognostic, Diagnostic and Therapeutic Markers for In-stent Reocclusion in Advanced Age Patients After Coronary Stenting.

Risk factors for intestinal colonization with vancomycin resistant enterococci' A prospective study in a level III pediatric intensive care unit.

Antifouling processes and toxicity effects of antifouling paints on marine environment. A review.

Metabolism and disposition of arsenic species from controlled oral dosing with sodium arsenite in adult female CD-1 mice. I. Pilot study to determine dosing, analytical measurements, and sampling strategies.

Understanding the viscoelastic behavior of arterial elastin in glucose via relaxation time distribution spectrum.

Intermittent Hypoxia and Unsaturated Aldehydes: Effects on Oral Epithelial Wound Healing.

[The roles of TSP-1 and its receptor CD47 in pathogenesis of paraquat-induced pulmonary fibrosis in rats].

Early Metabolome Profiling and Prognostic Value in Paraquat-Poisoned Patients: Based on Ultraperformance Liquid Chromatography Coupled To Quadrupole Time-of-Flight Mass Spectrometry.

A case of herbicide-induced acute fibrinous and organizing pneumonia?

Cytogenetic damage in peripheral blood lymphocytes of children exposed to pesticides in agricultural areas of the department of Cordoba, Colombia.

Effects of glyphosate residues and different concentrate feed proportions on performance, energy metabolism and health characteristics in lactating dairy cows.

Propolis supplementation attenuates the negative effects of oxidative stress induced by paraquat injection on productive performance and immune function in turkey poults.

Effects of glyphosate on immune responses and haemocyte DNA damage of Chinese mitten crab, *Eriocheir sinensis*.

Acrolein Disrupts Tight Junction Proteins and Causes Endoplasmic Reticulum Stress-Mediated Epithelial Cell Death Leading to Intestinal Barrier Dysfunction and Permeability.

Effectiveness of heparin eye drops in paraquat-induced ocular injury.

[Mechanism of action for oligomeric proanthocyaniclins in paraquat-induced acute lung injury].

[Paraquat poisoning mechanism and its clinical treatment progress].

Exposure of frogs and tadpoles to chiral herbicide fenoxaprop-ethyl.

Epi/perineural and Schwann Cells as Well as Perineural Sheath Integrity are Affected Following 2,4-D Exposure.

A new machine-learning method to prognosticate paraquat poisoned patients by combining coagulation, liver, and kidney indices.

Influence of sublethal doses of acetamiprid and halosulfuron-methyl on metabolites of zebra fish (*Brachydanio rerio*).

Effects of sub-chronic exposure to terbuthylazine on DNA damage, oxidative stress and parent compound/metabolite levels in adult male rats.

Simultaneous determination of bentazone and its metabolites in postmortem whole blood using liquid chromatography-tandem mass spectrometry.

Hypokalemia is a biochemical signal of poor prognosis for acute paraquat poisoning within 4 hours.

Genotoxic effects of Roundup Full II® on lymphocytes of *Chaetophractus villosus* (Xenarthra, Mammalia): In vitro studies.

Distribution and incorporation mode of the herbicide MCPA in soil derived organo-clay complexes.

Biomarkers of Chronic Acrolein Inhalation Exposure in Mice: Implications for Tobacco Product-Induced Toxicity.

Evaluation of imazethapyr-induced DNA oxidative damage by alkaline Endo III- and Fpg-modified single-cell gel electrophoresis assay in *Hypsiboas pulchellus* tadpoles (Anura, Hylidae).

In vivo cardiovascular toxicity induced by acetochlor in zebrafish larvae.

Tanshinone I Induces Mitochondrial Protection through an Nrf2-Dependent Mechanism in Paraquat-Treated Human Neuroblastoma SH-SY5Y Cells.

[Experimental study scavenging effect of paraquat by hemoperfusion].

Paraquat Induces Peripheral Myelin Disruption and Locomotor Defects: Crosstalk with LXR and Wnt Pathways.

Exploring the potential confounder of nitrogen fertilizers in the relationship between pesticide exposures and risk of leukemia: a Poisson regression with two-way fixed-effects analysis.

Metabolic profiling of goldfish (*Carassius auratus*) after long-term glyphosate-based herbicide exposure.

Influence of temperature on the antioxidant responses and lipid peroxidation of two species of tadpoles (*Rhinella schneideri* and *Physalaemus nattereri*) exposed to the herbicide sulfentrazone (Boral 500SC®).

DNA damage and methylation induced by glyphosate in human peripheral blood mononuclear cells (in vitro study).

Improvement of cyanobacterial-killing biologically derived substances (BDSs) using an ecologically safe and cost-effective naphthoquinone derivative.

[Intervention of edaravone against renal injury induced by acute paraquat poisoning in rats].

Levels of oxylipins, endocannabinoids and related lipids in plasma before and after low-level exposure to acrolein in healthy individuals and individuals with chemical intolerance.

Serum S100 protein could predict altered consciousness in glyphosate or glufosinate poisoning patients.

Time-dependent haemoperfusion after acute paraquat poisoning.

[The study of using salvianolate treat acute lung injury in rats induced by paraquat].

The association of cancer risks with pentachlorophenol exposure: Focusing on community population in the areas along certain section of Yangtze River in China.

Fluazifop- p-butyl, an aryloxyphenoxypropionate herbicide, diminishes renal and hepatic functions and triggers testicular oxidative stress in orally exposed rats.

[The study of using cordyceps-astragalus-salvia miltiorrhiza to treat acute lung injury induced by paraquat poisoning in rats].

Exposures to the environmental toxicants pentachlorophenol (PCP) and dichlorodiphenyltrichloroethane (DDT) modify secretion of interleukin 1-beta (IL-1 β) from human immune cells.

Acrolein Inhalation Alters Myocardial Synchrony and Performance at and Below Exposure Concentrations that Cause Ventilatory Responses.

Ablation of Akt2 prevents paraquat-induced myocardial mitochondrial injury and contractile dysfunction: Role of Nrf2.

[Evaluation of adsorption effect of activated charcoal on oral paraquat poisoning: an experimental study on large animal].

Performance of a novel atrazine-induced cerebellar toxicity in quail (*Coturnix C. coturnix*): Activating PXR/CAR pathway responses and disrupting cytochrome P450 homeostasis.

Effects of pentachlorophenol and dichlorodiphenyltrichloroethane on secretion of interferon gamma (IFN γ) and tumor necrosis factor alpha (TNF α) from human immune cells.

An intelligent prognostic system for analyzing patients with paraquat poisoning using arterial blood gas indexes.

Phycoerythrin averts intracellular ROS generation and physiological functional decline in eukaryotes under oxidative stress.

Perinatal exposure to glyphosate-based herbicide alters the thyrotrophic axis and causes thyroid hormone homeostasis imbalance in male rats.

Basagran (A[®]) induces developmental malformations and changes the bacterial community of zebrafish embryos.

Epigallocatechin-3-gallate alleviates paraquat-induced acute lung injury and inhibits upregulation of toll-like receptors.

Micronuclei and other nuclear abnormalities on *Caiman latirostris* (Broad-snouted caiman) hatchlings after embryonic exposure to different pesticide formulations.

[Value of base excess in predicting the prognosis of patients with paraquat poisoning].

Multiomics reveal non-alcoholic fatty liver disease in rats following chronic exposure to an ultra-low dose of Roundup herbicide.

Vasculitic Neuropathy Following Exposure to a Glyphosate-based Herbicide.

Sodium chlorate, a herbicide and major water disinfectant byproduct, generates reactive oxygen species and induces oxidative damage in human erythrocytes.

An Effective Machine Learning Approach for Prognosis of Paraquat Poisoning Patients Using Blood Routine Indexes.

Beneficial Effects of the Amino Acid Glycine.

[Protective effect of thalidomide on ALI induced by paraquat poisoning in rats and its mechanism].

[Effects of curcumin on pulmonary fibrosis and functions of paraquat-challenged rats].

Pinocembrin Provides Mitochondrial Protection by the Activation of the Erk1/2-Nrf2 Signaling Pathway in SH-SY5Y Neuroblastoma Cells Exposed to Paraquat.

Combined Catalase and ADH Inhibition Ameliorates Ethanol-Induced Myocardial Dysfunction Despite Causing Oxidative Stress in Conscious Female Rats.

Carbenoxolone inhibits TRPV4 channel-initiated oxidative urothelial injury and ameliorates cyclophosphamide-induced bladder dysfunction.

A screen for protective drugs against delayed hypoxic injury.

Cinnamaldehyde potentially attenuates gestational hyperglycemia in rats through modulation of PPAR γ , proinflammatory cytokines and oxidative stress.

In vitro antioxidant activities of resveratrol, cinnamaldehyde and their synergistic effect against cyadox-induced cytotoxicity in rabbit erythrocytes.

Effects of cinnamaldehyde or monensin on performance of weaned Holstein dairy heifers.

Glyphosate and Paraquat in Maternal and Fetal Serums in Thai Women.

[Curative effect of paraquat detoxification recipe combined with continuous hemoperfusion in the treatment of patients with APP and clinical value of Presepsin].

[Protective effect of 5-aminosalicylic acid on the kidney of paraquat poisoning rats by Nrf2-ARE signal pathway].

Investigation of the Importance of Multidrug Resistance-Associated Protein 4 (Mrp4/Abcc4) in the Active Efflux of Anionic Drugs Across the Blood-Brain Barrier.

Identification and Biological Evaluation of Secondary Metabolites from Marine Derived Fungi-*Aspergillus* sp. SCS10W3, Cultivated in the Presence of Epigenetic Modifying Agents.

Iron and Zinc Supplementation Does Not Impact Urinary Arsenic Excretion in Mexican School Children.

Effects of pentachlorophenol on the quail (*Coturnix japonica*) liver detoxification pathway.

A drastic superoxide-dependent oxidative stress is prerequisite for the down-regulation of IRP1: Insights from studies on SOD1-deficient mice and macrophages treated with paraquat.

Evaluation of antibacterial potential and toxicity of plant volatile compounds using new broth microdilution volatilization method and modified MTT assay.

[Experimental study on formation of neutrophil extracellular traps in human peripheral blood induced by paraquat in vitro].

2-Methoxycinnamaldehyde inhibits the TNF- α -induced proliferation and migration of human aortic smooth muscle cells.

A serine/threonine phosphatase 1 of *Streptococcus suis* type 2 is an important virulence factor.

Conjugation of nitrated acetaminophen to Der p1 amplifies peripheral blood monocyte response to Der p1.

Chloracne in a Farming Family.

Pathogenesis of deep endometriosis.

Expression of aryl hydrocarbon receptor, inflammatory cytokines, and incidence of rheumatoid arthritis in Vietnamese dioxin-exposed people.

Lactoferrin or ferrous salts for iron deficiency anemia in pregnancy: A meta-analysis of randomized trials.

Distribution of arsenic and oxidative stress in mice after rice ingestion.

Point-of-use fortification of foods with micronutrient powders containing iron in children of preschool and school-age.

Sodium chloride pica causing recurrent nephrolithiasis in a patient with iron deficiency anemia: a case report.

Dietary nonheme iron is equally bioavailable from ferritin or ferrous sulfate in thalassemia intermedia.

Iron absorption from oral iron supplements given on consecutive versus alternate days and as single morning doses versus twice-daily split dosing in iron-depleted women: two open-label, randomised controlled trials.

Gastrointestinal: Cause or effect: A case of microcytic anemia.

Obesogenic endocrine disruptors and obesity: myths and truths.

Sex-specific differences in effect of prenatal exposure to dioxin-like compounds on neurodevelopment in Japanese children: Sapporo cohort study.

Iron Pharmacokinetics in Women with Iron Deficiency Anaemia Following A Single Oral Dose of a Novel Formulation of Tardyferon (Prolonged Release Ferrous Sulphate).

A Toddler With Severe Anemia, Pica, and Extremity Swelling.

[Sensory axonal polyneuropathy due to 2,4-dinitrophenol].

Mitochondrial uncoupling in the melanocortin system differentially regulates NPY and POMC neurons to promote weight-loss.

Association Between Dioxin and Metabolic Syndrome by Age and Sex in an Endemic Area of Exposure in Taiwan.

Comparison of Different Iron Preparations in the Prophylaxis of Iron-deficiency Anemia.

Iron Supplementation in Twin Pregnancy - The Benefit of Doubling the Iron Dose in Iron Deficient Pregnant Women: A Randomized Controlled Trial.

Consumption of galacto-oligosaccharides increases iron absorption from a micronutrient powder containing ferrous fumarate and sodium iron EDTA: a stable-isotope study in Kenyan infants.

Do PCDD/PCDF standard solutions used in dioxin analysis pose a risk as potentially acutely toxic to lab personnel?

Mixture effects of 30 environmental contaminants on incident metabolic syndrome-A prospective study.

Carnosic Acid Protects Mitochondria of Human Neuroblastoma SH-SY5Y Cells Exposed to Paraquat Through Activation of the Nrf2/HO-1 Axis.

Effects of Orally Ingested Arsenic on Respiratory Epithelial Permeability to Bacteria and Small Molecules in Mice.

Construction of environmental risk score beyond standard linear models using machine learning methods: application to metal mixtures, oxidative stress and cardiovascular disease in NHANES.

Anemia after continuous-flow left ventricular assist device implantation: characteristics and implications.

Dietary Factors Modulate Iron Uptake in Caco-2 Cells from an Iron Ingot Used as a Home Fortificant to Prevent Iron Deficiency.

Recurrent anaemia in a patient with lymphocytic gastritis and vitamin B(12) deficiency.

Chronic exposure of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induces an obesogenic effect in C57BL/6J mice fed a high fat diet.

The anti-migraine component of butterbur extracts, isopetasin, desensitizes peptidergic nociceptors by acting on TRPA1 cation channel.

Antimicrobial agents, triclosan, chloroxylenol, methylisothiazolinone and borax, used in cleaning had genotoxic and histopathologic effects on rainbow trout.

Changes in Serum Adiponectin in Mice Chronically Exposed to Inorganic Arsenic in Drinking Water.

Assessing the Impact of Lithium Chloride on the Expression of P-Glycoprotein at the Blood-Brain Barrier.

Visual light effects on mitochondria: The potential implications in relation to glaucoma.

Metabolic inhibition reduces cardiac L-type Ca²⁺ channel current due to acidification caused by ATP hydrolysis.

Effects of C-Glycosides from *Apios americana* Leaves against Oxidative Stress during Hyperglycemia through Regulating Mitogen-Activated Protein Kinases and Nuclear Factor Erythroid 2-Related Factor 2.

Near infra-red light attenuates corneal endothelial cell dysfunction in situ and in vitro.

An infant and mother with severe B(12) deficiency: vitamin B(12) status assessment should be determined in pregnant women with anaemia.

Broad Spectrum Macromolecular Antimicrobials with Biofilm Disruption Capability and In Vivo Efficacy.

Iron Supplementation, Response in Iron-Deficiency Anemia: Analysis of Five Trials.

Iron bioavailability in iron-fortified cereal foods: The contribution of in vitro studies.

KML001 and doxercalciferol induce synergistic antileukemic effect in acute lymphoid leukemia cells.

[Refractory iron deficiency anaemia].

Amyloid fibril systems reduce, stabilize and deliver bioavailable nanosized iron.

Iron supplementation in singleton pregnancy: Is there a benefit to doubling the dose of elemental iron in iron-deficient pregnant women? a randomized controlled trial.

Forty to fifty-five-year-old women and iron deficiency: clinical considerations and quality of life.

Sulfhaemoglobinaemia caused by ferrous sulfate.

Effect of Low-Dose Ferrous Sulfate vs Iron Polysaccharide Complex on Hemoglobin Concentration in Young Children With Nutritional Iron-Deficiency Anemia: A Randomized Clinical Trial.

The history of arsenical pesticides and health risks related to the use of Agent Blue.

Evaluation of processed borax as antidote for aconite poisoning.

The decreased growth performance and impaired immune function and structural integrity by dietary iron deficiency or excess are associated with TOR, NF- κ B, p38MAPK, Nrf2 and MLCK signaling in head kidney, spleen and skin of grass carp (*Ctenopharyngodon idella*).

Progesterone resistance in endometriosis: origins, consequences and interventions.

Levels and profiles of organohalogenated contaminants in human blood from Egypt.

Oral Iron Treatment Response and Predictors in Anaemic Adolescents and Adults with IBD: A Prospective Controlled Open-Label Trial.

Polychlorinated biphenyls exposure-induced insulin resistance is mediated by lipid droplet enlargement through Fsp27.

Ferric carboxymaltose vs. oral iron in the treatment of pregnant women with iron deficiency anemia: an international, open-label, randomized controlled trial (FER-ASAP).

Oral administration of trace element magnesium significantly improving the cognition and locomotion in hepatic encephalopathy rats.

Sodium azide suppresses LPS-induced expression MCP-1 through regulating $\text{I}\kappa\text{B}\alpha$ and STAT1 activities in macrophages.

Iron Supplements Modulate Colon Microbiota Composition and Potentiate the Protective Effects of Probiotics in Dextran Sodium Sulfate-induced Colitis.

Limited reduction in uremic solute concentrations with increased dialysis frequency and time in the Frequent Hemodialysis Network Daily Trial.

Suppressed erythropoietin expression in a nitrofen-induced congenital diaphragmatic hernia.

DNP, mitochondrial uncoupling, and neuroprotection: A little dab'll do ya.

Ceftriaxone-Induced Hemolytic Anemia in a Jehovah's Witness.

Sustained effectiveness of weekly iron-folic acid supplementation and regular deworming over 6 years in women in rural Vietnam.

Environmental pollutants, a possible etiology for premature ovarian insufficiency: a narrative review of animal and human data.

1,2-Dichloroethane impairs glucose and lipid homeostasis in the livers of NIH Swiss mice.

Iron Deficiency Anemia in Adolescents Who Present with Heavy Menstrual Bleeding.

Comparison of intravenous ferrous sucrose and oral ferrous sulphate in treatment of postpartum iron deficiency anemia.

Strain differences in arsenic-induced oxidative lesion via arsenic biomethylation between C57BL/6J and 129X1/SvJ mice.

A path analysis of multiple neurotoxic chemicals and cognitive functioning in older US adults (NHANES 1999-2002).

Hyperglycemia enhances arsenic-induced platelet and megakaryocyte activation.

Pharmacologic Impact (aka "Breaking Bad") of Medications on Wound Healing and Wound Development: A Literature-based Overview.

Ameliorative effect of two Ayurvedic herbs on experimentally induced arsenic toxicity in calves.

Amelioration of arsenic-induced toxic effects in mice by dietary supplementation of *Syzygium cumini* leaf extract.

Oral antiplatelet agents for the management of acute coronary syndromes: A review for nurses and allied healthcare professionals.

Randomized clinical trial of preoperative oral versus intravenous iron in anaemic patients with colorectal cancer.

Effect of curcumin on kidney histopathological changes, lipid peroxidation and total antioxidant capacity of serum in sodium arsenite-treated mice.

An iron-deficient diet during development induces oxidative stress in relation to age and gender in Wistar rats.

Epidemiology of endometriosis and its comorbidities.

Accelerated Bone Regeneration by Two-Photon Photoactivated Carbon Nitride Nanosheets.

[Uremic toxins and gut micro biome].

[Ferrous sulfate in the treatment of iron deficiency anemia: The positions continue].

Effects of high fat diet and perinatal dioxin exposure on development of body size and expression of platelet-derived growth factor receptor β^2 in the rat brain.

Effect of 2,4-Dinitrophenol preconditioning on the expression levels of mesenchymal markers in neonatal cardiac progenitors.

Dibenzo[def,p]chrysene transplacental carcinogenesis in wild-type, Cyp1b1 knockout, and CYP1B1 humanized mice.

Biomarkers identification by a combined clinical and metabonomics analysis in Henoch-Schonlein purpura nephritis children.

Ion Imbalance Is Involved in the Mechanisms of Liver Oxidative Damage in Rats Exposed to Glyphosate.

Effects of water extracts of *Rehmannia glutinosa* on antioxidant system of Nrf2 in paraquat-induced insulin resistance diabetic rat model.

Mutagenic and genotoxic effects of Anilofos with micronucleus, chromosome aberrations, sister chromatid exchanges and Ames test.

Pesticide incidence in poisoned baits: A 10-year report.

Extensin-4 protects kidney from acute ischemia-reperfusion injury through upregulation of NRF2 signaling.

Aryl Hydrocarbon Receptor Activation Suppresses EBF1 and PAX5 and Impairs Human B Lymphopoiesis.

The protective effect of hydroalcoholic extract of Ginger (*Zingiber officinale* Rosc.) against iron-induced functional and histological damages in rat liver and kidney.

Adverse drug reactions in high-risk pregnant women: A prospective study.

Evaluation of the safety of a genetically modified DAS-444~6-6 soybean meal and hulls in a 90-day dietary toxicity study in rats.

Imbalanced immune responses involving inflammatory molecules and immune-related pathways in the lung of acute and subchronic arsenic-exposed mice.

Assessment of prescribed medications and pattern of distribution for potential drug-drug interactions among chronic kidney disease patients attending the Nephrology Clinic of Lagos University Teaching Hospital in Sub-Saharan West Africa.

Effect of soluble CD14 subtype on the prognosis evaluation of acute paraquat poisoning patients.

The effect of adding ferrous sulfate to methylphenidate on attention-deficit/hyperactivity disorder in children.

Novel Pathways of Ponatinib Disposition Catalyzed By CYP1A1 Involving Generation of Potentially Toxic Metabolites.

Effect of arsenic acid withdrawal on hepatotoxicity and disruption of erythrocyte antioxidant defense system.

No evidence for a link between forest herbicides and offspring sex ratio in a migratory songbird using high-throughput molecular sexing.

Biosensor Technology Reveals the Disruption of the Endothelial Barrier Function and the Subsequent Death of Blood Brain Barrier Endothelial Cells to Sodium Azide and Its Gaseous Products.

Loss of liver-specific and sexually dimorphic gene expression by aryl hydrocarbon receptor activation in C57BL/6 mice.

Alterations in the programming of energy metabolism in adolescents with background exposure to dioxins, dl-PCBs and PBDEs.

Benzene exposure is associated with cardiovascular disease risk.

Acute toxicity of commercial atrazine in *Piaractus mesopotamicus*: Histopathological, ultrastructural, molecular, and genotoxic evaluation.

Inhibition of ALDH2 expression aggravates renal injury in a rat sepsis syndrome model.

Gender-specific association of exposure to non-dioxin-like polychlorinated biphenyls during pregnancy with methylation levels of H19 and long interspersed nuclear element-1 in cord blood in the Hokkaido study.

Incidence and pathological study of *Explanatum explanatum* (Creplin, 1847) Fukui, 1929 in goats in Andhra Pradesh, India.

Haemoglobin site-specifically modified with ferulic acid to suppress the autoxidation.

Ifosfamide-Induced Malignancy of Ureter and Bladder.

Deficiency of long isoforms of Nfe2l1 sensitizes MIN6 pancreatic β^2 cells to arsenite-induced cytotoxicity.

Mixture toxicity of four commonly used pesticides at different effect levels to the epigeic earthworm, *Eisenia fetida*.

Hair analysis for the biomonitoring of pesticide exposure: comparison with blood and urine in a rat model.

Accumulation of Arsenic Speciation and In Vivo Toxicity Following Oral Administration of a Chinese Patent Medicine Xiao-Er-Zhi-Bao-Wan in Rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)-elicited effects on bile acid homeostasis: Alterations in biosynthesis, enterohepatic circulation, and microbial metabolism.

The Association of Combined GSTM1 and CYP2C9 Genotype Status with the Occurrence of Hemorrhagic Cystitis in Pediatric Patients Receiving Myeloablative Conditioning Regimen Prior to Allogeneic Hematopoietic Stem Cell Transplantation.

Predictive values of urine paraquat concentration, dose of poison, arterial blood lactate and APACHE II score in the prognosis of patients with acute paraquat poisoning.

Imperatorin is Transported through Blood-Brain Barrier by Carrier-Mediated Transporters.

Mitochondrial activity and oxidative stress functions are influenced by the activation of AhR-induced CYP1A1 overexpression in cardiomyocytes.

Potential role of heme metabolism in the inducible expression of heme oxygenase-1.

Dermal absorption of fumigant gases during HAZMAT incident exposure scenarios-Methyl bromide, sulfuranyl fluoride, and chloropicrin.

Roselle Polyphenols Exert Potent Negative Inotropic Effects via Modulation of Intracellular Calcium Regulatory Channels in Isolated Rat Heart.

Enhanced electrogenerated chemiluminescence behavior of C(3)N(4) QDs@ C(3)N(4) nanosheet and its signal-on aptasensing for platelet derived growth factor.

Time dependent transition of the levels of protein-conjugated acrolein (PC-Acro), IL-6 and CRP in plasma during stroke.

Evaluation of vascular effect of arsenic using in vivo assays.

Mechanistic insight into the effects of Aryl Hydrocarbon Receptor activation on osteogenic differentiation.

Exposure to endocrine disruptors during adulthood: consequences for female fertility.

A useful way to develop effective in vivo skin optical clearing agents.

Protective effects and functional mechanisms of *Lactobacillus gasseri* SBT2055 against oxidative stress.

Synergistic toxicity and physiological impact of imidacloprid alone and binary mixtures with seven representative pesticides on honey bee (*Apis mellifera*).

Sodium meta-arsenite induced reactive oxygen species in human red blood cells: impaired antioxidant and membrane redox systems, haemoglobin oxidation, and morphological changes.

Current pesticide profiles in blood serum of adults in Jiangsu Province of China and a comparison with other countries.

Fumarate Copolymer-Chitosan Cross-Linked Scaffold Directed to Osteochondrogenic Tissue Engineering.

Ingestion of Bt rice pollen does not reduce the survival or hypopharyngeal gland development of *Apis mellifera* adults.

Diet-induced obesity alters dural CGRP release and potentiates TRPA1-mediated trigeminovascular responses.

Mechanisms of Iron Uptake from Ferric Phosphate Nanoparticles in Human Intestinal Caco-2 Cells.

Subchronic Arsenic Exposure Through Drinking Water Alters Lipid Profile and Electrolyte Status in Rats.

Carnosine Attenuates the Development of both Type 2 Diabetes and Diabetic Nephropathy in BTBR ob/ob Mice.

Mitochondrial damage elicits a TCDD-inducible poly(ADP-ribose) polymerase-mediated antiviral response.

An experimental study of postmortem decomposition of methomyl in blood.

The association of peripubertal serum concentrations of organochlorine chemicals and blood lead with growth and pubertal development in a longitudinal cohort of boys: a review of published results from the Russian Children's Study.

Characterization of E-NTPDase (EC 3.6.1.5) activity in hepatic lymphocytes: A different activity profile from peripheral lymphocytes.

Aryl hydrocarbon receptor activation by 2,3,7,8-tetrachlorodibenzo-p-dioxin impairs human B lymphopoiesis.

Development of Rapid and Economical Colorimetric Screening Method for p-Phenylenediamine in Variety of Biological Matrices and its Application to Eleven Fatal Cases of p-Phenylenediamine Poisoning.

The French human biomonitoring program: First lessons from the perinatal component and future needs.

Biomarker Levels of Toxic Metals among Asian Populations in the United States: NHANES 2011-2012.

Absence of genotoxic effects of the chalcone (E)-1-(2-hydroxyphenyl)-3-(4-methylphenyl)-prop-2-en-1-one) and its potential chemoprevention against DNA damage using in vitro and in vivo assays.

Pharmacodynamics of S-dimethylarsino-glutathione, a putative metabolic intermediate of inorganic arsenic, in mice.

Toxicity studies of o-chloropyridine administered dermally and in drinking water to F344/N rats and B6C3F1/N mice.

Golden Hours in Severe Paraquat Poisoning-The Role of Early Haemoperfusion Therapy.

Arsenic levels among pregnant women and newborns in Canada: Results from the Maternal-Infant Research on Environmental Chemicals (MIREC) cohort.

Comparison of different advanced treatment processes in removing endocrine disruption effects from municipal wastewater secondary effluent.

Review of Advances in Uroprotective Agents for Cyclophosphamide- and Ifosfamide-induced Hemorrhagic Cystitis.

Beta-Glucans Supplementation Associates with Reduction in P-Cresyl Sulfate Levels and Improved Endothelial Vascular Reactivity in Healthy Individuals.

Plant regeneration from embryogenic callus derived from shoot apices and production of transgenic plants by particle inflow gun in dwarf napier grass (*Pennisetum purpureum* Schumach.).

Eryptosis - the Neglected Cause of Anemia in End Stage Renal Disease.

Comparison of the Effects of Iron Oxide, as a New Form of Iron Supplement, and Ferrous Sulfate on the Blood Levels of Iron and Total Iron-Binding Globulin in the Rabbit.

Benefits of Alcohol on Arsenic Toxicity in Rats.

Methanol Extract of *Adansonia digitata* Leaf Protects Against Sodium Arsenite-induced Toxicities in Male Wistar Rats.

Hemoglobins Likely Function as Peroxidase in Blood Clam *Tegillarca granosa* Hemocytes.

The adjuvant use of calcium fructoborate and borax with etanercept in patients with rheumatoid arthritis: Pilot study.

Hepatoprotective and antioxidant effects of dietary Glycyrrhiza polysaccharide against TCDD-induced hepatic injury and RT-PCR quantification of AHR2, ARNT2, CYP1A mRNA in Jian Carp (*Cyprinus carpio* var. Jian).

Occupational exposure to PCDDs, PCDFs, and DL-PCBs in metallurgical plants of the Brescia (Lombardy Region, northern Italy) area.

Cytotoxicity study of benzo[a]pyrene on blood cells of Wistar rat in vitro.

[Dose-effect relationship between vitamin C and paraquat poisoning rats].

Histone deacetylase inhibitors mediate DNA damage repair in ameliorating hemorrhagic cystitis.

The sublethal effects of (2,4-Dichlorophenoxy) acetic acid (2,4-D) on narrow-clawed crayfish (*Astacus leptodactylus* Eschscholtz, 1823).

Carvedilol attenuates paraquat-induced lung injury by inhibition of proinflammatory cytokines, chemokine MCP-1, NF- κ B activation and oxidative stress mediators.

Genotoxic and cytotoxic effects of flumetralin in human peripheral blood lymphocytes in vitro.

Paraquat intoxication and associated pathological findings in three dogs in South Africa.

Prognostic value of hematological parameters in patients with paraquat poisoning.

Herbicide Exposure, Vietnam Service, and Hypertension Risk in Army Chemical Corps Veterans.

The transcription factor, Nuclear factor, erythroid 2 (Nfe2), is a regulator of the oxidative stress response during *Danio rerio* development.

Metabolomics as read-across tool: A case study with phenoxy herbicides.

Methemoglobin measurements are underestimated by the Radical 7 co-oximeter: experience from a series of moderate to severe propanil poisonings.

Effect of atrazine on immunocompetence of red-eared slider turtle (*Trachemys scripta*).

Fresh water fish, *Channa punctatus*, as a model for pendimethalin genotoxicity testing: A new approach toward aquatic environmental contaminants.

Salvianolic acid B protects against paraquat-induced pulmonary injury by mediating Nrf2/Nox4 redox balance and TGF- β 1/Smad3 signaling.

Health effect of agricultural pesticide use in China: implications for the development of GM crops.

Effects of terbutylazine-desethyl, a terbutylazine degradation product, on red swamp crayfish (*Procambarus clarkii*).

Acute Acrolein Exposure Induces Impairment of Vocal Fold Epithelial Barrier Function.

Mechanism-specific injury biomarkers predict nephrotoxicity early following glyphosate surfactant herbicide (GPSH) poisoning.

Atrazine in public water supplies and risk of ovarian cancer among postmenopausal women in the Iowa Women's Health Study.

Genotoxic effect of a binary mixture of dicamba- and glyphosate-based commercial herbicide formulations on *Rhinella arenarum* (Hensel, 1867) (Anura, Bufonidae) late-stage larvae.

Poly-ADP-ribose polymerase inhibition provides protection against lung injury in a rat paraquat toxicity model.

High-Concentration L-Menthol Exhibits Counter-Irritancy to Neurogenic Inflammation, Thermal and Mechanical Hyperalgesia Caused by Trans-cinnamaldehyde.

The Protective Role of Thiourea on *Leuciscus cephalus* Exposed to Sublethal Doses of Pendigan 330EC (Pendimethalin) Herbicide.

A bedside test for methaemoglobinemia improved antidote use in propanil poisoning.

Lycopene ameliorates atrazine-induced oxidative damage in adrenal cortex of male rats by activation of the Nrf2/HO-1 pathway.

Potential subchronic food safety of the stacked trait transgenic maize GH5112E-117C in Sprague-Dawley rats.

Determination of glyphosate and its metabolite in emergency room in Korea.

[Clinical effect of compound monoammonium glycyrrhizinate combined with dandelion in treatment of acute paraquat poisoning].

[Risk factors for pulmonary fibrosis in patients with paraquat poisoning].

[An analysis of the clinical and epidemiological characteristics of acute poisoning patients in a general hospital].

Prognosis and survival analysis of paraquat poisoned patients based on improved HPLC-UV method.

Evaluation of the effect of 2,4-dichlorophenol on oxidative parameters and viability of human blood mononuclear cells (in vitro).

Glyphosate and adverse pregnancy outcomes, a systematic review of observational studies.

Effect of glyphosate on reproductive organs in male rat.

Genotoxicity induced by Roundup® (Glyphosate) in tegu lizard (*Salvator merianae*) embryos.

Toxic and genotoxic effects of the 2,4-dichlorophenoxyacetic acid (2,4-D)-based herbicide on the Neotropical fish *Cnesterodon decemmaculatus*.

Imazapyr+imazapic herbicide determines acute toxicity in silver catfish *Rhamdia quelen*.

The metabolite 3,4,3',4'-tetrachloroazobenzene (TCAB) exerts a higher ecotoxicity than the parent compounds 3,4-dichloroaniline (3,4-DCA) and propanil.

Effects of glyphosate on hepatic tissue evaluating melanomacrophages and erythrocytes responses in neotropical anuran *Leptodactylus latinasus*.

Multifactorial theory applied to the neurotoxicity of paraquat and paraquat-induced mechanisms of developing Parkinson's disease.

Intravenous lipid emulsion in treatment of cardiocirculatory disturbances caused by glyphosate-surfactant herbicide poisoning.

Acute paraquat exposure determines dose-dependent oxidative injury of multiple organs and metabolic dysfunction in rats: impact on exercise tolerance.

Lycopene protects against atrazine-induced hepatotoxicity through modifications of cytochrome P450 enzyme system in microsomes.

Influence of dioxin exposure upon levels of prostate-specific antigen and steroid hormones in Vietnamese men.

Unfractionated bone marrow cells attenuate paraquat-induced glomerular injury and acute renal failure by modulating the inflammatory response.

Cytotoxicity of Thirdhand Smoke and Identification of Acrolein as a Volatile Thirdhand Smoke Chemical That Inhibits Cell Proliferation.

Mechanism of Developmental Effects in Rats Caused by an N-Phenylimide Herbicide: Transient Fetal Anemia and Sequelae during Mid-to-Late Gestation.

Rat and poultry feeding studies with soybean meal produced from imidazolinone-tolerant (CV127) soybeans.

Common and distinct mechanisms of induced pulmonary fibrosis by particulate and soluble chemical fibrogenic agents.

Toxicological effects of pet food ingredients on canine bone marrow-derived mesenchymal stem cells and enterocyte-like cells.

Immunotoxicity of commercial-mixed glyphosate in broad snouted caiman (*Caiman latirostris*).

Multiple biomarker responses in *Prochilodus lineatus* subjected to short-term in situ exposure to streams from agricultural areas in Southern Brazil.

Radix puerariae extracts ameliorate paraquat-induced pulmonary fibrosis by attenuating follistatin-like 1 and nuclear factor erythroid 2p45-related factor-2 signalling pathways through downregulation of miRNA-21 expression.

Early Stage Blood Purification for Paraquat Poisoning: A Multicenter Retrospective Study.

Systematic review and meta-analysis of glyphosate exposure and risk of lymphohematopoietic cancers.

[The protective effect of bone marrow mesenchymal stem cells carrying antioxidant gene superoxide dismutase on paraquat lung injury in mice].

Paraquat induce pulmonary epithelial-mesenchymal transition through transforming growth factor- β 1-dependent mechanism.

Assessing the potential for intrinsic recovery in a Collembola two-generation study: possible implementation in a tiered soil risk assessment approach for plant protection products.

Suspected poisoning of domestic animals by pesticides.

Comparative toxicity of Paraquat herbicide and some plant extracts in *Lymnaea natalensis* snails.

Transient receptor potential ankyrin 1 agonists improve intestinal transit in a murine model of postoperative ileus.

Novel broad-spectrum and long-acting parenteral cephalosporins having an acyl cyanamide moiety at the C-3 terminal: Synthesis and structure-activity relationships.

A neoflavonoid dalsissoal isolated from heartwood of *Dalbergia sissoo* Roxb. has bone forming effects in mice model for osteoporosis.

Trans-cinnamaldehyde protected PC12 cells against oxygen and glucose deprivation/reperfusion (OGD/R)-induced injury via anti-apoptosis and anti-oxidative stress.

Cinnamaldehyde derivatives inhibit degranulation and inflammatory mediator production in rat basophilic leukemia cells.

Trans-Cinnamaldehyde, An Essential Oil in Cinnamon Powder, Ameliorates Cerebral Ischemia-Induced Brain Injury via Inhibition of Neuroinflammation Through Attenuation of iNOS, COX-2 Expression and NF- κ -B Signaling Pathway.

Reversal of diabetes-induced behavioral and neurochemical deficits by cinnamaldehyde.

Derivatization Strategy for the Comprehensive Characterization of Endogenous Fatty Aldehydes Using HPLC-Multiple Reaction Monitoring.

Albumin Cys34 adducted by acrolein as a marker of oxidative stress in ischemia-reperfusion injury during hepatectomy.

Membrane lipid peroxidation in neurodegeneration: Role of thrombin and proteinase-activated receptor-1.

Simultaneous Determination and Quantitation of Paraquat, Diquat, Glufosinate and Glyphosate in Postmortem Blood and Urine by LC-MS-MS.

Roles of catalase and glutathione peroxidase in the tolerance of a pulmonate gastropod to anoxia and reoxygenation.

Arsenic Metabolism in Children Differs From That in Adults.

Cinnamaldehydes in Cancer Chemotherapy.

Aggravation of brain infarction through an increase in acrolein production and a decrease in glutathione with aging.

Inhibition of para-Hydroxyphenylpyruvate Dioxygenase by Analogues of the Herbicide Nitrofen As a Strategy to Decrease Homogentisic Acid Levels, the Causative Agent of Alkaptonuria.

HIF-1 α regulates EMT via the Snail and β -catenin pathways in paraquat poisoning-induced early pulmonary fibrosis.

Impact of 3-Amino-1,2,4-Triazole (3-AT)-Derived Increase in Hydrogen Peroxide Levels on Inflammation and Metabolism in Human Differentiated Adipocytes.

[The effect of antioxidants on in vivo and in vitro methemoglobin formation in erythrocytes of patients with Parkinson's disease].

Structural and biochemical abnormalities in the absence of acute deficits in mild primary blast-induced head trauma.

Resveratrol protects mice from paraquat-induced lung injury: The important role of SIRT1 and NRF2 antioxidant pathways.

Exceptions in patterns of arsenic compounds in urine of acute promyelocytic leukaemia patients treated with As₂O₃.

Novel Role of Endogenous Catalase in Macrophage Polarization in Adipose Tissue.

Toxic acrolein production due to Ca²⁺ influx by the NMDA receptor during stroke.

[Effect of heme oxygenase-1 transduced by cell penetrating peptide PEP-1 on renal injury in rats with acute paraquat poisoning].

Is there a relationship between tea intake and maternal whole blood heavy metal concentrations?

Study of allelopathic effects of Eucalyptus erythrocorys L. crude extracts against germination and seedling growth of weeds and wheat.

TRPA1 activation leads to neurogenic vasodilatation: involvement of reactive oxygen nitrogen species in addition to CGRP and NO.

Engineering Enriched Microenvironments with Gradients of Platelet Lysate in Hydrogel Fibers.

The Impact of Glyphosate, Its Metabolites and Impurities on Viability, ATP Level and Morphological changes in Human Peripheral Blood Mononuclear Cells.

Assessment of tick antioxidant responses to exogenous oxidative stressors and insight into the role of catalase in the reproductive fitness of the Gulf Coast tick, *Amblyomma maculatum*.

Effects of TRP channel agonist ingestion on metabolism and autonomic nervous system in a randomized clinical trial of healthy subjects.

Cytoprotective Effect of Makgeolli Lees on Paraquat Induced Oxidative Stress in A549 Cells via Activation of NRF2 and Antioxidant Genes.

Serum concentrations of chlorinated dibenzo-p-dioxins, furans and PCBs, among former phenoxy herbicide production workers and firefighters in New Zealand.

Anti-oxidative and anti-inflammatory effects of cinnamaldehyde on protecting high glucose-induced damage in cultured dorsal root ganglion neurons of rats.

Candesartan ameliorates arsenic-induced hypertensive vascular remodeling by regularizing angiotensin II and TGF-beta signaling in rats.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) role in hematopoiesis and in hematologic diseases: A critical review.

A characteristic biosignature for discrimination of gastric cancer from healthy population by high throughput GC-MS analysis.

Disseminated tungiasis in a 78-year-old woman from Tanzania: a case report.

Semilobar holoprosencephaly in a 12-month-old baby boy born to a primigravida patient with type 1 diabetes mellitus: a case report.

The Role of Mitochondrial Aldehyde Dehydrogenase 2 (ALDH2) in Neuropathology and Neurodegeneration.

Estrogen receptor- α and aryl hydrocarbon receptor involvement in the actions of botanical estrogens in target cells.

Early Changes of Peripheral Blood Lymphocyte Subpopulations in Patients with Occupational 2,4-dinitrophenol Poisoning.

Mortality risk among workers with exposure to dioxins.

Protein-bound toxins: has the Cinderella of uraemic toxins turned into a princess?

Inhibitory effects of norlignans isolated from *Anemarrhena asphodeloides* on degranulation of rat basophilic leukemia- α 3 cells.

Pomegranate protects against arsenic-induced p53-dependent ROS-mediated inflammation and apoptosis in liver cells.

From the Cover: Coagulation-Driven Hepatic Fibrosis Requires Protease Activated Receptor-1 (PAR-1) in a Mouse Model of TCDD-Elicited Steatohepatitis.

Association between dioxin and cancer incidence and mortality: a meta-analysis.

Oral Toxicity of 2,4-Dinitroanisole in Rats.

Effects of wheat-flour biscuits fortified with iron and EDTA, alone and in combination, on blood lead concentration, iron status, and cognition in children: a double-blind randomized controlled trial.

Passive exposure to agricultural pesticides and risk of childhood leukemia in an Italian community.

Phase I and pharmacokinetic evaluation of the anti-telomerase agent KML-001 with cisplatin in advanced solid tumors.

Pesticide exposure and thyroid function in an agricultural population in Brazil.

Can Iron Treatments Aggravate Epistaxis in Some Patients With Hereditary Hemorrhagic Telangiectasia?

Electrophoretic stacking for sensitive determination of antibiotic ceftazidime in human blood and microdialysates from diabetic foot.

Combination screening in vitro identifies synergistically acting KP372-1 and cytarabine against acute myeloid leukemia.

Carbamylated Low-Density Lipoproteins Induce a Prothrombotic State Via LOX-1: Impact on Arterial Thrombus Formation In Vivo.

Effect and safety of Shengxuening (extract from excrement of bombyxin) for renal anemia: a systematic review.

Pseudomelanosis duodeni: is there a common denominator?

Atorvastatin attenuates cresyl sulfate-induced atherogenesis and plaque instability in ApoE knockout mice.

Efficacy and safety of adjuvant recombinant human erythropoietin and ferrous sulfate as treatment for iron deficiency anemia during the third trimester of pregnancy.

The effects of fat loss after bariatric surgery on inflammation, serum hepcidin, and iron absorption: a prospective 6-mo iron stable isotope study.

Preconditioning of mesenchymal stem cells with 2,4-dinitrophenol improves cardiac function in infarcted rats.

Arsenite inhibits the function of CD133(+) CD13(+) liver cancer stem cells by reducing PML and Oct4 protein expression.

Hypoxic Preconditioning Improves the Therapeutic Potential of Aging Bone Marrow Mesenchymal Stem Cells in Streptozotocin-Induced Type-1 Diabetic Mice.

Relationship of polychlorinated biphenyls (PCBs) with parasitism, iron homeostasis, and other health outcomes: Results from a cross-sectional study on recently arrived African immigrants.

Medical histories.

Common Bean Leaves as a Source of Dietary Iron: Functional Test in an Iron-Deficient Rat Model.

Osler-Weber-Rendu syndrome.

Red light of the visual spectrum attenuates cell death in culture and retinal ganglion cell death in situ.

Enhanced Pulmonary Vascular and Alveolar Development via Prenatal Administration of a Slow-Release Synthetic Prostacyclin Agonist in Rat Fetal Lung Hypoplasia.

Could the erythrocyte indices or serum ferritin predict the therapeutic response to a trial with oral iron during pregnancy? Results from the Accuracy study for Maternal Anaemia diagnosis (AMA).

Fowler's Solution and the Evolution of the Use of Arsenic in Modern Medicine.

A bedside test for methemoglobinemia, Sri Lanka.

Heme Iron Concentrate and Iron Sulfate Added to Chocolate Biscuits: Effects on Hematological Indices of Mexican Schoolchildren.

TCDD modulation of gut microbiome correlated with liver and immune toxicity in streptozotocin (STZ)-induced hyperglycemic mice.

Protective effect of prostacyclin against pre-cardiac edema caused by 2,3,7,8-tetrachlorodibenzo-p-dioxin and a thromboxane receptor agonist in developing zebrafish.

Endometrial expression and in vitro modulation of the iron transporter divalent metal transporter-1: implications for endometriosis.

Comparison of the Efficacies of Parenteral Iron Sucrose and Oral Iron Sulfate for Anemic Patients with Inflammatory Bowel Disease in Korea.

Effects of Fe-YM1504 on iron deficiency anemia in rats.

METABOLIC DYSBIOSIS OF THE GUT MICROBIOTA AND ITS BIOMARKERS.

Previously Unclassified Mutation of mtDNA m.3472T>C: Evidence of Pathogenicity in Leber's Hereditary Optic Neuropathy.

[Acute poisoning by pesticides in children].

Endocrine-disrupting chemicals, risk of type 2 diabetes, and diabetes-related metabolic traits: A systematic review and meta-analysis.

Tracheal occlusion and ventilation changes the nitric oxide pathway in congenital diaphragmatic hernia model.

Is selective prenatal iron prophylaxis better than routine prophylaxis: final results of a trial (PROFEG) in Maputo, Mozambique.

Effect of colestimide on the concentrations of polychlorinated dibenzo-p-dioxins, polychlorinated dioxofurans, and polychlorinated biphenyls in blood of Yusho patients.

Associations among chronic kidney disease, high total p-cresylsulfate and left ventricular systolic dysfunction.

Combined antenatal therapy with retinoic acid and tracheal occlusion in a rat model of congenital diaphragmatic hernia.

Association of dioxins, furans and dioxin-like PCBs in human blood with nephropathy among US teens and young adults.

The effect of ferrous-chelating hairtail peptides on iron deficiency and intestinal flora in rats.

Definite hereditary hemorrhagic telangiectasia in a 60-year-old black Kenyan woman: a case report.

Embryo Microinjection of Selenomethionine Reduces Hatchability and Modifies Oxidant Responsive Gene Expression in Zebrafish.

[Clinical value of serum presepsin (SCD14-ST) concentration measurement in patients with pesticide poisoning].

The effect of a vegetarian versus conventional hypocaloric diet on serum concentrations of persistent organic pollutants in patients with type 2 diabetes.

Resistant starch alters gut microbiome and metabolomic profiles concurrent with amelioration of chronic kidney disease in rats.

Ah receptor expression in cardiomyocytes protects adult female mice from heart dysfunction induced by TCDD exposure.

Repurposing an orally available drug for the treatment of geographic atrophy.

Effective Valsalva maneuvering during TCCD and unrevealed etiology of RLS.

A Randomized Noninferiority Trial of Intravenous Iron Isomaltoside versus Oral Iron Sulfate in Patients with Nonmyeloid Malignancies and Anemia Receiving Chemotherapy: The PROFOUND Trial.

Antimicrobial films obtained from latex particles functionalized with quaternized block copolymers.

SCO₂ Mediates Oxidative Stress-Induced Glycolysis to Oxidative Phosphorylation Switch in Hematopoietic Stem Cells.

Association between Blood Dioxin Level and Chronic Kidney Disease in an Endemic Area of Exposure.

TCDD-Induced Activation of Aryl Hydrocarbon Receptor Inhibits Th17 Polarization and Regulates Non-Eosinophilic Airway Inflammation in Asthma.

Effects of Dang-Gui-Bu-Xue-Tang, an herbal decoction, on iron uptake in iron-deficient anemia.

Iron Treatment Strategies in Nondialysis CKD.

Evaluation of Safety of Iron-Fortified Soybean Sprouts, a Potential Component of Functional Food, in Rat.

Effects of in Utero Exposure to Arsenic during the Second Half of Gestation on Reproductive End Points and Metabolic Parameters in Female CD-1 Mice.

5-Aminolevulinic acid combined with ferrous iron ameliorate ischemia-reperfusion injury in the mouse fatty liver model.

[Not Available].

Sulforaphane exerts its anti-inflammatory effect against amyloid- β^2 peptide via STAT-1 dephosphorylation and activation of Nrf2/HO-1 cascade in human THP-1 macrophages.

Hemocompatibility evaluation for peptide fragments of human serum albumin cleaved by cyanogens bromide.

Effects of a Tripeptide Iron on Iron-Deficiency Anemia in Rats.

Cottonseed Oil in Diets for Broilers in the Pre-Starter and Starter Phases.

A procoagulant chemically sulfated mannan.

Activation of ALDH2 with Low Concentration of Ethanol Attenuates Myocardial Ischemia/Reperfusion Injury in Diabetes Rat Model.

Management and Treatment of Human Lice.

Increased Levels of Total p-Cresylsulfate Are Associated with Pruritus in Patients with Chronic Kidney Disease.

Antipyretic and antimalarial activities of *Solenostemon monostachyus*.

How we diagnose and treat iron deficiency anemia.

PCB126-Induced Disruption in Gluconeogenesis and Fatty Acid Oxidation Precedes Fatty Liver in Male Rats.

Micronucleus frequency in Danish schoolchildren and their mothers from the DEMOCOPHES population.

Protective Effects of Combined Selenium and *Punica granatum* Treatment on Some Inflammatory and Oxidative Stress Markers in Arsenic-Induced Hepatotoxicity in Rats.

Lactoferrin versus ferrous sulphate for the treatment of iron deficiency anemia during pregnancy: a randomized clinical trial.

Pharmacokinetics of Ferrous Sulphate (Tardyferon[®]) after Single Oral Dose Administration in Women with Iron Deficiency Anaemia.

Olive oil and its phenolic compounds (hydroxytyrosol and tyrosol) ameliorated TCDD-induced hepatotoxicity in rats via inhibition of oxidative stress and apoptosis.

Oxidative stress-related liver dysfunction by sodium arsenite: Alleviation by *Pistacia lentiscus* oil.

Influence of LED light spectra on in vitro somatic embryogenesis and LC-MS analysis of chlorogenic acid and rutin in *Peucedanum japonicum* Thunb.: a medicinal herb.

Low-Chlorinated Non-Dioxin-like Polychlorinated Biphenyls Present in Blood and Breast Milk Induce Higher Levels of Reactive Oxygen Species in Neutrophil Granulocytes than High-Chlorinated Congeners.

Differences in the clinical manifestations and short-term prognosis of acute cerebral infarction after exposure to Agent Orange.

Activation of Nrf2-ARE signaling mitigates cyclophosphamide-induced myelosuppression.

Relative effect potency estimates of dioxin-like activity for dioxins, furans, and dioxin-like PCBs in adults based on cytochrome P450 1A1 and 1B1 gene expression in blood.

TRIB3 increases cell resistance to arsenite toxicity by limiting the expression of the glutathione-degrading enzyme CHAC1.

Dietary Omega-3 Polyunsaturated Fatty Acids Prevent Vascular Dysfunction and Attenuate Cytochrome P4501A1 Expression by 2,3,7,8-Tetrachlorodibenzo-P-Dioxin.

Dietary Route of Exposure for Rabbit Developmental Toxicity Studies.

The Effects of Nanoparticles Containing Iron on Blood and Inflammatory Markers in Comparison to Ferrous Sulfate in Anemic Rats.

Dialysis catheter-related pulmonary embolism in a patient with paraquat intoxication.

Simultaneous analysis of neutral monosaccharides, fatty acids and cholesterol as biomarkers from a drop of blood.

Fitness costs of herbicide resistance across natural populations of the common morning glory, *Ipomoea purpurea*.

Formyl peptide receptor modulators: a patent review and potential applications for inflammatory diseases (2012-2015).

Cigarette smoking behaviour and blood metabolomics.

[Effects of chronic exposure to monochloroacetic acid on the lung function and lymphocyte subsets in occupational exposed workers].

Diminished Phosphorylation of CREB Is a Key Event in the Dysregulation of Gluconeogenesis and Glycogenolysis in PCB126 Hepatotoxicity.

Vam3, a Compound Derived from *Vitis amurensis* Rupr., Attenuated Colitis-Related Tumorigenesis by Inhibiting NF- κ B Signaling Pathway.

Change in decay rates of dioxin-like compounds in Yusho patients.

Preparation and Bioavailability Analysis of Ferrous Bis Alanine Chelate as a New Micronutrient for Treatment of Iron Deficiency Anemia.

Specific carotenoid pigments in the diet and a bit of oxidative stress in the recipe for producing red carotenoid-based signals.

Arsenite suppresses angiogenesis of vascular endothelial cells mediated by Platelet Derived Growth Factor Receptor-beta.

A resurrection experiment finds evidence of both reduced genetic diversity and potential adaptive evolution in the agricultural weed *Ipomoea purpurea*.

Perinatal exposure to dioxins and dioxin-like compounds and infant growth and body mass index at seven years: A pooled analysis of three European birth cohorts.

Plasma metabolomics study on toxicity biomarker in rats treated with *Euphorbia fischeriana* based on LC-MS.

Exposure to Inorganic Arsenic Is Associated with Increased Mitochondrial DNA Copy Number and Longer Telomere Length in Peripheral Blood.

Tyrosine Detoxification Is an Essential Trait in the Life History of Blood-Feeding Arthropods.

Sulforaphane protects against acrolein-induced oxidative stress and inflammatory responses: modulation of Nrf-2 and COX-2 expression.

Toxicity of 3,5,6-trichloro-2-pyridinol tested at multiple stages of zebrafish (*Danio rerio*) development.

Optical coherence tomography angiography offers comprehensive evaluation of skin optical clearing in vivo by quantifying optical properties and blood flow imaging simultaneously.

On the Utility of ToxCast[®], ToxPi as Methods for Identifying New Obesogens.

Acute Copper and Ascorbic Acid Supplementation Inhibits Non-heme Iron Absorption in Humans.

Multi-tissue metabolic responses of goldfish (*Carassius auratus*) exposed to glyphosate-based herbicide.

Influence of Thromboxane A₂ on the Regulation of Adenosine Triphosphate-Sensitive Potassium Channels in Mouse Ventricular Myocytes.

Evaluation of the Sebia Capillarys 3 Tera and the Bio-Rad D-100 Systems for the Measurement of Hemoglobin A_{1c}.

Boron influences immune and antioxidant responses by modulating hepatic superoxide dismutase activity under calcium deficit abiotic stress in Wistar rats.

Oleuropein ameliorates arsenic induced oxidative stress in mice.

Occurrence of chlorinated and brominated dioxins/furans, PCBs, and brominated flame retardants in blood of German adults.

A double-blind, randomized, and active-controlled phase III study of Herbiron drink in the treatment of iron-deficiency anemia in premenopausal females in Taiwan.

Evaluation of relative effect potencies (REPs) for dioxin-like compounds to derive systemic or human-specific TEFs to improve human risk assessment.

Evaluation of an extraction method for a mixture of endocrine disruptors in sediment using chemical and in vitro biological analyses.

Structural Modifications to Quaternary Ammonium Polymer Coagulants to Inhibit N-Nitrosamine Formation.

Toxicity studies of sodium thioglycolate administered dermally to F344/N rats and B6C3F₁/N mice.

Nanoallergens: A multivalent platform for studying and evaluating potency of allergen epitopes in cellular degranulation.

Evaluation of toxicological biomarkers in secreted proteins of HepG2 cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin and their expressions in the plasma of rats and incineration workers.

Evaluation of toxicity and genotoxicity of 2-chlorophenol on bacteria, fish and human cells.

Studies of Hematopoietic Cell Differentiation with a Ratiometric and Reversible Sensor of Mitochondrial Reactive Oxygen Species.

Effect of Acetyl-L-Carnitine on Antioxidant Status, Lipid Peroxidation, and Oxidative Damage of Arsenic in Rat.

Aortic smooth muscle cell alterations in mice systemically exposed to arsenic.

Highly Selective Fluorescence Determination of the Hematin Level in Human Erythrocytes with No Need for Separation from Bulk Hemoglobin.

Cis-vaccenic acid induces differentiation and up-regulates gamma globin synthesis in K562, JK1 and transgenic mice erythroid progenitor stem cells.

Rabbit syndrome after taking herbicide containing 2-(4-chloro-2-methylphenoxypropionic) acid.

The Effect of Noscipine on Oxygen-Glucose Deprivation on Primary Murine Cortical Neurons in High Glucose Condition.

High efficient somatic embryogenesis development from leaf cultures of *Citrullus colocynthis* (L.) Schrad for generating true type clones.

Treatment of Resistant Cyclophosphamide Induced Haemorrhagic Cystitis: Review of Literature and Three Case Reports.

Development of a cell line from the American eel brain expressing endothelial cell properties.

Short Chemical Ischemia Triggers Phosphorylation of eIF2 α and Death of SH-SY5Y Cells but not Proteasome Stress and Heat Shock Protein Response in both SH-SY5Y and T98G Cells.

Nanopharmaceutical Approach for Enhanced Anti-cancer Activity of Betulinic Acid in Lung-cancer Treatment via Activation of PARP: Interaction with DNA as a Target: -Anti-cancer Potential of Nano-betulinic Acid in Lung Cancer.

Acute Sodium Arsenite-Induced Hematological and Biochemical Changes in Wistar Rats: Protective Effects of Ethanol Extract of *Ageratum conyzoides*.

Attenuation of hepatotoxicity and oxidative stress in diabetes STZ-induced type 1 by biotin in Swiss albino mice.

2,3,7,8-TCDD-mediated toxicity in peripheral blood mononuclear cells is alleviated by the antioxidants present in *Gelidiella acerosa*: an in vitro study.

Arsenic and smokeless tobacco induce genotoxicity, sperm abnormality as well as oxidative stress in mice in vivo.

Non-dioxin-like Polychlorinated Biphenyls (PCBs) and Chlordecone Release from Adipose Tissue to Blood in Response to Body Fat Mobilization in Ewe (*Ovis aries*).

Redirection of metabolite biosynthesis from hydroxybenzoates to volatile terpenoids in green hairy roots of *Daucus carota*.

Is Routine Iron Supplementation Necessary in Pregnant Women With High Hemoglobin?

Evaluation of serum markers of blood redox homeostasis and inflammation in PCB naturally contaminated heifers undergoing decontamination.

Facile fabrication of an aptasensor for thrombin based on graphitic carbon nitride/TiO₂ with high visible-light photoelectrochemical activity.

Astaxanthin Inhibits Expression of Retinal Oxidative Stress and Inflammatory Mediators in Streptozotocin-Induced Diabetic Rats.

Arsenic induced hematological and biochemical responses in nutritionally important catfish *Clarias batrachus* (L.).

PAHs Target Hematopoietic Lineages in Bone Marrow through Cyp1b1 Primarily in Mesenchymal Stromal Cells but Not AhR: A Reconstituted In Vitro Model.

Synthesis, Cytotoxic Activity on Leukemia Cell Lines and Quantitative Structure-Activity Relationships (QSAR) Studies of Morita-Baylis-Hillman Adducts.

Evaluation and modeling of the impact of coexposures to VOC mixtures on urinary biomarkers.

Qualitative/Chemical Analyses of Ankaferd Hemostat and Its Antioxidant Content in Synthetic Gastric Fluids.

Toxicokinetics of paraquat in Korean patients with acute poisoning.

Severe Endobronchial Inflammation Induced by Aspiration of a Ferrous Sulfate Tablet.

The onset of lipid peroxidation in rheumatoid arthritis: consequences and monitoring.

Sensitivity of KATP channels to cellular metabolic disorders and the underlying structural basis.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the development and function of the blood-brain barrier.

Tick-borne encephalitis--lipid peroxidation and its consequences.

Assessment of the genotoxic potential along the Danube River by application of the comet assay on haemocytes of freshwater mussels: The Joint Danube Survey 3.

Cytotoxic and apoptotic effects of boron compounds on leukemia cell line.

Analysis of Moms Across America report suggesting bioaccumulation of glyphosate in U.S. mother's breast milk: Implausibility based on inconsistency with available body of glyphosate animal toxicokinetic, human biomonitoring, and physico-chemical data.

A Potential Role for Acrolein in Neutrophil-Mediated Chronic Inflammation.

Oral exposure of pubertal male mice to endocrine-disrupting chemicals alters fat metabolism in adult livers.

Bioaccumulation and neurotoxicity of dithiopyridine herbicide in the brain of freshwater fish, *Cyprinus carpio*.

Abnormal pancreatic enzymes and their prognostic role after acute paraquat poisoning.

[Analysis of risk factors for prognosis of patients with acute paraquat intoxication].

Continuous IV infusion of MESNA can prevent hemorrhagic cystitis in HSCT and retain MESNA concentration in urine.

Agent Orange Exposure and Monoclonal Gammopathy of Undetermined Significance: An Operation Ranch Hand Veteran Cohort Study.

Dual regulation of skin sensitizer-induced HMOX1 expression by Bach1 and Nrf2: Comparison to regulation of the AKR1C2-ARE element in the KeratinoSens cell line.

Environmentally Relevant Concentrations of Atrazine and Ametryn Induce Micronuclei Formation and Nuclear Abnormalities in Erythrocytes of Fish.

Sensitization of the trigeminovascular system following environmental irritant exposure.

[Intensive hemoperfusion and long-term hemofiltration for treatment of paraquat poisoning: a case report].

The Air Force Health Study Data and Specimens as a Resource for Researchers.

L-Glutamate Enhances Barrier and Antioxidative Functions in Intestinal Porcine Epithelial Cells.

Toxicological evaluation of ametryn effects in Wistar rats.

Molecular characterization of heat-shock protein 90 gene and its expression in *Gobiocypris rarus* juveniles exposed to pentachlorophenol.

Cardiotoxic Electrophysiological Effects of the Herbicide Roundup(®) in Rat and Rabbit Ventricular Myocardium In Vitro.

Kidney damage biomarkers detect acute kidney injury but only functional markers predict mortality after paraquat ingestion.

[Case of paraquat poisoning and diazepam poisoning inducing pulmonary embolism].

[The prevention and therapeutics effect of sodium bicarbonate with gastric lavage, atomization inhalation and intravenous injection on the patients with paraquat poisoning and pulmonary fibrosis induced by paraquat poisoning].

[Changes of CD(4)(+) Foxp3+ regulatory T cells and CD(4)(+)IL-17+T cells in acrolein exposure rats].

RETRACTED: Glyphosate herbicide induces genotoxic effect and physiological disturbances in *Bulinus truncatus* snails.

Toxic and genotoxic effects of the imazethapyr-based herbicide formulation Pivot H[®] on monteideo tree frog *Hypsiboas pulchellus* tadpoles (Anura, Hylidae).

Roundup[®] exposure promotes gills and liver impairments, DNA damage and inhibition of brain cholinergic activity in the Amazon teleost fish *Colossoma macropomum*.

Genotoxicity evaluation of the herbicide Garlon([®]) and its active ingredient (triclopyr) in fish (*Anguilla anguilla* L.) using the comet assay.

Transcriptome profile analysis reflects rat liver and kidney damage following chronic ultra-low dose Roundup exposure.

Acute eosinophilic pneumonia associated with glyphosate-surfactant exposure.

Hepatotoxicity of herbicide Sencor in goldfish may result from induction of mild oxidative stress.

Glyphosate and dicamba herbicide tank mixture effects on native plant and non-genetically engineered soybean seedlings.

Mercapturic Acids Derived from the Toxicants Acrolein and Crotonaldehyde in the Urine of Cigarette Smokers from Five Ethnic Groups with Differing Risks for Lung Cancer.

[Clinical significance of serum amylase and lipase in patients with acute paraquat poisoning].

Teratogenicity, genotoxicity and oxidative stress in zebrafish embryos (*Danio rerio*) co-exposed to arsenic and atrazine.

Glutathione S-transferase P protects against cyclophosphamide-induced cardiotoxicity in mice.

Effects of (Anti) Androgenic Endocrine Disruptors (DEHP and Butachlor) on Immunoglobulin M (IgM) and Leukocytes Counts of Male Rainbow Trout (*Oncorhynchus mykiss*).

Transcriptional profiling of the soil invertebrate *Folsomia candida* in pentachlorophenol-contaminated soil.

Soft tissue sarcoma, non-Hodgkin's lymphoma and chronic lymphocytic leukaemia in workers exposed to phenoxy herbicides: extended follow-up of a UK cohort.

Adiponectin attenuates lung fibroblasts activation and pulmonary fibrosis induced by paraquat.

[The study of kidney injury in rats with acute paraquat poisoning].

Toxicity of *Spide 480SL*[®] spray mixture formulation of glyphosate to aquatic organisms.

[The first aid effect of blood perfusion 3-2-1-1 program and its prognosis on paraquat poisoned patients].

[Expression of heme oxygenase-1 in lung tissue of paraquat poisoned mice and its significance].

[Inhibition of pulmonary nuclear factor- κ B and tumor necrosis factor- α expression by diallyl sulfide in rats with paraquat poisoning].

[Intensity of hemoperfusion in acute paraquat-poisoned patients and analysis of prognosis].

[Effect of rhubarb as the main composition of sequential treatment in patients with acute paraquat poisoning: a prospective clinical research].

An efficient machine learning approach for diagnosis of paraquat-poisoned patients.

Commercial formulation containing 2,4-D affects biochemical parameters and morphological indices of silver catfish exposed for 90 days.

Occupational exposure to pentachlorophenol causing lymphoma and hematopoietic malignancy for two generations.

Mechanisms underlying early rapid increases in creatinine in paraquat poisoning.

Polyphenol extract from *Phellinus igniarius* protects against acrolein toxicity in vitro and provides protection in a mouse stroke model.

The significance of serum uric acid level in humans with acute paraquat poisoning.

Acute toxicity and sublethal effects of the mixture glyphosate (Roundup Active) and Cosmo-Flux 411F to anuran embryos and tadpoles of four Colombian species.

[Clinical study on the treatment of acute paraquat poisoning with sequential whole gastric and bowel irrigation].

Review of genotoxicity biomonitoring studies of glyphosate-based formulations.

Effects of different tidal volume ventilation on paraquat-induced acute lung injury in piglets.

Early haemoperfusion with continuous venovenous haemofiltration improves survival of acute paraquat-poisoned patients.

The relation between oxidative stress, inflammation, and neopterin in the paraquat-induced lung toxicity.

Docosahexaenoic acid prevents paraquat-induced reactive oxygen species production in dopaminergic neurons via enhancement of glutathione homeostasis.

Drinking well water and occupational exposure to Herbicides is associated with chronic kidney disease, in Padavi-Sripura, Sri Lanka.

Clostridium tertium bacteremia in a patient with glyphosate ingestion.

Acute effects of acrolein in human volunteers during controlled exposure.

The Biomarkers of Exposure and Effect in Agriculture (BEEA) Study: Rationale, Design, Methods, and Participant Characteristics.

Hematological Alterations in Common Carp (*Cyprinus carpio* L.) Exposed to Herbicides: Pendimethalin and Ethofumesate Tested Separately and in Mixture.

[Observation on the best dose of methylprednisolone improving lung injury in swine with paraquat intoxication].

Clearance rate and BP-ANN model in paraquat poisoned patients treated with hemoperfusion.

Acrolein inhalation alters arterial blood gases and triggers carotid body-mediated cardiovascular responses in hypertensive rats.

Effect of titanium dioxide nanoparticles on the bioavailability, metabolism, and toxicity of pentachlorophenol in zebrafish larvae.

Cancer risks and long-term community-level exposure to pentachlorophenol in contaminated areas, China.

Cinnamaldehyde attenuates pressure overload-induced cardiac hypertrophy.

Compensatory role of the Nrf2-ARE pathway against paraquat toxicity: Relevance of 26S proteasome activity.

Cinnamaldehyde inhibits inflammation and brain damage in a mouse model of permanent cerebral ischaemia.

Methylated arsenic metabolites bind to PML protein but do not induce cellular differentiation and PML-RAR α protein degradation.

A human surrogate model of itch utilizing the TRPA1 agonist trans-cinnamaldehyde.

Superoxide enhances Ca²⁺ entry through L-type channels in the renal afferent arteriole.

Soluble Epoxide Hydrolase Deficiency or Inhibition Attenuates MPTP-Induced Parkinsonism.

Role of aldehyde dehydrogenase in hypoxic vasodilator effects of nitrite in rats and humans.

Endogenous hydrogen peroxide in the hypothalamic paraventricular nucleus regulates neurohormonal excitation in high salt-induced hypertension.

Rapamycin reverses paraquat-induced acute lung injury in a rat model through inhibition of NF κ B activation.

Continuous, low-dose oral exposure to sodium chlorate reduces fecal generic Escherichia coli in sheep feces without inducing clinical chlorate toxicosis.

[Therapeutic effects of gastric lavage with fuller earth combined with Qingyill catharsis in treatment of oral paraquat poisoning in rabbits].

[Preventive effects of 5-hydroxy-1-methylhydantoin on paraquat-induced nephrotoxicity in rat].

Coniferyl aldehyde reduces radiation damage through increased protein stability of heat shock transcriptional factor 1 by phosphorylation.

Cinnamic acid exerts anti-diabetic activity by improving glucose tolerance in vivo and by stimulating insulin secretion in vitro.

Natural antioxidant betanin protects rats from paraquat-induced acute lung injury interstitial pneumonia.

[Changes in mRNA expression of p53 and related downstream genes in peripheral blood lymphocytes in workers occupationally exposed to arsenic].

The ethanol metabolite acetaldehyde induces water and salt intake via two distinct pathways in the central nervous system of rats.

Renal function is associated with indicators of arsenic methylation capacity in Bangladeshi adults.

Simultaneous determination of cinnamaldehyde, cinnamic acid, and 2-methoxy cinnamic acid in rat whole blood after oral administration of volatile oil of *Cinnamoni Ramulus* by UHPLC-MS/MS: An application for a pharmacokinetic study.

Proinflammatory effect of trivalent arsenical species in a co-culture of Caco-2 cells and peripheral blood mononuclear cells.

Menthol attenuates respiratory irritation and elevates blood cotinine in cigarette smoke exposed mice.

A micro-QuEChERS method coupled to GC-MS for the quantification of pesticides in specific maternal and fetal tissues.

Contribution to the food products' analysis: A research and evaluation on the hemolytic effect of some pesticides used in Lebanon.

PKC in rat dorsal raphe nucleus plays a key role in sleep-wake regulation.

Identification of *Scedosporium boydii* catalase A1 gene, a reactive oxygen species detoxification factor highly expressed in response to oxidative stress and phagocytic cells.

Continuous activation of Nrf2 and its target antioxidant enzymes leads to arsenite-induced malignant transformation of human bronchial epithelial cells.

Compound- and sex-specific effects on programming of energy and immune homeostasis in adult C57BL/6JxFVB mice after perinatal TCDD and PCB 153.

Iron bioavailability in 8-24-month-old Thai children from a micronutrient-fortified quick-cooking rice containing ferric ammonium citrate or a mixture of ferrous sulphate and ferric sodium ethylenediaminetetraacetic acid.

Iron bioavailability from commercially available iron supplements.

Effects of co-exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin and polychlorinated biphenyls on nonalcoholic fatty liver disease in mice.

Disruption of Ah Receptor Signaling during Mouse Development Leads to Abnormal Cardiac Structure and Function in the Adult.

Green tea inhibited the elimination of nephro-cardiovascular toxins and deteriorated the renal function in rats with renal failure.

Design, Synthesis and in Vivo Evaluation of Novel Glycosylated Sulfonylureas as Antihyperglycemic Agents.

Development of a physiologically-based pharmacokinetic model of 2-phenoxyethanol and its metabolite phenoxyacetic acid in rats and humans to address toxicokinetic uncertainty in risk assessment.

Monitoring Changes in the Redox State of Myoglobin in Cardiomyocytes by Raman Spectroscopy Enables the Protective Effect of NO Donors to Be Evaluated.

Residential Exposure to Pesticide During Childhood and Childhood Cancers: A Meta-Analysis.

Iron Absorption from an Intrinsically Labeled Lentil Meal Is Low but Upregulated in Women with Poor Iron Status.

A randomized trial of intravenous and oral iron in chronic kidney disease.

Current skin symptoms of Yusho patients exposed to high levels of 2,3,4,7,8-pentachlorinated dibenzofuran and polychlorinated biphenyls in 1968.

Vitamin B12 and folate levels increase during treatment of iron deficiency anaemia in young adult woman.

Regulation of p53-targeting microRNAs by polycyclic aromatic hydrocarbons: Implications in the etiology of multiple myeloma.

Exploring Protein Binding of Uremic Toxins in Patients with Different Stages of Chronic Kidney Disease and during Hemodialysis.

Continuous Reduction of Protein-Bound Uraemic Toxins with Improved Oxidative Stress by Using the Oral Charcoal Adsorbent AST-120 in Haemodialysis Patients.

A Curcumin Derivative That Inhibits Vinyl Carbamate-Induced Lung Carcinogenesis via Activation of the Nrf2 Protective Response.

Protective effects of melatonin against 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced cardiac injury in rats.

Using Insulin Infusion Sets in CSII for Longer Than the Recommended Usage Time Leads to a High Risk for Adverse Events: Results From a Prospective Randomized Crossover Study.

p-Cresol and Cardiovascular Risk in Kidney Transplant Recipients.

Influence of dioxin on the daily variation of insulin sensitivity in mice.

Yusho and its latest findings-A review in studies conducted by the Yusho Group.

An unusual cause of fetomaternal distress at term: uterine vessel rupture in pregnancy.

Ablation of XP-V gene causes adipose tissue senescence and metabolic abnormalities.

Persistent reduced oxygen requirement following blood transfusion during recovery from hemorrhagic shock.

Evaluation of efficacy of resin hemoperfusion in patients with acute 2,4-dinitrophenol poisoning by dynamic monitoring of plasma toxin concentration.

Prenatal Iron Supplementation Reduces Maternal Anemia, Iron Deficiency, and Iron Deficiency Anemia in a Randomized Clinical Trial in Rural China, but Iron Deficiency Remains Widespread in Mothers and Neonates.

Medical interventions to reverse pulmonary hypoplasia in the animal model of congenital diaphragmatic hernia: A systematic review.

Fluorimetric screening assay for protein carbonyl evaluation in biological samples.

Arsenic causes aortic dysfunction and systemic hypertension in rats: Augmentation of angiotensin II signaling.

Pesticide Use and Relative Leukocyte Telomere Length in the Agricultural Health Study.

Left ventricular global longitudinal strain is associated with cardiovascular risk factors and arterial stiffness in chronic kidney disease.

Effect of correction of anemia on echocardiographic and clinical parameters in patients with aortic stenosis involving a three-cuspid aortic valve and normal left ventricular ejection fraction.

[Virulence genes and clinical features of Clostridium difficile-associated diarrhea in children].

Nitrite-mediated renal vasodilatation is increased during ischemic conditions via cGMP-independent signaling.

The Transcriptional Effects of PCB118 and PCB153 on the Liver, Adipose Tissue, Muscle and Colon of Mice: Highlighting of Glut4 and Lipin1 as Main Target Genes for PCB Induced Metabolic Disorders.

Arsenic-induced dyslipidemia in male albino rats: comparison between trivalent and pentavalent inorganic arsenic in drinking water.

The effect of environmental chemicals on the tumor microenvironment.

Increased expression of activated pSTAT3 and PIM-1 in the pulmonary vasculature of experimental congenital diaphragmatic hernia.

Arsenic exposure and prevalence of the varicella zoster virus in the United States: NHANES (2003-2004 and 2009-2010).

Serum aryl hydrocarbon receptor ligand activity is associated with insulin resistance and resulting type 2 diabetes.

Effect of tocopherol on biochemical blood parameters in pleuritis-induced rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Latest Findings of Yusho and Its Therapeutic Development].

[The Distribution of Dioxin Concentrations in the Blood of Yusho Patients].

Occupational health and safety for agricultural workers in Thailand: gaps and recommendations, with a focus on pesticide use.

Dioxin inhibition of swim bladder development in zebrafish: is it secondary to heart failure?

Anti-leukemic effect of sodium metaarsenite (KML001) in acute myeloid leukemia with breaking-down the resistance of cytosine arabinoside.

Management of iron deficiency anemia: a survey of pediatric hematology/oncology specialists.

Mild hypoxia in vivo regulates cardioprotective SUR2A: A role for Akt and LDH.

Clinical significance of C-reactive protein levels in predicting responsiveness to iron therapy in patients with inflammatory bowel disease and iron deficiency anemia.

Inhibitors of plasmodial serine hydroxymethyltransferase (SHMT): cocrystal structures of pyrazolopyrans with potent blood- and liver-stage activities.

Modulation of colon cancer by nutmeg.

Optimizing early child development for young children with non-anemic iron deficiency in the primary care practice setting (OptEC): study protocol for a randomized controlled trial.

The role of TMPRSS6 polymorphisms in iron deficiency anemia partially responsive to oral iron treatment.

Chronic cardiovascular disease-associated gene network analysis in human umbilical vein endothelial cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Adherence in a pragmatic randomized controlled trial on prophylactic iron supplementation during pregnancy in Maputo, Mozambique.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced hypertension: the beneficial effects of melatonin.

Nanogels based on alginic aldehyde and gelatin by inverse miniemulsion technique: synthesis and characterization.

Synthesis, QSAR and anticandidal evaluation of 1,2,3-triazoles derived from naturally bioactive scaffolds.

Associations between self-reported pest treatments and pesticide concentrations in carpet dust.

Estimated dietary dioxin exposure and breast cancer risk among women from the French E3N prospective cohort.

Controlled-release mitochondrial protonophore reverses diabetes and steatohepatitis in rats.

In Ivorian school-age children, infection with hookworm does not reduce dietary iron absorption or systemic iron utilization, whereas afebrile Plasmodium falciparum infection reduces iron absorption by half.

Developmental exposure to 2,3,7,8 tetrachlorodibenzo-p-dioxin attenuates later-life Notch1-mediated T cell development and leukemogenesis.

Effect of NaFeEDTA-fortified soy sauce on zinc absorption in children.

Is lymphocyte adenosine a diagnostic marker of clinical malignant hyperthermia? A pilot study.

Ferrous sulfate supplementation causes significant gastrointestinal side-effects in adults: a systematic review and meta-analysis.

Effects of sodium arsenite on the some laboratory signs and therapeutic role of thymoquinone in the rats.

Systematic review and meta-analysis: what is the evidence for oral iron supplementation in treating anaemia in elderly people?

The effect of folic acid supplementation with ferrous sulfate on the linear and ponderal growth of children aged 6-24 months: a randomized controlled trial.

Lineage-dependent effects of aryl hydrocarbon receptor agonists contribute to liver tumorigenesis.

Aryl hydrocarbon receptor SNP -130 C/T associates with dioxins susceptibility through regulating its receptor activity and downstream effectors including interleukin 24.

Shed syndecan-1 translocates to the nucleus of cells delivering growth factors and inhibiting histone acetylation: a novel mechanism of tumor-host cross-talk.

Solid lipid nanoparticles loaded with iron to overcome barriers for treatment of iron deficiency anemia.

Clinical and analytical problems of sodium azide poisonings as exemplified by a case of fatal suicidal poisoning.

Ferric maltol (ST10): a novel oral iron supplement for the treatment of iron deficiency anemia in inflammatory bowel disease.

[MODELING IN VITRO PATHWAYS OF ACTIVATION OF LIPID PEROXIDATION AND PROTEIN IN CHRONIC KIDNEY DISEASE].

In Vitro Protective Potentials of Annona muricata Leaf Extracts Against Sodium Arsenite-induced Toxicity.

Serum free indoxyl sulfate associated with in-stent restenosis after coronary artery stentings.

The influence of low level pre- and perinatal exposure to PCDD/Fs, PCBs, and lead on attention performance and attention-related behavior among German school-aged children: results from the Duisburg Birth Cohort Study.

Borax partially prevents neurologic disability and oxidative stress in experimental spinal cord ischemia/reperfusion injury.

Ferric carboxymaltose: a review of its use in iron deficiency.

Release of uremic retention solutes from protein binding by hypertonic predilution hemodiafiltration.

Alterations of platelet functions in children and adolescents with iron-deficiency anemia and response to therapy.

Liquid chromatography with tandem mass spectrometry for the determination of flufenoxuron in blood using automatic solid phase extraction and its application to a fatal case of flufenoxuron poisoning.

Effects of iron-glycine chelate on growth, carcass characteristic, liver mineral concentrations and haematological and biochemical blood parameters in broilers.

A fetal whole ovarian culture model for the evaluation of CrVI-induced developmental toxicity during germ cell nest breakdown.

Determination of Neutral Monosaccharides as Per-O-methylated Derivatives Directly from a Drop of Whole Blood by Gas Chromatography-Mass Spectrometry.

Toxicity studies of 5-amino-o-cresol administered dermally to F344/NTac rats and B6C3F1/N mice.

An examination of fitness costs of glyphosate resistance in the common morning glory, *Ipomoea purpurea*.

Snapping Turtles (*Chelydra serpentina*) from Canadian Areas of Concern across the southern Laurentian Great Lakes: Chlorinated and brominated hydrocarbon contaminants and metabolites in relation to circulating concentrations of thyroxine and vitamin A.

Red palm oil-supplemented and biofortified cassava gari increase the carotenoid and retinyl palmitate concentrations of triacylglycerol-rich plasma in women.

Suicidal Fatality from Azide Ingestion.

Coupling passive sampling with in vitro bioassays and chemical analysis to understand combined effects of bioaccumulative chemicals in blood of marine turtles.

BFCOD activity in fish cell lines and zebrafish embryos and its modulation by chemical ligands of human aryl hydrocarbon and nuclear receptors.

Absorption of PCB126 by upper airways impairs G protein-coupled receptor-mediated immune response.

2,3,7,8-Tetrachlorodibenzo-p-dioxin differentially suppresses angiogenic responses in human placental vein and artery endothelial cells.

Predictive modes of action of pesticides in uterine adenocarcinoma development in rats.

Activation of NRF2 pathway in spleen, thymus as well as peripheral blood mononuclear cells by acute arsenic exposure in mice.

2,3,7,8-tetrachlorodibenzo-p-dioxin decrease expression of aryl hydrocarbon receptor in peripheral lymphocyte of β^0 -thalassemia major patients.

Tumor necrosis factor- α inhibits effects of aryl hydrocarbon receptor ligands on cell death in human lymphocytes.

Unexpectedly long half-lives of blood 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) levels in Yusho patients.

Solubility shift and SUMOylation of promyelocytic leukemia (PML) protein in response to arsenic(III) and fate of the SUMOylated PML.

Hydroxyl metabolite of PCB 180 induces DNA damage signaling and enhances the DNA damaging effect of benzo[a]pyrene.

Molecular cloning and characterization of a phospholipid hydroperoxide glutathione peroxidase gene from a blood fluke *Schistosoma japonicum*.

The geographic mosaic of herbicide resistance evolution in the common morning glory, *Ipomoea purpurea*: Evidence for resistance hotspots and low genetic differentiation across the landscape.

Biotin amelioration of nephrotoxicity in streptozotocin-induced diabetic mice.

Exogenous plant hormones and cyclotide expression in *Viola uliginosa* (Violaceae).

Toxicokinetic Model Development for the Insensitive Munitions Component 2,4-Dinitroanisole.

Silymarin attenuates paraquat-induced lung injury via Nrf2-mediated pathway *in vivo* and *in vitro*.

Fluorescent magnetic bead-based mast cell biosensor for electrochemical detection of allergens in foodstuffs.

Genetic Deficiency of Glutathione S-Transferase P Increases Myocardial Sensitivity to Ischemia-Reperfusion Injury.

Response to: Letter to the Editor: Blood levels of PCDDs, PCDFs, and coplanar PCBs in Yusho mothers and their descendants: Association with fetal Yusho disease.

Genotoxic effects of boric acid and borax in zebrafish, *Danio rerio* using alkaline comet assay.

Butafenacil: A positive control for identifying anemia- and variegate porphyria-inducing chemicals.

Effect of tocopherol and acetylsalicylic acid on the biochemical indices of blood in dioxin-exposed rats.

Toxicological and phytoprotective effect of *Keayodendron bridelioides* and *Monodora myristica* extracts in Wistar rats.

Lipoamide Acts as an Indirect Antioxidant by Simultaneously Stimulating Mitochondrial Biogenesis and Phase II Antioxidant Enzyme Systems in ARPE-19 Cells.

Levels of polychlorinated dibenzo-p-dioxins, dibenzofurans (PCDD/Fs) and biphenyls (PCBs) in blood of informal e-waste recycling workers from Agbogbloshie, Ghana, and controls.

Steroid hormone related effects of marine persistent organic pollutants in human H295R adrenocortical carcinoma cells.

Characterization of Batracylin-induced Renal and Bladder Toxicity in Rats.

Phosphatidylcholine Specific PLC-Induced Dysregulation of Gap Junctions, a Robust Cellular Response to Environmental Toxicants, and Prevention by Resveratrol in a Rat Liver Cell Model.

Amphiphilic zinc phthalocyanine photosensitizers: synthesis, photophysicochemical properties and in vitro studies for photodynamic therapy.

TCDD and omeprazole prime platelets through the aryl hydrocarbon receptor (AhR) non-genomic pathway.

Î±-Naphthoflavone Increases Lipid Accumulation in Mature Adipocytes and Enhances Adipocyte-Stimulated Endothelial Tube Formation.

2-Acetylcyclopentanone, an enolate-forming 1,3-dicarbonyl compound, is cytoprotective in warm ischemia-reperfusion injury of rat liver.

Human inhalation exposures to toluene, ethylbenzene, and m-xylene and physiologically based pharmacokinetic modeling of exposure biomarkers in exhaled air, blood, and urine.

Evaluation of various methods of point-of-care testing of haemoglobin concentration in blood donors.

Antioxidant compounds in the seaweed *Gelidiella acerosa* protects human Peripheral Blood Mononuclear Cells against TCDD induced toxicity.

Idiopathic erythrocytosis in a patient on chronic hemodialysis.

Malabsorption of iron as a cause of iron deficiency anemia in postmenopausal women.

Longitudinal assessment of occupational exposures to the organophosphorous insecticides chlorpyrifos and profenofos in Egyptian cotton field workers.

The effects of dietary boron compounds in supplemented diet on hormonal activity and some biochemical parameters in rats.

Development and characterization of an endothelial cell line from the bulbus arteriosus of walleye, *Sander vitreus*.

Dinitrophenol modulates gene expression levels of angiogenic, cell survival and cardiomyogenic factors in bone marrow derived mesenchymal stem cells.

Disparate roles of zinc in chemical hypoxia-induced neuronal death.

Reply to Koppe and Ten Tusscher's letter to the Editor concerning the use of human peripheral blood lymphocytes to determine relative effect potencies for dioxin like compounds.

Evaluation of effects of *Maá'á* *urabhasma* on structural and functional integrity of small intestine in comparison with ferrous sulfate using an experimental model of iron deficiency anemia.

Preliminary Study on Biosynthesis of Bacterial Nanocellulose Tubes in a Novel Double-Silicone-Tube Bioreactor for Potential Vascular Prosthesis.

What Is in the Caribbean Baby? Assessing Prenatal Exposures and Potential Health Outcomes to Environmental Contaminants in 10 Caribbean Countries.

Increase in oxidative stress biomarkers in dogs with ascending-descending myelomalacia following spinal cord injury.

Olive oil and its phenolic constituent tyrosol attenuates dioxin-induced toxicity in peripheral blood mononuclear cells via an antioxidant-dependent mechanism.

Influence of titanium dioxide nanoparticles on 2,3,7,8-tetrachlorodibenzo-p-dioxin bioconcentration and toxicity in the marine fish European sea bass (*Dicentrarchus labrax*).

Association between maternal urinary arsenic species and infant cord blood leptin levels in a New Hampshire Pregnancy Cohort.

Adiponectin protects against paraquat-induced lung injury by attenuating oxidative/nitrative stress.

Levels of PCDDs, PCDFs and dl-PCBs in the blood of childbearing-aged women living in the vicinity of a chemical plant in Tianjin: a primary study.

Effect of vitamin E supplementation on arsenic induced alteration in blood biochemical profile, oxidant/antioxidant status, serum cortisol level and retention of arsenic and selenium in goats.

Dioxin-induced thrombocyte aggregation in zebrafish.

PCBs, PCDD/Fs, and PBDEs in blood samples of a rural population in South Germany.

Modulatory role of Acacia honey from north-west Nigeria on sodium arsenite-induced clastogenicity and oxidative stress in male Wistar rats.

Diet with diphenyl diselenide mitigates quinclorac toxicity in silver catfish (*Rhamdia quelen*).

Continuous renal replacement therapy circuit failure after antidote administration.

Ozone therapy ameliorates paraquat-induced lung injury in rats.

Therapeutical effects and mechanism of salubrinal combined with ulinastatin on treating paraquat poisoning.

[Progress on pathogenesis and treatment of paraquat-induced pulmonary fibrosis].

[Comparative study of different methods of blood purification treatment of paraquat intoxication].

Tissue sensitivity of the rat upper and lower extrapulmonary airways to the inhaled electrophilic air pollutants diacetyl and acrolein.

Pesticide exposure as a risk factor for myelodysplastic syndromes: a meta-analysis based on 1,942 cases and 5,359 controls.

Exchange transfusion can be life-saving in severe propanil poisoning: a case report.

Evaluation of the genotoxicity of a herbicide formulation containing 3,6-dichloro-2-methoxybenzoic acid (dicamba) in circulating blood cells of the tropical fish *Cnesterodon decemmaculatus*.

Are DNA-damaging effects induced by herbicide formulations (Roundup® and Garlon®) in fish transient and reversible upon cessation of exposure?

Histopathological and biochemical changes in goldfish kidney due to exposure to the herbicide Sencor may be related to induction of oxidative stress.

Effects of bentazone on lipid peroxidation and antioxidant systems in human erythrocytes in vitro.

Induction of micronuclei and nuclear lesions in *Channa punctatus* following exposure to carbosulfan, glyphosate and atrazine.

Alterations in energy/redox metabolism induced by mitochondrial and environmental toxins: a specific role for glucose-6-phosphate-dehydrogenase and the pentose phosphate pathway in paraquat toxicity.

Acrolein induced both pulmonary inflammation and the death of lung epithelial cells.

Effects of the surfactant polyoxyethylene amine (POEA) on genotoxic, biochemical and physiological parameters of the freshwater teleost *Prochilodus lineatus*.

Comparison between kidney and continuous plasma perfusion for paraquat elimination.

RBE4 cells are highly resistant to paraquat-induced cytotoxicity: studies on uptake and efflux mechanisms.

Assessing multiple endpoints of atrazine ingestion on gravid Northern Watersnakes (*Nerodia sipedon*) and their offspring.

De novo assembly and annotation of the transcriptome of the agricultural weed *Ipomoea purpurea* uncovers gene expression changes associated with herbicide resistance.

Glucocorticoid with cyclophosphamide for paraquat-induced lung fibrosis.

Acrolein decreases endothelial cell migration and insulin sensitivity through induction of let-7a.

Induction of micronuclei and nuclear abnormalities in tadpoles of the common toad (*Rhinella arenarum*) treated with the herbicides Liberty[®] and glufosinate-ammonium.

An acute exposure to glyphosate-based herbicide alters aromatase levels in testis and sperm nuclear quality.

Clinical characteristics of paraquat poisoning in 22 Chinese children.

Elimination of young erythrocytes from blood circulation and altered erythropoietic patterns during paraquat induced anemic phase in mice.

Short-term effects of different genetically modified maize varieties on arthropod food web properties: an experimental field assessment.

Hemolytic uremic syndrome associated with paraquat intoxication.

[Tumor necrosis factor- α induced protein 6 attenuates acute kidney injury following paraquat poisoning in rats].

[Reproduction of acute lung injury model induced by paraquat in piglet].

[An analysis of relevant factors of early death in acute paraquat poisoning].

[Early acute liver injury in paraquat poisoning rats].

New insights into antioxidant strategies against paraquat toxicity.

Effects of glyphosate on growth rate, metabolic rate and energy reserves of early juvenile crayfish, *Cherax quadricarinatus* M.

Protective effects of exogenous $\hat{1}^2$ -hydroxybutyrate on paraquat toxicity in rat kidney.

The effect of glyphosate, its metabolites and impurities on erythrocyte acetylcholinesterase activity.

Validity of geographically modeled environmental exposure estimates.

[The prognostic value of the Acute Kidney Injury Network criteria in patients with acute paraquat poisoning].

Herbicide clomazone effects on $\hat{1}$ -aminolevulinic acid activity and metabolic parameters in *Cyprinus carpio*.

Effect of transforming growth factor- $\hat{1}^21$ on acute lung injury caused by paraquat.

Lithium prevents acrolein-induced neurotoxicity in HT22 mouse hippocampal cells.

Rapamycin inhibits acrolein-induced apoptosis by alleviating ROS-driven mitochondrial dysfunction in male germ cells.

Chronic exposure of mice to environmental endocrine-disrupting chemicals disturbs their energy metabolism.

Serum dioxin levels in Vietnamese men more than 40 years after herbicide spraying.

[Protective effect of ghrelin against paraquat-induced acute lung injury in mice].

A single exposure to acrolein desensitizes baroreflex responsiveness and increases cardiac arrhythmias in normotensive and hypertensive rats.

Clinico-hematological and tissue changes induced by butachlor in male Japanese quail (*Coturnix japonica*).

The effect of metabolites and impurities of glyphosate on human erythrocytes (in vitro).

Flurochloridone-based herbicides induced genotoxicity effects on *Rhinella arenarum* tadpoles (Anura: Bufonidae).

Effects of the exposure of fish to triazine herbicides.

Cytoprotective effect of kaempferol on paraquat-exposed BEAS-2B cells via modulating expression of MUC5AC.

CB2 receptor activation ameliorates the proinflammatory activity in acute lung injury induced by paraquat.

Evaluation of biochemical, haematological, and histopathological responses and recovery ability of common carp (*Cyprinus carpio* L.) after acute exposure to atrazine herbicide.

DNA and chromosomal damage induced in fish (*Anguilla anguilla* L.) by aminomethylphosphonic acid (AMPA)--the major environmental breakdown product of glyphosate.

Genotoxic effects of the herbicide Roundup Transorb and its active ingredient glyphosate on the fish *Prochilodus lineatus*.

Hemodialysis clearance of glyphosate following a life-threatening ingestion of glyphosate-surfactant herbicide.

Hematological and histopathological changes in silver catfish *Rhamdia quelen* (Siluriformes) exposed to clomazone herbicide in the Madre River, Santa Catarina State, Southern Brazil.

Clinical characteristics of patients after dicamba herbicide ingestion.

High cortisol and cortisone levels are associated with breast milk dioxin concentrations in Vietnamese women.

The impact of Agent Orange exposure on presentation and prognosis of patients with chronic lymphocytic leukemia.

Catalase inhibition in diabetic rats potentiates DNA damage and apoptotic cell death setting the stage for cardiomyopathy.

Agent Orange exposure and risk of death in Korean Vietnam veterans: Korean Veterans Health Study.

Immune suppressive effect of cinnamaldehyde due to inhibition of proliferation and induction of apoptosis in immune cells: implications in cancer.

Metabolism of arsenic trioxide in acute promyelocytic leukemia cells.

Atorvastatin attenuates the paraquat-induced pulmonary inflammation via PPAR γ receptors: a new indication for atorvastatin.

Pharmacological inhibition of CXCR2 chemokine receptors modulates paraquat-induced intoxication in rats.

Acrolein exposure is associated with increased cardiovascular disease risk.

Interaction of plasma glutathione redox and folate deficiency on arsenic methylation capacity in Bangladeshi adults.

Arsenic methylation capacity and developmental delay in preschool children in Taiwan.

Increased immunoglobulin production in silver catfish (*Rhamdia quelen*) exposed to agrichemicals.

Research on tumorigenicity of cinnamaldehyde in melanoma cell lines and its mechanism.

Liposome-encapsulated cinnamaldehyde enhances zebrafish (*Danio rerio*) immunity and survival when challenged with *Vibrio vulnificus* and *Streptococcus agalactiae*.

Cinnamon extract improves insulin sensitivity in the brain and lowers liver fat in mouse models of obesity.

Absence of P-glycoprotein transport in the pharmacokinetics and toxicity of the herbicide paraquat.

Synthesis, characterization, and preclinical evaluation of new thiazolidin-4-ones substituted with p-chlorophenoxy acetic acid and clofibrac acid against insulin resistance and metabolic disorder.

Cinnamaldehyde inhibits L-type calcium channels in mouse ventricular cardiomyocytes and vascular smooth muscle cells.

Metabolism of propylsulfuron: ¹⁴C excretion, ¹⁴C concentration in plasma and tissues, and amount of metabolites in rats.

[The effect of selective phosphatase inhibitors Salubrinal on autophagy and apoptosis in the lung tissue of rats with acute paraquat poisoning].

Trivalent methylated arsenic metabolites induce apoptosis in human myeloid leukemic HL-60 cells through generation of reactive oxygen species.

Novel bioassay for the discovery of inhibitors of the 2-C-methyl-D-erythritol 4-phosphate (MEP) and terpenoid pathways leading to carotenoid biosynthesis.

Enhanced toxicity of binary mixtures of *Bacillus thuringiensis* subsp. *israelensis* and three essential oil major constituents to wild *Anopheles sinensis* (Diptera: Culicidae) and *Aedes albopictus* (Diptera: Culicidae).

Metabolism and physiologically based pharmacokinetic modeling of flumioxazin in pregnant animals.

[Colorimetric determination of blood paraquat content and its clinical application].

Cinnamaldehyde and cinnamaldehyde-containing micelles induce relaxation of isolated porcine coronary arteries: role of nitric oxide and calcium.

[The molecular mechanism of interaction of trivalent dimethylarsinous acid (DMA(III)) binding to rat hemoglobin].

Serum concentrations of TCDD and other dioxin-like compounds in US Air Force veterans of Operation Ranch Hand.

Comparison of speciated arsenic levels in the liver and brain of mice between arsenate and arsenite exposure at the early life.

Pesticide exposures to migrant farmworkers in Eastern NC: detection of metabolites in farmworker urine associated with housing violations and camp characteristics.

Health effects and arsenic species in urine of copper smelter workers.

In-vivo evaluation of the permeability of the blood-brain barrier to arsenicals, molybdate, and methylmercury by use of online microdialysis-packed minicolumn-inductively coupled plasma mass spectrometry.

Human skin in vitro permeation of bentazon and isotretinoin formulations with or without protective clothing suit.

p-Cresol affects reactive oxygen species generation, cell cycle arrest, cytotoxicity and inflammation/atherosclerosis-related modulators production in endothelial cells and mononuclear cells.

Clastogenic effects of *Trypanosoma brucei brucei* and *Trypanosoma evansi* mixed infection in bone marrow of Wistar rats.

Effect of iron supplementation on the expression of hypoxia-inducible factor and antioxidant status in rats exposed to high-altitude hypoxia environment.

A nanoparticulate ferritin-core mimetic is well taken up by HuTu 80 duodenal cells and its absorption in mice is regulated by body iron.

In vivo kinetics of the uremic toxin p-cresyl sulfate in mice with variable renal function.

Sodium arsenite induces apoptosis and Epstein-Barr virus reactivation in lymphoblastoid cells.

Mechanism and inhibition of 1-deoxy-D-xylulose-5-phosphate reductoisomerase.

Antagonism of ionotropic glutamate receptors attenuates chemical ischemia-induced injury in rat primary cultured myenteric ganglia.

Impact of sodium arsenite on chromosomal aberrations with respect to polymorphisms of detoxification and DNA repair genes.

Atorvastatin ameliorates arsenic-induced hypertension and enhancement of vascular redox signaling in rats.

In silico identification of an aryl hydrocarbon receptor antagonist with biological activity in vitro and in vivo.

Arsenic exposure disrupts the normal function of the FA/BRCA repair pathway.

Protective action of curcumin and nano-curcumin against arsenic-induced genotoxicity in rats in vivo.

Uremic toxicity and sclerostin in chronic kidney disease patients.

In vitro evaluation of Midwest Caries ID: a novel light-emitting diode for caries detection.

Fructo-oligosaccharides and iron bioavailability in anaemic rats: the effects on iron species distribution, ferroportin-1 expression, crypt bifurcation and crypt cell proliferation in the caecum.

[Iron deficiency. Effective: oral substitution].

The novel regulations of MEF2A, CAMKK2, CALM3, and TNNI3 in ventricular hypertrophy induced by arsenic exposure in rats.

Microcytic anemia.

The comparison of antimutagenicity and anticancer activities of *Echinophora platyloba* DC on acute promyelocytic leukemia cancer cells.

Malondialdehyde, antioxidant enzymes, and renal tubular functions in children with iron deficiency or iron-deficiency anemia.

Safety and efficacy of lactoferrin versus ferrous sulphate in curing iron deficiency and iron deficiency anaemia in hereditary thrombophilia pregnant women: an interventional study.

Human organic anion transporters function as a high-capacity transporter for p-cresyl sulfate, a uremic toxin.

The Ah receptor regulates growth factor expression in head and neck squamous cell carcinoma cell lines.

Functional characterisation of the R2452W ryanodine receptor variant associated with malignant hyperthermia susceptibility.

Cardiac myocyte-specific AHR activation phenocopies TCDD-induced toxicity in zebrafish.

Radiosynthesis, photoisomerization, biodistribution, and metabolite analysis of ¹¹C-PBB3 as a clinically useful PET probe for imaging of tau pathology.

Involvement of COX2-thromboxane pathway in TCDD-induced precardiac edema in developing zebrafish.

Uremic toxin p-cresol induces Akt-pathway-selective insulin resistance in bone marrow-derived mesenchymal stem cells.

Doppler parameters of fetal lung hypoplasia and impact of sildenafil.

Indoxyl sulfate and p-cresyl sulfate in chronic kidney disease. Could these toxins modulate the antioxidant Nrf2-Keap1 pathway?

Effects of iron supplementation on dominant bacterial groups in the gut, faecal SCFA and gut inflammation: a randomised, placebo-controlled intervention trial in South African children.

Enhancement of non-heme iron absorption by anchovy (*Engraulis japonicus*) muscle protein hydrolysate involves a nanoparticle-mediated mechanism.

High-content screening in zebrafish embryos identifies butafenacil as a potent inducer of anemia.

Farm residence and lymphohematopoietic cancers in the Iowa Women's Health Study.

The formation of DNA single-strand breaks and alkali-labile sites in human blood lymphocytes exposed to 365-nm UVA radiation.

Ferroportin mediates the intestinal absorption of iron from a nanoparticulate ferritin core mimetic in mice.

Morphine glucuronidation increases its analgesic effect in guinea pigs.

Effect of supplementation with ferrous sulfate or iron bis-glycinate chelate on ferritin concentration in Mexican schoolchildren: a randomized controlled trial.

Reducing iron deficiency anemia in Bolivian school children: calcium and iron combined versus iron supplementation alone.

Role of the autonomic nervous system and baroreflex in stress-evoked cardiovascular responses in rats.

Marginally excessive iron loading transiently blocks mucosal iron uptake in iron-deficient rats.

Dioxins, furans and dioxin-like PCBs in human blood: causes or consequences of diabetic nephropathy?

Thrombin-facilitated efflux of D-[3H]-aspartate from cultured astrocytes and neurons under hyponatremia and chemical ischemia.

Postnatal development of eupneic ventilation and metabolism in rats chronically exposed to moderate hyperoxia.

An audit to review the characteristics and management of placenta praevia at Aberdeen Maternity Hospital, 2009-2011.

Obstetric and neonatal outcomes of maternal vitamin D supplementation: results of an open-label, randomized controlled trial of antenatal vitamin D supplementation in Pakistani women.

Uremic toxins impair human bone marrow-derived mesenchymal stem cells functionality in vitro.

PCB concentrations and dioxin-like activity in blood samples from Danish school children and their mothers living in urban and rural areas.

A study of the effects of latent iron deficiency on measures of cognition: a pilot randomised controlled trial of iron supplementation in young women.

Maternal diet, prenatal exposure to dioxin-like compounds and birth outcomes in a European prospective mother-child study (NewGeneris).

Cardiovascular disease relates to intestinal uptake of p-cresol in patients with chronic kidney disease.

A rapid, simple questionnaire to assess gastrointestinal symptoms after oral ferrous sulphate supplementation.

Effects of acute dietary iron overload in pigs (*Sus scrofa*) with induced type 2 diabetes mellitus.

The metabolically healthy but obese phenotype is associated with lower plasma levels of persistent organic pollutants as compared to the metabolically abnormal obese phenotype.

An adsorbent monolith device to augment the removal of uraemic toxins during haemodialysis.

Protein-bound uremic toxins, inflammation and oxidative stress: a cross-sectional study in stage 3-4 chronic kidney disease.

The thiocarbamate disulphide drug, disulfiram induces osteopenia in rats by inhibition of osteoblast function due to suppression of acetaldehyde dehydrogenase activity.

Iron supplementation does not worsen respiratory health or alter the sputum microbiome in cystic fibrosis.

Ultrasound-guided interventional procedures around the shoulder.

Evidence that p-cresol and IL-6 are adsorbed by the HFR cartridge: towards a new strategy to decrease systemic inflammation in dialyzed patients?

Augmented atherogenesis in ApoE-null mice co-exposed to polychlorinated biphenyls and 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Comparison of two doses of elemental iron in the treatment of latent iron deficiency: efficacy, side effects and blinding capabilities.

Nanoencapsulation of DMSA monoester for better therapeutic efficacy of the chelating agent against arsenic toxicity.

The emerging role of Nrf2 in dermatotoxicology.

Activation of Nrf2 in keratinocytes causes chloracne (MADISH)-like skin disease in mice.

Homoisoflavanone prevents mast cell activation and allergic responses by inhibition of Syk signaling pathway.

The FIND-CKD study--a randomized controlled trial of intravenous iron versus oral iron in non-dialysis chronic kidney disease patients: background and rationale.

The aryl hydrocarbon receptor-activating effect of uremic toxins from tryptophan metabolism: a new concept to understand cardiovascular complications of chronic kidney disease.

Hepatoprotective activity of Tephrosia purpurea against arsenic induced toxicity in rats.

In utero exposure to compounds with dioxin-like activity and birth outcomes.

Comparison of intake and systemic relative effect potencies of dioxin-like compounds in female rats after a single oral dose.

Effects of incapacitant spray deployed in the restraint and arrest of detainees in the Metropolitan Police Service area, London, UK: a prospective study.

Ferrous bisglycinate 25 mg iron is as effective as ferrous sulfate 50 mg iron in the prophylaxis of iron deficiency and anemia during pregnancy in a randomized trial.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin modulates dysregulation of the lipid metabolism in mouse offspring fed a high-calorie diet.

The NRF2-KEAP1 pathway is an early responsive gene network in arsenic exposed lymphoblastoid cells.

Circulating levels of p,p'-DDE are related to prevalent hypertension in the elderly.

Micronuclei in cord blood lymphocytes and associations with biomarkers of exposure to carcinogens and hormonally active factors, gene polymorphisms, and gene expression: the NewGeneris cohort.

Exploration of novel predictive markers in rat plasma of the early stages of chronic renal failure.

Elevated blood pressure in offspring of rats exposed to diverse chemicals during pregnancy.

Responsiveness to parenteral iron therapy in children with oral iron-refractory iron-deficiency anemia.

Accidental exposure to polychlorinated biphenyls (PCB) in waste cargo after heavy seas. Global waste transport as a source of PCB exposure.

The aryl hydrocarbon receptor mediates raloxifene-induced apoptosis in estrogen receptor-negative hepatoma and breast cancer cells.

ITE and TCDD differentially regulate the vascular remodeling of rat placenta via the activation of AhR.

Effects of intestinal bacteria-derived p-cresyl sulfate on Th1-type immune response in vivo and in vitro.

Sodium meta-arsenite ameliorates hyperglycemia in obese diabetic db/db mice by inhibition of hepatic gluconeogenesis.

A practical and successful desensitization protocol for immediate hypersensitivity reactions to iron salts.

Sildenafil stimulates and dexamethasone inhibits pulmonary vascular development in congenital diaphragmatic hernia rat lungs.

Rapid iron desensitization after generalized urticaria and facial angioedema.

In utero and lactational exposure to a mixture of environmental contaminants detected in Canadian Arctic human populations alters retinoid levels in rat offspring with low margins of exposure.

Effects of AST-120 on blood concentrations of protein-bound uremic toxins and biomarkers of cardiovascular risk in chronic dialysis patients.

[Statement of the Polish Gynecological Society Expert Group on the prevention of iron deficiency and of anemia caused by iron deficiency with a low dose heme iron in women. State of the art, 2013].

Oral iron for patients receiving dialysis: what is the evidence?

Micronucleus frequency in copper-mine workers exposed to arsenic is modulated by the AS3MT Met287Thr polymorphism.

Ultrahigh resolution mass spectrometry-based metabolic characterization reveals cerebellum as a disturbed region in two animal models.

Hemorrhagin VaH4, a covalent heterodimeric P-III metalloproteinase from *Vipera ammodytes* ammodytes with a potential antitumour activity.

Serum concentrations of p-cresyl sulfate and indoxyl sulfate, but not inflammatory markers, increase in incident peritoneal dialysis patients in parallel with loss of residual renal function.

Aldehyde dehydrogenase 2 partly mediates hypotensive effect of nitrite on L-NAME-induced hypertension in normoxic rat.

Photohemolysis Sensitized by the Furocoumarin Derivative Alloimperatorin and its Hydroperoxide Photooxidation Product.

Effects of sivelestat treatment on acute lung injury in paraquat-intoxicated rats.

Ferrous sulfate (Fe²⁺) had a faster effect than did ferric polymaltose (Fe³⁺) on increased oxidant status in children with iron-deficiency anemia.

Potential effects of polychlorinated biphenyls (PCBs) and selected organochlorine pesticides (OCPs) on immune cells and blood biochemistry measures: a cross-sectional assessment of the NHANES 2003-2004 data.

Development of inhibitors of the 2C-methyl-D-erythritol 4-phosphate (MEP) pathway enzymes as potential anti-infective agents.

Effect of drinking water disinfection by-products in human peripheral blood lymphocytes and sperm.

[Medication use during the first trimester of pregnancy: drug safety and adoption of folic acid and ferrous sulphate].

Endocrine disruption in human placenta: expression of the dioxin-inducible enzyme, CYP1A1, is correlated with that of thyroid hormone-regulated genes.

Induction of glutathione synthesis in human hepatocytes by acute and chronic arsenic exposure: differential roles of mitogen-activated protein kinases.

Differential Fmo3 gene expression in various liver injury models involving hepatic oxidative stress in mice.

Persistent organochlorine pollutants and human reproductive health.

Duodenal absorption and tissue utilization of dietary heme and nonheme iron differ in rats.

Protective Effect of Curcumin against the Liver Toxicity Caused by Propanil in Rats.

Effects of atrazine on the oxidative damage of kidney in Wister rats.

Lipid peroxidation in Rheumatoid arthritis; consequences and monitoring.

Differential susceptibility of human peripheral blood T cells to suppression by environmental levels of sodium arsenite and monomethylarsonous acid.

Risk assessment study of dioxins in sanitary napkins produced in Japan.

Kinetic mechanism of putrescine oxidase from *Rhodococcus* erythropolis.

Atorvastatin restores arsenic-induced vascular dysfunction in rats: modulation of nitric oxide signaling and inflammatory mediators.

Sodium arsenite induced changes in survival, growth, metamorphosis and genotoxicity in the Indian cricket frog (*Rana limnocharis*).

Urinary VEGF and PGE2 levels and the association with arsenical metabolites in copper-smelting workers.

^{11}C -ORM-13070, a novel PET ligand for brain α_1 -adrenoceptors: radiometabolism, plasma pharmacokinetics, whole-body distribution and radiation dosimetry in healthy men.

NADPH oxidase and the cardiovascular toxicity associated with smoking.

Luteolin modulates expression of drug-metabolizing enzymes through the AhR and Nrf2 pathways in hepatic cells.

Developmental toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in artificially fertilized crucian carp (*Carassius auratus*) embryo.

The effect of different polychlorinated biphenyls on two aquatic models, the green alga *Pseudokirchneriella subcapitata* and the haemocytes from the European abalone *Haliotis tuberculata*.

Two-stage culture procedure using thidiazuron for efficient micropropagation of *Stevia rebaudiana*, an anti-diabetic medicinal herb.

Prenatal exposure to persistent organic pollutants and polybrominated diphenyl ethers in 10 Caribbean countries.

Blood biochemistry, thyroid hormones, and oxidant/antioxidant status of guinea pigs challenged with sodium arsenite or arsenic trioxide.

Gynecological care in young women: a high-risk period of life.

Cross-omics gene and protein expression profiling in juvenile female mice highlights disruption of calcium and zinc signalling in the brain following dietary exposure to CB-153, BDE-47, HBCD or TCDD.

Standardization of in vitro Cell-based Model for Renal Ischemia and Reperfusion Injury.

Microvascular circulation at cool, normal and warm temperatures in rat leg muscles examined by histochemistry using *Lycopersicon esculentum* lectin.

A case report of acute severe paraquat poisoning and long-term follow-up.

A PET Tracer for Brain β -Adrenoceptors, (11)¹¹C-ORM-13070: Radiosynthesis and Preclinical Evaluation in Rats and Knockout Mice.

Biomonitoring and hormone-disrupting effect biomarkers of persistent organic pollutants in vitro and ex vivo.

Enantioselective metabolism of quizalofop-ethyl in rat.

Comparative oxidative stress, metallothionein induction and organ toxicity following chronic exposure to arsenic, lead and mercury in rats.

Fibrin-targeted plasminogen activation by plasminogen activator, PadA, from *Streptococcus dysgalactiae*.

Which exposure stage (gestation or lactation) is more vulnerable to atrazine toxicity? Studies on mouse dams and their pups.

Protective effect of quercetin on atrazine-induced oxidative stress in the liver, kidney, brain, and heart of adult wistar rats.

Relationship between dioxin and steroid hormones in sera of Vietnamese men.

Biochemical, oxidative and histological changes caused by sub-acute oral exposure of some synthetic cyanogens in rats: ameliorative effect of α -ketoglutarate.

Conditioned medium enhances the fusion capability of rat bone marrow mesenchymal stem cells and cardiomyocytes.

In Vitro Metabolism of Flucetosulfuron by Human Liver Microsomes.

Differential relative effect potencies of some dioxin-like compounds in human peripheral blood lymphocytes and murine splenic cells.

Identification of a novel mitochondrial uncoupler that does not depolarize the plasma membrane.

Persistent organic pollutant levels in semi-domesticated reindeer (*Rangifer tarandus tarandus* L.), feed, lichen, blood, milk, placenta, foetus and calf.

On the non-linear attachment characteristics of blood to bacterial cellulose/kaolin biomaterials.

Cytotoxic clerodane diterpenes from *Zuelania guidonia*.

Comparison of the in vivo and in vitro genotoxicity of glyphosate isopropylamine salt in three different organisms.

Plant extracts of the family Lauraceae: a potential resource for chemopreventive agents that activate the nuclear factor-erythroid 2-related factor 2/antioxidant response element pathway.

Oxygen tension controls the expression of the monocarboxylate transporter MCT4 in cultured mouse cortical astrocytes via a hypoxia-inducible factor-1 α -mediated transcriptional regulation.

Astrocytic mitochondrial membrane hyperpolarization following extended oxygen and glucose deprivation.

Increases in levels of epoxyeicosatrienoic and dihydroxyeicosatrienoic acids (EETs and DHETs) in liver and heart in vivo by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and in hepatic EET:DHET ratios by cotreatment with TCDD and the soluble epoxide hydrolase inhibitor AUDA.

Mechanism for the protective effect of diallyl disulfide against cyclophosphamide acute urotoxicity in rats.

A stable and efficient *Agrobacterium tumefaciens*-mediated genetic transformation of the medicinal plant *Digitalis purpurea* L.

Methylated pentavalent arsenic metabolites are bifunctional inducers, as they induce cytochrome P450 1A1 and NAD(P)H:quinone oxidoreductase through AhR- and Nrf2-dependent mechanisms.

Exposure to priority organochlorine contaminants in the Italian general population. Part 2: Fifteen priority polychlorinated biphenyl congeners in blood serum.

Arsenic trioxide and other arsenical compounds inhibit the NLRP1, NLRP3, and NAIP5/NLRC4 inflammasomes.

Antioxidative effect of rice bran oil and medium chain fatty acid rich rice bran oil in arsenite induced oxidative stress in rats.

Influence of zinc supplementation on histopathological changes in the stomach, liver, kidney, brain, pancreas and spleen during subchronic exposure of Wistar rats to glyphosate.

Effect of SP-A/B in lipoic acid on acute paraquat poisoning.

Serum biochemical assessment of hepatic and renal functions of rats during oral exposure to glyphosate with zinc.

Ameliorative Effect of Tephrosia Purpurea in Arsenic-induced Nephrotoxicity in Rats.

Assessment of genotoxic potential of arsenic in female albino rats at permissible dose levels.

Alpha-lipoic acid protects oxidative stress, changes in cholinergic system and tissue histopathology during co-exposure to arsenic-dichlorvos in rats.

Proton-coupled organic cation antiporter-mediated uptake of apomorphine enantiomers in human brain capillary endothelial cell line hCMEC/D3.

Serum dioxin concentrations and bone density and structure in the Seveso Women's Health Study.

Predictors of acute respiratory distress syndrome in patients with paraquat intoxication.

Effect of a glyphosate-based herbicide in *Cyprinus carpio*: assessment of acetylcholinesterase activity, hematological responses and serum biochemical parameters.

Single-cell gel electrophoresis assay in the ten spotted live-bearer fish, *Gambusia affinis holbrooki* (Jenyns, 1842), as bioassay for agrochemical-induced genotoxicity.

Antimycobacterial and herbicidal activity of ring-substituted 1-hydroxynaphthalene-2-carboxanilides.

Mutagenicity and genotoxicity in gill erythrocyte cells of *Poecilia reticulata* exposed to a glyphosate formulation.

Diphenyl diselenide prevents hepatic alterations induced by paraquat in rats.

Using bosentan to treat paraquat poisoning-induced acute lung injury in rats.

Toll-like receptor 4 is involved in myocardial damage following paraquat poisoning in mice.

Methemoglobinemia following ingestion of a weedicide.

Inhibitory effects of rosiglitazone on paraquat-induced acute lung injury in rats.

Methylene blue protects against paraquat-induced acute lung injury in rats.

Procedures to evaluate the efficiency of protective clothing worn by operators applying pesticide.

Non-destructive multibiomarker approach in European quail (*Coturnix coturnix coturnix*) exposed to the herbicide atrazine.

Effect of methylsulfonylmethane on paraquat-induced acute lung and liver injury in mice.

Effects of in vivo exposure to Roundup® on immune system of *Caiman latirostris*.

Agent Orange exposure and prevalence of self-reported diseases in Korean Vietnam veterans.

DNA damage and oxidative stress modulatory effects of glyphosate-based herbicide in freshwater fish, *Channa punctatus*.

Effect of safeners on damage of human erythrocytes treated with chloroacetamide herbicides.

Evaluation of selected biomarkers for the detection of chemical sensitization in human skin: a comparative study applying THP-1, MUTZ-3 and primary dendritic cells in culture.

The relationship between Agent Orange and prostate specific antigen: a comparison of a hotspot and a non-sprayed area in Vietnam.

Paraquat-induced convulsion and death: a report of five cases.

[Successful treatment of paraquat poisoning with hemolytic anemia: a report of 1 case].

Effect of atrazine and chlorpyrifos exposure on cytochrome P450 contents and enzyme activities in common carp gills.

Acetylcholinesterase in honey bees (*Apis mellifera*) exposed to neonicotinoids, atrazine and glyphosate: laboratory and field experiments.

On the methodological limitations of detecting oxidative stress: effects of paraquat on measures of oxidative status in greenfinches.

The suppressor of cytokine signaling 2 (SOCS2) modulating the neurotransmitters release in *Eriocheir sinensis*.

Hematological and biochemical alterations in the fish *Prochilodus lineatus* caused by the herbicide clomazone.

Exposure to herbicides in house dust and risk of childhood acute lymphoblastic leukemia.

Cytotoxicity on human cells of Cry1Ab and Cry1Ac Bt insecticidal toxins alone or with a glyphosate-based herbicide.

Spinal transient receptor potential ankyrin 1 channel induces mechanical hypersensitivity, increases cutaneous blood flow, and mediates the pronociceptive action of dynorphin A.

Toxic, cytotoxic, and genotoxic effects of a glyphosate formulation (Roundup®SL-Cosmoflux®411F) in the direct-developing frog *Eleutherodactylus johnstonei*.

Toxic and genotoxic effects of Roundup on tadpoles of the Indian skittering frog (*Euflyctis cyanophlyctis*) in the presence and absence of predator stress.

[Effect of treatment with early blood purification combined with prednisone and cyclophosphamide for patients with acute paraquat poisoning].

Paraquat poisoning in pediatric patients.

An evaluation of 2,4-dichlorophenoxyacetic acid in the Amphibian Metamorphosis Assay and the Fish Short-Term Reproduction Assay.

Hypoxia stress test reveals exaggerated cardiovascular effects in hypertensive rats after exposure to the air pollutant acrolein.

Goldfish can recover after short-term exposure to 2,4-dichlorophenoxyacetate: use of blood parameters as vital biomarkers.

Genotoxic effects of the herbicide Roundup(®) in the fish *Corydoras paleatus* (Jenyns 1842) after short-term, environmentally low concentration exposure.

Reduction of dimethylarsinic acid to the highly toxic dimethylarsinous acid by rats and rat liver cytosol.

Determination of glyphosate and AMPA in blood and urine from humans: about 13 cases of acute intoxication.

Evaluation of the genotoxic and cytotoxic effects of glyphosate-based herbicides in the ten spotted live-bearer fish *Gambusia affinis holbrooki* (Jenyns, 1842).

Severe chlorate poisoning successfully treated with methylene blue.

Paraquat-induced retinal degeneration is exaggerated in CX3CR1-deficient mice and is associated with increased retinal inflammation.

Impact of the redox-cycling herbicide diquat on transcript expression and antioxidant enzymatic activities of the freshwater snail *Lymnaea stagnalis*.

Influence of diet with kale on lipid peroxides and malondialdehyde levels in blood serum of laboratory rats over intoxication with paraquat.

[Glyphosate and its formulations--toxicity, occupational and environmental exposure].

Renal replacement therapy in acute poisonings--one center experience.

The uremic toxin acrolein promotes suicidal erythrocyte death.

Cytoprotective effect of alpha-lipoic acid on paraquat-exposed human bronchial epithelial cells via activation of nuclear factor erythroid related factor-2 pathway.

Immunotoxicity of atrazine in Balb/c mice.

Historical long-term exposure to pentachlorophenol causing risk of cancer--a community study.

[Hypoxia-inducible factor-1 α expression in renal tissue of rats with paraquat poisoning].

A 90-day feeding study of glyphosate-tolerant maize with the G2-aroA gene in Sprague-Dawley rats.

Involvement of interleukin-6-regulated nitric oxide synthase in hemorrhagic cystitis and impaired bladder contractions in young rats induced by acrolein, a urinary metabolite of cyclophosphamide.

Impact of four turf management regimes on arthropod abundance in lawns.

Effect of intravenous or oral sodium chlorate administration on the fecal shedding of *Escherichia coli* in sheep.

Comparative study of the possible protective effects of cinnamic acid and cinnamaldehyde on cisplatin-induced nephrotoxicity in rats.

Acrolein stimulates the synthesis of IL-6 and C-reactive protein (CRP) in thrombosis model mice and cultured cells.

Protective effects of cinnamic acid and cinnamic aldehyde on isoproterenol-induced acute myocardial ischemia in rats.

Participation of catalase in voluntary ethanol consumption in perinatally low-level lead-exposed rats.

Role of aldose reductase in the metabolism and detoxification of carnosine-acrolein conjugates.

Mitochondria-targeted antioxidant peptide SS31 protects the retinas of diabetic rats.

Differential morphological effects in rat corpora lutea among ethylene glycol monomethyl ether, atrazine, and bromocriptine.

Chemical composition and hypoglycemic and pancreas-protective effect of leaf essential oil from indigenous cinnamon (*Cinnamomum osmophloeum* Kanehira).

Aldehyde dehydrogenase-2 inhibition blocks remote preconditioning in experimental and human models.

Identification of aldo-keto reductases as NRF2-target marker genes in human cells.

Thirteen week rodent feeding study with grain from molecular stacked trait lepidopteran and coleopteran protected (DP-4114-3) maize.

Arsenic speciation in saliva of acute promyelocytic leukemia patients undergoing arsenic trioxide treatment.

Synergistic action of cinnamaldehyde with silver nanoparticles against spore-forming bacteria: a case for judicious use of silver nanoparticles for antibacterial applications.

The ultra-early protective effect of ulinastatin on rabbit acute lung injury induced by paraquat.

Combined treatment with bone marrow mesenchymal stem cells and methylprednisolone in paraquat-induced acute lung injury.

Synthesis of novel phosphorylated guanidine derivatives from cyanamide and their anti-inflammatory activity.

Inhibitory effects against pasture weeds in Brazilian Amazonia of natural products from the marine brown alga *Dictyota menstrualis*.

Use of biometric, hematologic, and plasma biochemical variables, and histopathology to assess the chronic effects of the herbicide prometryn on Common Carp.

In vivo absorption, distribution, excretion, and metabolism of a new herbicide, methiozolin, in rats following oral administration.

Stimulation of suicidal erythrocyte death by trans-cinnamaldehyde.

[Distribution of arsenic species and its DNA damage in subchronic arsenite-exposed mice].

Sub-acute exposure to the herbicide atrazine suppresses cell immune functions in adolescent mice.

Changes in nitrosative stress biomarkers in swine intestine following dietary intervention with verbascoside.

[Determination of 15 kinds of pesticides in blood by gas chromatography-mass spectrometry].

Enzyme inhibitor studies reveal complex control of methyl-D-erythritol 4-phosphate (MEP) pathway enzyme expression in *Catharanthus roseus*.

Antimitotic herbicides bind to an unidentified site on malarial parasite tubulin and block development of liver-stage *Plasmodium* parasites.

Antioxidant action of ellagic acid ameliorates paraquat-induced A549 cytotoxicity.

Malabsorption anemia and iron supplement induced constipation in post-Roux-en-Y gastric bypass (RYGB) patients.

Circulating soluble CD27 and CD30 in workers exposed to 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD).

Protein-bound uremic toxins stimulate crosstalk between leukocytes and vessel wall.

Pea protein provides a promising matrix for microencapsulating iron.

Bone remodelling is reduced by recovery from iron-deficiency anaemia in premenopausal women.

Does the adequacy parameter $Kt/V(\text{urea})$ reflect uremic toxin concentrations in hemodialysis patients?

Stability and performance of rapid-acting insulin analogs used for continuous subcutaneous insulin infusion: a systematic review.

The effect of a school-based iron intervention on the haemoglobin concentration of school children in north-west Pakistan.

Kidney hypoxia, attributable to increased oxygen consumption, induces nephropathy independently of hyperglycemia and oxidative stress.

Ten years of progress in the Hokkaido birth cohort study on environment and children's health: cohort profile--updated 2013.

Metabonomic study on the biochemical response of spontaneously hypertensive rats to chronic taurine supplementation using $(1)H$ NMR spectroscopic urinalysis.

Protein-bound uremic toxins—new targets to prevent insulin resistance and dysmetabolism in patients with chronic kidney disease.

Association between blood levels of PCDDs/PCDFs/dioxin-like PCBs and history of allergic and other diseases in the Japanese population.

Relationships between in vitro lymphoproliferative responses and levels of contaminants in blood of free-ranging adult harbour seals (*Phoca vitulina*) from the North Sea.

IRON-HF study: a randomized trial to assess the effects of iron in heart failure patients with anemia.

Indolic uremic solutes increase tissue factor production in endothelial cells by the aryl hydrocarbon receptor pathway.

[Role of iron in the treatment of attention deficit-hyperactivity disorder].

Interventions for preventing diarrhea-associated hemolytic uremic syndrome: systematic review.

Iron supplementation among pregnant women: results from a population-based survey study.

Coverage and adequacy of ferrous sulfate supplementation in the prevention of anemia among children treated at health centers of Florianopolis, Santa Catarina.

[Effectiveness of ferrous sulfate supplementation in the prevention of anemia in children: a systematic literature review and meta-analysis].

Associations between plasma persistent organic pollutant levels and blood pressure in Inuit adults from Nunavik.

Prenatal exposure to environmental contaminants and behavioural problems at age 7-8years.

Sox9b is required for epicardium formation and plays a role in TCDD-induced heart malformation in zebrafish.

Low-dose food contaminants trigger sex-specific, hepatic metabolic changes in the progeny of obese mice.

Maternal diet, prenatal exposure to dioxins and other persistent organic pollutants and anogenital distance in children.

Iron supplementation in premature infants using the zinc protoporphyrin to heme ratio: short- and long-term outcomes.

Regulation of protease-activated receptor-1 expression in human buccal fibroblasts stimulated with arecoline.

Cluster-randomised trial of the impact of school-based deworming and iron supplementation on the cognitive abilities of schoolchildren in Sri Lanka's plantation sector.

Diabetes, metabolic syndrome, and obesity in relation to serum dioxin concentrations: the Seveso women's health study.

Proteomic analysis of primary cultured rat cortical neurons in chemical ischemia.

Individuals' half-lives for 2,3,4,7,8-penta-chlorodibenzofuran (PeCDF) in blood: correlation with clinical manifestations and laboratory results in subjects with Yusho.

Ascertainment of iron deficiency and depletion in blood donors through screening questions for pica and restless legs syndrome.

Schistosomiasis chemotherapy.

The aryl hydrocarbon receptor and estrogen receptor alpha differentially modulate nuclear factor erythroid-2-related factor 2 transactivation in MCF-7 breast cancer cells.

Temperature increase exacerbates apoptotic neuronal death in chemically-induced ischemia.

Smoke carcinogens cause bone loss through the aryl hydrocarbon receptor and induction of Cyp1 enzymes.

[Effectiveness of iron amino acid chelate versus ferrous sulfate as part of a food complement in preschool children with iron deficiency, Medell n, 2011].

Hyperuricemia after exposure to polychlorinated dibenzo-p-dioxins and dibenzofurans near a highly contaminated area.

Antioxidant and micronutrient-rich milk formula reduces lead poisoning and related oxidative damage in lead-exposed mice.

Novel cell-based assay reveals associations of circulating serum AhR-ligands with metabolic syndrome and mitochondrial dysfunction.

Use of near-infrared spectroscopy to identify trends in regional cerebral oxygen saturation in horses.

Hematological effects of arsenic in rats after subchronical exposure during pregnancy and lactation: the protective role of antioxidants.

Does p-cresylglucuronide have the same impact on mortality as other protein-bound uremic toxins?

Prevention of transfusion-associated graft-versus-host disease by irradiation: technical aspect of a new ferrous sulphate dosimetric system.

Differences in circulating non-transferrin-bound iron after oral administration of ferrous sulfate, sodium iron EDTA, or iron polymaltose in women with marginal iron stores.

Aberrant pulmonary lymphatic development in the nitrofen mouse model of congenital diaphragmatic hernia.

[Relationship between parental exposure to chemicals and risk of childhood acute leukemia].

Iron plays a certain role in patterned hair loss.

Effects of iron polymaltose complex, ferrous fumarate and ferrous sulfate treatments in anemic pregnant rats, their fetuses and placentas.

Multidrug resistance protein 1 (ABCC1) confers resistance to arsenic compounds in human myeloid leukemic HL-60 cells.

Severe anemia in 3 toddlers with gastric lact bezoar.

Multiple micronutrient supplementation reduces anemia and anxiety in rural China's elementary school children.

Intravenous iron sucrose versus oral iron ferrous sulfate for antenatal and postpartum iron deficiency anemia: a randomized trial.

Association between exposure to dioxin-like polychlorinated biphenyls and miR-191 expression in human peripheral blood mononuclear cells.

Gastrointestinal stromal tumors, somatic mutations and candidate genetic risk variants.

The changes in dioxin concentrations in the blood of Yusho patients from 2004 to 2010.

Development of a newly large-volume injection system for dioxin determinations in blood of Yusho patients.

Managing severe anemia when the patient is a Jehovah's Witness.

Postmortem analyses of gaseous and volatile substances in pericardial fluid and bone marrow aspirate.

Exposure to persistent organic pollutants and risk of hypertension among Inuit from Greenland.

Removal of protein-bound, hydrophobic uremic toxins by a combined fractionated plasma separation and adsorption technique.

Tolerability of different oral iron supplements: a systematic review.

Low serum lipocalin levels in patients with iron deficiency anemia.

The influence of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on hematological parameters during experimentally induced pleuritis in rats.

Iron bioavailability in Wistar rats fed with fortified rice by Ultra Rice technology with or without addition of yacon flour (*Smallanthus sonchifolius*).

[Problems of adherence to the program of prevention of iron deficiency anemia and supplementation with iron salts in the city of Viçosa, Minas Gerais, Brazil].

Cases from NACCT acute and intensive care symposium: altered mental status, seizures, and rash in a fumigation company employee.

A randomized, double-blind clinical study on the safety and tolerability of an iron multi-amino acid chelate preparation in premenopausal women.

Uncoupling mitochondrial activity maintains body [Formula: see text] during hemorrhage-induced O₂ deficit in the anesthetized rat.

Differential sensitivity to pro-oxidant exposure in two populations of killifish (*Fundulus heteroclitus*).

Functional regulation of P-glycoprotein at the blood-brain barrier in proton-coupled folate transporter (PCFT) mutant mice.

Genetic susceptibility to dioxin-like chemicals' induction of cytochrome P4501A2 in the human adult linked to specific AhRR polymorphism.

Comparison of treatments to inactivate viral hemorrhagic septicemia virus (VHSV-IVb) in frozen baitfish.

[Reduction in alcohol consumption: therapeutic goal in alcohol dependence treatment].

Hepcidin levels predict nonresponsiveness to oral iron therapy in patients with iron deficiency anemia.

Intrarenal metabolomic investigation of chronic kidney disease and its TGF- β 1 mechanism in induced-adenine rats using UPLC Q-TOF/HSMS/MS(E).

Characterization of residential pesticide use and chemical formulations through self-report and household inventory: the Northern California Childhood Leukemia study.

Arsenic increases Pi-mediated vascular calcification and induces premature senescence in vascular smooth muscle cells.

Blood levels of PCDDs, PCDFs, and coplanar PCBs in Yusho mothers and their descendants: association with fetal Yusho disease.

Inorganic arsenic impairs differentiation and functions of human dendritic cells.

Cultured human peripheral blood mononuclear cells alter their gene expression when challenged with endocrine-disrupting chemicals.

A forgotten screening test for iron deficiency anemia: oral iron absorption test.

Iron absorption following a single oral dose of ferrous sulfate or ferric gluconate in patients with gastrectomy.

Increased kidney metabolism as a pathway to kidney tissue hypoxia and damage: effects of triiodothyronine and dinitrophenol in normoglycemic rats.

Occurrence of disseminated intravascular coagulation in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced pneumonia in the rat.

Removal of protein-bound uraemic toxins by haemodialysis.

Prenatal exposure to a polychlorinated biphenyl (PCB) congener influences fixation duration on biological motion at 4-months-old: a preliminary study.

[Statement of the Polish Gynecological Society Expert Group on the use of iron preparations (Tardyferon, Tardyferon-Fol) in obstetrics and gynaecology].

A genetically encoded FRET lactate sensor and its use to detect the Warburg effect in single cancer cells.

Isoflurane preconditioning confers cardioprotection by activation of ALDH2.

Clinical benefits of predilution on-line hemodiafiltration.

Warburg and Crabtree effects in premalignant Barrett's esophagus cell lines with active mitochondria.

Increased activation of NADPH oxidase 4 in the pulmonary vasculature in experimental diaphragmatic hernia.

Evaluation of lipid peroxidation and antioxidant system in healthy iron-replete infants receiving iron prophylaxis.

Iron autointoxication in a 16-year-old girl: a protective role for hepcidin?

Effect of different doses of iron supplementation during pregnancy on maternal and infant health.

Protective effects of protocatechuic acid on TCDD-induced oxidative and histopathological damage in the heart tissue of rats.

Construction and characterization of peroxisome proliferator-activated receptor-gamma co-activator 1 alpha (PGC-1 α) over-expressing cell line derived from human hepatocyte carcinoma HepG2 cells).

Sodium arsenite induced reactive oxygen species generation, nuclear factor (erythroid-2 related) factor 2 activation, heme oxygenase-1 expression, and glutathione elevation in Chang human hepatocytes.

Surface fluorescence studies of tissue mitochondrial redox state in isolated perfused rat lungs.

Evaluation of biomonitoring data from the CDC National Exposure Report in a risk assessment context: perspectives across chemicals.

TCDD inhibits heart regeneration in adult zebrafish.

In vitro propagation and production of cardiotoxic glycosides in shoot cultures of *Digitalis purpurea* L. by elicitation and precursor feeding.

Oxysterols modulate calcium signalling in the A7r5 aortic smooth muscle cell-line.

Chromatographic behaviour predicts the ability of potential nootropics to permeate the blood-brain barrier.

Elimination rates of dioxin congeners in former chlorophenol workers from Midland, Michigan.

Characterization of placental transfer of polychlorinated dibenzo-p-dioxins, dibenzofurans and polychlorinated biphenyls in normal pregnancy.

Mast cell-based electrochemical biosensor for quantification of the major shrimp allergen Pen a 1 (tropomyosin).

Glyphosate, pathways to modern diseases II: Celiac sprue and gluten intolerance.

Paraquat poisoning by skin absorption: Two case reports and a literature review.

[Homocysteine peroxidase activity in rat blood plasma: stoichiometry and enzymatic character of the reaction].

Biomarkers of oral exposure to 3-nitro-1,2,4-triazol-5-one (NTO) and 2,4-dinitroanisole (DNAN) in blood and urine of rhesus macaques (*Macaca mulatta*).

Identification and analysis of an impurity inducing clinical adverse effect in anti-adhesion carboxymethyl chitosan products.

Body burden monitoring of dioxins and other organic substances in workers at a hazardous waste incinerator.

Paraquat Exposure Up-regulates Cyclooxygenase-2 in the Lungs, Liver and Kidneys in Rats.

Resveratrol stimulates mitochondrial bioenergetics to protect retinal pigment epithelial cells from oxidative damage.

Gene expression and pathologic alterations in juvenile rainbow trout due to chronic dietary TCDD exposure.

Serum arylhydrocarbon receptor transactivating activity is elevated in type 2 diabetic patients with diabetic nephropathy.

[Effects of hemoperfusion on the patients with acute toxication of 2, 4-dinitrophenol].

The mortality and cancer experience of New Zealand Vietnam war veterans: a cohort study.

Dietary exposure to dioxins and PCBs in a large cohort of pregnant women: results from the Norwegian Mother and Child Cohort Study (MoBa).

Acute toxicity of some synthetic cyanogens in rats: time-dependent cyanide generation and cytochrome oxidase inhibition in soft tissues after sub-lethal oral intoxication.

The aryl hydrocarbon receptor interacts with nuclear factor erythroid 2-related factor 2 to mediate induction of NAD(P)H:quinoneoxidoreductase 1 by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effect of nicotine pretreatment on arsenic-induced oxidative stress in male Wistar rats.

Perinatal exposure to purity-controlled polychlorinated biphenyl 52, 138, or 180 alters toxicogenomic profiles in peripheral blood of rats after 4 months.

Emerging causes of iron deficiency anemia refractory to oral iron supplementation.

[Preparation of thrombin affinity chromatography media].

Histopathological changes in the liver of rabbits exposed to high nitrate ingestion in drinking water.

Expression and activity of the Na⁺-K⁺ ATPase in ischemic injury of primary cultured astrocytes.

Serum metabolomic perturbations among workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Radiosynthesis and evaluation of new α -1-adrenoceptor antagonists as PET radioligands for brain imaging.

Transplantation of induced pluripotent stem cells without C-Myc attenuates retinal ischemia and reperfusion injury in rats.

Cell to organ: physiological, immunotoxic and oxidative stress responses of *Lamellidens marginalis* to inorganic arsenite.

NMDA receptors in the lateral hypothalamus have an inhibitory influence on the tachycardiac response to acute restraint stress in rats.

Relative effect potency estimates of dioxin-like activity for dioxins, furans, and dioxin-like PCBs in adults based on two thyroid outcomes.

Quartz crystal microbalance measurements of mitochondrial depolarization predicting chemically induced toxicity of vascular cells and macrophages.

Biomarkers of toluene exposure in rats: mercapturic acids versus traditional indicators (urinary hippuric acid and o-cresol and blood toluene).

Tissue distribution of dioxin-like compounds: potential impacts on systemic relative potency estimates.

Gas signatures from *Escherichia coli* and *Escherichia coli*-inoculated human whole blood.

Dioxin-like compounds and bone quality in Cree women of Eastern James Bay (Canada): a cross-sectional study.

Protective effect of *Juglans nigra* on sodium arsenite-induced toxicity in rats.

Protective effects of *Vernonia amygdalina* against sodium arsenite-induced genotoxicity in rat.

Effects of lovastatin, clomazone and methyl jasmonate treatment on the accumulation of purpurin and mollugin in cell suspension cultures of *Rubia cordifolia*.

Xenoestrogenic and dioxin-like activity in blood of East Greenland polar bears (*Ursus maritimus*).

Persistent toxic burdens of halogenated phenolic compounds in humans and wildlife.

Arsenic speciation in the blood of arsenite-treated F344 rats.

Genetic association of aromatic hydrocarbon receptor (AHR) and cytochrome P450, family 1, subfamily A, polypeptide 1 (CYP1A1) polymorphisms with dioxin blood concentrations among pregnant Japanese women.

Effects of Zinc Sulfate Supplementation in Treatment of Iron Deficiency Anemia.

Urinary Arsenic Concentrations and their Associated Factors in Korean Adults.

Oral administration of hesperidin, a citrus flavonone, in rats counteracts the oxidative stress, the inflammatory cytokine production, and the hepatotoxicity induced by the ingestion of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Synthesis and cytotoxicity of oligomycin A derivatives modified in the side chain.

Dietary carnosine prevents early atherosclerotic lesion formation in apolipoprotein E-null mice.

Switchable skin window induced by optical clearing method for dermal blood flow imaging.

The protective effects of the proteasome inhibitor bortezomib (velcade) on ischemia-reperfusion injury in the rat retina.

Two-photon microscopy and fluorescence lifetime imaging of retinal pigment epithelial cells under oxidative stress.

Comparison of nicotine and carcinogen exposure with water pipe and cigarette smoking.

[Inter-laboratory crosscheck study of dioxins and PCBs in human blood samples].

Determination of urinary 6-mercaptopurine and three of its metabolites by HPLC-UV coupled with the iodine-azide reaction.

Synthesis and bioevaluation of [(18)F]4-fluoro-m-hydroxyphenethylguanidine ([[(18)F]4F-MHPG): a novel radiotracer for quantitative PET studies of cardiac sympathetic innervation.

Determination of dioxin-like polychlorinated biphenyls in 1 mL whole blood using programmable temperature vaporization large volume injection coupled to gas chromatogram and high-resolution mass spectrometry.

[Expression of hemolytic phospholipase C from *Pseudomonas aeruginosa* in *Escherichia coli*].

Combined use of irreversible binding and MRM technology for low- and ultralow copy-number protein detection and quantitation.

Comparison of routine prenatal iron prophylaxis and screening and treatment for anaemia: pregnancy results and preliminary birth results from a pragmatic randomised controlled trial (PROFEG) in Maputo, Mozambique.

Therapeutic effects of smecta or smectite powder on rats with paraquat toxication.

Binding interaction between (-)-epigallocatechin gallate causes impaired spreading of cancer cells on fibrinogen.

Correlation between Serum Levels of Protein-Bound Uremic Toxins in Hemodialysis Patients Measured by LC/MS/MS.

Human adipose tissue derived stem cells promote liver regeneration in a rat model of toxic injury.

Cancer incidence in pulmonary vasculitis.

Nrf2 protection against liver injury produced by various hepatotoxicants.

A Systematic Review of Carcinogenic Outcomes and Potential Mechanisms from Exposure to 2,4-D and MCPA in the Environment.

Metabolic signatures of extreme longevity in northern Italian centenarians reveal a complex remodeling of lipids, amino acids, and gut microbiota metabolism.

Changes in the expression of vascular endothelial growth factor after fetal tracheal occlusion in an experimental model of congenital diaphragmatic hernia.

A novel murine model to deplete hepatic stellate cells uncovers their role in amplifying liver damage in mice.

Butachlor induced dissipation of mitochondrial membrane potential, oxidative DNA damage and necrosis in human peripheral blood mononuclear cells.

Therapeutic potential of intravenous Xuebijing on transforming growth factor beta1 and procollagen type III peptide in patients with acute paraquat poisoning.

Proteomic analysis of changes in protein expression in serum from animals exposed to paraquat.

2,4-D exposure and risk assessment: comparison of external dose and biomonitoring based approaches.

The oxidative damage and inflammation caused by pesticides are reverted by lipoic acid in rat brain.

Toxicity of atrazine and nonylphenol in juvenile rainbow trout (*Oncorhynchus mykiss*): effects on general health, disease susceptibility and gene expression.

[Clinical studies of dynamic changes on the renal injury indicators of acute paraquat poisoning].

Haematology and blood chemistry changes in mice treated with terbuthylazine and its formulation Radazin TZ-50.

Changes in lymphocyte subsets in workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Atrazine promotes biochemical changes and DNA damage in a Neotropical fish species.

Pesticide application to agricultural fields: effects on the reproduction and avoidance behaviour of *Folsomia candida* and *Eisenia andrei*.

Innate immune response of silver catfish (*Rhamdia quelen*) exposed to atrazine.

Nrf2 protects against diquat-induced liver and lung injury.

Overexpression of stanniocalcin-1 inhibits reactive oxygen species and renal ischemia/reperfusion injury in mice.

Inhibition of aminoacylase 3 protects rat brain cortex neuronal cells from the toxicity of 4-hydroxy-2-nonenal mercapturate and 4-hydroxy-2-nonenal.

[Early continuous dialysis in acute glyphosate-surfactant poisoning].

[Influence factors for prognosis in patients with acute oral poisoning with paraquat].

[Optimal conditions of bone marrow mesenchymal stem cells on paraquat-induced acute lung injury in rats].

Pathological and toxicological findings in glyphosate-surfactant herbicide fatality: a case report.

L-Theanine extends lifespan of adult *Caenorhabditis elegans*.

Influence of 50-nm polystyrene particles in inducing cytotoxicity in mice co-injected with carbon tetrachloride, cisplatin, or paraquat.

[Therapeutic effects of epidermal growth factor (EGF) combined with plasma cryoprecipitate (CRYO) on the corneal injury induced by paraquat].

Pentachlorophenol decreases tumor-cell-binding capacity and cell-surface protein expression of human natural killer cells.

Immunotoxic and cytotoxic effects of atrazine, permethrin and piperonyl butoxide to rainbow trout following in vitro exposure.

Biochemical study of retired pentachlorophenol workers with and without following dietary exposure to PCDD/Fs.

Glucocorticoid with cyclophosphamide for paraquat-induced lung fibrosis.

Differential genotoxicity of Roundup(®) formulation and its constituents in blood cells of fish (*Anguilla anguilla*): considerations on chemical interactions and DNA damaging mechanisms.

[Expression of the 4-hydroxynonenal in lung tissue in rats with paraquat poisoned and the effect of ulinastatin].

Responses of growth performance and tryptophan metabolism to oxidative stress induced by diquat in weaned pigs.

Effects of herbicides and the chytrid fungus *Batrachochytrium dendrobatidis* on the health of post-metamorphic northern leopard frogs (*Lithobates pipiens*).

Bark extract of *Bathysa cuspidata* attenuates extra-pulmonary acute lung injury induced by paraquat and reduces mortality in rats.

Uncaria tomentosa extracts protect human erythrocyte catalase against damage induced by 2,4-D-Na and its metabolites.

Detection of early effects of a single herbicide (diuron) and a mix of herbicides and pharmaceuticals (diuron, isoproturon, ibuprofen) on immunological parameters of Pacific oyster (*Crassostrea gigas*) spat.

Effects of in vivo chronic exposure to pendimethalin/Prowl 400® on sanitary status and the immune system in rainbow trout (*Oncorhynchus mykiss*).

Effect of chronic exposure to pendimethalin on the susceptibility of rainbow trout, *Oncorhynchus mykiss* L., to viral hemorrhagic septicemia virus (VHSV).

Farmers' exposure to herbicides in North Italy: assessment under real-life conditions in small-size rice and corn farms.

[The relationship between HIF-1 α expression and the early lung fibrosis in rats with acute paraquat poisoning].

Copper and the herbicide atrazine impair the stress response of the freshwater fish *Prochilodus lineatus*.

Early cytotoxic and genotoxic effects of atrazine on Wistar rat liver: a morphological, immunohistochemical, biochemical, and molecular study.

[Experimental anticoagulant therapy of acute lung injury induced by paraquat].

Effects of short-term sodium chlorate exposure on pigs.

Acute oral poisoning due to chloracetanilide herbicides.

Hypercholesterolemia and oxidative stress inhibit endothelial cell healing after arterial injury.

Effects of long-term exposure to simazine in real concentrations on common carp (*Cyprinus carpio* L.).

Plasma dioxin levels and cause-specific mortality in an occupational cohort of workers exposed to chlorophenoxy herbicides, chlorophenols and contaminants.

Sequential organ failure assessment score can predict mortality in patients with paraquat intoxication.

The value of plasma paraquat concentration in predicting therapeutic effects of haemoperfusion in patients with acute paraquat poisoning.

Species-dependent effects of the phenolic herbicide ioxynil with potential thyroid hormone disrupting activity: modulation of its cellular uptake and activity by interaction with serum thyroid hormone-binding proteins.

Developmental exposure to diuron causes splenotoxicity in male Sprague-Dawley rat pups.

Effect of chronic pesticide exposure in farm workers of a Mexico community.

Reduction of mitoferrin results in abnormal development and extended lifespan in *Caenorhabditis elegans*.

A longer tracheal occlusion period results in increased lung growth in the nitrofen rat model.

Effect of bark extract of *Bathysa cuspidata* on hepatic oxidative damage and blood glucose kinetics in rats exposed to paraquat.

Standardized extracts of *Bacopa monniera* protect against MPP⁺ and paraquat-induced toxicity by modulating mitochondrial activities, proteasomal functions, and redox pathways.

The tobacco smoke component, acrolein, suppresses innate macrophage responses by direct alkylation of c-Jun N-terminal kinase.

Acquiring transgenic tobacco plants with insect resistance and glyphosate tolerance by fusion gene transformation.

Proton pumping ATPase mediated fungicidal activity of two essential oil components.

Antihyperglycemic and antihyperlipidemic action of cinnamaldehyde in C57BLKS/J db/db mice.

GC-MS analysis and screening of antidiabetic, antioxidant and hypolipidemic potential of *Cinnamomum tamala* oil in streptozotocin induced diabetes mellitus in rats.

[Effect of acrolein exposure on the percentage of CD4⁺CD25⁺ regulatory T cells and expression of transcription factor Foxp3 in asthmatic rats].

Potential use of nitrate reductase as a biomarker for the identification of active and dormant inhibitors of *Mycobacterium tuberculosis* in a THP1 infection model.

Attenuation of mouse somatic and emotional inflammatory pain by hydralazine through scavenging acrolein and inhibiting neuronal activation.

Resveratrol inhibits paraquat-induced oxidative stress and fibrogenic response by activating the nuclear factor erythroid 2-related factor 2 pathway.

Cinnamic aldehydes affect hydrolytic enzyme secretion and morphogenesis in oral *Candida* isolates.

Evaluating the efficacy of cinnamaldehyde and *Echinacea purpurea* plant extract in broilers against *Eimeria acervulina*.

Inverse correlation between stroke and urinary 3-hydroxypropyl mercapturic acid, an acrolein-glutathione metabolite.

[Determination of glyphosate in heart blood of corpse by ion chromatography].

Hypothesis: Estrogen related thrombosis explains the pathogenesis and epidemiology of gastroschisis.

Anticandidal activity of curcumin and methyl cinnamaldehyde.

Quantification of paraquat in postmortem samples by gas chromatography-ion trap mass spectrometry and review of the literature.

Enhanced catabolism to acetaldehyde in rostral ventrolateral medullary neurons accounts for the pressor effect of ethanol in spontaneously hypertensive rats.

2-methoxycinnamaldehyde from *Cinnamomum cassia* reduces rat myocardial ischemia and reperfusion injury in vivo due to HO-1 induction.

Ingestion of cinnamaldehyde, a TRPA1 agonist, reduces visceral fats in mice fed a high-fat and high-sucrose diet.

Anti-diabetic effects of TongGuanWan, a Chinese traditional herbal formula, in C57BL/KsJ-db/db mice.

Effects of exogenous methionine on arsenic burden and NO metabolism in brain of mice exposed to arsenite through drinking water.

Endogenous hydrogen peroxide in the hypothalamic paraventricular nucleus regulates sympathetic nerve activity responses to L-glutamate.

Reactive carbonyl compounds (RCCs) cause aggregation and dysfunction of fibrinogen.

A lung dosimetry model of vapor uptake and tissue disposition.

Hydrogen peroxide enhances vasodilatation by increasing dimerization of cGMP-dependent protein kinase type II.

Determination of tissue to blood partition coefficients for nonvolatile herbicides, insecticides, and fungicides using negligible depletion solid-phase microextraction (nd-SPME) and ultrafiltration.

Effects of a wheat bran extract containing arabinoxylan oligosaccharides on gastrointestinal health parameters in healthy adult human volunteers: a double-blind, randomised, placebo-controlled, cross-over trial.

Combined iron and zinc supplementation improves haematologic status of pregnant women in Upper West Region of Ghana.

Fortifying baladi bread in Egypt: reaching more than 50 million people through the subsidy program.

Pesticide exposure in children.

Toxicity of untreated and ozone-treated oil sands process-affected water (OSPW) to early life stages of the fathead minnow (*Pimephales promelas*).

Characterization of ecto-ATPase activity in the surface of LLC-PK1 cells and its modulation by ischemic conditions.

Synergistic effect of conjugated linolenic acid isomers against induced oxidative stress, inflammation and erythrocyte membrane disintegrity in rat model.

Reproductive hormone profile and pubertal development in 14-year-old boys prenatally exposed to polychlorinated biphenyls.

Effect of iron supplementation on development of iron deficiency anemia in breastfed infants.

Liberation of copper from amyloid plaques: making a risk factor useful for Alzheimer's disease treatment.

Environmental arsenic exposure and DNA methylation of the tumor suppressor gene p16 and the DNA repair gene MLH1: effect of arsenic metabolism and genotype.

The role of protein-bound uremic toxins on peripheral artery disease and vascular access failure in patients on hemodialysis.

A randomized controlled trial of oral heme iron polypeptide versus oral iron supplementation for the treatment of anaemia in peritoneal dialysis patients: HEMATOCRIT trial.

Reduced birth weight in relation to pesticide mixtures detected in cord blood of full-term infants.

Importance of riboflavin kinase in the pathogenesis of stroke.

Global gene expression analysis in cord blood reveals gender-specific differences in response to carcinogenic exposure in utero.

Quantification of p-cresol sulphate in human plasma by selected reaction monitoring.

Changes in the synaptic structure of hippocampal neurons and impairment of spatial memory in a rat model caused by chronic arsenite exposure.

Associations of dioxins, furans and dioxin-like PCBs with diabetes and pre-diabetes: is the toxic equivalency approach useful?

Formulation of oryzalin (ORZ) liposomes: in vitro studies and in vivo fate.

Long-term toxicology and carcinogenicity of 2,4,6-trichlorophenol.

Switching iron-deficient whole blood donors to plateletpheresis.

Milk-based cornstarch porridge fortified with iron is effective in reducing anemia: a randomized, double-blind, placebo-controlled trial.

Suicidal sodium azide intoxication: An analytical challenge based on a rare case.

Mild uncoupling of respiration and phosphorylation as a mechanism providing nephro- and neuroprotective effects of penetrating cations of the SkQ family.

[Human biomonitoring and variation of haematic parameters in a population exposed to PCB and dioxin near a steel plant in the lower Susa Valley].

Treatment of mild non-chemotherapy-induced iron deficiency anemia in cancer patients: comparison between oral ferrous bisglycinate chelate and ferrous sulfate.

Synergistic effects of tributyltin and 2,3,7,8-tetrachlorodibenzo-p-dioxin on differentiating osteoblasts and osteoclasts.

Patch testing with the textile dyes Disperse Orange 1 and Disperse Yellow 3 and some of their potential metabolites, and simultaneous reactions to para-amino compounds.

Photoinactivation of cell-free human immunodeficiency virus by hematoporphyrin monomethyl ether.

Inactivation of the sodA gene of *Streptococcus suis* type 2 encoding superoxide dismutase leads to reduced virulence to mice.

Effect of iron supplementation on fatigue in nonanemic menstruating women with low ferritin: a randomized controlled trial.

[Statement of the Polish Gynecological Society Expert Group on the use of ellen probiotic tampon].

EDTA-dependent pseudothrombocytopenia: further insights and recommendations for prevention of a clinically threatening artifact.

Mechanistic exploration of AhR-mediated host protection against *Streptococcus pneumoniae* infection.

A NUP98-HOXD13 leukemic fusion gene leads to impaired class switch recombination and antibody production.

FICZ, a tryptophan photoproduct, suppresses pulmonary eosinophilia and Th2-type cytokine production in a mouse model of ovalbumin-induced allergic asthma.

In vivo regulation of the heme oxygenase-1 gene in humanized transgenic mice.

Fetal exposure to propoxur and abnormal child neurodevelopment at 2 years of age.

Curcumin encapsulated in chitosan nanoparticles: a novel strategy for the treatment of arsenic toxicity.

Prenatal polychlorinated biphenyl exposure is associated with decreased gestational length but not birth weight: archived samples from the Child Health and Development Studies pregnancy cohort.

Yusho: 43 years later.

Increased protein carbonylation and decreased antioxidant status in anemic *H. pylori* infected patients: effect of treatment.

Oxidative stress fuels *Trypanosoma cruzi* infection in mice.

Preconditioning induces tolerance by suppressing glutamate release in neuron culture ischemia models.

Lactational transfer of mercury and polychlorinated biphenyls in polar bears.

Iron replacement therapy in the routine management of blood donors.

Sodium arsenite down-regulates the expression of X-linked inhibitor of apoptosis protein via translational and post-translational mechanisms in hepatocellular carcinoma.

Mixture of ferric sodium ethylenediaminetetraacetate (NaFeEDTA) and ferrous sulfate: an effective iron fortificant for complementary foods for young Chinese children.

Maternal diet and dioxin-like activity, bulky DNA adducts and micronuclei in mother-newborns.

Quantitative imaging of arsenic and its species in goat following long term oral exposure.

New agents promote neuroprotection in Parkinson's disease models.

Antenatal imatinib treatment reduces pulmonary vascular remodeling in a rat model of congenital diaphragmatic hernia.

Critical role of microsomal prostaglandin E synthase-1 in the hydronephrosis caused by lactational exposure to dioxin in mice.

Evaluation of paclitaxel/carboplatin in a dose dense or weekly regimen in 66 patients with recurrent or primary metastatic cervical cancer.

The impact of ferritin fluctuations on stable hemoglobin levels in hemodialysis patients.

Gilbert syndrome redefined: a complex genetic haplotype influences the regulation of glucuronidation.

Novel method for simultaneous determination of p-cresylsulphate and p-cresylglucuronide: clinical data and pathophysiological implications.

Iron requirements based upon iron absorption tests are poorly predicted by haematological indices in patients with inactive inflammatory bowel disease.

Comparative study of hypocholesterolemic and hypolipidemic effects of conjugated linolenic acid isomers against induced biochemical perturbations and aberration in erythrocyte membrane fluidity.

Micronutrient status in lactating mothers before and after introduction of fortified flour: cross-sectional surveys in Maela refugee camp.

Adipose tissue and bone marrow-derived stem cells react similarly in an ischaemia-like microenvironment.

Chromosome fragility in river buffalo cows exposed to dioxins.

Treatment with endotracheal therapeutics after sarin microinstillation inhalation exposure increases blood cholinesterase levels in guinea pigs.

Suboptimal response to ferrous sulfate in iron-deficient patients taking omeprazole.

A randomized controlled trial of intravenous or oral iron for posttransplant anemia in kidney transplantation.

[Plummer-Vinson syndrome: report of a case and review of literature].

Aryl hydrocarbon receptor (AhR) regulates silica-induced inflammation but not fibrosis.

Selectively increasing the clearance of protein-bound uremic solutes.

Isolation and identification of C-19 fatty acids with anti-tumor activity from the spores of *Ganoderma lucidum* (reishi mushroom).

Chronic low-level arsenite exposure through drinking water increases blood pressure and promotes concentric left ventricular hypertrophy in female mice.

A metabonomic study of biochemical changes characteristic of genetically hypertensive rats based on ¹H NMR spectroscopic urinalysis.

Two different dosing regimens of human recombinant erythropoietin beta during preoperative autologous blood donation in patients having hip arthroplasty.

[Determination of inorganic toxic anions in blood and urine for diagnosis of their poisoning].

Medication prescribing patterns among chronic kidney disease patients in a hospital in Malaysia.

Thrombocytosis and venous thromboembolism in cancer patients with chemotherapy induced anemia may be related to ESA induced iron restricted erythropoiesis and reversed by administration of IV iron.

Changes in fibrinopeptide A peptides in the sera of rats chronically exposed to low doses of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Polychlorinated biphenyl congeners that increase the glucuronidation and biliary excretion of thyroxine are distinct from the congeners that enhance the serum disappearance of thyroxine.

Efficacy and tolerability of a prolonged release ferrous sulphate formulation in iron deficiency anaemia: a non-inferiority controlled trial.

[Targeting malaria parasite at the level of apicoplast: an update].

Iron depletion and repletion with ferrous sulfate or electrolytic iron modifies the composition and metabolic activity of the gut microbiota in rats.

Synergism between arsenite and proteasome inhibitor MG132 over cell death in myeloid leukaemic cells U937 and the induction of low levels of intracellular superoxide anion.

Clinical evaluation of iron treatment efficiency among non-anemic but iron-deficient female blood donors: a randomized controlled trial.

[Comparative evaluation of efficacy and tolerance of iron polymaltose complex and ferrous sulphate for treatment of iron deficiency anemia in infants].

[Suicidal intoxication with sodium azide--a case report].

Induction of brain microvascular endothelial cell urokinase expression by *Cryptococcus neoformans* facilitates blood-brain barrier invasion.

Global DNA methylation not increased in chronic hemodialysis patients: a case-control study.

Quantitative proteomic analyses of cerebrospinal fluid using iTRAQ in a primate model of iron deficiency anemia.

Oxidative stress-induced glomerular mineralocorticoid receptor activation limits the benefit of salt reduction in Dahl salt-sensitive rats.

[Exploring the mechanism of rhizoma coptidis in treating type II diabetes mellitus based on metabolomics by gas chromatography-mass spectrometry].

Ferrous versus ferric oral iron formulations for the treatment of iron deficiency: a clinical overview.

Enhancing effects of trichloroethylene and tetrachloroethylene on type I allergic responses in mice.

Long-term consequences of iron-fortified flour consumption in nonanemic men.

Circulating levels of persistent organic pollutants (POPs) and carotid atherosclerosis in the elderly.

The removal of protein-bound solutes by dialysis.

An update on protein-bound uremic retention solutes.

Maternal exposure to high levels of dioxins in relation to birth weight in women affected by Yusho disease.

Influence of lactoferrin in preventing preterm delivery: a pilot study.

In vitro evaluation of betamethasone esters for phototoxic potential.

Transgenic tetraploid *Isatis indigotica* expressing Bt Cry1Ac and *Pinellia ternata* agglutinin showed enhanced resistance to moths and aphids.

The effects of some boron compounds against heavy metal toxicity in human blood.

Effects of arsenic exposure during the pre- and postnatal development on the puberty of female offspring.

A pilot study on the stability of toluene in blood from workers.

Effects of carnosine on polyamine levels in red blood cells of patients with hypertonic discirculatory encephalopathy.

Development and validation of prediction models for blood concentrations of dioxins and PCBs using dietary intakes.

Efflux of glutathione and glutathione complexes from human erythrocytes in response to inorganic arsenic exposure.

Permeation and metabolism of cocaine in the nasal mucosa.

Xylo-oligosaccharide (XOS) in combination with inulin modulates both the intestinal environment and immune status in healthy subjects, while XOS alone only shows prebiotic properties.

Arsenic exposure through drinking water is associated with longer telomeres in peripheral blood.

[Comparison of the total arsenic concentration between saliva and blood after oral administration of sodium arsenite to rats].

Environmentally persistent free radicals decrease cardiac function and increase pulmonary artery pressure.

Simultaneous analysis of 28 urinary VOC metabolites using ultra high performance liquid chromatography coupled with electrospray ionization tandem mass spectrometry (UPLC-ESI/MSMS).

Separation and preconcentration of 2,3,7,8-tetrachlorodibenzo-p-dioxin in blood samples by inclusion emulsion membranes and its determination by gas chromatography.

Urinary biomarkers of oxidative status.

Inorganic arsenic impairs proliferation and cytokine expression in human primary T lymphocytes.

Dioxin-like potency of HO- and MeO- analogues of PBDEs' the potential risk through consumption of fish from eastern China.

Low dose and long term toxicity of sodium arsenite caused caspase dependent apoptosis based on morphology and biochemical character.

Genes and environment: novel, functional polymorphism in the human cathepsin L (CTSL1) promoter disrupts a xenobiotic response element (XRE) to alter transcription and blood pressure.

VP2118 has major roles in *Vibrio parahaemolyticus* response to oxidative stress.

Toxicogenomic profiles in relation to maternal immunotoxic exposure and immune functionality in newborns.

Bladder urotoxicity pathophysiology induced by the oxazaphosphorine alkylating agents and its chemoprevention.

Effect of Vitamin E Supplementation on Hematological and Plasma Biochemical Parameters during Long Term Exposure of Arsenic in Goats.

Evaluation of biochemical, hematological and oxidative parameters in mice exposed to the herbicide glyphosate-Roundup®).

Protective Effect of *Psidium guajava* in Arsenic-induced Oxidative Stress and Cytological Damage in Rats.

Analysis of neuroglobin mRNA expression in rat brain due to arsenite-induced oxidative stress.

Blood levels of dioxins, furans, dioxin-like PCBs, and TEQs in general populations: a review, 1989-2010.

An improved synthesis of lysosomal activated mustard prodrug for tumor-specific activation and its cytotoxic evaluation.

Molecular and functional characterization of riboflavin specific transport system in rat brain capillary endothelial cells.

Creatine pretreatment protects cortical axons from energy depletion in vitro.

ABC transporter function and regulation at the blood-spinal cord barrier.

Induction of Apoptosis in the Rat Bone Marrow Mesenchymal Stem Cells Following Sodium Arsenite Treatment with the Dose Lesser than that Used for Treatment of Malignant Patient.

Reduction of Sodium Arsenite-Mediated Adverse Effects in Mice using Dietary Supplementation of Water Hyacinth (*Eichornia crassipes*) Root Powder.

Blood dioxin biomonitoring to assess local residents' exposure from a large urban remediation project.

In vitro propagation of *Dioscorea alata* var. *purpurea*.

Toxicity assessment of 45 pesticides to the epigeic earthworm *Eisenia fetida*.

Sodium azide poisoning at a restaurant - Dallas County, Texas, 2010.

Transcription factor-mediated regulation of carboxylesterase enzymes in livers of mice.

Arsenic toxicity: a heart-breaking saga of a freshwater mollusc.

New analytical method for sensitive quantification of urinary 3-methyl-4-nitrophenol to assess fenitrothion exposure in general population and occupational sprayers.

Expression and purification of the p75 neurotrophin receptor transmembrane domain using a ketosteroid isomerase tag.

Plasma Cytokine Concentrations in Workers Exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

[6]-Gingerol isolated from ginger attenuates sodium arsenite induced oxidative stress and plays a corrective role in improving insulin signaling in mice.

Clinical outcome of veterans with acute coronary syndrome who had been exposed to agent orange.

In vitro comparison of the hemocompatibility of diamond-like carbon and carbon nitride coatings with different atomic percentages of N.

Arsenite promotes apoptosis and dysfunction in microvascular endothelial cells via an alteration of intracellular calcium homeostasis.

Fish liver and seagull eggs, vitamin D-rich foods with a shadow: results from the Norwegian Fish and Game Study.

C and N isotope fractionation during biodegradation of the pesticide metabolite 2,6-dichlorobenzamide (BAM): potential for environmental assessments.

Characterization and fibrinolytic activity of *Acetobacter* sp. FP1 isolated from fermented pine needle extract.

Small calibre biosynthetic bacterial cellulose blood vessels: 13-months patency in a sheep model.

Structural nucleotide analogs are potent activators/inhibitors of pancreatic I^2 cell KATP channels: an emerging mechanism supporting their use as antidiabetic drugs.

Mast cells in the intestine and gills of the sea bream, *Sparus aurata*, exposed to a polychlorinated biphenyl, PCB 126.

The relationship between platelet endothelial cell adhesion molecule-1 and paraquat-induced lung injury in rabbits.

Antioxidant Potential of *Fagonia arabica* against the Chemical Ischemia-Induced in PC12 Cells.

Plasma polychlorinated biphenyls (PCB) levels of workers in a transformer recycling company, their family members, and employees of surrounding companies.

Tissue concentrations of pesticides, PCBs and metals among ospreys, *Pandion haliaetus*, collected in France.

Assessing single and joint effects of chemicals on the survival and reproduction of *Folsomia candida* (Collembola) in soil.

Identification of ketoconazole as an AhR-Nrf2 activator in cultured human keratinocytes: the basis of its anti-inflammatory effect.

[Negative paraquaturia does not exclude paraquat fatal poisoning].

Menstrual cycle characteristics and reproductive hormone levels in women exposed to atrazine in drinking water.

Medical management of paraquat ingestion.

Effects of glyphosate and polyoxyethylenamine on growth and energetic reserves in the freshwater crayfish *Cherax quadricarinatus* (Decapoda, Parastacidae).

[Paraquat (PQ) clearance through continuous plasma perfusion in PQ poisoning patients: a clinical study].

[Pulmonary platelet endothelial cell adhesion molecule-1 (PECAM-1) in rabbits after acute paraquat (PQ) poisoning].

[An evidence-based treatment design for paraquat (PQ) poisoning].

Prognostic significance of arterial blood gas analysis in the early evaluation of paraquat poisoning patients.

Protective effect of *Ginkgo biloba* L. leaf extract against glyphosate toxicity in Swiss albino mice.

Genotoxic effects of chlorophenoxy herbicide diclofop-methyl in mice in vivo and in human lymphocytes in vitro.

The differential effect of atrazine on luteinizing hormone release in adrenalectomized adult female Wistar rats.

Genotoxic effects of chlorpyrifos, cypermethrin, endosulfan and 2,4-D on human peripheral lymphocytes cultured from smokers and nonsmokers.

Exposure to arsenic in drinking water is associated with increased prevalence of diabetes: a cross-sectional study in the Zimapán and Lagunera regions in Mexico.

[Urinary neutrophil gelatinase-associated lipocalin (uNGAL) and early diagnosis of paraquat poisoning patients with acute kidney injury].

Lysine acetylsalicylate ameliorates lung injury in rats acutely exposed to paraquat.

Protective effects of chitosan oligosaccharide on paraquat-induced nephrotoxicity in rats.

Assessment of fetal brain uptake of paraquat in utero using in vivo PET/CT imaging.

Investigation into modification of mass transfer kinetics by acrolein in a renal biochip.

Acrolein inhalation prevents vascular endothelial growth factor-induced mobilization of Flk-1+/Sca-1+ cells in mice.

Waterborne exposure to clodinafop-propargyl disrupts the posterior and ventral development of zebrafish embryos.

Ameliorative action of melatonin on oxidative damage induced by atrazine toxicity in rat erythrocytes.

Granulocyte macrophage-colony stimulating factor protects against substantia nigra dopaminergic cell loss in an environmental toxin model of Parkinson's disease.

Effect of two herbicides on *Xenylla welchi* (Hexapoda:Collembola) under laboratory conditions.

In vivo genotoxicity evaluation of atrazine and atrazine-based herbicide on fish *Carassius auratus* using the micronucleus test and the comet assay.

Role of growth factors in acute lung injury induced by paraquat in a rat model.

Diuron exposure induces systemic and organ-specific toxicity following acute and sub-chronic exposure in male Wistar rats.

Risk of aplastic anemia and pesticide and other chemical exposures.

Maternal and fetal exposure to pesticides associated to genetically modified foods in Eastern Townships of Quebec, Canada.

Should atrazine and related chlorotriazines be considered carcinogenic for human health risk assessment?

Protection of bone marrow mesenchymal stem cells from acute lung injury induced by paraquat poisoning.

Tissue plasminogen activator and plasminogen activator inhibitor-1 levels in patients with acute paraquat intoxication.

Mortality of US pentachlorophenol production workers through 2005.

A review of epidemiologic studies of triazine herbicides and cancer.

Toxicokinetics, including saturable protein binding, of 4-chloro-2-methyl phenoxyacetic acid (MCPA) in patients with acute poisoning.

Mutagenic and genotoxic assessment of atrazine-based herbicide to freshwater fish *Channa punctatus* (Bloch) using micronucleus test and single cell gel electrophoresis.

[Study on the prognosis of patients with acute paraquat intoxication].

Inadvertent poisoning of seven teenagers with monosodium methanearsonate.

A physiologically based pharmacokinetic model for atrazine and its main metabolites in the adult male C57BL/6 mouse.

Aseptic meningitis in association with glyphosate-surfactant herbicide poisoning.

Mutagenic impact on fish of runoff events in agricultural areas in south-west France.

Analysis of acrolein-derived 1,N²-propanodeoxyguanosine adducts in human leukocyte DNA from smokers and nonsmokers.

The effects of Click 500 SC (terbuthylazine) on common carp *Cyprinus carpio* under (sub)chronic conditions.

Pesticide risk assessment: A study on inhalation and dermal exposure to 2,4-D and paraquat among Malaysian paddy farmers.

Baseline determination in social, health, and genetic areas in communities affected by glyphosate aerial spraying on the northeastern Ecuadorian border.

Evaluation of suppressive effects of paraquat on innate immunity in Balb/c mice.

More data on the effect of haemoperfusion for acute poisoning is required.

Altered hematological and immunological parameters in silver catfish (*Rhamdia quelen*) following short term exposure to sublethal concentration of glyphosate.

Giemsa versus acridine orange staining in the fish micronucleus assay and validation for use in water quality monitoring.

Pathological and genotoxic effects of atrazine in male Japanese quail (*Coturnix japonica*).

Construction of river model biofilm for assessing pesticide effects.

Suicide victim of paraquat poisoning make suitable corneal donor.

The effects of catalase inhibition into the fourth cerebral ventricle on the Bezold-Jarisch reflex in spontaneously hypertensive rats.

Functional characterization of transmembrane intracellular pH regulators and mechanism of alcohol-induced intracellular acidosis in human umbilical cord blood stem cell-like cells.

Endogenous hydrogen peroxide in paraventricular nucleus mediates sympathetic activation and enhanced cardiac sympathetic afferent reflex in renovascular hypertensive rats.

2-Methoxycinnamaldehyde inhibits tumor angiogenesis by suppressing Tie2 activation.

Protein conjugated with aldehydes derived from lipid peroxidation as an independent parameter of the carbonyl stress in the kidney damage.

Therapeutic potential of Nrf2 activators in streptozotocin-induced diabetic nephropathy.

TRPV1 and TRPA1 stimulation induces MUC5B secretion in the human nasal airway in vivo.

Cinnamaldehyde protects from the hypertension associated with diabetes.

Protein-conjugated acrolein as a biochemical marker of brain infarction.

[Mechanism of cinnamic aldehyde-inducing apoptosis of chronic myeloid leukemic cells in vitro].

Oral exposure to acrolein exacerbates atherosclerosis in apoE-null mice.

Arsenic methylation capacity and its correlation with skin lesions induced by contaminated drinking water consumption in residents of chronic arsenicosis area.

Catalase inhibition into the fourth cerebral ventricle affects bradycardic parasympathetic response to increase in arterial pressure without changing the baroreflex.

Urine arsenic and hypertension in US adults: the 2003-2008 National Health and Nutrition Examination Survey.

Brain infarction correlates more closely with acrolein than with reactive oxygen species.

Reduced coupling of oxidative phosphorylation in vivo precedes electron transport chain defects due to mild oxidative stress in mice.

Therapeutic effects of cinnamaldehyde and potentiation of its efficacy in combination with methylcellulose on murine oral candidiasis.

Use of polyamine metabolites as markers for stroke and renal failure.

Short-term germ-killing effect of sugar-sweetened cinnamon chewing gum on salivary anaerobes associated with halitosis.

Simiranes A and B: erythroxylenes diterpenes and other compounds from *Simira eliezeriana* (Rubiaceae).

Construction, expression, and characterization of a single-chain variable fragment antibody against 2,4-dichlorophenoxyacetic acid in the hemolymph of silkworm larvae.

The chemotherapy metabolite acrolein upregulates thrombin generation and impairs the protein C anticoagulant pathway in animal-based and cell-based models.

Changes in serum concentrations of polychlorinated biphenyls (PCBs), hydroxylated PCB metabolites and pentachlorophenol during pregnancy.

The activity and hydrogen peroxide sensitivity of the peroxiredoxins from the parasitic nematode *Haemonchus contortus*.

Effects of exogenous glutathione on arsenic burden and NO metabolism in brain of mice exposed to arsenite through drinking water.

Arsenic methylation efficiency increases during the first trimester of pregnancy independent of folate status.

Increased oxidative/nitrosative stress markers measured non-invasively in patients with high 2,3,7,8-tetrachloro-dibenzo-p-dioxin plasma level.

TRPA1 receptors mediate environmental irritant-induced meningeal vasodilatation.

Chronic subhepatotoxic exposure to arsenic enhances hepatic injury caused by high fat diet in mice.

Intermittent iron supplementation for reducing anaemia and its associated impairments in menstruating women.

Community-led initiative for control of anemia among children 6 to 35 months of age and unmarried adolescent girls in rural Wardha, India.

The management of iron deficiency in menometrorrhagia.

Environmental- and injury-related epidemic-assistance investigations, 1946-2005.

Antiplatelet effect by p-cresol, a uremic and environmental toxicant, is related to inhibition of reactive oxygen species, ERK/p38 signaling and thromboxane A2 production.

Weekly iron supplementation for the prevention of anemia in pre-school children: a randomized, double-blind, placebo-controlled trial.

Low-level subchronic arsenic exposure from prenatal developmental stages to adult life results in an impaired glucose homeostasis.

Supplementation with oral vs. intravenous iron for anemia with IBD or gastrointestinal bleeding: is oral iron getting a bad rap?

Mitochondrial ERK plays a key role in $\hat{\nu}$ -opioid receptor neuroprotection against acute mitochondrial dysfunction.

Efficacy and safety of oral iron(III) polymaltose complex versus ferrous sulfate in pregnant women with iron-deficiency anemia: a multicenter, randomized, controlled study.

Discovery of potent, selective, and orally bioavailable alkynylphenoxyacetic acid CRTH2 (DP2) receptor antagonists for the treatment of allergic inflammatory diseases.

Nrf2 protects against 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced oxidative injury and steatohepatitis.

Heated indoor swimming pools, infants, and the pathogenesis of adolescent idiopathic scoliosis: a neurogenic hypothesis.

Protective role of the methanolic extract of *Icacina trichantha* on sodium arsenite induced genotoxicity and hepatotoxicity.

[Implementation and impact of the National Iron Supplementation Program in the city of Viãosa, State of Minas Gerais].

The possible roles of environmental factors and the aryl hydrocarbon receptor in the prevalence of thyroid diseases in Vietnam era veterans.

Molecular targets that link dioxin exposure to toxicity phenotypes.

Hemoglobin regeneration efficiency in anemic rats: effects on bone mineral composition and biomechanical properties.

Impact of prophylactic iron supplementation in healthy pregnant women on maternal iron status and birth outcome.

Calcium does not inhibit the absorption of 5 milligrams of nonheme or heme iron at doses less than 800 milligrams in nonpregnant women.

Vascular hyperpermeability in response to inflammatory mustard oil is mediated by Rho kinase in mice systemically exposed to arsenic.

Protective effects of quercetin and chrysin against 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) induced oxidative stress, body wasting and altered cytokine productions in rats.

Development of fortified biscuit using NaFeEDTA.

Vitamin B12 protects against superoxide-induced cell injury in human aortic endothelial cells.

Determination of uremic solutes in biological fluids of chronic kidney disease patients by HPLC assay.

Comparison of the concentrations of polychlorinated biphenyls and dioxins in mothers affected by the Yusho incident and their children.

Interactive effect of arsenic and fluoride on cardio-respiratory disorders in male rats: possible role of reactive oxygen species.

Fulminant hepatic failure in woman with iron and non-steroidal anti-inflammatory drug intoxication.

Environmental factors and endometriosis.

De novo once-monthly darbepoetin alpha treatment for the anemia of chronic kidney disease using a computerized algorithmic approach.

Could *Malassezia* yeasts be implicated in skin carcinogenesis through the production of aryl-hydrocarbon receptor ligands?

Reproductive toxicity parameters and biological monitoring in occupationally and environmentally boron-exposed persons in Bandirma, Turkey.

Cysteine-3 and cysteine-4 are essential for the thioredoxin-like oxidoreductase and antioxidant activities of *Plasmodium falciparum* macrophage migration inhibitory factor.

In vitro and in vivo evaluation of chemically modified degradable starch microspheres for topical haemostasis.

Long-term effects on humoral immunity among workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Characterization of estrogen quinone-derived protein adducts and their identification in human serum albumin derived from breast cancer patients and healthy controls.

Vascular incompetence in dialysis patients--protein-bound uremic toxins and endothelial dysfunction.

Clearance of p-cresol sulfate and β_2 -microglobulin from dialysate by commercially available sorbent technology.

Fortification iron as ferrous sulfate plus ascorbic acid is more rapidly absorbed than as sodium iron EDTA but neither increases serum nontransferrin-bound iron in women.

Concomitant exposure to arsenic and organophosphates on tissue oxidative stress in rats.

Effects of prenatal exposure to dioxin-like compounds on allergies and infections during infancy.

Therapeutic efficacy of silymarin and naringenin in reducing arsenic-induced hepatic damage in young rats.

Plasma levels of polychlorinated biphenyls and risk of cutaneous malignant melanoma: a preliminary study.

Epidemiological approaches in the investigation of environmental causes of cancer: the case of dioxins and water disinfection by-products.

Recommendations on iron questioned.

Exclusively breastfed infants: iron recommendations are premature.

Concerns with early universal iron supplementation of breastfeeding infants.

Comparison of plasma and dry blood spots as samples for the determination of nitrofurantoin (NTBC) by high-performance liquid chromatography-tandem mass spectrometry. Study of the stability of the samples at different temperatures.

Mitochondrial uncoupling agents trigger ventricular fibrillation in isolated rat hearts.

Iron deficiency up-regulates iron absorption from ferrous sulphate but not ferric pyrophosphate and consequently food fortification with ferrous sulphate has relatively greater efficacy in iron-deficient individuals.

Prenatal TCDD in mice increases adult autoimmunity.

Arsenite-induced apoptosis is prevented by selenite in A375 cell line.

Shelf stability, sensory qualities, and bioavailability of iron-fortified Nepalese curry powder.

Residential pesticides and childhood leukemia: a systematic review and meta-analysis.

Haemoglobin mass in an anaemic female endurance runner before and after iron supplementation.

Effect of quercetin on formation of choroidal neovascularization (CNV) in age-related macular degeneration(AMD).

Central and peripheral mechanisms underlying gastric distention inhibitory reflex responses in hypercapnic-acidotic rats.

The nutritive value of grasspea (*Lathyrus sativus*) and allied species, their toxicity to animals and the role of malnutrition in neurolathyrism.

Haemoglobin-induced oxidative stress is associated with both endogenous peroxidase activity and H₂O₂ generation from polyunsaturated fatty acids.

Chromosome fragility in dairy cows exposed to dioxins and dioxin-like PCBs.

Effects of synbiotic treatment on serum level of p-cresol in haemodialysis patients: a preliminary study.

p-Cresyl sulphate and indoxyl sulphate predict progression of chronic kidney disease.

A case report of concomitant paroxysmal nocturnal hemoglobinuria and heterozygous β^2 -thalassemia.

Acute tubular necrosis due to cutaneous contact with cresol.

Neuroprotective effects of KR-62980, a new PPAR α agonist, against chemical ischemia-reperfusion in SK-N-SH cells.

[Effect of iron supplementation on maximal oxygen uptake in female athletes].

Prenatal TCDD causes persistent modulation of the postnatal immune response, and exacerbates inflammatory disease, in 36-week-old lupus-like autoimmune SNF1 mice.

[Ferrous sulfate: acute poisoning with a frequent use drug].

Case-control study of risk factors of myelodysplastic syndromes according to World Health Organization classification in a Chinese population.

Reduction of blood lead levels in lead-exposed mice by dietary supplements and natural antioxidants.

Simultaneous exposure of non-diabetics to high levels of dioxins and mercury increases their risk of insulin resistance.

AhR2-mediated, CYP1A-independent cardiovascular toxicity in zebrafish (*Danio rerio*) embryos exposed to retene.

Monitoring tyrosinaemia type I: Blood spot test for nitisinone (NTBC).

Association between glycodeilin and aryl hydrocarbon receptor in Iranian breast cancer patients: impact of environmental endocrine disrupting chemicals.

Moderate NaFeEDTA and ferrous sulfate supplementation can improve both hematologic status and oxidative stress in anemic pregnant women.

Factors determining compliance to routine iron supplementation in pregnancy at the University of Portharcout Teaching Hospital.

Total infusion of low molecular weight iron-dextran for treating postpartum anemia.

Does uremia cause vascular dysfunction?

Chronic exposure to arsenite induces S100A8 and S100A9 expression in rat RBL-2H3 mast cells.

Prevalence of anemia among preschoolers and response to iron supplementation.

Acute arsine poisoning confirmed by speciation analysis of arsenic compounds in the plasma and urine by HPLC-ICP-MS.

Phase III, randomized study of the effects of parenteral iron, oral iron, or no iron supplementation on the erythropoietic response to darbepoetin alfa for patients with chemotherapy-associated anemia.

Efficacy of intravenous iron for treating postpartum anemia in low-resource African countries: a pilot study in Malawi.

Basolateral potassium (IKCa) channel inhibition prevents increased colonic permeability induced by chemical hypoxia.

Residential exposure to pesticides and childhood leukaemia: a systematic review and meta-analysis.

A comparison of the bioavailability of ferrous fumarate and ferrous sulfate in non-anemic Mexican women and children consuming a sweetened maize and milk drink.

Gold kiwifruit consumed with an iron-fortified breakfast cereal meal improves iron status in women with low iron stores: a 16-week randomised controlled trial.

Functional Characterization of Hypertrehalosemic Hormone Receptor in Relation to Hemolymph Trehalose and to Oxidative Stress in the Cockroach *Blattella germanica*.

Blood and urine levels of long half-life toxicants by nativity among immigrants to the United States.

Concentrations of polychlorinated dibenzo-p-dioxins, polychlorinated dibenzofurans, and polychlorinated biphenyls in blood and breast milk collected from pregnant women in Sapporo City, Japan.

Bayer CropScience's position on the findings of glufosinate and its metabolite.

Dietary ligands of the aryl hydrocarbon receptor induce anti-inflammatory and immunoregulatory effects on murine dendritic cells.

Rat H9c2 cardiac myocytes are sensitive to arsenite due to a modest activation of transcription factor Nrf2.

Correlations of fish intake and plasma docosahexaenoic acid levels with each congener of PCDDs/PCDFs/dioxin-like PCBs in blood from the Japanese population.

Construction and characterization of hepatocyte nuclear factor HNF4alpha1 over-expressing cell line derived from human hepatoma HepG2 cells.

Daily versus intermittent iron supplementation in pregnant women.

Gene expression and inducibility of the aryl hydrocarbon receptor-dependent pathway in cultured bovine blood lymphocytes.

Evaluation of non cyanide methods for hemoglobin estimation.

Developmental effects related to angiogenesis and osteogenic differentiation in Salmon larvae continuously exposed to dioxin-like 3,3',4,4'-tetrachlorobiphenyl (congener 77).

Using condition factor and blood variable biomarkers in fish to assess water quality.

Transcriptomics identifies differences between ultrapure non-dioxin-like polychlorinated biphenyls (PCBs) and dioxin-like PCB126 in cultured peripheral blood mononuclear cells.

Oxidative stress biomarkers and acetylcholinesterase activity in human erythrocytes exposed to clomazone (in vitro).

Protective activity of the *Uncaria tomentosa* extracts on human erythrocytes in oxidative stress induced by 2,4-dichlorophenol (2,4-DCP) and catechol.

Enhancing effect of zinc on L-histidine transport in rat lung microvascular endothelial cells.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on steroid concentrations in blood and gonads of chicken embryo.

Severe cyclophosphamide-induced haemorrhagic cystitis treated with hyperbaric oxygen.

Characterization of iodinated adrenomedullin derivatives suitable for lung nuclear medicine.

Hydroxytyrosol, the phenolic compound of olive oil protects human PBMC against oxidative stress and DNA damage mediated by 2,3,7,8-TCDD.

Development of a co-culture model for in vitro toxicological studies in Atlantic salmon.

Reduced cytochrome P4501A activity and recovery from oxidative stress during subchronic benzo[a]pyrene and benzo[e]pyrene treatment of rainbow trout.

Role of zebrafish cytochrome P450 CYP1C genes in the reduced mesencephalic vein blood flow caused by activation of AHR2.

Modulation of mast cell adhesion, proliferation, and cytokine secretion on electrospun bioresorbable vascular grafts.

Hemocytes and humoral factors in silkworm blood are cooperatively involved in sheep erythrocyte aggregation.

Oral ferrous sulfate does not increase preoperative hemoglobin in patients scheduled for hip or knee arthroplasty.

Activating PKC- ζ 1 at the blood-brain barrier reverses induction of P-glycoprotein activity by dioxin and restores drug delivery to the CNS.

Assessing the genotoxic potentials of arsenic in tilapia (*Oreochromis mossambicus*) using alkaline comet assay and micronucleus test.

Role of mitochondria in the maintenance of platelet function during in vitro storage.

An occupational exposure assessment of polychlorinated dibenzo-p-dioxin and dibenzofurans in firefighters.

Novel hormonal delivery method using the ink-jet technology: application to pulmonary insulin therapies.

Effect of dioxin exposure on several indices of blood redox status in lactating buffalo cows.

Biomedicine in the environment: cyclotides constitute potent natural toxins in plants and soil bacteria.

Sex, BMI and age in addition to dietary intakes influence blood concentrations and congener profiles of dioxins and PCBs.

Tissue-specific and dose-related accumulation of arsenic in mouse offspring following maternal consumption of arsenic-contaminated water.

[The difference between male and female dioxin concentrations in the blood of Yusho patients].

[Promotive excretion of causative agents of Yusho by fermented brown rice with *Aspergillus oryzae* in Yusho patients].

[Relationship between half-lives of blood dioxins and possible metabolic mechanism].

[Differences in prenatal care between health services under the Family Health Strategy and traditional primary care clinics in Rio Grande, Rio Grande do Sul State, Brazil].

Correlations of PCBs, DIOXIN, and PBDE with TSH in children's blood in areas of computer E-waste recycling.

Fetal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin induces expression of the chemokine genes Cxcl4 and Cxcl7 in the perinatal mouse brain.

Protective effect of pretreatment with cilostazol on cytotoxicity of cadmium and arsenite in cultured vascular endothelial cells.

Standard operating procedures for pre-analytical handling of blood and urine for metabolomic studies and biobanks.

Stability of tissue PO₂ in the face of altered perfusion: a phenomenon specific to the renal cortex and independent of resting renal oxygen consumption.

Bacterial cellulose as a potential vascular graft: Mechanical characterization and constitutive model development.

The ATP-binding cassette transporter ABCB6 is induced by arsenic and protects against arsenic cytotoxicity.

Acute disruption of bone marrow hematopoiesis by benzo(a)pyrene is selectively reversed by aryl hydrocarbon receptor-mediated processes.

Cyclooxygenase-2 contributes to functional changes seen on experimental hemorrhagic cystitis induced by ifosfamide in rat urinary bladder.

Realgar and realgar-containing Liu-Shen-Wan are less acutely toxic than arsenite and arsenate.

H₂O₂ is the transferrable factor mediating flow-induced dilation in human coronary arterioles.

Adenosine A2 receptors are involved in the activation of ATP-sensitive K⁺ currents during metabolic inhibition in guinea pig ventricular myocytes.

Manganese uptake and distribution in the brain after methyl bromide-induced lesions in the olfactory epithelia.

Polymorphisms in arsenic(+III oxidation state) methyltransferase (AS3MT) predict gene expression of AS3MT as well as arsenic metabolism.

C-reactive protein makes human endothelium stiff and tight.

Human CYP2S1 metabolizes cyclooxygenase- and lipoxygenase-derived eicosanoids.

Aryl hydrocarbon receptor-mediated up-regulation of ATP-driven xenobiotic efflux transporters at the blood-brain barrier.

Realgar- and cinnabar-containing an-gong-niu-huang wan (AGNH) is much less acutely toxic than sodium arsenite and mercuric chloride.

Saturated hydrogen saline protects rats from acute lung injury induced by paraquat.

A dominant negative zebrafish Ahr2 partially protects developing zebrafish from dioxin toxicity.

Efficacy, Tolerability, and Acceptability of Iron Hydroxide Polymaltose Complex versus Ferrous Sulfate: A Randomized Trial in Pediatric Patients with Iron Deficiency Anemia.

NTP toxicity studies of toxicity studies of 2,4-decadienal (CAS No. 25152-84-5) administered by gavage to F344/N Rats and B6C3F1 mice.

Polychlorinated dioxins, furans, and biphenyls in blood of children and adults living in a dioxin-contaminated area in Tokyo.

Evaluation of Iron-induced Oxidative Stress and its Amelioration by Certain Herbs in Broilers.

Glutathione biosynthesis via activation of the nuclear factor E2-related factor 2 (Nrf2)--antioxidant-response element (ARE) pathway is essential for neuroprotective effects of sulforaphane and 6-(methylsulfinyl) hexyl isothiocyanate.

Dioxin furan blood lipid and attic dust concentrations in populations living near four wood treatment facilities in the United States.

Dietary patterns and blood levels of PCDDs, PCDFs, and dioxin-like PCBs in 1656 Japanese individuals.

9.3 KDa components of the injected venom of *Conus purpurascens* define a new five-disulfide conotoxin framework.

Paraquat induces cyclooxygenase-2 (COX-2) implicated toxicity in human neuroblastoma SH-SY5Y cells.

Influence of quercetin on haematological indices and biomarkers of oxidative stress in the serum of rats exposed to atrazine.

Association of the superoxide dismutase (V16A) and catalase (C262T) genetic polymorphisms with the clinical outcome of patients with acute paraquat intoxication.

A fatal case of paraquat ingestion: clinical course and review of pathophysiology.

[Hypothetical link between endometriosis and xenobiotics-associated genetically modified food].

[Successful rescue of a child with paraquat poisoning by using blood purification].

Exposure to acrolein by inhalation causes platelet activation.

Effects of Roundup Transorb on fish: hematology, antioxidant defenses and acetylcholinesterase activity.

[Extreme hyperkalemia in a patient with a new glyphosate potassium herbicide poisoning: report of a case].

European eel (*Anguilla anguilla*) genotoxic and pro-oxidant responses following short-term exposure to Roundup--a glyphosate-based herbicide.

Impacts of mixtures of herbicides on molecular and physiological responses of the European flounder *Platichthys flesus*.

Role of autophagy in protection afforded by hypoxic preconditioning against MPP⁺-induced neurotoxicity in SH-SY5Y cells.

Dietary olive oil effect on antioxidant status and fatty acid profile in the erythrocyte of 2,4-D- exposed rats.

Predicting acute complicated glyphosate intoxication in the emergency department.

Joint effects of three plant protection products to the terrestrial isopod *Porcellionides pruinosus* and the collembolan *Folsomia candida*.

An interesting case of iron deficiency anemia.

Use of a lipid emulsion in a patient with refractory hypotension caused by glyphosate-surfactant herbicide.

A deuterohemin peptide extends lifespan and increases stress resistance in *Caenorhabditis elegans*.

Alterations in Ca²⁺ homeostasis in rat erythrocytes with atrazine treatment: positive modulation by vitamin E.

Glucocorticoid with cyclophosphamide for paraquat-induced lung fibrosis.

Fatality in paraquat poisoning.

Postmortem distribution of ametryn in the blood and organ tissues of an herbicide-poisoning victim.

Immunotoxicity of paraquat after subacute exposure to mice.

Acrolein increases 5-lipoxygenase expression in murine macrophages through activation of ERK pathway.

Gene transcription in *Daphnia magna*: effects of acute exposure to a carbamate insecticide and an acetanilide herbicide.

Pentachlorophenol and its derivatives induce oxidative damage and morphological changes in human lymphocytes (in vitro).

[Expression of angiotensin converting enzyme and angiotensin converting enzyme 2 gene in lung of paraquat poisoning rats and protection of sodium dimercaptopropane sulfonate].

[Analysis of cardiac toxicity caused by cyclophosphamide in the H9c2 cell line and isolated and perfused rat hearts].

Transposon insertion in a serine-specific minor tRNA coding sequence affects intraperitoneal survival of *Haemophilus influenzae* in the infant rat model.

Acute human self-poisoning with bispyribac-containing herbicide Nominee: a prospective observational study.

Brain toxicokinetics of prometryne in mice.

Oxidative stress induced by atrazine in rat erythrocytes: mitigating effect of vitamin E.

Effects of sub-chronic exposure to terbutryn in common carp (*Cyprinus carpio* L.).

Perturbation of lipids and glucose metabolism associated with previous 2,4-D exposure: a cross-sectional study of NHANES III data, 1988-1994.

Acrolein consumption induces systemic dyslipidemia and lipoprotein modification.

A prospective observational study of the clinical toxicology of glyphosate-containing herbicides in adults with acute self-poisoning.

Plasma level of malondialdehyde in the cases of acute paraquat intoxication.

Toxicokinetics and recovery studies of dicamba dimethyl amine salt in goats following single oral administration.

[Acute poisoning due to chemical substances inducing methemoglobinemia--two cases report].

Clinical outcome of hemoperfusion in poisoned patients.

Simultaneous effects of nicotine, acrolein, and acetaldehyde on osteogenic-induced bone marrow cells cultured on plasma-sprayed titanium implants.

Environmental damage to the retina and preconditioning: contrasting effects of light and hyperoxic stress.

Effects of exogenous GSH and methionine on methylation of inorganic arsenic in mice exposed to arsenite through drinking water.

Cytotoxic effect of trans-cinnamaldehyde on human leukemia K562 cells.

Arsenic trioxide and ascorbic acid demonstrate promising activity against primary human CLL cells in vitro.

Selective stimulation by cinnamaldehyde of progesterone secretion in human adrenal cells.

Modulation of the reaction of vascular smooth muscle cells to angiotensin II induced by catalase and aminotriazol during ischemia-reperfusion.

Polychlorinated dibenzo-p-dioxins and dibenzofurans in blood and breast milk samples from residents of a schistosomiasis area with Na-PCP application in China.

Cinnamaldehyde in feedlot cattle diets: intake, growth performance, carcass characteristics, and blood metabolites.

Ameliorative effect of the cinnamon oil from *Cinnamomum zeylanicum* upon early stage diabetic nephropathy.

Dioxin exposure and insulin resistance in Taiwanese living near a highly contaminated area.

Substance MCS-18 isolated from *Helleborus purpurascens* is a potent antagonist of the capsaicin receptor, TRPV1, in rat cultured sensory neurons.

TCDD exposure estimation for workers at a New Zealand 2,4,5-T manufacturing facility based on serum sampling data.

Dose response to cinnamaldehyde supplementation in growing beef heifers: ruminal and intestinal digestion.

The herbicide ketoclofomazone inhibits 1-deoxy-D-xylulose 5-phosphate synthase in the 2-C-methyl-D-erythritol 4-phosphate pathway and shows antibacterial activity against *Haemophilus influenzae*.

Evidence for the pathophysiological relevance of TRPA1 receptors in the cardiovascular system in vivo.

Genetic polymorphism of As3MT and delayed urinary DMA excretion after organic arsenic intake from oyster ingestion.

Distribution and metabolism of four different dimethylated arsenicals in hamsters.

[Gas chromatography for determination of blood trifluralin].

ATZ (3-amino-1,2,4-triazole) injected into the fourth cerebral ventricle influences the Bezold-Jarisch reflex in conscious rats.

[Prof. Dr. Ivãjn Bernãjt (1915-1991)].

Effect of defatted methanolic extract of *Holarrhena floribunda* leaves in sodium arsenite-induced clastogenicity in Wistar albino rats.

[Effects of Î±-lipoic acid and vitamin C on oxidative stress in rat exposed to chronic arsenic toxicity].

Characterization of developmental neurotoxicity of As, Cd, and Pb mixture: synergistic action of metal mixture in glial and neuronal functions.

Toxicology and carcinogenesis studies of 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (CAS No. 31508-00-6) in female harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 3,3',4,4'-tetrachloroazobenzene (TCAB) (CAS No. 14047-09-7) in Harlan Sprague-Dawley rats and B6C3F1 mice (gavage studies).

Lactoferrin inhibits the growth of nasal polyp fibroblasts.

A case of black urine and dark skin - cresol poisoning.

Interrelationship between exposure to PCDD/Fs and hypertension in metabolic syndrome in Taiwanese living near a highly contaminated area.

A single prenatal exposure to the endocrine disruptor 2,3,7,8-tetrachlorodibenzo-p-dioxin alters developmental myelination and remyelination potential in the rat brain.

Body mass index, agricultural pesticide use, and cancer incidence in the Agricultural Health Study cohort.

Suppression of hepatic oxidative events and regulation of eNOS expression in the liver by naringenin in fructose-administered rats.

[Establishment of an erythroleukemia model in CB6F1 mice by transplant with haploidentical mouse leukemic cell line FBL-3].

Abnormal platelet-derived growth factor signaling accounting for lung hypoplasia in experimental congenital diaphragmatic hernia.

Home intervention improves cognitive and social-emotional scores in iron-deficient anemic infants.

Lymphocyte-based determination of susceptibility to malignant hyperthermia: a pilot study in swine.

Cytochrome P4501A1 is required for vascular dysfunction and hypertension induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Short course pre-operative ferrous sulphate supplementation--is it worthwhile in patients with colorectal cancer?

[Hypothyroidism as the result of drug interaction between ferrous sulfate and levothyroxine].

Anti-mutagenic and pro-apoptotic effects of apigenin on human chronic lymphocytic leukemia cells.

Exposure to selected endocrine disruptors and neonatal outcome of 86 healthy boys from Nice area (France).

Phenotypic anchoring of gene expression after developmental exposure to aryl hydrocarbon receptor ligands in zebrafish.

A prospective randomized, controlled trial of intravenous versus oral iron for moderate iron deficiency anaemia of pregnancy.

Neurodevelopmental toxicity of prenatal polychlorinated biphenyls (PCBs) by chemical structure and activity: a birth cohort study.

Antenatal steroid and tracheal occlusion restore vascular endothelial growth factor receptors in congenital diaphragmatic hernia rat model.

Trends in pregnancy outcomes in Malawian adolescents receiving antimalarial and hematinic supplements.

Does polyamine oxidase activity influence the oxidative metabolism of children who suffer of diabetes mellitus?

Assisted ventilation modes reduce the expression of lung inflammatory and fibrogenic mediators in a model of mild acute lung injury.

Serological cardiovascular and mortality risk predictors in dialysis patients receiving sevelamer: a prospective study.

[Diagnosis and treatment of iron deficiency without anaemia].

Arsenic antagonizes the Hedgehog pathway by preventing ciliary accumulation and reducing stability of the Gli2 transcriptional effector.

Elevated soluble transferrin receptor levels reflect increased erythropoietic drive rather than iron deficiency in pediatric sickle cell disease.

Sub-chronic arsenic exposure aggravates nephrotoxicity in experimental diabetic rats.

Copper sulphate toxicity in a young male complicated by methemoglobinemia, rhabdomyolysis and renal failure.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) reverses hyperglycemia in a type II diabetes mellitus rat model by a mechanism unrelated to PPAR gamma.

Functional and phenotypic effects of AhR activation in inflammatory dendritic cells.

Factors associated with blood concentrations of indoxyl sulfate and p-cresol in patients undergoing peritoneal dialysis.

Functional properties of RYR1 mutations identified in Swedish patients with malignant hyperthermia and central core disease.

The use of haemofiltration for severe iron overdose.

All the wrong moves: a clinical review of restless legs syndrome, periodic limb movements of sleep and wake, and periodic limb movement disorder.

Withdrawal symptoms after gabapentin discontinuation.

Lactoferrin efficacy versus ferrous sulfate in curing iron deficiency and iron deficiency anemia in pregnant women.

Oxygen-dependence of metabolic rate in the muscles of craniates.

Once weekly low-dose iron supplementation effectively improved iron status in adolescent girls.

The effect of in vitro tracheal occlusion on branching morphogenesis in fetal lung explants from the rat nitrofen model of congenital diaphragmatic hernia.

Dioxin-like exposures and effects on estrogenic and androgenic exposures and micronuclei frequency in mother-newborn pairs.

Incidence and risk factors for the development of anemia following gastric bypass surgery.

The role of calcium in modulating the reactivity of the smooth muscle cells during ischemia/reperfusion. Part 2.

Enhancement of TAT cell membrane penetration efficiency by dimethyl sulphoxide.

Randomized controlled trial of iron-fortified drinking water in preschool children.

Lactoferrin efficacy versus ferrous sulfate in curing iron disorders in pregnant and non-pregnant women.

Developmental profile in children with iron deficiency anemia and its changes after therapeutic iron supplementation.

Dioxin-like PCBs and endometriosis.

Expression and function of phosphodiesterases in nitrofen-induced congenital diaphragmatic hernia in rats.

Temporal and anatomical sensitivities to the aryl hydrocarbon receptor agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin leading to premature acyclicity with age in rats.

Free p-cresylsulphate is a predictor of mortality in patients at different stages of chronic kidney disease.

Distribution and speciation of arsenic by transplacental and early life exposure to inorganic arsenic in offspring rats.

Revised recommendations for iron fortification of wheat flour and an evaluation of the expected impact of current national wheat flour fortification programs.

Iron deficiency anemia in the pediatric emergency department.

Ischemia induces regulator of G protein signaling 2 (RGS2) protein upregulation and enhances apoptosis in astrocytes.

Stabilization of transcription factor Nrf2 by tBHQ prevents oxidative stress-induced amyloid beta formation in NT2N neurons.

Nonheme-iron absorption in first-degree relatives is highly correlated: a stable-isotope study in mother-child pairs.

Tolerance of arabinoxylan-oligosaccharides and their prebiotic activity in healthy subjects: a randomised, placebo-controlled cross-over study.

Maintenance of elevated versus physiological iron indices in non-anaemic patients with chronic kidney disease: a randomized controlled trial.

Speciation of arsenic trioxide penetrates into cerebrospinal fluid in patients with acute promyelocytic leukemia.

Animal poisoning in Europe. Part 2: Companion animals.

Chronic diseases and early exposure to airborne mixtures: Part III. Potential origin of pre-menopausal breast cancers.

AHR activation by tryptophan--pathogenic hallmark of Th17-mediated inflammation in eosinophilic fasciitis, eosinophilia-myalgia-syndrome and toxic oil syndrome?

Deliberate poisoning with dinitrophenol (DNP): an unlicensed weight loss pill.

Iron supplementation for anemia after hip fracture surgery: a randomized trial of 300 patients.

Albumin as an adjunct to tracheal occlusion in fetal rats with congenital diaphragmatic hernia: a placebo-controlled study.

In vitro studies with 'acatalasemic-like' erythrocytes and hydrogen peroxide: attention to the formation of lysis resistant erythrocytes.

Ischemia-activated microglia induces neuronal injury via activation of gp91phox NADPH oxidase.

Arsenic transformations and biomarkers in meadow voles (*Microtus pennsylvanicus*) living on an abandoned gold mine site in Montague, Nova Scotia, Canada.

Pesticide concentrations in maternal and umbilical cord sera and their relation to birth outcomes in a population of pregnant women and newborns in New Jersey.

Increased levels of total P-Cresylsulphate and indoxyl sulphate are associated with coronary artery disease in patients with diabetic nephropathy.

A combination of iron and retinol supplementation benefits iron status, IL-2 level and lymphocyte proliferation in anemic pregnant women.

Inhibitory effects of uraemic toxins 3-indoxyl sulfate and p-cresol on losartan metabolism in vitro.

Difructose anhydride III enhances bioavailability of water-insoluble iron in anemic Vietnamese women.

Efficacy and safety of ferric carboxymaltose in correcting iron-deficiency anemia: a review of randomized controlled trials across different indications.

Effect of eradication of *Helicobacter pylori* and iron supplementation on the iron status of children with iron deficiency.

The effect of TCDD dioxin on the rat liver in biochemical and histological assessment.

Pseudomelanosis of the stomach.

Residential pesticides and childhood leukemia: a systematic review and meta-analysis.

The absence of interleukin-6 enhanced arsenite-induced renal injury by promoting autophagy of tubular epithelial cells with aberrant extracellular signal-regulated kinase activation.

Neuroprotective effect of s-methylisothiourea in transient focal cerebral ischemia in rat.

Protein-bound uraemic toxin removal in haemodialysis and post-dilution haemodiafiltration.

p-Cresyl sulfate serum concentrations in haemodialysis patients are reduced by the prebiotic oligofructose-enriched inulin.

The safety and efficacy of continuous transcranial duplex Doppler monitoring of middle cerebral artery occlusion in acute stroke patients: comparison of TCDD and thrombolysis in MCA recanalization.

Utilization of iron from an animal-based iron source is greater than that of ferrous sulfate in pregnant and nonpregnant women.

Effects of the compounds MV8608 and MV8612 obtained from *Mandevilla velutina* in the model of hemorrhagic cystitis induced by cyclophosphamide in rats.

Relationship between persistent halogenated organic contaminants and TCDD-toxic equivalents on EROD activity and retinoid and thyroid hormone status in northern fulmars.

Radioiodinated 4-iodo-L-meta-tyrosine, a system L selective artificial amino acid: molecular design and transport characterization in Chinese hamster ovary cells (CHO-K1 cells).

Tissue-based risk assessment of great blue heron (*Ardea herodias*) exposed to PCDD/DF in the Tittabawassee River floodplain, Michigan, USA.

Characterization of the avian aryl hydrocarbon receptor 1 from blood using non-lethal sampling methods.

Five monomeric hemocyanin subunits from *Portunus trituberculatus*: purification, spectroscopic characterization, and quantitative evaluation of phenol monooxygenase activity.

Discriminating between different acute chemical toxicities via changes in the daphnid metabolome.

Transcriptomic profile indicative of immunotoxic exposure: in vitro studies in peripheral blood mononuclear cells.

Serum protein-bound uraemic toxins and clinical outcomes in haemodialysis patients.

Ecological risk assessment of great horned owls (*Bubo virginianus*) exposed to PCDD/DF in the Tittabawassee River floodplain in Midland, Michigan, USA.

Perfluorinated carboxylic acids inhibit cyclooxygenase pathway more potently than 12-lipoxygenase pathway in rat platelets.

Weight-of-evidence analysis of human exposures to dioxins and dioxin-like compounds and associations with thyroid hormone levels during early development.

[Study of between persistent organic pollutants (POPs) content in children vein blood and thyroid stimulating hormone (TSH) in the capacitors dismantlement area].

Inhibition of in vitro cytokine production by human peripheral blood mononuclear cells treated with xenobiotics: implications for the prediction of general toxicity and immunotoxicity.

Modulation of NAD(P)H:quinone oxidoreductase by vanadium in human hepatoma HepG2 cells.

Arsenic induces apoptosis of human umbilical vein endothelial cells through mitochondrial pathways.

Malformation of certain brain blood vessels caused by TCDD activation of Ahr2/Arnt1 signaling in developing zebrafish.

Genomic indicators in the blood predict drug-induced liver injury.

Pulmonary artery pressure responses to increased cardiac output in chickens with raised metabolic rate.

Expression of aryl hydrocarbon receptor in human placentas and fetal tissues.

Properties of blood, porphyrins, and exposure to legacy and emerging persistent organic pollutants in surf scoters (*Melanitta perspicillata*) overwintering on the south coast of British Columbia, Canada.

Acute copper supplementation does not inhibit non-heme iron bioavailability in humans.

Occurrence and risk assessment of acidic pharmaceuticals in the Yellow River, Hai River and Liao River of north China.

Dioxin-like and perfluorinated compounds in pigs in an Indian open waste dumping site: toxicokinetics and effects on hepatic cytochrome P450 and blood plasma hormones.

The effects of dietary boric acid and borax supplementation on lipid peroxidation, antioxidant activity, and DNA damage in rats.

Predicting PCDD/F and dioxin-like PCB contamination levels in bovine edible tissues from in vivo sampling.

Polychlorinated dibenzo-p-dioxins, dibenzofurans, biphenyls, and naphthalenes in plasma of workers deployed at the World Trade Center after the collapse.

Association between As and Cu renal cortex accumulation and physiological and histological alterations after chronic arsenic intake.

A case of toxic epidermal necrolysis (ten) with severe chronic ocular complications in a healthy 46-year-old woman.

Low-dose synergistic immunosuppression of T-dependent antibody responses by polycyclic aromatic hydrocarbons and arsenic in C57BL/6J murine spleen cells.

A 28-day oral toxicity study of fermentation-derived cellulose, produced by *Acetobacter acetii* subspecies *xylinum*, in F344 rats.

Role for tyrosine kinases in contraction of rat penile small arteries.

Influence of blood meal on the responsiveness of olfactory receptor neurons in antennal sensilla trichodea of the yellow fever mosquito, *Aedes aegypti*.

Environmental health risk assessment of dioxin exposure through foods in a dioxin hot spot-Bien Hoa City, Vietnam.

Environmental and human health risk assessment of organic micro-pollutants occurring in a Spanish marine fish farm.

Evaluation of a liver micronucleus assay in young rats (III): a study using nine hepatotoxicants by the Collaborative Study Group for the Micronucleus Test (CSGMT)/Japanese Environmental Mutagen Society (JEMS)-Mammalian Mutagenicity Study Group (MMS).

Hemorrhagic cystitis in a patient receiving docetaxel for prostate cancer.

Effect of rosiglitazone in sodium arsenite-induced experimental vascular endothelial dysfunction.

Dioxin-like activity in the blood of Greenlandic Inuit and Danish women: a pilot study.

Implication of oxidative stress as a cause of autoimmune hemolytic anemia in NZB mice.

A longitudinal study of trends in blood dioxins and dioxin-like compounds levels in residents from two locations in Japan during 2002-2006.

Intravital fluorescent microscopic evaluation of bacterial cellulose as scaffold for vascular grafts.

The aryl hydrocarbon receptor has an important role in the regulation of hematopoiesis: implications for benzene-induced hematopoietic toxicity.

Imaging dermal blood flow through the intact rat skin with an optical clearing method.

Interaction between oxidative stress sensor Nrf2 and xenobiotic-activated aryl hydrocarbon receptor in the regulation of the human phase II detoxifying UDP-glucuronosyltransferase 1A10.

Heparan sulfation-dependent fibroblast growth factor signaling maintains embryonic stem cells primed for differentiation in a heterogeneous state.

The mitochondrial PPR protein LOVASTATIN INSENSITIVE 1 plays regulatory roles in cytosolic and plastidial isoprenoid biosynthesis through RNA editing.

Oxidative stress may modify zinc protoporphyrin/heme ratio in hematofluorometry.

Chitosan nanoparticle-based neuronal membrane sealing and neuroprotection following acrolein-induced cell injury.

Gender-linked haematopoietic and metabolic disturbances induced by a pesticide mixture administered at low dose to mice.

Expression of heat shock protein 70 in lung tissues of acute paraquat poisoned rats and intervention of ulinastatin.

The effect of multigenerational diet containing genetically modified triticale on immune system in mice.

The new generation of intravenous iron: chemistry, pharmacology, and toxicology of ferric carboxymaltose.

[The effect of 2,4-dinitrophenol on the intensity of oxidative processes in the rat liver during prolonged experiment].

Unmetabolized VOCs in urine as biomarkers of low level occupational exposure.

Histone deacetylase inhibitors decrease the antigen presenting activity of murine bone marrow derived dendritic cells.

Laminin-1 induces neurite outgrowth in human mesenchymal stem cells in serum/differentiation factors-free conditions through activation of FAK-MEK/ERK signaling pathways.

Relationship between the concentrations of polychlorinated dibenzo-p-dioxins, polychlorinated dibenzofurans, and polychlorinated biphenyls in maternal blood and those in breast milk.

Altered metabolisms of mediators controlling vascular function and enhanced oxidative stress in asymptomatic children with congenital portosystemic venous shunt.

Distinct regulation of insulin receptor substrate-1 and -2 by 90-kDa heat-shock protein in adrenal chromaffin cells.

Exposure assessment at a PCDD/F contaminated site in Sweden--field measurements of exposure media and blood serum analysis.

Lipid oxidation and peroxidation in CNS health and disease: from molecular mechanisms to therapeutic opportunities.

Simultaneous quantification of 1,N2-propano-2'-deoxyguanosine adducts derived from acrolein and crotonaldehyde in human placenta and leukocytes by isotope dilution nanoflow LC nanospray ionization tandem mass spectrometry.

Arsenate and dimethylarsinic acid in drinking water did not affect DNA damage repair in urinary bladder transitional cells or micronuclei in bone marrow.

[Molecular mechanism of erythromycin in the improvement of paraquat-damaged vascular endothelial cell barrier function].

[The mechanism of alleviation of paraquat induced vascular endothelial permeability by erythromycin through adenosine 3'5'-cyclic monophosphate pathway].

Case-control study on risk factors for leukaemia and brain tumours in children under 5 years in Germany.

Alteration of NRSF expression exacerbating 1-methyl-4-phenyl-pyridinium ion-induced cell death of SH-SY5Y cells.

Toxicokinetics of glyphosate and its metabolite aminomethyl phosphonic acid in rats.

[Immunotoxic effect of herbicide simazine exposure in BALB/c mice].

Effects of atrazine on cytochrome P450 enzymes of zebrafish (*Danio rerio*).

Postmortem analyses unveil the poor efficacy of decontamination, anti-inflammatory and immunosuppressive therapies in paraquat human intoxications.

Comparative DNA microarray analysis of human monocyte derived dendritic cells and MUTZ-3 cells exposed to the moderate skin sensitizer cinnamaldehyde.

[Effects of aerial applications of the herbicide glyphosate and insecticides on human health].

[Acute glyphosate-surfactant poisoning with neurological sequels and fatal outcome].

Occupation and risk of parkinsonism: a multicenter case-control study.

Haemocyte lysosomal fragility facing an environmental reality: a toxicological perspective with atrazine and *Lymnaea stagnalis* (Gastropoda, Pulmonata) as a test case.

Subchronic feeding study of grain from herbicide-tolerant maize DP-9814-6 in Sprague-Dawley rats.

Trivalent methylated arsenical-induced phosphatidylserine exposure and apoptosis in platelets may lead to increased thrombus formation.

Mortality rates among trichlorophenol workers with exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Changes of cytokine and nuclear factor-kappa B in acute paraquat poisoned rats].

[Expression of thrombomodulin, endothelial protein C receptor in lung tissue of acute paraquat poisoned rats and intervention of sodium dimercaptopropene sulfonate].

Comparative effects of the formulation of glyphosate-surfactant herbicides on hemodynamics in swine.

Influence of 70 nm silica particles in mice with cisplatin or paraquat-induced toxicity.

Fatal diquat intoxication.

Occupational exposure to metribuzin and the incidence of cancer in the Agricultural Health Study.

Patterns of immunotoxicity associated with chronic as compared with acute exposure to chemical or physical stressors and their relevance with regard to the role of stress and with regard to immunotoxicity testing.

Chronic exposure to high levels of atrazine alters expression of genes that regulate immune and growth-related functions in developing *Xenopus laevis* tadpoles.

Glutathione-S-transferase P protects against endothelial dysfunction induced by exposure to tobacco smoke.

Occupational exposure to pesticides and lymphoid neoplasms among men: results of a French case-control study.

Development of PBPK model of molinate and molinate sulfoxide in rats and humans.

Human cord blood CD133+ stem cells transplanted to nod-scid mice provide conditions for regeneration of olfactory neuroepithelium after permanent damage induced by dichlobenil.

Western blot analysis for 4-hydroxy-2-nonenal (HNE)-modified proteins in paraquat-treated mice.

Agrichemicals in surface water and birth defects in the United States.

Effects of acute exposure to metribuzin on some hematological, biochemical and histopathological parameters of common carp (*Cyprinus carpio* L.).

Responsiveness of the interrenal tissue of Jundiá (Rhamdia quelen) to an in vivo ACTH test following acute exposure to sublethal concentrations of agrichemicals.

[Expression of inflammatory factors in lung tissue of acute paraquat poisoned rats].

The effects of prometryne on subchronically treated mice evaluated by SCGE assay.

Oxidant stress-induced liver injury in vivo: role of apoptosis, oncotic necrosis, and c-Jun NH₂-terminal kinase activation.

Serum total antioxidant statuses of survivors and nonsurvivors after acute paraquat poisoning.

Clinical outcomes and kinetics of propanil following acute self-poisoning: a prospective case series.

Effect of a subchronic exposure to simazine on energetic metabolism of common carp (*Cyprinus carpio*).

Genotoxicity of the herbicide formulation Roundup (glyphosate) in broad-snouted caiman (*Caiman latirostris*) evidenced by the Comet assay and the Micronucleus test.

Effects of subchronic exposure to Successor 600 (pethoxamid 600 g L⁻¹) on common carp *Cyprinus carpio*.

Biomonitoring of genotoxic risk in agricultural workers from five colombian regions: association to occupational exposure to glyphosate.

Risks to Colombian amphibian fauna from cultivation of coca (*Erythroxylum coca*): a geographical analysis.

Toxicity of formulated glyphosate (glyphos) and cosmo-flux to larval and juvenile colombian frogs 2. Field and laboratory microcosm acute toxicity.

Toxicity of formulated glyphosate (glyphos) and cosmo-flux to larval Colombian frogs 1. Laboratory acute toxicity.

Coca (*Erythroxylum coca*) Control is Affected by Glyphosate Formulations and Adjuvants.

Comparison between kidney and hemoperfusion for paraquat elimination.

Influence of strain and sex on the metabolic profile of rats in repeated dose toxicological studies.

Increased sensitivity of glutathione S-transferase P-null mice to cyclophosphamide-induced urinary bladder toxicity.

Staphylococcal catalase regulates its virulence and induces arthritis in catalase deficient mice.

Mortality rates among workers exposed to dioxins in the manufacture of pentachlorophenol.

Cardiovascular responses to hydrogen peroxide into the nucleus tractus solitarius.

Chronic intermittent hypobaric hypoxia protects the heart against ischemia/reperfusion injury through upregulation of antioxidant enzymes in adult guinea pigs.

Increased sensitivity of myoblasts to oxidative stress in amyotrophic lateral sclerosis peripheral tissues.

Carotenoid biosynthesis in intraerythrocytic stages of *Plasmodium falciparum*.

Supplementation with plant extracts (carvacrol, cinnamaldehyde and capsaicin): its effects on acid-base status and productive performance in growing/finishing bull calves.

Pharmacokinetics of trifluralin in blood and heart tissue of mice.

Oxidative stress in stroke pathophysiology validation of hydrogen peroxide metabolism as a pharmacological target to afford neuroprotection.

Chronic exposure to the herbicide, atrazine, causes mitochondrial dysfunction and insulin resistance.

Vascular responses to nitrite are mediated by xanthine oxidoreductase and mitochondrial aldehyde dehydrogenase in the rat.

Effects of atrazine and its withdrawal on gonadotropin-releasing hormone neuroendocrine function in the adult female Wistar rat.

Influence of cobalamin on arsenic metabolism in Bangladesh.

Bioaccumulation and biotransformation of brominated and chlorinated contaminants and their metabolites in ringed seals (*Pusa hispida*) and polar bears (*Ursus maritimus*) from East Greenland.

Collagen- and gelatine-based films sealing vascular prostheses: evaluation of the degree of crosslinking for optimal blood impermeability.

The expression of melanin-based plumage is separately modulated by exogenous oxidative stress and a melanocortin.

Spice active principles as the inhibitors of human platelet aggregation and thromboxane biosynthesis.

Atrazine inhibits pulsatile luteinizing hormone release without altering pituitary sensitivity to a gonadotropin-releasing hormone receptor agonist in female Wistar rats.

Metabolism of flufenpyr-ethyl in rats and mice.

Transforming a NEP1 toxin gene into two *Fusarium* spp. to enhance mycoherbicide activity on *Orobanche*--failure and success.

Effect of long-term exposure to simazine on histopathology, hematological, and biochemical parameters in *Cyprinus carpio*.

Paraquat is excluded by the blood brain barrier in rhesus macaque: An in vivo pet study.

Occupational paraquat exposure of agricultural workers in large Costa Rican farms.

Levels of metals and organic substances in workers at a hazardous waste incinerator: a follow-up study.

Lymphatic and portal vein absorption of organochlorine compounds in rats.

Effects of a herbicide-insecticide mixture in freshwater microcosms: risk assessment and ecological effect chain.

Iron in vitro bioavailability and iodine storage stability in double-fortified salt.

Antioxidant activity of mangostin in cell-free system and its effect on K562 leukemia cell line in photodynamic therapy.

Systems metabolic effects of a necator americanus infection in Syrian hamster.

Large-dose intravenous ferric carboxymaltose injection for iron deficiency anemia in heavy uterine bleeding: a randomized, controlled trial.

Safety assessment of leaf curl virus resistant tomato developed using viral derived sequences.

Polymorphisms in arsenic metabolism genes, urinary arsenic methylation profile and cancer.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin disrupts B-cell lymphopoiesis and exacerbates autoimmune disease in 24-week-old SNF1 mice.

The uremic retention solute p-cresyl sulfate and markers of endothelial damage.

Ingestion of ferrous sulfate increases ferremia in patients with short bowel syndrome.

Effects of dioxins, PCBs, and PBDEs on immunology and hematology in adolescents.

Inherited glutathione reductase deficiency and Plasmodium falciparum malaria--a case study.

Modulation of heart rate variability during severe hemorrhage at different rates in conscious rats.

A systematic review and meta-analysis of childhood leukemia and parental occupational pesticide exposure.

Overview of developmental heart defects by dioxins, PCBs, and pesticides.

Effect of prenatal zinc supplementation on birthweight.

Convenient headspace gas chromatographic determination of azide in blood and plasma.

Variation in half-life of penta-chlorodibenzofuran (PeCDF) blood level among Yusho patients.

Prenatal exposure to PCDDs/PCDFs and dioxin-like PCBs in relation to birth weight.

Organochlorine and heavy metals in newborns: results from the Flemish Environment and Health Survey (FLEHS 2002-2006).

Ferrous sulfate versus iron polymaltose complex for treatment of iron deficiency anemia in children.

Oral and intravenous iron treatment in inflammatory bowel disease: hematological response and quality of life improvement.

Effects of prolonged iron overload and low frequency electromagnetic exposure on spatial learning and memory in the young rat.

Post-exposure treatment with nasal atropine methyl bromide protects against microinstillation inhalation exposure to sarin in guinea pigs.

Mortality in workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin at a trichlorophenol plant in New Zealand.

Expression of chloride channels in trachea-occluded hyperplastic lungs and nitrofen-induced hypoplastic lungs in rats.

Minocycline attenuates iron neurotoxicity in cortical cell cultures.

Differential cytotoxic effects of arsenic compounds in human acute promyelocytic leukemia cells.

Health profiles of methyl bromide applicators in greenhouses in Turkey.

Lack of DNA polymerase theta (POLQ) radiosensitizes bone marrow stromal cells in vitro and increases reticulocyte micronuclei after total-body irradiation.

Autologous melanoma vaccine induces antitumor and self-reactive immune responses that affect patient survival and depend on MHC class II expression on vaccine cells.

Rationale and design of the oral HEMe iron polypeptide Against Treatment with Oral Controlled Release Iron Tablets trial for the correction of anaemia in peritoneal dialysis patients (HEMATOCRIT trial).

Iron status of breastfed infants is improved equally by medicinal iron and iron-fortified cereal.

Subchronic feeding study with genetically modified stacked trait lepidopteran and coleopteran resistant (DAS-157-1xDAS-59122-7) maize grain in Sprague-Dawley rats.

Effects of dioxin on vascular endothelial growth factor (VEGF) production in the retina associated with choroidal neovascularization.

Iron bioavailability of cocoa powder as determined by the Hb regeneration efficiency method.

Disruption of iron homeostasis and lung disease.

Prone position prevents regional alveolar hyperinflation and mechanical stress and strain in mild experimental acute lung injury.

Melatonin reduces acute lung injury in endotoxemic rats.

Intravenous versus oral iron supplementation for correction of post-transplant anaemia in renal transplant patients.

Phytochemical, antibacterial, antiproliferative, and antioxidant potentials and DNA damage-protecting activity of Acacia salicina extracts.

Thyroid hormone levels of pregnant Inuit women and their infants exposed to environmental contaminants.

Residential exposure to polychlorinated biphenyls and organochlorine pesticides and risk of childhood leukemia.

Effect of education and pill count on hemoglobin status during prenatal care in Nepalese women: a randomized controlled trial.

Adherence and side effects of three ferrous sulfate treatment regimens on anemic pregnant women in clinical trials.

Iron prophylaxis in pregnancy: intravenous route versus oral route.

Regular consumption of a complementary food fortified with ascorbic acid and ferrous fumarate or ferric pyrophosphate is as useful as ferrous sulfate in maintaining hemoglobin concentrations >105 g/L in young Bangladeshi children.

Effect of increasing dialyzer mass transfer area coefficient and dialysate flow on clearance of protein-bound solutes: a pilot crossover trial.

p-Cresol inhibits IL-12 production by murine macrophages stimulated with bacterial immunostimulant.

PCBs and the energy cost of migration in the European eel (*Anguilla anguilla* L.).

[Evaluation of dermatological symptom of Yusho patients in the annual examination in 2005-2007].

Evolution of protein-bound uraemic solutes during predilution haemofiltration.

Iron supplement in pregnancy and development of gestational diabetes--a randomised placebo-controlled trial.

Regulation of mitochondrial dynamics in acute kidney injury in cell culture and rodent models.

Providing iron/folic acid tablets free of charge improves compliance in pregnant women in Senegal.

Iron supplementation of low-income infants: a randomized clinical trial of adherence with ferrous fumarate sprinkles versus ferrous sulfate drops.

Effect of DNA hypomethylation on genotoxicity and apoptogenicity of sodium arsenite in laboratory mice.

Prevalence of metabolic syndrome associated with body burden levels of dioxin and related compounds among Japan's general population.

Uncouple my heart: the benefits of inefficiency.

Iron deficiency anemia in infants aged 12-15 months in Ahwaz, Iran.

Impact of iron supplementation on schistosomiasis control in Zambian school children in a highly endemic area.

Genotoxic effects of borax on cultured lymphocytes.

Pulmonary lesion induced by low and high positive end-expiratory pressure levels during protective ventilation in experimental acute lung injury.

Iron deficiency and child and maternal health.

Relative bioavailability of micronized, dispersible ferric pyrophosphate added to an apple juice drink.

Inhibition of androgen receptor transcriptional activity as a novel mechanism of action of arsenic.

Controlled, household-randomized, open-label trial of the effect of treatment of *Helicobacter pylori* infection on iron deficiency among children in rural Alaska: results at 40 months.

A new affordable flow cytometry based method to measure HIV-1 viral load.

Cell-mediated immune response to unrelated proteins and unspecific inflammation blocked by orally tolerated proteins.

Multiple micronutrient fortification of salt.

Dioxin-induced toxicity on vascular remodeling of the placenta.

Randomized, double-blind, placebo-controlled trial of effects of enteral iron supplementation on anemia and risk of infection during surgical critical illness.

Effects of leaves extract of *Ocimum sanctum* L. on arsenic-induced toxicity in Wistar albino rats.

Iron supplementation of breastfed infants from an early age.

Toxicology laboratory analysis and human exposure to p-chloroaniline.

The impact of iron supplementation efficiency in female blood donors with a decreased ferritin level and no anaemia. Rationale and design of a randomised controlled trial: a study protocol.

[The specific features of the clinical course of tuberculosis and enhancement of its treatment efficiency in fertile-age women with iron-deficiency anemia].

Chronic health impairment due to 2,3,7,8-tetrachloro-dibenzo-p-dioxin exposure.

Oxidative status in iron-deficiency anemia.

Efficacy and tolerability of oral bovine lactoferrin compared to ferrous sulfate in pregnant women with iron deficiency anemia: a prospective controlled randomized study.

Effects of arsenic on maternal and fetal health.

[Analysis of the infection status and the drug resistance of mycoplasma and chlamydiae in genitourinary tracts of children with suspected nongonococcal urethritis].

[Experience in the treatment of iron deficiency anemia with ferro-folgamma].

Ferric carboxymaltose: a review of its use in iron-deficiency anaemia.

Oral carcinogenicity and toxicity of 2-amino-4-chlorophenol in rats.

Intravenous iron sucrose is superior to oral iron sulphate for correcting anaemia and restoring iron stores in IBD patients: A randomized, controlled, evaluator-blind, multicentre study.

Therapeutic surfactants modulate the viability of eosinophils and induce inflammatory mediator release.

Iron medication-induced gastric mucosal injury.

Arsenic induced apoptosis in malignant melanoma cells is enhanced by menadione through ROS generation, p38 signaling and p53 activation.

Combined analysis of prenatal (maternal hair and blood) and neonatal (infant hair, cord blood and meconium) matrices to detect fetal exposure to environmental pesticides.

Speciation of arsenic trioxide metabolites in blood cells and plasma of a patient with acute promyelocytic leukemia.

Human protein S inhibits the uptake of AcLDL and expression of SR-A through Mer receptor tyrosine kinase in human macrophages.

Mouse breast cancer model-dependent changes in metabolic syndrome-associated phenotypes caused by maternal dioxin exposure and dietary fat.

Iron absorption from meat pate fortified with ferric pyrophosphate in iron-deficient women.

(3R,5S,7as)-(3,5-Bis(4-fluorophenyl)tetrahydro-1H-oxazolo[3,4-c]oxazol-7a-yl)methanol, a novel neuroprotective agent.

[Assessment of mitochondrial metabolic oxidative state in living cardiomyocytes with spectrally-resolved fluorescence lifetime spectroscopy of NAD(P)H].

Prenatal exposure to organohalogenes, including brominated flame retardants, influences motor, cognitive, and behavioral performance at school age.

Selenocysteine is selectively taken up by red blood cells.

Understanding butachlor toxicity in *Aulosira fertilissima* using physiological, biochemical and proteomic approaches.

Metabolic effects of dark chocolate consumption on energy, gut microbiota, and stress-related metabolism in free-living subjects.

A single exposure to particulate or gaseous air pollution increases the risk of aconitine-induced cardiac arrhythmia in hypertensive rats.

Evaluation of phagocytic activity and nitric oxide generation by molluscan haemocytes as biomarkers of inorganic arsenic exposure.

Glycome and transcriptome regulation of vasculogenesis.

Modulation of arsenic trioxide-induced apoptosis by genistein and functionally related agents in U937 human leukaemia cells. Regulation by ROS and mitogen-activated protein kinases.

The role of P-glycoprotein in intestinal transport versus the BBB transport of tetraphenylphosphonium.

Combined effects of repeated administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin and polychlorinated biphenyls on kidneys of male rats.

Co-exposure to arsenic and fluoride on oxidative stress, glutathione linked enzymes, biogenic amines and DNA damage in mouse brain.

Inhibition of extracellular matrix assembly induces the expression of osteogenic markers in skeletal muscle cells by a BMP-2 independent mechanism.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) poisoning in Victor Yushchenko: identification and measurement of TCDD metabolites.

Risk assessment of PCDD/Fs levels in human tissues related to major food items based on chemical analyses and micro-EROD assay.

Effects of occupational exposure to 1,4-dichlorobenzene on hematologic, kidney, and liver functions.

Acacia Senegal gum exudate offers protection against cyclophosphamide-induced urinary bladder cytotoxicity.

Inhibitory effects of guarana seed extract on passive cutaneous anaphylaxis and mast cell degranulation.

Characterization of the cancer chemopreventive NRF2-dependent gene battery in human keratinocytes: demonstration that the KEAP1-NRF2 pathway, and not the BACH1-NRF2 pathway, controls cytoprotection against electrophiles as well as redox-cycling compounds.

Comparing the role of glutathione-S-transferase and mitochondrial aldehyde dehydrogenase in nitroglycerin biotransformation and the correlation with calcitonin gene-related peptide.

Intra-individual variations and temporal trends in dioxin levels in human blood 1987-2002.

Preclinical activity of palifosfamide lysine (ZIO-201) in pediatric sarcomas including oxazaphosphorine-resistant osteosarcoma.

The formation of large-area conducting graphene-like platelets.

Rescue of anaemia and autoimmune responses in SOD1-deficient mice by transgenic expression of human SOD1 in erythrocytes.

Impact of WHO 2005 revised toxic equivalency factors for dioxins on the TEQs in serum, household dust and soil.

Genotoxicity of glyphosate assessed by the comet assay and cytogenetic tests.

Evaluation of a novel inhalation exposure system to determine acute respiratory responses to tobacco and polymer pyrolysate mixtures in Swiss-Webster mice.

Performance of different work clothing types for reducing skin exposure to pesticides during open field treatment.

The effect of workload on biological monitoring of occupational exposure to toluene and n-Hexane: contribution of physiologically based toxicokinetic modeling.

Calcein release from polymeric vesicles in blood plasma and PVA hydrogel.

Oral charcoal adsorbent (AST-120) prevents progression of cardiac damage in chronic kidney disease through suppression of oxidative stress.

Arsenic induces telomerase expression and maintains telomere length in human cord blood cells.

Dioxins interfere with differentiation of osteoblasts and osteoclasts.

Drug metabolizing enzyme expression in rat choroid plexus: effects of in vivo xenobiotics treatment.

Bed nucleus of the stria terminalis N-methyl-D-aspartate receptors and nitric oxide modulate the baroreflex cardiac component in unanesthetized rats.

[Dioxin concentration in the preserved umbilical cord from Yusho patients].

Concentrations of polychlorinated biphenyls in blood collected from Yusho patients during medical check-ups performed from 2004 to 2007.

Evaluation of possible modes of action for acute effects of methyl iodide in laboratory animals.

In vitro glutathione conjugation of methyl iodide in rat, rabbit, and human blood and tissues.

Evaluation of respiratory parameters in rats and rabbits exposed to methyl iodide.

Two-day inhalation toxicity study of methyl iodide in the rat.

Folate, Cobalamin, Cysteine, Homocysteine, and Arsenic Metabolism among Children in Bangladesh.

Studies supporting the development of a physiologically based pharmacokinetic (PBPK) model for methyl iodide: pharmacokinetics of sodium iodide (NaI) in pregnant rabbits.

Sustaining hypercitrullinemia, hypercholesterolemia and augmented oxidative stress in Japanese children with aspartate/glutamate carrier isoform 2-citrin-deficiency even during the silent period.

Preliminary results of small arterial substitute performed with a new cylindrical biomaterial composed of bacterial cellulose.

Hepatic uptake and biliary excretion of manganese in the little skate, *Leucoraja erinacea*.

Role of the bed nucleus of the stria terminalis in the cardiovascular responses to acute restraint stress in rats.

Sodium azide induced neuronal damage in vitro: evidence for non-apoptotic cell death.

Regulation of human bone sialoprotein gene transcription by platelet-derived growth factor-BB.

Gene expression profiling in rat liver treated with compounds inducing elevation of bilirubin.

Induction of mouse UDP-glucuronosyltransferase mRNA expression in liver and intestine by activators of aryl-hydrocarbon receptor, constitutive androstane receptor, pregnane X receptor, peroxisome proliferator-activated receptor alpha, and nuclear factor erythroid 2-related factor 2.

Permeability and toxicological profile estimation of organochlorine compounds by biopartitioning micellar chromatography.

Multiple adverse thyroid and metabolic health signs in the population from the area heavily polluted by organochlorine cocktail (PCB, DDE, HCB, dioxin).

Aldose reductase decreases endoplasmic reticulum stress in ischemic hearts.

GABA and nitric oxide in the PVN are involved in arterial pressure control but not in the chemoreflex responses in rats.

Effects of Nasal Occlusion and Oral Contact on Perception of Metallic Taste from Metal Salts.

Studies on histopathological changes in the gill, liver and kidney of *Channa punctatus* (Bloch) exposed to Alachlor.

The influence of iron loading and iron chelation on the proliferation and telomerase activity of human peripheral blood mononuclear cells.

Neuroprotective role of delta-opioid receptors against mitochondrial respiratory chain injury.

Effect of copper-hydroquinone complex on oxidative stress-related parameters in human erythrocytes (in vitro).

Transepithelial transport characteristics of the antihypertensive peptide, Lys-Val-Leu-Pro-Val-Pro, in human intestinal Caco-2 cell monolayers.

Concentrations of polychlorinated biphenyls in blood of Yusho patients over 35 years after the incident.

Hydroxylated polychlorinated biphenyls (OH-PCBs) in the blood of mammals and birds from Japan: lower chlorinated OH-PCBs and profiles.

Opsonized erythrocyte ghosts for liver-targeted delivery of antisense oligodeoxynucleotides.

Effects of arsenic exposure from drinking water on spatial memory, ultra-structures and NMDAR gene expression of hippocampus in rats.

Mediastinal abscess and suppurative thrombophlebitis possibly because of an accidental inhalation of paraquat.

Clastogenic effects of glyphosate in bone marrow cells of swiss albino mice.

Zolpidem, a clinical hypnotic that affects electronic transfer, alters synaptic activity through potential GABA receptors in the nervous system without significant free radical generation.

The role of polyamine metabolism in neuronal injury following cerebral ischemia.

Determination of cyanide in blood by reaction head-space gas chromatography.

[Determination of the electrophoretic mobility of peripheral red blood cells from healthy individuals, by using ethylene-2-amine-4-chloroacetic acid as a preservative].

The plastidial 2-C-methyl-D-erythritol 4-phosphate pathway provides the isoprenyl moiety for protein geranylgeranylation in tobacco BY-2 cells.

Role of the cyclooxygenase 2-thromboxane pathway in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced decrease in mesencephalic vein blood flow in the zebrafish embryo.

TCDD-mediated suppression of the in vitro anti-sheep erythrocyte IgM antibody forming cell response is reversed by interferon-gamma.

Treatment of mice with the Ah receptor agonist and human carcinogen dioxin results in altered numbers and function of hematopoietic stem cells.

The relation between the estimated dietary intake of PCDD/Fs and levels in blood in a Flemish population (50-65 years).

Effects of subchronic coexposure to arsenic and endosulfan on the erythrocytes of broiler chickens: a biochemical study.

Formation of dimethylthioarsenicals in red blood cells.

The 2,4-D herbicide effects on acetylcholinesterase activity and metabolic parameters of piava freshwater fish (*Leporinus obtusidens*).

Toxicity and effects of a glyphosate-based herbicide on the Neotropical fish *Prochilodus lineatus*.

Life-history trade-offs of *Paronychiurus kimi* (Lee) (Collembola: Onychiuridae) populations exposed to paraquat.

Genotoxicity study with special reference to DNA damage by comet assay in fission yeast, *Schizosaccharomyces pombe* exposed to drinking water.

Phenoxyherbicides induce production of free radicals in human erythrocytes: oxidation of dichlorodihydrofluorescein and dihydrorhodamine 123 by 2,4-D-Na and MCPA-Na.

Pneumoproteins as markers of paraquat lung injury: a clinical case.

Effects of acrolein on leukotriene biosynthesis in human neutrophils.

A comparative 90-day toxicity study of allyl acetate, allyl alcohol and acrolein.

S-ethyl-N,N-dipropylthiocarbamate exposure and cancer incidence among male pesticide applicators in the agricultural health study: a prospective cohort.

Constraints on the evolution of tolerance to herbicide in the common morning glory: resistance and tolerance are mutually exclusive.

Effects of subchronic exposure to LASSO MTX (alachlor 42% W/V) on hematological indices and histology of the common Carp, *Cyprinus carpio* L.

Pentachlorophenol decreases ATP levels in human natural killer cells.

Individual and joint toxic effects of pentachlorophenol and bisphenol A on the development of zebrafish (*Danio rerio*) embryo.

[Influence of pyrrolidine dithiocarbamate (PDTC) on expression of transforming growth factor beta(1), matrix metalloproteinase-2 and tissue inhibitor-1 of metalloproteinase in rats with pulmonary damage induced by paraquat].

Effects of subchronic metribuzin exposure on common carp (*Cyprinus carpio*).

A review of the immunotoxicity of the pesticide 3,4-dichloropropionanilide.

Genotoxic pressure of vineyard pesticides in fish: field and mesocosm surveys.

Atrazine-induced alterations in rat erythrocyte membranes: ameliorating effect of vitamin E.

Cilostazol inhibits oxidative stress-induced premature senescence via upregulation of Sirt1 in human endothelial cells.

Acrolein health effects.

Genotoxic effects of Roundup on the fish *Prochilodus lineatus*.

Biomonitoring Equivalents (BE) dossier for 2,4-dichlorophenoxyacetic acid (2,4-D) (CAS No. 94-75-7).

Protective effects of vitamin E against atrazine-induced genotoxicity in rats.

Combined in utero and juvenile exposure of mice to arsenate and atrazine in drinking water modulates gene expression and clonogenicity of myeloid progenitors.

Discriminating the molecular basis of hepatotoxicity using the large-scale characteristic molecular signatures of toxicants by expression profiling analysis.

Comparison of a pulsatile blood pump and a peristaltic roller pump during hemoperfusion treatment in a canine model of paraquat poisoning.

Hemoperfusion using dual pulsatile pump in paraquat poisoning.

Results of a 13-week safety assurance study with rats fed grain from corn rootworm-protected, glyphosate-tolerant MON 88017 corn.

Genotoxicity testing of the herbicide trifluralin and its commercial formulation Treflan using the piscine micronucleus test.

Effect of a toxicant on phagocytosis pathways in the freshwater snail *Lymnaea stagnalis*.

Modulation of signal transduction pathways in lymphocytes due to sub-lethal toxicity of chlorinated phenol.

Acrolein consumption exacerbates myocardial ischemic injury and blocks nitric oxide-induced PKC ϵ signaling and cardioprotection.

Subchronic feeding study of herbicide-tolerant soybean DP-356 \sim 43-5 in Sprague-Dawley rats.

Evaluation of DNA damage in Chinese toad (*Bufo bufo gargarizans*) after in vivo exposure to sublethal concentrations of four herbicides using the comet assay.

Induction of COX-2 expression by acrolein in the rat model of hemorrhagic cystitis.

A fatal intoxication from ingestion of 2-methyl-4-chlorophenoxyacetic acid (MCPA).

Dose-dependent uptake, elimination, and toxicity of monosodium methanearsonate in adult zebra finches (*Taeniopygia guttata*).

Improvement in survival after paraquat ingestion following introduction of a new formulation in Sri Lanka.

Application of physiological computational fluid dynamics models to predict interspecies nasal dosimetry of inhaled acrolein.

Protective effects of ethyl pyruvate treatment on paraquat-intoxicated rats.

Urinary corticosterone as an indicator of stress-mediated immunological changes in rats.

Paraquat poisonings: mechanisms of lung toxicity, clinical features, and treatment.

Acrolein: unwanted side product or contribution to antiangiogenic properties of metronomic cyclophosphamide therapy?

UCP2 modulates cell proliferation through the MAPK/ERK pathway during erythropoiesis and has no effect on heme biosynthesis.

Modulation of reactive oxygen species by antioxidants in chronic myeloid leukemia cells enhances imatinib sensitivity through survivin downregulation.

Activation of aldehyde dehydrogenase-2 reduces ischemic damage to the heart.

Modulation of the neuronal response to ischaemia by somatostatin analogues in wild-type and knock-out mouse retinas.

Plasma acrolein levels and their association with delayed ischemic neurological deficits following aneurysmal subarachnoid haemorrhage: a pilot study.

Prostaglandins inhibit cytochrome P450 4A activity and contribute to endotoxin-induced hypotension in rats via nitric oxide production.

Tolerance to disulfiram induced by chronic alcohol intake in the rat.

Eosinophilia among returning travelers: a practical approach.

Evaluation of micronucleus frequencies in blood lymphocytes from smelting plant workers exposed to arsenic.

Contribution of the SitABCD, MntH, and FeoB metal transporters to the virulence of avian pathogenic *Escherichia coli* O78 strain chi7122.

[Analysis of paraquat in blood and urine by sodium borohydride/nickel chloride chemical reduction-gas chromatography/thermionic specific detector].

Tissue distribution and urinary excretion of inorganic arsenic and its methylated metabolites in C57BL6 mice following subchronic exposure to arsenate in drinking water.

Inhibition of acrolein-stimulated MUC5AC production by fucoidan in human bronchial epithelial cells.

A physiologically based pharmacokinetic model for intravenous and ingested dimethylarsinic acid in mice.

[Micelle capillary electrophoresis on-line sweeping for determination of paraquat in blood].

Chronic ethanol ingestion alters xenobiotic absorption through the skin: potential role of oxidative stress.

Identification of the major arsenic-binding protein in rat plasma as the ternary dimethylarsinous-hemoglobin-haptoglobin complex.

[Gas chromatography for determination of paraquat derivatives in blood].

Distribution and function of the hydrogen sulfide-sensitive TRPA1 ion channel in rat urinary bladder.

Placental transfer of polychlorinated biphenyls, their hydroxylated metabolites and pentachlorophenol in pregnant women from eastern Slovakia.

[Determination of three phenoxyalkanoic acid herbicides in blood using gas chromatography coupled with solid-phase extraction and derivatization].

Cinnamaldehyde inhibits pro-inflammatory cytokines secretion from monocytes/macrophages through suppression of intracellular signaling.

Bed nucleus of the stria terminalis alpha(1)-adrenoceptor modulates baroreflex cardiac component in unanesthetized rats.

Maternal administration of betamethasone inhibits proliferation induced by fetal tracheal occlusion in the nitrofen rat model for congenital diaphragmatic hernia: a placebo-controlled study.

Hypertension, cardiac hypertrophy, and impaired vascular relaxation induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin are associated with increased superoxide.

Effects of dietary iron levels on growth performance, hematological status, liver mineral concentration, fecal microflora, and diarrhea incidence in weanling pigs.

Effect of FeSO₄ treatment on glucose metabolism in diabetic rats.

Arsenic-induced neurotoxicity in relation to toxicokinetics: effects on sciatic nerve proteins.

Effectiveness of two programs of intermittent ferrous supplementation for treating iron-deficiency anemia in infants: randomized clinical trial.

Dioxins and cardiovascular disease mortality.

Effect of dimethyl sulfides on the induction of apoptosis in human leukemia Jurkat cells and HL-60 cells.

Ferrous gluconate and ferrous sulfate added to a complementary food distributed by the Mexican nutrition program Oportunidades have a comparable efficacy to reduce iron deficiency in toddlers.

Fluorescence confocal laser scanning microscopy for in vivo imaging of epidermal reactions to two experimental irritants.

Elevated expression of CYP1A1 and gamma-SYNUCLEIN in human ectopic (ovarian) endometriosis compared with eutopic endometrium.

Causal relationship of Helicobacter pylori with iron-deficiency anemia or failure of iron supplementation in children.

Characterization of the transduction pathway involved in c-fos and c-jun expression induced by Aggregatibacter actinomycetemcomitans lipopolysaccharides in human gingival fibroblasts.

Transposition of the great arteries.

Combined administration of taurine and monoisoamyl DMSA protects arsenic induced oxidative injury in rats.

Impairment of short-term memory associated with low iron stores in a volunteer multidose plateletpheresis donor.

Ferric carboxymaltose injection in the treatment of postpartum iron deficiency anemia: a randomized controlled clinical trial.

[Severe esophagitis due to overdose of iron tablets].

Effectiveness of daily and weekly iron supplementation in the prevention of anemia in infants.

Perinatal 2,3,7,8-tetrachlorodibenzo-p-dioxin exposure sensitizes offspring to angiotensin II-induced hypertension.

An enhanced postnatal autoimmune profile in 24 week-old C57BL/6 mice developmentally exposed to TCDD.

Associations of environmental exposure to dioxins with prevalent diabetes among general inhabitants in Japan.

Association of polychlorinated biphenyls with hypertension in the 1999-2002 National Health and Nutrition Examination Survey.

Accumulation of M1dG DNA adducts after chronic exposure to PCBs, but not from acute exposure to polychlorinated aromatic hydrocarbons.

Mitotic arrest-associated apoptosis induced by sodium arsenite in A375 melanoma cells is BUBR1-dependent.

Fibronectin promotes cell proliferation of human pre-B cell line via its interactions with VLA-4 and VLA-5.

2,3,7,8-Tetrachlorodibenzo-p-dioxin exposure prevents cardiac valve formation in developing zebrafish.

Anemia reduction in preschool children with the addition of low doses of iron to school meals.

The effect of tracheal occlusion on lung branching in the rat nitrofen CDH model.

Toxicity of inorganic arsenic and its metabolites on haematopoietic progenitors "in vitro": comparison between species and sexes.

Neonatal thyroid function in Seveso 25 years after maternal exposure to dioxin.

Resveratrol prevents estrogen-DNA adduct formation and neoplastic transformation in MCF-10F cells.

Growth in non-anemic infants supplemented with different prophylactic iron doses.

Arsenic trioxide and auranofin inhibit selenoprotein synthesis: implications for chemotherapy for acute promyelocytic leukaemia.

Comparison of ferrous sulfate and ferrous glycinate chelate for the treatment of iron deficiency anemia in gastrectomized patients.

Effect of hemolytic and iron-deficiency anemia on intestinal absorption and tissue accumulation of cadmium.

Pollutant effects on genotoxic parameters and tumor-associated protein levels in adults: a cross sectional study.

Can folate intake reduce arsenic toxicity?

Exposure assessment of workers to airborne PCDD/Fs, PCBs and PAHs at an electric arc furnace steelmaking plant in the UK.

Comparison of grain from corn rootworm resistant transgenic DAS-59122-7 maize with non-transgenic maize grain in a 90-day feeding study in Sprague-Dawley rats.

Short-term ferrous sulfate supplementation in female blood donors.

Sensitivity to sodium arsenite in human melanoma cells depends upon susceptibility to arsenite-induced mitotic arrest.

Relationship between insulin sensitivity and exposure to dioxins and polychlorinated biphenyls in pregnant women.

Clinical manifestations and arsenic methylation after a rare subacute arsenic poisoning accident.

Differential oxidative stress and DNA damage in rat brain regions and blood following chronic arsenic exposure.

[Headache caused by pesticides--a review of the literature].

Epidemiologic evidence of relationships between reproductive and child health outcomes and environmental chemical contaminants.

A novel intravenous iron formulation for treatment of anemia in inflammatory bowel disease: the ferric carboxymaltose (FERINJECT) randomized controlled trial.

Metabolic flexibility permits mesenchymal stem cell survival in an ischemic environment.

Neuropharmacological profile of novel and selective 5-HT₆ receptor agonists: WAY-181187 and WAY-208466.

[Analytic role in clinical toxicology--impact on the diagnosis and treatment of a poisoned patient].

Sodium arsenite reduces severity of dextran sulfate sodium-induced ulcerative colitis in rats.

Medullary pathways mediating the parasubthalamic nucleus depressor response.

Comparative efficacy and safety of intravenous ferric carboxymaltose in the treatment of postpartum iron deficiency anemia.

Occupational risk factors for non-Hodgkin's lymphoma: a population-based case-control study in Northern Germany.

Microvascular free-tissue transfer for head and neck reconstruction in Jehovah's Witness patients.

Polychlorinated dibenzo-p-dioxins and the human immune system: 4 studies on two Spanish families with increased body burdens of highly chlorinated PCDDs.

Relative potency based on hepatic enzyme induction predicts immunosuppressive effects of a mixture of PCDDS/PCDFS and PCBS.

Prophylaxis for iron deficiency anemia using ferrous sulfate among infants followed up at a primary healthcare unit in the municipality of Embu-SP (2003/2004).

Efficacy of iron-fortified rice in reducing anemia among schoolchildren in the Philippines.

[An overview on biomarkers of arsenic-induced health hazards].

Risk factors for ovarian cancer: an overview with emphasis on hormonal factors.

Performance of laying hens fed diets containing DAS-59122-7 maize grain compared with diets containing nontransgenic maize grain.

Removal of the uremic retention solute p-cresol using fractionated plasma separation and adsorption.

The aryl hydrocarbon receptor affects distinct tissue compartments during ontogeny of the immune system.

Aryl hydrocarbon receptor targets pathways extrinsic to bone marrow cells to enhance neutrophil recruitment during influenza virus infection.

Environmental exposure to dioxins and polychlorinated biphenyls reduce levels of gonadal hormones in newborns: results from the Duisburg cohort study.

Effectiveness of oral and intravenous iron therapy in haemodialysis patients.

TCDD exposure exacerbates atopic dermatitis-related inflammation in NC/Nga mice.

Bioavailability of heme iron in biscuit filling using piglets as an animal model for humans.

Cardiovascular effects of L-glutamate injected in the medial prefrontal cortex of spontaneously hypertensive rats.

Exploiting gene-environment interaction to detect adverse health effects of environmental chemicals on the next generation.

Identification and biochemical characterization of a novel ryanodine receptor gene mutation associated with malignant hyperthermia.

Growth and micronutrient status in children receiving a fortified complementary food.

Renoprotective action of L-carnitine in fructose-induced metabolic syndrome.

Iron status markers in nonanemic pregnant women with and without iron supplementation.

Training and other predictors of personal protective equipment use in Australian grain farmers using pesticides.

The effects of gum arabic oral treatment on the metabolic profile of chronic renal failure patients under regular haemodialysis in Central Sudan.

Acute induction of epileptiform discharges by pilocarpine in the in vitro isolated guinea-pig brain requires enhancement of blood-brain barrier permeability.

[Outdoor work-related health hazards].

Anemia management in peritoneal dialysis patients: can an iron supplement maintain a normal transferrin saturation and hemoglobin level?

Residential exposures to pesticides and childhood leukaemia.

A 12-week randomised study comparing intravenous iron sucrose versus oral ferrous sulphate for treatment of postpartum anemia.

Anaphylaxis to oral iron salts. desensitization protocol for tolerance induction.

Treatment and prevention of anemia with ferrous sulfate plus folic acid in children attending daycare centers in Goi nia, Goi s State, Brazil: a randomized controlled trial.

Comparative study of gastrointestinal tract and liver toxicity of ferrous sulfate, iron amino chelate and iron polymaltose complex in normal rats.

Effect of iron fortification of nursery complementary food on iron status of infants in the DPRKorea.

Humoral response against Mycobacterium bovis Hsp65 derived fragments in children and young people with various disorders.

Caseinophosphopeptide-bound iron: protective effect against gut peroxidation.

Disruption of aryl hydrocarbon receptor (AhR) induces regression of the seminal vesicle in aged male mice.

Sensorial evaluation of nutritional supplements (PROGRESA) enriched with 3 different forms of iron in a rural Mexican community.

Insight into the selectivity of arsenic trioxide for acute promyelocytic leukemia cells by characterizing Saccharomyces cerevisiae deletion strains that are sensitive or resistant to the metalloid.

Feasibility studies of 4'-[methyl-(11)C]thiothymidine as a tumor proliferation imaging agent in mice.

Developmental exposure to polychlorinated biphenyls PCB153 or PCB126 impairs learning ability in young but not in adult rats.

Effects of iron supplementation on attention deficit hyperactivity disorder in children.

Removal of the protein-bound solutes indican and p-cresol sulfate by peritoneal dialysis.

Risk of leukaemia among pesticide manufacturing workers: a review and meta-analysis of cohort studies.

The link between environmental toxicant exposure and endometriosis.

Effects of anoxia, aglycemia, and acidosis on cytosolic Mg²⁺, ATP, and pH in rat sensory neurons.

Iron deficiency anemia, pica, and restless legs syndrome in a teenage girl.

Allium compounds, dipropyl and dimethyl thiosulfinates as antiproliferative and differentiating agents of human acute myeloid leukemia cell lines.

[Levels of PCDD/Fs, PCBs and PBDEs compounds in human placenta tissue].

Optimisation of chemical protein cleavage for erythropoietin semi-synthesis using native chemical ligation.

Boron compounds reduce vanadium tetraoxide genotoxicity in human lymphocytes.

A tandem MS precursor-ion scan approach to identify variable covalent modification of albumin Cys34: a new tool for studying vascular carbonylation.

A human intervention study with foods containing natural Ah-receptor agonists does not significantly show AhR-mediated effects as measured in blood cells and urine.

Arsenite but not arsenate inhibits general proteoglycan synthesis in cultured arterial smooth muscle cells.

Arsenic-induced decreases in the vascular matrix.

Congener-specific analysis of non-dioxin-like polychlorinated biphenyls in blood collected from 127 elderly residents in Nakagawa Town, Fukuoka Prefecture, Japan.

Congener-specific analysis of non-dioxin-like polychlorinated biphenyls in blood collected from 195 pregnant women in Sapporo City, Japan.

Involvement of the pyrilamine transporter, a putative organic cation transporter, in blood-brain barrier transport of oxycodone.

Comparison of methods used for the determination of cholinesterase activity in whole blood.

[Superoxide induces cellular growth and apoptosis of cultured human peripheral blood lymphocytes].

Exposure of laboratory mice to domestic cooking gas: implications for toxicity.

[Role of glycolysis and antioxidant enzymes in the toxicity of amyloid beta peptide Abeta25-35 to erythrocytes].

Formocresol blood levels in children receiving dental treatment under general anesthesia.

Bone mineral density changes in relation to environmental PCB exposure.

Synthesis and in vivo evaluation of novel PET radioligands for imaging the endothelin-A receptor.

A technical mixture of 2,2',4,4'-tetrabromo diphenyl ether (BDE47) and brominated furans triggers aryl hydrocarbon receptor (AhR) mediated gene expression and toxicity.

Evaluation of N (epsilon)-(3-formyl-3,4-dehydropiperidino)lysine as a novel biomarker for the severity of diabetic retinopathy.

Phospholipase A(2), reactive oxygen species, and lipid peroxidation in CNS pathologies.

Limited validity of o-cresol and benzylmercapturic acid in urine as biomarkers of occupational exposure to toluene at low levels.

Acetyl-L-Carnitine selectively prevents post-ischemic LTP via a possible action on mitochondrial energy metabolism.

Mild mitochondrial uncoupling in mice affects energy metabolism, redox balance and longevity.

Crosstalk between AHR and Wnt signaling through R-Spondin1 impairs tissue regeneration in zebrafish.

Saliva as an analytical tool to measure occupational exposure to toluene.

Potential endocrine disruption of sexual development in free ranging male northern leopard frogs (*Rana pipiens*) and green frogs (*Rana clamitans*) from areas of intensive row crop agriculture.

Changes in correlation coefficients of exposure markers as a function of intensity of occupational exposure to toluene.

Concentrations of polychlorinated dibenzo-p-dioxins, polychlorinated dibenzofurans, and dioxin-like polychlorinated biphenyls in blood and breast milk collected from 60 mothers in Sapporo City, Japan.

Ghrelin infused into the portal vein inhibits glucose-stimulated insulin secretion in Wistar rats.

Gender differences in the effects of organochlorines, mercury, and lead on thyroid hormone levels in lakeside communities of Quebec (Canada).

The Duisburg birth cohort study: influence of the prenatal exposure to PCDD/Fs and dioxin-like PCBs on thyroid hormone status in newborns and neurodevelopment of infants until the age of 24 months.

Effects of boric acid and borax on titanium dioxide genotoxicity.

AH receptor agonist activity in human blood measured with a cell-based bioassay: evidence for naturally occurring AH receptor ligands in vivo.

Boronate-containing polymers form affinity complexes with mucin and enable tight and reversible occlusion of mucosal lumen by poly(vinyl alcohol) gel.

Daily supplementation with iron increases lipid peroxidation in young women with low iron stores.

In vitro and ex vivo activity of new derivatives of acetoxyacid synthase inhibitors against *Mycobacterium tuberculosis* and non-tuberculous mycobacteria.

Transport of Val-Leu-Pro-Val-Pro in human intestinal epithelial (Caco-2) cell monolayers.

Determination of dioxins and polychlorinated biphenyls in breast milk, maternal blood and cord blood from residents of Tohoku, Japan.

Quercetin administration during chelation therapy protects arsenic-induced oxidative stress in mice.

Vascular leakage induced by exposure to arsenic via increased production of NO, hydroxyl radical and peroxynitrite.

Isotype expression, post-translational modification and stage-dependent production of tubulins in erythrocytic *Plasmodium falciparum*.

Agglutinin-mediated phagocytosis-associated generation of superoxide anion and nitric oxide by the hemocytes of the giant freshwater prawn *Macrobrachium rosenbergii*.

Sodium azide, a bacteriostatic preservative contained in commercially available laboratory reagents, influences the responses of human platelets via the cGMP/PKG/VASP pathway.

Distribution of PCDDs, PCDFs and dioxin-like PCBs in the blood, testis and adipose tissue of suckling beef calves.

CD36 and proteoglycan-mediated pathways for (n-3) fatty acid enriched triglyceride-rich particle blood clearance in mouse models in vivo and in peritoneal macrophages in vitro.

Development of a human adipocyte model derived from human mesenchymal stem cells (hMSC) as a tool for toxicological studies on the action of TCDD.

In vitro and in vivo reduction of sodium arsenite induced toxicity by aqueous garlic extract.

A comparison of infant hair, cord blood and meconium analysis to detect fetal exposure to environmental pesticides.

Perinatal dioxin exposure, cytochrome P-450 activity, liver functions and thyroid hormones at follow-up after 7-12 years.

Enhancing effect of chlorinated organic solvents on histamine release and inflammatory mediator production.

Estimation of atrazine in the stratum corneum and its toxic effects in skin following topical application to rabbits.

Testicular toxicity and mechanisms of chlorotoluron compounds in the mouse.

Melatonin prevents lipid peroxidation in human erythrocytes but augments deterioration of deformability after in vitro oxidative stress.

Derivation of biomonitoring equivalent (BE) values for 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and related compounds: a screening tool for interpretation of biomonitoring data in a risk assessment context.

Involvement of reduced folate carrier 1 in the inner blood-retinal barrier transport of methyltetrahydrofolate.

Tissue uptake, mortality, and sublethal effects of monomethylarsonic acid (MMA(V)) in nestling zebra finches (*Taeniopygia guttata*).

Effect of oversulfated chondroitin-6-sulfate or oversulfated fucoidan in the activation of glutamic plasminogen by tissue plasminogen activator: role of lysine and cyanogen bromide-fibrinogen.

Mutagenic, antimutagenic, cytotoxic, and apoptotic activities of extracts from *Pituranthos tortuosus*.

P-glycoprotein-mediated efflux of phenobarbital at the blood-brain barrier evidence from transport experiments in vitro.

Murine bone marrow-derived dendritic cells as a potential in vitro model for predictive identification of chemical sensitizers.

[Cytotoxicity of the herbicide glyphosate in human peripheral blood mononuclear cells].

Identification of an alginate-based formulation of paraquat to reduce the exposure of the herbicide following oral ingestion.

Targeted disruption of the glutaredoxin 1 gene does not sensitize adult mice to tissue injury induced by ischemia/reperfusion and hyperoxia.

Synthesis, cytotoxicity and clastogenicity of novel alpha-aminophosphonic acids.

Chlorate poisoning in beef cattle.

[Effects of high dose ambroxol on lung injury induced by paraquat in rats].

Pathophysiological aspects of cyclophosphamide and ifosfamide induced hemorrhagic cystitis; implication of reactive oxygen and nitrogen species as well as PARP activation.

Trifluralin toxicity in a Chagas disease mouse model.

Lack of effects of 2,4-dichlorophenoxyacetic acid administration on markers of oxidative stress during early pregnancy in mice.

The use of metabolomics for the discovery of new biomarkers of effect.

An antisense oligonucleotide to HSP47 inhibits paraquat-induced pulmonary fibrosis in rats.

Immunomodulatory effects of the herbicide propanil on cytokine production in humans: In vivo and in vitro exposure.

Pesticide poisoning.

Detection of cytogenetic and DNA damage in peripheral erythrocytes of goldfish (*Carassius auratus*) exposed to a glyphosate formulation using the micronucleus test and the comet assay.

[Change of liver function and blood glucose in patients with acute paraquat poisoning].

Effectiveness of activated hydrogen ions in neutralizing paraquat intoxication in rats.

In vitro atrazine-exposure inhibits human natural killer cell lytic granule release.

3,4-dichloropropionaniline suppresses normal macrophage function.

Cardiovascular effects of herbicides and formulated adjuvants on isolated rat aorta and heart.

Butachlor-induced acute toxic hepatitis.

Protective effect of erythropoietin against 1-methyl-4-phenylpyridinium-induced neurodegeneration in PC12 cells.

Effects of paraquat on anti-oxidant system in rats.

An unusual toxic cause of hemolytic-uremic syndrome.

Plasma cell gingivitis among herbal toothpaste users: a report of three cases.

Agent Orange, prostate cancer irradiation and acute promyelocytic leukemia (APL): is there a link?

Full survival of paraquat-exposed rats after treatment with sodium salicylate.

Melatonin reduces mortality and oxidatively mediated hepatic and renal damage due to diquat treatment.

Combined effects of herbicides on biomarkers reflecting immune-endocrine interactions in goldfish. Immune and antioxidant effects.

Characterization of hepatic glutathione S-transferases in coho salmon (*Oncorhynchus kisutch*).

Comparison study of the extraction methods of paraquat in post-mortem human blood samples.

Cancer incidence and mortality in a New Zealand community potentially exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin from 2,4,5-trichlorophenoxyacetic acid manufacture.

Chemically diverse toxicants converge on Fyn and c-Cbl to disrupt precursor cell function.

Luteolin protects rat PC12 and C6 cells against MPP+ induced toxicity via an ERK dependent Keap1-Nrf2-ARE pathway.

Atrazine is an immune disruptor in adult northern leopard frogs (*Rana pipiens*).

Lipid oxidation products and oxidized low-density lipoproteins impair platelet-derived growth factor receptor activity in smooth muscle cells: implication in atherosclerosis.

Amifostine and glutathione prevent ifosfamide- and acrolein-induced hemorrhagic cystitis.

The HcaR regulatory protein of *Photobacterium luminescens* affects the production of proteins involved in oxidative stress and toxemia.

Cells deficient in the FANC/BRCA pathway are hypersensitive to plasma levels of formaldehyde.

Acute antihypertensive action of Tempol in the spontaneously hypertensive rat.

Impact of arsenic in foodstuffs on the people living in the arsenic-affected areas of West Bengal, India.

Acute acrolein-induced cystitis in mice.

Arsenic methylation, GSTT1, GSTM1, GSTP1 polymorphisms, and skin lesions.

Evaluation of oxidative stress in D-serine induced nephrotoxicity.

Cinnamaldehyde--a potential antidiabetic agent.

Antiplatelet and antithrombotic activities of essential oil from wild *Ocotea quixos* (Lam.) Kosterm. (Lauraceae) calices from Amazonian Ecuador.

Cinnamaldehyde reduction of platelet aggregation and thrombosis in rodents.

Metabolic profiling using Fourier-transform ion-cyclotron-resonance mass spectrometry.

Herbicide 2,4-dichlorophenoxyacetic acid (2,4-D)-induced cytogenetic damage in human lymphocytes in vitro in presence of erythrocytes.

Oral absorption and oxidative metabolism of atrazine in rats evaluated by physiological modeling approaches.

Mechanism of the cytotoxicity of the diazoparaquinone antitumor antibiotic kinamycin F.

Formation of an adduct between insulin and the toxic lipoperoxidation product acrolein decreases both the hypoglycemic effect of the hormone in rat and glucose uptake in 3T3 adipocytes.

Adipokinetic hormone-induced enhancement of antioxidant capacity of *Pyrrhocoris apterus* hemolymph in response to oxidative stress.

Disruption of thyroid hormone binding to sea bream recombinant transthyretin by ioxinyl and polybrominated diphenyl ethers.

Tissue distribution and urinary excretion of dimethylated arsenic and its metabolites in dimethylarsinic acid- or arsenate-treated rats.

20-Hydroxyecdysone prevents oxidative stress damage in adult *Pyrrhocoris apterus*.

Endogenous hydrogen peroxide in paraventricular nucleus mediating cardiac sympathetic afferent reflex and regulating sympathetic activity.

Solid phase extraction of phosphorus-containing amino acid-type herbicides and their metabolites from human blood with titania for determination by capillary electrophoresis.

Is the titer of adipokinetic peptides in *Leptinotarsa decemlineata* fed on genetically modified potatoes increased by oxidative stress?

Trimethylamine oxide suppresses stress-induced alteration of organic anion transport in choroid plexus.

Metabolic differences between two dimethylthioarsenicals in rats.

Targeting the methyl erythritol phosphate (MEP) pathway for novel antimalarial, antibacterial and herbicidal drug discovery: inhibition of 1-deoxy-D-xylulose-5-phosphate reductoisomerase (DXR) enzyme.

Polychlorinated biphenyls and their hydroxylated metabolites (OH-PCBS) in pregnant women from eastern Slovakia.

Binding of dimethylarsinous acid to cys-13 α of rat hemoglobin is responsible for the retention of arsenic in rat blood.

Enhancing cell survival of atrazine degrading *Rhodococcus erythropolis* NI86/21 cells encapsulated in alginate beads.

Oxidative stress impairs heme detoxification in the midgut of the cattle tick, *Rhipicephalus (Boophilus) microplus*.

Thidiazuron-induced regeneration of *Echinacea purpurea* L.: micropropagation in solid and liquid culture systems.

Supplementation of ascorbic acid and alpha-tocopherol prevents arsenic-induced protein oxidation and DNA damage induced by arsenic in rats.

Household exposure to pesticides and risk of childhood hematopoietic malignancies: The ESCALE study (SFCE).

Iron deficiency anemia in infancy is associated with altered temporal organization of sleep states in childhood.

Gene-mutation induction by arsenic compounds in the mouse lymphoma assay.

Increased plasma malondialdehyde and fructosamine in iron deficiency anemia: effect of treatment.

Iron supplementation in pregnancy--does the preparation matter?

Mode of antibacterial action of a signal peptide, Pep27 from *Streptococcus pneumoniae*.

Effects of some boron compounds on peripheral human blood.

Pathogenesis of aryl hydrocarbon receptor-mediated development of lymphoma is associated with increased cyclooxygenase-2 expression.

Differential effects of quercetin and silymarin on arsenite-induced cytotoxicity in two human breast adenocarcinoma cell lines.

A case of survival following high-dose sodium azide poisoning.

Cytogenetic effects of commercial formulations of deltamethrin and/or isotretinoin on human peripheral lymphocytes and mouse bone marrow cells.

Serum profiles of PCDDs and PCDFs, in individuals near the Escambia Wood Treating Company Superfund site in Pensacola, FL.

Effects of dinoseb on energy reserves in the soil arthropod *Folsomia candida*.

Cortical spreading depression releases ATP into the extracellular space and purinergic receptor activation contributes to the induction of ischemic tolerance.

2,3,7,8-TCDD exposure, endothelial dysfunction and impaired microvascular reactivity.

In vitro bioavailability of iron and sensory qualities of iron-fortified wheat biscuits.

Lafora-like ground-glass inclusions in hepatocytes of pediatric patients: a report of two cases.

Randomized trial of early versus late enteral iron supplementation in infants with a birth weight of less than 1301 grams: neurocognitive development at 5.3 years' corrected age.

Study on hemostatic mechanism of fully soluble hemostatic fiber.

Mechanism of internalization of an ICAM-1-derived peptide by human leukemic cell line HL-60: influence of physicochemical properties on targeted drug delivery.

Isolation and characterization of arsenite-resistant human epidermoid carcinoma KB cells.

Relationship between serum concentrations of persistent organic pollutants and the prevalence of metabolic syndrome among non-diabetic adults: results from the National Health and Nutrition Examination Survey 1999-2002.

Arsenic salts induced autophagic cell death and hypermethylation of DAPK promoter in SV-40 immortalized human uroepithelial cells.

Comparison of the effects of arsenic and cadmium on benzo(a)pyrene-induced micronuclei in mouse bone-marrow.

Goserelin acetate 10.8 mg plus iron versus iron monotherapy prior to surgery in premenopausal women with iron-deficiency anemia due to uterine leiomyomas: results from a Phase III, randomized, multicenter, double-blind, controlled trial.

Parental occupational exposure to pesticides and the risk of childhood leukemia in Costa Rica.

Bisphenol-A and chlorinated derivatives in adipose tissue of women.

Intravenous ferric carboxymaltose compared with oral iron in the treatment of postpartum anemia: a randomized controlled trial.

Imatinib mesylate inhibits cell invasion of malignant peripheral nerve sheath tumor induced by platelet-derived growth factor-BB.

Fetal tracheal occlusion for the treatment of congenital diaphragmatic hernia.

Protective effects of hepatocellular canalicular conjugate export pump (Mrp2) on sodium arsenite-induced hepatic dysfunction in rats.

Hostility, anger, and depression predict increases in C3 over a 10-year period.

Policy statement on iron deficiency in pre-school-aged children.

Experimental investigation of the role of endothelin-1 in idiopathic portal hypertension.

Aryl hydrocarbon receptor activation during influenza virus infection unveils a novel pathway of IFN-gamma production by phagocytic cells.

[Effectiveness of different iron supplementation strategies on hemoglobin and ferritin levels among schoolchildren in Teresina, Piauí State, Brazil].

Cytotoxicity in cultured mammalian cells is a function of the method used to estimate it.

Subchronic feeding study of DAS-59122-7 maize grain in Sprague-Dawley rats.

Pesticides and their metabolites in the homes and urine of farmworker children living in the Salinas Valley, CA.

Mass iron treatment is cheaper than routine deworming.

Differences in acute toxicity syndromes of 2,3,7,8-tetrachlorodibenzo-p-dioxin and 1,2,3,4,7,8-hexachlorodibenzo-p-dioxin in rats.

Fortification of drinking water to control iron-deficiency anemia in preschool children.

Effects of various iron fortificants on sensory acceptability and shelf-life stability of instant noodles.

[Recommendation of a highly sensitive method for measuring hemoglobin in hemolytic test].

[Efficacy of iron supplementation with or without vitamin A for anemia control].

A randomised placebo-controlled trial to determine the effect of iron supplementation on pregnancy outcome in pregnant women with haemoglobin > or = 13.2 g/dl.

Symptomatic response of erythropoietic protoporphyria to iron supplementation.

Decreased lung fibroblast growth factor 18 and elastin in human congenital diaphragmatic hernia and animal models.

[Relationship between blood dioxin levels and present/past clinical symptoms in Kanemi Yusho patients].

Inhibition of NF- κ B does not induce c-Jun N-terminal kinase-mediated apoptosis in reperfusion injury.

Inhibiting glycosphingolipid synthesis improves glycemic control and insulin sensitivity in animal models of type 2 diabetes.

A battery of DNA effect biomarkers to evaluate environmental exposure of Flemish adolescents.

Some clinico and histopathological changes in female goats experimentally exposed to dioxin.

Iron absorption from wheat flour: effects of lemonade and chamomile infusion.

New insights about iron bioavailability inhibition by zinc.

Long-term effects of subcutaneously injected 2,3,7,8-tetrachlorodibenzo-p-dioxin on the liver of rhesus monkeys.

Iron therapy for renal anemia: how much needed, how much harmful?

Role of heat shock protein 70 in hepatic ischemia-reperfusion injury in mice.

Thirteen week feeding study with transgenic maize grain containing event DAS- \sim 15 \sim 7-1 in Sprague-Dawley rats.

Developmental exposure of mice to TCDD elicits a similar uterine phenotype in adult animals as observed in women with endometriosis.

Serum dioxin concentrations and quality of ovarian function in women of Seveso.

Rickettsial and other tick-borne infections.

Occupational exposure to methyl iodide.

Severe skin reaction due to excipients of an oral iron treatment.

Medical countermeasure against respiratory toxicity and acute lung injury following inhalation exposure to chemical warfare nerve agent VX.

Pharmacokinetics of arsenic species in Japanese patients with relapsed or refractory acute promyelocytic leukemia treated with arsenic trioxide.

Newly diagnosed iron deficiency anaemia in a premenopausal woman.

Rationale and design of the IRON-HF study: a randomized trial to assess the effects of iron supplementation in heart failure patients with anemia.

Intravenous ferric gluconate significantly improves response to epoetin alfa versus oral iron or no iron in anemic patients with cancer receiving chemotherapy.

Clinical aspects of iron use in the anemia of kidney disease.

P-selectin mediates metastatic progression through binding to sulfatides on tumor cells.

Placental transfer of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls in Taiwanese mothers in relation to menstrual cycle characteristics.

Effect of iron repletion and correction of iron deficiency on thyroid function in iron-deficient Iranian adolescent girls.

Arsenic methylation capability and hypertension risk in subjects living in arseniasis-hyperendemic areas in southwestern Taiwan.

Microarray analysis of gene expression in peripheral blood mononuclear cells from dioxin-exposed human subjects.

Comparison of efficacy, tolerability, and cost of iron polymaltose complex with ferrous sulphate in the treatment of iron deficiency anemia in pregnant women.

Keokuk County rural health study: self-reported use of agricultural chemicals and protective equipment.

Reproductive disorders associated with pesticide exposure.

Influence of dietary fat and zinc supplementation on the iron utilization in growing rats.

Investigation on the genotoxic effects of long-term administration of sodium arsenite in bone marrow and testicular cells in vivo using the comet assay.

[Sodium azide--clinical course of the poisoning and treatment].

[¹¹C]Vinblastine syntheses and preliminary imaging in cancer patients.

Iron(III)-hydroxide polymaltose complex in iron deficiency anemia / review and meta-analysis.

Decreased treatment failure rates following duodenal release ferrous glycine sulfate in iron deficiency anemia associated with autoimmune gastritis and Helicobacter pylori gastritis.

Arsenic methylation, urinary arsenic metabolites and human diseases: current perspective.

Exacerbation of infectious diseases by iron supplementation.

Is any link between inflammation and coronary artery ectasia?

Involvement of substance P and neurogenic inflammation in arsenic-induced early vascular dysfunction.

Taurine release in mouse brain stem slices under cell-damaging conditions.

Iron supplementation maintains ventilatory threshold and improves energetic efficiency in iron-deficient nonanemic athletes.

In vitro utilization of ferromagnetic nanoparticles in hemodialysis therapy.

Semen quality in relation to xenohormone and dioxin-like serum activity among Inuits and three European populations.

Association of thyroid hormone concentrations with levels of organochlorine compounds in cord blood of neonates.

Osteoblast protects osteoclast devoid of sodium-dependent vitamin C transporters from oxidative cytotoxicity of ascorbic acid.

Alterations in human red blood cell properties induced by 3-(dimethylamino)phenol (in vitro).

Damage to the cytoplasmic membrane and cell death caused by lycopene in *Candida albicans*.

Polychlorinated biphenyls 105 and 118 form thyroid hormone receptor agonists after cytochrome P4501A1 activation in rat pituitary GH3 cells.

Detection and structural characterization of glutathione-trapped reactive metabolites using liquid chromatography-high-resolution mass spectrometry and mass defect filtering.

Uridine-5'-triphosphate (UTP) maintains cardiac mitochondrial function following chemical and hypoxic stress.

Platelet-endothelial cell adhesion molecule-1-directed endothelial targeting of superoxide dismutase alleviates oxidative stress caused by either extracellular or intracellular superoxide.

An adaptable internal dose model for risk assessment of dietary and soil dioxin exposures in young children.

Comparison of the effect of phenol and its derivatives on protein and free radical formation in human erythrocytes (in vitro).

Panax ginseng effects on DNA damage, CYP1A1 expression and histopathological changes in testes of rats exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Structure of *Arabidopsis thaliana* 5-methylthioribose kinase reveals a more occluded active site than its bacterial homolog.

Lipid peroxidation-induced DNA damage in cancer-prone inflammatory diseases: a review of published adduct types and levels in humans.

Alkaline saponification results in decomposition of tocopherols in milk and ovine blood plasma.

Immunomodulatory effects of organochlorine mixtures upon in vitro exposure of peripheral blood leukocytes differ between free-ranging and captive southern sea otters (*Enhydra lutris*).

Polychlorinated biphenyls alter the expression of endothelial nitric oxide synthase mRNA in human umbilical vein endothelial cells.

Folic acid supplementation lowers blood arsenic.

Identification of the catalytic subunit of acetohydroxyacid synthase in *Haemophilus influenzae* and its potent inhibitors.

Concentrations of polychlorinated dibenzo-p-dioxins, polychlorinated dibenzofurans, and dioxin-like polychlorinated biphenyls in blood collected from 195 pregnant women in Sapporo City, Japan.

Attic dust and human blood samples collected near a former wood treatment facility.

Concentration and age-dependent elimination kinetics of polychlorinated dibenzofurans in Yucheng and Yusho patients.

Potentiating effect of an endocrine disruptor, paranonylphenol, on the generation of reactive oxygen species (ROS) in human venous blood -- association with the activation of signal transduction pathway.

An angiotensin II type-I receptor blocker, olmesartan medoxomil, attenuates lipid peroxidation in renal injury induced by subtotal nephrectomy.

Src family tyrosine kinases mediate contraction of rat isolated tail arteries in response to a hyposmotic stimulus.

Lack of an effect of oral iron administration on mycophenolic acid pharmacokinetics in stable renal transplant recipients.

The mode of action of thidiazuron: auxins, indoleamines, and ion channels in the regeneration of *Echinacea purpurea* L.

2,3,7,8-Tetrachlorodibenzo-p-dioxin modulates functional differentiation of mouse bone marrow-derived dendritic cells Downregulation of RelB by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Surface desorption atmospheric pressure chemical ionization mass spectrometry for direct ambient sample analysis without toxic chemical contamination.

Hemodynamic consequences of chronic parasympathetic blockade with a peripheral muscarinic antagonist.

In vitro and in vivo characterization of [³H]CNS-5161--a use-dependent ligand for the N-methyl-D-aspartate receptor in rat brain.

Current role of liquid chromatography-mass spectrometry in clinical and forensic toxicology.

Hexavalent chromium reduction by *Acinetobacter haemolyticus* isolated from heavy-metal contaminated wastewater.

SCL-GFP transgenic zebrafish: in vivo imaging of blood and endothelial development and identification of the initial site of definitive hematopoiesis.

Pesticide poisoning in domestic animals and livestock in Austria: a 6 years retrospective study.

Risk assessment of great horned owls (*Bubo virginianus*) exposed to polychlorinated biphenyls and DDT along the Kalamazoo River, Michigan, USA.

Towards improved artificial lungs through biocatalysis.

Intravenous versus oral iron supplementation in peritoneal dialysis patients.

Overexpression of thioredoxin1 in transgenic mice suppresses development of diabetic nephropathy.

Prenatal exposures to persistent organic pollutants as measured in cord blood and meconium from three localities of Zhejiang, China.

Chronic exposure to sub-lethal concentration of a glyphosate-based herbicide alters hormone profiles and affects reproduction of female Jundiã (*Rhamdia quelen*).

Dioxin concentration in the blood of patients collected during medical check-up for Yusho in 2004-2005.

[Analysis of residual nature of dioxins in blood of Yusho patients and controls in relation to the Yusho oil and food as respective exposure routes].

[Trend of 2,3,4,7,8-PeCDF concentrations in the blood of Yusho patients over four years].

Kinetics and functional assay of liver repopulation after human cord blood transplantation.

The Environmental Specimen Bank for Human Tissues as part of the German Environmental Specimen Bank.

Preparation of cyclic 2',3'-carbamate derivatives of erythromycin macrolide antibiotics.

Mechanisms of sodium azide-induced changes in intracellular calcium concentration in rat primary cortical neurons.

Reproductive functions and hypothalamic catecholamines in response to the soil fumigant metam sodium: adaptations to extended exposures.

Haemocyte apoptosis as a general cellular immune response of the snail, *Lymnaea stagnalis*, to a toxicant.

Comparison of three different preservatives for morphological and real-time PCR analyses of *Haemonchus contortus* eggs.

[Relationship between 5,10-methylenetetrahydrofolate reductase genetic polymorphism and arsenic metabolism].

Non-heme induction of heme oxygenase-1 does not alter cellular iron metabolism.

Preoperative haematinics and transfusion protocol reduce the need for transfusion after total knee replacement.

Modifying effect of the AR gene trinucleotide repeats and SNPs in the AHR and AHRR genes on the association between persistent organohalogen pollutant exposure and human sperm Y:X ratio.

Determinants of dioxins and furans in blood of non-occupationally exposed populations living near Portuguese solid waste incinerators.

PCDD/F and dioxin-like PCB in human blood and milk from German mothers.

Concentration and distribution of dioxins and related compounds in human tissues.

Levels of PCDDs, PCDFs, and PCBs in the blood of the non-occupationally exposed residents living in the vicinity of a chemical plant in the Czech Republic.

Arsenite interactions with phospholipid bilayers as molecular models for the human erythrocyte membrane.

No contribution of multipotent mesenchymal stromal cells to liver regeneration in a rat model of prolonged hepatic injury.

Cloning, purification, and identification of the liver canalicular ecto-ATPase as NTPDase8.

Inhibitory and enhancing effects of piroxicam on whole blood chemiluminescence.

Halogenated organic contaminants and mercury in northern fulmars (*Fulmarus glacialis*): levels, relationships to dietary descriptors and blood to liver comparison.

Computer aided boar semen motility analysis for cereulide detection in different food matrices.

Resveratrol protects dopaminergic neurons in midbrain slice culture from multiple insults.

Can radiation-induced apoptosis be modulated by inhibitors of energy metabolism?

Laminin and a *Plasmodium* ookinete surface protein inhibit melanotic encapsulation of Sephadex beads in the hemocoel of mosquitoes.

In vitro and in vivo characterization of alkyl hydroperoxide reductase mutant strains of *Helicobacter hepaticus*.

Investigating the role of the aryl hydrocarbon receptor in benzene-initiated toxicity in vitro.

Comparative developmental toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the hamster, rat and guinea pig.

Heparan sulfate proteoglycans (HSPGs) modulate BMP2 osteogenic bioactivity in C2C12 cells.

Vitamin E supplementation protects oxidative stress during arsenic and fluoride antagonism in male mice.

PLA2 mediated arachidonate free radicals: PLA2 inhibition and neutralization of free radicals by antioxidants--a new role as anti-inflammatory molecule.

LC-MS-MS analysis of 2,4-dinitrophenol and its phase I and II metabolites in a case of fatal poisoning.

Effects of combined administration of captopril and DMSA on arsenite induced oxidative stress and blood and tissue arsenic concentration in rats.

Modulation of the respiratory burst by organochlorine mixtures in marine mammals, humans, and mice.

EU biotech crop regulations and environmental risk: a case of the emperor's new clothes?

Synthesis of 6-chloroisoquinoline-5,8-diones and pyrido[3,4-b]phenazine-5,12-diones and evaluation of their cytotoxicity and DNA topoisomerase II inhibitory activity.

Diquat induces renal proximal tubule injury in glutathione reductase-deficient mice.

Acrolein induces vasodilatation of rodent mesenteric bed via an EDHF-dependent mechanism.

Toxicity of a trivalent organic arsenic compound, dimethylarsinous glutathione in a rat liver cell line (TRL 1215).

Genotoxicity analysis of the phenoxy herbicide dicamba in mammalian cells in vitro.

Relationship between body iron stores and diquat toxicity in male Fischer-344 rats.

Aldehyde load in ischemia-reperfusion brain injury: neuroprotection by neutralization of reactive aldehydes with phenelzine.

A model of hemorrhagic cystitis induced with acrolein in mice.

The effect of paraquat on hepatic EROD activity, liver, and gonadal histology in males and females of Nile tilapia, *Oreochromis niloticus*, exposed at different temperatures.

Comparative genotoxicity of the herbicides Roundup, Stomp and Reglone in plant and mammalian test systems.

A case of acute sodium chlorate self-poisoning successfully treated without conventional therapy.

Pesticides exposure in Culturama, Brazil--knowledge, attitudes, and practices.

Effect of glyphosate herbicide on acetylcholinesterase activity and metabolic and hematological parameters in piava (*Leporinus obtusidens*).

Introduction of cAMP and establishment of neutral lipids alterations as pollution biomarkers using the mussel *Mytilus galloprovincialis*. Correlation with a battery of biomarkers.

Histological changes and micronucleus induction in the zebra mussel *Dreissena polymorpha* after paraquat exposure.

Effects of Diuron [3-(3,4-dichlorophenyl)-1,1-dimethylurea] on the urinary bladder of male Wistar rats.

NTP Technical Report on the comparative toxicity studies of allyl acetate (CAS No. 591-87-7), allyl alcohol (CAS No. 107-18-6) and acrolein (CAS No. 107-02-8) administered by gavage to F344/N rats and B6C3F1 mice.

[Proposal of an analytical pathway for the treatment of poisonings--application of blood concentration to the evaluation of toxicity: nomogram and outcome].

Parenteral glyphosate-surfactant herbicide intoxication.

Antimutagenic effect of neem leaves extract in freshwater fish, *Channa punctatus* evaluated by cytogenetic tests.

DNA damage and repair in haemolymph cells of golden mussel (*Limnoperna fortunei*) exposed to environmental contaminants.

[Influence of ambroxol on paraquat-induced lung tissue injury and change of pulmonary surfactant-associated protein A in the experimental rats].

[Propofol protecting rats from paraquat induced lung injury].

The relative sensitivity of growth and reproduction in the springtail, *Folsomia candida*, exposed to xenobiotics in the laboratory: an indicator of soil toxicity.

Paternal occupational exposure to pesticides or herbicides as risk factors for cancer in children and young adults: a case-control study from the North of England.

Identification of a novel hemoglobin adduct in Sprague Dawley rats exposed to atrazine.

Analysis of reproductive toxicity and classification of glufosinate-ammonium.

Strategies to assess systemic exposure of chemicals in subchronic/chronic diet and drinking water studies.

Hodgkin lymphoma, multiple myeloma, soft tissue sarcomas, insect repellents, and phenoxyherbicides.

Acrolein produces nitric oxide through the elevation of intracellular calcium levels to induce apoptosis in human umbilical vein endothelial cells: implications for smoke angiopathy.

Mortality from ischemic heart disease and diabetes mellitus (type 2) in four U.S. wheat-producing states: a hypothesis-generating study.

Orphan nuclear receptor pregnane X receptor sensitizes oxidative stress responses in transgenic mice and cancerous cells.

Effects of insect growth regulators on the nontarget soil arthropod *Folsomia candida* (Collembola).

[Fatal poisoning caused by the ingestion of a concentrated solution of 2,4-D and MCPP].

Further evidence of the usefulness of Acute Physiology and Chronic Health Evaluation II scoring system in acute paraquat poisoning.

Polyamines in renal failure.

Hyperbaric oxygen preconditioning induces tolerance against spinal cord ischemia by upregulation of antioxidant enzymes in rabbits.

H₂O₂ injury in beta thalassemic erythrocytes: protective role of catalase and the prooxidant effects of GSH.

Gene expression of cytokines and growth factors in the lungs after paraquat administration in mice.

Effects of alpha tocopherol and probucol supplements on allergen-induced airway inflammation and hyperresponsiveness in a mouse model of allergic asthma.

Drought effects on carbon and nitrogen metabolism of pea nodules can be mimicked by paraquat: evidence for the occurrence of two regulation pathways under oxidative stresses.

Acrolein generation stimulates hypercontraction in isolated human blood vessels.

LC/MS/MS analysis of quaternary ammonium drugs and herbicides in whole blood.

Clarification of pathway-specific inhibition by Fourier transform ion cyclotron resonance/mass spectrometry-based metabolic phenotyping studies.

Total syntheses of (+/-)-beta-erythroidine and (+/-)-8-oxo-beta-erythroidine by an intramolecular Diels-Alder cycloaddition of a 2-amidoacrolein.

Hydralazine rescues PC12 cells from acrolein-mediated death.

Interactions of skin thickness and physicochemical properties of test compounds in percutaneous penetration studies.

Influence of Cry1Ac toxin on mineralization and bioavailability of glyphosate in soil.

Plasma organochlorine concentrations and bone ultrasound measurements: a cross-sectional study in peri- and postmenopausal Inuit women from Greenland.

Cardiovascular responses produced by central injection of hydrogen peroxide in conscious rats.

Sodium arsenite accelerates TRAIL-mediated apoptosis in melanoma cells through upregulation of TRAIL-R1/R2 surface levels and downregulation of cFLIP expression.

Effects of chemical ischemia on cerebral cortex slices: focus on mitogen-activated protein kinase cascade.

Oral mucosal ulceration due to ferrous sulphate tablets: report of a case.

Anthropometric and metabolic factors and risk of benign prostatic hyperplasia: a prospective cohort study of Air Force veterans.

Pharmacologic and functional characterization of malignant hyperthermia in the R163C RyR1 knock-in mouse.

Impaired intestinal iron absorption in Crohn's disease correlates with disease activity and markers of inflammation.

Sigma-1 receptor activation prevents intracellular calcium dysregulation in cortical neurons during in vitro ischemia.

Novel selective orally active CRTH2 antagonists for allergic inflammation developed from in silico derived hits.

MicroRNA responses to cellular stress.

Perinatal exposure to PCB 153, but not PCB 126, alters bone tissue composition in female goat offspring.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,3',4,4',5-pentachlorobiphenyl (PCB 118) (Cas No. 31508-00-6) in female Harlan Sprague-Dawley rats (gavage studies).

Impact of weekly treatment with ferrous sulfate on hemoglobin level, morbidity and nutritional status of anemic infants.

Covariation of psychological attributes and incident coronary heart disease in U.S. Air Force veterans of the Vietnam war.

Effects of iron deficiency versus iron deficiency anemia on brainstem auditory evoked potentials in infancy.

Coexistence of megaloblastic anemia and iron deficiency anemia in a young woman with chronic lymphocytic thyroiditis.

Hypolipidaemic and antiplatelet activity of phenoxyacetic acid derivatives related to alpha-asarone.

Ascorbyl palmitate enhances iron bioavailability in iron-fortified bread.

Interferon-gamma plays protective roles in sodium arsenite-induced renal injury by up-regulating intrarenal multidrug resistance-associated protein 1 expression.

Erythropoietin depletes iron stores: antioxidant neuroprotection for ischemic stroke?

Micronuclei induction and chromosomal aberrations in *Rattus norvegicus* by chloroacetic acid and chlorobenzene.

t(14;18) translocations in lymphocytes of healthy dioxin-exposed individuals from Seveso, Italy.

Bifunctional modulating effects of an indigo dimer (bisindigotin) to CYP1A1 induction in H4IIE cells.

Clozapine bioactivation induces dose-dependent, drug-specific toxicity of human bone marrow stromal cells: a potential in vitro system for the study of agranulocytosis.

Oxidative stress by ascorbate/menadione association kills K562 human chronic myelogenous leukaemia cells and inhibits its tumour growth in nude mice.

Effectiveness of intermittent iron treatment of two- to six-year-old Jordanian children with iron-deficiency anemia.

[Effects of ferrous sulfate supplementation on bone marrow hemopoiesis in rats].

Cancer and pesticides: an overview and some results of the Italian multicenter case-control study on hematolymphopoietic malignancies.

Antimicrobial efficiency of some antiseptic products on endodontic microflora isolated from gangrenous pulp tissue.

Iron deficiency, but not anemia, upregulates iron absorption in breast-fed peruvian infants.

Anti-irritants I: Dose-response in acute irritation.

Quaternary benzo[c]phenanthridine alkaloids sanguinarine and chelerythrine do not affect transcriptional activity of aryl hydrocarbon receptor: analyses in rat hepatoma cell line H4IIE.luc.

Connexin 43 gene expression in mice with cardiopulmonary developmental defects.

Down-regulation of wt1 expression in leukemia cell lines as part of apoptotic effect in arsenic treatment using two compounds.

Severe adverse cutaneous reaction to insulin due to cresol sensitivity.

Molluscicidal effect of fenitrothion and anilofos on *Lymnaea natalensis* and *Biomphalaria alexandrina* snails and on the free larval stages of *Schistosoma mansoni*.

Cutaneous poisoning syndromes in children: a review.

Superior dialytic clearance of beta(2)-microglobulin and p-cresol by high-flux hemodialysis as compared to peritoneal dialysis.

Mechanisms of 2-butoxyethanol-induced hemangiosarcomas.

Insulin-like growth factor-I increases bone sialoprotein (BSP) expression through fibroblast growth factor-2 response element and homeodomain protein-binding site in the proximal promoter of the BSP gene.

Cell death, caspase activation, and HMGB1 release of porcine choroid plexus epithelial cells during *Streptococcus suis* infection in vitro.

For dioxin-induced birth defects, mouse or human CYP1A2 in maternal liver protects whereas mouse CYP1A1 and CYP1B1 are inconsequential.

Failure to thrive while breastfeeding.

Demographic factors determining compliance to iron supplementation in pregnancy in Oyo State, Nigeria.

Angiotensin-converting enzyme inhibitors slow recovery from anemia following cardiac surgery.

Clinical inquiries. What is appropriate management of iron deficiency for young children?

Unique secondary chromosomal abnormalities are frequently found in the chronic phase of chronic myeloid leukemia in southern Vietnam.

Maternal hair--an appropriate matrix for detecting maternal exposure to pesticides during pregnancy.

HCV proteins increase expression of heme oxygenase-1 (HO-1) and decrease expression of Bach1 in human hepatoma cells.

Arsenic speciation transported through the placenta from mother mice to their newborn pups.

Overexpression of survivin in primary ATL cells and sodium arsenite induces apoptosis by down-regulating survivin expression in ATL cell lines.

Lung morphology after late fetal tracheal ligation in rats.

Lethal acute lung injury and hypoglycemia after subcutaneous administration of monochloroacetic acid.

In vitro stability of insulin lispro in continuous subcutaneous insulin infusion.

Adsorption of the uremic toxin p-cresol onto hemodialysis membranes and microporous adsorbent zeolite silicalite.

NTP technical report on the toxicology and carcinogenesis studies of 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (Gavage studies).

[Effects of MRP2-GSH cotransport system on hepatic arsenic metabolism in rats].

Effects of prenatal exposure to polychlorinated biphenyls and dioxins on mental and motor development in Japanese children at 6 months of age.

Clinical pharmacokinetic study of arsenic trioxide in an acute promyelocytic leukemia (APL) patient: speciation of arsenic metabolites in serum and urine.

Acute hypoxia-ischemia results in hydrogen peroxide accumulation in neonatal but not adult mouse brain.

Evaluation of subchronic inhalation toxicity of dimethyl disulfide in rats.

Chronic exposure to methylated arsenicals stimulates arsenic excretion pathways and induces arsenic tolerance in rat liver cells.

Synchrotron microradiography study on acute lung injury of mouse caused by PM(2.5) aerosols.

The dioxin receptor is silenced by promoter hypermethylation in human acute lymphoblastic leukemia through inhibition of Sp1 binding.

Effect of *Centella asiatica* on arsenic induced oxidative stress and metal distribution in rats.

Increased levels of polychlorobiphenyls in Italian women with endometriosis.

Differential susceptibilities of Holtzman and Sprague-Dawley rats to fetal death and placental dysfunction induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) despite the identical primary structure of the aryl hydrocarbon receptor.

NTP technical report on the toxicology and carcinogenesis studies of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (CAS No. 1746-01-6) in female Harlan Sprague-Dawley rats (Gavage Studies).

Two deaths attributed to the use of 2,4-dinitrophenol.

Clinical and experimental applications of NIR-LED photobiomodulation.

NADPH oxidase in the renal medulla causes oxidative stress and contributes to salt-sensitive hypertension in Dahl S rats.

Characterization of transferrin receptor-dependent GaC-Tf-FeN transport in human leukemic HL60 cells.

Depletion of cardiolipin and cytochrome c during ischemia increases hydrogen peroxide production from the electron transport chain.

A dose-response study of the effects of prenatal and lactational exposure to TCDD on the immune response to influenza a virus.

Endocrine disrupters and female reproductive health.

Bothrops moojeni myotoxin-II, a Lys49-phospholipase A2 homologue: an example of function versatility of snake venom proteins.

Synergism in immunotoxicological effects due to repeated combined administration of arsenic and lead in mice.

Elevation of circulating endothelial microparticles in patients with chronic renal failure.

Improved ELISA method for screening human antigen-specific IgE and its application for monitoring specific IgE for novel proteins in genetically modified foods.

Depletion of securin increases arsenite-induced chromosome instability and apoptosis via a p53-independent pathway.

Assessment of genotoxicity of 14 chemical agents used in dental practice: ability to induce chromosome aberrations in Syrian hamster embryo cells.

Lymphoid leukaemia in a saker falcon.

Cooking and Fe fortification have different effects on Fe bioavailability of bread and tortillas.

The effects of prophylactic iron given in prenatal supplements on iron status and birth outcomes: a randomized controlled trial.

Iron bioavailability from fortified petit suisse cheese determined by the prophylactic-preventive method.

Investigation of sanguinarine and chelerythrine effects on CYP1A1 expression and activity in human hepatoma cells.

Diabetogenic effects and pancreatic oxidative damage in rats subchronically exposed to arsenite.

[Tardyferon in obstetric and gynecological practice].

Antioxidant, antimutagenic, and antitumor effects of pine needles (*Pinus densiflora*).

Glycoconjugate vaccines against *Haemophilus influenzae* type b.

A randomized controlled trial of oral versus intravenous iron in chronic kidney disease.

Chondroitin sulfate A chains enhance platelet derived growth factor-mediated signalling in fibrosarcoma cells.

Molecular mechanisms of 2,3,7,8-tetrachlorodibenzo-p-dioxin cardiovascular embryotoxicity.

Effects of 2,4-dinitrophenol on ischemia-induced blood-brain barrier disruption.

NTP toxicology and carcinogenesis studies of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (CAS No. 57465-28-8) in female Harlan Sprague-Dawley rats (Gavage Studies).

[Free radical processes in patients with iron deficiency anemia treated with iron medication].

Effects of caffeine, halothane, and 4-chloro-m-cresol on skeletal muscle lactate and pyruvate in malignant hyperthermia-susceptible and normal swine as assessed by microdialysis.

Understanding dioxin developmental toxicity using the zebrafish model.

Induction of cytochrome P450-1A by the equine estrogen equilenin, a new endogenous aryl hydrocarbon receptor ligand.

Increased manganese uptake by primary astrocyte cultures with altered iron status is mediated primarily by divalent metal transporter.

Inhibition of MAPK stimulates the Ca²⁺ -dependent big-conductance K channels in cortical collecting duct.

De novo expression of MECA-79 glycoprotein-determinant on developing B lymphocytes in gut-associated lymphoid tissues.

A study of soluble HLA-G1 protecting porcine endothelial cells against human natural killer cell-mediated cytotoxicity.

Role of the medial prefrontal cortex in cardiovascular responses to acute restraint in rats.

Toxic effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in developing red seabream (*Pagrus major*) embryo: an association of morphological deformities with AHR1, AHR2 and CYP1A expressions.

Oxidative hemolysis of erythrocytes.

Liver glycogen bodies: ground-glass hepatocytes in transplanted patients.

Cytotoxic effects of S-(dimethylarsino)-glutathione: a putative intermediate metabolite of inorganic arsenicals.

Identification and characterization of genes susceptible to transcriptional cross-talk between the hypoxia and dioxin signaling cascades.

The 2005 World Health Organization reevaluation of human and Mammalian toxic equivalency factors for dioxins and dioxin-like compounds.

Comparison of the effect of Aminopielik D pesticide and its active components on human erythrocytes.

Toxicology and carcinogenesis studies of a mixture of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) (Cas No. 1746-01-6), 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4), and 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) in female Harlan Sprague-Dawley rats (gavage studies).

Toxicology and carcinogenesis studies of 2,3,4,7,8-pentachlorodibenzofuran (PeCDF) (Cas No. 57117-31-4) in female Harlan Sprague-Dawley rats (gavage studies).

Effects of pesticides on soil invertebrates in model ecosystem and field studies: a review and comparison with laboratory toxicity data.

Roles of cellular activation and sulfated glycans in *Haemophilus somnus* adherence to bovine brain microvascular endothelial cells.

C-Reactive protein upregulates receptor for advanced glycation end products expression in human endothelial cells.

Effects of individual and combined exposure to sodium arsenite and sodium fluoride on tissue oxidative stress, arsenic and fluoride levels in male mice.

Toxicology and carcinogenesis studies of a binary mixture of 3,3',4,4',5-pentachlorobiphenyl (PCB 126) (Cas No. 57465-28-8) and 2,2',4,4',5,5'-hexachlorobiphenyl (PCB 153) (CAS No. 35065-27-1) in female Harlan Sprague-Dawley rats (gavage studies).

Aryl hydrocarbon receptor activation produces heart-specific transcriptional and toxic responses in developing zebrafish.

The role of the aryl hydrocarbon receptor pathway in mediating synergistic developmental toxicity of polycyclic aromatic hydrocarbons to zebrafish.

Toll-like receptor priming sensitizes macrophages to proinflammatory cytokine gene induction by deoxynivalenol and other toxicants.

Polychlorinated biphenyl concentrations, congener profiles, and ratios in the fat tissue, eggs, and plasma of snapping turtles (*Chelydra s. serpentina*) from the Ohio Basin of Lake Erie, USA.

Case report: Hydroquinone and/or glutaraldehyde induced acute myeloid leukaemia?

Arsenicals in maternal and fetal mouse tissues after gestational exposure to arsenite.

A fatal case of saponated cresol ingestion.

Arsenite increases vasoconstrictor reactivity in rat blood vessels: role of endothelial nitric oxide function.

Hypoxic vasoconstriction of partial muscular intra-acinar pulmonary arteries in murine precision cut lung slices.

Oral administration of lactoferrin increases hemoglobin and total serum iron in pregnant women.

Differences in tumor-associated protein levels among middle-age Flemish women in association with area of residence and exposure to pollutants.

Horse chestnut extract induces contraction force generation in fibroblasts through activation of Rho/Rho kinase.

Impairment of testicular function in adult male Japanese quail (*Coturnix japonica*) after a single administration of 3-methyl-4-nitrophenol in diesel exhaust particles.

Toluene toxicokinetics and metabolism parameters in the rat and guinea pig.

Chronic exposure to dioxin-like compounds and thyroid function among New York anglers.

Systemic and myelotoxic effects of single administration of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats.

The effects of vehicles on the human dermal irritation potentials of allyl esters.

Body burdens of polychlorinated dibenzo-p-dioxins, dibenzofurans, and biphenyls and their relations to estrogen metabolism in pregnant women.

A toxicokinetic model for the carry-over of dioxins and PCBs from feed and soil to eggs.

Suppressive effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on vascular remodeling that takes place in the normal labyrinth zone of rat placenta during late gestation.

Dystrophin is a possible end-target of ischemic preconditioning against cardiomyocyte oncosis during the early phase of reperfusion.

Effect of chlorpromazine on bone sialoprotein (BSP) gene transcription.

Analytical methods for trace levels of reactive carbonyl compounds formed in lipid peroxidation systems.

Regeneration of the liver in mice treated with a mixture of hepatotoxins in delayed periods after bone marrow transplantation.

Effect of a single in ovo injection of 2,3,7,8-tetrachlorodibenzo-p-dioxin on protein expression in liver and ovary of the one-day-old chick analyzed by fluorescent two-dimensional difference gel electrophoresis and mass spectrometry.

Sodium azide dilates coronary arterioles via activation of inward rectifier K⁺ channels and Na⁺-K⁺-ATPase.

Desensitization of platelet-derived growth factor receptor-beta by oxidized lipids in vascular cells and atherosclerotic lesions: prevention by aldehyde scavengers.

[Polychlorinated biphenyls, dibenzo-p-dioxines, and dibenzofurans in the blood of the indigenous population of the Russian North].

Membrane protein carbonylation in non-leukodepleted CPDA-preserved red blood cells.

The aryl hydrocarbon receptor activates the retinoic acid receptoralpha through SMRT antagonism.

UVA1 radiation (340-400 nm) interferes with the perforin-granule system of CD8hi+ cytotoxic T lymphocytes in vitro.

Ecto-nucleotide pyrophosphatase/phosphodiesterase as part of a multiple system for nucleotide hydrolysis by platelets from rats: kinetic characterization and biochemical properties.

Identification of zebrafish ARNT1 homologs: 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity in the developing zebrafish requires ARNT1.

Epo protects SOD2-deficient mouse astrocytes from damage by oxidative stress.

Influence of orange juice in the levels and in the genotoxicity of iron and copper.

[Resorption and tolerance of the high doses of ferrous sulfate and ferrous gluconate in the patients on peritoneal dialysis].

Synthetic smooth muscle cell phenotype is associated with increased nicotinamide adenine dinucleotide phosphate oxidase activity: effect on collagen secretion.

Phospholipase A2, reactive oxygen species, and lipid peroxidation in cerebral ischemia.

Transport of carbamazepine and drug interactions at blood-brain barrier.

Recent female mouse models displaying advanced reproductive aging.

LTBP-1 blockade in dioxin receptor-null mouse embryo fibroblasts decreases TGF-beta activity: Role of extracellular proteases plasmin and elastase.

[Liquid chromatographic determination of free thiamine and its esters in whole blood].

Peroxynitrite can affect platelet responses by inhibiting energy production.

Co-administration of zinc and n-acetylcysteine prevents arsenic-induced tissue oxidative stress in male rats.

Coagulation-flocculation of wastewaters from a water-based paint and allied products industry and its effect on inert COD.

[Forecasting parameters of acute chemical toxicity according to in vitro conformation changes of proteins].

Isolation, culture, and plant regeneration from *Echinacea purpurea* protoplasts.

Transduced human copper chaperone for Cu,Zn-SOD (PEP-1-CCS) protects against neuronal cell death.

Myeloperoxidase-generated oxidants modulate left ventricular remodeling but not infarct size after myocardial infarction.

Detection of DNA damage by alkaline single cell gel electrophoresis in 2,4-dichlorophenoxyacetic-acid- and butachlor-exposed erythrocytes of *Clarias batrachus*.

[Toxicity effects of pentachlorophenol on *Brachydanio rerio*].

Effect of 2,4-dichlorophenoxyacetic acid on the activities of some metabolic enzymes for generating pyridine nucleotide pool of cells from mouse liver.

Effects of different soil types on the Collembolans *Folsomia candida* and *Hypogastrura assimilis* using the herbicide Phenmedipham.

Acrolein in cigarette smoke inhibits T-cell responses.

[Effects of different doses of levodopa on paraquat-induced neurotoxicity: an experiment with mice].

Mechanism of acrolein-induced vascular toxicity.

Clinical implications of the ethane in exhaled breath in patients with acute paraquat intoxication.

Intentional self-poisoning with the chlorophenoxy herbicide 4-chloro-2-methylphenoxyacetic acid (MCPA).

High blood pressure is one of the symptoms of paraquat-induced toxicity in rats.

The polysaccharide antibody response after *Streptococcus pneumoniae* vaccination is differentially enhanced or suppressed by 3,4-dichloropropionanilide and 2,4-dichlorophenoxyacetic acid.

Effects of a low dose of bentazon on spermatogenesis of mice exposed during foetal, postnatal and adult life.

Persistent inhibition of human natural killer cell function by ziram and pentachlorophenol.

Preventive mechanism of cellular glutathione in monomethylarsonic acid-induced cytolethality.

Immunotoxic effects of short-term atrazine exposure in young male C57BL/6 mice.

Acute arsenic poisoning in two siblings.

Cyanamide-induced aplastic anemia.

The comparative toxicology of 4-chloro-2-methylphenoxyacetic acid and its plant metabolite 4-chloro-2-carboxyphenoxyacetic acid in rats.

Decreasing the oxidant stress from paraquat in isolated perfused rat lung using captopril and niacin.

Assessment of potential application of binary mixtures of 2,4-d with novel aminophosphonates.

[Correlation of plasma endothelin and multiple organ dysfunction syndrome caused by acute paraquat poisoning].

Use of comet and micronucleus assays to measure genotoxicity in meadow voles (*Microtus pennsylvanicus*) living in golf course ecosystems exposed to pesticides.

Response of growth, photosynthesis and photoinhibition of the edible cyanobacterium *Nostoc sphaeroides* colonies to thiobencarb herbicide.

A risk assessment of atrazine use in California: human health and ecological aspects.

Effects on weed and invertebrate abundance and diversity of herbicide management in genetically modified herbicide-tolerant winter-sown oilseed rape.

Inhaled nitric oxide improves the survival of the paraquat-injured rats.

The validation of a pesticide exposure algorithm using biological monitoring results.

Determination of biological reference values for chlorpyrifos metabolites in human urine using a toxicokinetic approach.

Drug-induced hypersensitivity syndrome due to cyanamide associated with multiple reactivation of human herpesviruses.

Poisoning due to urea herbicides.

Herbicides and nitrates in groundwater of Maryland and childhood cancers: a geographic information systems approach.

Atrazine degradation by encapsulated *Rhodococcus erythropolis* NI86/21.

Application of an artificial sea salt solution to determine acute toxicity of herbicides to *Proisotoma minuta* (Collembola).

Mother and fetus both survive from severe paraquat intoxication.

Arsenic-induced micronuclei formation in mammalian cells and its counteraction by tea.

Responses of molecular indicators of exposure in mesocosms: common carp (*Cyprinus carpio*) exposed to the herbicides alachlor and atrazine.

Effects of herbicide and insecticide interaction on soil entomofauna under maize crop.

Review of the genotoxicity of 4-chloro-2-methylphenoxyacetic acid.

Operator exposure when applying amenity herbicides by all-terrain vehicles and controlled droplet applicators.

Neuropathological studies on cycloate-induced neuronal cell death in the rat brain.

An alternative Ca²⁺-dependent mechanism of neuroprotection by the metalloporphyrin class of superoxide dismutase mimetics.

Down-regulation of the glial glutamate transporter GLT-1 in rat hippocampus and striatum and its modulation by a group III metabotropic glutamate receptor antagonist following transient global forebrain ischemia.

Comparison of broiler performance when fed diets containing corn grain with insect-protected (corn rootworm and European corn borer) and herbicide-tolerant (glyphosate) traits, control corn, or commercial reference corn.

Plasma retinoid profile in bullfrogs, *Rana catesbeiana*, in relation to agricultural intensity of sub-watersheds in the Yamaska River drainage basin, QuÃ©bec, Canada.

Glutathione and ascorbic acid enhance recovery of Guinea pig spinal cord white matter following ischemia and acrolein exposure.

Modeling and predicting stress-induced immunosuppression in mice using blood parameters.

Concentrations of polybrominated diphenyl ethers, polychlorinated biphenyls, and polychlorobiphenyls in serum from pregnant Faroese women and their children 7 years later.

Hemoglobin autoxidation and regulation of endogenous H₂O₂ levels in erythrocytes.

Multiple components of 2,4-dichlorophenoxyacetic acid uptake by rat choroid plexus.

DNA damage in leukocytes of workers occupationally exposed to arsenic in copper smelters.

Worker exposures to triclopyr: risk assessment through measurements in urine samples.

Determination of hydroxylated polychlorinated biphenyls (HO-PCBs) in blood plasma by high-performance liquid chromatography-electrospray ionization-tandem quadrupole mass spectrometry.

Tissue distribution and urinary excretion of inorganic arsenic and its methylated metabolites in mice following acute oral administration of arsenate.

Crystal structure of a novel shikimate dehydrogenase from *Haemophilus influenzae*.

Genotoxic and cytotoxic effects in the bone marrow of rats exposed to a low dose of paraquat via the dermal route.

Tissue distribution of arsenic species in rabbits after single and multiple parenteral administration of arsenic trioxide: tissue accumulation and the reversibility after washout are tissue-selective.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced change in intestinal function and pathology: evidence for the involvement of arylhydrocarbon receptor-mediated alteration of glucose transportation.

Arsenite delays progression through each cell cycle phase and induces apoptosis following G2/M arrest in U937 myeloid leukemia cells.

Heart malformation is an early response to TCDD in embryonic zebrafish.

Met5-enkephalin-induced cardioprotection occurs via transactivation of EGFR and activation of PI3K.

Changes in DNA binding pattern of transcription factor YY1 in neuronal degeneration.

Transduced Tat-SOD fusion protein protects against ischemic brain injury.

The effect of iron supplementation on the level of haemoglobin after lower limb arthroplasty.

Effects of N- and C-terminal truncation of HP (2-20) from *Helicobacter pylori* ribosomal protein L1 (RPL1) on its anti-microbial activity.

Paradoxical effects of green tea (*Camellia sinensis*) and antioxidant vitamins in diabetic rats: improved retinopathy and renal mitochondrial defects but deterioration of collagen matrix glycooxidation and cross-linking.

Tetraethylammonium exacerbates ischemic neuronal injury in rat cerebrocortical slice cultures.

Pesticide use and breast cancer risk among farmers' wives in the agricultural health study.

[Ferro-folgamma--a good alternative in the treatment of iron deficiency anemia and depleted iron stores in pregnant women].

Chemical-induced atrial thrombosis in NTP rodent studies.

Pediatric fatality following ingestion of dinitrophenol: postmortem identification of a "dietary supplement".

Erythrocyte susceptibility to oxidative stress in chronic renal failure patients under different substitutive treatments.

Reduced coronary flow reserve in patients with congestive heart failure assessed by transthoracic Doppler echocardiography.

Protective effects of insulin during ischemia-reperfusion injury in hamster cheek pouch microcirculation.

Agricultural pesticide use and childhood cancer in California.

The epidemiology of non-Hodgkin lymphoma.

Toxicology and carcinogenesis studies of sodium chlorate (Cas No. 7775-09-9) in F344/N rats and B6C3F1 mice (drinking water studies).

Comparison of the efficacy of wheat-based snacks fortified with ferrous sulfate, electrolytic iron, or hydrogen-reduced elemental iron: randomized, double-blind, controlled trial in Thai women.

[Risk factors for pediatric malignant bone tumors].

A randomized, controlled trial comparing IV iron sucrose to oral iron in anemic patients with nondialysis-dependent CKD.

Effects of dietary zinc and iron supplementation on mineral excretion, body composition, and mineral status of nursery pigs.

High prevalence of the plasmid-mediated quinolone resistance determinant qnrA in multidrug-resistant Enterobacteriaceae from blood cultures in Liverpool, UK.

Free radical scavenging and antigenotoxic activities of natural phenolic compounds in dried flowers of *Hibiscus sabdariffa* L.

Serum soluble transferrin receptor is a valuable diagnostic tool in iron deficiency of breath-holding spells.

Effects of chemical ischemia in cerebral cortex slices. Focus on nitric oxide.

Pericapillary haem-rich deposits: evidence for microhaemorrhages in aging human cerebral cortex.

Hypothyroidism attenuates protein tyrosine nitration, oxidative stress and renal damage induced by ischemia and reperfusion: effect unrelated to antioxidant enzymes activities.

Determination of optimal conditions for studies of electrophoretic mobility of human erythrocytes loaded with cryoglobulins.

[Fractional utilization of reduced iron powder in Chinese child bearing age women with dual stable isotopes].

Darbepoetin alfa treatment for post-renal transplantation anemia during pregnancy.

Mild postnatal anemia: is it a problem?

Letter to the editor: treatment of iron deficiency anemia.

Hemolysis of human red blood cells by riboflavin-Cu(II) system: enhancement by azide.

The mitochondrial uncoupler 2,4-dinitrophenol attenuates tissue damage and improves mitochondrial homeostasis following transient focal cerebral ischemia.

Intravenous iron sucrose complex vs. oral ferrous sulfate for postpartum iron deficiency anemia.

Genomic damage and circulating AGE levels in patients undergoing daily versus standard haemodialysis.

Monitoring of hematological, inflammatory and oxidative reactions to acute oral iron exposure in human volunteers: preliminary screening for selection of potentially-responsive biomarkers.

Biomarkers of exposure, effect, and susceptibility of arsenic-induced health hazards in Taiwan.

Immortalized mouse mammary fibroblasts lacking dioxin receptor have impaired tumorigenicity in a subcutaneous mouse xenograft model.

Bone resorption by aryl hydrocarbon receptor-expressing osteoclasts is not disturbed by TCDD in short-term cultures.

Photosensitizing properties of 6-methoxy-2-naphthylacetic acid, the major metabolite of the phototoxic non-steroidal anti-inflammatory and analgesic drug nabumetone.

Increased dioxin-like compounds in the serum of women with peritoneal endometriosis and deep endometriotic (adenomyotic) nodules.

Glycation of mitochondrial proteins from diabetic rat kidney is associated with excess superoxide formation.

Induction of p53 by urokinase in lung epithelial cells.

Loss of mitochondrial membrane potential and caspase activation enhance apoptosis in irradiated K562 cells treated with herbimycin A.

Effect of anti-Helicobacter pylori therapy on outcome of iron-deficiency anemia: a randomized, controlled study.

E. coli proteolytic activity in milk and casein breakdown.

The bradycardic and hypotensive responses to serotonin are reduced by activation of GABAA receptors in the nucleus tractus solitarius of awake rats.

Serum dioxin concentrations and age at menopause.

Carbon-11 labeled sigma2 receptor ligands for imaging breast cancer.

Carbamylated low-density lipoprotein induces death of endothelial cells: a link to atherosclerosis in patients with kidney disease.

Direct effect of plasma permeability factors from patients with idiopathic FSGS on nephrin and podocin expression in human podocytes.

Congenital diaphragmatic hernia, tracheal occlusion, thyroid transcription factor-1, and fetal pulmonary epithelial maturation.

[Efficacy of complex Hongyibuxue oral solution and ferrous sulfate for iron deficiency anemia].

The heat shock protein 90 inhibitor, 17-allylamino-17-demethoxygeldanamycin, enhances osteoclast formation and potentiates bone metastasis of a human breast cancer cell line.

Pseudolaminar necrosis in cyanide intoxication: a neuropathology case report.

Common viral infection affects pentabrominated diphenyl ether (PBDE) distribution and metabolic and hormonal activities in mice.

Follow-up survey of dioxin concentrations in the blood of Yusho patients in 2002-2003.

[Congener specific determination of PCBs in human blood using gel permeation chromatography (GPC) and high resolution gas chromatography/high resolution mass spectrometry (HRGC/HRMS)].

[Improvements in the method of dioxin isolation from blood of Yusho patients].

[Skin symptoms in Yusho patients related to blood dioxin level].

Pressor and tachycardic responses evoked by microinjections of L-glutamate into the medial prefrontal cortex of unanaesthetized rats.

Role of autoimmune gastritis, Helicobacter pylori and celiac disease in refractory or unexplained iron deficiency anemia.

Gliomas and farm pesticide exposure in women: the Upper Midwest Health Study.

Organic anion transporter (Slc22a) family members as mediators of toxicity.

Chronic toxicity and carcinogenicity of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin displays a distinct dose/time toxicity threshold ($c \times t = k$) and a life-prolonging subthreshold effect.

Detection of volatile compounds emitted by Pseudomonas aeruginosa using selected ion flow tube mass spectrometry.

Use of hemoglobin raffimer for postoperative life-threatening anemia in a Jehovah's Witness.

Rubidium-87 magnetic resonance spectroscopy and imaging for analysis of mammalian K⁺ transport.

[Possibility of targeting FLT3 kinase for the treatment of leukemia].

Chronic toxicological evaluation of dietary NovaSil clay in Sprague-Dawley rats.

Is oxidative stress the mechanism of blue sac disease in retene-exposed trout larvae?

Dioxin toxicity and chloracne in the Ukraine.

Prospective protective role of melatonin against arsenic-induced metabolic toxicity in Wistar rats.

A truncated haemoglobin implicated in oxygen metabolism by the microaerophilic food-borne pathogen Campylobacter jejuni.

How does human stem cell therapy influence gene expression after liver injury? Microarray evaluation on a rat model.

Covalently grafted phospholipid monolayer on silicone catheter surface for reduction in platelet adhesion.

Maternal-fetal distribution and transfer of dioxins in pregnant women in Japan, and attempts to reduce maternal transfer with Chlorella (*Chlorella pyrenoidosa*) supplements.

Non-specific effects of 4-chloro-m-cresol may cause calcium flux and respiratory burst in human neutrophils.

Neurobehavioural evaluation and kinetics of inhalation of constant or fluctuating toluene concentrations in human volunteers.

Iron supplements reduce erythrocyte copper-zinc superoxide dismutase activity in term, breastfed infants.

The blood-brain barrier transmigration of single domain antibody: mechanisms of transport and antigenic epitopes in human brain endothelial cells.

In utero exposure to dioxins and polychlorinated biphenyls and its relations to thyroid function and growth hormone in newborns.

Dose-dependent liver regeneration in chloroform, trichloroethylene and allyl alcohol ternary mixture hepatotoxicity in rats.

Endogenous vascular hydrogen peroxide regulates arteriolar tension in vivo.

Tissue dosimetry, metabolism and excretion of pentavalent and trivalent monomethylated arsenic in mice after oral administration.

Changes in erythrocyte enzymes in humans long-term exposed to pesticides: influence of several markers of individual susceptibility.

Distribution of PCDDs/PCDFs and Co-PCBs in human maternal blood, cord blood, placenta, milk, and adipose tissue: dioxins showing high toxic equivalency factor accumulate in the placenta.

Inorganic arsenite potentiates vasoconstriction through calcium sensitization in vascular smooth muscle.

Assessment of reference values for polychlorinated biphenyl concentration in human blood.

Effects of AV3V lesion on pilocarpine-induced pressor response and salivary gland vasodilation.

Fate of endocrine-disruptor, pharmaceutical, and personal care product chemicals during simulated drinking water treatment processes.

Amelogenin stimulates bone sialoprotein (BSP) expression through fibroblast growth factor 2 response element and transforming growth factor-beta1 activation element in the promoter of the BSP gene.

Ability of 13 chemical agents used in dental practice to induce sister-chromatid exchanges in Syrian hamster embryo cells.

Effects of iron supplementation on binding activity of iron regulatory proteins and the subsequent effect on growth performance and indices of hematological and mineral status of young pigs.

Regulation of mouse organic anion-transporting polypeptides (Oatps) in liver by prototypical microsomal enzyme inducers that activate distinct transcription factor pathways.

The dioxin-like PCB 77 but not the ortho-substituted PCB 153 interferes with chicken embryo thyroid hormone homeostasis and delays hatching.

Human CD34-positive hematopoietic stem cells constitute targets for carcinogenic polycyclic aromatic hydrocarbons.

The development of a physiologically-based pharmacokinetic model using the distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the tissues of the eastern oyster (*Crassostrea virginica*).

Ouabain induces an increase of retinal ganglion cell survival in vitro: the involvement of protein kinase C.

Human cordonal stem cell intraperitoneal injection can represent a rescue therapy after an acute hepatic damage in immunocompetent rats.

Improvement of mortality rate and decrease in histologic hepatic injury after human cord blood stem cell infusion in a murine model of hepatotoxicity.

Plasma protein level changes in waste incineration workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Comparison of the concentrations of polychlorinated dibenzo-p-dioxins, dibenzofurans, and dioxin-like polychlorinated biphenyls in maternal and fetal blood, amniotic and allantoic fluids in cattle.

Role of adenosine A1 and A3 receptors in regulation of cardiomyocyte homeostasis after mitochondrial respiratory chain injury.

Pesticide residues on the external surfaces of field crop sprayers: occupational exposure.

Possible repair action of Vitamin C on DNA damage induced by methyl methanesulfonate, cyclophosphamide, FeSO₄ and CuSO₄ in mouse blood cells in vivo.

Neurobehavioural investigations in adolescents exposed to environmental pollutants.

Cardiovascular gene expression profiles of dioxin exposure in zebrafish embryos.

Adenosine 5'-monophosphate-activated protein kinase and p38 mitogen-activated protein kinase participate in the stimulation of glucose uptake by dinitrophenol in adult cardiomyocytes.

Cytochrome P450 1A1 and 1B1 in human blood lymphocytes are not suitable as biomarkers of exposure to dioxin-like compounds: polymorphisms and interindividual variation in expression and inducibility.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced impairment of glucose-stimulated insulin secretion in isolated rat pancreatic islets.

Differential transfer of organic micropollutants through intestinal barrier using Caco-2 cell line.

Tetrachlorodibenzo-p-Dioxin (TCDD) Inhibits Differentiation and Increases Apoptotic Cell Death of Precursor T-Cells in the Fetal Mouse Thymus.

[Evaluation of the iron bioavailability from meals prepared with lentil (*Lens esculenta*) or with white kidney bean seeds (*Phaseolus vulgaris*) in anemic rats].

[Differentiation of bone marrow derived Thy-1+ beta2M- cells into liver cells in AA induced liver injury micro-environment].

Platelet-activating factor increases VE-cadherin tyrosine phosphorylation in mouse endothelial cells and its association with the PtdIns3'-kinase.

Platelets can neutralize hydrogen peroxide in an acute toxicity model with cells involved in granulation tissue formation.

3D molecular modeling, free radical modulating and immune cells signaling activities of the novel peptidomimetic L-glutamyl-histamine: possible immunostimulating role.

C-reactive protein does not relax vascular smooth muscle: effects mediated by sodium azide in commercially available preparations.

Dioxins and furans determination in postmortem blood by gas chromatography--high-resolution mass spectrometry.

Transient activation of Ras-dependent signalling at the early stages of Herbimycin A induced erythroid differentiation of human K562 cells.

Inorganic arsenite alters macrophage generation from human peripheral blood monocytes.

Biomonitoring of persistent organochlorine pesticides, PCDD/PCDFs and dioxin-like PCBs in blood of children from South West Germany (Baden-Wuerttemberg) from 1993 to 2003.

Carrier mediated transport of chlorpheniramine and chlorcyclizine across bovine olfactory mucosa: implications on nose-to-brain transport.

Inhibition of cyclooxygenase activity, platelet aggregation and thromboxane B2 production by two environmental toxicants: m- and o-cresol.

Activation of ferret erythrocyte Na⁺-K⁺-2Cl⁻ cotransport by deoxygenation.

Phase I study of MetXia-P450 gene therapy and oral cyclophosphamide for patients with advanced breast cancer or melanoma.

MRP-1 expression levels determine strain-specific susceptibility to sodium arsenic-induced renal injury between C57BL/6 and BALB/c mice.

[Differentiation of rat bone marrow derived Thy-1+ beta2M- cells into hepatocytes].

Polychlorinated dibenzo-p-dioxin and dibenzofuran concentrations in serum samples of workers at an infectious waste incineration plant in Japan.

Heme oxygenase expression in cultured human trophoblast cells during in vitro differentiation: effects of hypoxia.

Hemodynamic and respiratory responses to microinjection of ATP into the intermediate and caudal NTS of awake rats.

Concentrations of polybrominated diphenyl ethers, polychlorinated dibenzo-p-dioxins and dibenzofurans, and polychlorinated biphenyls in human blood samples from Korea.

Overview of clinical trials in the treatment of iron deficiency with iron-acetyl-aspartylated casein.

Chronic exposure to arsenic sensitizes CD3+ and CD56+ human cells to sodium arsenite-mediated apoptosis.

Effects of N-acetylcysteine, quercetin, and phytic acid on spontaneous hepatic and renal lesions in LEC rats.

Cytotoxicity and mutagenicity study of waste and purified water samples from electroplating industries prepared by use of ferrous sulfate and wood fly ash.

Microbial metabolism of 2-chlorophenol, phenol and rho-cresol by *Rhodococcus erythropolis* M1 in co-culture with *Pseudomonas fluorescens* P1.

Differential effects of transforming growth factor-beta on the synthesis of connective tissue growth factor and vascular endothelial growth factor by peritoneal mesothelial cell.

Sodium iron EDTA [NaFe(III)EDTA] as a food fortificant: erythrocyte incorporation of iron and apparent absorption of zinc, copper, calcium, and magnesium from a complementary food based on wheat and soy in healthy infants.

Identification of potential biomarkers of genotoxicity and carcinogenicity in L5178Y mouse lymphoma cells by cDNA microarray analysis.

Concentrations of dioxins and related compounds in the blood of Fukuoka residents.

Evidence of hemoglobin binding to arsenic as a basis for the accumulation of arsenic in rat blood.

Field and semifield evaluation of impacts of transgenic canola pollen on survival and development of worker honey bees.

Serum luteinizing hormone response to administration of gonadotropin-releasing hormone to atrazine-treated gilts.

Toxicity of dipyriddy compounds and related compounds.

Insulin sensitivity following agent orange exposure in Vietnam veterans with high blood levels of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Chlorpropham-induced splenotoxicity and its recovery in rats.

Nutritional assessment and fate of DNA of soybean meal from roundup ready or conventional soybeans using rats.

Chymase is activated in the pulmonary inflammation and fibrosis induced by paraquat in hamsters.

Mortality and cancer incidence among alachlor manufacturing workers 1968-99.

Metallothionein (I/II) suppresses genotoxicity caused by dimethylarsinic acid.

Assessment of the ability of Imazaquin herbicide to induce chromosomal aberrations in vitro in cultured Chinese hamster ovary cells and micronuclei in vivo in mice.

Results of a 13 week safety assurance study with rats fed grain from glyphosate tolerant corn.

[The study of the effects of dichlorophenoxyacetic acid derivatives on the blood systems].

Acute upper-airway obstruction in a two-year-old child who ingested an herbicide preparation.

NTP toxicology and carcinogenesis studies of trans-cinnamaldehyde (CAS No. 14371-10-9) in F344/N rats and B6C3F1 mice (feed studies).

Multiple medical problems following agent orange exposure.

Glyphosate poisoning.

Poisoning due to chlorophenoxy herbicides.

External Qi therapy to treat symptoms of Agent Orange Sequelae in Korean combat veterans of the Vietnam War.

Developmental arrest in Japanese medaka (*Oryzias latipes*) embryos exposed to sublethal concentrations of atrazine and arsenic trioxide.

2,4,5-T and 2,4,5-TCP induce oxidative damage in human erythrocytes: the role of glutathione.

Genotoxicity evaluation of pesticide formulations containing alachlor and atrazine in multiple mouse tissues (blood, kidney, liver, bone marrow, spleen) by comet assay.

[Poisoning caused by chemicals for plant protection in Poland in 2002].

The involvement of p53 in paraquat-induced apoptosis in human lung epithelial-like cells.

Mixture of paraquat and linuron formulations examined for genotoxicity in Wistar rats by the in vivo micronucleus test--evaluation by different statistical tests.

A comparative study of the allergenic potency of wild-type and glyphosate-tolerant gene-modified soybean cultivars.

Effects of environmental concentrations of atrazine on hemocyte density and phagocytic activity in the pond snail *Lymnaea stagnalis* (Gastropoda, Pulmonata).

Anandamide-evoked activation of vanilloid receptor 1 contributes to the development of bladder hyperreflexia and nociceptive transmission to spinal dorsal horn neurons in cystitis.

The cytotoxic activity of lactoperoxidase: enhancement and inhibition by neuroactive compounds.

Possible mechanism for medial smooth muscle cell injury in diabetic nephropathy: glycooxidation-mediated local complement activation.

High levels of catalase and glutathione peroxidase activity dampen H₂O₂ signaling in human alveolar macrophages.

Multiple deficiencies in antioxidant enzymes in mice result in a compound increase in sensitivity to oxidative stress.

Decreasing glutamate buffering capacity triggers oxidative stress and neuropil degeneration in the *Drosophila* brain.

Cancer incidence among pesticide applicators exposed to alachlor in the Agricultural Health Study.

Acetaldehyde accumulation suppresses Kupffer cell release of TNF-Alpha and modifies acute hepatic inflammation in rats.

Arsenic speciation in urine from acute promyelocytic leukemia patients undergoing arsenic trioxide treatment.

Metabolism of metamitron in goat following a single oral administration of a nontoxic dose level: a continued study.

Impact of ethanol and acetaldehyde on DNA and cell viability of cultured neurones.

Evaluation of haemoglobin (erythrogen): for improved somatic embryogenesis and plant regeneration in cotton (*Gossypium hirsutum* L. cv. SVPR 2).

Role of mitochondrial aldehyde dehydrogenase in nitroglycerin-induced vasodilation of coronary and systemic vessels: an intact canine model.

Monitoring of urinary acrolein concentration in patients receiving cyclophosphamide and ifosphamide.

Hemoglobin promotes somatic embryogenesis in peanut cultures.

Protein sequence analysis, cloning, and expression of flammutoxin, a pore-forming cytolysin from *Flammulina velutipes*. Maturation of dimeric precursor to monomeric active form by carboxyl-terminal truncation.

Biosynthesis of FVIII in megakaryocytic cells: improved production and biochemical characterization.

Brown spots in the bowel.

Chronic beta-adrenoreceptor activation increases cardiac cavity size through chamber remodeling and not via modifications in myocardial material properties.

[Treatment of disorders of iron metabolism].

Iron amino acid chelates.

Effects of separate delivery of zinc or zinc and vitamin A on hemoglobin response, growth, and diarrhea in young Peruvian children receiving iron therapy for anemia.

Oral ferrous sulphate leads to a marked increase in pro-oxidant nontransferrin-bound iron.

Review of clinical and toxicological features of acute pesticide poisonings in Crete (Greece) during the period 1991-2001.

Comparative analysis of *Clostridium difficile* clinical isolates belonging to different genetic lineages and time periods.

ARNT2 is not required for TCDD developmental toxicity in zebrafish.

Trypanosoma brucei: unexpected azide sensitivity of bloodstream forms.

Feasibility of "directly observed home-based twice-daily iron therapy" (DOHBIT) for management of anemia in rural patients: a pilot study.

The effects of short-term iron supplementation on iron status in infants in malaria-endemic areas.

A randomized comparison of two anemia treatment regimens in Tanzanian children.

Efficacy of daily vs. weekly supplementation of iron in schoolchildren with low iron status.

Ex vivo evaluation of erythrocytosis-enhanced platelet thrombus formation using the cone and plate(let) analyzer: effect of platelet antagonists.

Iron absorption by heterozygous carriers of the HFE C282Y mutation associated with hemochromatosis.

Women and omega-3 Fatty acids.

The expression of P-glycoprotein in AML cells with FLT3 internal tandem duplications is associated with reduced apoptosis in response to FLT3 inhibitors.

Systemic-to-pulmonary collaterals: a source of flow energy loss in Fontan physiology.

Pilot study to reduce dioxins in the human body.

Dietary intervention with iron and black tea infusion in reducing cytotoxicity of arsenic.

Response of soluble transferrin receptor and iron-related parameters to iron supplementation in elite, iron-depleted, nonanemic female athletes.

CYP40, but not Hsp70, in rabbit reticulocyte lysate causes the aryl hydrocarbon receptor-DNA complex formation.

Antibiotic activity and synergistic effect of antimicrobial peptide against pathogens from a patient with gallstones.

[Toxic effect of arsenite on the expression of liver multidrug resistance-associated protein 2 in rat].

The modulation of radiation-induced cell death by genistein in K562 cells: activation of thymidine kinase 1.

Daily iron supplementation versus intermittent dose.

Removal of the protein-bound solute p-cresol by convective transport: a randomized crossover study.

Neuromuscular electric stimulation enhances endothelial vascular control and hemodynamic function in paretic upper extremities of patients with stroke.

Associations between organochlorine contaminant concentrations and clinical health parameters in loggerhead sea turtles from North Carolina, USA.

P-cresol, a uremic retention solute, alters the endothelial barrier function in vitro.

Helicobacter pylori infection, iron absorption, and gastric acid secretion in Bangladeshi children.

Antioxidant capacity of cultured mammalian cells estimated by ESR method.

SUR2A C-terminal fragments reduce KATP currents and ischaemic tolerance of rat cardiac myocytes.

Branch retinal artery occlusion: a complication of iron-deficiency anemia in a young adult with a rectal carcinoid.

Warm or cold ischemia in animal models of lung ischemia-reperfusion injury: is there a difference?

Ferrous sulfate does not affect mycophenolic acid pharmacokinetics in kidney transplant patients.

Independent actions on cyclin-dependent kinases and aryl hydrocarbon receptor mediate the antiproliferative effects of indirubins.

Minocycline up-regulates Bcl-2 and protects against cell death in mitochondria.

The dioxin-like pollutant PCB 126 (3,3',4,4',5-pentachlorobiphenyl) affects risk factors for cardiovascular disease in female rats.

[The effectiveness of three regimens using ferrous sulfate to treat anemia in pregnant women].

NTP toxicology and carcinogenesis studies of triethanolamine (Cas No. 102-71-6) in B6C3F1 mice (dermal studies).

Protective effect of N-acetylcysteine against arsenic-induced depletion in vivo of carbohydrate.

Hypothermia and localized cold injuries.

Ischemia/reperfusion induces the recruitment of leukocytes from whole blood under flow conditions.

Protective effect of methionine supplementation on arsenic-induced alteration of glucose homeostasis.

Synergistic effect of cigarette smoke and saliva on lymphocytes--the mediatory role of volatile aldehydes and redox active iron and the possible implications for oral cancer.

Nitric oxide donor increases osteoprotegerin production and osteoclastogenesis inhibitory activity in bone marrow stromal cells from ovariectomized rats.

Transient mitochondrial permeability transition pore opening mediates preconditioning-induced protection.

Limited effect of selected organic pollutants on cytokine production by peripheral blood leukocytes.

Agricultural pesticide use, familial cancer, and risk of non-Hodgkin lymphoma.

How environmental hazards in childhood have been discovered: carcinogens, teratogens, neurotoxicants, and others.

2,3,7,8-Tetrachlorodibenzo-p-dioxin inhibits regression of the common cardinal vein in developing zebrafish.

Association of liver hemangiosarcoma and secondary iron overload in B6C3F1 mice--the National Toxicology Program experience.

Simultaneous exposure of rats to dioxin and carbon monoxide reduces the xenobiotic but not the hypoxic response.

Cytochrome P-450 family 1 in rat embryo cell culture immortalized by Rausher leukemia virus.

Assessment of human health risk of dioxin in Korea.

Histological and lipid peroxidation changes after administration of 2-acetylaminofluorene in a rat liver injury model following selective periportal and pericentral damage.

Rat models of dementia based on reductions in regional glucose metabolism, cerebral blood flow and cytochrome oxidase activity.

In vitro DNA damage by arsenic compounds in a human lymphoblastoid cell line (TK6) assessed by the alkaline Comet assay.

Mechanisms of ischemic brain injury.

Geldanamycin and herbimycin A induce apoptotic killing of B chronic lymphocytic leukemia cells and augment the cells' sensitivity to cytotoxic drugs.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on fatty acid availability and neural tube formation in cynomolgus macaque, *Macaca fascicularis*.

Mitochondrial coupling in vivo in mouse skeletal muscle.

Comparison of the hemolytic activity of isopropoxyethanol and phenoxyethanol.

Treatment of iron deficiency anemia with Ferro-Folgamma.

Antibodies against the CB10 fragment of type II collagen in rheumatoid arthritis.

[Ferro-Folgamma--a drug for treatment and prophylaxis of iron deficiency anemia in pregnant women].

[Ferro-Folgamma--a drug for treatment and prophylaxis of iron deficiency anemia in pregnant women].

Coronary artery bypass grafting in a dialysis-dependent Jehovah's Witness.

Combined devascularization and proximal splenorenal shunt: is this a better option than either procedure alone?

Development of protamine hollow-fiber device for extracorporeal heparin removal.

Treatment of anaemia after joint replacement. A double-blind, randomised, controlled trial of ferrous sulphate versus placebo.

Metallic taste and retronasal smell.

Characterization of two lipoproteins in *Pasteurella multocida*.

Effect of epidermal growth factor on pulmonary hypoplasia in experimental diaphragmatic hernia.

Regulation by sulfanylurea receptor type 1 of a non-selective cation channel involved in cytotoxic edema of reactive astrocytes.

Role of aryl hydrocarbon receptor in mesencephalic circulation failure and apoptosis in zebrafish embryos exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Rodenticide-humic acid adsorption mechanisms and role of humic acid on their toxicity on human keratinocytes: chromatographic approach to support the biological data.

Characteristics of 3,5,3'-triiodothyronine (T3)-uptake system of tadpole red blood cells: effect of endocrine-disrupting chemicals on cellular T3 response.

Human bronchial smooth muscle cell proliferation via thromboxane A2 receptor.

Impact of FEBRA (fermented brown rice with *Aspergillus oryzae*) intake and concentrations of PCDDs, PCDFs and PCBs in blood of humans from Japan.

Amino acid sequence of a thrombin like enzyme, elegaxobin II, from the venom of *Trimeresurus elegans* (Sakishima-Habu).

Gestational exposure of Ahr and Arnt hypomorphs to dioxin rescues vascular development.

Potential roles of the aryl hydrocarbon receptor in female reproductive senescence.

Strain-specific of alachlor on murine olfactory mucosal responses.

Effects of dietary iron supplementation on growth performance, hematological status, and whole-body mineral concentrations of nursery pigs.

BRCA1 induces antioxidant gene expression and resistance to oxidative stress.

Menadione reduces rotenone-induced cell death in cerebellar granule neurons.

Anticlastogenic effects of *Hibiscus sabdariffa* fruits against sodium arsenite-induced micronuclei formation in erythrocytes in mouse bone marrow.

The use of potassium dichromate and ethyl alcohol as blood preservatives for analysis of organochlorine contaminants.

Hydroxylated and methyl sulfone PCB metabolites in adipose and whole blood of polar bear (*Ursus maritimus*) from East Greenland.

A human umbilical cord stem cell rescue therapy in a murine model of toxic liver injury.

Analysis of HO-PCBs and PCP in blood plasma from individuals with high PCB exposure living on the Chukotka Peninsula in the Russian Arctic.

2,3,7,8-Tetrachlorodibenzo-p-dioxin activation of the aryl hydrocarbon receptor/aryl hydrocarbon receptor nuclear translocator pathway causes developmental toxicity through a CYP1A-independent mechanism in zebrafish.

The sphingomyelin/ceramide pathway is involved in ERK1/2 phosphorylation, cell proliferation, and uPAR overexpression induced by tissue-type plasminogen activator.

Src kinase mediates angiotensin II-dependent increase in pulmonary endothelial nitric oxide synthase.

Identification of the growth hormone-releasing peptide binding site in CD36: a photoaffinity cross-linking study.

Validation of the CALUX bioassay for PCDD/F analyses in human blood plasma and comparison with GC-HRMS.

Avian exocrine secretions. I. Chemical characterization of the volatile fraction of the uropygial secretion of the green woodhoopoe, *Phoeniculus purpureus*.

Effect of uncouplers on endogenous respiration and ferrous iron oxidation in a chemolithoautotrophic bacterium *Acidithiobacillus* (*Thiobacillus*) *ferrooxidans*.

Exponential modeling, washout curve reconstruction, and estimation of half-life of toluene and its metabolites.

Sequential morphological changes of erythrocyte apoptosis in *Xenopus* larvae exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Signaling mechanisms mediated by G-protein coupled receptors in human platelets.

Phenylthiourea as a weak activator of aryl hydrocarbon receptor inhibiting 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced CYP1A1 transcription in zebrafish embryo.

Helper T cell subpopulations from women are more susceptible to the toxic effect of sodium arsenite in vitro.

Spatiotemporal evidence of apoptosis-mediated ischemic injury in organotypic hippocampal slice cultures.

Blood-brain barrier permeability of novel [D-arg²]dermorphin (1-4) analogs: transport property is related to the slow onset of antinociceptive activity in the central nervous system.

Fluorescence spectroscopic detection of mitochondrial flavoprotein redox oscillations and transient reduction of the NADPH oxidase-associated flavoprotein in leukocytes.

Involvement of thromboxane A₂ and tyrosine kinase in the synergistic interaction of platelet activating factor and calcium ionophore A23187 in human platelet aggregation.

Potassium channel openers are uncoupling protonophores: implication in cardioprotection.

Catalase binds Grb2 in tumor cells when stimulated with serum or ligands for integrin receptors.

Presence and functional activity of the aryl hydrocarbon receptor in isolated murine cerebral vascular endothelial cells and astrocytes.

Platelet-derived growth factor-induced arachidonic acid release for enhancement of prostaglandin E(2) synthesis in human gingival fibroblasts pretreated with interleukin-1beta.

Ectopic cyclin D1 expression blocks STI571-induced erythroid differentiation of K562 cells.

Transient increase in micronucleus frequency and DNA effects in the comet assay in two patients after intoxication with 2,3,7,8-tetrachlorodibenzo- p-dioxin.

[Degradation of 2,4-dinitrophenol by free and immobilized cells of *Rhodococcus erythropolis* HL PM-1].

The transepithelial voltage of the isolated anterior stomach of mosquito larvae (*Aedes aegypti*): pharmacological characterization of the serotonin-stimulated cells.

Sertoli cell junctional proteins as early targets for different classes of reproductive toxicants.

Influence of neopterin on generation of reactive species by myeloperoxidase in human neutrophils.

Developmental exposure to the potent aryl hydrocarbon receptor agonist 2,3,7,8-tetrachlorodibenzo-p-dioxin Impairs the cell-mediated immune response to infection with influenza a virus, but enhances elements of innate immunity.

Enhancing effect of the endocrine disruptor para-nonylphenol on the generation of reactive oxygen species in human blood neutrophils.

Glutathione-S-transferase A4-4 modulates oxidative stress in endothelium: possible role in human atherosclerosis.

Optimization of a method for determining dioxin in whole blood samples based on solvent extraction and simplified cleanup.

PCDD/Fs levels in indoor environments and blood of workers of three municipal waste incinerators in Taiwan.

CYP1A2 is not required for 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immunosuppression.

Quantitative analysis of cresol and its metabolites in biological materials and distribution in rats after oral administration.

Effects of sodium chlorate on toxin production by *Escherichia coli* O157:H7.

Inactivation of ERK accelerates erythroid differentiation of K562 cells induced by herbimycin A and STI571 while activation of MEK1 interferes with it.

Perinatal dioxin exposure and later effects--a review.

Blood saving protocol in elective total knee arthroplasty.

Determination of phenol and o-cresol by GC/MS in a fatal poisoning case.

Nitric oxide and platelet energy metabolism.

Damage to erythrocytes caused by 2,3,7,8-tetrachloro-dibenzo-p-dioxin (in vitro).

Vascular permeability alterations induced by arsenic.

[Relationships between dioxin concentrations in deposited dust and those in serum of workers at municipal waste incineration plants].

The olivacine derivative s 16020 (9-hydroxy-5,6-dimethyl-N-[2-(dimethylamino)ethyl]-6H-pyrido(4,3-B)-carbazole-1-carboxamide) induces CYP1A and its own metabolism in human hepatocytes in primary culture.

Menstrual effluent induces epithelial-mesenchymal transitions in mesothelial cells.

Characteristics and a functional implication of Ca(2+)-activated K(+) current in mouse aortic endothelial cells.

An assessment of the genotoxicity and human health risk of topical use of kojic acid [5-hydroxy-2-(hydroxymethyl)-4H-pyran-4-one].

Pyrazolo pyrimidine-type inhibitors of SRC family tyrosine kinases promote ovarian steroid-induced differentiation of human endometrial stromal cells in vitro.

Induction of murine NAD(P)H:quinone oxidoreductase by 2,3,7,8-tetrachlorodibenzo-p-dioxin requires the CNC (cap 'n' collar) basic leucine zipper transcription factor Nrf2 (nuclear factor erythroid 2-related factor 2): cross-interaction between AhR (aryl hydrocarbon receptor) and Nrf2 signal transduction.

Loss of pre-B and IgM(+) B cells in the bone marrow after exposure to a mixture of herbicides.

Developmental atrazine exposure suppresses immune function in male, but not female Sprague-Dawley rats.

Dioxin, dibenzofuran, and coplanar PCB levels in Laotian blood and milk from agent orange-sprayed and nonsprayed areas, 2001.

Severity assessment in acute paraquat poisoning by analysis of APACHE II score.

Comparative effects of cadmium, copper, paraquat and benzo[a]pyrene on the actin cytoskeleton and production of reactive oxygen species (ROS) in mussel haemocytes.

Direct oxidant damage to red cells associated with propanil ingestion.

Toxic nephropathy: environmental chemicals.

Fatal overdose of the herbicide bentazone.

Effects of 2,4-D and its metabolite 2,4-dichlorophenol on antioxidant enzymes and level of glutathione in human erythrocytes.

Food as a source of dioxin exposure in the residents of Bien Hoa City, Vietnam.

The herbicide metolachlor induces liver cytochrome P450s 2B1/2 and 3A1/2, but not thyroxine-uridine dinucleotide phosphate glucuronosyltransferase and associated thyroid gland activity.

Immunotoxicological effects of Agent Orange exposure to the Vietnam War Korean veterans.

Impact of Agent Orange exposure among Korean Vietnam veterans.

An oxygen-bonded c8-deoxyguanosine nucleoside adduct of pentachlorophenol by peroxidase activation: evidence for ambident c8 reactivity by phenoxy radicals.

Current applications of plasmapheresis in clinical toxicology.

Immune alterations in mice exposed to the herbicide simazine.

Sister chromatid exchanges and micronuclei analysis in lymphocytes of men exposed to simazine through drinking water.

Determination of the immunotoxic potential of pesticides on functional activity of sheep leukocytes in vitro.

Health effects on nearby residents of a wood treatment plant.

Consecutive administration of paraquat to rats induces enhanced cholesterol peroxidation and lung injury.

Allyl alcohol activation of protein kinase C delta leads to cytotoxicity of rat hepatocytes.

Pesticide use among farmers in the Amazon basin of Ecuador.

Determination of the herbicide glyphosate and its metabolite in biological specimens by gas chromatography-mass spectrometry. A case of poisoning by roundup herbicide.

Cancer and developmental exposure to endocrine disruptors.

Effects of L-dopa and other amino acids against paraquat-induced nigrostriatal degeneration.

Influence of malathion pretreatment on the toxicity of anilofos in male rats: a biochemical interaction study.

Fatal acute poisoning by bentazon.

Effect of haemoperfusion on plasma paraquat concentration in vitro and in vivo.

Thirty-five cases of S-carboxymethylcysteine use in paraquat poisoning.

Link found between Agent Orange and chronic lymphocytic leukaemia.

Pentachlorophenol poisoning.

Focal transmural necrotic tracheitis in commercial meat turkeys.

The hemolytic and physiological activities of mixtures of some phenoxy and organophosphorous herbicides.

Damage to the erythrocyte membrane caused by chlorophenoxyacetic herbicides.

Evaluation of genotoxicity of PCP and 2,4-D by micronucleus test in freshwater fish *Channa punctatus*.

Ischemic insult exacerbates acrolein-induced conduction loss and axonal membrane disruption in guinea pig spinal cord white matter.

Preferential megalin-mediated transcytosis of low-hormonogenic thyroglobulin: a control mechanism for thyroid hormone release.

Myocardial perfusion imaging versus biochemical markers in acute coronary syndromes.

Alpha-tocopherol content and alpha-tocopherol transfer protein expression in leukocytes of children with acute leukemia.

Prevalence of multiple antibiotic resistance in 443 *Campylobacter* spp. isolated from humans and animals.

Active arsenic species produced by GSH-dependent reduction of dimethylarsinic acid cause micronuclei formation in peripheral reticulocytes of mice.

Paraquat induces long-lasting dopamine overflow through the excitotoxic pathway in the striatum of freely moving rats.

Immunomodulation of human natural killer cell cytotoxic function by triazine and carbamate pesticides.

Clotrimazole, ketoconazole, and clodinafop-propargyl as potent growth inhibitors of equine *Babesia* parasites during in vitro culture.

In vitro activity of dimethylarsinic acid against human leukemia and multiple myeloma cell lines.

Endothelium dysfunction in LDL receptor knockout mice: a role for H₂O₂.

Acrolein produced from polyamines as one of the uraemic toxins.

Increased urinary levels of pentosidine, pyrroline and acrolein adduct in type 2 diabetes.

Quantitative identification of atrazine and its chlorinated metabolites in plasma.

Current internal exposure to pesticides in children and adolescents in Germany: blood plasma levels of pentachlorophenol (PCP), lindane (gamma-HCH), and dichloro(diphenyl)ethylene (DDE), a biostable metabolite of dichloro(diphenyl)trichloroethane (DDT).

Toxicokinetics, recovery, and metabolism of metamitron in goat.

Cinnamaldehyde induces apoptosis by ROS-mediated mitochondrial permeability transition in human promyelocytic leukemia HL-60 cells.

Production of alkaloids by in vitro culture of *Erythrina americana* Miller.

Human prenatal and postnatal exposure to polybrominated diphenyl ethers, polychlorinated biphenyls, polychlorobiphenyls, and pentachlorophenol.

Evidence of cytochrome P450-catalyzed cleavage of the ether bond of phenoxybutyrate herbicides in *Rhodococcus erythropolis* K2-3.

Study of atrazine effects on Pacific oyster, *Crassostrea gigas*, haemocytes.

Effects of the new herbicide fentrazamide on the glucose utilization in neurons and erythrocytes in vitro.

[Acute poisoning caused by intravenous arsenic].

Ascorbic acid reduces the frequency of iron induced micronuclei in bone marrow cells of mice.

Photodegradation pathways and the in vitro phototoxicity of pyrazinamide, a phototoxic antitubercular drug.

Cell-transforming activity of fourteen chemical agents used in dental practice in Syrian hamster embryo cells.

Brain mitochondrial aldehyde dehydrogenase: relation to acetaldehyde aversion in low-alcohol-drinking (UChA) and high-alcohol-drinking (UChB) rats.

Reticulocyte indices rapidly reflect an increase in iron availability for erythropoiesis.

Tolerogenic role of Kupffer cells in allergic reactions.

Mild hypothermia reduces expression of heat shock protein 60 in leukocytes from severely head-injured patients.

Cardiac hypertrophy in aryl hydrocarbon receptor null mice is correlated with elevated angiotensin II, endothelin-1, and mean arterial blood pressure.

Environmental exposure to polychlorinated biphenyls (PCBs) and breast cancer: a systematic review of the epidemiological evidence.

Non-Hodgkin's lymphoma, leukemia, and exposures in agriculture: results from the Italian multicenter case-control study.

Effects of mitochondrial inhibitors and uncouplers on hypoxic vasoconstriction in rabbit lungs.

[Eggs shells intake as a form of pica].

Opposing effects of low and high-dose clozapine on survival of transgenic amyotrophic lateral sclerosis mice.

Dioxin/polychlorinated biphenyl body burden, diabetes and endometriosis: findings in a population-based study in Belgium.

Experience of the small size (25 mm) Sorin Bicarbon bileaflet prosthetic valve in patients with small mitral annuli.

Effect of endodontic agents on cytotoxicity induction by sodium fluoride.

A comparative study between intramuscular iron dextran and oral ferrous sulphate in the treatment of iron deficiency anaemia in pregnancy.

Immunoglobulin E is not required for but enhances airway inflammation and hyperresponsiveness.

A double-masked, randomized control trial of iron supplementation in early infancy in healthy term breast-fed infants.

Measurement of pesticides and other toxicants in amniotic fluid as a potential biomarker of prenatal exposure: a validation study.

Aryl hydrocarbon receptor 2 mediates 2,3,7,8-tetrachlorodibenzo-p-dioxin developmental toxicity in zebrafish.

Oxygen regulation and limitation to cellular respiration in mouse skeletal muscle in vivo.

Systemic effects and skin injury after experimental dermal exposure to monochloroacetic acid.

Protein-bound uremic retention solutes.

FLT3 expressing leukemias are selectively sensitive to inhibitors of the molecular chaperone heat shock protein 90 through destabilization of signal transduction-associated kinases.

Natural product origins of Hsp90 inhibitors.

Iron supplementation during pregnancy, anemia, and birth weight: a randomized controlled trial.

Preconditioning of cortical neurons by oxygen-glucose deprivation: tolerance induction through abbreviated neurotoxic signaling.

Policies on screening female athletes for iron deficiency in NCAA division I-A institutions.

[The chimerism and GVT effects on murine mini-transplantation model].

Persistent hematologic and immunologic disturbances in 8-year-old Dutch children associated with perinatal dioxin exposure.

Medication-induced oesophageal disorders.

Association between blood lead concentrations and body iron status in children.

The effect of retinyl palmitate added to iron-fortified maize porridge on erythrocyte incorporation of iron in African children with vitamin A deficiency.

Evaluation of the potential impact of pharmacokinetic differences on tissue dosimetry in offspring during pregnancy and lactation.

The reliability of long-term storage of direct immunofluorescent staining slides at room temperature.

Uncoupling protein-2 prevents neuronal death and diminishes brain dysfunction after stroke and brain trauma.

MCSF expression is induced in healing myocardial infarcts and may regulate monocyte and endothelial cell phenotype.

Inhibition of NF-kappaB essentially contributes to arsenic-induced apoptosis.

Evaluation of iron bioavailability from bonito dark muscle using anemic rats.

Effect of acute exposure of sodium arsenite (Na_3AsO_3) on some haematological parameters of *Clarias batrachus* (common Indian cat fish) in vivo.

Effects of iron(II) salts and iron(III) complexes on trace element status in children with iron-deficiency anemia.

Comparison of response between food supplemented with powdered iron and iron in syrup form for iron deficiency anemia.

Efficacy and tolerability of low-dose iron supplements during pregnancy: a randomized controlled trial.

Effects of dietary habits and CYP1A1 polymorphisms on blood dioxin concentrations in Japanese men.

Polyglutamine protein aggregation and toxicity are linked to the cellular stress response.

Male reproductive hormones and thyroid function in pesticide applicators in the Red River Valley of Minnesota.

[The encapsulation of recombinant adenovirus containing HSP70 cDNA and its oral transfection effects in the rats].

Combating iodine and iron deficiencies through the double fortification of fish sauce, mixed fish sauce, and salt brine.

Markers of genetic susceptibility in human environmental hygiene and toxicology: the role of selected CYP, NAT and GST genes.

Antiallergic activity of ginseng and its ginsenosides.

Effect of twice weekly versus daily iron treatment in Turkish children with iron deficiency anemia.

Cardiac effects of hypocretin-1 in nucleus ambiguus.

Iron supplementation for unexplained fatigue in non-anaemic women: double blind randomised placebo controlled trial.

Protective effect of melatonin against mitochondrial injury induced by ischemia and reperfusion of rat liver.

Induction of cytochrome P450 1A is required for circulation failure and edema by 2,3,7,8-tetrachlorodibenzo-p-dioxin in zebrafish.

Heat shock protein (HSP72) and p38 MAPK involvement in sublethal hemorrhage (SLH)-induced tolerance.

Higher susceptibility of newborn than young rats to 3-methylphenol.

Health impacts of pesticide exposure in a cohort of outdoor workers.

Human RPE-monocyte co-culture induces chemokine gene expression through activation of MAPK and NIK cascade.

Methylated metabolites of arsenic trioxide are more potent than arsenic trioxide as apoptotic but not differentiation inducers in leukemia and lymphoma cells.

Do we need daily iron supplementation? Comments and controversies.

Preventive strategy to control iron deficiency anemia in children and adults.

Iron deficiency anemia: preventive strategies and controversies.

Evidence of oxidative stress in familial amyloidotic polyneuropathy type 1.

The induction of heat shock protein-72 attenuates cisplatin-induced acute renal failure in rats.

Functional alterations in CD11b(+)Gr-1(+) cells in mice injected with allogeneic tumor cells and treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Toxicokinetics of DL-glufosinate enantiomer in human BASTA poisoning.

Esophageal injury as a result of ingestion of iron tablets.

Studies on dialysate mixing in the Genius single-pass batch system for hemodialysis therapy.

Edaravone protects against ischemia/reperfusion-induced oxidative damage to mitochondria in rat liver.

Early changes in metabolism of leukemic cell lines upon induction of apoptosis by cytotoxic drugs.

Comparative effects of some local food condiments on sodium arsenite-induced clastogenicity.

[Effectiveness of weekly iron sulfate in the Family Health Program in Caruaru, Pernambuco State, Brazil].

A comparative study on the gastroduodenal tolerance of different antianaemic preparations.

Anemia: when is it iron deficiency?

Zinc protoporphyrin/heme as an indicator of iron status in NICU patients.

123I-Interleukin-2: biochemical characterization and in vivo use for imaging autoimmune diseases.

Toxicity of free p-cresol: a prospective and cross-sectional analysis.

Troglitazone-induced intracellular oxidative stress in rat hepatoma cells: a flow cytometric assessment.

Erythropoietin therapy in pre-dialysis patients with chronic renal failure: lack of need for parenteral iron.

Intentional poisoning of animals in southeastern Spain: a review of the veterinary toxicology service from Murcia, Spain.

Flow cytometric measurement of reactive oxygen species production by normal and thalassaemic red blood cells.

Ferric citrate is half as effective as ferrous sulfate in meeting the iron requirement of juvenile tilapia, *Oreochromis niloticus* x *O. aureus*.

Ring around the cardia: a watermelon stomach variant.

Dual fortification of salt with iodine and microencapsulated iron: a randomized, double-blind, controlled trial in Moroccan schoolchildren.

Iron deficiency anemia in infancy: long-lasting effects on auditory and visual system functioning.

Different effects of metabolic inhibitors and cyclosporin A on daunorubicin transport in leukemia cells from patients with AML.

Clinical nutrition: 8. The role of nutrition in the prevention of iron deficiency anemia in infants, children and adolescents.

Anemia in pregnancy at South Sharqiya health centers, Oman.

Prevention of iron deficiency anemia in adolescent and adult pregnancies.

Methylated trivalent arsenicals as candidate ultimate genotoxic forms of arsenic: induction of chromosomal mutations but not gene mutations.

A role for the aryl hydrocarbon receptor in cardiac physiology and function as demonstrated by AhR knockout mice.

[Iron deficiency anemia in pregnant women and its management with gino-tardyferon].

Estrogens and organochlorine xenoestrogens and breast cancer risk.

Pharmacological induction of HSP27 attenuates intimal hyperplasia in vivo.

Crosslinking of fibrinogen and fibronectin by free radicals: a possible initial step in adhesion formation in osteoarthritis of the temporomandibular joint.

Iron supplementation improves iron status and reduces morbidity in children with or without upper respiratory tract infections: a randomized controlled study in Colombo, Sri Lanka.

Hexose monophosphate shunt activities in human erythrocytes during oxidative damage induced by hydrogen peroxide.

Protein tyrosine phosphatase activity regulates endothelial cell-cell interactions, the paracellular pathway, and capillary tube stability.

Structural basis of fosmidomycin action revealed by the complex with 2-C-methyl-D-erythritol 4-phosphate synthase (IspC). Implications for the catalytic mechanism and anti-malaria drug development.

Fish intake, plasma omega-3 polyunsaturated fatty acids, and polychlorinated dibenzo-p-dioxins/polychlorinated dibenzo-furans and co-planar polychlorinated biphenyls in the blood of the Japanese population.

Pressure-induced activation of extracellular signal-regulated kinase 1/2 in small arteries.

Cardiovascular effects of hypocretin-1 in nucleus of the solitary tract.

Involvement of protein tyrosine kinase in Toll-like receptor 4-mediated NF-kappa B activation in human peripheral blood monocytes.

Direct evidence for recycling of myeloperoxidase-catalyzed phenoxyl radicals of a vitamin E homologue, 2,2,5,7,8-pentamethyl-6-hydroxy chromane, by ascorbate/dihydrolipoate in living HL-60 cells.

A tetrazolium-based colorimetric assay for metabolic activity of stored blood platelets.

Evaluation of the mutagenic, antimutagenic and antiproliferative potential of *Croton lechleri* (Muell. Arg.) latex.

Hepatocellular injury with hyperaminotransferasemia after cresol ingestion.

Blood-brain barrier transport of a novel micro 1-specific opioid peptide, H-Tyr-D-Arg-Phe-beta-Ala-OH (TAPA).

Application of improved iodine-azide procedure for the detection of thiouracils in blood serum and urine with planar chromatography.

Relaxation of arterial smooth muscle by water-soluble derivatives of coenzyme Q (ubiquinone).

[The regulatory effect of human bone morphogenetic protein 7 gene transfer on the proliferation and differentiation of rabbit bone marrow mesenchymal stem cells].

Characteristics of the hemostatic action of KFA-1411, an inhibitor of coagulation factor Xa (FXa), in humans and various animals.

Dynamics of endocytosis and exocytosis of poly(D,L-lactide-co-glycolide) nanoparticles in vascular smooth muscle cells.

Effects of magnesium on the production of extracellular matrix metalloproteinases in cultured rat vascular smooth muscle cells.

Hepatic stem cells: existence and origin.

Endocrine disrupting chemicals: interference of thyroid hormone binding to transthyretins and to thyroid hormone receptors.

Complex of pregnancy-associated plasma protein-A and the proform of eosinophil major basic protein. Disulfide structure and carbohydrate attachment.

α -Tocopherol Content and α -Tocopherol Transfer Protein Expression in Leukocytes of Children with Acute Leukemia.

Proteoglycans on bone marrow endothelial cells bind and present SDF-1 towards hematopoietic progenitor cells.

Aryl hydrocarbon receptor (AhR) agonists suppress interleukin-6 expression by bone marrow stromal cells: an immunotoxicology study.

Monitoring internal exposure to metals and organic substances in workers at a hazardous waste incinerator after 3 years of operation.

Polymorphisms in the human monomethylarsonic acid (MMA V) reductase/hGSTO1 gene and changes in urinary arsenic profiles.

Cardioacceleratory responses to hypocretin-1 injections into rostral ventromedial medulla.

Comparison of accumulation and altered steroid secretion by placental tissue treated with TCDD and natural mixture of PCDDs-PCDFs.

Oxygen availability during orthotopic liver transplantation.

Low density lipoprotein receptor-related protein (LRP) is a heparin-dependent adhesion receptor for connective tissue growth factor (CTGF) in rat activated hepatic stellate cells.

Inhibition of [¹⁸F]FP-TZTP binding by loading doses of muscarinic agonists P-TZTP or FP-TZTP in vivo is not due to agonist-induced reduction in cerebral blood flow.

NTP toxicology and carcinogenesis Studies of 2,4-hexadienal (89% trans,trans isomer, CAS No. 142-83-6; 11% cis,trans isomer) (Gavage Studies).

Phospholipase A2, hydroxyl radicals, and lipid peroxidation in transient cerebral ischemia.

[Development of the protein therapeutics using the super anti-cell death factor FNK].

Synergism interaction between arachidonic acid by 5-hydroxytryptamine in human platelet aggregation is mediated through multiple signalling pathways.

Simulation of dioxin accumulation in human tissues and analysis of reproductive risk.

Chlorinated hydrocarbon contaminants in blood of black and turkey vultures from Savannah River Site, South Carolina, USA.

Ischemic preconditioning by caspase cleavage of poly(ADP-ribose) polymerase-1.

P-glycoprotein restricted transport of nimodipine across blood-brain barrier.

Preparation and characterization of group A meningococcal capsular polysaccharide conjugates and evaluation of their immunogenicity in mice.

Ligand-independent activation of vascular endothelial growth factor receptor 2 by fluid shear stress regulates activation of endothelial nitric oxide synthase.

Tissue repair plays pivotal role in final outcome of liver injury following chloroform and allyl alcohol binary mixture.

Identification of lethal mutations in Escherichia coli genes encoding enzymes of the methylerythritol phosphate pathway.

Thrombospondin-bound integrin-associated protein (CD47) physically and functionally modifies integrin α IIb β 3 by its extracellular domain.

Pharmacokinetics of ovarian steroids in Sprague-Dawley rats after acute exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

[Fumigation of soil and food: assessment of occupational exposure to methyl bromide].

Measurement of dioxins in human blood: improvement of analytical method.

Survey on the health effects of chronic exposure to dioxins and its accumulation on workers of a municipal solid waste incinerator, rural part of Osaka Prefecture, and the results of extended survey afterwards.

Exposure evaluation of dioxins in municipal waste incinerator workers.

In vitro pharmacokinetic study of the novel anticancer agent E7070: red blood cell and plasma protein binding in human blood.

Zebrafish as a novel experimental model for developmental toxicology.

Uptake of proteins and degradation of human serum albumin by Plasmodium falciparum-infected human erythrocytes.

[Follow-up survey of dioxins in the blood of Yusho patients (in 2001)].

Reactive oxygen species mediate endotoxin-induced human dermal endothelial NF-kappaB activation.

[Determination of 2,4-dinitrophenol, its basic metabolite and 4-oxide diphenyl in biological materials].

Hydroxylated PCBs and other chlorinated phenolic compounds in lake trout (*Salvelinus namaycush*) blood plasma from the Great Lakes region.

Chemiluminescence response of beta-glucan stimulated leukocytes isolated from different tissues and peritoneal cavity of *Dicentrarchus labrax*.

The multidrug resistance-associated protein 1 transports methoxychlor and protects the seminiferous epithelium from injury.

Determination of paraquat in human blood plasma using reversed-phase ion-pair high-performance liquid chromatography with direct sample injection.

Platelet interaction with CNBr peptides from type II collagen via integrin alpha2beta1.

Different modulation by Ca²⁺-activated K⁺ channel blockers and herbimycin of acetylcholine- and flow-evoked vasodilatation in rat mesenteric small arteries.

The effect of fucoidan, heparin and cyanogen bromide-fibrinogen on the activation of human glutamic-plasminogen by tissue plasminogen activator.

An artificial amino acid, 4-iodo-L-meta-tyrosine: biodistribution and excretion via kidney.

Monthly variation in blood dioxin level, characteristics of isomer composition, and isomer changes in residents near an incineration facility.

Whole-grain rye and wheat foods and markers of bowel health in overweight middle-aged men.

Micronucleus frequency and proliferation in human lymphocytes after exposure to herbicide 2,4-dichlorophenoxyacetic acid in vitro and in vivo.

Combined methylprednisolone and dexamethasone therapy for paraquat poisoning.

Fractionation of protein adducts in rats and mice dosed with [¹⁴C]pentachlorophenol.

Role of antioxidants in paraquat toxicity.

In vitro myelotoxicity of propanil and 3,4-dichloroaniline on murine and human CFU-E/BFU-E progenitors.

A survey of EPA/OPP and open literature on selected pesticide chemicals. III. Mutagenicity and carcinogenicity of benomyl and carbendazim.

Detection of cellular responses to toxicants by dielectrophoresis.

Predictors of herbicide exposure in farm applicators.

A comparison between mouse and fish micronucleus test using cyclophosphamide, mitomycin C and various pesticides.

Induction of micronuclei and erythrocyte alterations in the catfish *Clarias batrachus* by 2,4-dichlorophenoxyacetic acid and butachlor.

Toxicokinetics, recovery, and metabolism of triclopyr butotyl (ACTP) ester in goats.

Reproductive outcomes in the women of the Red River Valley of the north. I. The spouses of pesticide applicators: pregnancy loss, age at menarche, and exposures to pesticides.

Induction of oxidative stress in paraquat formulating workers.

Predictors of survival after acute paraquat poisoning.

Exposure to pesticides as risk factor for non-Hodgkin's lymphoma and hairy cell leukemia: pooled analysis of two Swedish case-control studies.

Testicular changes induced by chronic exposure to the herbicide formulation, Tordon 75D (2,4-dichlorophenoxyacetic acid and picloram) in rats.

[Effects of pesticides on cytokines production by human peripheral blood mononuclear cells--fenitrothion and glyphosate].

Agent Orange no longer linked to childhood AML.

Computerized automated morphometric assay including frequency estimation of pentachlorophenol induced nuclear anomalies (micronucleus) in catfish *Heteropneustes fossilis*.

In vitro testing for genotoxicity of the herbicide terbutryn: cytogenetic and primary DNA damage.

Role of catalase in the smooth muscle relaxant actions of sodium azide and cyanamide.

In vivo genotoxicity evaluation of dimethylarsinic acid in MutaMouse.

Effect of vitamin C on plasma total antioxidant status in patients with paraquat intoxication.

Severe propanil [N-(3,4-dichlorophenyl) propanamide] pesticide self-poisoning.

Radioprotectants: current status and new directions.

Evaluation of the aneugenic potential of the fungicide Ferbam in mice.

A fatal human intoxication with the herbicide allyl alcohol (2-propen-1-ol).

Ethanol-stimulated behaviour in mice is modulated by brain catalase activity and H₂O₂ rate of production.

Rising leukemia rates in Thailand: the possible role of benzene and related compounds in cigarette smoke.

Two diarylurea electron transport inhibitors reduce *Staphylococcus aureus* hemolytic activity and protect cultured endothelial cells from lysis.

Plasmodium: assessment of the antimalarial potential of trifluralin and related compounds using a rat model of malaria, *Rattus norvegicus*.

Modified guanines representing O(6)-alkylation by the cyclophosphamide metabolites acrolein and chloroacetaldehyde: synthesis, stability, and ab initio studies.

Acrolein modifies and inhibits cytosolic aspartate aminotransferase.

Elimination of *O(2)(-)/H(2)O(2) by alpha-lipoic acid mediates the recovery of basal EDRF/NO availability and the reversal of superoxide dismutase-induced relaxation in diabetic rat aorta.

Brain catalase inhibition blocks ethanol-related decrease of blood luteinizing hormone levels in mice.

Combined calcium carbimide and ethanol treatment induces high blood acetaldehyde levels, myocardial apoptosis and altered expression of apoptosis-regulating genes in rat.

Transepithelial organic anion transport by shark choroid plexus.

Confocal imaging of organic anion transport in intact rat choroid plexus.

Uptake of (3)H-1-methyl-4-phenylpyridinium ((3)H-MPP(+)) by human intestinal Caco-2 cells is regulated by phosphorylation/dephosphorylation mechanisms.

Pentachlorophenol and hydroxylated polychlorinated biphenyl metabolites in umbilical cord plasma of neonates from coastal populations in Qu^Ãbec.

The distribution of the anti-HIV drug, 2'3'-dideoxycytidine (ddC), across the blood-brain and blood-cerebrospinal fluid barriers and the influence of organic anion transport inhibitors.

Erythromycin slows aging of *Saccharomyces cerevisiae*.

Plasma pharmacokinetics and tissue distribution of a N-pyrrolo-[1,2-c]imidazolylphenyl sulfonamide in rats.

Possible range of dioxin concentration in human tissues: simulation with a physiologically based model.

Altered protein profile and possible hypoxia in the placenta of 2,3,7,8-tetrachlorodibenzo-p-dioxin-exposed rats.

Comparative toxicity study of 3-aminophenol in newborn and young rats.

The usefulness of elemental iron for cereal flour fortification: a SUSTAIN Task Force report. Sharing United States Technology to Aid in the Improvement of Nutrition.

Acute toxicity of carbonyl iron and sodium iron EDTA compared with ferrous sulfate in young rats.

Addition of microencapsulated iron to iodized salt improves the efficacy of iodine in goitrous, iron-deficient children: a randomized, double-blind, controlled trial.

Pulmonary effects of ultrafine and fine ammonium salts aerosols in healthy and monocrotaline-treated rats following short-term exposure.

Associations of dichlorodiphenyltrichloroethane (DDT) 4.4 and dichlorodiphenyldichloroethylene (DDE) 4.4 blood levels with plasma IL-4.

[Chromosome instability induced by agrochemicals among farm workers in Passo Fundo, Rio Grande do Sul, Brazil].

The influence of a residual group in low-molecular-weight allergoids of *Artemisia vulgaris* pollen on their allergenicity, IgE- and IgG-binding properties.

Lipid metabolism and neuropsychological follow-up study of workers exposed to 2,3,7,8-tetrachlorodibenzo-*p*-dioxin.

Alcohol-induced increases in insulin-like growth factor binding protein-1 are partially mediated by TNF.

Bioavailability of caseinophosphopeptide-bound iron.

The effect of iron deficiency anaemia on the levels of haemoglobin subtypes: possible consequences for clinical diagnosis.

Fibrinogen induces chemotactic activity in endothelial cells.

Endocrine disruption by indole-3-carbinol and tamoxifen: blockage of ovulation.

Therapeutic effects of glucose infusion on monochloroacetic acid exposure in rats.

The Belgian PCB/dioxin incident: a critical review of health risks evaluations.

Domestic drinking water--an effective way to prevent anemia among low socioeconomic families in Brazil.

The effect of different iron fortificants on iron absorption from iron-fortified rice.

Determination of autofluorescence of red blood cells (RbCs) in uremic patients as a marker of oxidative damage.

2,3,7,8-tetrachlorodibenzo-*p*-dioxin causes alterations in lymphocyte development and thymic atrophy in hemopoietic chimeras generated from mice deficient in ARNT2.

Mortality in dioxin-exposed mice infected with influenza: mitochondrial toxicity (reye's-like syndrome) versus enhanced inflammation as the mode of action.

Critical windows of exposure to household pesticides and risk of childhood leukemia.

A study on behavioral, neurotoxicological, and immunotoxicological effects of subchronic arsenic treatment in rats.

Activation of adenosine triphosphate-sensitive potassium channels confers protection against rotenone-induced cell death: therapeutic implications for Parkinson's disease.

Streptococcus sanguis modulates type II collagen-induced arthritis in DBA/1J mice.

Bioavailability of Petit-Suisse cheese as food vehicle for iron fortification estimated by the prophylactic method.

The role of Akt and RAFTK in beta1 integrin mediated survival of precursor B-acute lymphoblastic leukemia cells.

FLT3 in human hematologic malignancies.

Reversal of iron deficiency anemia-induced peripheral neuropathy by iron treatment in children with iron deficiency anemia.

Behavior of non-protein-bound and protein-bound uremic solutes during daily hemodialysis.

Selective apoptosis of tandemly duplicated FLT3-transformed leukemia cells by Hsp90 inhibitors.

Assessment of genome damage in a population of Croatian workers employed in pesticide production by chromosomal aberration analysis, micronucleus assay and Comet assay.

Effect of arsenic, cadmium and lead on the induction of apoptosis of normal human mononuclear cells.

Supplemental zinc lowers measures of iron status in young women with low iron reserves.

Does iron have a place in the management of breath holding spells?

Mechanisms of 2-butoxyethanol carcinogenicity: studies on Syrian Hamster Embryo (SHE) cell transformation.

Platelet endothelial cell adhesion molecule-1 (PECAM-1/CD31) acts as a regulator of B-cell development, B-cell antigen receptor (BCR)-mediated activation, and autoimmune disease.

Angiopoietin-1 and VEGF in vascular development and angiogenesis in hypoplastic lungs.

Triplet pregnancy in a Jehovah's witness: recombinant human erythropoietin and iron supplementation for minimising the risks of excessive blood loss.

Studies on the photostability and phototoxicity of aloe-emodin, emodin and rhein.

Severe 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) intoxication: kinetics and trials to enhance elimination in two patients.

Clinical inquiries. Are any oral iron formulations better tolerated than ferrous sulfate?

Immunologic biomarkers in relation to exposure markers of PCBs and dioxins in Flemish adolescents (Belgium).

[Iron supplementation in a child with severe burns].

Modes of activation of mitogen-activated protein kinases and their roles in cepharanthine-induced apoptosis in human leukemia cells.

Decrease in 4-aminobiphenyl-induced methemoglobinemia in Cyp1a2(-/-) knockout mice.

[Treatment of iron deficiency in preschool children with a weekly dose of ferrous sulfate].

Dinitrophenol pretreatment of rat ventricular myocytes protects against damage by metabolic inhibition and reperfusion.

Transgenic rice is a source of iron for iron-depleted rats.

Changes in haemoglobin levels in infants in Malawi: effect of low birth weight and fetal anaemia.

Effects of subchronic exposure to a complex mixture of persistent contaminants in male rats: systemic, immune, and reproductive effects.

Tumor necrosis factor-alpha and interleukin-1beta mediate the production of nitric oxide involved in the pathogenesis of ifosfamide induced hemorrhagic cystitis in mice.

Case-control study evaluating the homogeneity and heterogeneity of risk factors between sinonasal and nasopharyngeal cancers.

[The prevalence of iron deficiency anemia among 6- to 18-month-old children in Japan].

Epoetin alpha in elective coronary and valve surgery in Jehovah's Witnesses patients. Experience in 45 patients.

Marginal iron deficiency without anemia impairs aerobic adaptation among previously untrained women.

Angiotensin protects cortical neurons from hypoxic-induced apoptosis via the angiotensin type 2 receptor.

An autopsy case of poisoning by massive absorption of cresol a short time before death.

Differential activities of murine single minded 1 (SIM1) and SIM2 on a hypoxic response element. Cross-talk between basic helix-loop-helix/per-Arnt-Sim homology transcription factors.

Congenital erythrocytosis with increased erythropoietin level.

Iron-deficiency anemia in young working women can be reduced by increasing the consumption of cereal-based fermented foods or gooseberry juice at the workplace.

The potential role of exposure to environmental toxicants in the pathophysiology of endometriosis.

On the rumors about the silent spring. Review of the scientific evidence linking occupational and environmental pesticide exposure to endocrine disruption health effects.

Bioavailability of microencapsulated ferrous sulfate in milk.

Bioavailability of microencapsulated ferrous sulfate in powdered milk produced from fortified fluid milk: a prophylactic study in rats.

Once weekly is superior to daily iron supplementation on height gain but not on hematological improvement among schoolchildren in Thailand.

Heat shock response reduces intestinal permeability in septic mice: potential role of interleukin-10.

Attenuation of ischemic efflux of endogenous amino acids by the novel 5-HT(1A)/5-HT(2) receptor ligand adatsanserin.

Obligatory requirement of sulfation for P-selectin binding to human salivary gland carcinoma Acc-M cells and breast carcinoma ZR-75-30 cells.

Association between chronic exposure to pesticides and recorded cases of human malignancy in Gaza Governorates (1990-1999).

Skin irritation typing and grading based on laser Doppler perfusion imaging.

In vitro adsorption of lithium by bentonite.

NTP Technical Report on the Toxicology and Carcinogenesis Studies of Chloral Hydrate (Cas No. 302-17-0) in B6C3F1 mice (Gavage Studies).

Increased glycogen content and glucose transporter 3 mRNA level in the placenta of Holtzman rats after exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Role of sarcolemmal K(ATP) channels in cardioprotection against ischemia/reperfusion injury in mice.

Weekly vs daily iron and folic acid supplementation in adolescent Nepalese girls.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxicity in the zebrafish embryo: altered regional blood flow and impaired lower jaw development.

Recent advances in understanding the mechanisms of TCDD immunotoxicity.

Anti-platelet and anti-thrombotic effects of triacetylshikimic acid in rats.

Effects of 2-butoxyethanol on hepatic oxidative damage.

Oxidative stress reproduces placental abnormalities of preeclampsia.

Dietary folate deficiency enhances induction of micronuclei by arsenic in mice.

A possible relationship between bumblefoot responsive to potassium arsenite and micrococci in the blood of three birds of prey.

[Relationship between emotional stress in female residents of the city of Chapaevsk and toxicological and genetic values].

Simple radioactive assay for the estimation of DNA breaks.

Iron deficiency anemia increases nitric oxide production in healthy adolescents.

Extracellular signal-regulated kinases and G protein-coupled receptors in megakaryocytic human erythroleukemia cells: selective activation, differential regulation, and dissociation from mitogenesis.

Selective transport and accumulation of alkanes by *Rhodococcus erythropolis* S+14He.

Metabolism and excretion of 2-nitro-p-cresol in rats.

Antagonism of NMDA receptors by sigma receptor ligands attenuates chemical ischemia-induced neuronal death in vitro.

Reactivity of atropaldehyde, a felbamate metabolite in human liver tissue in vitro.

Cyclic mechanical stretch augments prostacyclin production in cultured human uterine myometrial cells from pregnant women: possible involvement of up-regulation of prostacyclin synthase expression.

Internalization of basic fibroblast growth factor at the mouse blood-brain barrier involves perlecan, a heparan sulfate proteoglycan.

Hemorrhagic cystitis as an unexpected adverse reaction to temozolomide: case report.

Enhancement of allyl alcohol hepatotoxicity by endotoxin requires extrahepatic factors.

Role of oxidative phosphorylation and ATP release in mediating birth-related pulmonary vasodilation in fetal lambs.

[11C]Mirtazapine for PET neuroimaging: radiosynthesis and initial evaluation in the living porcine brain.

Differential sensitivity of inward rectifier K⁺ channels to metabolic inhibitors.

Clinical toxicology: part II. Diagnosis and management of uncommon poisonings.

Oxidative stress and gene transcription in asthma and chronic obstructive pulmonary disease: antioxidant therapeutic targets.

Analysis of paraquat, diquat and two diquat metabolites in biological materials by high-performance liquid chromatography.

[Biosensor of the reactor type based on *Rhodococcus erythropolis* HL TM-1 cells for determining 2,4-dinitrophenol].

Reconstitution of functional human B lymphocytes in NOD/SCID mice engrafted with ex vivo expanded CD34(+) cord blood cells.

Portal absorption of ¹⁴C after ingestion of spiked milk with ¹⁴C-phenanthrene, ¹⁴C-benzo[a]pyrene or ¹⁴C-TCDD in growing pigs.

2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity in the zebrafish embryo: local circulation failure in the dorsal midbrain is associated with increased apoptosis.

Opening of ATP-sensitive potassium channels causes generation of free radicals in vascular smooth muscle cells.

Resistance of isolated mammalian spinal cord white matter to oxygen-glucose deprivation.

Biological monitoring of metals and organic substances in hazardous-waste incineration workers.

Hypochlorous acid inhibits glutathione S-conjugate export from human erythrocytes.

Metabolite ratio of toluene-exposed rotogravure printing plant workers reflects individual mutagenic risk by sister chromatid exchanges.

Origins and consequences of mitochondrial decline in nucleated erythrocytes.

Serum dioxin concentrations and menstrual cycle characteristics.

Impact of human variability on the biological monitoring of exposure to toluene: I. Physiologically based toxicokinetic modelling.

Coagulation for treatment of paint industry wastewater.

The effect of oxidative stress on ERalpha and ERbeta expression.

Severe 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) intoxication: insights into the measurement of hepatic cytochrome P450 1A2 induction.

Modeling digestive tract absorption and desorption of lipophilic organic contaminants in humans.

Inhibition of protein kinases A and C demonstrates dual modes of response in human eosinophils stimulated with platelet-activating factor.

Comparative responsiveness of hypothyroxinemia and hepatic enzyme induction in Long-Evans rats versus C57BL/6J mice exposed to TCDD-like and phenobarbital-like polychlorinated biphenyl congeners.

Urokinase induces its own expression in Beas2B lung epithelial cells.

Antifungal mechanism of SMAP-29 (1-18) isolated from sheep myeloid mRNA against *Trichosporon beigelii*.

Distribution and elimination of polychlorinated dibenzo-p-dioxins, dibenzofurans, biphenyls, and p,p'-DDE in tissues of bald eagles from the Upper Peninsula of Michigan.

The effect of ascorbic acid and ethanol on the level of thiobarbituric acid reactive substances (TBARS) in selected tissues of albino BALB/c mice.

Isoflurane-induced facilitation of the cardiac sarcolemmal K(ATP) channel.

Differential modulation of the cardiac adenosine triphosphate-sensitive potassium channel by isoflurane and halothane.

Effects of glucocorticoids on generation of reactive oxygen species in platelets.

Amino acid sequence of a thrombin like enzyme, elegaxobin, from the venom of *Trimeresurus elegans* (Sakishima-habu).

Candida albicans expresses a focal adhesion kinase-like protein that undergoes increased tyrosine phosphorylation upon yeast cell adhesion to vitronectin and the EA.hy 926 human endothelial cell line.

Synthesis and cytotoxic activity of N-(2-diethylamino)ethylcarboxamide and other derivatives of 10H-quindoline.

Functional expression and localization of P-glycoprotein at the blood brain barrier.

Activation of erythropoietin receptor through a novel extracellular binding site.

Stereoselective transport of histidine in rat lung microvascular endothelial cells.

Microfilament-dependent movement of the beta3 integrin subunit within focal contacts of endothelial cells.

Development of an in vitro test battery for the estimation of acute human systemic toxicity: An outline of the EDIT project. Evaluation-guided Development of New In Vitro Test Batteries.

A convenient method for determination of the C20-22 PUFA composition of glycerolipids in blood and breast milk.

Detection of early embryonic development in chicken eggs using visible light transmission.

Discrimination and taxonomy of geographically diverse strains of nitrile-metabolizing actinomycetes using chemometric and molecular sequencing techniques.

Effects of protein kinase C on delayed rectifier K⁺ channel regulation by tyrosine kinase in rat retinal pigment epithelial cells.

Stimulation of nitric oxide synthase in cerebral cortex due to elevated partial pressures of oxygen: an oxidative stress response.

Laminar disorganisation of mitral cells in the olfactory bulb does not affect topographic targeting of primary olfactory axons.

[Prevalence of drug use during pregnancy: a pharmacoepidemiological approach].

Characterization of dioxin exposure in firefighters, residents, and chemical workers in the Irkutsk Region of Russian Siberia.

Compestatin antagonizes the AMPA/kainate-induced neurotoxicity in cultured chick telencephalic neurons.

Soluble fibrinogen modulates neutrophil functionality through the activation of an extracellular signal-regulated kinase-dependent pathway.

Role of gas chromatography-mass spectrometry with negative ion chemical ionization in clinical and forensic toxicology, doping control, and biomonitoring.

Long-chain fatty acids increase basal metabolism and depolarize mitochondria in cardiac muscle cells.

Aryl hydrocarbon receptor is required for prevention of blood clotting and for the development of vasculature and bone in the embryos of medaka fish, *Oryzias latipes*.

Monitoring for DNA damage of humans occupationally exposed to methyl bromide.

Expression and induction of the stress protein alpha-B-crystallin in vascular endothelial cells.

npd gene functions of *Rhodococcus (opacus) erythropolis* HL PM-1 in the initial steps of 2,4,6-trinitrophenol degradation.

Chiral pharmacokinetics and inversion of enantiomers of a new quinoxaline topoisomerase II β poison in the rat.

Nitric oxide inactivation in brain by a novel O₂-dependent mechanism resulting in the formation of nitrate ions.

Thrombin-stimulated cell proliferation mediated through activation of Ras/Raf/MEK/MAPK pathway in canine cultured tracheal smooth muscle cells.

Barbiturase, a novel zinc-containing amidohydrolase involved in oxidative pyrimidine metabolism.

Immobilized earthworm fibrinolytic enzyme III-1 with carbonyldiimidazole activated-agarose.

Determination of tissue-blood partition coefficients for a physiological model for humans, and estimation of dioxin concentration in tissues.

Porphyrin profiles in blood and urine as a biomarker for exposure to various arsenic species.

Urocortin, but not urocortin II, protects cultured hippocampal neurons from oxidative and excitotoxic cell death via corticotropin-releasing hormone receptor type I.

Multidrug-resistance mdr1a/1b double knockout mice are more sensitive than wild type mice to acute arsenic toxicity, with higher arsenic accumulation in tissues.

The major Cu,Zn SOD of the phytopathogen *Claviceps purpurea* is not essential for pathogenicity.

Intracellular Ca²⁺ homeostatic regulation and 4-hydroxynonenal-induced aortic endothelial dysfunction.

Ferritin induction protects cortical astrocytes from heme-mediated oxidative injury.

Rheological and biochemical examination of red blood cells after treatment with different pharmacological and toxic substances.

Myeloperoxidase-dependent caspase-3 activation and apoptosis in HL-60 cells: protection by the antioxidants ascorbate and (dihydro)lipoic acid.

Preliminary evaluation of the cytotoxic and genotoxic potential of D-003: Mixture of very long chain fatty acids.

Composition of enterococcal and streptococcal flora from pigeon intestines.

Sister chromatid exchange and proliferative rate index in the longitudinal risk assessment of occupational exposure to pesticides.

Syndecan-4 mediates antithrombin-induced chemotaxis of human peripheral blood lymphocytes and monocytes.

Nonagenarians from the Swedish NONA Immune Study have increased plasma antioxidant capacity and similar levels of DNA damage in peripheral blood mononuclear cells compared to younger control subjects.

Identification of hydroxylated PCB metabolites and other phenolic halogenated pollutants in human blood plasma.

Neutropenia induced by paraquat poisoning.

Subacute toxicity of anilofos, a new organophosphorus herbicide in male rats: effect on lipid peroxidation and ATPase activity.

Subacute toxicity of anilofos, a new organophosphorus herbicide, in male rats: effect on some physical attributes and acetylcholinesterase activity.

[Corrective effects of tocopherol on changes in indices of the protective activity of phagocytes under the action of the herbicide 2,4-DA].

Environmental and occupational skin diseases in Taiwan.

Toxicity and effects of 2,6-di-tert-butyl-4-methylphenyl N-methylcarbamate (terbutol) on hepatic cytochrome P450 in F344 rats.

Changes in concentrations of type IV collagen and tissue inhibitor of metalloproteinase-1 in patients with paraquat poisoning.

Surfactant and corticosteroid effects on lung function in a rat model of acute lung injury.

Relation of serum 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) level to hematological examination results in veterans of Operation Ranch Hand.

Induction of sister chromatid exchanges by 2,4-dichlorophenoxyacetic acid in somatic and germ cells of mice exposed in vivo.

Effect of isoproterenol pretreatment on the biochemical toxicodynamics of anilofos in male rats.

The effect of exposure to a commercial 2,4-D formulation during gestation on the immune response in CD-1 mice.

Gender difference in cytoprotection induced by estrogen on female and male bovine aortic endothelial cells.

Langerhans cells and immature dendritic cells as model systems for screening of skin sensitizers.

Genotoxic effect of 2,4-dichlorophenoxy acetic acid and its metabolite 2,4-dichlorophenol in mouse.

Carrier-mediated processes in blood--brain barrier penetration and neural uptake of paraquat.

Release of markedly increased quantities of prostaglandin D2 from the skin in vivo in humans after the application of cinnamic aldehyde.

Evaluation of immune parameters in propanil-exposed farm families.

Genotoxicity studies of three triazine herbicides: in vivo studies using the alkaline single cell gel (SCG) assay.

Toxic effects of the herbicide 2,4-dichlorophenoxyacetic acid on lymphoid organs of the rat.

Acute diquat poisoning with intracerebral bleeding.

Effects of atrazine on embryos, larvae, and adults of anuran amphibians.

Toxico-kinetics, recovery, and metabolism of napropamide in goats following a single high-dose oral administration.

Detection of DNA damage in haemocytes of zebra mussel using comet assay.

Proliferation and differentiation of murine haemopoietic progenitor cells in stroma-free culture in the presence of metabolites of chlorinated pesticides.

Paraquat poisoning in a family.

The hemolytic toxicity of some new aminophosphonates.

Effect of the herbicide 4-CPA on human erythrocyte antioxidant enzymes in vitro.

Effect of 2,4-dichlorophenoxyacetic acid herbicide on escherichia coli growth, chemical composition, and cellular envelope.

Reproductive toxicity of MCPA (4-chloro-2-methylphenoxyacetic acid) in the rat.

Influence of paraquat, glyphosate, and cadmium on the activity of some serum enzymes and protein electrophoretic behavior (in vitro).

Association of elevated blood levels of pentachlorophenol (PCP) with cellular and humoral immunodeficiencies.

Pesticide poisoning initially suspected as a natural death.

Induction of apoptosis in human lymphocytes by the herbicide 2,4-dichlorophenoxyacetic acid.

Pancreatitis induced by environmental toxins.

Dehydroepiandrosterone inhibits the death of immunostimulated rat C6 glioma cells deprived of glucose.

Measurement of inhibin A: a modification to an enzyme-linked immunosorbent assay.

Hyperbaric oxygenation pretreatment induces catalase and reduces infarct size in ischemic rat myocardium.

Chronic low-level administration of diquat increases the nociceptive response to gastric distension in rats: role of mast cells and tachykinin receptor activation.

Expression of inducible nitric oxide synthase in primary culture of rat bladder smooth muscle cells by plasma from cyclophosphamide-treated rats.

Effects of chlorpropham (CIPC) on the hemopoietic system of rats.

Down-regulation of catalase gene expression in the doxorubicin-resistant AML subline AML-2/DX100.

Haemonchus contortus utilises catalase in defence against exogenous hydrogen peroxide in vitro.

Biodegradation and transfer of ingested 2,4-D herbicide by a polyphagous saturniid caterpillar.

Animal species difference in the uptake of dimethylarsinous acid (DMA(III)) by red blood cells.

Hydrogen peroxide detoxification in the midgut of the blood-sucking insect, *Rhodnius prolixus*.

Cholinergic nerves mediate acetaldehyde action in the gastrointestinal tract.

Isolation and characterisation of *Rhodococcus erythropolis* TA57 able to degrade the triazine amine product from hydrolysis of sulfonylurea pesticides in soils.

Red blood cells inhibit activation-induced cell death and oxidative stress in human peripheral blood T lymphocytes.

Relative sensitivities of plasma lecithin:cholesterol acyltransferase, platelet-activating factor acetylhydrolase, and paraoxonase to in vitro gas-phase cigarette smoke exposure.

Metabolism of the herbicide glufosinate-ammonium in plant cell cultures of transgenic (rhizomania-resistant) and non-transgenic sugarbeet (*Beta vulgaris*), carrot (*Daucus carota*), purple foxglove (*Digitalis purpurea*) and thorn apple (*Datura stramonium*).

Acetaldehyde, a metabolite of ethanol, activates the hypothalamic-pituitary-adrenal axis in the rat.

B-lymphocytes from malignant hyperthermia-susceptible patients have an increased sensitivity to skeletal muscle ryanodine receptor activators.

[Effect of sideropenic anemia and its therapy on serum levels of leptin].

Cutaneous elimination of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Disruption of erythropoiesis by dioxin in the zebrafish.

Enhanced expression of heat shock proteins in activated polymorphonuclear leukocytes in patients with sepsis.

Macrophage migration inhibitory factor as a redox-sensitive cytokine in cardiac myocytes.

Treatment of anemia with microencapsulated ferrous fumarate plus ascorbic acid supplied as sprinkles to complementary (weaning) foods.

Biochemical, neuropsychological, and neurological abnormalities following 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) exposure.

The effect of long-term storage on nanoleakage.

Mast cell regulation of inflammation and gene expression during antigen-induced bladder inflammation in mice.

[A case of fatal acute sodium azide poisoning].

Arsenic suppresses necrosis induced by selenite in human leukemia HL-60 cells.

p73 is a growth-regulated protein in vascular smooth muscle cells and is present at high levels in human atherosclerotic plaque.

Chronic fatigue syndrome (CFS) associated with *Staphylococcus* spp. bacteremia, responsive to potassium arsenite 0.5% in a veterinary surgeon and his coworking wife, handling with CFS animal cases.

Complestatin is a noncompetitive peptide antagonist of N-methyl-D-aspartate and alpha-amino-3-hydroxy-5-methyl-4-isoxazolepropionic acid/kainate receptors: secure blockade of ischemic neuronal death.

Dioxin and diabetes mellitus: an analysis of the combined NIOSH and Ranch Hand data.

Methaemoglobinaemia and poisoning.

[Utilization of different iron concentrations on pregnant adolescents also supplemented with zinc and folate].

Do cool water or physiologic saline compresses enhance resolution of experimentally-induced irritant contact dermatitis?

Randomized, controlled trial of single versus 3-times-daily ferrous sulfate drops for treatment of anemia.

Cell swelling and a nonselective cation channel regulated by internal Ca^{2+} and ATP in native reactive astrocytes from adult rat brain.

Effects of chemical modifications of crotoxin B, the phospholipase A(2) subunit of crotoxin from *Crotalus durissus terrificus* snake venom, on its enzymatic and pharmacological activities.

Cytogenetic monitoring of croatian population occupationally exposed to a complex mixture of pesticides.

FLT3 tyrosine kinase as a target molecule for selective antileukemia therapy.

[CD7(+) acute myeloid leukemia (M0) associated with a mediastinal bulky mass lesion].

Severe 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) intoxication: clinical and laboratory effects.

Iron supplementation inhibits cough associated with ACE inhibitors.

Late confirmation of acute methyl bromide poisoning using S-methylcysteine adduct testing.

Aromatic hydrocarbon receptor-driven Bax gene expression is required for premature ovarian failure caused by biohazardous environmental chemicals.

Contribution of Mn-cofactored superoxide dismutase (SodA) to the virulence of *Streptococcus agalactiae*.

Pro-apoptotic interactions between XK469 and the peripheral benzodiazepine receptor.

Concomitant supplemental vitamin A enhances the response to weekly supplemental iron and folic acid in anemic teenagers in urban Bangladesh.

Suppression of allergic immune responses to house dust mite (HDM) in rats exposed to 2,3,7,8-TCDD.

Hypoxia-inducible factor 1alpha and 1beta proteins share common signaling pathways in human prostate cancer cells.

Cardioprotective effect of propranolol from alcohol-induced heart muscle damage as assessed by plasma cardiac troponin-t.

Tyrosine kinase inhibitors in the treatment of chronic myeloid leukaemia: so far so good?

The genetic basis of endometriosis.

Health effects of dioxin exposure: a 20-year mortality study.

Chronic toxicity of dietary 2,3,7,8-tetrachlorodibenzo-p-dioxin to mink.

Fetal tracheal occlusion in the rat model of nitrofen-induced congenital diaphragmatic hernia: tracheal occlusion reverses the arterial structural abnormality.

Polychlorinated biphenyl serum levels in pregnant subjects with diabetes.

[The changes of PCBs and PCDFs as well as symptoms in Yusho patients for 30 years].

Occupational exposures to metals, solvents and pesticides: recent evidence on male reproductive effects and biological markers.

Effectiveness of treatment of iron-deficiency anemia in infants and young children with ferrous bis-glycinate chelate.

Human emotional stress, dioxin blood content and genetic damage in Chapaevsk town.

Dioxin exposure and public health in Chapaevsk, Russia.

Fate of PCDF/PCB congeners and change of clinical symptoms in patients with Yusho PCB poisoning for 30 years.

Health risk assessment of dioxin emissions from municipal waste incinerators: the Neerlandquarter (Wilrijk, Belgium).

Method for evaluation of immunotoxicity of dioxin compounds using human T-lymphoblastic cell line, L-MAT.

Will genetically modified foods be allergenic?

A randomized study of oral vs intravenous iron supplementation in patients with progressive renal insufficiency treated with erythropoietin.

Activated coagulation factor X: a novel mitogenic stimulus for human mesangial cells.

Phosphorylation of xanthine dehydrogenase/oxidase in hypoxia.

IgE binding properties of the recombinant ovomucoid third domain expressed in Escherichia coli.

Uptake mechanism of valproic acid in human placental choriocarcinoma cell line (BeWo).

[Pathogenetic rationale for inclusion of vitamin E in combined correction of iron deficiency anemia].

Autologous blood transfusion in oral and maxillofacial surgery patients with the use of erythropoietin.

Toxicity of PCB-126 in European flounder (*Platichthys flesus*) with emphasis on histopathology and cytochrome P4501A induction in several organ systems.

Comparative biodistribution and metabolism of carbon-11-labeled N-[2-(dimethylamino)ethyl]acridine-4-carboxamide and DNA-intercalating analogues.

Dissociation of enzymatic and pharmacological properties of piratoxins-I and -III, two myotoxic phospholipases A2 from *Bothrops pirajai* snake venom.

Relative effectiveness of iron bis-glycinate chelate (Ferrochel) and ferrous sulfate in the control of iron deficiency in pregnant women.

Central retinal vein occlusion and nonarteritic ischemic optic neuropathy in 2 patients with mild iron deficiency anemia.

Androgen receptor antagonism by the organophosphate insecticide fenitrothion.

2,3,7,8-tetrachlorodibenzo-p-dioxin and natural immunity: lack of an effect on the complement system in a guinea pig model.

Characterization of endogenous amino acid efflux from hippocampal slices during chemically-induced ischemia.

Low ferritin levels indicate the need for iron supplementation: strategy to minimize iron depletion in regular blood donors.

High-performance liquid chromatography/fluorescence detection of S-methylglutathione formed by glutathione-S-transferase T1 in vitro.

Capacity of mouse mast cells to prime T cells and to induce specific antibody responses in vivo.

Genetic events associated with arsenic-induced malignant transformation: applications of cDNA microarray technology.

Effect of oral administration of excessive iron in adult ponies.

Ethanol activates NFkappaB DNA binding and p56lck protein tyrosine kinase in human osteoblast-like cells.

BAPS prize-1999: Lung growth induced by prenatal tracheal occlusion and its modifying factors: a study in the rat model of congenital diaphragmatic hernia.

2,3,7,8-tetrachlorodibenzo-p-dioxin decreases responsiveness of the hypothalamus to estradiol as a feedback inducer of preovulatory gonadotropin secretion in the immature gonadotropin-primed rat.

Improving iron absorption from a Peruvian school breakfast meal by adding ascorbic acid or Na₂EDTA.

Dioxin exposure is an environmental risk factor for ischemic heart disease.

Iron deficiency anemia.

Preconditioning with sodium arsenite inhibits apoptotic cell death in rat kidney with ischemia/reperfusion or cyclosporine-induced injuries. The possible role of heat-shock protein 70 as a mediator of ischemic tolerance.

History of the development of arsenic derivatives in cancer therapy.

The effectiveness of weekly iron and vitamin supplementation of Malawian preschool children.

Photosensitizing activity of thiocolchicoside: photochemical and in vitro phototoxicity studies.

Effect of sodium arsenite on iNOS expression and vascular hyporeactivity associated with cecal ligation and puncture in the rat.

Aryl hydrocarbon receptor signaling plays a significant role in mediating benzo[a]pyrene- and cigarette smoke condensate-induced cytogenetic damage in vivo.

Absorption of iron from unmodified maize and genetically altered, low-phytate maize fortified with ferrous sulfate or sodium iron EDTA.

Benzo[a]pyrene-induced toxicity: paradoxical protection in Cyp1a1(-/-) knockout mice having increased hepatic BaP-DNA adduct levels.

Lauryl gallate inhibits the activity of protein tyrosine kinase c-Src purified from human platelets.

Dioxins in bile in relation to those in the human liver and blood.

Studies made to assess risk concerning a 'dioxin' contamination incident near Bolsover, Derbyshire, UK.

Cyclic AMP increases the survival of ganglion cells in mixed retinal cell cultures in the absence of exogenous neurotrophic molecules, an effect that involves cholinergic activity.

Effects of dioxins and polychlorinated biphenyls (PCBs) on thyroid function in infants born in Japan--the second report from research on environmental health.

N-Acetylneuraminic acid uptake in *Pasteurella (Mannheimia) haemolytica* A2 occurs by an inducible and specific transport system.

Role of iron in the interaction of red blood cells with methylglyoxal. Modification of L-arginine by methylglyoxal is catalyzed by iron redox cycling.

Enhanced systemic tissue distribution after dermal versus intravenous 3,3',4,4'-tetrachlorobiphenyl exposure: limited utility of radiolabel blood area under the curve and excretion data in dermal absorption calculations and tissue exposure assessment.

Involvement of ADAM9 in multinucleated giant cell formation of blood monocytes.

[Dioxins in the environment and in the blood and breast milk of residents of the town of Chapayevsk].

Identification of the epidermal growth factor-like domains of thrombomodulin essential for the acceleration of thrombin-mediated inactivation of single-chain urokinase-type plasminogen activator.

Prenatal exposure to pesticides: a feasibility study among migrant and seasonal farmworkers.

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) inhibition of coronary development is preceded by a decrease in myocyte proliferation and an increase in cardiac apoptosis.

The effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on corticotrophin-releasing hormone, arginine vasopressin, and pro-opiomelanocortin mRNA levels in the hypothalamus of the cynomolgus monkey.

Functional expression of P-glycoprotein in rat brain microglia.

Reductions in systemic oxygen delivery induce a hypometabolic state in the turtle *Trachemys scripta*.

Distribution spaces for hyaluronan and albumin in rat tail tendons.

Mannheimia haemolytica leukotoxin activates a nonreceptor tyrosine kinase signaling cascade in bovine leukocytes, which induces biological effects.

Kinetics of the protein-bound, lipophilic, uremic toxin p-cresol in healthy rats.

Long-lived polyclonal B-cell lines derived from midgestation mouse embryo lymphohematopoietic progenitors reconstitute adult immunodeficient mice.

Rapid analysis of pesticide components, xylene, o-dichlorobenzene, cresol and dichlorvos, in blood and urine by pulse heating-gas chromatography-mass spectrometry.

Antioxidant effect of red wine anthocyanins in normal and catalase-inactive human erythrocytes.

In vitro assay of collagen gel contraction by cardiac fibroblasts in serum-free conditions.

Lidocaine and mexiletine inhibit mitochondrial oxidation in rat ventricular myocytes.

Direct estimate of 1:1 stoichiometry of K(+)-Cl(-) cotransport in rabbit erythrocytes.

Fatal poisoning by butachlor and chlornitrofen ingested from a bottle marked as nitrofen.

The Change in the Properties of Sodium Dodecyl Sulfate Micelles upon Addition of Isomeric and Unsaturated Short-Chain Alcohols Probed by Photophysical Methods.

Metabolism of [¹⁴C]1,2,7,8-tetrachlorodibenzo-p-dioxin in a ruminating Holstein calf.

Levels of certain metals, organochlorine pesticides and dioxins in cord blood, maternal blood, human milk and some commonly used nutrients in the surroundings of the Aral Sea (Karakalpakstan, Republic of Uzbekistan).

Effect of dioxin on ovarian function in the cynomolgus macaque (*M. fascicularis*).

2,3,7,8-Tetrachlorodibenzo-p-dioxin induces apoptotic cell death and cytochrome P4501A expression in developing *Fundulus heteroclitus* embryos.

A new technique for measuring the cell growth and metabolism of endothelial cells seeded on vascular prostheses.

Synthesis of novel anti-inflammatory peptides derived from the amino-acid sequence of the bioactive protein SV-IV.

Fusarium solani major allergen peptide IV-1 binds IgE but does not release histamine.

Human eosinophils induce histamine release from antigen-activated rat peritoneal mast cells: a possible role for mast cells in late-phase allergic reactions.

Renal function, cytogenetic measurements, and sexual development in adolescents in relation to environmental pollutants: a feasibility study of biomarkers.

Strategies for neuroprotection against L-trans-2,4-pyrrolidine dicarboxylate-induced neuronal damage during energy impairment in vitro.

[Follow-up survey of dioxins in the blood of Yusho patients (in 1998-1999)].

Levels of metals and organic substances in blood and urine of workers at a new hazardous waste incinerator.

Polychlorinated biphenyls, polychlorinated dibenzo-p-dioxins, and polychlorinated dibenzofurans as endocrine disrupters--what we have learned from Yusho disease.

Levels of hexachlorobenzene and other organochlorine compounds in cord blood: exposure across placenta.

Effects of binary mixtures of six xenobiotics on hormone concentrations and morphometric endpoints of northern bobwhite quail (*Colinus virginianus*).

Hemopoietic cell kinetics after intraperitoneal single injection of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in mice.

Increase of dioxin blood levels over the last 4 years in the general population in Spain.

Heparin-induced release of protein-bound solutes during hemodialysis is an in vitro artifact.

Differential requirements for ERK1/2 and P38 MAPK activation by thrombin in T cells. Role of P59Fyn and PKCepsilon.

Mechanisms of thrombin-induced MAPK activation associated with cell proliferation in human cultured tracheal smooth muscle cells.

Increased tumor necrosis factor-alpha production by peripheral blood leukocytes from TCDD-exposed rhesus monkeys.

Oncogenic Ras-induced proliferation requires autocrine fibroblast growth factor 2 signaling in skeletal muscle cells.

Aryl hydrocarbon receptor-deficient mice generate normal immune responses to model antigens and are resistant to TCDD-induced immune suppression.

[Involvement of regulating the phosphatidylinositol 3-kinase signaling pathway in the process of herbimycin A-induced erythroid cell differentiation in the K562 erythroleukemia cell line].

Effects of staurosporine, U-73122, wortmannin, 4-hydroxynonenal and sodium azide upon the release of secreted beta-amyloid precursor protein from human platelets in response to thrombin stimulation.

Plasma levels of persistent organohalogenes and hormone levels in adult male humans.

New method for determination of ten pesticides in human blood.

Quantitative exposure assessment: application of physiologically-based pharmacokinetic (PBPK) modeling of low-dose, long-term exposures of organic acid toxicant in the brain.

Heterogeneity and plasticity of hepatocyte lineage cells.

The role of time as a quantifiable variable of toxicity and the experimental conditions when Haber's $c \times t$ product can be observed: implications for therapeutics.

Associations of blood levels of PCB, HCHS, and HCB with numbers of lymphocyte subpopulations, in vitro lymphocyte response, plasma cytokine levels, and immunoglobulin autoantibodies.

Sulfated glycoconjugates are powerful modulators of bovine sperm adhesion and release from the oviductal epithelium in vitro.

Biological monitoring of occupational exposure to 1-bromopropane by means of urinalysis for 1-bromopropane and bromide ion.

Liver Cancer in Viet Nam: Risk Estimates of Viral Infections and Dioxin Exposure in the South and North Populations.

Oral versus intravenous iron supplementation in peritoneal dialysis patients.

Toxic effects of arsenic (III) on some hematopoietic and central nervous system variables in rats and guinea pigs.

Application of the nitroblue tetrazolium-reduction method for studies on the production of reactive oxygen species in insect haemocytes.

Cepharanthine activates caspases and induces apoptosis in Jurkat and K562 human leukemia cell lines.

Measurement of plasma metabolites of (S)-5-[123I]iodo-3-(2-azetidylmethoxy)pyridine (5-IA-85380), a nicotinic acetylcholine receptor imaging agent, in nonhuman primates.

Metabolic fate of [14C]-ethanol into endothelial cell phospholipids including platelet-activating factor, sphingomyelin and phosphatidylethanol.

Modulation of cell adhesion and viability of cultured murine bone marrow cells by arsenobetaine, a major organic arsenic compound in marine animals.

Inhalation toxicity studies of the alpha,beta-unsaturated ketones: 2-cyclohexene-1-one.

Health risks posed by use of Di-2-ethylhexyl phthalate (DEHP) in PVC medical devices: a critical review.

Pretreatment of whole blood for use in immunochromatographic assays for hepatitis B virus surface antigen.

Relationship between flow rate and NO production in postnatal mesenteric arteries.

Associations between laboratory parameters and outcome of paraquat poisoning.

Glycosuria in organophosphate and carbamate poisoning.

Relapsing pancytopenia following exposure and re-exposure to cyanamide.

Acute and repeated vapor exposure toxicology of 3-(methylthio)propionaldehyde.

The antioxidant ebselen prevents neurotoxicity and clinical symptoms in a primate model of Parkinson's disease.

Purification and characterization of diquat (1,1'-ethylene-2, 2'-dipyridylum)-metabolizing enzyme from paraquat-resistant rat liver cytosol.

Cytogenetic studies of three triazine herbicides. II. In vivo micronucleus studies in mouse bone marrow.

Genotoxic effect of substituted phenoxyacetic acids.

Evaluation of the genotoxic and cytochrome P450 monooxygenase-inhibitory potential of Dicuran on procaryotic and eucaryotic test systems.

[Paraquat poisoning. A study of 29 cases and evaluation of the effectiveness of the "Caribbean scheme"].

Cancer mortality in four northern wheat-producing states.

Clinical presentations and prognostic factors of a glyphosate-surfactant herbicide intoxication: a review of 131 cases.

Effect of chlorinated hydrocarbons on expression of cytochrome P450 1A1, 1A2 and 1B1 and 2- and 4-hydroxylation of 17beta-estradiol in female Sprague-Dawley rats.

In vivo cytokine production and resistance to infection after acute exposure to 3,4-dichloropropionaniline.

Subchronic toxicity of chlorpropham (CIPC) in ICR mice.

The non-mevalonate isoprenoid biosynthesis of plants as a test system for new herbicides and drugs against pathogenic bacteria and the malaria parasite.

[Pentachlorophenol poisoning. Report of 4 cases and review of the literature].

Cholinesterase activity and hematological parameters as biomarkers of sublethal molinate exposure in *Anguilla anguilla*.

Increased lymphocyte replicative index following 2,4-dichlorophenoxyacetic acid herbicide exposure.

Effects of L-2-oxothiazolidine-4-carboxylate on the cytotoxic activity and toxicity of cyclophosphamide in mice bearing B16F10 melanoma liver metastases.

Acute metobromuron poisoning with severe associated methemoglobinemia. Identification of four metabolites in plasma and urine by LC-DAD, LC-ESI-MS, and LC-ESI-MS-MS.

[A cluster of doubts].

[An evaluation of the effect of 2,4-dichlorophenoxyacetic acid derivatives on humoral and cellular immunities].

A fatal case of chlorate poisoning: confirmation by ion chromatography of body fluids.

Quantitative determination of paraquat in a fatal intoxication by HPLC-DAD following chemical reduction with sodium borohydride.

Ligation of the bronchial artery in sheep attenuates early pulmonary changes following exposure to smoke.

Detection of micronuclei in haemocytes of zebra mussel and great ramshorn snail exposed to pentachlorophenol.

Detection of 2,4-dichlorophenoxyacetic acid (2,4-D) residues in neonates breast-fed by 2,4-D exposed dams.

Genotoxicity of paraquat: micronuclei induced in bone marrow and peripheral blood are inhibited by melatonin.

A new diquat derivative appropriate for colourimetric measurements of biological materials in the presence of paraquat.

Clinical effects and plasma concentration determination after 2,4-dichlorophenoxyacetic acid 200 mg/kg administration in the dog.

Mechanisms of toxicity, clinical features, and management of acute chlorophenoxy herbicide poisoning: a review.

The expression of surface markers on dendritic cells as indicators for the sensitizing potential of chemicals.

Ethanol potentiates hypoxic liver injury: role of hepatocyte Na(+) overload.

Time course of changes in endothelium-dependent and -independent relaxation of chronically diabetic aorta: role of reactive oxygen species.

Reactive oxygen species-specific mechanisms of drug resistance in paraquat-resistant acute myelogenous leukemia sublines.

Evaluation of a novel antimicrobial polymer for the control of porcine postweaning colibacillosis.

Inhibition of cellular action of thrombin by N3-cyclopropyl-7-[[4-(1-methylethyl)phenyl]methyl]-7H-pyrrolo[3, 2-f]quinazoline-1,3-diamine (SCH 79797), a nonpeptide thrombin receptor antagonist.

Acute ethanol decreases NPY mRNA but not POMC mRNA in the arcuate nucleus.

PCP in the blood plasma: current exposure of the population in Germany, based on data obtained in 1998.

MPP(+) injection into rat substantia nigra causes secondary glial activation but not cell death in the ipsilateral striatum.

Xenobiotic-mediated production of superoxide by primary cultures of rat cerebral endothelial cells, astrocytes, and neurones.

[Toxicity of anti-herbicide gene (BAR) transgenic rice].

Induction of rat hepatic aryl sulfotransferase (SULT1A1) gene expression by triamcinolone acetonide: impact on minoxidil-mediated hypotension.

Role of megalin (gp330) in transcytosis of thyroglobulin by thyroid cells. A novel function in the control of thyroid hormone release.

Dose-dependent effects on tissue distribution and metabolism of dimethylarsinic acid in the mouse after intravenous administration.

In vitro genotoxicity of terbutryn evaluated by the alkaline single-cell microgel-electrophoresis "comet" assay.

Catalase activity in human erythrocytes: effect of phenoxyherbicides and their metabolites.

Multiple respiratory bursts as a response to veratrate stress in *Rhodococcus erythropolis* cells.

The genetic toxicity of 3,3',4,4'-tetrachloroazobenzene and 3,3',4,4'-tetrachloroazoxybenzene: discordance between acute mouse bone marrow and subchronic mouse peripheral blood micronucleus test results.

Liver tumor-promoting activity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in TCDD-sensitive and TCDD-resistant rat strains.

Sensitivity of the SRBC PFC assay versus ELISA for detection of immunosuppression by TCDD and TCDD-like congeners.

Short-term developmental outcome of iron prophylaxis in infants.

Nonspecific stimulation of the maternal immune system. I. Effects On teratogen-induced fetal malformations.

Spinotrapezius muscle microcirculatory function: effects of surgical exteriorization.

[Membrane disorder and free radical].

[Diagnosis of acute poisoning].

Elective coronary and valve surgery without blood transfusion in patients treated with recombinant human erythropoietin (epoetin-alpha).

The impact of weekly iron supplementation on the iron status and growth of adolescent girls in Tanzania.

Protective effects of herbimycin A on hepatic reperfusion injury.

Cyanate as a hemolytic factor.

Src homology 2 domain substitution modulates the kinase and transforming activities of the Fes protein-tyrosine kinase.

Iron deficiency due to excessive therapeutic phlebotomy in hemochromatosis.

Punctate keratoderma-like lesions on the palms and soles in a patient with chloracne: a new clinical manifestation of dioxin intoxication?

Daily iron supplementation is more effective than twice weekly iron supplementation in pregnant women in Pakistan in a randomized double-blind clinical trial.

Effects of dioxin and estrogen on collagenase-3 in UMR 106-01 osteosarcoma cells.

Are ferric compounds useful in treatment of iron deficiency anemia?

Antenatal dexamethasone enhances surfactant protein synthesis in the hypoplastic lung of nitrofen-induced diaphragmatic hernia in rats.

Central versus peripheral mediation of naloxone's perfusion effects in endotoxic rats.

Selective involvement of reactive oxygen intermediates in platelet-activating factor-mediated activation of NF-kappaB.

Novel oxime derivatives of radicicol induce erythroid differentiation associated with preferential G(1) phase accumulation against chronic myelogenous leukemia cells through destabilization of Bcr-Abl with Hsp90 complex.

Effect of prenatal tetrandrine therapy on pulmonary vascular structural remodeling in the nitrofen-induced CDH rat model.

[Prophylaxis of anemia of prematurity with erythropoietin. Case control study].

Immunological and in-vivo neurological studies on a benzoic acid-specific T cell-derived antigen-binding molecule from the serum of a toluene-sensitive patient.

Changes in free and esterified cholesterol: hallmarks of acute renal tubular injury and acquired cytoresistance.

Stretch-dependent modulation of contractility and growth in smooth muscle of rat portal vein.

Rapid inhibition by sodium azide of the phosphoinositide-mediated calcium response to serotonin stimulation in human platelets: preservation in Alzheimer's disease.

Acquired progressive kinking of the hair in a Japanese girl.

Alterations of the rat mesentery vasculature in experimental diabetes.

Negative regulation of FcepsilonRI signaling by FcgammaRII costimulation in human blood basophils.

Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) is associated with hyperinsulinemia and insulin resistance.

Subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin modulates the pathophysiology of endometriosis in the cynomolgus monkey.

Dietary protection by iron against clastogenic effects of short-term exposure to arsenic in mice in vivo.

Redistribution of accumulated 2,3,7,8-tetrachlorodibenzo-p-dioxin during coxsackievirus B3 infection in the mouse.

Effect of daily and intermittent iron supplementation on iron status of high school girls.

Quantitative analysis of tyrosinase transcripts in blood.

Antiplatelet therapy alters iron requirements in hemodialysis patients.

Iron requirements in pregnancy and strategies to meet them.

Dinitrophenol, cyclosporin A, and trimetazidine modulate preconditioning in the isolated rat heart: support for a mitochondrial role in cardioprotection.

Gestational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin induces developmental defects in the rat vagina.

A method to study apoptosis in eosinophils by flow cytometry.

The t(1;12)(q21;p13) translocation of human acute myeloblastic leukemia results in a TEL-ARNT fusion.

Preconditioning-induced neuroprotection is mediated by reactive oxygen species.

"Difficult-to-treat" asthma-like symptoms in a 12-yr-old atopic female.

Ligation of IgE receptors causes an anaphylactic response and neutrophil infiltration but does not induce eosinophilic inflammation in mice.

Childhood cancer in the offspring of male sawmill workers occupationally exposed to chlorophenate fungicides.

Effects of erythropoietin therapy on iron absorption in chronic renal failure.

Iron supplementation affects the production of pro-inflammatory cytokines in IL-10 deficient mice.

Effect of adenosine on adenosine triphosphate-sensitive potassium channel during hypoxia in rat hippocampal neurons.

Response to replacement iron therapy in sideropenic individuals with recrudescing herpes labialis.

Astrocytes generate isoprostanes in response to trauma or oxygen radicals.

Active movement of T cells away from a chemokine.

Role of manganese-containing superoxide dismutase in oxidative stress and virulence of *Streptococcus pneumoniae*.

Seveso Women's Health Study: a study of the effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on reproductive health.

Transfer factors: identification of conserved sequences in transfer factor molecules.

[An analysis of the immunity indices of patients with iron-deficiency anemia].

Studies on the in vitro phototoxicity of the antidiabetes drug glipizide.

The effectiveness of weekly iron supplementation in pregnant women of rural northern Malawi.

Arsenite, arsenate and vanadate affect human erythrocyte membrane.

Parkinson's disease mortality and pesticide exposure in California 1984-1994.

Photobiological properties of nabumetone (4-[6-methoxy-2-naphthalenyl]-2-butanone), a novel non-steroidal anti-inflammatory and analgesic agent.

Improved selective, simple, and contrast staining of acidophilic neurons with vanadium acid fuchsin.

Second primary neoplasms following non-Hodgkin's lymphoma in New South Wales, Australia.

Blockade of adenosine triphosphate-sensitive potassium channels by thiamylal in rat ventricular myocytes.

Effect of TCDD on maternal toxicity and chorionic gonadotropin--bioactivity in the immediate post-implantation period of macaque.

In vivo treatment of mutant FLT3-transformed murine leukemia with a tyrosine kinase inhibitor.

Iron supplementation improves endurance after training in iron-depleted, nonanemic women.

Effect of iron therapy on the whole blood platelet aggregation in infants with iron deficiency anemia.

Iron supplementation in goitrous, iron-deficient children improves their response to oral iodized oil.

Trypsin stimulates integrin alpha(5)beta(1)-dependent adhesion to fibronectin and proliferation of human gastric carcinoma cells through activation of proteinase-activated receptor-2.

Organophosphates and their impact on the global environment.

Toxic action/toxicity.

Efficacy and acceptability of two iron supplementation schedules in adolescent school girls in Lima, Peru.

Effects of TCDD on thyroid hormone homeostasis in the rat.

Effect of helicobacter pylori eradication on sideropenic refractory anaemia in adolescent girls with Helicobacter pylori infection.

Mechanisms of parenchymal cell death in-vivo after microvascular hemorrhage.

Serum alters the uptake and relative potencies of halogenated aromatic hydrocarbons in cell culture bioassays.

Anemia: a cause of intolerance to thyroxine sodium.

Regional differences in hypoxic depolarization and swelling in hippocampal slices.

Differential effect of antiallergic drugs on IgE-mediated cutaneous reaction in passively sensitized mice.

Geographic variation in hematological variables in adult and pre fledgling herring gulls (*Larus argentatus*) and possible associations with organochlorine exposure.

Mass psychogenic illness attributed to toxic exposure at a high school.

Serum leptin levels in patients with sideropenic and pernicious anemia: the influence of anemia treatment.

Morphologic, biochemical and molecular mitochondrial changes during reperfusion phase following brief renal ischemia.

Environmental exposure to polychlorinated biphenyls (PCBs) and dioxins. Consequences for longterm neurological and cognitive development of the child lactation.

Infusion of total dose iron versus oral iron supplementation in ambulatory peritoneal dialysis patients: a prospective, cross-over trial.

Effect of iron salts, haemosiderins, and chelating agents on the lymphocytes of a thalassaemia patient without chelation therapy as measured in the comet assay.

The hypoplastic heart in congenital diaphragmatic hernia: reduced expression of basic fibroblast growth factor and platelet-derived growth factor.

Prognostic significance of anemia and role of erythropoietin in radiation therapy.

Iron status in breast-fed full-term infants.

Treatment of iron deficiency anemia and associated protein-losing enteropathy in children.

Cytokine-inducing activity and antitumor effect of a liposome-incorporated interferon-gamma-inducing molecule derived from OK-432, a streptococcal preparation.

Administration of antenatal glucocorticoids upregulates peptide growth factor gene expression in nitrofen-induced congenital diaphragmatic hernia in rats.

Serum dioxin level in relation to diabetes mellitus among Air Force veterans with background levels of exposure.

Intradialytic removal of protein-bound uraemic toxins: role of solute characteristics and of dialyser membrane.

Effects of iron salts and haemosiderin from a thalassaemia patient on oxygen radical damage as measured in the comet assay.

Lipid alterations in transient forebrain ischemia: possible new mechanisms of CDP-choline neuroprotection.

Calpain-mediated proteolytic cleavage of troponin I induced by hypoxia or metabolic inhibition in cultured neonatal cardiomyocytes.

Evaluation of beta-galactosidase activity in tissue in the presence of blood.

Human toxicokinetics of inhaled monochlorobenzene: latest experimental findings regarding re-evaluation of the biological tolerance value.

A single dose of 2,3,7,8-tetrachlorodibenzo-p-dioxin produces a time- and dose-dependent alteration in the murine bone marrow B-lymphocyte maturation profile.

Evaluation of leukocyte adhesion on polyurethanes: the effects of shear stress and blood proteins.

Chronic toxicity of arsenic in goats: clinicobiochemical changes, pathomorphology and tissue residues.

Investigations on the mutagenicity of 1,4-dichlorobenzene and its main metabolite 2,5-dichlorophenol in vivo and in vitro.

Differential effects of estrogen and progesterone on AT(1) receptor gene expression in vascular smooth muscle cells.

Endotoxin (lipopolysaccharide)-induced nitric oxide production in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated Fischer rats: detection of nitrosyl hemoproteins by EPR spectroscopy.

Angiotensin II stimulates extracellular signal-regulated kinase activity in intact pressurized rat mesenteric resistance arteries.

Metabolism of lipid peroxidation product, 4-hydroxynonenal (HNE) in rat erythrocytes: role of aldose reductase.

Inhibition of dioxin effects on bone formation in vitro by a newly described aryl hydrocarbon receptor antagonist, resveratrol.

Hemodynamic dysfunction and cytochrome P4501A mRNA expression induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin during embryonic stages of lake trout development.

Proliferation of peripheral blood mononuclear cells increases riboflavin influx.

Induction of c-Src in human blood monocytes by anti-CD98/FRP-1 mAb in an Sp1-dependent fashion.

Portosystemic shunting and persistent fetal vascular structures in aryl hydrocarbon receptor-deficient mice.

Arsenic metabolism in seaweed-eating sheep from Northern Scotland.

Determination of azide in blood and urine by gas chromatography-mass spectrometry.

Secretory phospholipase A2 receptor-mediated activation of cytosolic phospholipase A2 in murine bone marrow-derived mast cells.

The role of time in toxicology or Haber's $c \times t$ product.

Platelet-dependent modulation of polymorphonuclear leukocyte chemiluminescence.

TP receptor-mediated vasoconstriction in microperfused afferent arterioles: roles of $O_2(-)$ and NO.

Structure-activity relationships in the induction of DNA-protein cross-links by hematotoxic ring-opened benzene metabolites and related compounds in HL60 cells.

Molecular characterization and developmental expression of the aryl hydrocarbon receptor from the chick embryo.

In vivo singlet-oxygen generation in blood of chromium(VI)-treated mice: an electron spin resonance spin-trapping study.

Bioavailability and intestinal absorption of aluminum in rats: effects of aluminum compounds and some dietary constituents.

Health effects of chronic exposure to polychlorinated dibenzo-P-dioxins (PCDD), dibenzofurans (PCDF) and coplanar PCB (Co-PCB) of municipal waste incinerator workers.

Color and toxicity removal following tyrosinase-catalyzed oxidation of phenols.

Analysis of hydroxylated metabolites of PCBs (OH-PCBs) and other chlorinated phenolic compounds in whole blood from Canadian Inuit.

Excretion of hexachlorobenzene and metabolites in feces in a highly exposed human population.

Effects of arsenic on blast transformation and DNA synthesis of human blood lymphocytes.

The aryl hydrocarbon receptor has a role in the in vivo maturation of murine bone marrow B lymphocytes and their response to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Two different types of nonthrombogenic surfaces: PEG suppresses platelet adhesion ATP-independently but HEMA-St block copolymer requires ATP consumption of platelets to prevent adhesion.

Pathological changes of hepatic artery and portal vein, after allyl-alcohol and carbon tetrachloride administration. An experimental study.

Purification, characterization, and localization of an ATP diphosphohydrolase in porcine kidney.

Gonadotropin-releasing hormone (GnRH) partially reverses the inhibitory effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on ovulation in the immature gonadotropin-treated rat.

Orosomucoid has a cAMP-dependent effect on human endothelial cells and inhibits the action of histamine.

Chlorinated dibenzo-p-dioxins and dibenzofurans and the human immune system: 3. Plasma immunoglobulins and cytokines of workers with quantified moderately-increased body burdens.

Mechanism of enhancement by fucoidan and CNBr-fibrinogen digest of the activation of glu-plasminogen by tissue plasminogen activator.

Time course of arsenite-induced copper accumulation in rat kidney.

Dermal absorption and tissue disposition of 3,3',4,4'-tetrachlorobiphenyl (TCB) in an ex-vivo pig model: assessing the impact of dermal exposure variables.

Hemopoietic progenitor cells are sensitive targets of 2,3,7,8-tetrachlorodibenzo-p-dioxin in C57BL/6J mice.

Hypoxia induces transcription of the plasminogen activator inhibitor-1 gene through genistein-sensitive tyrosine kinase pathways in vascular endothelial cells.

Tyrosine phosphorylation of the p85 subunit of phosphatidylinositol 3-kinase correlates with high proliferation rates in sublines derived from the Jurkat leukemia.

Novel priming compounds of cystathionine metabolites on superoxide generation in human neutrophils.

NTP Toxicology and Carcinogenesis Studies of Pyridine (CAS No. 110-86-1) in F344/N Rats, Wistar Rats, and B6C3F1 Mice (Drinking Water Studies).

Involvement of tyrosine kinase and phosphatidylinositol 3-kinase in phagocytosis by ascidian hemocytes.

Tyrosine-kinase dependent TGF-beta and extracellular matrix expression by mechanical stretch in vascular smooth muscle cells.

In-vivo and in-vitro evidence of a carrier-mediated efflux transport system for oestrone-3-sulphate across the blood-cerebrospinal fluid barrier.

Sensitivity analysis of a physiological model for 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): assessing the impact of specific model parameters on sequestration in liver and fat in the rat.

ATP-stimulated c-fos and zif268 mRNA expression is inhibited by chemical hypoxia in a rat brain-derived type 2 astrocyte cell line, RBA-2.

The role of protein-tyrosine phosphorylation and gelatinase production in the migration and proliferation of smooth muscle cells.

Effects of polychlorinated dibenzofurans, biphenyls, and their mixture with dibenzo-p-dioxins on ovulation in the gonadotropin-primed immature rat: support for the toxic equivalency concept.

Experimental exposure of rat skin to methyl bromide: a toxicokinetic and histopathological study.

Elevated perfusion pressure upregulates endothelin-1 and endothelin B receptor expression in the rabbit carotid artery.

Systemic indicators of inorganic arsenic toxicity in four animal species.

Geldanamycin disrupts platelet-membrane structure, leading to membrane permeabilization and inhibition of platelet aggregation.

Enhancement of transport of D-melphalan analogue by conjugation with L-glutamate across bovine brain microvessel endothelial cell monolayers.

Hydroxy-urea protects erythrocytes against oxidative damage.

Influence of different hemodialysis membranes on red blood cell susceptibility to oxidative stress.

Platelet-activating factor activates mitogen-activated protein kinases through the activation of phosphatidylinositol 3-kinase and tyrosine kinase in human eosinophils.

Pressure-induced upregulation of preproendothelin-1 and endothelin B receptor expression in rabbit jugular vein in situ : implications for vein graft failure?

Less than 80% of absorbed iron is promptly incorporated into erythrocytes of infants.

[The effect of the amine salt of 2,4-dichlorophenoxyacetic acid on the cluster- and colony-forming capacity of the bone marrow and on the mononuclear phagocyte system].

Multiple logistic regression analysis of plasma paraquat concentrations as a predictor of outcome in 375 cases of paraquat poisoning.

Persistent health effects of dioxin contamination in herbicide production.

Immune parameters in biological monitoring of pesticide exposure: current knowledge and perspectives.

Butachlor is cytotoxic and clastogenic and induces apoptosis in mammalian cells.

The mammary tumor response in triazine-treated female rats: a threshold-mediated interaction with strain and species-specific reproductive senescence.

In vivo micronucleus assays on 2,4-dichlorophenoxyacetic acid and its derivatives.

Glutathione antagonized cyclophosphamide- and acrolein-induced cytotoxicity of PC3 cells and immunosuppressive actions in mice.

[Methemoglobinemia caused by accidental poisoning with metolachlor and metabromuron].

A comparison between toxicity tests using single species and a microbial process.

Effects of trifluralin on carp: biochemical and histological evaluation.

Long-term exposure to wood-preserving chemicals containing pentachlorophenol and lindane is related to neurobehavioral performance in women.

[Massive paraquat poisoning. Favorable course after treatment with n-acetylcysteine and early hemodialysis].

Pentachlorophenol exposure in women with gynecological and endocrine dysfunction.

Serum dioxin, insulin, fasting glucose, and sex hormone-binding globulin in veterans of Operation Ranch Hand.

An evaluation of the feasibility of using cytogenetic damage as a biomarker for alachlor exposure.

Dioxin exposure and human leukemias and lymphomas. Lessons from the Seveso accident and studies on industrial workers.

Eczematous erythroderma induced by cyanamide.

Selected phenolic compounds in cultivated plants: ecologic functions, health implications, and modulation by pesticides.

Content of 8-oxodG in chromosomal DNA of Sparus aurata fish as biomarker of oxidative stress and environmental pollution.

Model field study of Sumithion 50 EC and Fusilade S on pheasants.

Reproductive disturbance caused by an S-triazine herbicide in pigs.

Herbicides and adjuvants: an evolving view.

Thiobencarb toxicity and plasma AChE inhibition in the European eel.

Serological and biochemical follow-up in cattle naturally infected with *Fasciola hepatica*, and comparison with a climate model for predicting risks of fasciolosis.

Arsenic trioxide selectively induces acute promyelocytic leukemia cell apoptosis via a hydrogen peroxide-dependent pathway.

Enhanced potential for oxidative stress in hyperinsulinemic rats: imbalance between hepatic peroxisomal hydrogen peroxide production and decomposition due to hyperinsulinemia.

Paraquat elicited neurobehavioral syndrome caused by dopaminergic neuron loss.

Ethanol co-exposure increases lethality of allyl alcohol in male Sprague-Dawley rats.

[Features of the inhibition of catalase activity by 3-amino-1,2,4-triazole in erythrocytes and liver of rats with streptozotocin diabetes].

Daily injections of cyanamide enhance both ethanol-induced locomotion and brain catalase activity.

Metabolism of [(1)(4)C]prometryn in rats.

Transendothelial permeability changes induced by free radicals in an in vitro model of the blood-brain barrier.

[Effect of alcohol intoxication and aldehyde dehydrogenase inhibitors on lipid peroxidation in rat liver].

Metabolism of 7-fluoro-6-(3,4,5,6-tetrahydrophthalimido)-4-(2-propynyl)-2H-1,4-benzoxazin-3(4H)-one (S-53482, flumioxazin) in the rat: II. Identification of reduced metabolites.

[Synthesis, antimicrobial effects and adverse effects of new structures of urea, hydrogen peroxide and tensides].

Studies on the callus cultures of *Ginkgo biloba* and its metabolites-ginkgolides.

[Dietary fiber inhibits the incidence of hepatic metastasis with the anti-oxidant activity and portal scavenging functions].

Expression of Ah receptor and dioxin-related genes in human uterine endometrium in women with or without endometriosis.

Study of the photochemical and in vitro phototoxicity of chlortalidone [2-chloro-5-(1-hydroxy-3-oxo-1-isoindolinyl)benzene sulfonamide].

Benzene and non-Hodgkin's lymphoma.

Oxidation of human catalase by singlet oxygen in myeloid leukemia cells.

Reactive oxygen species in essential hypertension and non-insulin-dependent diabetes mellitus.

Acute arsenic poisoning: clinical and histopathological features.

Apamin-sensitive conductance mediates the K(+) current response during chemical ischemia in CA3 pyramidal cells.

Taurine prevents high-glucose-induced human vascular endothelial cell apoptosis.

[Biological actions of acetaldehyde].

Species differences in arsenic-mediated renal copper accumulation: a comparison between rats, mice and guinea pigs.

Arsenic-induced oxidative stress and its reversibility following combined administration of N-acetylcysteine and meso 2,3-dimercaptosuccinic acid in rats.

Olestra increases faecal excretion of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

[Use of daily and weekly ferrous sulfate to treat anemic childbearing-age women].

Geldanamycin induces heat shock protein expression through activation of HSF1 in K562 erythroleukemic cells.

Blood lipid concentrations of dioxins and dibenzofurans causing chloracne.

Erosive injury to the upper gastrointestinal tract in patients receiving iron medication: an underrecognized entity.

Animal poisonings: the 10-year experience of a veterinary analytical toxicology laboratory.

Prenatal immunotoxicant exposure and postnatal autoimmune disease.

Cyclic nucleotide phosphodiesterases (PDE) 3 and 4 in normal, malignant, and HTLV-I transformed human lymphocytes.

Iron fortification with special reference to the role of iron EDTA.

[Occupational agents and endocrine function: an update of the experimental and human evidence].

Long term substitution and specific immune responses after transfer of bovine peripheral blood lymphocytes into severe combined immunodeficient mice.

Hypoxia induces renal tubular epithelial cell apoptosis in chronic renal disease.

Protection against cytotoxic effects of arsenic by dietary supplementation with crude extract of *Emblica officinalis* fruit.

Ferrous sulfate toxicity: a review of autopsy findings.

Balloon angioplasty induces heat shock protein 70 in human blood vessels.

Connective tissue responses to calcium hydroxide-based root canal medicaments.

Low-dose oral iron absorption test in anaemic patients with and without iron deficiency determined by bone marrow iron content.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on liver phosphoenolpyruvate carboxykinase (PEPCK) activity, glucose homeostasis and plasma amino acid concentrations in the most TCDD-susceptible and the most TCDD-resistant rat strains.

Fetal tracheal occlusion in the rat model of nitrofen-induced congenital diaphragmatic hernia.

Effectiveness of primary level antenatal care in decreasing anemia at term in Tanzania.

A monoclonal antibody reactive with a 40-kDa molecule on fetal thymocytes and tumor cells blocks proliferation and stimulates aggregation and apoptosis.

p44/42 mitogen-activated protein kinase is involved in the expression of ornithine decarboxylase in leukaemia L1210 cells.

Contribution of the nucleoside transport system to doxorubicin transport in HL60 cells but not in mononuclear cells.

Central control of blood pressure by nitrergic mechanisms in organum vasculosum laminae terminalis of rat brain.

Utilization of supplemental iron by premature infants fed fortified human milk.

74As-arsenate metabolism in Flemish Giant rabbits with renal insufficiency.

Occult gastrointestinal bleeding.

A chimeric aryl hydrocarbon receptor knockout mouse model indicates that aryl hydrocarbon receptor activation in hematopoietic cells contributes to the hepatic lesions induced by 2,3,7, 8-tetrachlorodibenzo-p-dioxin.

Role of Ras/ERK-dependent pathway in the erythroid differentiation of K562 cells.

Ferrous sulfate tolerance test: a case report.

[Sodium arsenite selectively inducing apoptosis of G2 + M phase NB4 cells].

[Anemia and its treatment with peroral anti-anemia agents in women during the postpartum period].

Randomized placebo-controlled trial of Helicobacter pylori eradication for iron-deficiency anemia in preadolescent children and adolescents.

Toxic equivalency factors of polychlorinated dibenzo-p-dioxins in an ovulation model: validation of the toxic equivalency concept for one aspect of endocrine disruption.

Heat shock protein expression protects against cerebral ischemia and monoamine overload in rat heatstroke.

4-chloro-m-cresol is a trigger of malignant hyperthermia in susceptible swine.

4-chloro-m-cresol triggers malignant hyperthermia in susceptible swine at doses greatly exceeding those found in drug preparations.

Delayed acute toxicity of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin (HpCDD), after oral administration, Obeyes Haber's rule of inhalation toxicology.

Toxicity of 3,3',4,4'-tetrachloroazoxybenzene in rats and mice.

Cytoplasmic elongation and rupture in megakaryoblastic leukemia cells via activation of adhesion and motility by staurosporine on fibronectin-bound substratum.

Prevention of cytotoxic effects of arsenic by short-term dietary supplementation with selenium in mice in vivo.

Toxicity of 3,3',4,4'-tetrachloroazobenzene in rats and mice.

Evaluation of diabetes mellitus, serum glucose, and thyroid function among United States workers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Nitecapone inhibits myeloperoxidase in vitro and enhances functional performance after 8 h of ischemia in experimental heart transplantation.

The effects of low-flow ischemia on K⁺ fluxes in isolated rat hearts assessed by ⁸⁷Rb NMR.

Heat-shock protein-73 protects against small intestinal warm ischemia-reperfusion injury in the rat.

TCDD-induced anorexia and wasting syndrome in rats: effects of diet-induced obesity and nutrition.

Mechanisms of hypoxic vasodilatation of isolated rat mesenteric arteries: a comparison with metabolic inhibition.

Ex vivo evaluation of a Taylor-Couette flow, immobilized heparinase I device for clinical application.

Recombinant human erythropoietin alpha in the correction of anaemia in epidermolysis bullosa.

Cellular disposition of sulphamethoxazole and its metabolites: implications for hypersensitivity.

Protective effect of pirenoxine and U74389F on induced lipid peroxidation in mammalian lenses. An in vitro, ex vivo and in vivo study.

Establishment of a double Philadelphia chromosome-positive acute lymphoblastic leukemia-derived cell line, TMD5: effects of cytokines and differentiation inducers on growth of the cells.

A focused approach to anemia.

Effective treatment of murine leukemia with antisense poly-2'O-(2,4-dinitrophenyl)-oligoribonucleotides.

Effects of dioxins on human health: a review.

Plasmodium falciparum and Plasmodium yoelii: effect of the iron chelation prodrug dexrazoxane on in vitro cultures.

Arsenic speciation in human organs following fatal arsenic trioxide poisoning--a case report.

Dioxin-induced perturbations in tryptophan homeostasis in laboratory animals.

Bovine blood components: fractionation, composition, and nutritive value.

Human cytochrome P4501A2.

Effect of varied fermentation periods on the diabetogenic potential of toasted cassava granules.

Uremic ultrafiltrate inhibits platelet-activating factor synthesis.

Therapeutic values of different routes of administration of vitamin A with ferrous sulfate in treating deferoxamin-induced iron-deficiency anemia.

[Changes in lipid metabolism with the use of alcohol deterrent preparations].

Iron-mediated cardiotoxicity develops independently of extracellular hydroxyl radicals in isolated rat hearts.

Improved functional recovery of ischemic rat hearts due to singlet oxygen scavengers histidine and carnosine.

2,3,7,8-Tetrachlorodibenzo-p-dioxin alters cardiovascular and craniofacial development and function in sac fry of rainbow trout (*Oncorhynchus mykiss*).

Genotoxicity of iron compounds in *Salmonella typhimurium* and L5178Y mouse lymphoma cells.

Effect of exposure to 3,3',4,4',5-pentachlorobiphenyl (PCB 126) throughout gestation and lactation on development and spatial delayed alternation performance in rats.

Poly(ADP ribose) polymerase cleavage precedes neuronal death in the hippocampus and cerebellum following injury to the developing rat forebrain.

Diluted mainstream cigarette smoke condensates activate estrogen receptor and aryl hydrocarbon receptor-mediated gene transcription.

On the role of c-Jun in the induction of PAI-1 gene expression by phorbol ester, serum, and IL-1alpha in HepG2 cells.

Ubiquitinated aldolase B accumulates during starvation-induced lysosomal proteolysis.

Effects of environmental exposure to polychlorinated biphenyls and dioxins on cognitive abilities in Dutch children at 42 months of age.

Effect of overproduction of interleukin 5 on dinitrofluorobenzene-induced allergic cutaneous response in mice.

[Changes in the erythropoiesis in normal mice after transplantation of peritoneal cells from syngeneic donors with prolonged sodium arsenite intoxication].

Reversible alteration of morphology in an invertebrate erythrocyte: properties of the natural inducer and the cellular response.

Vascular endothelial growth factor activates MAP kinase and enhances collagen synthesis in human mesangial cells.

The sources, fate, and toxicity of chemical warfare agent degradation products.

Bone marrow stromal cell cytochrome P4501B1 is required for pre-B cell apoptosis induced by 7,12-dimethylbenz[a]anthracene.

Molecular cloning and characterization of a hemolymph clottable protein from tiger shrimp (*Penaeus monodon*).

The role of plasma semicarbazide-sensitive amine oxidase in allylamine and beta-aminopropionitrile cardiovascular toxicity: mechanisms of myocardial protection and aortic medial injury in rats.

The role of polycyclic aromatic hydrocarbon metabolism in dimethylbenz[a]anthracene-induced pre-B lymphocyte apoptosis.

NTP Toxicology and Carcinogenesis Studies of Triethanolamine (CAS No. 102-71-6) in F344 Rats and B6C3F1 Mice (Dermal Studies).

Myeloperoxidase-catalyzed redox-cycling of phenol promotes lipid peroxidation and thiol oxidation in HL-60 cells.

Molecular cloning and characterization of a birch pollen minor allergen, Bet v 5, belonging to a family of isoflavone reductase-related proteins.

Trimethylamine oxide transport across plasma membranes of elasmobranch erythrocytes.

Acute peroxide treatment of rat hippocampal slices induces adenosine-mediated inhibition of excitatory transmission in area CA1.

Identification and immunolocalization of two isoforms of ATP-diphosphohydrolase (ATPDase) in the pig immune system.

Identification of two penicillin-binding multienzyme complexes in *Haemophilus influenzae*.

[Significance of urinary concentrations of S-benzyl-N-acetylcysteine (S-BMA) in subjects exposed to toluene].

Maintenance of GPIIb-IIIa avidity supporting "irreversible" fibrinogen binding is energy-dependent.

Estimating amounts of toluene inhaled by workers with protective mask using biological indicators of toluene.

Induction of negative regulators of haematopoiesis in human bone marrow cells by HLA-DR cross-linking.

Oral phosphate binders: phosphate binding capacity of iron (III) hydroxide complexes containing saccharides and their effect on the urinary excretion of calcium and phosphate in rats.

Flow cytometric procedure to detect apoptosis of bovine polymorphonuclear leukocytes in blood.

Hair concentrations of calcium, iron, and zinc in pregnant women and effects of supplementation.

Nitric oxide acts as a postsynaptic signaling molecule in calcium/calmodulin-induced synaptic potentiation in hippocampal CA1 pyramidal neurons.

Stimulation of Na⁺-K⁺-2Cl⁻ cotransport by arsenite in ferret erythrocytes.

Mechanisms of D-aspartate release under ischemic conditions in mouse hippocampal slices.

Expression and activity of cyclic and linear analogues of esculentin-1, an anti-microbial peptide from amphibian skin.

Phytase improves iron bioavailability for hemoglobin synthesis in young pigs.

Immunotargeting of glucose oxidase: intracellular production of H₂O₂ and endothelial oxidative stress.

Thrombin inhibits active sodium-potassium transport in porcine lens.

Cortical NADH during pharmacological manipulations of the respiratory chain and spreading depression in vivo.

In vivo and in vitro evidence of blood-brain barrier transport of a novel cationic arginine-vasopressin fragment 4-9 analog.

Reference values and human biological monitoring values for environmental toxins. Report on the work and recommendations of the Commission on Human Biological Monitoring of the German Federal Environmental Agency.

Factors affecting organochlorine contaminant concentrations in milk and blood of northern fur seal (*Callorhinus ursinus*) dams and pups from St. George Island, Alaska.

Choline uptake by mouse brain capillary endothelial cells in culture.

Hypoxic hypometabolism in the anesthetized turtle, *Trachemys scripta*.

Role of O⁶-alkylguanine-DNA alkyltransferase in protecting against cyclophosphamide-induced toxicity and mutagenicity.

Uptake of vitamin A in macrophages from physiologic transport proteins: role of retinol-binding protein and chylomicron remnants.

Activation of Akt/protein kinase B after stimulation with angiotensin II in vascular smooth muscle cells.

Heterocycle-peptide hybrid compounds. Aminotriazole-containing agonists of the thrombin receptor (PAR-1).

Gender difference in baroreflex-mediated bradycardia in young rats: role of cardiac sympathetic and parasympathetic components.

[Analysis of all PCB congeners in breast milk and blood of Yusho patients].

Cellular signalling and free-radical modulating activities of the novel peptidomimetic L-glutamyl-histamine.

Superficial buffer barrier and preferentially directed release of Ca²⁺ in canine airway smooth muscle.

Thrombospondin-1 induces tyrosine phosphorylation of adherens junction proteins and regulates an endothelial paracellular pathway.

Pasteurella haemolytica leukotoxin and endotoxin induced cytokine gene expression in bovine alveolar macrophages requires NF-kappaB activation and calcium elevation.

Active transport of fentanyl by the blood-brain barrier.

Polychlorinated dibenzo-p-dioxins and related compounds: correlations of levels in human tissues and in blood.

Dioxin and dibenzofuran concentrations in adipose tissue of a general population from Tarragona, Spain.

Cross-talk between the aryl hydrocarbon receptor and hypoxia inducible factor signaling pathways. Demonstration of competition and compensation.

Sequences within fibrinogen and intercellular adhesion molecule-1 (ICAM-1) modulate signals required for mitogenesis.

NTP Toxicology and Carcinogenesis Studies of Pentachlorophenol (CAS NO. 87-86-5) in F344/N Rats (Feed Studies).

Mechanisms for regulating platelet high density lipoprotein type3 binding sites: evidence that binding sites are downregulated by a protein kinase C-dependent mechanism.

Human immunodeficiency virus-1 infection requires pertussis toxin sensitive G-protein-coupled signalling and mediates cAMP downregulation.

Regulation of cytochrome P4501B1 (CYP1B1) in mouse embryo fibroblast (C3H10T1/2) cells by protein kinase C (PKC).

Investigation of a whole blood fluidized bed Taylor-Couette flow device for enzymatic heparin neutralization.

Central nervous system effects of intranasally administered insulin during euglycemia in men.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin or 2,2',4,4',5,5'-hexachlorobiphenyl on vitamin K-dependent blood coagulation in male and female WAG/Rij-rats.

Regulation of IL-8RA (CXCR1) expression in polymorphonuclear leukocytes by hypoxia/reoxygenation.

Dioxin and dibenzofuran concentrations in blood of a general population from Tarragona, Spain.

Low-density lipoprotein enhances platelet secretion via integrin-alphaIIb beta3-mediated signaling.

Hydride-Meisenheimer complex formation and protonation as key reactions of 2,4,6-trinitrophenol biodegradation by *Rhodococcus erythropolis*.

Prevention of reactive oxygen-induced endothelial cell injury by blocking its process.

Prophenoloxidase from brown shrimp (*Penaeus californiensis*) hemocytes.

A comparison of 1H8- and 2H8-toluene toxicokinetics in men.

Chronic dietary toxicity study on 2,4-dichlorophenoxybutyric acid in the dog.

Cytogenetic characteristics of herbicide production workers in Ufa.

The nature of antioxidant defense mechanisms: a lesson from transgenic studies.

Airspace configuration at different transpulmonary pressures in normal and paraquat-induced lung injury in rats.

Acute 2,4-D poisoning in tench (*Tinca tinca* L.): lesions in the hematopoietic portion of the kidney.

The role of glutathione S-transferases as a defense against reactive electrophiles in the blood vessel wall.

Urinary excretion and pharmacokinetics of acrolein and its parent drug cyclophosphamide in bone marrow transplant patients.

Lack of genotoxicity of the herbicide atrazine in cultured human lymphocytes.

Two cases of glufosinate poisoning with late onset convulsions.

The organochlorine herbicide chloridazon interacts with cell membranes.

Paraquat: a useful tool for the in vivo study of mechanisms of neuronal cell death.

Effects of the pesticides carbofuran, chlorpyrifos, dimethoate, lindane, triallate, trifluralin, 2,4-D, and pentachlorophenol on the metabolic endocrine and reproductive endocrine system in ewes.

Reproductive effects in mink (*Mustela vison*) exposed to the pesticides Lindane, Carbofuran and Pentachlorophenol in a multigeneration study.

Effects of G6PD overexpression in NIH3T3 cells treated with tert-butyl hydroperoxide or paraquat.

Second follow-up of a Dutch cohort occupationally exposed to phenoxy herbicides, chlorophenols, and contaminants.

Blood lipid concentrations of dioxins and furans in a sample of BASF employees included in the IARC registry of workers exposed to phenoxy acid herbicides and/or chlorophenols.

Exposure to Agent Orange and occurrence of soft-tissue sarcomas or non-Hodgkin lymphomas: an ongoing study in Vietnam.

Acute 2,4-dichlorophenoxyacetic acid intoxication in broiler chicks.

Melatonin reduces paraquat-induced genotoxicity in mice.

[An Italian multicenter case-control study on malignant neoplasms of the hematolymphopoietic system. Hypothesis and preliminary results on work-related risks. WILL (Working Group on Hematolymphopoietic Malignancies in Italy)].

Acute paraquat poisoning: increased toxicity in one case with high alcohol intake.

Effects of edifenphos and glyphosate on the immune response and protein biosynthesis of bolti fish (*Tilapia nilotica*).

Aneuploidy induced by dimethylarsinic acid in mouse bone marrow cells.

Effect of 2,4-dichlorophenoxyacetic acid, trifluralin and triallate herbicides on immune function.

In vivo studies on genotoxicity of a soil fumigant, dazomet.

Micronuclei analysis in lymphocytes of pesticide sprayers from Concepción, Chile.

Regional vulnerability to endogenous and exogenous oxidative stress in organotypic hippocampal culture.

Chlorinated hydrocarbons in women with repeated miscarriages.

Pulmonary arterioles from rats with congenital diaphragmatic hernias are hypoplastic but not hyperresponsive.

Chloracne and morbidity after dioxin exposure (preliminary results).

Nitro blue tetrazolium inhibits but does not mimic hypoxic vasoconstriction in isolated rabbit lungs.

Feeding fish oil to rats accelerates the metabolism of hexachlorobenzene.

Cytotoxic metabolites produced by a fungal strain from a Sargassum alga.

Quantitative cancer risk assessment for dioxins using an occupational cohort.

Exposure to dioxin and nonneoplastic mortality in the expanded IARC international cohort study of phenoxy herbicide and chlorophenol production workers and sprayers.

Effect of pentachlorophenol on immune function.

Chemical speciation of arsenic in serum of uraemic patients.

Erythrocyte antioxidant systems protect cultured endothelial cells against oxidant damage.

Microtubules in Plasmodium falciparum merozoites and their importance for invasion of erythrocytes.

Response of the NAD(P)H-oxidising flavohaemoglobin (Hmp) to prolonged oxidative stress and implications for its physiological role in Escherichia coli.

Headspace solid-phase microextraction and gas chromatographic determination of dinitroaniline herbicides in human blood, urine and environmental water.

Herbicide residues in leaves of Erythroxylum coca var. coca plants treated with soil-applied tebuthiuron and hexazinone.

Exposure to inorganic arsenic metabolites during early human development.

Differential xenobiotic induction of CYP2A5 in mouse liver, kidney, lung, and olfactory mucosa.

Reaffirmation that metabolism of polyamines by bovine plasma amine oxidase occurs strictly at the primary amino termini.

Cultured renal epithelial cells from birds and mice: enhanced resistance of avian cells to oxidative stress and DNA damage.

Oxidative stress and hypoxia/reoxygenation trigger CD95 (APO-1/Fas) ligand expression in microglial cells.

Clusterin protects against oxidative stress in vitro through aggregative and nonaggregative properties.

Electronic spin resonance detection of superoxide and hydroxyl radicals during the reductive metabolism of drugs by rat brain preparations and isolated cerebral microvessels.

Determination of chlorpyrifos, chlorpyrifos oxon, and 3,5,6-trichloro-2-pyridinol in rat and human blood.

Periplasmic copper-zinc superoxide dismutase protects *Haemophilus ducreyi* from exogenous superoxide.

Experimental study of oxidative DNA damage.

Expression of mucin-associated sulfo-Lea carbohydrate epitopes on human colon carcinoma cells.

Antihypertensive and vasodilator actions of antioxidants in spontaneously hypertensive rats.

Concentrated cresol intoxication.

Enantiomers of flurbiprofen can distinguish key pathophysiological steps of NSAID enteropathy in the rat.

Correlation analysis of pesticide use data and cancer incidence rates in California counties.

Influence of aromatic hydrocarbon receptor-mediated events on the genotoxicity of cigarette smoke condensate.

Induction of heat shock protein-73 reduces ischemia-reperfusion injury in rat small intestine.

PKC and tyrosine kinase involvement in amyloid beta (25-35)-induced chemotaxis of microglia.

Serum transferrin receptor and transferrin receptor-ferritin index identify healthy subjects with subclinical iron deficits.

Heat shock proteins: protective effect and potential therapeutic use (review).

Low-dose oral iron absorption test: establishment of a reference interval.

Quantitation of CD38 expression using QuantiBRITE beads.

Effects of environmental exposure to polychlorinated biphenyls and dioxins on birth size and growth in Dutch children.

Pathways for eosinophil lipid body induction: differing signal transduction in cells from normal and hypereosinophilic subjects.

Lipopolysaccharide-induced desensitization of junB gene expression in a mouse macrophage-like cell line, P388D1.

Genotoxicity in workers exposed to methyl bromide.

Sensitivity of reticulocyte indices to iron therapy in an intensely training athlete.

Altered regulation of L-type channels by protein kinase C and protein tyrosine kinases as a pathophysiologic effect in retinal degeneration.

Binding of the epoxide cryptophycin analog, LY355703 to albumin and its effect on in vitro antiproliferative activity.

Heat shock protein expression protects against death following exposure to heatstroke in rats.

Diagnosis of von Willebrand disease type 2N: a simplified method for measurement of factor VIII binding to von Willebrand factor.

P-selectin mediates adhesion of the human melanoma cell line NKI-4: identification of glycoprotein ligands.

Activation of MMP-2 by human GCT23 giant cell tumour cells induced by osteopontin, bone sialoprotein and GRGDSP peptides is RGD and cell shape change dependent.

Subchronic/chronic toxicity of a mixture of four chlorinated dibenzo-p-dioxins in rats. I. Design, general observations, hematology, and liver concentrations.

Role of tyrosine phosphorylation in leptin activation of ATP-sensitive K⁺ channels in the rat insulinoma cell line CRI-G1.

Suppression of multidrug resistance via inhibition of heat shock factor by quercetin in MDR cells.

Occupational exposures, animal exposure and smoking as risk factors for hairy cell leukaemia evaluated in a case-control study.

Transgenic mice with elevated level of CuZnSOD are highly susceptible to malaria infection.

Effects of glucose deprivation, chemical hypoxia, and simulated ischemia on Na⁺ homeostasis in rat spinal cord astrocytes.

[Immunotoxicology in occupational and environmental medicine: prospectives, limitations, and research objectives].

Identification of deoxy-D-fructosyl phosphatidylethanolamine as a non-enzymic glycation product of phosphatidylethanolamine and its occurrence in human blood plasma and red blood cells.

Respiratory and cardiovascular effects of the mu-opioid receptor agonist [Lys7]dermorphin in awake rats.

Atherogenic lipoproteins enhance mesangial cell expression of platelet-derived growth factor: role of protein tyrosine kinase and cyclic AMP-dependent protein kinase A.

Determinant analysis of IgE and IgG4 antibodies and T cells specific for bovine alpha(s)1-casein from the same patients allergic to cow's milk: existence of alpha(s)1-casein-specific B cells and T cells characteristic in cow's-milk allergy.

Iron nutritional status is improved in Brazilian preterm infants fed food cooked in iron pots.

Transgene expression kinetics after transfection with cationic phosphonolipids in hematopoietic non adherent cells.

[Clinical experience with iron supplementation in pregnancy].

Bioavailability of the iron formulated as natural ferric protein (TM/FMOA) and natural ferric protein + folic acid (TM/FMOA+FOL).

Estimation of the cumulated exposure to polychlorinated dibenzo-p-dioxins/furans and standardized mortality ratio analysis of cancer mortality by dose in an occupationally exposed cohort.

The Seveso studies on early and long-term effects of dioxin exposure: a review.

Activation of tissue-factor gene expression in breast carcinoma cells by stimulation of the RAF-ERK signaling pathway.

Prevention of iron-deficiency anemia: comparison of high- and low-iron formulas in term healthy infants after six months of life.

Inhibition of vascular and epithelial differentiation in murine nitrofen-induced diaphragmatic hernia.

Protein kinase C activity is required for aryl hydrocarbon receptor pathway-mediated signal transduction.

Epidermal growth factor protects neuronal cells in vivo and in vitro against transient forebrain ischemia- and free radical-induced injuries.

Herbimycin A accelerates the induction of apoptosis following etoposide treatment or gamma-irradiation of bcr/abl-positive leukaemia cells.

Arsenate toxicity in human erythrocytes: characterization of morphologic changes and determination of the mechanism of damage.

A computer-aided 3-D geometry of acute and chronic zonal necrosis: three-D tangent counting applied in an attempt to re-examine the structure of the human liver.

Plasma hydrogen peroxide production in hypertensives and normotensive subjects at genetic risk of hypertension.

Parvovirus B19 infection and unresponsiveness to erythropoietin therapy in haemodialysis patients.

Role of altered arachidonic acid metabolism in 2,3,7, 8-tetrachlorodibenzo-p-dioxin-induced immune suppression in C57Bl/6 mice.

Microangiopathic hemolytic anemia as a complication of diabetes mellitus.

Hypoferremia, absent bone marrow macrophage iron, and microcytic anemia with minimal response to iron therapy: an acquired disorder of iron metabolism.

Quantitative assessment of color vision impairment in workers exposed to toluene.

Effective utilization of erythropoietin with intravenous iron therapy.

Dioxin exposure and non-malignant health effects: a mortality study.

Acute intoxication with trichloroethene: clinical symptoms, toxicokinetics, metabolism, and development of biochemical parameters for renal damage.

A useful method to evaluate bone resorption inhibitors, using osteoclast-like multinucleated cells.

Role of protein tyrosine phosphorylation in etoposide-induced apoptosis and NF-kappa B activation.

[Management of hydatid disease of the lung].

Endotracheal inhalatory sodium nitroprusside in severely hypoxic newborns.

An unusual exposure to methyl bromide leading to fatality.

Tyro 3 receptor tyrosine kinase and its ligand, Gas6, stimulate the function of osteoclasts.

Environmental and occupational aspects on the etiology of non-Hodgkin's lymphoma.

Protective effects of nicaraven, a new hydroxyl radical scavenger, on the endothelial dysfunction after exposure of pig coronary artery to hydroxyl radicals.

The absorption of iron, calcium, phosphorus, magnesium, copper and zinc in the jejunum-ileum of control and iron-deficient rats.

Effect of prenatal glucocorticoids on pulmonary vascular muscularisation in nitrofen-induced congenital diaphragmatic hernia.

Collagens in the liver extracellular matrix bind hepatocyte growth factor.

Use of Mfu-galactoside enzymatic activity as ecotoxicological endpoint on rainbow trout red blood cells.

Current approaches toward chemical mixture studies at the National Institute of Environmental Health Sciences and the U.S. National Toxicology Program.

Bone marrow stromal cells constitutively express high levels of cytochrome P4501B1 that metabolize 7,12-dimethylbenz[a]anthracene.

Transient and prolonged increase in endothelial permeability induced by histamine and thrombin: role of protein kinases, calcium, and RhoA.

Anaphylatoxins C5a and C3a induce nuclear factor kappaB activation in human peripheral blood monocytes.

Calcium is required for quasi-lipoxygenase activity of hemoproteins.

The EC domains of human fibrinogen₄₂₀ contain calcium binding sites but lack polymerization pockets.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on the lymphatic absorption of a single oral dose of [3H]retinol and on the intestinal retinol esterification in the rat.

Involvement of tyrosine phosphorylation and protein kinase C in the activation of phospholipase D by H₂O₂ in Swiss 3T3 fibroblasts.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazoxybenzene (CAS No. 21232-47-3) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

NTP Technical Report on the Toxicity Studies of 3,3',4,4'-Tetrachloroazobenzene (CAS No. 14047-09-7) Administered by Gavage to F344/N Rats and B6C3F1 Mice.

Hepatobiliary transport kinetics of HSR-903, a new quinolone antibacterial agent.

Cytochrome P450 1B1: a major P450 isoenzyme in human blood monocytes and macrophage subsets.

Purification from bovine serum of a survival-promoting factor for cultured central neurons and its identification as selenoprotein-P.

Invasion of aortic and heart endothelial cells by *Porphyromonas gingivalis*.

Angiotensin II-stimulated collagen gel contraction by heart fibroblasts: role of the AT1 receptor and tyrosine kinase activity.

Fibronectin stimulates transcription of the platelet-derived growth factor beta-receptor in cultured rat aortic smooth muscle cells.

Further studies on Zn²⁺-mediated domain-domain communication in human erythrocyte band 3.

2,3,7,8-Tetrachlorodibenzo-p-dioxin in pregnant Long Evans rats: disposition to maternal and embryo/fetal tissues.

Partitioning of dioxins, dibenzofurans, and coplanar PCBS in blood, milk, adipose tissue, placenta and cord blood from five American women.

Decrease in levels and body burden of dioxins, dibenzofurans, PCBS, DDE, and HCB in blood and milk in a mother nursing twins over a thirty-eight month period.

Postnatal exposure to chlorinated dioxins and related chemicals on thyroid hormone status in Japanese breast-fed infants.

Effect of herbimycin A on tyrosine kinase receptors and platelet derived growth factor (PDGF)-induced signal transduction.

Contaminants in eggs of colonial waterbirds and hepatic cytochrome P450 enzyme levels in pipped tern embryos, Washington State.

Regulation of adenyl cyclase activity in human peripheral blood mononuclear cells: effects of protein kinase inhibitors and of a calcium ionophore.

Cyclophosphamide cystitis as a model of visceral pain in rats: a c-fos and Krox-24 study at telencephalic levels, with a note on pituitary adenylate cyclase activating polypeptide (PACAP).

Interleukin 3 prevents delayed neuronal death in the hippocampal CA1 field.

Quantitative low-dose assessment of seafood toxin, domoic acid, in the rat brain: application of physiologically-based pharmacokinetic (PBPK) modeling.

Secretion of a Fungal Extracellular Catalase by *Claviceps purpurea* During Infection of Rye: Putative Role in Pathogenicity and Suppression of Host Defense.

Full-spreading platelets induced by the recombinant rhodostomin are via binding to integrins and correlated with FAK phosphorylation.

Elucidation of the amino acid sequence of a crustacean hyperglycaemic hormone from the spiny lobster, *Jasus lalandii*.

Serum and urinary boron levels in rats after single administration of sodium tetraborate.

Subchronic/chronic toxicity of a mixture of four chlorinated dibenzo-p-dioxins in rats. II. Biochemical effects.

Enhancement by copper, zinc superoxide dismutase of DNA damage and mutagenicity with hydrogen peroxide.

Human in vivo and in vitro hydroquinone topical bioavailability, metabolism, and disposition.

Radiation inactivation suggests that human multidrug resistance-associated protein 1 occurs as a dimer in the human erythrocyte membrane.

Mycobacterium tuberculosis mannose-capped lipoarabinomannan can induce NF-kappaB-dependent activation of human immunodeficiency virus type 1 long terminal repeat in T cells.

Hydrogen peroxide activates mitogen-activated protein kinases and Na⁺-H⁺ exchange in neonatal rat cardiac myocytes.

Metabolism of inorganic arsenic in children with chronic high arsenic exposure in northern Argentina.

Hypotonic-stimulated taurine efflux in skate erythrocytes: regulation by tyrosine phosphatase activity.

Erythrocyte defenses against hydrogen peroxide: the role of ascorbic acid.

AMPA receptor mediated excitotoxicity in neocortical neurons is developmentally regulated and dependent upon receptor desensitization.

Interleukin 1beta and interleukin 6, but not tumor necrosis factor alpha, inhibit insulin-stimulated glycogen synthesis in rat hepatocytes.

Profiles of Great Lakes critical pollutants: a sentinel analysis of human blood and urine. The Great Lakes Consortium.

Similarities in the metabolism of alloxan and dehydroascorbate in human erythrocytes.

A selective historical review of congener-specific human tissue measurements as sensitive and specific biomarkers of exposure to dioxins and related compounds.

Occupational exposure to dioxins by thermal oxygen cutting, welding, and soldering of metals.

PCDD/PCDF indoor exposure in day-care centers and PCDD/PCDF blood concentrations of female employees.

Immune cell functions in industrial workers after exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: dissociation of antigen-specific T-cell responses in cultures of diluted whole blood and of isolated peripheral blood mononuclear cells.

Immunologic findings in workers formerly exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin and its congeners.

Expression of functional aromatic hydrocarbon receptor and aromatic hydrocarbon nuclear translocator proteins in murine bone marrow stromal cells.

The effects of serum iminodipeptides and prednisolone on superoxide generation and tyrosyl phosphorylation of proteins in neutrophils from a patient with prolidase deficiency.

Flow cytometric analyses in embryogenic and non-embryogenic callus lines of *Cyclamen persicum* Mill.: relation between ploidy level and competence for somatic embryogenesis.

[Assay for oxidative stress injury by detection of luminol-enhanced chemiluminescence in a freshly obtained blood sample: a study to follow the time course of oxidative injury].

The effect of tyrosine kinase inhibitors on IgE-mediated histamine release from human lung mast cells and basophils.

Effects of some thiol chelators on enzymatic activities in blood, liver and kidneys of acute arsenic (III) exposed mice.

Differential involvement of tyrosine and serine/threonine kinases in platelet integrin α IIb β 3 exposure.

Alterations in human B cell calcium homeostasis by polycyclic aromatic hydrocarbons: possible associations with cytochrome P450 metabolism and increased protein tyrosine phosphorylation.

Regulation of sulfotransferase gene expression by glucocorticoid hormones and xenobiotics in primary rat hepatocyte culture.

Cell-specific differences in the susceptibility of potential cellular targets of human origin derived from blood and lung following treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

[Effect on the microbicidal efficacy of formaldehyde, glutardialdehyde, peracetic acid, chloramine T (N-chloro-4-toluenesulfonamide), m-cresol, ethanol and benzyldimethyldodecacylammonium bromide by blood (model experiments for chemical disinfection of instruments)].

Ets-1 is an early response gene activated by ET-1 and PDGF-BB in vascular smooth muscle cells.

Accumulation of ascorbate by endocrine-regulated and glucose-sensitive transport of dehydroascorbic acid in luteinized rat ovarian cells.

Na⁺-dependent and phlorizin-inhibitable transport of glucose and cycasin in brain endothelial cells.

Metabolic Study of Isoproturon in Goats Following a Single Oral Administration: Toxicokinetics and Recovery.

Mixed effects of 2,6-dithiopurine against cyclophosphamide mediated bladder and lung toxicity in mice.

Vascular endothelial growth factor/vascular permeability factor enhances vascular permeability via nitric oxide and prostacyclin.

IL1 β and TNF α Induction of Monocyte Chemoattractant Protein-1 (MCP-1/JE) in Bone Marrow Stromal Cells: The Role of Protein Kinase C (PKC) and Protein Tyrosine Kinase (PTK) Activity.

3,4 Dichloroaniline-haemoglobin adducts in humans: preliminary data on agricultural workers exposed to propanil.

Modulating effects of thyroid state on the induction of biotransformation enzymes by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Effects of potassium antimony tartrate on rat erythrocyte phosphofructokinase activity.

Drug metabolizing enzyme activities and superoxide formation in primary and immortalized rat brain endothelial cells.

Determining sodium azide concentration in blood by ion chromatography.

S-p-toluymercapturic acid in the urine of workers exposed to toluene: a new biomarker for toluene exposure.

Uncouplers of mitochondrial oxidative phosphorylation are not substrates of the erythrocyte glutathione-S-conjugate pump.

Mortality of power workers exposed to phenoxy herbicides and polychlorinated biphenyls in waste transformer oil.

Male pesticide exposure and pregnancy outcome.

Respiratory symptoms, spirometry and chronic occupational paraquat exposure.

Haemoperfusion treatment in pigs experimentally intoxicated by paraquat.

Hemotoxicity of chlorpropham (CIPC) in F344 rats.

A review of epidemiologic studies of triazine herbicides and cancer.

Laryngeal survey in glyphosate intoxication: a pathophysiological investigation.

Cyanamide-induced granulocytopenia.

Sex-dependent differences in the disposition of 2,4-dichlorophenoxyacetic acid in Sprague-Dawley rats, B6C3F1 mice, and Syrian hamsters.

Cardiovascular effects of a herbicide containing glufosinate and a surfactant: in vitro and in vivo analyses in rats.

Effect of roundup and tordon 202C herbicides on antibody production in mice.

Propanil poisoning.

The oral and intratracheal toxicities of ROUNDUP and its components to rats.

In vivo studies on genotoxicity of pure and commercial linuron.

Pesticides and cancer.

Serum dioxin and diabetes mellitus in veterans of Operation Ranch Hand.

A fatal case of drinking and cyanamide intake.

Detection of drugs and poisons in postmortem tissues--determination of paraquat in tissues of rabbits buried underground.

Effects of dichlobenil on ultrastructural morphology and cell replication in the mouse olfactory mucosa.

Increased levels of PCP in blood can lead to severe T lymphocyte dysfunction.

Evaluation of renal function in rhesus monkeys and comparison to beagle dogs following oral administration of the organic acid triclopyr (3,5,6-trichloro-2-pyridinyloxyacetic acid).

Enhanced cytotoxicity of alkyl viologens and N,N'-diamino analogs toward cultured murine leukemia L1210 cells under vortex-stirring with a high molecular weight polyacrylic acid.

Effects of a diphenyl-ether herbicide, oxyfluorfen, on human BFU-E/CFU-E development and haemoglobin synthesis.

[Environmental pollution, human exposure and its health effect of sodium pentachlorophenate in schistosomiasis prevalent area].

Neurotoxicity of paraquat and triphenyltin in the earthworm, *Eisenia fetida* Sav. A histo- and cytopathological study.

[Ultrastructural changes in the wall and microcirculatory bed of the small intestinal villi of rats exposed to organochlorine toxicant].

Analyses of exposure to polychlorinated dibenzo-p-dioxins, furans, and hexachlorocyclohexane and different health outcomes in a cohort of former herbicide-producing workers in Hamburg, Germany.

Genotoxic evaluation of the herbicide paraquat in cultured human lymphocytes.

Inhibition of intracellular Ca²⁺ signalling, cytotoxicity and antitumor activity of the herbicide oryzalin and its analogues.

[Retrospective study of morbidity in a group professionally exposed to chlorotriazine herbicides].

Comparison of HPLC and CE for the analysis of dichlorprop in a case of intoxication.

Genotoxicity of select herbicides in *Rana catesbeiana* tadpoles using the alkaline single-cell gel DNA electrophoresis (comet) assay.

In vivo genotoxicity of selected herbicides in the mouse bone-marrow micronucleus test.

Comparative pharmacokinetics of [14C]metosulam (N-[2,6-dichloro-3-methylphenyl]-5,7-dimethoxy-1,2,4-triazolo[1,5a]-pyrimidine-2-sulfonamide) in rats, mice and dogs.

Metabolism of arsenic after acute occupational arsine intoxication.

Protection against oxidative damage of erythrocyte membrane by the flavonoid quercetin and its relation to iron chelating activity.

Performance characteristics of combined haemodialysis/haemoperfusion system for removal of blood toxins.

Acceleration of hypertensive cerebral injury by the inhibition of xanthine-xanthine oxidase system in stroke-prone spontaneously hypertensive rats.

Antioxidant defense system in differentially hydrogen peroxide sensitive L5178Y sublines.

Pentachlorophenol dermal absorption and disposition from soil in swine: effects of occlusion and skin microorganism inhibition.

[Effect of activity of semicarbazide-sensitive aminooxidases and cellular glutathione on the cytotoxic effect of allylamine, acrolein, and formaldehyde in human cultured endothelial cells].

SlyA, a transcriptional regulator of *Salmonella typhimurium*, is required for resistance to oxidative stress and is expressed in the intracellular environment of macrophages.

[Study of magnetic microspheres for purging cancer cells from bone marrow. II. Preparation of polystyrene magnetic microspheres.].

Mustard oil and garlic extract as inhibitors of sodium arsenite-induced chromosomal breaks in vivo.

Entacapone, a novel catechol-O-methyltransferase inhibitor for Parkinson's disease, does not impair mitochondrial energy production.

Beta-estradiol protects hippocampal CA1 neurons against transient forebrain ischemia in gerbil.

Iron pre-load for major joint replacement.

Abrogation of IL-3 requirements and stimulation of hematopoietic cell proliferation in vitro and in vivo by carboxylic acids.

A collagen peptide motif activates tyrosine kinase-dependent calcium signalling pathways in human osteoblast-like cells.

Changes in collagen phenotypes during progression and regression of cardiac hypertrophy.

Newborn infants diagnosed as neurologically abnormal with relation to PCB and dioxin exposure and their thyroid-hormone status.

Effect of advanced glycation end product-modified albumin on tissue factor expression by monocytes. Role of oxidant stress and protein tyrosine kinase activation.

Use of estrogen therapy in a patient with gastrointestinal bleeding secondary to arteriovenous malformations.

Dioxin exposure and cancer risk: a 15-year mortality study after the "Seveso accident".

Mutational evidence for control of cell adhesion through integrin diffusion/clustering, independent of ligand binding.

Alterations in the developing immune system of the F344 rat after perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: II. Effects on the pup and the adult.

Absorption of iron from grape-molasses and ferrous sulfate: a comparative study in normal subjects and subjects with iron deficiency anemia.

Morphologic characteristics of endometriosis in the mouse model: application to toxicology.

Possible involvement of rapamycin-sensitive pathway in Bcl-2 expression in human neuroblastoma SH-SY5Y cells.

Production of iron-fortified bread employing some selected natural iron sources.

Lateral hypothalamic injection of GABA(A) antagonist induces gastric vagus-mediated hypocalcemia in the rat.

Iron supplementation in pregnancy: is less enough? A randomized, placebo controlled trial of low dose iron supplementation with and without heme iron.

Subchronic/chronic toxicity of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin (HpCDD) in rats. Part I. Design, general observations, hematology, and liver concentrations.

Markers of masked iron deficiency and effectiveness of EPO therapy in chronic renal failure.

Haemophilus somnus immunoglobulin binding proteins and surface fibrils.

Randomised placebo-controlled trial of iron supplementation and malaria chemoprophylaxis for prevention of severe anaemia and malaria in Tanzanian infants.

[Acute myeloblastic leukemia showing pronounced skin infiltration during administration of low-dose cytarabine and etoposide with granulocyte colony-stimulating factor].

Induction of apoptosis in megakaryocytic leukemia cell lines by MX2, a morpholino anthracycline.

Characterization of hydrogen peroxide removal activities in mouse hemolysates: catalase activity and hydrogen peroxide removal activity by hemoglobin.

Inhibition of clastogenic effects of arsenic through continued oral administration of garlic extract in mice in vivo.

Differential effects on TNF alpha production by pharmacological agents with varying molecular sites of action.

Estrogens attenuate neuronal injury due to hemoglobin, chemical hypoxia, and excitatory amino acids in murine cortical cultures.

HDL causes mesangial cell mitogenesis through a tyrosine kinase-dependent receptor mechanism.

Differential vulnerability of the CA1 and CA3 subfields of the hippocampus to superoxide and hydroxyl radicals in vitro.

Maintenance therapy with intravenous iron in hemodialysis patients receiving erythropoietin.

A novel derivatization of phenol after extraction from human serum using perfluorooctanoyl chloride for gas chromatography-mass spectrometric confirmation and quantification.

In utero and lactational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin: effects on development of the male and female reproductive system of the mouse.

Membrane-bound protein disulfide isomerase (PDI) is involved in regulation of surface expression of thiols and drug sensitivity of B-CLL cells.

T cell responses to human type II collagen in patients with rheumatoid arthritis and healthy controls.

Brief communication: childhood leukemia in a residential small town near Barcelona.

Tyrosine phosphorylation is required for ehrlichial internalization and replication in P388D1 cells.

Role of bacterial Mn-cofactored superoxide dismutase in oxidative stress responses, nasopharyngeal colonization, and sustained bacteremia caused by Haemophilus influenzae type b.

Purification and partial sequencing of the XL-I form of xenobiotic-metabolizing medium chain fatty acid:CoA ligase from bovine liver mitochondria, and its homology with the essential hypertension protein.

Haematological and erythrocyte membrane changes induced by methacrylonitrile.

Cytosolic Ca²⁺ and protein kinase Calpha couple cellular metabolism to membrane K⁺ permeability in a human biliary cell line.

Iron deficiency anemia in children: prevalence and prevention studies in Ribeirão Preto, Brazil.

[Randomized multi-center trial of the administration of erythropoietin in anemia of prematurity].

Opposite effects of 2,2',4,4',5,5'-hexachlorobiphenyl and 2,3,7,8-tetrachlorodibenzo-p-dioxin on the antibody response to sheep erythrocytes in mice.

Effect of hepatic methyl donor status on urinary excretion and DNA damage in B6C3F1 mice treated with sodium arsenite.

Cytogenetic effects in human exposure to arsenic.

How long before resistance makes it impossible to control some field strains of Haemonchus contortus in South Africa with any of the modern anthelmintics?

Ferrous sulfate-induced increase in requirement for thyroxine in a patient with primary hypothyroidism.

P-Cresol, a uremic compound, enhances the uptake of aluminum in hepatocytes.

PET imaging of brain tumor with [methyl-¹¹C]choline.

Beta 2-integrin-mediated signal up-regulates counterreceptor ICAM-1 expression on human monocytic cell line THP-1 through tyrosine phosphorylation.

Calcium-induced bilirubin-dependent hemolysis of human erythrocytes.

Effects of iron salts in sucrose on dental caries and plaque in rats.

Correction of iron deficiency with an iron-fortified fluid whole cow's milk in children: results of a pilot study.

[Studies on mechanism of wasting syndrome in TCDD-intoxicated rats].

[Levels of PCDDs, PCDFs and coplanar PCBs in sebum and blood of Yusho patients].

Cell adhesion molecules and insulin-like growth factor-1 in vascular disease.

Altered intracellular distribution of daunorubicin in immature acute myeloid leukemia cells.

The carboxyl-terminal region of factor IX is essential for its secretion.

Effectiveness of iron therapy on breath-holding spells.

Establishment of a novel human acute myeloblastic leukemia cell line (YNH-1) with t(16;21), t(1;16) and 12q13 translocations.

Cancer mortality among rice growers in Novara Province, northern Italy.

Characterization of methemoglobin formation induced by 3,5-dichloroaniline, 4-amino-2,6-dichlorophenol and 3,5-dichlorophenylhydroxylamine.

Cancer risk assessment using blood dioxin levels and daily dietary TEQ intake in general populations of industrial and non-industrial countries.

Role of iron in ischemia-reperfusion oxidative injury of rat lungs.

AML1a but not AML1b inhibits erythroid differentiation induced by sodium butyrate and enhances the megakaryocytic differentiation of K562 leukemia cells.

Free radicals and the ischemia-evoked extracellular accumulation of amino acids in rat cerebral cortex.

Synthesis and antiproliferative and antiviral activity of carbohydrate-modified pyrrolo[2,3-d]pyridazin-7-one nucleosides.

Protective effect of captopril on ischemic myocardium.

Dioxin concentrations in women with endometriosis.

[Complete remission achieved by L-asparaginase, vincristine and prednisolone (LVP) therapy in secondary leukemia (M5a type) with an MLL gene rearrangement].

Tyrosine kinase signaling regulates Wiskott-Aldrich syndrome protein function, which is essential for megakaryocyte differentiation.

Sulfated sialyl Lewis X, the putative L-selectin ligand, detected on endothelial cells of high endothelial venules by a distinct set of anti-sialyl Lewis X antibodies.

Cytokines (IL-1beta and TNFalpha) in relation to biochemical and immunological effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in rats.

An in vitro test model for investigation of disinfection of dentinal tubules infected with *Enterococcus faecalis*.

BASF studies: epidemiological and clinical investigations on dioxin-exposed chemical workers.

Pesticides poisonings in clinical and medicolegal aspect.

Acute work-related poisoning by pesticides in The Netherlands; a one year follow-up study.

[Assessment of neurotoxic effects of methyl bromide in exposed workers].

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and congeners in infants. A toxicokinetic model of human lifetime body burden by TCDD with special emphasis on its uptake by nutrition.

Effect of source of iron on duodenal absorption of iron, calcium, phosphorous, magnesium, copper and zinc in rats with ferropenic anaemia.

Rheology of rat basophilic leukemia cells.

Contribution of ATP-sensitive potassium channels to hypoxic hyperpolarization in rat hippocampal CA1 neurons in vitro.

Continuous exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin inhibits the growth of surgically induced endometriosis in the ovariectomized mouse treated with high dose estradiol.

Cooperative inhibition of acetylcholinesterase activities by hexachlorophene in human erythrocytes.

Antithrombotic effects of the novel inhibitor of thrombin-induced offtelet aggregation and thrombus formation, 3-[2-[1,1':2',1'']-terphenyl-4'-yl)ethyl]phenoxyacetic acid.

Early life stage toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in zebrafish (*Danio rerio*).

A novel energy dependent mechanism reducing daunorubicin accumulation in acute myeloid leukemia.

Cytochrome P450 1A1 induction in rat lymphoid tissues following in vivo and in vitro exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin requires protein kinase C.

Modification of hepatic drug-metabolizing enzymes in rats treated with alkyl sulfides.

Cardiovascular depressor responses to stimulation of substantia nigra and ventral tegmental area.

4-Coumaroyl coenzyme A 3-hydroxylase activity from cell cultures of *Lithospermum erythrorhizon* and its relationship to polyphenol oxidase.

Backbone structure and dynamics of a hemolymph protein from the mealworm beetle *Tenebrio molitor*.

On-line supported liquid membrane-liquid chromatography with a phenol oxidase-based biosensor as a selective detection unit for the determination of phenols in blood plasma.

Long-term primary cultures of adult human hepatocytes.

Tissue factor pathway inhibitor in endothelial cells colocalizes with glycolipid microdomains/caveolae. Regulatory mechanism(s) of the anticoagulant properties of the endothelium.

Energy-dependent expression of platelet-von Willebrand factor on the surface of unstimulated and stimulated platelets.

Stimulation of cytosolic phospholipase A2-catalyzed arachidonic acid liberation by low dose tert-butyl hydroperoxide without an influence on the enzyme activity in rabbit platelets.

Dissociation between the anti-aggregatory & anti-secretory effects of platelet integrin alpha IIb beta 3 (GPIIb/IIIa) antagonists, c7E3 and DMP728.

Glypican-3 is a binding protein on the HepG2 cell surface for tissue factor pathway inhibitor.

Aging and oxygen toxicity: Relation to changes in melatonin.

Percutaneous penetration of 2-phenoxyethanol through rat and human skin.

Subchronic/chronic toxicity of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin (HpCDD) in rats. Part II. Biochemical effects.

The stability of ethanol in human whole blood controls: an interlaboratory evaluation.

Enhancement of plasminogen binding and fibrinolysis by chloropeptin I.

Comparative genotoxicity of halogenated acetic acids found in drinking water.

The oncofetal J28 epitope involves fucosylated O-linked oligosaccharide structures of the fetoacinar pancreatic protein.

Serum transcriptionally regulates Na(+)-K(+)-ATPase gene expression in vascular smooth muscle cells.

Growing pains in South America.

Transport mechanisms of idarubicin, an anthracycline derivative, in human leukemia HL60 cells and mononuclear cells, and comparison with those of its analogs.

Characterization of intracellular calcium responses produced by polycyclic aromatic hydrocarbons in surface marker-defined human peripheral blood mononuclear cells.

Role of 3,4-dichlorophenyl methyl sulfone, a metabolite of o-dichlorobenzene, in the changes in hepatic microsomal drug-metabolizing enzymes caused by o-dichlorobenzene administration in rats.

Neurotoxicity of the 22 kDa thrombin-cleavage fragment of apolipoprotein E and related synthetic peptides is receptor-mediated.

Specific attenuation of the pressure-induced contraction of rat cerebral artery by herbimycin A.

Apoptotic cell death of erythrocytes in *Xenopus* larvae exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Differential effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin, bis(tri-n-butyltin) oxide and cyclosporine on thymus histophysiology.

Induction of heat shock proteins by tyrosine kinase inhibitors in rat cardiomyocytes and myogenic cells confers protection against simulated ischemia.

Internalization and down-regulation of the prostacyclin receptor in human platelets.

Aluminum citrate is transported from brain into blood via the monocarboxylic acid transporter located at the blood-brain barrier.

Endothelial cells protect vascular smooth muscle cells from H₂O₂ attack.

Differences in platelet-activating factor receptor mediated Ca⁺⁺ response between hamster and guinea pig alveolar macrophages.

Resazurin reduction as a function of respiratory burst in bovine neutrophils.

Carbonyl cyanide phenylhydrazones as probes of the anionic activator site of the human erythrocyte glutathione adduct transport ATPase.

Localization of human intestinal defensin 5 in Paneth cell granules.

The role of tyrosine phosphorylation in lipopolysaccharide- and zymosan-induced procoagulant activity and tissue factor expression in macrophages.

Differential effects of the tyrosine kinase inhibitors on collagen type 1-induced platelet aggregation and adhesion to this protein.

Functional requirement of the hypoxia-responsive element in the activation of the inducible nitric oxide synthase promoter by the iron chelator desferrioxamine.

Effects of TCDD on Ah receptor, ARNT, EGF, and TGF- α expression in embryonic mouse urinary tract.

Peroxidase-release associated with phagocytosis in *Mytilus galloprovincialis* haemocytes.

Induction of micronuclei in cultured human lymphocytes with the mixture of highly toxic organochlorine compounds retained in human body.

Injury-induced enzymatic methylation of aging collagen in the extracellular matrix of blood vessels.

Angiotensin II activates the beta 1 isoform of phospholipase C in vascular smooth muscle cells.

Thiocarbamate herbicide-inducible nonheme haloperoxidase of *Rhodococcus erythropolis* NI86/21.

Effect of cell density and epidermal growth factor on the inducible expression of CYP3A and CYP1A genes in human hepatocytes in primary culture.

Multiplicity of antioxidant enzyme catalase in mouse liver cells.

Correlation of 2,3,7,8-tetrachlorodibenzo-p-dioxin induction of cytochrome P4501A in vascular endothelium with toxicity in early life stages of lake trout.

[Determination of the selenomethionine content in grain and human blood].

Intracellular calcium buffering declines in aging adrenergic nerves.

Lipid extraction from blood and biological samples and concentrations of dioxin-like compounds.

[¹⁴C]cyanate labeling of sheep red cells: covalent binding to hemoglobin continues in vivo for a day.

Thrombin stimulates production of transforming growth factor- β by cultured human mesangial cells.

Increase of glycocalyx and altered lectin agglutination profiles of *Pasteurella haemolytica* A1 after incubation in bovine subcutaneous tissue chambers in vivo or in ruminant serum in vitro.

Activation of the aryl hydrocarbon receptor/transcription factor and bone marrow stromal cell-dependent preB cell apoptosis.

Cardiovascular effects of neurotensin microinjections into the nucleus of the solitary tract.

The effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on tumor necrosis factor (TNF) production by peritoneal cells.

Plant regeneration from callus cultures of *Lithospermum erythrorhizon*.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) increases release of luteinizing hormone and follicle-stimulating hormone from the pituitary of immature female rats in vivo and in vitro.

Inhibitors of protein kinases and phosphatases alter root morphology and disorganize cortical microtubules.

Death following intentional methyl bromide poisoning: toxicological data and literature review.

Active efflux of the free acid form of the fluorescent dye 2',7'-bis(2-carboxyethyl)-5(6)-carboxyfluorescein in multidrug-resistance-protein-overexpressing murine and human leukemia cells.

Brain-to-blood active transport of beta-alanine across the blood-brain barrier.

Nitric oxide decreases intestinal haemorrhagic lesions in rat anaphylaxis independently of mast cell activation.

[Method of cyanogen bromide-fluorimetry determination of trace amount of selenomethionine in grain and blood].

Review and update of the results of the NIOSH medical study of workers exposed to chemicals contaminated with 2,3,7,8-tetrachlorodibenzodioxin.

Tumor necrosis factor beta is a major source of antibody-activated effector cells in the killing of virally infected target cells.

Polychlorinated dibenzo-p-dioxin and dibenzofuran levels and patterns in polyvinylchloride and chloralkali industry workers.

Reduced glutathione inhibits rabbit and rat skeletal muscle lactate dehydrogenase and prevents dinitrophenol induced extracellular acidification by an epithelial cell line.

Urinary excretion of ifosfamide, 4-hydroxyifosfamide, 3- and 2-dechloroethylifosfamide, mesna, and dimesna in patients on fractionated intravenous ifosfamide and concomitant mesna therapy.

Enhancement of plasminogen binding to U937 cells and fibrin by complestatin.

Fluid flow induces enhancement of the Egr-1 mRNA level in osteoblast-like cells: involvement of tyrosine kinase and serum.

Occupational chronic exposure to organic solvents. XVI. Ambient and biological monitoring of workers exposed to toluene.

Suspected herbicide toxicosis in a dog.

Interaction of 2,4-dichlorophenoxyacetic acid (2,4-D) with cell and model membranes.

Micronucleus induction by diuron in mouse bone marrow.

Genotoxic evaluation of the herbicide trifluralin on human lymphocytes exposed in vitro.

Histological changes in rat embryonic blood cells as a possible mechanism for ventricular septal defects produced by an N-phenylimide herbicide.

In vivo percutaneous absorption of acetochlor in the rhesus monkey: dose-response and exposure risk assessment.

Subchronic, developmental, and genetic toxicology studies with the ethane sulfonate metabolite of alachlor.

Comparative subchronic studies on 2,4-dichlorophenoxyacetic acid, amine, and ester in rats.

Acute, subchronic and chronic 2,4-dichlorophenoxyacetic acid (2,4-D) intoxication in rats.

Cellular target of cyclophosphamide toxicity in the murine liver: role of glutathione and site of metabolic activation.

Evaluation of the potential carcinogenicity and genetic toxicity to humans of the herbicide acetochlor.

Pesticide application and increased dioxin body burden in male and female agricultural workers in China.

Cancer incidence among alachlor manufacturing workers.

Comparative studies on the effects of herbicide atrazine on freshwater fish *Oreochromis niloticus* and *Chrysichthys auratus* at Assiut, Egypt.

Effects of Fuller's Earth and activated charcoal on oral absorption of paraquat in rabbits.

In vitro percutaneous absorption of model compounds glyphosate and malathion from cotton fabric into and through human skin.

Reactive oxygen and nitrogen intermediates and products from polyamine degradation are Babesiicidal in vitro.

Pulse therapy with cyclophosphamide and methylprednisolone in patients with moderate to severe paraquat poisoning: a preliminary report.

Effects of trifluralin and oryzalin on the human erythrocyte Ca-ATPase.

Cancer mortality in German male workers exposed to phenoxy herbicides and dioxins.

Protective effects of chlorogenic acid on paraquat-induced oxidative stress in rats.

Genotoxicity of the herbicides alachlor and maleic hydrazide in cultured human lymphocytes.

Experience with acute paraquat poisoning in Crete.

Serum biochemical changes associated with cystic ovarian degeneration in pigs after atrazine treatment.

Histological studies of atrazine toxicity on the thyroid gland in rats.

[Distribution of ventilation-perfusion ratios in paraquat-induced interstitial pneumonia in dogs].

[Fatal paraquat poisoning].

Construction of a physiologically based pharmacokinetic model for 2,4-dichlorophenoxyacetic acid dosimetry in the developing rabbit brain.

Comparative subchronic and chronic dietary toxicity studies on 2,4-dichlorophenoxyacetic acid, amine, and ester in the dog.

Effects of paraquat on mitochondrial electron transport system and catecholamine contents in rat brain.

Effect of dietary paraquat on a rat mutant unable to synthesize ascorbic acid.

Herbicide: fatal ammonium thiocyanate and aminotriazole poisoning.

Biotransformation of acrolein in rat: excretion of mercapturic acids after inhalation and intraperitoneal injection.

An interlaboratory evaluation of the Buehler test for the identification and classification of skin sensitizers.

In vivo and in vitro analysis of Bordetella pertussis catalase and Fe-superoxide dismutase mutants.

Effect of 3-aminotriazole on hyperthermia-mediated cardioprotection in rabbits.

Increased activity and sensitivity of mitochondrial respiratory enzymes to tumor necrosis factor alpha-mediated inhibition is associated with increased cytotoxicity in drug-resistant leukemic cell lines.

Cancer incidence in the rural community of Tecumseh, Michigan: a pattern of increased lymphopietic neoplasms.

Dioxins and dioxin-like chemicals in blood and semen of American Vietnam veterans from the state of Michigan.

Induction of micronuclei in haemocytes and gill cells of zebra mussels, Dreissena polymorpha, exposed to clastogens.

Spectrophotometric determination of hydrogen peroxide: catalase activity and rates of hydrogen peroxide removal by erythrocytes.

Identification of a novel growth-promoting factor with a wide target cell spectrum from various tumor cells as catalase.

The effects of chronic sidestream cigarette smoke exposure on eicosanoid production by tracheal epithelium.

Characterization of chlorinated adducts of hemoglobin and albumin following administration of pentachlorophenol to rats.

The flavohaemoglobin (HMP) of Escherichia coli generates superoxide in vitro and causes oxidative stress in vivo.

Assessment of the biochemical effects of percutaneous exposure of sulphur mustard in an in vitro human skin system.

Influence of age on the passage of paraquat through the blood-brain barrier in rats: a distribution and pathological examination.

Kinetic and spectroscopic properties of the cyanide complexes of ferrous haemoglobins I and IV from trout blood.

Increases in tissue levels of ubiquinone in association with peroxisome proliferation.

[Toxicologic risk assessment and prevention: rational and irrational approaches].

Different pathways in irritant contact eczema? Early differences in the epidermal elemental content and expression of cytokines after application of 2 different irritants.

Extraction and protein sequencing of immunoglobulin light chain from formalin-fixed cerebrovascular amyloid deposits.

Enforced expression of Bcl-XS induces differentiation and sensitizes chronic myelogenous leukemia-blast crisis K562 cells to 1-beta-D-arabinofuranosylcytosine-mediated differentiation and apoptosis.

Tetrahydrobiopterin biosynthesis enhanced by lipopolysaccharide stimulation in murine neuroblastoma cell line N1E-115.

Functional CD40 ligand expressed by human blood dendritic cells is up-regulated by CD40 ligation.

Interactive effects between 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,2',4,4',5,5'-hexachlorobiphenyl in female B6C3F1 mice: tissue distribution and tissue-specific enzyme induction.

Effects induced by feeding organochlorine-contaminated carp from Saginaw Bay, Lake Huron, to laying White Leghorn hens. II. Embryotoxic and teratogenic effects.

12-Lipoxygenase in A431 cells: genetic identity, modulation of expression, and intracellular localization.

Intravenous iron sucrose complex in the treatment of iron deficiency anemia during pregnancy.

Randomised study of cognitive effects of iron supplementation in non-anaemic iron-deficient adolescent girls.

Incidence rates of leukemias, lymphomas and myelomas in Italy: geographic distribution and NHL histotypes.

The heat-shock protein 70 family reduces ischemia/reperfusion injury in small intestine.

Asymptomatic giardiasis does not affect iron absorption in children with iron deficiency anemia.

Undersulfation of glycosaminoglycans reduces the proliferation of a leukemia cell line in vitro.

Acute cyanide poisoning: clinical spectrum, diagnosis, and treatment.

beta-Apo-8'-carotenal, but not beta-carotene, is a strong inducer of liver cytochromes P4501A1 and 1A2 in rat.

Fatal accident resulting from methyl bromide poisoning after fumigation of a neighbouring house; leakage through sewage pipes.

Cause specific mortality and cancer incidence among employees exposed to 2,3,7,8-TCDD after a 1953 reactor accident.

Exposures and health effects: an evaluation of workers at a sodium azide production plant.

Contribution of oxygen-sensitive neurons of the rostral ventrolateral medulla to hypoxic cerebral vasodilatation in the rat.

[The perioperative use of recombinant erythropoietin (rhEPO) in Jehovah's witnesses].

Chromium allergy in consecutive patients in a country where ferrous sulfate has been added to cement since 1981.

Epoetin alfa--focus on nutritional therapy. Case study of the anemic patient.

Farming, pesticide use and hairy-cell leukemia.

Use of four-colour flow cytometry to evaluate conjugate formation between human peripheral blood mononuclear cells and tumour target cells.

Correlation between selected environmental exposures and karyotype in acute myelocytic leukemia.

Does iron therapy benefit children with severe malaria-associated anaemia? A clinical trial with 12 weeks supplementation of oral iron in young children from the Turiani Division, Tanzania.

Monoclonal antibody to single-stranded DNA is a specific and sensitive cellular marker of apoptosis.

Cytokine-induced nitric oxide synthase gene transcription is blocked by the heat shock response in human liver cells.

Active involvement of catalase during hemolytic crises of favism.

Activation of mitogen activated protein kinase in dolichyl phosphate-induced apoptosis in U937 cells.

Inhibition of HSP70 expression by calcium ionophore A23187 in human cells. An effect independent of the acquisition of DNA-binding activity by the heat shock transcription factor.

Uncoupling of mitochondrial oxidative phosphorylation alters lipid peroxidation-derived free radical production but not recovery of postischemic rat hearts and post-hypoxic endothelial cells.

Transport mechanisms of anthracycline derivatives in human leukemia cell lines: uptake of pirarubicin, daunorubicin and doxorubicin by K562 and multidrug-resistant K562/ADM cells.

Diagnostic criteria for selenium toxicosis in aquatic birds: dietary exposure, tissue concentrations, and macroscopic effects.

Fetal globin expression in New World monkeys.

Nephrotoxicity of 4-amino-2-chlorophenol and 2-amino-4-chlorophenol in the Fischer 344 rat.

Activation of physiological cell death mechanisms by a necrosis-causing agent.

Target cell-induced apoptosis of interleukin-2-activated human natural killer cells: roles of cell surface molecules and intracellular events.

[Iron supplementation in Chilean Mapuche infants of the Cautin Province, Chile].

[Powdered milk enriched with iron and ascorbic acid as an intervention measure for treating iron deficiency anemia in children seen at a Basic Health Care Unit].

Decreased cerebral glucose utilization in rats during the ebb phase of thermal injury.

CD28-dependent killing by human YT cells requires phosphatidylinositol 3-kinase activation.

Iron deficiency and intestinal malabsorption in HIV disease.

Appropriateness of iron prescribing: a retrospective study.

Effects of polychlorinated biphenyl/dioxin exposure and feeding type on infants' mental and psychomotor development.

Role of decomposition products in sodium methyldithiocarbamate-induced immunotoxicity.

Dietary garlic extract in modifying clastogenic effects of inorganic arsenic in mice: two-generation studies.

Characterization of a chemical anoxia model in cerebellar granule neurons using sodium azide: protection by nifedipine and MK-801.

Synthesis of [¹¹C-methyl]-alpha-aminoisobutyric acid (AIB).

Subcutaneous epoetin alfa as an adjunct to autologous blood donation before elective coronary artery bypass graft surgery.

Perisurgical use of epoetin alfa in orthopedic surgery patients.

Epoetin alfa as an adjunct to autologous blood donation in patients with a low hematocrit scheduled for elective orthopedic surgery.

Potential of epoetin alfa in patients in autologous blood donation programs for orthopedic surgery.

Incidence and time trends for lymphomas, leukemias and myelomas: hypothesis generation. Working Group on the Epidemiology of Hematolymphopoietic Malignancies in Italy.

Microcytic anemia with iron malabsorption: an inherited disorder of iron metabolism.

Inhibition of Fc epsilon-RI-mediated activation of rat basophilic leukemia cells by Clostridium difficile toxin B (monoglucosyltransferase).

Identification of dioxin-responsive genes in Hep G2 cells using differential mRNA display RT-PCR.

Target-induced death by apoptosis in human lymphokine-activated natural killer cells.

[Action duality of nitrogen oxide (NO) in experimental African trypanosomiasis].

Glutathione transferase activity and formation of macromolecular adducts in two cases of acute methyl bromide poisoning.

TCDD-inducible plasminogen activator inhibitor type 2 (PAI-2) in human hepatocytes, HepG2 and monocytic U937 cells.

Membrane lipid peroxidation as a mechanism of sonodynamically induced erythrocyte lysis.

Recombinant human erythropoietin: effect on the functional performance of anemic orthopedic patients.

Surface expression of CD63 antigen (AD1 antigen) in P815 mastocytoma cells by transfected IgE receptors.

Glutathione S-transferase-pi is secreted as a monomer into human plasma by platelets and tumor cells.

Role of tyrosine phosphorylation in radiation-induced cell cycle-arrest of leukemic B-cell precursors at the G2-M transition checkpoint.

Intravenous iron supplementation for the treatment of the anemia of moderate to severe chronic renal failure patients not receiving dialysis.

Blood and air pollution: state of knowledge and research needs.

Specific induction of the 70-kD heat stress proteins by the tyrosine kinase inhibitor herbimycin-A protects rat neonatal cardiomyocytes. A new pharmacological route to stress protein expression?

Cell cycle defect in connection with oxygen and iron sensitivity in Fanconi anemia lymphoblastoid cells.

Activation of type I protein kinase A during receptor-mediated human T lymphocyte activation.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on humoral and cell-mediated immunity in Sprague-Dawley rats.

Bioavailability of microencapsulated ferrous sulfate in fluid milk studies in human beings.

Cytogenetic biomonitoring of pesticide-exposed farmers in central Italy.

GABA release is enhanced in mouse hippocampal slices in cell-damaging conditions.

Inhibition of the accumulation of uremic toxins in the blood and their precursors in the feces after oral administration of Lebenin, a lactic acid bacteria preparation, to uremic patients undergoing hemodialysis.

Occupational health data as a basis for process engineering changes: development of a safe work environment in the sodium azide industry.

Incomplete occlusion of central retinal artery in a girl with iron deficiency anemia.

Effects of canthaxanthin, astaxanthin, lycopene and lutein on liver xenobiotic-metabolizing enzymes in the rat.

Monoclonal antibody directed to a fibrinogen A alpha #529-539 epitope inhibits alpha-chain crosslinking by transglutaminases.

Effects of iron replenishment on iron, calcium, phosphorus and magnesium metabolism in iron-deficient rats.

Mechanism underlying the inhibitory effect of high calcium carbonate intake on iron bioavailability from ferrous sulphate in anaemic rats.

Pesticide applicators with mixed pesticide exposure: G-banded analysis and possible relationship to non-Hodgkin's lymphoma.

Antibodies released from immunoabsorbents: effect of support, activation and elution conditions.

[Separation of methotrexate-polyglutamates by capillary electrophoresis and its application to the measurement of gamma-glutamyl hydrolase activity in human leukemia cells in culture].

Effects of crude garlic extract on mouse chromosomes in vivo.

Transport mechanism of anthracycline derivatives in human leukemia cell lines: uptake and efflux of pirarubicin in HL60 and pirarubicin-resistant HL60 cells.

Structural characterization by mass spectrometry of hemoglobin adducts formed after in vivo exposure to methyl bromide.

Morbidity study of extruder personnel with potential exposure to brominated dioxins and furans. II. Results of clinical laboratory studies.

Herbimycin A down-regulates messages of cyclin D1 and c-myc during erythroid differentiation of K562 cells.

Heparin-binding domain of fibrin mediates its binding to endothelial cells.

Cyclosporine control of recipient lymphocyte traffic to the heart allograft.

Basal metabolism of intraperitoneally injected carrier-free ⁷⁴As-labeled arsenate in rabbits.

Binding of tissue factor pathway inhibitor to cultured endothelial cells-influence of glycosaminoglycans.

Coagulation factors VII and X induce Ca²⁺ oscillations in Madin-Darby canine kidney cells only when proteolytically active.

Toxic equivalence factors, problems and limitations.

[Bladder neoplasms and cyclophosphamide. Apropos of 3 cases and review of the literature].

Is the uptake of pefloxacin in human blood monocytes a simple diffusion process?

Effects induced by feeding organochlorine-contaminated carp from Saginaw Bay, Lake Huron, to laying White Leghorn hens. I. Effects on health of adult hens, egg production, and fertility.

Peroxy-nitrite augments fMLP-stimulated chemiluminescence by neutrophils in human whole blood.

Levels of PCDD/PCDF in blood fat as indices of the PCDD/PCDF body burden in humans.

2,3,7,8-TCDD induces cytochrome P450 enzyme activity but not proliferation or phenotypical changes in human peripheral blood lymphocytes.

Rapid distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) to embryonic tissues in C57BL/6N mice and correlation with palatal uptake in vitro.

Subchronic dispositional and toxicological effects of arsenate administered in drinking water to mice.

Molecular structure and antioxidant specificity of purpurogallin in three types of human cardiovascular cells.

Degradation of cross-linked fibrin by matrix metalloproteinase 3 (stromelysin 1): hydrolysis of the gamma Gly 404-Ala 405 peptide bond.

Bladder augmentation in the prevention of cyclophosphamide-induced haemorrhagic cystitis in the rat model.

Serum albumin is a specific inhibitor of apoptosis in human endothelial cells.

Toxic equivalency factors of polybrominated dibenzo-p-dioxin, dibenzofuran, biphenyl, and polyhalogenated diphenyl ether congeners based on rainbow trout early life stage mortality.

Mutation and Mutagenesis of thiol peroxidase of Escherichia coli and a new type of thiol peroxidase family.

The fifth epidermal growth factor-like domain of thrombomodulin does not have an epidermal growth factor-like disulfide bonding pattern.

Isolation and primary culture of rat cerebral microvascular endothelial cells for studying drug transport in vitro.

Rapid determination of in vivo and in vitro antibody responses by suspension hemolytic assay.

Anti-inflammatory properties of human serum IgA: induction of IL-1 receptor antagonist and Fc alpha R (CD89)-mediated down-regulation of tumour necrosis factor-alpha (TNF-alpha) and IL-6 in human monocytes.

Identification of the alpha chain lysine donor sites involved in factor XIIIa fibrin cross-linking.

Increased intracellular levels of calcitonin gene-related peptide-like immunoreactivity in pulmonary endocrine cells in an experimental model of congenital diaphragmatic hernia.

Interaction of zinc ions with human peripheral blood mononuclear cells.

Platelet-activating factor (PAF) induces the early tyrosine phosphorylation of focal adhesion kinase (p125FAK) in human endothelial cells.

Metabolic stress opens K⁺ channels in hepatoma cells through a Ca²⁺- and protein kinase calpha-dependent mechanism.

Effect of cystathionine and cystathionine metabolites on the phosphorylation of tyrosine residues in human neutrophils.

Tumor necrosis factor alpha-induced vascular leakage involves PECAM1 phosphorylation.

Pharmacological study of atypical beta-adrenoceptors in rat esophageal smooth muscle.

The reliability of the serum dioxin measurement in veterans of Operation Ranch Hand.

Effects of endothelial cells on activity of staphylokinase.

The effects of physical and chemical agents on the secretion and stability of a *Fusobacterium necrophorum* hemolysin.

Rapid cytotoxicity of human B lymphocytes induced by VH4-34 (VH4.21) gene-encoded monoclonal antibodies.

Sodium and chloride ion-dependent transport of beta-alanine across the blood-brain barrier.

Endothelin-1 induces tyrosine phosphorylation in human blood monocytes.

Thiol-induced hemoglobin oxidation.

Glutathione depletion in human erythrocytes and rat liver: a study on the interplay between bioactivation and inactivation functions of liver and blood.

An in vitro method for evaluating vascular endothelial ADPase activity.

Transduction mechanisms involved in thrombin receptor-induced nerve growth factor secretion and cell division in primary cultures of astrocytes.

Effect of active oxygen species scavengers on fibrinolytic activity of some proteinases.

Lyn and Fgr protein-tyrosine kinases prevent apoptosis during retinoic acid-induced granulocytic differentiation of HL-60 cells.

Differential induction of IL-1 beta and IL-6 production by the nontoxic lipid A from *Porphyromonas gingivalis* in comparison with synthetic *Escherichia coli* lipid A in human peripheral blood mononuclear cells.

Expression and release of the a and b subunits for human coagulation factor XIII in baby hamster kidney (BHK) cells.

Saturable transport of valproic acid in rat choroid plexus in vitro.

Persistence of decreased T-helper cell function in industrial workers 20 years after exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Mechanism of endothelial cell shape change and cytoskeletal remodeling in response to fluid shear stress.

Disposition characteristics of plasmid DNA in the single-pass rat liver perfusion system.

Tyrosine kinase is required for long-term depression in the cerebellum.

Exposure of ligand-binding sites on platelet integrin alpha IIB/beta 3 by phosphorylation of the beta 3 subunit.

Mammalian plasma and tissue-bound semicarbazide-sensitive amine oxidases: biochemical, pharmacological and toxicological aspects.

Arsenic-copper interaction in the kidney of the rat: influence of arsenic metabolites.

Analytical findings in a suicide involving sodium azide.

[Conformational changes of the platelet membrane glycoprotein IIb-IIIa complex stimulated by a monoclonal antibody to the N-terminal segment of glycoprotein IIIa].

Role of Cu/Zn-superoxide dismutase in xenobiotic activation. II. Biological effects resulting from the Cu/Zn-superoxide dismutase-accelerated oxidation of the benzene metabolite 1,4-hydroquinone.

Induction of CYP1A1 and ALDH-3 in lymphoid tissues from Fisher 344 rats exposed to 2,3,7,8-tetrachlorodibenzodioxin (TCDD).

Mechanisms involved in eosinophil migration. Platelet-activating factor-induced chemotaxis and interleukin-5-induced chemokinesis are mediated by different signals.

Elimination of polychlorinated dibenzo-p-dioxins and dibenzofurans in occupationally exposed persons.

Carbohydrate induced modulation of cell membrane: II. Spin label study of fluidity changes in peripheral blood lymphocyte membrane.

The formation of a disulfide cross-link between the two subunits demonstrates the dimeric structure of the mitochondrial oxoglutarate carrier.

Comparative structural and functional features of the human fibrinogen alpha C domain and the isolated alpha C fragment. Characterization using monoclonal antibodies to defined COOH-terminal A alpha chain regions.

Differential ability of 2,4-dinitrophenol to modulate etoposide cytotoxicity in mammalian tumor cell lines associated with inhibition of macromolecular synthesis.

Decrease in milk and blood dioxin levels over two years in a mother nursing twins: estimates of decreased maternal and increased infant dioxin body burden from nursing.

3,3',4,4'-tetrachloroazobenzene absorption, disposition, and metabolism in male Fischer 344 rats.

Methyl bromide intoxication during grain store fumigation.

Stimulation of beta1 integrins on fibroblasts induces PDGF independent tyrosine phosphorylation of PDGF beta-receptors.

Lysophosphatidic acid-induced neurite retraction in PC12 cells: control by phosphoinositide-Ca²⁺ signaling and Rho.

Signaling by hemolytically inactive C5b67, an agonist of polymorphonuclear leukocytes.

Glutathionyl hydroquinone: a potent pro-oxidant and a possible toxic metabolite of benzene.

Haemoglobin adducts as biomarkers of exposure to the herbicides propanil and fluometuron.

Heparan sulfate proteoglycans function in the binding and degradation of vitronectin by fibroblast monolayers.

Micellar electrokinetic capillary chromatographic analysis of platelet activating factor in human blood by indirect ultraviolet detection.

Role of cell surface glycosaminoglycans of human T cells in human immunodeficiency virus type-1 (HIV-1) infection.

Oral iron absorption test in patients on CAPD: comparison of ferrous sulfate and a polysaccharide ferric complex.

Hemoglobin and DNA adduct formation in Fischer-344 rats exposed to 2,4- and 2,6-toluene diamine.

Dose-dependent kinetics and metabolism of 1,2-dichlorobenzene in rat: effect of pretreatment with phenobarbital.

Determination of two sites of automethylation in bovine erythrocyte protein (D-aspartyl/L-isoaspartyl) carboxyl methyltransferase.

Potential role of the peroxidase-dependent metabolism of serotonin in lowering the polymorphonuclear leukocyte bactericidal function.

Oxidative phenotype polymorphism (P450 2D6) and metabolism of toluene.

Regenerated cellulose-based hemodialyzers with immobilized proteins as potential devices for extracorporeal immunoabsorption procedures: an assessment of protein coupling capacity and in vitro dialysis performances.

Effect of arsenic and cadmium on the persistence of mutagen-induced DNA lesions in human cells.

Habitual and genetic factors that affect urinary background levels of biomarkers for organic solvent exposure.

A mechanistic model of effects of dioxin on thyroid hormones in the rat.

Endogenous reactive oxygen metabolites mediate sublethal endothelial cell dysfunction during reoxygenation.

Detoxification of paraquat poisoning: effects of carbohydrate sulfate, alkylsulfate and alkylsulfonate on active oxygen.

Intratracheally administered liposomal alpha-tocopherol protects the lung against long-term toxic effects of paraquat.

Subacute toxicity of urea herbicide, isoproturon, in male rats.

Enhancement of paraquat toxicity by glutathione depletion in mice in vivo and in vitro.

Recovery of respiratory function in survivors with paraquat intoxication.

An easy and economical method to prepare cells for cytologic analyses.

The effect of p-chloroaniline on leucocytes of sheep peripheral blood under the migration-inhibition test conditions.

Effects of acute 2,4-dichlorophenoxyacetic acid on cattle serum components and enzyme activities.

Genotoxicity of the herbicide butachlor in cultured human lymphocytes.

Herbicide-induced DNA damage in human lymphocytes evaluated by the single-cell gel electrophoresis (SCGE) assay.

Effects of pentachlorophenol and biotic interactions on soil fauna and decomposition in humus soil.

[Paraquat poisoning. Treatment and prognosis].

Impaired in-vitro lymphocyte responses in patients with elevated pentachlorophenol (PCP) blood levels.

Chelation of organoarsenate with dimercaptosuccinic acid.

Toxicity of cotoran (fluometuron) in Desert sheep.

Serum biochemical and histopathological changes related to the hepatic function in pigs following atrazine treatment.

The effects of subchronic chlorate exposure in Sprague-Dawley rats.

The action of the herbicide paraquat on somatic and germ cells of mice.

Agent Orange and the Vietnamese: the persistence of elevated dioxin levels in human tissues.

Paraquat and diquat interference in the analysis of creatinine by the Jaffé reaction.

A 2,4-dichlorophenoxyacetic acid induced fatality.

[The effect of bentazone TP, an herbicide, on hematologic indicators in sheep during acute and subchronic poisoning].

[Herbicides and neoplasms of the hemolymphopoietic system].

Fate and effects of acrolein.

Metobromuron/metolachlor ingestion with late onset methemoglobinemia in a pregnant woman successfully treated with methylene blue.

Acute-phase reactant proteins and antioxidants in rats intoxicated chronically with paraquat.

Catalase inhibition with 3-amino-1,2,4-triazole does not abolish infarct size reduction in heat-shocked rats.

Exposure to polychlorinated dioxins and furans (PCDD/F) and mortality in a cohort of workers from a herbicide-producing plant in Hamburg, Federal Republic of Germany.

Generation of resistance to the diphenyl ether herbicide acifluorfen by MEL cells.

Dapsone-induced hemolytic anemia: role of glucose-6-phosphate dehydrogenase in the hemolytic response of rat erythrocytes to N-hydroxydapsone.

[A microtitration variant of the latex agglutination reaction in the diagnosis of leprosy].

Antioxidative roles of metallothionein and manganese superoxide dismutase induced by tumor necrosis factor-alpha and interleukin-6.

Simple method for analysis of diquat in biological fluids and tissues by high-performance liquid chromatography.

A unique metabolism of inorganic arsenic in native Andean women.

Time dependence of accumulation and binding of inorganic and organic arsenic species in rabbit erythrocytes.

Effects of drinking pattern on the peak/trough blood concentrations in drinking water studies.

Further evidence that the blood/brain barrier impedes paraquat entry into the brain.

The nitric oxide synthase inhibitor NW-nitro-L-arginine methylester attenuates brain catalase activity in vitro.

Development of a physiologically based pharmacokinetic model for 2,4-dichlorophenoxyacetic acid dosimetry in discrete areas of the rabbit brain.

Reorganization of microfilaments in protonemal tip cells of the moss *Ceratodon purpureus* during the phototropic response.

A comparative study of direct hemoperfusion and hemodialysis for the removal of glufosinate ammonium.

Diquat increases cysteine proteinase inhibitors greatly in rat plasma and tissues.

19-Allylaminoherbimycin A, an analog of herbimycin A that is stable against treatment with thiol compounds or granulocyte-macrophage colony-stimulating factor in human leukemia cells.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced anorexia and wasting syndrome in rats: aggravation after ventromedial hypothalamic lesion.

The role of the neurohormone melatonin as a buffer against macromolecular oxidative damage.

Tissue-specific effects of 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) on the activity of phosphoenolpyruvate carboxykinase (PEPCK) in rats.

[Fatal sodium azide poisoning in a hospital: a preventable accident].

Skin irritation in man: a comparative bioengineering study using improved reflectance spectroscopy.

[Comparison of the effectiveness and tolerance of Aktiferrin, a ferrous sulfate capsule preparation and Tardyferon pills in patients with uncomplicated sideropenic anemia].

Preferential requirement for protein tyrosine phosphatase activity in the 12-O-tetradecanoylphorbol-13-acetate-induced differentiation of human colon cancer cells.

Neurological condition in 18-month-old children perinatally exposed to polychlorinated biphenyls and dioxins.

[Comparative study on pharmacological effects of various species of Pueraria].

Oxidative processes in red blood cells from normal and diabetic individuals.

Photodegradation and in vitro phototoxicity of the antidiabetic drug chlorpropamide.

Role of sodium azide in reducing nonspecific color development in enzyme immunoassays.

Increased rate of adenosine triphosphate-dependent etoposide (VP-16) efflux in a murine leukemia cell line overexpressing the multidrug resistance-associated protein (MRP) gene.

Increase in chloride-dependent L-glutamate transport activity in synaptic membrane after in vitro ischemic treatment.

Dietary exposure of mink to carp from Saginaw Bay, Michigan: 2. Hematology and liver pathology.

A monoclonal antibody against a peptide sequence of fibrinogen gamma chain acts as an inhibitor of factor XIII-mediated crosslinking of human fibrin.

Ligand-dependent and -independent activation of the transcription factor gamma RF-1 in a cell-free system.

Induction of macrophage procoagulant activity by murine hepatitis virus strain 3: role of tyrosine phosphorylation.

Immunologic effects of background prenatal and postnatal exposure to dioxins and polychlorinated biphenyls in Dutch infants.

The effect of iron in formula milk after 6 months of age.

In utero 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) alters reproductive morphology and function in female rat offspring.

Serum erythropoietin levels in patients with severe anemia secondary to inflammatory bowel disease and the use of recombinant human erythropoietin in patients with anemia refractory to treatment.

Possible involvement of focal adhesion kinase, p125FAK, in osteoclastic bone resorption.

Molecular mechanism of drug photosensitization. Part 6. Photohaemolysis sensitized by tolmetin.

Spin trapping endogenous radicals in MC-1010 cells: evidence for hydroxyl radical and carbon-centered ascorbyl radical adducts.

Large secretory structures at the cell surface imaged with scanning force microscopy.

Integrin-mediated tyrosine phosphorylation and cytokine message induction in monocytic cells. A possible signaling role for the Syk tyrosine kinase.

Pregnancy associated anemia and iron: a pilot study.

Nutrition and breast-feeding.

Iron overdose and detection of gastrointestinal bleeding with the hemocult and gastrocult assays.

Ferritin excretion and iron balance in humans.

Effect of antibodies to membrane skeletal proteins on the shape of erythrocytes and their ability to respond to shape-modulating agents. Important role of 4.1 protein in the determination/maintenance of the discoid shape of erythrocytes.

Radiosyntheses of labeled beta-pseudouridine ([C-11]- and [H-3]methyl) and its biodistribution and metabolism in normal and tumored mice.

[The determination of toxic compounds with a dinitrophenol structure in biological fluids].

Hyperresponse in calcium-induced insulin release from electrically permeabilized pancreatic islets of diabetics GK rats and its defective augmentation by glucose.

Herbimycin A inhibits phorbol ester-induced morphologic changes, adhesion, and megakaryocytic differentiation of the leukemia cell line, MEG-01.

Antioxidant and prooxidant roles of copper in Tween 20-induced hemolysis of hamster and pig erythrocytes containing marginal vitamin E.

The mechanism of action of the two-layer cold storage method in canine pancreas preservation-- protection of pancreatic microvascular endothelium.

The efficacy of erythropoietin in human immunodeficiency virus-infected end-stage renal disease patients treated by maintenance hemodialysis.

Aneugenic effect of sodium arsenite on human lymphocytes in vitro: an individual susceptibility effect detected.

Phorbol ester stimulated cathepsin L expression in U937 cells.

Dioxin--an analysis of the major human studies: comparison with animal-based cancer risks.

[The use of tardyferon in the combined treatment of patients with chronic atrophic gastritis and peptic ulcer complicated by hemorrhage].

Hepatic microsomal ethoxyresorufin O-deethylase-inducing potency in ovo and cytosolic Ah receptor binding affinity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: comparison of four avian species.

Postischemic proximal tubular resistance to oxidant stress and Ca²⁺ ionophore-induced attack. Implications for reperfusion injury.

Influence of five methylsulphonyl PCB congeners on frequency of micronucleated cells in cultured human lymphocytes by cytokinesis block method.

Irritant dermatitis among workers cleaning up a pesticide spill: California 1991.

Variation in the expression and/or phosphorylation of the human low molecular weight stress protein during in vitro cell differentiation.

Modulation of TCDD-induced wasting syndrome by portocaval anastomosis and vagotomy in Long-Evans and Han/Wistar rats.

ACTH-(1-24) blocks the decompensatory phase of the haemodynamic response to acute hypovolaemia in conscious rabbits.

Treatment of Philadelphia-chromosome-positive human leukemia in SCID mouse model with herbimycin A, bcr-abl tyrosine kinase activity inhibitor.

Activation of mesangial cells by the phosphatase inhibitor vanadate. Potential implications for diabetic nephropathy.

Correlation between toxicity and effects on intermediary metabolism in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated male C57BL/6J and DBA/2J mice.

Efficacy of oral iron therapy in patients receiving recombinant human erythropoietin.

Acinar cell respiration in experimental acute pancreatitis.

Antithrombin-TRI (Ala382 to Thr) causing severe thromboembolic tendency undergoes the S-to-R transition and is associated with a plasma-inactive high-molecular-weight complex of aggregated antithrombin.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) distribution and cytochrome P4501A induction in young adult and senescent male mice.

Hemoglobin-induced lipid peroxidation in the retina: a possible mechanism for macular degeneration.

Activation of casein kinase II in ML-1 human myeloblastic leukemia cells requires IGF-1 and transferrin.

Mechanisms of uremic inhibition of phagocyte reactive species production: characterization of the role of p-cresol.

The adverse effects of long-term cassava (*Manihot esculenta* Crantz) consumption.

Effects of inhalative exposure to dioxins in wood preservatives on cell-mediated immunity in day-care center teachers.

1-beta-D-arabinofuranosylcytosine activates tyrosine phosphorylation of p34cdc2 and its association with the Src-like p56/p53lyn kinase in human myeloid leukemia cells.

Flow cytometric analysis of the granulocyte respiratory burst: a comparison study of fluorescent probes.

Antioxidant effect of a Ginkgo biloba extract (EGb 761) on the retina.

Effect of supplementation with an iron-fortified milk on incidence of diarrhea and respiratory infection in urban-resident infants.

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on tryptophan and glucose homeostasis in the most TCDD-susceptible and the most TCDD-resistant species, guinea pigs and hamsters.

Survival after a severe iron poisoning treated with intermittent infusions of deferoxamine.

Analysis of the relationship between hemoglobin-oxygen affinity and lipid peroxidation during fever.

Role of the lung in accumulation and metabolism of xenobiotic compounds--implications for chemically induced toxicity.

Importance of the matrix and its chemical activation on the stability of immuno-adsorbents.

Nitric oxide. An important signaling mechanism between vascular endothelium and parenchymal cells in the regulation of oxygen consumption.

Evaluation of the cytotoxicity of 10 chemicals in human and rat hepatocytes and in cell lines: Correlation between in vitro data and human lethal concentration.

A structural study of the carboxyl terminal region of the human erythrocyte band 3 protein.

Human cytochromes P4501A1 and P4501A2: R-warfarin metabolism as a probe.

Factors influencing the protein binding of YH-439 using an equilibrium dialysis technique. A new hepatoprotective agent.

Occupational exposure to polychlorinated dibenzo-p-dioxins and dibenzofurans in a magnesium production plant.

An attempt to explain interindividual variability in 24-h urinary excretion of inorganic arsenic metabolites by C57 BL/6J mice.

Thrombin stimulates phosphorylation of insulin-like growth factor-1 receptor, insulin receptor substrate-1, and phospholipase C-gamma 1 in rat aortic smooth muscle cells.

Use of Mishell-Dutton culture for the detection of the immunosuppressive effect of iron-containing compounds.

Inhibition of tumor necrosis factor activity fails to restore 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-induced suppression of the antibody response to sheep red blood cells.

Selective depletion of cyclin-dependent kinases is associated with Fas-mediated apoptosis in human leukemia T-cell lines.

Perinatal exposure to polychlorinated biphenyls and dioxins through dietary intake.

Cardiovascular responses to cigarette smoke exposure in restrained conscious rats.

Comparative assessment of metabolic enzyme levels in macrophage populations of the F344 rat.

Induction of hepatic CYP1A2 by the oral administration of caffeine to rats: lack of association with the Ah locus.

Factors influencing the protein binding of azosemide using an equilibrium dialysis technique.

Evaluation of the biodistribution and in vivo biochemistry of ^{99m}Tc -cysteine and $^{99/99m}\text{Tc}$ -cysteine complexes--a potential renal imaging agent.

Differential proteolytic processing leads to multiple forms of the CA protein in avian sarcoma and leukemia viruses.

In utero and lactational exposure of the male rat to 2,3,7,8-tetrachlorodibenzo-p-dioxin: impaired prostate growth and development without inhibited androgen production.

Tyrosine kinase inhibitors inhibit multiple steps of the cell cycle of vascular smooth muscle cells.

Neuropeptide YY1 receptors-mediated increase in intracellular Ca²⁺ concentration via phospholipase C-dependent pathway in porcine aortic smooth muscle cells.

Changes associated with tyrosine phosphorylation during short-term hypoxia in retinal microvascular endothelial cells in vitro.

Impaired cellular immune response in harbour seals (*Phoca vitulina*) feeding on environmentally contaminated herring.

Mass spectrometric analysis of haemoglobin adducts formed by methyl bromide in vitro.

Reproductive effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in female rats: ovulation, hormonal regulation, and possible mechanism(s).

Cyclophosphamide: review of its mutagenicity for an assessment of potential germ cell risks.

Effect of stereochemistry on the oxidative metabolism of the cyclophosphamide metabolite aldophosphamide.

Levels of pollutants and their metabolites: exposures to organic substances.

Application of high-performance liquid chromatography to a fatality involving azide.

Halogenated aromatic hydrocarbons and toxicity equivalency factors (TEFs) from the public health assessment perspective.

Cytochromes P450 in cynomolgus monkeys mutagenically activate 2-amino-3-methylimidazo[4,5-f]quinoline (IQ) but not 2-amino-3,8-dimethylimidazo[4,5-f]quinoxaline (MeIQx).

Glutathione S-transferase 8-8 is localized in smooth muscle cells of rat aorta and is induced in an experimental model of atherosclerosis.

Temperature regulation and metabolism in rats exposed perinatally to dioxin: permanent change in regulated body temperature?

A stereotypic, transplantable liver tissue-culture system.

Chemical speciation of arsenic in urine of patients with blackfoot disease.

[The property of tetracyclines to induce methemoglobin formation in erythrocytes and to inactivate catalase when exposed to radiation in the visible range].

Thrombin induces the preproendothelin-1 gene in endothelial cells by a protein tyrosine kinase-linked mechanism.

Kinetic characterization of a carrier-mediated transport system for L-tryptophan in human blood platelets.

Dioxin concentrations in the blood of workers at municipal waste incinerators.

A peptide, ALTE, within the fimbrial subunit protein from *Porphyromonas gingivalis*, induces production of interleukin 6, gene expression and protein phosphorylation in human peripheral blood mononuclear cells.

Inhibition of lecithin: cholesterol acyltransferase activity in human blood plasma by cigarette smoke extract and reactive aldehydes.

Halogenated aromatic hydrocarbon-induced suppression of the plaque-forming cell response in B6C3F1 splenocytes cultured with allogenic mouse serum: Ah receptor structure activity relationships.

Photolabeling of a pore-forming toxin with the hydrophobic probe 2-[3H]diazofluorene. Identification of membrane-inserted segments of *Staphylococcus aureus* alpha-toxin.

Hypoxia-mediated induction of acidic/basic fibroblast growth factor and platelet-derived growth factor in mononuclear phagocytes stimulates growth of hypoxic endothelial cells.

Distribution, metabolism and excretion of pentachloroanisole in the beagle dog and miniature pig.

Structural and functional characterization of proteolytic fragments derived from the C-terminal regions of bovine fibrinogen.

Characterization of muconate and chloromuconate cycloisomerase from *Rhodococcus erythropolis* 1CP: indications for functionally convergent evolution among bacterial cycloisomerases.

Vascular smooth muscle cell heme oxygenases generate guanylyl cyclase-stimulatory carbon monoxide.

Ethanol ingestion on allylamine-induced experimental subendocardial fibrosis.

Perinatal exposure to polychlorinated biphenyls and dioxins and its effect on neonatal neurological development.

The blood-brain barrier: In vitro methods and toxicological applications.

A human erythrocyte-derived growth-promoting factor with a wide target cell spectrum: identification as catalase.

Inhibition by activated neutrophils of the Ca²⁺ pump ATPase of intact red blood cells.

[Changes in hematological indices, iron levels and marrow erythroids through autologous blood donation before cardiac surgery--predonation with versus without recombinant human erythropoietin].

Phenotypic analysis of spleen, thymus, and peripheral blood cells in aged C57B1/6 mice following long-term exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Transformation by v-erb-B - induction of apoptosis is abrogated in a myeloid cell-line.

Activation of the hypothalamic dorsomedial nucleus stimulates intestinal motility in rats.

Sequence of release of fibrinopeptide A from fibrinogen molecules by thrombin or Atroxin.

An in vitro method for determination of tissue partition coefficients of non-volatile chemicals such as 2,3,7,8-tetrachlorodibenzo-p-dioxin and estradiol.

Iron balance in menstruating women.

Mechanism for drug absorption from rat-liver surface membrane: effect of dose and transport inhibitors on the pharmacokinetics of phenol red.

Cytotoxic effects of several hopanoids on mouse leukemia L1210 and P388 cells.

Protein tyrosine kinase activation is required for LPS and PMA induction of tissue factor mRNA in human blood monocytes.

Excitatory amino acid release from astrocytes during energy failure by reversal of sodium-dependent uptake.

Induction of cytochrome P4501A1 by aryl hydrocarbon receptor agonists in porcine aorta endothelial cells in culture and cytochrome P4501A1 activity in intact cells.

Involvement of hydrogen and lipid peroxides in acute tobacco smoking-induced platelet hyperactivity.

Thrombin receptor activation stimulates astrocyte proliferation and reversal of stellation by distinct pathways: involvement of tyrosine phosphorylation.

The primary structure of a hemorrhagic factor, HR2b, from the venom of Okinawa habu (*Trimeresurus flavoviridis*).

Interleukin-3 facilitates glucose transport in a myeloid cell line by regulating the affinity of the glucose transporter for glucose: involvement of protein phosphorylation in transporter activation.

Internal exposure of waste incineration workers to organic and inorganic substances.

Substrate-specificity of mammalian tissue-bound semicarbazide-sensitive amine oxidase.

Proliferative capacity of marmoset lymphocytes after tetanus vaccination and lack of 2,3,7,8-tetrachlorodibenzo-p-dioxin to reduce a booster effect.

Chlorinated dibenzo-p-dioxins and dibenzofurans and the human immune system. 2. In vitro proliferation of lymphocytes from workers with quantified moderately-increased body burdens.

Fish oil enhances pentachlorobenzene metabolism and reduces its accumulation in rats.

BW-755C diminishes smoke-induced pulmonary edema.

Analysis of 4-hydroxycyclophosphamide in human blood.

Platelet-collagen interactions.

Toxicology of methyl bromide.

Oxidative stress from environmental pollutants.

Mechanistic study on toxicity of positively charged liposomes containing stearylamine to blood.

Cytoplasmic calcium level and membrane fluidity of platelets contacting poly(acrylamide-co-methacrylic acid) particles with different surface properties.

Analysis of whole-blood cyclosporin G by liquid chromatography in renal transplant recipients.

Tyrosine kinase inhibitors potentiate the induction of low density lipoprotein receptor gene expression by hepatocyte growth factor.

Mechanism of cytotoxicity of paraquat. III. The effects of acute paraquat exposure on the electron transport system in rat mitochondria.

Body size and the toxicokinetics of trifluralin in rainbow trout.

Nephrotoxicity and hepatotoxicity of 5,6-dichloro-4-thia-5-hexenoic acid: evidence for fatty acid beta-oxidation-dependent bioactivation.

Acute 2,4-dichlorophenoxyacetic acid intoxication in cattle.

[Acetylcholinesterase in the erythrocyte membrane].

[Pathologic characteristics of diffuse alveolar damage induced by paraquat in rat lungs].

Effect of aldehyde dehydrogenase and alcohol dehydrogenase inhibitors and ethanol on blood and liver ketone bodies in the rat.

Nitric oxide as a mediator of oxidant lung injury due to paraquat.

Cyclooxygenase and lipoxygenase inhibition by BW-755C reduces acrolein smoke-induced acute lung injury.

Toxicokinetics and biotransformation of pentachlorophenol in the sea urchin (*Strongylocentrotus purpuratus*).

Influence of lindane and paraquat on oxidative stress-related parameters of erythrocytes in vitro.

Cinnamaldehyde-induced micronuclei in rodent liver.

Identification and dynamics of paraquat in the bone marrow, thymus and spleen in rats using immunohistochemical techniques.

[Organic trace element pollution in water--a potential health risk for long-term dialysis patients].

Genetic safety evaluation of pesticides in different short-term tests.

[Methemoglobinemia induced by sodium chlorate: value of hyperbaric oxygen therapy].

Bilateral spontaneous pneumothoraces, pneumopericardium, pneumomediastinum, and subcutaneous emphysema: a rare presentation of paraquat intoxication.

Selective myelotoxicity of propanil.

Characterization of the capsaicin-sensitive component of cyclophosphamide-induced inflammation in the rat urinary bladder.

An assessment of the genetic toxicity of atrazine: relevance to human health and environmental effects.

Fatal overdose of 2,4-dichlorophenoxyacetic acid (2,4-D).

High serum concentrations of paraquat increase apparent creatinine concentrations.

Comparison of two methods for determining the toxicokinetics of fluazifop-butyl after intravenous dosing in rats.

Polychlorinated biphenyl levels in the tissues of exposed and nonexposed humans.

[The enzymes of mono-oxygenase oxidation in the lymphocytes and liver of persons subjected to chlorophenoxy herbicide exposure].

Direct detection of the intracellular formation of carboxyphosphamides using nuclear magnetic resonance spectroscopy.

Environmental behavior of bentazon herbicide.

Aldehyde dehydrogenase of mice inhibited by thiocarbamate herbicides.

Free radicals in the pathophysiology of pulmonary injury and disease.

Erythrocyte catalase inactivation (H₂O₂ production) by ascorbic acid and glucose in the presence of aminotriazole: role of transition metals and relevance to diabetes.

Comparison of dibenzodioxin levels in blood and milk in agricultural workers and others following pentachlorophenol exposure in China.

Role of hydrogen peroxide in hypoxia-induced erythropoietin production.

A role for thyroid hormones in cold-induced elevation of blood pressure and cardiac hypertrophy.

Pharmacokinetic modeling of 2,4-dichlorophenoxyacetic acid (2,4-D) in rat and in rabbit brain following single dose administration.

Disposition and metabolism of radiolabelled pentachloroanisole in rats and rabbits.

Effect of in vivo desensitization to leukotriene B₄ on eosinophil infiltration in response to C₅a in guinea-pig skin.

Dioxins in blood from Swedish phenoxy herbicide workers.

Ifosfamide induced depletion of glutathione in human peripheral blood lymphocytes and protection by mesna.

Effect of dosing vehicle on the dermal absorption of fluazifop-butyl and fomesafen in rats in vivo.

Bacterial oxidative stress substance spontaneously recycles to form 2-methylbutane-1,2,3,4-tetraol-1,2-cyclophospho-4-phosphate.

Aldose reductase-catalyzed reduction of acrolein: implications in cyclophosphamide toxicity.

Iron release, lipid peroxidation, and morphological alterations of erythrocytes exposed to acrolein and phenylhydrazine.

Hydrogen peroxide production by red blood cells.

Characterization of a thioredoxin-related surface protein.

Short-term toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in laboratory animals: effects, mechanisms, and animal models.

Patterns of tyrosine phosphorylation differ in vascular hypertrophy and hyperplasia.

Transformation by v-src causes transient induction followed by repression of mouse thrombospondin-1.

[Treatment with prophylactic doses of ferrous sulphate as an intervention measure in the campaign++ against iron deficiency in children cared for in basic health units].

Growth of erythroid colonies in chronic myelogenous leukemia is independent of erythropoietin only in the presence of steel factor.

In vivo antitumor activity of herbimycin A, a tyrosine kinase inhibitor, targeted against BCR/ABL oncoprotein in mice bearing BCR/ABL-transfected cells.

Acycloguanosine and herbimycin A co-operatively inhibit proliferation and induce erythrodifferentiation of human myeloid leukemia K562 cells.

Subchronic (13-week) toxicity of heptachlorodibenzo-p-dioxin in male Sprague-Dawley rats.

[Mechanisms for cell damage in acute pancreatitis using isolated acinar cells].

[Erythropoietin].

Integrin alpha v beta 3 differentially regulates adhesive and phagocytic functions of the fibronectin receptor alpha 5 beta 1.

The role of DNA damage in the resistance of human chronic myeloid leukemia cells to cyclophosphamide analogues.

Therapy with recombinant human erythropoietin in patients with myelodysplastic syndromes.

Aftermath of a chemical spill: psychological and physiological sequelae.

Studies of the oxidation of ethanol to acetaldehyde by oxyhemoglobin using fluorogenic high-performance liquid chromatography.

Selective closure of the vascular bed of an experimental glioma model during in situ saline perfusion.

Treatment of methyl bromide poisoning with haemodialysis.

Neurotoxins: a neuroscience nursing challenge.

Psychological, psychosocial, and psychophysiological sequelae in a community affected by a railroad chemical disaster.

Established IL-2-dependent double-negative (CD4⁻ CD8⁻) TCR alpha beta/CD3⁺ ATL cells: induction of CD4 expression.

Blood levels of 2,3,7,8-tetrachlorodibenzo-p-dioxin and gamma-globulins in a follow-up investigation of employees with chloracne.

[Shock caused by poisoning. Use of cardiotropic agents].

Bronchial necrosis and granuloma induced by the aspiration of a tablet of ferrous sulphate.

The effects of iron supplementation during pregnancy, given by traditional birth attendants, on the prevalence of anaemia and malaria.

Effect of 1,2,4-trichlorodibenzo-p-dioxin on drug-metabolizing enzymes in the rat liver.

Survey of health and use characterization of pesticide applicators in Minnesota.

Hypoxic stimulation of vascular endothelial growth factor expression in vitro and in vivo.

Effects of inorganic arsenicals on DNA synthesis in unsensitized human blood lymphocytes in vitro.

Detection of apoptosis in leukemic and breast cancer cells with monoclonal antibody to single-stranded DNA.

Time-response necessary in validation for extraction of pesticides from cloth patches used in field exposure studies.

Acute inflammatory response to sheep red blood cells in mice treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin: the role of proinflammatory cytokines, IL-1 and TNF.

Iron deficiency in two adolescents with conduct, dysthymic and movement disorders.

Deaths from primary brain cancers, lymphatic and haematopoietic cancers in agricultural workers in the Republic of Ireland.

The use of zinc protoporphyrin in screening young children for iron deficiency.

Dentate gyrus and olfactory bulb responses to olfactory and noxious stimulation in urethane anaesthetized rats.

Study of the effector mechanism involved in the production of haemorrhagic necrosis of the small intestine in rat passive anaphylaxis.

Erythropoietin increases hemoglobin during radiation therapy for cervical cancer.

Synthesis and tissue biodistribution of [ω -¹¹C]palmitic acid. A novel PET imaging agent for cardiac fatty acid metabolism.

Activation of protein kinase C down-regulates leukotriene C₄ synthase activity and attenuates cysteinyl leukotriene production in an eosinophilic substrain of HL-60 cells.

Morbidity follow up study of BASF employees exposed to 2,3,7, 8-tetrachlorodibenzo-p-dioxin (TCDD) after a 1953 chemical reactor incident.

Iron supplementation in children after cardiopulmonary bypass for surgical repair of congenital heart disease.

Fc epsilon RI-stimulated Ca(2+)-dependent secretion from rat basophilic leukemia (RBL-2H3) cells permeabilized with Staphylococcal alpha-toxin: Fc epsilon RI-operated signals are not mimicked by the actions of GTP gamma S.

Chloracne. Some recent issues.

Increased in vitro tumour necrosis factor-alpha production in iron deficiency anemia.

Tyrosine kinase inhibitor-induced differentiation of K-562 cells: alterations of cell cycle and cell surface phenotype.

Posttranslational sulfation of factor V is required for efficient thrombin cleavage and activation and for full procoagulant activity.

Urea-derived cyanate forms epsilon-amino-carbamoyl-lysine (homocitrulline) in leukocyte proteins in patients with end-stage renal disease on peritoneal dialysis.

Effect of hypothermic cardioplegia on cardiac protection--I. Effect of hypothermic cardioplegia on the cytosolic Ca²⁺ concentration in rat ventricular myocytes.

Postischemic inhibition of cerebral cortex pyruvate dehydrogenase.

Bioavailability of iron from oral ferric polymaltose in humans.

Treatment of deeply infiltrating endometriosis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin-induced thymic atrophy and lymphocyte stem cell alterations by mechanisms independent of the estrogen receptor.

Effects of various drugs (staurosporine, herbimycin A, ketotifen, theophylline, FK506 and cyclosporin A) on eosinophil viability.

Dexamethasone, beta-estradiol, and 2,3,7,8-tetrachlorodibenzo-p-dioxin elicit thymic atrophy through different cellular targets.

In vivo and in vitro 4-amino-2,6-dichlorophenol nephrotoxicity and hepatotoxicity in the Fischer 344 rat. [SMANCS/lipiodol].

ONO-4007, a new synthetic lipid A derivative, induces differentiation of rat myelomonocytic leukemia cells in vitro and in vivo.

Craniofacial surgery in the Jehovah's Witness patient.

Iron supplementation improves appetite and growth in anemic Kenyan primary school children.

Failure of recombinant human interleukin-3 therapy to induce erythropoiesis in patients with refractory Diamond-Blackfan anemia.

Reoxygenation-induced relaxation of coronary arteries. A novel endothelium-dependent mechanism.

Anaemia, iron deficiency and malaria in a rural community in Brazilian Amazon.

Molecular mechanism of drug photosensitization. 5. Photohemolysis sensitized by Suprofen.

Leukemia mortality and farming in the prairie provinces of Canada.

Tumor-promoting effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin and phenobarbital in initiated weanling Sprague-Dawley rats: a quantitative, phenotypic, and ras p21 protein study.

Cell proliferation status, cytokine action and protein tyrosine phosphorylation modulate leukotriene biosynthesis in a basophil leukaemia and a mastocytoma cell line.

Severe iron deficiency anaemia in Fiji children.

Leukemia and brain tumors in Norwegian railway workers, a nested case-control study.

Functional consequences of iron supplementation in iron-deficient female cotton mill workers in Beijing, China.

Side effects of iron supplements in blood donors: superior tolerance of heme iron.

Induction of heat-shock protein synthesis and thermotolerance in EL-4 ascites tumor cells by transient ATP depletion after ischemic stress.

Receptor-mediated binding of IgE-sensitized rat basophilic leukemia cells to antigen-coated substrates under hydrodynamic flow.

Iron deficiency and infant development.

Y2 receptors for neuropeptide Y are coupled to three intracellular signal transduction pathways in a human neuroblastoma cell line.

Potent activation of phospholipase D by phenylarsine oxide in rat basophilic leukemia (RBL-2H3) cells.

Effects of herbimycin A and ST638 on Fc epsilon receptor-mediated histamine release and Ca²⁺ signals in rat basophilic leukemia (RBL-2H3) cells.

Effects of herbimycin A and its derivatives on growth and differentiation of Ph1-positive acute lymphoid leukemia cell lines.

Characterization and modulation of drug transport kinetics in K562 c1.6 daunorubicin-resistant cell line.

Increased native chemiluminescence in granulocytes isolated from synovial fluid and peripheral blood of patients with rheumatoid arthritis.

[Effect of iron deficiency on attention capacity among school children].

Effect of herbimycin A, an inhibitor of tyrosine kinase, on protein tyrosine kinase activity and phosphotyrosyl proteins of Ph1-positive leukemia cells.

Residue at position 331 in the IgG1 and IgG4 CH2 domains contributes to their differential ability to bind and activate complement.

Human interleukin-3 stimulates a phosphatidylcholine specific phospholipase C and protein kinase C translocation.

Decreased clearance of uraemic and mildly carbamylated low-density lipoprotein.

[Determination of serum ferritin: ideas for avoiding induced ferropenia in blood donors].

Developmental toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in the most TCDD-resistant and -susceptible rat strains.

Ca(2+)-calmodulin-dependent phosphorylation of arginine in histone 3 by a nuclear kinase from mouse leukemia cells.

Reversal agent inhibition of the multidrug resistance pump in human leukemic lymphoblasts.

Difference in energy metabolism between fresh and warm ischemic canine pancreases during preservation by the two-layer method.

[Plasma renin activity in tachistin-stimulated hypercalcemia and under the effect of chlorazine].

Effects of alpha-tocopherol on lipid peroxidation and mitochondrial reduction of tetraphenyl tetrazolium in the rat brain.

Human intestinal alkaline phosphatase-binding IgG in patients with severe bacterial infections.

[High altitude anemia: validity of definition criteria].

An evaluation of the HemoCue for measuring haemoglobin in field studies in Jamaica.

Age- and feeding-dependent production of carbonyl compounds in hypoxic heart. The role of carbonyls produced in connective tissue modification.

Histochemical demonstration of free radicals (H₂O₂) in ischemic brain edema and protective effects of human recombinant superoxide dismutase on ischemic neuronal damage.

[A comparative study of the effectiveness of iron preparations in the treatment of iron deficiency anemias in pregnant women].

Alternate immune system targets for TCDD: lymphocyte stem cells and extrathymic T-cell development.

Decreased phagolysosomal fusion of peripheral blood monocytes from patients with thalassemia major.

Fetal globin stimulation during a short-term trial of erythropoietin in HbS/beta-thalassemia patients.

Mechanisms of chemical injury of thyroid gland.

A targeting model of boron neutron-capture therapy to hepatoma cells in vivo with a boronated anti-(alpha-fetoprotein) monoclonal antibody.

Tyrosine kinases regulate the cytoskeletal attachment of integrin alpha IIb beta 3 (platelet glycoprotein IIb/IIIa) and the cellular retraction of fibrin polymers.

NTP Toxicology and Carcinogenesis Studies of 4,4'-Thiobis(6-*t*-butyl-*m*-cresol) (CAS No. 96-69-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Elevated dioxin blood levels in British chemical workers.

Application of magnetic sector thermal ionization mass spectrometry to studies of erythrocyte iron incorporation in small children.

Effect of metabolic inhibitors on K⁺ transport across the lamprey (*Lampetra fluviatilis*) erythrocyte membrane.

Involvement of protein-tyrosine kinase p72syk in collagen-induced signal transduction in platelets.

Interactions of human blood plasma with hydrogen peroxide and hypochlorous acid.

Expression of the multidrug resistance associated protein and P-glycoprotein in doxorubicin-selected human myeloid leukemia cells.

Genistein reduces tumor necrosis factor alpha-induced plasminogen activator inhibitor-1 transcription but not urokinase expression in human endothelial cells.

The relationship of blood- and urine-boron to boron exposure in borax-workers and usefulness of urine-boron as an exposure marker.

Laboratory results for selected target organs in 138 individuals occupationally exposed to TCDD.

Elevated dioxin blood levels in Russian chemical workers and their children following maternal exposure.

Effects of highly toxic organochlorine compounds retained in human body on induction of sister chromatid exchanges in cultured human lymphocytes.

Dioxin and PCB levels in blood and human milk in relation to living areas in The Netherlands.

Accumulation and persistence of individual polychlorinated biphenyl congeners in liver, blood, and adipose tissue of rats following dietary exposure to Aroclor 1254.

Mutagenic effects of heavy ions in bacteria.

2,4-Dinitrophenol and carbonylcyanide *p*-trifluoromethoxyphenylhydrazone activate the glutathione S-conjugate transport ATPase of human erythrocyte membranes.

Pathways of heat shock protein 28 phosphorylation by TNF in human fibroblasts.

Stimulation of erythrocyte membrane Mg(2⁺)-ATPase activity by dinitrophenol and other membrane-disturbing agents.

Erythrocyte antioxidant enzyme activity in CMF treated breast cancer patients.

Mitogenic signaling of thrombin in mesangial cells: role of tyrosine phosphorylation.

Inhibition of glucose transport in human erythrocytes by 2,3-dioxindole (isatin).

Evidence of two mechanisms of prostaglandin release in an in vitro model of muscle damage. Possible therapeutic implications.

[Colony formation of mouse primitive hemopoietic progenitors with interleukin-6 and phorbol ester, and their signal transduction].

Mapping of bactericidal epitopes on the P2 porin protein of nontypeable *Haemophilus influenzae*.

Thrombin-induced Ca^{2+} influx and protein tyrosine phosphorylation in endothelial cells is inhibited by herbimycin A.

Crocidolite-induced reactive oxygen metabolites generation from human polymorphonuclear leukocytes.

Transcriptional suppression of the human T-cell leukemia virus type I long terminal repeat occurs by an unconventional interaction of a CREB factor with the R region.

Pathological findings in rabbits and sheep following the subacute administration of triphenyltin acetate.

Dithio-bis-mercaptoethanesulphonate (DIMESNA) does not prevent cellular damage by metabolites of ifosfamide and cyclophosphamide in LLC-PK1 cells.

Identification of regions of bovine factor VII essential for binding to tissue factor.

ACTIVE Na^{+} , Cl^{-} AND HCO_3^{-} -DEPENDENT ACID EXTRUSION IN ATLANTIC COD RED BLOOD CELLS IN WINTER ACTIVATED BY HYPERCAPNIA.

Hepatobiliary disposition of 3'-azido-3'-deoxythymidine (AZT) in the rat: effect of phenobarbitone induction.

Specific determination of cyanide in blood by headspace gas chromatography.

Specificity of antibodies to type II collagen in early rheumatoid arthritis.

Isolation of phosphorylated calmodulin from rat liver and identification of the in vivo phosphorylation sites.

Interaction between the central histaminergic and the muscarinic cholinergic systems.

Evidence for histamine uptake by murine hematopoietic progenitors.

Clinical laboratory manifestations of exposure to background levels of dioxins in the perinatal period.

PET studies of the uptake of (S)- and (R)-[^{11}C]nicotine in the human brain: difficulties in visualizing specific receptor binding in vivo.

Cardiovascular effects of NaCl microinjections into the nucleus of the solitary tract.

Measurement of hemoglobin and albumin adducts of tetrachlorobenzoquinone.

An improved X-ray spectrometric method for the determination of bromide in whole blood of workers occupationally exposed to methyl bromide.

Effects of smoking and drinking habits on urinary o-cresol excretion after occupational exposure to toluene vapor among Chinese workers.

Blockade of ovulation in the rat by the fungicide sodium N-methyldithiocarbamate: relationship between effects on the luteinizing hormone surge and alterations in hypothalamic catecholamines.

Role of P-selectin and leukocyte activation in polymorphonuclear cell adhesion to surface adherent activated platelets under physiologic shear conditions (an injury vessel wall model).

UV-dependent quinolone-induced human erythrocyte membrane lipid peroxidation: studies on the phototoxicity of Y-26611, a new quinolone derivative.

Primary structure and reactive site of Streptovercillium anticoagulant (SAC), a novel protein inhibitor of blood coagulation produced by Streptovercillium cinnamoneum subsp. cinnamoneum.

Leukemia inhibitory factor and nerve growth factor are retrogradely transported and processed by cultured rat sympathetic neurons.

Effect of metabolic alterations on the accumulation of technetium-99m-labeled d,l-HMPAO in slices of rat cerebral cortex.

Investigation of dirithromycin and erythromycylamine uptake by human neutrophils in vitro.

Serum modulation of the effects of TCDD on the in vitro antibody response and on enzyme induction in primary hepatocytes.

Synthesis and evaluation of novel thiazolidine derivatives as thromboxane A₂ receptor antagonists.

Purification and characterization of bothrombin, a fibrinogen-clotting serine protease from the venom of Bothrops jararaca.

Mitogen-activated protein kinases and ribosomal S6 protein kinases are involved in signaling pathways shared by interleukin-11, interleukin-6, leukemia inhibitory factor, and oncostatin M in mouse 3T3-L1 cells.

Acute cytotoxicity of ten chemicals in human and rat cultured hepatocytes and in cell lines: Correlation between in vitro data and human lethal concentrations.

In vitro and in vivo transport of zidovudine (AZT) across the blood-brain barrier and the effect of transport inhibitors.

The thymus does not mediate 2,3,7,8-tetrachlorodibenzo-p-dioxin-elicited alterations in bone marrow lymphocyte stem cells.

Study of tissue-type plasminogen activator binding sites on fibrin using distinct fragments of fibrinogen.

Synthesis and expression of a gene coding for Erythrina trypsin inhibitor (ETI).

Increased proliferation, cytotoxicity, and gene expression after stimulation of human peripheral blood T lymphocytes through a surface ganglioside (GD3).

Attenuation of human leukocyte adherence to endothelial cell monolayers by tyrosine kinase inhibitors.

Effect of Paraquat Administration on Antioxidative Enzyme Activities and Oxidative Damage in the Blood and Liver of Senescence-accelerated Mice.

A physiologically based mathematical model of dermal absorption in man.

[Digoxin content in blood lipids of children, athletes, sports ground attendants and residents after contact with dioxin-containing surface slag (Kieselrot)].

Direct exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) increases infectivity of human erythrocytes to a malarial parasite.

Lack of direct immunosuppressive effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on human peripheral blood lymphocyte subsets in vitro.

Comparative investigations of the genotoxic effects of metals in the single cells gel (SCG) assay and the sister chromatid exchange (SCE) test.

Aryl hydrocarbon or dioxin receptor: biologic and toxic responses.

Metabolism of dichloromethane (methylene chloride) to formaldehyde in human erythrocytes: influence of polymorphism of glutathione transferase theta (GST T1-1).

Permeability changes in the blood-brain barrier of neonate and adult rats after thiobencarb exposure.

[The place of pentachlorophenol in general medicinal practice].

Transport of 2,4,5-trichlorophenoxyacetic acid across the blood-cerebrospinal fluid barrier of the rabbit.

Aminoguanidine: a drug proposed for prophylaxis in diabetes inhibits catalase and generates hydrogen peroxide in vitro.

[Binding of toxic substances and suppression of their toxicities by albumin--studies on psychosine and pentachlorophenol].

Distribution and elimination of the herbicide propanil in the channel catfish (*Ictalurus punctatus*).

The pneumotoxicant paraquat induces IL-8 mRNA in human mononuclear cells and pulmonary epithelial cells.

In vitro inactivation of glucose-6-phosphate dehydrogenase from human red blood cells by acrolein: a possible biomarker of exposure.

Genotoxic and teratogenic effect of pentachlorophenol, pollutant present in continental water bodies in the south of Chile.

Effect of aggressive haemoperfusion on the clinical course of patients with paraquat poisoning.

Effect of dehydroproline as a collagen synthetic inhibitor in paraquat-induced pulmonary fibrosis in beagle dogs.

Genotoxicity testing of the herbicide Roundup and its active ingredient glyphosate isopropylamine using the mouse bone marrow micronucleus test, *Salmonella* mutagenicity test, and *Allium* anaphase-telophase test.

[Do electromagnetic fields or chemicals cause cancer?].

Pentachlorophenol carcinogenicity: extrapolation of risk from mice to humans.

Charcoal haemoperfusion in drug intoxication.

Haemotoxic effect of phenylurea herbicides in rats: role of haemoglobin-adduct formation in splenic toxicity.

Toxicological and immune findings in workers exposed to pentachlorophenol (PCP).

Radiometric assay of red cell and plasma cholinesterase in pesticide applicators from Minnesota.

An epidemiological study of the health of Sri Lankan tea plantation workers associated with long term exposure to paraquat.

Results with OECD recommended positive control sensitizers in the maximization, Buehler and local lymph node assays.

Application of microencapsulation for toxicology studies. III. Bioavailability of microencapsulated cinnamaldehyde.

High-dose chemotherapy-induced platelet defect: inhibition of platelet signal transduction pathways.

Organophosphate poisoning.

Survival of a paraquat-poisoned patient, despite late (4 days) referral and initiation of conventional haemoperfusion treatment.

[Cytokines and pulmonary fibroses].

The protective effect of heat stress against reperfusion arrhythmias in the rat.

Alterations of peroxisomal function in ischemia-reperfusion injury of rat kidney.

Hexachlorobenzene-induced hypothyroidism. Involvement of different mechanisms by parent compound and metabolite.

Origin of reactive oxygen species in erythrocytes infected with *Plasmodium falciparum*.

Role of catalase and heat shock protein on recovery of cardiac endothelial and mechanical function after ischemia.

The analysis of ifosfamide and its metabolites (review).

Hyperbaric oxygen treatment for experimental cyclophosphamide-induced hemorrhagic cystitis.

Simple sensitive solid-phase extraction of paraquat from plasma using cyanopropyl columns.

Haemolysis of human erythrocytes by pentachlorophenol and its suppression by albumin.

Effect of excess alpha-hemoglobin chains on cellular and membrane oxidation in model beta-thalassaemic erythrocytes.

Modeling blood/plasma concentrations in dosed feed and dosed drinking water toxicology studies.

Hydrogen peroxide production by monoamine oxidase during ischemia-reperfusion in the rat brain.

Intracellular catalase inhibition does not predispose rat heart to ischemia-reperfusion and hydrogen peroxide-induced injuries.

Extraction and quantitation of paraquat and diquat from blood.

Protective role for neuropeptides in acute pulmonary response to acrolein in guinea pigs.

Effect of ifosfamide metabolites on sodium-dependent phosphate transport in a model of proximal tubular cells (LLC-PK1) in culture.

Metabolism of N-[4-chloro-2-fluoro-5-[(1-methyl-2-propynyl)oxy]phenyl]-3,4,5,6-tetrahydrophthalimide (S-23121) in the rat. II. Absorption, disposition, excretion and biotransformation.

Highly cooperative inhibition of acetylcholinesterase by pentachlorophenol in human erythrocytes.

Effect of herbicide formulation on atrazine residue removal from chemical plant workers' protective clothing.

PGI₂ production and angiotensin converting enzyme activity in cultured porcine pulmonary artery endothelial cells treated with paraquat.

Nitro blue tetrazolium staining: a morphological demonstration of superoxide in the rat retina.

Autoxidation of cysteine generates hydrogen peroxide: cytotoxicity and attenuation by pyruvate.

[Studies on quantitative analysis of paraquat in whole blood--the evaluation of pre-treatments and analytical methods].

Transport characteristics of paraquat across rat intestinal brush-border membrane.

Occupational exposure of Sri Lankan tea plantation workers to paraquat.

Tyrphostin-induced inhibition of p210^{bcr-abl} tyrosine kinase activity induces K562 to differentiate.

Comparison of the pharmacokinetics of 1,2-dimethyl-3-hydroxypyrid-4-one (L1) in healthy volunteers, with and without co-administration of ferrous sulfate, to thalassemia patients.

Erythropoietin increases hemoglobin in cancer patients during radiation therapy.

New insight into oncoprotein-targeted antitumor effect: herbimycin A as an antagonist of protein tyrosine kinase against Ph1-positive leukemia cells.

Cancer in a young population in a dioxin-contaminated area.

Effect of dietary iron on the course of *Plasmodium berghei* malaria in young rats.

In vitro study of pesticide hematotoxicity in human and rat progenitors.

Photolability and photohemolytic studies of fibrates.

In vitro phototoxicity of clofibrate. Photochemical and photohemolytic studies on its metabolite clofibric acid.

Tumor cell heme uptake induces ferritin synthesis resulting in altered oxidant sensitivity: possible role in chemotherapy efficacy.

Effects of pre- and postnatal exposure to chlorinated dioxins and furans on human neonatal thyroid hormone concentrations.

Ascorbigen and other indole-derived compounds from Brassica vegetables and their analogs as anticarcinogenic and immunomodulating agents.

Subchronic toxicity of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats.

Genistein exhibits preferential cytotoxicity to a leukemogenic variant but induces differentiation of a non-leukemogenic variant of the mouse monocytic leukemia Mm cell line.

Russophelins B, C, D, E and F, new cytotoxic substances from the mushroom *Russula subnigrans* Hongo.

[Iron deficiency anemia is not always simple].

Identification and characterization of an acidic major surface glycoprotein from procyclic stage *Trypanosoma congolense*.

Role of p21 RAS in p210 bcr-abl transformation of murine myeloid cells.

Cancer incidence in a population accidentally exposed to 2,3,7,8-tetrachlorodibenzo-para-dioxin.

[Anticancer agents targeting oncogene products].

The cardioprotective, vasorelaxant and electrophysiological profile of the large conductance calcium-activated potassium channel opener NS-004.

Changes in iron status during competitive season in female collegiate swimmers.

Chromium content in human skin after in vitro application of ordinary cement and ferrous-sulphate-reduced cement.

Thromboxane A₂ stimulates vascular smooth muscle hypertrophy by up-regulating the synthesis and release of endogenous basic fibroblast growth factor.

[Preoperative collection of autologous blood with recombinant human erythropoietin therapy].

Induced photolysis of rabbit red blood cells by several photosensitizers.

Collagen characterization in volume-overload- and pressure-overload-induced cardiac hypertrophy in minipigs.

[Protein tyrosine kinase inhibitor, herbimycin A].

Iron for chronic and persistent akathisia?

Sodium azide protects against ischemia-induced acute renal failure in rats.

Iron status and growth of rats fed different dietary iron sources.

Liver damage due to free radicals.

BCR/ABL oncoprotein-targeted antitumor activity of antisense oligodeoxynucleotides complementary to bcr/abl mRNA and herbimycin A, an antagonist of protein tyrosine kinase: inhibitory effects on in vitro growth of Ph1-positive leukemia cells and BCR/ABL oncoprotein-associated transformed cells.

Herbimycin A, a pp60c-src tyrosine kinase inhibitor, inhibits osteoclastic bone resorption in vitro and hypercalcemia in vivo.

Increased formation of 8-hydroxydeoxyguanosine, an oxidative DNA damage, in lymphoblasts from Fanconi's anemia patients due to possible catalase deficiency.

An acute model for IgA-mediated glomerular inflammation in rats induced by monoclonal polymeric rat IgA antibodies.

Renal and hepatic toxicity of monochloroacetanilides in the Fischer 344 rat.

Identification and purification of a novel serine proteinase inhibitor.

Effectiveness of iron-fortified infant cereal in prevention of iron deficiency anemia.

Severe anemia in the Jehovah's Witness: case report and discussion.

Experimental studies on the mechanisms of tiaprofenic acid photosensitization.

[Effects of disinfectants on erythrocytes and isolated hepatocytes from rats and surface tension].

Aortic collagen alterations in human diabetes mellitus. Changes in basement membrane collagen content and in the susceptibility of total collagen to cyanogen bromide solubilisation.

Combined oestrogen-progestin treatment of vaginal haemorrhage following gonadotrophin-releasing hormone agonist therapy of uterine myomas.

Increased serum catalase activity in rats subjected to thermal skin injury.

Angiotensin converting enzyme inhibitor, captopril, inhibits cardiac hypertrophy without changing collagen types and concentration in spontaneously hypertensive rats.

Characterization and localization of an ATP-diphosphohydrolase on the external surface of the tegument of *Schistosoma mansoni*.

DNA topoisomerases and the DNA lesion in human genetic instability syndromes.

Desensitization of beta-1 and beta-2, but not beta-3, adrenoceptor-mediated lipolytic responses of adipocytes after long-term norepinephrine infusion.

Molecular mechanism of drug photosensitization. 4. Photohemolysis sensitized by carprofen.

Iron protein succinylate in the treatment of iron deficiency: controlled, double-blind, multicenter clinical trial on over 1,000 patients.

The effect of NG-nitro-L-arginine methyl ester upon basal blood flow and endothelium-dependent vasodilatation in the dog hindlimb.

Calcium ions are required for cell fusion mediated by the CD4-human immunodeficiency virus type 1 envelope glycoprotein interaction.

[Mechanism of the cytologic action of streptolysin O: effect of scavengers of active oxygen species and complexons on erythrocyte hemolysis].

Red blood cell regeneration induced by subcutaneous recombinant erythropoietin: iron-deficient erythropoiesis in iron-replete subjects.

Effects of restricted feeding on the absorption, metabolism, and accumulation of pentachlorobenzene in rats.

The effect of ischaemia on xanthine oxidase activity in rat intestine and liver.

Role of tyrosine phosphorylation in radiation-induced activation of c-jun protooncogene in human lymphohematopoietic precursor cells.

Teratogenicity and immunotoxicity of 3,3',4,4',5-pentachlorobiphenyl in C57BL/6 mice.

Metabolism of iron from (3,5,5-trimethylhexanoyl)ferrocene in rats. A dietary model for severe iron overload.

Augmentation by erythropoietin of the fetal-hemoglobin response to hydroxyurea in sickle cell disease.

Reversal of developmental delays in iron-deficient anaemic infants treated with iron.

Modification of clastogenicity of three known clastogens by garlic extract in mice in vivo.

[2 cases report of open heart surgery with non-blood transfusion in severe valvular heart disease with cardiac cachexia--the efficacy of recombinant human erythropoietin].

Unchanged protein binding of penbutolol in renal insufficiency: a possible role of carbamylation.

[Iron deficiency anemia: a current problem].

Fe²⁺ ions and reduced glutathione--chemical activators of psoralen-sensitized photohaemolysis.

Activation of tumoricidal properties in macrophages by lipopolysaccharide requires protein-tyrosine kinase activity.

F reticulocyte response in sickle cell anemia treated with recombinant human erythropoietin: a double-blind study.

Suppressive effect of an oral sorbent on the accumulation of p-cresol in the serum of experimental uremic rats.

Ten and ninety-day toxicity studies of 2-chlorophenol in Sprague-Dawley rats.

Assessment of past occupational exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin using blood lipid analyses.

Malignant lymphomas and leukemias, and exposures in the wood industry: an industry-based case-referent study.

Assessment of vitamin A status in pregnant women as reflected by in vitro destruction of vitamin A by hemolysates and urinary ammonium nitrogen to creatinine ratio.

Synthesis of prothymosin alpha deduced from nucleotide sequence of the murine cDNA and its effect on the impaired T lymphocytes of uremic patients.

Cytogenetic studies in lymphocytes of workers exposed to 2,3,7,8-TCDD.

Mechanisms of carcinogenicity of methyl halides.

Comparative bioavailability of ferric polymaltose and ferrous sulphate in iron-deficient blood donors.

Protein tyrosine kinase activation is required for lipopolysaccharide induction of cytokines in human blood monocytes.

Transport mechanism of 3-hydroxy-3-methylglutaryl coenzyme A reductase inhibitors at the blood-brain barrier.

HLA class II molecule-mediated signal transduction mechanism responsible for the expression of interleukin-1 beta and tumor necrosis factor-alpha genes induced by a staphylococcal superantigen.

Cadmium induces interleukin-8 production in human peripheral blood mononuclear cells with the concomitant generation of superoxide radicals.

Inhibition of coaggregation between *Porphyromonas gingivalis* and *Streptococcus oralis* by fibrinogen fragments.

Platelet adhesion to cyanogen-bromide fragments of collagen alpha 1(I) under flow conditions.

Chlorate poisoning: mechanism of toxicity.

Intracellular signaling in arthropod blood cells: involvement of protein kinase C and protein tyrosine phosphorylation in the response to the 76-kDa protein or the beta-1,3-glucan-binding protein in crayfish.

Effect of dose, time, and pretreatment on the biliary excretion and tissue distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat.

Induction of neutrophil homotypic adhesion via sialophorin (CD43), a surface sialoglycoprotein restricted to haemopoietic cells.

Angiotensin II-mediated facilitation of sympathetic neurotransmission in the spontaneously hypertensive rat is not associated with neuronal uptake of the peptide.

Isolation and characterization of an intracellular serine proteinase inhibitor from a monkey kidney epithelial cell line.

Human xenobiotic metabolizing esterases in liver and blood.

Luminol-enhanced chemiluminescence induced in peripheral blood-derived human phagocytes: obligatory requirement of myeloperoxidase exocytosis by monocytes.

Differences in the transbilayer and lateral motions of fluorescent analogs of phosphatidylcholine and phosphatidylethanolamine in the apical plasma membrane of bovine aortic endothelial cells.

Ifosfamide. Patient care management.

Importance of venular flow in control of arteriolar diameter in hamster cremaster muscle.

CYP1A1 mRNA levels as a human exposure biomarker: use of quantitative polymerase chain reaction to measure CYP1A1 expression in human peripheral blood lymphocytes.

Measurement of chromosomal aberrations, sister chromatid exchange, hprt mutations, and DNA adducts in peripheral lymphocytes of human populations at increased risk for cancer.

Genetic toxicity of a mixture of fifteen pesticides commonly found in the Italian diet.

Restricted transport of cyclosporin A across the blood-brain barrier by a multidrug transporter, P-glycoprotein.

Introduction of lysine and clot binding properties in the kringle one domain of tissue-type plasminogen activator.

Effects of oral administration of brassica secondary metabolites, allyl cyanide, allyl isothiocyanate and dimethyl disulphide, on the voluntary food intake and metabolism of sheep.

Responses of smooth muscle cells to platelet-derived growth factor are inhibited by herbimycin-A tyrosine kinase inhibitor.

The complete amino acid sequence of a thrombin-like enzyme/gyroxin analogue from venom of the bushmaster snake (*Lachesis muta muta*).

Ion transport ATPases as targets for free radical damage. Protection by an aminosteroid of the Ca²⁺ pump ATPase and Na⁺/K⁺ pump ATPase of human red blood cell membranes.

Evaluation of human blood lymphocytes as a model to study the effects of drugs on human mitochondria. Effects of low concentrations of amiodarone on fatty acid oxidation, ATP levels and cell survival.

NTP technical report on the toxicity studies of Pesticide/Fertilizer Mixtures Administered in Drinking Water to F344/N Rats and B6C3F1 Mice.

Photodynamic effects of new silicon phthalocyanines: in vitro studies utilizing rat hepatic microsomes and human erythrocyte ghosts as model membrane sources.

Relatively immediate relaxant effects of cholera toxin on isolated rabbit blood vessels.

A physiologically based pharmacokinetic model for 2,3,7,8-tetrabromodibenzo-p-dioxin (TBDD) in the rat: tissue distribution and CYP1A induction.

Sulphonylurea drugs no longer inhibit ATP-sensitive K⁺ channels during metabolic stress in cardiac muscle.

Purification, kinetic properties and primary structure of bovine erythrocyte acylphosphatase.

Effects of metabolic inhibition on cytoplasmic calcium and contraction in smooth muscle of rat portal vein.

Assignment of intrachain disulfide bonds in platelet-derived growth factor B-chain.

Circulating human pregnancy-associated plasma protein-A is disulfide-bridged to the proform of eosinophil major basic protein.

Enhancement of neutrophil-mediated injury to bovine pulmonary endothelial cells by *Pasteurella haemolytica* leukotoxin.

Erythrocyte incorporation of ingested ^{58}Fe by 56-day-old breast-fed and formula-fed infants.

Modification of P450 activity and its effect on 1,2-dichlorobenzene toxicity in Fischer 344 rats.

[Toxicology of tobacco].

Serum-stimulated cell cycle progression and stress protein synthesis in C3H10T1/2 fibroblasts treated with sodium arsenite.

Internalization and degradation of anti-CD4 monoclonal antibodies bound to human peripheral blood lymphocytes.

Purification of a *Pasteurella haemolytica* serotype 1-specific polysaccharide epitope by use of monoclonal antibody immunoaffinity.

NTP Toxicology and Carcinogenesis Studies of Pentachloroanisole (CAS No. 1825-21-4) in F344 Rats and B6C3F1 Mice (Feed Studies).

Acute inflammatory response to sheep red blood cell challenge in mice treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD): phenotypic and functional analysis of peritoneal exudate cells.

Propachlor-S-cysteine: a major circulating metabolite in the calf, pig and rat after administration of propachlor.

[Use of arylsulfenylchlorides for cleaving fibrinogen at methionine residues].

The amino terminal sequence of VP60 from rabbit hemorrhagic disease virus supports its putative subgenomic origin.

Movement of fluorescein and its glucuronide across retinal pigment epithelium-choroid.

A selection of biological indicators in occupational exposure to toluene and xylene.

Identification of 40 S ribosomal protein S6 phosphorylation sites in Swiss mouse 3T3 fibroblasts stimulated with serum.

Amino-acid sequence of the alpha D- and beta-polypeptide chains of the Japanese quail hemoglobin.

Measurements of year-long exposure to tree nursery workers using multiple pesticides.

Semicarbazide protection from in vivo oxidant injury of vascular tissue by allylamine.

The Streptococcus sanguis platelet aggregation-associated protein. Identification and characterization of the minimal platelet-interactive domain.

Nature and role of xenobiotic metabolizing esterases in rat liver, lung, skin and blood.

Polymorphism of glutathione conjugation of methyl bromide, ethylene oxide and dichloromethane in human blood: influence on the induction of sister chromatid exchanges (SCE) in lymphocytes.

Mechanism of cytoplasmic calcium changes in platelets in contact with polystyrene and poly(acrylamide-co-methacrylic acid) surfaces.

Neuropsychological effects of chronic exposure to environmental dioxins and furans.

Effects of acute sodium arsenite administration on the pulmonary chemical metabolizing enzymes, cytochrome P-450 monooxygenase, NAD(P)H:quinone acceptor oxidoreductase and glutathione S-transferase in guinea pig: comparison with effects in liver and kidney.

Determination of cocaine and benzoylecgonine by derivatization with iodomethane-D3 or PFPA/HFIP in human blood and urine using GC/MS (EI or PCI mode).

Neutrophil-mediated damage to human vascular endothelium. Role of cytokine activation.

Intestinal solubility and absorption of ferrous iron in growing rats are affected by different dietary pectins.

Biological monitoring of occupational pesticides exposure.

In vivo correlation of Doppler waveform analysis with arterial input impedance parameters.

Molecular interactions between tissue-type plasminogen activator and plasminogen.

Comparative pharmacokinetics of ifosfamide, 4-hydroxyifosfamide, chloroacetaldehyde, and 2- and 3-dechloroethylifosfamide in patients on fractionated intravenous ifosfamide therapy.

Chlorinated dibenzo-p-dioxins and dibenzofurans and the human immune system. 1. Blood cell receptors in volunteers with moderately increased body burdens.

Herbicides and cancer.

Occupational risk factors for acute leukaemia: a case-control study.

Toxicokinetics of cinnamaldehyde in F344 rats.

Toxicology and hazard potential of trifluralin.

Marked interanimal differences in susceptibility of Sprague-Dawley rats to diquat-induced oxidative stress in the liver: correlation with hepatic uptake of diquat.

The immune response of sheep to subclinical chronic exposure to the herbicide Bentazon TP.

Pharmacokinetic concepts in assessing intake of pentachlorophenol by rats after exposure through drinking water.

Changes in erythropoietic activity of *Sarotherodon mossambicus* exposed to sublethal concentrations of the herbicide diuron.

The effect of teratogens on maternal corticosterone levels and cleft incidence in A/J mice.

The Ca²⁺-transport-ATPase of human erythrocytes as an in vitro toxicity test system--acute effects of some chlorinated compounds.

One-year toxicity of orally administered acrolein to the beagle dog.

Pulmonary hemodynamics and lung function during chronic paraquat poisoning in sheep. Possible role of reactive oxygen species.

Soft tissue sarcoma, aplastic anaemia, and exposure to pesticides.

Antioxidant-dependent inhibition of diquat-induced toxicity in vivo.

Protective effects of antioxidants on paraquat-induced acute renal failure in mice.

Disposition, bioavailability, and serum protein binding of pentachlorophenol in the B6C3F1 mouse.

Investigations of the acute toxic, cytogenetic, and embryotoxic activity of buminafos.

NTP technical report on the toxicity studies of Glyphosate (CAS No. 1071-83-6) Administered In Dosed Feed To F344/N Rats And B6C3F1 Mice.

Effects of concentration reduction and partial replacement of paraquat by diquat on human toxicity: a clinical survey.

[Toxic and drug-induced lesions of the pulmonary parenchyma].

Limited immunotoxic potential of technical formulation of the herbicide atrazine (AAtrex) in mice.

[Appearance of different panmyelopathies in the same patient].

Cytogenetic studies of herbicide interactions in vitro and in vivo using atrazine and linuron.

Acute toxicological studies on paraquat: pathological findings in beagle dogs following single subcutaneous injections.

Aplastic anaemia and cyanamide.

Subacute toxicity of paraquat in beagle dogs: clinicopathology and pathologic examinations.

Smoke aldehyde component influences pulmonary edema.

[Evaluation of the mutagenic activity of ammonium nitrate and dimethylamine salt of 2,4-dichlorophenoxyacetic acid].

Morphological changes on nerves and histopathological effects on liver and kidney of rats by pentachlorophenol (PCP).

Mechanisms of aldehyde-induced bronchial reactivity: role of airway epithelium.

Cytogenetic effects of alachlor and/or atrazine in vivo and in vitro.

[Drug-induced acute renal failure].

Fatal paraquat poisoning: a light microscopic study in eight autopsy cases.

Continuous arteriovenous haemoperfusion (CAVHP) for treatment of paraquat poisoning.

The effect of Lasso herbicide on human immune function as measured by in vitro assays.

Microtiter particle agglutination test for diagnosis of leprosy.

Efficacy of whole bowel irrigation using solutions with or without adsorbent in the removal of paraquat in dogs.

Platelet prevention of oxidant lung oedema is not mediated through scavenging of hydrogen peroxide.

The effect of a commercial 2,4-D formulation on chemical- and viral-induced tumor production in mice.

Spermine dialdehyde, a novel ex vivo purging agent for both allogenic and autologous bone marrow transplantations.

Cyclophosphamide decreases O⁶-alkylguanine-DNA alkyltransferase activity in peripheral lymphocytes of patients undergoing bone marrow transplantation.

No evidence of intracellular oxidative stress during ischemia-reperfusion damage in rat liver in vivo.

Selective eosinophil leukocyte recruitment by transendothelial migration and not by leukocyte-endothelial cell adhesion.

Endothelial dysfunction of resistance arteries of spontaneously hypertensive rats.

Transport of paraquat and mexiletine from the blood into the rat intestinal lumen and peritoneal cavity.

The formation of stable acetaldehyde-hemoglobin adducts in a red blood cell model.

Quantitation of cinnamaldehyde and cinnamic acid in blood by HPLC.

Inhibition of sodium-dependent transport systems in LLC-PK1 cells by metabolites of ifosfamide.

Plasma membrane as a site of redox activation of daunomycin in intact human erythrocytes.

Quantitative evaluation of the hydrogen peroxide produced by the membrane with respect to the cytosol.

Pharmacokinetics of fluzafop-butyl in human volunteers. II: Dermal dosing.

Ethanol-induced motor activity in normal and acatalasemic mice.

Paraquat-induced lung injury: prevention by N-tert-butyl-alpha-phenylnitron, a free-radical spin-trapping agent.

Effect of atrazine on hemopoietic system.

Clinical responses in relation to blood acetaldehyde levels.

Conifer seedling nursery worker exposure to glyphosate.

Modification of liver and serum enzymes by paraquat treatment in rabbits.

Genotoxic effects of sodium arsenite on human cells.

The pyrimido-pyrimidine derivative RA-642 protects from brain injury in a combined model of permanent focal ischemia and global ischemia reperfusion.

Effects of eating an uncooked vegetable diet for 1 week.

Protein tyrosine phosphorylation as an indicator of 2,3,7,8-tetrachloro-p-dioxin exposure in vivo and in vitro.

Development of monoclonal antibodies that identify *Vibrio* species commonly isolated from infections of humans, fish, and shellfish.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin or 2,2',4,4',5,5'-hexachlorobiphenyl on vitamin K-dependent blood coagulation in female germfree WAG/Rij-rats.

Evidence of a neurogenic component during IgE-mediated inflammation in mouse skin.

Structure of dietary pectin, iron bioavailability and hemoglobin repletion in anemic rats.

Mechanism of the increase in intracellular sodium during metabolic inhibition: direct evidence against mediation by voltage-dependent sodium channels.

Cytosolic and intranuclear calcium signals in rat basophilic leukemia cells as revealed by a confocal fluorescence microscope.

Increased serum catalase activity in septic patients with the adult respiratory distress syndrome.

Hematopoietic cytokines inhibit apoptosis induced by transforming growth factor beta 1 and cancer chemotherapy compounds in myeloid leukemic cells.

Cytochemical detection of superoxide in cerebral inflammation and ischemia in vivo.

Control of growth and differentiation of Philadelphia chromosome-positive leukemia cells by tyrosine kinase inhibitors.

Iron deficiency and anemia of chronic disease. Clues to differentiating these conditions.

Photosensitization by anticancer agents. 11. Mechanisms of photosensitization of human leukemic cells by diaminoanthraquinones: singlet oxygen and radical reactions.

Effect of herbimycin A, an antagonist of tyrosine kinase, on bcr/abl oncoprotein-associated cell proliferations: abrogative effect on the transformation of murine hematopoietic cells by transfection of a retroviral vector expressing oncoprotein P210bcr/abl and preferential inhibition on Ph1-positive leukemia cell growth.

Protein tyrosine phosphorylation induced via the IgG receptors Fc gamma R_I and Fc gamma R_{II} in the human monocytic cell line THP-1.

Purification, phosphorylation and control of the guanine-nucleotide-exchange factor from rabbit reticulocyte lysates.

Thyroid albumin originates from blood.

Bioavailability to rats and toxicity of bound residues in bean seeds fumigated with ¹⁴C-methyl bromide.

Hypoxia induces glucose transporter expression in endothelial cells.

A case of ulcerative colitis induced by oral ferrous sulfate.

The effects of beraprost Na, a stable prostacyclin analog, on animal models of stroke.

Herbimycin A, an inhibitor of tyrosine kinase, prolongs survival of mice inoculated with myeloid leukemia C1 cells with high expression of v-abl tyrosine kinase.

Effect of iron supplementation on endurance capacity in iron-depleted female runners.

Persistent brominated and chlorinated dioxin blood levels in a chemist. 35 years after dioxin exposure.

Chronic sodium azide treatment impairs learning of the Morris water maze task.

Chemiluminescence assay of mucosal reactive oxygen metabolites in inflammatory bowel disease.

Protein-linked isoprenoid lipids in dexamethasone-treated human lymphoid lines in culture.

Localization of the reflex pathway responsible for the vasodepressor reaction induced by inferior vena caval occlusion and isoproterenol.

Extraembryonic tissue changes induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin and 2,3,4,7,8-pentachlorodibenzofuran with a note on direction of maternal blood flow in the labyrinth of C57BL/6N mice.

[Trace analysis for drugs and poisons in human tissues].

[Differentiation therapy of hematologic malignancies: principles, current status and perspectives].

A single base mutation in the gene for type III collagen (COL3A1) converts glycine 847 to glutamic acid in a family with Ehlers-Danlos syndrome type IV. An unaffected family member is mosaic for the mutation.

Energy-dependent accumulation of daunorubicin into subcellular compartments of human leukemia cells and cytoplasts.

Effects of acid-base status on acute hypoxic pulmonary vasoconstriction and gas exchange.

Cancer incidence following chlorophenol exposure in a community in southern Finland.

Large hiatal hernias, anemia, and linear gastric erosion: studies of etiology and medical therapy.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin on blood and spleen natural killer (NK) cell activity in the mouse.

Pesticides and other agricultural risk factors for non-Hodgkin's lymphoma among men in Iowa and Minnesota.

Heat-shock responsive elements in the induction of the multidrug resistance gene (MDR1).

Integration of the human lymphocyte into immunotoxicological investigations.

Chemical burn with cresol intoxication and multiple organ failure.

The effect of ethanol metabolism on ferritin uptake by freshly isolated rat hepatocytes: is acetaldehyde responsible for this alteration?

Cancer risk among Danish and Italian farmers.

Neutrophil accumulation in ischemic reperfused rat liver: evidence for a role for superoxide free radicals.

Cytochrome oxidase inhibition: a novel animal model of Alzheimer's disease.

Effect of acidosis and anoxia on iron delocalization from brain homogenates.

Induction of differentiation of human leukemia cells with a structurally altered c-abl (bcr/abl) gene by herbimycin A, an inhibitor of tyrosine kinase activity.

Permeation and destructive effects of disinfectants on protective gloves.

Monoclonal antibodies specific to porin of Haemophilus influenzae type b: localization of their cognate epitopes and tests of their biological activities.

An osteopenic nonfracture syndrome with features of mild osteogenesis imperfecta associated with the substitution of a cysteine for glycine at triple helix position 43 in the pro alpha 1(I) chain of type I collagen.

Glycosylation-inhibiting factor from human T cell hybridomas constructed from peripheral blood lymphocytes of a bee venom-sensitive allergic patient.

[Analysis of iron prescription tolerance in a prenatal consultation].

Mortality of a young population after accidental exposure to 2,3,7,8-tetrachlorodibenzodioxin.

Cassava cyanogens and konzo, an upper motoneuron disease found in Africa.

Potential antitumor agents. 64. Synthesis and antitumor evaluation of dibenzo[1,4]dioxin-1-carboxamides: a new class of weakly binding DNA-intercalating agents.

A tradition of testing ironclad practices.

Serum 2,3,7,8-tetrachlorodibenzo-p-dioxin levels of New Zealand pesticide applicators and their implication for cancer hypotheses.

Metabolically dependent blood-brain barrier breakdown in chronic relapsing experimental allergic encephalomyelitis.

Sex differences in monochloroacetate pretreatment effects on chloroform toxicity in rats.

Toxicity of 2,3,7,8-tetrabromodibenzo-p-dioxin in rats after single oral administration.

Tardyferon therapy in hyposiderosis of infancy and childhood.

Effects of herbimycin A derivatives on growth and differentiation of K562 human leukemic cells.

Toxicity of monochloroacetic acid administered by gavage to F344 rats and B6C3F1 mice for up to 13 weeks.

[Dark and photosensitized hemolysis of erythrocytes in the presence of dithranol].

Placental transport of dioxins from mother to fetus. II. PCBs, dioxins and furans and vitamin K metabolism.

[Results of therapy of anemia in pregnancy].

Internal exposure to organic substances in a municipal waste incinerator.

A prospective open-label study evaluating the efficacy and adverse reactions of the use of Niferex-150 in ESRD patients receiving EPOGEN.

Relationship between the cytolytic tenebrosin-C from *Actinia tenebrosa* and equinatoxin II from *Actinia equina*.

Amelioration of dermal lesions in streptozotocin-induced diabetic rats by aminoguanidine.

The hemolytic activity of deoxynivalenol and T-2 toxin.

Enhanced suppression of humoral immunity in DBA/2 mice following subchronic exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Tiaprofenic acid-induced photohemolysis in vitro is inhibited by nimesulide.

Astrocyte glutamate uptake during chemical hypoxia in vitro.

Effect of inorganic phosphate on hypoxanthine transport in isolated brain microvessels.

Zymosan-triggered tyrosine phosphorylation in mouse bone-marrow-derived macrophages is enhanced by respiratory-burst priming agents.

Murine strain differences in metabolism and bladder toxicity of cyclophosphamide.

Low molecular weight, non-peptide fibrinogen receptor antagonists.

Effect of increased tissue oxygen uptake on autoregulation in postnatal intestine.

Effect of enhanced erythropoiesis on iron absorption.

(S)- and (R)-[11C]nicotine and the metabolite (R/S)-[11C]cotinine. Preparation, metabolite studies and in vivo distribution in the human brain using PET.

Effect of serum-free medium on cytochrome P450-dependent metabolism and toxicity in rat cultured hepatocytes.

2,3,7,8-Tetrachlorodibenzo-p-dioxin causes reduction of glucose transporting activities in the plasma membranes of adipose tissue and pancreas from the guinea pig.

Synergism among oxidants, proteinases, phospholipases, microbial hemolysins, cationic proteins, and cytokines.

Percutaneous absorption of nicotinic acid, phenol, benzoic acid and triclopyr butoxyethyl ester through rat and human skin in vitro: further validation of an in vitro model by comparison with in vivo data.

Iron for autologous blood donors needs more work.

Phagocytosis of liposomes by human platelets.

Importance of type I and type II mechanisms in the photodynamic inactivation of viruses in blood with aluminum phthalocyanine derivatives.

Uptake of polyamines by human endothelial cells. Characterization and lack of effect of agonists of endothelial function.

The potentiation of 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity by tamoxifen in female CD1 mice.

Dermal absorption of chemicals: effect of application of chemicals as a solid, aqueous paste, suspension, or in volatile vehicle.

Plasma alpha 1-acid glycoprotein concentration in rats with chemical liver injury.

Initial hydrogenation during catabolism of picric acid by *Rhodococcus erythropolis* HL 24-2.

Degradation of 2,4-dinitrophenol by two *Rhodococcus erythropolis* strains, HL 24-1 and HL 24-2.

Induction of thermotolerance by chemical agents in enucleate erythrocytes.

Heparin removal from blood using poly(L-lysine) immobilized hollow fiber.

Morbidity study of extruder personnel with potential exposure to brominated dioxins and furans. I. Results of blood monitoring and immunological tests.

Effects of antibacterial agents on in vitro ovine ruminal biotransformation of the hepatotoxic pyrrolizidine alkaloid jacobine.

Human fibrinogen heterogeneity: the COOH-terminal residues of defective A alpha chains of fibrinogen II.

The effect of chronic radiation on the humoral immune response of rainbow trout (*Onchorhynchus mykiss* Walbaum).

Surgical and pharmacological dissociation of cardiovascular and emetic responses to intragastric CuSO₄.

Chemical modification of Glu-953 of the alpha chain of Na⁺,K⁽⁺⁾-ATPase associated with inactivation of cation occlusion.

NTP technical report on the toxicity studies of para-Chloro-alpha,alpha,alpha Trifluorotoluene (CAS NO: 98-56-6) Administered in Corn Oil and alpha-Cyclodextrin to F344/N Rats and B6C3F1 Mice in 14-Day Comparative Gavage Studies.

Involvement of nonparenchymal cells in oxygen-dependent hepatic injury by allyl alcohol.

Arsenic concentrations in tissues and body fluids of dogs on chronic low-level dietary sodium arsenite.

Molecular cloning of rat prostate transglutaminase complementary DNA. The major androgen-regulated protein DP1 of rat dorsal prostate and coagulating gland.

Deamidation of human erythrocyte protein 4.1: possible role in aging.

Artificial liver.

Characterization of mineral-binding 40-kDa glycoprotein extracted from young adult rabbit alveolar bone.

Cyclophosphamide cystitis in rats: involvement of capsaicin-sensitive primary afferents.

Cross-reactive immunodeterminants on *Streptococcus sanguis* and collagen. Predicting a structural motif of platelet-interactive domains.

Dipyridamole inhibits platelet aggregation induced by oxygen-derived free radicals.

Calmodulin increases Ca-dependent inhibition of the Na,K-ATPase in human red blood cells.

Generation and functional characterization of ovine bone marrow-derived macrophages.

Ferric(III) ions inhibits copper(II)/hydrogen peroxide-catalyzing lipid peroxidation in human erythrocyte membranes.

Influence of metabolic inhibitors on the degradation of tight junctions in HT29 cells.

Low concentrations of sodium azide specifically inhibit a thromboxane A₂ pathway in human platelets.

[Changes in specific reaction of erythrocytes to the antigen after administration of methylene blue and sodium azide].

Distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in splenic tissue of C57BL/6J mice.

Amino acid sequence of fibrolase, a direct-acting fibrinolytic enzyme from *Agkistrodon contortrix contortrix* venom.

Interleukin-1 beta suppresses the induction of P4501A1 and P4501A2 mRNAs in isolated hepatocytes.

Dissociation of a new glutathione S-transferase activity in human erythrocytes.

Characterization of the thromboxane receptor mediating prostacyclin release from cultured endothelial cells.

Comparison of fibrin-mediated stimulation of plasminogen activation by tissue-type plasminogen activator (t-PA) and fibrin-dependent enhancement of amidolytic activity of t-PA.

Localization in the fibrinogen gamma-chain of a new site that is involved in the acceleration of the tissue-type plasminogen activator-catalysed activation of plasminogen.

Photoaffinity labeling of the primary fibrin polymerization site: isolation and characterization of a labeled cyanogen bromide fragment corresponding to gamma-chain residues 337-379.

Benzoquinonoid ansamycins possess selective tumoricidal activity unrelated to src kinase inhibition.

Differential effects of drugs upon hematopoiesis can be assessed in long-term bone marrow cultures established on nylon screens.

Physiological properties of liver, gonads and muscle during maturation of female Atlantic salmon, *Salmo salar*. Comparison between a control and xenobiotics containing fish feed.

Absorptive-mediated endocytosis of an adrenocorticotrophic hormone (ACTH) analogue, ebitatide, into the blood-brain barrier: studies with monolayers of primary cultured bovine brain capillary endothelial cells.

Inhibition of tyrosine phosphorylation prevents thrombin-induced mitogenesis, but not intracellular free calcium release, in vascular smooth muscle cells.

NTP Toxicology and Carcinogenesis Studies of Methyl Bromide (CAS: 74-83-9) in B6C3F1 Mice (Inhalation Studies).

Liquid flow across the epithelium of the artificially perfused lung of fetal and postnatal sheep.

Serotonin and norepinephrine vasoconstriction in rat hindlimb have different oxygen requirements.

The effect of oral iron supplementation on erythropoiesis in autologous blood donors.

Preparation and biodistribution in mice of [¹¹C]carfentanil: a radiopharmaceutical for studying brain mu-opioid receptors by positron emission tomography.

Iron supplementation after femoral head replacement for patients with normal iron stores.

Purification and characterization of a mutant human platelet phospholipase A2 expressed in *Escherichia coli*. Cleavage of a fusion protein with cyanogen bromide.

On the molecular interactions between plasminogen-staphylokinase, alpha 2-antiplasmin and fibrin.

NTP Toxicology and Carcinogenesis Studies of Monochloroacetic Acid (CAS No. 79-11-8) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Characterization of bilirubin transport system by human peripheral blood mononuclear cells.

Activity of oxytocinergic neurons in the paraventricular nucleus mirrors the periodicity of the endogenous stimulatory rhythm regulating prolactin secretion.

The influence of erythrocyte shape on suspension viscosities.

Accidental death caused by the absorption of 2,4-dichlorophenol through the skin.

Polyhalogenated dibenzo-p-dioxins and dibenzofurans and the immune system. 4. Effects of multiple-dose treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on peripheral lymphocyte subpopulations of a non-human primate (*Callithrix jacchus*).

Effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on benzo(a)pyrene hydroxylase activity in embryos of the Japanese medaka (*Oryzias latipes*).

Effect of cosubstrates on the dechlorination of selected chlorophenolic compounds by *Rhodococcus erythropolis* 1CP.

Failure of CAPD patients to respond to an oral iron absorption test.

Analysis of DNA strand breaks induced in rodent liver in vivo, hepatocytes in primary culture, and a human cell line by chlorinated acetic acids and chlorinated acetaldehydes.

Production of polyclonal antibody to the bovine adrenal atrial natriuretic factor-R1 receptor.

Contrasting influences of central and peripheral opioids on cardiac baroreflex sensitivity in rabbits.

[Effect of almitrine in acute canine lung injury induced by paraquat].

Occupational exposure of electrical utility linemen to pentachlorophenol.

[Immunomorphological analysis of prolonged intoxication by low doses of herbicide simazine].

Conjugates of superoxide dismutase with the Fc fragment of immunoglobulin G.

Marijuana and tobacco smoke gas-phase cytotoxins.

Fructose 1,6-diphosphate augments paraquat injury in isolated dog lungs.

Evidence that paraquat is able to cross the blood-brain barrier to a different extent in rats of various age.

[Is it appropriate to consider wood preservative poisoning in the differential diagnosis of chronic recurrent respiratory tract infections?].

Wood preservatives, solvents, and thrombocytopenic purpura.

[Arachidonic acid metabolism and angiotensin converting enzyme activity by cultured porcine pulmonary artery endothelial cells are affected with paraquat].

Assessment of lawn care worker exposure to dithiopyr.

Oncogenicity study of trifluralin in B6C3F1 mice.

Role of metabolites in propanil-induced hemolytic anemia.

Intra-nigral infusion of Cu-free superoxide dismutase prevents paraquat-induced behavioural stimulation and ECoG epileptogenic discharges in rats.

Genotoxicity studies on the preemergence herbicide trifluralin.

Cytogenetic biomonitoring of an Italian population exposed to pesticides: chromosome aberration and sister-chromatid exchange analysis in peripheral blood lymphocytes.

Predicting outcomes in paraquat poisonings.

Effects of hexachlorobenzene and its metabolites pentachlorophenol and tetrachlorohydroquinone on serum thyroid hormone levels in rats.

[Acute poisoning caused by the herbicide dichlorprop (preparation SYS 67 PROP)].

A fatal case of parenteral paraquat poisoning.

Protective effect of taurine against acute paraquat intoxication in rats.

Contribution of 3,4-dichlorophenylhydroxylamine in propanil-induced hemolytic anemia.

Inhibition of human and rabbit platelet aggregation by chlorophenoxyacid herbicides.

Immunohistochemical localization of paraquat in lung and brain.

Effects of 2,4,5-trichlorophenoxyacetic acid, pentachlorophenol, methylprednisolone, and Freund's adjuvant on 2-hydroxyethylnitrosourea carcinogenesis in MRC-Wistar rats.

Inhibition of platelet aggregation and thromboxane A₂ production by chlorophenoxy acid herbicides.

Human lymphocyte reactivity after in vitro exposure to technical and analytical grade pentachlorophenol.

Effects of acute 2,4-dichlorophenoxyacetic acid intoxication on some rat serum components and enzyme activities.

Acute poisoning with a glyphosate-surfactant herbicide ('Roundup'): a review of 93 cases.

The effect of free radicals induced by paraquat and copper on the in vitro development of *Plasmodium falciparum*.

Marked augmentation of nocturnal melatonin secretion in amenorrheic athletes, but not in cycling athletes: unaltered by opioidergic or dopaminergic blockade.

Cyclophosphamide-associated carcinoma of urothelium: modalities for prevention.

[Morphological evidence of the possible role of cytochrome P-450 in the development of an autoimmune process in the liver].

Use and mechanism of action of AS101 in protecting bone marrow colony forming units-granulocyte-macrophage following purging with ASTA-Z 7557.

Methemoglobin formation by potassium ferrocyanide in the hemolysate of acatalasemic mice.

Oxygen metabolite effects on creatine kinase and cardiac energetics after reperfusion.

Prolonged exposure to wood preservatives induces endocrine and immunologic disorders in women.

Inhibition of cellular thymidylate synthesis by cytotoxic propenal derivatives of pyrimidine bases and deoxynucleosides.

Evidence for acrolein-modified DNA in peripheral blood leukocytes of cancer patients treated with cyclophosphamide.

Protection against free radical-induced and transition metal-mediated damage: the use of "pull" and "push" mechanisms.

Free radical production and ischemic brain damage: influence of postischemic oxygen tension.

Cytochemical studies of hydrogen peroxide generation in postischemic hepatocytes.

Formation of the 37KD liver protein-acetaldehyde adduct in vivo and in vitro.

Hydrogen peroxide and ischemic renal injury: effect of catalase inhibition.

The role of catalase in protecting erythrocytes against methemoglobin formation.

Red cell regulation of tumor necrosis factor-induced human neutrophil cytostatic activity.

Detection of acrolein and crotonaldehyde DNA adducts in cultured human cells and canine peripheral blood lymphocytes by ³²P-postlabeling and nucleotide chromatography.

Enzyme mediated superoxide radical formation initiated by exogenous molecules in rat brain preparations.

Effect of 3-amino-1,2,4-triazole on ethanol-induced narcosis, lethality and hypothermia in rats.

Application of ELISA techniques to metabolic disposition studies for 1,3-dinitrobenzene: comparison with HPLC and radiochemical methods.

Biochemical studies carried out on different groups of *Candida parapsilosis* and *Candida rhagii* strains by comparing some cellular and mitochondrial activities.

Gastrointestinal absorption of paraquat in the isolated mucosa of the rat.

[Chemical and biochemical studies on reactivities, formations and toxicities of reactive oxygen species].

Urinary excretion of acetylcyanamide in rat and human after oral and dermal application of hydrogen cyanamide (H₂N₂CN).

Relationship between oxidative stress and hepatic phosphoglucomutase activity in rats.

Bioconcentration of atrazine, zinc and iron in the blood of *Tilapia sparrmanii* (Cichlidae).

Pharmacokinetics and metabolism of triclopyr in the crayfish (*Procambarus clarki*).

IgE-induced tyrosine phosphorylation of phospholipase C-gamma 1 in rat basophilic leukemia cells.

Expression of HSP-28 and three HSP-70 genes during the development and decay of thermotolerance in leukemic and nonleukemic human tumors.

Induction of NAD(P)H:quinone reductase in human peripheral blood lymphocytes.

Hypoxia induces endothelial cell synthesis of membrane-associated proteins.

Protein kinase C regulates proliferation of mast cells and the expression of the mRNAs of fos and jun proto-oncogenes during activation by IgE-Ag or calcium ionophore A23187.

Arsenite as the probable active species in the human carcinogenicity of arsenic: mouse micronucleus assays on Na and K arsenite, orpiment, and Fowler's solution.

Mechanism for enterohepatic injury caused by circulatory disturbance of hepatic vessels in the rat.

Hemolytic activity of ethylene glycol phenyl ether (EGPE) in rabbits.

Iron supplementation and running performance in female cross-country runners.

Induction of hepatic metallothionein by nonmetallic compounds associated with acute-phase response in inflammation.

Factors influencing variable oxidative hemolysis of inbred mouse erythrocytes.

Inhibitory effect of interleukin-4 on the in vitro growth of Ph1-positive acute lymphoblastic leukemia cells.

Toxic and neoplastic responses in the nasal passages: future research needs.

Homotypic aggregation of human cell lines by HLA class II-, class Ia- and HLA-G-specific monoclonal antibodies.

[The use of drinking water as a vehicle of nutrients: experimental studies with iron].

Randomized, placebo-controlled trial of iron supplementation in infants with low hemoglobin levels fed iron-fortified formula.

Molecular mechanism of drug photosensitization. Part 3. Photohemolysis sensitized by diflunisal.

The transient appearance of small blastoid cells in the marrow after bone marrow transplantation.

Intracellular calcium concentrations during "chemical hypoxia" and excitotoxic neuronal injury.

Engagement of interleukin-7 receptor stimulates tyrosine phosphorylation, phosphoinositide turnover, and clonal proliferation of human T-lineage acute lymphoblastic leukemia cells.

Breast milk, dioxins and the possible effects on the health of newborn infants.

The acute effects of S-(1,2-dichlorovinyl)-L-cysteine and related chemicals on renal function and ultrastructure in the pentobarbital-anesthetized dog: structure-activity relationships, biotransformation, and unique site-specific nephrotoxicity.

Acute neurotoxicity of sodium azide and nitric oxide.

Use of whole bowel irrigation in an infant following iron overdose.

Analysis of native forms and isoform compositions of the mouse 90-kDa heat shock protein, HSP90.

Hemolytic activity in the periodontopathogen *Porphyromonas gingivalis*: kinetics of enzyme release and localization.

[Reports on medico-legal data from the massive-investigation performed by the Medico-Legal Society of Japan--a statistical study of death by poisoning. Investigation Committee of the Medico-Legal Society of Japan].

Extracorporeal techniques in the treatment of poisoned patients.

Bioavailability of carbonyl iron: a randomized, double-blind study.

Disposition and excretion of intravenous 2,3,7,8-tetrabromodibenzo-p-dioxin (TBDD) in rats.

[The activity of formaldehyde, glutardialdehyde, peracetic acid, chloramine T (N-chlor-4-toluolsulfonamide), m-cresol, ethanol and benzyldimethyldodecylammonium bromide against bacteria which are found in coagulated blood. (Model studies for chemical disinfection of instruments)].

Gender-related differences in iron absorption by preadolescent children.

[Intestinal obstruction caused by non-absorbable tablets and Budd-Chiari syndrome in a patient with Crohn's disease].

Engraftment and development of human T and B cells in mice after bone marrow transplantation.

Ninety-day toxicity study of sodium monochloroacetate in Sprague-Dawley rats.

Iron dextran-induced muscle pain.

Absorption of low and therapeutic doses of ferric maltol, a novel ferric iron compound, in iron deficient subjects using a single dose iron absorption test.

PDGF, CSF-1, and EGF induce tyrosine phosphorylation of p120, a pp60src transformation-associated substrate.

Virus-specific B-lymphocytes are probably the primary targets for Aleutian disease virus.

Washed human platelets prevent ischemia-reperfusion edema in isolated rabbit lungs.

Hypothyroidism and acquired von Willebrand disease.

The sensitized liver represents a rich source of endogenous leukotrienes.

The issues of transport multiplicity and energetics pertaining to methotrexate efflux in L1210 cells addressed by an analysis of cis and trans effects of inhibitors.

[A new milk formula: iron bioavailability and effect on prevention of iron deficiency in infants].

Association of the crosslinked IgE receptor with the membrane skeleton is independent of the known signaling mechanisms in rat basophilic leukemia cells.

Transfusion of type-A and type-B blood to cats.

Studies of controlled reperfusion after ischemia. XXI. Reperfusate composition: superiority of blood cardioplegia over crystalloid cardioplegia in limiting reperfusion damage--importance of endogenous oxygen free radical scavengers in red blood cells.

[Breast feeding, PCBs and dioxins].

[Intravenous methyl iodide poisoning--detoxification using hemoperfusion].

Reversibility of thymic atrophy induced by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and bis(tri-n-butyltin)oxide (TBTO).

A one-year carcinogenicity study with 2,6-dichlorobenzonitrile (Dichlobenil) in male Swiss mice: preliminary note.

Antithrombin Vicenza, Ala 384 to Pro (GCA to CCA) mutation, transforming the inhibitor into a substrate.

[Role of collagen conformation in type II anticollagen immunity in rheumatoid polyarthritis].

Association of hyperglycemia with dietary cyanogen and socio-economic level. The study of rural communities in south-east Nigeria.

An exploratory study of environmental and medical factors potentially related to childhood cancer.

Blood levels of 2,3,7,8-tetrachlorodibenzo-p-dioxin in chemical workers after chloracne and in comparison groups.

Chronic inhalation toxicity and carcinogenicity study of methyl bromide in Wistar rats.

Pyridine derivatives: structure-activity relationships causing parkinsonism-like symptoms.

[Massive hemoptysis ten days after bronchial extraction of an accidentally inhaled tablet of ferrous sulfate].

Altered metabolic response of iron-deficient women during graded, maximal exercise.

Investigation on the dosage/efficacy relationship of iron dextran in veal calves.

Differential effects of sodium lauryl sulphate and non-anoic acid on the expression of CD1a and ICAM-1 in human epidermis.

Polycythemia in diabetic patients on CAPD.

Vitamin B12 deficiency and infertility: report of a case.

Reduced cortisol secretion in patients with iron deficiency.

Relationship between the concanavalin A-agglutinability and deformability of human erythrocytes.

[The effect of finoptin on the metabolism and pharmacological action of cyclophosphane in vivo and in vitro].

Single-dose cyclophosphamide for the prevention of bladder tumor implantation in F344 rats: site of drug activity.

Proliferation of chick embryo neuroblasts grown in the presence of horse serum requires exogenous transferrin.

Further studies on the topography of the N-terminal region of human platelet glycoprotein IIIa.

Localization of monoclonal antibody epitopes and the putative fibrinogen-binding sites.

Rapid and sensitive quantitation of cyanide in blood and its application to fire victims.

Degradation of erythrocyte glycophorin results in increased membrane bound hemoglobin.

Characterization of the cellular binding domain and the effects of monoclonal antibodies and thrombin inhibitors on the binding and internalization of the antithrombin-III--thrombin complex by cultured cells.

NTP technical report on the toxicity studies of Cresols (CAS Nos. 95-48-7, 108-39-4, 106-44-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Novel pathways of antigen presentation for the maintenance of memory.

Comparative studies on the primary structure of acetylcholinesterases from bovine caudate nucleus and bovine erythrocytes.

Biochemical study of repair of induced osteochondral defects of the distal portion of the radial carpal bone in horses by use of periosteal autografts.

Absorption of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) after low dose dermal exposure.

Chemoprotectants for cancer chemotherapy.

Phosphorylation sites in human erythrocyte band 3 protein.

Lung calcium-dependent phospholipid-binding proteins: structure and function.

Isolation and characterization of cDNA clones to mouse macrophage and human endothelial cell tissue transglutaminases.

[Experimental study on methyl bromide poisoning in mice. Acute inhalation study and the effect of glutathione as an antidote].

Peptide mapping of different *Bacillus thuringiensis* toxin gene products by CNBr cleavage in SDS-PAGE gels.

Nature of enhanced mitochondrial oxidative metabolism by a calf blood extract.

Intracellular regulation of the production and release of human erythroid-directed lymphokines.

Polyhalogenated dibenzo-p-dioxins and dibenzofurans and the immune system. 2. In vitro effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on lymphocytes of venous blood from man and a non-human primate (*Callithrix jacchus*).

Vagal amplification of phrenic nerve activity at different levels of ventilation in spontaneously breathing cats.

Quantitation of urinary chlorobenzene metabolites by HPLC: concentrations of 4-chlorocatechol and chlorophenols in urine and of chlorobenzene in biological specimens of subjects exposed to chlorobenzene.

Ten- and ninety-day toxicity studies of 1,2-dichlorobenzene administered by oral gavage to Sprague-Dawley rats.

Drug interaction effects on antitumour drugs (VIII): prevention of ifosfamide-induced urotoxicity by disulfiram and its effect on antitumour activity and acute toxicity of alkylating agents in mice.

[A gas-chromatographic method of analysis of monochloroacetic acid and its sodium salt in the air, skin washings, protective clothing extracts and urine].

Characterization of the cytochrome P450 isozyme that metabolizes ochratoxin A, using metabolic inducers, inhibitors and antibodies.

Free radicals promote "in vitro" a different intracellular decay of rabbit reticulocyte and erythrocyte glycolytic enzymes.

Effects of oxidants on protein breakdown in skeletal muscle.

In vitro effects of trace elements on blood clotting and platelet function. A--Iron, copper, and gold.

Accumulation and release of adrenaline, and the modulation by adrenaline of noradrenaline release from rabbit blood vessels in vitro.

Polyhalogenated dibenzo-p-dioxins and dibenzofurans and the immune system. 3. No immunosuppressive effect of 2,3,7,8-TCDD in the popliteal lymph node assay (PLNA) in rats.

Effects of cyclic nucleotides and phorbol myristate acetate on proliferation of pig aortic endothelial cells.

Factors influencing the protein binding of bumetanide using an equilibrium dialysis technique.

Characterization of the renal effects and renal elimination of sulotroban in the dog.

Comparison of the amino acid sequences of tissue-specific parvalbumins from chicken muscle and thymus and possible evolutionary significance.

Hexose uptake in primary cultures of bovine brain microvessel endothelial cells. I. Basic characteristics and effects of D-glucose and insulin.

The liver, kidney, and thyroid toxicity of chlorinated benzenes.

Use of HemoQuant assays to assess the effect of oral iron preparations on stool hemocult tests.

Active transport of ascorbic acid across the retinal pigment epithelium of the bullfrog.

NTP Toxicology and Carcinogenesis Studies of Sodium Azide (CAS: 26628-22-8) in F344 Rats (Gavage Studies).

A rapid microassay for measuring the luminol-dependent chemiluminescent response in canine whole blood.

Transport of monocarboxylic acids at the blood-brain barrier: studies with monolayers of primary cultured bovine brain capillary endothelial cells.

Studies on the mechanism of the toxic action of sodium nitrite on intestinal absorption in rats.

Induction by some protein kinase inhibitors of differentiation of a mouse megakaryoblastic cell line established by coinfection with Abelson murine leukemia virus and recombinant SV40 retrovirus.

Detection of *Streptococcus suis* type 2 in tonsils of slaughtered pigs using improved selective and differential media.

Human erythrocyte band 3 polymorphism (band 3 Memphis): characterization of the structural modification (Lys 56----Glu) by protein chemistry methods.

Occurrence of an Inhibitor of Tissue-Type Plasminogen Activator in Seeds and in Vitro Cultures of *Erythrina caffra* Thunb.

Studies on the structures of the Tm, Sj, M1, Can, Sext and Hu blood group antigens.

Effect of phosphopyridoxylation on thrombin interaction with platelet glycoprotein Ib.

Evidence for arsenic as the immunosuppressive component of gallium arsenide.

Induction of a 31,000-dalton stress protein by prostaglandins D2 and J2 in porcine aortic endothelial cells.

Energy Transduction by Anaerobic Ferric Iron Respiration in *Thiobacillus ferrooxidans*.

Quantitation of type I, III, and V collagens in human tissue samples by high-performance liquid chromatography of selected cyanogen bromide peptides.

Biophysical aspects of the integrated combination of cytostatic drugs with radiotherapy. Part 1: In vitro investigations on the kinetics of activated isophosphamide metabolites and the determination of selective properties of DNA-interstrand and DNA-protein crosslinking mechanisms using ³¹P-NMR spectroscopy.

Protamine-coated Cuprophan. A potential nonthrombogenic hemodialysis membrane with improved blood compatibility.

On the mechanism of fibrin-specific plasminogen activation by staphylokinase.

Formation of large, membrane skeleton-free erythrocyte vesicles as a function of the intracellular pH and temperature.

Complete sequence of *Sipunculus nudus* erythrocyte histone H2B and its gene. Identification of an N,N-dimethylproline residue at the amino-terminus.

The sequence A alpha-(154-159) of fibrinogen is capable of accelerating the t-PA catalysed activation of plasminogen.

Cytosolic-nuclear tumor promoter-specific binding protein: association with the 90 kDa heat shock protein and translocation into nuclei by treatment with 12-O-tetradecanoylphorbol 13-acetate.

Methylated sulfur compounds in microbial mats: in situ concentrations and metabolism by a colorless sulfur bacterium.

Role of eicosanoids, inositol phosphates and extracellular Ca²⁺ in cell-volume regulation of rat liver.

Calcium binding to human platelet integrin GPIIb/IIIa and to its constituent glycoproteins. Effects of lipids and temperature.

Effects of chlordane on parameters of liver and muscle toxicity in man and experimental animals.

The synergistic effect of chlorinated chemicals (trichlorosalicylanilid, 4-chloro-m-cresol, trichlorophenoxyacetic acid, trichloroethanol, trichloromethiazide, trichlorofon and trichloroacetaldehyde) and low concentrations of griseofulvin on porphyrin metabolism.

Protection by human serum from the immunosuppression induced by spermine in vitro.

Halogenated aryl hydrocarbon-induced suppression of the in vitro plaque-forming cell response to sheep red blood cells is not dependent on the Ah receptor.

Microheterogeneity of rat submaxillary gland kallikrein k10, a member of the kallikrein family.

The complete amino acid sequence of the haemorrhagic factor LHFII, a metalloproteinase isolated from the venom of the bushmaster snake (*Lachesis muta muta*).

Genistein, a protein tyrosine kinase inhibitor, inhibits thromboxane A₂-mediated human platelet responses.

Monoclonal anti-VH141 antibodies that specifically recognize the heavy chain variable region of, and are closely related to, MOPC141 myeloma protein whose VH gene belongs to VHQ52 family.

Expression and purification of active recombinant platelet factor 4 from a cleavable fusion protein.

Soluble fibrin preparations inhibit the reaction of plasmin with alpha 2-macroglobulin. Comparison with alpha 2-antiplasmin and leupeptin.

Strain-specific and immunodominant surface epitopes of the P2 porin protein of nontypeable *Haemophilus influenzae*.

Mitochondrial development in *Trypanosoma brucei brucei* transitional bloodstream forms.

Cytogenetic effect of the thiocarbamate herbicides butylate, molinate and vernolate in the mouse bone marrow micronucleus test.

Pre-embarkment prognostication for acute paraquat poisoning.

Italian multicentre case-control study of hematolymphopietic malignancies.

Haemodialysis/haemoperfusion in paraquat poisoning.

Comparison of the activity of topically applied pesticides and the herbicide 2,4-D in two short-term in vivo assays of genotoxicity in the mouse.

Chronic effect of atrazine on hydromineral balance in the crab.

Dermal toxicity to rats of isoproturon technical and formulation.

Propanil-induced methemoglobinemia and hemoglobin binding in the rat.

Genotoxic effect of isoproturon (herbicide) as revealed by three mammalian in vivo mutagenic bioassays.

[Exposure to agricultural chemicals and oncogenic risk].

A case-control study of non-Hodgkin's lymphoma and the herbicide 2,4-dichlorophenoxyacetic acid (2,4-D) in eastern Nebraska.

Efficacy of single or repeated hemoperfusion in a canine model of paraquat poisoning.

HPLC analysis of diuron and metabolites in blood and urine.

Paraquat poisoning. An overview of the current status.

Ground-glass hepatocytes: light and electron microscopy. Characterization of the different types.

[The effect of chronic butyphos poisoning on protein and nucleic acid synthesis in various rat organs and activity of blood cholinesterase].

[Functional testing of the immunotoxicity of the phenoxyalkane acid mecoprop in rats and prevention of immunotoxic effects by adrenalectomy].

PO₂ modulation of paraquat-induced microvascular injury in isolated dog lungs.

Childhood aplastic anaemia in Kenya.

Acrolein depletes the neuropeptides CGRP and substance P in sensory nerves in rat respiratory tract.

Metabolism of the arylamide herbicide propanil. I. Microsomal metabolism and in vitro methemoglobinemia.

[Acute changes in the body of laboratory rats during development after the parenteral administration of the herbicide Zeazin S-40. I. Determination of LD₅₀ and other biochemical findings].

[The toxicity of a prometryne/simazine combination in the lactation stage of rats].

Involvement of prostaglandins in paraquat intoxication.

The effects of pesticides on some biochemical parameters of carp (*Cyprinus carpio* L.).

Alkaline diuresis for acute poisoning with chlorophenoxy herbicides and ioxynil.

Initial accumulation of paraquat in the heart leading to acute death.

Effect of ethanol on acute paraquat toxicity in rabbits.

Chronic toxicity of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in mice.

Electroencephalographical analysis of acute paraquat poisoning.

Pentachlorophenol-associated aplastic anemia, red cell aplasia, leukemia and other blood disorders.

Aplastic anaemia associated with organochlorine pesticide: case reports and review of evidence.

Full thickness skin burns secondary to an unusual exposure to diquat dibromide.

Paraquat pharmacokinetics using a subcutaneous toxic low dose in the rat.

Distribution of three common chlorophenoxyacetic acid herbicides into the rat brain.

Biomonitoring of arylamines: hemoglobin adducts of urea and carbamate pesticides.

Increase in the acute toxicity and brain concentrations of chlorophenoxyacetic acids by probenecid in rats.

Biological valuation of extra-corporeal techniques in acute poisoning.

Long-term carcinogenicity bioassay of the herbicide atrazine in F344 rats.

Determination of diquat in biological materials by electron spin resonance spectroscopy.

Pharmacokinetics of 2,4,5-T in mice as a function of dose and gestational status.

[Biochemical changes in the brain tissue of white rats exposed to the herbicide acetochlor under acute and subacute oral experimental conditions].

Oxygen radicals in lung pathology.

Iron release and erythrocyte damage in allyl alcohol intoxication in mice.

Induction of superoxide dismutase in leukocytes by paraquat: correlation with age and possible predictor of longevity.

Acquisition and decay of heat-shock-enhanced postischemic ventricular recovery.

Interleukin 1 pretreatment decreases ischemia/reperfusion injury.

[Cytogenetic effect of pesticides in relation to their hygienic standardization].

Xanthine oxidase-derived H₂O₂ contributes to reperfusion injury of ischemic skeletal muscle.

Derecruitment of filtration surface area in paraquat-injured isolated dog lungs.

Suppressing effects of vanillin, cinnamaldehyde, and anisaldehyde on chromosome aberrations induced by X-rays in mice.

[The mechanisms of the inhibition of erythrocyte acetylcholinesterase activity by photodynamic herbicides].

Acid-base balance and cardiac index in SO₂-bronchitic, papaine-emphysematous and paraquat-fibrotic rats after isoproterenol treatment.

The determination of myeloperoxidase activity in liver.

Alterations of arachidonate metabolism in cardiovascular system by cigarette smoking.

Effects of skin preapplication treatments and postapplication cleansing agents on dermal absorption of 2,4-dichlorophenoxyacetic acid dimethylamine by Fischer 344 rats.

Human phagocytic cells as oxygen metabolite scavengers.

Effects of sulfur-containing metabolites of hexachlorobenzene on the heme metabolic enzymes in rat liver.

Neutrophil-mediated cytotoxicity induced by secretory IgA.

Effects of dose, age, inhibition of metabolism and elimination on the toxicokinetics of 2-butoxyethanol and its metabolites.

Intestinal absorption of cationic and anionic ferric colloids and complexes: biochemical, histochemical and morphological observations in rats.

Evaluation of genotoxic effects of the herbicide dicamba using in vivo and in vitro test systems.

Effects of acrolein on human platelet aggregation.

[The effect of histamine H1 receptors on the secretory function and blood flow in the gastric mucosa].

Antigen-induced cross-linking of the IgE receptor leads to an association with the detergent-insoluble membrane skeleton of rat basophilic leukemia (RBL-2H3) cells.

Hydrogen peroxide-induced alterations in prostaglandin secretion in the rat colon in vitro.

Towards a more effective management of pregnancy related anaemias in Africa.

Autologous blood transfusions in children and young adults with low body weight undergoing spinal surgery.

Cytotoxic synergism between trimetrexate and etoposide. Evidence that trimetrexate potentiates etoposide-induced protein-associated DNA strand breaks in L1210 leukemia cells through alterations in intracellular ATP concentrations.

Human body burden of polychlorinated dibenzofurans associated with toxicity based on the yusho and yucheng incidents.

Inhibition of abl oncogene tyrosine kinase induces erythroid differentiation of human myelogenous leukemia K562 cells.

End-tidal CO₂, CO₂ production, and O₂ consumption as early indicators of approaching hyperthermia.

Embryotoxic effects of sodium azide infusions in the Syrian hamster.

Pesticide exposures and other agricultural risk factors for leukemia among men in Iowa and Minnesota.

Thermogenesis and thermoregulatory function of iron-deficient women without anemia.

Confirmation by peptide sequence and co-expression on various cell types of the identity of CD44 and P85 glycoprotein.

Two modes of idiotypic stimulation of T lymphocytes from patients with Chagas' disease: correlations with clinical forms of infection.

Potassium accumulation in the globally ischemic mammalian heart. A role for the ATP-sensitive potassium channel.

Prevalence of iron deficiency in children aged 9-24 mo from a large urban area of Argentina.

Photosensitizing potential of benzanthrone.

Reversible focal neurologic deficits in severe iron deficiency anemia.

Epitopes of Escherichia coli alpha-hemolysin: identification of monoclonal antibodies that prevent hemolysis.

Preliminary report: furunculosis and hypoferraemia.

Oxygen extraction in lamb skeletal muscle.

Influence of the Ah locus on the humoral immunotoxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin: evidence for Ah-receptor-dependent and Ah-receptor-independent mechanisms of immunosuppression.

Influence of latent iron deficiency on generation of oxygen species in polymorphonuclear leucocytes.

Differential toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C57BL/6J mice congenic at the Ah Locus.

Intraabdominal sepsis: effects on polymorphonuclear leukocyte Fc receptor-mediated phagocytosis.

[Iron deficiency and pregnancy. A survey in a Mother and Child Care Center in Niamey (Niger)].

Altered calcium homeostasis in irreversibly injured P388D1 macrophages.

[Hemolytic anemia following surgical repair of mitral valve insufficiency in children].

[Evolution of autotransfusion: effect of a diet with and without the ingestion of iron].

Two cases of acute toluene intoxication.

Analysis of the sites in p56lck whose phosphorylation is induced by tetradecanoyl phorbol acetate.

[The nature, severity and distribution of obstructive airway lesions in COPD studied by morphometry and computer-assisted 3-D reconstruction].

Treatment of the endodontic emergency: a decade later.

Gastric delivery system for iron supplementation.

Studies on the role of lipid peroxidation in the acute toxicity of TCDD in rats.

Effect of EDTA on the bioavailability to rats of fortification iron used in Egyptian balady bread.

Brain phenylalanine and tyrosine levels and hepatic encephalopathy induced by CCl₄ in rats.

Decreased survival rate of pancreatic acinar cells isolated from rats with acute pancreatitis.

Intradural granulocytic sarcoma presenting as a lumbar radiculopathy. Case report.

Modification of membrane permeability measured by Texas-Red during cell cycle progression and differentiation.

Evaluation of national nutritional anemia prophylaxis programme.

Characterization of monoclonal antibodies against the Escherichia coli hemolysin.

A latent Mr 94,000 gelatin-degrading metalloprotease induced during differentiation of HL-60 promyelocytic leukemia cells: a member of the collagenase family of enzymes.

Cytosolic-nuclear tumor promoter-specific binding protein (CN-TPBP) in human promyelocytic leukemia cells HL-60.

Two-year oral chronic toxicity and carcinogenicity study in rats of diets fumigated with methyl bromide.

[Pica caused by the ingestion of coffee beans].

[Acute myelomonocytic leukemia with mastocytosis in bone marrow].

Histological examination of the temporal bone in medicolegal cases of asphyxia.

Ethylene dichloride: the influence of disulfiram or ethanol on oncogenicity, metabolism, and DNA covalent binding in rats.

Tissue distribution, metabolism, and excretion of ¹⁴C-TCDD in a TCDD-susceptible and a TCDD-resistant rat strain.

The role of pituitary beta-endorphin in mediating corticotropin-releasing factor-induced antinociception.

The effect of mitochondrial inhibitors on calcium homeostasis in tumor mast cells.

Neurogenic inflammation, vascular permeability, and mast cells. Capsaicin desensitization fails to influence IgE-anti-DNP induced vascular permeability in rat airways.

Cellular transport and accumulation of thiotepa.

Changes in the composition and metabolism of arterial collagens during the development of pulmonary hypertension in rabbits.

Cornified envelopes in congenital disorders of keratinization.

Methemoglobinemia with oxidized hemoglobins and modified hemoglobins found in bloods of workers handling aromatic compounds and in those of a man who drank cresol solution.

Hypoxia and deposition of iron in liver and spleen of mice given iron supplement.

Effects of TCDD on embryonic ureteric epithelial EGF receptor expression and cell proliferation.

Mortality and morbidity among Army Chemical Corps Vietnam veterans: a preliminary report.

Cancer in Iowa farmers: recent results.

Epidemiologic studies of cancer in agricultural workers.

Simulation of aspects of ischemia in cell culture: changes in lactate compartmentation.

Kinetics of internalization and cytotoxicity of transferrin-neocarzinostatin conjugate in human leukemia cell line, K562.

Inhibition of lipoxygenase of rat dental pulp and human platelets by phenolic dental medicaments.

Comparative studies on the action of 7-N-[2-[[2-(gamma-L-glutamylamino)ethyl]dithio]ethyl]mitomycin C and of mitomycin C on cultured HL-60 cells and isolated phage and plasmid DNA.

Enteric-coated iron tablets.

Comparison of anti-anaemic effects of iron protein succinylate (ITF 282) and ferrous sulfate in the rat.

Local mechanical oscillations of the cell surface within the range 0.2-30 Hz.

Golgi-like demonstration of "dark" neurons with an argyrophil III method for experimental neuropathology.

Potential of bleomycin cytotoxicity by polyhydric alcohols.

Absorption, distribution, excretion and metabolism of a single oral dose of [¹⁴C]tri-*o*-cresyl phosphate (TOCP) in the male rat.

Effects of glutathione depletion on the acute nephrotoxic potential of arsenite and on arsenic metabolism in hamsters.

Influence of SK&F 95587 and BN 50730 on bronchoconstrictor responses in the cat.

Radiofrequency plasma deposition of oxygen-containing films on polystyrene and poly(ethylene terephthalate) substrates improves endothelial cell growth.

Comparison of the effects of fibrinogen and fibrin products and isolated peptide chains on the fibrin-mediated stimulation of plasminogen activation by tissue-type plasminogen activator, and on the fibrin-dependent enhancement of the amidolytic activity of one-chain tissue-type plasminogen activator.

Primary structure of a hemorrhagic metalloproteinase, HT-2, isolated from the venom of *Crotalus ruber ruber*.

Characterization of the beta-chain N-terminus heterogeneity and the alpha-chain C-terminus of human platelet GPIIb. Posttranslational cleavage sites.

Free thiols of platelet thrombospondin. Evidence for disulfide isomerization.

Prothymocyte activity is reduced by perinatal 2,3,7,8-tetrachlorodibenzo-*p*-dioxin exposure.

UV-induced protein alterations and lipid oxidation in erythrocyte membranes.

The complete amino acid sequence of the high molecular mass hemorrhagic protein HR1B isolated from the venom of *Trimeresurus flavoviridis*.

Isolation and partial structural characterization of an equine fibrinogen CNBr fragment that exhibits immunologic cross-reactivity with an A alpha-chain cross-linking region of human fibrinogen.

Reduction of phosphate-induced dysfunction in rat heart mitochondria by carnitine.

Partial purification and characterization of the Ca²⁺-pumping ATPase of the liver plasma membrane.

Sensory neurotoxicology: use of the olfactory system in the assessment of toxicity.

Effect of venom from *Cerastes cerastes* (Egyptian sand viper) on luminol-dependent chemiluminescence of human blood phagocyte cells.

Lysis of fibrillar collagen by neutrophils in synovial fluid. A role for surface-bound immunoglobulins.

HPLC-based two-step purification of fibrinolytic enzymes from the venom of *Agkistrodon contortrix contortrix* and *Agkistrodon piscivorus conanti*.

Interaction of Mesna (2-mercaptoethane sulfonate) with the mutagenicity of cyclophosphamide in vitro and in vivo.

Effect of fibrin-like stimulators on the activation of plasminogen by tissue-type plasminogen activator (t-PA)--studies with active site mutagenized plasminogen and plasmin resistant t-PA.

[Comparison of different procedures for the hemato-fluorometric measurement of erythrocyte zinc-protoporphyrin].

Platelet-reactive sites in human collagens I and III: evidence for cell-recognition sites in collagen unrelated to RGD and like sequences.

Kinetic and spectroscopic studies of haemoglobin and myoglobin from *Urechis caupo*. Distal residue effects.

[Ifosfamide-induced urinary bladder lesion and its inhibition by mesna].

Norepinephrine and BRL 37344 stimulate adenylate cyclase by different receptors in rat brown adipose tissue.

Analysis of blood acetate by head-space gas chromatography: comparative studies of reagents for the methyl esterification.

Ferrous sulfate combined with ascorbic acid does not significantly reduce acetaldehyde accumulation in the blood of alcoholized rats treated with disulfiram or betalactam antibiotics.

Oxygen uptake and mean blood pressure as indicators of induced hyperthermia.

The phosphocreatine shuttle of sea urchin sperm: flagellar creatine kinase resulted from a gene triplication.

[Morphofunctional status of blood and bone marrow cells in acute experimental hepatitis induced by allyl alcohol].

Immunosuppressive activities of polychlorinated biphenyls in C57BL/6N mice: structure-activity relationships as Ah receptor agonists and partial antagonists.

End-tidal carbon dioxide concentration, carbon dioxide production, heart rate, and blood pressure as indicators of induced hyperthermia.

Complete amino acid sequence of tenebrosin-C, a cardiac stimulatory and haemolytic protein from the sea anemone *Actinia tenebrosa*.

Glutathione enhancement in various mouse organs and protection by glutathione isopropyl ester against liver injury.

Rapid purification and characterization of human platelet glycoprotein V: the amino acid sequence contains leucine-rich repetitive modules as in glycoprotein Ib.

Lysine-329 of murine leukemia virus reverse transcriptase: possible involvement in the template-primer binding function.

Multiple sites of methyl esterification of calmodulin in intact human erythrocytes.

Intracellular accumulation of azithromycin by cultured human fibroblasts.

Interrelation between nucleotide degradation and aldehyde formation in red blood cells. Influence of xanthine oxidase on metabolism: an application of nucleotide and aldehyde analyses by high-performance liquid chromatography.

Fluorescence immunolocalization of bound atrazine residues in plant tissue.

Zinc modulates thrombin adsorption to fibrin.

Comparison of polychlorinated dibenzodioxin levels with hepatic mixed-function oxidase induction in great blue herons.

Choline uptake by cerebral capillary endothelial cells in culture.

An investigation into the effects of oral iron supplementation on in vivo Hemocult stool testing.

[Arachidonic acid-induced aggregation of human peripheral blood neutrophils in the presence of interceptors of active forms of oxygen].

A physiological pharmacokinetic description of the tissue distribution and enzyme-inducing properties of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat.

Biochemical and functional characterization of human tissue-type plasminogen activator variants obtained by deletion and/or duplication of structural/functional domains.

¹H NMR sequential assignments and secondary structure analysis of human fibrinogen gamma-chain C-terminal residues 385-411.

Adrenal-dependent leucopenia after short-term exposure to various airborne irritants in rats.

Acetobacter cellulose pellicle as a temporary skin substitute.

Malformed fetuses and karyotype abnormalities in the offspring of cyclophosphamide and allyl alcohol-treated male rats.

[Determination of blood cyanide using head-space gas chromatography with electron capture detection].

Hydrophobic residues 382-386 of antithrombin III, Ala-Ala-Ala-Ser-Thr, serve as the epitope for an antibody which facilitates hydrolysis of the inhibitor by thrombin.

NTP Toxicology and Carcinogenesis Studies of Iodinated Glycerol (Organidin(R).) (CAS No. 5634-39-9) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Oxidant-induced haemoprotein degradation in rat tissue slices: effect of bromotrichloromethane, antioxidants and chelators.

Effect of polymorphonuclear leukocyte-derived oxygen free radicals and hypochlorous acid on cardiac function and some biochemical parameters.

Kinetic studies of plasminogen activation by epithelial tissue plasminogen activator.

Use of fragments of hirudin to investigate thrombin-hirudin interaction.

Impairment of prothymocyte activity by 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Thrombospondin binding to specific sequences within the A alpha- and B beta-chains of fibrinogen.

Protective and inactivating effects of neutrophil myeloperoxidase on C1q activity.

Molecular cloning of human protein 4.2: a major component of the erythrocyte membrane.

Isolation to homogeneity and partial characterization of a histo-blood group A defined Fuc alpha 1----2Gal alpha 1----3-N-acetylgalactosaminyltransferase from human lung tissue.

Preparation of biologically active platelet-derived growth factor isoforms AA and AB. Preferential formation of AB heterodimers.

Attempts to identify the causative allergen in cases of allergic contact dermatitis using an in vitro lymphocyte transformation test.

Polyhalogenated dibenzo-p-dioxins and dibenzofurans and the immune system. 1. Effects on peripheral lymphocyte subpopulations of a non-human primate (*Callithrix jacchus*) after treatment with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Functional measurements on carboxymethylated hemoglobin, a potential blood substitute: effects of sodium chloride on pH values that influence the alkaline Bohr effect.

A comparative investigation of the metabolism of methyl bromide and methyl iodide in human erythrocytes.

Characteristics of apical Cl-HCO₃ exchanger of bicarbonate-secreting cells in turtle bladder.

Limitations of the erythropoietic response to serial phlebotomy: implications for autologous blood donor programs.

[Mutagen activity of barium chloride in *Salmonella typhimurium*].

On the molecular interactions between fibrin, tissue-type plasminogen activator and plasminogen.

The amino acid sequence of the alpha chain of HB 2 completes the primary structure of the hemoglobins of the Antarctic fish *Notothenia coriiceps neglecta*.

Disposition, elimination, and metabolism of tri-o-cresyl phosphate following daily oral administration in Fischer 344 male rats.

[Hematologic parameters in repeated autologous blood donation].

Paraquat resistance associated with reduced NADPH reductase in an energy-dependent paraquat-accumulating cell line.

Calcium carbimide in alcoholism treatment. Part 2: Medical findings of a short-term, placebo-controlled, double-blind clinical trial.

Total exclusion from external respiration protects lungs from development of fibrosis after paraquat intoxication.

Oral and dermal pharmacokinetics of triclopyr in human volunteers.

[Structural changes in the rat cerebral cortex induced by alcohol in combination with aldehyde dehydrogenase inhibitors].

Effect of paraquat on serum and lung angiotensin I converting enzyme (AICE) activity in beagle dogs.

Bronchial artery ligation modifies pulmonary edema after exposure to smoke with acrolein.

HPLC measurement of chlorophenoxy herbicides, bromoxynil, and ioxynil, in biological specimens to aid diagnosis of acute poisoning.

Cancer risk in a cohort of licensed pesticide users.

Preventive effect of taurine against acute paraquat intoxication in beagles.

[Pathomorphologic and hematologic studies of the immunotoxicity of the phenoxyalkane acid mecoprop in rats].

Paraquat poisoning with acute renal failure--a case report.

[Paraquat poisoning. Pulmonary lesions].

[Anabolic effects of sodium selenite, vitamin E and retabolil in experimental hypotrophy induced by a pesticide].

A comparison of hemoperfusion columns for paraquat.

The effects of 24% paraquat (1,1'-dimethyl-4,4'-bipyridylium dichloride) on hemodynamics, blood gases, plasma lactate and plasma catecholamines in dogs.

[Paraquat poisoning: clinical and anatomopathologic aspects in 3 cases].

Inhibition of spontaneous growth and induced differentiation of murine erythroleukaemia cells by paraquat and atrazine.

Effectiveness of vitamin E and colchicine in amelioration of paraquat lung injuries using an experimental model.

[Practical experiences in animal experimental studies with 3(3)-BN-research plans].

The ratio of oxidized/reduced glutathione as an index of oxidative stress in various experimental models of shock syndrome.

[Comparative study of the mutagenic activity of dicurin on five test-objects].

Genotoxicity of selected herbicides.

Respiration and osmoregulation of the estuarine crab, *Rhithropanopeus harrisi* (Gould): effects of the herbicide, alachlor.

Adducts of malonaldehyde and a few other aldehydes to hemoglobin.

Effects of cholesterol feeding on the distribution, metabolism, and accumulation of pentachlorobenzene in rats.

Brain biogenic amine levels after methanol administration: possible mechanism of action on central monoaminergic neurons in discrete areas of brain in Wistar rat.

Allyl alcohol-induced hemolysis and its relation to iron release and lipid peroxidation.

Structure-activity relationships for unsaturated dialdehydes. 3. Mutagenic, antimicrobial, cytotoxic, and phytotoxic activities of merulidial derivatives.

The coincidence of myocardial reperfusion injury and hydrogen peroxide production in the isolated rat heart.

Endotoxin pretreatment increases endogenous myocardial catalase activity and decreases ischemia-reperfusion injury of isolated rat hearts.

Erythrocyte catalase decreases cardiac reperfusion injury.

Negative correlation of cigarette smoking and dysmenorrhea: reduced prostaglandin synthesis due to beta-endorphin, nicotine, or acrolein antagonism.

Bronchial responsiveness and inflammation in guinea pigs exposed to acrolein.

Renal handling of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in rats.

Atrazine biodegradation in rats--a model for mammalian metabolism.

Differential effects of organic hydroperoxides and hydrogen peroxide on proteolysis in human erythrocytes.

Effects of 3-amino-1,2,4-triazole on ethanol-induced open-field activity: evidence for brain catalase mediation of ethanol's effects.

Disposition of 2,4-dichlorophenoxyacetic acid dimethylamine by Fischer 344 rats dosed orally and dermally.

Spermidine uptake by type II pulmonary epithelial cells in primary culture.

[Preventing iron deficiency in breast-fed infants by suitable supplementary food. A prospective, controlled study].

Hemoglobin as a predictor of response to iron therapy and its use in screening and prevalence estimates.

The adrenocorticotrophic hormone (ACTH)-induced reversal of hemorrhagic shock.

Enhancement of erythrocyte superoxide dismutase activity: effects on cellular oxidant defense.

Induction of endonucleolytic DNA cleavage in human acute myelogenous leukemia cells by etoposide, camptothecin, and other cytotoxic anticancer drugs: a cautionary note.

Medical monitoring of dioxin clean-up workers.

[Noncirrhotic liver fibrosis after chronic arsenic poisoning].

Fibrinogen Baltimore IV: congenital dysfibrinogenemia with a gamma 275 (Arg----Cys) substitution.

Cellular transport and accumulation of thiotepa in murine, human, and avian cells.

Albumin decreases hydrogen peroxide and reperfusion injury in isolated rat hearts.

Effect of subacute low level dietary sodium arsenite on dogs.

Stabilization of ornithine decarboxylase in erythroleukemia cells depleted of ATP.

Poor clinical response to enteric-coated iron preparations.

Mechanism of transport and intracellular binding of porfiromycin in HCT 116 human colon carcinoma cells.

Prediction and evaluation of the effect of iron treatment in anaemic RA patients.

Molecular mechanism of drug photosensitization--II. Photohemolysis sensitized by ketoprofen.

Preliminary findings on iron supplementation and learning achievement of rural Indonesian children.

Iron deficiency and educational achievement in Thailand.

The capacity of subgingival microbiotas to produce volatile sulfur compounds in human serum.

Mechanism of tolerance to renal ischemia in harbor seal: role of membranes.

Modification of the FAST-ELISA for field diagnosis of schistosomiasis mansoni with serum or blood samples.

Intracellular distribution and pharmacokinetics of daunorubicin in anthracycline-sensitive and -resistant HL-60 cells.

Nigexine, a phospholipase A2 from cobra venom with cytotoxic properties not related to esterase activity. Purification, amino acid sequence, and biological properties.

[Oral iron therapy. Bioavailability and therapeutic effectiveness of ferrous iron in effervescent tablets in posthemorrhagic iron deficiency anemia].

Iron management during recombinant human erythropoietin therapy.

Hemodynamic effects of experimental iron poisoning.

[The composition and antianemia efficacy of the iron-containing waters of the Skhodnitsa spring].

Effect of sodium arsenite on the induction and turnover of ornithine decarboxylase activity in erythroleukemia cells.

Regional hemodynamic responses to hypoxia and hypermetabolism in polycythemic dogs.

Induction of in vitro differentiation of mouse embryonal carcinoma (F9) and erythroleukemia (MEL) cells by herbimycin A, an inhibitor of protein phosphorylation.

Mortality in an area contaminated by TCDD following an industrial incident.

Tumor cell permeability to peplomycin.

Subunit structure of the erythropoietin receptor.

Characteristics of 2,3,7,8-tetrachlorodibenzo-p-dioxin induced endotoxin hypersensitivity: association with hepatotoxicity.

Iron deficiency among active men.

Ten-year mortality study of the population involved in the Seveso incident in 1976.

³¹P and ¹³C NMR studies of isolated perfused hematopoietic cells from leukemic mice.

[Rapid local oscillations of the surface of the human erythrocyte].

Skin reactions to irritants assessed by non-invasive bioengineering methods.

Characterization of MB creatine kinase isoform conversion in vitro and in vivo in dogs.

[Screening of drugs and chemicals by wide-bore capillary gas chromatography with flame ionization and nitrogen phosphorus detectors].

[Histologic evaluation of gastric tolerability in rats of ferritin compared with ferrous sulfate].

Detection of specific binding of [1,6-³H]2,3,7,8-tetrachlorodibenzo-p-dioxin ([³H]TCDD) in human leukocytes using electrofocusing in polyacrylamide gel.

Molecular mechanism of naproxen photosensitization in red blood cells.

The human 32-kDa stress protein induced by exposure to arsenite and cadmium ions is heme oxygenase.

Reperfusion-induced calcium gain after ischemia.

Role of differential drug uptake, efflux, and binding of etoposide in sensitive and resistant human tumor cell lines: implications for the mechanisms of drug resistance.

2,2',4,4',5,5'-hexachlorobiphenyl as a 2,3,7,8-tetrachlorodibenzo-p-dioxin antagonist in C57BL/6J mice.

Cyanide and arsenic poisoning by intravenous injection.

Complestatin, a potent anti-complement substance produced by *Streptomyces lavendulae*. I. Fermentation, isolation and biological characterization.

6-Methyl-1,3,8-trichlorodibenzofuran (MCDF) as a 2,3,7,8-tetrachlorodibenzo-p-dioxin antagonist in C57BL/6 mice.

Cancer incidence of workers in a Finnish sawmill.

Erythrocytes decrease myocardial hydrogen peroxide levels and reperfusion injury.

Reversible downregulation of thiazide diuretic receptors by acute renal ischemia.

[A case of remarkable bronchial stenosis due to aspiration of delayed-release iron tablet].

Immunotoxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in a complex environmental mixture from the Love Canal.

Hematotoxic effects in the rat of a toluene dinitro derivative after short-term exposure.

Iron status in patients receiving erythropoietin for dialysis-associated anemia.

Induction of erythroid differentiation of K562 human leukemic cells by herbimycin A, an inhibitor of tyrosine kinase activity.

Serum-free culture of insulin-secreting clonal cells from a hamster insulinoma.

Antithrombin Sheffield: amino acid substitution at the reactive site (Arg393 to His) causing thrombosis.

Development and validation of a cellular transplant model for leukemia in Fischer rats: a short-term assay for potential anti-leukemic chemicals.

Lymphocyte stem cell alterations following perinatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Purification of human urine colony-stimulating factor by affinity chromatography.

Monitoring of genetic instability in subjects with increased risk of cancer.

Minnesota Highway Maintenance Worker Study: cancer mortality.

Antigen-induced bronchopulmonary alterations in the guinea pig: a new model of passive sensitization mediated by mouse IgE antibodies.

Immuno-toxicology and -pharmacology.

[Synthesis and antimalarial as well as antitumor activities of 1-methyl-2,4-diamino-6-(N-methyl-substituted benzylamion) quinazolinium iodides].

The effect of iron therapy on malarial infection in Papua New Guinean schoolchildren.

Dioxins and furans in the mother and possible effects on the fetus and newborn breast-fed baby.

Experimental selenium toxicity in guinea pigs: haematological studies.

Differential effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin on adipose tissue lipoprotein lipase activity in the guinea pig, rat, hamster, rabbit, and mink.

Synthesis of ¹¹C-labelled thymidine for tumor visualization using positron emission tomography.

Studies on phagocytosis in patients with acute bacterial infections.

The effect of oxidants on biomembranes and cellular metabolism.

Prevention of iron deficiency by milk fortification. The Chilean experience.

Sequence of the D-aspartyl/L-isoaspartyl protein methyltransferase from human erythrocytes. Common sequence motifs for protein, DNA, RNA, and small molecule S-adenosylmethionine-dependent methyltransferases.

The neutrophil chemoattractant produced by the rat kidney epithelioid cell line NRK-52E is a protein related to the KC/gro protein.

Continuous arteriovenous hemofiltration in experimental iron intoxication.

Selective mouse breeding for short ethanol sleep time has led to high levels of hepatic aromatic hydrocarbon (Ah) receptor.

The interactions of desferrioxamine and hydroxypyridone compounds with haemoglobin and erythrocytes.

Purification of recombinant human tissue factor.

Autologous blood transfusions and plastic surgery.

In vivo activation of peripheral blood polymorphonuclear neutrophils by gamma interferon results in enhanced fungal killing.

Micro-scission of YAC tumor cells during antibody-dependent cellular cytotoxicity mediated by human neutrophils.

Purification and characterization of a platelet-derived growth factor and heavy metal-modulated nuclear protein.

The primary structure of a protein carboxyl methyltransferase from bovine brain that selectively methylates L-isoaspartyl sites.

Seasonal variation of skin resistance to irritants.

Radioiodinated phenoxyacetic acid derivatives as potential brain imaging agents. II. Structure-biodistribution relationship.

[Urinary bioavailability of sodium-2-mercaptoethanesulfonate (Uromitexan) following intravenous, subcutaneous and continuous subcutaneous administration].

The reaction of nitrogen monoxide with the haemocyanins of the crayfish *Astacus leptodactylus* and the snail *Helix pomatia*.

Differential effects of osmotic pressure on mitochondrial respiratory chain and indices of oxidative phosphorylation.

Primary structure of H2-proteinase, a non-hemorrhagic metalloproteinase, isolated from the venom of the habu snake, *Trimeresurus flavoviridis*.

Sodium arsenite induced alterations in bilirubin excretion and heme metabolism.

Metabolism of phenol and hydroquinone to reactive products by macrophage peroxidase or purified prostaglandin H synthase.

Differential control and calcium-dependence of production of endothelium-derived relaxing factor and prostacyclin by pig aortic endothelial cells.

Retention of radiolead by human erythrocytes in vitro.

NTP Toxicology and Carcinogenesis Studies of 2,4-Dichlorophenol (CAS No. 120-83-2) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Comparative studies on the primary structure of human cystatin as from epidermis, liver, spleen, and leukocytes.

Intestinal absorption of aluminum in rats: stimulation by citric acid and inhibition by dinitrophenol.

Amino acid sequence of chitinase from *Streptomyces erythraeus*.

Management of acute iron overdose.

Improved gas chromatography with electron-capture detection using a reaction pre-column for the determination of blood cyanide: a higher content in the left ventricle of fire victims.

Functional characterization of monoclonal antibodies directed against fibrin binding domains of tissue-type plasminogen activator.

Three fatal sodium azide poisonings.

Primary structure of hemorrhagic protein, HR2a, isolated from the venom of *Trimeresurus flavoviridis*.

The effect of chlorinated chemicals on porphyrin metabolism--the synergistic effect with chlorinated chemicals and low concentrations of griseofulvin.

Expression and characterization of erythropoietin receptors on normal human bone marrow cells.

[Polychlorinated dibenzo-p-dioxins in the subcutaneous adipose tissue of yusho patients].

Preparation of biologically active platelet-derived growth factor type BB from a fusion protein expressed in *Escherichia coli*.

The effect of a low pH saline perfusate upon the integrity of the energy-depleted rat blood-brain barrier.

N-hydroxy-N-arylamides. V. Differences in the mechanism of haemoglobin oxidation in vitro by N-hydroxy-4-chloroacetanilide and N-hydroxy-4-chloroaniline.

Preparation of diastereomeric beta-d-glucuronides of the bronchodilator procaterol using immobilized rabbit liver microsomal enzymes.

Laser intensity and wavelength dependence of Rose-Bengal-photosensitized inhibition of red blood cell acetylcholinesterase.

Secretion by *Trypanosoma cruzi* of a hemolysin active at low pH.

Time resolved analysis of tubulin phosphorylation during platelet activation.

Microthrombomodulin. Residues 310-486 from the epidermal growth factor precursor homology domain of thrombomodulin will accelerate protein C activation.

Stimulated human neutrophils damage cardiac sarcoplasmic reticulum function by generation of oxidants.

Comparison of in vitro, animal, and clinical determinations of iron bioavailability: International Nutritional Anemia Consultative Group Task Force report on iron bioavailability.

Role of carboxylesterase in protection against soman toxicity.

Experimental selenium toxicity in guinea pigs: biochemical studies.

Effect of splenectomy on hepasor treatment in allyl-alcohol-traumatized rat liver.

[The microsurgical treatment of penetrating wounds of the cornea with the use of collagenous materials].

Determination of erythrocyte transit times through micropores. II. Influence of experimental and physicochemical factors.

Cationic polyelectrolytes: potent opsonic agents which activate the respiratory burst in leukocytes.

Dimethylthiourea prevents hydrogen peroxide and neutrophil mediated damage to lung endothelial cells in vitro and disappears in the process.

Hormonal contraceptive increases plasma lipid peroxides in female rats. Relationship to platelet aggregation and lipid biosynthesis.

Membrane oxidative metabolism of human eosinophilic cell line EoL-1 in response to phorbol diester and formyl peptide: synergistic augmentation by interferon-gamma and tumor necrosis factor.

Coloscreen VPI test kit evaluated for detection of fecal occult blood.

Health and reproductive outcomes among American Legionnaires in relation to combat and herbicide exposure in Vietnam.

[The influence of long-term utilization of some herbicides on oral cavity tissues of white rats].

[Changes in the glucosephosphate dehydrogenase activity in the liver and blood of albino rats after poisoning with chloride-containing pesticides].

[Paraquat poisoning].

Rapid determination of glyphosate in postmortem specimens using ^{31}P NMR.

Topical non-steroidal anti-inflammatory drugs inhibit non-immunologic immediate contact reactions.

Structure-activity relationship of reversible cholinesterase inhibitors including paraquat.

Glucocorticoid toxicity in the hippocampus: in vitro demonstration.

Acute MCPP intoxication: report of two cases.

Oxidant stress following renal ischemia: changes in the glutathione redox ratio.

Neurobehavioral toxicity and tolerance to the herbicide 2,4-dichlorophenoxyacetic acid-n-butyl ester (2,4-D ester).

A legacy from Vietnam.

An evaluation of the genotoxic potential of glyphosate.

Induction of hepatic peroxisome proliferation in mice by lactofen, a diphenyl ether herbicide.

An enzyme-linked immunosorbent assay for plasma-paraquat levels of poisoned patients.

Synthetic smoke with acrolein but not HCl produces pulmonary edema.

2,4-Dichlorophenoxyacetic acid intoxication increases its accumulation within the brain.

Paraquat intoxication during pregnancy: a report of 9 cases.

Ultrastructure of canine lung during the proliferative phase of paraquat toxicity.

Genotoxic effects of some systemic pesticides: in vivo chromosomal aberrations in bone marrow cells in rats.

Toxicokinetics of paraquat through the heart-lung block. Six cases of acute human poisoning.

[Failure of chemotherapy and radiotherapy in pulmonary fibrosis caused by paraquat].

Failure of haemoperfusion and haemodialysis to prevent death in paraquat poisoning. A retrospective review of 42 patients.

Effects of methylprednisolone on acute lung paraquat toxicity in sheep.

Effects of Gramoxone-induced reactive oxygen radicals on eicosanoid synthesis of mouse lung.

Prevention of occupational skin disease.

Toxicity of 2-hydrazinoethanol in turkey poults.

Comparative study on cerebrovascular injuries by three chlorophenoxyacetic acids (2,4-D, 2,4,5-T and MCPA).

Hematological effects of ethyl methanesulfonate, paraquat and phenylhydrazine in Japanese quail.

Hydrogen peroxide mediates reperfusion injury in the isolated rat heart.

Ultrastructural localization of platelet-derived growth factor and related factors in normal and transformed cells.

pH homeostasis in promyelocytic leukemic HL60 cells.

Prolonged, intravenous paraquat infusion in the rat. I. Failure of coinfused putrescine to attenuate pulmonary paraquat uptake, paraquat-induced biochemical changes, or lung injury.

Reactive oxygen species during ischemia-reflow injury in isolated perfused rat liver.

Xanthine oxidase produces hydrogen peroxide which contributes to reperfusion injury of ischemic, isolated, perfused rat hearts.

Enhancement of in vivo and in vitro murine immune responses by the cyclophosphamide metabolite acrolein.

Protective effect of alpha-human atrial natriuretic polypeptide (alpha-hANP) on chemical-induced pulmonary edema.

[The phenomenon of the accumulation of biological and nonbiological corpuscular particles in mammalian lungs].

Prostaglandin D2 generation in mouse bone marrow-derived mast cells exposed to dexamethasone is associated with endogenous peroxidase activity.

Effects of disulfiram, cyanamide and 1-aminocyclopropanol on the aldehyde dehydrogenase activity in human erythrocytes and leukocytes.

Characterization of hydrazine-stimulated proteolysis in human erythrocytes.

Toxicokinetics and bioavailability of paraquat in rats following different routes of administration.

Effect of 4-hydroxy-2,3-trans-nonenal on platelet function.

Dioxins and dibenzofurans in blood and adipose tissue of Agent Orange-exposed Vietnam veterans and matched controls.

Identification of the hepatic cytochrome P-450 isozymes induced and decreased by picloram.

Acute effects of the aldehyde dehydrogenase inhibitors, disulfiram, pargyline and cyanamide, on circulating ketone body levels in the rat.

Effect of 3-amino-1,2,4-triazole on narcosis time and lethality of ethanol in UChA rats.

Stimulation of interleukin-1 alpha and interleukin-1 beta release from human monocytes by cyanogen bromide peptides of type II collagen.

Investigation of the effects of heat shock and agents which induce a heat shock response on the induction of differentiation of HL-60 cells.

Significance of fibrin/fibrinogen related antigen in glomeruli in children with IgA nephropathy.

Altered production of the active oxygen species is involved in enhanced cytotoxic action of acylated derivatives of ascorbate to tumor cells.

Endogenous opiate modulation of baroreflexes in normotensive and hypertensive rats.

Blocking action of parenteral desferrioxamine on iron absorption in rodents and men.

Steroid hormones and medications that alter cancer risks.

Immunological abnormalities 17 years after accidental exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Intraglomerular deposition of fibrin/fibrinogen-related antigen in children with various renal diseases.

[Effectiveness of introducing individual protection measures for workers in the phenazone industry].

Biochemical and functional effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on the heart of female rats.

Hepatic ATP content and hyperammonemia induced by CCl₄ in rats.

Clinical toxicology--past, present and future.

Iron poisoning, chelation therapy and anaemia.

[Preventive use of iron in pregnancy--a luxury or a necessity?].

[Studies on serum ketone bodies in patients with hyperthyroidism].

Effects of t-butyl-4-hydroxyanisole and other phenolic antioxidants on tumoral cells and Trypanosoma parasites.

Degrading process of acute ischemic myocardial cells.

Multifactorial resistance to adriamycin: relationship of DNA repair, glutathione transferase activity, drug efflux, and P-glycoprotein in cloned cell lines of adriamycin-sensitive and -resistant P388 leukemia.

Iron deficiency in adolescent female dancers.

Differentiation of erythroid progenitor (CFU-E) cells from mouse fetal liver cells and murine erythroleukemia (TSA8) cells without proliferation.

The heparin binding domain of S-protein/vitronectin binds to complement components C7, C8, and C9 and perforin from cytolytic T-cells and inhibits their lytic activities.

An immunotoxicological evaluation of 4,4'-thiobis-(6-t-butyl-m-cresol) in female B6C3F1 mice. 2. Humoral and cell-mediated immunity, macrophage function, and host resistance.

An immunotoxicological evaluation of 4,4'-thiobis-(6-t-butyl-m-cresol) in female B6C3F1 mice. 1. Body and organ weights, hematology, serum chemistries, bone marrow cellularity, and hepatic microsomal parameters.

Selective alteration in blood-brain barrier and insulin transport in iron-deficient rats.

Single amino acid substitutions in the reactive site of antithrombin leading to thrombosis. Congenital substitution of arginine 393 to cysteine in antithrombin Northwick Park and to histidine in antithrombin Glasgow.

Iron deficiency in female athletes: its prevalence and impact on performance.

Toxicity and disposition of 2,3,4,7,8-pentachlorodibenzofuran (4PeCDF) in the rhesus monkey (Macaca mulatta).

Alteration of methyl dopa absorption, metabolism, and blood pressure control caused by ferrous sulfate and ferrous gluconate.

Calcium gain during postischemic reperfusion. The effect of 2,4-dinitrophenol.

Chromosomal damage induced by maleic hydrazide in mammalian cells in vitro and in vivo.

Potential antitumor agents. 54. Chromophore requirements for in vivo antitumor activity among the general class of linear tricyclic carboxamides.

Expression of the primary biliary cirrhosis antigens in yeast: aspects of mitochondrial control.

Modification of transplacental distribution of salicylate in rats by acidosis and alkalosis.

Reversal of transformed phenotypes by herbimycin A in src oncogene expressed rat fibroblasts.

The effect of age on the glucuronidation and toxicity of 4,4'-thiobis(6-t-butyl-m-cresol).

A crucial role of ongoing anaerobic glycolysis in attenuating acute ischemia-induced release of myocardial noradrenaline.

Catalase prevents increased lung vascular permeability during air emboli in unanesthetized sheep.

Iron supplementation and physical growth of rural Indonesian children.

Goitrogens and thyroid follicular cell neoplasia: evidence for a threshold process.

Species differences in 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity and biotransformation in fish.

The effect of iron therapy on the exercise capacity of nonanemic iron-deficient adolescent runners.

Prevention of iron deficiency by milk fortification. II. A field trial with a full-fat acidified milk.

Effect of oral iron therapy on the upper gastrointestinal tract. A prospective evaluation.

Variants of human tissue-type plasminogen activator. Fibrin binding, fibrinolytic, and fibrinogenolytic characterization of genetic variants lacking the fibronectin finger-like and/or the epidermal growth factor domains.

Plasmid-borne resistance to arsenate, arsenite, cadmium, and chloramphenicol in a *Rhodococcus* species.

Acute effects of amiodarone on action potentials of isolated guinea-pig ventricular muscle exposed to simulated ischemic solution and metabolic inhibitors.

[Hypotensive activity of dinitrosyl complexes of iron and proteins in anesthetized animals].

Treatment of gestational iron deficiency disease with tardyferon; monitoring the effectivity of treatment.

Responses of the L5178Y tk⁺/tk⁻ mouse lymphoma cell forward mutation assay: III. 72 coded chemicals.

Body iron stores in patients subjected to surgery of the large bowel.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxicity in yellow perch (*Perca flavescens*).

Morphologic lesions and acute toxicity in rainbow trout (*Salmo gairdneri*) treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Thrombocytopenia associated with repletion of iron in iron-deficiency anemia.

Synthesis of ¹¹C-methylated inulin as a radiopharmaceutical for imaging brain edema and pulmonary edema.

Photoaffinity analogues of methotrexate as folate antagonist binding probes.

Experimental studies on the mechanism of ethanol formation in corpses.

Examination of Tardyferon depot coated tablet in patients treated by general practitioners.

Membrane IgM: interactions with the cortical cytoskeleton in the human lymphoblastoid cell line WiL2.

Observations on the intracellular accumulation of methotrexate and 5-methyltetrahydrofolate in uninduced, dimethylsulphoxide-induced and 1,25-dihydroxyvitamin D₃-induced HL60 cells, and blood-monocyte-derived human macrophages.

Subchronic metabolic effects and toxicity of a simulated pulp mill effluent on juvenile lake trout, *Salmo trutta m. lacustris*.

K-cell-mediated cytotoxicity induced with rat monoclonal antibodies. I. Antibodies of various isotypes differ in their ability to induce cytotoxicity mediated by rat and human effectors.

Mercury vapor uptake and hydrogen peroxide detoxification in human and mouse red blood cells.

Central respiratory inhibition by angiotensin II in anesthetized cats.

Intracoronary infusion of prostaglandin I₂ attenuates arterial baroreflex control of heart rate in conscious dogs.

Expression of high affinity receptors for erythropoietin on human bone marrow cells and on the human erythroleukemic cell line, HEL.

Immunochemical characterization of crosslinked derivatives isolated from alpha chain oligomers formed during early stages of fibrin crosslinking.

Interaction of nitrite with catalase in the perfused rat liver.

Affinity chromatography of fibrinogen on Lens culinaris agglutinin immobilized on CNBr-activated sepharose: study of the active groups involved in nonspecific adsorption.

Down-modulation of high-affinity receptors for erythropoietin on murine erythroblasts by interleukin 3.

Teratogenic effects of nitrofen on cellular and functional maturation of the rat lung.

Characterization of an apparently lower molecular weight gamma-chain variant in fibrinogen Kyoto I. The replacement of gamma-asparagine 308 by lysine which causes accelerated cleavage of fragment D1 by plasmin and the generation of a new plasmin cleavage site.

Kinetic analysis of covalent hybrid plasminogen activators: effect of CNBr-degraded fibrinogen on kinetic parameters of Glu1-plasminogen activation.

Effect of 2,4-dinitrophenol on transport of cefmetazole and diclofenac from thigh muscle tissue and from intestinal connective tissue into blood circulation in rats.

Evidence for immunoglobulin Fc receptor-mediated prostaglandin₂ and platelet-activating factor formation by cultured rat mesangial cells.

The use of sequence-specific antibodies to identify a secondary binding site in thrombin.

Uptake of choline by rat mammary-gland epithelial cells.

NTP Toxicology and Carcinogenesis Studies of Monuron (CAS No. 150-68-5) in F344/N Rats and B6C3F1 Mice (Feed Studies).

Non-immune immunoglobulin binding by "Haemophilus somnus".

Memory B cells express a phenotype consistent with migratory competence after secondary but not short-term primary immunization.

The production of toxic oxygen metabolites by hemocytes of different snail species.

Generation of valency hybrids and nitrosylated species of hemoglobin in mice by nitric oxide vasodilators.

Plasma gamma-hexachlorocyclohexane concentrations in forestry workers exposed to lindane.

Localization of the pyridoxal phosphate binding site at the COOH-terminal region of erythrocyte band 3 protein.

Immunosuppressive activities of polychlorinated dibenzofuran congeners: quantitative structure-activity relationships and interactive effects.

Partial characterization of specific cantharidin binding sites in mouse tissues.

Modulation of the in vitro candidacidal activity of human neutrophil defensins by target cell metabolism and divalent cations.

Investigation of the causes of suboptimal haemoglobin response to iron supplementation.

Plasminogen activation by tissue plasminogen activator in the presence of stimulating CNBr fragment FCB-2 of fibrinogen is a two-phase reaction. Kinetic analysis of the initial phase of slow plasmin formation.

The influence of fibrin(ogen) fragments on the kinetic parameters of the tissue-type plasminogen-activator-mediated activation of different forms of plasminogen.

A 10-kDa cyanogen bromide fragment from the epidermal growth factor homology domain of rabbit thrombomodulin contains the primary thrombin binding site.

[Activity and properties of superoxide dismutase from human erythrocytes and plasma in ontogenesis].

Activity of the anion exchange protein (band 3) of human erythrocytes as affected by hydroxychloroaromatic chemicals.

Effects of the external ions and metabolic poisoning on the constriction of the squid giant axon after axotomy.

Suppression of splenic lymphocyte function by 7,12-dimethylbenz[a]anthracene (DMBA) in vitro.

Purification and analysis with monoclonal antibodies of P2, the major outer membrane protein of nontypable Haemophilus influenzae.

Transport of digoxin into brain microvessels and choroid plexuses isolated from guinea pig.

Distribution of 2,3,7,8-tetrachlorodibenzo-p-dioxin in human whole blood and its association with, and extractability from, lipoproteins.

Glucose starvation is required for insulin stimulation of glucose uptake and metabolism in cultured microvascular endothelial cells.

Binding of tissue-type plasminogen activator to fibrinogen fragments.

Toxic effects produced or mediated by human eosinophil granule components on Trypanosoma cruzi.

Mechanism of inhibition of cyclo-oxygenase in human blood platelets by carbamate insecticides.

Protein co-isolated with human tissue factor impairs recovery of activity.

An apparently higher molecular weight gamma-chain variant in a new congenital abnormal fibrinogen Tochigi characterized by the replacement of gamma arginine-275 by cysteine.

Irreversible inhibition of the TXA₂/PGH₂ receptor of human platelets by a photoaffinity ligand.

Mutagenicity, comutagenicity, and antimutagenicity of erythrosine (FD and C red 3), a food dye, in the Ames/Salmonella assay.

Regulation of human basophil and lung mast cell function by cyclic adenosine monophosphate.

Hepatic toxicity of paraquat in primary cultures of rat hepatocytes.

Cardiac transplantation in a Jehovah's witness.

Comparison of effects of paraquat and methidation on enzyme activity and tissue necrosis of carp, following exposure to the pesticides singly or in combination.

Thrombin enhances opsonized zymosan-induced chemiluminescence of neutrophils.

[Cases of severe methyl bromide poisoning residing above a warehouse].

Increase of enzyme activities following the in vitro peroxidation of normal human red blood cells.

Microfilament modification by dihydrocytochalasin B causes retinoic acid-modulated chondrocytes to reexpress the differentiated collagen phenotype without a change in shape.

Uptake, distribution, and metabolism of trivalent arsenic in the pregnant mouse.

Effects of arachidonic acid on respiratory activities in isolated brain mitochondria.

Predeposit autologous blood donation.

Current status of thrombopoietin.

Evidence for in vitro regulation of IgE receptors on the human basophil membrane by their removal and reexpression: effects of Ca²⁺, Mg²⁺, some metabolic inhibitors and fetal calf serum.

Endothelium-derived relaxing factor and atriopeptin II elevate cyclic GMP levels in pig aortic endothelial cells.

[The characteristics of metabolism of organochlorine insecticides in warm-blooded animals after induction of the monooxygenase system of the liver].

The pathologic and immunologic effects of inhaled acrolein in rats.

Hepatotoxicity induced by the herbicide atrazine in the rat.

[Hematological and biochemical changes in animals exposed to khardin and ethanol].

Risk of malignant lymphoma in Swedish pesticide applicators.

Formulation and food deprivation affects 2,4-D neurobehavioral toxicity in rats.

Dissociation of hypolipidemic and antiplatelet actions from adverse myotonic effects of clofibrac acid related enantiomers.

Paraquat (gramoxone) poisoning in south-west Hungary, 1977-1984. Toxicological and histopathological aspects of group intoxication cases.

Primary cultures of rat aortic endothelial and smooth muscle cells: I. An in vitro model to study xenobiotic-induced vascular cytotoxicity.

Cytogenetic toxicity of paraquat and streptonigrin in Fanconi's anemia.

Effects of pentachlorophenol on the in vitro and in vivo antibody response.

Haemodialysis for paraquat poisoning.

[Clinico-experimental research on acute isoproterenol poisoning in sheep].

Sister chromatid exchange and chromosomal breakage in pentachlorophenol (PCP) exposed workers.

[Three cases of eosinophilic cholecystitis].

Specific removal of paraquat by hemoperfusion through antiparaquat conjugated agarose-polyacrolein microsphere beads.

Elimination of paraquat.

[Experimental study and standardization of propanide in water].

Effect of aminotriazole on mercury uptake by the fetus of normal and acatalasemic mice exposed to metallic mercury.

Metabolic basis of ethylene glycol monobutyl ether (2-butoxyethanol) toxicity: role of alcohol and aldehyde dehydrogenases.

Effect of aldehyde dehydrogenase inhibitors on the ex vivo sensitivity of human multipotent and committed hematopoietic progenitor cells and malignant blood cells to oxazaphosphorines.

Treatment of adverse digitalis effects by hemoperfusion through columns with antidigoxin antibodies bound to agarose polyacrolein microsphere beads.

[Evaluation of the cytogenetic effect of the herbicide treflan and of a number of its metabolites on mammalian somatic cells].

Acetylsalicylic acid inhibits non-immunologic contact urticaria.

Paraquat-induced, dose-dependent conditioned taste aversions and weight loss mediated by the area postrema.

Oxygen toxicity and chromosomal breakage in ataxia telangiectasia.

Elimination kinetics of ethanol and acetaldehyde in healthy men during the calcium carbimide-alcohol flush reaction.

In vivo metabolism of the cardiovascular toxin, allylamine.

Alterations in brain aldehyde dehydrogenase activity modify ethanol-induced conditioned taste aversion.

Blood acetaldehyde and the ethanol-induced increase in splanchnic circulation.

Human erythrocyte glutathione S-transferase: a possible marker of chemical exposure.

In vitro effect of cinnamic aldehyde, a main component of Cinnamomi Cortex, on human platelet aggregation and arachidonic acid metabolism.

Membrane-directed effects of the plant hormones abscisic acid, indole-3-acetic acid and 2,4-dichlorophenoxyacetic acid.

Anti-thrombic actions of 70% methanolic extract and cinnamic aldehyde from cinnamomi cortex.

Absence of effect of 3-amino-1,2,4-triazole pretreatment on blood ethanol levels after oral administration, in rats.

Alterations in brain aldehyde dehydrogenase activity modify the locomotor effects produced by ethanol in rats.

Effects of a small dose of ethanol and calcium carbimide-induced acetaldehyde intoxication on human platelet aggregation, associated thromboxane formation and urinary excretion of 2,3-dinor-6-keto prostaglandin F1 alpha.

Paraquat as an agent affecting antioxidant enzymes of common carp erythrocytes.

Biochemically damaged erythroblasts bind natural serum antibodies and activate complement.

Dietary iron and broiler performance.

High-dose carbonyl iron for iron deficiency anemia: a randomized double-blind trial.

Immunosuppression following exposure to 7,12-dimethylbenz[a]anthracene (DMBA) in Ah-responsive and Ah-nonresponsive mice.

Effect of excess iron in milk replacer on calf performance.

Collagen type III deficiency in patients with rupture of intracranial saccular aneurysms.

Treatment of iron deficiency conditions in blood donors: controlled study of iron sulphate versus iron protein succinylate.

Exposure of the skin to methyl bromide: a study of six cases occupationally exposed to high concentrations during fumigation.

[Oral iron therapy: preparations with rapid or delayed iron liberation?].

ATP requirement for induced tight junction formation in HT 29 adenocarcinoma cells.

Uptake of propranolol by microvessels isolated from bovine brain.

[Pharmacological analysis of the participation of ethanol-oxidizing enzyme systems in ethanol metabolism at different stages of experimental alcoholism].

The kinetics of phosphoinositide hydrolysis in rat basophilic leukemia (RBL-2H3) cells varies with the type of IgE receptor cross-linking agent used.

Differential endocytosis of fluorescein iso-thiocyanate-concanavalin A by normal and chronic myeloid leukemic granulocytes.

Renal anaphylaxis. I. Antigen-initiated responses from isolated perfused rat kidney.

Photoaffinity analogues of methotrexate as folate antagonist binding probes. 1. Photoaffinity labeling of murine L1210 dihydrofolate reductase and amino acid sequence of the binding region.

Different cholinergic pathways are involved in the improvement induced by CCK-8 and by ACTH-(1-24) in massive acute hemorrhage, in rats.

Increased thromboplastic potential in diabetes: a multifactorial phenomenon.

Regional O₂ uptake during hypoxia and recovery in hypermetabolic dogs.

Photosensitized lysis of red blood cells by phototoxic antimalarial compounds.

[Treatment of anemia].

The relationship between uncoupling of oxidative phosphorylation and neuronal necrosis within the CNS in rats dosed with trihalogenated imidazoles.

TCDD-induced hyperplasia of the ureteral epithelium produces hydronephrosis in murine fetuses.

Erythrocyte lysis by monocytes: investigations on the mechanism and role of the target cell hydrogen peroxide catabolizing pathways.

Studies of phagocytosis in chronic granulomatous disease.

Iron deficiency anemia and iron therapy effects on infant developmental test performance.

⁵¹Cr-uptake assay. A sensitive and reliable method to quantitate cell viability and cell death.

[Possible mechanisms of the activation of the lipid peroxidation reaction in the vitreous body in hemorrhage].

The effect of cephalosporin antibiotics on alcohol metabolism: a review.

[Hemorrhaging esophageal varices treated by Mansel solution instead of the Sengstaken-Blakemore tube].

Immunochemical characterization of fibrinogen, fibrin I, and fibrin II in human thrombi and atherosclerotic lesions.

Cytogenetic studies on 1,1-dichloroethylene and its two isomers in mammalian cells in vitro and in vivo.

Drug-induced cholestasis.

Evaluation of a program to overcome vitamin A and iron deficiencies in areas of poverty in Minas Gerais, Brazil.

Clinical reports on plasma exchange in the Kidney Center, Tokai University School of Medicine.

A serine proteinase inhibitor produced by an HTLV I virus-transformed human T lymphocyte line.

Oral toxicity of trichlorobenzyl chloride and its acid derivative.

Internalisation and recycling of the granulocyte-macrophage colony-stimulating factor (GM-CSF) receptor on a murine myelomonocytic leukemia.

Analysis of mechanisms responsible for the bradycardic action of naloxone after haemorrhage in the conscious rabbit.

Epitope mapping of the von Willebrand factor subunit distinguishes fragments present in normal and type IIA von Willebrand disease from those generated by plasmin.

[Intranasal administration of chlornidine gel in hypertension].

Carbonyl iron for short-term supplementation in female blood donors.

Synthesis, cell growth inhibition, and antitumor screening of 2-(p-n-butylanilino)purines and their nucleoside analogues.

Health effects of pesticides: a review of epidemiologic research from the perspective of developing nations.

Effect of supplementary vitamins and iron on malaria indices in rural Gambian children.

Survival rates and properties of sickle cell anemia red cells treated with nitrogen mustard.

[Changes in brain energy metabolism in experimental cerebral hemorrhage].

A canine model for the study of hapten-specific suppression of IgE-mediated bronchoconstriction and anaphylaxis.

Bioavailability and therapeutic efficacy of bivalent and trivalent iron preparations.

Equivalent bioavailability of iron from ferrous salts and a ferric polymaltose complex. Clinical and experimental studies.

Pharmacokinetics of iron salts and ferric hydroxide-carbohydrate complexes.

Assessment of the systemic distribution and toxicity of formaldehyde following pulpotomy treatment: Part two.

No evidence for reactive oxygen damage in ischemia-reflow injury.

Pesticides and cancer risks in agriculture.

Overdose toxicity studies versus threshold: elements of biology must be incorporated into risk assessment.

Reactions of oxyphenbutazone with active oxygen species.

The heparin binding site of human antithrombin III. Selective chemical modification at Lys114, Lys125, and Lys287 impairs its heparin cofactor activity.

PHA- and Con A-induced chemiluminescence of human blood mononuclear cells and granulocytes in luminol or lucigenin.

The amino acid sequence of the phosphorylation domain of the erythrocyte Ca²⁺ ATPase.

Respiratory enzymes of *Thiobacillus ferrooxidans*. A kinetic study of electron transfer between iron and rusticyanin in sulfate media.

Metabolism and excretion of gallium arsenide and arsenic oxides by hamsters following intratracheal instillation.

[Alanine aminotransferase activity of the blood serum and liver of rats after exposure to chemical substances].

The interaction of streptokinase-plasminogen activator complex, tissue-type plasminogen activator, urokinase and their acylated derivatives with fibrin and cyanogen bromide digest of fibrinogen. Relationship to fibrinolytic potency in vitro.

Biochemical and immunological properties of different electrophoretic forms of juvenile hormone esterase from *Trichoplusia ni* (H₂Bner).

Cloning of cDNAs coding for the heavy chain region and connecting region of human factor V, a blood coagulation factor with four types of internal repeats.

Monochloroacetic acid toxicity in the mouse associated with blood-brain barrier damage.

Effect of age and sex on allyl alcohol hepatotoxicity in rats: role of liver alcohol and aldehyde dehydrogenase activities.

Inhibition of the activation of Hageman factor (factor XII) by peripheral blood cells.

Immunsorbent chemistry: a study of agarose-based column sorbents for the removal of low-density lipoprotein (LDL) from blood.

Evidence that 2,3,7,8-tetrachlorodibenzo-p-dioxin and thyroid hormones act through different mechanisms in human keratinocytes.

N-hydroxy-N-arylamides--IV. Differences in the mechanism of haemoglobin oxidation in vitro between N-hydroxy-N-arylamides and arylhydroxylamines.

Lipopolysaccharide-sensitive serine-protease zymogen (factor C) of horseshoe crab hemocytes. Identification and alignment of proteolytic fragments produced during the activation show that it is a novel type of serine protease.

Hybrid glycoproteins from human erythrocyte membranes. Isolation and complete structural analysis of the novel sialoglycoprotein from St(a+) red cells.

Phosphorylation in vitro of human fibrinogen with casein kinase TS and characterization of phosphorylated sites.

The production of pregnancy associated alpha glycoprotein (PAG) from human peripheral blood mononuclear cells.

Calcium channel blockers induce preferential coronary vasodilation by an alpha 1-mechanism.

A QSAR study of the acute toxicity of some industrial organic chemicals to goldfish. Narcosis, electrophile and proelectrophile mechanisms.

ADP-induced platelet aggregation depends on the conformation or availability of the terminal gamma chain sequence of fibrinogen. Study of the reactivity of fibrinogen Paris 1.

Amino acid sequence of the von Willebrand factor-binding domain of platelet membrane glycoprotein Ib.

Substrates for the cell surface protein kinase in blood: a calf serum protein and its precursor in plasma.

Synthesis and cardiotoxic activity of a series of substituted 4-alkyl-2(1H)-quinazolinones.

Cleavage of fibrin-derived D-dimer into monomers by endopeptidase from puff adder venom (*Bitis arietans*) acting at cross-linked sites of the gamma-chain. Sequence of carboxy-terminal cyanogen bromide gamma-chain fragments.

Effect of the cyanogen-bromide-2 fragment of fibrinogen on plasminogen activation by single-chain urokinase-type plasminogen activator.

Hybrid glycoproteins from human erythrocyte membranes. I. Isolation and complete structural analysis of the hybrid sialoglycoprotein from Dantu-positive red cells of the N.E. variety.

Oxygen metabolite-induced cytotoxicity to cultured rat gastric mucosal cells.

Comparison of the acute toxicity of endothal and cantharidic acid on mouse liver in vivo.

Effect of allyl alcohol-induced sublethal hepatic damage upon doxorubicin metabolism and toxicity in the rabbit.

Human growth hormone. Immunochemical characterization of polypeptide fragments purified by reversed phase-high performance liquid chromatography.

Transferrin receptors and transferrin iron uptake by cultured human blood monocytes.

Polyclonal activation of human peripheral blood lymphocytes by bacterial porins and defined porin fragments.

A collagen-like immunodeterminant on the surface of *Streptococcus sanguis* induces platelet aggregation.

Phenylethanolamine N-methyltransferase-containing neurons in the rostral ventrolateral medulla of the rat. I. Normal ultrastructure.

Endogenous Abscisic Acid and Indole-3-Acetic Acid and Somatic Embryogenesis in Cultured Leaf Explants of *Pennisetum purpureum* Schum. : Effects in Vivo and in Vitro of Glyphosate, Fluridone, and Paclobutrazol.

Binding and internalization of recombinant human erythropoietin in murine erythroid precursor cells.

Chloramphenicol accumulation by *Haemophilus influenzae*.

Alcohol loss arising from microbial contamination of drivers' blood specimens.

Effect of metabolic inhibitors on platelet attachment, spreading and aggregation on collagen-coated surfaces.

New modified activated partial thromboplastin time and prothrombin time methods using a synthetic chromogenic substrate in combination with diazotization.

Modulation of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)-mediated myelotoxicity by thyroid hormones.

[Effects of phenol and related compounds on erythrocytes and hepatocytes from rats and dipalmitoyl phosphatidylcholine-liposomes].

Ultrastructural changes in the respiratory tract of rats following methyl isocyanate inhalation.

N-hydroxy-N-arylamides. III: Mechanism of haemoglobin oxidation by N-hydroxy-4-chloroacetanilide in erythrocytes in vitro.

Selective manipulation of neurohumoral control of the cardiac pacemaker by drugs given intrapericardially.

Troponin-T and glyceraldehyde-3-phosphate dehydrogenase share a common antigenic determinant.

Opioid modulation of thyrotropin releasing hormone induced prolactin secretion.

Changes in plasma proteins in rats treated for short periods with hepatotoxins or with agents which induce cytochrome P450 isoenzymes.

Derivation of CO₂ output from oscillations in arterial pH.

Toxicity of certain products of lipid peroxidation to the human malaria parasite *Plasmodium falciparum*.

Haemophilus influenzae type b polysaccharide-protein conjugate vaccine.

Combinations of mesna with cyclophosphamide or adriamycin in the treatment of mice with tumors.

Inhibition of the photosynthetic electron transport of isolated thylakoids by hemolyzed rabbit sera.
Evidence for the potential involvement of parallel electron transport in photosystem I Mehler reactions.

Mechanisms of 1,2,3,4,6,7,8-heptachlorodibenzo-p-dioxin (HpCDD)-induced humoral immune suppression: evidence of primary defect in T-cell regulation.

The roles of haemolymphatic lipoproteins in the oogenesis of *Rhodnius prolixus*.

Metabolism and distribution of [¹⁴C]glucose in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Uptake of L-threo-dihydroxyphenylserine into human brain synaptosomes.

The effect of a metabolic inhibitor upon the properties of the cerebral vasculature during a whole-head saline perfusion of the rat.

Phosphorylation of human fibrinogen in vitro with protein kinase C: characterization of the phosphorylated sites.

In vivo effectiveness of oral complexation agents in the management of iron poisoning.

Demonstration of Ca²⁺-ATPase activity in the maturation ameloblast of rat incisor after vascular perfusion.

Physiological, anatomic and behavioural changes in the respiratory system of *Salmo gairdneri* Rich. On acute and chronic exposure to chlorothalonil.

Acute effect of paraquat on lung fluid balance and prostanoid production in awake sheep.

Lack of genotoxic and cytotoxic effects of the herbicide lenacil on mouse tumor cells and on some *Salmonella typhimurium* strains.

[The degree of toxicity of the combined effects of chlorophenoxy derivative herbicides on reproductive function of warm-blooded animals, and the problems of their hygienic regulation].

[Neurologic manifestations in 93 patients with exogenous poisoning caused by non-therapeutic chemical substances].

A light and electron microscopic study of the regenerative epithelium in the intrahepatic bile duct.
Experimental study of local direct instillation of paraquat into the intrahepatic bile ducts of rats.

The effect of topically applied n-butylester of 2,4-dichlorophenoxyacetic acid on the immune response in mice.

The corrected collagen content in paraquat lungs.

Biological effects of the superoxide radical.

The impact of inhaled acrolein on hypertension-sensitive and resistant rats.

Absorption study of pentachlorophenol in persons working with wood preservatives.

Further studies of lipid peroxidation in human paraquat poisoning.

Stable dicentric chromosomes induced by chemical mutagens in L5178Y mouse lymphoma cells.

Multicenter evaluation of ultrafiltration, dialysis, and thermal coagulation as sample pretreatment methods for the colorimetric determination of paraquat in blood and tissues.

Current status of plasmapheresis in toxicology.

Influence of lipid peroxidation on beta-adrenoceptors.

Some effects of multiple, sublethal doses of monosodium methanearsonate (MSMA) herbicide on hematology, growth, and reproduction of laboratory mice.

Acrolein and embryogenesis: an experimental study.

Pseudomembranous colitis in a patient of paraquat intoxication.

The effect of prenatal exposure to the n-butylester of 2,4-dichlorophenoxyacetic acid (2,4-D) on the immune response in mice.

Specific hemoperfusion through agarose acrobeads.

Chronic progredient diffuse alveolar damage probably related to exposure to herbicides.

Diquat intoxication: treatment by charcoal haemoperfusion and description of a new method of diquat measurement in plasma.

Elimination of paraquat.

Delayed health hazards of pesticide exposure.

The effect of oral exposure to the n-butylester of 2,4-dichlorophenoxyacetic acid on the immune response in mice.

Attenuation of cytogenetic damage by 2-mercaptoethanesulfonate in cultured human lymphocytes exposed to cyclophosphamide and its reactive metabolites.

[Characteristics of an experimental model of alcoholic cardiomyopathy by diagnostic enzyme tests].

Removal of paraquat from contaminated fabrics.

Glutathione depletion as a determinant of sensitivity of human leukemia cells to cyclophosphamide.

Cytotoxicity, DNA cross-linking, and single strand breaks induced by activated cyclophosphamide and acrolein in human leukemia cells.

Bacterial infection and acute lung injury in hamsters.

Diphenhydramine and the calcium carbimide-ethanol reaction: a placebo-controlled clinical study.

Histamine action in paraquat-induced lung injury.

Relationship between cellular diadenosine 5',5'''-P₁,P₄-tetrphosphate level, cell density, cell growth stimulation and toxic stresses.

Thermotropic properties of human erythrocyte membrane proteins as affected by hydroxychloroaromatic compounds.

Depletion of human lymphocytes from peripheral blood and bone marrow by affinity ligands conjugated to agarose-polyacrolein microsphere beads.

Differential inhibition of rat tissue catalase by cyanamide.

[Pentachlorophenol concentrations in the organs and blood of 11 dead infants].

Effect of 3-amino-1,2,4-triazole pretreatment on ethanol blood levels after intraperitoneal administration.

Observations on the biochemical basis of ethanol metabolism by human macrophages.

The metabolism of xenobiotics by certain extrahepatic organs and its relation to toxicity.

Three abnormal fibrinogen variants with the same amino acid substitution (γ 275 Arg----His): fibrinogens Bergamo II, Essen and Perugia.

Effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on IgA serum and bile levels in rats.

Poisoning by chemical non-medicinal products in Brazil: clinical and laboratory findings in 132 patients.

Effect of iron therapy on phagocytosis and bactericidal activity in neutrophils of iron-deficient infants.

Successful treatment of aplastic anemia associated with chronic thyroiditis and Sjögren's syndrome.

[Prevention of iron deficiency in infants by fortified milk. Field study of a low-fat milk].

Lipid peroxidative potency of photosensitized thiazide diuretics.

Modified selective medium for isolation of *Campylobacter* spp. from feces: comparison with Preston medium, a blood-free medium, and a filtration system.

Hyperferremia in immunosuppressed patients with acute nonlymphocytic leukemia and the risk of infection.

Bioavailability of iron in goat milk compared with cow milk fed to anemic rats.

Hematotoxic effects of 3,5-dinitro-4-chloro- α,α,α -trifluorotoluene, a water contaminant.

Methyl isocyanate subchronic vapor inhalation studies with Fischer 344 rats.

Bioavailability of iron in soy-based formula and its effect on iron nutriture in infancy.

Effects of oxygen and glucose deprivation on vasoactivity in isolated bovine middle cerebral arteries.

Tumor killing by human alveolar macrophages and blood monocytes. Decreased cytotoxicity of human alveolar macrophages.

Chronic hypoxaemia and decompensated erythrocytosis in cyanotic congenital heart disease.

Ascorbic acid does not augment the restoration effect of iron treatment for empty iron stores in patients after gastrointestinal surgery.

Heat stress proteins and experimental cancer metastasis.

Endogenous ethanol--its metabolic, behavioral and biomedical significance.

Antibody responses in protein-energy restricted beef cows and their cold stressed progeny.

Toxicity and evidence for metabolic alterations in 2,3,7,8-tetrachlorodibenzo-p-dioxin-treated guinea pigs fed by total parenteral nutrition.

Cross-linking of IgE-receptor complexes at the cell surface: a fluorescence method for studying the binding of monovalent and bivalent haptens to IgE.

Modulation of serum complement levels following exposure to polychlorinated dibenzo-p-dioxins.

Oxygen consumption in Plasmodium berghei-infected murine red cells: a direct spectrophotometric assay in intact erythrocytes.

Immunosuppression without liver induction by subchronic exposure to 2,7-dichlorodibenzo-p-dioxin in adult female B6C3F1 mice.

[Compensatory factors in acute failure of the isolated heart].

A monoclonal antibody preventing binding of tissue-type plasminogen activator to fibrin: useful to monitor fibrinogen breakdown during t-PA infusion.

Comparative evaluation of the effect of pharmacological agents on endocytosis and coendocytosis of IgE by rat basophilic leukaemia cells.

Effect of ischemia-related metabolic factors on thallium exchange in cultured rat myocardial cells.

Alcohol and acetaldehyde in rat's milk following ethanol administration.

Health effects of long-term exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Phenotypic alterations in tumors that developed from threshold subcutaneous inocula. I. Reduced binding of natural antibodies and sensitivity to hypotonic lysis.

Iron deficiency and behavioral development in infants and preschool children.

Intermediary metabolism of the mature rat following 2,3,7,8-tetrachlorodibenzo-p-dioxin treatment.

Monoclonal antibodies against ricin: effects on toxin function.

Increased binding of D-penicillamine to monocytes in rheumatoid arthritis.

Comparative uptake, retention and cytotoxicity of daunorubicin by human myeloid cells.

Plasma membrane potential of murine erythroleukemia cells: approach to measurement and evidence for cell-density dependence.

Subchronic oral toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the guinea pig: comparisons with a PCB-containing transformer fluid pyrolysate.

Iron deficiency in the elderly.

Regulation of alkaline phosphatase activity in rat hepatoma cells. Effects of serum proteins, cycloheximide, actinomycin D, chloroquine, dinitrophenol and potassium cyanide.

Carbonyl iron therapy for iron deficiency anemia.

Insulin internalization into monocytes is decreased in patients with type II diabetes mellitus.

[Cytogenetic activity of metabolites of pesticides representing different classes of chemical compounds].

Interaction of monoclonal antibodies with the IgE-receptor on rat mast cells and rat basophilic leukemia (RBL) cells.

Electrophysiological correlates of peroxide damage in guinea pig hippocampus in vitro.

Relationship of the wasting syndrome to lethality in rats treated with 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Eosinophil-mediated cellular cytotoxicity induced by zymosan-activated serum.

Subacute inhalation experiment for methyl bromide in rats.

[Effect of supplementation with iron on iron deposits in pregnancy, the puerperium and in the newborn infant].

A case of fatal sodium azide ingestion.

Contribution of drug transport and reductases to daunorubicin resistance in human myelocytic cells.

Synthesis and structure-activity relationships of antibacterial phosphonopeptides incorporating (1-aminoethyl)phosphonic acid and (aminomethyl)phosphonic acid.

Ferritin versus ferrous sulphate preparations: a controlled study in sideropaenic patients.

The C57B1/6 nu/nu, lpr/lpr mouse. III. Autoimmunity status.

[The influence of carrageenan, colchicine, 2,4-dinitrophenol, ethanol, galactose, indomethacin and liquoid on hemolytic complement activity (CH50E)].

The heat-shock response in vivo: experimental induction during mammalian organogenesis.

[Occurrence of drug reactions].

Staphylococcal alpha-toxin: a structure-function study using a monoclonal antibody.

[A method of preserving erythrocytic immunoglobulin diagnostic agents].

Transport of thiamin across the blood-brain barrier of the rat in the absence of aerobic metabolism.

Transport of cimetidine by the rat choroid plexus in vitro.

Cloning and expression in *Escherichia coli* of a synthetic DNA for hirudin, the blood coagulation inhibitor in the leech.

Nifedipine attenuates both alpha-1 and alpha-2 adrenoceptor-mediated pressor and vasoconstrictor responses in conscious dogs and primates.

Cross-linking site in fibrinogen for alpha 2-plasmin inhibitor.

Chemical and biological characterization of low-molecular-weight human skeletal growth factor.

Amino acid sequence of the sex steroid binding protein of human blood plasma.

The mechanisms by which haemoglobin inhibits the relaxation of rabbit aorta induced by nitrovasodilators, nitric oxide, or bovine retractor penis inhibitory factor.

Effect of sodium arsenite on liposomes and erythrocyte membranes.

Complementary DNA sequence of lamprey fibrinogen beta chain.

Prosimian hemoglobins. III. The primary structures of the duplicated alpha-globin chains of *Lemur variegatus*.

Human adenine phosphoribosyltransferase. Complete amino acid sequence of the erythrocyte enzyme.

Effects of heparin on prostacyclin binding and platelet adenylate cyclase activity stimulated by iloprost and forskolin.

1-amino-3,7,8-trichlorodibenzo-p-dioxin: a specific antagonist for TCDD-induced myelotoxicity.

Chemical conversion of aspartyl peptides to isoaspartyl peptides. A method for generating new methyl-accepting substrates for the erythrocyte D-aspartyl/L-isoaspartyl protein methyltransferase.

Mechanism of hepatotoxicity in periportal regions of the liver lobule due to allyl alcohol: studies on thiols and energy status.

Pantothenic acid transport through the blood-brain barrier.

Cloning of a cDNA coding for human factor V, a blood coagulation factor homologous to factor VIII and ceruloplasmin.

Transglutaminase modification of rhodopsin in retinal rod outer segment disk membranes.

The platelet reactivity of collagen type I: evidence for multiple platelet-reactive sites in the type I collagen molecule.

Teratogenicity of bifenox and nitrofen in rodents.

Characteristics of the large neutral amino acid transport system of bovine brain microvessel endothelial cell monolayers.

Concentration and chemical status of arsenic in the blood of pregnant hamsters during critical embryogenesis. 1. Subchronic exposure to arsenate utilizing constant rate administration.

Influence of extracellular calcium on allyl alcohol-induced hepatotoxicity.

Dependence of curing time, peak temperature, and mechanical properties on the composition of bone cement.

Effect of aminophylline on hindlimb blood flow autoregulation during increased metabolism in dogs.

Characterization of fibrinogen Milano I: amino acid exchange gamma 330 Asp----Val impairs fibrin polymerization.

The glutathione redox cycle as a defense system against hydrogen-peroxide-induced prostanoid formation and vasoconstriction in rabbit lungs.

Binding of 125I-labelled fibrin(ogen) fragments to platelets and to immunoprecipitated glycoprotein IIb-IIIa complex.

Red blood cells contain a pathway for the degradation of oxidant-damaged hemoglobin that does not require ATP or ubiquitin.

Arsenic levels in blood, urine, and hair of workers applying monosodium methanearsonate (MSMA).
pH shift during equilibrium dialysis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin metabolism and disposition in yellow perch.

Metabolism and disposition of 2,3,7,8-tetrachlorodibenzo-p-dioxin in rainbow trout.

Cellular uptake of 3,5,3'-triiodothyronine and thyroxine by red blood and thymus cells.

Concentration-related changes in blood and tissue parameters of hepatotoxicity and their interdependence in rats exposed to bromobenzene and 1,2-dichlorobenzene.

The modification of platelet-induced coronary vasoconstriction by a thromboxane receptor antagonist.

Human prostate-specific antigen: structural and functional similarity with serine proteases.

Prostaglandin release by the chick embryo heart is increased by 2,3,7,8-tetrachlorodibenzo-p-dioxin and by other cytochrome P-448 inducers.

Membrane glycoporphins in Sta blood group erythrocytes.

A calmodulin and alpha-subunit binding domain in human erythrocyte spectrin.

Effects of 2,4-dinitrophenol on renal ammoniogenesis in the rat.

Localization of thrombin cleavage sites in the amino-terminal region of bovine protein S.

Altered polyamine metabolism in Chinese hamster cells growing in a defined medium.

Vitamin E consumption by human blood platelets activated by latex particles.

Occupational exposure to chlorophenates. Renal, hepatic and other health effects.

Isolation and functional characterization of the heavy and light chains of human tissue-type plasminogen activator.

Influence of pulmonary blood flow and O₂ flux on DO₂ in avian lungs.

Erythrocyte incorporation of ingested stable isotope of iron (⁵⁸Fe).

Chemotactic activity of collagen-like polypeptides for human peripheral blood neutrophils.

Platelet-leukocyte interaction: selective binding of thrombin-stimulated platelets to human monocytes, polymorphonuclear leukocytes, and related cell lines.

Fixation, fine structure, and immunostaining for neuropeptides: perfusion versus immersion of the neuroendocrine hypothalamus.

Uncoupling effects of 2,4-dinitrophenol on electron transfer reactions and cell bioenergetics in rat brain in situ.

Complete amino acid sequence of NADH-cytochrome b₅ reductase purified from human erythrocytes.

Identification of a thrombin sequence with growth factor activity on macrophages.

Synergistic incorporation of daunorubicin in erythrocytes in the presence of polyene antibiotics. Role of the membrane potential.

Folate status during pregnancy and lactation in a West African rural community.

The increase of body iron stores estimated by the increase of serum ferritin concentration during ferrous sulphate treatment after gastrointestinal surgery.

The importance of aspartate aminotransferase for platelet aggregation.

Structure-function relationships of thrombin based on the computer-generated three-dimensional model of the B chain of bovine thrombin.

The preparation of ¹¹C-labelled fluoromethane for the study of regional cerebral blood flow using positron emission tomography.

Respiratory adjustments of the unanaesthetized chicken, *Gallus domesticus*, to elevated metabolism elicited by 2,4-dinitrophenol or cold exposure.

Humoral immunotoxicity of polychlorinated diphenyl ethers, phenoxyphenols, dioxins and furans present as contaminants of technical grade pentachlorophenol.

Congenital glaucoma and retinal dysplasia.

Experimental cytoxan cystitis and prevention by acetylcysteine.

Intravascular haemolysis induced by pentachlorophenol.

Protective effect of activated charcoal in cattle poisoned with atrazine.

Sequential bilateral lung transplantation for paraquat poisoning. A case report. The Toronto Lung Transplant group.

Recovery from paraquat pneumonitis.

Steroid pretreatment does not prevent paraquat pneumonitis in rabbits.

Hemoperfusion-hemodialysis ineffective for paraquat removal in life-threatening poisoning?

Extraction and quantification of paraquat in liver and hemolyzed blood.

Health hazards of natural and introduced chemical components of boatbuilding woods.

Pathogenesis of acute and chronic lung injury induced by foreign compounds.

Mechanisms of tobacco smoke toxicity on pulmonary macrophage cells.

Failure of desferrioxamine to modify the toxicity of paraquat in rats.

Investigation of adrenal steroids and 25-hydroxy-cholecalciferol in human gramoxone poisoning.

Therapy of digoxin intoxication in dogs by specific hemoperfusion through agarose polyacrolein microsphere beads-antidigoxin antibodies.

On the genotoxicity of the pesticides Endodan and Kilacar in 6 different test systems.

The effect of the plant cell inhibitor propachlor (alpha-chloro-N-isopropyl-acetanilide) on the cell cycle of L1210 cells as evaluated by flow cytometry.

Hydrogen peroxide has a role in the aggregation of human platelets.

Restoration of sensitivity to oxazaphosphorines by inhibitors of aldehyde dehydrogenase activity in cultured oxazaphosphorine-resistant L1210 and cross-linking agent-resistant P388 cell lines.

Organization of the cytoskeleton in resting, discoid platelets: preservation of actin filaments by a modified fixation that prevents osmium damage.

Gas chromatographic determination of pentachlorophenol in human blood and urine.

A comparative study of the inhibition of hepatic aldehyde dehydrogenases in the rat by methyltetrazoethiol, calcium carbimide, and disulfiram.

Demonstration of a functional blood-testis barrier to acetaldehyde. Evidence for lack of acetaldehyde effect on ethanol-induced depression of testosterone in vivo.

Metabolism and excretion of orally administered arsenic trioxide in the hamster.

Iron detoxification by haemoperfusion through deferoxamine-conjugated agarose-polyacrolein microsphere beads.

The effect of paraquat on the peroxide metabolism enzymes in erythrocytes of freshwater fish species.

[Effect of iron-enriched rolls on the hematological indicators and clinical symptoms in women of childbearing age].

Methylthio-capping of selenocysteamine: preliminary studies on selective toxicity for cancer chemotherapy.

Iron deficiency anemia and educational achievement.

Structure-genotoxic activity relationships of pesticides: comparison of the results from several short-term assays.

Respiratory effects of borax dust.

Evaluation of immune function in mice exposed to Ordram.

Surface functions during mitosis in rat basophilic leukemia cells.

Membrane and cytoskeletal changes associated with IgE-mediated serotonin release from rat basophilic leukemia cells.

Iron deficiency among incarcerated juvenile delinquents.

Decreased iron stores in high school female runners.

Changed enzyme activities in rat kidney during ischemia.

[Clinical significance of the chemoluminescence of the blood in acute paraproctitis].

Commentary on 2,3,7,8-tetrachlorodibenzo-para-dioxin (TCDD).

Does iron supplementation compromise zinc nutrition in healthy infants?

[Treatment of the complications of pulp gangrene: clinical evaluation of a modified Walkhoff paste used in abutment technics].

[Blood chemiluminescence in the diagnosis of acute inflammatory diseases of the abdominal organs].

Circulatory responses to 2,4-dinitrophenol in dog limb during normoxia and hypoxia.

ATP depletion and loss of cell integrity in anoxic hepatocytes and silica-treated P388D1 macrophages.

Chemical structure of carbamoylating groups and their relationship to bone marrow toxicity and antiangioma activity of bifunctionally alkylating and carbamoylating nitrosoureas.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) and 2,3,7,8-tetrachlorodibenzofuran (TCDF) in pregnant C57BL/6N mice: distribution to the embryo and excretion.

The mortality of boot and shoe makers, with special reference to cancer.

Hydrogen peroxide from cellular metabolism of cystine. A requirement for lysis of murine tumor cells by verneolepin, a glutathione-depleting antineoplastic.

Hepatotoxic doses of dioxin do not damage mouse bone marrow chromosomes.

Iron malabsorption in giardiasis.

alpha-1-Antitrypsin metabolism in the protein-deficient weanling rat.

[Pharmacodynamic research on the antianemia effect of rutozid combinations with iron and ascorbic acid].

Suppressive effect of secondary *Toxoplasma gondii* infection on antibody responses in mice.

Cyclic GMP levels in interferon treated cells.

Toxicity and fetotoxicity of TCDD, TCDF and PCB isomers in rhesus macaques (*Macaca mulatta*).

Characterization of fibrinogen New York 1. A dysfunctional fibrinogen with a deletion of B beta(9-72) corresponding exactly to exon 2 of the gene.

[Pseudotumor cerebri associated with iron-deficiency anemia].

Relationship between 3H-histamine uptake and H₂-receptors in the human promyelocytic leukemia cell line HL-60.

Dose-related effects of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) in C57BL/6J and DBA/2J mice.

Acetaldehyde and alcohol levels in pregnant rats and their fetuses.

Haematological response to supplements of iron and riboflavin to pregnant and lactating women in rural Gambia.

Mouse monoclonal antibodies at the red cell surface--I. Generation of EAC4 and interaction with C1.

Hair and fingernail changes in acquired and congenital pernicious anemia.

Cellular pharmacology in murine and human leukemic cell lines of diaziquone (NSC 182986).

Pharmacokinetics of elimination of 6-mercaptopurine in the urine of children with acute lymphoblastic leukemia.

Autologous transfusion in orthognathic surgery.

Metabolic energy pathways in *Theileria annulata* sporozoites and their significance in sporozoite-bovine lymphocyte interactions in vitro.

Effect of thyroidectomy and thyroxine on 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced immunotoxicity.

A study of the mutagenic effect of 3-methyl-4-nitrophenol on the somatic cells of the mouse.

Lack of adverse side effects of oral ferrous sulfate therapy in 1-year-old infants.

Homeostatic mechanisms in the utilization of exogenous iron in children recovering from severe malnutrition.

Immunoradiometric assay to measure the in vitro penetration of sporozoites of malaria parasites into hepatoma cells.

Occupational chronic exposure to organic solvents. XII. O-cresol excretion after toluene exposure.

Whole bowel irrigation for toxic ingestions.

Umbilical haemorrhage due to ferrous sulphate in newborn piglets.

[Determination of free serum phenol by gas-liquid chromatography in hemosorption].

Evaluation of chemicals used for drinking water disinfection for production of chromosomal damage and sperm-head abnormalities in mice.

[Multiple basalomas following long-term intake of arsenic].

Treatment of iron-deficiency anaemia of infancy with bebe-tardyferon depot coated tablet.

[Initiated chemiluminescence of surface-active substances in the lungs and blood serum].

Mutagenesis at the ouabain-resistance locus of 3.7.2C L5178Y cells by chromosomal mutagens.

Conferon capsules in the therapy of sideropenic anemia.

Two separable steps in the development of platelet prothrombin-converting activity.

Neurotoxicity and metabolism of methyl bromide in rats.

Gas-liquid chromatographic analysis of ethanol and acetaldehyde in blood with minimal artifactual acetaldehyde formation.

Assessment of attachment, ingestion, and killing of Escherichia coli by bovine polymorphonuclear cells with combined micromethods.

Autoregulation of hind-limb blood flow in conscious dogs.

Mechanism of tachycardia caused by intracarotid PGE₂ in conscious ewes.

Central thyrotropin-releasing hormone elicits systemic hypoglycemia in mice.

The interaction of human platelet thrombospondin with fibrinogen. Thrombospondin purification and specificity of interaction.

NTP Toxicology and Carcinogenesis Studies of 1,2-Dichlorobenzene (o-Dichlorobenzene) (CAS No. 95-50-1) in F344/N Rats and B6C3F1 Mice (Gavage Studies).

Influence of high dietary iron as ferrous carbonate and ferrous sulfate on iron metabolism in young calves.

Acute myelotoxic responses in mice exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Analysis of the binding of a hemopoietic growth factor, P-cell-stimulating factor, to a cell surface receptor using quantitative absorption of bioactivity.

Primary structure of p19 species of avian sarcoma and leukemia viruses.

Subacute physiological effects of bleached kraft mill effluent (BKME) on the liver of trout, *Salmo gairdneri*.

Purification and characterization of human lipoprotein lipase and hepatic triglyceride lipase. Reactivity with monoclonal antibodies to hepatic triglyceride lipase.

Uptake of glucose analogues into cultured cerebral microvessel endothelium.

¹¹C-labeled 4-isopropylantipyrine: preparation and biological evaluation as a blood flow tracer in positron emission tomography (PET).

Effects of ATP and cyclic AMP on the (Na⁺ + K⁺ + 2Cl⁻)-cotransport system in turkey erythrocytes.

Localization of a fibrinogen calcium binding site between gamma-subunit positions 311 and 336 by terbium fluorescence.

Amino acid sequences of the carboxyl-terminal regions of rat plasma fibrinogen gamma A and gamma' chains.

Activation of the hole-forming toxin aerolysin by extracellular processing.

Inhibition by pesticides of prostaglandin formation in blood platelets.

Amino acid sequence of chicken gizzard beta-tropomyosin. Comparison of the chicken gizzard, rabbit skeletal, and equine platelet tropomyosins.

Species specificity in the acceleration of tissue-type plasminogen activator-mediated activation of plasminogens, by fibrinogen cyanogen bromide fragments.

Dermal absorption of pesticides calculated by deconvolution.

Sublethal effects of simulated pulp mill effluents on the respiration and energy metabolism of rainbow trout (*Salmo gairdneri*).

Degradation of peptides and proteins of different sizes by homogenates of human MRC5 lung fibroblasts. Aged cells have a decreased ability to degrade shortened proteins.

Maintenance of the integrity of the blood-brain barrier in the rat during an in situ saline-based perfusion.

Chemiluminescence by peripheral blood phagocytes from channel catfish: function of opsonin and temperature.

A comparison of physiological changes in carp, *Cyprinus carpio*, induced by several pollutants at sublethal concentrations. I. The dependency on exposure time.

Lipid peroxidation modifies the effect of phenolic anti-inflammatory drugs on prostaglandin biosynthesis.

[Reproductive ability of *Staph. aureus* and *E. coli* in the presence of human blood and various levels of carrageenan, colchicine, indomethacin, galactose and 2,4-dinitrophenol].

[Effect of metabolic inhibitors on formed novocaine and neutral red segregation zones in frog erythrocytes].

Markers of fibrinogen derivatives used in clinical investigation.

Selective depression of thymus-independent anti-DNP antibody responses induced by adult but not neonatal splenectomy.

Potentiated hepatotoxicity from concurrent administration of acetaminophen and allyl alcohol to rats.

Activation of Na⁺-dependent transport at fertilization in the sea urchin: requirements of both an early event associated with exocytosis and a later event involving increased energy metabolism.

Pharmacokinetic analysis of potassium cyanate in mice using whole blood and expired air.

Atriopeptin-immunoreactive neurons in the brain: presence in cardiovascular regulatory areas.

Selective medium for isolation of *Haemophilus somnus* from cattle and sheep.

Immunochemical determination of conformational equilibria for fragments of the B beta chain of fibrinogen.

Catalytic activity and platelet reactivity of heparin covalently bonded to surfaces.

Effects of oxygen radicals on cerebral arterioles.

[ATPase activity of the novocaine segregation zones isolated from the erythrocytes of the common frog].

Putrescine transport in human platelets.

Amino acid sequence of the beta-chain of the tetrameric haemoglobin of the bivalve mollusc, *Anadara trapezia*.

[Secretin and pancreatic secretion in iron absorption].

Assessment of exposure to organophosphate insecticides during spraying in Haiti: monitoring of urinary metabolites and blood cholinesterase levels.

Influence of endogenous catalase activity on the sensitivity of the oral bacterium *Actinobacillus actinomycetemcomitans* and the oral haemophili to the bactericidal properties of hydrogen peroxide.

The protective effect of pollen extracts against allyl alcohol damage of the liver.

Lamprey fibrinogen gamma chain: cloning, cDNA sequencing, and general characterization.

The epidemiology and toxicology of TCDD.

Toxicologic studies in a fatal overdose of 2,4-D, mecoprop, and dicamba.

[Cytogenic activity of the combined action of the herbicides 2,4-D and 2,4,5-T].

[Interrelation of the level of acid phosphatase activity of erythrocytes and the phenotype of workers in the chemical industry].

Induction of sister chromatid exchanges by the peroxisome proliferators 2,4-D, MCPA, and clofibrate in vivo and in vitro.

Distribution and toxicity of monosodium methanearsonate following oral administration of the herbicide to dairy sheep and goats.

Evaluation of diallate and triallate herbicides for genotoxic effects in a battery of in vitro and short-term in vivo tests.

Selected responses of hypertension-sensitive and resistant rats to inhaled acrolein.

An evaluation of the mutagenic potential of cyanamide using the micronucleus test.

Effects of dietary methionine, methylmercury, and atrazine on ex-vivo synthesis of prostaglandin E1 and thromboxane B2.

The antispermatogenic effect and toxicity of 2, 4-dinitro-6-tert-butylphenyl methanesulfonate on Sprague-Dawley rat.

Additional data on the mutagenic effect of dinitro-o-cresol-containing herbicides.

Plasma pentachlorophenol concentrations in calves exposed to treated wood in the environment.

Pathogenesis of paraquat-induced pulmonary hemorrhage in hamsters with special reference to arterial constriction.

The acute effects of single and repeated injections of acrolein and other aldehydes.

Normothermic whole body rinse-out utilizing perfluorochemical(PFC)-containing artificial blood.

Acute diquat intoxication. Interest of its repeated determination in urine and the evaluation of renal proximal tubule integrity.

Tailor-made agarose-based reactive beads for hemoperfusion and plasma perfusion.

The effects of hypolipidemic peroxisome proliferators on the induction of sister chromatid exchanges.

Uptake, distribution and elimination of monosodium methanearsonate following long term oral administration of the herbicide to sheep and goats.

[Cytogenetic activity of the herbicide sodium trichloroacetate].

[Changes in the lung tissue of newborn rats after paraquat as a model of respiratory distress].

Penetration of some compounds through blood-brain and blood-testis barriers in chronically hypertensive rats.

Quantitative liver functions after administration of allyl alcohol to rats.

[Effect of herbazin 50 on the course of suppurative surgical infection in sheep].

Extracorporeal removal of specific antibodies by hemoperfusion through the immunosorbent agarose-polyacrolein microsphere beads: removal of anti-bovine serum albumin in animals.

Hyperoxia and paraquat alter the kinetics of platelet serotonin uptake.

Determination of 2-ethylhexyl 2,4-dichlorophenoxyacetate in rat blood and urine by electron-capture gas chromatography and gas chromatography-mass spectrometry.

A reinvestigation of the usefulness of breath analysis in the determination of blood acetaldehyde concentrations.

Organ and cellular distribution of inhaled metallic mercury in the rat and Marmoset monkey (*Callithrix jacchus*): influence of ethyl alcohol pretreatment.

The metabolic activation of cyanamide to an inhibitor of aldehyde dehydrogenase is catalyzed by catalase.

Decrease in calcium carbimide (calcium cyanamide)-induced inhibition of rat hepatic aldehyde dehydrogenases by multiple ethanol administration.

Delayed ethanol elimination from rat blood after treatment with thiram, tetramethylthiuram monosulfide, ziram, or cyanamide.

A quantitative study of peroxidase activity in unfixed tissue sections of the guinea-pig thyroid gland.

Determination of the herbicides paraquat and diquat in blood and urine by gas chromatography.

Activated cyclophosphamide: an enzyme-mechanism-based suicide inactivator of DNA polymerase/3'-5' exonuclease.

Effects of paraquat on peroxide metabolism enzymes and lipid peroxidation in the rat.

Perfused canine brain: metabolism and blood-brain transport during altered metabolic states.

Specific removal of digoxin by hemoperfusion through agarose polyacrolein microsphere polyacrolein microsphere beads-antidigoxin antibodies (APAMB-AD).

[Changes in erythrocyte form as affected by the pesticide sodium pentachlorophenolate (scanning electron microscopy)].

Epitopes immunologically related to glycophorin A on human malignant and non-malignant cells in culture.

A novel human myelomonocytoid cell line, P39/Tsugane, derived from overt leukemia following myelodysplastic syndrome.

[Absorption of iron from milk enriched with ferrous sulfate for the prevention of anemia in pregnancy].

Cross-resistance to rhodamine 123 in Adriamycin- and daunorubicin-resistant Friend leukemia cell variants.

Production of target-specific effector cells using hetero-cross-linked aggregates containing anti-target cell and anti-Fc gamma receptor antibodies.

Effects of zeolite a or clinoptilolite in diets of growing swine.

Role of acidosis in early contractile dysfunction during ischemia: evidence from pH_o measurements.

Toxic agent and radiation control: meeting the 1990 objectives for the nation.

[Mutagenic action of 5 prospective pesticides on mouse bone marrow, in a culture of human peripheral blood lymphocytes and on saccharomycete yeasts].

The cromolyn binding protein constitutes the Ca²⁺ channel of basophils opening upon immunological stimulus.

Cobalt--from bacteria to borax bead test.

Anaemia in old age.

Enhancing effects of monocytes on modulation of a lymphocyte membrane antigen.

Immunosuppression in weanling and adult Sprague-Dawley rats induced by acute exposure to 3,3',4,4'-tetrachloroazoxybenzene.

The effectiveness of chemical carcinogens to induce atherosclerosis in the white Carneau pigeon.

A monoclonal antibody to hemoglobin F.

[Mechanism of the cytotoxic action of the natural zeolite clinoptilolite].

Indian anaemia: salt as iron vehicle.

The pharmacological profile of the thromboxane A₂ antagonist BM 13.177. A new anti-platelet and anti-thrombotic drug.

Haemochromatosis following prolonged oral iron ingestion.

Acute lung injury in rat caused by immunoglobulin A immune complexes.

Effect of iron-deficiency anemia on percent blood volume in growing rats.

[Comparative evaluation of the effectiveness of iron preparations in iron deficiency anemia].

Contribution of education to cost-effective care of microcytic, hypochromic anemia.

Connective tissue antigens stimulate collagenase production in arthritic diseases.

Evidence for a role of hydroxyl radical in immune-complex-induced vasculitis.

Acute Heinz-body anemia due to severe cresol poisoning: successful treatment with erythrocytapheresis.

General principles of the evaluation and therapy of anemias.

In vivo and in vitro effects of sodium azide on mouse complement.

Glucose-6-phosphate-dehydrogenase-deficient erythrocytes have an impaired shape recovery mechanism.

Modification of sialic acid carboxyl group of ganglioside.

Proline transport and metabolism in *Rickettsia prowazekii*.

Coprophagy in iron-deficient rats: II. 2 novel methods of prevention.

Human monocyte-mediated tumor cytotoxicity. I. Demonstration of an oxygen-dependent myeloperoxidase-independent mechanism.

Erythrocyte membrane alterations as the basis of chlorate toxicity.

Benoxaprofen photosensitization of cell membrane disruption.

Oxygen-independent killing of *Bacteroides fragilis* by granule extracts from human polymorphonuclear leukocytes.

Identification of an anti-monocyte monoclonal antibody that is specific for membrane complement receptor type one (CR1).

Poly-L-arginine and an N-formylated chemotactic peptide act synergistically with lectins and calcium ionophore to induce intense chemiluminescence and superoxide production in human blood leukocytes. Modulation by metabolic inhibitors, sugars, and polyelectrolytes.

Neutrophil-mediated cellular cytotoxicity induced by zymosan-activated serum.

Blood-free selective medium for isolation of *Campylobacter jejuni* from feces.

Methylbromide: carcinogenic effects in the rat forestomach.

Interactions of thrombospondin with extracellular matrix proteins: selective binding to type V collagen.

Purification to homogeneity and partial characterization of interleukin 2 from a human T-cell leukemia.

Decarboxylation of uroporphyrinogen I and III in 2,3,7,8-tetrachlorodibenzo-p-dioxin induced porphyria in mice.

Development of chronic hepatic porphyria (porphyria cutanea tarda) with inherited uroporphyrinogen decarboxylase deficiency under exposure to dioxin.

The assessment of iron stores in children on regular dialysis treatment.

Effects of metabolic deprivation on methotrexate transport in L1210 leukemia cells: further evidence for separate influx and efflux systems with different energetic requirements.

Calcium is a competitive inhibitor of gentamicin-renal membrane binding interactions and dietary calcium supplementation protects against gentamicin nephrotoxicity.

Antithrombin III Toyama: replacement of arginine-47 by cysteine in hereditary abnormal antithrombin III that lacks heparin-binding ability.

On the absorption of divalent and trivalent iron in living rats.

Iron pharmacokinetics after administration of ferric-hydroxide-polymaltose complex in rats.

Toxicologic, pathologic, and immunotoxic effects of 2,4-dichlorophenol in rats.

Separation of the tryptic peptides and cyanogen bromide fragments of the human embryonic zeta chains of hemoglobin in Portland I and II by reverse phase high performance liquid chromatography.

Improved red cell survival in patients with chronic subclinical haemolysis due to artificial heart valve. Observations after in vitro treatment of the cells with potassium cyanate.

An acquired inhibitor of factor XIII with a qualitative abnormality of fibrin cross-linking.

Application of an enzyme-linked immunosorbent assay for detection of *Brucella* antigens in vaginal discharge of cows.

Polychlorinated biphenyls (PCBs) and polybrominated biphenyls (PBBs): biochemistry, toxicology, and mechanism of action.

Inhibition of erythrocyte plasma membrane NADH dehydrogenase by nucleotides and uncouplers.

Erythrocyte band 3 protein: evidence for multiple membrane-crossing segments in the 17 000-dalton chymotryptic fragment.

Effect of propranolol in dinitrophenol poisoning.

Cross-linking of histone H5 in hen erythrocyte nuclei.

Specific fibrinogen quantitation by electroimmunodiffusion in agarose gel containing heparin.

The covalent protein structure of insecticyanin, a blue biliprotein from the hemolymph of the tobacco hornworm, *Manduca sexta* L.

Influence of cyanogen-bromide-digested fibrinogen on the kinetics of plasminogen activation by urokinase.

Lead flux through the kidney and salivary glands of rats.

Intracellular calcium storage and release in the human platelet. Chlorotetracycline as a continuous monitor.

Specificity of human IgM M-proteins that bind to myelin-associated glycoprotein: peptide mapping, deglycosylation, and competitive binding studies.

Antigens encoded by the 3'-terminal region of human T-cell leukemia virus: evidence for a functional gene.

Blood glutathione as a measure of exposure to toxic compounds.

Comparison of mass spectrometric methods for trace level screening of hexachlorobenzene and trichlorophenol in human blood serum and urine.

Peripheral and central actions of sodium azide on circulatory and respiratory homeostasis in anesthetized cats.

Fine-structure analyses of lipid-protein and protein-protein interactions of gag protein p19 of the avian sarcoma and leukemia viruses by cyanogen bromide mapping.

Development of markers for cholinergic neurones in re-aggregate cultures of foetal rat whole brain in serum-containing and serum-free media: effects of triiodothyronine (T3).

Uptake and metabolism of thyroid hormones by the rat foetus in early pregnancy.

Use of bacteria and yeasts to identify T lymphocytes in peripheral blood and lymphoid tissues of healthy guinea pigs and guinea pigs fed aflatoxin.

Effect of metabolic inhibitors on the ability of human T lymphocytes to form active T rosettes.

Membrane protein carboxyl methylation does not appear to be involved in the response of erythrocytes to cytoskeletal stress.

Altered blood levels of corticosteroids in the rat after exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Amino acid sequence of NADH-cytochrome b5 reductase of human erythrocytes.

Endogenous peroxidase in the nuclear envelope and endoplasmic reticulum of human monocytes in vitro: association with arachidonic acid metabolism.

Plasminogens Tochigi II and Nagoya: two additional molecular defects with Ala-600----Thr replacement found in plasmin light chain variants.

A new procedure to analyze free fatty acids. Application to 20-mg brain tissue samples.

Evaluation of the genotoxicity of cresols using sister-chromatid exchange (SCE).

Effects of increasing metabolism by 2,4-dinitrophenol on respiration and pulmonary gas exchange in the duck.

Pregnancy-associated plasma protein A: purification under mild conditions, peptide mapping and tests for possible interactions with trypsin, plasmin and complement.

Conformation of the carboxy-terminal region of the A alpha chain of fibrinogen as elucidated by immunochemical analyses.

Primary structure, biochemical and physiological aspects of hemoglobin from South American lungfish (*Lepidosiren paradoxus*, Dipnoi).

Steady-state discharge and bursting of arterial chemoreceptors in the duck.

Receptor and non receptor-mediated activation of blood platelets. Effect on membrane-cytoskeleton interaction.

The use of sodium 2-mercaptoethane sulfonate to prevent cyclophosphamide cystitis.

Blood coagulation and acute iron toxicity. Reversible iron-induced inactivation of serine proteases in vitro.

Gastrointestinal absorption and metabolism of capsaicin and dihydrocapsaicin in rats.

The location of a second in vivo phosphorylation site in the A alpha-chain of human fibrinogen.

Exocytosis and macrophage-mediated antibody-dependent cellular cytotoxicity: a cautionary note.

Binding and lysis of antibody-coated human erythrocytes by activated human monocytes.

Sensitivity of cAMP-stimulated salt secretion in shark rectal gland to "loop" diuretics.

Preparation and characterization of NH₂-terminal fibrinogen B beta fragments from N-DSK of human fibrinogen.

Kinetics of the activation of plasminogen by natural and recombinant tissue-type plasminogen activator.

The ability of campylobacter media supplements to neutralize photochemically induced toxicity and hydrogen peroxide.

Different susceptibility of mouse tissues to porphyrogenic effect of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Investigation on a selective non-prostanoid thromboxane antagonist, BM 13.177, in human platelets.

Localization of a chemotactic domain in human thrombin.

erythro-beta-Hydroxyaspartic acid in bovine factor IX and factor X.

Mitochondrial oxidative phosphorylation: tissue oxygen sensor for regulation of coronary flow.

Effect of oral iron supplementation during pregnancy on maternal and fetal iron status.

Hemoglobin binds to the amino-terminal 23-residue fragment of human erythrocyte band 3 protein.

[Structural changes in erythrocyte ghosts after irradiation and the initiation of lipid oxidation detectable using 2,6-TNS and fluorescamine].

Influence of anoxia and dinitrophenol on Ca²⁺ efflux and phosphorylase a activity in rabbit colon smooth muscle.

Chlorinated compounds and phenols in tissue, fat, and blood from rats fed industrial waste site soil extract: methods and analysis.

Prolonged red cell survival following in vitro treatment with potassium cyanate. A study in patients undergoing open-heart surgery.

Sensitivity to suppression of cytotoxic T cell generation by 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) is dependent on the Ah genotype of the murine host.

Observations on the effects of cyclophosphamide, phosphoramidate mustard and some activated oxazaphosphorines on murine L1210 leukemia.

Panning separation for monoclonal antibody-specific T-cell subsets: effects of enzymes and metabolic inhibitors.

Genetically abnormal fibrinogens--strategies for structure elucidation, including fibrinopeptide analysis.

Studies on the toxin of *Aspergillus fumigatus*. XVIII. Photooxidation of asp-hemolysin in the presence of various dyes and its relation to the site of hemolytic activity.

Role of kidney and liver in degradation of circulating submaxillary renin in mice.

Polyamine oxidase-mediated intraerythrocytic killing of *Plasmodium falciparum*: evidence against the role of reactive oxygen metabolites.

Structure and function of normal fibrinogen.

The stimulatory effect of platelet homogenate on prolyl hydroxylase activity in L-929 cells.

Pharmacologic modulation in vitro of human histamine-induced suppressor cell activity.

The effect of nitrofen [4-(2,4-dichlorophenoxy)nitrobenzene] on the reproductive performance of male rats.

Fatality due to paraquat intoxication: confirmation by postmortem tissue analysis.

Effects of purified pentachlorophenol on the serum proteins of young pigs.

Subacute toxicity of paraquat in rats--biochemical effects.

The effects on rat pups when nitrofen (4-(2,4-dichlorophenoxy)nitrobenzene) was applied dermally to the dam during organogenesis.

Medical and morbidity surveillance findings among employees potentially exposed to TCDD.

Subacute toxicity of Basalin in rats.

Potential of ethanol toxicity by cyanamide in relation to acetaldehyde accumulation.

Haemoperfusion for paraquat poisoning.

Haemoperfusion ineffective for paraquat removal in life-threatening poisoning.

Hemoperfusion in a child who ingested diquat and died from pontine infarction and hemorrhage.

[Prognostic factors in acute paraquat poisoning. A retrospective study of cases registered by the Poison Control Center of Paris in 1981].

In vivo evaluation of a composite sorbent for the treatment of paraquat intoxication by hemoperfusion.

[Clinical findings and treatment of paraquat poisoning in childhood].

Evaluation of amitrole (aminotriazole) for potential carcinogenicity in orally dosed rats, mice, and golden hamsters.

Haemoperfusion ineffective for paraquat removal in life-threatening poisoning.

The effects of acetaldehyde and acrolein on blood pressure in guanethidine-pretreated hypertensive rats.

Novel composite sorbent beads for paraquat removal by hemoperfusion.

[Acute paraquat poisoning: prognostic and therapeutic significance of blood assay].

[Deliberate poisoning with paraquat, death in less than 24 hours].

Paraquat-induced enhancement of vascular permeability.

Physiological changes in carps induced by pollution.

Effects of paraquat on plasma glucose, cortisol, catecholamines, and insulin in the beagle.

New considerations on the time-dependence of toxic changes caused by paraquat poisoning.

Aplastic anemia and red cell aplasia due to pentachlorophenol.

Cytotoxicity of cinnamic aldehyde on leukemia L1210 cells.

Sister chromatid exchanges among workers occupationally exposed to phenoxy acid herbicides 2,4-D and MCPA.

Correlation between brain tissue and cerebrospinal fluid concentrations of selected compounds in rats with intact and injured blood-brain barrier.

Cardiovascular effects of acetaldehyde accumulation after ethanol ingestion: their modification by beta-adrenergic blockade and alcohol dehydrogenase inhibition.

Exposure of pesticide applicators to nitrofen: influence of formulation, handling systems, and protective garments.

A placebo-controlled double-blind comparative clinical study of the disulfiram- and calcium carbimide-acetaldehyde mediated ethanol reactions in social drinkers.

Effect of increasing carbon chain length on organic acid transport by the choroid plexus: a potential factor in Reye's syndrome.

Effects of chlorinated phenols on immunity in rats.

Iron overload of spleen, liver and kidney as a consequence of hemolytic anaemia.

[Modification of 2,4-dichlorophenoxyacetate-induced myotonia of cold blood muscles by variations in external Ca^{++} and K^+ concentrations].

Plasma glutathione and glutathione disulfide in the rat: regulation and response to oxidative stress.

Agarose-polyaldehyde microsphere beads: synthesis and biomedical applications. Cell labeling, cell separation, affinity chromatography, and hemoperfusion.

Acute toxicity of fluorinated ether anesthetics: role of 2,2,2-trifluoroethanol and other metabolites.

[Effect of chlorine-containing pesticides on the hemolytic stability and acetylcholinesterase activity of erythrocytes].

Procedure for the determination of residues of (2,4-dichlorophenoxy)acetic acid in dermal exposure pads, hand rinses, urine, and perspiration from agricultural workers exposed to the herbicide.

Effects of intravenous acetaldehyde, acrolein, formaldehyde and propionaldehyde on arterial blood pressure following acute guanethidine treatment.

Whole body and liver distribution of inhaled mercury vapor in the mouse: influence of ethanol and aminotriazole pretreatment.

[Molecular mechanisms of interaction between blood serum albumin and dinitroorthocresol].

Metabolism of [^{14}C]paraldehyde in mice in vivo, generation and trapping of acetaldehyde.

The effect of ethanol on the absorption, accumulation and biotransformation of xenobiotics by the isolated perfused rabbit lung.

Paraquat concentration and renal function in mice fed purified and cereal-based diets.

Metabolic activation of cyanamide to an inhibitor of aldehyde dehydrogenase in vitro.

Blood acetaldehyde levels in alcohol-dosed rats after treatment with ANIT, ANTU, dithiocarbamate derivatives, or cyanamide.

Investigations into the production of acetate from ethanol by human blood and bone marrow cells in vitro.

Glutathione peroxidase blockage inhibits prostaglandin biosynthesis in rat platelets and aorta.

Studies on the effect of paraquat on glycogen mobilization in liver of common carp (*Cyprinus carpio* L.).

Iron-storage deficiency and iron supplementation in pregnancy.

The relative effectiveness of iron and iron with riboflavin in correcting a microcytic anaemia in men and children in rural Gambia.

Biochemical modulation of angiogenesis in the chorioallantoic membrane of the chick embryo.

[A case from practice (20)].

Turnover of excess hemoglobin alpha chains in beta-thalassemic cells is ATP-dependent.

Lymphocyte transformation to connective tissue antigens in adult and juvenile rheumatoid arthritis, osteoarthritis, ankylosing spondylitis, systemic lupus erythematosus, and a nonarthritic control population.

Bioavailability of different sources of ferrous sulfate iron fed to anemic rats.

Energy-dependent reduced drug binding as a mechanism of Vinca alkaloid resistance in human leukemic lymphoblasts.

The acute toxicity of perfluorooctanoic and perfluorodecanoic acids in male rats and effects on tissue fatty acids.

Localization of lipid-protein and protein-protein interactions within the murine retrovirus gag precursor by a novel peptide-mapping technique.

Role of endorphins in endotoxin-induced hyperglycaemia in mice.

[Relaxation of DNA-protein interactions in mouse lymphoblastic leukemic cells exposed to antineoplastic agents].

Purification and comparison of outer membrane protein P2 from *Haemophilus influenzae* type b isolates.

[Clinical and bacteriological evaluation of the preparation Dexafen for sterilizing root canals in the treatment of simple and complicated pulp gangrene].

Biochemical and biosynthetic studies of a crystallizable human gamma 1 heavy-chain disease protein.

Membrane dynamics in human leukemia and lymphoma cells. pH dependency of diphenylhexatriene fluorescence polarization.

Modification of morphine antinociceptive response by blood glucose status: possible involvement of cellular energetics.

Lipid peroxidation and haemoglobin degradation in red blood cells exposed to t-butyl hydroperoxide. The relative roles of haem- and glutathione-dependent decomposition of t-butyl hydroperoxide and membrane lipid hydroperoxides in lipid peroxidation and haemolysis.

Hypothyroxinemia and hypothermia in rats in response to 2,3,7,8-tetrachlorodibenzo-p-dioxin administration.

Specific gene mutations in L5178Y cells in culture.

[Paroxysmal hemoglobinuria induced by cold].

Mushroom poisoning caused by species of the genus *Cortinarius* Fries.

Differential proteolysis and evidence for a residue exchange in tissue plasminogen activator suggest possible association between two types of protein microheterogeneity.

Molecular basis of hypoxanthine-guanine phosphoribosyltransferase deficiency in a patient with the Lesch-Nyhan syndrome.

Iron deficiency and sickle cell anemia.

Receptor-mediated endocytosis of transferrin in K562 cells.

Quantitation of type I to type III collagen ratios in small samples of human tendon, blood vessels, and atherosclerotic plaque.

Investigation of the haemolytic activity of *Proteus mirabilis* strains.

Comparative evaluation of fifteen anti-sickling agents.

Suppression of unprimed T and B cells in antibody responses by irradiation-resistant and plastic-adherent suppressor cells in *Toxoplasma gondii*-infected mice.

The effect of acute inflammation on iron metabolism in rats.

Bioavailability to anemic rats of iron from fresh, cooked or nitrosylated hemoglobin and myoglobin.

[Role of iron in infant nutrition. 2nd part].

[The significance of serum ferritin determination for the evaluation of preventive iron treatment of anemia in premature infants].

Procaine hydrolysis defect in uraemia does not appear to be due to carbamylation of plasma esterases.

Ethoxyformylation and guanidination of snake venom phospholipases A₂: effects on enzymatic activity, lethality and some pharmacological properties.

Dimethyl disulphide in the blood of cattle fed on brassicas.

A comparative cytogenetic study on cases of induced abortions in TCDD-exposed and nonexposed women.

Adaptation of the ektacytometer to automated continuous pO₂ changes: determination of erythrocyte deformability in sickling disorders.

Bioavailability of egg yolk iron measured by hemoglobin regeneration in anemic rats.

Decline of blood and alveolar toluene concentration following two accidental human poisonings.

Localization of intrarenal cross-linked fibrin in children with various renal diseases.

Impairment of blastogenic response of splenic lymphocytes from iron-deficient mice: in vivo repletion.

Purification and properties of human erythrocyte uroporphyrinogen decarboxylase: immunological demonstration of the enzyme defect in porphyria cutanea tarda.

Bioavailability of iron from wheat bran in pigs.

[Pharmacological and clinico-pharmacological studies of a combination preparation for calves having antianemia and general tonic action].

Structure of human erythrocyte spectrin. II. The sequence of the alpha-I domain.

Structure of human erythrocyte spectrin. I. Isolation of the alpha-I domain and its cyanogen bromide peptides.

The T8 antigen is a multimeric complex of two distinct subunits on human thymocytes but consists of homomultimeric forms on peripheral blood T lymphocytes.

Mechanical effects of right atrial pressure on heart rate in the conscious rabbit.

Identification and characterization of a plasma membrane phosphoprotein which is present in Chinese hamster lung cells resistant to adriamycin.

A monoclonal antibody with ability to distinguish between NH₂-terminal fragments derived from fibrinogen and fibrin.

Periportal localization of lorazepam glucuronidation in the isolated perfused rat liver.

Transport and processing of staphylococcal alpha-toxin.

Effects of propylthiouracil on urinary metabolites of cyclophosphamide in rats.

Hydrogen peroxide and hydroxyl radical mediation of activated leukocyte depression of cardiac sarcoplasmic reticulum. Participation of the cyclooxygenase pathway.

Identification of a site in fibrin(ogen) which is involved in the acceleration of plasminogen activation by tissue-type plasminogen activator.

Inhalation of products of combustion.

Susceptibility of 40 *Haemophilus ducreyi* strains to 34 antimicrobial products.

Elimination of artifactual acetaldehyde in the measurement of human blood acetaldehyde by the use of polyethylene glycol and sodium azide: normal blood acetaldehyde levels in the dog and human after ethanol.

Differences in effects of fibrin(ogen) fragments on the activation of 1-glu-plasminogen and 442-val-plasminogen by tissue-type plasminogen activator.

Blood-bound carbon disulfide: an indicator of carbon disulfide exposure, and its accumulation in repeatedly exposed rats.

Heterogeneity in the collagens extracted from human embryonic calvaria.

ESR investigations on the modification of the ascorbic acid-erythrocyte interaction by ferrous ions.

Artifacts in the definition of toxicity by cyanides and cyanogens.

Platelet aggregation induced in the hamster cheek pouch by a photochemical process with excited fluorescein isothiocyanate-dextran.

Monoclonal antibodies to alpha-chain regions of human fibrinogen that participate in polymer formation.

Monoclonal antibody to the region of fibronectin involved in cross-linking to human fibrin.

Isolation from trout liver of a methionine-containing H1 subfraction, THImet.

Chronobiologic fluctuation of cyclophosphamide induced urinary bladder damage in mice.

The metabolism of arsenite and arsenate by the rat.

Death and injury caused by methyl bromide, an insecticide fumigant.

Significance of energy metabolism pathways for stimulation of DNA synthesis by cell migration and serum.

Improved method to measure erythrocyte filtration times increased extremely by chlorate.

Evidence for the localization of a calcium-binding site in the amino-terminal disulphide knot of fibrin (ogen).

Absorption of aerosolized drugs from the rat lung.

Iron Deficiency in Adolescent Cross-Country Runners.

Ram rete testis fluid contains a protein (clusterin) which influences cell-cell interactions in vitro.

Structure of glycosylated and unglycosylated gag and gag-pol precursor proteins of Moloney murine leukemia virus.

Mechanism by which metabolic inhibitors depolarize cultured cardiac cells.

The chimpanzee M blood-group antigen is a variant of the human M-N glycoproteins.

[Effect of inhibitors of energy metabolism and protein synthesis on the process of neutral red segregation in frog erythrocytes].

2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) effects on hepatic microsomal steroid metabolism and serum estradiol of pregnant rats.

Regulation of coronary blood flow: effects of 2,4-dinitrophenol and theophylline.

Plasminogen activation by tissue activator is accelerated in the presence of fibrin(ogen) cyanogen bromide fragment FCB-2.

Localization of the disulfide bond in human antithrombin III required for heparin-accelerated thrombin inactivation.

Development of a blood-free *Campylobacter* medium: screening tests on basal media and supplements, and the ability of selected supplements to facilitate aerotolerance.

Hexose transport in microvascular endothelial cells cultured from bovine retina.

Inhibition of testosterone biosynthesis by ethanol. Relation to hepatic and testicular acetaldehyde, ketone bodies and cytosolic redox state in rats.

Recognition site for the platelet receptor is present on the 15-residue carboxy-terminal fragment of the gamma chain of human fibrinogen and is not involved in the fibrin polymerization reaction.

Distribution and metabolism of the teratogen nitrofen (2,4-dichloro-4'-nitro diphenyl ether) in pregnant rats.

Isophosphoramidate mustard, a metabolite of ifosfamide with activity against murine tumours comparable to cyclophosphamide.

Development of the granule population in neutrophil granulocytes from human bone marrow.

Multiple molecular forms of acid-stable plasmin inhibitor derived from human urinary trypsin inhibitor.

A new metabolically trapped agent by brain monoamine oxidase: N-methyl labeled (¹⁴C) N-methylphenylethylamine (¹⁴C-MPEA).

A chemical and enzymological comparison of the common major human erythrocyte carbonic anhydrase II, its minor component, and a new genetic variant, CA II Melbourne (237 Pro leads to His).

[Cu and Fe content and ceruloplasmin and catalase activities in the blood of growing rats receiving different amounts of Fe and Cu].

Effect of lidocaine on hepatic prostanoid production in vitro following 2,4-dinitrophenol administration.

Haemoglobin oxidation and free radical production in the red cell.

The complete amino acid sequence of human erythrocyte diphosphoglycerate mutase.

Enzymatic toxicogenation of "activated" cyclophosphamide by 3'-5' exonucleases.

[Electron microscopic study of the depolymerization process on unstabilized fibrin as affected by urea or monochloroacetic acid].

[Migration and adhesiveness of human and rabbit blood leukocytes under the influence of metabolic blocking agents and hirudin].

Uptake and dissimilation of glycerol by wild type and glycerol nonutilizing strains of *Neurospora crassa*.

Production of H₂O₂ by bovine blood and milk polymorphonuclear leucocytes.

Characterization of pulmonary cellular influx differentials to known toxic agents between species.

[Paraquat poisoning. Prognostic and therapeutic evaluation in 28 cases].

The pathophysiology of paraquat nephrotoxicity in the sheep.

Measurement of 2,4-dichlorophenoxyacetic acid (2,4-D) after occupational exposure.

[Experimental chronic paraquat poisoning. Functional and histopathological pulmonary changes].

Successful treatment of paraquat poisoning: activated charcoal per os and "continuous hemoperfusion".

[Enzyme activity of the blood and tissues of individual organs in long-term exposure to diquat].

Accumulation of radionuclide-labeled platelets and fibrinogen in paraquat-damaged rat lungs.

Methaemoglobinaemia due to monolinuron-not paraquat.

Paraquat ingestion with methaemoglobinaemia treated with methylene blue.

[Measurement of V/Q distribution by inert gas elimination method].

[Severe diquat poisoning].

Blood-brain barrier damage by 2-methyl-4-chlorophenoxyacetic acid herbicide in rats.

Paraquat poisoning--a review of four cases.

Congenital defects and miscarriages among New Zealand 2, 4, 5-T sprayers.

Analysis of neutral steroid sulfates by glass capillary gas chromatography-mass spectrometry (GC-MS) from blood of a patient with paraquat poisoning.

Accumulation of radionuclide-labeled platelets and fibrinogen in paraquat-damaged rat lungs.

Pathophysiological effects of paraquat intoxication in domestic ruminants: low dose studies.

Immunotoxicity of technical pentachlorophenol (PCP-T): depressed humoral immune responses to T-dependent and T-independent antigen stimulation in PCP-T exposed mice.

Efficacy of charcoal hemoperfusion in paraquat poisoning.

Increase in the penetration of tracer compounds into the rat brain during 2-methyl-4-chlorophenoxyacetic acid (MCPA) intoxication.

Potential mutagenic evaluation of the bentazone.

Neurotoxicological investigation of the new Hungarian pesticide Toxurazine.

Polyacrolein microspheres as a new tool in cell biology.

Dose-effect relationship between ethyl alcohol pretreatment and retention and tissue distribution of mercury vapor in rats.

Interaction of cyclophosphamide metabolites with membrane proteins: an in vitro study with rabbit liver microsomes and human red blood cells. Effect of thiols.

Acrolein: a potent modulator of lung macrophage arachidonic acid metabolism.

Calcium-dependent increase in the potassium permeability of human red blood cells by pentachlorophenol and 2,4,6-trinitrophenol.

Pharmacokinetics of [14C]-paraquat and associated biochemical and pathologic changes in Beagle dogs following intravenous administration.

Increase in hepatic mixed disulphide and glutathione disulphide levels elicited by paraquat.

Possible cardiovascular hazards of the alcohol-calcium carbimide interaction.

A new immunoabsorbent for hemoperfusion: agarose-polyacrolein microspheres beads. I. In vitro studies.

Antimutators of mitochondrial and nuclear DNA in *Saccharomyces cerevisiae*. Relationship with gamma-ray sensitivity.

Effect of albumin, low temperature and metabolic inhibitors on transport of fatty acids into cultured human leukemic myeloid cells.

[Middle cerebral artery occlusion with Moyamoya phenomenon.--2nd report: report of an autopsy case].

Mutagenicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin and perfluoro-n-decanoic acid in L5178Y mouse-lymphoma cells.

Spontaneous oxygen radical generation by sickle erythrocytes.

Bacteria and zymosan opsonized with histone, dextran sulfate, and polyanetholesulfonate trigger intense chemiluminescence in human blood leukocytes and platelets and in mouse macrophages: modulation by metabolic inhibitors in relation to leukocyte-bacteria interactions in inflammatory sites.

[A new test for hemolysis related to tocopherol deficiency: hemolysis caused by sodium azide (NaN₃). Results in cholestasis in children].

Pathogenesis of hyperlipidemia induced in rabbits by methyl iodide.

A stable propidium iodide staining procedure for flow cytometry.

Toxic effect of human polymorphonuclear leukocytes on *Chlamydia trachomatis*.

Synthesis of some potential antihypertensive phthalaziny- and quinoxalinyguanidines.

[Prevention of iron-deficiency anemia in infants in Family Health Centers].

Effect of iron-fortified bread roll on hematological indices and clinical symptoms in menstruating women.

Comparison of the structure and aspects of the proteinase-binding properties of cystic fibrotic alpha-macroglobulin with normal alpha 2-macroglobulin.

Effect of cholinergic drugs on acute and chronic morphine dependence.

Leukemia and farm practices in Iowa.

Anemias in the elderly: physiologic or pathologic?

Uptake, efflux, and hydrolysis of aclacinomycin A in Friend leukemia cells.

Severe peripheral neuropathy after exposure to monosodium methyl arsonate.

[Physicochemical and immunochemical properties of heavy chains of immunoglobulin G typical of malignant growth].

[Evaluation of iron therapy in patients in long-term haemodialysis (author's transl)].

Anemia of pregnancy in Liberia, West Africa: a therapeutic trial.

A new combined assay of phagocytosis and intracellular killing of *Escherichia coli* by polymorphonuclear leukocytes.

[Determination of bromine contents in the blood and hair of workers exposed to methyl bromide by radioactivation analysis method].

Collagen polymorphism in the normal and diseased blood vessel wall. Investigation of collagens types I, III and V.

Studies on the control of iron uptake by rabbit small intestine.

Comparative uptake of adriamycin and daunorubicin in sensitive and resistant friend leukemia cells measured by flow cytometry.

Reversible pure red cell hypoplasia in pregnancy.

The influence of antigen density and a comparison of IgG and IgM antibodies in the anti-complementary modulation of lymphocytic surface immunoglobulin.

Synthesis of pseudo cofactor analogues as potential inhibitors of the folate enzymes.

Effect of cell shape on extravascular hemolysis.

Treatment and prophylaxis of anaemia of pregnancy with 'Fefol Spansule'.

Monoclonal antibody to transferrin receptor blocks transferrin binding and inhibits human tumor cell growth in vitro.

Nutritional iron and dopamine binding sites in the rat brain.

[Values of various blood components in guinea pigs after acute 2,3,7,8-tetrachlorodibenzo-P-dioxin (TCDD) poisoning].

Serum ferritin in haemodialysis.

Cancer risks associated with agriculture: epidemiologic evidence.

A comparison of two combined iron-folic acid preparations in the prevention of anaemia in pregnancy.

Quantitation of red cell deformability during progressive deoxygenation and oxygenation in sickling disorders (the use of an automated Ektacytometer).

Effects of carbamylation of plasma proteins and competitive displacers on drug binding in uremia.

The binding of antibodies from *Plasmodium berghei*-infected rats to isoantigenic and parasite-specific antigenic sites on the surfaces of infected reticulocytes.

Clinical and laboratory findings in Metation EK-50.

Experimental and clinical results in shock lung treatment with vitamin E.

A simple, sensitive spectrophotometric assay for extrinsic (tissue-type) plasminogen activator applicable to measurements in plasma.

Purification, properties, partial sequence and evolutionary relationships of marsupial erythrocyte carbonic anhydrase.

[Ability to redistribute surface receptors in transplantable cell lines].

Subchronic toxicity of chlorine dioxide and related compounds in drinking water in the nonhuman primate.

Abnormal responses of glucose, insulin and glucagon in blood to I.V. glucose load in methyl iodide-treated rabbits.

Purification of a Gal beta 1 to 4GlcNAc alpha 2 to 6 sialyltransferase and a Gal beta 1 to 3(4)GlcNAc alpha 2 to 3 sialyltransferase to homogeneity from rat liver.

Purification, characterization and regulation of five rat hepatic microsomal cytochrome P-450 isozymes.

Volatile alkanes produced by erythrocytes: an assay for in vitro studies on lipid peroxidation.

Generation and release of DNA-binding vesicles by *Haemophilus influenzae* during induction and loss of competence.

Synthesis and effect of asymmetric 1,4-bis(aminoacyl) piperazines on neuromuscular transmission.

Renal transport of 2'-deoxytubercidin in mice.

Direct measurement of histone peptide elongation rate in cleaving sea urchin embryos.

False-positive stool occult blood tests caused by iron preparations. A controlled study and review of literature.

Comparative evaluation of contraction and relaxation of isolated heart muscle with decreased calcium concentration in the perfusate, acidosis, and metabolic blockade.

Effects of dopamine-beta-hydroxylase inhibitors FLA-57 and FLA-63 on ethanol metabolism and aldehyde dehydrogenase activity in rats.

Effects of ATP and cell development on the metabolism of high molecular weight aggregates of abnormal proteins in rabbit reticulocytes and cell-free extracts.

2-14C-1-Allyl-3,5-diethyl-6-chlorouracil I: Synthesis, absorption in human skin, excretion, distribution, and metabolism in rats and rabbits.

Synaptosomal calcium uptake systems: prostaglandins are probably not involved in the regulation of calcium fluxes into and within the nerve endings.

[Peculiarities of specific binding of serotonin by blood leukocytes, peritoneal cells and synaptosomes of mice].

Localization of a site interacting with human platelet receptor on carboxy-terminal segment of human fibrinogen gamma chain.

The protein composition of the fibrinoid material at the human uteroplacental interface.

Biosynthesis of dog fibrinogen. Characterization of nascent fibrinogen in the rough endoplasmic reticulum.

Multiple forms of phenolsulphotransferase in human tissues: selective inhibition by dichloronitrophenol.

Active calcium transport and calcium-dependent membrane phosphorylation in human peripheral blood lymphocytes.

Only the chemotactic subpopulation of human blood monocytes expresses receptors for the chemotactic peptide N-formylmethionyl-leucyl-phenylalanine.

The complete amino-acid sequence of histone H2B from erythrocytes of the adult domestic fowl *Gallus domesticus*.

An oligomycin-resistant Mg²⁺-dependent ATPase in rabbit bone marrow mitochondria.

Formation of a polymethylene bis(disulfide) intersubunit cross-link between cysteine-281 residues in rabbit muscle glyceraldehyde-3-phosphate dehydrogenase using octamethylene bis(methane[³⁵S]thiosulfonate).

Suppression of natural killing in vitro by monocytes and polymorphonuclear leukocytes: requirement for reactive metabolites of oxygen.

Inhibition of E-rosette formation and phagocytosis by human blood leukocytes after treatment with the dengue virus-induced cytotoxic factor.

Flow cytometry of mouse bone marrow cells cultured in vivo or in vitro.

Complete amino acid sequence of the group-specific antigen gene-encoded phosphorylated proteins of mouse leukemia viruses.

Isolation and amino acid sequence of a monomeric hemoglobin in heart muscle of the bullfrog, *Rana catesbeiana*.

Studies on the Production of Digitalis Cardenolides by Plant Tissue Culture: II. EFFECT OF LIGHT AND PLANT GROWTH SUBSTANCES ON DIGITOXIN FORMATION BY UNDIFFERENTIATED CELLS AND SHOOT-FORMING CULTURES OF DIGITALIS PURPUREA L. GROWN IN LIQUID MEDIA.

Role of the reticulum in the stability and shape of the isolated human erythrocyte membrane.

Relation between intestinal blood flow and oxygen uptake.

Active transport of nicotine by the isolated choroid plexus in vitro.

Assessment of myelotoxicity caused by environmental chemicals.

Effect of p-p'-DDE administered in vivo and in vitro on Ca²⁺ binding and Ca²⁺-Mg²⁺-ATPase activity in egg shell gland mucose of ducks.

Mitochondrial bioenergetics during the initiation of mercuric chloride-induced renal injury. II. Functional alterations of renal cortical mitochondria isolated after mercuric chloride treatment.

Mitochondrial bioenergetics during the initiation of mercuric chloride-induced renal injury. I. Direct effects of in vitro mercuric chloride on renal mitochondrial function.

Role of the bilayer in the shape of the isolated erythrocyte membrane.

Biomonitoring of occupational toluene exposure.

Embryotoxicity of 3,3',4,4'-tetrachloroazobenzene and 3,3',4,4'-tetrachloroazoxybenzene in the chick embryo.

Primary structure of horse erythrocyte glycoporphin HA. Its amino acid sequence has a unique homology with those of human and porcine erythrocyte glycoporphins.

[The use of AET-pretreated sheep red blood cells in the detection of lymphocytes with limited affinity for E receptors].

Aplastic anemia due to pentachlorophenol.

[The influence of several membrane stabilizing drugs on the induced hereditary myotonia--a methodic way to test the effectiveness of drugs on myotonia (author's transl)].

[Experimental models of lung diseases pulmonary fibrosis (idiopathic interstitial pneumonia) (author's transl)].

Male fertility, sister chromatid exchange, and germ cell toxicity following exposure to mixtures of chlorinated phenoxy acids containing 2,3,7,8-tetrachlorodibenzo-p-dioxin.

Subchronic administration of technical pentachlorophenol to lactating dairy cattle: immunotoxicologic evaluation.

Diquat intoxication: report of two cases and review of the literature.

Investigations into the mechanism of paraquat toxicity utilizing a cell culture system.

Effect of 2,4,5-trichlorophenoxyacetate on renal function.

Cardiovascular changes during the calcium carbimide-ethanol interaction.

[Chemical structure and toxicodynamic properties of phenoxy-carboxylic acid derivatives. III. The course of absorption into the blood and the measurement of the urinary excretion of phenoxyacetic and phenoxypropionic acid derivatives].

Repeated exposure to alpha-ethylacrolein vapour: subacute toxicity study in rats.

[Embryotropic action of the triazine herbicide polyzin 50].

[Investigations on neurotoxicity of chemical substances at the workplace. II. Determination of the motor and sensory nerve conduction velocity in persons occupationally exposed to pentachlorophenol (author's transl)].

[Field study of workers with longterm exposure to calcium cyanamide (author's transl)].

The heart and diaphragm: target organs in the neonatal death induced by nitrofen (2,4-dichlorophenyl-p-nitrophenyl ether).

Effects of phenolic compounds on in vivo blood parameters of a fish *Notopterus notopterus*.

Serum protein and glycoprotein changes in chronic paraquat intoxication.

The disulfiram and calcium carbimide acetaldehyde-mediated ethanol reactions.

[Experimental studies for the hygienic standardization of Lasso in water].

A rapid method for the emergency analysis of paraquat in plasma using a second derivative spectroscopy.

Hemoperfusion in toxicology. Basic considerations of its effectiveness.

Characterization of the inhibitory effects of the phytotoxic agent propachlor (alpha-chloro-N-isopropyl-acetanilide), on L1210 cell proliferation.

Effect of inhibitors of plant cell division on mammalian tumor cells in vitro.

Atmospheric pressure ionization mass spectrometry: the routine determination of 2,4,5-trichlorophenoxyacetic acid and its metabolites.

Oxidant injury of lung parenchymal cells.

Paraquat and NADPH-dependent lipid peroxidation in lung microsomes.

Modification by simetryn sulphoxide of a specific thiol group in rat haemoglobin.

The calcium carbimide-ethanol interaction: lack of relation between electroencephalographic response and cerebrospinal fluid acetaldehyde.

Pharmacokinetics of 2,4,5-T PGBE ester applied dermally to rats.

Effect of hydroxychlorodiphenyl ethers (chlorinated pre-and isopredioxins) on erythrocyte membrane adenosinetriphosphatase activity.

Tissue retention of arsenic in rats fed with founder or cacodylic acid.

Methanol poisoning and formate oxidation in nitrous oxide-treated rats.

Ethanol metabolism in guinea pig: in vivo ethanol elimination, alcohol dehydrogenase distribution, and subcellular localization of acetaldehyde dehydrogenase in liver.

[Pentachlorophenol concentrations in tissues and body fluids of normal persons (author's transl)].

Acute toxicity testing of some herbicides-, alkaloids-, and antibiotics-metabolizing soil bacteria in the rat.

Acetaldehyde concentration in rat blood and brain during the calcium carbimide--ethanol interaction.

Platelet interactions with *Candida albicans*.

Therapeutic drug assays with gas-liquid chromatography and optical detection.

Cardiovascular teratogenicity of 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin in the chick embryo.

Severe chlorate poisoning: report of a case.

Quantitation of differences between spontaneous and induced liver tumors in mice with an automated image analyzer.

Biological evaluation of hemoperfusion in acute poisoning.

Effects of iron and ascorbic acid supplementation on hemoglobin level and work efficiency of anemic women.

Influence of inducers of monooxygenases on cytotoxic efficiency of ellipticine on leukemia L1210 cells.

Nonspecific suppression of primary antibody responses and presence of plastic-adherent suppressor cells in *Toxoplasma gondii*-infected mice.

The killing of newborn larvae of *Trichinella spiralis* by eosinophil peroxidase in vitro.

Disulphide exchange reactions in the control of enzymic activity. Evidence for the participation of dimethyl disulphide in exchanges.

Folate analogues altered in the C9-N10 bridge region. 18. Synthesis and antitumor evaluation of 11-oxahomoaminopterin and related compounds.

Whole blood luminol-dependent chemiluminescence.

[Phenoxyacetic acid, chlorphenols and cancer].

Mechanism of natural resistance to vincristine in rat ascites hepatoma AH66.

Identification of abnormally [³²P]-phosphorylated cyanogen bromide cleavage product of erythrocyte membrane spectrin in Duchenne muscular dystrophy.

Detection of experimentally produced acute pulmonary arterial occlusion by methyl iodide-131 inhalation imaging.

[Human embryonic haemoglobins. The primary structure of the zeta chains (author's transl)].

Acute and subchronic toxicity studies of rats exposed to vapors of methyl mercaptan and other reduced-sulfur compounds.

Basal processes on duodenal epithelial cells of man, mouse and rat.

Anemia of pregnancy: evaluation of the effectiveness of routine dietary supplementation program in an Israeli community.

Inhibition of Ca^{2+} of oxidative phosphorylation in myeloid tumor mitochondria.

Iron deficiency: diagnosis and treatment.

Experimental siderosis of articular chondrocytes cultured in vitro.

Production and characterization of a monoclonal antibody against the seed lectin of the *Dolichos biflorus* plant.

Iron deficiency in one-year-old infants: comparison of results of a therapeutic trial in infants with anemia or low-normal hemoglobin values.

Iron availability and absorption in rats fed sodium phytate.

Adenylate cyclase and guanylate cyclase activity in normal and leukemic human lymphocytes.

Effect of staphylococcal iron content on the killing of *Staphylococcus aureus* by polymorphonuclear leukocytes.

Enhancement of antitumor activity of glutamine antagonists 6-diazo-5-oxo-L-norleucine and acivicin in cell culture by glutaminase-asparaginase.

Comparison of the metabolic and antihypertensive properties of tienilic acid and hydrochlorothiazide.

Inhibitors of oxidative ATP production cause transient vasoconstriction and block subsequent pressor responses in rat lungs.

[The presence of an albino ERG in the pigmented rat: genetic implications (author's transl)].

Production of Heinz body anaemia in the domestic fowl after ingestion of dimethyl disulphide: a haematological and ultrastructural study.

[Mutagenic activity of the anthelmintic preparation trichlorophene].

A gas chromatographic-mass spectrometric analysis for phenols in uremic serum.

Lymphocytotoxins in infectious mononucleosis: a non-cytotoxic effect on lymphocytes at 37 degrees C and the influence of cell metabolism on their cytotoxicity in vitro.

Evidence for a plasma membrane redox system on intact ascites tumor cells with different metastatic capacity.

Vitamin B12-dependent methyltetrahydrofolate: homocysteine methyltransferase activity in normal and leukemic human hematopoietic cells.

Iron supplementation studies. Experimental design and interpretation of results.

Baseline and sodium arsenite-induced sister chromatid exchanges in cultured lymphocytes from patients with Blackfoot disease and healthy persons.

[Activated chemoluminescence of the plasma in purulent infections].

Effect of pH on fluorescence polarization of DMSO induced Friend leukemic cells.

Ferrous sulfate liquid for the treatment of iron deficiency anemia.

Biotransformation and porphyrinogenic action of hexachlorobenzene and its metabolites in a primary liver cell culture.

Novel studies on a "silent" high affinity mutant hemoglobin (San Diego, beta 109 Val replaced by Met).

Antigenic modulation of lymphocytic surface immunoglobulin yielding resistance to complement-mediated lysis. II. Relationship to redistribution of the antigen.

[Iron reserves in the pregnant woman and the newborn infant: effects of an iron supplement].

Monocyte-mediated serum-independent damage to hyphal and pseudohyphal forms of *Candida albicans* in vitro.

[Method for increasing the intensity of free radical oxidation of lipid-containing components of the blood and its diagnostic significance].

Control of the erythrocyte membrane shape: recovery from the effect of crenating agents.

Aggregation of polymorphonuclear leucocytes (PMNs) by leukotriene B₄: effects of cyclooxygenase products and metabolic inhibitors.

Amino acid sequence of copper-zinc superoxide dismutase from horse liver.

The aldolase-binding site of the human erythrocyte membrane is at the NH₂ terminus of band 3.

Estimation of genetic risks of alkylating agents. VI. Exposure of mice and bacteria to methyl bromide.

¹¹C-Iodoantipyrine for the measurement of regional cerebral blood flow by positron emission tomography. Validation studies.

Hydrogen peroxide metabolism in human monocytes during differentiation in vitro.

Carboxy-terminal amino acid sequence of a human fibrinogen gamma-chain variant (gamma¹).

Arachidonic acid-induced chemiluminescence of human platelets: contribution of the prostaglandin and lipoxygenase pathways.

Influence of human beta-thromboglobulin on prostaglandin production by pig aortic endothelial cells in culture.

Receptor-mediated gonadotropin action in the ovary. Demonstration of acute dependence of rat luteal cells on exogenously supplied steroid precursor (sterols) for gonadotropin-induced steroidogenesis.

Somatic embryogenesis and plant regeneration from leaf tissues and anthers of *Pennisetum purpureum* Schum.

Alpha-fetoprotein on human peripheral blood lymphocytes does not block complement-dependent lymphocytotoxicity.

Complete primary structure of human C4a anaphylatoxin.

Immunochemical mapping of the conformation of human fibrinogen. The gamma 95-264 segment is inaccessible to antibody in native fibrinogen but progressively exposed by plasminic cleavage.

In vivo phytochrome difference spectrum from dark grown gametophytes of *Anemia phyllitidis* L. Sw. Treated with norflurazon.

Locus of N-ethylmaleimide action on sugar transport in nucleated erythrocytes.

Concanavalin A-induced receptor redistribution on *Biomphalaria glabrata* hemocytes: characterization of capping and patching responses.

Detection and characterization of monoclonal antibodies to platelet membrane proteins.

Development of an immunoassay for the COOH-terminal region of the gamma chains of human fibrin.

Alpha-chain domain of fibrinogen controls generation of fibrinolytic activity (coagulation factor XIIIa). Calcium ion regulatory aspects.

Chemical and carbon-13 nuclear magnetic resonance studies of the blood group M and N active sialoglycopeptides from human glycoprotein A.

Effects of brief and intermediate exposures to sulfate submicron aerosols and sulfate injections and cardiopulmonary function of dogs and tracheal mucous velocity of sheep.

Enzyme histochemistry and immunohistochemistry on biopsy specimens of pathologic human bone marrow.

[Hemoglobins XL: Sequence analysis of the monomeric hemoglobin CTT IV (erythrocrucorin) of *Chironomus thummi thummi*, Diptera (author's transl)].

Determination of 2,3,7,8-tetrachlorodibenzo-p-dioxin in goat milk and tissues by glass capillary gas chromatography and medium resolution mass fragmentography.

Affinity chromatography of *Streptomyces erythreus* trypsin-like enzyme on Japanese quail ovomucoid.

[Hemoglobins, XXXIX. Amino acid sequence of a dimeric hemoglobin (erythrocrucorin) from *Chironomus thummi thummi*: component CTT VIII].

Interaction of haemocin with *Escherichia coli*.

The primary structure of crotalase, a thrombin-like venom enzyme, exhibits closer homology to kallikrein than to other serine proteases.

Hemoglobins, XXXVIII. Amino acid sequence of a dimeric hemoglobin (erythrocrucorin), component VI from *Chironomus thummi thummi* (CTT VI).

Uptake of anticoagulants by isolated rat hepatocytes.

Platelet adherence to collagen: role of plasma, ADP, and divalent cations.

Membrane deformability of metabolically depleted human red cells.

An immunization method using antigen entrapped in erythrocyte ghosts.

Biotransformation and intracellular binding of arsenic in tissues of rabbits after intraperitoneal administration of ⁷⁴As labelled arsenite.

[Hemoglobins, XXXVII. The primary structure of a monomeric insect hemoglobin (Erythrocrucorin), component CTT IIIa of *Chironomus thummi thummi*. An anomalous Heme complex: E7 Gln, E11 Ile].

[Hemoglobins, XXXVI: The primary structure of a dimeric insect hemoglobin (Erythrocrucorin), component IX from *Chironomus thummi thummi*. Studies on the quaternary structure of the dimeric CTT-hemoglobins (author's transl)].

Protease-insensitive sea urchin embryo cell adhesions become protease sensitive in the presence of azide or cytochalasin B.

[The adhesion of blood platelets to collagen: molecular features of collagen (author's transl)].

Shadow-cast electron microscopy of fibrinogen with antibody fragments bound to specific regions.

Loss of haem and haemoproteins during the generation of superoxide anion and hydrogen peroxide: a pathway not involving production of carbon monoxide.

An economical hemoperfusion system to determine in vitro clearances of various poisons with different adsorbents.

Mutagenic and embryotoxic effects of paraquat and diquat.

[Ultrastructural studies and neutrophil myeloperoxidase determination in rats with acute 2,4-dichlorophenoxyacetic acid poisoning].

[The treatment of 10 cases of paraquat poisoning using charcoal haemoperfusion (author's transl)].

Mechanism of methyl viologen induced hemolysis.

Liver necrosis and lipid peroxidation in the rat as the result of paraquat and diquat administration. Effect of selenium deficiency.

[Paraquat poisoning; clinical toxicological aspects and a case description].

The chronic toxicity of technical and analytical pentachlorophenol in cattle. I. Clinicopathology.

Cerebral damage in paraquat poisoning.

The changing pattern of paraquat poisoning in man.

Action of intensive cigarette smoke inhalations on the rat lung. Role of particulate and gaseous cofactors.

PCP dioxins found to pose health risks.

[Comparative study of the intermittent and continuous action of the herbicide, Ramrod].

[Assessment of the chronic toxic action of the herbicide, balagrin, in continuous and intermittent exposure regimens].

A comparison of the effects of paraquat and diquat on lung compliance, lung volumes and single breath diffusing capacity in the rat.

Acute leukaemia after exposure to a weed killer, 2-methyl-4-chlorophenoxyacetic acid.

Human health effects of selected pesticides, chloroaniline derivatives.

Intraindividual variability in the calcium carbimide-ethanol interaction.

Calcium carbimide--ethanol interaction.

Exposure of pesticide applicators to arsenic acid.

Does acrolein contribute to the cytotoxicity of cyclophosphamide?

[The effect of the herbicide Dinoseb-acetate (Aretit) on transaminase (GOT, GPT) activity in the blood serum and muscles of the Japanese quail (*Coturnix coturnix japonica*)].

Ethanol oxidation by rat brain in vivo.

Intracellular population genetics: evidence for random drift of mitochondrial allele frequencies in *Saccharomyces cerevisiae* and *Schizosaccharomyces pombe*.

Determination of pentachlorophenol in milk and blood of dairy cattle.

Hydrogen peroxide production by rat brain in vivo.

Breath and blood acetaldehyde concentrations and their correlation during normal and calcium carbimide-modified ethanol oxidation in man.

The metabolic fate of a herbicidal methylmercapto-s-triazine (cyanatryn) in the rat.

[Myotonic effects of 2,4-Dichlorophenoxyacetate (2,4-D) on the isolated frog skeletal muscle (author's transl)].

Interaction of calcium and lead in human erythrocytes.

[Determination of free pentachlorophenol in air and in blood by efficient chromatographic procedures (author's transl)].

Mechanism of the linkage between the electrophoretic mobility and oxygen uptake of ascites tumor cells.

[Iron substitution in blood donors. Two different iron preparations from the galenic viewpoint].

Histopathologic differences between liver tumors in untreated (C57BL/6 X C3H)F1 (B6C3F1) mice and Nitrofen-fed mice.

The influence of hypoxia and metabolic inhibitors on the excitation process in atrioventricular node.

Histone 2B can be modified by the attachment of ubiquitin.

Hemodialysis clearance of arsenic.

Effects of combined glutamine and serum deprivation on glucose control of hexose transport in mammalian fibroblast cultures.

Toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the golden Syrian hamster.

The effects of acute and subacute sodium arsenite administration on carbohydrate metabolism.

Effects of level and source of dietary fat on the bioavailability of iron from turkey meat for the anemic rat.

Folate analogues altered in the C9-N10 bridge region. 16. Synthesis and antifolate activity of 11-thiohomoaminopterin.

Kale poisoning: the brassica anaemia factor.

Effect of iron therapy on serum ferritin levels in iron-deficiency anemia.

Role of oxygen-dependent mechanisms in antibody-induced lysis of tumor cells by activated macrophages.

The effect of total parenteral nutrition on the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin in the rat.

The relationship between hematocrit levels in gravidae and their newborn.

Antibodies specific for histone H2b fragments 1-58 and 63-125 in antisera to H2b and to the fragments: probes for histone evolution.

Effect of form of iron on the interaction between nickel and iron in rats: growth and blood parameters.

Plasma protein carbamylation and decreased acidic drug protein binding in uremia.

Antileukemic activity of 2-bis(2-methylthio)vinyl-1-methylquinolinium iodides.

The treatment of severe hookworm anaemia by a sustained slow-release ferrous sulphate preparation, Plexafer.

Inhibition of the alternative pathway of human complement in vitro by a natural microbial product, complestatin.

Primary structure of chicken liver dihydrofolate reductase.

The effect of methylmercury, tetraethyl lead, and sodium arsenite on the humoral immune response in mice.

Conferon treatment in risk pregnancy due to iron deficiency anaemia.

Blood clearance tests for detecting 2,3,7,8-tetrachlorodibenzo-p-dioxin hepatotoxicity in rats and rabbits.

General health effects of prolonged exposure to 3,3',4,4'-tetrachloroazobenzene and 3,3',4,4'-tetrachloroazoxybenzene in rats.

Sodium azide inhibition of complement-mediated functions.

Biological evaluation of hemoperfusion in acute poisoning.

Examination of bone marrow, immunologic parameters and host susceptibility following pre- and postnatal exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

Interactions between essential trace and ultratrace elements.

A study of gamma-aminobutyric acid uptake in normal and Down's syndrome platelets.

Structural characterization of the phosphorylation sites of human erythrocyte spectrin.

Amino acid sequence and attachment sites of oligosaccharide units of porcine erythrocyte glycophorin.

In vitro binding of ¹⁴C-labeled acidic compounds to serum albumin and their tissue distribution in the rat.

Cytotoxicity and DNA cross-linking activity of 4-sulfidocyclophosphamides in mouse leukemia cells in vitro.

The renal cortical lymphatic system in dogs with unimpeded lymph and urine flow.

Metabolic and cytoskeletal modulation of transferrin receptor mobility in mitogen-activated human lymphocytes.

Thermal injury of *Yersinia enterocolitica*.

A minor sialoglycoprotein of the human erythrocyte membrane.

Control of hepatic arterial blood flow: independence from liver metabolic activity.

Synthesis and secretion of hemolysin by *Escherichia coli*.

Reversible and irreversible loss of Fc receptor function of human monocytes as a consequence of interaction with immunoglobulin G.

Organ culture of adult rat colonic mucosa on fibrin foam.

Noncatalytic subunits of human blood plasma coagulation factor XIII. Preparation and partial characterization of modified forms.

Localization of a cross-link donor site in the alpha-chain of human fibrin.

The primary structure of the monomeric hemoglobin (erythrocrucorin) component CTT IV of *Chironomus thummi thummi* (Insecta, Diptera).

Gas-chromatographic method for the halothane metabolites, trifluoroacetic acid and bromide, in biological fluids.

Immunosuppression in mice induced by dioxin (TCDD) in feed.

Inhibition of lymphocyte growth by spermidine in medium containing fetal bovine serum.

Phosphorus nuclear magnetic resonance of bovine platelets.

Bioassay of Phenol for Possible Carcinogenicity (CAS No.108-95-2).

Fibrin oligomers of high molecular weight soluble in MCA solutions: implications on the time course of fibrin formation.

The control of pigment migration in isolated erythrocytes of *Holocentrus ascensionis* (Osbeck). I. Energy requirements.

The generation of sulfation factor activity by proteolytic modification of growth hormone.

Differences and similarities among three acidic endopeptidases associated with human erythrocyte membranes. Molecular and functional studies.

Effect of acute exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin on humoral antibody production in mice.

In vitro and in vivo evaluation of the movement of Kepone in the rat submaxillary gland.

Steady-state kinetic study of the bovine thrombin-fibrinogen interaction.

Characteristics of 5-hydroxytryptamine transport in pancreatic islets.

Structural homology between a mammalian H1(0) subfraction and avian erythrocyte-specific histone H5.

Determination of polyhalogenated phenotic compounds in drinking water, human blood serum and adipose tissue.

2,3,7,8-Tetrachlorodibenzo-p-dioxin toxic effects and tissue levels in animals from the contaminated area of Seveso, Italy.

Structure of the Ss blood group antigens. I. Isolation of Ss-active glycopeptides and differentiation of the antigens by modification of methionine.

[Purification of the bacterial ribosome using chloramphenicol and erythromycin columns].

The effect of acute administration of 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) on humoral antibody production and cell-mediated activities in mice.

The development of mesna for the inhibition of urotoxic side effects of cyclophosphamide, ifosfamide, and other oxazaphosphorine cytostatics.

Distribution of 2-methyl-4-chlorophenoxyacetic acid and 2,4-dichlorophenoxyacetic acid in male rats: evidence for the involvement of the central nervous system in their toxicity.

The mutagenic effect of trifluralin-containing herbicide on mouse bone marrow in vivo.

The effects of aminotriazole (ATZ) on the thyroid gland and the development of the White Leghorn chick.

Biochemical and morphological correlation of oxidant-induced pulmonary injury: low dose exposure to paraquat, oxygen, and ozone.

[Effect of the amine salt of 2,4-D on chickens].

Acute toxicity of oral diquat (1,1'-ethylene-2,2'-bipyridinium) in cynomolgus monkeys.

[Biological value of Mironovskaya-808 winter wheat grown using the herbicide simazine].

A clinical survey of paraquat formulation workers.

[Hemodialysis and hemoperfusion in the treatment of paraquat or diquat poisoning].

Acute toxicity and effects of sublethal dietary exposure of monosodium methanearsonate herbicide to *Peromyscus leucopus* (Rodentia: Cricetidae).

Control of in vitro cytotoxicity of positively charged liposomes.

Insecticide/herbicide exposure, aplastic anaemia, and pseudotumor cerebri.

Expression of the major red cell sialoglycoprotein, glycophorin A, in the human leukemic cell line K562.

Cellular pharmacology of 7(R)-O-methylnogarol: a new anticancer agent.

Protection by monospecific gonococcal antisera of the chicken embryo challenged with *Neisseria gonorrhoeae*.

Acute arsine poisoning in two workers cleaning a clogged drain.

Acute pulmonary injury in rats by nitrofurantoin and modification by vitamin E, dietary fat, and oxygen.

Unique characteristics of superoxide production by human eosinophils in eosinophilic states.

Active efflux of daunorubicin and adriamycin in sensitive and resistant sublines of P388 leukemia.

Developmental toxicology of the halogenated aromatics: effects on enzyme development.

Purification and characterization of a major component from the cytoplasmic matrix of cultured murine L cells.

Toxicological studies of ammonium sulfamate in rat after repeated oral administration.

Biomolecules bearing the S- or SeAsMe₂ function: amino acid and steroid derivatives.

Enhancement of human neutrophil bactericidal activity by chemotactic factors.

Large agarose beads for extracorporeal detoxification systems. Preparation and enzymatic properties of agarose-bound UDP-glucuronyltransferase.

Capping of surface immunoglobulin on 'hairy cells' is independent of energy production.

The protective action of inosine on isolated arteries in hypoxia.

Fe(III)-EDTA complex as iron fortification. Further studies.

Functional studies of hairy cell leukemia (leukemic reticuloendotheliosis).

Specific IgE antibodies to platinum salts in sensitized workers.

Normal iron absorption and decreased red cell iron uptake in the aged.

Bromine in blood, EEG and transaminases in methyl bromide workers.

Selective and differential medium for isolation of *Clostridium difficile*.

The amino acid sequence of dihydrofolate reductase from the mouse lymphoma L1210.

Conferon treatment in anaemia of pregnancy.

Therapy of iron deficiency anemia in patients on maintenance dialysis.

Increased pressor responses to physostigmine in spontaneously hypertensive rats.

Synthesis of daunorubicin analogues with novel 9-acyl substituents.

Amino acid sequence of human fibrin. Preliminary note on the completion of the intermediate part of the alpha-chain sequence.

Amino acid sequence studies on the alpha chain of human fibrinogen. Overlapping sequences providing the complete sequence.

Amino acid sequence studies on the alpha chain of human fibrinogen. Exact location of cross-linking acceptor sites.

Amino acid sequence studies on the alpha chain of human fibrinogen. Complete sequence of the largest cyanogen bromide fragment.

[The primary structure of a dimeric hemoglobin (erythrocrucorin); component CTT VI of *Chironomus thummi thummi*, Diptera (author's transl)].

Analysis of the adhesion step in the herpes simplex virus antibody-dependent cellular cytotoxicity system.

Inhibitory effect of certain drugs on thyroid hormone binding by human liver cytosol.

The sites of the lactoperoxidase-catalyzed iodination of human fibrinogen.

Cross-linking of fibronectin to collagen by blood coagulation Factor XIIIa.

Explosive hazard of blood diluents containing sodium azide.

Multiplicity of induction patterns of rat liver microsomal mono-oxygenases and other polypeptides produced by administration of various xenobiotics.

[Lipid complexes and thioldisulfide groups in the blood during chronic inhalation dosing of dimethyldisulfide].

Clinical laboratory estimations of serum and urinary phosphate.

Primary structure of human fibrinogen and fibrin. Structural studies on NH₂-terminal part of B beta chain.

Preparation of cyanogen bromide fragments of MM, NN, and MN glycoproteins (glycophorins) from human erythrocyte membranes of single donors.

Reactive sulfhydryl groups of the band 3 polypeptide from human erythrocyte membranes. Location in the primary structure.

Immunological approaches to the structure of fibrinogen.

Metabolic activation and deactivation of mutagens and carcinogens.

Hormonal alterations in female rhesus monkeys fed a diet containing 2, 3,7,8-tetrachlorodibenzo-p-dioxin.

Myeloperoxidase-mediated platelet release reaction.

Amino acid sequence of the beta chain of human fibrinogen.

Bioassay of calcium cyanamide for possible carcinogenicity.

Bioassay of 2,7-dichlorodibenzo-p-dioxin (DCDD) for possible carcinogenicity.

Inhibition of blood coagulation factor XIIIa-mediated cross-linking between fibronectin and collagen by polyamines.

The effect of perinatal exposure to tetrachlorodibenzo-p-dioxin on the immune response of young mice.

Effects of 2,3,7,8-tetrachlorodibenzofuran (TCDF) on the immune system in guinea pigs.

Interaction of an active glycopeptide from chick skin collagen (alpha 1-CB5) with human platelets.

Immunoabsorbent chromatography of hypoxanthine-guanine phosphoribosyltransferase.

Evidence for a common synthetic origin for secretory and serum IgA.

The subunit structure of human muscle and human erythrocyte pyruvate kinase isozymes.

Bovine erythrocyte superoxide dismutase. Isolation and characterization of tryptic, cyanogen bromide, and maleylated tryptic peptides.

Bovine erythrocyte superoxide dismutase. Subunit structure and sequence location of the intrasubunit disulfide bond.

Acid-soluble breakdown of homologous deoxyribonucleic acid adsorbed by *Haemophilus influenzae*: its biological significance.

The amino acid sequence of plastocyanin from *Cucurbita pepo* L. (vegetable marrow).

[Metabolic shifts in workers manufacturing elementary bromine and its compounds (bromine salts and methyl bromide)].

Studies on blood group substances. V. Blood group substance A coupled to agarose as an immunosorbent.

Mechanism of action of thrombin on fibrinogen. Reaction of the N-terminal CNBr fragment from the Aalpha chain of human fibrinogen with bovine thrombin.

Transport of taurine by normal human blood platelets.

[Primary structure of the bovine erythrocyte carbonic anhydrase CI].

The search for the active core of pituitary growth hormone.

Immunologic properties of Aalpha chain of human fibrinogen.

The determination of the primary structure of histones F3 from chicken erythrocytes by automatic Edman degradation. 1. Cleavage and alignment of fragments.

Lung collagen heterogeneity.

Evidence for localization of polymerization sites in fibrinogen.

Perturbation of leukocyte metabolism by nonphagocytosable concanavalin A-coupled beads.

Fibrinogenolysis by insolubilized plasmin.

Coupling of polysaccharides to erythrocytes by cyanogen bromide.

[Primary structure of human B erythrocyte carbonic anhydrase. 3. Sequence of CNBr fragment I and III (residues 149-260)].

Table 2A-5 – Titles of Pubmed Records Related to Immune System Adverse Events Following Herbicide Exposure

ALOPECIA; *ARTHRITIS*; *AUTOIMMUN*; *BREAKTHROUGH*; *BURSITIS*; *CROHN*; *DIPHTHERIA*; *EDEMA*; *FEBRILE*; *FEVER*; *GUILLAIN*; *HEPATITIS*; *HERPES*; *IMMUNE DEFICIENCY*; *IMMUNE EVASION*; *IMMUNE SUPPRESSION*; *IMMUNE THROMBOCYTOPENIA*; *IMMUNE TOLERANCE*; *IMMUNOCOMPROMISED*; *IMMUNODEFICIENCY*; *IMMUNOPATHOLOGY*; *IMMUNOSUPPRESSIVE*; *INFLAMM*; *LEPROSY*; *LICHEN PLANUS*; *LUPUS*; *LYME DISEASE*; *MEASLES*; *MULTIPLE SCLEROSIS*; *MUMPS*; *MYASTHENIA GRAVIS*; *PEMPHIGOID*; *PERTUSSIS*; *PNEUMONIA*; *POLYANGIITIS*; *POLYMYALGIA*; *PSORIA*; *RAYNAUD*; *RHEUMAT*; *RHINITIS*; *SWELLING*; *TETANUS*; *TRANSVERSE MYELITIS*; *TUBERCULOSIS*; *TYPE 1 DIABETES*; *TYPHOID*; *TYPHUS*; *ULCERATIVE COLITIS*; *UVEITIS*; *VASCULITIS*; *VITILIGO*; *WHITE DOT SYNDROME*; *ZOSTER*(5120)

Molecular, biochemical and histological assessment in paraquat induced neurotoxicity: restoring role of nano-curcumin in an experimental study.

A potential mechanism clue to the periodic storm from microglia activation and progressive neuron damage induced by paraquat exposure.

Co-exposure to environmental microplastic and the pesticide 2,4-dichlorophenoxyacetic acid (2,4-D) induce distinctive alterations in the metabolome and microbial community structure in the gut of the earthworm *Eisenia andrei*.

Prometryn exposure disrupts the intestinal health of *Eriocheir sinensis*: Physiological responses and underlying mechanism.

Inhaled paraquat-induced lung injury in rat, improved by the extract of *Zataria multiflora* boiss and PPAR γ agonist, pioglitazone.

Pelargonidin alleviates acrolein-induced inflammation in human umbilical vein endothelial cells by reducing COX-2 expression through the NF- κ B pathway.

Melatonin inhibits atrazine-induced mitochondrial impairment in cerebellum of mice: Modulation of cGAS-STING-NLRP3 axis-dependent cell pyroptosis.

The Peptide DH ϵ -(4-pentenyl)-ANPQIR-NH(2) Exhibits Antifibrotic Activity in Multiple Pulmonary Fibrosis Models Induced by Particulate and Soluble Chemical Fibrogenic Agents.

Amentoflavone mediated hepatoprotection to counteract paraquat instigated hepatotoxicity via modulating Nrf2/keap1 pathway: A biochemical, inflammatory, apoptotic and histopathological study.

Redox imbalance and inflammation: A link to depression risk in Brazilian pesticide-exposed farmers.

Atrazine exposure caused oxidative stress in male rats and inhibited brain-pituitary-testicular functions.

Ferulic acid grafted into β -cyclodextrin nanosponges ameliorates Paraquat-induced human MRC-5 fibroblast injury.

Paraquat and Parkinson's Disease: The Molecular Crosstalk of Upstream Signal Transduction Pathways Leading to Apoptosis.

Protective effects of natural compounds against paraquat-induced pulmonary toxicity: the role of the Nrf2/ARE signaling pathway.

Atrazine exposure promotes cardiomyocyte pyroptosis to exacerbate cardiotoxicity by activating NF- κ B pathway.

Cinnamaldehyde attenuates TNF- α induced skeletal muscle loss in C2C12 myotubes via regulation of protein synthesis, proteolysis, oxidative stress and inflammation.

Elucidating the mechanisms underlying astrocyte-microglia crosstalk in hippocampal neuroinflammation induced by acute diquat exposure.

Curcumin alleviates atrazine-induced cardiotoxicity by inhibiting endoplasmic reticulum stress-mediated apoptosis in mice through ATF6/Chop/Bcl-2 signaling pathway.

Amphibian-derived peptide RL-RF10 ameliorates paraquat-induced pulmonary fibrosis injury.

Mid-to-late stage diquat accumulation in the central nervous system: A severe case of oral poisoning.

Mitochondrial DNA is a key driver in cigarette smoke extract-induced IL-6 expression.

Occult paraquat poisoning causing pneumomediastinum and organizing pneumonia.

Cinnamaldehyde as a Promising Dietary Phytochemical Against Metabolic Syndrome: A Systematic Review.

Pesticides and PPCPs in aquatic ecosystems of the andean central region: Occurrence and ecological risk assessment in the Uco valley.

Exploring azomethine ylides reactivity with acrolein through cycloaddition reaction and computational antiviral activity assessment against hepatitis C virus.

Synthetic polyploidization induces enhanced phytochemical profile and biological activities in *Thymus vulgaris* L. essential oil.

African swine fever virus maintains de novo global cellular protein synthesis and inhibits stress granules formation via dephosphorylating eIF2 $\hat{\pm}$.

Baicalin and lung diseases.

"Comparative evaluation of different chemical agents induced Autism Spectrum Disorder in experimental Wistar rats".

ALDH2 deficiency exacerbates MCD-diet induced MASLD by modulating bile acid metabolism.

Regulation of stress granule formation in human oligodendrocytes.

Self-heating mitochondrion-induced free radical blast for immunogenic cell death stimulation and HCC immunotherapy.

Luteolin Is a Potential Immunomodulating Natural Compound against Pulpal Inflammation.

Switching from zonisamide to perampanel improved the frequency of seizures caused by hyperthermia in Dravet syndrome: a case report.

Prenatal treprostinil improves pulmonary arteriolar hypermuscularization in the rabbit model of congenital diaphragmatic hernia.

Inhibition of the urea cycle by the environmental contaminant 2,3,7,8-tetrachlorodibenzo-p-dioxin increases serum ammonia levels in mice.

Synergistic pervaporation dehydration of ethanol/water mixture: Exploring the potential of a covalently designed hybrid membrane structure of polyacrylic acid grafted carbon nitride and polyvinyl alcohol.

Glufosinate-ammonium causes liver injury in zebrafish by blocking the Nrf2 pathway.

Mitochondria-targeted Uncouplers Decrease Inflammatory Reactions in Endothelial Cells by Enhancing Methylation of the ICAM1 Gene Promoter.

Identification of *Mycobacterium tuberculosis* transcriptional repressor EthR inhibitors: Shape-based search and machine learning studies.

Identification of novel potential drugs for the treatment and prevention of osteoarthritis.

The uses of zebrafish (*Danio rerio*) as an in vivo model for toxicological studies: A review based on bibliometrics.

Zinc lactate alleviates oxidative stress by modulating crosstalk between constitutive androstane receptor signaling pathway and gut microbiota profile in weaned piglets.

Nanocellulose-Based Ecofriendly Nanocomposite for Effective Wastewater Remediation: A Study on Its Process Optimization, Improved Swelling, Adsorption, and Thermal and Mechanical Behavior.

The exposure in ovo to glyphosate on the integrity of intestinal epithelial tight junctions of chicks.

Geniposide from Gardeniae Fructus exerts antipyretic effect in febrile rats through modulating the TLR4/NF- κ B signaling pathway.

MAPK/NF- κ B signaling mediates atrazine-induced cardiorenal syndrome and antagonism of lycopene.

Curative effects of tectochrysin on paraquat-instigated testicular toxicity in rats: A biochemical and histopathological based study.

Toxicogenomics of the C-C chemokine receptor type 5 (CCR5): Exploring the potential impacts of chemical-CCR5 interactions on inflammation and human health.

Pesticide use and inflammatory bowel disease in licensed pesticide applicators and spouses in the Agricultural Health Study.

Assessing and mitigating foodborne acetochlor exposure induced ileum toxicity in broiler chicks: The role of omega-3 polyunsaturated fatty acids supplementation and molecular pathways analysis.

TCDD and CH223191 Alter T Cell Balance but Fail to Induce Anti-Inflammatory Response in Adult Lupus Mice.

Influence of triazines and lipopolysaccharide coexposure on inflammatory response and histopathological changes in the testis and liver of BalB/c mice.

Aldo-keto reductase 1B10 as a Carcinogenic but Not a Prognostic Factor in Colorectal Cancer.

Vitellin/Vitellogenin Is an Important Allergen in German Cockroach.

Correction: Glyphosate infiltrates the brain and increases pro-inflammatory cytokine TNF α : implications for neurodegenerative disorders.

Cardiac Radiofrequency Ablation Exacerbates Myocardial Injury through Pro-Inflammatory Response and Pro-Oxidative Stress in Elderly Patients with Persistent Atrial Fibrillation.

Zingerone attenuates sciatic nerve damage caused by sodium arsenite by inhibiting NF- κ B, caspase-3, and ATF-6/CHOP pathways and activating the Akt2/FOXO1 pathway.

TRPA1 as a promising target in ischemia/reperfusion: A comprehensive review.

Association between combined exposure to dioxins and arthritis among US adults: a cross-sectional study.

Persistent Neutrophil Infiltration and Unique Ocular Surface Microbiome Typify Dupilumab-Associated Conjunctivitis in Patients with Atopic Dermatitis.

Neuroprotective responses of quercetin in regulation of biochemical, structural, and neurobehavioral effects in 28-day oral exposure of iron in rats.

Hydrogen cyanamide exposure: a case series from Pavia Poison Control Centre.

Modifying effects of 2,4-D and Glyphosate exposures on gut-liver-adipose tissue axis of diet-induced non-alcoholic fatty liver disease in mice.

Involvement of glyphosate in disruption of biotransformation P450 enzymes and hepatic lipid metabolism in chicken.

The effects of metallothionein in paraquat-induced Parkinson disease model of zebrafish.

Mutagenicity, hepatotoxicity, and neurotoxicity of glyphosate and fipronil commercial formulations in Amazon turtles neonates (*Podocnemis expansa*).

The effects of *Crocus sativus* extract on inhaled paraquat-induced lung inflammation, oxidative stress, pathological changes and tracheal responsiveness in rats.

Molecular mechanism of paraquat-induced ferroptosis leading to pulmonary fibrosis mediated by Keap1/Nrf2 signaling pathway.

Effects of glyphosate exposure on western diet-induced non-alcoholic fatty liver disease in mice.

Toxic effects of benfluralin on zebrafish embryogenesis via the accumulation of reactive oxygen species and apoptosis.

Zinc Oxide Nanoparticles and Vitamin C Ameliorate Atrazine-Induced Hepatic Apoptosis in Rat via CYP450s/ROS Pathway and Immunomodulation.

Voluntary wheel-running improved pulmonary fibrosis by reducing epithelial mesenchymal transformation.

Dual-Hit: Glyphosate exposure at NOAEL level negatively impacts birth and glia-behavioural measures in heterozygous shank3 mutants.

2,4-dichlorophenoxyacetic acid (2,4-D) exposure during postnatal development alters the effects of western diet on mouse prostate.

Toxicological effects of ocular acrolein exposure to eyelids in rabbits in vivo.

Plantain-based diet decreases oxidative stress and inflammatory markers in the testes of rats exposed to atrazine.

The diabetogenic effects of pesticides: Evidence based on epidemiological and toxicological studies.

Synergistic toxicity of 2,4-dichlorophenoxyacetic acid and arsenic alters biomarkers in rats.

Transient Receptor Potential Ankyrin 1 (TRPA1) Channel Mediates Acrolein Cytotoxicity in Human Lung Cancer Cells.

The role of acrolein for E-cigarette vapour condensate mediated activation of NADPH oxidase in cultured endothelial cells and macrophages.

Immunotoxicity of relevant mixtures of pesticides and metabolites on THP-1 cells.

Chlorogenic acid protective effects on paraquat-induced pulmonary oxidative damage and fibrosis in rats.

Sex-specific respiratory and systemic endocrine effects of acute acrolein and trichloroethylene inhalation.

Low-dose glyphosate exposure alters gut microbiota composition and modulates gut homeostasis.

Evaluation of nano-curcumin against inhaled paraquat-induced lung injury in rats.

Nitric oxide-mediated the therapeutic properties of induced pluripotent stem cell for paraquat-induced acute lung injury.

Melatonin ameliorates acute lung injury caused by paraquat poisoning by promoting PINK1 and BNIP3 expression.

Prepubertal to adulthood exposure to low doses of glyphosate-based herbicide increases the expression of the Havcr1 (Kim1) biomarker and causes mild kidney alterations.

Xylopi *aethiopia* suppresses markers of oxidative stress, inflammation, and cell death in the brain of Wistar rats exposed to glyphosate.

Paraquat-induced systemic inflammation and oxidative stress in rats improved by *Curcuma longa* ethanolic extract, curcumin and a PPAR agonist.

Predicting structural features of selected flavonoids responsible for neuroprotection in a *Drosophila* model of Parkinson's disease.

Prolonged exposure to the herbicide atrazine promotes kidney fibrosis by activating Wnt/ β -catenin signaling in rats.

Adhesion Molecules in Lung Inflammation from Repeated Glyphosate Exposures.

Role of NF- κ B/IL-1 β Pathway and Caspase 3 in Mediating the Hepatoprotective Effect of Rutin against Paraquat-Induced Liver Toxicity in Male Rats.

Impact of sub-acute acrolein inhalation on the molecular regulation of mitochondrial metabolism in rat lung.

Tannin alleviates glyphosate exposure-induced apoptosis, necrosis and immune dysfunction in hepatic L8824 cell line by inhibiting ROS/PTEN/PI3K/AKT pathway.

Exposure to the herbicide fluridone induces cardiovascular toxicity in early developmental stages of zebrafish.

Perinatal exposure to high concentration glyphosate-based herbicides induces intestinal apoptosis by activating endoplasmic reticulum stress in offspring.

The Tobacco Smoke Component, Acrolein, as a Major Culprit in Lung Diseases and Respiratory Cancers: Molecular Mechanisms of Acrolein Cytotoxic Activity.

Cyhalofop-butyl exposure induces the severe hepatotoxicity and immunotoxicity in zebrafish embryos.

Effects of dietary supplementation with chlorogenic acid on growth performance, antioxidant capacity, and hepatic inflammation in broiler chickens subjected to diquat-induced oxidative stress.

Behavioral and neuroinflammatory changes caused by glyphosate: Base herbicide in mice offspring.

Integrin Mac1 mediates paraquat and maneb-induced learning and memory impairments in mice through NADPH oxidase-NLRP3 inflammasome axis-dependent microglial activation.

Single-cell transcriptome analysis reveals liver injury induced by glyphosate in mice.

Dimethyl fumarate attenuates paraquat-induced pulmonary oxidative stress, inflammation and fibrosis in mice.

Glyphosate based-herbicide disrupts energy metabolism and activates inflammatory response through oxidative stress in mice liver.

Mitigating effect of L-carnitine against atrazine-induced hepatotoxicity: histopathological and biochemical analyses in albino rats.

Dietary myricetin assuages atrazine-mediated hypothalamic-pituitary-testicular axis dysfunction in rats.

Effect of zinc supplementation on immunotoxicity induced by subchronic oral exposure to glyphosate-based herbicide (GOBARA®) in Wistar rats.

Ecogenotoxicity of environmentally relevant atrazine concentrations: A threat to aquatic bioindicators.

Glyphosate-based herbicide (GBH) causes damage in embryo-larval stages of zebrafish (*Danio rerio*).

HIF-1 α promotes paraquat induced acute lung injury and implicates a role NF- κ B and Rac2 activity.

Disturbance of cellular calcium homeostasis plays a pivotal role in glyphosate-based herbicide-induced oxidative stress.

Cryptotanshinone protects against oxidative stress in the paraquat-induced Parkinson's disease model.

Synergistic toxicity of ethanol and 2,4-dichlorophenoxyacetic acid enhances oxidant status, DNA damage, inflammation, and apoptosis in rats.

Suppressor of cytokine signaling 3-derived peptide as a therapeutic for inflammatory and oxidative stress-induced damage to the retina.

Exposure to Agent Orange and Hepatocellular Carcinoma Among US Military Personnel.

Glyphosate-induced glioblastoma cell proliferation: Unraveling the interplay of oxidative, inflammatory, proliferative, and survival signaling pathways.

Effects of glyphosate exposure on gut-liver axis: Metabolomic and mechanistic analysis in grass carp (*Ctenopharyngodon idellus*).

Study on the therapeutic effect of glucocorticoids on acute kidney injury in rats exposed to diquat.

Acrolein produced by glioma cells under hypoxia inhibits neutrophil AKT activity and suppresses anti-tumoral activities.

Clinical and pathological characteristics of acute kidney injury caused by diquat poisoning.

Hydralazine Promotes Central Nervous System Recovery after Spinal Cord Injury by Suppressing Oxidative Stress and Inflammation through Macrophage Regulation.

Soluble thrombomodulin alleviates Diquat-induced acute kidney injury by inhibiting the HMGB1/IL-1 β /NF- κ B signalling pathway.

The contribution of initial concussive forces and resulting acrolein surge to β -amyloid accumulation and functional alterations in neuronal networks using a TBI-on-a-chip model.

TRPA1 deficiency aggravates dilated cardiomyopathy by promoting S100A8 expression to induce M1 macrophage polarization in rats.

Trehalose prevents glyphosate-induced hepatic steatosis in roosters by activating the Nrf2 pathway and inhibiting NLRP3 inflammasome activation.

Hydralazine plays an immunomodulation role of pro-regeneration in a mouse model of spinal cord injury.

Inactivation of microglia dampens blood-brain barrier permeability and loss of dopaminergic neurons in paraquat-lesioned mice.

Sensitization of GSH synthesis by curcumin curtails acrolein-induced alveolar epithelial apoptosis via Keap1 cysteine conjugation: A randomized controlled trial and experimental animal model of pneumonitis.

Association of Lifetime Exposure to Glyphosate and Aminomethylphosphonic Acid (AMPA) with Liver Inflammation and Metabolic Syndrome at Young Adulthood: Findings from the CHAMACOS Study.

Inhibition of soluble epoxide hydrolase reduces paraquat neurotoxicity in rodents.

[Effect of pirfenidone on paraquat-induced pulmonary fibrosis in rats].

[Effects of Nintedanib associated with Shenfu Injection on paraquat-induced lung injury in rats].

Quantitation by Liquid Chromatography-Nanoelectrospray Ionization-High-Resolution Tandem Mass Spectrometry of Multiple DNA Adducts Related to Cigarette Smoking in Oral Cells in the Shanghai Cohort Study.

Organotin and organochlorine toxicants activate key translational regulatory proteins in human immune cells.

Clinical and pathological characteristics of diquat poisoning-related acute kidney injury.

Ethylfluralin induces developmental toxicity in zebrafish via oxidative stress and inflammation.

Arsenic exposure and prevalence of human papillomavirus in the US male population.

Sciadopitysin mitigates spermatological and testicular damage instigated by paraquat administration in male albino rats.

Polyamine-Derived Aminoaldehydes and Acrolein: Cytotoxicity, Reactivity and Analysis of the Induced Protein Modifications.

The herbicide glyphosate inhibits hippocampal long-term potentiation and learning through activation of pro-inflammatory signaling.

Teratogenic effects of the dicamba herbicide in Zebrafish (*Danio rerio*) embryos.

Opinion: "High-Dose Immunosuppression to Prevent Death after Paraquat Self-Poisoning"- Under Estimation of a Significant Effect with Small Mortality Rate Reduction.

Ovaries of guppies (*Poecilia reticulata*) investigated in pre-embryonic, embryonic and post-embryonic stages after exposure to maghemite nanoparticles ($\gamma\text{-Fe(2)O(3)}$) associated with Roundup[®] and glyphosate, followed by recovery period evaluation.

Molecular and behavioral toxicity assessment of tiafenacil, a novel PPO-inhibiting herbicide, in zebrafish embryos/larvae.

Developmental toxicity of prometryn induces mitochondrial dysfunction, oxidative stress, and failure of organogenesis in zebrafish (*Danio rerio*).

Pharmacokinetic and Permeation Studies in Rat Brain of Natural Compounds Led to Investigate Eugenol as Direct Activator of Dopamine Release in PC12 Cells.

Chaenomeles sinensis polysaccharide and its carboxymethylated derivative alleviate dextran sulfate sodium-induced ulcerative colitis via suppression of inflammation and oxidative stress.

Untargeted serum metabolomics reveals novel metabolite associations and disruptions in amino acid and lipid metabolism in Parkinson's disease.

Inflammation and cardiometabolic diseases induced by persistent organic pollutants and nutritional interventions: Effects of multi-organ interactions.

Environmental Toxicant Exposure Paralyzes Human Placental Macrophage Responses to Microbial Threat.

Terbutylazine exposure induces innate immune response and inflammation through activating cGAS-STING/NF- κ B pathway in myocardium of broiler chicken (*Gallus gallus*).

Nephroprotective effect of diosmin against sodium arsenite-induced renal toxicity is mediated via attenuation of oxidative stress and inflammation in mice.

Arsenic induces metabolome remodeling in mature human adipocytes.

Apply Anticoagulants after Discharge not Benefit to the Incidence of Symptomatic Thrombus in High-Altitude Areas: A Retrospective Study.

Airway Injury Caused by Aspiration of Iron Sulfate Pills: A Series of 11 Cases.

Oxidative stress contributes to flumioxazin-induced cardiotoxicity in zebrafish embryos.

Metformin alleviates sodium arsenite-induced hepatotoxicity and glucose intolerance in mice by suppressing oxidative stress, inflammation, and apoptosis.

Anti-inflammatory effects of antenatal administration of stem cell derived extracellular vesicles in the brain of rat fetuses with congenital diaphragmatic hernia.

High-Soluble-Fiber Diet Attenuates Hypoxia-Induced Vascular Remodeling and the Development of Hypoxic Pulmonary Hypertension.

Dysregulated meta-organismal metabolism of aromatic amino acids in alcohol-associated liver disease.

Phloretin as an add-on therapy to losartan attenuates diabetes-induced AKI in rats: A potential therapeutic approach targeting TLR4-induced inflammation.

Overactivated Epithelial NF- κ B Disrupts Lung Development in Congenital Diaphragmatic Hernia.

The Use of Multiple Biomarkers to Assess the Health of Anuran Amphibians in the Brazilian Cerrado Savanna: An Ecotoxicological Approach.

Knockdown of IL4I1 Improved High Glucose-evoked Insulin Resistance in HepG2 Cells by Alleviating Inflammation and Lipotoxicity Through AHR Activation.

A *Cryptosporidium parvum* vaccine candidate effect on immunohistochemical profiling of CD4(+), CD8(+), Caspase-3 and NF- κ B in mice.

Effect of Long-Term Low-Dose Arsenic Exposure on DNA Methylation and Gene Expression in Human Liver Cells.

Exposure to bromoxynil octanoate herbicide induces oxidative stress, inflammation, and apoptosis in testicular tissue via modulating NF- κ B pathway.

Gene deletion of long-chain acyl-CoA synthetase 4 attenuates xenobiotic chemical-induced lung injury via the suppression of lipid peroxidation.

Resveratrol and 3,3'-Diindolylmethane Differentially Regulate Aryl Hydrocarbon Receptor and Estrogen Receptor Alpha Activity through Multiple Transcriptomic Targets in MCF-7 Human Breast Cancer Cells.

2,4-Dinitrophenol does not exert neuro-regenerative potential in experimental autoimmune neuritis.

Human Preadipocytes Differentiated under Hypoxia following PCB126 Exposure during Proliferation: Effects on Differentiation, Glucose Uptake and Adipokine Profile.

Epidural Injection of Harpagoside for the Recovery of Rats with Lumbar Spinal Stenosis.

Precision modulation of dysbiotic adult microbiomes with a human-milk-derived synbiotic reshapes gut microbial composition and metabolites.

Antimicrobial effect of oral care gel containing hinokitiol and 4-isopropyl-3-methylphenol against intraoral pathogenic microorganisms.

Alterations in interleukin-1 β and nuclear factor kappa beta activity (NF- κ B) in rat liver due to the co-exposure of Cadmium and Arsenic: Protective role of curcumin.

CKBA suppresses mast cell activation via ERK signaling pathway in murine atopic dermatitis.

Endocrine-disrupting chemicals and autoimmune diseases.

Molinate induces organ defects by promoting apoptosis, inflammation, and endoplasmic reticulum stress during the developmental stage of zebrafish.

Glycopolymer-based multifunctional antibacterial hydrogel dressings for accelerating cutaneous wound healing.

Exposome epidemiology for suspect environmental chemical exposures during pregnancy linked to subsequent breast cancer diagnosis.

Hepatoprotective and anti-hyperglycemic effects of ferulic acid in arsenic-exposed mice.

Is exposure to chemical pollutants associated with sleep outcomes? A systematic review.

Aryl hydrocarbon receptor (AHR): Towards understanding intestinal microbial ligands including vitamin B12 and folic acid as natural antagonists.

Establishment and characterization of Yellow River carp (*Cyprinus carpio haematopterus*) muscle cell line and its application to fish virology and immunology.

Is a Lower Dose of More Bioavailable Iron (18-mg Ferrous Bisglycinate) Noninferior to 60-mg Ferrous Sulfate in Increasing Ferritin Concentrations While Reducing Gut Inflammation and Enteropathogen Detection in Cambodian Women? A Randomized Controlled Noninferiority Trial.

Ultra-stretchable, tissue-adhesive, shape-adaptive, self-healing, on-demand removable hydrogel dressings with multiple functions for infected wound healing in regions of high mobility.

Proteomic Profiling of Hypoplastic Lungs Suggests an Underlying Inflammatory Response in the Pathogenesis of Abnormal Lung Development in Congenital Diaphragmatic Hernia.

Untargeted Multiomics Approach Coupling Lipidomics and Metabolomics Profiling Reveals New Insights in Diabetic Retinopathy.

TCDD dysregulation of lncRNA expression, liver zonation and intercellular communication across the liver lobule.

Impact of the pentose phosphate pathway on metabolism and pathogenesis of *Staphylococcus aureus*.

Resveratrol ameliorates ortho- polychlorinated biphenyls' induced toxicity in ovary cells.

Torseamide increases arsenic concentrations by inhibition of multidrug resistance protein 4 in arsenic trioxide treated acute promyelocytic leukemia patients.

Diosmin exerts hepatoprotective and antihyperglycemic effects against sodium arsenite-induced toxicity through the modulation of oxidative stress and inflammation in mice.

Durvillaea antarctica: A Seaweed for Enhancing Immune and Cardiometabolic Health and Gut Microbiota Composition Modulation.

Cystine/Glutamate Xc(-) Antiporter Induction Compensates for Transsulfuration Pathway Repression by 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) to Ensure Cysteine for Hepatic Glutathione Biosynthesis.

Single-cell transcriptomic profiling of microvascular endothelial cell heterogeneity in congenital diaphragmatic hernia.

Development of a novel PET ligand, [(11)C]GO289 targeting CK2 expressed in the brain.

Possible Effects of Uremic Toxins p-Cresol, Indoxyl Sulfate, p-Cresyl Sulfate on the Development and Progression of Colon Cancer in Patients with Chronic Renal Failure.

Nephroprotective Effects of Selenium Nanoparticles Against Sodium Arsenite-Induced Damages.

Concomitant inhibition of TLR-4 and SGLT2 by phloretin and empagliflozin prevents diabetes-associated ischemic acute kidney injury.

Disruption of the mouse liver epitranscriptome by long-term aroclor 1260 exposure.

Carvacrol reduces abnormal and dead sperm counts by attenuating sodium arsenite-induced oxidative stress, inflammation, apoptosis, and autophagy in the testicular tissues of rats.

The effect of *Alnus incana* (L.) Moench extracts in ameliorating iron overload-induced hepatotoxicity in male albino rats.

Serum Levels of Indoxyl Sulfate and P-cresol in Type II Diabetic Patients With and Without Nephropathy.

Citicoline ameliorates arsenic-induced hepatotoxicity and diabetes in mice by overexpression of VAMP2, PPAR- β , As3MT, and SIRT3.

Effect of the probiotic strain, *Lactiplantibacillus plantarum* P9, on chronic constipation: A randomized, double-blind, placebo-controlled study.

A Tracheal Aspirate-derived Airway Basal Cell Model Reveals a Proinflammatory Epithelial Defect in Congenital Diaphragmatic Hernia.

Thioredoxin A of *Streptococcus suis* Serotype 2 Contributes to Virulence by Inhibiting the Expression of Pentraxin 3 to Promote Survival Within Macrophages.

Zingerone reduces sodium arsenite-induced nephrotoxicity by regulating oxidative stress, inflammation, apoptosis and histopathological changes.

NOX1 is essential for TNF α -induced intestinal epithelial ROS secretion and inhibits M cell signatures.

Consequences of reprogramming acetyl-CoA metabolism by 2,3,7,8-tetrachlorodibenzo-p-dioxin in the mouse liver.

Ifosfamide - History, efficacy, toxicity and encephalopathy.

Acetaldehyde dehydrogenase 2 activation attenuates sepsis-induced brain injury through NLRP3 inflammasome regulation.

The capsaicinoid nonivamide suppresses the inflammatory response and attenuates the progression of steatosis in a NAFLD-rat model.

A Paternal Fish Oil Diet Preconception Reduces Lung Inflammation in a Toxicant-Driven Murine Model of New Bronchopulmonary Dysplasia.

Adverse health effects of emerging contaminants on inflammatory bowel disease.

Role of Astrocytes in Parkinson's Disease Associated with Genetic Mutations and Neurotoxicants.

NKG2D Ligand Expression Induced by Oxidative Stress Mitigates Cutaneous Ischemia-Reperfusion Injury.

Mechanistic insights on the possible protective role of polyphenols extracted from *Tamarix aphylla* aerial parts against sodium arsenite-induced hepatotoxicity in rats.

Single-cell transcriptomics shows dose-dependent disruption of hepatic zonation by TCDD in mice.

Antibacterial Activity of Peptide Derivatives of Phosphinothricin against Multidrug-Resistant *Klebsiella pneumoniae*.

Supplementation with sesame oil suppresses genotoxicity, hepatotoxicity and enterotoxicity induced by sodium arsenite in rats.

Diagnostic biomarker panels of osteoarthritis: UPLC-QToF/MS-based serum metabolic profiling.

Prion Protein Overexpression in Adipose-Derived Mesenchymal Stem Cells (ADMSCs) Effectively Protected Rodent Kidney Against Ischemia-Reperfusion Injury Via Enhancing ATP/Mitochondrial Biogenesis-Role of ADMSC Rejuvenation and Proliferation.

[Clinical case report of acute dinitrophenol poisoning with a fatal outcome of Udmurt Republic].

Effectiveness of curcumin-based antimicrobial photodynamic therapy against *Staphylococcus aureus*.

DPP4 Inhibitor Sitagliptin Reduces Inflammatory Responses and Mast Cell Activation in Allergic Rhinitis.

Endocrine disruptors and endometriosis.

On-Demand Removable Self-Healing and pH-Responsive Europium-Releasing Adhesive Dressing Enables Inflammatory Microenvironment Modulation and Angiogenesis for Diabetic Wound Healing.

Multi-omics reveals diet-induced metabolic disorders and liver inflammation via microbiota-gut-liver axis.

Betaine protects against sodium arsenite-induced diabetes and hepatotoxicity in mice.

Elucidations of Molecular Mechanism and Mechanistic Effects of Environmental Toxicants in Neurological Disorders.

Exosomes released by environmental pollutant-stimulated Keratinocytes/PBMCs can trigger psoriatic inflammation in recipient cells via the AhR signaling pathway.

Club Cells-A Guardian against Occupational Hazards.

Ginkgo Biloba Extract Can Antagonize Subchronic Arsenite Exposure-Induced Hepatocyte Senescence by Inhibiting Oxidative Damage and Inflammation in Rats.

Dysregulation of immunity by cigarette smoking promotes inflammation and cancer: A review.

Insight into the emerging and common experimental in-vivo models of Alzheimer's disease.

Pan msr gene deleted strain of Salmonella Typhimurium suffers oxidative stress, depicts macromolecular damage and attenuated virulence.

Development and validation of chemometric-assisted spectrophotometric models for efficient quantitation of a binary mixture of supportive treatments in COVID-19 in the presence of its toxic impurities: a comparative study for eco-friendly assessment.

Indoor metabolites and chemicals outperform microbiome in classifying childhood asthma and allergic rhinitis.

Uroprotective Potential of Campesterol in Cyclophosphamide Induced Interstitial Cystitis; Molecular Docking Studies.

Ultrasonic neural regulation over two-dimensional graphene analog biomaterials: Enhanced PC12 cell differentiation under diverse ultrasound excitation.

How single-cell transcriptomics provides insight on hepatic responses to TCDD.

Paraquat induced acute kidney and lung injury with a dramatic response to methylprednisolone: A case report.

Carnosine synthase deficiency aggravates neuroinflammation in multiple sclerosis.

Developmental toxicity and estrogenicity of glyphosate in zebrafish in vivo and in silico studies.

Impact of endocrine disruptors on peripheral blood mononuclear cells in vitro: role of gender.

Differential transcriptomic alterations in nasal versus lung tissue of acrolein-exposed rats.

New Insight of Scaffold Based on Hydroxyapatite (HAp)/Bacteria's Nanocellulose (BN) for Dental Tissue Engineering.

Metabolic Pathways for Removing Reactive Aldehydes are Diminished in Atrophic Muscle During Heart Failure.

Resveratrol Attenuates 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Mediated Induction of Myeloid-Derived Suppressor Cells (MDSC) and Their Functions.

Effect of Hydralazine on Angiotensin II-Induced Abdominal Aortic Aneurysm in Apolipoprotein E-Deficient Mice.

Epidemiology and etiology of diffuse large B-cell lymphoma.

Mild Oxidative Stress Induced by Sodium Arsenite Reduces Lipocalin-2 Expression Levels in Cortical Glial Cells.

Dimethenamid promotes oxidative stress and apoptosis leading to cardiovascular, hepatic, and pancreatic toxicities in zebrafish embryo.

Nilotinib alleviates paraquat-induced hepatic and pulmonary injury in rats via the Nrf2/Nf-kB axis.

Gut Microbiota and Its Role in the Brain-Gut-Kidney Axis in Hypertension.

A Review on the Role of Phytoconstituents Chrysin on the Protective Effect on Liver and Kidney.

2,4-Dichlorophenoxyacetic Acid Induces Degeneration of mDA Neurons In Vitro.

Changes in Whole Blood Polyamine Levels and Their Background in Age-Related Diseases and Healthy Longevity.

Autoantibodies to beta tubulin in autoimmune liver diseases - relation to pANCA and clinical relevance.

Acute paraquat poisoning complicated by acute kidney injury and lung fibrosis: a case report from Nepal.

Carbonyl cyanide-4-(trifluoromethoxy)phenylhydrazone-induced toxicities in rats: comparative study with other mitochondrial uncouplers (2,4-dinitrophenol, OPC-163493 and tolcapone).

Role of NRF2 and reactive aldehydes in acute cellular rejection in liver transplant recipients.

Ferroptosis contributes to cyclophosphamide-induced hemorrhagic cystitis.

Biliverdin as a disease-modifying agent: An integrated viewpoint.

Terbutryn causes developmental toxicity in zebrafish (*Danio rerio*) via apoptosis and major organ malformation in the early stages of embryogenesis.

Effect of Intestinal Flora on Hyperuricemia-Induced Chronic Kidney Injury in Type 2 Diabetic Patients and the Therapeutic Mechanism of New Anti-Diabetic Prescription Medications.

Single and combined effects of polyethylene microplastics and acetochlor on accumulation and intestinal toxicity of zebrafish (*Danio rerio*).

Co-administration of L-Ascorbic Acid and α -Tocopherol Alleviates Arsenic-Induced Immunotoxicities in the Thymus and Spleen by Dwindling Oxidative Stress-Induced Inflammation.

Chronic Interstitial Nephritis in Agricultural Communities: Observational and Mechanistic Evidence Supporting the Role of Nephrotoxic Agrochemicals.

Protective potential effects of hydroalcoholic extract of *Teucrium polium* L. (Lamiaceae) against paraquat-induced lung fibrosis: An experimental study in rats.

Acetobacter pasteurianus BP2201 alleviates alcohol-induced hepatic and neuro-toxicity and modulate gut microbiota in mice.

Fluchloralin induces developmental toxicity in heart, liver, and nervous system during early zebrafish embryogenesis.

Uro-protective role of chrysin against cyclophosphamide-induced hemorrhagic cystitis in rats involving the turning-off NF- κ B/P38-MAPK, NO/PARP-1 and STAT-3 signaling cascades.

Increased anti-oxidative action compensates for collagen tissue degeneration in vitiligo dermis.

Controllable-Swelling Microneedle-Assisted Ultrasensitive Paper Sensing Platforms for Personal Health Monitoring.

Iron pill aspiration syndrome: A case report and literature review.

Effects of Prometryn Exposure on Hepatopancreas Oxidative Stress and Intestinal Flora in *Eriocheir sinensis* (Crustacea: Decapoda).

Case report: Occupational poisoning incident from a leak of chloroacetyl chloride in Jinan, Shandong, China.

Corrigendum to "Paraquat exposure induces Parkinsonism by altering lipid profile and evoking neuroinflammation in the midbrain" [Environ. Int. 169 (2022) 107512].

[8] and [10]-Gingerol reduces urothelial damage in ifosfamide-induced hemorrhagic cystitis via JAK/STAT/FOXO signaling pathway via IL-10.

Prevention of DSS-induced colitis in mice with water kefir microbiota via anti-inflammatory and microbiota-balancing activity.

Untargeted Analysis of Serum Metabolomes in Dogs with Exocrine Pancreatic Insufficiency.

Iron-rich *Candida utilis* improves intestinal health in weanling piglets.

The regulation of TRPA1 expression and function by Th1 and Th2-type inflammation in human A549 lung epithelial cells.

Protein adducts with lipid peroxidation products in patients with psoriasis.

E-cigarette effects on vascular function in animals and humans.

Exposure to low-dose arsenic caused teratogenicity and upregulation of proinflammatory cytokines in zebrafish embryos.

RNA-binding proteins that are highly expressed and enriched in healthy cartilage but suppressed in osteoarthritis.

Exposome Epidemiology for Suspect Environmental Chemical Exposures during Pregnancy Linked to Subsequent Breast Cancer Diagnosis.

The exposure to volatile organic chemicals associates positively with rheumatoid arthritis: a cross-sectional study from the NHANES program.

Long-term exposure to arsenic in drinking water leads to myocardial damage by oxidative stress and reduction in NO.

Human amnion-derived mesenchymal stem cells attenuate acute lung injury in two different acute lung injury mice models.

The herbicides glyphosate and glufosinate and the cyanotoxin Î²-N-methylamino-l-alanine induce long-term motor disorders following postnatal exposure: the importance of prior asymptomatic maternal inflammatory sensitization.

Diagnostic Dilemma in Fatal Paraquat Poisoning: An Autopsy Case Report.

Dissecting the effects of paraquat-induced pulmonary injury in rats using UPLC-Q-TOF-MS/MS-based metabolomics.

Resveratrol inhibits AhR/Notch axis and reverses Th17/Treg imbalance in purpura by activating Foxp3.

In-situ synchrotron imaging, experimental, and computational investigations on the efficiency of *Trametes versicolor* laccase on detoxification of P-Cresyl Sulfate (PCS) Protein Bound Uremic Toxin (PBUT).

Modulating AHR function offers exciting therapeutic potential in gut immunity and inflammation.

Stevioside Improves Antioxidant Capacity and Intestinal Barrier Function while Attenuating Inflammation and Apoptosis by Regulating the NF- κ B/MAPK Pathways in Diquat-Induced Oxidative Stress of IPEC-J2 Cells.

The herbicide glyphosate inhibits hippocampal long-term potentiation and learning through activation of pro-inflammatory signaling.

Induction of Axillary Bud Swelling of *Hevea brasiliensis* to Regenerate Plants through Somatic Embryogenesis and Analysis of Genetic Stability.

Enhancing Immune Protection in Hemodialysis Patients: Role of the Polymethyl Methacrylate Membrane.

Pretreatment of ellagic acid protects ifosfamide-induced acute nephrotoxicity in rat kidneys: A mitochondrial, histopathological and oxidative stress approaches.

Abscisic Acid Inhibits Cortical Microtubules Reorganization and Enhances Ultraviolet-B Tolerance in *Arabidopsis thaliana*.

Route of Arsenic Exposure Differentially Impacts the Expression of Genes Involved in Gut-Mucosa-Associated Immune Responses and Gastrointestinal Permeability.

Endometriosis: Update of Pathophysiology, (Epi) Genetic and Environmental Involvement.

Neuroprotective properties of borax against aluminum hydroxide-induced neurotoxicity: Possible role of Nrf-2/BDNF/AChE pathways in fish brain.

Associations between residential volatile organic compound exposures and liver injury markers: The role of biological sex and race.

Molecular and Biochemical Evidence of the Toxic Effects of Terbutylazine and Malathion in Zebrafish.

A Nomogram for Early Diagnosis of Community-Acquired Pneumonia Based on Bronchoalveolar Lavage Fluid Metabolomics.

AhR-mediated lipid peroxidation contributes to TCDD-induced cardiac defects in zebrafish.

Microbial Virulence Factors, Antimicrobial Resistance Genes, Metabolites, and Synthetic Chemicals in Cabins of Commercial Aircraft.

Effects of the Vitamin D3 on Alleviating the Oxidative Stress Induced by Diquat in Wenchang Chickens.

Could Vitamins Have a Positive Impact on the Treatment of Parkinson's Disease?

Absorption and Transport Mechanism of Red Meat-Derived N-glycolylneuraminic Acid and Its Damage to Intestinal Barrier Function through the NF- κ B Signaling Pathway.

Changes of Gut Microbiome in Adolescent Patients with Chronic Spontaneous Urticaria After Omalizumab Treatment.

Optimization of the Process for Preparing Bivalent Polysaccharide Conjugates to Develop Multivalent Conjugate Vaccines against *Streptococcus pneumoniae* or *Neisseria meningitidis* and Comparison with the Corresponding Licensed Vaccines in Animal Models.

Production and Anti-Inflammatory Performance of PVA Hydrogels Loaded with Curcumin Encapsulated in Octenyl Succinic Anhydride Modified Schizophyllan as Wound Dressings.

A Comparative Study on the Effects of the Lysine Reagent Pyridoxal 5-Phosphate and Some Thiol Reagents in Opening the TI(+)-Induced Mitochondrial Permeability Transition Pore.

Protective effects of zingerone against sodium arsenite-induced lung toxicity: A multi-biomarker approach.

Gestational arsenic exposure induces anxiety-like behaviors in F1 female mice by dysregulation of neurological and immunological markers.

Andrographolide alleviates paraquat-induced acute lung injury by activating the Nrf2/HO-1 pathway.

Mutual promotion of mitochondrial fission and oxidative stress contributes to mitochondrial-DNA-mediated inflammation and epithelial-mesenchymal transition in paraquat-induced pulmonary fibrosis.

Andrographolide-based potential anti-inflammatory transcription inhibitors against nuclear factor NF- κ B p50 subunit (NF- κ B p50): an integrated molecular and quantum mechanical approach.

Effects of haloxyfop-p-methyl on the developmental toxicity, neurotoxicity, and immunotoxicity in zebrafish.

Bioactive diterpenoids and sesquiterpenoids with different skeletons from *Salvia digitaloides* Diels.

Miniaturized extraction and determination of swelling agents in fruits and vegetables based on deep eutectic solvent-molecularly imprinted hydrophilic resin.

Glutathione Protects against Paraquat-Induced Oxidative Stress by Regulating Intestinal Barrier, Antioxidant Capacity, and CAR Signaling Pathway in Weaned Piglets.

Amyotrophic Lateral Sclerosis Pathoetiology and Pathophysiology: Roles of Astrocytes, Gut Microbiome, and Muscle Interactions via the Mitochondrial Melatonergic Pathway, with Disruption by Glyphosate-Based Herbicides.

Impact of Glyphosate on the Development of Insulin Resistance in Experimental Diabetic Rats: Role of NF- κ B Signalling Pathways.

Signaling pathways involved in paraquat-induced pulmonary toxicity: Molecular mechanisms and potential therapeutic drugs.

Atrazine exposure induces necroptosis through the P450/ROS pathway and causes inflammation in the gill of common carp (*Cyprinus carpio* L.).

Protective effect of biogenic selenium nanoparticles against diquat-induced acute toxicity via regulation of gut microbiota and its metabolites.

Tannic acid through ROS/TNF- α /TNFR 1 antagonizes atrazine induced apoptosis, programmed necrosis and immune dysfunction of grass carp hepatocytes.

Atrazine-induced oxidative damage via modulating xenobiotic-sensing nuclear receptors and cytochrome P450 systems in cerebrum and antagonism of lycopene.

Comparative assessment of individual and mixture chronic toxicity of glyphosate and glufosinate ammonium on amphibian tadpoles: A multibiomarker approach.

Glyphosate differentially affects the allergic immune response across generations in mice.

Cannabinoid Analogue WIN 55212-2 Protects Paraquat-Induced Lung Injury and Enhances Macrophage M2 Polarization.

YAP1 silencing attenuated lung injury/fibrosis but worsened diaphragmatic function by regulating oxidative stress and inflammation response in mice.

Conservation implications of herbicides on seagrasses: sublethal glyphosate exposure decreases fitness in the endangered *Zostera capensis*.

Identification of environmental factors that promote intestinal inflammation.

Gut dysfunction may be the source of pathological aggregation of alpha-synuclein in the central nervous system through Paraquat exposure in mice.

Perinatal exposure to a glyphosate pesticide formulation induces offspring liver damage.

Paraquat exposure induces Parkinsonism by altering lipid profile and evoking neuroinflammation in the midbrain.

Glyphosate, AMPA and glyphosate-based herbicide exposure leads to GFAP, PCNA and caspase-3 increased immunoreactive area on male offspring rat hypothalamus.

Pathophysiological Changes in Rhesus Monkeys with Paraquat-Induced Pulmonary Fibrosis.

Cyclooxygenase-2 activates the free radical-mediated apoptosis of polymorphonuclear leukocytes in the maneb- and paraquat-intoxicated rats.

Effects of glyphosate on zebrafish: a systematic review and meta-analysis.

Apigenin and apigenin-7, 4'-O-dioctanoate protect against acrolein-aggravated inflammation via inhibiting the activation of NLRP3 inflammasome and HMGB1/MYD88/NF- κ B signaling pathway in Human umbilical vein endothelial cells (HUVEC).

Immunosuppressive therapies attenuate paraquat-induced renal dysfunction by suppressing inflammatory responses and lipid peroxidation.

A dose-related positive effect of inhaled simvastatin-loaded PLGA nanoparticles on paraquat-induced pulmonary fibrosis in rats.

Neurotoxicity of pesticides - A link to neurodegeneration.

Cross-sectional and longitudinal associations of acrolein exposure with pulmonary function alteration: Assessing the potential roles of oxidative DNA damage, inflammation, and pulmonary epithelium injury in a general adult population.

Co-exposure of iron oxide nanoparticles and glyphosate-based herbicide promote liver toxicity in guppy (*Poecilia reticulata*): A histochemical and ultrastructural approach.

Pentachlorophenol mediated regulation of DAMPs and inflammation: In vitro study.

Verbascoside inhibits paraquat-induced pulmonary toxicity via modulating oxidative stress, inflammation, apoptosis and DNA damage in A549 cell.

IL-6/STAT3/Foxo1 axis as a target of lycopene ameliorates the atrazine-induced thymic mitophagy and pyroptosis cross-talk.

[Study on the Protective effect and mechanism of Nicotinamide Riboside on lung injury in paraquat intoxicated mice].

Glyphosate-based herbicides induces autophagy in IPEC-J2 cells and the intervention of N-acetylcysteine.

Glyphosate infiltrates the brain and increases pro-inflammatory cytokine TNF α : implications for neurodegenerative disorders.

Effects of exposure to glyphosate on oxidative stress, inflammation, and lung function in maize farmers, Northern Thailand.

Comparative study of oral versus parenteral crocin in mitigating acrolein-induced lung injury in albino rats.

Ginkgolide C Alleviates Acute Lung Injury Caused by Paraquat Poisoning via Regulating the Nrf2 and NF- κ B Signaling Pathways.

Exposure to glyphosate-based herbicide during early stages of development increases insulin sensitivity and causes liver inflammation in adult mice offspring.

Developmental toxicity of glyphosate on embryo-larval zebrafish (*Danio rerio*).

A review of molecular mechanisms linked to potential renal injury agents in tropical rural farming communities.

2,4-dichlorophenoxyacetic acid induces ROS activation in NLRP3 inflammatory body-induced autophagy disorder in microglia and the protective effect of *Lycium barbarum* polysaccharide.

Toxic Effects of Glyphosate on the Nervous System: A Systematic Review.

Ameliorative effect of N-acetylcysteine on the testicular tissue of adult male albino rats after glyphosate-based herbicide exposure.

Aqueous *Thunbergia laurifolia* leaf extract alleviates paraquat-induced lung injury in rats by inhibiting oxidative stress and inflammation.

Lycopene ameliorates atrazine-induced pyroptosis in spleen by suppressing the Ox-mtDNA/Nlrp3 inflammasome pathway.

[Preliminary study on time-dependent changes of intestinal tract and brain-gut axis in mice model of Parkinson's disease induced by paraquat].

Human Amnion-Derived MSCs Alleviate Acute Lung Injury and Hinder Pulmonary Fibrosis Caused by Paraquat in Rats.

Toxicity of commercial atrazine in *Rattus norvegicus* organs as a function of concentration: histopathological, ultrastructural and hematological evaluation.

Ellagic Acid Alleviates Diquat-Induced Jejunum Oxidative Stress in C57BL/6 Mice through Activating Nrf2 Mediated Signaling Pathway.

Protective effect of dexamethasone against paraquat-triggered toxicity in A549 cells through inhibiting inflammation, apoptosis and TGF- β 1/Smad3 pathway.

Metabolomic and Transcript Analysis Revealed a Sex-Specific Effect of Glyphosate in Zebrafish Liver.

Apiaceous vegetables protect against acrolein-induced pulmonary injuries through modulating hepatic detoxification and inflammation in C57BL/6 male mice.

Acute exposure to paraquat affects the phenotypic differentiation of substantia nigra microglia in rats.

Cardiotoxicity of cyclophosphamide's metabolites: an in vitro metabolomics approach in AC16 human cardiomyocytes.

5-aminosalicylic acid attenuates paraquat-induced lung fibroblast activation and pulmonary fibrosis of rats.

Paraquat mediates BV-2 microglia activation by raising intracellular ROS and inhibiting Akt1 phosphorylation.

The influence of preconditioning with low dose of LPS on paraquat-induced neurotoxicity, microglia activation and expression of α -synuclein and synphilin-1 in the dopaminergic system.

The STING-IRF3 pathway contributes to paraquat-induced acute lung injury.

[Effects on extravascular lung water of lung protective ventilation strategy applied on piglets with acute respiratory distress syndrome induced by paraquat].

Ellagic acid ameliorates paraquat-induced liver injury associated with improved gut microbial profile.

MicroRNA-200b-3p as a biomarker for diagnosis and survival prognosis of multiple organ dysfunction syndrome caused by acute paraquat poisoning.

Assessing sub-lethal effects of the dinitroaniline herbicide pendimethalin in zebrafish embryos/larvae (Danio rerio).

Evaluation of the efficiency of simvastatin loaded PLGA nanoparticles against acute paraquat-intoxicated rats.

Prenatal exposure to paraquat and nanoscaled TiO₂ aerosols alters the gene expression of the developing brain.

The potential risks of herbicide butachlor to immunotoxicity via induction of autophagy and apoptosis in the spleen.

Cinnamaldehyde causes developmental neurotoxicity in zebrafish via the oxidative stress pathway that is rescued by astaxanthin.

Lung transplantation in a woman with paraquat poisoning that led to pulmonary fibrosis-Widely reported by the media: A case report.

Network pharmacology and molecular docking-based prediction of active compounds and mechanisms of action of Cnidii Fructus in treating atopic dermatitis.

The Therapeutic Roles of Cinnamaldehyde against Cardiovascular Diseases.

Cinnamaldehyde-based poly(thioacetal): A ROS-awakened self-amplifying degradable polymer for enhanced cancer immunotherapy.

Acrolein plays a culprit role in the pathogenesis of diabetic nephropathy in vitro and in vivo.

Effects of TLR9/NF- κ B on oxidative stress and inflammation in IPEC-J2 cells.

Novel anti-arthritic mechanisms of trans-cinnamaldehyde against complete Freund's adjuvant-induced arthritis in mice: involvement of NF- κ B/TNF- α and IL-6/IL-23/IL-17 pathways in the immuno-inflammatory responses.

Acute diquat poisoning causes rhabdomyolysis.

Impact of Environmental Risk Factors on Mitochondrial Dysfunction, Neuroinflammation, Protein Misfolding, and Oxidative Stress in the Etiopathogenesis of Parkinson's Disease.

pH-responsive cinnamaldehyde-TiO₂ nanotube coating: fabrication and functions in a simulated diabetes condition.

Toxic effects of glyphosate on the intestine, liver, brain of carp and on epithelioma papulosum cyprinid cells: Evidence from in vivo and in vitro research.

Cinnamaldehyde protects against ligature-induced periodontitis through the inhibition of microbial accumulation and inflammatory responses of host immune cells.

Utilizing novel TBI-on-a-chip device to link physical impacts to neurodegeneration and decipher primary and secondary injury mechanisms.

Protective Effects of Cinnamaldehyde on the Oxidative Stress, Inflammatory Response, and Apoptosis in the Hepatocytes of Salmonella Gallinarum-Challenged Young Chicks.

Safety and tolerability of cinnamaldehyde in orabase for oral candidiasis treatment: phase I clinical trial.

Genomic Analyses Identify Manganese Homeostasis as a Driver of Group B Streptococcal Vaginal Colonization.

Cinnamaldehyde Mitigates Atherosclerosis Induced by High-Fat Diet via Modulation of Hyperlipidemia, Oxidative Stress, and Inflammation.

Evaluation of cinnamaldehyde mucoadhesive patches on minor recurrent aphthous stomatitis: a randomized, double-blind, placebo-controlled clinical trial.

[Imaging features of 10 patients with toxic encephalopathy caused by diquat].

Targeted delivery of acrolein scavenger hydralazine in spinal cord injury using folate-linker-drug conjugation.

An Inhibitor of Nuclear Factor-Kappa B Pathway Attenuates the Release of TGF- β 1 and Inhibits the Fibrogenic Progress in a Model of Airway Remodeling Induced by Acrolein.

Successful Treatment of Severe Toxic Hepatitis and Encephalopathy Without Respiratory Failure Caused by Paraquat Intoxication.

Histopathological Findings in a Fatal Case of Paraquat Poisoning.

C. elegans as an in vivo model system for the phenotypic drug discovery for treating paraquat poisoning.

Cinnamic Aldehyde, the main monomer component of Cinnamon, exhibits anti-inflammatory property in OA synovial fibroblasts via TLR4/MyD88 pathway.

MyD88 deficiency ameliorates weight loss caused by intestinal oxidative injury in an autophagy-dependent mechanism.

The phytonutrient cinnamaldehyde limits intestinal inflammation and enteric parasite infection.

Effect of Cinnamaldehyde on C. albicans cell wall and (1,3)- β -D-glucans in vivo.

Acrolein, an endogenous aldehyde induces Alzheimer's disease-like pathologies in mice: A new sporadic AD animal model.

Taurine protects dopaminergic neurons in paraquat-induced Parkinson's disease mouse model through PI3K/Akt signaling pathways.

Urinary acrolein metabolites, systemic inflammation, and blood lipids: Results from the National Health and Nutrition Examination Survey.

Anticancer Effects of Cinnamaldehyde Through Inhibition of ErbB2/HSF1/LDHA Pathway in 5637 Cell Line of Bladder Cancer.

Ellagic acid prevents gut damage via ameliorating microbe-associated intestinal lymphocyte imbalance.

Peripheral tissular analysis of rapamycin's effect as a neuroprotective agent in vivo.

Cinnamaldehyde-Based Self-Nanoemulsion (CA-SNEDDS) Accelerates Wound Healing and Exerts Antimicrobial, Antioxidant, and Anti-Inflammatory Effects in Rats' Skin Burn Model.

NRF2 activation by 2-methoxycinnamaldehyde attenuates inflammatory responses in macrophages via enhancing autophagy flux.

Hexagonal liquid crystalline system containing cinnamaldehyde for enhancement of skin permeation of sinomenine hydrochloride.

Swelling and glyphosate-controlled release behavior of multi-responsive alginate-g-P(NIPAm-co-NDEAm)-based hydrogel.

[Research progress on the relationship between diquat poisoning and nuclear factor E2-related factor 2 signaling pathway].

Behavioral, histopathological, and biochemical evaluations on the effects of cinnamaldehyde, naloxone, and their combination in morphine-induced cerebellar toxicity.

Pro-Inflammatory Interactions of Dolutegravir with Human Neutrophils in an In Vitro Study.

The significance of thymoquinone administration on liver toxicity of diazinon and cholinesterase activity; a recommendation for prophylaxis among individuals at risk.

[Expression and Regulatory Mechanism of Autophagy-related Genes in Synovial Tissues of Patients with Rheumatoid Arthritis].

Nano-formulations in treatment of iron deficiency anaemia: An overview.

Promising hepatoprotective effects of lycopene in different liver diseases.

Efficacy and Mechanism of Buxue Yimu Pills on Gynecological Anemia: A Combination of Clinical and Network Pharmacology Study.

The Clostridium Metabolite P-Cresol Sulfate Relieves Inflammation of Primary Biliary Cholangitis by Regulating Kupffer Cells.

Lactobacillus reuteri tryptophan metabolism promotes host susceptibility to CNS autoimmunity.

Ferrous sulfate-loaded hydrogel cures Staphylococcus aureus infection via facilitating a ferroptosis-like bacterial cell death in a mouse keratitis model.

Potential for TCDD to induce regulatory functions in B cells as part of the mechanism for T cell suppression in EAE.

Thiobencarb induces phenotypic abnormalities, apoptosis, and cardiovascular toxicity in zebrafish embryos through oxidative stress and inflammation.

The AHR target gene scinderin activates the WNT pathway by facilitating the nuclear translocation of β -catenin.

Carbamylation of β 2-glycoprotein I generates new autoantigens for antiphospholipid syndrome: a new tool for diagnosis of 'seronegative' patients.

Dual-dynamic-bond cross-linked injectable hydrogel of multifunction for intervertebral disc degeneration therapy.

A Combination Therapy Using Electrical Stimulation and Adaptive, Conductive Hydrogels Loaded with Self-Assembled Nanogels Incorporating Short Interfering RNA Promotes the Repair of Diabetic Chronic Wounds.

Comparative plasma metabolomic analysis to identify biomarkers for lead-induced cognitive impairment.

Transcriptomics analysis of human iPSC-derived dopaminergic neurons reveals a novel model for sporadic Parkinson's disease.

Trace Element Interactions, Inflammatory Signaling, and Male Sex Implicated in Reduced Growth Following Excess Oral Iron Supplementation in Pre-Weanling Rats.

The Autism Spectrum Disorder-Associated Bacterial Metabolite p-Cresol Derails the Neuroimmune Response of Microglial Cells Partially via Reduction of ADAM17 and ADAM10.

Synbiotics, prebiotics and probiotics for solid organ transplant recipients.

Correlation of inflammatory biomarkers with the diversity of Bacteroidaceae, Bifidobacteriaceae, Prevotellaceae and Lactobacillaceae families in the intestinal microbiota of patients with end stage renal disease.

Dioxin-elicited decrease in cobalamin redirects propionyl-CoA metabolism to the β -oxidation-like pathway resulting in acrylyl-CoA conjugate buildup.

Perinatal arsenic exposure-induced sustained microglial activation leads to impaired cognitive response in BALB/c mice.

Developmental, toxicological effects and recovery patterns in *Xenopus laevis* after exposure to penconazole-based fungicide during the metamorphosis process.

Lactoferrin for iron-deficiency anemia in children with inflammatory bowel disease: a clinical trial.

Sub-lethal concentration of metamifop exposure impair gut health of zebrafish (*Danio rerio*).

Transcriptome sequencing of 3,3',4,4',5-Pentachlorobiphenyl (PCB126)-treated human preadipocytes demonstrates progressive changes in pathways associated with inflammation and diabetes.

M1-linked ubiquitination facilitates NF- κ B activation and survival during sterile inflammation.

Barbaloin attenuates pulmonary fibrosis through TGF- β 1/Smads/p38 pathway.

HDL functionality in type 1 diabetes: enhancement of cholesterol efflux capacity in relationship with decreased HDL carbamylation after improvement of glycemic control.

Recombinant FGF21 Attenuates Polychlorinated Biphenyl-Induced NAFLD/NASH by Modulating Hepatic Lipocalin-2 Expression.

Multimomics analysis of the impact of polychlorinated biphenyls on environmental liver disease in a mouse model.

Nano-silica particles synergistically IgE-mediated mast cell activation exacerbating allergic inflammation in mice.

Radiosynthesis and characterization of a carbon-11 PET tracer for receptor-interacting protein kinase 1.

Xanthogranulomatous pyelonephritis in a pediatric patient.

Prognostic value of neutrophil to lymphocyte ratio in the diagnosis of neurotoxicity after glufosinate ammonium poisoning.

Quizalofop-P-ethyl induced developmental toxicity and cardiotoxicity in early life stage of zebrafish (Danio rerio).

Quercetin Reduces the Development of 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Induced Cleft Palate in Mice by Suppressing CYP1A1 via the Aryl Hydrocarbon Receptor.

AhR Activation Leads to Attenuation of Murine Autoimmune Hepatitis: Single-Cell RNA-Seq Analysis Reveals Unique Immune Cell Phenotypes and Gene Expression Changes in the Liver.

Pesticide use and risk of systemic autoimmune diseases in the Agricultural Health Study.

Mild Mitochondrial Uncoupling Decreases Experimental Atherosclerosis, A Proof of Concept.

N6-Acetyl-L-Lysine and p-Cresol as Key Metabolites in the Pathogenesis of COVID-19 in Obese Patients.

Comparison of Ferric Sodium EDTA in Combination with Vitamin C, Folic Acid, Copper Gluconate, Zinc Gluconate, and Selenomethionine as Therapeutic Option for Chronic Kidney Disease Patients with Improvement in Inflammatory Status.

Kunitz-Type Peptides from Sea Anemones Protect Neuronal Cells against Parkinson's Disease Inductors via Inhibition of ROS Production and ATP-Induced P2X7 Receptor Activation.

Gut-derived bacterial toxins impair memory CD4+ T cell mitochondrial function in HIV-1 infection.

Application of FeOOH Nano-Ellipsoids as a Novel Nano-Based Iron Supplement: an In Vivo Study.

Bacterial neurotoxic metabolites in multiple sclerosis cerebrospinal fluid and plasma.

Curcumin Facilitates Aryl Hydrocarbon Receptor Activation to Ameliorate Inflammatory Astrogliosis.

Rosmarinus officinalis L. Leaf Extracts and Their Metabolites Inhibit the Aryl Hydrocarbon Receptor (AhR) Activation In Vitro and in Human Keratinocytes: Potential Impact on Inflammatory Skin Diseases and Skin Cancer.

Toxic Effects of Endocrine Disruptor Exposure on Collagen-Induced Arthritis.

Lentinan alleviates arsenic-induced hepatotoxicity in mice via downregulation of OX40/IL-17A and activation of Nrf2 signaling.

Flavoring agent dihydrocoumarin alleviates IgE-mediated mast cell activation and allergic inflammation.

Nontoxic Metal-Free Visible Light-Responsive Carbon Nitride Quantum Dots Cause Oxidative Stress and Cancer-Specific Membrane Damage.

Monomeric C-Reactive Protein: Current Perspectives for Utilization and Inclusion as a Prognostic Indicator and Therapeutic Target.

Phage therapy for refractory periapical periodontitis caused by *Enterococcus faecalis* in vitro and in vivo.

Tryptophan Metabolites Regulate Neuropentraxin 1 Expression in Endothelial Cells.

Metabolic trade-offs favor regulated hypothermia and inhibit fever in immune-challenged chicks.

Acute Dyspnea and Hemoptysis in an 84-Year-Old Man With Multiple Comorbidities.

Ubiquitinated gasdermin D mediates arsenic-induced pyroptosis and hepatic insulin resistance in rat liver.

Synthesis and anti-inflammatory activities of glycyrrhetic acid derivatives containing disulfide bond.

2, 3, 7, 8-Tetrachlorodibenzo-p-dioxin potential impacts on peripheral blood mononuclear cells of endometriosis women.

Comparative Effects between Oral Lactoferrin and Ferrous Sulfate Supplementation on Iron-Deficiency Anemia: A Comprehensive Review and Meta-Analysis of Clinical Trials.

Reduced Colonic Mucosal Injury in 2,3,7,8-Tetrachlorodibenzo-p-Dioxin Poly ADP-Ribose Polymerase (TIPARP/PARP7)-Deficient Mice.

Impact of Uremic Toxins on Endothelial Dysfunction in Chronic Kidney Disease: A Systematic Review.

Minocycline improves the functional recovery after traumatic brain injury via inhibition of aquaporin-4.

Biotic Supplements in Patients With Chronic Kidney Disease: Meta-Analysis of Randomized Controlled Trials.

Associations between persistent organic pollutants and endometriosis: A multiblock approach integrating metabolic and cytokine profiling.

Treatment with MDL 72527 Ameliorated Clinical Symptoms, Retinal Ganglion Cell Loss, Optic Nerve Inflammation, and Improved Visual Acuity in an Experimental Model of Multiple Sclerosis.

Carbonyl Profiles of Electronic Nicotine Delivery System (ENDS) Aerosols Reflect Both the Chemical Composition and the Numbers of E-Liquid Ingredients-Focus on the In Vitro Toxicity of Strawberry and Vanilla Flavors.

Insights into metabolic and pharmacological profiling of *Aspergillus ficuum* through bioinformatics and experimental techniques.

An In-Silico Evaluation of Anthraquinones as Potential Inhibitors of DNA Gyrase B of Mycobacterium tuberculosis.

Ethnicity Associated Microbial and Metabonomic Profiling in Newly Diagnosed Ulcerative Colitis.

Can probiotic, prebiotic, and synbiotic supplementation modulate the gut-liver axis in type 2 diabetes? A narrative and systematic review of clinical trials.

Toxic effects of pesticides on cellular and humoral immunity: an overview.

Chemical compositions, antibacterial, antifungal and cytotoxic effects of *Alhagi mannifera* five extracts.

Acetobacter tropicalis bacteraemia in an immunocompromised patient: case report.

Suspected gut barrier disruptors and development of food allergy: Adjuvant effects and early immune responses.

Post-Translational Modifications Evoked by Reactive Carbonyl Species in Ultraviolet-A-Exposed Skin: Implication in Fibroblast Senescence and Skin Photoaging.

Protective effects and DNA repair induction of a coumarin-chalcone hybrid against genotoxicity induced by mutagens.

Chlorinated Polycyclic Aromatic Hydrocarbons Induce Immunosuppression in THP-1 Macrophages Characterized by Disrupted Amino Acid Metabolism.

The modulation of gut microbiota by herbal medicine to alleviate diabetic kidney disease - A review.

Comparative Biochemical Profiling of Aluminum Chloride and Sodium Azide Induced Neuroinflammation and Cardiometabolic Disturbance.

Effect of water diuresis with hydrogen saturation on the course of acute kidney damage during the separation of oxidation and phosphorylation.

Diffusion-Weighted Imaging for Detecting Glufosinate Ammonium Intoxication: A Case Report.

Synthesis, Characterization, and Swelling Properties of a New Highly Absorbent Hydrogel Based on Carboxymethyl Guar Gum Reinforced with Bentonite and Silica Particles for Disposable Hygiene Products.

Sodium acetate/sodium butyrate alleviates lipopolysaccharide-induced diarrhea in mice via regulating the gut microbiota, inflammatory cytokines, antioxidant levels, and NLRP3/Caspase-1 signaling.

AhR Mediated Activation of Pro-Inflammatory Response of RAW 264.7 Cells Modulate the Epithelial-Mesenchymal Transition.

Chemical Composition and Cytotoxic Activity of Extracts from *Carpesium divaricatum*: In Vitro- versus Field-Grown Plants.

C-X-C-Chemokine-Receptor-Type-4 Inhibitor AMD3100 Attenuates Pulmonary Inflammation and Fibrosis in Silicotic Mice.

Acidifiers Attenuate Diquat-Induced Oxidative Stress and Inflammatory Responses by Regulating NF- κ B/MAPK/COX-2 Pathways in IPEC-J2 Cells.

Bergenin ameliorates cognitive deficits and neuropathological alterations in sodium azide-induced experimental dementia.

Somatic embryogenesis and plant regeneration from transverse thin cell layers of adult peach palm (*Bactris gasipaes*) lateral offshoots.

Facile fabrication of Bi-layered perfusable hydrogel tubes as biomimetic 3D arterial construct.

Efficacy of *Sterculia diversifolia* Leaf Extracts: Volatile Compounds, Antioxidant and Anti-Inflammatory Activity, and Green Synthesis of Potential Antibacterial Silver Nanoparticles.

Synthesis and Structure-Activity Relationship Studies of Pyrido [1,2-e]Purine-2,4(1H,3H)-Dione Derivatives Targeting Flavin-Dependent Thymidylate Synthase in *Mycobacterium tuberculosis*.

Efficacy of kangfuxin liquid on radiotherapy-induced oral mucositis for patients with head and neck squamous cell carcinoma and its effect on salivary glands and immune function.

Periplaneta americana Extract Pretreatment Alleviates Oxidative Stress and Inflammation and Increases the Abundance of Gut *Akkermansia muciniphila* in Diquat-Induced Mice.

In Vitro Induction of Eryptosis by Uremic Toxins and Inflammation Mediators in Healthy Red Blood Cells.

Levels of anti-cyclic citrullinated peptide and antinuclear antibodies in Brazilian agricultural workers exposed to pesticides and fertilizers.

Protection against Paraquat-Induced Oxidative Stress by *Curcuma longa* Extract-Loaded Polymeric Nanoparticles in Zebrafish Embryos.

Food-derived bioactive oligopeptide iron complexes ameliorate iron deficiency anemia and offspring development in pregnant rats.

The Joint Influence of TI(+) and Thiol-Modifying Agents on Rat Liver Mitochondrial Parameters In Vitro.

Allergic and non-allergic wheeze among farm women in the Agricultural Health Study (2005-2010).

Microbiome profiling of nasal extracellular vesicles in patients with allergic rhinitis.

The Effects of Resistant Starch Consumption in Adult Patients With Chronic Kidney Disease: A Systematic Review.

Comparative effects of *Curcuma longa* and curcumin on paraquat-induced systemic and lung oxidative stress and inflammation in rats.

Borax exerts protective effect against ferrocene-induced neurotoxicity in *Oncorhynchus mykiss*.

Evaluation of dioxin induced transcriptomic responses in a 3D human liver microtissue model.

Tocopherol Enhances the Antioxidant Defense System and Histomorphometric Parameters in The Gastrointestinal Tract of Rats Treated with Sodium Arsenite.

In vivo toxicity evaluations of halophenolic disinfection byproducts in drinking water: A multi-omics analysis of toxic mechanisms.

Effects of Autophagy Modulators and Dioxin on the Expression of Epidermal Differentiation Proteins on Psoriasis-Like Keratinocytes in vitro and ex vivo.

Dietary supplementation with biogenic selenium nanoparticles alleviate oxidative stress-induced intestinal barrier dysfunction.

Chronic Toxicity of Primary Metabolites of Chloroacetamide and Glyphosate to Early Life Stages of Marbled Crayfish *Procambarus virginalis*.

Exposure to the Dioxin-like Pollutant PCB 126 Afflicts Coronary Endothelial Cells via Increasing 4-Hydroxy-2 Nonenal: A Role for Aldehyde Dehydrogenase 2.

Effects of benzotriazole UV stabilizers, UV-PS and UV-P, on the differentiation of splenic regulatory T cells via aryl hydrocarbon receptor.

Associations of Smokeless Tobacco Use With Cardiovascular Disease Risk: Insights From the Population Assessment of Tobacco and Health Study.

Histopathological Alterations in the Livers of Chronic Hepatitis Patients Exposed to Agent Orange/Dioxin in Vietnam.

Effect of cyanocobalamin (vitamin B12) on paraquat-induced brain injury in mice.

Genotoxic, biochemical and histological biomarkers of subacute concentrations of paraquat and glyphosate in Nile Tilapia.

Red propolis reduces inflammation in cyclophosphamide-induced hemorrhagic cystitis in rats.

A glyphosate-based herbicide disrupted hematopoiesis and induced organ toxicities, ameliorated by vitamin B(12) in a mouse model.

New insights into arsenic, lead, and iron neurotoxicity: Activation of MAPK signaling pathway and oxidative stress.

The toxicity of perfluorodecanoic acid is mainly manifested as a deflected immune function.

Metformin Regulates Alveolar Macrophage Polarization to Protect Against Acute Lung Injury in Rats Caused by Paraquat Poisoning.

Engineering Multifunctional Hydrogel With Osteogenic Capacity for Critical-Size Segmental Bone Defect Repair.

Toxic Exposure to Endocrine Disruptors Worsens Parkinson's Disease Progression through NRF2/HO-1 Alteration.

Pedunculagin isolated from *Plinia cauliflora* seeds exhibits genotoxic, antigenotoxic and cytotoxic effects in bacteria and human lymphocytes.

Optimized Transformation and Gene Editing of the B104 Public Maize Inbred by Improved Tissue Culture and Use of Morphogenic Regulators.

Pesticide Exposure and Risk of Rheumatoid Arthritis: A Systematic Review and Meta-Analysis.

[A case of occupational allyl alcohol inhalation poisoning].

The bZIP Ap1 transcription factor is a negative regulator of virulence attributes of the anthropophilic dermatophyte *Trichophyton rubrum*.

Atrazine and Diuron Effects on Survival, Embryo Development, and Behavior in Larvae and Adult Zebrafish.

Paraquat Induces Lung Injury via miR-199-Mediated SET in a Mouse Model.

Kidney and lung injury in rats following acute diquat exposure.

JAK2/STAT3 pathway regulates microglia polarization involved in hippocampal inflammatory damage due to acute paraquat exposure.

Sodium arsenite accelerates D-galactose-induced aging in the testis of the rat: Evidence for mitochondrial oxidative damage, NF- κ B, JNK, and apoptosis pathways.

Effects of sequential blood purification on the organ function and lethality in patients with paraquat-induced multiple organ dysfunction syndrome.

Paraquat modulates immunological function in bone marrow-derived macrophages.

Is the Use of Glyphosate in Modern Agriculture Resulting in Increased Neuropsychiatric Conditions Through Modulation of the Gut-brain-microbiome Axis?

More than Meets the Eye: The Aryl Hydrocarbon Receptor is an Environmental Sensor, Physiological Regulator and a Therapeutic Target in Ocular Disease.

Metabolic profiling of serum and urine in lactating dairy cows affected by subclinical ketosis using proton nuclear magnetic resonance spectroscopy.

Lead acetate versus cadmium sulfate in the modulation of main physiological pathways controlling detrusor muscle contractility in rat.

Heterogeneous nucleation of creases in swelling polymer gels.

Significant Correlations between p-Cresol Sulfate and Mycophenolic Acid Plasma Concentrations in Adult Kidney Transplant Recipients.

Exploring breath biomarkers in BLM-induced pulmonary fibrosis mice with associative ionization time-of-flight mass spectrometry.

Plant-Derived Molecule 4-Methylumbelliferone Suppresses Fc ϵ RI-Mediated Mast Cell Activation and Allergic Inflammation.

Assessment of Selected Morphological, Physical and Chemical Parameters of the Teeth of the Offspring of Female Rats Exposed to 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD), Taking into Account the Protective Role of Selected Antioxidants-Preliminary Study.

Pharmacological Inhibition of Spermine Oxidase Suppresses Excitotoxicity Induced Neuroinflammation in Mouse Retina.

Extranodal Diffuse Large B-Cell Lymphoma of Bone and Soft Tissue Presenting With Marked Lymphedema and Hypercalcemia.

A Novel Imidazolinone Derivative with 5-Arylidene and 2-Substituted Mercapto Group as Potent Anti-Hepatitis C Virus Compound.

6-Formylindolo[3,2-b]carbazole, a Potent Ligand for the Aryl Hydrocarbon Receptor Produced Both Endogenously and by Microorganisms, can Either Promote or Restrain Inflammatory Responses.

Oxyfluorfen induces hepatotoxicity through lipo-sugar accumulation and inflammation in zebrafish (*Danio rerio*).

TCDD Inhibition of IgG1 Production in Experimental Autoimmune Encephalomyelitis (EAE) and In Vitro.

Isatis phytoenic relieved atrazine induced growth retardation, hepato-renal dysfunction, and oxidative stress in Nile tilapia.

5-Aminosalicilyc Acid, A Weak Agonist for Aryl Hydrocarbon Receptor That Induces Splenic Regulatory T Cells.

Repeated Low-Dose Acrolein Triggers Irreversible Lamina Propria Edema in Urinary Bladder, Transient Voiding Behavior and Widening of Eyes to Mechanical Stimuli.

Lung inflammation from repeated exposure to LPS and glyphosate.

Long Noncoding RNA NEAT1 Knockdown Ameliorates 1-Methyl-4-Phenylpyridine-Induced Cell Injury Through MicroRNA-519a-3p/SP1 Axis in Parkinson Disease.

Effects of 2,4-dichlorophenoxyacetic acid on the expression of NLRP3 inflammasome and autophagy-related proteins as well as the protective effect of *Lycium barbarum* polysaccharide in neonatal rats.

Berberine Attenuates MPP(+)-Induced Neuronal Injury by Regulating LINC00943/miR-142-5p/KPNA4/NF- κ B Pathway in SK-N-SH Cells.

Contact allergy to fragrance mix I and its components in individuals with photocontact allergy to ketoprofen.

Inflammatory, Oxidative Stress, and Apoptosis Effects in Zebrafish Larvae after Rapid Exposure to a Commercial Glyphosate Formulation.

Pleiotropic Outcomes of Glyphosate Exposure: From Organ Damage to Effects on Inflammation, Cancer, Reproduction and Development.

Atrazine Inhalation Worsen Pulmonary Fibrosis Regulating the Nuclear Factor-Erythroid 2-Related Factor (Nrf2) Pathways Inducing Brain Comorbidities.

Vitamin D(3) Protects Mice from Diquat-Induced Oxidative Stress through the NF- κ B/Nrf2/HO-1 Signaling Pathway.

Bidirectional role of reactive oxygen species during inflammasome activation in acrolein-induced human EAhy926 cells pyroptosis.

Subchronic exposure to a glyphosate-based herbicide causes dysplasia in the digestive tract of Wistar rats.

Exposure to the herbicide butachlor activates hepatic stress signals and disturbs lipid metabolism in mice.

Recovery trend to co-exposure of iron oxide nanoparticles ($^{59}\text{Fe}(2)\text{O}(3)$) and glyphosate in liver tissue of the fish *Poecilia reticulata*.

Toxicological Parameters of a Formulation Containing Cinnamaldehyde for Use in Treatment of Oral Fungal Infections: An In Vivo Study.

Autonomous regulation of inducible nitric oxide synthase and cytochrome P450 2E1-mediated oxidative stress in maneb- and paraquat-treated rat polymorphs.

Pectin/chitosan/tripolyphosphate encapsulation protects the rat lung from fibrosis and apoptosis induced by paraquat inhalation.

Negative impacts of microcystin-LR and glyphosate on zebrafish intestine: Linked with gut microbiota and microRNAs?

Toxicity of 2-methyl-4-chlorophenoxy acetic acid alone and in combination with cyhalofop-butyl to *Cyprinus carpio* embryos.

Transient glyphosate encephalopathy due to a suicide attempt.

CD34+ derived macrophage and dendritic cells display differential responses to paraquat.

Systemic inflammation and oxidative stress induced by inhaled paraquat in rat improved by carvacrol, possible role of PPAR γ receptors.

Effects of sulfometuron-methyl on zebrafish at early developmental stages.

Glyphosate and Polyoxyethyleneamine Ingestion Leading to Renal, Hepatic, and Pulmonary Failure.

The effect of *Zataria multiflora* hydroalcoholic extract on memory and lung changes induced by rats that inhaled paraquat.

circGLI3 Inhibits Oxidative Stress by Regulating the miR-339-5p/VEGFA Axis in IPEC-J2 Cells.

Immediate and late systemic and lung effects of inhaled paraquat in rats.

Protective Activity of Aspirin Eugenol Ester on Paraquat-Induced Cell Damage in SH-SY5Y Cells.

Pulmonary inflammatory response from co-exposure to LPS and glyphosate.

Ameliorative effect of N-acetylcysteine against glyphosate-induced hepatotoxicity in adult male albino rats: histopathological, biochemical, and molecular studies.

Atrazine Inhalation Causes Neuroinflammation, Apoptosis and Accelerating Brain Aging.

Overexpression of TOLLIP Protects against Acute Kidney Injury after Paraquat Intoxication through Inhibiting NLRP3 Inflammasome Activation Modulated by Toll-Like Receptor 2/4 Signaling.

Exposure to Atrazine Induces Lung Inflammation through Nrf2-HO1 and Beclin 1/LC3 Pathways.

Glyphosate-based herbicides: Evidence of immune-endocrine alteration.

Paraquat induces redox imbalance and disrupts glutamate and energy metabolism in the hippocampus of prepubertal rats.

Glucocorticoid with cyclophosphamide for oral paraquat poisoning.

Inflammatory state and autism-like behavioral phenotype of offspring induced by maternal exposure to low-dose chemical mixtures during pregnancy in mice.

Perinatal exposure to low doses of glyphosate-based herbicide combined with a high-fat diet in adulthood causes changes in the jejunums of mice.

Isorhynchophylline ameliorates paraquat-induced acute kidney injury by attenuating oxidative stress and mitochondrial damage via regulating toll-interacting expression.

Ground-glass hepatocellular inclusions are associated with polypharmacy.

Fluorofenidone attenuates paraquat-induced pulmonary fibrosis by regulating the PI3K/Akt/mTOR signaling pathway and autophagy.

The hepatotoxicity of atrazine exposure in mice involves the intestinal microbiota.

The effects of carbon monoxide releasing molecules on paraquat-induced pulmonary interstitial inflammation and fibrosis.

Zataria multiflora and Pioglitazone Affect Systemic Inflammation and Oxidative Stress Induced by Inhaled Paraquat in Rats.

Pendimethalin-based herbicide impairs cellular immune response and haemocyte morphology in a beneficial ground beetle.

Lipoxin A4 protects against paraquat-induced acute lung injury by inhibiting the TLR4/MyD88-mediated activation of the NF- κ B and PI3K/AKT pathways.

Chronic ciprofloxacin and atrazine co-exposure aggravates locomotor and exploratory deficits in non-target detritivore speckled cockroach (*Nauphoeta cinerea*).

Physiological and morphoanatomical effects of glyphosate in *Eugenia uniflora*, a Brazilian plant species native to the Atlantic Forest biome.

Aspirin eugenol ester ameliorates paraquat-induced oxidative damage through ROS/p38-MAPK-mediated mitochondrial apoptosis pathway.

Hemodynamic and electromechanical effects of paraquat in rat heart.

Characterizing the protracted neurobiological and neuroanatomical effects of paraquat in a murine model of Parkinson's disease.

Paraquat-activated BV-2 microglia induces neuroinflammatory responses in the neuron model through NF- κ B signaling pathway.

Mitochondrial biochemical and histopathological defects induced by the herbicide pendimethalin in tilapia fish (*Oreochromis niloticus*).

Differential impact of dose-range glyphosate on locomotor behavior, neuronal activity, gliocerebrovascular structures, and transcript regulations in zebrafish larvae.

Evaluation of the potential teratogenic and toxic effect of the herbicide 2,4-D (DMA[®] 806) in bullfrog embryos and tadpoles (*Lithobates catesbeianus*).

GardeninA confers neuroprotection against environmental toxin in a *Drosophila* model of Parkinson's disease.

Low-dose exposure of glyphosate-based herbicides disrupt the urine metabolome and its interaction with gut microbiota.

Andrographolide, an Antioxidant, Counteracts Paraquat- Induced Mutagenesis in Mammalian Cells.

Hepatotoxic Effects of Atrazine on *Clarias gariepinus* (Burchell, 1822): Biochemical and Histopathological Studies.

The use of combined high-fructose diet and glyphosate to model rats type 2 diabetes symptomatology.

Modeling paraquat-induced lung fibrosis in *C. elegans* reveals KRIT1 as a key regulator of collagen gene transcription.

Does diclofenac act like a photosynthetic herbicide on green algae? *Chlamydomonas reinhardtii* synchronous culture-based study with atrazine as reference.

Common and particular biochemical responses of *Unio tumidus* to herbicide, pharmaceuticals and their combined exposure with heating.

Inflammatory lncRNA AK039862 regulates paraquat-inhibited proliferation and migration of microglial and neuronal cells through the Pafah1b1/Foxa1 pathway in co-culture environments.

Glyphosate poisoning - a case report.

The herbicide paraquat-induced molecular mechanisms in the development of acute lung injury and lung fibrosis.

Diclofenac and atrazine restrict the growth of a synchronous *Chlamydomonas reinhardtii* population via various mechanisms.

Effects of chronic glyphosate exposure on antioxidative status, metabolism and immune response in tilapia (GIFT, *Oreochromis niloticus*).

Exposure to paraquat associated with periodontal disease causes motor damage and neurochemical changes in rats.

Cinnamaldehyde and eugenol protect against LPS-stimulated oxidative stress and inflammation in Raw 264.7 cells.

Study on the Efficacy and Safety of Ambroxol Combined with Methylprednisolone in Patients with Acute Lung Injury.

MSBA-S - A pentacyclic sulfamate as a new option for radiotherapy of human breast cancer cells.

Carnosine quenches the reactive carbonyl acrolein in the central nervous system and attenuates autoimmune neuroinflammation.

Differences in epithelial-mesenchymal-transition in paraquat-induced pulmonary fibrosis in BALB/C and BALB/C (nu/nu) nude mice.

Evidence of acrolein in synovial fluid of dogs with osteoarthritis as a potential inflammatory biomarker.

Resveratrol protects intestinal integrity, alleviates intestinal inflammation and oxidative stress by modulating AhR/Nrf2 pathways in weaned piglets challenged with diquat.

Inhibition of NLRP3 inflammasome by glibenclamide attenuated dopaminergic neurodegeneration and motor deficits in paraquat and maneb-induced mouse Parkinson's disease model.

Evaluation of prophylactic efficacy of cinnamaldehyde in murine model against *Paradendryphiella arenariae* mycotoxin tenuazonic acid-induced oxidative stress and organ toxicity.

Biofunctional chemistry and reactivity of biogenic acrolein for cancer diagnosis and therapy.

[Two case reports: chronic obstructive pulmonary disease developed in long term survived patients after acute paraquat poisoning].

Coniferyl aldehyde alleviates LPS-induced WI-38 cell apoptosis and inflammation injury via JAK2-STAT1 pathway in acute pneumonia.

Cinnamaldehyde inhibits psoriasis-like inflammation by suppressing proliferation and inflammatory response of keratinocytes via inhibition of NF- κ B and JNK signaling pathways.

Celecoxib promotes survival and upregulates the expression of neuroprotective marker genes in two different in vitro models of Parkinson's disease.

Small molecules baicalein and cinnamaldehyde are potentiators of measles virus-induced breast cancer oncolysis.

[A case of allergic cutaneous vasculitis caused by glyphosate].

Cinnamaldehyde Improves Metabolic Functions in Streptozotocin-Induced Diabetic Mice by Regulating Gut Microbiota.

[Four cases of acute diquat poisoning with prominent epileptoid seizure and literature review].

Screening the Q-markers of TCMs from RA rat plasma using UHPLC-QTOF/MS technique for the comprehensive evaluation of Wu-Wei-Wen-Tong Capsule.

Mechanistic role of antioxidants in rescuing delayed gastric emptying in high fat diet induced diabetic female mice.

Protective effect of lutein against acrolein-induced ototoxicity in rats.

Cinnamaldehyde and hesperetin attenuate TNBS-induced ulcerative colitis in rats through modulation of the JAK2/STAT3/SOCS3 pathway.

Neuroprotective effects of pomegranate (*Punica granatum* L.) juice and seed extract in paraquat-induced mouse model of Parkinson's disease.

Inhibition of Lipopolysaccharide-Induced Inflammatory and Oxidative Responses by Trans-cinnamaldehyde in C2C12 Myoblasts.

The Onset of Systemic Oxidative Stress Associated with the Accumulation of Lipid Peroxidation Product Acrolein in the Skin of Patients with Small-Vessel Vasculitis.

Protective Effects of Cinnamaldehyde on the Inflammatory Response, Oxidative Stress, and Apoptosis in Liver of *Salmonella typhimurium*-Challenged Mice.

Esophagitis dissecans superficialis associated with acute transoral paraquat poisoning: Clinical study of 15 cases.

Neuroprotective potential of cinnamon and its metabolites in Parkinson's disease: Mechanistic insights, limitations, and novel therapeutic opportunities.

[Progress in the study of pulmonary fibrosis signaling pathways caused by paraquat poisoning].

Coniferaldehyde prevents articular cartilage destruction in a murine model via Nrf2/HO-1 pathway.

Association of Agricultural, Occupational, and Military Inhalants With Autoantibodies and Disease Features in US Veterans With Rheumatoid Arthritis.

Plasma acrolein level in rheumatoid arthritis increases independently of the disease characteristics.

Suppression of Th17 cell differentiation via sphingosine-1-phosphate receptor 2 by cinnamaldehyde can ameliorate ulcerative colitis.

Thal protects against paraquat-induced lung injury through a microRNA-141/HDAC6/Î±BÎ±-NF-Î±B axis in rat and cell models.

Arenaria kansuensis attenuates pulmonary fibrosis in mice via the activation of Nrf2 pathway and the inhibition of NF-kB/TGF-beta1/Smad2/3 pathway.

Glyphosate-induced lipid metabolism disorder contributes to hepatotoxicity in juvenile common carp.

Novel FXR agonist nelumal A suppresses colitis and inflammation-related colorectal carcinogenesis.

Gallic acid exerts anti-inflammatory, anti-oxidative stress, and nephroprotective effects against paraquat-induced renal injury in male rats.

The Keap1/Nrf2-ARE signaling pathway is involved in atrazine induced dopaminergic neurons degeneration via microglia activation.

Effects of low-concentration glyphosate and aminomethyl phosphonic acid on zebrafish embryo development.

Involvement of mitochondrial fission in renal tubular pyroptosis in mice exposed to high and environmental levels of glyphosate combined with hard water.

Cytotoxic effects on cancerous and non-cancerous cells of trans-cinnamaldehyde, carvacrol, and eugenol.

The TRPA1 Agonist Cinnamaldehyde Induces the Secretion of HCO₃⁽⁻⁾ by the Porcine Colon.

Differential sensitivity of cinnamaldehyde-evoked calcium fluxes to ruthenium red in guinea pig and mouse trigeminal sensory neurons.

Anti-Enterococcus Faecalis, Cytotoxicity, Phytotoxicity, and Anticancer Studies on Clausena excavata Burum. f. (Rutaceae) Leaves.

Analogues of the Herbicide, N-Hydroxy-N-isopropylloxamate, Inhibit Mycobacterium tuberculosis Ketol-Acid Reductoisomerase and Their Prodrugs Are Promising Anti-TB Drug Leads.

Arsenic-induced lung inflammation and fibrosis in a rat model: Contribution of the HMGB1/RAGE, PI3K/AKT, and TGF- β 1/SMAD pathways.

Chrysin attenuates sodium arsenite-induced nephrotoxicity in rats by suppressing oxidative stress and inflammation.

Chemical constituents and medicinal properties of Allium species.

Aryl Hydrocarbon Receptor Repressor Is Hypomethylated in Psoriasis and Promotes Psoriasis-like Inflammation in HaCaT Cells.

Carbohydrate Sulfation As a Mechanism for Fine-Tuning Siglec Ligands.

Role of AHR Ligands in Skin Homeostasis and Cutaneous Inflammation.

Dinitramine induces cardiotoxicity and morphological alterations on zebrafish embryo development.

Aryl hydrocarbon receptor (AHR) functions in infectious and sterile inflammation and NAD⁽⁺⁾-dependent metabolic adaptation.

Potential role of dietary chitosan nanoparticles against immunosuppression, inflammation, oxidative stress, and histopathological alterations induced by pendimethalin toxicity in Nile tilapia.

Ameliorative role of rolipram, PDE-4 inhibitor, against sodium arsenite-induced vascular dementia in rats.

Computational studies on bacterial secondary metabolites against breast cancer.

The protective effect of Xanthoceras sorbifolia Bunge husks on cognitive disorder based on metabolomics and gut microbiota analysis.

An Overview: The Toxicity of *Ageratina adenophora* on Animals and Its Possible Interventions.

Sphingolipid imbalance and inflammatory effects induced by uremic toxins in heart and kidney cells are reversed by dihydroceramide desaturase 1 inhibition.

Effects of prebiotic oligofructose-enriched inulin on gut-derived uremic toxins and disease progression in rats with adenine-induced chronic kidney disease.

Promising potential of boron compounds against Glioblastoma: In Vitro antioxidant, anti-inflammatory and anticancer studies.

Cardiac toxicity assessment of pendimethalin in zebrafish embryos.

Lipid metabolism disorders associated with dioxin exposure in a cohort of Chinese male workers revealed by a comprehensive lipidomics study.

The consequences of altered microbiota in immune-related chronic kidney disease.

Transcriptome-based analysis of blood samples reveals elevation of DNA damage response, neutrophil degranulation, cancer and neurodegenerative pathways in *Plasmodium falciparum* patients.

Comparative Evaluation of Sucrosomial Iron and Iron Oxide Nanoparticles as Oral Supplements in Iron Deficiency Anemia in Piglets.

The Aryl hydrocarbon receptor mediates reproductive toxicity of polychlorinated biphenyl congener 126 in rats.

Mechanism of Gene-Environment Interactions Driving Glial Activation in Parkinson's Diseases.

Uremic endothelial-derived extracellular vesicles: Mechanisms of formation and their role in cell adhesion, cell migration, inflammation, and oxidative stress.

Fluroxypyr-1-methylheptyl ester interferes with the normal embryogenesis of zebrafish by inducing apoptosis, inflammation, and neurovascular toxicity.

Citrullinated and homocitrullinated low-density lipoprotein in rheumatoid arthritis.

2,3,7,8-Tetrachlorodibenzo-p-Dioxin (TCDD)-Inducible Poly-ADP-Ribose Polymerase (TIPARP/PARP7) Catalytic Mutant Mice (TiparpH532A) Exhibit Increased Sensitivity to TCDD-Induced Hepatotoxicity and Lethality.

Is Cenobamate the Breakthrough We Have Been Wishing for?

Fenofibrate, a peroxisome proliferator-activated receptor-alpha agonist, blocks steatosis and alters the inflammatory response in a mouse model of inflammation-dioxin interaction.

Baseline Hemoglobin, Heparin, Ferritin, and Total Body Iron Stores are Equally Strong Diagnostic Predictors of a Hemoglobin Response to 12 Weeks of Daily Iron Supplementation in Cambodian Women.

Overexpression of miR-19a and miR-20a in iPS-MSCs preserves renal function of chronic kidney disease with acute ischaemia-reperfusion injury in rat.

8-Formylpogonone B antagonizes doxorubicin-induced cardiotoxicity by suppressing heme oxygenase-1-dependent myocardial inflammation and fibrosis.

Antioxidant and food additive BHA prevents TNF cytotoxicity by acting as a direct RIPK1 inhibitor.

Oxidative stress inducers potentiate 2,3,7,8-tetrachlorodibenzo-p-dioxin-mediated pre-cardiac edema in larval zebrafish.

Agricultural Pesticides and Shingles Risk in a Prospective Cohort of Licensed Pesticide Applicators.

Associations between Exposure to Organochlorine Chemicals and Endometriosis: A Systematic Review of Experimental Studies and Integration of Epidemiological Evidence.

Paraquat lung - a rare cause of diffuse parenchymal lung disease.

Oral Ferric Maltol Does Not Adversely Affect the Intestinal Microbiome of Patients or Mice, But Ferrous Sulphate Does.

The Ability of AhR Ligands to Attenuate Delayed Type Hypersensitivity Reaction Is Associated With Alterations in the Gut Microbiota.

Analysis of the Oxidative Stress Regulon Identifies *soxS* as a Genetic Target for Resistance Reversal in Multidrug-Resistant *Klebsiella pneumoniae*.

Gene expression profile analysis and target gene discovery of *Mycobacterium tuberculosis* biofilm.

Regulated hypothermia in response to endotoxin in birds.

Can curcumin supplementation reduce plasma levels of gut-derived uremic toxins in hemodialysis patients? A pilot randomized, double-blind, controlled study.

Inulin supplementation ameliorates hyperuricemia and modulates gut microbiota in Uox-knockout mice.

[Aryl hydrocarbon receptor modulates airway inflammation in mice with cockroach allergen-induced asthma by regulating Th17/Treg differentiation].

[Risk factors associated with acute kidney injury caused by pesticide poisoning].

Role of Endocrine-Disrupting Chemicals in the Pathogenesis of Non-Alcoholic Fatty Liver Disease: A Comprehensive Review.

Pathology of salivary gland dysfunction and restoration of function.

Klebsiella pneumoniae carbapenemase (KPC) in urinary infection isolates.

Non-targeted metabolomics analyses by mass spectrometry to explore metabolic stress after six training weeks in high level swimmers.

COPD-derived fibroblasts secrete higher levels of senescence-associated secretory phenotype proteins.

Nutritional Intervention with Dried Bonito Broth for the Amelioration of Aggressive Behaviors in Children with Prenatal Exposure to Dioxins in Vietnam: A Pilot Study.

Dietary Strategies for Management of Metabolic Syndrome: Role of Gut Microbiota Metabolites.

Circulating short and medium chain fatty acids are associated with normoalbuminuria in type 1 diabetes of long duration.

Benzo(a)pyrene Enhanced Dermatophagoides Group 1 (Der f 1)-Induced TGF β ¹ Signaling Activation Through the Aryl Hydrocarbon Receptor-RhoA Axis in Asthma.

Rapamycin Alleviates 2,3,7,8-Tetrachlorodibenzo-p-dioxin-Induced Aggravated Dermatitis in Mice with Imiquimod-Induced Psoriasis-Like Dermatitis by Inducing Autophagy.

Ephedra Herb, Mao, Inhibits Antigen-Induced Mast Cell Degranulation by Induction of the Affinity Receptor for IgE Internalization.

Protective effect of toll-interacting protein overexpression against paraquat-induced lung injury in mice and A549 cells through inhibiting oxidative stress, inflammation, and NF- κ B signaling pathway.

Regulation of Mitochondrial Function by Epac2 Contributes to Acute Inflammatory Hyperalgesia.

Influences of Selenium-Enriched Yeast on Growth Performance, Immune Function, and Antioxidant Capacity in Weaned Pigs Exposure to Oxidative Stress.

Microbial metabolism of L-tyrosine protects against allergic airway inflammation.

Insulin, Not the Preservative m-cresol, Instigates Loss of Infusion Site Patency Over Extended Durations of CSII in Diabetic Swine.

Attenuation of sodium arsenite-induced cardiotoxicity and neurotoxicity with the antioxidant, anti-inflammatory, and antiapoptotic effects of hesperidin.

The Role of Gut Bacterial Metabolites in Brain Development, Aging and Disease.

AhR Ligands Differentially Regulate miRNA-132 Which Targets HMGB1 and to Control the Differentiation of Tregs and Th-17 Cells During Delayed-Type Hypersensitivity Response.

Pharmacological inhibition of catalase induces peroxisome leakage and suppression of LPS induced inflammatory response in Raw 264.7 cell.

The Aryl Hydrocarbon Receptor Attenuates Acute Cigarette Smoke-Induced Airway Neutrophilia Independent of the Dioxin Response Element.

The relationship of indoxyl sulfate and p-cresyl sulfate with target cardiovascular proteins in hemodialysis patients.

Mechanisms involved in the possible protective effect of chrysin against sodium arsenite-induced liver toxicity in rats.

A Positive Relationship between Exposure to Heavy Metals and Development of Chronic Diseases: A Case Study from Chile.

The aryl hydrocarbon receptor and the gut-brain axis.

Arsenite suppresses IL-2-dependent tumoricidal activities of natural killer cells.

TCDD attenuates EAE through induction of FasL on B cells and inhibition of IgG production.

Adverse effects of iron deficiency anemia on pregnancy outcome and offspring development and intervention of three iron supplements.

The impact of dextran sodium sulphate and probiotic pre-treatment in a murine model of Parkinson's disease.

Exposure of Environmental Contaminants and Development of Neurological Disorders.

Toxin-Related Acute Kidney Injury.

Protein-Bound Uremic Toxins and Immunity.

Why is the Incidence of Type 1 Diabetes Increasing?

Biological Therapies for Atopic Dermatitis: A Systematic Review.

Catalase deficiency induces reactive oxygen species mediated pexophagy and cell death in the liver during prolonged fasting.

Effects of Probiotic Preparations on Inflammatory Cytokines in Chronic Kidney Disease Patients: A Systematic Review and Meta-Analysis.

TriTACs, a Novel Class of T-Cell-Engaging Protein Constructs Designed for the Treatment of Solid Tumors.

Associations Between Residential Exposure to Volatile Organic Compounds and Liver Injury Markers.

The Improvement of the Adaptation Process of Tocopherol and Acetylsalicylic Acid in Offspring of Mothers Exposed to TCDD.

MicroRNA-based host response to toxicant exposure is influenced by the presence of gut microbial populations.

Could Mesna and Celery Seed Cotherapy Modulate Oxidative Stress and Inflammation of the Urinary Bladder Induced by Ifosfamide in Rabbits?

Antioxidant, anti-inflammatory and protective potential of gallic acid against paraquat-induced liver toxicity in male rats.

Effects of Acute 2,3,7,8-Tetrachlorodibenzo-p-Dioxin Exposure on the Circulating and Cecal Metabolome Profile.

The Role of Bacterial-Derived Aromatic Amino Acids Metabolites Relevant in Autism Spectrum Disorders: A Comprehensive Review.

Cytokine changes in fatal cases of paraquat poisoning.

Arsenic exposure induces a bimodal toxicity response in zebrafish.

Low-Dose Cyclophosphamide Induces Nerve Injury and Functional Overactivity in the Urinary Bladder of Rats.

An injectable anti-microbial and adhesive hydrogel for the effective noncompressible visceral hemostasis and wound repair.

Absence of prostacyclin greatly relieves cyclophosphamide-induced cystitis and bladder pain in mice.

Effects of TI(+) on the inner membrane thiol groups, respiration, and swelling in succinate-energized rat liver mitochondria were modified by thiol reagents.

Impact of whole-body versus nose-only inhalation exposure systems on systemic, respiratory, and cardiovascular endpoints in a 2-month cigarette smoke exposure study in the ApoE(-/-) mouse model.

[Vigilance against a highly lethal insecticide chlorfenapyr poisoning (report of 4 cases and literature review)].

The AST-120 Recovers Uremic Toxin-Induced Cognitive Deficit via NLRP3 Inflammasome Pathway in Astrocytes and Microglia.

Transcriptional profiling of Chinese hamster ovary (CHO) cells exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD).

GDNF requires HIF-1 α and RET activation for suppression of programmed cell death of enteric neurons by metabolic challenge.

Borate and boric acid supplementation of drinking water alters teeth and bone mineral density and composition differently in rabbits fed a high protein and energy diet.

Perinatal Resveratrol Therapy to Dioxin-Exposed Dams Prevents the Programming of Hypertension in Adult Rat Offspring.

Effect of paraquat on cytotoxicity involved in oxidative stress and inflammatory reaction: A review of mechanisms and ecological implications.

Benoxacor caused developmental and cardiac toxicity in zebrafish larvae.

Pelargonic acid vanillylamide and rosuvastatin protect against oxidized low-density lipoprotein-induced endothelial dysfunction by inhibiting the NF- κ B/NLRP3 pathway and improving cell-cell junctions.

Cutaneous Effects of In Utero and Lactational Exposure of C57BL/6J Mice to 2,3,7,8-Tetrachlorodibenzo-p-dioxin.

Applicability of *Enchytraeus bulbosus* as a model species in ecotoxicology and risk assessment.

A new approach using a numerical diagnostic criterion for vitiligo diagnosis with HMB-45 and Melan-A staining.

Characterization of human sulfotransferases catalyzing the formation of p-cresol sulfate and identification of mefenamic acid as a potent metabolism inhibitor and potential therapeutic agent for detoxification.

P2X7 Receptor Blockade Protects Against Acrolein-Induced Bladder Damage: A Potential New Therapeutic Approach for the Treatment of Bladder Inflammatory Diseases.

Effects of sublethal concentration of metamifop on hepatic lipid metabolism in adult zebrafish (*Danio rerio*).

Mechanistic Investigation of Xuebijing for Treatment of Paraquat-Induced Pulmonary Fibrosis by Metabolomics and Network Pharmacology.

Potential secondary metabolite from Indonesian Actinobacteria (InaCC A758) against *Mycobacterium tuberculosis*.

Fine particulate matter air pollution and aortic perivascular adipose tissue: Oxidative stress, leptin, and vascular dysfunction.

The impact of vaping on ocular health: a literature review.

Arsenic-induced uterine apoptotic damage is protected by ethyl acetate fraction of *Camellia sinensis* (green tea) via Bcl-2-BAX through NF- κ B regulations in Wistar rats.

Effects of Coated Cysteamine on Oxidative Stress and Inflammation in Weaned Pigs.

Scarlet Flax *Linum grandiflorum* (L.) In Vitro Cultures as a New Source of Antioxidant and Anti-Inflammatory Lignans.

Can kissing cause paraquat poisoning: A case report and review of literature.

Resveratrol Attenuates Diquat-Induced Oxidative Stress by Regulating Gut Microbiota and Metabolome Characteristics in Piglets.

The Aryl Hydrocarbon Receptor Suppresses Chronic Smoke-Induced Pulmonary Inflammation.

Acute Administration of Bioavailable Curcumin Alongside Ferrous Sulphate Supplements Does Not Impair Iron Absorption in Healthy Adults in a Randomised Trial.

Metagenomic and phytochemical analyses of kefir water and its subchronic toxicity study in BALB/c mice.

Protective and therapeutic effect of hydrogen sulfide on hemorrhagic cystitis and testis dysfunction induced with cyclophosphamide.

Injectable hydrogels based on oxidized alginate-gelatin reinforced by carbon nitride quantum dots for tissue engineering.

Autonomic and cholinergic mechanisms mediating cardiovascular and temperature effects of donepezil in conscious mice.

The endocrine disrupting effects of sodium arsenite in the rat testis is not mediated through macrophage activation.

Phytotoxic property of metabolites isolated from *Garcinia gardneriana*.

Xanthohumol prolongs lifespan and decreases stress-induced mortality in *Drosophila melanogaster*.

Evaluation of pentoxifylline and ferrous sulfate for treatment of lower limb venous ulcers.

Role of Fucoidan on the Growth Behavior and Blood Metabolites and Toxic Effects of Atrazine in Nile Tilapia *Oreochromis niloticus* (Linnaeus, 1758).

Hidroxi (H[®]) Counteracts Cyclophosphamide-Induced Male Infertility through NRF2 Pathways in a Mouse Model.

Resveratrol in Rodent Models of Parkinson's Disease: A Systematic Review of Experimental Studies.

Comparison of Pancreatic Damage in Rats for Two Methods of Paraquat Administration.

Exposures to 2,4-Dichlorophenoxyacetic acid with or without endotoxin upregulate small cell lung cancer pathway.

Complex Coronary Instant Chronic Total Occlusion Lesions: Oxidative Stress, Inflammation, and Coronary Stent Lengths.

Combined Ubisyl-Q(10) and Ashwagandha Root Extract Target Multiple Biochemical Mechanisms and Reduces Neurodegeneration in a Paraquat-Induced Rat Model of Parkinson's Disease.

In vitro and in vivo digestion of red cured cooked meat: oxidation, intestinal microbiota and fecal metabolites.

Detoxification of Reactive Aldehydes by Alda-1 Treatment Ameliorates Experimental Autoimmune Encephalomyelitis in Mice.

HGF-Modified Dental Pulp Stem Cells Mitigate the Inflammatory and Fibrotic Responses in Paraquat-Induced Acute Respiratory Distress Syndrome.

Computational exploration and anti-mycobacterial activity of potential inhibitors of Mycobacterium tuberculosis acetyl coenzyme A carboxylase as anti-tubercular agents.

Oxidative testicular injury: effect of L-leucine on redox, cholinergic and purinergic dysfunctions, and dysregulated metabolic pathways.

Benfuresate induces developmental toxicity in zebrafish larvae by generating apoptosis and pathological modifications.

Selective beta-cell toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin on isolated pancreatic islets.

Quercetin Alleviates Oxidative Damage by Activating Nuclear Factor Erythroid 2-Related Factor 2 Signaling in Porcine Enterocytes.

2,4-Dichlorophenoxyacetic Acid Poisoning Mimicking as Organophosphorus Poisoning.

Acute 2,3,7,8-Tetrachlorodibenzo-p-dioxin exposure in adult mice does not alter the morphology or inflammatory response of cortical microglia.

Oxidative Stress and Lipid Mediators Modulate Immune Cell Functions in Autoimmune Diseases.

Azadirachta indica A. Juss. In Vivo Toxicity-An Updated Review.

Protective effect of melatonin against herbicides-induced hepatotoxicity in rats.

Chlorogenic acid abates male reproductive dysfunction in arsenic-exposed mice via attenuation of testicular oxido-inflammatory stress and apoptotic responses.

Renal tubular injury induced by glyphosate combined with hard water: the role of cytosolic phospholipase A2.

Pro-inflammatory Mediators and Oxidative Stress: Therapeutic Markers for Recurrent Angina Pectoris after Coronary Artery Stenting in Elderly Patients.

Effects of cyhalofop-butyl on the developmental toxicity and immunotoxicity in zebrafish (*Danio rerio*).

Tetrachlorobisphenol A induced immunosuppression and uterine injury in mice.

Catecholic alkaloid sulfonates and aromatic nitro compounds from *Portulaca oleracea* and screening of their anti-inflammatory and anti-microbial activities.

Associations of PCBS, dioxins and furans with follicle-stimulating hormone and luteinizing hormone in postmenopausal women: National Health and Nutrition Examination Survey 1999-2002.

Roundup causes embryonic development failure and alters metabolic pathways and gut microbiota functionality in non-target species.

The impact and toxicity of glyphosate and glyphosate-based herbicides on health and immunity.

Mucosal-associated invariant T-Cell (MAIT) activation is altered by chlorpyrifos- and glyphosate-treated commensal gut bacteria.

[Protective effects of taurine on neurons and microglia in Parkinson's disease-like mouse model induced by paraquat].

Acrolein: A Potential Mediator of Oxidative Damage in Diabetic Retinopathy.

A rabbit model for evaluating ocular damage from acrolein toxicity in vivo.

Effects of tacrolimus on the TGF β 1/SMAD signaling pathway in paraquat-exposed rat alveolar type II epithelial cells.

Reduced Dpp expression accelerates inflammation-mediated neurodegeneration through activated glial cells during altered innate immune response in *Drosophila*.

Urinary crystal formation and urothelial effects of pyroxasulfone administered to male rats.

Ocreotide alleviates pancreatic damage caused by paraquat in rats by reducing inflammatory responses and oxidative stress.

Effect of fomesafen on the embryonic development of zebrafish.

Knockdown of TLR4 Represses the Paraquat-Induced Neuroinflammation and Microglial M1 Polarization.

Transcriptome analysis of *Penaeus vannamei* hepatopancreas reveals differences in toxicity mechanisms between phoxim and prometryne.

Depletion of NK cells attenuates paraquat-induced acute lung injury by manipulating macrophage polarization.

Paraquat increases Interleukin-1 β in hippocampal dentate gyrus to impair hippocampal neurogenesis in adult mice.

Orthotopic foetal lung tissue direct injection into lung showed a preventive effect against paraquat-induced acute lung injury in mice.

Does pendimethalin develop in pancreatic cancer induced inflammation?

The MUC5B Mucin Is Involved in Paraquat-Induced Lung Inflammation.

[Treatment of "hydration therapy" for acute paraquat poisoning].

Systems Genetics and Systems Biology Analysis of Paraquat Neurotoxicity in BXD Recombinant Inbred Mice.

Haloxypop-P-methyl induces developmental defects in zebrafish embryos through oxidative stress and anti-vasculogenesis.

Embryotoxicity of atrazine and its degradation products to early life stages of zebrafish (*Danio rerio*).

[Study on the protective effect and mechanism of somatostatin on renal injury in paraquat intoxicated mice].

Exploration of therapeutic role of montelukast and dexamethasone combination against paraquat induced inhalational toxicity.

Glyphosate induces lymphocyte cell dysfunction and apoptosis via regulation of miR-203 targeting of PIK3R1 in common carp (*Cyprinus carpio* L.).

Glyphosate exposure induces inflammatory responses in the small intestine and alters gut microbial composition in rats.
